Kuntze; *Pusaetha entada* Kuntze)

India. Perennial climbing shrub, liana, woody, yellowish white flowers in axillary pendulous spikes, reddish brown woody pods, cut seeds fried soaked and eaten

See *Species Plantarum* 1: 518. 1753, *Flora Jamaicaensis* 22. 1759, *Species Plantarum*, Editio Secunda 2: 1501. 1763, *Species Plantarum*. Editio quarta 4(2): 1057–1058. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 424–425. 1825, *Systema Vegetabilium*, editio decima sexta 2: 325. 1825, *Fl. Filip.* [F.M. Blanco] 353. 1837, *Sylva Telluriana* 118. 1838, *Journal of Botany, being a second series of the Botanical Miscellany* (Hooker) 4(30): 332. 1841, *Revisio Generum Plantarum* 1: 204. 1891, *Annual Report of the Missouri Botanical Garden* 4: 82. 1893, *Helios* 11(9): 134. 1893 and *Formosan Trees* 195. 1917, *J. Bot.* 58: 195. 1920, *Flora of Jamaica*, Containing Descriptions of the Flowering Plants Known from the Island 4: 124. 1920, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18(2): 487–559. 1937, *Sargentia* 8: 137. 1949, *Ann. Missouri Bot. Gard.* 37(2): 184–314. 1950, *Bulletin de la Société Botanique de France* 99(1–3): 46. 1952, *Notes from the Royal Botanic Garden, Edinburgh* 37(2): 348–350. 1979, *Journal of Taiwan Museum* 38: 76. 1985, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Fl. Yunnanica* 10: 289. 2006

(Used in Ayurveda and Sidha. Toxins. Saponin in bark and seeds. Stem and root powder for diarrhea. Juice from bark and wood applied to relieve ulcers. For snakebite and stomachache,

seed infusion drunk. Seed paste useful in paralysis, toothache, mumps, rubbed on the affected part, applied over boils for suppuration; seed powder soaked in water and given for chest pain and to reduce weight; seed pulp taken to cure stomachache and other digestive problems; paste from seed powder mixed with sugar applied over swellings. Leaves or roots decoction given in chest pain, lumbago and colic. Magico-religious beliefs, twigs kept in cattle shed to ward off diseases. Veterinary medicine, seed paste applied to cure inflammatory glandular swellings. Seeds and leaves juice as fish poison; crushed leaves of *Entada pursaetha* used to stupefy fish.)

in English: elephant creeper, snuff-box bean

in Pacific: bagogo, bayogon dangkulo, lodusong

in China: guo jiang long, yan jing dou

in India: arsa, barabi, chappe kayi, chhui, chian, cilla, deosiadi, dodda ganapi balli, doddakampi, entada, gaarabeej, gaarambi, ganape kaayi, gardaala, ghila, gila, gilatheege, gilla teega, haale balli, halle kaai balli, hanuma loha, hanuman maur, hanuman mura, hanumanmura, irikki, ka nup, kakkumkai, kawi, kawihru, konda chinta, makku, mei jynriew, mei nap, mei nop, nallatheega, pangra, paranda, peddamadupu, perim-kaku-valli, samudrapuliyani, sarini, shuri, taekathivva, tikka tivva, tille nop, vewu, yaanai kazharchi kaai, yanna pullian, yenugu chinta, yerratheega

in Madagascar: vahankarabo, vaheamiolana, vaheasolana, vahebe, vahinikarabo, vahinkarebao, vihinkarabo, voankarabo, voheankarabo

Entada spiralis Ridl. (*Entada schefferi* sensu auct.; *Entada scheffleri* Ridl.)

Indonesia. Perennial non-climbing shrub

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 67: 305. 1898 and *J. Bot.* 58: 195. 1920

(For abdominal complaints, burn the plant, collect the ashes, rub them over the body.)

Malay name: beluru

Entada stuhlmannii (Taub.) Harms (*Entadopsis stuhlmannii* (Taub.) Pedro; *Pusaetha stuhlmannii* Taub.)

Tanzania. Perennial climbing shrub

See *Revisio Generum Plantarum* 1: 204. 1891 and *Die Vegetation der Erde* 9, *Pflanzenw. Afr.* 3(1): 401. 1915, *Journal of Ethnopharmacology* 29: 295–323. 1990

(Paste to reduce swellings; roots decoction aphrodisiac. Veterinary medicine, lactogenic.)

in Tanzania: mmehagona, mgosinkagona

Entandrophragma C. DC. Meliaceae

From the Greek *en* 'in', *aner*, *andros* 'male' and *phragma* 'a partition, compartment, wall'. Stamens partly or completely

fused to form a staminal tube, a distinctive tube, an urceolate or funnellform tube; the lower part of the staminal tube is divided into small compartments. See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 4, 20. 1760, *Bulletin de l'Herbier Boissier* 2(9): 582–583. 1894, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 153. 1895.

Entandrophragma angolense (Welw.) C. DC. (*Entandrophragma angolense* C. DC.; *Entandrophragma leplaei* Vermeesen; *Entandrophragma macrophyllum* A. Chev.; *Entandrophragma rederi* Harms; *Swietenia angolensis* Welw.; *Swietenia angolensis* Welw. ex C. DC.)

Tropical Africa. Tree, slash reddish, inflorescence an axillary or terminal panicle, dark pendulous cylindrical capsule

See *Apontamentos Phytogeographicos* 587. 1859 [Dec 1858 publ. Dec 1859], *Bulletin de l'Herbier Boissier* 2: 582, t. 21. 1894 and *Bulletin of Miscellaneous Information Kew* 1908(6): 257–258. 1908, *Vég. Utiles Afrique Trop. Franç.* v. 196. 1909, *Notizbl. Königl. Bot. Gart. Berlin* 5: 184. 1910, *Bulletin of Miscellaneous Information Kew* 1910(6): 180. 1910, *Rev. Zool. Afr.* ix. Suppl. Bot. 48. 1921, *Phytotherapy Research* 8(1): 46–48. 1994, *Biological and Pharmaceutical Bulletin* 24(4): 364–367. 2001, *Pharmacology and Toxicology* 91(2): 71–76. 2002, *African Journal of Traditional, Complementary and Alternative Medicines* 4(2): 135–139. 2007

(Bark antiplasmodial, spasmolytic, sedative, analgesic, a decoction drunk to treat fever, applied for stomachache, arthritis, rheumatism, swellings, ulcers, gastric ulcers, earache and ophthalmia, kidney troubles.)

in English: Tiama mahogany

in Central African Republic: mokanja, mokanda, mokanga, tiama

in Zaire: ngone

Entandrophragma candollei Harms (*Entandrophragma ferrugineum* A. Chev.)

Tropical Africa. Tree, inflorescence an axillary or terminal panicle, dark pendulous cylindrical capsule

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 1: 181. 1896 and *Les végétaux Utiles de l'Afrique Tropical Française* 5: 195. 1909, *Journal of Agricultural and Food Chemistry* 51(25): 7271–7275. 2003, *West African Journal of Pharmacology and Drug Research* 21(1): 39–42. 2005

(Bark bitter, antifeedant, antiplasmodial; sap applied for stomachache, arthritis, rheumatism, swellings, ulcers, gastric ulcers, earache and ophthalmia, kidney troubles; sap of the root bark applied to snakebites.)

in English: heavy mahogany, heavy sapele, West African cedar

in Cameroon: meli

in Central African Republic: mokanja, mokanda, mokanga

Entandrophragma cylindricum (Sprague) Sprague (*Entandrophragma cylindricum* Sprague; *Entandrophragma cylindricum* (Sprague) Sprague & Hoyle; *Pseudocedrela cylindrica* Sprague)

Tropical Africa. Tree, pinkish red slash, cedar-like smell, inflorescence an axillary or terminal panicle, fruit a dark pendulous cylindrical capsule, seeds dispersed by wind

See *Apontamentos Phytogeographicos* 587. 1859, *Bulletin de l'Herbier Boissier* 2: 582, t. 21. 1894 and *Bulletin of Miscellaneous Information Kew* 1908(6): 257–258. 1908, *Bulletin of Miscellaneous Information Kew* 1910(6): 180. 1910, *Bull. Misc. Inform. Kew* 1932, 40. cum descr. ampl. 1932, *Journal of Essential Oil Research* 11(2): 173–175. 1999

(Bark decoctions taken to treat bronchitis, lung complaints, colds, edema, bark pulp applied externally to furuncles and wounds. Bark extract insect repellent, botanical insecticide.)

in English: sapele mahogany, sapelli mahogany, scented mahogany, West African cedar

in Central African Republic: boyo, mokanja, mokanda, mokanga, tiama

in Gabon: sapelli

in Zaire: poyu

Entandrophragma utile (Dawe & Sprague) Sprague (*Entandrophragma macrocarpum* A. Chev.; *Pseudocedrela utilis* Dawe & Sprague)

Tropical Africa. Tree, unpleasant smell of the slash, gorillas eat the leaves

See *Journal of the Linnean Society, Botany* 37: 511. 1906 [1904–1906 publ. 1906], *Les végétaux Utiles de l'Afrique Tropical Française* 5: 203. 1909, *Bulletin of Miscellaneous Information Kew* 1910: 180. 1910

(Stem bark for diabetes, antiseptic, wound dressing, sores.)

in English: scented mahogany

in Cameroon: aseng assié, bokilo, bokula, kakale, koukindjok, koukinjok, lese, timbi, wo

in Central African Republic: goi, goy

in Congo: kalungi, libuyu

in Central Africa: bokilo, bokoi, bokoie

in Gabon: assi, kosi kosi

in Ghana: afrobrodiju, sapele, sapeli

in Ivory Coast: sipo, mebrou, n'guissou

in Nigeria: sapele, sapeli; ijebu (Yoruba); okeong (Igbo, Awka); akuk (Boki)

in Sierra Leone: njeli

in Uganda: miovu

in W. Africa: ogipogo

in Yoruba: igedu, ijebu

Enterolobium Martius Fabaceae (Ingeae, Mimosaceae)

From the Greek *enteron* ‘intestine’ and *lobos* ‘pod’, perhaps referring to the material inside the pod; in *Flora oder allgemeine Botanische Zeitung*. 20(2): 117. 1837, *Annals of the New York Academy of Sciences* 7: 102. 1893 and *N. Amer. Fl.* 23(1): 1–76. 1928, *Ann. New York Acad. Sci.* 35: 101–208. 1936, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18 (2): 487–559. 1937, *Ann. Missouri Bot. Gard.* 37(2): 184–314. 1950, *Phytologia* 13 (6): 379–400 1966, *Candollea* 36 (2): 301–333. 1981, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Ceiba* 44(2): 105–268. 2003 [2005].

Enterolobium contortisiliquum (Vell.) Morong (*Acacia melalobiata* Rojas Acosta; *Acacia saponaria* Heyne ex Benth., nom. nud.; *Calliandra pacara* Griseb.; *Enterolobium contortisiliquum* (Vell.) Hauman; *Enterolobium glaucescens* Mart.; *Enterolobium guaraniticum* (Chodat & Hassl.) Hassl.; *Enterolobium tamboril* Mart.; *Enterolobium timbouva* Mart.; *Enterolobium timbouva* Benth.; *Enterolobium timbouva* fo. *minor* Hoehne; *Enterolobium timbouva* var. *canescens* Benth.; *Feuilleea contortisiliqua* (Vell.) Kuntze; *Feuilleea pacara* (Griseb.) Kuntze; *Mimosa contortisiliqua* Vell.; *Pithecellobium guaraniticum* Chodat & Hassl.)

South America. Perennial non-climbing tree

See *Florae Fluminensis* 11: pl. 25. 1827[1831], *Flora* 20(2, Beibl.): 117, 128. 1837, *Transactions of the Linnean Society of London* 30(3): 531. 1875, *Symbolae ad Floram Argentinam* 123. 1879, *Revisio Generum Plantarum* 1: 185, 188. 1891, *Annals of the New York Academy of Sciences* 7: 102. 1893 and *Anales de Sociedad Científica Argentina* 87: 168. 1919, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953

(Bark as fish poison.)

in China: qing pi xiang er dou

in South America: oreja de negro, orelha-de-macaco, orelha-de-negro, pacar, paracá, pau-de-sabão, tambori, tamboril, tamboril-do-campo, tamburé, timbaúva, timbó

Enterolobium cyclocarpum (Jacq.) Griseb. (*Albizia longipes* Britton & Killip; *Enterolobium cyclocarpa* (Jacq.) Griseb.; *Feuilleea cyclocarpa* (Jacq.) Kuntze; *Inga cyclocarpa* (Jacq.) Willd.; *Mimosa cyclocarpa* Jacq.; *Mimosa parota* Sessé & Moc.; *Pithecellobium cyclocarpum* (Jacq.) Mart.; *Prosopis dubia* Kunth; *Prosopis dubia* Guill. & Perr., nom. illeg.)

in Central and South America. Perennial non-climbing tree

See *Fragmenta Botanica* 30, pl. 34, f. 1. 1801, *Species Plantarum*. Editio quarta 4(2): 1026. 1806, *Nova Genera et*

Species Plantarum [H.B.K.] (quarto ed.) 6: 309. 1823, *Flora* 20(2, Beibl.): 115. 1837, *Flora of the British West Indian Islands* 226. 1860, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 1, app. 177. 1890, *Revisio Generum Plantarum* 1: 184, 187. 1891 and *Annals of the New York Academy of Sciences* 35(3): 132. 1936

(For bronchitis, common cold, tuberculosis. Piscicide.)

in English: earpod-tree, elephant’s ear, monkey soap

in Latin America: anjera, carito, guanacaste, oreja, orejero, yaga chibe

in China: xiang er dou

Enteropogon Nees Poaceae (Gramineae)

From the Greek *enteron* ‘intestine’ and *pogon* ‘beard’, probably referring to the bearded callus or to the beards in the axils of the spikes, very closely related to and often confused with *Chloris* Sw.; see *Essai d’une Nouvelle Agrostographie* 41, 71, 74, 84, 164, 167, 176. 1812, John Lindley (1799–1865), *A natural system of botany*. Second edition, with numerous additions and corrections, and a complete list of genera, with their synonyms. 381, 448, 485. London 1836, *Tentamen Fl. Abyss.* 2: 408. 1850 and *Contrib. U.S. Nat. Herbarium* 18: 378. 1917, *Kew Bulletin* 21: 105–110. 1967, D.E. Anderson, “Taxonomy of the genus *Chloris* (Gramineae).” *Brigham Young University Science Bulletin: Biological Series* 19(2): 1–133. 1974, *Taxon* 33: 126–134. 1984, *Journal of Cytology and Genetics* 20: 205–206. 1985, *Telopea* 3: 217–221. 1988, *Flora Mesoamericana* 6: 289. 1994, *Austral Ecology* 25(2): 140–149. 2000, *Flora of Ecuador* 68: 103–105. 2001, *Contributions from the United States National Herbarium* 41: 78–79, 139, 193. 2001, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, “Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications.” *Botanical Journal of the Linnean Society* 148(1): 57–72. 2005.

Enteropogon dolichostachyus (Lag.) Keng ex Lazarides (*Chloris digitata* (Roxb.) Steud.; *Chloris dolichostachya* Lag.; *Chloris incompleta* Roth; *Chloris incompleta* Roth ex Roem. & Schult.; *Chloris panicea* Willd.; *Chloris radiata* Heyne ex Roth, nom. illeg., non *Chloris radiata* (L.) Sw.; *Chloris roxburghii* Edgew.; *Chloris tetrameris* Trin.; *Enteropogon dolichostachyus* (Lag.) Keng; *Lophacme incompleta* (Roth) Chiov.; *Melica digitata* Roxb.)

China, India, Sri Lanka, SE Asia, Thailand, Afghanistan, Australia. Perennial, terete or compressed, tufted, robust, tussock-forming, ascending or scrambling, erect or procumbent, branched, wiry, cylindrical, smooth, sometimes rooting at the lower nodes, fodder grass, eaten by cattle before flowering, similar to *Enteropogon acicularis* and *Enteropogon minutus*

See *Species Plantarum*. Editio quarta 4: 923. 1806, *Encyclopédie Méthodique. Botanique ... Supplément* 2:

236. 1811, *Genera et species plantarum* 5. 1816, *Systema Vegetabilium* 2: 607. 1817, *Flora Indica; or descriptions ...* 1: 328. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 64. 1821, *Novae Plantarum Species* 61. 1821, *Gram. Unifl. Sesquifl.* 235. 1824, *Journal of the Asiatic Society of Bengal* 21: 183. 1851, *Synopsis Plantarum Glumacearum* 1: 207. 1854, *Flora Capensis* 7(2): 316. 1898 and *Handb. Fl. Ceylon* 5: 275. 1900, *Annuario del Reale Istituto Botanico di Roma* 8: 350. 1908, *Grasses of Ceylon* 88. 1956, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 197. 1957, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 466. 1960, *Australian Journal of Botany, Supplementary Series* 5: 31. 1972

(Used in Ayurveda.)

in India: bamna, bansi, hika gadi, kanthari gadi, maituwa, manthanaka, mathaniya, melamalai hullu, sainder, tekhadia, tikativva

Enteropogon macrostachyus (Hochst. ex A. Rich.) Munro ex Benth. (*Chloris macrostachya* Hochst. ex A. Rich.; *Chloris simplex* Schumach.; *Enteropogon macrostachyus* K. Schum. ex Engl.; *Enteropogon macrostachyus* (A. Rich.) Benth.; *Enteropogon simplex* (Schumach.) A. Chev.; *Macrostachya abyssinica* Hochst.; *Megastachya abyssinica* Steud.; *Megastachya abyssinica* Hochstätter ex Steud.)

Tropical Africa, Namibia, tropical Arabia. Perennial bunchgrass or annual, erect, densely tufted, leafy, termitophile, leaves finely pointed, good seeder, good drought tolerance, thatching grass, useful for erosion control, palatable, good grazing, growing in semi-arid climates, *Acacia* bushland

See *Beskrivelse af Guineiske planter* 54. 1827, *Tentamen Florae Abyssinicae ...* 2: 408. 1850, *Synopsis Plantarum Glumacearum* 1: 203. 1854, *Journal of the Linnean Society, Botany* 19: 101. 1881, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 31. 1894 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 14(150): 125. 1934

(Leaves decoction for trypanosomiasis.)

in English: bush rye, mopane grass, needle grass

in Kenya: lkujita-ong

Enydra Lour. Asteraceae

Greek *en* 'in' and *hydor* 'water', referring to the habitat, wet places; see J. de Loureiro, *Flora cochinchinensis*. 2: 510–511. 1790, *Genera Plantarum* 570. 1791, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 636. 1836.

Enydra fluctuans Lour. (*Enydra anagallis* Gardner; *Meyera fluctuans* (Lour.) Spreng.; *Meyera fluctuans* Spreng.)

India, Tropics. Perennial creeping herb, glabrous, reddish, succulent, erect or decumbent, branched, stoloniferous,

rooting at lower part, stem fistular elongate, sessile axillary flower heads, white or yellowish white florets, oblong compressed achenes, leaves eaten as vegetables

See *Familles des Plantes* 2: 257. 1763, *Flora Cochinchinensis* 2: 511. 1790, *Fl. Cochinch.* ed. 2, 2: 625. 1793, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 602. 1826, *London Journal of Botany* 7: 409. 1848

(Used in Ayurveda. Tender shoots laxative, antibilious, for skin diseases, gonorrhoea, piles, hysteria. Leaves antibilious, demulcent, laxative, used in skin, liver and nervous diseases, anasarca, ascites, dropsy, snakebite; leaf paste applied to cure ulcers and skin diseases.)

in English: water cress

in India: achari, bramhi, chakrangi, halasi, harhuch, harkuch, haruch, helanchi, helencha, helonchi sak, hidmircha, hila-mochika, himamocika, hinch, hinche, hingcha, jalabramhi, komprek-tujombi, mambi, matsyakshi, matsyangi, mochi, rochi, sasasrutih, shankhadhara, trinittaparni, vishaghni

Epaltes Cass. Asteraceae

From the Greek *epalthes* 'healing', *epaltheo* 'to heal, cure', referring to the root of an Indian species, used as a tonic; see *Mantissa Plantarum* 1: 110. 1767, A.H.G. de Cassini (1781–1832), in *Bull. Sci. Soc. Philom. Paris*. 1818: 139. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 140. 1837, *Fragmenta Phytographiae Australiae* 2(16): 154–155. 1861, *Naturwissenschaftliche Reise nach Mossambique ...* 2: 453–454, 457–458. 1864, *Compositae Indicae* 151. 1876, *Fragmenta Phytographiae Australiae* 10(86): 100. 1877.

Epaltes gariepina (DC.) Steetz (*Epaltes alata* (Sond.) Steetz; *Erigerodes gariepinum* (DC.) Kuntze; *Ethulia alata* Sond.; *Ethulia gariepina* DC.; *Litogyne gariepina* (Steetz) Anderb.; *Litogyne scabra* Harv.)

Zambia. Erect herb, woody, aromatic, linear leaves, flowers purple-green

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 13. 1836, *Linnaea* 23: 60. 1850, *Naturwissenschaftliche Reise nach Mossambique ...* 452. 1864, *Revisio Generum Plantarum* 1: 335. 1891 and *Plant Systematics and Evolution* 176(3–4): 168. 1991

(The plant produces a jaundice in sheep.)

in Zambia: lwangelwafu, musampwisa

Ephedra L. Ephedraceae

Greek *ephedra* (*epi* 'upon' and *hedra* 'seat') for the common mare's tail (*Hippuris*), Latin *ephedra* or *ephedros* for the plant horse-tail; see Carl Linnaeus, *Species Plantarum*. 2: 1040. 1753, *Genera Plantarum*. Ed. 5. 462. 1754, *Analyse des Familles de Plantes* 11, 12. 1829 and *Field Mus. Nat. Hist., Bot. Ser.* 13(1):

84–86. 1936, Cheng Ching-yung. *Ephedraceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 468–489. 1978, Peschkova, G.A. “Synopsis of the Siberian *Ephedra* species (Ephedraceae).” *Botanicheskii Zhurnal. Moscow & Leningrad* 90: 423–436. 2005.

Ephedra alata Decne. (*Ephedra alata* Schimp. ex Carrière; *Ephedra alata* var. *decaisnei* (Decne.) Stapf, nom. inval.)

N. Africa to Arabian Peninsula.

See *Ann. Sci. Nat. (Paris)* 2: 239. 1824, *Traité Gén. Conif.* 556. 1855, *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 56(2): t. 1/1. 1889

(Cardiotonic, for eye diseases, asthma, dropsy.)

Ephedra americana Humb. & Bonpl. ex Willd. (*Ephedra americana* var. *humboldtii* Stapf; *Ephedra andina* Poepp. ex C.A. Mey.; *Ephedra andina* Poepp. & Endl.; *Ephedra peruviana* Bertero ex Carr.)

North America, Ecuador.

See *Species Plantarum*. [Willdenow] Editio quarta 4(2): 860. 1806, *Synopsis Coniferarum* 255. 1847, *Traité Gén. Conif.*: 549. 1855, *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 56, pt. 2: 85. 1889

(Diuretic, depurative.)

Ephedra antisyphilitica Berlandier ex C.A. Meyer (*Ephedra antisyphilitica* S. Watson, nom. illeg.; *Ephedra antisyphilitica* var. *brachycarpa* Cory; *Ephedra occidentalis* Torrey ex Parlatores; *Ephedra texana* E.L. Reed)

North America. Perennial shrub

See *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5(2): 291. 1846, *Monogr. Ephedra*: 101. 1846, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(2.2): 354. 1868 [mid Jul 1868], *U.S. Geol. Explor. Fortieth Parallel [Botany]* 328. 1871 and *Bulletin of the Torrey Botanical Club* 62: 43. 1935, *Rhodora* 40(473): 218. 1938

(Depurative, astringent, blood purifier, for venereal diseases, diarrhea.)

in English: clap weed, clapweed

in Mexico: popote, tepopote

Ephedra breana Phil. (*Ephedra haenkeana* Toel; *Ephedra wraithiana* I.M. Johnst.)

Peru, Argentina. Edible fruits

See *Anales Univ. Chile* 91: 519. 1895 and *Sitzungsber. Königl. Böhm. Ges. Wiss., Math.-Naturwiss. Cl.* 38: 2. 1902, *Contr. Gray Herb.* 85: 164. 1929

(Stem infusion against bladder diseases.)

in Chile: pingo-pingo

Ephedra californica S. Watson

North America. Perennial shrub

See *Proceedings of the American Academy of Arts and Sciences* 14: 300. 1879

(Blood purifier, for kidney ailments, stomachache.)

in English: California ephedra, California jointfir

in Mexico: cañatillo

Ephedra dahurica Turcz. (*Ephedra ma-huang* Liu; *Ephedra pseudodistachya* Pachom.; *Ephedra sinica* Stapf)

Siberia, Mongolia. Herb or undershrub, erect or prostrate, green, erect, short, somewhat flat, leaves opposite reduced to scales

See *Species Plantarum* 2: 1040. 1753, *Bull. Soc. Imp. Naturalistes Moscou* 26(1): 421. 1854 and *Bull. Misc. Inform. Kew.* 1927(3): 133. 1927, *China Journ.* 6(5): 257. 1927, *J. Sci. Hiroshima Univ., Ser. B.* 19: 57–109. 1984

(Bitter and astringent, stems used for fever, common cold, cough, dyspnea, edema.)

in English: Chinese ephedra, Chinese joint fir, joint fir

in China: cao ma huang, ma huang

Ephedra distachya L. subsp. *distachya* (*Ephedra arborea* Lag. ex Bertol.; *Ephedra botryoides* Fisch.; *Ephedra clusii* Dufour; *Ephedra distachya* f. *caspia* Fomin; *Ephedra distachya* f. *circinnata* Stapf; *Ephedra distachya* subsp. *monostachya* (L.) Riedl; *Ephedra distachya* subvar. *monostachya* (L.) Stapf; *Ephedra distachya* var. *caspia* (Fomin) Grossh.; *Ephedra distachya* var. *media* (C.A. Mey.) Stapf; *Ephedra dubia* Regel; *Ephedra linnaei* Stapf ex Koehne; *Ephedra macrocephala* Bertol.; *Ephedra maritima* St.-Lag.; *Ephedra media* C.A. Mey.; *Ephedra minor* Host; *Ephedra monostachya* L.; *Ephedra podostylax* Boiss.; *Ephedra polygonoides* Pall., nom. illeg.; *Ephedra subtristachya* C.A. Mey.; *Ephedra vulgaris* Rich., nom. illeg.; *Ephedra vulgaris* var. *arborea* (Lag. ex Bertol.) Nyman; *Ephedra vulgaris* var. *media* C.A. Mey.; *Ephedra vulgaris* var. *minor* (Host) Nyman; *Ephedra vulgaris* var. *monostachya* (L.) C.A. Mey.; *Ephedra vulgaris* var. *submonostachya* C.A. Mey.)

Central Asia, Europe.

See *Species Plantarum* 2: 1040. 1753, *Monogr. Ephedra*: 80, 83–84, 99. 1846, *Pinaceae*: Drawings and Descriptions of the Genera: *Abies*, *Cedrus*, *Pseudolarix*, *Keteleeria*, *Nothotsuga*, *Tsuga*, *Cathaya*, *Pseudotsuga*, *Larix* and *Picea* 162. 1866, *Denkschr. Afrique N.* 27: 269. 1936, *Cytologia* 46: 173–181. 1981

(Cardiotonic, for asthma, dropsy.)

Ephedra fragilis Desf.

Mediterranean.

See *Flora Atlantica* 2: 372–373. 1799

(Stimulant, for asthma, rheumatism.)

Ephedra gerardiana Wall. ex Stapf (*Ephedra gerardiana* Wall.; *Ephedra gerardiana* Wall. ex C.A. Mey.; *Ephedra*

gerardiana var. *congesta* C.Y. Cheng; *Ephedra gerardiana* var. *wallichii* Stapf)

Afghanistan, China, Himalaya. Small shrub, low growing, tufted, erect, many-branched, spreading, thick bark, ascending branches, leaves reduced to teeth-like projections forming a sheath around the nodes, flowers yellowish, red ovoid fruits, persistent bracts, sweet fleshy reddish female cones, sweet ripe fruit eaten, fodder

See *Numer. List* [Wallich] n. 6048. 1831–1832, *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Pétersbourg par Divers Savans et lus dans ses Assemblées* 5: 292. 1846, *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 56(2): 75. 1889 and *Acta Phytotaxonomica Sinica* 13(4): 87–88, pl. 59, f. 9–13. 1975, *J. Sci. Hiroshima Univ., Ser. B*, 19: 57–109. 1984

(Used in Ayurveda. Plant and dried stems tonic, blood purifier, nerve stimulant, taken for blood pressure, to relieve asthma, to stop bleeding, for respiratory affections, hay fever; stem decoction given orally for asthma, pneumonia and cardiac troubles; plant paste in water to take bath to treat skin diseases; plant decoction to get relief from kidney pain. Aerial parts used for wounds, injuries, ulcers, fevers, liver diseases, to stop bleeding. Roots antibacterial, used for respiratory diseases, asthma, bronchitis, cough, cold, wounds, painful urination; roots and stems decoction a remedy to rheumatism. Ripe fresh fruits eaten for curing asthma, bronchial disorders and to overcome altitude sickness. Veterinary medicine, tonic, stimulant.)

in English: ephedra, jointfir

in China: ma huang, shan ling ma huang

in India: ain, asmanibuti, buchchur, buchur, chhapat, chhe, chhedang, khanna, khanta, lata, som, soma, somalatha, somlata, torgatha, trans, tsapatt, tse, tshepad, tut gatha, tutgantha, tutgautha, tutgonta

in Nepal: chee, kagcharo, sang kaba, somalatha, somlata, tutgantha

Ephedra intermedia Schrenk ex C.A. Meyer (*Ephedra alata* var. *decaisnei* Stapf, nom. inval.; *Ephedra ferganensis* V. (For the treatment of headache, fever, asthma, jaundice, stimulant, to increase virility. Essential oil antiviral.)

in English: Chinese ephedra, Chinese joint fir, joint fir

in China: cao ma huang, ma huan, ma huang

Ephedra torreyana S. Watson (*Ephedra torreyana* S. Watson var. *torreyana*)

North America. Perennial shrub or subshrub

See *Proceedings of the American Academy of Arts and Sciences* 14: 299–300. 1879

(For cough, kidney trouble, gastrointestinal disturbances, stomachache, bladder trouble, cough, venereal ailments, itching skin, a decoction used as a diuretic.)

in English: Mormon tea, Torrey’s jointfir

Ephedra trifurca Torrey ex S. Watson (*Ephedra trifaria* Parl.)

North America. Perennial shrub

See Watson, Sereno (1826–1892), *United States Geological Exploration of the Fortieth Parallel. Botany* 329. 1871 [Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany. Washington, 1871.]

(For venereal and kidney ailments, stomach troubles, gastrointestinal disturbances, bleeding sores, boils, sores, skin diseases.)

in English: long-leaf joint-fir, long-leaf ephedra, longleaf jointfir, Mexican tea, Mormon tea

Ephedra viridis Coville (*Ephedra nevadensis* subvar. *pluribracteata* Stapf; *Ephedra nevadensis* var. *viridis* (Coville) M.E. Jones)

North America. Perennial shrub

See *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 56(2): 83. 1889, *Contr. U. S. Natl. Herb.* 4: 220. 1893, *Proc. Calif. Acad. Sci.*, II, 5(18): 726. 1895

(Astringent, antidiarrheal, cathartic, antirheumatic, emetic, blood purifier, laxative, tonic, for burns, sores, skin and venereal diseases, bowel complaints, diarrhea, gastrointestinal and urinary disturbances, stomach ulcers, cold, cough, menstrual troubles, backaches, rheumatism.)

in English: green ephedra, Mormon tea

Epidendrum L. Orchidaceae

Greek *epi* 'upon, above, on top' and *dendron* 'a tree', referring to the epiphytic habit of these plants that grow on trees; see *Species Plantarum* 2: 953. 1753, C. Linnaeus, *Species Plantarum*, Editio Secunda 1347. 1763, *Nova Genera et Species Plantarum* (quarto ed.) 1: 355–356, t. 87. 1815[1816], *Edwards's Botanical Register* 18: t. 1541. 1832, *Edwards's Botanical Register* 24: Misc. 32. 1838, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 478–479. 1899 and *Botanical Museum Leaflets* 8(7): 148–150. 1940, *Harvard Pap. Bot.* 5(2): 383–466. 2001.

Epidendrum blancheanum Urb. (*Epidendrum acunae* Dressler; *Spathiger roigii* Acuña, nom. illeg.)

Mexico, North America.

See *Ark. Bot.* 17(7): 21. 1922, *Amer. Orchid Soc. Bull.* 28: 358. 1959

(Astringent, vermifuge.)

Epidendrum secundum Jacq. (*Amphiglottis lacera* (Lindl.) Britton; *Amphiglottis secunda* (Jacq.) Salisb.; *Amphiglottis secunda* (Jacq.) Britton; *Bifrenaria secunda* (Jacq.) Hoehne

Caribbean, South America.

See *Enum. Syst. Pl.*: 29. 1760, *Transactions of the Horticultural Society of London* 1: 294. 1812, *Edwards's Botanical Register* 30: Misc. 18. n. 11. 1844, *Bonplandia* 2: 111–112. 1854, *Revue Horticole* 554. 1882 and *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 7: 125, 131, 140, 143. 1920, *Archivos de Botânica do São Paulo* 1: 245. 1926, *Bradea* 2: 64. 1976, *Acta Bot. Brasil.* 10: 142. 1996, *Hoehne* 29: 111. 2002

(Flowers infusion as a diuretic.)

in Ecuador: flor de Cristo

Epidendrum strobiliferum Rchb.f. (*Epidendrum mosenii* Barb. Rodr., nom. illeg.; *Epidendrum rodriguesii* Cogn.; *Epidendrum strobiliferum* var. *swartzii* Rchb.f. ex Griseb.; *Epidendrum verecundum* Schltr.; *Isochilus ramosus* Focke, nom. illeg.; *Spathiger strobiliferus* (Rchb.f.) Small)

S. Florida, Trop. America.

See *Tijdschr. Natuurk. Wetensch. Kunsten* 4: 69. 1851, *Ned. Kruidk. Arch.* 4: 333. 1859, *Fl. Brit. W. I.* 618. 1864, *Gen. Spec. Orchid.* 2: 144. 1881, *Fl. Bras.* 3(5): 176. 1898 and *Repert. Spec. Nov. Regni Veg. Beih.* 17: 42. 1922

(For skin diseases, cuts, boils.)

in English: big cypress star orchid

Epifagus Nutt. Orobanchaceae (Scrophulariaceae)

From the Greek *epi* 'upon' plus *Fagus*, referring to the habit and habitat, see *The Genera of North American Plants* 2: 60. 1818.

Epifagus virginiana (L.) Barton (*Leptamnium virginianum* (L.) Raf.)

North America. Annual herb

See *Compendium Florae Philadelphicae* 2: 50. 1818

(Astringent, for skin diseases, bruises, wounds, cancer, cuts, diarrhea.)

in English: beech drops, beechdrops, cancer root, pinedrops

Epigaea L. Ericaceae

From the Greek *epi* ‘upon’ and *gaia* ‘the earth’, referring to the creeping habit, see *Species Plantarum* 1: 395. 1753.

Epigaea repens L. (*Epigaea repens* L. var. *glabrifolia* Fernald)

North America. Perennial shrub or subshrub

See *Species Plantarum* 1: 395. 1753 and *Huntia* 7: 232. 1987

(Astringent, antiinflammatory, diuretic, emetic, analgesic, for diarrhea, dysentery, rheumatism, kidney ailments, menstrual troubles. Sacred flowers.)

in English: mayflower, trailing arbutus

Epilobium L. Onagraceae

Greek *epi* ‘upon’ and *lobos* ‘a pod’, referring to the petals and the podlike ovary, or to the epigynous flowers; see Carl Linnaeus, *Species Plantarum*. 1: 347–348. 1753, *Genera Plantarum*. Ed. 5. 164. 1754, *Amer. Monthly Mag. & Crit. Rev.* 2(4): 266. 1818, *Hist. Nat. Vég.* (Spach) 4: 383. 1835, *Fl. N. Amer.* (Torr. & A. Gray) 1: 488. 1840, *Anales Soc. Ci. (Paste of leaves applied to relieve toothache and gum trouble.)

in China: zhao sheng liu ye cai

Epilobium royleanum Hausskn. (*Epilobium himalayense* Hausskn.; *Epilobium lividum* Hausskn.; *Epilobium roseum* var. *dalhousieanum* C.B. Clarke; *Epilobium roseum* var. *indicum* C.B. Clarke; *Epilobium royleanum* fo. *glabrum* P.H. Raven; *Epilobium royleanum* fo. *glandulosum* P.H. Raven)

India. Perennial, tomentose, many-branched, purplish flowers, cordate petals deeply notched, seeds with a tuft of white coma

See *Oesterreichische Botanische Zeitschrift* 29(2): 55. 1879, *The Flora of British India* 2(6): 584. 1879, *Monographie der Gattung Epilobium* 201, 213, pl. 7, f. 48, 49. 1884 and *Bull. Brit. Mus. [Nat. Hist.], Bot.* 2: 358–361. 1962

(Fresh leaves paste applied to the inflammatory parts.)

in China: duan geng liu ye cai

Epimedium L. Berberidaceae

Epimedium, a Greek and Latin name used by Dioscorides and Plinius for an unidentified plant, see *Species Plantarum* 1: 117. 1753 and Stearn, William Thomas (1911–2001), *The genus Epimedium and Other Herbaceous Berberidaceae*; including the genus *Podophyllum* / by Julian M.H. Shaw; edited by Peter S. Green [1920–2009] and Brian Mathew, with illustrations by Christabel King ... [et al.]. Kew: Royal Botanic Gardens, Kew, 2002.

Epimedium elatum C. Morren & Decne.

Himalaya.

See *Annales des Sciences Naturelles, Botanique* II, 2: 356. 1834

(Leaves extract used to control asthma.)

Epimedium sagittatum (Sieb. & Zucc.) Maxim. (*Aceranthus macrophyllus* Blume ex C. Koch; *Aceranthus sagittatus* Siebold & Zucc.; *Aceranthus triphyllus* C. Koch; *Epimedium coactum* H.R. Liang & W.M. Yan var. *longtouhum* H.R. Liang; *Epimedium sagittatum* Maxim.; *Epimedium sagittatum* Baker; *Epimedium sinense* Siebold ex Miq.; *Epimedium sinense* Sieb.)

Japan, China. Perennial herb, evergreen, very slender creeping rhizome, inflorescence a raceme or a panicle, yellow petals, calyx in 8 segments in 2 whorls, fruit a follicle ovoid, black reniform seeds

See *Species Plantarum* 1: 117. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 2, 2: 349. 1834, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich*

Bayerischen Akademie der Wissenschaften 4(2): 175, pl. 2. 1845, *Miq. Ann. Mus. Lugd.-Batav.* 1: 253. 1864, *Miq. Ann. Mus. Lugd.-Batav.* 2: 71. 1865, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 23: 309. 1877, *Gard. Chron.* (1880) I. 683. 1880 and *Journal of Science of Hiroshima University, Series B, Division 2 (Botany)* 22: 159–269. 1989, *Acta Phytotaxonomica Sinica* 28(4): 321–322, pl. 1. 1990

(Whole plant aphrodisiac, used for impotence, chronic tracheitis, chronic pain in the lower body and legs, rheumatic arthritis.)

in English: horny goat weed, sagittate epimedium

in China: yin yang huo

Epinetrum Hiern Menispermaceae

From the Greek *epinetron* ‘a distaff’, see *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* (Hiern) 1: 21. 1896.

Epinetrum cordifolium Mangenot & Miegé

Tropical Africa.

See *Revue Générale de Botanique* 58: 443, t. 1. 1951

(Leaves and stems antiinflammatory, astringent, for circulation troubles, anemia, edema of the legs.)

Epinetrum villosum Troupin (*Epinetrum villosum* (Exell) Troupin)

Tropical Africa. See also *Albertisia villosa*

See *Fl. Congo Belge* 2: 222. 1951, *Journal of Ethnopharmacology* 71(3): 411–423. 2000, *Fitoterapia* 72(3): 291–294. 2001, *Journal of Ethnopharmacology* 102(1): 89–94. 2005

(Root extract astringent, abortifacient, antifungal, antiamebic, antidiarrheal, antimicrobial and antiplasmodial. Root decoction astringent, to treat diarrhea and dysentery; root bark decoction taken to treat malaria. Crushed leaves applied to burns; ground leaves applied as hemostatic to wounds.)

Epipactis Zinn Orchidaceae

Greek *epiaktis*, a word applied by Theophrastus to a plant used by the Greeks to curdle milk, name applied to a plant also called helleborine, possibly *Epipactis helleborine* (L.) Crantz (*epi* ‘upon’ and *paktos*, *pektos* ‘put together’) or a hellebore (*Helleborus*), Latin *epipactis* for an herb. See *Plantae Veronenses* 3: 253. 1754, Johann Gottfried Zinn (1727–1759), *Catalogus plantarum horti academici et agri gottingensis*. 85–87. Gottingae 1757, *Stirpium Austriarum Fasciculus* 2: 467, pl. 57. 1769, *Synopsis Plantarum* 2: 513. 1807, G. King and R. Pantling, “The Orchids of the Sikkim-Himalaya.” *Annals of the Royal Botanic Garden, Calcutta*. 8(1–4). 1898

and S. Deva and H.B. Naithani, *The Orchid Flora of North-West Himalaya*. New Delhi 1986.

(Laxative.)

in English: meadow horsetail, shady horsetail

Equisetum ramosissimum Desf. (*Equisetum debile* Roxb. ex Vaucher; *Equisetum ramosissimum* Kunth, nom. illeg., non *Equisetum ramosissimum* Desf.; *Equisetum ramosissimum* subsp. *debile* (Roxb. ex Vaucher) Hauke; *Hippochaete ramosissima* (Desf.) Farw.; *Hippochaete ramosissima* (Desf.) Börner; *Hippochaete ramosissima* (Desf.) Milde ex Bruhin; *Hippochaete ramosissima* subsp. *debilis* (Roxb. ex Vaucher) Á. Löve & D. Löve)

Tunisia, Africa, America. Herb, perennial, terrestrial, soft, creeping, erect, weak, often climbing or trailing, grey-green weak flattened stems, 3 branchlets at each node, slender dark creeping rhizome, minute spores borne in ellipsoidal

terminal spikes, cattle fodder, common in wet places, near streams, on grassy river banks, on stream banks, sandy soil

See *Species Plantarum* 2: 1061–1062. 1753, *Flora Atlantica* 2: 398–399. 1799, *Species Plantarum*. Editio quarta 5: 9. 1810, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 1: 387. 1822, *Botanische Zeitung*. Berlin 23: 298. 1865, *Verh. K.K. Zool.-Bot. Ges. Wien* 18: 758. 1868 and *Fl. Deut. Volk* 282. 1912, *Mem. New York Bot. Gard.* 6: 463. 1916, *American Fern Journal* 52(1): 33. 1962, *Taxon* 26(2–3): 324. 1977

(Poisoning in sheep, and probably other stock; toxic to horses. Stems tied round broken limbs, also a shoot paste applied locally in the treatment of fracture and dislocation of bones; whole plant pounded with *Sida cordata* and paste applied on site of bone dislocation or fracture; plant juice given in bone fracture. Root antipyretic, antiinflammatory, for rheumatism, arthritis, joint pain, kidney stones, dysentery, urinary disorders; root juice given to treat malaria and fevers, and to increase lactation.)

in English: drill grass, horsetail, mare's tail, scouring rush, Transvaal horsetail, weak horsetail

in Southern Africa: bewerasiegras, drilgras, dronkgras, Transvaal dronkgras, litjiesgras, lidjies gras, perdestert (Afrikaans); isikhumukele (Zulu); mohlakaphotwane (Sotho)

in China: tu mu zei

in India: gathi singa, hadjuri, harjor, harjora, kurkure jhar, nikshu ningmat

in Indonesia: bibitangan, lorogan haji, petungan, rumput betung, sempol, sendep-sendep, sodlisoan, tataropongan, tepung balung, tikel balung, tropongan

in Japan: inu-dokusa (= dog or false *Equisetum*)

in Nepal: kurkure, lahar jokka, purpure, purpure simdhungri, simdhungri, yo phuli

Equisetum ramosissimum Desf. subsp. *debile* (Roxb. ex Vaucher) Hauke (*Equisetum debile* Roxb. ex Vaucher; *Hippochaete ramosissima* subsp. *debilis* (Roxb. ex Vaucher) Á. Löve & D. Löve)

North America. Perennial herbs, underground rhizome, branches terminating in cones

See *Species Plantarum* 2: 1061–1062. 1753, *Flora Atlantica* 2: 398–399. 1799, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 1: 387. 1822, *Botanische Zeitung*. Berlin 23: 298. 1865 and *American Fern Journal* 52(1): 33. 1962, *Taxon* 26(2–3): 324. 1977

(Poisoning in sheep. Whole plant antipyretic, cooling, antiinflammatory, used for treatment of kidney stones, gonorrhoea, dysentery, urinary disorders; whole plant made into a paste and applied over the head and body for a cooling effect; stems tied round broken limbs, also a shoot paste applied locally in

the treatment of fracture and dislocation of bones. Root juice given to relieve fever.)

in English: horsetail, weak horsetail

in China: tu mu zei

in India: gathi singa, hadjuri, harjora, kurkure jhar, nikshu ningmat, soojigandhi

in Nepal: kurkure, simdhungri

Equisetum sylvaticum L. (*Equisetum capillare* Hoffm.; *Equisetum sylvaticum* fo. *multiramosum* Fernald; *Equisetum sylvaticum* var. *multiramosum* (Fernald) Wherry; *Equisetum sylvaticum* var. *pauciramosum* Milde)

North America.

See *Species Plantarum* 2: 1061–1062. 1753, *Fl. Deutsch.* 3. 1795 and *Rhodora* 20(235): 131. 1918, *American Fern Journal* 27(2): 58. 1937, *Nord. J. Bot.* 14: 148. 1994

(For kidney ailments, internal bleeding.)

in English: woodland horsetail

Equisetum telmateia Ehrh. (*Equisetum braunii* Milde; *Equisetum majus* Garsault; *Equisetum maximum* auct. non Lam.; *Equisetum telmateia* Ehrh. subsp. *braunii* (Milde) Hauke)

North America.

See *Hannoversches Magazin* 21: 287. 1783

(Stems diuretic, blood purifier, for sores, cuts, wounds, kidney stones, liver diseases.)

in English: giant horsetail, great horsetail, variegated horsetail

Equisetum variegatum Schleich. ex F. Weber & D. Mohr (*Equisetum hyemale* subsp. *variegatum* A. Braun; *Equisetum variegatum* Schleich. ex F. Weber & D. Mohr var. *anceps* Milde; *Hippochaete variegata* (Schleich. ex F. Weber & D. Mohr) Bruhin; *Hippochaete variegata* Bruhin; *Hippochaete variegata* Farw.)

North America.

See *Botanisches Taschenbuch* 60, 447. 1807 and *Memoirs of the New York Botanical Garden* 6: 466. 1916

(For eye ailments.)

in English: variegated horsetail, variegated scouring-rush, variegated scouringrush

Eragrostis N.M. Wolf Poaceae (Gramineae)

From the Greek *eros* ‘love’ and *agrostis*, *agrostidos* (*agros* ‘a field, country’) ‘grass, weed, couch grass’; Latin *agrostis*, *is* ‘couch-grass, quitch-grass’ (Pseudo Apuleius Barbarus); some suggested from *era* ‘earth’; see *Species Plantarum* 1:

in Nigeria: agbado esin, aknuse, alielie nkuku, barata, burburwa, burburwar fādámàà, dutaleho, eeran awo, eran esin, eran awo, gantaska, gafar fatin, hatsàà hatsàà, iwo awo, irungbon, irungbon efon, karangiyaa, kashe saura, katsàà katsàà, kelaselem, kooko esin, koomayyàà, kumbura kama, kumbura kama, matsandaka, matsandaka tsumbe, namijin tsintsiyàà, ogbe agufon, ogbe agunfon, oka esin, rauwaj, sagaje, saraaho, saraaho gorko, sarawal, tappo, tsintsiyay fadamàà, tsumbè, yayangan

in Senegal: diamblogor, diamblokör, diisis gor, itimakoro, kiu pitè, mbangati, paguire jaule, salguf, salguf utak, sambu gambi, sorghobo, wolo gaman, wolo kaman

in Sierra Leone: funfuri, peni fafagbe, peni fafagbi, peni pagbel, sankabesukwi, serelinyaxe

in Southern Africa: wollerige-eragrostis; lehola-le-letso-lalipere (Sotho); muchila bwende (Tonga)

in Yoruba: agbado esin, eeran awo, eran esin, eran awo, iwo awo, irungbon, irungbon efon, kooko esin, ogbe agufon, ogbe agunfon, oka esin, yayangan

Eragrostis gummiflua Nees

South Africa, Botswana, Namibia, Mozambique. Perennial bunchgrass, tufted or densely tufted, wiry, sticky at the nodes, leaf sheaths shiny and sticky, ligule a membrane with hairy margin, hard and slightly contracted panicle, glabrous spikelets, rachilla fragile, hard and unpalatable, used for broom-making, growing in shallow sandy soil, rocky soil, disturbed areas, along roadsides, open grassland, open habitats, open patches in bushveld

See *Florae Africae Australioris Illustrationes Monographicae* 393. 1841

(Veterinary medicine, used for some kind of an ointment to promote fertility of the bulls.)

in English: gum grass, sticky-stem love grass

in Southern Africa: gomgras, kleefgras, kleefhalm eragrostis, koperdraadgras, taaigras; khita-poho, thita-poho, kgitapoho, likonono, dikonono, dikonokono, lefielo (Sotho)

(Infusion of the fresh leaves used externally as a poultice for headaches.)

in English: Japanese love grass, pond love grass

in India: kaadu gasagase hullu, kanjira pullu, pini hullu

in Japan: kogome-kaze-kusa, kogome-kazekusa

in the Philippines: grama

in Thailand: yaa waai, ya wai

in Arabic: lehmeré

in Gambia: farangtambo

in Mauritania: lehmeré

in Nigeria: bafulatana, fain rumeya

Eragrostis olivacea K. Schum. (*Eragrostis lasiantha* Stapf)

East Africa, Ethiopia, Mozambique, Malawi, Tanzania. Perennial, tussocky, tufted, erect, reddish, leaf blades tough, basal sheaths papery, inflorescence dark grey, panicle diffuse to contracted, spikelets flattened, 5–20 flowered, glumes subequal, lemmas narrowly ovate, palea keels ciliate, ornamented

tal grass, forage, viscous roots, found in moist meadow, open woodland, grassland, heavy soil

See *Bulletin of Miscellaneous Information Kew* 1906: 82. 1906

(Loss of appetite. Veterinary medicine, ritual, magic.)

in Burundi: ishingé

Eragrostis plana Nees (*Diplachne hackeliana* Thell.; *Diplachne hackeliana* var. *probstii* Thell.; *Eragrostis plana* var. *hackeliana* (Thell.) Probst; *Eragrostis plana* var. *probstii* (Thell.) Probst)

Mozambique, South Africa, Zambia, Malawi, Lesotho. Strongly perennial, sometimes or rarely glandular, densely tufted, erect, narrow, rigid, tough, stiff, coarse, aromatic, forming small clumps, leaves upright and strong, weed, pasture, unpalatable to relatively unpalatable, low grazing value, grazed when young, strong leaves used for weaving

See *Florae Africae Australioris Illustrationes Monographicae* 390. 1841 and *Mittheilungen der Naturforschenden Gesellschaft Bern* 9(Bericht 21): 8. 1929–1931, *New Zealand Journal of Botany* 29: 117–129. 1991, *Edinburgh Journal of Botany* 48: 73–80. 1991, *Revista Brasileira de Botânica* 23(2): 177–194. 2000, *Iheringia, Série Botânica* 55: 23–169. 2001

(Used for treating fractures.)

in English: fan love grass, ox grass, South African love grass, tough love grass

in Southern Africa: baiesterkgras, beesgras, blousaadgras, jongosgras, jongospol, kruilgras, osgras, ospolgras, oulandergras, taaipol, taaipoleragrostis, taaipol-eragrostis, verdompsterkpolgras, vleigras; modula, modila (Sotho); umtshiki (Zulu)

in Brazil: capim-annoni, capim-chorão, capim-teff

Eragrostis tef (Zuccagni) Trotter (*Cynodon abyssinicus* (Jacq.) Raspail; *Eragrostis abessinica* (Jacq.) Link; *Eragrostis abyssinica* (Jacq.) Link; *Eragrostis abyssinica* Link; *Eragrostis pilosa* (L.) P. Beauv. subsp. *abyssinica* (Jacq.) Asch. & Graebn.; *Eragrostis pilosa* var. *tef* (Zucc.) Fiori; *Poa abyssinica* Jacq.; *Poa cerealis* Salisb.; *Poa tef* Zuccagni)

NE Africa, Ethiopia. Annual bunchgrass, upright or spreading, solitary or tufted, slender, glabrous, forming scanty tufts, spikelets lanceolate and long-stipitate breaking up very slowly at maturity, violet-red and white varieties, famine crop possibly derived from *Eragrostis pilosa* (L.) P. Beauv., edible seeds, one of the faster growing hay crops known, food and fodder, straw used in brick manufacture, cultivated cereal, high grazing value, extremely palatable and very well grazed, valuable hay and pasture grass suitable for all kinds of stock, widely grown for hay, seed eaten by wildlife and cattle, cultivated by the ancient Egyptians, good for erosion control, in Ethiopia grains ground to flour and used for

making unleavened bread and a pancake (*injera*), similar to *Eragrostis pilosa*

See Nicolai Josephi Jacquin *Miscellanea austriaca* ... 2: 364. 1781, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 20. Londini [London] (Nov.-Dec.) 1796, *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Annales des Sciences Naturelles (Paris)* 5: 302. 1825, *Hortus Regius Botanicus Berolinensis* 1: 192. 1827 and *Synopsis der mitteleuropäischen Flora* 2: 374. 1900, *Bollettino della Società Botanica Italiana* 1918: 62. 1918, *Nuova Flora Analitica d'Italia* 1: 123. 1923, *Atti dell'Istituto Botanico dell'Università di Pavia* 2: 168. 1944, Amanda L. Ingram and Jeff J. Doyle, "The origin and evolution of *Eragrostis tef* (Poaceae) and related polyploids: evidence from nuclear *waxy* and plastid *rps16*." *Am. J. Bot.* 90: 116–122. 2003, *Journal of Ethnopharmacology* 111: 271–283. 2007, *Journal of Ethnopharmacology* 124: 69–78. 2009

(For rabies, anemia, stomachache.)

in English: love grass, red teff grass, tef, teff, teff flour, teff grass

in French: mil éthiopien

in South Africa: tef, tefgras

in Yemen: tahaf

in NE Africa: t'ef, taf, tafi, tef, teff, tikur teff (Ethiopia)

in India: teff hagaiz, teff tseddia

Eragrostis tenuifolia (A. Rich.) Hochst. ex Steud. (*Eragrostis collocarpa* K. Schum., also spelled *collocarpa*; *Eragrostis parviglumis* Hochst. ex Steud.; *Eragrostis patula* (Kunth) Steud.; *Eragrostis tenuifolia* (A. Rich.) Steud.; *Eragrostis tenuifolia* Hochst.; *Poa patula* Kunth; *Poa tenuifolia* A. Rich.)

Tropical Africa, North Africa, Asia. Annual or short-lived perennial, widely naturalized, tufted, weak, slender, glandular, erect or rarely geniculate, branched, thick clumps, seeds reddish-brown and very small, low grazing value due to its wiry leaves, a problem weed of sports fields and parks, a weed of cultivation, quickly builds up a huge seedbed, grazed by cattle, allied to *Eragrostis plana*

See *Nova Genera et Species Plantarum* 1: 158–159. 1815 [1816], *Systema Vegetabilium* 2: 585. 1817, *Nomenclator Botanicus. Editio secunda* 1: 564. 1840, *Flora* 10 24(Intell.1): 20. 1841, *Tentamen Florae Abyssinicae* ... 2: 425. 1850 [1851], *Synopsis Plantarum Glumacearum* 1: 267–268. 1854, *Die Pflanzenwelt Ost-Afrikas* C: 114. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: Anhang, 110, t. 66, f. 2, 1930: 336. 1931, *Opera Botanica* 121: 159–172. 1993

(Veterinary medicine, prolapse of the rectum, for abortion prevention.)

in English: elastic grass, elastic love grass, love grass, wire grass

in India: dodda garike hullu, machendi

in Congo: bwikalabalume, hikalabalume

in East Africa: aroambo

in Kenya: gujita

in South Africa: elastiese-eragrostis

Eragrostis tephrosanthos Schult. (*Eragrostis arida* Hitchc.; *Eragrostis caroliniana* (Biehler) Scribn.; *Eragrostis delicatula* Trin.; *Eragrostis diffusa* var. *arida* (Hitchc.) Beetle; *Eragrostis pectinacea* (Michx.) Nees; *Eragrostis pectinacea* var. *miserrima* (E. Fourn.) Reeder; *Eragrostis pilosa* var. *delicatula* (Trin.) Hack.; *Eragrostis purshii* Schrad.; *Eragrostis simpliciflora* (J. Presl) Steud.; *Megastachya simpliciflora* J. Presl; *Poa caroliniana* Biehler; *Poa pectinacea* Michx.; *Poa tephrosanthos* Spreng. ex Schult.)

SW USA, West Indies, Argentina. Annual, tufted, erect, often decumbent at the base and rooting at the nodes, leaves glabrous, ligules ciliolate, open inflorescence, 7–11 flowered, glumes broadly lanceolate, lower florets acute, weed, medicinal value, along roadsides, disturbed places, gardens

See *Flora Boreali-Americana* 1: 69. 1803, *Plantarum Novarum ex Herbario Sprengelii Centarium* 10. 1807, *Essai d'une Nouvelle Agrostographie* 71: 162, 175. 1812, *Mantissa* 2: 316. 1824, *Reliquiae Haenkeanae* 1(4–5): 283. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. in Senegal: kiu pitè, mbangati, mbelkem, mbelken, otokama, paguire jaule, salguf, salguf utak, sambu gambi, sèlgue, sorg-hobo, sorgobo, wolo gaman, wolo kaman

in Sierra Leone: funfuri, peni fafagbe, peni fafagbi, peni pagbel, sankabesukwi, sankabesuwu

in Southern Africa: wollerige-eragrostis; lehola-le-letso-lalipere (Sotho); muchila bwende (Tonga)

in Sudan: bano, bannu

in Yoruba: agbado eshin, agbado esin, oka esin, eeran awo, eran esin, eran awo, iwo awo, irungbon, irungbon efon, kooko esin, ogbe agufon, ogbe agunfon, yayangan

in India: bansa, bhamiri, chanika, chankam buti, chankan buti, chiri ka chanwalia, chiri-ka-khet, chirio ro khet, chirio khet, chirka, kalunji, laki, lukki

Eranthemum L. Acanthaceae

The classical Greek name *eranthemon*, from *er* 'spring' and *anthon* 'flower', possibly referring to the flowering period; see Carl Linnaeus, *Species Plantarum*. 1: 9. 1753, *Genera Plantarum*. Ed. 5. 9. 1754, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1854(8–12): 166. 1855, *Sitzungsberichte der Mathematisch-Physikalischen*

Classe (Klasse) der K. B. Akademie der Wissenschaften zu München 13(2): 282. 1883, *Revisio Generum Plantarum* 1: 494. 1891 and *Contr. U.S. Natl. Herb.* 31: 292. 1953, *Contr. Univ. Michigan Herb.* 23: 115–137. 2001, *Contr. Univ. Michigan Herb.* 24: 51–108. 2005.

Eranthemum malaccense C.B. Clarke (*Pseuderanthemum malaccense* (C.B. Clarke) Lindau; *Pseuderanthemum malaccense* Lindau)

India, Malay Peninsula.

See *Fl. Brit. India* [J.D. Hooker] 4: 498. 1884, *Nat. Pflanzenfam.* [Engler & Prantl] 4(3b): 330. 1895 and *Fragmenta Florae Philippinae* 40. 1904

(Whole plant a wash after confinement.)

Malay name: tampan mutri

Eranthemum palatiferum Nees (*Eranthemum palatiferum* Hook.; *Pseuderanthemum palatiferum* (Nees) Radlk. ex Lindau; *Pseuderanthemum palatiferum* Radlk., nom. inval.)

India, Himalaya. Shrub, elliptic acuminate leaves, purplish flowers in racemes or in panicles

See *Plantae Asiaticae Rariores* (Wallich). 3: 108. 1829–1832, *Bot. Mag.* 98: t. 5957. 1872, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 13: 286. 1883[1884], *Fl. Brit. India* [J.D. Hooker] 4: 498. 1884, *Nat. Pflanzenfam.* [Engler & Prantl] 4(3b): 330. 1895

(Roots pounded with leaves of *Naravelia zeylanica* and applied in bone fracture.)

in India: laungla-mak, longlamak

Eranthemum pulchellum Andrews (*Daedalacanthus nervosus* (Vahl) T. Anderson; *Daedalacanthus nervosus* T. Anderson; *Eranthemum nervosum* (Vahl) R. Br. ex Roem. & Schult.; *Eranthemum nervosum* (Vahl) R. Br.; *Eranthemum pulchellum* Roxb., nom. illeg.; *Eranthemum pulchellum* Hort.; *Fitonia verschaffeltii* (Lem.) Van Houtte var. *pearsei* G. Nicholson; *Justicia nervosa* Vahl; *Pseuderanthemum pulchellum* Merr.)

India, Sri Lanka. Perennial shrub

See *Botanist's Repository*, for new, and rare plants 2: pl. 88. 1800, *Enumeratio Plantarum ...* [Vahl] 1: 164–165. 1804, *Prodr. Fl. Nov. Holland.* 476. 1810, *Gartenmag.* (1810) 176. t. 17. 1810, *Hortus Bengalensis*, or a catalogue ... 3. 1814, *Systema Vegetabilium* 1: 174–175. 1817, *Journal of the Linnean Society, Botany* 9: 487. 1867

(Roots, stems and leaves decoction antimicrobial, antiseptic, used for wounds, ulcers.)

in English: blue-sage

in India: nalla neelaambari, vaadambram

in Philippines: aliopiop, kinatuluan, limang-sugat, maladosodos, mopio, panaptum, pasioki, pulpulto, sinkilladas, tulang-manuk

Eranthemum roseum R. Br. (*Eranthemum roseum* Linden & E. Fourn.)

SE Asia. Blue flowers

See *Prodromus Florae Novae Hollandiae* 1: 477. 1810, *L'illustration horticole* 23: 42, t. 235. 1876 and *Iranian Journal of Pharmaceutical Research* 6(2): 131–133. 2007

(Roots antimicrobial, boiled in milk a remedy for leucorrhoea. Veterinary medicine, given to pregnant cattle to promote the growth of foetus.)

in India: dasamuli, dashmuli, gulsham, nilamulli, ran-aboli

Eranthis Salisb. Ranunculaceae

From the Greek *er* 'spring' and *anthos* 'flower', an early blooming spring flower, see *The British Herbal* 47. 1756, *Transactions of the Linnean Society of London* 8: 303. 1807 and *Botanical Magazine* 51: 364. 1937.

Eranthis hyemalis (L.) Salisb. (*Cammarum hyemale* (L.) Greene; *Cammarum hyemale* (L.) Hill; *Cammarum hyemale* (L.) Hill; *Eranthis cilicicus* Schott & Kotschy; *Eranthis x tubergenii* Hoog; *Helleborus hyemalis* L.; *Koellea hyemalis* (L.) Biria; *Robertia hiemalis* (L.) Mérat)

Europe.

See *Species Plantarum* 1: 557. 1753, *The British Herbal* 47. 1756, *Transactions of the Linnean Society of London* 8: 304. 1807, *Histoire Naturelle et Médicale des Renoncles* 21. 1811, *Nouvelle Flore des Environs de Paris* 211. 1812, *Oesterreichisches Botanisches Wochenblatt* 4: 113. 1854, *Pittonia* 3: 152. 1897 and *Nordic J. Bot.* 14: 161. 1994, *Phytomorphology* 46: 377–385. 1996

(Poison.)

in English: winter-aconite

Erechtites Raf. Asteraceae

Possibly referring to the dissected leaves, Greek *erechtho* 'to rend, break', *erechthites* 'the groundsel, *erigeron*', some suggest for Erechtheus, a fabled king of Athens; see *Species Plantarum* 2: 1169. 1763, Constantine Samuel Rafinesque (1783–1840), *Florula ludoviciana*; or, a flora of the state of Louisiana. 65. New York 1817, *Flora Mexicana* 180–181. 1894 and E.D. Merrill, *Index Rafinesquianus*. 235, 241. Jamaica Plain, Massachusetts, USA 1949.

Erechtites hieraciifolius (L.) Raf. ex DC. (*Erechtites cacalioides* (Fisch. ex Spreng.) Less.; *Erechtites hieraciifolius* var. *cacalioides* (Fisch. ex Spreng.) Griseb.; *Senecio cacalioides* Fisch. ex Spreng.; *Senecio hieraciifolius* L.)

America. Weed, annual, very brittle, erect, unbranched, green, taproots with tufts of fibrous roots, leaves alternate spreading lanceolate-oblong acute, flowers in a terminal loose paniced corymb, heads nodding, very copious sessile pappus, in woodland pastures and waste places

See *Species Plantarum* 2: 866–872. 1753, *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 37. 1819, *Synopsis Generum Compositarum ...* 395. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 294. 1837 [1838], *Flora of the British West Indian Islands* 381. 1861 and *Ann. Missouri Bot. Gard.* 43:1–85. 1956, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 25: 1–18. 1976, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Taxon* 30: 515–516. 1981, *Revista Brasil Genet.* 5: 533–549. 1982, *Flora of the Venezuelan Guayana* 3: 177–393. 1997

(Hepatotoxic. Oil antiseptic, vulnerary, astringent, emetic, cathartic, tonic, used in hemorrhage and acute hemorrhages, headache, diseases of skin, wounds, sciatica, muscular rheumatism, inflammation, cystitis, piles, cold, dysentery, hay fever.)

in English: American burnweed, American fireweed, burnweed, fireweed, Malayan groundsel, pilewort, true fireweed

Erechtites valerianifolius (Wolf) DC. (*Cacalia prenanthoides* Kunth; *Erechtites prenanthoides* (Kunth) Greenm. & Hieron.; *Erechtites valerianifolia* DC.; *Erechtites valerianifolia* (Wolf) DC.; *Erechtites valerianifolius* (Link ex Spreng.) DC.; *Senecio valerianifolius* Wolf; *Senecio valerianifolius* Link ex Spreng.)

South America. Herb, erect or decumbent, soft, juicy, leaves oblong, flowers in heads, achenes with white hairs, a weed of roadsides

See *Florula Ludoviciana*, or, a flora of the state of ... 65. 1817, *Index Seminum* [Berlin] 1825, *Linnaea* 5(1): 163. 1830, *Prodr.* (DC.) 6: 295. 1838 [early Jan 1838]

(Leaves rubbed on skin infections, burns; leaves juice given in cuts, wounds and skin diseases; juice from stem and leaves applied to sores and scabies.)

in Papua New Guinea: baru sake

in Sarawak: sawie

Eremalche E. Greene Malvaceae

Greek *eremos* 'lonely, solitary, desert, lone' and *alkea* 'mal-low', desert habitat, see *Leaflets of Botanical Observation and Criticism* 1(15): 208. 1906.

Eremalche exilis (A. Gray) Greene (*Malvastrum exile* A. Gray; *Malveopsis exilis* (A. Gray) Kuntze; *Malveopsis exilis* Kuntze; *Sphaeralcea exilis* (A. Gray) Jeps.)

North America. Annual herb, food

See *Revisio Generum Plantarum* 1: 72. 1891 and *Leaflets of Botanical Observation and Criticism* 1(15): 208. 1906, *A Manual of the Flowering Plants of California ...* 633. 1925

(Leaves eaten as stomachic, tonic.)

in English: white mallow

Eremogone Fenzl Caryophyllaceae

From the Greek *eremos* 'lonely, solitary, desert' and *gonos* 'seed', see *Versuch einer Darstellung der Geographischen Verbreitungs- und Vertheilungs-Verhältnisse der Natürlichen Familie der Alsineen* 13, pl. s.n. [p. 18]. 1833, *Flora Rossica* 1: 360. 1842, *The Flora of British India* 1(2): 236. 1874 and *Notes Roy. Bot. Gard. Edinburgh* 24: 121. 1962.

Eremogone aculeata (S. Watson) Ikonn. (*Arenaria aculeata* S. Watson; *Arenaria congesta* Nutt. var. *aculeata* (S. Watson) M.E. Jones; *Arenaria fendleri* A. Gray var. *aculeata* (S. Watson) S.L. Welsh; *Arenaria pumicola* Coville & Leiberger var. *californica* Maguire; *Arenaria salmonensis* L.F. Hend.)

North America. Perennial subshrub, herb

See *United States Geological Exploration of the Fortieth Parallel. Botany* 40–41. 1871, *Proceedings of the California Academy of Sciences, Series 2*, 5(18): 626. 1895 and *Great Basin Naturalist* 46(2): 255. 1986

(Decoction of root used as an eyewash.)

in English: prickly sandwort

Eremogone congesta (Nutt.) Ikonn. (*Arenaria congesta* Nutt.; *Eremogone congesta* var. *congesta*)

North America. Perennial subshrub, herb

See *A Flora of North America: containing ...* 1(1): 178. 1838

(Plant used as bowel medicine; poultice of steeped leaves applied for swellings, ulcers, gonorrhoea.)

in English: ballhead sandwort

Eremogone congesta (Nutt.) Ikonn. var. ***congesta***

North America. Perennial subshrub, herb

See *A Flora of North America: containing ...* 1(1): 178. 1838

(Plant used as bowel medicine; poultice of steeped leaves applied for swellings, ulcers, gonorrhoea.)

in English: ballhead sandwort

Eremogone eastwoodiae (Rydb.) Ikonn. (*Arenaria eastwoodiae* Rydb.; *Arenaria eastwoodiae* Rydb. var. *eastwoodiae*; *Arenaria fendleri* A. Gray var. *eastwoodiae* (Rydb.) Harrington)

North America. Perennial

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 13. 1849 and *Bulletin of the Torrey Botanical*

Club 31(7): 406–407. 1904, *Great Basin Naturalist* 46(2): 255. 1986

(Emetic.)

in English: Eastwood's sandwort

Eremogone eastwoodiae (Rydb.) Ikonn. var. ***eastwoodiae*** (*Arenaria eastwoodiae* var. *adenophora* Kearney & Peebles; *Eremogone eastwoodiae* var. *adenophora* (Kearney & Peebles) R.L. Hartm. & Rabeler)

North America. Perennial

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 13. 1849 and *Bulletin of the Torrey Botanical Club* 31(7): 406–407. 1904, *Journal of the Washington Academy of Sciences* 29(11): 475–476. 1939, *Great Basin Naturalist* 46(2): 255. 1986, *Sida* 21(1): 240. 2004

(Emetic.)

in English: Eastwood's sandwort

Eremogone fendleri (A. Gray) Ikonn. (*Arenaria fendleri* A. Gray; *Arenaria fendleri* subsp. *brevifolia* Maguire; *Arenaria fendleri* var. *brevifolia* (Maguire) Maguire; *Arenaria fendleri* var. *diffusa* Porter; *Arenaria fendleri* var. *fendleri*; *Arenaria fendleri* var. *porteri* Rydb.; *Arenaria fendleri* var. *tweedyi* (Rydb.) Maguire; *Arenaria tweedyi* Rydb.)

North America. Perennial

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 13. 1849, *Synopsis of the Flora of Colorado* 13. 1874 and *Bulletin of the Torrey Botanical Club* 31(7): 406. 1904, *Bulletin of the Torrey Botanical Club* 39(7): 316. 1912, *Madroño* 6(1): 23–24. 1941, *Bulletin of the Torrey Botanical Club* 74(1): 49–50. 1947, *Taxon* 37: 397–398. 1988

(Powdered root used as snuff for congested nose.)

in English: Fendler's sandwort

Eremogone juncea Fenzl (*Arenaria juncea* M. Bieberstein)

Temperate Asia.

See *Genera Plantarum* 299. 1789, *Fl. Taur.-Caucas.* 3: 309. 1819, *Versuch einer Darstellung der Geographischen Verbreitungs- und Vertheilungs-Verhältnisse der Natürlichen Familie der Alsineen* 13, pl. s.n. [p. 18]. 1833, *Flora Rossica* 1: 360. 1842, *The Flora of British India* 1(2): 236. 1874 and *Notes Roy. Bot. Gard. Edinburgh* 24: 121. 1962, *J. Nat. Prod.* 64(12): 1533–1537. 2001, *Pharmazie* 60(8): 635–637. 2005

(Saponins.)

in China: lao niu jin

in Korea: byeo-ruk-i-ul-ta-ri

Eremogone macradenia (S. Watson) Ikonn. (*Arenaria congesta* var. *macradenia* (S. Watson) M.E. Jones; *Arenaria congesta* Nutt. var. *parishiorum* (B.L. Rob.) B.L. Rob.; *Arenaria macradenia* S. Watson; *Arenaria macradenia* var.

parishiorum B.L. Rob.; *Eremogone parishiorum* (B.L. Rob.) Ikonn.)

North America. Perennial subshrub, herb

See *Proceedings of the American Academy of Arts and Sciences* 17: 367. 1882, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 626. 1895

(Roots analgesic, antirheumatic.)

in English: Mojave sandwort

Eremomastax Lindau Acanthaceae

Greek *eremos* ‘solitary’ and *mastax*, *mastakos* ‘mouth, jaws’, see *Flora* 27(1, Bes. Beibl.): 4, 17. 1844, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 8. 1894, *Naturl. Pflanzenfam.* iv. 3 b.(1895) 297. 1895.

Eremomastax speciosa (Hochst.) Cufod. (*Eremomastax crossandriflora* Lindau; *Eremomastax polysperma* (Benth.) Dandy; *Paulo-wilhelmia glabra* Lindau; *Paulo-wilhelmia polysperma* Benth.; *Paulo-wilhelmia pubescens* Lindau; *Paulo-wilhelmia sclerochiton* (S. Moore) Lindau; *Paulo-wilhelmia speciosa* Hochst.; *Paulo-wilhelmia togoensis* Lindau; *Ruellia sclerochiton* S. Moore)

Tropical Africa. Herb, multi-branched herbaceous shrub, coarse, erect, blue flowers in sticky glandular strongly scented inflorescence

See *Species Plantarum* 2: 634–635. 1753, *Niger Flora* 479. 1849, *Journal of Botany, British and Foreign* 7. 1880, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 105. 1893 and *Mémoires de la Société Botanique de France* 2(8): 49. 1907, *The Flowering Plants of the Anglo-Egyptian Sudan* [F.W. Andrews] 3: 174. 1956, *Bulletin du Jardin Botanique de l'État* 34, Suppl.: 931. 1964

(A poultice to heal wounds, sores. Magic, ritual.)

in Tanzania: eikingula

Eremophila R. Br. Myoporaceae

A desert-lover, from the Greek *eremos* ‘lonely, solitary, desert’ and *philos* ‘loving, friend’; see Robert Brown, *Prodromus florae Novae Hollandiae*. 518. 1810 and *Economic Botany* 48(1): 35–59. 1994.

Eremophila alternifolia R.Br. (*Bontia alternifolia* (R.Br.) Kuntze; *Eremophila alternifolia* R.Br. var. *latifolia* F. Muell. ex Benth.; *Pholidia alternifolia* (R.Br.) Wettst.; *Stenochilus alternifolius* (R.Br.) Kraenzlin)

Australia.

See *Revisio Generum Plantarum* 2 1891 and *Repertorium Specierum Novarum Regni Vegetabilis*, *Beihefte* 54. 1929

(Leaves infusion sedative, narcotic; leaves decoction for coughs, colds, influenza and headaches.)

in Australia: emu bush, honeysuckle, magenta, mindyinga, narrow leaf fuchsia bush, narrow leaved fuchsia bush, native honeysuckle, round leaf poverty bush, scented emu bush

Eremophila bignoniiflora (Benth.) F. Muell. (*Eremophila bignoniiflora* F. Muell.; *Stenochilus bignoniaeflorus* Benth.)

Australia.

See *Proc. Roy. Soc. Tasmania* iii. 294. 1859

(Leaves decoction laxative, purgative.)

in Australia: bignonia, bignonia emu bush, creek wilga, emu bush, eurah, gooramurra, jamarrah, pombel, quirramurra, river angee, swamp sandalwood, swamp wilga, white tree fuchsia

Eremophila cuneifolia Kraenzlin

Australia.

See *Repertorium Specierum Novarum Regni Vegetabilis*, *Beihefte* 54: 93. 1929

(Leaves decoction for colds.)

in Australia: pinyuru, royal poverty bush, wedge-leaved eremophila

Eremophila duttonii F. Muell. (*Bontia duttonii* (F. Muell.) Kuntze; *Eremophila calycina* S. Moore; *Stenochilus duttonii* (F. Muell.) Kraenzlin) (for the German-born Francis Staker Dutton, 1816–1877, in 1840s to Australia, Commissioner for Crown Lands in South Australia and Premier, explorer and algae collector; see F. von Mueller, in *Linnaea*. 25: 409. 1853 and *Transactions and Proceedings of the Victorian Institute for the Advancement of Science*. 40. 1855.)

Australia.

See *Rep. Pl. Babbage's Exped.* 16. 1859, *Revisio Generum Plantarum* 2. 1891

(Leaves antiseptic.)

in English: budda, butterbush, Dutton's emu bush, emu bush, harlequin fuchsia-bush, kangaroo bush, red poverty bush, saline fuchsia bush, tall fuchsia

Eremophila elderi F. Muell. (*Bontia elderi* (F. Muell.) Kuntze)

Australia.

See *Fragmenta Phytographiae Australiae* 8. 1874, *Revisio Generum Plantarum* 2. 1891

(Leaves applied for colds.)

Eremophila fraseri F. Muell. (after Sir Malcolm Fraser, 19th century Western Australia Surveyor-General.)

Australia.

See *Fragmenta Phytographiae Australiae* 11. 1874, *Revisio Generum Plantarum* 2. 1891

(Leaves decoction for colds.)

in Australia: bino bush, burra, burro, turpentine bush, turpentine plant, wax plant

Eremophila freelingii F. Muell. (after Sir Arthur H. Freeling, explorer, 19th century South Australia Surveyor-General; see F. Mueller, "Report on the plants collected during Mr. Babbage's expedition into the north-western interior of South Australia in 1858." *Victorian Parliamentary Papers*. 1859–1860.)

Australia. Bush, flowers bluish

See *Papers and Proceedings of the Royal Society of Tasmania* 3: 295. 1859

(Leaves decoction for colds, headache, sores, diarrhea.)

in Australia: emu bush, limestone fuchsia, long leaved fuchsia bush, native fuchsia, rock emu bush, rock fuchsia, rock fuchsia-bush, rutta, stony poverty bush

Eremophila gilesii F. Muell. (after Ernest Giles, explorer)

Australia.

See *Fragmenta Phytographiae Australiae* 8. 1874

(Leaves decoction for colds, headache, sores.)

in Australia: Charleville turkey bush, desert fuchsia, fuchsia bush, Giles emu bush, green turkey bush, turkey bush

Eremophila goodwinii F. Muell. (*Bontia goodwinii* (F. Muell.) Kuntze) (after Rev. Thomas H. Goodwin; see F. Mueller, "Report on the plants collected during Mr. Babbage's expedition into the north-western interior of South Australia in 1858." *Victorian Parliamentary Papers*. 1859–1860.)

Australia.

See *Rep. Pl. Babbage's Exped.* 17. 1859

(Leaves purgative.)

in Australia: fuchsia bush, Goodwin's emu bush, purple fuchsia bush

Eremophila latrobei F. Muell. (for Charles Joseph La Trobe, 1801–1875, Lieutenant-Governor of Victoria, naturalist, traveller, botanist, companion of Washington Irving, among his writings are *The Rambler in Mexico: 1834*. London 1836 and *The Rambler in North America: 1832–1833*. London 1835. See Hans Pieter Hallbeck, *Narrative of a visit ... to the New Missionary Settlement of the United Brethren ... on the Witte Revier ... South Africa*. Transl. and edited by C.J. Latrobe. London 1820, Washington Irving (1783–1859), *A Tour on the Prairies*. London 1851 and Alan Gross, *Charles Joseph La Trobe, Superintendent of the Port Phillip District, 1839–1851, Lieutenant-Governor of Victoria, 1851–1854*. Melbourne 1956, Douglas Pike, ed., *Australian Dictionary*

of Biography. 2: 89–93. 1967, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 415. 1994.)

Australia. Spindly shrub, brittle branches, deep red flowers

See *Linnaea* 25: 428. 1852, *Proc. Roy. Soc. Tasm.* iii. 294. 1859

(Leaves decoction for colds, headache, sores, diarrhea.)

in Australia: crimson turkey-bush, emu bush, Georgina poison bush, grey fuchsia bush, Latrobe's emu bush, mintjingka, native fuchsia, wart leaf eremophila, warty fuchsia bush, warty leaved eremophila

Eremophila longifolia (R. Br.) F. Muell. (*Stenochilus longifolius* R. Br.)

Australia.

See *Prodromus Florae Novae Hollandiae* 517. 1810, *Papers and Proceedings of the Royal Society of Tasmania* 3: 295. 1859

(Ceremonial, ritual.)

in Australia: berrigan, emu bush, long-leaved emu bush, long-leaved eremophila, weeping emu bush

Eremophila maculata (Ker Gawl.) F. Muell.

Australia.

See *Papers and Proceedings of the Royal Society of Tasmania* 3: 297. 1859

(Leaves poultice for cold.)

in Australia: mindyinga, native fuchsia, pitula, poison fuchsia, spotted emu bush, spotted fuchsia

Eremophila mitchellii Benth. (after Sir Thomas Livingstone Mitchell, 1792–1855, translator, explorer and botanist, 1839 Fellow of the Royal Society; see Stafleu and Cowan, *Taxonomic Literature*. 3: 524–525. 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 492. 1994.)

Australia.

(Leaves decoction for colds, headache.)

in Australia: Budda, false sandalwood, sandalwood

Eremophila oppositifolia R. Br.

Australia.

See *Prodromus Florae Novae Hollandiae* 518. 1810

(Leaves decoction for colds.)

in Australia: emu bush, twin-leaf emu bush, weeooka

Eremophila sturtii R. Br.

Australia.

(Leaves decoction for sores, colds, cuts, sore eyes, diarrhea.)

in Australia: narrow-leaf emu bush, turpentine-bush

**Eremospatha (G. Mann & H.A. Wendland)
H.A. Wendland Arecaceae (Palmae)**

No bracts or spathe are evident on the inflorescence, Greek *eremos* 'lonely, solitary' and *spathe* 'spathe', see *Palmiers* 244. 1878, *Genera Plantarum* 3: 881, 936. 1883.

Eremospatha haullevilleana De Wild. (*Eremospatha hookeri* Wendl.)

Tropical Africa. Climbing palm, liana, hooked rachis, white and maroon flowers, red scaly fruits

See *Ann. Mus. Congo Belge, Bot.*, V, 1[2]: 96. 1904 [1903–1906, publ. May 1904] (*Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 96. 1904)

(Used for intestinal worms.)

in Cameroon: gao, kpongbo

in Central African Republic: mopongbo

in Congo: n'koli, okoli

Eremospatha wendlandiana Dammer ex Becc. (*Calamus hookeri* G. Mann & H. Wendl.; *Eremospatha hookeri* Wendl.; *Eremospatha hookeri* (G. Mann & H. Wendl.) Wendl.; *Eremospatha korthalsii* Becc.)

Tropical Africa, Nigeria, Angola. Climber, spiny

See *Transactions of the Linnean Society of London* 24: 434. 1864, *Palmiers* 244. 1878 and *Webbia* 3: 290, 292. 1910

(For tooth decay.)

in Congo: ihpindo, maphindo

Eremostachys Bunge Lamiaceae (Labiatae)

Greek *eremos* 'lonely, solitary' and *stachys* 'a spike', the genus *Stachys* L.

Eremostachys loasaefolia Benth.

Pakistan, Afghanistan.

See *Flora Altaica* 2: 414. 1830, *Prodr. (DC.)* 12: 547. 1848 [5 Nov 1848]

(Seeds burned and the smoke inhaled to treat gum disease and tooth decay.)

in Pakistan: dannan shan

Eremostachys vicaryi Benth. ex Hook. f. (*Eremostachys sharifii* Rech. f.)

Pakistan.

See *Cat. Fl. Punjab and Sindh* 119. 1869, *The Flora of British India* 4: 695. 1885 and *Oesterreichische Botanische Zeitschrift* 99: 43. 1952

(Entire plant fish poison.)

Eria Lindley Orchidaceae

Greek *erion* 'wool', referring to the inflorescence and to the indumentum of the perianth; Akkadian *erwu*, *ermu* 'cover, wrap'; see J. Lindley, in *Edwards's Botanical Register*. 11: t. 904. (Jan.) 1825, *The Genera and Species of Orchidaceous Plants* 70. 1830, *Notulae ad Plantas Asiaticas* 3: 321. 1851, *Museum Botanicum* 2: 183. 1856, *Bonplandia* (Hanover) 5: 55. 1857, *Journal of the Linnean Society, Botany* 3: 46, 48, 50, 52, 58. 1859, *Journal of the Linnean Society, Botany* 18: 287. 1881, *Die Natürlichen Pflanzenfamilien* 2(6): 175. 1889, *The Flora of British India* 5(16): 786. 1890 and *Philippine Journal of Science* 4: 217. 1909, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 9: 106. 1921, *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 93. 1978.

Eria bractescens Lindl. (*Dendrobium subterrestre* Gagnep.; *Eria bractescens* var. *latipetala* Leav.; *Eria dillwynii* Hook.; *Eria griffithii* Rchb.f.; *Eria kurzii* Anderson ex Hook.f.; *Eria littoralis* Teijsm. & Binn.; *Eria pulchella* Griff., nom. illeg.; *Pinalia bractescens* (Lindl.) Kuntze; *Pinalia pulchella* Kuntze; *Tropilis subterrestris* (Gagnep.) Rauschert)

Tropical Asia.

See *Edwards's Bot. Reg.* 27(Misc.): 18. 1841, *Revisio Generum Plantarum* 2: 679. 1891 and *Feddes Repert.* 94: 471. 1983

(Leaves infusion drunk in fever and malaria.)

Eria pannea Lindl. (*Eria calamifolia* Hook. f.; *Eria nivosa* Ridl.; *Eria odoratissima* Teijsm. & Binn.; *Eria teretifolia* Griff.; *Pinalia calamifolia* (Hook. f.) Kuntze; *Pinalia pannea* (Lindl.) Kuntze)

India, Himalaya to S. China. Epiphyte, creeping, flowers dull yellow to yellowish-orange, lip deep violet brown, central callus of the lip yellow, inflorescence small with white tomentum

See *Orch. Scel.* 14. 21. 23. 1826, *Plantae Asiaticae Rariores* 1: 32, pl. 36. 1828, *Bot. Reg.* 28: (Misc.) 64. 1842, *Natuurk. Tijdschr. Ned.-Indië* 27: 17. 1864, *The Flora of British India* 6(17): 191. 1890, *Revisio Generum Plantarum* 2: 679. 1891 and *J. Nat. Hist. Soc. Siam* 4: 116. 1921

(Leaves paste taken for relief from cough and cold. A bath prepared by boiling whole plant used as a cure for the ague. Rhizome paste applied as a remedy against chicken pox.)

in India: taming

Erianthemum Tieghem Loranthaceae

Greek *erion* 'wool' and *antheon* 'flower', referring to the hairy corolla tube, see *Bulletin de la Société Botanique de France* 42: 247–248. 1895.

Erianthemum dregei (Eckl. & Zeyh.) Tiegh. (*Erianthemum dregei* Tiegh.; *Erianthemum heterochromum* Danser;

Erianthemum heterochromum (K. Krause) Danser; *Erianthemum liguliforme* (Peter) Danser; *Erianthemum linguiforme* (Peter) Danser; *Loranthus dregei* Eckl. & Zeyh.; *Loranthus dregei* Eckl. & Zeyh. forma *obtusifolia* Engl.; *Loranthus dregei* Eckl. & Zeyh. forma *subcuneifolia* Engl.; *Loranthus dregei* fo. *subcuneifolius* Engl.; *Loranthus dregei* var. *foliaceus* Sprague; *Loranthus dregei* var. *kerenicus* Sprague; *Loranthus dregei* var. *kilimanjaricus* Sprague; *Loranthus dregei* var. *nyasicus* Sprague; *Loranthus dregei* var. *ovatus* Sprague; *Loranthus dregei* var. *roseus* (Klotzsch) Fiori; *Loranthus dregei* var. *sodenii* Engl.; *Loranthus dregei* var. *subcuneifolius* (Engl.) Sprague; *Loranthus heterochromus* K. Krause; *Loranthus hirsutiflorus* Klotzsch; *Loranthus liguliformis* Peter; *Loranthus linguiformis* Peter; *Loranthus oblongifolius* A. Rich.; *Loranthus oblongifolius* E. Mey. ex A. Rich.; *Loranthus oblongifolius* E. Mey.; *Loranthus oblongifolius* E. Meyer ex Drège; *Loranthus roseus* Klotzsch) (for the German plant collector Jean François Drège, 1794–1881, botanical explorer, traveller, at the Cape 1826, his writings include *Zwei pflanzengeografische Dokumente*. Leipzig [1843–1844] and *Catalogus plantarum exsiccatarum Africae australioris, quas emturus offert*. 1837–1840. See J.H. Verduyn den Boer, *Botanists at the Cape*. 55–58. 1929, John Hutchinson, *A Botanist in Southern Africa*. 642. 1946, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 471. 1965, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 704. 1993, Gordon Douglas Rowley, *A History of Succulent Plants*. California 1997.)

South Africa.

See *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 358–359. 1837, *Zwei Pflanzengeogr. Docum.* (Drège) 200. 1843–1844, *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 177–178. 1861, *Bulletin de la Société Botanique de France* 42: 248. 1895 and *Bot. Jahrb. Syst.* lvii. 490. 1922, *Notizbl. Bot. Gart. Néerl.* 31: 223. 1934, *Journal of Ethnopharmacology* 79: 109–112. 2002

(Leaves for headache. Magic, ritual, against evil spirit.)

in English: mistletoe, wood flower

in South Africa: dumba, liphakama, voëlent

Eriastrum Wooton & Standley Polemoniaceae

Greek *erion* ‘wool’ plus *astrum*, a suffix indicating incomplete resemblance, glabrous to woolly species, see *Flora Peruviana, et Chilensis Prodrumus* 20, 25. 1794, *Edwards’s Botanical Register* 19: sub pl. 1622. 1833, *Handbuch des Natürlichen Pflanzensystems* 194. 1837 and *Contributions from the United States National Herbarium* 16(4): 160. 1913.

Eriastrum densifolium (Benth.) H. Mason (*Gilia densifolia* (Benth.) Benth.; *Hugelia densifolia* Benth.; *Navarretia densifolia* (Benth.) Brand; *Navarretia densifolia* (Benth.) Kuntze; *Navarretia densifolia* Kuntze; *Welwitschia densifolia* (Benth.) Tidestr.)

North America. Perennial subshrub, herb

See *Edwards’s Botanical Register* pl. 1622. 1833, *Prodrumus Systematis Naturalis Regni Vegetabilis* 9: 311. 1845, *Revisio Generum Plantarum* 2: 433. 1891 and *Das Pflanzenreich* 27[IV,250]: 165. 1907, *Contributions from the United States National Herbarium* 25: 429. 1925, *Madroño* 8(3): 73. 1945

(For venereal diseases.)

in English: giant woollystar, giant woolstar

Eriastrum eremicum (Jeps.) H. Mason (*Gilia eremica* (Jeps.) T.T. Craig; *Hugelia eremica* Jeps.) (Central Mohave Desert)

North America. Annual herb

See *A Manual of the Flowering Plants of California ...* 793. 1925, *Bulletin of the Torrey Botanical Club* 61(8): 416. 1934, *Madroño* 8(3): 78. 1945

(Antidiarrheal.)

in English: desert woollystar, desert woolstar

Eriastrum eremicum (Jeps.) H. Mason subsp. *eremicum*

North America. Annual herb

See *A Manual of the Flowering Plants of California ...* 793. 1925, *Bulletin of the Torrey Botanical Club* 61(8): 416. 1934, *Madroño* 8(3): 78. 1945

(Antidiarrheal, stomachache, for gastrointestinal disorders, tuberculosis.)

in English: desert woollystar, desert woolstar

Eriastrum filifolium (Nutt.) Wooton & Standl. (*Gilia filifolia* Nutt.; *Gilia floccosa* var. *filifolia* (Nutt.) A. Nelson & J.F. Macbr.; *Gilia virgata* (Benth.) Steud. var. *filifolia* (Nutt.) Milliken; *Hugelia filifolia* (Nutt.) Jeps.; *Navarretia filifolia* (Nutt.) Kuntze; *Welwitschia filifolia* (Nutt.) Rydb.)

North America. Annual herb

See *Journal of the Academy of Natural Sciences of Philadelphia* 1: 156. 1848, *Revisio Generum Plantarum* 2: 433. 1891 and *University of California Publications in Botany* 2(1): 39. 1904, *Contributions from the United States National Herbarium* 16(4): 160. 1913, *Botanical Gazette* 61: 35. 1916, *Flora of the Rocky Mountains* 1065. 1917, *A Manual of the Flowering Plants of California ...* 792. 1925

(Cathartic, antirheumatic, emetic, analgesic, for venereal diseases.)

in English: lavender woollystar, lavender woolstar

Eriastrum sparsiflorum (Eastw.) H. Mason (*Gilia filifolia* Nutt. var. *sparsiflora* (Eastw.) J.F. Macbr.; *Gilia sparsiflora*

Eastw.; *Hugelia filifolia* var. *sparsifolia* (Eastw.) Jeps.; *Navarretia filifolia* subsp. *sparsiflora* (Eastw.) Brand

North America. Annual herb

See *Proceedings of the California Academy of Sciences*, Series 3, 2(9): 291–292. 1902, *Das Pflanzenreich* 27[IV,250]: 167. 1907, *Contributions from the Gray Herbarium of Harvard University* 49: 57. 1917, *A Manual of the Flowering Plants of California ...* 792. 1925, *Madroño* 8(3): 86. 1945

(Emetic, stomachic, for gastrointestinal disorders.)

in English: Great Basin woolstar

Eriastrum sparsiflorum (Eastw.) H. Mason subsp. *sparsiflorum*

North America. Annual herb

See *Proceedings of the California Academy of Sciences*, Series 3, 2(9): 291–292. 1902, *Das Pflanzenreich* 27[IV,250]: 167. 1907, *Contributions from the Gray Herbarium of Harvard University* 49: 57. 1917, *A Manual of the Flowering Plants of California ...* 792. 1925, *Madroño* 8(3): 86. 1945

in English: Great Basin woollystar, Great Basin woolstar

Eriastrum virgatum (Benth.) H. Mason (*Gilia virgata* (Benth.) Steud.; *Hugelia virgata* Benth.; *Navarretia virgata* (Benth.) Brand; *Navarretia virgata* (Benth.) Kuntze)

North America. Annual herb

See *Edwards's Botanical Register* 19: pl. 622. 1833, *Nomenclator Botanicus*. Editio secunda 1: 684. 1840, *Revisio Generum Plantarum* 2: 433. 1891 and *Das Pflanzenreich* 27[IV,250]: 165. 1907, *Madroño* 8(3): 84. 1945

in English: virgate collomia, wand woollystar, wand woolstar

Eribroma Pierre Sterculiaceae

From the Greek *eri* ‘very, much’ and *broma* ‘food’, referring to the seeds, see *Bull. Mens. Soc. Linn. Paris* 1: 1273. 1897.

Eribroma oblongum (Mast.) Pierre ex A. Chev. (*Sterculia elegantiflora* Hutch. & Dalziel; *Sterculia oblonga* Mast.)

Tropical Africa. Tree, flowers cream or greenish-yellow, fruiting carpels greyish-brown

See *Species Plantarum* 2: 1007. 1753, *Flora of Tropical Africa* 1: 216. 1868 and *Les végétaux utiles de l'Afrique Tropicale Française* 9: 78. 1917, *African Study Monographs* 25(1): 1–27. March 2004

(Religion, superstitions, magic.)

English: yellow sterculia

in Cameroon: bongele, bopamba, eboyo, ekonge, eyong, lom, mgwan

in Central African Republic: boboli, bongele, bongo, eboyo, egboyo, eyong, g'boyo, lom, mgwan

in Congo: kuil

in Gabon: nzong

in Ghana: oha, ohaa

in Ivory Coast: assa-sodau, assosodau, azodo, bi, gbi, lomien

in Nigeria: kokoniko, oroforofo; ebenebe (Igbo), okoko (Edo)

Erica L. Ericaceae

Greek *erike*, *ereike* ‘heath’; Akkadian *waraq*, *araq* ‘to become green’, *warqu*, *barqu*, *erqu* ‘green, greenish’; Arabic *waraq*, Hebrew *jaraq* ‘greens, herbs, vegetables’; Latin *erica*, *ae* and *erice*, *es* ‘heath, broom, ling’; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 352–356. 1753, *Genera Plantarum*. Ed. 5. 167. 1754, *Enumeratio Methodica Plantarum* [Fabr.] 131. 1759, *Definitiones Generum Plantarum* 67. 1760, *Genera Plantarum* 159–160. 1789, *Transactions of the Linnean Society of London* 6: 317, 348. 1802, M.A. Marchi, *Dizionario tecnico-etimologico-filologico*. Milano 1828–1829, *Linnaea* 9: 354. 1834, *Linnaea* 12: 222. 1838, *Revisio Generum Plantarum* 2: 389. 1891 and *Kongliga Svenska Vetenskaps Academiens Handlingar*. ser. 3 ser. 3. 4(4): 43. 1927, *Taxon* 41: 563. 1992.

Erica arborea L. (*Erica arborea* Thunb.; *Erica arborea* Brot.; *Ericodes arborea* Kuntze; *Ericoides arboreum* (L.) Kuntze)

Europe.

See *Species Plantarum*. 1: 353. 1753, *Flora Lusitanica* 2: 22. 1827, *Revisio Generum Plantarum* 2: 966. 1891 and *Anales Jard. Bot. Madrid* 39: 533–539. 1983, *Stud. Bot. Univ. Salamanca* 4: 173–177. 1985, *Pharmazie*. 64(10): 656–659. 2009

(Antioxidant.)

in English: tree heath

in Portuguese: betouro, urze molar

Erica carnea L.

Europe.

See *Species Plantarum*. 1: 355. 1753 and *J. Linn. Soc., Bot.* 60: 65. 1967, *Pharmazie*. 64(10): 656–659. 2009

(Antioxidant.)

in English: snow-heather, spring heath, winter heath

Ericameria Nutt. Asteraceae

Perhaps from the Greek *erike*, *ereike* ‘heath, broom’ and *meris* ‘part’, see *Dictionnaire des Sciences Naturelles* 56: 168. 1828, *Transactions of the American Philosophical Society*, new series, 7: 318–320, 322–324. 1840 and *Bulletin of the Torrey Botanical Club* 27(12): 617. 1900, *Publications of the Carnegie Institution of Washington* 389: 156. 1928, Urbatsch, L.E. “The Chihuahuan Desert species of

Ericameria (Asteraceae).” *Sida* 7: 298–303. 1978, *Bulletin of the Torrey Botanical Club* 31(2): 273. 1979, Roundy, B.A., J.A. Young and R.A. Evans. “Phenology of salt rabbit brush (*Chrysothamnus nauseosus* subsp. *consimilis*) and greasewood (*Sarcobatus vermiculatus*).” *Weed Sci.* 29: 448–454. 1981, Anderson, L.C. “Sympatric subspecies in *Chrysothamnus nauseosus*.” In: E.D. McArthur and B.L. Welch, eds. *Proceedings, Symposium on the Biology of Artemisia and Chrysothamnus*, Provo, Utah, July 9–13, 1984. Ogden. Pp. 98–103. 1986, Ostler, W.K., C.M. McKell and S. White. “*Chrysothamnus nauseosus*: A potential source of natural rubber.” In: E.D. Mc Arthur and B.L. Welch, eds. *Proceedings, Symposium on the Biology of Artemisia and Chrysothamnus*. Provo, Utah, July 9–13, 1984. Ogden. Pp. 389–395. 1986.

Ericameria nauseosa (Pall. ex Pursh) G.L. Nesom & G.I. Baird (*Chondrophora nauseosa* (Pall. ex Pursh) Britton; *Chrysocoma nauseosa* Pall. ex Pursh; *Chrysothamnus nauseosus* (Pall. ex Pursh) Britton)

North America. Perennial shrub or subshrub, florets bright yellow

See *Species Plantarum* 2: 840. 1753, *Flora Americae Septentrionalis*; or, ... 2: 517–518. 1814 [1813], *Memoirs of the Torrey Botanical Club* 5(21): 317. 1894, *An Illustrated Flora of the Northern United States* 3: 326. 1898 and Sampson, A.W., Malmsten, H.E. “Stock-poisoning plants of California.” *Univ. Calif. Div. Agric. Sci. Bull.*, 593. 1935, Fuller, T.C., McClintock, E. *Poisonous Plants of California*. Univ. California Press, Berkeley. 1986, *Phytologia* 75(1): 84. 1993, *Great Basin Naturalist* 55: 84–88. 1995

(This plant has been reported to be toxic to livestock. The plant is so unpalatable that quantities sufficient to cause toxicity are not likely to be ingested. As a tea used to break fevers and promote sweating.)

in English: rabbitbrush, rubber rabbitbrush, salt rabbit brush, stinking rabbitbrush

in Spanish: chamiso blanco

Ericameria nauseosa (Pall. ex Pursh) G.L. Nesom & G.I. Baird var. *latisquamea* (A. Gray) G.L. Nesom & Baird (*Bigelowia graveolens* (Nutt.) A. Gray var. *latisquamea* A. Gray; *Chrysothamnus latisquameus* (A. Gray) Greene; *Chrysothamnus nauseosus* (Pall. ex Pursh) Britton subsp. *latisquameus* (A. Gray) H.M. Hall & Clem.; *Chrysothamnus nauseosus* (Pall. ex Pursh) Britton var. *latisquameus* (A. Gray) H.M. Hall; *Chrysothamnus speciosus* var. *latisquameus* (A. Gray) Greene; *Ericameria nauseosa* (Pall. ex Pursh) G.L. Nesom & Baird subsp. *nauseosa* var. *latisquamea* (A. Gray) G.L. Nesom & Baird)

North America. Perennial shrub or subshrub, florets bright yellow

See *Proceedings of the American Academy of Arts and Sciences* 8: 645. 1873, *Erythea* 3(7): 110. 1895, *Pittonia*

4(20E): 42. 1899 and *University of California Publications in Botany* 7(6–8): 167. 1919, *Publications of the Carnegie Institution of Washington* 326: 212. 1923, *Phytologia* 75(1): 84. 1993

(Wood to make poisonous arrows.)

in English: rabbitbrush, rubber rabbitbrush, salt rabbit brush, stinking rabbitbrush

in Spanish: chamiso blanco

Erigeron L. Asteraceae

Erigeron, an ancient Greek and Latin name for a species of *Senecio* (Theophrastus, *HP.* 7.7.1, and Plinius), possibly from *ear*, *earos* ‘the sap, blood’ and *geron* ‘an old man’, or from *erion* ‘wool’ and *geron*, or from *eri* ‘early’ and *geron*, or from *er* ‘the spring’ and *geron*; see Carl Linnaeus, *Species Plantarum*. 2: 863–865. 1753, *Genera Plantarum*. Ed. 5. 371. 1754, *Flora Peruviana* 3: 37, pl. 261. 1802, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 1958. 1803, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 873. 1809, *Bull. Sci. Soc. Philom. Paris* 1817: 137. 1817, *The Genera of North American Plants* 2: 148. 1818, *Nova Genera et Species Plantarum* (folio ed.) 4: 70. 1820[1818], *Dictionnaire des Sciences Naturelles* [Second edition] 37: 462, 485. 1825, *Dictionnaire des Sciences Naturelles* [Second edition] 39: 404–405. 1826, *Syn. Comp.* 188. 1832, *Mem. Reale Accad. Sci. Torino* 38: 11, tab. 23. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 281–282, 290, 318. 1836, *Flora Telluriana* 2: 50. 1836[1837], *Transactions of the American Philosophical Society*, new series, 7: 310. 1840, *Transactions of the Linnean Society of London* 20: 207. 1847, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 72. 1849, *Flora Chilena* 4: 12–14. 1849, *Annales des Sciences Naturelles; Botanique*, sér. 3 12: 185. 1849, *Genera Plantarum* 2: 280. 1873, *Flora Orientalis* 3: 156. 1875, *Notes on Some Compositae* 98. 1880, *Syn. Fl.* 1(2): 201. 1884, *Bulletin of the Torrey Botanical Club* 26(5): 249. 1899 and *Flora of the Rocky Mountains* 891, 1067. 1917, *Contributions from the Gray Herbarium of Harvard University* 188: 85. 1960, *Acta Horti Bergiani* 20(3): 108. 1962, *Systematic Botany* 7(4): 463. 1982, *Phytologia* 69(4): 250. 1990, *Taxon* 41: 563. 1992, *Phytologia* 76(2): 99. 1994, *Taxon* 44: 611–612. 1995, *Fl. Venez. Guayana* 3: 177–393. 1997, *Sida Bot. Misc.* 20: 1–100. 2000.

Erigeron aphanactis (A. Gray) Greene (*Erigeron concinnus* (Hook. & Arn.) Torr. & A. Gray var. *aphanactis* A. Gray)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 6: 540. 1865, *Flora Franciscana* 4: 389. 1897

(Analgesic, cathartic, emetic, whole plant for stomachache, colic, cramps, and as an eyewash.)

in English: rayless shaggy fleabane

Erigeron aphanactis (A. Gray) Greene var. ***aphanactis*** (*Erigeron aphanactis* var. *congestus* (Greene) Cronquist; *Erigeron concinnus* (Hook. & Arn.) Torr. & A. Gray var. *aphanactis* A. Gray)

North America. Biennial or perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 6: 540. 1865, *Flora Franciscana* 4: 389. 1897 and *Brittonia* 6(2): 177. 1947

(Analgesic, cathartic, emetic, whole plant for stomachache, colic, cramps, and as an eyewash.)

in English: rayless shaggy fleabane

Erigeron bellidiastrum Nutt.

North America. Annual herb

See *Transactions of the American Philosophical Society*, new series, 7: 307. 1840 and *Amer. J. Bot.* 63: 1393–1403. 1976, *Sida* 7: 375–381. 1978

(Ceremonial, dried leaves infusion.)

in English: western daisy fleabane

Erigeron bellidiastrum Nutt. var. ***bellidiastrum***

North America. Annual herb

See *Transactions of the American Philosophical Society*, new series, 7: 307. 1840 and *Amer. J. Bot.* 63: 1393–1403. 1976, *Sida* 7: 375–381. 1978, *Phytologia* 56(1): 55–60. 1984

(Ceremonial, dried leaves infusion.)

in English: western daisy fleabane

Erigeron breviscapus (Vaniot) Hand.-Mazz. (*Aster breviscapus* Vaniot)

China.

See *Species Plantarum* 2: 863–865. 1753 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 12: 495. 1903, *Symbolae Sinicae* 7(4): 1093. 1936

(Febrifuge, sedative.)

Erigeron caespitosus Nutt. (*Erigeron caespitosus* Nutt. var. *laccoliticus* M.E. Jones)

North America. Perennial herb

See *Transactions of the American Philosophical Society*, new series, 7: 307. 1840 and *Amer. J. Bot.* 63: 1393–1403. 1976, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Canad. J. Bot.* 59: 1373–1381. 1981

(Root decoction astringent, for diarrhea, and as an eyewash for eye troubles.)

in English: tufted fleabane

Erigeron canus A. Gray (*Erigeron phoenicodontus* S.F. Blake; *Wyomingia cana* (A. Gray) A. Nelson)

North America. Perennial herb

See *New Manual of Botany of the Central Rocky Mountains* 531. 1909, *Journal of the Washington Academy of Sciences* 21: 327. 1931

(Disinfectant. Ceremonial.)

in English: hoary fleabane

Erigeron compositus Pursh (*Erigeron compositus* Pursh var. *discoideus* A. Gray; *Erigeron compositus* Pursh var. *glabratus* Macoun; *Erigeron compositus* Pursh var. *multifidus* (Rydb.) J.F. Macbr. & Payson; *Erigeron compositus* Pursh var. *typicus* Hook.; *Erigeron gormanii* Greene; *Erigeron trifidus* Hook.)

North America. Perennial herb

See *Flora Americae Septentrionalis*; or, ... 2: 535. 1814[1813], *American Journal of Science, and Arts*, ser. 2, 33(98): 237. 1862, *Catalogue of Canadian Plants* 2: 231. 1884 and *Memoirs of the New York Botanical Garden* 1: 402. 1900, *Pittonia* 4(22C): 156. 1900, *Contributions from the United States National Herbarium* 11: 567. 1906, *New Manual of Botany of the Central Rocky Mountains* 529. 1909, *Contributions from the Gray Herbarium of Harvard University* 49: 75, 78. 1917, *Contributions de l'Institut Botanique de l'Université de Montréal* 36: 61. 1940, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Syst. Bot.* 20: 132–146. 1995, *Amer. J. Bot.* 83(10): 1292–1303. 1996, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 18–22. 1998

(For sores, broken bones.)

in English: cutleaf daisy

Erigeron concinnus (Hook. & Arn.) Torr. & A. Gray (*Distasis concinna* Hook. & Arn.; *Erigeron pumilus* var. *concinus* (Hook. & Arn.) Dorn; *Erigeron pumilus* Nutt. var. *euconcinoides* Cronquist)

North America. Perennial subshrub, herbaceous

See *The Botany of Captain Beechey's Voyage* 350. 1839, *A Flora of North America: containing ...* 2(1): 174. 1841 and *Vascular Plants of Wyoming* 295. 1988

(Analgesic, disinfectant, for body pain and gonorrhea.)

in English: Navajo fleabane

Erigeron concinnus (Hook. & Arn.) Torr. & A. Gray var. ***concinus*** (*Distasis concinna* Hook. & Arn.; *Erigeron brandegeei* A. Gray; *Erigeron pumilus* Nutt. subsp. *concinoides* Cronquist; *Erigeron pumilus* var. *concinus* (Hook. & Arn.) Dorn; *Erigeron pumilus* Nutt. var. *euconcinoides* Cronquist)

North America. Perennial subshrub, herbaceous

See *The Botany of Captain Beechey's Voyage* 350. 1839, *A Flora of North America: containing ...* 2(1): 174. 1841 and *Vascular Plants of Wyoming* 295. 1988

(Analgesic, disinfectant, for body pain and gonorrhea.)

in English: Navajo fleabane

Erigeron concinnus (Hook. & Arn.) Torr. & A. Gray var. ***condensatus*** D.C. Eaton (*Erigeron condensatus* (D.C. Eaton) Greene; *Erigeron pumilus* var. *condensatus* (D.C. Eaton) Cronquist)

North America. Perennial subshrub, herbaceous

See *United States Geological Exploration of the Fortieth Parallel. Botany* 151. 1871, *Bulletin of the Torrey Botanical Club* 24(11): 511. 1897 and *Brittonia* 6(2): 182. 1947

(Analgesic, used for difficult labor and headache.)

in English: Navajo fleabane

Erigeron divergens Torr. & A. Gray (*Erigeron accedens* Greene; *Erigeron divaricatus* Michx.; *Erigeron divaricatus* Nutt.; *Erigeron divergens* Hook.; *Erigeron divergens* fo. *incomptus* (A. Gray) Cronquist; *Erigeron divergens* Torr. & A. Gray var. *typicus* Cronquist; *Erigeron incomptus* A. Gray; *Erigeron solisaltator* G.L. Nesom)

North America. Biennial herb, branching, hairy stem, lanceolate leaves

See *Flora Boreali-Americana* (Michaux) 2: 123. 1803, *Transactions of the American Philosophical Society*, new series, 7: 311. 1840, *A Flora of North America: containing ...* (Torr. & A. Gray) 2(1): 175. 1841, *Lond. Journ. Bot.* 6: 242. 1847, *Syn. Fl. N. Amer.* 1(2): 218. 1884 and *Pittonia* 4(22C): 155. 1900, *Brittonia* 6(2): 260–261. 1947, *Rhodora* 77: 171–195. 1975, *Madroño* 28(3): 145–146, f. 2B. 1981, *Taxon* 30: 705–706. 1981, *Sida* 15: 649–653. 1993

(Analgesic, disinfectant, used for difficult labor, snakebite, eye troubles and headache. Ceremonial, good luck charm.)

in English: spreading fleabane

Erigeron eximius Greene (*Erigeron superbus* Greene ex Rydb.)

North America.

See *Pittonia* 3(18C): 295. 1898 and *Flora of Colorado* 361, 364. 1906

(Febrifuge, sedative, for cough, influenza. Ceremonial, for protection in warfare or hunting; witchcraft medicine, plant infusion as a protection from witches.)

in English: sprucefir fleabane

Erigeron filifolius (Hook.) Nutt. (*Diplopappus filifolius* Hook.; *Diplopappus filifolius* DC.; *Diplopappus filifolius* Less. ex Steud.; *Erigeron filifolius* var. *robustior* M. Peck; *Erigeron filifolius* (Hook.) Nutt. var. *typicus* Cronquist)

North America.

See *Flora Boreali-Americana* (Hooker) 2(7): 21. 1834, *Prodr.* (DC.) 5: 276. 1836, *Nomencl. Bot.* [Steudel], ed. 2. 1: 516. 1840, *Transactions of the American Philosophical Society*, new series, 7: 308. 1840 and *Proceedings of the Biological*

Society of Washington 50(32): 123. 1937, *Brittonia* 6: 203. 1947

(Powdered stems and leaves on sores, cuts and wounds.)

in English: threadleaf fleabane

Erigeron flagellaris A. Gray (*Erigeron divergens* var. *nudiflorus* (Buckley) A. Nelson; *Erigeron flagellaris* A. Gray var. *typicus* Cronquist; *Erigeron nudiflorus* Buckley)

North America.

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 68–69. 1849, *Proceedings of the Academy of Natural Sciences of Philadelphia* 13: 456. 1862 and *New Manual of Botany of the Central Rocky Mountains* 529. 1909, *Brittonia* 28: 263–272. 1976, *Amer. J. Bot.* 63: 247–250. 1976, *Taxon* 29: 357–358. 1980, *Madroño* 43(3): 384–392. 1996

(Analgesic, disinfectant, hemostat, leaves poultice applied to spider bites and snakebite. Ceremonial, fumigant. Veterinary medicine, leaves infusion as eyewash for livestock.)

in English: trailing fleabane

Erigeron foliosus Nutt.

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 309. 1840, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 176. 1847, *Geological Survey of California, Botany* 1: 330. 1876, *Pittonia* 3(13): 25. 1896 and *Rhodora* 87: 517–527. 1985

(Analgesic, febrifuge, for toothache, pustules, skin eruptions, smallpox)

in English: leafy fleabane

Erigeron foliosus Nutt. var. ***foliosus*** (*Erigeron foliosus* Nutt. var. *stenophyllus* (Nutt.) A. Gray; *Erigeron stenophyllus* Nutt.; *Erigeron tenuissimus* Greene)

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 309. 1840, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 176. 1847, *Geological Survey of California, Botany* 1: 330. 1876, *Pittonia* 3(13): 25. 1896

(Analgesic, febrifuge, for toothache, pustules, skin eruptions, smallpox)

in English: leafy fleabane

Erigeron formosissimus Greene (*Erigeron formosissimus* Greene var. *formosissimus*; *Erigeron formosissimus* Greene var. *typicus* Cronquist; *Erigeron formosissimus* Greene var. *viscidus* (Rydb.) Cronquist; *Erigeron glabellus* Nutt. var. *viscidus* (Rydb.) B. Boivin; *Erigeron viscidus* Rydb.)

North America.

See *Bulletin of the Torrey Botanical Club* 25(3): 121, pl. 332, f. 3–4. 1898

(Good luck charm, in hunting.)

in English: beautiful fleabane

Erigeron glabellus Nutt.

North America.

See *Species Plantarum* 2: 863–865. 1753, *The Genera of North American Plants* 2: 147–148. 1818, *Bulletin of the Torrey Botanical Club* 24(6): 294. 1897, *Flora Pyrenaea ...* 2: 264. 1899 and *American Midland Naturalist* 5(3): 58. 1917, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Taxon* 31: 583–587. 1982, *Sida* 12: 409–417. 1987

(Febrifuge, sedative.)

in English: rough fleabane

Erigeron glabellus Nutt. var. ***glabellus*** (*Erigeron asper* Nutt.; *Erigeron ob lanceolatus* Rydb.; *Tessenia aspera* (Nutt.) Lunell)

North America.

See *Species Plantarum* 2: 863–865. 1753, *The Genera of North American Plants* 2: 147–148. 1818, *Bulletin of the Torrey Botanical Club* 24(6): 294. 1897, *Flora Pyrenaea ...* 2: 264. 1899 and *American Midland Naturalist* 5(3): 58. 1917, *Taxon* 31: 583–587. 1982

(Febrifuge, sedative.)

in English: rough fleabane

Erigeron glacialis (Nutt.) A. Nelson (*Aster glacialis* Nutt.; *Erigeron salsuginosus* (Richardson ex R. Br.) A. Gray var. *glacialis* (Nutt.) A. Gray)

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 291. 1840, *Notes on Some Compositae* 93. 1880, *Proceedings of the American Academy of Arts and Sciences* 16: 93. 1881, *Synoptical Flora of North America* 1(2): 209. 1884, *Bulletin of the Torrey Botanical Club* 24(6): 295. 1897, *Leaflets of Botanical Observation and Criticism* 2(10): 197–198. 1912, *Rhodora* 45(534): 264. 1943, *Brittonia* 6(2): 145. 1947, *Taxon* 26: 257–274. 1977, *Taxon* 29: 357–358. 1980, *The Canadian Field-Naturalist* 71(2): 69. 1957, *Sida* 21(2): 671. 2004

(Stimulant, for backache, dizziness.)

in English: subalpine fleabane

Erigeron glacialis (Nutt.) A. Nelson var. ***glacialis*** (*Erigeron callianthemus* Greene; *Erigeron glacialis* var. *hirsutus* (Cronquist) G.L. Nesom; *Erigeron peregrinus* (Banks ex Pursh) Greene subsp. *callianthemus* (Greene) Cronquist; *Erigeron peregrinus* (Banks ex Pursh) Greene var. *angustifolius* (A. Gray) Cronquist; *Erigeron peregrinus* var. *callianthemus* (Greene) Cronquist; *Erigeron peregrinus* (Banks ex Pursh) Greene var. *eucallianthemus* Cronquist; *Erigeron peregrinus* var. *scaposus* (Torr. & A. Gray) Cronquist)

North America.

See *Notes on Some Compositae* 93. 1880, *Bulletin of the Torrey Botanical Club* 24(6): 295. 1897, *Leaflets of Botanical Observation and Criticism* 2(10): 197–198. 1912, *Rhodora* 45(534): 264. 1943, *Brittonia* 6(2): 145. 1947, *Taxon* 26: 257–274. 1977, *Taxon* 29: 357–358. 1980, *The Canadian Field-Naturalist* 71(2): 69. 1957, *Sida* 21(2): 671. 2004

(Stimulant, for backache, dizziness.)

in English: subalpine fleabane

Erigeron grandiflorus Hook. (*Erigeron grandiflorus* Nutt.; *Erigeron grandiflorus* Hoppe ex DC.; *Erigeron grandiflorus* Sessé & Moc.; *Erigeron grandiflorus* Willd. ex Spreng.; *Erigeron simplex* Greene)

North America. Perennial herb

See *Syst. Veg.* (ed. 16) [Sprengel] 3: 519. 1826, *Flora Boreali-Americana* (Hooker) 2(7): 18, t. 123. 1834, *Prodr.* (DC.) 5: 291. 1836, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 31–32. 1834, *Fl. Mexic.*, ed. 2 185. 1894, Greene, Edward Lee (1843–1915), *Flora Franciscana* 4: 387. San Francisco, 1891–1897 [*An attempt to classify and describe the vascular plants of middle California.*] and *Rhodora* 80: 431–440. 1978, *Canad. J. Bot.* 59: 1373–1381. 1981

(Roots used for arrow poison.)

in English: largeflower fleabane

Erigeron grandiflorus Hook. subsp. ***grandiflorus***

North America. Perennial herb

See *Flora Boreali-Americana* (Hooker) 2(7): 18, pl. 123. 1834, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 31–32. 1834, *Flora Franciscana* 4: 387. 1897 and *Rhodora* 80: 431–440. 1978, *Canad. J. Bot.* 59: 1373–1381. 1981

(Roots used for arrow poison.)

in English: largeflower fleabane

Erigeron karvinskianum DC. (*Erigeron karvinskianus* var. *mucronatus* (DC.) Hieron.; *Erigeron mucronatus* DC.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 285. 1836 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28(5): 585. 1901

(Ceremonial, for decorating houses and temples during festivals.)

in India: pottu poovu

Erigeron linearis (Hook.) Piper (*Diplopappus linearis* Hook.; *Erigeron linearis* Spreng. ex DC., nom. inval.; *Erigeron peucephyllus* A. Gray)

North America.

See *Flora Boreali-Americana* (Hooker) 2(7): 21–22. 1834, *Prodr.* (DC.) 5: 474. 1836, *Notes on Some Compositae* 89. 1880, *Proc. Amer. Acad. Arts* 16: 89. 1881 and *Contributions from the United States National Herbarium* 11: 567. 1906

(Whole plant decoction taken for tuberculosis.)

in English: desert yellow fleabane

Erigeron neomexicanus A. Gray (*Erigeron delphinifolius* Willd. subsp. *neomexicanus* (A. Gray) Cronquist; *Erigeron delphinifolius* Willd. var. *euneomexicanus* Cronquist; *Erigeron delphinifolius* var. *neomexicanus* (A. Gray) Cronquist)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 19: 2. 1883 and *Brittonia* 6(2): 263. 1947, *Amer. J. Bot.* 64: 680–686. 1977, *Amer. J. Bot.* 86(7): 1003–1013. 1999

(Powdered plant applied to dog or bear bite sores.)

in English: New Mexico fleabane

Erigeron philadelphicus L. (*Erigeron philadelphicus* L. var. *glaber* Henry; *Erigeron philadelphicus* L. var. *scaturicola* (Fernald) Fernald; *Erigeron purpureus* Aiton; *Tessenia philadelphica* (L.) Lunell)

North America. Biennial or perennial herb, slender, branching, spatulate leaves

See *Species Plantarum* 2: 863. 1753, *Flora Pyrenaea ...* 2: 264. 1899 and *American Midland Naturalist* 5(3): 59. 1917, *Sida* 7: 375–381. 1978, *Taxon* 29: 357–358. 1980, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *New Zealand Journal of Botany* 20: 169–186. 1982, *Taxon* 31(2): 344–360. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Sida* 12: 409–417. 1987, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Erigenia* 11: 1–8. 1991, *Fl. Mascareignes* 109: 106. 1993

(Contact dermatitis. Antidiarrheal, diuretic, sudorific, antidote, analgesic, antihemorrhagic, febrifuge, anticonvulsive, menstruation troubles, abortifacient, for headache, itch, sores, hemorrhages, cough, catarrh, spitting of blood, colds, poison ivy, kidney troubles and epilepsy; an infusion taken for diarrhea, fevers, coughs and bronchitis, kidney stones, to stop bleeding.)

in English: common fleabane, daisy fleabane, fleabane, Philadelphia fleabane

Erigeron philadelphicus L. var. ***philadelphicus*** (*Erigeron philadelphicus* L. var. *scaturicola* (Fernald) Fernald)

North America. Biennial or perennial herb

See *Species Plantarum* 2: 863. 1753, *Flora Pyrenaea ...* 2: 264. 1899 and *American Midland Naturalist* 5(3): 59. 1917, *Sida* 7: 375–381. 1978, *Taxon* 29: 357–358. 1980, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *New Zealand Journal of Botany* 20: 169–186. 1982, *Taxon* 31(2): 344–360. 1982, *Le Naturaliste Canadien* 111: 447–449.

1984, *Sida* 12: 409–417. 1987, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Erigenia* 11: 1–8. 1991, *Fl. Mascareignes* 109: 106. 1993

(Contact dermatitis. Antidiarrheal, diuretic, sudorific, antidote, analgesic, antihemorrhagic, febrifuge, anticonvulsive, menstruation troubles, abortifacient, for headache, itch, sores, hemorrhages, cough, catarrh, spitting of blood, colds, poison ivy, kidney troubles and epilepsy; an infusion taken for diarrhea, fevers, coughs and bronchitis, kidney stones, to stop bleeding.)

in English: common fleabane, daisy fleabane, fleabane, Philadelphia fleabane

Erigeron pulchellus Michx. (*Aster pulchellus* Willd.; *Aster pulchellus* Turcz. ex Herder; *Aster pulchellus* D.C. Eaton; *Aster pulchellus* Hohen.; *Erigeron bellidifolius* Muhl. ex Willd.; *Erigeron pulchellus* (Willd.) DC.; *Erigeron pulchellus* DC.; *Erigeron pulchellus* Turcz.; *Erigeron pulchellus* Hook.)

North America. Perennial herb

See *Flora Boreali-Americana* 2: 124. 1803, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 2019. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 287. 1836 and *Sida* 7: 375–381. 1978, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989

(Abortifacient, diuretic, analgesic, anticonvulsive, diaphoretic, for headache, tuberculosis, colds, cough, hemorrhages, epilepsy, sores, kidney ailments.)

in English: blue spring daisy, poor-Robin's fleabane, Robin's plantain, rose petty

Erigeron pulchellus Michx. var. ***pulchellus*** (*Erigeron bellidifolius* Muhl. ex Willd.)

North America. Perennial herb

See *Flora Boreali-Americana* 2: 124. 1803, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 2019. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 287. 1836 and *Sida* 7: 375–381. 1978, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989

(Abortifacient, diuretic, analgesic, anticonvulsive, diaphoretic, for headache, tuberculosis, colds, cough, hemorrhages, epilepsy, sores, kidney ailments.)

in English: blue spring daisy, poor-Robin's fleabane, Robin's plantain, rose petty

Erigeron pumilus Nutt. (*Erigeron pumilus* Hook.)

North America. Perennial herb

See *The Genera of North American Plants* 2: 147. 1818 and *American Midland Naturalist* 5(3): 59. 1917, *Taxon* 29: 357–358. 1980, *Sida* 12: 409–417. 1987

(Roots infusion as eye tonic.)

in English: shaggy fleabane

Erigeron pumilus Nutt. subsp. ***pumilus*** (*Erigeron pumilus* Nutt. subsp. *typicus* Cronquist; *Erigeron pumilus* Nutt. var. *pumilus*; *Tessenia pumila* (Nutt.) Lunell; *Tessenia pumila* Lunell)

North America. Perennial herb

See *The Genera of North American Plants* [Nuttall] 2: 147. 1818 and *American Midland Naturalist* 5(3): 59. 1917, *Brittonia* 6: 179. 1947, *Taxon* 29: 357–358. 1980, *Sida* 12: 409–417. 1987

(Roots infusion as eye tonic.)

in English: shaggy fleabane

Erigeron speciosus (Lindl.) DC. (*Erigeron conspicuus* Rydb.; *Erigeron macranthus* Nutt.; *Erigeron macranthus* Sch. Bip. ex Klatt, nom. illeg.; *Erigeron speciosus* var. *conspicuus* (Rydb.) Breitung; *Erigeron speciosus* var. *macranthus* (Nutt.) Cronquist; *Erigeron subtrinervis* subsp. *conspicuus* (Rydb.) Cronquist; *Erigeron subtrinervis* var. *conspicuus* (Rydb.) Cronquist; *Stenactis speciosa* Lindl.)

North America. Perennial subshrub, herbaceous

See *Edwards's Botanical Register* 19: pl. 1577. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 284. 1836, *Transactions of the American Philosophical Society*, new series, 7: 310. 1840, *Leopoldina* 20(8–9): 91. 1882 and *Memoirs of the New York Botanical Garden* 1: 400–401. 1900, *Bulletin of the Torrey Botanical Club* 70: 269, 271. 1943, *Vascular Plants of the Pacific Northwest* 5: 193. 1955, *The Canadian Field-Naturalist* 71(2): 69. 1957, *Rhodora* 87: 517–527. 1985, *Rhodora* 89: 319–325. 1987, *Sida* 12: 409–417. 1987, *Rhodora* 94: 48–62. 1992, *Rhodora* 103: 202–218. 2001

(Analgesic, contraceptive, used for menstrual pain.)

in English: Aspen fleabane, Oregon fleabane

Erigeron strigosus Muhl. ex Willd. (*Diplemium strigosum* (Muhl. ex Willd.) Raf.; *Erigeron annuus* (L.) Pers. subsp. *strigosus* (Muhl. ex Willd.) Wagenitz; *Erigeron ramosus* (Walter) Britton, Sterns & Poggenb.; *Erigeron strigosus* Muhl. ex Willd. var. *discoideus* Robbins ex A. Nat.* 37: 462, 485. 1825, *Dictionnaire des Sciences Naturelles* 39: 404. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 299. 1836, *Flora Telluriana* 2: 50. 1836 [1837], *Index Seminum* [St. Petersburg] 5: 2169. 1839, *Index Seminum* [St. Petersburg] 6: 63. 1840, *Synoptical Flora of North America* 1(2): 219. 1884 and *Illustrierte Flora von Mittel-Europa*, ed. 2 6/3 (2): 96. 1965, *Sida* 7: 375–381. 1978, *Botaniceskij Žurnal SSSR* 64(4): 582–589. 1979, *Rhodora* 87: 517–527. 1985, *Annals of the Missouri Botanical Garden* 74: 432–433. 1987, *Rhodora* 89: 319–325. 1987, *American Journal of Botany* 75: 652–668. 1988, *Rhodora* 91: 296–314. 1989, *Novosti Sistematiki Vysshchikh Rastenii* 28: 148. 1991, *Bot. Helv.* 113(1): 1–14. 2003

(Analgesic, contraceptive, for heart troubles, headache, menstrual pain.)

in English: daisy fleabane, fleabane, prairie fleabane, rough daisy fleabane, rough fleabane, white-top

Erigeron sublyratus Roxb. ex DC.

India. Hairy herbs, leaves lanceolate, pink ray florets, yellow disc florets

See *Enum. Hort. Berol. Alt.* 2: 324. 1822, *Enum. Pl.* [Besser] 33. 1822, *Consp. Fl. Eur.* 2: 388. 1879

(Whole plant astringent, restorative.)

Erinocarpus Nimmo ex J. Graham Tiliaceae

From the Greek *erion* 'wool', *erineos* 'woollen' and *karpos* 'fruit', referring to the spiny fruits, see *Cat. Pl. Bombay* 21. 1839.

Erinocarpus nimmonii J. Graham

India. Trees, yellow flowers in lax terminal panicles, woody triquetrous winged fruits

See *A Catalogue of the Plants Growing in Bombay and its Vicinity* 21. 1839, *Retzia*, sive, *Observationes botanicae, quas de plantis horti botanici Bogoriensis* 1: 137. 1855, *The Flora of British India* 1: 394. 1874

(For skin diseases, itch.)

in India: cher, chira, jangli-bhendi

Eriobotrya Lindley Rosaceae

Greek *erion* 'wool' and *botrys* 'cluster, a bunch of grapes, a cluster of grapes', the panicles are woolly and clustered; see J. Lindley, in *Transactions of the Linnean Society of London. Botany*. 13(1): 96, 102. 1821 and *Fieldiana, Bot.* 24(4): 432–484. 1946, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 2202–2206. 2001, *Ceiba* 44(2): 105–268. 2003 [2005], *Biodiver. Tabasco* 65–110. 2005.

Eriobotrya japonica (Thunberg) Lindley (*Crataegus bibas* Lour.; *Mespilus japonica* Thunb.; *Photinia japonica* (Thunb.) Benth. & Hook. f. ex Asch. & Schweinf.)

Subtropics, China, Japan. Evergreen tree or shrub, grey rough bark, young branches robust, dull green stiff thinly coriaceous leaves stalkless or briefly petiolate, scented creamy white flowers in woolly terminal clusters, calyx cupuliform, yellow fleshy edible fruit pear-shaped, pulp yellowish, large ovoid brown seeds, drought resistant when established, visited by bees and beetles

See *Species Plantarum* 1: 475–479. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* (426). 1754, *Enumeratio Systematica Plantarum* 15. 1760, *Histoire des plantes de la Guiane Française* 1: 85–86, pl. 33. 1775, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 199, 208. 1780, *Flora Cochinchinensis* 1: 319–320. 1790, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 407, t. 4. 1801, *Syn. Pl.* 2: 658. 1807, *Botanical Register*; consisting of coloured ... 6: pl. 491. 1820, *Transactions of the Linnean Society of London* 13(1): 102. 1821, *Illustration de la Flore d'Égypte* 73. 1887, *Histoire des Plantes* 11: 286. 1891 and *Taxon* 16(5): 383. 1967, *Proceedings of the Indian Academy of Sciences. Plant Sciences* 100: 17–21. 1990, *Acta Horticulturae Sinicae* 26(2): 71–76. 1999, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85: 2202–2206. 2001

(Used in Ayurveda and Unani. Poisonous, cyanogenic glycoside, pit kernel from cracked seeds, toxic if large quantities eaten. Fruits sedative, used in vomiting and relieving thirst. Leaves infusion emollient, for cough, bronchitis, diarrhea, vomiting, arthritis, swelling. Flowers expectorant.)

in English: Japanese loquat, Japanese medlar, Japanese plum, loquat

in French: bibassier, néflier du Japon

in Latin America: jacote cereca, jacote chino, jocociruelo, jocote cereca, jocote chino, nispero, níspero, put-kan

in East Africa: ekeragwati (Kisii), mtangawizi (Chagga), murungati (Kikuyu)

in China: pi pa, pi pa ye

in India: ilakotta, labkote, lakkote, lakkote hannu, lakkotta, lakote, lakote hannu, laktta, laukat, logat, lokat, lokvaat hannu, lottaka, nokkotta, nokkttamaram

in Japan: biwa (= the biwa is the three stringed instrument which the fruit resembles in shape)

in Tibetan: zhu-mkhan dmanpa

in Vietnam: nhot tay, phi pha, ti ba

Eriocaulon L. Eriocaulaceae

From the Greek *erion* 'wool' and *kaulos* 'a stem, a branch or stalk', referring to the scapes or to the woolly stems of some species; see Carl Linnaeus, *Species Plantarum*. 1: 87. 1753 and *Genera Plantarum*. Ed. 5. 38. 1754 and *Fl. Madagasc.* 36: 1–37. 1955, *Fieldiana, Bot.* 24(1): 374–380. 1958, *Phytologia* 54(1): 68–81. 1983, *Acta Phytotaxonomica Sinica* 29(4): 301, 309, 312. 1991, *Fl. Mesoamer.* 6: 178–184. 1994.

Eriocaulon brownianum Mart. (*Eriocaulon brownianum* Mart. ex Hook. f.)

Sri Lanka, India. Slender herb, depressed globose head, villos receptacle, dark brown ovoid seeds

See *Plantae Asiaticae Rariores* 3: 25–26, pl. 248. 1832, *The Flora of British India* 6(19): 576. 1894

(Whole plant crushed and applied on skin diseases. Ceremonial.)

in China: yun nan gu jing cao

in India: button poovu

Eriocaulon buergerianum Körnicke (*Eriocaulon chishingsanensis* C.E. Chang; *Eriocaulon pachypetalum* Hayata; *Eriocaulon whangii* Ruhland)

China.

See *Ann. Mus. Bot. Lugduno-Batavi* 3: 163. 1867 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 10: 52–53, 55, f. 29. 1921, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(100): 1040–1041. 1930, *Fl. Taiwan* 5: 180. 1978, Ma Weiliang, *Eriocaulaceae*. In: Wu Kuo-fang, ed., *Fl. Reipubl. Popularis Sin.* 13(3): 20–63. 1997

(For skin diseases.)

in China: gu jing cao

Eriocaulon cinereum R. Brown (*Eriocaulon cinereum* var. *sieboldianum* (Siebold & Zuccarini ex Steudel) T. Koyama; *Eriocaulon cinereum* var. *sieboldianum* (Siebold & Zucc. ex Steud.) T. Koyama ex Huang; *Eriocaulon formosanum* Hayata; *Eriocaulon heteranthum* Benthams; *Eriocaulon sieboldianum* Siebold & Zuccarini ex Steudel)

China. Dwarf, tufted, scapigerous, marshy herb, floral heads globular, capsule furrowed, reddish brown ovate seeds, green manure

See *Prodromus Florae Novae Hollandiae* 254. 1810, *Synopsis Plantarum Glumacearum* 2: 272. 1855, *Flora Hongkongensis* 382–383. 1861 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 10: 49–50, f. 27. 1921, *Flora of Japan* 266. 1965, *Pollen Fl. Taiwan* 260. 1972

(Leaves chewed to cure toothache, a poultice for pimples.)

in China: bai yao gu jing cao

Eriocaulon sexangulare L. (*Eriocaulon cantoniense* Hooker & Arnott; *Eriocaulon consanguineum* Kunth; *Eriocaulon kwangtungense* Ruhland; *Eriocaulon longifolium* Nees ex Kunth; *Eriocaulon longifolium* Raf.; *Eriocaulon miyagianum* Koidz.; *Eriocaulon pterosepalum* Hayata; *Eriocaulon pterosepalum* Herzog; *Eriocaulon quadrangulare* Lour.; *Eriocaulon quadriangulare* Lour. ex Moldenke; *Eriocaulon sexangulare* Willd. ex Link, non *Eriocaulon sexangulare* L.; *Eriocaulon sexangulare* var. *longifolium* (Nees ex Kunth) Hook. f.; *Eriocaulon sinicum* Miquel; *Eriocaulon sinii* Ruhland; *Eriocaulon wallichianum* Thwaites, nom. illeg.; *Eriocaulon wallichianum* Wight ex Kunth; *Eriocaulon wallichianum* Heyne ex Moldenke; *Eriocaulon wallichianum* Martius; *Eriocaulon wallichianum* var. *tenellum* Wight ex Moldenke; *Eriocaulon willdenovianum* Moldenke)

China.

See *Sp. Pl.* 1: 87. 1753, *Flora Cochinchinensis* 60. 1790, *Plantae Asiaticae Rariores* 3: 26–27, pl. 249. 1832, *The Botany of Captain Beechey's Voyage* 219. 1837, *Autikon Botanikon* 188. 1840, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 566–568. 1841, *Journal de Botanique Néerlandaise* 1: 87. 1861, *Enumeratio Plantarum Zeylanicae* 341. 1864, *The Flora of British India* 6(19): 580. 1893 and *Botanical Magazine* 28(331): 171–172. 1914, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 10: 55, f. 30. 1921, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(100): 1041–1042. 1930, *Known Geogr. (Astringent, disinfectant.)

in China: hua nan gu jing cao

in India: aaru moole kaanda, betta gundu kaddi hullu

Eriochloa Kunth Poaceae (Gramineae)

Woolly grass, hairy spikelets and pedicels, from the Greek *erion* 'wool' and *chloe*, *chloa* 'grass', *Paspalum*-like, see *Flora Boreali-Americana* 1: 47. 1803, *Essai d'une Nouvelle Agrostographie* 49, 168, t. 10, f. 10. 1812, *Nova Genera et Species Plantarum* 1: 94–95, t. 30. 1815 [1816] [folio, 1: 78. 1816], Friedrich W.H.A. von Humboldt, Aimé J.A. Bonpland and Carl S. Kunth, *Nova Genera et Species Plantarum*. 1: 94–95. Lutetiae Parisorum [Paris] 1815–1825, *Fundamenta Agrostographiae* 103–104, t. 4. 1820 [1822], *Hortus Regius Botanicus Berolinensis* 1: 51, 273, 1827, *Bulletin Botanique [Genève]* 1: 220. 1830, *Nomenclator Botanicus. Editio secunda* 1: 37, 66. 1840 and *Contributions from the United States National Herbarium* 12(6): 183–258. 1909, *N. Amer. Fl.* 17: 157. 1912, *Acta Phytotaxonomica et Geobotanica* 11: 41. 1942, *Fieldiana, Botany* 24(2): 38–331. 1955, *Kurtziana* 2: 95–106. 1965, *Amer. J. Bot.* 66: 907–913. 1979, *Iselya* 2: 15–19. 1983, *Flora Novo-Galiciana* 14: 1–436. 1983, R.B. Shaw & R.B. Webster, "The genus *Eriochloa* (Poaceae: Paniceae) in North and Central America." *Sida* 12(1): 165–207. 1987, *Flora Mesoamericana* 6: 333–335. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768–774. 1994, *Flora Fanerogámica Argentina* 19(1): 11–16. 1995, *Memoirs of the New York Botanical Garden* 78: 509–540. 1996, Melvin R. Duvall, Jeffrey D. Noll and Alexandra H. Minn, "Phylogenetics of Paniceae (Poaceae)." *Am. J. Bot.* 88: 1988–1992. 2001, *Am. J. Bot.* 88: 1993–2012. 2001, *Contributions from the United States National Herbarium* 46: 233–239, 242, 246–247, 296–297, 298. 2003.

Eriochloa procera (Retz.) C.E. Hubb. (*Agrostis procera* Retz.; *Agrostis procera* A. Rich., nom. illeg., non *Agrostis procera* Retz.; *Agrostis ramosa* (Retz.) Poir.; *Eriochloa annulata* (Fluegge) Kunth; *Eriochloa polystachya* Hook.f., nom. illeg., non *Eriochloa polystachya* Kunth; *Eriochloa polystachya* var. *annulata* (Fluegge) Maiden & Betche; *Eriochloa procera* var. *procera*; *Eriochloa ramosa* (Retz.) Kuntze; *Eriochloa ramosa* var. *barbata* Peter; *Helopus annulatus* (Fluegge) Nees; *Helopus laevis* Trin.; *Milium ramosum* Retz.; *Paspalum annulatum* Fluegge; *Piptatherum annulatum* (Fluegge) J. Presl, nom. illeg., non *Piptatherum annulatum* Raddi; *Thysanolaena procera* (Retz.) Mez) (from the Latin *procera*, *a*, *um*, 'high, tall')

Tropics, Africa, Asia, Australia. Short lived perennial or slender annual, leafy, herbaceous, caespitose, erect or ascending or sprawling, with many branches or simple, rooting at the lower nodes, leaf blades long-acuminate and finely pointed, leaf sheath smooth and glabrous, ligule a fringe of hairs, panicles contracted and loose, spikelets solitary or paired, glabrous pedicel, fertile floret mucronate, lower glume minute and cupular sterile lemma acute, naturalized weed of cultivation, ruderal, high tolerance of saline condition, good nutritious fodder, forage crop, palatable, grows on disturbed ground, grassland, open areas, jungle, damp areas, scrubs, wetlands, wet places, marshland, heavy soils, seasonally flooded sites, along irrigation canals, plantations

See *Observationes Botanicae* 4: 19. 1786, *Observationes Botanicae* 6: 22. 1791, *Graminum Monographiae ... Pars. I. Paspalum. Reimaria* 133. 1810, *Encyclopédie Méthodique, Botanique Suppl.* 1: 257. 1810, *Nov. Gen. (Used in Ayurveda.)

in English: spring grass

in India: jurna, jurnahva, karungaani pul, karungani pillu, maathangi hullu, maathanka pullu, mathanka pillu, tadambaran pullu, tandambaran pillu

in Thailand: ya nok, ya yung, yaa nok, yaa yuung

Eriodictyon Benth. Hydrophyllaceae (Boraginaceae)

From the Greek *erion* 'wool' and *diktyon* 'net', undersurface of leaves, see *Nova Genera et Species Plantarum* (quarto ed.) 3: 126–127. 1818[1819], *The botany of the voyage of H.M.S. Sulphur* 35–36. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 183. 1846.

Eriodictyon angustifolium Nutt. (*Eriodictyon angustifolium* Nutt. var. *amplifolium* Brand; *Eriodictyon glutinosum* Benth. var. *angustifolium* (Nutt.) Torr.)

North America. Perennial shrub

See *Journal of the Academy of Natural Sciences of Philadelphia* 1: 181. 1848, *Explorations and Surveys for a Railroad Route* 4(5; 4): 124. 1857

(Leaves decoction as a wash for cuts and wounds, also used for colds, cough, tuberculosis, indigestion, venereal disease, diarrhea, vomiting, dyspepsia, and as a laxative, an expectorant.)

in English: narrow-leaved yerba santa, narrowleaf yerba santa

Eriodictyon californicum (Hook. & Arn.) Torr. (*Eriodictyon californicum* Decne.; *Wigandia californica* Hook. & Arn.)

North America. Perennial shrub

See *The Botany of Captain Beechey's Voyage* 364, pl. 88. 1839, *Voyage autour du monde sur la frégate la Venus ... Atlas.* 22. 1846, *Report on the United States and Mexican Boundary ... Botany* 2(1): 148. 1859

(Antirheumatic, analgesic, laxative, expectorant, astringent, used for colds, cough, whooping cough, tuberculosis, rheumatism, indigestion, venereal disease, diarrhea, vomiting, dyspepsia.)

in English: California yerba santa, yerba santa

Eriodictyon crassifolium Benth.

North America. Perennial shrub

See *The Botany of the Voyage of H.M.S. Sulphur* 35–36. 1844

(For lung troubles.)

in English: thickleaf yerba santa

Eriodictyon crassifolium Benth. var. ***crassifolium***

North America. Perennial shrub

See *The Botany of the Voyage of H.M.S. Sulphur* 35–36. 1844

(For lung troubles.)

in English: thickleaf yerba santa

Eriodictyon tomentosum Benth.

North America. Perennial shrub

See *The Botany of the Voyage of H.M.S. Sulphur* 35–36. 1844

(For lung troubles.)

in English: woolly yerba santa

Eriodictyon trichocalyx A. Heller

North America. Perennial shrub

See *Muhlenbergia; a journal of botany* 1(5): 108–109. 1904

(Antirheumatic, blood purifier, analgesic, laxative, expectorant, astringent, used for colds, cough, whooping cough, tuberculosis, rheumatism, indigestion, venereal disease, diarrhea, vomiting, dyspepsia.)

in English: hairy yerba santa, San Diego yerbasanta

Eriodictyon trichocalyx A. Heller var. ***lanatum*** (Brand) Jeps. (*Eriodictyon californicum* (Hook. & Arn.) Torr. var. *lanatum* Brand; *Eriodictyon lanatum* (Brand) Abrams; *Eriodictyon trichocalyx* A. Heller subsp. *lanatum* (Brand) Munz)

North America. Perennial shrub

See *Das Pflanzenreich* IV. 251(Heft 54): 142. 1913, *A Manual of the Flowering Plants of California ...* 834. 1925

(Leaves decoction as a wash for cuts and wounds, also used for colds, cough, tuberculosis.)

in English: hairy yerba santa, San Diego yerbasanta

Eriodictyon trichocalyx A. Heller var. *trichocalyx*

North America. Perennial shrub

See *Muhlenbergia*; a journal of botany 1(5): 108–109. 1904

(Leaves decoction as a wash for cuts and wounds, also used for colds, cough, tuberculosis.)

in English: hairy yerba santa, San Diego yerbasanta

Erioglossum Blume Sapindaceae

From the Greek *erion* ‘wool’ and *glossa* ‘tongue’, referring to the petals or to the woolly tongue like stigma; see Karl Ludwig von Blume (1796–1862), *Bijdragen tot de flora van Nederlandsch Indië*. 229. 1825.

Erioglossum edule Blume

Malaysia. Small tree, odd pinnate pubescent beneath leaves, white flowers in panicles

See *Bijdragen tot de flora van Nederlandsch Indië* 5: 229. 1825

(Fruit astringent. Seeds decoction in whooping cough. Root decoction to treat coughing, fever; roots and leaves to treat fever. Leaves poultice for itch; leaves decoction febrifuge.)

Malay names: mertajam, terajam

***Eriogonum Michaux* Polygonaceae**

Greek *erion* ‘wool’ and *gony* ‘joint, knee’, referring to the stems and to the downy nodes, see *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *Transactions of the Linnean Society of London* 17(3): 413. 1836, *Journal of the Academy of Natural Sciences of Philadelphia* 1(2): 166. 1848, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 16–17. 1848, *Proceedings of the American Academy of Arts and Sciences* 12: 259, 262. 1877, *Flora Franciscana* 2: 146, 151. 1891 and *Lexikon Generum Phanerogamarum* 204. 1903, *Flora of the Rocky Mountains* 211. 1917, Stokes, Susan G., *The genus Eriogonum*; a preliminary study based on geographic distribution. San Francisco, Calif. [J. H. Neblett pressroom] 1936, *Journal of the Washington Academy of Sciences* 26(7): 304–305. 1936, *Leaflets of western botany*, vol. 11, no. 3, August 26, 1937, *Boissiera*. Mémoires du Conservatoire de Botanique et de l’Institut de Botanique Systématique de l’Université de Genève 10: 92. 1964, *Sida* 3(2): 82. 1967, *Current Topics in Plant Science* 1969: 237. 1969, *Great Basin Naturalist* 36(3): 298. 1976, *Brittonia* 56(4): 299. 2004, *Sida* 22(2): 857. 2006.

Eriogonum abertianum Torrey (*Eriogonum abertianum* subsp. *pinetorum* (Greene) S. Stokes; *Eriogonum abertianum* var. *abertianum*; *Eriogonum abertianum* var. *cyclosepalum* (Greene) Fosberg; *Eriogonum abertianum* var. *lappulaceum* (Greene) S. Stokes; *Eriogonum abertianum*

var. *neomexicanum* Gandoger; *Eriogonum abertianum* var. *ruberrimum* Gandoger; *Eriogonum abertianum* var. *villosum* Fosberg; *Eriogonum cyclosepalum* Greene; *Eriogonum pinetorum* Greene)

North America. Species exceedingly variable

See Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance* from Fort Leavenworth in Missouri to San Diego in California: including part of the Arkansas, Del Norte, and Gila Rivers. 150. Washington, 1848 and *Bulletin de la Société Botanique de Belgique* 42(3): 185–186. 1906, *Muhlenbergia*; a journal of botany 6: 1, 3. 1910, *The Genus Eriogonum* 37. 1936, Fosberg, Francis Raymond (1908–1993) “*Eriogonum abertianum* and its varieties.” *Madroño*, 4: 189–194. 1938

(A lotion for skin diseases, on humans and horses.)

in English: Abert’s buckwheat, Abert’s wild buckwheat

Eriogonum abertianum Torrey var. *abertianum*

North America.

See *Notes of a military reconnaissance* 150. 1848 and *Bulletin de la Société Botanique de Belgique* 42(3): 185–186. 1906, *Muhlenbergia*; a journal of botany 6: 1, 3. 1910, *The Genus Eriogonum* 37. 1936, Fosberg, Francis Raymond (1908–1993) “*Eriogonum abertianum* and its varieties.” *Madroño*, 4: 189–194. 1938, *Phytologia* 54: 302–309. 1983

(A lotion for skin diseases, on humans and horses.)

in English: Abert’s buckwheat, Abert’s wild buckwheat

Eriogonum alatum Torrey (*Pterogonum alatum* (Torrey) H. Gross)

North America. Perennial subshrub

See *Rep. Exped. Zuni Colorado Rivers*. 168, plate 8. 1853 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49(2): 239. 1913

(Emetic, astringent, analgesic, stomachic, a mixture of shredded roots and water used to treat internal ailments; root infusion for diarrhea, sore gums, cough. Ceremonial.)

in English: winged buckwheat

Eriogonum alatum Torrey var. *alatum* (*Eriogonum alatum* subsp. *mogollense* (S. Stokes ex M.E. Jones) S. Stokes; *Eriogonum alatum* Torr. subsp. *triste* (S. Watson) S. Stokes; *Eriogonum alatum* var. *mogollense* S. Stokes ex M.E. Jones; *Eriogonum triste* S. Watson; *Pterogonum alatum* (Torrey) H. Gross)

North America. Perennial subshrub

See *Rep. Exped. Zuni Colorado Rivers*. 168, plate 8. 1853, *Proceedings of the American Academy of Arts and Sciences* 10: 347. 1875 and *Contributions to Western Botany* 11: 15. 1903, *Botanische Jahrbücher für Systematik*,

Pflanzengeschichte und Pflanzengeographie 49(2): 239. 1913, *The Genus Eriogonum* 20. 1936

(Emetic, astringent, analgesic, stomachic, a mixture of shredded roots and water used to treat internal ailments; root infusion for diarrhea, sore gums, cough. Ceremonial.)

in English: winged buckwheat

Eriogonum androsaceum Bentham (*Eriogonum flavum* Nuttall subsp. *androsaceum* (Bentham) S. Stokes; *Eriogonum flavum* Nutt. var. *androsaceum* (Benth.) M.E. Jones)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 14(1): 9. 1856 and *Contributions to Western Botany* 11: 7. 1903, *The Genus Eriogonum* 117. 1936

(Decoction used in sweatbaths for rheumatism, and for internal pain. A strong decoction of the plants used for syphilis.)

in English: rock-jasmine wild buckwheat, rockjasmine buckwheat

Eriogonum annuum Nuttall (*Eriogonum annuum* subsp. *cymosum* (Bentham) S. Stokes; *Eriogonum annuum* subsp. *hitchcockii* (Gandoger) S. Stokes; *Eriogonum annuum* subsp. *hitchcockii* S. Stokes; *Eriogonum annuum* var. *cymosum* (Benth.) S. Stokes; *Eriogonum annuum* var. *cymosum* S. Stokes)

North America. Annual to biennial

See *New Fl.* (Rafinesque) 4: 53. 1837, *Trans. Amer. Philos. Soc.* n.s. 5(6[2]): 164–165. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14: 19. 1856 and *Bulletin de la Société Botanique de Belgique* 42(3): 187. 1906, *The Genus Eriogonum* 40. 1936, *Phytologia* 64: 390–398. 1988

(Diuretic, used in the treatment of sore mouths in children. Magico-religious beliefs, a protection against witches.)

in English: annual buckwheat, annual wild buckwheat

Eriogonum arcuatum Greene (*Eriogonum jamesii* Benth. var. *arcuatum* (Greene) S. Stokes)

North America.

See *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(1): 7–8. 1856 and *Pittonia* 4(25A): 319–320. 1901, *Bull. Torrey Bot. Club.* 33: 51. 1906, *Phytologia* 25: 202. 1973, *Harvard Pap. Bot.* 9: 157. 2004

(Used ceremonially.)

Eriogonum atrorubens Engelmann var. *atrorubens*

North America.

See *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *Memoir of a Tour to Northern Mexico* 108–109. 1848 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49(2): 239. 1913

(Root used as a treatment for toothache.)

in English: red wild buckwheat

Eriogonum baileyi S. Watson (*Eriogonum baileyi* S. Watson var. *baileyi*; *Eriogonum vimineum* Douglas ex Bentham subsp. *baileyi* (S. Watson) S. Stokes)

North America. Annual herb, closely related to and sometimes difficult to distinguish from *Eriogonum elegans* and *Eriogonum brachyanthum*

See *Transactions of the Linnean Society of London* 17(3): 416. 1836, *Proc. Amer. Acad. Arts.* 10: 348. 1875 and *The Genus Eriogonum* 49–50. 1936

(Tonic, antiseptic, for skin diseases.)

in English: Bailey's buckwheat

Eriogonum cernuum Nuttall (*Eriogonum cernuum* subsp. *tenue* (Torrey & A. Gray) S. Stokes; *Eriogonum cernuum* subsp. *viminale* S. Stokes; *Eriogonum cernuum* var. *psammophilum* S.L. Welsh; *Eriogonum cernuum* var. *tenue* Torrey & A. Gray; *Eriogonum cernuum* var. *umbraticum* Eastwood; *Eriogonum cernuum* var. *viminale* (S. Stokes) Reveal)

North America. Annual herb

See *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 14–15. 1848, *J. Acad. Nat. Sci. Philadelphia*, ser. 2, 1: 162. 1848, *Proceedings of the American Academy of Arts and Sciences* 8: 182–183. 1870, *Proceedings of the California Academy of Sciences*, Series 2, 6(18): 319. 1896 and *The Genus Eriogonum* 41. 1936, *Taxon* 16: 410. 1967, *Supplement to A California Flora* 52. 1968, *A Utah Flora*: Third Edition, revised 503. 2003

(Tonic, antiseptic, for skin and kidney diseases, rashes, insect bite, red ant bite.)

in English: nodding buckwheat, nodding wild buckwheat

Eriogonum compositum Douglas ex Bentham (*Eriogonum compositum* Douglas ex Benth. var. *compositum*)

North America. Perennial subshrub or herb

See *Edwards's Bot. Reg.* 21: t. 1774. 1835

(Roots and stems decoction taken for colds, antidiarrheal, a wash for infected cuts, ulcers, sores, wounds.)

in English: arrowleaf buckwheat

Eriogonum corymbosum Bentham (*Eriogonum corymbosum* Benth. var. *corymbosum*; *Eriogonum corymbosum* Benth. var. *divaricatum* Torr. & A. Gray; *Eriogonum corymbosum* Benth. var. *erectum* Reveal & Brotherson; *Eriogonum corymbosum* Benth. var. *revealianum* (S.L. Welsh) Reveal; *Eriogonum divergens* Small; *Eriogonum effusum* Nuttall subsp. *corymbosum* (Bentham) S. Stokes; *Eriogonum effusum* Nutt. subsp. *durum* S. Stokes; *Eriogonum effusum* Nutt. subsp. *salinum* (A. Nelson) S. Stokes; *Eriogonum revealianum* S.L. Welsh; *Eriogonum salinum* A. Nelson)

North America. Perennial subshrub or shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 17. 1856, *Proc. Calif. Acad. Sci.*, ser. 2, 5: 718–719. 1895 and *Contr. W. Bot.* 11: 14. 1903, *Eriogonum* 79. 1936, *Great Basin Naturalist* 27: 221, 224, fig. 14. 1968, *Great Basin Naturalist* 30: 17, fig. 2. 1970, *Great Basin Naturalist* 35: 362. 1976, *Taxon* 32: 293. 1983, *Phytologia* 86: 125, 128. 2004

(Tonic, analgesic, for headache, stomachache.)

in English: crispleaf buckwheat

Eriogonum corymbosum Benth. var. ***glutinosum*** (M.E. Jones) M.E. Jones (*Eriogonum aureum* M.E. Jones var. *glutinosum* M.E. Jones; *Eriogonum microthecum* Nuttall var. *crispum* (L.O. Williams) S. Stokes)

North America.

See *Proc. Calif. Acad. Sci.*, ser. 2, 5: 718–719. 1895 and *Contr. W. Bot.* 11: 14. 1903

(Leaves decoction for headaches, to treat tuberculosis, cough.)

in English: sticky wild buckwheat

Eriogonum davidsonii Greene (*Eriogonum baileyi* var. *davidsonii* (Greene) M.E. Jones; *Eriogonum molestum* S. Watson var. *davidsonii* (Greene) Jepson; *Eriogonum vimineum* subsp. *juncinellum* (Gandoger) S. Stokes; *Eriogonum vimineum* Douglas ex Benth. var. *davidsonii* (Greene) S. Stokes; *Eriogonum vimineum* var. *glabrum* S. Stokes)

North America. Annual herb, seeds eaten

See *Pittonia* 2: 295. 1892 and *Contributions to Western Botany* 11: 16. 1903, *Bulletin de la Société Botanique de Belgique* 42(3): 187. 1906, *A Flora of California* 1(4): 412. 1914, *The Genus Eriogonum* 51, 53. 1936, *Rhodora* 78: 37–52. 1976

(Tonic, stomachic.)

in English: Davidson's buckwheat, Davidson's wild buckwheat

Eriogonum divaricatum Hooker (*Eriogonum ameghinoi* Speg.; *Sanmartinia ameghinoi* (Speg.) M. Buchinger)

North America. Annual herb

See *Hooker's J. Bot. Kew Gard. Misc.* 5: 265. 1853 and *Anales Mus. Nac. Buenos Aires* 7: 156. 1902, *Comun. Inst. Nac. Invest. Ci. Nat., Ser. Ci. Bot.* 1(4): 5. 1950

(Antidote, portions of the plant smoked in the treatment of snakebite. Ceremonial.)

in English: divergent buckwheat, divergent wild buckwheat

Eriogonum elatum Douglas ex Benth. (*Eriogonum elatum* subsp. *typicum* (Douglas ex Benth.) S. Stokes; *Eriogonum elatum* Douglas ex Benth. var. *elatum*)

North America. Perennial subshrub or herb

See *Transactions of the Linnean Society of London* 17(3): 413. 1836 and *The Genus Eriogonum* 98. 1936

(Cathartic, purgative.)

in English: tall woolly buckwheat

Eriogonum elongatum Benth. (*Eriogonum elongatum* Nutt. ex Benth.; *Eriogonum elongatum* Nutt.; *Eriogonum elongatum* Benth. var. *elongatum*)

North America. Perennial subshrub or herb

See *The Botany of the Voyage of H.M.S. Sulphur* 45–46. 1844, *J. Acad. Nat. Sci. Philadelphia* n.s., 1: 165. 1848, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 10. 1856

(Blood purifier, postpartum remedy, hypotensive.)

in English: longstem buckwheat, wild buckwheat

Eriogonum fasciculatum Benth. (*Eriogonum fasciculatum* Benth. var. *fasciculatum*)

North America. Perennial subshrub or shrub

See *Transactions of the Linnean Society of London* 17(3): 411. 1836 and *Bull. New York Bot. Gard.* 6: 351. 1910, *Bull. Torrey Bot. Club.* 49: 350. 1923

(Analgesic, astringent, applied for pain and headaches, used for diarrhea. Roots powder to treat wounds; a root decoction taken for colds, cough, influenza and hoarseness. Plant decoction to treat urinary problems, stomachache, colic.)

in English: California buckwheat, Eastern Mojave buckwheat

Eriogonum fasciculatum Benth. var. ***polifolium*** (Benth.) Torrey & A. Gray (*Eriogonum fasciculatum* subsp. *polifolium* (Benth.) S. Stokes; *Eriogonum fasciculatum* var. *revolutum* (Goodding) S. Stokes; *Eriogonum polifolium* Benth.; *Eriogonum revolutum* Goodd.)

North America. Perennial subshrub or shrub

See *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *Transactions of the Linnean Society of London* 17(3): 411. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 12. 1856, *Proceedings of the American Academy of Arts and Sciences* 8: 169. 1870 and *Botanical Gazette* 37(1): 54. 1904, *The Genus Eriogonum* 86. 1936

(Analgesic, astringent, applied for pain and headaches, used for diarrhea. Magico-religious beliefs, used in the practice of witchcraft, in a potion against evil spells.)

in English: Eastern Mojave buckwheat, Mojave Desert California buckwheat

Eriogonum gracillimum S. Watson (*Eriogonum angulosum* Benth. subsp. *gracillimum* (S. Watson) S. Stokes; *Eriogonum angulosum* subsp. *victorensis* (M.E. Jones) S. Stokes; *Eriogonum angulosum* var. *gracillimum* (S. Watson) M.E. Jones; *Eriogonum angulosum* var. *victorensis* M.E. Jones)

North America. Annual herb

See *Transactions of the Linnean Society of London* 17(3): 406, pl. 18, f. 1. 1836, *Geological Survey of California, Botany* 2: 480. 1880 and *Contributions to Western Botany* 11: 16. 1903, *Contributions to Western Botany* 12: 74. 1908, *The Genus Eriogonum* 38. 1936

(Whole plant infusion as a lotion for skin diseases, scabies, pimples.)

in English: rose and white buckwheat

Eriogonum heracleoides Nuttall var. ***heracleoides*** (*Eriogonum angustifolium* Nuttall; *Eriogonum heracleoides* subsp. *angustifolium* (Nutt.) S. Stokes; *Eriogonum heracleoides* subsp. *angustifolium* (Nuttall) Piper; *Eriogonum heracleoides* var. *angustifolium* (Nuttall) Torrey & A. Gray; *Eriogonum heracleoides* var. *minus* Bentham)

North America. Perennial subshrub or herb

See *J. Acad. Nat. Sci. Philadelphia* 7: 49, plate 7. 1834, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 15. 1848, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 11. 1856, *Proceedings of the American Academy of Arts and Sciences* 8: 159. 1870 and *Contributions from the United States National Herbarium* 11: 238. 1906, *The Genus Eriogonum* 107. 1936, *Phytologia* 25: 200. 1973

(Used for colds, tuberculosis, lung ailments, to treat infected cuts and sores, a decoction of roots and stems. Roots decoction taken for diarrhea, stomachaches; used in steambaths to treat aching joints and muscles. A strong plant decoction taken to treat syphilis, tuberculosis.)

in English: parsnip-flower wild buckwheat, parsnipflower buckwheat

Eriogonum hookeri S. Watson (*Eriogonum deflexum* subsp. *hookeri* (S. Watson) S. Stokes; *Eriogonum deflexum* Torrey var. *gilyum* S. Stokes)

North America. Annual herb

See *Proc. Amer. Acad. Arts.* 14: 295. 1879

(Tonic.)

in English: Hooker's buckwheat, Hooker's wild buckwheat

Eriogonum inflatum Torrey & Fremont (*Eriogonum glaucum* Small; *Eriogonum inflatum* var. *deflatum* I.M. Johnston; *Eriogonum inflatum* Torr. & Frém. var. *inflatum*; *Eriogonum trichopes* Torrey subsp. *glaucum* (Small) S. Stokes)

North America. Annual or perennial herb, spindly, basal rosette of oval leaves, tiny yellow flowers, newly emerged stems eaten, leaves boiled and eaten, the hollow stems used as drinking tubes and pipes, a food plant for the desert metalmark butterfly, *Apodemia mormo deserti* Barnes & McDunnough

See *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 317. 1845, *Notes of a military*

reconnaissance 150. 1848, *Bulletin of the Torrey Botanical Club* 25(1): 51. 1898 and *Proceedings of the California Academy of Sciences*, Series 4, 12: 1013. 1924, *The Genus Eriogonum* 24. 1936

(Plant infusion taken as a cold remedy, used as a lotion for animal bite, bear or dog bite.)

in English: bottle stopper, desert trumpet, Indian pipeweed, native American pipeweed

Eriogonum inflatum Torrey & Fremont var. ***inflatum***

North America. Annual or perennial herb, newly emerged stems eaten, leaves boiled and eaten, the hollow stems used as drinking tubes and pipes, a food plant for the desert metalmark butterfly, *Apodemia mormo deserti* Barnes & McDunnough

See *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 317. 1845, Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance* from Fort Leavenworth in Missouri to San Diego in California: including part of the Arkansas, Del Norte, and Gila Rivers. Washington, 1848, *Bulletin of the Torrey Botanical Club* 25(1): 51. 1898 and *Proceedings of the California Academy of Sciences*, Series 4, 12: 1013. 1924, *The Genus Eriogonum* 24. 1936

(Plant infusion taken as a cold remedy, used as a lotion for animal bite, bear or dog bite.)

in English: bottle stopper, desert trumpet, Indian pipeweed, native American pipeweed

Eriogonum jamesii Bentham (*Eriogonum jamesii* subsp. *typicum* (Benth.) S. Stokes, nom. inval.; *Eriogonum jamesii* Benth. var. *jamesii*)

North America. Perennial subshrub or herb, a nectar source for the rare Spalding's Dotted-Blue butterfly, *Euphilotes spaldingi* Barnes & McDunnough

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 7–8. 1856 and *Contr. W. Bot.* 11: 8. 1903, *Bull. Soc. Roy. Bot. Belgique.* 42: 190. 1906, *The Genus Eriogonum* 118. 1936

(Roots chewed as heart tonic, stomachic. Ceremonial, ritual.)

in English: antelope sage, James' buckwheat

Eriogonum lachnogynum Torrey ex Bentham

North America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 8. 1856 and *Utah Fl.* ed. 3, 840. 2003, *Harvard Pap. Bot.* 9: 178. 2004, *Phytologia* 86: 169. 2004

(Crushed roots concoction given for diarrhea, stomachache, colic, cough. Ceremonial.)

in English: woolly-cup wild buckwheat

Eriogonum latifolium Smith (*Eriogonum latifolium* subsp. *typicum* (Sm.) S. Stokes, nom. inval.)

North America. Perennial subshrub, young stems eaten, the species is the food plant for the bramble hairstreak butterfly or Coastal Green Hairstreak (*Callophrys dumetorum* Boisduval), Mormon metalmark (*Apodemia mormo* Felder & Felder), western square-dotted blue (*Euphilotes comstocki comstocki*), and the federally endangered Smith's dotted-blue, *Euphilotes enoptes smithi* Mattoni

See *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *The Cyclopaedia*; or, universal dictionary of arts, ... 13: *Eriogonum* no. 3. 1809 and *The Genus Eriogonum* 65. 1936, Howe, W.H. *The Butterflies of North America*. Garden City, NY. Doubleday & Company, Inc. 1975, Arnold, R.A. *Ecological Studies of Six Endangered Butterflies (Lepidoptera, Lycaenidae): Island Biogeography, Patch Dynamics, and the Design of Habitat Preserves*. Berkeley, Ca. University of California Press. 1980, Arnold, R.A. "Conservation and management of the endangered Smith's blue butterfly, *Euphilotes enoptes smithi* (Lepidoptera: Lycaenidae)." *Journal of Research on the Lepidoptera* 22(2): 135–153. 1983, Shields, O., J.L. Reveal. "Sequential evolution of *Euphilotes* (Lycaenidae: Scolitantidini) on their plant host *Eriogonum* (Polygonaceae: Eriogonoideae)." *Biological Journal of the Linnean Society* 33(1): 51–93. 1988

(Analgesic, a decoction of roots, leaves, and stems taken for colds and coughs. Roots decoction for stomach pain, female complaints and sore eyes.)

in English: seaside buckwheat, seaside wild buckwheat

Eriogonum leptophyllum (Torrey) Wooton & Standley (*Eriogonum effusum* Nuttall var. *leptophyllum* Torrey; *Eriogonum effusum* Nutt. var. *leptophyllum* Torr. & A. Gray; *Eriogonum leptophyllum* (Torr. & A. Gray) Woot. & Standl.; *Eriogonum microthecum* Nutt. var. *leptophyllum* (Torr.) Torr. & A. Gray)

North America. Perennial subshrub or shrub

See *Rep. Exped. Zuni Colorado Rivers* 168–169, pl. 10. 1853, *Proceedings of the American Academy of Arts and Sciences* 8: 171. 1870 and *Contr. U.S. Natl. Herb.* 16: 118. 1913, *Rhodora* 78: 37–52. 1976

(Analgesic, postpartum remedy, antidote, stomachic, a snakebite remedy; roots infusion for stomach trouble, colic, a decoction of the whole plant for snakebite and for postpartum pain.)

in English: slender-leaf wild buckwheat, slenderleaf buckwheat

Eriogonum longifolium Nutt. (*Eriogonum longifolium* Nutt. var. *longifolium*; *Eriogonum longifolium* Nutt. var. *plantagineum* Engelm. & A. Gray; *Eriogonum vespinum* Shinnors

North America. Perennial herb, food

See *Transactions of the American Philosophical Society*, new series, 5: 164. 1835, George Engelmann (1809–1884), Asa Gray and Joseph William Blankinship (1862–1938),

Plantae lindheimerianae. 22. Boston 1845–1850, *Boston J. Nat. Hist.* 5(2): 230. 1845 and *Field & Lab.* 22: 68. 1954

(Roots infusion taken for stomach troubles, colic.)

in English: long-leaf wild buckwheat, longleaf buckwheat

Eriogonum microthecum Nuttall (*Eriogonum microthecum* Nutt. subsp. *typicum* S. Stokes; *Eriogonum microthecum* subsp. *typicum* (Nutt.) S. Stokes, nom. inval.; *Eriogonum microthecum* Nutt. var. *idahoense* (Rydb.) S. Stokes; *Eriogonum microthecum* var. *idahoense* S. Stokes; *Eriogonum microthecum* Nutt. var. *microthecum*)

North America. Perennial subshrub or shrub, food plants for subspecies of the rare pallid blue butterfly (*Euphilotes pallescens* Tilden and Downey). Also found on this species is the cythera metalmark, *Apodemia mormo cythera* Edwards

See *Proc. Acad. Nat. Sci. Philadelphia* 4(1): 15. 1848, *Journ. Acad. Nat. Sci. Philad.*, Ser. 2, i. 162. 1848 and *Bulletin of the Torrey Botanical Club* 39(7): 307. 1912, *The Genus Eriogonum* 74. 1936, *Taxon* 16: 410. 1967

(Used in the treatment of tuberculosis, cough, rheumatism and bladder troubles.)

in English: slender buckwheat

Eriogonum niveum Douglas ex Bentham (*Eriogonum niveum* subsp. *decumbens* (Bentham) S. Stokes; *Eriogonum niveum* subsp. *decumbens* S. Stokes; *Eriogonum niveum* subsp. *dichotomum* S. Stokes; *Eriogonum niveum* subsp. *dichotomum* (Douglas) S. Stokes; *Eriogonum niveum* subsp. *dichotomum* (Douglas ex Bentham) S. Stokes; *Eriogonum niveum* subsp. *typicum* (Douglas ex Benth.) S. Stokes, nom. inval.; *Eriogonum niveum* subsp. *typicum* S. Stokes; *Eriogonum niveum* Douglas ex Benth. var. *decumbens* (Benth.) Torr. & A. Gray; *Eriogonum niveum* Douglas ex Benth. var. *dichotomum* (Douglas ex Benth.) M.E. Jones; *Eriogonum niveum* var. *dichotomum* (Douglas) S. Stokes ex M.E. Jones; *Eriogonum strictum* var. *lachnostegia* Benth.; *Eriogonum strictum* Benth. var. *lachnostegium* Benth.)

North America. Perennial subshrub or herb, a highly variable species

See *Trans. Linn. Soc. London* 17(3): 414–415. 1836 [1837 publ. 21 Jun–9 Jul 1836], *Prodr.* (DC.) 14(1): 16. 1856, *Proceedings of the American Academy of Arts and Sciences* 8: 174. 1870 and *Contr. W. Bot.* 11: 8. 1903, *The Genus Eriogonum* 62. 1936

(Used for colds and as a wash for cuts.)

in English: snow buckwheat, snow wild buckwheat

Eriogonum nudum Douglas ex Bentham (*Eriogonum latifolium* Smith subsp. *nudum* (Douglas ex Bentham) S. Stokes; *Eriogonum latifolium* subsp. *nudum* S. Stokes; *Eriogonum nudum* Douglas ex Benth. var. *nudum*)

North America. Perennial subshrub or herb, food plants for the Bauer's dotted-blue butterfly (*Euphilotes baueri*), the

Pacific dotted-blue (*Euphilotes enoptes*), the gorgon copper (*Gaeides gorgon* Boisduval), and the Mormon metalmark, *Apodemia mormo*

See *Trans. Linn. Soc. London* 17(3): 413. 1836 [1837 publ. 21 Jun-9 Jul 1836], *Proc. Amer. Acad. Arts.* 12: 264. 1877 and *The Genus Eriogonum* 64–65. 1936, *Mentzelia* 1: 20. 1976

(Roots used as an infusion for coughs.)

in English: naked buckwheat

Eriogonum nudum Douglas ex Benth. var. ***oblongifolium*** S. Watson (*Eriogonum affine* Benth.; *Eriogonum capitatum* A. Heller; *Eriogonum harfordii* Small; *Eriogonum latifolium* subsp. *sulphureum* (Greene) S. Stokes; *Eriogonum latifolium* subsp. *sulphureum* S. Stokes; *Eriogonum latifolium* var. *affine* (Benth.) S. Stokes; *Eriogonum latifolium* var. *harfordii* (Small) S. Stokes; *Eriogonum latifolium* var. *harfordii* S. Stokes; *Eriogonum nudum* var. *sulphureum* (Greene) Jeps.; *Eriogonum nudum* Douglas ex Benth. var. *sulphureum* Jeps.; *Eriogonum sulphureum* Greene)

North America. Perennial subshrub or herb, food

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 13. 1856, *Proceedings of the American Academy of Arts and Sciences* 12: 264. 1877, *Bulletin of the Torrey Botanical Club* 25(1): 47. 1898 and *Pittonia* 5(26C): 70–71. 1902, *Muhlenbergia*; a journal of botany 2(1A): 27. 1905, *A Flora of California* 1: 420. 1909, *The Genus Eriogonum* 65–66. 1936

(Roots used as an infusion for coughs, abdominal ailments.)

in English: naked buckwheat

Eriogonum nudum Douglas ex Benth. var. ***pauciflorum*** S. Watson (*Eriogonum latifolium* subsp. *pauciflorum* (S. Watson) S. Stokes; *Eriogonum latifolium* subsp. *pauciflorum* S. Stokes; *Eriogonum nudum* subsp. *pauciflorum* (S. Watson) Munz; *Eriogonum nudum* var. *perturbum* M.E. Jones, nom. illeg.)

North America. Perennial subshrub or herb, food

See *Proceedings of the American Academy of Arts and Sciences* 12: 264. 1877 and *Contributions to Western Botany* 11: 11. 1903, *The Genus Eriogonum* 63–64. 1936, *A Flora of Southern California* (Munz) 692. 1974, *Rhodora* 78: 37–52. 1976

(Roots used as an infusion for coughs, colds, abdominal ailments.)

in English: naked buckwheat

Eriogonum ovalifolium Nuttall (*Eriogonum ovalifolium* subsp. *typicum* (Nutt.) S. Stokes, nom. inval.; *Eriogonum ovalifolium* Nutt. subsp. *typicum* S. Stokes; *Eriogonum ovalifolium* Nutt. var. *nevadense* Gandog.; *Eriogonum ovalifolium* Nutt. var. *ovalifolium*; *Eriogonum ovalifolium* var. *typicum* (Nutt.) Gand., nom. inval.; *Eriogonum ovalifolium* Nutt. var.

typicum Gand.; *Eucycla ovalifolia* (Nuttall) Nuttall; *Eucycla ovalifolia* Nutt.)

North America. Perennial subshrub or herb, food plants for Bauer's dotted-blue butterfly, *Euphilotes baueri*

See *J. Acad. Nat. Sci. Philadelphia* 7: 50, plate 8, fig. 1. 1834, *Journ. Acad. Nat. Sci. Philad.*, Ser. 2, 1: 166 1848, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 16–17. 1848, *Contr. U.S. Natl. Herb.* 4: 187. 1893, *Bull. Torrey Bot. Club* 25: 45. 1898 and *Mem. New York Bot. Gard.* 1: 123. 1900, *Contr. W. Bot.* 11: 8. 1903, *Sci. Stud. Montana Coll. Agric., Bot.* 1: 49. 1905, *Bulletin de la Société Botanique de Belgique Compt.-Rend.* 42: 193. 1906, *Bot. Gaz.* 52: 262. 1911, *Proc. Biol. Soc. Wash.* 36: 181. 1923, *The Genus Eriogonum* 67. 1936, *Man. Higher Pl. Oregon.* 256. 1941, *Great Basin Naturalist.* 32: 115. 1972, *Mentzelia* 1: 19. 1976, *Brittonia* 33: 446. 1981, *Phytologia* 66: 259. 1989, *Madroño* 49: 16, fig. 1. 2002

(Roots decoction used for colds, stomachache, venereal diseases; a poultice or wash to treat venereal diseases.)

in English: cushion buckwheat

Eriogonum plumatella Durand & Hilgard (*Eriogonum plumatella* var. *jaegeri* (Munz & I.M. Johnston) S. Stokes ex Munz; *Eriogonum plumatella* Durand & Hilg. var. *jaegeri* S. Stokes; *Eriogonum plumatella* var. *typicum* (Durand & Hilg.) S. Stokes, nom. inval.; *Eriogonum plumatella* Durand & Hilg. var. *typicum* S. Stokes)

North America. Perennial subshrub or shrub, herbaceous, seeds eaten

See *Plantæ Heermannianaæ*. Descriptions of new plants, collected in south California by A.L. Heermann; with remarks on other plants heretofore described and belonging to the same collection. 45. 1854, *J. Acad. Nat. Sci. Philadelphia*, n.s., 3(1): 37–46. 1855, Durand, Elias (Elie) Magloire (1794–1873), *Routes in California to connect with the routes near the thirty-fifth and thirty-second parallels, explored by Lieut. R.S. Williamson ... in 1853. Botanical report.* [E. Durand and Hilgard, Theodore Charles (1828–1875).] Washington, D.C., 1855 [i.e., 1856] and *Man. S. Calif. Bot.* [Munz] 120. 1935, *The Genus Eriogonum* 61. 1936

(Tonic, stomachic.)

in English: yucca buckwheat, yucca wild buckwheat

Eriogonum pusillum Torrey & A. Gray (*Eriogonum reniforme* subsp. *pusillum* (Torrey & A. Gray) S. Stokes; *Eriogonum reniforme* subsp. *pusillum* S. Stokes; *Eriogonum reniforme* Torrey & Fremont var. *playanum* (M.E. Jones) S. Stokes)

North America. Annual herb, food plant by the rare Mojave dotted-blue butterfly, *Euphilotes mojave* Watson & W.P. Comstock

See *Prodr.* (DC.) 14(1): 21. 1856, *Proc. Amer. Acad. Arts* 8: 184. 1870 and *The Genus Eriogonum* 36. 1936

(Tonic.)

in English: yellow turbans, yellowturbans

Eriogonum racemosum Nuttall (*Eriogonum racemosum* var. *obtusum* (Benth.) S. Stokes; *Eriogonum racemosum* var. *obtusum* S. Stokes; *Eriogonum racemosum* var. *orthocladon* (Torrey) S. Stokes; *Eriogonum racemosum* var. *orthocladon* S. Stokes; *Eriogonum racemosum* var. *typicum* (Nutt.) S. Stokes, nom. inval.; *Eriogonum racemosum* var. *typicum* S. Stokes)

North America. Perennial subshrub or shrub, herbaceous, highly variable species, food plant for the Spalding dotted-blue butterfly (*Euphilotes spaldingi* Barnes & McDunnough) and is occasionally visited by the Desert Green Hairstreak or Comstock's hairstreak (*Callophrys comstocki* Henne, Caterpillar hosts: various wild buckwheats (*Eriogonum*), especially Wright's buckwheat and racemose buckwheat

See *Proc. Acad. Nat. Sci. Philadelphia* 4(1): 14. 1848, *J. Acad. Nat. Sci. Philadelphia*, ser. 2, 1: 161. 1848 and *The Genus Eriogonum* 62. 1936, *Taxon* 16: 410. 1967, *Rhodora* 78: 37–52. 1976

(Roots for the treatment of poisoning and diarrhea, backache, analgesic, blood purifier, and for venereal disease, poisoning.)

in English: racemose buckwheat, red-root wild buckwheat, redroot buckwheat

Eriogonum roseum Durand & Hilgard (*Eriogonum vimineum* Douglas ex Benth. subsp. *virgatum* (Benth.) S. Stokes; *Eriogonum vimineum* subsp. *virgatum* S. Stokes; *Eriogonum virgatum* Benth.; *Eriogonum virgatum* var. *roseum* (Durand & Hilg.) Torr. & A. Gray; *Eriogonum virgatum* Benth. var. *roseum* (Durand) Torr. & A. Gray)

North America. Annual herb

See *Pl. Heermannianae* 45. 1854, *J. Acad. Nat. Sci. Philadelphia* n.s. 3: 45. 1855, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(1): 16. 1856, *Proceedings of the American Academy of Arts and Sciences* 8: 177. 1870 and *The Genus Eriogonum* 53. 1936

(Whole plant infusion as a lotion for skin diseases, pimples.)

in English: wand wild buckwheat

Eriogonum rotundifolium Benth. (*Eriogonum cernuum* Nuttall subsp. *glaucescens* S. Stokes; *Eriogonum cernuum* subsp. *rotundifolium* (Benth.) S. Stokes; *Eriogonum cernuum* Nutt. subsp. *rotundifolium* S. Stokes; *Eriogonum rotundifolium* var. *angustius* Goodman)

North America. Annual herb, food

See *Prodromus Systematis Naturalis Regni Vegetabilis* 14(1): 21. 1856 and *The Genus Eriogonum* 41. 1936, *Leaflets of Western Botany* 6(3): 71. 1950, *Southw. Naturalist* 24: 187–206. 1979

(Emetic. Leaves used for sore throats.)

in English: round-leaf wild buckwheat, roundleaf buckwheat

Eriogonum sphaerocephalum Douglas ex Benth. (*Eriogonum sphaerocephalum* subsp. *typicum* (Douglas ex Benth.) S. Stokes, nom. inval.; *Eriogonum sphaerocephalum* subsp. *typicum* S. Stokes; *Eriogonum sphaerocephalum* Douglas ex Benth. var. *brevifolium* S. Stokes ex M.E. Jones; *Eriogonum sphaerocephalum* Douglas ex Benth. var. *geniculatum* (Nutt.) S. Stokes; *Eriogonum sphaerocephalum* var. *megacephalum* S. Stokes ex M.E. Jones; *Eriogonum sphaerocephalum* Douglas ex Benth. var. *megacephalum* (Nutt.) S. Stokes ex M.E. Jones; *Eriogonum sphaerocephalum* var. *megacephalum* (Nutt.) S. Stokes; *Eriogonum sphaerocephalum* Douglas ex Benth. var. *sphaerocephalum*)

North America. Perennial subshrub or shrub

See *Trans. Linn. Soc. London* 17(3): 407–408. 1836 [1837 publ. 21 Jun–9 Jul 1836] and *Contributions to Western Botany* 11: 6. 1903, *Bull. Soc. Roy. Bot. Belgique* 42: 197. 1906, *Bot. Gaz.* 54: 407. 1912, *The Genus Eriogonum* 104. 1936, *Leafl. W. Bot.* 2: 72. 1938, *Harvard Pap. Bot.* 9: 197. 2004

(A decoction of the root to treat colds and diarrhea.)

in English: rock buckwheat, rock wild buckwheat

Eriogonum strictum Benth. var. *proliferum* (Torr. & A. Gray) C.L. Hitchc.; (*Eriogonum fulvum* S. Stokes; *Eriogonum ovalifolium* var. *bellum* S. Stokes; *Eriogonum ovalifolium* Nutt. var. *proliferum* (Torr. & A. Gray) S. Watson; *Eriogonum proliferum* Torr. & A. Gray; *Eriogonum strictum* subsp. *bellum* (S. Stokes) S. Stokes; *Eriogonum strictum* Benth. subsp. *proliferum* (Torr. & A. Gray) S. Stokes; *Eriogonum strictum* var. *argenteum* S. Stokes; *Eriogonum strictum* var. *proliferum* (Torr. & A. Gray) Reveal, nom. illeg., non *Eriogonum strictum* var. *proliferum* (Torr. & A. Gray) C.L. Hitchc.)

North America. Food plants for the Bauer's dotted-blue butterfly, *Euphilotes baueri* Shields

See *Flora Boreali-Americana* 1: 246, pl. 24. 1803, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 50, pl. 8, f. 1. 1834, *Transactions of the Linnean Society of London* 17(3): 414. 1836 [1837 publ. 21 Jun–9 Jul 1836], *Proceedings of the American Academy of Arts and Sciences* 8: 164. 1870, *Proceedings of the American Academy of Arts and Sciences* 12: 263. 1877 and *Leaflets of Western Botany* 1(4): 29–30. 1932, *The Genus Eriogonum* 67. 1936, *Leaflets of Western Botany* 3(9): 200. 1943, *Vascular Plants of the Pacific Northwest* 2: 132. 1964, *Phytologia* 40(6): 467. 1978

(Decoction as an anti-witchcraft medicine.)

in English: proliferous wild buckwheat

Eriogonum tenellum Torr. (*Eriogonum tenellum* Nutt., nom. illeg.; *Eriogonum tenellum* Torr. var. *tenellum*)

North America. Perennial subshrub or herb

See *Annals of the Lyceum of Natural History of New York* 2: 241. 1827, *Proceedings of the Academy of Natural Sciences*

of *Philadelphia* 4(1): 16. 1848, *Journal of the Academy of Natural Sciences of Philadelphia* II, 1: 165. 1848

(Postpartum remedy, febrifuge.)

in English: tall buckwheat

Eriogonum umbellatum Torrey (*Eriogonum umbellatum* Benth., nom. illeg.; *Eriogonum umbellatum* subsp. *typicum* (Torr.) S. Stokes, nom. inval.; *Eriogonum umbellatum* Torr. subsp. *typicum* S. Stokes; *Eriogonum umbellatum* Torr. var. *umbellatum*)

North America. Perennial subshrub or herb, short woody branches, tiny yellow-cream or yellow flowers in small rounded clusters, a widespread and exceedingly variable species

See *Annals of the Lyceum of Natural History of New York* 2: 241–242. 1827, *Transactions of the Linnean Society of London* 17: 410. 1836 [1837 publ. 21 Jun–9 Jul 1836], *Proc. Acad. Nat. Sci. Philadelphia* 4: 14. 1848, *Hooker's J. Bot. Kew Gard. Misc.* 5: 264. 1853, *Proc. Amer. Acad. Arts* 8: 158–159. 1870, *Bull. Torrey Bot. Club* 16: 152. 1889, *Gartenflora* 40: 493, fig. 92. 1891, *Pittonia* 3: 201. 1897, *Bull. Torrey Bot. Club* 25: 41–42. 1898 and *Pittonia* 5: 68. 1902, *Contr. W. Bot.* 11: 5–6. 1903, *Bull. S. Calif. Acad. Sci.* 2: 68. 1903, *Bull. Soc. Roy. Bot. Belgique* 42: 195, 198–199. 1906, *Contr. U.S. Natl. Herb.* 11: 238. 1906, *Fl. Calif.* 1: 425. 1914, *Bull. S. Calif. Acad. Sci.* 17: 64. 1918, *The Genus Eriogonum* 107, 109–110, 112–113. 1936, *Leaflet. W. Bot.* 2: 53. 1937, *Leaflet. W. Bot.* 3: 17. 1941, *Vasc. Pl. Pacif. N.W.* 2: 135. 1964, *Taxon* 17: 532. 1968, *Great Basin Naturalist* 28: 157. 1968, *Suppl. Calif. Fl.* 43–44. 1968, *Southw. Naturalist* 13: 357. 1968, *Aliso* 7: 218. 1970, *Great Basin Naturalist* 32: 115. 1972, *Great Basin Naturalist* 35: 365. 1976, *Taxon* 32: 294. 1983, *Great Basin Naturalist* 45: 278–279. 1985, *Phytologia* 66: 259–261. 1989, *Phytologia* 86: 146–149, 153–154, 156. 2004, *Harvard Pap. Bot.* 9: 202. 2004

(Flowers infusion used for ptomaine poisoning, colds and stomachaches; mashed flowers as a salve for gonorrhoeal sores. Poultices of leaves and roots used for rheumatism; leaves in a poultice to soothe pain, especially burns. Disinfectant and emetic.)

in English: sulfur buckwheat, sulfur flower, sulphur flower, sulphur-flower buckwheat, sulphur wildbuckwheat

Eriogonum umbellatum Torr. var. *ellipticum* (Nutt.) Reveal (*Eriogonum croceum* Small; *Eriogonum ellipticum* Nutt.; *Eriogonum stellatum* Benth.; *Eriogonum umbellatum* subsp. *stellatum* (Benth.) S. Stokes; *Eriogonum umbellatum* Torr. subsp. *stellatum* S. Stokes; *Eriogonum umbellatum* var. *chrysanthum* Gand.; *Eriogonum umbellatum* Torr. var. *croceum* S. Stokes; *Eriogonum umbellatum* var. *croceum* (Small) S. Stokes; *Eriogonum umbellatum* Torr. var. *croceum* (Small) S. Stokes ex R.J. Davis; *Eriogonum umbellatum* var. *stellatum* (Benth.) M.E. Jones; *Eriogonum umbellatum* Torr. var. *stellatum* M.E. Jones)

North America. Perennial subshrub or herb

See *Transactions of the Linnean Society of London* 17(3): 409–410. 1836 [1837 publ. 21 Jun–9 Jul 1836], *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 14. 1848, *J. Acad. Nat. Sci. Philadelphia* (ser. 2) 1: 162. 1848, *Bulletin of the Torrey Botanical Club* 25(1): 43. 1898 and *Contributions to Western Botany* 11: 5. 1903, *Bulletin de la Société Botanique de Belgique* 42(3): 198. 1906, *The Genus Eriogonum* 108, 110–112. 1936, *Taxon* 32(2): 294. 1983

(For burns, leaves made into a paste and applied.)

in English: sulfur flower, sulphur flower, sulphur-flower buckwheat, sulphur wildbuckwheat

Eriogonum umbellatum Torr. var. *majus* Hook. (*Eriogonum heracleoides* Nutt. var. *subalpinum* (Greene) S. Stokes; *Eriogonum subalpinum* Greene; *Eriogonum umbellatum* subsp. *majus* (Hook.) Piper; *Eriogonum umbellatum* subsp. *subalpinum* (Greene) S. Stokes; *Eriogonum umbellatum* Torr. subsp. *subalpinum* S. Stokes; *Eriogonum umbellatum* Torr. var. *subalpinum* M.E. Jones; *Eriogonum umbellatum* Torr. var. *majus* Benth.; *Eriogonum umbellatum* var. *subalpinum* (Greene) M.E. Jones)

North America. Perennial subshrub or herb

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 49–50, pl. 7. 1834, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 264. 1853, *Prodr.* (DC.) 14(1): 11. 1856, *Pittonia* 3(13): 18–19. 1896 and *Contributions to Western Botany* 11: 5. 1903, *Contributions from the United States National Herbarium* 11: 238. 1906, *The Genus Eriogonum* 107, 109. 1936

in English: sulfur flower, sulphur flower, sulphur-flower buckwheat, sulphur wildbuckwheat

Eriogonum wrightii Torrey ex Benth (*Eriogonum trachygonum* Torrey ex Benth subsp. *wrightii* (Torrey ex Benth) S. Stokes; *Eriogonum trachygonum* subsp. *wrightii* S. Stokes; *Eriogonum wrightii* Torr. ex Benth. subsp. *glomerulum* S. Stokes; *Eriogonum wrightii* subsp. *typicum* (Torr. ex Benth.) S. Stokes, nom. inval.; *Eriogonum wrightii* subsp. *typicum* S. Stokes; *Eriogonum wrightii* Torr. ex Benth. var. *wrightii*)

North America. Perennial subshrub, food plants for the rare Rita dotted-blue butterfly (*Euphilotes rita* Barnes & McDunnough), the Pacific dotted-blue (*Euphilotes enoptes* Boisduval), the veined blue (*Plebeius neurona* Skinner), and the Mormon metalmark, *Apodemia mormo mormo* C. & R. Felder

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 15. 1856, *Bot. California*. 2: 29. 1880 and *The Genus Eriogonum* 58–59. 1936, *Leaflets of Western Botany* 2: 47. 1937, *Leaflet. W. Bot.* 6: 151. 1951, *Suppl. Calif. Fl.* 63. 1968, Scott, J.A. *The Butterflies of North America*. Stanford University Press, Stanford, Calif. 1986, Tilden, J.W. *A Field Guide to Western Butterflies*. Houghton-Mifflin Co., Boston, Mass. 1986

(Emetic.)

in English: bastard-sage, bastardsage

Eriolaena DC. Malvaceae (Sterculiaceae)

From the Greek *erion* ‘wool’ and *chlaena*, *laina* ‘cloak, blanket’, referring to the leaves and calyx, see *Mémoires du Muséum d’Histoire Naturelle* 10: 102, 104. 1823.

Eriolaena hookeriana Wight & Arn.

India. Tree, ovate-orbicular leaves, flowers yellow, petals reflexed, smooth or tuberculate ovoid capsule, in dry deciduous forests

See *Mémoires du Muséum d’Histoire Naturelle* 10: 102. 1823, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 70. 1834

(Fruit paste applied on wounds.)

in India: kunjje

Eriolaena lushingtonii Dunn

India. Tree, roasted seeds eaten

See *Bulletin of Miscellaneous Information Kew* 1915: 88. 1915

(Stimulant, diaphoretic.)

in India: nalla battuku

Eriolaena quinquelocularis Wight (*Microchlaena quinquelocularis* Wight & Arn.; *Wallichia quinquelocularis* (Wight & Arn.) Steud.)

India, China. Small tree, deciduous, grey foliage, yellow flowers, open forest, savanna

See *Plants of the Coast of Coromandel* 3: 91. 1820, *Genera plantarum* 1: 114. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 71. 1834, *Icones Plantarum Indiae Orientalis* pl. 882. 1840, *Nomenclator Botanicus*. Editio secunda 2: 783. 1841

(Used for boils and wounds.)

in India: malanitutti, naiuman, vattanumu

Eriophorum L. Cyperaceae

Cotton grass, from the Greek *erion* ‘wool’ and *phoros* ‘bearing’, wool-bearer, alluding to the woolly heads or to the seeds; Latin *eriphoros* used by Plinius for a kind of bulbous plant.

Eriophorum angustifolium Honck.

Eriophorum chamissonis C.A. Mey.

Eriophyllum Lagasca Asteraceae

Greek *erion* and *phyllon* ‘leaf’, woolly leaves.

Eriophyllum confertiflorum (DC.) A. Gray var. *confertiflorum* (*Eriophyllum confertiflorum* var. *latum* H.M. Hall; *Eriophyllum confertiflorum* var. *laxiflorum* A. Gray)

North America.

See *Gen. Sp. Pl.* 28. 1816 and Constance, L. “A systematic study of the genus *Eriophyllum* Lag.” *Univ. Calif. Publ. Bot.* 18: 69–136. 1937

(A remedy for rheumatism.)

Eriophyton Benth. Lamiaceae (Labiatae)

From the Greek *erion* ‘wool’ and *phyton* ‘plant’, fully covered with bristles, see *Edwards’s Botanical Register* 15: t. 1289. 1829, *Plantae Asiaticae Rariores* 1: 63. 1830.

Eriophyton wallichii Benth. (*Eriophyton wallichianum* Benth.)

China. Herb, erect, leaves grey-green softly pubescent, flowers pale pink pubescent, anthers purple, plant with distinctive odor

See *Edwards’s Botanical Register* 15: t. 1289. 1829, *Plantae Asiaticae Rariores* 1: 63. 1830 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2(2): 225. 1929, *Acta Botanica Boreali-Occidentalia Sinica* 16(3): 310–318. 1996

(Used for wounds, lung infection, nervous breakdown. Roots used as a tonic.)

in English: Wallich eriophyton

in China: mian shen

Eriosema (DC.) Desv. Fabaceae (Leguminosae), Papilionaceae, Phaseoleae)

From the Greek *erion* ‘wool’ and *sema* ‘standard, a sign, mark’, in reference to the nature of flowers or to the standard petal, see *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 388. 1825, *Annales des Sciences Naturelles* (Paris) 9: 421. 1826, *Linnaea* 7: 170. 1832, *A General History of the Dichlamydeous Plants* 2: 347. 1832 and *Adansonia* 11(1): 147–148. 1971, *Taxon* 54(2): 528. 2005.

Eriosema chinense Vogel (*Dolichos biflorus* sensu Lour.)

China. Perennial non-climbing shrub, herb, yellow flowers, tuberous roots eaten raw

See *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibitio Ephemerides sive Observationes Historias et Experimenta* 19(Suppl. 1): 31. 1843 and *An Enumeration of Philippine Flowering Plants* 2 (3): 241–323. 1923, *J. Bombay Nat. Hist. Soc.* 82: 489–500. 1984

(Tonic, stomachic, skin of tubers used in dysentery; root decoction taken as a stimulant.)

in India: kondan, pen, soh pen

Eriosema cordatum E. Mey. (*Eriosema cordatum* var. *guenzii* (Sond.) Harv.; *Eriosema guenzii* Sond.; *Eriosema guenzii* Sond.)

South Africa, Mozambique. Perennial non-climbing herb, tubers eaten

See *Annales des Sciences Naturelles (Paris)* 9: 421. 1826, *Commentariorum de Plantis Africae Australioris* 128. 1836, *Linnaea* 23: 34. 1850 and *Kew Bull.* 25: 65–169. 1971, *Bothalia* 12: 395–404. 1978, *Bothalia* 13: 281–306. 1981

(Roots for impotency and barrenness.)

in English: heart-leaf eriosema

in Southern Africa: lesapo (Sotho), uQontsi (Zulu)

in Swaziland: umonoankunzi

Eriosema glomeratum (Guill. & Perr.) Hook. f. (*Eriosema glomeratum* Hook.f.; *Rhynchosia glomerata* Guill. & Perr.)

Tropical Africa. Perennial non-climbing herb, shrubby, yellow flowers

See *Florae Senegambiae Tentamen* 1: 216. 1832, *Niger Flora* [W.J. Hooker]. 313. 1849 and *Feddes Repert.* 103: 111–120. 1992

(Roots and leaves for venereal diseases, wound dressing.)

Eriosema himalaicum H. Ohashi (*Crotalaria tuberosa* D. Don; *Crotalaria tuberosa* Buch.-Ham. ex D. Don; *Eriosema chinense* auct. non Vogel; *Eriosema tuberosa* (Buch.-Ham. ex D. Don) F.T. Wang & Tang; *Eriosema tuberosum* (D. Don) Wang & T. Tang)

India, Nepal, Himalaya. Perennial non-climbing herb, tender roots eaten fresh

See *Prodromus Florae Nepalensis* 241. 1825, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 19(Suppl. 1): 31. 1843 and *Journal of Japanese Botany* 41(3): 96. 1966

(Leaf juice given for fever.)

in China: ji tou shu, mian san qi, zhu zai li

in Nepal: bhattimle

Eriosema montanum Bak. f. (*Eriosema montanum* Baker f. var. *brevipedunculatum* Verdc.; *Eriosema stanerianum* Hauman)

Angola, Tanzania. Perennial non-climbing shrub, soft-wooded, branched erect shrubby herb, often subshrubby, sometimes straggling or trailing, yellow flowers

See *Journal of Botany, British and Foreign* 33(389): 142. 1895 and *Bulletin du Jardin Botanique de l'État* 25: 116. 1955, *Adansonia* sér. 2, 11: 141–199. 1971, *Kew Bulletin* 25(1): 127–128. 1971, *Journal of Ethnopharmacology* 79(2): 155–163. 2002, *Journal of Ethnopharmacology* 114(3): 452–457. 2007

(Leaves decoction analgesic, antibacterial, antifungal, antiviral, febrifuge, astringent, magic, oxytocic, vermifuge, anti-*Helicobacter pylori* activity, for diarrhea, dysentery, conjunctivitis, cough, snakebite, rheumatism, against bad spirits; leaves juice, drops for earache.)

in Burundi: umufunyantoki, umupfanyintoke, umupfunyantoke, umupfunyantoki

in Congo: umumfunyantoke, umupfunyantoki

in Rwanda: umugfunyantoke, umupfunyantpke

in Tanzania: nakuvumba

Eriosema parviflorum E. Mey. (*Cytisus glomeratus* Bojer, nom. nud.; *Eriosema bojeriana* Baill.; *Eriosema bojeriana* (Bojer) Benth. ex Baker; *Eriosema caillei* A. Chev., nom. nud.; *Eriosema consanguineum* Klotzsch; *Eriosema djalonense* A. Chev., p.p., nom. nud.; *Eriosema gillettii* De Wild. & T. Durand; *Eriosema gilletti* De Wild. & T. Durand)

Tropical and Subtropical Africa, Madagascar. Perennial non-climbing shrub, multibranched, ascending herb

See *Commentariorum de Plantis Africae Australioris* 130. 1836, *Hortus Mauritianus* 89. 1837, *Naturwissenschaftliche Reise nach Mossambique ...* 32. 1861, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(49): 388. 1883, *Journal of the Linnean Society, Botany* 20: 133. 1883 and *Bulletin de l'Herbier Boissier*, sér. 2, 1: 18. 1900, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 207–208. 1920, *Kew Bulletin* 25: 65–169. 1971

(Antiinflammatory, for rheumatism. Veterinary medicine, to enhance the ferocity of a dog.)

in Madagascar: ambatriparihy, avoko, avokonibiby, karintana, kifoka, tialamba

in Tanzania: kaluvilo

Eriosema psoraleoides (Lam.) G. Don (*Crotalaria psoraleoides* Lam.; *Crotalaria psoraleoides* Lam.; *Eriosema argenteum* Desv.; *Eriosema argenteum* A. DC.; *Rhynchosia psoraleoides* (Lam.) DC.)

Madagascar. Perennial non-climbing shrub

See *Encyclopédie Méthodique, Botanique* 2(1): 201. 1786, *Flora Cochinchinensis* 425, 460. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 389. 1825, *Annales des Sciences Naturelles (Paris)* 9: 421–422. 1826, *Florae Senegambiae Tentamen* 1: 215. 1832, *A General History of the Dichlamydeous Plants* 2: 348. 1832, *Commentariorum de Plantis Africae Australioris* 130. 1836, *Niger Flora* 314. 1849, *Linnaea* 22: 524. 1849, *Naturwissenschaftliche Reise nach Mossambique ...* 33–35. 1861, *Flora of Tropical Africa* 2: 225. 1871, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(49): 387. 1883 and *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 207–208. 1920, *Opera Botanica* 68: 1–223. 1983, *Willdenowia* 15: 521–527. 1986, *Feddes Repertorium* 103: 111–120. 1992

(Toxins. Roots emetic and poison antidote. Leaves juice for conjunctivitis, internal disorders, wounds, cuts. Lightning protection.)

in English: yellow-seed

in East Africa: mbaazi mwtu

in Madagascar: ambarivatrindolo, ambatombohitra, ambatridry, ambatrimbohitra, ambatrindolo, ambaty, amberivatrindolo, amborivatindolo, asotryzaza, kisotrisotry, kisotrisoty, sarembatry, sariambaty, tsi ambatriambotry, voapika, vohibato, vohipiky

in Rwanda: umupfuyantpke

in Southern Africa: geelkeurtjie, nyakamutu

in S. Rhodesia: umPandamatendele

in Swaziland: inhlaba, inhlula, madoda

in Yoruba: opa awon funfun, pirigidi, soludegburu

***Eriosema salignum* E. Mey.**

South Africa. Perennial non-climbing herb

See *Commentariorum de Plantis Africae Australioris* 129. 1836

(Expectorant and diuretic, to treat impotence. Veterinary medicine, tonic, stimulant for the bull.)

in English: brown bonnets

in Swaziland: ubangalala, uluphondongozi, uqonsi

Eriospermum Jacq. ex Willd. Asparagaceae (Eriospermaceae, Liliaceae)

From the Greek *erion* ‘wool’ and *sperma* ‘a seed’, the seeds are woolly, see *Collectanea* 5(Suppl.): 72. 1796, *Species Plantarum*. Editio quarta 2(1): 110. 1799 and *Gen. S. African Fl. Pl.* ed. 2. 115. 1951, *Contributions from the Bolus Herbarium* 17: 19, 32, 54, 68, 77, 119–120, 137, 283. 1994.

***Eriospermum abyssinicum* Baker**

East Africa. Bulb or corm, tuber geophyte, herbaceous, erect, leaves lanceolate, yellow flowers

See *Journal of the Linnean Society, Botany* 15: 263. 1877 and *Caryologia* 52: 117–125. 1999, *Bothalia* 30: 157. 2000

(Aphrodisiac.)

***Eriospermum flagelliforme* (Baker) J.C. Manning** (*Anthericum flagelliforme* Baker; *Bulbine unifolia* Schult.f. ex Baker; *Eriospermum abyssinicum* Baker; *Eriospermum burchellii* Baker; *Eriospermum elatum* Baker; *Eriospermum fleckii* Schinz; *Eriospermum longipetiolatum* Dammer; *Eriospermum luteorubrum* Baker; *Eriospermum schinzii* Engl. & K. Krause, nom. illeg.; *Eriospermum togoense* Dammer; *Schizobasis flagelliformis* (Baker) Baker)

Tropical and Southern Africa.

See *J. Bot.* 10: 140. 1872, *J. Linn. Soc., Bot.* 15: 261, 263. 1876, *Fl. Cap.* 6: 372. 1896, *Fl. Trop. Afr.* 7: 471. 1898 and *Bot. Jahrb. Syst.* 38: 64–65. 1905, *Bot. Jahrb. Syst.* 45: 140. 1910, *Bothalia* 30: 157. 2000

(A poultice for skin diseases.)

***Eriospermum ornithogaloides* Baker** (*Eriospermum coerulescens* Poelln.; *Eriospermum haygarthii* Baker; *Eriospermum microphyllum* Baker)

South Africa. Bulbous plant, heart-shaped leaves, tiny bluish flowers

See *J. Linn. Soc., Bot.* 15: 266. 1876 [1877 publ. 1876], *Fl. Cap.* (Harvey) 6(2): 370, 372. 1896 and *Feddes Repert. Spec. Nov. Regni Veg.* 52: 116. 1943

(Tonic, antianemic. An infusion of the bulbs of *Eriospermum ornithogaloides*, mixed with *Mentha* sp., roots of *Gunnera perpensa*, *Scabiosa columbaria* and *Eulophia ovalis* a womb purifier, to enhance fertility in woman.)

in Lesotho: tsebe ea pela

Eriotheca Schott & Endl. Bombacaceae

From the Greek *erion* ‘wool’ and *theke* ‘a case’, see *Melet. Bot.* 35. 1832 and *Bull. Jard. Bot. État Bruxelles* 33(2): 170 (–171). 1963, *Lilloa* 33(1): 8. 1968, *Plant Biology* (Stuttg). 7(5): 533–540. 2005.

***Eriotheca globosa* (Aubl.) A. Robyns** (*Bombax globosum* Aubl.; *Bombax sclerophyllum* Ducke; *Eriotheca macrophylla* (K. Schum.) A. Robyns subsp. *sclerophylla* (Ducke) A. Robyns)

South America. Tree, yellowish flowers

See *Histoire des plantes de la Guiane Française* 2: 701, t. 281. 1775 and *Arq. Inst. Biol. Veg.* 2(1): 58. 1935, *Bulletin du Jardin Botanique de l'État* 33: 142, 152, 154. 1963

(Ripe fruits applied to cuts, ulcers, sores.)

Erithalis P. Browne Rubiaceae

Latin and Greek *erithales*, Plinius used for the stone-crop or a little houseleek, *eritheles* ‘very flourishing, luxuriant’, *erithallos* ‘growing luxuriantly, flourishing’, see *The Civil and Natural History of Jamaica* in Three Parts 165, pl. 17, f. 3. 1756, *Systema Naturae*, Editio Decima 2: 930. 1759, *Florulae Insularum Australium Prodrum* 17. 1786.

Erithalis fruticosa L. (*Erithalis elliptica* Raf.; *Erithalis fruticosa* var. *inodora* (Jacq.) Pers.; *Erithalis fruticosa* var. *inodora* (Jacq.) DC.; *Erithalis harrisii* var. *angusta* S. Moore ex Rendle; *Erithalis inodora* Jacq.; *Erithalis insularis* (Ridl.) Zappi & T.S. Nunes; *Erithalis parviflora* Griseb.; *Erithalis procumbens* Raf.; *Erithalis revoluta* Urb.; *Palicourea insularis* Ridl.; *Psathura obovata* Tussac)

West Indies. Many-branched shrub or a small tree, erect branches, clusters of tiny star-like white flowers in long-stalked cymes, spreading white petals, shiny black several-seeded drupes

See *Selectarum Stirpium Americanarum Historia* ... 73. 1763, *Prodrum Systematis Naturalis Regni Vegetabilis* 4: 465. 1830 and *Bahama Fl.* 415: 26. 1920, *Brenesia* 41–42: 73–80. 1994, *Kew Bulletin* 55: 655. 2000

(A tea or a bath for measles and sores.)

in English: bay torch, black torch

Ernodea Sw. Rubiaceae

See *Nova Genera et Species Plantarum seu Prodrum* (Swartz) 2, 29. 1788 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Ernodea littoralis Sw.

North America, Caribbean, C. America.

See *Nova Genera et Species Plantarum seu Prodrum* (Swartz) 29, pl. 223, f. 4. 1788, *Genera Plantarum* 196. 1789 and *Rhodora* 72: 35. 1970, *Opera Bot. Belg.* 7: 403–412. 1996

(A tea for coughs.)

in English: cough bush

Erodium L'Hérit. Geraniaceae

From the Greek *erodios* ‘a heron’, referring to the mericarp or carpels; see *Species Plantarum* 2: 676–683. 1753, *Genera Plantarum*. Ed. 5. 306. 1754, L'Héritier de Brutelle, Charles Louis (1746–1800), *Geraniologia*, seu Erodii, pelargonii, geranii, monsoniae et grieli historia iconibus illustrata. Parisiis: typis P.-F. Didot, 1787–1788, *Genera Plantarum* 268. 1789, William Aiton (1731–1793), *Hortus Kewensis*. 2: 417–431. London 1789, Sweet, Robert (1783–1835), *Geraniaceae*: the natural order of gerania ... London, J. Ridgway, 1820–1830, Georg Christian Wittstein, *Etymologisch-botanisches*

Erodium glaucophyllum (L.) L'Hér. (*Geranium glaucophyllum* L.)

North Africa.

See *Species Plantarum* 2: 679. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 416. 1789 and *Zeitschrift für Naturforschung. C, Journal of Biosciences* 58(9–10): 670–674. 2003

(Antibacterial and antifungal.)

Erodium moschatum (L.) L'Hérit. ex Aiton (*Geranium moschatum* L.; *Geranium moschatum* Burm. f., nom. illeg.)

South America.

See *Species Plantarum* 2: 676–683. 1753, *Specimen Botanicum de Geraniis* 29. 1759, *Systema Naturae*, Editio

Decima 2: 1143. 1759, *Hortus Kewensis*; or, a catalogue ... 2: 414. 1789, *Species Plantarum*. Editio quarta 3: 631. 1800[1801] and *Journal of the South African Veterinary Association* 73(2): 57–61. 2002

(Suspected to be the cause of photosensitivity in sheep if ingested in large quantities. Leaves antipyretic, an infusion for stomachache and for flatulence, diarrhea, dysentery.)

in English: heron's-bill, musk clover, musk heron's-bill, musky crow foot, musky heron's-bill, musky storksbill, storksbill, white-stem filaree, white-stemmed filaree

in Bolivia: alfilerillo, awuja-awuja, kuti-kuti, rapa-rapa, tupu-tupu

in Ecuador: cuchi-agujilla

in Southern Africa: muskuskruid, oorlosie, reiersbek, Turknael, Turk(se)naels

Erodium oxyrhinchum M. Bieb. (*Erodium hoefftianum* C.A. Mey.; *Geranium oxyrhinchum* (M. Bieb.) Poir.)

Iran.

See *Flora Taurico-Caucasica* 2: 133. 1808, *Encyclopédie Méthodique, Botanique* Suppl. 2: 743. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 7: 3. 1855 and *Journal of Ethnopharmacology* 121(3): 400–404. 2009

(Antiplasmodial.)

in China: jian hui mang niu er miao

Erodium stephanianum Willd. (*Erodium stephanianum* var. *atranthum* Nakai ex Kitag.)

China, Nepal.

See *Species Plantarum*. Editio quarta 3: 625. 1800 and *Folia Geobot. Phytotax.* 30: 445–453. 1995

(Plant paste applied to treat gout.)

in China: mang niu er miao

in Nepal: chyakatu

Errazurizia Philippi Fabaceae (Amorpheae)

Errazurizia rotundata (Woot.) Barneby (*Parryella rotundata* Woot.)

North America, Arizona. Perennial non-climbing shrub, inconspicuous, rare, erect, prostrate, foliage aromatic, apetalous flowers

See *Proceedings of the American Academy of Arts and Sciences* 7: 397. 1868, *Anales de la Universidad de Chile* 41(11): 688–689. 1872, *Bulletin of the Torrey Botanical Club* 25(8): 457. 1898 and *Leaflets of Western Botany* 9(13–14): 210. 1962, *Mem. New York Bot. Gard.* 27(13): 12–597. 1977

(Bitter alkaloids, purgative, emetic, for stomachache, vomiting, kidney ailments. Ceremonial, burned as a fumigant for purification.)

in English: prairie dog smoke, roundleaf dunebroom

Eruca Miller Brassicaceae (Cruciferae)

Latin *eruca*, *ae*, ancient name for a caterpillar and for *Brassica eruca* L. (Plinius, L. Junius Moderatus Columella, Q. Horatius Flaccus, M. Valerius Martialis).

Eruca vesicaria (L.) Cav. subsp. *sativa* (Miller) Thellung (*Brassica eruca* L.; *Eruca cappadocica* Reuter var. *eriocarpa* Boissier; *Eruca laticalvis* Boissier; *Eruca sativa* Miller; *Eruca sativa* var. *eriocarpa* (Boissier) Post)

South Africa.

(Oil from seeds causes photosensitivity. The young plants are medicinal and used as a stimulant, antiscorbutic, stomachic and diuretic.)

in English: dame's-rocket, garden eruca, garden rocket, purple-vein rocket, rocket-salad, roquette, salad rocket, vesper-flower

in South Africa: tuin-eruca, wildekool

in Arabic: gargir, kerkas, rawq

in China: zhi ma cai

Erucastrum C. Presl Brassicaceae (Cruciferae)

Partially resembling the genus *Eruca* Mill., see *Flora Sicula* (Presl) 92. 1826, *Anales de la Sociedad Científica Argentina* 47: 169. 1899 and *Parodiana* 3: 113–128. 1984.

Erucastrum arabicum Fisch. & C.A. Mey. (*Brassica arabica* (Fisch. & C.A. Mey.) Fiori; *Brassica schimperi* Boiss.; *Diplotaxis inopinata* Sprague; *Erucastrum arabicum* var. *hararensis* (Engl.) O.E. Schulz; *Erucastrum arabicum* var. *schimperi* (Boiss.) O.E. Schulz; *Sisymbrium abyssinicum* E. Fourn.; *Sisymbrium hararensis* Engl.)

East Africa, Ethiopia, Rwanda, Sudan. Annual herb, erect, branched or unbranched, tap root, leaves alternate, inflorescence terminal branched, yellow to cream white flowers, long capsule angled with a pointed terminal beak, seeds brown, leaves eaten as a vegetable, fresh roots smell of mashed Irish potatoes, grazed by domestic stock, a weed of arable crops, often confused with some *Brassica carinata* types

(Stomachic and diuretic.)

in English: Ethiopian kale

in East Africa: enyakashogi, eshaaga

in Ethiopia: meshisha

in Kenya: cheplemindet, chepleminik, churukechir, enyaro, enyaru, etilelo, gomanza, itogotia, monion, namunio, ngomba, njunge, nonion, nyaner kadhira, olowon, togotia

Erucastrum austroafricanum Al-Shehbaz & Warwick (*Brassica pachypoda* Thell.; *Erucastrum pachypodum* (Chiov.) Jonsell; *Sisymbrium thellungii* O.E. Schulz)

South Africa. Annual or biennial, strong taproot, rough leaves hairy, small yellowish flowers, fodder

See *Vierteljahrsschr. Naturf. Ges. Zürich* 56: 257. 1911, *Pflanzenr.* (Engler) *Crucif. Brassic.* 83, in syn. 1919, *Botaniska Notiser* 129(2): 127. 1976, *Novon* 13(2): 266. 2003

(Nutritious, tonic, stomachic, stimulant.)

in English: wild mustard

in Lesotho: sepail

Erycibe Roxb. Convolvulaceae

Greek *erysibe* 'mildew' or from *eryo* 'to draw out, drag' and *kybe* 'head', or from an old Indian name, *erima-tali*; see William Roxburgh, *Plants of the Coast of Coromandel* 2: 31, t. 159. 1795–1820.

Erycibe aenea Prain

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 63(2): 85. 1894

(Roots decoction a postpartum remedy.)

Malay name: langsung hutan

Erycibe obtusifolia Bentham (*Erycibe versatilihirta* C.Y. Ma)

Hong Kong, China. Woody liana

See *Pl. Coromandel*. 2: 31, t. 159. 1795–1820, *Fl. Hongk.* 236. 1861 and *Sunyatsenia* 6: 221–230. 1946, *Blumea* 7: 342–361. 1953, *Acta Botanica Yunnanica* 7(1): 91–93, pl. 1. 1985, *Am. J. Chin. Med.* 27: 117–122. 1999

(Toxic, antioxidant; aerosol inhalation of *Erycibe obtusifolia* injection on respiratory tract of rats can not only enhance the local immune of the respiratory tract, but also enhance the general immunity system.)

in English: obtuse-leaf erycibe

in China: ding gong teng

Erycibe paniculata Roxb.

India. Large woody climbing shrubs, leaves cuspidate, flowers whitish, panicles many-flowered, black fleshy edible berries

See *Plants of the Coast of Coromandel* 2: 31, t. 154. 1795–1820

(Used in Ayurveda. Whole plant diuretic and hypotensive; decoction of stem of this plant and root of *Plumbago auriculata* given as a post remedy, against post-delivery complications; plant infusion as a gargle to cure inflamed gum; decoction of leaves, twigs and bark given for bronchial asthma; decoction of twigs and bark along with bark of *Entada rheedii* given to increase potency. Ripe fruits taken for constipation. Bark paste used in syphilis, cholera; stem bark and fruits made into fine powder and given with water for cholera. Pounded roots given in fever. Seed oil warmed and applied externally on blood clotted part. Veterinary medicine, leaves and stems decoction applied on sprains of cattle.)

in English: paniculate erycibe

in India: baralaokeshar, chainkatho, kari, karilata, khoikhumar, khoikumru, koilkhamar, kujri, singara balli

Erycibe peguensis Prain

India.

See *Journ. As. Soc. Beng.* lxiii. (1894) ii. 83. 1894

(Pounded leaves rubbed on the body as cooling.)

in India: muiyo

Erycibe schmidtii Craib (*Erycibe semipilosa* Gagnepain)

China, Thailand, Vietnam. Shrub, scandent

See *Botanisk Tidsskrift* 32: 352. 1916, *Notulae Systematicae. Herbarium du Museum de Paris* 14(1): 28–29. 1950

(Antiinflammatory, to relieve rheumatic conditions, swelling and pain; exhibits a strong diaphoretic activity, contraindicated in pregnancy.)

in English: glabrous-leaf erycibe

in China: dinggongteng, guang ye ding gong teng

Erycina Lindley Orchidaceae

A name of Venus or Aphrodite of Mount Eryx, in the north-west of Sicily, near the city of Drepanum, now Trapani, see *Folia Orchidacea*. 2 (*Erycina*): [1]. 1853 and *Fieldiana, Bot.* 26(2): 399–727. 1953, *Fieldiana, Bot.* 30(4): 787–1005. 1961, *Icon. Pl. Trop.* 3: 201–300. 1980, *Icon. Pl. Trop. Fasc.* 12: 1101–1200. 1984, *Harvard Pap. Bot.* 5(2): 383–466. 2001.

Erycina pusilla (L.) N.H. Williams & M.W. Chase (*Cymbidium pusillum* (L.) Sw.; *Cymbidium pusillum* Sw.; *Epidendrum pusillum* L.; *Epidendrum pusillum* J. Koenig, nom. illeg.; *Epidendrum pusillum* Rolfe, nom. illeg.; *Epidendrum ventilabrum* Vell.; *Erycina allemanii* (Barb. Rodr.) N.H. Williams & M.W. Chase; *Oncidium allemanii* Barb. Rodr.; *Oncidium iridifolium* Kunth; *Oncidium pusillum* (L.) Rchb.f.; *Oncidium pusillum* var. *megalanthum* Schltr.; *Psychmorchis allemanii* (Barb. Rodr.) Garay & Stacy; *Psychmorchis pusilla* (L.) Dodson & Dressler; *Tolumnia pusilla* (L.) Hoehne) (*Psychmorchis* Dodson & Dressler,

Greek *psygmōs* ‘dampness’, *psygma*, *psygmatos* ‘a fan’ plus *orchis* ‘orchid’, referring to the habitat or habit of these epiphytes with large flowers and loving moderate shade and humidity.) (*Tolumnia* Raf., origin unknown, according to Rafinesque named for a nymph; Tolumnius was a king of the Veientes or a Rutulian soothsayer mentioned by Vergilius; see Constantine Samuel Rafinesque, *Flora Telluriana*. 2: 101. Philadelphia 1836 [1838].)

Tropical America.

See *Sp. Pl.* ed. 2. 2: 1352. 1763, *Observationes Botanicae* 6: 49. 1791, *Nova Acta Regiae Soc. Sci. Upsal.* 6: 74. 1799, *Nov. Gen. Sp.* 1: 344. 1816, *Fl. Flumin.* 9: t. 32. 1831, *Ann. Bot. Syst.* (Walpers) 6(5): 714. 1863, *Gen. Spec. Orchid.* 2: 185. 1881, *Gard. Chron.* ser. 3, 16: 669. 1894 and *Repert. Spec. Nov. Regni Veg. Beih.* 27: 115. 1924, *Icon. Orch. Bras.*: 231. 1949, *Phytologia* 24(4): 288. 1972, *Bradea* 1(40): 408. 1974, *Lindleyana* 16(2): 136. 2001, Hammel, B.E. et al. *Manual de Plantas de Costa Rica*. Missouri Botanical Garden Press. 2003 [as *Psychmorchis pusilla*.]

(Whole plant cooked and eaten to treat colic and stomach-ache; whole plant boiled used as a wash to treat lacerations, cuts, wounds.)

in Central America: dikík

Eryngium L. Apiaceae (Umbelliferae)

Greek *eryngion* (possibly from *ear*, *earos* ‘the sap, blood’) ancient name for *Eryngium campestre* L.; Latin *erynge*, *es* and *eryngion*, *ii* for a kind of thistle, the eringo or the spotted yellow thistle; see Carl Linnaeus, *Species Plantarum*. 1: 232–233. 1753, *Genera Plantarum*. Ed. 5. 108. 1754, Delaroché, François (1780–1813), *Eryngiorum nec non generis novi Alepidae historia*. Parisiis, 1808, *Bulletin Botanique* [Genève] 1: 218. 1830, *Atlantic Journal* 149. 1832, *Botanical Miscellany* 3: 352. 1833, *New Flora and Botany of North America* ... 4: 35–36. 1836[1838], *Synopsis Plantarum Glumacearum* 2: 311. 1855 and *Das Pflanzenreich* 4(228): 106. 1913, *Amer. Midl. Naturalist* 25(2): 361–387. 1941.

Eryngium aquaticum L. (*Eryngium aquaticum* Michx., nom. illeg.; *Eryngium aquaticum* Hook. & Arn.; *Eryngium aquaticum* Vell.; *Eryngium plukenetii* Elliott; *Eryngium praealtum* A. Gray; *Eryngium virginianum* Lam.; *Eryngium virginianum* Elliott)

North America. Biennial herb

See *Species Plantarum* 1: 232–233. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 4(2): 759. 1798, *Flora Boreali-Americana* (Michaux) 1: 163. 1803, *Sketch Bot. S. Carolina* [Elliott] 1: 343. 1817, *A Sketch of the Botany of South-Carolina and Georgia* [Elliott] 1(6): 582. 1821, *Flora Fluminensis* 3: 126, t. 99. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 3: t. 99. 1831. [1827 publ. 29 Oct 1831], *The Botany of Captain Beechey’s Voyage* 142. 1832,

Boston Journal of Natural History 6(2): 210. 1850 and *Amer. Midl. Naturalist* 25(2): 361–387. 1941

(Roots as an antidote for snakebite.)

in English: button snakeroot, eryngo, marsh eryngo, rattlesnake-master

Eryngium aquaticum L. var. ***aquaticum*** (*Eryngium virginianum* Lam.; *Eryngium virginianum* Elliott)

North America. Biennial herb

See *Species Plantarum* 1: 232–233. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 4(2): 759. 1798, *Flora Boreali-Americana* (Michaux) 1: 163. 1803, *Sketch Bot. S. Carolina* [Elliott] 1: 343. 1817, *A Sketch of the Botany of South-Carolina and Georgia* [Elliott] 1(6): 582. 1821, *Florae Fluminensis* 3: 126, t. 99. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 3: t. 99. 1831. [1827 publ. 29 Oct 1831], *The Botany of Captain Beechey's Voyage* 142. 1832, *Boston Journal of Natural History* 6(2): 210. 1850 and *Amer. Midl. Naturalist* 25(2): 361–387. 1941

(Roots as an antidote for snakebite.)

in English: button snakeroot, eryngo, marsh eryngo, rattlesnake-master

Eryngium billardierei F. Delaroché (*Eryngium billardierei* Heldr. ex Boiss.)

Himalaya.

See *Eryngiorum nec non Generis Novi Alepideae Historia* 25. 1808, *Diagnoses plantarum orientalium novarum* ser. 1, 10: 20. 1849

(Plant ashes used for piles. Roots tonic, stimulant, aphrodisiac.)

in India: dudhali, pahari, poli

Eryngium columnare Hemsl.

Mexico.

See *Hooker's Icones Plantarum* 26: t. 2511. 1897

(Leaves and flowers infusion diuretic and emmenagogue.)

in English: rattlesnake master

in Mexico: hierba del sapo

Eryngium foetidum L. (*Eryngium antihystericum* Rottler; *Eryngium antihystericum* Rottb.; *Eryngium foetidum* Forssk.; *Eryngium foetidum* Walter; *Eryngium foetidum* fo. *comosum* Urb.; *Eryngium foetidum* fo. *nudum* H. Wolff; *Eryngium molleri* Gand.)

Neotropics, Virginia, Jamaica, Mexico. Herb, strong smelling to aromatic, taprooted, roots fusiform, fleshy rootstock exuding latex, leaves spinously dentate, floral spikes cylindrical, weedy, cattle fodder, young leaves eaten and used as a flavoring similar to *Coriandrum sativum*

See *Voy. Jam. Nat. Hist.* 1: t. 156, f. 3–4. 1707, *Species Plantarum* 1: 232. 1753, *Fl. Aegypt.-Arab.* p. xxiii. 1775, *Fl. Carol.* [Walter] 112. 1788, *Acta Literaria Universitatis Hafniensis* 1: 288. 1778, *Fl. Bras.* (Martius) 11, pt. 1: 302. 1879 and *Pflanzenr.* (Engler) 4, Fam. 228: 203. 1913, *Bull. Soc. Bot. France* 65: 31. 1918, *Amer. Midl. Naturalist* 25(2): 361–387. 1941, *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/1): 3–97. 1962, *Stuttgarter Beitr. Naturk., A*, 596: 19. 1999

(Antisnake plant, snakes said to avoid the places where this plant grows. Leaves decoction anticonvulsant, antiinflammatory, antimalarial, pectoral, carminative, antispasmodic, for epilepsy, flatulence, infantile vomiting and diarrhea. Leaf infusion taken for fever, flu, headache, diabetes; leaves taken for pinworms, food allergy and poisoning; young leaves stuffed in the ear for earache; baths for heat, cough; leaves poultice applied to gland swellings, abscesses, boils. Root decoction for fever, cold, cough, pneumonia, malarial fever, constipation, stomachache; crushed roots taken for stomachache. Magico-religious beliefs, ritual, leaves crushed and rubbed on the face of the victim.)

in English: coriander, fit-weed, nanna-a-run

in China: ci qin, jia yuan qian

in India: ati sambar, bah khawr, bhandhanya, sambar soppu

in South Laos: (people Nya Hön) phak hôôm cin (cin = Chinese), 'phak 'hoom theet (= foreign perfumed legume)

Eryngium horridum Malme

South America.

See *Ark. Bot.* 3, no. 13: 15, pl. 1, fig. 1. 1904

(Purgative.)

Eryngium yuccifolium Michx. (*Eryngium aquaticum* var. *normale* H. Wolff; *Eryngium aquaticum* var. *subinerme* H. Wolff; *Eryngium tuberosum* Raf.)

North America. Perennial herb

See *Flora Boreali-Americana* (Michaux) 1: 164. 1803, *Florula Ludoviciana*, or, a flora of the state of ... 60. 1817 and *Das Pflanzenreich* 4(228): 240, 242. 1913

(Root used for bladder trouble and as an antidote.)

in English: buttoneryngo, button snakeroot, rattlesnake-master

Eryngium yuccifolium Michx. var. ***yuccifolium***

North America. Perennial herb

See *Flora Boreali-Americana* (Michaux) 1: 164. 1803, *Florula Ludoviciana*, or, a flora of the state of ... 60. 1817 and *Das Pflanzenreich* 4(228): 240, 242. 1913

(Root used for bladder trouble and as an antidote.)

in English: buttoneryngo, button snakeroot, rattlesnake-master

Erysimum L. Brassicaceae (Cruciferae)

From the Greek *erysimon*, used by Theophrastus (*HP*. 8.3.1) and Dioscorides (2.158) for a garden plant, possibly *Sisymbrium*; Latin *erysimum*, *i* for a sort of grain, called *irio* by Plinius; see Carl Linnaeus, *Species Plantarum*. 2: 660–663. 1753, *Genera Plantarum*. Ed. 5. 296. 1754, *Syst. Nat.* [Candolle] 2: 491, 493. 1821, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 170. 1822, *Bibliothèque Universelle de Genève* sér. 2. 17: 125. 1838, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg*, Septième Série (Sér. 7) 15(2): 76. 1869 and *Bull. Misc. Inform.* 1925: 55. 1925, *Fieldiana, Bot.* 24(4): 354–380. 1946, *Flora Reipublicae Popularis Sinicae* 33: 379, 390. 1987.

Erysimum cheiranthoides L. (*Cheiranthus cheiranthoides* (L.) A. Heller; *Cheiranthus cheiranthoides* A. Heller; *Cheirinia cheiranthoides* (L.) Link; *Cheirinia cheiranthoides* Link; *Crucifera erysimum* E.H.L. Krause; *Erysimum brevifolium* Z.X. An (also C.H. An); *Erysimum cheiranthoides* Crantz; *Erysimum cheiranthoides* subsp. *altum* Ahti; *Erysimum cheiranthoides* var. *japonicum* H. Boissieu; *Erysimum japonicum* (H. Boissieu) Makino; *Erysimum parviflorum* Pers.; *Erysimum parviflorum* Nutt.; *Erysimum parviflorum* Nutt. ex Torr. & A. Gray)

North America.

See *Species Plantarum* 2: 660–661. 1753, *Syn. Pl.* (Persoon) 2(1): 199. 1806, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 170. 1822, *Handbuch* [Link] ii. 314. 1831, *Fl. N. Amer.* (Torr. & A. Gray) 1: 95. 1838, *Catalogue of North American Plants North of Mexico* 4. 1898 and *Deutschlands Flora, Abtheilung II, Cryptogamie* 6: 31, 75, pl. 1. 1902, *Contributions from the Gray Herbarium of Harvard University* 207: 101–116. 1977, *Le Naturaliste Canadien* 108: 143–152. 1981, *Taxon* 31: 574–575. 1982, *Botaniceskij Žurnal SSSR* 64(2): 236–240. 1984, *Le Naturaliste Canadien* 111: 447–449. 1984, *Botaniceskij Žurnal SSSR* 69(1): 75–80. 1984, Palechek, N. “Toxic weed seeds in cattle feed.” *Can. Vet. J.*, 26: A10. 1986, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Regnum Veg.* 127: 46. 1993, *Flora Xinjiangensis* 2(2): 379. 1995

(It contains large quantities of glucosinolates, which release allylisothiocyanate upon hydrolysis.)

in English: treacle mustard, wallflower mustard, wormseed mustard

in China: xiao hua tang jie

Erysimum hieraciifolium L.f. (*Erysimum afghanicum* Kitam.; *Erysimum bhutanicum* W.W. Sm.; *Erysimum esepatum* Z.X. An; *Erysimum hieraciifolium* L.; *Erysimum hieraciifolium* Jacq.; *Erysimum hieraciifolium* Pall.; *Erysimum hieraciifolium* d'Urv.; *Erysimum hieraciifolium* Schleich. ex DC.; *Erysimum robustum* D. Don)

India, Bhutan, Himalaya.

See *Cent. Pl.* I. 18. 1755, *Fl. Austriac.* (Jacquin) 1: t. 73. 1773, *Tabl. Phys. Topogr. Taur.* 54. 1795, *Syst. Nat.* [Candolle] 2: 496. 1821, *Mém. Soc. Linn. in Zambia: chisunga, mulunguti, mutiti, mwale

Erythrina acanthocarpa E. Mey. (*Corallodendron acanthocarpum* (E. Mey.) Kuntze)

South Africa. Perennial non-climbing shrub, large succulent underground rootstock, deciduous, many-branched, spiny, hooked sharp purplish-black prickles, scarlet flowers, brown armed pods constricted between the seeds

See *Commentariorum de Plantis Africae Australioris* 151. 1836, *Revisio Generum Plantarum* 1: 172. 1891 and *Lloydia* 37(3): 408. 1974, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981, *J. Nat. Prod.* 45(4): 427–433. 1982, *Journal of Ethnopharmacology* 74(3): 231–237. 2001

(Narcotic, anti-bacterial and purgative. Seeds used as a charm against evil.)

in English: prickly coral tree, tambookie thorn, thorny coral tree

in South Africa: Tamboekiedoring

Erythrina americana Mill. (*Corallodendron americanum* (Mill.) Kuntze; *Erythrina carnea* Aiton; *Erythrina coraloides* DC.; *Erythrina enneandra* DC.; *Erythrina fulgens* Loisel.; *Erythrina fulgens* Sweet, nom. nud.)

Central America. Perennial non-climbing tree, flowers frequently eaten

See Luis de Molina y Neve, *Reglas de orthographia, diccionario, y arte del idioma othomi*. Mexico 1767, *The Gardeners Dictionary*: ... eighth edition no. 5. 1768, *Hortus Kewensis*; or, a catalogue ... 3: 8. 1789, *Catalogus plantarum horti botanici monspeliensis* 109. 1813, *Herbier général de l'amateur*, contenant la description, l'histoire, propriétés et la culture des végétaux utiles et agréables. 4: t. 262. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 413. 1825, *Hort. (Toxins, poisonous seeds, flower buds, young leaves, and young twigs eaten like stringbeans though deemed potentially harmful. Narcotic, piscicidal, poisonous, sedative, soporific, anti-fungal, used for female problems, dysmenorrhea; flower decoction sedative, for dysentery, hemorrhages; seeds eaten to induce a deep relaxing sleep. Bark used to poison dogs and wild animals. Crushed branches used to intoxicate fish.)

in English: coral bean

in Central America: amapola de cerca, brucal, bucare, bucayo enano, coralilla, cresta de gallo, elequeme, gallito, machete, machetico, machetillos, mata caiman, miche, palo de pito, parsu, pernila de casa, peronio, piñon de cerca, piñon de España, piñon de pito, pito, pito blanco, pito negro, pito de montaña, pito de Peronilla, pitón, poro, poro de cerca, tzinte, tzite

Erythrina burana Chiov.

Ethiopia. Perennial non-climbing tree, spreading, inflorescence borne on leafy branch, calyx tomentose with blunt apical teeth, corolla standard pale yellow-orange

See *Atti Reale Accad. Italia, Mem. Cl. Sci.* 11: 27. 1940, *Agroforestry Today* 2: 13–14. 1990, *Journal of Natural Products* 56(10): 1831–1834. 1993

(Antimicrobial, cytotoxic, antineoplastic, antimutagenic, anticonvulsant.)

Erythrina burtii Baker f. (*Erythrina burtii* Baker f.)

Kenya, Tanzania. Perennial non-climbing tree

See *Journal of Botany, British and Foreign* 70: 254. 1932

(Stem bark extracts antifungal and antibacterial. Seeds to treat throat pain. Veterinary medicine, to treat cough in camels.)

Erythrina caffra Thunb. (*Chirocalyx pubescens* Walp.; *Duchassaingia caffra* Walp.; *Erythrina caffra* Ker Gawl.; *Erythrina constantiana* Micheli; *Erythrina fissa* Presl; *Erythrina fusca* Lour.; *Erythrina insignis* Tod.; *Erythrina viarum* Tod.)

South Africa, Mozambique. Perennial non-climbing tree, deciduous, round spreading canopy, prickly branches, short broad standard petal, orange-red scarlet flowers in large clusters, dark cylindrical pods, small shiny coral-red seeds

See *Flora Cochinchinensis* 2: 427–428. 1790, *Prodromus Plantarum Capensium*, ... 121. 1800, *Bot. Reg.* 9: t. 736. 1823, *Fl. Filip.*, ed. 2 [F.M. Blanco] 394. 1845, *Linnaea* 23: 742. 1851, *Revisio Generum Plantarum* 1: 172. 1891, *Rev. Hort.* 1896: 524. 1896 and *Lloydia* 37(3): 404. 1974

(Poisonous, a curare-like and paralyzing action, used in treating nervous diseases, also antibacterial, antiinflammatory and analgesic. Leaves known to have poisoned cattle; leaves infusions as eardrops for earache. Bark to treat sores, wounds, toothache, abscesses and arthritis; powdered burnt bark for open wounds. Magic, ceremonial, royal trees.)

in English: coast coral tree, coral tree, lucky bean tree

in China: nan fei ci tong

in Southern Africa: Cape kafferboom, cocky-doodles, dopkrale, kafferboom, kafferboontjie, kafferkrale, kaffir beans, kaffirboom, koraalboom, kuskoraalboom, muRungu, muSindzana, muSintsana, muTzozo, umSinsi, umSintsi

Erythrina corallodendron L. (*Corallodendron occidentale* (L.) Kuntze; *Erythrina corallifera* Salisb.; *Erythrina corallodendron* Lam.; *Erythrina corallodendron* Herb. Madr. ex Wallich; *Erythrina corallodendron* var. *occidentalis* L.; *Erythrina corallodendron* L.; *Erythrina inermis* Mill.; *Erythrina pallida* Britton; *Erythrina spinosa* Mill.)

Caribbean. Perennial non-climbing tree, thorny, bright coral red flowers

See *Species Plantarum* 2: 706. 1753, *The Gardeners Dictionary*: ... eighth edition no. 3 and no. 6. 1768, *Encyclopédie Méthodique, Botanique* 2(1): 390. 1786, *Flora Cochinchinensis* 2: 427. 1790, *Prodr. Stirp. Chap. Allerton*

in Argentina: ceibo, ceibo macho, chopo, corticeira, cresta de gallo, curtiza, curtizera, seibo, zuinan

in Brazil: curtiscao, mulungu, suina

in Guadeloupe: immortelle du pays

in Mexico: iquimite

in Peru: pisonai

Erythrina dominguezii Hassler (*Erythrina chacoensis* Speg.)

South America. Perennial non-climbing tree

See *Darwiniana* 7(2): 175–184. 1946, *Journal of Ethnopharmacology* 70: 87–109. 2000

(Bark decoction taken for wounds, hemorrhage.)

in Bolivia: cosorió, cuat'ruí, gallito

Erythrina edulis Micheli (*Erythrina edulis* Posada-Ar.; *Erythrina edulis* Triana; *Erythrina edulis* Triana ex Sprague; *Erythrina edulis* Triana ex Micheli; *Erythrina esculenta* Sprague; *Erythrina lorenii* J.F. Macbr.; *Erythrina megistophylla* Diels)

South America. Perennial non-climbing tree, stem and branches covered with stout prickles, reddish-green calyx, corolla crimson, seeds must be boiled or fried thoroughly before being eaten, leaves and tender branches can be fed to cattle, goats, horses, pigs and rabbits

See *Journal de Botanique* (Morot) 6(8): 145. 1892 and *Bulletin de l'Herbier Boissier*, sér. 2, 5: 1167. 1905, *Publications of the Field Columbian Museum, Botanical Series* 8(2): 104. 1930, *Bibliotheca Botanica* 116: 96. 1937

(Uncooked seeds can be toxic if consumed over a long period. Flowers used to treat eye irritations. Seed mixed in a liquid concoction to treat inflammation of the bladder.)

in South America: balú, basul, basul sachaporoto, chachafruto, guat, pajuro, pashuro, poroto, sacha purutu, sachaporoto

Erythrina excelsa Baker (*Erythrina bagshawei* Baker f.; *Erythrina seretii* De Wild.)

Nigeria, Sudan. Perennial non-climbing tree, straight, trunk armed with woody conical spines, twigs armed with prickles, petiole often prickly, corolla orange-red to scarlet red or coral-red, inflorescence an axillary or terminal erect compact

false raceme, fruit a linear-oblong spirally twisted pod constricted between the orange-red seeds, flowers contain much nectar and are visited by sunbirds and bees

See *Flora of Tropical Africa* 2: 183. 1871, *Revisio Generum Plantarum* 1: 172. 1891 and *Journal of the Linnean Society, Botany* 37: 145. 1905, *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 5(2): 154. 1907

(Bark sap administered as an antidote for snakebites.)

in Cameroon: engame, ponji

in Yoruba: elegun sese

in Zaire: mundungu

Erythrina flabelliformis Kearney (*Erythrina coralloides* sensu A. Gray; *Erythrina purpusii* Brandege)

North America, Mexico. Perennial non-climbing tree or shrub, semi-succulent, spiny, swollen stem, tubular red flowers in terminal clusters

See *Transactions of the New York Academy of Sciences* 14(2): 32. 1894 and *Bulletin of Narcotics* 21(4): 15–27. 1969, *Annual Review of Plant Physiology* 21: 571–597. 1970, *Lloydia* 37(3): 332–459. 1973, *Lloydia* 37(4): 543–664. 1974, Merrill, W. “An investigation of ethnographic and archeology specimens of mesalbeans (*Sophora secundiflora*) in American museums.” *Museum of Anthropology. in Mexico: colorin, colorin patol, jutucù, patol, patol colorin, pejmoch, pemoche, pichoco cimarron, pomachita

Erythrina humeana Spreng. (*Erythrina erythrostachia* Morr.; *Erythrina hastifolia* G. Bertol.; *Erythrina humei* N.E. Br., nom. nud.; *Erythrina humei* E. Mey.; *Erythrina humei* var. *hastifolia* (Bertol. f.) Baker f.; *Erythrina humei* var. *raja* (Meisn.) Harv.; *Erythrina princeps* A. Dietr.; *Erythrina raja*

Meisn.) (for Sir Abraham Hume, 1748/49–1838, Director of Hon. East India Company, 1775 Fellow of the Royal Society, owner of a very famous garden in Wormleybury, Herts; see E.H.M. Cox, *Plant-hunting in China*. A history of botanical exploration in China and the Tibetan marches. 47–48. London 1945, Emil Bretschneider (1833–1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 364. 1994.)

Mozambique, South Africa. Perennial non-climbing tree, deciduous, large swollen tuberous roots, scarlet flowers rich in nectar, knobbly black pods

See *Systema Vegetabilium*, editio decima sexta 3: 243. 1826, *Allgemeine Gartenzeitung* 2: 305. 1834, *Commentariorum de Plantis Africae Australioris* 150. 1836, *London Journal of Botany* 2: 96. 1843, *Ann. Soc. Roy. Agric. Gand* 5: 457. 1849, *Mem. Reale Accad. Sci. Ist. Bologna*, ser. 1, 2: 568. 1850, *Flora Capensis* 2: 237. 1862, *Revisio Generum Plantarum* 1: 173. 1891 and *The Leguminosae of Tropical Africa* 2: 370. 1929, *Lloydia* 37(3): 407. 1974, *Journal of Ethnopharmacology* 74(3): 231–237. 2001

(Antibacterial, narcotic and purgative, antiinflammatory, analgesic.)

in English: dwarf coral tree, dwarf erythrina, dwarf kaffirboom, Natal coral tree, summer blooming

in China: na ta er ci tong

in Southern Africa: dwarf kafferboom, dwarf kaffirboom, iKati, kleinkoraalboom, muRungu, muSintsana, muTzozo, umSinsana, umSintsana, umSintsane

Erythrina latissima E. Mey. (*Chirocalyx mollissimus* Meisn.; *Corallodendron latissimum* (E. Mey.) Kuntze; *Erythrina gibbsae* Baker; *Erythrina sandersonii* Harv.)

South Africa. Perennial non-climbing tree, deciduous, thorny, spreading round crown, scarlet flowers, grey woolly calyx, compact inflorescences on stout peduncles, bright red seeds

See *Commentariorum de Plantis Africae Australioris* 151. 1836, *London Journal of Botany* 2: 97–98. 1843, *Revisio Generum Plantarum* 1: 173. 1891 and *The Leguminosae of Tropical Africa* 2: 374. 1929, *Pure Appl. Chem.* 73(7): 1197–1208. 2001

(Antimicrobial, antifungal. Powdered burnt bark used as a dressing for open wounds. Necklaces from the seeds will ward off evil spirits.)

in English: broad-leaf coral tree, broad-leaved coral tree, cork tree, hairy kafferboom, hairy kaffirboom, lucky beans, royal kafferboom

in Southern Africa: breëblaarkafferboom, breëblaarkoraalboom, broad-leaf kafferboom, broad-leaf kaffirboom, grootkafferboom, kafferboom, mofhupe, monabete, mphapha, umKhakhasi, umGqwabagqwaba, umNqwane, umQongqazi

Erythrina lysistemon Hutch. (*Erythrina caffra* sensu auct.; *Erythrina caffra* sensu Harvey, sensu E.G. Baker, sensu Burt Davy, sensu Miller; *Erythrina caffra* Thunb. var. *mosambicensis* Bak.f.; *Erythrina humeana* sensu E.G. Baker, sensu Eyles; *Erythrina humeana* Spreng.; *Erythrina humei* sensu J.G. Baker, non E. Mey.; *Erythrina princeps* A. Dietr.) (the specific name from the Greek *lyo*, *lyein* ‘to loosen, loose’ and *stemon* ‘stamen’, with vexillary stamen free from other stamens.)

South Africa. Perennial non-climbing tree, deciduous, spreading crown, scattered hooked thorns on the trunk, leaves and branches armed with short hooked prickles, red spikes of erect flowers, inflorescence a short dense terminal pseudoraceme, slender black pods constricted between the seeds, fruits hanging in clusters, shiny scarlet black seeds, food and shelter, birds and insects feed on the nectar, often confused with *Erythrina caffra*

See *Systema Vegetabilium*, editio decima sexta 3: 243. 1826, *Allgemeine Gartenzeitung* 2: 305. 1834, *Revisio Generum Plantarum* 1: 173. 1891 and *Bulletin of Miscellaneous Information Kew* 1933(9): 422–423. 1933, *Journal of Botany, British and Foreign* 76: 238. 1938, *Bothalia* 4: 223. 1941, *Botanist South. (Presence of potentially toxic alkaloids in the leaves. Roots and stem bark antibacterial. Effective in the treatment of bruises and swellings, powdered bark used against sting-ray wounds; bark decoction for uterine hemorrhage, cough. Seeds, bark and roots as fish poison, insecticides.)

in English: coral tree, flaming coral tree, immortelle, immortelle tree, mountain immortelle

in South America: amapola, amapola de sombra, amashisa, amasisa, anauca, barbatusco, brucayo, bucare, búcare, bucaro, bucayo, bucayo gigante, cachimbo, cámbulo, casho, ceibo, cosorió, Eritrina-do-alto, gallito, helequeme, madre del cacao, oropel, palo de boya, pito, pito extranjero, poró, poró de sombra, poró extranjero, poró gigante

in Indonesia: dadap

Erythrina resupinata Roxb. (*Corallodendron resupinatum* (Roxb.) Kuntze; *Duchassaingia resupinata* (Roxb.) Walp.; *Erythrina resupinata* Moritz)

India. Perennial non-climbing shrub, bright scarlet flowers

See *Hortus Bengalensis*, or a catalogue ... 53. 1814, *Flora* 36: 150. 1853, *Systematisches Verzeichniss der im Indischen Archipel* 4. 1854, *Revisio Generum Plantarum* 1: 173. 1891 and *Economic Botany* 19(3): 236–250. 1965, *J. Econ. Taxon. Bot.* 7: 249–276. 1985

(Roots given for fevers, rheumatism and leprosy. Veterinary medicine, tuber pounded and applied to relieve body pains of cattle.)

in India: badokanda, bhatjivla, dhivna, nelamogad

Erythrina rubrinervia Kunth (*Chirocalyx rubrinervius* Walp.; *Corallodendron rubrinerve* (Kunth) Kuntze)

Central and South America, Panama. Perennial non-climbing tree, small tree, scarlet flowers in large pyramidal clusters, bright red seeds, flowers and buds eaten cooked

See *Nova Genera et Species Plantarum* (quarto ed.) 6: 434. 1823[1824], *Flora* 36: 148. 1853, *Revisio Generum Plantarum* 1: 173. 1891 and *Brittonia* 3(2): 205–337. 1939, *Lloydia* 37(3): 332–459. 1974

(Flowers and buds if eaten in quantity induce sleep. Seeds sometimes used for poisoning noxious animals.)

in English: coama wood, tiger wood, tigerwood

in Belize: chac-mol-che, coapma, colorin, pito, sumpank-le

in Colombia: peronilla

in Costa Rica: elequeme, poró, poró de montaña

in Guatemala: pito, piton

in Honduras: pito

in Mexico: equelite (Tehuantepec, Oaxaca), chacmolche, chaemolche, sumpnankle

in Panama: machete, pernila de casa

in Peru: haymura

Erythrina sacleuxii Hua

Tropical Africa, Kenya, Tanzania. Perennial non-climbing tree, prickly to thorny, scarlet flowers, red seeds

See *Bull. Mens. Soc. Linn. Paris* n.s. 1: 54. 1898 and *Planta Med.* 72: 187–189. 2006

(Extracts of the root bark and stem bark showed antiplasmodial activities; root decoction to treat gonorrhoea and leprosy.)

Erythrina sandwicensis Degener (*Corallodendron monospermum* (Gaud.) Kuntze; *Erythrina monosperma* Gaudich., nom. illeg.; *Erythrina montana* Forster ex Cuzent, nom. nud.; *Erythrina montana* Rose & Standl.; *Erythrina sandwicensis* O. Deg. var. *luteosperma* H. St. John; *Erythrina tahitensis* auct. non Nadeaud. p.p.)

Hawaii. Perennial non-climbing tree, corollas pale yellow-orange

See *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 12: 466, pl. 114. 1830, *Enum. Pl. Tahiti* 80. 1873, *Revisio Generum Plantarum* 1: 173. 1891 and *Contr. U.S. Natl. Herb.* 20: 179. 1919, *Fl. Hawaiiensis* 169C. 1932, *Pacific Science* 13: 168. 1959, *J. Arnold Arbor.* 53(1): 128–139. 1972

(Flowers or infusion of pounded bark used for venereal diseases.)

in English: Hawaiian coral tree

in Hawaii: wiliwili

Erythrina senegalensis DC. (*Chirocalyx latifolius* Walp.; *Corallodendron senegalense* (DC.) Kuntze; *Duchassaingia senegalensis* (DC.) Hassk.; *Erythrina guineensis* G. Don; *Erythrina latifolia* Schumach. & Thonn.; *Erythrina senegalensis* A. Rich.)

From Senegal to Cameroon, West Africa. Perennial non-climbing tree or shrub, spreading, thick fissured bark with few stout spines, twigs grey with many sharp spines, coriaceous leaves pale below with conspicuous glands at base, calyx red, petals red, young fruits green with gold-brown pubescence twisted, coastal areas, savanna

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 413. 1825, *Beskrivelse af Guineiske planter* 333. 1827, *A General History of the Dichlamydeous Plants* 2: 371. 1832, *London Journal of Botany* 2: 97. 1843, *Tentamen Florae Abyssinicae ...* 1: 213. 1847, *Linnaea* 23: 741. 1851, *Flora* 36: 148. 1853, *Hort. Bogor. Descr.* 194. 1858, *Revisio Generum Plantarum* 1: 173. 1891

(Bark for jaundice, coughs, bronchitis, throat inflammations. Root infusion a toothache remedy, for venereal diseases. Roots and leaves for dysentery, cough, fevers; ordeal poison. The wood said to be aphrodisiac.)

in English: coral flower, parrot tree, Senegal coral tree

in Mali: nti, ntimini

in Nigeria: echichi, edeng, eranigbonyakehi, majiriya, minjiriya, minjirya, ogun sese, ologbosere, ologun-sese, ologun sheshe, showoh, usiere

in Togo: myimu, yrewo

Erythrina standleyana Krukoff (*Erythrina americana* (Dryand.) Mill.)

Central America, Cuba. Perennial non-climbing tree, slender, spiny, inflorescence orange-red, bright red seeds

See *Brittonia* 3(2): 301–304. 1939

(Seed toxic. Bark eaten as a treatment for intestinal parasites. Seeds for eye complaints.)

in English: coama wood, tiger wood

in Central America: chac lol che, chacmolche, chacmoolche, colorin, piñon espinoso, xoyo

Erythrina steyermarkii Krukoff & Barneby

Nicaragua, Costa Rica. Perennial non-climbing tree, spiny, flowers orange

See *Memoirs of the New York Botanical Garden* 20(2): 175–176, f. 8. 1970, *Revista de Biología Tropical* v. 46 n. 4 San José dic. 1998

(Mitogenic effect on human mononuclear cells isolated from peripheral blood.)

Erythrina stricta Roxb. (*Corallodendron strictum* Kuntze; *Corallodendron strictum* (Roxb.) Kuntze; *Micropteryx stricta* Walp.; *Micropteryx stricta* (Roxb.) Duchass. & Walp.)

India. Perennial non-climbing tree, deciduous, fast growing, columnar bole, soft white wood, many-branched, grey corky bark armed with prickles or short stout thorns, trifoliate leaves, scarlet flowers in axillary or terminal racemes, pods more or less woody

See *Hort. Bengal.* 53. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 251–252. 1832, *Linnaea* 23: 739–740. 1851, *FBI* 2: 189. 1876, *Revisio Generum Plantarum* 1: 173. 1891 and *Lloydia* 37(3): 332–459. 1974, *J. Nat. Prod.* 44(5): 526–529. 1981, *Contr. Bolus Herb.* 14: 258. 1991, *J. Econ. Taxon. Arnold Arbor.* 53(1): 128–139. 1972

(Used in Ayurveda and Sidha. Toxic alkaloids, poisonous, cyanogenic glycoside, saponin, all parts of the tree poisonous. Raw seeds poisonous, can be eaten after boiling and roasting. Bark antipyretic, febrifuge; bark decoction with sugar taken to eradicate intestinal worms and for blood dysentery; gum from bark diluted in water and applied to the eyes for jaundice; a soup made from bark of this tree and leaves of *Adhatoda vasica* given in cold and cough; a decoction of bark and leaves used to treat dysentery, rheumatism, fever and to relieve asthma and coughs; stem bark ground with calcium and the paste applied on scorpion sting; scraped bark used in stomachache, colic. Leaves soporific, a cure for convulsions and stomachache; leaves juice anthelmintic, for killing worms in sores; leaf paste used on boils; leaves and flowers to treat menstrual disorders; warm leaf juice applied on chest in cough; drops of leaf juice put into ear to cure ear infections. Roots and leaves febrifuge; roots decoction to treat bronchitis. Seeds astringent, crushed seeds as a poultice to treat cancer, sores and abscesses. Veterinary medicine, crushed bark antiinflammatory and astringent for diarrhea; bark extract given in indigestion; for trypanosomiasis, bark extract of *Capparis divaricata* pounded with leaves of *Erythrina variegata*, ginger, garlic and turmeric in goat's milk and given orally; leaves paste applied on the wounds of the cattle.)

in English: coral tree, Easter flower, India coral bean, Indian coral tree, moochy wood tree, thorny dadap, tiger's claw, variegated coral tree

in Madagascar: anzava

in Rodrigues Isl.: mourouk

in Burma (Myanmar): penglay- kathit

in Cambodia: roluöhs ba:y

in China: ci tong, hai tong pi

in India: badamu, badapu, badasapa, badchamu, badchipachettu, badida, badidamu, badidapu-chettu, badide, badidi, badiga, badisa, badise, badita, badite, baditha, baditi, bahu-pushpa, baridachettu, barijamu, bhadesapa, chaavuldwa, chavuldwa, dadap, era-badu, era-mudu, farhad, ferrud, harawana, kaliyana marukka, kaliyana murukka, kalyanamurukku-maram, kaliyana murunkai, kaliyanamurukku, kaliyanamurukkan, kalyanimuruigai, kandamadar, kantkimshuka, kantaki, kantaki-palaasha, kantakinshuka, kantakipalasa, katu-eramadu, krimighna, krimishatru, laro, machhikara, madarigali, mandaara, mandalia, mandar, mandara, marar, mimbataru, modugo, mokek, muccikarra, muchi mullumurukku, mullu moduga, mullu-murukku, murukku, murunga, murungu, nimbataru, paaladwa, paaribhadra, paaribhadra, paaribhadra, paaribhadrakamu, paaribhavyamu, parijata, parijataka, parijatamu, paringa, parivala, parivalada, parivana, perol mere, phaledo, pholado, pongara, pongarada, pongare, prabhadraka, raktakeshar, raktakusuma, raktapushpa, rinki, saleki, savusayam, sinsugam, tellavarjam, vallai, varijapa, varjipe, varjrapa, wangiram, warjipe, weta-erabodu, yak-erabodu

in Indochina: boung, lang

in Indonesia: dadap ayam, dadap ayam, dede bineh, dadap blendung

in Japan: deigo, diigu

(Larvicidal seeds. Leaves antinociceptive, anticonvulsant, depressant action in the central nervous system, for memory, anxiety, epilepsy, agitation, insomnia and others disorders of the CNS, benzodiazepine-like effects. Paralyzing curarising action in animals.)

in English: coral tree, red bean tree

in South America: bico-de-papagaio, Eritrina-molungu, mulungu

Erythrina verna Vell. (*Corallodendron mulungu* (Mart.) Kuntze; *Erythrina flammea* Herzog; *Erythrina mulungu* Benth.)

Bolivia, Brazil. Perennial non-climbing tree

See *Phytologia* 1(8): 287–289. 1938, *Fieldiana, Bot.* 24(5): 1–425. 1946, *Mem. N.Y. Bot. Gard.* 20(2): 159–177. 1970, *Phytologia* 22(4): 244–277. 1971, *Phytologia* 25(1): 1–31. 1972, *Phytologia* 27(2): 108–141. 1973, *Phytologia* 33(5): 342–356. 1976, *Phytologia* 36(1): 1–11. 1977, *Phytologia* 39(5): 294–306. 1978, *Phytologia* 41(4): 19–32, 256–300. 1979, *Phytologia* 46(2): 88–93. 1980, *Ann. Missouri Bot. Gard.* 67(3): 523–818. 1980, *Phytologia* 51(7): 440–457. 1982, *Journal of Ethnopharmacology* 110(2): 271–274. 2007

(Leaves antinociceptive, anticonvulsant, depressant action in the central nervous system, for memory, anxiety, epilepsy, agitation, insomnia and others disorders of the CNS, benzodiazepine-like effects.)

in Brazil: bico de papagajo, mulungá, mulungu, mulungú, murungu, pau vermelho, sananduva, sandu, sapatinho de judeu, saubu, suinas murungu

Erythrina vespertilio Benth. (*Corallodendron vespertilio* (Benth.) Kuntze; *Erythrina biloba* F. Muell.; *Erythrina*

vespertilio var. *biloba* Domin; *Erythrina vespertilio* var. *typica* Domin)

Australia, Papua New Guinea. Perennial non-climbing tree, pleasant scent

See *Journal of an Expedition into the Interior of Tropical Australia* 218. 1848, *Hooker's Journal of Botany and Kew Garden Miscellany* 9: 21. 1856, *Revisio Generum Plantarum* 1: 173. 1891 and *Bibl. Bot.*, Heft 89(3): 775. 1920

(Bark and bast soaked in water which is applied externally to treat headaches and sore eyes.)

in Australia: barswing coral, bat's wing bean tree, bat's wing coral tree, bean tree, coral tree, cork tree, gray corkwood, grey corkwood, yantal

Erythrina zeyheri Harv. (*Corallodendron zeyheri* (Harv.) Kuntze)

South Africa, Zimbabwe. Perennial non-climbing shrub, suffruticose shrublet, large underground rootstock, leaves compound covered with large recurved prickles on the midrib, scarlet flowers, upright inflorescences on long stalks, smooth black pod, orange-red seeds

See *Flora Capensis* 2: 236. 1862, *Revisio Generum Plantarum* 1: 173. 1891 and *Journal of Ethnopharmacology* 74(3): 231–237. 2001

(Antibacterial, bark and leaves. Underground rootstock smoked for asthma.)

in English: harrow-breaker, plough-breaker, prickly cardinal

in South Africa: khungoana, motumo, ploegbreker, umnsinsana

Erythrococca Benth. Euphorbiaceae

From the Greek *erythros* 'red' and *kokkos* 'a berry', the fruits are bright orange-red when ripe, see *Niger Flora* [W.J. Hooker]. 506. 1849.

Erythrococca africana (Baill.) Prain (*Athroandra africana* (Baill.) Pax & K. Hoffm.; *Claoxylon africanum* (Baill.) Müll. Arg.; *Claoxylon barteri* Hook. f.; *Erythrococca africana* Prain; *Trewia africana* Baill.)

Trop. Africa, Cape Verde and Senegal to Cameroon. Small tree or shrub, flowers pale green, smooth 2-locular fruits, seeds with orange arils

See *Adansonia* 1: 68. 1860, *Journal of the Linnean Society, Botany* 6: 21. 1862, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 777. 1866 and *Ann. Bot.* 25: 620. 1911, *Das Pflanzenreich* IV. 147(VII): 79. 1914

(Powdered dry leaves taken with food as a mild purgative; crushed leaves applied to whitlow.)

Erythrococca anomala (Juss. ex Poir.) Prain (*Adelia anomala* Juss. ex Poir.; *Erythrococca aculeata* Benth.; *Erythrococca anomala* Prain)

Tropical Africa. Shrub or small tree, spiny, pairs of short thorns at nodes, yellowish flowers, dehiscent fruits, seeds with a bright red aril

See *Systema Naturae*, Editio Decima 2: 1285, 1298. 1759, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 132. 1810, *Niger Fl.* 506. 1849 and *Ann. Bot.* 25: 614. 1911

(Leaves laxative and purgative, a decoction of the leaves taken to expel tapeworms; leaves sap to treat sore eyes, sinusitis and ear infections. Leafy twigs to clean wounds and ulcers. Bark against arthritis and rheumatism.)

in English: bush lime

Erythrococca atrovirens (Pax) Prain (*Athroandra atrovirens* (Pax) Pax & K. Hoffm.; *Claoxylon atrovirens* Pax; *Erythrococca atrovirens* Prain)

Equatorial Africa, Zambia. Shrub or tree, spindly, orange dehiscent fruits, aril orange, leaves eaten as a vegetable

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 85–86. 1894 and *Annals of Botany. Oxford* 25: 623–625. 1911, *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908*, *Botanik* 4: 452. 1912

(Leaf powder applied to wounds. Leaf sap or a paste from the roots, heated together with lemon juice, applied to syphilitic sores.)

Erythrococca atrovirens (Pax) Prain var. *flaccida* (Pax) Radcl.-Sm. (*Athroandra atrovirens* (Pax) Pax & K. Hoffm. var. *flaccida* (Pax) Pax & K. Hoffm.; *Claoxylon flaccidum* Pax; *Claoxylon oleraceum* Prain; *Erythrococca flaccida* (Pax) Prain; *Erythrococca oleracea* (Prain) Prain)

Tanzania. Shrub

See *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen*, tabulis aeneis 18 illustratum 43, pl. 14, f. 43. 1824, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 85–86. 1894 and *Annals of Botany. Oxford* 25: 623–625. 1911, *Bull. Misc. Inform. Kew* 1911: 94. 1911, *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908*, *Botanik* 4: 452. 1912, *Das Pflanzenreich* IV. 147(VII): 83. 1914, *Kew Bull.* 42: 395. 1987

(Leaf powder applied to wounds, skin diseases.)

Erythrococca berberidea Prain (*Micrococca berberidea* (Prain) Phill.)

Mozambique, Tanzania, South Africa. Spiny shrub

See *Niger Fl.* 503. 1849 and *Kew Bulletin* 1911: 92. 1911, *Journal of South African Botany* 9: 138. 1943

(Root infusion given as an enema against stomachache and indigestion. Veterinary medicine, leaves decoction given in case of anthrax and East Coast fever.)

in English: prickly red-berry

in Southern Africa: doringrooibessie, erythrococca, uHlabazihlangane

Erythrococca bongensis Pax (*Erythrococca olacifolia* Prain; *Erythrococca paxii* Rendle; *Erythrococca rigidifolia* Pax)

Burundi, Tanzania, Uganda. Shrub or small tree, armed, multi-branched, erect or scandent, spreading, greenish flowers, greenish or purplish cocci, seed aril orange-yellow or red, leaves eaten as a vegetable

See *Niger Flora* 506. 1849, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 88. 1894 and *Journal of the Linnean Society, Botany* 37: 212, t. 3. 1905, *Bot. Jahrb. Syst.* 43: 320. 1909, *Bull. Misc. Inform. Kew* 1911: 89. 1911, *African Study Monographs*, Supplement 7: 1–52. 1987, *Kew Bulletin* 46(2): 331–333. 1991, *Journal of Ethnopharmacology* 83: 39–54. 2002, *Journal of Ethnopharmacology* 88: 19–44. 2003

(Leaf sap diluted with water drunk against cough, leaves mixed with butter eaten against stomach complaints and cough; leaf decoction drunk for diarrhea. A decoction of the roots and leaves together with the leaves of *Hibiscus fuscus* drunk against intestinal parasites. Veterinary medicine, leaf sap given to facilitate parturition.)

in Burundi: umutinti, umutintyi

in Tanzania: engetaengashe, kitindi, mteru

Erythrococca chevalieri (Beille) Prain (*Athroandra chevalieri* (Beille) Pax & K. Hoffm.; *Claoxylon chevalieri* Beille; *Erythrococca chevalieri* Prain)

Guinea, Cameroon, Congo.

See *Bulletin de la Société Botanique de France* 55(8): 75. 1908, *Annals of Botany*. 25: 621. 1911, *Das Pflanzenreich* 7: 79. 1914

(Leaves aphrodisiac, taken against gonorrhoea, applied to heal sores and scabies. Leaf sap drunk against bronchial complaints, applied externally to treat itch. Roots infusion taken to relieve stomach complaints. Magic, ritual, used in witchcraft.)

Erythrococca fischeri Pax

Eastern equatorial Africa. Shrub or tree, flower buds green, calyx pale yellow-green, red 1–3 lobed fruits edible, food for goats

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 88. 1894

(Roots decoction drunk to treat intestinal worm infections and gonorrhoea.)

in Tanzania: enjani engashe, mkunda ng'ombe, mnyembewe

Erythrococca hispida (Pax) Prain (*Athroandra hispida* (Pax) Pax & K. Hoffm.; *Claoxylon hispidum* Pax; *Erythrococca hispida* Prain)

Cameroon. Small tree, greenish flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 85. 1894 and *Annals of Botany*. 25: 621, 625. 1911, *Das Pflanzenreich* 7: 84, f. 13. 1914

(Leaves grounded with salt and applied to scarifications to treat kidney pain. Young leaves eaten with vegetable salt and cooked banana against gastro-intestinal problems.)

Erythrococca kirkii (Müll.Arg.) Prain (*Claoxylon kirkii* Müll.Arg.; *Erythrococca kirkii* Prain; *Erythrococca mitis* Pax)

Kenya, Mozambique. Shrub, lianescent, many-branched, straggling or erect, stem producing white latex when cut, yellowish cream inflorescence, fruit a 3-lobed capsule, seeds with yellow, orange or red aril, chopped leaves eaten cooked as a vegetable, ripe fruits eaten raw, leaves used for fodder

See *Flora* 47: 436. 1864, *Pflanzenw. Ost-Afrikas*, C: 238. 1895 and *Annals of Botany*. 25: 609. 1911

(Ground leaves mixed with milk drunk or raw leaves eaten to expel tapeworm, and also for epilepsy and abdominal pain.)

in Tanzania: chehuwa, cheluwa, kimele, mjembelule, mnyembeue, mwembelule

Erythrococca menyharthii (Pax) Prain (*Claoxylon menyharthii* Pax; *Erythrococca menyharthii* Prain)

East and southern tropical Africa. Shrub or tree, leaves eaten as a vegetable, fruits edible

See *Bulletin de l'Herbier Boissier*, sér. 2, 1(9): 877. 1901, *Annals of Botany*. 25: 616. 1911

(Roots ground and eaten with honey against cough. Leaf sap applied as drops in the eye as anti-venom after attacks by spitting snakes.)

Erythrococca polyandra (Pax & K. Hoffm.) Prain (*Claoxylon polyandrum* Pax & K. Hoffm.; *Erythrococca polyandra* Prain)

Tanzania, Mozambique, Zimbabwe. Tree or shrub, greenish flowers, orange fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 237. 1910, *Annals of Botany*. 25: 618. 1911

(Leaves and stems applied as an enema against hemorrhoids.)

Erythrococca welwitschiana (Müll.Arg.) Pax & K. Hoffm. (*Athroandra welwitschiana* (Müll.Arg.) Pax & K. Hoffm.; *Claoxylon welwitschianum* Müll.Arg.; *Erythrococca welwitschiana* Prain)

Central Africa, Congo. Small tree, flowers white

See *Journal of the Linnean Society, Botany* 2: 333. 1864 and *Annals of Botany*. 25: 622. 1911, *Das Pflanzenreich* IV. 147(VII): 81. 1914

(Leaves aphrodisiac, taken against gonorrhoea, applied to heal sores and scabies. Leaf sap drunk against bronchial complaints, applied externally to treat itch. Roots infusion taken to relieve stomach complaints.)

Erythronium L. Liliaceae

From the ancient Greek plant name *erythronion*, from *erythros* 'red', referring to the leaves and flowers of some species; Latin *erythraicon* for a species of the plant *satyrion* (Plinius), Greek *erythraikon satyrion* (*satyros* 'satyr'), an ancient name used by Dioscorides for an orchid; see *Species Plantarum* 1: 305. 1753 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 237. Basel 1996.

Erythronium albidum Nutt.

North America. Perennial herb, long elliptical sheathing mottled, nodding white bell-shaped flowers, petals curved-back

See *The Genera of North American Plants* 1: 223–224. 1818

(Leaves may cause allergic reactions. Leaves paste to treat ulcers, draw out splinters and reduce swellings.)

in English: blonde-Lillian, white dog-tooth-violet, white trout lily

Erythronium americanum Ker Gawler (*Erythronium americanum* Ker Gawl. subsp. *americanum*; *Erythronium flavum* Sm., nom. superfl.)

North America. Perennial herb, basal brown-mottled leaves, nodding yellow flower

See *Bot. Mag.* 28: t. 1113. 1808, *Cycl.* 13: 2. 1809

(Plant taken to prevent conception. Root infusion febrifuge.)

in English: amberbell, American troutlily, dogtooth violet, trout lily

Erythronium americanum Ker Gawler subsp. *americanum*

North America. Perennial herb, basal brown-mottled leaves, nodding yellow flower

See *Bot. Mag.* 28: t. 1113. 1808, *Cycl.* 13: 2. 1809 and *Acta Biol. Cracov.*, *Ser. Bot.* 29: 19–30. 1987

(Plant taken to prevent conception. Root infusion febrifuge.)

in English: amberbell, American troutlily, dogtooth violet, trout lily

Erythronium grandiflorum Pursh (*Erythronium giganteum* Lindl.; *Erythronium grandiflorum* Benth.; *Erythronium grandiflorum* fo. *giganteum* (Lindl.) Voss; *Erythronium grandiflorum* f. *revolutum* (Sm.) Voss; *Erythronium grandiflorum* Pursh subsp. *chrysandrum* Applegate; *Erythronium grandiflorum* Pursh subsp. *nudipetalum* Applegate; *Erythronium grandiflorum* Pursh var. *chrysandrum* (Applegate) Scoggan; *Erythronium grandiflorum* var. *idahoense* (H. St. John &

G.N. Jones) R.J. Davis; *Erythronium grandiflorum* var. *minus* Hook.; *Erythronium grandiflorum* var. *nudiflorum* C.L. Hitchc.; *Erythronium grandiflorum* Pursh var. *nudipetalum* (Applegate) C.L. Hitchc.; *Erythronium grandiflorum* Pursh var. *pallidum* H. St. John; *Erythronium grandiflorum* var. *parviflorum* S. Watson; *Erythronium leptopetalum* Rydb.; *Erythronium maximum* Douglas ex Baker; *Erythronium nudipetalum* Applegate; *Erythronium obtusatum* Goodd.; *Erythronium pallidum* (H. St. John) G.N. Jones; *Erythronium parviflorum* (S. Watson) Goodd.; *Erythronium parviflorum* (S. Watson) Goodding; *Erythronium speciosum* Nutt. ex Baker; *Erythronium utahense* Rydb.)

North America. Perennial herb, food

See *Fl. Amer. Sept.* (Pursh) 1: 231. 1813, *Edwards's Botanical Register* under pl. 1786. 1835, *Fl. Bor.-Amer.* (Hooker) 2: 182. 1839, *J. Linn. Soc., Bot.* 14: 298. 1874, *Proc. Amer. Acad. Arts* 26: 129. 1891, *Vilmorin's Blumengärtnerei. Dritte neubearbeitete Aflage* 1: 1115. 1895 and *Bot. Gaz.* 33: 67. 1902, *Contr. Dudley Herb.* 1: 190. 1933, *Univ. Washington Publ. Biol.* 7: 58. 1938, *Vasc. Pl. Pacific Northw.* 1: 787. 1969, *Fl. Canada* 1: 51. 1978, *Phytologia* 42(1): 15. 1979

(Corms for colds and applied to boils.)

in English: avalanche-lily, dogtooth lily, glacier lily, yellow avalanche-lily

Erythronium oregonum Applegate (*Erythronium giganteum* auct. non Lindl.; *Erythronium giganteum* subsp. *leucandrum* Applegate; *Erythronium grandiflorum* var. *albiflorum* Hook.; *Erythronium oregonum* subsp. *leucandrum* (Applegate) Applegate; *Erythronium oregonum* Applegate subsp. *oregonum*; *Erythronium revolutum* var. *albiflorum* Purdie; *Erythronium revolutum* var. *praecox* Purdy; *Erythronium revolutum* var. *watsonii* Purdy)

North America. Perennial herb

See *Contributions from the Dudley Herbarium* 1(5): 189–190. 1933, *Madroño* 3(2): 99–107. 1935

(Crushed plant made into a paste applied to boils.)

in English: giant white fawnlily

Erythralum Blume Olacaceae (Erythralaceae)

From the Greek *erythros* 'red' and *palos* 'stake', an allusion to the nature of the plant, see *Narrative of an Expedition to Explore the River Zaire* 452. 1818, *Bijdragen tot de flora van Nederlandsch Indië* 15: 921. 1826.

Erythralum scandens Blume (*Dactylium vagum* Griff.; *Erythralum populifolium* Mast.; *Erythralum vagum* Mast.; *Erythralum vagum* (Griff.) Mast.; *Modeccopsis vaga* Griff.)

India, China, Himalaya. Climber, liana, herbaceous to woody vine, lianescent shrub, whitish stem, subcoriaceous

ovate-oblong leaves, small greenish-yellow flowers, orange-red oblong drupes, edible inflorescence shoots, young leaves and shoots used as vegetable, young shoots eaten when cooked

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 922. 1826, *Mag. Zool Bot.* 2: 531, 1838, *Proceedings of the Linnean Society of London* 2: 252. 1853, *Notulae ad Plantas Asiaticas* 4: 633. 1854, *The Flora of British India* [J.D. Hooker] 1(3): 578. 1875

(Leaves decoction in malaria; leaf paste applied on snakebit-ten part.)

in China: chi cang teng

in India: han-resim, laujang-thu, laujanthu, pulluvalli kodi

in Vietnam: rau bo khai

Erythrophleum Afzel. ex R. Br. Fabaceae (Caesalpinaceae, Caesalpinieae, Leguminosae)

Greek *erythros* 'red' and *phloios* 'bark of trees', red bark, referring to the red sap in some African species; see *Exped. River Zaire (Congo)*, 430. 1818, Dixon Denham (1786–1828), Hugh Clapperton (1788–1827) and Walter Oudney (1790–1824), *Narrative of Travels and Discoveries in Northern and Central Africa. 1822–1824.* [Botany by R. Brown.] 235. London 1826, *A General History of the Dichlamydeous Plants* 2: 423. 1832, *Fl. Seneg. Tent.* i. 242. t. 55. 1833 and Arthur D. Chapman, ed., *Australian Plant Name Index.* 1186–1187. Canberra 1991. Complex alkaloids of *Erythrophleum* spp., *Erythrophleum* alkaloids have similar pharmacological activities as digitoxine and ouabain; internal use of unpurified medicines made from *Erythrophleum* is extremely dangerous.

Erythrophleum africanum (Benth.) Harms (*Burkea africana* Hook.; *Caesalpiniodes africanum* (Welw. ex Benth.) Kuntze; *Cordyla densiflora* Milne-Redh.; *Erythrophleum africanum* Harms; *Erythrophleum africanum* (Welw. ex Benth.) Harms; *Erythrophleum africanum* var. *stenocarpum* Harms; *Erythrophleum pubistamineum* Hennings; *Erythrophleum pubistamineum* Henn. var. *parvifolium* Schinz; *Gleditsia africana* Welw. ex Benth.)

Tropical Africa. Perennial non-climbing tree, semi-deciduous, straight trunk, spreading crown, heartwood reddish, spikes of yellowish creamy flowers with strong not pleasant scent, green flat papery pods dehiscing simultaneously along both sutures, woodland

See *Transactions of the Linnean Society of London* 25: 304. 1866, *Gartenflora* xxxviii. (1889) 39 fig. 8. 1889, *Revisio Generum Plantarum* 1: 167. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 12: 298. 1913, *Pakistan Journal of Biological Sciences* 10(21): 3815–3821. 2007

(Toxins, poisonous, rodenticide, repellent. Extremely toxic to livestock, especially to goats, sheep and cows, a mammal and bird poison. Bark has been used as an ordeal poison. Bark

analgesic, for relieving toothache, an infusion of the bark drunk to treat stomachache, dysmenorrhea. Powdered root bark mixed with urine is applied to the skin to treat leprosy; a hot water extract from pounded roots drunk to induce vomiting in case of poisoning and as a cure for insanity.)

in English: African blackwood, koy the dead tree, pelli the living tree, ununza tree

in Congo: kahimbi, moosaasi, nyandwe

in Nigeria: samberu, sungwoi

in Senegal: diégélé, dievèl, gerombélé, guéli téli, kabala, kéko, kobala talé, ninimonovi, pèl, péli

in Southern Africa: muNyunya, umkonkotsi, ununza

in S. Rhodesia: muShati, umBako

in Tanzania: mgando, mkarati

in W. Africa: gele tali

in Zambia: kabulwebulwe, kayimbi, mubako, mubulwebulwe, mukoso, mungansa, museshe, musesi wehama

Erythrophleum chlorostachys (F. Muell.) Baillon (*Erythrophleum chlorostachys* Baill.; *Erythrophleum laboucheri* F. Muell. ex Benth.; *Erythrophleum laboucherii* F. Muell. nom. illeg.; *Laboucheria chlorostachya* F. Muell.; *Laboucheria chlorostachys* F. Muell.)

Tropical Australia. Perennial non-climbing tree, shrub, bark tessellated

See *Histoire des Plantes* 2: 150. 1870 and *Phytochemistry* 10(11): 2793–2797. 1971, *Tetrahedron Lett.* 50: 5069–5072. 1972, *Aust. J. Chem.* 27: 179–185. 1974, *Tetrahedron Lett.* 29: 2497–2498. 1975, *Aust. J. Chem.* 28(3): 645–650. 1975, Devanesen, D. and Henshall, T.S. "A study of plant medicines in Central Australia", *Transactions of the Menzies Foundation* 4: 161–166. 1982, Devanesen D. *Traditional Aboriginal Medicine and Bicultural Approach to Health Care In Australia's Northern Territory.* Proceedings of the 2nd National Drug Institute, Alcohol and Drug Foundation, Canberra 1985, *Ann. Rheum. Dis.* 58: 266–270. 1999

(Highly toxic to livestock; highly cytotoxic alkaloid, responsible for numerous deaths of both cattle and horses. Liniment, for joint and muscle pain; wash and poultice, skin problems, sores, boils, cuts; sundry conditions treated with smoke or vapor baths. Bark used for poison.)

in Australia: Cooktown ironwood, ironwood, ironwood tree, leguminous ironbark, Northern ironwood, red ironwood

Erythrophleum couminga Baill.

Madagascar. Perennial non-climbing tree, whitish yellow flowers, fruit a flat straight or slightly curved dehiscent pod

See *Adansonia* 10: 105. 1871 and *Acta Pharmaceutica Suecica* 12(5–6): 467–478. 1975, *Fitoterapia* 64: 117–129. 1993, *Curtis's Botanical Magazine* 14(4): 231–240. 1997

(Toxins. Leaves toxic to cattle. Poisonous bark, purgative and laxative, also used as an ordeal poison.)

in Madagascar: komanga, koumanga

Erythrophleum guineense G. Don

Sierra Leone.

See *A General History of the Dichlamydeous Plants* 2: 424. 1832 and *West Afr. Med. J.* 16(2): 63–64 1967, *Sci. Rep. Res. Inst. Evol. Biol.* 3: 57–71. 1986

(Emetic, cathartic and ordeal poison.)

in English: sasswood

Erythrophleum ivorense A. Chev. (*Erythrophleum micranthum* Holland; *Erythrophleum micranthum* Harms ex Craib)

Tropical Africa, Cameroon, Equatorial Guinea. Perennial non-climbing tree, sapwood creamy yellow, red brown flowers, densely hairy petals, fruit a flat thick leathery pendulous elliptical dehiscent pod, timber of *Erythrophleum ivorense* and *Erythrophleum suaveolens* usually not differentiated

See *Les végétaux utiles de l'Afrique Tropicale Française* 5: 178. 1909, *Bulletin of Miscellaneous Information Kew* 9: 279. 1911

(Seed and bark poisonous if ingested. Strong bark decoction emetic, antiinflammatory, analgesic, purgative, antifungal, abortifacient, for scabies. Charcoal from the bark used for rheumatism. Pounded bark fish poison, and poison for rats and game.)

in English: ordeal tree, sasswood, sasswood tree

in Central African Republic: banda

in Ivory Coast: tali

in Nigeria: erun

in Tanzania: mwavi

Erythrophleum lasianthum Corbishley (*Erythrophleum guineense* auct. sensu Henkel; *Erythrophleum guineense* G. Don var. *swaziense* Burt Davy; *Erythrophleum suaveolens* auct., sensu Compton, misapplied name) (the specific name means 'with woolly flowers', from the Greek *lasios* and *anthos*)

Mozambique, South Africa. Perennial non-climbing tree, *Erythrophleum lasianthum* closely resembles *Erythrophleum suaveolens*

See *Narrative of Travels and Discoveries in Northern and Central Africa* 235. 1826 and *Bulletin of Miscellaneous Information Kew* 1922(1): 27–28. 1922, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Planta Medica* 61(3): 271–274. 1995

(Bark used as ordeal poison, and also as a fish and rat poison. Barks, seeds, powder, prevention of abortion; bark analgesic, for the treatment of pain and inflammation. For headache,

stem bark powdered and snuffed. Veterinary medicine, bark for lung problems in cattle, and abortifacient in dogs.)

in English: ordeal tree, Swazi ordeal tree

in Southern Africa: rooihout, Swazi-oordeelboom, umBhemise, umHlakazane, umkhangu, umKhangu, umKhanku, umKhwangu

Erythrophleum suaveolens (Guill. & Perr.) Brenan (*Erythrophleum guineense* G. Don; *Fillaea suaveolens* Guill. & Perr.)

Tropical Africa. Perennial non-climbing tree, erect, greyish brown, crown spreading, low branching, leaves papery, inflorescence an axillary panicle, flowers yellowish white to greenish yellow, dehiscent pods, fruits edible, green sticky seeds, old pods remain on tree, seeds eaten by Colobus monkeys, gorillas eat the leaves, the alkaloid content of *Erythrophleum ivorense* is similar to that of *Erythrophleum suaveolens*

See *Flora Senegambiae Tentamen* 1: 242–243, pl. 55. 1832, *A General History of the Dichlamydeous Plants* 2: 424. 1832 and *Taxon* 9: 194. 1960, *Sci. Rep. Res. Inst. Evol. Biol.* 3: 57–71. 1986, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Mycoses* 38(5–6): 191–195. 1995, *Journal of Ethnopharmacology* 76: 263–268. 2001, *African Study Monographs* 25(1): 1–27. March 2004, *Journal of Ethnopharmacology* 93: 231–241. 2004, *Journal of Ethnopharmacology* 97: 327–336. 2005

(Toxins. Bark, seeds and root very poisonous, in high doses, the bark extract is an extremely strong, rapid-acting cardiac poison. Ordeal tree, the bark is boiled, infusion used as proof poison for sorcerers and witch-doctors; seeds, pods, bark, an ordeal poison. Leaves insecticidal. Strong bark decoction emetic, antiinflammatory, antioxidant, analgesic, purgative, antifungal, abortifacient, for scabies. Charcoal from the bark used for rheumatism. Pounded bark used as fish poison, arrow poisons, and poison for rats and game; bark and leaves as fish poison, also mixed with bark and leaves of *Lovoa klaineana* (*Lovoa trichilioides*). Magico-religious beliefs, spiritual, healing rituals, pieces of root or bark are a protective and love charm.)

in English: forest ordeal tree, mwavi-ordeal tree, ordeal tree, red water tree, red water tree of Sierra Leone, sasswood, sasswood tree, sassy-bark-tree, sassywood

in Angola: (olo) mbambu

in Cameroon: bolondo, elon, elondo, eloum, loundi, moumou, oloun, mbanda, ngmana, tom

in Central African Republic: banda, benge, elède, elit, elund, gunda, mana, mbanda, mbbamba, mwavi, n'kassa, ngamana

in Congo: anjoafa, ehomi, elède, elit, elund, gbanda, ishea, ishega, kassa, mbanda, mbbamba, mbuma ngwele, muti-ai-pum, mwafi, mwaifi, n'kassa, ngere, ngero, ngwele, nkasa, nkhasa, putu, tafa

in Gabon: бага, eloum, eloun, eyo, loundou, n'kassa

in Ghana: potrodom

in Guinea: tali, teli

in Ivory Coast: adjouga, alui, amerere, arhone, atiema, atiouya, bamaro, elegue-mouani, erhone, guie, lo, meli, n'gue, n'guie, tali, teli

in Ivory Coast, Burkina Faso: adio, adjuga, alui, aronhé, atiéma, atiuhia, élégué-muani, élui, érué, éruí, gué, guhié, guiouroutou, kowé, tali, télé, téré, tom, toma

in Liberia: gogwi, jru

in Nigeria: obo, erun, erun abo, erun obo, ovinyin; gwaska (Hausa); lakpa (Nupe); kora (Tiv); erun-obo (Yoruba); ovinyin (Edo); ijini (Itsekiri); iyin (Ijaw); inyi (Igbo); akpa (Efik); idip (Ibibio); nko (Boki)

in Senegal: bukimabu, tali

in Southern Africa: muSanda, muSande

in Tanzania: mbaraka mkuu, mkelekele, muavi, mwavi, mwavi dume, mwayara

in Togo: etsa, kekeu, tsa

in Tropical Africa: kasa, muavi

in Uganda: muvumu

in West Africa: a-kon, doussi, elondo, ngobbei, tali, teli

in Yoruba: awareri, erun, erun obo, obo

in Zambia: mwafi, mwaifi

Erythrophysa E. Mey. ex Arn. Sapindaceae

Greek *erythros* 'red' and *physa* 'bladder', *physao* 'inflated, swollen', referring to the inflated fruits, red balloon-like structure, see *Journal of Botany*, being a second series of the Botanical Miscellany 3: 258. 1841, *Zwei Pflanzengeographische Documente* 183. 1843, *Fl. Cap.* (Harv. & Sond.) i. 237. 1860.

Erythrophysa transvaalensis Verd.

South Africa, North West Province. Deciduous shrub or small tree, slender brittle stems, caudiciform, leaves compound, flowers green suffused with red in erect panicles, four clawed petals, straight protruding stamens, fruits 3-angled with three chambers, round smooth black seeds

See *Fl. Pl. S. Afr.* xxii. t. 857. 1942

(For skin diseases.)

in English: bushveld red balloon, Transvaal red balloon, wild jacaranda

in South Africa: klapperbos, Transvaalse rooiklapperbos

Erythrorchis Blume Orchidaceae

Referring to the colour of the flowers, from the Greek *erythros* 'red' and *orchis*; see *Rumphia*. 1: 200. 1837.

Erythrorchis altissima (Blume) Blume (*Cyrtosia altissima* Blume; *Galeola altissima* (Blume) Rchb.f.; *Haematorchis altissima* (Blume) Blume) (*Cyrtosia* Blume, from the Greek *kyrtos* 'curved, arched, swelling', *kyrtosis* 'bulging, convexity', referring to the pollen mass; *Galeola* Loureiro, Latin *galeola* 'a hollow vessel shaped like a helmet', the diminutive of *galea*, *ae* 'a helmet', possibly referring to the flowers when not fully open or to the shape of the labellum; see J. de Loureiro, *Flora cochinchinensis*: sistens plantas in regno Cochinchina nascentes. 520. Ulyssipone [Lisboa] 1790.)

W. Malesia to Philippines. Herb, creeping, reddish stems, vestigial leaves and roots, parasitic, lowland forest

See *Bijdragen tot de flora van Nederlandsch Indië* 8: 396. 1825, *Rumphia* 1: 200. 1835, *Rumphia* 4: t. 200 B. 1849, *Xenia Orchid.* 2: 77. 1865

(Sap drunk as a treatment for joint disorders. The doctrine of signatures, the jointed stems resemble bones.)

in Indonesia: akar tulang

Erythroxyllum P. Browne Erythroxyllaceae

Greek *erythros* 'red' and *xylon* 'wood', some species have reddish wood; see Patrick Browne, *The civil and natural history of Jamaica*. 278. London 1756, *Systema Naturae*, Editio Decima 1035. 1759, *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 3: 59. 1822, *Nova Genera et Species Plantarum* (quarto ed.) 5: 175. 1822, *Genera Plantarum* 1065. 1840 and *N. Amer. Fl.* 25: 59–66. 1907, Alfonso L. Herrera, *Farmacopea Latino-Americana*. Mexico 1921, Margaret A. Towle, *The Ethnobotany of Pre-Columbian Peru*. 58–60. Aldine Publishing Company, Chicago 1961, Jaroslav Soukup, S.D.B., *Vocabulario de los nombres vulgares de la flora peruana*. 174–175. Lima 1970, W. Golden Mortimer, *History of the Coca: The Divine Plant of the Incas*. AND/OR Press, San Francisco 1974, *Ann. Missouri Bot. Gard.* 62(1): 21–33. 1975, *Taxon* 25: 141–144. 1976, *Botanical Museum Leaflets, Harvard University* 27: 45–68. 1979, *Fl. Bahama Archip.* 710–713. 1982, *Fl. Lesser Antilles* 4: 543–551. 1988, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 834–838. 2001, *Brittonia* 56(1): 1–53. 2004.

Erythroxyllum cataractarum Spruce ex Peyr. (*Erythroxyllum zuluense* Schönland; *Nectaropetalum zuluense* (Schönland) Corbishley)

Brazil. A shrub or small tree, fruits eaten by fish

See *Flora Brasiliensis* (Martius) 12(1): 149. 1878 and *Records of the Albany Museum* 3: 52. 1914, *Bulletin of Miscellaneous Information Kew* 1919: 449. 1919

(A very strong wild coca, a substitute for real coca.)

Common name: coca de pescado

Erythroxylum coca Lam. (*Erythroxylum bolivianum* Burck; *Erythroxylum chilpei* E. Machado; *Erythroxylum peruvianum* Mitchel. & Pascal. ex Steud.; *Erythroxylum peruvianum* Prescott)

Peru, Bolivia. A shrub or small tree, very prominent lenticels on the branches, flowers in clusters, petals oblong yellow or yellowish green, fruit pointed red

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 393. 1786, *Nomencl. Bot.* [Steudel], ed. 2. 1: 598. 1840, *Teysmannia*; magazijn van Horticultuur en Landbouw der Tropen 1: 456, t. 3. 1890 and *Anales Científicos (Universidad Agraria)* 6: 162. 1968, *Botanical Museum Leaflets* 26: 203–209. 1978, *Fl. Ecuador* 36: 1–32. 1989, *Brittonia* 56(1): 1–53. 2004

(Psychotropic plants, narcotic.)

in English: coca, coca plant, cocaine plant, cocaine tree, Peru coca, Peruvian coca

in Argentina: coca del monte

in Brazil: coca-do-peru, ipadu, padu

in Peru: coca, coca-coca, boto, colorada, cuca, cuca-cuca, cucu, fruta de pomba, hay, hayo, ipadu, jaya, jübiro, jübiro, motelo caspi, murcu varilla, puca llaja, puetsatpan, pussachpan, shatona, urcu ingaina

in Japan: koka

Erythroxylum coca Lam. var. *ipadu* Plowman

Colombia, Ecuador, Peru.

See *Botanical Museum Leaflets* 27(1–2): 45–68. 1979, *Botanical Museum Leaflets* 28(1): 47–60. 1980

(Psychotropic plants, magico-religious, narcotic and sacred narcotic.)

Erythroxylum cuneatum Kurz forma *cuneatum*

Sumatra, Thailand. Shrub or tree, reddish brown bark, yellowish sapwood, flowers in clusters or sometimes solitary, bright red ellipsoid fruits, flattened seeds, scanty endosperm

See *Journal of the Asiatic Society of Bengal* Pt. 2, *Nat. Hist.* 43(2): 135. 1874

(Leaves used as a fish poison.)

Malay names: baka, cinta mula, inai inai, ketai mula

Erythroxylum delagoense Schinz (*Erythroxylum brownianum* Burt Davy)

Tropical Africa.

See *Bulletin de l'Herbier Boissier* Sér. II. i. 876. 1901–1908, *Bull. Misc. Inform. Kew* 1924, 230. 1924

(Leaves for colds.)

Erythroxylum ecarinatum Burck (*Erythroxylum ecarinatum* Hochr.)

Moluccas, New Guinea. Tree, small crown, flowers in clusters, orange red fruit

See *Ann. Jard. Bot. Buitenzorg* xi. 19. 1893 and Hochreutiner, Benedict Pierre Georges (1873–1959), *Plantae bogorienses exsiccatae novae vel minus cocnitae* [!] quae in horto botanico coluntur ... [Buitenzorg] typis Instituti botanici bogoriensis, 1904

(Leaves chewed and the sap swallowed to treat stomachache and to prevent vomiting.)

in Papua New Guinea: taa

Erythroxylum emarginatum Thonn. (*Erythroxylum caffrum* Sond.; *Erythroxylum emarginatum* var. *angustifolium* O.E. Schulz; *Erythroxylum emarginatum* var. *caffrum* O.E. Schulz; *Erythroxylum indicum* Bedd.; *Erythroxylum indicum* (DC.) Beddome; *Erythroxylum indicum* (DC.) Elliot; *Erythroxylum monogynum* Roxb.; *Erythroxylum monogynum* var. *caffrum* (Sonder) Eyles; *Erythroxylum monogynum* var. *caffrum* Eyles; *Erythroxylum perrotii* A. Chev.; *Sethia indica* DC.)

Guinea, Ghana. Shrub or small tree, glabrous, many-branched, very rough bark, aromatic leaves

See *Pl. Coromandel* i. 61. t. 88. 1795–1798, *Prodr.* (DC.) 1: 576. 1824, *Beskrivelse af Guineiske planter* 224–225. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 244–245. 1828, *Linnaea* 23: 22. 1850, Elliot, Walter, Sir (1803–1887), *Flora andhrica*; a vernacular and botanical list of plants ... in the Telugu districts ... 46. Madras, 1859 and *Bull. Soc. Bot. France* 58(Mém. 8d): 142. 1912 [1911 publ. 1912], *Taxon* 32(1): 87. 1983

(Used in Sidha. Stem and root pieces of *Erythroxylum monogynum* burnt and the ash or the oil substance of the plant applied to skin diseases, scabies. Aromatic leaves stomachic, diuretic, diaphoretic, used for stomach upsets and fever; leaves juice given for jaundice, malaria and to kill intestinal worms; leaves paste applied to wounds; leaf juice of *Erythroxylum monogynum* taken orally as hepatic stimulant. Stem bark decoction given for itches, and as a tonic and stomachic. Root powder applied for acute skin diseases. Veterinary medicine, stem bark decoction given for easy delivery and for retained placenta; stem of *Cissus quadrangularis* and the leaves of *Erythroxylum monogynum* pounded and the extract applied over the fractured area and bandaged; tubers of *Dioscorea bulbifera* along with stem bark of *Erythroxylum monogynum*, leaves of *Phyllanthus reticulatus* pounded and the extract applied over fractured area and bandaged.)

in India: adavigoranta, adavigorante, adavigoranti, adavigerenta, adivi goranti, adivigeranta, adivigerenta, anakam, arakkani, ayakkantam, ayakkantamaram, cakkaratapam, cakkirapuliccai, cakkiravatapam, cambulikayi, cem, cembulukayi, cemmanam, cemmanatti, cemmaram, cemmeliccan, cempuliccan, chambalike, chambalu, chem, chemanatti, chemmana, chembulichan, chembulakaayi,

(Poultice for skin diseases.)

Eschscholzia Chamisso Papaveraceae

After the Estonian (b. Dorpat, now Tartu) physician Johann Friedrich Gustav von Eschscholtz, 1793–1831 (d. Dorpat), explorer, naturalist, professor of medicine and anatomy, plant collector, zoologist, biologist, as a physician and naturalist he accompanied Captain Otto von Kotzebue (1787–1846) on his expeditions round the world; see *Horae Physicae Berolinenses* [Nees] 73–75, pl. 15. 1820, Otto von Kotzebue, *Entdeckungs-Reise in die Süd-See und nach der Berings-Strasse zur Erforschung einer nordöstlichen Durchfahrt. Unternommen in ... 1815–1818 ... auf dem Schiffe Rurick*. Weimar 1821, Louis Joseph Yorik Choris (1795–1828), *Voyage pittoresque autour du Monde*. Paris 1822, *Flore des Jardins* 2: 106. 1847 and Günther Schmid, *Chamisso als Naturforscher. Eine Bibliographie*. Leipzig 1942, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 515. 1965, L.J. Blacher, in *D.S.B.* 4: 406–407. 1981, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 151. Cape Town 1981, John Dunmore, *Who's Who in Pacific Navigation*. University of Hawaii Press, Honolulu 1991, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 265 and 708. 1993.

Eschscholzia californica Chamisso (*Eschscholzia caespitosa* Benth.; *Eschscholzia californica* Cham. subsp.

californica; *Eschscholzia compacta* Walp.; *Eschscholzia crocea* Benth.; *Eschscholzia douglasii* Benth., nom. illeg.; *Eschscholzia douglasii* Hook. & Arn.; *Eschscholzia hypocoides* Benth.; *Eschscholzia rosea* auct.; *Eschscholzia tenuifolia* Benth.; *Eschscholzia tenuisecta* Greene)

North America. This species is highly variable

See *Horae Phys. Berol.* 74–75, plate 15. 1820, *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 407–408. 1835, *The Botany of Captain Beechey's Voyage* 320. 1838, *Plantas Hartwegianas imprimis Mexicanas* 296. 1849, *The Gardeners' Chronicle & Agricultural Gazette* 1868: 1336. 1868, *Bull. (Poison. Used to treat lice, to induce sleep in children, for consumption, for toothaches, as an emetic and a poison.)

in English: California poppy

Eschscholzia parishii Greene

North America. Annual herb

See *Bull. Calif. Acad. Sci.* 1: 183. 1885

(Used to treat venereal diseases, gonorrhoea and syphilis.)

in English: Parish's goldenpoppy, Parish's poppy

Ethulia L.f. Asteraceae

Derivation obscure, possibly from the Greek *aitho*, *aithein* 'to light up, to burn, blaze', or *ethos* 'habit, usage, manner' and *oulios* 'baneful, destructive'; see C. Linnaeus (filius), 1741–1783, *Decas prima [secunda] plantarum rariorum horti upsaliensis*. 1. Stockholmiae 1762 [–1763], *Sp. Pl.*, ed. 2. 2: 1171. 1763.

Ethulia conyzoides L.f. (*Ethulia angustifolia* Bojer ex DC.; *Ethulia conyzoides* Herb. Madr. ex Wall.; *Ethulia conyzoides* var. *angustifolia* (Bojer ex DC.) Vatke; *Ethulia gracilis* Delile; *Ethulia kraussii* Sch.Bip.; *Ethulia kraussii* Sch.Bip. ex Walp.; *Ethulia parviflora* Klatt; *Ethulia ramosa* Roxb.)

South Africa, Sri Lanka. Herb, weed, erect, branched, aromatic, annual, ribbed, shortly pubescent, hollow stems, fibrous roots, thin leaves, florets mauve or light purple, small discoid flower-heads, calyx green, ribbed achenes, crushed leaves with strong smell, fodder, in seasonally flooded scrubland

See *Decas plantarum rariorum horti upsaliensis* 1: t. 1. 1762, *Voyage à Méroé* 4: 398. 1826–1827 [*Centurie de plantes d'Afrique du voyage à Méroé, recueillies par M. Cailliaud*. Paris 1826], *Numer. List* [Wallich] n. 3039. 1831, *Hortus Bengalensis*, or a catalogue ... 61. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 12. 1836, *Linnaea* 37: 507. 1872, *Oesterreichische Botanische Zeitschrift* 25(10): 323. 1875 and *Bulletin of the Torrey Botanical Club* 106: 79–84. 1979, *Taxon* 29: 352–353. 1980, *Kew Bull.* 43(2): 173. 1988, *Feddes Repertorium* 101: 49–62. 1990

(Used for skin diseases, intestinal parasites, abdominal disorders, colic and stomach complaints, lumbago, headache, cold, fevers, conjunctivitis, to stop abortion.)

in South Africa: umSokosoko (Zulu)

Etlingera Giseke Zingiberaceae

Named to honor the German botanist Andreas Ernst Etlinger, fl. 1777, author of *Commentatio ... de Salvia*. De *Salvia* dissertatio. Erlangae 1777; see Paul Dietrich Giseke (1741–1796), *Praelectiones in ordines naturales plantarum*. 199, 202, 209, 229, 251. Hamburg 1792, *Specchio delle Scienze* 1: 116. 1814, *Enumeratio Plantarum Javae* 1: 55. 1827, *Sylloge Plantarum Novarum* 2: 5. 1828[1825], *Notulae ad Plantas Asiaticas* 3: 426–427. 1851, *Prodromus Monographiae Scitaminearum* 32. 1862 and *The Gardens' Bulletin Singapore* 13: 1–249. 1950, *Notes Roy. Bot. Gard. Edinburgh* 31(2): 221–222. 1972, *Notes from the Royal Botanic Garden Edinburgh* 42: 261–314 and 43: 439–466. 1985–1986.

(Pieces of rhizomes chewed with betel leaf in sore throat.)

Etlingera littoralis (J. König) Giseke (*Achasma megalocheilos* Griff.; *Amomum littorale* J. König; *Amomum megalocheilos* (Griff.) Baker; *Hornstedtia megalocheilos* (Griff.) Ridl.)

China. Herb, stout stem, glabrous leaves, spike-like inflorescence, ovate or oblong papery pale pink with a crimson tip bracts, pink tubular calyx, red lip with yellow or orange margins, globose capsule, edible

See *Observationes Botanicae* 3: 52. 1783, *Observationes Botanicae* 6: 18. 1791, *Praelectiones in ordines naturales plantarum* 199, 209. 1792, *Plants of the Coast of Coromandel* 3: 75. 1820, *Notulae ad Plantas Asiaticas* 3: 426, pl. 355. 1851,

The Flora of British India 6(18): 236. 1892 and *Walailak J. Sci. & Tech.* 5(1): 17–27. 2008

(Essential oil.)

in China: hong hui sha

in Indonesia: kedungkel, tepus, ubut ladyei

Etlingera punicea (Roxb.) R.M. Sm. (*Achasma coccineum* (Blume) Valetton; *Achasma puniceum* (Roxb.) Loes.; *Amomum coccineum* (Blume) K. Schumann; *Elettaria punicea* (Roxb.) Schult.; *Gethyra punicea* (Roxb.) Sweet; *Hornstedtia macrocheilus* Ridley; *Hornstedtia punicea* (Roxb.) K. Schum.)

India. Perennial herb, seed aril edible

See *Flora Indica*: being a systematic account of the plants . . . 1: 73. 1820, *Mantissa* 1: 24. 1822, *Loudon's Hortus Britannicus*. A catalogue . . . 390. 1826 and *Das Pflanzenreich* IV, 46: 197. 1904, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 62. 1927, *Notes from the Royal Botanic Garden, Edinburgh* 43: 249. 1986

(Pounded leaves rubbed against fever.)

in Indonesia: rongod, tepus bener

in Malaysia: chalong

Etlingera yunnanensis (T.L. Wu & S.J. Chen) R.M. Smith (*Achasma yunnanense* T.L. Wu & S.J. Chen; *Achasma yunnanense* T.L. Wu & Senjen Chen; *Achasma yunnanensis* T.L. Wu & S.J. Chen; *Etlingera yunnanensis* (Wu & Senjen) R.M. Sm.)

China.

See *Acta Phytotaxonomica Sinica* 16(3): 40, pl. 14. 1978, *Notes from the Royal Botanic Garden, Edinburgh* 43(2): 251. 1986, *Food Chemistry* 109 (2008) 477–483. 2008

(Antioxidant and tyrosinase inhibition properties of leaves and rhizomes.)

in China: hui xiang sha ren

Euadenia Oliver Capparaceae (Capparidaceae)

From the Greek *eu* 'good, fine, well' and *aden* 'gland', referring to the knobbed base of the gynophore, see *Genera Plantarum* [Bentham & Hooker f.] 1(3): 969. 1867, *Flora of Tropical Africa* 1: 91. 1868.

Euadenia eminens Hook. f. (*Euadenia major* Hua)

Tropical Africa, Ghana. Treelet or shrub, soft-wooded, strongly scented, papery leaves, yellow-green flowers in short corymbose racemes

See *Botanical Magazine* 107: t. 6578. 1881, *Bull. Soc. Philom. Paris* sér. 8, vii. (1895) 82. 1895

(Ripe fruits chewed as an effective aphrodisiac. Seeds and roots aphrodisiac, analgesic. Pounded root a cure for earache.)

in Ghana: dusinkro

in Liberia: mano-to

in Sierra Leone: nyankuie

Eucalyptus L'Hérit. Myrtaceae

Greek *eu* 'good, normal, fine, well' and *kalypto*, *kalyptein* 'to hide, cover', referring to the flower cap, the calyx lobes and the petals are united forming a lid, in reference to the operculum which covers the stamens in bud; see Charles Louis L'Héritier de Brutelle, 1746–1800, *Sertum anglicum seu plantae rariores quae in hortis juxta Londinum, imprimis in horto regio Kewensi excoluntur, ab anno 1786 ad annum 1787 observatae* 18. 1789 and t. 20. 1792, A. Bonavilla, *Dizionario etimologico di tutti i vocaboli usati nelle scienze, arti e mestieri, che traggono origine dal greco*. Milano 1819–1821 and *Bull. Econ. Madagascar* 24: 111–112. 1924, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1188–1291. Canberra 1991, *Austral. Syst. Bot.* 13(1): 90, 100. 2000, *Austral. Syst. Bot.* 22(5): 397. 2009. Taxonomic complexity.

Eucalyptus camaldulensis Dehnh. (*Eucalyptus rostrata* Schldl., nom. illeg.)

Australia. Tree, variable, white stamens, a source of nectar, closely related to *Eucalyptus tereticornis* Sm.

See *Cat. Plantarum Horti Camald.*, ed. 2: 6, 20. 1832, *Linnaea* 20: 655–656. 1847, *Nederlandsch Kruidkundig Archief. Verslangen en Mededelingen der Nederlandsche Botanische Vereeniging* 4: 125. 1856 and *Austral. Forest Res.* 9: 149–150. 1979, *Journal of Essential Oil Research* 10(3): 321–324. 1998, *Journal of Natural Products* 63(9): 1265–1268. 2000, *Taxon* 57(3): 1002. 2008

(Leaves insecticidal, antifeedant, molluscicidal, spasmolytic, anti-ulcer, antinociceptive, an infusion for the relief of colds, congestion, diabetes, a leaf decoction to treat stomachache and dysmenorrhea; leaves with ripe fruits of *Piliostigma* boiled and taken orally for menstrual disorders; fresh leaves applied against rheumatism; leaf paste or juice applied to forehead to relieve headaches and cold. Leafy twigs decoction of *Azadirachta indica*, *Eucalyptus camaldulensis* and *Citrus aurantifolia* used for cough. Leaves essential oil antibacterial, mosquito repellent, molluscicidal, insecticidal, antiseptic, expectorant, febrifuge, antifungal, antioxidant, tonic, astringent, hemostatic, vermifugal, a cough sedative. Astringent gum used for diarrhea. Veterinary medicine, oil applied for the treatment of inflammation on foot.)

in English: Australian kino, Murray red gum, red gum, red kino, river red gum, rostrata gum

in China: chi an

in India: eucaly, nilgiri, safeda

in Nepal: mashala

in Nigeria: paulwaya

in Tanzania: mkaratusi

Eucalyptus citriodora Hook. (*Corymbia citriodora* (Hook.) K.D. Hill & L.A.S. Johnson; *Eucalyptus maculata* var. *citriodora* (Hook.) L.H. Bailey)

Australia. See also *Corymbia citriodora*

See *Journal of an Expedition into the Interior of Tropical Australia* 235. 1848, *A Synopsis of the Queensland Flora* 181. 1883 and *Manual of Cultivated Plants* 540. 1924, *Telopea* 6: 388. 1995

(Botanical pesticide, green parts and dry leaves burnt in the field to control aphids. Leaves essential oil carminative, stimulant, expectorant, diaphoretic, disinfectant, used in the treatment of colds, flu, asthma, malaria and coughs.)

in English: lemon-scented gum, lemon-scented spotted gum, white gum

in China: ning meng an

in India: nilgiri

in Japan: remon-yûkari-no-ki

Eucalyptus cloeziana F. Muell. (*Eucalyptus stannariensis* F.M. Bailey) (The name honors Francois Stanislas Cloez (1817–1883), a French chemist who included the analysis of eucalypt leaves and oils in his medical studies.)

Australia. Tree, variable, inflorescence an axillary umbel-like dichasium, bee forage

See *Fragmenta Phytographiae Australiae* 11: 44. 1878 and *Queensland Agric. J.* 21: 293. 1908

(Essential oil.)

in English: cloeziana gum, dead finish, gympie messmate, Queensland messmate

Eucalyptus globulus Labill. (*Eucalyptus maidenii* subsp. *globulus* (Labill.) J.B. Kirkp.)

New South Wales to Tasmania. Tree, dense, narrow, straight, crown rounded and open, smooth bark, leaves camphor smelling, woody capsular fruit stalkless, a source of nectar

See *Relation du Voyage à la Recherche de la Pérouse* 1: 153, pl. 13. 1799 and *Bot. J. Linn. Soc.* 69: 101. 1975, *Cytologia* 50: 513–520. 1985, *Aspects of Plant Sciences* 11: 391–397. 1989, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998, *Journal of Ethnopharmacology* 79: 213–220. 2002, *Journal of Ethnopharmacology* 89(2–3): 277–283. 2003, *Journal de Botanique Société de Botanique de France* 24: 67–78. 2004

(Used in Ayurveda and Sidha. Essential oil from the leaves antimicrobial, antifungal, analgesic, antiinflammatory, rube-facient, antitubercular, febrifuge, tonic, astringent, antiseptic, hemostatic, antiamebic, vermifugal, larvicidal, insect repellent, used in the treatment of colds, flu, hay fever, asthma, coughs, rheumatic disorders. Gum resin from the plant against diarrhoea. Leaves antibacterial, anthelmintic,

antifungal, antiviral, antihyperglycemic, diuretic, antiinflammatory, molluscicidal, antitussive, stomachic, expectorant, an infusion or decoction against asthma, malaria, bronchitis, tonsillitis, colds, stomachache, urinary problems, abscesses and wounds, hemorrhages; leaf juice applied on forehead to treat fever; tender leaf paste applied on forehead to treat fever, also against rheumatism; fresh leaves used as a bed in lumbago, sciatica and backache. Oil mild irritant, toxic side effects, large doses cause gastro-intestinal irritation, vomiting and diarrhea; poisoning is described in humans. Leaves and bark decoction given for swellings and headache.)

in English: blue gum, blue gum eucalyptus, blue gum tree, eucalyptus, eucalyptus tree, fever tree, southern blue gum, Tasmanian blue gum

in Arabic: calibtus, kafur

in East Africa: mbanyi (Chagga), mkaratusi, mti-ulaya (Swahili)

in Tanzania: mkaratusi

in China: an ye

in India: eucali, haritaparna, kapura maram, karpooora thaila vriksha, kapuramaram, karpuramaram, karupuramaram, nasik, nattu-kunkuli, neelagiri thailada mara, neelgiri mara, nilagiri, nilagiri mara, nilaniryasa, nilappicin, nilgiri, safeda, sugandhapatra, taila, tailaparnah, tailaparni, teilada, thephisei, yukeliptas, yukkalimaram

in Japan: yûkari-no-ki

Eucalyptus globulus Labill. subsp. *maidenii* (F. Muell.) Kirkp. (*Eucalyptus maidenii* F. Muell.)

SE. New South Wales to E. Victoria.

See *Bot. J. Linn. Soc.* 69: 101. 1974

(Stimulant, astringent.)

Eucalyptus grandis Hill (*Eucalyptus grandis* Hill ex Maiden)

E. Australia. Tree, leaves lanceolate, bee forage, closely related to *Eucalyptus saligna* Sm.

See *John White's Voyage* 231. 1790, *Cat. Nat. Indust. Prod. Queensland*: 25. 1862 and *The Forest Flora of New South Wales* 1: 79. 1903, *Aspects of Plant Sciences* 11: 391–397. 1989, *Cancer Letters* 155: 61–65. 2000, *Journal of Essential Oil Research* 12(4): 467–470. 2000, *Fitoterapia* 72: 351–368. 2001, *Journal of the American Mosquito Control Association* 23(3): 299–303. 2007

(Essential oil rubefacient, larvicidal.)

in English: bluegum, flooded gum, rose gum, saligna

in South Africa: bloekom, saligna gom

Eucalyptus propinqua H. Deane & Maiden

Australia.

See *Proceedings of the Linnean Society of New South Wales* II, 10: 541. 1896

(Used for treatment of respiratory problems, fever and skin diseases.)

in English: grey gum, propinqua gum

Eucalyptus resinifera Sm. (*Eucalyptus hemilampra* F. Muell.; *Eucalyptus resinifera* Hort.Arg. ex Maiden; *Eucalyptus resinifera* subsp. *hemilampra* (F. Muell.) L.A.S. Johnson & K.D. Hill; *Eucalyptus resinifera* var. *grandiflora* Benth.; *Eucalyptus resinifera* var. *hemilampra* (F. Muell.) Domin; *Melaleuca gummifera* Steud.)

Australia.

See *J. Voy. N.S.W.*: 231. 1790, *Nomencl. Bot.*: 515. 1821, *J. Proc. Linn. Soc., Bot.* 3: 85. 1859, *Fl. Austral.* 3: 246. 1867 and *Biblioth. Bot.* 89: 468. 1928, *Telopea* 4(1): 46. 1990

(Used in Sidha.)

in India: toomble haan

Eucalyptus robusta Sm. (*Eucalyptus multiflora* Poir.; *Eucalyptus multiflora* var. *bivalvis* Blakely; *Eucalyptus robusta* var. *bivalvis* (Blakely) Blakely; *Eucalyptus robusta* var. *rostrata* (Cav.) Pers.; *Eucalyptus rostrata* Cav.)

Australia. Tree, bee forage

See *Spec. Bot. New Holland* 4: 39, pl. 13. 1795, *Encycl., Suppl.* 2: 594. 1812 and *Journal of Organic Chemistry* 53(19): 4562–4567. 1988, *Journal of Ethnopharmacology* 79: 213–220. 2002

(Leaves used against malaria, fever, colds, asthma and sinusitis, cough and influenza, diabetes, stiffness, rheumatism and epilepsy.)

in English: Australian silk oak, beakpod eucalyptus, swamp mahogany, swamp messmate, white mahogany

in China: da ye an ye

in Japan: robusuta-yūkari

in Nepal: simsar mashala

in Tanzania: mkaratusi

Eucalyptus tereticornis Sm. (*Eucalyptus coronata* Tausch ex Maiden, nom. inval.; *Eucalyptus insignis* Naudin; *Eucalyptus populifolia* Desf.; *Eucalyptus subulata* A. Cunn. ex Schauer; *Eucalyptus tereticornis* var. *brevirostris* Benth.; *Eucalyptus tereticornis* var. *cineolifera* R.T. Baker & H.G. Sm.; *Eucalyptus tereticornis* var. *pruiniflora* (Blakely) Cameron; *Eucalyptus umbellata* (Gaertn.) Domin, nom. illeg., non *Eucalyptus umbellata* Desf.; *Eucalyptus umbellata* sensu Blakely; *Eucalyptus umbellata* var. *pruiniflora* Blakely; *Leptospermum umbellatum* Gaertn.)

New Guinea, E & SE Australia. Tree, flowers white-yellowish, source of pollen and nectar

See *Characteres Generum Plantarum* [second edition] 36. 1775, *De Fructibus et Seminibus Plantarum...* 1: 174, pl. 35. 1788, *A Specimen of the Botany of New Holland* 1: 41. 1795 and *Bibliotheca Botanica* 89: 467. 1928, *Key Eucalypts* 130. 1934, *Victorian Naturalist* 63: 43. 1946, *Cytologia* 49: 547–550. 1984, Webb, C.J., Sykes, W.R. & Garnock-Jones, P.J. *Flora of New Zealand* 4: 1–1365. (Leaves useful in rheumatism, burns, asthma, body pain, pulmonary problems, fever.)

in English: blue gum, forest red gum, forest river gum, Queensland blue gum

in India: neelagiri, thaila

in Tanzania: mkaratusi

Eucalyptus viminalis Labill. (*Eucalyptus paniculata* Sm.; *Eucalyptus resinifera* Smith)

Australia. Tree

See *John White's Voyage* 231. 1790, *Transactions of the Linnean Society of London* 3: 287–288. 1797, *Novae Hollandiae Plantarum Specimen* 2: 12–13, pl. 151. 1806 and Nelson, Ernest Charles (1951–), *John White's Journal of a voyage to New South Wales (London 1790): Bibliographic Notes*. 1998 [Archives of Natural History], *Journal of Essential Oil Research* 12(6): 695–701. 2000, *Journal of Ethnopharmacology* 79: 213–220. 2002, *Scientia Agricola* 63(1): 85–89. 2006

(Leaves useful in rheumatism, burns, asthma, body pain, pulmonary problems, fever.)

in English: manna gum, ribbon gum, white gum

in China: yuan zhui hua an

in Tanzania: mkaratusi

Eucharis Planchon & Linden Amaryllidaceae (Liliaceae)

From the Greek *eucharis* 'charming, gracious', *charis* 'grace, beauty', alluding to the large scented flowers, see *Catalogue des Plantes Exotiques* (Linden) 8: 3. 1853 and *Plant Life* 27: 57–59. 1971, *Ann. Missouri Bot. Gard.* 76(1): 136–220. 1989, *Contributions from the United States National Herbarium* 52: 1–415. 2005.

Eucharis amazonica Linden ex Planchon (*Eucharis amazonica* Linden)

Peru.

See *J. Gén. Hort.* 12: 69–70, f. 1216. 1857, *L'illustration Horticole*. 28: 30. 1881 and *Taxon* 33: 416–422. 1984, Espejo Serena, A. & López-Ferrari, A.R. *Las Monocotiledóneas Mexicanas una Sinopsis Florística* 1(1): 1–76. Consejo

Nacional de la Flora de México, México D.F. 1993 [as *Eucharis grandiflora*.]

(Whole plant infusion drunk as an emetic tea.)

in English: Amazon lily

Euchresta Bennett Fabaceae (Euchresteae)

From the Greek *euchrestos* ‘useful, serviceable’, referring to the medicinal properties of its seeds, see *Plantae Javanicae Rariores* 148, pl. 31. 1840 and *J. Fac. Sci. Univ. Tokyo*, sect. 3, 10: 210–235. 1970, *Thai Forest Bull.* (Bot.) 18: 80–81. 1989, *Acta Phytotax. Sin.* 30(1): 43–56. 1992.

Euchresta horsfieldii (Lesch.) Benn. (*Andira horsfieldii* Lesch.; *Euchresta horsfieldii* (Lesch.) Benn.; *Euchresta horsfieldii* Benn.; *Euchresta horsfieldii* (Lesch.) Benn. var. *bhutanica* H. Ohashi; *Euchresta strigillosa* C.Y. Wu; *Geoffroea horsfieldii* (Lesch.) Oken)

India, Indonesia. Perennial non-climbing shrub, erect, blue-black egg-shaped pods

See *Enumeratio Systematica Plantarum* 7, 28. 1760, *Genera Plantarum* 363. 1789, *Annales du muséum national d’histoire naturelle* 16: 418, pl. 12. 1810, *Plantae Javanicae Rariores* 148, pl. 31. 1838, *Allg. Naturgesch.* 3(3): 1684. 1841 and *J. Arn. Arb.* 31: 276. 1950, *Acta Phytotaxonomica Sinica* 6(2): 249–250. 1957, *Journal of Japanese Botany* 54: 39–42. 1979, *Phytochemistry* 29: 2663, 2675, 2738. 1990

(Poisonous kernels very bitter, narcotic, aphrodisiac, antidote, emetic, a remedy against tuberculosis, chest-lung complaints. Roots chewed for snakebite.)

in China: fu mao shan dou gen

in Indonesia: palakija, pranadjiwa

Malayan names: ki boeaia, prono-dyivo

Euclea L. Ebenaceae

Greek *eu* ‘good, normal, fine’ and *kleos* ‘glory’, *eukleia* ‘glory’, maybe because of the fine quality of the wood; see C. Linnaeus, *Systema Vegetabilium* ... ed. 13. 747. 1774, *Gen. Pl.* [Endlicher] 743. 1839 and *Fl. Trop. E. Africa, Eben.* 44. 1996.

Euclea crispa (Thunb.) Gürke subsp. *crispa* (*Celastrus crispus* Thunb.; *Euclea bakerana* Brenan; *Euclea baumii* Gürke; *Euclea crispa* (Thunb.) Sond. ex Gürke; *Euclea crispa* var. *crispa*; *Euclea dekindtii* Gürke; *Euclea guerkei* Hiern; *Euclea lanceolata* E. Mey. ex A. DC.; *Gymnosporia ferruginea* Baker)

Tanzania, South Africa, Ethiopia. Shrub or treelet, evergreen, with a dense leafy crown, erect, woody base, stems reddish at base turning yellow green, young branches and leaves covered in rust coloured scales, leaves deep green alternate or

subopposite, small flowers in axillary sprays, petals creamy white to yellow fading deep brown, anthers white, fruit a small reddish brown berry becoming black when ripe, flowers inconspicuous and dioecious, in open woodland and forest margins, savanna, usually among rocks

See *Systema Vegetabilium*. ed. 13. 747. 1774, *Phytophographische Blätter* 1: 23. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 218. 1844, *Die Natürlichen Pflanzenfamilien* 4(1): 158. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 53: 275–297. 1980, van der Merwe, D., du Plessis, L. “Microscopic morphology of *Dichapetalum cymosum* (Hook.) Engl. as an aid in the identification of leaf fragments from the digestive tract of poisoned animals.” *J. S. Afr. Vet. Assoc.* 77(4): 197–201. 2006

(Aerial parts for viral infections and rheumatic pains. Both the bark and fruit widely used as a purgative, diabetes remedy and to prevent rheumatism.)

in English: blue guarri, blue-leaved euclea

in S. Rhodesia: umGwale

in Southern Africa: bloughwarrie, ghwarriebos, bosghwarrie; muSingaranguru (Shona); mutangule, munyele (Venda); umGwali, iYeza lokuxaxazisa, umTshekisane (Xhosa); motlhaletsogane (Tswana: Western Transvaal, northern Cape, Botswana); agagule (Kalanga: Northern Botswana); umShekisane, iDungamuzi, umNqandane, umGwali (Zulu); motlhalolana, mokgwara (Kwena dialect, Botswana); motlhalolana (Ngwaketse dialect, Botswana); motakola, mokgwelekgwele (Tawana dialect, Ngamiland); mohlakola (North Sotho); mussukula (Kololo, Barotseland); mushitondo (Mbukushu)

in Zimbabwe: madziyire

Euclea divinorum Hiern (*Embelia oleifolia* S. Moore; *Euclea divinorum* Hiern subsp. *keniensis* (R.E. Fr.) de Wit; *Euclea huillensis* Gürke; *Euclea katangensis* De Wild.; *Euclea keniensis* R.E. Fr.; *Euclea kiwuensis* Gürke; *Euclea lanceolata* sensu Hiern p.p.; *Euclea oleifolia* S. Moore; *Euclea stuhlmannii* Gürke)

Ethiopia, Sudan, South Africa. Small evergreen tree or shrub, many-branched, rounded crown, stiff wavy opposite leaves, creamy white fragrant small flowers, short dense branched inflorescences in the leaf axils, purple-black fruits, ripe sweet edible pulp, fodder, in dry forest margins, in open woodland, often associated with termite mounds, wooded grassland, evergreen bushland

See Drummond, R.B. *Common Trees of the Central Watershed Woodlands of Zimbabwe*. Natural Resources Board, Harare. 1981, *Fitoterapia* 76(3–4): 355–358. 2005

(A soup from the bark and root used as a purgative and tonic; soup made from the bark taken as a worm medicine; bark added to children’s milk as a tonic. Infusion of roots a remedy for headache, diarrhea and toothache, a purgative and an appetizer; roots chewed for toothache. Used to make medicine for diviners. Cytotoxic.)

in English: diamond-leaved euclea, euclea, magic guarri, magic guarri

in East Africa: iwaruka, mdaa, mkenye, mukinyai

in Kenya: akado, cheptuishak, cheptuya, emus, ilchinge, ilkinyei, isojon, lchinge, m'mbuku, mukiinyi, mukinyai, mukinyei, mukinyi, mukonde, mukuthi, munyiza, nginyai, ochol, olkinyei, osojo, shiendet, shinghe, usuet, uswa, wuswet

in S. Rhodesia: umChekesane

in Zimbabwe: mubhununu, mudzimiratsuro, mugarazvuru, mugurameno, munyenya, mushangura, umtshekesane

Euclea frutuosa Hiern

East Africa, Tanzania.

See *Transactions of the Cambridge Philosophical Society* 12: 101. 1873 and Christina Schlage et al. "Medicinal plants of the Washambaa (Tanzania): Documentation and ethnopharmacological evaluation." *Plant Biol.* (Stuttg.) 2: 83–92. 2000

(Poisonous. Medicine applied on cuts in the skin. Anticonvulsant. Dentifrice.)

Euclea lanceolata E. Mey. ex A. DC.

South Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 218. 1844

(Used for dropsy. Bark for stomach and intestinal complaints.)

in South Africa: umShekisane, iDungamuzi (Zulu)

Euclea natalensis A. DC.

South Africa. Tree or shrub, well-branched, stem dark, leaves pale green below, perianth cream, anthers pale brown, fruits green-yellow becoming red to light orange when ripe, roots used as a dye for making batiks

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 218. 1844 and *Boletim da Sociedade Broteriana*, ser. 2 2, 53: 275–297. 1980

(Poisonous. Bark of root for scrofula. Bark for intestinal complaints. Root decoction emetic, anthelmintic, for pleurisy, stomatitis, gastric and chest complaints; powdered dried roots applied to wounds and sores.)

in English: Natal ebony, Natal guarri, Natal guarri

in Southern Africa: Natalghwarrie, bergghwarrie, swartbasboom; iDungamuzi, iChitamuzi, isiZimane, umZimane, umTshikisane, inKunzi-emnyama (= the strong black enema), inKunzane (= the strong enema), umHlalanyamazane, uMan-

yathi (Zulu); chiPambati, muPambati (Shona); umTshekisani, umKhasa (Xhosa)

in S. Rhodesia: chiPambati

in Tanzania: kapala, mdaa, mdala

Euclea racemosa L. subsp. *schimperi* (A. DC.) F. White (*Euclea bilocularis* Hiern; *Euclea divinatorum* Hiern; *Euclea karaguensis* Gürke; *Euclea kellau* Hochst.; *Euclea latidens* Stapf; *Euclea macrophylla* sensu Willd.; *Euclea mayottensis* H. Perrier; *Euclea microcarpa* Gürke; *Euclea mildbraedii* Gürke; *Euclea schimperi* (A. DC.) Dandy; *Euclea urijiensis* Hiern; *Kellaua schimperi* A. DC.; *Maba mildbraedii* Gürke)

East Africa. Shrub to small tree, well-branched shrub, stem white-brown, twigs green-white tinged dark blue-purple, terminal twigs with conspicuous leaf scars, smooth leaves dark green above, corolla white-cream, stamens brown, globose fruit green to red-pink with brown-red stigma, used as decoration during ceremonies, stem used as fuel wood and building poles, in bushland, savanna rocky woodland, on river banks and along streams, on mountain slope in forest, seasonally inundated grassland

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 6: 65. 1836, *Journal of Botany, being a second series of the Botanical Miscellany* 3: 155. 1840, *Annales des Sciences Naturelles; Botanique*, sér. 2, 18: 209. 1842, *Transactions of the Cambridge Philosophical Society* 12: 99. 1873 and *Fl. (Medicine for stomach disorders. Toxic.)

in English: bush guarri, sea guarri, sea guarri, white-stem guarri

in Southern Africa: seeghwarrie, bosghwarrie, witstamghwarrie, kersibos, kersbos; iChitamuzi, iDungamuzi (Zulu)

in Tanzania: mdaa, mdale, mnondo, mpwesa pwesa jike, mpwese pwese dume, mtubuyu, orkinyei,uku

Euclea schimperi (A. DC.) Dandy (*Euclea bilocularis* Hiern; *Euclea kellau* Hochst.; *Euclea macrophylla* sensu Wild; *Euclea racemosa* Murray; *Euclea racemosa* subsp. *schimperi* (A. DC.) F. White; *Euclea urijiensis* Hiern; *Kellaua schimperi* A. DC.; *Royena macrophylla* E. Mey. ex A. DC.)

From Oman, Yemen and Egypt, throughout tropical Africa to KwaZulu-Natal and Eastern Cape, S. Africa. Shrub or small evergreen tree, narrow dense rounded crown, leaves spirally arranged subopposite or whorled usually at the ends of branches, small sweetly scented flowers in axillary clusters, petals white, anthers creamy white, fruit subspherical red to purplish with scattered white hairs, used as decoration, woodland, riverine fringes

See *Systema Vegetabilium*. Editio decima tertia 13: 747. 1774, *Annales des Sciences Naturelles; Botanique*, sér. 2, 18: 209. 1842 and *The Flowering Plants of the Anglo-Egyptian Sudan* 2: 370. 1952, *Bulletin du Jardin Botanique National de Belgique* 50: 399. 1980

(Medicine for stomach disorders. Toxic.)

in English: bush guarri, glossy guarri, river guarri

in Southern Africa: witstam gwarri; amaCafuthane, iDungamuzi, iChitamuzi (Zulu)

Eucomis L'Hérit. Asparagaceae (Hyacinthaceae, Liliaceae)

From the Greek *eu* 'good, fine' and *kome* 'hair of the head, foliage, tuft', the inflorescence bears a tuft of leaf-like bracts at its tip, see *Encycl.* 1: 382. 1785, *Sert. Angl.* 17. t. 18. 1788 (publ. 1789), *Prodr. Stirp. Chap. Allerton*: 218. 1796.

Eucomis autumnalis (Mill.) Chitt. (*Eucomis autumnalis* Chitt.; *Fritillaria autumnalis* Mill.)

Malawi, S. Africa. Perennial bulbous herbs, deciduous, big ovoid bulbs, rosette of broad fleshy wavy-edged leaves, inflorescence a dense cylindrical raceme on a stout stalk, starry yellowish-green flowers with a tuft of leaf-like bracts at the tip, trilobular capsule, shiny black rounded seeds, bulb geophyte, in grassland, forest, swamps and river banks

See *Gard. Dict.* ed. 8: 10. 1768 and *R.H.S. Dict. Gard.* ii. 787. 1951, Compton, J. "Eucomis L'Heritier." *The Plantsman* 12(3) 128–139. 1990, *Phytochemistry Reviews* 4(1): 39–46. 2005

(Herb infusion good for healing sexually transmitted diseases, piles. The bulb is toxic. Bulb blood purifier, a decoction used for urinary diseases, stomachache, fevers, colic, flatulence, hangovers and syphilis, and to facilitate childbirth; also used against inflammation and pains, in post-operative recovery, low backache, in healing fractures. Cyclooxygenase inhibiting activity.)

in English: pineapple flower, pineapple lily, Ricksha-boys

in Lesotho: khapumpu

in South Africa: krulkop, krulkoppie, wilde pynappel, wildepynappel; ubuHlungu becanti (Xhosa), Umathunga, uMakhanda ka'ntsele (Zulu)

Eucomis autumnalis (Mill.) Chitt. subsp. *clavata* (Baker) Reyneke (*Eucomis autumnalis* subsp. *clavata* Reyneke; *Eucomis clavata* Baker; *Eucomis robusta* Baker; *Eucomis undulata* Aiton)

S. Africa. Perennial bulbous herbs, bulb geophyte, in open grassland and marshes

See *Gard. Dict.* ed. 8: 10. 1768, *Prodromus Plantarum Capensium*, ... 62. 1794, *Histoire naturelle, générale et particulière, des plantes* 8: 338. 1804, *Refug. Bot.* 4: t. 238. 1871,

Gard. Chron., III, 16: 562. 1894 and *Bothalia* 13: 140–142. 1980, *Journal of South African Botany* 46: 355–360. 1980

(The bulb is toxic. Antiinflammatory, topical pain killer and antispasmodic, used for coughs and respiratory ailments, biliousness, lumbago, blood disorders, venereal diseases and to prevent premature childbirth.)

Eucommia Oliver Eucommiaceae

Greek *eu* 'good, fine' and *kommi* 'gum', alluding to a rubber or solid latex producing species, see *Hooker's Icones Plantarum* 20: pl. 1950. 1890 et 24(3): t. 2361. 1895 and *Syllabus der Pflanzenfamilien* (ed. 5) 139. 1907, *Novon* 2(3): 235–236. 1992.

Eucommia ulmoides Oliver

China. Tree, elm-like, bark and dried leaves brown, leaves alternate long acuminate, flowers dioecious, female flowers solitary, male flowers in bracteate clusters, flattened ovary syncarpous, 2 ovules pendulous anatropous, indehiscent samaroid fruit, solitary pendulous seed, the timber used for furniture and fuel, the solidified latex used for lining pipes, insulating electric cables and for filling teeth

See *Hooker's Icon. Pl.* 20: t. 1950. 1890 and Chang Hung-ta. *Eucommiaceae*. In: Chang Hung-ta, ed., *Fl. Reipubl. Popularis Sin.* 35(2): 116–118. 1979, *Chromosome Information Service* 35: 21–22. 1983, *Acta Phytotaxonomica Sinica* 24: 157–160. 1986, *Systematics Association Special Volume* 40(2): 131–135. 1989

(Bark used as an invigorator, to increase activity, a tonic for arthritis and kidney, and for reducing blood pressure.)

in English: eucommia, guttapercha tree

in China: du chong, du zhong, tu chung

in Vietnam: dang ping, do trong

Eugenia P. Micheli ex L. Myrtaceae

Dedicated to the Prince Eugene of Savoy [Eugene of Savoy, Eugenio di Savoia, or François Eugène, Prince de Savoie-Carignan, or Franz Eugen, Prinz von Savoyen-Carignan], 1663–1736, book collector, patron and promoter of botany and science, he was the teacher of Frederick the Great, he fought against the Turks in central Europe and the Balkans (1683–1688, 1697, 1715–1718) and against France in the War of the Grand Alliance (1689–1697) and in the War of the Spanish Succession (1701–1714). See Carl Linnaeus, *Species Plantarum*. 1: 470–471. 1753, *Genera Plantarum*. Ed. 5. 211. 1754, *Histoire des plantes de la Guiane Française* 511. pl. 203. 1775, *De Fructibus et Seminibus Plantarum*... 1: 166, 168, t. 33. 1788, *Genera Plantarum* 324. 1789, *Dictionnaire des Sciences Naturelles* 20: 11. 1821, *Nova Genera et Species Plantarum* (quarto ed.) 6: 144–145. 1823, *Prodromus*

Systematis Naturalis Regni Vegetabilis 3: 237. 1828, *Sylva Telluriana* 106–107. 1838, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 334. 1843, *Tentamen Florae Abyssinicae* ... 1: 160. 1847, *Linnaea* 27(2–3): 136–137, 306, 309–310, 315, 345. 1854[1856], *Flora Brasiliensis* 14(1): 352, 380. 1857, *Linnaea* 43: 133. 1881, *Anales de la Sociedad Española de Historia Natural* 10: 272. 1881, *Enumeratio Myrtacearum Brasiliensium* 39. 1893, *Nat. Pflanzenfam.* 3(4): 137. 1896, *Bull. Mens. Soc. Linn. Paris* 2: 71. 1898 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 217. 1914, *J. Arnold Arbor.* 31: 329. 1950, *Taxon* 5: 139, 143. 1956, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien ser. 2.* 3: 504, 509. 1956, *Ann. Missouri Bot. Palermo 1988, *Loefgrenia* 94: 1, 3. 1989, *Fl. Lesser Antilles.* 5: 463–532. 1989, *Brenesia* 31: 53–73. 1989, *Brittonia* 49(4): 508–536. 1997, *Ceiba* 44(2): 105–268. 2003 [2005]. Some suggested from the Greek *eu* and *genos* 'race, kind, people, nation', referring to some stimulating properties, see A. Bazzarini, *Dizionario enciclopedico delle scienze, lettere ed arti.* Venezia 1830–1835.

Eugenia axillaris (Sw.) Willd. (*Eugenia cabanisiana* O. Berg; *Eugenia cozumelensis* Lundell; *Eugenia guadalupensis* DC.; *Eugenia guttata* Lundell; *Eugenia itzana* Lundell; *Eugenia matanzensis* O. Berg; *Eugenia minimiflora* Lundell; *Eugenia verrucosa* A. Rich.; *Eugenia yumuryensis* O. Berg; *Myrtus axillaris* Sw.; *Psidiastrum dubium* Bello)

Central America, Caribbean. Tree, aromatic, greyish-white smooth bark, dull rhomboidal pointed leaves, short reddish petiole, flowering on shoots produced earlier in the year, individual flowering branches are short racemes, dried gall-like black fruits, fragrant oils when fresh twigs are broken and crushed leaves with a strong odor

See *Nova Genera et Species Plantarum seu Prodrumus* 78. 1788, *Species Plantarum.* Editio quarta 2(2): 960–961. 1799 and *Sci. Surv. Porto Rico & Virgin Islands.* 6(1): 25–43. 1925, *Journal of Ethnobiology* 3(2): 149–156. December 1983

(Infusion for diarrhea. Love potion, the leafy twig.)

in English: iron wood, stopper, white stopper

Eugenia khasiana Duthie (*Syzygium khasianum* (Duthie) N.P. Balakr.)

India.

See *The Flora of British India* 2: 491. 1878 and *Bulletin of the Botanical Survey of India* 22: 174. 1980 (publ. 1982)

(Fruits crushed and mixed with sand and used as fish poison.)

in India: yamda-changne

Eugenia ligustrina (Sw.) Willd. (*Eugenia ligustrina* Kiaersk.; *Eugenia ligustrina* Cambess.; *Eugenia ligustrina*

Willd.; *Eugenia ligustrina* Miq., nom. illeg.; *Eugenia ligustrina* var. *hebecarpa* Amshoff; *Myrtus bracteiflora* Sessé & Moc.; *Myrtus cerasina* Vahl; *Myrtus ligustrina* Sw.; *Phyllocalyx ligustrinus* O. Berg; *Stenocalyx ligustrina* (Sw.) O. Berg; *Stenocalyx ligustrinus* (Sw.) O. Berg)

West Indies. Small tree or shrub, perennial, ripe berries eaten raw

See *Nova Genera et Species Plantarum seu Prodrumus* (Swartz) 78. 1788, *Symbolae Botanicae, ...* 2: 57. 1791, *Species Plantarum.* Editio quarta [Willdenow] 2(2): 962. 1799, *Flora Brasiliae Meridionalis* (quarto ed.) 2: 258. 1829, *Fl. Gard.* 18(2): 55–286. 1969, *Loefgrenia* 94: 3. 1989, *Fl. Lesser Antilles* 5: 463–532. 1989, *Loefgrenia* 124: 3. 2007

(Astringent.)

in English: privet stopper

in Dominica: méwiz, ti fèy

Eugenia pendens Duthie (*Syzygium pendens* (Duthie) I.M.Turner)

India, Malay Peninsula.

See *The Flora of British India* [J.D. Hooker] 2: 475. 1878 and *Journal of the Singapore National Academy of Science* 22–24: 22. 1997

(Leaves febrifuge.)

Malay name: pohon jambu penawah bikit

Eugenia singampattiana Bedd.

India.

See *Icones plantarum Indiae orientalis ...* [Beddome] 1: 65. 1868–1874

(Leaves powder taken with honey to treat constipation; stem, leaves and flowers made into a paste consumed for gastric complaints.)

in India: kaattukurandipatchilai, kaattus-iruvallipatchilai, korandi

Eugenia uniflora L. (*Eugenia arechavaletae* Herter; *Eugenia brasiliensis* (L.) Aubl.; *Eugenia brasiliensis* Aubl.; *Eugenia costata* Cambess.; *Eugenia dasyblasta* (O. (Tubers for healing swellings, tumours, spermatorrhea, leucorrhoea, abdominal pain due to menstrual disorders. Veterinary medicine, finely crushed bulb given to the cattle for the treatment of inflammation and constipation.)

in China: zi hua mei guan lan

in India: bhratabatuli, churiakand, kukadi kand

Eulophia welwitschii (Rchb.f.) Rolfe (*Eulophia dichroma* Rolfe; *Eulophia welwitschii* Hook. f., nom. illeg.; *Eulophia zeyheri* Hook. f.; *Eulophia zeyheriana* Sond.; *Orthochilus welwitschii* Rchb.f.)

South Africa. Perennial herb, underground white rhizomes or corms, hard pointed folded leaves, yellow flowers

See *Flora* 48: 186. 1865, *Bol. Soc. Brot.* 7: 236. 1889, *Botanical Magazine* 119: sub t. 7330. 1893, *Flora of Tropical Africa* [Oliver et al.] 7(1): 62. 1897 and *Veld & Flora* 89: 68–69. 2003

(Rhizome infusion against intestinal parasites of children, and during menopause to alleviate and reduce symptoms; drops into ear for earache.)

in English: orchid

in Lesotho: makholela

in South Africa: umlungu

Euodia Forster & Forster f. Rutaceae

Greek *euodia* 'a sweet scent, sweet smelling', *eu* and *ozo* 'to smell', alluding to the fragrant leaves and follicles; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*, quas in itinere ad insulas maris australis, etc. 7, 13, 28. London (Nov.) [1775]. Confusion with *Evodia*. Some problem of classification, this genus sometimes in *Melicope* and *Tetradium*.

Euodia alata F. Muell.

Australia.

See *Fragmenta Phytographiae Australiae* 7. 1869

(Bark soaked in water and the solution drunk for a bad cough. Leaves concoction for stomachache.)

in Papua New Guinea: gadembo

Euodia anisodora K. Schum. & Lauterb.

New Guinea. Small tree, many-flowered axillary panicles

(Leaves together with a vine or *Citrus* sp. to treat internal stomach pains, constipation, diarrhea and to remove intestinal worms. Dried leaves sap taken orally to treat tuberculosis.)

in Papua New Guinea: maig, tarripo, wajo

Euodia elleryana F. Muell. (*Melicope elleryana* (F. Muell.) T.G. Hartley) (after R.L. Ellery, Victorian astronomer)

Papua New Guinea. Spreading tree, fast growing, petals dark red, flowers in many-branched dense panicles

See *Fragmenta Phytographiae Australiae* (Mueller) 5(31): 4. 1865 and *Allertonia* 8(1): 201. 2001

(Dried bark decoction used for malaria; fresh bark juice taken as a contraceptive.)

in English: corkwood, Ellery's evodia, parrotwood, pink euodia, pink evodia, pink-flowered evodia

in Papua New Guinea: kurih, sehit

Euodia fraxinifolia (D. Don) Hook. f. (*Euodia fraxinifolia* Dunn; *Euodia fraxinifolia* (Hook. f.) Benth.; *Euodia fraxinifolia* (Hook.) Hook.f.; *Tetradium fraxinifolium* (Hook. f.) T.G. Hartley; *Tetradium fraxinifolium* (Hook.) T.G. Hartley; *Tetradium fraxinifolium* Wall. ex Royle)

India. Tree, white flowers

See *Flora Cochinchinensis* 1: 91–92. 1790, *Prodromus Florae Nepalensis* 248. 1825, *Icones Plantarum* pl. 710. 1845, *Fl. Hongk.* 59. 1861, *The Flora of British India* [J.D. Hooker] 1(3): 490. 1875 and *Journal of the Linnean Society, Botany* 39(274): 448. 1911, *Silvae Genet.* 22: 182–188. 1973, *The Gardens' Bulletin Singapore* 34(1): 102–105. 1981

(Fruit made into paste and given in indigestion, cough and cold, also used in typhoid; ripe fruit kept inside the mouth to relieve toothache. Bark and fruit as fish poison.)

in China: wu xian wu yu

in India: kalukung, kanukpa

in Lepcha: sohom koong

in Nepal: bokumba

Euodia hortensis J.R. Forst. & G. Forst. (*Euodia hortensis* Forst.)

Papua New Guinea. Small tree or shrub, leaves aromatic, small creamy fragrant flowers in clusters, shiny black seeds

See Forster, Johann Reinhold (1729–1798), *Characteres Generum Plantarum* quas in itinere ad insulas maris Australis, collegerunt, descripserunt, delineaverunt, annis 1772–1775. Joanne Reinoldus Forster ... et Georgius Forster. Londini, 1775

(Leaf scraped in water and drunk for cold; leaves infusion febrifuge. Root and leaves chewed with betel nut and lime by a patient with malaria. Bark febrifuge.)

in Papua New Guinea: hane, karongon, mamata, sup, wareba

Euodia malayana Ridl.

Malaysia.

See *Fl. Malay. Penin.* i. 342. 1922

(Febrifuge.)

Malay name: medang ketiwang

Euodia roxburghiana Benth.

New Guinea.

See Benthams, George (1800–1884), *Flora Hongkongensis* 59. London: L. Reeve, 1861

(Used to relieve indigestion and bilious attack. Leaves and flowers used as tonic.)

Malay name: tengah burong

Euodia ruticarpa (A. Juss.) Benth. (*Ampacus ruticarpa* (A. Juss.) Kuntze; *Boymia ruticarpa* A. Juss.; *Euodia ruticarpa* Pamp.; *Euodia ruticarpa* Dunn & Tutcher; *Evodia rutaecarpa* (Juss.) Benthams; *Evodia ruticarpa* Dunn & Tutcher; *Evodia ruticarpa* Pamp.; *Evodia ruticarpa* (A. Juss.) Benth.; *Tetradium ruticarpum* (A. Juss.) T.G. Hartley)

China, India, Japan. Deciduous small tree, leaves opposite, leaflets winged dotted with glands, on the top of the branches small white flowers in a corymb, dried fruits brown and aromatic, on slopes

See *Flora Cochinchinensis* 1: 92. 1790, *Mémoires du Muséum d'Histoire Naturelle* 12: 507. 1825, *Flora Hongkongensis* 59, in nota. 1861, *Revisio Generum Plantarum* 1: 98. 1891 and *Nuovo Giornale Botanico Italiano*, new series 18(2): 169. 1911, *Kew Bulletin, Additional Series* 10: 55. 1912, *The Gardens' Bulletin Singapore* 34(1): 116–120. 1981, *Plant Systematics and Evolution* 146: 13–30. 1984, [Zhongguo Zhong yao za zhi = Zhongguo zhongyao zazhi] = *China Journal of Chinese Materia Medica* 35(9): 1185–1188. 2010, *Molecules* (Basel, Switzerland) 15(3): 1873–1881. 2010

(The fruit for nausea, vomiting, headache, abdominal pain, postpartum hemorrhage, dysentery and amenorrhea, diarrhea, belching; a water extract may have an inhibitory and clinically therapeutic effect on colon cancer. Rutaecarpine has been shown to have cardiovascular biological effects such as inotropic and chronotropic, vasorelaxant, anti-platelet aggregation and antiinflammatory effects.)

in English: medicinal evodia

in China: wu-chu-yu, wu zhu yu

Euodia triphylla DC. (*Ampacus triphylla* (Lam.) Kuntze; *Euodia triphylla* Forbes & Hemsl.; *Euodia triphylla* (Lam.) DC.; *Euodia triphylla* Bedd.; *Euodia triphylla* Hort. ex Backer; *Evodia arborescens* D.D. Tao; *Evodia gracilis* Kurz; *Evodia triphylla* DC.; *Evodia triphylla* Forbes & Hemsl.; *Fagara triphylla* Lam.; *Melicope triphylla* (Lam.) Merr.; *Zanthoxylum triphyllum* (Lam.) G. Don)

China. Broad-leaf forest

See *Encyclopédie Méthodique, Botanique* 2: 447. 1788, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 724. 1824, *Journal of the Asiatic Society of Bengal* 2: 48. 1871, *Journal of the Linnean Society, Botany* 23: 104. 1886 and *Philippine Journal of Science* 7(6): 375–377. 1912, *Transactions of the American Philosophical Society, New Series* 24(2): 1–445. 1935, *Acta Botanica Yunnanica* 6(3): 285–286, pl. 1. 1984, *Taxon* 38(1): 119–123. 1989, Wang,

S.-K., Duh, C.-Y., Hou, R.-S., Wu, Y.-C., Lu, S.-T., and Chang, S.-F., *Antiviral Furoquinoline Alkaloids from Melicope triphylla*, Annual Meeting of Taiwan Pharmaceutical Society, November 17, 1990, Taichung, Taiwan, R.O.C. 1990, *Pharmaceutical Society of Japan* 110(11): 822–827. 1990, *Phytochemistry* 35: 271–272. 1994, *Phytochemistry* 60(8): 817–820. 2002

(Antiinflammatory, antiviral and anticancer.)

Euonymus L. Celastraceae

Ancient Greek name *euonymon dendron*; Latin *euonymos*, *i* 'of good, prosperous name', the name of a tree in Lesbos, the Greek name of the Spindle Tree; *euonymus* is poisonous to animals; see Carl Linnaeus, *Species Plantarum*. 1: 197. 1753, *Genera Plantarum*. Ed. 5. 91. 1754, *Flora Indica*; or descriptions of Indian Plants 2: 410–412. 1824, *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 453–454. 1858, *Flora von Nieder-Österreich* 2(1): 588. 1892, *Flore Forestière de la Cochinchine* sub. t. 309. 1894, *Flore de France* 4: 159. 1897 and *Journal of Japanese Botany* 17: 617–618, 686. 1941, *Acta Phytotaxonomica et Geobotanica* 13: 21–22. 1943, *Journal of Japanese Botany* 24: 11–12. 1949, *Flora URSS* 14: 744. 1949, *Kew Bull.* 2: 234. 1951, *Taxon* 47: 473–474. 1998, *Fl. Reipubl. Popularis Sin.* 45(3): 36, 187. 1999, *Taxon* 49: 270. 2000.

Euonymus americanus L. (*Euonymus americana* L.)

North America.

See *Species Plantarum* 1: 197. 1753

(Abortifacient, antihemorrhagic, analgesic, hemostat, expectorant, tonic, astringent, disinfectant, for urinary troubles, stomachache, menstrual problems.)

in English: American strawberrybush, bursting-heart, strawberry-bush

Euonymus atropurpureus Jacq. (*Euonymus atropurpurea* Jacq.)

North America.

See *Species Plantarum* 1: 197. 1753, *Hort. Bot. Vindob.* 2: 55, pl. 120. 1772/1773

(Plant poisonous. Cathartic, used for sore eyes. A decoction of the inner bark for uterine troubles.)

in English: burning bush, eastern wahoo, Indian arrow wood, wahoo

Euonymus europaeus L. (*Euonymus bulgarica* Velen.; *Euonymus europaea* L.; *Euonymus floribundus* Steven; *Euonymus medirossica* Klokov; *Euonymus suberosus* Klokov)

Europe.

See *Species Plantarum* 1: 197. 1753, *Bull. Soc. Imp. Naturalistes Moscou* xxix. (1856) II. 122. 1856 and *Taxon*

28: 400–401. 1979, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(The shrub has poisoned children as well as goats, horses and sheep. Children are attracted to the mature fleshy orange fruits, which contain seeds with cardiac glycosides and alkaloids. Several cardiac glycosides have been found in the seeds, including evomonoside, whose aglycone is digitoxigenin. Anthelmintic, disinfectant, cathartic, for bloody urine, intestinal worms.)

in English: European spindle tree

Euonymus hamiltonianus Wall. (*Euonymus bodinieri* H. Lév.; *Euonymus darrisii* H. Lév.; *Euonymus darrisii* Loes.; *Euonymus hamiltonianus* Dippel ex Koehne; *Euonymus hamiltonianus* fo. *lanceifolius* (Loes.) C.Y. Cheng ex Q.H. Chen; *Euonymus hamiltonianus* fo. *lanceifolius* (Loes.) C.Y. Cheng; *Euonymus hamiltonianus* var. *lanceifolius* (Loes.) Blakelock; *Euonymus hamiltonianus* var. *pubinervius* S.Z. Qu & Y.H. He; *Euonymus lanceifolius* Loes.; *Euonymus rugosus* H. Lév.; *Euonymus yedoensis* Koehne var. *koehneanus* Loes.)

Himalaya, China, India.

See *Flora Indica*; or descriptions of Indian Plants 2: 403. 1824 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(5): 462. 1902, *Notes from the Royal Botanic Garden, Edinburgh* 7: 193. 1912, *Plantae Wilsonianae* 1(3): 491. 1913, *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 261. 1914, *Flora Guizhouensis* 2: 402. 1986, *Bulletin of Botanical Research* 8(4): 92–93, pl. 1, f. 1–3. 1988, *Fl. Reipubl. Popularis Sin.* 45(3): 48. 1999

(Bark useful in eye diseases, chronic constipation and dyspepsia.)

in China: xi nan wei mao

in India: kungku

Euonymus javanicus Blume

Java, India. Small glabrous tree or shrub, leaves opposite, bisexual flowers in axillary clusters, beaked fruit strongly lobed, black seeds with orange aril

See *Bijdragen tot de flora van Nederlandsch Indie* 17: 1146. 1827 [Oct 1826–Nov 1827]

(In eye diseases, dyspepsia, constipation, aqueous extract of leaves given to treat spermatorrhea.)

in India: inkauol, ravong

Euonymus lucidus D. Don (*Euonymus pendulus* Wall. ex Roxb.; *Euonymus pendulus* Wall. ex M.A. Lawson)

India.

See *Prodromus Florae Nepalensis* 191. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 406. 1832, *The Flora of British India* 1: 612. 1875

(Bark decoction used in eye ailments and against chronic constipation.)

in English: spindle tree

in China: chui xu wei mao

in India: kambella

Euonymus obovatus Nutt. (*Euonymus obovata* Nutt.)

North America.

See *The Genera of North American Plants* [Nuttall]. 1: 155. 1818

(Disinfectant, for difficult urination. Magico-religious beliefs, witchcraft medicine, ritual.)

in English: running strawberry-bush

Euonymus pendulus Wall. ex M.A. Lawson (*Euonymus pendulus* Wall., nom. inval.; *Euonymus pendulus* Wall. ex Roxb.)

India.

See *Fl. Ind.* (Carey & Wallich ed.) 2: 406. 1824, *Prodromus Florae Nepalensis* 191. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 406. 1832, *The Flora of British India* [J.D. Hooker] 1: 612. 1875

(Used in Ayurveda.)

in India: bhambeli, bharmela, bhillotaka, chopra, dhabela

Euonymus tingens Wall.

Himalaya.

See *Flora Indica*, ed. Carey & Wall. ii. 406. 1824 and *Taxon* 29: 355–357. 1980

(Used in Ayurveda. Arils and bark used as purgative, for diseases of eyes, dyspepsia and constipation.)

in China: ran yong wei mao

in India: barmeli, barphali, bhambeli, bhillotaka, kala chindwara, kalachindwara, kumkum, kunghu, kunku, kunkuma, sinduri

Eupatorium L. Asteraceae

Eupator was a surname of Mithridates VI (132–63 BC.), king of Pontus, in northern Anatolia; Latin *eupatoria*, *ae* ancient name applied to agrimony (Plinius); Greek *eupatorium* (*eupator*) ‘a herb, *Agrimonia eupatorium* Spreng.’ (Dioscorides, Galenus). See Carl Linnaeus, *Species Plantarum*. 2: 836–839. 1753, *Genera Plantarum*. Ed. 5. 363. 1754, *The Civil and Natural History of Jamaica* in Three Parts 490, 314–315, t. 34, f. 1. 1756, *Linnaea* 5(1): 136–137. 1830, *Linnaea* 6: 403–404. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 133, 136. 1836, *Plantas Hartwegianas imprimis Mexicanas* 85. 1841, *Histoire Naturelle des Végétaux. Phanérogames* 10: 286–287, 290–291. 1841, *Flora* 33(27):

417–418. 1850, *Plantae Novae Thurberianae* 323–324. 1854, *Zeitschrift des Gartenbau-Vereins zu Darmstadt* 6(1): 6. 1857, *Proceedings of the American Academy of Arts and Sciences* 21: 383. 1886, T. Reinach, *Mithridate Eupator, roi de Pont*. (1953–), *Taxonomy of Eupatorium*: section *Verticillata* (Asteraceae). New York: New York Botanical Garden, 1995, *Candollea* 50(2): 542. 1995, *Flora of Japan* 3b: 112. 1995.

Eupatorium ayapana Vent.

India, Gabon, South America. See also *Ayapana triplinervis* (Vahl) R.M. King & H. Rob.

See *Species Plantarum* 2: 836–839. 1753, *Symbolae Botanicae, ...* 3: 97. 1794, *Bijdragen tot de flora van Nederlandsch Indië*: 903. 1826 and *Phytologia* 20(3): 212. 1970, *Monogr. Syst. Bot. Missouri Bot. Gard.* 22: 197. 1987, *Biochemical Systematics and Ecology* 36(11): 853–858. 2008

(Used in Sidha. Leaves depurative, cardiotoxic, digestive, sudorific, tonic, astringent, stomachic, anti-infective, cardiac stimulant, sedative, febrifuge, antineoplastic, emetic, laxative, hemostatic, used for influenza, fevers, yellow fever, cold, headaches, bronchitis, pneumonia, asthma, colic, constipation, vomiting, stomach troubles, diarrhea, inflammation of the urinary tract, mouth sores, ulcers, hypertension, edema, wounds, snakebites. Root paste used orally as antidote, anti-venom. Planted to repel snakes.)

in India: ayapana, ayapani, ayapanie, ayapanum, ayappanai

Eupatorium cannabinum L. (*Eupatorium nodiflorum* Wall. ex DC.)

Europe. Herb, erect, clump, stems pinkish, flowers white to pale pink, bedding material, strong odour when crushed, open sunny slopes

See *Species Plantarum* 2: 836–839. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 179. 1836 and *Taxon* 24: 501–516. 1975, *Watsonia* 11: 211–223. 1977, *Taxon* 28: 395–397. 1979, *Taxon* 30: 829–842. 1981, *Fl. Iran.* 164: 31. 1989, *Plant Systematics and Evolution* 170: 215–228. 1990, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Watsonia* 19: 134–137. 1992, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Opera Botanica* 137: 1–42. 1999

(Tender leaves and tender stems crushed fresh and juice applied to cuts, wounds, bruises and swellings of legs and scrotum.)

in English: hemp agrimony, hemp weed, water hemp agrimony

in Arabic: ghafath, tebbaq

in India: banmara, dura summok, kalijhar, samsing, tongol-lati, tongol lati

in Indonesia: teklan gede

in Philippines: apanang-gubat

in Vietnam: t[oor] ma, y[ee]n b[aj]ch

Eupatorium capillifolium (Lam.) Small ex Porter & Britton (*Artemisia capillifolia* Lam.)

North America. Erect, many-branched herb, greenish-white or yellowish flowers, achene 5-angled

See *Encyclopédie Méthodique, Botanique* 1(1): 267. 1783, *Memoirs of the Torrey Botanical Club* 5(20): 311. 1894

(Leaf extract applied against fungal infections on skin.)

in English: dog-fennel

Eupatorium chinense Linnaeus (*Bupthalmum oleraceum* Lour.; *Eupatorium chinense* var. *reevesii* Miquel; *Eupatorium crenatifolium* Handel-Mazzetti; *Eupatorium japonicum* Thunb. ex Murray; *Eupatorium melanadenium* Hance; *Eupatorium reevesii* Wallich ex DC.)

Vietnam, China, Taiwan. Shrub, rhizomatous, leaves glossy green, fragrant flower heads, terminal corymb, corolla purplish, fruit an achene, in moist grassland, along rivers

See *Species Plantarum* 2: 837. 1753, *Numer. List* n. 3168. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 179. 1836 and *Oesterreichische Botanische Zeitschrift* 88: 307–308. 1939

(This plant is poisonous, especially the leaves, used to treat carbuncles, scabies, poisonous snakebites. Whole plant diuretic, analgesic and anthelmintic.)

in China: cheng gan cao, duo xu gong

Eupatorium fortunei Turczaninow (*Eupatorium caespitosum* Migo; *Eupatorium chinense* L. var. *tripartitum* Miquel; *Eupatorium formosanum* Hayata var. *quasitripartitum* (Hayata) Kitamura; *Eupatorium fortunei* var. *angustilobum* Y. Ling; *Eupatorium quasitripartitum* Hayata; *Eupatorium stoechadosmum* Hance)

SE Asia. Fragrant stems, flowers and leaves

See *Bull. Soc. Imp. Naturalistes Moscou* 24(1): 170. 1851

(Blood purifier.)

in China: pei lan

in Vietnam: lan thao, trach lan

Eupatorium heterophyllum DC. (*Eupatorium cannabinum* L. subsp. *asiaticum* Kitamura var. *heterophyllum* (DC.) Kitamura; *Eupatorium heterophyllum* A. Rich.; *Eupatorium*

mairei H. Lévl.; *Eupatorium wallichii* DC. var. *heterophyllum* (DC.) Diels)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 179–180. 1836, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 3: 39. 1853 and *Notes from the Royal Botanic Garden, Edinburgh* 7: 360. 1912, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 14. 1915

(The stems or whole plant used for treating injuries, wounds, cuts.)

in China: yi ye ze lan

Eupatorium inulifolium Kunth (*Austroeupatorium entre-riense* (Hieron.) R.M. King & H. Rob.; *Austroeupatorium inulifolium* (Kunth) R.M. King & H. Rob.; *Eupatorium entre-riense* Hieron.; *Eupatorium pallescens* DC.; *Eupatorium pallescens* var. *bonariense* DC.; *Eupatorium pallescens* var. *hirsuta* DC.; *Eupatorium pallidum* Hook. & Arn.; *Eupatorium paranense* Hook. & Arn.)

Colombia.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 85. 1820[1818], *Companion to the Botanical Magazine* 1: 241. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 154. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 269. 1838, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 767. 1897 and *Leaflets of botanical observation and criticism* 1(1): 13. 1903, *Phytologia* 19(7): 433–434. 1970

(Leaf tea for colds, cough; poultice for sores; leaf juice in eye. Leaves and stem decoction used for regulating fertility.)

in English: Christmas bush

in Paraguay: doctorcito

Eupatorium japonicum Thunberg ex Murray

Japan.

See *Flora Japonica*, ... 308. 1784

(Antiphlogistic.)

in China: bai tou po

Eupatorium japonicum Thunberg ex Murray var. ***japonicum*** (*Eupatorium chinense* Linnaeus var. *simplicifolium* (Makino) Kitamura; *Eupatorium fortunei* fo. *aureoreticulatum* (Makino) Nakai; *Eupatorium fortunei* Turczaninow var. *simplicifolium* (Makino) Nakai; *Eupatorium fortunei* var. *simplicifolium* f. *aureo-reticulatum* (Makino) Nakai; *Eupatorium japonicum* fo. *aureoreticulatum* Makino; *Eupatorium japonicum* var. *simplicifolium* f. *aureo-reticulatum* Makino; *Eupatorium japonicum* var. *simplicifolium* f. *aureo-reticulatum* Makino; *Eupatorium japonicum* var. *simplicifolium* f. *aureo-reticulatum* Makino; *Eupatorium japonicum* var. *wallichii* (DC.) Yamamoto; *Eupatorium wallichii* DC.)

Japan.

(Stomach medicine.)

Euphorbia antiquorum L. (*Euphorbia antiquorum* var. *polygona* Wight; *Euphorbia arborescens* E. Mey.; *Euphorbia arborescens* C. Sm.; *Euphorbia arborescens* Roxb., nom. illeg.; *Euphorbia arborescens* Hort. Par. ex Boiss.; *Euphorbia*

arborescens Hort. Angl. ex Salm-Dyck; *Euphorbia trigona* Mill.; *Euphorbia trigona* Haw.; *Euphorbia trigona* Roxb., nom. inval.; *Tithymalus antiquorum* (L.) Moench; *Tithymalus antiquorum* Moench)

Pakistan, China, South India. Fleshy shrub or small tree, succulent, ascending, leafless, winged-angled stem, milky juice, spiny with persistent sharp spines, jointed thorny branches, cyathia with pale yellow glands, anthers dark red, capsule trigonous, in dry open evergreen forest, on sandy soils

See *Species Plantarum* 1: 450–463. 1753, *Plantae Veronenses* 3: 91. 1754, *Gard. Dict.*, ed. 8. n. 3. 1768, *Methodus Plantas Horti Botanici ...* (Moench) 665. 1794, *Synopsis plantarum succulentarum ...* 127. 1812, *Hort. Bengal.* 36. 1814, *Fl. Ind.* (Roxburgh) 2: 468 (–469). 1832, *Prodr.* (DC.) 15(2.1): 82. 1862, *FBI* 5: 225. 1887 and *Taxon* 29: 536–537. 1980, *Bot. Commelins* 97. 1983, *J. Econ. Taxon. Bot.* 24: 24. 1984, *Cytologia* 64: 229–234. 1999

(Poisonous acrid milky latex, a drastic purgative and emetic, rubefacient, irritant, cathartic, insecticidal, applied externally to swellings, burns, boils, rheumatism, moles, warts and other skin affections, for killing maggots in wounds, used also to treat toothache, stomach trouble, earache and asthma, nervine diseases, dropsy, deafness, palsy. Plaster from the roots and mixed with *asafoetida* applied on the stomach of children suffering from worms. Plant purgative, digestive, pungent; stem decoction in gout. Dried heartwood antipyretic, antibiotic, febrifuge, used against dysentery. Root bark purgative. Latex a fish poison or used to make the fish blind. Magico-religious beliefs, due to its bifurcated spines plant considered to have the property to keep the snakes away, tribal worship the plant as a symbol of Manasa Devi, Goddess of snakes. Veterinary medicine, latex applied on bone fracture.)

in English: ancients' euphorb, fleshy spurge, Malayan spurge, Malayan spurge tree, triangular spurge

in Cambodia: chan bat day

in China: huo ying le, huo yang le

in India: bajvaran, bajvarun, burre jemudu, ekete, elete, hiju-araung, hiju-araung karbis, hijuarong, sid daru, siju, tikta, tridhar sehud, tridhara, tridhara-sehund

in Indonesia: sudu-sudu, susudu, susuru

in Japan: fukuro-gi

in Laos: lep nguak

in Malaysia: sesudu, sudu, sudu-sudu, teras sudu

in Thailand: kalam-phak, keu ceh, khia phaa, sa-lat-dai, salatdai paa

in Vietnam: x[uw][ow]ng r[oof]ng, x[uwl][ow]ng r[oof]ng c[aj]nh

Euphorbia antisiphilitica Zucc.

U.S.A., Mexico. Erect succulent herb, branching from the base, small deciduous elliptic leaves, yellowish flowers, brown capsule, dark brown seeds

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 1: 292. 1832

(Latex in skin diseases. A plant decoction drunk to cure syphilis, also used for washing syphilitic sores. Roots made into a paste and used on skin diseases.)

Euphorbia atoto G. Forst. (*Anisophyllum atoto* Klotzsch & Garcke; *Anisophyllum atoto* (G. Forst.) Klotzsch & Garcke; *Anisophyllum laevigatum* Klotzsch & Garcke; *Chamaesyce atoto* (G. Forst.) (Cathartic, analgesic, for injuries and pain, applied to boils and pimples. Root poultice applied for breast troubles. Magic, good luck charm, for bewitchment.)

in English: horned spurge, San Francisco Mountain spurge

Euphorbia bupleurifolia Jacq. (*Euphorbia bupleurifolia* E. Mey., nom. nud.; *Euphorbia proteifolia* Boiss.; *Tithymalus bupleurifolius* (Jacq.) Haw.)

South Africa.

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 55. 1797, *Synopsis plantarum succulentarum* ... 138. 1812, *Zwei Pflanzengeografische Dokumente* (Drège) 184. 1843, *Prodr.* 15(2): 92. 1862

(Latex and leaves purgative, emetic, antiseptic, for skin diseases, sores.)

Euphorbia buxoides Radcl.-Sm.

New Guinea.

See *Kew Bull.* 25: 552. 1971

(Bark very bitter and an antidote for poison, vomiting when chewed; large quantities mixed with food to kill a person.)

in Papua New Guinea: timburumbu, toienge, tuk

Euphorbia caducifolia Haines

India, Pakistan. Dendroid armed shrub, numerous branches arising from the base, yellowish-green flowers, capsule sharply 3-lobed, globose smooth seeds

See *Indian Forester* 40: 154. 1914

(Plant juice given for arthritis. Latex for coughs, applied to the skin on blisters and wounds, fracture and injuries, arthritis and rheumatism. Inner pulp of stem to relieve backache, for impotence. Veterinary medicine, white milky juice to treat sarcoptic mange in camels, also called scabies.)

in India: danda-thor, thor, vadthor

in Pakistan: dedar, thoar, thor

Euphorbia candelabrum Trémaux ex Kotschy (*Euphorbia candelabrum* Welw. ex Hiern, nom. illeg.)

Ethiopia to Zimbabwe. Tree, succulent, short thick trunk, four-winged stems, paired spines, ascending branches, sticky white latex, above the pairs of spines fleshy yellow green flowers in small groups, green fruit 2–3-lobed, on rocky slopes, bushland, wooded grassland, thickets

See *Species Plantarum* 1: 450–463. 1753, *Mitteilungen der Geographischen Gesellschaft* 1(2): 169. 1857 and *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1(4): 496. 1900

(The honey cannot be eaten as it irritates and burns the mouth. Latex extremely poisonous, a single drop in the eye can cause blindness. A decoction of the stem after childbirth to clear out the afterbirth. Fish poison.)

in English: candelabra euphorbia, tree euphorbia

in East Africa: epopong (Ateso), mtungutungii, mtupa (Swahili), ol-bobongo (Maasai)

in Zambia: chibeka, chinsembu, chisu, kilota, lyandandu, mulangali, mutupa

Euphorbia candelabrum Trémaux ex Kotschy var. ***candelabrum*** (*Euphorbia calycina* N.E. Br.; *Euphorbia confertiflora* Volkens; *Euphorbia murielii* N.E. Br.; *Euphorbia reinhardtii* Volkens; *Euphorbia tozzii* Chiov.)

Ethiopia to Zimbabwe.

See *Species Plantarum* 1: 450–463. 1753, *Mitteilungen der Geographischen Gesellschaft* 1(2): 169. 1857

(Latex extremely poisonous, solvent for arrow poison ingredients.)

Euphorbia cattimandoo Elliot ex Wight (*Euphorbia cattimandoo* Elliot)

East central India.

See *Icon. Pl. Ind. Orient.* [Wight] 6: t. 1993. 1853

(Latex used as vesicant.)

Euphorbia chamaesyce L. (*Anisophyllum chamaesyce* (L.) Haw.; *Anisophyllum vaticanum* Gand.; *Chamaesyce canescens* (L.) Prokh.; *Chamaesyce canescens* subsp. *glabra* (Roep.) Soják; *Chamaesyce canescens* subsp. *massiliensis* (DC.) Soják; *Chamaesyce chamaesyce* (L.) Hurus., nom. inval.; *Chamaesyce massiliensis* (DC.) Galushko; *Chamaesyce libassii* (Lojac.) (Antiinflammatory.)

in English: beach spurge

Euphorbia clavarioides Boiss. (*Euphorbia basutica* Marloth; *Euphorbia truncata* N.E. Br., nom. illeg.; *Euphorbia truncata* (Pers.) J.C. Loudon)

S. Africa. Perennial, flat-growing, main stem underground, milky latex with a pungent smell

See *Species Plantarum* 1: 450–463. 1753, *Hort. Brit.* [Loudon], ed. 2. 192. 1832, *Centuria Euphorbiarum* 25. 1860 and *Trans. Roy. Soc. South Africa* i. 408. 1910, *Flora Capensis* (Harvey) 5(2.2): 309 (-310). 1915

(Plant infusion used externally to heal body rash. Milky latex antidote, antiseptic, to heal cracks on foot soles; mixed with clay and applied to pimples and skin diseases. Magic, ceremonial, ritual, spiritual rites.)

in English: birdlime

in Lesotho: sehloko

Euphorbia clavigera N.E. Br. (*Euphorbia clavigera* Lacaite, nom. illeg.; *Euphorbia persistens* R.A. Dyer)

Mozambique.

See *Fl. Cap.* (Harvey) 5(2): 362. 1915, *Cavanillesia* 1: 9. 1928, *Fl. Pl. South Africa* 18: 713. 1938

(A stomach medicine.)

Euphorbia consanguinea Schrenk (*Chamaesyce consanguinea* (Engelm.) Millsp.; *Euphorbia consanguinea* Engelm.; *Euphorbia consanguinea* Engelm. ex Boiss., pro syn.; *Euphorbia consanguinea* Klotzsch, pro syn.; *Tithymalus consanguineus* (Schrenk) Klotzsch & Garcke; *Tithymalus consanguineus* Klotzsch & Garcke)

C. Asia, Afghanistan.

See *Species Plantarum* 1: 450–463. 1753, *Plantae Veronenses* 3: 91. 1754, *A Natural Arrangement of British Plants* 2: 260. 1821, *Enumeratio Plantarum Novarum* 1: 88. 1841, *Report on the United States and Mexican Boundary Survey, ...* 2(1): 187. 1859, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1859: 64. 1860, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 43. 1862, *Die*

Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen 114. 1862 and *Publications of the Field Columbian Museum, Botanical Series* 2(11): 408. 1916

(For boils, wounds.)

Euphorbia convolvuloides Hochst. ex Benth. (*Anisophyllum convolvuloides* (Hochst. ex Benth.) Klotzsch & Garcke; *Chamaesyce prieuriana* (Baill.) Soják; *Euphorbia prieuriana* Baill.)

Trop. Africa. Erect branched herb, drooping branches, eaten by all stock

See *Species Plantarum* 1: 450–463. 1753, *Niger Flora* 499. 1849, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1859: 34. 1860

(Plant infusion for urethral discharges. Leaves and latex vesicant, antidote and preventive of snake and scorpion bites. Applied to women's breasts to increase lactation.)

Euphorbia cooperi N.E. Br. ex Berger (the specific name after Thomas Cooper, 1815–1913 (d. Kew, Surrey), who first introduced the species in Kew in 1862; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 168. London 1994; Gordon Douglas Rowley, *A History of Succulent Plants*. 1997; A. White and B.L. Sloane, *The Stapelieae*. Pasadena 1937)

Zambia, South Africa. Shrub, milky sap

See *Sukkulente Euphorbien* 83. 1907[1906]

(Poisonous. For stomach and bladder troubles. Roots for warts.)

in English: lesser candelabra tree, Transvaal candelabra tree, umphapha euphorbia

in Southern Africa: Transvaalse kandelaarnaboom; umHlonhlo, umPhapha (Zulu); umHlontlo, umHlohlo (Swazi); xihaha (Tsonga); tshikonde-ngala (Venda)

Euphorbia corollata L. (*Agaloma arundelana* (Bartlett) Nieuwl.; *Agaloma corollata* (L.) Raf.; *Agaloma corollata* var. *angustifolia* (Elliott) Raf.; *Agaloma discoidalis* (Chapm.) (White sap irritant. Branches and leaves fish poison.)

in English: red euphorbia, red spurge

in Mexico: trompillo, piñoncillo, mala mujer (Oaxaca); guichi-bidu (Zapoteca l., Oaxaca); mata gallina (Veracruz)

in Peru: assacuhi, carawá, chepo, gunapalu, huarus, huarus juquilla, huarus juquillo, juquilla, juquillo, koenapaloe, leit-eira, yuquilla negra

Euphorbia cristata B. Heyne ex Roth (*Chamaesyce cristata* (B. Heyne ex Roth) G.L. Webster; *Chamaesyce fimbriata* subsp. *burmanica* (Panigrahi) K.S. Rao & M.N.V. Prasad; *Chamaesyce laciniata* subsp. *burmanica* (Panigrahi) V.S. Raju & P.N. Rao; *Euphorbia cristata* var. *major* Roth; *Euphorbia laciniata* subsp. *burmanica* Panigrahi; *Lophobios cristata* (B. Heyne ex Roth) Raf.)

Indian subcontinent to Thailand. Erect armed irregularly branched shrub, stem cristate at apex, minute ovate deciduous leaves, yellowish flowers

See *J. Arnold Arbor.* 48: 424. 1967, *Kew Bull.* 30: 532. 1975, *Phytologia* 37: 454. 1977, *Taxon* 36: 762. 1987

(Tender leaves pasted and applied on fracture. Mucilage from stem used on burnt part.)

Euphorbia crotonoides Boiss.

Ethiopia to S. Africa.

See *Species Plantarum* 1: 450–463. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 98. 1862

(Latex irritant. Leaves for cough, viral infections.)

Euphorbia crotonoides Boiss. subsp. *crotonoides* (*Euphorbia holstii* Pax var. *hebecarpa* Pax; *Euphorbia systioides* Pax var. *hebecarpa* (Pax) N.E. Br.)

Ethiopia to S. Africa.

See *Species Plantarum* 1: 450–463. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 98. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 121. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 374. 1904, *Flora of Tropical Africa* 6(1): 521. 1911

(Irritant, vesicant.)

Euphorbia cuneata Vahl (*Lyciopsis cuneata* (Vahl) Schweinf.; *Tirucalia cuneata* (Vahl) P.V. Heath; *Tirucallia cuneata* (Vahl) P.V. Heath)

Africa, Arabian Pen. Shrub, many-branched, spine-tipped branches, white milky latex, glabrous leaves, yellowish flowers, reddish purple fruits, in *Acacia-Commiphora* bushland, semi-desert scrub, in mixed bushland

See *Species Plantarum* 1: 450–463. 1753, *Symbolae Botanicae, ...* 2: 53. 1791, *Beitr. Fl. Aethiop.* 37. 1867 and *Calyx* 5(3): 89. 1996

(Sap from the branches applied to wounds, sores and eyelids.)

in East Africa: echokokile, lokilei, mchongoma, mlimbilimbi

Euphorbia cuneata Vahl subsp. *cuneata* (*Euphorbia carpasus* Ehrenb. ex Boiss.; *Euphorbia cuneata* var. *carpasus* Boiss.; *Euphorbia cuneata* var. *perrottetii* (Jaub. & Spach) Boiss.; *Euphorbia fruticosa* Edgew., nom. illeg.; *Euphorbia perrottetii* Jaub. & Spach)

Africa, Arabian Pen.

See *Species Plantarum* 1: 450–463. 1753, *J. Asiat. Soc. Bengal* 16(2): 1219. 1847, *Die Pflanzenwelt Ost-Afrikas* 15(2): 97. 1862, *Symbolae Botanicae, ...* 2: 53. 1791

(Sap from the branches applied to wounds, sores and eyelids.)

Euphorbia cupularis Boiss. (*Euphorbia arborescens* E. Mey., nom. nud.; *Euphorbia synadenia* Baill., nom. superfl.; *Synadenium arborescens* Boiss.; *Synadenium cupulare* (Boiss.) Wheeler ex A.C. White, R.A. Dyer & B. Sloane)

S. Mozambique to S. Africa.

See *Cent. Euphorb.*: 23. 1860, *Adansonia* 3: 142. 1863 and Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. Kew. 2000 [as *Synadenium cupulare*.] (*Synadenium*, from the Greek *syn* 'with, together, united' and *aden* 'gland', it refers to the united gland enclosing and surrounding the flower.)

(Very poisonous. Leaves for catarrh and chest complaints.)

in South Africa: umDlebe (Zulu)

Euphorbia cyathophora Murray (*Cyathophora ciliata* Raf.; *Cyathophora picta* Raf.; *Euphorbia angustifolia* Lockh. ex G. Don, nom. illeg.; *Euphorbia barbellata* Engelm.; *Euphorbia cyathophora* var. *graminifolia* Chapm.; *Euphorbia cyathophora* var. *graminifolia* (Vill) Chapm.; *Euphorbia graminifolia* Vill; *Euphorbia graminifolia* Michx., nom. illeg.; *Euphorbia havanensis* Willd. ex Boiss.; *Euphorbia heterophylla* L. fo. *cyathophora* (Murray) Voss; *Euphorbia heterophylla* var. *barbellata* (Engelm.) (Whole plant and fruits irritant, purgative, vermifuge, taenifuge, applied for headache. Sap from the branches applied to wounds, sores.)

Euphorbia fusiformis Buch.-Ham. ex D. Don (*Euphorbia acaulis* Roxb.; *Euphorbia humilis* Royle, nom. illeg.)

Himalaya, India, Nepal.

See *Hort. Bengal.* [36]. 1814, *Prodromus Florae Nepalensis* 62. 1825, *Icones Plantarum* 2: 25. 1830, *Flora Indica*; or, descriptions of Indian Plants 2: 472. 1832, *Illustrations of the*

Botany ... of the Himalayan Mountains ... [Royle] 329. 1836 and *Ethnobotany* 16: 52–58. 2004, *Fam. Euphorbiaceae India* 280. 2007

(Latex highly poisonous, used as an arrowhead poison or as a fish poison. Roots and leaves febrifuge. Rootstock, cut and boiled in *lahi* oil and made into a paste, applied externally in the treatment of gout and rheumatic pains; powdered root given to improve digestion and to treat dysentery; fresh root juice mixed with sugar to reduce throat pain, catarrh; root eaten raw to increase lactation. Extract of rootstock with white latex applied on breasts for increasing lactation (Doctrine of Signatures). Veterinary medicine, crushed roots/rhizome given to cattle to increase lactation.)

in India: banmauli, banmuli, buishirid, dudhia kand, dudhyakand, jangli palak, khurkund, kundili chevulugaddalu, palasaepugaddalu

Euphorbia gossypina Pax (*Tirucalia gossypina* (Pax) P.V. Heath)

East Africa.

See *Bot. Jahrb. Syst.* 19: 119. 1894 and *Calyx* 5: 90. 1996

(Fruits and leaves for cough.)

Euphorbia grandicornis Goebel ex N.E. Br. (*Euphorbia grandidens* K.I. Goebel)

Mozambique, South Africa.

See *Species Plantarum* 1: 450–463. 1753, *Hooker's Icones Plantarum* 26: t. 2531, 2532. 1897

(Latex poisonous, vesicant. For stomachache. Veterinary medicine, used for cow parasites.)

in English: rhino thorn

in Swaziland: sinhlonhlwane

Euphorbia grantii Oliv. (*Euphorbia mulemae* Rendle)

East Africa, Tanzania, Rwanda to Zambia. Small shrub or shrubby tree, soft, succulent, white milky latex, branches woody at the base, prominent leaf scars, leaves stalkless, forked inflorescences, ovate bracts, large glands, capsule 3-lobed, young fruit bright red, mature fruit green, globose seed, on stony soils

See *Species Plantarum* 1: 450–463. 1753, *Transactions of the Linnean Society of London, Botany* 29: 144. 1875 and *Journal of the Linnean Society, Botany* 37: 209. 1905

(Roots poisonous, used as an emetic in the treatment of snakebite; roots antiviral, used for snakebite treatment and diarrhea.)

in Tanzania: imambula, imambura, mbunkuya, mbunkwya, mdulansongo, mtula songo, mubunkuya, muranganina, ndulansongo, ndulwa nsongo

Euphorbia granulata Forssk. (*Anisophyllum granulatum* (Forssk.) Schweinf.; *Chamaesyce granulata* (Forssk.) Soják;

Euphorbia turcomanica Boiss.; *Tithymalus granulatus* (Forssk.) Raf.)

Arabia, Pakistan, India, East Africa, SW & C. Asia.

See *Flora Aegyptiaco-Arabica* 94. 1775, *Flora Telluriana* 4: 115. 1838, *Beitrag zur Flora Aethiopiens ...* 34. 1867 and *Mitteilungen der Botanischen Staatssammlung München* 22: 5–20. 1986

(Blood purifier. Latex used as an antidote to scorpion sting.)

in Pakistan: shimsh

Euphorbia griffithii Hook.f. (*Euphorbia bulleyana* Diels; *Euphorbia cyanophylla* Lév.; *Euphorbia erythrocoma* Lév.; *Euphorbia porphyrastra* Handel-Mazzetti; *Euphorbia rubriflora* Lév., nom. illeg.; *Euphorbia sericocarpa* Handel-Mazzetti; *Tithymalus griffithii* (Hook. f.) Hara)

Himalaya, China.

Euphorbia lacei Craib (*Euphorbia barnhartii* Croizat; *Euphorbia trigona* Roxb., nom. illeg.)

India, Indochina.

See *Bull. Misc. Inform. Kew* 1911: 456. 1911

(Juice from heated leaves applied for earache; latex for wounds, ulcers and muscle pain.)

Euphorbia lactea Haw. (*Euphorbia lactea* Roxb., nom. illeg.)

Sri Lanka. Cactus-like, succulent, erect, many-branched, straight trunk, angled branches, short and sharp spines, minute leaves early deciduous, yellowish flowers, milky sticky sap when cut or broken

See *Species Plantarum* 1: 450–463. 1753, *Synopsis plantarum succulentarum* ... 127. 1812, *Fl. Ind.* ed. 1832, 2: 468. 1832 and Crowder, J.I., Sexton, R.R. "Keratoconjunctivitis resulting from the sap of candelabra cactus and the pencil tree." *Archives of Ophthalmology* 72: 476–484. 1964

(The latex, juice or milky sap, of the plant contains an intense irritant that causes intense burning and keratoconjunctivitis when the latex comes in contact with mucous membranes and eyes. Ingestion should be avoided by children and family pets. Stem and branches, after removing of spines, made into a paste and applied on forehead to relieve headache.)

in English: candelabra-cactus

Malay name: pokok sesudu

Euphorbia lancifolia Schldtl. (*Euphorbia lancifolia* var. *villicaulis* Fernald; *Poinsettia lancifolia* Klotzsch & Garcke; *Poinsettia lancifolia* (Schldtl.) Klotzsch & Garcke)

Central America, Guatemala, Belize, Honduras, Mexico. Perennial herb, extremely vigorous, fleshy and succulent, root system with nodules, dark green rhombic-lanceolate leaves, dehiscent seed capsule, sticky milky sap exuding from broken stems and leaves

See *Linnaea* 7: 143–144. 1832, *Monatsber. Königl. Preuss. Akad. Wiss. Berlin* 1859: 253. 1859 and *Proc. Amer. Acad. Arts* 36: 496. 1901, *Fieldiana, Bot.* 24(6): 25–170. 1949

(Leaves, stems, flowers and branches galactagogue, an herbal tea will stimulate lactation and increase the flow of mother's milk in postpartum women. Fresh leaves as a cure for sexual impotence. Veterinary medicine, reputed to increase milk yields in cows when mixed with cattle fodder.)

in Central America: ixbut

in Cuba: isbut

in Guatemala: ixbut, planta lechera, sapillo

in Mexico: hierba de la leche, hierba lechera

Euphorbia lathyris L. (*Epurga lathyris* (L.) Fourr.; *Euphorbia decussata* Salisb.; *Euphorbia lathyris* Georgi, nom. illeg.; *Euphorbia lathyris* var. *minor* Hook. & Arn.; *Euphorbia spongiosa* Ledeb. ex Schrank; *Euphorbion lathyrum* (L.) St.-Lag.; *Galarhoeus decussatus* (Salisb.) Gray; *Galarhoeus lathyris* (L.) Haw.; *Keraselma lathyris* (L.) Raf.; *Tithymalus cataputia* Garsault; *Tithymalus lathyris* (L.) Hill)

C. Asia, Vietnam, Pakistan, China. Biennial, seed oil widely used in industry

See *Species Plantarum* 1: 450–463. 1753, *Plantae Veronenses* 3: 91. 1754, *Hortus Kewensis* 172.3. 1768, *Beschr. Russ. Reich.* 3(4): 993. 1800, *Synopsis plantarum succulentarum* ... 143. 1812, *Autikon Botanikon* 93. 1840 and *Lagascalia* 10: 225–256. 1981, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Acta Phytotaxonomica Sinica* 37(4): 394–402. 1999

(This plant contains irritant toxin in the latex, toxic diterpenes. Humans have been poisoned after ingesting the seed capsules, which resemble capers, a different plant. Goats apparently eat this plant without experiencing great problems, but the toxin can accumulate and can be passed through the milk. Seeds used in dropsy and intoxicating fish, leaves carminative.)

in English: caper spurge, gopher plant, mole plant, myrtle spurge, petroleum plant

in Mexico: piñoncillo

in China: xu sui zi, qian jin zi, lu ju

Euphorbia lugardae (N.E. Br.) Bruyns (*Euphorbia lugardiae* (N.E. Br.) Bruyns; *Monadenium lugardae* N.E. Br.)

Tropical Africa.

See *Species Plantarum* 1: 450–463. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und*

Pflanzengeographie 19: 126. 1894 and *Bulletin of Miscellaneous Information Kew* 1909: 138. 1909, *Taxon* 55: 413. 2006

Hum. Toxicol.*, 32: 368. 1990, *Cytologia* 64: 229–234. 1999

(Poisonous, it has been listed as a known toxic plant that has caused a loss of human life, all parts may be toxic; contact with the sap causes skin irritation, severe itching and burning. The case cited in all literature is based on the death of a child in Hawaii who ingested a leaf of poinsettia. Various studies have not found any of the toxic diterpenes that occur in the latex of other spurges (*Euphorbia* spp.). Whole plant for bronchitis, cough, dysentery, conjunctivitis, to increase lactation and to relieve body pains. Latex applied on wounds.)

in English: Christmas flower, Christmas plant, Christmas star, common poinsettia, eastern flower, lobster plant, Mexican flameleaf, painted leaf, poinsettia, wild poinsettia

in Mexico: bandera, bebeta, beteta, catalina, flor de fuego, flor de nochebuena, flor de Pascua, flor de Pascua del Monte, flor de pascuas, flor de Santa Catarina, paño de Holanda, Santa Catarina, Sta. Catarina

in South America: ajoyò, bandera, bebeta, cardinal, catalina, cuitlaxochitl, flor de fuego, flor de la Pascua, flor de noche buena, flor de nochebuena, flor de Pascua, flor de Pascua del Monte, flor de pascuas, flor de Santa Catarina, guie rini, guie tiini, gule-tiini, lipa-que-pojua, manhãs de Páscoa, noche buena, papagallo, pascua, pastora, pastores, pastushtln, poinsettia, poscuaxuchitl, Sta. Catarina, uanipeni

in Bali: bungan racun (racun = poison)

in India: lalpatti

in Indonesia: kastuba

in Japan: shôjô-boku

Malay name: poinsetia

in Philippines: pascuas, rosas de pascua

Euphorbia pulvinata Marloth

South Africa.

See *Transactions of the Royal Society of South Africa* 1: 315. 1909

(To relieve stomachache.)

in English: prickle-leaved euphorbia

in Swaziland: sihlohlwana

Highly unsaturated irritant diterpene esters from *Euphorbia tirucalli* originating from Madagascar.” *J. Nat. Prod. (Lloydia)* 49: 386–397. 1986, *Calyx* 5: 93. 1996

(Used in Ayurveda, Unani and Sidha. Highly toxic, can be poisonous, the plant contains caustic and irritant chemicals in the latex which cause reactions with the skin, mucous membranes and the eyes; latex causes keratoconjunctivitis if it gets into the eyes. Severe burning and inflammation result after the latex comes into contact with the skin. Ingestion causes burning and irritation of the mouth and stomach. The juice of the young branches, roasted and chewed, a remedy for sore throats and stomach complaints. Latex applied to warts, rheumatism, earache and toothache; whole plant and latex for wounds and external swellings. Boiled root solution an emetic in cases of snakebite. Roots burned and boiled to treat convulsions. Fruit for sexual impotence. Veterinary medicine, plant decoction given for cough; latex applied to kill maggots of wound. Small branches used as fish poison. Milky latex used as an arrow-head poison.)

Macbr.; *Roupala pinnata* Lam.)

South America.

See *Encyclopédie Méthodique, Botanique* 1: 243. 1791, *Flora* 1: 163, t. 97. 1798, *On the cultivation of the plants belonging to the natural order of Proteaceae* 101. 1809, *Transactions of the Linnean Society of London* 10(1): 193. 1810, *Prodr.* (DC.) 14(1): 433. 1856 and *Contributions from the Gray Herbarium of Harvard University* 73: 42. 1924, *Publications of the Field Museum of Natural History, Botanical Series* 13(2/2): 374. 1937, *Proceedings of the Royal Society of Queensland* 60: 43. 1950

(Crushed leaves applied to contusions; crushed powdered leaves to dry up ulcers.)

Eurya Thunb. Theaceae (Pentaphylacaceae)

From the Greek *eury*s 'large, broad', possibly referring to the petals and sepals, see *Nova Genera Plantarum* 3: 67–68. 1783, *Species Plantarum*. Editio quarta 2(2): 1179. 1799, *Annals of Botany* 2: 73. 1805, *Theoria Systematis Plantarum* 51. 1858, *Die Natürlichen Pflanzenfamilien* 3(6): 190. 1893, *Bulletin de la Société Botanique de France* 42: 156. 1895

and *Die natürlichen Pflanzenfamilien*, Zweite Auflage 21: 148. 1925.

Eurya acuminata DC. (*Eurya acuminata* var. *multiflora* (DC.) Blume; *Eurya acuminata* var. *wallichiana* (Steud.) Dyer; *Eurya euprista* Korth.; *Eurya japonica* auct., non Thunb.; *Eurya japonica* var. *phyllanthoides* (Blume) Dyer; *Eurya monticola* Ridley; *Eurya multiflora* DC.; *Eurya phyllanthoides* Blume; *Eurya wallichiana* Steud.; *Eurya wrayi* King)

Nepal, Sri Lanka. Shrub or tree, dioecious or monoecious, unpleasant pungent odour, small white flowers in flowered axillary fascicles unisexual, glabrous globose blue-black fruit, found in open places

See *Nova Genera Plantarum* 3: 67. 1783, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 1: 418. 1822

(Leaves chewed to prevent cough; raw leaves eaten for stomachache, cholera, dysentery. Crushed young leaves with salt used as a remedy for cholera, dysentery and stomach disorders, for poulticing skin eruptions; juice of leaves for skin diseases. Fruits for stomach disorders and to promote digestion.)

in English: acuminate eurya

in India: alomeset, arruttuvarai, attathuvarei, bakryal, deura, dieng lapyrshit, dieng pyrshit, dieng pyrshiteh, dieng shit, mesen, murmura, pyrshitlum, saseni, sihneh

in Indonesia: ki sapu, lingsangan, sala

in Laos: txiv ntoo teb nple

in Malaysia: beberas, beras beras, betutu, cheremal burong, jerak merah, jerok merah, jerok puteh, jirak, kelantang, kelanting, medang melukut jantan, mempadi, meribut, pagar anak, petutu, renek daun, tirak

in Nepal: jhingane, tegar

in Papua New Guinea: yeika

in Thailand: plaisan, rangkai

Eurya cavinervis Vesque (*Eurya cavinervis* fo. *laevis* Hung T. Chang; *Eurya fangii* Rehder var. *glaberrima* P.S. Hsu; *Eurya handeliana* Kobuski)

India, China. Shrub, variable, white flowers with an unpleasant odour, globose berries

See *Journal of the Arnold Arboretum* 11(3): 165. 1930, *Annals of the Missouri Botanical Garden* 25: 309. 1937, *Acta Phytotaxonomica Sinica* 3(1): 49–50. 1954, *Acta Phytotaxonomica Sinica* 9(1): 93–94. 1964

(Fruits for stomach disorders and to promote digestion.)

in English: wild tea

in India: jhngni, jhingoni, tungchung

Eurya nitida Korth. (*Eurya aurescens* (Rehder & E.H. Wilson) Hand.-Mazz.; *Eurya hayatae* Yamam.; *Eurya*

japonica subsp. *nitida* (Korth.) T. Yamaz.; *Eurya japonica* Thunb. var. *aurescens* Rehder & E.H. Wilson; *Eurya japonica* var. *nitida* (Korth.) Dyer; *Eurya japonica* var. *thunbergii* Thwaites; *Eurya nitida* Hieron.; *Eurya nitida* var. *aurescens* (Rehder & E.H. Wilson) Kobuski; *Eurya nitida* var. *nangshanensis* C.F. Hsieh, L.K. Ling & S.Z. Yang; *Rapanea aurea* H. Lévl.)

China. Shrub

See *Histoire des plantes de la Guiane Française* 1: 121, pl. 46. 1775, *Nova Genera Plantarum* 68. 1783, *Verhandeligen over de Natuurlijke Geschiedenis der ...* 3: 115, pl. 17. 1840, *Enumeratio Plantarum Zeylaniae* 41. 1864, *The Flora of British India* 1(2): 284. 1874 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(257–259): 376. 1912, *Plantae Wilsonianae* 2(2): 399. 1915, *Symbolae Sinicae* 7(2): 400. 1931, *Journal of the Society of Tropical Agriculture* 5: 348. 1933, *Annals of the Missouri Botanical Garden* 25: 314. 1937, *Journal of Japanese Botany* 70(5): 271. 1995, *Flora of Taiwan* (Second edition) 2: 682. 1996, *Flora Yunnanica* 8: 371. 1997

(Leaves decoction to reduce swelling from sores. Fresh root, turmeric powder and *Tamarindus indica* seed powder made into a paste applied on skin boils. Dried root, black pepper and *Ferula asafoetida* decoction made into a paste applied against muscular pain.)

in China: xi chi ye ling

in India: hulayane, hulumi, huluni, jhingoni, koora mar

Euryale Salisb. Nymphaeaceae (Euryalaceae)

Named after one of the three Gorgons, referring to the thorny nature of the plants, see *Annals of Botany* [Koenig & Sims]. 2(1): 70, 73–74, 78. 1805 and *Komarov Lectures*. 20: 47–61. 1973, *J. Jap. Bot.* 56: 367–375. 1981, *Acta Phytotax. Sin.* 32(4): 293–300. 1994.

Euryale ferox Salisb. ex K.D. Koenig & Sims (*Euryale ferox* Salisb.)

China, India. Densely prickly herbs, shallow and deep waters, corrugated leaves densely spiny below, violet or bluish submerged flowers, densely spinous fruits with persistent sepals; rhizomes and fruits edible

See *Ann. Bot.* [Koenig & Sims]. 2(1): 74. 1805

(Seeds astringent, cooling, tonic, deobstruent, used in dysmenorrhea, spermatorrhea. Leaves tonic, astringent, in rheumatism and dysentery. Flowers tonic, aphrodisiac, astringent, in dysentery, diarrhea. Ritual, ceremonial, Hindus consider it a sacred plant.)

in English: foxnut, Gordon euryale, old hen's head, prickly water lily

in China: ch'ien, chien shih, qian shi

in India: juwar, makhana, nikari

in Nepal: makhana

Eurybia (Cass.) Cass. Asteraceae

From the Greek *eurybies*, *eurybia*, *eurybias* 'mighty far and wide, wide-spreading', see *Dictionnaire des Sciences Naturelles* [Second edition] 16: 46. 1820.

Eurybia conspicua (Lindl.) G.L. Nesom (*Aster conspicuus* Lindl.)

North America. Perennial herb, erect, creeping rhizome, open round-topped inflorescence, ray flowers blue to violet, disk flowers yellow

See *Flora Boreali-Americana* 2(7): 7. 1834 and *Phytologia* 77(3): 259. 1994[1995]

(Roots antibacterial, a wash for sores, hemorrhoids, boils, wounds and infections, applied to the tooth for toothaches, drunk for gonorrhea; poultice of leaves applied to boils, hemorrhoids. Veterinary medicine, roots used for cuts with maggots on horses.)

in English: showy aster, western showy aster

Eurybia furcata (E.S. Burgess) G.L. Nesom (*Aster furcatus* E.S. Burgess)

North America. Perennial, corollas cream or light yellow becoming purple, endangered or threatened

See *An Illustrated Flora of the Northern United States* 3: 358, f. 3738. 1898 and *Phytologia* 77(3): 259. 1994[1995]

(Analgesic, infusion of leaves rubbed on head for headache.)

in English: forked aster, midwestern white heart-leaf aster

Eurybia macrophylla (L.) Cass. (*Aster ianthinus* E.S. Burgess; *Aster macrophyllus* L.; *Aster macrophyllus* var. *apricensis* E.S. Burgess; *Aster macrophyllus* var. *excelsior* E.S. Burgess; *Aster macrophyllus* var. *ianthinus* (E.S. Burgess) Fernald; *Aster macrophyllus* var. *pinguifolius* E.S. Burgess; *Aster macrophyllus* var. *sejunctus* E.S. Burgess; *Aster macrophyllus* var. *velutinus* E.S. Burgess; *Aster multiformis* E.S. Burgess; *Aster nobilis* E.S. Burgess; *Aster riciniatus* E.S. Burgess; *Aster roscidus* E. S. Burgess; *Aster violaris* E.S. Burgess; *Biotia latifolia* DC.; *Biotia macrophylla* (L.) DC.; *Biotia macrophyllus* (L.) DC.; *Eurybia jussiei* Cass.)

North America. Perennial, very large soft thick heart-shaped leaves, small flat-topped flowering clusters, lavender to purple to pale blue to nearly white ray florets, yellowish disk florets reddish in a mature flower, a widespread ground cover

See *Species Plantarum*, Editio Secunda 2: 1232. 1763, *Dictionnaire des Sciences Naturelles* [Second edition] 37: 487. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 265. 1836, *An Illustrated Flora of the Northern United*

States 3: 360. 1898 and *Fl. Southington* 99. 1902, *Flora of the Southeastern United States* 1212, 1339. 1903

(Roots decoction laxative, for venereal diseases; roots infusion for headache. Magic, ritual, a charm in hunting.)

in English: big-leaf aster, bigleaf aster, large-leaf aster, lumberjack toilet paper

Eurycoma Jack Simaroubaceae

From the Greek *eurys* 'large, broad' and *kome* 'hair', referring to the tufts of the flowers, see *Malayan Miscellanies* 2(7): 44–45. 1822.

Eurycoma apiculata A.W. Bennett

Malaysia, Sumatra. A small tree, petals linear, in primary and secondary forest

See *The Flora of British India* [J.D. Hooker] 1: 522. 1875

(Powdered roots, male aphrodisiac, febrifuge, tonic, anti-malaria, antiulcer, anxiolytic; roots decoction febrifuge, a remedy for intermittent fevers. Leaves or bark decoction a remedy for malaria.)

in Cambodia: antong sar, antoung sar

in Indonesia: akar jangat semang, babi kurus, bedara merah, beseng, bidara laut, bidara pahit, bina, gagaten harimau, kayu petimah, kebel, mempalel, mempel, pasak bumi, tongkat ali, tongkat baginda, tungkei ali, tunkat ali, tunket ali

in Laos: tho nan

in Malaysia: bedara merah, bedara pahit, bedara putih, payong Ali (= the Prophet's umbrella), penawa pahit (= bitter antidote), penawar pahit, juak, tongkat Ali, tongkat baginda, tungkat ali

in Thailand: hae phan chan, phiak, plaa-lai-phuek, plaalai phuenk

in Vietnam: c[aa]y b[as] b[eej]nh

Eurycoma longifolia Jack

SE Asia, Myanmar. Small tree or shrub, spindly, slender, twigs stout with prominent leaf scars, crowded whorl of compound leaves at ends of twigs, umbrella-like rosette of leaves, reddish brown petioles and young shoots, reddish regular unisexual flowers in large panicles hanging below the leaves, thin-fleshed yellowish-purple to red fruits, lowland forest, primary and secondary forest, on sandy soil

See *Malayan Miscellanies* 2(7): 44–45. 1822

(Powdered roots, male aphrodisiac, febrifuge, tonic, anti-malaria, antiulcer, anxiolytic, expectorant; roots decoction as a rubefacient to treat backache; root decoction drunk as aphrodisiac; crushed roots bitter infusion drunk to treat fever, stomachache, impotence, hypertension; a decoction of the root a febrifuge, a remedy for intermittent fevers,

a postpartum remedy; root bark febrifuge. Wounds and ulcers, scrape the bark and poultice with it. A decoction of the leaves, sometimes together with those of *Psychotria malayana*, taken as a remedy for fevers; leaves or bark decoction a remedy for malaria. Veterinary medicine, heated leaves rubbed to kill lice. Magic, bracelets from the roots worn for protection.)

in English: Ali's umbrella

in Borneo: sengkayap

in Cambodia: antong sar, antoung sar

in Indonesia: akar jangat semang, atiu kenyah, babi kurus, bedara merah, beseng, bidara laut, bidara pahit, bidara pait, bina, gagaten harimau, kayu petimah, kebel, mempalel, mempel, pasak bumi, tongkat ali, tongkat baginda, tungkei ali, tunkat ali, tunket ali

in Laos: tho nan

in Malaysia: bedara merah, bedara pahit, bedara putih, bidara pahit, bidara pait, jelas, juak, muntah bumi, payong Ali (= the Prophet's umbrella), penawa pahit (= bitter antidote), penawar pahit, penawar puteh, petala bumi, tongkat Ali, tongkat baginda, tukar Ali, tungkat Ali

in Thailand: cha-naang(trat), hae phan chan, hae phan chan, ian don, kha naang, krung baadaan, lai phueak, phiak, plaa-lai-phueak, plaa-lai-phuek, plaalai phuenk, trueng baadaan, tu wu boh ming, tung so, tuu wu wo ming, yik bo thong, yik mai thueng

in Vietnam: c[aa]y b[as] b[eej]nh

Euryops (Cass.) Cass. Asteraceae

Possibly from the Greek *eurys* 'large, broad' and *ops*, *opos* (*opsomai*, *opsis*) 'aspect, resemblance, appearance, sight, the eye', referring to the flowers or to the leaves; see A.H.G. de Cassini, in *Bull. Sci. Soc. Philom. Paris*. 140. 1818, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 353. Ansbach 1852.

Euryops arabicus Steud. ex Jaub. & Spach

Saudi Arabia. Shrub

(Heated leaves and stem sap to heal wounds.)

in Arabic: jubar, yubar

Eusideroxylon Teijsm. & Binnend. Lauraceae

From the Greek *eu* 'fine, good', *sideros* 'iron' and *xylon* 'wood', referring to the hard timber, see *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 25: 280–294. 1863.

Eusideroxylon zwageri Teijsm. & Binnend.

Borneo.

See *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 25: 280–294. 1863

in English: Bornean ironwood, Borneo ironwood

in Sarawak: belian, billian

(Roots boiled together with the roots of *Koompassia excelsa* and *Agelaea macrophylla* and the solution drunk to treat weakness in infants.)

Eustachys Desvaux Poaceae (Gramineae)

From the Greek *eu* ‘fine, good’ and *stachys* ‘a spike’, referring to the beauty of the spikes and dark brown lemmas; sometimes included in and barely separable from *Chloris* Sw., see *Nova Genera et Species Plantarum seu Prodrum* 1, 25. 1788, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188–189. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 17. 1815, *Conspectus Regni Vegetabilis* 4. 1828, *Index Seminum [St. Petersburg]* 28. 1863, *The Genera of Plants* 33. 1866 and *Flora de la Provincia de Buenos Aires* 4(2): 1–624. 1970, *Flora Illustrada Catarinense* 1(Gram.): 1–435. 1981, *Annals of the Missouri Botanical Garden* 77(1): 125–201. 1990, *Flora Mesoamericana* 6: 288–289. 1994, A.M. Molina, “Revisión taxonómica del género *Eustachys* Desv. (Poaceae: Chloridoideae, Cynodonteae) de Sudamérica.” *Candollea* 51(1): 225–272. 1996, *Fontqueria* 46: [i-ii], 1–259. 1997, *Gramíneas de Bolivia* 353–355. 1998, *Contributions from the United States National Herbarium* 41: 39–52, 117–118, 222–223. 2001, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, “Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications.” *Botanical Journal of the Linnean Society* 148(1): 57–72. May 2005.

Eustachys distichophylla (Lagasca) Nees (*Chloris acuminata* Trin.; *Chloris argentina* (Hack.) Lillo & Parodi; *Chloris argentinensis* (Hack.) Lillo & Parodi, nom. illeg., non *Chloris argentina* (Hack.) Lillo & Parodi; *Chloris confertifolia* Trin.; *Chloris distichophylla* Lag.; *Chloris distichophylla* var. *acuminata* (Trin.) Hack.; *Chloris distichophylla* var. *argentina* Hack.; *Chloris distichophylla* var. *argentina* Hack. ex Stuck.; *Chloris distichophylla* var. *genuina* Hack.; *Chloris dolichostachya* Lag.; *Chloris fasciculata* Schrad. ex Schult.; *Chloris paytensis* Steud., named for Payta, Peru; *Enteropogon dolichostachyus* (Lag.) Keng ex Lazarides; *Enteropogon dolichostachyus* (Lag.) Keng; *Eustachys argentina* (Hack.) Herter, nom. illeg., non *Eustachys argentinensis* (Hack.) Herter; *Eustachys argentinensis* (Hack.) Herter; *Eustachys confertifolia* (Trin.) Kunth; *Paspalum superbum* Spreng.) (from the Latin *distichus* ‘consisting of two rows’, Greek *distichos* ‘in two rows, in two ranks’ and *phyllon* ‘leaf’)

Peru, Chile, Argentina, Brazil, Paraguay. Perennial bunchgrass, herbaceous, rhizomatous, simple, erect, purplish at the base, tufted, ligule membranous, leaves loose and often scabrous, inflorescence digitate, cultivated, fodder, ornamental, sometimes a weedy escape, disturbed areas

See *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Genera et species plantarum* 4. 1816, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 74. 1821, *Mantissa* 2: 339. 1824, *Systema Vegetabilium, editio decima sexta* 1: 248. 1825, *Species Graminum* 1828–1836, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 418. 1829, *Révision des Graminées* 1: 88. 1829, *Synopsis Plantarum Glumacearum* 1: 207. 1854 and *Bulletin de l’Herbier Boissier, sér. 2, 4*: 279. 1903, *Anales del Museo Nacional de Buenos Aires* 11: 113. 1904, *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 4: 180. 1918, *Revista de la Facultad de Agronomía y Veterinaria* 2: 283. 1919, *Revista Sudamericana de Botánica* 6(5–6): 146. 1940, *Estudios Botánicos en la Región Uruguaya* 1: 86, f. 341. 1941, *Revista Sudamericana de Botánica* 7(6–8): 196. 1943, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 197. 1957, *Fl. Ill. Pl. Prim. Sin. Gramin.* 471. 1959, *Australian Journal of Botany, Supplementary Series* 5: 1–51. 1972, *Brigham Young University Science Bulletin: Biological Series* 19(2): 1–133. 1974, *J. Cytol. Genet.* 20: 205–206. 1985

(Possibly poisonous. Fruits diuretic and leaves febrifuge.)

in English: evergreen chloris, weeping finger grass

in Bolivia: penacho

in Brazil: capim batatal, capim cebola, cocorobó, graminha de araraquara, pasto plumero, pasto borla, pé de galinha

Eustoma Salisb. Gentianaceae

From the Greek *eu* ‘well, fine’ and *stoma* ‘a mouth’, *eustomos* ‘with large mouth’, referring to the showy flowers.

Eustoma exaltatum (L.) Griseb. (*Chlora exaltata* (L.) Griseb.; *Eustoma exaltatum* (L.) Salisb. ex G. Don; *Eustoma exaltatum* (L.) Salisb.; *Gentiana exaltata* L.; *Lisianthus exaltatus* (L.) Lam.)

West Indies.

See *Species Plantarum, Editio Secunda* 1: 331. 1762, *Tableau Encyclopédique et Méthodique... Botanique* 1: 478. 1791, *The Paradisus Londinensis* sub pl. 34. 1805[1806], *A General History of the Dichlamydeous Plants* 4: 211. 1837, *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 118–119. 1839[1838], *Prodrum Systematis Naturalis Regni Vegetabilis* 9: 51. 1845

(Leaves for an eye bath.)

Euterpe Martius Arecaceae (Palmae)

Named after one of the nine Muses, Euterpe was the muse of the lyric poetry, the muse of music, Greek *euterpes* ‘delightful, charming’, *Euterpe* ‘the Well-pleasing’, referring to the habit; see *De Fructibus et Seminibus Plantarum...* 1:

24, t. 9. 1788, *Historia Naturalis Palmarum* 2: 28–31. 1823 and *Pomona College Journal of Economic Botany and Subtropical Horticulture* 2: 352. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 63: 50–51. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14: 328. 1939, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(1/2): 321–418., A. Henderson & G. Galeano, “*Euterpe*, *Prestoea*, and *Neonicholsonia* (Palmae: Euterpeineae).” *Flora Neotropica*. Volume 72. The New York Botanical Garden, New York 1996, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2005, *Kew Bulletin* 60(4): 562. 2005, Lorenzi, H., Noblick, L.R., Kahn, F. & Ferreira, E. *Brazilian Flora Areaceae (Palms)*. Instituto Plantarum de Estudos da Flora LTDA, São Paulo, Brazil. 2010.

Euterpe oleracea Mart. (*Catis martiana* O.F. Cook, nom. nud.; *Euterpe badiocarpa* Barb. Rodr.; *Euterpe beardii* L.H. Bailey; *Euterpe brasiliensis* Oken; *Euterpe cuatrecasana* Dugand; *Euterpe oleracea* Engel, nom. nud.)

Trinidad to S. Trop. America.

See *Hist. Nat. Palm.* 2: 29–31, tt. 28–30. 1823, *Linnaea* 33: 671. 1865 and *Contr. Jard. Bot. Rio de Janeiro* 1: 12. 1901, *Bull. Torrey Bot. Club* 28: 557. 1901, *Sert. palm. brasil.* 1: t. 36b. 1903, *Gentes Herb.* 7: 426, t. 196–198. 1947, *Revista Acad. Colomb. Ci. Exact.* 8: 393. 1951

in English: assai palm

in Brazil: açai-do-baixo Amazonas, açai-do-Pará, açaizeiro, palmitero, palmito açai, uçaí

in Venezuela: assai, manaca, moru, palmito, wahu

Euterpe precatória Mart. (*Euterpe andicola* Brongn. ex Mart.; *Euterpe confertiflora* L.H. Bailey; *Euterpe haenkeana* Brongn. ex Mart.; *Euterpe jatapuensis* Barb. (Fruits antioxidant and antiinflammatory, used traditionally to treat inflammatory processes.)

in Bolivia: asaí

in Brazil: açai, açai da mata, açai-do-alto Amazonas, açai mirim, guaçai, juçara, palmito mole

Vernacular names: manacáy, manáco

Eutrochium Raf. Asteraceae

Greek *eu* ‘well, fine’ and *trochos* ‘a wheel, a round ball, any thing round or circular’, *trochiskos* ‘a small wheel’, see *New Flora and Botany of North America ...* 4: 78. 1836[1838] and *Phytologia* 19(7): 431–432. 1970.

Eutrochium maculatum (L.) E.E. Lamont (*Eupatoriadelphus maculatus* (L.) R.M. King & H. Rob.; *Eupatorium maculatum* L.; *Eupatorium purpureum* L. subsp. *maculatum* (L.) Á. Löve & D. Löve; *Eupatorium purpureum* var. *maculatum* (L.) Darl.; *Eupatorium trifoliatum* var. *maculatum* (L.) Farw.)

North America. Perennial, sturdy purple-spotted stem, long lanceolate and sharply toothed leaves whorled, flat cluster of pink-purple flowers

See *Species Plantarum* 2: 838. 1753, *Centuria I. Plantarum ...* 27. 1755, *New Flora and Botany of North America ...* 4: 78. 1836[1838], *Florula Cestrica* 453. 1837 and *Annual Report of the Michigan Academy of Science* 20: 191. 1919, *Phytologia* 19(7): 432. 1970, *Taxon* 29: 707–709. 1980, *Taxon* 30: 515–516. 1981, *Taxon* 31(2): 357. 1982, *Naturaliste Canad.* 114: 105–116. 1987, *Pl. Syst. Evol.* 170: 215–228. 1990, *Sida* 21(2): 902. 2004

(Diuretic, postpartum remedy, tonic, astringent, carminative, used for urinary tract health, kidney trouble, menstrual disorders, gonorrhea, venereal diseases, dropsy, gout, rheumatism, joint inflammations, impotence, consumption, asthma, colds, fever, chills, diarrhea. Whole plant infusion as a diuretic. Root infusion to treat fevers, rheumatism, colds,

diarrhea, liver and kidney ailments. Magico-religious beliefs, ritual, anti-love medicine.)

in English: Joe-pye weed, purple boneset, smoke-weed, spotted Joe-pye weed, tall boneset, trumpet weed

Eutrochium maculatum (L.) E.E. Lamont var. *maculatum*

North America. Perennial

See *Species Plantarum* 2: 838. 1753, *Centuria I. Plantarum* ... 27. 1755, *New Flora and Botany of North America* ... 4: 78. 1836[1838], *Florula Cestricea* 453. 1837 and *Annual Report of the Michigan Academy of Science* 20: 191. 1919, *Phytologia* 19(7): 432. 1970, *Taxon* 29: 707–709. 1980, *Taxon* 30: 515–516. 1981, *Taxon* 31(2): 357. 1982, *Naturaliste Canad.* 114: 105–116. 1987, *Pl. Syst. Evol.* 170: 215–228. 1990, *Sida* 21(2): 902. 2004

(Diuretic, postpartum remedy, tonic, astringent, carminative, used for urinary tract health, kidney trouble, menstrual disorders, gonorrhoea, venereal diseases, dropsy, gout, rheumatism, joint inflammations, impotence, consumption, asthma, colds, fever, chills, diarrhea. Magico-religious beliefs, ritual, anti-love medicine.)

in English: Joe-pye weed, purple boneset, smoke-weed, spotted Joe-pye weed, tall boneset, trumpet weed

Eutrochium purpureum (L.) E.E. Lamont (*Cunigunda purpurea* (L.) Lunell; *Cunigunda purpurea* Lunell; *Eupatoriadelphus purpureus* (L.) King & H. Rob.; *Eupatorium falcatum* Michx.; *Eupatorium purpureum* L.; *Eupatorium purpureum* Lour.; *Eupatorium purpureum* Michx., nom. illeg.; *Eupatorium purpureum* L. var. *amoenum* (Pursh) A. Gray; *Eupatorium trifoliatum* L.)

North America. Perennial herb

See *Species Plantarum* 2: 838. 1753, *Flora Cochinchinensis* 487. 1790, *Flora Boreali-Americana* 2: 99. 1803, *Flora Pyrenaea* ... 2: 273. 1899 and *American Midland Naturalist* 5(2): 35. 1917, *Phytologia* 19(7): 432. 1970, *Ann. (Used in Ayurveda. Whole plant paste applied over cuts to stop bleeding; a decoction general tonic, powerful stimulant to the brain, given to cure dysentery, intestinal worms, cough in children, stomachache and fevers, smoked in asthma; a paste applied in toothache; whole plant powder given in nervous disorders, loss of memory. Roots for fever, typhoid, scorpion sting, gastric and duodenal ulcers; roots crushed and powdered and the powder taken orally along with sugar as an aphrodisiac; infusion of root, stalk and leaves used as stomachic, anthelmintic. Fruits and leaves for skin infections and venereal diseases. Leaves for asthma and bronchitis; dried leaf powder and leaf powder of *Indigofera linnaei*, mixed with cumin and milk, given orally as an aphrodisiac; leaf juice applied externally to cure ulcers. Plant burnt in rooms to repel mosquitoes. Ceremonial, ritual, sacred plant, ingredient of Patra pooja in different religious pooja ceremonies. Veterinary medicine, leaf paste mixed with turmeric applied in boils, blisters, ulcers and wounds.)

Trop. and Subtrop. Asia, Pacific. Shrub or small tree, dioecious, bushy, white milky sap, leathery simple alternate leaves, staminate flowers in very dense yellowish green racemes, tiny fragrant blossoms, fruit a small triangular capsule, growing in sand, coastal areas, edge of beach, near mangrove swamps

See *Systema Naturae*, Editio Decima 2: 1288. 1759, *Fl. Cochinch.*: 606. 1790, *Species Plantarum*. Editio quarta [Willdenow] 4(2): 864. 1806, *Prodr. Fl. Norfolk.*: 83. 1833, *Prodromus* (DC.) 15(2.2): 1161, 1221. 1866 and *Pflanzenr.*, (Engler) Euphorb.-Hippom. IV, 147, V: 167. 1912, *J. Econ. Taxon. Bot.* 19: 571–575. 1995, *Fl. Reipubl. Pop. Sin.* 44(3): 9, pl. 24 fig. 3–5. 1997, *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* no. 34: 141–144. 2001

(Milky sap very poisonous, all parts of the plant poisonous when ingested. Latex toxic, extremely irritant, acrid and caustic, harmful to eyes, a severe eye irritant; on the skin, severe burning, inflammation, blistering and permanent damage are

to be expected; even the smoke of burning wood is caustic and can cause severe irritation to the eyes. A poison antidote, stem sap swallowed to induce vomiting in cases of food poisoning; bark sap used for constipation, stomachache, to treat bad pains caused by the stings of poisonous fish; bark chewed as a purgative. Leaves decoction given in epilepsy and ulcers. Latex boiled in oil used externally for treatment of ulcers, wounds, rheumatism, leprosy and paralysis. Latex used as an anthelmintic, drastic purgative and abortifacient; applied for ingworm, scabies and eczema. Root paste smeared over the affected area to reduce swellings. Crushed plants a fish poison, arrow or dart poison.)

in English: blind-your-eye mangrove, blind-your-eyes, blind-your-eyes mangrove, blinding tree, blinding tree of Ceylon, milky mangrove, poison mangrove, river poison tree

in Burma (Myanmar): kayaw taway

in India: gangu, geneo, gengwa, geo-gheria, goma, guan

in Indonesia: kayu betah, kayu buta-butua, menengan

in Japan: metubushi-no-ki, miishi-kuki, Okinawa-jinkô, shima-shiraki, shimashiraki

Malayan names: bebuta, buta-butua (buta means blindness), bomo, dari, kajoe mata boeta, pohon

in Papua New Guinea: sisimet, sismet, su, te'eria

in Philippines: buta-butua, lipata

in Sabah: buta-butua

in Thailand: bu-to, buu-to, ta-thum-tha-le, tatum, tatum thale

in Vietnam: gi[as], tr[af] m[ur]

in Pacific: bat, bat'nigak'iy, butabuta, fetanu, ketomatskera, mbanal, sinu dina, sinugaga, sismet, su, urbanal

Excoecaria bantamensis Müll.Arg. (*Excoecaria macrophylla* J.J. Smith; *Excoecaria macrophylla* J.J. Sm. ex Koord. & Valetton; *Excoecaria oppositifolia* Griff. var. *crenulata* auct. non Chakrab. & M.G. Gangop.)

Borneo, the Philippines and Java. Tree

See *Linnaea* 32: 124. 1863 and *Meded. Dept. Landb. Ned.-Indië* 10: 611. 1910, *Kew Bull.* 26: 269. 1972, *J. Econ. Taxon. Bot.* 18: 208. 1994, *Thai For. Bull.* 28: 79. 2000, *Fl. Thailand* 8, 1: 293. 2005

(Irritating latex.)

in Thailand: ko-ka-pue, tatum pa

Excoecaria benthamiana Hemsl. (*Excoecaria densiflora* (Baker) Pax; *Excoecaria densiflora* Pax; *Stillingia lineata* (Lam.) Müll.Arg.; *Stillingia lineata* Müll.Arg.; *Stillingia lineata* var. *densiflora* Baker)

Seychelles.

See *Prodr.* (DC.) 15(2.2): 1157. 1866, *Fl. Mauritius* 314. 1877 and *Hooker's Icon. Pl.* 28: t. 2741. 1901, *Pflanzenr.*, (Engler)

Euphorb.-Hippom. IV, 147, V: 162. 1912, *The Journal of Ecology* 28(2): 465–483. 1940

(The latex is a powerful vesicant and is applied externally to warts.)

in Seychelles: bois charlot, bois jasmin rouge, bwa zasmín

Excoecaria borneensis Pax & Hoffm. (*Excoecaria mirandae* Merr.)

Borneo, Philippines, Sulawesi.

See *Pflanzenr.*, IV, 147, VII: 422. 1914, *Philipp. J. Sci.* 16: 576. 1920

(Leaves heated over a fire and applied as a poultice to relieve rheumatism. Leaves poisonous to cattle.)

Excoecaria bussei (Pax) Pax (*Excoecaria sambesica* Pax & K. Hoffm.; *Sapium bussei* Pax)

Kenya. Shrub or tree, multistemmed, white milky latex, leaves alternate with wavy margins, flowers green, lax catkin-like terminal shortly pedunculate inflorescences, globose inflated red-orange fruit, cattle do not browse the plant

See *Enumeratio Systematica Plantarum* 9, 31. 1760 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 284–285. 1903, *Pflanzenr.*, IV, 147, V: 169–170. 1912

(Said to be poisonous, white poisonous latex. Most people consider the seeds poisonous. Sap on skin is bad, and in the eye can cause blindness. If eating the honey you can get a problem with the throat. A root decoction taken as an emetic.)

in East Africa: katongotongo, msejere, msejeze, mtheitheie, muana, mumpobompobo

in Tanzania: mufeghefeghe, mujejejeje

Excoecaria cochinchinensis Lour. (*Antidesma bicolor* Hassk.; *Excoecaria bicolor* (Hassk.) Zoll. ex Hassk.; *Excoecaria bicolor* var. *orientalis* (Pax & K. Hoffm.) Gagnep.; *Excoecaria bicolor* var. *purpurascens* Pax & K. Hoffm.; *Excoecaria bicolor* var. *viridis* Pax & K. Hoffm.; *Excoecaria cochinchinensis* var. *viridis* (Pax & K. Hoffm.) Merr.; *Excoecaria orientalis* Pax & K. Hoffm.; *Excoecaria quadrangularis* Müll.Arg.; *Sapium cochinchinense* (Lour.) Kuntze)

S. China to Pen. Malaysia. Shrub, monoecious, fruits green, sometimes confused with *Triadica cochinchinensis* Lour.

See *Flora Cochinchinensis* 2: 612. 1790, *Cat. Hort. Bot. Bogor.*: 81. 1844, *Retzia* 1: 158. 1855, *Linnaea* 32: 124. 1863, *Revis. Gen. Pl.* 3(2): 293. 1898 and *Philipp. J. Sci.* 15: 244. 1919, *Cytologia* 64: 229–234. 1999

(Toxic, latex is said to be poisonous, it irritates the skin and mucous membranes. Uterotonic. A decoction of roasted leaves a remedy for urticaria and *Herpes zoster*; leaves with a blood red colour underneath, externally applied to arrest bleeding. Latex as a fish poison.)

in Indonesia: daun remek daging, daun sambang darah

in Japan: sei-shi-boku

in Thailand: bai thong daeng, ka buea, kamlang krabue, krabue chet tua, krabue jed tua, lin krabue, lin krabue khao, tatum kai, tatum nok

in Vietnam: d[ow]n t[is]a, d[ow]n l[as] d[or], m[aw]jt qu[ir]

Excoecaria dallachyana (Baill.) Benth. (*Excoecaria agalocha* var. *dallachyana* Baill.; *Excoecaria dallachyana* f. *tenuispica* Domin)

Australia.

See *Adansonia* 6: 324. 1866, *Flora Australiensis: a description ...* 6: 153. 1873 and *Biblioth. Bot.* 89: 338. 1927

(Milky sap irritant to the skin, very dangerous to the eyes.)

in English: brown birch, bush poison tree, scrub poison tree

Excoecaria grahamii Stapf (*Sapium grahamii* (Stapf) Prain; *Sapium grahamii* Prain)

W. Trop. Africa. Shrub, erect, suffrutex, fleshy, creeping rootstock, leaves papery, milky sticky white latex, inflorescence a slender terminal spike, flowers dull reddish pink-green, fruit a 3-lobed dehiscent capsule, in savanna, at forest edges

See *Enumeratio Systematica Plantarum* 9, 31. 1760, *London J. Bot.* ii. 552 (err. typ. 452). 1843 and *Bull. Misc. Inform. Kew* 1906: 81. 1906, *Flora of Tropical Africa* 5: 164. 1906, *Fl. Trop. Afr.* [Oliver et al.] 6(1.6): 1012. 1913, *Bulletin du Jardin botanique de l'État a Bruxelles* 29(2): 133–146. 1959, *Journal of Ethnopharmacology* 16: 23–103. 1986, *Revue de Médecines et Pharmacopées Africaines* 9(2): 21–30. 1995, *Systematics and Geography of Plants* 71(2), *Plant Systematics and Phytogeography for the Understanding of African Biodiversity*, 889–910. 2001, *Biodiversity and Conservation* 12(8): 1715–1739. 2003, *Bioresour. Technol.* 99(6): 2037–2045. 2008

(Plant very toxic, very poisonous; irritating latex from the root a powerful caustic; plant extract very dangerous to the eyes. Leaf decoction taken to induce abortion; pounded leaves applied to Guinea worm sores; latex from leaves rubbed on fresh wounds. Whole plant decoction as a bath to treat skin affections. The smoke of burnt and ground fresh roots together with those of *Gnidia kraussiana* Meisn. inhaled to treat hallucinations. Roots an ingredient of arrow poison, also used for criminal purposes; plant added as bait to kill wild animals; insecticidal activity. Magic, used for ritual scarifications.)

in Dahomey: dobogo

in Ghana: pampiga, pulle, tullu, zaga rafi

in Ivory Coast: anuflanoku, lefora, tara

in Nigeria: gurohi, inagodo, nabbiri, nyanyarngal, yàzàáwáá, yàzàáyáá

in Upper Volta: daganàga, ignèl, konyoro, lefora, mahera, mara, nakoronekon, nyan, pawdo, pimpla, samplanan, sien-honlon, sukulu, teul, tianon, yarngal, yazawa

Excoecaria guineensis (Benth.) Müll.Arg. (*Excoecaria angustifolia* Afzel. ex Pax; *Excoecaria guineensis* var. *cavalliensis* Beille; *Excoecaria guineensis* var. *comoen-sis* Beille; *Sapium guineense* (Benth.) Kuntze; *Stillingia guineensis* Benth.)

West and Central Africa, Cameroon. Shrub, white juice, greenish yellow flowers

See *Niger Fl.*: 501. 1849, *Linnaea* 32: 123. 1863, *Revis. Gen. Pl.* 3(2): 293. 1898 and *Bull. Soc. Bot. France* 57(8): 129. 1910, *Bulletin du Jardin botanique de l'État a Bruxelles* 29(2): 133–146. 1959

(Sap acrid and poisonous, repellent. A decoction of root bark or stem bark taken in small doses as a purgative in case of constipation and also to treat kidney diseases. Stem bark decoction emetic. Leaf sap and leaves applied to sores.)

in Nigeria: suru-fufu

Excoecaria madagascariensis (Baill.) Müll.Arg. (*Excoecaria madagascariensis* Müll.Arg.; *Excoecaria sylvestris* S. Moore; *Sapium madagascariense* (Baill.) Prain, nom. illeg.; *Sapium madagascariense* Prain; *Sapium madagascariense* (Müll.Arg.) Pax; *Spirostachys madagascariensis* Baill.; *Stillingia goudotiana* Baill.; *Stillingia madagascariensis* Baill., nom. nud.)

Somalia to Zimbabwe, Swaziland, Madagascar. Shrub or small tree, milky latex, leaves opposite, terminal inflorescence or inflorescences in axils of the upper leaves shortly pedunculate, male flowers greenish yellowish, female flowers green, fruit pink to dark brown when mature

See *Systema Naturae*, ed. 12 2: 611, 637. 1767, *Étude générale du groupe des Euphorbiacées* 522. 1858, *Adansonia* 2: 30. 1861, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1219. 1866, *Nat. Pflanzenfam.* [Engler & Prantl] iii. v. 98. 1891 and *J. Linn. Soc., Bot.* 40: 204. 1911, *Fl. Trop. Afr.* 6(1.6): 1010. 1913, *Catalogue des Plantes de Madagascar, Euphorbiaceae* 2(23): 1–51. 1935, *Bulletin du Jardin botanique de l'État a Bruxelles* 29(2): 133–146. 1959, *Economic Botany* 33(1): 35–51. 1979, *Bulletin du Jardin botanique national de Belgique / Bulletin van de National Plantentuin van België* 60(1/2): 9–71. 1990, *Bothalia* 33: 155–156. 2003

(White poisonous latex. Arrow poison, often in combination with the latex of *Acokanthera schimperi* (A. DC.) Schweinf. and the tuber of *Dioscorea quartiniana* A. Rich. Plants very toxic to cattle and camels.)

in English: milky mangrove, red-ears

in East Africa: mguluari, mugulore

Excoecaria oppositifolia Griffith

Burma (Myanmar), Thailand and Indochina. Tree, white latex, flowers in racemes, along streams

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 386. 1844, *Icones Plantarum Indiae Orientalis* 5: pl. 1865. 1852 and *Kew Bulletin* 26: 270. 1972, *Tree Fl. Malaya* 2: 96. 1973, *Journal of Economic and Taxonomic Botany* 18(1): 207–208. 1994, *Planta Med.* 60(6): 566–8. 1994, *Thai For. Bull.* 28: 80. 2000, *Fl. Thailand* 8, 1: 298, fig. 72h. 2005

(Acrid milky juice, corrosive, abortifacient, known to cause skin irritation; the poisonous sap can cause blistering and temporary blindness. Latex toxic to fishes.)

in Thailand: fai duean ha, tang ta bot, yang ron

Excoecaria parvifolia Müll.Arg. (*Excoecaria agallocha* var. *muelleriana* Baill.)

Australia.

See *Flora* 47: 433. 1864, *Adansonia* 6: 325. 1866

(Volatile sap very irritating, acrid, may cause severe inflammation and temporary blindness.)

in English: gutta percha tree

Excoecaria venenata S.K. Lee & F.N. Wei

China.

See *Guihaia* 2(3): 129–130, f. 1. 1982

(Toxic, irritant.)

in China: ji wei mu

Exomis Fenzl ex Moq. Chenopodiaceae (Amaranthaceae)

Greek *exomis*, *exomidos* ‘a man’s vest without sleeves’ (leaving the shoulders bare) (Aristophanes) (*ex* and *omos* ‘the shoulder with the upper arm’; Latin *umerus*, *humerus*); “Exomides sunt comici vestitus exsertis humeris”, Sext. Pompeius Festus, a Roman grammarian; see Moquin-Tandon, Christian Horace Bénédicte Alfred (1804–1863), *Chenopodearum Monographica Enumeratio* 49. Parisiis, 1840 and *Willdenowia* 16(1): 187–210. 1986.

Exomis microphylla (Thunb.) Aellen var. *axyrioides* Aellen (*Exomis axyrioides* Drege; *Exomis axyrioides* Fenzl ex Moq.; *Exomis axyrioides* Wright)

South Africa.

See *Chenopodearum Monographica Enumeratio* 49. 1840 and *South African Journal of Science* 97: 375–379. 2001

(For epilepsy and convulsions. Veterinary medicine, leaf decoction for endometritis and vaginitis.)

in South Africa: hondebos, uMvenyathi

Exomis microphylla (Thunb.) Aellen var. ***microphylla*** (*Atriplex microphylla* Willd.; *Atriplex microphylla* (Thunb.) Willd.; *Atriplex microphylla* Schur; *Chenopodium microphyllum* Thunb.; *Chenopodium microphyllum* M. Bieb., nom. illeg.; *Chenopodium microphyllum* F. Muell., nom. illeg.)

South Africa.

See *Prodromus Plantarum Capensium*, ... 48. 1794, *Flora Taurico-Caucasica* 3: 175. 1819 [Dec 1819 or early 1820], *Transactions and Proceedings of the Philosophical Institute of Victoria* 2: 74. 1858, Philippi, Rudolph Amandus (1808–1904), *Florula Atacamensis*: seu, Enumeratio plantarum, quas in itinere per desertum Atacamense observavit R. Philippi ... 48. Halis Saxonum, 1860, *Reise durch die Wueste Atacama*: auf Befehl der chilenischen Regierung im Sommer 1853–54 ... Halle, 1860, *Enumeratio Plantarum Transsilvaniae* 578. 1866 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 70: 375. 1939, *South African Journal of Science* 97: 375–379. 2001

(Veterinary medicine, leaf decoction for endometritis and vaginitis.)

in English: exomis

in South Africa: basterhondebossie, brakbossie, hondebos, hondebossie, hondepisbossie

Exostema (Pers.) Bonpl. Rubiaceae

From the Greek *exo* ‘outside’ and *stema* ‘a stamen’, see *Synopsis Plantarum* (Persoon) 1: 196. 1805, *Plantae Aequinoctiales* [Humboldt & Bonpland] 1: 131 (-132, 135). 1808[1807] and *Fieldiana, Bot.* 24(11/1–3): 1–274. 1975, *Acta Biologica Hungarica* 35(1–4): 300–301. 1989, *Opera Botanica Belgica* 7: 277–295. 1996.

Exostema caribaeum (Jacq.) Schultes (*Cinchona caribaea* Jacq.; *Cinchona caribbeana* W. Wright; *Cinchona herba-cea* L.; *Cinchona jamaicensis* Wright; *Cinchona myrtifolia* Stokes, nom. illeg.; *Cinchona racemosa* Schrank ex Steud.; *Exostema caribaeum* (Jacq.) Roem. & Schult.; *Exostema*

caribaeum var. *pubescens* Borhidi & O. Muñiz; *Exostema caribaeum* var. *velutinum* Urb.; *Exostema longicuspe* Oerst.)

New World tropics. Small tree or shrub, erect branches, leaves recurved, conspicuously jointed twigs, pointed fringed stipules, large white solitary flowers with a long corolla tube and narrow corolla lobes, dry woody capsules separating into 2–4 valves, flat and winged seeds

See *Enumeratio Systematica Plantarum* 16. 1760, *Plantae Aequinoctiales* 1: 131. 1808[1807], *Syst. Veg.* 5: 18–19. 1819, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(2–4): 48. 1853 and *Symb. Antill.* 8: 665. 1921, *Acta Bot. Acad. Sci. Hung.* 18: 44. 1973, *Opera Bot. Belg.* 7: 289. 1996, *Ceiba* 44(2): 105–268. 2003 [2005]

(A yellow tea from the bark to increase the appetite and to improve low poor blood. Febrifuge, this species contains quinine.)

in English: black torch, Jamaica bark, princetorch, princewood

Eysenhardtia Kunth Fabaceae (Amorpheae)

Dedicated to the German botanist Carl (Karl) Wilhelm Eysenhardt, 1794–1825, professor of botany at Königsberg, wrote *De accurata plantarum comparatione*, adnexis observationibus in Floram Prussicam. D. Regiomonti, 1823.

Eysenhardtia texana Scheele (*Eysenhardtia angustifolia* Pennell)

USA, Texas. Perennial non-climbing shrub, woody, yellowish white flowers, sweet pungent fragrance

See *Nova Genera et Species Plantarum* (quarto ed.) 6: 489–491. 1823 [1824], *Linnaea* 21: 462–463. 1848 and *North American Flora* 24(1): 38. 1919, *Iowa State Journal of Research* 56(4): 393–417. 1982

(Leaves soaked in water, the liquid drunk to relieve kidney conditions.)

F

Nat.*, ed. 13[bis]. 2(2): 1173. 1792 [1791 publ. late Apr-Oct 1792], *Journal of the Linnean Society, Botany* 23(157): 479. 1888, *Journal de Botanique* (Morot) 9(16): 294. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(368–369): 345. 1914, *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 252. 1914, *University of California Publications in Botany* 22: 631. 1947

(Used for promoting semen.)

in China: hua pei ju

Faberia thibetica (Franch.) Beauverd (*Faberia thibetica* Beauverd; *Lactuca thibetica* Franch.)

Himalaya, China, India. Herb, young leaves eaten as vegetables

See *Journal de Botanique* (Morot) 9(16): 293. 1895 and *Bulletin de la Société Botanique de Genève, Sér. 2* 2: 50. 1910

(Stomachic.)

in India: khala

Fabiana Ruíz & Pavón Solanaceae

After the Spanish Archbishop Francisco Fabián y Fuero, 1719–1801, a patron and promoter of botanical study, Bishop of Puebla de los Angeles; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 361. Ansbach 1852 and *Gayana, Bot.* 42: 1–157. 1985, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 102. Berlin & Hamburg 1989.

Fabiana bryoides Phil.

Chile.

See Philippi, Rudolph Amandus (1808–1904), *Viaje al Desierto de Atacama* 214, pl. 5D. 1860

(Ritual, magic, ceremonial.)

in Chile: k'oa

Fabiana denudata Miers

Chile.

See *London Journal of Botany* 5: 163. 1846

(Stem used to reduce swelling, heal wounds and fractures. Ritual, magic, ceremonial, funeral.)

in Chile: alma tola

Fabiana imbricata Ruiz & Pav. (*Fabiana araucana* Phil.; *Fabiana biflora* Remy; *Fabiana imbricata* var. *biflora* (Remy) Reiche; *Fabiana lutescens* Phil.)

South America.

See *Flora Peruviana* 2: 12, pl. 122. 1799, *Anales de la Universidad de Chile* 90: 758–760. 1895 and *Ann. Missouri Bot. Gard.* 93: 634–646. 2006

(Veterinary medicine, anthelmintic for sheep and goats.)

in Argentina: pichi, pichi-pichi

in Chile: pichi

in Patagonia: palo piche

in Peru: pichi

Fadogia Schweinf. Rubiaceae

The generic name from the locality in Sudan where was collected a species, see *Rel. Kotsch.* 47. t. 32. 1868.

Fadogia ancylantha Schweinf. (*Fadogia obovata* N.E. Br.; *Pachystigma ancylanthum* (Schweinf.) K. Schum.; *Pachystigma obovata* (N.E. Br.) Eyles; *Temnocalyx ancylantha* (Schweinf.) Robyns; *Temnocalyx ancylanthus* (Hiern) Robyns; *Temnocalyx ancylanthus* var. *puberulus* Robyns; *Temnocalyx obovata* (N.E. Br.) Robyns; *Temnocalyx obovatus* (N.E. Br.) Robyns)

Trop. Africa. Herb or shrub, several woody stems, woody rootstock, green-yellow tubular flowers, slender corolla tube distinctly curved and wider above, round 5-lobed berry, nectar produced by flowers sweet and sucked by children, sweet fleshy ripe fruit eaten raw, dry leaves used as tea, a source of

bee forage, in grassland, *Acacia-Combretum* wooded grassland, *Brachystegia* woodland

See *Flora of Tropical Africa* [Oliver et al.] 3: 155. 1877 and *Bull. Misc. Inform. Kew* 1906: 105. 1906, *Trans. Roy. Soc. South Africa* 5: 494. 1916, *Bull. Jard. Bot. État* 11: 317, 320, 323. 1928, *Kew Bulletin* 36: 493–557. 1981, *Pl. Syst. Evol.* 253(1–4): 179. 2005

(Roots chewed, used as a toothbrush which helps stop bleeding from the gums.)

in Tanzania: booami, kindokoli, kitokoli, manduguli, mandunguli

Fadogia cienkowskii Schweinf. var. ***cienkowskii*** (*Fadogia katangensis* De Wild.; *Fadogia tristis* (K. Schum. ex De Wild.) Robyns; *Fadogia tristis* (K. Schum.) Robyns; *Vangueria tristis* K. Schum. ex De Wild.; *Vangueria tristis* K. Schum.)

Trop. Africa, Tanzania. A woody herb or undershrub, woody rhizome, leaves in whorls, flowers bright cream-yellow, shiny black rounded fruit crowned by old calyx lobes, ripe fleshy sweet fruit eaten raw, green leaves used as tea, sweet nectar from the flowers a source of bee forage, in grassland, seasonally wet grassland, rocky slopes, open *Brachystegia* woodland

See *Genera Plantarum* 206. 1789, *Reliq. Kotschy.*: 47. 1868 and *Annales du musée du Congo. Serie 1, Botanique*, sér. 4 1: 227. 1903, *Ann. Afrique Noire* 16: 61. 1954, *Kew Bulletin* 36: 493–557. 1981

(Roots used for treating infertility.)

in Tanzania: kambolambola, kindokoli, kitokoli, vikoko ndumbila

Fadogia elskensii De Wild. var. ***elskensii*** (*Vangueria katangensis* K. Schum. ex De Wild.; *Vangueria katangensis* K. Schum., non *Fadogia katangensis* De Wild.)

Burundi to Mozambique. Shrubby herb, several unbranched stems, woody rootstock, small yellow-green-cream flowers in axillary groups, rounded shiny black fruit, ripe sweet fruit eaten raw, sweet nectar from the flowers sucked by children, plant a source of bee forage, in woodland with *Brachystegia*, *Isobertinia*, *Uapaca*, *Protea*, grassland

See *Ann. Mus. Congo Belge, Bot.*, IV, 1: 227. 1903, *Plantae Bequaertianae* 3: 201. 1925, *Kew Bulletin* 36: 493–557. 1981

(Roots boiled with porridge and taken to treat infertility in women.)

in Tanzania: booami, kindokoli, kitokoli, madunguli, nakalondo

Fadogia erythrophloea (K. Schum. & K. Krause) Hutch. & Dalziel (*Fadogia djalonensis* A. Chev. ex Robyns, nom. illeg.; *Fadogia djalonensis* A. Chev.; *Fadogia leucophloea* Schweinf. ex Hiern var. *djalonensis* (A. Chev. ex Robyns)

Aubrév.; *Vangueria dalzielii* Hutch.; *Vangueria erythrophloea* K. Schum. & K. Krause)

Guinea.

See *Fl. Trop. Afr.* [Oliver et al.] 3: 153. 1877 and *Bot. Jahrb. Syst.* 39: 533. 1907, *Bull. Misc. Inform. Kew* 1913: 179. 1913, *Explor. Bot. Afrique Occ. Franc.* i. 331. 1920, *Bull. Jard. Bot. État* 11: 88. 1928, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] 2: 108. 1931, *Fl. Forest. Soudano-Guin.*: 480. 1950

(Leaves and berries febrifuge, poison antidote.)

Fadogia glaberrima Welw. ex Hiern (*Fadogia ledermannii* K. Krause)

Tropical Africa. Multi-stemmed, white flowers

See *Fl. Trop. Afr.* 3: 155. 1877 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 416. 1912

(Bark to stop bleeding.)

in Sudan: gagaga

Fagara L. Rutaceae

Fagara is the Arabic name used by Avicenna for an unknown plant; see *Traité Arbr. Arbust.* (Duhamel), nouv. éd. 1: 229. 1755, C. Linnaeus, *Systema Naturae*. Ed. 10. 2: 897. 1759 and *Ind. Gen. Vasc. Pl.* 1753–74 (Regn. Veg. li.) 49. 1967, J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique centrale*. CTA, Ede/Wageningen 1989.

Fagara angolensis Engl.

Tropical Africa. Tree, armed, greenish flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 148. 1896

(Bark used as fish poison.)

Fagara bukobensis Engl.

Tropical Africa.

See *Systema Naturae*, Editio Decima 2: 897. 1759 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 409. 1911

(Essential oil for toothache and roundworms.)

Fagara lemairei De Wild.

Tropical Africa. Tree, dark fruits, shiny blue seeds

See *Repertorium Specierum Novarum Regni Vegetabilis* 13: 380. 1914

(Bark used as fish poison.)

Fagara macrophylla Engl.

Tropical Africa. Tree, small white pinkish flowers

(Bark used as fish poison.)

Fagara rubescens (Planch. ex Hook. f.) Engl. (*Zanthoxylum rubescens* Planch. ex Hook. f.)

Tropical Africa, Ghana. Tree, aromatic, spiny, shiny black seeds

See *Systema Naturae*, Editio Decima 2: 897. 1759, *Niger Flora* 270. 1849, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 118. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 409. 1911

(Stem bark and roots antiseptic, for venereal diseases, mouth and urinary infections.)

Fagaropsis Mildbr. ex Siebenl. Rutaceae

The genus *Fagara* and *opsis* 'resemblance', see Siebenlist, Th., *Forstwirtschaft in Deutsch-Ostafrika* ... 90. Berlin, P. Parey, 1914.

Fagaropsis hildebrandtii (Engl.) Milne-Redh. (*Clausena hildebrandtii* Engl.; *Clausenopsis hildebrandtii* (Engl.) Milne-Redh.)

Tanzania. Shrub or small tree, flower cream, red fleshy fruits

See *Flora Indica* ... nec non Prodrumus Florae Capensis 87, 243. 1768, *Die Pflanzenwelt Ost-Afrikas* 229. 1895 and *Bulletin of Miscellaneous Information Kew* 1935: 278. 1935, *Bulletin of Miscellaneous Information Kew* 1936: 475. 1936

(Morning sickness, women's infertility, malaria, asthma, ulcers, root or bark soaked in water or boiled, infusion or decoction.)

in Kenya: muvindavindi

Fagerlindia Tirveng. Rubiaceae

Fagerlindia fasciculata (Roxb.) Tirveng. (*Benkara fasciculata* (Roxb.) Ridsdale; *Gardenia fasciculata* (Roxb.) Spreng.; *Oxyceros fasciculata* (Roxb.) T. Yamaz.; *Oxyceros fasciculatus* (Roxb.) T. Yamaz.; *Posoqueria fasciculata* Roxb.; *Randia fasciculata* (Roxb.) DC.; *Solena fasciculata* (Roxb.) D. Dietr.; *Solena triflora* (Buch.-Ham. ex D. Don) D. Dietr.; *Webera fasciculata* (Roxb.) Kurz)

Tropical Asia. Shrub

See *Flora Indica*; or descriptions of Indian Plants 2: 568. 1824, *Systema Vegetabilium*, editio decima sexta 4(2): 84. 1827, *Synopsis Plantarum* 1: 800. 1839, *Forest Flora of British Burma* 2: 49. 1877 and *Journal of Japanese Botany* 45(11): 340. 1970, *Nordic Journal of Botany* 3(4): 458, f. 4. 1983, *Reinwardtia* 12(4): 298. 2008

(Leaves poulticed. Paste of roots given orally against leucorhea. Roots and fruits used as fish poison.)

in India: semia

Malay name: akar mukeling

Fagonia L. Zygophyllaceae

Named after the French botanist Guy-Crescent (Guido Crescentius) Fagon, 1638–1718, chemist, a patron of botany, physician of Louis XIV, from 1671 to 1708 professor of botany at the Paris Jardin du Roi (or Jardin royal) and from 1699 to 1718 Director, 1699 member of the Académie des Sciences, wrote *Fons in Regio Plantarum Horto Parisiensi*. 1660. See Antoine de Jussieu, *Eloge de Mr. Fagon avec l'Histoire du Jardin Royale de Paris*. Paris 1718, François Xavier Bon [Marquis de Saint Hilaire], *Dissertation sur l'utilité de la soye des araignées*. Avignon 1748, *Species Plantarum* 1: 385–386. 1753, Flinders, Matthew (1774–1814), *A voyage to Terra Australis*: undertaken for the purpose of completing the discovery of that vast country, and prosecuted in the years 1801, 1802 and 1803. London, 1814, Antoine Vallot, *Journal de la santé du Roi Louis XIV, de l'année 1647 à l'année 1711*, écrit par Antoine Vallot (1594–1671), D'Aquin et Fagon. Paris, Versailles 1862 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 524. 1965.

Fagonia arabica L.

India.

See *Species Plantarum* 1: 386. 1753

(Used in Ayurveda and Unani. Decoction of root with leaf of *Azadirachta indica* and stem of *Tinospora cordifolia* used as blood purifier.)

in India: badavard, badawand, badaward, badawarde, chitika, cittigara, darulabha, dhamasa, dhamaso, dhanvayas, dhanvayasa, dhanvayavasa, duralabha, dusparsa, dusparsha, shawkat-ul-baiza, suralabha, ustarkhar, ustrabhaksya

Fagonia bruguieri DC.

Pakistan.

See *Species Plantarum* 1: 386. 1753

(For liver ailments.)

in India: dhamasa, dhamaso

in Pakistan: karkawag

in Sahara: telaihat

Fagonia cretica L. (*Fagonia desertorum* Andr.)

Europe, India. Prostrate herb, spiny stipulae, sepals green, petals purple, filaments greenish, anthers yellow, fruits greenish

See *Species Plantarum* 1: 386. 1753 and *Regnum Veg.* 127: 47. 1993

(Used in Ayurveda and Unani. Whole plant decoction diuretic, cooling, given in calculi, sore throat, asthma and

bronchitis, as mouth wash in stomatitis. Ash given to the children suffering from anemia. Powdered leaves and flowers emetic and used in diarrhea.)

in India: ajabhakshya, ananto, atmamuli, badavard, badawand, badaward, badawarde, chitikara, chittigara, cittigara, damahan, darulabha, dhamasa, dhamasha, dhamaso, dhamaya, dhanuryasa, dhanvayas, dhanvayasa, dhanvayavasa, dhanvi, dhhamaso, dumaso, durabhi, duralabaha, duralabha, dusparsa, dusparsha (du, painful; sparsha, to touch), gandhari, grahini, idankarya, igraha, kacchura, kashaya, kunashaka, marujauma, mriduparna, padmamukhi, prabodhani, pralhadini, rodini, samudranta, shankubaitiza, shawkat-ul-baiza, sukshmadala, suralabha, tamramula, ushtrabhakshya, ustarkhar, ustrabhaksya, vikanta, virupa, visharada

in Tibet: barnam gcig, batsher, byi-tsher, byi tsher

Fagonia glutinosa Delile

Iran.

See *Description de l'Égypte*, ... Histoire Naturelle, Tom. Second 230, t. 28. f. 2. 1814

(Fruits and stems tonic, cooling, febrifuge.)

in Pakistan: karkawag

Fagonia indica Burm.f. (*Fagonia jolyi* Batt.; *Fagonia jolyi* Batt. var. *stenophylla* Maire; *Fagonia mysorensis* Roth; *Fagonia mysorensis* B. Heyne ex Roth; *Fagonia oliveri* DC. forma *jolyi* (Batt.) Ozenda & Quézel, p.p.; *Fagonia oliveri* DC. var. *grandiflora* Ozenda & Quézel; *Fagonia olivieri* auct., non DC.; *Fagonia parviflora* Boiss.; *Fagonia persica* DC.; *Fagonia subinermis* Boiss.)

Pakistan.

See *Flora Indica* ... nec non Prodr. Florae Capensis (N.L. Burman) 102. 1768, *Prodr.* (DC.) 1: 704. 1824, *Diagn. Pl. Orient.* ser. 1, 1: 62. 1843, *Diagn. Pl. Orient.* ser. 1, 8: 124. 1849 and *Bull. Soc. Bot. France* 47: 249. 1900

(Used in Ayurveda. Aerial parts febrifuge, antimalarial, cooling, to relieve thirst, skin rash and skin allergy.)

in India: ajabhakshya, ananta, ananto, atmamuli, badavard, badawand, badaward, badawarde, chitikara, chittigara, cittigara, damahan, darulabha, dhamasa, dhamasha, dhamaso, dhamaya, dhanna, dhanuryasa, dhanva, dhanvayas, dhanvayasa, dhanvayasaka, dhanvayavasa, dhanvi, dhhamaso, dhumaso, duhsparsha, dumaso, durabhi, duralabaha, duralabha, dusparsa, dusparsha (du, painful; sparsha, to touch), gandhari, grahini, idankarya, igraha, jawasio, kacchura, kashaya, kunashaka, marujauma, mriduparna, mullu muddu gida, nela ingalaara, padmamukhi, prabodhani, pralhadini, rodini, samudranta, shankubaitiza, shawkat-ul-baiza, sukshmadala, suralabha, tamramula, ushtrabhakshya, ustarkhar, ustrabhaksya, vikanta, virupa, visharada

in Pakistan: jawasoo, karka, karkawag, shiz

Fagonia schweinfurthii Hadidi (*Fagonia indica* var. *schweinfurthii* Hadidi; *Fagonia schweinfurthii* (Hadidi) Hadidi; *Fagonia schweinfurthii* (Hadidi) Nabil & Hadidi)

India. Spiny undershrub

See *Fl. Iran.* 98: 6. 1972, *Webbia* 33: 87. 1978

(Plant blood purifier, used in anemia and diarrhea; a fresh decoction in water used for abortion. Crushed dry leaves taken orally with boiled water for indigestion.)

in India: dhamasia, dhamaso, usturgar

Fagopyrum Miller Polygonaceae

Latin *fagus* 'beech' and Greek *pyros* 'wheat, grain', referring to the edible fruit, beechnut-like; Greek *phagos*, *phegos* for a species of oak, for an acorn of the same tree; see Philip Miller (1691–1771), *The gardeners dictionary*. Abr. ed. 4. London (28 Jan.) 1754.

Fagopyrum dibotrys (D. Don) H. Hara (*Fagopyrum acutatum* (Lehmann) Mansfeld ex K. Hammer; *Fagopyrum cymosum* (Treviranus) Meisner; *Fagopyrum megaspartanium* Q.F. Chen; *Fagopyrum pilus* Q.F. Chen; *Polygonum acutatum* Lehmann; *Polygonum cymosum* Treviranus; *Polygonum dibotrys* D. Don; *Polygonum labordei* H. Léveillé & Vaniot; *Polygonum tristachyum* H. Léveillé; *Polygonum volubile* Turczaninow)

Himalaya. Annual herb, leaves as vegetable

See *Species Plantarum* 1: 359–365. 1753, *Prodr. Fl. Nepal.* 73. 1825, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibitia Ephemerides sive Observationes Historias et Experimenta* 13: 177. 1826, *Plantae Asiaticae Rariores* 3: 63. 1832 and *Fl. E. Himal.* 69. 1966, *Cell Chromosome Res.* 12: 22–29. 1989, *Botanical Journal of the Linnean Society* 130: 62. 1999

(A paste to treat broken bones. Root decoction wormicide; tuber decoction febrifuge. Grains taken as a diet in abdominal pains, diarrhea, cholera.)

in English: buckwheat

in China: tian qiao mai gun, jin qiao

in India: ban faapar, ban ogal, ban-oggal, banogal, garei, jangli oggal, jarain, kanjolya

Fagopyrum esculentum Moench (*Fagopyrum emarginatum* (Roth) Meisn.; *Fagopyrum emarginatum* Moench; *Fagopyrum emarginatum* var. *kunawarensis* Meisn.; *Fagopyrum fagopyrum* Shafer; *Fagopyrum fagopyrum* H. Karst.; *Fagopyrum fagopyrum* (L.) H. Karst., nom. inval., tautonym; *Fagopyrum sagittatum* Gilib., nom. illeg.; *Fagopyrum vulgare* T. Nees; *Fagopyrum vulgare* Hill; *Fagopyrum zuogongense* Q.F. Chen; *Polygonum emarginatum* Roth; *Polygonum emarginatum* Wall.; *Polygonum fagopyrum* L.; *Polygonum fagopyrum* Buch.-Ham. ex D. Don)

China. Herb, glabrous, leaves triangular-cordate, white or pink flowers in dense cymes, trigonous nutlets, leaves as vegetable, fodder

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* (495). 1754, *Brit. Herb.* 486 (1756, *Exercitia Phytologica* 2: 435. 1792, *Methodus Plantas Horti Botanici ...* (Moench) 290. 1794, *Catalecta Botanica* 1: 48. 1797, *Suppl. Meth.* (Moench) 100. 1802, *Prodr. Fl. Nepal.* 73. 1825, *Numer. List* [Wallich] n. 1688. 1829, *Gen. Fl. Germ.* [T. Nees] Monochl. 53. 1835, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* (Karsten) 522. 1881 and *Rep. Bot. Exch. Cl. Brit. Isles*, 1913, iii. 439. 1913, Blumstein, G.I. “Buckwheat sensitivity.” *J. Allergy*, 7: 74–79. 1936, *Fl. Trop. E. Africa, Polygonaceae* 26. 1958, *Proceedings of the Indian Science Congress Association* (III, C) 67: 50. 1980, *Journal of Cytology and Genetics* 16: 59–63. 1981, Johnson, A.E. “Photosensitizing toxins from plants and their biologic effects.” Pages 345–359 in Keeler, R.F., Tu, A.T., eds. *Handbook of Natural Toxins*. Vol. 1. *Plant and Fungal Toxins*. Marcel Dekker, Inc., New York, N.Y., USA. 1983, *Hereditas (Beijing)* 10: 6–8. 1988, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998, *Botanical Journal of the Linnean Society* 130(1): 53–64. 1999, *J. Inner Mongol. Agric. Univ., Nat. Sci. Ed.* 21(1): 69–74. 2000, *Journal of Sichuan University: Natural Science Edition* 37(1): 142–143. 2000

(This plant is considered to be a primary photosensitizer; skin rash following ingestion and exposure to sunlight, in susceptible individuals. Ingesting entire plants, dried or fresh, has caused photosensitization in animals with exposed or light-colored skin including cattle, goats, sheep, swine, and turkeys. Exposure to the sun is necessary. Humans can be sensitized to dust from buckwheat flour after long exposure. Asthma is the usual response, photosensitization has not occurred in humans. Fagopyrin, probably a derivative of naphthodianthrone, is closely related to hypericin, which is found in St. John’s-wort, *Hypericum perforatum*. Plant antihemorrhagic, a cure for capillary fragility of the heart; juice of plant useful in urinary disorders. Leaves paste as an ointment for headache; leaf decoction taken for gastrointestinal problems; dried leaf paste taken against constipation; leaf extract of *Mentha longifolia* and *Fagopyrum esculentum* taken orally for cold and cough; leaves fried with ghee eaten as febrifuge; fresh leaves decoction or infusion taken in stomach ailments. Root decoction in rheumatic pains, lung diseases and typhoid; root juice in urinary disorders. Ceremonial, seeds ground into flour during Khaning.)

in English: buckwheat, common buckwheat

in China: qiao mai, chiao mai, wu mai, hua chiao

in India: doron, kaadu godhi, kaiyuk, kali-indrayan, kathu, kotu, kuttu, ogal, oggal, ogla, olgo, phapar, phaphra, suel, tyat

in Japan: soba (= buckwheat noodles)

in Tibetan: rgya-bra

Fagopyrum tataricum (L.) Gaertn. (*Polygonum tataricum* L.)

India, Central Asia. Annual herb, edible grains

See *Species Plantarum* 1: 364. 1753, *De Fructibus et Seminibus Plantarum...* 2(1): 182, pl. 119, f. 6. 1790 and *J. Inner Mongol. Agric. Univ., Nat. Sci. Ed.* 21(1): 69–74. 2000, *Journal of Sichuan University: Natural Science Edition* 37(1): 142–143. 2000

(Used in Ayurveda. Bitter seeds for rheumatism.)

in English: Indian wheat, Kangra buckwheat, Siberian buckwheat, Tartary buckwheat, Tatarian buckwheat

in China: ku chiao mai (= bitter buckwheat), ku qiao

in India: brafo, kaspat, mitha faapar, phapara, phaphar, ukhala

in Tibetan: bra-bo

Fagraea Thunb. Loganiaceae (Gentianaceae)

Named after the Swedish Dr. Jonas Theodorus Fagraeus, 1729–1797, physician, naturalist and botanist, friend of Thunberg, with Anders Dahl (1751–1789) and Carl Birger Rutström (1758–1826) Curator of the Alströmer herbarium. See Specimen inaugurale, sistens *Medicamenta Graveolentia*, quod ... sub praesidio C. Linnaei ... submittit J.T. Fagraeus. Upsaliae [1758], *Nov. Gen.* 34. 1782, Carl Peter Thunberg (1743–1828), in *Kongl. Vetenskaps Academiens Nya Handlingar* 3: 125, 132, t. 4. 1782 [Preceded and superseded by *Kongl. Vetensk. Acad. Handl.*], Peder Andreas Munch, *Arnmødlingeslaegten i Norge. En genealogisk Undersøgelse, grundet paa Fagrskinna*. [Annaler for nordisk Oldkyndighed.] Copenhagen 1846 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 244. [“Johan Theodor Fagraeus”] Basel 1996.

Fagraea berteriana A. Gray ex Benth. (*Fagraea berteriana* A. Gray; *Fagraea berteriana* Benth.)

Pacific.

See *Kongl. Vetenskaps Academiens Nya Handlingar* 3: 132. 1782, *Journal of the Proceedings of the Linnean Society* 1: 98. 1856 [1857 publ. 1856]

(Root decoction a tonic after fever.)

Fagraea bodenii Wernham

New Guinea. Tree or shrub, erect, leaves opposite, inflorescence cymose, corolla tubular, beaked fruit orange, in forests, on slopes

See *Trans. Linn. Soc. London, Bot.* 9(1): 111. 1916 [1916–22 publ. Aug 1916]

(Leaves stimulant, chewed to cure malaria and an enlarged spleen.)

in Papua New Guinea: pehea

Fagraea ceilanica Thunb. (*Fagraea chinensis* Merr.; *Fagraea khasiana* Benth.; *Fagraea obovata* Wall.; *Fagraea obovata* Blume, nom. illeg.; *Fagraea sasakii* Hayata)

India.

See *Kongl. Vetenskaps Academiens Nya Handlingar* 3: 132. 1782, *Flora Indica; or descriptions of Indian Plants* 2: 33–34. 1824, *Bijdragen tot de flora van Nederlandsch Indie* 1021. 1826, *A General History of the Dichlamydeous Plants* 4: 69. 1837, *Journal of the Proceedings of the Linnean Society* 1: 99. 1857 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 3: 151–152, pl. 29. 1913, *Philippine Journal of Science* 23(3): 261–262. 1923

(Fruit paste applied to cure skin diseases, eczema, psoriasis.)

in China: hui li

Fagraea cochinchinensis A. Chev. (*Aidia cochinchinensis* Lour.; *Fagraea cochinchinensis* (Lour.) A. Chev.; *Randia cochinchinensis* (Lour.) Merr.)

Philippines.

See *Flora Cochinchinensis* 143. 1790 and *Cat. Pl. Jard. Bot. Saigon*, 33, 66. 1919, *Transactions of the American Philosophical Society*, new series, 24(2): 365–366. 1935

(Bark febrifuge.)

in Philippines: dolo, susulin, teka, urung

Fagraea racemosa Jack ex Wall. (*Fagraea racemosa* Jack)

Malaya, Penang. Shrub or small trees, stipules joined into an ochrea around the twig, leathery leaves, 4 or 5-merous bisexual flowers in racemes

See *Flora Indica* or *Descriptions of Indian plants*, ed. Carey & Wall. 2(2): 35. 1824

(Bark and flowers as an antidote for snakebite. For malaria, fever, heat the leaves and apply hot to the abdomen; heated leaves applied as a poultice to relieve swelling, sprains, broken bones; leaves in dropsy and rheumatism; leaf decoction given in rheumatism and fever; leaves mixed with small stones and leaves of *Manihot esculenta* applied as a poultice to the abdomen to aid expulsion of the placenta after childbirth. Roots decoction febrifuge, for pains in lungs, applied as a poultice in ulceration.)

in English: false coffee tree, stone wood

in India: inveh, rohekui

in Indonesia: kayu batu

Malayan names: dada kura, kahwa hutan, kahwa utan, kopi hutan, kopi utan, lidah rusa, mempuleh, mengkudu badak, mengkudu utan, pakan ayer, pakan paya, puleh, riang-riang gelugor, rumpo-rumpo, sebereteh kayu, sekobang, sepuleh, sepulis, sepulit, serawas paya, seruas, setebal, setubal, tahi musang, tembusu ayer, tembusu paya, tengkok biawak

in Philippines: baagu, bago-sala, bulubuaia, hambuaia, himbubuaia, kabal, kibuaia, kukodmon, libakan, magusiak, makatibuha, malabago, malabuaia, talob-alok

Fagus L. Fagaceae

Latin *fagus*, *i* and *fagus*, *us* 'a beech-tree'; Greek *phagos*, *phegos* for a species of oak, for an acorn of the same tree; Akkadian *paglu* 'strong', *pagalu*, *pakalu*; see Carl Linnaeus, *Species Plantarum*. 2: 997–998. 1753 and *Genera Plantarum*. Ed. 5. 432. 1754 and Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 244–245. Basel 1996.

Fagus grandifolia Ehrhart (*Fagus americana* Sweet; *Fagus ferruginea* Aiton; *Fagus ferruginea* Dryand.; *Fagus ferruginea* Siebold; *Fagus grandifolia* Ehrh. subsp. *heterophylla* Camp; *Fagus grandifolia* Ehrh. var. *caroliniana* Fernald & Rehder; *Fagus grandifolia* var. *caroliniana* (Loudon) Fernald & Rehder; *Fagus grandifolia* var. *typica* (Ehrh.) Rehder; *Fagus grandifolia* Ehrh. var. *typica* Rehder)

North America. Perennial tree, a variable species

See *Beitr. Naturk.* [Ehrhart] 3: 22–23. 1788, *Hortus Kew.* (W. Aiton) 3: 362. 1789, *Hort. Brit.* [Sweet] 370. 1826, *Verh. Batav. Gen.* xii. (1830) 25. 1830 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 16: 70. 1907, *Pap. Michigan Acad. Sci.* 3: 93. 1924

(Used for worms, consumption and heart trouble, to purify the blood, as a poultice for burns and scalds, sores, and as a wash for poison ivy. Nuts chewed for worms. Bark used for abortions, tuberculosis, pulmonary troubles.)

in North America: American beech, hêtre américain

Faidherbia A. Chev. Fabaceae (Ingeae, Leguminosae)

See *Revue de Botanique Appliquée et d'Agriculture Tropicale* 14: 876. 1934.

Faidherbia albida (Delile) A. Chev. (*Acacia albida* Delile; *Acacia albida* Lindl., nom. illeg., non *Acacia albida* Delile; *Acacia albida* Rojas, nom. illeg., non *Acacia albida* Delile; *Acacia mossambicensis* Bolle)

Senegal to East Africa. Perennial non-climbing tree, shrub or small tree, leaves and pods animal fodder

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 142, t. 52, f. 3. 1813, *Edwards's Botanical Register* 16: pl. 1317. 1830, *Cat. Hist. Nat. (Toxic. Gum for treating inflammations and eye infections. Decoction of bark used orally against leprosy, fever. Leaves and fruits decoction for leprosy, fevers, cough and diarrhea. Roots, maceration, for malaria, nausea, pneumonia, coughing, diarrhea.)

in English: ana tree, apple-ring acacia, white acacia, white thorn, winter thorn

in French: arbre blanc

in Angola: muheia, ohué, omué, omunyéle, omunyére, ué

in Congo: kinvisilu

in Ethiopia: aqba (Tigre); derot, garbi (Orominya); garsha, momona (Tigrinya); gerbi (Amharinya and Guragenya); maman (Sahonya); qeretor (Gamonya)

in Ivory Coast: balanzan, balenza, zangha

in Kenya: iti, sangale

in Malawi: chitonya, nsangu, msangumsangu (Yao, Tumbuka)

in Mali: balanzan

in Namibia: anaboom; omue (Herero); anab/s (Nama/Damara); omuyele (Ndonga, Kwanyama); mbunga (Lozi)

in Niger: aeferock, bulubulu, chaski, gao, gawon

in Nigeria: ege, gawo, haraza, hazar, karage, karaguk, kyaski

in Sahara: ahetes

in Senegal: barangsanii, bubirik, buteful, cadde, taiki

in Southern Africa: ana baum, ahua baum, anaboom, apiesdoring, muUnga; umHlalankwazi (= the tree where the fish eagle sits), umKhaya-womfula, umKhaya wemfula (Zulu); mmolela (Tsonga or Shangaan or Thonga); mokosho (Mangwato dialect, Botswana); mogabo, mogohlo (North Sotho); muhoto (Venda); omue (Herero); anáheis, anás (Southern South West Africa, Nama)

in Sudan: harar

in Tanzania: ipogoro, mpogoro

in Zambia: munga, musangu (but also *Mitragyna macrophylla*, Rubiaceae)

in Arabic: haras, haraz, ‘afrar, telh lebiad; (the fruits) kharrub

in Berber: ahades, ahates, azawo, temahaq

Falcataria (I.C. Nielsen) Barneby & Grimes Fabaceae (Ingeae, Mimosaceae)

From the Latin *falcatus*, *a*, *um* ‘falcated, sickle shaped, hooked’, see *Memoirs of the New York Botanical Garden* 74(1): 254. 1996.

Falcataria moluccana (Miq.) Barneby & J.W. Grimes (*Adenanthera falcata* L.; *Adenanthera falcataria* L.; *Adenanthera falcatoria* L.; *Albizia eymae* Fosberg; *Albizia falcata* sensu auct.; *Albizia falcata* (L.) Backer; *Albizia falcataria* (L.) Fosb.; *Albizia falcatoria* (L.) Fosberg; *Albizia fulva* Lane-Poole; *Albizia moluccana* Miq.; *Paraserianthes falcataria* (L.) I.C. Nielsen; *Paraserianthes falcataria* subsp. *falcataria* (L.) I.C. Nielsen; *Paraserianthes falcataria* subsp. *fulva* (Lane-Poole) I.C. Nielsen; *Paraserianthes falcatoria* (L.) I.C. Nielsen)

Indonesia, Moluccas and Papua New Guinea. Perennial non-climbing tree, deciduous, large panicles, whitish flowers, flat pods winged along the ventral structure, pioneer, fast growing, often described as *Albizia falcataria*

See *Species Plantarum* 1: 384. 1753, *Species Plantarum*, Editio Secunda 1: 550. 1762 and *Reinwardtia* 7: 88. 1965, *Bulletin du Muséum National d’Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 5(3): 326–327. 1983[1984], *Journal of Occupational Health* 48: 392–395. 2006

(Whole plant extract drunk to induce sleep and also to treat venereal diseases. Bark eaten by a patient with a congested chest. Occupational asthma induced by the wood.)

in English: bataiwood, falcata wood, Indonesia albizia, Molucca albizia, Moluccan sau, white albizia

in Indonesia: djeungdjing, sengon, sengon laut

in Malaysia: bantai, batai, kayu macis

in Pacific: arapitia, fai, folo fai, tamaligi, tamaligi, tamaligi pa’epa’e, tamaligi palagi, tuhke kerosin, tuhkehn karisihn, ukall ra ngebard

in Papua New Guinea: ele, iri

in Sri Lanka: mara

Falconeria Royle Euphorbiaceae

Named for the Scottish (d. Forbes, Morayshire) botanist Hugh Falconer, 1808–1865 (London), physician, M.D. Edinburgh 1829, in India from 1830 to 1855, in 1832

appointed Superintendent of the Serampore [Saharanpur] Botanical Garden, 1844 Fellow of the Linnean Society, 1845 Fellow of the Royal Society, 1848 Superintendent of the Calcutta Botanic Gardens. See J.D. Hooker and Thomas Thomson (1817–1878), *Flora Indica*. 67–68. 1855, C. Murchison, compiled and edited by, *Description of the Plates of the Fauna Antiqua Sivalensis* from notes and memoranda by H.F. London 1867, Charles Murchison, *Palaeontological Memoirs and Notes of the Late Hugh Falconer, A.M., M.D.* London 1868 and H.B. Woodward, *The history of the Geological Society of London*. 108–109. London 1908, D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. 2: 147–148. London 1914, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 525. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 121. 1972, John Challinor, in *D.S.B.* 4: 518–519. 1981.

Falconeria insignis Royle (*Carumbium insigne* (Royle) Kurz; *Excoecaria insignis* (Royle) Müll.Arg.; *Falconeria malabarica* Wight; *Falconeria wallichiana* Royle; *Gymnobotrys lucida* Wall. ex Baill.; *Sapium insigne* (Royle) Benth. & Hook. f.; *Sapium insigne* (Royle) Benth.; *Sapium insigne* (Royle) Trimen; *Sapium insigne* var. *genuinum* Pax, nom. inval.; *Sapium insigne* var. *malabaricum* (Wight) Hook.f.)

India, China, Nepal. Tree, smooth grey-black bark with a deep broad network of fissures, leaves opposite or in whorls with two glands at the base, leaf margin serrate

See *Ill. Bot. Himal. Mts.*: 354, pl. 84a, pl. 98, f. 2. 1839, *Étude générale du groupe des Euphorbiacées* 527. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1212. 1866, *Forest Flora of British Burma* 2: 412. 1877, *Genera Plantarum* 3: 335. 1880, *Fl. Brit. India* 5: 472. 1888

(Used in Ayurveda. Fruits extremely nauseous. Latex poisonous, acrid, vesicant; milky latex given for indigestion; applied externally in skin eruptions, warts, alopecia; latex for wound maggots. Veterinary medicine, latex applied on the body of animals as a germicidal. Bark and leaves as fish poison; latex piscicide.)

in India: balodhar, baloje, chhina, chhirna, chiran, daeva sarupi, devasuroopi, dudla, garbhasula, garghasula, garpashola, garpashula, garphashola, garvhasula, huraa, hure, kalmaram, kanapadai, kanapade, kanappade, kannu pade, kannupade, karuppu-chulai, karuppuculai, khina, khindra, khinna, khinni, khirni, khirun, kurda, kurudu mara, kurudanandi, kurudunandaga, lendwa, lienda, mukulaka, naanaka, nanaka, nanaka mara, sakkarakkalli, sherod, thingvawkpui, thinvawkpui, ura, ure, uro

in Nepal: khirra, khirro

Fallopia Adans. Polygonaceae

After the Italian anatomist Gabriele (Gabiello) Falloppio, 1523–1562 (Padova), discovered the tubes that connect the

ovaries to the uterus (now known as Fallopian tubes). See C.D. O'Malley, in *D.S.B.* 4: 519–521. 1981; Bruno Zanolio, in *D.S.B.* 4: 507–512. 1981; Marcello Donati (Donatus) (1538–1602), *De medica historia mirabili libri sex*. Mantua 1586; Jacopo Filippo Tomasini (Tomasinus) (1597–1654), *Illustrium virorum elogia iconibus exornata*. [Portraits and biographies of Tycho Brahe (1546–1601), Casserius, Mercurialis, Cardanus, Taisner, Torquato Tasso, Fabricius, Falloppio, etc.] Patavii 1630 and Garrison and Morton, *Medical Bibliography*. 3417, 6377. 1961, Richard J. Durling, comp., *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 1430. 1967. According to some author the genus was named after the Greek *phallos* 'penis' and *ops, opos, opsis* 'aspect, appearance, resemblance', the berries are penis-like.

Fallopia cilinodis (Michx.) Holub (*Bilderdykia cilinodes* (Michx.) Greene; *Polygonum cilinode* Michx.; *Polygonum cilinode* var. *laevigatum* Fernald; *Reynoutria cilinodis* (Michx.) Shinnars; *Tiniaria cilinodis* (Michx.) Small)

China.

See *Familles des Plantes* 2: 277, 557. 1763, *Natuurlijke Historie* 2(8): 639. 1777, *Flora Boreali-Americana* 1: 241. 1803, *Florula belgica*, opera majoris prodromus, auctore ... 18. 1827, *Handbuch des Naturlichen Pflanzensystems* 236. 1837 and *Flora of the Southeastern United States* 382. 1903, *Leaflets of botanical observation and criticism* 1: 23. 1904, *Rhodora* 16(189): 166. 1914, *Sida* 3(2): 117. 1967, *Folia Geobotanica et Phytotaxonomica* 6(2): 176. 1971, *Taxon* 31: 120–126. 1982, *Plant Systematics and Evolution* 180: 29–52. 1992

(Skin and venereal diseases.)

Fallopia denticulata (C.C. Huang) J. Holub (*Polygonum denticulatum* C.C. Huang)

China.

See *Acta Bot. Yunnan.* 6: 288. 1984, *Preslia* 70(2): 104. 1998

(Blood purifier.)

in China: jiang tou

Fallopia multiflora (Thunb.) Czerep. (*Bilderdykia multiflora* (Thunb.) Roberty & Vautier; *Fagopyrum multiflora* (Thunb.) I. Grint.; *Fagopyrum multiflorum* (Thunb.) I. Fargesia yunnanensis J.R. Xue & T.P. Yi (*Sinarundinaria yunnanensis* (J.R. Xue & T.P. Yi) J.R. Xue & D.Z. Li; *Yushania yunnanensis* (J.R. Xue & T.P. Yi) Keng f. & T.H. Wen)

China, Yunnan, Sichuan, Kunming. Young culm glabrous or sparsely silky, sheath persistent coriaceous, yellowish, no sheath auricles and no cilia, purple sheath ligule truncate, leaf lanceolate, shoot edible

See *Journal of Bamboo Research* 6(2): 21. 1987 and 6(4): 16. 1987, *Bulletin of Botanical Research* 5(4): 125–126, f. 3. 1985

(Worshipped.)

in China: mi jia

Farsetia Turra Brassicaceae (Cruciferae)

After a Venetian botanist, Filippo (Philip) Farseti, see *Farsetia: novum genus accedunt animadversiones quaedam botanicae* 5. t. 1. Venetiis, 1765, *Farsetia; novum plantae genus*. Venetiis: [s.n.], 1765.

Farsetia hamiltonii Royle

India. Used as deer and camel fodder

See *Taxon* 30: 854. 1981

(Tonic, astringent, antiinflammatory, in rheumatism.)

in India: hiram chaba, hiran chabbo

Farsetia macrantha Blatt. & Hallb.

India. Annual or perennial herb

See *J. Bombay Nat. Hist. Soc.* 26: 220. 1918, *J. Econ. Taxon. Bot.* 5(5): 1091. 1984

(Whole plant in rheumatism and as a cooling medicine after pounding.)

in India: hiranchabba

Fatoua Gaudich. Moraceae

Derivation obscure, possibly dedicated to a M. Fatou, probably referring to one of the SW Pacific languages; the Fijian *vatu* means rock, stone; see Louis Claude de Saulces de Freycinet, *Voyage autour du Monde entrepris par ordre du Roi ... sur les corvettes de S.M. L'Uranie et La Physicienne, pendant ... 1817–1820*. 509. Paris 1830 and *Bull. Jard. Bot. Belg.* 47: 267–407. 1977.

Fatoua pilosa Gaudich. (*Fatoua pilosa* Siebold & Zucc.)

Philippines, Pacific.

See *Voy. Uranie, Bot.* 509. 1830 [6 Mar 1830] and *Flora Japonica* 219. 1946

(Plant used for swollen gums.)

in Australia: arzerarzer

in China: xi chi shui she ma

in Philippines: malbas-damo, poro, sarungkar a babassit, sikkir

Faurea Harvey Proteaceae

The genus was named after the South African botanist William Caldwell Faure, 1822–1844 (died tragically), soldier, naturalist; see *Journal of Botany, British and Foreign* 6: 373, t. 15. 1847 and *Adansonia*, n.s. 3: 370–373. 1963, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 154. Cape Town 1981, *Comparative Biochemistry and Physiology*. Part B, *Biochemistry & Molecular Biology* 131(4): 613–620. 2002.

Faurea arborea Engl. (*Faurea arborea* Sim)

South Africa, Madagascar, Tanzania. Shrub or tree

See *London Journal of Botany* 6: 373, t. 15. 1847, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19(Beibl. 47): 29. 1894 and *For. Fl. Cape Col.* 297. 1907

(Leaves infusion for skin diseases, boils, ulcers, mental illness.)

in Tanzania: ol amulul

Faurea macnaughtonii Phill. (*Faurea natalensis* Phill.) (in honor of C.B. MacNaughton, Conservator of Forests in the Midland Conservancy of the Cape Colony in the 1890's)

South Africa.

See *Fl. Cap.* (Harvey) 5(1.4): 641–642. 1912

(Bark used as a tonic and astringent.)

in English: Macnaughton's beech, terblanz beech

in Southern Africa: bosboekenhout, Egossa boekenhout, terblans; iSefu, isiQalaba (Zulu); iSafu, iSefu, iSefi, iSafu, umKhubane (Xhosa)

Faurea rochetiana (A. Rich.) Chiov. ex Pic. Serm. (*Faurea rochetiana* Chiov. ex Pic. Serm.; *Leucospermum rochetianum* A. Rich.)

South Africa. Small tree or shrub, deciduous, gnarled twisted crooked trunks, greenish creamy yellowish flowers in conspicuous hanging spikes, fruit a small nutlet

See *Tentamen Florae Abyssinicae ...* 2: 232. 1850 and *Webbia* 7: 327. 1950, *Bull. Jard. Bot. Natl. Belg.* 45: 233. 1975

(Sawdust known to be an irritant and may cause dermatitis. Roots to treat diarrhea and ear infections.)

in English: broad-leaved boekenhout

in Southern Africa: breëblaarboekenhout, mogwapi, mutango, N'wamidzumba, siSefo

in Tanzania: ihalangwa, isense, ivuti, mhongolo-mlima, nachipa, natipa

Faurea saligna Harvey

Tropical Africa. Small tree or shrub, lianescent, green to creamy white fragrant flowers in slender spikes, fruit a small nutlet

See *London J. Bot.* 6: 373, t. 15. 1847

(Bark boiled and taken as a tonic soup. Leaves and stem for fevers and diarrhea. Roots boiled and the liquid drunk as a remedy for diarrhea and indigestion.)

in English: African beech, beachwood, beechwood, red boekenhout, Transvaal beech, willow beechwood, willow-like faurea

in Malawi: tetre

in Southern Africa: beukenhout, boekenhout (= beech), bosveldboekenhout, chinsense, chiyele, geelboekenhout, muhunde, musokoto, mutsatsati, rooiboekenhout, saninga, Transvaalboekenhout, umdwadwa, witboekenhout; isiDwadwa, umOnyeli, umOnyela (Ndebele: Central and Southern Transvaal); garahongwe, gurahongwe, Gurahunwa, Kapfutsa, Kafutsana, muOnyela, muPembere, muRere, muSasati, Sesena, muSesetu, muShangwa, muSusina, Tsatsai, muTsatsati (Shona); iSefu, umCalathole (Zulu); muTango (Venda); mofufu (Subya: Botswana, eastern Caprivi); mohlakô, mongêna, mohlako, mongena (North Sotho: North and North East Transvaal); isiQalaba (Swazi: Swaziland and Eastern Transvaal)

in S. Rhodesia: muRere, muSesetu, umPembele

in Tanzania: kinyigi, mhenyi, msasa

Felicia Cass. Asteraceae

Possibly after a German official, possibly in Regensburg, possibly a certain Herr Felix, possibly d. 1846; or from the Latin *felix, licis* 'happy, cheerful'; or for the Italian Fortunato Bartolomeo de Felice, 1723–1789; see Alexandre Henri Gabriel Comte de Cassini, in *Bull. Sci. Soc. Philom. Paris*. Année 1818. 165. (Nov.) 1818; Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 247. Basel 1996; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 363. Ansbach 1852.

Felicia erigeroides DC. (*Aster erigeroides* (DC.) Harv.; *Aster erigeroides* var. *schultesii* Harv.; *Aster erigeroides* var. *trinervius* (Turcz.) Harv.; *Felicia natalensis* Sch. Bip. ex Walp.; *Felicia trinervia* Turcz.)

South Africa.

See *Species Plantarum* 2: 872–877. 1753, *Bull. Sci. Soc. Philom. Paris* 1818: 165. 1818, *Repertorium Botanicæ Systematicæ*. 2(suppl. 1): 956. 1843, *Bulletin de la Société Impériale des Naturalistes de Moscou* 24(2): 60. 1851, *Flora Capensis* 3: 74. 1865

(Leaves used for intestinal parasites.)

in South Africa: isiThelelo (Zulu)

Feretia Delile Rubiaceae

See *Ann. Sci. Nat., Bot.* sér. 2, 20: 92, t. 1, f. 4. 1843.

Feretia apodanthera Del. (*Feretia canthioides* Hiern; *Pavetta elliptica* Hochst.)

Mauritania to Somalia.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 92, t. 1, f. 4. 1843, *Flora* 27: 98. 1844, *Fl. Trop. Afr.* [Oliver et al.] 3: 116. 1877

(Roots and stem bark sedative, antimalarial, analgesic, antipyretic.)

Feretia apodanthera Del. subsp. *tanzaniensis* Bridson

Tanzania. A deciduous shrub or small tree, tubular flowers together on short shoots, calyx with 5 pointed lobes, round reddish berries, fleshy pulp of ripe fruit eaten raw, in bushland, forest margins, near rivers

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 92, t. 1. 1843 and *Kew Bulletin* 34(2): 368. 1979

(Roots boiled, the infusion drunk to treat stomachache; the powder obtained from pounded roots used to treat wounds. Roots soaked in cold water and the infusion used as a cold bath for babies as a preventive magic charm against various ailments and to assure good health.)

in Tanzania: ikechu, mbuguswa, mginya, mnanyeza, mpakapaka

Fernaldia Woodson Apocynaceae

Dedicated to the American (b. Maine) botanist Merritt Lyndon Fernald, 1873–1950 (Cambridge, Massachusetts), botanical collector, from 1899 to 1950 editor of *Rhodora*, rearranged and revised the Asa Gray's *Manual of Botany* (eighth edition, 1950), his writings include *Biographical Memoir of Benjamin Lincoln Robinson, 1864–1935*. Washington 1937, *Contributions from the Gray Herbarium of Harvard University*. [1900], *The Linear-leaved North American Species of Potamogeton, Section Axillares*. [Boston, Mass.] 1932 and *Persistence of Plants in Unglaciated Areas of Boreal America*. Boston, Mass. 1925; see Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 278. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 536. 1965, T.W.

Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 124. 1972, J. Ewan, ed., *A Short History of Botany in the United States*. New York and London 1969; J. Ewan, in *D.S.B.* 4: 583–584. 1981, Morales, J.F. “Estudios en las Apocynaceae Neotropicales XIX: La familia Apocynaceae s.str. (Apocynoideae, Rauvolfioideae) de Costa Rica.” *Darwiniana* 43(1–4): 90–191. 2005.

Fernaldia pandurata (A. DC.) Woodson (*Amblyanthera pandurata* (A. DC.) Müll.Arg.; *Angadenia pandurata* (A. DC.) Miers; *Echites barbatus* Sessé & Moc., nom. illeg., non *Echites barbatus* Desv. ex Ham.; *Echites panduratus* A. DC.; *Echites pinguifolius* Standl.; *Fernaldia brachypharynx* Woodson; *Fernaldia glabra* (Ant. Molina) Lundell; *Fernaldia pandurata* var. *glabra* Ant. Molina; *Mandevilla potosina* Brandegee; *Mandevilla velutina* K. Schum.; *Urechites karwinskii* Müll.Arg.)

Mexico to Central America. Woody vine, twining, watery sap, flowering shoots hanging down, corollas cream white, fruit green, edge of riparian forest

See *The Civil and Natural History of Jamaica* in Three Parts 182. 1756, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 458. 1844, *Linnaea* 30: 440–441, 448. 1860, *Flora Brasiliensis* 6(1): 141. 1860, *Botanische Zeitung*. Berlin 18: 22. 1860, *On the Apocynaceae of South America* 173, 182. 1878, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 2(App): 45. 1893, *Die Natürlichen Pflanzenfamilien* 4(2): 171. 1895 and *University of California Publications in Botany* 4(15): 276. 1912, *Publications of the Field Columbian Museum, Botanical Series* 8(1): 35. 1930, *Annals of the Missouri Botanical Garden* 19(1): 48. 1932, *Annals of the Missouri Botanical Garden* 19(4): 380. 1932, *Ceiba* 3(2): 95–96. 1952, *Wrightia* 5(7): 256. 1976, *Mem. Inst. Oswaldo Cruz*. 86 Suppl 2: 193. 1991, *Rhodora* 104: 186–200. 2002, Biondo, R. et al. “Inhibition of enzymatic and pharmacological activities of some snake venoms and toxins by *Mandevilla velutina* (Apocynaceae) aqueous extract.” *Biochimie*. 85(10): 1017–25. 2003, Santos A.R. et al. “Mechanisms involved in the antinociception caused by compound MV8612 isolated from *Mandevilla velutina* in mice.” *Brain Res.* 961(2): 269–276. 2003, *Regulatory Peptides* 136(1–3): 98–104. 2006, *Neuropeptides*. 40(2): 125–132. 2006

(Irritating sap. Velutinol A is a pregnane compound isolated from the rhizomes of the Brazilian plant *Mandevilla velutina* that interferes with kinin actions and possesses anti-inflammatory action. Velutinol A selectively blocks the edema responses mediated by B(1) receptor activation in vivo. Active against snakebite.)

in El Salvador: bejuco quilite

Ferocactus Britton & Rose Cactaceae

Latin *ferox* ‘ferocious’ plus *Cactus*, referring to the spines; see George Lindsay and others, *The Taxonomy and*

Ecology of the Genus Ferocactus. Tireless Termites Press, California 1996.

Ferocactus emoryi (Engelm.) Orcutt (*Echinocactus emoryi* Engelm.; *Ferocactus covillei* Britton & Rose)

Mexico, USA.

See *Proceedings of the American Academy of Arts and Sciences* 3: 275. 1856 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family 3: 123, 132–133, f. 138–139. 1922, *Cactography* 1926(1): 5. 1926

(A slice of cactus roasted until juice comes out of it, then held on a sore spot of the body for relief.)

in English: hatpin cactus

Feronia Corrêa Serr. Rutaceae

From the patroness of freedmen, an old Italian deity related to Tellus and whose principal sanctuary was at Anxur; “*Feronia mater nympa Campaniae*.”

Feronia limonia (L.) Swingle (*Feronia elephantum* Corrêa; *Schinus limonia* L.)

China.

See *Species Plantarum* 388–389. 1753, *Transactions of the Linnean Society of London* 5: 224. 1800 and *Journal of the Washington Academy of Sciences* 4: 328. 1914, *Journal of Cytology and Genetics* 18: 20–25. 1983

(Unripe fruit eaten in diarrhea and dysentery. Dried bark decoction applied for itch; dry stem bark powder given orally with boiled water for indigestion. Root chewed as antidote, anti-venom. Ceremonial, worship.)

in India: kaith, kaith bel, kaitha, kanith, kothu, vilam

Ferraria Burm. ex Miller Iridaceae

Named to honor the Italian botanist Giovanni Battista Ferrari (Joannes Baptista Ferrarius), 1584–1655, Jesuit of Siena, author of *Flora seu de florum cultura libri IV*. Romae, Etienne Paulin 1633, Io. Bapt. Ferrarii ... *Orationes*. Coloniae [1650?], *Nomenclator Syriacus*. Romae 1622, Joannis Baptistae Ferrarii *Senensis Orationes*. Quibus accessere Pleiades, sive orationes septem varii argumenti. Londini 1657 and *Hesperides, sive de malorum aureorum cultura et usu libri IV*. Romae 1646; see Philip Miller (1691–1771), *Figures of the most beautiful, useful, and uncommon plants described in the Gardeners dictionary*. 1: 187, t. 280. London [1755–] 1760, Filippo Arena (1708–1789), *La Natura e Cultura de' Fiori* etc. Cosmopoli 1771 [Arena was a Jesuit, florist and professor of mathematics in Palermo], Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 364. Ansbach 1852 and E.A. Bunyard, “Some early Italian gardening books.” *J. Roy. Hort. Soc.* 183–184. 1923, L. Polgar,

Bibliography of the History of the Society of Jesus. Rome 1967, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 103. Palermo 1988.

Ferraria glutinosa (Baker) Rendle (*Ferraria andongensis* (Baker) Rendle; *Ferraria bechuanica* Baker; *Ferraria candelabrum* (Baker) Rendle; *Ferraria hirschbergii* L. Bolus; *Ferraria randii* (Rendle) Rendle; *Ferraria viscaria* Schinz; *Ferraria welwitschii* Baker; *Moraea andongensis* Baker; *Moraea aurantiaca* Baker, nom. illeg.; *Moraea candelabrum* Baker; *Moraea glutinosa* Baker; *Moraea kitambensis* Baker; *Moraea malangensis* Baker; *Moraea malangensis* Baker, nom. illeg.; *Moraea randii* Rendle; *Moraea spithamaea* Baker; *Moraea viscosa* R.C. Foster)

Zaire, Cape Prov. Bulbous herb, flattened stems, creamy yellow flowers

See *Cat. Afr. Pl.* 2: 27. 1899 and *Journal of South African Botany* 45: 295–375. 1979, *Annals of the Missouri Botanical Garden* 66: 856–861. 1979, *Annals of the Missouri Botanical Garden* 84: 285–304. 1997

(Corm poisonous to rabbits.)

Ferreyranthus H. Robinson & Brettell Asteraceae

Dedicated to the Peruvian botanist Ramón Alejandro Ferreyra, b. 1912, among his writings are “Las lomas costaneras del extremo sur del Perú.” *Bol. Soc. Argent. Bot.* 9: 87–120. 1961 and *Estudio Sistemático de los Algarrobos de la Costa Norte del Perú*. Ministerio de Agricultura, Instituto Nacional Forestal y de Fauna. Lima, Peru 1987.

Ferreyranthus verbascifolius (Kunth) H. Rob. & Brettell (*Andromachia verbascifolia* Kunth; *Ferreyranthus pseudo-salviifolius* (Hieron.) H. Rob. & Brettell; *Liabum pseudo-salviifolium* Hieron.; *Liabum salviifolium* Hieron.; *Liabum verbascifolium* (Kunth) Less.)

Peru.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 79. 1820[1818], *Linnaea* 6(4): 700. 1831 and *Phytologia* 28(1): 50. 1974, *Arnaldia* 2(2): 7–23. 1994

(Veterinary medicine, infusion to bathe bruises.)

in Ecuador: cotaj, kotah

Ferula L. Apiaceae (Umbelliferae)

Latin *ferula*, *ae* for the plant fennel-giant, the thin or slender branch of a tree and a rod, Akkadian *per'u*, *pir'u*, *perhu*, Hebrew *perah*, Arabic *farh* ‘blossom, sprout’; see Carl Linnaeus, *Species Plantarum*. 1: 246. 1753, *Genera Plantarum*. Ed. 5. 117. 1754, *Icones Plantarum* 1: 20. 1829, *Nuovo Giornale Botanico Italiano* 4: 214. 1872 and Korovin,

Evgenii (Yevgeni, Eugeny) Petrovich (1891–1963), *Generis Ferula* (Tourn.) L. *monographia* illustrata. Taschkent, 1947.

Ferula bungeana Kitagawa (*Peucedanum rigidum* Bunge)

China, Japan.

See *J. Jap. Bot.* 31: 304. 1956

(For indigestion.)

in China: ying a wei

Ferula communis L. (*Ferula abyssinica* Hochst. ex A. Rich.; *Ferula communis* subsp. *sousseensis* El Alaoui-Faris & Cauwet-Marc; *Ferula communis* var. *brevifolia* (Link) Mariz; *Ferula communis* var. *littoralis* El Alaoui-Faris & Cauwet-Marc; *Ferula ferulago* L.)

Northern and Eastern Africa, Mediterranean. Parsley-like, very aromatic, finely divided leaves, absence of bracts at the base of the inflorescences

See *Species Plantarum* 1: 246. 1753 and *Boletim da Sociedade Broteriana*, ser. 2 48: 171–186. 1974, *Lagascalia* 7: 191–216. 1978, *Biologie-Ecologie Mediterranee* 8: 101–118. 1981, *Botaničeskij Žurnal* (Moscow & Leningrad) 67 (9): 1228–1237. 1982, *Fl. Libya* 117: 98. 1985, *Acta Botanica Barcinonensia* 45: 217–239. 1998, *Flora Mediterranea* 8: 221–245. 1998

(Suspected of poisoning.)

in English: common giant fennel, giant fennel

in Arabic: kelkh, kelkha

Ferula conocaula Korovin

China.

See *Monogr. Ferula* 33. 1947

(Diaphoretic.)

in China: yuan zhui jing a wei

Ferula feruloides (Steudel) Korovin (also *ferulaeoides*) (*Peucedanum feruloides* Steudel, also *ferulaeoides*)

China. Leaves cattle fodder

See *Monogr. Ferula*. 77. 1947

(A substitute for the traditional Chinese medicine *a wei*, *Ferula assafoetida* Linnaeus.)

in China: duo san a wei

Ferula foetida (Bunge) Regel (*Ferula assa-foetida* L.; *Ferula assafoetida* L.; *Scorodosma foetidum* Bunge)

India.

See *Species Plantarum* 1: 246, 248. 1753 and *Botaničeskij Žurnal* (Moscow & Leningrad) 67(9): 1228–1237. 1982

(Gum resin from tap root useful in cough, cold, gout, paralysis, cataract, low blood pressure. Resin vermifuge, to relieve

pain associated with toothache, to kill gastrointestinal parasites; seeds purgative for children.)

in India: hing, hingra, hingu, inguva, kayam, perungayam

in Pakistan: hing, hing patrak, patrak

in Tibetan: shing-kun

Ferula fukanensis K.M. Shen

China.

See *Acta Phytotax. Sin.* 13(3): 89. 1975

(Laxative.)

in China: fu kang a wei

Ferula krylovii Korovin

China, Eurasia.

See *Sist. Zamecki Mater. Gerb. Krylova Tomsk. Gosud. Univ. Kujbyševa.* 2–3: 2. 1934

(Astringent, for dysentery.)

in China: tuo li a wei

Ferula kuhistanica Korovin (*Ferula jaeschkeana* Vatke; *Ferula jaeschkeana* var. *parkeriana* O.E. Schulz; *Ferula jaeskeana* C.B. Clarke; *Peucedanum jaeschkeanum* (Vatke) Baill.; *Peucedanum jaeschkeanum* Baill.)

India, Middle Asia. Tall perennial herb, yellow flowers, leaves as fodder

See *Bot. Med.* ii. 1043. 1884 and *Fl. URSS*, xvii. 89. 1951, *Naucn. Dokl. Vyss. Shkoly, Biol. Nauki.* 7: 90–95. 1977, *Index Seminum [Berlin]* App. 2. 1876 and *Taxon* 29: 543. 1980, *Botaničeskij Žurnal* (Moscow & Leningrad) 67(9): 1228–1237. 1982

(Gum resin applied for relieving toothache; latex/resin from the roots applied on wounds, bruises and on pimples; paste from the roots applied to join broken bones and also for rheumatism. Blood purifier, digestive, stimulant. Veterinary medicine, plant given to horses to increase their strength.)

in China: zhong ya a wei

in India: chuklam, ghora ghass, hapat kanpapor, jangli heeng, jungli-hing, kaidmoh, kaith, kalassh, sampharu, yang

Ferula lehmannii Boissier

China.

See *Fl. Orient.* 2: 992. 1872

(Against toothache.)

in China: da guo a wei

Ferula narthex Boiss. (Latin *narthecium*, ii ‘an ointment-box, a medicine-chest’, Greek *narthex*, *narthekos* ‘rod, giant fennel, casket’, used by Theophrastus (*HP.* 1.2.7) and Plinius for *Ferula communis*, *narthekion* ‘small splint, small rod’)

India.

See *Flora orientalis* [Boissier] 2: 994. [Dec 1872 or Jan 1873]

(The resin along with root paste of *Papaya* used for abortion.)

in India: hinguka

Ferula olivacea (Diels) H. Wolff (*Peucedanum olivaceum* Diels)

China.

See *Symb. Sin.* 7: 727. 1933

(Emetic.)

in China: lan lü a wei

Ferula sinkiangensis K.M. Shen

China.

See *Acta Phytotax. Sin.* 13(3): 88. 1975

(Purgative.)

Ferula teterrima H. Karsten & Kirilov

Eurasia, China.

See *Bull. Soc. Imp. Naturalistes Moscou* 15: 363. 1842

(Analgesic.)

in China: xiu a wei

Ferula thomsonii C.B. Clarke

India, Himalaya.

See *The Flora of British India* [J.D. Hooker] 2: 708. 1879

(Used for cuts, bruises, wounds.)

Festuca L. Poaceae (Gramineae)

From the Latin *festuca*, *ae* ‘a straw, stalk’ but also ‘a straw-like weed among barley, *Avena sterilis* L. or *Aegilops ovata* L.’ (Plinius), Akkadian *desu* ‘broken, smashed’, *dasu* ‘to thresh’; a difficult genus close to *Poa* and *Bromus*, the closely related genus *Vulpia* C.C. Gmelin has an annual habit, intergeneric hybrids with *Vulpia* C.C. Gmelin, *Lolium* L. and *Bromus* L., see *Species Plantarum* 1: 73–74, 83. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Essai d'une Nouvelle Agrostographie* 99, 162, 177, pl. 19, f. 2. 1812, *Systema Vegetabilium* 698–710. 1817, *Synopsis Florae Germanicae et Helveticae* 813. 1837, *Florae Africae Australioris Illustrationes Monographicae* I. Dumort.; *Schedonorus elatior* (L.) P. Beauv.)

Europe, temperate Asia, NW Africa. Long-lived perennial bunchgrass, erect and stout, tufted, green to dark green, hollow, herbaceous, aggressive and vigorous, unbranched, forms heavy clumps, sometimes tussock forming, almost reedlike, deep-rooted, roots tough and coarse, short-rhizomatous or without rhizomes, rarely stoloniferous, grain compressed and reddish, planted as a pasture grass, cultivated for hay and fodder, turf, forage, palatable when young and succulent, coarse and tough when mature, noxious and invasive weed, potential seed contaminant, ornamental, drought resistant, resistant to trampling, tolerant of poor drainage and seasonal flooding, ground cover, excellent soil improver, colonizes bare soil, useful in rehabilitation and watershed protection,

suitable for reclamation of surface mines and for erosion control, occasionally referred to as *Festuca elatior* L.

See *Species Plantarum* 1: 64, 75. 1753, *Spicilegium Florae Lipsicae* 57. 1771, *Tentamen Florae Germanicae* 2: 141. 1789, *Essai d'une Nouvelle Agrostographie* 177, pl. 19, f. 2. 1812, *Monographia Festucarum Europearum* 152, 154. 1882 and *Brittonia* 19: 131. 1967, *Bothalia* 16: 59. 1986, Clay K., “Effects of fungal endophytes on the seed and seedling biology of *Lolium perenne* and *Festuca arundinacea*.” *Oecologia* 73: 358–362. 1987, *Taxon* 40: 135–137. 1991, *Novon* 3(3): 241. 1993, D.J. (Seed purgative, antidote, for snakebites. Endosperm eaten in a small amount to treat persistent cases of intestinal parasites, too large dose said to be fatal.)

in Brazil: jatobá

in Central America: dunawo

in Peru: habilla grande

Fibraurea Lour. Menispermaceae

From the Latin *fibra*, *ae* 'a fiber, filament' and *aureus*, *a*, *um* 'of gold, golden', *Fibraurea recisa* Pierre yields a yellow dye, see *Flora Cochinchinensis* 2: 600, 626. 1790.

Fibraurea chloroleuca Miers

SE Asia. Climbing shrubs, yellow flowers in large axillary panicles

See *Contributions to botany, iconographic and descriptive* 3: 42. 1871

(Root decoction as a postpartum remedy; stem in dysentery and diabetes. For ulcerated nose, inhale the smoke of chips of the wood.)

Malay name: kekunyet

Fibraurea recisa Pierre

SE Asia.

See *Fl. For. Cochinch.* 2: t. 111. 1885

(Astringent, for diarrhea.)

in China: tian xian teng

Fibraurea tinctoria Lour.

SE Asia.

See *Flora Cochinchinensis* 2: 600, 626. 1790, *Flora Cochinchinensis*, denuo in Germania edita 679. 1793

(Stem astringent, antipyretic, antiviral, for dysentery, influenza, infectious hepatitis.)

in China: huang teng

Ficus L. Moraceae

Latin *ficus*, *i* and *ficus*, *us* for a fig-tree, *Ficus carica* L. or the edible fruit of the fig-tree, Greek *sykon* 'fig', Akkadian *piqu* or *siqu* 'narrow', *piaqum*, *siaqum* 'to be narrow'; see Carl Linnaeus, *Species Plantarum*. 2: 1059–1060. 1753, *Genera Plantarum*. Ed. 5. 482. 1754, Gasparrini, Guglielmo (1804–1866), *Nova Genera*, quae super nonnullis Fici speciebus struebat 7, 10. Neapoli, 1844, *Ricerche sulla natura del caprifico, e del fico; e sulla caprificazione*. Napoli, 1845, *London J. Bot.* 7: 436. 1848, *Gen. Pl.* [Endlicher] Suppl. 4(2): 35. 1848, *Fl. Ned. Ficus abutilifolia (Miq.) Miq. (*Ficus soldanella* Warb.; *Urostigma abutilifolium* Miq.)

South Africa. Tree, twisted or contorted trunk, whitish to yellowish white bark, fruits borne singly or in pairs in the leaf axils on terminal branchlets, fruits eaten, resembling *Ficus tettensis* and *Ficus glumosa*

See *London J. Bot.* 6: 551. 1847, *Annales Museum Botanicum Lugduno-Batavi* 3: 288. 1867 and *Vierteljahrsschr.*

Naturf. Ges. Zürich li. 136. 1906, Hutchings, A. *Zulu Medicinal Plants: An Inventory*. University of Natal Press, Pietermaritzburg. 1996

(Leaves decoctions taken to promote fertility; plant milky latex to remove skin warts.)

in English: large-leaved rock fig, rock fig, rock wild fig

in Nigeria: yandi (Hausa)

in Southern Africa: grootblaarrotsvy, klipvy, monokane, rotsevy, tshikululu; iNkokhokho, uBambematsheni, imPayi (Zulu); amPhayi (Thonga); mohawa (Western Transvaal, northern Cape, Botswana); momelantsweng, moomela-ntsweng (= cling to rock) (Ngwaketse dialect, Botswana)

Ficus adenosperma Miq. (*Ficus adenosperma* var. *chaetophora* (Warb.) Corner; *Ficus adenosperma* var. *glabra* Corner; *Ficus chaetophora* Warb., K. Schum. & Lauterb.; *Ficus depressa* Benth.; *Ficus frutescens* F.M. Bailey; *Ficus pauper* King; *Ficus turbinata* Ridley)

Australia, Celebes, Moluccas. Tree, leaves alternate, figs globose, in primary and secondary forest

See *International Journal of Crude Drug Research* 25: 171–176. 1987, *J. Ethnopharmacol.* 37(3): 179–96. 1992

(Latex from the leaves applied to sores, boils and scabies; drink sap with water for diarrhea. Fresh roots chewed to treat malaria. Used in the treatment of tuberculosis and persistent respiratory ailments, bark anti-mycobacterial. Maternity plant.)

in Indonesia: fangkis, nusu, tintinalino

in Papua New Guinea: simpia

Ficus alba Reinw. ex Blume

Malaysia.

See *Bijdragen tot de flora van Nederlandsch Indië* 9: 476. 1826[1825]

(For kidney complaints drink the leaves decoction.)

Malay name: semelit dadeh

Ficus altissima Blume

India, Himalaya. Tree, rounded crown, orange-red fruits

See *Bijdragen tot de flora van Nederlandsch Indië* 9: 455. 1825

(Used in Ayurveda and Sidha.)

in English: council tree, false banyan, lofty fig

in India: corakapatra, gadgubar, gadgular, goli, kallatti, nandivrksha, uromavirukam, uromavirukamaram

Ficus americana Aubl. (*Ficus americana* subsp. *guianensis* (Desv. ex Ham.) C.C. Berg; *Ficus chiribiquetensis* Dugand; *Ficus chiriquiana* (Miq.) Miq.; *Ficus clusiifolia* (Miq.) Schott ex Spreng.; *Ficus corpulenta* Pittier; *Ficus erratica* Standl.;

(White latex mild vermifuge, styptic, antiseptic, applied to bleeding cuts and wounds.)

in English: jacquinia-leaved fig, Werckle's rubber tree, West Indian laurel, West Indian laurel fig

Ficus ampelos Burm. f. (*Ficus ampelas* Burm. f.; *Ficus blepharosepala* Warb.; *Ficus kingiana* Hemsl.; *Ficus soro-nensis* King; *Ficus tashiroi* Maxim.)

Taiwan to the Philippines. Tree, evergreen, leaves distichous, red-purple figs axillary and clustered on twigs, fruits eaten raw or cooked, in primary and secondary lowland forest

See *Flora Indica ... nec non Prodromus Florae Capensis* 226. 1768, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 32: 621. 1888

(Latex diuretic, taken internally to treat diarrhea. Warm leaves onto sores; for headache eat fruit with 2–3 seeds.)

in Indonesia: hampelas, pila, rempelas

in Philippines: upling-gubat

in Madagascar: ampaly

Ficus amplissima Sm. (*Ficus indica* Willd.; *Ficus pseudobenjamina* Miq.; *Ficus tsiela* Roxb. ex Buch.-Ham.; *Ficus tsiela* Roxb.; *Urostigma pseudobenjamineum* Miq.)

India. Tree, slender, weak, epiphytic, spreading branches, white smooth bark, figs axillary and on twigs below the leaves, sweet ripe fruits eaten

See *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1146. 1806, *The Cyclopaedia*; or, universal dictionary of arts, ... 14: no. 1. 1810, *Hort. Bengal.* 66. 1814, *London J. Bot.* 6: 566. 1847, *Ann. Mus. Bot. Lugduno-Batavi* 3: 286. 1867

(Used in Ayurveda. Pounded bark in water used in stomachache and gastric disorders; latex to increase lactation in women.)

in India: aali, basuri, basurimara, bili basari, bilibasuri, bovinamara, candrata, dodda basari, gardabhaande, hebbasuri, ichi, jatini, juvvi, juvvi mara, kaela, kal-ichchi, parkati, payer, peddajuvvi, pimpari, pimpri, pipri, pittajuvvi, plaksa, tsjela, vatiplaksa

in Sri Lanka: ela-nuga, kalatti

Ficus apiocarpa Miq.

Indonesia, Malay Peninsula. Climber

See *Annales Museum Botanicum Lugduno-Batavi* 3: 289. 1867

(Young leaves poulticed to draw out infection and pus from boils and abscesses.)

in Borneo: entaban

Ficus arnottiana (Miq.) Miq. (*Ficus arnottiana* var. *courtalensis* (Miq.) Miq.; *Ficus emodi* Wall.; *Ficus emodi* (Miq.) Miq.; *Pogonotrophe emodi* Miq.; *Urostigma arnottianum* Miq.; *Urostigma caulobotryum* Miq.; *Urostigma courtalense* Miq.)

India.

See *Numer. List* [Wallich] n. 4515. 1831, *London J. Bot.* 6: 564, 568. 1847, *London J. Bot.* 7: 73. 1848, *Ann. Mus. Bot. Lugduno-Batavi* 3: 287. 1867

(Used in Ayurveda and Sidha. Pungent and astringent, used for blood diseases, vertigo and delirium. Latex for wound maggots.)

in India: aashaa, amakanniyam, amakanniyam, asti, aswathom, bettaarali, bettada arali, bettadarali, bettadarali mara, bettaragi, bettarasi, bhodhidruva, bondaraavi, cirat-tiyacam, cotivalpipri, ka-arasu, kaadaarasa mara, kaadalage, kaadarasi, kaadashwathha, kaadattasu, kaadu ashwatha, kaaduashwaththa, kaatotasu, kadarase, kadarasu, kadasvattha, kadelage, kadelege, kaduashvattha, kaduasvattha, kaduattasa, kagoli, kakoli, kalasi, kalla ravi, kallaaswattha, kallaalholi, kallal, kallaraavi, kallaraci, kallarase, kallarasi, kallarasu, kallaravi, kallarayal, kallashwatha, kapitanah, karunkumiri, katachi, katattasu, katuattasu, kenalige, kenelege, kodi arasu, kodyarasu, kolikkal, konda ravi, kondaraavi, kondaravi, kon-takai, kontakaiyaracumaram, kotiyaracu, kotiyarasu, kulasi, lapitanah, nandi, nandyavartah, paras pipal, paraspipal, parishah, payr, plaksa, plaksah, plaksha, plaksha mara, plokhyo, pushaval, raavi, ravi, tanavan, tanavanmaram, tevavaracu

in Sri Lanka: kaputu-bo, kaudu-bo, patana-bo

***Ficus asperifolia* Miq.**

East Africa. Scandent shrub, lianescent, scrambling, stem producing white latex, syconia bright light orange maturing red-orange, ostiole circular with all scales horizontal to descending, ripe fruit hispid, on dry stream bank, along river in sandy bank

See *London Journal of Botany* 7: 231, 564, f. 15B. 1848 and Ajose, Frances O.A. "Some Nigerian plants of dermatologic importance." *International Journal of Dermatology* 46(Suppl. 1): 48–55. 2007

(Ripe fruit hispid with urticating hairs. Leaves recorded to be poisonous or harmful to cattle. Leaves and fruits antiseptic, for cough, hemorrhoids, fever, urogenital disorders. Leaf gastrointestinal protective, oxytocic, nematicidal, diuretic, hypotensive; a maceration of the leaf taken as an oxytocic, while a leaf decoction or infusion drunk as an abortifacient. Leafy shoot taken for the treatment of dysentery, applied externally against jaundice or drunk as a diuretic. Bark decoction taken against worms, dizziness, hemorrhoids, heart problems, to relieve cough, to stop bleeding. Sap from the stem bark used for the treatment of wounds, sores, abscesses, eye ailments, stomachache and for the removal of splinters. Root tonic, anthelmintic, for the treatment of urinary tract ailments, gonorrhoea, asthma and tuberculosis, cough, eye problems. Stem bark and leaf ingredients of arrow poisons.)

in Congo: amasokasoka

in Tanzania: mkuruguta, mkuyu

***Ficus asperrima* Roxb. (*Ficus asperrima* Teijsm. & Binn.)**

India.

See *Ned. Kruidk. Arch.* iii. 402. 1855 [*Nederlandsch Kruidkundig Archief. Verslagen en Mededelingen der Nederlandsche Botanische Vereeniging.*]

(Used in Ayurveda and Sidha. Antibacterial.)

in India: adaviyatti, andapaje, andapajevu garagasaye, garagatti, gargata, gargatti, garugatti, gerguttee, gergutti, irambarathan, irambarattam, irambarattan, irambarathan, kalmnor, kalumar, karaka boddu, karakabodda, karakarabudi, karakarbooda, karakarbunda, karasa, karasana, karasaana, khargas, kharoti, kharvamt, kharvat, kharwat, khatwat, korotosano, kullakith, kuragasayeli, kurugasiyelli, malandiniyatti, malantinniyatti, maramthinniatthi, olaparam, pechi, pethi, picci, pindichettu, shakataka, sheoda, siri-bodda, terakam, teregam, theragam

***Ficus aurantiaca* Griff. (*Ficus aurantiaca* var. *parvifolia* Corner; *Ficus callicarpa* Miq.; *Ficus kallicarpa* Miq.; *Ficus lanyuensis* S.S. Ying; *Ficus megacarpa* Merr.; *Ficus pomifera* Kurz; *Ficus terasoensis* Hayata)**

SE Asia. Tree, climber, latex, leaves elliptical to obovate, figs cauliflorous pear-shaped red to black with white spots, in lowland, montane forest

See *Notulae ad Plantas Asiaticas* 4: 394. 1854 and *Publications of the Bureau of Science Government Laboratories* 17: 14. 1904, *Icones plantarum formosananum nec non et contributiones ad floram formosanam*. 8: 116–117, pl. 39 & 40, f. 3–4. 1919, *The Gardens' Bulletin Singapore* 18(1): 23. 1960, *Coloured Illustrations of Plants of Taiwan* 1: 435. 1987

(Fruits poisonous. Leaf shoots heated and applied as a poultice on skin itches; pounded leaves to treat fever and toothache.)

in China: cheng huang rong

in Indonesia: oyod santenan

in Malaysia: akar jalar-jalar, akar pala-pala, ipi kelah, tengkok biawak hitam, teriak

in Vietnam: sung cam

***Ficus aurea* Nutt. (*Ficus aurea* var. *latifolia* Nutt.; *Ficus jimenezii* Standl.; *Ficus lundellii* Standl.; *Ficus tecolutensis* (Liebm.) Miq.; *Ficus tuerckheimii* Standl.)**

USA, Florida. Tree, dark green leaves, glabrous green stipules, figs sessile, red fruits

See *The North American Sylva* 2(4): pl. 43. 1846 and *Taxon* 54(2): 532. 2005

(Drink fig's milky juice for burning or pain. Leaves infusion for coughs and hoarseness.)

in English: Florida strangler fig, golden fig, strangler fig

***Ficus auriculata* Lour. (*Ficus macrocarpa* Blume; *Ficus macrocarpa* H. Lévesq. & Vaniot; *Ficus macrocarpa* King; *Ficus macrocarpa* Gasp.; *Ficus macrocarpa* Hügel ex Miq.; *Ficus macrocarpa* Wight ex Miq.; *Ficus roxburghii* Wall. ex Miq.; *Ficus roxburghii* Wall.; *Ficus roxburghii* Miq.)**

Nepal, China. Trees, leaves subcoriaceous, stipules triangular, fruits minutely tuberculate, ripe sweet fruits eaten, latex used for catching birds

See *Flora Cochinchinensis*, denuo in Germania edita 2: 666. 1790, *Cat. Gew. Buitenzorg* (Blume) 36. 1823, *Bijdr. Fl. Ned. Ind.* 9: 459. 1825, *Numer. List* [Wallich] n. 4508. 1831, *Ric. Caprifico* 78. 1845, *London J. Bot.* 7: 74, 456. 1848, *Ann. Mus. Bot. Lugd.-Bat.* 3: 269. 1867, *FBI* 5: 534. 1885, *Ann. Roy. Bot. Gard.* (Calcutta) i. (1888) 166, t. 208. 1888

(Latex applied on skin diseases and breast ulcers. Bark pounded and applied on itches and skin diseases; bark decoction with honey is given as blood purifier; bark juice of *Ficus auriculata* with bark of *Albizia lebeck* and *Ficus rumphii* applied on pox; latex of *Euphorbia neriifolia* mixed with dry powdered bark of *Ficus auriculata* and *Streblus asper* given in discharge of blood in urine. Stem bark and fruits astringent, anthelmintic, to treat diarrhea. Roasted figs for diarrhea and dysentery. A decoction of roots of *Dillenia indica* with roots of *Ficus auriculata* and *Urena lobata* given in discharge of blood in urine. Veterinary medicine, leaves decoction given to cattle for enhancing milk production.)

in China: da guo rong

in India: fagoora, lauthebi-araung, mura, phagoora, raj dum-miri, theibal, tiamble, timla, timul, tirmal

in Nepal: maku

Ficus baeuerleinii King (*Ficus hollrungii* Lauterb. & K. Schumann; *Ficus laurentina* Diels; *Ficus mespiloides* King)

New Guinea. A large climber, stem red when cut, leaves elliptical, figs axillary solitary or paired depressed globose rose-red, in lowland forest

See *Journ. Asiat. Soc. Bengal* II, 55: 408. 1887 and *International Journal of Crude Drug Research* 21: 121–133. 1983

(Latex of the inner bark drunk to treat diarrhea and dysentery.)

in Papua New Guinea: ohota

Ficus benghalensis L. (*Ficus cotoneaefolia* Vahl; *Ficus cotoneaefolia* Vahl; *Ficus cotoneaefolia* Hort. ex Miq.; *Ficus cotoneifolia* Vahl; *Ficus cotonifolia* Stokes; *Ficus indica* L.)

India. Tree, wide spreading, fast growing, deciduous to evergreen, many aerial roots, abundant sticky milky-white latex, leaves coriaceous arranged spirally, figs paired, red fruits in axillary pairs round and downy, monsoon and rain forests, evergreen to deciduous lowland forest

See *Species Plantarum* 2: 1059–1060. 1753, *Species Plantarum*, Editio Secunda 1514. 1763, *Enumeratio plantarum* [Vahl] 2: 189. 1805, *Bot. Mat. Med.* iv. 355. 1812, *Ann. Mus. Bot. Lugduno-Batavi* iii. 299. 1867 and *Plant Systematics and Evolution* 156: 1–4. 1987

(Used in Ayurveda, Unani and Sidha. Leaves diaphoretic, aphrodisiac, astringent, useful in treatment of biliousness,

ulcers, vomiting, vaginal complaints, fever, inflammations, dysentery and diarrhea; paste of soft leaves applied on cuts and injuries to relieve pain, also for abdominal pain; for neuritis leaves tied over the affected area. Stem decoction with water taken for dysentery; young shoots used for pregnancy. Bark tonic, astringent, diuretic, antidiabetic; stem bark of *Ficus benghalensis* and root bark of *Ficus religiosa* made into a paste and eaten to cure diabetes; extract of bark of *Wattakaka volubilis* with barks of *Soymida febrifuga* and *Ficus benghalensis* taken for bone fracture; bark of *Ficus virens* with barks of *Wattakaka volubilis* and *Ficus benghalensis* extract given for bone fracture; stem barks of *Ficus virens*, *Ficus benghalensis*, *Dalbergia sissoo*, *Mangifera indica* and *Tamarindus indica* boiled and the extract given to cure leucorrhea; birth control by prevention of pregnancy, the bark of mature stem of *Ficus benghalensis* dried and powdered with the fruits of *Embelia ribes*. Latex aphrodisiac, tonic, vulnerary, useful in piles, sexual weakness, eye troubles, gonorrhoea, against pains and fever, seminal emissions, rheumatism and lumbago, toothache, given to children in fever and dullness; for knee pain in children, milky latex massaged over the knee; milky latex given for loose motions; white latex applied on affected area of mumps, ringworm and for healing of foot cracks and to treat bleeding and swelling of gum; milky latex of leaves has special healing properties; latex against wound maggots. Roots and aerial roots styptic, useful in syphilis, dysentery, persistent vomiting; aerial roots decoction given to treat spermatorrhea; bark of *Dalbergia lanceolaria* along with prop roots of *Ficus benghalensis* and bark of *Oroxylum indicum* crushed with water and the extract given for jaundice. Fruits tonic, aphrodisiac and cooling. Sacred plant, holy tree, used in religion and magico-religious beliefs, considered equivalent to God Brahma; ingredient of *Patra pooja* in different religious *pooja* ceremonies; worship tree, rain-making through sacrifices in the sacred forest. Veterinary medicine, young prop roots fed for maggot wounds; latex from leaf applied on maggot wounds.)

in English: banyan, banyan tree, East Indian fig tree, Indian banyan

in Burma (Myanmar): pyi-nyaung

in China: jung

in India: aaladamara, achhaya, al, ala, alada, alada mara, alam, alamarom, alamarum, avaroha, bad, bahupada, bahu-pada-kandhajanma, bahupadakandhajanma, bahupadaskan-daja, bahupadi, bar, bara, bargad, bargada, bargat, barh, bat, bhandira, bhringi, bor, boro, bot, chira, dhruva, goli, jatala, jatalo, jatiljati, karmaja, khongnangbot, khongnang-bot, kshiri, mah, mana, mandali, marichettu, marri, marrichettu, nandi, nila, nyagrodha, nyagrodhah, padarohona, paeral, patanga, peddamarri, peral, raktaphala, raktaphalah, rohina, shikhandin, shipharuha, shungi, skandaja, skandhaja, skandhjanya, skandharuha, sriksha, sungivanaspati, vad, vada, vadlo, vaishravanavas, vaisravanalaya, vanaspati, vat, vata, vatah, vatakshiram, vati, vatpatra, vitapi, vor, vrikshanath, wad, war, watam, yakshataru, yakshavas, yamapriya

in Indonesia: beringin India

in Japan: ban-garu-bodai-ju

in Malaysia: ara tandok, banyan, bohdi

in Nepal: bar, barahar, borhar

in Tibet: nya gro dha, nya-gro-dha

in Vietnam: da l[as] tr[of]n

Ficus benjamina L. (*Ficus cuspidato-caudata* Hayata; *Ficus cuspidatocaudata* Hayata; *Ficus haematocarpa* Blume ex Decaisne; *Ficus nitida* Thunberg; *Ficus pope-noei* Standl.; *Ficus pyrifolia* Salisb.; *Ficus retusa* Linnaeus var. *nitida* (Thunberg) Miquel; *Urostigma benjamina* (Linnaeus) Miquel; *Urostigma benjaminum* (Linnaeus) Miquel; *Urostigma haematocarpum* (Blume ex Decaisne) Miquel) (The name probably refers to the supposed relation of the plant to the source of a resin or benzoin procured from the Orient in antiquity, or the specific epithet from banyan, Sanskrit *baniij*.)

India, Indonesia, Malaysia. Evergreen shrub or tree, huge, multiple-stemmed spreading strangler with multiple stilt roots, stem with white latex, drooping foliage, ripe fruit red-orange, fast-growing, extensive and strong root system

See *Syst. Nat.*, ed. 12. 2: 681. 1767, *Mantissa Plantarum* 1: 129. 1767, *Nova Genera, quae super nonnullis Fici speciebus struebat* 7. 1844, *London Journal of Botany* 4: 583. 1847 and *Publications of the Field Columbian Museum, Botanical Series* 4(8): 301. 1929, *Systematics Association Special Volume* 40(2): 131–135. 1989, *Clin. Exp. Allergy* 25(3): 199–201, 228–33. 1995, *Clinical & Experimental Allergy* 33(7): 971–977. 2003, *Allergy* 61(3): 393–394. 2006

(Bark extract for wounds and bruises. Latex mixed with alcohol used to treat shock. Cross-reactivity between *Ficus benjamina* latex and fig fruit in patients with clinical fig allergy. Skin irritation with itching, redness and stinging following contact and exposure to sunlight. There is some evidence that possibly a crossreactivity between latex of *Ficus benjamina* and latex from the rubber tree *Hevea brasiliensis*, a member of the Euphorbiaceae family, may exist.)

in English: benjamin tree, Java fig, Java tree, small-leaved rubber plant, tropic laurel, weeping fig

in Burma/Myanmar: kyet-kadut, nyaung-lun, nyaung-thabye

in China: chui ye rong

in India: chilubor, dieng jri, jaavaatthi, juvvi, kallichi, kamrup, khongnang-bot, kondagolugu, kondajuvvi, kuni, phrap raksang, phrap-rakseng, pilala, pimpri, pittajuvvi, pootrajoo-vee, pukar, puthrajuvvi, putra-juvi, putradzuvvi, putrajeevi, putrajuvvi, thellabarinka, thing-jaman, vellal, yerrajuvvi

in Malaysia: beringin, waringin

in Nepal: kabra

in Papua New Guinea: nong

in Sri Lanka: walu-nuga

Ficus bernaysii King

New Guinea. Small tree, small figs, sap milky

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 55: 406. 1887

(Leaves rubbed for body pains.)

in Papua New Guinea: diwa

Ficus botryocarpa Miq. (*Ficus barnesii* Merr.; *Ficus linearifolia* Elmer; *Ficus mindorensis* Merr.)

Papua New Guinea. Treelet, leafy twigs ferruginous-hairy, long flagelliform figs, figs cauliflorous paired subglobose, leaves and fruits edible, along rivers, in primary and secondary lowland to montane forest

See *Ann. Mus. Bot. Lugduno-Batavi* iii. 233. 1867

(Fruit latex cures sores, boils, ulcers.)

in Indonesia: bali susuk, delah, tarera intalun

in Papua New Guinea: simbahu

in Philippines: basikong, daing-daing

Ficus bussei Warb. ex Mildbr. & Burret

Tropical Africa. Tree, monoecious, spreading branches, stem with milky latex, syconia green with cream spots

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 213. 1911, *African Study Monographs* 1: 1–53. 1981, *Kew Bulletin* 43(1): 77–97. 1988, *Journal of Ethnopharmacology* 37: 93–112. 1992, *African Study Monographs* 24(1–2): 1–168. 2003, *South African Journal of Botany* 73(4): 642–649. 2007

(Powdered root taken for the treatment of impotence, cardiac pain, anxiety, madness and hysteria. Bark decoction drunk in case of retention of the afterbirth.)

in English: Busse's fig, Zambezi fig

in Tanzania: mkuyu, mtamba

Ficus callosa Willd. (*Ficus basidentula* Miquel; *Ficus cinerascens* Thwaites; *Ficus cordatifolia* Elmer; *Ficus malunuensis* Warburg; *Ficus porteana* Regel; *Ficus scleroptera* Miquel)

SE Asia. Large tree, semi-deciduous, crown conical to spreading, trunk straight, inner bark whitish, colorless sap, soft hairy simple leaves forming a whorl with a cordate base, from the leaf axis in pairs from a slender individual peduncle round fruits greenish gray and powdery, tiny brown seeds, propagation by giant bats, food for elephants, fine wood used for furniture, male, gall and female flowers within same fig, along roadsides and in urban areas, forests, forest margins

See *Plantae Junghuhnianae* 63. 1851, *Flora van Nederlandsch Indië* I 2: 314. 1859, *Ann. Mus. Ludg.-Bat.* 3: 295. 1859, *Gartenflora* 280. 1862, *Enumeratio Plantarum Zeylanicae* 266. 1864 and *Leaflets of Philippine Botany* 4: 1250. 1911, Markus Kappeler, "Diet and feeding behaviour of the Moloch gibbon" in H. Preuschoft et al. *The Lesser Apes. Evolutionary and Behavioural Biology*. Edinburgh University Press, 1984, Tesoro, F.O. and J.U. Aday, *Properties and Uses of Some Philippine Woods*. Forest Product Research and Development Institute, DOST, College, Laguna. 1990, *Agroforestry Systems* 13(2): 159–176. 1991

(Used in Sidha/Siddha. Sap causes skin irritation and burning, depending on the degree of contact.)

in English: callose-leaved fig, hard fig, shiny-leaved fig

in China: ying pi rong

in India: andapaaajepu, anpeja, handir-alou, kadaplavu naayi vaate, koli-aal, kolial, koliyal, neerathi, neeruvaate, ney-apuram, nirati, niratti, nirpajaevu, nirpeja, tavadugoli, thau-dugoli, thawdugoli

in Philippines: hindang, kalukoi, taloot

in Sri Lanka: gonna, wal-gona

Ficus calopilina Diels (*Ficus setistyla* Warb.)

New Guinea. Tree, compact crown, smooth grey bark, milky sap and hairy twigs, leaves obovate-oblong to elliptic, lower surface densely hairy, upper surface scabrous, hairy figs flattened globose to broad-conical and borne on stiff branching twigs arising from the trunk and main branches, fruits edible, forest edges, roadsides, forest, foodplant for *Phyliris moira moira* (Grose-Smith)

See *Australian Journal of Entomology* 16 (3), 273–275. 1977

(Fruit latex used to cover sores.)

Ficus capreifolia Delile (*Ficus palustris* Sim, nom. illeg.; *Ficus palustris* K. Schum. & Lauterb.; *Ficus palustris* Hort. Berol. ex Kunth & C.D. Bouché)

Tropical Africa. Shrub or small tree, dioecious, scandent, milky latex, very rough leaves, syconium green, figs rough surfaced, leaf and fruits eaten

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 94. 1843, *Ind. Sem. Hort. Berol.* (1846) 15. 1846 and *Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 288. 1900 [1901 publ. Nov 1900], *Forest Flora and Forest Researches of Portuguese East Africa* 99. 1909

(Bark latex said to be urticant. Leaves fungicidal. Leaf sap or the powdered roots applied on syphilitic ulcers, wounds, abscess; leaf sap and a decoction of the root taken for the treatment of schistosomiasis.)

in English: river sandpaper fig, riverine sandpaper fig, rough-leaved fig, sandpaper fig, willow wild fig

in Southern Africa: skurwevy; umDubu, umDubu womfula, iFubi, iFibu (Zulu); phalavurha (Tsonga or Thonga); muBharanta, muKowe (Shona)

in S. Rhodesia: muKowe, umBharanta

in Tanzania: mshasha

Ficus carica L. (*Ficus carica* L. subsp. *rupestris* (Boiss.) Browicz; *Ficus ovata* var. *octomelifolia* (Warb.) Mildbr. & Burret)

Cosmopolitan. A small tree or large woody shrub, deciduous, branches round, white latex, leaves rough on the upper side coarsely downy beneath cordate, fruit solitary axillary more or less pear shaped or almost round, fleshy receptacle bearing staminate and pistillate flowers on its inner surface

See *Species Plantarum* 2: 1059. 1753, *Enumeratio Plantarum ... 2*: 185. 1805 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 244. 1911, *Taxon* 30: 508–509. 1981, *Fl. Iran.* 153: 7. 1982, *Journal of Plant Research* 108: 313–326. 1995, *Journal of Ethnopharmacology* 64(3): 255–258. 1999 [Anthelmintic activity of the latex of *Ficus* species.]

(Used in Ayurveda, Unani and Sidha. Bark bitter, tonic, febrifuge. Tea from leaves, against stomach pains; leaves infusion taken to raise body temperature in order to accelerate birth; leaves decoction with lime and alcohol from sugar cane drunk, medicine for women with menstruation; latex of leaves, fruits and young shoots used in skin diseases. Fruit cooling, tonic, laxative, antipyretic, purgative, aphrodisiac, lithotriptic, useful in diseases of head and blood, leprosy, in inflammation, weakness, paralysis, thirst, liver and spleen diseases, pain in chest; fruit decoction taken for easy delivery. Roots tonic and useful in leucoderma, ringworm. Milky juice expectorant, diuretic, vermifuge, applied for ring worm over the affected area.)

in English: brown Turkey fig, common fig, common fig tree, edible fig, edible fig tree, fig

in Arabic: karm, karma, karmous, karmus, kerma, teen, tine

in Mexico: higo, higuero, yaga yaxo castilla, yaxo castilla

in Portuguese: bebereira

in China: wu hua guo, wu hua kuo, ying jeh kuo, yu tan po

in India: anjeer, anjeer naya, anjeera, anjir, anjir zard, anjira, anjoora, anjooram, anjooru, anjra, anjura, anjuri, anjuru, appira, balas, cevatti, cimai atti, cimaiyatti, cikappatti, kakodomar, kakodumbar, manchi medi, mancimedi, manjimi, manjula, modipatu, phalgu, rajodumbara, seeme atthi, seemai aththi, seematti, seemayatti, shima-atti, shimai-atti, shimayatti, shime-atti, shimeatti, simaatti, simaiyatti, simayatti, simeatti, simeyam, simeyatti, simie attie pullum, taciaiyatti, teen, ten, ten-atti, tenatti, tene-atti, teneyatti, theneyatti, tin, udumbara, udumvara, utumparam

in Japan: ichijiku

in Sierra Leone: e-yambo, yungbi-yangbi

Ficus citrifolia Mill. (*Ficus botryapioides* Kunth & C.D. Bouché; *Ficus brevifolia* Nutt.; *Ficus caribaea* Jacq.; *Ficus caucana* Dugand; *Ficus citrifolia* subsp. *brevifolia* (Nutt.) A.E. Murray; *Ficus citrifolia* var. *brevifolia* (Nutt.) Miq.; *Ficus syringaefolia* Kunth & C.D. Bouché; *Ficus thomaea* Miq.; *Ficus turbinata* Pittier; *Urostigma giganteum* (Kunth) Miq.; *Urostigma laevigatum* (Vahl) Miq.; *Urostigma pedunculatum* (Dryand. ex Aiton) Miq.; *Urostigma populneum* (Willd.) Miq.; *Urostigma sancti-crucis* Liebm.; *Urostigma syringaefolium* (Kunth & C.D. Bouché) Miq.)

West Indies, Bolivia. Tree, aerial roots, pink hairy stipules, figs stalked, orange-yellow to dark purple fleshy fruit, small seeds, no parasitic feeding by the tree

See *The Gardeners Dictionary*: ... eighth edition no. 10. 1768 and *Revista Soc. Boliv. Bot.* 4(1): 81–129. 2003, *Ceiba* 44(2): 105–268. 2003 [2005], *Taxon* 54(2): 531. 2005

(Latex applied to wounds and infections.)

in English: Jamaica cherry, milk tree, shortleaf fig

in Dominica: figuier, fijyé

in Panama: saguagua, suu, tuu

Ficus conglobata King

India. Very good fodder

See *Annals of the Royal Botanic Garden. Calcutta.* 1: 99. 1888

(May poison the cattle if gall formation takes place.)

in India: nivaro

Ficus copiosa Steud. (*Ficus copiosa* var. *pubescens* Corner; *Ficus krausseana* Rechinger; *Ficus longipedunculata* Rechinger; *Ficus magnifolia* F. Muell.; *Ficus polycarpa* Roxb., nom. illeg., non Jacq.; *Ficus subinflata* Warb.)

Australia, Celebes, Moluccas. Tree or small tree, evergreen, not a strangler, leaves alternate to whorled often sandpapery, fruits can be produced along the stem and trunk, slightly depressed globular figs axillary to cauliflorous, male flowers

ostiolar, female flowers long-pedicellate, young leaves and figs eaten raw or cooked, fruit edible for humans, fig eaten by the endangered Cassowary, mutualist with the flying fox *Pteropus tonganus*, coastal and inland regions, in primary and secondary forest

See *Nomenclator Botanicus* [Steudel], ed. 2. 1: 635. 1840

(Unripe fruits chewed to relieve stomachache; fresh fruit latex applied to boils, sores; chew inside of branch for toothache. Fresh leaves eaten as a poison antidote; the roots and leaves used to treat stomachache; bark put on cuts. New leaves boiled and eaten to stop ability to get pregnant, then fruits eaten to regain fertility. Stomachache said to be relieved by massaging the stomach with crushed leaves.)

in English: fig, plentiful fig

in Indonesia: ampelas, gohi, sosa kecil

in Papua New Guinea: kagua, kandap, kumu mosong, kumu musong (= hairy vegetable), orang, orang gaman, surosai

Ficus cordata Thunb. (*Ficus cordata* Kunth & Bouchardlet; *Ficus cordata* Ridl.; *Ficus cordata* Thunb.; *Ficus cordata* Hort.Berol. ex Kunth & C.D. Bouché; *Ficus rupium* Dinter)

South Africa. Tree, shiny leathery leaves, greyish-white bark, milky latex, small fruits in pairs in leaf axils, bark used for tanning and dyeing of hides, leaves with latex unsuitable as a food source for wildlife

See *Ind. Sem. Hort. Berol.* (1846) 14, 15. 1846 and *J. Straits Branch Roy. Asiat. Soc.* 57: 93. 1911 [Jan 1911]

(Milky latex used as poultices over burns, boils, ringworm and external ulcers to draw out infection.)

in English: Namaqua fig

in South Africa: motlhatswa, melkboom, melkhout, omukuju

Ficus cordata Thunb. subsp. *lecardii* (Warb.) C.C. Berg (*Ficus lecardii* Warb.; *Urostigma cordatum* Thunb.)

West Africa. Shrub or tree, scandent, twisted, spreading, pink-reddish slash, latex white-cream, fruits yellowish or reddish when ripe

See *Ann. Mus. Congo Belge, Bot. sér.* 6, [1]: 24. 1904 [Jan 1904], *Kew Bull.* 43(1): 81. 1988

(Bark promotes lactation. Magic, ritual, rainmaker.)

Ficus cordata Thunb. subsp. *salicifolia* (Vahl) C.C. Berg (*Ficus eucalyptoides* Batt. & Trab.; *Ficus indica* Forssk., non L.; *Ficus pretoriae* Burtt Davy; *Ficus religiosa* Forssk., non L.; *Ficus salicifolia* Vahl; *Ficus salicifolia* Vahl forma *eucalyptoides* (Batt. & Trab.) Maire; *Ficus salicifolia* var. *australis* Warb.; *Ficus salicifolia* var. *teloukat* (Batt. & Trab.) Maire; *Ficus teloukat* Batt. & Trab.; *Urostigma salicifolium* (Vahl) Miq.)

Northern and Eastern South Africa, Tanzania. Tree, twisted, spreading, stem grey with milky juice, leaves dull

on both surfaces, small syconium pale green to red-yellow when ripe, stream bank, in kloofs along watercourses and rocky outcrops

See *Kew Bulletin* 43(1): 82. 1988, Myburgh J.G. et al. "A nervous disorder in cattle, caused by the plants *Ficus ingens* var. *ingens* and *Ficus cordata* subsp. *salicifolia*." *Onderstepoort J. Vet. Res.* 61(2): 171–6. 1994

(Latex toxic to camels. Milky latex used as poultices over burns, boils, ringworm and external ulcers to draw out infection.)

in English: wadi fig, willow-leafed fig

in Southern Africa: wonderboomvy, wonderboom, wonderboom fig, wildevy; isiGondwane, isiSantu (Zulu); inDhlaheni (Swazi); mohlatssa, mohlatsiso, monokane (North Sotho); motlhatsa, motlhatswa (Ngwaketse dialect, Botswana)

in S. Rhodesia: umKiwani

in Tanzania: msoko

Ficus crassiramea Miq. (*Ficus crassiramea* (Miq.) Miq.; *Urostigma crassirameum* Miq.)

Indonesia, Malay Peninsula. Strangling fig

See *Plantae Junghuhniana* 48. 1851, *Ann. Mus. Bot. Lugduno-Batavi* 3: 286. 1867

(Crushed leaves, bark and roots made into a paste applied to snakebite and wounds.)

Ficus crininervia Miq.

India, Himalaya.

See *Fl. Ned. Ind.*, *Eerste Bijv.* 3: 432. 1861

(Leaves for the treatment of jaundice.)

in India: lodishargua

Ficus dalhousiae Miq.

India. Tree

See *Annales Museum Botanicum Lugduno-Batavi* 3: 285. 1867

(Used in Ayurveda and Sidha. Antibacterial, leaves and bark used for skin diseases. Root bark for toothache.)

in India: kal-aal, kal-al, kall-al, kallal, kallala, kallalam, kallalan, koli maram, pei-aal, pei-al, perumputalam, perumputalamaram, peyal, somavalkhom, ulomatakari, ulomatakaram

Ficus dammaropsis Diels (*Dammaropsis kingiana* Warb.)

New Guinea. Small tree, leaves arranged spirally, male flowers in many rows, figs axillary solitary sessile covered with large bracts, edible fruits, rarely eaten but can be used as an emergency food, highland, on riverbanks, in montane forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 13: 296. 1891 and *Bot. Jahrb. Syst.* lxxvii. 204. 1935

(Stem latex to relieve the cough.)

in English: dinner plate fig

in New Guinea: kapiak

Ficus deltoidea Jack (*Ficus diversifolia* Blume; *Ficus diversifolia* var. *deltoidea* (Jack) Ridl.; *Ficus lutescens* Desf.; *Ficus motleyana* Miq.)

SE Asia. Treelet, evergreen epiphyte or small shrub, terrestrial, orange-red figs axillary solitary or paired globose to oblong, a variable species, on sandy shores, in lowlands and mountains

See *Malayan Miscellanies* ii. 7: 71. 1822

(It promotes contraction of the vagina, considered an aphrodisiac. Leaves and fruits used for regulating blood pressure, reducing blood sugar level, womb contraction after birth, reducing cholesterol and blood lipids, improving blood circulation, reducing piles pain, relieving nausea, a remedy against leucorrhoea. Latex a fish poison.)

in English: mistletoe fig, mistletoe rubber plant, rusty-leaved bush fig

in Indonesia: tabat barito

in Malaysia: ara burong, ara jelateh, ara tanah, mas cotek

Ficus donnell-smithii Standl. (*Ficus florenciana* Dugand; *Ficus floresina* Pittier)

Guatemala.

See *Contributions from the United States National Herbarium* 20(1): 21. 1917, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 4(30): 58. 1937, *Caldasia* 1(4): 44. 1942, *Fieldiana, Bot.* 24(4): 10–58. 1946, *Mus. West Africa, South Africa. Tree, strangler, rounded or spreading crown, aggressive root system, milky latex, young leaves brown-red-purple, stiff papery leaves, figs dark purple in pairs or singly along the branchlets, fruits sessile in clusters, fruit edible, mammals and birds eat the fruit, sometimes splitting the rock, in riverine fringe, on river bank, open woodland, in bushland and stony bushland

See *Annales Museum Botanicum Lugduno-Batavi* 3: 288. 1867 and Myburgh J.G. et al. "A nervous disorder in cattle, caused by the plants *Ficus ingens* var. *ingens* and *Ficus cordata* subsp. *salicifolia*." *Onderstepoort J. Vet. Res.* 61(2): 171–176. 1994

(The latex used as a substitute disinfectant for iodine. The leaves of *Ficus ingens* and *Ficus salicifolia* known to be toxic. Veterinary medicine, bark extracts to increase lactation.)

in English: red-leaf wild fig, red-leaved rock fig, wild fig

in Benin: nyianpenni

in Central African Republic: mopandja

in Guinea: ibbé, nyibble, tourou

in Nigeria: hon, kawari, kawuri

in S. Rhodesia: muTata

in Southern Africa: mohlatsa, motlhatsa, rooiblaarvy, wildevy; umDende, umDende-obomvu, umDenda obomu, umDenda, isiGondwane, iNkokhokho, umGonswane (Zulu); uLuzi, umThombe (Xhosa); moumo (Western Transvaal, northern Cape, Botswana); monokana, monokane, mohlatsa, moumo (North Sotho); tshikululu (Venda)

in Tanzania: kirikia, mkuyu, mlandege, mlumba, msombe, mulumba, mumu, mvila, mvumo, ndebela, ndola

in West Africa: nyianpenri

Ficus insipida Willd. (*Ficus anthelmintica* Mart.; *Ficus crassiuscula* Warb. ex Standl.; *Ficus glabrata* Kunth; *Ficus mexicana* (Miq.) Miq.; *Ficus radulina* S. Watson; *Ficus segoviae* Miq.; *Pharmacosycea angustifolia* Liebm.)

South America, Panama. Tree, large smooth buttresses, smooth, milky white latex, the tip of a branch has a long yellow pointed stipule which falls as the branch grows, leaves bright shiny green with yellow veins, fig inner surface lined, many birds and bats eat the fruits, in secondary forests, near lakes and riverbanks

See *Species Plantarum*. Editio quarta 4: 1143. 1806, *Nova Genera et Species Plantarum* (quarto ed.) 2: 47. 1817, *Bijdragen tot de flora van Nederlandsch Indië* 463. 1826, *Systema Materiae Medicae Vegetabilis Brasiliensis* 88. 1843, *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 333. 1851, *Verlagen en Mededeelingen van de Afdeeling Natuurkunde; Koninklijke Akademie van Wetenschappen* 13: 415–, 414. 1862, *Annales Museum Botanicum Lugduno-Batavi* 3: 299. 1867 and *Contributions from the United States National Herbarium* 20(1): 12. 1917, *Boletín del Instituto de Botánica Universidad de Guadalajara* 1(7): 481, f. 2. 1993[1995], *Journal of Ethnopharmacology* 64(3): 255–258. 1999 [Anthelmintic activity of the latex of *Ficus* species.], Hansson A. et al. "Reevaluation of risks with the use of *Ficus insipida* latex as a traditional anthelmintic remedy in the Amazon." *J. Ethnopharmacol.* 98(3): 251–257. 2005

(Milky juice anthelmintic, parasiticide, vermifuge, cytotoxic, laxative, antiinflammatory, tonic; effective poultice against external inflammation and ant stings, oral antiseptic. Fruit aphrodisiac. Possible antitumor activity in cancer cell lines.)

in Ecuador: higeron, ila, leche de ojé, ojé

Ficus johannis Boiss.

Iran, Pakistan. Tree, ripe purple fruits eaten by people

See *Diagnoses plantarum orientalium novarum*, ser. 1, 7: 96. 1846

(Tonic.)

Ficus lacor Buch.-Ham.

India. Tree, small deciduous treelet or shrub, used for rearing insects and producing lacs

See *Transactions of the Linnean Society of London* 15: 150. 1827

(Used in Ayurveda and Sidha. Bark decoction drunk to prevent the loss of memory.)

in India: ashvatthi, badijuvvi, bakri, banda juvvi, basari, basarigoli, bassari, chakar, chakkila, charudarshani, chela, chuvannal, dhedumbara, dridhapraroha, gandhaambar, gardabhandu, icci, ichchi, itti, ittiyal, jati, jati juvi, jovi, juvvi, kabbasari, kahimal, kahlimal, kaim, kallal, kallikki, kamandalutaru, kamarup, kandaralu, kapitana, karibasari, karibasari, karibasuri, karpuri, keoi, keol, khabar, kshiri, kurugatti, kurugu, lendva, lendwa, mahabala, malai-ichchi, pakar, pakari, pakri, pakur, parkataki, parkati, pepar, pilkhan, pimpari, pitana, plaksa, plaksha, plavaka, ramanjir, shringi, son-pakur, suparshva, suvi, ulabasari, varoha-shakhi, vati

in Tibet: sla ba

Ficus lacor Buch.-Ham. var. *lambertiana* M.F. Barrett

India.

See *American Midland Naturalist* 45: 153. 1951

(Used in Ayurveda.)

in India: plaksa, plaksha

Ficus lepreurii Miq. (*Ficus natalensis* Hochst. subsp. *lepreurii* (Miq.) C.C. Berg)

Tropical Africa. Tree

See *Annales Museum Botanicum Lugduno-Batavi* 3: 219. 1867

(Fruits and leaves for cough, viral infection, cold, inflammation.)

Ficus lucescens Blume (*Ficus lucescens* Miq.)

India. Tree, deciduous, aerial roots, pink to purple edible figs, leaves as fodder

See *Hortus Bengalensis*, or a catalogue ... 66. 1814, *Bijdragen tot de flora van Nederlandsch Indie* 9: 444. 1825 and *Phil. J. Sci.* 7: 413–415. 1912, Mary F. Barrett, “The case of the vanishing *Ficus racemosa*.” *Bulletin of the Torrey Botanical Club* 73(3): 312–325. 1946, *Amer. Mid. Naturalist* 45:118–183. 1951

(Pulp decoction for gargle.)

in India: echhimaram, kuru gatti, pakri

Ficus minahassae Miq.

Philippines.

See *Annales Museum Botanicum Lugduno-Batavi* 3: 231. 1867

(Leaves antirheumatic.)

in Philippines: aimit, arimit, ayimit, ayumit, businai, hagimit, hugimit, sabfog, taisan, tambis-tambis, tambuyogan

Ficus montana Burm. f. (*Ficus quercifolia* Roxb.)

Tropical Asia. Shrub, erect or creeping, non-epiphytic, infructescences axillary, fig greenish-white to red, young leaves eaten raw, very variable, in forest edges

See *Flora Indica* ... nec non *Prodromus Florae Capensis* 226. 1768

(Roots used with other ingredients to cure syphilis.)

in English: oak leaf fig

in Indonesia: amis mata, periyeh, uyah-uyahan

in Malaysia: kesinan

in Thailand: duea din, maduea hin

Ficus mucoso Welw. ex Ficalho (*Ficus corylifolia* Warb.; *Ficus corylifolia* Warb. var. *glabrescens* Warb.; *Ficus sidi-folia* Welw. ex Hiern) (the specific name from an African vernacular name)

West Africa, Uganda. Tree, spreading, open crown, multi-stemmed, when slashed exuding copious latex which rapidly turns brownish, leaves papery apex shortly acuminate, figs orange-red on branchlets on the main branches and trunk, seasonally flooded grassland, forest, lowland rainforest, savanna woodland, rocky woodland

See Mnason Tweheyo et al. "Chimpanzee diet and habitat selection in the Budongo Forest Reserve, Uganda." *Forest Ecology and Management* 188(1–3): 267–278. 2004

(Used for self-medication and food by wild chimpanzees in West Africa.)

in Angola: kuiu, kuyu, mukuzu, uelungu

in Cameroon: lekoko, lingembe, liwawa, tol

in Central African Republic: lifwete, liveté, mopongi

in Congo: ete, likuyne

in Gabon: tol

in Ivory Coast: doumbourou, dumburu

in Nigeria: abo omo, ijan orisa, ogoro, oguro

Ficus nasuta Summerhayes

New Guinea and the Solomon Islands. Climber, liana, cordate leaves arranged spirally, figs axillary depressed globose purple, flowers sessile, in lowland to montane forest

See *Hooker's Icon. Pl.* 32: t. 3189. 1933

(Bark latex drunk for asthma and other respiratory problems; leaves eaten with salt to increase the fertility of women.)

in Papua New Guinea: hohoya, imda

Ficus natalensis Hochst.

Tanzania. Tree, leafy, stems brown, spreading, many-branched, strangler, adventitious roots abundant on main trunk, latex white, leaves slightly succulent, red fruits, small

figs borne in the axils of the leaves, bark cloth, riverine and ground-water forest, closely related to *Ficus thonningii*

See *Flora* 28: 88. 1845 and *Acta Phytotaxonomica et Geobotanica* 44: 53–58. 1993

(Fruits and leaves analgesic, for pains and venereal diseases. Fresh bark chewed to induce lactation; bark crushed and boiled in water, the extract drunk as a remedy for influenza. A ceremonial tree.)

in English: banyan tree fig, Natal fig, Natal wild fig, tree-killer, wild fig

in Cameroon: dobo

in East Africa: mugaire, mugumo, mutuba

in Southern Africa: Natalvy, bostouboom, natou; moumo (Tawana dialect, Ngamiland); muovumo, muumo (Venda); umDende, isiHlamfane, umThombe, umBombe, iDende, umDenda (Zulu); umThombe, uLuzi, umZombi (Xhosa); asiHlamfani (Thonga)

in Tanzania: chocho, ivumo, mvumo

(Veterinary medicine, fresh leaves given to the domestic animals to increase lactation.)

in China: sen liin rong

in India: dudhila

Ficus nervosa B. Heyne ex Roth (*Ficus apoensis* Elmer; *Ficus blinii* H. Lévl. & Vaniot; *Ficus magnoliifolia* Blume; *Ficus modesta* Miq.; *Ficus modesta* (Miq.) Miq.; *Ficus modesta* F. White; *Ficus nervosa* Roth; *Ficus nervosa* fo. *apoensis* (Elmer) Sata; *Ficus nervosa* var. *longifolia* Sata; *Urostigma modestum* Miq.; *Urostigma nervosum* (B. Heyne ex Roth) Miq.)

China, India. Tree, tender leaves used as vegetable, ripe fruit eaten raw

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 1: 513. 1817, *Novae Plantarum Species* 388. 1821, *Bijdragen tot de flora van Nederlandsch Indië* 448. 1825 [20 Sep–7 Dec 1825], *London Journal of Botany* 6: 585. 1847 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(191–195): 550. 1910, *Leaflets of Philippine Botany* 4: 1249. 1911, *Contributions from the Horticultural Institute: Taihoku Imperial University* 32: 186. 1944, *Bull. Jard. Bot. Natl. Belg.* 60(1–2): 104. 1990

(Bark infusion given in diarrhea and dysentery. Unripe fruit given for relief from asthma.)

in China: jiu ding rong

in India: bol-chhap

Ficus nodosa Teijsm. & Binnend. (*Ficus du* Lauterb. & K. Schumann)

Moluccas. Tree, buttressed, large canopy, bole cylindrical or markedly fluted, leaves alternate spaced along branches, inflorescence on the trunk or branches, yellow to purple-brown figs cauliflorous and ramiflorous densely lenticellate, flowers with tepals fused at base, male flowers in 3 rows, similar to *Ficus variegata*, in lowland forest

See *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 29: 245. 1867 and *Flora Malesiana*, Series 1: 343–345, Fig. 57-(a-f, map 7)-58. 2005

(Leaves styptic and antiseptic applied externally.)

in English: Rocky river fig

in Indonesia: laura, maseke

in Papua New Guinea: kem kem

Ficus nymphaeifolia Mill. (*Ficus anguina* Benoist; *Ficus cabusana* Standl. & Steyerl.; *Ficus cyclophylla* (Miq.) Miq.; *Ficus duquei* Dugand; *Ficus duquei* var. *obtusiloba* Dugand; *Ficus ierensis* Britton; *Ficus involuta* var. *urbaniana* (Warb.) Dugand; *Ficus nymphoides* Thunb.; *Ficus pascuorum* Pittier; *Ficus urbaniana* Warb.; *Urostigma cyclophyllum* Miq.; *Urostigma nymphaeifolium* (Mill.) Miq.)

South America.

See *The Gardeners Dictionary*: ... eighth edition no. 9. 1768, *London Journal of Botany* 6: 527. 1847, *Flora Brasiliensis* 4(1): 91. 1853, *Annales Museum Botanicum Lugduno-Batavi* 3: 297–298. 1867 and *Symbolae Antillarum* 3: 459. 1903, *Bulletin of the Torrey Botanical Club* 48(12): 329. 1921[1922], *Boletín de la Sociedad Venezolana de Ciencias Naturales* 4(30): 54. 1937, *Publications of the Field Museum of Natural History, Botanical Series* 22(4): 226. 1940, *Caldasia* 1: 42, f. 3. 1942, *Caldasia* 2: 275. 1943, *Fieldiana, Bot.* 40: 94–215. 1977, *Revista Soc. Boliv. Bot.* 4(1): 81–129. 2003

(Leaves infusion, a bath and poultice for erysipelas; latex cataplasm for pain.)

Ficus obliqua G. Forst. (*Ficus brachypoda* (Miq.) Miq.; *Ficus eugenioides* (Miq.) Miq.; *Ficus eugenioides* (Miq.) F. Muell. ex Miq.; *Urostigma eugenioides* Miq.)

New South Wales, Asia tropical. Strangling tree, spreading, dense crown, massive trunks of coalesced roots, buttressed, young stems glabrous, copious white exudate from broken parts, leaves elliptic to oblong-lanceolate, fruits orange-red paired often with dark spots, fruit eaten by birds and fruit-bats, in coastal areas, lowland rain forest

See *Florulae Insularum Australium Prodromus* 77. 1786 and *Austral. Syst. Bot.* 14: 133–154. 2001

(Crushed leaves used to treat boils, yellow leaves chewed and applied to boils; infusion of leaves used to treat convulsions in infants. Infusion of the pounded bark for treating boils. Used medicinally for arthritis.)

in English: brush fig, giant strangler fig, Polynesian banyan, small-leafed fig, small-leaved fig, strangler fig

in Fiji: baka ni viti, bake

in Tonga: 'ovava

Ficus oppositifolia Willd.

India.

See *Species Plantarum* 4: 1151. 1806

(Used in Ayurveda, Unani and Sidha.)

in India: adavi-atti, anjire-dashti, kakodumbarika, kattatti, kattu atti, paraka-pazham, pe-attip-pazham, pe-yatti, peyatti, tine-barri, ummattodumbara, verriatti-pandlu

Mildbr. & Burret; *Ficus pseudo-elastic* Hiern; *Ficus pseudoelastica* Welw. ex Hiern; *Ficus sapinii* De Wild.; *Ficus spectabilis* Kunth & Bouché; *Ficus tuberculosa* Welw. ex Hiern var. *elliptica* Hiern; *Ficus vohsenii* Warb.; *Urostigma ovatum* (Vahl) Miq.)

Tanzania. Tree, huge, strangler, crooked, copious white latex, rainfall indicator

See *Enumeratio Plantarum ...* 2: 185. 1805 and *Pharmaceutical Biology* 38(1): 40–45, 46–50. 2000, *African Journal of Ecology* 42 (Suppl.1): 114–118. 2004

(Antiviral, antimicrobial. White latex used on soles of feet. Root, bark, for tetanus convulsions. Magic, ritual, protector fetish tree. Veterinary medicine.)

in Benin: djaatenam, wétibanyéglé

in Burundi: igikobekobe, imanda, umumanda

in Central African Republic: dobu, etobo, sosaka

in Kenya: bongu

in Nigeria: cediya

in Rwanda: umurehe

in Tanzania: tungalinga

Ficus pachyrrhachis K. Schum. & Lauterb. (*Ficus grandis* King non Miq.; *Ficus hypoglauca* Lauterb. & K. Schumann; *Ficus pachyrrachis* Lauterb. & K. Schumann; *Ficus pachythyrsa* Diels)

New Guinea. Tree, leaves arranged spirally, figs on leafless twigs, leaves edible, in lowland to montane forest

See *Philosophical Transactions of the Royal Society of London. Series B, Biological Sciences* 281(982): 373–406. 1978

(Latex applied onto ulcer.)

in Papua New Guinea: topu

Ficus pachystemon Warb. (*Ficus brassii* Summerh., non Sabine; *Ficus aechmophylla* Summerh.; *Ficus mangiferifolia* Lauterb. & K. Schumann, non Griffith; *Ficus pachystemon* Warb. ex K. Schum. & Lauterb.; *Ficus saxicola* Summerhayes)

Papua New Guinea. Small tree or shrub, figs axillary paired sessile, alluvial forest, in lowland forest, on river banks

See *J. Arnold Arbor.* 10: 147. 1929

(Leaves anti-mycobacterial. Drink sap with cold water for spleen, diarrhea and stomach problems; leaves chewed and swallowed for diarrhea.)

in Papua New Guinea: wawaina

Ficus palmata Forssk. (*Ficus pseudocarica* Miq.)

East Africa, India. Tree or shrub, deciduous, young branches tomentose, white to light-yellow wood, leaves alternate membranous, flowers unisexual greenish white very small, both the male and female flowers present within the same fleshy receptacle, round seeds very small, tasty, juicy fruit eaten, around the villages, in wastelands, fields

See *Flora Aegyptiaco-Arabica* 179. 1775 and Parmar, C. and Kaushal, M.K. *Wild Fruits of the Sub-Himalayan Region*. New Delhi 1982, *Kirkia* 13: 253–254. 1990, *Sida* 22: 769–775. 2006, *Journal of Ethnopharmacology* 112: 55–70. 2007

(Used in Sidha. The sap and the half-ripe fruits said to be poisonous. Sap used in the treatment of warts and pimples; latex of young twigs applied to draw out prickles and thorns. The fruits demulcent, astringent and laxative, used in cases of constipation and in the diseases of the lungs and the bladder, also used as a poultice; ripe fruits eaten raw for hypertension; boiled fruits a remedy for dysentery. Veterinary medicine, fresh leaves crushed and boiled used for constipation, abdominal distension, shivering. Ritual, ceremonial, plant used in pyre at time of cremation of dead bodies.)

in English: Punjab fig, wild fig

in Arabic: hamat

in Ethiopia: lugo

in India: abjiri, angiri, anjir, anjiri, atti, bedu, beru, daghla anjir, dagla, daugla, dhura, dudla, dura, dogla, fafura, fago, fagoora, fagu, fagura, fegra, heibam, jangli anjir, keemra, khasra, khemri, mancimedi, manjimedi, manmjedi, medi, naati anjoora, pepri, phagoora, phagoru, phedu, phegra, phegwara, pheru, timla

Ficus parietalis Blume (*Ficus cerasiformis* Desf.; *Ficus concentrica* Hassk. ex Miq.; *Ficus grandifolia* Wall. ex Miq.; *Ficus junghuhniana* Miq.; *Ficus parietalis* var. *angustifolia* Miq.; *Ficus parietalis* var. *ovalis* Blume; *Ficus parietalis* var. *rufipila* (Miq.) Miq.; *Ficus parietalis* var. *tabing* (Miq.) Miq.; *Ficus phlebophylla* Miq.; *Ficus rufipila* Miq.; *Ficus tabing* Miq.) (Latin for 'like a brick-wall', referring to the tertiary venation of the leaves.)

Tropical Asia, Peninsular Malaysia. Tree, strangler, stem with white sap, stipules hairy, alternate simple tripli-veined leaves, fruits yellow-orange-red, globose figs placed along the twigs, fruits edible, along rivers and streams, in secondary forests, in disturbed to undisturbed open mixed dipterocarp and submontane forests, on sandy soils, understorey

See *Bijdr. Fl. Ned. Ind.* 9: 462. 1825 and *Philosophical Transactions of the Royal Society of London. Series B, Biological Sciences* 273(925): 359–386. 1976

(Root decoction for stomachache.)

in English: sharp-pointed fig

in Borneo: buah punok

in Indonesia: pelas kebo, seprah

in Malaysia: ara kesinai, ara landang puteh, sepedeh

in Thailand: ma hai, maduea khon

Ficus payapa Blanco

Philippines.

See *Flora de Filipinas* [F.M. Blanco] 683. 1837

(Roots vulnerary, applied to boils, wounds, cuts, burns.)

in Philippines: balete, balite, dalagita, dalakit, langaban, payapa

Ficus platyphylla Del. (*Ficus kotschyana* (Miq.) Miq.; *Ficus lateralis* Warb.; *Ficus somalensis* auct., non (Pamp.) Chiov.; *Urostigma kotschyianum* Miq.)

Uganda, Sudan. Shrub or tree, spreading crown, rusty or pinkish-brown bark, white latex, leaves coriaceous, inflorescence greenish, figs borne on long stalks and crowded at ends of branches, in open woodland, savanna

See *Journal of Herbs, Spices & Medicinal Plants* 9(1): 47–53. 2002, B.A. Chindo et al. "Central nervous system activity of the methanol extract of *Ficus platyphylla* stem bark." *Journal of Ethnopharmacology* 85(1): 131–137. 2003, *African Journal of Biomedical Research* 7(2): 75–78.

2004, *Journal of Ethnopharmacology* 99: 273–279. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 105: 387–399. 2006

(Leaves and stem bark for malaria, schistosomiasis, anti-inflammatory and anti-nociceptive, sedative, also for the treatment of convulsive disorder. Veterinary medicine, for contusion, buises, swellings.)

in English: flake rubber tree, gutta-percha tree, red Kano rubber tree

in Benin: ganglo, gangourou, kobé

in Burkina Faso: kamsaogo, kangouna bougou, sica lolié

in Ghana: gàlinzènyâ, selinge

in Ivory Coast: kangouna bougou, sica lolié

in Mali: n'gaba, n'kaba

in Niger: gamji, kobe

Perrier; *Ficus soroceoides* var. *onivensis* H. Perrier; *Ficus xiphocuspis* Baker; *Urostigma longipes* Liebm.)

Madagascar. Dioecious shrub or small tree, scrambling, milky white latex, scabrid-abrasive leaf surface, reddish fruits

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(2): 500. 1788, *Fl. Cochinch.* 2: 667. 1790, *Cat. Pl. Ceylon.* 74. 1824, *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 321. 1851, *Notulae ad Plantas Asiaticas* 4: 397. 1854, *Annales Museum Botanicum Lugduno-Batavi* 3: 297. 1867, *Journal of the Linnean Society, Botany* 20: 258–261. 1883 and *Repertorium Specierum Novarum Regni Vegetabilis* 1: 78. 1905, *Archives de Botanique, Bulletin Mensuel* 2(8/9): 137–180. 1928, *Flore de Madagascar et des Comores* 55: 67. 1952, *Bull. Mus. Natl. Hist. Nat.*, B, *Adansonia* 8(1): 17–55. 1986

(Young leaf or bud decoction taken as a stomachic.)

Ficus polysyce Ridl.

Malaysia.

See *Journal of the Straits Branch of the Royal Asiatic Society* 82: 195. 1920

(Root decoction a postpartum remedy.)

Malay name: akar serapat

Ficus populifolia Vahl (*Ficus intermedia* Delile; *Ficus populifolia* Desf.; *Ficus populifolia* Vahl var. *major* Warb.; *Ficus populifolia* var. *taitensis* Warb.)

E. Africa to Arabia. Large tree, strangling, drooping branches, terete branchlets covered with glabrous yellowish bark, savanna

See *Tableau de l'École de Botanique* 239. 1804

(Latex urticant; sap lactation stimulant. Leaves abortifacient, used for pulmonary troubles. Bark infusion used to stop diarrhea. Arrow poison. Veterinary medicine, roots juice for wounds and injuries.)

in Dahomey: bijahi

in Kenya: balan baal, sosotwo

in Nigeria: bijaje, bishiyooyi, gameisa

Ficus prolixa G. Forst. (*Ficus mariannensis* Merr.)

Micronesia, Pacific. Tree, hundreds of aerial roots to the ground, pollinated by the fig wasp *Platyscapa innumerabilis*, lowland forest

See *Journal of Ethnopharmacology* 112(1): 7–12. 2007 [Antiparasitic activity of some New Caledonian medicinal plants.]

(Antiparasitic. Slender aerial roots picked and used to treat skin cancer and other afflictions. Considered a sacred tree.)

in English: banyan, Pacific banyan, Polynesian banyan

in the Cook Islands: ava

in Hawaii: aoa

Ficus pumila Linnaeus (*Ficus awkeotsang* Makino; *Ficus hanceana* Maximowicz; *Ficus longipedicellata* H. Perrier; *Ficus repens* auct.; *Ficus repens* Hort. var. *lutchuensis* Koidz.; *Ficus scandens* Lam.; *Ficus stipulata* Thunberg) (Latin *pumilus*, a, um 'dwarf')

Asia, Japan, China. Woody, aggressive, creeping and clinging, prostrate or climbing vine, scandent, latex white, stems grey with numerous adventitious roots at nodes, rooting branchlets sterile, leaves distichous simple leathery, flowers insignificant, pyriform figs solitary in the axils of leaves, fruit reddish inside, involucre bracts triangular-ovate, densely pubescent, fruits used to make a jelly

See *Species Plantarum* 2: 1060. 1753 and *Archives de Botanique, Bulletin Mensuel* 2: 141–142. 1928, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 8(1): 17–55. 1986, *Plant Systematics and Evolution* 156: 1–4. 1987, *Journal of Asian Natural Products Research* 1(4): 269–275. 1999, *Chem. Pharm. Bull.* (Tokyo). 47(8): 1138–1140. 1999, *Chem. Pharm. Bull.* (Tokyo). 48(1): 77–80. 2000

(Leaves antimicrobial, crushed leaves made into a paste and the juice applied for the treatment of eczema and skin irritation. Fruits and leaves tonic. Latex antihelminthic. For dropsy, plant ash rubbed on the body.)

in English: climbing fig, creeping fig, creeping rubber plant, fig ivy

in Mexico: amate

in Bangladesh: anoya waneh

in China: bi li, mu lien, pi li, kuei man tou, mu man tou, ai yu tzu

in India: jengto-jingo

Ficus pungens Reinw. ex Blume (*Ficus kalingaensis* Merr.; *Ficus myriocarpa* Miq.; *Ficus ovalifolia* Ridley)

Papua New Guinea. Tree, short stilt roots, white latex, branches armed with sharp spines, leaves arranged spirally, fruits red orange cauliflorous on long pendent leafless branches, figs paired sessile pyriform, famine food, leaves cooked as a vegetable and eaten with meat, in primary and secondary lowland forest, near streams and drains

See *Bijdr. Fl. Ned. Ind.* 9: 478. 1825 and Dumont, E.R., G. W. Weiblen and J. Winkelmann. "Preferences of fig wasps and fruit bats for figs of functionally dioecious *Ficus pungens*." *Journal of Tropical Ecology* 20: 233–238. 2004

(Latex reported to be very poisonous. Crushed bark juice taken orally for the treatment of asthma. Leaves heated over a fire and applied to body pains; fresh leaves rubbed for swelling of testicles. Root chewed and sap swallowed for cough.)

in English: Kalinga fig

in Indonesia: gososo

in Papua New Guinea: baguai, limiengkuilre, niyaniya, ohohone, riki, wopope

Ficus racemosa L. (*Covellia glomerata* (Roxburgh) Miquel; *Covellia glomerata* Miq.; *Ficus glomerata* Hort. ex Miq.; *Ficus glomerata* Roxburgh; *Ficus glomerata* Blanco, nom. illeg.; *Ficus racemosa* Willd.; *Ficus racemosa* Wall.)

Asia, India, northern Australia. Spreading tree, deciduous, cauliflorous, fluted or buttressed, open crown, twigs with abundant milky latex, large spreading branches, fruits grow from side branches and trunks, leaves and unripe figs eaten as vegetable, edible figs densely clustered along trunk and main branches, leaves animal fodder, used for rearing insects

and producing lacs, in open deciduous forest, along river banks in lowlands

See *Species Plantarum* 2: 1060. 1753, *Plants of the Coast of Coromandel* 2: 13, t. 123. 1798–99, *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1146. 1806, *Numer. List* [Wallich] n. 4549. 1831, *Flora de Filipinas* [F.M. Blanco] 683. 1837, *London Journal of Botany* 7: 465. 1848 and Mary F. Barrett, “The case of the vanishing *Ficus racemosa*.” *Bulletin of the Torrey Botanical Club* 73(3): 312–325. 1946, *Biotropica* 38 (3), 334–341. 2006

(Used in Ayurveda, Unani and Sidha. Root, bark and leaves useful in snakebite. Leaves for diarrhea, fever, fresh juice given to treat diabetes; leaf decoction for bronchitis; leaf juice mixed with urine of goat given orally as hepatic stimulant; cold infusion of leaves and ripe fruits given in white discharge in female; leaves extracts of *Ficus glomerata* and *Cuminum cyminum* mixed and given for stomach complaints. Fruits antioxidant, carminative, astringent, antiinflammatory, hepatoprotective, hypoglycemic, antipyretic, eaten against constipation, diabetes, smallpox, leucorrhoea, lungs and urinary problems; ripe fruits with honey eaten as aphrodisiac; dried fruits taken with warm water in diabetes; fruits pickled in goat-milk and taken to get complete relief from tuberculosis. Stem bark astringent, anti-diarrheal, antidiuretic, antitussive, hypotensive, antipyretic and hypoglycemic, used for smooth delivery; rhizome of *Asparagus racemosus* ground with bark of *Ficus racemosa* and *Ficus hispida* extract given orally to woman to promote fertility; stem bark ground with that of *Ficus exasperata* and given to promote fertility; bark skin decoction useful in diarrhea, dysentery and ulcerative colitis; stem bark ground with that of *Artocarpus heterophyllus* and leaves of *Phyllanthus amarus* given to promote fertility. Latex given to children in dysentery, applied on chronic infected wounds to alleviate edema, pain and to promote healing; latex from the root taken orally in impotence; fruits of *Terminalia chebula* ground with the latex of *Ficus racemosa* and the paste applied in rheumatism, rheumatoid arthritis. Root of this plant along with that of *Achyranthes aspera* are pasted and given to a woman for stopping childbirth; root sap antidiabetic; root decoction given against habitual abortion; contact therapy, root tied on the ear to relieve toothache. Veterinary medicine, galactagogue, stem bark powder mixed with seed oil of *Pongamia pinnata* made into a paste applied for skin diseases; bark given to cure rinderpest/cattle plague. Sacred plant, holy tree, worship tree, used in religion and magico-religious beliefs, rain-making through sacrifices in the sacred forest; ingredient of *Patra pooja* in different religious *pooja* ceremonies.)

(Used in Ayurveda and Sidha. Leaf juice mixed with leaf juice of *Sida acuta* given in dysuria.)

in India: attimeeraloo, attimeraloo, attimiral, datiri, datri, dieng sohlakhain, garasu, goddumitle, goddumitli, gudu-mittemara, intiri, ithimottu, ithitholi, ithiyila, itthi, itti, kajjigoli, kaliporasa, kallitthi, kallitti, kanjigoli, kappa, karaasa, karasa, kondadzuvvi, kondajoovee, kondajuvi, kondajuvvi, korsano, kuruval, mangalyam, mara, mitle, pakki, pendi, phrap-rakhet, phrap rakhet, pindi, sodaro, tellabarinka, tellabarranki, thellabarinka, udumbar, umbar

Ficus tsiela Roxb. (*Ficus tsiela* Roxb. ex Buch.-Ham.)

India.

See *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1146. 1806, *The Cyclopaedia*; or, universal dictionary of arts, ... 14: no. 1. 1810, *Hortus Bengalensis* 66. 1814, *London J. Bot.* 6: 566. 1847, *Ann. Mus. Bot. Lugduno-Batavi* 3: 286. 1867 and *Taxon* 28: 402–403. 1979

(Used in Ayurveda and Sidha. Pounded bark in water used in stomachache and gastric disorders; latex to increase lactation in women.)

in India: aali, basuri, basurimara, bili basari, bilibasari, bilibasri, bilibasuri, billibasari, bovinamara, candrata, cela, celaikkallicci, chela, cherla, cilaikkallicci, cilaikkallic-cimaram, cirral, dodda basari, doddabasari, dzuvvi, gard-abhaande, gardabhande, goli, grihadvaraparshve, hebbasuri, icciyal, ichchi, ichi, iratakam, iratam, irattiri, jari, jatini, javi, juvvi, juvvi mara, kaela, kal-ichchi, kalathi, kalllicci, kallichi, kallitti, kancenica, kaninika, kel, koyali, kuruval, motpipri, pakri, parkati, payer, pedda juvvi, peddadzuvvi, peddajoovee, peddajuvvi, pimpari, pimpri, pipar, pipli, pipri, pitta juvvi, pitta-juvvi, pittajuvvi, plaksa, plaksah, plaksha, selai-kkallichi, sittal, tsiela, tsjela, vatiplaksa

in Sri Lanka: ela-nuga, kalatti

Ficus tsjakela Burm.f. (*Ficus tsjahela* Burm. f.)

India, Sri Lanka. Tree

See *Flora Indica ... nec non Prodrumus Florae Capensis* (N.L. Burman) 227. 1768

(Used in Ayurveda. Bark masticatory. Sacred tree.)

in India: basari, basuri, cakkila, chakkila, chuvannal, cuvannal, ichhi, javi, jevi, juvi, juvikari, kallal, kapbasuri, kapitanah, kappabasari, karal, karibasari, koli, maki, pepre, pilkhan, plaksah, plaksha, selavala, tsjakela

in Sri Lanka: kiri-pela

Ficus uncinata (King) Becc. (*Ficus geocarpa* Teijsm. ex Miq. var. *uncinata* King; *Ficus geocarpa* Teijsm. var. *uncinata* King)

Indonesia, Borneo. Tree, white bark

See *Annals of the Royal Botanic Garden, Calcutta*. 1(2): 102 (t. 129). 1888 and *Nelle Foreste di Borneo* 527. 1902

(Fruits eaten raw to treat diarrhea. Crushed young leaves applied as a poultice to new fresh wounds to stop bleeding.)

in Indonesia: abung

Ficus vallis-choudae Del.

Tropical Africa. Tree, milky sap

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 94. 1843

(Bark decoction for dysentery, food poisoning, bronchitis, colitis, enteritis, gastroenteritis and gastrointestinal disorders. A decoction of stem with leaves for gastroenteritis and gastrointestinal disorders, nausea. Leaves decoction for high fever in children. Pounded roots, seeds and leaves of *Mangifera indica* and roots of *Ficus vallis-choudae*, extract taken for diarrhea. Magic, ritual. Veterinary medicine, to increase lactation.)

in Benin: gandou, ibi

in Congo: ifolo, iholo, kitembe, kitobolo, mapholo, mulehe

in Ivory Coast: aloma, aloma bli, sara fingué, siha, sihataloma, toro, toroba

in Niger: kamasafi

in Nigeria: dulu, ogunro, oguro, opoto funfun

in Ufanda: olam

Ficus variegata Blume (*Ficus chlorocarpa* Benth.; *Ficus chlorocarpa* Miq.; *Ficus garciae* Elmer; *Ficus glochidiifolia* Hayata; *Ficus konishii* Hayata; *Ficus variegata* fo. *rotundata* Sata; *Ficus variegata* var. *chlorocarpa* (Benth.) Benth. ex King; *Ficus variegata* var. *garciae* (Elmer) Corner)

SE Asia, Indonesia. Tree, small tree, deciduous, milky juice, straight trunk buttressed when mature, narrowly ovate leaves, syconia dirty purple, pear-shaped figs densely clustered along trunk and main branches, lowland forest

See *Bijdragen tot de flora van Nederlandsch Indië* 9: 459. 1825, *London Journal of Botany* 7: 224. 1848, *Flora Hongkongensis* 330. 1861, *Annals of the Royal Botanic Garden, Calcutta*. 1: 170. 1888 and *Leaflets of Philippine Botany* 2: 550. 1908, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 273–274. 1911, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 8: 126, f. 52. 1919, *Monogr. Ficus Form. & Philipp.* 367. 1944, *The Gardens' Bulletin Singapore* 18(1): 33. 1960

(Leaves chewed for dysentery; young leaves included in a complex oral remedy for diarrhea and whitish stool. Bark decoction for dysentery. Milky juice from the fruits used externally for small wounds.)

in English: gondang wax

in Borneo: nyanwey

in Indonesia: gele, gondang, lilin gondang (= milky juice from the fruits)

Ficus variifolia Warb. (*Ficus bongouanensis* A. Chev.; *Ficus bongouanensis* A. Chev.; *Ficus zenkeri* Warb. ex Mildbr. & Burret; *Ficus zenkeri* Mildbr. & Burret)

Tropical Africa, Uganda. Tree, straight, white latex, syconia borne in axils of leaves

See *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 30, t. 15. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 204, f. 2. 1911, *Explor. Bot. Afrique Occ. Franc.* i. 604. 1920, *African Study Monographs* 24(1–2): 1–168. 2003

(Ritual, ceremonial, hunting rituals.)

in Tanzania: mlumba, mulumba-njia panda

Ficus variolosa Lindley ex Bentham (*Ficus langbianensis* Gagnepain)

SE Asia, China, Vietnam. Tree or shrub, white latex, syconia dirty purple-green, paired or solitary globose figs axillary on normal leafy shoots, fibers used for making cloth, confused with *Ficus biglandulosa* Wallich ex Steudel, on open slopes, wet places, forest

See *London Journal of Botany* 1: 492. 1842 and *Notulae Systematicae*. *Herbier du Museum de Paris* 4: 91. 1927, *Biotropica* 38 (1): 116–121. 2006

(The stems, leaves, and roots antimicrobial.)

in English: mountain fig, varied-leaf fig

in China: bian ye rong

Ficus vasta Forssk. (*Ficus benghalensis* A. Rich., non L.; *Ficus callabatensis* Warb.; *Ficus dahro* Delile; *Ficus hararensis* Warb.; *Ficus rivae* Warb.; *Ficus socotrana* Balf.f.; *Ficus vasta* Forssk. var. *glabrescens* Hutch.; *Ficus vasta* Forssk. var. *velutina* Fiori)

Yemen. Tree

See *Flora Aegyptiaco-Arabica* cxxiv, 179. 1775 and *Journal of Ethnopharmacology* 111(3): 657–666. 2007

(Fruits antioxidant and cytotoxic.)

Ficus virgata Reinw. ex Blume (*Ficus decaisneana* Miq.; *Ficus esmeralda* F.M. Bailey; *Ficus formula* Miq.; *Ficus inaequifolia* Elmer; *Ficus magnifica* Elmer; *Ficus philippinensis* Miq.; *Ficus philippinensis* fo. *magnifica* (Elmer) Sata; *Ficus philippinensis* fo. *setibracteata* (Elmer) Sata; *Ficus pinkiana* F. Muell.; *Ficus setibracteata* Elmer; *Ficus trematocarpa* Miq.; *Ficus virgata* Roxb.; *Ficus virgata* Boerl.; *Ficus virgata* Wall. ex Roxb.; *Ficus virgata* var. *philippinensis* (Miq.) Corner)

Asia tropical, Philippines. Trees, evergreen, latex, usually epiphytic, usually a strangler growing around host trees, solitary or paired figs axillary on normal leafy shoots, involucre bracts absent, small orange fruits that have a rounded nipple at one end, closely related to *Ficus tinctoria* G. Forster, Chinese bulbuls and black bulbuls eat the fruits, in rain forest

See *Bijdragen tot de Flora van Nederlandsch Indie* 454. 1825, *London Journal of Botany* 7: 435. 1848, *Flora van Nederlandsch Indië* 1(2): 312. 1859, *Annales Museum Botanicum Lugduno-Batavi* 3: 224, 292. 1867, *Queensland Agricultural Journal* 1: 452. 1897 and *Leaflets of Philippine Botany* 1: 51. 1906, *Leaflets of Philippine Botany* 1: 242. 1907, *Leaflets of Philippine Botany* 7: 2411, 2413. 1914, *Monogr. Ficus Form. & Philipp.* 231. 1944, *The Gardens' Bulletin Singapore* 17(3): 477. 1959, *Bot. Bull. Acad. Sin.* 38: 97–104. 1997, Konno K. et al. "Papain protects papaya trees from herbivorous insects: role of cysteine proteases in latex." *Plant Journal* 37(3): 370–378. 2004

(Calcium oxalate, druses or prismatic crystals, and calcium carbonate in the leaves. Leaves showed strong toxicity and growth inhibition against lepidopteran larvae. Fruit laxative, demulcent, used as diet in constipation and in lungs and bladder diseases. Leaves are boiled in the milk of goat used to soften the arteries.)

in Australia: fig, strangler fig

in China: bai ro rong, dao rong

in Indonesia: daun ulang-ulang, lumaput, nunok

in Japan: hama-inu-biwa, hamainubiwa (= beach *Ficus erecta*)

in Okinawa: achineiku, ankaniku

in Pakistan: phagwara

in Philippines: diakit, kauis, liuliu

Ficus vogeliana (Miq.) Miq. (*Sycomorus vogeliana* Miq.)

Tropical Africa, Uganda. Tree, whitish latex, rough leaves, cauliflorous infructescences, syconia red with yellow dots, figs eaten

See *London J. Bot.* 7: 112. 1848, *Annales Museum Botanicum Lugduno-Batavi* 3: 288, 295. 1867

(Bark extracts drunk as laxative, astringent, emetic, to treat diarrhea and dysentery, a decoction used as emetic. Bark, root or leaf infusion used as a wash for leprosy. Figs and latex applied to wounds.)

in English: false sycomore

in Nigeria: ob (Igbo)

in Yoruba: ekiki, gbakogbako, idiya

Ficus wassa Roxb. (*Ficus eulampra* K. Schumann; *Ficus nubigena* Diels; *Ficus rhodocarpa* Summerh.)

Papua New Guinea, Indonesia. Canopy tree, shrubby tree, scabrous dry leaves with a gland at the angle of each of the basal lateral veins, fruits white-light yellow on trunk and small branches, leaves and fruits edible, lowland alluvial forest, open places, riparian vegetation, forest, along banks of the river

See *Hort. Bengal.* 65. 1814

(Roots used as a contraceptive. An extract from leaves in warm water given to women in childbed; leaves chewed to stop dysentery. Bark scraped and chewed for dysentery.)

in Indonesia: gohi, wassa, wassa laki-laki

in Nehan: bouh kurum

in Papua New Guinea: avavaia, gabajekni

in Solomon Islands: ka'ano doñ, kanava vasiki

in Ternatense (Celebes): gohi

Ficus wildemaniana Warb. (*Ficus wildemaniana* Warb. ex De Wild. & T. Durand)

Tropical Africa. Strangler fig

See *Ann. Mus. Congo Belge, Bot.* sér. 3, 1(2): 217. 1901; sér. 6, [1]: 7. 1904.

(Latex drunk with honey for the treatment of cardiac problems.)

Filipendula Mill. Rosaceae

Latin *filum* 'thread' and *pendulus* 'hanging', referring to the root tubers; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 365. Ansbach 1852.

Filipendula ulmaria (L.) Maxim. (*Spiraea ulmaria* L.; *Thecanisia ulmaria* (L.) Raf.; *Ulmaria pentapetala* Gilib.)

Europe. Herbaceous, perennial, villous, erect, stems brown, leaves green, small extremely numerous creamy white flowers sweetly scented, in swamps, hedges and alongside running water, marshes, fens, wet woods and meadows

See *Species Plantarum* 1: 489–490. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Actes de la Société Linnéenne de Bordeaux* 6: 265. 1834, *Sylva Telluriana* 152. 1838, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 6(1): 251. 1879 and *Turun Yliopiston Julkaisuja : Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Watsonia* 18: 415–417. 1991, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 476–479. 1991, *Watsonia* 19: 134–137. 1992, *Opera Botanica* 137: 1–42. 1999

(Salicylic medication. Analgesic, alterative, antiinflammatory, antiseptic, aromatic, astringent, diaphoretic, diuretic, stomachic, tonic.)

in English: bridewort, lady of the meadow, meadow-wort, meadow queen, meadow sweet, mountain spiraea, pride of the meadow

Fimbristylis Vahl Cyperaceae

Latin *fimbriae*, *arum* 'shreds, fringe' and *stilus*, *i* 'style', referring to the fringed or ciliate style; see Martin H. Vahl (1749–1804), *M. Vahlilii ... Enumeratio Plantarum*. 2: 285, 287, 296. 1805, *Flora Italica* 1(3): 312. 1833, *Genera Plantarum* 3: 1048. 1883 and *Fieldiana, Bot.* 24(1): 90–196. 1958, *Flora Reipublicae Popularis Sinicae* 11: 97. 1961, *J. S. African Bot.* 34: 371–396. 1968, *Cytologia* 44: 233–240. 1979, *Cuscutlania* 1(6): 1–29. 1991, *Willdenowia* 22: 133–142. 1992, *Cell Chromosome Res.* 15(3): 22. 1992, *Fl. Novo-Galiciana* 13: 225–440. 1993, *Fl. Mesoamer.* 6: 455–458. 1994, *Hoehnea* 29(2): 93–107. 2002, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 458–551. 2003.

Fimbristylis aestivalis Vahl (*Fimbristylis aestivalis* (Retz.) Vahl; *Iria aestivalis* (Vahl) Kuntze; *Scirpus aestivalis* (Vahl) Retz.)

Tropics and Subtropics.

See *Observ. Bot.* 4: 12. 1786, *Enumeratio Plantarum ...* 2: 288. 1805, *Revis. Gen. Pl.* 2: 751. 1891

(For skin complaints.)

in English: summer fringe-rush

Malay name: rumput salah pemakai

Fimbristylis argentea (Rottb.) Vahl (*Scirpus argenteus* Rottb.)

India. Erect caespitose glabrous sedge, terminal inflorescence with 4–20 spikelets aggregated on the apex of culm, white obovoid nut

See *Descriptionum et Iconum Rariores* 51. 1773, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 294. 1805

(Whole plant made into a paste and applied on eczema.)

Fimbristylis bisumbellata (Forssk.) Bubani (*Fimbristylis alamosana* Fernald; *Fimbristylis annua* (All.) Roem. & Schult.; *Fimbristylis annua* fo. *brizoides* (Nees & Meyen) Kük.; *Fimbristylis annua* var. *diphylla* (Retz.) Kük.; *Fimbristylis arenicola* Wiggins; *Fimbristylis baldwiniana* (Schult.) (Nutritious, stimulant, tonic.)

in South Africa: biesie

Fimbristylis thomsonii Boeck. (*Fimbristylis complanata* Benth.; *Iria thomsonii* (Boeck.) Kuntze)

India.

See *Flora Hongkongensis* 303. 1861, *Linnaea* 37: 37–38. 1871, *Revisio Generum Plantarum* 2: 753. 1891

(Plant juice for wound washing.)

Finlaysonia Wallich Asclepiadaceae (Apocynaceae, Periplocaceae)

For the English botanist George Finlayson, fl. 1790s–1823 (on the way from Calcutta to England), naturalist, plant collector in Malaya and Siam, East India Company surgeon, 1821–1823 with the Crawford's mission to Siam and Cochinchina, collected for N. Wallich, author of *The Mission to Siam and Hué the capital of Cochin China, in the years 1821, 1822*. From the Journal of G.F. [Edited] with a memoir of the author, by Sir T.S. Raffles. London 1826. See Nathaniel Wallich (1786–1854), *Plantae Asiaticae Rariores*. 2: 48–50, t. 162. London 1831, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Alexander Carroll Maingay (1836–1869), "Timber trees of Straits Settlements." *Kew Bull.* 112–134. 1890 and D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. London 1914, John Crawford, *The Crawford Papers*. 1915, M. Archer, *Natural History Drawings in the India Office Library*. London 1962.

Finlaysonia obovata Wall.

India.

See *Plantae Asiaticae Rariores* (Wallich) 2: 48, t. 162. 1831

(Stem and leaves for skin diseases; leaves for the treatment of asthma.)

in India: dudhi lata

Firmiana Marsili Malvaceae (Sterculiaceae)

Named for the Austrian Karl Josef von Firmian, 1718–1782, book collector, a patron of the Padua Botanic Garden and Governor of Lombardy (Lombardia, Italy). See *Saggi*

scientifici e letterarj dell' accademia di Padova 1: 115–116. 1786, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 366. 1852 and C. Gola, *L'Orto Botanico. Quattro secoli di attività (1545–1945)*. Padova 1947, Wenzel Anton von Kaunitz-Rietberg, *Vorbereitung und Anfänge des Josefinismus im amtlichen Schriftwechsel des Staatskanzlers Fürsten von Kaunitz-Rittberg mit seinem bevollmächtigten Minister beim Governo generale der österreichischen Lombardei, Karl Grafen von Firmian, 1763 bis 1770*. Mitteilungen des Österreichischen Staatsarchivs. 1948, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 103. 1989, H. Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 250. [“b. 1716”] Basel 1996.

Firmiana colorata (Roxb.) R. Br. (*Erythropsis colorata* (Roxb.) Burkill; *Erythropsis roxburghiana* Schott & Endl.; *Firmiana colorata* R. Br.; *Karaka colorata* (Roxb.) Raf.; *Sterculia colorata* Roxb.)

India. Deciduous tree, bright red flowers, strongly veined foli- cles, yellow compressed seeds

See *Species Plantarum* 2: 1007. 1753, *Plants of the Coast of Coromandel* 1: 26. 1795, *Meletemata Botanica* 33. 1832, Bennett, John Joseph (1801–1876), *Plantae javanicae rari- ores*, descriptae iconibusque illustratae, quas in insula Java, annis 1802–1818, legit et investigavit Thomas Horsfield, M. D., e siccis descriptiones et characteres plurimarum elaboravit Joannes J. Bennett; observationes structuram et affinitates praesertim respicientes passim adjecit Robertus Brown. Londini, 1838–1852, *Sylva Telluriana* 72. 1838, *Pterocymbium* 235. 1844 and *Gardens' Bulletin, Straits Settlements* 5: 231. 1931

(Used in Sidha. Bark and juice for jaundice; gum infusion given for stomach pain. Leaf powder fish poison.)

in English: bullock's eyes

in Bangladesh: krasambaing

in China: huo tong

in India: ataikkati, ataikkatimaram, bilisoolige, bilisulige, dieng sangklor, gudilapu, jari udal, kaaruchinche, kaa- rupaayu, karaka, kaushi, khaukhim, khaukim, khavsa, khowsey, kodokili, kondatthaamara, malaiyamparutti, malapparutti, pisi, samarri, sambar kudal, sembar kudal, walgem

in Malaya: mata lembu

Fissistigma Griffith Annonaceae

From the Latin *findo*, *fidi*, *fissum* ‘to split, divide, sepa- rate’ and *stigma*, on each carpel the stigma are separated; see *Flora Cochinchinensis* 329, 351. 1790, William Griffith (1810–1845), *Notulae ad plantas asiaticas*. 4: 706. 1854, *Flora Indica*: being a systematic account of the plants . . . 115. 1855 and *Philippine Journal of Science* 15(2): 125. 1919.

Fissistigma bicolor Merr. (*Melodorum bicolor* Hook.f. & Thomson)

Philippines, India, Himalaya. Woody climber, elliptic-oblong leaves, pinkish globose fruits, sweet gelatinous pulp eaten

See *Fl. Ind.* [Hooker f. & Thomson] 1: 119. 1855, *FBI* 1: 80. 1872 and *Philippine Journal of Science* 15(2): 131. 1919

(Used for tooth decay.)

in India: kala-phangsu

Fissistigma bracteolatum Chatterjee

India, China.

See *Kew Bulletin* 1948: 58. 1948

(Roots antiinflammatory.)

in China: duo bao gua fu mu

Fissistigma latifolium (Dunal) Merr. (*Fissistigma latifolium* Merr.; *Melodorum latifolium* (Dunal) Hook. f. & Thomson; *Melodorum latifolium* Hook.f. & Thomson; *Unona latifolia* Dunal; *Unona latifolia* Hook.f. & Thomson; *Uvaria latifo- lia* (Dunal) Blume; *Uvaria latifolia* Blume; *Uvaria latifolia* Engl. & Diels)

SE Asia. Small woody climber

See *Monographie de la famille des Anonacées* 115. 1817, *Fl. Jav Anon.* 37. 1828, *Fl. Javae Anon.*, 37. t. 15. 1830, *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 117. 1855, *Fl. Brit. India* [J.D. Hooker] 1(1): 60. 1872 and *Monogr. Afrik. Pflanzen.-Fam.* 6: 22. 1901, *Philippine Journal of Science* 15(2): 132. 1919

(Crushed stems decoction drunk for the treatment of fever.)

in Sarawak: akar rarak

Fissistigma oldhamii (Hemsley) Merrill (*Fissistigma old- hamii* var. *longistipitatum* Tsiang; *Melodorum oldhamii* Hemsley)

China.

See *J. Linn. Soc., Bot.* 23: 27. 1886

(The roots used for traumatic injuries and arthritis.)

in China: gua fu mu

Fissistigma polyanthum (J.D. Hooker & Thomson) Merrill (*Fissistigma polyanthum* Merr.; *Melodorum polyanthum* J.D. Hooker & Thomson; *Uvaria polyantha* Wallich)

China, India. Woody climber, leaves oblong-elliptic, fragrant reddish flowers, ripe fruits eaten

See *Numer. List* [Wallich] n. 6467. 1832, *Fl. Ind.* [Hooker f. & Thomson] 1: 121. 1855, *FBI* 1: 81. 1872 and *Philipp. J. Sci.* 15: 135. 1919

(Roots for rheumatism, traumatic injuries and scabies; leaves used for asthma and scabies.)

in China: duo hua gua fu mu

Fissistigma rigidum Merr.

Borneo. Woody climber

See *Philipp. J. Sci.* 15: 135. 1919

in Sarawak: randau rarak

(Crushed stems decoction drunk for the treatment of fever.)

Fittonia Coem. Acanthaceae

Named for the sisters Elizabeth and Sarah Mary Fitton (born Dublin, flourished 1817–1866, d. 1866), friends of Robert Brown, authors of *Conversations on Botany*. [By S.M. Fitton, with the assistance of Elizabeth Fitton.] London 1817, Sarah Mary also wrote *Conversations on Harmony*. London 1855, *Dicky Birds*. A true story, in words of one and two syllables. London 1862, *The Four Seasons*; a short account of the structure of plants. London 1865, *The Grateful Sparrow*. A true story. London 1859, *How I became a Governess*. London 1861 and *My Pretty Puss*. London 1866; see *The Gardeners' Chronicle & Agricultural Gazette* 1861: 499. 1861 and J. Britten and G.S. Boulger, *A Biographical Index of Deceased British and Irish Botanists*. London 1931, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 248. London 1994, *Contr. Univ. Michigan Herb.* 23: 115–137. 2001, *Contr. Univ. Michigan Herb.* 24: 51–108. 2005.

(Whole plant infusion or decoction used as a rinse of the mouth and for toothache.)

in English: mosaic plant, nerve plant, silver fittonia, silver nerve, silver nerve-plant, silver net plant, silver threads, snakeskin plant, white-leaf fittonia

Flabellaria Cav. Malpighiaceae

Latin *flabellum* 'a little fan', see *Species Plantarum* 1: 428. 1753, *Monadelphiae Classis Dissertationes Decem* 9: 436. 1790, *Trav. S. Africa* 2: 280. 1824 and *Taxon* 43: 125. 1994.

Flabellaria paniculata Cav. (*Triaspis flabellaria* A. Juss.; *Triopteris pinnata* Poir.)

Tropical Africa. Climber, liana, woody, trailing, glossy leaves, petals white

See *Monadelphiae Classis Dissertationes Decem* 9: 436, t. 264. 1790, *Archives du Muséum d'Histoire Naturelle* iii: 507. 1843

(Leaves for skin infections, wound dressing.)

Flacourtia Comm. ex L'Hérit.

Salicaceae (Flacourtiaceae)

After the traveller and colonizer Étienne de Flacourt, 1607–1660, botanist, Director of the French East India Company, among his writings are *Dictionnaire de la langue de Madagascar*. Paris 1658, *Petit catéchisme et les prières du matin et du soir que les Missionnaires font et enseignent aux Néophytes et Cathécumènes de l'isle de Madagascar...* Paris 1657 and *Histoire de la grande Isle Madagascar*, etc. Paris 1661; see Charles Louis L'Héritier de Brutelle (1746–1800), *Stirpes novae aut minus cognitae*. 59, t. 30–31. Parisii 1786, *Flora Cochinchinensis* 601, 633. 1790, *Elem. Physiol. Veg. Bot.* 2: 905. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 255. 1824, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 367. Ansbach 1852, *Ann. Sci. Nat., Bot.* ser. 5, 9: 298–344. 1868 and *Pl. Syst. Evol.* 139: 57–76. 1981, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1084–1105. 2001.

Flacourtia flavescens Willd.

Ghana. Shrub, orange fruits

See *Species Plantarum*. Editio quarta 4: 830. 1806

(Antiplasmodial.)

Flacourtia indica (Burm.f.) Merr. (*Flacourtia afra* Pichi-Serm.; *Flacourtia hirtiuscula* Oliv.; *Flacourtia parvifolia* Merr.; *Flacourtia ramontchi* L'Hérit.; *Flacourtia sepiaria* Roxb.; *Gmelina indica* Burm.f.)

Tropical and subtropical Africa, India. Small tree, deciduous, rough bark, spiny or unarmed, spines on the trunk straight or branched, small cream fragrant flowers, male flowers with many yellow stamens, female flowers with a divided spreading style, blackish-red juicy berry persisting on the tree, small hard flat seeds, fruit eaten raw, soft sweet reddish purple ripe fruit eaten, goat fodder, at forest edges, montane woodland

See *Species Plantarum* 2: 626. 1753, *Flora Indica ... nec non Prodromus Florae Capensis* (N.L. Burman) 132, t. 39, f. 5. 1768, *Stirp. Nov.* 59 (–62; tt. 30–30b). 1786, *Fl. Trop.*

Afr. [Oliver et al.] 1: 121. 1868 and *An Interpretation of Rumphius's Herbarium Amboinense* 377. 1917, *Lingnan Science Journal* 6(4): 328. 1930 [1928 publ. 1930], *Miss. stud. Lago Tana* vii. *Ricerche Bot.*, Pt. 1, 97. 1951

(Decoction of aerial parts taken in leucorrhoea and menstrual irregularities. Fruits used in syphilis, its powder in jaundice and liver enlargement. Stem bark powder an antidote of snakebite; pills from stem bark paste taken for cholera; bark paste for chest pain; bark applied to eczema, infusion used as a gargle; bark decoction given to women for smooth delivery. Leaves infusion to cure fever, coughs and diarrhoea, dysentery, cholera, used to treat asthma, as a tonic for anaemia; leaf juice given orally for liver ailments; leaf and root infusion an antidote for snakebite. Roots used for indigestion and stomachache, snakebite and infertility, root infusion for pneumonia; root decoction diuretic, to treat indigestion, stomachache, diarrhoea and gonorrhoea; a paste from fresh roots licked for treating sore throat and cough, also applied locally on skin diseases. Unripe fruits crushed or bark as fish poison. Veterinary medicine, leaves infusion for screw worm in cattle.)

Hawkes; *Flickingeria kunstleri* (Hook.f.) A.D. Hawkes)

Tropical Asia, China. Epiphytic and lithophytic shrub to shrublet, undershrub, rhizomes and pseudobulbs yellow-green, yellowish sweet smelling flowers with dull brown-reddish marks, labellum cream-white

See *Exotic flora* 1: pl. 71. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 7: 329. 1825, *The Genera and Species of Orchidaceous Plants* 76. 1830, *Revis. Gen. Pl.* 2: 654–655. 1891 and *Taxon* 10: 103–105. 1961, *Orchid Weekly* 2(46): 454. 1961, *Orquídea* (Rio de Janeiro) 27: 302–303, 305. 1965

(Stimulant, tonic, cooling, aphrodisiac, demulcent, soothing, used in snakebite.)

in India: jivanti

Flickingeria macraei (Lindl.) Seidenf. (*Callista macraei* (Lindl.) Kuntze; *Dendrobium macraei* Lindl.; *Ephemerantha macraei* (Lindl.) P.F. Hunt & Summerh.; *Flickingeria macraei* (Lindl.) Bennet; *Flickingeria rabanii* (Lindl.) Seidenf.)

Himalaya.

See *Gen. Sp. Orchid. Pl.*: 75. 1830, *Revisio Generum Plantarum* 2: 655. 1891 and *Taxon* 10: 105. 1961, *Dansk Bot. Ark.* 34: 39, 43. 1980, *Journal of Economic and Taxonomic Botany* 5(2): 452. 1984

(Used in Ayurveda.)

in India: jivanti

Floscopa Lour. Commelinaceae

From the Latin *flos, floris* ‘a flower’ and *scopa, ae* ‘twigs, shoots, a broom’, the racemes are fastigiate and bundled; see J. de Loureiro, *Flora cochinchinensis*. 1: 189, 192. 1790.

Floscopa scandens Loureiro (*Floscopa scandens* var. *vaginivillosa* R.H. Miao) (alternative name R.H. Miao)

India. Creeping or ascending herb, acuminate leaves with sheathing base

See *Fl. Cochinch.* 1: 193. 1790, *FBI* 6: 390. 1892 and *Bull. Bot. Survey India* 16: 20. 1974, *Acta Sci. Nat. Univ. Sanyatseni* 1981(3): 116. 1981

(Whole plant used as a postpartum remedy, febrifuge and for relieving pyodermas, abscesses and acute nephritis; for sore eyes, squeeze the stem and drop the juice. Leaves juice dropped into sore eyes. Ceremonial, ritual, shoots placed in the altar.)

in India: chaha-lubar

Malay names: aur-aur, awo-awo, hawar-hawar, johong beraleh, kerakap sireh

Flourensia DC. Asteraceae

Flourensia cernua DC. (*Helianthus cernuus* (DC.) Benth. & Hook. f.)

Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 593. 1836, *Genera Plantarum* 2(1): 376. 1873

(Leaves for treating indigestion and stomach colic; leaves boiled in water and drunk to cure dysentery; a decoction of leaves drunk to treat vaginal hemorrhages; leaves infusion astringent and mildly laxative.)

in English: tarbush

in Mexico: hojase, hojasen

Flueggea Willd. Phyllanthaceae (Euphorbiaceae)

After the German physician Johann Flügge (Johannes Flueggé), 1775–1816, cryptogamic botanist, author of *Graminum monographiae ... Pars I. Paspalum. Reimaria. Hamburgi* 1810 and *Plan zur Anlegung eines botanischen Gartens nahe bey Hamburg*. Hamburg 1810; see *Species Plantarum*. Editio quarta [Willdenow] 4(2): 637, 757–758. 1806 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 552. 1965, *Allertonia* 3(4): 276, 299, 301. 1984.

Flueggea leucopyrus Willd. (*Acidoton leucopyrus* (Willd.) Kuntze; *Cicca leucopyrus* (Willd.) Kurz; *Flueggea leucopyrus* Dalzell & A. Gibson; *Flueggea wallichiana* Baill., nom. illeg.; *Flueggea xerocarpa* A. Juss.; *Phyllanthus albicans* Wall., nom. inval.; *Phyllanthus leucopyrus* (Willd.) König ex Roxb.; *Phyllanthus lucena* B. Heyne ex Roth; *Securinega leucopyrus* (Willd.) Müll.Arg.; *Xylophylla lucena* Roth)

India, Sri Lanka. Profusely branched shrub, stiff branchlets thorn-like, greenish flowers, white globose capsule, leaves fried and eaten, ripe fruits edible

See *Species Plantarum*. Editio quarta [Willdenow] 4(2): 757. 1806 [Apr 1806], *Hort. Bengal.*: 69. 1814, *Nov. Pl. Sp.*: 185. 1821, Jussieu, Adrien de (1797–1853), *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen*, tabulis aeneis 18 illustratum 106. 1824, *Flora Indica*; or, descriptions of Indian Plants 3: 658. 1832, *Numer. Fontainea Heckel Euphorbiaceae

Named for the French botanist René (Renus) Louiche Desfontaines, 1750–1833, professor at the Jardin des Plantes in Paris, President of the Institut National, traveller, among his most valuable writings are *Flora atlantica*, sive *Historia plantarum, quae in Atlante, agro Tunetano et Algeriensi crescut*. Paris [1798–1799], *Catalogus plantarum Horti Regii Parisiensis*. Editio tertia. Paris 1829 and *Histoire des arbres et arbrisseaux qui peuvent être cultivés en pleine terre sur le sol de la France*. Paris 1809. See *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis 18 illustratum* 33. 1824, *Prodromus Florae Norfolkicae* 84. 1833, Édouard Marie Heckel (1843–1916), *Étude au point de vue botanique et thérapeutique sur le Fontainea pancheri* (nobis). 9, 10. Montpellier 1870 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 446. 1965.

Fontainea pancheri (Baill.) Heckel (*Baloghia pancheri* Baill.; *Codiaeum pancheri* (Baill.) Müll.Arg.; *Fontainea pancheri* Heckel)

New Caledonia.

See *Adansonia* 2: 214. 1862, *Prodr.* 15(2): 1117. 1866

(Poisonous. Used for poisoning fish.)

Forsskaolea L. Urticaceae

For the Finnish-born Swedish botanist Pehr Forsskål (also Forsskåhl or Forskål or Forsskal), 1732–1763 (d. Yarim or

Yerim, Yemen), traveller, plant collector, from 1761 to 1763 on the Royal Danish Expedition to Egypt and Yemen, among his writings are *Flora aegyptiaco-arabica* ... post mortem auctoris edidit Carsten Niebuhr. Copenhagen 1775 and *Icones rerum naturalium*, quas in itinere orientali depingi curavit Petrus Forsskål. Post mortem auctoris ad regis mandatum aeri incisas edidit Carsten Niebuhr. Copenhagen 1776. See Martin Vahl (1749–1804), *Symbolae Botanicae*, sive plantarum tam earum quas in itinere imprimis orientali collegit Petrus Forsskål. Copenhagen 1790–1794, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 369. 1852 and Carl Christensen (1872–1942), “Index to Pehr Forsskål: *Flora Aegyptiaco-Arabica* 1775, with a revision of *Herbarium Forsskålîi*.” *Dansk Botanisk Arkiv*. 4, 3: 1–54. 1922, Carl Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 559. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 130. 1972, Gunnar Eriksson, in *D.S.B.* 5: 74. 1981, Frank Nigel Hepper and Ib Friis, *The Plants of Pehr Forsskal’s ‘Flora Aegyptiaco-Arabica’ collected on the Royal Danish Expedition to Egypt and the Yemen 1761–1763*. Kew 1994.

Forsskaolea candida L.f.

Namibia, South Africa. Perennial herb, reddish, rough leathery sticky leaves, inconspicuous flowers clustered in leaf axils green to greenish-maroon papery bracts

See *Opobals. Decl.* 17. 1764, *Suppl. Pl.* 245. 1782 [1781 publ. Apr 1782]

(Used to treat headaches, stomach aches and influenza.)

Forsythia Vahl Oleaceae

After the Scottish gardener William Forsyth, 1737–1804 (d. Kensington, London), 1763 gardener at Syon, 1771–1784 at Physic Garden (Chelsea), March 7, 1804, one of the founders of the Horticultural Society of London (now the Royal Horticultural Society), his principal writings are *Observations on the diseases, defects and injuries in all kinds of Fruit and Forest Trees*. London 1791; see F.D. Drewitt, *The romance of the Apothecaries’ Garden at Chelsea*. London 1924; C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966. The seven men who attended the first meeting of the Society were John Wedgwood (the son of the inventor of the Wedgwood pottery), Charles Francis Greville (1749–1809), Sir Joseph Banks (1743–1820), Richard Anthony Salisbury (né Markham) (1761–1829), William Townsend Aiton (1766–1849), William Forsyth and James Dickson (1738–1822).

Forsythia suspensa (Thunberg) Vahl (*Forsythia fortunei* Lindley; *Forsythia giraldiana* Lingelsh.; *Forsythia giraldiana* fo. *pubescens* (Rehder) C.S. Niu; *Forsythia suspensa* f. *pubescens* Rehder; *Forsythia suspensa* var. *fortunei*

(Lindley) Rehder; *Forsythia suspensa* var. *latifolia* Rehder; *Forsythia suspensa* var. *sieboldii* Zabel; *Ligustrum suspensum* Thunberg; *Rangium suspensum* (Thunberg) Ohwi; *Syringa suspensa* (Thunberg) Thunberg ex Murray; *Syringa suspensa* (Thunberg) Thunberg

China, Japan. Deciduous shrub, slender branches arching or erect, leaves ovate or oblong-ovate, bright yellow flowers in an axillary cluster, loculicidal capsules with light knobs outside

See *Species Plantarum* 1: 7, 9. 1753, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 207. 1780, *Systema Vegetabilium*. Editio decima quarta 57. 1784, *Enumeratio Plantarum ...* 1: 39. 1804, *Gardener's Chronicle & Agricultural Gazette* 1864: 412. 1864 and *Jahresbericht der Schlesischen Gesellschaft für Vaterländische Cultur* 86: 1. 1908, *Plantae Wilsonianae* 1(2): 302. 1912, *Acta Phytotaxonomica et Geobotanica* 1(2): 140. 1932, *Investigatio et Studium Naturae* 12: 66–77. 1992

(Fruits as antipyretic, antiviral, antibiotic and antidote, detoxify, loosen knot, swelling and pain in the throat, cool body, skin inflammation.)

in English: forsythia, weeping forsythia, weeping golden bell

in China: ehr-ts'ao, han lien tsao, lian qiao, lien chiao, lien, i chiao

in Japan: rengyô

Fouquieria Kunth Fouquieriaceae

After the French physician Pierre Éloi Fouquier, 1776–1850, professor of medicine at Paris. See Achille Pierre Requin, *Notice sur Fouquier*. Paris 1852; A.C. Celsi *De re medica libri octo*. Editio nova, curantibus P. Fouquier ... et F.S. Ratier. Parisiis, Lipsiae 1823; François Vincent Raspail, *Procès et défense de F.V. Raspail*, poursuivi ... en exercice illégal de la médecine ... sur la dénonciation formelle des sieurs Fouquier ... et Orfils. Paris 1846; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 370. [“Pierre Édouard”] Ansbach 1852; Irving William Knobloch, compil., “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs*. VI. 140. 1983.

Fouquieria splendens Engelm. (*Fouquieria splendens* subsp. *breviflora* Henrickson)

Mexico.

See *Nova Genera et Species Plantarum* (folio ed.) 6: 65. 1823, *Memoir of a Tour to Northern Mexico* 98–99. 1848 and *Aliso* 7(4): 508, 515–516. 1972, *Fl. Novo-Galiciana* 3: 9–751. 2001

(Tonic, roots decoction, a bath, to relieve tiredness; powdered roots applied to painful swellings.)

in English: coach-whip, ocotillo

Fragaria L. Rosaceae

Latin *fragum*, *i* or *fraga*, *ae* ‘strawberry, strawberry-plant’; Hebrew *perah* ‘sprout, blossom, blossom-shaped’, *parah* ‘to sprout, to blossom’, *peret* ‘single berry’, *baraq* ‘splendour, flash’, Akkadian *barhu* ‘shining’; see Carl Linnaeus, *Species Plantarum*. 1: 494–495. 1753 and *Genera Plantarum*. Ed. 5. 218. 1754 and *N. Amer. Fl.* 22: 356. 1908, *Fieldiana, Bot.* 24(4): 432–484. 1946, Pietro Bubani, *Flora Virgiliana*. 53. China, Himalaya. Edible fruits

See *Species Plantarum* 1: 495. 1753, *Inst. Rei Herb.* 2: 179. 1766, Weston, Richard (1733–1806), *The universal botanist and nurseryman*. London, 1770–1777, Weston, Richard (1733–1806), *Tracts on practical agriculture and gardening...*, 2nd. ed., greatly improved. London, 1773, *Cours Complet d'Agriculture Théorique, Pratique, Économique, et de Médecine Rurale et Vétérinaire* 5: 52, t. 5, fig. 1. 1785, *Encyclopédie Méthodique, Botanique* 2(2): 538. 1788, *Beiträge zur Naturkunde* 7: 25. 1792, *Fl. Env. Paris*, ed. 2. 264. 1799, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 571. 1825 and *Standard Cyclopaedia of Horticulture* 1272. 1927, *Kromosomo* 17: 487–489. 1980, *Acta Bot. Boreal.-Occid. Sin.* 8: 175–183. 1988, *Taxon* 51(2): 541. 2002

(Roots medicinal. Berries a source of vitamin C.)

in English: cultivated strawberry, garden strawberry, strawberry

in China: cao mei

in Japan: Oranda-ichigo

Fragaria daltoniana J. Gay (*Fragaria sikkimensis* Kurz; *Potentilla daltoniana* (J. Gay) Mabb.)

India. Fruits edible

See *Annales des Sciences Naturelles; Botanique*, série 4 8: 204. 1857 and *Telopea* 9(4): 798. 2002

(Root extract to heal wounds and cuts.)

in China: lie e cao mei

in India: kume mati

Fragaria nilgerrensis Schltld. ex J. Gay

India.

See *Annales des Sciences Naturelles; Botanique*, série 4 8: 206. 1857

(Root chewed for treatment of toothache and tooth decay.)

in China: huang mao cao mei

in India: kijuchuni

Fragaria nubicola (Hook. f.) Lindl. ex Lacaïta (*Fragaria nubicola* Lindl.; *Fragaria nubicola* Lindl. ex Lacaïta; *Fragaria vesca* var. *nubicola* Hook. f.; *Potentilla nubicola* (Hook. f.) Mabb.)

India. Herb, ripe fruits eaten

See *Numer. List* [Wallich] n. 1238. 1829, *The Flora of British India* 2(5): 344. 1878 and *Journal of the Linnean Society, Botany* 43(293): 467–468. 1916, *Telopea* 9(4): 799. 2002

(Plant emetic. Leaves for boils and ulcer inside the mouth; leaf juice dropped in ear for relieving earache. Root paste diuretic, laxative, diaphoretic, astringent, for headache. Fruits for the treatment of liver disorders and anemia; fruit juice given to small children for hastening recovery from weakness after illness or high fevers.)

in English: wild strawberry

in China: xi zang cao mei

in India: bhawila, bhula, gand-kaphal

Fragaria vesca L. (*Fragaria vesca* Coville; *Fragaria vesca* Benth.; *Fragaria vesca* Walter; *Fragaria vesca* Lour.)

North America. Perennial stoloniferous herb, erect or ascending, white flowers, reddish brown berries

See *Species Plantarum* 1: 494–495. 1753, *Fl. Carol.* [Walter] 150. 1788, *Fl. Cochinch.* 1: 325. 1790 and *Canad. J. Bot.* 40: 870. 1962

(Fruits and leaves astringent, diuretic. Leaves infusion in diarrhea and urinary complaints. Rhizome and leaves infusion for troubles of the circulatory system and for jaundice. Roots for diarrhea, urinary disorders, an infusion tonic, astringent. Veterinary medicine, for cattle.)

in English: alpine strawberry, common strawberry, European strawberry, sowteat strawberry, wild strawberry, wood strawberry, woodland strawberry

in Arabic: tout el-ard, tout en-nasara

in China: ye cao mei

in India: bhui asilo, gandokafal

in the Philippines: atakbang, dotdating, kubkubut

Fragaria virginiana Mill. (*Fragaria virginiana* Duchesne, nom. inval.; *Potentilla virginiana* (Mill.) E.H.L. Krause)

North America. Fruits eaten fresh

See *Hist. Nat. Frais.* 204. 1766, *Gard. Dict.*, ed. 8. [text s.n.] *Fragaria* no. 2. 1768 and M.R. Gilmore, *Uses of plants by the Indians* ... 32. 1991

(Young leaves infused to make a tea.)

in English: ground berry, mountain strawberry, scarlet strawberry, strawberry, strawberry vine, wild strawberry

in North America: wazhushtecha, wazhushtecha-hu, wazhushtecha sha wi (Dakota), bashte, bashte-hi (Omaha-Ponca), haz-shchek (Winnebago), aparu-huradu (Pawnee)

Fragula Miller Rhamnaceae

Perhaps from the Latin *frangere* ‘to break’; see *The Gardeners Dictionary* ... Abridged ... fourth edition vol. 1. 1754, *A Natural Arrangement of British Plants* 2: 621. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 26. 1825. See also *Rhamnus*.

Fragula betulifolia (Greene) Grubov (*Rhamnus purshiana* DC. var. *betulifolia* (Greene) Cory)

North America. Perennial tree or shrub

See *Rhodora* 38(455): 407. 1936

(Ceremonial, emetic.)

in English: beechleaf frangula, birch-leaf buckthorn

Fragula betulifolia (Greene) Grubov subsp. *betulifolia* (*Rhamnus betulifolia* Greene)

North America. Perennial tree or shrub

See *Pittonia* 3(13): 16. 1896 and *Rhodora* 38(455): 407. 1936

(Ceremonial, emetic.)

in English: beechleaf frangula

Fragula californica (Eschsch.) A. Gray (*Rhamnus californica* Eschsch.; *Rhamnus purshiana* DC. var. *californica* (Eschsch.) Rehder)

North America. Perennial tree or shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 26. 1825, *Genera Florae Americae Boreali-Orientalis Illustrata* 2: sub pl. 178. 1849, *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean*, made under the direction of the Secretary of War 12(2): 57. 1860

(Berries considered poisonous; crushed berries used to counteract poisoning.)

in English: California buckthorn, California coffee-berry, cascara buckthorn, coffee-berry

Frangula californica (Eschsch.) A. Gray subsp. ***californica*** (*Rhamnus californica* Eschsch.; *Rhamnus californica* Eschsch. subsp. *californica*)

North America. Perennial tree or shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 26. 1825, *Genera Florae Americae Boreali-Orientalis Illustrata* 2: sub pl. 178. 1849, *Reports of explorations and surveys* (Stevens) 12(2): 57. 1860

(Berries considered poisonous; crushed berries used as antidote.)

in English: California buckthorn, California coffee-berry, cascara buckthorn, coffee-berry

Frangula californica (Eschsch.) A. Gray subsp. ***occidentalis*** (Howell ex Greene) Kartesz & Gandhi (*Frangula occidentalis* (Howell ex Greene) Grubov; *Rhamnus californica* Eschsch. subsp. *occidentalis* (Howell) C.B. Wolf; *Rhamnus californica* subsp. *occidentalis* (Howell ex Greene) C.B. Wolf; *Rhamnus californica* var. *occidentalis* (Howell ex Greene) Jeps.; *Rhamnus californica* Eschsch. var. *occidentalis* (Howell) Jeps.; *Rhamnus occidentalis* Howell ex Greene)

North America. Perennial tree or shrub

See *Pittonia* 2(7A): 15. 1889 and *A Manual of the Flowering Plants of California* ... 615. 1925, *Rancho Santa Ana Botanic Garden: Monographs: Botanical Series* 1: 66. 1938, *Phytologia* 76(6): 449. 1994

(Laxative, dried, ground bark used for constipation.)

in English: California buckthorn, California coffee-berry, cascara buckthorn, coffee-berry

Frangula californica (Eschsch.) A. Gray subsp. ***tomentella*** (Benth.) Kartesz & Gandhi (*Frangula californica* var. *tomentella* (Benth.) A. Gray; *Frangula tomentella* (Benth.) Grubov; *Rhamnus californica* Eschsch. subsp. *tomentella* (Benth.) C.B. Wolf; *Rhamnus tomentella* Benth.; *Rhamnus tomentella* Benth. subsp. *tomentella*)

North America. Perennial tree or shrub

See *Plantas Hartwegianas imprimis Mexicanas* 303. 1849, *Smithsonian Contr. Knowl.* 5(6): 28. 1853, *Geological Survey of California, Botany* 1: 101. 1876, *Pittonia* 2(7A): 15. 1889, *Zoë* 1(8): 244. 1891 and *A Manual of the Flowering Plants of California* ... 615. 1925, *Rancho Santa Ana Botanic Garden: Monographs: Botanical Series* 1: 66, 70. 1938, *Phytologia* 76(6): 449. 1994

(Decoction of bark used as a cathartic, and as a bath for poison oak.)

in English: California buckthorn, California coffee-berry, cascara buckthorn, coffee-berry, hoary coffeeberry

Frangula caroliniana (Walter) A. Gray (*Rhamnus caroliniana* Walter; *Rhamnus caroliniana* Blanco; *Rhamnus caroliniana* Walter var. *mollis* Fernald)

North America. Perennial tree or shrub

See *Flora Caroliniana*, secundum ... 101. 1788, *Flora de Filipinas* 169. 1837, *Genera Florae Americae Boreali-Orientalis Illustrata* 2: 178. 1849

(Decoction or infusion of bark used as a cathartic, emetic, laxative; bark paste for wounds, boils. Wood infusion for jaundice.)

in English: Carolina buckthorn, Indian cherry, yellow buckthorn

Frangula purshiana (DC.) A. Gray (*Frangula purshiana* (DC.) Cooper; *Rhamnus purshiana* DC.)

North America. Perennial tree or shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 26. 1825, *Reports of explorations and surveys* (Stevens) 12(2): 57. 1860

(Fruits poisonous. Decoction or infusion of bark used as a cathartic, emetic, laxative.)

in English: California buckthorn, California coffee-berry, cascara, cascara buckthorn, coffee-berry, Pursh's buckthorn

Frangula rubra (Greene) Grubov

North America. Perennial shrub

See *Pittonia* 1(4): 68–69. 1887

(Decoction or infusion of bark used as a cathartic, emetic, laxative.)

in English: red buckthorn

Frangula rubra (Greene) Grubov subsp. ***rubra*** (*Rhamnus rubra* Greene)

North America. Perennial tree or shrub

See *Pittonia* 1(4): 68–69. 1887

(Decoction or infusion of bark used as a cathartic, emetic, laxative.)

in English: red buckthorn

Frankenia L. Frankeniaceae

After the Swedish botanist Johan Frankenius (Franke or Franckenius or Franck), 1590–1661, professor of botany and medicine at Uppsala, Sweden, author of *Speculum botanicum*. Upsaliae 1638. See Carl Linnaeus, *Species Plantarum*. 1: 331–332. 1753 and *Genera Plantarum*. Ed. 5. 154. 1754, *Definitiones Generum Plantarum* 3. 290. 1760, *Descriptiones Plantarum ex Capite Bonae Spei*, ... 171. 1767, Beatson, Alexander (1759–1833), *Tracts relative to the island of St.*

Helena 300. London, 1816 [“An alphabetical list of plants, seen by Dr. Roxburgh growing on the island of St. Helena, in 1813–14”: p. 295–326.], *Dictionnaire raisonné de botanique* 188. 1817, *Flora Telluriana* 2: 93. 1836[1837], Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 371. Ansbach 1852, J. Franckenii *Botanologia nunc primum edita, praefatione historica, annotationibus criticis, nomenclatura Linnaeana illustrata* a R.F. Fristedt. Upsala 1877, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 3: 218. 1879 and *Syst. Bot. Monogr.* 17: 1–93. 1987.

Frankenia palmeri S. Watson

North America.

See *Proceedings of the American Academy of Arts and Sciences* 11: 124. 1876

(Roots infusion taken as a cold remedy.)

in English: Palmer’s frankenia

Fraseria Walter Gentianaceae

For the Scottish traveller John Fraser, 1750–1811 (Chelsea, London), professional plant collector in Newfoundland and North America, gardener, hosier, established a nursery at Chelsea, published Thomas Walter’s (c. 1740–1789) *Flora caroliniana*. 1788, 1810 Fellow of the Linnean Society, collector for Czar of Russia, wrote *A short history of the Agrostis Cornucopiae: or the new American grass: and a botanical description of the plant*. London 1789. See W.J. Hooker, in *Companion to the Botanical Magazine*. 2: 300–305. 1836, John Claudius Loudon, *Arboretum et fruticetum britannicum*. London 1838, A. Lasègue, *Musée botanique de Benjamin Delessert*. 199–200. Paris 1845, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 371. Ansbach 1852 and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 167. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 4. Boston 1965, Jeannette Elizabeth Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808 - 1841*. 466. Harvard University Press 1967, Alice Margaret Coats, *The Quest for Plants. A History of the Horticultural Explorers*. 281–285. London 1969, J. Ewan, ed., *A Short History of Botany in the United States*. New York and London 1969, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 132. 1972, Blanche Henrey, *British Botanical and Horticultural Literature before 1800*. Oxford 1975, M. Hadfield et al., *British Gardeners: a Biographical Dictionary*. London 1980, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 712. Stuttgart 1993.

Fraseria caroliniensis Walter (*Fraseria officinalis* W. Bartram; *Fraseria verticillata* Raf.; *Fraseria walteri* Michx.; *Swertia caroliniensis* (Walter) Kuntze; *Swertia carolinien-sis* Kuntze)

North America. Perennial herb

See *Flora Caroliniana*, secundum ... 88. 1788, *Revisio Generum Plantarum* 2: 430–431. 1891

(Root used as tonic, antiseptic, antiemetic and taken for dysentery, indigestion, colics and cramps.)

in English: American columbo

Fraseria montana Mulford (*Leucocraspedum montanum* (Mulford) Rydb.; *Swertia montana* (Mulford) H. St. John)

North America. Perennial herb

See *Botanical Gazette* 19(3): 119. 1894 and *Flora of the Rocky Mountains* 1065. 1917

(Infusion of roots taken for tuberculosis.)

in English: white elkweed, white fraseria

Fraxinus L. Oleaceae

Latin *fraxinus*, *i* ‘an ash-tree, ash, an ashen spear, an ashen javelin’ (Vergilius, C. Plinius Caecilius Secundus), Akkadian *burasu*, Hebrew *beros*; see Carl Linnaeus, *Species Plantarum*. 2: 1057. 1753 and *Genera Plantarum*. Ed. 5. 477. 1754, *Defin. Gen. Pl.*: 476. 1760, *Vorles. Churpfälz. Phys.-Okon. Ges.* 1: 198. 1791, *Amer. Monthly Mag. & Crit. Rev.* 1: 175. 1818, *Allgemeine Medizinisch-Pharmazeutische Flora* 3: 1003. 1834, *New Fl.* 3: 93. 1838, *Deut. Bot. Herb.-Buch*: 135. 1841, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 372. Ansbach 1852, Pietro Bubani, *Flora Virgiliana*. 53–54. Bologna 1870 and *Amer. Midl. Naturalist* 3: 187. 1914, *Bot. Zhurn.* (Moscow & Leningrad) 66(10): 1423, 1426, 1428. 1981, *Fl. Reipubl. Popularis Sin.* 61: 33. 1992, *Pl. Syst. Evol.* 273(1–2): 25–49. 2008.

Japan* 3a: 128. 1993, *Fl. Korea*: 1159. 1996

(Bark anthelmintic, febrifuge.)

in China: hua ch'u liu

Fraxinus excelsior L. (*Fraxinus excelsior* var. *communis* Aiton, nom. inval.; *Fraxinus excelsior* var. *pendula-variegata* de Vos)

Europe.

See *Sp. Pl.*: 1057. 1753, *Hort. Kew.* 3: 445. 1789 and *Journal of Ethnopharmacology* 126(2): 226–232. 2009

(Bark tonic; leaves cathartic. Seeds consumed as a food, condiment, and antiobesity folk medicine, used as a potent hypoglycemic agent, to regulate glycemia and insulinemia.)

in English: common European ash, European ash

in India: kum

Fraxinus floribunda Wallich (*Fraxinus floribunda* Bunge, nom. illeg., non *Fraxinus floribunda* Wall.; *Fraxinus urophylla* (G. Don) Wall. ex A. DC.; *Ornus floribunda* (Wall.) Sweet; *Ornus urophylla* G. Don)

India, Himalaya. Tree, deciduous, cylindrical bole, slightly warty outer bark white, bark exudate, imparipinnate opposite ragged glabrous leaves, petioles and young leaves red, corolla white, sweetly fragrant, near the streams, open spaces, shaded moist areas

See *Flora Indica*; or descriptions of Indian Plants 1: 150–151. 1820, *Hort. Brit.*: 271. 1826, *Enumeratio Plantarum*, quas in China Boreali 61 (no. 343). 1831, *Gen. Hist.* 4: 57. 1837, *Prodr.* 8: 275. 1844

(Used in Ayurveda. Exudate laxative.)

in English: Himalayan ash, Himalayan manna ash

in China: duo hua qin

in India: dieng la maheg, lankooree, Inakooree, sanooh, sunnu, sunuh, yavasasarkara

in Nepal: lankuri

Fraxinus griffithii C.B. Clarke (*Fraxinus bracteata* Hemsl.; *Fraxinus eedenii* Boerl. & Koord.; *Fraxinus floribunda* var. *integerrima* Wenz.; *Fraxinus formosana* Hayata; *Fraxinus griffithii* var. *koshunensis* (K. Mori) T. Yamaz.; *Fraxinus guilinensis* S.K. Lee & F.N. Wei; *Fraxinus minutepunctata* Hayata; *Fraxinus philippensis* Merrill; *Fraxinus retusa* var. *koshunensis* K. Mori; *Fraxinus sasaki* Masam.; *Ligustrum vaniotii* H. Lévy.)

Himalaya and northeastern India. Tree, leaves subcoriaceous, inflorescence a spreading terminal and axillary panicle, corolla white, fruit a samara, unilateral wing, fleshy seed endosperm, bark and leaves contain tannin

See *Fl. Brit. India* 3: 605. 1882, *Bot. Jahrb. Syst.* 4: 173. 1883, *J. Linn. Soc., Bot.* 26: 84. 1890, *Natuurk. Tijdschr. Ned.-Indië* 56: 185. 1896 and *J. Coll. Sci. Imp. Univ. (Infusion of inner bark taken for depression, fatigue. Rituals, mystic powers, symbolic objects, sacred pole, ceremonies.)

in English: American ash, Canadian ash, green ash, red ash, white ash

in North America: ash, tashnánga-hi (Omaha-Ponca), rak (Winnebago), kiditako (Pawnee)

Fremontia Torrey Sterculiaceae

After the American explorer John Charles Frémont, 1813–1890; see John Torrey (1796–1873), *Plantae Frémontianae*. Washington and New York 1853 and Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 7. 1965, Margaret Miller Rocq, ed., *California Local History. A Bibliography and Union List of Library Holdings*. Second Edition. Stanford, California 1970, Erwin G. Gude, *California Place Names. The Origin and Etymology of Current Geographical Names*. University of California Press, Berkeley 1974 [1949].

Fremontia californica Torr. (*Fremontodendron californicum* (Torr.) Coville)

North America.

See *Proceedings of the American Association for the Advancement of Science* 4: 191. 1851, *Contributions from the United States National Herbarium* 4: 74. 1893

(An infusion of the bark used to relieve irritation of the throat.)

in English: flannel bush, fremontia

Freycinetia Gaudich. Pandanaceae

Dedicated to the French navigator Admiral Louis-Claude de Saulces (or Desaulces) de Freycinet, 1779–1842, naval officer and cartographer, plant collector, traveller and naval explorer, a founder of Société de Géographie de Paris, in 1800 he joined Captain Nicolas Baudin on a voyage of exploration to southern and southwestern coastal Australia and Tasmania, explored portions of Australia and islands in the Pacific Ocean, conducted magnetic and oceanographic researches in the Pacific, commander of the French exploring expedition of 1817–1820 on which Gaudichaud-Beaupré was botanist, Freycinet wrote *Voyage de découvertes aux terres australes*. 1807–1816 and *Voyage autour du Monde entrepris par ordre du Roi ... sur les corvettes de S.M. L'Uranie et La Physicienne, pendant ... 1817–1820*. 13 vol. and four atlases. Paris Paris 1826[1830]. See *Journal of a voyage to the South Seas* 46. 1773, *Prodromus Florae Novae Hollandiae* 340. 1810, *Annales des Sciences Naturelles* (Paris) 3: 509. 1824, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 372. Freycinetia insignis Blume

India, Philippines. Branched climber, leaves acuminate, green elongate berries

See *Rumphia* 1: 158, t. 42. 1837

(Astringent, aphrodisiac.)

Freycinetia javanica Blume

Thailand to W. Malesia.

See *Rumphia* 1: 157. 1837

(Aphrodisiac, laxative. Magic.)

Freycinetia sumatrana Hemsl. (*Freycinetia auriculata* Merr.; *Freycinetia kurziana* Martelli; *Freycinetia sumatrana* var. *penangiana* B.C. Stone; *Freycinetia valida* Ridl.)

Indochina to W. Malesia and Philippines.

See *Bull. Misc. Inform. Kew* 1896: 167. 1896

(Adaptogenic.)

Friesodielsia Steenis Annonaceae

The genus commemorates the Swedish botanist Elias Magnus Fries, 1794–1878, and the German botanist Friedrich Ludwig Emil Diels, 1874–1945. E.M. Fries, one of the founders of taxonomic mycology, wrote *Systema mycologicum*. Lund 1821–1832, F.L.E. Diels contributed to H.G.A. Engler & K.A.E. Prantl *Die Natürlichen Pflanzenfamilien* ed. I and ed. 2, to Engler *Das Pflanzenreich*, he also wrote *Beiträge zur Kenntniss der Vegetation und Flora von Ecuador*. Stuttgart 1937, see Gottfried Wilhelm Johannes Mildbraed (1879–1954), *Bot. Jb.* 74(2): 173–198. 1948 (Obituary and bibliography); see *Bijdragen tot de flora van Nederlandsch Indie* 19. 1825, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 14 Suppl. 1: 124. 1829, *Flora Indica*: being a systematic account of the plants . . . 145. 1855 and *Bull. Jard. Bot. Buitenzorg* Ser. 3, xvii. 458. 1948, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 454. 1965 and 2: 11. 1965, *Kew Bull.* 25(1): 18. 1971.

Friesodielsia obovata (Benth.) Verdc. (*Popowia obovata* (Benth.) Engl. & Diels; *Popowia obovata* Engl. & Diels; *Popowia stormsii* De Wild.; *Unona obovata* Benth.)

Tanzania, Congo, Angola, Botswana. A shrub or small tree, scrambler or climber, branches spreading or drooping, fruits bright scarlet-red hanging down like sausages or fingers, ripe fruit sweet but slightly acid and eaten fresh, fruits eaten by birds, found in open woodlands or grasslands, rocky hills, on sandy soils

See *Supplementum Plantarum* 44, 270. 1782, *Genera Plantarum* 831. 1839, *Trans. Linn. Soc. London* 23(3): 469. 1862 and *Monogr. Afr. Pfl.* vi. 44. 1901, *Ann. Mus. Congo Belge, Bot. sér. 5, 1[3]: 242. 1906 [1903–1906 publ. Jan 1906], Kew Bulletin* 25(1): 18. 1971, *Fl. Trop. E. Africa, Annon.* 86. 1971

(Roots decoction used for stomachache, infertility in women and as an antidote for snakebite.)

in English: bastard dwaba-berry, monkey fingers, northern dwaba-berry, savanna dwaba-berry (iDwaba is the Xhosa name for *Monanthes caffra* (Sond.) Verdc.)

in Southern Africa: savannedwababessie, basterdwababessie, kombe, mchinga, mfulafula, mkatama, mkotamu, mochingachinga, muchukwana, mudandachonco, mujanjachoco, mulungalunga, munzinga, nayako; mukondekonde (Mbukushu); muDerere, muGaramuzuru, muKozombo (Shona)

in Tanzania: kunjengunjengu, mduguya, msalasi, nsalasi

Fritillaria L. Liliaceae

Latin *fritillus*, *i* ‘a dice-box’, referring to the sepals or to the markings on the flowers of a species or to the shape of the fruits; see P.B. Clarici, *Istoria e coltura delle piante*. Venezia

1726, *Species Plantarum* 1: 303–304. 1753, *The Genera of Plants* 56. 1866, *Journal of the Linnean Society, Botany* 14: 254, 269. 1874, *Genera Plantarum* 3: 818. 1883.

Fritillaria anhuiensis S.C. Chen & S.F. Yin (*Fritillaria anhuiensis* f. *jinzhaiensis* Y.K. Yang & J.Z. Shao (= J.Z. Zhao); *Fritillaria anhuiensis* var. *albiflora* S.C. Chen & S.F. Fuchsia excorticata (Forst. & Forst.f.) L.f. (*Skinnera excorticata* J.R. Forst. & G. Forst.; *Skinnera excorticata* Forst.)

New Zealand. Tree, short trunk, flaky papery bark, waxy buds, crimson purple flowers, blue pollen exuding a sticky substance, purplish-black berry edible

See *Characteres Generum Plantarum* [second edition] 58, t. 29. 1775, *Supplementum Plantarum* 217. 1781 and *Ann. Missouri Bot. Gard.* 82(4): 473–516. 1995

(Leaves as a postpartum remedy.)

in English: tree fuchsia

Maori names: kohutuhutu, konini (the fruits), kotukutuku

Fuerstia T.C.E. Fr. Lamiaceae

See *Acta Universitatis Lundensis* ser. 2. Afd. 2. 25(17): 3. 1929.

Fuerstia africana T.C.E. Fries

Uganda, Kenya. Woody-based herb, stem white-pubescent, corolla white with red-purple dots on outside of upper lip, in grassland, in *Acacia* woodland, near river

See *Species Plantarum* 2: 597–598. 1753 and *Acta Universitatis Lundensis* n.f. 25 17: 3. 1929, *Journal of Ethnopharmacology* 39: 197–203. 1993

(Leaves for eye and ear diseases; leaves pounded and soaked in warm water for malaria, pneumonia, ulcers, infertility. Used as body lotion.)

in Kenya: abunga-useke, aremo, birirwa, birirwob-sot, gathiriga, kalaku, munga'atha, olotodoaiki, piriwob-sot, piriwob-set

in Tanzania: engangu, kimamho, kimamko, kimamuo, kimancho, ngaangu

Fuertesimalva Fryxell Malvaceae

See Fryxell, P.A. “*Fuertesimalva*, a new genus of neotropical Malvaceae.” *Sida* 17(1): 69–76. 1996.

Fuertesimalva peruviana (L.) Fryxell (*Malva mathewsii* Turcz.; *Malva peruviana* L.; *Malvastrum peruvianum* (L.) A. Gray; *Malveopsis peruviana* (L.) Kuntze; *Urocarpidium mathewsii* (Turcz.) Krapov.; *Urocarpidium peruvianum* (L.) Krapov.)

Peru.

See *Species Plantarum* 2: 687–690. 1753, *Genera Plantarum* 271. 1789, *Abhandlungen der Königlich Böhmisches Gesellschaft der Wissenschaften* 3: 449. 1845, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 21–22. 1849, *United States Exploring Expedition* 146. 1854, *Revisio Generum Plantarum* 3(2): 21. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54(Beibl. 117): 63. 1916, *Darwiniana* 10(4): 616, 629. 1954, *Sida* 17(1): 74–75. 1996

(Purgative, roots boiled.)

in Ecuador: cuchi malva, cuchi malva blanca, cuchi malva lanuda

Fumaria L. Fumariaceae

Latin *fumarium*, ii (*fumus*, i ‘smoke’) ‘a smoke chamber for ripening the wine and drying the wood’, possibly referring to the roots; see Carl Linnaeus (1707–1778), *Species Plantarum*. 2: 699–701. 1753 and *Genera Plantarum*. Ed. 5. 314. 1754, *Neues Journal für die Botanik* 3(3): 37. 1809, *Esq. Regne*

Veg. 50. 1820, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 374. Ansbach 1852 and *J. Palynol.* 16: 85–105. 1980, *Lagascalia* 10: 225–256. 1981, *Castanea* 57: 273–281. 1992.

Fumaria indica Pugsley (*Fumaria indica* (Hauskn.) Pugsley; *Fumaria vaillantii* Loisel. var. *indica* Hausskn.)

Iran, Europe. Spreading, prostrate, decumbent, annual herb with pink flowers in short racemes, leaflet deeply lobed, leaf as vegetable, seeds edible

See *Flore de l'Iran* [Parsa] 2: 490. 1986

(Powder of the dried herb given along with milk as a diaphoretic, diuretic, blood purifier, anthelmintic and aperient. Plant paste mixed with sugar given with cow milk to cure fever. Leaf juice used for liver ailment. Stem or leaf infusion to treat mild cases of diarrhea; paste with water from powdered stem mixed with powder of pepper seeds applied to forehead for malaria. Decoction of the aerial parts mixed with cheese and water taken as a cooling drink and a blood purifier.)

in India: ban gajar, dhuna, khairwa, mijalu, papra, pit papra, pitapapdo, pitpapra, pitpatra, pittapapdo, saitra, shahtar

Fumaria officinalis L. (*Fumaria officinalis* Chaub., nom. illeg.; *Fumaria officinalis* Hohen., nom. illeg.)

China, Europe.

See *Species Plantarum* 2: 700. 1753, *Bulletin de la Société Impériale des Naturalistes de Moscou* 6: 247. 1833, *Nouvelle Flore du Péloponnèse et des Cyclades* 45. 1838 and *Feddes Repert.* 68: 178. 1963

(Antispasmodic, aperient, cholagogue, hypnotic and sedative, diaphoretic, diuretic, laxative, tonic.)

in English: earth-smoke, fumitory

in Brazil: erva-molarinha, fumária

in China: tzu hua ti ting, yan jin

Fumaria parviflora Lam.

India.

See *Encyclopédie Méthodique, Botanique* 2(2): 567. 1788

(Plant used for fever and influenza, to treat boils.)

in India: kairu, khet papra, pit papra, pitpapra

Funtumia Stapf Apocynaceae

From *ofuntun*, a vernacular common name used in Central Africa, see *Rumphia* 4: 25. 1849 and *Hooker's Icones Plantarum* 27: t. 2694. 1901.

Funtumia africana (Benth.) Stapf (*Funtumia latifolia* (Stapf) Schltr.; *Kickxia africana* Benth.; *Kickxia latifolia* Stapf; *Kickxia zenkeri* K. Schum.)

Tropical Africa. Tree, white latex, yellowish-white flowers

See *Icones Plantarum* 13: 59, t. 1276. 1879, *Bulletin of Miscellaneous Information Kew* 1898: 307. 1898, *Proceedings of the Linnean Society of London* 1899: 2–3. 1899 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 3: 81. 1900, *Hooker's Icon. Pl.* 27: tt. 2694–5, 2696–2697. 1901

(Leaves and roots wound dressing; root infusion for urinary tract troubles.)

in Tanzania: mbombo

Funtumia elastica (Preuss) Stapf (*Kibatalia elastica* Merr.; *Kibatalia elastica* (Preuss) Merr.; *Kickxia elastica* Preuss)

W. Trop. Africa, Tanzania. Tree or shrub, white pale yellow latex, cream-white flowers in cluster at leaf axil, rubber tree, leaves and fruit eaten by gorillas, fruit eaten by monkeys

See *Florula belgica, opera majoris prodromus, auctore ...* 35. 1827, *Notizbl. Königl. Bot. Gart. Berlin* 2: 353. 1899, *Proceedings of the Linnean Society of London* 1899: 2–3. 1899 and *Hooker's Icones Plantarum* 27: tt. 2694–2695. 1901, Christy, Cuthbert (1863–), *The African rubber industry and Funtumia elastica ("kickxia") ...* London, J. Bale, Sons & Danielson, Limited, 1911, *Philipp. J. Sci.* 17: 309. 1920 [1921]

(Scraped bark boiled and water drunk for stomach complaints. Stem and twigs for male impotence, piles, skin infections.)

in Cameroon: damba, ebonga, landa, ndamba, ndembo, ngonga

in Central African Republic: guga, landa

in Congo: debo, tata pusia

in Ivory Coast: pri

in Nigeria: anyan, chigban ete, ire, mba, nkware

in Yoruba: ire

in China: si jiao shu

Furcraea Vent. Asparagaceae (Agavaceae, Iridaceae, Amaryllidaceae)

For the French physician Antoine François de Fourcroy, 1755–1809 (Paris), naturalist, chemist, 1785 elected to the Académie Royale des Sciences, 1787 collaborated with A.L. Lavoisier, Guyton de Morveau and Berthollet in the revision of chemical nomenclature, entered politics during the French Revolution, a member of the electoral assembly of Paris, 1808 Count of Empire. See Étienne Pierre Ventenat (1757–1808), in *Bulletin des sciences, par la Société Philomatique*. [= *Bull. Sci. Soc. Philom. Paris.*] 1: 65–66. Paris 1793, *Annalen der Botanick.* ed. Usteri 12. 1796, *Plantarum historia succulentarum* 126. 1803, *Catalogue des livres de la bibliothèque de feu*

South Africa. Bulbous

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 1: 321, t. 14. 1834, *Fl. Tellur.* 2: 27. 1837, *Bot. Mag.* 89: t. 5388. 1863, *Fl. Cap.* 6: 465. 1897 and *J. Ethnopharmacol.* 2(4): 323–335. 1980 [Antineoplastic constituents of some Southern African plants: *Urginea capitata*, *Raphionacme hirsuta* and *Cheilanthes contracta*, *Haemanthus natalensis*, *Brunsvigia radulosa*, *Amaryllis belladonna*.], *Feddes Repert.* 107(5–6): 520. 1996, *Phyton* (Horn) 38(1): 69. 1998

(Used as anticancer. *Urginea capitata* preparations have been used to vaccinate African chiefs. Extracts of these plants showed significant cytotoxicity in the KB cell culture test-system.)

G

Gaertnera Lam. Rubiaceae

After the German botanist Joseph Gaertner, 1732–1791 (d. Calw), physician, studied medicine at Göttingen, in 1753 received M.D. from Tübingen, traveller, botanical collector, about 1760 professor of anatomy at Tübingen, in 1768 professor of botany and natural history at St. Petersburg and Director of the Botanic Garden, his works include *De fructibus et seminibus plantarum*. Stuttgart, Tübingen 1788–1791 [–1792]. His son Carl (Karl) Friedrich von Gaertner (Gärtner) (1772–1850, d. Calw, Württemberg), physician and botanist, traveller, celebrated experimental plant hybridizer, in 1796 received M.D. from Tübingen, wrote *Supplementum carpologiae seu continuati operis Josephi Gaertner de fructibus et seminibus plantarum*. Leipzig 1805–1807 and *Versuche und Beobachtungen über die Bastarderzeugung im Pflanzenreich*. Stuttgart 1849. See Jean Baptiste Antoine Pierre de Monnet de Lamarck (1744–1829), *Tableau encyclopédique et méthodique des trois règnes de la nature. Botanique*. Paris 1794, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, Joseph P.F. Deleuze, “Notice sur la vie et les ouvrages de Gaertner.” in *Annales du muséum national d’histoire naturelle*. 1 (an XI [1802]): 207–233. 1802, *Prodromus Florae Novae Hollandiae* 553. 1810, *Systema Vegetabilium*. Editio decima quinta 5: 21. 1819, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 18: 351, 353. 1836, *Hortus Mauritianus* 216. 1837, *Plantarum vascularium genera secundum ordines ...* 1: 259. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 34. 1845, *Journal of the Proceedings of the Linnean Society* 1: 112. 1857, *Enumeratio Plantarum Zeylaniae* 2: 149. 1859, *Genera Plantarum* 2: 132. 1873, *Die Natürlichen Pflanzenfamilien* 4(4): 124. 1891 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 22. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 138. 1972.

Gaertnera cooperi Hutch. & M.B. Moss

Tropical Africa. Shrub, leaves coriaceous

See *Flora of West Tropical Africa* [Hutchinson & Dalziel] 2: 21. 1931, *Kew Bull.* [Hutchinson & Dalziel] 1937: 62, latine. 1937

(Leaves and stem tonic, antiseptic, for skin infections, embrocation for swellings.)

Gaiadendron G. Don Loranthaceae

Greek *gaia* ‘the earth’ and *dendron* ‘a tree’, terrestrial, see *A General History of the Dichlamydeous Plants* 3: 431. 1834.

Gaiadendron punctatum G. Don (*Gaiadendron ellipticum* (Ruiz & Pav.) Baehni ex J.F. Macbr.; *Gaiadendron lanceolatum* (Ruiz & Pav.) Baehni ex J.F. Macbr.; *Gaiadendron macranthum* Killip; *Gaiadendron poasense* Donn. Sm.; *Gaiadendron punctatum* var. *puracense* (Kunth) Steyererm.; *Gaiadendron puracensis* (Kunth) G. Don; *Gaiadendron revolutum* Rizzini; *Gaiadendron tagua* (Kunth) G. Raf.; *Taguaria puracensis* (Kunth) B.D. Jacks.; *Taguaria puracensis* (Kunth) Raf.)

Peru.

See *Flora Peruviana* 3: 47–48, t. 277, f. a. 1802, *A General History of the Dichlamydeous Plants* 3: 432. 1834, *Sylva Telluriana* 125. 1838, *Flora Brasiliensis* 5(2): 48. 1868 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 375–416. 1936, *Fl. Ecuador* 24: 113–194. 1986

(Flowers infusion taken for cough.)

in Ecuador: violeta

Gaillardia Foug. Asteraceae

After the French magistrate Gaillard de Charentonneau, a member of the Académie des Sciences, naturalist, 18th century patron of botany and amateur botanist; see Auguste Denis Fougeroux de Bondaroy (1732–1789), *Observations sur la Physique, sur l’Histoire Naturelle et sur les Arts*. 29: 55. 1786, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 376. Ansbach 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 105. 1989, Alice Stroup, *A Company of Scientists. Botany, Patronage, and Community at the Seventeenth-Century Parisian Royal Academy of Sciences*. Berkeley 1990.

Gaillardia pinnatifida Torr. (*Gaillardia flava* Rydb.; *Gaillardia gracilis* A. Nelson; *Gaillardia mearnsii* Rydb.; *Gaillardia pinnatifida* var. *linearis* (Rydb.) Biddulph)

North America.

See *Annals of the Lyceum of Natural History of New York* 2: 214–215. 1827

(Diuretic.)

Galactia P. Browne Fabaceae (Leguminosae, Phaseoleae)

Greek *gala*, *galaktos* ‘milk’, possibly some species contain a milky sap or latex; see Patrick Browne, *The civil and natural history of Jamaica*. 290, 298. London 1756 and *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Darwiniana* 16(3–4): 663–796. 1971, *Nordic J. Bot.* 12: 339–346. 1992.

Galactia dubia DC. (*Galactia dubia* Schldl.; *Galactia dubia* DC. var. *angustata* Urb.; *Galactia dubia* DC. var. *ehrenbergii* Urb.; *Galactia dubia* DC. var. *guanicensis* Urb.; *Galactia dubia* DC. var. *typica* Stehle & L. Quentin; *Galactia montana* Britton; *Galactia striata* var. *tenuiflora* (Klein ex Willd.) Burkart; *Galactia tenuiflora* (Klein ex Willd.) Wight & Arn.; *Galactia tenuiflora* Eggers)

West Indies. Perennial climbing herb, creeping

See *Species Plantarum*. Editio quarta 3(2): 1059. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 238. 1825, *Systema Vegetabilium*, editio decima sexta 3: 325. 1826, *Linnaea* 5: 178. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 206. 1834, *Bulletin of the Torrey Botanical Club* 16(12): 324. 1889 and *Symbolae Antillarum* 2(2): 318. 1900, *Flore de Guadeloupe et Dependances ...* 2(2): 110. 1948, *Darwiniana* 16(3–4): 721. 1971, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Bol. Soc. Argent. Bot.* 34(1–2): 119–122. 1999

(Leaves infusion for relieving pain in the back. Doctrine of signatures.)

in English: iron weed

Galactia tenuiflora (Willd.) Wight & Arn. (*Galactia obcordata* (Baill.) Verdc.; *Galactia sericea* Pers. var. *phrynoides* DC.; *Galactia striata* (Jacq.) Urb. var. *tenuiflora* (Klein ex Willd.) Burkart; *Galactia tenuiflora* (Klein ex Willd.) Wight & Arn.; *Galactia tenuiflora* Eggers, nom. illeg.; *Glycine dubia* DC.; *Glycine tenuiflora* Willd.; *Glycine tenuiflora* Klein ex Willd.; *Teramnus obcordatus* Baill.; *Teramnus tenuiflorus* (Klein ex Willd.) Spreng.)

India, SE Asia, Papua New Guinea. Perennial non-climbing herb, trailing, vine, liana, procumbent, scrambling, climber, standard mauve and white, blackish linear pods

See *Species Plantarum*. Editio quarta 3(2): 1059. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 238.

1825, *Systema Vegetabilium*, editio decima sexta 3: 325. 1826, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 206. 1834, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(48): 382. 1883 and *Pflanzenr.* (Engler) *Menispermac.* 276. 1910, *Reinwardtia* 5 (4): 419–456. 1960, *Kew Bulletin* 24(2): 283. 1970, *Darwiniana* 16(3–4): 721. 1971, *Glycoconjugate Journal* 11(5): 443–461. 1994, *Bioorganic & Medicinal Chemistry* 4(11): 1979–1988. 1996, *Glycoconjugate Journal* 13: 263–271. 1996, *Chemistry—A European Journal* 11(10): 3032–3038. 2005

(Tuber mixed with those of *Pueraria mirifica* Airy Shaw & Suvat. (*Pueraria candollei* Benth. var. *mirifica* (Airy Shaw & Suvat.) Niyomdham) and *Stephania pierrei* Diels, and honey, made into pills and taken as rejuvenator.)

in China: ru dou

in India: bana kotlaha

Galanthus L. Alliaceae (Amaryllidaceae, Liliaceae)

Greek *gala*, *galaktos* ‘milk’ and *anthos* ‘flower’, from the colour of the flowers.

Galanthus nivalis L. (*Chianthemum nivale* (L.) Kuntze; *Galanthus alexandri* Porcius; *Galanthus imperati* Bertol.; *Galanthus melvillei* Voss; *Galanthus montanus* Schur; *Galanthus nivalis* f. *pictus* K. Malý; *Galanthus nivalis* f. *pleniflorus* P.D. Sell; *Galanthus nivalis* var. *atkinsii* Mallett; *Galanthus nivalis* var. *carpaticus* S.S. Fodor; *Galanthus nivalis* var. *hololeuca* Celak.; *Galanthus nivalis* var. *majus* Ten.; *Galanthus nivalis* var. *minus* Ten.; *Galanthus nivalis* var. *scharlockii* Casp.; *Galanthus scharlockii* (Casp.) Baker; *Galanthus umbricus* Dammann)

Europe.

See *Species Plantarum* 1: 288. 1753, *Abh. Königl. Böhm. Ges. Wiss.*, VII, 3: 198. 1891 and *Verh. K. K. Zool.-Bot. Ges. Wien* 54: 302. 1904, Stern, F.C. *Snowdrops and Snowflakes—A Study of the Genera Galanthus and Leucojum*. (This plant contains the alkaloid lycorine, which can cause poisoning. Some individuals were poisoned after ingesting the bulbs as emergency food in Holland during World War II. Large amounts of bulbs need to be ingested to produce toxic

reactions. An aqueous extract of the leaves has produced a positive patch test reaction in a gardener. Used for cancer or non-cancer diseases.)

in English: snowdrop

Galbulimima Bailey Himantandraceae

The fruit resembles to a *galbulus*, a cone or a strobilus with fleshy scales; Latin *mimus*, i 'a mimic actor', Greek *mimos*; see F.M. Bailey, in *Queensland Department of Agriculture and Stock. Botany Bulletin*. 9: 5. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 164. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 55: 126. 1917.

Galbulimima belgraveana (F. Muell.) Sprague (*Galbulimima baccata* Bailey; *Galbulimima belgraveana* Bailey; *Galbulimima belgraveana* Sprague)

New Guinea, Moluccas. Evergreen tree, aromatic, densely compact crown

See *Journal of Botany, British and Foreign* 60: 138. 1922, *J. Agric. Trop. Bot. Appl.* 4: 348–349. 1957, *J. Agric. Trop. Bot. Appl.* 5: 377–378. 1958, Hamilton, L. "An experiment to observe the effect of eating substances called ereriba leaves and agara bark", in *Transactions of the Papua and New Guinea Scientific Society* 1: 16–18. 1960

(Leaves and bark chewed to induce hallucinations, a violent intoxication leading to sleep and visual hallucinations. Bark used to relieve abdominal pain.)

in English: magnolia, magnolia ash, pigeonberry ash

in Papua New Guinea: waga

Common name: agara

Galearis Raf. Orchidaceae

From the Latin *galea*, *ae* 'a helmet', *galearis* 'helmet-', referring to petals and sepals; see C.S. Rafinesque, *Herbarium Rafinesquianum* 71–72. 1833, *Flora Telluriana*. 2: 39. 1836 [1837] and *Manual of the Flora of the Northern States and Canada* 292. 1901.

Galearis rotundifolia (Banks ex Pursh) R.M. Bateman (*Amerorchis rotundifolia* (Banks ex Pursh) Hultén; *Amerorchis rotundifolia* f. *angustifolia* (J. Rousseau) P.M. Br.; *Amerorchis rotundifolia* f. *beckettii* (B. Boivin) Hultén; *Amerorchis rotundifolia* f. *immaculata* Mazurski & Laur. P. Johnson; *Amerorchis rotundifolia* f. *lineata* (Mousley) Hultén; *Amerorchis rotundifolia* f. *rosea* P.M. Br.; *Amerorchis rotundifolia* f. *wardii* P.M. Br.; *Amerorchis rotundifolia* var. *lineata* (Mousley) W.J. Schrenk; *Habenaria rotundifolia* Conz.; *Habenaria rotundifolia* (Banks ex Pursh) Richardson; *Habenaria rotundifolia* Richardson; *Habenaria rotundifolia* Lindl.; *Habenaria rotundifolia* (Banks ex Pursh) Lindl.; *Orchis grandiflora* B.

Heyne ex Wall., nom. inval.; *Orchis rotundifolia* Banks ex Pursh; *Orchis rotundifolia* f. *angustifolia* J. Rousseau; *Orchis rotundifolia* f. *beckettii* B. Boivin; *Orchis rotundifolia* f. *lineata* (Mousley) E.G. Voss; *Orchis rotundifolia* var. *lineata* Mousley; *Platanthera rotundifolia* (Banks ex Pursh) Lindl.; *Ponerorchis rotundifolia* (Banks ex Pursh) Soó)

North America.

See *Fl. Amer. Sept.* 2: 588. 1813, *Numer. List*: 7032. 1832, *Gen. Sp. Orchid. Pl.*: 292, 306. 1835, *The Genera and Species of Orchidaceous Plants* 306. 1835 and *Canad. Field-Naturalist* 55: 65. 1941, *Rhodora* 68: 462. 1966, *Ark. Bot.*, a.s., 7(1): 34–35. 1967 (publ. 1968), *Lindleyana* 10: 1. 1995, *Orchidee* (Hamburg) 28: 98. 1997, *N. Amer. Native Orchid J.* 10: 34. 2004 (publ. 2005), *Wild Orchids Canad. Marit. & N. Gr. Lakes*: 284. 2006, *Ann. Bot.* (Oxford) 104: 439. 2009

(Used in Ayurveda, *Habenaria rotundifolia*.)

in India: padma

Galega L. Fabaceae (Galegeae)

Greek *gala*, *galaktos* 'milk' and *aix*, *aigos* 'a goat', fodder for cattle and goats, Latin *gallica herba*; see Carl Linnaeus, *Species Plantarum* 2: 714. 1753 and *Genera Plantarum* Ed. 5. 320. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 378. Ansbach 1852 and H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 260. 1996.

Galega officinalis L. (*Galega bicolor* Regel; *Galega patula* Steven; *Galega persica* Pers.; *Galega vulgaris* Lam.)

Algeria, Europe. Perennial non-climbing herb, subshrub, flowers light blue to white, leaves cooked

See *Fl. W. Pakistan* 100: 91. 1977, *Le Naturaliste Canadien* 106: 451–461. 1979, *Thaiszia* 7: 75–88. 1997, *The Journal of reproductive medicine* 52(11): 1011–1015. 2007, *The Annals of pharmacotherapy* 43(5): 939–943. 2009, *Diabetic medicine: A Journal of the British Diabetic Association* 26(8): 798–802. 2009, *Diabetes care* 33(1): 9–16. 2010

(Toxins. Febrifuge, diaphoretic, galactagogue. Metformin appears to be an effective alternative to insulin in the treatment of GDM (Gestational Diabetes Mellitus). Veterinary, often fed to cows and goats in order to increase their milk yield.)

in English: goat's rue, professor weed

in China: shan yang dou

in Italian: aruta capraria, capraggine, chiappamosche, lavamani, ruta di capra

Galenia L. Aizoaceae

The genus was named to honor the Greek Claudius Galen (Galenos, Galenus), born circa A.D. 130 at Pergamum, d.

circa in A.D. 200 probably in Sicily, one of the most eminent physicians of any age or country, his writings were very numerous but practically nothing remains of his philosophical works. See Carl Linnaeus, *Species Plantarum*. 359. 1753 and *Genera Plantarum*. Ed. 5. 169. 1754, *The American Journal of Science* ... New York, NY, ed. 2 1: 376. 1819, Ernst H.F. Meyer (1791–1858), *Geschichte der Botanik*, Studien von Ernst H.F. Meyer. II: 187–194 and IV: 258–261. Königsberg 1854–1857 and John Ferguson, *Bibliotheca Chemica*. 1: 352. Glasgow 1906, Garrison and Morton, *Medical Bibliography*. 665. 1961, Richard J. Durling, *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 1971. 1967, Fridolf Kudlien & Leonard G. Wilson, in *D.S.B.* 5: 227–237. 1981, Antonio Clericuzio, “From van Helmont to Boyle. A study of the transmission of Helmontian chemical and medical theories in seventeenth-century England.” *BJHS*. 26: 303–334. 1993.

Galenia africana L. (*Galenia africana* var. *halimifolia* Fenzl ex Sond.; *Galenia africana* var. *pentandra* Hiern; *Galenia africana* var. *secundata* Adamson; *Galenia linearis* Thunb.; *Galenia namaensis* auct., non Schinz, misapplied name; *Galenia tenuifolia* Salisb.)

South Africa. Erect aromatic woody shrublet

See *Species Plantarum* 1: 359. 1753, *Prodromus Plantarum Capensium*, ... 77. 1794, *Prodr. Stirp. Chap. Allerton* 283. 1796, *Flora Capensis* (Harvey) 2: 478. 1862 and *J. S. African Bot.* 22: 91. 1956, Van Der Lugt J.J., Schultz R.A., Fourie N., Hon L.J., Jordaan P., Labuschagne L. “*Galenia africana* L. poisoning in sheep and goats: hepatic and cardiac changes.” *Onderstepoort J. Vet. Res.* 59(4): 323–333. 1992

(Poisonous, blistering of the oral mucous membranes. Plant or fresh leaves chewed to relieve toothache. Leaves and roots sedative, antimicrobial, analgesic, antiseptic, to treat venereal sores, prostate disorders, wounds, eye infections and skin diseases.)

in English: yellow bush

in Southern Africa: dabee, geelbos, iqina, kraalbos, kraalbossie, kraalgeelbos, muisgeelbos, perdebos, waterpensgeelbos

Galenia secunda (L.f.) Sond. (*Aizoon contaminatum* Eckl. & Zeyh.; *Aizoon elongatum* Eckl. & Zeyh.; *Aizoon propinquum* Eckl. & Zeyh.; *Aizoon secundum* L.f.; *Galenia aizoides* Fenzl ex Sond.; *Galenia contaminata* Eckl. & Zeyh.; *Galenia elongata* Eckl. & Zeyh.; *Galenia secunda* (L.f.) Sond. var. *strigulosa* Sond.)

South Africa.

See *Supplementum Plantarum* 261. 1782 [1781 publ. Apr 1782], *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 3: 326. 1837, *Flora Capensis* (Harvey) 2: 474. 1862 and *Flora of Australia* 19–62. 1984

(For skin diseases, venereal sores, wounds, antiseptic, an infusion is taken for bladder infections.)

in South Africa: vanwyksbossie

Galianthe Griseb. Rubiaceae

Galianthe brasiliensis (Spreng.) E.L. Cabral & Bacigalupo (*Diodia anthospermoides* Cham. & Schltldl.; *Diodia brasiliensis* Spreng.; *Diodia brasiliensis* var. *angulata* (Benth.) Standl.; *Diodia brasiliensis* var. *microphylla* (Cham. & Schltldl.) Standl.; *Diodia polymorpha* Cham. & Schltldl.; *Diodia polymorpha* var. *angulata* (Benth.) K. Smith & Downs; *Galianthe clidemioides* Griseb.; *Spermacoce centranthoides* (Cham. & Schltldl.) Kuntze; *Spermacoce clidemioides* (Griseb.) Niederl.)

Brazil to NE. Argentina.

See *Genera Plantarum* 196. 1789, *Primitiae Florae Essequeboensis* ... 79, t. 1. 1818, *Linnaea* 3(4): 327–330, 331. 1828, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 156–157. 1879, *Revisio*

Generum Plantarum 3: 123. 1898 and *Journal of the Washington Academy of Sciences* 48(9): 284. 1958, *Boletín de la Sociedad Argentina de Botánica* 27(3–4): 235–249. 1991[1992]

(Abortifacient.)

Galinsoga Ruiz & Pavón Asteraceae

After the Spanish botanist Mariano Martinez Galinsoga, d. 1797, physician, Superintendent of the Madrid Botanic Garden; see Hipólito Ruiz López (1754–1815) and José Antonio Pavón (1754–1844), *Flora peruviana, et chilensis prodromus*. 110, t. 24. Madrid 1794, *Catalecta* 2: 112. 1800, *Nova Genera Plantarum* 137. 1800, *New Flora and Botany of North America* ... 1: 67. 1836, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 379. Ansbach 1852 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Amer. J. Bot.* 63: 247–250. 1976, Canne, J.M. “A revision of the genus *Galinsoga* (Compositae: Heliantheae).” *Rhodora* 79: 319–389. 1977, *Taxon* 26: 557–565. 1977, *Taxon* 27: 223–231. 1978, Canne, J.M. “Circumscription and generic relationships of *Galinsoga* (Compositae: Heliantheae).” *Madroño* 25: 81–93. 1978, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Compositae Newslitt.* 27: 7–10. 1995, *Bot. Žurn.* (Moscow & Leningrad) 81(5): 98–101. 1996, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999, *Compositae Newsletter* 37: i-iii, 1–84. 2001. *Galinsoga* is closely related to *Sabazia* Cassini of Mexico and South America and to at least some members of *Alloispermum* Willdenow, primarily from South America. *Galinsoga* might best be treated as a single larger genus including *Alloispermum* and *Sabazia*, see J.M. Canne 1978.

Galinsoga parviflora Cav. (*Adventina parviflora* Raf.; *Galinsoga quinquerediata* Ruiz & Pav.; *Stemmatella sodiroi* Hieron.; *Vigolina acmella* (Roth) Poir.; *Wiborgia acmella* Roth; *Wiborgia parviflora* (Cav.) Kunth)

East Africa. Annual herb, erect, many-branched, slightly hairy, shallow root fibrous, leaves opposite, flower heads of many yellow tubular florets and 4–5 white 3-lobed ray florets surrounded by membranous bracts, flower heads on stalks in a regularly branched loose leafy inflorescence, angled or flat black achene, pappus of flat fringed scales, young plants cooked as a vegetable, a weed of crops and waste land, similar to *Galinsoga quadriradiata*

See *Icones et Descriptiones Plantarum, quae aut sponte* ... [Cavanilles] 3(2): 41–42, pl. 281. 1794 [1795–1796], *Flora Peruviana, et Chilensis Prodromus* 110, pl. 24. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 1: 198. 1798, *Catalect. Bot.* 2: 112. 1800, *Nova Genera Plantarum* 137. 1800, *Encyclopédie Méthodique, Botanique* 8: 613. 1808, *Nova Genera et Species Plantarum* (folio ed.) 4: 201. 1820 [1818] and also quarto ed. 4: 256. 1820, *New Flora and Botany of North America* ... 1: 67. 1836, *Genera Plantarum* 2: 193, 359. 1873 and *Botanische Jahrbücher für Systematik*,

Pflanzengeschichte und Pflanzengeographie 28: 601. 1901, *Kirkia* 6(1): 1–62. 1967, *Taxon* 30: 78. 1981

(Plant rubbed on the skin as an antidote to beetle stings. Leaves antimicrobial, a paste a remedy for snakebites and stings of poisonous insects; crushed leaves mixed with lime used to stop bleeding; leaf extract in jaundice, dysentery, fever, diarrhea, vomiting; leaves juice to stop profuse bleeding. Stem and leaves pounded and juice squeezed applied on the wounds.)

in English: chickweed, galinsoga weed, gallant soldier, Kew weed, potato weed, small-flowered galinsoga, small-flowered quickweed, yellow weed

in Peru: paco yuyo, pacpa yuyo

in East Africa: kafumba, kafumbe, kangei, karandaranda, msekeseke, omenta

in South Africa: knopkruid

in India: banmara, japkondewa, marchiya, tiew-lien

Galium L. Rubiaceae

Greek *galion* ‘bedstraw’, *Galium verum* L., the yellow flowers of *Galium verum* can be used to curdle milk in cheese-making or to colour cheese; see C. Oudin, *Le thresor des trois langues, espagnole, françoise et italienne*. 1627, N. Duez, *Dittionario italiano & francese*. Genève 1664, Carl Linnaeus, *Species Plantarum*. 1: 105, 107. 1753, *Genera Plantarum*. Ed. 5. 46. 1754, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754, *Iconographia Botanica Exotica* 3: 15. 1830, *Nova Genera et Species Plantarum seu Prodromus* 4: 600. 1830, *Flora Indica*; or, descriptions of Indian Plants 1: 381. 1832, *Genera Plantarum* 523. 1839, *Annales de la Société Linnéenne de Lyon*, sér. 2 16: 397–398. 1868, *Genera Plantarum* 2: 149. 1873 and *American Midland Naturalist* 1: 264. 1910, A. Prati, *Vocabolario etimologico italiano*. Torino 1951, S. Battaglia, *Grande dizionario della lingua italiana*. Torino 1961, H.H. Allan, *Fl. New Z.* 1: 591–593. 1961, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana* 1: 184. 1979, D.J. McGillivray, *Telopea*. 2: 355–377. 1983, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. Watsonia 21: 365–368. 1997, *Monogr. Syst. Bot. Missouri Bot. Gard.* 107(3): 2871–2920. 2008

(Plant considered purgative and diuretic. Juice of the fresh plant or decoction from the dried plant used for skin diseases, cutaneous eruptions and to check bleeding from cuts; plant juice in epilepsy and hysteria.)

in English: bed-flower, cheese-rennet, curd-wort, ladies' bedstraw, lady's bedstraw, our lady's bedstraw, yellow bedstraw

Gallesia Casaretto Phytolaccaceae

Dedicated to Giorgio Gallesio, 1772–1839, an Italian botanist, among his writings *Gli agrumi dei Giardini Botanico-Agrari di Firenze*. Firenze 1839, *Pomona Italiana*. Pisa 1817–1839, *Traité du citrus*. Paris 1811 and *Versi*. Pisa 1824; see *Annales du muséum national d'histoire naturelle* 3: 70–71. 1804, *Narrative of an Expedition to Explore the River Zaire* 454. 1818, Casaretto, Giovanni (1812–1879), *Novarum Stirpium Brasiliensium Decades* 5: 43–44. Genuae, Typis J. Ferrandi, 1842 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 546–558. 1937, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 109. Palermo 1988.

Gallesia integrifolia (Spreng.) Harms (*Crateva gorarema* Vell.; *Gallesia gorarema* (Vell.) Moq.; *Gallesia gorazema* Moq.; *Gallesia gorazema* (Vell.) Moq.; *Gallesia integrifolia* var. *ovata* (O.C. Schmidt) Nowicke; *Gallesia ovata* O.C. Schmidt; *Thouinia integrifolia* Spreng., Sapindaceae)

South America. Tree, rough bark, leaves simple, inflorescence paniculate, samara winged, strong garlic smell, essential oil, forest, primary forest

See *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 2: 155. 1821, *Florae Fluminensis* 1: 200. 1825, *Novarum Stirpium Brasiliensium Decades* 5: 43. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 8. 1849 and *Repertorium Specierum Novarum Regni Vegetabilis* 32: 97. 1933, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 16(c): 144. 1934, *Annals of the Missouri Botanical Garden* 55: 320–321. 1969, *Fl. Ecuador* 46: 1–43. 1993

(Leaf infusion febrifuge; bark infusion used for bath, believed to protect against bad luck and witchcraft.)

in Peru: ajo, palo de cebolla

Gamblea C.B. Clarke Araliaceae

Named for the English botanist James Sykes Gamble, 1847–1925 (d. Liss, Hants), forester, 1871–1879 Indian Forest Service, 1877 Fellow of the Linnean Society, 1899 Fellow of the Royal Society, among his writings *A manual of Indian timbers*. Calcutta 1881 and *List of the trees, shrubs and large climbers found in the Darjeeling District, Bengal*. Calcutta 1878, with Cecil Ernest Claude Fischer (1874–1950) and

Stephen Troyte Dunn (1868–1938) wrote *Flora of Presidency of Madras*. London [1915–]–1936, with Sir George King (1840–1909) and Andrew Thomas Gage (1871–1945) “Materials for a Flora of the Malay Peninsula.” in *Journal of the Asiatic Society of Bengal*. vol. 58–74. Calcutta 1889–1936. See *The Flora of British India* [J.D. Hooker] 2: 739. 1879 and *J. Arnold Arbor*. 5: 7. 1924, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 169. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 26. 1965.

Gamblea ciliata C.B. Clarke (*Acanthopanax evodiaefolius* Franchet var. *ferrugineus* W.W. Smith, also *evodiifolius*; *Acanthopanax evodiaefolius* var. *glaucus* K.M. Feng; *Acanthopanax evodiaefolius* var. *gracilis* W.W. Smith; *Evodiopanax evodiaefolius* (Franchet) Nakai var. *ferrugineus* (W.W. Smith) Nakai, also *evodiifolius*; *Evodiopanax ferrugineus* (W.W. Smith) Grushvitsky & Skvortsova; *Evodiopanax gracilis* (W.W. Smith) Grushvitsky & Skvortsova)

India, Nepal, Himalaya

See *The Flora of British India* 2: 740. 1879 and *Adansonia*, Sér. 3, 22: 48. 2000, *Fl. Hubeiensis* 3: 182. 2002

(Stimulant, antibacterial, antiseptic, febrifuge.)

in China: yu ye wu jia

Ganophyllum Blume Sapindaceae

From the Greek *ganos* ‘beauty, brightness, ornament’ and *phyllon* ‘leaf’, bright and attractive leaves; see Karl Ludwig von Blume (1796–1862), *Museum Botanicum Lugduno-Batavum* 1(15): 230. 1850 [publ. late 1850 or early 1851].

Ganophyllum falcatum Blume (*Dictyoneura integerrima* Radlk. ex Koord.-Schum.; *Dictyoneura integerrima* Radlk.; *Ganophyllum falcatum* Br.)

Papua New Guinea, Northern Australia. Tree, dense spreading crown, bark light grey-brown smooth flaky, young branchlets resinous and scaly, leaves pinnate, sickle-shaped leaflets egg-shaped to oblong, male and female flowers in separate inflorescences, small greenish white clusters of male and female flowers, large panicles in the upper axils, orange ovoid-shaped fleshy fruit, fast growing, hard wood, insectivorous birds, nectar birds, sandstone, riverine, coastal districts, along streams, among mangroves

See *Museum Botanicum Lugduno-Batavum*: sive stirpium Exoticarum, Novarum vel Minus Cognitarum ex Vivis aut Siccis Brevis Expositio et Descriptio. Lugduni-Batavorum: E.J. Brill, 1849–[1856] and *Syst. Verz.* ii. 61. 1913, *Repert. Spec. Nov. Regni Veg.* 18: 343. 1922

(Tender leaves pounded, mixed in water and taken to treat stomachache; leaves pounded and squashed with leaves of *Lepisanthes rubiginosa* (*Erioglossum rubiginosum*) given as contraceptive. Termiticidal extracts from the wood.)

in English: scaly ash

in India: sanuk, sanup

in Indonesia: arangen, kayu mangir, ki angir, lulibas, mangir, panapok ayer, salngen, scaly ash, tapu

Garcinia L. Clusiaceae (Guttiferae)

After the Portuguese physician García de Orta (1490/1501/1502–1570) and the French-born Dutch army physician Laurent Garcin, 1683–1752, naturalist, botanist of the Dutch East Indies Company, traveller and plant collector. See Carl Linnaeus, *Species Plantarum*. 1: 443–444. 1753, *Species Plantarum* 2: 1193. 1753, *Genera Plantarum*. Ed. 5. 202. 1754, *Plants of the Coast of Coromandel* 2: 51, t. 196. 1804, *Genera Nova Madagascariensia* 15. 1806, *Dictionnaire des Sciences Naturelles* [Second edition] 20: 104. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 560. 1824, *Ordines Naturales Plantarum* 222, 292. 1830, Bridel, *Biographie de Laurent Garcin*. 1857 and *Annales des Sciences Naturelles; Botanique*, série 9 11: 256, 263. 1910, Cornelis Andries Backer, *Verklarend woordenboek*. 228. Groningen, Batavia 1936, J. Lanjou and F.A. Stafleu, *Index Herbariorum*. 2: 216. Utrecht 1957 [Regnum Vegetabile vol. 9]. John H. Barnhart, *Biographical Notes upon Botanists*. 2: 29. 1965, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 106. 1989, *Novon* 18(4): 524–537. 2008.

Garcinia atroviridis Griff. ex T. Anderson

India.

See *The Flora of British India* 1: 266. 1874

(Pound the leaves and use the juice as a postpartum remedy; leaf and root decoction dropped into the ear for earache. Fruits as a wash after confinement.)

Malay names: asam gelugur, asay gelugor, gelugor

Garcinia buchananii Baker

Tanzania, South Africa. Small tree, evergreen, understory, densely branched, all parts contain a rather sticky yellow sap, opposite thick leathery leaves, female flowers solitary, male flowers in clusters, sticky orange stigma, fruits yellow-orange, ripe fleshy fruit eaten raw, in evergreen forest, riverine thickets

See *Bulletin of Miscellaneous Information Kew* 1894: 354. 1894

(Roots infusion used as an aphrodisiac and as a lotion for sores.)

in English: granite garcinia

in Tanzania: kasolyo, mduma, mfilafila, mholoholo, musalasi, norkipiren, unsongwa

Garcinia cambogia Desr. (*Garcinia cambogia* Roxb., nom. illeg.; *Garcinia cambogia* Hort. ex Boerl.)

India.

See *Encyclopédie Méthodique, Botanique* 3: 701. 1792, *Hort. Bengal.* 42. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 621. 1832

(Used in Sidha.)

in India: aradal, aradala, aradalada, arasinapulige, ardala, cakkiraviriyam, catpeti, cattapeti, chigiri, cikiri, cimaikkorukkappuli, cimaikkorukkappulimaram, cimaikkorukkappuli, coddampulli, dharamba, dharambe, esali, esalpuli, heela, hile, ilappuli, kadumpuli, kapavatamariyan, karkpuli, kattimutantam, kattimutantamaram, kodagam, kodakapuli, kodakkapuli, kodampuli, kodapuli, korugan, korukka, korukkaip-puli, korukkaippuli, korukkampuli, korukkay, kotakan, kottukkappuli, kurkapullie, kurukkampuli, kutampuli, manthulli, namalomalam, ontepuli, otekayi, penanga, pinaru, punampuli, raktasrava, simachinta, simacinta, simai hunase, takattaippokki, takattaiyatakki, upagi, upagi mara, vadachinte, vadacinte

Garcinia cowa Roxb. (*Garcinia cowa* Roxb. ex DC.; *Garcinia roxburghii* Wight; *Garcinia wallichii* Choisy; *Oxycarpus gangetica* Buch.-Ham.)

India. Tree, quadrangular branchlets, lanceolate leaves, small yellow flowers in fascicles, smooth globular grooved fruit, oblong seeds with soft aril, leaves and shoots used as vegetable

See *Flora Cochinchinensis* 640, 647. 1790, *Hort. Bengal.* 42. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 622. 1824, *Prodr.* (DC.) 1: 561. 1824, *Memoirs of the Wernerian Natural History Society* 5: 344–345. 1824, *Illustrationes Plantarum Orientalium* 1: 125. 1840, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 12: 417. 1851, *FBI* 1: 262. 1874 and *Botanical Journal of the Linnean Society* 103: 233–250. 1990

(Used in Ayurveda. Leaves infusion drunk for diarrhea. Dried fruit finely powdered used for dysentery; dry pericarp made into a paste with fruits of *Solanum indicum* given in stomachache; dry pericarp infusion taken as cooling and febrifuge; seeds of *Garcinia cowa* made into a paste with seeds of *Spondias pinnata* applied on blistering spots, rashes and itches. Pesticide, mosquito larvicide.)

in India: cheng-kek, chengkek, dvipaja, dvipakharjuri, kangach, kaothekera, kau, kau thekera, kauthekera, manip, paravata, pranpi-chau-araung, rengnan, tekra-rengnan

Garcinia dulcis (Roxb.) Kurz (*Garcinia dulcis* (Roxb.) M.R. Almeida, nom. inval.; *Xanthochymus dulcis* Roxburgh)

SE Asia.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 43(2): 88. 1874 and *Fl. Maharashtra* 1: 89. 1996

(Antiscorbutic, emollient, demulcent.)

in Australia: mangosteen

Malayan names: mondo, mundu

in Philippines: taklang-anak

Garcinia gaudichaudii Planch. & Triana

SE Asia.

See *Annales des Sciences Naturelles; Botanique*, série 4 14: 357. 1860

(For cuts, roots rubbed.)

Malayan name: kandis

Garcinia gummi-gutta (L.) N. Robson (*Cambogia gummi-gutta* L.; *Garcinia gummigutta* (L.) N. Robson; *Garcinia gummigutta* Roxb.)

India. Tree, rounded crown, yellow gum when cut, fleshy shiny yellow berries, shiny seeds covered with fleshy white or red aril, very acidic fruits eaten raw or pickled

See *Hort. Malab.* 1: t. 24. 1678, *Hortus Bengalensis*, or a catalogue ... 42. 1814 and *Brittonia* xx. 103. 1968, *Ceylon J. Sci.* 12: 55. 1976

(Used in Ayurveda. Leaves, fruits and seed oil antiobesity, purgative and emetic, useful in ulcers, inflammations, bleeding piles, diarrhea, dysentery, indigestion, dropsy, worms. Fruit rind for controlling obesity, for fever and cold; a syrup from the fruit given to treat bilious disorders.)

in English: Malabar tamarind

in India: aesali, aesalu huli, aradaalada mara, aradala, aradalaupagi, arasina pulige, bilatti-amli, coddam-pulli, daraambaa, darambo, kadagolu, karkapuli, kodukkappuli, kodakkapuli, kodampuli, kodappuli, kokam, kotakkappuli, kotappuli, kudumpuli, kutappuli, mandu huli, manthey huli, manthuli, mantulli, marappuli, munthe huli, muragi, opagi mara, pinampuli, pinar, punampuli, punarpuli, seemachinta, seeme hunise, seeme kamboge, vaadachinta, vatte hule, vote kaayi, vote kayi, vrksamla, vrksamlah

Garcinia hanburyi J.D. Hooker (*Garcinia morella* Desr. var. *pedicellata* Hanbury)

Cambodia. Shrub or dioecious evergreen trees, straight, reddish-yellow to brownish-orange latex or resinous sap, leaves decussate, flowers axillary, yellow dyes of the best quality

See *Journal of the Linnean Society, Botany* 14: 485. 1875 and Jacques Désiré Leandri, 1903–1982, “Note sur le *Ron* (*Garcinia hanburyi* des Guttifères) dans la province de Kompong-Speu.” *Bull. Econ. Indochine.* 35: 633–640. 1932, *Phytochemistry* 41(3): 815–820. 1996, *Chem. Pharm. Bull.* 53: 850–852. 2005

(Used in Ayurveda. Provide medicinal resin, *gamboge*, a drastic potent purgative, an emetic, and a vermifuge for treating tapeworm, sometimes given to cows as purgative. Growth inhibitory activity of some extracts from barks and fruits. Cytotoxic, antibacterial, useful for their anticancer effects. Large doses of gamboge can be fatal.)

in English: gamboge tree

in Cambodia: rung

in India: amlaparni, kankusta

in Thailand: rong

in Vietnam: dang hoàng, ron, vàng nghệ

Garcinia hombroniana Pierre

Tropical SE Asia, Malaysia, India. Tree, latex white, dense canopy, leaves oblong to elliptic, flowers unisexual rose-red outside cream-yellow inside, fruit a scented berry bright rose-red, edible flesh thin and sour, on sandy and rocky coasts

See *Botanical Journal of the Linnean Society* 103: 233–250. 1990, *J. Nat. Prod.* 68(8): 1222–1225. 2005, *Planta Med.* 73(9): 884–884. 2007

(Bark antioxidant and antimicrobial. A root decoction after childbirth as a preventive medicine; roots and leaves used to relieve itching.)

in English: seashore mangosteen

in Peninsular Malaysia: beruas, manggis hutan

in Thailand: waa

Garcinia indica Choisy

India. Evergreen slender tree, drooping branches, leaves ovate, dark purple globose or spherical fruits

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 561. 1824

(Used in Ayurveda. Fruits antiscorbutic, cardiogenic, anthelmintic, emollient, demulcent, useful in piles, deficient digestion, thirst, diseases of mouth, dysentery, pain and heart complaints; a syrup from the fruit juice given in bilious affections. Root astringent.)

in English: Goa butter, kokum, kokum butter

in India: aamkola, amasole gida, amasolu, amlabija, amlapura, amlashaka, amlavetasa, amlavriksha, amlavrikshaka, amsole, atyamala, bherunda, bhinda, bhiran, bhirand, bijamla, cambogie, chirand, chudamala, chukra, chukramla, chukraphala, devana huli, dhoopada mara, dhupadamara, katambi, kethae huli, kokam, kokam-kattel, kokam khatai, kokam tel, kokamtel, kokum, kokum mara, kokum thaila, kokumbrindeo, kukam, mugal, murgal, murgal-mara, murgala, murguli, murgina huli, murgina hulimara, murginahuli, murginahuli-mara, murinahuli, murugalu, muruvana huli, muruvina, phalamlah, phalamlaka, pinampuli, punampuli, punarapuli, punarpuli, puramla, raktachudah, raktapuraka, rasamla, ratamba, ratambi, sakamla, shalamla, shreshthamla, tintidika, tittidiphala, vatehuli, vishambil, vote kayi, vrikshamla, vrksamla, vrksamla, vruksamla

in Tibet: da tri ga, da tri ga

Garcinia kola Heckel

West and Central Africa. Tree, spreading, straight, resinous leaves, bearing male and female flowers separately, petals pale green, sepals green with a dull pinkish bloom, indumentum of sepals and petals silvery, disk yellow, female flowers yellow and fleshy, male flowers with prominent stamens and greenish-white petals, orange round fruits, pulp of fruit eaten, in moist forest

See *Journal de Pharmacie et de Chimie* sèr. 5, 8: 88 (-89). 1883 and *Plantas que curam e cortam feitiços*. Rio de Janeiro 1988, Pierre Fatumbi Verger, *Ewé: The Use of Plants in Yoruba Society*. São Paulo 1995, Celia Blanco, *Santeria Yoruba*. Caracas 1995

(Masticatory. Bark added to palm wine as an aphrodisiac; stem bark purgative. Sap used for parasitic skin diseases. Seeds, stem and roots antiinflammatory, poison antidote, aphrodisiac, antimicrobial, antidiabetic, antiviral, aphrodisiac, for cough, inflammation of the respiratory tract. Fruit relieves cough.)

in English: bitter kola, false kola, male kola

in Cameroon: goro, ebon gagnagne, ebongagnagne, esok, ngbwel, onie

in Central Africa Republic: aovolié, haingré, kousou, kusu, orogba, tiampia

in Congo: angwandia, bompoma, botendo, bukumbu, engbeto kasa keke, kusu, mukakera, ngadiadia, ngaradia, ngadidi, nzero, otendo

in Ghana: tweappia

in Ivory Coast: aouolie

in Liberia: kofe, swa-meh

in Nigeria: adi, adu, akara inu, aki-inu, akilu, edun, efiat, efi-rai, goro, iwo, ojje, okan, orogba

in Sierra Leone: sagbei, ta sagbei

Garcinia kydia Roxb.

India. Trees, yellow flowers, sour berries eaten

See *Flora Indica*; or, descriptions of Indian Plants 2: 623. 1832

(Young leaves useful in bilious affections.)

in India: chop-chopa, taung-pha-lai, tekra, thikratenga

Garcinia lanceifolia Roxb. (*Garcinia lanceaefolia* Roxb.)

India, Himalaya. Shrub, dark green subcoriaceous leaves, solitary terminal yellow flowers, ovoid fruits, young leaves and shoots eaten in curries, ripe fruits eaten fresh or cooked

See *Hort. Bengal.* 42. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 623. 1832, *FBI* 1: 263. 1874

(Leaves infusion drunk as stomachic and diuretic.)

in India: pangsau-araung, pangsu-araung, pehlte

Garcinia livingstonei T. Anderson (*Garcinia angolensis* Vesque) (after the explorer David Livingstone, 1813–1873 (d. Lake Bangweulu, Rhodesia), author of *Missionary travels and researches in South Africa*. London 1857. See E.D. Young, *The Search after Livingstone*. [A diary kept during the investigation of his reported murder.] Revised by Rev. Horace Waller. 1868, William Garden Blaikie, *The Personal Life of David Livingstone*, chiefly from his unpublished journals and correspondence in the possession of his family. London 1882 and Dr. James I. Macnair, ed., *Livingstone's Travels*. 1956, Ian Anstruther, *I Presume: Stanley's Triumph and Disaster*. London 1956, Michael Gelfand, *Livingstone the Doctor, His Life and Travels. A Study in Medical History*. Oxford 1957, M.N. Chaudhri, I.H. Vegter and C.M. De Wal, *Index Herbariorum*, Part II (3), *Collectors I-L*. Regnum Vegetabile vol. 86. 1972, G.A. Shepperson, ed., *David Livingstone and Africa*. Edinburgh 1973, Richard Hall, *Stanley. An Adventurer Explored*. London 1974, Alan Moorehead, *The White Nile*. London 1983.)

Tropical Africa. Small tree or shrub, evergreen, short bole, large erect branches, heavy conical crown, stiff and leathery leaves, small clusters of cream-green scented flowers, small green buds sticky resinous, the bark exudes drops of yellow to red latex when damaged, fleshy acid-sweet yellow-orange ripe fruits eaten raw, found in riverine forest or thicket

See *Journal of the Linnean Society, Botany* 9: 263. 1867

(Roots infusion mixed with milk and drunk to treat abdominal pains in pregnant women, or shortly after giving birth. Fruit used in mumps. Fruits and stem for cough, fevers, parasitic diseases. Yellow oily sap used in the manufacture of arrow poison.)

in English: African mangosteen, Livingstone garcinia, lowveld mangosteen

in Kenya: atenum, daresa, dhembela, ekwalakwala, enongeperen, kikangakanywa, kisambwe, Ikasiyoi, lyoret, magadhoguyo, mangales, merwo, mfunza-tanzu, mpekechu, mpeketo, mtotozi, mufodzohi, mukanga, munganga, munyanga, muthuthuura, nerkwo, ngangakanywa, olkifulwa, unglise

in Southern Africa: laeveldse geelmelkhout; umPhimbi, uPhimbi, uGobandlovu, isiHlulamanye (Zulu); muKwananga, muRorongwe, Sina, muTungwa (Shona); isiNyula (Swazi); motsaodi (Tswana dialect, Ngamiland); mpimbi (Venda); mokononga (Subya); mokonkono (Kololo, Barotseland)

in S. Rhodesia: sina, muTungwa

in Tanzania: enongeperen, kanala, kisambwe, mbigo, mchanvia, mfunzatanzu, mkuku mbuzi, mpekechu, mpeketo, mpepete, mpugopugo, mpukopuko, mtiko, mtotozi, mtumbi, olkifulwa

Garcinia macrophylla Mart. (*Garcinia gardneriana* (Planch. & Triana) Zappi; *Rheedia benthamiana* Planch. & Triana; *Rheedia gardneriana* Planch. & Triana; *Rheedia macrantha* Standl. & Steyerl.; *Rheedia spruceana* Engl.)

South America.

See *Species Plantarum* 1: 443. 1753, *Species Plantarum* 2: 1193. 1753, *Flora* 24(Band 2): 35. 1841, *Annales des Sciences Naturelles; Botanique*, série 4 14: 309–310, 320–321. 1860, *Flora Brasiliensis* 12(1): 463. 1888 and *Publications of the Field Museum of Natural History, Botanical Series* 23(2): 65–66. 1944, *Annals of the Missouri Botanical Garden* 76(3): 927–929. 1989, *Kew Bulletin* 48(2): 410. 1993, *Guía de Árboles de Bolivia* 1–958. 1993

(Antiscorbutic, emollient, demulcent.)

Garcinia mangostana L. (*Mangostana garcinia* Gaertner)

Asia, Malaysia. Dioecious tree, straight trunk, symmetrically branched, yellow latex, leaves opposite, flowers solitary or paired at apices of branchlets, petals thick and fleshy yellow-green with reddish edges, fruit a globose and smooth berry turning dark purple at ripening, pericarp purple, white aril-lode, delicious edible fruit, dark red wood heavy coarse and very strong, humid tropics

See *Species Plantarum* 1: 443–444. 1753, *De Fructibus et Seminibus Plantarum...* 2: 105. 1791 and *Regnum Veg.* 127: 48. 1993, *Planta Med.* 62(5): 471–2. 1996, Nakatani, K. et al. "Inhibition of cyclooxygenase and prostaglandin E2 synthesis by γ -Mangostin, a xanthone derivative in Mangostano, in C6 rat glioma cells." *Biochem. Pharmacol.* 63(1): 73–79. 2002, *Journal of Ethnopharmacology* 101(1–3): 330–333. 2005

(Used in Sidha. Leaves and bark antimicrobial, febrifuge, astringent, antibacterial, antifungal, antimycobacterial, antioxidative. A fruit skin decoction with the bark of *Lansium domesticum* drunk as a remedy for bloody diarrhea. Pericarp used as a tea, applied to the skin, and also for dysentery, infections, inflammation, pain. Alpha-mangostin and gamma-mangostin are a histaminergic and a serotonergic receptor blocking agent, respectively. Circumcision and wounds, applied leaves and unripe bananas infusion. Roots decoction taken for irregular menstruation.)

in English: mangosteen

in Cambodia: mongkhut

in India: mangastin, mango-si, mangosteen hannu, mangostin, mangusta, mangustan, mankustan, mangusthan, mengkop, mengo-ti, mengostin, mengustan, mengut, mimbu, shulampuli, sula puli, tavr

in Indochina: mangoustan

in Indonesia: manggis

in Laos: mangkhud

in Malaysia: manggis, mangosteen, masta, mesetor, mesta, sementah, semetah

in Dutch East Indies: mangies boom, mangoe, mangostan, mangsteen

in Philippines: manggis, manggustan, mangostan, mangosteen
in Thailand: mang-khut, mangkhut

in Vietnam: cay mang cut, mang cut, tien lum

Garcinia mannii Oliv. (*Garcinia punctata* Oliv.)

Tropical Africa. Small tree, stilt roots, yellow latex, ripe fruits orange with yellow latex

See *Flora of Tropical Africa* [Oliver et al.] 1: 167. 1868

(Roots and fruits aphrodisiac, astringent, for diarrhea, dysentery, cough.)

Garcinia morella Desr. (*Garcinia morella* (Gaertn.) Desr.; *Garcinia morella* Hort. ex Boerl.)

India, Indo-Malaysia.

See *Encyclopédie Méthodique, Botanique* 3: 701. 1783–1808

(Used in Ayurveda, Unani and Sidha. Antiscorbutic, emollient, demulcent.)

in China: hai teng, teng huang, tung huang

in Tibet: rtsad sman khrol bu, rtsan sman khrol bu, rtsi da sman khrol bu

Garcinia multiflora Champ. ex Benth. (*Garcinia hainanensis* Merrill; *Garcinia tonkinensis* Vesque)

Southern China, Laos and Vietnam. Tree or shrub, leaves obovate, flowers unisexual, fruit a reddish fleshy edible berry, seed oil

See *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 310. 1851 and *Philippine Journal of Science* 23(3): 253–254. 1923

(Bark used as an external medicine to reduce inflammation.)

in China: mu zhu zi

in Laos: bira tai

in Vietnam: cây giôc

Garcinia nervosa Miq.

India. Small tree, twigs strongly angled, inner bark granular, white-yellowish sticky juice, globular fruit

See *Annales Museum Botanicum Lugduno-Batavi* 1: 208. 1864

(Antiscorbutic, emollient, demulcent, for body pains, leaf paste warmed in coconut oil rubbed on the body.)

in India: kintul

Garcinia pedunculata Roxb. ex Buch.-Ham. (*Garcinia pedunculata* Roxb.; *Garcinia pedunculata* Roxb. & G. Don)

China, India. Tree, ovate-oblong leaves, terminal pedunculate bracteate flowers, smooth rounded fruits, reniform seeds, yellow succulent aril, leaves used as vegetable, ripe fruits eaten fresh or in curries, aril eaten

See *Edinburgh Journal of Science* 7: 45, t. 1. 1827, *Gen. Hist.* i. 620. 1831, *Fl. Ind.* 2: 625. 1832, *FBI* 1: 264. 1874 and *Taxon* 26(5–6): 535. 1977

(Used in Ayurveda. Leaves decoction taken for round worms. For constipation, stomachache, indigestion, urinary troubles, infusion of dried pericarp in cold water. Seeds paste given in blood dysentery.)

in China: da guo teng huang

in India: amlavetasa, amlavetasah, ampri-araung, bor-the-kera, borthe-kera, dieng sohdanei, heibung, nerinnampuli, pranpi-araung, thagir, tikur, vawm-va

in Tibet: star bu, star zun, tam bra

Garcinia pictoria Buch.-Ham. (*Garcinia pictoria* Roxb.; *Garcinia pictoria* (Roxb.) Engl.; *Garcinia pictoria* (Roxb.) D'Arcy; *Garcinia pictorius* (Roxb.) D'Arcy; *Garcinia tinctoria* (DC.) Dunn; *Garcinia xanthochymus* Hook. f.; *Xanthochymus pictorius* Roxb.; *Xanthochymus tinctorius* DC.)

India. Evergreen tree, coriaceous leaves, unisexual flowers, four lobed fruits, ovoid to reniform dark brown seeds

See *Plants of the Coast of Coromandel* 2: 51, t. 196. 1805, *Hort. Bengal.* 42. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 562. 1824, *Memoirs of the Wernerian Natural History Society* 5: 346. 1826, *The Flora of British India* 1(2): 269. 1874 and *Flora of the Presidency of Madras* 74. 1915, *Nat. (Used in Ayurveda. Yellowish emulsion in the leaves, flowers and fruits. Plant seed pericarp, stem, bark, leaves and fruits antibacterial.)

in China: da ye teng huang

in India: gamboge, irevel, jorigehuli-mara, kurukapuli, mukki, mukki maram, mukki-maram, punarpuli, revachini, revalchini-pal, tamal, tamala, tapichha, tapinja

Garcinia sessilis Seem. (*Garcinia sessilis* (Forst.f.) Seem.)

Pacific, Tonga. Tree, dioecious, fragrant, yellow latex, leaves opposite simple, pale pink flowers unisexual 4-parted borne in axillary clusters of 3–9 flowers, fruit a red obovoid drupe

See Melinda Ostraff et al. “Traditional Tongan cures for morning sickness and their mutagenic/toxicological evaluations.” *Journal of Ethnopharmacology* 71(1–2): 201–209. 2000

(Crushed leaves in water used as an eyewash for eye problems, skin rashes, stomachache.)

in English: heilala tree

in Fiji: rauba

in Tonga: heilala

Garcinia sopsopia Mabb. (*Garcinia sopsopia* (Buch.-Ham.) Mabb.)

India.

See *Taxon* 26(5–6): 529. 1977

(Powdered bark applied on snakebite and the twigs used as snake repellent.)

in India: theisakei

Garcinia travancorica Bedd.

India.

See *The Flora Sylvatica for Southern India* t. 173. 1872

(Used in Sidha.)

in India: malampunku

Garcinia vieillardii Pierre

New Caledonia.

See *Planta Medica* 68(1): 41–44. 2002, *Life Sciences* 75(25): 3077–3085. 2004

(Antifungal, antimalarial.)

Garcinia xanthochymus Hook.f. ex T. Anderson (*Garcinia pictoria* Buch.-Ham.; *Garcinia pictoria* (Roxb.) D’Arcy, nom. illeg., non *Garcinia pictoria* Buch.-Ham.; *Garcinia pictoria* (Roxb.) Engl.; *Garcinia xanthochymus* Hook.f.; *Garcinia xanthochymus* Hook.f. ex T. Anderson; *Xanthochymus pictorius* Roxb.) (Greek *xanthos* ‘yellow’ and *chymos* ‘juice’.)

India, Sri Lanka. Tree, acute oblong leaves, pedicellate flowers, smooth globular fruits, ripe fruits eaten fresh or cooked, see also *Garcinia pictoria*

See *Species Plantarum* 1: 443. 1753, *Plants of the Coast of Coromandel* 2: 51, t. 196. 1805, *Memoirs of the Wernerian*

Natural History Society 5: 346. 1826, *The Flora of British India* [J.D. Hooker] 1(2): 269. 1874 and *Journal of the Indian Botanical Society* 59: 251–262. 1980, *Journal of Cytology and Genetics* 15: 99–104. 1980, *Annals of the Missouri Botanical Garden* 67(4): 998–1000, f. 4a. 1980 [1981]

(Used in Ayurveda and Sidha. Leaves for mouth ulcers and tongue diseases. An extract of bark of *Garcinia xanthochymus* with bark of *Miliusa roxburghiana* and leaves of *Ocimum sanctum* given in alcoholic intoxication. Fruits very acidic, astringent, antiscorbutic, emollient, demulcent, cooling, cholagogue, used in biliousness and dysentery.)

Gardenia cornuta Hemsl.

South Africa. Shrub or small tree, sweet scented white yellow flowers, golden yellow woody fruit tipped with persistent calyx, leaves browsed by goats and game, fruits eaten by monkeys

See *Hooker's Icon. Pl.* 29: t. 2809. 1906

(Fruit and roots decoction as an emetic.)

in English: horned gardenia, Natal gardenia, spurred gardenia

in Southern Africa: Natalkatjeepering, wilde-appel; umValasangweni (= to close the gate), uValasangwane semanzini, umHlahle, uNomphumela (Zulu)

Gardenia coronaria Buch.-Ham. (*Gardenia carinata* Griff., nom. illeg.; *Gardenia carinata* Thwaites, nom. illeg.; *Gardenia costata* Roxb.; *Yangapa flava* Raf.)

India.

See Symes, Michael, 1753?-1809., *An account of an embassy to the kingdom of Ava*, sent by the governor-general of India, in the year 1795, by Michael Symes ..., ed. 2, 3 v. London, Printed for J. Debrett [etc.] 1800, *Sylva Tellur.*: 20. 1838, *Not. Pl. Asiat.* 4: 261. 1854, *Enum. Pl. Zeyl.*: 159. 1859

(Wood for curing wounds.)

Gardenia erubescens Stapf & Hutch. (*Gardenia triacantha* DC. var. *parvilimbis* F.N. Williams)

Tropical Africa.

See *Prodr.* (DC.) 4: 382. 1830 and *Bull. Herb. Boissier*, II, 7: 378. 1907, *J. Linn. Soc., Bot.* 38: 428. 1909

(Fruit tonic, aphrodisiac, for venereal diseases.)

Gardenia gummifera L.f. (*Gardenia arborea* Roxb.; *Gardenia inermis* F. Dietr.; *Genipa arborea* (Roxb.) Baill.; *Genipa arborea* Baill.; *Genipa gummifera* (L.f.) Baill.; *Genipa gummifera* Baill.)

India. Shrub, unarmed, glabrous, a drop of gum covers leaf-buds, white terminal solitary flowers, smooth ellipsoid berry, ripe fruits and seeds eaten, fodder

See *Supplementum Plantarum* 164. 1782 [1781 publ. Apr 1782], *Hort. Bengal.* 15. 1814, *Fl. Ind.*, ed. Carey & Wall., ii. 554. 1824, *Fl. Ind.*, ed. Carey, i. 708. 1832, *Histoire des Plantes* (Baillon) 7: 374, 379. 1880 and *Afr. J. Tradit. Complement. Altern. Med.* 6(3): 228–232. 2009

(Used in Ayurveda, Unani and Sidha. Stem bark paste with the paste of *Piper nigrum* given orally as an effective antidote for snakebite. Resinous exudation of leaf buds and shoots antibacterial, used against diarrheal or abdominal discomforts or intestinal infections. Gum/resin stomachic, tonic, anthelmintic, antispasmodic, antiseptic, stimulant, carminative, astringent, to remove nervous complaints and against diarrhea, used internally with water to expel worms, for ring-worm; gum poultice to treat inflammatory joints. Veterinary medicine, bark paste applied over the body to relieve pains; gum applied to wounds of cattle to remove worms and to keep flies from sores.)

in English: gummy cape jasmine

in India: adavi bikke, aerebikke, ban anjir, barabutra, bhickygidda, bhika mali, bhikmali, bhurro, bhuru, bikke, bikkegidha, bikki, biliki, bukki, burui, cantirakarkam, chinabikki, chiribikki, chit-mit, chitnityal, chitta-mitta, chit-taa mooli, chittamatt, chittamatta, chittimitta, chittubikke, cinnabikki, cirubikki, cirukampil, cittamalli, cittamatta, cittimitta, decamali, dekamalli, dikaamali, dika-malli, dikamali (the gum), dikamalli, dikamari, dikamli, dikkaamalli, dikki, dokambe, gaaraga, gaggaru, gandharaj, gandharajan, garagamoduga, garagamuti, garga, hingunadika, kaaringuva, kambi maena, kambi mara, kambimara, kambimena, kampi, kampil, kampil, kampilippicin, kampilippicin, kampilippinmaram, kotranga, kullu, kumbai, kunkham, tikka malli, kurdu, kurla, kurlu, kuru, mali, nadihingu, peesilamaram, periyakampi, perunkampil, perunkampiputu, pindava, pindawa, puranapalam, sinnabikki, sinnakkambil, sirubikki, sirukkambil, sintametu, sittamatta, sittimitta, sittubikke, somanadikayam, thella manga, vidgi, vidgu, vurrkura, yerbhicky

in Tibet: sibs

Gardenia ternifolia Schum. & Thonn. var. ***goetzei*** (Stapf & Hutch.) Verdc. (*Gardenia asperula* Stapf & Hutch.; *Gardenia goetzei* Stapf & Hutch.; *Gardenia triacantha* DC.; *Randia torulosa* K. Krause)

Tropical Africa.

See *Prodr.* 4: 382. 1830 and *Bot. Jahrb. Syst.* 39: 529. 1907, *J. Linn. Soc., Bot.* 38: 423, 427. 1909, *Kew Bull.* 34: 355. 1979

(Used for its thorns.)

in Rhodesia: isivalesangweni

Gardenia thunbergia Thunb. (*Caquepiria bergkia* J.F. Gmel.; *Gardenia appendiculata* Stokes; *Gardenia crassicaulis* Salisb.; *Gardenia lutea* Fresen.; *Gardenia macrocarpa* Carey ex Voigt; *Gardenia medicinalis* Vahl ex Schum.; *Gardenia medicinalis* Vahl; *Gardenia medicinalis* Vahl ex Schumach. & Thonn.; *Gardenia speciosa* Salisb.; *Gardenia verticillata* Lam., nom. illeg.; *Genipa thunbergia* (Thunb.) Baill.; *Warneria thunbergia* (Thunb.) Stuntz)

Mozambique, South Africa. Evergreen shrub or small tree, creamy white sweetly scented flowers, hard woody egg-shaped fruits, confused with *Gardenia volkensii*, *Gardenia cornuta*, *Gardenia ternifolia* (= *Gardenia jovis-tonantis*), *Gardenia resiniflua*

See *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Diss. Gard.*: 13. 1780, *Bot. Mat. Med.* 1: 494. 1812, *Beskrivelse af Guineiske planter* 148. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 168. 1828, *Mus. Senckenberg.* 2: 167. 1837, *Hort. Suburb. Calcutt.*: 379. 1845 and *U.S.D.A. Bur. Pl. Industr. Invent. Seeds* 32: 39. 1914

(Latex as a purgative. Roots and root bark emetic, febrifuge, to treat skin diseases, leprosy, gall bladder problems; roots and leaves to treat syphilis.)

in English: forest gardenia, white gardenia, wild gardenia

in Southern Africa: bobbejaangif, buffelsbal, buffelsbol (= testicle of a buffalo), stompdoring, wildekatjeepering, witkatjeepering; umKhangazo, umKhwakhwane, umValasangwene (= back-gate closer), umValasangweni, umValasangweni-wehlathi (Zulu); umKangazi, umKankaza, umKhangazi (Xhosa)

Gardenia turgida Roxb. (*Ceriscoides turgida* (Roxb.) Tirveng.; *Gardenia donia* Buch.-Ham. ex Wall., nom. nud.; *Gardenia donia* Buch.-Ham.; *Gardenia montana* Roxb.; *Gardenia turgida* var. *montana* (Roxb.) Hook.f.; *Randia turgida* (Roxb.) Tirveng.)

India, Vietnam, Bhutan. Small tree or shrub, armed with axillary leaf bearing spines, leaves clustered at the end of branches, triangular stipules, white flowers, ovoid or globose woody fruit, many seeds, see also *Ceriscoides turgida*

See *Hort. Bengal.* 15. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 557. 1824, *Fl. Ind.*, ed. Carey, i. 711. 1832, *Numer. List* [Wallich] n. 8292. 1847, *Gen. Pl.* 2: 90. 1873, *Fl. Brit. India* 3: 108. 1880 and *Bull. Mus. Natl. Hist. Nat.*, Sér. 3, Bot. 35: 13, 15. 1978, *Ceylon J. Sci., Biol. Sci.* 14(1–2): 5. 1981

(Used in Ayurveda and Sidha. Whole plant in cholera, dysentery, fever, epilepsy, pneumonia, snakebite, smallpox, indigestion. Emetic, eating the fruit; pulp pounded and applied to head for fever and abdominal colic. Root paste applied as an antidote to scorpion bite; root extract taken in stomachache and abdominal pain. Seeds powder or paste given in case of food poisoning for its emetic property; seeds extract for diarrhea and weakness. Veterinary medicine, fruits juice squeezed into the ailing eyes of cattle to prevent lachrymation. Fruit as fish poison.)

in India: bangeri, bengeri, bharangi, bharngi, bonagaare, bone gaare, bongeri, boodugare, boodugaare, dandou kit, dundukit, elkasettu, gangli, gurman, ghurga, ghurgia, gudi manga, gutu, karamba, katolmaram, kharkar, kharhar, kharkar, khuriari, khurphendra, khurrur, khurur, kokkita, kukka elaka, kukka-elka, kukkayelka, magge, mahapindi, makkara, makkarai, makke, malakara, malamkarai, malangarai, malankara, malankarai, manjunda, mhaner, midhola, midola, mindhal, mullukokkita, mullukokkitha, naikinna, nakkareni, nancuntamaram, nancuntan, nanjundam, padairi, pendra, pendri, petra, phanda, phendra, phethra, phetra, safed-phetra, telel, teliga, tella-elka, tella gumma, tellaguma, tellakakkisa, tellakokkita, thanela, thanella, thanera, thella elaka, thellakakkitha, thellakokkita, tuddumanga, tuddumunga, vangli, verribikki, vettibikki, yerra-bikki, yerra-bikki, yerribikki, yelukari chittu

Gardenia volkensii K. Schum. (named after the plant collector Georg Ludwig August Volkens, 1855–1917, who collected on Mount Kilimanjaro, 1892–1894, wrote *Exkursionen*

am Kilima-Ndjaru. Berlin 1895, *Der Kilimandscharo*. Berlin 1897, see Sir Harry Hamilton Johnston (1858–1927), *Der Kilima-Ndjaru*. Leipzig 1886 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 443. 1965, Theodore W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 421. Boston, Mass. 1972.)

South Africa. Shrub or small tree, multi-stemmed, arching branches, domatia, crushed leaves sweet-smelling, sweetly scented whitish trumpet-like flowers, leaves browsed by game

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 332. 1904, *Journal of the Linnean Society, Botany* 38: 424. 1909, *Kew Bull.* 34: 358. 1979, *Proceedings, Indian Academy of Sciences. Section B, Biological Sciences* 47: 708–715. 1981, *Taxon* 30: 153. 1981

(Roots ash rubbed into the chest to treat pneumonia; for headache, a root extract dripped into the eyes or applied on the forehead. Fruits and roots infusion emetic, vermifuge, for intestinal worms.)

in English: bushveld gardenia, savanna gardenia, Transvaal gardenia

in Southern Africa: bosveldkatjeepering, kannetjieboom, morala, ntsalala, savannekatjeepering, stompdoring, Transvaal katjeepering, Transvaalkatjeepering; umValasangweni (= to close the gate), umGongwane (Zulu)

in Tanzania: chinyongandembo

Gardenia volkensii K. Schum. subsp. *spatulifolia* (Stapf & Hutch.) Verdc. (*Gardenia spathulifolia* Stapf & Hutch.; *Gardenia spatulifolia* Stapf & Hutch.; *Gardenia volkensii* subsp. *spathulifolia* (Stapf & Hutch.) Verdc.)

S. Trop. & S. Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 332. 1904, *Journal of the Linnean Society, Botany* 38: 424. 1909, *Kew Bull.* 34: 358. 1979, *Proceedings, Indian Academy of Sciences. Section B, Biological Sciences* 47: 708–715. 1981, *Taxon* 30: 153. 1981

(Fish poison.)

in English: Transvaal gardenia, wild gardenia

in Southern Africa: Transvaalse katjeepering, katjeepering, stompdoring; mubangara, chinara, mutara, muTarara, muTarura, chiTsalala (Shona); umKwakwane onkhulu, iValasangwane (Zulu); umValasangweni (Swazi); ntsalala (Tsonga); morala (Western Transvaal, northern Cape, Botswana); morala (North Sotho); kabunga (Subya); mtamba (Kalanga: Northern Botswana); sulu (Kololo: Barotseland); moravi (Mbukushu)

in S. Rhodesia: muTarura, chiTsalala

in Zambia: mukololo, sulu

Gardneria Wallich Strychnaceae (Loganiaceae)

Named for the English colonial governmental officer Hon. Edward Gardner (b. 1784), 1817 resident in Nepal at Court of Rajah at Katmandu, sent mosses to W.J. Hooker and plants to N. Wallich; see Nathaniel Wallich (1786–1854), *Plantae Asiaticae rariores*. London 1832; William Roxburgh (1751–1815), *Flora Indica*. 1: 400. [Annotations and additions by N. Wallich; editor William Carey, 1761–1834.] Serampore 1820–1824. Some suggested the genus was named after the English botanist and explorer George Gardner, 1812–1849, see M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 150. Dehra Dun 1985.

Gardneria multiflora Makino (*Gardneria chinensis* Nakai; *Gardneria hongkongensis* Hayata; *Gardneria nutans* Siebold & Zuccarini f. *multiflora* (Makino) Matsuda; *Gardneria shimadai* Hayata; *Marlea cavaleriei* H. Léveillé; *Paederia bodinieri* H. Léveillé; *Pseudogardneria multiflora* (Makino) Pampanini; *Rhamnus pasteurii* H. Léveillé; *Sabia esquirolii* H. Léveillé)

See *Bot. Mag. (Tokyo)* 15: 103. 1901

(Medicinal.)

in English: many-flowered gardneria

in China: peng lai ge

Gardneria nutans Siebold & Zuccarini (*Gardneria insularis* Nakai; *Gardneria linifolia* C.Y. Wu & S.Y. Pao; *Gardneria liukiensis* Hatusima; *Pseudogardneria nutans* (Siebold & Zuccarini) Raciborski)

See *Abh. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss.* 4: 165. 1846 and *Bot. Bull. Acad. Sinica* 35: 223–227. 1994

(Medicinal.)

in China: xian ye peng lai ge

in Japan: horai-kazura

Garuga Roxb. Burseraceae

Garuga is a Telugu name for *Garuga pinnata* Roxb., see William Roxburgh, *Plants of the Coast of Coromandel*. 3: 5, t. 208. 1811, *Annales des Sciences Naturelles* (Paris) 2: 346. 1824.

Garuga abilo Merr.

Philippines.

See *Publications of the Bureau of Science Government Laboratories* 35: 73. 1905 [*Philipp. Gov. Lab. Bur. Bull.*]

(Root decoction drunk in tuberculosis.)

in Philippines: abilo, bio, bogo, bugo, bunus, lamio, libas, talinganan

Garuga pinnata Roxb.

India, Thailand. Tree, deciduous, cylindrical bole, low rounded buttresses, rough warty bark, hairy pinnate leaves crowded at the ends of branches, ragged toothed leaflets, yellow flowers in many-branched axillary large terminal tomentose panicles, black fruits, leaves and fruits as fodder for cattle, often attacked by insects which produce large red or purple galls, fresh bark yields a black dye

See *Pl. Corom.* iii. 5. t. 208. 1811, *Hortus Bengalensis*, or a catalogue ... 33. 1814, *FBI* 1: 528. 1875 and *Journal of Cytology and Genetics* 19: 115–117. 1984

(Used in Ayurveda and Sidha. Powdered bark used in diabetes; bark boiled and made into a paste applied on bone fracture; stem bark juice dropped into the eye for conjunctivitis. Root bark decoction applied on skin diseases, piles, infections, venereal diseases and pulmonary affections. Fruits stomachic. Leaf juice astringent, mixed with that of *Adhatoda vasica*, *Vitex trifolia* and honey and given in asthma; leaf juice mixed with honey given in asthma. Stems and leaves boiled with those of *Gnetum* and *Albizia*, poultice applied to swellings and boils; stem juice dropped in eyes for conjunctivitis and opacity. Veterinary medicine, bark fermented with water given with red onion and chili powder for dysentery. Fruits as fish poison. Magic, plants regarded as sacred, one piece of wood used in house building to prevent all evil spirits from entering the house.)

in India: accani, agri, amalakam, amalam, annakara, annakkara, aranalli, aranelli, arenelli, arunelli, baalige, balige, bandera kaayi, ben-kalesjam, bholamate, bilee gadde, bili gadde, biligadde, bilugadde, boalu amate, bohlla, bungbu-tuai-ram, bungbu tuairam, bungbutuairam, chidampha, chigambol, chinyuk, dabdabi, doddadumpli, doddamamppli, dumi, enneykkarai, enneykkaraimaram, gadde, garga, garge, gargu, garuga, garugoo, garugu, garugu chettu, garugudu, ghogar, ghunja, ghurri, godda, goddana mara, godde, golika, guddada nelli, guddhamara, gurugu, gurugumaru, haalahulige, hagabalagi, hala, hala huliga, halabalaga, halabalage, halabalagi, hallu bolige, hallubolige, jum, kaakad, kaakanda, kaalugudu, kaashtanelli, kadambate, kadambatte, kadamte, kaikar, kaikra, kakad, kakadio, kakar, kalugudu, kankad, kankar, karem, kareyam, karivembu, karivempu, karnikara, karolu, karuvembu, karuvempu, karuvilangam, karuvilankam, katmanna, katou-kalesjam, katoukalesjam, kattukalincan, kattukalinjam, kattukalinjan, kattunelli, katula, kauriyam, kayitariyam, kechkechi, kehad, kekad, kekadogatcho, kekar, kharpat, khogar, khusia, kilmira, kinkirata, kitmirria, kondavepa, kooruk, krsnamilka, kudak, kunak, kuruk, kurule, kusaar, kusar, maharut, malaiyudi, malaiyuti, malaiyutiyam nelagodda, nellagodda, nelligadde, okkirukantam, pani amora, paranki, phalsa, pitariyancu, pitariyancumaram, rohimola, roorak, sarota, sodikonne, sudhekanne, sudhikanne, tejhi-araung, thotmola, timur-araung, titmar, toom, ukkirakantam, ukkirakanti, vaccinimpam, vacciranimpam, vacciraninam, vanagra, vilangam, vilankam, yannaikkarai, yennaikkarai

in Indonesia: kayu juping

in Thailand: sisah

in Tibet: kirati, kimkirati

Gastrodia R. Br. Orchidaceae

Greek *gastris*, *gastridos* 'pot-bellied', referring to the shape of the flower or of the sepals; see R. Brown, *Prodromus florae Novae Hollandiae*. 330. 1810.

Gastrodia elata Blume (*Gastrodia elata* f. *alba* S. Chow; *Gastrodia elata* f. *flavida* S. Chow; *Gastrodia elata* f. *glauca* S. Chow; *Gastrodia elata* f. *pilifera* Tuyama; *Gastrodia elata* f. *viridis* (Makino) Makino; *Gastrodia elata* var. *gracilis* Pamp.; *Gastrodia mairei* Schltr.; *Gastrodia viridis* Makino)

Himalaya to Japan. Alpine saprophyte, perennial, herb, bluish-red, simple, erect, robust fleshy tubers, inflorescence a terminal cluster of yellowish-red flowers, in damp shady places, under trees and shrubs

See *Mus. Bot.* 2: 174. 1856 and *Ill. Fl. Jap.* 692. 1940, *Acta Bot. Yunnan.* 5: 365–366. 1983, *Chromosome Information Service* 39: 27–28. 1985, *Kromosomo* 42: 1336–1340. 1986, *J. Neurosci. Res.* 71: 534–43. 2003, *QJM* 98(9): 625–31. 2005

(Tubers for blood pressure, numbness of extremities, cramps, dizziness, hypertension, vertigo, infantile convulsions, to treat allergies and relieve headache, migraine. Combined with *Uncaria rhynchophylla* (Miq.) Miq. ex Havil. (Rubiaceae) a remedy for convulsions and high fever.)

in English: red arrow, tall gastrodia

in China: tian ma, chih chien, tien ma

Gaultheria Kalm ex L. Ericaceae

Named for the French physician Jean François Gaultier (Gaultier), c. 1708–1756, botanist, Quebec, Canada; see Carl Linnaeus, *Species Plantarum*. 1: 395. 1753, *Species Plantarum* 2: 1190. 1753 and *Genera Plantarum*. Ed. 5. 187. 1754, *Traité des Arbres et Arbustes* 1: 285. 1755, *Familles des Plantes* 2: 165. 1763, *Hortus Kewensis* 146. 1768, *Dispositio Vegetabilium Methodica* 11, 21. 1790, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 697. 1791, *Transactions of the Horticultural Society of London* 2: 94. 1817, *American monthly magazine and critical review* 2: 266. 1818, *American monthly magazine and critical review* 4(3): 192. 1819, *Medical Flora* 1: 202. 1828, *A General History of the Dichlamydeous Plants* 3: vi, 788, 841. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 591. 1838, *Geol. Report New York* 152. 1839, *Linnaea* 24: 17. 1851, *Anales de la Universidad de Chile* 90: 195, t. opp. p. 194, f. 15. 1895 and *Fl. Neotrop.* 66: 351–488. 1995.

South America, Mexico.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 6: 43, t. 562, f. 2. 1801, *Synopsis Plantarum* 1: 483. 1805, *Botanical Magazine* t. 3177. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 587, 609. 1839, *A General History of the Dichlamydeous Plants* 3: 837. 1841, *Plantas Hartwegianas imprimis Mexicanas* 219. 1845, *Chloris Andina* 2: 170. 1857, *Botanical Gazette* 25(3): 148. 1898 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 56: 283. 1916, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12(113): 289–290. 1935, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13(117): 207. 1936

(Toxic, hallucinogenic.)

in Ecuador: taglli

Gaultheria trichophylla Royle (*Brossaea trichophylla* (Royle) Kuntze; *Gaultheria nana* C.Y. Wu & T.Z. Hsu)

India. Aromatic fruits eaten

See *Species Plantarum* 2: 1190. 1753, *Illustrations of the Botany ... of the Himalayan Mountains* ... 260, pl. 63, f.

3. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 591. 1838, *Revisio Generum Plantarum* 2: 388. 1891 and *Acta Botanica Yunnanica* 3(4): 431–432, f. 4. 1981

(Oil from the leaves aromatic, stimulant, carminative, used in rheumatism; leaves used for sores and wounds. Fruits as strong stimulant.)

in English: fragrant wintergreen

in China: ci mao bai zhu

in India: bher, bhwinla, gheri, jheri

Gaura L. Onagraceae

Greek *gauros* ‘superb, fierce, proud’, referring to the flowers; Sanskrit *garv*, medium Irish *guaire*; see Carl Linnaeus, *Species Plantarum*. 1: 347. 1753 and *Genera Plantarum*. Ed. 5. 163. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 382. Ansbach 1852 and *Systematic Botany Monographs* 83: 165, 171. 2007. Often as *Oenothera*.

Gaura mollis James (*Gaura parviflora* Douglas ex Lehm.; *Gaura parviflora* Douglas ex Lehm. var. *lachnocarpa* Weath.; *Gaura parviflora* Douglas ex Lehm. var. *s* Munz)

North America. Annual herb

See *Long Exped.* (Phila. ed.) 2: 77. 1823

(Febrifuge, sedative; root decoction taken for snakebite.)

in English: velvetweed

Gayophytum A. Juss. Onagraceae

Dedicated to the French botanist Claude Gay, 1800–1873, travelled to South America in 1828–1832 and in 1834–1842, his works include *Historia física y política de Chile. Botánica [Flora chilena]*. Paris 1845–1852[–1854] and “Extrait d’une lettre de M. C. Gay, datée de Valparaiso le 13 janvier 1837, contenant quelques détails sur la végétation de Coquimbo au Chili.” *Ann. Sci. Nat.*, sér. 2. 7: 380–381. 1837. See *Annales des Sciences Naturelles* (Paris) 25: 18. 1832, A. Lasègue, *Musée botanique de Benjamin Delessert*. 138–141. Paris 1845, D. Barros Arana, “Don Claudio Gay y su obra.” *Anales Univ. Chile*. 48: 5–227. 1876 and C. Porter, “Don Claudio Gay. Notas biográficas y bibliográficas.” *Revista Chilena Hist. Nat.* 6(3): 110–132. 1902, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 34. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 141. 1972, H. Gunkel, “Recuerdos juveniles de Claudio Gay.” *Bol. Mus. Nac. Hist. Nat.* 35: 5–10. 1977, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Gayophytum ramosissimum Torr. & A. Gray

North America. Annual herb

See *A Flora of North America*: containing ... 1(3): 513–514. 1840

(For skin diseases.)

in English: pinyon groundsmoke

Gazania Gaertner Asteraceae

Perhaps from the Greek *gaza* 'riches, the royal treasure', or after Theodore of Gaza (Theodorus Gaza, Theodoros Gazes), 1398–1478, translator of the botanical works of Theophrastus from Greek into Latin, author of *Grammatica introductiva, de mensibus* etc. Venetiis 1495; see *Systema Naturae*, Editio Decima 2: 1229, 1358, 1377. 1759, Joseph Gaertner, *De fructibus et seminibus plantarum*. 2: 451, t. 173, fig. 2. 1791, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 382f. Ansbach 1852, Ernst H.F. Meyer (1791–1858), *Geschichte der Botanik*. IV: 215–219. Königsberg 1854–1857 and *Mitteilungen der Botanischen Staatssammlung München* 3: 364–418 (71–500). 1959, *Flora zambesiaca* 6,1: 252–255. 1992, *Strelitzia* 9: 326–327. 2000, *Strelitzia* 10: 101–170. 2000, Karis, P.O., Funk, V.A., McKenzie, R.J., Barker, N.P. & Chan, R. Chapter 25. *Arctotideae*. In V.A. Funk, A. Susanna, T.F. Stuessy & R.J. Bayer (eds), *Systematics, Evolution and Biogeography of Compositae*: 385–410. International Association for Plant Taxonomy, Vienna. 2009.

Gazania krebsiana Less.

South Africa. Small perennial herbaceous, woolly underside of the leaves, palatable, grazed, flowers eaten

See *Synopsis Generum Compositarum* 44. 1832 and *Aquilo, Ser. Bot.* 6: 2 19–227. 1967, *Nucleus* 19: 8–12. 1976

(Antiemetic for infants, used for colic, cramps, heartburn.)

in English: butter flower, gazania, terracotta gazania

in Lesotho: tsikitlane

in South Africa: botterblom, gousblom, rooi gazania, shoeshoe

Gazania rigens (L.) Gaertn. var. *uniflora* (L.f.) Roessler (*Gazania uniflora* (L.f.) Sims; *Gorteria uniflora* L.f.)

South Africa.

See *Amoenitates Academici* ... 6: 105. 1763, *Supplementum Plantarum* 382. 1781, *De Fructibus et Seminibus Plantarum*... 2: 451. 1791, *Botanical Magazine* 48: t. 2270. 1821 and Hulme, M.M. *Wild Flowers of Natal*. Shuter & Shooter, Pietermaritzburg. 1954, *Mitteilungen der Botanischen Staatssammlung München* 3: 371. 1959, *Veld & Flora* 92(1): 22–23. 2006

(Magic, ritual, used by men when courting.)

in English: treasure-flower

Geigeria Griesselich Asteraceae

After a professor Geiger of Heidelberg, see *Linnaea* 5: 411. 1830.

Geigeria ornativa O. Hoffm. (*Geigeria africana* Griess.; *Geigeria africana* subsp. *ornativa* Merxm.; *Geigeria appendiculata* O. Hoffm. & Muschl.; *Geigeria eenii* S. Moore; *Geigeria luederitziana* O. Hoffm.; *Geigeria nonikamensis* Heering; *Geigeria passerinoides* Harv. p.p.; *Geigeria passerinoides* (L'Hér.) Harv.)

South Africa. Herb, almost prostrate, whorled linear leaves, yellow flowers

See *Sert. Angl.* [1]: 23. 1789, *Linnaea* 5: 411. 1830, *Prodr.* (DC.) 6: 285. 1838 [1837 publ. early Jan 1838], *Fl. Cap.* (Harvey) 3: 125. 1865, *Bull. Herb. Boissier* i. (1893) 81. 1893, *J. Bot.* 37: 373. 1899 and *Bot. Jahrb. Syst.* xlvii. 117. 1911, *Untersuch. Weideverhalten Deutsch-Sudwestaf.* 35. 1911, *Opera Botanica* 40: 39. 1976

(Very poisonous to sheep.)

in Southern Africa: misbeksiektebos, vermeerbos, vermeerbossie, vomeerbos; imVane (Xhosa)

Geissaspis Wight & Arnott Fabaceae (Aeschynomeneae)

From the Greek *geisson* 'a tile' and *aspis* 'a shield', see *Prodromus Florae Peninsulae Indiae Orientalis* 217. 1834 and *Journal of Botany, British and Foreign* 46: 113. 1908.

Geissaspis cristata Wight & Arn. (*Zornia disperma* Graham)

India, China. Perennial non-climbing herb, densely caespitose, trailing, very small purplish flowers on long peduncled axillary racemes, pod 1–2 jointed reticulately veined, yellowish subreniform seeds

See *A Numerical List of Dried Specimens* n. 5663. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 218. 1834

(Whole plant used in dysentery and diarrhea.)

in China: jie bao dou

Geissospermum Allemão Apocynaceae

From the Greek *geisson* 'tile' and *sperma* 'seed', see Miers, John (1789–1879), *On the Apocynaceae of South America*. London, 1878

Geissospermum laeve (Vell.) Miers (*Geissospermum laeve* Miers; *Geissospermum laeve* Baill.; *Geissospermum martianum* Miers; *Geissospermum vellosii* Allemão; *Tabernaemontana laevis* Vell.)

South America, Brazil.

See *Species Plantarum* 1: 210–211. 1753, *Florae Fluminensis* 105. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.*

3: t. 18. 1831 [1827 publ. 29 Oct 1831], *On the Apocynaceae of South America* 84. 1878, *Nat. Pflanzenfam.* [Engler & Prantl] iv. 2 (1895) 146. 1895 and *Ann. Pharm. Fr.* 12(7–8): 547–555. 1954, *Ann. Pharm. Fr.* 19(Feb.): 104–116. 1961, *Ann. Pharm. Fr.* 19(Mar.): 175–189. 1961, *Journal of Ethnopharmacology* 69(2): 127–137. 2000

(Febrifuge, antimalarial.)

Common name: pao-pereira

Geissospermum sericeum Benth. & Hook. f. ex Miers (*Geissospermum sericeum* Miers; *Geissospermum sericeum* Benth. & Hook.f.)

South America.

See *Genera Plantarum* [Bentham & Hooker f.] 2(2): 707. 1876, *On the Apocynaceae of South America* 86. 1878 and *Ann. Pharm. Fr.* 12(7–8): 547–555. 1954, *J. Ethnopharmacol.* 69(2): 127–137. 2000, *J. Nat. Prod.* 65(1): 85–88. 2002, *J. Ethnopharmacol.* 98(1–2): 45–54. 2005

(Antimalarial, antiplasmodial, cytotoxic, febrifuge. A traditional preventive remedy, made from *Geissospermum argenteum* bark macerated in rum, was able to impair the intrahepatic cycle of the parasite *Plasmodium falciparum*. The wood causes symptoms similar to those produced by *Aspidosperma* species.)

Common name: acarirana

Gelsemium Jussieu Loganiaceae (Gelsemiaceae)

A Latinized version of the Italian word *gelsomino* ‘jasmine’, see *Gen. Pl.* [Jussieu] 150. 1789 and *Toxicon* 36: 1635–1640. 1998, Durán-Espinosa, Carlos Manuel, *Flora de Veracruz*. Fascículo 133, *Gelsemiaceae*. Xalapa: Instituto de Ecología, 2003, *Journal of Analytical Toxicology* 33(1): 56–61. 2009. The gelsemium plants are highly poisonous.

Gelsemium elegans (Gardner & Champion) Bentham (*Gelsemium elegans* Benth.; *Gelsemium elegans* (Gardner) Benth.; *Medicia elegans* Gardner & Champion)

China. Woody vine, climber

See *Gen. Pl.* 150. 1789, *Hooker’s J. Bot. Kew Gard. Misc.* 1: 324–325. 1849, *J. Proc. Linn. Soc., Bot.* 1: 90. 1856 [1857 publ. 1856] and *Journal of Natural Products* 69(9): 1347–1350. 2006, *Journal of Asian natural products research* 12(4): 273–277. 2010

(Poisonous, cytotoxic, harmful, roots chopped into a pulp and used as a source of poison. Whole plant or the root used to treat sores, arthritis and skin diseases, ringworms, tiger-bite and wounds; crushed root juice used for stomachache and care should be taken. Veterinary medicine, powdered root bark or stem with leaves given to cure pig’s mange, fever and cough, dyspepsia, parasites in stomach.)

in English: Chinese gelsemium, graceful gelsemium

in Borneo: lemuan

in China: duan chang cao, ge lu fa, gou wen, kou wen

in India: hnam-tur, hnamtur

in Thailand: na ngo, nan go

Gelsemium rankinii Small (*Gelsemium sempervirens* var. *inodorum* Nutt.)

North America. Woody vine, trailing or high climbing, evergreen, simple opposite leaves, yellow flowers funnel-shaped, thin flattened capsule

See *The Genera of North American Plants* 1: 171. 1818 and *Addisonia*; colored illustrations and popular ... 13: 37. 1928, *J. Arnold Arbor.* 51(1): 1–17. 1970, *Syst. Bot.* 18(2): 345–355. 1993

(All parts poisonous, highly toxic, may be fatal if eaten.)

in English: yellow jessamine

Gelsemium sempervirens (L.) J. St.-Hil. (*Bignonia sempervirens* L.)

Bignonia sempervirens L.; *Gelsemium sempervirens* (L.) W.T. Aiton)

China, North America. Perennial woody vine, trailing or high climbing, evergreen, simple opposite leaves, aromatic yellow flowers funnel-shaped, thin flattened capsule

See *Expos. Fam. Nat.* 1: 338. 1805, *Hortus Kew.* (W.T. Aiton), ed. 2. 2: 64. 1811 and *Psychopharmacology* 210(4): 533–545. 2010, *Zhong xi yi jie he xue bao = Journal of Chinese Integrative Medicine* 8(7): 645–654. 2010, *Experimental Biology and Medicine* (Maywood, N.J.) 235(6): 678–688. 2010

(All parts poisonous, highly toxic, may be fatal if eaten. Roots as blood purifier, anxiolytic, used to treat pain and respiratory ailments. Anticancer potentials, chemoprevention.)

in English: Carolina jessamine, evening trumpetflower, yellow jessamine

Genianthus Hook.f. Asclepiadaceae

From the Greek *geneion* ‘beard, chin’ and *anthos* ‘flower’, see Wight, Robert (1796–1872), *Contributions to the botany of India*. London, 1834, *Fl. Brit. India* [J.D. Hooker] 4: 15. 1883 and *Bot. Jahrb. Syst.* 117(4): 447. 1995.

Genianthus laurifolius (Roxb.) Hook. f. (*Genianthus laurifolius* Hook.f.; *Secamone laurifolia* (Roxb.) K. Schum.; *Secamone laurifolia* K. Schum.; *Toxocarpus laurifolius* Wight & Arn.; *Toxocarpus laurifolius* (Roxb.) Wight & Arn.)

India.

See *Prodromus Florae Novae Hollandiae* 464. 1810, *Flora Indica*; or, descriptions of Indian Plants 2: 49–50. 1832, *Contributions to the Botany of India* 61. 1834, *The Flora of*

British India [J.D. Hooker] 4(10): 16. 1883, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(2): 263. 1893

(For stomach and urinary troubles, a decoction from leaves mixed with leaves of *Annona reticulata*, *Annona squamosa* and *Jasminum multiflorum* taken with sugar.)

in English: laurel-leaf genianthus

in India: pholobolo, ponyam

Geniostoma Forster & Forst.f. Loganiaceae (Geniostomaceae)

From the Greek *geneion* ‘beard’ and *stoma* ‘mouth’, referring to the bearded throat of the corolla; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 23–24, t. 12. (Nov.) 1775 and B.J. Conn, in *Blumea*. 26(2): 245–364. 1980, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. 25(1): 115–170. 1987.

Geniostoma antherotrichum Gilg & Gilg-Ben.

New Guinea.

See *Bot. Jahrb. Syst.* liv. 158. 1916, *Blumea* 26(2): 320. 1980, *Phytochemistry* 41(4): 1205–1207. 1996

(HIV-inhibitory activity.)

Geniostoma borbonicum Spreng.

Mascarene Archipelago.

See *Syst. Veg.* (ed. 16) [Sprengel] 1: 588. 1824 [dated 1825; publ. in late 1824]

(Antiplasmodial, antiinflammatory and cytotoxic.)

Geniostoma micranthum DC.

Guam.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 9: 27. 1845

(Poisonous.)

in Guam: anasser, majlocjayo

Geniostoma rupestre J.R. et G. Forst. (*Geniostoma kasyotense* Kaneh. & Sasaki; *Geniostoma rupestre* A. Rich. & Less.; *Geniostoma rupestre* Forst.)

China.

See *Characteres Generum Plantarum* 23–24. 1776 and *Transactions of the Natural History Society of Taiwan* 24: 400, f. 3. 1934 [*Transactions, Natural History Society of Formosa*], *American Journal of Botany* 85(5): 654–660. 1998

(For boils, skin diseases.)

in English: Maori privet

in China: ran guan hua

Genipa L. Rubiaceae

From the Guiana vernacular name for one species; see *Genera Plantarum* ed. 5 87. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 384. Ansbach 1852 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 263. Basel 1996.

Genipa americana L. (*Gardenia brasiliensis* Spreng.; *Gardenia genipa* Sw.; *Gardenia oblongifolia* (Ruiz & Pav.) Poir.; *Genipa americana* f. *grandifolia* Chodat & Hassl.; *Genipa americana* f. *jorgensenii* Steyerl.; *Genipa americana* f. *parvifolia* Chodat & Hassl.; *Genipa americana* var. *caruto* (Kunth) K. Schum.; *Genipa americana* var. *riobranquensis* Kuhlm.; *Genipa barbata* Presl; *Genipa brasiliensis* A. Rich.; *Genipa brasiliensis* (Spreng.) Baill.; *Genipa caruto* Kunth; *Genipa codonocalyx* Standl.; *Genipa cymosa* Spruce, nom. nud.; *Genipa excelsa* K. Krause; *Genipa grandifolia* Pers., nom. illeg. superfl.; *Genipa humilis* Vell.; *Genipa nervosa* Spruce, nom. nud.; *Genipa oblongifolia* Ruiz & Pav.; *Genipa oleosa* Rojas; *Genipa pubescens* DC.; *Genipa spruceana* Steyerl.; *Genipa venosa* Standl.)

Trop. America. Tree, erect, simple leaves, cymose inflorescence, large yellow flowers, indehiscent fruits, fruit edible, bark in tanning, the juice of the fruit used as a dye, leaves used as forage, pulp of the ripe fruit eaten, in lowland tropics

See *Genera Plantarum* ed. 5 87. 1754, *Systema Naturae*, Editio Decima 2: 931. 1759, *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Nova Genera et Species Plantarum seu Prodromus* 51. 1788, *Flora Peruviana* 2: 67, t. 220, f. a. 1799, *Syn. Pl.* 1: 198. 1805, *Nova Genera et Species Plantarum* (quarto ed.) 3: 407. 1818 [1820], *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 379. 1830, *Flora Brasiliensis* 6(6): 352. 1889, *Cat. Hist. Nat. Corrient.* 67, 166. 1897 and *Bull. Herb. Boissier*, II, 4: 171. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 327. 1908, *Contributions from the United States National Herbarium* 17(5): 446. 1914, *Journal of the Washington Academy of Sciences* 18(6): 168. 1928, *Publ. Inst. Nac. Pesq. Amazônia Bot.* 5: 4. 1957, *Memoirs of the New York Botanical Garden* 23: 353, f. 62a-c. 1972, *Notes from the Royal Botanic Garden, Edinburgh* 40: 399–407. 1982, *Revista Brasileira de Genética* 9: 21–40. 1986, *International Organization of Plant Biosystematists Newsletter* 13: 21. 1989, *Cytologia* 58: 427–432. 1993, *Cytologia* 62: 81–90. 1997

(Ripe fruit vermifuge, bactericidal, germicidal, insect repellent and diuretic, used in the treatment of ulcers, tumor, bronchitis, respiratory diseases, female genital inflammation, diarrhea. Powdered root decoction purgative. Seeds emetic. Leaf infusion against stomach ache and colics. Antimicrobial, bark against diarrhea.)

in English: rat apple

in Indonesia: genipa

in Bolivia: bi, nané

in Panama: abgi, jagua, saptur

in Peru: acuisho, acuisho-ana, genip, genipap, huito, huito sua, huitoc, isso, jagua, janipa, juaraavuru, nandi, palo colorado, sua, vito, vitoc, yaco-huito, yayu-huito

Genista L. Fabaceae (Genisteae)

From the Latin *genesta* or *genista*, *ae* ‘the broom-plant, broom’; see Carl Linnaeus, *Species Plantarum*. 709. 1753 and *Genera Plantarum*. Ed. 5. 318. 1754.

Genista canariensis L. (*Cytisus canariensis* (L.) Steud.; *Cytisus canariensis* (L.) Kuntze; *Cytisus canariensis* (L.) Masf.; *Cytisus canariensis* var. *ramosissimus* (Poir.) Briq.; *Cytisus hillebrandii* (H. Christ) Briq.; *Cytisus ramosissimus* Poir.; *Cytisus racemosus* G. Nicholson; *Genista canariensis* DC.; *Genista canariensis* Bory & Chaubard; *Genista hillebrandii* H. Christ; *Teline canariensis* (L.) Webb & Berthel.)

Europe, Canary Isl. Perennial non-climbing shrub

See *Species Plantarum* 2: 709–710. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 145. 1825, *Nouvelle Flore du Péloponnèse et des Cyclades*: 46. 1838, *Revisio Generum Plantarum* 1: 177. 1891 and *Economic Botany* 19(4): 383. 1965, *Bol. Soc. Brot.* ser. 2, 45: 274. 1971, *Vieraea* 12: 229. 1983

(Psychedelic, hallucinogenic use.)

in English: Canary broom, Canary Island broom, Cape broom, florist’s broom, fountain of gold

Gentiana L. Gentianaceae

Latin *gentiana*, *ae* ‘the herb gentian’; see *Mem. Acad. Berl.* v. 130. 1749 (1751), Carl Linnaeus, *Species Plantarum*. 1: 227–232. 1753, *Genera Plantarum*. Ed. 5. 107. 1754, *Familles des Plantes* 2: 502–504. 1763, *Syst. Pl.* [Gleditsch] 238. 1764 [ante 13 Sep 1764], *Genera Plantarum* 141. 1789, Joseph Aloys (Josephus Aloysius) von Froelich, 1766–1841, *De Gentiana libellus*. Erlangae [1796], *Flore d’Auvergne*, ed. 2 28. 1800, *Florula belgica*, opera majoris prodromus, auctore ... 51. 1827, Bunge, Alexander Andrejewitsch von (1803–1890), *Conspectus generis Gentianae*: tableau du genre *Gentiana*, et principalement des espèces russes. [Moscou: Société impériale des naturalistes de Moscou, 1829], *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 117. 1845 and H.H. Allan, *Fl. New Z.* 1: 766. 1961, *Ind. Gen. Vasc. Pl.* 1753–74 (*Regn. Veg.li.*) 73. 1967, *Botaniska Notiser* 125(3): 256. 1972, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 2: 485. Zanichelli, Bologna 1980, *New Zealand J. Bot.* 18: 563–564. 1980, C.E. Wood and R.E. Weaver, in *J. Arnold Arbor.* 63: 441–487. 1982, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina

Nova IV, 1983–1986.” *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987, *Novon* 2(3): 236. 1992, Ho, Ting-Nung (1938–) and Liu, Shang Wu (1934–), *A Worldwide Monograph of Gentiana*. Beijing, Science Press, 2001.

Gentiana affinis Griseb. (*Dasystephana affinis* (Griseb.) Rydb.; *Dasystephana interrupta* (Greene) Rydb.; *Gentiana affinis* Griseb. var. *bigelovii* (A. Gray) Kusnez.; *Gentiana affinis* Griseb. var. *forwoodii* (A. Gray) Kusnez.; *Gentiana affinis* Griseb. var. *major* A. Nelson & Kennedy; *Gentiana affinis* Griseb. var. *ovata* A. 1980, *Bot. Zhurn.* 67(6): 778–787. 1982, *Bull. Coll. Child Develop., Kochi Womens Univ.* 8: 55–104. 1984

(Roots decoction used as a tonic, to stimulate appetite and digestion.)

in English: alpine gentian

in China: gao shan long dan

in India: tiktas

Gentiana andrewsii Griseb. (*Dasystephana andrewsii* (Griseb.) Small; *Pneumonanthe andrewsii* (Griseb.) W.A. Weber)

North America. Perennial herb

See *Flora Boreali-Americana* 2: 55–56. 1838 and *Flora of the Southeastern United States* 930, 1336. 1903, *Phytologia* 33(2): 105. 1976, *Taxon* 31(2): 344–360. 1982

(Plant used as analgesic, for headaches, chills; roots for snakebite. Ceremonial, spiritual, dried root hung in house as a charm against evil spirits, witch and ghosts.)

in English: bottle gentian, closed bottle gentian

Gentiana andrewsii Griseb. var. ***andrewsii***

North America. Perennial herb

See *Flora Boreali-Americana* 2: 55–56. 1838 and *Flora of the Southeastern United States* 930, 1336. 1903, *Phytologia* 33(2): 105. 1976, *Taxon* 31(2): 344–360. 1982

(Plant used as analgesic, for headaches, sore eyes, fevers; roots for snakebite. Roots infusion taken for hysteria, madness.)

in English: bottle gentian, closed bottle gentian

Gentiana capitata Buch.-Ham. ex D. Don (*Ciminalis capitata* (Buch.-Ham. ex D. Don) Omer; *Ericala capitata* D. Don ex G. Don; *Ericala capitata* (Buch.-Ham. ex D. Don) D. Don; *Gentiana cephalodes* Edgew.)

Nepal.

See *Familles des Plantes* 2: 504. 1763, *A Natural Arrangement of British Plants* 2: 335. 1821, *Prodromus Florae Nepalensis* 126–127. 1825, *Florula belgica*, opera majoris prodromus, auctore ... 51. 1827, *Philosophical Magazine and Journal* 8: 76. 1836, *A General History of the Dichlamydeous Plants* 4: 193. 1837, *Linnean Society of London* 20: 84. 1846 and *Bulletin of Botanical Research* 5: 18. 1985, *Edinburgh Journal of Botany* 50(1): 72. 1993

(Plant paste taken to relieve headache.)

in China: tou zhuang long dan

in Nepal: pangen ombo

Gentiana carinata Griseb.

India, Himalaya. Small herb

See *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 304. 1838 [1839 publ.

1838] and *Chromosome Inf. Serv.* 39: 33–35. 1985, *Proc. Indian Natl. Sci. Acad.*, B 55: 177–184. 1989

(Used in stomach complaints and as a sudorific.)

in India: maidankulwenth, teeta

Gentiana crinita Froel. (*Anthopogon crinitum* (Froel.) Raf.; *Gentianopsis crinita* (Froel.) Ma)

China.

See *Species Plantarum* 1: 227–232. 1753, *Genera Plantarum* 141. 1789 and *Acta Phytotaxonomica Sinica* 1(1): 7. 1951, Ho Ting-nung; Liu Shang-wu, & Wu Ching-ju in Ho Ting-nung, ed. 1988. *Gentianaceae. Fl. Reipubl. Popularis Sin.* 62: 1–411. 1988

Gentiana kurroo Royle (*Pneumonanthe kurroo* D. Don)

India. Perennial herb, glabrous, branched, thick stout root-stock, blue flowers with white dots

See *Species Plantarum* 1: 227–232. 1753

(Used in Ayurveda and Unani. Bitter tonic, carminative, anthelmintic, febrifuge, blood purifier, emmenagogue, in urinary complaints.)

in English: Indian gentian, Indian gentian root

in India: buroni, kadu, kamalphul, kampantirai, karu, katki, kuru, kutki, nilakil, nilkan, pakhanbhed, trayaman, trayamana

Gentiana loureiroi (G. Don) Griseb. (*Ericala loureiroi* G. Don; *Gentiana pedicellata* var. *rosulata* Kusn.)

China.

See *Species Plantarum* 1: 227–232. 1753, *A Natural Arrangement of British Plants* 2: 335. 1821, *A General History of the Dichlamydeous Plants* 4: 192. 1837 [1838], *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 273. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 108. 1845

(Whole plant used for skin inflammation, jaundice, genital discharge, boils, snakebites.)

Gentiana nubigena Edgew. (*Gentiana algida* Pall. var. *nubigena* (Edgew.) Kusn.; *Gentiana algida* var. *przewalskii* (Maxim.) Kusnez.; *Gentiana przewalskii* Maxim.; *Gentianodes algida* (Pallas) Á. Löve & D. Löve var. *nubigena* (Edgew.) Omer, Ali & Qaiser)

Himalaya, India.

See *Transactions of the Linnean Society of London* 20(1): 85. 1846, *Bull. Acad. Petersb.* xxvii. (1881) 502. 1881 and *Pakistan Journal of Botany* 20(1): 16. 1988, *Bull. Soc. Neuchateloise Sci. Nat.* 116: 65–78. 1993

(Powdered flowers taken against inflammation of throat, bronchitis, cough, fevers, influenza.)

in China: yun wu long dan

in India: tiktas

Gentiana olivieri Griseb. (*Gentiana regeliana* Gand.; *Gentiana weschniakowii* Regel)

Pakistan.

See *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 278. 1839 [1838] and *Bulletin de la Société Botanique de France* 65: 60. 1918

(Stems and flowers to treat diseases of the liver and spleen.)

in China: xie wan que qin jiao

in Pakistan: bangero

Gentiana paludosa Munro ex Hook. f.

India.

See *Hooker's Icones Plantarum* 9: pl. 857. 1852

(Aerial parts febrifuge.)

Gentiana robusta King ex Hook. f. (*Gentiana lhakangensis* C. Marquand; *Gentiana pharica* Burkill; *Gentiana tibetica* King ex Hook. f. var. *robusta* (King ex Hook. f.) Kusn.)

Nepal, China, Himalaya.

See *Hooker's Icones Plantarum* 15(2): 31–32, 33–34, t. 1439, 1441. 1883 [1883–1885 publ. Sin.* 44(6): 627–640. 2006

(Root infusion given to treat fever.)

in China: cu zhuang qin jiao

in Nepal: khije

Gentiana saponaria L. (*Dasystephana puberula* (Michx.) Small, as to type, non sensu Small; *Dasystephana saponaria* (L.) Small; *Gentiana cherokeensis* (W.P. Lemmon) Fernald; *Gentiana puberula* Michx., as to type, non sensu Small; *Pneumonanthe saponaria* (L.) Greene)

North America. Perennial

See *Species Plantarum* 1: 228. 1753 and *Flora of the Southeastern United States* 930, 1336. 1903, *Leaflets of Botanical Observation and Criticism* 1(5): 71. 1904

(Root decoction drunk as tonic.)

in English: downy gentian, harvestbells, soapwort gentian

Gentiana stipitata Edgew. (*Gentianodes stipitata* (Edgew.) Á. Löve & D. Löve)

India.

See *Transactions of the Linnean Society of London* 20(1): 84–85. 1846 and *Botaniska Notiser* 125(3): 257. 1972

(Roots tonic, stomachic and for urinary affections.)

in English: Indian gentian

in China: duan bing long dan

in India: bumlya

Gentiana tianschanica Rupr. (*Gentiana glomerata* Kusn.; *Gentiana regelii* Maxim. ex Kusn.; *Gentiana regelii* var. *glomerata* Kusn.; *Gentiana tianschanica* var. *glomerata* Kusn.; *Gentiana tianschanica* var. *intermedia* Kusn.; *Gentiana tianschanica* var. *pumila* Kusn.; *Gentianodes tianschanica* (Rupr.) Omer, Ali & Qaiser)

India.

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 14(4): 61. 1869, *Bulletin de l'Académie Impériale des Sciences de St.- Pétersbourg: Nouvelle Série* 13: 177. 1891 and *Pakistan Journal of Botany* 20: 18. 1988

(Roots febrifuge, analgesic, diaphoretic, antiseptic.)

in China: tian shan qin jiao

Gentiana tibetica King ex Hook. f. (*Gentiana brevidens* Regel)

Himalaya.

See *Hooker's Icones Plantarum* 15(2): 33–34, t. 1441. 1883 [1883–1885 publ. Dec 1883] and *Pl. Syst. Evol.* 210: 231–247. 1998, *Acta Phytotax. Sin.* 44(6): 627–640. 2006

(Root infusion given to treat fever, stomach and liver diseases. Flowers used for wounds.)

in China: xi zang qin jiao

Gentiana urnula Harry Sm. (*Gentiana amoena* C.B. Clarke var. *major* Burkill; *Gentianodes urnula* (Harry Sm.) Á. Löve & D. Löve)

Himalaya, Bhutan.

See *Journal of the Asiatic Society of Bengal* 2(7): 312–313. 1906, *Kew Bulletin* 15(1): 51–52. 1961, *Botaniska Notiser* 125(3): 258. 1972, *Bot. J. Linn. Soc.* 123: 25–43. 1997

(Whole plant as astringent, in diarrhea and dysentery.)

in Bhutan: gangga chung

in China: wu nu long dan

Gentianella Moench Gentianaceae

Diminutive of the genus *Gentiana*; see Moench, Conrad (1744–1805), *Methodus plantas horti botanici et agrri Marburgensis*. 482. Marburgi Cattorum, 1794 and *Supplementum ad Methodum plantas a staminum situ describendi*. Marburgi Cattorum: in *Officina Nova Libraria Academiae*, 1802, *Fl. Tellur.* 3: 21. 1837 [dt. 1836; issued Nov–Dec 1837] and H.H. Allan, *Fl. New Z.* 1: 766. 1961, *Bot.*

J. Linn. Soc. 65(2): 260. 1972, C.E. Wood and R.E. Weaver, in *J. Arnold Arbor.* 63: 441–487. 1982, *Bot. Zhurn.* (Moscow & Leningrad) 70(7): 922–923. 1985, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany.* Vol. 25: 115–170. 1987, *Willdenowia* 21(1–2): 190. 1991.

Gentianella amarella (L.) Börner (*Gentiana amarella* L.; *Gentianella* × *davidiana* T.C.G. Rich; *Gentianella amarella* (L.) Harry Sm.)

South America.

See *Species Plantarum* 1: 227–232. 1753, *Methodus Plantas Horti Botanici ...* (Moench) 482. 1794 and *Eine Flora für das deutsche Volk* 543. 1912, Hylander, Nils (1904–1970), *Nomenklatorische und Systematische Studien über Nordische Gefüsspflanzen.* 1945 [Uppsala Univ. Arsskr., 7, 1945. 337 p.], *Taxon* 32: 509. 1983, *Watsonia* 21(4): 322. 1997, *Flora del Bajío y Regiones Adyacentes* 65: 1–56. 1998, *Flora de Veracruz* 121: 1–67. 2001

(Tonic, digestive.)

Gentianella moorcroftiana (Wall. ex G. Don) Airy Shaw (*Aliopsis moorcroftiana* (Wall. ex G. Don) Omer, Qaiser & Ali; *Aloitis moorcroftiana* (Wall. ex G. Don) Omer, Qaiser & Ali; *Gentiana moorcroftiana* Griseb.; *Gentiana moorcroftiana* Wall.; *Gentiana moorcroftiana* Wall. ex G. Don; *Gentiana moorcroftiana* var. *maddenii* C.B. Clarke; *Gentianella maddenii* (C.B. Clarke) Airy Shaw; *Gentianella moorcroftiana* (Wall. ex Griseb.) Airy Shaw)

China, India. Annual herb, branched, tubular campanulate blue flowers

See *Numer. List* [Wallich] n. 4390. 1831, *A General History of the Dichlamydeous Plants* 4: 182. 1837, *Prodr.* (DC.) 9: 96, pro parte. 1845 and *Hooker's Icones Plantarum* 35(2): t. 3431, in nota p. 2. 1943, *Bull. (Plant decoction in fever and as a blood purifier. Leaves made into a paste applied to wounds. Flower extract in nausea, giddiness, cough and cold; flowers and leaves ground into a paste and applied externally for curing backache and headache.)

in China: pu lan jia long dan

in India: chhukmu, chhumbi tikta, tikta

Gentianella propinqua (Richardson) J.M. Gillett (*Aloitis propinqua* (Richardson) Á. Löve & D. Löve; *Amarella propinqua* (Richardson) Greene; *Arctogentia propinqua* (Richardson) Á. Löve & D. Löve; *Gentiana propinqua* Richardson)

North America. Annual herb

See *Botanical Appendix to Captain Franklin's Narrative* 734. 1823 and *Leaflets of Botanical Observation and Criticism*

1(4): 53. 1904, *Annals of the Missouri Botanical Garden* 44(3): 236. 1957, *Bot. Zhurn.* SSSR 67(3): 360–365. 1982, *Taxon* 31(2): 352. 1982, *Taxon* 34(1): 164. 1985

(Decoction of leaves, stems and flowers taken for colds.)

in English: fourpart dwarf gentian

Gentianella propinqua (Richardson) J.M. Gillett var. ***propinqua*** (*Gentiana arctophila* Griseb.; *Gentiana propinqua* Richardson; *Gentiana propinqua* Richardson subsp. *arctophila* (Griseb.) Hultén; *Gentianella propinqua* (Richardson) J.M. Gillett subsp. *arctophila* (Griseb.) Tzvelev)

North America.

See *Botanical Appendix to Captain Franklin's Narrative* 734. 1823 and *Leaflets of Botanical Observation and Criticism* 1(4): 53. 1904, *Annals of the Missouri Botanical Garden* 44(3): 236. 1957, *Bot. Zhurn.* SSSR 67(3): 360–365. 1982, *Taxon* 31(2): 352. 1982, *Taxon* 34(1): 164. 1985

(Decoction of leaves, stems and flowers taken for coughs.)

in English: fourpart dwarf gentian

Gentianella quinquefolia (L.) Small (*Aloitis quinquefolia* (L.) Raf.; *Gentiana quinquefolia* L.; *Gentiana quinquefolia* Oeder)

North America. Annual or perennial herb

See *Species Plantarum* 1: 230. 1753, *Flora Danica* t. 344. 1767, *Flora Telluriana* 3: 22. 1836[1837] and *Flora of the Southeastern United States* 929. 1903

(Root used as a cathartic, stimulant, laxative, for diarrhea, stomachache.)

in English: ague-weed, stiff gentian

Gentianella quinquefolia (L.) Small var. ***quinquefolia*** (*Gentiana quinquefolia* L.)

North America. Annual or perennial herb

See *Species Plantarum* 1: 230. 1753, *Flora Danica* t. 344. 1767, *Flora Telluriana* 3: 22. 1836[1837] and *Flora of the Southeastern United States* 929. 1903

(Root used as a cathartic, laxative, astringent, anthelmintic, sedative, tonic.)

in English: agueweed, stiff gentian

Gentianopsis Ma Gentianaceae

Resembling *Gentiana* L., see *Acta Phytotaxonomica Sinica* 1(1): 7. 1951, *Hokuriku Journal of Botany* 6: 33. 1957.

Gentianopsis crinita (Froel.) Ma (*Anthopogon crinita* (Froel.) Raf.; *Anthopogon crinitum* (Froel.) Raf.; *Gentiana crinita* Froel.; *Gentiana ventricosa* Griseb.; *Gentianella crinita* (Froel.) G. Don; *Gentianella crinita* (Froel.) G. Don subsp. *nevadensis* (Gilg) Weaver & Rudenberg)

North America. Annual or biennial herb

See *Flora Telluriana* 3: 25. 1836[1837] and *Acta Phytotaxonomica Sinica* 1: 15. 1951

(Infusion of roots used as a blood purifier, stomachic.)

in English: fringed gentian, greater fringed gentian, smaller fringed gentian

Gentianopsis detonsa (Rottb.) Ma (*Gentiana detonsa* Rottb.; *Gentianella detonsa* (Rottb.) G. Don; *Anthopogon detonsa* (Rottb.) Raf.)

China. Annual or biennial herb, solitary terminal blue flowers

See *Kiob. Selsk. Skr. (Acta Hafn.)* 10: 435, pl. 1, f. 3. 1770, *A General History of the Dichlamydeous Plants* 4: 179. 1838, *Flora Telluriana* 3: 25. 1837 and *Acta Phytotaxonomica Sinica* 1(1): 15, 19. 1951

(Flowers for nausea, cough, headache and fever.)

in English: shaven-flowered gentiana

in India: sheeti

Gentianopsis paludosa (Munro ex Hook. f.) Ma var. *paludosa* (*Gentiana detonsa* Rottb. var. *nana* Ling; *Gentiana detonsa* var. *paludosa* Munro ex Hook. f.; *Gentiana detonsa* var. *stracheyi* C.B. Clarke; *Gentianella paludosa* (Munro ex Hook. f.) Harry Sm.; *Gentianopsis longistyla* Ma; *Gentianopsis nana* (Ling) Ma)

Nepal, China.

See *Hooker's Icones Plantarum* 9: pl. 857. 1851, *The Flora of British India* 4(10): 118. 1883 and *Symbolae Sinicae* 7(4): 980 in obs. 1936, *Acta Phytotaxonomica Sinica* 1(1): 12–13, pl. 3, f. 3, 4. 1951, *Pl. W. Pakist.* 117. 1964, *Folia Geobotanica et Phytotaxonomica* 8: 176. 1973, *Cytologia* 58: 115–123. 1993

(Plant paste applied to subdue headache and to heal wounds.)

in China: shi sheng bian lei

in Nepal: upa tikta

Geocaulon Fernald Santalaceae

From the Greek *ge, gea* ‘the earth’ and *kaulos* ‘stalk’, see *The Genera of North American Plants* 1: 157–158. 1818 and *Rhodora* 30(350): 23–24. 1928.

Geocaulon lividum (Richardson) Fernald (*Comandra livida* Richardson; *Comandra lividum* Richardson)

North America. Erect perennial herb, parasitic, creeping thread-like reddish rhizomes, spreading underground stems, flowers in slender-stalked clusters from leaf axils, inconspicuous greenish purple petal-like sepals, orange berry-like juicy drupes, see also *Comandra*

See *Narrative of a Journey to the Shores of the Polar Sea* 734. 1823 and *Rhodora* 30(350): 23. 1928, *Taxon* 31: 120–126. 1982

(Fruits swallowed to relieve chronic chest problems, tuberculosis. Leaves and bark decoction emetic and purgative. Chewed stems and leaves applied as a poultice on wounds.)

in English: northern comandra

Geodorum G. Jackson Orchidaceae

Greek *ge, gea* ‘the earth’ and *doron* ‘a gift’ or the second element of the generic name *Limodorum*, referring to its habitat or to the recurved apex of the inflorescence, see *Botanist's Repository*, for new, and rare plants 10: t. 626. 1810 and *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 93. 1978.

Geodorum candidum Wall.

India.

See *A Numerical List of Dried Specimens* [Wallich] n. 7374. 1832

(Antidote for scorpion sting, pseudobulb eaten raw to alleviate the pain.)

in India: bitchu davaayi

Geodorum densiflorum (Lam.) Schltr. (*Arethusa glutinosa* Blanco; *Callista nutans* (C. Presl) Kuntze; *Cistella cernua* (Willd.) (Plant extract and bulb extract, to cure skin inflammation, abscesses. Juice and paste of root stock applied on rabbit and

dog bites. Tubers to cure impotency. Tuber paste mixed with little sugar in case of diabetes, blood pressure, cancer, running sores. Tubers in veterinary medicine.)

in China: di bao lan

in India: haryakand, kukurmuria

Geodorum pallidum D. Don (*Cymbidium nutans* (Roxb.) Sw.; *Geodorum pallidum* Llanos; *Geodorum purpureum* R.Br., nom. superfl.; *Limodorum nutans* Roxb.; *Malaxis nutans* (Roxb.) Willd.)

Himalaya, India, Nepal.

See *Pl. Coromandel* 1: 33. 1795, *Prodr. Fl. Nepal.*: 31. 1825, *Memorias, Real Academia de Ciencias Exactas, Físicas y Naturales de Madrid* 4: 507. 1856

(Leaves and tubers ground, paste applied on forehead for malaria and whooping cough.)

in India: matea bas

Geoffroea Jacq. Fabaceae (Leguminosae)

For the French physician Étienne François Geoffroy (Geoffroy the Elder), 1672–1731 (Paris), he was the father of Étienne Louis Geoffroy (1725–1810), he was the brother of Claude Joseph Geoffroy (1685–1752) (Geoffroy the Younger); see *The Civil and Natural History of Jamaica* in Three Parts 299. 1756, *Enum. Syst. Pl.* 7, 28. 1760, *Fam. Pl.* (Adanson) 2: 320. 1763, *Histoire des plantes de la Guiane Française* 2: 753, t. 301. 1775 and W.A. Smeaton, in *D.S.B.* 5: 351–354. 1981, Jean Théodorides, in *D.S.B.* 5: 354–355. 1981, *Bulletin of the Botanical Survey of India* 25(1–4): 169. 1983 (publ. 1985).

Geoffroea violacea (Aubl.) Pers. (*Acouroa violacea* Aubl.; *Ecastaphyllum violaceum* (Aubl.) Benth.; *Ecastaphyllum violaceum* Benth.)

French Guiana.

See *Histoire des plantes de la Guiane Française* 2: 753–755, t. 301. 1775, *Synopsis Plantarum* 2(2): 278. 1807, *Commentationes de Leguminosarum Generibus* 29. 1837, *Ann. Wien. Mus.* ii. (1838) 93. 1838

(Fruits astringent, antiseptic, for wounds.)

Vernacular names: acouroa, acourou, acuroa

Geonoma Willd. Arecaceae (Palmae)

Greek *geonomos* ‘colonist, one who distributes land’, see *Histoire des plantes de la Guiane Française* 2: 99. 1775, *Species Plantarum*. Editio quarta 4(1): 174, 593–594. 1805, *Mémoires du Muséum d’Histoire Naturelle* 9: 387. 1822, *Linnaea* 33: 680. 1865, *Handbuch der Botanik* 342. 1880 and *Contributions from the United States National Herbarium* 16:

(Infusion for flatulence.)

in Ecuador: aguijillas del cercas, aguijillas del puerco

Geranium incanum Burm.f. (*Geranium incanum* E.Mey.)

South Africa.

See *Specimen Botanicum de Geraniis* 28. 1759, *Zwei Pflanzengeogr. Docum.* (Drège) 187. 1843–1844

(Leaves infusion for bladder infections, venereal diseases, and irregular menstruation. Roots and leaves anthelmintic, for bronchitis.)

in English: carpet geranium

in South Africa: bergtee, horlosies, ngope-sethsoha, tlako, vrouebossie, vrouetee

Geranium lentum Wooton & Standl.

North America. Perennial herb

See *Contributions from the United States National Herbarium* 16(4): 142. 1913

(Leaves and roots made into a paste and applied to skin diseases.)

in English: Mogollon geranium

Geranium macrorrhizum L.

Chile.

See *Species Plantarum* 2: 680. 1753 and *Taxon* 30: 829–842. 1981, *Gayana, Bot.* 42: 1–157. 1985, *Candollea* 50(2): 457–493. 1995, *Acta Biochimica Polonica* 57(2): 157–163. 2010

(Strong radical-scavenging activity; cyto- and genotoxic effects.)

Geranium maculatum L. (*Geranium maculatum* Dum. Cours.)

North America. Perennial herb. branching, palmate leaves, flowers borne in loose racemes

See *Species Plantarum* 2: 681. 1753, *Le Botaniste Cultivateur, ...* 5: 377. 1805

(Plant infusion for diarrhea. Roots infusion or decoction astringent, antiseptic, emetic, for diarrhea, piles, neuralgia, sore gums and toothache, heart trouble, burns, wounds, itch, sores and sore mouth, venereal diseases, kidney and stomach problems, to stop bleeding. Magic, love charm.)

in English: alumroot, spotted crane's-bill, spotted geranium, wild geranium

Geranium mascatense Boiss.

India, Arabia.

See *Diagnoses plantarum orientalium novarum*, ser. 1, 1: 59. 1843 and *Suppl. Duthie's Fl. Upper Gangetic Plain*, etc. iv, 36. 1976

(Plant powder given to improve memory.)

in India: chakkarpati

Geranium molle L. (*Geranium molle* G. Gaertn., B. Mey. & Scherb.)

India, Himalaya.

See *Species Plantarum* 2: 682. 1753, *Oekonomisch-Technische Flora der Wetterau* 2: 489. 1800 and *Bol. Soc.*

Brot., sér. 2, 50: 231–245. 1976, *Taxon* 27: 519–535. 1978, *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 26: 1–42. 1978, *Willdenowia* 13: 101–106. 1983, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989, *Opera Bot.* 137: 1–42. 1989, *Bocconea* 16(2): 675–682. 2003

(Plant effective in kidney problems.)

in English: crane's bill, dove's foot, dove's foot cranesbill, dove's-foot geranium

in China: ruan mao lao guan cao

Maori name: namunamu

Geranium nepalense Sweet (*Geranium fangii* R. Knuth; *Geranium jinchuanense* Z.M. Tan; *Geranium lavergneanum* H. Lév.; *Geranium lavergneanum* var. *cinerascens* H. Lév.; *Geranium nepalense* var. *oliganthum* (C.C. Huang) C.C. Huang & L.R. Xu; *Geranium oliganthum* C.C. Huang)

Nepal, China. Prostrate or decumbent, pubescent or softly hairy herbs, rooting at nodes, leaves orbicular, pink or white flowers solitary or paired on long axillary peduncles, sometimes difficult to distinguish from *Geranium sibiricum*

See *Geraniaceae* 1: pl. 12. 1820 and *Bulletin de la Société d'Agriculture, Sciences et Arts de la Sarthe* 39: 319. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 40(1031–1039): 218–219. 1936, *Acta Phytotaxonomica Sinica* 1(2): 161–162, pl. 9. 1951, *Taxon* 30: 5. 1981, *Bulletin of Botanical Research* 14(3): 232–233, f. 2. 1994, *Flora Reipublicae Popularis Sinicae* 43(1): 35. 1998

(Whole plant astringent, used in renal diseases, urinary troubles, jaundice. Roots cooling, bitter, astringent, in stomach complaints, liver disorders, jaundice, toothache, ulcer, wounds, renal diseases, diarrhea. Fruit juice given to treat fever. Veterinary medicine, whole plant made into a paste applied to cure diseases of hoofs and abscesses and wounds of animals; ground fresh roots given to cattle for the treatment of stomach ailments, indigestion, food poisoning.)

in English: Nepal geranium

in China: ni bo er lao guan cao, niu pien

in India: banda, bhanda, gajalihar, lal jari, murilli, phori, rath, syunil, tirrahani

in Nepal: salyan sai

Geranium ocellatum Cambess. (*Geranium kweichowense* C.C. Huang; *Geranium mascatense* Boiss. var. *yunnanense* (R. Knuth) Raizada; *Geranium ocellatum* var. *yunnanense* R. Knuth; *Geranium tapintzense* C.C. Huang)

India, China.

See *Voyage dans l'Inde* 4(Bot.): 33. 1841, *Plantae Delavayanae* 114. 1889 and *Das Pflanzenreich* IV. 129(Heft 53): 62. 1912, *Suppl. Duthie's Fl. Upper Gangetic Plain* 4: 36. 1976, *Notes from the Royal Botanic Garden, Edinburgh* 42(2): 325–326. 1985

(Plant astringent, diuretic.)

in China: er se lao guan cao

in India: bhanda, kaphlya

Geranium oreganum Howell

North America. Perennial herb

See *A Flora of Northwest America* 1: 106–107. 1897

(Roots astringent, antirheumatic, for aching joints, sore lips, diarrhea.)

in English: Oregon geranium

Geranium polyanthes Edgew. & Hook. f.

India, Sikkim.

See *The Flora of British India* 1(2): 431. 1875 and *Das Pflanzenreich* IV. 129(Heft 53): 46, 136. 1912

(Paste of herb for headache. Seeds in tonsillitis.)

in China: duo hua lao guan cao

in India: laljhari

Geranium potentillaefolium DC. (*Geranium pedunculare* Willd. ex Spreng.; *Geranium potentillifolium* DC.)

Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 639. 1824, *Syst. Veg.* (ed. 16) [Sprengel] 3: 71. 1826 and *Contributions from the United States National Herbarium* 10: 108. 1906, *Contr. Gray Herb.* 146: 53. 1943, *Natural Product Communications* 5(4): 531–534. 2010

(Ellagitannins. Antitumor ellagic acid.)

Geranium pratense L. (*Geranium affine* Ledeb.; *Geranium pratense* var. *affine* (Ledeb.) C.C. Huang & L.R. Xu; *Geranium transbaicalicum* Serg.)

Cosmopolitan. Erect perennial herb, bluish-purple flowers in pair

See *Species Plantarum* 2: 681. 1753, *Fl. Altaic.* 3: 229. 1831, *Ic. Pl. Fl. Ross.* 4: 20, pl. 371. 1833 and *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Taxon* 28: 400–401. 1979, *Watsonia* 19: 134–137. 1992, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Flora Reipublicae Popularis Sinicae* 43(1): 59, pl. 16, f. 6–11. 1998

(Whole plant styptic, astringent, tonic, a decoction used for diarrhea and chronic dysentery, piles, internal bleeding. Leaf extract given against influenza and infections, to check dysentery and diarrhea. Roots vulnerary, stomachic, for headache, toothache, cuts, wounds, bruises. Veterinary medicine, leaf extract given to control dysentery in goats and sheep.)

in English: meadow crane's bill, meadow geranium

in China: cao di lao guan cao

in India: ga-dur, gugchuk, laljahri, likatur, polo mendok, porlo

Geranium psilostemon Ledeb.

Eurasia.

See *Fl. Ross.* (Ledeb.) 1(2): 465. 1842 and *Natural Product Communications* 5(6): 899–902. 2010

(Antioxidant.)

Geranium pusillum L. (*Geranium parviflorum* (L.) Curtis; *Geranium parviflorum* Curtis; *Geranium parviflorum* Willd.; *Geranium parviflorum* Andrews; *Geranium parviflorum* Hand.-Mazz.; *Geranium pusillum* Burm. f.)

China, Himalaya, India.

See *Systema Naturae*, Editio Decima 2: 1144. 1759, Burman, Nikolaus Laurens (1734–1793), *Specimen botanicum de geraniis*, quod favente summo numine ex auctoritate magnifici rectoris. (Flowers antisecretory, antibacterial, antiprotozoal, astringent, to treat gastrointestinal disorders, diarrhea, dysentery.)

Geranium trilophum Boiss.

Iran, Saudi Arabia. Annual

See *Diagn. Pl. Orient.* ser. 1, 6: 30. 1846 [1845 publ. Jul 1846]

(Dried ground plant applied to relieve backache.)

in Arabic: zahra'a

Geranium viscosissimum Fisch. & C.A. Mey. (*Geranium attenuilobum* G.N. Jones & F.L. Jones; *Geranium nervosum* Rydb.; *Geranium viscosissimum* Fisch. & C.A. Mey. ex C.A. Mey.; *Geranium viscosissimum* subsp. *nervosum* (Rydb.) W.A. Weber; *Geranium viscosissimum* var. *nervosum* (Rydb.) C.L. Hitchc.)

North America. Perennial or annual herb, hairy branching stem, palmate leaves long-stalked

See *Index Seminum* [St. Petersburg] 11: Suppl. 18. 1846 and *Bulletin of the Torrey Botanical Club* 28(1): 34–35. 1901, *Rhodora* 45(530): 40–41. 1943, *Vascular Plants of the Pacific Northwest* 3: 383. 1961, *Phytologia* 51(6): 374. 1982

(Roots poultice on wounds, burns and swellings. Infusion of leaves for sores and sore eyes, dropsy, colds. Veterinary medicine, roots decoction rubbed on horses sores, cuts, burns. Magic, a love charm, love potion, flowers used for witchcraft.)

in English: sticky geranium, sticky purple geranium

Geranium viscosissimum Fisch. & C.A. Mey. var. *viscosissimum*

North America. Perennial or annual herb

See *Index Seminum* [St. Petersburg] 11: Suppl. 18. 1846 and *Bulletin of the Torrey Botanical Club* 28(1): 34–35. 1901, *Rhodora* 45(530): 40–41. 1943, *Vascular Plants of the Pacific Northwest* 3: 383. 1961, *Syesis* 10: 125–138. 1977, *Phytologia* 51(6): 374. 1982

(Roots poultice on wounds, burns and swellings. Infusion of leaves for sores and sore eyes, dropsy, colds. Veterinary medicine, roots decoction rubbed on horses sores, cuts, burns. Magic, a love charm, love potion, flowers used for witchcraft.)

in English: sticky geranium, sticky purple geranium

Geranium wallichianum D. Don ex Sweet (*Geranium wallichianum* D. Don)

China, Himalaya. Erect or decumbent, ascending, hairy herb, bluish-purple to pinkish-purple solitary or paired flowers on long peduncles

See *Geraniaceae* 1: pl. 90. 1821

(Astringent, for toothache, plant paste applied to relieve aching joints. Roots for eye complaints, a warm decoction of root a remedy for dysentery and cold; fresh or dried roots infusion given for rheumatic pain, fever, abdominal pain and body ache; to treat peptic ulcer, infusion of root mixed with bark of *Schima wallichii* and *Prunus cerasoides*. Veterinary medicine, root paste to kill worms in wounds of cattle.)

in China: kuan tuo ye lao guan cao

in India: chowhri, kaphal, kidi jadi, lal jari, laljhani, laljahri, laljari, ratanjot

in Nepal: birath, chyaktu, nikyu, yasign

in Pakistan: rattanjot

Gerbera L. Asteraceae

After the German naturalist Traugott Gerber (Gerberus), d. 1743, flourished 1739–1741, physician, traveller and plant collector in Russia, author of *Dissertationem physicam de Plantarum transpiratione* ... exponet M. Joannes Gottlob Hertelius ... respondente T. Gerbero, etc. Lipsiae [1735]. See C. Linnaeus, *Opera varia* in quibus continentur Fundamenta botanica, sponsalia plantarum, et Systema naturae. 214. Lucae [Lucca] 1758, *Bull. Sci. Soc. Philom. Paris* 1817: 152. 1817, *Bull. Mens. Soc. Linn. Paris* 1: 282. 1881 and J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. in China: mao da ding cao

in India: pangnesir

Gerbera viridifolia (DC.) Sch. Bip. (*Gerbera abyssinica* Sch. Bip. ex A. Rich.; *Gerbera abyssinica* Sch. Bip. ex Hochst.; *Gerbera conrathii* Thell.; *Gerbera glandulosa* Dümmer; *Gerbera glandulosa* Thell.; *Gerbera natalensis* Sch. Bip.; *Gerbera plantaginea* Harv.; *Gerbera viridifolia* Sch. Bip.; *Lasiopus viridifolius* DC.; *Perdicium abyssinicum* (Sch. Bip. ex A. Rich.) Hiern; *Perdicium abyssinicum* Hiern)

South Africa. Herb, stemless, perennial, very variable, thickened fleshy roots

See *Plantae Rariores Africanae* 22. 1760, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 19. 1838, *Flora* 24(1, Intelligenzbl.): 27. 1841, *Flora* 27: 778, 780. 1844, *Tentamen Florae Abyssinicae ...* 1: 458. 1848, *Flora Capensis* (Harvey) 3: 522. 1865, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* (Hiern) 1: 615. 1898 and *Journal of the Royal Horticultural Society* 40: 249. 1914, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 68: 452, 454. 1923, *South African Journal of Science* 98: 589–597. 2002, *Veld & Flora* 89(1): 30. 2003

(Smoke inhaled to treat headache and colds. Veterinary medicine, used to stimulate milk production in cattle.)

in English: the herb of milk

in South Africa: iyeza lamazi

Gerrardanthus Harvey ex Hook.f. Cucurbitaceae

After the English William Tyrer Gerrard, d. 1866 (d. Foulpointe, Madagascar), botanical collector in Natal and Madagascar in the 1860s, collected with Mark Johnston McKen (1823–1872); see *Species Plantarum* 2: 1010–1011. 1753, *Genera Plantarum* 393–394. 1789, *Genera Plantarum* 1: 820, 840. 1867 and J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 165–166. Cape Town 1981.

Gerrardanthus lobatus (Cogn.) Jeffrey (*Gerrardanthus grandiflorus* Cogn. var. *lobatus*)

Tanzania. Herbaceous climber, corolla orange

See *Kew Bulletin* 15: 353. 1962

(Veterinary medicine, for East Coast fever.)

in Kenya: manereriati

Gethyllis L. Amaryllidaceae (Liliaceae)

An old Greek name, a diminutive of *gethyon* ‘the spring onion, leek’; Plinius used *gethyum*, *gethyon* and *getium*, *i* for a species of onion or leek, see *Species Plantarum* 1: 292,

442. 1753, *Exposition des Familles Naturelles* 1: 134. 1805, *Analyse des Familles de Plantes* 58. 1829, *Flora Telluriana* 4: 19. 1838.

Gethyllis afra L. (*Gethyllis pusilla* Bak.)

South Africa. Bulbous, long fleshy roots, leaves often hairy, one flower per bulb, flowers sweetly scented, berry-like fragrant edible fruits

See *Species Plantarum* 442. 1753, *Fl. Cap.* (Harvey) 6(3): 531. 1897

(Fruits a remedy for colic and indigestion.)

in South Africa: bramakranka, koekemakranka, kukumakranka

Gethyllis spiralis (Thunb.) Thunb. (*Abapus spiralis* (Thunb.) Raf.; *Gethyllis rosea* Eckl.; *Gethyllis spiralis* L.f.; *Gethyllis spiralis* Ait.; *Gethyllis unilateralis* L. Bolus; *Papiria spiralis* Thunb.)

South Africa. Bulbous, leaves tightly spiralled leaves, flowers sweetly scented, one flower per bulb, fragrant fruits, birds and rodents reported to eat the fruit’s fleshy pulp

See *Physiogr. Sälsk. Handl.* 1: 111. 1776, *Nov. Gen. Pl.* [Thunberg] 1: 14. 1781, *Suppl. Pl.* 198. 1782 [1781 publ. Apr 1782], *Hortus Kew.* (W. Aiton) 1: 437. 1789, *Topogr. Verz. Pflanzensamml. Ecklon:* 4. 1827, *Fl. Tellur.* 4: 19. 1838, *Fl. Cap.* (Harvey) 6(3): 531. 1897 and *J. Bot.* 67: 135. 1929

(Flowers infusion used to ease teething troubles; flowers applied to boils, bruises and insect bites.)

in South Africa: bramakranka, koekemakranka, kukumakranka, ruikertjie

Getonia Roxb. Combretaceae

See *Tableau Encyclopédique et Méthodique... Botanique* 1 (vol. 2): t. 357. 1793, *Encyclopédie Méthodique. Botanique ... Supplément* 2: 41. 1811, *Tableau Encyclopédique et Méthodique... Botanique* 2 (vol. 5): 485. 1819 and *FRPS* (53(1): 3. 1984

Getonia floribunda Roxb. (*Calycopteris floribunda* (Roxb.) Lam. ex Poir.; *Calycopteris floribunda* (Roxb.) Lam.; *Calycopteris floribunda* (Roxb.) Poir.; *Calycopteris nutans* Kurz; *Calycopteris nutans* (Roxb.) Kurz; *Calycopteris nutans* var. *glabriuscula* Kurz; *Calycopteris nutans* var. *roxburghii* Kurz; *Combretum extensum* Roxb.; *Combretum sericeum* (Walp.) Wall. ex C.B. Clarke; *Getonia nitida* Roth; *Getonia nutans* Roxb.; *Poivrea sericea* Walp.) (*Calycopteris*, from the Greek *kalyx* ‘calyx’ and *pteron* ‘a wing’, from the form of the calyx and to the spreading winged and persistent calyx lobes.)

India, China. Liana, climbing, straggling shrub, scandent, woody, yellowish green apetalous flowers in dense pubescent terminal panicles

See *Plants of the Coast of Coromandel* 1: 61, pl. 87. 1798, *Prodromus Florae Novae Hollandiae* 351. 1810, *Nov. Pl. Sp.* 217. 1821, *Journal of the Asiatic Society of Bengal* 46: 59. 1877 and *Biochem. J.* 28(6): 1964–1967. 1934, *Current Science* 44: 888–889. 1975, *China Pl. Red Data Book* 1: 222–223. 1992, *Phytochemistry* 65(5): 593–601. 2004, *Planta Medica* 71(2): 191–193. 2005, *Journal of Ethnopharmacology* 107(2): 229–233. 2006

(Used in Ayurveda and Sidha. Leaves astringent, laxative, antidysenteric, anthelmintic, antitubercular, depurative, febrifuge, diaphoretic, toxic, used in colic, constipation, leprosy, intestinal worms, malaria, dysentery, ulcers, fever; leaf juice a cure for fresh wounds and cuts. Fruits for jaundice, ulcers, skin diseases.)

in China: e chi teng

in India: adavi jama, adivijaama, adivijama, aejarike, aenjarike, baaguli, baguli, baguli balli, banda puvvulu, bandeemooroodoodoo, bandimurududu, bandimurugudu, biliyadi, boguli, bontathige, bontha, enjarigekubsa, enjarigekutsa, gaddaputike, gedda puthika, geddaputhiki, hangarike, hanjarike kuchchu, hanjarikekuccu, hanjarikekuchchu, kalika-tige, kalikatige, karravadala, karravedala, kattavedala, kokaray, kokkarai, kokkare, kokoray, kokundia, kollingatheega, kuchchu kuppasa, kuchhu, kukkasada balli, kumasalu, kupasa, kuppasa, kupsa, mannar koti, mara suthu balli, marasada balli, marasuthu balli, marasuttu balli, marasuttuballi, marsada, marsada boli, marsadabaguli, marsadaballi, marsadaboli, minarkoti, minnargodi, minnar-koti, muruguduthige, murugudutige, paaniyavalli, pillani, pippindatheega, pippindathige, pippindatiga, pippindatige, pottengi, pullaani veru, pullaaniyila, pullaaniyila pacha, pullani, pullanii, pullanji, pullanni, rasselmal, sitapaki, susavi, sushavi, tellavadala, thanduga, thellavadala, therulankodi, ukshi, varavalli, wukshi, yenjarike

Geum L. Rosaceae

Geum is the classical Latin name for the herb bennet, avens, *Geum urbanum* L.; see Carl Linnaeus, *Species Plantarum*. 1: 500–501. 1753, *Genera Plantarum*. Ed. 5. 220. 1754, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 2: 139. 1823, *Manual* (Gray), ed. 2. 117. 1856, *Fl. Orient.* [Boissier] 696, 698. 1872 and *J. Arnold Arbor.* 55(3): 384. 1974, *Bull. Bot. Surv. India* 21(1–4): 128. 1979 (publ. 1981), *Bull. Bot. Surv. India* 26(3–4): 238. 1984 (publ. 1986), *Botaničeskij Žurnal* (Moscow & Leningrad) 72: 772. 1987, *Illustrierte Flora von Mittel-Europa*, ed. 3 4(2a): 625–626. 1995.

Geum adnatum Wall.

India.

See *Numer. List* [Wallich] n. 712. 1829

(Plant useful in diarrhea and dysentery.)

in India: gogjimul

Geum aleppicum Jacquin (*Geum aleppicum* subsp. *strictum* (Aiton) R.T. Clausen; *Geum aleppicum* var. *bipinnatum* (Batalin) F. Bolle ex Hand.-Mazz.; *Geum aleppicum* var. *bipinnatum* (Batalin) Handel-Mazzetti; *Geum aleppicum* var. *strictum* (Aiton) Fernald; *Geum intermedium* Besser ex M. Bieb.; *Geum intermedium* Ledeb.; *Geum intermedium* Besser ex Marschall von Bieberstein (1808), not Ehrhart (1791), nor Willdenow (1806), nor Tenore ex Nyman (1878); *Geum potaninii* Juzepczuk; *Geum strictum* Aiton, nom. illeg.; *Geum strictum* var. *bipinnatum* Batalin; *Geum vidalii* Franchet & Savatier)

China.

See *Icones Plantarum Rariorum* 1: 10, pl. 93. 1781–1793, *Collectanea* [Jacquin] 1: 88, t. 127. 1787 [dt. 1786, issued Jan–Sep 1787], *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 2: 217–218. 1789, *Flora Altaica* 2: 265–266. 1830, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 13(1): 93. 1893 and *Symbolae Sinicae* 7(3): 523. 1933, *Rhodora* 37(440): 294. 1935, *Flora URSS* 10: 255. 1941, *Cornell University Agricultural Experiment Station Memoir* 291: 9. 1949

(Skin diseases, astringent.)

in English: yellow avens, avens

in China: lu bian qing, wu qi chao yang

Geum elatum Wall. ex G. Don (*Acomastylis elata* (Royle) F. Bolle; *Acomastylis elata* (Wall. ex G. Don) F. Bolle; *Acomastylis elata* var. *elata* (Wall. ex G. Don); *Acomastylis elata* var. *leiocarpa* (W.E. Evans) F. Bolle; *Geum elatum* Wall.; *Geum elatum* Wall. & G. Don; *Geum elatum* var. *leiocarpum* W.E. Evans; *Sieversia elata* (Wall. ex G. Don) Royle; *Sieversia elata* Royle)

China, India. Suberect, rhizomatous, herbs, flowering stems with few leaves and 1–6 flowers, hairy achenes

See *Numer. List* [Wallich] n. 711. 1829, *A General History of the Dichlamydeous Plants* 2: 526. 1832, *Fl. Brit. India* 2(5): 343. 1878 and *Notes from the Royal Botanic Garden, Edinburgh* 14(67): 29. 1923, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 72: 83. 1933, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 207. t. 39. t. 1. 1935

(Roots and shoots tonic, stomachic, astringent, for dysentery, diarrhea, leucorrhea and sore throat. Leaves decoction for dysentery and diarrhea.)

in China: yu ye hua

in India: gwali, zahrada

Geum japonicum Thunberg var. *chinense* F. Bolle

China.

See *Notizbl. Bot. Gart. Berlin-Dahlem* 11(103): 210. 1931

(Diaphoretic, febrifuge.)

in China: rou mao lu bian qing

Geum roylei Wall. & F. Bolle (*Geum roylei* Wall.)

Himalaya.

See *Repert. Spec. Nov. Regni Veg. Beih.* 72: 66. 1933

(Leaves decoction for diarrhea and dysentery.)

in India: gwali

Geum triflorum Pursh (*Erythrocoma triflora* (Pursh) Greene; *Sieversia triflora* (Pursh) R. Br.)

North America.

See *Flora Americae Septentrionalis*; or, ... 2: 736. 1814[1813] and *Leaflets of Botanical Observation and Criticism* 1(12): 175. 1906, *Fl. Canada* 3: 547–1115. 1978

(An infusion of the fresh or dried roots drunk for chills.)

in English: long-plumed purple avens, old man's whiskers

Geum urbanum L. (*Geum rivale* L. subsp. *urbanum* Á. Löve & D. Löve; *Geum urbanum* A. Gray)

India, Himalaya.

See *Species Plantarum* 1: 501. 1753, *Manual* (Gray), ed. 4. p. xcii. 1863 and *Komarov Lectures*. 20: 47–61. 1973, *Taxon* 28: 398–400. 1979, *Taxon* 29: 718–720. 1980, *Taxon* 30: 829–842. 1981, *Naturaliste Canad.* 113(4): 321. 1986, *Watsonia* 19: 134–137. 1992, *Watsonia* 19: 169–171. 1993, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999

(Plant stomachic, febrifuge, styptic, astringent, for diarrhea and dysentery. Aromatic roots in infusion or decoction taken as digestive, stomachic. Leaves and roots antiseptic, astringent, used in fever, chill, catarrh.)

in English: common avens, herb bennett (from *herba benedicta*, blessed plant or grass), little cinnamon, wood avens

Maori name: kopata

in Arabic: hashishet el-mubarek

in Spanish: canelilla

Geum urbanum L. var. *strictum* (Aiton) Hook.f.

Australia, New Zealand. Leaves rise directly from the rootstock, serrated leaflets, yellow flowers

See *Species Plantarum* 1: 501. 1753, Hooker, Joseph Dalton, Sir (1817–1911), *The Botany of the Antarctic voyage of H.M. discovery ships Erebus and Terror in the years 1839–1843 under the command of Captain Sir James Clark Ross, Kt., R.N., F.R.S. & L.S., etc ...* . iii, *Flora Tasmaniae*. Vol II. Monocotyledones and Acotyledones. London, [1855–]1860

(Leaves and roots antiseptic, astringent, used in fever, bruises, pimples, burns, chill, catarrh, diarrhea, dysentery.)

in English: common avens, herb bennet

Maori name: kopata

Gigantochloa Kurz ex Munro Poaceae (Gramineae)

From the Greek *gigas*, *gigantos* 'a giant' and *chloe*, *chloa* 'grass', giant bamboos, see *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 226. 1864, *Transactions of the Linnean Society of London* 26(1): 123. 1868 and *Fieldiana, Botany* 24(2): 38–331. 1955, *Taxon* 5: 28–30. 1956, *Reinwardtia* 10(3): 291–380. 1987, *Plant Resources of South-East Asia* 7: 1–191. 1995, Li, Z.-L., The *Flora of China* Bambusoideae project — problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61–81. 1997, *Contributions from the United States National Herbarium* 39: 58. 2000.

Gigantochloa scortechinii Gamble (after the Italian clergyman Rev. Benedetto (Bertold) Scortechini, 1845–1886, botanist, botanical explorer, traveller, from 1871 to 1884 in Queensland (Australia), 1881 Fellow of the Linnean Society, from 1884 to 1886 Government botanist of Perak, plant collector in the Straits settlements, Malay Peninsula, collaborated with Bailey and von Mueller. See J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 251. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 358. 1972; D.J. Carr and S.G.M. Carr, eds., *People and plants in Australia*. 1981; Henry Nicholas Ridley (1855–1956), *The Flora of the Malay Peninsula*. London 1922–1925; I.H. Vegter, *Index Herbariorum*. Part II (6), *Collectors S. Regnum Vegetabile* vol. 114. 1986; M.N. Chaudhri, I.H. Vegter and C.M. De Wal, *Index Herbariorum*, Part II (3), *Collectors I-L. Regnum Vegetabile* vol. 86. 1972; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 613. London 1994)

Peninsular Malaysia, Indonesia, Thailand, China, Yunnan. Densely tufted, gregarious species, sympodial, erect, top drooping, young culms pruinose to waxy, young shoots orange-green, basal nodes with aerial roots, young shoots rather bitter, found in disturbed areas, overlogged forest, sandy loams, ravines, similar to *Gigantochloa wrayi* Gamble

See *Annals of the Royal Botanic Garden, Calcutta*. 7: 62, pl. 53. 1896, *The Flora of British India* 7: 398. 1896 and *Gard. Bull. Sing.* 16: 122–124. 1958, *Nature Malaysiana* 7: 34–39. 1982, *Reinwardtia* 10: 341–347, fig. 20–22. 1987, *Journal of Tropical Forest Science* 2(3): 227–234. 1990, *Nature Malaysiana* 16(4): 130–135. 1991, *Journal of Tropical Forest Science* 4(1): 87–93. 1992

(Irregular menses, boil the leaves with leaves of *Panicum sarmentosum* and *Setaria plicata* and drink the decoction.)

in Indonesia: buloh gala, buloh rayah, buloh semantan, buloh seremai, buloh telor, buluh galah, buluh kapal, buluh rayah, buluh semantan

Malay name: buloh hauw

Gilbertiodendron J. Léonard Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

Named for the Belgian botanist G. Gilbert, a contributor of Raymond Boutique (1906–1985), *Flore du Congo Belge et du Ruanda-Urundi*. (Mimosaceae) Brussels, 1952, see *Genera Plantarum* 1: 30. 1789, *Niger Flora* 326. 1849 and *Bulletin du Jardin Botanique de l'État* 22: 188. 1952.

Gilbertiodendron ivorense (A. Chev.) J. Léonard (*Berlinia ivorensis* A. Chev.; *Macrobium chevalieri* Harms; *Macrobium ivorense* (A. Chev.) Pellegr.)

Tropical Africa. Perennial non-climbing tree

See *Bulletin de la Société Botanique de France* 58: Mém. VIII 165. 1911, *Bulletin de la Société Botanique de France* 69: 745. 1923, *Bulletin du Jardin Botanique de l'État* 24: 58. 1954

(Leaves and unripe fruits antimicrobial, astringent, for skin diseases, colds and cough.)

Gilia Ruíz & Pavón Polemoniaceae

Named to honor the Italian astronomer Filippo Luigi Gili (Gili), 1756–1821, his principal writings are *Agri Romani historia naturalis* tres in partes divisa. Roma 1781 and *Delineazione dei generi naturali ... a norma del Systema naturae di Linneo*. Roma 1785, with Gaspar Xuarez wrote *Osservazioni fitologiche sopra alcune piante esotiche introdotte in Roma ... dagli Abati F.L. Gili e Gaspar Xuarez*. Roma 1789. See Hipólito Ruíz López and José Antonio Pavón, *Flora peruviana, et chilensis prodromus*. 25, t. 4. Madrid 1794 and J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957, J.C. Houzeau and A. Lancaster, *Bibliographie Générale de l'Astronomie Jusqu'en 1880*. London 1964. According to Georg Christian Wittstein (in *Etymologisch-botanisches Handwörterbuch*. 388. Ansbach 1852) the genus was dedicated to a Felipe Salvador Gil (or Filippo Salvatore Gili)? author of *Saggio di storia americana*. Roma 1780–1784, 1756–1821.

Gilia achilleifolia Benth. (*Gilia capitata* var. *achilleifolia* (Benth.) H. Mason ex Jeps.)

North America.

See *Edwards's Botanical Register* 19: pl. 1622. 1833 and *A Manual of the Flowering Plants of California ...* 795. 1925

(Very poisonous.)

Gilia aggregata (Pursh) Spreng. (*Callisteris aggregata* (Pursh) Greene; *Cantua aggregata* Pursh; *Ipomeria aggregata* (Pursh) Nutt.; *Ipomopsis aggregata* (Pursh) V.E. Grant)

North America.

See *Systema Vegetabilium*, editio decima sexta 1: 626. 1825 and *Leaflets of botanical observation and criticism* 1(11): 159. 1905, *Aliso* 3(3): 360. 1956

(Very poisonous.)

in English: skyrocket gilia

Gilia capitata Sims subsp. *staminea* (Greene) V.E. Grant (*Gilia achilleifolia* subsp. *staminea* (Greene) H. Mason & A.D. Grant; *Gilia staminea* Greene; *Navarretia capitata* (Sims) Kuntze)

North America. Annual or perennial herb

See *Botanical Magazine* 53: pl. 2698. 1826, *Revisio Generum Plantarum* 2: 433. 1891, *Erythea* 3(6): 105. 1895 and *Madroño* 9(7): 208. 1948, *Aliso* 2(3): 308. 1950

(Febrifuge.)

in English: bluehead gilia, field gilia, gillyflower

Gilia inconspicua (Sm.) Sweet (*Gilia inconspicua* (Sm.) Douglas ex Hook.; *Ipomopsis inconspicua* Sm.)

North America. Annual herb

See *Exotic Botany* 1: 25, pl. 14. 1804, *Hortus Britannicus* 286. 1826, *Edwards's Botanical Register* 56: t. 2883. 1829

(Febrifuge.)

in English: shy gilia

Gilia laciniata Ruiz & Pav. (*Cantua breviflora* Juss.; *Gilia alpina* (Wedd.) Brand; *Gilia erecta* Hieron.; *Gilia laciniata* var. *alpina* Wedd.; *Ipomeria albida* Nutt.)

Peru.

See *Flora Peruviana* 2: 17, t. 123, f. B. 1799 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/2): 112–131. 1967

(Very poisonous.)

Gilia leptomeria A. Gray (*Aliciella leptomeria* (A. Gray) J.M. Porter; *Navarretia leptomeria* (A. Gray) Kuntze)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 8: 278. 1870, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 17(1): 38. 1998

(Plant sedative, soporific, analgesic, antiseptic, tonic. Poultice of plant applied to scorpion stings, insect bites, worms.)

in English: sand gilia

Gilia macombii Torr. ex A. Gray (*Ipomopsis macombii* (Torr. ex A. Gray) V.E. Grant; *Navarretia macombii* (Torr. ex A. Gray) Kuntze)

USA, Arizona.

See *Proceedings of the American Academy of Arts and Sciences* 20: 301–302. 1885, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 361. 1956

(Piscicide.)

in Mexico: matesuwa

Gilia rigidula Benth. subsp. ***acerosa*** (A. Gray) Wherry (*Gilia acerosa* (A. Gray) Britton; *Gilia rigidula* var. *acerosa* A. Gray; *Giliastrum acerorum* (A. Gray) Rydb.; *Giliastrum rigidulum* subsp. *acerorum* (A. Gray) W.A. Weber)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 8: 280. 1870 and *Manual of the Flora of the northern States and Canada* 761. 1901, *Flora of the Rocky Mountains* 1066. 1917, *Sida* 1(4): 250. 1964, *Phytologia* 51(6): 374. 1982

(Crushed plant rubbed for cramps, rheumatism, inflammations, swellings.)

in English: bluebowls

Gilia sinuata Douglas ex Benth. (*Gilia inconspicua* var. *sinuata* (Douglas ex Benth.) A. Gray; *Gilia tenuiflora* var. *sinuata* (Douglas ex Benth.) Jeps.)

North America. Annual herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 313. 1845, *Geological Survey of California, Botany* 1: 498. 1876 and *A Flora of California* 3: 179. 1943

(Antiinflammatory.)

in English: rosy gilia

Gilia subnuda Torr. ex A. Gray (*Aliciella subnuda* (Torr. ex A. Gray) J.M. Porter; *Navarretia subnuda* (Torr. ex A. Gray) Kuntze)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 8: 276. 1870, *Revisio Generum Plantarum* 2: 433. 1891 and Moerman, Daniel E. *Native American Ethnobotany*. 1998, *Aliso* 17(1): 33. 1998

(Ground flowers eaten to ensure healthy pregnancy and ease labor.)

in English: coral gilia

Gingidium Forst. & Forst.f. Apiaceae (Umbelliferae)

Gingidion is an ancient Greek name for a small Syrian plant, for the French carrot, *Daucus gingidium* L.; see *The British Herbal* 425. 1756, J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. London. 1776, *Trans. Phil. Soc. Vict.* i. (1855) 103. 1855 and H.H. Allan, *Fl. New Z.*

1: 443, 487–505. 1961, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987.

Gingidium montanum J.R. Forst. & G. Forst. (*Gingidium montanum* Forst.)

New Zealand. Small plant, aromatic, lavender leaves from the base, flowers in umbels

See *Characteres generum plantarum*. London. 1776

(Leaves diuretic, for venereal diseases.)

in English: Maori anise

Maori names: kohepiro, koheriki

Gingidium rosifolium (Hook.f.) J.W. Dawson (*Angelica rosifolia* Hook.)

New Zealand. Small plant, aromatic, leaves from the base, flowers in umbels

See *Icon. Pl.* 6: t. 581. 1843 and *Univ. Calif. Publ. Bot.* xxxiii. 6. 1961

(Leaves diuretic.)

in English: rose-leaved anise

Maori names: kohepiro, koheriki

Ginkgo L. Ginkgoaceae

Possibly from the Chinese *yinling*, *yin* ‘silver’ and *hing* ‘apricot’, or from the ancient Japanese *gin* ‘silver’ and *kyo* ‘apricot’; see A. de Théis, “Spiegazione etimologica de’ nomi generici delle piante.” tratta dal *Glossario di botanica* di A. de Théis. Vicenza 1815, C.A. Vanzon, *Dizionario universale della lingua italiana*. Livorno 1828–1842 and A.H. Franklin, “*Ginkgo biloba* L.: Historical summary and bibliography.” *Virginia J. Sci.* n.s. 10: 131–176. 1959, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 266. Basel 1996, Ernest Weekley, *An Etymological Dictionary of Modern English*. 1: 640. Dover Publications, New York 1967.

Ginkgo biloba L. (*Salisburia adiantifolia* Sm.; *Salisburia biloba* Hoffmanns.; *Salisburia biloba* (L.) Hoffmanns.)

Asia. Tree, deciduous, simple fan-shaped alternate leaves, on female trees plum-like yellow-orange seeds, fleshy pulp foul-smelling when ripe, the interior kernel of the fruit considered a delicacy by people of Chinese, Japanese and southeast Asian descent

See *Mantissa Plantarum* 2: 313–314. 1771, *Transactions of the Linnean Society of London* 3: 330. 1797, *Verzeichniss der Pflanzenkulturen* 109. 1824 and Franklin, A.H. “*Ginkgo biloba* L.: Historical summary and bibliography.” *Virginia J. Sci.*, n.s. 10: 131–176. 1959, Cheng Wan-chün & Fu Li-kuo.

Ginkgoaceae. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 18–23. 1978, *Kromosomo* 18–19: 515–525. 1980, *Cytologia* 47: 27–46. 1982, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 34: 27–32. 1987, Wada, K. et al. “Studies on the constitution of edible and medicinal plants. 1. Isolation and identification of 4-O-methylpyridoxine, toxic principle from the seed of *Ginkgo biloba* L.” *Chem. Pharm. Bull. (Tokyo)* 36: 1779–1782. 1988, *Kromosomo* 50: 1635–1651. 1988, Lepoittevin, J.-P., Benezra, C., Asakawa, Y. “Allergic contact dermatitis to *Ginkgo biloba* L.: relationship with urushiol.” *Arch. Dermatol. Res.*, 281: 227–230. 1989, *Regnum Veg.* 127: 49. 1993, *Cathaya* 5: 41–48. 1993, *Journal of Huazhong Agricultural University* 15(6): 590–593. 1996, *Acta Botanica Sinica* 39(2): 97–101. 1997, *Scientia Silvae Sinicae* 35(5): 2–4. 1999

(Oils from the outer coat are known to cause dermatitis in some humans. Contact dermatitis occurs in sensitive individuals when they remove the fleshy pulp from the seeds in the autumn. The crude extract contains a toxin that causes convulsions and death if used in excess. The Chinese and Japanese use a crude extract of ginkgo seed, called *gin-nan*, as an antitussive and expectorant. Excessive use of this extract has caused *gin-nan* food poisoning, some deaths have occurred. Leaves used for pesticides; roots a cure for leucorrhea. Wood against moths, leaves against silverfish.)

in English: ginkgo, maidenhair tree

in China: bai guo, yin kuo, pai kuo, yin hsing, yin xing

in Japan: ichô ka, icho (ichô= duck’s foot)

in Okinawa: haburugii

Girardinia Gaudich. Urticaceae

Girardinia bullosa (Steudel) Wedd. (*Urtica bullosa* Steud.; *Urtica bullosa* Hochst. ex Steud.)

East Africa. Woody

See *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l’Uranie et la Physicienne ... Botanique* 498. 1830, *Annales des Sciences Naturelles; Botanique*, série 4 1: 181. 1854 and *Biotropica* 32(1): 23–32. 2000, *Systematics and Geography of Plants* Vol. 71, No. 2, *Plant Systematics and Phytogeography for the Understanding of African Biodiversity*, pp. 975–991. 2001, *Ethiop. J. Health Dev.* 15(3): 209–221. 2001

(Harmful to people and/or livestock. Veterinary medicine, for retained placenta.)

in East Africa: dobi warabecha, dobi warabechaa, kusha

in Rwanda: ikibabanzovu

Girardinia diversifolia (Link) Friis (*Girardinia adoensis* (Steud.) Wedd.; *Girardinia adoensis* (Hochst. ex Steud.)

Wedd.; *Girardinia chingiana* Chien; *Girardinia condensata* (Hochst. ex Steud.) Wedd.; *Girardinia condensata* (Steud.) Wedd.; *Girardinia condensata* var. *adoensis* (Hochst. ex Steud.) China*. 5: 91. 2003, *Contributions to Nepalese Studies* 30(1): 19–52. 2003

(Stout stinging hairs very strongly irritating, burning sensation, itching, reddening, blistering, sometimes poisonous, dangerous. Plant decoction used as febrifugal; young plants boiled and made into a paste taken for tuberculosis; bud for

diabetes. Fresh juice of the leaves applied externally in the treatment of headaches and swollen joints; leaves decoction given for cough and fevers; leaves infusion for rheumatic pains. Roots stimulant, contraceptive, a decoction for boils, gastric troubles, urinary diseases; root poultice for bone fracture, sprain; roots juice to treat constipation, cuts and wounds. Seeds as fish poison. Veterinary medicine, stinging hairs believed to stimulate milk production, for cows and buffaloes. Magic, ritual purposes, shamans beat with wild nettles humans possessed by evil spirits.)

in English: giant stinging nettle, Himalayan nettle, Nilgiri nettle, Niligiri nettle, wild nettle

in India: ain, ain bichhu buti, alla, ana-schorigenam, ana schorigonain, anaccoriyanam, anachohoriyanum, anachoriyan, anjankarla, arike, awa-bichu, awla, bangle-sisnu, beechi-booti, beiya, beksha, bhabar, bhainsya kandali, bhangresishnu, bichhu buti, bichu, bichua, chelu urigida, chichr, chikri, dholu kandali, ein, gaddanelli, gass-kahambilya, herpa, horu surat, jhir kandali, jurkunkundalu, kal, kaldi bichhu, kali, kandali, kangthai, kazoobi, keru, kingi, kubra, kundalu, kushi, laghukacchu, lomasa, moti khajati, phetyakyi, rakasi chettu, romalu, sanoli, santativardhini, serpa, shishuna, surusurike, taintham, thurike, tiang thap, ting thap, turike, turisike, ullo, vatavidhvamsini, vrishchika, vrscika, vrsciyasaka

in Lepcha: kasu, kazoobi

in Nepal: allo puwa, allo sisnu, ban sisnu, calou, chalni sisnu, dya nhakan, ullo

in Thailand: han-chang-hai, han-chang-rong, han-sa, kanglang-tang-chang, lae-chae, tam-yae-chang

in Rwanda: ikiboroza

Girardinia palmata (Forssk.) Gaudich. (*Girardinia heterophylla* Decne.; *Girardinia zeylanica* Decne.; *Urtica palmata* Forssk.)

India. Herb with stinging hairs, ovate acuminate dentate leaves, flowers in panicles

See *Flora Aegyptiaco-Arabica* 159. 1775, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 498. 1830, *Jacquem. Voy. Bot.* 151. t. 153. 1844, *FBI* 5: 550. 1888

(Young leaves eaten after boiling as tonic, digestive, stimulant. Roots crushed with the roots of *Amaranthus viridis* for the treatment of the urinary diseases, painful urination. *Clerodendrum viscosum* roots infusion with roots of *Girardinia palmata* and *Solanum melongena* as a bath in debility and fatigue.)

in English: Himalayan nettle

in India: bhangre sishnu, dholan kandali, dholan kandelu, kazoobi, termay

Girardinia zeylanica Decne.

Sri Lanka.

See *Voyage dans l'Inde* 4(Bot.): 151–152. 1844 and *Economic Botany* 44(1): 94–105. 1990

(Used in Unani. For headache, swollen joints.)

in India: bichhu buti, bichubute, bichwa siyah, ghora keemesh, ghora-keemesh, khaskulio, kasti-khatkutli, sinsu

Gironniera Gaudich. Cannabaceae (Ulmaceae)

After a traveller, a French naval surgeon, Paul Proust de la Gironnière, 1820–1839 in the Philippines, survived the massacre of foreigners, wrote *Vingt Années aux Philippines. Souvenirs de Jala-Jala*. Paris 1853, see Fu Likuo, Chen Chiajui & Tang Yancheng. *Ulmaceae*. In: Chun Woonyong & Huang Chengchiu, eds., *Fl. Reipubl. Popularis Sin.* 22: 334–413. 1998.

Gironniera hirta Ridl.

Malaysia. Small tree

See *Journal of the Straits Branch of the Royal Asiatic Society* 82: 194. 1920

(Roots as a postpartum remedy; a decoction used for sore eyes.)

in Borneo: medang kasap

Malay name: menangkuk

Gironniera subaequalis Planchon (*Gironniera chinensis* Bentham; *Gironniera nervosa* Planchon var. *subaequalis* (Planchon) Kurz)

China, Papua New Guinea. Tree, leaves coriaceous rough, hirsute fruits yellow-orange

See *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique*, pl. 85. 1844, *Ann. Sci. Nat., Bot.*, sér. 3. 10: 339. 1848, *Flora Hongkongensis* 325. 1861, *Forest Flora of British Burma* 2: 470. 1877 and *Botanical Magazine* 103: 113–131. 1990

(Leaves as a postpartum remedy.)

in English: greater rough laurel, subequal gironniera, white gironniera

in China: bai yan shui

in Indonesia: menyalin pipit

Malayan names: medang belanak, medang berlapok

Gisekia L. Gisekiaceae

After the German botanist Paul Dietrich Giseke, 1741–1796, pupil of Linnaeus, his writings include *Index linnaeanus*

in Leonhardi Plukenetii ... Opera Botanica ... *Index linnaeanus* in Joannis Jacobi Dillenii Historiam muscorum, etc. Hamburgi 1779 and *Theses botanicae*. Hamburgi 1790, joint author of *Icones Plantarum ...* ediderunt P.D.G., Johann Dominicus Schulze [Schultze, 1752–1790], Abraham A. Abendroth et N.J. Buek [Johannes Nikolaus B., 1736–1812]. Hamburgi 1777–1778. See *Mantissa Plantarum Altera* 2: 554, 562. 1771, Antoine Lasègue, *Musée botanique de Benjamin Delessert*. 332. Paris 1845 and *Journal of Japanese Botany* 18: 102. 1942, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 53. 1965, Frans A. Stafleu, *Linnaeus and the Linnaeans*. The spreading of their ideas in systematic botany, 1735–1789. Utrecht 1971.

Gisekia pharnaceoides L. (*Gisekia linearifolia* Schumach.; *Gisekia linearifolia* Schumach. & Thonn.; *Gisekia linearifolia* Fenzl ex Moq.; *Gisekia molluginoides* Wight; *Gisekia pharnacioides* L.; *Pharnaceum occultum* Forsk.) (Latin *pharnacion* or *pharnaceon*, ii was applied by Plinius to a plant, a species of panax, so named after Pharnaces, the name of two kings of Pontus)

Guinea, India. Spreading succulent, prostrate, aromatic, shrubby weedy, fleshy leaves, tiny flowers in many flowered axillary cymes, eaten

See *Mant. Pl.* 2: 562. 1771, *Flora Aegyptiaco-Arabica* 58. 1775, *Beskrivelse af Guineiske planter* 167–168. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 187–188. 1828, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 7: 162. 1847 and *Fl. Iran.* 114: 2. 1975, *Fam. Gen. Fl. Pl.* 2: 511, 514. 1993, *Kew Bulletin* 48: 343–356. 1993, Lu Dequan, *Aizoaceae (Gisekia-Mollugo)*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 26: 20–30. 1996

(Used in Ayurveda and Sidha. Plant aromatic, anthelmintic, purgative, rubbed on swellings, a remedy for diarrhea, miscarriage. Roots as a chest medicine. Leaves purgative, anti-inflammatory, astringent, anodyne, used for boils. Veterinary medicine, used as a poultice for cattle sores.)

in English: gisekia

in Nigeria: shinkafar awaki

in Southern Africa: gisekia; mulandege (Swahili)

in S. Rhodesia: tarambiya

in China: ji su cao

(Anesthetic, antiseptic, stomachic, anthelmintic, blood purifier, tonic, pods for the treatment of indigestion, measles, whooping cough, catarrh, colds. Bark infusion for dyspepsia, fever, measles, smallpox; infusion of roots and bark used for cold, cough. Magico-religious beliefs, ceremonial, protection, pod used for the complaints of children.)

in English: common honey locust, honey-chuck, honey locust, honeylocust, honeysuck, sweet locust, three-thorned acacia

in India: keeyamlei

in Southern Africa: driedoring-gleditsia, driedoringboom, leoka, soetpeulboom, springkaanboom

Glehnia Schmidt ex Miq. Apiaceae (Umbelliferae)

For the Russian botanist Peter von Glehn, 1835–1876, plant explorer in Baltic Russia, companion of Friedrich (Karl) (Fedor Bogdanovich) Schmidt (1832–1908), author of *Flora der Umgebung Dorpats*. Dorpat 1860. See Friedrich Schmidt, *Reisen im Amur-Lande und auf der Inseln Sachalin* ... Botanischer Theil. St. Petersburg 1868 and J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957.

Glehnia littoralis F. Schmidt ex Miquel (*Cymopterus littoralis* A. Gray; *Phellopterus littoralis* (F. Schmidt ex Miquel) Bentham; *Phellopterus littoralis* (A. Gray) F. Schmidt)

China. Perennial herb, white roots, rhizome thick, lustrous leathery leaves alternate, compound umbels terminal, small white flowers, fruit in two elliptical mericarps, winged and hirsute mericarp 5-ribbed, in sandy soils

See *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 100. 1819, *Ann. Mus. Bot. Lugduno-Batavi* 3: 61. 1867, *Genera Plantarum* 1: 905. 1867, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 12: 138. 1871 and *Guihaia* 19(49): 344–348. 1999

(The roots used in traditional Chinese medicine for treating coughs, dry cough and bronchitis.)

in English: coastal glehnia

in China: bei sha shen

in Japan: hama-bôfû

Gleichenia J.E. Smith Gleicheniaceae

After the German botanist Wilhelm Friedrich von Gleichen-Russworm [called Russworm, Russwurm, Rusworm], 1717–1783 (Schloss Greifenstein, Bonnland, Hammelburg, Germany), microscopist, among his works are *Das Neueste aus dem Reiche der Pflanzen*. Nürnberg [1763–] 1764 [–1766], *Dissertation sur la génération, les animalcules spermaticques, et ceux d'infusions ...* Ouvrage traduit de l'allemand [by J.C.T. Laveaux.] Paris [1799], *Auserlesene mikroskopische Entdeckungen bei den Pflanzen, Blumen und Blüten, Insecten und andern Merkwürdigkeiten*. Nürnberg 1777–1781 and *Histoire de la Mouche commune de nos appartements*. Nürnberg 1790; see J.E. Smith, in *Mémoires de l'Académie Royale de Sciences de Turin*. 5: 419, t. 9, fig. 10. Turin, 1793, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London, 1796–1800, *Neues J. Bot.* 1(2): 38. 1805 [dt. 1806; issued in Nov 1805], *Tentamen Pteridographiae* 48. 1836, Presl, Carl (Karl, Carel, Carolus) Borivoj (Boriwog, Boriwag) (1794–1852), *Die Gefässbündel im Stipes der Farnn* 30. Gray; *Robinia hispida* L.; *Robinia maculata* Kunth; *Robinia sepium* Jacq.; *Robinia variegata* Schltldl.)

South America. Perennial non-climbing tree, deciduous, odd-pinnate leaves, pinkish reddish flowers in dense clusters along the branches, flattened compressed seed pods, flat shiny blackish seed, leaves have a fetid smell, leaves and tender stems used as green manure, fodder for rabbits, sheep and goats, cattle food

See *Enumeratio Systematica Plantarum* 28. 1760, *Mantissa Plantarum* 1: 101–102. 1767, *Nova Genera et Species Plantarum* (quarto ed.) 6: 393–395. 1823[1824], *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 260–261. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 263. 1834, *Linnaea* 12: 301. 1838, *Repertorium Botanicum Systematicum*. 1(4): 679. 1842, *United States Exploring Expedition* 1: 456. 1854, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 7: 152. 1857, *Botanical Gazette* 20: 284, 533. 1895 and *Symbolae Antillarum* 2(2): 289. 1900, *Fitoterapia* 71(6): 722–724. 2000, *Phytotherapy Research* 15(4): 356–359. 2001, *Pak. J. Bot.* 40(6): 2625–2629. 2008

(Toxins, poison, humans and animals; leaves and seeds used for the poisoning of noxious animals. Antimicrobial, hepatoprotective, antibacterial, antidysenteric, antipseudomonas, nematocidal, antifungal, insecticide, insect repellent, mosquito repellent, rodenticide, pesticidal, sedative, cytotoxic, expectorant, febrifuge, bark and leaves to treat human skin diseases, scabies, sores, boils, ulcers, wounds, burns, itch, sprains, rheumatism, gonorrhoea, headache, cold, cough; sap of bark, leaves and roots for wound healing; powdered

seed, bark and leaves used as a rat poison. Leaves decoction to bathe head for lice infestations. Veterinary medicine, crushed leaves to repel insects.)

in English: Aaron's rod, bristly locust, cacao-mother, glory cedar, Mexican lilac, mouse killer, Nicaraguan cocoa shade, quick stick, St. Vincent plum, tree of iron

in Latin America: bala, bien vestido, cacahnanance, caca-hua nano, cacahuananche, cacahuanantl, cacahuano, cacahuatón, cacao de nance, cocohuite, cuchunuc, jaiti, kansim, kante, lengua de perico, madera negra, madre cacao, madre de cacao, madre kakau, madrecacao, madrecacas, madriado, madricacao, mandiri-kakau, marikadau, marikakaw, mata ratón, matasarna, palo de sombra, piñon amoroso, piñon florido, sacyab, sangre de drago, xak-yaab, yaga le, yaga ley, yaite, zacyab

in China: mao yang huai

in India: kona, seemakkonna, vivazyathagari

in the Philippines: cacauate, kakaoati, kakauati, kakawate, kakawati, madre cacao, madrecacao, marikakau

in Nigeria: agala, agunmaniye

Globba L. Zingiberaceae

Probably from the Amboinan *galoba*, the name of a spice; see C. Linnaeus, *Mantissa Plantarum Altera*. 143, 170. (Oct.) 1771, *Prodr. Monogr. Scitam.* 19–20. 1862, *Gen. Pl.* [Bentham & Hooker f.] 3(2): 640. 1883 and *Pflanzenr.* (Engler) 4/46: 133. 1904, F. Boerner, *Taschenwörterbuch der botanischen Pflanzennamen*. 2. Aufl. 113. Berlin & Hamburg 1966, *Notes Roy. Bot. Gard. Edinburgh* 31(2): 235. 1972, *Nordic J. Bot.* 20(1): 65. 2000, *Amer. J. Bot.* 91(1): 114. 2004.

Globba atrosanguinea Teijsm. & Binn. (*Globba* × *atrosanguinea* Hort.)

Sumatra, Borneo. Herb, wild ginger, red-orange flowers

See *Natuurk. Tijdschr. Ned.-Indië* 27: 22. 1864, *Rev. Horticult.* (1887) 346. 1887 and *Nordic J. Bot.* 21(2): 163. 2001

(Crushed leaves applied to swellings. Rhizome paste applied as a poultice to sores, insect stinging nettle and bites, for body pain after delivery, as a postpartum remedy.)

in Borneo: ingkuyong

in Indonesia: tubo bala

Globba aurantiaca Miq. (*Globba deliana* Valetton)

Indonesia, Sumatra.

See *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 3: 613. 1861 and *Annales du Jardin Botanique de Buitenzorg* 31: 21. 1920

(Plant decoction as a postpartum remedy.)

Malay name: meroyan berok

Globba clarkei Baker

Nepal, Thailand. Herb, creeping rhizome, erect stem, long inflorescence

See *Fl. Brit. India* [J.D. Hooker] 6: 210. 1890

(Leaves decoction taken as a tonic. Rhizome, inflorescence and seed ground and the juice drunk as antidote against any poison.)

in India: dike-holdiram, techubima, techurbima

Globba marantina L. (*Ceratanthera amomoides* Hornem.; *Colebrookia bulbifera* Donn; *Globba barthei* Gagnep.; *Globba barthei* var. *pauciflora* Gagnep.; *Globba bracteosa* Horan.; *Globba bulbifera* Roxb.; *Globba ectobolus* K. Schum.; *Globba heterobracteata* K. Schum.; *Globba marantinoides* Wight; *Globba strobilifera* Zoll. & Moritzi; *Globba timorensis* K. Schum.; *Globba zollingeri* Gagnep.; *Lampujang majus* Medik.)

Philippines, Bangladesh, China. Leafy, lower nodes bearing bulbils, leaves very shortly petiolate, corolla yellow, dense strobiliform spikes, winged anthers, spicy bulbils eaten, in shady forest

See *Mantissa Plantarum* Alt. 143, 170. 1771, *Asiatic Researches* 11: 358. 1810, *Icon. Pl. Ind. Orient.* 6: 15. 1853 and *Bull. Soc. Bot. France* 48: 208–209. 1901, *Pflanzenr.*, (Engler) *Zingib.* 156, 159–160. 1904, *Fl. Indo-Chine* 6: 39. 1908, *The Gardens' Bulletin Singapore* 26: 115–126. 1972, *Notes Royal Bot. Gard. Edinburgh* 31: 188. 1972

(Aqueous extract of leaves used as eye drops against conjunctivitis. Rhizome paste applied on bone fracture, and vitiligo; rhizome pounded with rye and given in snakebites; rhizome extract administered orally as abortifacient; juice with black pepper given for cough and asthma. Rhizome and bulbils in asthma, cough, rheumatism and snakebite. Ritual, ceremonial, flowers used in worshipping and also worn by women.)

in East Asia: kera kera

in India: akhai-lar, chhota rasna, damakhasi, halla sulli, kalinga gadda, kalinga raashtra, kondapasupu, krishnakedar, krushnakedar, kuve, kuwe, rasukedar

Globba multiflora Wall. ex Baker (*Globba multiflora* Wall.; *Globba rubromaculata* J. Lal & D.M. Verma; *Globba velutina* Horan.)

India, Sikkim to Myanmar. Leafy stems, hairy leaves

See *Numer. List* [Wallich] n. 6537. 1832, *Fl. British India* 6: 202. 1890 and *Bull. Bot. Surv. India* 29(1–4): 26. 1987 [1989]

(Rhizome juice tonic, applied for headache and rheumatism. Plant used for rheumatic inflammations. Ceremonial, flowers used for *puja*.)

in India: karami, marsakan

Globba ophioglossa Wight

India.

See *Icones Plantarum Indiae Orientalis* [Wight] 6: 16. 1853

(Rhizome crushed and extract taken for stomachache.)

in India: chera ada, sunthi

Globba orixensis Roxb. (*Alpinia missionis* Wall., nom. nud.; *Globba orixensis* Wall.)

India, Himalaya to Myanmar. Leafy stems, panicles lower branches 2–3 flowered

See *Asiatic Researches* 11: 358, t. 6. 1810, *Numer. List* [Wallich] n. 6535, 6589. 1832

(Tonic.)

in India: dumparashtrakam, kantarokudho

Globba pendula Roxb. subsp. *pendula* (*Globba aphylla* Miq.; *Globba calophylla* Ridl.; *Globba ciliata* Jack; *Globba debilis* Ridl.; *Globba expansa* Wall. ex Horan.; *Globba fasciata* Ridl.; *Globba hura* (J.F. Gmel.) Roxb., nom. illeg.; *Globba kingii* Baker; *Globba koenigiana* Spreng., nom. illeg.; *Globba maculata* var. *minor* Blume; *Globba maculata* var. *stricta* Blume; *Globba oligantha* Miq.; *Globba panicoides* Miq.; *Globba polyphylla* K. Schum.; *Globba siamensium* (J. König) A.S. Rao & D.M. Verna, nom. illeg.; *Globba stenothyrsa* Baker; *Globba uliginosa* Miq.; *Globba valida* Ridl.; *Globba versicolor* Sm., nom. illeg.; *Globba wallichii* Baker; *Hura koenigii* Roem. & Schult.; *Hura siamensium* J. König; *Manitia aurea* Giseke, nom. illeg.; *Sphaerocarpos hura* J.F. Gmel.)

India, Malaysia.

See *Asiatic Researches* 11: 359. 1810, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 614. 1861 and *J. Straits Branch Roy. Asiat. Soc.* 54: 56. 1910, *J. Straits Branch Roy. Asiat. Soc.* 57: 101. 1911, *Bull. Bot. Surv. India* 14: 118. 1972 (publ. 1975)

(Childbirth, postpartum remedy, pound the rhizome and poultice the abdomen during or after childbirth; roots for fever and rheumatism.)

Malay names: bunga lidah muntah, haliya hantu, haliya hutan, haliya k'ra, haliya rimbah, meroyan b'rchoin, meroyan tingal, pua birah

Globba racemosa Sm. (*Globba bulbosa* Gagnep.; *Globba mairei* H. Lévy.; *Globba orixensis* Roxb. var. *racemosa* (Sm.) Gagnep.; *Globba simaoensis* Y.Y. Qian; *Globba strigulosa* K. Schum.)

Himalaya, China, India.

See *Exotic Botany* 2: 115, pl. 117. 1806 and *Bulletin de la Société Botanique de France* 48: 201–202 in text. 1901, *Pflanzer*. 20(IV. 46): 137. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 11(301–303): 493. 1913, *Acta Botanica Austro Sinica* 10: 68, f. 2. 1995

(Used for skin diseases and stomachache. Ceremonial, flowers used for decoration.)

in China: wu hua jiang

in India: karu pasupu, sanodol, sulli, sulli sao

Globba variabilis Ridl. subsp. *variabilis* (*Globba malaccensis* Ridl.; *Globba perakensis* Ridl.)

Thailand, Sumatra.

See *J. Straits Branch Roy. Asiat. Soc.* 32: 93, 98. 1899

(In childbirth, postpartum remedy. Leaves for earache, toothache, sores, ulcers, wounds.)

Malay names: matang, pua gajah, pua hadang, pua hudang, pua rimbah

Globularia L. Globulariaceae

From the Latin *globulus* 'a small round ball', referring to the flower heads, see *Species Plantarum* 1: 95. 1753, *Flore Française*. Troisième Édition 3: 427. 1805.

Globularia alypum L. (*Globularia alypum* Delile)

Europe, Spain.

See *Bolletino della Società Botanica Italiana* 1925: 105. 1925

(Demulcent, emollient, for skin diseases.)

Glochidion Forster & Forster f. Phyllanthaceae (Euphorbiaceae)

From the Greek *glochis*, *glochis* 'a point, extremity, a projecting point', referring to the staminal column of the male flowers or to the typical pubescence of some species; see *Mant. Pl. Altera* 161, 296. 1771, J.R. Forster and J.G.A. Forster, *Characteres generum plantarum, quas in itinere ad insulas maris australis, etc.* 113–114, t. 57. London [1775], *Linnaea* 32: 58, 61. 1863 and *Nachtr. Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 289. 1905.

Glochidion calocarpum Kurz (*Diasperus calocarpus* (Kurz) Kuntze; *Diasperus calocarpus* Kuntze)

India, Nicobar, Andaman. Small tree, broad leaves, male flowers with short pedicels, female flowers in clusters, yellow flowers

See *J. Bot.* 13: 330. 1875, *Revisio Generum Plantarum* 2: 601. 1891

(Leaf paste applied in skin complaints, septic wounds; leaf decoction taken in intestinal disorders. Veterinary medicine, applied to skin diseases, wounds or sores of pigs.)

in India: ang chongsi, anghongsi, kalayayo, luoikana, lukiana

Glochidion concolor Müll.Arg. (*Diasperus concolor* (Müll. Arg.) Kuntze; *Glochidion ramiflorum* var. *lanceolatum* Müll.Arg.; *Phyllanthus concolor* (Müll.Arg.) Müll.Arg.;

Phyllanthus concolor var. *ellipticus* Müll.Arg.; *Phyllanthus ramiflorus* var. *lanceolatus* Müll.Arg.)

Fiji, Tonga. Shrubby tree, leaves alternate elliptic, small flowers on pedicel, fruit grooved

See *Species Plantarum* 2: 981–982. 1753, *Linnaea* 32: 62. 1863, *Flora* 48: 374. 1865

(Leaves for food poisoning.)

in Tonga: malolo

Glochidion cuspidatum (Müll.Arg.) Pax (*Diasperus cuspidatus* (Müll.Arg.) Kuntze; *Diasperus cuspidatus* Kuntze; *Phyllanthus cuspidatus* Müll.Arg.)

Samoa.

See *Revis. Gen. Pl.* 2: 599. 1891, *Bot. Jahrb. Syst.* 25: 645. 1898

(In skin complaints.)

Glochidion ellipticum Wight (*Bradleia wightiana* Wall., nom. nud.; *Diasperus assamicus* (Müll.Arg.) Kuntze; *Diasperus assamicus* Kuntze; *Diasperus ellipticus* (Wight) Kuntze; *Diasperus ellipticus* Kuntze; *Diasperus malabaricus* (Müll.Arg.) Kuntze; *Diasperus wightianus* (Wight) Kuntze; *Diasperus wightianus* Kuntze, nom. illeg.; *Glochidion assamicum* (Müll.Arg.) Hook.f.; *Glochidion assamicum* var. *brevipedicellatum* Hurus. & Yu. Tanaka; *Glochidion assamicum* var. *magnicapsulum* Croizat & H. Hara; *Glochidion balakrishnanii* Jothi & al.; *Glochidion diversifolium* Bedd.; *Glochidion diversifolium* var. *wightianum* (Müll.Arg.) Bedd.; *Glochidion diversifolium* var. *wightianum* (Müll.Arg.) Hook.; *Glochidion ellipticum* var. *wightiana* (Müll.Arg.) Hook.f.; *Glochidion ellipticum* var. *wightianum* (Müll.Arg.) Hook.f.; *Glochidion malabaricum* (Müll.Arg.) Bedd.; *Phyllanthus andersonii* Müll.Arg., nom. illeg.; *Phyllanthus anderssonii* Müll.Arg.; *Phyllanthus assamicus* Müll.Arg.; *Phyllanthus diversifolius* var. *longifolius* Müll.Arg.; *Phyllanthus diversifolius* var. *wightiana* Müll.Arg.; *Phyllanthus diversifolius* var. *wightianus* Müll.Arg.; *Phyllanthus malabaricus* Müll.Arg.)

India, Taiwan. Shrub or small tree, deciduous, leaves on short spurs, greenish white to creamy yellow clustered flowers

See *Icon. Pl. Ind. Orient.* 5: t. 1906. 1852, *Fl. Sylv. S. India* 193–194. 1872, *Fl. Brit. India* 5: 319, 321. 1887, *Revis. Gen. Pl.* 2: 597–600. 1891 and *J. Econ. Taxon. Bot.* 26: 114. 2002

(Fresh bark juice given in stomachache of children and infants.)

in China: si lie suan pa zi

in India: lungdi

Glochidion eriocarpum Champion ex Bentham (*Diasperus anamiticum* Kuntze; *Diasperus eriocarpus* (Champ. ex Benth.) Kuntze; *Diasperus eriocarpus* Kuntze; *Diasperus villicaulis* (Hook.f.) Kuntze; *Diasperus villicaulis* Kuntze;

Glochidion anamiticum Kuntze; *Glochidion annamense* Beille; *Glochidion esquirolii* H. Lév.; *Glochidion villicaulis* J.D. Hooker; *Phyllanthus eriocarpus* (Champion ex Bentham) Müll.Arg.)

China, Taiwan, Vietnam to Malesia.

See *Hooker's J. Bot. Kew Gard. Misc.* 6: 6. 1854, *Revis. Gen. Pl.* 2: 599, 601. 1891 and *Fl. Indo-Chine* 5: 627. 1927

(All parts or roots and leaves used for urticaria, mastitis, toothache, menorrhagia, dysentery, skin eczema, enteritis.)

in China: mao guo suan pan zi

Glochidion heyneanum (Wight & Arn.) Wight (*Bradleia ovata* Wall.), nom. nud.; *Diasperus asperus* (Müll.Arg.) Kuntze; *Diasperus asper* Kuntze; *Diasperus heyneanus* Kuntze; *Diasperus heyneanus* (Wight) Kuntze; *Diasperus heyneanus* (Wight & Arn.) Kuntze; *Diasperus nepalensis* (Müll.Arg.) Kuntze; *Diasperus nepalensis* Kuntze; *Diasperus velutinus* (Wight) Kuntze; *Diasperus velutinus* Kuntze; *Eriococcus glaucescens* Zoll.; *Glochidion asperum* (Müll.Arg.) Bedd.; *Glochidion asperum* Bedd.; *Glochidion heyneanum* Wight; *Glochidion nepalense* (Müll.Arg.) Kurz; *Glochidion nepalense* Kurz; *Glochidion velutinum* Wight; *Gynoon heyneanum* Wight & Arn.; *Phyllanthus asperus* Müll.Arg.; *Phyllanthus heyneanus* (Wight & Arn.) Müll. Arg.; *Phyllanthus heyneanus* (Wight) Müll.Arg., nom. illeg.; *Phyllanthus heyneanus* Müll.Arg.; *Phyllanthus nepalensis* Müll.Arg.; *Phyllanthus velutinus* (Wight) Müll.Arg.; *Phyllanthus velutinus* Müll.Arg.)

China, India.

See *Numer. List* [Wallich] n. 7052. 1832, *Edinburgh New Philosophical Journal* 14: 300. 1833, *Icon. Pl. Ind. Orient.* [Wight] 5(2): t. 1907, 1908, f. 2. 1852, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 14: 173. 1857, *Linnaea* 32: 49. 1863, *Flora* 48: 375, 377, 380, 387, 389. 1865, *The Flora Sylvatica for Southern India* 193. 1872, *Prelim. Rep. For. Veg. Pegu*, App. B. 77. 1875, *Forest Flora of British Burma* 2: 344. 1877, *Revis. Gen. Pl.* 2: 598–601. 1891 and *J. Cytol. Genet.* 16: 35–45. 1981, *J. Cytol. Genet.* 23: 219–228. 1988

(Stem bark extract applied on the body as a leech repellent.)

in China: rong mao suan pan zi

in India: anche, anse

Glochidion hohenackeri (Müll.Arg.) Bedd. (*Diasperus hohenackeri* (Müll.Arg.) Kuntze; *Diasperus hohenackeri* Kuntze; *Phyllanthus hohenackeri* Müll.Arg.)

India.

See *Flora* 48: 373. 1865, *The Flora Sylvatica for Southern India* 193. 1872, *Revisio Generum Plantarum* 2: 599. 1891

(Bark given in anorexia, nausea.)

in India: bhoma

Glochidion lanceolarium (Roxb.) Voigt (*Bradleia lanceolaria* Roxb.; *Diasperus benthamianus* Kuntze; *Diasperus lanceolarius* (Roxb.) Kuntze; *Diasperus lanceolarius* Kuntze; *Glochidion cantoniense* Hance; *Glochidion lanceolarium* Voigt; *Glochidion macrophyllum* Benth.; *Glochidion subsessile* var. *birmanicum* Chakrab. & M.G. Gangop.; *Glochisandra acuminata* Wight; *Phyllanthus benthamianus* Müll.Arg., nom. illeg.; *Phyllanthus fraxinifolius* Lodd.; *Phyllanthus lanceolarius* (Roxb.) Müll.Arg.)

China, India.

See *Flora Indica*; or, descriptions of Indian Plants 3: 697–698. 1832, *London Journal of Botany* 1: 491. 1842, *Hort. Suburb. Calcutt.*: 153. 1845, *Flora* 48: 371. 1865, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5(5): 241. 1866, *Revis. Gen. Pl.* 2: 598. 1891 and *Journal of Economic and Taxonomic Botany* 13(3): 716. 1989

(Seeds pasted and warmed with mustard oil and applied on forehead for relief from headache. Stem as toothbrush to cure toothache.)

in China: ai jiao suan pan zi

in India: chikni, pati

Glochidion littorale Blume (*Agyneia impuber* Wall.; *Agyneia impubera* Miq.; *Agyneia impubera* Wall.; *Bradleia littorea* Steud.; *Bradleia littorea* (Blume) Steud.; *Bradleia obtusa* Wall.; *Diasperus littoralis* Kuntze; *Diasperus littoralis* (Blume) Kuntze; *Glochidion littorale* var. *caudatum* Airy Shaw; *Glochidion littorale* var. *culminicola* Airy Shaw; *Phyllanthus littoralis* (Blume) Müll.Arg.; *Phyllanthus littoralis* Müll.Arg.)

India, Malaysia. Shrub

See *Bijdragen tot de flora van Nederlandsch Indië* 12: 585. 1826, *Nomenclator Botanicus*. [Steudel], Editio secunda 1: 222. 1840, *Numer. List* [Wallich] n. 7869. 1847, *Fl. Hongk.* 314. 1861, *Flora* 48: 370. 1865, *Revis. Gen. Pl.* 2: 599. 1891 and *Kew Bulletin* 29(2): 290. 1974

(Twigs and leaves ash mixed with lime and garlic applied to rashes and itchy skin. Leaves decoction for stomachache.)

Malay names: daun sau sik, daun sok-sik

in Borneo: tutum

Glochidion marianum Müll.Arg.

Pacific, Marianas.

See *Linnaea* 32: 65. 1863

(Acute dermatitis on contact with the sap or latex.)

Common name: chosgo

Glochidion oblatum Hook.f. (*Diasperus oblatum* (Hook.f.) Kuntze; *Diasperus oblatum* Kuntze)

China, India, Himalaya.

See *Fl. Brit. India* [J.D. Hooker] 5(14): 312. 1887, *Revis. Gen. Pl.* 2: 601. 1891

(Extract of stem and root taken for dysentery.)

in China: kuan guo suan pan zi

in India: lakharotodu, lokhro tod

Glochidion obscurum (Roxb. ex Willd.) Blume (*Bradleia glaucophylla* Hassk.; *Bradleia kipareh* Steud.; *Bradleia pinnata* Roxb.; *Diasperus kipareh* (Müll.Arg.) Kuntze; *Diasperus kipareh* Kuntze; *Diasperus obscurum* (Roxb. ex Willd.) Kuntze; *Diasperus obscurum* Kuntze; *Glochidion blumeianum* Müll.Arg.; *Glochidion glaucum* Blume; *Glochidion pinnatum* (Roxb.) Voigt; *Glochidion roxburghianum* Müll.Arg.; *Phyllanthus kipareh* Müll.Arg.; *Phyllanthus obscurum* Roxb. ex Willd.)

Vietnam, Malaysia.

See *Species Plantarum*. Editio quarta 4: 581. 1805, *Bijdragen tot de flora van Nederlandsch Indië* 587. 1826, *Hort. Suburb. Calcutt.* 153. 1845, *Linnaea* 32: 61, 65. 1863, *Flora* 48: 373. 1865, *Revis. Gen. Pl.* 2: 599–600. 1891

(Leaves infusion for diarrhea; root decoction for stomachache.)

Malay names: bungau, daun cheremai

Glochidion puberum (L.) Hutchinson (*Agyneia impubes* L.; *Agyneia pinnata* Miq.; *Agyneia pubera* Linnaeus; *Agyneia sinica* Miq.; *Bradleia pubera* (L.) Roxb.; *Bradleia sinica* Gaertner; *Glochidion bodinieri* H. Lév.; *Glochidion distichum* Hance; *Glochidion fortunei* Hance; *Glochidion hayatae* var. *tsushimense* Hurus.; *Glochidion pseudo-obscureum* Pampanini; *Glochidion pseudo-obscureum* var. *glabrum* Pampanini; *Glochidion pseudo-obscureum* var. *lanceolatum* Pampanini; *Glochidion sinicum* (Gaertn.) (Used in Ayurveda, Unani and Sidha. Ingesting the tubers causes severe poisoning in humans; all parts of this plant, both above and below ground, are extremely poisonous and ingestion could be fatal. The rhizomes contains two alkaloids, colchicine and gloriosine, which cause severe gastroenteritis, vomiting, abdominal pain, severe and bloody diarrhea,

vaginal bleeding, weakness, and possible unconsciousness. Severe hair loss is a consistent symptom of colchicine poisoning. Complete recovery is slow. Rhizomes abortifacient, used to treat boils, intestinal worms, bruises, infertility, skin problem and impotence; tuber paste applied as an antidote in snakebite, and also on eyelids to cure conjunctivitis. Sap from the leaf tip used for pimples and skin eruptions. Roots pounded, mixed with water and dropped in the eye to reduce blindness; root powder rubbed to cure leprosy, snakebite and scorpion sting; roots for wound maggots; root of this plant and the root of *Plumeria rubra* pasted together and the paste given to a woman for complete infertility; dried powdered roots introduced into the mouth of uterus for easy abortion. Tuber cut into pieces mixed with water and dropped into ears for stopping ear pains; tuber ground into paste applied as bandage with leaves of *Calotropis procera* for skin eruptions; tuber paste applied on wound for healing without leaving permanent scar on skin. Root or bulbs for impotency and barrenness. Tubers used for poisoning arrowheads. Veterinary medicine, tuberous roots used in smallpox of cattle and maggot wounds; in insect bite, root decoction given orally and the root extract employed as nasal and ear drops; crushed bulb applied on wound to kill the maggots. Sacred plant, the flowers used for initiating labor pains; flowers in worshipping.)

in English: climbing lily, dragon lily, flame lily, gloriosa, gloriosa lily, glory lily, superb lily, turk's cap

Glossocardia Cass. Asteraceae

From the Greek *glossa* 'a tongue' and *kardia* 'heart', referring to the shape of the ray florets, see *Bull. Sci. Soc. Philom. Paris* 1817: 138. 1817.

Glossocardia bosvallia (L.f.) DC. (*Bidens minuta* Miré & H. Gillet; *Glossocardia linearifolia* Cass.; *Glossocardia setosa* Blatter & Hallberg; *Pectis meifolia* Wall., nom. nud.; *Verbesina bosvallia* L.f., also *boswellia*)

India. Young plants very aromatic, crushed whole plant boiled and the extract used as a drink

See *Species Plantarum* 2: 831–834, 901–903. 1753, *Systema Naturae*, Editio Decima 2: 1189, 1221, 1376. 1759, *Supplementum Plantarum* 379. 1787, *Bull. Sci. Soc. Philom. Paris* 1817: 138. 1817, *Dictionnaire des Sciences Naturelles* [Second edition] 9: 139. 1817, *A Numerical List of Dried Specimens* 3198. 1831, *Contributions to the Botany of India* 19. 1834 and *Journal of the Bombay Natural History Society* 26: 536. 1919, *Journal d'Agriculture Tropicale* 3: 703. 1956, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Kew Bulletin* 45(1): 141–145. 1990, *Compositae Newsletter* 27: 7–10. 1995

(Plant used as emmenagogue, febrifuge, in female complaints; paste of fresh plants applied on sores and wounds. Leaf decoction given in hypertension and as heart tonic; leaf paste for eczema. Veterinary medicine, shoots for ephemeral fevers.)

in India: joraman-dardoo, karumkrunchi, mirgi, parapataka, pitpada, pitpapra, thurakapeechu, seri

Glossonema Decne. Asclepiadaceae

From the Greek *glossa* 'a tongue' and *nema* 'filament, a thread', see *Kew Bulletin* 37(2): 341–347. 1982.

Glossonema boveanum (Decne.) Decne. (*Cynanchum boveanum* Decne.; *Glossonema affine* N.E. Br.; *Glossonema boveanum* Hochst. & Steud. ex Decne.; *Glossonema echinatum* Hochst. ex Di Capua; *Glossonema erlangeri* K. Schum.; *Odontanthera boveana* (Decne.) Mabb.; *Petalostemma chenopodii* R. Br.)

Yemen, Somalia. Perennial herb, ascending, corolla white cream

See *Species Plantarum* 1: 212–213. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 82–3. 1835, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 335, t. 12D. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 555. 1844

(To increase lactation.)

Glossonema boveanum (Decne.) Decne. subsp. **nubicum** (Decne.) Bullock (*Glossonema gautieri* Batt. & Trab.; *Glossonema gautieri* var. *titensis* Batt. & Trab.; *Glossonema nubicum* Decne.)

Egypt, Nigeria. Herb, shrublet, woody-based, erect, spreading, prostrate, creeping rhizome, milky sap, white lilac flowers in sessile cymes, acuminate lanceolate purplish fruits, plant can be eaten raw

See *Species Plantarum* 1: 212–213. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 82–3. 1835, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 335, t. 12D. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 555. 1844 and *Bulletin of Miscellaneous Information Kew* 10: 617. 1956

(Lactation stimulant.)

in Mali: marku djiguini

in Mauritania: achakan, m'gueïle

in Niger: cobbel waynaasse, gänd-báa háwrù, gobbel duroosse

in Nigeria: bafilatana, cakum-cako, cobbel waynaasse, gadoil, gobbel duroosse, taarin-gidaa, tafo ka shamamarka, tatarida

in Senegal: marka digini

Glossonema varians (Stocks) Benth. ex Hook. f. (*Mastostigma varians* Stocks)

Pakistan. Eaten uncooked

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 335, t. 12D. 1838, *Hooker's Icones Plantarum* 9: 863, pl. 863. 1851, *The Flora of British India* 4(10): 16. 1883

(Tonic.)

in Pakistan: shagushak

Glossopetalon A. Gray Crossosomataceae

Greek *glossa* 'a tongue' and *petalon* 'a petal', from petal shape, see *Erythea* 1(10): 206. 1893, *Smithsonian Contributions to Knowledge* 5(6): 29–30, pl. 12, f. B. 1853 and *Die Natürlichen Pflanzenfamilien* 1: 185. 1897 and *Taxon* 42: 697. 1993.

Glossopetalon spinescens A. Gray (*Forsellesia spinescens* (A. Gray) Greene; *Forsellesia spinescens* Greene) (after the Swedish Jacob Henric af Forselles, 1785–1855, mining engineer)

North America.

See *Smithsonian Contributions to Knowledge* 5(6): 29–30, pl. 12, f. B. 1853, *Erythea* 1(10): 206. 1893

(Antibiotic.)

in English: Nevada greasewood

Glossopetalon spinescens A. Gray var. **aridum** M.E. Jones (*Forsellesia arida* (M.E. Jones) A. Heller; *Forsellesia arida* A. Heller; *Forsellesia nevadensis* A. Heller; *Forsellesia nevadensis* (A. Gray) Greene; *Forsellesia nevadensis* Greene; *Forsellesia stipulifera* (H. St. John) Ensign; *Glossopetalon nevadense* A. Gray; *Glossopetalon nevadense* A. Gray var. *stipuliferum* (H. St. John) C.L. Hitchc.; *Glossopetalon stipuliferum* H. St. John)

North America. Perennial subshrub, herb

See *Smithsonian Contributions to Knowledge* 5(6): 29–30, pl. 12, f. B. 1853, *Proc. Amer. Acad. Arts* xi. (1876) 73. 1876, *Erythea* 1(10): 206. 1893, *Contributions to Western Botany* 8: 28. 1898 and *Catalogue of North American Plants North of Mexico* (ed. 2) 7–8. 1900, *Fl. S.-E. Washington* (St. John) 250. 1937, *Amer. Midl. Naturalist* 27: 510. 1942, *Univ. Wash. Publ. Biol.* 17(3): 410. 1961 [*Vasc. Pl. Pacific N.W.* 3: 410. 1961]

(Shrub decoction taken for tuberculosis)

in English: spiny greasebush

Glottidium Desv. Fabaceae (Robinieae)

From the Greek *glottis*, *glottidos*, diminutive of *glotta* 'tongue', referring to the shape of the pods, see *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1(2): 119, pl. 4, f. 1. 1813.

Glottidium vesicarium (Jacq.) R.M. Harper (*Aeschynomene platycarpa* Michx.; *Colutea floribunda* Poir.; *Dalbergia polyphylla* Poir.; *Emerus vesicarius* (Jacq.) Kuntze; *Glottidium floridanum* (Willd.) Desv.; *Glottidium floridanum* var. *atrurubrum* Nash; *Glottidium vesicarium* R.M. Harper; *Glottidium*

vesicarium var. *atrorubrum* (Nash) Small; *Glottidium vesicarium* var. *atrorubrum* Small; *Glottidium vesicarium* var. *sericeum* R.W.S. Fl.* 24(4): 201–250. 1924, *Economic Botany* 12(3): 307–311. 1958, *Man. of Vasc. Fl. of the Carolinas Fabaceae* 569–645. 1968

(Poisonous seeds, toxic to animals, cattle, rabbits and chickens.)

in English: bag-pod, bladder pod, castlebean, coffeebean weed

Gluta L. Anacardiaceae

Latin *gluten*, *inis* 'glue, a connecting tie', *glus*, *utis* 'glue', *glutus*, *a*, *um* or *gluttus*, *a*, *um* 'tenacious, well-tempered, soft', tissues contain a reddish sap which turns black with exposure to the air, see *Mantissa Plantarum* 2: 293. 1771, *Pl. Asiat. Rar.* (Wallich). 1: 9, tt. 11, 12. 1829 and *Botanical Journal of the Linnean Society* 86(4): 375–403. 1983.

Gluta aptera (King) Ding Hou (*Melanorrhoea aptera* King; *Melanorrhoea inappendiculata* King; *Melanorrhoea tricolor* Ridley)

Sumatra.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 487–488. 1896 and *Bull. Misc. Inform. Kew* 1933, 196. 1933, *Blumea*

24(1): 12. 1978, Wong, T.M. *A Dictionary of Malaysian Timbers*. Revised by Lim, S.C. & Chung, R.C.K. Malayan Forest Record No. 30. Forest Research Institute Malaysia Kuala Lumpur. 1982, Lopez, D.T. *Malaysian Timbers—Rengas*. Malaysian Forest Service Trade Leaflet No. 87. The Malaysian Timber Industry Board and Forest Research Institute Malaysia, Kuala Lumpur. 1984, Menon, P.K.B. *Uses of Some Malaysian Timbers*. Revised by Lim, S.C. Timber Trade Leaflet No. 31. The Malaysian Timber Industry Board and Forest Research Institute Malaysia, Kuala Lumpur. 1986

(The white irritant sap turns black on exposure to the air. Due to the poisonous nature of the sap, the timber is not very often exploited. The seasoned timber, however, is quite safe to handle.)

in Indonesia: rengas kerbau jalang, rengas paya, ungan

Gluta beccarii (Engl.) Ding Hou (*Melanorrhoea beccarii* Engl.)

Indonesia.

See *Bot. Jahrb. Syst.* 1(1): 45. 1880 and *Blumea* 24(1): 13. 1978, *Journal of Tropical Ecology* 17(2): 163–175. 2001

(Irritant sap. Rengas poisoning, in the form of acute dermatitis with constitutional symptoms.)

in Indonesia: rengas kerangas, rengas paya

Gluta benghas L.

Java.

See *Mantissa Plantarum* 2: 293. 1771

(Poisoning by the fresh juice of the fruits.)

Gluta coarctata Hook. f. (*Gluta velutina* Blume)

SE Asia. Shrub or tree, branching, young leaves bright reddish-brown, pink flowers, tomentose calyx 2-lobed, warty fleshy fruits

See *Fl. Brit. India* [J.D. Hooker] 2: 22. 1876 [May 1876]

(The wood causes dermatitis; fruits contain a black juice very irritating to the skin; fruits and leaves poisonous, used for criminal purposes.)

in English: rengas tree, Singapore mahogany

in Thailand: rak-nam

Gluta compacta Evrard

Vietnam.

See *Bulletin de la Société Botanique de France* 99(1–3): 84. 1952

(Irritant.)

Gluta curtisii (Oliver) Ding Hou (*Melanorrhoea curtisii* Oliver)

China.

See *Blumea* 24(1): 13. 1978

(The sap causes dermatitis.)

in English: Curtis' rengas

Malay name: rengas

Gluta elegans Hook.f. (*Gluta elegans* (Wallich) Hook.f.; *Gluta elegans* Kurz)

India.

See *Prelim. Rep. Forest Pegu* App. A. p. xli.; App. B. 41, in clavi. 1875, *Fl. Brit. India* [J.D. Hooker] 2: 22. 1876 [May 1876]

(The sap causes dermatitis.)

in English: Penang rengas

Gluta gracilis Evrard

Vietnam.

See *Bulletin de la Société Botanique de France* 99(1–3): 83. 1952

(Irritant.)

Gluta laccifera (Pierre) Ding Hou (*Gluta laccifera* Ding Hou; *Melanorrhoea laccifera* Pierre)

SE Asia.

See *Mantissa Plantarum* 2: 293. 1771, *Plantae Asiaticae Rariores* 1: 9. 1829 [1830], *Bull. Mens. Soc. Linn. Paris* i. (1885) 538. 1885 and *Blumea* 24(1): 14. 1978

(The milky juice is caustic. The acrid juice of *Alocasia macrorrhizos* has been used to combat the caustic effect of the sap of this species.)

Gluta laxiflora Ridley

Borneo.

See *Bull. Misc. Inform. Kew* 1933, 196. 1933

(The fruit juice can cause dermatitis.)

Gluta macrocarpa (Engl.) Ding Hou (*Melanorrhoea macrocarpa* Engl.)

Indonesia.

See *Blumea* 24(1): 14. 1978, *American Journal of Botany* 86(10): 1414–1436. 1999

in Indonesia: kilakap, rengas kerbau jalang

Gluta malayana (Corner) Ding Hou (*Melanorrhoea malayana* Corner; *Melanorrhoea pilosa* Ridley; *Melanorrhoea pilosa* Lecomte)

Malaysia. Tree, inner bark pinkish with black sap, spiral leaves, bisexual flowers in panicles

See *Bull. Soc. Bot. France* 54: 608. 1908 [1907 publ. 1908], *Bull. Misc. Inform. Kew* 1931, 448. 1931, *Gard. Bull. Straits*

Settem. 10: 260. 1939, *Blumea* 24(1): 14. 1978, *Journal of Vegetation Science* 8(1): 105–114. 1997

(This species has been reported to be irritant; vesicant latex.)

Common names: kerbau jalang, Malayan rengas, rengas

Gluta nitida (Lour.) Merr. (*Penaea nitida* Lour.)

Asia, Vietnam.

See *Species Plantarum* 1: 111. 1753, *Flora Cochinchinensis* 1: 72–73. 1790 and *Sunyatsenia* 2(1): 35. 1934, *Transactions of the American Philosophical Society, New Series*, 24(2): 1–445. 1935

(Irritant.)

Gluta oba (Merr.) Ding Hou (*Melanorrhoea oba* Merr.)

Vietnam.

See *J. Straits Branch Roy. Asiat. Soc.* 77: 190. 1917, *Blumea* 24(1): 14. 1978, *The Journal of Ecology* 76(2): 320–340. 1988

(Irritant.)

in Sabah: rengas

Gluta obovata Craib

Thailand. Big canopy tree, bole cylindrical, highly variable leaves, leaf blade thick, wingless fruit

See *Bull. Misc. Inform. Kew* 1926, 362. 1926

(Irritant.)

Gluta papuana Ding Hou

Papua New Guinea.

See *Blumea* 24(1): 14. 1978

(Irritant.)

Common name: hekakoro

Gluta pubescens (Ridley) Ding Hou (*Melanorrhoea pubescens* Ridl.)

Borneo.

See *Fl. Malay. Penin.* i. 530. 1922, *Blumea* 24(1): 15. 1978

(Irritant.)

Common name: kebacar

Gluta renghas L. (*Gluta benghas* Linnaeus)

SE Asia, India.

See *Mantissa Plantarum* 2: 293. 1771, *Monogr. Phan.* 4: 225. 1883 and *Br. J. Pharmacol. Chemother.* 15: 440–7. 1960 [Pharmacological activity of an aqueous extract of the leaves of the Malayan rengas tree *Gluta renghas*.], Beaman J.H. "Allergenic Asian Anacardiaceae." *Clin. Dermatol.* 4: 191–203. 1986

(Poisonous, allergenic and caustic, these trees can cause an acute vesicular dermatitis. The trees release a black sap on their surfaces when damaged, a vesicant latex. The timber from these trees is dangerous to handle. Allergizing and chemically skin-irritating. The smoke of the burning wood can also be dangerous.)

in English: ape nut, East Coast rengas, Wallich's rengas tree

Malayan names: jintun, jitong, rengas, rengas ayer

Gluta rostrata Ding Hou

Sumatra.

See *Blumea* 24(1): 15. 1978

(Irritant.)

Gluta rugulosa Ding Hou

Borneo, Sarawak, Brunei, Sabah, Kalimantan.

See *Blumea* 24(1): 16. 1978

(Irritant.)

Gluta sabahana Ding Hou

Borneo, Sabah.

See *Blumea* 24(1): 16. 1978

(Irritant.)

Gluta speciosa (Ridley) Ding Hou (*Melanorrhoea speciosa* Ridley)

See *Bull. Misc. Inform. Kew* 1933, 197. 1933, *Blumea* 24(1): 21. 1978

(This species is irritant.)

Gluta tavoyana Hook. f.

Burma.

See *Fl. Brit. India* [J.D. Hooker] 2: 22. 1876 [May 1876]

(The sap of this species is irritant.)

Gluta torquata (King) Tard. (*Melanorrhoea torquata* King)

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 486. 1896 and *Adansonia* sér. 2, 1: 195. 1962

(Irritant.)

Common name: rengas

Gluta tourtour Marchand (*Camposperma schatzii* Randrianasolo & J.S. Mill.; *Gluta benghas* L.; *Gluta benghas* var. *turtur* Engl.)

Madagascar. Tree, many-branched, sap watery, white greenish flowers, fruits eaten by pigs

See *Mantissa Plantarum* 2: 293. 1771, *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 65. 1854, *Revision du groupe des Anacardiacees* 187–188. 1869, *Monographiae*

Phanerogamarum 4: 266. 1883 and *Adansonia*, Sér. 3 20(2): 291, f. 2C, 3. 1998

(The sap of this species is irritant.)

in Madagascar: antoro, tontoro, tontorona, tontoronoorhazontontarano, torotoro

Gluta travancorica Bedd.

India, Kerala, Tamil Nadu. Tree, erect, perennial, evergreen, single stemmed, sapwood light reddish-grey, submontane forest

See *Journal of Biogeography* 23(6): 783–789. 1996

(Irritant. Used in Sidha.)

in India: arakkunayaki, arakkunayakimaram, cankarana, cencantanam, cenkarraru, cenkarrutti, cenkotal, cenkotalamaram, cenkuram, cenkuran, cenkurani, cenkurinci, chenkurinji, cenkurunai, cenkurutu, centantu, chenduruny, chenkuruny, malaikkurinca, pavalakkuruntam, pavalakkuruntanceti, pavalakkuruntu, perunkurinci, perunkurinciver, shendurney, shenduruney, shenduruny, shenkuruny, thodappai, totappi

Gluta usitata (Wallich) Ding Hou (*Melanorrhoea usitata* Wall.)

Burma. Tree, deciduous, velvety stout branchlets, hairy simple leaves, white flowers in tomentose panicles, pubescent calyx, reddish fleshy fruit

See *Pl. Asiat. Rar.* (Wallich). 1: 9, t. 11, 12. 1829 and *Blumea* 24(1): 21. 1978

(Sap poisonous. May cause dermatitis and irritation of the mouth nose and throat; the smoke of the burning wood can also be dangerous. The oleoresin used in combination with honey as an anthelmintic in skin diseases.)

in English: black varnish tree, Burma lac tree, Burmese lacquer tree, Burmese varnish tree

in Thailand: hak, hak-luang, ma-ria, rak-yai, su

in Tropical Asia: theetsee, thitsi

Gluta velutina Blume (*Gluta coarctata* Hook. f.)

Malaya.

(The wood causes dermatitis; the fruit and leaves are also poisonous and have been used for criminal purposes.)

in English: rengas ayer, Singapore mahogany, water rengas

Gluta virosa Ridley

Penins. Mal. Red wood

See *J. Straits Branch Roy. Asiat. Soc.* 75: 27. 1917 [Apr 1917]

(This species can produce dermatitis.)

in English: wild buffalo tree

Malayan name: pohun kerbau jalang

Gluta wallichii (Hook. f.) Ding Hou (*Melanorrhoea wallichii* Hook. f.; *Melanorrhoea maingayi* Hook. f.; *Melanorrhoea woodsiana* Scort.)

Indonesia. Large tree, widespread, small bisexual white and red colored flowers borne in great pyramidal clusters, small fruit with 5 very long wings

See *Fl. Brit. India* [J.D. Hooker] 2: 25. 1876 and *Blumea* 24(1): 21. 1978

in Singapore: rengas

Gluta wrayi King

Penins. Malay

(This species is said to be the most virulent of the rengas.)

in English: Straits mahogany

in Singapore: rengas

Glyceria R. Br. Poaceae (Gramineae)

Greek *glykys* 'sweet', referring to the edible grains of *Glyceria fluitans* (L.) R. Br.; similar to *Puccinellia*, see Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae*. 179. 1810, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 393. Ansbach 1852 and *Monocotiledóneas Mexicanas: una Sinopsis Florística* 10: 7–236. 2000, *Contributions from the United States National Herbarium* 48: 371–379. 2003. Some species may cause cyanogenic poisoning in livestock.

Glyceria borealis (Nash) Batch. (*Glyceria borealis* (Nash) A. Nelson, nom. illeg., non *Glyceria borealis* (Nash) Batch.; *Glyceria borealis* (Nash) Piper, nom. illeg., non *Glyceria borealis* (Nash) Batch.; *Glyceria fluitans* var. *angustata* Vasey ex Fernald; *Panicularia borealis* Nash; *Panicularia fluitans* (L.) Kuntze; *Panicularia fluitans* var. *angustata* (Vasey ex Fernald) Vasey ex Farw.)

North America, USA, California, Mexico. Perennial, weak, endangered, herbaceous, sometimes decumbent at the base, often producing adventitious roots from submerged lower nodes, ligule rounded or sharply pointed, panicle branches stiff and erect, grain dark brown, grains worth gathering for food, occurs in wetlands and in meadow habitats, in shallow water or mud of streams, similar to *Glyceria fluitans* (L.) R. Br.,

See *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Herbarium Pedemontanum* 6: 235. 1836, *Revisio Generum Plantarum* 2: 782. 1891, *Proceedings of the Portland Society of Natural History* 2: 91. 1895, *Bulletin of the Torrey Botanical Club* 24(7): 348–349. 1897 and *Proceedings of the Manchester Institute of Arts and Sciences* 1: 74. 1900, Charles Vancouver Piper (1867–1926), *The Flora of the Palouse Region* 27. Washington 1901, *New Manual of Botany of the Central Rocky Mountains* 74. 1909, *Annual*

Report of the Michigan Academy of Science 21: 353. 1920, *Ill. Fl. Pacific States* 1: 211. 1923, *Taxon* 30: 509–511. 1981, *Taxon* 31: 766–768. 1982

(Stimulant, emollient.)

in English: Northern manna grass, small floating manna grass

Glyceria canadensis (Michx.) Trinius (*Briza canadensis* Michx.; *Briza canadensis* Nutt., nom. illeg., non *Briza canadensis* Michx.; *Glyceria canadensis* var. *canadensis*; *Megastachya canadensis* (Michx.) Michx. ex Roem. & Schult.; *Nevroloma canadensis* (Michx.) Raf.; *Panicularia canadensis* (Michx.) Kuntze; *Panicularia canadensis* Kuntze; *Poa canadensis* (Michx.) Torr.)

North America, Canada, USA. Perennial, herbaceous, clumped, open inflorescence, drooping branches, green flower clusters, found in swamps, edge of swampy forests, moist woods, marshes, shores and wet shores, wet woods, lakeshore

See *Flora Boreali-Americana* 1: 71. 1803, *Systema Vegetabilium* 2: 593. 1817, *The Genera of North American Plants* 1: 69. 1818, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 106. 1819, *A Flora of the Northern and Middle Sections of the United States* 1: 112. 1823, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 366. 1830, *Revisio Generum Plantarum* 2: 783. 1891, *Bulletin of the Torrey Botanical Club* 21(1): 37. 1894, *Proceedings of the Portland Society of Natural History* 2: 91. 1895 and *American Journal of Botany* 21(3): 128. 1934

(Roots for menstrual disorders.)

in English: rattlesnake grass, rattlesnake manna grass

Glyceria fluitans (L.) R. Br. (*Desvauxia fluitans* P. Beauv. ex Kunth; *Devauxia fluitans* (L.) P. Beauv. ex Kunth; *Festuca fluitans* L.; *Glyceria fluitans* var. *acutiflora* Döll; *Hydrochloa fluitans* (L.) Hartm.; *Melica fluitans* (L.) Raspail; *Panicularia brachyphylla* Nash; *Panicularia fluitans* (L.) Kuntze; *Poa fluitans* (L.) Scop.)

Temperate regions of the Northern Hemisphere. Perennial, hairless, herbaceous, lowland to montane, loosely tufted or forming loose masses, stoloniferous, stems horizontal then ascendent, erect or spreading, sometimes prostrate or floating at base, auricles absent, leaf sheath closed and papery, ligule acute or rounded on the top, blade folded when young, panicle-like inflorescence loose and spreading or open at anthesis, spikelets 5–14-flowered linear-cylindrical or slightly compressed, glumes unequal, scabrous or minutely scabrid lemmas, palea apex shortly bidentate, foliage relished by the cattle, human food, sweet seed eaten raw or cooked in porridge and soups, a flour from the seed, occasionally cultivated, this grass can cover the surface of ponds or rivers with its stems and its floating leaves, tolerates strongly acid soils, occurs on very wet or boggy soils, in shallow pond margins,

shallow water either stagnant or slow flowing, marshes, open swamps, ponds, on riversides, in soft mud on margins, on alluvial or peat soils,

See *Species Plantarum* 1: 75. 1753, *Flora Carniolica, Editio Secunda* 73. 1772, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Genera Graminum* 8. 1819, *Annales des Sciences Naturelles; Botanique, sér. 5*, 5: 443. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 367. 1833, *Flora Chilena* 6: 390. 1854, *Flora des Grossherzogthums Baden* 1: 170. 1855 [1857], *Revisio Generum Plantarum* 2: 782. 1891, *Bulletin of the Torrey Botanical Club* 24(7): 349–350. 1897 and *New Zealand Journal of Botany* 29: 101–116. 1991

(Ceremonial.)

in English: float grass, floating manna grass, floating meadow grass, floating sweet grass, manna grass, sweet grass, water manna grass, water mannagrass

in French: glycérie flottante, glyceria pliée

in Morocco: bou rokba, gousmir

Glyceria grandis S. Watson (*Glyceria americana* (Torr.) Pammel; *Glyceria arundinacea* Kunth subsp. *grandis* (S. Watson) Tzvelev; *Glyceria flavescens* M.E. Jones; *Glyceria grandis* S. Wats. ex Gray; *Glyceria grandis* f. *pallescens* Fernald; *Glyceria maxima* f. *pallescens* (Fernald) B. Boivin; *Glyceria maxima* subsp. *grandis* (S. Watson) Hultén; *Glyceria maxima* var. *americana* (Torr.) B. Boivin; *Glyceria maxima* var. *grandis* (S. Watson) Breitung; *Panicularia americana* (Torr.) MacMill.; *Panicularia grandis* (S. Watson) Nash; *Poa aquatica* [sensu] Pursh; *Poa aquatica* var. *americana* Torr.)

North America, USA, California, Canada. Perennial, herbaceous, stout, rhizomatous, no auricles, smooth to slightly rough sheaths, ligules blunt, leaves with rough upper surface and a smooth underside, grain dark brown, rare to extremely rare species, native pasture grass, grows in swampy places, in wet areas along lakeshores, shallow water, ditches, lake-margins, freshwater wetlands, shores, bogs and fens, stream-bank, brooksides, meadows and wet meadows, edge habitats, mud of marshes, ponds, lakes

See *Species Plantarum* 1: 67. 1753, *A Flora of the Northern and Middle Sections of the United States* 1: 108. 1823, *A Manual of the Botany of the Northern United States (ed. 6)* 667. 1890, *The Metaspermae of the Minnesota Valley* 81. 1892 and *The Grasses of Iowa* 2: 271. 1905, *Biological Series of the Bulletin of the State University of Montana* 15: 17, t. 2. 1910, *An Illustrated Flora of the Northern United States* 1: 265. 1913, *Botaniska Notiser* 1919: 97. 1919, *Rhodora* 23(274): 231. 1921 [1922], *Man. Grasses U.S.* 865. 1935, *Acta Universitatis Lundensis* 38: 229. 1942, *The Canadian Field-Naturalist* 71(2): 45. 1957, *Le Naturaliste Canadien* 94(4): 524. 1967, *Novosti Sist. Vyss. Rast.* 8: 82. 1971, R. Puls, F.P. Newschwander, J.A. Greenway, "Cyanide poisoning from *Glyceria grandis* S. Wats. ex Gray (tall mannagrass) in a British Columbia beef herd." *Can. Vet. J.* 19: 264–265. 1978

(Cyanogenic potential, an unknown cyanogenic glycoside that can be converted to cyanide in the animal body is found in tall manna grass. This plant has caused sickness and death in a herd of cattle. The amount of cyanogenic potential decreases in the plant later in the season.)

in English: American manna grass, American mannagrass, reed mannagrass, tall manna grass

Glyceria maxima (Hartm.) E. Holmb. (*Catabrosa hydrophila* Link; *Exydra aquatica* (L.) Endl.; *Festuca aquatica* (L.) Mutel; *Glyceria altissima* (Moench) Schloss. & Vuk.; *Glyceria altissima* Garcke; *Glyceria aquatica* (L.) Wahlb., nom. illeg., non *Glyceria aquatica* (L.) J. Presl & C. Presl; *Glyceria spectabilis* Mertens & W.D.J. Koch; *Heleochoa aquatica* (L.) Drejer; *Hydropoa spectabilis* (Mert. & W.D.J. Koch) Dumort.; *Molinia maxima* Hartm.; *Panicularia aquatica* (L.) Kuntze; *Poa aquatica* L.)

Temperate Eurasia, Europe. Perennial, aquatic or semi-aquatic, tall, wide-leaved, glabrous, caespitose, stout stems erect and unbranched, robust, large, rhizomatous with stout creeping rhizomes, dark brown seeds, used as a forage crop, palatable, a nutritious wetland fodder for cattle, vigorous growth, extensive root system, troublesome aquatic weed and aggressive species, has the potential to be a serious invader of wetlands, sometimes forms vast floating mats, a poor food plant and nesting substrate for wetland wildlife, provides shelter for waterbirds and other aquatic organisms, tolerates strongly acid soils, useful for erosion control, suitable for reducing erosion of river banks

See *Species Plantarum* 1: 67. 1753, *Fl. Gothob.* 18. 1820, *Handbok i Skandinavien Flora* 56. 1820, *Flora Excursoria Hafniensis* 40. 1838, *Linnaea* 17(4): 405. 1844, *Flora von Nord- und Mittel-Deutschland* ed. 2 375. 1851, *Bulletin de la Société Botanique de Belgique* 7: 67. 1868, *Revisio Generum Plantarum* 2: 782. 1891 and *Botaniska Notiser* 1919: 97. 1919, *Taxon* 49(2): 255. 2000

(Poisonous due to the presence of smut only in fresh foliage, in Australia and New Zealand cattle poisoning due to cyanide production in the young shoots.)

in English: meadow reed grass, reed manna grass, reed meadow grass, reed sweet grass

Glyceria obtusa (Muhl.) Trinius (*Panicularia obtusa* (Muhl.) Kuntze; *Panicularia obtusa* Kuntze; *Poa obtusa* Muhl.)

Northern America, USA, Canada. Perennial, herbaceous, endangered, cone-like dense inflorescence, branches all point upward, occurs in wet sandy soils, wet woods, swamps, bogs, moist sandy peaty ground

See *Descriptio uberior Graminum* 147. 1817, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles.* 1(4): 366. 1830, *Revisio Generum Plantarum* 2: 763. 1891

(Crushed roots infusion taken as an analgesic, for backache.)

in English: Atlantic manna grass, coastal manna grass, blunt mannagrass

Glyceria striata (Lam.) Hitchc. (*Briza canadensis* Nutt., nom illeg. non *Briza canadensis* Michx.; *Catabrosa nervata* (Willd.) Link; *Glyceria aquatica* subsp. *nervata* (Willd.) Douin; *Glyceria elata* (Nash ex Rydb.) M.E. Jones; *Glyceria michauxii* Kunth; *Glyceria neogaea* Steud.; *Glyceria nervata* (Willd.) Trin.; *Glyceria nervata* var. *rigida* (Nash) Lunell; *Glyceria nervata* var. *stricta* Scribn. ex Hitchc.; *Glyceria rigida* (Nash) Rydb., nom. illeg., non *Glyceria rigida* (L.) Sm.; *Glyceria striata* subsp. *stricta* (Scribn.) Hultén; *Glyceria striata* var. *stricta* (Scribner) Fernald; *Hydropoa nervata* (Willd.) Dumort.; *Panicularia nervata* (Willd.) Kuntze; *Panicularia nervata* f. *major* Millsp.; *Panicularia nervata* f. *stricta* (Scribn.) House; *Panicularia nervata* var. *filiformis* Farw.; *Panicularia nervata* var. *parviglumis* Scribn. & Merr.; *Panicularia nervata* var. *purpurascens* Farw.; *Panicularia nervata* var. *rigida* Nash; *Panicularia nervata* var. *stricta* (Scribn.) Scribn. ex Hitchc.; *Panicularia nervata* var. *viridis* Farw.; *Panicularia rigida* (Nash) Rydb.; *Panicularia striata* (Lam.) A.S. Hitchc.; *Poa lamarkii* Kunth; *Poa lineata* Pers.; *Poa nervata* Willd.; *Poa parviflora* Pursh, nom. illeg., non *Poa parviflora* R. Br.; *Poa striata* Lam.; *Poa striata* Michx., nom. illeg., non *Poa striata* Lam.; *Poa sulcata* Roem. & Schult., nom. illeg., non *Poa sulcata* Lag.)

Northern America, USA, California, Canada, Mexico, Guatemala. Perennial, slender, herbaceous, erect, smooth, densely tufted, clumped or single, shortly rhizomatous, stoloniferous, grain shiny dark brown to reddish, grains large and worth gathering for food, occurs in wetlands and in meadow habitats

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 183. 1791, *Species Plantarum. Editio quarta* 1: 389. 1797, *Flora Boreali-Americana* 1: 69. 1803, *Syn. Pl.* 1: 89. 1805, *Flora Americae Septentrionalis; or, ...* 80. 1814, *Systema Vegetabilium* 2: 550. 1817, *The Genera of North American Plants* 1: 69. 1818, *Révision des Graminées* 1: 118. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Glycosmis Corrêa Rutaceae

Greek *glykys* 'sweet' and *osme* 'smell, odour, perfume, scent', the plants are fragrant, see *Annales du muséum national d'histoire naturelle* 6: 384. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 538. 1824 and *Ceiba* 19(1): 1–118. 1975.

Glycosmis cochinchinensis (Lour.) Pierre (*Glycosmis cochinchinensis* Pierre ex Engl.; *Glycosmis cochinchinensis* var. *contracta* Craib; *Glycosmis parkeri* Narayanaswamy; *Glycosmis parkerii* V. Naray. ex Tanaka; *Glycosmis touranensis* Guillaumin; *Toluiifera cochinchinensis* Lour.)

Indonesia, India.

See *Flora Cochinchinensis* 1: 262. 1790, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 185. 1896 and *Journ. Ind. Bot. Soc.* 1937, xvi. 229. in syn. 1937, *Records of the Botanical Survey of India* 14(2): 52. 1941, *Bulletin de la Société Botanique de France* 91: 216. 1945

(Used in Ayurveda and Sidha.)

in China: shan ju shu

in India: anam, ashvashakota, bannimbu, girgitti, golugu, gongi, gonji, gonjipandu, gunji, gurodagida, guruvade,

guruvede, jangama, jangamma, kattukkonji, kirmira, kondagolugu, konji, kulapanai, malampanal, manikyan, otamadika, panal, pilrupotala, potali, vademadige

Glycosmis macrocarpa Wight (*Glycosmis pentaphylla* var. *macrocarpa* (Wight) Hook. f.)

India. Shrub, flowers in terminal or axillary panicles, petals creamy-yellow

See *Illustrations of Indian Botany* 1: 109. 1840, *The Flora of British India* 1: 506. 1875

(Leaf juice for treating fever, liver complaints, skin diseases, eczema, as vermifuge.)

Glycosmis mauritiana Tanaka (*Glycosmis mauritiana* (Lam.) Tanaka; *Glycosmis pentaphylla* (Retz.) DC.; *Glycosmis pentaphylla* Corrêa; *Limonia mauritiana* Lam.; *Limonia pentaphylla* Retz.)

Mauritius, Indian Ocean.

See *Encycl.* (Lamarck) 3(2): 517. 1792, *Ann. Mus. Natl. Hist. Nat.* vi. (1805) 386. 1805, *Prodr.* (DC.) 1: 538. 1824 and *Bulletin de la Société Botanique de France* 75: 708. 1928

(Root extract for high fever, cough and cold; root paste applied on boils and swellings of toes; roots ground with palm jaggery and turmeric powder taken as abortifacient; roots pounded with pepper and applied on aching tooth. Magico-religious beliefs and performances.)

in India: golugu, guroda gida, guruvaade, jangama, kumana paanu, maanikya beeja, mankali, panal, paparate, paparatte

Glycosmis parviflora (Sims) Little (*Citrus erythrocarpa* Hayata; *Fortunella erythrocarpa* Hayata, nom. nud.; *Glycosmis citrifolia* Lindl.; *Glycosmis citrifolia* (Willd.) Lindl.; *Glycosmis erythrocarpa* (Hayata) Hayata; *Glycosmis parviflora* (Sims) Kurz; *Limonia citrifolia* Willd., not Salisbury; *Limonia parviflora* Sims)

China, Vietnam. Perennial, tree or shrub

See *Species Plantarum* 2: 782–783. 1753, *Species Plantarum*, Editio Secunda 554. 1762, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 448. 1809, *Botanical Magazine* 50: pl. 2416. 1823, *Transactions of the Horticultural Society of London* 6: 72. 1826, *Journal of Botany, British and Foreign* 5: 40. 1876 and *Journal of the Washington Academy of Sciences* 5(5): 165–168. 1915, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 6: 13. 1916, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 8: 14. 1919, *Phytologia* 2(11): 463. 1948

(Antifungal, antibacterial, cytotoxic.)

in English: Chinese glycosmis, flower axistree

in China: xiao hua shan xiao ju

in Japan: hana-shinbô-gi

Malayan name: nerapi

Glycosmis pentaphylla (Retz.) DC. (*Glycosmis arborea* DC.; *Glycosmis arborea* (Roxb.) DC.; *Glycosmis chylocarpa* Wight & Arn.; *Glycosmis cochinchinensis* auct.; *Glycosmis cochinchinensis* Pierre ex Engl.; *Glycosmis pentaphylla* Groff, nom. illeg.; *Glycosmis pentaphylla* Corrêa; *Glycosmis pentaphylla* (Retz.) Correa; *Glycosmis quinquefolia* Griff.; *Limonia arborea* Roxb.; *Limonia pentaphylla* Retz.; *Myxospermum chylocarpum* (Wight & Arn.) M. Roem.)

Himalaya, Papua New Guinea, India. Shrub or treelet, very small tree, erect, unarmed, compound leaves, small creamy white flowers in axillary and terminal panicles, small translucent purplish pink glandular fruits with juicy spicy flesh, flowers and fruits born in large clusters, ripe fruits eaten raw

See *Species Plantarum*, Editio Secunda 554. 1762, *Observationes Botanicae* 5: 24. 1789, *Plants of the Coast of Coromandel* 1: 60, pl. 85. 1795, *Annales du muséum national d'histoire naturelle* 6: 384, 386. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 538. 1824, *Prodr. Fl. Ind. Orient.* 1: 93. 1834, *Not. Pl. Asiat.* 4: 495. 1854, *FBI* 1: 499. 1875, *Nat. Pflanzenfam.* [Engler & Prantl] iii. IV. 185. 1896 and *Lingnaam Agricultural Review* 2(1): 21. 1924

(Used in Ayurveda and Sidha. Antitumor alkaloid, hepatoprotection. Plant used for cough, rheumatism, anemia, jaundice. Stem bark paste applied to cure rheumatic pain; pounded bark applied on wounds; wood used in snake-bite. Root decoction taken against fever and stomachache; poultice of roots of *Glycosmis pentaphylla* and *Sida acuta* applied on mumps; root paste to cure cold, cough, asthma; root powder for deworming in children; a decoction of roots of *Dillenia indica* with roots of *Glycosmis pentaphylla* and *Litsea monopetala* given in biliousness. Crushed fruits and cumin decoction in the treatment of dysentery; pounded seeds given with hot water in cholera. Leaves used in fever, liver complaints and as vermifuge; pounded in coconut oil rubbed on the body as renovating; leaf paste applied for gout, eczema, skin diseases and swellings; a paste of leaves and ginger used to cure eczema and skin affections; leaf extract taken for piles; leaves and flowers made into a paste consumed with *ghee* for gastric complaints. Larvicidal, insecticide, insect repellent, against mosquitoes. Magico-religious beliefs, leafy twigs used to keep off evil spirits.)

in English: gin berry, Jamaica mandarine orange, orange-berry, village rue

in Cambodia: dom phlang

in China: shan xiao ju

Europe, Asia, China. Perennial non-climbing herb, shrub, suffrutescent, root bark dark brown, root wood yellow-tan, flowers yellow-orange

See *Species Plantarum* 2: 741–742. 1753, *Descriptiones et Icones Plantarum Rariorum Hungariae* 1: 20, pl. 21. 1800, *Nova Genera et Species Plantarum* (quarto ed.) 6: 511–513, pl. 600. 1823 [1824], *Diagnoses plantarum orientalium novarum*, ser. 1, 1(2): 28–32. 1843, *Diagnoses plantarum orientalium novarum*, ser. 2, 3(2): 22–23. 1856, *Soc. Mose.* 2: 564, 1866, *Flora Orientalis* 2: 202. 1872 and *Feddes Repertorium* 83(9–10): 633. 1972 [1973], *Acta Botanica Boreali-Occidentalia Sinica* 5: 149–154. 1985, *Current Science* 54: 45–47. 1985, *Anales del Jardín Botánico de Madrid* 45: 259–266. 1988, *Botanicheskie Materialy Gerbariia Instituta Botaniki Akademii Nauk Uzbekskoi SSR* 2: 51–68. 1989, *Bulletin of Botanical Research* 9(1): 31–32. 1989, *Caryologia* 43: 223–234. 1990, *Bulletin of Botanical Research* 11(3): 45–53. 1991, *Advances in Plant Taxonomy in Northwest China* 1: 7–24, 101–107. 1992, *Bulletin of Botanical Research* 13(1): 24, f. 1. 1993

(Used in Ayurveda. Roots and rhizomes demulcent, expectorant and antiinflammatory, anti-hepatotoxic, anti-viral and anti-bacterial, memory enhancer and mental rejuvenator, used for sore throats, throat congestions, coughs, respiratory disorders and tuberculosis, peptic ulcers, liver diseases and abdominal aches, gastric hyposecretion, cough, skin inflammation, food poisoning, boils.)

in English: common licorice, drop, licorice, licorice powder, licorice-root, liquorice, liquorice plant, Spanish juice-root, Spanish juice-wood, Spanish liquorice, sweetwood

in Italian: liquirizia, regolizia

in South Africa: soethout

in India: anti-maduram, athimathuram (for the liquorice of commerce), athimathurappal, ati-maduram, atimaduram, atimaduramu, jalayashti, jashti-madhu, jashti-madhukam, jashtimadh, jastimadhu, jathimadh, jestamaddu, jethi-madh, jeshti-madh, klitaka, kuba susa, madhuka, madhusrava, madhuyashti, madhuyashtika, mithilakdi (root), mulathee, mulatthi, muleti, mulhatti, neelipushapa, rasayani, sthalayashti, yashti-madhu, yashti-madhukam, yashtika, yashtimadhu, yashtimaduka, yashtirasakrya, yastho-madhu, yashtyawa

in Pakistan: khawasdar

in Tibetan: shing-mngar

in Arabic: arab essous, 'areq sous, el-irkasus, erq essous, oud essous, sous

Glycyrrhiza lepidota Nutt. ex Pursh (*Glycyrrhiza glutinosa* Nutt. ex Torr. & A. Gray; *Glycyrrhiza glutinosa* Nutt.; *Glycyrrhiza lepidota* Nutt.)

North America. Perennial non-climbing herb

See *Flora Americae Septentrionalis*; or, ... 2: 480. 1814[1813], *A Flora of North America*: containing ... 1(2): 298. 1838 and *Phytologia* 15(6): 329–446. 1976, *Phytologia* 38(6): 483–497. 1978, *Taxon* 31(2): 344–360. 1982, *Uzbekskii Biologicheskii Zhurnal* 1: 36–39. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Caryologia* 43: 223–234. 1990

(Roots and rhizomes used for sore throats, gastric hyposecretion, cough, skin inflammation, food poisoning, boils.)

in English: American licorice, Nuttall's licorice, wild licorice

Glycyrrhiza uralensis Fisch. (*Glycyrrhiza asperrima* L.f. var. *desertorum* Regel; *Glycyrrhiza asperrima* var. *uralensis* (Fisch. ex DC.) Regel; *Glycyrrhiza asperrima* var. *uralensis* Regel; *Glycyrrhiza glandulifera* Ledeb.; *Glycyrrhiza shiheizensis* X.Y. Li; *Glycyrrhiza uralensis* Fisch. ex DC.)

Russia, China, Mongolia. Perennial non-climbing herb, subshrub, glandular, erect, woody in the lower part, roots brownish yellow cylindrical fibrous, short hairy leaves alternate imparipinnate, stipules lanceolate, inflorescence axillary, flowers purplish, calyx villous, fruit a flat oblong pod densely hairy, on sunny slopes, dry grassland

See *Species Plantarum* 2: 741–742. 1753, *Supplementum Plantarum* 330. 1781, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 248. 1825, *Flora Rossica* 1: 566. 1842 and *Acta Botanica Boreali-Occidentalia Sinica* 5: 149–154. 1985, *Current Science* 54: 45–47. 1985, *Bulletin of Botanical Research* 9(1): 29. 1989, *Grassland of China [Zhongguo caoyuan]* 4: 53–60. 1989, *Syst. Bot.* 14(1): 20–23. 1989, *Botanicheskie Materialy Gerbariia Instituta Botaniki Akademii Nauk Uzbekskoi SSR* 2: 51–68. 1989, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 118–120. 1990, *J. Hunan Agric. Coll.* 11(2): 166–170. 1991, *Chinese Traditional and Herbal Drugs* 22(9): 417–418. 1991, *Bulletin of Botanical Research* 11(3): 45–53. 1991, *Advances in Plant Taxonomy in Northwest China* 1: 7–24. 1992, *Botaničeskij Žurnal* (Moscow & Leningrad) 79(2): 135–139. 1994

(Roots and rhizomes used for sore throats, gastric hyposecretion, cough, skin inflammation, food poisoning, boils; a treatment for lung disease, especially fever of lungs; treats laryngitis, small red bumps in throat, excessive thirst, and nervousness.)

in English: Chinese licorice, Manchurian licorice, Ural licorice

in China: gan cao, kan tsao

in Tibet: shing-mngar, shing ngar (= sweet wood)

Glyphaea Hook.f. Malvaceae (Tiliaceae)

From the Greek *glypho*, *glyphein* 'to carve, engrave', *glyphe* 'carving', *glyphis* 'notches, grooves, pen-knife', referring to the grooved fruits, see *Icones Plantarum* 8: sub t. 760. 1848.

Glyphaea brevis (Spreng.) Monachino (*Capparis brevis* Spreng.; *Glyphaea grewioides* Hook.f. ex Planch.; *Glyphaea grewioides* Hook.f.; *Glyphaea lateriflora* (G. Don) Hutch. & Dalziel; *Glyphaea lateriflora* Hutch. & Dalziel; *Grewia lateriflora* G. Don)

Tropical Africa. Shrub or small tree, climber, straggling, spreading, slash pink, yellow flowers, ribbed fruits

See *Mantissa Prima Florae Halensis* 43. 1807, *A General History of the Dichlamydeous Plants* 1: 549. 1831, *Icon. Pl.* 4: t. 760. 1848 and *Flora of West Tropical Africa* [Hutchinson & Dalziel] ed. 1 1: 239. 1927, *Kew Bull.* 1928, 229. 1928, *Phytologia* 2: 484. 1948, *Willdenowia* 21: 233–238. 1991

(Fruit, juice and root vermifuge, analgesic, aphrodisiac, for venereal diseases, indigestion. Leaves antidote, diuretic, vermifuge, applied to sores and ulcers; the juice from the leaves used for stomach and venereal discharges, gonorrhoea. A solution from the roots for chest complaints. Fruit pulp insecticide, arachnicide. Root arrow poison. Magic. Veterinary medicine.)

in Central African Republic: mokiba

in Congo: otitimbe

in Nigeria: oghemota; atori (Yoruba); itolon (Ijaw); uwenrhiontan (Edo); anyasu, alo (Igbo); ndodido (Efik); ndorido (Ibibio)

in Senegal: bola pâne, keng, mbarambaram

in Sierra Leone: bulontokawari, domba bondue, gbala, gbondo-kpokwe, ma lunto, mba belei, niki guii

in Yoruba: ore ewoo, atori

in Zaire: amabulubulu

Gmelina L. Lamiaceae (Labiatae, Verbenaceae)

To honor the German botanist and geographer Johann Georg Gmelin, 1709–1755 (d. Tübingen), [he was the uncle of Johann Friedrich Gmelin, 1748–1804, and brother of Philipp Friedrich Gmelin, 1721–1768; Leopold Gmelin (1788–1853) was the third and youngest son of Johann Friedrich Gmelin], traveller, naturalist, explorer, from 1733 to 1743 took part in the Imperial Scientific Expedition to eastern Siberia with the historian Gerhard Friedrich Müller and the astronomer Louis Delisle de la Croyère, 1749–1755 professor of botany and chemistry at the University of Tübingen. See Carl Linnaeus, *Species Plantarum*. 626. 1753 and *Genera Plantarum*. Ed. 5. 274. 1754 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 56. 1965, Emil Bretschneider, *History of European Botanical Discoveries in China*. 809–811. [Reprint of the original edition 1898.] Leipzig 1981, Vladislav Kruta, in *D.S.B.* 5: 427–429. 1981, Claude K. Deischer, in *D.S.B.* 5: 429–432. 1981, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 113–114. 1988, R. Zander, F. Encke, G. Buchheim

and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 293. 1993.

Gmelina arborea Roxb. (*Gmelina arborea* Roxb. ex Sm.; *Gmelina arborea* var. *canescens* Haines; *Gmelina arborea* var. *glaucescens* C.B. Clarke; *Gmelina rheedei* Hook., nom. illeg.; *Gmelina sinuata* Link)

Pakistan, China, Malesia. Tree, deciduous, unarmed, young parts tomentose, cordate trinerved yellowish-green leaves with two large laminar glands where the leaf stalk joins the blade, corolla brownish-yellow, calyx campanulate with small triangular teeth, green yellow drupes, fruits eaten, twigs and leaves fodder for cattle, fast-growing

See *Species Plantarum* 2: 626. 1753, *The Cyclopaedia*; or, universal dictionary of arts, ... 16: *Gmelina* 4. 1810, *Hortus Bengalensis*, or a catalogue ... 46. 1814, *Plants of the Coast of Coromandel* 3: 41–42, t. 246. 1815, *Enum. in Vietnam: tu h[us] philippin, tu h[us] l[as] b[aws]c t[is]m

Gmelina uniflora Stapf (*Gmelina uniflora* var. *villosa* Bakh.)

Borneo. Climber

See *Hooker's Icones Plantarum* 24: t. 2391. 1895 and *Bull. Jard. Bot. Buitenzorg*, III, 3: 66. 1921

(Crushed stem decoction drunk to ease labor pain during childbirth.)

in Borneo: akar engkeleh

Gnaphalium L. Asteraceae

Greek *gnaphallion*, *gnaphalon*, *knaphallon* 'soft down', referring to the habit of the plant; Latin *gnaphalium*, *ii* or *gnaphalion*, *ii* 'cudweed, cotton-grass' (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 850–857. 1753, *Genera Plantarum*. Ed. 5. 368. 1754, *Abhandlungen der königlichen Böhmischen Gesellschaft der Wissenschaften* ser. 5. 8(Gesch.): 52. 1854 and *Taxon* 44: 611–612. 1995, *Fl. Venez. Guayana* 3: 177–393. 1997.

Gnaphalium glandulosum Klatt

Chile, Peru.

See *Linnaea* 42: 129. 1878

(Leaves infusion against cough.)

in Chile: wira-wira

Gnaphalium lacteum Meyen & Walp. (*Gnaphalium argyrolepis* Phil.; *Gnaphalium frigidum* Wedd.)

Chile.

See *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19: 276. 1843, *Chloris Andina* 1(4–6): 147, t. 24a. 1855[1856], *Anales del Museo Nacional de Chile. Primera Sección* — *Zoología* 8: 46. 1891

(Leaves infusion against cough.)

in Chile: wira-wira blanca

Gnaphalium polycaulon Pers. (*Gnaphalium indicum* L.; *Gnaphalium multicaule* Willd., nom. illeg.; *Gnaphalium multicaule* Lam.; *Helichrysum indicum* (L.) Grierson)

India. Procumbent herb, soil binder, leaves eaten, herb as cattle feed

See *Species Plantarum* 1: 852. 1753, *Encyclopédie Méthodique, Botanique* 2(2): 743. 1786[1788], *Species Plantarum*. Editio quarta 3(3): 1888. 1803, *Synopsis Plantarum* 2: 421. 1807 and *Notes from the Royal Botanic Garden, Edinburgh* 31(1): 128. 1971, *Nucleus* 18: 6–19. 1975, *J. Cytol. Genet.* 33(2): 201–205. 1998

(Leaf paste in pulmonary troubles.)

Gnaphalium trinerve Forst. f. (*Anaphalioides trinerve* (Forst. f.) Anderb.)

South America.

See *New Zealand J. Bot.* 15: 17–18. 1977, *Opera Bot.* 104: 101. 1991

(Crushed and applied to contusions, sprains, sores.)

Gnaphalium viravira Molina (*Gnaphalium vira-vira* Molina)

Chile.

See *Saggio sulla Storia Naturale del Chili ...* 149, 354. 1782

(Plant decoction to treat bronchial troubles. Crushed and applied to contusions, sprains, sores.)

in Chile: hierba de la diuca, hierba de la vida, vira-vira

Gnetum L. Gnetaceae

From the word *gnemon*, see *Systema Naturae*, ed. 12 2: 612, 637. 1767, Bertoloni, Antonio (1775–1869), *Disquisitio de quibusdam plantis novis, etc.* Bononiae, 1832, *Dissertatio de quibusdam novis plantarum speciebus et de bysso antiquorum.* Bononia, 1832, Blume, K.L. *De novis quibusdam plantarum familiis expositio et olim jam expositarum enumeratio.* Lugduni Batavorum. (Quarto edition). 1833 and Cheng Ching-yung. *Gnetaceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 490–504. 1978.

Gnetum africanum Welw.

Trop. Africa to Angola. Evergreen climbing plant, small oval reddish seeds, rainforest

See *Trans. Linn. Soc. London* 27: 73. 1869 and *Food Chemistry* 64(4): 489–493. 1999, *Pakistan Journal of Nutrition* 6(1): 40–43. 2007

(Leaf and seed effective in the treatment of enlarged spleen, sore throat, cathartic, antidotes to some forms of poison and snakebite. Seed fungicide, for septic wounds. Stem abortifacient; leaves and stem purgative and tonic.)

in Nigeria: afang, ajakobale, eruru, okazi, ukazi

Gnetum buchholzianum Engl.

Tropical Africa. Herbaceous climber, liana, vine, leaves cooked as a spinach

See *Flora of Tropical Africa* 6(2): 331. 1917

(Leaves and stem tonic.)

in Cameroon: eru, kale

Gnetum cuspidatum Blume (*Gnemon cuspidata* (Blume) Kuntze; *Gnetum longispica* Ridl.; *Gnetum neglectum* Blume var. *macrostachyum* Blume; *Gnetum neglectum* var. *procerum* Blume; *Gnetum penangense* Ridl.)

Vietnam, New Guinea.

See *Rumphia* 4: 5–6. 1849 and *J. Straits Branch Roy. Asiat. Soc.* 60: 62–63. 1911

(Yaws in children, applied externally.)

Malay name: asam anyang

Gnetum edule (Willd.) Blume (*Gnemon edulis* (Blume) Kuntze; *Thoa edulis* Willd.)

India. Roasted seed edible

See *Species Plantarum* 4: 477. 1805, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 1: 161. 1834, *Abhandlungen der Naturforschenden Gesellschaft zu Halle* 231. 1866, *Revisio Generum Plantarum* 2: 796. 1891

(Seeds to give strength to the body. Dart poison.)

in India: karimkodi

Malay names: blay kechil, blay merah

Gnetum funiculare Brongn. (*Gnetum scandens* Roxb., nom. superfl.)

India.

See *Fl. Ind.* ed. 1832, 3: 518. 1832

(Leaves as fish poison.)

Gnetum gnemon L. (*Gnetum acutatum* Miq.; *Gnetum acutatum* Markgr., nom. illeg.; *Gnetum brunonianum* Griff.; *Gnetum vinosum* Elmer) (from a Moluccan name, *ganema*)

Papua New Guinea. Erect tree or shrub, dioecious, evergreen, twigs swollen at nodes, smooth crooked bole, drooping branches, broadly elliptic acuminate coriaceous leaves, unisexual flowers in green cylindrical catkins, ripe fruits pinkish, orange-red to scarlet seeds, tender young leaves used as vegetable, ripe fruits eaten roasted or fried

See *Systema Naturae*, ed. 12 2: 637. 1767, *Mant. Pl.* 125. 1767, *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 3: 251, 588. 1861, *FBI* 5: 641. 1888 and *Leaflets of Philippine Botany* 7: 2673. 1915, *Blumea* 13: 404. 1966, *Fl. Males.* 6: 947. 1972, *Regnum Veg.* 127: 50. 1993

(Leaf paste antiperiodic, applied on abdomen for menstrual disorders and also on the cuts of snakebite.)

in English: dwarf gnemon tree, gnemon tree

in China: guang zhuang mai ma teng

in India: amih, amih hittuh, han-thu

Malayan names: belinjau, cheperai, dagun puteh, ekor belangkas, meliling, meninjau, minjau, pantat ulat, sokak, songkok, sugi-sugi

in the Philippines: bago

Gnetum latifolium Blume (*Abutua indica* Lour.; *Gnemon latifolia* (Blume) Kuntze; *Gnetum indicum* (Lour.) Merr.; *Gnetum philippinense* Foxw.; *Gnetum philippinense* Warb.)

India, Papua New Guinea. Large evergreen climber, liana, woody vine, swollen base, fruits pink to orange

See *Flora Cochinchinensis* 630. 1790, *Tijdschr. Natuurl. Gesch. Physiol.* 1: 160, 162. 1834, *Revis. Gen. Pl.* 2: 796. 1891 and *Monsunia*, *Beiträge zur Kenntniss der Vegetation des Süd- und Östasiatischen Monsungebietes* 1: 196. 1900, *Philippine Journal of Science* 6: 175. 1911, *Interpr. Rumph. Herb. Amboin.* 77. 1917, *Flora Malesiana* 4: 336–347. 1954

(Fruits used against opium poisoning.)

Gnetum macrostachyum Hook.f.

Indochina, Malesia, New Guinea.

See *Fl. Brit. India* 5: 642. 1888

(Stem tonic.)

in Sabah: kokos, sapang

Gnetum montanum Markgraf

Himalaya, SE Asia, Vietnam. Liana, large woody climber, evergreen, flattened and twisted stems, flowers in green cylindrical catkins, reddish orange edible fruits

See *Hortus Bengalensis*, or a catalogue ... 66. 1814 and *Phil. J. Sci.* 7: 413–415. 1912, *Bull. Jard. Bot. Buitenzorg*, III, 10(4): 466. 1930, *Phytochemistry* 58(4): 591–594. 2001, *Fitoterapia* 73(1): 40–42. 2002, *Planta Medica* (70)(2): 160–165. 2004

(Stems and leaves boiled with those of *Albizia* and *Garuga*, poultice applied to boils and swellings. Roots and stems anti-periodic, antioxidative, for the treatment of bronchitis and arthritis, blood circulation. Fish poison.)

in China: mai ma teng

in India: tukap

Gnetum parvifolium (Warburg) W.C. Cheng (*Abutua indica* Lour.; *Gnemon indica* (Lour.) Kuntze; *Gnetum indicum* (Lour.) Merr.; *Gnetum indicum* f. *parvifolium* (Warburg) Masamune; *Gnetum montanum* f. *megalocarpum* Markgr.; *Gnetum montanum* Markgraf f. *parvifolium* (Warburg) Markgraf; *Gnetum scandens* Roxburgh var. *parvifolium* Warburg)

China to Indochina.

See *Monsunia* 1: 196. 1900, *Interpr. Herb. Amboin.* 77. 1917, *Bull. Jard. Bot. Buitenzorg*, III, 10: 468. 1930, *Acta Phytotax. Sin.* 9: 386. 1964

(Used for the treatment of bronchitis and arthritis. Antioxidative activity.)

in China: xiao ye mai ma teng

Gnetum scandens Roxb.

India. Dioecious climber, oblong leaves, flowers in spikes

See *Hortus Bengalensis*, or a catalogue ... 66. 1814 and *Phil. J. Sci.* 7: 413–415. 1912

(Stems and root antiperiodic. Fish poison.)

in India: navarukatte

Gnetum tenuifolium Ridl.

Thailand, Sumatra.

See *J. Straits Branch Roy. Asiat. Soc.* 59: 188. 1911

(Root decoction as a postpartum remedy. For delayed menses, seeds are eaten.)

Malay names: serapat akar, telinak

Gnetum ula Brongn. (*Gnetum pyriformium* Miq. ex Parl., nom. inval.)

India. Liana, dioecious, swollen joints, spiny fibrous seed coats, roasted seeds eaten, edible oil from kernels

See *Sp. Pl.*, ed. 4 [Willdenow] 4(1): 477. 1805, *Voy. Monde, Phan.* [7]: 12. 1829, *Prodr. (DC.)* 16(2.2): 350. 1868, *Annales du Jardin Botanique de Buitenzorg* 11: 211, t. 18, f. 7, 10. 1893

(Antiperiodic. Oil from kernels used in rheumatism.)

in India: anapendu, anlaso, kaadu dodda amrutha balli, kaadu kamballi, kodkamballi, lollori, lollorimaal, makad-gamgoli, mahulolendi, mullan valli, odal, peioda, peiodal, ula

Gnidia L. Thymelaeaceae

Latin Gnidus, Gnidius, Cnidus, Cnidos, a city built on the promontory of Triopion, in Caria, Asia Minor; the temple of Aphrodite contained a beautiful statue of the goddess by Praxiteles; Cnidus was one of the six cities of the Dorian Hexapolis; see *Species Plantarum* 1: 358. 1753, *Familles des Plantes* 2: 285. 1763, *Flora* 21(2): 602–603. 1838, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 1: 356, 359. 1843, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 395. Ansbach 1852, *Bull. Soc. Bot. France* 40: 75–76. 1893, *Annales des Sciences Naturelles; Botanique*, sér. 7, 17: 203–204. 1893, *Bot. Jahrb. Syst.* 19(2): 274. 1894, *Die Natürlichen Pflanzenfamilien* 3(6a): 230, f. 81A-E. 1894 and *Bibliotheca Botanica* 27(111): 135. 1934, *Journal of South African Botany* 10: 63–65. 1944, *Notulae Systematicae.* *Herbier du Museum de Paris* 13: 44. 1947, *Fl. South Africa. Small perennial suffrutescent, herbaceous, many erect stems, dense heads of bright yellow flowers at the ends of the branches, individual flowers narrowly tubular

See *Species Plantarum* 1: 358. 1753, *Flora* 21: 602. 1838, *Hooker's Journal of Botany and Kew Garden Miscellany*

2: 552–553, (*London J. Bot.*, err. typ. 452–453). 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 596. 1857, *Plantae tinneanae* sive descriptio plantarum in ... 39–40, pl. 19B. 1867, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19(2): 268–269. 1894, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 206. 1896 and *Flora of Tropical Africa* 6(1): 232–234. 1910, *Journal of the Linnean Society, Botany* 40: 187. 1911, *Transactions of the Royal Society of South Africa* 5(4): 425. 1916, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 545. 1920, *Die Vegetation der Erde* 9: 636. 1921, *A Manual of the Flowering Plants and Ferns of the Transvaal* 1: 207. 1926, *Fl. Trop. E. Africa, Thymelaeaceae*: 29–30. 1978, *Strelitzia* 14: 928–935. 2003, *Fl. Zambesiaca* 9: 108. 2006

(Plant/roots very poisonous to animals, toxic to humans. Flowering parts for skin diseases, bronchitis, yellow fever. The smoke of burnt and ground fresh roots together with those of *Excoecaria grahamii* Stapf inhaled to treat hallucinations. Roots purgative, to treat snakebite and sore throat. Root to kill fishes.)

in English: yellow heads

in Zambia: kalumbwamalela, kanchense, katupe, nakambuti, sisila

in Zimbabwe: chiao

Gnidia kraussiana Meisn. var. *kraussiana* (*Gnidia hoepfneriana* Gilg; *Gnidia hoepfneriana* Vatke ex Gilg; *Lasiosiphon hoepfnerianus* Vatke ex Gilg; *Lasiosiphon hoepfnerianus* (Vatke ex Gilg) H. Pearson; *Lasiosiphon kraussianus* (Meisn.) Burttt Davy; *Lasiosiphon kraussianus* var. *villosus* Burttt Davy; *Lasiosiphon kraussii* Meisn.; *Lasiosiphon kraussii* (Meisn.) Meisn.)

From Sudan to South Africa. Perennial herb, suffrutescent, erect to semi-prostrate, woody rootstock, leaves hairy or hairless, bright yellow flowers narrowly tubular, *Brachystegia* woodland, grassland, savanna, grassy meadow

See *Species Plantarum* 1: 358. 1753, *Flora* 21: 602. 1838, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 552–553, err. typ. “452–453”. 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(2): 596. 1857 and *A Manual of the Flowering Plants and Ferns of the Transvaal* 1: 207. 1926, *Strelitzia* 14: 928–935. 2003

(Exceedingly poisonous. Flowering parts for skin diseases, bronchitis, yellow fever. Root used as an arrow poison; young leaf and flowering tip a fish poison.)

in East Africa: dedende, ilulwi, lunyafinyi, utuha

Gnidia latifolia (Oliv.) Gilg (*Arthrosolen latifolius* Oliv.; *Gnidia vatkeana* Engl. & Gilg; *Lasiosiphon hildebrandtii* Vatke ex Engl., nom. nud.; *Lasiosiphon latifolius* (Oliv.) Brenan; *Lasiosiphon vatkeana* (Engl. & Gilg) H. Pearson)

Tanzania. Stem light brown, smooth, petals white-grey

See *Transactions of the Linnean Society of London, Botany* 2: 348. 1887, *Abhandlungen der Königlich Akademie der Wissenschaften in Berlin* 2: 310. 1891[1892], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19(2): 267. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 283. 1895 and *Flora of Tropical Africa* 6(1): 228. 1910, *Kew Bulletin* 4(1): 93. 1949, *Webbia* 24(1): 365. 1969, *Fl. Trop. E. Africa, Thymelaeaceae*: 29–31. 1978

(Used as a purgative, poisonous in large doses.)

Gomortega Ruiz & Pav. Gomortegaceae

Named for Casimiro Gómez de Ortega 1740–1818, Madrid Botanical Garden 1771–1801, his writings include *Tratado de la naturaleza y virtudes de la cicuta*. Madrid 1763, *De laudibus Caroli III. Hispaniarum Regis carmina*. Bononiae 1759, *Tabulae Botanicae*. Matriti 1773 and *Resumen historico del primer viaje hecho al rededor del mundo*. Madrid 1769. See *Saggio sulla Storia Naturale del Chili ...* 186, 352. 1782, *Florae Peruviana, et Chilensis Prodromus* 62. t. 10. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 1: 108. 1798, *Syn. Pl.* (Persoon) 1: 467. 1805, *Berichte der Deutschen Botanischen Gesellschaft* 14: 232. 1896 and J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 33 and 2: 62. 1965, *Gayana, Bot.* 42: 1–157. 1985.

Gomortega keule (Molina) Baill. (*Adenostemum nitidum* (Ruiz & Pav.) Pers.; *Adenostemum nitidum* Bertero, nom. illeg.; *Adenostemum nitidum* Pers.; *Gomortega keule* I.M. Johnst.; *Gomortega keule* (Molina) I.M. Johnst.; *Gomortega keule* (Molina) Baill.; *Gomortega keule* (Molina) Gunckel; *Gomortega nitida* Ruiz & Pav., nom. illeg.; *Lucuma keule* Molina)

Chile. Evergreen tree, aromatic resinous leaves, green flowers, edible shiny yellow fruits

See *Saggio sulla Storia Naturale del Chili ...* 187. 1782, *Syst. Veg. Fl. Peruv. Chil.* 1: 108. 1798, *Syn. Pl.* (Persoon) 1: 467. 1805, *Mercurio Chileno* 12: 557. 1829, *Fl. Nat.* 17(197): 6. 1972 [*Mus. Nac. Hist. Nat. Not. Mens.* (Chile)], *Gayana, Bot.* 58(2): 133–137. 2001

(Fresh fruits narcotic, intoxicating when eaten in excess. Leaves acid-astringent.)

in Chile: hualhual, keule

Gomphandra Wallich ex Lindley Icacinaceae (Stemonuraceae)

From the Greek *gomphos* ‘a nail, pin, peg, club’ and *aner*, *andros* ‘male, stamen’, referring to the swollen anthers; see John Lindley, *A natural system of botany*. Second edition,

with numerous additions and corrections, and a complete list of genera, with their synonyms. 439. London 1836 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15(2): 238. 1940.

Gomphandra affinis Mast.

India.

See *The Flora of British India* [J.D. Hooker] 1: 586. 1875

(Root decoction as a postpartum remedy.)

Malay name: taring pelandok

Gomphandra salicifolia Ridl. (*Stemonurus salicifolius* (Ridl.) R.A. Howard)

India.

See *Journal of the Straits Branch of the Royal Asiatic Society* 82: 176. 1920, *Journal of the Arnold Arboretum* 21(4): 469. 1940

(Leaves decoction as a postpartum remedy.)

Malay name: ekor bukit derimba

Gomphocarpus R. Br. Asclepiadaceae (Apocynaceae)

Greek *gomphos* ‘a nail, pin, peg, club’ and *karpos* ‘fruit’; see R. Brown, “On the Asclepiadeae.” *Memoirs of the Wernerian Natural History Society*. 1: 37. Edinburgh 1811, *Nat. Pflanzenfam.* [Engler & Prantl] 4(2): 236. 1895.

Gomphocarpus fruticosus (L.) W.T. Aiton (*Asclepias abyssinica* (Decne.) N.E. Br.; *Asclepias albida* N.E. Br.; *Asclepias angustifolia* Schweigg.; *Asclepias cornuta* (Decne.) (Mildly poisonous. Decoction of all parts for stomach trouble and insect stings. Leaves against pulmonary tuberculosis.)

in English: cotton milkbush, firesticks, fruticose gomphocarpus, milkweed, narrow-leaved cotton bush, shrubby milkweed, swan bush, swan plant, wild cotton

in Portuguese: planta de seda

in Kenya: muvungu

in Madagascar: fanorona, fanory, sipoapoaky, tapoaky, fandemy, tandemy, poaka, matsivina

in Rwanda: gasaho

in Somalia: du-fe-oh

in South Africa: gansies, melkbos, tontelbossie, tonteldoosbos, wild swans, blaasoppies, vleiklapper, wilde kapok, kapokbos, kapok melkbossie, tontelbos, wildegaring, katoenbossie

in S. Rhodesia: muSasa

in China: ding tou guo

Gomphocarpus integer (N.E. Br.) Bullock (*Asclepias integra* N.E. Br.)

Kenya. Woody based bush, milky sap, narrow leaves, yellow flowers, corona creamy white, beaked elongated fruits, pods greenish yellow and purple spotted when young

See *Species Plantarum* 1: 214–217. 1753, *Bulletin of Miscellaneous Information Kew* 1895: 219. 1895 and *Kew Bulletin* 1952: 408. 1952

(Mildly poisonous.)

Gomphocarpus physocarpus E. Mey. (*Asclepias brasiliensis* (E. Fourn.) Schltr.; *Asclepias denticulata* Schltr.; *Asclepias physocarpa* (E. Mey.) Schltr.; *Asclepias physocarpus* Schltr.; *Asclepias semilunata* (A. Rich.) N.E. Br.; *Gomphocarpus*

brasiliensis E. Fourn.; *Gomphocarpus fruticosus* (L.) W.T. Aiton forma *brasiliensis* (E. Fourn.) Briq.; *Gomphocarpus semilunatus* A. Rich.)

Tropical and southern Africa. Shrub, herbaceous, vine-shrub like, milky latex, branched, leaves opposite or whorled, flowers yellowish in stalked umbels, corona pale pink, fruits bristly inflated bladders, fruit inflated with long stiff hairs, seeds with stalkless parachutes, in swamp, moist soils

See *Species Plantarum* 1: 214–217. 1753, *Hortus Kewensis*; or, a catalogue ... The second edition 2: 80. 1811, *Commentariorum de Plantis Africae Australioris* 202. 1838, *Flora Brasiliensis* 6(4): 203. 1885, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21(Beibl. 54): 8. 1896 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(7): 21. 1900, *Mededeelingen van's Rijks-Herbarium* 29: 12. 1916

(Cultivated for medicine. Poisonous to sheep.)

in English: balloon cotton bush, balloon plant, bindweed, milkweed, pocket-fruit gomphocarpus, wild cotton

in Ecuador: bolsas de adán

in Honduras: huevos de gringo

in East Africa: chepkuinaba, chepkuinka, en-daguletti, enura, gasaho, kafumba, kashaho, lubotobondwi, mufumbo, mukangarithi, mwania, namatu, oluwondwe-wondwe, yapiringuet

in Southern Africa: balbossie, melkbos, wilde kapok; leretela-ntja (Sotho); qomantenetu (Zulu)

in China: dun ding tou guo

Gomphocarpus stenophyllus Oliv.

East Africa, Tanzania. Herbaceous shrub, stem greenish with white latex, very narrow fruit greenish to brown

See *Transactions of the Linnean Society of London* 29(3): 110, t. 119. 1875

(Mildly poisonous. Leaves, stem and roots for diarrhea, venereal diseases.)

in Tanzania: endakuieti

Gomphostemma Wallich ex Bentham Lamiaceae (Labiatae)

Greek *gomphos* 'a nail, pin, bolt, articulation' and *stemma* 'a crown, wreath, garland', see *Numer. List* [Wallich] n. 2151. 1829, *Edwards's Bot. Reg.* 15: t. 1292. 1830 and *J. Soc. Trop. Agric.* 10: 277. 1938.

Gomphostemma crinitum Wall. ex Benth. (*Gomphostemma crinitum* Wall.; *Gomphostemma crinitum* var. *griffithii* Prain)

China, Malaysia.

See *Plantae Asiaticae Rariores* 2: 12. 1830, *Numer. List* [Wallich] n. 2159. 1830 and *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 74: 724. 1908

(Swellings in the groin, pound the leaves with camphor and poultice. Roots a wash after confinement.)

in English: longhair gomphostemma

in China: chang mao zhui hua

Malayan names: derita dapor, jenjulong bukit, menjulong bukit, mumjulong bukit

***Gomphostemma leptodon* Dunn**

China, Vietnam.

See *Notes Roy. Bot. Gard. Edinburgh*. 8: 170. 1913

(Used for scalds and burns.)

in English: slendertooth gomphostemma

in China: xi chi zhui hua

***Gomphostemma melissifolium* Wall. ex Benth.** (*Gomphostemma melissifolium* Wall.; *Prasium melissifolium* Roxb.; *Prasium melissifolium* Wall. ex Benth.; *Prasium melissifolium* (Wall. ex Benth.) Roxb.)

Nepal. Scandent or prostrate herbs, slender, grooved, scabrous, flowers in dense axillary whorls, toothed calyx, corolla lanceolate

See *Hort. Bengal.* 45. 1814, *Plantae Asiaticae Rariores* 2: 12. 1830, *Numer. List* [Wallich] n. 2157. 1830, *Flora Indica* ed. 1832, 3: 26. 1832

(Leaf paste applied on sore due to long contact of the skin of hand and feet with water.)

in India: dekaishing

***Gomphostemma microdon* Dunn**

China, Vietnam.

See *Notes Roy. Bot. Gard. Edinburgh*. 8: 170. 1913

(A remedy for pneumonia, bronchitis, nephritis, urinary tract infections and urolithiasis.)

in English: smalltooth gomphostemma

in China: xiao chi zhui hua

Gomphrena L. Amaranthaceae

Latin *gomphus*, *i* ‘a nail, peg’, Greek *gomphos* ‘a nail, pin, peg, articulation’, Sanskrit *jāmbha-* ‘a tooth’, Akkadian *gab’u* ‘point, tooth’, Anglo-Saxon *camb*, English *comb*. Plinius used *gromphaena*, *ae* for a kind of amaranth, possibly *Amaranthus tricolor* L.; see Carl Linnaeus, *Species Plantarum*. 1: 224–225. 1753 and *Genera Plantarum*. Ed. 5. 105. 1754 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2):

478–518. 1937, *Fieldiana, Bot.* 24(4): 143–174. 1946, *Ceiba* 19(1): 1–118. 1975, *Taxon* 27: 375–392. 1978, *Fieldiana, Bot.*, n.s. 13: 142–180. 1983.

***Gomphrena celosioides* Mart.** (*Gomphrena celosioides* fo. *villosa* Suesseng.; *Gomphrena decumbens* Jacq.; *Gomphrena decumbens* fo. *albiflora* Chodat & Hassl.; *Gomphrena decumbens* fo. *albiflora* Chodat; *Gomphrena decumbens* fo. *aureiflora* Chodat; *Gomphrena decumbens* fo. *roseiflora* Chodat & Hassl.)

South America, Brazil. Herb, decumbent, ascending, shaggy branches, flowers in axillary and terminal cylindrical or subglobose inflorescence, fodder

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 4: 41–42, pl. 482. 1804, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibitentia Ephemerides sive Observationes Historias et Experimenta* 13(1): 301–302. 1826, *Revisio Generum Plantarum* 2: 545. 1891 and *Fl. Il. Entre Ríos*. 6(3): 160–203, 251–291. 1987

(Whole plant decoction used for regulating fertility; roots and shoots for piles. Roots chewed in cough.)

in Paraguay: perdudilla

in India: javalada malle, neeru bogada banta, neervada malle, nela rudraakshi hoo

***Gomphrena globosa* L.**

India. Mucilage in flowers

See *Species Plantarum* 1: 224. 1753

(Plant infusion drunk for whooping cough. Flowers tea or infusion for children with oliguria, heat. Leaf tea diuretic, for hypertension, cough, diabetes; leaves paste for body sore; leaf juice applied on the wound or cut for relief from pain.)

in English: bachelor’s button, globe amaranth

in Bali: bungan ratna

in China: gian ri hong, pai jih hung

in India: parbosente

in Indonesia: bunga kancing, bunga tiga bulan (= three month flower)

in Japan: sen-ni-kô

in Okinawa: bobojiik

in Hawaii: bozu, lehua, lehua mau loa, lehua pepa, leihua

in Nigeria: kandiri

***Gomphrena pulchella* Mart.** (*Gomphrena haenkeana* Mart.; *Gomphrena perennis* var. *rosea* (Griseb.) Stuchlik; *Gomphrena pulchella* fo. *grandifolia* Stuchlik; *Gomphrena pulchella* fo. *linearifolia* Stuchlik; *Gomphrena pulchella* subfo. *grandifolia* Stuchlik; *Gomphrena pulchella* subfo. *parvifolia* Stuchlik; *Gomphrena pulchella* subvar.

pseudocristata Stuchlik; *Gomphrena pulchella* var. *ecristata* Chod.; *Gomphrena pulchella* var. *haenkeana* (Mart.) Suess.; *Gomphrena pulchella* var. *rosea* Stuchlik; *Gomphrena rosea* Griseb.; *Xeraea haenkeana* (Mart.) Kuntze; *Xeraea pulchella* (Mart.) Kuntze)

Argentina.

See *Novorum Actorum Academia Caesareae Leopoldinae-Carolinae Germanicae Naturae Curiosorum* (1): 302. 1826, *Revisio Generum Plantarum* 2: 545. 1891 and *Bulletin de la Société Botanique de Genève* (2me sér.) 18: 293. 1926, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 478–518. 1937, *Mitt. Bot. Staatssamml. München.* 2(14/15): 178–249. 1956, *Darwiniana* 14: 430–462, 1 lám. 1967

(Diuretic, emollient, purgative.)

Gomphrena serrata L. (*Amaranthoides decumbens* (Jacq.) M. Gómez; *Gomphrena bicolor* Mart.; *Gomphrena decumbens* Jacq.; *Gomphrena decumbens* Lag., nom. illeg.; *Gomphrena decumbens* fo. *albiflora* Chodat & Hassl.; *Gomphrena decumbens* fo. *roseiflora* Chodat & Hassl.; *Gomphrena decumbens* var. *carinata* Suess.; *Gomphrena decumbens* var. *genuina* Stuchlik, nom. inval.; *Gomphrena decumbens* var. *grandifolia* Stuchlik; *Gomphrena dispersa* Standl.; *Gomphrena ixiamensis* Rusby; *Gomphrena perennis* fo. *simplex* Stuchlik; *Gomphrena perennis* subsp. *pseudodecumbens* Stuchlik; *Xeraea decumbens* (Jacq.) Kuntze)

South America.

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 4: 41–42, pl. 482. 1804, *Revisio Generum Plantarum* 2: 545. 1891, *Anales del Instituto de Segunda Enseñanza de la Habana* 2: 313. 1896 and *Bull. Herb. Boiss.* 2: 389. 1903, *Bulletin of the New York Botanical Garden* 6(22): 502. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 11: 153, 156–157. 1912, *Contributions from the United States National Herbarium* 18(3): 91–92. 1916, *Repertorium Specierum Novarum Regni Vegetabilis* 39: 8. 1935

(Plant decoction given in fever.)

Gonatanthus Klotzsch Araceae

Greek *gony* ‘joint, knee’ and *anthos* ‘flower’, alluding to the spathe; see D.H. Nicolson, “Derivation of aroid generic names.” *Aroideana*. 10: 15–25. 1988.

Gonatanthus pumilus (D. Don) Engl. & K. Krause (*Arum sarmentosum* Fisch. ex C.Y. Wu & H. Li, nom. nud.; *Caladium pumilum* D. Don; *Caladium sarmentosum* Kunth; *Colocasia pumila* Kunth; *Colocasia pumila* (D. Don) Kunth; *Gonatanthus sarmentosus* Klotzsch; *Remusatia garrettii* Gagnep.; *Remusatia pumila* (D. Don) Heng Li & A. Hay)

Nepal to Indochina. Creeping on tree trunks

See *Species Plantarum* 2: 964. 1753, *Prodromus Florae Nepalensis* 21. 1825, *Meletemata Botanica* 18. 1832,

Icon. Pl. Rar. Horti. Berol. 1: 33, t. 14. 1841, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 40. 1841 and *Das Pflanzenreich* IV. 23E (Heft 71): 19, f. 5, A-K. 1920, *Notulae Systematicae*. *Herbier du Museum de Paris* 9(3): 138. 1941, *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Flora Reipublicae Popularis Sinicae* 13(2): 63. 1979, *Acta Botanica Yunnanica* Suppl. 5: 27–33. 1992, *Immunol. Invest.* 24(5): 845–855. 1995, *Phytochemistry* 40(2): 449–455. 1995, *Bangladesh Journal of Plant Taxonomy* 8(2): 19–34. 2001, Govaerts, R. & Frodin, D.G. *World Checklist and Bibliography of Araceae (and Acoraceae)*. Kew. 2002 [as *Remusatia pumila*.], Dhuna, V. et al. “Characterization of a lectin from *Gonatanthus pumilus* D. Don having anti-proliferative effect against human cancer cell lines.” *Protein Pept. Lett.* 14(1): 71–78. 2007

(A paste from rhizome rubbed on the chest for chest pain. For wounds in humans and animals, juice from crushed leaves applied as an antibiotic. Mitogenic potential towards human peripheral blood lymphocytes. Veterinary medicine, stem ground into a paste and mixed with food and fed to cattle as germicide.)

in India: tsungrem longtong, tsungremlongtong

Gongronema (Endlicher) Decne. Asclepiadaceae (Apocynaceae)

Greek *gongros* ‘a swelling or excrescence on trees, tubercle’ and *nema* ‘a thread, filament’, see *Genera Plantarum* 595. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 624. 1844.

Gongronema latifolium Benth. (*Marsdenia glabriflora* Benth.; *Marsdenia latifolia* (Benth.) K. Schum.; *Marsdenia latifolia* K. Schum.; *Marsdenia leonensis* Benth.; *Marsdenia racemosa* K. Schum.)

Nigeria. Annual creeping, hard cone-shaped pointed follicles

See *Niger Flora* [W.J. Hooker]. 455–456. 1849, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 147. 1893 and *Botanischer Jahresbericht* 26(1): 372. 1900, *J. Zhejiang Univ. Sci. B.* 8(5): 352–358. 2007

(Stem, leaves and fruits antibacterial, laxative, hypoglycemic, antiinflammatory, hypolipidemic and antioxidative, anthelmintic, a good source of protein, for arthritic pains, mouth sores. Leaves laxative, stomachic, tonic, vermifuge, appetite stimulant, used in the preparation of peppery diets for nursing mothers. Twigs for high fever and convulsions in little children.)

in Nigeria: arokeke, utazi

Gongronema napalense (Wallich) Decaisne (*Gongronema napalense* (Wall.) Decne.; *Gongronema napalense* Decne.; *Gymnema napalense* Wallich)

Nepal, Himalaya. Glabrous twining shrubs or undershrubs, ovate sepals, yellow corolla, slender follicles

See *Prodromus Florae Novae Hollandiae* 461–462. 1810, *Tentamen Florae Napalensis Illustratae* 49–50, pl. 38. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 624. 1844

(Latex applied on skin diseases; adaxial surface of the leaf applied on boils for expulsion of pus and as an antiseptic. Decoction of all parts used for the treatment of leucorrhoea, blenorrrhea and traumatic injury.)

in English: Nepal gongronema

in China: qian guan teng

in India: yagshong

Gonioma E. Meyer Apocynaceae

From the Greek *gonia* ‘angle, corner’, referring to the corona or to the follicles which grow out at right angles, see Meyer, Ernst Heinrich Friedrich (1791–1858), *Commentariorum de Plantis Africae Australioris: quas per octo annos collegit observationibusque manuscriptis illustravit Joannes Franciscus Drège*. Vol.1, fasc.1–2. Lipsiae: Apud Leopoldum Voss, 1835–1837.

Gonioma kamassi E. Mey. (*Gonioma kamassi* var. *brachycarpa* E. Mey.; *Tabernaemontana camassi* Eckl.; *Tabernaemontana camassi* Regel; *Tabernaemontana kamassi* Eckl.)

S. Africa.

See *Species Plantarum* 1: 210–211. 1753, *S. A. Quart. Journ.* 1: 371. 1830, Regel, Eduard August von (1815–1892), *Catalogus plantarum quae in horto Aksakoviano coluntur*. [St. Petersburg], 1860 and *Biochem. J.* 6(1): 127–129. 1912, *J. Pharm. Pharmacol.* 13: 268–278. 1961 [Some observations on the curarising activity of *Gonioma kamassi* E. Mey.], *Genetica* 68: 3–35. 1985, *Wageningen Agricultural University Papers* 97(2): 1–124. 1997

(Occupational dermatitis. Irritation of the eyes and nose, asthma, and also constitutional symptoms.)

in English: East London boxwood, Knysna boxwood, South African boxwood

Goniothalamus (Blume) Hook.f. & Thomson Annonaceae

From the Greek *gonia* ‘angle, corner’ and *thalamos* ‘the base of the flower’, alluding to the receptacle; see *Flora Javae* 28–29: 71. 1830, J.D. Hooker and Thomas Thomson (1817–1878), *Flora Indica: being a systematic account of the plants . . .* [Hooker f. & Thomson] 105. 1855 and Sinclair, J. “A revision of the Malayan Annonaceae.” *Gardens’ Bulletin*

Singapore 14(2): 149–362, 445–446. 1955, *Bot. Zhurn.* (Moscow & Leningrad) 59(4): 551–552. 1974, Christophe Wiart, “*Goniothalamus* Species: A Source of Drugs for the Treatment of Cancers and Bacterial Infections?” *Evidence-based Complementary and Alternative Medicine (eCAM)* 4(3): 299–311. 2007.

Goniothalamus amuyon (Blanco) Merr. (*Goniothalamus amuyon* Merr.; *Polyalthia sasakii* Yamam.; *Uvaria amuyon* Blanco; *Unona cauliflora* Blanco)

Taiwan, Philippines. Shrub or small tree, smooth thin fibrous and strongly aromatic bark, leaves coriaceous, flowers usually solitary axillary, outer petals yellow-green, inner petals fleshy, in forests

See *Species Plantarum* 536. 1753, *Flora Javae Anonac.* 68. 1830, *Flora de Filipinas* 463. 1837 and *Philippine Journal of Science* 10(4): 264. 1915, *Icones plantarum formosananarum nec non et contributiones ad floram formosanam.* 3: 38–39, t. 2. 1927

(Cytotoxic. Fruit stomachic and antidote for poison. Extracts of the seeds used for the treatment of edema, sores, scabies, inflammations and rheumatism.)

in Philippines: amuyon, amuyong, sagiat

Goniothalamus andersonii J. Sinclair

Borneo.

See *Gard. Bull. Singapore* 18: 98. 1961, *Phytotherapy Research* 15(8): 681–686. 2001

(Immunosuppressive and antiinflammatory. Insect repellent.)

Goniothalamus dolichocarpus Merr.

Borneo. Small tree

See *Journal of the Straits Branch of the Royal Asiatic Society* 85: 183. 1922

(Young leaves chewed and swallowed for the treatment of stomachache and diarrhea. Magic, ritual, a piece of bark burned for protection by evil spirits.)

in Sarawak: bihidieng

Goniothalamus donnaiensis Finet & Gagnepain (*Goniothalamus donnajensis* Finet & Gagnep.)

China.

See *Bull. Soc. Bot. France* 53 (Mém.) 4(2): 121. 1906, *Phytochemistry* 46: 327–331. 1997, *J. Nat. Prod.* 61: 86–88. 1998, *Phytochemistry* 49: 769–775. 1998

(Bark used for traumatic injury and fractures.)

in China: tian fang gu

Goniothalamus giganteus Hook.f. & Thomson

SE Asia, Thailand. Tree, leaves oblong, flowers axillary undulate like waves, scent sweet and very strong, carpels elongate rusty tomentose, in forests

See *Experientia* 44(1): 83–85. 1988, *J. Nat. Prod.* 52: 1371–1373. 1989, *Experientia* 46: 539–541. 1990, *J. Nat. Prod.* 55: 1655–1663. 1992, *Bioorg. Med. Chem.* 4(8): 1271–1279. 1996, *Phytochemistry* 49(3): 761–768. 1998

(Acetogenins cytotoxic, antimetabolic and insecticide, comparable to the activity of rotenone against yellow fever mosquito larvae. Roots abortifacient. Leaves febrifuge, and a decoction of the roots given as a postpartum remedy.)

in Malaysia: dedanum, galang hutan, penawar hitam

in Thailand: paanan chaang

Goniothalamus macrophyllus (Blume) Hook.f. & Thoms. (*Goniothalamus macrophyllus* (Blume) Miq.; *Polyalthia macrophylla* (Blume) Blume; *Unona macrophylla* Blume)

Malaya, Sumatra, Java, Borneo. Small tree or shrub, single arched stem, flowers from branches, weakly fragrant fusiform leathery solitary axillary bisexual flowers borne along the side of the stem, spreading thickened waxy tepals, elongate glabrous several-seeded fruits, in humid forest

See *Phytochemistry* 11(6): 2025–2030. 1972, *Malayan Nature Journal* 43(4): 267. 1990

(Abortifacient. Leaves febrifuge; a decoction of the roots given as a postpartum remedy, used externally for colds, in fevers and typhoid fevers. The smoke used to repel mosquitoes, snakes and wild animals.)

in Brunei: limpanas putih, linpanas puteh, talipanas puteh

in Malaysia: akar beranak gajah, gajah beranak, lada hutan, mempisang, penawar hitam

Goniothalamus scortechinii King

Malaysia. Small tree

See *Journ. As. Soc. Beng.* lix. (1892) II. 77. 1892

(Antibacterial. A decoction given as a postpartum protective remedy.)

in Malay: akar gajah beranak (= climber of the elephant bringing forth), daun pelah besar

Goniothalamus sesquipedalis (Wall.) Hook. f. & Thomson (*Guatteria sesquipedalis* Wall.)

India.

See *Plantae Asiaticae Rariores* 3: t. 266. 1832, *Flora Indica* or Descriptions of Indian plants. 2(1): 108. 1855

(Leaf paste applied in toothache; fresh leaves decoction drunk for belly pain.)

in India: leikhham, sakamri

Goniothalamus tapis Miq.

Malaysia. A shrub or small tree, leaves coriaceous, axillary flowers solitary or paired sweet-scented, sepals green tinged purple, carpels elongate tomentose, in forest

See *Fl. Ned. Ind., Eerste Bijv.* 3: 371. 1861 and *International Journal of Crude Drug Research* 27(2): 92–94. 1989, *Folia Malaysiana* 2(2): 89. 2001

(Roots used as abortifacient during early months of pregnancy; for stomachache chew the roots and swallow the juice. An infusion of the roots used to treat typhoid fever, diarrhea and stomachache. Bark used as a mosquito repellent. Magic, ritual, a piece of bark burned for protection from evil spirits and ghosts.)

in Malaysia: galai, gertimang, kenarak, tongkat bumi

in Sarawak: gertimang, kulit serbah, lukai

in Thailand: bu ngaa lam chiak, chi-no-koh, naara

Goniothalamus tenuifolius King

Perak, Malaysia. Tree

See *Journ. As. Soc. Beng.* lxi. (1892) II. 71. 1892 and *Arch. Pharm. Res.* 29(3): 199–202. 2006

(Cytotoxic, antimalarial alkaloids, free radical scavengers from the leaves. Roots cut into small pieces and boiled, the decoction is taken to treat stomachache, wounds infected during childbirth and also diarrhea. The leaves and twigs are burnt during heavy storm to get rid of evil spirits.)

in Malaysia: midur

in Thailand: panan kee meaw

Goniothalamus umbrosus J. Sinclair

SE Asia.

See *Mutation Research/Genetic Toxicology and Environmental Mutagenesis* 562(1–2): 91–102. 2004

(Abortifacient, anticancer. Widely used as a postpartum decoction or in abortion. Goniothalamine, a styrylpyrone derivative from *Goniothalamus umbrosus* and other Annonaceae species, has been shown to have anticancer and apoptosis-inducing properties against various human tumor and animal cell lines.)

in Malaysia: kenerak

Goniothalamus velutinus Airy Shaw

Borneo. A small tree, young shoots rusty, leaves oblanceolate papery rusty, cauliflorous, in mixed dipterocarp forest, on upper slopes and ridges

See *Bull. Misc. Inform. Kew* 286. 1939, *Phytochemistry* 11(6): 2025–2030. 1972, *Sabah Society Journal* 8(3): 366–372. 1987

(Warding off snakes, bad spirits and dangerous animals. Twigs used as a mosquito repellent.)

in Brunei: linpanas hitam, talipanas hitam

in Malaysia: kayu tas, limpanas, selokai

Gonocaryum Miq. Icacinaceae (Cardiopteridaceae)

From the Greek *gonia* 'angle, corner' and *karyon* 'a nut', referring to the seeds, see *Flora van Nederlandsch Indië* 3: 343. 1861 [Dec 1861], *Genera Plantarum* 1: 353. 1862.

Gonocaryum calleryanum (Baill.) Becc. (*Gonocaryum diospyrosifolium* Hayata; *Phlebocalymna calleryana* Baill.)

Malaysia, Philippines.

See *Adansonia* 9: 147. 1869, *Malesia Raccolta* ... 1: 123, in obs. 1877 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 2: 106–107. 1912

(Plant stomachic. Veterinary medicine, smoke of the burning flowers or fruits for hunting-dogs.)

in China: tai wan qiong lan

in Philippines: ampaleng, bitotu, busigan, duhatduhatan, gozzang kalinga, karasoko, lunas, malagozzan, malaikmo, malaikmo lalaki, malapandakaki, malapinggan, malasamat, malatapai, maragauak, maragaued, rog-rogso, saling bato, taingang babui, uratan, yaya

Gonocaryum lobbianum (Miers) Kurz (*Gonocaryum lobbianum* Kurz; *Gonocaryum lobbianum* Pierre; *Gonocaryum maclurei* Merr.; *Phlebocalymna lobbiana* (Miers) Mast.; *Platea lobbiana* Miers)

India, China.

See *Bijdragen tot de flora van Nederlandsch Indië* 646. 1825[1826], *Annals and Magazine of Natural History*, ser. 2 10: 110. 1852, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 39(2): 72. 1870, *The Flora of British India* 1(3): 590. 1875, *Fl. Forest. Cochinch.* fasc. xvii. sub t. 268. 1892 and *Philippine Journal of Science* 21(4): 348. 1922

(Roots astringent, for skin diseases, disinfectant.)

in China: qiong lan

Gonostegia Turcz. Urticaceae

From the Greek *gonia* 'angle' and *steges*, *stegos* 'roof, shelter', referring to the achenes; see P.K.N.S. Turczaninow (1796–1863), *Bulletin de la Société Impériale des Naturalistes de Moscou*. 19(2): 509. 1846.

Gonostegia hirta (Blume ex Hassk.) Miq. (*Driessenia sinensis* H. Léveillé; *Gonostegia hirta* (Blume) Miq.; *Memoralis hirta* (Blume) Wedd.; *Memoralis hirta* (Blume ex Hassk.) Wedd.; *Pouzolzia hirta* Blume ex Hasskarl, non Swartz; *Pouzolzia hirta* (Blume) Blume ex Hassk.; *Pouzolzia quin-*

quenervis Benn.; *Urtica hirta* Blume, nom. illeg., non *Urtica hirta* Sw.; *Urtica hirta* Sw.)

SE Asia, India to China and Japan. Herb, monoecious, erect, scrambling or drooping, woody at base, reddish, flowers in male or bisexual clusters, male flowers pedicellate, female flowers subsessile to sessile, ribbed perianth, fodder for pigs, in grasslands, disturbed habitats

See *Species Plantarum* 2: 983–985. 1753, *Flora Indiae Occidentalis* 1: 285. 1797, *Bijdragen tot de flora van Nederlandsch Indië* 495. 1825, *Verh. Natuurl. Gesch. Ned. Overz. Bezitt., Bot. Kruiddk.* 251. 1844, *Catalogus Plantarum in Horto Botanico Bogoriensi Culturarum Alter* 80. 1844, *Bulletin de la Société Impériale des Naturalistes de Moscou* 19(2): 509. 1846, *Archives du Muséum d'Histoire Naturelle* 9: 415. 1856–1857, *Annales Museum Botanicum Lugduno-Batavi* 4: 303. 1868–69, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 235. 1869 and *Repertorium Specierum Novarum Regni Vegetabilis* 11: 494. 1913, *Cell and Chromosome Research* 12: 22–29. 1989

(Root juice for constipation and burning sensation during urination; a poultice of the roots applied to bruises; root paste applied on cuts and wounds and for chest pain. A treatment for boils and bone dislocations and fractures. Leaves eaten to cure a severe cough or sore throat; crushed leaves applied to ulcers, ring worm and skin diseases. An infusion of the whole plant drunk by children suffering from atrophy and indigestion.)

in China: nuo mi tuan

in India: ashok, chiplay, memynsleh, thezouts

in Nepal: aaichuli

in Papua New Guinea: chol, gogo

in Vietnam: thu[oos]c d[of]ji l[oo]ng

Gonostegia pentandra (Roxb.) Miq. (*Gonostegia pentandra* var. *akoensis* (Yamam.) Masam.; *Gonostegia pentandra* var. *hypericifolia* (Blume) Masam.; *Memoralis pentandra* (Roxb.) Benn.; *Pouzolzia pentandra* var. *hypericifolia* (Blume) Masam.; *Urtica pentandra* Roxb.)

SE Asia, India, Philippines. Herb, monoecious, creeping, erect branches, whitish tinged pink flowers in bisexual clusters in the upper leaf axils, broadly winged perianth, in humid forest and along watersides

See *Flora Indica*; or, descriptions of Indian Plants 3: 583. 1832, *Plantae Javanicae Rariores* 64, 66, pl. 14. 1838, *Museum Botanicum* 2: 242. 1857, *Annales Museum Botanicum Lugduno-Batavi* 4: 302–303. 1868–1869, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 235. 1869 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 1: 26–27. 1925,

Journal of the Society of Tropical Agriculture 3: 392. 1931, *Journal of the Society of Tropical Agriculture* 3: 114. 1941

(Insecticide, insect repellent. A decoction of the whole plant taken as an emmenagogue and diuretic. Ground fresh leaves used topically on abscesses and as an antiinflammatory. A decoction taken as a blood purifier.)

in China: wu rui nuo mi tuan

in Thailand: khop cha naang, yaa non taai

in Vietnam: thu[oos]c d[of]i ng[ux] h[uf]ng

Gonystylus Teijsm. & Binn. Thymelaeaceae

From the Greek *gony* 'joint, knee' and *stylos* 'a style', referring to the angled style, see *Botanische Zeitung*. Berlin 20(32): 265. 1862, *Annales des Sciences Naturelles; Botanique*, sér. 7, 17: 245–247. 1893 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12(112): 233–234. 1934, *Kew Bulletin* 2(1): 9–10. 1947, *Kew Bulletin* 5(1): 145. 1950, *Fl. Vit. Nova* 2: 576–592. 1981, *Tree Fl. Sabah & Sarawak* 5: 433–484. 2004.

Gonystylus maingayi Hook.f.

Malaysia. Trees, bole fluted at base, inner bark with silky fibers, spiral leaves with translucent gland dots, flowers in terminal inflorescences, ovoid capsule with thick woody walls, seeds partially covered with orange aril

See *The Flora of British India* [J.D. Hooker] 5(8): 200–201. 1886 [Aug 1886]

(Roots decoction as a postpartum remedy.)

Malay name: gelugor tawar, ramin pipit

Gonzalagunia Ruiz & Pav. Rubiaceae

For Padre Francisco Gonzales Laguna, botanist and member of the Academy called *Amantes* (or *Amigos*) *del País*.

Gonzalagunia rudis (Standl.) Standl. (*Duggena rudis* Standl.; *Gonzalagunia acutifolia* Rusby)

Panama, Costa Rica to Peru.

See *Flora Peruviana, et Chilensis Prodromus* 12, t. 3. 1794 and *Contributions from the United States National Herbarium* 18(3): 125. 1916, *Journal of the Washington Academy of Sciences* 17(7): 170. 1927

(Used as a snakebite cure.)

in Panama: usiburnu puruiwat

Goodenia Smith Goodeniaceae

In honor of the Rev. Samuel Goodenough, 1743–1827 (Worthing, Sussex), Bishop of Carlisle from 1808 onwards,

amateur botanist, in 1788 a founder (with the entomologist Thomas Marsham, d. 1819, and the physician and botanist Sir James Edward Smith, 1759–1828) of the Linnean Society of London (and initial Treasurer), in 1789 a Fellow of the Royal Society, author of *A sermon* [on Psal. xvii. 13] preached before the Hon. House of Commons Feb. 25, 1795, being ... a day of solemn fasting and humiliation. London 1795, co-author with Thomas Jenkinson Woodward (1745–1820) of *Observations on the British Fuci*. [London 1797]. See J.E. Smith, *A specimen of the botany of New Holland*. 15, t. 5. London 1793[–1795], *Memoir and Correspondence of ... Sir J.E. Smith* ... Edited by Lady Pleasance Smith. London 1832, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 398. Ansbach 1852 and Andrew Thomas Gage (1871–1945), *A History of the Linnean Society of London*. London 1938.

Goodenia lunata J. Black

Australia.

See *Transactions and Proceedings of the Royal Society of South Australia* 51: 384. 1927

(Narcotic.)

in English: hairy goodenia, stiff goodenia

Goodyera R. Br. Orchidaceae

For the British (b. Hants) botanist John Goodyer of Mapledurham, Hants, 1592–1664 (d. Petersfield, Hants), a searcher of plants, translated Dioscoride's *Materia medica* into English, assisted Johnson in editing the Gerard's *Herball*. See John Parkinson (1567–1650), *Theatrum Botanicum: The Theatre of Plants*. London 1640, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. London 1790, *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 5: 197–198. 1813, *Revisio Generum Plantarum* 2: 674. 1891 and Robert William Theodore Gunther (1869–1940), *Early British Botanists and Their Gardens* based on unpublished writings of Goodyer ... and others. Oxford 1922, *Brittonia* 28: 53–75. 1976, *Brittonia* 33: 52–56, 137–155. 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 108. 1989, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 271. [birthdate 1591] Basel 1996, *Adansonia*, sér. 3 25: 229–231. 2003.

Goodyera oblongifolia Raf. (*Epipactis decipiens* Benth.; *Epipactis decipiens* (Hook.) Ames; *Goodyera decipiens* (Hook.) F.T. Hubb.; *Goodyera decipiens* Piper Hubbard; *Goodyera menziesii* Lindl.; *Goodyera oblongifolia* f. *reticulata* (B. Boivin) P.M. Br.; *Goodyera oblongifolia* var. *reticulata* B. Vill.; *Tussaca repens* (L.) Raf.; *Tussaca secunda* Raf.)

Temp. Northern Hemisphere. Perennial

See *Species Plantarum* 2: 945. 1753, *Encyclopédie Méthodique, Botanique* 6(2): 581. 1805, *Transactions of the Horticultural Society of London* 1: 301. 1812, *Hort. Kew.* ed. 2. 5: 197–198. 1813, *Revisio Generum Plantarum* 2: 674. 1891 and *Bull. Natl. Sci. Mus. Tokyo* 33: 30. 1953, *Native Orch. Taiwan* 1: 182(f.) 1975, *N. Amer. Native Orchid J.* 1: 14. 1995

(Root and leaves for bladder and stomach problems, and female disorders; cold infusion of leaves for toothache, colds and kidney problems. A poultice of the chewed leaves and the swallowed juice, for snakebites.)

in English: creeping ladies' tresses, lesser rattlesnake plantain, netleaf, squirrel ear, white blotched rattlesnake

Gossweilerodendron Harms Fabaceae (Caesalpiaceae, Leguminosae)

For the botanist John Gossweiler, 1873–1952, plant collector, author of *Carta fitogeografica de Angola*. [Luanda] 1939, *Flora exotica de Angola*. Luanda 1950, “Bibliografia das viagens feitas em Angola por exploradores de diversas nacionalidades, cujos relatorios se referem à flora, fauna e agricultura.” *Bol. Serv. Agr. Com. Col. Flor.* Ano VII, 28–31: 121–125. 1935, “Elementos para a historia da exploração botânica de Angola.” *Bol. Soc. Broter.* 13: 303–304. 1939 and “Relação dos viajantes que coligiram plantas em Angola actualmente depositadas nos institutos botânicos de Londres, Berlim, Paris, Montpellier, Zürich, Lisboa, Coimbra, Cabo da Boa Esperança e Washington onde estão sendo estudadas desde 1868.” *Bol. Serv. Agr. Com. Col. Flor.* Ano VII, 28–31: 126–130. 1935. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 439. 1913, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 457. 1925, Alberto Judice Leote Cavaco (b.1916), *Contribution à l'étude de la flore de la Luanda d'après les récoltes de Gossweiler, 1946–1948*. Lisboa 1959 [Publicações culturais da Companhia de Diamantes de Angola, vol. 42], *Wageningen Agricultural University Papers* 99–3: 21. 1999.

Gossweilerodendron balsamiferum (Vermoesen) Harms (*Gossweilerodendron balsamiferum* Harms; *Prioria balsamifera* (Vermoesen) Breteler; *Pterygopodium balsamiferum* Vermoesen)

Tropical Africa, Gabon. Tree

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 459. 1925, *Wageningen Agricultural University Papers* 99–3: 21. 1999

(Stem exudate antiviral, for bronchitis.)

in English: pink mahogany, tola, tola wood

in Cameroon: alo, alop, gondo, sinedon

in Congo: tola

in Gabon: agba, emolo

in Nigeria: agba, loshi erin, moboron; losinerin (Yoruba); agba (Edo); agbara (Itsekiri); okimeten (Ijaw); achi aro (Igbo); emonga (Boki)

in W. Africa: agba

in Yoruba: losi erin, losinerin

Gossypioides Skovsted ex J.B. Hutch. Malvaceae

Resembling the genus *Gossypium* L., see *New Phytologist* 46: 131. 1947.

Gossypioides kirkii (Mast.) J.B. Hutch. (*Gossypioides brevilanatum* Hutchinson; *Gossypioides brevilanatum* (Hochr.) J.B. Hutch.; *Gossypioides kirkii* (Mast.) Skovsted; *Gossypium kirkii* Mast.; *Gossypium microcarpum* sensu García; *Malvastrum guaraniticum* Hassl.)

Tanzania. Shrub, lianescent, climber, arching, bright yellow flowers

See *Journal of the Linnean Society, Botany* 19: 214. 1882 and *Repert. Spec. Nov. Regni Veg.* 12: 264. 1913, *Journ. Genet.* xxxi. 287. 1935, *New Phytologist* 46: 131–132. 1947

(Leaves for pneumonia, tuberculosis.)

in Kenya: mpamba mwitu

in Tanzania: mpamba mwitu

Gossypium L. Malvaceae

Latin *gossypion*, *gossipion*, *gossypinus* for the cotton tree (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 693. 1753, *Genera Plantarum*. Ed. 5. 300. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 474. 1824, *Sylva Telluriana* 14, 16. 1838, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 399. (Used in Ayurveda and Sidha. Bacteriostatic, analgesic, antipyretic. Root bark powder given to regulate menstruation. Leaf decoction for flu, fever, cough, cold in chest; leaf juice for earache; leaves crushed and rubbed on body for nausea; leaves crushed together with *Senna occidentalis* and applied to wounds. Roots decoction drunk to ease childbirth. Flower in teas for flu and colds. Ceremonial, ritual.)

in English: American upland cotton, common cotton, cotton, dharwar-American, red cotton, upland cotton, upland georgian, wild cotton

in South America: algodón, (ah) te'tanam, ichcatl

in India: dodda hatthi, ilatan parutti, kapas, karpasa, may-ilanparutti, paruthi

in Philippines: bulak, candaba, gapas, kapas

Gouania Jacq. Rhamnaceae

Named for the French botanist Antoine Gouan (Gouin) (Dupuy des Esquiles, pseud.), 1733–1821, professor of botany at Montpellier. See [Pierre Cusson, Antoine Gouan and P.E. Crassous] Dupuy des Esquiles, *Leçons de Botanique, faites au jardin royal de Montpellier; par Monsieur Imbert, Professeur & Chancelier en l'Université de Médecine*. [A satire directed at François Imbert] en Hollande [Avignon] 1762, Nikolaus Joseph von Jacquin (1727–1817), *Selectarum stirpium americanarum historia*. 1: 263, t. 179, fig. 40. Vindobonae [Wien] 1763 and Clap, *Antoine Gouan, Essais et documents inédits*. Montpellier 1955, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 69. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 149. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 456. 1973, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 115. Palermo 1988.

Gouania javanica Miq. (*Clematoclethra racemosa* H. Lév.)

China, Laos, Philippines, Thailand, Vietnam. Shrubs climbing, flowers polygamous 5-merous

See *Flora van Nederlandsch Indië* 1(1): 649. 1855, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 11: 36. 1890 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(260–262): 440. 1912

(Antifungal, antioxidant.)

in China: mao ju qian

Gouania latifolia Reissek (*Gouania mollis* Reissek)

Brazil.

See *Flora Brasiliensis* 11(1): 103. 1861

(Inner bark and leaves decoction used against uterine inflammations.)

Gouania leptostachya DC.

India, Thailand.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 40. 1825

(Used for the treatments of skin diseases and related problems. The water from boiled roots used to cure gonorrhoea.)

Gouania longipetala Hemsl. (*Gouania mozambicensis* M.L. Green; *Gouania retinaria* DC.; *Gouania scandens* R.B. Drumm.; *Gouania tiliifolia* auct., sensu Bak., sensu Suesseng., non Lam.; *Retinaria scandens* Gaertn.)

East Africa. Liana or climbing shrub, straggling, scrambling, sweetly fragrant flowers greenish-cream or yellowish white, fruit wings prominently reticulate

See *Fl. Trop. Afr.* [Oliver et al.] 1: 383–384. 1868 and *Flora Zambesiaca* 2: 435, t. 88/D. 1966, *Pharmaceutical Biology* 26(4): 246–252. 1988

(Leaves molluscicide, taeniocidal, tonic, febrifuge, for venereal diseases, control of schistosomiasis.)

Gouania longispicata Engl.

Sierra Leone.

See *Selectarum Stirpium Americanarum Historia* ... 263–264. 1763, *Die Pflanzenwelt Ost-Afrikas* C: 256. 1895 and *Journal of Ethnopharmacology* 8: 215–223. 1983, *Journal of Ethnopharmacology* 70: 281–300. 2000, *International Journal of Primatology* 26(6): 1345–1373. 2005

(Lactogenic, leaves infusion; leaves and stems crushed, maceration, anthelmintic. Used for burns, bark scraped and pounded, the liquid applied to sores. Veterinary medicine.)

in Burundi: umubimbafura, umubimbafuro

in Congo: angetiangeti, ekundyakoda, katshikalihunji, muly-anjovu, muovula, muovura, ngoliobakpetu, umubimbafuno, umukuvasenge

in Ivory Coast: akonanbon, popokbé

in Sierra Leone: sawa, sawa la, sawai

Gouania lupuloides (L.) Urb. (*Banisteria lupuloides* L.; *Gouania domingensis* (Jacq.) L.; *Lupulus lupuloides* (L.) Kuntze; *Rhamnus domingensis* Jacq.)

Mexico. Vine

See *Species Plantarum* 1: 427. 1753, *Enumeratio Systematica Plantarum* 17. 1760, *Species Plantarum*, Editio Secunda 1663. 1763, *Revisio Generum Plantarum* 1: 119. 1891 and *Index Lectionum in Lyceo Regio Hosiano Brunsbergensi: Banisteria* 12. 1901, *Symbolae Antillarum* 4(3): 378. 1910, *Fl. Graffenrieda rupestris Ducke

South America, Brazil. Tree, white fragrant flowers

See *Arquivos do Instituto de Biologia Vegetal* 2(1): 66. 1935

(Leaves rubbed on blisters.)

Grangea Adans. Asteraceae

See *Species Plantarum* 2: 843–845, 849, 891–892. 1753, *Familles des Plantes* (Adanson) 2: 121, 563. 1763, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 41: 120. 1826.

Grangea maderaspatana (L.) Poir. (*Artemisia maderaspatana* L.; *Cotula maderaspatana* (L.) Willd.; *Cotula sphaeranthus* Link; *Grangea adansonii* Cass.; *Grangea aegyptiaca* DC.; *Grangea aegyptiaca* (Juss. ex Jacq.) DC.; *Grangea ceruanoides* Cass.; *Grangea glandulosa* Fayed; *Grangea hispida* Humbert; *Grangea maderaspatana* Poir.; *Grangea mucronata* Buch.-Ham. ex Wall.; *Grangea procumbens* DC.; *Grangea sphaeranthus* (Link) Koch; *Grangea sphaeranthus* K. Koch; *Grangea strigosa* Gand.; *Pyrarda ceruanoides*

(Cass.) Cass.; *Pyrarda ceruanoides* Cass.; *Tanacetum aegyptiacum* Juss. ex Jacq.)

India. Prostrate, procumbent, hairy, annual herb

See *Species Plantarum* 2: 843–845, 849, 891–892. 1753, *Familles des Plantes* 2: 121, 563. 1763, *Hortus Botanicus Vindobonensis* 3: 46. 1776, *Encyclopédie Méthodique. Botanique ...* (Lamarck) Supplément 2(2): 825–826. 1812, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 19: 304, 307. 1821, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 344. 1822, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 41: 121. 1826, *Numer. List* [Wallich] sub n. 3236. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 373. 1836, *Botanische Zeitung. Berlin* 1: 41. 1843 and *Bull. Soc. Bot. France* 65: 42. 1918, *Mémoires de la Société Linnéenne de Normandie* 25: 37, 171, 282. 1923, *Taxon* 26: 557–565. 1977, *Mitt. Bot. Staatssamml. München* 15: 466. 1979, *Taxon* 30: 78. 1981

(Used in Sidha. Whole plant given in digestive disorders. Leaves infusion antispasmodic, deobstruent, stomachic, sedative, and eaten in hysteria; leaves decoction given in eczema, skin diseases, irregular menses. Root stimulant, appetizer.)

in India: mashipattiri, mastaru, mukhatari, mustaru, namuti, zinki-mundi

in Philippines: pakpako-ti-alog

Grammatophyllum Blume Orchidaceae

From the Greek *gramma*, *grammatos* ‘a thread, line, letter’ and *phyllon* ‘leaf’, referring to the markings of the sepals and petals; see *Bijdragen tot de flora van Nederlandsch Indië* 6: t. 2, f. 20. 1825, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 400. Ansbach 1852.

Grammatophyllum scriptum (L.) Blume (*Cymbidium scriptum* (L.) Sw.; *Epidendrum scriptum* L.; *Gabertia scripta* (L.) Gaudich.; *Vanda scripta* (L.) Spreng.)

Malesia.

See *Species Plantarum*, Editio Secunda 1347, 1351. 1763, *Rumphia* 4: 48. 1849

(Pseudobulbs paste applied to heal sores.)

Graphistemma Champion ex Bentham Asclepiadaceae

From the Greek *graphe* ‘drawing, painting, picture’ and *stemma* ‘a crown, wreath, garland’.

Graphistemma pictum (Champion ex Bentham) Bentham & J.D. Hooker ex Maximowicz (*Holostemma pictum* Champion ex Bentham)

China.

See *Hooker's J. Bot. Kew Gard. Misc.* 5: 53. 1853, *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Petersbourg* 9: 776. 1876

(Decoction of all parts used for the treatment of traumatic injury and sore throat.)

in English: painted graphistemma

in China: tian xing teng

Graptophyllum Nees Acanthaceae

Greek *graptos* 'painted' and *phyllon* 'a leaf', referring to the markings on the leaves; see Nathaniel Wallich, *Plantae Asiaticae Rariores*. 3: 76, 102. London 1832, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 401. Ansbach 1852.

Graptophyllum pictum (L.) Griff. (*Graptophyllum hortense* Nees; *Graptophyllum pictum* Griff.; *Justicia picta* L.; *Justicia picta* Noronha)

Pantropical. Shrub, strong stem, leaves acuminate, flowers axillary or in terminal racemes, dark red corolla 2-lipped, fruit a cylindrical capsule, in primary forest

See *Species Plantarum*, Editio Secunda 1: 21. 1762, *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 18. 1790, *Plantae Asiaticae Rariores* 3: 102. 1832, *Notulae ad Plantas Asiaticas* 4: 139–140. 1854 and *Sci. & Cult.* 43: 497–498. 1977, *Ann. Missouri Bot. Gard.* 65: 199. 1978, *Austrobaileya* 5(4): 651–659. 2000, *Contr. Univ. Michigan Herb.* 23: 115–137. 2001, *Contr. Univ. Michigan Herb.* 24: 51–108. 2005

(Sap used on spear wounds; for earache, squeeze the juice of the leaves into the ear; leaves emollient, applied to ulcers, cuts and sores.)

in English: caricature plant

in Malaysia: puding

in Papua New Guinea: kutung, nepec

in Philippines: antolang, atai-atai, balasbas, balasbas-malomai, kalpueng, kalpueng, morado, pasau, sarasa, ternate, yovas

Gratiola L. Scrophulariaceae (Plantaginaceae)

From the Latin *gratia*, *ae* 'agreeableness, pleasantness, beauty, loveliness', referring to the medical uses and qualities; see Carl Linnaeus, *Species Plantarum*. 1: 17. 1753, *Genera Plantarum*. Ed. 5. 11. 1754, *Florula Ludoviciana*, or, a flora of the state of ... 36–37. 1817 and *Academy of Natural Sciences of Philadelphia Monographs* 1: 82. 1935, *Fieldiana, Bot.* 24(9/4): 319–416. 1973.

Gratiola peruviana L. (*Gratiola latifolia* R. Br.)

Peru.

See *Species Plantarum* 1: 17. 1753

(Used for intestinal complaints, for fevers.)

in English: Austral brooklime

in Ecuador: yaco-muyo

Grevea Baill. Montiniaceae

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 420. 1884.

Grevea eggelingii Milne-Redh. (For William Julius Eggeling, botanist, Uganda Forest Department, his works include *The indigenous trees of the Uganda Protectorate*. Second edition. Revised and enlarged by Ivan R. Dale. Glasgow [printed 1951] and *Elementary Forestry* ... Revised by R.G. Sangster. London 1949, with Christopher Money Harris wrote *Fifteen Uganda Timbers*. Oxford 1939.)

Tropical Africa. Shrub or tree

See *Hooker's Icones Plantarum* 36, sub t. 3541–4: 7 & t. 3543–4. 1955, *Ann. Missouri Bot. Gard.* 66: 856–861. 1979

(Stem bark for wound healing, for earache.)

Grevillea R. Br. ex J. Knight Proteaceae

Named after the English horticulturist Hon. Charles Francis Greville, 1749–1809, introduced and grew rare plants, 1772 Fellow of the Royal Society, 1802 Fellow of the Linnean Society, in March 7, 1804, one of the founders of the Horticultural Society, now the Royal Horticultural Society. See Joseph Knight, *On the cultivation of the plants belonging to the natural order of Proteaceae*. xvii, 120. London 1809, *Trans. Linn. Soc. London* 10(1): 167. 1810, Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae*. 375–380. 1810, Leichhardt, Ludwig (1813–1848), *Report of the expedition from Moreton Bay to Port Essington*. 1846, *Journal of an overland expedition in Australia, from Moreton Bay to Port Essington: a distance of upwards of 3000 miles, during the years 1844–1845*. London, 1847, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 402. Ansbach, 1852 and *Fieldiana, Bot.* 24(4): 58–62. 1946, Emil Bretschneider, *History of European Botanical Discoveries in China*. 809–811. Leipzig, 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 109. 1989, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1460–1491. Canberra, 1991, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 274. Basel, 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2185–2186. 2001.

Grevillea papuana Diels

New Guinea.

See *Bot. Jahrb. Syst.* liv. 205. 1916

(Heated leaves placed on wounds, tropical ulcers and sores.)

in Papua New Guinea: legelegera, pelepele, roldop, tolpi, trolup

Grewillea pyramidalis A. Cunn. ex R. Br.

Australia. Small tree, viscous secretion, flowers cream, woody follicles

See Brown, Robert (1773–1858), *Supplementum primum Prodrumi florae Novae Hollandiae* Suppl. 1: 25. Londini, 1830, *Prodr.* (DC.) 14(1): 381. 1856

(Painful blistering.)

Grewillea viscidula C.A. Gardner

Australia. Small tree, viscous secretion, woody follicles

See *Forests Dep. Bull., W. Austral.* 32: 44. 1923

(Painful blistering. Caustic sap used to make body scars, tribal marks.)

in W. Australia: bambra

Grewia L. Malvaceae (Tiliaceae)

For the English botanist and physiologist Nehemiah Grew, 1641–1712, physician and microscopist, M.D. Leyden 1671, a Fellow of the Royal Society 1671, one of the founders of the science of plant anatomy, a pioneer in exploring the physiology of plants and the comparative anatomy of animals, 1677–1679 Secretary of the Royal Society. See Carl Linnaeus, *Species Plantarum*. 2: 964. 1753, *Genera Plantarum*. Ed. 5. 412. 1754, *Flora Cochinchinensis* 335–336. 1790, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 417. 1829, *Botanical Miscellany* 1: 293–294, t. 62. 1830, *Nomencl. Bot.* [Steudel], ed. 2. ii. 769. 1841, *The Flora of British India* 1: 392. 1874, William Munk, *The Roll of the Royal College of Physicians of London*. 1: 406–409. London 1878 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 643. 1926, Garrison and Morton, *Medical Bibliography*. 297. New York 1961, Charles R. Metcalfe, in *D.S.B.* 5: 534–536. 1981, Helmut Genaust, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 274. [d. 1711] Basel 1996, *Botanical Review* 71: 100. 2005.

Grewia abutilifolia Vent ex Juss. (*Grewia hirsutovelutina* Burret; *Grewia kainantensis* Masam.; *Sterculia tiliacea* H. Lév.)

India.

See *Species Plantarum* 2: 1007–1008. 1753, *Annales du muséum national d'histoire naturelle* 4: 92. 1804 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(88): 649–650. 1926, *Transactions of the Natural History Society of Taiwan* 33: 166. 1943

(Root paste in diabetes; crushed root juice applied on swellings.)

in English: silver oak

in China: qing ma ye bian dan gan

in India: chikan kharbat, gangeti, gubbadara, guvvadada, jaanigida, karadikaale, karadikale, karadikalli, karagele, karakele, karikavadi, karikavari, pampukonta, pamukonda, peddatadaki, peddataraki, peddatarraki, potucamanti, potuchaamanti, potushalmali, ryna, soh eitblang

Grewia acuminata Juss. (*Grewia acuminata* Juss.; *Grewia acuminata* Bedd.; *Grewia densiserrulata* Hung T. Chang)

India, China. Shrub

See *Annals and Magazine of Natural History* 4: 91. 1804, *Madras J. Lit. Sci.* Ser. III, i. (1864) 38. 1864 and *Acta Phytotaxonomica Sinica* 20(2): 178. 1982

(Leaves decoction given after delivery as an antispasmodic and analgesic, a postpartum remedy.)

in China: mi chi bian dan gan

in India: kitah

Grewia asiatica L.

India. Small tree or shrubs, yellow petals, drupes weakly 2-lobed

See *Species Plantarum* 2: 964. 1753 and *Journal of Tree Sciences* 1: 88–97. 1982

(Used in Ayurveda, Unani and Sidha. Fruits taken in spasmodic pain. Leaves decoction as hair wash to remove dandruff; leaf paste applied on allergic eruptions.)

in Bangladesh: tarafu

in India: alpasthi, bhyunl, buttiyudipe, buttiyudippe, butuudipi, chadicha, dhaman, dhamani, dhamin, dhanvana, dhanvanacchada, dhanvanah, dhanvanchhada, dharmana, falseh, giripilu, jana, jani, karra, mriduphala, nagadalapam, nalajana, nilacharma, nilamandala, palasah, palica, palicam, palisa, parapara, paravata, parusa, parusaka, parusakah, parusakam, parusam, parusha, parushaka, peddajana, pethajana, phalasa, phalasa, phalsa, phalsa ki chhaal, phalsa taza, phalsi, pharosakoli, pharsa, pharsula, pharvah, pharwani, phassa, phulsa, phutiki, porusha, purusha, putiki, roshana, shukri, siyalphessa, tadachi, tadachit, tadasal, tadasala, thadasali, unnu

in Tibet: ba ru sa ka, pa ru sa ka

Grewia aspera Roxb. (*Grewia abutilifolia* Vent ex Juss.; *Grewia aspera* Schinz)

India, Sri Lanka.

See *Annales du muséum national d'histoire naturelle* 4: 92. 1804, *Hortus Bengalensis*, or a catalogue ... 42. 1814 and *Bulletin de l'Herbier Boissier* II, 8: 701. 1908

(Root extract given in stomachache and gastrointestinal complaints.)

in India: chikan kharbat, kharbat

Grewia avellana Hiern (*Grewia calycina* N.E. Br.)

Tropical Africa, South Africa. Scandent shrub, white star-shaped flowers, four-lobed red fruits, ripe fruits eaten raw

See *Bull. Misc. Inform. Kew* 1909, 97. 1909

(Roots infusion dropped into sore eyes or drunk for stomach-ache and diarrhea.)

Grewia bicolor Juss. (*Grewia disticha* Dinter & Burret; *Grewia grisea* N.E. Br.; *Grewia heterophylla* A. Rich.; *Grewia kwebensis* N.E. Br.; *Grewia madandensis* J.R. Drumm. ex Baker f.; *Grewia miniata* Mast. ex Hiern; *Grewia mossambicensis* Burret; *Grewia pallida* Hochst. ex A. Rich.)

East Africa. Small tree or shrub, spreading, low, many-branched, bright yellow sweet scented flowers, dark orange fruit, hard seeds, animal fodder, leaves browsed by domestic stock, ripe sweet scanty fruits eaten raw, bee forage, grassland and woodland, in dry *Acacia* bushland, on rocky sites, in lowlands in dry bushland, bushed grassland

See *Annales du muséum national d'histoire naturelle* 4: 90, t. 50, f. 2. 1804

(Seeds known for their constipating property and ingesting large amounts may lead to serious constipation. Bark used to treat intestinal infestations and syphilis; bark chewed and put on wounds as a bandage; slimy pounded bark applied locally for body itches. Roots sedative, antiseptic, for chest pains, insanity, colds and snakebite; roots infusion drunk to treat anemia, chest pains, snakebite, colds, diarrhea and infertility in women. Veterinary medicine, root decoction used for the extraction of the afterbirth in cattle. Magic, ritual, ceremonial; leaves used by medicine men in exorcizing spirits and used to produce smoke in ceremonies for sick cattle. Ritual sticks used in an earthquake-prevention ceremony.)

in English: bastard brandybush, bastard raisin bush, donkey berry, false brandybush, two-colour grewia, two-coloured grewia, white raisin

in India: bather, gargas, nikki-bekkar

in East Africa: mkone, mulawa, olsitete

in Kenya: arlilo, dabach, debhi, dowee, ekali, haroru, ilawa, kikalwa, lagrat-denai, lkarraiyo, mfukufuku, mikoche, mkone, mmara, mulawa, muraagwa, muragwa, murawa, ndomoko, ngalwa, olsiteti, powo, seteti, siitet, sitet, sitetet, sitetooik, siti, suriech

in Nigeria: mariken dutse (Hausa)

in Southern Africa: basterrosyntjebos (rosyntjebos = raisin bush), witosyntjije; ngiri (Tonga); umHlalampunzi, umHlabampunzi, umDliwampunzi, uSiphane (Zulu); os siteti (Masai)

in Tanzania: ebusheni, esegi, esitete, lagaang-aawak, lomo, mduwau, mfukufuku, mkole, mkole mweupe, mkole-ngoda, mkoma, mkomakoma, mkomalendi, mkone, mpelemehe, msesetya, mswere, mtafuta, mukoma, musuna-nu-kuu, nyamkole, olsiteti, osiminde, ositeti, serekuúk

Grewia carpinifolia Juss. (*Grewia carpinifolia* Roth, nom. illeg.; *Vinticina carpinifolia* (Juss.) Burret)

Tropical Africa. Scrambling shrub, branched, vine, yellow flowers

See *Annales du muséum national d'histoire naturelle* 4: 91, t. 31, f. 1. 1804, *Nov. Pl. Sp.* 245 (-246). 1821 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 715. 1935

(Leaves, fruits and roots anthelmintic, tonic oxytotic, used for female infertility.)

Grewia damine Gaertn.

India.

See *De Fructibus et Seminibus Plantarum...* 2: 113. 1790

(Veterinary medicine, leaves ground with those of *Grewia villosa*, *Tephrosia purpurea* and *Vitex altissima* given in anthrax.)

in India: ulchara

Grewia elastica Royle

India.

See *Taxon* 28:403. 1979

(Used in Ayurveda.)

in India: beul, bihul, bijol gach, bor-khentri, borkhentor, dhamman, dhanvanah, dieng sohangrithat, dieng thabalieh, khengkhriwabik, phalsa, pheruman, sial-phosra

Grewia erythraea Schweinf.

Sudan.

See *Verhandlungen der Zoologisch-Botanischen Gesellschaft in Österreich* 18: 671. 1868

(Wood decoction to relieve cough.)

in Pakistan: catarch, gangi

Grewia falcistipula K. Schum.

South Africa. Shrub, orange fruits, raw ripe fruits eaten

See *Kun. Sambesi-Exp.* 296. 1903

(Root decoction drunk as an oral contraceptive.)

Grewia flava DC. (*Grewia cana* Sond.; *Grewia hermannioides* Harv.)

South Africa.

See *Cat. Pl. Horti Monsp.* 113. 1813

(Emetic.)

in English: brandy bush, raisin bush, velvet raisin, wild currant, wild raisin

in Southern Africa: bessiebos, brandewynbessie, fluweelrosyntjije, kefferbessie, rosyntjebos, wilderosyntjije,

wilderrosyntjebos; umHlwampunzi, umHlalampunzi (Zulu); moretlhwa (Western Transvaal, northern Cape, Botswana); murapfa, muredwa (Venda); morezwa (Kalanga: Northern Botswana); omuvapu, omundjendjere (Herero: Central South West Africa); oub (Nama: Southern South West Africa)

Grewia forbesii Harv. ex Mast. (*Grewia faucherei* Danguy; *Grewia platyclada* K. Schum.)

Tropical Africa. Lianescent shrub or tree, scandent, flowers yellow, edible fruit

See *Fl. Trop. Afr.* [Oliver et al.] 1: 250. 1868

(Root decoction drunk for lumbago, convulsions and stiffness in the neck. Leaves for fevers and diabetes, to bathe in epilepsy and convulsions.)

in Tanzania: mhongodeka, mkongo deka, mkongodeka, mkongodelea, msokote, munarungombe, musuma

Grewia helicterifolia Wall. ex G. Don (*Grewia hirsuta* Vahl var. *helicterifolia* (Wall. ex G. Don) Haines)

India.

See *A General History of the Dichlamydeous Plants* 1: 548. 1831 and *Forest Fl. Chota Nagpur* 196. 1910

(Used in Ayurveda. Fruits extract mixed with water taken during dysentery.)

in India: bijol-goch, kukuraru, kukurbicha, nagabala, seta andir

Grewia heterotricha Mast. (*Grewia heterotricha* Burret)

India.

See *The Flora of British India* 1: 385. 1874 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 342. 1914

(Used in Sidha.)

in India: atipala, cakkarapantaceti, cakkarapantam, ciru-tutti, kaadu jaane, kaaluvaame, kadujane, kalaitavam, kalaitavattutti, kalavame, kalluami, motadhamni, talini, talinittutti, tampuli, tampulittutti

Grewia hirsuta Vahl (*Grewia hirsuta* Sm.; *Grewia hirsuta* Wall.; *Grewia hirsuta* (Korth.) Kochummen; *Grewia hirsuta* Roxb.; *Grewia pilosa* Roxb.)

India. Shrub or small arching treelet, softly hairy leaves nearly sessile, ripe fruits eaten by the children

See *Symb. Bot.* (Vahl) i. 84. 1790, *Hort. Bengal.* 93. 1814, *Numer. List* [Wallich] p. 237, n. 1090 C. 1829 and *Taxon* 29: 355–357. 1980, *Journal of Tree Sciences* 1: 88–97. 1982, *Proceedings of the Indian Science Congress Association* 71(3-vi): 143–144. 1984

(Used in Ayurveda and Sidha. Terminal twig crushed and the extract given to treat stomachache. Leaf paste applied on boils. Juice of fruits given to treat indigestion. Tonic, roots

paste a remedy for cuts, boils and wounds; whole plant of *Selaginella bryopteris* made into a paste mixed with roots of *Grewia hirsuta* and *Hemidesmus indicus* and taken for gonorrhoea; root powder with milk in heart diseases and asthma; root decoction, mixed with black pepper and sugar, given in the treatment of venereal diseases, gonorrhoea; roots ground with turmeric and the juice given to cure stomachache and dysentery; root crushed with water and the extract given for dysentery and gastrointestinal complaints. Veterinary medicine, dried root powder to treat bone fractures.)

in India: bidaracheepuru, bidarachipuru, bidaracipuru, bidurcheepuru, bontur chettu, budda, chikku dippe, chikkudippe, chikkudippe, chilijana, chimachipuru, chipri, chipuru, chitijana, chittajana, chitti jana, chittijaan, cikkudippe, cipuru, ciri jana, cittijana, dadachelu, eejeegida, gandaudippe, gangarasi, govli, gudasarkara, gudsakri, gursakari, gursakri, gurusikri, hukta-pata, huktapata, jaana, jevelica, jibilika, jibilike, kaduru pandlu, kakarolim, kakarundah, kalle, kalunnu, kucho-padia, kukka budda alam, kukurbicha, kukurkoli, muvalaku, muvalcu, muvvalasu, nagabala, navri, phrongli, sepuru chettu, sitachabeni, sithachabeni, soh synting, tadiki, tavadu, tavidu, tavuttai, tella jana, tellajana, thellajaana, udipe, zyani

Grewia microcarpa K. Schum.

Tanzania. Shrub or small tree, lianescent, yellow purple flowers

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 2: 190. 1898

(Stem bark soaked in cold water and the infusion drunk to remedy indigestion.)

in Tanzania: mkandekande, mkole, mlawa, mtawbe

Grewia mollis Juss. (*Grewia mollis* Juss. var. *petitiana* (A. Rich.) Burret; *Grewia petitiana* A. Rich.; *Grewia pubescens* P. Beauv.; *Grewia velutina* A. Rich., non (Forsk.) Vahl; *Grewia venusta* Fresen.; *Grewia venusta* var. *angustifolia* K. Schum. ex T. Durand & H. Durand)

From Senegal to the Sudan and East Africa. A shrub or small tree, multi-stemmed, spreading hairy branches, thick and flaky bark deeply fissured, ripe sweet fruits eaten fresh, found in moist woodlands

See *Annales du muséum national d'histoire naturelle* 4: 91. 1804 and *Taxon* 38: 523. 1989, *Taxon* 42: 696. 1993

(Stem bark and leaves wound dressing. Leaves infusion drunk to reduce gas in the stomach; leaves crushed, mixed with water and used as a shampoo against head lice. Veterinary medicine, leaves infusion used to treat constipation in domestic animals.)

in Nigeria: afoforo-igbo, evbare, ora-igbo

in Tanzania: ebusheni, esegi, lagagir-daata, lomo, mdagwata, mduwau, mkole, mkomakoma, mpelemehe, mukoma, musuna, ositeti, umushamgumu, x'waa

in Yoruba: afoforo igbo, amara fuye, eru atori, oora igbo

Grewia multiflora Juss. (*Grewia didyma* Roxb.; *Grewia didyma* Roxb. ex G. Don; *Grewia disperma* Rottler ex Spreng.; *Grewia glabra* Mast.; *Grewia glabra* Blume; *Grewia jing-hongensis* Y.Y. Qian; *Grewia serrulata* DC.)

China, India. Tree or shrub, deciduous, slender branches, distichous leaves, whitish yellow flowers, lobed fruits, a good host for lac insect

See *Annales du muséum national d'histoire naturelle* 4: 89, t. 47, f. 1. 1804, *Prodr.* (DC.) 1: 510. 1824, *Bijdr. Fl. Ned. Ind.* 3: 115. 1825, *Syst. Veg.* (ed. 16) [Sprengel] 2: 579. 1825, *Gen. Hist.* 1: 549, descr. 1831, *Fl. Brit. India* [J.D. Hooker] 1: 388, 393, in syn. sphalm. 1872–1897 and *Guihaia* 17(4): 297, f. 2. 1997

(Root extract taken for bone fracture, and fractured part bandaged with bamboo strips. Antidote to poisoning, emetic.)

in China: guang ye bian dan gan

in India: annakuti maram, kadupattanga, khad dhamani, singnam-laung-dak

Grewia obtusifolia Eckl. & Zeyh.

India.

See *Enumeratio Plantarum Africae Australis Extratropicae* 53. 1834

(Flower and bark for skin diseases.)

in India: dhraman

Grewia occidentalis L.f. (*Grewia chirindae* Baker f.; *Grewia microphylla* Weim.)

South Africa. Shrub, sprawling and climbing vine, spreading along ground when small, branching at base, flowers pale purple, petals light violet, anthers yellow, filaments violet

See *Species Plantarum* 2: 964. 1753

(Used for impotency and barrenness.)

in English: assegai wood, bow-wood, buttonwood, cross-berry, four-corners, star-flower

in Southern Africa: assegaibos, booghout, knoppiehout, kruisbessie (kruis = cross), phylhout, rosyntjebos; iLalan-yathi, umHlalanyathi, iManhlele, iKlolo (Zulu); umNqabaza, umVilani (= assegais of an army) (Xhosa); umSipane (Swazi); mokukutu, mogwana, motswetsweyane (Tswana: Western Transvaal, northern Cape, Botswana); mulembu (Venda); muSosobiana, muMaka (Shona)

Grewia oppositifolia Roxb. & DC. (*Grewia oppositifolia* Buch.-Ham. ex Roxb.)

India, Nepal, Himalaya. Tree, spreading crown, pale yellow flowers, sweet ripe fruits eaten, fodder for livestock

See *Hort. Bengal.* 42. 1814, *Prodr.* (DC.) 1: 509. 1824, *Prodr. Fl. Nep.* 227. 1825 and *Notizbl. Bot. Gart. Berlin-Dahlem*

9: 692. 1926, *J. Tree Sci.* 1: 88–97. 1982, *Bull. Medico-Ethnobot. Res.* 4: 14–28. 1983, *Himalaya Res. and Develop.* 3(2): 6–8. 1984, *Ethnobotany* 9: 112–116. 1997

(Root decoction used for cough; root paste applied on boils.)

in India: beul, beulang, bheku, bhekua, bhukul, bhekula, bhimal, bhiunal, bihul, biul, dhaman, dhamman, dhanvanah, sanna udupel, todana

Grewia optiva J.R. Drumm. ex Burret (*Grewia oppositifolia* Buch.-Ham. ex Roxb.; *Grewia oppositifolia* Roxb. & DC.; *Grewia optiva* (Buch.-Ham. ex Roxb.) J.R. Drumm. ex Burret)

India, Nepal, Himalaya. Tree, spreading crown, pale yellow flowers, sweet ripe fruits eaten, fodder for livestock

See *Hort. Bengal.* 42. 1814, *Prodr.* (DC.) 1: 509. 1824, *Prodr. Fl. Nep.* 227. 1825 and *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 692. 1926, *Bull. Medico-Ethnobot. Res.* 4: 14–28. 1983, *Himalaya Res. and Develop.* 3(2): 6–8. 1984, *Ethnobotany* 9: 112–116. 1997

(Used in Ayurveda. Leaves applied on eruptions. Crushed bark extract taken for indigestion and gastric problems, also used as lubricant during difficult childbirth. Fruits for fever. Veterinary medicine, bark paste as plaster and fresh bark as bandage on fracture of cattle. Ceremonial, rituals, religious ceremonies, branches used for worship.)

in India: beul, beulang, bheku, bhekua, bhukul, bhekula, bhimal, bhiunal, bihul, biul, dhaman, dhamman, dhanvanah, todana

in Nepal: makakosi, pankath, phusre, sweto phorsa

Grewia paniculata Roxb. ex DC. (*Grewia paniculata* Roxb., nom. inval., nom. nud.)

SE Asia.

See *Hort. Bengal.* [93]. 1814, *Prodr.* (DC.) 1: 510. 1824, *Fl. Ind.* (Roxburgh) 2: 591. 1832 and *Bot. Hist. Hortus Malabaricus* 102. 1980

(Leaves decoction in fever following childbirth; leaves infusion as a lotion for fever; poultice of pounded leaves for itch. Roots for cough and cold.)

in Malaya: ara dani, chenderai, chenerah, chenerai, chenirai, chinerai, jenerai

Grewia picta Baill. var. *picta* (*Chadara tenax* Forssk.; *Grewia asiatica* var. *celtidifolia* (Juss.) L.F. Gagnep.; *Grewia betulaeifolia* Baill.; *Grewia betulifolia* Baill.; *Grewia boehmeriifolia* Kaneh. & Sasaki; *Grewia bracteata* Baker; *Grewia celtidifolia* Juss.; *Grewia celtidifolia* var. *eriocarpa* (Juss.) Hsu & R. Zhuge; *Grewia comorensis* Bojer; *Grewia comorensis* Baill.; *Grewia eriocarpa* Juss.; *Grewia lantsangensis* Hu; *Grewia orientalis* L.; *Grewia pamanziana* R. Vig.; *Grewia populifolia* Vahl; *Grewia rupestris* Dinter & Schinz; *Grewia simaoensis* Y.Y. Qian; *Grewia tenax* (Forssk.) Fiori; *Grewia yunnanensis* Hung T. Chang)

India. Small tree, spreading crown, white petals

See *Flora Aegyptiaco-Arabica* 105. 1775, *Symbolae Botanicae, ...* 1: 33. 1790, *Annales du muséum national d'histoire naturelle* 4: 93. 1804, *Procès-Verbaux Société Histoire Naturelle de l'Île Maurice* 1842–1845: 30. 1846, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 548, 557–558. 1886, *Journal of the Linnean Society, Botany* 25: 300–301. 1889 and *Bulletin de l'Herbier Boissier, sér. 2, viii*: 702. 1908, *Flore Générale de l'Indo-Chine* 1: 537. 1911, *Agricoltura Coloniale* 5: Suppl. 23. 1912, *Revue Générale de Botanique* 29: 196. 1917, *Transactions of the Natural History Society of Taiwan* 18: 332. 1928, *Bulletin of the Fan Memorial Institute of Biology*: 10: 314. 1940, *Acta Phytotaxonomica Sinica* 20(2): 176. 1982, *Botanical Journal of South China* 2: 19. 1993, *Guihaia* 17(4): 295, f. 1. 1997

(Veterinary medicine, leaves ground with those of *Byttneria herbacea* Roxb. given in impaction.)

in China: mao guo bian dan gan, pu ye bian dan gan

in India: gandu gandhara

Grewia platyclada K. Schum.

Tropical Africa. A shrub or small rounded tree, woody climber, strong, looping angular stems, young branchlets and shoots covered with soft brown hairs, bright orange-yellow star-like flowers beside leaves, shiny edible berries, plant used for fodder, found in degraded bushland, lowland forest, edges and clearings

See *Bot. Jahrb. Syst.* xxviii. 430. 1899

(Roots used to treat menstrual problems, stomach problems during pregnancy and other disorders in women.)

in Tanzania: firaakwi, iperemesu, khoa, lomo-peh, lunkukuma, mbajua, mkole, mpelemehe, mpelemense, mpelemese, mpelemesu, olmangulai-oloingoni, olmangulai-oloing'oni, uduboguta, x'waa

Grewia rhamnifolia Roth (*Grewia rhamnifolia* Burret)

India, Sri Lanka. Small tree

See *Nov. Pl. Sp.* 244. 1821 and *Notizbl. Bot. Gart. Berlin-Dahlem* 9(88): 698 (-699). 1926

(Used in Sidha. Paste of crushed leaves applied on wounds and cuts.)

in India: panripputukkan, udambaamaram

Grewia rothii DC.

India.

See *Prodr.* (DC.) 1: 509. 1824

(Root extract with water applied for gonorrhoea.)

in India: angolam, chipuru, gunnangi, jaana, jibilika chettu, karijaana, kolupu, manchipuru, muvanchi, peddachipuru, putiki, shirinjaana, siriana, thadika chuvva

Grewia salutaris Span.

Indonesia. Tree

See *Linnaea* 15: 176. 1841

(Bark grated and applied for contusions, or a decoction taken.)

in Indonesia: pasolder

Grewia sapida Roxb. ex DC. (*Grewia sapida* Roxb.)

India, Himalaya.

See *Hort. Bengal.* 42. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 512. 1824

(Root paste applied on boils; root extract for gastrointestinal complaints.)

in India: bansuli, bistu

Grewia sclerophylla Roxb. ex G. Don

India.

See *A General History of the Dichlamydeous Plants* 1: 550. 1831

(Used in Sidha.)

in India: alakupican, bankajana, garbheli, gurhheli, kattukkadali, khatkhathi, pharsia, phrsia, punaimati, punaippitukkan, punaippitukku

Grewia similis K. Schum. (*Grewia chlorophila* K. Schum.; *Grewia coerulea* K. Schum.; *Grewia mbuluensis* Exell)

East Africa. Shrub or small tree, straggling, often a climber, young shoots hairy, woody knobs on the old stems, mauve pinkish or striking purple-blue flowers, fleshy orange-red berries, ripe sweet fruits eaten raw, in grassland, evergreen bushland, dry evergreen mountain forest and forest edges, moist areas

(Sticky substance under the bark used in the treatment of sores. Bark pounded and the powder used to treat wounds, sores and snakebite. Seeds known for their constipating property and ingesting large amounts may lead to serious constipation.)

in East Africa: mkole, mutuva, ol-neligwat

in Kenya: mutheregendi, mutheregendu, mutuva wa kiima, oyirri, theregendu

in Tanzania: eirii, furudou, kisesetya, mbudu, mgombaryandi, mkole, mkole mweupe, mkomabubu, mlela, mnangu, mpelemehe, mseseza, mtafuta, mukhantokhanto, mukuma, ndagwasa, nyakisesetya, nyamkole, olmkoma, sajadi, saski, tsampure, umukoma

Grewia subaequalis Baill. (*Grewia discolor* Fresen.; *Grewia penninervis* Boivin ex Baill.)

India, Madagascar. Shrub

See *Museum Senckenbergianum* 2: 159. 1837, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 544, 551–552. 1885, *Journal of the Linnean Society, Botany* 25: 300. 1889

(Root for rheumatism and gastrointestinal complaints.)

in Madagascar: sely malay

Grewia subinaequalis DC. (*Grewia subinaequalis* Wall.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 511. 1824, *Numer. List* [Wallich] n. 1087 et p. 237. 1829

(Root for gastrointestinal complaints.)

in India: buttiyudippe, dhamin, jaana, jana, jangolat, nal-lajaana, nallajana, palisa, parusha, peddajaana, phaalasaa, phalsa, phalsi, phutiki, putiki, shukri, tadachi, tadasala

Grewia tembensis Fresen.

Kenya. Shrub, multi-stemmed, straggling, long weak young stems, flower white to pink, fruits orange or bright red, sweet fruits can be chewed and swallowed whole, good fodder plant, found in bushland, often riverine

See *Museum Senckenbergianum* 2: 158. 1837

(Seeds known for their constipating property and ingesting large amounts may lead to serious constipation; whole fruit together with seeds may be eaten but large amounts may cause constipation. Drink hor decoction for coughs.)

in Kenya: chesarebut, damich-arab, deka, deka-dubra, demag, dhamag, dook-gudhan, dumag, egomo, emaleker, emaleger, emalokere, hashanli, iri, irri, kituva, Ikogom, Ikogomi, mkone, mmbogha, mulahanyo, mured-bonati, muruba, mwemba, nduva, ogumdi, oirri, oyiri

Grewia tenax (Forssk.) Fiori (*Chadara betulaeifolia* Juss.; *Chadara erythraea* Schweinf.; *Chadara tenax* Forssk.; *Grewia asiatica* var. *celtidifolia* (Juss.) L.F. Gagnep.; *Grewia betulaeifolia* Juss.; *Grewia betulifolia* Baill.; *Grewia betulifolia* Schinz, nom. illeg.; *Grewia betulifolia* Juss.; *Grewia celtidifolia* Juss.; *Grewia celtidifolia* var. *eriocarpa* (Juss.) Hsu & R. Zhuge; *Grewia eriocarpa* Juss.; *Grewia populifolia* Vahl; *Grewia rupestris* Dinter & Schinz; *Grewia tenax* var. *betulifolia* (Juss.) Maire; *Grewia tenax* var. *capillipes* Lanza; *Grewia tenax* var. *glechomifolia* Chiov.; *Grewia tenax* var. *ribesifolia* Fiori)

East Africa. Shrub, straggling, many-branched, multi-stemmed, solitary white flowers, orange-red fruits can be chewed and swallowed whole, ripe and unripe fruit eaten raw, found in dry *Acacia* bushland, bushed grassland, a highly variable species commonly grazed by camels, goats and sheep

See *Flora Aegyptiaco-Arabica* 105. 1775, *Symbolae Botanicae, ...* 1: 33. 1790, *Annales du muséum national d'histoire naturelle* 4: 92–93. 1804, *Bulletin Mensuel de la Société Linnéenne de Paris* 548. 1886, *Journal of the Linnean*

Society, Botany 25: 300–301. 1889 and *Bulletin de l'Herbier Boissier* II, 8: 700. 1908, *Flore Générale de l'Indo-Chine* 1: 537. 1911, *Agricoltura Coloniale* 5: Suppl. 23. 1912, *Notizbl. Bot. Gart. Berl.* 9: 689. 1926, *Stud. Fl. Egypt* 234. 1956, *Fl. Delhi* 87. 1963, *Botanical Journal of South China* 2: 19. 1993

(Used in Ayurveda and Sidha. Wood decoction a remedy against cough. Sticky substance under the bark used as an insect repellent. For snakebite, root decoction drunk; roots mixed with those of *Diospyros scabra*, boiled and used to treat tuberculosis; roots boiled in milk and given to children as a tonic; roots for bone fracture. Seeds known for their constipating property and ingesting large amounts may lead to serious severe constipation.)

in Kenya: amasha, d'eeke, damich, damiek, damis, deeka, deeka-diima, deeka-imimo, deka, domook, domook derle, egomo, eirri-narok, emalokere, eng'omo, haroru korma, ilkogomi, irgegud, iri, irri, kamasha, lkarayoi, lkogomi, lngongomi loitipai, lpuusani, mared, mkone-kilaa, mulahanyo, murie, muryo, nashimleh, oirri, oyirri, sarkam, taran, taronwet, toronwo

in China: mao guo bian dan gan, pu ye bian dan gan

in India: accu, catusphata, gangan, gangaran, gangeru, gangeruki, gangerun, gangeti, gangi, gangir, gangri, gundu kadeera, gundukadeera, gundukadira, jana, kadadari, kaladari, kaladi, kanduru, kankeran, kattedolupu, katustikta, madhuramla, mahapatra, mahaphala, mahasakha, mahodaya, nagabala

in Tibet: na ga ba la, na-ga-ba-la

Grewia tiliaefolia Vahl (*Grewia tiliifolia* Vahl, nom. illeg.; *Grewia tiliifolia* A. Rich.)

India. Tree, deciduous, bark light brown, yellow flowers in axillary cymes, bilobed globose drupes, young leaves eaten, ripe fruits eaten, in moist deciduous forests

See *Symb. Bot.* (Vahl) 1: 35. 1790 and *Journal of Tree Sciences* 1: 88–97. 1982, *Journal of Cytology and Genetics* 25: 308–320. 1990

(Used in Ayurveda and Sidha. Stem in dysentery. Bark paste given in dysentery, diarrhea; pounded bark in water given to women in delayed childbirth; bark paste applied on boils, and also on forehead to cure headache. Paste made of stem bark of *Grewia tiliaefolia* and *Helicteres isora* together with tuber of *Amorphophallus paeoniifolius* applied for bonesetting.)

in India: baddi bodda, balmuri, batala, batale, belakka, bhut-thade, boothaaale, butale, butali, buttale, buttele, cachadicha, catacci, cataicci-p-pattai, chadache, chadachi, chadack, chadicca, charachi, chatacci, daaman, daamani, dadasal, dadasal, daddasal, dadsaala, dadsal, dadsalu, daman, damni, dhaaman, dhadsal, dhaman, dhamani, dhamin, dhamni, dhanurvriksha, dhanurvrsah, dhanvana, dhanvanah, dhanvanga, dhanvanavrsam, dharmana, dharwana, dhavanga, dhawana, erratada, errathada, ettatada, ganguti, inupatada, jaana, jana, jani, jhujhana, kada, kanapadi, karavarani,

karkarani, karvini, kavini, kehla, kendalasu, kitacari, kitacari-ceti, mahabala, nacudu, nulijaana, nulijana, pai-paroea, pedda jaana, pedda jana, peddatena, phaisa, pharsa, pichhilaka, pichhilatvaka, raktakusuma, rodgi, rujasaha, ruksha, sadachi, sadachu, satachi, swaduphala, tada, tada chettu, tadacali, tadagana, tadajana, tadasal, tadasali, tadasalu, tadashalu, tadda, taddasu, tanuvakam, tara, tarra, tarumanam, tata, tatal, tatalatrumanam, tatali, tatali, thada, thadachettu, thadachi, thadajana, thadas, thadasal, thadasalu, thadasu, thadathi, thadda, thadiccha, thadicha, thadsal, thana, tharaa, tharra, thathsaa, udupai, una, unal, unnam, unnu, unu, unum, vatelai unnu, wada, yerratada

Grewia vestita Wall. (*Grewia asiatica* var. *vestita* (Wall. ex Brandis) Mast.; *Grewia vestita* Wall. ex Brandis)

India, Himalaya.

See *Numer. List* [Wallich] n. 1105. 1829, *The forest flora of North-West and Central India* 40. 1874 and *J. Cytol. Genet.* 23: 219–228. 1988

(Fresh bark juice used for gonorrhoea and urinary disorders.)

Grewia villosa Willd. (*Balmeda corylifolia* Nocca; *Balmeda corylifolia* Scannagatta; *Grewia chaunothamnus* K. Schum.; *Grewia corylifolia* A. Rich.; *Grewia echinulata* Delile; *Grewia villosa* Heyne ex Roth; *Grewia villosa* var. *glabrior* K. Schum.)

Tropical Africa, Sudan, Eritrea, Kenya. A deciduous shrub, young parts covered with pale silky hairs, small clusters of pink flowers turning yellow with age, red-brown fruits soft and hairy, hard seeds, sweet pulp of the ripe fruit eaten raw, fodder for camel, sheep, goat and cattle, found in dry bushland and thickets

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 205. 1803, *Nov. Pl. Sp.* 248. 1821 and *Notizbl. Königl. Bot. Gart. Berlin* 3: 103. 1901

(Roots used to treat body pains; roots boiled in soup to fortify mothers after childbirth; root decoction with milk used as child's tonic; roots pounded, water added and used for diarrhoea and gastrointestinal complaints; roots boiled in soup used for stomachache, gastrointestinal complaints, diarrhoea. Boiled plant extract used for aching bones. Medicine for wounds, apply powdered or chewed bark; fresh bark juice used in gonorrhoea. Veterinary medicine, leaves ground with those of *Grewia damine*, *Tephrosia purpurea* and *Vitex altissima* given in anthrax.)

in English: mallow raisin, round-leaf grewia

in India: baliogangarin, banta, banta, butti-aaragale, buttiagaragale, cemula, chenula, chenulu, cemula, chenula, dhoban, dhohan, gangeti, garakele, gawal kopra, gorakele, inzarra, inzarra pusht wanne, jalidar, jalidar kaskusri, kharmati, kullai, lankas, luskanu jhad, pade khado, pastuwanne, sannaudapagarukale, sannudippe, sannudippegarakele, tamthar, tarse kotap, thamther

in Kenya: barbar, buruudo, emankulai, epokoo, epong'ae, epongae, ilmankula, lpopoi, lpupo, lpupoi, makow, mbu, mokoghio, mokuwo, mokuwo, moorodah, mshashote, mubuu, mukorobosho, muvu, obhoob, ogomdi, olmankulai, shoshoti

in Southern Africa: malvarosyntjie; iKlolo, iKholo (Zulu); murapfa (Venda)

in S. Rhodesia: uBusbanga, umLekule

in Tanzania: amu, emangulai, emankulai, ilmankula, lomo, mkole, mkorobosho, motoo, mumpembe, olmangulai, olmankulai

in W. Africa: nogonogobilen

Grias L. Lecythidaceae

Latin *grias*, *adis* used by Pseudo Apuleius Barbarus (*Herbarium* 50) for a plant growing in Basilicata, Italy; Greek *grao* 'to eat, gnaw', referring to the edible fruit, see *Systema Naturae*, Editio Decima 2: 1075. 1759 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 229–249. 1941, *Fl. Neotrop.* 21: 1–270. 1979.

Grias neuberthii J.F. Macbr. (*Grias foetidissima* Dugand; *Grias lorentensis* R. Knuth)

Peru.

See *Repertorium Specierum Novarum Regni Vegetabilis* 35: 339. 1934, *Caldasia* 3: 31–32. 1941

(Toxic. Squeezed fruit for sinusitis, liver complaints.)

in English: anchovy pear

in Peru: membrillo, sacha mango, sacha manguar

Grias peruviana Miers (*Grias grandifolia* Pilg.; *Grias maranonensis* R. Knuth; *Grias tessmannii* R. Knuth)

Peru.

See *Transactions of the Linnean Society of London* 30(2): 301. 1874 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 142. 1924, *Repertorium Specierum Novarum Regni Vegetabilis* 35: 339–340. 1934

(For sinusitis, catarrh, antifungal, emetic, purgative.)

in English: sachamangua tree

in Peru: apai, mancoa, sacha mango, sacha mangua

Griffonia Baill. Fabaceae (Caesalpinioideae, Cercideae, Leguminosae)

See *Adansonia* 6: 188, t. 2. 1865, *Genera Plantarum* [Bentham & Hooker f.] 1(2): 577, 602, 608. 1865 and *Agricultural and Forest Entomology* 5(4): 317–323. 2003, *Toxicology Letters* 150(1): 111–122. 2004.

Griffonia physocarpa Baill. (*Bandeiraea tenuiflora* Benth.)

Tropical Africa. Liana, shrub, woody vine, many-branched, fleshy calyx, smooth leathery stipitate inflated oblique-cylindrical pods, a black dye is obtained from the leaves

See *Adansonia* 6: 188, t. 2, f. 2–5. 1865, *Trans. Linn. Soc. London* 25(2): 307. 1865

(Leaves decoction drunk against stomach troubles, intestinal worms, venereal diseases, also a wash for children with fever. Macerated leaves taken as an aphrodisiac. Ash of leaves applied externally to treat bone fractures.)

Griffonia simplicifolia (M. Vahl ex DC.) Baill. (*Bandeiraea simplicifolia* (M. Vahl ex DC.) Benth.; *Bandeiraea simplicifolia* Benth.; *Schotia simplicifolia* M. Vahl ex DC.)

Tropical Africa. Liana, tree or shrub, woody climber, papery leaves, balloon-shaped oblique-cylindrical leathery fruits

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 508. 1825, *Adansonia* 6: 197. 1866, *Transactions of the Linnean Society of London* 25(2): 306, in nota. 1865 and *Alternative Medicine Review* 3(4): 271–280. 1998, *Medicinal Plant Conservation* 6: 23–24. 2000

(Whole plant aphrodisiac, purgative, astringent, stomachic, emetic. Seeds antidepressant, carminative, analgesic, aphrodisiac, insecticidal, antibiotic, for kidney ailments, used to treat mood disorders, depression, insomnia, anxiety, diarrhea, vomiting and stomachache, fibromyalgia, headaches and chronic headaches, eating disorders, to reduce food intake and body weight; high content in 5-hydroxy-tryptophan (5-HTP) particularly in the seed. Leaf decoction used as an emetic, aphrodisiac, cough medicine. Pulped bark applied to syphilitic sores.)

Griffonia speciosa (Welw. ex Benth.) Taub. (*Bandeiraea speciosa* Welw. ex Benth.; *Griffonia speciosa* Taub.)

Tropical Africa.

See *Trans. Linn. Soc. London* 25(2): 306, t. 40. 1865, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 3 (1892) 147. 1892

(Aerial parts decoction drunk against stomach troubles, intestinal worms, venereal diseases. Young leaves eaten as an aphrodisiac. Ash of leaves applied externally to treat bone fractures.)

Griffonia tessmannii (De Wild.) Compere (*Bandeiraea tessmannii* De Wild.)

Tropical Africa.

See *Bull. Jard. Bot. État Bruxelles* 32: 203. 1962

(Leaves decoction drunk against stomach troubles, intestinal worms, venereal diseases, also a wash for children with fever. Macerated young leaves taken as an aphrodisiac. Ash of leaves applied externally to treat bone fractures.)

Grimmeodendron Urb. Euphorbiaceae

See *Symbolae Antillanae* seu *Fundamenta Florae Indiae Occidentalis* 5: 397. 1908.

Grimmeodendron jamaicense Urban

West Indies.

See *Symb. Antill.* 5: 399. 1908

(Skin irritant, dangerous for the eyes.)

Grindelia Willd. Asteraceae

For the German botanist David Hieronymus Grindel, 1777–1836, apothecary, physician, author of *Fasslich dargestellte Anleitung zur Pflanzenkenntniss*. Riga 1804, *Russisches Jahrbuch der Pharmacie*, herausgegeben von D.H.G. Riga 1803 and *Handbuch der theoretischen Chemie zu akademischen Vorlesungen*. Dorpat 1808; see *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 1(4): 259–261. 1807, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 402. Ansbach 1852.

Grindelia camporum Greene (*Grindelia camporum* Greene var. *camporum*; *Grindelia camporum* Greene var. *parviflora* Steyerl.; *Grindelia paludosa* Greene; *Grindelia procera* Greene; *Grindelia robusta* Nutt.)

North America. Perennial herb

See *Trans. Amer. Philos. Soc.* ser. 2, 7: 314. 1840, *Man. Bot. San Francisco* 172. 1894 and *Madroño* 2: 22. 1931, *Ann. Missouri Bot. Gard.* 21: 534. 1934, *Novon* 2: 216. 1992, *Sida* 15: 539–546. 1993

(Antispasmodic, analgesic, stomachic, antiseptic, blood purifier, used for asthma, dermatitis, poison oak, boils and wounds.)

in English: Great Valley gumweed

Grindelia decumbens Greene (*Grindelia decumbens* Greene var. *subincisa* Steyerl.; *Grindelia decumbens* var. *subincisa* (Greene) Steyerl.; *Grindelia subincisa* Greene)

North America. Perennial

See *Pittonia* 3(15B): 102. 1896 and *Pittonia* 4(22C): 154–155. 1900, *Annals of the Missouri Botanical Garden* 21(3): 503. 1934

(Infusion of plant used for stomachache.)

in English: reclined gumweed

Grindelia hirsutula Hook. & Arn. (*Grindelia acutifolia* Steyerl.; *Grindelia camporum* Greene; *Grindelia camporum* var. *bracteosa* (J.T. Howell) M.A. Lane; *Grindelia camporum* var. *davyi* (Jeps.) North America. Perennial

See *The Botany of Captain Beechey's Voyage* 147. 1833, *Transactions of the American Philosophical Society*, new series, 7: 314. 1840 and *Annals of the Missouri Botanical Garden* 21(1): 227. 1934, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Madroño* 29: 62, 274. 1982, *Amer. J. Bot.* 73: 297–303. 1986

(Plant or roots antispasmodic, emetic, expectorant, antiseptic, stomachic, blood tonic and purifier, used for asthma, cough, pneumonia, tuberculosis, severe stomachache, bladder trouble, swellings, venereal disease, smallpox and measles.)

in English: hairy gumweed, Hall's gumweed, Idaho gumweed, marsh gumplant, pointed gumweed, San Diego gumplant, San Francisco gumplant

Grindelia squarrosa (Pursh) Dunal (*Donia squarrosa* Pursh; *Grindelia aphanactis* Rydb.; *Grindelia nuda* Alph. Wood; *Grindelia nuda* var. *aphanactis* (Rydb.) G.L. Nesom; *Grindelia serrulata* Rydb.; *Grindelia squarrosa* var. *nuda* (Alph. Wood) A. Gray; *Grindelia squarrosa* var. *serrulata* (Rydb.) Steyerm.)

North America. Perennial, biennial or annual, erect, branching, alternate oblong toothed glandular leaves, strong-smelling substance, flower heads have pale yellow ray flowers, pointed sticky bracts

See *Flora Americae Septentrionalis*; or, ... 2: 559. 1814[1813], *Mémoires du Muséum d'Histoire Naturelle* 5: 50. 1819 and

Taxon 30: 515–516. 1981, M.R. Gilmore, *Uses of Plants by the Indians* ... 81. 1991

(Infusion of stems and leaves antispasmodic, bitter, snakebite remedy, emetic, stomachic, drunk for asthma, colds, pneumonia, fever, whooping cough, tuberculosis. A decoction of the plant given to children as a remedy for colic. Insecticide. Poultice of flower applied to ant bites. Veterinary medicine, a wash for saddle galls and sores on horses' back, to relieve the irritation caused by poison ivy; sticky flowers rubbed on horses' sore hooves.)

in English: curly buffalo, curly-cup gum-weed, curlycup gumweed, curlytop gumweed, gum-plant, gum-weed, rosinweed, stick-head, sticky head, stickyheads, strong herb, tarweed

in North America: pezhe-wasek (Omaha-Ponca), bakskitits (Pawnee)

Griselinia Forst. & Forst.f. Cornaceae (Griselinaceae)

After the Italian botanist Francesco Grisellini, 1717–1783, naturalist, his works include *Memorie Anedote spettanti alla vita e agli studii del ...filosofo ... Paolo Servita*. Losana 1760, *Nuova maniera di seminare e coltivare il Formento*. Venegia 1765 and *Socrate filosofo sapientissimo*. Venezia 1755; see Forster, Johann Reinhold (1729–1798), *Characteres generum plantarum/* quas in itinere ad insulas maris Australis, collegunt, descripserunt, delineant, annis 1772–1775. Joanne Reinoldus Forster ... et Georgius Forster. Londini: B. White, T. Cadell, & P. Elmsly, 1776, Forster, Georg (1754–1794), *Florulae Insularum Australium prodromus* 75. Gottingae, 1786, *Annals of Natural History* 3: 261. 1839, Raoul, Etienne Fiacre Louis (1815–1852), *Choix des plantes de la Nouvelle-Zélande*. Paris, Fortin, Mason et cie; [etc.] 1846 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 109. 1989, *Novon* 9(4): 550. 1999.

Griselinia littoralis (Raoul) Raoul (*Griselinia littoralis* Raoul; *Pukateria littoralis* Raoul)

New Zealand.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 2: 120. 1844

(Used for constipation.)

in English: broadleaf

Maori name: kapuka, papauma

Gronovia L. Loasaceae

Named after the Dutch botanist Johan Frederik (Jan Fredrik, Johannes Fridericus) Gronovius, 1686–1762, among his writings are *Flora orientalis*, sive recensio plantarum, quas botanicorum coryphaeus Leonhardus Rauwolfus, medicus

augustanus, annis 1573–1575 in Syria, Arabia, Mesopotamia, Babylonia, Assyria, Armenia et Judaea crescentes observavit et collegit ... Lugduni Batavorum [Leiden] 1755, *Disputatio medico-botanica inauguralis, camphorae historiam exhibens*. [Leyden 1715], *Flora virginica* exhibens plantas quas ... Johannes Clayton in Virginia observavit atque collegit. Leiden 1739–1743 and *Index supellectilis lapideae* quam collegit J.F.G. Lugduni Batavorum 1740. See Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, William Darlington, *Memorials of John Bartram and Humphry Marshall*. Philadelphia 1849 and J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Royal Botanic Gardens, Kew, London 1906, Ernest Earnest, *John and William Bartram, Botanists and Explorers 1699–1777, 1739–1823*. Philadelphia 1940, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 175. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 90. 1965, Edmund Berkeley and Dorothy Smith Berkeley, *Dr. Alexander Garden of Charles Town*. 376. University of North Carolina Press [1969], Joseph Ewan, ed., *A Short History of Botany in the United States*. New York and London 1969, Frans A. Stafleu, *Linnaeus and the Linnaeans*. The spreading of their ideas in systematic botany, 1735–1789. Utrecht 1971, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 117–118. Palermo 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, *Fl. Veracruz* 110: 1–27. 1999, *Am. J. Bot.* 88(2): 326–336. 2001.

Gronovia scandens L. (*Gronovia humboldtiana* Schult.; *Gronovia jacquiniana* Roem.)

Mexico, Panama. Slender herbaceous vine, broadly cordate alternate lobed leaves

See *Species Plantarum* 1: 202. 1753, Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Collectanea ad Botanicam, Chemiam, et Historiam naturalem spectantia* [cum supplemento] Vindobonæ, 1786–1796, *Systema Vegetabilium* 5: 492. 1819, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 108. 1846 and *Regnum Veg.* 127: 51. 1993

(Whole plant covered with barbed stinging hairs.)

in South America: chichicaste, Juan caliente, pega pega, pica pica

in Venezuela: pega pega de bejuco

Grusonia F. Rchb. ex Britton & Rose Cactaceae

Named for the German privy councillor Hermann Gruson, 1821–1895, a friend and lover of cacti; see *Proc. Amer. Acad. Arts* 3: 289, 302. 1856, *Monatsschr. Kakteenk.* 4: 110. 1894, *Monatsschrift für Kakteenkunde* 6: 177. 1896 and *The Cactaceae*; descriptions and illustrations of plants of the

cactus family (Britton & Rose) 1: 215. 1919, *Kaktus-ABC* [Backeb. & Knuth] 114, 410. 1936, *Cactáceas y Suculentas Mexicanas* 17(4): 118. 1972, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997, *Studies in Opuntioideae (Cactac.) (Succ. Pl. Res., 6)* 48. 2002, *Tephrocactus Study Group* 12(3): 42–43. 2006.

Grusonia reflexispina (Wiggins & Rollins) E.F. Anderson (*Corynopuntia reflexispina* (Wiggins & Rollins) Backeb.; *Opuntia reflexispina* Wiggins & Rollins)

North America.

See *Monatsschrift für Kakteenkunde* 6: 177. 1896 and *Contributions from the Dudley Herbarium* 3(8): 275–277, t. 59, f. 1–2. 1943, *Die Cactaceae* (Backeberg) 1: 365. 1958, *Cactus and Succulent Journal* (Los Angeles) 71(6): 324–325. 1999

(Roots cooked in ashes and eaten as a cure for diarrhea.)

Guadua Kunth Poaceae (Gramineae)

From the vernacular name, sometimes in *Bambusa*, type *Guadua angustifolia* Kunth, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 150. 1822, *Synopsis Plantarum* 1: 253. 1822, *Die Natürlichen Pflanzenfamilien* 2(2): 95. 1887 and *Österreichische Botanische Zeitschrift* 53: 194. 1903, *Fieldiana, Botany* 24(2): 38–331. 1955, *Taxon* 6(7): 203. 1957, Leonardo Tascón, *Diccionario de provincialismos y barbarismos del Valle del Cauca y quechuismos usados en Colombia*. Biblioteca de la Universidad del Valle, 7, Cali, Editorial Norma 1961, Arturo Pazos, *Glosario de quechuismos colombianos*. 2a. ed., Pasto, Imprenta del Departamento, Secretaria de Educación Pública, Departamento de Extensión Cultural 1966, *Flora Ilustrada Catarinense* 1(Gram.-Supl.): 1–78. 1967, *Smithsonian Contributions to Botany* 9: 1–148. 1973, *Ceiba* 19(1): 1–118. 1975, *Annals of the Missouri Botanical Garden* 68: 15–47. 1981, *Fl. Guaiacum L. Zygophyllaceae

From the Spanish South American vernacular name, *guaiac* or *guayaco*, for *Guaiacum officinale* L., *lignum vitae*. See Niccolò Massa, *Liber de morbo gallico*. [Small 4to, second edition, one tract of the book is devoted to *Guaiacum*, or *lignum indicum*.] Venice 1532; Josephus Tectander, ed., *Morbi Gallici curandi ratio ... a variis ... medicis conscripta*: nempe P.A. Matthaëolo, etc. [Included is the first work describing syphilis of the newborn by P.A. Mattioli; it contains a long section on guaiacum by the physician to Maximilian I, Nicholas Pol (ca. 1470–1532); Niccolò (Nicola) Massa (1489–1569) describes the neurological manifestations of syphilis, he speaks of Jamaican sarsaparilla; essays by Benedetto Vettori (1481–1561), Angelo Bolognini (fl. 1506–1517) and Juan Almenar appear in the present work.] Basel 1536. See *Species Plantarum* 1: 381–382. 1753 and *Fieldiana, Bot.* 24(5): 393–398. 1946, Garrison and Morton, *Medical Bibliography*. 2365. 1961, Richard J. Durling, *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 2991. 1967, *Taxon* 51(1): 203–204. 2002.

***Guaiacum coulteri* A. Gray**

Mexico.

See *Species Plantarum* 1: 381–382. 1753, Gray, Asa (1810–1888), *Plantae Novae Thurberianae* 312. Cambridge, Mass., 1854

(A tea used for arthritis, dysentery, diarrhea, a good treatment for sore throats and bronchitis. Not for use during pregnancy, moderate toxicity.)

Common name: guayacan

Guaiacum officinale L. (*Guajacum officinale* L.)

West Indies. Trees, hairy flat petals, flat 2-winged fruit

See Sloane, Hans, Sir (1660–1753), *A voyage to the islands Madera, Barbados, Nieves, S. Christophers and Jamaica* t. 222, f. 3–6. London, 1707–1725, *Species Plantarum* 1: 381–382. 1753

(Poisonous wood and seeds. Resinous gum in rheumatism, syphilis, gout, tonsillitis.)

in English: lignum vitae

Guaiacum sanctum L. (*Guaiacum guatemalense* Planch. ex Rydb.)

West Indies. Trees, evergreen, opposite compound even-pinnate leaves, dark green shiny leaflets, glabrous spoon-shaped blue petals twisted at the base, long-stalked flowers, 5-lobed capsule, seed with red aril

See *Species Plantarum* 1: 382. 1753 and *Fieldiana, Bot.* 24(5): 393–398. 1946, *Bot. Commel.* 202. 1983

(Infusion to relieve back strain.)

Common name: lignum-vitae

Guapira Aublet Nyctaginaceae

From a vernacular name, see *Histoire des plantes de la Guiane Française* 1: 308, pl. 119. 1775, *Florae Fluminensis* 3: 139. 1829[1825] and *Fieldiana, Bot.* 24(4): 174–192. 1946.

Guapira discolor (Spreng.) Little (*Guapira bracei* (Britton) Little; *Guapira discolor* (Spreng.) Lundell; *Guapira floridana* (Britton) Lundell; *Guapira globosa* (Small) Little; *Guapira longifolia* (Heimerl) Little; *Pisonia discolor* Spreng.; *Torrubia discolor* (Spreng.) Britton; *Torrubia longifolia* (Heimerl) Britton)

West Indies, Brazil. Small tree, dioecious, variable, unarmed, small alternate to opposite or subopposite leaves bluntly rounded, flowers in long-stalked racemes, smooth fleshy somewhat pear-shaped red fruit in short-stalked clusters

See *Histoire des plantes de la Guiane Française* 1: 308, pl. 119. 1775, *Systema Vegetabilium*, editio decima sexta 2: 168. 1825 and *Bulletin of the Torrey Botanical Club* 31(11): 613. 1904, *Phytologia* 17(5): 368. 1968, *Wrightia* 4(2): 80. 1968

(Leaves infusion for typhoid fever.)

in English: blolly, pigeon berry

Guarea Allam. ex L. Meliaceae

From a Cuban/Antillan vernacular name; see *Mantissa Plantarum* 2: 150. 1771 and *Fieldiana, Bot.* 24(5): 444–468. 1946, Maria Helena Farelli, *Plantas que curam e cortam feitiços*. Rio de Janeiro 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 633. Stuttgart 1993, Pierre Fatumbi Verger, *Ewé: The Use of Plants in Yoruba Society*. São Paulo 1995, Celia Blanco, *Santeria Yoruba*. Caracas 1995.

Guarea cedrata (A. Chev.) Pellegr. (*Guarea alitipetiolata* De Wild.; *Guarea cedrata* Pellegr. ex A. Chev.; *Khaya cunahailata* De Wild.; *Trichilia cedrata* A. Chev.)

Tropical Africa. Tree, aromatic, gum exudation often present, seeds covered with bright orange aril

See *Les végétaux Utiles de l'Afrique Tropical Française* 5: 215. 1909, *Bulletin de la Société Botanique de France* 75: 480. 1928

(The wood dust may cause irritation to the skin. Stem bark for fevers and piles, leprosy; decoction taken to treat stomachache, food poisoning and gonorrhea, as a wash against kidney pain, bleeding after childbirth, rheumatism.)

in English: bosse, light bosse, Nigerian pearwood, pink African cedar, pink mahogany, scented guarea

in Central African Republic: injumbo

in Gabon: bosse

in Zaire: ngongongo, sakba

Guarea glabra Vahl (*Carapa trijuga* Willd. ex C. DC., nom. nud.; *Guarea bijuga* C. DC.; *Guarea brachystachya* Sesse & Mocino ex DC.; *Guarea brevianthera* C. DC.; *Guarea bullata* Radlk.; *Guarea chiapensis* S.F. Blake; *Guarea chiricana* Standl.; *Guarea cook-griggii* C. DC.; *Guarea donnell-smithii* C. DC.; *Guarea erythrocarpa* C. (Postpartum remedy, emetic, purgative.)

Guarea guidonia (L.) Sleumer (*Guarea eggersii* C. DC.; *Guarea leticiana* Harms; *Guarea rusbyi* (Britton) Rusby; *Guarea rusbyi* Rusby; *Guarea trichilioides* L., nom. illeg.; *Samyda guidonia* L.; *Sycocarpus rusbyi* Britton)

Tropical America. Tree, inflorescences narrowly paniculate, petals white or cream, capsule valved

See *Species Plantarum* 1: 443. 1753, *Mant. Pl. Altera* 228. 1771, *Mem. Torrey Bot. Club* 6: 17. 1896 and *Annuaire Conserv. Jard. Bot. Genève* 10: 176. 1907, *Notizbl. Bot. Gart. Berlin-Dahlem* 13: 505. 1937, *Taxon* 5(8): 194. 1956

(Bark boiled and the extract used for the treatment of thrush in babies and as a purgative and emetic.)

in English: alligator wood, bastard crabwood, West Indian redwood

in Tropical America: acajou, atapio, buck puke, buck vomit, karaba balli, latapi, latapi caspi, requia, requia colorada, trompillo

Guarea laurentii De Wild. (*Trichilia guentheri* Harms; *Trichilia reygartii* De Wild.)

Central African Republic, Gabon. Tree, aromatic, latex in the bark, closely resembles *Guarea thompsonii*

See *Ann. Mus. Congo Belge, Bot.* sér. 5, 2[3]: 263. 1908 [1907–1908 publ. Jul 1908], *Repert. Spec. Nov. Regni Veg.* 13: 375. 1914, *Notizbl. Bot. Gart. Berlin-Dahlem* 7: 230. 1917

(The bark is used as purgative.)

in Central African Republic: mbeka, mopokoto

Guarea pubescens (Rich.) A. Juss. subsp. *pubescens*

South America. Small tree, calyx red or pink, petals cream or white, reddish purple capsule

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 108. 1792, *Mémoires du Muséum d'Histoire Naturelle* 19: 241. 1830

(Root and stem decoction emetic.)

Guarea thompsonii Sprague & Hutch. (for the British plant collector Henry Nilus Thompson, d. 1938 Burma; see F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 79. 1971, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 679. London 1994)

Tropical Africa. Tree, white latex or gummy exudate, cedar-like smell, bright orange aril covering seeds

See *Bulletin of Miscellaneous Information Kew* 1906: 245. 1906

(The wood dust may cause irritation to the skin and mucous membranes. Bark decoction applied to treat kidney pain, rheumatism and leprosy, to stop bleeding after childbirth; bark maceration drunk as a strong purgative.)

in English: Benin mahogany, black guarea, cedar, cedar mahogany, close-grained mahogany, dark bosse, scented mahogany, sweet cedar

in Cameroon: mbolon, mobeka, njombo

in Central African Republic: injumbo, mbenja, mo beka, mo'beke, mobeka

in Congo: diambi

in Gabon: bosse

in Ghana: bosi, busi, kwadwuma, mpaya, obobonekhui, obobonikiwi, sapele, teminini, teninino

in Ivory Coast: bossé, douamoro, koiguibe, metchibanaie, mutigbanaye, nuedezo

in Liberia: bo in dah, kaffi, mutibanaye, mutigbanaie, nvedzo

in Nigeria: obobonekhui, obobonekwi, obobonikiwi, ogun, sapele, sidu; ofe, ofe-olofun, ofuye (Yoruba); obobonekwi (nekwi = black) (Edo); ugbokpo (Igbo); borun, dirimo ako (Ijaw)

Guatteria Ruiz & Pavón Annonaceae

For the Italian botanist Giovanni Battista Guatteri, 1743 (or 1739, Castelnuovo di Sotto, Reggio Emilia)–1793, professor of botany, founder of the new Botanical Garden of Parma and first Praefectus from 1770 to 1793; see *Florae Peruvianae, et Chilensis Prodromus* 85. 1794, *Systema Vegetabilium Florae Peruvianae et Chilensis* 1: 145. 1798, *Journal of the Proceedings of the Linnean Society* 5: 69. 1861 and Francesco Lanzoni, “Il fondatore dell’Orto Botanico di Parma, l’Abate Giambattista Guatteri.” in *Aurea Parma*. (Cytotoxic, antibacterial. Old inner bark infusion given in elephantiasis, for diarrhea, prostate problems; bark decoction astringent, a wash for skin sores, infections and rashes. Fruits infusion antitussive and pectoral; fruit eaten for abdominal pain. Roasted pounded seeds decoction used as a mild astringent. Magic, shaman blessed fruit juice drunk to facilitate difficult births.)

Gueldenstaedtia Fischer Fabaceae (Galegeae, Leguminosae)

in English: bastard cedar, bay cedar, jackocalaloo

in India: jenumara, rudraksh, rudrakshi mara

in Indonesia: djati blanda

in South America: bolaina negra, caca de mico, caulote, cer-ezo, chicharrón, coco, contamal, cupuaca, cupuacu, guácima, guácimo, guasmo, guazima, guazima cablote, hapayillo, huashimo, huásimo, iumanasi, llucho vainilla, moena, papayillo, pixoy, tablote, tapaculo, xuyuy, yumanasa

in Mexico: nocuana yana, ya ana, yaco de granadillo, yaco de venado, yaga yana

Gueldenstaedtia Fischer Fabaceae (Galegeae, Leguminosae)

For the Latvian botanist Johann Anton von Gueldenstaedt (Güldenstädt), 1745–1781, botanized in Caucasus, a companion of the German naturalist Samuel Gottlieb Gmelin (1745–1774, a nephew of J.G. Gmelin) in S.E. Russia 1768–1775, wrote *Reisen durch Russland und im Caucasischen Gebürge*. St. Petersburg 1787–1791. See Peter Simon Pallas, *Flora Rossica*. St. Petersburg 1784–1788, Nicolas-Gabriel Clerc, called Le Clerc, *De la contagion, de sa nature, de ses effets, de ses progres, et des moyens les plus surs pour la prévenir et pour y remédier*. [8vo, first edn., the terrible outbreak of plague in Moscow in 1771.] St. Petersburg 1771, *Allgemeine Geschichte der neuesten Entdeckungen welche von verschiedenen gelehrten Reisenden* [Peter Simon Pallas, S.G. Gmelin, J.I. Lepekhin] in *vielen Gegenden des russischen Reichs und Persien in der Historie, Landwirthschaft und Naturgeschichte*, etc. [Edited by Jacob Samuel Wyttenbach.] Berne 1777–1786, Charles de Mertens, *Observationes medicae de febribus putridis, de peste, nonnullisque aliis morbis*. [First edn., the Moscow plague in 1771.] Vienna 1778, *Mémoires de la Société Impériale des Naturalistes de Moscou* 6: 171. 1823 and Gordon Dunthorne, *Flower and Fruit Prints of the 18th and Early 19th Centuries*. London 1938, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 95. 1965.

Gueldenstaedtia multiflora Bunge (*Amblytropis multiflora* (Bunge) Kitag.; *Gueldenstaedtia brachyptera* Pamp.; *Gueldenstaedtia giralddii* Harms ex Diels; *Gueldenstaedtia giralddii* Harms; *Gueldenstaedtia harmsii* Ulbr.; *Gueldenstaedtia longiscapa* H. Lév.; *Gueldenstaedtia longiscapa* (Franch.) H. Lév.; *Gueldenstaedtia verna* (Georgi) Boriss.)

India, China. Perennial non-climbing herb

See *Bemerkungen einer Reise im Russischen Reich im Jahre* 1772 1: 226. 1775, *Enum. Pl. Chin. Bor.* 18. 1833 and *Bot. Jahrb. Syst.* 29(3–4): 413. 1900, *Bot. Jahrb. Syst.* 36(5, Beibl. 82): 58. 1905, *Nuovo Giorn. Bot. Ital.* xvii. 396. 1910, *Cat. Pl. Yun-Nan* 155. 1916, *Rep. Exped. Manchoukuo* Sect. IV, Pt. 4, *Index Fl. Jeholensis* 87. 1936, *Bull. Bot. Lab. Kuntze)

Tropical America. Shrub or trees, flowers solitary or in few-flowered clusters, fruits red to black eaten by parrots and other birds

See *Species Plantarum* 2: 991–992. 1753, *Nova Genera et Species Plantarum seu Prodromus* 59. 1788, *Fl. Mexic.*, ed. 2: 218. 1894 and *Repert. Spec. Nov. Regni Veg.* 17: 7. 1921,

Univ. Calif. Publ. Bot. 10: 416. 1924, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 8: 358. 1931

(Tonic tea.)

in English: spoonwood, velvet seed

in Mexico: cruzecilla

Guettarda speciosa L. (*Cadamba jasminiflora* Sonn.; *Gardenia speciosa* (L.) Roxb. ex Wight & Arn., nom. illeg.; *Gardenia speciosa* A. Rich.; *Guettarda hirsuta* Sarg., nom. illeg.; *Guettarda speciosa* var. *glabrata* DC.; *Guettarda speciosa* var. *tahitensis* (Nadeaud) Drake; *Guettarda tahitensis* Nadeaud; *Matthiola speciosa* (L.) Kuntze)

Kenya to S. Africa, Trop. & Subtrop. Asia. Shrub or small tree, oblong pubescent leaves cordate at base, white tubular fragrant flowers, silky corolla, brown fruit, near the shore

See *Species Plantarum* 2: 991–992. 1753, *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Mémoire sur la famille des Rubiacées* 160. 1834, *Silva* 5: 111. 1893 and *Kew Bulletin* 43: 496. 1988

(Astringent, febrifuge, anticholinergic, an infusion of the inner bark with boiling water a treatment for epilepsy; applied to wounds and abscesses. Flowers used for female medicine, treating hemorrhoids, as a purgative and for treating headaches. Leaves used to make a baby bath and a remedy for headaches, leaves are placed in hot water, then a towel is soaked in this water and put on the head; leaf juice carminative; pounded leaves of *Ficus hispida* and *Guettarda speciosa* taken with water as carminative to treat stomachache. Fruit mixed with coconut is a fast-acting antidote for fish poisoning.)

in English: zebra wood

in South Africa: beach false medlar

in India: bili hoovina lakki mara, tu-ma-halus, tuma halu

in Japan: hateruma-giri

in Malaysia: sea randa, selar makan

in Pacific: 'ano, fano, hano, panao, puopua, utilomar

Samoan name: puapua

in Tonga: puopua

Guevaria R.M. King & H. Rob. Asteraceae

See *Phytologia* 29: 259. 1974.

Guevaria sodiroi (Hieron.) R.M. King & H. Rob. (*Piqueria sodiroi* Hieron.)

South America.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 3(1): 18. 1794[1795] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29: 3. 1900, *Phytologia* 29: 261. 1974

(Infusion for indigestion and stomachache.)

in Ecuador: pedorrera

Guibourtia J.J. Benn. Fabaceae (Caesalpinaceae, Detarieae)

After the French pharmacologist Nicolas Jean Baptiste Gaston Guibourt, 1790–1861, author of *Histoire abrégée des Drogues simples*. Quatrième édition. Paris 1849–1851.

Guibourtia coleosperma (Benth.) J. Léonard (*Copaiba coleosperma* (Benth.) Kuntze; *Copaifera coleosperma* Benth.; *Copaiva coleosperma* (Benth.) Britton) (the specific name from the Greek *koleos* ‘sheath’ and *sperma* ‘seed’)

Southern & Eastern Africa. Perennial non-climbing tree, sapwood pale pink to white, heartwood light red-brown, bark pinkish-cream, white cream flowers in lax terminal heads, fruit a broad woody dark brown pod splitting on one side only, brown seed with a bright red aril

See *Bulletin du Jardin Botanique de l'État* 19: 403. 1949, *Phytochemistry* 67(8): 818–823. 2006

(Young leaves eaten to treat cough; leaves infusion drunk in cases of a severe cough. Veterinary medicine, for Newcastle disease, leaves and stalks pounded and added to drinking water.)

in English: African rosewood, bastard mopane, bastard teak, copalwood, false mopane, large false mopane, Rhodesian copalwood, Rhodesian mahogany

in Southern Africa: bastermopanie, machibi, motsaodi, munzauri, nsibi, oshi, ushivi

in N. Rhodesia: mushivi

in S. Rhodesia: muChiwa, umtshibi, umTshibi, umTshini

in Zambia: muzauli

Guiera Adans. ex Juss. Combretaceae

See *Genera Plantarum* [Jussieu] 320. 1789

Guiera senegalensis J.F. Gmel. (*Guiera senegalensis* Lam., hom. illegit.)

Tropical Africa. Shrub, villous achenes, in floodplain

See *Genera Plantarum* 320. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* ed. 13 2(1): 675. 1791 and *Journal of Veterinary Pharmacology and Therapeutics* 3: 261–273. 1980, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Ethnopharmacology* 67: 225–228. 1999, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 327–336, 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006

(Leaves and fruits tonic, blood purifier, febrifuge, astringent, for diarrhea and dysentery, to increase lactation; externally used as a poultice for swellings and skin diseases. Febrifuge, the decoction of the leaves of *Guiera senegalensis*, *Piliostigma thonningii*, *Piliostigma reticulatum*, *Tapinanthus bangwensis* (Engl. & K. Krause) Danser, *Tapinanthus dodoneifolius* (DC.) Danser, and *Tapinanthus ophiodes* (Sprague) Danser. Leafy twigs decoction used for bronchitis. Roots of *Gardenia ternifolia* with roots of *Guiera senegalensis* boiled with tendon of cow and the mixture is taken with cow tendon to cure impotence in males.)

in Benin: bomigué

(This plant has caused acute toxicity and abortion in cattle. The essential oil contains monoterpenes and sesquiterpenes. The plant is more toxic during the early stages of growth and if it grows on poor, sandy soils. Saponins are believed to be the cause of the toxicity to animals and may also be implicated in the abortifacient fraction. Used for arthritis, to reduce uterine swelling after childbirth; an infusion for colic and stomachache, and as an antidote. Veterinary medicine, a decoction of the herb was given to horses.)

in English: broom snakeroot, broom snakeweed, broomweed, broomweed, snake broom

in Spanish: escoba de la vibora

Gymnadenia R. Br. Orchidaceae

From the Greek *gymnos* 'naked' and *aden* 'gland', alluding to the viscidia of the stamens, see *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 5: 191, 197. 1813.

Gymnadenia orchidis Lindl. (*Gymnadenia conopsea* (L.) R.Br. var. *yunnanensis* Schltr., nom. nud.; *Gymnadenia cylindrostachya* Lindl.; *Gymnadenia delavayi* Schltr.; *Gymnadenia habenarioides* (King & Pantl.) Verm.; *Gymnadenia himalayica* Schltr.; *Gymnadenia microgymnadenia* (Kraenzl.) Naturwiss. Vereins Wuppertal* 25: 33. 1972, *Edinburgh J. Bot.* 58: 112. 2001

(Roots stimulant, tonic, nervine, used in urinary, gastric and gonadic disorders.)

in India: hathi jari, salam panja, salam punja, salep

Gymnanthes Sw. Euphorbiaceae

From the Greek *gymnos* 'naked' and *anthos* 'flower', see *The Civil and Natural History of Jamaica* in Three Parts 339. 1756, *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 2: 118, pl. 3. 1820[1821], *Archiv für Naturgeschichte* 7(1): 181, 184. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1193. 1866 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988, *Fieldiana, Bot.*, n.s. 36: 1–169. 1995, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Gymnanthes lucida Sw. (*Ateramnus lucidus* (Sw.) Rothm.; *Excoecaria lucida* (Sw.) Sw.; *Sebastiania lucida* (Sw.) Müll. Arg.) (*Ateramnus* P. Browne, from the Greek *ateramnus* 'unsoftened, hard, stubborn'.)

Florida, Caribbean, Mexico to Central America. Tree, monoecious, evergreen to semi-deciduous, leaves alternate, many male and a single female flower in the same catkin

See *Nova Genera et Species Plantarum seu Prodromus* 96. 1788, *Flora Indiae Occidentalis* 2: 1121. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1181. 1866 and *Feddes Repert. Spec. Nov. Regni Veg.* 53: 5. 1944

(Irritant, dangerous.)

in English: crab bush, crab wood, crabwood, goatwood, oyster-wood, poison wood, West Indian poison tree

Gymnema R. Br. Asclepiadaceae (Apocynaceae)

From the Greek *gymnos* 'naked' and *nema* 'thread', referring to the hairless staminal filaments or to the projecting style; see *Species Plantarum* 1: 211–214. 1753, *Prodromus Florae Novae Hollandiae* 461–462. 1810, *On the Asclepiadeae* 22. 1810, Robert Brown, "On the Asclepiadeae." *Memoirs of the Wernerian Natural History Society*. 1: 33. Edinburgh 1811, *Genera Plantarum* 595. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 623–624. 1844 and *Gen. S. African Fl. Pl.*, ed. 2, 616. 1951.

Gymnema inodorum (Loureiro) Decaisne (*Asclepias tingens* Roxb.; *Asclepias tingens* Buch.-Ham. ex Roxb.; *Bidaria inodora* (Loureiro) Decaisne; *Bidaria tingens* (Roxburgh ex Sprengel); *Bidaria tingens* (Roxb.) Decne.; *Cynanchum inodorum* Lour.; *Cynanchum inodorum* Loureiro) Decaisne; *Ganosma inodora* Lour. ex Decne.; *Gymnema tingens* Roxburgh ex Sprengel)

China.

See *Flora Cochinchinensis* 1: 166. 1790, *Hortus Bengalensis*, or a catalogue ... 21. 1814, *Plants of the Coast of Coromandel*

3: 34–35, t. 239. 1815, *Systema Vegetabilium*, editio decima sexta 1: 844. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 53–54. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 551, 623–624. 1844 and *Australian Systematic Botany* 8(5): 692. 1995

(All parts used for infantile paralysis and pulmonary tuberculosis.)

in English: Kwangtung gymnema

in China: guang dong chi geng teng

Gymnema khandalense Santapau (*Bidaria khandalensis* (Santapau) A.P. Jagtap & N.P. Singh)

India. Climbing shrub, milky white latex, slightly fragrant flowers in axillary umbellate cymes, yellow campanulate corolla, pubescent cylindrical follicles

See *Kew Bulletin* 1948: 486. 1949, *Biovigyanam* 16(1): 62. 1990

(All parts used for the treatment of rheumatism, skin diseases, blood-vessel inflammation, bronchitis, hemorrhoids, poisonous bites and snakebites. Dried leaves for diabetes; leaf juice given for diabetes and gastric disorders; aqueous extract of leaves given in urinary troubles and diabetes; roots and leaves for stomachache. Tuberous roots infusion drunk for snakebite.)

Gymnema montanum (Roxb.) Hook.f. (*Asclepias montana* Roxb.; *Bidaria montana* (Roxb.) M.A. Rahman & Wilcock)

India.

See *Species Plantarum* 1: 214–217. 1753, *Flora Indica*; or, descriptions of Indian Plants 2: 45–46. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 623–4. 1844, *The Flora of British India* 4(10): 31. 1883 and *Blumea* 34: 99. 1989

(Antiinflammatory.)

Gymnema sylvestre (Retz.) R. Br. ex Schult. (*Apocynum alterniflorum* Lour.; *Asclepias geminata* Roxb.; *Cynanchum subvolubile* Schumach.; *Gymnema affine* Decne.; *Gymnema alterniflorum* (Lour.) Bull.* 314. 1986, M.R. Gilmore, *Uses of Plants by the Indians* ... 37–38. 1991

(Seeds and fruit pulp have poisoned humans and cattle, the ripe seed contains hydrocyanic acid; the foliage has caused the death of sheep, leaves used as a fly poison. The seeds contain a low concentration of the alkaloid cytisine, and chewing one or two seeds would not be enough to produce toxic results. Root bark laxative, stimulant, tonic, diuretic, analgesic, as a rectal injection in cases of constipation.)

in English: American coffee berry, Kentucky coffee-tree, Kentucky mahogany, nickers-tree, stump tree

in North America: chicot, tohuts (Pawnee)

in China: bei me fei zao jia

Gymnopetalum Arn. Cucurbitaceae

From the Greek *gymnos* ‘naked’ and *petalon* ‘a petal’, see *Species Plantarum* 2: 1012–1013. 1753, *Madras J. Lit. Sci.* 12: 52. 1840, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 3: 278. 1841.

Gymnopetalum cochinchinense (Lour.) Kurz (*Bryonia cochinchinensis* Lour.; *Gymnopetalum cochinchinense* Kurz; *Gymnopetalum cochinchinensis* (Lour.) Kurz; *Tripodanthera cochinchinensis* (Lour.) M. Roem)

Vietnam, SE Asia.

See *Flora Cochinchinensis* 2: 595–596. 1790, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 48. 1846, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 40: 57. 1871

(Fruit said to be very poisonous. Leaves decoction for miscarriage, tetanus.)

Malay names: bertimum tikus, tuwasah

Gymnosperma Less. Asteraceae

From the Greek *gymnos* ‘naked’ and *sperma* ‘a seed’, see *Mag. Neuesten Entdeck. Gesammten Naturk. Ges. Naturf. Freunde Berlin* 1: 140. 1807, Sprengel, Kurt Polycarp Joachim (1766–1833), *Novi Proventus Hortorum Academicorum Halensis et Berolinensis*. 36–37. Halae, [Dec 1818–1819], *Nova Genera et Species Plantarum* (folio ed.) [H.B.K.] 4: 208–209. 1820[1818], Lessing, Christian Friedrich (1809–1862), *Synopsis Generum Compositarum* 194. Berolini, sum-tibus Dunckeri et Humblotii, 1832 and *Amer. J. Bot.* 86(7): 1003–1013. 1999.

Gymnosperma glutinosum (Spreng.) Less. (*Gymnosperma corymbosum* DC.; *Gymnosperma glutinosum* Less.; *Gymnosperma multiflorum* DC.; *Gymnosperma scoparium* DC.; *Selloa corymbosa* Kuntze; *Selloa glutinosa* Spreng.; *Selloa multiflora* (DC.) Kuntze; *Selloa multiflora* Kuntze; *Selloa scoparia* Kuntze; *Selloa scoparia* (DC.) Kuntze; *Xanthocephalum glutinosum* (Spreng.) Shinners)

Mexico.

See *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 36–37. Halae, [1818–1819], *Nova Genera et Species Plantarum* (folio ed.) [H.B.K.] 4: 208–209. 1820[1818], *Synopsis Generum Compositarum* ... 194. 1832, *Prodr.* (DC.) 5: 312. 1836, *Revis. Gen. Pl.* 1: 362. 1891 and *Field & Laboratory* 18(1): 29. 1950, *Fieldiana, Bot.* 24(12): 128–164, 483–495. 1976, *Amer. J. Bot.* 63: 1393–1403. 1976, *Amer. J. Bot.* 64: 680–686, 791–798. 1977

(Used to treat diarrhea. Stem and flowers, a bath for a person suffering from stiff joints.)

in English: naked-seed weed

Gymnosporia (Wight & Arnott) Hook.f. Celastraceae

Greek *gymnos* ‘naked’ and *sporos* ‘a seed’, referring to the appearance of the seeds, see *Introductio ad Historiam Naturalem* 228. 1777, *Prodr. Fl. Ind. Orient.* 1: 159. 1834, *Abhandlungen der königlichen Böhmisches Gesellschaft der Wissenschaften* 3: 463. 1845, *Gen. Pl.* [Bentham & Hooker f.] 1(1): 359, 365. 1862, *Flora Australiensis: a description* ... 1: 400. 1863 and *S. African J. Bot.* 65(2): 177–181. 1999, *Taxon* 55(2): 517, 519, 520, 521, 522, 523, 524. 2006.

Gymnosporia senegalensis (Lam.) Loes. (*Catha grossulariae* Tul.; *Catha senegalensis* (Lam.) G. Don; *Celastrus saharae* Batt.; *Celastrus senegalensis* Lam.; *Celastrus senegalensis* Lam. var. *inermis* A. Rich.; *Gymnosporia antunesii* Loes.; *Gymnosporia baumii* Loes.; *Gymnosporia benguelensis* Loes.; *Gymnosporia crenulata* Engl.; *Gymnosporia dinteri* Loes.; *Gymnosporia eminiiana* Loes.; *Gymnosporia eremoecusa* Loes.; *Gymnosporia grossulariae* (Tul.) Loes.; *Gymnosporia intermedia* Chiov.; *Gymnosporia senegalensis* Loes.; *Gymnosporia senegalensis* (Lam.) Loes. var. *inermis* (A. Rich.) Loes.; *Gymnosporia senegalensis* (Lam.) Loes. var. *spinosa* Engl. ex Loes.; *Maytenus baumii* (Loes.) Exell & Mendonça; *Maytenus senegalensis* (Lam.) Exell)

Tropical Africa. Tree, small tree or shrub, corolla pale whitish-green, see also *Maytenus senegalensis* (Lam.) Exell

See *Encyclopédie Méthodique, Botanique* 1: 661. 1785, *A General History of the Dichlamydeous Plants* 2: 10. 1832, *Annales des Sciences Naturelles; Botanique, série 4* 8: 99–100. 1857, *Die Natürlichen Pflanzenfamilien* 3(5): 207. 1892, *Bot. Jahrb. Syst.* xvii. (1893) 541. 1893 and *Notul. Syst.* (Paris) 10(4): 173–206. 1942, *Boletim da Sociedade Broteriana*, ser. 2 26: 223. 1952

(Root bark used to treat dysentery, diarrhea, fever and rheumatism. Root bark and leaves anthelmintic, laxative, astringent, gastrointestinal remedy, for dysentery, diarrhea. Roots used to treat pneumonia. Roots, leaves and bark a remedy for snakebite.)

in Tanzania: chongalindi

Gymnotheca Decne. Saururaceae

From the Greek *gymnos* 'naked' and *theke* 'a case, ovary', see *Species Plantarum* 1: 341. 1753, *Botanographie Élémentaire* 453. 1826, *Ann. Sci. Nat., Bot.*, sér. 3. 3: 100, t. 5. 1845 and *Acta Bot. Yunnan.* 13(3): 303–307. 1991.

Gymnotheca chinensis Decne. (*Saururus cavaleriei* H. Léveillé)

China.

See *Hort. Brit.* [Loudon] 144. 1830, *Ann. Sci. Nat., Bot.*, sér. 3. 3: 100. 1845 and *Repert. Spec. Nov. Regni Veg.* 10(243–247): 149. 1911, Tseng Yung-chien. *Saururaceae*. In: Tseng Yung-chien, ed., *Fl. Reipubl. Popularis Sin.* 20(1): 4–11. 1982

(Astringent, for headache, diarrhea.)

in China: luo shuo

Gynandropsis DC. Capparaceae (Capparidaceae, Cleomaceae)

Greek *gyne* 'female', *andros* 'male' and *opsis* 'appearance', referring to the stamens, inserted at the top of the ovary; see

Species Plantarum 2: 671–672. 1753, *Prodr.* (DC.) 1: 237. 1824, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 409. Ansbach 1852.

Gynandropsis gynandra (L.) Briq. (*Cleome gynandra* L.; *Cleome pentaphylla* L.; *Cleome pentaphylla* Willd.; *Gynandropsis gynandra* Merr.; *Gynandropsis pentaphylla* (L.) DC.; *Gynandropsis pentaphylla* DC.; *Pedicellaria pentaphylla* (L.) Schrank; *Pedicellaria pentaphylla* Schrank)

East Africa. Annual herb, erect, many-branched, glandular-pubescent, root a taproot, leaves alternate, inflorescence a terminal raceme or corymb, flowers white or pale pink, viscid-pubescent capsule spindle-shaped splitting lengthways, dark brown round seeds, in waste and arable land, used as a vegetable, see also *Cleome gynandra* L.

See *Annuaire du Conservatoire et Jardin Botaniques de Genève* 17: 382–383. 1914, *Enum. Philipp. Fl. Pl.* ii. 209. 1923, *Acta Bot. Indica* 3: 136–141. 1975, *Taxon* 29: 360–361. 1980, *Journal of Palynology* 16: 85–105. 1980, *Veterinary Parasitology* 42(1–2): 123–136. 1992, *Ernstia* 10(2): 53. 2000, *Journal of Ethnopharmacology* 83: 39–54. 2002, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 109: 1–9. 2007, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Used in Ayurveda and Sidha. Seeds and bruised leaves extremely irritant. Plant used in snakebite and scorpion stings, powder from dried whole plant taken to treat poisonous bites. Root stomachic, mild febrifuge, a decoction in fever, ascites, ulcers, pain, earache, threadworms and spleen enlargement. Leaf rubefacient and vesicant, the juice for headache, pound and poultice the head, also applied in rheumatism. Seeds decoction taken for headache, coughs, and to control roundworm.)

in English: spider flower

in East Africa: akeyo, chinsaga, dek, ecaboi, ejjobyo, eshogi, eyobyoyo, mchicha, sake

in Tanzania: mkabili

in India: bhutmula

Malay name: maman

Gynocardia R. Br. Flacourtiaceae (Achariaceae)

From the Greek *gyne* 'a woman, female' and *kardia* 'heart', referring to the ovary, see *Plants of the Coast of Coromandel* 3: 95, pl. 299. 1820 (1819).

Gynocardia odorata R. Br. (*Chaulmoogra odorata* Roxb.; *Chilmoria dodecandra* Buch.-Ham.; *Chilmoria odorata* Buch.-Ham.; *Chilmoria pentandra* Buch.-Ham.; *Gynocardia odorata* Roxb.)

India, Himalaya. Evergreen dioecious glabrous spreading tree, grey lenticellate bark, ovate-oblong leathery leaves, fragrant flowers in axillary fascicles, petals pale yellow,

large hard woody round fruits with hard rind, seeds ovoid or oblong embedded in gelatinous pulp, pulp of the fruit eaten by people after boiling, monkeys relish the pulp of the fruit

See *Hort. Bengal.* 105. 1814, *Plants of the Coast of Coromandel* 3(4): 95, t. 299. 1820, *Transactions of the Linnean Society of London* 13(2): 500–501. 1822, *Flora Indica*; or, descriptions of Indian Plants 3: 835–837. 1832, *FBI* 1: 195. 1872 and *Taxon* 29: 355–357. 1980, *Proceedings of the Indian Science Congress Association* 71(3-vi): 143–144. 1984

(Used in Ayurveda and Unani. Seeds poisonous, leaves poisonous to cattle; seeds poultice applied on painful swelling of joints; oil from the seeds applied in skin diseases, eczema, leprosy, rheumatism, arthritis, stings of poisonous insects. Bark febrifuge; a paste applied on itches and skin diseases. Fruit pulp for fish catching, fish poison. Leaves for blocking beehives.)

in China: ma dan guo, ta feng tzu

in India: alasakapaha, alemba sera, balibu, bandarpele, bandre phal, bonsha, brinj-mogra, brinjmogra, chal mogra, chal-mogre-ke-binj, chaulmogra, chaulmugra, chhalmugra, chkal-mogre-ke-binj, choulmungri, dieng-sohliang, dieng sohphailing, gantay, gante, ganthe, gotashing, kampi-bumtalarung, koitur, kushthapa, masribu, sagarodbhuta, sai-thei, saithe, surantaeil, thebaung-kauk, thithopha-bipha, thithpha bipha, tul-kung, tuvaraka

in Lepcha: took koong

in Nepal: gantay

Gynochthodes Blume Rubiaceae

From the Greek *gyne* ‘a woman, female’ and *ochthodes* ‘humped, mound-like, hilly’, an allusion to the ovary; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 16: 993. 1827 [Oct 1826–Nov 1827] and *Austrobaileya* 7: 357. 2006.

Gynochthodes sublanceolata Miq. (*Paederia tetrandra* Wall., nom. nud.; *Gynochthodes tetrandra* Kuntze)

Malay Peninsula, Thailand.

See *Numer. List.* 6249. 1832, *Fl. Ned. Ind.*, Eerste Bijv.: 3: 548. 1861, *Revis. Gen. Pl.* 1: 284. 1891

(Roots and leaves stomachic.)

Malay name: sulong akar

Gynostemma Blume Cucurbitaceae

Greek *gyne* ‘female organs, female’ and *stemma* ‘a crown, wreath’, indicating the arrangement of the ovules inside the ovary, see *Bijdragen tot de flora van Nederlandsch Indië* 23. 1825 and *Acta Phytotaxonomica Sinica* 33(4): 405. 1995.

Gynostemma compressum X.X. Chen & D.R. Liang

China.

See *Guihaia* 11(1): 13–14. 1991

(Plants for chronic bronchitis and hepatitis.)

in China: bian guo jiao gu lan

Gynostemma pentaphyllum (Thunb.) Makino var. *pentaphyllum* (*Alsomitra cissoides* M. Roem.; *Enkylia digyna* Griff.; *Enkylia trigyna* Griff.; *Gynostemma pedatum* Blume; *Gynostemma pedatum* var. *hupehense* Pamp.; *Gynostemma pedatum* var. *trifoliatum* Hayata; *Pestalozzia pedata* (Blume) Zoll. & Moritz; *Vitis mairei* H. Lévl.; *Vitis martini* H. Lévl. & Vaniot; *Vitis pentaphylla* Thunb.; *Vitis quelpaertensis* H. Lévl.; *Zanonia pedata* (Blume) Miq.)

SE Asia.

See *Species Plantarum* 2: 1028. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 1: 23. 1825, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842–1844* 31. 1846, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 113, 117–118. 1846, *Flora van Nederlandsch Indië* 1: 683. 1856 and *Botanical Magazine* 16: 179. 1902, *Nuovo Giornale Botanico Italiano*, new series 17(4): 730. 1910, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 10: 5–6, f. 3. 1921

(Whole plant demulcent, for swollen joints, sprain, sores, muscles. Leaves and stems sedative.)

Gynotroches Blume Rhizophoraceae

From the Greek *gyne* ‘a woman, female’ and *trochos* ‘a wheel’, referring to the shape of the stigma, radially pel-tate; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 5: 218. 1825 and *Acta Phytotax. Geobot.* 48: 15–21. 1997.

Gynotroches axillaris Blume

Malay Peninsula.

See *Bijdr. Fl. Ned. Ind.* 5: 219. 1825

(Leaves for headache.)

in English: fish eyes

in Malaya: mata keli

Gynura Cass. Asteraceae

From the Greek *gyne* ‘female’ and *oura* ‘a tail’, referring to the stigma or to the tailed style lobes; see *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 34: 391. 1825, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 410. Ansbach 1852 and *Kew Bull.* 33(2): 335–342. 1978, *Kew Bull.* 41(4): 873–943. 1986.

Gynura amplexicaulis Oliv. & Hiern (*Gynura amplexicaulis* Hutch. & Dalziel; *Gynura claessensii* De Wild.; *Senecio claessensii* (De Wild.) Humbert & Staner)

Tropical Africa. Herb

See *Flora of Tropical Africa* [Oliver et al.] 3: 403. 1877 and *Plantae Bequaertianae* 5: 91. 1929, *Flora of West Tropical Africa* 2: 148. 1931, *Bulletin du Jardin Botanique de l'État* 14: 105. 1936

(Whole plant tonic, stomachic, purgative.)

Gynura aurantiaca (Blume) DC. (*Cacalia aurantiaca* Blume; *Gynura aurantiaca* Benth.)

Japan, South America.

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 908. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 300. 1837[1838], *Niger Flora* 437. 1849 and *Fieldiana, Bot.* 24(12): 392–423, 585–589. 1976

(Antibacterial.)

in English: purple-passion-vine, purple velvet plant, royal velvet plant, royal-vine-plant, velvet plant

in Japan: birôdo-san-shichi

Gynura cusimbua (D. Don) S. Moore (*Cacalia angulosa* Wall., nom. nud.; *Cacalia cusimbua* D. Don; *Gynura angulosa* (Wall.) DC.)

India, Nepal.

See *Prodromus Florae Nepalensis* 1791. 1825, *A Numerical List of Dried Specimens* n. 3152. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 298. 1838 and *Journ. Bot.* 50: 212. 1912, *Nucleus* 18: 6–19. 1975

(Tender shoots and leaves eaten raw or cooked for chronic gastritis. Paste obtained by pounding the leaves along with those of *Eupatorium odoratum* applied on cuts, wounds and injuries.)

in India: hempushpa, tenpang molitong, terapaibi

Gynura japonica (Thunb.) Juel (*Cacalia pinnatifida* Lour.; *Cacalia segetum* Lour.; *Gynura aurita* C. Winkl.; *Gynura flava* Hayata; *Gynura japonica* var. *flava* (Hayata) Kitam.; *Gynura pinnatifida* DC.; *Gynura pinnatifida* (Lour.) DC.; *Gynura pinnatifida* Vaniot; *Gynura segetum* (Lour.) Merr.; *Gynura vaniotii* H. Lév.; *Kleinia japonica* (Thunb.) Less.; *Senecio japonicus* Thunb.)

Japan.

See *Species Plantarum* 2: 834. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 44. 1754, *Flora Japonica, ...* 315. 1784, *Flora Cochinchinensis* 2: 486. 1790, *Dictionnaire des Sciences Naturelles* [Second edition] 34: 391–392. 1825, *Linnaea* 6: 134. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 301. 1837, *Acta Horti Bergiani* 1(3): 86. 1891 and *Bulletin de l'Académie Internationale de*

Géographie, Botanique 12: 489. 1903, *Journal of the College of Agriculture, Imperial University of Tokyo* 25(19): 138–139. 1908, *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 284. 1914, *Philippine Journal of Science* 15(3): 260. 1919 [1920], *Acta Phytotaxonomica et Geobotanica* 8: 202. 1939, *Planta Medica* 69(8): 757–764. 2003

(Exhibited significant anti-platelet aggregation activity in vitro.)

in Japan: ninjin-san-shichi, san-shichi-gusa

Gynura nepalensis DC. (*Gynura dielsii* H. Lév., nom. illeg.; *Gynura nudibasis* (H. Lév. & Vaniot) Lauener & D.K. Ferguson; *Senecio nudibasis* H. Lév. & Vaniot)

India, Nepal.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 300. 1838 and *Repertorium Specierum Novarum Regni Vegetabilis* 6(125–130): 331. 1909, *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 284. 1914, *Notes from the Royal Botanic Garden, Edinburgh* 34(3): 359. 1976

(Leaf paste applied on forehead to cure headache; leaves boiled and taken for blood pressure, gastrointestinal problems. Fresh juice from the succulent leaves and stems applied to fresh cuts and wounds to check bleeding.)

in India: terapaibi, throenye

Gynura procumbens (Lour.) Merr. (*Cacalia procumbens* Lour.; *Cacalia sarmentosa* Blume; *Cacalia sarmentosa* Lesch. ex Hook.f.; *Crassocephalum baoulense* (Hutch. & Dalziel) Milne-Redh.; *Crassocephalum baoulense* (A. Chev.) Milne-Redh.; *Gynura baoulensis* Hutch. & Dalziel; *Gynura buntingii* S. Moore; *Gynura cavaleri* H. Lév.; *Gynura procumbens* Merr.; *Gynura sarmentosa* (Blume) DC.; *Gynura sarmentosa* DC.; *Senecio baoulensis* A. Chev.)

Nigeria, Sierra Leone. Robust, climber, glabrous, fleshy, wide-spreading, flowers greenish yellow-orange, edible leaves

See *Flora Cochinchinensis* 2: 485. 1790, *Bijdragen tot de flora van Nederlandsch Indië* 15: 907. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 298. 1838, *Fl. Brit. India* [J.D. Hooker] 3: 352. 1881 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 284. 1914, *Journal of Botany, British and Foreign* 54: 281, 287. 1916, *Bull. Soc. Bot. France* 61(Mém. 8e): 260. 1917 [1914 publ. 1917] [*Mémoires de la Société Botanique de France* 2(8): 260. 1917], *Explor. Bot. Afrique Occ. Franc. i.* 375. 1920, *An Enumeration of Philippine Flowering Plants* 3: 618. 1923, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 2: 147–148. 1931, *Kew Bulletin* 5: 377. 1951, *Kew Bull.* 33(2): 335–342. 1978

(Roots astringent. Antiinflammatory, hypotensive, leaves applied to relieve rheumatic pains, toothache.)

Malay names: akar subiak, kulu mayi merah

in Sarawak: poong

Gynura pseudochina (L.) DC. (*Cacalia bulbosa* Lour.; *Crassocephalum miniatum* (Welw.) Hiern; *Gynura bodinieri* H. Lév.; *Gynura eximia* S. Moore; *Gynura miniata* Welw.; *Gynura miniata* var. *orientalis* O. Hoffm.; *Gynura rusiensis* R.E. Fr.; *Gynura somalensis* (Chiov.) Cufod.; *Gynura variifolia* De Wild.; *Senecio crassipes* H. Lév. & Vaniot; *Senecio miniatus* (Welw.) Staner; *Senecio pseudochina* L.; *Senecio somalensis* Chiov.)

Vietnam, Tanzania. Herb, succulent, purplish, mucilaginous leaves, outer inflorescence bracts green, flowers orange-yellow

See *Species Plantarum* 2: 867. 1753, *Flora Cochinchinensis* 485. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 299. 1838, *Apontamentos Phytogeographicos* 586. 1858, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 595. 1898 and *Repertorium Specierum Novarum Regni Vegetabilis* 6(125–130): 331. 1909, *Bulletin de l'Académie Internationale de Géographie, Botanique* 24: 283. 1914, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 106. 1916, *Plantae Bequaertianae* 5: 93. 1929, *Nuovo Giornale Botanico Italiano* 50: 112. 1943, *Kew Bull.* 41(4): 873–943. 1986

(Plant hemostatic, antipyretic, vulnerary, used to regulate menses, herpes infections and sore throats. Leaves demulcent, to treat fever, insect stings, pimples and bruises, to cure scabies and erysipelas, to reduce skin irritation; leaf sap applied to sore eyes.)

in English: (a source of) China root

Gynura scandens O. Hoffm. (*Crassocephalum auriformis* S. Moore; *Crassocephalum picridifolium* (DC.) S. Moore; *Crassocephalum ruwenzoriensis* S. Moore; *Crassocephalum scandens* (O. Hoffm.) Hiern; *Gynura auriformis* (S. Moore) S. Moore; *Gynura brownii* S. Moore; *Gynura ruwenzoriensis* (S. Moore) S. Moore; *Gynura taylorii* S. Moore; *Senecio rutshuruensis* De Wild.; *Senecio seretii* De Wild.; *Senecio subalatiptiolatus* De Wild.; *Senecio variostipellatus* De Wild.)

Tanzania. Herbaceous climber, scandent, shrub, scrambler, succulent, clambering, inflorescence aromatic, corollas yellow to reddish, stamens and stigmas yellow

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 386. 1838, *Die Pflanzenwelt Ost-Afrikas* C: 416. 1895, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 595. 1898 and *Journal of the Linnean Society, Botany* 35: 352. 1902, *Journal of the Linnean Society, Botany* 37: 171. 1904, *Journal of Botany, British and Foreign* 43: 23. 1906, *Annales du Musée du Congo. Serie 1, Botanique* 3: 315. 1910, *Journal of Botany, British and Foreign* 50: 212–213. 1912, *Journal of Botany, British and Foreign* 54: 281. 1916, *Bulletin of Miscellaneous Information Kew* 1925: 569. 1925, *Plantae Bequaertianae* 5: 130, 134–135. 1929

(Splenomegaly, jaundice, liver diseases.)

Gypsophila L. Caryophyllaceae

Lime-loving, from the Greek *gypsos* 'gypsum, chalk' and *philos* 'loving', *Gypsophila repens* occurs on gypsum rocks; see Carl Linnaeus, *Species Plantarum*. 1: 406–408. 1753 and *Genera Plantarum*. Ed. 5. 191. 1754, *Mantissa* 1: 69, 231. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 354. 1824, *Flora Altaica* 2: 131. 1830, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 2: 235. 1831, *Genera Plantarum* 972. 1840, *Flora* 26: 282, 383. 1843, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 410. 1852, *Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 138. 1862, *Flora Orientalis* 1: 534–536. 1867, *Journal of Botany, British and Foreign* 27: 325. 1889 and *Flora URSS* 6: 757, 763, 770. 1936, *Fieldiana, Bot.* 24(4): 217–239. 1946, *Wentia* 9: 37, 42, 44. 1962, *Novosti Sist. Vyssh. Rast.* 8: 273. 1971, *Novosti Sist. Vyssh. Rast.* 13: 116. 1976, *Fl. Iranica* [Rechinger] 163: 217, 241, 244. 1988, *Contr. Univ. Michigan Herb.* 19: 152–153. 1993.

Gypsophila davurica Turczaninow ex Fenzl var. *davurica* (*Gypsophila gmelinii* Bunge var. *dahurica* Turcz.; *Gypsophila patrinii* subsp. *davurica* (Fenzl) Kozhevnik.; *Gypsophila patrinii* Seringe subsp. *davurica* (Turczaninow ex Fenzl) Kozhevnikov)

China, Eurasia.

See *Prodr.* (DC.) 1: 353. 1824, *Nomencl. Bot.* [Steudel], ed. 2. 1: 715. 1840, *Flora Rossica* (Ledeb.) 1(2): 294. 1842, Turczaninow, Nicolaus (1796–1864), *Flora Baicalensi-Dahurica* 1: 201. 1842–1856 and *Novosti Sist. Vyssh. Rast.* 22: 111. 1985

(Astringent.)

in China: cao yuan shi tou hua

Gypsophila oldhamiana Miquel

China, Japan.

See *Ann. Mus. Bot. Lugduno-Batavi.* 3: 187. 1867

(For skin diseases.)

in China: chang rui shi tou hua

Gypsophila pacifica Komarov

China.

See *Bull. Jard. Bot. Petersb.* 1916, xvi. 167. 1916

(Stomachic, for respiratory ailments.)

in China: da ye shi tou hua

Gypsophila paniculata Linnaeus

China. Perennial herb, diffusely branched herb, opposite leaves, white or pink small flowers

See *Species Plantarum* 1: 407. 1753, *Flora Orientalis* 1: 535. 1867, *Journal of Botany, British and Foreign* 27: 325. 1889 and *Biologia* (Bratislava) 48: 441–445. 1993

(Skin irritation after contact of all parts when dried. Flowers, astringent, tonic.)

in English: baby's breath, old maid's-pink

in China: yuan zhui shi tou hua

in Japan: kogome-nadeshiko

Gyrocarpus Jacq. Hernandiaceae (Gyrocarpaceae)

From the Greek *gyros* 'a ring' and *karpos* 'fruit', referring to the embryo with large and folded cotyledons; see Nikolaus Joseph von Jacquin (1727–1817), *Selectarum stirpium americanarum historia*. 282, t. 178, fig. 80. Vindobonae [Wien] 1763 and *Feldiana, Bot.* 24(4): 344–347. 1946, *Bot. Jahrb. Syst.* 89(2): 149–209. 1969, *Ceiba* 44(2): 105–268. 2003[2005], *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 5–9. 2007.

Gyrocarpus americanus Jacq. (*Gyrocarpus asiaticus* Willd.)

Pantropical. Tree

See *Selectarum Stirpium Americanarum Historia ...* 282, pl. 178, f. 80. 1763, *Species Plantarum*. Editio quarta 982. 1805 and *Bot. Jahrb. Syst.* 89: 185. 1969

(Used in Sidha. Pills from stem bark paste with black pepper and garlic taken for chest pain. A drink made from the

bark taken for edema following childbirth, for filariasis and in treating stomachache. Fresh endosperm taken to relieve stomachache.)

in English: propeller tree

in Australia: gyro damson

in Toga: pukovili

in S. Rhodesia: muNdari

in Southern Africa: american gyrocarpus, helikopterboom; muNdari (Shona)

in India: caivavatala, cami, centanakku, centavam, centavamaram, chandra poliki, kaadu bende, kadavai, kadubende, kapavinacani, karamanikkay, katarkotittumam, katarkotittumamaram, katavai, katavimaram, katavu, katavumaram, kavari, kavaramaram, kavariirukki, kavariirukku, kottaikkala, kottaittanakkan, kottaittanakku, kumaara ponaku, kumaari poliki, munuvu, muttaikkonku, nallaponaku, natavai, natavu, natcai, nuna, nunavu, pantuputtirika, pantuputtirikam, papurapu kaaya, parunkalikam, parunkalikamaram, pasanaparpi, petiracanamaram, petiracanam, piruntika, piruntikamaram, pollika, ponaku, punkalakam, puttiramancari, puttiramancarimaram, sibbi chettu, tanakku, tanuku, tep-pam, teppamaram, thanaku, tuavumaram, tunavu, vanni, vellaittanakku, visaculakustakkini, vivakatam, vivakatamaram, zaitun

H

Habenaria Willd. Orchidaceae

From the Latin *habena*, *ae* (*habeo*, *ere*, *ui*, *itum* ‘that by which a thing is held’) ‘a strap, holder, rein’, the lip is usually trilobed and always spurred, in some species the spur is long and strap-shaped and swollen toward the apex, or referring to the long anther canals; see Carl L. von Willdenow, *Species Plantarum*. Ed. 4, 4(1): 5, 44. 1805, *De Orchid. Eur.* 20, 26, 35. 1817, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 412. Ansbach 1852, *Gen. Pl.* [Bentham & Hooker f.] 3(2): 626. 1883, *Beitr. Monogr. Gattung Habenaria* 31–33, 38–39. 1891 [also published in *Bot. Jahrb. Syst.* 16: 55, 64. 1892], *J. Bot.* (Morot) 6: 474. 1892, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 16(1 and 2): 55–56, 58, 64, 74, 83, 85, 88, 91, 94, 100, 102–103, 112, 114, 125, 128, 130, 135, 141, 147, 155–156, 176, 182, 187–189, 194, 205, 210–211, 217. 1892, *Orchid. Gen. Sp.* 1: 425. 1898, *Flora of Tropical Africa* 7: 205. 1898 and *Kew Bull.* 16: 301 (–302). 1962, *Watsonia* 6: 133. 1965, *Kew Bulletin* 22: 489. 1968, *Harvard Pap. Bot.* 5(2): 383–466. 2001, *Orchidee* (Hamburg) 54(1): 84. 2003, *Richardiana* 3(4): 158. 2003, *Richardiana* 6(1): 41–42. 2006.

Habenaria commelinifolia (Roxb.) Wall. ex Lindl. (*Habenaria commelinifolia* Wall. ex Lindl.; *Orchis commelinifolia* Roxb.; *Orchis stylosanthes* Ham. ex Hook.f.; *Platanthera commelinifolia* (Roxb.) Lindl.; *Platanthera commelinifolia* (Roxb.) Lindl. ex Wall.)

India. Herb, leafy, sheathing at the base

See *A Numerical List of Dried Specimens* n. 7037. 1828, *Fl. Ind.* ed. 1832, 3: 451. 1832, *Hortus Bengalensis*, or a catalogue ... 63. 1832, *The Genera and Species of Orchidaceous Plants* 325. 1835, *Fl. Brit. India* 6: 143. 1890 and *Taxon* 28: 392. 1979, *Taxon* 30: 704–705. 1981

(Pseudobulbs extract tonic, stimulant, to improve physical fitness. Tuber paste rubbed on wounds in snakebite.)

in India: ankra, jadu, jati jadu

Habenaria conopsea Rchb.f.

Colombia.

See *Species Plantarum* 2: 942. 1753, *Hortus Kewensis*; or, a catalogue ... The second edition 5: 191. 1813, *Bonplandia* (Hannover) 2: 10. 1854 and *Index plantarum japonicarum sive enumeratio plantarum* ... 2: 258. 1905

(Astringent.)

(Tuber paste applied in swelling and internal pain.)

in India: wagsaura, wakchora

Habenaria rariflora A. Rich.

India.

See *Ann. Sci. Nat., Bot.*, sér. 2, 15: 70. 1841 and *Taxon* 29: 546. 1980, *Taxon* 30: 854–855. 1981

(Whole plant decoction to check bleeding and menstrual disorders.)

in India: vellai pattu, vellai puttu

Habenaria walleri Rchb.f. (*Habenaria soyauxii* Kraenzl.; *Macrura walleri* (Rchb.f.) Szlach. & Sawicka)

Trop. Africa. Orchid, terrestrial, stout erect stems, fleshy tuberous roots, erect leaves long oval pointed, green sepals, flowers fragrant at night, oblong or spindle-shaped capsules, tiny seeds, tubers cooked or baked and eaten, in swampy grassland

See *Otia Botanica Hamburgensia* 98. 1881, *Bot. Jahrb. Syst.* 16: 93. 1893 and *Orchidee* (Hamburg) 54: 332. 2003

(Roots pounded and soaked in cold water, the liquid used in the treatment of stomachache.)

in Tanzania: binika, chanima, chikande, kikande

Hackelia Opiz Boraginaceae

For the Bohemian botanist Josef Hackel, 1783–1869, see *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* [Moench] 416. 1794, *Oekonomisch-technische Flora Böhmens* 2(1): 146–147. 1838 and *Fieldiana, Bot.* 24(9/1–2): 111–167. 1970, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988.

Hackelia floribunda (Lehm.) I.M. Johnston (*Hackelia leptophylla* (Rydb.) I.M. Johnst.; *Lappula floribunda* (Lehm.) Greene)

North America. Biennial or perennial herb, prickly fruits

See *Pittonia* 2(10B): 182. 1891 and *Contributions from the Gray Herbarium of Harvard University* 68: 46. 1923, *Mem. New York Bot. Gard.* 26(1): 121–227. 1976, *Phytologia* 64: 390–398. 1988

(Plant considered poisonous, skin irritation and swelling caused by prickly fruits. Ceremonial, good luck charm.)

in English: large-flowered stickseed, manyflower stickseed, manyflowers stickseed, stickweed, western stick-seed, western stickseed

Hackelia hispida (A. Gray) I.M. Johnst. var. *hispida* (*Lappula hispida* (A. Gray) Greene)

North America. Perennial herb

See *Pittonia* 2(10B): 182. 1891 and *Contributions from the Gray Herbarium of Harvard University* 68: 46. 1923, *Mem. New York Bot. Gard.* 26(1): 121–227. 1976

(Medicinal value.)

in English: showy stickseed

Hackelia virginiana (L.) I.M. Johnst. (*Cynoglossospermum virginianum* (L.) Kuntze; *Cynoglossospermum virginianum* Kuntze; *Echinosperrum virginianum* (L.) Britton, Sterns & Poggenb.; *Echinosperrum virginianum* (L.) Lehm.; *Lappula virginiana* (L.) Greene; *Myosotis virginiana* L.; *Rochelia virginiana* (L.) Roem. & Schult.)

North America. Perennial or biennial herb

See *Species Plantarum* 1: 131. 1753, *Plantae e Familiae Asperifoliarum Nuciferae* 1: 117. 1818, *Systema Vegetabilium* 4: 108. 1819, *Preliminary Catalogue of Anthophyta and*

Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York 37. 1888, *Pittonia* 2(10B): 182. 1891, *Revisio Generum Plantarum* 2: 182. 1891 and *Contributions from the Gray Herbarium of Harvard University* 68: 45. 1923, *Mem. New York Bot. Gard.* 26(1): 121–227. 1976, *Taxon* 53(3): 803. 2004

(Plant decoction used for kidney trouble. Insecticide. Ceremonial, aphrodisiac, love charm.)

in English: beggarslice, wild comfrey

Hackelochloa Kuntze Poaceae (Gramineae)

Named after the Greek *chloe*, *chloa* ‘grass’ and the Bohemia-born Austrian botanist Eduard Hackel, 1850–1926, agrostologist, high school teacher at St. Pölten and at Graz, his publications include *Monographia Festucarum Europaeorum*. Kassel and Berlin 1882 and *Catalogue raisonné des Graminées du Portugal*. Coimbre [Coimbra] 1880, contributor to Martius, *Flora Brasiliensis, Gramineae* V, fasc. 90, vol. 2 (3): 245–326. 1883.

Similar to *Heteropholis* C.E. Hubbard, sometimes included in *Mnesithea* Kunth, type *Hackelochloa granularis* (L.) Kuntze, see *Révision des Graminées* 1: 153–154. 1829, *Monogr. Phan.* 6: 314. 1889, *Revisio Generum Plantarum* 2: 776. 1891 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. London 1918, *United States Department of Agriculture: Bulletin* 772: 278. 1920, Elmer Drew Merrill (1876–1956), *Contr. U.S. Natl. Herb.* 30(1): 141–142. 1947, *Fieldiana, Botany* 24(2): 38–331. 1955, R. Zander Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 106. 1965, *Blumea* 31(2): 281–307. 1986, *Cytologia* 51: 43–50. 1986, *Journal of Cytology and Genetics* 21: 152–154. 1986, *Flora of the Guianas. (Leaves or sheaths somewhat irritant to the skin. The roots are good in cases of enlarged liver and spleen.)

in English: hare's maize, lizard-tail grass

in India: chiria, dhaturogas, guru singu gaddi, kaadu sanna haaraka hullu, kadu sanna harka hullu, kangani, kangni, kasiungas, kurujedanai gaddi, moti shimpi, nali poonuku, pairia, palangini, phulwa, ratob, suklu, trinpali

in Japan: Yae-gaya (= Yaeyama grass)

in the Philippines Isl.: ginetkaran

in Thailand: yaa kha naeng, ya kha naeng

in Brazil: capim mimosa, mimosinho

in Mexico: sit-suuk

in Mali: bambari ladde, kanyane maka, ngoriri, susan kaba

in Senegal: susan kaba

in Sierra Leone: andande, fesifesi, gungulwi, kanyane maka, sanywanya, tamed sarana

in Upper Volta; njadere, soham kamani, suambu kamana, zoomena

Haemanthus L. Amaryllidaceae (Alliaceae, Liliaceae)

Blood lilies, from the Greek *haima* ‘blood’ and *anthos* ‘a flower’, in some species flowers are pink or red, see *Species Plantarum* 1: 325. 1753.

Haemanthus albiflos Jacq. (*Diaclis ciliaris* Salisb., nom. inval.; *Diaclis pubescens* (Herb.) Salisb., nom. inval.; *Haemanthus albiflos* var. *brachyphyllus* Baker; *Haemanthus*

albiflos var. *burchellii* Baker; *Haemanthus albiflos* var. *pubescens* (Herb.) Baker; *Haemanthus albomaculatus* Baker; *Haemanthus intermedius* (Herb.) M. Roem.; *Haemanthus leucanthus* Miq.; *Haemanthus mackenii* Baker; *Haemanthus pubescens* (Herb.) Ker Gawl., nom. illeg.; *Haemanthus virescens* Herb.; *Haemanthus virescens* var. *albiflos* (Jacq.) Herb., nom. illeg.; *Haemanthus virescens* var. *intermedius* Herb.; *Haemanthus virescens* var. *pubescens* Herb.)

Cape Prov. to KwaZulu-Natal. Evergreen, bulbous geophytes, perennial fleshy roots, oblong leaves, dense cluster of numerous erect narrow white flowers, compact flower-head, erect stamens protruding beyond the tips of the flowers, red fleshy berries with a distinctive musty odour, a very variable plant

See *Species Plantarum* 1: 325. 1753, *Amaryllidaceae* 235. 1837, *Fl. Cap.* 3: 235. 1896 and *Plant Systematics and Evolution* 135: 119–126. 1980, *Journal of South African Botany* 50: 237–259. 1984

(Used to treat chronic coughs and as a charm to ward off lightning. Traditional veterinary medicine, fracture, the bulb is pulped and bandaged directly onto a broken limb to facilitate healing.)

in English: april fool, blood lily, paintbrush

in South Africa: poeierkwas, umathunga

***Haemanthus coccineus* L.** (*Haemanthus callosus* Burch. ex Baker; *Haemanthus carinatus* L.; *Haemanthus coarctatus* Jacq.; *Haemanthus concolor* Herb.; *Haemanthus crassipes* Jacq.; *Haemanthus hookerianus* Herb.; *Haemanthus hyalocarpus* Jacq.; *Haemanthus latifolius* Salisb.; *Haemanthus moschatus* Jacq.; *Haemanthus splendens* Dinter; *Haemanthus tigrinus* Jacq.; *Perihemia coarctata* (Jacq.) Raf.)

Namibia to Cape Prov. Perennial, geophytic, laterally compressed bulb solitary or clumped, generally 2 leaves per bulb, flowerhead with 6–9 stiff red spathe valves surrounding 25–100 coral to scarlet flowers, valves mostly fleshy, translucent fleshy berries, 1–3 dark wine-coloured seeds, very variable

See *Species Plantarum* 1: 325. 1753, *Prodr. Stirp. Chap. Allerton* 216. 1796, *Pl. Hort. Schoenbr.* 1: 29–30, t. 56. 1797, *Pl. Hort. Schoenbr.* 4: 5–7, t. 409, 410. 1804, *Amaryllidaceae* 238. 1837 and *Spec. Nov. Regni Veg.* 19: 181. 1923, *Norweg. J. Bot.* 19: 190. 1972, *Plant Systematics and Evolution* 135: 119–126. 1980, *Journal of South African Botany* 50: 237–259. 1984, *Botaničeskij Žurnal (Moscow & Leningrad)* 73: 1207–1208. 1988

(Fresh leaves applied as a dressing to septic ulcers and sores and also to the pustules of anthrax. Diuretic and antiasthma, the sliced bulb boiled in vinegar and mixed with honey. Convulsive action.)

in English: april fool, blood flower

in South Africa: paintbrush, maartblom, skeerkwaas, velskoenblaar

Haematocarpus Miers Menispermaceae

From the Greek *haima*, *haimatos* ‘blood’ and *karpos* ‘fruit’, see *Genera Plantarum* 284–285. 1789 and *Annals and Magazine of Natural History* ser. 3. 13: 124. 1864.

***Haematocarpus validus* Bakh.f. ex Forman**

India. Liana

See *Kew Bull.* 26(3): 420. 1972

(Killing pain, analgesic, leaf paste rubbed on the body; leaf decoction given in bodyache.)

in India: khinno, vian

Haematostaphis Hook.f. Anacardiaceae

Greek *haima* ‘blood’ and *staphyle* ‘a cluster, bunch of grapes’, referring to the fruits; *astaphis*, *astaphidos* ‘dried grapes, raisins’; *staphis*, *staphidos*, a plant, stavesacre, a species of *Delphinium* mentioned by Dioscorides; see *Transactions of the Linnean Society of London* 23(1): 169, t. 25. 1860.

***Haematostaphis barteri* Hook.f.**

Tropical Africa.

See *Transactions of the Linnean Society of London* 23: 169, t. 25. 1860, Schön, James Frederick (eigentl. Jakob Friedrich), *Grammar of the Hausa Language*. 1. Ausgabe. London, Church Missionary House, 1862

(Stem bark astringent, for diarrhea and sleeping sickness.)

in English: blood plum

in Nigeria: jan danya (Hausa); tursuhi (Fula); djijeregya (Nupe)

Haematoxylum L. Fabaceae (Caesalpinieae, Caesalpinieae, Leguminosae)

From the Greek *haimatos* ‘blood’ and *xylon* ‘wood’, referring to the red dye, see *Species Plantarum* 1: 384. 1753, *Bulletin of Miscellaneous Information Kew* 1895: 103. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(1): 102. 1900, *Pollen & Spores* 22: 355–423. 1980, *Fl. Lesser Antilles* (Dicotyledoneae–Part 1) 4: 334–538. 1988, *Harvard Pap. Bot.* 7(2): 381–398. 2003, *Biotechnic & Histochemistry*: official publication of the Biological Stain Commission. 80(2): 73–78. 2005.

***Haematoxylum campechianum* L.** (*Cymbosepalum baroni* Baker; *Cymbosepalum baronii* Baker; *Haematoxylum campechianum* L.)

South America, Tropical Africa. Perennial non-climbing tree, shrub, thorny, heartwood blood-red, yellow fragrant flowers, seeds eaten, bee plant

See *Species Plantarum* 1: 384. 1753, *Bulletin of Miscellaneous Information Kew* 1895: 103. 1895 and *J. Arnold Arbor.*

64: 529. 1983, *Kew Bulletin* 1(1): 88. 1988, *J. Amer. Acad. Dermatology*. 34: 149–151. 1996, *Journal of Medicinal Chemistry* 51(15): 4419–4429. 2008

(Used in Ayurveda and Sidha. Haematoxylin / Hematoxylin antifertility, abortifacient, analgesic, astringent, anti-inflammatory, antiseptic, tonic, febrifuge, PTK (Protein tyrosine kinase) inhibitor, used for treating dysentery and diarrhea, leucorrhea, gangrene and sores, dyspepsia, chronic diarrhea and infantile diarrhea.)

in English: blackwood, bloodwood tree, bluewood, campeachy tree, campeachy wood, campeche logwood, campeche wood, Jamaica wood, logwood, logwood tree

in Dominica: kampèch

in Ecuador: campeche

in Mexico: yaga cohui, yaga guela tiguiani

in China: cai mu

in India: bokkan, cayamaram, cimai cemmaram, cimaic-cemmaram, gabbi, neelirangina mara, partanga, patang, patanga, patangi

in Madagascar: misemy, mosemy, moussemi

Hagenia J.F. Gmelin Rosaceae

After the German botanist Carl (Karl) Gottfried Hagen, 1749–1829, pharmacist, naturalist, his works include *Tentamen historiae lichenum*. Regiomonti [Königsberg i. Pr.] 1782, *Grundriss der Experimentalchemie*. Königsberg und Leipzig 1786, *Grundsätze der Chemie, durch Versuche erläutert*. Königsberg 1796, *Lehrbuch der Apothekerkunst*. Königsberg und Leipzig 1781, *Ordinis Medici ... Decani C.G.H. ... programma primum de plantis in Prussia cultis*, etc. (Monandria-Trinadria.) Regiomonti 1791 and *Preussens Pflanzen*. Königsberg 1818; see *Syst. Nat.*, ed. 13[bis]. 2(1): 613. 1791, J.C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 414. Ansbach 1852 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 109. 1965.

Hagenia abyssinica (Bruce) J.F. Gmel. (*Brayera anthelmintica* Kunth; *Hagenia abyssinica* J.F. Gmel.; *Hagenia anthelmintica* (Kunth) Eggeling)

NE Africa, Abyssinia. Tree, leafy and rounded crown, reddish brown bark, branchlets silky, leaves compound, female heads pink-red, male heads orange-white, small dry fruit one-sided, upland, high mountain forest

See *Genera Plantarum* 334. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2(1): 613. 1791, *Bull. Sci. Soc. Philom. Paris* 1822: 156. 1822

(Anthelmintic, flowers infusion against the tapeworm; irritant to mucous membrane, nausea, vomiting, colic. Dried female flower-heads a remedy for intestinal worms, young leaves and dried flowers ground and mixed with water. Leaves astringent, antiseptic, for diarrhea, fevers, syphilis, scrofula, malaria, cough, wound dressing. An infusion of the bark used for diarrhea and stomachache, also used to induce abortion.)

in East Africa: cosso, cusso, habbi, kisichetwa, koso, kouso, kusso, mlanga, muthithiku

in Tanzania: mdebore, mturunga

Haldina Ridsd. Rubiaceae

A vernacular name, see *Blumea* 24(2): 360. 1978.

Haldina cordifolia (Roxb.) Ridsd. (*Adina cordifolia* (Roxb.) Hook. f.; *Adina cordifolia* (Roxb.) Benth. & Hook.f. ex B.D. Jacks.; *Adina cordifolia* Benth. & Hook.f.; *Nauclea cordifolia* Roxb.; *Nauclea sterculiifolia* A. Rich. ex DC.) (*Adina* Salisb., from the Greek *adinos* ‘clustered, plentiful, crowded’, referring to the clustered flowers.)

India, China, Malaysia. Tree, deciduous, straight fluted bole, leaves opposite simple entire, flowers in an axillary stalked yellowish head, corolla hypocrateriform, fruit in a head-like infructescence, persistent central axis and calyx, seed narrowly winged

See *Plants of the Coast of Coromandel* 1: 40, pl. 53. 1795, *The Paradise Londinensis*, pl. 115. 1807, *Genera Plantarum* 2: 30. 1873, *Forest Fl. N.W. India* 263. 1874 and *Blumea* 24(2): 360–362. 1978

(Used in Ayurveda and Sidha. Plant juice for the treatment of fevers, inflammation and skin diseases; young stem juice given as febrifuge. Leaf juice antibacterial, antiseptic, for dysentery, fever, malaria, stomachache and stomach disorders, dressing and healing wounds; young stipules eaten to heal old wounds; young leaves crushed and the juice taken in through nostrils to relieve intense headache. Bark febrifuge, stomachic, generally healing, antiseptic; juice of bark to treat sores and to kill worm in sores; bark extract taken in stomachache; *Morinda pubescens* bark extract with extract of barks of *Oroxylum indicum*, *Haldina cordifolia* and *Terminalia bellirica* given in jaundice; bark paste in case of scar formation and skin diseases (Doctrine of Signatures); decoction of the bark given with candy in acute fever. Root astringent. Ritual, ceremonial, tree associated with worship. Stem bark as fish poison.)

in English: yellow teak

in Burma: nhan-ben

in Cambodia: khvao

in India: ahnau, ahnow, anagalu, anavu, anigallu, arasan-ategu, arasantajeh, arasinatega, arsanatega, arsinatega,

arunsantige, attaka, bachenige, bahuphala, bangsa, bandari, bandaru, barakuram, bhramarapriya, bhringavallabha, daddagu, dadduga, daduga, dako, dharakadamba, dhulikadamva, dodaga, doddakadaga, dudaga, dudagu, edu, ethega, ettegu, gauradruma, haladu, haldarava, haldarvo, haldava, haldavan, haldawa, haldiva, haldu, haludava, harda, hardra, hardu, haridraka, haridrakah, haridru, haridrumba, haridrumah, hed, hedde, heddi, hedu, heldarvo, heretege, hettaga, hettega, hettiga, highora, holondu, honangi, kadaba, kadaga, kadagina, kadamb, kadamba, kadambai, kadambaka, kadambapushpah, kadambe, kadami, kadimi, kamada, kamba, kanapu, karam, karan, katampa, kelikadam, kesharadhya, khetkadam, kurumba, laupatia, lungkhup, mahakadamba, mancal katampu, mancatkatampu, manja kadambai, manjakadamba, manjakadambai, manjakadambu, manjatkadambu, mannakkadamba, mannakkatamba, mannakkatampa, mannia, meghabha, nipa, paccabotruga, paccaganapa, paccenike, patchabotika, pachabotruga, pachaganapa, paspuganapu, paspukadambe, pasupukadimi, pedda kamba, petpuria, pettega, pettegu, pettige, pitadaru, pitadaruh, pitaka, pitakashtha, pitampu, pitavarna, pravishya, priyaka, pulaki, roghu, rudra genapu, rudragampa, rudraganapa, rudraganapu, rudrakadapa, rudrakadapu, sandang, saudang, sharpadapriya, supushpa, suravha, tarakchapa, yatega, yethuga, yettata, yettagal, yettega, yuethagada

in Laos: 'thom

in Philippines: haldu

in Thailand: tong lueang

in Vietnam: g[as]o l[as] tim

Halenia Borkh. Gentianaceae

For Jonas Halen (J. Petrus Halenius, Uplandus), among his works *Plantae rariores Camschatcenses*, quas ... praeside ... C. Linnaeo ... submittit J.P. Halenius, etc. Upsaliae [1750] and *Dissertatio medica de dentitione difficili*. Upsaliae [1757]; see *Familles des Plantes* 2: 319, 535. 1763, *Flora Sibirica* 4: 114, t. 53. 1769, *Archiv für die Botanik* [Leipzig] 1(1): 25. 1796, *Synopsis Plantarum* 1: 287. 1805, *Genera et Species Gentianearum* adjectis observationibus quibusdam phytogeographicis 322–323. 1839[1838], Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 414. Ansbach 1852 and *Rhodora* 86(847): 311–337. 1984, *Bull. Torrey Bot. Club* 111: 366. 1984, *Fl. Veracruz* 121: 1–67. 2001.

Halenia elliptica D. Don

China, Nepal. Herb, white-bluish flowers, corolla lobes spreading with spreading spur

See *Trans. Linn. Soc. London* 17(4): 529. 1837, *London and Edinburgh philosophical magazine and journal of science* 8: 77. 1836 and *Cytologia* 58: 115–123. 1993

(Whole plant used to treat diseases related to gall bladder and ulcerous wounds. Root infusion given to treat fever, to cool body and for liver. Seed powder taken in intermittent fever.)

in English: elliptic-leaf spur gentian, spurred-gentian

in China: tuo yuan ye hua mao

in India: hasela

in Nepal: tite

in Tibet: ja tu rung gu

Halogeton C.A. Meyer Chenopodiaceae (Amaranthaceae)

From the Greek *hals*, *halos* 'salt, sea' and *geiton* 'a neighbour', alluding to the habitat and to its nature, see *Species Plantarum* 1: 222–223. 1753, *Icon. Pl.* [Ledebour] 1: 10. 1829, *Fl. Altaic.* [Ledebour]. 1: 378. 1829, *Flora Rossica* 3: 831. 1851–1852, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg, Septième Série* (Sér. 7) 4(11): 19, 92. 1862.

Halogeton arachnoideus Moquin-Tandon (*Halogeton arachnoideus* Moq.; *Micropeplis arachnoidea* Bunge; *Micropeplis arachnoidea* (Moquin-Tandon) Bunge; *Salsola aptera* Handel-Mazzetti)

China.

See *Prodr.* (DC.) 13(2): 205. 1849, Bunge, Alexander Andrejewitsch von (1803–1890), *Alexandri Lehmann Reliquiae botanica sive enumeratio plantarum in itinere per deserta Asiae ...* 1839–42 collect. Dorpati, 1849, *Mém. Acad. Sci. St-Pétersb.* 7: 177–536. 1854 and *Oesterreichische Botanische Zeitschrift* 80: 339. 1931, *Bot. Žurn.* (Moscow & Leningrad) 88(8): 113–115. 2003

(Astringent, stomachic.)

in China: bai jing yan sheng cao

Halogeton glomeratus (M. Bieberstein) C.A. Meyer (*Anabasis glomerata* M. Bieberstein; *Halogeton glomeratus* (M. Bieb.) Ledeb.)

North America.

See *Mém. Soc. Imp. Naturalistes Moscou* 1: 110. 1808, *Fl. Altaic.* [Ledebour]. 1: 378. 1829, *Icon. Pl.* [Ledebour] 1: 10, plate 40. 1829 and Blackwell, W.H., J.D. Haacke and C.O. Hopkins. "Halogeton (Chenopodiaceae) in North America." *Sida* 8: 157–169. 1979

(This species is toxic to livestock. A noxious and toxic weed in disturbed, barren, alkaline soils, *Halogeton glomeratus* is able to withstand high concentrations of salinity. It is often associated with *Sarcobatus vermiculatus* and *Atriplex confertifolia* and is found in the cold deserts of western United States.)

in English: saltlover

Halopyrum Stapf Poaceae (Gramineae)

From the Greek *hals*, *halos* 'salt, sea' and *pyros* 'grain, wheat', see *Hooker's Icones Plantarum* 25: t. 2448. 1896 and *Flora of Ethiopia and Eritrea* 7: 94–95. 1995, W.M. Musila, J.I. Kinyamario and P.D. Jungerius, "Vegetation dynamics of coastal sand dunes near Malindi, Kenya." *African Journal of Ecology* 39(2): 170–177. 2001, M. Ajmal Khan and Salman Gulzar, "Light, salinity, and temperature effects on the seed germination of perennial grasses." *Am. J. Bot.* 90: 131–134. 2003, Hester L. Bell and James W. O'Leary, "Effects of salinity on growth and cation accumulation of *Sporobolus virginicus* (Poaceae)." *Am. J. Bot.* 90: 1416–1424. 2003, *Botanical Journal of the Linnean Society* 148(1): 57–72. May 2005.

Halopyrum mucronatum (L.) Stapf (*Briza mucronata* (L.) Lam.; *Briza mucronata* Lam.; *Brizopyrum mucronatum* (L.) Wight; *Brizopyrum mucronatum* Aitch.; *Brizopyrum mucronatum* Nees, nom. inval.; *Desmazeria uniolooides* Deflers, also spelled Defleurs; *Eragrostis mucronata* Deflers; *Eragrostis mucronata* (L.) Defleurs, nom. illeg.; *Eragrostis mucronata* Roem. & Schult.; *Halopyrum mucronatum* Stapf; *Triticum repens* Thwaites, nom. illeg., non *Triticum repens* L.; *Uniola mucronata* L.)

Africa, Indian Ocean. Perennial, coarse, rigid, robust, woody, tough, tussocky, strongly branched, dead stalks protect new growth, callus of each floret bearded, useful sand binder, abundant on sand dunes by the sea, in small depressions, coastal sand, dunes near the ocean

See *Species Plantarum* 1: 86. 1753, *Species Plantarum, Editio Secunda* 1: 104. 1762, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 465. 1785, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 2: 577. 1817, *A Numerical List of Dried Specimens* n. 8898. 1849 [Wallich's Catalogue], *Enum. Pl. Zeyl.* 376. 1864, *Bull. Soc. Bot. France* 34: 69. 1887, Albert Deflers (1841–1921), *Voyage au Yemen, Journal d'une excursion botanique faite en 1887 dans les montagnes de l'Arabie heureuse suivi du Catalogue de plantes.* 220. Paris 1889, *Hooker's Icones Plantarum* 25: t. 2448. 1896 and *Handb. Fl. Ceylon* 5: 299. 1900, *Grasses of Ceylon* 67. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma ...* 516. 1960, *Taxon* 49(2): 258. 2000

(Used as a stimulant, appetizer, tonic, for the treatment of burns, retention of urine, leprosy and blood impurities.)

in Somalia: sido

in India: darai, kans, kansado, uppukarai pullu

Haloxylon Bunge Chenopodiaceae

From the Greek *hals*, *halos* 'salt, sea' and *xylon* 'wood', possibly referring to the nature of the sandy-saline habitats, see *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 7: 468. 1851, *Flora Rossica* 3: 820. 1851, *Beitr.*

Kenntn. Fl. Russl. 292. 1852 and Niloufari, Parviz. *The genus Haloxylon Bunge with special reference to wood anatomy: 13th International Botanical Congress & International Association of Wood Anatomists Sydney, Australia, 21–28 August, 1981.* Karaj: University of Tehran, 1981.

Haloxylon salicornicum Bunge ex Boiss. (*Caroxylon salicornicum* Moq.; *Haloxylon salicornicum* (Moq.) Bunge ex Boiss.; *Hammada salicornica* (Moq.) Iljin)

India, Afghanistan, Iran. Perennial shrub, fodder for camels

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 164. 1849 and *Botaniceskij Žurnal SSSR* 33: 583. 1948

(For skin diseases.)

in India: lana

Haloxylon scoparium Pomel (*Arthrophytum scoparium* (Pomel) Iljin ex Jahand. & Maire; *Haloxylon articulatum* (Cav.) Bunge; *Hammada articulata* (Cav.) O. Bolòs & Vigo subsp. *scoparia* (Pomel) O. Bolòs & Vigo; *Hammada scoparia* (Pomel) Iljin; *Salsola articulata* Cav.)

North Africa, Mediterranean.

See *Nouveaux matériaux pour la flore atlantique.* 1874–1875. Paris

(Antispasmodic, astringent.)

Hamamelis L. Hamamelidaceae

Hamamelis, *hamamelidos*, the ancient Greek name for the medlar, *Mespilus germanica*, see *Acta Phys.-Med. Acad. Caes. Leop.-Francisc. Nat. Cur.* 8: App. 219. 1748, *Species Plantarum* 1: 124. 1753, *Fam. Pl.* (Adanson) 2: 381, 613. 1763, *Diss. Bot. & Zool.* 41. 1769, *Narrative of a Journey in the Interior of China* 374. 1818 and Salvatore Battaglia, *Grande dizionario della lingua italiana.* UTET, Torino 1961.

Hamamelis virginiana Linnaeus (*Hamamelis androgyna* Walter; *Hamamelis corylifolia* Moench; *Hamamelis dioica* Walter; *Hamamelis macrophylla* Pursh; *Hamamelis virginiana* var. *angustifolia* Nieuwland; *Hamamelis virginiana* L. var. *henryi* Jenne; *Hamamelis virginiana* L. var. *macrophylla* (Pursh) Nutt.; *Hamamelis virginiana* var. *orbiculata* Nieuwland; *Hamamelis virginiana* L. var. *parvifolia* Nutt.; *Hamamelis virginica* Linnaeus var. *macrophylla* (Pursh) Nuttall; *Hamamelis virginica* var. *parvifolia* Nuttall; *Trilopus dentata* Rafinesque; *Trilopus estivalis* Rafinesque; *Trilopus nigra* Rafinesque; *Trilopus nigra* var. *catesbiana* Rafinesque; *Trilopus parvifolia* Raf.; *Trilopus parvifolia* (Nuttall) Rafinesque; *Trilopus rotundifolia* Rafinesque; *Trilopus virginica* Raf.; *Trilopus virginica* (Linnaeus) Rafinesque)

North America. Perennial tree or shrub

See *Sp. Pl.* 1: 124. 1753, *Fl. Carol.* [Walter] 255. 1788, *Methodus* (Moench) 273. 1794, *Fl. Amer. Sept.* (Pursh) i. 116. 1813, *Gen. N. Amer. Pl.* [Nuttall]. 1: 107. 1818, *New*

Flora and Botany of North America ... 3: 15–17. 1836 and *Amer. Midl. Naturalist* 3: 63–64. 1913, Chang Hung-ta. *Hamamelidaceae*. In: Chang Hung-ta, ed., *Fl. Reipubl. Popularis Sin.* 35(2): 36–116. 1979

(Emetic, blood purifier, cold remedy, febrifuge, postpartum remedy, antirheumatic, antidiarrheal, for skin diseases, cholera, sore throat, kidney troubles, tuberculosis, eyes problems, arthritis. Magic, ritual, ceremonial, the twigs were used as divining rods (water-witching), thus giving the vernacular name to the plant.)

in English: American witchhazel, Virginian witch-hazel

in North America: café du diable, hamémelis, witch-hazel

Hamatocaulis Hedenäs Amblystegiaceae

Latin *hamus* ‘hook, a fish-hook’, *hamatus* ‘hooked, crooked’ and *caulis* ‘the stalk, stem of a plant’, Greek *kaulos* ‘stem’, see *Species Muscorum Frondosorum* 236, 291. 1801, *Bryologia Europaea* 6: 45 (fasc. 55–56. Mon. 1.). 1853, *A Manual of the Botany of the Northern United States*. (For the German botanist Hans Wolfgang Limpricht, b. 1877, traveller, botanical explorer in China and Tibet, wrote *Botanische Reisen in den Hochgebirgen Chinas und Ost-Tibets*. Dahlem bei Berlin 1922, he was son of the German bryologist Karl Gustav Limpricht (1834–1902); see E.D. Merrill & Egbert H. Walker, *A Bibliography of Eastern Asiatic Botany*. 273. The Arnold Arboretum of Harvard University, Jamaica Plain, Massachusetts 1938, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 382. 1965.)

North America.

See *Linnaea* 10: 406. 1836, *Annales des Sciences Naturelles; Botanique*, sér. 3 2: 308. 1844, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 11: 124. 1861, *Handbok i Skandinaviens Flora*, Attonde Upplagan 342. 1861, *Journal of the Proceedings of the Linnean Society* 8: 43. 1864, *Bericht des Naturhistorischen Vereins in Augsburg* 18: 176. 1865, *Musci Scandinavici* 33. 1879, *Botanisches Centralblatt* 4(Gratisbeil. 2): 23–24. 1880, *Meddelelser om Grønland* 3: 326. 1887 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 42: 216. 1901, *Beihefte zum Botanischen Centralblatt* 13: 402. 1903, *Hedwigia* 46: 310. 1907, *Hedwigia* 48: 153. 1908, *Annales Botanici Fennici* 10: 216. 1973, *Lindbergia* 15: 27. 1989

(To treat fever and inflammation.)

in English: hamatocaulis moss, slender green feather moss, varnished hook-moss

Hamelia Jacq. Rubiaceae

After the French botanist Henri Louis Duhamel du Monceau (Hamel, du Hamel, Monceau), 1700–1782 (Paris), forester and agronomist, plant physiologist, Inspecteur générale de la Marine; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 305. Ansbach 1852 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 479. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 108. 1972, Stafleu and Cowan, *Taxonomic literature*. 1: 692–695. Utrecht 1976, Jon Eklund, in *D.S.B. (or Dictionary of Scientific Biography)*. Editor in Chief Charles Coulston Gillispie. 4: 223–225. 1981, *AAU Reports* 24: 1–241. 1990, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 705. Stuttgart 1993, *Rapid Assessment Program Working Papers* 8: 1–84. 1997, *Listados Florísticos de México* 17: 1–41. 1997, *Ceiba* 44(2): 105–268. 2003 [2005].

Hamelia longipes Standl.

Central America, Guatemala, Mexico, Nicaragua.

See *Proc. Biol. Soc. Wash.* 37: 53. 1924

(Leaves and roots crushed, mixed with cool water, drunk for snakebites.)

Hamelia patens Jacq. (*Duhamelia odorata* Willd. ex Roem. & Schult.; *Duhamelia patens* (Jacq.) Pers.; *Duhamelia sphaerocarpa* (Ruiz & Pav.) Brazil to Peru and Paraguay.

See *Mem. Math. Phis. Acad. Real Sci. Lisboa* 3: 51. 1812 and *Repert. Spec. Nov. Regni Veg.* 20: 18. 1924, *Ark. Bot.* 21A(6): 6. 1927, *Field Museum of Natural History, Botanical Series* 13(5/1): 363–455. 1959, *Rapid Assessment Program Working Papers* 10: 1–372. 1998

(Latex believed to be effective against warts.)

Hanguana Blume Hanguanaceae (Flagellariaceae)

An Indonesian name for the plant, *Hanguana kassintu* Blume; see Karl Ludwig von Blume (1796–1862), *Enumeratio plantarum Javae*. 15. Leyden 1827–1828.

Hanguana malayana (Jack) Merr. (*Hanguana anthelminthica* (Blume) Masam.; *Hanguana aquatica* Kaneh.; *Hanguana kassintu* Blume; *Hanguana malayana* subsp. *anthelminthica* (Blume) Backer; *Hanguana malayana* subsp. *kassintu* (Blume) Backer; *Hanguana malayana* var. *anthelminthica* (Blume) Bakh.; *Susum anthelminthicum* Blume; *Susum kassintu* (Blume) Kurz; *Susum malayanum* (Jack) Planch. ex Hook.f.; *Susum malayanum* f. *aquatica* Backer; *Susum minus* Miq.; *Veratronia malayana* (Jack) Miq.; *Veratrum malayanum* Jack)

Sri Lanka to Caroline Is.

See *Species Plantarum* 2: 1044–1045. 1753, *Malayan Miscellanies* 1: 25. 1820 and *Philippine Journal of Science* 10: 3. 1915, *Journal of Ethnopharmacology* 45(2): 75–95. 1995

(Hemophilic, whole plant; myorelaxant, the leaves.)

in Sabah: nalu kapar, tambaka

Hannoa Planchon Simaroubaceae

Named for Hanno, a Carthaginian navigator of the late fifth century BC., he conducted a voyage of exploration and colonization to the west coast of Africa; founded Thymiaterion (now Kenitra, Mor.), Carian Fortress (Greek: Karikon Teichos; perhaps identified with Essaouira on the Moroccan coast) and Acra (Agadir) and built a temple at Soloeis (Cape Cantin, now Cape Meddouza), he reached the coast of present Gambia or of Sierra Leone. See Th. Falconer, *The Voyage of Hanno*. Oxonii 1797, *Hannonis Periplus*. Friburgi 1808, *London Journal of Botany* 5: 566. 1846.

Hannoa klaineana Pierre & Engl. (*Quassia silvestris* Cheek & Jongkind; *Quassia undulata* D. Dietr.)

Tropical Africa.

See *Synopsis Plantarum* 2: 1416. 1840, *Nomenclature Botanique* [Steudel], ed. 2, 2: 802. 1841, *London J. Bot.* 5: 567. 1846, *Bulletin Mensuel de la Société Linnéenne de Paris* 1237. 1896 and *Bot. Jahrb. Syst.* 32(1): 122. 1902, *Kunene-Sambesi-Exped.* [Warburg] 270. 1903, *J. Linn. Soc., Bot.* 37: 505. 1906 [1904–1906 publ. 1906],

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 46: 282. 1911, *Journal of Ethnopharmacology* 31(1): 59–65. 1991, *International Journal for Parasitology* 28(4): 635–640. 1998, *Journal of Ethnopharmacology* 67(3): 321–325. 1999, *African Journal of Medicine and Medical Sciences* 32(4): 353–356. 2003, *Kew Bull.* 63(2): 249–250. 2008

(Stem bark and leaves for fevers, colic, stomachache, venereal diseases, body ache, pains. Leaves and stem antibacterial and antifungal. Stem bark or root bark as antidote, aphrodisiac and purgative, used against fever, hysteria, mental disorders, insanity, dementia, leprosy, cough and stomach complaints; root bark antimalarial, antitumour.)

in Nigeria: igbo, igigun (Yoruba); uguokpokin (Edo); ikpoki (Itsekiri); ofor (Urhobo); abor (Ijaw); oghulu (Igbo); bobet (Boki)

in Ivory Coast: ati, efe, effe, effeu, haiefai, hete-bake, noube

in Liberia: zauh

in Cameroon: nom ozek

in Gabon: nkourangueuk

in Central Africa: babolo

Haplanthodes Kuntze Acanthaceae

From the Greek *haplos*, *haploos* ‘simple, single’, *anthos* ‘flower’ and *-odes* ‘resembling’, resembling *Haplanthus* Nees, see *Lexikon Generum Phanerogamarum* 265. 1903, *Acta Phytotaxonomica Sinica* 21(4): 470–471, pl. 1. 1983.

Haplanthodes verticillatus (Roxb.) R.B. Majumdar

India. Robust herb, glandular-pubescent, blue violet flowers in axillary spikes, oblong pointed capsule

See *Bull. Bot. Soc. Bengal* 25(1–2): 76. 1971

(Dried plant powder given in fever. Leaf decoction given to expel worms from the intestine.)

in India: ghamasa

Haplolobus H.J. Lam. Burseraceae

From the Greek *haplos* ‘simple, single’ and *lobos* ‘lobe’.

Haplolobus floribundus H.J. Lam

New Guinea. Tree, oblong leaflets, inflorescence axillary, fruits ovoid, extremely variable species, in primary forest

See *Annales du Jardin Botanique de Buitenzorg* 42: 25, 26. 1931, *Acta Phytotaxonomica et Geobotanica* 50: 43–50. 1999

(Young leaf shoots crushed, mixed with water and drunk to treat stomachache.)

Haplopappus Cass. Asteraceae

From the Greek *haplos* ‘single’ and *pappos* ‘pappus’; see *Dictionnaire des Sciences Naturelles* 56: 168. 1828, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 418. Ansbach 1852 and Harvey Munroe Hall, 1874–1932, *A botanical survey of San Jacinto Mountain*. Berkeley 1902, *The genus Haplopappus*. A phylogenetic study in the Compositae. [Carnegie Institution of Washington. Publication n. 389.] Washington 1928.

Haplopappus baylahuen Remy

Chile. Perennial herb

See *Flora Chilena* 4: 42. 1849

(Soaked leaves water decoction drunk to treat hepatic problems.)

in Chile: bailahuén

Haplopappus rigidus Phil. (*Haplopappus rigidus* (Rydb.) Blank.)

Chile.

See *Florula Atacamensis seu Enumeratio ...* 204. 1860 and *Science Studies, Montana College of Agriculture and Mechanical Arts, Botany* 1(2): 100. 1905

(Leaves infusion for cough.)

in Chile: baylahuina

Haplophyllum A. Juss. Rutaceae

From the Greek *haplos* ‘simple, single’ and *phylon* ‘a leaf’.

Haplophyllum tuberculatum Forssk. (*Ruta tuberculata* Forssk.)

Saudi Arabia. Flowers yellow, foul odor

See *Mémoires du Muséum d'Histoire Naturelle* 12: 464. 1825

(Leaves for acute cough, fever, chest congestion. Veterinary medicine, to treat cough in camels.)

in Pakistan: gandrem, sadaf, sadap

Haplophyton A. DC. Apocynaceae

From the Greek *haplos* ‘simple, single’ and *phyton* ‘plant’, see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 412–413. 1844 and *Sida* 16(3): 469–475. 1995, *Darwiniana* 47(1): 140–184. 2009.

Haplophyton cimicidum A. DC. (*Echites cimicidus* Sessé & Moc.; *Echites cinereus* A. Rich.; *Haplophyton cimicidium* A. DC.; *Haplophyton cinereum* (A. Rich.) Woodson; *Rhodocalyx cinereus* (A. Rich.) Miers)

Mexico.

See *The Civil and Natural History of Jamaica in Three Parts* 182. 1756, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 412–413. 1844, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 2: 93. 1850, *On the Apocynaceae of South America* 141. 1878 and *Annals of the Missouri Botanical Garden* 23(2): 231–232. 1936, *Fontqueria* 40: 49–52. 1994, *Sida* 16(3): 472. 1995

(Roots and stem bark for venereal diseases, fevers, hypertension. Insecticidal, used for killing cockroaches, flies, mosquitoes, fleas, lice.)

in English: cockroach plant

Haplophyton crooksii (L.D. Benson) L.D. Benson (*Haplophyton cimicidum* var. *crooksii* L.D. Benson; *Haplophyton crooksii* L.D. Benson)

America.

See *Torreyia* 42: 9. 1942, *American Journal of Botany* 30(8): 630. 1943

(Insecticidal.)

in English: cockroach plant

Haplopteris C. Presl Vittariaceae (Adiantaceae)

From the Greek *haplos* 'simple, single' and *pteris* 'a fern', see *Tentamen Pteridographiae* 141. 1836.

Haplopteris ensiformis (Sw.) E.H. Crane (*Oetosis ensiformis* (Sw.) Greene; *Vittaria ensiformis* Sw.; *Vittaria plantaginea* Bory)

East Africa, Mauritius, Sumatra. Epiphyte, hanging from the branches and tree trunk

See *Systematic Botany* 22(3): 509–517. 1997[1998]

(Stomachic, fronds infusion drunk to treat colic.)

Hardwickia Roxb. Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

For the British botanist Thomas Hardwicke, 1755–1835 (Lambeth, London), zoologist, Major-General, 1778 Bengal Artillery, 1804 Fellow of the Linnean Society, 1813 Fellow of the Royal Society, wrote *An account of the Sheep-Eater of Hindústán ...* (From the *Transactions of the Royal Asiatic Society of Great Britain and Ireland*. vol. III) London 1833, collected plants in South Africa and St. Helena, India and Mauritius. See Roxburgh, William (1751–1815), *Plants of the Coast of Coromandel* 3: 6. London: George Nicol, 1795–1819, *Hort. Bengal.* 33. 1814, Sir William Jardine (1800–1874) and Prideaux John Selby (1788–1867), *Illustrations of Ornithology, ... With the co-operation of ... Thomas Hardwicke*. Edinburgh [1826–1835], Lady Pleasance Smith, ed., *Memoir and Correspondence of ... Sir J.E. Smith*. London 1832, Antoine Lasègue (1793–1873), *Musée botanique de M. Benjamin*

Delessert. Paris and Leipzig 1845 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, M. Archer, *Natural History Drawings in the India Office Library*. London 1962, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 126. Boston 1965, Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Hardwickia binata Roxb.

India. Perennial non-climbing tree, drooping branches, flowers in terminal and axillary paniced racemes, pods strap-shaped

See *Hortus Bengalensis*, or a catalogue ... 33. 1814, *Plants of the Coast of Coromandel* 3: 6, pl. 209. London, 1795–1819

(Used in Ayurveda and Sidha. Gum used externally to cure gonorrhoea. Bark decoction in diarrhoea, piles, toxemia, skin diseases, dysentery, worms.)

in India: aaccha, aacha, acca, accha, acha, altina, alviro, anjan, anjana, anzan, asana, asanagurgi, asina, epe, genne, jiran, kaaraacha, kamara, kamaru, kamla, kammar, kammara, kamra, karacha, karachi, karachu, karachya, karaci, karmara, kattudugi, kattutuku, kolavu, kolla, malaiathi, mataiyancampirani, matayen, naarayepe, naarepe, naiyepi, naraepe, narayepe, narayepi, narepe, narepu, naryepa, naryepi, samprani, shurali, ura, uram, yalam, yapa, yenne, yepi, yeppi

Hardwickia mopane (J. Kirk ex Benth.) Breteler *Colophospermum mopane* (Benth.) J. Léonard; *Colophospermum mopane* (J. Kirk ex Benth.) Léonard; *Colophospermum mopane* (J. Kirk ex Benth.) J. Kirk ex J. Léonard; *Copaiba mopane* (Kirk ex Benth.) Kuntze; *Copaifera mopane* Kirk ex Benth.; *Copaifera mopane* Benth.) (the specific name is derived from a Bantu common name for the plant, see Sir Harry H. Johnston, *A comparative study of the Bantu and Semi-Bantu languages*. Oxford 1919, 1922, Henri A. Junod, *Moeurs et Coutumes des Bantous*. Paris 1936)

Zambia. Perennial non-climbing tree, bark grey-brown deeply fissured, leaves green, in woodland, see also *Colophospermum mopane*

See *Transactions of the Linnean Society of London* 25: 316–317. 1866 and *Bulletin du Jardin Botanique de l'État* 19: 390. 1949, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981, *Taxon* 53: 813. 2004

(Twigs chewed as toothbrushes. The leaves used for healing wounds. Roots for diarrhoea.)

Harmsioplanax O. Warburg Araliaceae

For the German botanist Hermann August Theodor Harms, 1870–1942, professor of botany at the Prussian Academy

of Science, from 1900 editor of *Pflanzenreich*, contributor to H.G.A. Engler and K.A.E. Prantl *Die Natürlichen Pflanzenfamilien* ed. 1 and ed. 2; see *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 166. 1897 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 128. 1965.

Harmsioplanax harmsii K. Schum.

Papua New Guinea.

See *Genera Plantarum* 217. 1789 and *Nachträge zur Flora der Deutschen Schutzgebiete in der Südsee* [Schumann & Lauterbach] 329. 1905

(Poison antidote.)

in Papua New Guinea: mak, murui, obolo

Harpagophytum DC. ex Meisn. Pedaliaceae

Greek *harpagos* ‘a hook, a rake’, *harpazo* ‘to rob, rapacious, ravish’ and *phyton* ‘a plant’; Latin *harpago, onis* ‘hook, a grappling hook, drag’, *harpago, avi, atum, are* ‘to rob’; an allusion to the armed capsules.

Harpagophytum procumbens (Burch.) DC. ex Meisn. subsp. ***procumbens*** (Burch.) DC. ex Meisn. (*Harpagophytum burchellii* Decne.; *Uncaria procumbens* Burch.)

South Africa. Perennial herb with vertical rootstock, corolla dark red, large hooked claw-like fruit, savanna, deciduous forest

See *Genera Plantarum* 1: 125. 1789, *Pl. Vasc. Gen.* 298, 206. 1840

(Tubers analgesic, bitter tonic, hypotensive, sedative, oxytocic, digestive aid, antiinflammatory, ointment, antirheumatic, antiphlogistic. An infusion of the tuber used for fever and blood diseases.)

in English: devil’s claw, grapple plant, grapple thorn, quick thorn, sandbur, veldspider, woolspider

in Southern Africa: beesdubbeltjie, beestedoorn, bobbejaandoring, bobbejaanklou, duiwelsdoring, duiwelshaak, duiwelsklou, duiwelsnaels, haakdoring, kalabasdubbeltjie, Kalahariskaapklou, katdoring, klou-doring, leudoring, noorsdoring, ouklip, rankdoring, sand-doring, sand-dubbeltjie, sandnoors, skerpioen-dubbeltjie, toutjie, veldspinnepok, wolspinnepok; kanako (Tswana)

Harpephyllum Bernh. ex K. Krause Anacardiaceae

From the Greek *harpe* ‘sickle’ and *phyllon* ‘leaf’, referring to the shape of the falcate leaflets, see *Flora* 27(1): 349. 1844.

Harpephyllum caffrum Bernh. ex Krause

South Africa. Evergreen tree, large, single-stemmed, high-branching, round dense canopy, leaflets leathery, small white flowers star-shaped, fleshy berries edible, sour pulp

See *Flora* 27(1): 349. 1844

(A bark extract used as an emetic and blood purifier, and for acne and eczema. Powdered burnt bark applied to treat sprains and fractures.)

in English: kaffir date, kaffir plum, wild plum

in Southern Africa: kafferpruim, suurpruim, gwenya; umGwenye (Xhosa); umGwenye (Swazi); umGwenya (Zulu); mmidibidi (North Sotho)

Harpullia Roxb. Sapindaceae

Harpulli is a Bengali name used in Chittagong, Bangladesh, for *Harpullia cupanioides* Roxb.; see William Roxburgh, *Flora Indica*. 2: 441–442. Serampore 1824.

Harpullia arborea (Blanco) Radkl. (*Harpullia arborea* Radlk.)

India. Small trees, greenish-yellow flowers in axillary panicles, bright red obcordate capsules 2-lobed with bright orange arillate seed

See *Flora Indica*; or descriptions of Indian Plants 2: 441–444. 1824 and *Botanica Acta* 103: 372–383. 1990

(Crushed bark applied on legs as a leech repellent, stem bark juice applied to prevent leech bite. Bark as fish poison.)

in India: poochikkolli, puzhukolli, puzhukollimaram

Harpullia cupanioides Roxb. (*Harpullia imbricata* Thwaites)

India. Tree, cylindrical bole, smooth soft orange bark

See *Hort. Beng.* 86. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 442–444. 1824

(Crushed fresh bark applied on legs as a leech repellent, stem bark juice applied to prevent leech bite. Fish poison.)

in China: jia shan luo

in India: purzhukollimaram, puzhukolli, puzhukollimaram

Harrisonia R. Br. ex A. Juss. Rutaceae (Rhamnaceae, Simaroubaceae)

Named after Arnold Harrison, a British amateur gardener, or for Charles Harrison, who wrote *A treatise on the culture and management of fruit-trees*. London 1823, see *Mémoires du Muséum d’Histoire Naturelle* 12: 517. 1825, *Oesterreichische Botanische Zeitschrift* 47: 419. 1897.

Harrisonia abyssinica Oliv. (*Harrisonia occidentalis* Engl.)

Tropical Africa.

See *Mémoires du Muséum d’Histoire Naturelle* 12: 517. 1825, *Flora of Tropical Africa* 1: 311. 1868

(Whole plant extract to treat stomachache and abdominal pains. Leaves anthelmintic, antiinflammatory, antiseptic, for rheumatism, piles, abscesses, carbuncles, stomach upset, waist pain and dyspnea; leaf extract for snakebite. Roots pounded and soaked in water for stomach pain; roots decoction for fever, dyspnea, tuberculosis, snakebite, swelling of the testicles, insomnia, nausea, vomiting.)

in Kenya: mukiliulu

in Nigeria: arujeran, sekpò

in Tanzania: mapaura-dogo, mkidori, mkoromanda, mkoromonda, mkusu, msoma mgwole

Harrisonia brownii A.H.L. Juss.

New Guinea. Scandent shrub, paired spines at base of older leaves and leafless twigs, tiny flowers in axillary cymes, drupe with shiny black exocarp and purple flesh

See *Memorias del Museo de Historia Natural "Javier Prado"* 12: 517, 540, t. 28, no. 47. 1825

(Dried whole plant to treat malarial fever. Leaves decoction drunk to treat diarrhea, cough, asthma, malaria; boiled leaves, the bitter solution used to treat fever, malaria and asthma.)

in Papua New Guinea: iburo

Harrisonia occidentalis Engl.

Tropical Africa.

See *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 218. 1895

(Root bark laxative, antiseptic, for skin diseases.)

Harrisonia perforata (Blanco) Merr. (*Feroniella pubescens* (Wall. ex Hook. f.) Tanaka; *Feroniella pubescens* Yu. Tanaka; *Harrisonia citrinaecarpa* Elmer; *Harrisonia perforata* Merr.; *Lasiolepis multijuga* Benn.; *Lasiolepis paucijuga* Benn. & R. Br.; *Limonia pubescens* Wall. ex Hook. f.; *Paliurus dubius* Blanco; *Paliurus perforatus* Blanco)

Philippines.

See *Flora de Filipinas* [F.M. Blanco] 174. 1837, *The Flora of British India* 1: 507. 1875 and *Philippine Journal of Science* 7(4): 236. 1912, *Studia Citrologica* 2: 30. 1928

(Root bark decoction for diarrhea, dysentery, cholera.)

in China: niu jin guo

in Philippines: asimau, baguit, baut, bokit, mamikil, sap-sapang

Harungana Lam. Clusiaceae
(Guttiferae, Hypericaceae)

The local name for the plant in Madagascar, see *Tableau Encyclopédique et Méthodique ... Botanique* 3: t. 645. 1796, *Synopsis Plantarum* 2: 91. 1807, *Genera Nova*

Madagascariensia 15. 1808, *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 157. 1836.

Harungana madagascariensis Lam. ex Poir. (*Arungana paniculata* Pers.; *Haronga madagascariensis* (Lam. ex Poir.) Choisy; *Haronga madagascariensis* Choisy; *Haronga paniculata* (Pers.) Lodd. ex Steud.; *Haronga paniculata* Lodd. ex Steud.; *Haronga paniculata* fo. *oblongifolia* Engl.; *Haronga paniculata* var. *oblongifolia* Engler ex De Wild.; *Harungana paniculata* (Pers.) Lodd. ex Steud.; *Harungana madagascariensis* Poir.; *Harungana montana* Spirlet; *Harungana paniculata* Pers.; *Harungana robynsii* Spirlet)

Tropical Africa, Madagascar. Shrub or tree, many-branched, orange or blood-red resin exudes from broken leaves, twigs and from a slash in the bark, very small almond-scented flowers in dense many-flowered terminal heads, very small fruits deep red in heavy massed heads, sweet ripe berries eaten raw, bark and roots chewed as a substitute for toothpaste, a source of bee forage

See *Encyclopédie Méthodique, Botanique* 6: 314. 1804, *Syn. Pl.* 2: 91. 1807, *Genera Nova Madagascariensia* 15. 1808, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 20: 307. 1821, Choisy, Jacques Denys (1799–1859), *Prodromus d'une monographie de la famille des hypéricinées* 34. Genève, J. J. Paschoud, 1821, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 722. 1840 and *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 2: 560. 1913, *Annales de la Société Scientifique de Bruxelles, Série B* 37, *Mém.*: 85. 1913, *Bulletin du Jardin Botanique de l'État* 29: 321–322. 1959, *Bull. Jard. Bot. de l'État* 36: 425–459. 1966, *Annals of the Missouri Botanical Garden* 74: 123–125. 1987

(Leaves, roots and stem for acute toothaches and stomachache, for dysentery and piles. Leaves rubbed on the head to treat headache, also used for diarrhea, sore throats and bleeding. Leaves and bark for bloody diarrhea; bark for malaria. Bark and roots boiled and the infusion taken twice a day to interrupt menses; roots used to hasten breast development in young women. Sap in the treatment of scabies and tapeworm. A mixture of leaves of the plant with leaves of *Bidens gracilior* Sherff drunk to remedy malaria and other fevers.)

in English: orange-milk tree

in Congo: ekongo, metondolondo, motondolondo

in Madagascar: fohatra, fohatse, haronga, harungana, miangaroka

in Nigeria: elepo, amuje, itue, ituwi, urua-rua, adidin; alillibar rafi (Hausa); elepo (Yoruba); itue (Edo); uruarua (Ishan); boupulo (Ijaw); ututru (Igbo); oton (Efik); oton (Ibibio)

in Southern Africa: muMinyu, muTseti, muTsodzo (Shona)

in S. Rhodesia: muTsotso, muTsetsi

in Tanzania: mbura, mdamudamu, mkekundu, mkuntu, mngonengone, mtunu

in Yoruba: amuje, amujenla, elepo

Haumania J. Léonard Marantaceae

For the Belgian botanist Lucien Hauman, 1880–1965, author of *La végétation des hautes Cordillères de Mendoza*. Buenos Aires 1919, *Catalogue des phanérogames de l'Argentine* Buenos Aires 1917–1923, jointly written with G. Vanderveken and Luis H. Irigoyen; see *Gen. Pl.* [Bentham & Hooker f.] iii. 651. 1883 and *Bull. Jard. Bot. État Bruxelles* 19: 453–454. 1949, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 139. 1965.

Haumania danckelmaniana (J. Braun & K. Schum.) Milne-Redh. (*Trachyphrynium danckelmanianum* J. Braun & K. Schum.; *Trachyphrynium spinulosum* Pierre)

West Tropical Africa. Spiny vine, liana, straggling or climbing, bamboo-like shrub, zig-zag wiry stems, white fragrant flowers, pendulous, inflorescences, food for gorillas

See *Genera Plantarum* 3: 651. 1883, *Mitteilungen aus den Deutschen Schutzgebieten. Deutsches Kolonialblatt* 2: 153. 1889 and *Kew Bulletin* 1950: 162. 1950, *African Study Monographs* 23(2): 65–89. June 2002

(Leaf sap vermifuge. Veterinary medicine, roots used.)

in Central African Republic: basele, baselé, djelé, zilli

Haumaniastrum P.A. Duvign. & Plancke Lamiaceae (Labiatae)

For the Belgian botanist Lucien Hauman, 1880–1965; see *Edwards's Botanical Register* 15: pl. 1282. 1829 and *Biologisch Jaarboek* 27: 222, 224. 1959, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 139. 1965.

Haumaniastrum caeruleum (Oliv.) P.A. Duvign. & Plancke (*Acrocephalus barakaensis* De Wild.; *Acrocephalus bequaeritii* De Wild.; *Acrocephalus caeruleus* Oliv.; *Acrocephalus caeruleus* var. *trichosoma* Briq.; *Acrocephalus campicola* Briq.; *Acrocephalus centratheroides* Baker; *Acrocephalus claessensii* Robyns & Lebrun; *Acrocephalus crinitus* Briq.; *Acrocephalus degiorgii* Robyns & Lebrun; *Acrocephalus demeusei* Briq. ex T. Duvign. & Plancke; *Haumaniastrum nyassicum* Gilli; *Haumaniastrum uluguricum* Gilli; *Lippia oligophylla* Baker) (*Acrocephalus* Benth., from the Greek *akros* 'the summit, terminal, highest' and *kephale* 'head', the flowers are at the top of the branches.)

Trop. Africa, Madagascar. Herb, woody-based, shrubby, stem pale brown with dark purple tomentum, young leaves purple, bracts subtending inflorescence shaded white, inflorescence purple-white, blue-purple upper lobes, stigma and

style white, ovary green, anthers blue-purple dotted white at apex, leaves with mint smell when crushed or fetid smelling herb, at forest edge, in disturbed area, montane forest, tall grassland, in wooded grassland

See *Labiatarum Genera et Species* 23. 1832 and *J. Linn. Soc., Bot.* 40: 171. 1911, *Ann. Soc. Sciences Bruxelles* 41: 30. 1921, *Contr. Fl. Katanga*, Suppl. 1: 91. 1927, *Biologisch Jaarboek* 27: 222. 1959, *Bull. Jard. Bot. État* 33(Suppl.): 843. 1963, *Ann. Naturhist. Mus. Wien* 77: 33, 35–36. 1973, *Kew Bulletin* 31: 174. 1976, *Kew Bulletin* 52(2): 370. 1997

(Astringent, antalgic, tonic, stimulant, used for diarrhea, dysentery, fever, malaria, hemorrhoids, stomachache, agalactia. Local medicine uses: “Dawa ya vi donda”. Leaves decoction, against bad spirits.)

in Burundi: urusekerasuka

in Congo: lubunanga

in Tanzania: ivanivani, kwa fufya

Hebanthe C. Martius Amaranthaceae

Possibly from the Greek *hebe* ‘youth, down of puberty’ and *anthos* ‘flower’, see *Nova Genera et Species Plantarum* ... 2: 42. 1826.

Hebanthe eriantha (Poir.) Pedersen (*Gomphrena eriantha* (Poir.) Moq.; *Iresine erianthos* Poir.)

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 386. 1849 and *Bonplandia* (Corrientes) 10: 101. 2000

(Aphrodisiac, anticancer, immune enhancer.)

Hebe Comm. ex A.L. Juss. Scrophulariaceae

In honor of the goddess of youth in Greek mythology, cup-bearer of the gods; Greek *hebe* ‘youth, down of puberty’; see *Species Plantarum* 1: 9–14. 1753, *Genera Plantarum* [Jussieu] 105. 1789, *Systema Naturae* 27. 1791, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 421. Ansbach 1852 and P.J. Garnock-Jones & B.P.J. Molloy, *New Zeal. J. Bot.* 20: 391–399. 1983, *Bot. Soc. Otago Newsl.* 5: 11. 1987, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. 25: 115–170. 1987, Graham Hutchins, *Hebes Here and There*. Hutchins & Davies, Reading 1997, Peter G. Barnes, in *The New Plantsman*. 5(1): 62–63. March 1998.

Hebe salicifolia (Forster f.) Pennell (*Hebe salicifolia* Pennell; *Veronica forsteri* F. Muell., nom. illeg., nom. superfl.; *Veronica salicifolia* G. Forst.; *Veronica salicifolia* A. Cunn. ex Hook.f., nom. inval.)

New Zealand. Low spreading shrub, glossy green leaves, sweet scented white-pink flowers from the base of the leaves

See *Fl. Ins. Austr.* 3. 1786, *Veg. Chatham-Isl.* 45 (-47). 1864 and *Rhodora* 23: 39. 1921, *New Zealand J. Bot.* 37: 511–521. 1999

(Young leaf tips astringent, for diarrhea and dysentery, kidney and bladder troubles.)

in English: veronica

Maori name: koromiko

Hedeoma Pers. Lamiaceae (Labiatae)

Latin *hedyosmos* for the herb wild mint, Greek *hedyosmon* ‘green mint, wild mint’, *hedysmos* ‘sweetness’, *hedys* ‘sweet’, *osme* ‘smell’, *hedyosmos* ‘sweet-smelling, fragrant’, *hedeos* adv. of *hedys*; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 422. Ansbach 1852.

Hedeoma drummondii Benth.

Mexico.

See *Labiatarum Genera et Species* 368. 1834

(Leaves and stem decoction febrifuge, sedative.)

Hedeoma pulegioides (L.) Pers. (*Cunila pulegioides* L.; *Hedeoma pulegioides* Pers.)

North America.

See *Systema Naturae*, Editio Decima 2: 1359. 1759, *Species Plantarum*, Editio Secunda 1: 30. 1762, *Syn. Pl.* 2: 131. 1806 and *Cytologia* 46: 27–44. 1981, *Journal of Cytology and Genetics* 16: 35–45. 1981

(Analgesic, stimulant.)

in English: American pennyroyal

Hedera L. Araliaceae

Latin *hedera* or *edera* for *Hedera helix* L., the ivy; Akkadian *kadru*, *kadaru*; see Carl Linnaeus, *Species Plantarum*. 202. 1753 and *Genera Plantarum*. Ed. 5. 94. 1754; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 442. Ansbach 1852; Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 2: 372. Zanichelli, Bologna 1980; G. Volpi, “Le falsificazioni di Francesco Redi nel Vocabolario della Crusca.” in *Atti della R. Accademia della Crusca per la lingua d’Italia*. 33–136. 1915–1916.

Hedera canariensis Willd.

Cosmopolitan. Woody vine, climbing or creeping, evergreen, small yellow-green flowers small, black fleshy fruits

See *Species Plantarum* 1: 202. 1753, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 4: 261. 1830 and *Contact Dermatitis*. 19(2): 125–8. 1988, *Plant Systematics and Evolution* 219: 165–179. 1999

(Dermatitis, severe skin irritation, allergic contact dermatitis, bullous dermatitis, following contact with cell sap.)

Common names: Canary island ivy, Algerian ivy

Hedera helix L. (*Hedera caucasigena* Pojark.; *Hedera helix* Lowe; *Hedera helix* subsp. *caucasigena* (Pojark.) Takht. & Mulk.; *Hedera helix* var. *palmata* Paul; *Hedera taurica* (Paul) Carrière)

Cosmopolitan. Woody vine, alternate palmately-lobed dark green leaves, flowers uncommon borne in small umbrella-like clusters, small black berries

See *Species Plantarum* 1: 202. 1753, *A Manual Flora of Madeira* 376. 1864, *Gardener's Chronicle & Agricultural Gazette* 1867: 1215. 1867, *Revue Horticole* 62: 163. 1890 and *Flora URSS* 16: 587. 1950, *Fl. Iran.* 102: 2. 1973, *Flora Armenii* 6: 251. 1973, *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 23: 1–23. 1974, *Taxon* 30: 856–857. 1981, Mitchell, J.C. “Allergic contact dermatitis from *Hedera helix* and *Brassica actinophylla* (Araliaceae).” *Contact Dermatitis* 7: 158–159. 1981, Boyle, J., Harman, R.M. “Contact dermatitis to *Hedera helix* (common ivy).” *Contact Dermatitis* 12: 111–112. 1985, *Genome* 29: 498–503. 1987, Massmanian, A. et al. “Contact dermatitis from variegated ivy (*Hedera helix* subsp. *canariensis* Willd.).” *Contact Dermatitis* 18: 247–248. 1988, *Opera Botanica* 137: 1–42. 1999, *Plant Systematics and Evolution* 219: 165–179. 1999

(The leaves and fruit contain hederasaponins that hydrolyze into toxic hederin compounds, micro-hederin and beta-hederin. These toxins have caused poisoning in cattle, dogs, sheep, birds and other pets, and humans; low toxicity, although reported to be very toxic, coma and death may occur if large quantities are consumed. Two chemicals in the sap can also cause severe contact dermatitis in sensitive humans. Humans who ingested the berries have shown symptoms, including coma. Dermatitis, allergic and irritant contact dermatitis, bullous dermatitis. Dermatitis is rare but can be severe.)

in English: common ivy, English ivy, ivy

in Arabic: lablab kebir, leblab, qessous

in India: banda, karmora, lablab, maravalai

Hedera nepalensis K. Koch

India, Nepal.

See *Hortus Dendrologicus* 284. 1853 and *Taxon* 29: 712–713. 1980, *Plant Systematics and Evolution* 219: 165–179. 1999

(Dried small twig powder paste applied against psoriasis; dried twig powder mixed with white yolk of hen's egg applied against body swellings and muscle inflammation. Berries infusion in rheumatism, stimulant, diaphoretic and cathartic. Fermentated leaves in glandular enlargement.)

in India: arambal, kuhru, laglya

Hedera nepalensis K. Koch var. *sinensis* (Tobler) Rehder (*Hedera himalaica* Tobler; *Hedera himalaica* (Hibb.) Carr.; *Hedera himalaica* var. *sinensis* Tobl.; *Hedera potaninii* Pojark.; *Hedera robusta* Pojark.; *Hedera shensiensis* Pojark.; *Hedera sinensis* (Tobler) Handel-Mazzetti; *Hedera sinensis* Tobler)

China, India, Nepal.

See *Species Plantarum* 1: 202. 1753, *Hortus Dendrologicus* 284. 1853 and *Gatt. Heder.* 67, 79–80, f. 31–38, 39–42. 1912, *Journal of the Arnold Arboretum* 4(4): 250. 1923, *Symbolae Sinicae* 7: 693. 1933, *Notul. Syst. Lining.* 14: 258, 261, f. 1, 3. 1951, *Taxon* 29: 712–713. 1980, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Plant Systematics and Evolution* 219: 165–179. 1999

(Leaves decoction for skin diseases.)

in English: ivy

in China: chang chun teng

in Nepal: dudela

Hedera rhombea (Miquel) Bean var. *formosana* (Nakai) H.L. Li (*Hedera formosana* Nakai; *Hedera helix* var. *rhombea* Miq.; *Hedera rhombea* Siebold & Zucc., nom. nud.)

Korea.

König) Lam.)

India, Taiwan. Leafy stems, flowers very fragrant, cone-like spikes dense flowered, oblong imbricate bracts, green calyx, corolla tubular, oblong capsule with crimson aril seed

See *Observationes Botanicae* 3: 73–74. 1783, *The Cyclopaedia*; or, universal dictionary of arts, ... 17: *Hedychium* no. 3. 1811, *The Flora of British India* 6(18): 226. 1892 and *Guihaia* 4: 13–18. 1984, *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984

(Crushed roots juice put into eyes for eye troubles, red eyes. Leaves decoction drunk for indigestion; pain in the abdomen, eat the leaves with betel; vapor of boiled leaves for sore joints. Rhizome and leaf paste applied on forehead for headache and for body swellings. Rhizomes antisypilitic, antidote, carminative, antirheumatic, tonic, stimulant; dried rhizome powder given with warm water in fever. Magic, root as charm against

evil spirits, and when the Goddess of jungle harms men for their misdeeds.)

in English: butterfly ginger, butterfly lily, cinnamon jasmine, common ginger lily, garland flower, ginger lily, white ginger

in Bangladesh: dolon chapa

in China: jiang hua, tu qiang huo

in India: bhod silndi, gulbakaoli, kachhra, phaching, rubiri

in Japan: hana-shuku-sha

Malay name: ganda suli

in Hawaii: 'awapuhi ke'oke'o

Hedychium cylindricum Ridl. (*Hedychium mjoebergii* Merr.)

Malesia.

See *Journal of the Malayan Branch of the Royal Asiatic Society* 1: 98. 1923, *Sarawak Mus. J.* 3: 519. 1928

(Stalk juice squeezed into eye to treat infections and sores; inner stalk decoction drunk to treat malaria. Powdered rhizome applied as a poultice to sores, insect bites and stings, infected wounds and cuts.)

in Indonesia: tubo sakai

Hedychium flavescens Carey ex Roscoe (*Gandasulium peregrinum* (N.E. Br.) Kuntze; *Gandasulium peregrinum* Kuntze; *Hedychium coronarium* var. *flavescens* (Carey ex Roscoe) Baker; *Hedychium coronarium* var. *subditum* (Turrill) Naik; *Hedychium emeiense* Z.Y. Zhu; *Hedychium panzhuum* Z.Y. Zhu; *Hedychium subditum* Turrill)

Nepal, China.

See *Monandr. Pl. Scitam.* t. 47, 50. 1824 and *Acta Bot. Yunnan.* 6: 63, 65, 1984

(For skin diseases.)

in English: cream ginger, yellow ginger, yellow ginger lily

in Hawaii: 'awapuhi melelemele

in China: e mei jiang hua

Hedychium gardnerianum Sheppard ex Ker Gawler (*Gamochilus speciosus* T. Lestib.; *Hedychium gardnerianum* Griff.; *Hedychium gardnerianum* Wall. ex Spreng.; *Hedychium gardnerianum* Ker Gawl.; *Hedychium gardnerianum* Roscoe; *Hedychium gardnerianum* var. *pallidum* (Regel) Baker; *Hedychium pallidum* Regel) (named for the English colonial governmental officer Hon. Edward Gardner (b. 1784), 1817 resident in Nepal at Court of Rajah at Katmandu, sent mosses to W.J. Hooker and plants to N. Wallich)

Nepal.

See *Bot. Reg.* 9: t. 774. 1824, *Monandrian Plants of the Order Scitamineae* 1–2: t. 62. 1824, *Syst. Veg.* (ed. 16) [Sprengel]

4(2, Cur. Post.): 6. 1827, *Not. Pl. Asiat.* 3: 419. 1851, *Fl. Brit. India* 6: 230. 1892

(Rhizome as antidote for poison.)

in English: butterfly lily, ginger lily, kahili ginger

in Hawaii: kahili ginger, kahili, 'awapuhi kahili

in India: kitanpang

Hedychium glaucum Roscoe (*Hedychium gracile* var. *glaucum* (Roscoe) Baker)

Nepal. Small herb

See *Bot. Reg.* 9: t. 774. 1824, *Monandrian Plants of the Order Scitamineae* 1–2: t. 53. 1824, *The Flora of British India* 6: 229–230. 1892

(Rhizome as antidote for poison, food poisoning.)

in India: kinaa

Hedychium gracile Roxb. (*Gandasulium gracile* Kuntze; *Gandasulium gracile* (Roxb.) Kuntze)

India, Thailand. Leafy stems, subsessile lanceolate-oblong leaves, white or yellow flowers

See *Fl. Ind.* 1: 12. 1820, *Fl. Ind.*, ed. Carey, i. 14. 1832, *Bot. Mag.* 108: t. 6638. 1882, *Revisio Generum Plantarum* 2: 690. 1891

(Root used in chest pain. Magic, plant offered to drive away evil spirit by local priest when a man is suffering from diseases.)

in India: bibu, hatong-gism

Hedychium longicornutum Griff. ex Baker (*Hedychium crassifolium* Baker; *Hedychium longicornutum* var. *minor* Ridl.)

Thailand, Malaysia.

See *Fl. Brit. India* 6: 228. 1892 and *Bull. Misc. Inform. Kew* 1926: 88. 1926

(Worms in children, plant decoction in a bath. Roots for ear-ache and vermifuge.)

Malay name: tepus hinggap, tepus lada, ubat chaching

Hedychium spicatum Buch.-Ham. ex Smith (*Gandasulium sieboldii* (Wall.) Kuntze; *Gandasulium sieboldii* Kuntze; *Gandasulium spicatum* (Sm.) Kuntze; *Gandasulium spicatum* Kuntze; *Hedychium acuminatum* Roscoe; *Hedychium album* Buch.-Ham. ex Wall.; *Hedychium flavescens* Carey ex Roscoe; *Hedychium flavescens* Lodd. ex Lindl., nom. illeg.; *Hedychium flavescens* Lodd.; *Hedychium sieboldii* Wall.; *Hedychium spicatum* Lodd.; *Hedychium spicatum* Smith; *Hedychium spicatum* var. *acuminatum* (Roscoe) Wall.; *Hedychium spicatum* var. *hasianum* C.B. Clarke ex Baker; *Hedychium spicatum* var. *trilobum* (Wall. ex Roscoe) Wall.; *Hedychium tavoyanum* Horan.; *Hedychium trilobum* Wall.; *Hedychium trilobum* Wall. ex Roscoe)

Himalaya. Stout leafy herb, robust, perennial, rhizomes, white or yellowish flowers in densely flowered spikes

See *Observationes Botanicae* 3: 73–74. 1783, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 7. 1791, *Cycl.* 17: 8. 1811, *Bot. Cab.* t. 653, 723. 1818–1833, *Monandr. Pl. Scitam.* 1–2: t. 47. 1824, *Monandr. Pl. Scitam.* 3–4: t. 50. 1825, *Numer. List* [Wallich] n. 6554. 1832, *Journ. Hort. Soc.* vii. (1852) 281. 1852, *Hooker's J. Bot. Kew Gard. Misc.* 5: 328, 371. 1853, *Revis. Gen. Pl.* 2: 690. 1891, *Fl. Brit. India* 6: 227. 1892

(Used in Ayurveda and Unani. Stem juice given in case of fever. Rhizomes bitter, pungent, purgative, carminative, stimulant, heating, tonic, blood purifier, used in stomach trouble, dyspepsia, skin lesions, asthma, liver complaints, vomiting, diarrhea, dysentery, inflammation, snakebite; decoction as eye drop for diseases of the eyes; paste applied on boils. Powdered rootstock and rhizome powder stomachic, carminative, anthelmintic, stimulant, tonic. Rhizome and leaf extracts together given to regulate menstruations and alleviate arthritis. Roots chewed as a relief from the snakebite. Ceremonial, ritual, *dhoop* from the roots. Veterinary medicine, rhizome and flower extract given orally in treating food poisoning; root paste given for cough.)

in English: butterfly ginger, butterfly lily, cinnamon jasmine, common ginger lily, garland flower, ginger lily, white ginger

in China: cao guo yao

in India: abir, aithur, amlaharidra, amlanisha, bagldu, ban haldi, ban-kela, banhaldi, banhaldu, cimai kiccilikilanku, dudh kenwara, dudh kenwra, durva, gandapatari, gandasati, gandha, gandha saathi, gandha-shati, gandhamuli, gandhamulika, gandhapalashi, gandhapalasi, gandharika, gandhasati, gandhashati, gandhavadhu, gandholi, haimi, haridracchadana, himaja, himodbhava, jangli haldi, jharanbaja, jimutamula, kachari, kachhora, kachor, kachur-kachu, kafur-kachri, Kapoor, Kapoor kachli, Kapoorakachari, Kapoorkachali, kapur kachari, kapur kachiri, kapur kachri, kapura kachali, kapurakachari, kapurkachli, kapurkachri, kapurkachur, karbura, karchura, karpur, karpura, karpurakachali, karpurakachari, khor, malai inci, ndhori, prithupalashika, prthupalasika, saduwa, samudra, sara, sapur kachri, saru, sathi, sati, saumya, sedhua, sedua, seer, selru, shadugrantha, shathi, shati, shedwa, sheduri, shimai-kich-chilik-kishangu, shimai-kich-chilik-kizhangu, sima-kich-chili-gaddalu, simaikkichilikilangu, sitruti, sutti, shimai-kich-chilik-kishangu, simaikkichilik-kilangu, sitruti, sonatakka, sugandha, sugandhamula, sugandhasati, sutthee, suvata, takhellei-hanggam-mapan, tuni, van haldi, velati kachur, vilaayithi kachhar, viteise

in Nepal: gaisya, tariya

in Tibetan: zur pa dkar po

Hedychium villosum Wall.

Nepal, China, Himalaya. Terrestrial or epiphyte, leafy stems, rhizome aromatic, glabrous leaves, spikes rachis villous, white fragrant flowers

See *Fl. Ind.* 1: 12. 1820

(Juice of crushed rhizome taken as a remedy for asthma, cough, spasms, colic.)

in China: mao jiang hua

in India: thingsawhthing

Hedyosmum Sw. Chloranthaceae

From the Greek *hedyosmon* 'green mint, wild mint', *hedyosmos* 'sweet-smelling, fragrant', see *Philosophical Transactions of the Royal Society of London* 77: 359. 1787, *Nova Genera et Species Plantarum seu Prodromus* 5, 84. 1788, *Florae Peruvianaee, et Chilensis Prodromus* 136, t. 29. 1794, *Systema Vegetabilium Florae Peruvianaee et Chilensis* 271. 1798, *Botanical Magazine* 48: sub pl. 2190. 1820, *Revisio Generum Plantarum* 2: 565. 1891 and *Publ. Biography. Editor in Chief Charles Coulston Gillispie.) 6: 220–222. 1981, Stafleu and Cowan, *Taxonomic Literature*. 2: 123–127. Utrecht 1983.

Heeria argentea (Thunb.) Meisn. (*Anaphrenium argenteum* E. Meyer; *Anaphrenium argenteum* (Thunb.) E. Meyer; *Heeria argentea* Meisn.; *Rhus thunbergii* (Thunb.) Hook.; *Roemeria argentea* (Thunb.) Thunb.; *Sideroxylon argenteum* Thunb.)

See *Species Plantarum* 1: 265–267. 1753, *Plantarum vascularium genera ...* [Meisner] 1: 75. 1837, *Genera Plantarum* 1425. 1841

(The gum exudate from the bark used as an ointment to draw boils and abscesses, has been reported to have caused severe dermatitis.)

in English: rock ash, rockwood, wild apricot

Heeria insignis (Delile) Kuntze (*Anaphrenium insigne* (Delile) Fiori; *Heeria insignis* Kuntze; *Ozoroa insignis* Delile; *Rhus insignis* (Delile) Oliv.)

Nigeria. Branched shrub or small tree, lax paniculate inflorescences and infructescences, small creamy flowers, glossy black fruits

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91, t. 1, f. 3. 1843, *Flora of Tropical Africa* 1: 437. 1868, *Revisio Generum Plantarum* 1: 152. 1891 and *Agricultura Coloniale* 5: 292. 1911

(Crushed leaves given as a vermifuge, astringent, stomachic.)

in Nigeria: kasheshe

Heimia Link Lythraceae

After the German physician Ernst Ludwig Heim, 1747–1834, a student of music, owner of an herbarium. See *Gen. Pl.* [Jussieu] 332. 1789, J.H.F. Link, *Enumeratio plantarum horti regii berolinensis*. 2: 3. 1822, *Icon. Pl. Select.* [Link et Otto] 63, t. 28. 1822, *Nov. Gen. Sp.* [H.B.K.] 6: 151 (ed. f.). 1823, *Dr. E.L. Heim's vermischte medicinische Schriften ... herausgegeben von A. Paetsch*. Leipzig 1836, *Der alte Heim. Leben und Wirken E.L. Heim's ... Aus hinterlassenen Briefen und Tagebüchern herausgegeben von G.W. Kessler*. Leipzig 1846, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 423. Ansbach 1852 and *Fieldiana, Bot.* 24(7/2): 240–260. 1962.

Heimia salicifolia Link (*Heimia salicifolia* Link & Otto; *Nesaea salicifolia* Kunth)

Mexico, Argentina.

See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 3. 1822, *Nova Genera et Species Plantarum* (quarto ed.) 6: 151, 191–192. 1824 and *Lloydia* 29: 275–292. 1966, *Phytochemistry* 14(8): 1883–1884. 1975, *Journal*

of *Ethnopharmacology* 15(2): 161–167. 1986, *Journal of Ethnopharmacology* 42(3): 135–159. 1994

(Aerial parts antisyphilitic, antiinflammatory and antispasmodic, sudorific, antipyretic, ataractic, psychoactive, laxative, diuretic, postpartum remedy, inhibitors of prostaglandin synthetase, to enhance wound healing. Roots and stem diuretic, vulnerary, purgative. A mildly intoxicating drink from the leaves, unpleasant effects, auditory hallucinations.)

in Argentina: quiebra arado

in Mexico: sinicuichi

Heinsia DC. Rubiaceae

The genus was named after the Dutch philologist Daniel Heinsius (pseud. Janus Philodusus), 1580–1655; see *Theophrasti Eresii graece et latine Opera omnia. Daniel Heinsius textum graecum locis infinitis partim ex ingenio partim e libris emendavit ... Lugduni Batavorum*. 1613, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 390. 1830.

Heinsia crinita (Afzel.) G. Taylor subsp. *crinita* (*Gardenia jasminiflora* (DC.) D. Dietr.; *Gardenia pulchella* G. Don; *Heinsia crinita* var. *scitula* N. Hallé; *Heinsia crinita* var. *splendida* N. Hallé; *Heinsia jasminiflora* DC.; *Heinsia pubescens* Klotzsch; *Heinsia pulchella* (G. Don) K. Schum.; *Heinsia pulchella* K. Schum.; *Heinsia splendida* A. Chev., nom. nud.)

W. Trop. Africa.

See *Abh. Königl. Akad. Wiss. Berlin* 1857: 228. 1857, *Nat. Pflanzenfam.* 4(4): 84. 1891 and *Etudes Fl. Afr. Centr. Franc.* 1: 149. 1913, *Catalogue of the Vascular Plants of Sao Tome* 209. 1944, *Fl. Gabon* 12: 135–136. 1966

in Congo: mukombo, munkombo

Heinsia crinita (Afzel.) G. Taylor subsp. *parviflora* (K. Schum. & K. Krause) Verdc. (*Gardenia pulchella* G. Don; *Heinsia crinita* auct., sensu Brenan (1949); Garcia (1958); Dale & Greenway (1961); Drummond (1975); non (Afzel.) G. Taylor sensu stricto, misapplied name; *Heinsia jasminiflora* DC., pro parte non sensu stricto; *Heinsia parviflora* K. Schum. & K. Krause; *Heinsia pulchella* (G. Don) K. Schum., pro parte non sensu stricto)

S. Somalia to Northern Prov.

See *Edinburgh Philosophical Journal* 11: 343. 1824, *Stirpium in Guinea medicinalium species novae, ...* 13, no. 5. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 390. 1830, *Die Natürlichen Pflanzenfamilien* (IV) 4: 84. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 530. 1907, *Catalogue of the Vascular Plants of Sao Tome* 209. 1944, *Kew Bulletin* 31: 184. 1976, *Flora of Tropical East Africa* 415–747. 1988

in E. Africa: wambola-ya-ndumbili

in South Africa: jasmine-flowered heinsia

in Yoruba: tonaposo

Heinsia myrmoecia (K. Schum.) N. Hallé (*Epitaberna myrmoecia* K. Schum.) (*Epitaberna* Schumann, from the Greek *epi* ‘upon’ and Latin *taberna, ae* ‘hut, stall, a passage’, possibly referring to some species myrmecophily.)

Cameroon, Gabon.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 316–317. 1903, Bequaert J. “Ants in their diverse relations to the plant world.” *Bulletin of the American Museum of Natural History* 45: 333–583. 1922, *Fl. Gabon* 12: 132. 1966, Schmidt, R.J. “The super-nettles: a dermatologist’s guide to ants in the plants.” *International Journal of Dermatology* 24(4): 204–210. 1985

(Pseudophytophthiriasis caused by the bites and stings of the ants inhabiting this plant, caulinary swellings inhabited almost invariably by an aggressive species of ant (*Tetraponera aethiops* F. Smith, fam. Formicidae, syn. *Pachysima aethiops* F. Smith) with an exceedingly painful sting.)

Heisteria N.J. Jacquin Olacaceae

For the German physician Lorenz (Laurentz) Heister, 1683–1758 (Bornum, near Königslutter), botanist, M.D. 1708 Harderwijk, field surgeon of the Dutch army, anatomist, attended the lectures of Caspar Commelijn and Hermann Boerhaave, since 1710 professor of anatomy and surgery at Altdorf, professor of medicine at Helmstädt, his works include *Institutiones chirurgicas* etc. Amsterdam 1739, *Compendium anatomicum*. [4to, first edn., a masterpiece of systematisation.] Altdorf 1717, *Chirurgie*. Nürnberg 1718, *Descriptio novi generis plantae rarissimae et speciosissimae africanae ex bulbosarum classe Brunsvigiae illustre nomen imposuit*. Brunsvigae [Brunswick, Braunschweig] 1753, *De Pipere*. Helmstaedii [Helmstädt] [1740], *Systema plantarum generale*. Helmstadii 1748 and *Meditationes et animadversiones in novum systema botanicum sexuale*. 1741. See Albrecht von Haller, editor, *Disputationes chirurgicae selectae*. Lausanne 1755–1756, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 4: 20. 1760, *Plantae Aequinoctiales* 2: 139, t. 125. 1813, *Florae Fluminensis* 1: 185. 1825, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1856: 236, t. 3. 1857, *Flora Brasiliensis* 12(2): 14, 29, t. 4, f. 1. 1872, *Bulletin de la Société Botanique de France* 44: 126. 1897, *Botanischer Jahresbericht* 25(2): 406. 1899 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Journal of Botany, British and Foreign* 59: 244. 1921, *Boletim Técnico do Instituto Agrônomo de Norte* 4: 5–6, f. 1. 1945, *Fieldiana, Bot.* 24(4): 88–92. 1946, Garrison and Morton, *Medical Bibliography*. 5576. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 152. 1965, T.W. Bossert, *Biographical*

dictionary of botanists represented in the Hunt Institute portrait collection. 170. 1972, *Fl. Neotrop.* 38: 43. 1984, *Fl. Veracruz* 93: 1–15. 1996.

Heisteria acuminata (Humb. & Bonpl.) Engler (*Heisteria acuminata* subsp. *acuminata*; *Heisteria burchelii* Hochr.; *Heisteria celsastrinea* Triana & Planch.; *Heisteria cyanocarpa* Poeppig; *Heisteria cyanocarpa* subsp. *occidentalis* Cuatrec.; *Heisteria cyathiformis* Little; *Heisteria ixiamensis* Rusby; *Heisteria longipes* Standl.; *Heisteria pallida* Engler; *Heisteria rhamnastylum* Triana & Planch.; *Rhamnastylum acuminatum* Humb. & Bonpl.)

Peru. Tree, u-shaped petiole, axillary fascicle, expanded flattened calyx, in primary forest

See *Enumeratio Systematica Plantarum* 4: 20. 1760, *Plantae Aequinoctiales* 2: 139, t. 125. 1809[1813], *Flora Brasiliensis* 12(2): 14, 16. 1872 and *Fl. Neotrop.* 38: 1–159. 1984, *Fl. Ecuador.* 69: 59–103. 2002

(Bark infusion vulnerary, aphrodisiac, antioxidant, antirheumatic and antihepatitis, tonic, febrifuge, analgesic, antiinflammatory, free radical scavenging.)

in Peru: chuchuhuasha, chuchuhuasi, cotama-masacey, cotoma, huarmi-chuchu-huasha, huarmi-huarmi, masacey, moena, naranjo caspi

Heisteria zimmereri Engl.

West Africa. Small tree or shrub, straight, spreading, foliage yellow-green, small greenish flowers, primary forest

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 288. 1899

(Pulmonary troubles, astringent, pain killer; leaves for convulsions, spasm, stomach troubles; root bark sap for eye treatments.)

in Congo: bandindi

in Ivory Coast: bali, kluadé

Helenium L. Asteraceae

Latin *helenium* for a plant; Theophrastus in his *HP.* 6.6.2 applied Greek *helenion* to the calamint or to the elecampane; see Carl Linnaeus, *Species Plantarum.* 2: 886. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754, *Genera Plantarum.* Ed. 5. 377. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 667–668. 1836 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 111. 1989.

Helenium amarum (Raf.) H. Rock (*Gaillardia amara* Raf.; *Helenium amarum* (Raf.) H. Rock var. *amarum*; *Helenium tenuifolium* Nutt.)

North America. Annual herb

See *Florula Ludoviciana*, or, a flora of the state of ... 69–70. 1817, *Journal of the Academy of Natural Sciences of*

Philadelphia 7(1): 66. 1834 and *Rhodora* 59(702): 131. 1957, *Amer. J. Bot.* 62: 1100–1103. 1975, *Amer. J. Bot.* 64: 791–798. 1977, *Kew Bull.* 37: 221–227. 1982

(Whole plant decoction for dropsy and swellings.)

in English: bitter sneezeweed, bitter-weed, bitterweed, fennel, slender-leaved sneezeweed, yellowdicks, yellow dog-fennel

Helenium autumnale L. (*Helenium autumnale* L. var. *autumnale*; *Helenium autumnale* var. *canaliculatum* (Lam.) Torr. & A. Gray; *Helenium autumnale* var. *fylesii* B. Boivin; *Helenium autumnale* var. *grandiflorum* Torr. & A. Gray; *Helenium autumnale* var. *montanum* (Nutt.) Fernald; *Helenium autumnale* var. *parviflorum* (Nutt.) Fernald; *Helenium canaliculatum* Lam.; *Helenium grandiflorum* Gilib.; *Helenium grandiflorum* Nutt., nom. illeg., non *Helenium grandiflorum* Gilib.; *Helenium latifolium* Mill.; *Helenium montanum* Nutt.; *Helenium parviflorum* Nutt.)

North America. Perennial herb

See *Species Plantarum* 2: 886. 1753, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, Nomenclator linnæanus. *Flora lithuanica inchoata*; seu, *Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert. Coloniae-Allobrogum, 1785–1787, Journal d’Histoire Naturelle* 2: 213, pl. 35. 1792, *Transactions of the American Philosophical Society*, new series, 7: 384. 1841, *A Flora of North America*: containing ... 2(2): 384. 1842 and *Rhodora* 45: 486, 491–492. 1943, *Le Naturaliste Canadien* 87: 35. 1960, Herz, W. “Sesquiterpene lactones from live-stock poisons.” Pages 487–497 in Keeler, R.F., Van Kampen, K.R., James, L.F., eds. *Effects of poisonous plants on live-stock.* Academic Press, New York. 1978, *Taxon* 29: 707–709. 1980, *New Zealand Journal of Botany* 20: 169–186. 1982

(This plant causes illness and occasional death in cattle and horses. The plant is well-named because it is highly irritating to the nose, eyes, and stomach. Helenalin, a sesquiterpene lactone, is the major toxin found in sneezeweed. Stem infusion febrifuge, pectoral. Dried powdered leaves used to induce sneezing.)

in English: common sneezeweed, sneezeweed

Helenium autumnale L. var. *autumnale* (*Helenium autumnale* L. var. *canaliculatum* (Lam.) Torr. & A. Gray; *Helenium autumnale* L. var. *parviflorum* (Nutt.) Fernald; *Helenium canaliculatum* Lam.; *Helenium latifolium* Mill.; *Helenium parviflorum* Nutt.)

North America. Perennial herb

See *Species Plantarum* 2: 886. 1753, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, Nomenclator linnæanus. *Flora lithuanica inchoata*; seu, *Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert. Coloniae-Allobrogum, 1785–1787, Journal d’Histoire Naturelle* 2: 213, pl. 35. 1792, *Transactions of the American Philosophical Society*, new series, 7: 384. 1841, *A Flora of North America*: containing ... 2(2): 384.

1842 and *Rhodora* 45: 486, 491–492. 1943, *Le Naturaliste Canadien* 87: 35. 1960, Herz, W. “Sesquiterpene lactones from livestock poisons.” Pages 487–497 in Keeler, R.F., Van Kampen, K.R., James, L.F., eds. *Effects of Poisonous Plants on Livestock*. Academic Press, New York. 1978, *Taxon* 29: 707–709. 1980, *New Zealand Journal of Botany* 20: 169–186. 1982

(This plant causes illness and occasional death in cattle and horses. Helenalin, a sesquiterpene lactone, is the major toxin found in sneezeweed. Dried powdered leaves used to induce sneezing.)

in English: common sneezeweed, sneezeweed

Helenium flexuosum Raf. (*Helenium nudiflorum* Nutt.)

North America.

See *Species Plantarum* 2: 886. 1753, *New Flora and Botany of North America* ... 4: 81. 1838, *Transactions of the American Philosophical Society*, new series, 7: 384–385. 1841

(This plant has caused poisoning in horses and sheep. It contains sesquiterpene lactones, flexuosin A and B closely related to the chemical helenalin.)

in English: naked-flowered sneezeweed

Helenium glaucum (Cav.) Stuntz (*Cephalophora glauca* Cav.; *Cephalophora plantaginea* DC.; *Cephalophora rigida* Phil.; *Helenium glaucum* Stuntz; *Helenium plantagineum* J.F. Macbr.)

South America.

See *Icones et Descriptiones Plantarum, quae aut sponte ... [Cavanilles]* 6(2): 79–80, t. 599. 1801, *Prodr.* (DC.) 5: 662. 1836, *Linnaea* 33: 170. 1864 and *Bull. Bur. Pl. Industr. U.S.D.A.* 31: 86. 1914, *Contributions from the Gray Herbarium of Harvard University* 56: 47. 1918, *Syst. Bot.* 3: 277–298. 1978

(Antiinflammatory.)

Helenium microcephalum DC. (*Helenium microcephalum* Kuntze; *Helenium microcephalum* M.A. Curtis ex A. Gray; *Helenium microcephalum* DC. var. *microcephalum*)

North America. Annual herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 667. 1836, *Syn. Fl. N. Amer.* 1(2): 348. 1884, *Revis. Gen. Pl.* 1: 343. 1891 and *Amer. J. Bot.* 62: 1100–1103. 1975

(Hypotensive, dried powdered leaves or flowers used to induce sneezing, for sinus congestion and respiratory troubles.)

in English: littlehead tarweed, smallhead sneezeweed, sneezeweed

Helenium puberulum DC. (*Helenium decurrens* (Less.) Vatke, non Moench)

North America. Annual or perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 667. 1836 and *Amer. J. Bot.* 62: 1100–1103. 1975, *Amer. J. Bot.* 75: 652–668. 1988

(For cold, skin and venereal diseases.)

Common name: rosilla

Helianthemum Miller Cistaceae

Greek *helios* ‘sun’ and *anthemon* ‘a flower’; see *Species Plantarum* 1: 90. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 267. 1824, *Annales des Sciences Naturelles; Botanique*, sér. 2, 6: 365, 370. 1836, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 425. 1852 and *Rhodora* 67(771): 255–312. 1965.

Helianthemum canadense (L.) Michaux (*Cistus canadensis* L.; *Crocantemum canadense* (L.) Britton; *Crocantemum majus* (L.) Britton; *Halimium canadense* (L.) Grosser; *Halimium majus* (L.) (Compositae).” *Contact Dermatitis* 20: 326–334. 1989, *Acta Agriculturae Universitatis Jilimensis* 11: 23–25. 1989, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Acta Agriculturae Universitatis Pekinensis* 16(3): 249–253. 1990, *Cytologia* 56: 559–566. 1991, M.R. Gilmore, *Uses of Plants by the Indians ...* 78. 1991, *Cytologia* 57: 277–281. 1992, *Biologia* 48: 441–445. 1993, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Plant Systematics and Evolution* 196: 227–241. 1995, *Compositae Newsletter* 27: 7–10. 1995, *Journal of August Ist Agricultural College* 18(3): 100–103. 1995, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998

(It causes allergic contact dermatitis in sensitive individuals after contact with the sesquiterpene lactones contained in fragile, multicellular, capitate glandular hairs on sunflower leaves. Cattle have been poisoned in Europe after ingesting plants that did not have mature seeds. This is a result of nitrate toxicity, which has caused sickness and death. The complete mixture of sesquiterpene lactones contributes to the allergic response in humans. Standard infusion added to the bathwater to alleviate arthritic pain and joint swellings. Flowers, along with those of five other plants, soaked in coconut milk drunk as a remedy for fever. Seeds diuretic, pectoral, expectorant, a remedy for pulmonary troubles, cough, colds and bronchitis. Ceremonial, worship. Many believed that growing the plant near a house would protect from malaria.)

in English: common sunflower, mirasol, sunflower, the sunflower of Peru, yellow-eyes, yellow flower, yellow weed

in North America: zha-zi (Omaha-Ponca), kirik-tara-kata (Pawnee)

in Spanish: anil

in South Africa: sonneblom

in Bali: bungan matanai (= sun)

in China: xiang ri kui zi, hsiang jih kwei, chao jih kwei

in India: aditya-bhakti-chettu, adityabhakta, adityabhaktichettu, arkakantha, guli-aftab, hurduja, kawanish, surajmukhi, suraja-mukhi, surajamukhi, surajmaki, surajmukh, surajmukhi, suriyakandi, surjamukhi, surya-mukhi, suryaphul, suryakamal, suryakanti

in Indonesia: bunga matahari (= sun)

in Japan: hi-mawari

in Lepcha: sa tsuk rip

in Hawaii: nanala, pua nanala

Helianthus anomalus S.F. Blake (*Helianthus deserticola* Heiser)

North America. Annual herb

See *Journal of the Washington Academy of Sciences* 21(14): 333. 1931, *Syst. Bot.* 11: 354–371. 1986

(For skin diseases, scabies, eczema.)

in English: western sunflower

Helianthus cusickii A. Gray

North America. Perennial herb or subshrub

See *Proceedings of the American Academy of Arts and Sciences* 21(2): 413. 1886

(Analgesic, carminative, disinfectant, febrifuge, roots used for heart troubles, tuberculosis, swellings, chills, fever. Magico-religious beliefs, roots burned to keep away disease.)

in English: Cusick's sunflower

Helianthus giganteus L. (*Helenium giganteus* subsp. *alienus* (E. Watson) Long; *Helianthus alienus* E.E. Watson; *Helianthus borealis* E.E. Watson; *Helianthus giganteus* L. subsp. *alienus* (E.E. Watson) R.W. Long; *Helianthus giganteus* L. var. *subtuberosus* Britton; *Helianthus nuttallii* Torr. & A. Gray var. *subtuberosus* (Britton) B. Boivin; *Helianthus subtuberosus* (Britton) Britton; *Helianthus validus* E.E. Watson)

North America. Perennial herb

See *Papers of the Michigan Academy of Science, Arts and Letters* 9: 406–407, 410–411, pl. 60, 62. 1929 and *Taxon* 30: 515–516. 1981

(Dried powdered leaves or flowers used to induce sneezing, for sinus congestion and respiratory troubles.)

in English: giant sunflower

Helianthus grosseserratus M. Martens (*Helianthus grosseserratus* M. Martens; *Helianthus grosse-serratus* Pohl ex Baker; *Helianthus grosseserratus* M. Martens subsp. *maximus* R.W. Long; *Helianthus grosseserratus* M. Martens var. *hypoleucus* A. Gray; *Helianthus instabilis* E.E. Watson)

North America. Perennial herb

See *Select. Seminum Hort. Lovani.* 4. 1839, *Bull. Acad. Sci. Bruxelles* 8(1): 67. 1841 and *Papers of the Michigan Academy of Science, Arts and Letters* 9: 423–424, pl. 65. 1929, *Rhodora* 56: 199. 1954, *Cytologia* 70: 267–273. 2005

(Blossoms made into a paste used for burns.)

in English: saw-tooth sunflower, sawtooth sunflower

Helianthus hirsutus Raf. (*Helianthus decapetalus* L.; *Helianthus eggertii* Small; *Helianthus hirsutus* var. *stenophyllus* Torr. & A. Gray; *Helianthus hirsutus* var. *trachyphyllus* Torr. & A. Gray; *Helianthus montanus* E. Watson; *Helianthus saxicola* Small; *Helianthus scrophulariifolius* Britton; *Helianthus stenophyllus* (Torr. & A. Gray) E. Watson; *Helianthus strumosus* L.; *Helianthus trachelifolius* Mill.; *Helianthus trachelifolius* Mill.)

North America. Perennial herb

See *Species Plantarum* 2: 905. 1753, *The Gardeners Dictionary*: ... eighth edition no. 7. 1768, *Annals of Nature* 1: 14. 1820, *A Flora of North America*: containing ... 2(2): 329. 1842 and *Flora of the Southeastern United States* 1267–1268, 1340. 1903, *Papers of the Michigan Academy of Science, Arts and Letters* 9: 396, 403. 1929, *Cytologia* 44: 325–334. 1979, *Bot. Žurn.* (Moscow & Leningrad) 73: 1358–1359. 1988, *Cytologia* 70: 267–273. 2005

(Poultice of macerated root applied to sores, ulcers.)

in English: forest sunflower, giant sunflower, hairy sunflower, pale-leaf sunflower, paleleaf woodland sunflower, rough-leaf sunflower, rough sunflower, stiff-haired sunflower, swollen sunflower, ten-petals sunflower, thin-leaf sunflower, woodland sunflower

Helianthus nuttallii Torr. & A. Gray (*Helianthus angustifolius* subsp. *nuttallii* (Torr. & A. Gray) Anashch.; *Helianthus fascicularis* Greene; *Helianthus nuttallii* Torr. & A. Gray subsp. *canadensis* R.W. Long)

Helianthus nuttallii Torr. & A. Gray subsp. *coloradensis* (Cockerell) R.W. Long; *Helianthus nuttallii* Torr. & A. Gray subsp. *nuttallii*)

North America. Perennial herb

See *A Flora of North America*: containing ... 2(2): 324–325. 1842 and *Bot. Zhurn.* (Moscow & Leningrad) 59(10): 1479. 1974, *Caryologia* 29: 377–385. 1976, *Bot. J. Linn. (Infusion of dried, crushed leaves taken for stomach troubles.)

in English: Nuttall's sunflower

Helianthus occidentalis Riddell (*Helianthus dowellianus* M.A. Curtis; *Helianthus occidentalis* Riddell subsp. *occidentalis*; *Helianthus occidentalis* Riddell var. *dowellianus* (M.A. Curtis) Torr. & A. Gray)

North America. Perennial herb

See *American Journal of Science, and Arts* 44(1): 82. 1843, *A Flora of North America*: containing ... 2(3): 504. 1843 and *Cytologia* 70: 267–273. 2005

(Crushed root made into a paste applied to bruises.)

in English: fewleaf sunflower, naked-stemmed sunflower, western sunflower

Helianthus petiolaris Nutt. (*Helianthus annuus* subsp. *petiolaris* (Nutt.) Anashch.; *Helianthus debilis* subsp. *praecox* (Engelm. & A. Gray) Heiser; *Helianthus integrifolius* Nutt.; *Helianthus integrifolius* var. *gracilis* Nutt.; *Helianthus patens* Lehm.; *Helianthus petiolaris* Nutt. subsp. *petiolaris*; *Helianthus petiolaris* var. *patens* (Lehm.) Rydb. ex Porter & Britton; *Helianthus praecox* Engelm. & A. Gray)

North America. Annual herb

See *Transactions of the American Philosophical Society*, new series, 7: 366. 1841, *Boston Journal of Natural History* 5(2): 221. 1845, *Memoirs of the Torrey Botanical Club* 5(22): 334. 1894 and *Madroño* 13(5): 160. 1956, *Botaničeskij Žurnal* (Moscow & Leningrad) 59: 1476. 1974, *Mendeliana* 4: 81–93. 1980, *Mendeliana* 7: 13–30. 1985

(Plant or leaves applied to spider and insect bite, on sores and swellings.)

in English: Kansas sunflower, petioled sunflower, prairie sunflower

Helianthus petiolaris Nutt. var. *canescens* A. Gray (*Helianthus canescens* (A. Gray) S. Watson; *Helianthus canus* (Britton) Wooton & Standl.; *Helianthus niveus* (Benth.) Brandege subsp. *canescens* (A. Gray) Heiser; *Helianthus*

petiolaris Nutt. var. *canescens* A. Gray; *Helianthus petiolaris* Nutt. var. *canus* Britton, nom. superfl.)

North America. Annual or perennial subshrub, herbaceous

See *Smithsonian Contributions to Knowledge* 3(5): 108. 1852, *Memoirs of the Torrey Botanical Club* 5(22): 334. 1894 and *Contributions from the United States National Herbarium* 16(4): 190. 1913, *Memoirs of the Torrey Botanical Club* 22(3): 43–44. 1969, *Syst. Bot.* 11: 354–371. 1986

(Stem juice applied to open bleeding wounds.)

in English: showy sunflower

Helianthus tuberosus Linnaeus (*Helianthus esculentus* Rottb.; *Helianthus esculentus* Warsz.; *Helianthus subcanescens* E. Watson; *Helianthus subcanescens* (A. Gray) E. Watson; *Helianthus tomentosus* Michaux; *Helianthus tuberosus* Parry; *Helianthus tuberosus* var. *subcanescens* A. Gray)

North America. Perennial herbaceous, stout, variable, branching, lanceolate rough thick leaves, opposite lower leaves, alternate upper leaves, rough stems bearing large yellow flower heads, food plant, root tuber eaten as vegetable

See *Sp. Pl.* 2: 905. 1753, *Acta Lit. Univ. Hafn.* 1: 298. 1778, *Flora Boreali-Americana* (Michaux) 2: 141. 1803, *Allgemeine Gartenzeitung* (Otto & Dietrich) 20: 293. 1852, Gray, Asa (1810–1888), *Synoptical Flora of North America*. 1, pt. 2: 280. (Tubers stimulant, useful to diabetic patients.)

in English: Canadian potato, earth-apple, girasole, Jerusalem artichoke, sun-choke, topinambour, woodland sunflower

in India: alu, hastipijoo, hathichuk, safed alu, vajrangi

in Japan: kiku-imo

in North America: kisu-sit (Pawnee)

Helicanthes Danser Loranthaceae

Possibly from the Greek *helix* ‘anything spirally twisted’ and *anthos* ‘flower’, see *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 29(6): 55. 1933.

Helicanthes elasticus (Desvaux) Danser (*Loranthus elasticus* Desr.)

India.

See *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 29(6): 55. 1933, *Cytologia* 52: 761–766. 1987, *Aspects Pl. Sci.* 9: 199–244. 1987, *Cytologia* 58: 21–26. 1993

(Veterinary medicine, leaves given orally to cure foot and mouth disease and anorexia.)

in India: pulluri

Helichrysum Miller Asteraceae

Latin *helichrysos* and *helichrysum* for the herb marigold, Greek *helisso*, *helissein* ‘to wind, to turn round’ and *chrysos* ‘gold, golden’, some suggested from *helios* ‘sun’; see *Species Plantarum* 2: 850–857. 1753, Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London 1754, *Observ. Compos.* 125. 1817, *Memoirs of the Wernerian Natural History Society* 5: 546. 1826, *Synopsis Generum Compositarum* 332. 1832, *Flora Australiensis: a description ...* 3: 625–626. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 219. 1838, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 317, 425. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 112. 1989, Paul G. Wilson, “A revision of the genus *Hyalosperma* (Asteraceae: Inuleae: Gnaphaliinae).” *Nuytsia*. 7(1): 75–101. 1989, *Taxon* 44: 611–612. 1995, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 282. 1996.

Helichrysum appendiculatum (L.f.) Less. (*Gnaphalium appendiculatum* L.f.; *Helichrysum appendiculatum* Less.)

South Africa. Perennial herb, woody rootstock, upper leaves woolly

See *Synopsis Generum Compositarum* 308. 1832

(Leaves eaten as a remedy for chest troubles, smallpox and intestinal parasites. Oils antiinflammatory.)

in English: everlastings, sheep’s ears

in South Africa: ibode, senkotoana, sewejaartjies, skaapoorbossie

Helichrysum aureonitens Sch. Bip. (*Helichrysum auronitens* Sch.Bip.; *Helichrysum helodes* Hiern)

South Africa. Perennial, slender, erect, silvery-white leaves, golden flowers

See *Flora* 27(2): 680. 1844 and *South African Journal of Botany* 63: 22. 1997, Pooley, E. *A Field Guide to Flowers of Kwazulu-Natal and the Eastern Region*. Natal Flora Publications Trust, Durban. 1998

(Antiseptic, a remedy for bed-wetting in children. Magic, ritual, ceremonial.)

in English: golden everlasting

in South Africa: goue sewejaartjie, impepho-emphlope, indondokozane, inkondlwane, toane-ntja, toane-poli

Helichrysum caespitium (DC.) Harv. (*Helichrysum caespitium* Sond. ex Harv. & Sond.; *Helichrysum lineare* DC. var. *caespitium* DC.)

South Africa. Perennial herb, silver-grey, mat-forming, very small leaves, small light pink flowers

See *Prodr.* (DC.) 6: 172. 1838, *Flora Capensis* (Harvey) 3: 217. 1865

(For chest pain and troubles, impotency.)

Helichrysum cooperi Harv.

South Africa. Herb, aromatic, fast growing, simple oblong sticky hairy leaves

See *Flora Capensis* (Harvey) 3: 231. 1865

(A love charm.)

in English: yellow everlasting

in South Africa: bohloko, geelsewejaartjie, phefo-ae-thaba, toane-balimo, toane-balingoana, umadotsheni

Helichrysum foetidum (L.) Moench (*Gnaphalium foetidum* L.; *Helichrysum foetidum* Moench)

South Africa. Herb, robust, fast growing, strong smelling, hairy leaves, confused with *Helichrysum decorum* and *Helichrysum cooperi*

See *Species Plantarum* 2: 851. 1753, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* (Moench) 575. 1794 and Watt, J.M. & Breyer-Brandwijk, M.G. *The Medicinal and Poisonous Plants of Southern and Eastern Africa*. Livingstone, Edinburgh and London. 1962, *Bot. Not.* 130: 1–24. 1977, *Anales Jard. Bot. Madrid* 43: 412–416. 1987, *Opera Bot.* 121: 159–172. 1993

(Leaves for sores and wounds, influenza, and menstrual disorders and pains. Roots used for eye complaints. Ceremonial, ritual, together with *Helichrysum decorum* and *Helichrysum stenopterum*, *Helichrysum foetidum* is inhaled by traditional healers to induce a trance.)

in English: everlasting, fetid everlasting, stinking everlasting

in Portuguese: traqueiro

in South Africa: muishondblaar

Helichrysum formosissimum Sch.Bip. (*Helichrysum argyrocotyle* S. Moore; *Helichrysum cruentum* S. Moore; *Helichrysum formosissimum* var. *guilelmii* (Engl.) Mesfin; *Helichrysum formosissimum* Sch.Bip. var. *volkensisii* (O. Hoffm.) Hedberg; *Helichrysum lychnophorum* Mattf.; *Helichrysum volkensisii* O. Hoffm.)

East Africa.

See *Botanische Zeitung. Berlin* 3: 173. 1845, *Pflanzenw. Ost-Afrikas* C (1895) 410. 1895 and *J. Linn. Soc., Bot.* xxxviii. 260. 1908, *J. Bot.* 54: 255. 1916, *Bot. Jahrb. Syst.* 59(4,

Beibl. 133): 15. 1924, *Bot. Not.* 130: 1–24. 1977, *Compositae Newsletter* 22: 14. 1992

(Dry powdered leaves on wounds, sores and ulcers.)

Helichrysum forskahlii (J.F. Gmel.) Hilliard & B.L. Burt (*Gnaphalium chrysocephalum* Sch.Bip.; *Gnaphalium chrysocephalum* Franch.; *Gnaphalium chrysocephalum* Gand.; *Gnaphalium forskahlii* J.F. Wright, nom. illeg.; *Helichrysum plantaginifolium* O. Hoffm.; *Helichrysum quinquenerve* Less.; *Helichrysum quinquenerve* (Thunb.) Less.; *Helichrysum ruwenzoriense* S. Moore; *Helichrysum velatum* Moeser; *Helichrysum velatum* Moeser var. *longifolium* De Wild.; *Lepiscline nudifolia* (L.) Cass.; *Lepiscline nudifolia* Cass.)

East Africa, Malawi, Tanzania. Herbaceous plant, woody roots, yellow flowers

See *Plantae Rariores Africanae* 19. 1753, *De Fructibus et Seminibus Plantarum*... 2: 407. 1791, *Dictionnaire des Sciences Naturelles* ed. 2. [F. Cuvier] 26: 49. 1823, *Synopsis Generum Compositarum* 299–300. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 200. 1838, *Revis. Gen. Pl.* 3[3]: 153. 1898 and *Bull. Misc. Inform. Kew* 1901: 123 (-124). 1901, *J. Linn. Soc., Bot.* 35: 338. 1902 [1901–1904 publ. 1902], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 264, 266. 1910, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 52: 95–100. 1996, *Kew Bulletin* 55(2): 357. 2000

(For painful delivery, abdominal pains, urogenital infection, headache, chest ailments, tuberculosis, pneumonia, intercostal pain, nightmare, rachialgia. Fresh leaves or roots for diabetes. Veterinary medicine, tonic, anthelmintic, crushed roots of *Gunnera perpensa* mixed with *Helichrysum nudifolium* against intestinal worms.)

in English: Hottentot's tea

in South Africa: Hottentotstee, ichocholo, icholocholo, impepho, isidwaba-somkhovu, letapiso, ludvutfane, mohlomelatsie-oa-thaba, umagada-emthini

Helichrysum nudifolium (L.) Less. var. *pilosellum* (L.f.) Beentje (*Gnaphalium pilosellum* L.f.; *Helichrysum pilosellum* Less.; *Helichrysum pilosellum* (L.f.) Less.)

South Africa. Perennial herb, woody stem, woody rootstock, fluffy seeds

See *Supplementum Plantarum* 364. 1782 [1781 publ. Apr 1782], *Synopsis Generum Compositarum* 297. 1832 and *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 52: 95–100. 1996, *Kew Bulletin* 55(2): 359. 2000

(An infusion for childbirth problems, infertility and as a colic remedy.)

in English: hairy everlasting

in South Africa: boleba-ba-liliba, bolebo, isicwe, leboko, papetloane-e-kholo, papetloane-ea-liliba, tsebe-litelele, umadotsheni, umaphephesa

Helichrysum obconicum DC.

Europe, Madera.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 181. 1838

(Shoots and leaves infusion digestive, stomachic, for intestinal disorders.)

Helichrysum odoratissimum (L.) Sweet (*Gnaphalium odoratissimum* L.; *Helichrysum butagense* De Wild.; *Helichrysum engleri* O. Hoffm.; *Helichrysum odoratissimum* (L.) Less.; *Helichrysum rosmarinum* Mattf.; *Helichrysum roulingii* De Wild.)

East Africa, Malawi, Tanzania. Herb, small shrub, strong peppermint smell, yellowish flowers, fodder

See *Species Plantarum* 855. 1753, *Hortus Britannicus* 223. 1826, *Synopsis Generum Compositarum* 301. 1832 and *Bot. Not.* 130: 1–24. 1977, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 108: 332–339. 2006

(Plant as insect and parasites repellent. For painful delivery, abdominal pains, helminthiasis, urogenital infection, headache, heart ailments, cough, colds, influenza, chest ailments, tuberculosis, pneumonia, catarrh, intercostal pain, nervous disorders, nightmare, rachialgia. Fresh leaves or roots for diabetes. For rheumatic and arthritic joints *Senecio asperulus* mixed with *Helichrysum odoratissimum* and *Mentha longifolia*. Veterinary medicine, anaplasmosis. Ceremonial, ritual, leaves and stems used as incense to invoke the goodwill of the ancestors.)

in English: everlasting

in Burundi: agapfindopfindo, sanganingoyi

in Kenya: mataa, mûtaa, sulubei, taa

in Lesotho: phefo

in South Africa: hotnotskooigoed, hotnotskruie, imphepho, kooigoed

Helichrysum petiolare Hilliard & B.L. Burt (*Helichrysum petiolatum* D. Don)

South Africa. Soft shrub, aromatic foliage, creamy-white flowers

See *Memoirs of the Wernerian Natural History Society* 5: 550. 1824 and *Notes from the Royal Botanic Garden, Edinburgh* 32(3): 357–358. 1973

(Leaves infusion for coughs, colds, wounds and infections, asthma, chest problems and high blood pressure; the smoke of the burning leaves is inhaled as a pain reliever.)

in English: liquorice plant

in South Africa: everlasting, imphepho, kooigoed

Helichrysum platypterum DC. (*Cassinia alba* O. Hoffm.; *Gnaphalium amplum* Kuntze; *Gnaphalium amplum* (O. Hoffm.) Kuntze)

South Africa. Perennial herb, woody tuber, white to creamy yellow sweetly scented flowers

See *Prodr.* (DC.) 6: 201. 1838, *Revis. Gen. Pl.* 3[3]: 150. 1898

(Magic, ritual, woody tuber of *Helichrysum platypterum* mixed with the roots of *Pentanisia prunelloides* used as protection against evil.)

in South Africa: mbizakayivuthwa, uhlokokayivuthwa, umbizakayivuthwa, umgunyuza

Helichrysum schimperi (Sch.Bip. ex A. Rich.) Moeser (*Achyrocline adoensis* Sch.Bip. ex A. Rich.; *Achyrocline schimperi* Sch.Bip. ex A. Rich.; *Gnaphalium schimperi* Sch. Bip. ex Oliv.; *Gnaphalium schimperi* (Sch.Bip. ex A. Rich.) Sch. Bip.; *Gnaphalium schimperi* (Sch.Bip. ex A. Rich.) Sch. Bip. var. *stramineum* Sch.Bip.; *Helichrysum galbanum* S. Moore; *Helichrysum nyasicum* Baker; *Helichrysum ovato-ellipticum* De Wild.; *Helichrysum sarmentosum* O. Hoffm.; *Helichrysum schimperi* Moeser; *Helichrysum schimperi* (Sch. Bip. ex A. Rich.) Moeser var. *stramineum* (Sch.Bip.) Chiov.)

East Africa, Tanzania.

See *Tentamen Florae Abyssinicae* ... 1: 428. 1848, *Fl. Trop. Afr.* [Oliver et al.] 3: 341. 1877, *Pflanzenw. Ost-Afrikas C* (1895) 411. 1895, *Bull. Misc. Inform. Kew* 1898, 150. 1898 and *J. Linn. Soc., Bot.* 37: 169. 1905 [1904–1906 publ. 1905], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 244. 1910, *Pl. Bequaert.* v. 64. 1929, *Journal of Ethnopharmacology* 45: 27–33. 1995

(For painful delivery, abdominal pains, helminthiasis, intestinal parasites, urogenital infection, headache, heart ailments, cough, influenza, chest ailments, tuberculosis, pneumonia, intercostal pain, sores, wounds, itch, piles. Fresh leaves or roots for diabetes. Veterinary medicine, leaves stomachic, for East Coast fever. Magic, ritual, against bad spirits.)

in Burundi: manayeze

in Congo: manayezi

in Tanzania: ikowe, isurwa, luyafuno

Helichrysum splendidum (Thunb.) Less. (*Gnaphalium splendidum* Thunb.; *Helichrysum splendidum* Less.; *Helichrysum strictum* Druce; *Helichrysum strictum* Moench)

South Africa. Shrub, fast growing, woolly stems, aromatic leaves, golden sweet scented flowers

See *Methodus* (Moench) 576. 1794, *Prodr. Pl. Cap.* 149. 1800, *Synopsis Generum Compositarum* 286. 1832 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 626. 1917

(Wound-healing and antifungal, used to treat rheumatism. Ceremonial, ritual, together with *Helichrysum decorum* and *Helichrysum foetidum*, *Helichrysum stenopterum* is inhaled by traditional healers to induce a trance.)

in English: Cape Gold

in South Africa: geelsewejaartjie, phefo-ea-loti, sewejaartjie, strooibloem, toanae-moru

Helichrysum umbraculigerum Less. (*Helichrysum coactum* M.D. Henderson)

South Africa. Erect perennial herb, fast growing, leaf shape extremely variable, golden yellow flowers

See *Synopsis Generum Compositarum* 284. 1832 and *Bothalia* 6: 421. 1954

(Wound-healing and antifungal.)

in English: everlasting, woolly umbrella helichrysum

in South Africa: kerrikruid

Helicia Lour. Proteaceae

Greek *helix* ‘anything spirally twisted’, *helisso*, *helissein* ‘to wind, to turn round’, referring to the petals or to the perianth segments; see J. de Loureiro, *Flora cochinchinensis*. 1: 83. 1790.

Helicia excelsa Blume

India.

See *Annales des Sciences Naturelles, Botanique* II, 1: 219. 1834

(Bark decoction taken for colic, stomachache and menstrual disorders.)

in India: s-ialhma, sialhma, siathma

Helicia nilagirica Bedd. (*Helicia cornifolia* W.T. Wang; *Helicia erratica* Hook. f.; *Helicia erratica* var. *sinica* W.T. Wang; *Helicia nilagirica* Sleumer; *Helicia stricta* Diels)

India. Tree, edible fruit

See *Madras Journal of Literature and Science*, ser. 3 1: 56, pl. 11. 1864, *The Flora of British India* 5(13): 189–190. 1886 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(378–380): 527–528. 1915, *Blumea* 8(1): 69. 1955, *Acta Phytotaxonomica Sinica* 5(4): 295–297, pl. 57, f. 3. 1956

(Tonic, stimulant, stomachic.)

in China: shen lü shan long yan

in India: bandre, zheyong kung

Helicia robusta R. Br. ex Blume

India.

See *Annales des Sciences Naturelles, Botanique* II, 1: 220. 1834

(Bark decoction taken for stomachache.)

in India: sialhma

Heliciopsis Sleumer Proteaceae

Resembling the related genus *Helicia*, see *Fl. Cochinch.* 1: 83. 1790 and *Blumea* 8: 79–80. 1955.

Heliciopsis artocarpoides (Elmer) Sleumer (*Helicia artocarpoides* Elmer)

Indonesia. Tree

See *Leaflet Philipp. Bot.* v. 1826. 1913, *Blumea* 8: 83. 1955

(Leaves juice applied as eye drops in conjunctivitis, and as an ointment to relieve the itch of insect bites; pounded young leaves made into a paste applied for leprosy. Ritual, magic, small pieces of wood slipped into a child’s carrier.)

in English: taboo tree

in Indonesia: kayu tengat

Malay name: patak

Heliciopsis terminalis (Kurz) Sleumer (*Helicia terminalis* Kurz; *Heliciopsis lobata* (Merrill) Sleumer var. *microcarpa* C.Y. Wu & T.Z. Hsu)

China, SE Asia. Small tree, glabrous branches, glabrous oblanceolate leaves

See *Forest Fl. Burma* 2: 312. 1877 and *Blumea* 8: 80. 1955, Kiu hua-shing. *Proteaceae*. In: Kiu Hua-shing & Ling Yeourenn, eds., *Fl. Reipubl. Popularis Sin.* 24: 6–29. 1988

(Tonic, stimulant.)

in China: zha sai shu

Helicteres L. Malvaceae (Sterculiaceae)

From the Greek *heliktos* ‘twisted, a spiral, rolled’, *helisso* ‘to wind, to turn round’, referring to the twisted fruits or carpels of some species; see Carl Linnaeus, *Species Plantarum*. 2: 963–964. 1753, *Genera Plantarum*. Ed. 5. 411. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition* 700. 1754, *Mantissa Plantarum* 2: 294. 1771, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 475–476. 1824, *Plantes Usuelles des Brasiliens* 13: 2–5, pl. 64. 1828, *Meletemata Botanica* 31. 1832, *Reliquiae Haenkeanae* 2(2): 138–140. 1835, *Genera Plantarum* 1(13): 992–993. 1840, *Die Natürlichen Pflanzenfamilien* 3(6): 90. 94. 1890 and *Contributions from the United States National Herbarium* 23(3): 798. 1923, *Bonplandia* (Corrientes) 6(1): 74–80, f.

1–2. 1987, *Bonplandia* (Corrientes) 11: 26, 29, 31–32, 34–35, 173–174. 2001.

Helicteres angustifolia L. (*Helicteres angustifolia* var. *acuminatissima* Kuntze; *Helicteres angustifolia* var. *gaudichaudii* Kuntze; *Helicteres angustifolia* var. *meyeniana* Kuntze; *Helicteres angustifolia* var. *naumanniana* Kuntze; *Helicteres angustifolia* var. *virgata* Kuntze; *Helicteres salicifolia* C. Presl; *Helicteres virgata* G. Don; *Oudemansia integerrima* Miq.; *Oudemansia integerrima* var. *angustifolia* Hassk. ex Mast.; *Oudemansia javensis* var. *angustifolia* (L.) Hassk.; *Oudemansia virgata* Hassk.)

Indonesia.

See *Species Plantarum* 2: 963–964. 1753, *Retzia*, sive, *Observationes botanicae*, quas de plantis horti botanici Bogoriensis 1: 134. 1855 and *Bonplandia* (Corrientes). 11: 1–206. 2001

(Roots and leaves demulcent, astringent.)

in English: screw-tree

in China: shan zhi ma

in Japan: yanbaru-goma

Helicteres angustifolia L. var. *obtusata* (Wall. ex Kurz) Pierre (*Helicteres obtusata* Wall. ex Kurz)

India. Erect shrubs, white flowers in axils, ovoid fruit stellately pubescent

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 62. 1873, *Flore Forestière de la Cochinchine* 13: t. 211, f. 14–25. 1889

(Bark astringent, for dysentery and diarrhea.)

Helicteres isora L. (*Anisora angulata* Raf.; *Anisora murri* Raf.; *Helicteres baruensis* Jacq. var. *ovata* DC.; *Helicteres chrysocalyx* Miq. ex Mast.; *Helicteres corylifolia* Buch.-Ham. ex Dillwyn; *Helicteres grewiaefolia* DC.; *Helicteres grewiifolia* Wall.; *Helicteres grewiifolia* DC.; *Helicteres isora* var. *glabrescens* Mast.; *Helicteres isora* var. *microphylla* Hassk.; *Helicteres isora* var. *tomentosa* Mast.; *Helicteres macrophylla* Wight ex Wight & Arnold; *Helicteres ovata* var. *fructus-regis* Lam.; *Helicteres ovata* var. *isora-murri* Lam.; *Helicteres roxburghii* G. Don; *Helicteres versicolor* Hassk.; *Isora corylifolia* Schott & Endl.; *Isora grewiaefolia* (DC.) Schott & Endl.; *Isora grewiifolia* Schott & Endl.; *Isora versicolor* Hassk.) (from the Malabar plant name *isora-murri*)

India. Erect shrub, young parts densely stellate-tomentose, orange-red flowers in extra axillary cymes, spirally twisted tomentose follicles, wrinkled angular seeds

See *Hort. Malab.* 6: pl. 33. 1686, *Species Plantarum* 2: 963. 1753, *Enumeratio Systematica Plantarum* 30. 1760, *Fam. Pl.* (Adanson) 2: 382. 1763, *Encycl.* (Lamarck) 3(1): 88. 1789, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 476–477. 1824, *Numer. List* [Wallich] n. 1443. 1829, *Melet.* 31. 1832, *Prodr. Fl. Ind. Orient.* 1: 60. 1834 and *J. Arnold Arbor.*

54(4): 454. 1973, *Regnum Veg.* 127: 52. 1993, *Ethnobotany* 16: 139–140. 2004

(Used in Ayurveda and Sidha. Stem bark in diarrhea and dysentery; bark and fruits antigalactagogue, soothing, demulcent, expectorant, useful in respiratory troubles, dysentery, diarrhea, diabetes, stomachache, scabies. Paste made of stem bark of *Grewia tiliaefolia* and *Helicteres isora* together with tuber of *Amorphophallus paeoniifolius* applied for bone-setting. Roots in cough and asthma; root paste warmed and applied on boils; a mixture of water extract of roots of *Celastrus paniculatus*, *Helicteres isora*, *Imperata cylindrica* and *Rhynchosia minima* given as an antidote for snake poison; root extract of *Woodfordia fruticosa* along with extract of *Helicteres isora* given as antidote in snakebite; fruits or roots of *Helicteres isora*, seeds of *Pongamia glabra* and stem bark of *Tinospora cordifolia* mixed and crushed into powder eaten to cure diabetes. Seed decoction or the aqueous extract of the seeds used in dysentery and stomach pains; for snakebite, drink seed infusion. Paste of dried leaves, pepper and coconut oil used in the treatment of skin ailments including eczema. Fruits aphrodisiac, astringent, stomachic, postpartum remedy, used to relieve stomach disorders and dysentery, dried fruits soaked in water and eaten; fruits soaked in boiling oil, this oil applied externally in stomach complaints of children; fruit powder in diarrhea and dysentery. Magico-religious beliefs, twigs placed on the door of the hut of a pregnant woman to relieve the labor pains; tribal, hang a dry fruit in black thread on neck of children against pain, a fruit hung around the neck of a patient as a postpartum remedy. Ceremonial, ritual, dried fruit in marriage ceremony; contact therapy, magic, fresh fruits made into garland and tied as necklace for scabies; fruits tied to the waist of children to cure muscular pain, fever and swelling. Veterinary medicine, roots along with leaves of *Phyllanthus reticulatus* pounded and the extract given orally in insect bite; fruits of *Gardenia latifolia* along with leaves of *Jasminum auriculatum*, stem bark of *Helicteres isora* pounded and the extract given orally for tympany; roots along with those of *Coccinia grandis* and leaves of *Jasminum auriculatum* pounded and the extract given orally for tympany.)

in English: East Indian screw-tree, Indian screw-tree, nut-leaved screw-tree, red isora, spiral bush

in China: huo suo ma

in India: aat hateri, aedamuri, aedamuri kaayi, ainthi, aithan, alti, altwaallatu, anteri, antia, antmachra, atai, ati, atmora, atmura, avaratani, avartani, avartaphala, avartiphala, avarttani, avatarini, avurtunnie, awartaki, awartani, bendu, bhendu, bhoota-karalu, chachalu, chuchula, cuculu, cunculla, dhamini, edamuri balamuri, gubadarra, gubba-thada, isora-murri, javiri, jonka-phal, kaiva, kapasi, kappali, kauri, kayyuna, keheli, kevana, kevani, kewan, kish-tur-kish-t, kish-tur-kish-t, kish-tur-kish-t, kivantani, kurkure, machra, maedasingi, maradsing, maraphali, mardasing, mardasingi, marodamphali, marodphali, marorphal, marophali, maror phal, maror phalli, marori, marorphali, marorshali,

Malay names: chabei tali, chabei thali

Helicteres plebeja Kurz (*Corchorus cavaleriei* H. Lév.; *Helicteres cavaleriei* (H. Lév.) H. Lév.; *Helicteres glabriuscula* Wall. ex Mast.; *Helicteres spinulosa* Wall. ex Mast., nom. inval.)

India.

See *Species Plantarum* 1: 529–530. 1753, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 39(2): 67. 1870, *The Flora of British India* 1(2): 366. 1874 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(260–262): 437. 1912

(Bitter roots chewed for pain.)

in China: ai shan zhi ma

Helinus E. Meyer ex Endl. Rhamnaceae

From the Greek *helinos* ‘a tendril’, see *Genera Plantarum* 376–377. 1789, *Genera Plantarum* [Endlicher] 1102. 1840, *Flora Capensis* 1: 479. 1860.

Helinus integrifolius (Lam.) Kuntze (*Gouania integrifolia* Lam.; *Helinus brevipes* Radlk.; *Helinus integrifolius* Kuntze; *Helinus ovatus* E. Mey.; *Helinus ovatus* E. Mey. ex Sond., nom. illeg. superfl.; *Helinus scandens* Radlk. ex Weberbauer; *Helinus scandens* A. Rich.; *Helinus scandens* (Eckl. & Zeyh.) A. Rich.; *Rhamnus mystacinus* Aiton; *Willemetia scandens* Eckl. & Zeyh.)

East Africa. Shrub, climbing, spreading, delicate, weak, woody, sprawling, scrambling, pale brown, thick leaves pale green, coiled tendrils present, flowers pale yellow, fruits obovoid pale green, in roadside grassland, forest edge, woodland

See *Species Plantarum* 1: 193–195. 1753, *Encyclopédie Méthodique, Botanique* 3: 5. 1789, *Hortus Kewensis*; or, a catalogue ... 1: 266. 1789, *Journal für die Botanik* 1800 (1): 329. 1801, *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 1: 130. [Dec 1834–Mar 1835], *Genera Plantarum* 1102. 1840, *Zwei Pflanzengeogr. Docum.* (Drège) 190. 1843–1844, *Tentamen Florae Abyssinicae* ... 1: 139. 1847, *Flora Capensis* 1: 479. 1860, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 8: 385. 1883, *Revisio Generum Plantarum* 1: 120. 1891, *Nat. Pflanzenfam.* [Engler & Prantl] iii. v. 426. 1896

(Roots used in hysteria.)

in South Africa: uBhubhubhu (Zulu)

Helinus lanceolatus (Wall.) Brandis (*Gouania lanceolata* Wall.; *Helinus lanceolatus* Brand.)

India, Himalaya.

See *A Numerical List of Dried Specimens* n. 4273. 1831, *The forest flora of North-West and Central India* 574. 1874 and *Fasc. Fl. India*, 20: 44. 1990

(Eating the root bark makes the sweet buds of tongue inert; the taste buds for sweet are classically placed on the tip of the tongue, the tongue map was essentially a century-old misunderstanding that no one challenged, and the notion that the tongue is mapped into four areas—sweet, sour, salty and bitter—is wrong.)

in India: gur-mar-buti

Helinus mystacinus (Aiton) E. Mey. ex Steud. (*Helinus mystacinus* E. Mey. ex Steud.; *Rhamnus mystacinus* Aiton) (from the Greek *mystax*, *mystakos* ‘moustache’)

East Africa. Shrub, scandent, climbing vine, scrambling, leaning, soft-wooded, woody-based, stem branching horizontally, old stem red to purple, perianth yellow-white-green, fruit green becoming purple, at edge of thicket, in open forest, in *Acacia* woodland, on mountain slope in forest

See *Species Plantarum* 1: 193–195. 1753, *Hortus Kewensis*; or, a catalogue ... 1: 266. 1789, *Nomenclator Botanicus* [Steudel] ed. 2 1: 742. 1840

(Used to treat back pain and back problems.)

in Tanzania: magombole, olesapeni, olesupen, olesupeni, olomitu

Heliophila Burm.f. ex L. Brassicaceae (Cruciferae)

From the Greek *helios* ‘the sun’ and *philos* ‘lover, loving’; see C. Linnaeus, *Species Plantarum*. 2: 926. 1763, *Genera Plantarum*. Ed. 6. 340. 1764, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 426. Ansbach 1852.

Heliophila suavissima Burch. ex DC. (*Heliophila basutica* Phillips; *Heliophila fascicularis* DC.; *Heliophila fascicularis* Banks ex DC.; *Heliophila fascicularis* Eckl. & Zeyh.; *Heliophila suavissima* Drege ex Sond.)

Tropical Africa, South Africa.

See *Syst. Nat.* [Candolle] 2: 691. 1821, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 12. [Dec 1834–Mar 1835], *Abh. Geb. Naturw. Hamb.* i. (1846) 251. 1846 and *Ann. S. African Mus.* xvi. 38. 1917

(Leaves tonic. Ritual, magic, divination, the leaves.)

Heliopsis Pers. Asteraceae

From the Greek *helios* ‘the sun’ and *opsis* ‘like’, resembling *Helianthus*, referring to the flowers, see *Syn. Pl.* (Persoon) 2: 473. 1807, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 24: 326, 327, 333. 1822, *Prodr.* (DC.) 5: 550–551. 1836, *Trans. Amer. Philos. Soc.* ser. 2. 7: 349. 1840.

Heliopsis longipes (A. Gray) S.F. Blake (*Heliopsis longipes* S.F. Blake; *Philactis longipes* A. Gray)

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 15: 35. 1880 and *Contributions from the United States National Herbarium* 22(8): 608–609. 1924

(Roots insecticidal, toxic to codling moth larvae and house flies.)

Heliotropium L. Boraginaceae

Latin *heliotropium* and Greek *heliotropion* for the plant turnsole, heliotrope, Greek *helios* ‘the sun’ and *trepo*, *trepein*, *trope* ‘a turning’; see Carl Linnaeus, *Species Plantarum* 1: 130–131. 1753, *Genera Plantarum* Ed. 5. 63. 1754, M.A. Marchi, *Dizionario tecnico-etimologico-filologico*. Milano 1828–1829, *A General History of the Dichlamydeous Plants* 4: 308, 364. 1837 and E. Weekley, *An Etymological Dictionary of Modern English*. 1: 640. Dover Publications, New York 1967, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988.

Heliotropium angiospermum Murray (*Heliophytum parviflorum* (L.) DC.; *Heliophytum portoricense* Bello; *Heliotropium foetidum* Salzmann ex DC.; *Heliotropium humile* Lam.; *Heliotropium latifolium* Willd. ex Lehm.; *Heliotropium oblongifolium* M. Martens & Galeotti; *Heliotropium parviflorum* L.; *Heliotropium patibilcense* Kunth; *Heliotropium rugosum* M. Martens & Galeotti; *Heliotropium scorpioides* Kunth; *Heliotropium simplex* Meyen; *Heliotropium synzistachyum* Ruiz & Pav.; *Schobera angiosperma* (Murray) Scop.; *Schobera angiosperma* (Murray) Britton; *Synzistachium peruvianum* Raf.; *Tournefortia synzistachya* (Ruiz & Pav.) Roem. & Schult.)

Curaçao.

See *Prodromus Designationis Stirpium Gottingensium* 217–219. 1770, *Introductio ad Historiam Naturalem* 158. 1777, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 553. 1845 and *Scientific Survey of Porto Rico and the Virgin Islands* 6: 134. 1925

(Plant boiled and the brew used to bathe irritated eyes. Leaf decoction with decoction of *Capraria* taken for jaundice. Leaves applied to boils; a wash for boils, sores, cuts, wounds, headaches.)

in English: eyebright

in Curaçao: cocolode

Heliotropium argenteum Lehm.

Ecuador.

See *Novorum Actorum Academia Caesareae Leopoldinae-Carolinae Germanicae Naturae Curiosorum* 9: 139. 1818

(Leaves infusion given as antispasmodic to women during childbirth.)

in Ecuador: guagra-callo blanco

Heliotropium curassavicum L. (*Heliotropium curassavicum* var. *parviflorum* Ball; *Heliotropium curassavicum* var. *violaceum* Ram. Goyena; *Heliotropium lehmannianum* Bruns) (from Curaçao, off the Venezuelan coast)

South America. Glauous fleshy herb, small white flowers with pink yellowish centre

See *Species Plantarum* 1: 130–131. 1753, *Journal of the Linnean Society, Botany* 21: 227. 1884 and *Flora Nicaragiense* 2: 641. 1911, *Pakistan Journal of Botany* 14: 117–129. 1982, *Pacific Science* 39: 302–304. 1985, *Ann. Missouri Bot. Gard.* 75(2): 501. 1988, Huxtable, R.J. “Human health implications of pyrrolizidine alkaloids and herbs containing them.” Pages 41–86 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, Inc., Boca Raton, Fla., USA. 1989, *Fl. Trop. E. Afr., Borag.* 67. 1991, *Willdenowia* 25: 659–668. 1996

(Hepatotoxic alkaloids. Leaf extract taken in convulsions. It and other members of the genus (*Heliotropium* species) are used in herbal teas and have been used in several parts of the world for medicinal reasons; over consumption of such teas may cause veno-occlusive disease of the liver (Budd-Chiari syndrome), with hepatic vein thrombosis. Dried powdered roots applied to sores and wounds.)

in English: heliotrope, sea shore heliotrope, seaside heliotrope, smooth heliotrope, spatulate-leaved heliotrope, turnsole

in India: hatti suri

in Nigeria: ukuera

in South Africa: brakganna, panbrak

in Hawaii: kipukai, lau po’opo’ohina, nena, po’opo’ohina

Heliotropium curassavicum L. var. *curassavicum* (*Heliotropium chenopodioides* Humb. & Bonpl. ex Willd.; *Heliotropium chilense* Bertero; *Heliotropium curassavicum* var. *chenopodioides* (Humb. & Bonpl. ex Willd.) Lehm.; *Heliotropium curassavicum* var. *genuinum* I.M. Johnst.; *Heliotropium curassavicum* var. *parviflorum* Ball; *Heliotropium glaucophyllum* Moench; *Heliotropium glaucum* Salisb.; *Heliotropium portulacoides* DC. ex Bello)

South America. Annual or perennial subshrub, herb

See *Species Plantarum* 1: 130–131. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium* 113. 1796,

Supplementum ad Methodum Plantas: a staminum situ describendi 147. 1802, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 175. 1809, *Plantae e Familiae Asperifoliarum Nuciferae* 1: 34. 1818, *Mercurio Chileno* 1828–29(14): 647. 1829, *Anales de la Sociedad Española de Historia Natural* 10: 298. 1881, *Journal of the Linnean Society, Botany* 21: 227. 1884 and *Flora Nicaragüense* 2: 641. 1911, *Contributions from the Gray Herbarium of Harvard University* 81: 14. 1928, *Pakistan Journal of Botany* 14: 117–129. 1982, *Pacific Science* 39: 302–304. 1985, *Ann. Vol. I. *Alkaloids*. CRC Press, Inc., Boca Raton, Fla., USA. 1989, *Fl. Trop. E. Afr., Borag.* 67. 1991, *Willdenowia* 25: 659–668. 1996

(Hepatotoxic alkaloids. Plant astringent, diuretic, antiseptic, emetic, for diarrhea, sore throat, venereal diseases, sores and wounds, measles; leaf extract taken in convulsions. Dried powdered roots applied to sores and wounds.)

in English: heliotrope, salt heliotrope, sea shore heliotrope, seaside heliotrope, smooth heliotrope, spatulate-leaved heliotrope, turnsole

Heliotropium indicum L. (*Eliopia riparia* Raf.; *Eliopia serrata* Raf.; *Heliophytum indicum* (L.) DC.; *Heliotropium africanum* Schumach. & Thonn.; *Heliotropium cordifolium* Moench; *Heliotropium foetidum* Salisb.; *Heliotropium hornimifolium* Mill.; *Tiaridium indicum* (L.) Lehm.)

Old World. Herb, coarse, erect, weedy, stem green-white with white pubescence, stalkless whitish light pink flowers, long terminal brush-like inflorescences, fruit somewhat tinged brown-purple

See *Species Plantarum* 1: 130–131. 1753, *The Gardeners Dictionary: ... eighth edition no. 3*. 1768, *Methodus Plantas Horti Botanici ...* 415. 1794, *Prodr. Stirp. Chap. Allerton* 112. 1796, *Plantae e Familiae Asperifoliarum Nuciferae* 1: 13–14. 1818, *Sylva Telluriana* 90. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 551, 556. 1845 and *Proceedings of the Indian Science Congress Association* 69(3-vi): 231. 1982, *Ann. Missouri Bot. Gard.* 75(2): 501. 1988, *Museo Nacional de Historia Natural (Bolivia) Comunicación* 10: 32–52. 1990, *Glimpses of Cytogenetics in India* 3: 188–198. 1992, *Rapid Assessment Program Working Papers* 10: 1–372. 1998, *Taxon* 53(3): 802. 2004, *Ethnobotany* 16: 52–58. 2004, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005, *Biodiversidad del estado de Tabasco* Cap. 5: 111–144. 2005

(Used in Ayurveda and Sidha. Plant used in rheumatism, eye diseases, wounds; plant juice applied to reduce pain of snakebite, scorpion and insect stings; cooked plant for stomachache. Leaves vermifuge, febrifuge, eye lotion, wound dressing; leaf juice for skin and eye diseases, wounds, ulcers, boils, scabies, cuts, sores, cholera, convulsions, intestinal worms, scorpion sting. Flowers antimicrobial, astringent, emollient, emmenagogue, carcinogenic, antitumor,

antipyretic and antiinflammatory; in large doses flowers cause abortion. Roots infusion taken for cold; root paste applied on the head and the juice is given internally when children are frightened due to thunder; freshly collected and crushed roots taken orally in scorpion bites; root crushed in water and paste applied on scorpion bite and snakebite. For the treatment of venereal diseases, diarrhea and vomiting in infants, on warts and in poultices to treat inflammatory diseases; a bath for skin conditions. For snakebite, seed crushed with jaggery, eaten. Veterinary medicine, leaves crushed with those of *Crotalaria medicaginea*, the juice rubbed over the body in babesiosis.)

in English: cock's comb, erysipela plant, Indian heliotrope, scorpion weed, scorpion's tail, turnsole, white clary, wild clary
in Honduras: borraja

in Cambodia: kantui damrey, promoi damrey

in China: da wei yao

Heliotropium keralense Sivar. & Manilal

India. Erect herb, white flowers in terminal spicate scorpioid cymes

See *J. Ind. Bot. Soc.*, 51(3–4): 348. 1972 (publ. 1973)

(Leaf juice to cure fresh wounds.)

in India: telkkata

Heliotropium ovalifolium Forssk. (*Heliotropium ovalifolia* Gürke)

Tropical Africa. Perennial herb, decumbent, erect, woody-based, many-branched, hairy to densely white-villous, prostrate, inflorescence a spike-like cyme, small white flowers in two ranks, corolla funnel-shaped, nutlets, on roadsides

See *Flora Aegyptiaco-Arabica*, pl. 38, descr. 1775 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 125: 48. 2003

(Plant reported to be poisonous, causing diarrhea and vomiting. Used in the treatment of syphilis, strong purgative, analgesic, hot poultices to treat severe pain, used externally for syphilitic ulcers.)

in India: hastrashundi (hastra = elephant, shundi = trunk), naga-phuli

Heliotropium pterocarpum (DC. & A. DC.) Hochst. & Steud. ex Bunge (*Heliophytum pterocarpum* DC.; *Heliophytum pterocarpum* DC. & A. DC.; *Heliotropium kassasii* Täckh. & Boulos; *Heliotropium pterocarpum* (DC.) Bunge; *Heliotropium pterocarpum* Hockst. & Steud. ex Bunge; *Heliotropium pterocarpum* Hochst. & Steud. ex DC.)

Saudi Arabia, Comoros. Low bushy herb, white flowers

See *Species Plantarum* 1: 130–131. 1753, *Buletin Kebun Raya [Indonesia]* 9: 552. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 551–552. 1845, *Bulletin de la Société Impériale des Naturalistes de Moscou* 42(1): 331. 1869

(Purgative, analgesic.)

Heliotropium ramosissimum (Lehm.) DC. (*Heliotropium afghanicum* Boiss.; *Heliotropium bacciferum* auct., non Forssk.; *Heliotropium bacciferum* auct. forma *ramosissimum* (Lehm.) Maire; *Heliotropium undulatum* var. *ramosissimum* Lehm.; *Heliotropium undulatum* var. *suffrutescens* (Pomel) Maire; *Heliotropium undulatum* var. *tuberosum* Boiss.)

Tropical Africa.

See *Species Plantarum* 1: 130–131. 1753, *Flora Aegyptiaco-Arabica* Descr. Pl. 38. 1775, *Symbolae Botanicae, ...* 1: 13. 1790, *Sylva Telluriana* 88. 1838 and *Flora of Tropical Africa* 4(2): 37. 1905, *Iranian Journal of Botany* 7(1): 81–93. 1996

(Antispasmodic, antiinflammatory, for skin diseases.)

in Sahara: hebaliyé

Heliotropium scabrum Retz. (*Heliotropium scabrum* Lehm.)

Pakistan, India, Sri Lanka. Herb, perennial, prostrate, branched from the base, subcapitate cyme terminal, calyx hairy, corolla funnel-shaped white, fruit 4 nutlets, in dunes, near the sea

See Retzius, Anders Jahan (1742–1821), Andreae Johannis Retzii ... *Observationes botanicae* sex fasciculis comprehensae / quibus accedunt Joannis Gerhardi Koenig ... Descriptiones monandrarum et epidendrorum in India Orientali factae. Lipsiae, 1791 [i.e., 1779–1791], *Pl. Asperif. Nucif.* 1: 70. 1818, Hasskarl, Justus Karl (1811–1894), *Retzia: sive observationes botanicae* quas de plantis horti botanici bogoriensis annis 1855 & 1856. Bataviae, 1856 and *Taxon* 28: 393–395. 1979

(Antimicrobial, emmenagogue, carcinogenic, antitumor, antipyretic and antiinflammatory.)

Heliotropium steudneri Vatke (*Heliotropium dissimile* N.E. Br. ex Baker & Wright; *Heliotropium dissimile* N.E. Br.; *Heliotropium eduardii* Martelli; *Heliotropium longiflorum* sensu Hiern; *Heliotropium nelsonii* C.H. Wright; *Heliotropium rogersii* Kaplan)

South Africa.

See *Species Plantarum* 1: 130–131. 1753, *Oesterreichische Botanische Zeitschrift* 25: 167. 1875, *Revisio Generum Plantarum* 2: 590. 1891

(Antiinflammatory.)

Heliotropium strigosum Willd. (*Euploca strigosa* (Willd.) Diane & Hilger; *Heliotropium constrictum* Kaplan; *Lithospermum chinense* Hook. & Arn.)

Nigeria, Senegal. Heath-like shrublet, erect or spreading, branched, woody base, small narrow leaves, corolla white with yellow throat, bad odor when leaves crunched

See *Species Plantarum*. Editio quarta 1(2): 743. 1798, *Transactions of the American Philosophical Society*, new series, 5(6[3]): 189–190. 1837[1836], *The Botany of Captain Beechey's Voyage* 202. 1837 and *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 125: 49. 2003

(Plant paste applied on boils. Roots, leaves and bark, local application for snakebite, poisonous stings, wounds, boils.)

in China: xi ye tian jie cai

in India: achu'sing, chitiful

Heliotropium subulatum (Hochst. ex A. DC.) Vatke (*Heliotropium inconspicuum* Dinter ex Vaupel; *Tournefortia subulata* Hochst. ex A. DC.)

South Africa, Tanzania. Herb, shrubby, creeping, spreading, leaves linear rigid with short spines, yellow flowers, in dry bushland, grassland

See *Species Plantarum* 1: 140–141. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 528. 1845, *Linnaea* 43: 316. 1882

(Used in postpartum medication. Leaves and roots pounded and boiled, decoction drunk as medicine for postpartum diseases in women.)

in Tanzania: ngola moyo, nyalulimi lwisenga, nyasowasa

Heliotropium supinum L. (*Piptoclaina supina* G. Don fil.)

Europe, Spain, India. Prostrate many-branched herb

See *Species Plantarum* 1: 130. 1753, *A General History of the Dichlamydeous Plants* 4: 308, 364. 1837 and *Inform. Bot. Ital.* 12: 333–340. 1980, *Willdenowia* 25: 659–668. 1996

(Paste of fresh plant applied on skin diseases.)

in India: bethi-hathisundhi

Heliotropium zeylanicum Lam. (*Heliotropium zeylanicum* Baker)

Tropical Africa, West Africa, Central and South Africa. Herb, branched and woody at the base, erect, perennial, long thick rootstock, flowers yellow-green along spike-like stalks, tiny hairy bell-shaped calyx, tubular white corolla, fodder, tender leaves cooked and eaten, in very dry bushland, a weed of roadsides

See *Encyclopédie Méthodique, Botanique* 3: 94. 1789 and *Flora of Tropical Africa* 4(2): 31. 1905

(Leaves and roots pounded and boiled, decoction drunk as medicine for postpartum diseases in women.)

in Tanzania: ngola moyo, nyalulimi lwisenga, nyasowasa

Helixanthera Lour. Loranthaceae

From the Greek *helix* 'anything spirally twisted, a spiral', *helisso* 'to wind, to turn round' and *anthera* 'anther', see *Fl. Cochinch.* 1: 142. 1790.

Helixanthera parasitica Lour. (*Helicia parasitica* (Lour.) Pers.; *Leucobotrys adpressa* Tiegh.; *Loranthus adpressus* (Tiegh.) Lecomte; *Loranthus pentapetalus* Roxb.)

India.

See *Flora Cochinchinensis* 1: 142–143. 1790, *Synopsis Plantarum* 1: 214. 1805, *Flora Indica*; or descriptions of Indian Plants 2: 211–212. 1824, *Bulletin de la Société Botanique de France* 41: 504. 1894 and *Notulae Systematicae. Herbarium du Museum de Paris* 3: 53. 1914

(Stem bark pounded and applied for treatment of new bone fracture.)

in China: li ban ji sheng

in India: tacha-changne

Helleborus L. Ranunculaceae

Greek *helleboros*, a plant name for a species of *Helleborus*, perhaps the Lent hellebore, Greek *hellos, ellos* 'a young deer' and *bibroskein* 'to eat, to devour'; Latin *elleborus* (*hell-*) and *elleborum* (*hell-*) 'hellebore'; see *Species Plantarum* 1: 557–558. 1753, *Reisen durch Russland und im Caucasischen Gebürge* 2: 196. 1791, G. Manuzzi, ed., *Libro della cura delle malattie*. Testo del buon secolo della lingua allegato nel Vocabolario della Crusca, ora per la prima volta posto in luce dal cav. Abate G. Manuzzi. Firenze, 1863 and Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 2: 379. Zanichelli, Bologna 1980, *Flora* 189(2): 98. 1994.

Helleborus argutifolius Viv. (*Helleborus corsicus* (Viv.) Willd. ex Mabile, nom. illeg.)

Europe. Evergreen perennial herb, erect or sprawling, cup- or bowl-shaped pale green flowers

See *Florae Corsicae Prodromus* 8. 1824, *Recherches sur les Plantes de la Corse* 1: 7. 1867 and *Prodrome de la Flore Corse* 1: 582. 1910

(All parts poisonous, toxic if large quantities eaten, burning of mouth and throat, skin irritation.)

in English: Corsican hellebore

Helleborus foetidus L.

Europe, North America. Erect, evergreen, perennial herb, drooping flowers green flushed with purple at apex

See *Collect. Bot.* (Barcelona) 18: 45–57. 1990, *Anales Jard. Bot. Madrid* 59(2): 287. 2002, *Bol. Real Soc. Esp. Hist. Nat., Secc. Biol.* 98(1–4): 9–19. 2003

(All parts poisonous, toxic if large quantities eaten, burning of mouth and throat, skin irritation.)

in English: bear's-foot, bearsfoot hellebore, setterwort, stinking hellebore, stinkwort

***Helleborus niger* L.**

Europe. Erect, evergreen, unbranched, perennial herb, solitary flowers white becoming pink or purplish

See *Species Plantarum* 1: 558. 1753 and *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995

(All parts poisonous, toxic if large quantities eaten, burning of mouth and throat, skin irritation.)

in English: Christmas rose, black hellebore

***Helleborus orientalis* Lam.**

Europe. Erect, evergreen, perennial branched herb, white or creamy flowers saucer-shaped

See *Encyclopédie Méthodique, Botanique* 3: 96. 1789 and *Taxon* 35: 195. 1986

(All parts poisonous, toxic if large quantities eaten, burning of mouth and throat, skin irritation.)

in English: Lenten rose

***Helleborus viridis* Linnaeus**

Europe.

See *Sp. Pl.* 1: 557–558. 1753, *Gen. Pl.* ed. 5, 244. 1754

(Both living and dried plants of all species of *Helleborus* are extremely poisonous. Plants contain a cardiac glycoside (helleborin), which acts directly on the heart muscle, causing convulsions, delirium, and sometimes death. Poisoning from contaminated hay has been known to cause livestock fatalities in some areas.)

in English: green hellebore

Helosis Rich. Balanophoraceae (Helosaceae)

Probably from the Greek *helos* 'a nail, stud, nail-head', referring to the peltate bracts, or also from Greek *heleos*, *helos* 'a marsh, wet, low ground, meadow, backwater, swamp', see *Hortus Berolinensis* 1(6): t. 71. 1806, *Semanario del Nuevo Reino de Granada* 1810(2): 26. 1810, *Mémoires du Muséum d'Histoire Naturelle* 8: 416, 432, t. 20. 1822, *Annales des Sciences Naturelles; Botanique*, sér. 2, 7: 32. 1837 and *Field Museum of Natural History, Botanical Series* 13(2/2): 427–431. 1937, *Fieldiana, Bot.* 24(4): 92–93. 1946, *Fl. Neotrop.*

23: 1–80. 1980, *Fieldiana: Botany, New Series* 13: 93–99. 1983, *Flora of Ecuador* 19: 1–16. 1983, *Fieldiana: Botany, New Series* 13: 93–99. 1983, *Flora de Veracruz* 85: 1–7. 1995, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(1): 393–394. 2001, *Harvard Papers in Botany* 9(2): 257–296. 2005, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

***Helosis cayennensis* (Sw.) Spreng.** (*Caldasia brasiliensis* (Schott & Endl.) Kuntze; *Caldasia cayennensis* (Sw.) Mutis ex Steud.; *Cynomorium cayennense* Sw.; *Helosis brasiliensis* Schott & Endl.; *Helosis cayennensis* var. *mexicana* (Liebm.) B. Hansen; *Helosis guyanensis* Rich.; *Helosis guyanensis* fo. *brasiliensis* (Schott & Endl.) Eichler; *Helosis mexicana* Liebm.)

Central America.

Plymouth, U.K. 2001

(For liver diseases, astringent.)

in English: lemon daylily, yellow daylily

in China: bei huang hua cai

Hemerocallis minor Miller (*Hemerocallis flava* (Linnaeus) Linnaeus var. *minor* (Miller) M. Hotta; *Hemerocallis graminea* Andrews; *Hemerocallis graminifolia* Schldl.; *Hemerocallis pumila* Salisb.; *Hemerocallis sulphurea* Nakai)

Siberia to Korea. The flowers are steamed and then dried as a traditional food in China

See *Gard. Dict.*, ed. 8. *Hemerocallis* no. 2. 1768 and *Acta Phytotax. Geobot.* 22: 40. 1966, Grubov, V.I. *Key to the Vascular Plants of Mongolia* 1: 1–411. 2001

(Stimulant, tonic, astringent, stomachic.)

in China: xiao huang hua cai

Hemidesmus R. Br. Asclepiadaceae (Apocynaceae, Periplocaceae)

From the Greek *hemi* 'half' and *desmis*, *desmos* 'a bond, band, bundle', an allusion to the filaments and to the pollen masses, see *Asclepiadeae* 45. 1810, *Hortus Kew.* (W.T. Aiton), ed. 2. 2: 75. 1811, *Mem. Wern. Nat. Hist. Soc.* 1: 56. 1811 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Taxon* 26: 257–274. 1977.

Hemidesmus indicus R. Br. ex Schult. (*Hemidesmus indicus* (L.) R. Br.; *Hemidesmus indicus* (L.) R. Br. ex Schult.; *Periploca indica* L.)

India. Slender twining shrub, perennial, creeper, climber, prostrate, semi-erect, twining, milky juice, crowded small flowers greenish purple to brownish yellow in axillary fascicles, long slender follicles, ovate-oblong seeds

See *Species Plantarum* 1: 211–212. 1753, *On the Asclepiadeae* 45. 1810, *Hortus Kew.* (W.T. Aiton), ed. 2. 2: 75. 1811, *Memoirs of the Wernerian Natural History Society* 1: 56. 1811, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 6: 126. 1820 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Taxon* 26: 257–274. 1977, *Proceedings of the Indian Science Congress Association* 75(3-VI): 233–234. 1988, *J. Econ. Taxon. Bot.* 15: 603–605. 1991, *Phytotherapy Res.* 10: 58–61. 1996, *J. Ethnopharmacol.* 106(1): 38–43. 2006, *Phytotherapy Res.* 20(5): 416–421. 2006, *J. Pharm. Pharmacol.* 59(3): 445–453. 2007

(Used in Ayurveda. Whole plant crushed in water given for fever, scorpion stings and leprosy. Antibacterial, tonic, nutritive, antimicrobial, diaphoretic, alterative, antioxidant, hepatoprotective, renoprotective, demulcent, antihepatocarcinogenic, antienterobacterial, antinociceptive, cytotoxic, antidiarrheal. A paste of the fragrant root applied to cleanse and cure ulcers and swellings, snakebites, venereal diseases, also taken to cure impotency, diarrhea, dysentery and gastritis; root infusion taken in stomach disorders; whole plant of *Selaginella bryopteris* made into a paste mixed with roots of *Grewia hirsuta* and *Hemidesmus indicus* and taken for gonorrhoea; roots of *Vetiveria* and *Hemidesmus indicus* ground into a paste mixed with water and given in diarrhea; root ground and given with milk in skin diseases, eczema; root chewed to alleviate toothache; root paste applied over forehead for high fever; roots for wound maggots; crushed roots with sugar given in venereal diseases; root infusion given in non-malarial fever; root extract drunk for improving lactation in women; root powder with milk drunk in biliousness, spermatorrhea and to increase lactation in mothers; dried powdered roots of *Hemidesmus indicus* mixed with *Cuminum cyminum* taken orally to treat gonorrhoea. The milky juice dropped into inflamed eyes. Viper venom neutralization by *Hemidesmus indicus* and *Pluchea indica* root extracts; roots decoction drunk for snakebite, gout, arthritis, rheumatism; root infusion drunk in ulcers, gastric ulcers, diarrhea. Veterinary medicine,

dried roots ground with those of *Withania somnifera* and fruits of *Balanites roxburghii* given for impaction; leaves of *Jasminum auriculatum* along with those of *Cassia italica* and roots of *Hemidesmus indicus* pounded and the extract given orally for tympany. Magico-religious beliefs, ritual, against evil spirits and pain in the stomach, chew few roots and swallow the juice; root tied around the wrist of a children with a red thread to ward off evil spirits; a piece of root is tied on the wrist or around the neck of person suffering from fever; for unhealthy babies, this creeper is tied in their hands; hang a few roots in the neck of the baby if the skull bones are not growing properly.)

in English: country sarsaparilla, Indian sarsaparilla

in India: analsing, anant mool, ananta, ananta mool, anantamul, ananthamoola, anantmool, anantmul, anantmuli, anantvel, anatmul, arjata (name of evil spirit), arochilli, bari dudhi, chahajali, chemidimulo, chirmar, choti dudhii, dandaralaha, dandaralaha, dandralaha, drishti voso, dud mal, dudellaha, dudhi, dudhia, dudhigeri, dudhilibutta, dudhli, dudhuel, dudhvel, dudumal, garger, gerhedi, gooda pala, kali-papri, kapoori, kapuri, khapri, khokuvel, ladugora, matiatonda (associated with the name of evil spirit), mugraba, nannaari, nannari, phaluri, rapuri, sariva, sogade beru, sugandhi, sugandhi pala, sugandhijad, sugandhipala, sugrandhijad, sugundi, tasad atikir, trajamala

in Nepal: anantamul

Hemidesmus indicus (L.) R. Br. ex Schult. var. *pubescens* (Wight & Arn.) Hook. f. (*Hemidesmus pubescens* Wight & Arn.)

India.

See *Contributions to the Botany of India* 63. 1834, *The Flora of British India* 4(10): 5. 1883

(Powdered root antiemetic after delivery in women, also given in epilepsy; seeds of *Punica granatum*, rhizome of *Curculigo trichocarpa* and roots of *Hemidesmus indicus* var. *pubescens* powdered and consumed for increasing the fertility. Plant juice mixed with grating of *Cocos nucifera* consumed for cold and to increase eyesight.)

in India: nannaari, nannari

Hemigraphis Nees Acanthaceae

Greek *hemi* 'half' and *graphis* 'brush, pencil', *hemigraphos* 'half-written', possibly referring to the covering on the filaments of the outer stamens, see *Prodr.* (DC.) 11: 722. 1847.

Hemigraphis alternata (Burm.f.) Anderson (*Blechum cordatum* Leonard; *Hemigraphis alternata* T. Anderson; *Hemigraphis colorata* (Blume) Hallier f.; *Ruellia alternata* Burm. f.; *Ruellia colorata* Bl.)

Asia, Java, Belize. Herb, ascending or creeping, stems hairy, rooting at the lower nodes, leaves broadly ovate to

ovate-oblong purplish beneath, dense terminal spicate inflorescence, corolla white, limb spreading, 4 stamens

See *Species Plantarum* 2: 634–635. 1753, *The Civil and Natural History of Jamaica in Three Parts* 261. 1756, *Flora Indica ... nec non Prodrumus Florae Capensis* 135. 1768, *Bijdragen tot de flora van Nederlandsch Indië* 795. 1826, *Prodrumus Systematis Naturalis Regni Vegetabilis* 11: 722. 1847, *Journal of the Proceedings of the Linnean Society, Bot.* 7: 114. 1863 [1864 publ. 1863], *Nova Acta Leopoldina* 70: 199. 1897 and *Publications of the Carnegie Institution of Washington* 461(10): 200, f. 2. 1936, *Fieldiana, Botany* 24(10/4): 328–462. 1974

(Wet leaves squeezed and the solution drunk as a contraceptive.)

in English: metal leaf, red flame ivy, red ivy

in Philippines: dahong pula

Hemigraphis latebrosa (Roth) Nees (*Hemigraphis latebrosa* Nees; *Ruellia latebrosa* Roth)

India.

See *Novae Plantarum Species* 307. 1821, *Prodrumus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 723. 1847 and *Cytologia* 41: 283–290. 1976, *Ber. Schweiz. Bot. Ges.* 86: 152–203. 1976, *Taxon* 28: 630–631. 1979

(Plant decoction as a blood purifier. Root extract as nasal drops for promoting aversion for alcohol.)

in India: akkala, kolshinda

Hemionitis L. Pteridaceae (Adiantaceae, Hemionitidaceae)

Hemionitis, used by Strabo for the mule-fern, a species of *Scolopendrium*; from the Greek *hemionos* ‘a mule’, supposed to be barren, worn by women as a charm against pregnancy; Latin and Greek *hemionion* for a plant, called also *asplenium*; see *Species Plantarum* 2: 1077–1078. 1753, *Journal für die Botanik* 1799(1): 297. 1799, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 304. 1811, *Enum. Filicum* 68, 198. 1824, *Tentamen Pteridographiae* 242, 244, t. 11, f. 4–5. 1836, *Filicum Species* 138. 1841, *Epimeliae Botanicae* 263. 1849, *Mémoires de la Société d’Histoire Naturelle de Strasbourg* 4(1): 202. 1850, *Mémoires sur les Familles des Fougères* 171, t. 15A, f. 2. 1850, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 430. Ansbach 1852, *Hist. Fil.* 150–151. 1875 and *Bulletin of the Torrey Botanical Club* 29(11): 627. 1902, *Fern Gaz.* 11(2–3): 141–162. 1975.

Hemionitis arifolia (Burm. f.) T. Moore (*Asplenium arifolium* Burm. f.; *Gymnogramma arifolia* (Burm. f.) Kuhn; *Gymnogramma sagittata* (Fée) Ettingsh.; *Hemionitis arifolia* (Burm.) T. Moore; *Hemionitis cordata* Hook. & Grev.;

Hemionitis cordifolia Roxb., nom. nud.; *Hemionitis sagittata* Fée; *Hemionitis toxotis* Trevis.; *Parahemionitis arifolia* (Burm. f.) Panigrahi; *Parahemionitis cordata* (Hook. & Grev.) Fraser-Jenk.)

India. Lithophytic fern, creeping rhizomes, brown sori

See *Flora Indica ... nec non Prodrumus Florae Capensis* 231. 1768, *A Numerical List of Dried Specimens* [Wallich] n. 44. 1828, *Icones Filicum* 1(4): t. 64. 1828, *Atti Istituto Veneto di Scienze, Lettere ed Arti* 2: 168. 1851, *Mémoires sur les Familles des Fougères* 5: 172, t. 14D. 1852, *Index Filicum* (T. Moore) 114. 1859, *Denkschriften der Kaiserlichen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 22: 102. 1864, *Annales Museum Botanicum Lugduno-Batavi* 4(9): 283. 1869 and *American Fern Journal* 83(3): 90. 1993, *New Sp. Syndrome Indian Pterid. & Ferns Nepal* 187. 1997

(Used in Ayurveda. Juice from the fronds applied to burns and used as antifertility; dried powdered fronds made into a paste applied to skin diseases; fronds extract taken for flatulence; fronds made into a paste orally administered for less poisonous snakebites; leaf paste applied on stomach to get relief from stomachache. Leaves analgesic, antibacterial, made into a paste with turmeric and applied to dog bites. Rhizome antibacterial. Whole plant of *Drosera peltata* along with the roots of *Toddalia asiatica* and rhizomes of *Hemionitis arifolia* ground together and used for mental disorders, nervous breakdown.)

in English: mula fern

in India: akhukarni, attukalkilangu, kalpaasi, karun churutai, mannakkadu, mayilkalpatchillai, pannekadu, patitsjivimaravara, pattichevi, poonakkathi

Hemiphora (F. Muell.) F. Muell. Lamiaceae (Dicrasyliidaceae, Labiatae, Verbenaceae)

From the Greek *hemi* ‘half’ and *phoros* ‘bearing’, the flowers have only two stamens; see F. von Mueller, *Systematic census of Australian plants*. pl. 103. 1883 and Munir, A.A. “A taxonomic revision of the genus *Hemiphora* (Chloanthaceae).” *J. Adelaide Bot. Gard.* 1: 161–166. 1978.

Hemiphora elderi (F. Muell.) F. Muell. (*Chloanthes elderi* F. Muell.; *Hemiphora elderi* F. Muell.) (named after the philanthropist Sir Thomas Elder, 1818–1897, pastoralist, sponsor of the Elder Exploring Expedition, author of *Notes from a pocket journal of a trip up the River Murray in 1856*. Adelaide 1893, *Travels in Algeria in 1860*. Adelaide 1894, *Notes from a pocket journal of rambles in Spain in 1860*. Adelaide 1894 and *Narrative of a tour in Palestine in 1857*. Adelaide 1894; see [Elder Scientific Exploration Expedition], *Handbook of Instructions for the guidance of the officers of The Elder Scientific Exploration Expedition to the unknown portions of Australia*. Issued by the Council of the Royal Geographical Society of Australasia, South Australian Branch. Adelaide

1891; [Elder Scientific Exploration Expedition], *Journal of the Elder Scientific Exploring Expedition, 1891–1892*. Under command of D. Lindsay, etc. Adelaide 1893)

Australia.

See *Prodr. Fl. Nov. Holland.* 513. 1810, *Fragm.* (Mueller) 10(81): 13. 1876, *Systematic census of Australian plants.* 103. 1883

(Anticonvulsant.)

in English: red velvet

Hemiphragma Wallich Scrophulariaceae (Plantaginaceae)

From the Greek *hemi* ‘half’ and *phragma* ‘a hedge, a fence, screen’, alluding to the division of the capsule, see *Transactions of the Linnean Society of London* 13(2): 611–612. 1822 [3–19 Dec 1822], *Tentamen Florae Nepalensis* 16, t. 8. 1824–1826.

Hemiphragma heterophyllum Wall.

China, India, Himalaya.

See *Transactions of the Linnean Society of London* 13(2): 612. 1822, *Tent. Fl. Nep.* 16, t. 8. 1824

(Whole plant decoction given to cure pharyngitis and inflammation of tonsils.)

in China: bian da xiu qiu

in India: malajhar

Hemiptelea Planchon Ulmaceae

Greek *hemi* ‘half’ and *ptelea* ‘elm’, referring to the fruits, partially winged; see *Compt. Rend. Hebd. Séances Acad. Sci.* 74: 131. 1872 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 112. 1989.

Hemiptelea davidii (Hance) Planchon (*Hemiptelea davidiana* Priemer; *Planera davidii* Hance; *Zelkova davidiana* (Priemer) Bean; *Zelkova davidii* (Hance) Hemsley)

China.

See *J. Bot.* 6: 333. 1868, *Compt. Rend. Hebd. Séances Acad. Sci.* 74: 131–132. 1872

(For skin diseases, astringent, for headache.)

in China: chu, ci yu

Hemisteptia Bunge ex Fischer & C.A. Meyer Asteraceae

From the Greek *hemi* ‘half’ and *steptos* ‘crowned’; in *Index Sem. Hortus Bot. Petrop.* 2: 38. Dec. 1835 (Index Seminum [St. Petersburg]).

Hemiphragma Wallich Scrophulariaceae (Plantaginaceae)

Hemisteptia lyrata (Bunge) Bunge (*Aplotaxis bungei* DC.; *Aplotaxis carthamoides* DC.; *Cirsium lyratum* Bunge; *Cnicus carthamoides* Wall., nom. nud.; *Cnicus multicaulis* Wall. ex DC.; *Haplotaxis australasia* F. Muell.; *Haplotaxis bungei* (DC.) Benth. & Hook. f. ex Franch. & Sav.; *Hemisteptia carthamoides* (DC.) Kuntze; *Hemisteptia carthamoides* Kuntze; *Hemisteptia lyrata* (Bunge) Fisch. & C.A. Mey.; *Saussurea affinis* DC.; *Saussurea affinis* Spreng. ex DC.; *Saussurea carthamoides* Buch.-Ham. ex DC.; *Saussurea carthamoides* (Roxb.) Benth.; *Saussurea stricta* Spreng. ex DC.; *Saussurea stricta* Franch.; *Serratula multicaulis* Wall.)

China. Thick stem

See *A Numerical List of Dried Specimens* [Wallich] n. 2896–7. 1831, *Enumeratio Plantarum, quas in China Boreali* 110. 1833, *Gen. Pl.* [Endlicher] 468. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 538–540. 1838 [1837 publ. early Jan 1838], *Fragmenta Phytographiae Australiae* 1: 36. 1858, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 1(2): 255. 1875, *Revisio Generum Plantarum* 1: 344. 1891, *J. Bot.* (Morot) viii. (1894) 342. 1894 and *Taxon* 26: 557–565. 1977

(Roots juice one of the ingredients used for female diseases.)

in India: gangamula

Hemsleya Cogniaux ex F.B. Forbes & Hemsley Cucurbitaceae

Dedicated to the British botanist William Botting Hemsley, 1843–1924 (Broadstairs, Kent), in 1889 a Fellow of the Royal Society and in 1896 of the Linnean Society, from 1899 to 1908 Keeper of the Kew Herbarium, his writings include *Handbook of hardy trees, shrubs, and herbaceous plants.* Boston 1873, “The Flora of Tibet.” *Kew Bull.* 207–216. 1896, *Biologia centrali-americanae*; ... edited by F. Ducane Godman and Osbert Salvin. *Botany ...* by W. Botting Hemsley. London 1879–1885 and *Diagnoses plantarum novarum vel minus cognitarum mexicanarum et centrali-americanarum.* [London]1878–1880, contributor to Daniel Oliver (1830–1916) et al., *Flora of Tropical Africa* (Balanophoreae, Campanulaceae, Rhamnaceae, Scrophulariaceae). See *Hist. Nat. Vég.* (Spach) 6: 187. 1838, Griffith, William (1810–1845), *Some account of the botanical collection brought from the eastward by Dr. Cantor.* 26 (t. 4). Calcutta, 1845, *Fam. Nat. Syn. Monogr.* 2: 117. 1846, *J. Asiat. Soc. Bengal* 23: 645. 1854, *Gen. Pl.* [Bentham & Hooker f.] 1(3): 840. 1867, *Journal of the Linnean Society, Botany* 23: 490. 1888 and Ernest Nelmes and William Cuthbertson, *Curtis’s Botanical Magazine Dedications, 1827–1927.* 282–284. 1932, Elmer Drew Merrill, *Contr. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey.* Library of the New York Botanical Garden. 220. 1973, *Acta Phytotax.*

Sin. 23(2): 124, 129, 133. 1985, *Systematics and Evolution of Hemsleya (Cucurbitaceae) Cucurbitac.*: 70–72, 75, 79–80, 83, 86, 93. 1993.

***Hemsleya amabilis* Diels**

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 206–207. 1912, *Systematics and Evolution of Hemsleya (Cucurbitaceae) Cucurbitac.*: 80. 1993

(Plants for cervical erosion. Root tubers stomachic and for enteritis, sore throat, leprosy, bronchitis.)

in China: qu lian

***Hemsleya graciliflora* (Harms) Cogniaux** (*Alsomitra graciliflora* Harms; *Gomphogyne bonii* Gagnep.; *Hemsleya graciliflora* Cogn.; *Hemsleya graciliflora* var. *tianmuensis* X.J. Xue & H. Yao; *Hemsleya longgangensis* X.X. Chen & D.R. Liang)

China.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(5): 602. 1901, *Das Pflanzenreich* (Engler) Cucurb.-Fevill. & Melothr. IV. 275, 1(Heft 66): 24, f. 7A-H. 1916, *Bulletin du Muséum National d'Histoire Naturelle* 24(5): 372–373. 1918, *Acta Botanica Yunnanica* 14(1): 27–28, f. 1. 1992, *Acta Phytotaxonomica Sinica* 33(2): 208. 1995

(Plants for chronic bronchitis and hepatitis.)

in China: ma tong ling, ma tun ling

***Hemsleya longgangensis* X.X. Chen & D.R. Liang**

China.

See *Acta Botanica Yunnanica* 14(1): 27–28, f. 1. 1992

(Plants for chronic bronchitis and hepatitis.)

Hepatica Miller Ranunculaceae

Greek *hepatikos*, from *hepar* ‘liver’, referring to the colour and shape of the leaves and to the supposed curative effect; see *Familles des Plantes* 2: 14. 1763, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754, M.A. Marchi, *Dizionario tecnico-etimologico-filologico*. Milano 1828–1829, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 432. Ansbach 1852.

***Hepatica nobilis* Mill.** (*Anemone hepatica* L.; *Hepatica hepatica* (L.) H. Karst.; *Hepatica hepatica* H. Karst.; *Hepatica hepatica* Britton; *Hepatica nobilis* Schreb.; *Hepatica nobilis* Garsault, nom. inval.)

Europe, Spain.

See *Species Plantarum* 1: 538–542. 1753, *Fig. Pl. Anim. Med.* 3: t. 301. 1764, *Descr. Pl. Anim.* 189. 1767, *The Gardeners Dictionary*: ... eighth edition *Hepatica* no. 1. 1768, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* (Karsten) 558–559. 1882, *Ann. New York Acad. Sci.* 6: 233. 1891 and *Nordic J. Bot.* 14: 160. 1994

(Astringent, diuretic, demulcent, pectoral, nervine, vulnerary.)

***Hepatica nobilis* Miller var. *acuta* (Pursh)** Steyermark (*Anemone acutiloba* (DC.) G. Lawson; *Anemone acutiloba* Laws.; *Hepatica acuta* Britton; *Hepatica acuta* (Pursh) Britton; *Hepatica acutiloba* DC.; *Hepatica triloba* Chaix var. *acuta* Pursh; *Hepatica triloba* var. *acutiloba* (DC.) Warner)

North America. Perennial herb

See *Hist. Pl. Dauphiné* (Villars) 1: 336. 1786, *Flora Americae Septentrionalis*; or, ... (Pursh) 2: 391. 1813, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 22. 1824, *Proc. & Trans. Roy. Soc. Canada* 2(4): 30–31. 1884 [*Ranunc. Canad.*], *Annals of the New York Academy of Sciences* 6: 234. 1891 and *Rhodora* 62(740): 232. 1960

(Emetic, laxative, stomachic, blood purifier, analgesic, contraceptive, to treat abdominal pain, leucorrhoea, gastrointestinal and liver disorders, constipation, lung troubles. Ceremonial, spiritual, emotional, witchcraft.)

in English: sharp-lobed hepatica, sharplobe hepatica

***Hepatica nobilis* Miller var. *obtusa* (Pursh)** Steyermark. (*Anemone americana* (DC.) H. Hara; *Anemone hepatica* L.; *Hepatica americana* Ker Gawl.; *Hepatica americana* (DC.) Ker Gawl.; *Hepatica hepatica* (L.) Karst.; *Hepatica triloba* var. *americana* DC.; *Hepatica triloba* var. *obtusa* Pursh)

North America. Perennial herb, basal leaves, slender hairy flower stalks

See *Flora Americae Septentrionalis*; or, ... (Pursh) 2: 391. 1813, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 216–217. 1817, *Botanical Register*; consisting of coloured ... 5: t. 387. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 22. 1824, *Proc. & Trans. Roy. Soc. Canada* 2(4): 30–31. 1884, *Annals of the New York Academy of Sciences* 6: 234. 1891 and *Journal of Japanese Botany* 33(9): 271. 1958, *Rhodora* 62(740): 232. 1960, *Taxon* 31: 120–126. 1982, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989, *Chromosome Sci.* 2: 27–29. 1998

(Plants contain irritating compounds. Abortifacient, anti-convulsive, antidiarrheal, astringent, febrifuge, tonic, in the treatment of abdominal pain, dysentery, colic, cramps, convulsions, liver ailments, vertigo, stomachache and constipation, inflammations and bruises; roots decoction taken for amenorrhoea. Ceremonial, ritual, hunting charm.)

in English: liverwort, round-lobed hepatica, roundlobe hepatica

Heracleum L. Apiaceae (Umbelliferae)

Greek *herakleia* or *panakes* *Herakleion*, in honor of Hercules, Herakles or Heracles, see *Species Plantarum* 1: 249–250. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 191, 194. 1830 and *Bull. Nanjing Bot. Gard. Mem. Sun Yat-Sen* 1988–1989: 115. 1990.

Heracleum bivittatum H. de Boissieu

China.

See *Species Plantarum* 1: 249–250. 1753 and *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 855. 1903

(Wounds, boils, cuts.)

in China: er guan du huo

Heracleum candicans Wallich ex DC. (*Tetrataenium candicans* (Wallich ex DC.) Mandenova)

China. Essential oil from the roots

See *Species Plantarum* 1: 249–250. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 192. 1830 and *Taxon* 29: 543. 1980, *Chromosome Information Service* 34: 6–7. 1983, *Zametki Sist. Geogr. Rast.* 41: 44. 1986, *Plant Systematics and Evolution* 154: 11–30. 1986, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994, *Acta Phytotaxonomica Sinica* 42(6): 562. 2004

(A poison for cattle. Roots for headache, abdominal pain, leprosy, neurological disorders, to stop bleeding. Juice of fresh young shoot given in treating dysentery.)

in Bhutan: sprunag-dkarpo

in China: bai liang du huo

in India: chhataya, het shoma, kaindal, raswal, tukaar

Heracleum candicans Wallich ex DC. var. *candicans* (*Tetrataenium candicans* (Wallich ex DC.) Mandenova)

China. Essential oil from the roots

See *Species Plantarum* 1: 249–250. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 192. 1830 and *Taxon* 29: 543. 1980, *Chromosome Information Service* 34: 6–7. 1983, *Zametki Sist. Geogr. Rast.* 41: 44. 1986, *Plant Systematics and Evolution* 154: 11–30. 1986, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994, *Acta Phytotaxonomica Sinica* 42(6): 562. 2004

(A poison for cattle. Roots for headache, abdominal pain, leprosy, neurological disorders, to stop bleeding. Juice of fresh young shoot given in treating dysentery.)

in China: bai liang du huo

in India: chhataya, het shoma, kaindal, raswal, tukaar

Heracleum canescens Lindl.

India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 232. 1839

(Roots for skin diseases, psoriasis.)

in India: arva, candle, ghontiakusumo, kakrya

Heracleum fargesii H. de Boissieu

China.

See *Species Plantarum* 1: 249–250. 1753 and *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 852–853. 1903

(Purgative, emetic, antiseptic, for snakebite.)

in China: cheng kou du huo

Heracleum franchetii M. Hiroe (*Heracleum acuminatum* Franchet, non Schleicher)

China.

See *Species Plantarum* 1: 249–250. 1753, *Bull. Soc. Philom. Paris*, sér. 8, 6: 144. 1894 and *Umbell. World.* 1749. 1979, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(Antiinflammatory.)

in China: jian ye du huo

Heracleum grande (Dalzell & A. Gibson) Mukhop. (*Pastinaca grandis* Dalzell & A. Gibson)

India. Perennial glabrous herbs, yellow flowers

See *Science and Culture* 39(12): 542. 1973

(Crushed leaves infusion for gastric trouble.)

in India: bafali

Heracleum hemsleyanum Diels

China.

See *Species Plantarum* 1: 249–250. 1753 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 503. 1900, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(Diuretic.)

in China: du huo

Heracleum henryi H. Wolff

China.

See *Species Plantarum* 1: 249–250. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 33(866–872): 76. 1933

(Root tonic, astringent.)

in China: si mao du huo

Heracleum lanatum Michx. (*Heracleum lanatum* var. *asiaticum* Hiroe; *Heracleum sphondylium* L. subsp. *lanatum* (Michx.) Á. Löve & D. Löve; *Heracleum sphondylium*

var. *lanatum* (Michx.) Dorn; *Pastinaca lanata* (Michx.) Koso-Pol.; *Sphondylium lanatum* (Michx.) Greene)

North America. Shrub, young stalks peeled and eaten raw

See *Species Plantarum* 1: 249–250, 262. 1753, *Flora Boreali-Americana* 1: 166. 1803, *Manual of the Botany of the Region of San Francisco Bay ...* 157. 1894 and *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 113. 1916, *Taxon* 31: 350, 764–765. 1982, *Vascular Plants of Wyoming* 295. 1988, M.R. Gilmore, *Uses of Plants by the Indians ...* 55. 1991

(The tops used in the smoke treatment for convulsions. Flowers and leaves made into a paste and applied on forehead to cure headache, for the treatment of psoriasis and in the preparation of sun-tan lotions. The fresh seeds used as an anesthetic to the gums. The root pounded and boiled and applied as a poultice for boils, swellings; a decoction from the root taken for intestinal pains; roots chewed for stomach disorders, headaches.)

in North America: beaver medicine, beaver root, cow parsnip, yerba del oso, zhaba-maka (Omaha-Ponca)

in India: padara, patrala, poral

Heracleum mantegazzianum Sommier & Levier

Asia, Caucasus. Shrub, herb, hollow stout dark reddish-purple stem, spotted leaf stalks, white flowers, dried fruits used as a spice, noxious weed, clear watery sap exuding from all parts of the plant

See *Species Plantarum* 1: 249–250. 1753, *Nuovo Giornale Botanico Italiano*, new series 2: 79. 1895 and *Br. Med. J.*, 3: 109. 1970, Anon. “The giant hogweed.” *Lancet* 2: 32. 1970, *Can. Field-Nat.*, 89: 183–184. 1975, *Hereditas Genetiskt Arkiv* 91: 117–127. 1979, *J. Am. Med. Assoc.*, 244: 2596. 1980, *Biologicheskije Nauki* 207(3): 60–65. 1981, *Acta Biologica Cracoviensia, Series Botanica* 25: 57–77. 1983, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 34: 21–25. 1987

(A public health hazard, sap from all parts of the plant, particularly from the stem, acts as a phototoxic; also poisonous when ingested. Giant hogweed contains furocoumarins (psoralens), which make human skin hypersensitive to sunlight, causing cellular damage at the surface. They absorb long-wave ultraviolet light and become photodynamic. It has caused photosensitization in children after exposure to the plant followed by sunlight. Symptoms of phytophotosensitization include serious and extensive weeping blisters, swelling, blisters and eruptions of affected sites.)

in English: cartwheel-flower, cow parsnip, giant cow parsnip, giant hogweed, parsnip tree

Heracleum maximum Bartram (*Heracleum lanatum* Michx.; *Heracleum sphondylium* L. subsp. *montanum* (Schleich. ex Gaudin) Briq.; *Heracleum sphondylium* L. var.

lanatum (Michx.) Dorn; *Heracleum sphondylium* Ucria ex Guss. var. *lanatum* (Michx.) Dorn)

North America. Perennial herb, food

See *Travels Through North and South Carolina* 344. 1791, *Fl. Bor.-Amer.* (Michaux) vol. 1: 166. 1803 and *Rhodora* 46: 50. 1944, *Rhodora* 46: 390. 1944, *Vasc. Pl. Wyoming* 295. 1988

(Plant considered poisonous; roots poisonous to cattle. Tonic, analgesic, antirheumatic, antiseptic, cathartic, antidiarrheal, for skin diseases, boils, cuts, toothaches, sore throats, muscle pain, venereal diseases, bruises and chronic swellings, rheumatism, lung pains, diarrhea. Insecticide. Magico-religious beliefs, ritual, ceremonial.)

in English: common cowparsnip

Heracleum millefolium Diels var. *millefolium* (*Heracleum smithii* Fedde ex H. Wolff; *Peucedanum malcolmii* Hemsley & H. Pearson; *Semenovia millefolia* (Diels) V.M. Vinogradova & Kamelin)

China.

See *Species Plantarum* 1: 245–246, 249–250. 1753 and *Journal of the Linnean Society, Botany* 35: 179. 1902, *Repertorium Specierum Novarum Regni Vegetabilis* 2(18): 65. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 33(866–872): 79. 1933, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(Root tonic.)

in China: lie ye du huo

Heracleum moellendorffii Hance var. *moellendorffii* (*Heracleum barbatum* Ledeb.; *Heracleum barbatum* subsp. *moellendorffii* (Hance) M. Hiroe; *Heracleum dissectum* Ledeb.; *Heracleum dissectum* subsp. *moellendorffii* (Hance) Voroschilov; *Heracleum lanatum* subsp. *moellendorffii* (Hance) H. Hara; *Heracleum microcarpum* Franchet; *Heracleum morifolium* H. Wolff)

China.

See *Species Plantarum* 1: 249–250. 1753, *Flora Boreali-Americana* 1: 166. 1803, *Flora Altaica* 1: 301. 1829, *Journal of Botany, British and Foreign* 16: 12. 1878, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 6: 24. 1883 and *Acta Horti Gothoburgensis* 2(7): 326–327. 1926, *Botaničeskij Žurnal* (Moscow & Leningrad) 61(1): 93–99. 1976, *Botaničeskij Žurnal* (Moscow & Leningrad) 64(2): 227–232. 1979, *Journal of Plant Biology* 39: 15–22. 1996

(Root tonic.)

in China: duan mao du huo

Heracleum nepalense D. Don (*Heracleum nepalense* var. *bivittatum* C.B. Clarke; *Tetrataenium nepalense* (D. Don) Manden.)

Nepal. Herb

See *Prodromus Florae Nepalensis* 185. 1825

(Root paste for diarrhea, tonic, aphrodisiac. Fried seeds eaten to treat cough. Fruit for gastric troubles, body ache, muscular pain, headache, fever, cold, cough, blood purification.)

in China: ni po er du huo

in India: chimphing

in Nepal: nhajyugmran, phaki

Heracleum pinnatum C.B. Clarke (*Tetrataenium pinnatum* (C.B. Clarke) Manden.)

India, Himalaya. Tall perennial plant, white flowers

See *Fl. Brit. India* [J.D. Hooker] ii. 712. 1872–1897 and *Taxon* 29: 543. 1980, *Zametki Sist. Geogr. Rast.* 42: 12. 1991

(Root extract given orally to treat inflammation, pain, fevers, intestinal worms. Veterinary medicine, useful in early lactation.)

in India: khars

Heracleum rapula Franchet

China.

See *Species Plantarum* 1: 249–250. 1753, *Bull. Soc. Philom. Paris*, sér. 8. 6: 145. 1894 and *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 31: 13–16. 1999

(Stomachic.)

in China: he qing du huo

Heracleum scabridum Franchet

China.

See *Species Plantarum* 1: 249–250. 1753, *Bull. Soc. Philom. Paris*, sér. 8. 6: 145. 1894

(Tonic.)

in China: cao du huo

Heracleum sibiricum L. (*Heracleum sibiricum* L. var. *angustifolium* Jacq. p.p.; *Heracleum sphondylium* L. subsp. *sibiricum* (L.) Simonkai)

North America. Perennial herb

See *Bot. Zhurn. SSSR* 67(2): 206–210. 1982, *Biol. Nauki* (Moscow) 5(257): 72–75. 1985, *Fitologija* 41: 70–75. 1991

(Used for menstrual disorders.)

in English: eltrot

Heracleum souliei H. de Boissieu

China.

See *Species Plantarum* 1: 249–250. 1753 and *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 852–853. 1903

(Aphrodisiac.)

in China: kang ding du huo

Heracleum sphondylium L. (*Heracleum sphondylium* Claus; *Heracleum sphondylium* Bourg. ex Reut.; *Heracleum sphondylium* Ucria ex Guss.; *Heracleum sphondylium* Pall.)

Europe. Herb, robust, hollow and pubescent, petals white, pig and cattle fodder, stem and young shoots raw or cooked used as a green vegetable, root boiled

See *Species Plantarum* 1: 249. 1753, *Linnaea*, i. (1826) 894. 1826, *Fl. Sic. Prodr.* 1: 364. 1827, *Bull. Soc. Bot. France* 11: 46. 1864 and *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Bot. Zhurn.* 64(2): 227–232. 1979, *Taxon* 30: 829–842. 1981, *Watsonia* 19: 134–137. 1992, *Berichte des Geobotanischen Institutes der Eidgenössische Technische Hochschule Stiftung Rübel* 58: 101–120. 1992, *Regnum Veg.* 127: 53. 1993

(Sap from all parts of the plant, particularly from the stem, acts as a phototoxic. Roots and leaves tonic, lowers blood pressure, aphrodisiac, digestive, expectorant, sedative, used for pain relief, coughs, epilepsy, jaundice, laryngitis and bronchitis.)

in English: cow parsnip, hogweed

Heracleum stenopterum Diels

China.

See *Species Plantarum* 1: 249–250. 1753 and *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 291–292. 1912, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(Astringent, aphrodisiac.)

in China: xia chi du huo

Heracleum thomsonii C.B. Clarke

India, Ladakh.

See *Flora of British India, The.* [J.D. Hooker] London, 1872–1897

(Goats become blind due to excessive eating of fruits and leaves.)

in India: sushu

Heracleum tiliifolium H. Wolff

China.

See *Species Plantarum* 1: 249–250. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 33(866–872): 80. 1933

(Blood purifier.)

in China: duan ye du huo

Heracleum vicinum H. Boissieu

China.

See *Species Plantarum* 1: 249–250. 1753 and *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 852–853. 1903, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(Abortifacient.)

in China: ping jie du huo

***Heracleum wallichii* DC.**

India. Herb, aromatic, perennial shrub, leaves compound, flowers greenish, winged fruits, a source of pickle, moist places

See *Prodr.* (DC.) 4: 195. 1830 and *Taxon* 26: 577–585. 1976, *Current Science* 46: 751–752. 1977, *Cell and Chromosome Research* 12: 22–29. 1989

(Dried fruits taken orally during influenza and stomachache. Dried flowers and fruits chewed to cure body ache, stomachache and influenza.)

in English: cow parsnip, hogweed

in India: chimphing, chingping

***Heracleum yungningense* Handel-Mazzetti**

China.

See *Species Plantarum* 1: 249–250. 1753 and *Symbolae Sinicae* 7(3): 729. 1933, *Acta Phytotaxonomica Sinica* 32(1): 32–40. 1994

(A postpartum remedy.)

in China: yong ning du huo

Herderia Cass. Asteraceae

See *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 60: 599. 1830.

***Herderia truncata* Cass.**

Guinea, Ghana. Spreading annual herb, woody-based, woolly-pubescent, florets reddish-purple tubular, flower-heads broadly campanulate, glabrous 4-angled achenes

See *Annales des Sciences Naturelles* (Paris) 17: 421. 1829, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 60: 599. 1830

(To relieve rheumatic pains.)

Heritiera Aiton Sterculiaceae

Named for the French botanist Charles Louis L'Héritier de Brutelle, 1746–1800 (assassinated), magistrate, Commandant of the National Guard of Paris, plant collector, author of *Stirpes novae aut minus cognitae*. Parisiis 1784–1785, and *Sertum anglicum seu plantae rariorae quae in hortis juxta Londinum ... ab anno 1786 ad annum 1787 observatae*. Parisiis, Londini, Argentorati [Strasbourg] 1788. See W. Aiton, *Hortus Kewensis* 3: 546. 7 Aug-1 Oct 1789, *De Fructibus et Seminibus Plantarum...* 2: 94. 1790, [Charles Louis L'Héritier de Brutelle], *Catalogue des livres de la bibliothèque de feu C.L. L'Héritier de Brutelle*, par G. Debure l'aîné. Paris 1802 and H. Barnhart, *Biographical Notes*

upon Botanists. 2: 378. 1965, F.N. Hepper and Fiona Neate, *Plant collectors in West Africa*. 50. 1971, Frans A. Stafleu, in *D.S.B.* 8: 303–304. 1981, Stafleu and Cowan, *Taxonomic Literature*. 3: 1–4. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 742. Stuttgart 1993.

***Heritiera fomes* Buch.-Ham. (*Heritiera fomes* Wall.; *Heritiera minor* Roxb.)**

India. Evergreen tall tree, mangrove, straight, grooved and buttressed stem, pneumatophores, rough bark, leathery leaves with silvery scales beneath, small orange unisexual flowers, calyx cup shaped, solitary seeds can float on the tidal water, fruit does not possess vivipary germination

See *Hortus Bengalensis*, or a catalogue ... 50. 1814, *Fl. Ind.* 3: 142. 1832, *Fl. Brit. India* 1: 363. 1874, *Revisio Generum Plantarum* 1: 75. 1891 and *Caryologia* 48(3–4): 319–328. 1995

(Bark paste applied against fresh swellings. Seed oil used in water borne skin diseases. Gum from the bark used in mouth diseases, gum inflammation, bleeding gums.)

in India: badasundari, sundari

***Heritiera littoralis* Dryand. (*Balanopteris totila* Gaertn.; *Heritiera littoralis* Aiton; *Heritiera minor* Bojer)**

East Africa. Shrubby, slow growing tree, strong horizontal roots, shiny simple leaves, inflorescences axillary, white scented very small flowers, in habitats of low salinity, high tide line, along beach, infructescence pendulous, fruits ovoid with flattened base and winged keel, fruits eaten by monkeys, wild pigs and mangrove crabs

See *Hortus Kewensis*; or, a catalogue ... 3: 546–547. 1789, *De Fructibus et Seminibus Plantarum...* 2: 94, t. 99. 1790 and *Journal of Cytology and Genetics* 7–8: 98–105. 1973, *Caryologia* 48(3–4): 319–328. 1995

(Seeds decoction given for diarrhea and dysentery. Leaf paste applied on forehead in headache and body pain. Bark decoction to cure piles.)

in English: looking glass mangrove, looking glass tree

in India: dhala sundari, kamreout, kannadi yele, sundri

in Japan: sakishima-suho-no-ki

in Malaysia: bengkulang, dungun, mengkulang

in Philippine Isl.: barit

in Comoros, Mayotte: moukoumafi, mouroumouny

in Madagascar: moromony, msikundazi, rogniny, rognno, tsi-laintsango, voandrongo

Hermannia L. Malvaceae (Sterculiaceae)

After the German-born Dutch botanist Paul Hermann (Latinized Paulus Hermannus), 1646–1695 (Leyden),

traveller in Africa, India and Sri Lanka, herbalist, explorer, studied medicine at the University of Padua, professor of botany at Leyden 1680–1695, went to Batavia as physician to the Dutch Company, plant collector at the Cape. See Carl Linnaeus, *Species Plantarum* 2: 673–674. 1753 and *Genera Plantarum*. Ed. 5. 304. 1754, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 433. Ansbach 1852, Peter MacOwan, “Personalalia of botanical collectors at the Cape.” *Trans. S. Afr. Philos. Soc.* 4(1): xxx–liii. 1884–1886 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 154–155. London 1904, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J. Britten, “Some early Cape botanists and collectors.” *J. Linn. Soc. Bot.* 45: 31–34. 1920, J. Hutchinson (1884–1972), *A Botanist in Southern Africa*. 610. London 1946, Mia C. Karsten, *The Old Company's Garden at the Cape and Its Superintendants*. Cape Town 1951, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 182–183. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 163. 1965, Gilbert Westacott Reynolds, *The Aloes of South Africa*. 27, 37, 77. Rotterdam 1982.

Hermannia coccocarpa Kuntze (*Hermannia coccocarpa* Burt Davy; *Hermannia coccocarpa* (Eckl. & Zeyh.) Kuntze; *Mahernia coccocarpa* Eckl. & Zeyh.)

South Africa

See *Species Plantarum* 2: 673–674 [as “774”]. 1753, *Systema Naturae*, ed. 12 2: 143, 227. 1767, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 50. [Dec 1834–Mar 1835], *Revis. Gen. Pl.* 3[3]: 25. 1898 and *Ann. Transvaal Mus.* iii. 122. 1912

(Roots decoction for cough, pneumonia, tuberculosis.)

Hernandia L. Hernandiaceae

After the Spanish botanist Francisco Hernández, 1517–1587 (Toledo, Spain), physician to King Philip II of Spain, naturalist, 1570–1577 in Mexico studied the flora and fauna. See Francisco Hernández, *Obras completas*. Mexico City 1959–1966; Denis Rhodes, *Catalogue of books printed in Spain and of Spanish books printed elsewhere in Europe before 1601 now in the British Library*. London 1989; Francisco Guerra, *Bibliografía de la Materia Medica Mexicana*. 319 (under Ximenez, 203 fol.) México City 1950; Agustin Jesus Barreiro, “El testamento del Dr. Francisco Hernández.” *Bol. R. Acad. Hist. Madrid*. 94: 475–497. 1929; Carl Linnaeus, *Species Plantarum*. 981. 1753 and *Genera Plantarum*. Ed. 5. 421. 1754; John Alden and Dennis Channing Landis, *European Americana*. New Canaan, Ct. 1980–1988.

Hernandia moerenhoutiana Guillem. subsp. *campanulata* Kubitzki

Pacific, Tonga.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 7: 189. 1837 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 89(1): 128, f. 24. 1969

(Leaves, bark and flowers pounded together and applied to boils.)

in Tonga: pipi, pipitui

Hernandia nymphaeifolia (C. Presl) Kubitzki (*Biasoletia nymphaeifolia* C. Presl; *Hernandia nymphaeifolia* (Presl) Kubitzki; *Hernandia peltata* Meissn.; *Hernandia sonora* Burmann, non L.)

Madagascar, India, Guam. Tree, many-branched, flowers white to pale yellow, persistent calyx

See *Reliquiae Haenkeanae* 2(2): 141–142. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 263. 1864 and *Bot. Jahrb. Syst.* 90: 272. 1970, *Fl. Mascareignes* 154: 1–4. 1982

(Black heartwood to stop bleeding. Leaf paste applied on boils, ulcers, cuts, wounds, and on forehead for headache. Roots and shoots to cure the effects of toxic crabs and fish, and also for healing wounds.)

in English: Jack in the box

in India: min hont, minhont, talo

in Comoros: m'pwata

in Madagascar: barobe, fotabe, morondriaka, tarantana

Hernandia sonora L. (*Hernandezia sonora* (L.) Hoffmanns.; *Hernandia guianensis* Aubl.; *Hernandia ovigera* L.; *Hernandia peltata* Meissn.; *Hernandia peltata* Sessé & Moc.; *Hernandia sonora* Kosterm., non L.)

China, Taiwan. Tree, white flowers, green fruits

See *Species Plantarum* 2: 981. 1753, *Herbarium Amboinense* 14. 1754, *Histoire des plantes de la Guiane Française* 2: 848, pl. 329. 1775, *Verzeichniss der Pflanzenkulturen* 136, 219. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 263. 1864, *Flora Mexicana* 213. 1894 and *Mededeelingen van het Botanisch Museum en Herbarium van de Rijks Universiteit te Utrecht* 25: 45. 1936, *Botanical Bulletin of Academia Sinica* 27: 219–235. 1986, *Fl. Lesser Antilles* 5: 271. 1988

(Bark, seeds and young leaves purgative, emetic, cathartic, anodyne, narcotic. Leaf juice depilatory. Oil used as a hair restorer and for dandruff.)

in English: Jack in the box

in India: min hont, minhot, talo

Herniaria L. Caryophyllaceae (Illecebraceae)

From the Greek *hernia* ‘a rupture’, an allusion to its supposed property of curing a rupture; Latin *hernia*, *ae*; see

Carl Linnaeus, *Species Plantarum*. 1: 218. 1753 and *Genera Plantarum*. Ed. 5. 103. 1754.

Herniaria hirsuta L. (*Herniaria hirsuta* M. Bieb.; *Herniaria hirsuta* d'Urv.; *Herniaria hirsuta* Viv.; *Herniaria incana* sensu Tate)

India, Himalaya.

See *Species Plantarum* 1: 218. 1753, *Encycl.* (Lamarck) 3(1): 124. 1789 and *Acta Fac. Rerum Nat. Univ. Comeniana*, Bot. 23: 1–23. 1974, *Acta Biol. Cracov.*, Ser. Bot. 24: 159–189. 1982, *Bot. Zhurn. SSSR* 69(11): 1563–1564. 1984, *Pakistan Syst.* 3(1): 2. 1987, *Fl. Medit.* 3: 323–333. 1993

(A decoction used for sore throat.)

in English: dense mat-plant, herniaria, rupturewort

in India: chikil

Herpetospermum Wallich ex Hook.f. Cucurbitaceae

From the Greek *herpeton* ‘reptile, creeping’ and *sperma* ‘a seed’, see *Numer. List* [Wallich] n. 6761. 1832 (1831?), *Genera Plantarum* 1: 834. 1867.

Herpetospermum pedunculatum (Ser.) C.B. Clarke (*Bryonia pedunculata* Ser.; *Herpetospermum caudigerum* Wall. ex Chakr.; *Herpetospermum caudigerum* Wall.; *Herpetospermum grandiflorum* Cogn.; *Herpetospermum pedunculatum* C.B. Clarke)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 306. 1828, *Numer. List* [Wallich] n. 6761. 1832 (1831?), *Journal of the Linnean Society, Botany* 15: 115. 1876 [1877 publ. 1876] and *Bulletin de la Société Botanique de Belgique* 42(2): 231. 1906 [*Compt. Rend. Soc. Bot. Belg.*], *Indian Journal of Agricultural Sciences* 16(1): 34. 1946

(Fruits to treat jaundice, hepatitis and indigestion; seeds for gastrointestinal and liver disorders.)

Herrania Goudot Malvaceae (Sterculiaceae)

For the General Pedro Alcántara Herrán, 1800–1872, Secretary of War, from 1841 to 1845 President of the Republic of Nueva Granada. See *Species Plantarum* 2: 782. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 3 2: 230, t. 5. 1844, *Report of the British Association for the Advancement of Science* 1844(2): 71. 1845, Triana, Jose Jeronimo (1834–1890), *Nuevos Jeneros i Especies* 11–12. Neo Granadina, 1853–1854, José Manuel Groot, *Historia eclesiástica y civil de Nueva Granada*. Bogotá 1869–1870, Soledad Acosta de Samper, *Biografías de hombres ilustres o notables, relativas a Colombia*. Bogotá 1883 and *Caldasia* 2(6): 16. 1943, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 622–667. 1956, *J.*

Arnold Arbor. 39(3): 217–295. 1958, *Mol. Phylogenet. Evol.* 44(3): 1141–1154. 2007.

Herrania camargoana R.E. Schult. (*Theobroma camargoanum* (R.E. Schult.) Ducke)

South America, Brazil. Slender, reddish fruits with fleshy pseudospines

See *Bot. Mus. Leaflet*. 14: 120, pl. 29, 32. 1950, *Boletim Técnico do Instituto Agrônomo de Norte* 28: 15. 1954

Bitter seeds stimulant, tonic.)

Herrania nitida (Poepp.) R.E. Schultes (*Abroma nitidum* Poepp. & Endl.; *Abroma nitidum* Poepp.; *Brotobroma aspera* H. Karst. & Triana; *Brotobroma asperum* H. Karst. & Triana; *Herrania aspera* H. Karst.; *Herrania aspera* (H. Karst. & Triana) H. Karst.; *Herrania atrorubens* Huber; *Herrania nitida* var. *aspera* (H. Karst. & Triana) R.E. Schult.; *Theobroma aspera* (H. Karst. & Triana) K. Schum. ex C.J.J. Hall; *Theobroma nitidum* (Poepp. & Endl.) K. Schum.; *Theobroma nitidum* (Poepp.) K. Schum.)

South America.

See *Sp. Pl.* 2: 782. 1753, *Nova Genera ac Species Plantarum* (Poeppig & Endlicher) 3: 73. 1845, *Nuevos Jeneros i Especies* 12. 1854, *Linnaea* 28: 446. 1857, *Flora Brasiliensis* (Martius) 12(3): 72. 1886 and *Bulletin de la Société Botanique de Genève*, Sér. 2 6: 187. 1914[1915], *Cacao*. ed. 2 49. 1932, *Kew Bull.* 1934, 395. 1934, *Caldasia* 2(6): 16. 1943, *Botanical Museum Leaflets* 14: 130. 1950, *Harvard Papers* n. 4: 36–37. 1993

(Roasted powdered seeds added to *manicuera*.)

in Peru: cacao de murciélago, caco de chimbe, mu-se-ge-ke, mu-se-na, palo de chimbe, palo de murciélago

Herreria Ruíz & Pav. Asparagaceae (Herreriaceae, Liliaceae)

After the Spanish agricultural writer Ildephonso de Herrera (or Gabriel Alonso de Herrera, 1470–circa 1539), see *Fl. Peruv. Prodr.*: 48, t. 35. 1794, *Fl. Peruv.* 3: 70. 1802, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 290. 1850.

Herreria bonplandii Lecomte (*Dioscorea tuberosa* Rojas Acosta, nom. illeg.; *Herreria montevidensis* Klotzsch ex Griseb. var. *bonplandii* (Lecomte) L.B. Sm.; *Herreria tuberosa* Rojas Acosta, nom. illeg.; *Herreria tuberosa* (Rojas) Rojas, nom. illeg.)

South America, Paraguay, Argentina.

See *Flora Brasiliensis* 3(1): 24. 1842, *Cat. Hist. Nat. Corrient.*: 86. 1897 and *Bull. Soc. Bot. France* 56: 346. 1909, *Bull. Acad. Int. Géogr. Bot.* 28: 158. 1918, *J. Wash. Acad. Sci.* 48(9): 282. 1958, *Fl. Prov. Buenos Aires.* 4(1): 298. 1968

(Roots antivenereal.)

Hertia Less. Asteraceae

After the German physician Joannes Casimirus Hertius, author of *Discursus de crepitu ossium*. Giessae Hassorum [Giessen] [1704], see also *Dissertatio inauguralis botanico-medica de Pimpinella saxifraga, quam ... praeside ... I.C. Hertio, ... submittit Ludovicus Henricus Leonardus Hilchen* (1702–1753). Giessae [Giessen] [1726], *Synopsis Generum Compositarum* 88. 1832, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 435. 1852.

***Hertia intermedia* Kuntze**

Iran.

See *Revis. Gen. Pl.* 1: 344. 1891 [5 Nov 1891] and *Ann. Missouri Bot. Gard.* 81: 800–808. 1994

(Insect repellent, to relieve headache, stomachache, to treat boils.)

in Pakistan: mangoli, manguli, monguli, mungli

Hesperethusa M. Roem. Rutaceae

Greek *hespera* ‘evening, west’, Theophrastus in his *HP*. 1.6.5 applied *hesperis*, *hesperidos* to the night-scented stock, a species of *Matthiola*, see *Species Plantarum*, Editio Secunda 554. 1762, *Familiarum Naturalium Regni Vegetabilis Monographicae* 1: 31, 38. 1846.

Hesperethusa crenulata (Roxb.) M. Roem. (*Hesperethusa crenulata* M. Roem.; *Limonia crenulata* Roxb.)

India.

See *Plants of the Coast of Coromandel* 1: 60, pl. 86. 1795, *Familiarum Naturalium Regni Vegetabilis Monographicae* 1: 31, 38. 1846

(Ripe fruit pulp given in the treatment of dysentery.)

in India: belsaundha

Hesperocallis A. Gray Asparagaceae (Agavaceae, Liliaceae, Funkiaceae)

Greek *hesperos* ‘western, at evening’ and *kalli* ‘beautiful’, western beauty, see *Proceedings of the American Academy of Arts and Sciences*. Boston, MA. 7: 390. 1868

Hesperocallis undulata A. Gray

North America.

See *Proc. Amer. Acad. Arts.* 7: 390–391. 1868

(Tonic.)

in Spanish: ajo (due to the garlic flavor)

Hesperocnide Torrey Urticaceae

Greek *hespera* ‘evening, west’, *hesperos* ‘western’ and *knide* ‘nettle’, referring to the distribution of some species, see *Reports of explorations and surveys*: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War 4(5): 139–140. 1857.

Hesperocnide tenella Torrey

North America.

See *Pacif. Railr. Rep.* 4(5): 139. 1857 and Woodland, D.W., I.J. Bassett, and C.W. Crompton. “The annual species of stinging nettle (*Hesperocnide* and *Urtica*) in North America.” *Canad. J. Bot.* 54: 374–383. 1976

(Irritant dermatitis.)

in English: western-nettle, western stinging nettle

Hetaeria Blume Orchidaceae

Greek *hetaireia*, *hetairia* ‘a companionship, union, brotherhood’, *hetairos* ‘a comrade, fellow’, referring to similarities with the related genus *Goodyera*, see *Bijdragen tot de flora van Nederlandsch Indië* 8: 409, t. 14. 1825 and *Taxon* 42: 873. 1993.

Hetaeria obliqua Blume (*Dossinia obliqua* Miq.)

Thailand, Borneo, Malesia. Terrestrial, yellow flowers

See *Annales de la Societe Royale d'Agriculture et de Botanique de Gand: Journal d'Horticulture et des Sciences Accessoires* 4: 171. 1848, *Collection des Orchidées* 104, pl. 34, f. 1. 1859 [1858 publ. before Dec 1859], *Flora van Nederlandsch Indië* 3: 731. 1859

(Leaves as a poultice to heal sores.)

Malayan name: poko tambah hutan

Heteranthera Ruiz & Pavón Pontederiaceae

Greek *heteros* ‘different, variable, varying’ and *anthera* ‘anther’, referring to the anthers of most species, one is different in shape from the other two; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 436. Ansbach 1852 and *Fl. Paraguay* [7:] 1–28. 1987, *Fl. Ecuador* 29: 1–20. 1987, *Monogr. Syst. Bot. Missouri Bot. Gard.* 3: 2177–2180. 2001

Heteranthera reniformis Ruiz & Pav. (*Buchosia aquatica* Vell.; *Buchozia aquatica* Vell.; *Heterandra reniformis* P. Beauv.; *Heterandra reniformis* (Ruiz & Pav.) P. Beauv.; *Heteranthera acuta* Vahl, nom. illeg.; *Heteranthera acuta* Willd.; *Heteranthera pubescens* Vahl; *Heteranthera reniformis* var. *conjungens* O. Schwarz; *Heteranthera virginica* (Pers.) Steud.; *Heteranthera virginicus* Steud., nom. inval.;

Leptanthus peruvianus Pers.; *Leptanthus reniformis* (Ruiz & Pav.) Michx.; *Leptanthus reniformis* (P. Beauv.) Michx.; *Leptanthus virginicus* Pers.; *Phrynium reniforme* (Ruiz & Pav.) Kuntze; *Phrynium reniforme* var. *acuta* (Vahl) Kuntze; *Phrynium reniforme* var. *acutum* (Willd.) Kuntze; *Pontederia azurea* Schult. & Schult.f., nom. illeg.; *Schollera reniformis* (Ruiz & Pav.) Kuntze)

America. Perennial herb

See *Tentamen Florae Germanicae* 1: 165, 170. 1788, *Genera Plantarum* 785. 1791, *Fl. Peruv.* 1: 43, pl. 71, f. a. 1798, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 438. 1801, *Florae Fluminensis* 34. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 2: 42. 1837, *Revisio Generum Plantarum* 1: 719. 1891, *Revisio Generum Plantarum* 3: 318. 1898 and *Beih. Bot. Centralbl.* 42(1): 287. 1926

(Whole plant crushed, soaked in cool water, drunk for coughs and sore throats.)

in English: kidneyleaf mudplantain

Heteromorpha Cham. & Schltld. Apiaceae (Umbelliferae)

From the Greek *heteros* 'different, dissimilar, of another kind, varying' and *morphe* 'form, shape', *heteromorphos* 'of different or diverse form', an allusion to the variability between species; see *Linnaea* 1: 385, 398, t. 5. 1826 and T.H. Arnold & B.C. de Wet, eds., *Plants of Southern Africa: Names and Distribution*. 529. National Botanical Institute, Pretoria 1993.

Heteromorpha abyssinica Hochst. ex A. Rich. (*Annesorhiza abyssinica* A. Braun; *Bupleurum arborescens* Jacq.; *Bupleurum arborescens* Thunb., nom. illeg. hom.; *Bupleurum trifoliatum* Wendl. & Bartl.; *Bupleurum trifoliatum* Wendl.; *Franchetella arborescens* (Cham. & Schltld.) Kuntze; *Franchetella arborescens* Kuntze; *Franchetella arborescens* var. *abyssinica* (Hochst. ex A. Rich.) Kuntze; *Heteromorpha abyssinica* Hochst.; *Heteromorpha arborescens* Cham. & Schltld.; *Heteromorpha arborescens* var. *abyssinica* (Hochst. ex A. Rich.) H. Wolff; *Heteromorpha trifoliata* (H.L. Wendl.) Ecklon & Zeyher; *Heteromorpha trifoliata* Eckl. & Zeyh.; *Tenoria arborescens* Spreng.)

South Africa, Ethiopia. Shrub or small tree, weak, multi-branched or sparsely branched, stems purple-brown with conspicuous scars, bark reddish-brown peeling in papery flakes, inflorescence green-yellow, fruit light green tinged with red-purple, at edge of water, in forest, among grasses in woodland, at forest margin, in wooded grassland, in bushy rocky land, at edge of riverine forest

See *Species Plantarum* 1: 236–239. 1753, *Collectanea* 2: 343. 1788, *Prodromus Plantarum Capensium*, ... 50. 1794, *Beiträge zur Botanik* 2: 13. 1825, *Linnaea* 1: 385, t. v, f. 2. 1826, *Enumeratio Plantarum Africae Australis*

Extratropicae [Ecklon & Zeyher] 3: 342. 1837, *Flora* 24(1, Intelligenzbl.): 28. 1841, *Tentamen Florae Abyssinicae* ... 1: 325. 1848, *Notes Botaniques Sapotacees* 1: 24–25. 1890, *Revisio Generum Plantarum* 1: 267. 1891, *Revisio Generum Plantarum* 3: 113. 1898 and *Das Pflanzenreich* IV 228(Heft 43): 35. 1910

(Poisonous to cattle and sheep. Powdered dried root as an anthelmintic. Leaves used for scrofula.)

in English: live long, parsley tree, parsnip tree

in Southern Africa: kraaihout (= like a crow's nest), stinkbos, papierboom, wildepieterselie, wildepieterseliebos; serethe, mpyeya (Ngwaketse dialect, Botswana); mula-notshi (= fed on by bees), muthatha-vhanna (Venda); muBagan-dura, muHinghani, muMingani (Shona); makatlala, mongkhoane, monkhoane, phela (South Sotho); umBangandlala (Swazi); umBangandlela (= cause of hunger), umBangandlala (Xhosa); umBangandlala (Zulu)

in S. Rhodesia: umBangandhlala, muMinghani, muBangandura

in Tanzania: enguyainei, enguyaine, eniguyainei, olkuyaine, orukuyeni

Heteropanax Seemann Araliaceae

From the Greek *heteros* 'diverse, dissimilar, various' plus *Panax*, see *Flora Vitiensis* 114. 1866.

Heteropanax brevipedicellatus H.L. Li

China.

See *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 2: 94–95. 1942

(Tonic.)

in China: duan geng huang san feng

Heteropanax chinensis (Dunn) H.L. Li (*Heteropanax fragrans* (Roxburgh) Seemann var. *chinensis* Dunn)

China, India.

See *Journal of the Linnean Society, Botany* 38(267): 360–361. 1908, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 2: 95. 1942

(Tonic.)

in China: hua huang san feng

Heteropanax fragrans (Roxburgh) Seemann (*Aralia fragrans* (Roxb.) G. Don ex Loud.; *Aralia fragrans* G. Don. ex Loudon; *Aralia fragrans* (D. Don) Jebb & J. Wen; *Heteropanax fragrans* Seem.; *Heteropanax fragrans* (Roxb. ex DC.) Seem.; *Heteropanax fragrans* var. *attenuatus* C.B. Clarke; *Heteropanax fragrans* var. *ferrugineus* Y.F. Deng; *Heteropanax fragrans* var. *subcordatus* C.B. Clarke; *Heteropanax subcordatus* sensu H.L. Li, non C.B. Clarke; *Panax fragrans* Roxburgh ex DC.; *Panax fragrans* Roxburgh)

China, India. Tree, yellow fragrant flowers in umbels

See *Hortus Bengalensis*, or a catalogue ... 21. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 254. 1830, *Fl. Ind.* ed. 1832, 2: 76. 1832, Loudon, J. C. (John Claudius) (1783–1843), *Loudon's Hortus Britannicus. A catalogue...* ed. 2, 1: 112. London, 1832, Seemann, Berthold (1825–1871), *Flora Vitiensis* 114. London, 1865–1873, *The Flora of British India* 2(6): 735. 1879 and *Adansonia* sér. 3, 23(2): 312. 2001, *Acta Botanica Yunnanica* 24(5): 605. 2002

(Bark powder mixed with coconut oil to make a paste applied for itching. Roots stimulant, tonic. A decoction of flowers and stems of *Vanda teres* with flowers of *Heteropanax fragrans* given in general debility, also applied on forehead as a cooling agent.)

in China: huang san feng

in India: bhatghila, kainsra-asing, kanjaur-araung

***Heteropanax nitentifolius* G. Hoo**

China.

See *Acta Phytotaxonomica Sinica*, Additamentum 1: 166–167. 1965

(Astringent, stomachic, stimulant.)

in China: liang ye huang san feng

***Heteropanax yunnanensis* G. Hoo (C. Ho = G. Hoo)**

China.

See *Acta Phytotaxonomica Sinica*, Additamentum 1: 167. 1965

(Stimulant.)

in China: yun nan huang san feng

Heteropogon DC. Bignoniaceae

From the Greek *heteros* ‘different, dissimilar’ and *phragma* ‘a hedge, a fence, screen’, referring to the partition in the fruit, see *Bibliothèque Universelle de Genève* sér. 2. 17: 129. 1838.

***Heteropogon quadriloculare* (Roxb.) K. Schum.** (*Bignonia quadrilocularis* Roxb.; *Heteropogon roxburghii* DC.; *Heteropogon roxburghii* (Spreng.) DC.)

Sri Lanka, India.

See *Species Plantarum* 2: 622–625. 1753, *Plants of the Coast of Coromandel* 2: 24. 1799, s, editio decima sexta 2: 835. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 210. 1845, *Die Natürlichen Pflanzenfamilien* 4(3b): 243. 1895

(Wood paste applied on skin diseases. A drink made from the roots decoction used for viper bite. Sacred plant, magico-religious beliefs, to keep away the snakes.)

in India: udludamaram, varas, warrus, waruas

Heteropogon Pers. Poaceae (Gramineae)

From the Greek *heteros* ‘different, variable, other’ and *pogon* ‘a beard’, the spikelets are awned and awnless, awned female-fertile and awnless male-fertile, related to *Elymandra*; see *Species Plantarum* 2: 1045. 1753, Christiaan Hendrik Persoon (1761/1762–1836), *Synopsis Plantarum*, seu enchiridium botanicum complectens enumerationem systematicam specierum hucusque cognitorum ... 2: 533. Parisiis lutetiorum [Paris] 1805–1807, *Bulletin Botanique [Genève]* 1: 221. 1830, *Die Natürlichen Pflanzenfamilien* 2(2): 29. 1887 and *N. Amer. Fl.* 17: 127. 1912, *Kew Bulletin* 1954: 74. 1954, *Bulletin of the Botanical Survey of India* 30(1–4): 120–125. 1988, *Flora Mesoamericana* 6: 395. 1994, *Memoirs of the New York Botanical Garden* 78: 509–540. 1996, *Am. J. Bot.* 88: 1993–2012. 2001, *Contributions from the United States National Herbarium* 46: 248–249, 607. 2003.

in Indonesia: bejeng-benjeng, merakan

in Japan: aka-hige-gaya (= red-bearded grass)

in the Philippines Isl.: sibat-sibatan

in Sri Lanka: itana

in Thailand: lem, ya laem, yaa laem, yaa lem, ya-lem, yaa luuk nong, ya luk nong, ya nuat ruesi, yaa nuat ruese, ya-nuatrusi, yaa phung chuu, ya phung chu, yaa rang tak kataen, yaa rang takka taen, ya rang takkataen

in Mexico: aceitilla, barba negra, cabeza enmarañada, guixi biia, quixi pija, retorcido moreno, tola, zacate aceitillo, zacate colorado

in Hawaii: pili, pili grass, lule, native pili grass

Heteropsis Kunth Araceae

Greek *heteros* 'different, variable, other, diverse' and *opsis* 'like, resembling, resemblance'; see D.H. Nicolson,

“Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Heteropsis flexuosa (Kunth) G.S. Bunting var. *flexuosa* (*Heteropsis jenmanii* Oliv.)

Trop. South America. Growing on long trees, long aerial roots

See *Revista Fac. Agric. Univ. Centr. Venezuela* 10: 201. 1979

(Medicinal bark.)

in Brazil: cipó titica

Heteropterys Kunth Malpighiaceae

From the Greek *heteros* ‘different, variable, other, diverse’ and *pteron* ‘a wing’, referring to the winged samara, see *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 253–312. 2007.

Heteropterys leona (Cav.) Exell (*Banisteria leona* Cav.; *Banisteria magnoliaefolia* Desv. ex Ham.; *Banisteria magnoliifolia* Ham.; *Banisteria magnoliifolia* Desv. ex Ham.; *Banisteria multiflora* Boj. ex A. Juss.; *Banisteria multiflora* DC.; *Banisteria reticulata* (Poir.) C.B. Rob.; *Byrsonima reticulata* (Poir.) DC.; *Byrsonima reticulata* Klotzsch; *Heteropterys africana* A. Juss., nom. illeg. superfl.; *Heteropterys africana* fo. *nigritiana* Nied.; *Heteropterys africana* var. *australis* Nied.; *Heteropterys africana* var. *borealis* Nied.; *Heteropterys multiflora* (DC.) Hochr.; *Heteropterys multiflora* Hochr.; *Heteropterys reticulata* (Poir.) Nied.; *Malpighia reticulata* Poir.)

Tropical Africa. Liana, woody, scrambling, shrub, more or less scandent, leaves coriaceous, fragrant yellow flowers in terminal inflorescences

See *Monadelphiae Classis Dissertationes Decem* 9: 424, t. 247. 1790, *Encyclopédie Méthodique. Botanique ... Supplément* 4: 8. 1816, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 581, 589. 1824, *Prodromus Plantarum Indiae Occidentalis* (Hamilton) 40. 1825, *Ann. Sci. Nat., Bot. sér.* 2, 13: 276, 286. 1840, *Arch. Mus. Par.* iii. (1843) 424. 1843 and *Arbeiten aus dem Botanischen Institut des Königl. Tomé: (with Principe and Annobon)* 123. London: Printed by order of the Trustees of the British Museum, 1944, *Contr. Univ. Michigan Herb.* 23: 35–47. 2001

(Leaves, seeds and pods antiparasitic, febrifuge, analgesic, topical application for headache and fevers.)

Heterosmilax Kunth Smilacaceae

From the Greek *heteros* ‘different, atypical’ and the genus *Smilax* L., see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 270. 1850, *Journal of Botany, British and Foreign* 6: 258. 1868 and *Icones plantarum formosananarum*

nec non et contributiones ad floram formosanam. 9: 124. 1920, *J. Wuhan Bot. Res.* 13(2): 185–187. 1995, *Cathaya* 7: 105–124. 1995.

Heterosmilax japonica Kunth (*Heterosmilax arisanensis* Hayata; *Heterosmilax indica* A. DC.; *Heterosmilax raishaensis* Hayata; *Heterosmilax tsaii* F.T. Wang & T. Tang; *Smilax bockii* Warb.; *Smilax plani-pedunculata* Hayata; *Smilax planipedunculata* Hayata; *Smilax stemonifolia* H. Lév. & Vaniot)

China.

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 270. 1850, *Monographiae Phanerogamarum* 1: 43. 1878 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 259. 1900, Leveille, Augustin Abel Hector (1863–1918), *Liliacées, Amaryllidacées, Iridacées et Hémodoracées de Chine*. 28. Roma, 1905 [Mem. Pontif. Accad. Romana dei Nuovi Lincei, xxiv.], *Journal of the College of Science, Imperial University of Tokyo* 30(1): 361–362. 1911, *Icones plantarum formosananarum nec non et contributiones ad floram formosanam*. 5: 235–236, f. 83. 1915, *Icones plantarum formosananarum nec non et contributiones ad floram formosanam*. 9: 138–140, f. 51. 1920, *Bulletin of the Fan Memorial Institute of Biology* 7(2): 87. 1936, *Arch. Pharm. Res.*, 28: 395–399. 2005

(Antiinflammatory.)

in Japan: karasu-kiba-sankirai

in Okinawa: sanchina

Heterostemma Wight & Arnott Asclepiadaceae (Apocynaceae)

Greek *heteros* ‘different, various, diverse’ and *stemma* ‘a garland, crown’, see *Contributions to the Botany of India* 42. 1834, *Flora* 40: 101. 1857, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 775. 1876, *Hooker’s Icones Plantarum* 12: t. 1191. 1876 and *Bot. J. Linn. Soc.* 101(2): 253. 1989, *Austral. Syst. Bot.* 5: 71–80. 1992.

Heterostemma decanense (Talb.) K. Swarupanandan & J.K. Mangaly (*Oianthus deccanensis* Talbot)

India.

See *Forest Fl. Bombay* ii. 260. 1911, *Bot. J. Linn. Soc.* 101(2): 255. 1989

(Root decoction taken to increase sexual vigour.)

in India: pedda jula paala

Heterostemma piperifolium King & Gamble (*Heterostemma peperifolium* King & Gamble)

Malay Peninsula.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(2): 557. 1908

(Root decoction given for fever in children.)

in India: badobhulan

Heterostemma tanjorensis Wight & Arn. (*Heterostemma tanjorensis* Wight & Arn.)

India.

See *Contributions to the Botany of India* 42. 1834 and *Taxon* 30: 696. 1981

(Magic, ritual, root paste applied on head to drive away evil spirits.)

in India: badobhulan

Heterostemon Desf. Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

From the Greek *heteros* 'different, diverse' and *stemon* 'stamen, thread, filament', referring to the form and length of the stamens, see *Mémoires du Muséum d'Histoire Naturelle* 4: 248. 1818 and *Mem. New York Bot. Gard.* 15(1): 112–128. 1966.

Heterostemon mimosoides Desf.

South America. Perennial non-climbing tree, small tree or shrub, purple flowers

See *Mémoires du Muséum d'Histoire Naturelle* 4: 248, t. 12. 1818

(Powdered flowers for stomachache, stimulant, tonic.)

Heterotheca Cass. Asteraceae

Different cases, from the Greek *heteros* 'different, variable' and *theke* 'a case, ovary, sheath', referring to the shape of the fruits, of the achenes; see A.H.G. Cassini, in *Bulletin des sciences, par la Société Philomatique*. [*Bull. Sci. Soc. Philom. Paris.*] 137. Paris 1817.

Heterotheca inuloides Cass. (*Heterotheca inuloides* Cav. ex Sosa & Gómez Pompa, nom. nud.)

Mexico.

See *Dictionnaire des Sciences Naturelles* [Second edition] 41: 460. 1862 and *Flora de Veracruz* 82: 69. 1994

(Leaves and stem infusion used for skin diseases, ulcers, acne, bruises and infections.)

in English: everlasting, telegraph weed

Heterotheca subaxillaris (Lam.) Britton & Rusby subsp. *latifolia* (Buckley) Semple (*Heterotheca latifolia* Buckley; *Heterotheca latifolia* var. *arkansana* B. Wagenkn.; *Heterotheca latifolia* var. *macgregoris* B. Wagenkn.; *Heterotheca psammophila* B. Wagenkn.; *Heterotheca subaxillaris* var. *latifolia* (Buckley) Gandhi & R.D. Thomas; *Heterotheca subaxillaris* var. *petiolaris* Benke)

North America.

See *Proceedings of the Academy of Natural Sciences of Philadelphia* 13(12): 459. 1861[1862], *Transactions of the New York Academy of Sciences* 7(1–2): 10. 1887 and *Asteraceae of Louisiana* 110. 1989, *Sida* 21(2): 759. 2004

(Used for burns, rash, itchy feet. Plant decoction drunk to ease menstrual pains.)

in English: arnica, camphor plant

Heterotis Benth. Melastomataceae

From the Greek *heteros* 'different' plus the genus *Dissotis* Benth., see *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 394–574. 2007

Heterotis buettneriana (Cogn. ex Büttner) Jacq.-Fél. (*Dissotis buettneriana* (Cogn. ex Büttner) Jacq.-Fél.; *Dissotis plumosa* (D. Don) Hook. f.; *Dissotis rotundifolia* (Sm.) Triana; *Heterotis plumosa* (D. Don) Benth.; *Heterotis rotundifolia* (Sm.) Jacq.-Fél.; *Heterotis rotundifolia* var. *buettneriana*; *Melastoma plumosum* D. Don; *Osbeckia buettneriana* Cogn. ex Büttner; *Osbeckia rotundifolia* Sm.; *Osbeckia rubropilosa* De Wild.)

Nigeria. Shrub, straggling, erect, creeping, decumbent or prostrate, spreading, young stems, rooting at nodes, petioles and nerves pink, petals pale pink, wet places, see also *Dissotis*

See *The Cyclopaedia*; or, universal dictionary of arts, ... 25: *Osbeckia* no. 4. 1813, *Memoirs of the Wernerian Natural History Society* 4(2): 291. 1823, *Niger Flora* 348. 1849, *Flora of Tropical Africa* 2: 452. 1871, *Transactions of the Linnean Society of London* 28(1): 58. 1871[1872], *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 31: 95. 1890 and *Plantae Bequaertianae* 1: 378. 1922, *Adansonia* 11(3): 547. 1971, *Adansonia* n.s. 20(4): 417. 1981

(Leaves for stomach troubles, gonorrhoea, diarrhoea, dysentery, poison, eye problems, cough, tuberculosis, yaws, rheumatism. Magic, ritual.)

in English: rockrose

in Congo: olondo

in Guinea: mandafnade

in Senegal: ba poti

in Sierra Leone: ebowa, febungi, felebunbe, legbe, ngaku wui

Heuchera L. Saxifragaceae

For the Austrian-born German botanist Johann Heinrich von Heucher (Joannes Henricus Heucherus), 1677–1747, physician, author of *Ex historia naturali de vegetabilibus magicis*. Wittebergae 1700, *Morbos ex nimio Veneris usu*,

sub Praes. P.G. Sperlingii, publico examini subicit J.H.H. Vitebergae 1700, *Index plantarum horti medici Academiae Vitembergensis*. Vitembergae [Wittenberg] 1711 and *Novi proventus horti medici Academiae Vitembergensis*. Vitembergae 1711. See G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 440. Ansbach 1852 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 168. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 173. 1972, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 125. 1988.

***Heuchera americana* L.**

North America.

See *Species Plantarum* 1: 226. 1753 and *Syst. Bot.* 5: 17–29. 1980, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 19–20. 1995

(Analgesic, astringent, tonic, for dysentery, diarrhea, piles, stomach pain, menstrual troubles, sore mouth, sore eyes, sores.)

in English: American alumroot, black-geranium, rock-geranium

***Heuchera americana* L. var. *hispida* (Pursh) E.F. Wells (*Heuchera hispida* Pursh)**

North America.

See *Flora Americae Septentrionalis*; or, ... 1: 188. 1814[1813] and *Rhodora* 81(828): 576. 1979

(Root decoction as a wash for sore eyes, an infusion for diarrhea; dried root chewed and the juice swallowed for stomach pain.)

in English: hairy alumroot

***Heuchera bracteata* (Torr.) Ser. (*Oreotrys bracteata* (Torr.) Raf.; *Tiarella bracteata* Torr.)**

North America.

See *Annals of the Lyceum of Natural History of New York* 2: 204–205. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 52. 1830, *Atlantic Journal* 1: 145. 1832

(Plant chewed for indigestion, sore gums, toothache.)

in English: bracted alumroot

***Heuchera cylindrica* Douglas**

North America.

See *Flora Boreali-Americana* 1(5): 236–237. 1832

(Roots infusion astringent, drunk for stomachache and diarrhea; decoction of roots taken for tuberculosis.)

in English: alumroot, roundleaf alumroot

Heuchera cylindrica* Douglas var. *alpina* S. Watson (*Heuchera alpina* (S. Watson) Blank.; *Heuchera ovalifolia

var. *alpina* Rosend.; *Heuchera ovalifolia* var. *alpina* (S. Watson) Rosend.)

North America.

See *United States Geological Exploration of the Fortieth Parallel. Botany* 96. 1871 and *Science Studies*, Montana College of Agriculture and Mechanical Arts, Botany 1(2): 62. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37, Beibl. 83: 81. 1905

(Poultice of powdered roots, antirheumatic, applied for poison ivy.)

in English: alpine alumroot

***Heuchera cylindrica* Douglas var. *glabella* (Torr. & A. Gray) Wheelock (*Heuchera glabella* Torr. & A. Gray)**

North America.

See *A Flora of North America: containing ...* 1(4): 581. 1840, *Bulletin of the Torrey Botanical Club* 17(6): 203. 1890

(Roots used for sores, snakebites, eyewash.)

in English: beautiful alumroot

***Heuchera flabellifolia* Rydb.**

North America.

See *North American Flora* 22(2): 115. 1905

(Roots decoction drunk for stomachaches, colic.)

in English: Bridger Mountain alumroot

***Heuchera glabra* Willd. ex Roemer & J.A. Schultes**

North America.

See *Systema Vegetabilium* 6: 216. 1820

(For venereal diseases.)

in English: alpine heuchera

***Heuchera micrantha* Douglas ex Lindl.**

North America.

See *Edwards's Botanical Register* 15: pl. 1302. 1830

(Leaves and roots made into a paste and used for sores, cuts, wounds. Roots infusion drunk for liver trouble, jaundice, sore throat.)

in English: crevice alumroot

***Heuchera novamexicana* Wheelock (*Heuchera novomexicana* Wheelock)**

North America.

See *Bulletin of the Torrey Botanical Club* 17(6): 200. 1890

(Root poultice applied to fractures, infected sores and swellings.)

in English: New Mexico alumroot

Heuchera parviflora Bartl. (*Heuchera parviflora* Nutt.)

North America.

See *Index Seminum* [Goettingen] 1838: 4. 1838

(Root poultice applied to fractures, infected sores and swellings.)

in English: littleflower alumroot

Heuchera parvifolia Nutt. ex Torr. & Gray

North America.

See *A Flora of North America*: containing ... 1(4): 581–582. 1840

(Roots to ease delivery of placenta, and for infected sores, rat bites, wounds, rheumatism and swellings, stomachache, venereal diseases. Veterinary medicine, roots infusion given to horses for respiratory troubles.)

in English: littleleaf alumroot

Heuchera richardsonii R. Br. (*Heuchera hispida* Pursh var. *richardsonii* (R. Br.) Rydb.)

North America.

See *Species Plantarum* 1: 226. 1753, *Flora Americae Septentrionalis*; or, ... 1: 188. 1814 [1813], *Narrative of a Journey to the Shores of the Polar Sea* 766, pl. 29. 1823 and *Manual of the Flora of the Northern States and Canada* 483. 1901, *Systematic Botany* 5: 17–29. 1980, *Taxon* 31(2): 344–360. 1982, *Systematic Botany Monographs* 3: 45–121. 1984

(Roots chewed for stomachache and diarrhea, or an infusion drunk.)

in English: Richardson's alumroot

Heuchera rubescens Torr. (*Heuchera clutei* A. Nelson)

North America.

See *An Expedition to the Valley of the Great Salt Lake of Utah* 388, pl. 5. 1852 and *American Botanist* 28: 22. 1922

(Roots decoction or infusion astringent, tonic, febrifuge, for diarrhea, colic, venereal disease, fevers, heart trouble, liver trouble, biliousness. Veterinary medicine, leaves decoction as a wash for horses' saddle sores.)

in English: pink alumroot

Hevea Aublet Euphorbiaceae

From *hevé*, a Guyanan name for *Hevea guianensis*.

Hevea brasiliensis (Willd. ex A. Juss.) Müll.Arg. (*Hevea brasiliensis* (A. Juss.) Müll.Arg.; *Hevea brasiliensis* (Kunth) Müll.Arg.; *Hevea brasiliensis* f. *accreana* (Ule) Ducke; *Hevea brasiliensis* f. *angustifolia* (Ule ex Huber) Ule; *Hevea brasiliensis* f. *latifolia* (Ule ex Huber) Ule; *Hevea brasiliensis* fo. *randiana* (Huber) Ducke; *Hevea brasiliensis* mut. *granthamii*

Barth; *Hevea brasiliensis* var. *accreana* Ule; *Hevea brasiliensis* var. *angustifolia* Ule ex Huber; *Hevea brasiliensis* var. *janeirensis* (Müll.Arg.) Pax; *Hevea brasiliensis* var. *latifolia* Ule ex Huber; *Hevea brasiliensis* var. *randiana* (Huber) Pax; *Hevea brasiliensis* var. *stylosa* Huber; *Hevea camargoana* Pires; *Hevea granthamii* Bartlett; *Hevea janeirensis* Müll. Arg.; *Hevea paludosa* Ule; *Hevea randiana* Huber; *Hevea sieberi* Warb.; *Hevea* sp. Eyles; *Siphonia brasiliensis* Willd. ex A. Juss.; *Siphonia brasiliensis* A. Juss.; *Siphonia brasiliensis* Kunth; *Siphonia janeirensis* (Müll.Arg.) O.F. Cook; *Siphonia ridleyana* O.F. Cook)

Tropical America. A deciduous, monoecious tree, extremely polymorphic, well-developed taproot, bole straight, bark smooth to slightly corky, inner bark pale brown with abundant white latex, twigs glabrous, petiole gland reniform, leaves arranged spirally trifoliate, leaflets entire, inflorescence a many-flowered axillary panicle, male and female flowers in the same panicle, female flowers with a green disk at base, fruit an exploding 3-lobed capsule, seeds ovoid, endosperm abundant, seed not normally eaten

See *Histoire des plantes de la Guiane Française* 2: 871, pl. 335. 1775, *Genera Plantarum* 2: 656. 1791, *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen*, tabulis aeneis 18 illustratum 40, pl. 12, pl. 38b, f. 1–6. 1824, *Nova Genera et Species Plantarum* (quarto ed.) 7: 171. 1825, *Linnaea* 34: 204. 1865, *Flora Brasiliensis* 11(2): 706. 1874 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* iv. 636, 1906, *Arquivos do Instituto de Biologia Vegetal* 2: 224. 1935, *Proceedings of the Indian Science Congress Association* 76(3, vi): 183. 1989, *Cytologia* 55: 225–229, 547–551. 1990, *Journal of Cytology and Genetics* 30(2): 115–118. 1995, *Cytologia* 64: 229–234. 1999, *International Archives of Allergy and Immunology* 136:90–97. 2005

(*Hevea brasiliensis* latex allergens, latex allergy.)

in English: natural rubber, para rubber, rubber

in Thailand: yang phara

in Vietnam: cao su

Hewittia Wight & Arnott Convolvulaceae

After the English zoologist John Hewitt, 1880–1961 (d. Grahamstown, S. Africa), naturalist, 1905–1908 Curator

of the Sarawak Museum, from 1910 to 1958 Director of the Albany Museum (Grahamstown), his writings include “Notes on the flora and fauna of Sarawak, (considered more especially in comparison with that of South Africa)” in *S. Afr. J. Sci.* 6: 203–212. 1910, [An illustrated] *Guide to the Exhibited Collections of the Albany Museum*. Grahamstown 1912 and *A Guide to the Vertebrate Fauna of the Eastern Cape Province*. Grahamstown 1931; see Casey A. Wood, *An Introduction to the Literature of Vertebrate Zoology*. Based chiefly on titles in the Blacker Library of Zoology ... and other libraries of McGill University, Montreal. London 1931, *Candollea* 14: 11–60. 1952, *Bothalia* 26(1): 46–50. 1996.

Hewittia malabarica (L.) Suresh (*Convolvulus bicolor* Vahl, nom. illeg.; *Convolvulus bicolor* Lam.; *Convolvulus bracteatus* Vahl; *Convolvulus malabaricus* L.; *Convolvulus scandens* J. König ex Milne; *Convolvulus sublobatus* L.f.; *Hewittia bicolor* Wight & Arn.; *Hewittia bicolor* (Vahl) Wight & Arnott; *Hewittia scandens* (J. König ex Milne) Mabb.; *Hewittia sublobata* (L.f.) Kuntze; *Shuterea bicolor* Choisy; *Shuterea sublobata* (L.f.) House)

Tropical Africa, Asia and Polynesia. Climbing or prostrate perennial herb with slender stem, inflorescence an axillary bracteate cyme, corolla campanulate to funnel-shaped pale yellow or white with a purple centre, pilose capsule, leaves as a cooked vegetable, close to *Convolvulus*

See *Species Plantarum* 1: 155. 1753, *Supplementum Plantarum* 135. 1781[1782], *Symbolae Botanicae*, ... 3: 25. 1794, *Madras Journal of Literature and Science* 1(5): 22. 1837, *Revisio Generum Plantarum* 2: 441. 1891 and *Bulletin of the Torrey Botanical Club* 33: 318. 1906, *Taxon* 29(5–6): 606. 1980, *An Interpretation of Van Rheede’s Hortus Malabaricus* 88. 1988

(Used in Sidha.)

in English: hewittia, sublobed hewittia

in China: zhu cai teng

in India: paymoostey

Hexalobus A. DC. Annonaceae

From the Greek *hex* ‘six’ and *lobos* ‘lobe’, see *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 5: 212. 1832.

Hexalobus monopetalus (A. Rich.) Engl. & Diels (*Hexalobus glabrescens* Hutch. & Dalziel; *Hexalobus glabrescens* Hutch. & Dalz. ex Burt Davy; *Hexalobus huillensis* Engl. & Diels; *Hexalobus huillensis* (Engl. & Diels) Engl. & Diels; *Hexalobus monopetalus* Engl.; *Hexalobus monopetalus* Engl. & Diels; *Hexalobus monopetalus* var. *parvifolius* Baker f.; *Hexalobus senegalensis* A. DC.; *Hexalobus tomentosus* A. Chev., Hutch. & Dalziel; *Hexalobus tomentosus* A. Chev.; *Uvaria huillensis* Engl. & Diels; *Uvaria monopetalus* A. Rich.)

Tropical Africa. Shrub semi-deciduous or tree, rounded crown, flowers solitary or in clusters beside leaves not stalked, cream-yellow petals crinkly spider-like joined at the base, red-brown buds, red-black cylindrical capsules soft and fleshy narrowed between seeds, sweet-sour ripe fruit eaten

See *Species Plantarum* 536. 1753, *Genera Plantarum* 283. 1789, *Florae Senegambiae Tentamen* 8, t. 2. 1831, *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 5: 213. 1832 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 56, t. 20/B. 1901, British Museum, Natural History. *Catalogue of the plants collected by Mr. & Mrs. P. A. Talbot in the Oban district South Nigeria* ... 5. 1913, *Explor. Bot. Afrique Occ. Franc.* i. 10. 1920, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] i. 52. 1927, *Bulletin of Miscellaneous Information Kew* 1927: 152. 1927

(Stem bark and roots antifungal, antiinflammation, anti-plasmodial, used for the treatment of gonorrhoea, fevers, mouth infection.)

in English: baboon’s breakfast, Shakama plum, wild custard-apple

in Nigeria: kelli (Fula); ohun-egbo (Igbo)

in Southern Africa: bastersuikerappel, shakama pruum; nxakama (Tsonga); muhuhuma (Venda)

in Tanzania: mfiwi, mfyuwi, mkungu mwali, mkungumwale, mkuwa

in Togo: tschabola buanda, tumbalaka

in W. Africa: fuganyan, nfuganinje, nfuganyan, yaco

Hexalobus salicifolius Engl. (*Hexalobus crispiflorus* A. Rich.; *Hexalobus crispiflorus* var. *angustifolia* Robyns & Ghesq.; *Hexalobus grandiflorus* Benth.; *Hexalobus lujae* De Wild.; *Hexalobus lujai* De Wild.; *Hexalobus mbula* Exell)

Gabon, Cameroon.

See *Histoire Physique, Politique et Naturelle de l’Ile de Cuba ... Botanique. — Plantes Vasculaires* 1: 43. 1845, *Transactions of the Linnean Society of London* 23(3). 1862 and *Bull. Jard. Bot. État Bruxelles* 4: 389. 1914, *Journal of Botany, British and Foreign* 70(Suppl.): 206–207. 1932, *African Study Monographs*, 23(2): 47–64. June 2002, *Phytochemistry* 64(7): 1269–1275. 2003

(*Hexalobus crispiflorus* antifungal, anti-plasmodial, used for the treatment of gonorrhoea.)

in Cameroon: chungé, evota, leoue, mimpanda, ovey, owe, pota

in Central Africa: bofuafua na ebare, etutu, inaolo a boniningo, kondolio, kwaraka, kpakasa, mbula-ndombe, mukobakoba, owui, evota, minpanda, niok, owé, pogo, mos-some, lapawe, siélebé

in Gabon: evoma, mouvounda, movouanda, ovonda, ovounda, owounda, owui

in Ivory Coast: siélébé, sieleke

in Nigeria: lapawe, oji-ogoda; lapawe, apara (Yoruba); oji ogoda (Igbo)

in Yoruba: abado, abaduro, apara

Hexastylis Raf. Aristolochiaceae

From the Greek *hex* 'six' and *stylos* 'style'; see C.S. Rafinesque, *Neogenyton*, or Indication of Sixty-Six New Genera of Plants of North America. 3. 1825 and *Flora Telluriana*. 4: 99. 1836 [1838] and E.D. Merrill, *Index Rafinesquianus*. 115. 1949.

Hexastylis arifolia (Michaux) Small (*Asarum arifolium* Michaux; *Hexastylis arifolia* Small)

North America. Perennial herb, see also *Asarum*

See *Species Plantarum* 1: 442. 1753, *Fl. Bor.-Amer.* 1: 279–280. 1803, *Neogenyton* 3. 1825, *Bull. Torrey Bot. Club* 24: 334. 1897, *J. Elisha Mitchell Sci. Soc.* 14: 35–36. 1897 and *Fl. S.E. U.S.* 1132. 1903, *Brittonia* 8: 268. 1957

(For stomach pains, miscellaneous pains, heart trouble and backaches, whooping cough and asthma.)

in English: littlebrownjug

Hexastylis arifolia (Michaux) Small var. ***arifolia*** (*Asarum arifolium* Michaux)

North America. Perennial herb, see also *Asarum*

See *Species Plantarum* 1: 442. 1753, *Fl. Bor.-Amer.* 1: 279–280. 1803, *Neogenyton* 3. 1825, *Bull. Torrey Bot. Club* 24: 334. 1897, *J. Elisha Mitchell Sci. Soc.* 14: 35–36. 1897 and *Fl. S.E. U.S.* 1132. 1903, *Brittonia* 8: 268. 1957

(For stomach pains, miscellaneous pains, heart troubles and backaches, whooping cough and asthma.)

in English: littlebrownjug

Hexastylis virginica (Linnaeus) Small (*Asarum memmingeri* Ashe; *Asarum virginicum* Linnaeus; *Hexastylis memmingeri* (Ashe) Small; *Hexastylis virginica* Small in Britton; *Hexastylis virginica* Small)

North America. Perennial herb

See *Species Plantarum* 1: 442. 1753, *Neogenyton* 3. 1825 and *Manual of the Flora of the Northern States and Canada* 348. 1901, *Fl. S.E. U.S.* 1131. 1903s

(Hemostat, styptic.)

in English: Virginia heartleaf

Heynea Roxburgh ex Sims Meliaceae

Named after the German (Moravian) missionary Benjamin Heyne, 1770–1819 (Madras, India), physician, botanist, plant collector, from 1802 to 1808 Superintendent of the Bangalore

Gardens, 1813 Fellow of the Linnean Society, wrote *Tracts, historical and statistical, on India*, with journals of several tours through various parts of the Peninsula; also an account of Sumatra, in a series of letters. London 1814. See *Botanical Magazine* 41: pl. 1738. 1815, [Benjamin Heyne], *An Examination of so much of the Tracts, historical and statistical, on India*, etc. by B.H. ... as relates to the accounts of Sumatra, with various notices on the subjects of *Cannibalism*, *Slavery*, etc. By an inhabitant of Fort Marlborough. London 1818, Albrecht Wilhelm Roth (1757–1834), *Novae plantarum species praesertim Indiae orientalis*. Ex collectione doct. Benj. Heynii. 292. Halberstadii 1821 and M. Archer, *Natural History Drawings in the India Office Library*. 27–28, 79–80. London 1962, Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965, Stafleu and Cowan, *Taxonomic Literature*. 2: 188. 1979, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. London 1994, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.

Heynea trijuga Roxb. (*Heynea trijuga* var. *microcarpa* Pierre; *Heynea trijuga* var. *pilosula* C. DC.; *Trichilia connaroides* (Wight & Arn.) Benth.; *Trichilia connaroides* var. *connaroides*; *Trichilia connaroides* var. *microcarpa* (Pierre) Benth.; *Walsura trijuga* (Roxb.) Kurz; *Walsura trijuga* var. *microcarpa* (Pierre) S.Y. Hu; *Zanthoxylum connaroides* Wight & Arn.)

India. Tree, dark brown bark shallowly cracked, leaves pinately compound with a terminal leaflet, leaflets opposite, young leaves red, mature leaves dark green, small white flowers in spreading flat-topped clusters at the ends of twigs and in upper leaf axils, bright red fruit globose splitting into 2 sections

See *Botanical Magazine* 41: pl. 1738. 1815, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 148. 1834, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 44(2): 148. 1875, *For. Fl. Brit. Burma* 1: 225, 1877, *Monographiae Phanerogamarum* 1: 714. 1878, *Flore Forestière de la Cochinchine* pl. 352. 1885 and *Journal of the Arnold Arboretum* 5(4): 229. 1924, *Acta Botanica Neerlandica* 11: 13, 17. 1962

(Leaf paste applied for skin eruptions. Sacred, ceremonial, a holy tree, cutting it is a taboo.)

in India: kedumbu, kozhi penali, pedda garugudu

Hibiscus L. Malvaceae

Latin *hibiscum*, also *ebiscum* and *hibiscus*, *i* 'the marsh-mallow, *Althaea officinalis* L.' (Plinius), Greek *ebiskos* or *ibiskos* 'mallow or mistletoe-like, with a marsh-mallow twig', used by Dioscorides to indicate a mallow or some other plant group where all the members have either sticky mucilaginous parts

or alternatively pliable rush-like stems that may be used for making baskets (“*fiscellam textit hibisco*” Vergilius); see Carl Linnaeus, *Species Plantarum*. 2: 693. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Genera Plantarum*. Ed. 5. 310. 1754, *Opera varia*, in quibus continentur *Fundamenta botanica, Sponsalia Plantarum, et Systema naturae ...* 241. Lucae, Juntini, 1758, Schäffer, Jacob Christian (1718–1790), *Botanica expeditior* 34, 78. Ratisbonae, 1760, *Familles des Plantes* 2: 401. 1763, *Flora Carniolica*, Editio Secunda 2: 45. 1772, *Hortus Botanicus Vindobonensis* 3: 11–12. 1776, Medikus, Friedrich Kasimir (1736–1808), *Ueber einige künstliche Geschlechter aus der Malvenfamilie, denn der Klasse der Monadelphien*. Mannheim: In der Neuen Hof- und akademischen Buchhandlung, 1787, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 447–448, 452–454. 1824, *Flora Brasiliae Meridionalis* (quarto ed.) 1: ed. fol. 198, ed. qu. 255. 1825, Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Conspectus regni vegetabilis per gradus naturales evoluti*. 202. Geogr. Lisboa* ser. 2 9–10: 608. 1881 and *Fieldiana, Bot.* 24(6): 324–386. 1949, Pietro Bubani, *Flora Virgiliana*. 62–63. [Ristampa dell’edizione di Bologna 1870] Bologna 1978, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 538. 1983, *Systematic Botany Monographs* 25: 470–471. 1988, *Abelmoschus: a taxonomical and cytogenetical overview*. In: IBPGR. Report of an international workshop on okra genetic resources, held at the National Bureau for Plant Genetic Resources (NBPGR), New Delhi, India, 8–12 October 1990. International Crop Network Series 5. International Board for Plant Genetic Resources (IBPGR), Rome, Italy. pp. 52–68. 1991, *Contributions from the University of Michigan Herbarium* 23: 225–270. 2001, Verdcourt, B. & Mwachala, G.M., 2009. *Malvaceae*. In: Beentje, H.J. & Ghazanfar, S.A. (Editors). *Flora of Tropical East Africa*. Royal Botanic Gardens, Kew, Richmond, United Kingdom. 2009. Taxonomical confusion, thus literature has to be interpreted with care.

Hibiscus acetosella Welw. ex Hiern (*Hibiscus acetosella* Welw. ex Ficalho, nomen nudum; *Hibiscus acetosella* Welw.; *Hibiscus cannabinus* Hochr., non L.; *Hibiscus eetveldeanus* De Wild. & T. Durand; *Hibiscus eetveldianus* De Wildeman & Dur.; *Hibiscus surattensis* L. var. *eetveldeanus* (De Wild. & T. Durand) Hochr.)

East and South-tropical Africa, Angola. Herb, decumbent, shrub or subshrub, annual or perennial, sometimes suffruticose, non-prickly stems, leaves alternate with narrow red serrated margins, showy purple-red or lemon-yellow flowers solitary axillary, hispid papery capsule, dry brown seeds, leaves eaten in small amount as a vegetable or salad, very similar to *Hibiscus cannabinus* L., possibly originating from hybridization between *Hibiscus asper* Hook.f. and *Hibiscus surattensis* L.

See *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853—61* 1: 73. 1896

(Mucilaginous leaves decoction or infusion for anemia; leaves infusion for washing babies who have body pains. Lactation stimulant. Veterinary medicine.)

in English: African rosemallow, cranberry hibiscus, false roselle, red-leaved hibiscus

in Angola: use-ua-ngoje

in Congo: kangao (ka mesongo), tongao (ta mesongo)

in Malawi: limanda, linyololo (this name used for all plants with sticky leaves), lumanda

in Tanzania: kololwe, lumaka

Hibiscus articulatus Hochst. ex A. Rich. var. *articulatus*

East Africa, Ivory Coast. Trailing, hispid, suberect, woody rhizome, white or yellow flowers, slightly hairy capsules

See *Tentamen Florae Abyssinicae ...* 1: 60. 1847

(A remedy for stomach troubles.)

Hibiscus asper Hook. f. (*Abelmoschus verrucosus* (Guill. & Perr.) Walp.; *Furcaria cavanillesii* Kostel.; *Hibiscus asper* var. *punctatus* (A. Rich.) Berhaut; *Hibiscus cannabinus* L.; *Hibiscus cannabinus* var. *chevalieri* Hochr.; *Hibiscus cannabinus* var. *punctatus* (A. Rich.) Hochr.; *Hibiscus cannabinus* var. *unidentis* (Lindl.) Hochr.; *Hibiscus cordofanus* Turcz.; *Hibiscus unidentis* Lindl.; *Hibiscus verrucosus* Guill. & Perr.; *Hibiscus verrucosus* var. *punctatus* A. Rich.; *Ketmia glandulosa* Moench)

West Africa. Herb, perennial, shrub, erect, prickly, stem with small spine-tipped tubercles, petals yellow with red base inside, leaves and flowers eaten, fodder plant, in savanna, considered conspecific with *Hibiscus cannabinus*
