See *Plantas Hartwegianas imprimis Mexicanas* 15. 1839, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 606. 1859 and *Contributions from the United States National Herbarium* 16(4): 117. 1913

(To cure toothache a decoction of the stem cooked in water held in the mouth.)

Aristolochia californica Torr. (*Isotrema californica* (Torr.) Huber; *Isotrema californicum* (Torr.) H. Huber)

North America. Perennial vine

See *American monthly magazine and critical review* 4: 195. 1819, *Pacif. Railr. Rep.* 4(5): 128. 1856 [1857] and *Mitteilungen der Botanischen Staatssammlung München* 3: 550. 1960

(Decoction taken for colds.)

in English: California dutchman’s pipe

Aristolochia clematitis L.

Europe.

See *Species Plantarum* 2: 960–962. 1753 and *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 25: 1–18. 1976, *Hum. Genet.* 64(2): 131–133. 1983, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Croat. Med. J.* 46(1): 116–125. 2005 [Endemic nephropathy: the case for chronic poisoning by *Aristolochia*.]

(Aristolochic acid, a major constituent of the seeds, plays a central role in the development of endemic nephropathy; well-founded suspicion that aristolochic acid may be a very potent carcinogen. Irritant. *Aristolochia clematitis* as a remedy in purulent infections, wounds and phlebitis.)

Common names: birthwort, vucja stopa

Aristolochia contorta Bunge

China.

See *Enumeratio Plantarum, quas in China Boreali* 58. 1831 and *Bulletin of Botanical Research* 15(2): 199–205, pl. I–III. 1995

(Cough, stomachache, rheumatic arthritis, sore throat, eczema, toothache, snakebites (external use), inflammation of lung.)

Aristolochia daemoninoxia Mast.

South America. Climbing shrub, deeply fissured corky bark

See *Bulletin of Miscellaneous Information Kew* 1906: 6. 1906

(Vine decoction an oral contraceptive for women. An infusion of scrapings of inner bark used for the relief of indigestion, coughs, asthma, as an antispasmodic, and as an enema for treating thrush.)

in Guyana: boyari

Aristolochia debilis Sieb. & Zucc. (*Aristolochia longa* Thunb., nom. illeg., non *Aristolochia longa* L.; *Aristolochia recurvilabra* Hance; *Aristolochia sinarum* Lindley)

China, Japan. Herb, perennial, creeping, slender, glabrous, yellowish brown aromatic root, flowers irregular, fruit a rounded capsule 6-valved, winged compressed seeds, at forest edges

See *Flora Japonica, ...* 144. 1784, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 197. 1846, *Gardener's Chronicle & Agricultural Gazette* 1850: 708. 1850, *London Journal of Botany* 11: 75. 1873 and *Acta Phytotaxonomica et Geobotanica* 43: 27–30. 1992, *Bulletin of Botanical Research* 15(2): 199–205, pl. I–III. 1995, *Pharm. World Sci.* 20(1): 43–44. 1998 [Acute hepatitis in a patient using a Chinese herbal tea—a case report.], *Phytomedicine*. 14(4): 273–279. 2007

(Three herbs, madouling, qingmuxiang and tianxianteng, derived respectively from the fruit, root and stem of *Aristolochia debilis*: cough, stomachache, rheumatic arthritis, sore throat, eczema, toothache, snakebites (external use), inflammation of lung.)

in English: slender dutchman's pipe

in China: ma dou ling

Aristolochia disticha Mast.

Brazil. Climber

See *Flora Brasiliensis* 4: 110. 1875

(Stem infusion for diarrhea and stomachache.)

Aristolochia fangchi Y.C. Wu ex L.D. Chow & S.M. Hwang
China.

See *Acta Phytotax. Sin.* 13(2): 108–109, pl. 19. 1975, Nortier J.L., Vanherweghem J.L. “Renal interstitial fibrosis and urothelial carcinoma associated with the use of a Chinese herb (*Aristolochia fangchi*).” *Toxicology*. 181–182: 577–580. 2002, *Flora of China* 5: 264. 2003, *Bulletin et mémoires de l'Académie royale de médecine de Belgique* 161(5): 327–333. 2006, *Phytomedicine*. 14(4): 273–279. 2007

(Roots used as abortifacients, as cures for snakebites, for criminal poisoning. The herb *fangji* refers to the root of either *Aristolochia fangchi*, *Stephania tetrandra* or *Cocculus trilobus*. Nephropathy caused by Chinese plants and aristolochic acids. Exposure to *Aristolochia* species is associated with the development of renal interstitial fibrosis and urothelial cancer in humans.)

in China: guang fang yi, guang fanchi

Aristolochia fordiana Hemsley

China.

See *Journal of Botany, British and Foreign* 23(273): 286. 1885 and *China Journal of Chinese Materia Medica* 22(10): 620–622, 640. 1997

(Used in the treatment of snakebites.)

in China: tong cheng hu

Aristolochia fragrantissima Ruiz (*Aristolochia asperifolia* Ule; *Aristolochia mathewsii* Duch., nom. illeg.; *Aristolochia reticulata* Holton ex Duch.; *Aristolochia reticulata* Seem., nom. illeg.; *Aristolochia reticulata* Nutt.; *Aristolochia sprucei* Mast.; *Aristolochia sprucei* Hoehne; *Howardia fragrantissima* (Ruiz) Klotzsch; *Howardia fragrantissima* Klotzsch)

South America, Peru.

See *Mem. Virt. Bejuco Estrella* 46. 1805, *Transactions of the American Philosophical Society*, new series, 5: 162–163. 1835, *The Botany of the Voyage of H.M.S. ~Herald~* 5: 193. 1854, *Monatsberichte der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 584, 607, 615. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(1): 457, 497. 1864, *Flora Brasiliensis* (Martius) 4(2): 88. 1875 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 47: 121. 1905, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 431–443. 1937, *Fl. Ecuador* 51: 1–42. 1994

(Roots decoction drunk to cure rheumatic pains and venereal diseases.)

in English: Texas dutchman's-pipe

in Spanish: bejuco de la estrella, contrayerba

Aristolochia impressinervia C.F. Liang

China.

See *Acta Phytotaxonomica Sinica* 13(2): 15–16, pl. 1, f. 6, pl. 2, f. 3. 1975

(For skin diseases.)

in China: ao mai ma dou ling

Aristolochia indica L. (*Aristolochia lanceolata* Wight)

India. Climber, twining herb, shrubby, woody stems, oblong-subglobose capsules

See *Species Plantarum* 2: 960–962. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 479. 1864 and *Current Science* 47: 549–550. 1978, *Contraception*. 20(1): 49–54. 1979, *Journal of Ethnopharmacology* 6(2): 191–226. 1982 [Research on plants for fertility regulation in India.], *Fitoterapia* 73(5): 439–441. 2002, *J. Environ. Biol.* 26(2 Suppl): 383–386. 2005, *Journal of Ethnopharmacology* 107(2): 182–188. 2006

(Used in Ayurveda, Unani and Sidha. Crushed vegetative parts applied externally for snakebites. Leaf paste applied on boils, wounds, snakebites; fresh or dried leaves chewed and swallowed for asthma; leaf decoction febrifuge, antibacterial, antimicrobial, antifungal, antifertility, antineoplastic. Root paste given orally in headache, snakebites, scorpion stings, fever, flatulence, intestinal disorders, dysentery and diarrhea, in addition the paste is applied on forehead for headache and in rash; root powder used in abortion; root juice given for rheumatism; stem bark of *Sida cordifolia*, crushed with root of *Aristolochia indica*, tubers of *Cyperus scariosus*, whole plant of *Selaginella bryopteris* and *Phyllanthus fraternus* made into pills taken to cure epileptic attacks; tuberous roots crushed and applied on the body for itching and given as an antidote for snakebite. Combination with pepper and ginger used for fever in children. Dried fruit kept in water for overnight, drops of this water put in each nostrils to get relief from jaundice. Magico-religious beliefs, tribal snake charmers use fresh roots during catching snakes. Veterinary medicine, leaves with pepper and garlic boiled in water and given in insect bites; roots along with stem of *Tinospora cordifolia* pounded, boiled in water and the decoction given in insect bite.)

in English: Indian birthwort

(Root teas and infusions for indigestion, heat, jaundice, snakebites, scorpion stings, in postpartum.)

Aristolochia rumphii Kostel.

Lesser Sunda Islands, Sulawesi, Moluccas. Climber, woody based, long slender stem, leaves obtuse minutely hairy beneath, flowers in a short racemose inflorescence, fruit short cylindrical, seeds not winged, in open forest, thickets and grassland

See *Allg. med.-pharm. Fl.* 2: 465. 1833

(Roots decoction to treat stomachache, spasm, constipation and intermittent fevers.)

in Indonesia: akar pulurun, tuhe tutunu, warosbot

Aristolochia saccata Wallich (*Aristolochia cathcartii* J.D. Hooker; *Aristolochia saccata* Hook.f. & Thomson ex Klotzsch; *Siphisia saccata* (Wall.) Klotzsch; *Siphisia saccata* Klotzsch)

China, India. Woody climber, stout, branches tomentose, lanceolate leaves silky pubescent beneath, pitcher-like flowers

See *Medical Flora* 1: 62. 1828, *Plantae Asiaticae Rariores* (Wallich). 2(2): 2, t. 103. 1829, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 603, t. 2, f. 11. 1859, *The Flora of British India* [J.D. Hooker] 5(13): 77. 1886

(Extract of underground parts and roots eaten to relieve stomachache; boiled tubers juice for urinary and spleen troubles; tuber made into a paste applied to cure hematoma.)

in English: birthwort

in China: guan lan xiang

in India: baro hirkhut, krah-lahit, rikang-batelaung, rikang-batelaung, rikangbatelong

Aristolochia serpentaria L. (*Aristolochia convolvulacea* Small; *Aristolochia dodecandra* Raf., nom. nud.; *Aristolochia hastata* Nuttall, nom. illeg., non *Aristolochia hastata* Kunth; *Aristolochia nashii* Kearney; *Aristolochia officinalis* Nees; *Aristolochia pentandra* Jacq. var. *hastata* (Kunth) Duch.; *Aristolochia polyrrhizos* Spreng.; *Aristolochia sagittata* Muhl., nom. nud.; *Aristolochia serpentaria* var. *bartonii* (Klotzsch) Duch.; *Aristolochia serpentaria* var. *hastata* Duch.; *Aristolochia serpentaria* var. *hastata* (Nuttall) Duchartre; *Aristolochia serpentaria* var. *laxa* Duch.; *Aristolochia serpentaria* var. *nashii* (Kearney) H.E. (L.) Raf.; *Pistolochia serpentaria* (L.) Raf.; *Psophiza undulata* Raf., nom. illeg. superfl.)

North America. Perennial herb

See *Sp. Pl.* 2: 960–962. 1753, *Enumeratio Systematica Plantarum* 30. 1760, *Catalogus Plantarum Americae Septentrionalis* 81. 1813, *Nova Genera et Species Plantarum* (quarto ed.) 2: 148, t. 116. 1817, *The Genera of North American Plants* 2: 200. 1818, *Systema Vegetabilium*, editio decima sexta 3: 754. 1826, *Medical Flora* 1: 62. 1828, *Flora Telluriana* 4: 98–99. 1836 [1838], *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 600–601, t. 2, f. 9. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 434, 440. 1864, *Index Kewensis* 1: 840. 1893, *Bulletin of the Torrey Botanical Club* 21(11): 485–486. 1894, *Bulletin of the Torrey Botanical Club* 24(7): 335. 1897 and *Journal of the Elisha Mitchell Scientific Society* 75: 130. 1959, *J. Pharm. Pharmacol.* 11: 607–617. 1959 [The chemistry of the *Aristolochia* species.]

(The dried rhizome, Virginia snakeroot or serpentary, is a popular herbal tonic; in small doses, a gastric stimulant and diuretic. Large doses can cause violent gastric distress and respiratory paralysis. The rhizome contains aristolochic acid and trimethyl amine, both potential carcinogens. Used for treatment of rheumatism, various pains, obstructions, worms, toothaches, sore throats, fever, sore noses, and colds, as a tonic, and mixed with saliva for snakebites. Abortifacient, analgesic.)

in English: Virginia snakeroot

Aristolochia tagala Cham. (*Aristolochia megalophylla* K. Schumann; *Aristolochia mindanaensis* Warb.; *Aristolochia roxburghiana* Klotzsch)

India, Sri Lanka and Bangladesh. Climber, greenish yellow and purple flowers in a racemose or paniculate inflorescence, fruit subglobose, seeds winged

See *Species Plantarum* 2: 960–962. 1753, *Encyclopédie Méthodique, Botanique* 1: 254. 1783, *Flora Indica*; or, descriptions of Indian Plants 3: 489. 1832, *Linnaea* 7: 207–208, pl. 5, f. 3. 1832, *Annales des Sciences Naturelles; Botanique*, série 4 2: 73–76. 1854, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 596, 599, t. 2, f. 6. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 482–497. 1864, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 488–489. 1898, *Bulletin de la Société Botanique de Belgique* 38(2): 46. 1899 and *Flora of Tropical Africa* 6(1): 139. 1909, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 412. 1912, *Bulletin of Miscellaneous Information Kew* 1924: 231. 1924, *Pesticides* 24(1): 29–31. 1990

(Whole plant ground and applied on fractures and dislocation of bones. Roots stomachic, tonic, carminative and emmenagogue, analgesic, anthelmintic, febrifuge, Guinea worm remedy, for bone fracture, indigestion, malaria, rheumatism,

toothache, fevers; fresh or dry roots taken for snake poison. Pounded leaves applied to the head to treat fever; leaf paste in coconut oil applied on chest in asthma and cough; leaf juice used to alleviate the pain due to swellings; cooling leaves decoction taken by pregnant women.)

in India: aadutheendapalai, belikol, dodda eeshvari balli, eswara balli, garuda kodi, gattada eeshvari, ishvari bheda, karalakam, khurthlong, krah-kshiang, lakiom, mincho-koyen, minchokoyon, nallaeshvara, nallaisvara, nallayisvari, punkot

in Indonesia: kalayar, kunit, puyan

in Malaysia: akar ketola hutan, akar petola hutan

in Philippines: goan-goan, nagerus, timbangan

in Thailand: krachao mot, krachao pheemot

in Vietnam: d[aa]y kh[oo]s r[as]ch, ph[of]ng k[yr]

Aristolochia triangularis Cham. (*Howardia triangularis* Klotzsch; *Howardia triangularis* (Cham.) Klotzsch)

South America.

See *Linnaea* 7: 209, pl. 7. 1832, *Annales des Sciences Naturelles; Botanique, série 4* 1: 65–66, f. 10. 1854, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 620. 1859

(Diuretic, diaphoretic. Stem decoction and tea used for regulating fertility.)

in Paraguay: mil hombres

Aristolochia trilobata L. (*Aristolochia appendiculata* Vell.; *Aristolochia caracasana* Spreng.; *Aristolochia caudata* Booth ex Lindl.; *Aristolochia macrotota* Duch.; *Aristolochia macroura* Gomes; *Aristolochia macroura* var. *subtrifida* Duch.; *Aristolochia scandens* P. Browne; *Aristolochia surinamensis* Willd.; *Aristolochia tapetotricha* Lem.; *Aristolochia trifida* Lam.; *Aristolochia triloba* Salisb.; *Howardia macroura* (Gomes) Klotzsch; *Howardia surinamensis* (Willd.) Klotzsch; *Howardia trifida* (Lam.) Klotzsch; *Howardia trilobata* (L.) Klotzsch)

South America. Often as *Aristolochia macroura* Ortega

See *Species Plantarum* 2: 960. 1753, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 617–618. 1859 and *Ann. Missouri Bot. Gard.* 47(4): 309–323. 1960[1961], *Ann. Missouri Bot. Gard.* 53(2): 115–196. 1966, *Fl. Colombia* 12: 127. 1990

(Leaf decoction for diabetes, snakebites, hypertension, as abortifacient, postpartum, to ease parturition. Magico-religious beliefs, vine planted against bewitchment.)

Aristolochia tuberosa C.F. Liang & S.M. Hwang (*Aristolochia cinnabarina* J.L. Wu & Z.L. Yang; *Aristolochia cinnabarina* C.Y. Cheng & J.L. Wu)

China.

See *Acta Phytotax. Sin.* 13(2): 17, pl. 3. f. 3; pl. 4, f. 1–2. 1975, *Iconographia Cormophytorum Sinicorum* 1: 257, f. 8513. 1982, *J. Ethnopharmacol.* 6(2): 191–226. 1982

(The tuber is used medicinally, known as *zhu sha lian*; the species is also used for treating snakebites.)

in China: bei she sheng

Aristolochia tubiflora Dunn (*Aristolochia longilingua* C.Y. Cheng & W. Yu; *Aristolochia triangulifolia* W. Yu)

China.

See *Journal of the Linnean Society, Botany* 38(267): 364. 1908, *Bulletin of Botanical Research* 12(1): 109, pl. 1. 1992, *Guihaia* 12(1): 3–4, f. 1. 1992, *Bulletin of Botanical Research* 15(2): 199–205, pl. I–III. 1995

(For the treatment of snakebites.)

in China: bi she lei

Aristolochia versicolor S.M. Hwang

China.

See *Acta Phytotaxonomica Sinica* 19(2): 224–226, pl. 4. 1981

(The tuber used for skin diseases.)

in China: guo shi zhu

Aristolotelia L'Hérit. Elaeocarpaceae

See *Species Plantarum* 1: 117–118. 1753, *Fam. Pl.* (Adanson) 2: 125. 1763, Charles Louis L'Héritier de Brutelle (1746–1800), *Stirpes novae aut minus cognitae*. 31, t. 16. Parisiis 1785, *Syst. Nat.*, ed. 13[bis]. 2(1): 751. 1791, *Anleitung zur Kenntniss der Gewachse* 2: 885. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 520. 1824, *Systema Vegetabilium*, editio decima sexta 2: 445, 450. 1825, *Analyse des Familles de Plantes* 37, 41. 1829, *Nomenclator Botanicus*. Editio secunda 1: 192. 1840, *Der Deutsche Botaniker Herbarienbuch* 209. 1841 and *Bot. Mag.* 128: t. 7868. 1902.

Aristolotelia chilensis (Molina) Stuntz (*Aristolotelia chilensis* Stuntz; *Aristolotelia glandulosa* Ruiz & Pav., nom. illeg.; *Aristolotelia macqui* L'Hér.; *Aristolotelia macqui* var. *alpestris* Reiche; *Aristolotelia macqui* var. *andina* Phil.; *Aristolotelia macqui* var. *brachystyla* Kurz; *Aristolotelia macqui* var. *leucocarpa* Dimitri; *Cornus chilensis* Molina)

Chile. Shrub

See *Species Plantarum* 1: 117–118. 1753, *Systema Vegetabilium*, editio decima sexta 2: 445, 450. 1825 and *U.S. Department of Agriculture. Bureau of Plant Industry. Inventory of Seeds and Plants Imported by the Office of Foreign Seed and Plant Introduction* 31: 85. 1914

(Dry fruit for indigestion and child diarrhea. Crushed fresh roots applied to the back as a febrifuge; crushed roots chewed to cleanse and heal sores of the mouth.)

in Chile: maque, maqui

Aristotelia serrata (Forst. & Forst.f.) W. Oliver (*Aristotelia serrata* Oliv.; *Dicera serrata* Forst.)

New Zealand. Small tree, pale pink to deep red flowers in clusters, red to black berries hang in bunches, fruits quite edible

See *Trans. & Proc. New Zealand Inst.* 53: 365. 1921

(Leaves for burns, rheumatism, boils, sore eyes; bark in cold water for eye troubles.)

in English: wineberry

Maori names: mako, makomako

Armeniaca Miller Rosaceae

Latin *Armeniacum* for the fruit of the apricot-tree, the apricot, *Armeniaca* 'the apricot-tree' (Plinius and L. Junius Moderatus Columella); see Helmut Genoust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 76. Basel 1996.

Armeniaca vulgaris Lamarck (*Prunus armeniaca* L.)

China, India, Japan. Deciduous tree, round-headed, globose fleshy fruit with a large pit/stone, seeds rich in oil and protein, fruits eaten

See *Methodus Plantarum* 15. 1754, *Encycl.* 1(1): 2. 1783, *Synopsis Florae Germanicae et Helveticae* 1: 205. 1837 and *Fl. Reipubl. Popularis Sin.* 38: 26. 1986, *Bull. Bot. Res., Harbin* 9(3): 66. 1989, *Acta Phytotax. Sin.* 31: 188. 1993, *Acta Phytotax. Sin.* 38: 281. 2000

(Poisonous parts are the wilted leaves, twigs, stems and seeds; cyanogenic glycoside, amygdalin. Liquid from the seed kernels is highly toxic; oil from the seed kernels used as a laxative. Antiseptic, antiinflammatory, laxative. The fresh ground kernels mixed with water to form a milky paste and applied to dry and cracked nostrils and lips. Salted fruit used in the treatment of cough, asthma, sore throat, diarrhea and ascariasis.)

in English: apricot, common apricot

in Arabic: michmèche

in Italian: albicocca

in Spanish: albaricoque

in China: xing ren, hsing, tien mei

in India: aru, chuli, dilitel, gurdalu

in Indonesia, Malaysia: badam

in Japan: anzu

in Thailand: aprikhot

in Tibetan: kham-bu

in Vietnam: hanh, ma pheng, mac moi, mo, mo', mai

Armeniaca vulgaris Lamarck var. *vulgaris* (*Armeniaca armeniaca* (L.) Huth, nom. inval., tautonym; *Prunus armeniaca* L.; *Prunus tiliifolia* Salisb., nom. nud., nom. illeg.)

China, India, Japan.

See *Species Plantarum* 1: 473–475. 1753, *Methodus Plantarum* 15. 1754, *Encyclopédie Méthodique, Botanique* 1(1): 2. 1783, *Prodr. Stirp. Chap. Allerton* 356. 1796, *Helios* 11(9): 133. 1893 and *Flora Sylvatica Koreana* 5: 38. 1915

(Peach (*Prunus persica*) and apricot (*Prunus armeniaca*), have pits with enough toxin to cause poisoning and death in humans and animals. Medicinally used for cough and constipation. Warm oil applied on joints to get relief from rheumatic pain.)

in English: apricot, common apricot

in India: chul, chuli, chulli

Armoracia Gaertner, B. Meyer & Scherb. Brassicaceae (Cruciferae)

From the classical Latin name for horseradish, *armoracia*, *ae*, (*armoracea*, *armoracium*, *ii*), Greek *armorakia*, see *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 267. 1794, *Oekonomisch-Technische Flora der Wetterau* 2: 426–428. 1800.

Armoracia rusticana P. Gaertn., B. Mey. & Scherb. (*Armoracia armoracia* (L.) Cockerell; *Armoracia lapathifolia* Gilib.; *Armoracia sativa* Bernhardt; *Cardamine armoracia* (L.) Kuntze; *Cochlearia armoracia* L.; *Cochlearia rusticana* Lam.; *Crucifera armoracia* (L.) E.H.L. Krause; *Nasturtium armoracia* (L.) Fries; *Nasturtium armoracioides* (L.) Fr.; *Radicula armoracia* (L.) B.L. Rob.; *Rorippa armoracia* (L.) A.S. Hitchcock; *Rorippa rusticana* Gren. & Godr.; *Rorippa rusticana* (Gaertner et al.) Godron)

North America. Perennial herb, deep fleshy taproot, small white flowers 4-parted

See *Species Plantarum* 2: 648. 1753, Gilibert, Jean Emmanuel (1741–1814), *Caroli Linnæi ... Systema plantarum Europae. Coloniae-Allobrogum, 1785–1787* [t. I. Nomenclator linnæanus. *Flora lithuanica inchoata*; seu, Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert.], *Systematisches Verzeichnis* 191. 1800, *Oekonomisch-Technische Flora der Wetterau* 2: 426. 1800, *Flore de France* [Grenier] 1: 127. 1847 [1848 publ. Nov 1847], *A Key to the Spring Flora of Manhattan* 18. 1894 and *Deutschlands Flora, Abtheilung II, Cryptogamie* 6: 54. 1902, *Rhodora* 10(110): 32. 1908, *Flora of Boulder, Colorado, and Vicinity* 130. 1911, *Acta Biol. Cracov., Ser. Bot.* 19: 107–148. 1976, *Taxon* 29: 725–726. 1980, Fenwick, G.R., Heaney, R.K., Mawson, R. *Glucosinolates*. Pages 1–41 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. II. *Glycosides*. CRC Press, Inc., Boca Raton, FL, USA. 1989

(Toxic only if large quantities eaten. The plant contains glucosinolates, which can cause toxicity in livestock. Irritation of the mucous membranes can occur in humans who grind the roots to produce horseradish condiment. Plant used for diabetes. Roots abortifacient, diuretic, rubefacient, antirheumatic, tonic, analgesic, for colds, asthma, bronchitis, inflammation, urinary troubles; infusion gargled for sore throat; roots chewed for tongue and mouth diseases. Poultice of leaves applied for neuralgia, toothache.)

in English: horseradish, red cole

in China: la gen

Arnebia Forssk. Boraginaceae

From vernacular name *sagaret el arneb*, Arabic name for Arabian primrose and prophet flower; see P. Forsskål, *Flora aegyptiaco-arabica*. 62, 63. Copenhagen 1775, *Ann. Naturhist. Mus. Wien*, 75: 212–213, 220. 1971 (publ. 1972) and *Flora Uzbekistanica* 5: 632. 1961.

Arnebia benthamii (Wall. ex G. Don) I.M. Johnston. (*Echium benthamii* Wall. ex G. Don; *Echium benthamii* Wall.; *Lithospermum benthamii* (Wall. ex G. Don) I.M. Johnston.; *Macrotomia benthamii* (Wall. ex G. Don) A. DC.; *Macrotomia benthamii* Boiss.; *Macrotomia benthamii* DC. ex Meisn.)

Himalayas, Pakistan, Nepal. Erect herbaceous perennial, hispid, purplish brown flowers, see also *Macrotomia benthamii*

See *Numer. List* [Wallich] n. 931. 1829, *A General History of the Dichlamydeous Plants* 4: 333. 1837, *Pl. Vasc. Gen.* [Meisner] 2: 190. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 27. 1846, *Fl. Orient.* [Boissier] Suppl. 352 [*Macrotamia*]. 1888 and *Journal of the Arnold Arboretum* 33: 333. 1952, *Journal of the Arnold Arboretum* 35: 56. 1954

(Used in Ayurveda and Unani. Root paste mildly warmed and applied to forehead for relieving headache and fever, also to wounds and burns; roots for asthma, rheumatic pains and snakebite. Cardiac and febrifuge, flowering shoots used in preparation of sherbet (syrup) and jam useful in various diseases of tongue, throat, fever and cardiac disorders. A major ingredient of the commercial drug available under the name *Gaozaban*, which has antibacterial, antifungal, stimulant, tonic, diuretic, expectorant, antiinflammatory and wound-healing properties.)

in India: balchari, balchhadi, balsamjari, gaozaban, gauzaban, gojihva, kahzaban, khome, lajjari, laldori, laljari, ratanjot, ratanjor, ratanjot, rattanjot

Arnebia euchroma (Royle) I.M. Johnston (*Arnebia euchroma* I.M. Johnston.; *Arnebia euchroma* (Royle ex Benth.) I.M. Johnston.; *Arnebia euchroma* subsp. *caespitosa* Rech. f. & Riedl; *Arnebia euchroma* var. *grandis* (Bornm.) Kazmi; *Arnebia perennis* (Schrenk) A. DC.; *Arnebia tingens*

A. DC.; *Lithospermum euchromon* Royle; *Macrotomia echioides* Boiss.; *Macrotomia endochromon* Hook. f. & Thoms. ex Henderson and Hume; *Macrotomia euchroma* (Royle ex Benth.) Paulsen; *Macrotomia euchroma* (Royle) Paulsen; *Macrotomia euchromon* Paulsen; *Macrotomia oginoi* Kitamura; *Macrotomia perennis* (Schrenk) Boiss.; *Macrotomia ugamensis* Popov; *Stenosolenium perenne* Schrenk)

Himalaya, India, Nepal. Perennial herb, erect, hairy, variable, fat red edible dye

See *Ill. Bot. Himal. Mts.* 1: 305. 1839, *Fl. Orient.* [Boissier] 4(1): 211. 1875 and *Botanisk Tidsskrift* 27: 216. 1906, *Contributions from the Gray Herbarium of Harvard University* 73: 49. 1924, *Oesterreichische Botanische Zeitschrift* 111, 152. 1962, *Fl. Iran.* 48: 164. 1967, *Journal of Ethnopharmacology* 55(1): 77–80. 1996, *J. Nat. Prod.* 65(12): 1857–1862. 2002

(Purple roots antipyretic, bactericidal, antimicrobial, antiinflammatory, anticancer, contraceptive, hair tonic, emollient and vulnerary, used in the treatment of measles, eye diseases, burns, eczema, dermatitis, wounds, toothache and earache; dried roots antiviral, to prevent hepatitis; bruised roots applied to skin eruptions. Ceremonial, ritual, red dye used for worship.)

in English: Sinkiang-Tibet arnebia

in China: ruan zi cao, zi cao

in India: balchari, demok, dimo, dimug, dre-mog, khamed, ratanjot

Arnebia guttata Bunge (*Arnebia thomsonii* C.B. Clarke; *Arnebia tibetana* Kurz; *Lithospermum guttatum* (Bunge) I.M. Johnston; *Macrotomia guttata* (Bunge) Farrer)

China, Afghanistan. Herb, biennial and perennial

See Bunge, Alexander Andrejewitsch von (1803–1890), *Ind. Sem. Hort. Dorpat.* 7. Dorpati Livonorum, 1840, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 43(3): 189. 1874, *Fl. Brit. India* [J.D. Hooker] iv. 176. 1883 and *Engl. Rock Gard.* 2: 469. 1925, *J. Arnold Arbor.* xxxiii. 330. 1952

(Antimalarial, fungicidal. Ceremonial, ritual, red dye used for worship.)

in English: common arnebia

in China: zi cao, huang hua ruan zi cao

in India: balchari, demok, dimo, dimug, dre-mog, khamed, ratanjot

Arnebia hispidissima (Sieber ex Lehm.) A. DC. (*Arnebia hispidissima* DC.; *Lithospermum hispidissimum* Lehm.; *Lithospermum hispidissimum* Sieber ex Lehm.)

India.

See *Icon. Descr. Nov. Stirp.* t. 39. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 94. 1846

(Bristles of plants are said to act as poison. Leaves for yellow fever and edema. Root dye for skin eruptions.)

in India: rambus

Arnica L. Asteraceae

Derivation obscure, possibly a corruption of the Greek *ptarnike* 'sneeze'; see Carl Linnaeus, *Species Plantarum*. 2: 884–885. 1753, *Genera Plantarum*. Ed. 5. 376. 1754, *Definitiones Generum Plantarum* 186. 1760 and Maguire, B. "A monograph of the genus *Arnica*." *Brittonia* 4: 386–510. 1943.

Arnica acaulis (Walter) Britton, Sterns & Poggenb. (*Doronicum acaule* Walter)

North America, SE United States. Simple stems, corollas yellow, anthers yellow

See *Species Plantarum* 2: 885–886. 1753, *Flora Caroliniana*, secundum... 205. 1788, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 30. 1888

(Roots infusion taken for back pain. Bactericidal, vesicant, used topically to treat bruises, sprains, wounds.)

in English: common leopardbane, leopard's bane, stemless arnica

Arnica chamissonis Less. (*Arnica bernardina* Greene; *Arnica chamissonis* subsp. *foliosa* (Nutt.) Maguire; *Arnica chamissonis* subsp. *genuina* Maguire, nom. inval.; *Arnica chamissonis* subsp. *incana* (A. Gray) Maguire; *Arnica chamissonis* var. *bernardina* (Greene) Jeps. ex Maguire; *Arnica chamissonis* var. *foliosa* (Nutt.) Maguire; *Arnica chamissonis* var. *incana* (A. Gray) Hultén; *Arnica chamissonis* var. *interior* Maguire; *Arnica chamissonis* var. *jepsoniana* Maguire; *Arnica foliosa* Nutt.; *Arnica foliosa* var. *bernardina* (Greene) Jeps.)

North America. Perennial, bright yellow to orange-yellow flowers

See *Species Plantarum* 2: 884–885. 1753, *Linnaea* 6(2): 238–239. 1831, *Transactions of the American Philosophical Society*, new series, 7: 407. 1841, *American Naturalist* 8(4): 214. 1874 and *Pittonia* 4(23): 169–170. 1900, *A Manual of the Flowering Plants of California* ... 1157. 1925, *Rhodora* 41(490): 508. 1939, *Madroño* 6(5): 154. 1942, *Brittonia* 4(3): 466. 1943, *American Midland Naturalist* 37(1): 139–140. 1947, *Acta Universitatis Lundensis*, n.s. 46(1): 1591. 1950, *Le Naturaliste Canadien* 94(4): 521. 1967, *Great Basin Naturalist* 28(3): 149. 1968, *American Journal of Botany* 63: 1393–1403. 1976, *Taxon* 28: 278. 1979, *Taxon* 34: 547–551. 1985, *Rhodora* 89: 391–400. 1987, *Sida* 15: 649–653. 1993, *Planta Med.* 60(4): 369–372. 1994

(Parts of plant are poisonous if ingested, reported potentially allergenic pseudoguaianolides and (from *Arnica foliosa*)

sesquiterpene lactones. Used in liniments and creams for external treatment of bruises and injuries, should not be applied to broken skin.)

in English: American arnica, Chamisso arnica, leafy arnica

Arnica cordifolia Hook. (*Arnica cordifolia* Hook. subsp. *genuina* Maguire; *Arnica cordifolia* Hook. var. *humilis* (Rydb.) Maguire; *Arnica cordifolia* var. *pumila* (Rydb.) Maguire; *Arnica cordifolia* Hook. var. *whitneyi* (Fernald) Maguire; *Arnica hardinae* H. St. John; *Arnica humilis* Rydb.; *Arnica paniculata* A. Nelson; *Arnica whitneyi* Fernald)

North America. Perennial

See *Flora Boreali-Americana* 1(Suppl.): 331. 1834 and *Memoirs of the New York Botanical Garden* 1: 433. 1900, *New Manual of Botany of the Central Rocky Mountains* 572. 1909, *Rhodora* 37(441): 334–337, pl. 379, f. 1–5. 1935, *Madroño* 6(5): 154. 1942, *Brittonia* 4(3): 452. 1943

(Whole plant said to be toxic, nervine, antiinflammatory, antiphlogistic, antirheumatic, sternutatory and vulnerary; mashed plant poultice for swellings, sore eyes, bruises and cuts. Charm, magic, roots used as a love medicine.)

in English: heartleaf arnica

Arnica latifolia Bong. (*Arnica latifolia* Bong. var. *angustifolia* Herder)

USA, Alaska. Perennial, ray flowers yellow, disk flowers darker yellow

See *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 147–148. 1832 and *North American Flora* 34(4): 336. 1927

(Commonly used in herbal ointments and oils applied on the skin as an antiinflammatory and pain-relieving agent for aches, bruises and sprains on unbroken skin. Charm, magic, roots used as a love medicine.)

in English: broadleaf arnica, daffodil leopardbane

Arnica lonchophylla Greene (*Arnica alpina* (L.) Olin & Ladau subsp. *lonchophylla* (Greene) G.W. Douglas & Ruyle-Douglas; *Arnica angustifolia* Vahl subsp. *lonchophylla* (Greene) G.W. Douglas & Ruyle-Douglas; *Arnica arnoglossa* Greene; *Arnica chionopappa* Fernald; *Arnica gaspensis* Fernald; *Arnica lonchophylla* subsp. *arnoglossa* (Greene) Maguire; *Arnica lonchophylla* subsp. *chionopappa* (Fernald) Maguire)

North America, Canada, Alaska. Stems usually simple rarely branched, yellow flowers

See *Pittonia* 4(23): 164, 166. 1900, *Rhodora* 7(80): 148–149. 1905, *Brittonia* 4(3): 430–431. 1943, *Le Naturaliste Canadien* 87(2): 27. 1960, *Great Basin Naturalist* 28(3): 149. 1968, *Canadian Journal of Botany* 56(2): 185. 1978, *Canadian Journal of Botany* 56(14): 1710. 1978, *Planta Med.* 70(10):

967–977. 2004 [New triterpene esters from flowerheads of *Arnica lonchophylla*.]

(Antiinflammatory.)

in North America: longleaf arnica, northern arnica, spearleaf arnica, white-plumed arnica, arnica lonchophylle

Arnica longifolia D.C. Eaton (*Arnica longifolia* subsp. *myriadenia* (Piper) Maguire; *Arnica myriadenia* Piper)

USA.

See *Species Plantarum* 2: 884–885. 1753, *United States Geological Exploration of the Fortieth Parallel. Botany* 186. 1871 and *Rhodora* 7(80): 148. 1905, *Proceedings of the Biological Society of Washington* 33(23): 106. 1920, *Brittonia* 4(3): 430, 470. 1943, Hausen, B.M. et al. “The sensitizing capacity of Compositae plants. I. Occupational contact dermatitis from *Arnica longifolia* Eaton.” *Contact Dermatitis* 4(1): 3–10. 1978, *Rhodora* 89: 391–400. 1987, *Planta Med.* 54(6): 578. 1988, *Planta Med.* 65(2): 153–156. 1999, *J. Agric. Food Chem.* 55: 8430–8435. 2007

(Antifungal. Occupational allergic contact dermatitis, reported potentially allergenic sesquiterpene lactones.)

in English: spear-leaf leopardbane

Arnica montana L.

Europe, North America. Herbaceous perennial, basal leaves clustered

See *Species Plantarum* 2: 884. 1753 and *Contact Dermatitis*. 4(1): 3–10. 1978, *Planta Med.* 54(6): 578. 1988, *Planta Med.* 64(3): 268–270. 1998, *Planta Med.* 65(2): 153–156. 1999, *Biol. Pharm. Bull.* 30(5): 873–879. 2007, *Homeopathy* 96(1):17–21. 2007

(Toxic only if large quantities eaten; roots and flowers the poisonous parts. When applied tincture can cause blistering and inflammation, occupational allergic contact dermatitis, skin irritation minor; reported potentially allergenic sesquiterpene lactones. Commonly used in herbal ointments and oils applied on the skin as an antiinflammatory and pain-relieving agent for aches, bruises, and sprains on unbroken skin. Homeopathic *Arnica montana* for analgesia, inflammation; *Arnica montana* is a homeopathic remedy often prescribed after traumata and injuries, but the hypothesis that homeopathic *Arnica* is effective could be neither proved nor rejected.)

in English: arnica, arnica root, common arnica, leopard’s-bane, leopardsbane, mountain arnica, mountain snuff, mountain tobacco, wolf’s bane

Arnicratea N. Hallé Celastraceae

See *Bulletin du Muséum National d’Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 6: 12. 1984.

Arnicratea grahamii N. Hallé

India. Shrub, climbing, white flowers in axillary branched panicles, winged seeds

See *Bulletin du Muséum National d’Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 6: 14. 1984

(For skin diseases.)

in India: danshir, dhavsaricha vel, lokhandi

Arnoglossum Raf. Asteraceae

Greek *arnos* ‘a lamb’ and *glossa* ‘a tongue’, referring to the leaves; *arnoglosson*, the ancient Greek name for plantain, *Plantago major*, and haresfoot plantain, *Plantago lagopus*; see C.S. Rafinesque, *Florula Ludoviciana*, or, a flora of the state of ... 64–65. 1817, *Am. Monthly Mag. Crit. Rev.* 4: 188. 1819, *Gardener’s Magazine and Register of Rural and Domestic Improvement* 8: 247. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 329. 1837[1838] and *American Midland Naturalist* 3(7): 193. 1914, E.D. Merrill, *Index Rafinesquianus*. 232. 1949.

Arnoglossum atriplicifolium (L.) H. Rob. (*Cacalia atriplicifolia* L.; *Cacalia paniculata* Raf.; *Cacalia paniculata* (DC.) Kuntze; *Cacalia paniculata* Kuntze; *Cacalia rotundifolia* (Raf.) House; *Cacalia similis* (Small) Buchholz & E.J. Palmer; *Cacalia similis* J. Buchholz & E.J. Palmer; *Conophora atriplicifolia* (L.) Nieuwl.; *Conophora atriplicifolia* Nieuwl.; *Conophora similis* Nieuwl.; *Conophora similis* (Small) Nieuwl.; *Mesadenia atriplicifolia* (L.) Raf.; *Mesadenia pulverulenta* Raf.; *Mesadenia rotundifolia* Raf.; *Mesadenia similis* Small; *Senecio atriplicifolius* (L.) Hook.; *Senecio atriplicifolius* Hook.)

North America. Perennial herb

See *Species Plantarum* 2: 835. 1753, *Annals of Nature* 14. 1820, *Flora Boreali-Americana* (Hooker) 1(Suppl.): 332. 1834, *New Flora and Botany of North America* ... 4: 79. 1836[1838], *Revisio Generum Plantarum* 2: 970. 1891 and *Flora of the Southeastern United States* 1301, 1341. 1903, *American Midland Naturalist* 3(7): 193. 1914, *Transactions of the Academy of Science of St. Louis* 25: 141. 1926, *Phytologia* 28(3): 294. 1974, *Taxon* 31: 126–127. 1982

(Poultice used for cancerous sores, as a blood purifier and antidote.)

in English: pale Indian plantain

Arrabidaea DC. Bignoniaceae

Don Antonio da Arrabida, Bishop of Anemurium; see José Mariano da Conceição Velloso, *Petro ... primo ... jubente ... Florae Fluminensis icones* ... Edidit ... A. da Arrabida. Parisiis 1827 and *Fieldiana, Bot.* 24(10/3): 153–232. 1974,

Flora of Ecuador 7: 1–172. 1977, *Flora de Veracruz* 24: 1–222. 1982, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Arrabidaea chica (Humb. & Bonpl.) B. Verl. (*Adenocalymma portoricensis* A. Stahl; *Arrabidaea acutifolia* A. DC.; *Arrabidaea cuprea* (Cham.) Bornm., nom. illeg.; *Arrabidaea larensis* Pittier; *Arrabidaea rosea* DC.; *Bignonia chica* Humb. & Bonpl.; *Bignonia cuprea* Cham.; *Bignonia erubescens* S. Moore, nom. illeg., non *Bignonia erubescens* DC.; *Bignonia tinctoria* Arruda; *Bignonia triphylla* Willd. ex DC., nom. illeg., non *Bignonia triphylla* L.; *Lundia chica* (Humb. & Bonpl.) Seem.; *Temnocydia carajura* Mart. ex DC., nom. inval.; *Vasconcellia acutifolia* C. Mart. ex DC., nom. inval.)

Tropical America. Liana, creeper, climbing, scrambling, scandent shrub, red pigment from the leaves for tattoos, dye in body painting for rituals.

See *Species Plantarum* 2: 622–625. 1753, *Genera Plantarum* 137. 1789, *Plantae Aequinoctiales* 1: 107–110, t. 31, f.1. 1808[1807], *Linnaea* 7: 655. 1832, *Bibliothèque Universelle de Genève sér. 2.* 17: 126–128. 1838, *Plantarum vascularium genera secundum ordines ...* 1: 300; 2: 208. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 151, 185, 194, 201. 1845, *The Botany of the Voyage of H.M.S. Anal.* 13(2): 114–119. 2002, Pinto L.N. “Levantamento etnofarmacêutico dos fitoterápicos tradicionais utilizados no município de Cameté e análise de *Arrabidaea chica* (HBK) Verlot.” Belém. Monografia de Especialização, Faculdade de Farmácia, Universidade Federal do Pará 2004, *Revista Brasileira de Farmacognosia / Brazilian Journal of Pharmacognosy* 18(4): 544–548. 2008, *J. Ethnopharmacol.* 118(3): 361–366. 2008

(Fresh or dried leaves infusion antiinflammatory, antifungal, trypanocidal, astringent, antioxidant, antimicrobial, vulnerary, wound healing agent, conjunctivitis, uterine inflammation, hemorrhage, anemia and leukemia, blood disorders, hepatitis, hemorrhoids, inflammation, stomach and intestinal aches, diarrhea, for skin affections, to protect the skin against the sunlight and to repel insect; eventually used to bath external wounds; extract of *Arrabidaea chica* able to influence liver metabolism, inhibitory effect of the extract from leaves and stems on hepatic glucose production; sap used as eye wash for eye infections.)

in English: cricket vine

in South America: carajiru, carajurin, carajuru, chica, crajiru, masipahka, pariri, puca panga

Arracacia Bancroft Apiaceae (Umbelliferae)

From the Spanish vernacular name; see *Verhandlungen des Vereins zur Beförderung des Gartenbaues in den Königlich Preussischen Staaten* 4(2): 386–389. 1828 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/1): 3–97. 1962, *Fieldiana, Bot.* 24(8/1): 21–66. 1966, *Ceiba* 19(1): 1–118. 1975, *Fl. Ecuador* 5: 1–71. 1976, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989.

Arracacia xanthorrhiza Bancroft (*Arracacha esculenta* DC.; *Arracacia andina* Britton; *Arracacia esculenta* DC.; *Bancroftia xanthorrhiza* (Bancroft) Billberg; *Conium arracacha* Hooker)

Colombia.

See *Transactions of the Agricultural and Horticultural Society of Jamaica* 1825: 5. 1825, *Linnéska samfundets handlingar* 1: 40. 1833

(Postpartum remedy.)

in English: Peruvian parsnip

in Peru: arracacha, birracas, huaisampilla, r'accacha, racacha, rajacha, rakcacha, rumu racacha, virraca

Artabotrys R. Br. Annonaceae

According to Robert Brown the generic name is from the Greek *artane*, *artao* ‘that by which something is hung up’ and *botrys* ‘cluster, a bunch of grapes, a cluster of grapes’, in reference to the cluster of woody tendrils arising from the flower stalk (peduncles); this name was used by Dioscorides to describe a herb ‘like wormwood’, see *Species Plantarum* 1: 536–537. 1753, *Botanical Register*; consisting of coloured ... 5: pl. 423. 1820 and *J. Wash. Acad. Sci.* 1: 119. 1911, *Bull. Misc. Inform.* 1923: 256. 1923.

Artabotrys brachypetalus Benth.

Tanzania. Liana.

See *Transactions of the Linnean Society of London* 23: 467. 1862 and *Biochem. Syst. Ecol.* 31: 1447–1449. 2003

(Alkaloids. For impotence and infertility.)

in English: short-petalled artabotrys

in Mozambique: tita

in Southern Africa: uMazwenda omnyama (Zulu); Ntita, ntiti (Tsonga: Eastern Transvaal); mudzidzi (Venda)

Artabotrys hexapetalus (L.f.) Bhandari (*Annona hexapetala* Linnaeus f.; *Annona uncinata* Lamarck; *Annona uncinata* Lam.; *Artabotrys odoratissimus* R. Br.; *Artabotrys odoratissimus* R. Brown ex Ker Gawl., nom. illeg.; *Artabotrys uncatata* (Lour.) Baill.; *Artabotrys uncatatus* (Loureiro) Baillon; *Artabotrys uncatatus* Baillon; *Artabotrys uncinatus* (Lamarck)

Merrill; *Unona uncata* (Lour.) Dunal; *Unona uncinata* (Lamarck) Dunal; *Uvaria esculenta* Roxburgh ex Rottl.; *Uvaria odoratissima* Roxburgh; *Uvaria uncata* Loureiro)

India, Sri Lanka, Java and South China. Straggler, liana, climbing vine, scandent shrub, thorny branches, hooked spines, juicy yellow flowers very fragrant

See *Supplementum Plantarum* 270. 1781[1782], *Encyclopédie Méthodique, Botanique* 2: 127. 1786, *Flora Cochinchinensis* 1: 349. 1790, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 201. 1803, *Monographie de la famille des Anonacées* 105, t. 25. 1807, *Botanical Register*; consisting of coloured ... 5: pl. 423. 1819, *Botanical Register*; consisting of coloured ... 5: pl. 423. 1820, *Histoire des Plantes* 1: 232. 1868 and *Philippine Journal of Science* 7(4): 234. 1912, *Fl. Madagasc.* 78: 7. 1958, *Baileya* 12(4): 147. 1964, *International Journal of Tropical Plant Diseases* 5(2): 173–179. 1987, *Phytochemistry* 45(4): 831–833. 1997

(Used in Ayurveda and Sidha. Flowers tonic, stimulant; fruits for scrofula, fruit and bark to treat fever, diarrhea, dysentery, helminthiasis, flatulence, colic, constipation, bruises, cuts, sprains, skin diseases, wounds, ulcers, amenorrhea, dysmenorrhea, inflammation, leprosy, cough, asthma, bronchitis. Leaves extract antibacterial, antifertility, antifungal, decoction of the leaves against cholera.)

in English: climbing ylang-ylang

in China: ying zhua hua

in India: akkurotam, antakam, chinichampa, harachampaka, hari-champa, harichampa, hiravaachaapa, hirvachampa, kanankay, kandaala sampige, kandalisampage, kantali champa, kantalisampige, kanthaala sampige, kanthali champa, katchampa, kulakayam, kunarancitam, madana kaamaeshvari, madana masthi hoo, madanah, madanakameshvari, madanakamesvari, madanakameswari, madanmast, madmanti, makaticam, mandanamanjari hoo, mano-ranjitam, manorancitam, manoranjana balli, manoranjballi, manoranjani, manoranjani hoo balli, manoranjidam, manoranjidamu, manoranjini hoovu, manoranjitam, manoranjitham, manoranjithamu, matanakamappu, muddasampenga, naaga champaka, nilachampaka, phala-sampenga, phalasampanga, phalasampenga, sakalaphala-sampenga, sakalaphala-sampanga, sampenga, thiga sampangi, tiga sampangi

in Malaysia: kenanga china, kenanga bolok

in Thailand: kradangngaa cheen, sabanngaa cheen

in Vietnam: d[aa]y c[oo]ng ch[us]a, hoa m[os]ng r[oof]ng

Artabotrys modestus Diels

Tropical Africa, Tanzania.

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 272. 1936

(Leaves and roots antiinflammatory, astringent, for stomach-ache, diarrhea.)

Artabotrys monteiroae Oliv. (*Artabotrys nitidus* Engl.) (the specific name honors Mrs. Rose Monteiro, 1840–1897, botanist and plant collector, author of *Delagoa Bay. Its natives and natural history*. London 1891; see I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M*. Regnum Vegetabile vol. 93. 1976.)

South Africa. Woody lianescent climber, creeping, scrambling shrub, stem somewhat spiny, crushed leaves fragrant, climbing by hooks, white yellow flowers

See *Hooker's Icones Plantarum* 18, t. 1796. 1888 and *Phytochemical Analysis* 4(2): 72–75. 1993, *Kirkia* 18 (19): 35–48. 2002, *Journal of Ethnopharmacology* 92(2–3): 177–191. 2004

(Analgesic, antiplasmodial, antiinflammatory; against malaria body bathed with leaf juice, and a decoction of roots and bark drunk; roots boiled and drunk to increase strength.)

in English: red hook-berry

in Southern Africa: mudzidzi, munnamutswu, uMazwenda

in Tanzania: inyanswila, pilipili pori

Artabotrys suaveolens (Blume) Blume (*Unona suaveolens* Blume)

Java, Northeastern India. A scandent shrub or climber, inflorescence many-flowered, flowers creamy white or yellow

See *Bijdragen tot de flora van Nederlandsch Indië* 17. 1825, *Flora Javae* 62, t. 30, 31D. 1830

(Alkaloids. Bark and roots decoction emmenagogue, used by women after parturition; decoction or infusion of the leaves used against cholera.)

in India: manarancitam

in Malaysia: akar chenana, akar larak

in Philippines: bahai-balagan, susong-damulag, susong-kalabau

in Thailand: aa-kaa-kai

Artabotrys zeylanicus Hook.f. & Thomson

Sri Lanka, India. Liana

See *Flora Indica: Being a Systematic Account of the Plants of British India*. [Hooker f. & Thomson] 1: 128. 1855 and *Taxon* 29: 165–166. 1980

(Flowers decoction for treating vomiting.)

in India: manoranjitham

Artanema D. Don Scrophulariaceae (Linderniaceae, Plantaginaceae, Veronicaceae)

Greek *artane*, *artao* ‘that by which something is hung up, to support, to suspend’ and *nema* ‘thread’, referring to the appendages of the filaments, see *The British Flower Garden*,

... 3: t. 234. 1834 and *American Journal of Botany* 88: 348–361. 2001.

Artanema longifolium (L.) Merr. (*Artanema longifolia* (L.) Vatke; *Artanema longifolium* Merr.; *Artanema longifolium* Vatke; *Columnea longifolia* L.)

Tropical Africa, India. Erect branched herb, corolla deep red-purple, leaves eaten as a vegetable

See *Species Plantarum* 2: 638. 1753, *Mantissa Plantarum* 90. 1767, *Scroph. Ind.* 39. 1835, *Linnaea* 43: 307. 1882 and *Philipp. J. Sci.* 19: 380. 1921

(Used in Ayurveda. Antidiabetic and antioxidant, an aqueous extract a component of Ayurvedic medicines used against inflammations of the skeleto-muscular system, for rheumatoid arthritis and osteoarthritis, also used against nausea.)

in India: bahel-tsjulli, kokilaksah, neermulli, vayalculli

Artanema sesamoides (Vahl) Benth. (*Achimenes sesamoides* Vahl; *Artanema sesamoides* Benth.)

India. Erect branched herb, linear-lanceolate leaves, glandular hairy red purple flowers in terminal cymes

See *Symbolae Botanicae, ...* 2: 71. 1791, *Syn. Pl.* 2: 164, 169. 1806, *Scrophularineae Indicae* 39. 1835 and *International Journal of Applied Research in Natural Products* 1(1): 25–33. 2008

(Used in Ayurveda. Roots decoction antidiabetic and antioxidant, given in rheumatism, diarrhea, syphilis and ophthalmia, to improve vitality and relieve nausea. Seeds given for biliousness and fertility.)

in India: iksrua, kokilaksha, neermulli

Artemisia L. Asteraceae

Latin *artemisia* for the plant mugwort (Plinius); see Carl Linnaeus, *Species Plantarum* 2: 845–850. 1753, *Genera Plantarum* Ed. 5. 367. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Flore Française* 4: 189. 1815, *Bull. Sci. Soc. Philom. Paris* 1817: 33. 1817, *Flora* 6(2) Beil. 96, sphalm. 1823, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1(8): 222–223. 1828, *Synopsis Generum Compositarum* 264. 1832, *Transactions of the American Philosophical Society*, new series, 7: 399. 1841, *Flore de France ... Prospectus* 2: 126. 1850 and *Flore de France* 27. 1903, *North American Flora* 34(3): 258, 282. 1916, *Acta Phytotaxonomica et Geobotanica* 8: 64. 1939, *Flora URSS* 26: 504. 1961, *American Journal of Botany* 68(5): 590–591. 1981, *Glimpses in Plant Research* 8: 1–177. 1988, *Bulletin of Botanical Research* 4(2): 5. 1988, *Phytologia Memoirs* 10: i-ii, 1–93. 1996, *Opera Botanica* 137: 1–42. 1999.

Artemisia abrotanum L. (*Artemisia abrotanum* Thunb., non L.)

North America.

See *Species Plantarum* 2: 845–850. 1753, *Flora Japonica*, ... 309. 1784 and *Canadian Journal of Botany* 66: 672–676. 1988, *Kew Bulletin* 52(1): 121–138. 1997

(Used in Sidha. A fly and parasite repellent.)

in North America: armoise aurone, lad's love, lady's love, old man, southernwood

in India: cirotikam, davana, iruppaval, iruppavarceti, kanakamarukkoluntu, kanalkanni, kattumaruk koluntu, kilavantati, mavitakkatti, municatilam, panitanki

Artemisia absinthium L. (*Artemisia absinthia* St.-Lég.; *Artemisia absinthium* var. *insipida* Stechmann)

Cosmopolitan, from Europe to Asia. Perennial aromatic herb, silky, leaves silvery-green finely divided into blunt narrow segments, small drooping greenish yellow flowers, yellowish heads

See *Species Plantarum* 2: 845–850. 1753, *Annales de la Société Botanique de Lyon* 7: 119. 1880 and *Plant Systematics and Evolution* 123: 35–54. 1974, *Fragmenta Floristica et Geobotanica* 25: 477–483. 1979, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 769–771. 1979, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *Folia Geobotanica et Phytotaxonomica* 19: 299–316. 1984, *Plant Systematics and Evolution* 152: 195–210. 1986, *Fitologija* 31: 71–74. 1986, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 33: 57–62. 1986, *Biologie-Ecologie Mediterranee* 10: 273–289. 1987, *Boletim da Sociedade Broteriana*, ser. 2 61: 105–124. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1671–1673. 1989, *Prace Botaniczne* 49: 1–83. 1992, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(10): 88–90. 1992, *Watsonia* 20: 63–66. 1994, *Flora Mediterranea* 5: 357–363. 1995, *Thaiszia* 7: 75–88. 1997

(Used in Ayurveda, Unani and Sidha. Toxic only if large quantities eaten, all parts poisonous. Psychoactive ingredient for absinthe liquor, a beverage that is illegal in some markets. Known as a powerful neurotoxin, absinthe in large quantities is addictive as well as deadly. Leaf and stem decoction given for regulating fertility; decoction or infusion of twigs taken for head colds; roots infusion stomachic. Leaves infusion or decoction vermifuge, to expel worms in children; leaves paste applied for healing wounds.)

in English: absinth, absinth sagewort, absinthe, common wormwood, green ginger, lady's love, madder-wood, madderwort, mugwort, old man, old woman, wormwood

in French: absinthe

in Italian: artemisia, assenzio

in Arabic: chajret mariam, dasisah, eshbet mariam, shadjret mariam, shih rumi

in India: afsanteen, afsanthin, afsantin, bhurse, cimaimacipattiri, damar, davana, faloling, indhana, machipattiri, macippaccai, moshipatri, nilampala, qaisoom

(afsanteen), serpana, shulabandha, surapeena, surpan, tartiha, tethwan, tirunitri-pachcha, urigattige, uruvalu, vilayathi afsanthin, vilayathi afsantin, vilayatiarfsantin

in South America: absinto, ajenjo, ajinku, chillk'a killara, losna, naki-mark'u, ñawñatamisa, qilq' ijup'alla

Artemisia abyssinica Sch.Bip. ex A. Rich. (*Artemisia abyssinica* Sch. Bip.)

Saudi Arabia, Ethiopia.

See *Species Plantarum* 2: 845–850. 1753 and *Phytotherapy research* 15(2): 103–108. 2001, *J. Ethnopharmacol.* 112: 55–70. 2007

(Essential oil antioxidant, antidiabetic. Veterinary medicine.)

in Ethiopia: arrtta bera

Artemisia afra Jacq. ex Willd. (*Artemisia afra* Jacq.)

Tropical Africa. Shrublet, perennial herb, woody-based, erect, tufted, suffruticose, many-branched, spreading, sprawling, stems light grey green, woolly soft much divided leaves grey green to silvery white, strong spicy smell, small yellowish flowers

See *Species Plantarum* 2: 845–850. 1753, *Sp. Pl.*, ed. 4 [Willdenow] 3(3): 1820. 1803, *Pl. Rar. Hort. Schoenbr.* 4: 34, t. 467. 1804 and *Botaniska Notiser* 130: 1–24. 1977, *Phytotherapy Research* 15(2): 103–108. 2001, *Phytotherapy Research* 17(2): 123–128. 2003 [In vitro antiplasmodial evaluation of medicinal plants from Zimbabwe.], *Bot. J. Linn. Soc.* 148: 77–85. 2005, *Journal of Ethnopharmacology* 103(2): 261–275. 2006 [Medicinal plant use in the Bredasdorp/Elim region of the Southern Overberg in the Western Cape Province of South Africa.], Mukinda J.T., Syce J.A. “Acute and chronic toxicity of the aqueous extract of *Artemisia afra* in rodents.” *Journal of Ethnopharmacology* 112(1): 138–144. 2007

(Whole plant and leaves vermifuge, febrifuge; infusion of shoots used as tonic and stomachic. Aerial parts decoction irritant, stomachic, antiplasmodial, cytotoxic, antioxidant, antimicrobial, antifungal, tonic, febrifuge, insect repellent, used to treat coughs, colds, fevers, malaria, convulsions. Burning a mixture of *Helichrysum* and *Artemisia afra* leaves, effective as insect repellent, to keep flies and mosquitoes away.)

in English: African wormwood, S. African absinthe, wild wormwood, wormwood

African names: fivi, iliongana, lengana, lusanje, luyanga, umhlonyane

in Southern Africa: als, wilde-als, wilde-alsem; lengana (Pedi or Transvaal Sotho, South Sotho, Tswana); umHlonyane (Swati, Xhosa, Zulu)

in Tanzania: enjani pus, fivi, injanevyoso, inyaga, linyaga, olunjanyoiiboru

Artemisia alaskana Rydb. (*Artemisia kruhsiana* Besser subsp. *alaskana* (Rydb.) D.F. Murray & Elven; *Artemisia tyrellii* Rydb.; *Artemisia tyrellii* Rydb.)

North America. Perennial herb or subshrub

See *North American Flora* 34(3): 262, 281. 1916, *Taxon* 28: 265–268. 1979, *Journal of the Botanical Research Institute of Texas* 2(1): 443. 2008

(Decoction taken for diabetes.)

in English: Alaska sagebrush, Alaska wormwood

Artemisia alpina Pall. ex Willd. (*Artemisia alpina* Fritsch; *Artemisia alpina* Sch. Bip. ex Willk.; *Artemisia alpina* DC. ex Steud.; *Artemisia caucasica* Willd.; *Artemisia chamisso-niana* Besser ex Hook.; *Artemisia chamissonis* Besser)

Eurasia.

See *Sp. pl.* ed. 4 [Willdenow] 3(3): 1823–1824. 1803, *Nomencl. Bot.* [Steudel], ed. 2. 1: 136. 1840, *Flora* 34: 746. 1851 and *Excursionsfl. Oesterreich* (Ed. 3). 569. 1922, *Kew Bulletin* 52(1): 121–138. 1997

(Found to contain potentially allergenic sesquiterpene lactones. Antibacterial.)

in French: armoise du Caucase

Artemisia annua L. (*Artemisia chamomilla* C. Winkler)

India, China, Europe. Annual herb, erect, many-branched, when bruised very fragrant to strongly sweet scented, furrowed, floral leaves sessile, spreading branching compound panicle, greenish heterogamous flower heads, disk flowers hermaphrodite, smooth obovoid achenes, on waste lands, river banks, in grassland, widely cultivated for aromatic oils

See *Species Plantarum* 2: 845–850. 1753, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 10(1): 87. 1887 and *Plant Systematics and Evolution* 123: 35–54. 1974, *Fitologija* 31: 71–74. 1986, *Bot. Zurn.* 71: 1693. 1986, *Anales del Jardín Botánico de Madrid* 44: 79–96. 1987, *Grassland of China [Zhongguo caoyuan]* 4: 53–60. 1989, *Cytologia* 55: 43–50. 1990, *Grassland of China [Zhongguo caoyuan]* 1990(6): 24–31. 1990, *Acta Scientiarum Naturalium Universitatis Intramongolicae* 22(3): 422–427. 1991, *Journal of Wuhan Botanical Research* 17(4): 382–384. 1999, Liu C., Zhao Y., Wang Y. “Artemisinin: current state and perspectives for biotechnological production of an antimalarial drug.” *Appl. Microbiol. Biotechnol.* 72(1): 11–20. 2006, *Planta Med.* 73(4): 299–309. 2007, *Journal of Ethnopharmacology* 120(3): 302–314. 2008, *The Times of India*, Kolkata, February 5, 2011

(Potentially allergenic. The active principle of *Artemisia annua* L., artemisinin, isolated from the aerial parts, exerts not only antimalarial activity but also profound cytotoxicity against tumor cells; antifebrile, antiviral, antimycobacterial, to treat jaundice, anorexia, boils and skin diseases. Seeds to treat flatulence, dyspepsia and tuberculosis.)

in English: sweet Annie, sweet sagewort, sweet wormwood, wormwood

in China: qing hao, huang hua hao, chou hao (= stinking herbage), tsao hao (= grassy herbage), qinghao, qinhao

in Tibetan: mkhan-chung

in Vietnam: ngai hoa vang, ngai ma, ngai si, thanh cao, thanh hao, thanh hao hoa v[af]ng, ng[air] si, thao cao

in Argentina: banai, buriasco, María Juana

Artemisia anomala S. Moore (*Artemisia vulgaris* Linnaeus var. *integrifolia* Franchet)

China. Stems hollow

See *Species Plantarum* 2: 845–850. 1753, *Journal of Botany, British and Foreign* 13(152): 227–228. 1875 and *Plant Systematics and Evolution* 152: 195–210. 1986

(Antiphlogistic and antitoxin, used externally in the treatment of burns and inflamed skin.)

Artemisia apiacea Hance (*Artemisia carvifolia* Buch.-Ham. ex Roxb. var. *apiacea* (Hance) Pamp.)

China, Vietnam, India. Herb, branched, flowers yellowish

See *Roxb. Hort. Beng.* 61, 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 422. 1832, *Annales Botanices Systematicae* 2: 895. 1852 and *Nuovo Giornale Botanico Italiano*, new series 34(3): 648. 1927

(Aerial plant parts febrifuge, hemostatic, tonic, stomachic, to treat tuberculosis, malaria, epistaxis, anorexia, externally to treat hemorrhoids and skin diseases.)

in Vietnam: rau bao, thanh cao, th[ar]o cao

Artemisia arborescens L.

North Africa. A morphologically highly variable species

See *Species Plantarum*, Editio Secunda 2: 1188. 1763 and *Taxon* 30: 695–696. 1981, *Planta Med.* 47(1): 49–51. 1983, *Boletim da Sociedade Broteriana*, ser. 2 61: 105–124. 1988, *Flora Mediterranea* 5: 357–363. 1995, *Planta Med.* 61(3): 242–245. 1995 [Chemical constituents of *Artemisia arborescens* and the effect of the aqueous extract on rat isolated smooth muscle.], Merzouki A., Ed-derfoufi F., Molero Mesa J. “Contribution to the knowledge of Rifian traditional medicine. II: Folk medicine in Ksar Lakbir district (NW Morocco).” *Fitoterapia* 71(3): 278–307. 2000, *Eur. J. Pharm. Biopharm.* 59(1): 161–168. 2005, *Organic Letters* 9(12): 2377–2380. 2007

(Antioxidant, antiviral, antiherpetic. The powdered leaf used as an external application in the treatment of cutaneous infections and wrinkles, burns, sensitive skin, acne, keratosis, sunburn, inflamed skin. For respiratory problems, inhalation could be beneficial for bronchitis, (asthmatic and catarrhal), coughs, sinus and chest congestion. It is best avoided in pregnancy, and for babies and children; avoid use on sensitive or damaged skin.)

in English: powis castle, silver wormwood, tree wormwood, wormwood

in Saharan Atlas, Beni Farah: merriw, meriw

in Arabic: shagaret mariam, shadjret mariam, shiba, sheeba

Artemisia arbuscula Nutt. (*Artemisia tridentata* subsp. *arbuscula* (Nutt.) H.M. Hall & Clem.; *Artemisia tridentata* var. *arbuscula* (Nutt.) McMinn; *Seriphidium arbusculum* (Nutt.) W.A. Weber)

North America. Bush, inflorescence brownish purple

See *Species Plantarum* 2: 845–850. 1753, *Transactions of the American Philosophical Society*, new series, 7: 398. 1841 and *Publications of the Carnegie Institution of Washington* 326: 138. 1923, *Man. Calif. Shrubs* 608–609. 1939, *Great Basin Naturalist Memoirs* 2: 229–243. 1978, *American Journal of Botany* 65: 589–605. 1981, *Phytologia* 55(1): 7. 1984, *American Journal of Botany* 86(12): 1754–1775. 1999

(Found to contain potentially allergenic sesquiterpene lactones.)

in English: low sagebrush, sagebrush, small sagebrush

Artemisia arctica Less. subsp. *arctica* (*Artemisia arctica* Less. subsp. *saxicola* (Rydb.) Hultén; *Artemisia norvegica* Fr. subsp. *saxatilis* H.M. Hall & Clem.; *Artemisia norvegica* Fr. subsp. *saxatilis* (Besser) H.M. Hall & Clem.; *Artemisia norvegica* Fr. subsp. *saxatilis* (Besser ex Hook.) H.M. Hall; *Artemisia norvegica* Fr. var. *piceetorum* S.L. Welsh & Goodrich; *Artemisia norvegica* Fr. var. *saxatilis* (Besser) Jeps.; *Artemisia norvegica* Fr. var. *saxatilis* Jeps.; *Artemisia norvegica* var. *saxatilis* (H.M. Hall & Clem.) Jeps.)

North America. Perennial subshrub

See *Novit. Fl. Suec.* 56. 1817 and *Phylogenet. Meth.* 58, fig. 5, pl. 3. 1923, *Man. Fl. Pl. Calif.* [Jepson] 1141. 1925, *Acta Univ. Lund.* 2, 46(1): 1561. 1950, *Taxon* 28: 265–268. 1979, *Brittonia* 33(3): 295. 1981

(Decoction taken for diabetes.)

in English: boreal sagebrush

Artemisia argyi H. Lév. & Vaniot (*Artemisia argyi* H. Lév. & Vaniot var. *incana* Pampanini; *Artemisia handel-mazzettii* Pampanini; *Artemisia leucophylla* Komarov; *Artemisia leucophylla* Kitag.; *Artemisia leucophylla* (Turcz. ex Besser) C.B. Clarke; *Artemisia leucophylla* Turcz. ex Clarke; *Artemisia nutans* Nakai; *Artemisia nutans* Willd.; *Artemisia nutantiflora* Nakai; *Artemisia princeps* Pampanini var. *candicans* Pampanini; *Artemisia vulgaris* L. var. *incana* Maximowicz; *Artemisia vulgaris* var. *incanescens* Franchet; *Artemisia vulgaris* var. *incanescens* Mattf.)

China.

See *Species Plantarum* 2: 845–850. 1753, *Nouveaux Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 54. 1834, *Primitiae Florae Amurensis* 160. 1859,

Compositae Indicae 162. 1876, *Plantae Davidianae ex Sinarum Imperio* 1: 169. 1884 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(163–165): 138. 1910, *Flora Koreana* 2: 33. 1911, *An Enumeration of Plants Hitherto Known From Corea*: 344. 1922, *Fl. Sylvat. Koreana* 14: 101. 1923, *Repertorium Specierum Novarum Regni Vegetabilis* 22(618–626): 248. 1926, *Nuovo Giornale Botanico Italiano*, new series 36(4): 444–446, 455. 1930, *Bot. Zurn.* 71: 1693. 1986, *Grassland of China [Zhongguo caoyuan]* 4: 53–60. 1989, *Regnum Veg.* 127: 21. 1993

(Antiphlogistic, detoxifying and hemostatic.)

Artemisia aschurbajewii C. Winkl.

Eurasia.

See *Species Plantarum* 2: 845–850. 1753

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia austriaca Jacq. (*Artemisia austriaca* var. *jacquiniana* DC.; *Artemisia austriaca* var. *jacquiniana* Besser; *Artemisia austriaca* var. *orientalis* Fisch. ex DC.; *Artemisia nivea* Redowsky ex Willdenow; *Artemisia repens* Pallas ex Willdenow)

Europe, North Africa, North America, Asia. Perennial

See *Species Plantarum* 2: 845–850. 1753, *Systema Vegetabilium*. Editio decima quarta 744. 1784, *Species Plantarum*. Editio quarta 3(3): 1840. 1803, *Enum. Pl.* 2: 863. 1813, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 316. 1822, *Nouveaux Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 49. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 112. 1837 and *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 32: 57–70. 1985, *Fitologija* 31: 71–74. 1986, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 769–771. 1991, *Pharmacologyonline* 1: 131–138. 2008

(Used in Ayurveda. Hepatoprotective and antiinflammatory, antiparasitic.)

in India: dawanakaha, marikolindoo

Artemisia balchanorum H. Kraschen (*Seriphidium balchanorum* (Krasch.) Poljakov)

Europe.

See *Species Plantarum* 2: 845–850. 1753 and *Vestnik Akademii nauk Kazakhskoi SSR* 11: 171. 1961

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia bigelovii A. Gray (*Artemisia petrophila* Wootton & Standl.; *Seriphidium bigelovii* (A. Gray) K. Bremer & Humphries) (The species name honors either Dr. John Milton Bigelow (1804–1878) or Dr. Jacob Bigelow (1787–1879). Dr. John Milton Bigelow was a 19th century professor of botany at Detroit Medical College who collected in the West under

Whipple in the Pacific Railroad Survey of 1853–1854; Dr. Jacob Bigelow was a botanist and physician.)

North America. Aromatic shrub, corollas of yellow disk flowers and minute ray flowers, associated with mycorrhizal fungus in the genus *Glomus*, good browse plant

See *Species Plantarum* 2: 845–850. 1753, *Pacif. Railr. Rep.* 4(5): 110. 1857 and *Contributions from the United States National Herbarium* 16(4): 193. 1913, *Vestnik Akademii nauk Kazakhskoi SSR* 11: 171. 1961, *J. Org. Chem.* 30 (12): 4340–4342. 1965, *Great Basin Naturalist Memoirs* 2: 229–243. 1978, *American Journal of Botany* 68: 589–605. 1981, *Bulletin of the Natural History Museum, London (Botany)* 23(2): 118. 1993, *American Journal of Botany* 86(12): 1754–1775. 1999

(Found to contain potentially allergenic sesquiterpene lactones.)

in English: big basin sagebrush, Bigelow sagebrush, Bigelow's sage

Artemisia brachyloba Franchet (*Artemisia adamsii* Kitagawa; *Artemisia adamsii* Besser; *Artemisia licentii* Pampanini)

China.

See *Species Plantarum* 2: 845–850. 1753, *Nouveaux Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 27. 1834, *Plantae Davidianae ex Sinarum Imperio* 1: 171. 1884 and *Nuovo Giornale Botanico Italiano*, new series 34(3): 676–677. 1927, *Index florae jeholensis*, cum appendice: plantae novae vel minus cognitae ex Manshuria / by Takenoshin Nakai et al. 50. 1936, *Journal of Wuhan Botanical Research* 17(4): 382–384. 1999

(Antiphlogistic, antifebrile, diuretic and antihelminthic.)

Artemisia brevifolia Wall. ex DC. (*Artemisia brevifolia* Wall.; *Artemisia maritima* L.; *Seriphidium brevifolium* (Wall. ex DC.) Ling & Y.R. Ling)

India, Kashmir, Nepal. Perennial, many-branched, highly aromatic, small reddish flower heads in cluster or branched spike

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 103. 1837 and *Acta Phytotaxonomica Sinica* 18(4): 513. 1980, *Journal of Ethnopharmacology* 93(2–3): 265–268. 2004

(A decoction from leaves and flowers useful against gastrointestinal parasites, worms. Leaves extract carminative, anthelmintic, stomachic, strongly aromatic, used in asthma and against round worms. Dried leaves powder mixed with oil of *Prunus persica* used to prepare incense, *dhoop*. Veterinary medicine, antihelminthic activity against nematodes.)

in English: worm seed

in India: dronapati, khamchu, phur-nag, purchu, seski

Artemisia californica Less. (*Artemisia abrotanoides* Nutt.; *Artemisia fischeriana* Besser; *Artemisia foliosa* Nutt.; *Crossostephium californicum* (Less.) Rydb.; *Crossostephium californicum* Rydb.)

North America.

See *Linnaea* 6: 220, 523. 1831, *Nouveaux Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 21. 1834, *Transactions of the American Philosophical Society*, new series, 7: 397–399. 1841 and *North American Flora* 34(3): 243. 1916, *American Journal of Botany* 75: 652–668. 1988

(Potentially allergenic.)

in English: California sagebrush

Artemisia cana Pursh subsp. *cana* (*Artemisia columbiensis* Nutt.)

North America.

See *Species Plantarum* 2: 845–850. 1753, *Flora Americae Septentrionalis*; or, ... 2: 521. 1814 [1813], *Transactions of the American Philosophical Society*, new series, 7: 398. 1841 and *Vestnik Akademii nauk Kazakhskoi SSR* 11: 171. 1961, *American Journal of Botany* 68: 589–605. 1981, *Phytologia* 55(1): 7. 1984, *American Journal of Botany* 86(12): 1754–1775. 1999

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia cana Pursh subsp. *viscidula* (Osterh.) Beetle (*Artemisia argilosa* Beetle; *Artemisia cana* var. *viscidula* Osterh.; *Artemisia viscidula* (Osterh.) Rydb.)

North America.

See *Flora Americae Septentrionalis*; or, ... 2: 521. 1814 [1813] and *Bulletin of the Torrey Botanical Club* 27(9): 507. 1900, *Bulletin of the Torrey Botanical Club* 33(3): 157. 1906, *Rhodora* 61(723): 84–85. 1959, *American Journal of Botany* 68: 589–605. 1981, *American Journal of Botany* 86(12): 1754–1775. 1999

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia capillaris Thunb. (*Artemisia capillaris* Miq.; *Oligosporus capillaris* (Thunb.) Poljak.)

China. Many-branched subshrub, closely resembles *Artemisia campestris* and *Artemisia scoparia*

See *Species Plantarum* 2: 845–850. 1753, *Flora Japonica*, ... 309. 1784, *Bull. Sci. Soc. Philom. Paris* 1817: 33. 1817 and *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, *Bull. Fac. Educ. Yamaguchi Univ.* 23: 93–100. 1973, *Kromosomo*, II 100: 3123–3135. 1975, *Taxon* 26: 557–565. 1977, *Botanical Bulletin of Academia Sinica* 19: 53–66. 1978, *Heterocycles* 19: 1615–1617. 1982, *Journal of Agricultural and Food Chemistry* 31(3): 667–668. 1983, *Plant Systematics and Evolution* 152: 195–210. 1986, *Grassland of China*

[*Zhongguo caoyuan*] 4: 53–60. 1989, *Grassland of China* [*Zhongguo caoyuan*] 1990(6): 24–31. 1990, *Biological and Pharmaceutical Bulletin* 17(1): 150–151. 1994, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Phytotherapy Research* 9(8): 563–566. 1995, *Journal of Phytogeography and Taxonomy* 42: 133–153. 1995

(Buds cholagogue, antiinflammatory, antipyretic, antihepatotoxic and diuretic, used in jaundice; insect antifeeding from growing buds. Leaves applied in poultices to cure headache; poultice of leaves tied over the soles of feet in sunstroke.)

in English: capillary wormwood, Chinese moxa weed

in China: yin chen hao, yin chen, shinh yin chen (= stone artemisia)

in India: jhirun, marwa, undri

in Malaysia: rumput roman

in Vietnam: ng[ar]i l[as] kim, nh[aa]n tr[aaf]n b[aws]c

Artemisia carruthii Alph. Wood ex Carruth (*Artemisia bakeri* Greene; *Artemisia carruthii* var. *wrightii* (A. Gray) S.F. Blake; *Artemisia coloradensis* Osterh.; *Artemisia kansana* Britton; *Artemisia pringlei* Greenman; *Artemisia vulgaris* subsp. *wrightii* (A. Gray) H.M. Hall & Clem.; *Artemisia vulgaris* var. *carruthii* (Alph. Wood ex Carruth) F.C. Gates; *Artemisia wrightii* A. Gray; *Artemisia wrightii* var. *coloradensis* (Osterh.) A. Nelson)

North America.

See *Species Plantarum* 2: 845–850. 1753, *Transactions of the Kansas Academy of Science* 5: 51. 1877, *Proceedings of the American Academy of Arts and Sciences* 19: 48. 1883, *An Illustrated Flora of the Northern United States* 3: 466, f. 4012. 1898 and *Bulletin of the Torrey Botanical Club* 27(9): 506–507. 1900, *Plantae Bakerianae* 3: 31. 1901, *Proceedings of the American Academy of Arts and Sciences* 40: 50. 1904, *New Manual of Botany of the Central Rocky Mountains* 568. 1909, *Publications of the Carnegie Institution of Washington* 326: 80. 1923, *Transactions of the Kansas Academy of Science* 42: 138. 1939, *Journal of the Washington Academy of Sciences* 30(11): 472. 1940, *Taxon* 26: 107–109. 1977, *Great Basin Naturalist* 39: 419–426. 1979

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia cina Berg ex Poljakov (*Seriphidium cinum* (Berg ex Poljakov) Poljakov)

China.

See *Species Plantarum* 2: 845–850. 1753 and *Vestnik Akademii nauk Kazakhskoi SSR* 11: 171. 1961, *China Journal of Chinese Materia Medica* 16(2): 67–9, 125. 1991, *J. Egypt. Soc. Parasitol.* 32(3): 725–36. 2002

(Used in Ayurveda. Antihelminthic drug, may cause dermatitis. Treatment of lice, pediculosis. Used to treat endoparasites and stomach problems in dogs, cats and pigs.)

in English: levant wormseed

in India: cauvara

Artemisia conaensis Ling & Y.R. Ling

China. Perennial herb

See *Acta Phytotaxonomica Sinica* 18(4): 511–512, pl. 9. 1980

(Used medicinally for coughs.)

Artemisia copa Phil.

Chile.

See *Viage al Desierto de Atacama* 207. 1860 and *Pharmacological Research* 50(1): 59–63. 2004

(Antinociceptive, antibacterial and antiinflammatory, analgesic; infusions used against abdominal, liver and kidneys pains. Probably hallucinogenic.)

in Chile: copa-copa

Artemisia douglasiana Besser (*Artemisia campestris* L. var. *douglasiana* (Besser) B. Boivin; *Artemisia camporum* Rydb.; *Artemisia caudata* Michx. var. *douglasiana* (Besser) B. Boivin; *Artemisia commutata* Besser var. *douglasiana* (Besser) Besser; *Artemisia desertorum* var. *douglasiana* Besser; *Artemisia heterophylla* Nutt.; *Artemisia ludoviciana* Nutt. var. *douglasiana* (Besser) D.C. Eaton; *Artemisia vulgaris* var. *douglasiana* (Besser) H. St. John)

North America.

See *Species Plantarum* 2: 845–850. 1753, *Flora Boreali-Americana* 2: 129. 1803, *Bull. Sci. Soc. Philom. Paris* 1817: 33. 1817, *The Genera of North American Plants* 2: 143. 1818, *Dictionnaire des Sciences Naturelles* 36: 25. 1826, *Flora Boreali-Americana* 1(6): 323, 325. 1833, *Bulletin de la Société Impériale des Naturalistes de Moscou* 8: 69, 73. 1835, *United States Geological Exploration of the Fortieth Parallel. (Plant decoction a wash for burns. Extract of leaf and flower given against toothache, urinary problems and intestinal disorders. Anticonvulsant. Found to contain potentially allergenic sesquiterpene lactones.)

in English: dragon wormwood

in India: burtse, shersing, tsa-chheh

Artemisia dubia Wall. ex Besser (*Artemisia dubia* Wall.; *Artemisia dubia* L. ex B.D. Jacks.)

Nepal, India.

See *Numer. List* [Wallich] n. 3307. 1831, *Nouveau Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 39. 1834 and *Index to the Linnean Herbarium*, with Indication of the Types of Species marked by Carl von Linné... London, 1912

(Plant paste taken to control fever; plant extract used as anthelmintic, antispasmodic, stomachic; plant juice applied to boils. Root juice for stomach disorders. Crushed leaves used as fish poison.)

in Nepal: chhaphung, chyang chin, nagadamani, pati, tite pati

Artemisia feddei A. Lévillé & Vaniot (*Artemisia lavandulaefolia* DC.; *Artemisia lavandulifolia* DC.; *Artemisia lavandulifolia* DC. var. *feddei* (H. Lév. & Vaniot) Pamp.)

Korea.

See *Species Plantarum* 2: 845–850. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 110, n. 94. 1837 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(163–165): 138. 1910, *Nuovo Giornale Botanico Italiano*, new series 36(4): 467. 1930, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1810–1811. 1989, *Planta medica* 65(5): 400–403. 1999, *J. Microbiol. Biotechnol.* 17(12): 2061–2065. 2007, *Pharmacologyonline* 1: 131–138. 2008

(Essential oil antibacterial. Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia franserioides Greene

North America.

See *Bulletin of the Torrey Botanical Club* 10(4): 42. 1883 and *American Journal of Botany* 63: 1393–1403. 1976, *Life Sciences* 70(9): 1035–1040. 2002

(Antioxidant. Found to contain potentially allergenic sesquiterpene lactones.)

in English: basin sagebrush, mountain mugwort, ragweed sagebrush, sand sagebrush

Artemisia frigida Willd. (*Absinthium frigidum* (Willd.) Besser; *Artemisia frigida* Eichw.; *Artemisia frigida* var. *gmeliniana* Besser; *Artemisia frigida* Willd. var. *gmeliniana* (Besser) Besser; *Artemisia frigida* var. *williamsiae* S.L. Welsh)

Russia, Siberia, Alaska. Perennial subshrub

See *Species Plantarum*. Editio quarta [Willdenow] 3(3): 1838. 1803, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1(8): 251. 1829, *Flora Boreali-Americana* (Hooker) 1: 321. 1833 and *Great Basin Naturalist* 28(3): 149–151, f. 3. 1968

(Stems and foliage for bathing sore, varicose veins; leaves infusion taken for colds, as a vermifuge or applied to wounds; stems and leaves infusion for indigestion, a decoction for diabetes.)

in English: fringed sagebrush, fringed sagewort, prairie sagewort, sagebrush, wormwood

Artemisia furcata M. Bieb. (*Artemisia furcata* subsp. *tacomensis* (Rydb.) Hultén; *Artemisia furcata* var. *heterophylla* (Besser) Hultén; *Artemisia heterophylla* Besser; *Artemisia hyperborea* Rydb.; *Artemisia tacomensis* Rydb.; *Artemisia trifurcata* Willd. ex Spreng.; *Artemisia trifurcata* Desf.; *Artemisia trifurcata* Steph. ex Spreng.)

North America. Perennial herb

See *Flora Taurico-Caucasica* 3: 567. 1819, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 488. 1826, *Cat. Pl. Horti Paris.* ed. 3, 161 et 399. 1829 and *North American Flora* 34(3): 262. 1916, *Arkiv för Botanik, Andra Serien* 7(1): 139. 1967[1968], *Bot. Žurn.* (Moscow & Leningrad) 60(3): 395–401. 1975, *Taxon* 28: 265–268. 1979,

Taxon 30: 852–853. 1981, *Sida* 12: 409–417. 1987, *Rhodora* 99: 33–55. 1997

(Juice used as an antidote for poison oak.)

in English: forked wormwood

Artemisia genipi Weber (*Absinthium spicatum* (Wulfen) Dulac; *Artemisia bocconi* All.; *Artemisia genipi* Stechm.; *Artemisia genipi* var. *accedens* Rouy; *Artemisia rupestris* All.; *Artemisia rupestris* Lam.; *Artemisia rupestris* Lag. & Rodr.; *Artemisia rupestris* L.; *Artemisia rupestris* Scop.; *Artemisia rupestris* O.F. Müll.; *Artemisia rupestris* Asso; *Artemisia rupestris* Vill.; *Artemisia spicata* Wulfen; *Artemisia spicata* subsp. *villarsii* (Godr.) Arcang.; *Artemisia spicata* subsp. *villarsii* H. Marcaillou & A. Marcaillou; *Artemisia villarsii* Godr.)

Europe. Alpine plant

See *Sp. Pl.* 2: 847. 1753, *Fl. Carniol.*, ed. 2. 2: 146. 1772, *Syn. Stirp. Aragon.* 117. 1779, *Encycl.* (Lamarck) 1(1): 262. 1783, *Fl. Pedem.* i. 169. 1785, *Hist. Pl. Nauk SSSR* 9: 173. 1946, *Flora Intramongolica* 6: 328. 1982, *Grassland of China [Zhongguo caoyuan]* 4: 53–60. 1989, *Journal of Wuhan Botanical Research* 8: 9–12. 1990, *Grassland of China [Zhongguo caoyuan]* 1990(6): 24–31. 1990, *Acta Scientiarum Naturalium Universitatis Intramongolicae* 22(3): 422–427. 1991, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Journal of Arid Environments* 72(6): 953–963. 2008

(Used for making antiphlogistic drugs.)

Artemisia orientalihengduangensis Ling & Y.R. Ling (*Artemisia roxburghiana* Besser var. *orientalis* Pampanini; *Artemisia vulgaris* L.; *Artemisia vulgaris* Matfeld)

Asia.

See *Species Plantarum* 2: 845–850. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 22(618–626): 248. 1926, *Bull. Bot. Res., Harbin* 8(4): 34. 1988, *Regnum Veg.* 127: 21. 1993

(Antimicrobial, vermifuge.)

Artemisia pallens Wall. ex DC.

India.

See *Prodr.* (DC.) 6: 120. 1838

(Used in Sidha. Oil aphrodisiac, aromatherapy. Used for the treatment of diabetes mellitus. Magic, ritual, ceremonial, Davana is dedicated to Shiva.)

in India: anantakarantam, anantapitam, cilesmanarapani, cukantacutcam, cukatmarankara, cutcampiccam, davana, davanam, davna, irucukantappuntu, kantotkatam, manali, manalicaceti, manalicam, manamali, manamalikkoluntu, mancarikam, manci, mancitavikam, manji pathre, manmali, manmalikkoluntuceti, marikkoluntu, marukkam, marukkarakkoluntu, marukkoluntu, maruvakam, maruvu, maruvuceti, mayirkkoluntu, mentiyakkoluntu, mentiyam, municatilam, napacariyaceti, napacariyam, panitanki, pintitakam, pintitakoluntu, pintitam, pompani, pompaniceti, puccaraturakam, talamalam, tamanakantam, tamanam, tavanakam, tavanam, tipanicam, tipanicapputu, vacikaram, vacikaramaruvu, vauciki, vaucikikkoluntu, venkapattirakam, virai

Artemisia parviflora Buch.-Ham. ex Roxb. (*Artemisia parviflora* Roxb. ex D. Don; *Artemisia parviflora* Aitch.; *Oligosporus parviflorus* (Buch.-Ham. ex Roxb.) Poljak.)

India, Myanmar. Shrubs, greenish-white flowers, fragrant, aromatic

See *Bull. Sci. Soc. Philom. Paris* 1817: 33. 1817, *Prodromus Florae Nepalensis* 181. 1825, *Fl. Ind.* 3: 420. 1832 and *Nuovo Giornale Botanico Italiano*, new series 34(3): 665–666. 1927

(Plant antiviral, juice applied on the forehead of children in case of convulsions. Leaves chewed for sore throat; green leaves decoction applied on skin diseases. Ceremonial.)

in India: dhor davana, kirmani, leibakngou, niapfu

Artemisia passiflora Roxb.

India.

(Veterinary medicine, dried leaf powder given to birds or chickens.)

in India: imra molitong

Artemisia persica Boissier (*Artemisia togusbulakensis* O. Fedtschenko)

Iran, China.

See *Diagnoses plantarum orientalium novarum*, ser. 1, 1(6): 91. 1846 and *Trudy Botaničeskago Muzeja Imperatorskoj Akademii Nauk* 1: 143. 1902, *Plant Systematics and Evolution* 152: 195–210. 1986, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994

(Used as an antiphlogistic, hemostatic, for invigorating the function of digestion.)

Artemisia princeps Pampanini (*Artemisia mongolica* Chang; *Artemisia mongolica* (Fisch. ex Besser) Nakai; *Artemisia montana* (Nakai) Pamp.; *Artemisia montana* f. *occidentalis* Pampanini; *Artemisia montana* var. *nipponica* (Nakai) Pampanini; *Artemisia parvula* Pampanini; *Artemisia vulgaris* f. *nipponica* Nakai; *Artemisia vulgaris* L. var. *indica* Hayata; *Artemisia vulgaris* var. *indica* (Willd.) Maxim.; *Artemisia vulgaris* var. *latiloba* Nakai; *Artemisia vulgaris* var. *latiloba* Ledeb.; *Artemisia vulgaris* var. *maximowiczii* Nakai)

SE Asia.

See *Species Plantarum*. Editio quarta 3: 1846. 1800, *Flora Altaica* 4: 83. 1833, *Nouveaux Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 53. 1834, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 8: 535. 1872 and *Compos. Ital.*, n.s., 36(4): 444, 460–462. 1930, *Sunyatsenia* 3(4): 297. 1937, *Kromosomo, II* 100: 3123–3135. 1975, *Journal of Hokkaido University of Education: Section IIB* 37: 5–17. 1986, *The Journal of Japanese history of pharmacy* 35(1): 55–62. 2000

(In Japan and China *moxa* are made from the leaves or the downy hairs on the leaves and stems of one or more species of *Artemisia* L. or *Crossostephium* Less., including

Artemisia princeps and *Artemisia montana*. Moxibustion has been a part of acupuncture practice for thousands of years; traditionally it includes direct moxibustion, in which moxa sticks are burned at acupuncture points on the skin, and indirect moxibustion. Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia ramosa Lag. ex Willk. & Lange (*Artemisia ramosa* C. Sm. ex Link; *Seriphidium ramosum* (C. Sm.) Dobignard)

Tropical Africa.

See *Phys. Besch. Canar. Ins.* [Buch] 148. 1825, *Prodr. Fl. Hispan.* 2(1): 71. 1865 and *Candollea* 52(1): 151. 1997

(Whole plant and leaves anthelmintic, stomachic, for indigestion.)

Artemisia rothrockii A. Gray (*Artemisia tridentata* subsp. *rothrockii* (A. Gray) H.M. Hall & Clem.; *Artemisia tridentata* var. *rothrockii* (A. Gray) McMinn; *Seriphidium rothrockii* (A. Gray) W.A. Weber)

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 398. 1841, *Geological Survey of California, Botany* 1: 618. 1876 and *Publications of the Carnegie Institution of Washington* 326: 138. 1923, *Man. Calif. Shrubs* 608. 1939, *Vestnik Akademii nauk Kazakhskoi SSR* 11: 171. 1961, *Great Basin Naturalist Memoirs* 2: 229–243. 1978, *American Journal of Botany* 68: 589–605. 1981, *Phytologia* 55(1): 8. 1984

(Found to contain potentially allergenic sesquiterpene lactones.)

in English: Rothrock sagebrush

Artemisia roxburghiana Wall. ex Besser (*Artemisia roxburghiana* Wall.)

India.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 9: 57. 1836

(Leaves as poultice for severe stomachache.)

in India: chamur, kunjaa

Artemisia rupestris Linnaeus (*Absinthium rupestre* (L.) Besser; *Absinthium rupestre* (L.) Schrank, also Schrenk; *Absinthium rupestre* var. *oelandicum* Besser; *Absinthium rupestre* var. *thuringiacum* Besser; *Absinthium viridifolium* Besser; *Absinthium viridifolium* (Ledebour) Besser; *Absinthium viridifolium* var. *rupestre* (L.) Besser; *Artemisia dentata* Willdenow; *Artemisia rupestris* subsp. *woodii* Neilson; *Artemisia rupestris* var. *oelandica* (Besser) DC.; *Artemisia rupestris* var. *thuringiaca* (Besser) DC.; *Artemisia rupestris* var. *viridifolia* (Besser) DC.; *Artemisia rupestris* var. *viridis* (Besser) DC.; *Artemisia viridifolia* Sprengel; *Artemisia viridis* Willdenow ex DC.)

North America.

See *Species Plantarum* 2: 845–850. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Primitiae Florae Salisburgensis* 203. 1792, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1(8): 246–249. 1829 and *The Canadian Field-Naturalist* 82(2): 119, f. 2A-D. 1968

(Used as antiphlogistic and hemostatic.)

Artemisia rutifolia Stephan ex Sprengel

Russia, Siberia.

See *Systema Vegetabilium*, editio decima sexta 3: 488. 1826 and *Plant Systematics and Evolution* 152: 195–210. 1986, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994

(Found to contain potentially allergenic sesquiterpene lactones.)

Artemisia sacrorum Ledeb. (*Artemisia sacrorum* Ledeb. ex Hook. f.)

Himalaya, Tibet, China. Perennial shrub, strongly aromatic, green flower-heads in clusters, leaf and stem used as fertilizer, animal fodder, grazed by cattle, moderate to heavy grazing

See *Dissert. De Artem.* 17, 30. 1775, *Species Plantarum*. Editio quarta 3: 1845. 1800, *Mém. Acad. Imp. Sci.* 5: 571. 1805, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1(8): 259. 1829, *The Flora of British India* 3(8): 326–327. 1881 and *Southern Tibet, Botany* 6(3): 41, pl. 3, f. 1. 1922

(Roots and leaves as a poultice used to relieve headache and for healing sores. Leaf decoction for colds and cough. Ceremonial, burned for religious ceremonies, used as incense in religious prayers.)

in India: ganga-tulsi, kandam, khampa shridhi

in Nepal: chyangchin, kamba girbu, namnewa, paati, titepati

in Tibet: gang ge, geng gai, geng ge peng, kang ge

Artemisia scoparia Waldst. & Kit. (*Artemisia capillaris* Thunb. var. *scoparia* (Waldst. & Kit.) Pamp.; *Artemisia scoparia* Maxim., non Waldst. & Kit.; *Oligosporus scoparius* (Waldst. & Kit.) Less.)

Central Europe. Herb, corollas yellow-cream

See *Flora Japonica*, ... 309. 1784, *Descriptiones et Icones Plantarum Rariorum Hungariae* 1: 66, pl. 65. 1802, *Linnaea* 9: 191. 1834, *Primitiae Florae Amurensis* 159. 1859 and *Nuovo Giornale Botanico Italiano*, new series 34(3): 642. 1927, *Trudy Instituta Botaniki. Alma-Ata* 11: 167. 1967, *Pharmaceutical biology* 33(3): 193–197. 1995

(Anticholesterolemic, antiserotonergic, antipyretic, antiseptic, spasmolytic, cholagogue, diuretic, vasodilator, antibacterial, used for earache, jaundice, hepatitis and inflammation of the gall bladder. Smoke from the dried herb used for burns and the infusion given as purgative.)

in English: redstem wormwood

in India: chambur, seeta-bani

Artemisia selengensis Turczaninow ex Besser (*Artemisia cannabifolia* H. Lév.; *Artemisia cannabifolia* var. *nigrescens* H. Lév.; *Artemisia selengensis* var. *cannabifolia* (H. Lév.) Med.* 46(13): 1015–1018. 2007

(Used in Ayurveda, Unani and Sidha. Very poisonous to livestock. Occupational allergy, weed dermatitis. Antimalarial, vermifuge, antispasmodic, sedative, tonic, antihyperglycemic, hepatoprotective, diuretic, antipyretic, vulnerary, expectorant, stomachic and emmenagogue; used to treat menstrual disorders, epistaxis, hemorrhoids, vomiting, colic, asthma, earache, rheumatism, impetigo, diarrhea, and externally to treat skin diseases, ulcers and sores. Fresh leaves pounded with roots of *Capparis assamica*, extract applied on forehead in headache. Roots anthelmintic, but large doses cause harmful effect, uterus contraction, abortion. Whole plant burnt over the fire and the smoke drives out mosquitoes and other insects. Magico-religious beliefs, used in cleaning or purifying ceremonies.)

in English: common mugwort, common wormwood, felonherb, fleabane, green-ginger, Indian wormwood, maidenwort, motherwort, mugwort, sailor's tobacco, St John's plant, wild wormwood, wormwood

in Bolivia: artemisa, altamiza, mark'u altamisa, mark'ualtamisa

in Southern Africa: umhlonyane (Zulu)

in China: ai ye, ai hao

(Shoots infusion drunk to stop vomiting blood.)

in Borneo: tekalong

in Malaya: terap

Artocarpus gomezianus Wall. ex Trécul (*Artocarpus gomezianus* Wall., nom. nudum)

India, Vietnam. Tree, cylindrical bole, black bark, copious white sap, young leaf sticky scabrous, ripe fruits and roasted seeds eaten

See *A Numerical List of Dried Specimens* [Wallich] 4660. 1831, *Annales des Sciences Naturelles, Botanique* sér. 3, 8: 118. 1847 and *Pharmaceutical Biology* 43(8): 651–657. 2005, *Chemistry & Biodiversity* 3(10): 1138–1143. 2006

(Used in Ayurveda. Antiviral, antiretroviral agent, phenolics with anti-HSV and anti-HIV activities; antiherpetic flavones from the heartwood; moderate to potent tyrosinase inhibitory activity.)

in English: monkey jack

in India: anjannu, armu, badhar, dewa sali, dieng sohram, esuluhuli, ikui, kammaregu, kanchi simbu, kshudraphanas, kul, lakucha, lakuchamu, likuchamu, nakkaraenu, nakkaremu, phala, vatar, votamba, wotomba

Malayan names: merubek, monsoon tampang, tampang bulat, tampang burong, tampang nangka, tampang nasi, tampang sering, tapang

Artocarpus gomezianus Wall. ex Trécul subsp. *zeylanicus* F.M. Jarrett

India.

See *Journal of the Arnold Arboretum* 41: 90. 1960

(Bark extract taken as emetic; inner bark chewed along with betel leaves in place of *Areca* nut.)

in India: hudehulli, theettippatta

Artocarpus heterophyllus Lam. (*Artocarpus brasiliensis* Gomez; *Artocarpus heterophylla* Lam.; *Artocarpus integer* auct. - sensu mult.; *Artocarpus integra* Merr.; *Artocarpus integrifolia* L.f.; *Artocarpus integrifolius* L.f.; *Artocarpus maxima* Blanco; *Artocarpus maximus* Blanco; *Artocarpus philippensis* Lam.)

India, Malaysia. Tree, evergreen, monoecious, crown densely spreading, all living parts exude viscid yellowish-white latex, oval glossy leathery leaves, leafy stipules, inflorescences solitary borne axillary, flowers and fruit borne on the trunk or large branches, male flower heads barrel-shaped or ellipsoid, fertile male flowers with tubular bilobed perianth, male and female heads on a cauliflorous shoot, fruit (syncarp) barrel- or pear-shaped with short pyramidal protuberances or warts, horny endocarp, seeds oblong-ellipsoid, young leaves readily eaten by cattle, fruits edible, seeds eaten boiled or roasted, yellow dye extracted from wood

See *Suppl. Pl.* 412. 1782 [1781 publ. Apr 1782], *Encyclopédie Méthodique, Botanique* (Lamarck) 3(1): 209–210. 1789, *Fl. Filip.* [F.M. Blanco] 669. 1837 and *Interpr. Rumph. Herb. Amboin.* 190. 1917, *J. Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996, *Journal of Ethnopharmacology* 99(3): 403–407. 2005

(Used in Ayurveda and Sidha. Leaves of *Allophylus cobbe*, *Antidesma roxburghii* and *Artocarpus heterophyllus* used in the preparation of *choarak*, a local wine, health tonic, but intoxicating when consumed in large amount. Flowers, leaves and bark, decoction and latex, to treat wound, diarrhea, emaciation and skin diseases. Bark extracts antiviral; wood sedative and its pith abortifacient. Root for skin diseases and asthma, fever and diarrhea; root paste for headache. Ripe fruit demulcent, cooling and laxative; for tuberculosis, mature fruit processed with molasses and given; unripe fruits astringent; ash of fruit peduncle given in fever; young fruits pounded with roots of *Caesalpinia cucullata* Roxb. (*Mezoneuron cucullatum* (Roxb.) Wight & Arn.) and given in swellings of feet, arms, legs. Seed starch to relieve biliousness, roasted seeds aphrodisiac, pulp and seeds cooling and nutritious tonic. Leaves used in skin diseases and as an antidote to snakebite; heated leaves placed on wounds, and the ash of the leaves burned with maize and coconut shells used to heal ulcers; stem bark of *Ficus racemosa* ground with

that of *Artocarpus heterophyllus* and leaves of *Phyllanthus amarus* given to promote fertility. Latex promotes healing of abscesses, snakebite and glandular swellings; gum applied to burns. Veterinary medicine, leaves for placental retention. Ceremonial, superstitions, rituals, festivals, magico-religious beliefs.)

in Philippines: nangka

in Thailand: champada

Artocarpus integrifolius L.f. (*Artocarpus integrifolia* L.f.)

India.

See *Suppl. Pl.* 412. 1782 [1781 publ. Apr 1782]

(Used in Ayurveda and Sidha. Bark or root decoction for high fever.)

in India: alasu, apushpa, ashaya, atibrihatphala, cakka, cakkai, chakka, chakki, champa, champakalu, chuckkai, ekaravalli, gujje, halasima, halasina, halasinatiga, halasu, halsina, halsu, hulsen, iticcakka, itichchakka, jaca, jaka, jakka, kandakiphala, kantakaphaa, kantakaphala, kantaki, kantakiphala, kantaphala, kanthal, kantiphala, katahara, kathal, kathar, katiahar, katol, kosha, kottaccakka, kottachchakka, kujje, kuvi, mahasarja, mridangapha, mulaphalada, murajaphala, murasabalam, pagal, pala, palachu, palakkay, palasa, palasu, palavu, pale, panas, panasa, panasam, panasero, panos, pashumusta, pela, phalada, phalasa, phalavrikshaka, phalina, phanas, phanasa, phunnas, pila, pilav, pilavu, pilpazham, plavu, putaphala, sira, skandaphala, sthula, sthulakantaphala, tagar, tage, thagai, tsjaca, varikka, varukkai, vasukkai, verppala, verupanasa

Malay names: akar nangka bubor, nangka, nangka bubor

Artocarpus kunstleri King

India.

See *The Flora of British India* 5: 540. 1888

(For ulcers, poultice with the inner bark.)

Malay name: terap

Artocarpus lakoocha Roxb. (*Artocarpus ficifolius* W.T. Wang; *Artocarpus lacucha* Buchanan-Hamilton ex D. Don; *Artocarpus lacucha* Buch.-Ham.; *Artocarpus lacucha* Roxb.; *Artocarpus lakoocha* Wall. ex Roxb.; *Artocarpus yunnanensis* Hu)

China. Tree, dense rounded crown, red brown bark, white latex, alternate coriaceous leaves, young shoots densely red-brown hairy, mature leaves leathery and slightly rough above, male inflorescences ovoid to ellipsoid, compound fleshy syncarp, velvety yellow sweet and sour edible fruit, good fodder

See *Mem. Wern. Soc.* 5: 333. 1826, *Flora Indica*; or, descriptions of Indian Plants ed. 1832. 3: 524. 1832 and *Bulletin of the Fan Memorial Institute of Biology* 8: 32. 1937, *Acta Phytotaxonomica Sinica* 6(3): 274–275, pl. 55, f. 23. 1957, *Taxon* 26(5–6): 529. 1977

(Used in Ayurveda and Sidha. Bark masticatory, often used as a substitute for betel nut; powdered bark antiseptic, applied to sores, small pimples and cracked skin; bark infusion applied to pimples and cracked skin. Leaves in skin diseases and snakebite. Latex applied on toothache and dental caries. Ripe fruits sweetened juice given as cooling agent in fever; unripe fruit used as laxative. Fruits and seeds used in constipation and diarrhea; seeds purgative. Roots antipyretic, anthelmintic.)

in English: iacoocha, monkey jack

in China: ye bo luo mi

in Nepal: badahar, badar, bahar, borhar, dewa

in Thailand: haat, kaa-yaе, mahaat, mahaat baiyai, taa-pae, taa-paeng

Artocarpus mariannensis Trécul

Pacific. Large tree, straight trunks, sticky white latex, monoecious, male and female flowers on the same tree at ends of branches, fruit a small fleshy syncarp, pulp deep yellow when ripe, leaves edible, closely related to *Artocarpus altilis*

See *Ann. Sci. Nat., Bot.*, sér. 3. 8: 114. 1847

(Root astringent, purgative; bark to treat headaches. Diluted latex taken internally to treat diarrhea, stomachaches and dysentery. Latex rubbed to treat broken bones and sprains and plastered on the spine to relieve sciatica. Sap from the crushed petioles used to treat ear infections or sore eyes. Dried male flowers burned to repel mosquitoes and other flying insects. Magic, ritual.)

in English: Mariannas bread-fruit, seeded breadfruit

in Pacific: chebiei, dokdok, dugdug, ebiei meduuliou, mai, maiyah, mei chocho, mei kole, mejwaan, mos en kosrae, te mai, ulu elihe, ulu elise

Artocarpus nitidus Trécul

China, Indonesia.

See *Ann. Sci. Nat., Bot.*, sér. 3. 8: 119. 1847 and *Journal of Ethnopharmacology* 45(2): 75–95. 1995

(For diarrhea and other gastrointestinal problems.)

in China: guang ye gui mu

Artocarpus nitidus Trécul subsp. *lingnanensis* (Merrill) F.M. Jarrett (*Artocarpus lingnanensis* Merrill; *Artocarpus parvus* Gagnepain)

China.

See *Lingnan Sci. J.* 7: 302. 1929, *J. Arnold Arbor.* 41: 124. 1960

(Fruits for dysentery.)

in China: gui mu

Artocarpus odoratissimus Blanco (*Artocarpus mutabilis* Becc.; *Artocarpus tarap* Becc.)

Philippines. Evergreen tree, large lobed leaves, can be confused with *Artocarpus elasticus*

See *Fl. Filip.* [F.M. Blanco] 671. 1837 and *Nelle Foreste di Borneo* 626, 637. 1902

(Roots decoction taken as antibacterial, astringent.)

in English: green tarap

in Indonesia, Malaysia (Borneo): keiran, lumuk, lumuq, pi-ien, pingan, tarap, terap

in Philippines: loloi, madang, marang

Arum L. Araceae

From the Greek name *aron*, Coptic *aro* ‘climbing plant, winding’, quite similar to *ar*, *ahor* ‘snake, serpent’. See Carl Linnaeus, *Species Plantarum.* 2: 964, 966. 1753, *Genera Plantarum.* Ed. 5. 413. 1754 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana.* 10: 15–25. 1988, *Kew Bulletin* 44(3): 390–392. 1989, P.C. Boyce, *The genus Arum.* A Kew Magazine Monograph. Cambridge 1993.

(Poisonous, toxic and dangerous, foliage and berries poisonous, but the root, if suitably treated, can yield an edible starch; do not consume or taste the root in its raw state; berries and sap of the plant can be fatally toxic to animals. Skin irritation after contact with root juices. Stomach pains, dizziness, and cramping after ingestion of berries; burning and swelling of the lips, mouth, tongue and throat. Insecticidal activity of *Arum maculatum* tuber lectin, antimicrobial, pro-inflammatory activity.)

in English: Adam-and-Eve, adder's root, cuckoo pint, cuckoo-pint, friar's cowl, lords-and-ladies, Portland arrowroot, wake-robin

Aruncus L. Rosaceae

Latin *aruncus*, *i* ‘the beard of the goat’, a classical name used by Pliny for herbs commonly known as “goat’s beard”; see *Species Plantarum* 1: 490. 1753, C. Linnaeus, *Opera Varia*. 259. 1758 and *Regnum Veg.* 127: 21. 1993.

Aruncus dioicus (Walter) Fernald var. ***acuminatus*** (Rydb.) H. Hara (*Aruncus acuminatus* (Rydb.) Rydb.; *Aruncus dioicus* (Walter) Fernald var. *acuminatus* (Rydb.) Rydb. ex H. Hara; *Aruncus sylvester* Kostel. ex Maxim. subsp. *acuminatus* (Rydb.) Jeps.)

North America. Perennial herb

See *North American Flora* 22(3): 255. 1908, *A Flora of California* 2(2): 168–169. 1936, *Journal of Japanese Botany* 30(3): 68. 1955, *Kalmia* 12: 18. 1982

(Roots decoction taken for colds, indigestion and influenza.)

in English: bride’s feathers, goat’s-beard

Aruncus dioicus (Walter) Fernald var. ***dioicus*** (*Aruncus allegheniensis* Rydb.)

North America. Perennial herb

See *North American Flora* 22(3): 255. 1908, *A Flora of California* 2(2): 168–169. 1936, *Journal of Japanese Botany* 30(3): 68. 1955, *Kalmia* 12: 18. 1982

(Roots applied to bee sting; a decoction of washed roots taken for internal ailments, influenza, abdominal pain, colic.)

in English: bride’s feathers, goat’s-beard

Aruncus dioicus (Walter) Fernald var. ***vulgaris*** (Maxim.) H. Hara (*Aruncus aruncus* (L.) Karst.; *Aruncus sylvester* Kostel. ex Maxim.; *Aruncus vulgaris* (Maxim.) Raf. ex H. Hara; *Spiraea aruncus* L.)

North America. Perennial herb

See *Species Plantarum* 1: 504. 1753, *Flora Caroliniana*, secundum ... 152. 1788, *Sylva Telluriana* 152. 1838 and *Rhodora* 41(489): 423. 1939

(Cyanogenic glycosides found in the leaves. Roots infusion astringent, antipyretic, stomachic, blood purifier, to bathe swollen feet, taken for excessive urination, internal wounds and stomach problems; poulticed root applied to bee stings; roots decoction taken for influenza.)

in English: bride’s feathers

Aruncus sylvester Kostel. ex Maxim. (*Aruncus aruncus* (L.) Karst.; *Aruncus asiaticus* Pojark.; *Aruncus dioicus* var. *kamtschaticus* (Maxim.) H. Hara; *Aruncus dioicus* var. *tenuifolius* (Nakai ex H. Hara) H. Hara; *Aruncus dioicus* (Walter) Fernald var. *triternatus* (Wall. ex Maxim.) Hara; *Aruncus dioicus* var. *vulgaris* (Maxim.) H. Hara; *Aruncus kamtschaticus* (Maxim.) Rydb.; *Aruncus kamtschaticus* var. *tomentosus* (Koidz.) (Contact allergy. Antifungal, antinociceptive and antiinflammatory. Roots to treat pain, dental caries, periodontal disease and inflammation.)

Asarum virginicum L. (*Asarum memmingeri* Ashe; *Hexastylis memmingeri* (Ashe) Small; *Hexastylis virginica* (L.) Small)

North America.

See *Species Plantarum* 1: 442. 1753, *Neogenyton* 3. 1825 and *Manual of the Flora of the northern States and Canada* 348. 1901

(Reported to be irritant.)

Ascarina Forster & Forster f. Chloranthaceae

From the Latin *ascaris*, *idis* ‘intestinal worm’, referring to the shape of the anthers.

Ascarina lanceolata Hook.f.

Pacific, Kermadec Islands, New Zealand. Shrub or small slender tree, rough bark dark reddish-brown, aromatic foliage, flower spikes drooping with insignificant flowers, fruit white with purple stripes

See *Charact. Gen.* 59. 1775, *Journal of the Linnean Society, Botany* 1: 127. 1856

(Leaves used for hair-lotion.)

in Fiji: buevu

Samoan name: afia

Asclepias L. Asclepiadaceae (Apocynaceae)

Latin *asclepias* and Greek *asklepias* for the common swallowwort; Asclepius (Asklepios or Aesculapius), Greek god of medicine, the worship of Asclepius was centered in Epidaurus, the serpent was sacred to Asclepius. See Carl Linnaeus, *Species Plantarum* 1: 214–217. 1753, *Genera Plantarum* Ed. 5. 102. 1754, *A Sketch of the Botany of South-Carolina and Georgia* 1(4): 316, 326–327. 1817, *The Genera of North American Plants* 1: 169–170. 1818, *New Flora and Botany of North America ...* 4: 63. 1836[1838], *Transactions of the American Philosophical Society*, new series, 5(6[3]): 199. 1837[1836], *Proceedings of the American Academy of Arts and Sciences* 12: 66. 1876, *Pittonia* 2(8A): 67. 1890, *Pittonia* 3(17C): 235–238. 1897 and *Manual of the Southeastern Flora* 1073. 1933, W.K.C. Guthrie, *The Greeks and their Gods*. 1950, Woodson, Jr., R.E. “The North

American species of *Asclepias* L.” *Annals of the Missouri Botanical Garden* 41(1): 1–211. 1954, *Bothalia* 20(1): 88. 1990. Low to moderate toxicity, variable toxicities; death is not likely unless large quantities are consumed.

Asclepias albicans S. Watson

Mexico, USA.

See *Proceedings of the American Academy of Arts and Sciences* 24: 59–60. 1889

(Shampoo made by cooking the roots in water used to cure headache.)

Asclepias asperula (Decne.) Woodson subsp. ***capricornu*** (Woodson) Woodson (*Acerates decumbens* (Nutt.) Decne.; *Anantherix angustifolia* Raf.; *Anantherix decumbens* Nutt.; *Anantherix nuttaliana* G. Don; *Asclepias asperula* var. *decumbens* (Nutt.) Shinnery; *Asclepias capricornu* Woodson; *Asclepias capricornu* subsp. *occidentalis* Woodson; *Asclepias decumbens* (Nutt.) K. Schum.; *Asclepias decumbens* (Nutt.) Decne.; *Asclepiodora decumbens* (Nutt.) A. Gray)

North America. Perennial herb, spreading, milky white latex, petals and sepals green or green-yellow

See *Species Plantarum* 1: 216. 1753, *Atlantic Journal* 146. 1832, *Transactions of the American Philosophical Society*, new series, 5(6[3]): 202–203. 1837[1836], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 522. 1844, *Proceedings of the American Academy of Arts and Sciences* 12: 67. 1876, *Die Natürlichen Pflanzenfamilien* 4(2): 239. 1895 and *Annals of the Missouri Botanical Garden* 32: 370. 1945, *Field & Laboratory* 22(2): 58. 1954, *Annals of the Missouri Botanical Garden* 41(1): 195. 1954

(Plant used as a snuff for catarrh, cough, bronchitis. Ceremonial emetic.)

in English: antelope horns

Asclepias californica Greene (*Acerates tomentosa* Torr.; *Asclepias californica* subsp. *californica*; *Gomphocarpus tomentosus* (Torr.) A. Gray; *Gomphocarpus tomentosus* var. *xanti* A. Gray; *Gomphocarpus torreyi* J.F. Macbr.; *Gomphocarpus torreyi* var. *xanti* (A. Gray) Macbr.)

North America. Perennial herb, decumbent, milky-white latex, creamy white flowers

See *Travels in the interior of South Africa* 1: 543. 1822, *Report on the United States and Mexican Boundary ... Botany* 2(1): 160, pl. 44. 1859, *Geological Survey of California, Botany* 1: 477. 1876, *Manual of the Botany of the Region of San Francisco Bay ...* 242. 1894 and *Contributions from the Gray Herbarium of Harvard University* 65: 42. 1922, *Annals of the Missouri Botanical Garden* 41(1): 169. 1954

(Dried, powdered plant applied to spider and insect bites.)

in English: California milkweed, purple milkweed

Asclepias cordifolia (Benth.) Jeps. (*Acerates atropurpurea* Kellogg; *Acerates cordifolia* Benth.; *Asclepias acornuta* Kellogg; *Gomphocarpus cordifolius* Benth.; *Gomphocarpus cordifolius* (Benth.) Benth. ex A. Gray; *Gomphocarpus cordifolius* Benth. ex A. Gray)

North America.

See *Plantas Hartwegianas imprimis Mexicanas* 323. 1849, *Proc. Calif. Acad. Sci.* 1: 65. 1855; 1(ed. 2): 68. 1873, *Proceedings of the California Academy of Sciences* 1: 54. 1865, *Geological Survey of California, Botany* 1: 477. 1876 and *A Flora of Western Middle California* 384. 1901

(Root used as a tonic medicine.)

in English: heartleaf milkweed

Asclepias cryptoceras S. Watson (*Asclepias cryptoceras* subsp. *cryptoceras*; *Acerates latifolia* Torr. & Frem.)

North America. Perennial herb, large greenish-yellow umbellate flowers, petals curled backward

See *A Sketch of the Botany of South-Carolina and Georgia* 1: 316. 1817, *Expeditions of John Charles Fremont* 317. 1845, *United States Geological Exploration of the Fortieth Parallel. Botany* 283, pl. 28, f. 1–4. 1871 [Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany. Washington: Government Printing Office, 1871.*]

(Analgesic. Latex used for ringworm; roots applied to sores, a wash for headaches. Veterinary medicine, juice of plant used for horse with sore back.)

in English: Humboldt mountains milkweed, pallid milkweed

Asclepias curassavica L. (*Asclepias aurantiaca* Salisb.; *Asclepias bicolor* Moench; *Asclepias cubensis* Wenderoth; *Asclepias curassavica* Griseb., nom. illeg., non *Asclepias curassavica* L.; *Asclepias curassavica* Lour., nom. illeg., non *Asclepias curassavica* L.; *Asclepias curassavica* Willd., nom. illeg., non *Asclepias curassavica* L.; *Asclepias curassavica* var. *concolor* Krug & Urb.; *Asclepias margaritacea* Hoffmannsegg ex Schult.; *Asclepias margaritacea* Hoffmanns. ex Roem. & Schult.; *Asclepias nivea* L. var. *curassavica* (L.) Kuntze)

South America, West Indies. Perennial herb, erect, woody at base, simple or many-branched, copious white milky latex, thin opposite leaves, small yellow-orange red flowers, inflorescence an axillary umbel mostly solitary, anthers with an apical incurved membrane, cylindrical dry fusiform follicles, small winged seeds with an apical tuft of silky hairs white, a common weed of pastures, roadsides, waste places

See *Sp. Pl.* 1: 215. 1753, *Flora Cochinchinensis* 1: 170. 1790, *Methodus Plantas Horti Botanici ...* (Moench) 717. 1794, *Prodr. Stirp. Chap. Allerton* 150. 1796, *Species Plantarum. Editio quarta* 1: 1266. 1798, *Systema Vegetabilium* ed. 15 bis

Afr.* [Oliver et al.] 4(1.2): 346. 1902

(Roots infusion analgesic, laxative, diuretic, astringent, taken for venereal diseases. Veterinary medicine, infusion for mastitis.)

in English: aquatic milkweed, swamp milkweed, thin-leaved milkweed, white milkweed

Asclepias prolifera Rottler ex Ainslie

India.

See *Materia indica* 2: 225. 1826 and *Taxon* 26(5–6): 536. 1977

(Used in Sidha.)

in India: nanjarapanjan vayr

Asclepias pumila (Gray) Vail (*Asclepias pumila* Vail; *Asclepias verticillata* var. *pumila* A. Gray)

North America. Perennial herb, erect, milky white latex, flowers white pink

See *Proceedings of the American Academy of Arts and Sciences* 12: 71. 1876, *An Illustrated Flora of the Northern United States* (Britton & Brown) 3: 12. 1898, *Bulletin of the Torrey Botanical Club* 25(4): 175. 1898

(Leaves infusion for diarrhea, also taken by children.)

in English: plains milkweed

Asclepias quadrifolia Jacq. (*Asclepias quadrifolia* var. *oppositifolia* Raf.; *Asclepias vanilla* Raf.)

North America. Perennial, erect, simple, herbaceous, false whorl of leaves, stem from rhizomes, milky sap, pinkish flowers sweetly scented, terminal and axillary umbels

See *Observationum Botanicarum* 2: 8. 1767, *American monthly magazine and critical review* 4: 39. 1818, *Autikon Botanikon* 177. 1840

(Roots infusion analgesic, diuretic, laxative, taken for venereal diseases and to treat backaches; rubbed on warts to remove them. Veterinary medicine, infusion for mastitis.)

in English: four-leaved milkweed, fourleaf milkweed

Asclepias speciosa Torr. (*Asclepias douglasii* Hook.; *Asclepias giffordii* Eastw.)

North America. Perennial herb, erect, leafy, star-like sweet scented flowers

See *Annals of the Lyceum of Natural History of New York* 2: 218–219. 1827, *Flora Boreali-Americana* 2: 53, t. 97. 1837 and Fleming, C.E., Peterson, N.F., Miller, M.R., Vawter, L.R., Wright, L.H. "The narrow-leaved milkweed and the broad-leaved or showy milkweed. Plants poisonous to livestock in Nevada." *Univ. Nev. Agric. Exp. Stn. Bull.*, 99. 1920, *Proceedings of the California Academy of Sciences*, Series 4, 20(5): 150. 1931, *Taxon* 31: 583–587. 1982, Moerman, Daniel E. *Native American Ethnobotany*. 108. 1998

(Plant poisonous to sheep and cattle; leaves, roots, pods and seeds poisonous. However, this plant is so distasteful to livestock that they ingest it only under extreme circumstances. Antidiarrheal, antiseptic, tonic, emetic, ceremonial,

antirheumatic, stomachic, analgesic. Roots decoction for venereal diseases, diarrhea, cough and headache; roots infusion taken for stomachache; poultice of mashed roots applied to swellings, for rheumatism. Plant tops decoction used as an eye-wash for blindness or snowblindness; seeds decoction to draw poison from snakebites. Latex antiseptic and healing, applied to warts, cuts, skin sores, corns, ringworm, syphilitic sores. Not for use during pregnancy. Ceremonial, emetic medicine.)

in English: broad-leaved milkweed, Greek milkweed, milkweed, showy milkweed

in North America: paṅnuṅpala (Lakota)

Asclepias stenophylla A. Gray (*Acerates angustifolia* (Nutt.) Decne.; *Acerates angustifolia* Decne.; *Polyotus angustifolius* Nutt.)

North America. Perennial subshrub, erect, herbaceous, terete, stout vertical rootstock, simple retrorse pubescent stems, white milky sap, small clusters of whitish green or greenish white flowers, short pedunculate umbels in the upper leaf axils

See *Transactions of the American Philosophical Society*, new series, 5(6[3]): 199, 201. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 522–523. 1844, *Proceedings of the American Academy of Arts and Sciences* 12: 72. 1876 and *Annals of the Missouri Botanical Garden* 41(1): 181. 1954

(Root given to children to increase and stimulate the appetite.)

in English: narrow-leaf milkweed, narrow-leaved milkweed, prairie milkweed, slimleaf milkweed

in North America: tiṅsila pejūta (Lakota, means prairie turnip medicine)

Asclepias subulata Decne. (*Asclepias subulata* Larrañaga)

North America. Perennial herb or subshrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 571. 1844 and Larrañaga, Dámaso Antonio (1771–1848), *Escritos* Montevideo: Imp. National, 1923–1927

(Poisonous. Cathartic, emetic, for sore eyes, stomach disorders.)

in English: rush milkweed

in Mexico: cadenilla bronca (Sinaloa); yumete, yamete (Baja California)

Asclepias subverticillata (A. Gray) Vail (*Asclepias galioides* auct. non Kunth; *Asclepias subverticillata* Vail; *Asclepias verticillata* var. *subverticillata* A. Gray)

North America. Perennial herb, erect, flowers pure white to light cream in umbel-like terminal clusters

See *Proceedings of the American Academy of Arts and Sciences* 12: 71. 1876, *Bulletin of the Torrey Botanical Club* 25(4): 178. 1898 and *Ann. Missouri Bot. Gard.* 41: 67. 1954

(Poisonous, toxic, sheep, cattle, horses, chickens and turkeys have been poisoned by horsetail milkweed. Plant used to increase lactation in mothers. Ceremonial.)

in English: horsetail milkweed, poison milkweed, western whorled milkweed, whorled milkweed

Asclepias syriaca L. (*Asclepias apocinum* Gaterau; *Asclepias capitellata* Raf.; *Asclepias cornuta* Cordem.; *Asclepias cornuti* Decne.; *Asclepias elliptica* Raf.; *Asclepias fragrans* Raf.; *Asclepias grandifolia* Bertoloni; *Asclepias intermedia* Vail; *Asclepias kansana* Vail; *Asclepias pubescens* Moench; *Asclepias pubigera* Dumort.; *Asclepias serica* Raf.; *Asclepias syriaca* Blanco, nom. illeg., non *Asclepias syriaca* L.; *Asclepias syriaca* fo. *inermis* J.R. Churchill; *Asclepias syriaca* fo. *leucantha* Dore; *Asclepias syriaca* var. *kansana* (Vail) E.J. Palmer & Steyerl.; *Asclepias pubescens* Moench; *Asclepias pubigera* Dumort.; *Asclepias serica* Raf.)

North America. Perennial herb, leaves downy gray beneath, milky white latex

See *Species Plantarum*, Editio Secunda 1: 214. 1762, *Description des Plantes qui Croissent aux Environs de Montauban* 58. 1789, *Methodus Plantas Horti Botanici ...* 716. 1794, *Medical Repository*, ser. 2, 5: 354. 1808, *Florula belgica*, opera majoris prodromus, auctore ... 52. 1827, *Flora de Filipinas* 204. 1837, *Autikon Botanikon* 179. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 564. 1844, *Memorie della Reale Accademia delle Scienze dell'Istituto di Bologna* 3: 189. 1851, *Fl. Réunion* (E.J. de Cordemoy) 482. 1895 and *Bulletin of the Torrey Botanical Club* 31(9): 457–460, pl. 16, f. 2, 4, pl. 17, 18, f. 2a-f. 1904, *Rhodora* 20(240): 207. 1919, *Annals of the Missouri Botanical Garden* 22(3): 621. 1935, *Rhodora* 40(471): 133. 1938, Reynard, G.B., Norton, J.B. “Poisonous plants of Maryland in relation to livestock.” *Univ. MD. Agric. Exp. Stn. Bull.*, A10. 1942, *Rhodora* 46(550): 387–388. 1944, *Ann. Missouri Bot. Gard.* 41: 105. 1954, *Taxon* 31: 583–587. 1982, *Acta Biologica Cracoviensia, Series Botanica* 32: 172, 177–179, 181–183. 1990, M.R. Gilmore, *Uses of plants by the Indians ...* 57–58. 1991, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 129: 215–226. 1992, *International Organization of Plant Systematists Newsletter* 24: 19–20. 1995

(Dermatitis. This plant has poisoned sheep, but is normally distasteful to livestock; the plant contains cardiac glycosides, toxic to animals. Analgesic, diuretic, antirheumatic, laxative, stomachic, contraceptive, to prevent hemorrhage after childbirth, to increase the appetite. Leaves infusion for stomach troubles. Roots infusion taken for venereal diseases, also taken by women for temporary sterility; root broken up and boiled in water, then cooled and taken with liquid food to produce a flow of milk in a woman's breasts. Latex rubbed on warts, bee stings, ringworm and cuts. Veterinary medicine, infusion for mastitis.)

in English: common milkweed, cotton weed, milkweed, silkweed

in North America: mahintsh (Winnebago), karipiku (Pawnee)

Asclepias tuberosa L. (*Acerates floridana* (Lam.) Hitchc.; *Acerates floridana* Hitchc.; *Asclepias decumbens* L.; *Asclepias decumbens* (Nutt.) K. Schum.; *Asclepias decumbens* K. Schum.; *Asclepias floridana* Lam.; *Asclepias lutea* Raf.; *Asclepias lutea* Mill.; *Asclepias tuberosa* Hort. ex Kunze, nom. illeg., non *Asclepias tuberosa* L.; *Asclepias tuberosa* Roxb., nom. illeg., non *Asclepias tuberosa* L.; *Asclepias tuberosa* fo. *decumbens* (L.) Voss; *Asclepias tuberosa* subsp. *tuberosa*; *Asclepias tuberosa* var. *decumbens* (L.) Pursh)

North America. Perennial herb, leafy, hairy, alternate leaves, deep yellow to dark orange or red flowers, seed pods edible

See *Species Plantarum* 1: 216–217. 1753, *Gard. Dict.*, ed. 8. n. 3. 1768, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 284. 1783, *Medical Repository* ser. 2 5: 361. 1808, *Flora Americae Septentrionalis*; or, ... Beschreibung, kultur und verwendung des gesamten pflanzenmaterials für deutsche gärten. Dritte neubearbeitete Aflage. 1: 663. Berlin, 1894–1896, *Nat. Pflanzenfam.* [Engler & Prantl] 4, Abt. 2: 239. 1895 and *Ann. Missouri Bot. Gard.* 41: 74. 1954, M.R. Gilmore, *Uses of Plants by the Indians* ... 57. 1991, *Chem. Pharm. Bull.* (Tokyo) 48(7): 991–993, 1017–1022. 2000

(Able to produce dermatitis; caution is advised, as large doses of butterfly weed are emetic and purgative. Seeds boiled for diarrhea. Roots analgesic, vasodilator, antispasmodic, laxative, mildly cathartic, expectorant, antirheumatic, tonic, carminative, diaphoretic, for breasts, stomach and intestinal pains, for pleurisy, influenza, diarrhea, dysentery, for dog or coyote bites. Raw roots or infusion for rheumatism, heart, bronchial and pulmonary trouble, a remedy for sores, cuts and wounds; poultice of root used or decoction taken for bruises and swellings, skin ulcers. Poultice of bruised leaves bound to snakebites. Rites and ceremonies, ceremonial emetic.)

in English: butterfly milkweed, butterfly weed, Canada root, chigger flower, chigger weed, Indian paintbrush, orange milkweed, orange root, pleurisy root, raw medicine, silk weed, swallowwort, tuber root, white root, wound medicine

in North America: maka saka, maka saka thata i, kiu maka (Omaha-Ponca)

Asclepias tuberosa L. subsp. *tuberosa*

North America. Perennial herb, leafy, hairy, alternate leaves, deep yellow to dark orange or red flowers, seed pods edible

See *Species Plantarum* 1: 217. 1753, *Encyclopédie Méthodique, Botanique* 1: 284. 1783, *Medical Repository* ser. 2 5: 361. 1808, *Flora Americae Septentrionalis*; or, ... 1: 184. 1814 [1813], *A Sketch of the Botany of South-Carolina and*

Georgia 1: 316. 1817, *Flora Indica*; or, descriptions of Indian Plants 2: 38. 1832, *Linnaea* 20: 27. 1847, *Transactions of the Academy of Science of St. Louis* 5: 508. 1891, *Vilmorin's Blumengärtnererei*. (Able to produce dermatitis; caution is advised, as large doses of Butterfly Weed are emetic and purgative. Seeds boiled for diarrhea. Roots analgesic, vasodilator, antispasmodic, laxative, mildly cathartic, expectorant, antirheumatic, tonic, carminative, diaphoretic, for breasts, stomach and intestinal pains, for pleurisy, influenza, diarrhea, dysentery, for dog or coyote bites. Raw roots or infusion for rheumatism, heart, bronchial and pulmonary trouble, a remedy for sores, cuts and wounds; poultice of root used or decoction taken for bruises and swellings, skin ulcers. Poultice of bruised leaves bound to snakebites. Rites and ceremonies, ceremonial emetic.)

in English: butterfly milkweed, butterfly weed, Canada root, chigger flower, chigger weed, Indian paintbrush, orange milkweed, orange root, pleurisy root, raw medicine, silk weed, swallowwort, tuber root, white root, wound medicine

in North America: maka saka, maka saka thata i, kiu maka (Omaha-Ponca)

Asclepias verticillata L. (*Asclepias parviflora* Leconte ex Decne., nom. illeg., non *Asclepias parviflora* Aiton)

North America. Perennial herb, narrow linear leaves whorled along the stem, small greenish-white flowers

See *Species Plantarum* 1: 217. 1753, *Hortus Kewensis*; or, a catalogue ... 1: 307. 1789, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 570. 1844, *J. Bot.* 36: 265. 1898 and Marsh, C.D., Clawson, A.B. "Poisonous properties of the whorled milkweeds *Asclepias pumila* and *Asclepias verticillata* var. *geyeri*." *U. S. Dept. Agric. Bull.*, 942. 1921, Clark, J.G. "Whorled milkweed poisoning." *Vet. Hum. Toxicol.*, 21: 431. 1979, *Taxon* 31: 583–587. 1982

(Very poisonous to livestock but is unpalatable and rarely consumed, it can cause problems when fed in hay; experimental feeding of fresh eastern whorled milkweed caused poisoning in sheep. Diaphoretic, stimulant, to treat snakebites and nose or throat ailments, used when women didn't have any milk.)

in English: eastern whorled milkweed, horsetail milkweed, whorled-leaf milkweed, whorled milkweed

in North America: waḥpé tin'psila (Lakota, means turnip leaf)

Asclepias viridiflora Raf. (*Acerates ivesii* Wooton & Standl.; *Acerates ivesii* (Britton) Wooton & Standl.; *Acerates lanceolata* Steud.; *Acerates linearis* (A. Gray) Lunell; *Acerates viridiflora* (Raf.) Eaton; *Acerates viridiflora* (Raf.) Pursh ex Eaton; *Acerates viridiflora* var. *ivesii* Britton; *Acerates viridiflora* var. *lanceolata* A. Gray; *Acerates viridiflora*

var. *linearis* A. Gray; *Asclepias ivesii* (Britton) Wootton & Standl.; *Asclepias lanceolata* E. Ives; *Asclepias nutans* Muhl. ex Steud.; *Asclepias viridiflora* Pursh; *Asclepias viridiflora* var. *lanceolata* Torr.; *Asclepias viridiflora* var. *lanceolata* (E. Ives) Torr.; *Asclepias viridiflora* var. *linearis* (A. Gray) Fernald; *Gomphocarpus viridiflorus* (Raf.) Spreng.; *Otanema lanceolata* Raf.; *Otanema latifolia* Raf.; *Otanema ovata* Raf.; *Polyotus heterophyllus* Nutt.)

North America. Perennial, leaves typically have an acuminate shape with an acute tip

See *Flora Caroliniana*, secundum ... 105. 1788, *Medical Repository*, ser. 2, 5: 360. 1808, *Fl. Amer. Sept.* (Pursh) 1: 181. 1814 [Dec 1813], *A Sketch of the Botany of South-Carolina and Georgia* 1: 317. 1817, *American Journal of Science* 1(3): 252, pl. [1]. 1819, *Fl. N. Middle United States* 1: 284. 1824, *Systema Vegetabilium*, editio decima sexta 1: 849. 1824, *Transactions of the American Philosophical Society* 5(6[3]): 199, 201. 1837[1836], *Prodr.* (DC.) 8: 573. 1844, *Memoirs of the Torrey Botanical Club* 5(18): 265. 1894, *Die Natürlichen Pflanzenfamilien* 4(2): 236. 1895, *An Illustrated Flora of the Northern United States* 3: 14. 1898 and *Contributions from the United States National Herbarium* 19: 509. 1915, *Kew Bull.* 52(1): 247. 1997

(Roots antirheumatic, galactagogue, antidiarrheal, astringent, stomachic, used for sore eyes, swellings, rashes, gums, sore throats, diarrhea, to increase milk production.)

in English: green comet milkweed, green milkweed, tall milkweed

in North America: hu ciiǰśká (Lakota)

Asclepias viridis Walter (*Acerates paniculata* (Nutt.) Decne.; *Anantherix grandiflora* Raf.; *Anantherix ovata* Raf.; *Anantherix paniculata* Nutt.; *Anantherix torreyana* G. Don; *Anantherix viridis* (Walter) Nutt.; *Anthanotis procumbens* (Raf.) Raf.; *Anthanotis viridis* (Walter) Raf.; *Asclepias longipetala* Scheele; *Asclepias procumbens* Raf.; *Asclepiodora viridis* (Walter) A. Gray; *Gomphocarpus viridis* (Walter) Spreng.; *Podostigma viridis* (Walter) Elliott)

North America. Perennial herb

See *Flora Caroliniana*, secundum ... 107. 1788, *Memoirs of the Wernerian Natural History Society* 1: 37. 1810, *A Sketch of the Botany of South-Carolina and Georgia* 1: 316, 326–327. 1817, *Florula Ludoviciana*, or, a flora of the state of ... 51–52, 149. 1817, *The Genera of North American Plants* 1: 169. 1818, *Systema Vegetabilium*, editio decima sexta 1: 849. 1824, *Atlantic Journal* 146. 1832, *A General History of the Dichlamydeous Plants* 4: 146. 1837, *Transactions of the American Philosophical Society*, new series, 5: 203. 1837, *New Flora and Botany of North America* ... 4: 59–60. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 521. 1844, *Linnaea* 21: 757–758. 1848 [1849], *Proceedings of the American Academy of Arts and Sciences* 12: 66. 1876 and Smith R.A. et al. “Intoxication of sheep exposed to ozark

milkweed (*Asclepias viridis* Walter).” *Vet. Hum. Toxicol.* 42(6): 349–50. 2000

(Dermatitis. The root is boiled and the tea drunk for kidney trouble.)

in English: antelope-horn milkweed, green antelopehorn, Ozark milkweed, spider milkweed

in North America: hvtki kafka (Seminole)

Asimina Adanson Annonaceae

From the French form of an Indian name, *assiminier*, see *Familles des Plantes* 2: 365. 1763, *Monographie de la famille des Anonacées* 83. 1817 and Murray, N.A. “Revision of *Cymbopetalum* and *Porcelia* (Annonaceae).” *Systematic Botany Monographs* 40: 1–121. 1993.

Asimina triloba (L.) Dunal (*Annona pendula* Salisb.; *Annona triloba* L.; *Asimina glabra* Hort. ex K. Koch; *Asimina triloba* Dunal; *Asimina triloba* Koch; *Orchidocarpum arietinum* Michx., nom. superfl.; *Porcelia triloba* (L.) Pers.; *Uvaria triloba* (L.) Torr. & A. Gray)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 536–537. 1753, *Flora Peruviana, et Chilensis Prodrum* 84, t. 16. 1794, *Flora Boreali-Americana* 1: 329. 1803, *Syn. Pl.* 2: 95. 1806, *Monographie de la famille des Anonacées* 83. 1817, *A Flora of North America: containing ...* 1(1): 45. 1838, *Dendrologie* 1: 384. 1869 and *Bioorg. Med. Chem.* 8(1): 285–290. 2000, *J. Nat. Prod.* 63(11): 1503–1506. 2000, *J. Nat. Prod.* 68(2): 194–197. 2005

(Cytotoxic, anticancer, homeopathic remedy, irritant, pesticidal and feeding-deterrent activities against a variety of pests. The tree has edible fruit that has caused dermatitis in some individuals and can also cause severe gastroenteritis when it is ingested. Seed emetic and narcotic, powdered and applied to hair to kill lice; seed has insecticidal properties. Bark is a bitter tonic. Leaves diuretic, applied to boils, abscesses and ulcers; fruit used as a laxative.)

in English: American pawpaw, custard apple, gopher-apple, North American pawpaw, northern banana, papaw, pawpaw, poor man’s banana

Aspalathus L. Fabaceae (Crotalariaeae)

Latin *aspalathus* and Greek *aspalathos* for a scented and spiny bush, a thorny shrub whose bark and roots yield a fragrant oil, which is used in the preparation of spiced wine, rosewood; see Aristoteles, *Problemata* 906b, ed. C.E. Ruelle-H. Knoellinger-I. Klek, 1922; Plato, *Res Publica* 616a.

Aspalathus linearis (Burm.f.) R. Dahlgren (*Aspalathus contaminata* Druce; *Aspalathus contaminatus* sensu Druce & auct. pl., non (L.) Druce; *Borbonia pinifolia* Marloth; *Psoralea linearis* Thunb.; *Psoralea linearis* Burm. f.)

South Africa. Perennial non-climbing shrub, shrublet, erect to spreading, strong taproot, leaves needle-shaped, small pea-shaped yellow flowers solitary or arranged in dense groups at the tips of branches, small lance-shaped pod, polymorphic

See *Species Plantarum* 2: 711. 1753, *Flora Indica* ... nec non *Prodromus Florae Capensis* 22. 1768, *Prodromus Plantarum Capensium*, ... 135. 1800, *Revisio Generum Plantarum* 1: 161. 1891 and *Trans. Roy. Soc. S. Afr.* 2: 238. 1912, (*Report Botanical Society and Exchange Club of the British Isles* 4: 606. 1916 (publ. 1917), *Opera Botanica* 9(1): 283. 1963, *Bot. Not.* 121: 165–208. 1968, *Economic Botany* 37(2): 164–173. 1983, *J. Agric. Food Chem.*, 45(3): 632–638. 1997, *Bioscience, Biotechnology, and Biochemistry* 61(2): 267–271. 1997, *Veld and Flora* 86(1): 19–21. 2000, *Journal of Ethnopharmacology* 96(1–2): 145–150. 2005, *Cancer Letters* 224: 193–202. 2005, *Veld and Flora* 92(3): 1541–1556. 2006, *Biological and Pharmaceutical Bulletin* 29(6): 1271–1274. 2006, *Phytotherapy Research* 21: 1–16. 2007

(Rooibos tea tonic, stimulant, astringent, antiinflammatory, antiviral, digestive, antispasmodic, antioxidant, strong anti-HIV activity, in the treatment of vomiting, diarrhea and mild gastric complaints, reducing nervous tension and promoting sound sleep; used internally and externally in the treatment of insomnia, eczema, hay fever and asthma.)

in English: red bush tea, rooibos tea

in South Africa: bossietee, rooibos, rooibostee

Asparagus L. Asparagaceae (Liliaceae)

Greek *asparagos*, *aspharagos*, perhaps from *spharageomai* ‘to burst with a noise, to crack’; ancient Indian *sphurjati*; Latin *asparagus*, *i*, ancient name used by the Roman historian C. Suetonius Tranquillus (born towards the end of the 1st century A.D.) and by Plinius; see Carl Linnaeus, *Species Plantarum*. 1: 313–314. 1753, *Genera Plantarum*. Ed. 5. 147. 1754, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 2: 25. 1808, *Histoire Naturelle des Îles Canaries* 3(2:4): xv. 1841, *Abh. Königl. Akad. Wiss. Berlin* 1842: 35. 1844, *Enum. Pl.* [Kunth] 5: 76. 1850, *Journal of the Linnean Society, Botany* 14: 595. 1875 and *Flora URSS* 4: 427. 1935, *Fieldiana, Bot.* 24(3): 59–100. 1952, *Bothalia* 24: 205–209. 1955, *Bothalia* 9: 31–96. 1966, Hepper, F.N. (ed.), *Flora of West Tropical Africa*, ed. 2, 3(1): 1–574. 1968, Anna Amelia Obermeyer (1907–), in *South African Journal of Botany*. 2(3): 243. 1983, *Fl. Mesoamer.* 6: 33. 1994, Demissew, S. *Asparagaceae. Flora of Tropical East Africa*: 1–22. 2006.

Asparagus acerosus Thunb. ex Schult. & Schult.f. (*Asparagus acerosus* Thunb. ex Schult.f.; *Asparagus acerosus* Roxb., nom. illeg.)

India.

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(1): 337. 1829, *Flora Indica*; or, descriptions of Indian Plants 2: 150. 1832

and *Journal of Economic and Taxonomic Botany* 15: 707. 1991 (publ. 1992)

(Root paste given in menstrual irregularities.)

in India: sakti-chara

Asparagus adscendens Roxb. (*Asparagopsis adscendens* (Roxb.) Kunth; *Asparagopsis adscendens* Kunth; *Asparagus satawur* James A. Murray; *Protasparagus adscendens* (Roxb.) Kamble)

India, Himalaya, Pakistan. Prickly straight herbaceous climber, tubers and young shoots cooked as a vegetable

See *Hort. Bengal.* 24. 1814, *Fl. Ind.* ed. 1832, 2: 153. 1832, *Enum. Pl.* 5: 102. 1850 and *J. Econ. Taxon. Bot.* 15(3): 707. 1991 (publ. 1992)

(Used in Ayurveda, Unani and Sidha. Whole plant for dysuria; leaves ground and mixed with milk and drunk for obesity; stem aphrodisiac. Tubers used in dysentery, diarrhea, general debility. Rhizome demulcent, bitter, tonic, galactagogue, diaphoretic, stimulant, aphrodisiac, sperm and libido enhancer, used for diabetes, arthritis, diarrhea, general physical weakness, dysentery, impotence, male sexual disorders. Root bark supposed to give vitality and strength. Veterinary medicine, tubers given to cows to increase lactation.)

in India: dholi moosli, divya aushad (= divine medicine), durnamari, hazarmuli, hirtha-wariya, jhinjani, jhirna, jhirni, kairu, kairwa, khairuwa, mahavrsa, mulsi safaid, musali, musli siyah, naranka pattirakam, pandaari musalee, safed muli, safed musali, safed musli, safedamusli, safeta musli, sallog dooda, sansarmuli, satavar, satavari, sataver, satawar, satwa, shaqaq-ul-misri, shaqaqul-i-misri shaqaqul misri, shaqaqul misri nim kofta, shaqaqul-hindi, shaqqul misri, shasi mulu, shatabari, shedeveli, shwet musali, sufed, sufedmusli, sufedmusli, svetamusali, tannirvittang, tsallo-gadda, tsallogadda, vrsyakanda

Asparagus aethiopicus L. (*Asparagopsis aethiopica* Kunth; *Asparagopsis aethiopica* (L.) Kunth; *Asparagopsis lancea* (Thunb.) Kunth; *Asparagopsis lancea* Kunth; *Asparagus aculeatus* Hort.; *Asparagus aculeatus* Voss; *Asparagus laetus* Salisb.; *Asparagus lanceus* Thunb.; *Asparagus maximus* Hort.; *Asparagus maximus* Voss; *Asparagus sprengeri* Regel; *Protasparagus aethiopicus* (L.) Oberm.)

South Africa. Evergreen climber, spines present on all nodes, flowers sweet-scented, red berries

See *Mant. Pl.* 63. 1767, *Mant. Pl.* 1. 1770, *Prodr. Pl. Cap.* 66. 1794, *Prodr. Stirp. Chap. Allerton* 253. 1796, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 5: 95–96, 104. 1850, *Vilm. Blumengärtn.*, ed. 3. 1: 1047, in syn. 1895 and *Bothalia* 9: 65. 1966, *South African Journal of Botany* 2(3): 243. 1983, *Journal of Ethnopharmacology* 45(1): 27–33. 1995, *Journal of Ethnopharmacology* 119(3): 455–461. 2008

(Berry ingestion could result in gastric upset, vomiting, abdominal pain or diarrhea; allergic dermatitis. Taenicidal,

anthelmintic, anticancer (*in vitro*), used for bladder and kidney ailments, lung conditions, tuberculosis and as a diuretic.)

in English: asparagus fern, Sprenger's asparagus

in South Africa: haakdoring

Asparagus africanus Lam. (*Asparagopsis juniperina* Kunth; *Asparagopsis lamarckii* Kunth, nom. illeg.; *Asparagopsis schlechtendalii* Kunth; *Asparagus africanus* var. *biarticulatus* De Wild. & T. Durand; *Asparagus africanus* var. *microcarpus* Balf.f.; *Asparagus africanus* var. *pubescens* Baker; *Asparagus asiaticus* auct., non L.; *Asparagus asiaticus* var. *ellenbeckianus* Engl., nom. nud.; *Asparagus asiaticus* L. var. *mitis* (A. (Used in Ayurveda. Roots demulcent, tonic, for urinary infection, stomach troubles, gonorrhoea, piles, diabetes, rejuvenating tonic.)

in India: ghigini, keru, musli, satavari, satawari, shatavari

Asparagus densiflorus (Kunth) Jessop (*Asparagopsis densiflora* Kunth; *Asparagus myriocladus* Baker; *Asparagus sarmentosus* var. *comatus* Baker; *Asparagus sarmentosus* var. *densiflorus* (Kunth) Baker; *Asparagus sprengeri* Regel; *Protasparagus densiflorus* (Kunth) Oberm.)

South Africa. Erect, perennial herb, scrambling, extensive root systems, leaves alternate and scale-like, small very sweetly scented axillary drooping flowers, fruit a bright red berry

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 96. 1850, *J. Linn. Soc., Bot.* 14: 625. 1875, *J. Bot.* 27: 43. 1889 and *Bothalia* 9: 65. 1966, *South African Journal of Botany* 2: 243. 1983, *Nucleus* (Calcutta) 35(2,3): 93–97. 1992, *Nucleus* (Calcutta) 36(3): 141–144. 1993, *Nucleus* (Calcutta) 40(1,2): 7–12. 1997

(Low toxicity only if eaten; eating of berries may cause gastrointestinal problems; skin irritation, redness, swelling and blisters following contact with sap.)

in English: asparagus-fern, basket asparagus, emerald fern, Sprenger's asparagus

in China: fei zhou tian men dong

Asparagus falcatus L. (*Asparagus aethiopicus* var. *ternifolius* Baker; *Asparagus falcatus* var. *ternifolius* (Baker) Jessop; *Protasparagus falcatus* (L.) Oberm.)

Trop. Africa, India, Sri Lanka. Vine, climbing, creeper, woody, bushy, spiny, white scented flowers

See *Species Plantarum* 1: 313. 1753 and *Bothalia* 9: 70. 1966, *South African Journal of Botany* 2: 243–244. 1983

(Root antibiotic, aphrodisiac, nerve tonic and antispasmodic, to treat constipation. Ashes from dry leaves applied to fresh wounds, burns.)

in English: large forest asparagus, sicklethorn, yellowwood asparagus

in Japan: yanagi-ba-temmondo

in South Africa: doringtouw, imbelekazana

in Tanzania: lutona, mnamila mpurimi, mwimkangulu

Asparagus filicinus Buch.-Ham. ex D. Don (*Asparagus filicinus* var. *brevifolius* Baker; *Asparagus filicinus* var. *brevipes* Baker; *Asparagus filicinus* var. *giraldii* C.H. Wright; *Asparagus filicinus* var. *megaphyllus* F.T. Wang & T. Tang; *Asparagus filicinus* var. *microclada* Hook.f.; *Asparagus qinghaiensis* Y. Wan; *Protasparagus filicinus* (Buch.-Ham. ex D. Don) Kamble; *Protasparagus filicinus* var. *brevifolius* (Baker) Kamble; *Protasparagus filicinus* var. *brevipes* (Baker) Kamble; *Protasparagus filicinus* var. *microclada* (Hook.f.) Kamble)

China, Himalaya. Erect herb, young shoots and tubers cooked as vegetable

See *Prodromus Florae Nepalensis* 49. 1825, *J. Linn. Soc., Bot.* 14: 605. 1875, *Fl. Brit. India* 6: 315. 1892 and *Gardener's chronicle*, ser. 3 44: 122, f. 48. 1908, *Bulletin of the Fan Memorial Institute of Biology*: 7: 290. 1937, *Guihaia* 11(4): 289, f. 1. 1991, *J. Econ. Taxon. Bot.* 15: 708–709. 1991 (publ. 1992)

(Used in Ayurveda. Roots used to cure weakness, tuberculosis, sexual debility, urinogenital disorders, dysuria, cooked in water for bathing to treat skin diseases. Veterinary medicine, roots fed to cattle to increase milk production.)

in English: fern asparagus

in China: tu bai bu, yang chi tian men dong

in India: chiriya-kanda, kaunta, sahasimuli, sansbai, sata-vari, sharanoi, sherno

in Tibet: ni shin cau wa, pa-za

Asparagus flagellaris (Kunth) Baker (*Asparagopsis flagellaris* Kunth; *Asparagus abyssinicus* Hochst. ex A. Rich.; *Asparagus africanus* Lam. var. *abyssinicus* (Hochst. ex A. Rich.) Fiori; *Asparagus flagellaris* Baker; *Asparagus pauli-guilelmi* Solms; *Asparagus pauli-guilelmii* var. *katangensis* De Wild. & T. Durand; *Asparagus schweinfurthii* Baker; *Asparagus somalensis* Chiov.)

Trop. & S. Africa, W. Arabian Pen. Erect or scrambling woody perennial shrub, scandent, twisted branches bearing strong spines, leaves scale-like, leafy needle-like cladodes in clusters along stems with recurved spines, stems densely covered with cladode needles, white fragrant flowers on jointed stalks, small fleshy orange berries, in wooded grasslands

See *Tent. Fl. Abyss.* 2: 319. 1850, *Enum. Pl.* 5: 103. 1850, *J. Linn. Soc., Bot.* 14: 613, 614, 616. 1875 and *Bull. Soc. Roy. Bot. Belgique* 40: 33. 1901, *Result. Sci. Miss. Stefan.-Paoli Somal. Ital.* 1: 170. 1916

(Aphrodisiac, antiprotozoal, antimalarial, antifertility, anti-implantation, a traditional cure for problems related to reproductive health, used for diuresis and syphilis, swellings, Guinea worm sores; pounded plant drunk to treat problems in early pregnancy. Leaves or root chewed to facilitate childbirth. Boiled roots to treat gonorrhoea, roots infusion a remedy for venereal diseases. Magic, roots boiled for burst lungs caused by witchcraft.)

in English: wild asparagus

in Nigeria: maza adawa, tsatsarinbera

in Tanzania: kasesanhanga, kasolanhanga, lukungwisa, mwinika nguu

Asparagus gonocladus Baker (*Asparagus gonocladus* Baker; *Protasparagus gonocladus* (Baker) Kamble)

Sri Lanka, India.

See *Journal of the Linnean Society, Botany* 14: 627. 1875 and *J. Econ. Taxon. Bot.* 15: 709. 1991 (publ. 1992)

(Root aphrodisiac, when boiled with oil applied to cutaneous diseases. Fever in children, contact therapy, roots hung around the neck)

in India: challagaddalu, kadu majjige gedde, pillipichara, sathavarimool, shakakul, thanneervittan kizhangu, zatar

Asparagus macowanii Baker (*Asparagus macowanii* var. *zuluensis* (N.E. Br.) Jessop; *Asparagus zuluensis* N.E. Br.; *Protasparagus macowanii* (Baker) Oberm.)

Madagascar, Mozambique, S. Africa.

See *Journal of the Linnean Society, Botany* 14: 609. 1875 and *Bull. Misc. Inform. Kew* 1912: 283. 1912, *Bothalia* 9: 58. 1966, *South African Journal of Botany* 2: 243. 1983

(Used for divination.)

in English: Zulu asparagus

in Swaziland: silevu sembuti

Asparagus officinalis L. (*Asparagus officinalis* var. *altilis* L.; *Asparagus polyphyllus* Steven)

Europe to Mongolia, NW. Africa. Dioecious perennial herb with climbing or erect stems, robust woody rhizome, pendulous greenish yellow flowers solitary or in pairs in the leaf-axils

See *Species Plantarum* 1: 313. 1753, *Gen. Pl.* ed. 5, 147. 1754, *Bulletin de la Société Impériale des Naturalistes de Moscou* 30: 343. 1857 and *Fl. Mascareignes* 183: 8. 1978, *Bot. tuvittatturu, urttuvakantam, utaka mulam, utakamulam, vaishnavi, vannattikkilanku, vari, varivali, varivalikkilanku, varivam, varivari, varunamuni, vasudevapriyankari, viduri-buru, vipucatturu, viputacatturu, vishvasya, visva, vrishya, zatars

in Nepal: ban kurilo, kopi, kurilo, pujutoro

in Sanskrit: mahabirya, shatamuli

in Tibet: chitawar, ne u sin, nye-shing, satmuli, shatawari

in Congo: minimanva, otende

in Tanzania: ling'oto

Asparagus ramosissimus Baker (*Asparagus scandens* var. *deflexus* Baker; *Myrsiphyllum ramosissimum* (Baker) Oberm.)

South Africa.

See *Gard. Chron.*, n.s., 2: 6. 1874, *J. Linn. Soc., Bot.* 14: 622. 1875 and *Bothalia* 15: 87. 1984

(Treatment of colic. Protective charm against snakes.)

in English: cascade asparagus

in Swaziland: ibutha

Asparagus rottleri Baker (*Asparagus floribundus* Royle, nom. inval.; *Protasparagus rottleri* (Baker) Kamble)

India.

See *Ill. Bot. Himal. Mts.*: 393. 1840, *J. Linn. Soc., Bot.* 14: 611. 1875 and *J. Econ. Taxon. Bot.* 15: 709. 1991 (publ. 1992)

(Presumably extinct endemic medicinal plant. Red listed. Tuber cooling.)

in India: peddapillipicara, peddapillipichara

Asparagus rubicundus P.J. Bergius (*Asparagopsis dregei* Kunth; *Asparagopsis niveniana* (Schult. & Schult.f.) Kunth; *Asparagopsis thunbergii* Kunth, nom. illeg.; *Asparagus nitidus* J.R. Forst. ex Baker; *Asparagus nivenianus* Schult. & Schult.f.; *Asparagus thunbergianus* Schult.; *Asparagus thunbergianus* Schult. & Schult. f.; *Protasparagus rubicundus* (P.J. Bergius) Oberm.)

South Africa. A fibrous-rooted, hairless shrub, smooth dark stems, sharp slightly curving spines, flowers usually solitary in the axils of the long needle-like leaves, red berries

See *Descriptiones Plantarum ex Capite Bonae Spei, ...* 88. 1767, *Syst. Veg.* 7: 331, 333. 1829, *Enum. Pl.* 5: 84–85, 88. 1850, *Fl. Cap.* 6: 263. 1896 and *South African Journal of Botany* 2(3): 244. 1983, *Bothalia* 25: 208. 1995

(Used for bladder and kidney ailments, lung conditions, tuberculosis and as a diuretic.)

in English: wild asparagus

in South Africa: katdoring, wag-'n-bietjie

Asparagus sarmentosus L. (*Asparagopsis sarmentosa* (L.) Kunth; *Asparagus sarmentosus* Delile; *Asparagus sarmentosus* Heyue; *Asparagus sarmentosus* var. *comatus* Baker; *Asparagus sarmentosus* var. *kunthii* Baker; *Protasparagus sarmentosus* (L.) Kamble)

India. Herb, long fleshy whitish root

See *Sp. Pl.* 1: 314. 1753, *Enum. Pl.* 5: 97. 1850, *Journ. Linn. Soc.* xvi. 625. 1875 and *J. Econ. Taxon. Bot.* 20: 270. 1996

(Used in Ayurveda, Unani and Sidha. Roots demulcent, tonic, also boiled in oil and applied in diseases of the skin.)

in India: challa-gaddalu, cimaiccataveri, cimaitannir vit-tankilanku, halarru-makkal, jayibem, kilavari, majjigegadde, pappa kilangu, philli-taga, pilli-pichara, sadavari, sahasravirya, satavari, satavari-mull, satmuli, shakakul, shakakul-hindi, shaqaqul, shatavali, shatavari-kizhanna, shimai shadavari, sufed mush, tanner-vittang-kalung, tannimuttan-kizhangu, tannir vittan, tannir-vittan-kizhangu, tannirvittankizhangu, thannirvithan kalangu, thannirvittan kalangu, utaka mulam, wari

Asparagus schoberioides Kunth (*Asparagus micranthus* Siebold & Zucc. ex Baker; *Asparagus parviflorus* Turcz.; *Asparagus rigidulus* Nakai; *Asparagus schoberioides* var. *subsetaceus* Franch.; *Asparagus sessiliflorus* Oett.; *Asparagus sieboldii* Maxim.; *Asparagus wrightii* A. Gray) (After Gottlieb (Gottlob) Schober, c. 1675–1739, physician and hydrotherapist in Northern Germany, St. Petersburg and Moscow, (from 1717) on a commission from Peter the Great (1672–1725) travelled along the Volga, the Caspian Sea and Iran, wrote *Disputatio ... de cholera*. Trajecti ad Rhenum [Utrecht] 1696; see Carl (Karl) Friedrich von Ledebour (1785–1851), *Icones Plantarum*. 1: 11. (May-Dec.) 1829.)

Siberia, Japan.

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 70. 1850, *Mem. Amer. Acad. Arts, n.s.*, 6: 413. 1859, *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 9: 287. 1859, *J. Linn. Soc., Bot.* 14: 604. 1875, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 7: 112. 1884 and *Bot. Mag. (Tokyo)* 27: 213. 1913, Van Steenis, C.G.G.J. (ed.) *Flora Malesiana* 9: 1–600. Noordhoff-Kolff, N.V., Djakarta. 1979–1983 [as *Asparagus racemosus*.]

(Stem and leaves for backache. Root sap for the fungal scalp disease favus, also termed tinea favosa.)

in Japan: chikap-muk, ikkew-kar-mun

Asparagus setaceus (Kunth) Jessop (*Asparagopsis setacea* Kunth; *Asparagus asiaticus* var. *amharicus* Pic. Serm.; *Asparagus conglomeratus* auct., sensu Baker, non Baker, nom. illegit.; *Asparagus plumosus* auct., non Baker; *Asparagus plumosus* Baker; *Asparagus plumosus* var. *tenuissimus* auct.; *Asparagus zanzibaricus* Baker; *Protasparagus plumosus* (Baker) Oberm.; *Protasparagus setaceus* (Kunth) Oberm.)

Ethiopia to S. Africa. A slender, climbing or ascending, branched perennial, with round, green and wiry stems, with very numerous slender branchlets

See *Abh. Königl. Akad. Wiss. Berlin* 1842: 82. 1842, *Enum. Pl.* 5: 82. 1850, *J. Linn. Soc., Bot.* 14: 614. 1875 and *Miss. Stud. Lago Tana* 7(1): 194. 1951, *Bothalia* 9: 51. 1966, *S. African J. Bot.* 2: 243–244. 1983, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 294–295. 2003, *Journal of Ethnopharmacology* 111: 303–307. 2007, *Journal of Ethnopharmacology* 112: 152–161. 2007

(Used for wounds, diarrhea, abscess, postpartum pains, urination problems, toothache, sores, for boils, leaves and stems pounded, local application; chewing crushed and pounded leaves for cough. Decoction of branches used for pulmonary infections; decoction of roots used as a diuretic; roots used for hypotonic labor. Veterinary medicine. Love charms.)

in English: asparagus fern, climbing asparagus-fern, fern asparagus, lace-fern, wild asparagus

in Ethiopia: saritii

in Kenya: karûrûra, rura, rûrura, tumbae

in South Africa: imvane

in Swaziland: mahlabane, silevu sembuti, umutsi wekubeleka

Asparagus suaveolens Burch. (*Asparagopsis spine-scens* Kunth; *Asparagopsis suaveolens* (Burch.) Baker; *Asparagopsis triacantha* Kunth; *Asparagopsis zeyheri* Kunth; *Asparagus intangibilis* Dinter; *Asparagus omahekiensis* K. Krause; *Asparagus spinescens* Steud. ex Schult. & Schult.f., nom. illeg.; *Asparagus spinosissimus* Kuntze; *Asparagus stipulaceus* var. *spinescens* (Kunth) Baker; *Asparagus suaveolens* auct., sensu Jessop, non Burch., p.p., misapplied name; *Asparagus triacanthus* Willd. ex Schult. & Schult.f., nom. illeg.; *Protasparagus suaveolens* (Burch.) Oberm.)

Kenya to S. Africa.

See *Enum. Pl.* 5: 91–93. 1850, *J. Linn. Soc., Bot.* 14: 617–618. 1875, *Revis. Gen. Pl.* 3(2): 315. 1898 and *Bot. Jahrb. Syst.* 51: 447. 1914, *Repert. Spec. Nov. Regni Veg.* 29: 269. 1931, *S. African J. Bot.* 2: 243–244. 1983, *Journal of Ethnopharmacology* 96(3): 603–606. 2005

(A remedy for epilepsy. Veterinary medicine, roots, tubers for retained placenta in cows.)

in English: bushveld asparagus

in South Africa: imvane, lesitwane

Asparagus virgatus Baker (*Asparagus merkeri* K. Krause; *Asparagus sylvaticus* Burch. ex Baker, nom. illeg.; *Asparagus virgatus* var. *capillaris* Baker; *Protasparagus virgatus* (Baker) Oberm.)

Yemen, S. Tanzania to S. Africa. Erect subshrub, wiry stem, wiry branches

See *J. Linn. Soc., Bot.* 14: 606. 1875 and *Journal of Ethnopharmacology* 14: 159–172. 1985, *Fl. Australia* 45: 494. 1987

(Roots and tubers for diarrhea, syphilis and intestinal worms. Protective charms.)

in English: broom asparagus

in Swaziland: umshanveto

in Tanzania: likalakanga, mifagio

Asparagus warneckei (Engl.) Hutch. (*Asparagus drepanophyllus* Welw. & Baker var. *warneckei* Engl.) (for the German Otto Warnecke, c. 1899 plant collector and gardener in Togo, 1903 to East Africa; see Frank Nigel Hepper (1929–), “Botanical collectors in West Africa, except French territories, since 1860.” in *Comptes Rendus de l’Association pour l’étude taxonomique de la flore d’Afrique*, (A.E.T.F.A.T.). 69–75. Lisbon 1962, F.N. Hepper and Fiona Neate, *Plant collectors in West Africa*. 84. 1971.)

Tropical Africa. Liana, scrambling, climbing by hooks, white or creamy sweet scented flowers

See *Transactions of the Linnean Society of London, Botany* 1: 254. 1877 and *Bot. Jahrb. Syst.* 32: 97. 1902, *Fl. W. Trop. Afr.* 2: 351. 1936, *Bulletin of Miscellaneous Information Kew* 1939: 245. 1939

(Plant decoction given to infants for stomachache. Leaves poultice drunk as a postpartum remedy, also applied for tapeworms and Guinea worms.)

Asperugo L. Boraginaceae

Latin *asperugo*, *inis* for a plant with prickly leaves, see *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, *Bot. J. Linn. Soc.* 110: 77–94. 1992, *Opera Bot.* 137: 1–42. 1999.

Asperugo procumbens L.

Europe.

See *Species Plantarum* 1: 138. 1753

(For skin diseases.)

in English: catch-weed, madwort, rough straw

in China: cao cao

Asphodelus L. Xanthorrhoeaceae (Asphodelaceae, Liliaceae)

Asphodelos, Greek name for the true asphodel, *Asphodelus ramosus*; see Carl Linnaeus, *Species Plantarum*. 1: 309–310. 1753, *Genera Plantarum*. Ed. 5. 146. 1754, *Methodus*: 634. 1794, *Flora Germanica Excursoria* 116. 1830, *Gen. Pl.*: 72. 1866, *Proc. Amer. Acad. Arts* 18: 164. 1883 and Quézel, P. *Mission Botanique au Tibesti*: 1–357. Université d’Alger. 1958.

Asphodelus fistulosus L. (*Asphodeloides ramosa* Moench, nom. illeg.; *Hagenbachia angusta* Ravenna; *Ophioprason fistulosum* (L.) Salisb., nom. inval.; *Verinea fistulosa* (L.) Pomel)

Mediterranean, Mauritius. Herb, short-lived perennial, erect, hollow cylindrical leaves, sweetly scented white flowers with a pink brownish central stripe, widespread and invasive noxious weed

See *Species Plantarum* 1: 309–310. 1753, *Methodus* 634. 1794, *Gen. Pl.* 72. 1866 and *Phytologia* 57: 328. 1985, *Egyptian Journal of Medical Laboratory Sciences* 10(1): 25–38. 2001, *Journal of Ethnobiology and Ethnomedicine* 2: 52. 2006

(Used in Unani. A suspected cause of dermatitis in cattle. Seeds diuretic, antiinflammatory, antispasmodic, insecticidal, laxative, for constipation, applied externally to ulcers, scabies and skin diseases.)

in English: hollow-stemmed asphodel, onion-leaved asphodel, onion-weed, pink asphodel, welsh onion, wild onion

in Arabic: baroog, barwaq, bayrq, busayl

in India: burg-i-gundana

in Oman: mubsaila

in Spanish: gamonilla tiesa

Asphodelus tenuifolius Cav. (*Anthericum annuum* Pourr. ex Willk. & Lange; *Asphodelus bornmuelleri* Gand.; *Asphodelus canariensis* C. Sm. & Buch; *Asphodelus clavatus* Roxb.; *Asphodelus clavosus* Don ex Steud.; *Asphodelus fistulosus* subsp. *faurei* Sennen; *Asphodelus fistulosus* subsp. *nilotica* Ravenna; *Asphodelus fistulosus* subsp. *tenuifolius* (Cav.) Arcang.; *Asphodelus fistulosus* var. *tenuifolius* (Cav.) Baker; *Asphodelus maroccanus* Gand.; *Asphodelus microcarpus* Rchb., nom. illeg.; *Asphodelus serrulatifolius* Sennen; *Asphodelus serrulatus* Sennen & Mauricio; *Asphodelus tenuifolius* f. *micranthus* (Boiss.) Maire; *Asphodelus tenuifolius* var. *micranthus* Boiss.; *Ornithogalum flavum* Forssk.; *Verinea tenuifolia* (Cav.) Pomel)

India, Mauritius. Herb, pale flowers, leaves eaten raw as a vegetable, bulbs edible

See *Fl. Aegypt.-Arab.* 209. 1775, *Anales de Ciencias Naturales* 3: 46. 1801, *Abh. Königl. Akad. Wiss. Berlin* 1816–1817: 262. 1817, *Fl. Ind.* ed. 1832, 2: 24. 1832, *Journal of the Linnean Society, Botany* 15: 272. 1876, *Fl. Orient.* 5: 315. 1882 and *Bull. Soc. Bot. France* 55: 565. 1908, *Bull. Soc. Bot. France* 66: 291. 1920, *Fl. Afr. Nord* 5: 40. 1958, Bossier, J. & al. (eds.) *Flore des Mascareignes 177–188*: IRD Éditions, MSIRI, RBG-Kew, Paris. 1978 [as *Asphodelus fistulosus* var. *tenuifolius*.], *Herbertia* 43: 40. 1987

(Used in Ayurveda. Febrifuge, diuretic, antiinflammatory, seeds’ smoke inhaled through mouth for carious teeth.)

in English: onion-weed

in India: bokat, bringharbij, cheel, dungro, jungli pyaz, piaz
in Pakistan: pimaluk

Aspidopterys A. Juss. ex Endl. Malpighiaceae

Greek *aspis*, *aspidos* 'a shield' and *pteryx* 'wing', referring to the carpels, see *Genera Plantarum* [Endlicher] 1060. 1840, *Ann. Sci. Nat., Bot.* sér. 2, 13: 266. 1840.

Aspidopterys andamanica Hutch.

India. Woody climber, small white or yellowish-white flowers, membranous fruits

See *Bulletin of Miscellaneous Information Kew* 1917: 99. 1917

(Astringent, a postpartum remedy.)

Aspidopterys cordata A. Juss.

India.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 13: 267. 1840

(Root extract given as a postpartum remedy.)

in India: rebensla

Aspidosperma Martius & Zucc. Apocynaceae

From the Greek *aspis*, *aspidos* 'a shield' and *sperma* 'seed', see *Ann. Missouri Bot. Gard.* 38(2): 119–206. 1951, *Fieldiana, Bot.* 24(8/4): 334–407. 1969, *Darwiniana* 23(2–4): 367–474. 1981, *Flora de la provincia de Jujuy* 13(8): 84–116. 1983, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006.

Aspidosperma album (Vahl) Benoist ex Pichon (*Aspidosperma centrale* Markgr.; *Aspidosperma desmanthum* Benth. ex Müll.Arg.; *Aspidosperma latisiliqua* (Poir.) A. DC.; *Aspidosperma latisiliquum* (Poir.) A. (Antimalarial, analgesic. Bark decoction used for regulating fertility. The alkaloids from the bark are responsible for toxic effects on the nervous, respiratory and circulatory systems. An extract from the bark of the tree is used as a prescription drug to treat erectile dysfunction in some countries.)

in Paraguay: quebracho-blanco

Aspidosperma ramiflorum Müll.Arg. (*Geissospermum ramiflorum* (Müll.Arg.) Miers)

Brazil, Bolivia.

See *Fl. Bras.* 6(1): 55. 1860, *Apocyn. S. Amer.:* 85. 1878 and *Braz. J. Med. Biol. Res.* 39(3): 387–391. 2006, *Phytomedicine.* 14(6): 377–380. 2007

(Antileishmanial, antibacterial, from the stem bark.)

Aspidosperma schultesii Woodson

Venezuela, Colombia, Peru, Brazil. Tree

See *Ann. Missouri Bot. Gard.* 38(2): 168, t. 1, f. 6. 1951, *Revista Brasileira de Botânica* 19(2): 212. 1996[1997]

(Latex febrifuge, antifungal, to treat external infections, infected sores.)

Aspidosperma subincanum Mart. ex A. DC. (*Aspidosperma chodatii* Hassl. ex Markgr.; *Aspidosperma subincanum* Mart.; *Aspidosperma subincanum* var. *tomentosum* Müll. Arg.; *Macaglia subincana* (Mart. ex A. DC.) Kuntze; *Macaglia subincana* Kuntze)

South America, Bolivia, Brazil.

See *Prodr.* 8: 397–398. 1844, *Fl. Bras.* (Martius) 6(1): 50. 1860, *Revis. Gen. Pl.* 2: 416. 1891 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 427. 1923, *Ann. Missouri Bot. Gard.* 38: 148, 150. 1951, *Pharmazie.* 64(12): 836–869. 2009

(Used to treat digestive disorders.)

Aspidosperma ulei Markgr. (*Aspidosperma occidentale* Markgr., nom. illeg.)

Tropical America.

See *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 78. 1924, *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 133. 1940, *Journal of Ethnopharmacology* 104(1–2): 240–244. 2006, *International Journal of Impotence Research* 20(3): 255–263. 2008

(Pro-erectile effects of an alkaloidal rich fraction from root bark.)

Aspidosperma vargasii A. DC. (*Macaglia vargasii* (A. DC.) Kuntze)

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 399. 1844, *Revisio Generum Plantarum* 2: 416. 1891 and *Ann. Missouri Bot. Gard.* 38: 154. 1951, *Mem. Inst. Oswaldo Cruz.* 102(3): 359–365. 2007

(Febrifuge, antimalarial, antioxidant, used for jaundice.)

Aspilia Thouars Asteraceae

Spotless, from the Greek *a* ‘without’ and *spilos* ‘a spot, stain’, see *Genera Nova Madagascariensia* 12. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 561. 1836 and *Smithsonian Contributions to Botany* 52: 1–28. 1981.

Aspilia africana (Pers.) C.D. Adams (*Aspilia africana* (P. Beauv.) C.D. Adams; *Wedelia africana* Pers.)

Tropical Africa.

See *Enumeratio Systematica Plantarum* 8, 28. 1760 and *Webbia* 12: 236. 1956, *Thromb. Res.* 47(4): 401–407. 1987 [Studies on the anticoagulant action of *Aspilia africana*.], *Feddes Repertorium* 101: 49–62. 1990, *J. Ethnopharmacol.* 28(3): 323–327. 1990, Dimo, T. et al. “In vitro vascular smooth muscle contractile activity of *Aspilia africana* extract on rat aortic preparations.” *Pharmazie.* 57(6): 421–423. 2002, *J. Ethnopharmacol.* 102(2): 262–268. 2005, *J. Ethnopharmacol.* 109(2): 219–225. 2007, *BMC Complement. Altern. Med.* 7(1): 24. 2007

(Leaves antiinflammatory, febrifuge, hemostatic, wound dressing, antimalarial, antibacterial, anticoagulant, used to stop bleeding from wounds, clean the surfaces of sores, in the treatment of rheumatic pains, bee and scorpion stings and for removal of opacities and foreign bodies from the eyes; leaves decoction for headache, fever.)

in Nigeria: ebe onewa, ogbie

Aspilia africana (Pers.) C.D. Adams subsp. ***africana*** (*Aspilia africana* subsp. *magnifica* (Chiov.) Wild; *Aspilia africana* var. *ambigua* C.D. Adams; *Aspilia africana* var. *guineensis* (O. Hoffm. & Muschl.) C.D. Adams; *Aspilia africana* var. *minor* C.D. Adams; *Aspilia africana* var. *ubanguensis* O. Hoffm. & Muschl.; *Aspilia guineensis* O. Hoffm. & Muschl.; *Aspilia latifolia* Oliv. & Hiern, p.p.; *Aspilia latifolia* A. Chev.; *Wedelia africana* Pers.; *Wedelia africana* P. Beauv.; *Wedelia africana* P. Beauv. var. *ambigua* (C.D. Adams) Isawumi; *Wedelia africana* var. *guineensis* (C.D. Adams) Isawumi; *Wedelia africana* var. *minor* (C.D. Adams) Isawumi)

Tropical Africa.

See *Enumeratio Systematica Plantarum* 8, 28. 1760, *Flore d’Oware* 2119, pl. 69. 1807, *Flora of Tropical Africa* 3: 379. 1877 and *Mémoires de la Société Botanique de France* 8 57: 115. 1910, *Exploration Botanique de l’Afrique Occidentale Française ...* 371. 1920, *Webbia* 12: 236–238. 1956, *Kirkia* 5: 219. 1966, *Revue de Cytologie et de Biologie*

Végétales, le Botaniste 10: 177–184. 1987, *Thromb. Res.* 47(4): 401–407. 1987, *Feddes Repertorium* 99: 1–13. 1988, *J. Ethnopharmacol.* 28(3): 323–327. 1990, Okoli, C.O. et al. “Antiinflammatory activity of hexane leaf extract of *Aspilia africana* C.D. Adams.” *J. Ethnopharmacol.* 109(2): 219–225. 2007

(The leaves possess constituents capable of arresting wound bleeding, inhibiting the growth of microbial wound contaminants and accelerating wound healing. Leaves anti-inflammatory in acute and chronic inflammation which may derive from inhibition of prostaglandins synthesis, inhibition of increased vascular permeability, inhibition of neutrophil migration into inflamed tissues, and stimulation of lymphocyte accumulation, which may enhance tissue repair and healing. The terpenoids present in the leaves may account for the antiinflammatory activity.)

Aspilia africana (P. Beauv.) C.D. Adams subsp. *magnifica* (Chiov.) Wild (*Aspilia congoensis* S. Moore; *Aspilia latifolia* Oliv. & Hiern, p.p.; *Wedelia magnifica* Chiov.)

East Africa.

See *Genera Nova Madagascariensia* 12. 1806 *Annali di Botanica* 9: 74. 1911, *Journal of Botany, British and Foreign* 58: 45. 1920, *Webbia* 12: 236. 1956, *Kirkia* 5: 219. 1966, *Compositae Newsletter* 33: 23–32. 1999

(Leaves antiinflammatory.)

Aspilia helianthoides (Schumach. & Thonn.) Oliv. & Hiern subsp. *ciliata* (Schumach.) C.D. Adams (*Aspilia abyssinica* (Sch. Bip.) Vatke; *Aspilia ciliata* (Schumach.) Wild; *Aspilia dewevrei* O. J. Health Sci.* 3(2): 44–46. 1996 [Antimalarial activity of fractions isolated from *Albizia gummifera* and *Aspilia mossambicensis* crude extracts.]

(A mixture of roots and leaves boiled and the decoction used to bath children suffering from convulsions, also used as antimalarial. A chimpanzee medicinal plant.)

in Tanzania: kanyamuza

Aspilia natalensis (Sond.) Wild (*Aspilia welwitschii* O. Hoffm.; *Wedelia natalensis* Sond.)

East and South Africa. Herbaceous shrub, robust, flowers deep yellow, leaves scabrid, whole plant covered with whitish hairs

See *Enumeratio Systematica Plantarum* 8, 28. 1760

(Antibiotic, astringent, fungicidal and vermifugal, used for stomach and intestinal complaints. Roots for dysentery and diarrhea. Leaves for wounds and febrile complaints.)

in English: wild creeping sunflower

in South Africa: ubuHlungwana (Zulu)

in Swaziland: umphamephuce

Aspilia pluriseta Schweinf. (*Aspilia asperifolia* O. Hoffm.; *Aspilia brachyphylla* S. Moore; *Aspilia involucrata* O. Hoffm.; *Aspilia vulgaris* N.E. Br.)

East Africa.

See *Genera Nova Madagascariensia* 12. 1806 and Cos, P. et al. "Complement modulating activity of Rwandan medicinal plants." *Phytomedicine*. 9(1): 56–61. 2002, Cos, P. et al. "Antiviral activity of Rwandan medicinal plants against human immunodeficiency virus type-1 (HIV-1)." *Phytomedicine*. 9(1): 62–68. 2002

(Plants used for the treatment of infections and/or rheumatoid diseases, autoimmune diseases, heartburn. Antiviral.)

Asplenium L. Aspleniaceae

Latin *asplenium* or *asplenon* 'miltwort, spleenwort', Greek *asplenon* 'miltwaste, *Asplenium ceterach* L.', *a-* euph. and *splen* 'the spleen', referring to the medicinal properties of some species, supposed to be a cure for the spleen; see Carl Linnaeus, *Species Plantarum* 2: 1078–1082. 1753, *Genera Plantarum*. Ed. 5. 485. 1754, *The British Herbal* 525, t. 74. 1756, *Familles des Plantes* 2: 20, 536. 1763, *Tabulae Bot.* 31. 1773, *Acta academiae scientiarum imperialis petropolitanae* 6(2): 248–250. 1782, *Genera Plantarum* 15. 1789, *Mémoires de l'Académie Royale des Sciences* 5(1791–1792): 421. 1793, *Anleitung zum Selbststudium der Botanik* 578. 1804, *Hortus Regius Botanicus Berolinensis* 2: 69. 1833, *Flore Cryptogamique des Environs de Louvain* 8. 1835, *Tentamen Pteridographiae* 105. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 409. 1841, *A History of British Ferns*. Aster amellus L.

Europe, India. Pubescent or hairy annual herb, toothed lanceolate leaves, lilac flowers

See *Acta Biol. Cracov., Ser. Bot.* 22: 129–153. 1980, *Taxon* 47: 354. 1998, *Sida* 22: 1088. 2006

(Root decoction to cure cough and pulmonary infections.)

in India: babru

Aster asperulus Nees (*Aster asperulus* Wall.; *Aster asperulus* Torr. & A. Gray)

Himalaya.

See *Fl. N. Amer.* (Torr. & A. Gray) 2: 120. 1841

(Root decoction applied to wounds.)

in Nepal: ghanse phul

Aster asteroides (DC.) Kuntze (*Aster asteroides* (L.) MacMill.; *Aster asteroides* (Colla) Rusby; *Heterochaeta asteroides* DC.)

China, India, Himalaya. Woolly tomentose herb, purple blue heads

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 282. 1836, *Revisio Generum Plantarum* 1: 315. 1891, *The Metaspermae of the Minnesota Valley* 524. 1892, *Memoirs of the Torrey Botanical Club* 4: 213. 1895

(Roots used for coughs and pulmonary infections.)

Aster bakeranus Burt Davy ex C.A. Sm. (*Aster asper* Wood & Evans; *Aster bakeranus* subsp. *angustifolius* Lippert; *Aster bakeranus* subsp. *intermedius* Lippert; *Aster bakeranus* subsp. *ovalis* Lippert; *Aster bakeranus* subsp. *septentrionalis* Lippert; *Aster grauii* Lippert; *Aster hispidus* (Thunb.) Baker; *Aster hispidus* Baker; *Diplopappus asper* Less.; *Diplopappus natalensis* Sch. Bip.; *Felicia asper* Burt Davy)

South Africa, Lesotho. Herb, erect, stoloniferous rhizome, roots fusiform, rays blue-mauve purple, disc yellow, grassland and rocky slope

See *Species Plantarum* 2: 872–877. 1753, *Bull. Sci. Soc. Philom. Paris* 1817: 137. 1817, *Bull. Sci. Soc. Philom. Paris* 1818: 165. 1818

(Roots very poisonous, used for stomach and chest complaints, chronic coughing.)

in South Africa: uDlutshana (Zulu)

Aster diplostephioides (DC.) C.B. Clarke (*Aster diplostephioides* Benth. & Hook.f.; *Diplopappus diplostephioides* (DC.) Hook. f. & Thomson; *Heterochaeta diplostephioides* DC.)

India, Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 282. 1836, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 272. 1873, *Compositae Indicae* 45. 1876 and *Fl. Reipubl. Popularis Sin.* 74: 244. 1985, *Bull. Bot. Res., Harbin* 19(4): 392–395. 1999

(Powdered flowers antibacterial, taken for influenza, fevers, colds, cough, tonsillitis, wounds, bleeding and poisoning.)

in India: kiamentok

in Nepal: mara

Aster exilis Elliott

USA, Bolivia. Flowers light purple or lavender, on dark wet soil, in moist soil, on dry gravelly soil, on dry area

See *Species Plantarum* 2: 872–877. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 2: 344. 1823, *Systema Vegetabilium*, editio decima sexta 3: 515. 1826, *Flora Brasiliensis* 6(3): 22. 1882 and *American Journal of Botany* 67: 1027–1039. 1980, *Phytologia* 54: 302–309. 1983, *Rhodora* 87: 517–527. 1985

(Weed dermatitis.)

Aster flaccidus Bunge (*Erigeron flaccidus* (Bunge) Botsch.)

India.

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg, Septième Série* (Sér. 7) 2: 599. 1835 and *Bot. Mater. Gerb. Bot. Inst. Komarova Akad. Nauk S.S.S.R.* 16: 388. 1954, *News Sib. Depart. Acad. Sci. USSR, Ser. Biol.* 15(3): 46–52. 1976

(Fruits used in fever, cough, poisoning.)

in Bhutan: lug-mig

Aster molliusculus (Lindl. ex DC.) C.B. Clarke (*Aster molliusculus* Wall.; *Aster molliusculus* var. *molliusculus*; *Diplopappus molliusculus* Lindl. ex DC.; *Diplopappus molliusculus* Lindl.)

Tropical Asia, India, Pakistan, Himalaya.

See *Bull. Sci. Soc. Philom. Paris* 1817: 137. 1817, *Numer. List* [Wallich] n. 2972. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 277. 1836, *Compositae Indicae* 45. 1876 and Bhattarai, N.K. “Medical ethnobotany in the Rapti Zone, Nepal.” *Fitoterapia* 64(6): 483–493. 1993

(Root decoction rubbed on the chest to relieve muscular pain. Crushed leaves antifungal, antibacterial, for amenorrhea and to strengthen the body, applied to alleviate pain due to sprains and contusions.)

in India: kadam

in Pakistan: taverra

Aster peduncularis Wall. ex Nees

Tropical Asia, India, Nepal, Pakistan.

See *Gen. Sp. Aster.* 24. 1832 and *Journal of Cytology and Genetics* 23: 38–52. 1988, *Aspects of Plant Sciences* 11: 427–437. 1989, Bhattarai, N.K. “Medical ethnobotany in the Rapti Zone, Nepal.” *Fitoterapia* 64(6): 483–493. 1993

(Antifungal, antibacterial.)

Aster smithianus Hand.-Mazz. (*Kalimeris smithiana* (Hand.-Mazz.) S.Y. Hu; *Kalimeris smithianus* (Hand.-Mazz.) S.Y. Hu)

India.

See *Acta Horti Gothoburgensis* 12(9): 216–217. 1938, *Quarterly Journal of the Taiwan Museum* 20: 13. 1967

(Aerial parts used for fevers, wounds.)

in Bhutan: yu-gu-shing

Aster subulatus Michaux (*Aster divaricatus* var. *sandwicensis* A. Gray; *Aster exilis* var. *australis* A. Gray; *Aster exilis* Elliott var. *inconspicuus* (Less.) Hieron., comb. illeg.; *Aster inconspicuus* Less., nom. illeg.; *Aster madrensis* M.E. Jones; *Aster pauciflorus* Nutt. var. *gracilis* Benth.;

Aster sandwicensis (A. Gray) Hieron.; *Aster squamatus* (Spreng.) Hieron.; *Aster subulatus* var. *australis* (A. Gray) Shinnery; *Aster subulatus* var. *cubensis* (DC.) Shinnery; *Aster subulatus* var. *sandwicensis* (A. Gray) A.G. Jones; *Conyza squamata* Spreng.; *Erigeron expansus* Poepp. ex Spreng.; *Erigeron linifolius* Bert. ex DC.; *Erigeron multiflorus* Hook. & Arn.; *Mesoligus subulatus* (Michx.) Raf.; *Symphotrichum expansum* (Poepp. ex Spreng.) G.L. Nesom; *Symphotrichum subulatum* (Michx.) G.L. Nesom; *Symphotrichum subulatum* var. *parviflorum* (Nees) S.D. Sundb.; *Tripolium subulatum* (Michx.) DC.; *Tripolium subulatum* (Michx.) DC. var. *cubensis* DC.; *Tripolium subulatum* var. *parviflorum* Nees)

South and North America, Mexico. Herb, erect, slender, annual, bushy, low, annual, disk florets yellow, ray florets white to lavender violet, along stream, on wet savanna, roadside, wet soil, in clearing

See *Species Plantarum* 2: 863–865, 872–877. 1753, *Flora Boreali-Americana* 2: 111. 1803, *The Genera of North American Plants* 2: 154. 1818, *A Sketch of the Botany of South-Carolina and Georgia* 2: 344. 1823, *Systema Vegetabilium* 3: 515, 518. 1826, *Linnaea* 5(1): 143. 1830, *Genera et Species Asterearum* 9–10, 135–136, 152–158, 286. 1832, *Synopsis Generum Compositarum ...* 203–204. 1832, *The Botany of Captain Beechey's Voyage* 87. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 254. 1836, *Flora Telluriana* 2: 44. 1836 [1837], *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852: 81. 1852, *Proceedings of the American Academy of Arts and Sciences* 7: 173. 1867, *Synoptical Flora of North America* 1(2): 203. 1884 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29: 19. 1900, *Contributions to Western Botany* 12: 43. 1908, *Field & Laboratory* 21(4): 158, 161. 1953, *Fieldiana, Botany* 24(12): 128–164, 483–495. 1976, *Taxon* 26: 557–565. 1977, *Sida* 7: 80–90. 1977, *Taxon* 27: 519–535. 1978, *Brittonia* 32: 240–261. 1980, *American Journal of Botany* 67: 1027–1039. 1980, *Brittonia* 36: 463–466. 1984, *Rhodora* 87: 517–527. 1985, *Investigatio et Studium Naturae* 12: 48–65. 1992, *AAU Reports* 34: 1–443. 1994, *Phytologia* 77(3): 281, 293. 1994 [1995], *Sida* 21(2): 907. 2004, *Sida* 21(4): 2125–2140. 2005

(Suspected of causing urticaria or skin irritation, dermatitis. Crushed stem and leaves applied as a poultice to draw infection from wounds.)

in English: bushy starwort, cobbler's pegs, salt marsh aster

Aster thomsonii C.B. Clarke

India, Himalaya. Perennial, in forests and shrubberies

See *Compositae Indicae* 48. 1876 and *Journal of Cytology and Genetics* 22: 162–163. 1987, *CIS Chromosome Information Service* 43: 7–9. 1987, *Aspects of Plant Sciences* 11: 427–437. 1989, Bhattarai, N.K. “Medical ethnobotany in the Rapti Zone, Nepal.” *Fitoterapia* 64(6): 483–493. 1993

(Antifungal, antibacterial.)

in English: Thomson's aster

Aster umbellatus Mill. (*Diplopappus umbellatus* (Mill.) Hook.; *Diplostephium umbellatum* (Mill.) Cass.; *Doellingeria umbellata* Nees; *Doellingeria umbellata* (Mill.) Nees; *Doellingeria umbellata* var. *umbellata*)

USA, Ontario, Quebec, Nova Scotia. Herb, perennial, rigid, erect, tall, rough, pubescent, sometimes purplish, leaves lance-shaped with prominent vein pattern, flower heads in flattish cluster, white ray flowers surrounding yellow disk flowers, yellow disk turns purplish or gray with age, slightly sweet fragrance, open areas and woods, in disturbed areas, moist fields, moist sunny areas lake swamp and other wetland edges, moist thickets, border of swamps, loamy sandy soils, an important host plant in the life cycles of the butterflies Pearl Crescent (*Phyciodes tharos*) and Silvery Checkerspot (*Chlosyne nycteis*), rabbit deterrent

See *The Gardeners Dictionary*: ... eighth edition no. 22. 1768, *Bull. Sci. Soc. Philom. Paris* 1817: 137. 1817, *Nova Genera et Species Plantarum* (folio ed.) 4: 75, t. 335. 1820 [1818], *Genera et Species Asterearum* 10, 177–184. 1832, *Flora Boreali-Americana* 2(7): 22–23. 1834 and *American Journal of Botany* 67: 1027–1039. 1980, *Brittonia* 32: 230–261. 1980, *Taxon* 30: 703–704. 1981, *Brittonia* 35(2): 140–146. 1983, *Rhodora* 87: 517–527. 1985, *Phytologia* 61: 299–310. 1986, *Le Naturaliste Canadien* 114: 105–116. 1987, *Phytologia* 77: 252. 1994, *Journal of Chemical Crystallography* 25(7): 371–374. 1995

(Sesquiterpene lactone. Leaves infusion stomachic, expectorant and emmenagogue, for croup. Root diaphoretic, anti-rheumatic, tonic and aromatic. Witchcraft medicine, flowers used as a smudge to drive away evil spirits working against a patient's recovery.)

in English: aster flattopped, flat-topped white aster, parasol aster, parasol whitetop, tall flat-topped white aster, umbellate aster, umbelled aster

Asteroistigma Bedd. Flacourtiaceae (Bixaceae)

Greek *aster* 'a star' and *stigma* 'stigma', see *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 255. 1824, *The Flora Sylvatica for Southern India* 266. 1872.

Asteroistigma macrocarpa Bedd.

India. Trees, evergreen, alternate entire leaves, scented white flowers, very numerous stamens, dark brown woody fruits, numerous angular seeds

See *Forest. Man. Bot.* 236. 1878

(Used for vitiligo, oils used in the treatment of leprosy. Repellent for blowflies.)

in India: aeleyam, ailiyan, doddasolte, doddasurante, vellananga

Asteroistigma Fischer & C.A. Meyer Araceae

Greek *aster* 'a star' and *stigma* 'stigma', referring to the form of the stigma; see *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 3: 148. 1845 and D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 18. 1988.

Asteroistigma luschnathianum Schott (*Arum draconitium* Vell., nom. illeg.; *Asteroistigma draconitium* Stellfeld; *Asteroistigma vellozianum* Schott; *Staurostigma luschnathianum* (Schott) K. Koch; *Staurostigma vellozianum* (Schott) K. Koch)

SE Brazil. The resemblance of the petioles to the jararaca snake (*Bothrops jararaca* as well as other *Bothrops* sp.), a venomous viper member of the lancehead, or fer-de-lance, family

See *Syn. Aroid.* 126. 1856, *Index Aroidearum* 78. 1864 and *Tribuna Farm.* 12: 134. 1944, *Economic Botany* 23(2): 97–122. 1969

(Round tuber used in treating snakebite.)

in Brazil: jararaca, jararaca minda

Astilbe Buch.-Ham. ex D. Don Saxifragaceae

From the Greek *a* 'without' and *stilbe* 'brilliance, brightness', referring to the individual flowers or to the leaves without shine, see *Prodromus Florae Nepalensis* 210–211. 1825 and *The Gardeners' Chronicle* 1902(2): 95, 154–156, 171. 1902.

Astilbe rivularis Buch.-Ham. ex D. Don (*Astilbe rivularis* Buch.-Ham.)

India, Himalaya, Vietnam. Shrub, herb, erect, strong, leaves compound, green yellow flowers in woolly pubescent terminal panicles, wet places, sunny moist slopes

See *Prodromus Florae Nepalensis* 210–211, 221. 1825

(Roots juice, dried or fresh roots taken in small pieces orally during diarrhea and dysentery; rhizome for rheumatism; crushed rhizome decoction for body pain, also used after childbirth; roots decoction given for painful joints and arthritis. Leaves eaten raw to cure toothache. Powdered dried stem and root with powder of *Bergenia purpurascens* made into a paste and used to cure general body pain, also as a postpartum remedy, tonic.)

in English: false buck's beard, perennial spiraea

in China: luo xin fu shu

in India: bura okhati, buri okhati, buriokhati, buro okhati, gosity, padah, padum, polah, pothee

in Nepal: ghanchhyangmran

Astracantha Podlech Fabaceae (Galegeae, Leguminosae)

From the Greek *aster*, *astron* 'a star, the stars' and *akantha* 'thorn, spine, prickle', see *Mitteilungen der Botanischen Staatssammlung München* 19: 4. 1983.

Astracantha strobilifera (Benth.) Podlech (*Astracantha strobilifera* (Royle ex Benth.) Podlech; *Astragalus strobilifer* Royle ex Benth.; *Astragalus strobiliferus* Benth.; *Astragalus strobiliferus* Lindl.)

Afghanistan. Perennial non-climbing herb

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 199. 1839, *Edwards's Bot. Reg.* 26(Misc.): 39. 1840 and *Mitteilungen der Botanischen Staatssammlung München* 19: 20. 1983

(Gum a substitute for tragacanth.)

Astraea Klotzsch Euphorbiaceae

From the Greek *astron* 'a star', *astraios* 'starry', see *Species Plantarum* 2: 1004–1005. 1753, *Archiv fur Naturgeschichte* 7: 194. 1841, *Étude générale du groupe des Euphorbiacées* 363. 1858, *Die Natürlichen Pflanzenfamilien* 3(5): 40. 1890 and *J. Arnold Arbor.* 48: 354. 1967, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2): 1–483, 1–529. MIM, Deurne. 1995 [as *Croton*.], Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2000 [as *Croton*.]

Astraea lobata (L.) Klotzsch (*Astraea lobatum* (L.) Klotzsch; *Astraea lobatum* Klotzsch; *Astraea manihot* Klotzsch; *Astraea palmata* Klotzsch; *Astraea seemannii* Klotzsch; *Cnidocolus surinamensis* Miq.; *Croton courteti* Beille; *Croton decorsei* Beille; *Croton digitatus* Salzm. ex Schltdl.; *Croton leiocarpus* Bartl.; *Croton lobatum* L.; *Croton lobatus* Vell.; *Croton lobatus* L.; *Croton lobatus* Forssk.; *Croton lobatus* f. *crispus* Müll.Arg.; *Croton lobatus* lusus *gracilis* Müll.Arg.; *Croton lobatus* var. *digitatus* (Salzm. ex Schltdl.) Müll.Arg.; *Croton lobatus* var. *genuinus* Müll.Arg., nom. inval.; *Croton lobatus* var. *gracilis* (Müll.Arg.) Arg.; *Croton lobatus* var. *riparius* (Kunth) Müll.Arg.; *Croton lobatus* var. *seemannii* (Klotzsch) Müll.Arg.; *Croton lobatus* var. *sericeus* Müll.Arg.; *Croton manihot* (Klotzsch) Baill.; *Croton mocinoi* Radcl.-Sm. & Govaerts; *Croton perrottetianus* Baill.; *Croton riparius* Kunth; *Croton trilobatus* Willd.; *Croton trilobatus* Sessé & Moç., nom. illeg.; *Croton trilobatus* Forssk., nom. illeg.; *Oxydectes lobata* (L.) Kuntze; *Schradera scandens* Willd.)

Caribbean and South America, Tropical Africa. Herbaceous, woody shrub, monoecious, erect, branched, strong taproot and lateral roots, leaves papery 3-lobed stellate-pubescent, inflorescence a slender axillary or terminal raceme, male and female, flowers yellowish green, fruit a green capsule stellate hairy, a favourite food for fowls, a weed of cultivation, often invasive, on river banks, along road sides and on wasteland, often as *Croton lobatus* Linn.

See *Species Plantarum* 2: 1004–1005. 1753, *Fl. Aegypt.-Arab.* 162. 1775 [1 Oct 1775], *Nova Genera et Species Plantarum* (quarto ed.) 2: 90. 1817, *Archiv fur Naturgeschichte* 7(1): 194. 1841, *The Botany of the Voyage of H.M.S. Herald* 103. 1853, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 668–669. 1866, *Fl. Mexic.*, ed. 2: 222. 1894 and *Bull. Soc. Bot. France* 55(3): 71–72. 1908, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2): 1–483, 1–529. MIM, Deurne. 1995 [as *Croton lobatus*.], *Kew Bulletin* 52: 188. 1997, *Journal of Ethnopharmacology* 90(2–3): 279–284. 2004, *BioFactors* 27(1–4): 69–78. 2006

(Very poisonous, due care should be taken when using it. Antiviral, antimalarial, antiplasmodial. Root bark decoction purgative. Leaf decoction febrifuge, drunk as a strong purgative; a leaf paste mixed with palm oil applied to treat Guinea worm sores, ulcers, skin diseases, cutaneous and subcutaneous parasitic infection, and headache. Heated leaves rubbed onto the skin to treat rheumatic and costal pain; the leaves boiled in a little water are an enema for gynaecological affections. Penis washed with a maceration of the leafy twigs as an aphrodisiac. Antidote, leaf sap applied to lessen the pain of scorpion stings. A strong arrow poison is made by simply crushing the plant into a paste with water. Religion, superstitions, magic, superstitious use against witchcraft, a person washing with a lotion prepared from it keeps evil at bay.)

in English: gasaya of the antelope, lobed croton, male gasaya

in Gambia: jambalulu, nyri jejongho

in Ghana: akonansa, aneta, balasa natudi, gka, mfansu, voligbe

in Guinea: curedjandjam-ō

in Ivory Coast: agbonsé, bruété, hitzasan, tahatinta, tototo

in Nigeria: àjéofòlé, èru, gaàsàyaá, gaàsàyár bareewa, kiban kadangari, námíjìn gaàsàyaá, námíjìn záakí-fánzáá, òkwè-one

in Senegal: hab el khechba, hab el l'hesbal, kurdiängdiäng, mbèt i tiängay, ñakalé, ñakali, narhalé, ñaxali, vorudièh

in Sierra Leone: gomakfuri, njewombi

Astragalus L. Fabaceae (Galegeae)

Latin *astragalus* and Greek *astragalos*, used for the ankle-bone but also for a leguminous plant, milk vetch, *Orobos niger* (Dioscorides 4.61) or a species of *Astragalus*, Spanish

tragacanth; see Carl Linnaeus, *Species Plantarum*. 2: 755–762. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Genera Plantarum*. Ed. 5. 335. 1754, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 24(1): 50. 1877 and *Bull. Torrey Bot. Club* 32: 658. 1905, *Mem. New York Bot. Gard.* 13(1): 1–596 and 13(2): 597–1188. 1964, *Phytologia* 15(6): 329–446. 1967, James, L.F., Hartley, W.J., Van Kampen, K.R. “Syndromes of *Astragalus* poisoning in livestock.” *J. Am. Vet. Med. Assoc.* 178: 146–150. 1981, James, L.F. “Neurotoxins and other toxins from *Astragalus* and related genera.” Pages 445–462 in Keeler, R.F., Tu, A.T., eds. *Handbook of Natural Toxins*. Vol. 1. *Plant and Fungal toxins*. Marcel Dekker, Inc., New York, N.Y., USA. 1983, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*. AVI Publishing Company, Inc., Westport, CT, USA. 1985, Davis, A.M. “Selenium uptake in *Astragalus* and *Lupinus* species.” *Agron. J.*, 78: 727–729. 1986, *Mitt. Bot. Staats. Munchen* 30: 1–196. 1992, *Taiwania* 52(1): 25–48. 2007. This plants can accumulate quantities of selenium high enough to cause toxicity in cattle, horses, sheep and swine. High quantities of selenium cause acute toxicity, with symptoms including staggering, diarrhea, prostration and abdominal pain.

Astragalus adsurgens Pall. (*Astragalus adsurgens* Torr.; *Astragalus adsurgens* Willd. ex Steud.; *Astragalus adsurgens* subsp. *robustior* (Hook.) S.L. Sci.* 11: 375–382. 1989, *Cytologia* 54: 565–571. 1989

(Whole plant for leprosy and colic.)

in China: lie xiang huang qi

Astragalus gummifer Labill. (*Astracantha gummifera* (Labill.) Podl.; *Astragalus gummifera* Labill.; *Astragalus rayatensis* Eig)

Middle East, Syria. Perennial non-climbing shrub, thorny, fragrant, umbellate, leaves composed of thorny rachis, the source of the suspending agent tragacanth gum

See *J. Phys.* (Halle) 46. 1790 and *Revue de Cytologie et de Biologie Végétales, le Botaniste* 2: 169–181. 1979, *Mitteilungen der Botanischen Staatssammlung München* 19: 4, 12. 1983, *Cathaya* 11–12: 1–218. 2000, *Pharmacologyonline* 3: 80–89. 2006

(Antitussive, antiinflammatory, antiasthma and dyspnea, antibacterial and anticarcinogenic, demulcent, mild laxative, used for constipation; gum used externally as a dressing for burns. Leaves a wound healing lotion.)

in English: gum tragacanth, tragacanth tree

African names: adrilel, shagal el Ketira

Astragalus hamosus L. (*Ankylobus hamosus* (L.) Steven; *Astragalus aegyptiacus* Mill.; *Astragalus ancistrum* Pomel; *Astragalus arnoceras* Bunge; *Astragalus brachyceras* Ledeb.; *Astragalus buceras* Willd.; *Astragalus dorcoceras* Bunge; *Astragalus embergeri* Jahand. & al.; *Astragalus hamosus* Bal. ex Bunge; *Astragalus hamosus* Kotschy ex Bunge; *Astragalus hamosus* Pall.; *Astragalus hamosus* var. *ancistrum* (Pomel) Batt.; *Astragalus hamosus* subsp. *brachyceras* (Ledeb.) Kuntze; *Tragacantha buceras* (Willd.) Kuntze; *Tragacantha hamosa* (L.) Kuntze)

Asia, Mediterranean, Sahara. Annual non-climbing herb

See *Reise durch verschiedene Provinzen des russischen Reichs* 3: 653. 1776, *Species Plantarum* 2: 758. 1753, *Mém. Acad. Imp. Sci. St.-Petersbourg*, Sér. 7. 15(1): 14, 17. 1869, *Revisio Generum Plantarum* 2: 945. 1891 and *Phytologia* 10 (5): 321–406. 1964, *Bot. Jahrb. Syst.* 108: 259–270. 1987, *Bot. Zhurn. (Leningrad)* 76, 11: 1607–1612. 1991, *Natural product research* 21(5): 392–395. 2007

(Plant antiproliferative, anticancer, carminative, astringent, emetic, diuretic, emollient, demulcent, aphrodisiac, laxative, galactagogue, antiinflammatory, used in treating irritation of the mucous membranes, pulmonary and genitourinary problems, inflammatory states, catarrh, malignant tumors; a paste applied in headache.)

in English: European milkvetch

in Arabic: asabea-ul-malik, elkoren, ikhlil-ul-malik, qoreyn

in India: akhil-ul-malik, akhli-el-malik, katila, nakhunah, parang, purtuk, taje badshah, ukil-ul-mulk

Astragalus himalayanus Klotzsch (*Astragalus carinalis* Benth. ex Bunge; *Astragalus carinalis* Bunge; *Astragalus maddenianus* Baker)

India, Himalaya, Kashmir. Perennial non-climbing herb, prostrate to suberect, quite elongated, pubescent, leaves imparipinnately compound, inflorescence an axillary pedunculate condensed raceme

See *Bot. Ergebn. Reise Waldemar* 160, t. 4. 1862, *Fl. Brit. Ind.* 2: 126. 1876 and *Fitoterapia* 66(4): 376. 1995, *Botanical Journal of the Linnean Society* 154. 27–34. 2007

(Toxic, antibiotic.)

in English: Himalayan astragalus

in India: kayabachhutup

Astragalus hoantchy Franch.

China. Perennial non-climbing herb, famine food, shoots and leaves eaten

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 5: 238. 1883

(Roots diuretic, pectoral and tonic, effective against Gram-positive, diabetes.)

in English: yellow vetch

in China: huang qi, wu la te huang qi

in Korea: hwanggi

Astragalus humistratus A. Gray (*Astragalus datilensis* (Rydb.) Tidestr.; *Astragalus humistratus* var. *humivagans* (Rydb.) Barneby; *Astragalus humistratus* var. *tenerrimus* M.E. (Poisonous, plants contain the alkaloid swainsonine, which can cause locoism, teratogenic effects have also been noted in lambs and foals; at high altitudes cattle suffer from congestive heart failure, swainsonine influences the vascular system. Ceremonial, used as a charm in prayers.)

in English: freckled milkvetch, rattle-weed, speckledpod milkvetch, spotted loco, spotted locoweed

Astragalus leucocephalus Bunge (*Astragalus leucocephalus* Graham ex Benth.)

Himalaya, Nepal. Perennial non-climbing herb

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 198, pl. 33, f. 2. 1835 and *Ann. Missouri Bot. Gard.* 81: 792–799. 1994

(Plant poisonous to cattle and human beings. Root juice applied to treat boils and pimples.)

in China: bai xu huang qi

in Nepal: pataka

Astragalus lonchocarpus Torr. (*Astragalus lonchocarpus* var. *lonchocarpus*; *Astragalus macer* A. Nelson; *Homalobus*

macrocarpus (A. Gray) Rydb.; *Lonchophaca macra* (A. Nelson) Rydb.; *Lonchophaca macrocarpa* (A. Gray) Rydb.; *Phaca macrocarpa* A. Gray; *Tragacantha lonchocarpa* (Torr.) Kuntze)

North America. Perennial non-climbing herb

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 36–37. 1849, *Proceedings of the American Academy of Arts and Sciences* 6: 219. 1864, *Revisio Generum Plantarum* 2: 946. 1891 and *Bulletin of the Torrey Botanical Club* 32(12): 667. 1905[1906], *Botanical Gazette* 56(1): 65–66. 1913, *North American Flora* 24(5): 312–313. 1929

(Emetic.)

in English: great rushy milkvetch, rushy milkvetch

Astragalus maxwellii Benth. (*Astragalus ciliolatus* Bunge; *Astragalus ciliolatus* Benth. ex Bunge; *Astragalus ciliolatus* Benth.; *Astragalus emodi* Steud.; *Astragalus maxwellii* Royle)

Himalaya. Perennial non-climbing herb

See *Ill. Bot. Himal. Mts.* [Royle] 199. 1833–1840

(Roots as toothbrush for toothache; powdered roots used for eye troubles.)

Astragalus michauxii (Kuntze) F.J. Herm. (*Astragalus apilosus* E. Sheld.; *Astragalus glaber* Michx., nom. illeg.; *Tium apilosum* (E. Sheld.) Rydb.; *Tium michauxii* (Kuntze) Rydb.; *Tragacantha michauxii* Kuntze)

North America. Perennial non-climbing herb, erect, underground rootstock, leaves pinnately compound, flowering racemes erect, corolla white, glabrous pod slightly curved upward

See *Encyclopédie Méthodique, Botanique* 1(2): 525. 1783, *Flora Boreali-Americana* 2: 66. 1803, *Revisio Generum Plantarum* 2: 941. 1891, *Minnesota Botanical Studies* 1(1): 22. 1894 and *Flora of the Southeastern United States* 619, 1332. 1903, *North American Flora* 24(7): 392. 1929, *Journal of the Washington Academy of Sciences* 38(7): 237. 1948, *Memoirs of the New York Botanical Garden* 13: 542. 1964

(Poisonous, toxic to animals.)

in English: poison vetch

Astragalus miser Hook. (*Astragalus griseopubescens* E. Sheld.; *Astragalus miser* Dougl. ex Hook.; *Astragalus miser* var. *miser*; *Astragalus miser* var. *oblongifolius* (Rydb.) Cronquist; *Astragalus miser* var. *tenuifolius* (Nutt.) Barneby; *Astragalus serotinus* Cooper var. *strigosus* (J.M. Coult. & Fisher) J.F. Macbr.; *Astragalus strigosus* J.M. Coult. & Fisher; *Homalobus decurrens* Rydb.; *Homalobus hitchcockii* Rydb.; *Homalobus humilis* Rydb.; *Homalobus microcarpus* Rydb.; *Homalobus oblongifolius* Rydb.; *Homalobus paucijugus* Rydb.; *Homalobus strigosus* (J.M. Coult. & Fisher) Rydb.; *Homalobus tenuifolius* Nutt.; *Phaca misera* (Douglas ex Hook.) Piper; *Phaca misera* Piper; *Tium miserum* (Douglas

ex Hook.) Rydb.; *Tragacantha misera* (Hook.) Kuntze; *Tragacantha misera* (Douglas ex Hook.) Kuntze)

North America. Perennial non-climbing shrub

See *Flora Boreali-Americana* 1(3): 152. 1831, *A Flora of North America*: containing ... 1(2): 352. 1838, *Revisio Generum Plantarum* 2: 946. 1891, *Botanical Gazette* 18(8): 299–300. 1893, *Minnesota Botanical Studies* 1(1): 24. 1894 and *Contributions from the United States National Herbarium* 11: 373. 1906, *Bulletin of the Torrey Botanical Club* 34(1): 50. 1907, *Bulletin of the Torrey Botanical Club* 34(8): 418. 1907, *Bulletin of the Torrey Botanical Club* 40(2): 52–53. 1913, *Contributions from the Gray Herbarium of Harvard University* 65: 37. 1922, *Revision of North-American Astragalus* 91. 1923, *North American Flora* 24(7): 394. 1929, *Leaflets of Western Botany* 3(11): 252. 1943, *Leaflets of Western Botany* 7(2): 18. 1953, *Leaflets of Western Botany* 7(8): 195. 1954, *Phytologia* 15(6): 329–446. 1967, *J. Range Manage.* 42: 368–371. 1989, Majak, W., Pass, M.A. “Aliphatic nitrocompounds.” Pages 143–159 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. II *Glycosides*. CRC Press, Inc., Boca Raton. 1989

(This plant contains miserotoxin, and causes acute and chronic toxicity in cattle and sheep; this toxic principle is found primarily in the leaves and reaches its highest concentration during the bud and mature-flower stages of growth. Honey bees that forage on the flowers of timber milk-vetch were also poisoned.)

in English: timber milk-vetch, timber milkvetch, Wasatch milk-vetch, weedy milkvetch

Astragalus mollissimus Torr. (*Astragalus mogollonicus* Greene; *Astragalus mollissimus* fo. *flavus* McGregor; *Astragalus mollissimus* var. *mollissimus*; *Astragalus simulans* Cockerell; *Astragalus thompsoniae* S. Watson; *Phaca villosa* S. Watson)

North America. Perennial non-climbing herb, robust, tufted, numerous hairy small light green leaflets usually arching, hairy flower stems, long and narrow pink-purple flowers, short very hairy seeds

See *Annals of the Lyceum of Natural History of New York* 2: 178–179. 1827–1828, *Proceedings of the American Academy of Arts and Sciences* 6: 195. 1864, *Proceedings of the American Academy of Arts and Sciences* 10: 345–346. 1875, *Bulletin of the Torrey Botanical Club* 8(9): 97. 1881, *Revisio Generum Plantarum* 2: 946, 948. 1891, *Contributions to Western Botany* 8: 23. 1898 and *Torreya* 2(10): 154–155. 1902, *Leaflets of Western Botany* 4(4): 60. 1944, *Rhodora* 62(736): 116. 1960, *Memoirs of the New York Botanical Garden* 13: 745–747. 1964

(Poisonous, producing a toxic and addictive alkaloid, highly poisonous to livestock, especially to horses.)

in English: locoweed, purple locoweed, Thompson’s woolly locoweed, woolly loco, woolly locoweed, woolly milkvetch

Astragalus mollissimus Torr. var. *matthewsii* (S. Watson) Barneby (*Astragalus bigelovii* A. Gray var. *matthewsii* (S. Watson) M.E. Jones; *Astragalus matthewsii* S. Watson) (for Washington Matthews, 1843–1905, a medical doctor, collector, his chief interest was Native American ethnography.)

North America. Perennial non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 18: 192. 1883 and *Revision of North-American Astragalus* 231. 1923, *Memoirs of the New York Botanical Garden* 13: 745–746. 1964

(Ceremonial, leaves emetic.)

in English: Matthews’ woolly milkvetch, woolly locoweed

Astragalus mollissimus Torr. var. *mollissimus*

North America. Perennial non-climbing herb, robust, tufted, numerous hairy small light green leaflets usually arching, hairy flower stems, long and narrow pink-purple flowers, short very hairy seeds

See *Annals of the Lyceum of Natural History of New York* 2: 178–179. 1827–1828, *Proceedings of the American Academy of Arts and Sciences* 6: 195. 1864, *Proceedings of the American Academy of Arts and Sciences* 10: 345–346. 1875, *Bulletin of the Torrey Botanical Club* 8(9): 97. 1881, *Revisio Generum Plantarum* 2: 946, 948. 1891, *Contributions to Western Botany* 8: 23. 1898 and *Torreya* 2(10): 154–155. 1902, *Leaflets of Western Botany* 4(4): 60. 1944, *Rhodora* 62(736): 116. 1960, *Memoirs of the New York Botanical Garden* 13: 745–747. 1964

(Poisonous, producing a toxic and addictive alkaloid, highly poisonous to livestock, especially to horses.)

in English: locoweed, purple locoweed, Thompson’s woolly locoweed, woolly loco, woolly locoweed, woolly milkvetch

Astragalus multiceps Benth. (*Astragalus bicuspis* Fisch.; *Astragalus jacquemontii* Bunge; *Astragalus leptocentrus* Bunge; *Astragalus multiceps* Wall. ex Benth.; *Astragalus multiceps* Wall.)

India, Himalaya. Perennial non-climbing shrub

See *Ill. Bot. Himal. Mts.* 199. 1835, *Mém. Acad. Imp. Sci. St.-Pétersbourg*, Sér. 7. 11(16): 44. 1868 and 15(1): 68. 1869), *Flora of British India* 2: 56–306. 1876–1879 and *Bot. Hist. Hortus Malabaricus* 105. 1980

(Seeds demulcent, stomachic, sedative and emollient, used in the treatment of colic and leprosy.)

in Afghanistan: diddani, tinani

in India: bharna, buarina, kande, kandiara, katarkanda, pisar, sarmul

Astragalus pachypus Greene (*Astragalus pachypus* var. *pachypus*; *Brachyphragma pachypus* (Greene) Rydb.)

North America. Perennial non-climbing herb, flowers cream-white

See *Bulletin of the California Academy of Sciences* 1(3): 157. 1885 and *North American Flora* 24(7): 401. 1929, *American Journal of Botany* 16(4): 204–205, pl. 17S. 1929

(Analgesic, roots decoction taken for menstrual pains.)

in English: thickpod milkvetch

Astragalus pattersonii A. Gray (*Astragalus pattersonii* A. Gray ex Brandegee; *Jonesiella pattersonii* (A. Gray) Rydb.; *Phacopsis pattersonii* (A. Gray) Rydb.; *Rydbergiella pattersonii* (A. Gray) Fedde; *Rydbergiella pattersonii* (A. Gray) Fedde & P. Syd.; *Tragacantha pattersonii* (A. Gray) Kuntze) (Asa Gray named this species from a specimen “collected by Mr. H.N. Patterson [in 1876?]. . . in the foothills of Gore Mountains, Colorado”; Patterson, Edward Harry Norton, 1853–1919, Illinois newspaper publisher and amateur botanist.)

North America. Perennial non-climbing herb, arching red stems, white flowers, distinctive fringing of the calyx

See *Fl. S. W. Colorado* 235. 1876 (also *Bull. U.S. Geol. Surv. Terr.* 2: 235. 1876), *Revisio Generum Plantarum* 2: 947. 1891 and *Just's botanischer Jahresbericht*. 33(1[3]): 534. 1905[1906], *Bulletin of the Torrey Botanical Club* 32(12): 661. 1905[1906], *Revision of North-American Astragalus* 153. 1923, *North American Flora* 24(7): 402. 1929

(Poisonous to stock. Analgesic, emetic, for earache, sore throats.)

in English: Patterson's milkvetch

Astragalus penduliflorus Lam. (*Astragalus alpinus* (L.) E. Sheld.; *Astragalus membranaceus* Moench fo. *propinquus* (Schischk.) Kitag.; *Astragalus mongholicus* Bunge; *Astragalus penduliflorus* subsp. *mongholicus* (Bunge) X.Y. Zhu; *Astragalus penduliflorus* var. *mongholicus* (Bunge) X.Y. Zhu; *Astragalus propinquus* Schischk.; *Colutea alpina* (L.) Lam.; *Phaca alpina* L.; *Phaca alpina* L.; *Phaca penduliflora* (Lam.) Dusen; *Phaca penduliflora* (Lam.) Bech.; *Tragacantha penduliflora* (Lam.) Kuntze; *Tragacantha penduliflora* Kuntze)

Europe. Perennial non-climbing herb

See *Species Plantarum* 2: 755–762. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Flore Française* 2: 636. 1778, *Methodus Plantas Horti Botanici* ... 167. 1794, *Revisio Generum Plantarum* 2: 947. 1891 and *Mém. Acad. Sci. St. Pétersb.* sér. 7, 11(16): 117. 1964, *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, *Cathaya* 2: 139–150. 1990, *Nordic Journal of Botany* 23(3): 288–289. 2005

(Roots used for diarrhea, rectocele.)

in English: Mongolian milk vetch, mountain lentil, nickender tragant

in China: huang qi, huangqi

Astragalus polyacanthus Benth. (*Astragalus polyacanthus* Royle ex Benth.; *Astragalus polyacanthus* Royle; *Astragalus polyacanthus* Wall.; *Astragalus psilacanthus* Fisch.; *Astragalus psilacanthus* auct.; *Astragalus psilacanthus* Boiss.; *Astragalus tenuispinus* Bunge)

India, Himalaya, Nepal. Perennial non-climbing shrub

See *A Numerical List of Dried Specimens* [Wallich] n. 5934. 1831, *Ill. Bot. Himal. Mts.* [Royle] 199. 1833–1840, *Diagn. Pl. Orient.* ser. 1, 9: 97. 1849, *Bull. Soc. Imp. Naturalistes Moscou* xxvi. (1853) 407. 1853, *Mém. Acad. Imp. Sci. St.-Pétersbourg*, Sér. 7. 11(16): 44. 1868 and 15(1): 70. 1869

(Plants given for colic, stomachache, leprosy. Gum antelmintic, antirheumatic. Roots tonic, as a toothbrush for toothache; a decoction in chronic bronchitis, cough and cold.)

in China: duo ci huang qi

in India: jib

Astragalus praelongus E. Sheld. (*Astragalus pattersonii* var. *praelongus* (E. Sheld.) M.E. Jones; *Astragalus pattersonii* var. *procerus* (A. Gray) M.E. Jones; *Astragalus praelongus* var. *ellisiae* (Rydb.) Barneby ex B.L. Turner; *Astragalus praelongus* var. *lonchopus* Barneby; *Astragalus praelongus* var. *praelongus*; *Astragalus procerus* A. Gray, nom. illeg.; *Astragalus recedens* (Rydb.) C.L. Porter; *Astragalus recedens* Ced. Porter; *Astragalus recedens* (Greene ex Rydb.) Ced. Porter; *Astragalus rothrockii* E. Sheld.; *Jonesiella ellisiae* Rydb.; *Jonesiella mearnsii* Rydb.; *Jonesiella praelonga* (E. Sheld.) Rydb.; *Jonesiella recedens* Rydb.; *Jonesiella rothrockii* (E. Sheld.) Rydb.; *Phacopsis praelongus* (E. Sheld.) Rydb.; *Rydbergiella praelonga* (E. Sheld.) Fedde & P. Syd.)

North America. Perennial non-climbing herb, coarse, light green stems, long tubular pale yellow blooms in thick dangling clusters at the apex of the stem

See *Flora Orientalis* 2: 464. 1872, *Proceedings of the American Academy of Arts and Sciences* 13: 369. 1878, *Minnesota Botanical Studies* 1(1): 23. 1894, *Minnesota Botanical Studies* 1(3): 174. 1894, *Proceedings of the California Academy of Sciences, Series 2*, 5(18): 636. 1895 and *Contributions to Western Botany* 10: 65. 1902, *Bulletin of the Torrey Botanical Club* 32(12): 661. 1905[1906], *Just's botanischer Jahresbericht*. 33(1[3]): 534. 1905[1906], *North American Flora* 24(7): 403–404. 1929, *American Journal of Botany* 28(10): 888. 1941[1942], *The Legumes of Texas* 190. 1959, *Leaflets of Western Botany* 9(6): 90–91. 1960, *Phytologia* 56(1): 55–60. 1984

(Poisonous, a selenium-accumulating plant. Magic, ritual, ceremonial, emetic.)

in English: stinking locoweed, stinking milkvetch

Astragalus propinquus Schischkin (*Astragalus membranaceus* (Fisch.) Bunge; *Astragalus membranaceus* Moench;

Astragalus membranaceus Bunge; *Astragalus membranaceus* (Fisch. ex Link) Bunge; *Astragalus membranaceus* var. *mongholicus* (Bunge) P.G. Xiao; *Astragalus membranaceus* var. *mongholicus* (Bunge) P.K. Hsiao; *Astragalus mongholicus* Bunge; *Astragalus penduliflorus* Lam.; *Astragalus propinquus* var. *glabra* Vyd.; *Phaca membranacea* Fischer; *Phaca membranacea* Fischer ex Link)

E. Asia, Mongolia, China. Perennial non-climbing herb

See *Species Plantarum* 2: 755–762. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Flore Française* 2: 636. 1778, *Methodus Plantas Horti Botanici ...* 167. 1794, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 252. 1822 and *Acta Pharmaceutica Sinica* 11(2): 117. 1964, *Neo-Lineam. Fl. Manshur.* 396. 1979, *Cathaya* 2: 139–150. 1990, *Nordic Journal of Botany* 23(3): 288–289. 2005

(Root and plant antibacterial, cardiogenic, diuretic, febrifuge, hypoglycemic, hypotensive, pectoral, uterine tonic, vasodilator, used for treatment of the kidneys, diarrhea, prolapse of the uterus or anus, abscesses and chronic ulcers; root can increase the production of interferon and macrophages.)

in English: membranous milk vetch, Mongolian milk vetch

in China: huang qi, huangqi

Astragalus purshii Hook. (*Astragalus glareosus* Douglas; *Astragalus incurvus* (Rydb.) Abrams; *Astragalus purshii* Douglas; *Astragalus purshii* Douglas ex Hook.; *Astragalus purshii* Douglas ex G. Don; *Astragalus purshii* var. *incurvus* (Rydb.) Jeps.; *Astragalus purshii* var. *interior* M.E. Jones; *Astragalus purshii* var. *longilobus* M.E. Jones; *Astragalus purshii* var. *purshii*; *Astragalus purshii* var. *typicus* Barneby; *Astragalus ventosus* Suksd. ex Rydb., nom. inval.; *Phaca mollissima* Nutt.; *Phaca mollissima* Torr. & A. Gray; *Phaca purshii* (Douglas ex Hook.) Piper; *Phaca purshii* (Hook.) Piper; *Tragacantha purshii* (Hook.) Kuntze; *Tragacantha purshii* (Douglas ex Hook.) Kuntze; *Xylophacos incurvus* Rydb.; *Xylophacos purshii* Rydb.; *Xylophacos purshii* (Hook.) Rydb.)

North America. Perennial non-climbing herb, tufted, woody-based, stems and leaves covered with very fine wavy entangled silver or gray hair, flowers purple pink to lavender or cream, flower stalks erect to prostrate among leaves, seed-pods covered with thick white hairs

See *Flora Boreali-Americana* 1(3): 152. 1831, *A General History of the Dichlamydeous Plants* 2: 271. 1832, *A Flora of North America: containing ...* 1(2): 350. 1838, *Revisio Generum Plantarum* 2: 947. 1891 and *Bulletin of the Torrey Botanical Club* 32(12): 662. 1905[1906], *Contributions from the United States National Herbarium* 11: 369. 1906, *Bulletin of the Torrey Botanical Club* 52(7): 366–367. 1925, *A Flora of California* 2(4): 360. 1936, *Illustrated Flora of the Pacific States* 2: 577. 1944, *Mem. New York Bot. Gard.* 13: 671. 1964

(The milk from an animal that has ingested *Astragalus* plants may also be toxic. Disinfectant.)

in English: Pursh loco milkvetch, Pursh milk-vetch, Pursh's milkvetch, Pursh's sheeppod, Pursh's woolly pod, woolly-pod locoweed, woollypod milkvetch

Astragalus purshii Hook. var. ***tinctus*** M.E. Jones (*Astragalus candelarius* E. Sheld.; *Astragalus candelarius* var. *exiguus* E. Sheld.; *Astragalus consectus* E. Sheld.; *Astragalus inflexus* G. Don var. *flocculatus* Jeps.; *Astragalus inflexus* var. *ordensis* Jeps.; *Astragalus leucolobus* M.E. Jones subsp. *consectus* (E. Sheld.) Abrams; *Astragalus purshii* var. *gavisus* Jeps.; *Astragalus purshii* var. *longilobus* M.E. Jones; *Astragalus purshii* var. *ordensis* (Jeps.) Jeps.; *Phaca purshii* (Hook.) Piper var. *tincta* (M.E. Jones) Piper; *Xylophacos candelarius* (E. Sheld.) Rydb.; *Xylophacos consectus* (E. Sheld.) Rydb.; *Xylophacos subvillosus* Rydb.)

North America. Perennial non-climbing shrub

See *Zoë* 4(3): 269. 1893, *Minnesota Botanical Studies* 1(3): 142–143. 1894 and *Contributions from the United States National Herbarium* 11: 369. 1906, *Bulletin of the Torrey Botanical Club* 40(2): 49. 1913, *A Manual of the Flowering Plants of California ...* 573. 1925, *Bulletin of the Torrey Botanical Club* 52(7): 370. 1925, *A Flora of California* 2(4): 360. 1936, *Illustrated Flora of the Pacific States* 2: 578. 1944, *Mem. New York Bot. Gard.* 13: 675. 1964

(Analgesic, roots decoction taken for menstrual pains.)

in English: woollypod, woollypod milkvetch

Astragalus racemosus Pursh (*Astragalus galegoides* Nutt.; *Astragalus racemosus* var. *brevisetus* M.E. Jones; *Astragalus racemosus* var. *racemosus*; *Astragalus racemosus* var. *treleasei* Ced. Porter; *Astragalus racemosus* var. *typicus* Ced. Porter; *Tium brevisetum* (M.E. Jones) Rydb.; *Tium racemosum* (Pursh) Rydb.; *Tragacantha racemosa* (Pursh) Kuntze; *Tragacantha racemosa* Kuntze)

Central and North America. Perennial non-climbing herb, erect to ascending, racemes elongate on stalks, drooping white or pale purple flowers

See *Flora Americae Septentrionalis; or, ...* 2: 740. 1814[1813], *The Genera of North American Plants* 2: 100. 1818, *Revisio Generum Plantarum* 2: 947. 1891, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 662. 1895 and *Bulletin of the Torrey Botanical Club* 32(12): 659. 1905[1906], *North American Flora* 24(7): 386. 1929, *Madroño* 8(3): 99–100, pl. 9, f. 1–3. 1945, *Mem. New York Bot. Gard.* 13: 416. 1964, *Alternative and Complementary Therapies*. 12(4): 165–171. 2006

(Plant poisonous to livestock, selenium poisoning.)

in English: alkali milkvetch, cream milkvetch, creamy milkvetch, creamy poison-vetch, Trelease's alkali milkvetch

Astragalus racemosus Pursh var. *racemosus*

Central and North America. Perennial non-climbing herb, erect to ascending, racemes elongate on stalks, drooping white or pale purple flowers

See *Flora Americae Septentrionalis*; or, ... 2: 740. 1814[1813], *The Genera of North American Plants* 2: 100. 1818, *Revisio Generum Plantarum* 2: 947. 1891, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 662. 1895 and *Bulletin of the Torrey Botanical Club* 32(12): 659. 1905[1906], *North American Flora* 24(7): 386. 1929, *Madroño* 8(3): 99–100, pl. 9, f. 1–3. 1945, *Mem. New York Bot. Gard.* 13: 416. 1964, *Alternative and Complementary Therapies*. 12(4): 165–171. 2006

(Plant poisonous to livestock, selenium poisoning.)

in English: alkali milkvetch, cream milkvetch, creamy milkvetch, creamy poison-vetch, Trelease's alkali milkvetch

Astragalus rhizanthus Benth. (*Astragalus hindukushensis* Wendelbo; *Astragalus rhizanthus* Royle ex Benth.; *Astragalus rhizanthus* Royle; *Astragalus rhizanthus* Boiss.)

Himalaya, India, Kashmir, Pakistan. Perennial non-climbing herb, densely covered with silky hairs, stemless and caespitose, bright yellow flowers aggregated in cluster, leaves grazed by sheep and goats, variable species

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 301. 1825, *Ill. Bot. Himal. Mts.* [Royle] 199–200. 1835, *Diagnoses plantarum orientalium novarum*, ser. 1, 1(2): 83. 1843, *Fl. Brit. Ind.* 2: 132. 1876 and *Biologia* 7: 57. 1961, *Taiwania* 53(4): 338–355. 2008

(Roots heart stimulant; roots paste applied externally against skin infection and diseases. Insecticide.)

in India: dukchal, krelsed, krelseng, sarma, serma, srachun, zomoshing

in Tibetan: srad ser

Astragalus rhizanthus Benth. subsp. ***candolleanus*** (Benth.) Podlech (*Astragalus candolleanus* Royle; *Astragalus candolleanus* Benth.; *Astragalus candolleanus* Royle ex Benth.; *Astragalus rhizanthus* subsp. *candolleanus* (Royle ex Benth.) Podlech; *Astragalus royleanus* Bunge)

Himalayas, Pakistan, Kashmir. Perennial non-climbing shrub, suberect or prostrate, variable, yellow flowers, inflorescence a compact raceme

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 301. 1825, *Illustrations of the Botany ... of the Himalayan Mountains ...* 199–200. 1835, *Diagnoses plantarum orientalium novarum*, ser. 1, 1(2): 80. 1843 and *Feddes Repertorium* 83(9–10): 631. 1972[1973], *Himalayan Chem. Pharm. Bull.* 2: 42–48. 1985, *Mitt. Bot. Staatssamml. München* 25(1): 184. 1988

(Whole plant depurative, bechic, blood purifier, used for leprosy, skin diseases, tuberculosis, bringing fertility to barren women; root powder and decoction used in tuberculosis.)

in India: rudanti, rudarvantee, rudravanti, rudrawanti

Astragalus sesquiflorus S. Watson (*Astragalus sesquiflorus* var. *brevipes* Barneby; *Batidophaca sesquiflora* (S. Watson) Rydb.; *Phaca sesquiflora* (S. Watson) Rydb.; *Tragacantha sesquiflora* (S. Watson) Kuntze)

North America. Perennial non-climbing shrub

See *Proceedings of the American Academy of Arts and Sciences* 10: 346. 1875, *Revisio Generum Plantarum* 2: 948. 1891 and *Bulletin of the Torrey Botanical Club* 40(2): 48. 1913, *North American Flora* 24(6): 318. 1929, *American Midland Naturalist* 55(2): 478. 1956

(Applied to ringworm. Ceremonial, ritual, emetic.)

in English: sandstone milkvetch

Astragalus tibetanus Bunge (*Astragalus chadjanensis* Franch.; *Astragalus tibetanus* Benth. ex Bunge; *Astragalus tibetanus* var. *patentipilus* K.T. Fu; *Astragalus talievii* Sirj.)

India, Afghanistan. Perennial non-climbing herb

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 11(16): 52. 1868 and 15(1): 85. 1869, *Bulletin du Muséum d'Histoire Naturelle* 2: 344. 1869, *Minnesota Botanical Studies* 1(3): 164. 1894 and *Bulletin of Botanical Research* 2(4): 73. 1982

(Goats could die of excessive eating of the leaves of this plant.)

in India: biru

Astragalus tribuloides Delile (*Astragalus kirghisicus* Stschegl.; *Astragalus tribuloides* Kotschy ex Bunge; *Astragalus tribuloides* Delile var. *leiocarpus* Boiss.)

India, Egypt. Annual non-climbing herb

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 70. 1813, *Mém. Acad. Imp. Sci. St.-Pétersbourg*, Sér. 7. 15(1): 10. 1869

(Seeds used as demulcent.)

in Arabic: beyd-el-djemel, ruchainu quedd, rukhaimi qudad

in China: ji li huang qi

in India: ogai, ogaj

Astragalus verus Olivier (*Astragalus verus* DC. ex Bunge)

Iran, Asia Minor, India. Perennial non-climbing shrub, branches covered with imbricate scales and spines, yellow flowers, gummy exudation

(Demulcent.)

in English: gum dragon, tragacanth

in India: vadamocottay pisin

Astragalus vogelii (Webb) Bornm. (*Astragalus gautieri* Batt. & Trab.; *Astragalus prolixus* Sieber ex Bunge; *Astragalus vogelii* (Webb) Hutch. & Dalziel; *Astragalus vogelii* Bornm.;

Astragalus vogelii subsp. *prolixus* (Sieber ex Bunge) Maire;
Phaca vogelii Webb)

Tropical Africa, India. Annual non-climbing herb, ephemerals, sprawling, a good source of livestock grazing

See *Species Plantarum* 2: 755. 1753, *Niger Flora* 123, pl. 8. 1849 and *Conspectus Florae Graecae* 1(2): 429. 1900, *Beihefte zum Botanischen Centralblatt* 33: 233. 1915, *Bulletin of Miscellaneous Information Kew* 1928(10): 404. 1928, *Anales Jard. Bot. Madrid* 8: 357–431. 1948, *Mitt. Bot. Staatss. Munchen* 20: 441–499. 1984

(Veterinary medicine, lactogenic, stimulant, encourages fertility and milk production.)

in Arabic: tawil

in Mali: adrilel, tiraral

Astragalus zanskarensis Bunge (*Astragalus zanskarensis* Benth. ex Bunge)

Himalaya, Nepal. Perennial non-climbing shrub, leaves grazed by goats and sheep

See *Mém. Acad. Imp. Sci. St.-Pétersbourg*, Sér. 7. 11(16): 43. 1868; 15(1): 67. 1869

(Seeds antihelminthic.)

in India: dianko, nanchu

Astragalus zanskarensis Bunge subsp. *zanskarensis* (*Astragalus cicerifolius* Bunge; *Astragalus cicerifolius* Royle ex Bunge; *Astragalus cicerifolius* Royle ex Fisch.; *Astragalus oplites* Benth. ex Baker; *Astragalus oplites* R. Parker; *Astragalus zanskarensis* subsp. *oplites* (R. Parker) I. Deml)

Himalayas, India, Kashmir. Perennial non-climbing shrub, leaves grazed by goats and sheep

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 26(2): 404. 1853, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 11(16): 44. 1868, *The Flora of British India* 2(4): 134. 1876

(Underground parts antiemetic.)

in India: dianko, nanchu, yakpo

Astripomoea A.D.J. Meeuse Convolvulaceae

From the Greek *aster* 'a star' and the genus *Ipomoea* L., possibly for a plant with starry pubescence, see *Bothalia* 6: 709. 1958.

Astripomoea grantii Verdc. (*Astripomoea grantii* (Rendle) Verdc.; *Astrochlaena grantii* Rendle; *Astrochlaena ugandensis* Rendle; *Convolvulus malvaceus* auct., sensu Oliv., non *Breweria malvacea* Klotzsch)

Tanzania. Herb or shrub, short-lived perennial, erect or decumbent, flower white and purple-pink at base, inflorescence a subcapitate cyme, capsule ovoid

See *Kew Bulletin* 13: 196. 1958, *African Study Monographs* 19(1): 13–33. 1998, *Journal of Ethnopharmacology* 109(1): 1–9. 2007

(For mastitis, pregnancy disorders, used to induce labor childbirth. For livestock diseases, wounds, anthrax, rabies, madness, plague.)

in Congo: cimenwa, cinenwa, nfumbia likasi

in Rwanda: umuháto, umutakampungwe

in Uganda: mukuzanyara

Astrocaryum G. Meyer Arecaceae (Palmae)

Greek *astron* 'a star' and *karyon* 'nut', an allusion to the arrangement of the fruits; see *L. Praelect. Ord. Nat. Pl.* 38, 53. 1792, *Primitiae Florae Essequeboensis* ... 265–266. 1818, *Nachr. Kaiserl. Oesterr. Naturf. Brasilien* 2(Anhang): 12. 1822 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 156. 1934, *Fieldiana, Bot.* 24(1): 196–299. 1958, *Gentes Herbarum*, ix. 247. 1963, Claudio Urbano B. Pinheiro and Michael J. Balick, "Brazilian Palms. Notes on Their Uses and Vernacular Names, etc." in *Contributions from the New York Botanical Garden*. Volume 17. 1987, Hammel, B.E. et al. *Manual de Plantas de Costa Rica* 2: 1–694. Missouri Botanical Garden Press. 2003.

Astrocaryum acaule Martius (*Astrocaryum acaule* var. *angustifolium* Drude; *Astrocaryum giganteum* Barb. Rodr.; *Astrocaryum huebneri* Burret; *Astrocaryum luetzelburgii* Burret)

South America. Trunkless palm, spiny, leaves pinnate, axillary panicle, ovoid fruits apically beaked

See *Historia Naturalis Palmarum* 2: 78, t. 24, 63, fig. 5. 1824, *Fl. Bras.* 3(2): 386. 1881 and *Contributions du Jardin Botanique de Rio de Janeiro* 82. 1902, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 1021. 1930, *Repertorium Specierum Novarum Regni Vegetabilis* 35: 128. 1934

(Ripe seeds and endocarp used.)

in Brazil: jarivá, tucum rasteiro, tucumã, tucumã-i

Astrocaryum aculeatum G. Mey. (*Astrocaryum aculeatum* Wallace, nom. illeg., non *Astrocaryum aculeatum* G. Mey.; *Astrocaryum aureum* Griseb.; *Astrocaryum candescens* Barb. Rodr.; *Astrocaryum chambira* Burret; *Astrocaryum jucuma* Linden; *Astrocaryum macrocarpum* Huber; *Astrocaryum manaoense* Barb. Rodr.; *Astrocaryum princeps* Barb. Rodr.; *Astrocaryum princeps* var. *aurantiacum* Barb. Rodr.; *Astrocaryum princeps* var. *flavum* Barb. Rodr.; *Astrocaryum princeps* var. *sulphureum* Barb. Rodr.; *Astrocaryum princeps* var. *vitellinum* Barb. Rodr.; *Astrocaryum tucuma* Mart.)

S. Trop. America. Tree, heavily spined trunks, base of spadix densely spiny, leaves very long, the leaflets irregularly arranged and white below, edible oil, (Thorny, intensely spiny.)

See *Primitiae Florae Essequiboensis* ... 265–266. 1818, *Historia Naturalis Palmarum* 2: 77 t. 65 f. 2. 1824, *Palm Trees of the Amazon* 111, t. 43. 1853, *Flora of the British West Indian Islands* 521. 1864, *Enumeratio palmarum novarum quas valle fluminis Amazonum inventas et ad sertum palmarum collectas* 22. 1875, *Vellosia* (ed. 2) 1: 49–50, 105. 1891 and *Bulletin de l'Herbier Boissier*, sér. 2, 6: 271. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 35: 122. 1934, *Braz. J. Biol.* 65(4): 711–716. 2005, *J. Agric. Food Chem.* 55(13): 5062–5072. 2007

in Brazil: murumuru, tucum, tucuma

in Venezuela: kijajuaya

Astrocaryum alatum H.F. Loomis (*Hexopetion alatum* (H.F. Loomis) F. Kahn & Pintaud)

C. America, Colombia. Tree, short trunk, erect, armed, mass of roots at base, persistent leaf bases, sheath persistent, very spiny along midrib and petiole, inflorescences among leaves, flowers creamy white, infructescence erect or pendent, old spathes reflexed, hard fruit brownish green with blackish spines, fruit can be eaten, pulp sometimes eaten, lowland, forest edge, tropical wet forest, (Rows of black spines.)

See *Journal of the Washington Academy of Sciences* 29(4): 142–146, f. 1–2. 1939, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 201–293. 2003, *Revista Peruana de Biología* 15(Supl. 1): 53. 2008

in Costa Rica: coquillo palm, coquito, coyolillo, surubre

in Honduras: kajka, lancetilla

in Mexico: chocon

in Nicaragua: casca

in Panama: lancetilla

in Venezuela: alcoyure, cumare, murumuru, tucuma, yauary

Astrocaryum gynacanthum Mart. (*Astrocaryum dasychaetum* Burret; *Astrocaryum dasychaetum* (Burret) Burret; *Astrocaryum gymnopus* Burret; *Astrocaryum gynacanthum* var. *dasychaetum* Burret; *Astrocaryum gynacanthum* var. *munbaca* Trail; *Astrocaryum gynacanthum* var. *munbaca* (Mart.) Trail; *Astrocaryum minus* Trail; *Astrocaryum minus* var. *terrae-firmae* Drude; *Astrocaryum minus* var. *terrafirme* Drude; *Astrocaryum munbaca* Mart.; *Astrocaryum rodriguesii* Trail; *Astrocaryum rodriguesii* var. *minus* (Trail) Barb. Rodr.)

Tropical America. Trunk armed with rings of flattened black spines, pinnate leaves, obovate fruits eaten, (Thorny, intensely spiny.)

See *Hist. Nat. Palm.* 2: 71, 73–74. 1824, *Journal of Botany, British and Foreign* 15: 78–79. 1877, *Flora Brasiliensis* 3(2): 374. 1881 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 1020. 1930, *Repertorium Specierum Novarum Regni Vegetabilis* 35: 141. 1934

Vernacular names: cubarillo, xaneeboto

in Brazil: coqueiro mumbaca, marajá-açu, mumbaca

in Venezuela: manaca, quidiyou, wuaju, zawarasi

Astrocaryum mexicanum Liebm. ex Mart. (*Astrocaryum cohune* (S. Watson) Standl.; *Astrocaryum rostratum* Hook. f.; *Astrocaryum warscewiczii* H. Karst.; *Bactris cohune* S. Watson; *Hexopetion mexicanum* (Liebm. ex Mart.) Burret)

Mexico to C. America. Tree, flat triangular spines on junction of internodes, blade regularly pinnate, leaves glaucous below, armed throughout petioles, inflorescence erect among the leaves, flowers cream, infructescence erect among leaves, spiny brown ovoid fruits, spathe persisting, seeds and very young inflorescence edible, (Armed with spines.)

See *Introductio ad Historiam Naturalem* 70. 1777, *Primitiae Florae Essequiboensis* ... 265–266. 1818, *Historia Naturalis Palmarum* 3: 323. 1853, *Botanical Magazine* 80. 1854, *Wochenschrift für Gärtnerei und Pflanzenkunde* 1: 297. 1858, *Proceedings of the American Academy of Arts and Sciences* 21: 467–468. 1886 and *Tropical Woods* 21: 25. 1930, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 156. 1934, *Mycorrhiza*. 13(5): 271–276. 2003, *Ecol. Appl.* 17(1): 118–128. 2007

in Belize: chapay

in Brazil: chapéu-mexicano, coyol

in Honduras: lancetilla

in Mexico: capean, chichon, choco

Astrocaryum standleyanum L.H. Bailey (*Astrocaryum standleyanum* var. *calimense* Dugand; *Astrocaryum trachycarpum* Burret)

Costa Rica, Ecuador. Tree, adventitious roots at nodes, armed with flattened spines, trunk and petiole very spiny, trunk internodes set with long spines, leaf base heavily armed, rachis armed with spines of different length, pendent inflorescences from upper leaves, peduncle heavily armed, fruits basally on floral branches, drooping ripe fruits bright orange, leathery spineless pericarp, pulp orange, unripe and ripe fruits eaten, (Spiny trunk and leaves.)

See *Gentes Herbarum*; occasional papers on the kind of plants 3(2): 88, f. 67–70. 1933, *Repertorium Specierum Novarum Regni Vegetabilis* 35: 138. 1934, *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 8: 396. 1951

in English: black palm

in Central America: chungá, coyolillo, guerre, guerregue, guinul, mocora, poca chi, pucajchi, pucaishchi, pucashchi, puka tci

in Ecuador: huinul, mocora, pucajchi

in Panama: naba

Astrocaryum vulgare Mart. (*Astrocaryum awarra* de Vriese; *Astrocaryum guianense* Splitg. ex Mart.; *Astrocaryum segregatum* Drude; *Astrocaryum tucumoides* Drude)

South America.

See *Hist. Nat. Palm.* 2: 74. 1824, *Hist. Nat. Palm.* 3: 323. 1853, *Fl. Bras.* 3(2): 381–382. 1881

(Roots for venereal diseases. Fruits for colic, stomachache; oil from the fruits for rheumatism.)

in Brazil: tucum, tucumã

in French Guiana: aouara, arouara

in Venezuela: akiato, cumare

Astrolepis D.M. Benham & Windham Adiantaceae (Pteridaceae)

From the Greek *astron* ‘a star’ and *lepis* ‘scale’, referring to the scales on the blade surface.

Astrolepis cochisensis (Goodding) D.M. Benham & Windham (*Astrolepis cochisensis* subsp. *arizonica* D.M. Benham; *Astrolepis cochisensis* subsp. *chihuahuensis* D.M. Benham; *Astrolepis cochisensis* subsp. *cochisensis*; *Cheilanthes cochisensis* (Goodding) Mickel; *Cheilanthes sinuata* (Lagasca ex Swartz) Domin var. *cochisensis* (Goodding) Munz; *Notholaena cochisensis* Goodding; *Notholaena sinuata* (Lagasca ex Swartz) Kaulfuss var. *cochisensis* (Goodding) Weatherby)

North America. Perennial desert fern, compact, reddish brown stems

See *Enumeratio Filicum* 135. 1824 and *Muhlenbergia* 8(8): 93. 1912, *Bibliotheca Botanica* 85(1): 133. 1913, *Journal of the Arnold Arboretum* 24(3): 314. 1943, *Aliso* 4(1): 87. 1958, *Phytologia* 41(6): 433. 1979, *Amer. Fern J.* 82(2): 56–57, 59–60. 1992

(Reported to be toxic to sheep.)

in English: Arizona scaly cloakfern, Chihuahua scaly cloakfern, Cochise scaly cloakfern, Jimmyfern, scaly cloakfern, waxy cloak fern

Astronia Blume Melastomataceae

From the Greek *astron* ‘a star’, see *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 1. 1790, *Bijdragen tot de flora van Nederlandsch Indië* 1080. 1826 [Oct 1826–Nov 1827], *Sylvæ Tellur.* 97. 1838 and *Blumea* 35(1): 104. 1990.

***Astronia macrophylla* Blume**

Indonesia, Malaya. Tree, yellow-cream flowers

See *Bijdragen tot de flora van Nederlandsch Indië* 1080. 1826 [Oct 1826–Nov 1827]

(Young leaves and stem decoction drunk to treat stomachache, diarrhea, fever.)

in English: primary forest jelemutin

in Indonesia: jelemutin empak

Astronium Jacq. Anacardiaceae

From the Greek *astron* ‘star’, see *Enumeratio Systematica Plantarum* 10, 33. 1760 and *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Phytologia* 16(2): 107–152. 1968, *Listados Florísticos de México* 2: 1–100. 1983, *Flora of Ecuador* 30: 9–50. 1987, *Flora del Paraguay* 1–84. 1990, T. Parker & B. Bailey, “A biological assessment of the Alto Madidi region and adjacent areas of Northwest Bolivia.” *Rapid Assessment Program Working Papers* 1: 1–108. 1991, *Listados Florísticos de México* 17: 1–41. 1997, T.J. Killeen & T.S. Schulenberg, “A biological assessment of Parque Nacional Noel Kempff Mercado, Bolivia.” *Rapid Assessment Program Working Papers* 10: 1–372. 1998, W.S. Alverson, D.K. Moskovits & J.S. Shopland, “Bolivia: Pando, Río Tahauamanú.” *Rapid Biological Inventories* 1: 1–79. 2000, M.J. Balick, M.H. Nee & D.E. Atha, “Checklist of the vascular plants of Belize.” *Memoirs of the New York Botanical Garden* 85: i–ix, 1–246. 2000, *Listados Florísticos de México* 22: 1–55. 2001, *Guía de los Árboles y Arbustos del Bosque Seco Chiquitano, Bolivia* i–x, 1–324. 2003, *Ceiba* 44(2): 105–268. 2003 [2005], *Biodiversidad del estado de Tabasco* Cap 4: 65–110. 2005.

Astronium graveolens Jacq. (*Astronium conzattii* S.F. Blake; *Astronium fraxinifolium* Schott ex Spreng.; *Astronium fraxinifolium* var. *glabrum* Engl.; *Astronium graveolens* var. *brasiliense* Engl.; *Astronium graveolens* var. *inodorum* Triana & Planch.; *Astronium graveolens* var. *planchoniana* Engl., nom. illeg.; *Astronium planchonianum* Engl.; *Astronium zongolica* Reko)

South America. Timber tree

See *Systema Vegetabilium*, editio decima sexta 4(2, app.): 404. 1827, *Annales des Sciences Naturelles; Botanique*, sér. 5, 14: 268. 1872, *Flora Brasiliensis* 12(2): 399. 1876, *Monographiae Phanerogamarum* 4: 455–456. 1883 and *Contributions from the Gray Herbarium of Harvard University* 53: 59. 1918, *El México Antiguo* 1: 157. 1918, *Fieldiana, Bot.* 24(6): 177–195. 1949, *Economic Botany* 50(3): 327–336. 1996

(The sawdust sometimes causes such intense skin irritation that the affected areas resemble second-degree burns. Bactericidal, there is good evidence in several primate taxa of the use of these plants for medicinal purposes.)

in English: tigerwood, zebrawood

in South America: gonçalo alves, gonzalo alves, jobillo, palo obrero, ronron

Astronium urundeuva (Allemão) Engl. (*Astronium juglandifolium* Griseb.; *Astronium urundeuva* Engl.; *Myracrodruon urundeuva* Allemão)

South America.

See *Trabalhos da Comissão Científica de Exploração, Seccão Botanica* 1: 3. 1862, *Symbolae ad Floram Argentinam* 94. 1879, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 45. 1881 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 1011. 1934, *Phytologia* 16(2): 107–152. 1968, *Braz. Ethnopharmacol.* 67(1): 69–77. 1999, *Acta Botânica Brasílica* 17: 287–303. 2003, *Contact Dermatitis.* 51(5–6): 311. 2004, *Phytomedicine* 11(2–3): 230–234. 2004, *Phytomedicine* 11(6): 516–522. 2004

(Contact dermatitis. Antimicrobial, antiulcerogenic, antioxidant and antiinflammatory, for treatment of diarrhea, inflammatory processes.)

in South America: aroeira, aroeira da serra, aroeira do campo, aroeira do sertao, aroeira preta, chibatao, cuchi, gibao, gibatao, muiracatiara, pandeiro, ubata, ubatani, urunday, urundel, urundeúva

Asystasia Blume Acanthaceae

Greek *asystasia* ‘confusion, inconsistency, want of union’, *asystatos* ‘loose, having no cohesion’, referring to the habit of the plant; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië.* 14: 796. 1825–1826, *J. Linn. Soc., Bot.* 7: 13–54. 1864 and *Fieldiana: Botany, New Series* 18: 1–87. 1986, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Asystasia calycina Benth. (*Asystasia calycina* Nees)

Ghana. Scrambling herb, straggling, semi-erect to erect, rooting at nodes, corolla white, browsed by sheep

See *Plantae Asiaticae Rariores* 3: 90. 1832, *Niger Fl.* [W.J. Hooker]. 478. 1849 [Nov–Dec 1849]

(Pounded leaves applied to sores; poultice used for healing bullet-wounds.)

Asystasia chelonoides Nees (*Asystasia violacea* Dalzell ex C.B. Clarke)

India, Sri Lanka. Herb, straggling, terminal branched panicles, corolla white to light purple

See *Plantae Asiaticae Rariores* 3: 89. 1832, *Hooker's J. Bot. Kew Gard. Misc.* 2: 139. 1850 and *Indian Journal of Experimental Biology* 40: 812–827. 2002, *Ethnobotanical Leaflets* 11: 280–290. 2007

(Used to relieve internal heat or fever, giddiness, dehydration, leucoderma, leaves and flowers consumed with honey. Roots for skin diseases.)

in China: shi wan cuo

in India: kaattumanikulikipatchilai, kattumaniculiki pachilalai, kattumanikulikipachillai

Asystasia dalzelliana Santapau

India. Herb, young leaves as a vegetable

See *Kew Bulletin* 1948, 276. 1948

(Heated leaves as a bandage on boils and swellings; leaves paste applied on sprains of foot.)

in India: bassatti, harani, karappan-boondu

Asystasia gangetica (L.) T. Anderson (*Asystasia bojeriana* Nees; *Asystasia capensis* Nees; *Asystasia comorensis* Nees; *Asystasia comorensis* var. *humilis* Nees; *Asystasia coromandeliana* Nees; *Asystasia coromandeliana* Burkill & C.B. Clarke; *Asystasia violacea* Dalz.; *Justicia gangetica* L.; *Ruellia secunda* Vahl)

Tropical Africa and Asia. Herb, weed, prostrate or erect, scrambling, straggling, creeping, scandent, climber, trailing, woody rootstock, weak-stemmed, sepals cream pale green, corolla white-purple to pale yellow, hairy capsules, high nutritive value, tender leaves and young stems edible, browsed by stock, along roadsides and riverbanks, coastal alluvium, at forest edges and disturbed areas, in semi-waterlogged areas

See *Amoenitates academicae* ... 4: 299–300. 1759, *Plantae Asiaticae Rariores* 3: 89. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 166–167. 1847, *Enumeratio Plantarum Zeylaniae* 235–236. 1860, *Flora of Tropical Africa* 5: 131. 1899 and *Cat. Pl. Madag., Acanth.* 2(24): 7–32. 1939, *Taxon* 26: 257–274. 1977, *Taxon* 27: 519–535. 1978, *Journal of Cytology and Genetics* 15: 90–92. 1980, Kang, L.C., “*Asystasia*.” *Nature Malaysiana* 6(2): 14–17. 1981, *Taxon* 31: 595–596, 773. 1982, *Cytologia* 48: 491–504. 1983, *Journal of Cytology and Genetics* 65: 310–315. 1986, *Feddes Repertorium* 99: 507–517. 1988, *Special Publication [Bernice Pauahi Bishop Museum]* 1: 988. 1990, *Proceedings of the XIIIth Plenary Meeting of AETFAT, Zomba, Malawi, 1–11 April, 1991* 1: 333–346. 1994, *Systematic Botany* 25(1): 15–25. 2000, *Proceedings of the California Academy of Sciences* 52(12): 143–158. 2000

(Used in Ayurveda and Sidha. The juice, with lime and onion juice, used for dry coughs with an irritated throat and chest complaints; sap applied to sores, swellings, wounds and piles; plant juice to children for swellings and rheumatism. Leaves washed, pounded and boiled, the decoction drunk to eradicate intestinal worms; leaf decoction analgesic, to treat epilepsy, rheumatism and urethral discharge. Powdered roots analgesic, for stomachache and snakebites. Veterinary

medicine, plants pounded with water to make a wash against fleas for young animals.)

in English: Chinese violet, Coromandel, Ganges river asystasia

in China: kaw kua chai

in India: corri, lavana-valli, lavana-valli, lavana-valli, lavangavalli, maithaala kaddi, medday keerai, medde soppu, meddesoppu, meddhe soppu, mekampokki, mitikirai, mooguthi gida, mukka mungera, pacconti, paccorri, paccottinkirai, paccurri, paccutti, palcorrikkirai, palvatintan, panacakkoti, paralaukikam, paralelakkam, parcorri, parcorrikkirai, parcurri, patunayaki, patuvanayaki, payacakkoti, poda beera, porrikkirai, tappeta, valli-upu-dali, venna kattethige

in Malaysia: rumput bunga putih, rumput hantu, rumput nyonya

in Philippines: asistasia, asistasiya, bulak-bulak, zamboangenita

in Thailand: baya, yaya

in Congo: ondo, ondoko

in Kenya: atipa, burutula, enkosida, fuchwe, futsure, futswe, gosida, mtikini, tala-kushe, talakusha, talakushe, thalakushe, tsalakushe, turkwot, vongonya

in Rodrigues Isl.: herbe à pistache

in Tanzania: enkosida, fuchwe, futsure, futswe, gosida, ikingura, ikobito, kamfondofondo kahendavu, katikamonga, kichwamangwo, mchicha, mfuchwe, mtikini, tala-kushe, tikini

in Yoruba: abesukale, ila funfun, lobiri, obo esin, sobohee funfun

Asystasia mysorensis (Roth) T. Anderson (*Asystasia mysorensis* T. Anderson; *Ruellia mysorensis* Roth)

Tanzania. A small herb, erect or scrambling, yellow white flowers borne on a short densely bracted terminal inflorescence, dehiscent yellowish brown capsule, cooked and eaten as a vegetable

See *Species Plantarum* 2: 634–635. 1753, *Journal of the Linnean Society, Botany* 9: 524. 1867

(Said to be good for digestion.)

in Kenya: atipa, esidiba, esitipa, karimi-ka-nthia, kisuvu, muhika-naihu, nyag'ori, orongwo, sitipa

Asystasia schimperi T. Anders. (*Adhatoda rostrata* Hochst. ex Oliv.; *Asystasia rostrata* Solms; *Asystasia rostrata* (Hochst. ex Nees) Solms)

Kenya. Erect, white flowers

See *J. Proc. Linn. Soc., Bot.* 7: 40, 53. 1863

(Leaves infusion taken to treat cough, skin diseases.)

in East Africa: acwer, atipa, ejotot malakao, ttemba

in Kenya: chemurguiwet

in South Africa: umThunuka

Asystasiella Lindau Acanthaceae

Diminutive of the genus *Asystasia* Blume, see *Nat. Pflanzenfam.* 4(3b): 326. 1895.

Asystasiella neesiana (Wallich) Lindau (*Asystasia chinensis* S. Moore; *Asystasia neesiana* (Wallich) Nees; *Asystasia neesiana* Nees; *Asystasiella chinensis* (S. Moore) E. Hossain; *Ruellia neesiana* Wallich)

China.

See *Journal of Botany, British and Foreign* 13(152): 228–229. 1875 and *Notes from the Royal Botanic Garden, Edinburgh* 32(3): 405. 1973

(Leaves and rhizome used as medicine.)

in China: bei jie guo

Ataenidia Gagnepain Marantaceae

From the Greek *a* 'negative' and *tainia* 'fillet, a ribbon', see *Bulletin de la Société Botanique de France* 55: xli. 1908.

Ataenidia conferta (Benth.) Milne-Redh. (*Ataenidia gabonensis* Gagnep.; *Calathea conferta* Benth.; *Donax conferta* (Benth.) Roberty; *Phrynium confertum* K. Schum.; *Phrynium confertum* (Benth.) K. Schum.; *Phrynium crista-galli* A. Chev., Hutch. & Dalziel; *Phrynium crista-galli* A. Chev.; *Phrynium gabonense* (Gagnep.) Loes.; *Phrynium textile* Ridl.; *Phyllodes conferta* (Benth.) Kuntze; *Phyllodes textile* (Ridl.) T. Durand & Schinz)

Ghana, Nigeria, Trop. Africa. Herb, branching, tufted, straggling, mauve white flowers in terminal spikes, flowering bracts dark red, membranous indehiscent fruit, leaf shoot eaten by chimpanzee

See *Gen. Pl.* [Bentham & Hooker f.] 3(2): 653. 1883 [14 Apr 1883], *Journal of Botany, British and Foreign* 25: 133. 1887, *Revisio Generum Plantarum* 2: 696. 1891, *Consp. Fl. Afric.* 5: 133. 1894 and *Pflanzenr.*, IV, 48: 56. 1902, *Bull. Soc. Bot. France* 55: 41. 1908, *Exploration Botanique de l'Afrique Occidentale Française* ... i 631. 1920, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 15a: 673. 1930, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] ii. 337. 1936, *Kew Bulletin* 1952: 168. 1952, *Fl. Ouest-Afr.*: 360. 1954

(Vermifuge, astringent, wound healing.)

Atalantia Corr. Rutaceae

Named in honor of Atalanta (or Atalante), probably a by-form of the goddess Artemis, in Greek legend the daughter

of the Arcadian Iasus by his wife Clymene; according to a Boeotian legend she was the daughter of King Schoeneus of Scyros and her husband Hippomenes; in *Annales du Muséum National d'Histoire Naturelle*. 6: 383. Paris 1805.

Atalantia monophylla Corr. (*Atalantia floribunda* Wight; *Atalantia malabarica* (Raf.) Tanaka; *Atalantia monophylla* (L.) Corr.; *Atalantia monophylla* (L.) DC.; *Atalantia monophylla* DC.; *Atalantia monophylla* Hook. & Arn.; *Atalantia puberula* Miq.; *Atalantia spinosa* (Willd.) Tan.; *Limonia monophylla* L.; *Limonia monophylla* Roxb., non L.; *Malnarega malabarica* Raf.; *Trichilia spinosa* Willd.; *Turraea spinosa* Willd.; *Turraea virens* Hellen., non L.)

India, Sri Lanka. Shrub or small tree, glabrous, much-branched, widely spreading crown, unarmed or with strong straight axillary spines, coriaceous alternate leaves, leaflets elliptic or ovate-oblong, calyx more or less irregularly and deeply 2-cleft, fragrant flowers fascicled or shortly racemose to paniculate, fruit a small hesperidium, seeds oblong, ripe fruits palatable, very hard wood, dry habitats and climates, rocky coasts, rocky or sandy soils

See *The Civil and Natural History of Jamaica in Three Parts* 278. 1756, *Mant. Pl. Altera* 237. 1771, *Annales du muséum national d'histoire naturelle* 6: 383–384. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 535. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 133. 1825, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 18: 324. 1836 and *J. Ind. Bot. Soc.* 16: 233. 1937, *Proceedings of the Indian Science Congress Association* 71(3-x): 13. 1984, *Revis. Handb. Fl. Ceylon* 5: 418. 1985, *Acta Botanica Indica* 18: 67–70. 1990, *Chem. Pharm. Bull. (Tokyo)*. 44(7): 1415–1417. 1996, *American Journal of Botany* 87(5): 735–747. 2000, *Mem. Inst. Oswaldo Cruz*. 99(1): 115–118. 2004, *Ethnobotany* 17(1–2): 205. 2005

(Used in Ayurveda and Sidha. Roots antiseptic, antiviral, antispasmodic, stimulant, useful in rheumatism, lumbago, snakebite and swellings. Leaves decoction used in itches and skin diseases; leaf paste massaged to relieve backache and waist pain. Fruits antipyretic; unripe fruits prescribed as digestive, appetizing, invigorating and gastric stimulant; essential oil from the fruits used in paralysis and chronic rheumatism. Mosquitocidal.)

in English: Indian atalantia, sea lime, wild lime

in India: adavi limbe, adavi nimbe, adavi-nimma, adavi-munugudu, adavinimbe, adavinimma, adivinimma, anakamitam, atavi-jambira, betta, betta kanchi, chor-nimbu, chulemo, dodda huli, dodi-nimbu, dodli huli, dodlihuli, erra munukudu, erramunukudu, ettamunukudu, ida-nimbu, iyacakurinci, iyacakurincimaram, jangli-neembu, junglinimbu, kaadu limbe, kaadu nimbe, kaaka kanchi, kaakanchi, kaakanchi balli, kacappuelumiccai, kacapputtotikam, kacapputtotikamaram, kadinimbi, kadnimbai, kadu-limbe, kadulimbe, kadumbi, kadunimbe, kaiperapuli, kaiperipuli, kaitikam, kaitikamaram, kanchi, kanchile, kappiliyelumiccai, karu nimma, karunimma, katimbai, katnaranjee,

kattanaragam, kattelimiccai, kattelumiccai, kattelumichai, kattu-elumchhiphalam, kattu elumiccai, kattu elumicchai, kattu elumichai, kattu-elumichchai, kattu-elumichham-pazham, kattu-elumichhampazham, kattu narankam, kattuelimichai, kattukkani, kattukiccili, kattukkichili, kattukkolumiccai, kattukkolunci, kattukkurundu, kattukuruntu, kattukurunnu, kattukurunta, kattulimbe, kattunaragam, kattunarakam, kattunaratthai, katunimbe, kolanna, kondanikka, kurandubeej, kurindai, kurundu, kuruntan, kuruntotti, kuruntottimaram, kuruntu, kuttunarakam, maakadlimbu, makadlimbu, makurlimbu, mal-naregam, malai-narathai, malainarathai, malamandarai, malanarakam, malanaregam, malang-nar, malenarakam, malenarakan, malnaregam, murikinimma, narattai, nargumi, narguni, palamaram, perungurundhu, perungurundu, perunkuruntu, perunkuruttu, peyelumiccai, raanlimbu, ramser, ran-limbi, ranlimbu, yerramonukudu

in Malaya: limau hantu, merlimau

Atalantia racemosa Wight & Arn.

India, Sri Lanka. Shrub or small tree, branches with long spines, white flowers in axillary short cymes, globose fruit edible

See *Prodr. Fl. Ind. Orient.* 1: 91. 1834, *Hook. Journ. Bot.* 1: 64, t. 122. 1834 and *Fl. Bombay* 1: 187. 1903, *Bull. Soc. Bot. France* 75: 714. 1928, *Journal of Agricultural and Food Chemistry* 37(5): 1435–1437. 1989, *Fl. Maharashtra* 1: 199. 1996, *Fl. Madras* 1: 159. 1997, *Fitoterapia* 73(4): 281–287. 2002

(Used in Sidha. Antiviral, antispasmodic and analgesic, leaf used to treat intestinal ulcers, fever and cough. Fruit juice used for skin ailments. Stem and leaves, insect antifeedants. Sacred tree associated with Lord Shiva.)

in English: Bombay atalantia, wild lime

in India: aadavinimma, adavinim, atavi-jambira, huchhu nimbe, kadimbe, kadimbi, kattelimiccai, kattelumiccai, kattelumichai, kattu elumiccai, kattu elumicchai, kattu elumichai, kattu-elumichchai, kattu-k-kolinci, kattuelimichai, kattukkolunci, kattunaragam, kurundhu, kuruntu, malanaragam, ran-limbi

in Sri Lanka: kattu naragam, kuranga, naivella

Atalantia roxburghiana Hook.f. (*Atalantia roxburghiana* Tanaka)

Malaysia.

See *The Flora of British India* 1(3): 513. 1875 and *Journal of Botany, British and Foreign* 68: 232. 1930

(For stomachache, pound the leaves with the leaves of *Citrus aurantifolia* and *Areca catechu*, and swallow the juice.)

Malay name: limau pagar

Athanasia L. Asteraceae

Greek *athanasia* ‘immortality’, *a* ‘without, not, un-, lacking’ and *thanatos* ‘death’, the flowers are dry and long persisting, the involucre bracts are very persistent.

Athanasia trifurcata (L.) L. (*Santolina trifurcata* L.)

South Africa. Shrub, aromatic, flowers heads yellow rarely creamy white, unpalatable, drought tolerant and clay soil tolerant, on overgrazed or recently burnt or disturbed veld

See *Species Plantarum* 2: 843–845. 1753, *Species Plantarum*, Editio Secunda 2: 1180. 1763 and “Photosensitivity in South Africa. III. Ovine hepatogenous photosensitivity caused by the plant *Athanasia trifurcata* L. (Asteraceae).” *Onderstepoort J. Vet. Res.* 50(1): 45–53. 1983, *Opera Botanica* 106: 1–75. 1991

(Toxic, photosensitivity.)

in South Africa: klaas louwbos, klaaslouwbos, klaaslouwbossie, kouterbossie

Athanasia vestita Druce (*Athanasia calva* Hutch.; *Athanasia coronopifolia* Harv.; *Athanasia fasciculata* (Less.) D. Dietr.; *Athanasia leuoclada* (DC.) Harv.; *Athanasia montana* Wood; *Athanasia punctata* (DC.) Harv.; *Athanasia thodei* Bolus; *Athanasia tridens* Oliv.; *Athanasia vestita* (Thunb.) Druce; *Hymenolepis dregeana* DC.; *Hymenolepis leuoclada* DC.; *Morysia fasciculata* Less.; *Tanacetum vestitum* Thunb.)

South Africa. Perennial shrub, compact

See *Species Plantarum* 2: 843–845. 1753, *Species Plantarum*, Editio Secunda 2: 1180. 1763, *Bull. Sci. Soc. Philom. Paris* 1817: 138. 1817 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 607. 1917

(Potentially allergenic.)

Athyrium Roth Dryopteridaceae (Polypodiaceae, Woodsiaceae)

Greek *athyros*, *athyron* ‘without door, open’, referring to the sporangia, see *Flora of Chiapas* 2: 1–370. 1981, *J. Jap. Bot.* 56(7): 194. 1981, *Bull. Bot. Res., Harbin* 6(4): 130–133. 1986, *Acta Phytotax. Sin.* 30(3): 246–247. 1992, *Bull. Bot. Res., Harbin* 17(3): 286–300. 1997, *Memoirs of the New York Botanical Garden* 84: viii–xv, 1–278. 1999, *Fl. Yunnan*. 20: 391–395. 2006.

Athyrium falcatum Bedd.

India.

See *The Ferns of Southern India* t. 151. 1863 and *Aspects Pl. Sci.* 11: 459–465. 1989

(Leaves extract taken to treat jaundice and diseases of spleen. Fronds decoction used to promote menstruation, to increase bronchial secretion, to remove catarrh.)

in India: mahwari

Athyrium filix-femina (L.) Roth (*Aspidium angustum* Willd.; *Aspidium asplenioides* Griseb.; *Aspidium asplenioides* (Michx.) Sw.; *Aspidium asplenioides* Christ; *Aspidium asplenioides* Sw.; *Aspidium filix femina* Sw.; *Aspidium filix-femina* (L.) Sw.; *Asplenium filix-femina* (L.) (Sporophyll antibacterial.)

Atractylis L. Asteraceae

Latin *atractylis* and Greek *atraktylis* or *atraktyllis* for a thistle-like plant used for making spindles, woolly carthamus or *Carthamus lanatus* L. (Theophrastus, *HP.* 6.4.6), *atraktos* ‘a spindle, arrow’, see *Species Plantarum* 2: 828–829. 1753, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 47: 509. 1827 and *Feddes Repert.* 83(4): 228–231. 1972, *Bull. Soc. Bot. France, Lett. Bot.* 134(2): 179. 1987, *Bull. Soc. Bot. France, Lett. Bot.* 135(1): 72. 1988, *Denkschr. Österr. Akad. Wiss., Mat.-Naturwiss.* 127: 275. 1990, *Denkschr. Österr. Akad. Wiss., Mat.-Naturwiss.* 128: 111, 138, 414. 1994, *Taxon* 59(2): 377. 2010.

Atractylis gummifera L. (*Atractylis gummifera* Salzm. ex Ball; *Carlina fontanesii* DC.; *Carlina gummifera* Less.; *Chamaeleon gummifer* Cass.)

Mediterranean regions, North Africa. Spiny thistle, stemless, in dry areas

See *Species Plantarum* 2: 829. 1753, *Dict. Sci. Nat.* ed. 2. [F. Cuvier] 47: 509. 1827, *Flora* 11: 325. 1828, *Syn. Gen. Compos.* 12. 1832, *Prodr.* (DC.) 6: 548. 1838 [1837 publ. early Jan 1838], *J. Linn. Soc., Bot.* 16: 519. 1878 and *Fitoterapia* 71(3): 278–307. 2000, *J. Toxicol. Clin. Toxicol.* 41(3): 309–315. 2003, *Vet. Hum. Toxicol.* 46(3): 144–146. 2004, Daniele, C. et al. “*Atractylis gummifera* L. poisoning: an ethnopharmacological review.” *Journal of Ethnopharmacology* 97(2): 175–181. 2005, *Presse Med.* 35(12 Pt 1): 1828–1830. 2006, Stickel, F., Schuppan, D. “Herbal medicine in the treatment of liver diseases.” *Digestive and Liver Disease: Official journal of the Italian Society of Gastroenterology and the Italian Association for the Study of the Liver* 39(4): 293–304. 2007

(Rhizome juice poisonous and often fatal. Powdered root used as an external application in the treatment of skin abscesses and warts. No specific pharmacological treatment for *Atractylis gummifera* intoxication is yet available and all the current therapeutic approaches are only symptomatic.)

in English: bird-lime, blue thistle, gum thistle

in Italian: masticogna laticifera

in Malta: xewk tal-mixta

in Morocco: addad

Atractylodes DC. Asteraceae

From the genus *Atractylis* L. and *eidos*, *oides* ‘resemblance’, Latin *atractylis* and Greek *atraktylis* or *atraktyllis* for a thistle-like plant used for making spindles, woolly carthamus or *Carthamus lanatus* L. (Theophrastus, *HP.* 6.4.6), *atraktos* ‘a

spindle, arrow’, see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 48. 1838.

Atractylodes japonica Koidzumi ex Kitamura (*Atractylis japonica* (Koidzumi ex Kitamura) Kitagawa; *Atractylis lyrata* Siebold & Zucc. fo. *ternata* (Kom.) Nakai; *Atractylis lyrata* var. *ternata* (Kom.) Koidz.; *Atractylis ovata* fo. *pinnatifolia* Kom.; *Atractylis ovata* Thunberg var. *ternata* Kom.; *Atractylis pinnatifolia* (Kom.) S.Y. Hu; *Atractylodes lyrata* Siebold & Zuccarini var. *ternata* (Komarov) Koidzumi)

Japan. Perennial herb, knotty rhizomes, leaves radical and cauline, white flowers, famine food

See *Species Plantarum* 2: 829. 1753, *Flora Japonica*, ... 306. 1784, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 193. 1846 and *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 25(2): 716. 1907, *Botanical Magazine* 42: 478. 1928, *Florae Symbolae Orientali-Asiaticae* 5. 1930, *Acta Phytotaxonomica et Geobotanica* 4(3): 178. 1935, *Lineamenta Florae Manshuricae* 439. 1939, *Quarterly Journal of the Taiwan Museum* 18: 217. 1965, *Acta Pharmacol. Sin.* 22(6): 493–497. 2001, *Phytother. Res.* 15(6): 481–486. 2001, *Biol. Pharm. Bull.* 27(3): 324–327. 2004, Han, S.B. et al. “Prevention of arthritic inflammation using an oriental herbal combination BDX-1 isolated from *Achyranthes bidentata* and *Atractylodes japonica*.” *Arch. Pharm. Res.* 28(8): 902–908. 2005, *Journal of Food Science* 70(9): 575–580. 2005, *Biol. Pharm. Bull.* 29(2): 315–320. 2006

(Rhizome antiemetic, liver-protective, diaphoretic, hypoglycemic, digestive, antioxidant, diuretic, expectorant, stomachic, used in the treatment of gastrointestinal disorders, diarrhea, edema, mastitis, fistula, rheumatoid arthritis, pain, allergy and asthma. Dried rhizomes of five species of *Atractylodes* (*A. japonica*, *A. macrocephala*, *A. lancea*, *A. chinensis*, and *A. koreana*) used as crude drugs mainly for the treatment of stomach disorders and for their diuretic properties. An oriental herbal combination (BDX-1) was isolated from *Achyranthes bidentata* and *Atractylodes japonica*; BDX-1 could be useful for the treatment of rheumatoid arthritis.)

in English: Japanese atractylodes

in China: guan cang shu

in Korea: sab-joo

Atractylodes lancea (Thunb.) DC. (*Acarina chinensis* Bunge; *Atractylis chinensis* (Bunge) DC.; *Atractylis chinensis* fo. *erosodentata* (Koidz.) Hand.-Mazz.; *Atractylis chinensis* fo. *simplicifolia* (Loes.) Kitamura; *Atractylodes lyrata* Siebold & Zuccarini; *Atractylodes ovata* (Thunberg) DC.; *Giraldia stapfii* Baroni)

China. Perennial herb, erect, simple, rhizomes finger-shaped somewhat aromatic, inflorescence a terminal head

See *Species Plantarum* 2: 829. 1753, *Definitiones Generum Plantarum* 195. 1760, *Flora Japonica*, ... 306. 1784, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2: 110. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 549. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 48. 1838, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 193. 1846, *Nuovo Giornale Botanico Italiano*, new series 4: 431. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1, Beibl. 75): 74. 1904, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 25(2): 716–717. 1907, *Gentes Herbarum*; occasional papers on the kind of plants 1: 47, f. 16. 1920, *Florae Symbolae Orientali-Asiaticae* 4, 6. 1930, *Report of the First Scientific Expedition to Manchoukou* 4(4): 94. 1936, *Acta Horti Gothoburgensis* 12(9): 308–310. 1938, *Report of the Institute of Scientific Research, Manchoukuo* 3: 439. 1939, *Transactions of the Sapporo Natural History Society* 16: 63. 1940, *Journal of Japanese Botany* 19(4): 114–115. 1943, *Key Pl. N.E. China* 410. 1959, *Am. J. Chin. Med.* 24(2): 165–168. 1996, *J. Ethnopharmacol.* 84(1): 51–55. 2003, *Chem. Pharm. Bull. (Tokyo)*. 51(6): 673–678. 2003, *Chem. Pharm. Bull. (Tokyo)*. 51(9): 1106–1108. 2003, *Eur. J. Pharmacol.* 512(2–3): 105–115. 2005

(Antiangiogenic, antiinfective, antibacterial, antiinflammatory, febrifuge, antiemetic, anti-night blindness, interferon inducent, tonic, immune regulator, appetite stimulant, diuretic, diaphoretic, hypoglycemic, sedative, hypotensive, stomachic, rhizomes used for gastric and digestive disorders, vomiting, dyspepsia, abdominal distension, diarrhea, candida, rheumatism, arthritis, headaches, edema in lower extremities.)

in English: southern tsangshu, swordlike atractylodes

in China: cang shu, cang zhu, cangzhu, mao cang zhu, nan cang zhu

Atractylodes macrocephala Koidzumi (*Acarina chinensis* Bunge; *Atractylis lancea* var. *chinensis* (Bunge) Kitam.; *Atractylis macrocephala* (Koidzumi) Handel-Mazzetti; *Atractylis macrocephala* var. *hunanensis* Ling)

E. Asia, China, Japan and Korea. Perennial herb, somewhat aromatic, erect, glabrous, branched in upper part, roots brown outside, flowers dioecious, fruit an achene with a silky pappus, pastures and waste ground

See *Flora Japonica*, ... 306. 1784, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2: 110. 1833. and *Florae Symbolae Orientali-Asiaticae* 5. 1930, *Acta Horti Gothoburgensis* 12(9): 310. 1938, *Transactions of the Sapporo Natural History Society* 16: 63. 1940, *Contributions from the Institute of Botany, National Academy of Peiping* 6: 66. 1949, Yeung, Him-Che. *Handbook of Chinese Herbs and Formulas*. Institute of Chinese Medicine, Los Angeles 1985, Nguyen Van Dan & Doan Thi Nhu, *Medicinal Plants in Vietnam*. World Health Organization, Manila and Institute of Materia Medica, Hanoi 1989

(Rhizomes peptic, stomachic and tonic, immune stimulant, carminative, cholagogic, antiulcer, antibacterial, diuretic, antiinflammatory, sedative, antitussive, hypoglycemic, used in the treatment of gastritis, peptic ulcer, dyspepsia, vomiting, abdominal distension, chronic diarrhea, edema and spontaneous sweating, polyuria, dysuria. Increases excretion of potassium salts.)

in English: large-headed atractylodes, white atractylodes

in China: bai shu, baizhu, bai zhu

in Vietnam: bach truat

Atriplex L. Chenopodiaceae

Latin *atriplex*, *icis*, a name used by Plinius for the orach, a kitchen vegetable; see Carl Linnaeus, *Species Plantarum*. 1052. 1753 and *Genera Plantarum*. Ed. 5. 472. 1754 and *Rhodora* 102(912): 418. 2000[2001].

Atriplex argentea Nutt. (*Atriplex argentea* Nutt. subsp. *typica* H.M. Hall & Clem.; *Obione argentea* (Nutt.) Moq.) (*Obione* Gaertner, probably after the river Ob; see *De Fructibus et Seminibus Plantarum*... 2: 198, pl. 126. 1791 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 427. Basel 1996.)

North America. Annual or perennial, young leaves cooked and eaten, forage for cattle

See *The Genera of North American Plants* 1: 198. 1818, *Chenopodearum Monographica Enumeratio* 76–77. 1840 and *North American Flora* 21(1): 46. 1916, *Rhodora* 102(912): 420. 2000[2001]

(Analgesic, stomachic, poultice of leaves applied to spider bites, poultice of chewed root applied to sores and rashes; roots infusion for stomachache.)

in English: silverscale, silverscale saltbush

Atriplex argentea Nutt. subsp. *expansa* (S. Watson) H.M. Hall & Clem. (*Atriplex argentea* var. *mohavensis* M.E.

Jones; *Atriplex expansa* S. Watson; *Atriplex expansa* var. *mohavensis* M.E. Jones)

North America. Annual or perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 9: 116. 1874 and *Publications of the Carnegie Institution of Washington* 326: 284. 1923, *Novon* 14(4): 509. 2004

(Analgesic.)

in English: silverscale, silverscale saltbush

Atriplex barclayana (Benth.) D. Dietr. (*Obione barclayana* Benth.)

North America. Perennial herb, dense branching, ground-cover, birds eat seeds, alkaline or saline soils

See *De Fructibus et Seminibus Plantarum...* 2: 198, pl. 126. 1791, *The botany of the voyage of H.M.S. Sulphur* 48. 1844, *Synopsis Plantarum* 5: 537. 1852 and *North American Flora* 21(1): 60. 1916

(Twigs and leaves cooked with branch tips of *Bursera microphylla* and the liquid used to bathe stingray wounds.)

in English: Barclay's saltbush, dwarf saltbush

Atriplex canescens (Pursh) Nutt. (*Atriplex canescens* James; *Atriplex nuttallii* S. Watson; *Calligonum canescens* Pursh; *Obione canescens* (Pursh) Moq.; *Obione canescens* (Pursh) Torr.; *Pterochiton canescens* (Pursh) Nutt.)

North America. Perennial, shrub, spreading to erect, plants are either staminate or pistillate, inflorescence cream, anthers pale orange, four-winged fruit, on dry saline soils

See *Flora Americae Septentrionalis*; or, ... 2: 370. 1814[1813], *The Genera of North American Plants* 1: 197. 1818, *Chenopodearum Monographica Enumeratio* 74. 1840, *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 95. 1845, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 184. 1847 and *Proc. Utah Acad. Sci.* 52: 65. 1975, *Taxon* 32: 553–554. 1983, *Great Basin Naturalist* 55: 324. 1995

(Stimulant, emetic, stomachic, analgesic, cathartic. Leaves infusion emetic; leaves poultice applied to ant bites, swellings, itches, rashes; leaves or roots decoction taken for cough; poultice of root applied for toothache. Wood used to make poison arrow heads. Ceremonial medicine, emetic. Veterinary medicine, decoction given to sheep for bloating.)

in English: fourwing saltbush, grey sage brush, narrow-leaf saltbush, shad-scale, wingscale

in Central America: cenizo, chamere, chamiso, chamiza, chamizo, nocuana laza

Atriplex confertifolia (Torr. & Frém.) S. Watson (*Atriplex collina* Wooton & Standl.; *Atriplex jonesii* Standl.; *Atriplex subconferta* Rydb.; *Obione confertifolia* Torr. & Frém.; *Obione rigida* Torr. & Frém.)

Mexico, North America. Perennial, dioecious, densely branched, spiny, rounded, rigid erect twigs, irregular trunk, small inconspicuous green flowers, clustered fruits provide food for game birds and songbirds, salt-tolerant shrub, valuable browse plant for wildlife and livestock

See *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 318. 1845, *Proceedings of the American Academy of Arts and Sciences* 9: 119. 1874 and *Contributions from the United States National Herbarium* 16(4): 119–120. 1913, *North American Flora* 21(1): 70. 1916, *Flora of the Rocky Mountains* 248, 1061. 1917

(Anticonvulsive, cold remedy, antirheumatic, antispasmodic.)

in English: shad-scale, shadscale saltbush, sheep's fat, spiny saltbush

Atriplex hortensis L. (*Atriplex nitens* Schkuhr)

Asia, Mongolia. Annual, erect, leaves eaten raw or cooked

See *Species Plantarum* 2: 1053. 1753, *Handbuch des Natürlichen Pflanzensystems* 3: 541. 1803

(Leaves diuretic, emetic, purgative, stimulant, tonic. Seeds emetic, mixed with wine, to cure jaundice; flour of the seeds useful in vitamin A deficiency. Fruits purgative and emetic.)

in English: arache, bitter leaves, butter leaves, common orach, French spinach, garden orache, mountain spinach, orach, orache, salt bush

in Italian: atrepllice degli orti, bietolone, bietolone rosso, spinacione, treppico

in China: yu qian bo cai

in India: chakkotha, chakothana soppu, chakottae soppu, chandanbatvu, korake, surake

Atriplex lentiformis (Torr.) S. Watson (*Atriplex lentiformis* subsp. *lentiformis*)

North America. Perennial

See *Report of an Expedition down to the Zuni and Colorado Rivers* 169–170, pl. 14. 1853, *Proceedings of the American Academy of Arts and Sciences* 9: 118–119. 1874 and *North American Flora* 21(1): 62. 1916, *Publications of the Carnegie Institution of Washington* 326: 335–336. 1923, *An Illustrated Manual of California Shrubs* 113. 1939

(Leaves chewed or smoked for colds; poultice of root applied to sores.)

in English: big saltbush, lens scale, quail bush, white thistle

Atriplex lentiformis (Torr.) S. Watson subsp. *lentiformis*

North America. Perennial

See *Report of an Expedition down to the Zuni and Colorado Rivers* 169–170, pl. 14. 1853, *Proceedings of the American Academy of Arts and Sciences* 9: 118–119. 1874 and *North American Flora* 21(1): 62. 1916, *Publications of the Carnegie*

Institution of Washington 326: 335–336. 1923, *An Illustrated Manual of California Shrubs* 113. 1939, *Taxon* 35: 404. 1986

(Leaves chewed or smoked for colds; poultice of root applied to sores.)

in English: big saltbush, lens scale, quail bush, white thistle

Atriplex linearis S. Watson (*Atriplex canescens* subsp. *linearis* (S. Watson) H.M. Hall & Clem.; *Atriplex canescens* var. *linearis* (S. Watson) Munz)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 24: 72. 1889 and *Publications of the Carnegie Institution of Washington* 326: 344. 1923, *A Manual of Southern California Botany* 141. 1935

(Leaves infusion emetic.)

in English: narrow-leafed saltbush

Atriplex obovata Moq. (*Atriplex greggii* S. Watson; *Atriplex jonesii* Standl.; *Atriplex obovata* var. *tuberosa* J.F. Macbr.)

North America. Perennial

See *Chenopodearum Monographica Enumeratio* 61. 1840, *Proceedings of the American Academy of Arts and Sciences* 9: 118. 1874 and *Contributions to Western Botany* 11: 21–22. 1903, *North American Flora* 21(1): 65. 1916

(Anticonvulsive.)

in English: mound saltbush, New Mexico saltbush

Atriplex obovata Moq. var. ***obovata*** (*Atriplex obovata* var. *tuberosa* J.F. Macbr.)

North America. Perennial

See *Chenopodearum Monographica Enumeratio* 61. 1840, *Proceedings of the American Academy of Arts and Sciences* 9: 118. 1874 and *Contributions to Western Botany* 11: 21–22. 1903, *North American Flora* 21(1): 65. 1916, *Contributions from the Gray Herbarium of Harvard University* 53: 11. 1918

(Anticonvulsive.)

in English: mound saltbush, New Mexico saltbush

Atriplex polycarpa (Torr.) S. Watson (*Atriplex curvidens* Brandege; *Obione polycarpa* Torr.)

North America. Perennial shrub, dioecious, sprawling, gray-white, fragrant leaves, inflorescence yellow green, seeds famine food

See *Pacif. Railr. Rep.* 4(5): 130. 1857, *Proceedings of the American Academy of Arts and Sciences* 9: 117. 1874, *Proceedings of the California Academy of Sciences*, Series 2, 2: 201. 1889 and *North American Flora* 21(1): 64. 1916

(Antirheumatic, moxa of dried galls.)

in English: alkali saltbush, all-scale, allscale saltbush, cattle saltbush, cattle spinach, desert saltbush

Atriplex vestita (Thunb.) Aellen var. ***appendiculata*** Aellen (*Atriplex glauca* L.; *Atriplex halimus* L.; *Atriplex halimus* var. *glaucoidea* Maire; *Atriplex halimus* var. *hastulata* Maire; *Atriplex halimus* var. *ramosissima* L. Chevall.; *Atriplex halimus* var. *rifea* Sennen & Mauricio; *Atriplex halimus* var. *schweinfurthii* Boiss.; *Atriplex portulacoides* L.; *Atriplex portulacoides* Pall.)

Mediterranean, North Africa. Perennial shrub, leaves edible, fodder shrub for livestock in low-rainfall Mediterranean areas, in highly alkaline and salty areas along seashores

See *Species Plantarum* 2: 1493, 1052–1053. 1753, *Tabl. Phys. Topogr. Taur.* 59. 1795 and *Communications in Biometry and Crop Science* 1(2): 79–89. 2006

(Carminative, antacid, emetic, stomatitis, thrush, healing mouth and teeth, useful in the treatment of diabetes, for trypanosomiasis pounded leaves on wounds.)

in English: salt bush, sea orach, sea purslane, shrubby goose-foot, tree purslane

in Arabic: ârmâs, l-getaf, legtef, legtuf, maluh, qataf

in Italian: atriplice alimo

in Portuguese: salgadeira

Atropa L. Solanaceae

Greek *atropos* ‘rigid, inflexible, eternal’, Atropos is one of the three Fates of the Greek mythology; see Carl Linnaeus, *Species Plantarum*. 1: 181–182. 1753, *Genera Plantarum*. Ed. 5. 85. 1754 and *Cytologia* 62: 103–113. 1997. The whole plants, and especially the roots and fruits, are very poisonous.

Atropa acuminata Royle ex Lindl. (*Atropa acuminata* Royle; *Atropa acuminata* Royle ex Miers; *Atropa belladonna* auct.)

India, Himalaya, Jammu, Kashmir. Perennial herb, branched, leaves stalked, corolla yellow purplish

See *Ill. Bot. Himal. Mts.* [Royle] 279. 1833–1840, *Journ. Hort. Soc. Lond.* 1: 306. 1846, *Hook. Kew J.* 1:138. 1849, *Fl. Brit. Ind.* 4: 241. 1883 and *Fl. Iran.* 39, 43. 1972, *Cytologia* 62: 103–113. 1997, *Pakistan Journal of Biological Sciences* 10(5): 778–782. 2007

(Used in Unani. Roots and leaves poisonous, hallucinogenic, narcotic, sedative, anticholinergic, anodyne, diuretic, stomachic, analgesic, antidote, antispasmodic, mydriatic, applied externally to relieve intestinal colic, painful menstruation, cough and asthma, peptic ulcers, neurological pain.)

in English: deadly nightshade, Indian belladonna, Indian belladonna

in India: angurshefa, belladonna, belladonna, jalakajal, jhakra, jharka, rub luffah, shafoo, suchi, yebraj

Atropa belladonna L. (*Atropa bella-donna* L.)

Eurasia, Mediterranean. Perennial herb, branched, coarse, red sap, axillary drooping tubular 5-lobed dull red-purple or greenish purple flowers

See *Species Plantarum* 1: 181. 1753 and *Fl. Iran.* 39, 43. 1972, *Taxon* 28: 635–636. 1979

(Used in Unani and Sidha. Poisonous all parts, mainly berries, highly toxic, may be fatal if eaten. Hallucinogenic, anticholinergic, anodyne, diuretic, stomachic, analgesic, antidote, antispasmodic, mydriatic, narcotic, sedative, to relieve intestinal colic, painful menstruation, acute sore throat, cough and asthma, peptic ulcers, neurological pain, gout, rheumatism and sciatica, treatment of eye diseases.)

in English: belladonna, black cherry, deadly nightshade, devil's cherries, devil's herb, naughty man's cherries

in Brazil: beladona

in Arabic: bou qini, belaidour, ustrung, zbib el-laidour

in India: angurshefa, bikh luffah, luckmuna, luckmune, merdum seeah, pellatona, pelletonacceti, poast bikh luffah, saagngnur, sag-angur, sagangur, shafoo, suci

Atropanthe Pascher Solanaceae

From the genus *Atropa* L. and *anthos* 'flower', see *Oesterr. Bot. Zeitschrift* 59: 329. 1909.

Atropanthe sinensis (Hemsley) Pascher (*Anisodus sinensis* (Hemsley) Pascher; *Atropanthe sinensis* Pascher; *Scopolia sinensis* Hemsley)

China. Subshrubs or perennial herbs, erect, thick rhizomes, zygomorphic flowers, corolla yellow-green

See *Systema Vegetabilium*, editio decima sexta 1: 512, 699. 1825, *Journal of the Linnean Society, Botany* 26(174): 176. 1890 and *Oesterr. Bot. Zeitschrift* 59(9): 330, f. 1–2. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 7(140–142): 167. 1909, *Notes Roy. Bot. Gard. Edinburgh* 37: 147. 1978, *Planta Med.* 61(3): 292–293. 1995, *Bull. Nat. Hist. Mus. London, Bot.* 27: 26. 1997

(Roots used for relieving muscular spasm and pain.)

in English: Chinese atropanthe

in China: tian peng zi

Attalea Kunth Arecaceae (Palmae)

Attalus III Philometor, King of Pergamum in Asia Minor; Attalus was the name of several kings of Pergamos or Pergamum; Attalea or Attalia was the name of a Greek city, in Pamphylia, in the region of Mysia, in Galatia; Attaleia was a festival at Delphi, *attalianon* was a kind of garment; see *Nova Genera et Species Plantarum* (quarto ed.) 1: 309–310, 319. 1815[1816], *Palmarum familia* 20. 1824, *Hist. Nat.*

(Milk-like beverage from the fruits taken as an important source of high quality proteins. Ceremonial.)

in English: coquirita palm, cucurrit, inajá-palm

in Brazil: anajá, anajax, aritá, aritairé, coqueiro anajá, inajá, inajá da Guiana, inajaf, maripá

in Guyana: kokerit palm

in Peru: anajá, anaju, anaú, ina-yacu, ina-yuca, inajá, inayá, inayacu, inayuca, inayuga, inija, inijá, juajá, juajuá, juayacu, kokerit, maripá, ynayuca

in South America: curcurita, inajá, kokerite, maripa, maripá, naxáribo

in Venezuela: cucurito

Attalea princeps Mart. (*Scheelea princeps* (Mart.) H. Karst.)

South America, Brazil.

See *Voy. Amér. MÉR.* 7(3): 113. 1844, *Linnaea* 28: 269. 1857 and *Journal of Ethnopharmacology* 9(2–3): 225–236. 1983, *J. Med. Entomol.* 44(4): 624–630. 2007

(The crude ash of the spathe or leaf base used as an alkaline additive to coca. Husks burned on charcoal as insect repellents and fumigants against the malaria vector *Anopheles*.)

in English: motacú palm

Atuna Raf. Chrysobalanaceae (Rosaceae)

A vernacular name; see C.S. Rafinesque, in *Sylva Telluriana* 153. 1838 and E.D. Merrill (1876–1956), *Index Rafinesquianus*. The plant names published by C.S. Rafinesque et al. 136. Jamaica Plain, Massachusetts, USA 1949, *Flora Malesiana Series*. 1. 10: 635–678. 1989.

Atuna racemosa Raf. (*Atuna racemosa* subsp. *racemosa*; *Cyclandrophora glaberrima* Hassk.; *Ferolia glaberrima* (Hassk.) Kuntze; *Parinari glaberrima* Hassk.; *Parinari glaberrima* (Hassk.) Hassk.; *Parinarium laurinum* A. Gray; *Petrocarya glaberrima* (Hassk.) Miers)

Indonesia, Samoa. Tree, fragrant oil extracted from the fruit

See *Genera Plantarum* ed 8. 1: 245. 1789, *Narrative of an Expedition to Explore the River Zaire* 433. 1818, *Flora* 25(2,

Beibl. 1): 47. 1842, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 147. 1843, *Journal of the Linnean Society, Botany* 17: 336. 1879, *Revisio Generum Plantarum* 1: 216. 1891 and *Journal of Ethnopharmacology* 57: 35–56. 1997, *Econ. Bot.* 58(3): 470–475. 2004, *Ethnobotany* 17: 13–19. 2005, *BMJ* 333: 1314–1315. 2006, *Experimental Biology and Medicine* 231: 1739–1743. 2006, *Journal of Ethnopharmacology* 109(2): 304–311. 2007, *Journal of Ethnopharmacology* 111(3): 592–597. 2007

(Inner bark as a tea to cure severe abdominal pains. Leaves and kernels antibacterial, antibiotic, antiinflammatory, for the treatment of dysentery, body pain, swelling, inflammation, stomachache, liver problems, to prevent scabies and itching. Oil from fruit used for medical massages for body pain and sprains.)

in English: makita tree

in Samoa: ififi

Aucoumea Pierre Burseraceae

Vernacular name *oukumé* for *Aucoumea klaineana* Pierre, see *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 1: 1241. 1896 and *Bull. Soc. Bot. France* 55: 267. 1908, *Adansonia*, séries 2, 17(3): 335–342. 1978, *Planta Medica* 44: 215–217. 1982, *Adansonia*, séries 3, 20(1): 139–162. 1998, *Forest Ecology and Management* 140: 117–132. 2001.

Aucoumea klaineana Pierre

Tropical Africa. Tree, canopy tree, evergreen, shallow-rooted, inflorescence an axillary or terminal panicle, dehiscent fruit, winged seeds

See *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 1: 1241. 1896

(Bark astringent, used for diarrhea; bark resin to treat wounds and abscesses.)

in English: Gabon, Gabon mahogany, Gaboon, Gaboon mahogany, mahogany, okoume, okoume mahagoni, picus mahogany

in W. Africa: canbogala

in Cameroon: angouma, okoum, mfumu

in Congo: moukoumi, mukumi, n'koumi, n'kumi, ongumi

in Gabon: acoume, angouma, angoumea, bengouma, combo combo, koumi, mofoumou, mokoumi, moukoumi, moukouni, n'goumi, n'koumi, nyangala, okaka, okoumé, okoume, okoume cambogala, okoume combo combo, okoume nyan-gala, okoume zouga, ongoumi, zouga

in Ivory Coast: hetere

in Equat. Guinea: okume

Aucuba Thunb. Garryaceae (Aucubaceae, Cornaceae)

Aukubi or *ao-ki* or *aokiba*, the Japanese name, see *Nova Genera Plantarum* [Thunberg] 3: 61–62. 1783.

Aucuba japonica Thunb.

China, North America. Evergreen shrub, alternate simple glossy leaves green or mottled with yellow, small axillary flowers 4-parted

See *Nova Genera Plantarum* [Thunberg] 3: 62. 1783 and *J. Jap. Bot.* 81: 107–112. 2006

(Causes only low toxicity if eaten, poisonous parts fruit and leaves.)

in English: Japanese aucuba, Japanese laurel, spotted laurel, spotted laurels

in China: qing mu

in Japan: ao-ki, aoki

Augea Thunberg Zygophyllaceae

For the German (b. Saxony) gardener Johann Andreas Auge, 1711–1805 (d. Cape Province), botanical collector; see *Prodromus Plantarum Capensium*, ... 1: [viii], 80. 1794, Peter MacOwan, “Personalia of botanical collectors at the Cape.” *Trans. S. Afr. Philos. Soc.* 4(1): xxxiv. 1884–1886 and John Hutchinson (1884–1972), *A botanist in Southern Africa*. London 1946, Mia (Maria) Caroline Karsten, *The Old Company's Garden at the Cape and its superintendants: involving an historical account of early Cape botany*. Cape Town 1951, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 83. Cape Town 1981, Gilbert Westacott Reynolds (1895–1967), *The Aloes of South Africa*. 43, 47, 87. Balkema, Rotterdam 1982.

Augea capensis Thunb.

Tropical Africa. Shrub or shrublet, yellowish flowers

See *Prodr. Pl. Cap.* 80. 1794

(Tonic roots.)

Avena L. Poaceae (Gramineae)

Latin *avena*, *ae*, classical name for oats used by Plinius, Horatius and Vergilius (“avenae steriles vanae”); hybrids with *Arrhenatherum* P. Beauv., type *Avena fatua* L., see *Species Plantarum* 1: 79–81. 1753, *Genera Plantarum*. Ed. 5. 34. 1754, *Introductio ad Historiam Naturalem* 74. 1777, Pietro Bubani, *Flora Virgiliana*. 24–25. Bologna 1870, *Flora Brasiliensis* 2(3A): 1–160, t. 1–43. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 8: 519. 1910, *Manual of the Grasses of the United States* (ed. 2, revised by A. Chase). 1951 [1950], *Bot. Mus. Leaflet. Harvard* 16: 265–303.

1954, *Fieldiana, Botany* 24(2): 38–331. 1955, *Taxon* 23(4): 579–583. 1974, *Canada Dept. Agric. Monogr.* 14: 1–463. 1977 [Canada Department of Agriculture, Research Branch, Monograph], *Acta Societatis Botanicorum Poloniae* 52: 205–214. 1983, *Journal of Cytology and Genetics* 18: 60–61. 1983, *Journal of Cytology and Genetics* 25: 147–148. 1990, *Taxon* 40: 132. 1991, *Fitologija* 39: 72–77. 1991, *Bot. Zhurn.* (Moscow & Leningrad) 78(4): 36–47. 1993, *Flora Mesoamericana* 6: 232. 1994, *Watsonia* 20: 63–66. 1994, *Flora of Ethiopia and Eritrea* 7: 33–37. 1995, *Flora Mediterranea* 5: 340–345. 1995, *Journal of Wuhan Botanical Research* 13(2): 177–179. 1995, *Bothalia* 26(1): 53–61. 1996, *Southwest China Journal of Agricultural Sciences* 9(1): 33–38. 1996, *Lagascalia* 20(2): 265–275. 1998, *Journal of Jiangsu Agricultural College* 19(2): 35–38. 1998, *Am. (Used in Ayurveda. Antiinflammatory, tonic, antidepressant, diuretic, depurative, cardiac, antioxidant, laxative, emollient, anticholesterolemic, nervine, uterine tonic, aphrodisiac, antispasmodic, sedative, stimulant, vulnerary, repellent. Moderate toxicity, under some circumstances capable of poisoning livestock. Can cause nitrate toxicity in livestock. Cattle are more prone to toxicity, but swine and turkeys have been poisoned on oat stubble. Grass tetany also occurs during periods of lush growth when ruminants suffer from a mineral imbalance. Oat hay is a common source of plant poisoning by nitrates.)

in English: black tartarian oats (a variety of *Avena sativa* L.), common oat, common oats, cultivated oat, cultivated oats, oat, oat hay, oats, red oat, sativa oats, side oat, tree oat, wild oat

in Arabic: azekkoun, hartaman, khortan, shufan, tamenzirt, taskrunt, ziwan, zummeir

in Spanish: avena roja, avena común, avena

in Morocco: hortâl, âzqûn, wazqûn, wasqûn

Averrhoa bilimbi L.

Southeast Asia. Small tree, sparsely branched, branches stiff thick, leaves imparipinnate, red-purple fragrant pentamerous flowers in cauliflorous panicles, petals much longer than sepals, greenish-yellow translucent juicy cylindrical fruit, seeds ellipsoid lacking aril, sour taste, edible fruits rich in potassium and vitamin A, humid tropics, at forest edge

See *Species Plantarum* 1: 428. 1753

(Used in Sidha. Stem sap drunk for fevers. Bark roasted and included in a preparation taken to treat peritonitis. Fruit used for skin disorders, fevers, diarrhea and vomiting. Leaves to treat mumps, rheumatism, pimples; a decoction for high blood pressure; macerated leaves applied to cuts and itching; leaf juice applied against skin diseases; an extract of the leaves antibiotic; childbirth, leaves infusion as a postpartum

remedy. Flowers soaked in water and this used for cough and thrush.)

in English: bilimbi, cucumber tree, tree sorrel

in Tanzania: mbilimbi, mbirimbi

in Cambodia: trâlông tống

in China: san lian

in Thailand: bli-ming, ka-ling-pring, ling-pring, ta-ling-pling, taling pling

in Vietnam: khê tau

***Averrhoa carambola* L.**

Southeast Asia. Small tree, bushy, much-branched, leaves imparipinnate, violet-purplish flowers usually in axillary panicles, lacking anthers, yellow angled sour stellate fruit with 5 pronounced ribs, seeds with fleshy aril, sour taste, edible fruits rich in potassium and vitamin A, young leaves used as vegetable, fruits and flowers edible

See *Species Plantarum* 1: 428. 1753 and *Fl. W. Pakistan* 11: 3. 1971

(Used in Ayurveda and Sidha. For ringworm, pound the shoots and poultice; fruit and leaves decoction given to arrest vomiting, diarrhea; crushed leaves and shoots applied externally in chicken pox, ringworm and headache. Root mixed with *Eclipta alba* roots made into a paste and applied in bleeding from gum; a decoction of roots with roots of *Eclipta prostrata* given for washing infected gums. Fruits cooling, astringent, stomachic, refrigerant; stem bark of *Croton oblongifolius*, *Prunus triflora*, rhizome of *Curcuma domestica*, ripe fruits of *Averrhoa carambola* and root of *Capsicum annuum* crushed together and boiled in water and the extract given in jaundice, slices of fresh fruit taken for jaundice, bleeding piles and as antiscorbutic; dried fruits cooling, antiscorbutic, used for skin diseases, jaundice and liver disorders, fevers, bleeding piles, eaten by a patient with sore throat; salted fruit juice given as cooling agent; ripe fruit juice laxative; crushed extract of ripe fruit applied to burns

as a cooling medicine, also taken orally for jaundice and liver problems. Flowers said to kill intestinal worms.)

in English: caramba, carambola, Chinese gooseberry, country gooseberry, star fruit

in Cambodia: spö

in China: wu han tzu, wu leng tzu, yang tao

in Japan: hirugi-damashi (hirugi = mangrove)

Malayan names: api api daun bulat, api-api hitam, api-api jambu, api ludat, api-api merah, api puteh, ludat, udat

Avicennia marina (Forssk.) Vierh. var. *marina*

India. Fodder

See *Hort. Malab.* 4: t. 45. 1683, *Species Plantarum* 1: 110. 1753, *Flora Aegyptiaco-Arabica* 2: 37. 1775 and *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 71: 435. 1907, *Kew Bulletin* 13: 35. 1958, *Molecular Ecology* 15(12): 3515–3525. 2006, *Annals of Botany* 97(6): 1095–1101. 2006, *Journal of Natural Products* 70(6): 923–927. 2007

(Crushed leaves used in the treatment of stomachache; leaf decoction antidote after eating poisoned fish, leaf and bark decoctions applied against scabies.)

in India: tavra, tivar

Avicennia officinalis L. (*Avicennia germinans* (L.) L.; *Avicennia germinans* (L.) Stearn; *Avicennia tomentosa* Jacq.; *Avicennia tomentosa* Schauer, nom. illeg.)

India. Evergreen tree or shrub, short often-crooked trunk, numerous upright pneumatophores, leathery leaves, malodorous flowers, tubular corolla bell-shaped yellow to orange, calyx 5-lobed with resin dots, green aromatic resin used as a famine food, bitter seeds can be cooked and dried and then eaten, fodder, sometimes confused with *Avicennia marina* (Forssk.) Vierh.

See *Hort. Malab.* 4: t. 45. 1683, *Sp. Pl.* 1: 110. 1753, *Enumeratio Systematica Plantarum* 25. 1760, *Sp. Pl.*, ed.

Forsch.* 258: 41. 1977, *Mangroves and Salt Marshes* 2(3): 133–148. 1998

(Used in Ayurveda and Sidha. Contact dermatitis. Bark astringent. Leaf paste applied to get relief from joint pain; leaves chewed for immediate relief from constipation. Root aphrodisiac, tonic, contraceptive, a febrifuge or fever producer when taken internally, cholinesterase inhibitory activity, a remedy for boils and tumors, scabies, ulcers, poulticed onto abscesses, boils and smallpox sores, alternative medicine for the treatment of Alzheimer's disease. Resin from the sapwood for snakebite. Powder of the unripe seeds applied for boils and abscesses; seed paste used for boils.)

in English: grey mangrove, Indian mangrove, mangrove, white mangrove

in India: badabani, bina, eriva, erivogu, gundumada, ipathi, ipati, kaandal, kalabani, kandaale, kandal, kantal, kantil, kantukam, karungarudal, mada, madaipattai, madda, matapattai, meda, nalla mada, nallamada, oepata, oepatu, orei, sagarodbhutih, sagarodhurga, tellamada, thavara, thellamada, timirah, tivar, tivariya, tiwar, tuvara, tuvaraka, upali, upatba, upatha, upattha, uppathi, uppati, uppattam, uppukkurri, uppukkutti, uppukutti, upputti, uri, urppam, vengandal, venkantal

in Java: api-api, api api ludat, api-api suduh

in Philippines: api-api

Maori name: manama

Axonopus P. Beauv. Poaceae (Gramineae)

Greek *axon*, *axonos* 'axis, stem, axle' and *pous*, *podos* 'a foot', referring to the stolons or to the digitate inflorescences; Latin *axon*, *onis* (*axis*, *is* 'axle, pivot', from *ago*, *egi*, *actum*, *ere* 'to move'); from the ancient Indian *aksa*; from the ancient German *ahsa* and the Avestic *asa*, type *Axonopus aureus* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Prodr.* 24. 1788, *Essai d'une Nouvelle Agrostographie* 12, 154. 1812, *Genera et species plantarum* 5. 1816, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 24. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Ayapana Spach Asteraceae

A vernacular name for a species of *Eupatorium*, see *Histoire Naturelle des Végétaux* (Spach) 10: 290–291. 1841 and *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Ayapana triplinervis (Vahl) R.M. King & H. Rob. (*Eupatorium ayapana* Vent.; *Eupatorium triplinerve* Vahl; *Eupatorium triplinerve* M. Vahl ex Blume)

Southern America, Ecuador, West Indies. Perennial herb, undershrub, low spreading shrub, semi-woody at base,

profusely branching, long slender aromatic leaves, pink flowers, essential oils

See *Species Plantarum* 2: 836–839. 1753, *Symbolae Botanicae, ...* (Vahl) 3: 97. 1794, *Bijdragen tot de flora van Nederlandsch Indië*: 903. 1826 and *Phytologia* 20(3): 212. 1970, *Monogr. Syst. Bot. Missouri Bot. Gard.* 22: 197. 1987, *Biochemical Systematics and Ecology* 36(11): 853–858. 2008

(Used in Ayurveda and Sidha. Leaves bitter, aromatic, pungent depurative, cardiotoxic, digestive, sudorific, tonic, cicatrizant, astringent, stomachic, detergent, anti-infective, cardiac stimulant, sedative, febrifuge, antineoplastic, emetic, laxative, hemostatic, used for influenza, fevers, yellow fever, cold, headaches, bronchitis, pneumonia, asthma, colic, constipation, vomiting, stomach troubles, diarrhea, inflammation of the urinary tract, mouth sores, ulcers, hypertension, edema, wounds, snakebites. Planted to repel snakes.)

Common names: ahiapana, aiapaina, aiapana, aipana, asmachilca, ayapana, ayapana, cagueña, curia, daun panahan, daun perasman, diapalma iapana, diarana-guaco, japana, japana-branca, sekrepatoe wiwir, yapana

in English: pool root, white snakeroot

in India: aayaa paana, ajaparna, ajaparnah, ayapan, ayapana, ayapani, ayapanie, ayapanum, ayaparnah, ayappanai, ayapani, ayyampana, ayyappana, visappacca

in Philippines: aiapana, apana

Azadirachta A. Juss. Meliaceae

From the Persian *azad dhirakat* or *azaddhirakt* ‘excellent tree, noble tree’, referring to the usefulness and the considerable economic importance of the genus, see *Mémoires du Muséum d’Histoire Naturelle* 19: 220–221, t. 2, f. 5. 1830, *Bull. Sci. Nat. Géologie* 23: 236. 1830 and *Taxon* 31(1): 66. 1982.

Azadirachta excelsa (Jack) Jacobs (*Azadirachta integrifolia* Merr.; *Melia excelsa* Jack)

Peninsular Malaysia, Sumatra, Borneo. Large deciduous tree, straight bole, buttresses absent, leaves with 7–11 pairs of leaflets asymmetrical, flowers greenish-white, fruit oblong, young shoots, leaves and flowers consumed as a vegetable

See *Gard. Bull. Singapore* 18: 75. 1961, *Scientia Horticulturae* 86(4): 311–321. 2000, *J. Nat. Prod.* 68(7): 1047–1050. 2005

(Similar medicinal and insecticidal qualities to *neem*. Insect repellent, insecticide, antimalarial.)

in English: bird’s-eye kalantas, sentang

in Indonesia: bawang kunyit, kayu bawang, nibwak, surian bawang

in Malaysia: limpaga, ranggu

in Papua New Guinea: azadirachta

in Philippines: danggo, maranggo

in Thailand: sa-dao-thiam, sadao chang, sadao-thiam, thiam

Azadirachta indica A. Juss. (*Antelaea azadirachta* (L.) Adelb.; *Melia azadirachta* L.; *Melia indica* Brandis; *Melia indica* (A. Juss.) Brandis)

India, Sri Lanka. Tree or small tree, straight, evergreen to deciduous, hardy, bole usually short sometimes fluted, rough bark fissured, fast growing, dense leafy oval canopy, shiny green leaves, leaflets asymmetrical, small scented white or greenish white flowers in axillary panicles, oval yellowish green fruits

See *Species Plantarum* 1: 384–385. 1753, *Mém. Mus. Hist. Nat.* 19: 221. 1830, *Trans. Linn. Soc. London* 17(2): 231. 1835 [1837 publ. 25 May 1835], *For. Fl. Ind.* 67. 1874 and *Blumea* 6: 315. 1948, *Journal of Ethnopharmacology* 4: 75–98. 1981, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Journal of Ethnopharmacology* 48: 131–144. 1995, *Afr. Health Sci.* 2(2): 309–311. 1995 [In vitro antimalarial activity of extracts of *Albizia gummifera*, *Aspilia mossambicensis*, *Melia azedarach* and *Azadirachta indica* against *Plasmodium falciparum*.], *Journal of Ethnopharmacology* 83: 39–54. 2002, *J. Econ. Taxon. Bot.* 27(1): 17–19. 2003, *Journal of Ethnopharmacology* 88: 279–286. 2003, *Ceiba* 44(2): 105–268. 2003 [2005], *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 99: 273–279. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *African Journal of Traditional, African Journal of Traditional, Complementary and Alternative Medicines* 3 (2): 94–103. 2006, *International Journal of Dermatology* 46(Suppl. 1): 48–55. 2007, *Journal of Ethnopharmacology* 111: 303–307. 2007

(Used in Ayurveda, Unani and Sidha. Seeds poisonous in large doses and may produce symptoms of severe purgation. A powerful insecticide, insect and nematode repellent; oil, seed, leaves and cake against insects, fungi, bacteria, viruses. Fruit aromatic oil used for malaria, skin diseases, stomach ulcers, worms, rheumatism, leprosy and eczema; *neem* oil has contraceptive properties, application of the oil from the seeds to both male and female genital organs. Leaves febrifuge, antidiabetic, antispasmodic, emetic, astringent, used in the treatment of malaria, diarrhea, dysentery; leaves juice given internally in piles, jaundice, fever; leaf extract mixed with leaf extract of *Momordica charantia* and taken against intestinal worms; paste from roots of *Maerua apetala* with leaves of *Azadirachta indica* and garlic extract taken for leucoderma; decoction of root of *Fagonia arabica* with leaf of *Azadirachta indica* and stem of *Tinospora cordifolia* used as blood purifier; leaves of *Azadirachta indica* ground with the dried rhizome of *Curcuma longa* and the paste applied all over the body for chicken pox; leaf paste applied on chicken pox and measles infected sites, also on wounds, scabies, ringworm, eczema, scorpion sting; decoction of leaves applied

externally for snakebite, boils and wounds as an antiseptic. For diabetes, leaves juice or powdered leaves or pulp of seeds taken with warm water. Stem bark bitter, tonic, astringent and antiperiodic, bark extract drunk to eliminate stomach worms; a decoction of *Costus speciosus* rhizome along with tubers of *Cyperus rotundus* and bark of *Azadirachta indica* is given for jaundice; leaves of *Ziziphus glaberrima* together with stem of *Tinospora cordifolia*, stem bark of *Azadirachta indica* and tubers of *Cyperus rotundus* made into a decoction given in fevers; decoction made of stem bark of *Toona ciliata*, *Azadirachta indica* and whole plant of *Andrographis paniculata* given in fevers to female patients; a decoction of root bark of *Mundulea sericea* pounded with stem barks of *Sapindus emarginatus* and *Azadirachta indica* given as postpartum remedy, antiseptic and general tonic; fresh stem bark crushed with leaves and roots of *Cissampelos pareira* and *Aristolochia indica*, the extract in drops applied in nostrils during epileptic attacks; root bark alterative. For skin diseases, bark and leaves boiled in water and used for bathing. Leafy twigs decoction of *Azadirachta indica*, *Eucalyptus camaldulensis* and *Citrus aurantifolia* used for cough. Veterinary medicine, leaves for ephemeral fevers and an antidote to snake poison for goats; leaves infusion given to cattle for fevers; leaves juice applied for mastitis, eczema, ascariasis, also administered orally to cure ulcers; root of *Sarcostemma acidum* with *neem* bark pounded and the extract given orally as a snakebite antidote; for ephemeral fever, leaves of *Anisomeles indica* with those of *Annona squamosa* and *Azadirachta indica* burnt close to the animal; stem bark ground with that of *Ficus religiosa* given to cure anthrax. Sacred plant, being the seat of Shitala, the deity of the disease, used in religion and magico-religious beliefs, reception, stem bark sweetish white exudation considered to have magical properties; contact therapy, patient suffering from rheumatism and swelling has to take rest under the tree for some nights.)

in Indonesia: imba, intaran, membha, mempheuh, mimba

in Laos: ka dao

in Malaysia: baypay, mambu, repe, veppam, weppa

in Nepal: nim

in Pakistan: neem, nimoli, shirish

in Papua New Guinea: azadirachta

in Singapore: kohumba, nimba, veppam

in Thailand: khwinin, sadao, saliam

in Tibet: ni mba, ni-mba, nim-pa

in Vietnam: s[aa]fju d[aa]ju

Azanza Alef. Malvaceae

Probably from *azania*, an old word meaning *black* in Zanzibar, or from a vernacular Mexican name, see *Prodr.* (DC.) 1: 453. 1824, *Botanische Zeitung*. Berlin 19: 298. 1861.

Azanza garckeana (F. Hoffm.) Exell & Hillc. (*Shantzia garckeana* (F. Hoffm.) Lewton; *Thespesia garckeana* F. Hoffm.; *Thespesia rogersii* Moore; *Thespesia triloba* Hoffm.) (species named after the German botanist Christian August Friedrich Garcke, 1819–1904, author of *Flora von Halle...* 2 vols. Berlin 1848, 1856) (*Shantzia* Lewton, Malvaceae, for the American botanist Homer LeRoy (Leroy) Shantz,

1876–1958, traveller (Africa) and plant collector; see Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 696. University of Pennsylvania Press, Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 265. Boston 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 362. 1972, Irving William Knobloch, compil., “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs*. VI. 1983.)

Tanzania. Tree or shrub, deciduous, rounded crown, large showy red-orange flowers, rounded woody fruit with sweet sticky flesh, fruits important famine food, very sweet ripe fruits edible, on termite mounds, in open bushland and woodland, in *Combretum-Terminalia* bushland

See *Beiträge zur Kenntnis der Flora von Central-Ost-Afrika* 12. 1889 and *Journal of the Washington Academy of Sciences* 18: 15, f. 1–2. 1928, *Contrib. Conhec. da Flora de Moçambique* (Estud., Ens. & Docum. xii.) 2: 59. 1954

(Roots boiled and drunk to treat infertility and constipation. Used for coughs; stems and leaves pounded and extract taken against liver problems.)

in English: snot apple, tree hibiscus, wild hibiscus

in Kenya: baamiya, matoo, muto, mutoo, muwatata, nduwe, olmotoo

in Nigeria: goron tula (Hausa)

in Southern Africa: snotappel (from the Afrikaans snotter = to snivel); morajwa (Mangwato dialect, Botswana); muthowa (Venda); moneko (Kololo, Barotseland); muGurura, muNeko, muNogotogiwa, muTobge, iTobgwe, muTochwe, muTogwe, muTowe (Shona)

in Tanzania: dong, emoloo, emotoo, matua, matwa, mchagai, mchai, mnduwe, msembere, mtakataka, mtobo, mtogho, mtoo, mtowo, mtoyo, mtula, mtwa, muchagai, mutogo, mutroggho, mutwa, mwatata, olmatawayu, olmotoo, thogi, tlaghay, xaxabo

Azima Lam. Salvadoraceae

Origin of the generic name quite uncertain, or from the Malagasy name *azimena*, or from an ancient city of Thrace, Azimus, whose swords were straight like the spines of *Azima*; see *Encycl.* (Lamarck) 1(1): 343. 1783, *Sylva Tellur.* 138. 1838, *Ann. Sci. Nat., Bot.* ser. 4, 8: 44–163. 1857, G.W. Parker, *A Concise Grammar of the Malagasy Language*. London 1883.

Azima tetraacantha Lam. (*Azima angustifolia* DC.; *Azima spinosissima* Engl.; *Azima tetraacantha* var. *laxior* C.H. Wr.; *Azima tetraacantha* var. *pubescens* H. Perrier, nomen nudum; *Monetia barlerioides* L'Hér.; *Monetia tetraacantha* (Lam.) Salisb.; *Monetia tetraacantha* Salisb.)

Tropical Africa to India, Sri Lanka, Madagascar, Comoro Islands. Dioecious, erect evergreen small woody shrub,

variable, scandent, rambling, straggling, spines in each leaf axil often in whorls of 4, greenish to yellowish unisexual flowers, inflorescence an axillary spike or cyme, fruit a thinly fleshy globose edible berry, edible oil, browsed by livestock, barrier plant

See *Encycl.* (Lamarck) 1(1): 343. 1783, *Stirpes Novae aut Minus Cognitae* 1: t. 1. 1784, *Prodr. Stirp. Chap. Allerton* 65. 1796, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 298. 1844, *Prodr.* (DC.) 17: 29. 1873, *Bot. Jahrb. Syst.* xix. (1894) 147. 1894 and *Flore de Madagascar et des Comores* 118: 1–7. 1946, *JAOCS—Journal of the American Oil Chemists' Society* 68(12): 978–979. 1991, *Journal of Ethnopharmacology* 56(2): 145–152. 1997, *Annals of the East Cape Museums* 1: 26–53. 2000, *South African Journal of Science* 97: 375–379. 2001, *Phytotherapy Research* 17(9): 1123–1125. 2003, *Journal of Ethnopharmacology* 94(2–3): 261–266. 2004, *Journal of Ethnopharmacology* 111(3): 657–666. 2007, *Ethnobotanical Leaflets* 12: 948–953. 2008

(Used in Ayurveda and Sidha. Wood avoided as fuel wood because the smoke is considered poisonous. Pricks from thorns, unpleasant burning sensations. Whole plant diuretic, antimicrobial, anticarcinogenic, antiproliferative, antifungal, antioxidant and astringent, used to treat dropsy, dyspepsia, chronic diarrhea, diabetes and arthritis; sap disinfectant, used in oral health care and applied directly to treat toothache and bleeding gums after tooth extraction. Pounded roots applied directly to snakebites; root decoction to treat stomach disorders; root, root bark and leaves added to food as a remedy for rheumatism. Leaves infusion to treat venereal diseases; pickled leaves against colds; leaves made into a paste with water used for fever; juice of the leaves expectorant, said to relieve the cough, bronchitis, vomiting, tuberculosis and asthma, also applied as eardrops against earache and crushed leaves placed on painful teeth; leaf powder antiinflammatory, wound-healing. Juice of the berries applied directly into the ear to treat earache. Veterinary medicine, roots ground and given with rice soaked water for knee pains; dried root ground, put in cold water and given to cows to facilitate difficult parturition; leaves ground with tubers of *Asparagus racemosus* given in fevers.)

in English: bee-hanger, bee-sting, bee-sting bush, by-angel, fire thorn, four thorns, needle bush, stink bush

in India: accamaram, ae sagale, aesagale maale, aesagale mele, aesagale mutthu, ancil, ancirikacceti, anji, atiyamam, bilee uppina gida, bili uppi gida, bilivuppi, biliwuppi, canka-kiranam, cankam, cankam ver, cankan, cankan kuppi, cankan kuppi ilai, cankan ver, cankanceti, canku, cankuceti, carini, cattinakitacceti, cattinakitam, catukkini, changan, cuvacakkini, egachi, elam, elu, elukacceti, elukam, esagale motu, esagelemale, esagelemuttu, esalake, esanku, etu, etukacceti, etukam, evakaanacceti, evakanacceti, evakanam, ganjimullu, hallusunde, hullu sunde, icanku, ichanka, ijangu, inkanceti, isangu, iyanku, kanda-gur-kamay, kandagachangam, kandaki, kanniram, kanta-gur-kamai, kantakacankam, kantaccanku, kantangur, kantagurkamai, karavelasangam,

kavarelocankam, kecchalu baavu, kokkai, kokkarai, kol, kolaccankam, kolaccanku, kolachangu, koturai, koturaiceti, koturi, koturicceti, kucitamiyam, kuncitamiyaceti, kundali, kuntal, kuntalatti, kuntali, kuntalikacceti, kunthali, miccenkan, minnikizhangu, mucaippul, mujangu, mukai, mulcanku, mulchangan, mullangan, mulluccanku, mulchangu, mullukari, mulsangu, mulsanguyelai, muluccanku, mundla kampa, mutai, mutcamkan, mutcankam, mutcankan, mutcanku, muttam, muttapalam, muttayilai, nalla-sanganchedi, nallacanku, nallochangan, narcankan, narcanku, nirccanku, pannaicavitam, pannaiccervitacceti, pannaiccevitacceti, pannaiccevitam, puttu, sangan, sanguchedi, sangumul, sankan, sankunkuppi, shankunkuppi, sukkaa paatha, sukkipat, sung ilai, sungam-chedi, tantapalini, tella-upi, tella uppi, tellavuppi, telluppi, thellavuppi, thelluppi, trikantagati, trikantajata, trikantajati, tuti, tuticcerikacceti, tuticcevikacceti, tuticcevikam, tutiyanci, tutiyancikacceti, tutiyancikam, uppara, uppu chekka, uppugobe, uttapalam, uvarcankam, uvarccankam, uvarccankanceti, vellaiccanku, virutakuntali, vuppukampa, yagachi mullu, yasank, yasanku, yellesundi, yesagale, yesigelamotu, yesigilamali

Malay name: pekan

in Namibia: onyarayongwe

in Southern Africa: byangel, byangelbos, byhanger, groending, naaibos (= sewing bush), naaldebos, speldedoring, speldoring, stinkbos; ndewe (Swahili); isiKhumukela, iHlazane, umGeza, umGeya, iNgungumela, inGungumela, gecaya (Zulu); iGcegelya, iceGceya, iGceleya (Xhosa); ribaba (Tsonga)

in Swaziland: ligumkela, ligumkelii, siKhumekela, umvusankunzi

in Tanzania: mdunga ndewe, mpilipili tawa, mswaki ndume

Azolla Lamarck Azollaceae (Salviniaceae)

Greek *azos* 'dry', *aza* 'dryness', *azo* (see the Hittite *hat*) 'to dry, to burn' and *ollumi*, *olluo* 'to kill, destroy', the plants are killed by drought; see Jean Baptiste Antoine Pierre de Monnet de Lamarck (1744–1829), *Encyclopédie méthodique*. Botanique. 1(1): 343. 1783, Meyen, Franz Julius Ferdinand (1804–1840), *Reise um die Erde ...* 1: 337. Berlin, 1834–1835 and *Handb. Syst. Bot.* 2: 77. 1903, F. Boerner, *Taschenwörterbuch der botanischen Pflanzennamen*. 2. Aufl. 70. 1966, *Acta Phytotax. Sin.* 18(4): 453. 1980, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 63. 1989, *Pl. Syst. Evol.* 184(3–4): 189. 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 90. Basel 1996.

Azolla pinnata R. Br. subsp. *africana* (Desv.) R.M.K. Saunders & K. Fowler (*Azolla africana* Desv.; *Azolla guineensis* Schumacher.; *Azolla pinnata* R. Br.; *Azolla pinnata* var. *africana* (Desv.) Baker)

Tropical Africa. Small aquatic nitrogen-fixing fern, slender and creeping, growing in standing water of rice field, floating on surface, green manure, forage for cattle, feed for poultry

See *Prodromus Florae Novae Hollandiae* 11. 1810, *Mémoires de la Société Linnéenne de Paris* 6(2): 178. 1827, *Beskrivelse af Guineiske planter* 462. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 4: 236. 1829, *J. Bot.*, 25: 101. 1886, *Handbook of the Fern-Allies* 138. 1887 and *Proc. Roy. Soc. Edinburgh, Sect. B, Biol. Sci.* 86: 471–472. 1985, *Fern Gaz.* 13: 317–319. 1989, *Cytologia* 54: 275–286. 1989, *Pl. Syst. Evol.* 173: 223–239. 1990, *Bot. J. Linn. Soc.* 109(3): 351. 1992, *Indian Fern J.* 9: 94–101. 1992, *Pl. Syst. Evol.* 184: 175–193. 1993

(Plant antibacterial, antifungal.)

in English: duckweed, ferny azolla, green azolla, pinnate mosquito-fern

Azolla pinnata R. Br. subsp. *asiatica* R.M.K. Saunders & K. Fowler (*Azolla decomposita* Zoll., nom. nud.; *Azolla imbricata* (Roxb.) Nakai; *Azolla imbricata* (Roxb. ex Griff.) Nakai; *Azolla imbricata* var. *prolifera* Y.X. Ling; *Azolla imbricata* var. *sempervirens* Y.X. Ling; *Azolla pinnata* var. *imbricata* (Roxb. ex Griff.) Bonap.; *Salvinia imbricata* Roxb. ex Griff.)

Thailand, China. Small aquatic nitrogen-fixing fern, slender and creeping, growing in standing water of rice field, floating on surface

See *Flora Veronensis* 3: 52. 1754, *Flora Pedemontana* 2: 289. 1785, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 469–470. 1844, *Systematisches Verzeichniss der im Indischen Archipel* 51. 1854 and *Notes Pteridologiques* 7: 130. 1918, *Botanical Magazine* 39(463): 185. 1925, *Acta Phytotaxonomica Sinica* 18(4): 454. 1980, *Botanical Journal of the Linnean Society* 109(3): 349–351. 1992

(Used for perspiration, diuresis and neurodermatitis. Herbal dog remedy, for respiratory troubles.)

in China: man jiang hon

Azorella Lam. Apiaceae (Umbelliferae)

From the Azores Islands in the Eastern Atlantic. See J.B.A.P. de Monnet de Lamarck, *Encyclopédie méthodique*. Botanique. 1(1): 344. 1783, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 88. Ansbach 1852 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/1): 3–97. 1962, João Afonso, *Bibliografia geral dos Açores: sequencia do Dicionário bibliográfico português*. Angra do Heroísmo 1985, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 63. Berlin & Hamburg 1989.

Azorella compacta Phil. (*Azorella columnaris* H. Wolff; *Azorella prismatoclada* Domin; *Azorella yareta* Hauman; *Laretia compacta* Reiche; *Laretia compacta* (Phil.) Reiche)

Chile. Compact resinous cushion shrub, flowers pale yellow, forming large rounded mounds

See *Botanical Miscellany* 1: 329. 1830, *Anales del Museo Nacional de Chile*. Primera Sección — Zoolojía 8: 28. 1891, *Anales de la Universidad de Chile* 104: 784. 1899 and *Flora de Chile* 3: 63. 1902, *Repertorium Specierum Novarum Regni Vegetabilis* 4: 297. 1907, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 288. 1908, *Physis* 4: 485, f. 3d, 4–6. 1919, *Phytochemistry* 44(4): 649–651. 1997, *Journal of*

Natural Products 62(9): 1319–1321. 1999, *Phytochemistry* 56: 177–180. 2001, *Journal of Andrology* 24(3). May/June 2003, *Phytochemistry* 65(13): 1931–1935. 2004, *Phytotherapy Research* 19(8): 713–716. 2005

(Antibacterial, antihyperglycemic, antiplasmodial, contraceptive. Used to treat the common cold and ache, to reduce sugar in the blood, and as an ointment to treat dermatological disorders; heated resin a dressing for backache.)

in Chile: llarella, llareta, yareta

B

Baccaurea Lour. Phyllanthaceae (Euphorbiaceae)

Latin *baca* (or *bacca*), *ae* 'a berry, a small round fruit' and *aureus*, *a*, *um* 'golden, of gold', see *Flora Cochinchinensis* 2: 641, 651, 661. 1790, *Bijdr.*: 579. 1826, *Fl. Ind.* ed. 1832, 2: 254. 1832, *Fl. Ned. Ind.*, Eerste Bijv.: 444, 471. 1861, *Prodromus* (DC.) 15(2.2): 456–466. 1866 and *Philipp. J. Sci.*, C 4: 279. 1909, *Pflanzenr.* (Engler) Euphorb.-Phyllanthoid.-Phyllanth. 45–72. 1922 [F. Pax and K. Hoffmann], *Bull. Soc. Bot. France* 71: 870. 1924 [publ. 1925], *Trans. Amer. Philos. Soc.* ser. 2. 24(2): 233. 1935, *Botanical Museum Leaflets* - Harvard University 21(3): 65–104. 1965, *Kew Bulletin* 26: 191–363. 1972, *Kew Bulletin* 36: 239–374. 1981. A very difficult genus.

***Baccaurea brevipes* Hook.f.**

Pen. Thailand to W. Malesia. Small tree, fruit a globose waxy capsule white to rose-pink, flesh violet, in rain forest, related to *Baccaurea motleyana* (Müll.Arg.) Müll.Arg.

See *Fl. Brit. India* 5: 372. 1887

(Leaves juice to regulate menstruation.)

in English: blue rambai

in Indonesia: mata ayam, rambai bukit

in Malaysia: mata ayam, rambai ayam, rambai tikus, setambum lilin

***Baccaurea courtallensis* (Wight) Müll.Arg.** (*Baccaurea courtallensis* Müll.Arg.; *Baccaurea macrostachya* (Wight & Arn.) Hook.f.; *Baccaurea macrostachya* Wight; *Pierardia courtallensis* Wight; *Pierardia macrostachya* Wight & Arn.)

India, Sri Lanka. Trees, shining leaves, pendulous inflorescence, crimson flowers, ripe fruits eaten raw

See *Icon. Pl. Ind. Orient.* [Wight] 5(2): t. 1912. 1852, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2): 459. 1866, *Fl. Brit. India* 5: 371. 1887

(Paste from root bark applied on the forehead to get relief from headache.)

in India: mootithuri, onapazham

***Baccaurea lanceolata* (Miq.) Müll.Arg.** (*Adenocrepis lanceolata* Müll.Arg.; *Adenocrepis lanceolata* (Miq.) Müll.Arg.; *Baccaurea glabriflora* Pax & K. Hoffm.; *Baccaurea lanceolata* Müll.Arg.; *Baccaurea pyrrhodasya* (Miq.) Müll.Arg.; *Baccaurea pyrrhadasya* Müll.Arg.; *Hedycarpus lanceolatus* Miq.; *Pierardia pyrrhodasya* Miq.)

Borneo, Thailand. Tree

See *Flora van Nederlandsch Indië* 1(2): 359. 1859, *Fl. Ned. Ind.*, Eerste Bijv.: 3: 442. 1861, *Linnaea* 32: 82. 1863, *Prodr.* (DC.) 15(2): 457, 462. 1866 and *Pflanzenr.*, (Engler) Euphorb.-Phyllanthoid.-Phyllanth. 147,15(Heft 81): 59. 1922

(Pounded leaves with water drunk for stomachache.)

in Sarawak: lampa ong

***Baccaurea macrophylla* (Müll.Arg.) Müll.Arg.** (*Baccaurea beccariana* Pax & K. Hoffm.; *Baccaurea macrophylla* Müll.Arg.; *Baccaurea macrophylla* Pax; *Pierardia macrophylla* Müll.Arg.)

Malay Peninsula, Thailand, Borneo. Tree

See *Flora* 47: 516. 1864, *Prodr.* (DC.) 15(2.2): 460. 1866, *Bot. Jahrb. Syst.* 28(1): 21. 1899 and *Pflanzenr.*, (Engler) Euphorb.-Phyllanthoid.-Phyllanth. 147,15(Heft 81): 62. 1922

(Inner bark juice for sore eyes.)

in Sarawak: pekang

***Baccaurea motleyana* (Müll.Arg.) Müll.Arg.** (*Baccaurea motleyana* Müll.Arg.; *Baccaurea pubescens* Pax & K. Hoffm.; *Pierardia motleyana* Müll.Arg.) (after the British (b. Yorks) plant collector James Motley, c. 1821–1859 (murdered in Borneo), civil engineer and botanist in Malaysia and Borneo, who with Lewis Llewellyn Dillwyn wrote *Contributions to the Natural History of Labuan, and the Adjacent Coasts of Borneo*. London 1855. See E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 520. 1965, I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976, R. Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 503. 1994.)

Thailand, peninsula Malaysia, Sumatra, Borneo. Tree, bushy, ripe fruits eaten usually raw

See *Hort. Bengal.* 28. 1814, *Fl. Ind.* ii. 254. 1832, *Flora* 47: 516. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 461. 1866 and *Pflanzenr.*, IV, 147, XV: 61. 1922

(Sap from bark treats sore eyes, sometimes used with leaves of *Mimusops elengi*. Bark one of the ingredients of a post-partum remedy.)

in English: common rambai

in China: duo mai mu nai guo

in Malaya: rambai

Baccaurea polyneura Hook.f. (*Baccaurea cordata* Merr.; *Baccaurea hookeri* Gage; *Baccaurea kunstleri* King ex Gage)

Pen. Thailand to W. Malesia, Sumatra. Tree, leaves oblong, inflorescences clustered on branches, fruit an ovoid capsule reddish, fruits edible

See *Flora Cochinchinensis* 641, 661. 1790, *Fl. Brit. India* 5: 369. 1887 and *Rec. Bot. Surv. India* 9: 230, 232. 1922, *Univ. Calif. Publ. Bot.* 15: 147. 1929

(Roots grated, mixed with water and the juice squeezed into eyes to relieve soreness and irritation.)

in Indonesia: rambe

in Malaysia: jintek bukit, jintek-jintek, jintek merah, rambai hutan

in Thailand: chamrai, kachampuling, mafai-ling

Baccaurea racemosa (Reinw. ex Blume) Müll.Arg. (*Baccaurea bhaswatii* Chakrab. & M. Gangop.; *Baccaurea racemosa* Müll.Arg.; *Baccaurea wallichii* Hook.f.; *Coccomelia racemosa* Reinw. ex Blume; *Coccomelia racemosa* Reinw.; *Pierardia racemosa* Blume; *Pierardia racemosa* (Reinw.) Blume; *Pierardia racemosa* (Reinw. ex Blume) Blume)

Malesia. Trees, ripe fruits eaten usually raw

See *Hort. Bengal.* 28. 1814, *Cat. Gew. Buitenzorg* (Blume) 110. 1823, *Bijdragen tot de flora van Nederlandsch Indië.* 12: 579. 1826, *Sylloge Plantarum Novarum* 2: 6. 1828[1825], *Prodr.* (DC.) 15(2.2): 461. 1866, *Fl. Brit. India* [J.D. Hooker] 5: 375. 1887 and *J. Straits Branch Roy. Asiat. Soc.* 82: 183–184. 1920, *J. Econ. Taxon. Bot.* 18(2): 420. 1994

(Vomiting caused by eating too much of the fruit. Leaves used for yaws.)

in Bali: kapundung

in Java: kapundung

in Malay Peninsula: kapundung, menteng (the fruit), tuko takal

in Sumatra: kapundung

Baccaurea ramiflora Lour. (*Baccaurea cauliflora* Lour.; *Baccaurea oxycarpa* Gagnep.; *Baccaurea sapida* (Roxb.) Müll. Arg.; *Baccaurea wrayi* King ex Hook. f.; *Gatnaia annamica* Gagnep.; *Pierardia sapida* Roxb.)

Cambodia, Pen. Malaysia. Tree, small tree, evergreen, spreading crown, shaggy thin bark, elliptic-ovate leaves spirally arranged, slow growing, fragrant pale yellow flowers in tomentose unbranched inflorescences, yellow globose edible fruits in bunches along the branches, flowers used as vegetable, fruit pulp eaten fresh

See *Fl. Cochinch.*: 2: 661. 1790, *Flora Indica*; or, descriptions of Indian Plants 2: 254–255. 1832, *Prodromus*

Systematis Naturalis Regni Vegetabilis (DC.) 15(2.2): 459. 1866 and *Bulletin de la Société Botanique de France* 70: 431–432. 1923, *Bulletin de la Société Botanique de France* 71: 870–871. 1925 [1924 publ. 1925], *Planta Medica* 73(13): 1415–1417. 2007, *Fitoterapia* 79(5): 388–392. 2008, *Planta Medica* 76(1): 88–90. 2010

(Stem antioxidant. Bark antioxidant, radical-scavenging activities, used in gynecological disorders, skin diseases, constipation, stomachache, colic and gastric ulcer; a decoction used as a wash for ulcers; bark infusion astringent, taken for food allergy and poisoning; bark sap given to children for constipation; bark chewed by adults for constipation; powdered dry bark applied on infected wounds. Paste made from the root applied in the bite of *Neanthes*, a worm. Eating too many fruits gives an upset stomach. Magic, contact therapy, a piece of stem tied on arms cures sore eyes.)

in English: Burmese grape, rambai

in Cambodia: phnhiew

in China: mu nai guo

in India: dampiya-araung, dieng sohmyndong, dojuka, kata-phal, khata phal, leteku, lotqua, lutco, lutqua, moktok, pang-kai, pangkai, rambai, samai, tampaiuk, tampaiuk-araung

in Indonesia: mafai setambun, tajam molek

in Laos: f'ai

in Malaysia: pupor, tampoi, tempui

in Myanmar: kanazo

in Thailand: hamkang, mafai, phayiu, sae-khruea-sae, somfai

in Vietnam: dzâu miên dzu' ó'i, giâu gia dât, giâu tiên

Baccaurea sumatrana (Miq.) Müll. Arg. (*Calyptroon sumatranum* Miq.)

Indonesia. Small tree, dioecious, reddish-brown bole, unisexual flowers borne in few-flowered clusters behind the leaves, orange dehiscent berries with a few orange-arillate seeds

See *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 471. 1861, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 466. 1866

(Leaf paste applied on wounds.)

in India: kachchmai

Malay name: tambun

Baccharis L. Asteraceae

Greek *bakkaris*, *bakkaridos* 'unguent made from asaron'; *bakcharis*, an ancient Greek name used by Dioscorides for sowbread, *Cyclamen hederacifolium*; Greek *bakchar*, *bakchari* 'unguent', Latin *baccar* (or *bacchar*), *baccaris* for a plant having a fragrant root from which an oil was expressed

(Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 860–861. 1753, *Genera Plantarum*. Ed. 5. 370. 1754, *Symbolae Botanicae*, ... 3: 98. 1794, *Synopsis Plantarum* 2: 425. 1807, *Nova Genera et Species Plantarum* (folio ed.) 4: 47–48. 1820, *Dictionnaire des Sciences Naturelles* [Second edition] 41: 57–59. 1826, *Flora* 10(6): 96. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 402, 407, 409–410, 413, 415–416, 420, 424. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 3(17): 38. 1840, *Plantas Hartwegianas imprimis Mexicanas* 202. 1845, *Smithsonian Contributions to Knowledge* 3(5): 101–102. 1852, *Anales de la Universidad de Chile* 34: 180. 1870, *Flora Brasiliensis* 6(3): 55, 61. 1882, *Anales Mus. Baccharis articulata (Lam.) Pers. (*Conyza articulata* Lam.; *Molina articulata* (Lam.) Less.; *Pingraea articulata* (Lam.) F.H. Hellw.)

South America.

See *Encyclopédie Méthodique, Botanique* 2: 94. 1786, *Synopsis Plantarum* 2: 425. 1807, *Linnaea* 6: 140. 1831 and *Candollea* 48(1): 217. 1993

(Aerial parts decoctions or infusions antidiabetic, diuretic and digestive.)

in Brazil: carquejana, carquejilla, quauhizquitzli

Baccharis caespitosa (Ruiz & Pav.) Pers. (*Baccharis alpina* Kunth; *Baccharis alpina* Cerv.; *Baccharis alpina* fo. *macrocephala* Hieron.; *Baccharis caespitosa* var. *alpicola* Cuatrec. ex Luteyn, nom. nud.; *Baccharis caespitosa* var. *alpina* (Kunth) Cuatrec.; *Baccharis caespitosa* var. *caespitosa*; *Baccharis humifusa* Kunth; *Baccharis incarum* Wedd. fo. *prostrata* Cuatrec.; *Baccharis microphylla* subvar. *prostrata*

Wedd.; *Baccharis odorata* Kunth fo. *spathulata* Wedd.; *Baccharis procumbens* Hieron.; *Baccharis tricuneata* (L.f.) Pers. var. *minifolia* Cuatrec.; *Molina caespitosa* Ruiz & Pav.)

South America.

See *Systema Vegetabilium Florae Peruvianaes et Chilensis* 203. 1798, *Synopsis Plantarum* 2: 425. 1807, *Nova Genera et Species Plantarum* (folio ed.) 4: 37–38, t. 322. 1820[1818], *Chloris Andina* 1(4–6): 169. 1855[1856] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 590. 1901, *Caldasia* 10(46): 8. 1967, *Memoirs of the New York Botanical Garden* 84: 86. 1999

(Crushed leaves applied to sprains and contusions.)

Baccharis concava Pers. (*Baccharis macraei* Hook. & Arn. var. *intermedia* Heer.; *Molina concava* Ruiz & Pav.)

South America.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 32. 1841

(Crushed leaves applied to sprains, wounds, ruptures and contusions.)

Baccharis conferta Kunth (*Baccharis orizabaensis* Sch. Bip. ex Hemsl., nom. nud.; *Baccharis resinosa* Kunth; *Baccharis xalapensis* Kunth)

Mexico.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 41, 43–44, t. 323. 1820 [1818], *Biologia Centrali-Americana; ... Botany ...* 2(8): 130. 1881 and *Journal of Pharmacy and Pharmacology* 54(1): 99–104. 2002

(Spasmolytic, laxative, astringent, used to treat diarrhea, stomachaches, gastrointestinal cramps, for stimulating urination. Tea made from the leaves taken to lose weight.)

in Brazil: quauhizquitzli

Baccharis coridifolia DC. (*Eupatorium montevidense* Spreng.)

Mexico.

See *Systema Vegetabilium Florae Peruvianaes et Chilensis* 3: 417. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 422. 1836

(Whole herb decoction used externally as an antiinflammatory. Veterinary medicine, vapors of the whole herb, mixed with sulphur, used for horse's external parasites.)

in Mexico: mio-mio, romerillo

Baccharis corymbosa (Ruiz & Pav.) Pers. (*Molina corymbosa* Ruiz & Pav.)

South America. Shrub

See *Systema Vegetabilium Florae Peruvianaes et Chilensis* 210. 1798, *Synopsis Plantarum* 2: 424. 1807

(Resinous, balsamic, aromatic, tonic.)

Baccharis dracunculifolia DC. (*Baccharis bracteata* Hook. & Arn.; *Baccharis dracunculifolia* fo. *spectabilis* Heering; *Baccharis dracunculifolia* fo. *subviscosa* Kuntze; *Baccharis dracunculifolia* var. *integerrima* Kuntze; *Baccharis leptospermoides* DC.; *Baccharis pulverulenta* Klatt)

Brazil.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 421. 1836, *London Journal of Botany* 3: 35. 1841, *Abhandlungen der Naturforschenden Gesellschaft zu Halle* 15: 327. 1881, *Revisio Generum Plantarum* 3: 132. 1898 and *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten* 31: 143. 1913

(Resinous exudates, used to improve health and prevent diseases.)

Baccharis emarginata (Ruiz & Pav.) Pers. (*Molina emarginata* Ruiz & Pav.)

South America.

See *Synopsis Plantarum* 2: 424. 1807

(Crushed leaves applied to sprains, wounds, ruptures and contusions.)

in Peru: tayo macho

Baccharis gaudichaudiana DC.

Paraguay.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 424. 1836

(Used for the treatment of diabetes, gastrointestinal ailments and as a tonic.)

in Paraguay: chilca melosa

Baccharis genistelloides (Lam.) Pers. subsp. ***crispa*** (Spreng.) Joch. Müll. (*Baccharis crispa* Spreng.; *Baccharis cylindrica* (Less.) DC.; *Baccharis genistelloides* var. *crispa* (Spreng.) Baker; *Baccharis genistelloides* var. *cylindrica* (Less.) Baker; *Baccharis genistelloides* var. *trimera* (Less.) Baker; *Baccharis myriocephala* DC.; *Baccharis trimera* (Less.) DC.; *Molina crispa* (Spreng.) Less.; *Molina cylindrica* Less.; *Molina trimera* Less.; *Pingraea crispa* (Spreng.) F.H. Hellw.)

South America.

See *Monadelphiae Classis Dissertationes Decem* 9: 435. 1790, *Systema Vegetabilium*, editio decima sexta 3: 466. 1826, *Linnaea* 6: 141. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 425. 1836, *Flora Brasiliensis* 6(3): 41. 1882 and *Candollea* 48(1): 217. 1993

(Aphrodisiac. Decoctions from the aerial parts digestives and antiseptic for external use; decoctions of the whole herb to treat liver disease, rheumatism, diabetes, as digestive and aphrodisiac, for hepatic and renal disorders. *Baccharis trimera*, leaves and stem, used for regulating fertility.)

in Brazil: carqueja-amarga

in Mexico: carqueja

in Paraguay: jaguarete ka'á

Baccharis glomeruliflora Persoon (*Baccharis sessiliflora* Michaux, nom. illeg.; *Baccharis sessiliflora* Vahl)

North America. Dioecious shrub, not resinous, flowers in heads, in salt marshes, swamps and low ground, in hammocks

See *Symbolae Botanicae*, ... 3: 97. 1794, *Fl. Bor.-Amer.* 2: 125. 1803, *Syn. Pl.* 2: 423. 1807

(Toxic.)

in English: silverling

Baccharis grisebachii Hieron (*Baccharis abientina* Kuntze)

Andean provinces, Argentina.

See *Boletín de Academia de Ciencias, Bellas Letras y Nobles Artes. Córdoba, Spain* 4: 36. 1881, *Revisio Generum Plantarum* 3(2): 31. 1898

(Aerial parts infusion digestive, local antiseptic and cicatrizing, to treat gastric ulcers.)

Baccharis halimifolia L. (*Baccharis halimifolia* var. *angustior* DC.)

North America. Dioecious shrub, resinous, white flowers, not generally palatable to cattle

See *Sp. Pl.* 2: 860–861. 1753, *Gen. Pl.* ed. 5, 370. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 412. 1836 and *Regnum Veg.* 127: 23. 1993

(Leaves contain a cardiotoxic glycoside known to cause the death of sheep if they eat about one percent of their body weight in leaves.)

in English: consumption weed, eastern baccharis, groundsel bush, groundsel tree, sea myrtle, silverling, tree groundsel

Baccharis heterophylla Kunth (*Baccharis cuneata* DC.; *Baccharis spathulata* Schauer; *Baccharis spathulata* Klatt, nom. illeg.)

Mexico.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 48–49. 1820[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 408. 1836, *Linnaea* 19: 724–725. 1847, *Abhandlungen der Naturforschenden Gesellschaft zu Halle* 15: 326. 1882

(Infusions or decoctions of the aerial parts antimicrobial, used for gastrointestinal disorders.)

Baccharis illinita DC.

Brazil.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 412. 1836

(Leaves and stems infusion antiinflammatory, anti-infectious, skin and mucosal healing, protective action against stomach ulcers. Powder from macerated and dried leaves used for the cicatrization of skin wounds.)

in Brazil: erva milagrosa

Baccharis incarum Wedd. (*Baccharis incarum* (Wedd.) Cuatrec.; *Baccharis incarum* (Wedd.) Perkins; *Baccharis incarum* var. *lejia* (Phil.) Cabrera; *Baccharis lejia* Phil.; *Baccharis microphylla* var. *incarum* Wedd.; *Baccharis tola* Phil.; *Baccharis tola* var. *lejia* (Phil.) Reiche)

Argentina. Low shrub, resinous, white heads

See *Chloris Andina* 1(4–6): 170, t. 29. 1855[1856], *Florula Atacamensis* seu Enumeratio ... 30. 1860 and *Anales de la Universidad de Chile* 111: 176. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 224. 1913, *Phytologia* 9: 7. 1963, *Systematic Botany Monographs* 76: 93. 2006

(Decoctions or poultices of leaves for healing wounds.)

Baccharis latifolia (Ruiz & Pav.) Pers. (*Baccharis floribunda* Kunth; *Baccharis polyantha* Kunth; *Baccharis polyantha* fo. *genuina* Hieron.; *Baccharis polyantha* var. *macrophylla* Hieron.; *Baccharis riparia* Kunth; *Molina latifolia* Ruiz & Pav.; *Pingraea latifolia* (Ruiz & Pav.) F.H. Hellw.; *Pluchea glabra* Griseb.; *Vernonia otavalensis* Gilli)

Peru, Andes, Ecuador. Páramos

See *Systema Vegetabilium Florae Peruvianaee et Chilensis* 208. 1798, *Nova Genera et Species Plantarum* (folio ed.) 4: 50–51, t. 325. 1820[1818], *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 183. 1879 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29: 25. 1900, *Feddes Repertorium* 94: 313. 1983, *Candollea* 48(1): 217. 1993

(Decoctions or infusions of leaves and stems for skin infections, liver disease, wounds, ulcers, diabetes and rheumatism.)

Baccharis linearis (Ruiz & Pav.) Pers. (*Baccharis callistemoides* Walp.; *Baccharis holmbergii* Hicken; *Baccharis lingulata* Kunze ex Less.; *Baccharis linifolia* Phil.; *Baccharis rosmarinifolia* Hook. & Arn.; *Baccharis rosmarinifolia* var. *callistemoides* (Walp.) Heer. ex Reiche; *Baccharis rosmarinifolia* var. *subandina* (Phil.) Heer. ex Reiche; *Baccharis rosmarinifolia* var. *subsiniuata* DC.; *Baccharis subandina* Phil.; *Molina linearis* Ruiz & Pav.)

South America.

See *Systema Vegetabilium Florae Peruvianaee et Chilensis* 205. 1798, *Synopsis Plantarum* 2: 425. 1807 and *Amer. J. Bot.* 76: 585–594. 1980, *Darwiniana* 30: 115–121. 1990

(Crushed leaves applied to sprains, wounds, ruptures and contusions.)

Baccharis multiflora Kunth (*Neomolina multiflora* Kunth; *Neomolina multiflora* (Kunth) F.H. Hellw.)

Mexico. Erect, suffrutescent shrub, flowers yellowish white

See *Nov. Gen. Sp.* [H.B.K.] 4: 46, 59. 1820[1818] and *Taxon* 19(1): 105. Feb. 1970, *Candollea* 48(1): 213. 1993

(Used in the form of infusions of the leaves for the treatment of catarrhs and for urinary problems.)

Baccharis nitida (Ruiz & Pav.) Pers. (*Baccharis lepidota* Gilli)

Baccharis nitida fo. *angustifolia* Cuatrec.; *Baccharis oronocensis* DC.; *Baccharis oronocensis* var. *perua* Cuatrec.; *Baccharis popayanensis* Hieron.; *Baccharis prinoides* Kunth; *Molina nitida* Ruiz & Pav.)

South America.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 44. 1820[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 422. 1836 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 593. 1901, *Anales. Ciencias. Universidad de Madrid* 4: 209. 1935, *Mutisia* 17: 11. 1953, *Feddes Repertorium* 94: 306. 1983, *Phytologia* 56(4): 252–255. 1984, *Fl. Venez. Guayana* 3: 177–393. 1997

(Resinous, aromatic, tonic, balsamic, stimulant.)

Baccharis notoserigila Griseb.

Argentina, Uruguay and Paraguay. Subshrub, white flowers

See *Symbolae ad Floram Argentinam* 183. 1879 (also *Abh. Königl. Ges. Wiss. Göttingen* 24: 183. 1879)

(Infusions of the leaves and/or stems diuretic and digestive.)

Baccharis obtusifolia Kunth (*Baccharis loxensis* Benth.)

Ecuador.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 40. 1820[1818], *Plantas Hartwegianas imprimis Mexicanas* 135. 1844

(Decoctions of the aerial parts for the treatment of rheumatism, liver disease, wounds and ulcers.)

Baccharis pentlandii DC.

Bolivia. Resinous shrub densely branched, white flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 416. 1836

(Used in the treatment of inflammation and rheumatism.)

Baccharis pentlandii DC. subsp. *pentlandii* (*Baccharis fallax* Kuntze; *Baccharis pentlandii* subsp. *sculpta* (Griseb.) Joch. Müll.; *Baccharis rubricaulis* Rusby)

Bolivia. Woody shrub, white flowers

See *Prodr.* (DC.) 5: 416. 1836, *Revisio Generum Plantarum* 3: 132. 1898 and *Bulletin of the New York Botanical*

Garden 8(28): 129. 1912, *Systematic Botany Monographs* 76: 156. 2006

(Infusions or decoctions of the leaves and/or stems used for treating different types of mucous ailments.)

Baccharis pilularis DC. (*Baccharis pilularis* subsp. *consanguinea* (DC.) C.B. Wolf; *Baccharis pilularis* subsp. *consanguinea* C.B. Wolf; *Baccharis pilularis* var. *consanguinea* (DC.) Kuntze; *Baccharis pilularis* var. *consanguinea* Kuntze)

North America. Prostrate shrub, wiry and woody perennial evergreen, large root system, numerous small waxy stiff grey-green leaves, white fluffy female and yellowish male flowers, leaves fragrant and sticky with resinous oils, drought-resistant, fire-retardant, pioneer species

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 407–408. 1836, *Revis. Gen. Pl.* 1: 319. 1891 and *Occas. Pap. Rancho Santa Ana Bot. Gard.* ser. 1; 1: 21. 1935

(Infusion of plant tonic and stimulant; heated leaves to reduce swelling.)

in English: bush baccharis, chaparral broom, coyote brush, dwarf baccharis, dwarf chaparral broom, dwarf coyote brush, fuzzy wuzzy, kidney wort, kidney-wort baccharis

Baccharis pteronioides DC. (*Baccharis ramulosa* (DC.) A. Gray; *Haplopappus ramulosus* DC.; *Linosyris ramulosa* (DC.) A. Gray; *Neomolina pteronioides* (DC.) F.H. Hellw.)

Mexico. Perennial shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 410. 1836, *Smithsonian Contributions to Knowledge* 3(5): 97. 1852, *Plantae Novae Thurberianae* 301. 1854 and *Candollea* 48(1): 213. 1993

(A hazard to cattle and sheep, the plants are also said to be poisonous to cattle and sheep. Infusion of the leaves used to treat chills (pasma) and sores; decoction of leaves and roots used as wash for rheumatism and gonorrhoea.)

in Mexico: yerba de pasmo

Baccharis rufescens Spreng. var. *ventanicola* Cabrera (*Baccharis baldwinii* Hook. & Arn.; *Baccharis brevifolia* DC.; *Baccharis chilco* Kunth; *Baccharis cordobensis* Heering; *Baccharis denticulata* D. Don ex DC.; *Baccharis humilis* Pruski; *Baccharis leptcephala* DC.; *Baccharis linearifolia* (Lam.) Pers.; *Baccharis microphylla* var. *linearifolia* Wedd. ex Sch. Bip.; *Baccharis microphylla* var. *pulverulenta* Rusby; *Baccharis obovata* (Ruiz & Pav.) DC.; *Baccharis patiensis* Hieron.; *Baccharis paucidentata* DC.; *Baccharis pedalis* Sch. Bip. ex Griseb.; *Baccharis pedersenii* Cabrera; *Baccharis pflanzii* Perkins; *Baccharis polycephala* Wedd.; *Baccharis prostrata* (Ruiz & Pav.) Pers.; *Baccharis pseudotridentata* Heering; *Baccharis rotundifolia* var. *stuckertii* Heering; *Baccharis rufescens* var. *leptocephala* (DC.) Baker; *Baccharis rufescens* var. *varians* (Gardner) Baker; *Baccharis subcapitata* Gardner; *Baccharis subdentata* DC.; *Baccharis*

subdentata var. *incogitata* Malag.; *Baccharis subdentata* var. *incognita* Malag.; *Baccharis subrufescens* Heering; *Baccharis tricuneata* (L.f.) in Sri Lanka: kado-seragam, sanne nayan

Backhousia Hook. & Harvey Myrtaceae

In honor of the British (b. Darlington, Durham) Rev. James Backhouse, the Elder, 1794–1869 (d. York), traveller,

nurseryman, plant collector, botanist, a Quaker missionary, reached Hobart in 1832, with G.W. Walker he spent nearly six years travelling and preaching throughout Tasmania and New South Wales, brother of Nathan Backhouse (1788–1805) and Thomas Backhouse (1792–1845), father of James Backhouse (1825–1890, d. York). See *Extracts from the Letters of James Backhouse*, now engaged in a religious visit to Van Diemen's Land and New South Wales. Accompanied by George Washington Walker. London 1838–1841, *Curtis's Botanical Magazine*. 71: t. 4133. 1845, J.G. Baker, "James Backhouse." *J. Bot. Lond.* 7: 51–58. 1869, Sarah Backhouse, *Rev. James Backhouse 1794–1869. Memoir of James Backhouse*, by his sister. York, London 1870 and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 123. 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 99. 1965, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 84–85. Cape Town 1981, Gilbert Westacott Reynolds, *The Aloes of South Africa*. 59–62, 318. Balkema, Rotterdam 1982.

Backhousia citriodora F. Muell.

Queensland. Shrub or tree, low-branching habit, young foliage reddish, numerous white flowers in long-stalked clusters, bell-shaped hairy receptacle with 5 persistent spreading calyx lobes, numerous fluffy stamens, fruit a nut-like capsule, aromatic essential oils from the strongly lemon-scented leaves

See *Fragmenta Phytographiae Australiae* 1: 78. 1859 and Hayes A.J., Markovic B. "Toxicity of Australian essential oil *Backhousia citriodora* (lemon myrtle). Part 1. Antimicrobial activity and in vitro cytotoxicity." *Food Chem. Toxicol.* 40(4): 535–543. 2002, Hayes, A.J., Markovic, B. "Toxicity of Australian essential oil *Backhousia citriodora* (lemon myrtle). Part 2. Absorption and histopathology following application to human skin." *Food Chem. Toxicol.* 41(10): 1409–1416. 2003, *J. Agric. Food Chem.* 2003 51(1): 76–81. 2003, *Phytother. Res.* 18(11): 947–949. 2004, Burke, B.E., Baillie, J.E., Olson, R.D. "Essential oil of Australian lemon myrtle (*Backhousia citriodora*) in the treatment of molluscum contagiosum in children." *Biomed. Pharmacother.* 58(4): 245–247. 2004, *Anal. Bioanal. Chem.* 386(7–8): 2141–2152. 2006

(A powerful antifungal, antibacterial and antimicrobial agent.)

in English: Australian lemon myrtle, lemon ironwood, lemon myrtle, lemon-scented myrtle, sweet verbena tree

Backhousia myrtifolia Hook. & Harvey (*Backhousia australis* G. Benn., nom. nud.; *Backhousia riparia* Hook. & Harv.)

Queensland, New South Wales. Evergreen shrub, essential oil with a cinnamon-like odour obtained from the leaves

See *Bot. Mag.* 71: t. 4133. 1845

(Toxic woods.)

in English: carrol, carrol ironwood, cinnamon myrtle, grey myrtle, ironwood, neverbreak

Bacopa Aublet Scrophulariaceae (Plantaginaceae)

From an Indian aboriginal name in French Guiana; see *Civ. Nat. Hist. Jamaica* 269. 1756, J.B.C.F. Aublet, *Histoire des Plantes de la Guiane Française*. 1: 128, t. 49. Paris 1775, *Suppl. Carp.* 186 (t. 214). 1807 and *Memoirs of the Torrey Botanical Club* 16: 105. 1920, *Proceedings of the Academy of Natural Sciences of Philadelphia* 98: 98. 1946, *Field Mus. Nat. Hist., Bot. (Fruits tonic, stimulant, eaten to quench thirst.)

Vernacular names: espina, xaneeboto

Baeckea L. Myrtaceae

After the Swedish naturalist Abraham Bäck, 1713–1795, physician, amateur botanist, friend of Linnaeus. See Carl Linnaeus, *Species Plantarum* 1: 358–359. 1753, *Genera*

Plantarum. Ed. 5. 169. 1754, [Bishop Uno von Troil], *Bref rorende en Resa til Island in aaren 1772*. [A collection of letters describing a voyage to Iceland headed by Joseph Banks and Daniel Solander in 1772, there is a letter by A. Bäck on the prevalence of elephantiasis in Iceland.] Upsala 1777, Carl Adolph Agardh, *Antiquitates Linnaeanae*. Lundae 1826, *Syn. Hesper.* 140. 1846 and J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 101. 1965, *Phytochemistry* 41(3): 923–925. 1996, *Telopea* 7(3): 245–268. 1997, *Journal of Tropical Forest Products* 4(2): 192–198. 1998, *Phytochemistry* 50(2): 273–277, 303–306. 1999.

Baeckea frutescens L. (*Baeckea chinensis* Gaertn.; *Baeckea cochinchinensis* Blume, nom. illeg.; *Baeckea cumingiana* Schauer; *Baeckea ericoides* Schltdl.; *Baeckea frutescens* var. *brachyphylla* Merr. & L.M. Perry; *Baeckea sinensis* Gaertn.; *Baeckea stenophylla* F.Muell.; *Baeckea sumatrana* Blume; *Cedrela rosmarinus* Lour.; *Drosodendron rosmarinus* (Lour.) M. Roem.; *Drosodendron rosmarinus* M. Roem.; *Neuhofia rosmarinifolia* Stokes)

China, Australia. Shrub or small tree, tufted, slender, pendent branchlets, needle-shaped leaves, white solitary flowers, angular seeds, all parts of the plant are strongly scented

See *De Fructibus et Seminibus Plantarum...* 1: 157, pl. 31. 1788, *Flora Cochinchinensis* 1: 160–161. 1790, *Syn. Hesper.* 140. 1846, *Museum Botanicum* 1: 69. 1849 and *Journal of the Arnold Arboretum* 20(1): 102. 1939, *J. Vet. Med. Sci.* 67(8): 829–831. 2005

(Leaves infusion or decoction diuretic, febrifuge, tonic, emmenagogue, postpartum remedy and abortifacient. Essential oil from the whole plant, except the roots, anti-inflammatory, antibacterial, cytotoxic, febrifuge, astringent, antiseptic, hemostatic, used for influenza, headache, hemorrhagic dysentery, dyspepsia, colic, jaundice, rheumatism, epistaxis, menstrual disorders, furunculosis, measles, snakebite. The extracts of *Achillea millefolium*, *Baeckea frutescens*, *Brucea javanica*, *Curcuma xanthorrhiza*, *Strychnos lucida* and *Swietenia macrophylla* showed both strong antibabesial and antimalarial activities.)

in English: false ru, shrubby baeckea

in Cambodia: moreck ansai

in China: gang song

in Indonesia: djung rahab, jhung rahab, jung rahab, junjung atap, udjung atap

Baeckea gunniana Schauer ex Walp. (*Baeckea gunniana* Schauer; *Baeckea micrantha* Hook.f., nom. illeg.; *Tetrapora*

gunniana (Schauer ex Walp.) Miq.; *Tetrapora gunniana* (Schauer) Miq.; *Tetraspora gunniana* (Schauer ex Walp.) Miq.)

New South Wales to Tasmania. Evergreen shrub

See *Repert. Bot. Syst.* 2: 920. 1843, *Linnaea* 17: 238. 1843, *Nederlandsch Kruidkundig Archief* 4: 150. 1856, *Flora Australiensis* 3. 1867 and *J. Nat. Prod.* 62(12): 1624–1626. 1999

(Crude plant extracts were surveyed for their ability to inhibit DNA polymerase β .)

in English: alpine baeckea, mountain heath-myrtle

Bafodeya Prance ex F. White Chrysobalanaceae

Bafodeya benna (Scott-Elliot) Prance ex F. White (*Bafodeya benna* (Scott-Elliot) Prance; *Parinari benna* Scott-Elliot)

West Tropical Africa. Small tree or shrub, flowers white with pink centre, bristly seeds, savanna

See *Histoire des plantes de la Guiane Française* 1: 514, pl. 204–206. 1775, *Journal of the Linnean Society, Botany* 30: 78. 1894 and *Bulletin du Jardin Botanique National de Belgique* 46(3–4): 271. 1976, *Philosophical Transactions of the Royal Society of London, Series B* 320: 1–184. 1988, *Journal of Ethnopharmacology* 114(1): 44–53. 2007

(Fruit vermifuge. Veterinary medicine.)

in Guinea: kura, sigmyi, sigon, sigonai, sigonaïa, siko, sikon-dyi, tusu kuraa

in Sierra Leone: siko-na

in West Africa: kura, sigmyi, sigon, sigonai, sigonaïa, sigonyi, siko, siko-na

Bafodeya hills, see *Bull. Jard. Bot. Natl. Belg.* 46(3–4): 271. 1976.

Bagassa Aublet Moraceae

A native name for *Bagassa guianensis* Aublet, called *bagasse* by the Galibis, French Guiana; *bagasse* is also the name of the crushed *Saccharum*, see *Histoire des plantes de la Guiane Française* Suppl.: 15, t. 376. 1775.

Bagassa guianensis Aubl. (*Bagassa sagotiana* Bureau ex Benth. & Hook. f.; *Bagassa tiliifolia* (Desv.) Benoist; *Bagassa tiliifolia* (Gaudich.) Benoist; *Bagassa tiliifolia* Benoist; *Laurea tiliifolia* Gaudich.; *Piper schiedeanum* Steud.; *Piper tiliifolium* Desv.; *Piper tiliifolium* Desv. ex Ham.; *Piper tiliifolium* Schtdl. & Cham., nom. illeg.)

French Guiana.

See *Histoire des plantes de la Guiane Française* 2(Suppl.): 15, t. 376. 1775, *Prodromus Plantarum Indiae Occidentalis*

4. 1825, *Linnaea* 6: 352–353. 1831, *Nomenclator Botanicus*. Editio secunda 2: 343. 1841, *Genera Plantarum* 3(1): 362. 1880 and *Archives de Botanique, Mémoires* 5(1): 31. 1933

(Latex purgative.)

Baileya Harvey & A. Gray Asteraceae

Dedicated to the American botanist Jacob Whitman Bailey, 1811–1857, plant collector, explorer, 1838–1842 in Charles Wilkes U.S. expedition to Antarctic islands and NW coast of North America. See John H. Barnhart, *Biographical Notes upon Botanists*. 1: 105. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 21. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 445–446. 1973, Turner, M.W. “Systematic study of the genus *Baileya* (Asteraceae: Helenieae).” *Sida* 15: 491–508. 1993.

Baileya multiradiata Harvey & A. Gray (*Baileya australis* Rydberg; *Baileya multiradiata* Harv. & A. Gray ex A. Gray; *Baileya multiradiata* Harv. & A. Gray ex Torr.; *Baileya multiradiata* var. *nudicaulis* A. Gray; *Baileya multiradiata* var. *thurberi* (Rydb.) Kittell; *Baileya pleniradiata* Harvey & A. Gray var. *multiradiata* (Harvey & A. Gray) Kearney; *Baileya pleniradiata* var. *multiradiata* (Torr.) Kearney; *Baileya pleniradiata* var. *multiradiata* (Harv. & A. Gray ex Torr.) Kearney; *Baileya thurberi* Rydberg)

Southwestern US deserts. Annual, biennial, perennial, slender, tongue-shaped leaves, single yellow flower-head

See *Not. Milit. Recon.* 143–144. 1848, *Mem. Amer. Acad. Arts*, n.s. 4(1): 106. 1849, *Synoptical Flora of North America* 1(2): 318. 1884, *Transactions of the New York Academy of Sciences* 14(3): 42. 1895 and *North American Flora* 34(1): 10–11. 1914, *Fl. Ariz. New Mex.* 457. 1941, *Sida* 15: 501. 1993

(Poisonous, reportedly toxic to livestock, especially to sheep and goats; cattle and horses seem to be unaffected. Both *Baileya multiradiata* and *Baileya pleniradiata* produce an antineoplastic pseudoguaianolide, radiatin that might prove useful in cancer therapy; antibiotic sesquiterpene lactone from *Baileya multiradiata* inhibits tumor formation. Plant rubbed under arms as deodorant.)

in English: desert baileya, desert marigold, wild desert marigold

Baileya pauciradiata Harvey & A. Gray

North America. Subshrub, stem and leaves with lanate pubescence, receptacle densely lanate, ray florets yellow, disk florets yellow, growing in creosote scrub desert

See *Mem. Amer. Acad. Arts*, n.s. 4(1): 105. 1849

(Cytotoxic sesquiterpene lactones.)

Baileya pleniradiata Harvey & A. Gray (*Baileya multiradiata* Harvey & A. Gray var. *perennis* (A. Nelson) Kittell; *Baileya multiradiata* var. *pleniradiata* (Harvey & A. Gray) Coville; *Baileya nervosa* M.E. Jones; *Baileya perennis* (A. Nelson) Rydberg; *Baileya perennis* Rydb.; *Baileya pleniradiata* Harv. & A. Gray ex A. Gray; *Baileya pleniradiata* var. *perennis* A. Nelson)

Southwestern USA, Northern America.

See *Mem. Amer. Acad. Arts*, ser. 2, 4(1): 105. 1849 and *Bot. Gaz.* 47: 431. 1909, *North American Flora* 34(1): 10–11. 1914

(Both *Baileya multiradiata* and *Baileya pleniradiata* produce an antineoplastic pseudoguaianolide, radiatin that might prove useful in cancer therapy.)

Baillonella Pierre Sapotaceae

Named after the French botanist Henri Ernest Baillon, 1827–1895, professor at the Faculté de Médecine, Paris, among his many works are *Adansonia*. Recueil périodique d'observations botaniques. 1860–1879 and *Histoire des plantes*. Paris, London, Leipzig 1866–1895, with Emmanuel Drake del Castillo (1855–1904) wrote *Histoire naturelle des Plantes de Madagascar*. Paris 1886 [–1897] in Alfred Grandidier (1836–1921), *Histoire physique, naturelle et politique de Madagascar*. Paris 1886–1903; see Elmer Drew Merrill, in *Bernice P. Bishop Mus. Bull.* 144: 37–39. 1937, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 106. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 21. 1972.

Baillonella toxisperma Pierre (*Baillonella djave* (Engl.) Pierre ex Dubard; *Baillonella obovata* Pierre ex Engl., nom. illeg.; *Baillonella pierriana* (Engl.) A. Chev.; *Baillonella toxisperma* var. *obovata* Aubrév. & Pellegr.; *Mimusops djave* Engl.; *Mimusops obovata* Engl., nom. illeg.; *Mimusops pierreana* Engl.)

WC. Trop. Africa, Southern Nigeria, Gabon, Congo. Very large tree, straight and cylindrical, crown umbrella-shaped, deeply fissured bark, leaves arranged spirally in tufts at the ends of branches, white sticky sap, creamy white flowers in dense fascicles at the ends of branches, edible oil extracted by boiling, fruit pulp eaten fresh

See *Notes Botaniques Sapotacees* 1: 14. 1890, *Nat. Pflanzenfam.*, Nachtr. 1: 279. 1897 and *Monogr. Afrik. Pflanzen-Fam.* 8: 82. 1904, *Ann. Inst. Bot.-Géol. Colon. (Used in Ayurveda and Unani. Bark juice poisonous. Antivenin, antidote for snakebites. Antifungal. Roasted seeds given in cough, seeds given to children in colic; oil from the seeds in treating burns; seed powder given internally as a mild purgative. Gum from wood mixed with maize-meal porridge and eaten to treat chest complaints. Fruit pulp mild purgative; dried powdered fruits taken orally to prevent pregnancy; fruit paste put over the forehead for migraine, also applied over an old ulcer, on boils and acne; fruit pulp given in diarrhea; fruits used as suppository for expulsion of worms. Root and fruits anthelmintics and arrow-poison antidote. Roots emetic, a decoction used to treat abdominal pains, intestinal worms, malaria, diarrhea and as an antidote for poisoning; roots paste for reducing swellings caused by insect bites. Bark infusion used to treat heartburn. Flowers and leaves for ceremonial use; seed oil used by Hindu priests in the ceremony of initiating a Hindu. Crushed stem bark and roots piscicides and molluscicide; emulsion of the fruit used as a fish poison; crushed leaves for stupefying fishes. Veterinary medicine, roots of *Indigofera trita* along with stem bark of *Balanites aegyptiacus*, stem of *Cissus quadrangularis* and *Tinospora cordifolia* pounded and the extract given in impaction.)

in English: desert date, Egyptian balsam, Egyptian myrobalan, soapberry bush, soapberry tree, thorn tree, Zachum oil tree

in Arabic: heglig, balah harara, zachun, zacon, zaqqoum

in Zambia: mubambwangoma, mulyanzovu

in India: akantaka, angaravrksa, angarvriksha, angulidala, anilantaka, baam, banchadi, bhallakiviriksha, darupar-naphala, egorca, elheglyg, gara, gara-chettu, garachetti, gari, gauritvac (Gauri, goddess of abundance; tvac, worship), gaurtvaka, gouritvac, heghelig, hingalbet, hingam, hingan, hingan-ka-per, hinganbet, hingane, hingen, hinger, hingol, hingonya, hingora, hingoriyo, hingorni, hingot, hingota, hingotia, hingotio, hingoto, hingu, hingudi, hinguputra, ingala, ingalarade, ingalare, ingaleeka, ingalike, ingalukke, ingna, ingol, ingori, ingoria, ingorio, ingoriyo, ingoriyu, ingua, inguda, ingudam, ingulada mara, ingudi, ingudi-vraksha, ingudivrikshaha, ingul, inguni, jalajantu, kantaka, krisharaka, kroshtuphala, manchuta, meenu mara, munipadapa, namunta, nanchundan, nanchunta, nancuntan, nanjunda, nanjundan, putigandha, putranjiva, putripatra, ringri, shulari, tailabija, tanupatra, tapasadruma, tapasamudrama, tapasataru, tiktaka, tiktarnajja, toruvattu, vinashaka

in Tibet: i ngu da

Balanites glaber Mildbr. & Schlecht. (*Balanites glabra* Mildbr. & Schltr.)

Tanzania. Tree or shrub, dense, many-branched, armed with long thick sharp thorns, succulent, branches drooping, thorny twigs, greenish white sweet scented flowers in dense clusters, leaves grazed and browsed, sweet juicy ripe fruit pulp eaten, savanna, open *Commiphora*, *Acacia tortilis* and *Acacia kirkii* woodland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 163. 1913

(Fruit mildly poisonous, causing a feverish feeling, stomach-ache and diarrhea.)

in Kenya: olong'oswa

Balanites maughamii Sprague (*Balanites dawei* Sprague) (the specific name after the botanical collector Reginald Charles Fulke Maugham, 1866-x, a British Consul at Lourenço Marques (now Maputo, Mozambique), author of *Zambezia: a general description of the valley of the Zambezi River*. London 1910; see I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976)

Mozambique, Kenya, Swaziland, KwaZulu-Natal, South Africa. Tree or a shrub, straight, fluted, spreading, spines branched forked, inflorescence an axillary fascicle-like cyme, flowers scented green or greenish yellow, fruit reddish brown, spongy fibrous dark and oily mesocarp, clear yellow oil from the seed kernel, fruits and seed oil edible, closely related to *Balanites wilsoniana*

See *Bulletin of Miscellaneous Information Kew* 1913: 131–141. 1913, *Planta Medica* 46: 195–209. 1982, *South African Journal of Science* 84: 201–202. 1988, *Kew Bull.* 56(1): 37. 2001, *Journal of Ethnopharmacology* 76: 239–245. 2001, *South African Journal of Botany* 68(3): 408–410. 2002

(Stem bark extracts inhibit the malarial parasite in vitro. Roots emetic; roots and bark purgative. Fruits insecticide, antiparasitic, cough sedative. Fruit exudate fish and frog poison, molluscicidal, lethal to the freshwater snails and water fleas. Magic, ritual.)

in English: green thorn, torch fruit tree, torchwood, y-thorned torchwood

in East Africa: manduro, menduro, nulo

in Southern Africa: groendoring, iPamu, iPhambo, nnulu, nulu, uGobendlovu, umNulu, Umnunu, umNununu

in Malawi: njuyu (Chichewa, Nyanja); mpambula (Yao)

in Tanzania: mguguni, mkonga

Balanites pedicellaris Mildbr. & Schltr. (*Balanites australis* Bremek.)

Kenya. Shrub or small tree, spiny, multi-stemmed, much-branched, larger spines usually with many smaller ones,

green flowers, yellow fruits, cooked cotyledons eaten, usually along dry watercourses, flood plains, dry bushland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 162. 1913, *Ann. Transvaal Mus.* xv. 244. 1933

(Fresh fruits bitter and toxic, symptoms of poisoning by fresh fruits are thirst, dizziness and vomiting. Root infusion used for fever and diarrhea, boiled root infusion added to children's milk.)

in English: small green thorn, torchwood minor

in Kenya: elamach, ilbule, lom, lomion, sarai

in Southern Africa: kleingroendoring; uGobandlovana (Zulu)

Balanites rotundifolia (Tiegh.) Blatt. (*Agialid rotundifolia* Tiegh.; *Agialida rotundifolia* Tiegh.; *Balanites gillettii* Cufod.; *Balanites gillettii* var. *renifolia*; *Balanites orbicularis* Sprague; *Balanites patriziana* Lusina; *Balanites rotundifolius* Blatt.)

Tanzania. A spiny multi-stemmed evergreen shrub or tree, dark green stout straight thorns, oval hairy fruit, ripe orange sweet edible pulp, leaves and fruit eaten by livestock, camel and goat fodder, in dry wooded savanna and grassland

See *Revisio Generum Plantarum* 1: 103. 1891 and *Annales des Sciences Naturelles; Botanique*, série 9 4: 231. 1906, *Records of the Botanical Survey of India* 8: 109. 1919, *Ann. Bot. (Italy)* 20(1): 138. 1933

(Leaves used for eye diseases; boiled root infusion added to children's milk as a tonic; boiled root infusion used as an emetic and purgative during fever and for diarrhea. Ethnoveterinary medicine.)

in Kenya: baddan, baddana, ebei, kullan, kulum, kuusam, kuute, loma, lomion, lorn, mubadana, sarai, tirikikwa

in Tanzania: mvanga ngioma, mkonga, mvambandusi, olkwai, olongoswa, mbamba ngoma

Balanites roxburghii Planch. (*Agialid roxburghii* (Planch.) Kuntze; *Agialid roxburghii* Kuntze; *Balanites aegyptiaca* Delile var. *roxburghii* (Planch.) Duthie)

India. Shrub, armed with stout axillary spines, leaves alternate, small greenish white flowers

See *Familles des Plantes* 2: 508. 1763, *Ann. Sci. Nat., Bot.* sér. 4, 2: 258, t. 2. 1854, *Revisio Generum Plantarum* 1: 103. 1891 and *Flora of the upper Gangetic Plain*, and of the adjacent ... 1: 145. 1903, *Taxon* 28: 274–275. 1979

(Used in Ayurveda and Sidha. Fruit powder used for jaundice; fruit extract applied on the eye to cure jaundice.)

in India: dirghakanta, gaara, gara, gouritvae, hingaata, hingalat, hingaloru, hingan, hingan bet, hingane, hingoloro, ingalaarada mara, ingala, ingalada mara, ingalara, ingalare, ingaleeka, ingalika, ingalu mullu, ingalukke, inglara, ingudam, ingudi, ingudi-vraksha, ingudi-vrikshaka, ingulada

mara, ingulaka, meenu mara, nanchundan, nanchunta, nancunta, nancuntan, nancuntan pattai, nunjoondam, ringri, tailaphala, tapasataru, tapasavrksa, toruvattu

Balanites wilsoniana Dawe & Sprague (*Balanites mayumbensis* Exell; *Balanites tieghemii* A. Chev.; *Balanites wilsonianus* Dawe & Sprague)

Tropical West Africa, Uganda, Gabon. Tree, semi-deciduous, crooked or straight, sweet gum exudate, lack of spines on the flowering branches, ascending branches, spreading crown, branchlets with forked hard sharp spines, yellow-green flowers in stalked clusters, petals hairy inside, yellow drupe with strong unpleasant smell, fibrous coat surrounding hard inner stone, seed kernel edible, edible oil from seeds, elephants eat fallen fruit, leaves and fruit eaten by gorillas

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 77. 1813 and *Bot. Miss. Uganda Prot.* 14, 23, 40. 1906, *J. Linn. Soc., Bot.* 37: 506. 1906 [1904–1906 publ. 1906], *Bulletin de la Société Botanique de France* 1911 58 (Mém. 8): 145. 1912 [1911 publ. 1912], *Journal of Botany, British and Foreign* 65 (Suppl.) 1: 55. 1927

(Bark and roots piscicides, and molluscicide, acting on fresh water snails intermediate hosts of the *Schistosoma* trematode and on the free-living larval stages of this parasite. Fruits and leaves emmenagogue, anthelmintic, febrifuge, antiinflammatory. Fruit pulp toxic to the snails which carry *Bilharzia*. Emulsion of the fruit used as a fish poison. Ritual, ceremonial, puberty rites of the young women of Ashanti.)

African names: budare, nkwu-awusa, ubogho

in Benin: ugbogbo

in Central African Republic: boko, boku, gboko

in Ghana: krobo-dua

in Kenya: kivuw'a, mkonga, mtonga

in Nigeria: budare, egungun-ekun (Yoruba); ubogho (Edo)

in Tanzania: mbambangoma, mguguni, mkonga, mmera, mngalangala, mnuwili-msitu, nyakahamba, popoma

in Zaire: bukere, kombe, loho, lohole, mukele

Balanocarpus Bedd. Dipterocarpaceae

Greek *balanos* 'acorn' and *karpos* 'fruit', referring to the shape of the fruit, see *Plants of the Coast of Coromandel* 3: 7. 1811, *The Flora Sylvatica for Southern India* 236 [bis]. 1873.

Balanocarpus utilis Bedd. (*Hopea utilis* (Bedd.) Bole)

India. Perennial evergreen tree, yellowish white flowers in axillary panicles

See *Forest. Man. Bot.* 237 [bis]. 1873 and *Kew Bulletin* 146. 1951

(Used in Sidha.)

in English: black kongu

in India: kara kong, karakong, karakongu, karankongu, kong

Balanophora Forster & Forster

f. Balanophoraceae

Greek *balanos* 'acorn' and *phoros* 'bearing', referring to the pistillate inflorescence; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 99, t. 50. (Nov.) 1775, *Mémoires du Muséum d'Histoire Naturelle* 8: 429. 1822 and *Dansk Bot. Ark.* 28(1): 88–89. 1972, *Journal of Ethnopharmacology* 108(1): 59–67. 2006

Balanophora dioica R. Brown ex Royle

China. Dioecious, root parasites, scapes purple to pink, rare and vulnerable

See *Ill. Bot. Himal. Mts.* 1: 330. 1839 and Tam Pui-cheung. *Balanophoraceae*. In: Kiu Hua-shing & Ling Yeou-ruenn, eds., *Fl. Reipubl. Popularis Sin.* 24: 250–268. 1988, *Journal of Economic and Taxonomic Botany* 26(1): 103–104. 2002

(Medicinal baths to prevent and cure rheumatic and skin diseases.)

in China: lu xian cao

Balanophora fungosa J.R. Forst. & G. Forst. (*Balanophora fungosa* Forst.)

India, Vietnam. Reddish purple parasite, fleshy, fungus-like appearance of the tuber, bird lime from the tubers

See *Characteres Generum Plantarum* 99, t. 50. 1775 and *Dansk Bot. Ark.* 28(1): 93. 1972, *Fl. Malesiana* 1, 7: 764, fig. 8, 9. 1976

(Used in Sidha. Treating piles.)

in China: she gu

in India: gajapippali, nila bomb, yanai thippali

Balanophora harlandii Hook.f. (*Balania harlandii* (Hook.f.) Tiegh.; *Balanophora esquirolii* H. Léveillé; *Balanophora harlandii* var. *mutinoides* (Hayata) F.W. Xing; *Balanophora henryi* Hemsley; *Balanophora kawakamii* Valetton; *Balanophora kudoii* Yamamoto; *Balanophora lancangensis* Y.Y. Qian; *Balanophora minor* Hemsley; *Balanophora mutinoides* Hayata)

China. Dioecious, root parasites, rhizome yellowish to brownish, scapes red to yellow

See *Trans. Linn. Soc. London* 22(4): 426, pl. 75. 1859, *Journal of the Linnean Society, Botany* 26(177): 410–411, pl. 9, f. 1. 1894 and *Annales des Sciences Naturelles; Botanique, série 9* 6: 201. 1907, *Icones Bogorienses* 4: 169, pl. 351. 1913, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 3: 168–169, pl. 31. 1913, *Annual*

Reports of the Taihoku Botanic Garden 1: 95. 1931, *Bulletin of Botanical Research* 12(4): 381. 1992

(Medicinal baths to prevent and cure rheumatic and skin diseases.)

in China: ge jun

Balanophora involucrata Hook.f. (*Balanophora involucrata* Hook.f. & Thomson; *Balanophora involucrata* var. *cathcartii* Hook.f.; *Balanophora involucrata* var. *flava* Hook.f.; *Balanophora involucrata* var. *gracilis* Hook.f.; *Balanophora involucrata* var. *rubra* Hook.f.)

China, temperate Himalayas, Sikkim. Dioecious, root parasites, erect, fleshy, large woody knots, scapes yellow to orange

See *Trans. Linn. Soc.* 22: 30 & 44, t. 4–7. 1856, *Fl. Brit. Ind.* 5: 237. 1886 and *Illustr. W. Himal. Flow. Pl.* 14, fig. 22. 1963, *Dansk. Bot. Ark.* 28(1): 152–155. fig. 41. 1972

(Medicinal baths to prevent and cure rheumatic and skin diseases.)

in China: hong jun

Baliospermum Blume Euphorbiaceae

From the Greek *balios* ‘spotted’ and *sperma* ‘seed’, the seeds are spotted, see *Bijdr. Fl. Ned. Ind.* 12: 603. 1826 and *Kew Bulletin* 36: 267. 1981, *Bull. Bot. Surv. India* 32(1–4): 9. 1990 (publ. 1992), *Ann. Missouri Bot. Gard.* 81: 108. 1994, *Gen. Euphorb.*: 306. 2001, *Fl. Thailand* 8, 1: 120. 2005.

Baliospermum calycinum Müll.Arg. (*Baliospermum calycinum* var. *corymbiferum* (Hook.f.) Chakrab. & N.P. Balakr.; *Baliospermum calycinum* var. *densiflorum* (D.G. Long) Chakrab. & N.P. Balakr.; *Baliospermum calycinum* var. *effusum* (Pax & K. Hoffm.) Chakrab. & N.P. Balakr.; *Baliospermum calycinum* var. *micranthum* (Müll.Arg.) Chakrab. & N.P. Balakr.; *Baliospermum calycinum* var. *siamense* (Craib) Chakrab. & N.P. Balakr.; *Baliospermum corymbiferum* Hook.f.; *Baliospermum densiflorum* D.G. Long; *Baliospermum effusum* Pax & K. Hoffm.; *Baliospermum meeboldii* Pax & K. Hoffm.; *Baliospermum micranthum* Müll.Arg.; *Baliospermum siamense* Craib; *Baliospermum suffruticosum* Pax & K. Hoffm.)

Nepal, China, Thailand. Shrub, dioecious, flowers pale green to green-yellow, erect fruits

See *Flora* 47: 470. 1864, *Linnaea* 34: 215–216. 1865, *The Flora of British India* 5: 463. 1888 and *Bulletin of Miscellaneous Information Kew* 1911: 467. 1911, *Das Pflanzenreich* 52(IV. 147. IV): 27, f. 7. 1912, *Das Pflanzenreich* 63(IV. 147. VII): 414. 1914, *Kew Bulletin* 26: 222–223. 1972, *Notes from the Royal Botanic Garden, Edinburgh* 44: 171. 1986, *Bulletin of the Botanical Survey of India* 32(1–4): 13, 15–16, 22. 1990

(Used in Ayurveda.)

in China: yun nan ban zi mu

in India: naagadanti, nagadanti

in Thailand: plao tong taek

Baliospermum calycinum Müll.Arg. var. *sinuatum* (Müll. Arg.) Chakrab. & N.P. Balakr. (*Baliospermum sinuatum* Müll. Arg.)

India, Arunachal Pradesh.

See *Flora* 47: 470. 1864 and *Bull. Bot. Surv. India* 32: 24. 1990 [1992]

(Used in Ayurveda.)

in India: danti

Baliospermum solanifolium (Burm.) Suresh (*Baliospermum angulare* Decne. ex Baill.; *Baliospermum axillare* Blume; *Baliospermum indicum* Decne.; *Baliospermum montanum* Müll. Arg.; *Baliospermum montanum* (Willd.) Müll. Arg.; *Baliospermum moritzianum* Baill.; *Baliospermum pendulinum* Pax; *Baliospermum polyandrum* (Roxb.) Kew. 2000 [as *Baliospermum montanum*.], *Ethnobotany* 16: 52–58. 2004, *FoC* 11: 277. 2008

(Used in Ayurveda, Sidha and Unani. Oil from the seeds and leaves irritant when touching the skin. Plant juice applied on cuts to check bleeding caused by knife, axe; plants crushed and boiled in water and its bath taken to cure rheumatism. Root, leaves, seed and seed oil used in the form of powder, seed and oil to treat piles, wound, conjunctivitis, anemia, jaundice, skin diseases. Dried root in jaundice and splenomegaly; fresh root paste taken internally as an antidote to food poison, and in dropsy and jaundice; freshly crushed root juice to stop vomiting. Leaves purgative, antiasthmatic; leaves decoction used in asthma; decoction bath taken for scabies; leaf juice applied to forehead in headache. Latex for bodyache and pain of joints. Branches used as toothbrush to relieve the toothache. Seeds drastic purgative, used as a substitute for *Croton tiglium* L., in large doses act as narcotic poison; seed paste used in rheumatism, snakebite. Doctrine of Signatures, against snakebite, *Baliospermum montanum* seeds powdered, mixed in boiled water and then drunk.)

in English: castor oil plant

in Bangladesh: tungkramon

in India: anukheti, anukula, appaiccevakacceti, appaiccevakam, artagala, banbhathi, bedanjure khatai, bhadra, bukumbo, cimai amanakku, cimaiyamanakku, dantan, dante, danthi, danti (dant, tooth), danti lambi waali, danti mool, dantika, dantimool, dantimool asli, dantimul, dantt, dati (dat, tooth), dhantimool, donti, dravanti, dumajoda, dumbo joda, erandapatri, erandaphala, erandphalaa, erradundiga, ettadundiga, gunapriya, habbussalatine-barri, habbussalatine-sahrai, hakni, hakum, hakun, hakuna, harital, ilantanamanakku, iran-cani, jamal ghoti, jamalghota, jamalgota, jangli jamaalgota, jangli jamalghota, jangli-jamalgota, jarinata, jaupli, jayapala, kaadu haralu, kaduharalu, kakubha, kanaka pata, kanakapaata, kanakapata, kanniyucari, kanniyucaricceti, katalavanakku, kattamanakku, kattamanakku, kondamudamu, kumbhachitra, kumbhi, kumpam kurantaka, madhupushpa, makulaka, maku-naka, maniyamanakku, maniyamanakkucceti, mukulaka, naaga danti, naagadanthi, naga danti, nagadandi, nagadanthi beru, nagadanti, nagadanti beru, nagadhanthi, nagasphota, nagavinna, nagdanti, nakadanti, nakatanti, neelajidi, neeradimuthu, nela jidi, nelajidi, nepala, nepalam, nervalam, nikumba, nikumbha, nikumbhah, nikumbhi, nir adimuttu, niradimuttu, niratimuttu, nirettimuttu, nirvetti, nishalya, nishkumbha, parankiyamanakku, pey amanakku, peyamanakku, phan-thap, pratyak-shreni, pratyakparni, pratyaksreni, raktadanti, rechani, ruksha, sapdi, shighra, shighraa, shimai-amanakku, shwetaghanta, shyenaghanta, sighra, tanti, taruni, timalai, turuvati, udumbarparni, upachitra, upakulya, varah-angi, vishaalya, vishalya, vishodhini

(Roots and fruits tonic, root used as a remedy for diarrhea; bark juice in urinary troubles, irritation in the bladder and gonorrhoea. The bark, powdered or fresh, to treat wounds; various parts of the tree used in the treatment of syphilis, spleen trouble, eyeache and stomachache.)

in English: mallow-leaved ross berry, mallow raisin, round leaf grewia

in Kenya: lpupoi

in Pakistan: dhohan, insarra, jalidar, kashkasri, pastuwanne

Balsamorhiza Hook. ex Nutt. Asteraceae

Greek *balsamon* 'balsam' and *rhiza* 'root', fleshy taproot with sticky sap, see *Transactions of the American Philosophical Society*, new series, 7: 349–351. 1840 and *A Manual of the Flowering Plants of California ...* 1077. 1925, *Annals of the Missouri Botanical Garden* 22(1): 115. 1935, *American Midland Naturalist* 35: 416. 1946, *Phytologia* 85(1): 19. 1998[1999].

Balsamorhiza deltoidea Nutt. (*Balsamorhiza glabrescens* Benth.)

North America. Perennial

See *Transactions of the American Philosophical Society*, new series, 7: 351. 1840, *Plantas Hartwegianas imprimis Mexicanas* 317. 1849

(Roots decoction for colds, coughing.)

in English: deltoid balsamroot

Balsamorhiza hookeri Nutt. (*Balsamorhiza balsamorhiza* (Hook.) A. Heller; *Balsamorhiza hirsuta* Nutt.; *Balsamorhiza hirsuta* var. *lagocephala* W.M. Sharp; *Balsamorhiza hirsuta* var. *neglecta* W.M. Sharp; *Balsamorhiza hookeri* var. *hirsuta* (Nutt.) A. Nelson; *Balsamorhiza hookeri* var. *lagocephala* (W.M. Sharp) Cronquist; *Balsamorhiza hookeri* var. *neglecta* (W.M. Sharp) Cronquist; *Balsamorhiza hookeri* var.

platylepis (W.M. Sharp) Cronquist; *Balsamorhiza macrolepis* var. *platylepis* (W.M. Sharp) R.S. Ferris; *Balsamorhiza platylepis* W.M. Sharp; *Heliopsis balsamorhiza* Hook.)

North America. Perennial

See *Flora Boreali-Americana* 1(6): 310. 1833, *Transactions of the American Philosophical Society*, new series, 7: 349–350. 1840, *Catalogue of North American Plants North of Mexico* 7. 1898 and *New Manual of Botany of the Central Rocky Mountains* 546. 1909, *Annals of the Missouri Botanical Garden* 22(1): 131–132, 139. 1935, *Vascular Plants of the Pacific Northwest* 5: 103. 1955, *Contributions from the Dudley Herbarium* 5(4): 99. 1958, *Intermountain Flora* 5: 20. 1994

(Root decoction stomachic, for female complaints, for bladder troubles.)

in English: hairy balsamroot, Hooker's balsamroot

Balsamorhiza incana Nutt.

North America. Perennial, roots eaten raw

See *Transactions of the American Philosophical Society*, new series, 7: 350. 1840

(Analgesic, for stomach pains, colds, headaches.)

in English: hoary balsamroot

Balsamorhiza sagittata (Pursh) Nuttall (*Balsamorhiza helianthoides* (Nutt.) Nutt.; *Bupthalmum sagittatum* Pursh; *Espeletia helianthoides* Nutt.; *Espeletia sagittata* (Pursh) Nutt.)

North America. Perennial

See *Flora Americae Septentrionalis*; or, ... 2: 564. 1814[1813], *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 38–39. 1834, *Transactions of the American Philosophical Society*, new series, 7: 350–351. 1840

(Seeds eaten for dysentery, analgesic, sedative, febrifuge, disinfectant. Leaves poultice for swellings or burns. Roots infusion drunk for tuberculosis, whooping cough, to increase urinary flow; chewed roots applied to sore mouth and throat, syphilitic sores, blisters and sores, toothaches; root decoction taken to ensure easy delivery.)

in English: arrowleaf balsam-root, arrowleaf balsamroot, balsam-root

Bambusa Schreb. Poaceae (Gramineae)

From the Malayan native name; see *Familles des Plantes* 2: 244. 1763, *Observationes Botanicae* 5: 24. 1788, Johann Christian Daniel von Schreber (1739–1810), *Genera Plantarum*. 236, 828. 1789, *Obs. Bot.* 5: 24. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 579. 1791, *Species Plantarum. in Myanmar: pai bong

in Thailand: phai bong

Bambusa oliveriana Gamble

India, Myanmar. Tufted, strong, thick-walled, small leaves, edible shoots, non-invasive

See *Annals of the Royal Botanic Garden, Calcutta*. 7: 130. 1896, *Fl. Brit. India* 7: 392. 1896

(Tonic.)

in English: bush bamboo, bushy bamboo

in India: warak

in Myanmar: wa pyu san, wap gu san

Bambusa pallida Munro (*Arundarbor pallida* (Munro) Kuntze; *Bambusa critica* Kurz)

NE India, Bhutan, China, Myanmar, Thailand. Caespitose, growing in thick clumps, young culms pruinose, used for house building and screens, cultivated, hills and plains, open areas

See *Transactions of the Linnean Society of London* 26(1): 97. 1868, *Revisio Generum Plantarum* 2: 761. 1891

(Green peel removed and applied on cuttings and injuries.)

in India: bakhal, bijli, nijuli bah, bongshing, burwal, hoss-ae, jowa, ka-sken, kalinga, loto, makal, pashipo, pshi, pushee, seskien, shen, skhen, tesero, teusng, tneng, toung, usken, walkthai, watai, wathai, watoi

in Thailand: phai phio, phai phiu

Bambusa pervariabilis McClure

Southern China, Guangxi, Guangdong. Strong and straight culms, young culms pruinose with white deciduous pubescence, clumps unicaespitose, related to *Bambusa tuldoidea* Munro

See *Lingnan University Science Bulletin* 9: 13. 1940, *Journal of Bamboo Research* 4(2): 9–10, f. 1. 1985

(Shavings of culm-cortex used for treating febrile diseases and hematuria.)

in English: punting pole bamboo

in China: cheng gao zhu

Bambusa textilis McClure

China, Guangdong, Guangxi. Straight, clumps unicaespitose, culms with nodding or slightly pendulous tips, culm top bending

See *Lingnan University Science Bulletin* 9: 14. 1940

(From the culm-internodes collected tabasheer (*Concretio Silicea Bambusae Textilis*, note that the fully natural product is rare), siliceous secretions used for the treatment of childhood convulsions.)

in English: weaver's bamboo

in China: zhu huang, zhu huang jing, tian zhu huang (all names for tabasheer)

in Japanese: tenjikuo

in Korean: ch'onhwabun

Bambusa tulda Roxb. (*Bambusa lixin* Hsueh & T.P. Yi; *Bambusa tulda* Benth.; *Dendrocalamus tulda* (Roxb.) Voigt; *Dendrocalamus tulda* Voigt)

Tropical Asia, India, Bangladesh to Burma and Thailand, Nepal, Bhutan, China. Sympodial, evergreen or deciduous, pruinose, caespitose, usually erect to ascending, spineless, walls very thick, normally flowers gregariously, more or less edible succulent shoots taste slightly bitter, leaves as animal fodder

See *Hortus Bengalensis, or a catalogue ...* 25. 1814, *Fl. Ind.* (Carey edn.) 2: 193. 1832 [*Flora Indica*; or, descriptions of Indian Plants 2: 193. 1832], *Hortus Suburbanus Calcuttensis* 718. 1845, *Fl. in Cambodia: russèi kaèw

in China: long tou zhu

in India: bakal, banh, bannada bidiru, basini bans, basinibans, davike, haladi bidiru, jai-baruwa, kalaka, ponmungil, seemamula, sunderkania bansa

in Indonesia: bambu ampel (green culms), bambu blenduk, bambu kuning (yellow culms), domar, haur

in Japan: dai-san-chiku, daisan-chiku, kinshi-chiku (green stripes on the yellowish culm)

in Laos: s'a:ng kh'am'

Malayan names: aur beting, aur gading, bambu kuning, buloh aur, buloh gading, buloh kuning, buloh minyak, buloh minyak has, buloh pau, buluh aur, buluh minyak, buluh pau, tamalang, tamalang silau, tambalang, tamelang

in Philippines: bolinao, bolinau, burirau, butong, kabaloan, kauayan, kauayan-china, kauayan-kiling, kauayan-kiting, kawayan, kawayang-china, kawayang-kiling, kawayang-kiting, kawayang-tsina, kiling, labong (bamboo shoots), limas, lunas, maribal, marobal, patong, patung, sinambang, sinamgang, taiu-anak, taring, teuanak, tewanak, tiling, yellow bamboo

in Thailand: chan kham, mai-luang, phai cheen, phai chin, phai-luang, phai lueang, phai-ngachang, rai yai, ree sai, ri sai

in Vietnam: phai-bongkham, tre m[owx], tre tr[owf]

in Pacific: kaho palangi, kaho papalangi

in New Guinea: mambu kakar

Banara Aubl. Salicaceae (Flacourtiaceae)

See *Syst. Nat.*, ed. 10. 2: 1068, 1074, 1373. 1759, *Mant. Pl. Altera* 153. 1771, *Hist. Pl. Guiane* 1: 547–549, t. 217. 1775, *Prodr. Pl. Ind. Occid.* (Hamilton) xv (41). 1825.

Banara arguta Briq. (*Banara amazonica* Sleumer; *Banara fagifolia* Vahl, nom. illeg.; *Banara glabrata* Sleumer;

(Alkaloids.)

Banisteriopsis C. Robinson Malpighiaceae

Resembling *Banisteria* L., dedicated to Rev. John Banister, 1650–1692 (Virginia, USA), British (b. Glos) missionary and botanist, naturalist, Anglican minister, plant collector for R. Morison, correspondent of Leonard Plukenet (1642–1706) and M. Lister; see John Ray, *Historiae plantarum* tomus tertius. London 1704, *Species Plantarum* 1: 427–428. 1753, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 55–57. London 1790, *Linnaea* 13: 201. 1839 and *Index Lectionum in Lyceo Regio Hosiano Brunsbergensi: Banisteria* 12. 1901, *North American Flora* 25(2): 131. 1910, James Britten, *The Sloane Herbarium* ... revised and edited by J.E. Dandy. 84–87. London 1958, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 125–126. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 117. 1965, Joseph Ewan, in *D.S.B.* 1: 431–432. New York 1981, *Fl. Neotrop.* 30: 1–238. 1982.

Banisteriopsis caapi (Spruce ex Griseb.) C.V. Morton (*Banisteria caapi* Spruce ex Griseb.; *Banisteria inebrians* (C.V. Morton) J.F. Macbr.; *Banisteria quitensis* Nied.; *Banisteriopsis inebrians* C.V. Morton; *Banisteriopsis quitensis* (Nied.) C.V. Morton)

Bolivia, Peru, Ecuador, Colombia, Brazil. Large woody liana, leaves opposite, flowers yellow or pink, fruit a samara, seeds wind-dispersed, in primary forest

See *Flora Brasiliensis* 12(1): 43. 1858 and *Index Lectionum in Lyceo Regio Hosiano Brunsbergensi: Banisteria* 12. 1901, *North American Flora* 25(2): 131. 1910, *Journal of the Washington Academy of Sciences* 21(20): 486. 1931, *Field Mus. Nat. Hist., Bot. Ser.* 13(3/3): 781–871. 1950

(Ayahuasca, hallucinogenic, for healing and spiritual exploration.)

in English: soul vine, spirit vine

in Brazil: aiahuasca, caapi, cabi, cagahuasca, capi, iagê, iagê, iagi

in Colombia: yagé, yajé

in Peru: añushi-ayahuasca, árbol de viento, aya huasca, ayac huasca, ayahuasca, ayahuasca-caapi-yajé, ayawasca, bejuco bravo, borrachera, caapi, cadana, capi, cayapi, honii, huni, huyac huasca, ijona, iyona, jayavasca, kamalampi, kamarane, lluasca, mado, mado bidada, natema, natemoni, nepe, nepi, nishi, ñucñu huasca, nucñu huasca, oni, onñaanhon, punga huasca, rambi, rami, ramunu, same, shuri, sogá del muerto, sogé del muerto, undi, yagé, yagé del monte, zoroopsi

Banisteriopsis longialata (Ruiz ex Nied.) B. Gates (*Banisteria bopiana* Rusby; *Banisteria longialata* Ruiz ex Nied.; *Banisteriopsis longialata* (Nied.) B. Gates; *Banisteria rusbyana* Nied.; *Banisteriopsis rusbyana* (Nied.) Morton; *Diplopterys longialata* (Nied.) W.R. Anderson & C. Davis; *Diplopterys longialata* (Ruiz ex Nied.) W.R. Anderson & C. Cav. Davis; *Heteropterys bopiana* (Rusby) Nied.)

Peru.

See *Banisteria* 1: 18–19. 1900 [Jul 1900] [*Index Lectionum in Lyceo Regio Hosiano Brunsbergensi...: de genere Banisteria.*], *Memoirs of the New York Botanical Garden* 7: 274. 1927, *Das Pflanzenreich* 4(141): 377. 1928, *Journal of the Washington Academy of Sciences* 21: 486. 1937, *Flora Neotropica* 30: 195. 1982, *Harvard Papers in Botany* 11(1): 10. 2006

(Narcotic, hallucinogenic, one of the admixtures of the Ayahuasca drink is the leaf of *Banisteriopsis rusbyana*.)

in South America: oco-yajé

Baphia Afzel. ex Lodd. Fabaceae (Leguminosae, Papilionoideae)

The name based on the Greek word *baphe* 'a dye', referring to the red dye given by the heartwood of *Baphia nitida* Lodd.,

see *Botanical Cabinet*; consisting of coloured delineations . . . t. 367. 1820, *Annales des Sciences Naturelles* (Paris) 9: 406. 1826, *J. Linn. Soc., Bot.* 25: 294–350. 1889 and *Adansonia*, n.s. 12(1): 137–154. 1972, *Kew Bull.* 40(2): 291–386. 1985.

Baphia capparidifolia Baker (*Baphia pyrifolia* (Desv.) Baill.; *Baphia pyrifolia* Baill.; *Delaria pyrifolia* Desv.)

Guinea, Tanzania, Zambia, Madagascar. Climbing or scrambling shrub, liana, white-yellowish flowers

See *Annales des Sciences Naturelles* (Paris) 9: 406. 1826, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(56): 445. 1885, *Journal of the Linnean Society, Botany* 25: 311. 1889

(Leaves to treat fever, and are given to pregnant women when the foetus develops too slowly.)

Baphia kirkii Baker (*Baphia cordifolia* Harms)

Tropical Africa, Tanzania. Tree or shrub, red gum, many-branched, drooping branches, white scented flowers

See *Flora of Tropical Africa* [Oliver et al.] 2: 250. 1871

(A root decoction drunk to treat epilepsy.)

in English: baphia, camwood

in Tanzania: mkuluti, mkuruti

Baphia nitida Afzel. ex Lodd. (*Baphia nitida* Lodd.; *Carpolobia versicolor* G. Don)

Tropical Africa, Nigeria. Small tree or shrub, many-stemmed, erect, slender, climbing, lianescent, sprawling and arching, white sweetly fragrant flowers, seeds are eaten, leaves as fodder, the heartwood and roots yield a red dye

See *Botanical Cabinet*; consisting of coloured delineations . . . [Edited by Loddiges] t. 367. 1820, *Gen. Hist.* 1: 370. 1831 and *Monographs in Systematic Botany from the Missouri Botanical Garden* 9: 1–163. 1985, *Phytotherapy Research* 5(6): 254–257. 1991, *Phytotherapy Research* 6(3): 129–132. 1992, *Journal of Ethnopharmacology* 46(2): 121–124. 1995, *Tropical Science* 40: 159–161. 2000

(Roots, leaves and stem for inflammation and skin infections. Leaves analgesic, antiinflammatory, astringent, antidiarrheal, for waist pain, sprains, skin diseases, dislocation; leaf sap applied as eye drops against jaundice; leaf infusion drunk to cure enteritis and gastrointestinal problems. Leaves and bark hemostatic, antiinflammatory, used for healing sores and wounds. A decoction of the bark drunk against epilepsy. Ceremonial, magic, rituals, ritual dances, religious ceremonies, ceremonial masks, body paint, magic powers; in some regions the tree is considered sacred, to protect against evil spirits and to attract benevolent ones.)

in English: barwood, camwood, Sanderswood

in Cameroon: serrené

in Ghana: odwen, odwene, odzori, senema

in Ivory Coast: ekuro, eseme, essin, okoue, tre

in Nigeria: okoria, owiwi, ubara, ufie, uhie, ukpa; irosun (Yoruba); otua (Edo); orosun (Itsekiri); arhua (Urhobo); abodi (Ijaw); aboshi (Igbo); ubara (Efik); oshie (Boki)

in Yoruba: igiosun, irosun, awewi, owiwi, arase, ajolawo irosun

Baphia pubescens Hook.f. (*Baphia bancoensis* Aubrév.)

Congo. Shrub or tree, scented creamy flowers

See *Niger Fl.* [W.J. Hooker]. 320. 1849 and *Bull. Soc. Bot. France* 82: 602. 1936 [1935 publ. 1936]

(Ground root bark taken against asthma. Leaves decoction taken against jaundice and diabetes. Bark and leaves to treat constipation.)

in English: Benin camwood

in Nigeria: majigi (Hausa); awewi (Yoruba); ositua (Edo); aboshi (Igbo)

in Yoruba: awebi

Baphicacanthus Bremek. Acanthaceae

Greek *baphe* ‘a dye, a dipping’, *baphikos* ‘the art of dyeing’ and *akantha*, *akanthes* ‘thorn’, referring to the nature of the plant, see *Genera Plantarum* 102–103. 1789, *Plantae Asiaticae Rariores* (Wallich). 3: 75, 87. 1832 and *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2. 41(1): 59, 190. 1944.

Baphicacanthus cusia (Nees) Bremekamp (*Goldfussia cusia* Nees; *Strobilanthes cusia* (Nees) J.B. Imlay; *Strobilanthes cusia* Kuntze; *Strobilanthes flaccidifolia* Nees)

SE Asia, China, Thailand. Shrub or subshrub, often in *Strobilanthes*

See *Bijdragen tot de flora van Nederlandsch Indië* 781, 796. 1826, *Plantae Asiaticae Rariores* 3: 88. 1832, *Prodr.* (DC.) 11:194. 1847, *Revis. Gen. Pl.* 2: 499. 1891 and *Bull. Misc. Inform. Kew* 1939: 115. 1939, *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2. 41(1): 190. 1944, *Edinburgh J. Bot.* 51: 223. 1944, Honda, G. and Tabata, M. “Isolation of antifungal principle tryptanthrin, from *Strobilanthes cusia* O. Kuntze.” *Planta Medica* 36(1): 85–86. 1979, *CIS Chromosome Information Service* 54: 3–5. 1993, Li L. et al. “[Chemical studies of *Strobilanthes cusia*].” *Yao Xue Xue Bao*. 28(3): 238–40. 1993, *Edinburgh J. Bot.* 51: 216, 223. 1994, *Ethnobotany* 10: 127–129. 1998, *Ethnobotany* 14: 43–46. 2002

(Fresh juice from the leaves used for athlete’s foot. Rhizome and root febrifuge, to remove toxic heat and reduce swelling, to reduce heat in blood and to relieve convulsions, for infantile convulsions due to high fever, epidemic febrile disease with eruption, erysipelas, influenza, encephalitis; root bark decoction taken as soup to cure hepatitis and malaria. Roots and leaves to treat eruptions, snakebite, fever and headache,

influenza, sore throat, tonsillitis, conjunctivitis, pyogenic infection. Veterinary medicine, whole plant to treat domestic animals suffering from poisoning.)

in English: southern ban lan gen

in China: banlangen, ma lan gen, nan ban lan gen

in Thailand: naw ceh

Baptisia Vent. Fabaceae (Thermopsidae)

Greek *bapto*, *baptein* 'to dip, to dip in dye, colour', *baptos* 'dipped, dyed, bright-coloured', see *Ann. Missouri Bot. Gard.* 27(2): 119–258. 1940, *Mem. New York Bot. Gard.* 25(3): 1–264. 1981.

Baptisia alba (L.) Vent. (*Baptisia alba* var. *macrophylla* (Larisey) Isely; *Baptisia albescens* Small; *Baptisia albiglora* Raf.; *Baptisia lactea* (Raf.) Thieret; *Baptisia leucantha* Torr. & A. Gray; *Baptisia leucantha* var. *divaricata* Larisey; *Baptisia leucantha* var. *pauciflora* Larisey; *Baptisia pendula* Larisey; *Baptisia pendula* var. *macrophylla* Larisey; *Baptisia psammophila* Larisey; *Crotalaria alba* L.; *Dolichos lacteus* Raf.; *Podalyria alba* (L.) Willd.; *Podalyria alba* Sims, nom. illeg., non *Podalyria alba* (L.) Willd.; *Sophora alba* (L.) L.)

North America. Perennial non-climbing herb, long-lived, bushy, stout deep taproot, stout central stem, upright white flower spikes, no floral scent, large oblong seed pods, worker bumblebees pollinate the flowers, adult weevils eat both the leaves and flowers

See *Species Plantarum* 2: 725. 1753, *Species Plantarum*. Editio quarta 2: 492, 501. 1799, *Botanical Magazine* pl. 1177. 1808, *Decas Generum Novorum* 9. 1808, *Florula Ludoviciana*, or, a flora of the state of ... 103. 1817, *A Flora of North America*: containing ... 1(3): 385. 1840 and Hansen, A.A. "Indiana plants injurious to livestock." *Purdue Univ. Agric. Ext. Stn. Circ.*, 175. 1930, *Sida* 3(6): 446. 1969, *Sida* 11(4): 435. 1986

(Homeopathy. If cattle, horses, or other kinds of livestock consume sufficient quantities of this plant, they can be seriously poisoned; the plant contains toxic alkaloids that have caused poisoning in cattle. Potentially poisonous to humans. Roots and leaves poultice applied to swellings, piles, rattlesnakebite; roots decoction taken for rheumatism, catarrh.)

in English: baptisia, clover broom, horsefly weed, indigo broom, largeleaf wild indigo, prairie indigo, rattlebush, shoofly, white false indigo, white indigo, white prairie wild indigo, white wild indigo, wild false indigo, wild indigo, yellow indigo

Baptisia australis (L.) R. Br. (*Baptisia australis* (L.) R. Br. ex Ait. f.; *Baptisia australis* Hort. ex Lehmann; *Baptisia australis* var. *australis*; *Baptisia caerulea* Eaton & Wright; *Baptisia confusa* Sweet ex G. Don; *Baptisia confusa* G. Don; *Baptisia exaltata* Sweet; *Baptisia minor* var. *aberrans*

Larisey; *Baptisia versicolor* Lodd.; *Podalyria australis* (L.) Willd.; *Podalyria coerulea* Michx.; *Podalyria coerulea* (Trew) Michx.; *Ripasia caerulea* (Trew) Raf.; *Sophora australis* L.; *Sophora caerulea* Trew)

North America. Perennial non-climbing herb, blue flowers

See *Systema Naturae*, ed. 12 2: 287. 1767, *Species Plantarum*. Editio quarta 2(1): 503. 1799, *Flora Boreali-Americana* 1: 264. 1803, *Hortus Kewensis*; or, a catalogue ... The second edition 3: 6. 1811, *The British Flower Garden*, ... 1: pl. 97. 1825, *Botanical Cabinet*; consisting of coloured delineations . . . 12: pl. 1144. 1826, *Nov. Act. Nat. Cur.* 14: 803. 1829, *A General History of the Dichlamydeous Plants* 2: 113. 1832, *New Flora and Botany of North America* ... 2: 48. 1836[1837], *A Manual of Botany* 154. 1840 and *Annals of the Missouri Botanical Garden* 27(2): 206. 1940, *Brittonia* 19(1): 42–61. 1967, *Phytologia* 76(5): 383. 1994

(Purgative, emetic, antiinflammatory, for toothache.)

in English: baptisia, blue false indigo, blue indigo, blue wild indigo, false indigo, plains baptisia, rattlebush, wild indigo

Baptisia bracteata Muhl. ex Elliott var. ***glabrescens*** (Larisey) Isely (*Baptisia leucophaea* Nutt.; *Baptisia leucophaea* var. *glabrescens* Larisey; *Lasinia bracteata* Raf.)

North America. Perennial non-climbing herb, corolla yellow

See *A Sketch of the Botany of South-Carolina and Georgia* 1(5): 469. 1817, *The Genera of North American Plants* 1: 282. 1818, *New Flora and Botany of North America* ... 2: 48, 50. 1836[1837] and *Annals of the Missouri Botanical Garden* 27(2): 161, pl. 21, f. 1. 1940, *Brittonia* 30(4): 470. 1978, *Phytologia* 71(4): 276. 1991

(Antispasmodic, stomachic.)

in English: cream false indigo, cream-colored indigo, long-bract wild indigo, long-bracted wild indigo, plains wild indigo, white wild indigo

Baptisia tinctoria (L.) Vent. (*Baptisia gibbesii* Small; *Baptisia tinctoria* (L.) R. Br. ex Ait. f.; *Baptisia tinctoria* (L.) R. Br., nom. illeg., non *Baptisia tinctoria* (L.) Vent.; *Baptisia tinctoria* var. *crebra* Fernald; *Baptisia tinctoria* var. *gibbesii* (Small) Fernald; *Baptisia tinctoria* var. *projecta* Fernald; *Podalyria tinctoria* (L.) Willd.; *Podalyria tinctoria* (L.) Michx., nom. illeg.; *Podalyria tinctoria* Lam.; *Podalyria tinctoria* (L.) Lam.; *Sophora tinctoria* L.)

North America. Perennial non-climbing herb, much-branched, erect, elongated terminal clusters of yellow pea-like flowers, a larval host and/or nectar source for Frosted Elfin (*Callophrys irus*) and Wild Indigo Duskywing (*Erynnis baptisiae*)

See *Species Plantarum* 1: 373. 1753, *Tabl. Encycl.* 2(2): 471 (t. 327). 1797, *Species Plantarum* 2(1): 492, 501, 503. 1799, *Flora Boreali-Americana* 1: 265. 1803, *Decas Generum Novorum* 9. 1808, *Hortus Kewensis*; or, a catalogue ... The second edition 3: 6. 1811 and *Flora of the Southeastern*

United States 599, 1331. 1903, *Rhodora* 38(456): 424. 1936, *Rhodora* 39(466): 414–415. 1937, *Annals of the Missouri Botanical Garden* 27(2): 119–244. 1940

(Toxic, poisonous in large quantities, caution is advised in the internal use of this plant. Antibacterial, antihemorrhagic, antiseptic, astringent, acrid, bitter, homeopathy, cholagogue, toothache remedy, emetic, antiemetic, stomachic, cathartic, immune-stimulant, tonic, alterative, febrifuge, laxative, purgative, antiinflammatory, stimulant. Plant infusion for liver complaints and gonorrhoea, cold tea to stop vomiting. Roots for kidney troubles, gonorrhoea, infections of the chest, gastro-intestinal tract, tonsillitis, pharyngitis, treatment of upper respiratory infections; infusion an antiseptic wash for ulcers, bruises, gangrenous sores, wounds, cuts, skin complaints; decoction of roots rubbed on the arms and legs for cramps, sprains.)

in English: baptisia, clover broom, false indigo, horsefly weed, indigo broom, rattlebush, rattleweed, shoofly, wild false indigo, wild indigo, yellow indigo

in Brazil: anil-bravo, anil-selvagem

Barbarea W.T. Aiton Brassicaceae (Cruciferae)

The genus was dedicated to Saint Barbara (2nd–4th century), patron of artillerymen and miners, early Christian martyr; see William Townsend Aiton (1766–1849), *Hortus Kewensis*; or, a catalogue ... The second edition 4: 109. 1812 and *Can. J. Plant Sci.* 71: 149–166. 1991.

Barbarea australis Hook.f. (*Barbarea australis* Jord.)

New Zealand, Australia, New South Wales, Victoria, Tasmania. Erect annual or short-lived perennial herb, yellow sepals, siliqua beakless and dehiscent, highly palatable, endangered Tasmanian endemic

See *Ann. Soc. Linn. Lyon sér. 2, 7*: 471. 1861

(Leaves antiscorbutic.)

in English: Austral winter-cress, native winter cress

Barbarea verna (Miller) Aschers. (*Barbarea praecox* (Sm.) R.Br.; *Barbarea praecox* (Sm.) W.T. Aiton; *Campe verna* (Mill.) A. Heller; *Erysimum praecox* Smith; *Erysimum vernum* Miller)

North America, S.W. Europe. Biennial, perennial, vegetable

See *The Gardeners Dictionary*: ... eighth edition *Erysimum* no. 3. 1768, *Hortus Kew.* (W.T. Aiton), ed. 2. 4: 109. 1812, *Flora der Provinz Brandenburg* 1: 36. 1860 and *Muhlenbergia*; a journal of botany 7(11): 124. 1911[1912]

(Decongestant, antiscorbutic.)

in English: American cress, belle isle cress, cress, early winter cress, early yellow-rocket, early yellowrocket, land cress, Normandy cress, peppergrass, scurvy grass, upland cress, upland winter cress, winter cress

in South Africa: waterkerwel

Barbarea vulgaris W.T. Aiton (*Barbarea arcuata* (Opiz ex C. Presl & J. Presl) Rchb.; *Barbarea arcuata* (Opiz ex J. Presl & C. (Extracts of the aerial parts used for their antiinflammatory effects, antioxidant, radical scavenging activity, and to also reduce rheumatic pains, migraine and headache.)

Barleria L. Acanthaceae

The genus was named to honor the French botanist Jacques Barrelier [Jacobus Barrelierus], 1606–1673, physician, Dominican monk, traveller, author of *Plantae per Galliam, Hispaniam et Italiam observata ... Opus posthumum, editum cura et studio Antonio de Jussieu, medici. Paris 1714*; see Carl Linnaeus, *Species Plantarum*. 2: 636–637. 1753, *Genera Plantarum*. Ed. 5. 283. 1754 and *Bulletin de la Société Botanique de France* 84: 316. 1937, *Berichte der Schweizerischen Botanischen Gesellschaft* 86: 152–203. 1976, Blanche Henrey, *No ordinary gardener—Thomas Knowlton, 1691–1781*. Edited by A.O. Chater. British Museum (Natural History). London 1986, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 33. Regione Siciliana, Palermo 1988, *Taxon* 41: 558. 1992, *Taxon* 44: 611–612. 1995.

Barleria acanthoides Vahl (*Barleria acanthoides* Vahl; *Barleria acanthoides* non Vahl; *Barleria lanceolata* Oberm.; *Barleria lanceolata* (Schinz) Oberm.; *Barleriacanthus acanthoides* Oerst.)

India, Sudan, Egypt. Shrub, highly variable species, many-branched, armed with simple spines, white flowers in scorpioid racemes, fodder for goats, camels, donkeys and sheep

See *Symbolae Botanicae* 1: 47. 1790, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 136. 1855 and *The Journal of Ecology* 44(1): 180–194. 1956, *Economic Botany* 35(1): 96–130. 1981, *Economic Botany* 44(3): 369–381. 1990, *Biotropica* 25(2): 164–175. 1993, *Current Science* vol. 78, n. 7. April 2000

(Used in Ayurveda. Antimicrobial, antibacterial, for typhoid fever. Leaves for fever and catarrh, soaked in water and used for eye lotion. Roots decoction for stomachache.)

in India: amlana, amlatana, artagala, bana, chapari, jhinti, jhintika, kurantaka, sahadara, saireyakah

in Pakistan: asad, thath

in Kenya: akudho, lekwelito, logolito, onyango arungu, socha

***Barleria buxifolia* L.**

India.

See *Journal of Cytology and Genetics* 15: 90–92. 1980, *Taxon* 31: 361–362. 1982, *Cytologia* 48: 491–504. 1983, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Cytologia* 55: 175–179. 1990, *Cytologia* 56: 353–357. 1991, *Biochimica et Biophysica Acta* (BBA) - General Subjects 1472(3): 462–470. 1999, *Anti-Cancer Drugs* 12(10): 807–819. 2001

(Used in Ayurveda and Sidha/Siddha. Cytotoxic, antitumor.)

in India: caraschulli, chulli, culli, erramullugoranta, gandikottimullu, gandu chotte mullu, gandu kotthi mullu, gandukottimullu, ganukotte mullu, ganukotte mullu, gubbacchi gida, gubbacchi mullu, gubbee mullu, gubbi mullu, iksura, karaculli, kari chulli, kariculli, karichulli, kariculli, kattimullu, kempu gorate, kempugorate, krishna chora, kuruvaka, nalla mullugoranta, peda mullugoranta, rosmullippuntu, thella mullugoranta

***Barleria courtallica* Nees**

India.

See *Taxon* 31: 593–595. 1982, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Cytologia* 56: 353–357. 1991, *Journal of Herbs, Spices & Medicinal Plants* 10(4): 103–112. 2004

(Used in Ayurveda.)

in India: chethasahacharam, karimkurunni, sahadarah, venkurunji

Barleria cristata L. (*Barleria ciliata* Roxb.; *Barleria cristata* f. *albiflora* Degener & I. Degener; *Barleria dichotoma* Roxb.; *Barleria napalensis* Wall.)

Himalayas. Shrub or undershrub, erect, branched unarmed, corolla white, red pink or purple, in waste places and along roadsides

See *Species Plantarum* 2: 636. 1753 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Journal of the Indian Botanical*

Society 65: 310–315. 1986, *Baileya* 23: 86–93. 1989, *Cytologia* 56: 353–357. 1991, *Taxon* 41: 558. 1992

(Used in Ayurveda and Sidha. Whole plant antiinflammatory, bechic, hypoglycemic, spasmolytic, oxytotic, used in snakebite; a paste or a decoction given in tuberculosis. Leaves for inflammations. Roots and leaves infusion applied to boils and sores to reduce swellings; the bitter juice of the leaves or roots diaphoretic and expectorant; root paste for toothache; roots for anemia and cough, a decoction of the root with *Barleria strigosa* and dry fish is given in anemia; a decoction of the root of *Barleria strigosa* with *Barleria cristata* and *Tinospora cordifolia* is given in fevers with honey and long pepper.)

in English: blue bell barleria, bluebell, Philippine violet

in India: artagala, baipariguda, bana, catserna, dasi, dasikurantaka, daskaranda, december puvvulu, errapulapedagoranta, ettapulapeddagoranta, gobbi, gokran, gorinta, jhante, jhinte, jhinti, kakubha, kala bansa, karimkurunni, kattukkanagambaram, kinkiraatha, kodi kannu, kodikannu, kurabaka, kurabakah, kurantaka, kuravaka, kurubakah, kuruvaka, mahasaha, mituri, mukro, mulkanagambaram, mullu gorate, na, nallapeddagoranta, neerugoranta, nilacemmulli, nilachemmulli, nilamlaainduka, nilamparam, niru goranta, nirugoranta, patikada hoo, patro, peddagoranta, ragaprasava, raktajhinti, raktamlana, raktapushpa, raktasaireyaka, ramalinganakamuka, rujakara, saireyakahn-ilapuspa, saha, sahaacara, sahacara, sahacarah, saireya, saireyaka, saireyakah, sairiya, sairyaka, sairyaka, semmulli, shemmuli, shonajhintaka, sphatika, sphatikada hoovu, subhaga, sweta saireyaka, swetjhanti, tadrelu, tellanilambari, thellaneelambari, udamulli, vellai nilambaram, vellainilambaram, yera poolapedda gorinta

in Japan: barureria

in Philippines: kolintang, violeta

in Thailand: kaan chang, luem thao yai, thong ra-aa

in Tibet: sa ha ra ca, sa ha ra tsap, sa-ha-tsa

in Vietnam: hoa ch[oo]ng

Barleria cuspidata Heyne ex Nees

India, Congo. Low spiny shrub, slender spines, yellow flowers solitary in leaf axils or in terminal spikes

See *Journal of Cytology and Genetics* 15: 90–92. 1980, *Cytologia* 48: 491–504. 1983, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Cytologia* 56: 353–357. 1991

(A poultice of the leaves antiinflammatory, put on bites of insects.)

in English: spiny barleria

in India: bobbi, gohoma, kadanculi, kate koranti, vellaimuli

Barleria grandicalyx Lindau

Tanzania. Shrub, woody herb, white corollas

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 25. 1894

(Leaves used as paste applied for snakebites.)

in Kenya: cheperenet

in Tanzania: itunga mbichi

Barleria involucrata Nees

India.

See *Cytologia* 50: 473–482. 1985, *Journal of Biogeography* 23(6): 783–789. 1996

(Used in Ayurveda.)

in English: racemose blue nail dye

in India: kurabakah, raktamlanah, saireyakah-raktah

Barleria longiflora L.f.

India.

See *Suppl. Pl.* 290. 1782 [1781 publ. Apr 1782] and *Cytologia* 50: 473–482. 1985, *Indian Journal of Pharmaceutical Sciences* 61(5): 282–286. 1999

(Used in Ayurveda. Root decoction in dropsy. Powder from the dried whole plant taken with water to treat poisonous bites.)

in India: adyanda, ekakantaka, goarimidi, gokshuraka, ikshurah, kokilaksha, kolavali, mullanakole, neeruppi gida, pinna-gorinta, pinna gorinta, pinnagorata, suryabhira, suryabhiya, vellai kurinji

Barleria lupulina Lindl. (*Barleria monostachya* Bojer ex Bouton)

Mauritius. Shrub, many-branched, axillary spines, flowers in small terminal spikes, corolla lobes orange-yellow, capsule ovoid, in secondary bushland and thickets, moist soil

See *Species Plantarum* 2: 636–637. 1753, *Edwards's Botanical Register* 18: t. 1483. 1832, *Journal of Botany*, being a second series of the Botanical Miscellany 1: 356. 1834, *Prodr.* 11: 243, 1847 and *Flore de Madagascar et des Comores* 182: 1–219. 1967

(Roots for jaundice, abdominal pain, insect poisoning, toothache, antsnake venom. Leaves and roots chewed against toothache. Crushed leaves applied to cure fresh cuts, wounds, ulcers and to stop bleeding; a poultice of the leaves put on bites of insects, snakes or dogs, as an antiinflammatory. This species bears sharp spines at its leaf bases which may cause mechanical injury.)

in English: hop-headed barleria, hophead, Philippine violet

in Rodrigues Isl.: piquants tac-tac

in China: hua je jia du juan

in India: kanta bishalyakarani, mullanangai

in Indonesia: landik, sujen trus

Malay name: setawar sakelian bisa

in Thailand: chek che kiam, phimsen ton, phimsenton, salet phangphong

in Vietnam: gai kim v[af]ng

Barleria montana Wight & Nees ex C.B. Clarke (*Barleria montana* Herb. Madr. ex Nees; *Barleria montana* Nees)

India.

(Used in Ayurveda.)

in India: adavi decembaralu, bana, kolista

Barleria mucronata Lindau (*Barleria kilimandscharica* Lindau)

Tropical Africa.

See *Species Plantarum* 2: 636–637. 1753, *Bot. Jahrb. Syst.* xx. (1894) 24, 26. 1894 and Watt, J.M., Breyer-Brandwijk, M.G. *The Medicinal and Poisonous Plants of Southern and Eastern Africa*. Being an account of their medicinal and other uses, chemical composition, pharmacological effects and toxicology in man and animal. 2nd edn. Edinburgh. 1962

(The Masai use the thorns to prick the skin around a snakebite in order to permit the sucking out or pressing out of blood.)

Barleria mysorensis Heyne

India.

(Used in Sidha.)

in India: bantalagobbi, cara-schulli, chulli, erramulugoranta, kantanculi, kattucculli, kempugorate, nallamulugornta

Barleria noctiflora L.f. (*Barleria noctiflora* Hochst. ex A. Rich.)

India.

See *Suppl. Pl.* 290. 1782 [1781 publ. Apr 1782] and *Taxon* 31: 361–362. 1982, *Cytologia* 48: 491–504. 1983, *Cytologia* 55: 175–179. 1990, *Cytologia* 56: 353–357. 1991

(Used in Ayurveda.)

in India: naaga gorinta

Barleria opaca (Vahl) Nees (*Barleria opaca* Nees; *Justicia opaca* Vahl)

West Africa, Cameroon. Liane, scrambling, straggling, undershrub or shrub, flowers white to pale blue, inflorescence cymose, leaves eaten as a cooked vegetable

See *Prodr.* (DC.) 11: 230. 1847 [25 Nov 1847]

(The whole plant used in treating jaundice, epilepsy, arthritis, rheumatism and paralysis. Leaves laxative, for piles and snakebites; leaf sap applied against catarrh and naso-pharyngeal affections.)

in English: child's vegetable, children's spinach, kwahu

in Ghana: ala fango, efanba

in Nigeria: aarenikosun

Barleria prattensis Santapau

India. Roots eaten during scarcity

See *Kew Bulletin* 3: 487. 1948 (publ. 1949)

(Root powder given to mothers for increasing lactation. Leaf powder in small doses given internally as an antipyretic.)

in India: bodo kantasaliyo, ikharu

Barleria prionitis L. (*Barleria coriacea* Oberm.; *Prionitis hystrix* (L.) Miq.; *Prionitis hystrix* Miq.)

Tropical East Africa and Asia. Shrub, erect, bushy, weedy, many-branched, usually very prickly, rarely unarmed, three to five sharp pale spines at the leaf base, solitary axillary tubular golden yellow or creamy orange flowers, inflorescences axillary cymes, calyx lobes spine-tipped, beaked ovoid-conical loculicidal capsule, unpalatable to stock, a very serious troublesome weed, in thickets, in waste places, tropical savannas, riverbanks and grasslands

See *Species Plantarum* 2: 636–637. 1753 and *Berichte der Schweizerischen Botanischen Gesellschaft* 86: 152–203. 1976, Nadkarni K.M. *Indian Materia Medica*. With Ayurvedic, Unani-Tibbi, Siddha, allopathic, homeopathic, naturopathic & home remedies. Bombay. 1976, *Taxon* 29: 358–360. 1980, *Taxon* 31: 773. 1982, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Cytologia* 56: 353–357. 1991, *J. Nat. Prod.* 61(10): 1295–1297. 1998, *Journal of Ethnopharmacology* 70(2): 111–117. 2000, *Phytotherapy Research* 19(5): 391–404. 2005

(Used in Ayurveda and Sidha. Roots, leaves, flowers, fruits and seeds for infantile diarrhea; leaf and stem hepatoprotective, to heal chronic sores and ulcers. Whole plant used for dental care. Juice used as an application to the feet to prevent cracks and lacerations; a paste of the root applied to boils and glandular swellings; a medicated oil applied to unhealthy wounds. Leaves diuretic, tonic, chewed for fever, rheumatism, liver and skin diseases, jaundice and urinary infections; leaves and the tender branches used for treatment of toothache, strengthening of gums, whooping cough and premature ejaculation. Powdered dried bark with honey given to cure whooping cough; bark juice expectorant, inducing perspiration. A preparation made from the flowers effective in painful menstruation. Iridoid glycosides with potent *in vitro* activity against respiratory syncytial virus. Antifertility, the roots. Sacred plant, the flowers. Root hung at the door of cowshed to protect cows from diseases.)

in English: barleria, lobed needle grass, porcupine flower

in Rodrigues Isl.: piquants tac-tac

in India: ananta, araniyacokiceti, araniyacoki, artagala, atotitaceti, atotitam, bajradanti, bana, bhindi, brijdanti,

(Used in Ayurveda, Unani and Sidha. Plant expectorant, emetic, laxative, tonic, astringent, for headache and diarrhea. Bark, leaves and roots applied for poulticing itch, wounds, sores and ulcers; bark and roots tonic. Roots laxative. Leaves used for wound healing and against diarrhea; paste made from powdered leaves and turmeric applied all over the body to prevent insect bites like mosquito, bed bug and ants. Bark antimicrobial, abortifacient, contraceptive, to reduce the enlarged abdomen of children, a decoction given as stomachic, as a remedy for diarrhea, rheumatic pains, blenorrhea and malaria; water extract of stem bark given in dysentery; fresh stem bark crushed and the juice given for eczema; stem bark taken orally by women to reduce chances of pregnancy. Fruits ground and eaten as a treatment for leucorrhea. Seed used to treat ophthalmia, cough, bronchitis, asthma; powdered seeds emetic, expectorant. Veterinary medicine, stem bark paste applied locally for rheumatism; crushed leaves with rice to treat dysentery of cow. Crushed stem bark, roots and seeds employed as a fish poison; bark red sap used to poison fish.)

Barringtonia conoidea Griff.

SE Asia, Myanmar. Shrub or treelet, stout, scarcely branched, leaves spirally arranged in rosettes, short few-flowered pendulous racemes, white flowers, pink style, fruit conical shaped with 8 projecting basal flanges, fruits floating in water, riparian, in brackish and tidal estuaries and estuarine mangroves

See *Not. Pl. Asiat.* 4: 656. 1854, *Icon. Pl. Asiat.* t. 635, 636, f. 1. 1854

(Fish poison, seeds, bark or roots, often in combination with *Derris*.)

in English: river putat

in Malaysia: putat ayer

Barringtonia macrocarpa Hassk. (*Barringtonia insignis* Miq.; *Barringtonia serrata* Miq.)

SE Asia, Thailand, Burma (Myanmar), Peninsular Malaysia, Indonesia. A shrub or small tree, flowers not scented, terminal pendulous racemes, sepals purple or pink, convex petals white or pale pink, stamens in 3–4 whorls, fruit fibrous, seed ovoid fissured, along rivers, in swampy forest and periodically inundated areas

See *Kew Bulletin* 50(4): 677–694. 1995

(The pounded roots or root bark used as a fish poison.)

in Indonesia: bulat, potet, songgom

in Thailand: chik nom yan

in Vietnam: l[ooj]c v[uwf]ng qu[ar] to

***Barringtonia scortechinii* King**

Peninsular Thailand, Peninsular Malaysia, Sumatra and Borneo. Spreading tree, sometimes with buttresses bark scaly finely longitudinally fissured brown or red peeling off in small flakes, leaves subcoriaceous glabrous, inflorescence a pendulous spike, calyx tubular with 3–4 lobes, petals 4 greenish-white to pink-red, stamens in 4–5 whorls, fruit an ovoid 1-seeded berry with 8 ridges, seed ovoid yellow-white, in primary and secondary forest, in swampy forest and near rivers

See *J. Asiat. Soc. Bengal*, Pt. 2, Nat. Hist. 70: 138. 1901

(Pounded seeds or bark used as a fish poison, contain saponins.)

in Borneo: langsat burung, tempalang

in Malaysia: putat gajah, putat hutan, putat tuba

Barteria Hook.f. Passifloraceae

After the English plant collector Charles Barter (d. 1859 in West Africa, North Nigeria, Rabba), Kew gardener, 1857 botanist on William Balfour Baikie's Niger Expedition, author of *The Dorp and the Veld; or, six months in Natal*. London 1852. See Samuel Crowther [Missionary Bishop of the Niger Territory] and John Christopher Taylor, *Niger Expedition of 1857–1859*. 1859, *J. Proc. Linn. Soc., Bot.* 5: 14, t. 2. 1860 [1861 publ. 1860] and Bequaert J. "Ants in their diverse relations to the plant world." *Bulletin of the American Museum of Natural History* 45: 333–583. 1922, Sir John Hawley Glover, *The Voyage of the Dayspring: being the journal of ... Sir J.H. Glover ... together with some account of the expedition up to the Niger River in 1857*, by Archibald Charles Gardiner Hastings. London 1926, *Bulletin Institut d'Études Centrafricaines*, Nouvelle série 4: 181–186. 1952, J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. "The super-nettles: a dermatologist's guide to ants in the plants." *International Journal of Dermatology* 24(4): 204–210. 1985, *Adansonia* 21(2): 307–318. 1999.

***Barteria dewevrei* De Wild. & T. Durand** (*Barteria acuminata* Baker f.; *Barteria stuhlmannii* Engl. & Gilg)

Tropical Africa. Tree, white flowers

See *Ann. Mus. Congo Belge, Bot.* sér. 2, 1(1): 8. 1899 [1899–1900 publ Jul 1899]

(Myrmecophyte, ant symbiosis, protection from defoliating insects, branchlets inhabited by small ants.)

in Gabon: ongóumóugna

***Barteria fistulosa* Mast.** (*Barteria braunii* Engl.; *Barteria nigritana* Hook. f. subsp. *fistulosa* (Mast.) Sleumer; *Barteria urophylla* Mildbr.)

Tropical Africa. Small tree or shrub, slender, erect, horizontal non-ramified lateral branches with swollen and hollow internodes (domatia), branchlets usually hollow, leaves variable, large white axillary flowers and prominent yellow stigma, leaves and bark eaten by gorillas, seeds dispersed by birds and small mammals

See *Flora of Tropical Africa* 2: 511. 1871 and *Comptes rendus des Séances de l'Académie des Sciences*, Série D, *Sciences naturelles* 268(23): 2804–2806. 1969, *Blumea* 22(1): 14. 1974, *Ecological Research* 14(4): 393–404. 1999, *Biological Journal of the Linnean Society* 93(1): 63–69. 2008

(Leaves, bark and root contain traces of hydrocyanic acid. Stem bark, roots and leaves antidotes, venomous stings, bites, arthritis, anemia, toothache, epilepsy, convulsions, headache, rheumatism. Bark decoction taken to treat venereal diseases and madness, astringent; bark sap to treat wounds, scabies and itch; bark and leaves febrifuge; young shoots eaten as an aphrodisiac. Myrmecophyte, ant symbiosis, protection from defoliating insects, branchlets inhabited by large fierce ants. Pseudophytophagism caused by the bites and stings of the ant inhabiting this plant, an aggressive species of Pseudomyrmecinae ants (*Tetraponera aethiops* F. Smith, syn. *Pachysima aethiops* F. Smith) with an exceedingly painful sting. Superstitions, ritual, magic.)

in English: ant tree

in Central African Republic: mogomagoma, ngomangoma, ngoumangouma

in Congo: essesse, mumfimi

in Nigeria: igbangitarighá, ngibe, ogeimi, oje, oko

***Barteria nigritana* Hook.f.** (*Barteria nigritiana* Hook.f., nom. illeg., non *Barteria nigritana* Hook.f.)

Nigeria. Tree, stout, leaves coriaceous, corolla white, myrmecophyte, ant plant

See *Journal of the Linnean Society, Botany* 5: 15, t. 2. 1860 [1861 publ. 1860] and Dorothy Amaury Talbot, 1871–1916, *Women's Mysteries of a Primitive People. The Ibibios of Southern Nigeria*. London 1915, *Journal of Ethnopharmacology* 41: 193–200. 1994, *Acta Oecologica*

26(2): 109–116. 2004, *African Study Monographs* 25(1): 1–27. 2004

(Bark to treat wounds, scabies and itch, anemia and toothache; powdered bark to treat wounds, scabies and itch. Leaves and fruits for fevers, aches, stomach disorders.)

in Nigeria: oko (Yoruba); ogeyben (Edo); oromogwa (Etsako); pereta (Ijaw); ukwoifia (Igbo); akpaekpan (Ibibio)

Basananthe Peyr. Passifloraceae

From the Greek *basanos* ‘a touchstone, a test’ and *anthos* ‘flower’, see Harvey, William Henry (1811–1866), *Thesaurus Capensis* 1: 32, t. 51. Dublin: Hodges, Smith, and co., 1859–1863, *Botanische Zeitung* (Berlin) 17: 101. 1859, *Sitzb. Acad. Wien. Math. Nat.* xxxviii. (1860) 569. 1860, *Die Natürlichen Pflanzenfamilien* 3(6a): 81. 1893 and *Blumea* 21: 327–356. 1973.

Basananthe heterophylla Schinz (*Tryphostemma heterophyllum* Engl.)

Namibia and Botswana. Herb

See *Verh. Bot. Vereins Prov. Brandenburg* xxx. (1888) 252. 1888, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14(4): 388. 1891, *Bot. Jahrb. Syst.* 15: 577. 1893

(A root decoction given to treat coughs.)

Basananthe sandersonii (Harv.) W.J. de Wilde (*Tryphostemma sandersonii* Harv.)

Tropical Africa, Tanzania. Herb, woody rootstock, erect or prostrate, pendulous capsule

See *Thesaurus Capensis* 1: 33. 1859 and *Blumea* 21(2): 339, f. 2a-c. 1973

(Leaves and roots as wound dressing and antidote. Roots chewed and the juice swallowed to treat snakebites.)

Basella L. Basellaceae

Vasala or *basella-kira*, the Malabar names for *Basella rubra* L.; see van Rheede in *Hortus Indicus Malabaricus*. 7: t. 24. 1688, *Flora Telluriana* 3: 44. 1837 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 573–578. 1973, *Syst. Basellaceae* 1–279. 1987, Lu Dequan. *Basellaceae*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 26: 43–47. 1996, *Fl. Ecuador* 55: 57–83. 1996, *Novon* 9(4): 562–563. 1999.

Basella alba L. (*Basella alba* var. *subcordata* Hassk.; *Basella alba* var. *subrotunda* Moq.; *Basella cananifolia* Buch.-Ham. ex Wall., nom. nud.; *Basella cordifolia* Lam.; *Basella crassifolia* Salisb.; *Basella japonica* Burm.f.; *Basella lucida* L.; *Basella nigra* Lour.; *Basella ramosa* J. Jacq. ex Spreng.; *Basella rubra* L.; *Basella rubra* var. *virescens* Moq.; *Basella*

volubilis Salisb.; *Gandola alba* Rumph. ex L.; *Gandola nigra* (Lour.) Raf.; *Gandola rubra* Rumph. ex L.)

Tropics, Africa and Asia. Soft, herbaceous, creeping, climbing, twining, short-lived perennial, fleshy, slender, rampant, soft shiny leaves heart-shaped with a pointed tip, small fleshy cream or white flowers borne on an axillary spike, fruit a subglobose pseudo-berry, leaves used as a slightly mucilaginous vegetable, eaten raw or cooked, can be confused with *Anredera cordifolia*

See *Species Plantarum* 1: 272. 1753, *Species Plantarum*, Editio Secunda 390. 1762, *Encyclopédie Méthodique, Botanique* 1: 382. 1785, *Prodr. Stirp. Chap. Allerton*: 153. 1796, *Syst. Veg.* 1: 950. 1824, *Numer. List*: 6961. 1832, *Sylva Tellur.*: 60. 1838, *Cat. Hort. Bot. Bogor.*: 82. 1844, *Prodr.* 13(2): 223. 1849 and *Fl. Trop. E. Africa, Basellaceae* 2. 1968, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Journal of Ethnopharmacology* 76: 263–268. 2001, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Asian Journal of Andrology* 7: 411–417. 2005, *Journal of Ethnopharmacology* 108: 332–339. 2006, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Used in Ayurveda and Sidha. Cooked vegetable eaten for mouth ulcers. Stem and leaves emollient, diuretic, tonic, laxative, aphrodisiac, androgenic potential, sedative, used for flatulence, ulcers, leprosy, dysentery; for snakebites whole plant crushed and packed into or onto the surface of the skin. Leaves laxative, lactogenic, oxytocic, for foot and mouth disease, to cure stomachache and constipation after childbirth; pulped leaves applied as a poultice to sores, boils, ulcers, abscesses; pounded leaves, infusion, wash the wounds; leaves soaked in water used for diarrhea; leaves along with juice from fruits of *Punica granatum* given in diarrhea; especially useful as laxative in children and pregnant women; leaves and flowers for diarrhea. Red fruit juice as eyedrops to treat conjunctivitis. Seeds antifungal, antiviral. Veterinary medicine, for constipation and treatment of retained afterbirth and anaplasmosis; plant paste with milk given for reducing labor pain in cows; leaves given to cattle to increase milk yield.)

in English: Ceylon spinach, country-spinach, Gambian spinach, Indian spinach, Malabar nightshade, Malabar spinach, red vine spinach, vine spinach

Basilicum Moench Lamiaceae (Labiatae)

From the Greek *basilikos*, Latin *basilicus*, *a*, *um* 'princely, royal, kingly'; see Conrad Moench (1744–1805), *Methodus plantarum horti botanici et agri Marburgensis a staminum situ*

describendi. Marburgi Cattorum [Marburg] Suppl. 143. 1802 and *Bangladesh Journal of Botany* 4, 37–47. 1975.

Basilicum polystachyon (L.) Moench (*Basilicum polystachyon* Moench; *Lehmannia ocymoidea* Jacq. ex Steud.; *Lumnitzera moschata* (Salisb.) Spreng.; *Lumnitzera ocimoides* Jacq. ex Spreng.; *Lumnitzera polystachyon* (L.) J. Jacq. ex Spreng.; *Moschosma dimidiatum* (Schumach. & Thonn.) Benth.; *Moschosma moschatum* (Salisb.) Druce; *Moschosma polystachyon* (L.) Benth.; *Moschosma polystachyum* (L.) Benth.; *Moschosma polystachyum* Benth.; *Ocimum dimidiatum* Schumach. & Thonn.; *Ocimum moschatum* Salisb., nom. superfl.; *Ocimum polystachyon* L.; *Ocimum tashiroi* Hayata; *Ocimum tenuiflorum* Burm. f., non L.; *Perxo polystachyon* (L.) Raf.; *Plectranthus flaccidus* (Vatke) Gürke; *Plectranthus micranthus* Spreng.; *Plectranthus moschatus* (Salisb.) R.Br.; *Plectranthus parviflorus* R.Br., nom. illeg.)

Trop. & S. Africa, Tanzania, India. Small herb with woody base, annual to short-lived perennial, erect, very aromatic, often many-branched, 4-angled, papery leaves, white to pinkish small flowers, close to *Ocimum*

See *Species Plantarum* 597. 1753, *Flora Indica* ... nec non Prodr. Florae Capensis 129. 1768, *Mantissa Plantarum* ed. 2 567. 1771, *Stirpes Novae aut Minus Cognitae* 84 verso. 1788, *Methodus Plantarum Horti Botanici et Agri Marburgensis, Suppl. Meth.* (Moench) 143. 1802, *A Numerical List of Dried Specimens* n. 2711. 1829, *Edwards's Botanical Register* 15: pl. 1300. 1830, *Plantae Asiaticae Rariores* 2: 13. 1830, *Autik. (Used in Sidha. Crushed leaves sedative, antibacterial, to relieve painful sprains and limbs; leaves decoction for epilepsy, palpitations of the heart, neuralgia, nervous breakdown, headaches, depression after childbirth, rheumatism and convulsions; leaf sap pain killer. Fresh roots chewed against cough. Fruit abortifacient, infusion taken for parturition in the case of delayed birth. Plant burnt indoors as a mosquito, arachnicides and snake repellent. Magic, against bad spirits.)

in English: African curry powder, musk basil, polystachyous basilicum

in Ghana: nwasinwansi

(Ingestion has caused poisoning in cattle, horses, and sheep. Oxalates are at least partly responsible for the complicated toxic affects of kochia ingestion. Hepatogenous photosensitivity and liver damage often occur together, along with the outward signs of photosensitization. In addition, polioencephalomalacia, toxic hepatitis, and nephrosis can occur. Ceremonial.)

in English: belvedere, burning bush, common kochia, kochia, summer cypress

in China: di fu, sao chou tsao, ti fu

in Japan: hôki-gi

in Okinawa: kanzanna

Bathysa C. Presl Rubiaceae

See *Abh. Königl. Böhm. Ges. Wiss.*, V, 3: 514. 1845, *Genera Plantarum* 2: 49. 1873 and *Rodriguésia* 50: 49–75. 1999.

India. Polymorphic herb, rooting from the base, stems fistular, white flowers, hairy receptacle, seeds eaten by water birds

See *Species Plantarum* 1: 556. 1753, *Histoire des Plantes de Dauphiné* 1: 335. 1786, *Baiersche Flora* 2: 104. 1789, *A Natural Arrangement of British Plants* 2: 722. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 26. 1824, *Florula belgica*, opera majoris prodromus, auctore ... 127. 1827, *Histoire Naturelle des Végétaux* 7: 200. 1838, *Prodromus Florae Batavae* 7, 17. 1850, *Enumeratio Plantarum Transsilvaniae* 12. 1866, *A Manual of Botany of the Northern United States* (ed. 5) 40. 1867, *Journal of Botany, British and Foreign* 9: 101. 1871 and *Northw. Fl.* 169. 1912, *Spring Flora of the Wasatch Region* ed. 3: 35. 1917

(Leaves decoction for toothache and gum troubles.)

in English: water buttercup

in China: mao bing shui mao gen

Bauhinia L. Fabaceae (Caesalpinieae, Cercideae, Leguminosae)

After the two Swiss brothers Bauhin, Caspar (Casper, Gaspard) (1560–1624, Basel) and Jean Johannes (1541–1613, Montbéliard, Württemberg-Montbéliard), herbalists and botanists. Caspar B., physician and botanist, professor of anatomy and botany at Basel University, distinguished between genus and species, was the first to establish a scientific system of nomenclature. Jean J. B. studied at Montpellier under Rondelet and at Zürich under Gesner, collaborated with Jacques Daleschamps at Lyon, traveller, physician to Duke Frederick of Württemberg. See Johann Schultes (Scultetus) (1595–1645), *Cheiroplothete* [graece]

seu ... *armamentarium chirurgicum*. [S. was, with Fabry von Hilden, the leading German surgeon of his era.] [Folio, first edn.] Ulmae Suevorum 1655, Junghuhn, Franz Wilhelm (1809–1864), *Plantae Junghuhnianae*: enumeratio plantarum, quas, in insulis Java et Sumatra detexit Fr. Junghuhn. Lugduni-Batavorum [Leiden, The Netherlands], Parisiis, [1853?]-1857 [Confusion on dating of fascicles exists.], *J. Linn. Soc. Bot.* 25: 1–107. 1889 and Ludovic Legré, *La Botanique en Provence au XVI^e siècle. Les deux Bauhin*. Marseille 1904, *Contr. U.S. Natl. Herb.* 23: 413–418. 1922, *North American Flora* 23: 201–349. 1930, *Flora de Cuba* 2: 224–367. 1951, *Reinwardtia* 3: 381–541. 1956, J.H. India, China, Thailand. Perennial non-climbing tree, shrub or small tree, white flowers

See *Species Plantarum* 1: 375. 1753 and *Reinwardtia* 3: 393. 1956, *Mem. New York Bot. Gard.* 25(2): 19. 1975

(Used in Ayurveda, Unani and Sidha. Stem bark and roots for stomach disorders and malaria. Antifungal, antibacterial, to treat ulceration of the nose in the form of a poultice; bark and leaves decoction given for venereal diseases, stone in bladder, asthma, leprosy. Roots to treat cough by making cold extracts, and to treat urinary problem probably by means of hot extraction; roots boiled with oil applied to burns.)

in English: bell bauhinia, butterfly, dwarf white bauhinia, mountain ebony, orchid tree, snowy orchid tree plant, St. Thomas' tree, white bauhinia, yellow bauhinia, yellow butterfly tree

in Burma: mahahlegabyu

in India: aralu mandaara, bile kanchuvaala, bile kanchuvala, bile mandara, bilemandara, bili kanchuvaala, bili mandaara, bilikancivala, bilikancivalada, bilimandaara, bilimandar, bilimandara, chingthao, civamalli, devakanchanamu, duolo-kanchan, kaanchnaara, kachna, kachnaal, kachnal, kachnar, kaha-petan, kanalmirakamaram, kanalmirukam, kancanarah, kanchan, kanchana, karbudarah, kobo-leela,

kokkirakumantarai, kokkumandarai, kokkumantarai, kovi-daara, mandaram, mandharai, manjal mandharai, mati katota, mati kotota, megong aphil, pakam, pakaram, pakaramaram, pujamandara, safed-kachnar, svetakancana, swetkanchan, tevataru, tiruvathi, tiruvatti, vanasampige, vanasampigi, vellaimandarai, vellaimantarai, vellaimantararam, vellamandaram, vellirakumantarai, velutta-mandaru, veluttamandaram, veluttamandaru

in Japan: moku-wan-ju

in Java: kupu-kupu

in Malay Peninsula: bunga perak

in Sundanese: penawar seribu

in Thailand: kalong

Bauhinia bidentata Jack (*Phanera bidentata* (Jack) Benth.)

Indonesia, Sumatra. Perennial climbing shrub

See *Malayan Misc.* 2(7): 76. 1822, *Plantae Junghuhnianae* 2: 263. 1852

(For nervous complaints in women.)

Malay name: dedaup

Bauhinia burbridgei Stapf (*Phanera kockiana* (Korth.) Benth. var. *burbridgei* (Stapf) de Wit)

Sarawak. Perennial climbing shrub

See *Verh. Nat. Gesch. Bot.* (1839–42) 87. 1839, *Trans. Linn. Soc. London, Bot.* 4(2): 143. 1894 [1894–96 publ. Dec 1894]

(Roots decoction drunk for gonorrhoea and body ache.)

in Sarawak: akar ketong

Bauhinia calycina Gagnep. (*Bauhinia calycina* Pierre ex Gagnepain; *Bauhinia calycina* Ridl.; *Phanera audax* de Wit)

Cambodia, Peninsular Malaysia. Perennial climbing shrub

See *J. Asiat. Soc. (Straits)* 61: 3. 1912 [*J. Straits Branch Roy. Asiat. Soc.*], *Notulae Systematicae*. Herbarium du Museum de Paris 2: 169. 1912, *Reinwardtia* 3: 381–541 1956

(Boiled roots given for dropsy.)

in Malay: akar kurutok hitam

Bauhinia diphylla Buch.-Ham. (*Bauhinia buehnanii* Desv.; *Bauhinia diphylla* Zoll.; *Lysiphyllum diphyllum* (Buch.-Ham.) de Wit; *Phanera diphylla* (Buch.-Ham.) Benth.)

India, Mauritius, Myanmar, Sri Lanka. Perennial climbing shrub or small tree, white flowers

See Michael Symes (1753?-1809), *An account of an embassy to the Kingdom of Ava...*, 476, t. 24. London 1800, *Nat. Geneesk. Arch. Neerl. Ind.* 3: 70. 1846 and *Reinwardtia* 3: 431. 1956

(For broken bones.)

in India: kadakol, kadukolu

Bauhinia esculenta Burch.

South Africa. See also *Tylosema*

See *Travels in the interior of South Africa* 2: 589. 1824 and *Mitteilungen der Botanischen Staatssammlung München* 3: 611. 1960, *Kew Bulletin* 31(2): 219–220. 1976, *Economic Botany* 41(2): 216–220. 1987

(Leaves laxative, antiparasitic. Antibacterial, antiviral, antioxidant and antifungal activity of bean extracts.)

in English: camel's foot, gemsbok bean, gemsbuck bean, marama bean, morama bean

in Namibia: noukom, tjhng, tschng

in South Africa: braaiboontjie, elandsboontjie, gami, marama, maramaboontjie, marumama, morama, ombanui, tsi, tsin

Bauhinia ferruginea Roxb. var. ***griffithiana*** (Benth.) Baker (*Bauhinia ferruginea* D. Dietr.; *Bauhinia griffithiana* (Benth.) Baker; *Bauhinia suffruticosa* Ridl.; *Phanera griffithiana* Benth.)

Indonesia, Malaysia. Perennial climbing shrub

See *Hortus Bengalensis*, or a catalogue ... 90. 1814, *Synopsis Plantarum* 2: 1476. 1840, *The Flora of British India* 2: 285. 1878

(Decoction against diarrhea.)

Malay names: akar kempaga, selak kerebok

Bauhinia forficata Link subsp. ***pruinosa*** (Vogel) Fortunato & Wunderlin (*Bauhinia candicans* Benth.; *Bauhinia forficata* subsp. *candicans* (Benth.) E. Latzina; *Bauhinia forficata* subsp. *pruinosa* (Vogel) Hassl.; *Bauhinia forficata* var. *candicans* (Benth.) Hassl. ex Latzina; *Bauhinia forficata* var. *pruinosa* (Vogel) Hassl.; *Bauhinia pruinosa* Vogel; *Pauletia candicans* (Benth.) Schmitz; *Pauletia pruinosa* (Vogel) A. Schmitz)

Brazil. Perennial non-climbing tree

See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 404. 1821, *Linnaea* 13: 301. 1839, *Flora Brasiliensis* 15(2): 201. 1870 and *Repertorium Specierum Novarum Regni Vegetabilis* 16: 157. 1919, *Lilloa* 1: 154. 1937, *Bulletin du Jardin Botanique National de Belgique* 43(3–4): 389, 396. 1973, *Darwiniana* 27: 550. 1986

(Medicinal, used specifically for children.)

in Argentina: cauba, falsa caoba (caoba = mahogany), palo de buey, pata de buey, pata de vaca, toro pe, toro po

in Brazil: bauinia, miroró, mororá, pata-de-burro, pata de cabra, pata de chivo, pata de toro, pata-de-vaca, unha-d'anta, unha-de-boi, unha-de-boi-de-espinho, unha-de-vaca, unha-de-veado

Bauhinia foveolata Dalzell (*Bauhinia lawii* Baker; *Bauhinia lawii* Benth. ex Baker f.; *Piliostigma foveolatum* (Dalzell) Thoth.)

India. Perennial non-climbing tree

See *Journal of the Linnean Society, Botany* 13: 188. 1872 [1873 publ. 1872], *The Flora of British India* [J.D. Hooker] 2(5): 277. 1878 and *Bulletin of the Botanical Society of Bengal* 19(2): 131. 1967 [Oct 1965 issued 23 Feb 1967]

(Inner bark paste heated and applied for stomach pain.)

in India: chamei

Bauhinia glauca (Benth.) Benth. subsp. ***tenuiflora*** (Watt ex C.B. Clarke) K. Larsen & S.S. Larsen (*Bauhinia caterviflora* L. Chen; *Bauhinia glauca* subsp. *tenuiflora* (C.B. Clarke) K. Larsen & S.S. Larsen; *Bauhinia polysperma* Gagnep.; *Bauhinia polysperma* Pierre ex Gagnepain; *Bauhinia tenuiflora* C.B. Clarke; *Bauhinia tenuiflora* Watt ex C.B. Clarke; *Phanera tenuiflora* (Watt ex C.B. Clarke) de Wit; *Phanera tenuiflora* (C.B. Clarke) de Wit)

China, India, Himalaya. Perennial climbing shrub, liana

See *Journal of the Linnean Society, Botany* 25(165–169): 18, pl. 6. 1889 and *Notulae Systematicae. Herbarium du Museum de Paris* 2: 177. 1912, *Reinwardtia* 3: 490. 1956, *Natural History Bulletin of the Siam Society* 25(1–2): 10. 1973, *Union Burma J. Life Sci.* 5: 307–317. 1974

(Bark is used in diarrhea.)

in India: chingthao

in Thailand: dok siew

Bauhinia guianensis Aubl. (*Bauhinia chrysophylla* Vogel; *Bauhinia excisa* (Griseb.) Hemsl.; *Bauhinia excisa* Hemsl.; *Bauhinia guianensis* var. *splendens* (Kunth) Amshoff; *Bauhinia manca* Standl.; *Bauhinia obovata* S.F. Blake; *Bauhinia outimouta* Aubl.; *Bauhinia platycalyx* Benth.; *Bauhinia sericella* Standl.; *Bauhinia splendens* Kunth; *Bauhinia splendens* var. *latifolia* Benth.; *Bauhinia sprucei* var. *acuminata* Benth.; *Bauhinia thompsonii* I.M. (Antimalarial, astringent, analgesic. Root, vine decoctions for heat and venereal diseases; roots infusion for flu, hypertension, scorpion stings. Stem infusion drunk for diarrhea and stomachache. Vine decoctions for snakebite, pain, eczema, yaws.)

Bauhinia herrerae (Britt. & Rose) Standl. & Steyerl. (*Bauhinia klugii* Standl.; *Binaria herrerae* (Britton & Rose) Schmitz; *Schnella herrerae* Britton & Rose)

Mexico, North America, Peru.

See *Sylva Telluriana* 122. 1838 and *North American Flora* 23(4): 206–207. 1930, *Publications of the Field Museum of Natural History, Botanical Series* 23(1): 10. 1943, *Bulletin du Jardin Botanique National de Belgique* 43(3–4): 403. 1973

(A remedy for birth control. Stem used as an astringent for diarrhea and to reduce emorrhage, and for headaches, bleeding and internal wounds.)

Vernacular names: cowfoot vine, pata de vaca, ki-bix

Bauhinia integrifolia Roxb. (*Bauhinia flammifera* Ridl.; *Bauhinia holosericea* Ridl.; *Phanera integrifolia* (Roxb.) Benth.)

Thailand, Indonesia. Perennial climbing shrub

See *Hort. Bengal.* 90. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 331. 1832, *Plantae Junghuhnianae* 2: 263. 1852

(Aqueous extract of roots given for the treatment of syphilis.)
in India: mohlain

Bauhinia kаланtha Harms

Tanzania. Shrub, perennial, non-climbing, yellow solitary flowers, woody dehiscent pods green with dark blotches, edible leaves, in *Acacia-Commiphora-Adansonia* mixed woodland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 398. 1900, *Indian Journal of Animal Sciences* 77: 1219–1223. 2007

(Larvicidal, sliced roots boiled together with chicken and eaten as a treatment for schistosomiasis.)

in Tanzania: mchekwa

Bauhinia kockiana Korth. (*Phanera kockiana* Benth.; *Phanera kockiana* (Korth.) Benth.)

Sarawak. Perennial climbing shrub

See *Verh. Nat. Gesch. Bot.* (1839–42) 87. 1839

(Roots decoction drunk for gonorrhoea and body ache.)

in Sarawak: akar ketong

Bauhinia kunthiana Vogel (*Bauhinia guianensis* var. *kunthiana* (Vogel) Wunderlin; *Bauhinia rosea* Miq.; *Schnella rosea* (Miq.) Walp.)

Brazil, French Guiana. Perennial climbing shrub

See *Linnaea* 13: 312. 1839, *Linnaea* 18: 588. 1844 and *Annals of the Missouri Botanical Garden* 60(2): 571. 1973, *Bulletin du Jardin Botanique National de Belgique* 43(3–4): 406. 1973

(To treat malaria. Fish poison.)

in English: rose bauhinia, turtle ladder

Bauhinia malabarica Roxb. (*Bauhinia acida* Korth.; *Bauhinia acida* Reinw.; *Bauhinia castrata* Hassk.; *Bauhinia castrata* Blanco; *Bauhinia hawkesiana* F.M. Bailey; *Bauhinia malabarica* Roxb. var. *reniformis* Baker; *Bauhinia platyphylla* Benth.; *Bauhinia platyphylla* Zipp. ex Span.; *Bauhinia platyphylla* Miq.; *Bauhinia rugulosa* Miq.; *Casparia castrata* (Hassk.) (Used in Ayurveda, Unani and Sidha. Root bark poisonous. Leaf juice, mixed with onion juice, given to treat stones in gall bladder, leprosy, irregular menstruation, gastrointestinal disorders. Bark juice astringent, given in diarrhea and dysentery; bark pounded by stone tools and sprinkled on sores of smallpox; paste of bark against arthritis, applied on forehead to relieve headache; fine bark paste eaten for asthma, insect bite and chest pain; bark and flower buds for diarrhea. Flowers laxative. Flowers buds and flowers given for dysentery, indigestion; bark and flowers for diarrhea. Root carminative, applied in cuts and bruises. Magico-religious beliefs, ritual, spiritual and emotional, the bark used to keep evil spirits away; contact therapy, a portion of root tied on the arm of the person suffering from hydrocele.)

in English: butterfly tree, camel's foot tree, geranium tree, orchid tree, pink bauhinia, pink butterfly tree, poor man's orchid, purple bauhinia, purple butterfly tree

in Bali: bungan glauka, daun kupu-kupu (kupu-kupu = butterfly), kembang sabita

in India: acanomantarai, acanomantaraimaram, acuvacampurappu, akilu, apta, arelu, aroe, arputaveni, ashta, atmatti, atthi, banne, basavanapadu, bodanta, bodanta chettu, borodo, camarikah, chingthao angangba, chovanna-mandaru, chovannamandaru, cikappu mantarai, compucikam, compucikamaram, cuvannamandaram, dev kanchan, deva, deva kaanchana, deva-kanchan, deva-kasla, devakaanchanamu, devakanchan, devakanjanamu, devakunchun, devana kanchana, dhondhar, dieng long, dundra, gairal,

gairal, gural, jhinhora, kaanchanamu, kachnar, kailari, kalarviluti, kalavilaccai, kalavilaichi, kalaviluti, kaliaar, kaliar, kancan-kacnar, kancanarah, kanchan, kanchana, kanchanam, kanchanar, kanchivaala, kanchivala, kanchuvaala, kancivala, kandan, kaniar, kanjanamu, kanjivala, karal, karalli, karar, karial, karuppumantarai, kattu mantarai, kempu kanchivaala, kempu kanchuvaala, kempu mandaara, kempu-kanchavala, kempukancivala, kempukanjivala, kempumandaara, kempumandara, kenchna, keolar, keolari, khairwaal, khairwal, khairwal papri, kodel, kodwari, koilaara, koilar, koilari, koinar, koival, kolar, koliar, kovidaara, kovidara, kovidarah, kudwari, kureri, kural, kurial, kurul, kwillar, kwiryal, lal kachnar, lal karal, mahayamalapatrakah, makkuna, mancaltarai, mancaltaram, mandara, mandarai, mandaram, mandareh, mandari, mandharai, mantarai, mantharai, mawai, megong, mutiraikkali, nilataru, nilat-tiruvatti, pedda-are, peddaare, peddare, peddari, periyavatti, petigosh, punkaram, purapicam, ragtachandan, ragthachandan, rakta-kaanchanaara, rakta-kanchan, raktakanchan, raktakovidara, raktapushpakovidara, raktha kaanchan, rakta kanchan, sarul, segappumandarai, sing-aa, singara, singyara, sinhara, sivappu mandarai, sona, sona chal new, sonachal, sovari, suvannamandaram, swetakancanara, tambdo-apto, tamrapuspah, uleppe, ulipe, ulittikam, vanaraja, vau-fa-vang, vaube, vaufavang, weiben tong

in Indonesia: kembang kupu-kupu (kupu-kupu = butterfly)

in Japan: murasaki-soshin-ka

in Nepal: khwairalo, tanki

in Philippines Isl.: alibangban, alibanban

in Sri Lanka: kolar

in Tibet: go bi da rap, ko bi da ra, ko bid drid

Bauhinia racemosa Lam. (*Bauhinia parviflora* Vahl; *Bauhinia racemosa* Vahl, nom. illeg.; *Piliostigma racemosa* (Lam.) Benth.; *Piliostigma racemosum* (Lam.) Benth.)

Sub-Himalaya, India, South Asia. Small perennial non-climbing tree, crooked, bushy, drooping branches, small flowers eaten, flat pods, seeds dried and ground into flour for making bread

See *Encyclopédie Méthodique, Botanique* 1(2): 390. 1785, *Symbolae Botanicae, ...* 3: 55, pl. 62. 1794, *Plantae Junghuhnianae* 2: 262. 1852 and *Helv. Chim. Acta* 74, 791–799. 1991, *Bulletin of the Faculty of Pharmacy, Cairo University* 33: 59–65. 1995, *Bulletin of the Faculty of Pharmacy, Cairo University* 38: 93–97. 2000, *Indian J. Chem.* 41B, 1321–1322. 2002, *Acta Pharmacologica Sinica* 25: 1070–1076. 2004, *Iranian Journal of Pharmacology and Therapeutics* 3: 12–20. 2004, *Braz. J. Med. Biol. Res.* 38(7): 1015–1024. 2005, *Arch. Pharm. Res.* 31(12): 1525–1529. 2008

(Used in Ayurveda, Unani and Sidha. Plant cytotoxic, anti-oxidant, hypotensive, hypothermic, hepatoprotective, antitumor, antifungal, antimicrobial. Stem bark astringent, blood purifier, cholagogue, antiinflammatory, CNS depressant,

postpartum remedy, antioxidant and antimicrobial, used in the treatment of headache, gastrointestinal disorders, ulcers, fever, skin and blood diseases, tumors, dysentery and diarrhea; paste of fresh bark applied to swellings and in stomachache; bark extract given after meals for indigestion; bark extract of *Woodfordia fruticosa* along with extract of barks of *Oroxylum indicum*, *Mangifera indica*, *Bauhinia racemosa* and *Dalbergia lanceolaria* given for jaundice. Root bark decoction wormicide. Gum used to treat diarrhea. Leaves analgesic, antipyretic, antiinflammatory, antispasmodic, antimicrobial, anthelmintic, astringent, for diarrhea; leaves decoction for headache and malaria; leaves paste applied on headache. Fresh flower buds antiulcer and for cough. Seed antibacterial. Veterinary medicine, leaf juice given to lamb for diarrhea. Ritual, leaves as a symbol of gold, offered to God and friends; tree worshipped by the Hindus during Dushehra festival. Contact therapy, stem bark as a necklace worn to cure conjunctivitis. Seeds and bark extract used as fish poison and insecticide.)

in English: bidi-leaf tree

in India: aapata, aapataa, aapta, aaptha mara, aapto, aaralu, aare, aathi chedi, achilu, ada, adaviyavise, adiviyavise, aishuy, amlalota, anupushpak, anupushpaka, apata, apta, ar, ara, araginda, arai, aralukadumandara, aralumandara, aram, arambuli, archi, are, arechettu, areka, arelu, ari, arichettu, arikka, arilumandara, arise, arisele, arisile, arjuna, arjunada, arsilu, arthi, arti, ashmantak, ashmantaka, ashta, asintro, asitra, asitranaparda, asmantaka, asmantakah, asoda, asotaro, asundra, asundro, athi, atthi, atti, aupta, ayata, ban raj, ban raji, bannae, banne, bannemara, banraj, banraji, beriju, candrakah, chitaachi, dhorara, dondra, ghila, goddari, guli-anehnal, gural, hatera, hetri, ishae, iyuta, jezya, jhanjhora, jhinghora, jhinja, jhinjero, jhinjha, jhinjheri, jhinza, jhira, kaadumandaara, kachnaala, kachnaar, kachnal, kachnar, kanchini, kanchnal, kanchwala, kancivala, kanraja, karal, karial, kitacha, kittarasa, kittarisa, kitthirasa, kitunasa, kodavapuli, kokku mandarai, kokkumantharai, konchana, koryale, kotapuli, kovidara, kusali, kushali, maila, makkuna, malai-atthi, malayathi, manchare, manchiyaare, mandara, mandarai, mandaram, manjiyare, marvil maula, mayila, pachaare, pachare, papri, poast kachnal, sahata, sallagi, seta, seyara, shiara, shida, shlashnatvaka, sirhata, sittacha, slaksnatvak, sonan, sone (= gold), sonpatta, svetakanchan, svetakanchana, tadagi, vana sampige, vanaraja, vanasampige, vanraja, vattatthi, vellai mantarai, yamalapatraka, yamalapatrakah, yugmapatra

Bauhinia roxburghiana Voigt (*Bauhinia emarginata* G. Don)

India. Perennial non-climbing tree

See *Hortus Suburbanus Calcuttensis* 254. 1845

(Blood dysentery.)

in India: kachan

Bauhinia rufescens Lam. (*Adenolobus rufescens* (Lam.) A. Schmitz; *Bauhinia adansoniana* Guill. & Perrott.; *Piliostigma rufescens* (Lam.) Benth.)

Ghana, Nigeria, Sahel. Perennial non-climbing small trees and shrubs, papery glaucous leaves, flowers greenish-yellow to white and pale pink in few-flowered racemes, fruits edible to humans and animal, leaves and shoots valuable forage, can be planted on dunes, provides a good impenetrable browse-resistant live fence

See *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 391. 1785 and *Bulletin du Jardin Botanique National de Belgique* 43(3–4): 399. 1973, *Phytochemistry* 55(4): 349–352. 2000, *Journal of Ethnopharmacology* 69(2): 127–137. 2000, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 111(3): 625–629. 2007

(Antiplasmodial, leafy stems decoction for malaria. Crude bark to treat dysentery, smallpox and diarrhea; bark of the roots and trunk to cure chest complaints, syphilis and other venereal diseases, leprosy, diarrhea and dysentery and to reduce fever. Roots astringent, diuretic, febrifuge, decoction for conjunctivitis. Leaves antiinflammatory, cholagogue, stomachic, for cancers, skin diseases, eyes problems, conjunctivitis, ophthalmia, diarrhea, dysentery, stomachache, gingivitis; powder of dry leaves and fruits for skin diseases. Veterinary medicine, antiseptic, wound healing, leaves decoction after delivery; leaves and fruits to increase milk production and abortion.)

in Arabic: kharoub, kulkul, kulkuli

in Burkina Faso: ti pohega

in Mali: cartu-baleejo, geseme, namali, sa-dela, sa-delle, séségéré, sifile iri

in Niger: dirga, jiga, jirga, nammare, nammarehi, nammari, shishi, sisi, taedaeyni

in Nigeria: disga, matsagi, matsattsagi

in Senegal: cartu-baleejo, mamadi, namari, namariyel, nammare, rand, randa

in Sudan: kulkul

in Togo: nator

Bauhinia scala-simiae Sandwith

Guyana, Venezuela. Woody climber, scrambling, ladder-like stem flattened and pocketed, axillary racemes, corolla yellowish-white with brown veins, flat pod densely rusty-tomentose

See *Bulletin of Miscellaneous Information Kew* 1931(7): 362–363. 1931, *Mem. New York Bot. Gard.* 15(1): 112–128. 1966

(Decoction or infusion tonic, aphrodisiac; decoction useful for backache.)

in Guyana: hikuri tarafo, monkey ladder, turtle step

Bauhinia scandens L. (*Bauhinia anguina* Roxb.; *Bauhinia anguina* Roxb. var. *horsfieldii* (Miq.) Prain; *Bauhinia debilis* Hassk.; *Bauhinia horsfieldii* (Miq.) J.F. Macbr.; *Bauhinia piperifolia* Roxb.; *Bauhinia scandens* Burm. f.; *Bauhinia scandens* Roxb.; *Bauhinia scandens* Blanco; *Bauhinia scandens* Sessé & Moc.; *Bauhinia scandens* L. var. *anguina* (Roxb.) Environ and Ecoplanning* 6(2): 363–365. 2002, *Industrial Crops and Products* 27(1): 39–43. 2008

(Antitumour, antifungal and antibacterial compound from the leaves.)

in English: snake climber

in India: deo-jokhola, mei-lang-rih, naga-mu-valli, naga-valli, nagbaele, zong-lei-lon

Bauhinia semibifida Roxb. (*Phanera semibifida* (Roxb.) Benth.; *Phanera semibifida* Benth.)

Indonesia. Perennial climbing shrub

See *Hort. Bengal.* 31. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 330. 1832, *Plantae Junghuhnianae* 2: 263. 1852

(Roots decoction drunk for cough.)

in Borneo: daun bedaub

Bauhinia semibifida Roxb. var. *semibifida* (*Bauhinia borneensis* Merr.; *Phanera sumatrana* Miq.)

Indonesia. Perennial climbing shrub

See *Hort. Bengal.* 31. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 330. 1832 and *Philipp. J. Sci.*, C 11: 78. 1916

(Stem sap drunk for cough. Roots decoction drunk for cough.)

in Borneo: akar ruki, daun bedaub

Bauhinia semla Wunderlin (*Bauhinia retusa* Roxb.; *Bauhinia retusa* Roxb. ex DC., nom. illeg.; *Bauhinia retusa* Ham.; *Bauhinia retusa* F. Hamilton ex Roxburgh; *Bauhinia retusa* Buch.-Ham. ex Roxb., nom. illeg.; *Bauhinia retusa* Poir.; *Bauhinia semla* (Buch.-Ham. ex Roxb.) Wunderlin; *Lasiobema retusum* (Roxb.) de Wit; *Lasiobema retusum* de Wit; *Phanera retusa* Benth.; *Phanera retusa* (Roxb.) Benth.)

Himalayas, India. Perennial non-climbing tree, leaves as fodder, flower buds as vegetable

See *Encyclopédie Méthodique. Botanique* ... (Lamarck) Supplément 1(2): 599–600. 1811, *Hortus Bengalensis*, or a catalogue ... 31. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 515. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 322. 1832, *Plantae Junghuhnianae* 2: 263. 1852 and *Reinwardtia* 3: 538. 1956, *Taxon* 25(2–3): 362. 1976, *Biologiske Skrifter* 28: 24. 1987

(Used in Sidha. Plant astringent, antidiarrhetic, anthelmintic. Root bark decoction vermifuge, used for liver problems and gastrointestinal disorders. Gum diuretic, emmenagogue, astringent, applied to sores. Fruit diuretic. Seed hypoglycemic, tonic, aphrodisiac, a paste applied to wounds, snake and scorpions bites.)

in English: semla gum

in India: are, birnju, bunju, chekera, choari, chyakakuryal, dhondra, goddari, goddu yaade, goddukoora, goddukura, godduyaare, godduyara, godduyare, gondi, gwayral, jhinjit, kaamaun, kaimu, kanadi, kanalla, kandiawa, kandla, kandlao, kangali, kanla, kanlao, kanloo, karial, kasini, kathmahuli, katman, katmauli, koilar, koiral, kuayral, kural, kwayral, laba, laoa, makarokranda, nirapa, nirapaayamu, nirapayamu, nirpa, panki, semalaa, semla, semla gond, tewar, thaur, twar

Bauhinia sirindhorniae K. Larsen & S.S. Larsen (for HRH Princess Maha Chakri Sirindhorn.)

Thailand. Climber

See *Nordic J. Bot.* 17(2): 113–118. 1997, *Natural Medicines* 57(4): 150–153. 2003, *Thai Journal of Health Research* 19(1): 13–18. 2005, *Chiang Mai Medical Bulletin* 44(1): 1–12. 2005

(Antibacterial, antifungal, cytotoxic and free radical scavenging activities. Dried roots and stems used to cure boils and skin diseases.)

in English: bauhinia vine

in Thailand: sam sip song pra dong

Bauhinia tomentosa L. (*Alvesia bauhinioides* Welw.; *Alvesia tomentosa* (L.) Britton & Rose; *Bauhinia pubescens* DC.; *Bauhinia tomentosa* Wall.; *Bauhinia tomentosa* Vell.; *Bauhinia tomentosa* var. *glabrata* Hook.f.; *Bauhinia volkensis* Taub; *Bauhinia wituensis* Harms; *Pauletia tomentosa* (L.) Schmitz)

Southern India. Perennial non-climbing tree, small tree, yellow paired flowers, pointed pods

See *Species Plantarum* 1: 375. 1753, *A Numerical List of Dried Specimens* [Wallich] n. 5790 F-G. 1831, *Apontamentos Phytogeographicos* 1858: 587, n. 47. 1859, *Botanical Magazine* pl. 5560. 1866 and *North American Flora* 23(4): 208. 1930, *Bulletin du Jardin Botanique National de Belgique* 43: 393. 1973

(Used in Ayurveda and Sidha. Bark decoction astringent, antidysenteric, in diarrhea, worms, dysentery and liver troubles; bruised bark applied to wounds; bark infusion as an astringent gargle. Root bark vermifuge, a decoction prescribed for liver diseases. Fruit diuretic; seeds for wound healing, snakebite, poisonous animals and scorpion sting. Leaves for headache and malaria. Dried leaves, buds and flowers used in dysentery. Young pods diuretic.)

in English: bauhinia, bell bauhinia, bush neat's foot, butterfly tree, hairy bauhinia, St. Thomas tree, yellow bauhinia, yellow butterfly tree, yellow tree bauhinia

in East Africa: muandia, mulema (Kamba), murema (Kikuyu), musaponi (Swahili)

in Southern Africa: bosbeeskloou; isiThibathibana (Zulu)

in Uganda: ogal, ogali

Malay name: kupu-kupu

Bauhinia urbaniana Schinz (*Bauhinia urbaniana* Passarge; *Perlebia urbaniana* (Schinz) A. Schmitz)

Zambia, Angola, Namibia, Botswana, and Kalahari. Perennial non-climbing small shrub or treelet, pinkish purple flowers, on red loamy sand of omurambas

See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 30: 169. 1888

(Cut fresh roots cooked in water and the decoction taken as a tonic for adults in case of any sickness. The dried powdered roots mixed with vaseline and babies are rubbed with the mixture as a protection against sickness.)

in English: pink bauhinia, sand neat's foot

in Namibia: dukudunih

in South Africa: sandbeeskloou

Bauhinia vahlii Wight & Arn. (*Bauhinia racemosa* Vahl; *Bauhinia racemosa* Lam.; *Bauhinia vahlii* Fern.-Vill.; *Phanera vahlii* (Wight & Arn.) Benth.; *Phanera vahlii* Benth.)

Tropical Himalaya, India. Perennial climbing tree, robust, giant, strong, straggling, flowers yellow or white, woody dehiscent rusty velvety pod, foliage as fodder, seeds fried in butter and eaten

See *Encycl.* (Lamarck) 1(2): 390. 1785, *Symb. Bot.* (Vahl) iii. 56. t. 62. 1794, *Catalogue of Indian Plants* 38. 1833, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 297. 1834, *Plantae Junghuhnianae* 2: 262–263. 1852, *Flora de Filipinas ... Novissima Appendix ad Floram Philippinarum*. 72. Manila, 1880 and *Journal of Ethnopharmacology* 50(2): 97–102. 1996, *Journal of Herbs, Spices & Medicinal Plants* 14(3 & 4): 175–184. 2008

(Used in Ayurveda. Powdered stem bark prescribed for amenorrhoea. Seeds aphrodisiac, antibacterial, tonic, vermifuge; seed paste applied to treat boils. Root juice applied to cuts and wounds; root paste given with water in dysentery and gastrointestinal disorders. Leaves demulcent and mucilaginous. Root with fruit of *Aegle marmelos* and *Madhuca longifolia* boiled and given in malaria; powdered root with *Leucas nutans* given in snakebite. Magico-religious beliefs, tribal wear the tendrils as safeguard against any evil activities of witches; the sacred thread *Pavornonde* is made from its fibre. Veterinary medicine, flowers of *Bauhinia vahlii* mixed with rhizome of *Zingiber officinale* and seeds of pepper pounded and given to treat fever of animals.)

in English: adda leaf, camel's foot climber, maloo climber, malu creeper

in India: aadathige, aanepaada, adattige, adda, adda teega, addaku, addatiga, addatige, ane-padu, anepadu, anipadu, aptavel, asmantaka, baro lara, basaanapadaduga, basaanapadadugu, chambal, chambeli, chambil, chambuli, chambura, charbor, chearo-chal, chehur, chihor, chihurlata, hepparige, jallaur, jallur, jom, kambihoo, kambihu, kambu, kat, koja, koya, kural sak, tumandarai, madapu, madapu tige, madaputiga, mahualan, mahul, mahulan, mahul patta, mahulang,

Gard.* 25(2): 30. 1975, *Cuscatlania* 1(2): 1–16. 1979, *Listados Floristicos de Mexico* 1: 47–61 and 2: 31–38. 1983, *Indian Journal of Pharmaceutical Sciences* 58(5): 194–196. 1996, *Journal of Ethnopharmacology* 89(1): 107–109. 2003, *Biodivers. & Conserv.* 13: 459. 2004, *Journal of Ethnopharmacology* 104(3): 407–409. 2006, *Yakugaku Zasshi* 127: 1503–1507. 2007, *PTR. Phytotherapy Research* 22(7): 957–962. 2008

(Used in Ayurveda and Sidha. Non-woody aerial parts for inflammatory conditions; leaves antifungal, antibacterial, in skin diseases. Dried buds for diarrhea, worms, dysentery, piles, stomach disorders. Flower juice applied to treat boils; flowers for dysentery and gastrointestinal disorders; flower with sugar is laxative; dried flower buds used for diarrhea, dysentery and bleeding piles; fresh flowers used as mild laxative. Bark, flowers and roots for Dalton's ascitic lymphoma, dysentery, diarrhea, skin diseases, rectal prolapse, diabetes, inflammations, worms, tumors, hemorrhoids, astringent to the bowel, chemopreventive, tonic to the liver, hypoglycemic, antitumor and cytotoxic. Roots and bark astringent, vulnerary, antiinflammatory, acrid, depurative, anthelmintic, cooling. Bark hepatoprotective, antimalarial, astringent, anthelmintic, tonic; fresh bark juice with the juice of the flowers of *Strobilanthes* sp. given as an expectorant; bark powder to treat mumps, bark juice anthelmintic, astringent, for diarrhea and dysentery, to remove intestinal worm; bark

paste applied to skin diseases, muscular pain and swelling, cuts and wounds; bark decoction blood purifier, given orally for skin eruptions; stem bark paste taken orally for dysentery and stomachache. Root bark decoction used for lessening fatness. Roots decoction in dyspepsia, dysentery and flatulence; roots juice given in snakebite. Boiled seed juice in jaundice.)

in English: camel's foot, Florida tree, mountain ebony, orchid tree, poor man's orchid tree, red bauhinia, St. Thomas' tree, variegated bauhinia, variegated orchid tree

in China: lao bai hua

in India: akatuti, aranpucaikkerramaram, aranpucaimaram, arishina thaega, arisinantige, arjuna, arsanatega, ashmantaka, asphota, ayata, ayisha, barial, bhumi, bilikanchavala, bilikanchivala, bilikancivala, bilikanjivala, boda, bodanta, bodantham, calacacankati, camarika, cekappumantarai, cemmantarai, cempuvatti, cevappumantarai, cevvarattinam, chamari, chamarika, champavidala, chingthao-angouba, chommandara, chovanna-mandaru, chovannamandaree, chovannamandaru, chuvanna-mandaram, chuvanna mandram, chuvannamandaram, chuvannamandari, chuvannamundiri, civappumantarai, cuvannamandaram, cuvannamandram, daevakaanchanamu, daevakanchanamu, darichiksam, deva kanchanamu, devakanchanamu, devakanchanam, devakanchanamu, devakanjanamu, dhak, dieng, dieng long, dieng tharlong, gandari, gandhaari, girija, goriyal, gueral, guiral, guriyal, gwiar, inku-araung, irattakancanam, irkubalitu, irkumbalithu, irkumbalitu, jhinjero, kaanchana, kaanchanaar guggulu, kaanchanaara, kaanchanaaraka, kaanchanamu, kaanchnar chaal, kacanara, kachan, kachanar, kachnar, kachnar chal, kachnar chhal, kachnar ki chhal, kacini, kammukari, kammukarimaram, kanakaprabha, kanaraj, kancanakam, kancanam, kancanar, kancanara, kancanarah, kancanaraka, kanchan, kanchana, kanchanak, kanchanala, kanchanar, kanchanara, kanchanarah, kanchanaraka, kanchivala, kanchivalado, kanchiyalapada, kanchnar, kanchnar chal, kanchuval, kanchuvala, kanchvaala, kancivala, kandan, kandul, kaniar, kanjanamu, kanjivala, kantaputpam, kantar, karaka, karal, karalabhogi, karalbhogi, karbudara, karial, karyalo, kavidara, kempu kanchivaala, kempu mandara, kempukancivala, kempukancivalada, kempukanjivala, kempumandar, kempumandara, khairwal, khwairaal, khwairai, kochnarphul, kogilepukka, koilar, koiar, konar, kondaalka, kondalka, kongu, kongumandaram, konnu, konnumandaram, kotora, kovidar, kovidara, kovidarah, kovidaram, kovindaara, kuddala, kuddalah, kuddara, kuli, kundali, kuni, kunkumacemmantarai, kunkumamantari, kuntalam, kural, kurol, kwaru, madapaku, mahapushpa, malaiyatti, malayakatti, mandaara, mandara, mandaara, mandarai, mandaram, mandare, mandari, mandharai, mantarai, manthaaram, maramantarai, migong, mundari, murva, nattumantarai, padrian, pakari, palukam, palukamaram, palupam, papri, pattumantarai, pedama, peddaare, periyavatti, perumantarai, phumpe, plah, potattam, pulikogelapukka, rakta-kanchan, raktakanchan, raktakanchana, raktapushpa, raktakanchan, rimsi, segappumanchori, segappumandarai,

segappumandrai, segapu manchori, segapu-munthari, sem-mandarai, seyadla, shemmandarai, sigappu-mandarai, sigappu mandarai, shonapushpaka, sivappumanchori, sonapushpaka, suvannamandaram, suvarnara, svalpakesari, tamiram, tampiraputpi, tamrapushpa, tego, thaur, uddal-aka, ulipa, ulipe, ulpe, unna, unnu, utipa, vataraci, vau-be, vau-favang, vaube, vaufavang, vaufavang, vellaippuvatti, vennatti, yamalachhada, yamalapatrakah, yugapatraka, yug-mapatra, yugmapatra

in Lepcha: kachik koong

in Nepal: aambu, koiralo, puwangma, takki

in N. Rhodesia: msekese

Bauhinia variegata L. var. *candida* Voigt (*Bauhinia alba* Wall.; *Bauhinia alba* Buch.-Ham. ex Wall.; *Bauhinia candida* Aiton; *Bauhinia candida* Roxb.; *Bauhinia variegata* var. *alboflava* de Wit; *Bauhinia variegata* var. *candida* (Aiton) Buch.-Ham.; *Bauhinia variegata* var. *candida* (Roxb.) Voigt, nom. illeg.; *Bauhinia variegata* var. *candida* (Roxb.) Corner)

China, Pacific. Deciduous tree

See *Hort. Kew.* ii. (1789) 49. 1789, *Transactions of the Linnean Society of London* 13(2): 497. 1822, *Numer. List* [Wallich] sub n. 5796. 1831–1832, *Flora Indica*; or, descriptions of Indian Plants 2: 318–319. 1832, *Hortus Suburbanus Calcuttensis* 253. 1845 and *Reinwardtia* 3: 412. 1956, *Pharmacological Research* 52(3): 229–233. 2005

(Used in Ayurveda. Flower juice taken to treat dysentery, diarrhea and stomachache; buds decoction given in piles and against tumors. Bark astringent, anthelmintic, tonic, antioxidant, used externally in scrofula and skin diseases; bark powder to treat mumps, bark juice for diarrhea and dysentery, bark paste applied to cuts and wounds.)

in English: Buddhist bauhinia, white butterfly tree

in India: kachnar, kowidarrah

Bauhinia wallichii J.F. Macbr. (*Bauhinia macrostachya* (Benth.) Baker; *Bauhinia macrostachya* Benth.; *Bauhinia macrostachya* Wallich ex Baker; *Bauhinia macrostachya* Wall., nom. nud.; *Bauhinia melanophylla* Merr.; *Phanera macrostachya* Benth.; *Phanera wallichii* (J.F. Macbr.) Thoth.)

India. Perennial climbing shrub

See *A Numerical List of Dried Specimens* n. 5774. 1831, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 96. 1840, *Plantae Junghuhnianae* 2: 262. 1852, *The Flora of British India* 2(4): 281. 1878 and *Contributions from the Gray Herbarium of Harvard University* 59: 23. 1919

(Used in skin diseases and lesions.)

in China: yuan ye yang ti jia

in India: gandhagila, gundagilla, jong-rak-kal-hring-rang, makhori ghila, nagbeli, ram jakhola, ran jakhola

in Nepal: nagbeli

Bauhinia winitii Craib (*Lysiphyllum winitii* (Craib) de Wit)

Thailand. Shrub, climbing, perennial, leaves arranged spirally, unbranched raceme

See *Bulletin of Miscellaneous Information Kew* 1924(3): 95–96. 1924, *Reinwardtia* 3: 431, 434. 1956, *Journal of Ethnopharmacology* 119(2): 214–217. 2008

(Astringent bark. Aphrodisiac, neurotonic, PDE (Phosphodiesterases) inhibitory activity.)

in Thailand: khiunang, oraphim

Beaumontia Wallich Apocynaceae

For Lady Diane Beaumont (of Bretton Hall near Sheffield, Yorks), sent plants to N. Wallich at Calcutta Botanic Garden; see Wallich, Nathaniel (1786–1854), *Tentamen Florae Napalensis Illustratae*: consisting of botanical descriptions and lithographic figures of select Nipal plants. Calcutta: Asiatic Lithographic Press, 1826, *Tent. Fl. Nep.* 14–16. t. 7. 1824 and Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 59. London 1994, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Beaumontia brevituba Oliv.

China. Liana, white flowers

See *Hooker's Icon. Pl.* 16(4): t. 1582. 1887 [1886–1887 publ. Jun 1887] and *Phytochemistry* 29(6): 1961–1965. 1990, *Planta Medica* 58(5): 429–431. 1992, *World Journal of Microbiology and Biotechnology* 21(8–9): 1515–1519. 2005

(Cytotoxic activity of cardenolides, from the stems.)

in China: duan chang hua

Beaumontia grandiflora Wallich (*Beaumontia longiflora* Hook.f.; *Beaumontia longifolia* Lodd. ex Loudon; *Chonemorpha grandiflora* (Roth) G. Don; *Echites grandiflora* Roxburgh; *Echites grandiflorus* Stadelm.; *Echites grandiflorus* Roxb., nom. illeg., non *Echites grandiflorus* G. Mey.; *Echites grandiflorus* Roth, nom. illeg.)

Nepal, China, Vietnam. Strong, sprawling clambering woody vine, shrub, evergreen, climbing, twining, suffrutescent at base, white latex, glossy shiny dark green leaves, white cream rather fleshy funnellform flowers, faintly scented or not fragrant

See *The Civil and Natural History of Jamaica in Three Parts* 182. 1756, *Hort. Bengal.* 20. 1814, *Primitiae Florae Essequiboensis* ... 131–132. 1818, *Pl. Coromandel* 3: 78. 1820, *Novae Plantarum Species* 136. 1821, *Tentamen Florae Napalensis Illustratae* 1: 14–16, pl. 7. 1824, *Flora Indica*; or, descriptions of Indian Plants 2: 14. 1832, *Journal of Botany*, being a second series of the Botanical Miscellany 1: 286.

1834, *A General History of the Dichlamydeous Plants* 4: 76. 1837, *Flora* 24(1, Beibl. 1): 49–50. 1841, *Fl. Brit. India* 3: 660. 1882 and *Natural Medicines* 56: 19. 2002

(Leaves extract showed antiimplantational, antifertility, abortifacient and luteolytic effects.)

in English: Easter herald trumpet, Easter lily vine, heralds trumpet, Nepal trumpet flower

in China: qing ming hua, pao dan guo

in Nepal: swari phool

Beaumontia murtonii Craib (*Beaumontia fragrans* Pierre ex Pitard)

China, Pen. Malaysia. Woody vine, fragrant white flowers

See *Bulletin of Miscellaneous Information Kew* 1914(8): 282. 1914, *Fl. Indo-Chine* 3: 1236. 1933

(Latex used as an arrow poison.)

in English: heralds trumpet, Murton herald trumpet, Nepal trumpet flower

in China: si mao qing ming hua

Beesia Balf. f. & W.W. Sm. Ranunculaceae

See *Notes Roy. Bot. Gard. Edinburgh* 9: 63. 1915

Beesia calthifolia (Maximowicz ex Oliver) Ulbrich (*Beesia calthifolia* Ulbr.; *Beesia calthifolia* (Maxim.) Ulbr.; *Beesia cordata* I.B. Balfour & W.W. Smith; *Beesia elongata* Handel-Mazzetti; *Cimicifuga calthifolia* Maximowicz ex Oliver)

Myanmar, China. Ground cover, rhizomatous, shiny foliage, small white flowers, short racemes

See *Genera Plantarum* 298, 321. 1763, *Hooker's Icon. Pl.* 18(2): t. 1746. 1888 and *Notes from the Royal Botanic Garden, Edinburgh* 9(41): 63–64, pl. 148. 1915, *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 59: 245. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(98): 872. 1929, *Acta Phytotaxonomica Sinica* 23: 270–274. 1985, *Acta Phytotaxonomica Sinica* 37(1): 1–9. 1999, *Journal of Natural Products* 65(2): 147–152. 2002

(Rhizomes to treat rheumatic pain, influenza and swelling.)

in China: dian dou gen, tie po luo

Beesia deltophylla C.Y. Wu (*Beesia deltophylla* C.Y. Wu ex P.K. Hsiao)

China. Ground cover, rhizomatous, shiny foliage, small white flowers, short racemes

See *Notes from the Royal Botanic Garden, Edinburgh* 9(41): 63–64, pl. 148. 1915, *Flora Reipublicae Popularis Sinicae* 27: 91, 604 (Addenda). 1979, *Acta Phytotaxonomica Sinica* 33(3): 225–229. 1995

(Rhizomes to treat rheumatic pain, influenza and swelling.)

in China: jiao ye tie po luo

Begonia L. Begoniaceae

For the French patron of botany Michel Bégon, 1638–1710, Governor of French Canada and San Domingo. See G. Duplessis, *Un Curieux du XVII^e siècle. Michel Bégon ... Correspondance et documents inédits*, recueillis, publiés et annotés par G.D. Avec un portrait. Paris 1874, Georges Duplessis, *Un curieux du XVII^e siècle. Michel Bégon, intendant de La Rochelle*. Paris 1874, Louis Meschinot de Richemond, *Inventaire-sommaire des archives communales antérieures à 1790*. Ville de Rochefort. 1877 and Louis Delavaud and Ch. Dangibeaud, *Lettres de Michel Bégon*, annotées par ... Paris 1925–35, Yvonne Bezar, *Fonctionnaires maritimes et coloniaux sous Louis XIV. Les Bégon*. Paris 1932, *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 181–202. 1941, *Fieldiana, Bot.* 24(7/1): 157–185. 1961, *Fl. Madagasc.* 144: 1–108. 1983, *Tulane Stud. Zool. Bot.* 25(1): 1–131. 1985, *Fl. Ecuador.* 25: 1–65. 1986, Mark C. Tebbitt, *Begonias*. Brooklyn Botanic Garden 2005.

Begonia annulata K. Koch (*Begonia barbata* Wall. ex A. DC.; *Begonia griffithii* Hook.; *Platycentrum annulatum* (K. Koch) Regel)

Himalaya, India. Stipulated stem, inflorescence a few flowered cyme, pinkish perianth, pubescent capsules

See *Berliner Allg. Gartenzeitung* 1: 76. 1837, *Bot. Mag.* 83: t. 4984. 1857, *Gartenflora* 8: 15. 1859, *Prodr.* 15(1): 348. 1864

(Fresh leaf juice applied on leach bite to stop bleeding from the wound.)

in India: jabjew, shiltetui

Begonia auritistipula Y.M. Shui & W.H. Chen

Temperate Asia, China. Flowers pink

See *Acta Bot. Yunnan.* 27(4): 357–359, fig. 2. 2005

(Leaves to relieve stomachache. Stimulating blood circulation.)

in China: er tuo qiu hai tang

Begonia baramensis Merr.

Borneo. Herb, pinkish flowers, red flower stalk

See *Sarawak Mus. Journ.* iii. 529. 1928

(Leaves to relieve stomachache; roots for amenorrhea and snakebites.)

Begonia cathcartii Hook. f. & Thomson (*Platycentrum cathcartii* (Hook. f. & Thomson) Klotzsch; *Platycentrum cathcartii* Klotzsch) (after John Ferguson (Fergusson) Cathcart, 1802–1851 (Lausanne, Switzerland), Bengal Civil Service, plant collector in India (Darjeeling) and

South Africa (Cape), amateur botanist; see J.D. Hooker, *Illustrations of Himalayan plants* chiefly selected from drawings made for the late J.F. Cathcart Esq. re of the Bengal Civil Service. The plates executed by W.H. Fitch. [London 1855] and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 76. 1989, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992.)

Himalaya.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 18(2): 114, t. 5, f. 1. 1852, *Himalayan Plantst.* 13. 1855, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1854: 245. 1855

(Whole plant extract given as febrifuge and in cough and cold.)

in India: mangar kanji

Begonia crenata Dryand. (*Begonia crenata* Fisch. ex Walp., nom. inval.)

India. Small herbs, tuberous roots

See *Transactions of the Linnean Society of London* 1: 162, pl. 14, f. 3. 1791, *Repertorium Botanices Systematicae*. 2: 217. 1843

(Whole plant juice taken against acidity.)

in India: khatadi

Begonia cucullata Willd. (*Begonia agrifolia* Rojas Acosta; *Begonia cucullata* var. *hookeri* (Sweet) L.B. Sm. & B.G. Schub.; *Begonia cucullata* var. *hookeri* (A. DC.) L.B. Smith & B.G. Schub.; *Begonia cucullata* var. *hookeri* L.B. Sm. & B.G. Schub.; *Begonia paludicola* C. DC.; *Begonia semperflorens* Link & Otto; *Begonia spatulata* Lodd.)

South America.

See *Species Plantarum*. Editio quarta 4(1): 414. 1805, *Darwiniana* 5: 104. 1941

(Antiphlogistic, antibacterial, antispasmodic.)

in Japan: shiki-zaki-begoniya

Begonia floccifera Bedd.

India.

See *Icones plantarum Indiae orientalis* [Beddome] 1: 23, pl. 111. [1868–1874]

(Leaves juice cooling, to cure heart diseases and to reduce body heat.)

in India: kalthamarai

Begonia fusicarpa Irmsch. (*Begonia fusialata* Warb.)

Sierra Leone, Ghana. Herb, pinkish-white flowers, male flowers in lax cymes

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 37. 1895 and

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 76: 212. 1954

(Juice applied to wounds.)

Begonia grandis Otto ex A. DC. (*Begonia discolor* R. Brown; *Begonia erubescens* H. Lév. subsp. *evansiana* (C. Andrews) Irmscher; *Begonia evansiana* C. Andrews; *Begonia grandis* Dryand.; *Begonia grandis* Dryander; *Begonia grandis* Otto; *Knesebeckia discolor* (R. Br.) Klotzsch)

China.

See *Transactions of the Linnean Society of London, Botany* 1: 163. 1791, *Kew Index* 5: 284. 1813, *Allgemeine Gartenzeitung* 4: 349. 1836, *Monatsberichte der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 122. 1854

(Tuberous roots and fruits anodyne, antibacterial, antiphlogistic and antispasmodic; decoction in the treatment of traumatic pain, gonorrhoea, postpartum vaginal discharge.)

in English: hardy begonia

in China: qiu hai tang

Begonia heracleifolia Cham. & Schltld. (*Begonia heracleifolia* Schltld. & Cham.; *Begonia heracleifolia* var. *longipila* (Lem.) A. DC.; *Begonia heracleifolia* var. *nigricans* Hook.; *Begonia heracleifolia* var. *nigricans* (Hook.) A. DC.; *Begonia heracleifolia* var. *punctata* F. Cels; *Begonia heracleifolia* var. *sunderbrucki* C. Chev.; *Begonia heracleifolia* var. *sunderbrucki* Hort. ex C. Chevalier; *Begonia jatrophifolia* Cels; *Begonia jatrophifolia* Hort. ex Klotzsch; *Begonia longipila* Lem.; *Begonia nigricans* Klotzsch, nom. nud.; *Begonia punctata* Link & Otto; *Begonia radiata* Graham; *Begonia trigonoptera* Sprague; *Gireoudia heracleifolia* (Schltld. & Cham.) Klotzsch; *Gireoudia heracleifolia* var. *punctata* (F. Cels) Klotzsch; *Gireoudia heracleifolia* var. *viridis* Klotzsch; *Gireoudia punctata* (Link & Otto) Klotzsch)

Mexico. Herb, perennial, short creeping rhizome, flowers pink

See *Linnaea* 5: 603–604. 1830, *Edinburgh Philosophical Journal* 1833: 182. 1833, *Icones Plantarum Rariorum* 1: 16, t. 7. 1840, *Journal des Jardins* 1842: 104. 1842, *Bericht über die zur Bekanntmachung geeigneten Verhandlungen der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1854: 125. 1854, *Bulletin, University Museum, University of Tokyo* 1854: 215. 1855, *Botanical Magazine* 83: pl. 4983. 1857, *L'illustration horticole* 8: t. 307. 1861, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 335. 1864 and *Bulletin of Miscellaneous Information Kew* 1921: 218. 1921, *Planta Medica* 64(4): 385–386. 1998, *Economic Botany* 54(1): 73–81. 2000, *Journal of Ethnopharmacology* 79(1): 129–132. 2002, *Journal of Ethnopharmacology* 88(2–3): 119–124. 2003

(Antibacterial and antifungal, strong antiproliferative activity towards tumor and immune cells.)

in English: star begonia, star-leaf begonia

Begonia humilis Dryand. (*Begonia humilis* A. DC.; *Begonia lokobeensis* Humbert ex Keraudren & Bossier; *Begonia lucida* Haw.; *Begonia meyeniana* Walp.; *Begonia pavoniana* A. DC.; *Begonia subhumilis* A. DC.)

Madagascar, West Indies to Peru and Brazil.

See *Hortus Kewensis*; or, a catalogue ... 3: 353. 1789, *Saxifragearum Enumeratio* 197. 1821, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 16, suppl., 2(19, suppl.1) 409. 1843, *Annales des Sciences Naturelles; Botanique*, série 4 11: 124, 142. 1859 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 181–202. 1941, *Bulletin du Muséum d'Histoire Naturelle*, sér. 3, 47: 80. 1972

(Herb teas for cough, cold, fever.)

Begonia inflata C.B. Clarke

India. Succulent herb, flowers in cyme, young shoots eaten as chutney

See *The Flora of British India* [J.D. Hooker] 2: 636. 1879

(Plant digestive, stomachic, fresh plant taken for food allergy; plant eaten raw against dysentery and diarrhea; whole plant boiled with the bark of *Engelhardia spicata* and the liquid drunk for dysentery and piles. Roots decoction drunk as a remedy for genitourinary troubles; crushed root juice taken to cure malaria.)

in India: magarkachae, se-khup-thur, sekhupthur

Begonia isoptera Dryand. ex Sm.

Asia tropical, Thailand, Malaysia, Indonesia. Herb, creeping, lowland forest

See *Plantarum Icones Hactenus Ineditae* pl. 43. 1790 and *Journal of Ethnopharmacology* 45(2): 75–95. 1995, Doorenbos, J. et al. "The sections of *Begonia*." *Agric. Univ. Wageningen Pap.* 98–2: 240. 1998, *Contr. U.S. Natl. Herb.* 43: 74. 2002

(Leaves paste applied to fractures, enlarged spleen.)

in Indonesia: reriang

Malay name: riang batu

Begonia josephii A. DC.

India.

See *Annales des Sciences Naturelles; Botanique*, série 4 11: 126. 1859

(For stomachache and indigestion, bulbs eaten raw.)

in China: chong chi qiu hai tang

in India: chulon derm, jajew

Begonia laciniata Roxb.

India.

See *Hortus Bengalensis*, or a catalogue ... 68. 1814, *Num. List n.* 3678B, 1831, *Flora Indica*; or, descriptions of Indian Plants 3: 649. 1832

(Whole plant paste eaten for stomachache and diarrhea.)

in India: alikhaba-tasola

Begonia longifolia Blume (*Begonia aptera* Hayata; *Begonia crassirostris* Irmsch.; *Begonia hayatae* Gagnep.; *Begonia inflata* C.B. Clarke; *Begonia tricornis* Ridl.; *Begonia trisulcata* (A. DC.) Warb.; *Casparya trisulcata* A. DC.)

India, China. Herb, shrub-like, erect, non-rhizomatous, very short axillary inflorescence, flowers white

See *Catalogus* ... 102. 1823, *The Flora of British India* 2: 636. 1879 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 122–123. 1911, *Bulletin du Muséum d'Histoire Naturelle* 25: 282. 1919, *Mitteilungen aus dem Institut für allgemeine Botanik in Hamburg* 10: 513. 1939, *Agric. Univ. Wageningen Pap.* 98–2: 243. 1998, *Contr. U.S. Natl. Herb.* 43: 85. 2002, *Brittonia* 55(1): 19–29. 2003

(For stomachache.)

in China: cu hui qiu hai tang

in India: magarkachae, sekhupthur

Begonia magnifolia Noronha

Malaya, India.

See *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 8. 1790

(Pulp of the stem mixed with fermented millet grain and applied on swellings.)

in India: bukuyolo

Begonia malabarica Lam.

SE Asia.

See *Encyclopédie Méthodique, Botanique* 1: 393. 1785, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 392. 1864 *Journal of Ethnopharmacology* 79(1): 129–132. 2002

(Antibacterial and antifungal.)

in India: minukki, tsjeria-narinampuli

Begonia nepalensis (A. DC.) Warb. (*Begonia gigantea* (A. DC.) Wall. ex C.B. Clarke, nom. superfl.; *Begonia gigantea* Wall.; *Begonia nepalensis* Warb.; *Begonia nepalensis* var. *micropteron* (A. DC.) J. Door.; *Begonia nepalensis* var. *micropteron* (A. DC.) J. Door. ex F.A. Barkley & Golding; *Mezierea nepalensis* A. DC. var. *micropteron* A. DC.)

India, Nepal, Himalaya.

See *Numer. List* [Wallich] n. 3677 B. 1831, *Annales des Sciences Naturelles; Botanique*, série 4, 11: 144. 1859, *Prodr.* (DC.) 15(1): 277. 1864 [May 1864], *The Flora of British India*

2: 636, 643. 1879, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(6A): 142. 1894 and *Check List of Begonia Names* 35. 1971, *The Species of the Begoniaceae* ed. 2: 85. 1974

(Leaf with petiole ground and the juice taken in stomachache; leaf paste with powder of *Curcuma longa*, white yolk of hen's egg mixed and made into a paste applied on stomach region against stomachache.)

in India: chincharach

Begonia palmata D. Don (*Begonia palmata* Pav. ex A. DC., nom. illeg.)

India, Nepal. Stem used a vegetable

See *Prodromus Florae Nepalensis* 223. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 307. 1864

(Root decoction drunk for fever and liver complaints. Stem used orally to relieve cough and cold; twigs and leaves chewed and the juice swallowed for urinary troubles; stem and leaves eaten raw as an antidote for poisoning and vomiting; leaves and leafstalk taken to treat throat congestion and pain, cold and fever.)

in China: lie ye qiu hai tang

in India: alampua, baya, bayia, hurmaw, teisu

Begonia picta Sm. (*Begonia echinata* Royle; *Begonia picta* Wall.; *Begonia picta* Hort. ex Hend.)

India. On moist moss-covered rocks

See *Exotic Botany* 2: 81, pl. 101. 1805, *A Numerical List of Dried Specimens* [Wallich] no. 3685 A. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 313, pl. 80, f. 1. 1839

(Whole plant eaten raw for stomachache, gas troubles and indigestion; plant juice given to relieve headaches. Warm juice from the leaves applied to ulcer of the mouth and for bristles of the tongue; root juice given for peptic ulcer.)

in China: zhang mu qiu hai tang

in India: alikhaba, kokora, lalruangaarawhna, longsilawa, patharchatta

in Nepal: braju, keyubro, kyubro, kyumru, magarkanche, magarkanchuli, namkimro, pragyum

Begonia plebeja Liebm. (*Begonia barsalouxiae* Standl. & L.O. Williams; *Begonia fissurarum* C. DC.; *Begonia glandulosa* Donn. Sm.; *Begonia leptophylla* C. DC.; *Begonia plebeja* var. *kennedyi* Ziesenh.; *Begonia ripicola* C. DC.; *Begonia tenuipila* C. DC.; *Begonia tenuipila* var. *kennedyi* (Ziesenh.) Ziesenh.; *Begonia uvana* C. DC.; *Gireoudia plebeja* (Liebm.) Klotzsch)

Costa Rica, Nicaragua.

See *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(1): 8. 1852, *Bericht über die zur*

Bekanntmachung geeigneten Verhandlungen der Königlich Preussischen Akademie der Wissenschaften zu Berlin 1854: 125. 1854 and *Ceiba* 1(3): 154. 1950, *Fieldiana, Bot.* 24(7/1): 157–185. 1961, *Tulane Stud. Zool. Bot.* 25(1): 103–104. 1985

(Sap applied directly to sores of the mouth as an astringent.)

Begonia rex Putz.

India.

See *Flore des Serres et des Jardins de l'Europe* 2: 141, pls. 1255 & 1258. 1857

(Calcium oxalate crystals. Plant juice poisonous to leeches; the juice given to relieve headaches.)

in English: elephant's ear, king begonia, painted-leaf begonia

in China: da wang qiu hai tang

in India: lalruanga-dar-nawhna, thunyu-no

in Japan: ôba-begoniya

Begonia roxburghii A. DC.

India. Succulent herb, rootstock, toothed ovate leaves, white fragrant flowers, winged fruits, leaves and petiole used as vegetable

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(1): 398. 1864

(Whole plant decoction taken in dysentery. Raw leaves eaten for indigestion; leaves heated and bound on the affected part for relief from swelling and inflammation. Rootstock pounded and applied on itches.)

in India: babrai, bikhu-hamang, chuwat, hati njerang, se-khup-thur

Begonia semiovata Liebm. (*Begonia flexuosa* A. DC.; *Begonia guyanensis* A. DC.; *Begonia guyanensis* A. DC. var. *glaberrima* C. DC. ex Donn.Sm.; *Begonia guyanensis* var. *glaberrima* C. DC.; *Begonia spruceana* A. DC.)

Nicaragua. Vine, succulent leaves and stems

See *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(1): 22. 1852, *Annales des Sciences Naturelles; Botanique, série 4* 11: 142. 1859, *Bot. Gaz.* 20(12): 540. 1895

(Stems and leaves cooked and eaten to treat vomiting and diarrhea.)

Begonia × tuberhybrida Voss

South America.

See *Brittonia* 17(2): 112–120. 1965

(Low toxicity if eaten; rhizomes, thickened rootstock, tubers and roots the poisonous parts.)

in English: hybrid tuberous begonia, tuberous begonia

Beilschmiedia Nees Lauraceae

After the German botanist Carl (Karl) Traugott Beilschmied, 1793–1848, apothecary, author of *Ueber einige bei pflanzengeographischen Vergleichen zu berücksichtigende Punkte, in Anwendung auf die Flora Schlesiens*. Breslau 1829, and *Pflanzengeographie, nach A. von Humboldt's Werke ueber die geographische Vertheilung der Gewächse*, etc. Breslau 1831. See Nathaniel Wallich (1786–1854), *Plantae Asiaticae rariores*. 2: 61, 69. London 1831, *Flora Novae-Zelandiae* 1: 217. 1853, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(55): 434. 1884 and *Bulletin du Muséum d'Histoire Naturelle* 26: 652. 1920, *Recueil Trav. Bot. Nierl.* 35: 839. 1938, *Fieldiana, Bot.* 24(4): 302–344. 1946, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 155. 1965.

Beilschmiedia mannii Robyns & R. Wilczek (*Afrodaphne mannii* Stapf; *Afrodaphne mannii* (Meisn.) Stapf; *Beilschmiedia cuspidata* (Kraenzl.) Robyns & R. Wilczek; *Beilschmiedia mannii* (Meisn.) Benth. & Hook. f.; *Oreodaphne mannii* Meisn.; *Tylostemon cuspidatus* Kraenzl.; *Tylostemon kamerunensis* Engl. & Kraenzl.; *Tylostemon mannii* (Meisn.) Stapf)

Tropical Africa. Tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 130. 1864, *Genera Plantarum* 1: 158. 1880 and *Flora of Tropical Africa* 6(1): 178. 1909, *Bot. Jahrb. Syst.* 46: 148. 1911, *Bulletin du Jardin Botanique de l'État* 19: 463. 1949, *Bulletin du Jardin Botanique de l'État* 20: 211. 1950

Beilschmiedia pahangensis Gamble

Malay Peninsula, Pahang.

See *Bull. Misc. Inform. Kew* 150. 1910

(Seeds, stem and leaves for dysentery, headache. Stomachic, the bark decoction for stomach trouble after childbirth. Root decoction for dysentery, diarrhea.)

Malay names: medang pungoh, medang salah, medang sera, pinang pergam, rambutan pachat, tampu rengat

Beilschmiedia towarensis (Klotzsch & H. Karst. ex Meisn.) Sa. Nishida (*Aniba pseudo-coto* (Rusby) Kosterm.; *Hufelandia towarensis* Klotzsch & H. Karst. ex Meisn.)

South America.

See *Hufelandiae Illustratio* 11, 21. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 65–66. 1864 and *Bulletin of the Torrey Botanical Club* 49(9): 261–262. 1922, *Recueil des Travaux Botaniques Néerlandais* 35: 872–873. 1938, *Annals of the Missouri Botanical Garden* 86(3): 696. 1999

(Aromatic, antiseptic.)

Bellendena R. Br. Proteaceae

After the British (b. Hants) botanist John Bellenden Ker (*olim* Gawler), 1764–1842 (Ramridge, Hants), from 1815 to

1824 editor of the *Botanical Register*, among his works are *The authentic Account of Mr. Gawler's being turned out of the Army*. London 1793, *Recensio plantarum*. London 1801, *A review of the genus Amaryllis*. London 1817, *An Essay on the Archaeology of our Popular Phrases, and Nursery Rhymes*. London 1837 and *Iridearum genera*. Bruxellis 1827. See *Trial for adultery. The proceedings on the trial of J.B.G. for criminal conversation with Lady Valentia*, in the Court of King's Bench. London 1799, Robert Brown, in *Transactions of the Linnean Society of London. Botany*. 10: 166. 1810, Antoine Lasègue (1793–1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845 and R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 173–174. 1947, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, Emil Bretschneider, *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981, *Telopea* 7: 181–185. 1997.

Bellendena montana R. Br.

Australia.

See *Transactions of the Linnean Society of London* 10: 166. 1810 and *Planta Med.* 41(4): 379–385. 1981

(Alkaloids.)

in English: mountain rocket

Bellis L. Asteraceae

Bellis, *bellidis*, Latin name for the white daisy, ox-eye, *Bellis perennis* L.; see Carl Linnaeus, *Species Plantarum*. 2: 886–887. 1753 and *Genera Plantarum*. Ed. 5. 378. 1754.

Bellis perennis Linnaeus

Mediterranean. Perennial herb, short rhizomes

See *Species Plantarum* 2: 886–887. 1753 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Watsonia* 11: 211–223. 1977, *Taxon* 29: 713–714. 1980, *Izvestiia Akademii Nauk Belorusskoi SSR: Serii Biologicheskikh Nauk* 2: 7–12. 1983, *CIS Chromosome Information Service* 45: 3–4. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Pharmazie*. 45(8): 618–20. 1990, *Flora Mediterranea* 1: 157–173. 1991, *Biologia* 48: 441–445. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Planta Med.* 63(6): 503–7. 1997, *American Journal of Botany* 86(7): 1003–1013. 1999, *Opera Botanica* 137: 1–42. 1999, *Complementary Therapies in Med.* 13(2):87–90. 2005

(Homeopathic medicine. Treatment with homeopathic *Arnica montana* and *Bellis perennis* may reduce postpartum blood loss, as compared with placebo. Haemolytic, antimicrobial, antifungal, vulnerary. Plant decoction for stomachaches.)

in English: common daisy, daisy, English daisy, English lawndaisy, European daisy, garden daisy, hens and chickens, lawndaisy, red daisy, true daisy

in Italian: pratolina

in Japan: hina-giku

Belostemma Wallich ex Wight Asclepiadaceae (Apocynaceae)

From the Greek *belos* 'arrow' and *stemma* 'a crown', see *Contributions to the Botany of India* 52. 1834.

Belostemma cordifolium (Link, Klotzsch & Otto) P.T. Li (*Echites sinensis* hort. Angl. ex Walpers, nom. nud.; *Hybanthera cordifolia* Link, Klotzsch & Otto; *Tylophora cordifolia* Thwaites; *Tylophora cordifolia* (Link, Klotzsch & Otto) Benth. & Hook. f. ex Kuntze, nom. illeg., non *Tylophora cordifolia* Thwaites; *Tylophora thwaitesii* K. Schum.; *Vincetoxicum cordifolium* Kuntze; *Vincetoxicum hybanthera* Kuntze)

India, China. Scandent shrub, flowers yellow or yellowish, cultivated

See *The Civil and Natural History of Jamaica in Three Parts* 182. 1756, *Genera Plantarum* 130. 1776, *Prodromus Florae Novae Hollandiae* 460. 1810, *Prodromus Florae Norfolkicae* 59. 1833, *Contributions to the Botany of India* 52. 1834, *Icones plantarum rariorum horti regii botanici berolinensis ... 2*: 109–111, pl. 44. 1844, *Repertorium Botanices Systematicae*. 6: 491. 1847, *Enumeratio Plantarum Zeylaniae* 196. 1860, *Revisio Generum Plantarum* 2: 422–425. 1891, *Die Natürlichen Pflanzenfamilien* 4(2): 286. 1895 and Atal C.K. et al. "Immunomodulating agents of plant origin. I: Preliminary screening." *J. Ethnopharmacol.* 18(2): 133–41. 1986, *Journal of South China Agricultural University* 15(1): 64. 1994, *J. Med. Food.* 7(3): 343–348. 2004

(Commonly used in the Ayurvedic and Unani systems of medicine for treatment of chronic infections and immunological disorders. Vesicant.)

in China: xin ye jian yao teng

Benincasa Savi Cucurbitaceae

Named after the Count Giuseppe Benincasa (alias Giuseppe Casabona, Joseph Goodhouse, Josef Goodenhuysen), d. 1596, Flemish botanist, Director of the Orto dei Semplici in Florence, from 1592 to 1596 Praefectus of the third Botanic Garden in Pisa. See Gaetano Savi (1769–1844), *Memoria sopra una pianta cucurbitacea*. Milano 1818 [Reprinted from *Biblioteca Italiana*. 9: 158–165, f. a-g. 1818] and *Lexikon Generum Phanerogamarum* 95. 1903, A. Chiarugi, "Le date di fondazione dei primi orti botanici del mondo." *Nuovo Giorn. Bot. Ital.*, n.s., 60: 785–839. Firenze 1953, *Fl.*

Mascareignes 101: 1–21. 1990, *Fl. Venezuela* 5(1): 11–202. 1992, *Etnofl. Yucatanense* 22: 1–315. 2004.

Benincasa hispida (Thunb.) Cogn. (*Benincasa cerifera* Savi; *Benincasa hispida* Cogn.; *Cucurbita hispida* Thunberg)

China. Vine, hairy climber, branched 2-fid tendrils, large yellow flowers, spreading petals, edible ellipsoid fruit with bluish-white waxy bloom

See *Nova Acta Regiae Soc. Sci. Upsal.* iv. 38. 1783, *Syst. Veg.*, ed. 14, (J.A. Murray). 868. 1784, *Flora Japonica*, ... (Thunberg) 322. 1784, Savi, Gaetano (1769–1844), *Memoria sopra una pianta cucurbitacea [Benincasa cerifera]*. Milano, 1818 [*Bibliot. Ital.* (Milan) ix. 158. 1818], *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 513. 1881 and *Journal of Ethnopharmacology* 78(2–3): 159–164. 2001, *Indian Journal of Pharmacology* 34: 365–366. 2002, *Journal of Ethnopharmacology* 97(3): 509–513. 2005

(Used in Ayurveda, Unani and Sidha. Plant decoction used in dropsy to wash the body. Dried bark in cough. Leaves for dysentery, measles, edema, bruises; leaves juice used in catarrhal affections of children; leaves chewed to relieve toothache. Leaves, stems, fruit and seeds antifungal. Seeds demulcent, anthelmintic, vermicide, antiinflammatory, antiangiogenic, used for gonorrhoea; ripened seeds pasted and taken with water against intestinal worms. Fruit tonic, antihistaminic or anticholinergic, diuretic, alterative, anti-ulcerogenic, astringent, anthelmintic, aphrodisiac, sedative, demulcent, febrifuge, tonic and styptic, a treatment for jaundice, edema, stomachache, fever, diabetes; fruit decoction laxative and styptic, useful in diabetes; fruit juice taken in insanity, epilepsy, nose bleeding, dysentery and diabetes; ash applied to painful wounds. Root paste applied to boils and swellings; roots for gonorrhoea; ground root taken for asthma.)

in English: ash gourd, ash pumpkin, Chinese fuzzy gourd, Chinese preserving melon, Chinese watermelon, Chinese winter melon, tallow gourd, tunka, wax gourd, white gourd, white gourd melon, white pumpkin, zit-kwa

in China: dong gua, pai kua, shui chih, ti chih, tung kua, tung-kua p'i

(Antimicrobial, antifungal, for abdominal pain, throat infections, scorpion sting.)

in India: ben-kara, kuthupidari, pedalli, pidathi, pudan, siru-karai, thermuti, thermutti

Bentinckia A. Berry ex Roxb. Areaceae

Named after Lord William Henry Cavendish-Bentinck, 1774–1839, Governor-General of India from 1828 to 1835; see [Margaret Cavendish Bentinck, Duchess of Portland, 1715–1785], *Catalogue of the Portland Museum*, lately the property of the Duchess Dowager of Portland ... which will be sold by auction ... on Monday the 24th of April, 1786, etc. (By John Lightfoot) [1786] and D. Padmanabhan & D. Regupathy, “Studies on *Bentinckia condapanna*: I. The fruit and the seed.” *Principes* 25(4): 172–177. 1981, K.S. Manilal & C. Renuka, “Etymology of *Bentinckia condapanna*.” *Principes* 27(3): 138–139. 1983.

Bentinckia condapanna Berry ex Roxb. (*Bentickia coddapanna* Berry)

Southern India. Single-stemmed palm tree, endangered, fast growing, vigorous, solitary, arching fronds, sparse crown, pinnate, small flowers sunken in branches of spadix, male flowers scarlet, female flowers lilac or violet, palm’s cabbage eaten by elephants

See *Fl. Ind.* ed. 1832, 3: 621. 1832, *Fl. Madras* 3: 1555. 1998 (Fruits for asthma.)

in English: hill areca nut, Lord Bentinck’s palm

in India: kantakkamuka, kantal, kantha kamuku, kantha panai, kanthakamugu, kanthal, varei kamugu, varukamuvu

Berberis L. Berberidaceae

From the Arabian name for the fruit; see Carl Linnaeus, *Species Plantarum* 1: 330–331. 1753, *Genera Plantarum*. Ed. 5. 153. 1754, *The Genera of North American Plants* 1: 211–212. 1818 and *Ill. Fl. N. U.S.* ed. 2. 2: 127. 1913, *Journal of the American Pharmaceutical Association* 42(2): 111–116. 1953, *J. Linn. Soc., Bot.* 57(369): 1–410. 1961, *Notes Roy. Bot. Gard. Edinburgh* 42(3): 535–536, 538, 540, 542, 544, 550–551. 1985, *Southw. Naturalist* 32(4): 487. 1987. The genus *Berberis* is divided into two genera, *Berberis* and *Mahonia*, by some authors.

Berberis actinacantha Mart. (*Berberis actinacantha* Mart. ex Schult.f.; *Berberis actinacantha* var. *crispa* (Gay) Reiche; *Berberis actinacantha* var. *crispa* Reiche; *Berberis brachyacantha* Phil. ex Reiche; *Berberis congestiflora* var. *hakeoides* Hook. f.; *Berberis coquimbensis* Muñoz; *Berberis crispa* Gay; *Berberis florida* Phil.; *Berberis variiflora* C.K. Schneid.)

South America, Chile. Shrub

See *Systema Vegetabilium* 7(1): 12. 1829, *Flora Chilena* 1: 86. 1845, *Linnaea* 33: 5. 1864, *Botanical Magazine* t. 6770. 1884, *Anales de la Universidad de Chile* 88: 95–96. 1894, *Flora de Chile* 1: 41. 1896 and *Bulletin de l’Herbier Boissier*, sér. 2, 5: 146–147. 1905, *Agricultura Técnica* (Santiago) 8(2): 79, f. 6–9. 1948, *Ann. Missouri Bot. Gard.* 86(4): 793–834. 1999 [2000]

(Stem decoction with sugar given to reduce fevers.)

in Chile: michay

Berberis aggregata C.K. Schneid. (*Berberis aggregata* var. *integrifolia* Ahrendt; *Berberis brevipaniculata* C.K. Schneid.)

China. Shrub

See *Bulletin de l'Herbier Boissier*, sér. 2, 8(3): 203, 263. 1908, *Journal of the Linnean Society, Botany* 57: 203. 1961

(Antibacterial.)

Berberis amurensis Rupr.

Manchuria, China, Korea. Shrub

See *Bull. Phys.-Math. Acad. Petersb.* xv. (1857) 260. 1857, *Tent. Fl. Uss.* 46. 1861

(Root antirheumatic, antibacterial, antitumour.)

Berberis angulosa Wall. ex Hook. f. & Thomson (*Berberis angulosa* Wall.)

India, Nepal.

See *Numer. List* [Wallich] n. 1475. 1829, *Flora of India*: [Hooker f. & Thomson] 1: 227. 1855 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970

(Roots antibacterial, used for cough, cold, fevers, dysentery.)

in Nepal: kyunudzu

Berberis aquifolium Pursh (*Berberis aquifolium* Pursh var. *aquifolium*)

Berberis piperiana (Abrams) McMinn; *Mahonia aquifolium* (Pursh) Nuttall; *Mahonia piperiana* Abrams; *Odostemon aquifolium* (Pursh) Rydb.)

North America. Evergreen perennial shrub, see also *Berberis dictyota*

See *Fl. Amer. Sept.* (Pursh) 1: 219, pl. 4. 1814[1813], *Gen. N. Amer. Pl.* [Nuttall]. 1: 212. 1818 and *Bull. Torrey Bot. Club* 33(3): 141. 1906, Abrams, L. "The mahonias of the Pacific states." *Phytologia* 1: 89–94. 1934, *Syesis* 10: 125–138. 1977, *Syst. Bot.* 7: 48–59. 1982

(Panacea, tonic, antibacterial, antitumor, blood tonic, cholagogue, diuretic, laxative. Root preparations used for stomach trouble, hemorrhages, and tuberculosis; an eye wash, to purify blood. Leaves and roots used in steam baths to treat yellow fever; a poison; tips of stems to treat stomachache. *Mahonia aquifolium* considered poisonous.)

in English: blue barberry, holly barberry, holly mahonia, mountain grape, Oregon grape

Berberis aristata DC. (*Berberis aristata* Sims)

Temperate Himalaya. Thorny evergreen shrub, erect, yellowish wood, simple or branched spines, ovate stalked leathery leaves, golden yellow flowers in a raceme, ripe fruits eaten raw or pickled

See *Syst. Nat.* [Candolle] 2: 8. 1821, *Bot. Reg.* 9: t. 729. 1823, *Bot. Mag.* 52: t. 2549. 1825, *Prodr. Fl. Nepal.* 204. 1825 and *Journal of Cytology and Genetics* 23: 219–228. 1988, *Phytotherapy Research* 9(7): 489–494. 1995

(Used in Ayurveda, Unani and Siddha/Sidha. Antibacterial, diaphoretic, laxative, antidiarrheal, astringent, alterative, hepatoprotective, deobstruent, tonic, antiperiodic, antiosteoporosis, antidote, in treatment of joint pain and also used in alleviating symptoms of menopause, in treatment of postmenopausal osteoporosis. Fruit cooling and laxative. Root and dried bark astringent, antiperiodic, used in jaundice, malaria and diarrhea; root used externally to cure eye disease; paste of fresh roots for headache. Concentrated root bark or stem bark decoction for eye inflammation and infection, fevers and boils; bark for fevers, diarrhea, cough, eye infection, and as an antidote. Bark piscicide.)

in English: berberry, chitra, Indian barberry

in Bhutan: skyer-pa-dkar-po

in India: aarghis, aargis, ambar-baris, ambarbaris, anbarbaris, baagi soothra, bagisutra, bagisutrum, cailapitti, chitra, chotra, chotru, chuthrakilmora, daaruhaldi chahal, daaruhaldi kacchi, dar-chob, dar-hald, darhald, darhald nim kofta, darhaldi, daru, daru haldi chal, daru haridara (daru, wood; haridara, turmeric), daruhalad, daruhald, daruhalder, daruhaldi, daruhaldi chhal, daruhalood, daruharidar, daruharidra, darunisa, darurajani, darvi, doddamaradarsina, ehitra, filzahrah, filzahraj, gantarishina, huzuze-hindi, kaliyaka, kash-mal, kashmal, kashmar, kasmal, kasmale, kastaranjani, kastroori pushpa, kasturi-paspu, kasturimanjal, kasturipaspu, kata, katankateri, katankati, kateri, kemal, khepacho, kilmora, kottukkala, maradarisina, maramancal, maramanj, maramannal, mullukala, mullukkala, pacampaca, parjanya, pil-zahrah, pita-daru, rasanjana, rasaunt, rasaut, rasaut musaffa, rasaut mussafa, rascut, rasvat, suvarnavarna, ucikala, usikkala, zarishk, zarishjk, zirishk

in Nepal: ban chutro, chitra, chomaphram, chutro, daru haridra, kerpak, marpesi, pichyar, tigiri chyungwa

in Tibet: lig mig, skyer ba, skyer dkar bar sun, skyer pa, skyer-rtsa yun-ba, yun-ba

Berberis asiatica Roxb. (*Berberis asiatica* Roxb. ex DC.; *Berberis asiatica* Griff.)

India, Nepal. Evergreen shrub, erect, thorny, yellow flowers in simple inflorescence, ovoid berries, ripe fruits edible

See *Syst. Nat.* [Candolle] 2: 13. 1821, *Icon. Pl. Ind. Orient.* [Wight] 4: t. 648. 1840 and *Taxon* 24: 501–516. 1975, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Journal of Ethnobiology and Ethnomedicine* 6: 3. 2010

(Used in Ayurveda and Unani. Plants used for ophthalmological problems, toothache, kidney problems and menstrual disorders. Stem bark infusion given in menstrual disorders; stem decoction for rheumatism. Dried leaf powder mixed with castor oil and the paste applied for swelling on ailing part of the

body; tender leaf buds chewed and kept in mouth to relieve dental caries. Ripe fruits given as a mild laxative to children. Roots antibacterial, stomachic, laxative, astringent, cooling, febrifuge, odontalgic, ophthalmic, tonic, for jaundice, bleeding piles, snakebite and eye complaints; roots made into a paste with water applied on wounds and inflammations; root dried extract as blood purifier; root bark decoction for eye trouble and for boils. Magico-religious beliefs, ritual, young shoots used to drive away evil spirits from houses.)

in English: barberry

in India: ambar-baris, anbar-baris, chitrokankra, daaruhaldi chaal, daaruhaldi kacchi, daaruhaldi kapchi, dar-chob, dar-hald, darhuld, daru, daru-haldi, daru haldi ki chhal, daru-halad jadh, daruhaldi, daruhaldi chal, daruhaldi choti lakadi, daruharidra, daruhuld, darumool, darunisa, darunisha, darupita, darvi, dvtiyabha, fil-zahrah, fil-zahraj, haimavati, haridra, hemakanti, hemkranta, huzuze-hindi, kaliyaka, kapitaka, karkatini, karnavati, kashmal, kashtha, kashtharajani, kasmal, katankateri, kemal, khapacho, kilmora, kingora, kingori, marmmari, mosholi, nirdishta, pacampaca, pachampacha, parjani, parjaniya, pil-zahrah, pita, pitadaru, pitadru, pitatvaka, pitika, rasanjana, rasaunt, rasort, rasvat, sthirraga, sumlu, ucikkala, zarishk

in Nepal: chutro, chutrol, kerpak, pichyar

Berberis canadensis Miller

North America. Perennial shrub

See *Gard. Dict.*, ed. 8. *Berberis* no. 2. 1768

(Antibacterial, scraped bark infusion taken to treat diarrhea.)

in English: American barberry

Berberis ceratophylla G. Don

India, Nepal.

See *A General History of the Dichlamydeous Plants* 1: 115. 1831

(Stem bark antibacterial, used for fever.)

in Nepal: kyerpa

Berberis chitria Lindl. (*Berberis chitria* Ahrendt, nom. illeg.; *Berberis chitria* D. Don; *Berberis chitria* Buch.-Ham.; *Berberis chitria* Buch.-Ham. ex Lindl.; *Berberis chitria* Buch.-Ham. ex Ker Gawl., nom. illeg. nom. superfl.)

Nepal, India. Shrub, dark-red prickly stem

See *Syst. Nat.* [Candolle] 2: 8. 1821, *Botanical Register*; consisting of coloured ... 9: t. 729. 1823, *Prodromus Florae Nepalensis* 204. 1825 and *Journal of Botany, British and Foreign* 80(950, Suppl.) 83 (-85). 1942

(Used in Ayurveda and Unani. Roots and stem bark blood purifier, used for fever, urinary complaints and eye ailments. Antibacterial, stomachic, cooling, febrifuge, odontalgic, ophthalmic, tonic. Filtered root bark extract for eye disorders,

skin diseases, menorrhagia, diarrhea; juice of the bark to treat peptic ulcers. Root decoction for fever, diarrhea and piles. Stembark decoction for eye inflammation and infection)

in English: barberry, Indian barberry

in India: chitter, chotar, chutro, chutrum, kashmal, kashmoi, kasmal, kingor, kingore, totaru

in Nepal: ban chutro, chutro, kerpak

Berberis crataegina DC. (*Berberis vulgaris* var. *crataegina* (DC.) Hook. f. & Thomson)

India.

See *Systema Naturae* [Candolle] 2: 9. 1821, *The Flora of British India* 1: 109. 1872 and *Journal of Ethnopharmacology* 79(2): 237–248. 2002

(Extracts obtained from the roots used as antiinflammatory, analgesic and febrifuge.)

Berberis dictyota Jepson (*Berberis aquifolium* Pursh; *Berberis aquifolium* Pursh var. *dictyota* (Jepson) Jepson; *Berberis californica* Jepson; *Mahonia aquifolium* (Pursh) Nuttall; *Mahonia californica* (Jeps.) Ahrendt; *Mahonia dictyota* (Jepson) Fedde; *Odostemon dictyota* (Jeps.) Abrams)

North America. Evergreen perennial shrub or subshrub, see also *Berberis aquifolium*

See *Fl. Amer. Sept.* (Pursh) 1: 219, pl. 4. 1814[1813], *Gen. N. Amer. Pl.* [Nuttall]. 1: 212. 1818, *Bull. Torrey Bot. Club.* 18: 319. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 31(1–2): 89. 1901, *Bull. Torrey Bot. Club* 33(3): 141. 1906, *Bulletin of the New York Botanical Garden* 6(21): 360. 1910, *A Flora of California* 1: 549. 1921, Abrams, L. “The mahonias of the Pacific states.” *Phytologia* 1: 89–94. 1934, *Journal of the Linnean Society, Botany* 57: 335. 1961, *Syesis* 10: 125–138. 1977, *Syst. Bot.* 7: 48–59. 1982, *Taxon* 36: 284. 1987

(Root decoction to treat gonorrhoea. Root preparations used for stomach trouble, hemorrhages, and tuberculosis; an eye wash, to purify blood. *Mahonia aquifolium* considered poisonous.)

in English: blue barberry, holly barberry, holly mahonia, hollyleaved barberry, mountain grape, Oregon grape, shining netvein barberry

Berberis empetrifolia Lam. (*Berberis empetrifolia* var. *magellanica* C.K. Schneid.; *Berberis empetrifolia* var. *typica* C.K. Schneid.; *Berberis mutabilis* Phil.; *Berberis wawrana* C.K. Schneid.)

Chile. Shrub

See *Tableau Encyclopédique et Méthodique ... Botanique* 2: 391, pl. 253, f. 4. 1792

(Antibacterial, antitumour. Crushed roots for mountain sickness.)

in Chile: zarcilla

Berberis fendleri A. Gray

North America. Perennial shrub

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 5. 1849

(For skin sores, cough, blood purifier.)

in English: Colorado barberry

Berberis fremontii Torrey (*Berberis higginsiae* Munz; *Mahonia fremontii* (Torrey) Fedde; *Mahonia higginsiae* (Munz) Ahrendt; *Odostemon fremontii* (Torr.) Rydb.)

North America. Perennial shrub, food

See *Rep. U.S. Mex. Bound.* 2(1): 30–31. 1859 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 31(1–2): 98. 1901, *Bulletin of the Torrey Botanical Club* 33(3): 141. 1906, *Aliso* 4(1): 91–92. 1958, *Journal of the Linnean Society, Botany* 57: 356. 1961

(Laxative, tonic, bitter, for mild liver, intestinal and blood problems, to heal gums. Ceremonial.)

Common names: Fremont's mahonia, palo amarillo, Rocky Mountain barberry

Berberis gagnepainii C.K. Schneid. (*Berberis acuminata* non Franch.; *Berberis caudatifolia* S.Y. Bao; *Berberis gagnepainii* fo. *pluriflora* Ahrendt; *Berberis gagnepainii* var. *filipes* Ahrendt; *Berberis gagnepainii* var. *lanceifolia* Ahrendt)

China. Evergreen shrub, impenetrable hedge

See *Bulletin de l'Herbier Boissier*, sér. 2, 8(3): 196. 1908, *Journal of Botany, British and Foreign* 79(6): 39. 1941, *Journal of the Linnean Society, Botany* 57(369): 53. 1961, *Bulletin of Botanical Research* 5(3): 5–6. 1985

(Antibacterial, antitumour, used orally for bacterial dysentery.)

Berberis haematocarpa Wooton (*Berberis nevinii* A. Gray var. *haematocarpa* (Wooton) L.D. Benson; *Mahonia haematocarpa* (Wooton) Fedde; *Odostemon haematocarpus* (Wooton) A. Heller)

North America. Perennial shrub, berries eaten

See *Bulletin of the Torrey Botanical Club* 25(6): 304–306. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 31(1–2): 100. 1901, *Muhlenbergia*; a journal of botany 7(12): 139. 1911[1912], *American Journal of Botany* 30(3): 236. 1943

(Bark as an eyewash.)

in English: red barberry

Berberis insignis Hook. f. & Thomson

India, Eastern Himalayas, Nepal, Sikkim, Bhutan. Shrub, stems unarmed, well-developed internodes

See *Flora Indica*: being a systematic account of the plants. 226. 1855

(Root bark for skin diseases, diarrhoea.)

in India: timburjhin

Berberis jaeschkeana Schneider

Himalaya. Shrub

See *Flow. Pl. India, Nepal & Bhutan*: 25. 1990

(Antibacterial, antitumour. Leaves chewed and swallowed for relief from toothache.)

in India: juffa, kahmal, kaymali

Berberis koreana Palib.

Korea.

See *Biologia* (Bratislava) 58(4): 797–804. 2003, *Bioorg. Med. Chem. Lett.* 20(6): 1944–1947. 2010, *J. Sci. Food Agric.* 90(14): 2399–2404. 2010

(Antimicrobial and antimutagenic.)

in English: Korean barberry

Berberis kumaonensis Schneider

India, Himalaya. Shrub, stiff erect stems, spiny, solitary flowers, red ovoid fruits

See *Bulletin de l'Herbier Boissier* 5: 391, 393, 397. 1905

(Roots for jaundice.)

in India: kingora

Berberis lutea Ruiz & Pav. (*Berberis boliviana* Lechler; *Berberis chrysacantha* C.K. Schneid.; *Berberis conferta* Kunth; *Berberis conferta* var. *boliviana* (Lechler) C.K. (Antibacterial. Roots tonic, antinausea.)

in India: kashmal, malai-t-tummatti

Berberis vulgaris L.

North America. Perennial shrub

See *Sp. Pl.* 1: 330. 1753 and *Journal of American Folklore* 58: 113–123. 1945, *Phytotherapy Research* 22(7): 979–981. 2008, *Phytotherapy Research* 22(8): 999–1012. 2008, *Epilepsy Behav.* 18(3): 207–210. 2010, *Phyther. Res.*

24(8): 1250–1255. 2010, *Food Chem. Toxicol.* 48(8–9): 2176–2180. 2010

(Used in Unani. Leaves decoction for jaundice. Poultice of pounded root or bark used for sore throat, ulcerated gums; root bark antiurolithic, antioxidant and cytoprotective, used for the treatment of urolithiasis. Berries decoction or juice febrifuge, used for sore throat and fever. Anticonvulsant activity of berberine.)

in English: barberry, common barberry, European barberry, jaundice berry, true barberry

in China: xiao bo

in India: ambar-baris, ambarbaris, asrar, barbaris, bedana, chachar, cutch, kashmal, kasmal, kaymali, kemal, rartak, rasaunt, zaraj, zarishk, zarshak, zirishk

***Berberis wallichiana* DC.**

Nepal, China, Himalaya. Shrub

See *Prodr.* (DC.) 1: 107. 1824

(Twigs antibacterial, antitumour, astringent, for diarrhea, dysentery, ophthalmia and dyspepsia. Root and stem used in piles, ophthalmia; root bark for jaundice.)

in India: chemo, dahurahidra, dieng mat shynrang, kerpa, niang

Berchemia Necker ex DC. Rhamnaceae

After the naturalist Jacob Pierre Berthoud van Berchem, author of *Excursion dans les mines du Haut Faucigny, et description de deux nouvelles routes pour aller sur le Buet & le Breuen, avec une notice sur le Jardin*. Lausanne, 1787. See J.D.P.E. Levade, *A True and Surprising Account of a Natural Sleep Walker* [being a report to the Société des Sciences physiques de Lausanne by M.M. Levade, Berthoud van Berchem, etc.]. 1792, A.P. de Candolle, *Prodromus*. 2: 22–23. 1825.

Berchemia discolor (Klotzsch) Hemsl. (*Araliorhamnus punctulata* H. Perrier; *Araliorhamnus vaginata* H. Perrier; *Berchemia discolor* Hemsl.; *Phyllogeiton discolor* (Klotzsch) Herzog; *Scutia discolor* Klotzsch)

Sudan, South Africa. Tree or shrub, deciduous or evergreen, spreading, small yellow-green flowers, yellow to reddish brown sweetly fragrant fruits, gum edible, ripe and unripe fruit eaten, in semi-arid bushland, wooded grassland, riverine vegetation

See *Mém. Fam. Rhamnées* 61–62, pl. 4, f. 3. 1826, *Annales des Sciences Naturelles (Paris)* 10: 362. 1827, *Naturwissenschaftliche Reise nach Mossambique ...* 1: 110–111, t. 21. 1862, *Flora of Tropical Africa* 1: 381. 1868 and *Beihefte zum Botanischen Centralblatt* 15: 168. 1903, *Notulae Systematicae*. *Herbier du Museum de Paris* 11: 14–16. 1943, *Adansonia*: n.s. 5: 121–123. 1966

(Bark infusion for enlarged spleen and diarrhea; bark decoction taken for jaundice. Ground up fruits used for sore throat and tonsillitis; root decoction given to barren women.)

in English: bird plum, brown ivory, mountain date, wild almond

in Kenya: deen, dheen-den ro'o, emeyan, emeyen, jajab, jaja-bho, jejab, kisaaya, kisanawa, kor'guba, mkulu, muchuk, muchukwa, muchukwo, mujajabho, muthwana, muthwaye, mzwana, nzaaya, nzanawa, santaiti

in Madagascar: hotrombengy, maroampotra, merana, sarikomanga, tsiadala, tsiandala

in S. Rhodesia: muWe, muNye, umNcaga

in Southern Africa: bruinivoor, wilde dadel; uMumu, umMumu, uBaletsheni-omkhulu, uBaletsheni likulu, uVuka (Zulu); nyiyi (Tsonga); mutsintila (Western Transvaal, northern Cape, Botswana); muhukhuma (Venda); mozinzila (Subya: Botswana, eastern Caprivi); omuve (Herero); omuve (Northern South West Africa); muNye, muNyii, muWe (Shona)

Berchemia floribunda (Wallich) Brongniart (*Berchemia floribunda* Wallich, nom. nud.; *Berchemia floribunda* (Wallich ex Roxb.) Brongniart; *Berchemia giraldiana* C.K. Schneid.; *Ziziphus floribunda* Wall.)

Myanmar, Tropical Himalayas. Shrub, vine, evergreen, twining, scandent or erect, evergreen, greenish flowers in fascicles arranged in large terminal pubescent panicles, red-black oblong fruits

See *Flora Indica*; or descriptions of Indian Plants 2: 368–369. 1824, *Annales des Sciences Naturelles, Botanique* 10: 357, pl. 13, f. 1. 1826, *A Numerical List of Dried Specimens* n. 4256. 1830 and *Illustriertes Handbuch der Laubholzkunde* 2: 263, f. 182 m–n, 183 k. 1909, *Ann. Cat. Vasc. Pl. W. Pak. & Kashm.* 466. 1972, *Chemistry & Biodiversity* 3(6): 646–653. 2006, *Chinese Chemical Letters* 18(4): 412–414. 2007, *Chem. Pharm. Bull.* (Tokyo). 56(9): 1248–1252. 2008

(Bark, cytotoxic activity against human leukemia cells. Roots hepatoprotective, used to alleviate pain, rheumatic pains.)

in English: Japanese supple-jack

in China: duo hua gou er cha, gou er cha, kou erh ch'a, niu bi quan, niu pi ch'uan

Berchemia kulingensis C.K. Schneider

China.

See *Plantae Wilsonianae* 2(1): 216. 1914

(Roots for cough.)

in English: Kuling supplejack

in China: gu ling gou er cha, shan huang ch'i, tzu ch'ing t'eng ken

Berchemia lineata (Linnaeus) DC. (*Berchemia lineata* DC.; *Berchemia lineata* Benth.; *Rhamnus lineata* Linnaeus)

China, Himalayas. Climber, low shrub, arching, trailing, small white flowers in axillary fascicles, black oblong drupeous fruits

See *Centuria II. Plantarum ...* 2: 11. 1756, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 23. 1825

(Febrifuge. Young shoots used in folk medicine, *lao shu er*. Roots and leaves used for relieving coughs, and for treating injuries and snakebite.)

in English: lesser berchemia, rat dropping, supple jack

in China: gou er cha, kou er ch'a, lao shu shi, lao shu shih, t'ieh pao chin, tie bao jin, wu lung ken

in Japan: hime-kuma-yanagi, makkô

Berchemia polyphylla Wallich ex Lawson var. *leioclada* (Hand.-Mazz.) Handel-Mazzetti (*Berchemia trichoclada* (Rehder & E.H. Wilson) Hand.-Mazz. var. *leioclada* Hand.-Mazz.)

China.

See *Fl. Brit. India* 1(3): 638. 1875 and *Anzeiger der Akademie der Wissenschaften in Wien. Mathematisch-naturwissenschaftliche Klasse. Wien* 58: 149. 1921, *Symb. Sin.* 7(3): 672. 1933

(Roots and leaves antitussive, antiasthmatic, expectorant.)

in China: guang zhi gou er cha

Berchemia scandens (J. Hill) K. Koch (*Berchemia scandens* (Hill) Trel., nom. illeg.; *Berchemia volubilis* (L.f.) DC.; *Berchemia volubilis* A. DC.; *Rhamnus scandens* Hill; *Rhamnus volubilis* L.f.)

North America. Woody perennial vine, alternate simple leaves with conspicuous, pinnate veins, greenish flowers in terminal clusters, fleshy blue-black fruits

See *Hortus Kewensis* 453, pl. 20. 1768, *Supplementum Plantarum* 152. 1781, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 23. 1825, *Dendrologie* 1: 602. 1869, *Transactions of the Academy of Science of St. Louis* 5(3[2]): 364. 1889 and *Fieldiana, Bot.* 24(6): 277–293. 1949

(Poisonous berries if eaten cause only low toxicity. Blood purifier. Leaves and bark decoction taken by males or females for impotency.)

in English: Alabama supple-jack, supple Jack, supplejack, trattan-vine, vine rattany

Berchemia zeyheri Grubov (*Berchemia zeyheri* (Sond.) Grubov; *Phyllogeiton zeyheri* (Sond.) Suess.; *Phyllogeiton zeyheri* Suess.; *Rhamnus zeyheri* Sond.) (the specific name honors the German botanist and plant collector Carl (Karl) Ludwig Philipp Zeyher, 1799–1858, in South Africa (col. 1822, 1824, 1825, 1828, 1829–31; col. 1831–32 with Christian

Frederic Ecklon (1795–1868); see William Jackson Hooker (1785–1865), *London J. Bot.* 2: 163–165. 1843, 5: 242. 1846; *Kew J. Bot.* 2: 61–62. 1850; I.H. Vegter, *Index Herbariorum. Part II* (7), *Collectors T-Z. Regnum Vegetabile* vol. 117. 1988)

South Africa, Zimbabwe, Mozambique. Tree, evergreen to semi-deciduous, spineless shrub or small tree, small greenish or yellowish flowers in small clusters in leaf-axils, delicious fruits eaten fresh, wood extremely hard, tree browsed by game and stock

See *Mitteilungen der Botanischen Staatssammlung München* Heft 6, 182. 1953, *The Veterinary Journal* 173(2): 366–372. 2007

(Powdered roots smoked as a cure for headaches or sometimes used as an enema to relieve pain in the back and to treat rectal ulceration in children. Veterinary medicine, cytotoxic, antibacterial, anthelmintic, bark for infectious diseases in cattle. This is the royal tree of the Zulus because only the royal family was allowed to possess the wood. Magic.)

in English: pink ivory, purple ivory, red ivory, red ivorywood

in South Africa: monee, moye, muhukhuma, muMbeza, muni-ane, munia-niane, muNyii, rooi ivoor, rooihout, umGologolo, umNeyi, umNcaka, umNini, umGoloty, xiniyani

in Swaziland: sineyi, tineyi, umneyi

Bergenia Moench Saxifragaceae

For Karl August von Bergen, 1704–1760, see *Methodus Plantas Horti Botanici ...* (Moench) 664. 1794, Haworth, Adrian Hardy (1767–1833), *Saxifragearum enumeratio. Accedunt, Revisiones plantarum succulentarum.* Londini, Wood, 1821, *Revisiones plantarum succulentarum.* Londini, R. et A. Taylor, 1821, *Sylva Telluriana* 102. 1838, Walpers, Wilhelm Gerhard (1816–1853), *Repertorium botanices systematicae.* Lipsiae, 1842–1848 and Yeo, Peter Frederick (1929–2010), “A Revision of the genus *Bergenia* Moench (Saxifragaceae).” *Kew Bull.*, 20, 113–148, 1966. 1966, *Acta Phytotax. Sin.* 26(2): 122, 124. 1988.

Bergenia ciliata (Haw.) Sternb. (*Bergenia ciliata* Sternb.; *Bergenia ciliata* (Haw.) Sternb.; *Bergenia ciliata* A. Braun ex Engl.; *Bergenia ciliata* Stein; *Bergenia ligulata* (Wall.) Engl.; *Bergenia ligulata* Engl.; *Megasea ciliata* Haw.; *Saxifraga ciliata* Walp.; *Saxifraga ciliata* Royle; *Saxifraga ciliata* Lindl.)

Temperate Himalaya, SE Asia. Perennial herb, erect, short, fleshy, thick stout cylindrical rootstock, creeping rhizomes, stalked ciliate leaves sheathing at the base, white pink flowers in spreading panicles, tender leaves or flowers edible, along streams, water holes, damp soils, moist places

See *Opuscula* 26, pl. 1. 1781, *Asiatic Researches* 13: 398. 1820, *Saxifrag. Enum.* 7. 1821, *Rev. Saxifr. Suppl.* 2. p. 2. 1831, *Ill. Bot. Himal. Mts.* [Royle] 226. t. 49. f. 2. 1833–1840, *Edwards's Bot. Reg.* 29: t. 65. 1843, *Botanische*

Zeitung (Berlin) 26: 840. 1868, *Gartenflora* 307. 1886, *Nat. Pflanzenfam.* [Engler & Prantl] iii. II a. 51. 1890 [1891], *Bull. Soc. Bot. Fr.* xli. Bergia decumbens Planch. ex Harv.

Tropical Africa.

See Harvey, William Henry (1811–1866), *Thesaurus Capensis: or, illustrations of the South African flora ...*, selected from the Dublin University Herbarium. Dublin, 1859–1863

(Fruits for kidney diseases and stomachache.)

Bergia guineensis Hutch. & Dalziel

Tropical Africa.

See *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 109. 1927, *Kew Bull.* 1928, 27. 1928

(Whole plant and roots applied for scabies, yaws, skin diseases, bronchitis, venereal diseases.)

Bergia suffruticosa (Delile) Fenzl (*Bergia odorata* Edgew.; *Bergia suffruticosa* Fenzl; *Lancretia suffruticosa* Delile)

India, Sudan. Perennial undershrub, woody at base, decumbent or spreading, aromatic, flowers white to pinkish

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 69(213): t. 25, f. 1. 1813, *Journal of the Asiatic Society of Bengal* 7: 765. 1838, *Denkschriften der Bayer. Botanischen Gesellschaft in Regensburg* 3: 183. 1841 and *Journal of Natural Medicines* 61(1): 59–62. 2007

(Used to repair bones, cleaning teeth and applied on sores, leaves used as poultice on sores and broken bones. Whole plant decoction for malaria. Plant paste an antidote against scorpion sting. Superoxide scavenging activity, free-radical scavenging activity.)

in India: kankairo, kankario, karbuji, kharbuji, kharsan, lavariu, rohan, ropatri, rowan, runvand, runvund

in Pakistan: kharbuja, rohwan

Berkheya Ehrh. Asteraceae

After the Dutch naturalist and poet Jan (Johannes) Le Franc van Berkhey, 1729–1812, botanist and biologist, author of *Expositio characteristica structurae florum qui dicuntur Compositi*, etc. [Thesis] Lugduno-Batavus [Leyden] 1760. See *Neues Magazin für Aerzte* 6: 303. 1784, Adrian Loosjes, *De geest der geschriften van Jan le Francq van Berkhey*. Haarlem 1813 and Roessler, H. “Revision der Arctotideae—Gorteriinae (Compositae).” *Mitteilungen der Botanischen Staatssammlung München* 3: 71–500. 1959, J.H. Barnhart, *Biographical Notes upon Botanists* 1: 171. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection* 35. 1972, *Curtis's Botanical Magazine* 23(4): 289–296. 2006.

Berkheya barbata (L.f.) Hutch. (*Berkheya grandiflora* (Thunb.) Willd.; *Berkheya grandiflora* Willd.; *Berkheya ilicifolia* Druce; *Berkheya ilicifolia* (M. Vahl) Druce; *Gorteria barbata* L.f.; *Rohria grandiflora* Thunb.; *Rohria ilicifolia* Vahl)

South Africa. Near the sea in fynbos

See *Systema Naturae*, Editio Decima 2: 1229, 1358, 1377. 1759, *Supplementum Plantarum* 382. 1782 and *Transactions of the Royal Society of South Africa* 21: 86. 1932

(Phototoxic. Alkaloids.)

in South Africa: groot disseldoring

Berkheya carlinopsis Welw. ex O. Hoffm. subsp. ***magalismontana*** (Bolus) Roessler (*Berkheya magalismontana* Bolus; *Crocodylodes carlinopsis* (Welw. ex O. Hoffm.) Hiern)

South Africa.

See *Boletim da Sociedade Broteriana* 13: 34. 1896, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1, 3: 608. 1898 and *Transactions of the South African Philosophical Society* 18: 397. 1907, *Journal of Botany, British and Foreign* 65, Suppl. 2: 63. 1927, *Mitteilungen der Botanischen Staatssammlung München* 3: 143–144. 1959,

Mitteilungen der Botanischen Staatssammlung München 11: 96. 1973, *Planta Med.* 50(2): 192–193. 1984

(Guaianolides closely related to subluteolide.)

in South Africa: bergdisseldoring

Berkheya cirsiifolia (DC.) Roessler (*Berkheya alba* Phillips; *Stobaea cirsiifolia* DC.)

South Africa, Lesotho. Shiny leaves with sharp spikes on the edges, rays white, disc with yellow corolla fading to brown, stigma white, on slope, along roadside bank

See *Prodr. Pl. Cap.* 2: [v], 141. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 519. 1838 and *Mitteilungen der Botanischen Staatssammlung München* 3: 250–251. 1959

(Phototoxic. Tonic, analgesic, invigorating, for impotency, liver and gall bladder diseases.)

in English: thistle

in Lesotho: mohatollo

in South Africa: mohata-o-mosoeu, ntsoantsane-e-kholo, tsehlo-ea-thaba

Berkheya coddii Roessler (The species was named to honor the South African botanist Leslie Edward W. Codd, born 1908, former Director of Botanical Research Institute, Pretoria, co-author with Mary Gunn of *Botanical exploration of southern Africa*. Cape Town 1981, author of *Trees and Shrubs of the Kruger National Park*. [Mem. Bot. Surv. S. Afr. no. 26] Pretoria 1951 and “Notes on poisonous plants with special reference to the *Gousiekte* problem.” *J. S. Afr. Biol. Soc.* 2: 8–18. 1961; see A.P. Backer, D.J.B. Killick and D. Edwards, “A plant ecological bibliography and thesaurus for southern Africa up to 1975.” *Memoirs of the Botanical Survey of South Africa*. no. 52. 1986.)

South Africa. Fast growing, herb, flowers yellow, endemic Nickel hyperaccumulator

See *Mitteilungen der Botanischen Staatssammlung München* 3: 231–232. 1959, *Mycorrhiza*. 13(4): 185–90. 2003, *New Phytologist* 158(2): 279–285. 2003, Keeling, S.M. et al. “Nickel and cobalt phytoextraction by the hyperaccumulator *Berkheya coddii*: implications for polymetallic phytomining and phytoremediation.” *Int. J. Phytoremediation*. 5(3): 235–44. 2003, *Biotechnol. Bioeng.* 86(3): 243–50. 2004, Robert S. Boyd et al. “Metal concentrations of insects associated with the South African Ni hyperaccumulator *Berkheya coddii* (Asteraceae).” *Insect Science* 13(2): 85–102. 2006

(A hyper-accumulator of nickel, which can be used in phytomining and phytoremediation; formed well-developed arbuscular mycorrhiza under greenhouse conditions.)

Berkheya echinacea (Harv.) O. Hoffm. ex Burt Davy (*Crocodylodes echinaceum* (Harv.) Kuntze; *Crocodylodes gerrardii* (Harv.) Kuntze; *Stobaea echinacea* Harv.; *Stobaea gerrardii* Harv.)

South Africa, Tanzania. Erect, scarcely branched, copiously prickly throughout, stem fluted, prickly wings on stem, basal leaves oval, leaves puberulous densely hispid, flowers in dense yellow heads, involucre bracts with copious long spines, ray-florets scarcely exceeding involucre bracts, corollas narrow

See *Flora Capensis* 3: 495. 1865, *Revisio Generum Plantarum* 1: 332. 1891 and *Annals of the Transvaal Museum* 3: 121. 1912

(Phototoxic. Medicinal.)

in Swaziland: iphungula

Berkheya fruticosa (L.) Ehrh. (*Atractylis fruticosa* L.; *Berkheya asteroides* (L.f.) Druce; *Berkheya incana* (Thunb.) Willd.)

South Africa.

See *Species Plantarum* 2: 829. 1753, *Neues Magazin fur Aerzte* 6: 303. 1784

(Phototoxic.)

in South Africa: vaalperdebos, vaaldissel, vaaldisseldoring

Berkheya heterophylla (Thunb.) O. Hoffm. var. ***heterophylla*** (*Stobaea biloba* DC.; *Stobaea heterophylla* Thunb.)

South Africa.

See *Neues Magazin fur Aerzte* 6: 303. 1784, *Prodromus Plantarum Capensium*, ... 141. 1800

(Phototoxic.)

in South Africa: isihlungu, disseldoring, graweelwortel, ntsoantsoane

Berkheya macrocephala J.M. Wood

South Africa.

See *Neues Magazin fur Aerzte* 6: 303. 1784

(Phototoxic.)

in South Africa: ntsoantsane, sehohlo-se-sehoho

Berkheya maritima J.M. Wood and Evans

South Africa.

See *Neues Magazin fur Aerzte* 6: 303. 1784

(Phototoxic.)

Berkheya montana J.M. Wood & M.S. Evans (*Berkheya arctiifolia* O. Hoffm. ex Kuntze; *Berkheya bilabiata* N.E. Br.)

South Africa, Swaziland.

See *Neues Magazin fur Aerzte* 6: 303. 1784 and *Journal of Ethnopharmacology* 100(1–2): 210–215

(For bruises; sedatives or to treat various CNS-related ailments, mental diseases.)

in South Africa: mohatollo, ntsoa-ntsane-ea-loti

Berkheya onopordifolia (DC.) O. Hoffm. ex Burt Davy
(*Stobaea onopordifolia* DC.)

Taiwan, Swaziland. Herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 521. 1838 and *Annual of Taiwan Museum* 3: 121. 1912

(Phototoxic.)

in South Africa: mohato, ntsoantsane

Berkheya pannosa Hilliard

South Africa.

See *Neues Magazin für Aerzte* 6: 303. 1784

(Phototoxic.)

Berkheya pauciflora Roessler

South Africa.

See *Mitteilungen der Botanischen Staatssammlung München* 3: 519–520. 1960, *Planta Med.* 50(2): 192–193. 1984

(Desacetyl laurenobiolide and a caustic acid derivative.)

Berkheya pinnatifida (Thunb.) Thell. (*Stobaea pinnatifida* Thunb.)

South Africa.

See *Prodromus Plantarum Capensium*, ... 141. 1800 and *Mitteilungen der Naturforschenden Gesellschaft in Solothurn* 8(20): 77. 1928

(Phototoxic.)

in Southern Africa: isihlungu, mofahla-toeba

Berkheya radula (Harv.) De Wild. (*Berkheya adlami* Hook.; *Berkheya radula* Hubb.; *Crocodilodes radula* (Harv.) Kuntze; *Stobaea radula* Harv.)

South Africa. Herb, stem with prickly irregular wings, leaves basal oval narrowing to base margin with numerous shallow lobes edged with small prickles, leaves upper surface dark rough, flower-heads borne singly on short stalks spaced along top of stem, involucre bracts narrow-oblong, ray-florets yellow, highveld

See *Prodr. Pl. Cap.* 2: [v], 141. 1800, *Tekhno-Bot. Slovar.* 55. 1820, *Flora Capensis* 3: 491. 1865, *Revisio Generum Plantarum* 1: 333. 1891, *Botanical Magazine* 123: t. 7, 514. 1897 and *Icones selectae horti thenensis* 2: 89. 1901, *Kirkia* 10(1): 73–99. 1975

(Phototoxic.)

in Southern Africa: diphate, isihlungu, ntsoantsoane, boesmansrietjie

Berkheya rhapontica Hutch. & Burt Davy subsp. *aristosa* (DC.) Roessler (*Stobaea aristosa* DC.) (Rhaponticum, Latin *radix Pontica*, Greek *rheon*, *rha* 'roots and rhizomes (from Iran)', the *rha* of Pontus, Greek *Rha* (said to be from

the ancient name of the river Volga/Wolga), Latin *Rha* 'the Volga, on whose banks grew the radix pontica, *Rha ponticum*, rhubarb, *Rheum rhaponticum* L., which thence received its name'; see C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1234. [rhubarb] 1967, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 1017. Bologna 1985, R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. 475. 1993, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XV: 176, 966. 1994, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 532, 533–534. 1996.)

South Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 518–519. 1837 and *Bulletin of Miscellaneous Information Kew* 1935: 571. 1935, *Mitteilungen der Botanischen Staatssammlung München* 3: 170–171. 1959

(Phototoxic. Used for coughs.)

Berkheya rhapontica Hutch. & Burt Davy subsp. *platyptera* (Harv.) Roessler (*Berkheya platyptera* (Harv.) O. Hoffm.; *Stobaea platyptera* Harv.)

South Africa. Herb, erect, very prickly, stem narrow bearing smaller irregularly lobed leaves whose margins are prolonged downwards to form wings on stem, basal rosette of leaves lance-shaped or oval, leaves upper surface rough, ray-florets yellow, flower-heads lateral on upper part of stem, involucre bracts spreading or reflexed felted below with many marginal prickles

See *Flora Capensis* 3: 495. 1865 and *Mitteilungen der Botanischen Staatssammlung München* 3: 170. 1959

(Phototoxic. Used for coughs.)

Berkheya rhapontica Hutch. & Burt Davy subsp. *rhapontica* (*Stobaea rhapontica* DC.)

South Africa. Herb, very prickly, stem narrow bearing smaller irregularly lobed leaves whose margins are prolonged downwards to form wings on stem, basal rosette of leaves lance-shaped or oval, lower leaf surface silvery, leaves margins with shallow mostly rounded lobes edged with prickles, florets all yellow, flower-heads lateral on upper part of stem, involucre bracts spreading or reflexed felted below with many marginal prickles

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 519. 1837 and *Bulletin of Miscellaneous Information Kew* 1935: 571. 1935

(Phototoxic. Used for coughs.)

in South Africa: ikhakhasi, iphungula, ntsoa-ntsane, pepetloane-e-meutla

Berkheya robusta Bohnen ex Roessler

South Africa, Mpumalanga, Swaziland, Mozambique. Robust, erect, lower leaf surface grey silvery, flower-heads in large branching terminal inflorescence, florets all yellow, involucre bracts numerous lance-shaped ending in long spines, ray-florets few sometimes absent, disk florets with long pointed lobes, among boulders

See *Mitteilungen der Botanischen Staatssammlung München* 3: 260–261. 1959

(Phototoxic.)

Berkheya setifera DC. (*Berkheya setifera* var. *tropica* S. Moore; *Crocodilodes setiferum* (DC.) Kuntze; *Crocodilodes setiferum* Kuntze)

South Africa, Zimbabwe. Leaves mostly basal lance-shaped, flower-heads in long loosely branching inflorescence, involucre bracts numerous very narrow, ray-florets yellow, young leaves used as spinach

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 507. 1865, *Revisio Generum Plantarum* 1: 333. 1891 and *Journal of the Linnean Society, Botany* 40: 123. 1911

(Phototoxic. Roots for rheumatism, arthritis, kidney problems, urinary and stomach complaints; an infusion taken as blood purifier. Magic, repels evil spirits.)

in English: buffalo-tongue Berkheya, ox tongue

in South Africa: ikhakhasi, indlebe-lenkomo, leleme la khomo, lelelemla-khomo, lulwimi lwenkhomo, mavambuka, ntsoaantsane, rasperdisseldoring, ulimi-lwenkomo, ulimi-lwenyathi, uLimilwenyathi, uLimilwenkomo

Berkheya speciosa (DC.) O. Hoffm. (*Stobaea speciosa* DC.)

South Africa. Erect, slender, inflorescence of few long-stalked flower-heads borne at about same level, involucre bracts narrow with long fine point and marginal prickles, ray-florets strap-shaped yellow

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 518–519. 1838 and *Annalen des K. K. Naturhistorischen Hofmuseums* 24: 314. 1910, Sparg, S.G. et al. “Efficiency of traditionally used South African plants against schistosomiasis.” *Journal of Ethnopharmacology* 73(1–2): 209–214. 2000

(Phototoxic. Medicinal, urinary schistosomiasis, the plant extracts from *Berkheya speciosa*, *Euclea natalensis* (Ebenaceae) and *Trichilia emetica* (Meliaceae) are lethal to the schistosomula.)

in South Africa: ikhakhasi elikhulu, ntsoaantsane, skraaldisseldoring, umaphola

Berkheya speciosa (DC.) O. Hoffm. subsp. *lanceolata* Roessler

South Africa, Swaziland. Herb, erect, slender, leaves basal with slender stalk, leaves margin entire with numerous minute prickles, inflorescence of few long-stalked flower-heads borne at about same level, involucre bracts narrow

with long fine point and marginal prickles, ray-florets strap-shaped yellow

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 518–519. 1838 and *Annalen des K. K. Naturhistorischen Hofmuseums* 24: 314. 1910, *J. Ethnopharmacol.* 73(1–2): 209–14. 2000

(Phototoxic. Medicinal, antischistosomal, abdominal disorders, bilharzia and sore eyes.)

in English: buffalo-tongue Berkheya

Berkheya spekeana Oliv. (*Berkheya chiesiana* Chiov.; *Crocodilodes spekeanum* (Oliv.) Kuntze) (Dedicated to John Hanning Speke, 1827–1864, British soldier and explorer, 1854 East Africa, 1857–1859 East Africa with R.F. Burton and 1860–1863 with J.A. Grant (1827–1892); see William Allen (1793–1864) and Thomas Richard Heywood Thomson, *A narrative of the expedition ... to the River Niger, in 1841*. London 1848, J.F. Schön & S. Crowther, *Journals of the Expedition up the Niger in 1841*. London 1848, F.A. Maximilian Kuhn, *Filices Africanæ ... Accedunt filices Deckenianæ et Petersianæ*. Lipsiæ [Leipzig] 1868, D. Oliver, *The botany of the Speke and Grant expedition*, an enumeration of the plants collected during the journey of the late captain J.H., Speke and captain (now Lieut.-Col.) J.A. Grant from Zanzibar to Egypt. *Transactions of the Linnean Society of London* 1873–1875, Carl Claus (Karl Klaus) von der Decken (1833–1865), *Baron C.C. von der Decken's Reisen in Ost Afrika in 1859–61*. Leipzig & Heidelberg 1869–1879 and Ethelyn Maria Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, F.N. Hepper and Fiona Neate, *Plant collectors in West Africa*. 69. Utrecht 1971, *Principes*. Volume 21(3): 140. 1977, I.H. Vegter, *Index Herbariorum*. Part II (5), *Collectors N-R*. *Regnum Vegetabile* vol. 109. 1983.)

South Africa, Burundi, Uganda, Tanzania. Erect, shrub, herb, thorny, stem with white latex exudate, flowers yellow, ray corollas yellow, stigmas yellow, old inflorescences brown, in open areas, in wooded grassland, stony bushland

See *Transactions of the Linnean Society of London, Botany* 29: 100, t. 66. 1873 and *Phytomedicine: International Journal of Phytotherapy & Phytopharmacology*, Jan. 2002

(Phototoxic. Antiviral, against human immunodeficiency virus type-1. Veterinary medicine, leaves for stomachache, wounds, jaundice.)

in Burundi: igihandambwa, umuhandambwa

in Congo: cigwigwi, ikigembe-gembe, ikigembegembe, ikigwarara, mugwigwi, ngwigwi, omugwigwi

in Kenya: katabut, lirakalu, lisatsa

Berkheya umbellata DC. (*Crocodilodes umbellatum* (DC.) Kuntze)

South Africa.

See *Neues Magazin für Aerzte* 6: 303. 1784

(Phototoxic.)

in South Africa: geelklossiedissel, ikhakhasana elincane, klossies, vleidissel

Berkheya zeyheri (Sond. & Harv.) Oliv. & Hiern (*Berkheya subteretifolia* Thell.; *Crocodylodes zeyheri* (Sond. & Harv.) Kuntze; *Stobaea zeyheri* Sond. & Harv.)

Tropical Africa. Herbaceous, tufted, hispid, woody root, yellow daisy-like flowers

See *Flora Capensis* 3: 496. 1865, *Flora of Tropical Africa* 3: 429. 1877, *Revisio Generum Plantarum* 1: 333. 1891 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 74: 126. 1929, *Mitt. Bot. Staatssammi. München* 3: 218. 1959, *Kirkia* 10(1): 73–99. 1975

(Bark medicinal for baby's navel, for diarrhea and as a diuretic.)

in English: buffalo-tongue Berkheya

Berlandiera DC. Asteraceae

The genus honors the 19th century French-Swiss physician Jean Louis Berlandier, 1805–1851, plant collector in North America, see *Prodr.* (DC.) 5: 517. 1836, *Transactions of the American Philosophical Society* n.s., 7: 342. 1840.

Berlandiera lyrata Benth. (*Berlandiera incisa* Torr. & A. Gray; *Berlandiera lyrata* Benth. var. *macrophylla* A. Gray)

North America, Mexico. Perennial herb, leafy, branching, upper branches sprawling, long alternate velvety leaves, compound fragrant flower heads, yellow rays and maroon central disk

See *A Flora of North America: containing ...* (Torr. & A. Gray) 2(2): 282. 1842 and *Plantas Hartwegianas imprimis Mexicanas* 17. 1839, *Synoptical Flora of North America* 1(2): 243. 1884 and *Taxon* 32: 510–511. 1983, *Sida* 21(3): 1665–1668. 2005

(Roots as sedative, in hysteria, madness, nervousness.)

in English: chocolate flower, greeneyes, lyreleaf greeneyes

Berrya Roxb. Tiliaceae

After the English physician Andrew Berry, flourished 1780s–1810s, M.D. 1784, nephew of James Anderson (d. 1809, Madras, India), from 1784 to 1814 doctor and botanist in Madras (Madras Medical Service), contributed to the development of the East India Company's Botanic Garden at Calcutta, friend of W. Roxburgh. See William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. 3: 60–61, t. 264. 1819[1820], *Flora Indica*. 2: 639. Serampore 1832, [Madras, Presidency of Fort St. George], *Code of Regulations*

for the Medical Department of the Presidency of Fort St. George. Madras 1833 and D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. London 1914, K. Biswas, ed., *The original correspondence of Sir Joseph Banks relating to the foundation of the Royal Botanic Garden, Calcutta and The summary of the 150th anniversary volume of the Royal Botanic Garden, Calcutta*. Calcutta 1950, *Fl. Novogaliciana* 3: 9–751. 2001.

Berrya cubensis (Griseb.) M. Gómez (*Berrya ameliae* (Lundell) Kosterm.; *Berrya cubensis* (Griseb.) Kosterm.; *Berrya mariarum* (Standl.) Kosterm.; *Carpodiptera ameliae* Lundell; *Carpodiptera cubensis* Griseb.; *Carpodiptera mariarum* Standl.)

Cuba, Haiti.

See *Plantae Wrightianae* 1: 164. 1860, *Mem. Amer. Acad. Arts* 8: 164, 1861, *Anales de la Sociedad Española de Historia Natural* 19(2): 215. 1890 and *Field & Laboratory* 6(1): 13. 1937, *Publications of the Field Museum of Natural History, Botanical Series* 23(3): 126. 1944, *Reinwardtia* 7(5): 424. 1969

(Diuretic, stomachic, for anemia, dysmenorrhea.)

in Mexico: telcon

Bersama Fresen. Melianthaceae

From the Ethiopian name *brsma*, see *Museum Senckenbergianum* 2: 280. 1837.

Bersama abyssinica Fresen. subsp. *abyssinica* (*Bersama abyssinica* subsp. *engleriana* (Gürke) F. White; *Bersama abyssinica* subsp. *nyassae* (Baker f.) Touss.; *Bersama zombensis* Dunkley; *Natalia paullinioides* Planch.)

East Africa, Malawi, Tanzania. Small tree or shrub, evergreen, slender, bark cracking lengthwise, large leaves compound in clusters at branch ends, creamy flowers sweet-smelling, yellowish to reddish woody capsule 4–5 lobed, bright red seeds with yellow or orange arils, large morphological variation

See *Museum Senckenbergianum* 2: 281. 1837 and *Kew Bulletin* 1950: 237. 1950, *Phytotherapy Research* 7(2): 211–212. 1993, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Plant Systematics and Evolution* 227(3–4): 157–182. 2001, *Phytotherapy Research* 15(1): 62–69. 2001, *Journal of Ethnopharmacology* 97(3): 421–427. 2005, *African Journal of Traditional, Complementary and Alternative Medicines* 2(3): 215–221. 2005, *Journal of Ethnopharmacology* 103(1): 139–142. 2006, *Ethiopian Pharmaceutical Journal* 24(1): 23–30. 2006, *Phytochemistry* 67(19): 2126–2132. 2006, *Journal of Ethnopharmacology* 112: 55–70. 2007, *Journal of Ethnobiology and Ethnomedicine* 3: 7. 2007, *Journal of Ethnobiology and Ethnomedicine* 4: 10–11. 2008

(All parts poisonous to stock and humans. Leaf extracts antibacterial and antifungal, antiviral, cardiogenic, spasmolytic and hypoglycemic. Bark, leaf and root decoctions taken as a purgative to treat malaria, stomach disorders, abdominal pain, colic, diarrhea, dysentery, cholera, intestinal worms, amebiasis. Crushed leaves used as snuff for colds, chewed as an aphrodisiac; leaves to treat mental disturbances, debility, jaundice and leprosy. Pounded leaves mixed with water, the mixture drunk and applied to the body to treat convulsions and snakebites. Stem bark extract antispasmodic, bark juice purgative, stem bark decoction drunk to cure rheumatism, stem bark and leaves to treat diabetes mellitus and cancer. Root decoction taken for epilepsy and hemorrhoids; roots boiled and mixed with other species to treat bilharzia and dysentery. Ethnoveterinary medicinal plants, antifungal, insecticide, itching, mastitis, rabies.)

in English: bitter bark, winged bersama

in Burundi: umuhinguri, umurerabana

in Ethiopia: azamir, azamrr, kilisa guracha, lolchisa, lolchissa

in Rwanda: umukaka, umurokora

in Sierra Leone: jondobai

in Tanzania: eng'arangupe, eng'arapigupe, engarangupe, kirangwe, manguwe, mbatsamwono, misuangatu, mkururumbi, mpeme, mrindawa, mtata, muthandi, mwangwakwao

in Zambia: nakancete

in Zimbabwe: chereke, muNyahlawa, muNyahava, muNyohava, muNyakowa, muYakawa (Shona)

Bersama abyssinica Fresen. subsp. ***paullinioides*** (Planch.) Verdc. (*Natalia paullinioides* Planch.)

Tropical Africa. Tree, bushy, slender, erect, low-branched, dark green foliage, leaves imparipinnate, perianth white to brown, stamens yellow, woody globose capsules with four valves spreading horizontally, scarlet seeds with yellow arils, seeds white inside when cut, riverside, montane forest

See *Museum Senckenbergianum* 2: 281. 1837, *Flora* 24: 663. 1841, *Hooker's Icones Plantarum* 4: t. 780. 1848 [May 1848] and *Kew Bulletin* 1950: 237. 1950

(Stem bark and roots purgative, vermifuge, stomachic, anthelmintic, aphrodisiac. Ritual, medico-religious beliefs, magic, ceremonial, twigs used as a ritual plant during the treatment of fractures.)

in English: bersama bark, bitter bark

African names: chereke, duantu, je ra kpar, kapachi, kpondeblokai, maranguwe, mrandangube, munyahlawo, munyohava, samangya, wamis

in Congo: ndondwambi

in Tanzania: mpeme, ongarangupe

in Zimbabwe: chereke, muNyahlawa, muNyahava, muNyohava, muNyakowa, muYakawa

Bersama lucens (Hochst.) Szyszyl. (*Bersama lucens* Szyszyl.; *Natalia lucens* Hochst.)

South Africa. Small tree or shrub, shiny leathery thick glossy compound leaves, inflorescence long-stalked many-flowered raceme, small greenish white flowers, ridged wrinkled woody capsules, scarlet seeds, fleshy yellowish aril, fruits eaten by Vervet monkeys

See *Museum Senckenbergianum* 2: 280. 1837, *Flora* 24(2): 664. 1841, *Polypet. Discifl. Rehmann.* 50. 1888

(Very poisonous, leaves and the roots have been reported to have caused death. Bark used for impotency and barrenness; powder from stem bark sniffed to cure headache; a stem bark maceration drunk to treat menstrual pain, nervousness, venereal diseases and impotence; stem bark extract to kill lice. An aqueous stem bark extract showed significant antifungal activity against *Candida albicans*. A magical protector against evil spirits.)

in English: glossy bersama, glossy white ash, shiny-leaf bersama

in Southern Africa: blinkblaarwitessenhout; uNdiyaza, isiNdiyandiya (Zulu); isiNdiyandiya (Xhosa)

in Swaziland: ndiyasa, ndiyaza, sindiyandiya

Bersama tysoniana Oliv. (*Bersama stayneri* E. Phillips; *Bersama transvaalensis* Turrill) (for the Jamaican-born William Tyson, 1851–1920, plant collector and South African school teacher. See E.P. Phillips, “A brief historical sketch of the development of botanical science in South Africa and the contribution of South Africa to botany.” *S. Afr. J. Sc.* 27: 53. 1930, A.W. Bayer, *S. Afr. J. Sc.* 67: 407. 1971, I.H. Vegter, *Index Herbariorum*. Part II (7), *Collectors T-Z*. Regnum Vegetabile vol. 117. 1988.)

South Africa.

See *Hooker's Icon. Pl.* 23: t. 2267. 1894 [May 1893]

(Probably poisonous. A stem bark extract drunk to treat fever and hysteria. Veterinary medicine, bark decoction used for gallsickness in cattle.)

in English: bastard sneezewood, bitter-bark, common white ash

in Southern Africa: gewone witessenhout; iNdiyandiya, isiNdiyandiya (Zulu); iNdiyandiya (Xhosa)

Bertholletia Bonpland Lecythidaceae

After the French chemist Claude-Louis Berthollet, 1748–1822 (Arcueil, France), physician, in Egypt with Napoléon expedition's (1798), in 1807 with Pierre-Simon de Laplace (1749–1827) founded the Société d'Arcueil, his works include *Essai de statique chimique*. 1803 and *Description du blanchiment des toiles et des fils par l'acide muriatique oxigéné*. Paris 1789. See E.F. Jomard, *Notice sur la vie et les ouvrages de C.L. Berthollet*. Annecy 1844 and W.A. Smeaton, in *D.S.B.* 5: 600–604. 1981, Satish C. Kapoor, in *D.S.B.* 2: 73–82. 1981, *Fl. Neotrop.* 21(2): 1–376. 1990, *Libro Rojo Pl. Fanerog. Colombia* 1: 1–220. 2002, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Bertholletia excelsa Bonpl. (*Barthollesia excelsa* Silva Manso; *Bertholletia excelsa* Humb. & Bonpl.; *Bertholletia nobilis* Miers)

South America, Venezuela. Tree, large, straight, red gum from the bark, spreading branches, leaves leathery, calyx green, petals light yellow and white towards base, filaments white, anthers golden-yellow, petals tinted red on exterior in buds, round woody capsule or pod, the shell of the fruit woody very hard the outside with sticky sap, nuts eaten

See *Plantae Aequinoctiales* 1: 122–127, pl. 36. 1807, *Enumeração das Substancias Brasileiras* 45. 1836, *Transactions of the Linnean Society of London* 30(2): 197–199, t. 37, f. 4–7. 1874 and *Eur. J. Biochem.* 159(3): 597–604. 1986, *Eur. J. Biochem.* 162(3): 477–483. 1987, *Fl. Neotrop. Monogr.* 21(2):114–118. 1990, *J. Agric. Food Chem.*

50(20): 5722–5728. 2002, *World J. Urol.* 21(1): 21–27. 2003, *Fitoterapia* 76(1): 26–29. 2005, *J. Investig. Allergol. Clin. Immunol.* 17(3): 189–191. 2007

(Brazil nuts are a frequent cause of allergic reaction. Nuts antioxidant, nutritive, emollient, high selenium content, wound healer. Husks of seed infusion to treat stomachaches; tree bark infusion to treat liver ailments; stem barks with trypanocidal activity. Insect repellent.)

in English: Brazil nut, Brazil nut-tree, creamnut, Pará nut, Paranut

in South America: almendra, castaña, castanha do Pará, castanheiro do Para, jubia, tuca

Bertya Planchon Euphorbiaceae

For the French botanist Léonce de Lambertye, 1810–1877, horticulturist, author of *Catalogue raisonné des plantes vasculaires qui croissent spontanément dans le département de la Marne*. Paris 1846 and *Le Fraisier: sa botanique, son histoire, sa culture*. Paris [1864]. See Geiseler, Eduard Ferdinand (1781–1827), *Crotonis monographiam*. Halae, 1807, *Hooker's London Journal of Botany*. 4: 472, t. 16A. 1845 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 338. 1965, Ruiz López, Hipólito (1754–1815), *Relación del viaje hecho a los reynos del Perú y Chile por los botánicos y dibuxantes enviados para aquella expedición, extractado de los diarios por el orden que llevó en estos su autor*. Madrid, 1931 [Revisada y anotada por el vocal de la misma R.P. A.J. Barreiro, O.S.A.].

Bertya gummifera Planchon (*Bertya gummifera* var. *genuina* Müll.Arg., nom. inval.; *Bertya gummifera* var. *genuina* (Planch.) Müll. Arg.; *Bertya neglecta* Dümmer; *Bertya polymorpha* Baill. var. *mitchelliana* Baill.; *Croton gummiferus* A. Cunn. ex Planch.)

Australia. See also *Croton gummiferus*

See *London Journal of Botany* 4: 473. 1845, *Flora* 47: 471. 1864, *Adansonia* 6: 298–299. 1866 and *Journal of Botany, British and Foreign* 52: 151. 1914

(Gum-resin astringent.)

in Australia: gum bertya

in Spanish: sangre de drago

Berula W.D.J. Koch Apiaceae (Umbelliferae)

From the Latin *berula*, *ae* for an herb, called also *cardamine*; *berle* is the French vernacular name for the plant, see *Species Plantarum* 1: 251–252. 1753, *Enumeratio Plantarum* 44. 1822 and *Fieldiana, Bot.* 24(8/1): 21–66. 1966, *Botaničeskij Žurnal (Moscow & Leningrad)* 63(12): 1746. 1978.

Berula erecta (Hudson) Coville (*Berula angustifolia* Mertens & W.D.J. Koch; *Berula angustifolia* (L.) Mertens & Koch; *Berula*

angustifolia (L.) Koch, nom. illeg.; *Berula erecta* var. *incisa* (Torr.) Cronquist; *Berula incisa* (Torr.) G.N. Jones; *Berula orientalis* Woronow; *Berula pusilla* Fernald; *Berula thunbergii* (DC.) H. Wolff; *Carum sioides* J. Black; *Siella erecta* (Huds.) Pimenov; *Sium angustifolium* L., nom. illeg.; *Sium erectum* Hudson; *Sium orientale* Soó; *Sium thunbergii* DC.)

Europe. Perennial, hairless, hollow, stoloniferous, submerged aquatic herb, roots adventitious, rooting at the lower nodes, branched, lower leaves pinnate, inflorescences emergent, petals white, growing in shallow part of streams

See *Flora Anglica* 103. 1762, *Species Plantarum*, Editio Secunda 1672. 1762, *J.C. Rohlings Deutschlands Flora* 2: 25, 433. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 125. 1830, *Contributions from the United States National Herbarium* 4: 115. 1893 and *Das Pflanzenreich* IV 228, heft 90: 340. 1927, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 25: 1–18. 1976, *Taxon* 29: 543. 1980, *Acta Biologica Cracoviensia, Series Botanica* 22: 37–69. 1980, *Journal of Ethnopharmacology* 2: 365–388. 1980, *Plant Systematics and Evolution* 154: 11–30. 1986, *Linzer Biologische Beiträge* 23: 457–481. 1991, *Flora Mediterranea* 8: 221–245. 1998, *Opera Botanica* 137: 1–42. 1999, *Journal of Ethnopharmacology* 112: 55–70. 2007

(This plant extremely poisonous, suspected of causing stock poisoning, vlei-poisoning. Used externally for rheumatism; whole plant infusion used as wash for rashes, swellings.)

in English: cutleaf waterparsnip, lesser water-parsnip, water-parsnip

in China: tian shan ze qin, tian shan zi qin

in East Africa: esayauta, gonde

in Italian: sedanina d'acqua

Besleria L. Gesneriaceae

For the German botanist Basilius Besler, 1561–1629, apothecary, established a private botanic garden, editor of *Hortus Eystettensis*. [A collection of engravings of flowering plants from the garden of Johann Conrad von Gemmingen, Bishop of Eichstätt in Franconia.] Nürnberg 1613 and *Fasciculus rariorum et aspectu dignorum vari generis quae collegit, et suis impensis aeri ad vivum incidi curavit*, etc. [Nuremberg] 1616. See *Species Plantarum* 2: 612, 619. 1753, *Essai sur les Propriétés Médicales des Plantes* 192. 1816, *Nova Gen. Sp.* 3: 43. 1829 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 177. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 36. 1972, Nicolas Barker, *Hortus Eystettensis*. The Bishop's Garden and Besler's Magnificent Book. The British Library, London 1994, David Paisey, in *The Library*. Volume 17. 4: 365–368. 1995, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997.

Besleria calantha C.V. Morton

Ecuador, Colombia.

See *Contributions from the United States National Herbarium* 29: 21. 1944

(Against snakebites.)

Besseyia Rydb. Plantaginaceae (Scrophulariaceae)

See *Bulletin of the Torrey Botanical Club* 30(5): 279–280. 1903.

Besseyia plantaginea (James) Rydb. (*Synthyris plantaginea* (E. James) Benth.; *Veronica plantaginea* E. James; *Wulfenia plantaginea* (E. James) Greene)

North America.

See *Transactions of the American Philosophical Society*, new series, 2: 173. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 455. 1846, *Erythea* 2(5): 83. 1894 and *Bulletin of the Torrey Botanical Club* 30(5): 280. 1903

(Plant infusion diuretic. Ceremonial, witchcraft medicine, protection, emetic.)

in English: White River coraldrops

Besseyia rubra (Douglas ex Hook.) Rydb. (*Besseyia rubra* Rydb.; *Gymnandra rubra* Douglas ex Hook.; *Lunellia rubra* (Douglas ex Hook.) Nieuwl.; *Synthyris rubra* (Douglas ex Hook.) Benth.; *Wulfenia rubra* (Douglas ex Hook.) Greene)

North America.

See *Flora Boreali-Americana* 2(9): 103, pl. 172. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 454. 1846, *Erythea* 2(5): 83. 1894 and *Bulletin of the Torrey Botanical Club* 30(5): 280. 1903, *American Midland Naturalist* 3: 189. 1914

(A strong infusion drunk for colds and as a physic.)

in English: kitten's-tail

Beta L. Chenopodiaceae (Amaranthaceae)

From the ancient Latin name for the beet; see Carl Linnaeus, *Species Plantarum*. 222. 1753, *Genera Plantarum*. Ed. 5. 103. 1754 and *Nordic Journal of Botany* 18(2): 159–167. 1998, *Botanical Journal of the Linnean Society* 130(1): 81–96. 1999, *Journal of the American Society for Horticultural Science* 125(5): 658–664. 2000.

Beta vulgaris L. (*Beta maritima* L.; *Beta orientalis* L.; *Beta vulgaris* subsp. *orientalis* Aellen)

Europe, Mediterranean. Robust, erect, herb, greenish flowers

See *Species Plantarum* 1: 222. 1753, *Species Plantarum*, Editio Secunda 1: 322. 1762, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 56. 1849, *Compendio della*

Flora Italiana 593. 1882 and *Wageningen Agric. Univ. Papers* 93(1): 27. 1993

(Used in Ayurveda and Unani. Leaves applied to burns and bruises. Roots and leaves antitumor, emmenagogue, carminative, stomachic, emollient, tonic, nutritive, rejuvenative, stimulating, for liver complaints, hepatitis, jaundice, fatty liver, nausea, hypoglycemia, infections, hypertension, arteriosclerosis, anemia, cancer, diverticulitis, diarrhea, dysentery, constipation, hemorrhoids.)

in English: beet, beet root, beetroot, common beet, garden beet, leaf beet, mangel, mangold, red beet, sea beet, spinach beet, sugar beet, Swiss chard, white sugar beet

in China: chun ta tsai, tian cai, tian cai gen, tien tsai

in India: bit, bittruttu, cencira, cencirai, chakundar, chukandar, chukander, cukkandan, karangia, neycira, palak, palakya, palanki, raktagrjnana, rakthagadde, tukhm chuqandar

in Japan: kaen-sai, sangojuna

Betula L. Betulaceae

From *betulla*, *ae*, the Latin name for birch; Hebrew *betula* 'chaste maiden, virgin, bride', Hebrew *bat* and Akkadian *bīntu* 'girl, daughter, pupil'; see Carl Linnaeus, *Species Plantarum*. 2: 982–983. 1753, *Genera Plantarum*. Ed. 5. 422. 1754, *A Natural Arrangement of British Plants* 2: 222, 243. 1822 and *Acta Phytotax. Sin.* 32(2): 137. 1994, *Fl. N. Amer.* 3: i-xxiii, 1–590. 1997, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 402–403. 2001.

Betula alleghaniensis Britton (*Betula alleghaniensis* f. *macrolepis* (Fernald) Brayshaw; *Betula alleghaniensis* var. *alleghaniensis*; *Betula alleghaniensis* var. *fallax* (Fassett) Brayshaw; *Betula alleghaniensis* var. *macrolepis* (Fernald) Brayshaw; *Betula alleghaniensis* var. *macrolepis* (Fernald) F. Seym.; *Betula excelsa* Pursh, nom. illeg.; *Betula lutea* F. Michaux, nom. illeg.; *Betula lutea* f. *fallax* Fassett; *Betula lutea* f. *macrolepis* (Fernald) Fernald; *Betula lutea* var. *alleghaniensis* (Britton) Rehder; *Betula lutea* var. *genuina* Regel, nom. inval.; *Betula lenta* var. *lutea* Regel; *Betula lutea* var. *macrolepis* Fernald; *Betula lutea* var. *persicifolia* Dippel; *Betula persicifolia* K. Koch)

North America. Tree, perennial, male and female catkins, small nutlets held in catkins, closely related to *Betula lenta*

See *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 2: 152. 1811, *Fl. Amer. Sept.* 2: 621. 1813 and *Bull. Torrey Bot. Club.* 31(3): 166. 1904, *Rhodora* 24(285): 170–171. 1922, *Rhodora* 34(401): 95–96. 1932, *Canadian Field-Naturalist* 80(3): 161. 1966, *Fl. New England* ed. 2, 220. 1982

(Bark decoction taken as emetic or cathartic, blood purifier, diuretic. Ceremonial, bark placed on the coffins.)

in English: gray birch, yellow birch

in North America: merisier, bouleau jaune

Betula alnoides Buch.-Ham. ex D. Don (*Betula acuminata* Wallich, nom. illeg.; *Betula acuminata* Kindb.; *Betula acuminata* Ehrh.; *Betula acuminata* var. *arguta* Regel; *Betula acuminata* var. *glabra* Regel; *Betula acuminata* var. *lancifolia* Regel; *Betula acuminata* var. *pilosa* Regel; *Betula affinis* (Spach) Endl.; *Betula alnoides* var. *acuminata* (Spach) H.J.P. Winkl.; *Betula alnoides* var. *acuminata* (Wall.) H.J.P. Winkl.; *Betula cylindrostachya* var. *pilosa* (Regel) Regel; *Betula cylindrostachya* var. *subglabra* Regel; *Betula nitida* D. Don; *Betulaster acuminata* (Wallich) Spach; *Betulaster acuminata* Spach; *Betulaster affinis* Spach; *Betulaster nitida* (D. Don) Spach)

China, Nepal, Himalaya. Tree

See *Prodromus Florae Nepalensis* 58. 1825, *Pl. Asiat. Rar.* (Wallich). 2: 7, t. 109. 1830, *Linnaea* 7: 139. 1832, *Ann. Sci. Nat., Bot.*, II, 15: 198–200. 1841, *Nouv. Mém. Soc. Imp. Naturalistes Moscou* 13(2): 129–130. 1861 and *Das Pflanzenreich* IV. 61 (Heft 19): 89. 1904

(Roots eaten as antiemetic, anodyne, also for itch, measles, cold. Powder of burn bark mixed with ghee and applied for conjunctivitis; bark decoction taken against fever; dried bark powder made into a paste massaged on inflammation, sprain. Ceremonial, ritual, ingredient of Patra pooja in different religious pooja ceremonies.)

in China: xi hua

in India: bhojpatra, bhuji patra, bhuj patra, bhujapatra, bhujpatra, bhurjapatra, bol nangal, dieng ling, hlosunle, hriang, katbhoj, kath bhuj sauri, kathbhoj, shagra, shaur-sharol, sheori, sour, tadpatra, teria-ching

Betula ermanii Cham. (*Betula ermanii* var. *genuina* H.J.P. Winkl., nom. inval.; *Betula paraermanii* V. Vassil)

Siberia to Japan.

See *Mantissa Plantarum* 1: 124. 1767, *Linnaea* 6: 537, pl. 6, f. D, a-e. 1831 and *Botaniceskij Žurnal SSSR* 27: 7. 1942

(Bark applied as a bandage to wounds.)

in Japan: kamuy-tat, sarampe-tat

Betula insignis Franchet (*Betula austrosinensis* Chun ex P.C. Li; *Betula gynoterminalis* Y.C. Hsu & C.J. Wang; *Betula kwangsiensis* F.P. Metcalf; *Betula kweichowensis* Hu)

China.

See *Journal de Botanique* (Morot) 13(7): 206. 1899 and *Sinensia* 3(3): 88. 1932, *Lingnan Sci. J.* 20: 216. 1942, *Acta Phytotax. Sin.* 17(2): 89. 1979, *Acta Bot. Yunnan.* 5: 381. 1983

(Antiseptic, a spring tonic.)

in China: xiang hua

Betula lenta L. (*Betula lenta* var. *genuina* Regel, nom. inval.)

North America. Tree, perennial, bark dark reddish brown

See *Sp. Pl.* 2: 983. 1753, *Nouv. Mém. Soc. Imp. Naturalistes Moscou* 13: 126. 1861

(Used to treat dysentery, colds, pneumonia, diarrhea, gonorrhea, fevers, soreness, stomachache. Ceremonial, bark placed on the coffins.)

in English: black birch, cherry birch, mahogany birch, mountain mahogany, sweet birch

Betula nana L. (*Betula nana* var. *genuina* Regel, nom. inval.; *Chamaebetula nana* (L.) Opiz)

North America, Arctic and Subarctic. Shrub or subshrub, perennial

See *Species Plantarum* 2: 983. 1753, *Bulletin de la Société Impériale des Naturalistes de Moscou* 38(2): 407. 1865 and *Nordic J. Bot.* 14: 153. 1994

(Leaves decoction taken for stomachache and intestinal discomfort.)

in English: bog birch, dwarf birch

Betula neoalaskana Sarg. (*Betula alaskana* Sarg., nom. illeg.; *Betula alba* var. *humilis* Regel; *Betula papyrifera* subsp. *humilis* (Regel) Hultén; *Betula papyrifera* subsp. *humilis* (Regel) A.E. Murray; *Betula papyrifera* subsp. *neoalaskana* (Sarg.) A.E. Murray; *Betula papyrifera* var. *humilis* (Regel) Fernald & Raup; *Betula papyrifera* var. *neoalaskana* (Sarg.) Raup; *Betula resinifera* (Regel) Britton; *Betula resinifera* Britton, nom. illeg.)

North America, Alaska.

See *Arbustum Americanum* 19. 1785, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2B): 166. 1868 and *Botanical Gazette* 31(4): 236–237. 1901, *Bulletin of the New York Botanical Garden* 2(6): 165. 1901, *Das Pflanzenreich* IV,61: 79. 1904, *Journal of the Arnold Arboretum* 3(4): 206. 1922, *Contributions from the Arnold Arboretum of Harvard University* 6: 152. 1934, *Rhodora* 47(562): 321. 1945, *Flora of Alaska and Neighboring Territories. A Manual of the Vascular Plants* 367. 1968, *Kalmia* 12: 18. 1982, *Kalmia* 13: 4. 1983

(Astringent, stomachic.)

in English: paper birch, resin birch

Betula nigra Linnaeus (*Betula americana* Buc'hoz, nom. nud.; *Betula lanulosa* Michx.; *Betula nigra* Murith; *Betula nigra* Du Roi; *Betula nigra* Duhamel; *Betula rubra* F. Michaux; *Betula rubra* Hort. ex Regel)

North America. Perennial tree

See *Species Plantarum* 2: 982. 1753, *Fl. Bor.-Amer.* (Michaux) 2: 181. 1803, *Traité Arbr. Arbust.* (Duhamel), nouv. éd. 3: 203, t. 51. 1806, *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 2: 143. 1812, *Prodr.* (DC.) 16(2.2): 167. 1868

(Leaves applied as a poultice to cleanse and heal ulcers and fresh wounds, to treat dysentery, diarrhea, colds, inflammations, stomachache, milky urine.)

in English: black birch, red birch, river birch

Betula occidentalis Hook. (*Betula alba* f. *occidentalis* (Hook.) Fernald; *Betula alba* subsp. *occidentalis* (Hook.) Regel; *Betula beeniana* A. Nelson; *Betula elrodiana* E.J. in Thailand: koncham

in Tanzania: kimbara, pwimbiji

Bidens borianiana (Sch. Bip. ex Schweinf.) Cufod. (*Coreopsis borianiana* Sch. Bip.; *Coreopsis borianiana* Sch. Bip. ex Schweinf.)

Senegal, Cameroon. Erect branched annual herb, glabrescent, golden yellow flowers, winged achenes

See *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 18: 684. 1868 and *Bull. Jard. Bot. Natl. Belg.* 37(3, Suppl.): 1136. 1967

(A decoction given as a drink and bath for fever.)

Bidens cernua L. (*Bidens cernua* var. *elliptica* Wiegand; *Bidens cernua* var. *integra* Wiegand; *Bidens cernua* var. *minima* (Hudson) Pursh; *Bidens cernua* var. *oligodonta* Fernald & H. St. John; *Bidens cernua* var. *radiata* DC.; *Bidens filamentosa* Rydberg; *Bidens glaucescens* Greene; *Bidens gracilentata* Greene; *Bidens minima* Hudson; *Bidens prionophylla* Greene)

USA. Erect herb, nodding flowering heads solitary

See *Species Plantarum* 2: 832. 1753, *Flora Anglica* 310. 1762, *Flora Americae Septentrionalis*; or, ... 2: 566. 1814[1813], *Bulletin of the Torrey Botanical Club* 26(8): 417–419. 1899 and *Pittonia* 4(24B): 258. 1901, *Ohio Naturalist (and Journal of Science)* 5: 317. 1905, *Brittonia* 1(2): 104. 1931

(Used medicinally to treat urinary-tract infections. Root paste warmed and applied to forehead for relieving headache and fever.)

Bidens coronata (L.) Britton (*Bidens coronata* (L.) Fisch. ex Steud.; *Bidens coronata* Britton ex Sherff; *Bidens coronata* Britton; *Bidens coronata* Fisch. ex Steud.; *Bidens coronata* Fisch. ex Colla; *Bidens coronata* (L.) Britton var. *brachyodonta* Fernald; *Bidens coronata* (L.) Britton var. *tenuiloba* (A. Gray) Sherff; *Bidens coronata* (L.) Britton var. *trichosperma* (Michx.) Fernald; *Bidens trichosperma* (Michx.) Britton)

North America. Annual

See *Species Plantarum*, Editio Secunda 2: 1281. 1763, *Herb. Pedem.* iii. 306. 1834, *Nomenclator Botanicus*. Editio secunda 202. 1840, *Transactions of the American Philosophical Society*, new series, 7: 360. 1841 and *Bot. Gaz.* 56: 495. 1913

(Analgesic, antidiarrheal, antirheumatic, febrifuge, anti-inflammatory. Roots infusion taken for eye disease, headache, high fever and diarrhea.)

in English: crowned beggarticks

Bidens frondosa L. (*Bidens frondosa* var. *anomala* Porter ex Fernald; *Bidens frondosa* var. *caudata* Sherff; *Bidens frondosa* var. *pallida* (Wiegand) Wiegand; *Bidens frondosa* var. *stenodonta* Fernald & H. St. John; *Bidens melanocarpa* Wiegand)

North America.

See *Species Plantarum* 2: 832. 1753, *Bulletin of the Torrey Botanical Club* 26(8): 405–407. 1899 and *Rhodora* 5(51): 91. 1903, *Rhodora* 17(193): 22–23. 1915, *Rhodora* 26(301): 5. 1924, *Rhodora* 40(477): 352. 1938, *Brittonia* 11(3): 190. 1959

(Infusions and tinctures for irritation, inflammation, pain and bleeding of the urinary tract mucosa, for benign prostatic hypertrophy and increasing excretion of uric acid, decreasing the risk of gout attacks.)

Bidens gracilior Sherff

Tanzania.

See *Bot. Gaz.* 76: 84. 1923

(A mixture of leaves of the plant with leaves of *Harungana madagascariensis* Lam. ex Poir. drunk to remedy malaria and other fevers.)

in Tanzania: rwongera, vimulimuli

Bidens parviflora Willd.

China.

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 848. 1809 and *Phytochemistry* 62(5): 741–746. 2003, *Tetrahedron* 60(42): 9405–9415. 2004, *Chemical and Pharmaceutical Bulletin* 54(8): 1190–1192. 2006

(Antiallergic, histamine release inhibitor. Antidote, stings, vulnerary.)

in English: deer antler herb, prickly bidens, small flower bidens

in China: cizhencao, lujiaocao, xiaohua guizhencao

Bidens pilosa L. (*Bidens adhaerescens* Vell.; *Bidens alausensis* Kunth; *Bidens alba* (L.) DC.; *Bidens alba* var. *radiata* (Schultz-Bipontinus) R.E. Ballard; *Bidens alba* var. *radiata* R.E. in Indonesia: ajeran, hareuga, jaringan, ketul

in Japan: ko-sendan-gusa

in Malaysia: daun roten, kanching baju, kancing baju, kero-ten, pau-pau pasir, rumput jual

in Nepal: katare, nir

in Papua New Guinea: ivu na mag, kwipo, matapikwa, rakot

in Philippines: ang-nguad, burburtak, dadayem, 'enwad, nguad, pisau-pisau, puriket

in Thailand: puen noksai, kee nok sai, yaa koncham khaao

in Vietnam: d[ow]n bu[oos]t, t[uwr] t[oo] hoang, q[ur]y tr[aa] m th[ar]o

in Hawaii: ki, ki nehe, ki pipili, nehe

in Tonga: fisi'uli

Bidens schimperi Sch. Bip. (*Bidens prolixa* S. Moore)

Ethiopia, Tanzania. An annual herb, many-branched, erect or straggling, conspicuous bright yellow terminal flowers, small achenes, pappus of barbed bristles, leaves eaten as a vegetable

See *Repertorium Botanices Systematicae* 6: 168. 1846

(Roots to treat coughs and colds.)

in Tanzania: mangwe, mbangwe, mwitango, nyahedja, nyahedza, nyatwanga, nyaweza

Bidens tetraspinosa A. Majeed Kak & Javeid

India. Herbs, much-branched stems sulcate, spiny achenes, leaves sweet

See *J. Bombay Nat. Hist. Soc.* 79(1): 175. 1982

(Leaves paste applied for boils and rheumatism.)

Bidens tripartita L. (*Bidens comosa* (A. Gray) Wiegand; *Bidens comosa* Wiegand)

Europe. Annual, erect herb

See *Species Plantarum* 2: 831–832. 1753, *A Manual of Botany of the Northern United States* (ed. 5) 261. 1867, *Bulletin of the Torrey Botanical Club* 24(9): 436. 1897 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 16: 271. 1937

(Whole plant antiseptic, aperient, refrigerant, astringent, diuretic, emmenagogue, febrifuge, narcotic, sedative, styptic, sudorific, a remedy for bleeding of any kind. Used internally to treat bladder and kidney problems, blood in the urine, uterine bleeding, chronic dysentery, ulcerative colitis and peptic ulcers. Roots and seeds emmenagogue, expectorant, diuretic, against kidney stones and gallstones. Burning herb repels insects and flies.)

in English: bur-beggar tick of Europe, bur marigold, three-lobed butterbur, trifid bur-marigold, wolf's grasp weed

in China: lang ba cao, lang pa tsao, longbacao

in Japan: ta-ukogi

in Vietnam: th[ur]y song nha

Biebersteinia Stephan Geraniaceae (Biebersteiniaceae)

For the German explorer Friedrich August Marschall von Bieberstein, 1768–1826, author of *Flora taurico-caucasica*. Charkouiae [Charkow] 1808–1819, *Beschreibung der Länder zwischen den Flüssen Terek und Kur am Caspischen Meere*. Frankfurt am Main 1800 and *Centuria plantarum rariorum Rossiae meridionalis* praesertim Tauriae et Caucasi iconibus descriptionibusque illustrata. Charkoviae 1810. See *Mémoires de la Société Impériale des Naturalistes de Moscou* 1: 89. 1806, Fischer, Friedrich Ernst Ludwig von (1782–1854), *Catalogue du jardin des plantes de son excellence monsieur le comte Alexis de Razoumoffsky, à Gorenki*. Moscou, 1812, Antoine Lasègue (1793–1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845, *Analysen zu den natürlichen Ordnungen der Gewächse* 14. 1856 and E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, Warren R. Dawson, *The Banks letters*. London 1958, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 207. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 450. 1965, Stafleu and Cowan, *Taxonomic Literature*. 3: 305–306. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Biebersteinia odora Stephan ex Fisch. (*Biebersteinia emodii* Jaub. & Spach; *Biebersteinia odora* Royle)

India. Perennial herb, fern-like leaves, densely tufted root-stock, strongly aromatic, deep yellow flowers in terminal clusters

See *Mémoires de la Société Impériale des Naturalistes de Moscou* 1: 89. 1806, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 153. 1835, *Illustrationes Plantarum Orientalium* 2: 109. 1844, *Ann. Sci. Nat., Bot. sér.* 3, 6: 109. 1846

(Paste of whole plant applied on cuts, burns, skin sores and wounds; plants used as insect repellent. Crushed leaves made into a paste applied against septic wounds, infections. Veterinary medicine, crushed leaves made into a paste applied against septic wounds.)

in China: gao shan xun dao niu, xun dao niu shu

in India: chhekerpa, darkspos, khardug, khardung

Bignonia L. Bignoniaceae

Named in honor of Abbé Jean Paul Bignon, 1662–1743, librarian to the King Louis XIV, contributor to the *Journal des savants*, author of *Discours prononcé dans l'Académie Française ...* par l'abbé Bignon, reçu à la place de M. le comte de Bussy. Paris 1693. See Paris - Académie des Inscriptions, etc., *Médailles sur les principaux événements du règne de Louis le Grand*, avec des explications historiques

par l'Académie [F. Charpentier, J.P. Bignon and others]. 1702, E. Rassiod, *Notes sur le Concile de Trente* touchant les points les plus importants de la discipline ecclésiastique et le pouvoir des évêques, etc. [from lectures by J.P. Bignon and others] 1706, Johann Jakob Scheuchzer (1672–1733), *Herbarium diluvianum*. Leyden 1723, *Bibliotheca duboisiana, ou Catalogue de la bibliotheque de feu son Eminence Monseigneur le Cardinal Du Bois*; recueillie ci devant par Monsieur l'abbé Bignon. Paris 1725, Sébastien Vaillant (1669–1722) and Claude Aubriet (1665?–1742), *Botanicon Parisiense*. Leyden & Amsterdam 1727, Carl Linnaeus, *Species Plantarum*. 2: 622–625. 1753, *Genera Plantarum*. Ed. 5. 273. 1754, *Genera Plantarum* 137. 1789, Henry C. Andrews, *The Botanist's Repository*. 2: t. 86. London 1800 and *Fl. Neotrop.* 25(1): 1–131. 1980.

Bignonia capreolata L. (*Anisostichus capreolata* (L.) Bureau; *Anisostichus crucigera* (L.) Bureau)

North America. Perennial vine

See *Species Plantarum* 2: 624. 1753

(Leaves infusion or decoction taken as blood purifier, antirheumatic.)

in English: cross vine, quarter vine

Bignonia hyacinthina (Standl.) L. Lohmann (*Bignonia macrophylla* Sessé & Moc.; *Bignonia priurei* DC.; *Bignonia priurei* DC. ex Seem., nom. illeg.; *Mussatia hyacinthina* (Standl.) Sandwith; *Tynanthus hyacinthinus* Standl.)

Amazon Basin, Peru and Bolivia. Lianas, leaves compound, pseudostipules, flattened woody dehiscent fruit, primary forest, also as *Mussatia hyacinthina* (Standl.) Sandwith

See *Species Plantarum* 2: 622–625. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 154. 1845, *The Botany of the Voyage of H.M.S. ~Herald~* 179. 1854, *Proceedings of the Royal Horticultural Society of London* 3: 193. 1863, *Histoire des Plantes* 10: 32. 1888, *Die Natürlichen Pflanzenfamilien* 4(3b): 224. 1894 and *Publications of the Carnegie Institution of Washington* 461(4): 87. 1935, *Recueil des Travaux Botaniques Néerlandais* 34: 218. 1937, *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Journal of Ethnopharmacology* 9(2–3): 225–236. 1983, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000, *Nuevo Catálogo de la Flora Vasculare de Venezuela* 272. 2008

(Leaf infusion against colds. Bitter and astringent bark an admixture to coca.)

in Peru: chamairo

Biondia Schltr. Apocynaceae (Asclepiadaceae)

Biondia microcentra (Tsiang) P.T. Li (*Adelostemma microcentrum* Tsiang; *Biondia elliptica* P.T. Li & Z.Y. Zhu)

China. Liana, twining, corolla yellowish white with purplish interior

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36(5, Beibl. 82): 91. 1905, *Sunyatsenia* 2(2): 184–186, pl. 34. 1934, *Acta Botanica Yunnanica* 4(2): 161–162, pl. 1. 1982, *Journal of South China Agricultural University* 12(3): 39. 1991

(A decoction of all parts used as a febrifuge and for the treatment of rheumatism.)

in China: qin ling teng shu, qu feng teng

Biophytum DC. Oxalidaceae

Greek *bios* 'life' and *phyton* 'plant', the leaves and pods are sensitive to touch; see *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 689–690. 1824, *Genera Plantarum* 1172. 1840.

Biophytum abyssinicum Steud. ex A. Rich. (*Biophytum reinwardtii* (Zucc.) Klotzsch; *Biophytum reinwardtii* Klotzsch; *Biophytum reinwardtii* subsp. *abyssinicum* Steen)

India, Southeast Asia, Tanzania. Herb, flowers yellow and purple in pedunculate umbels

See *Tentamen Florae Abyssinicae ...* 1: 122. 1847, *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 85. 1861

(Used in Ayurveda. Plant against fever, rashes, insanity; whole plant extract applied for hip pain; dried plant put in milk and taken on an empty stomach against jaundice; induction of sleep in children, contact therapy, whole plant put below the pillow.)

in India: bhoomi sakkari, horamuchhaka, lajjalu, puliyarala

in Indonesia: biskucingan, ki payung, krambilan

in Malaysia: inya payung

in Tanzania: chakuse, kikusi

Biophytum adiantoides Wight ex Edgew. & Hook.f.

India, Vietnam, Cambodia. Woody perennial shrublet, branched, white yellowish petals

See *Fl. Brit. India* [J.D. Hooker] 1(2): 437. 1874 [Jan 1874]

(Whole plant given to children against stomach troubles.)

in Malaysia: daun payong, mayong, payong ali

in Thailand: krathuep yop

in Vietnam: sinh di[eej]p r[as]ng

Biophytum candolleianum Wight

India.

See *Journal of Ethnopharmacology* 102(2): 246–255. 2005

(Used in Ayurveda. Leaf paste febrifuge, to cure skin diseases, poison bites, wounds and rheumatism.)

in India: alambusa, horamuni, mukcutti, todda-vaddi

Biophytum fruticosum Blume (*Biophytum blumei* Zuccarini; *Biophytum esquirolii* H. Lév.; *Biophytum thorelianum* Guillaumin var. *sinensis* Guillaumin)

China, Java. Perennial, white petals

See *Bijdr. Fl. Ned. Ind.* 5: 242. 1825 and *Notulae Systematicae. Herbarium du Muséum de Paris* 1(1): 24–25. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 12(317–321): 181. 1913

(Antiinflammatory.)

in China: fen zhi gan ying cao

Biophytum helenae Buscal. & Muschl. (*Biophytum bequaertii* De Wild.; *Biophytum bogoroense* De Wild.; *Biophytum homblei* De Wild.; *Biophytum sensitivum* auct., non (L.) DC.)

Tanzania. Petals yellow purple

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 475. 1913

(Prevention of abortion, miscarriage, piles. Purgative, vermifuge, laxative, carminative, stomachic, astringent, against diarrhea, cough.)

in Burundi: itinyabakwe, tinyabakwe

in Congo: bishasri, funyebishari, kafunhya

in Tanzania: tenyabakwe

Biophytum intermedium Wight var. *verticillatum* (Wight) Edgew. & Hook. f.

India.

See *Illustrations of Indian Botany; or Figures Illustrative of Each of the Natural Orders of Indian Plants...* 1: 162. 1840, *The Flora of British India* [J.D. Hooker] 1(2): 439. 1874 and *J. Cytol. Genet.* 30(2): 151–155. 1955

(Plant paste consumed for diarrhea, vomiting.)

in India: paarainellipatchilai

Biophytum nervifolium Thwaites (*Biophytum sensitivum* (L.) DC. var. *nervifolium* (Thwaites) Edgew. & Hook. f.)

India.

See *Prodr.* (DC.) 1: 690. 1824, *Enumeratio Plantarum Zeylaniae* [Thwaites] 64. 1858, *The Flora of British India* [J.D. Hooker] 1(2): 437. 1874

(Leaf paste applied over the forehead to relieve severe headache.)

in India: thottasurungi

Biophytum sensitivum (L.) DC. var. *candolleianum* Edgew. & Hook. f. (*Biophytum sensitivum* (L.) DC. var. *candolleianum* (Wight) Edgew. & Hook.f.)

India.

See *Prodr.* (DC.) 1: 690. 1824, *The Flora of British India* [J.D. Hooker] 1(2): 437. 1874

(Magico-religious beliefs, the plant as a good luck charm.)

in India: kirunelli

Biophytum zenkeri Guillaumin

Cameroon. Herb, much-branched, petals yellow

See *Notulae Systematicae*. *Herbier du Museum de Paris* 1: 26. 1909

(Sedative, lactogenic, for epilepsy. Veterinary medicine, lactogenic, before and after delivery.)

in Congo: changoli, nabwifomeke, nabwifunye

Bischofia Blume Phyllanthaceae (Bischofiaceae, Euphorbiaceae)

Named after the German botanist Gottlieb Wilhelm T.G. Bischoff, 1797–1854 (Heidelberg), pharmacist, lexicographer and glossographer, his observations on cryptograms prepared the way for Wilhelm F.B. Hofmeister's discovery of the alteration of generations, among his writings are *Die kryptogamischen Gewächse*. Nürnberg 1828, *Plantae medicinales secundum methodum Candollii*. Heidelberg 1829, *Lehrbuch der Botanik*. Stuttgart 1834–1840 and *Handbuch der botanischen Terminologie und Systemkunde*. Nürnberg 1830–1844. See Karl L. von Blume, *Bijdragen tot de flora van Nederlandsch Indië* 17: 1168–1169. 1826–1827, Wilhelm Friedrich Benedikt Hofmeister (1824–1877), *Vergleichende Untersuchungen*. in Togo: berniticu, kirane

Blainvillea Cassini Asteraceae

For the French biologist Henri Marie Ducrotay de Blainville, 1777–1850 (d. Paris, France), zoologist, physician, paleobiologist, naturalist, professor of zoology, comparative anatomy and physiology, among his writings are *Manuel d'actinologie ou de zoophytologie*. [Engravings by Prêtre, Turpin and Massard.] Paris, Strasbourg [1830-] 1834, *Manuel de Malacologie et Conchologie*. Paris, Strasbourg 1825–1827, *De l'Organisation des Animaux, ou principes d'Anatomie comparée*. Paris & Strasbourg 1822, and *Ostéographie ... Ouvrage précédé d'une étude sur la vie et les travaux de M. de Blainville*, par M.P. Nicard. Paris 1839–1864. See Alexandre Henri Gabriel Comte de Cassini, *Dictionnaire des Sciences Naturelles*. 29: 493–494. 1823, Charles Gaudichaud-Beaupré (1789–1854), [Botany of the Voyage.] *Voyage autour du Monde ... sur ... l'Uranie et la Physicienne, pendant ... 1817–1820*. Paris 1826 [-1830], A.N. Vaillant, *Voyage autour du Monde exécuté pendant les Années 1836 et 1837 sur la corvette "La Bonite"*. Paris, 1844–1846, 1851, 1866 and Stafleu and Cowan, *Taxonomic literature*. 1: 227. [Date of birth: 1777.] Utrecht 1976, *Kew Bulletin* 32: 321–322. 1978, William Coleman, *D.S.B.* 2: 186–188. 1981, *Taxon* 30: 78. 1981, Frans A. Stafleu and Erik A. Mennega, *Taxonomic Literature. Supplement II*. 190. [Date of birth: 1778.] Königstein 1993, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Compositae Newslett.* 27: 7–10. 1995.

Blainvillea acmella (L.) Philipson (*Bidens acmella* (L.) Lam.; *Bidens ocymifolia* Lam.; *Blainvillea latifolia* (L.f.) DC.; *Blainvillea rhomboidea* Cass.; *Ceratocephalus acmella*

(L.) Kuntze; *Coreopsis acmella* (L.) K. Krause; *Eclipta latifolia* L.f.; *Pyrethrum acmella* (L.) Medik.; *Spilanthes acmella* (L.) Murray; *Spilanthes ocymifolia* (Lam.) A.H. Moore; *Verbesina acmella* L.; *Verbesina lavenia* L.)

India. Herb

See *Species Plantarum* 2: 901–902. 1753, *A System of Vegetables*. Translated from the thirteenth edition 610. 1774, *Obs. Bot.* 243. 1775, *Supplementum Plantarum* 378. 1781, *Encyclopédie Méthodique, Botanique* 1: 415. 1783, *Dictionnaire des Sciences Naturelles* [Second edition] 29: 493. 1823, *Contributions to the Botany of India* 17. 1834, *Prodr.* 5: 492. 1836, *Revisio Generum Plantarum* 1: 326. 1891 and *Beihefte zum Botanischen Centralblatt* 32: 340. 1914, *Blumea* 6(2): 350–351. 1950, *Taxon* 30: 78. 1981, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Compositae Newsl.* 27: 7–10. 1995

(Used in Ayurveda. Leaf juice antiseptic. Shoot paste against animal bite.)

in India: acharbomdi, akalkarra, akarkara, byshit-iong, kala-jari, pipulka, pirazha, sam atching, sarahattika, vana-mugali

Blainvillea dichotoma (Murray) Stewart (*Blainvillea latifolia* (L.f.) DC.; *Blainvillea rhomboidea* Cass.; *Eclipta latifolia* L.f.; *Verbesina dichotoma* Murray)

India.

See *Opuscula* 2: 15, t. 4. 1779, *Supplementum Plantarum* 378. 1781, *Dictionnaire des Sciences Naturelles* [Second edition] 29: 493. 1823, *Contributions to the Botany of India* 17. 1834, *Prodr.* 5: 492, 1836 and *Proceedings of the California Academy of Sciences*, Series 4, 2: 149. 1911, *Kew Bull.* 32: 321–322. 1978, *Taxon* 30: 78. 1981

(Used in Ayurveda. Leaf juice antiseptic. Paste of shoots applied externally on the portion of wild animal bite.)

in India: kalajari

Blastania Kotschy & Peyr. Cucurbitaceae

From the Greek *blastano*, *blastao* ‘to bring forth’, see Kotschy, Karl Georg Theodor (1813–1866), *Plantae tinneanae sive descriptio plantarum ... in septentrionali interiori Africae parte collectarum ... suis sumptibus ediderunt A.P.F. Tinne et J.A. Tinne.* 15, pl. 7. Vindobonæ, 1867.

Blastania fimbriatipula Kotschy & Peyr. (*Melothria fimbriatipula* (Kotschy & Peyr.) Roberty)

Tropical Africa.

See *Species Plantarum* 1: 35. 1753 and *Bulletin de l’Institut Française d’Afrique Noire* 16: 795. 1954

(Fruit for venereal and skin diseases.)

Blastania garcini (L.) Cogn. (*Ctenolepis garcinii* (Burm. f.) C.B. Clarke; *Ctenolepis garcinii* (L.) C.B. Clarke; *Ctenopsis*

garcini (L.) Naudin; *Sicyos garcini* L.; *Sicyos garcini* Burm. f.; *Zehneria garcini* (L.) Stocks)

India. Herb, spreading, twining, small axillary greenish yellow flowers, red globose fruit

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 4: 148. 1852, *Annales des Sciences Naturelles; Botanique*, sér. 5, 6: 13. 1866, *Genera Plantarum* 1: 832. 1867, *The Flora of British India* 2: 629. 1879, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 629. 1881

(Tonic, diuretic. Used in religion and magico-religious beliefs, seeds as amulets.)

in India: ankh-phorni, ankh-phorni-ki-bel

Blastus Lour. Melastomataceae

From the Greek *blastos* ‘bud, sprout, germ, ovary, sucker’, referring to the anthers and to the ovary, see *Flora Cochinchinensis* 2: 517, 526. 1790.

Blastus borneensis Cogn. ex Boerl. (*Blastus cogniauxii* Stapf)

SE Asia, Borneo.

See *Transactions of the Linnean Society of London* 28(1): 116. 1871[1872], *Handl. Fl. Ned. Ind.* (Boerlage) 1: 531. 1890, *Monographiae Phanerogamarum* 7: 477, 481. 1891, *Icones Plantarum* 24: pl. 2311. 1894

(Roots decoction as a postpartum remedy.)

in China: nan ya bai la mu

Malay names: keduduk cherang, keduduk hutan, senduduk rimba

Blechnum L. Blechnaceae (Blechnoideae)

Latin *blachnon* or *blechnon* applied by Plinius to a kind of fern, the ancient Greek name *blechnon* used for a species of fern, male fern, *Aspidium filix-mas*; see Carl Linnaeus, *Species Plantarum*. 2: 1077. 1753, *Methodus Plantarum* 25. 1754, *Genera Plantarum*. Ed. 5. 485. 1754, *Plantae Cryptogamicae Florae Gottingensis* 286–288. 1770, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesamten Naturkunde* 3(2): 160. 1809, *Prodromus Florae Novae Hollandiae* 152–153. 1810, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften* 6: 463, 469–472, 474–475, 477, 481, 514–515. 1851, *Historia Filicum* 303. 1875, *Anales de la Sociedad Española de Historia Natural* 1898: 108. 1898 and *Botanical Magazine* 41(492): 702. 1927, *Botanical Magazine* 47(555): 180–181. 1933, *Annales Cryptogamici et Phytopathologici* 5: 155. 1947, *Webbia* 28: 456–457. 1973, *Fern Gaz.* 11(23): 141–162. 1975.

Blechnum orientale L. (*Blechnopsis orientale* Nakai; *Blechnopsis orientalis* (L.) C. Presl; *Blechnopsis orientalis* C. Presl)

SE Asia, Belize. Terrestrial fern, robust, stout, woody, erect, short stem densely covered with glossy brown scales, long fronds, whole plant as food

See *Species Plantarum* 2: 1077. 1753, *Species Plantarum* ed. II. 2. 1535. 1763, *Epimel. Bot.* 117. 1851, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften* 6: 477. 1851 and *Bot. Mag.* (Tokyo) 47. 181. 1933, *Pharmacologyonline* 3: 58–60. 2008

(Whole plant ground and taken with water to cure impotency in men. Fronds antibacterial, tonic, antiviral, anthelmintic, female contraceptive, diaphoretic, stomachic, a new leaf of the fern eaten by women to ensure complete sterility; a poultice for boils, abscesses, sores, weeping sores. Rhizome anthelmintic, a cure for intestinal wounds and urinary bladder complaints. Magico-religious beliefs, ceremonial, used in worship and rituals.)

in English: barking deer fern, fern, Oriental hammock fern, shield fern

in China: dong fang wu mao jue ye

in India: bajee, brahma rakshasani, hathajori, haththazori, hobe tepop, japi, lase paye, rajhans, thotripanai

in Indonesia: paku telao

in Japan: hiryu-shida (= flying dragon fern)

Malay name: paku lipan

in Papua New Guinea: awor

in Philippines: pakong alagdan

in Sarawak: paku kelindang

Blechnum spicant (L.) Sm. (*Acrostichum spicant* (L.) Willd.; *Asplenium spicant* Bernh.; *Blechnum spicant* (L.) Roth; *Blechnum spicant* Roth; *Blechnum spicant* (L.) With.; *Blechnum spicant* subsp. *nipponicum* auct. non (Kunze) A. Löve & D. Löve; *Blechnum spicant* var. *elongata* B. Boivin; *Blechnum spicant* var. *elongatum* (Hook.) B. Boivin; *Lomaria spicant* (L.) Desv.; *Lomaria spicant* Desv.; *Lomaria spicant* fo. *serrulatum* Clute; *Lomaria spicant* var. *elongata* Hook.; *Onoclea spicant* Hoffm.; *Osmunda spicant* L.; *Struthiopteris spicant* (L.) F.W. Weiss; *Struthiopteris spicant* Weiss)

Europe, North America. Evergreen fern, perennial, dimorphic, emergency food, chewed to alleviate thirst, plant eaten by mountain goats and deer

See *Species Plantarum* 2: 1066–1067. 1753, *Methodus Plantarum* 25. 1754, *Plantae Cryptogamicae Florae Gottingensis* 287. 1770, *Flora Berolinensis Prodrromus* 289. 1787, *Mémoires de l'Académie Royale des Sciences* 5: 411. 1793, *Annalen der Botanick.* ed. Usteri 10: 56. 1794, *An Arrangement of British Plants*, Third Edition 765. 1796,

Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde 5: 325. 1811 and *American Midland Naturalist* 12: 277. 1931, *Economic Botany* 27: 257–310. 1973, *Nordic J. Bot.* 14: 150. 1994

(Plant used in diarrhea. Astringent, anticancer, stomachic, leaflets chewed in the treatment of cancer, lung disorders, colic and stomach problems; fronds used externally for skin sores; roots decoction taken for diarrhea.)

in English: deer fern, hard fern

Blechum P. Browne Acanthaceae

Latin and Greek *blechon* applied to some other plant species, wild pennyroyal, see *The Civil and Natural History of Jamaica* in Three Parts 261. 1756, *Systema Naturae*, Editio Decima 2: 1120. 1759 and *Fieldiana, Bot.* 24(10/4): 328–462. 1974, *Proc. Calif. Acad. Sci.*, ser. 4, 48(13): 253–284. 1995, *Revista Biol. Trop.* 43(1–3): 75–115. 1995, *Contr. Univ. Michigan Herb.* 21: 161–174. 1997, *Brittonia* 59(3): 199–216. 2007, *Taxon* 58(3): 893–906. 2009, *Proc. Calif. Acad. Sci.*, ser. 4, 61(4): 291–379. 2010.

Blechnum brownei Juss. (*Barleria pyramidata* Lam.; *Blechnum blechum* (L.) Millsp.; *Blechnum brownei* Kunth, nom. illeg.; *Blechnum brownei* fo. *albiflorum* Kuntze; *Blechnum brownei* fo. *coeruleum* Kuntze; *Blechnum brownei* fo. *puberulum* Leonard; *Blechnum brownei* var. *laxum* Nees; *Blechnum linnaei* Nees; *Blechnum linnaei* var. *laxum* Nees; *Blechnum linnaei* var. *nanum* Nees; *Blechnum linnaei* var. *parviflorum* Nees; *Blechnum pyramidatum* (Lam.) Urb.; *Blechnum trinitense* Nees; *Ruellia blechum* L.)

West Indies. Sometimes as *Ruellia blechum* L.

See *Systema Naturae*, Editio Decima 2: 1120. 1759, *Encyclopédie Méthodique, Botanique* 1: 380–381. 1785, *Annales du muséum national d'histoire naturelle* 9: 270. 1807, *Nova Genera et Species Plantarum* 2: 238. 1818 and *Publications of the Field Columbian Museum, Botanical Series* 2(1): 100. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 15: 323. 1918, *Journal of the Washington Academy of Sciences* 32(6): 184. 1942, *Ceiba* 20(1): 27–41. 1976, *Brittonia* 59: 209. 2007

(Whole plant decoction for venereal diseases. Pounded leaves as vulnerary.)

in Philippines: bamburia, bumburrua, daiang, damong-sambali, dayang, gareng nga purau, karimbusuk, karis-busuk, kopsis-kopsis, sapin-sapin, tari-tari, tarre-tarre

Blepharis Juss. Acanthaceae

From the Greek *blepharis* 'eyelash', in allusion to the fringed bracts and bracteoles, or to the white fringed anthers, see

Genera Plantarum 103. 1789 and *Cat. Pl. Madag., Acanth.* 2(24): 7–32. 1939, *Fl. Madagasc.* 182: 1–219. 1967.

Blepharis asperima Nees (*Cynarospermum asperimum* (Nees) Vollesen)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 267. 1847 and *Kew Bulletin* 54: 171–172. 1999

(Leaves and seeds as tonic, aphrodisiac, purgative, in liver disorders, throat inflammation, asthma.)

in India: karadu

Blepharis ciliaris (L.) B.L. Burt (Acanthodium spicatum Delile; *Acanthus edulis* Forssk.; *Blepharis ciliaris* auct.; *Blepharis edulis* (Forssk.) Pers.; *Blepharis edulis* Pers.; *Blepharis edulis* var. *gracilis* Maire; *Blepharis persica* (Burm.f.) Kuntze; *Ruellia ciliaris* L.; *Ruellia persica* Burm.f.)

Pakistan, Saudi Arabia. Upright spiny herb, rigid, lavender flowers edible, leaves and seeds reported to be edible, good fodder for sheep and camels

See *Species Plantarum* 2: 634–635. 1753, *Syst. Nat.* ed. 12, 2: 424. 1767, *Flora Indica ... nec non Prodromus Florae Capensis*, pl. 42. 1768, *Flora Aegyptiaco-Arabica* 114. 1775, *Syn. Pl.* (Persoon) 2(1): 180. 1806, *Revisio Generum Plantarum* 2: 483. 1891 and *Notes from the Royal Botanic Garden, Edinburgh* 22: 94. 1956

(Used in Ayurveda and Unani. Plant juice to cure earache. Leaves useful in wounds, ulcers, nasal hemorrhage, asthma, throat inflammation, purgative, disorders of spleen and liver. Roots diuretic, in urinary discharges and dysmenorrhea. Seeds diuretic, aphrodisiac, expectorant, useful in strangury and conjunctivitis; dried ripe seeds ground and powdered to heal wounds and sore eyes. *Blepharis edulis* aphrodisiac.)

in India: babhru, chachu, chaupatia, grahaka, guthava, kama-vrddhi, karadu, kukkuta, kuranta, kurkuta, medhakrita, oontgan, parnaka, sachidala, shikhi, shiriari, shitichara, shitivara, shrivaraka, shvetavara, sitivara, suchipatra, suchyavha, suchyavhaya, sunishanna, sunishannaka, sutapatra, svastika, tukham balanga, tukhm anjir, tukhm anjrah, tukhm balanga, tukhm-i-otangan, tukhm utangan, uchchata, ustrakandi, utangan, utangana, utanjan, utingana, utangan, uttanjan, vitunna

in Pakistan: sagedantan

Blepharis integrifolia (L.f.) E. Mey. ex Schinz (*Acanthus integrifolius* L.f.; *Acanthus repens* Vahl; *Blepharis integrifolia* (L.f.) E. Mey. & Drège; *Blepharis integrifolia* var. *setosa* (Nees) Oberm.; *Blepharis molluginifolia* Pers.; *Blepharis repens* (Vahl) Roth; *Blepharis rupicola* Engl.; *Blepharis saturajifolia* Pers.; *Blepharis setosa* Nees)

Southern and Eastern Africa.

See *Supplementum Plantarum* 294. 1782, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 60: 416. 1915

(Leaves for boils and ulcers, leaves crushed and the paste applied on forehead for headache.)

Blepharis linariifolia Pers. (*Acanthodium hirtum* Hochst. ex Nees; *Blepharis edulis* Pers. fo. *hirta* (Hochst. ex Nees) A. Terracc.; *Blepharis hirta* (Hochst. ex Nees) Martelli; *Blepharis hirta* var. *latifolia* Martelli; *Blepharis linariaefolia* Pers.; *Blepharis passargei* Lindau)

East Africa. Herb, wiry, low-growing, linear leaves, prickly bracts, flowers blue, eaten by cattle, goats, sheep, camels and donkeys

See *Syn. Pl.* (Persoon) 2(1): 180. 1806 and *Journal of Ethnopharmacology* 35: 25–63. 1991, *Journal of Ethnopharmacology* 92: 233–244. 2004

(Used in Ayurveda. Febrifuge, drink plant decoction; a tisane of the whole plant taken for syphilis, tuberculosis, chestpain; wounds, decoction used as a wash and powder of the dried plant applied; fresh or dried whole plant, powdered, local application, for skin burns, urogenital infection. Seeds and leaves applied for pains. Veterinary medicine, lactogenic, retained placenta.)

in India: bhongri, billikhoja, chatuspatri, oontakateri, oonthkantela, ucchata

in Burkina Faso: wiwintin wilinwitin

in Ivory Coast: wiwintin wilinwitin

in Kenya: ekuleu-lochi, imaraga, Imarak

in Mali: giirngal, nāman, nāman doñolo ya, nyame danga, yaanso, yawotanjomolo

in Mauritania: giirngal

in Niger: barkari si goudji

in Nigeria: daúdàr-maáguzaáwaa, daudar maguzawa, fàskàrà todyí, gagi, gandin damo, gigi

in Senegal: kuru ulu

in Somalia: yamaarug

in Upper Volta: wiwintin wilinwitin

Blepharis maderaspatensis (L.) B. Heyne ex Roth (*Acanthus ciliaris* Burm. f.; *Acanthus maderaspatensis* L.; *Blepharis boerhaviifolia* Pers., nom. illeg.; *Blepharis boerhaviifolia* var. *nigrovenulosa* De Wild. & T. Durand; *Blepharis breviciliata* Fiori; *Blepharis gueinzii* T. Anderson; *Blepharis maderaspatensis* (L.) Heyne; *Blepharis maderaspatensis* Heyne ex Roth; *Blepharis maderaspatensis* (L.) Roth; *Blepharis maderaspatensis* subsp. *maderaspatensis*; *Blepharis maderaspatensis* subsp. *rubiifolia* (Schumach.) Napper; *Blepharis maderaspatensis* var. *abyssinica* Fiori; *Blepharis rubiifolia* Schumach.; *Blepharis teaguei* Oberm.; *Blepharis togodelia* Solms)

India, Tropical Africa. Suffrutescent herb, procumbent, scrambling, creeping, prostrate or suberect, wiry,

many-branched, rooting at nodes, whorled leaves, cream white flowers, spiny spikes

See *Flora Indica* ... nec non Prodrumus Florae Capensis 139. 1768, *Novae Plantarum Species* 320. 1821, *Beskrivelse af Guineiske planter* 292. 1829 and *Boschi e Piante Legn. Eritrea* 346. 1912, *Kew Bulletin* 24: 325. 1970, *Fl. Tamilnadu-Carnatic* 3(1): 1167. 1983

(Plant ash for dropsy, swellings, edema, gout; dry alcoholic extract of the plant a potent diuretic; plant parts crushed mixed with sheep milk given for venereal diseases. Leaf juice in throat troubles and asthma; leaves ground with egg and onion and applied for bone fracture; leaf paste applied on wounds. Veterinary medicine, leaves ground with egg and onion and applied for bone fracture.)

in English: creeping blepharis

in India: anthrinta pulu, arithilai poruthi, dudhiya choti, karattukkodi, kodali soppu, kolagohoma, nanthrapundu, nethira poondu, uttagana, vettukaya poondu

in Mali: eñe tara, énye taràà

in Nigeria: abèròdéfe

Blepharis repens Roth

India.

See Roth, Albrecht Wilhelm (1757–1834), *Novae Plantarum Species praesertim Indiae orientalis* 321. Halberstadii: Sumptibus H. Vogleri, 1821 and *Journal of Ethnopharmacology* 94(2–3): 261–266. 2004

(Plants used in oral health care.)

Blepharis sindica Stocks ex T. Anderson

India, Pakistan.

See *Journal of the Linnean Society, Botany* 9: 500. 1867

(Seeds boiled in cow milk and taken as tonic.)

in India: bhangari

Blepharispermum Wight ex DC. Asteraceae

From the Greek *blepharis* ‘eyelash’ and *sperma* ‘seed’, referring to the shape of the seeds, see *Contr. Bot. India* 11. 1834 and *Economic Botany* 59(1): 43–65. 2005.

Blepharispermum pubescens S. Moore

Tropical Africa. Scandent shrub, scrambling, florets white

See *J. Linn. Soc., Bot.* 37: 168. 1905 [1904–1906 publ. 1905]

(For malaria.)

in Rwanda: umunyuragisaka

Blepharispermum subsessile DC.

India. Herb, shrub, woody rootstock, white globose heads

See *Contr. Bot. India* 12. 1834

(Used in Ayurveda. Plant or roots decoction used as a tonic. Powdered root in snakebite and scabies; root juice given in rheumatoid arthritis; root extract given to expel intestinal worms, also for rheumatic pains and diarrhea; root paste taken internally in body pain. Veterinary medicine, leaves ground with those of *Alysicarpus vaginalis* given for anthrax. Magico-religious beliefs, auspicious twigs put in houses on festival days, the harvest festival *Navkhana*.)

in India: adavi banti, adivibanti, batvali, batvati, konda mamidi, naama banta, nallipodla, nemabanti, raasnajadi, rasna, rasna jadi, rasnajadi, rasnajandi, rasnajhodi

Blepharistemma Wall. ex Benth. Rhizophoraceae

From the Greek *blepharis* ‘eyelash’ and *stemma* ‘a crown’, referring to the shape of the crown, see *J. Proc. Linn. Soc., Bot.* 3: 73, 78. 1858.

Blepharistemma serratum (Dennst.) Suresh (*Blepharistemma corymbosum* Benth.; *Blepharistemma corymbosum* Wall. ex Benth.; *Blepharistemma membranifolium* (Miq.) Ding Hou; *Rodschiedia serrata* Densst.)

India. Tree, corky bark, inflorescence axillary cymes, white flowers polygamodioecious, petals laciniate, greenish black capsule, arillate seeds

See *Species Plantarum* 1: 443. 1753, *Schlüssel Hortus Malab.* 31. 1818, *Bijdr. Fl. Ned. Ind.* 5: 218–219. 1825, *Numer. List* [Wallich] n. 6320. 1832, *Cat. Hort. Bog. Alt.* 213. 1844, *J. Proc. Linn. Soc., Bot.* 3: 65, 73, 78. 1858 and *Fl. Males., Ser. 1, Spermat.* 5: 489. 1958, *Interpret. Van Rheede’s Hort. Malab.* 214. 1988, Saldanha, Cecil John (1926–2002), *Flora of Karnataka* 2: 57. New Delhi: Oxford & IBH, 1996, *Fl. Madras* 1: 460. 1997, *Novon* 9(4): 550. 1999

(Used in Siddha/Sidha.)

in India: karumarachedi, nirkurunda, tsjerou-poeam

Blepharocarya F. Muell. Anacardiaceae (Sapindaceae, Blepharocaryaceae)

Greek *blepharon* ‘an eyelid’ and *karyon* ‘a nut’, the fruit is ciliate and contained in a globular involucre; see Ferdinand von Mueller, *Fragmenta Phytographiae Australiae.* 11: 15. 1878.

Blepharocarya involucrigera F. Muell.

Australia. Tree, pinnate leaves, green insignificant flowers, woody pods

See J.C Mitchell et al. “Absence of cross sensitivity between *Toxicodendron* (syn. *Rhus*) and *Blepharocarya*.” *Contact Dermatitis* 3 (3): 169–170. 1977

(Wood toxic, poisonous, if rubbed on the skin.)

in English: bolly gum, north Queensland bollygum, northern bolly gum, rose butternut

Bletia Ruiz & Pavón Orchidaceae

Named for the Spanish botanist Luis Blet, flourished towards the end of the 18th century, apothecary, owner of a Botanical Garden in Algeciras, Spain; see Hipólito Ruiz López (1754–1815) and José Antonio Pavón (1754–1844), *Flora peruviana, et chilensis prodromus*. 119, t. 26. Madrid 1794, C.S. Rafinesque, in *Am. Monthly Mag. Crit. Rev.* 2: 268. 1818 and E.D. Merrill, *Index Rafinesquianus* 101. 1949, *Fieldiana, Bot.* 26(2): 399–727. 1953, *Harvard Pap. Bot.* 5(2): 383–466. 2001.

(Antibacterial, antiinflammatory, mucilaginous, antiphlogistic, demulcent, pectoral, styptic, vulnerary. Pseudobulbs used for gastric ulcer, uterine bleeding, hemorrhages, melaena, hematuria, whooping cough; for external use, wound bleeding, cuts, abscesses, sores and burns.)

in English: bletilla, common bletilla, hyacinth orchid, urn orchid

in China: bai ji, lan hu, pai chi

in Japan: shi-ran

Blighia König Sapindaceae

Dedicated to the British (b. Cornwall) mariner William Bligh, 1754–1817 (London), navigator, in March 1776 appointed sailing master to James Cook on his 2nd voyage in *Resolution*, Captain of the merchant ship *Bounty* sailed in 1787 for a voyage to the Pacific to collect breadfruit plants, he wrote *A Narrative of the Mutiny on board His Majesty's Ship Bounty; and the subsequent voyage of part of the crew, in the ship's boat, from Tofoa ... to Timor*. London 1790 and *A Voyage to the South Sea*. London 1792.

Blighia sapida König

Africa, Jamaica. Tree, small tree, bark rough brownish-gray, spreading branches, compound leaves papery coriaceous, sweet scented flowers white yellow to creamy white, branched inflorescences, pendent fruits deep coral red split open when ripe, seed brown, yellow or white cream fleshy aril, edible fruit tastes like egg when cooked

See *Annals of Botany* 2: 571–574, t. 16–17. 1806 and *Fieldiana, Bot.* 24(6): 234–273. 1949, *Taxon* 31: 576–579. 1982, *South African Journal of Botany* 74: 76–84. 2008

(Fruit poisonous, but edible when ripe, the ingestion of unripe ackee can give rise to acute poisoning called Jamaican vomiting sickness, the vomiting disease of Jamaica or toxic hypoglycemic syndrome. Fruits edible, but children often poisoned by cooked akee water. Stem bark and leaves used externally as body stimulant, a weak decoction used in wasting disease. Various parts of the tree used to expel parasites and to treat dysentery, diarrhea, conjunctivitis and headache. Pounded fruit used as a fish poison. Veterinary medicine, lactogenic.)

in English: ackee, ackee apple, akee, akee apple, vegetable brain

in Benin: atéhan, dirébou, ewé ishin, ishin, isin odan, lisséman

in Cameroon: abale, ndamba

in Gabon: ekom, ngwim, ngwin

in Ghana: achin, adza, akee, akee apple, atsa, ayigbe atia, takwadua

in Nigeria: abikotor, awai, feso, gwanja kusa, ila, ilipa, ishin, isin, isin jije, isin odan, isin oka, ogheghe, okpu, otusi, ukpe, ukpe rerhen

in Togo: adza, atchanti, atchati, bupobu, itchin, keka, kpresso, peso

in South America: akee, huevo, huevo vegetal, huevos de yankee, seso vegetal

Blighia unijugata Baker (*Blighia zambesiaca* Bak.; *Phialodiscus plurijugatus* Radlk.; *Phialodiscus unijugatus* (Baker) Radlk.; *Phialodiscus zambesiacus* (Bak.) Radlk.)

South Africa, SE Africa. Tree, leafy, spreading, prostrate scrambler, slow-growing, short trunk, small flowers green-yellow, furry capsules, shiny dark red-brown to black oval seeds, juicy orange-to-pink flesh edible, bee forage, leaves browsed by animals, fodder for cattle and goats during dry periods, ripe and unripe fruits eaten raw, ripe fruits liked by birds, found in bushland and wooded or bushed grassland

See *Species Plantarum* 1: 367. 1753, *Enumeratio Plantarum Africae Australis Extratropicae* 53. 1835, *Flora Capensis* 2: 562. 1862, *Genera Plantarum* 1: 907. 1867, *Flora of Tropical Africa* [Oliver et al.]: 427. 1868, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 9: 497, 655. 1879, *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* xx. (1890) 263. 1890 and *Annals of the Transvaal Museum* 3: 121. 1912

(Bark toxic. Root, pods and leaves hemostatic (in childbirth), tonic, anthelmintic. Oil from the seeds laxative. Bark cooked with soup to treat indigestion, stomach disorders, diarrhea and stomachache. Leaves used for stomachache and diarrhea. Roots boiled, decoction for typhoid fever, dysentery and amebic dysentery, abdominal pain. Bark and leaves poisonous to fish.)

in English: triangle tops

in Ivory Coast: bebi

in Nigeria: ishin oko, ukpe nehwi; isin-oko (Yoruba); ukpe nehwi (Edo); ojawala (Igbo)

in Southern Africa: blighia, driehoektolletjies; iDlebelendlovu, umDlaguva, umHlabelo (Zulu); musadema (Shona)

in Yoruba: ako isin, akoisin, isin ako, odofin ile

in Zaire: bobili, bubili, buba

Blinkworthia Choisy Convolvulaceae

For Robert Blinkworth, plant collector for N. Wallich, see *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 6: 430, pl. 4. 1833.

Blinkworthia convolvuloides Prain (*Blinkworthia discostigma* Handel-Mazzetti)

China, Burma. Climbers or trailers, woody, flexuous, slender, white greenish flowers

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 63(2): 91. 1894

(Roots and leaves for stomachache.)

in English: bindweed-like blinkworthia

in China: bao ye teng

Bloomeria Kellogg Asparagaceae (Alliaceae, Liliaceae)

For the American (San Francisco) botanist H.G. Bloomer, 1821–1874, see F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 67. Berlin & Hamburg 1989, James C. Hickman, ed., *The Jepson Manual: Higher Plants of California*. 1180. University of California Press, Berkeley 1993.

Bloomeria clevelandii S. Watson (*Muilla clevelandii* (S. Watson) Hoover)

North America, Mexico. Perennial

See *Proc. Amer. Acad. Arts.* 20: 376. 1885 and *Pl. Life* 11: 23. 1955, Govaerts, R. *World Checklist of Seed Plants* 2(1, 2): 1–492. 1996 [as *Muilla clevelandii*]

(Corms, diuretic.)

in English: San Diego golden star

Blumea DC. Asteraceae

After the Dutch (German born) botanist Karl Ludwig (Carl, Carolus Ludovicus) von Blume, 1796–1862, physician, traveller, plant collector, Director of the Botanic Gardens of Buitenzorg, with Johannes Baptistus Fischer (d. 1832) wrote *Flora Javae*. Bruxelles 1828 [–1851], his works include *Enumeratio plantarum Javae*. Leyden 1827–1828, *Bijdragen tot de flora van Nederlandsch Indië*. Batavia 1825–1826. See *Archives de Botanique* 2: 514. 1833 and Randeria, A.J. “The composite genus *Blumea*, a taxonomic revision.” *Blumea* 10: 176–317. 1960, *Kirkia* 7: 121–136. 1968, *Fl. Madagasc.* 189: 339–622. 1969, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 133–134. Oxford 1964, John H. Don) Sch.Bip. ex Oliv.)

Tropical Africa. A strongly aromatic erect weedy herb, see also *Laggera alata*

See *Prodromus Florae Nepalensis* 171. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 448. 1836.

(Leaves antalgic, for convulsion, bleeding; ashes from leaves applied to cure backache. Roots for cough, constipation, stomachache, sinusitis. Conjunctivitis and sores eyes, leaves decoction. Veterinary medicine.)

in Rwanda: igikatsikatsi, igitabitabi, umutamatama

in South Africa: kaptisbossie, muishondbossie

in Tanzania: ludenyikumbwe, mdenyi-kumburi, muuga

Blumea arfakiana Martelli (*Blumea balfourii* Hemsl.)

Moluccas, Papua New Guinea. A herb or low shrub, erect, woody based, branched, sparsely pubescent, capitula in large terminal panicles, involucre bracts glandular, achene ribbed, pappus whitish to pale red

See *Nuov. Giorn. Bot.* xv. 292. 1883 and *Planta Med.* 57: 278–281. 1991

(Young leaves eaten to treat anemia; leaves and roots used against stomachache.)

in Papua New Guinea: kumpeka

Blumea arnakidophora Mattf.

Borneo, Mt Kinabalu, New Guinea. A small shrub, erect, woolly tomentose, soft leaves woolly tomentose below, capitula in large terminal panicles, involucre bracts densely lanuginose, achene ribbed, pappus pale reddish-yellow

See *Bot. Jahrb. Syst.* lxxix. 286. 1938, *International Journal of Crude Drug Research* 27: 1–8. 1989

(Leaves astringent, used for diarrhea.)

in Papua New Guinea: kambali, kuwmkuwm

Blumea aurita (L.f.) DC. (*Blumea aurita* DC.; *Blumea bojeri* Baker; *Blumea glutinosa* DC.; *Blumea obliqua* (L.) Druce; *Blumea obliqua* var. *aurita* (L.f.) V.N. Naik & P.Y. See *Species Plantarum* 2: 862. 1753, *Linnaea* 6: 105, 320, 674. 1829, *Linnaea* 6: 105, 674. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 444–445. 1836, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 294. 1843, *Revisio Generum Plantarum* 1: 324. 1891 and *Bulletin of the Torrey Botanical Club* 40: 306. 1913, *Smithsonian Contr. Bot.* 89: 1–116. 1999

(Roots for colic, stomachache, fevers.)

Malay names: perasi putih, ruku gajah, sampu angin, tombak-tombak

Blumea clarkei Hook. f. (*Blumea hongkongensis* H. Lév. & Vaniot; *Blumea lessingii* Merr.; *Blumea malabarica* Hook. f.; *Pluchea hirsuta* Less.)

India, Sikkim. Erect, pubescent or tomentose, herb, yellow flowers, silky achenes

See *Linnaea* 6: 150–151. 1831, *The Flora of British India* 3(8): 267. 1881 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 12(158): 22. 1903, *An Enumeration of Philippine Flowering Plants* 3: 603. 1923

(Leaves extract antiseptic on wounds and cuts.)

Blumea densiflora DC.

India, Vietnam, Sub-tropical Himalayas. Shrub or herb, flowers greenish yellow

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 446. 1836

(Used in Ayurveda. Juice of fresh leaves insecticidal, mosquito repellent.)

in English: ngai camphor

in India: karpoor, kukundara

Blumea eriantha DC.

India.

See Wight, Robert (1796–1872), *Contributions to the botany of India*. London: Parbury, Allen, 1834 *Taxon* 26: 107–109. 1977, *J. Bombay Nat. Hist. Soc.* 92: 314–321. 1995

(Used in Ayurveda and Unani. Herb juice carminative, sedative. Leaves carminative, diuretic, emmenagogue, sudorific, for healing wounds and bleeding of nose; an infusion taken as diuretic, sudorific, emmenagogue. Oil antibacterial, anti-fungal, insecticidal. Decoction of bark of *Albizia procera* with barks of *Combretum ovalifolium* and *Acacia ferruginea* and root of *Blumea eriantha* given as an antidote for snakebite; root extract of *Cryptostegia grandiflora* with barks of *Holarrhena pubescens* and *Blumea eriantha* given as antidote in snakebite.)

in India: kakarondaa, kukundara, manja-adeca-manjen, nimdi, nimurdi, nirmudi

Blumea fistulosa (Roxb.) Kurz (*Blumea amethystina* Hance; *Blumea fistulosa* Kurz; *Blumea glomerata* DC.; *Blumea leptoclada* DC.; *Blumea nodiflora* Hook. f.; *Blumea purpurea* DC.; *Blumea racemosa* DC.; *Conyza fistulosa* Roxb.)

Tropical Himalayas, Sri Lanka, Nepal to Bhutan.

See *Flora Indica*; or, descriptions of Indian Plants 3: 429. 1832, *Contributions to the Botany of India* 15. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 442–443. 1836, *Journal of Botany, British and Foreign* 6(66): 173–174. 1868, *Journal of the Asiatic Society of Bengal* 46(2): 187. 1877, *The Flora of British India* 3(8): 262–263. 1881 and *Taxon* 24: 501–516. 1975, *Taxon* 28: 401–402. 1979, *Cytologia* 47: 153–162. 1982, *Taxon* 32: 668. 1983, *Glimpses in Plant Research* 8: 1–177. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Journal of the Bombay Natural History Society* 92: 314–321. 1995

(Used in Ayurveda and Unani. Water extract diuretic, anthelmintic, used for intestinal diseases. Essential oil CNS depressant.)

in India: duggi, kakarondaa, kukundara, rumdum

Blumea hieraciifolia Hook.f. & Thomson (*Blumea hieraciifolia* (Spreng.) DC.; *Blumea hieraciifolia* Hayata; *Blumea hieraciifolia* DC.; *Blumea hieraciifolia* (Don) DC.)

India.

See *Systema Vegetabilium*, editio decima sexta 3: 514. 1826, *Contributions to the Botany of India* 15. 1834, *Fl. Brit. India* [J.D. Hooker] 3: 267. 1881 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 8: 52. 1919

(Essential oil astringent.)

in India: ching-terapaibi

Blumea junghuhniana Boerl. (*Conyza junghuhniana* Miq.)

India, Java. Erect pubescent herb, leaves dentate, yellow flowers in heads

See *Handl. Fl. Ned. Ind.* (Boerlage) 2(1): 239. 1891

(Stomachic, diaphoretic.)

Blumea lacera (Burm.f.) DC. (Antifungal, for venereal diseases.)

in India: sakarkandi, sankaooli

Blumea oxyodonta DC. (*Placus oxyodonta* (DC.) Kuntze)

Sri Lanka, India. Annual herb, slender whitish hairy stem, often forked, branches spreading or prostrate, leaves with spinous-toothed margin and tip, yellowish flower-heads on long peduncles

See *Flora Cochinchinensis* 475, 496. 1790, *Contributions to the Botany of India* 15. 1834, *Revisio Generum Plantarum* 1: 357. 1891 and *Cytologia* 40: 365–370. 1975, *Cytologia* 47: 153–162. 1982, *Glimpses in Plant Research* 8: 1–177. 1988, *Journal of the Bombay Natural History Society* 92: 314–321. 1995, *Journal of Cytology and Genetics* 33(2): 201–205. 1998

(Known allergenic activity. Root decoction in impotency and spermatorrhea.)

in English: spiny keaved blumea

Blumea pubigera (L.) Merr. (*Conyza pubigera* L.)

Indonesia. Shrub, herbaceous climber, smooth vine, leaves elliptic-lanceolate, flowering heads clustered, terminal hairy panicle, corolla-lobes hairy strongly 10-ribbed, pappus white

See *Philippine Journal of Science* 14: 250. 1919, *Journal of Ethnopharmacology* 49(1): 1–16. 1995

(Crushed young leaves applied as a poultice to new wounds, scabies; leaves in a complex remedy taken orally and applied externally for leprosy; leaves used in remedies for mental disorders; young leaves poultice applied to swollen liver or spleen. Roots decoction drunk for colic.)

in English: aster vine

in Indonesia: embeng aka, serungkas sebekas, udu sekiput lulut

in Philippines: katarai, kuli amu, lankat, pagang pagang

Blumea repanda (Roxb.) Hand.-Mazz. (*Blumea procera* DC.; *Blumea semivestita* DC.; *Conyza repanda* Roxb.; *Leveillea procera* (DC.) Vaniot; *Placus procera* (DC.) Kuntze)

China, India. Villous or tomentose herb, yellow flowers, ribbed silky achenes

See *Flora Indica*; or, descriptions of Indian Plants 3: 431. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 445. 1836, *Revisio Generum Plantarum* 1: 357. 1891 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 13(170–171): 16. 1903, *Symbolae Sinicae* 7(5): 1378. 1936

(Leaves extract on wounds and cuts, applied in anus in children to kill the pinworm.)

Blumea riparia DC. (*Blumea chinensis* auct. non (L.) DC.; *Blumea pubigera* auct. non (L.) Merr.; *Blumea semivestita* DC.; *Conyza riparia* Blume, nom. illeg., non *Conyza riparia* Kunth; *Conyza riparia* Kunth; *Conyza semivestita* Wall.; *Phalacromesus riparia* (Kunth) Cass. ex B.D. Jacks.; *Phalacromesus riparia* Cass.)

India, Thailand, SE Asia. Shrub, herbaceous, scandent, sprawling, creeping, capitula in terminal and axillary racemes, achene ribbed pubescent, pappus white, weed of sugarcane fields, in open grassy places, forest clearings, along streams and rivers

See *Nova Genera et Species Plantarum* (folio ed.) 4: 60. 1820 [1818], *Bijdragen tot de flora van Nederlandsch Indië* 899. 1826, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 53: 235. 1828, *Numer. List* [Wallich] n. 2996. 1831, *Synopsis Generum Compositarum* ... 203–204. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 444. 1836, *Index Kewensis* 2(3): 486. 1895 [1894] and *Taxon* 26: 443–452. 1977, *Journal of the Bombay Natural History Society* 92: 314–321. 1995, *Chinese Chemical Letters* 18(3): 303–305. 2007

(A roots decoction to cure colic. Leaf juice used to treat sores, boils and sore eyes, to stop bleeding in cuts and wounds; sore

eyes treated by rubbing a young leaf around the eye. Chewed leaves applied to boils.)

in Indonesia: jonge areuy, lalangkapan, tombak-tombak

in Laos: phang nhot pang

in Papua New Guinea: mulmul, mungla

in Philippines: katarai, lankat, pagang-pagang

in Sarawak: klumpah pinggai

in Thailand: kamu maeng, mu masang

Blumea sessiliflora Decne. (*Blumea fasciculata* DC.; *Blumea gracilis* DC.; *Blumea membranacea* DC. var. *gracilis* (DC.) Hook. f.)

India. Herb, sessile oblanceolate leaves, white heads in panicles

See *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 140. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 442–443. 1836, *The Flora of British India* 3(8): 265. 1881 and *J. Bombay Nat. Hist. Soc.* 92: 314–321. 1995, *J. Cytol. Genet.* 33(2): 201–205. 1998

(Leaves sudorific, a decoction used against bronchitis and asthma, liver ailments; applied externally as a poultice to treat rheumatism; leaves infusion taken for dysentery; leaves of *Blumea sessiliflora*, *Blumea balsamifera*, *Mikania cordata* and *Blumea lanceolaria* boiled in water and the decoction used for bathing to cure body ache; leaves juice applied on wounds and chronic ulcers, also on the head of a small child as a cure for fever. Veterinary medicine, crushed leaves juice dropped over the sores and ulcers to kill worms, maggots.)

in India: chulum-pau

Blumea sinuata Merr. (*Blumea laciniata* (Roxb.) DC.; *Blumea laciniata* DC.; *Blumea okinawensis* Hayata; *Blumea onnaensis* Hayata; *Blumea runcinata* DC.; *Blumea sinapifolia* Gagnep.; *Blumea sonchifolia* DC.; *Blumea uninata* DC.; *Conyza laciniata* Roxb.; *Gnaphalium sinuatum* Lour.)

SE Asia.

See *Species Plantarum* 2: 850–857. 1753, *Flora Cochinchinensis* 2: 497. 1790, *Hort. Beng.* 61. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 427–428. 1832, *Synopsis Generum Compositarum* ... 203–204. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 436–438. 1836 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 8: 53. 1919, *Bulletin de la Société Botanique de France* 68: 43. 1921, *Transactions of the American Philosophical Society*, new series, 24: 388. 1935, *Research Bulletin [Cytogenetics Laboratory, Department of Botany, University of Calcutta]* 2: 1–50. 1970, *Taxon* 26: 557–565. 1977, *Nucleus* 18: 6–19. 1978, *Recent Res. (Leaves used for skin diseases, eczema, insect repellent; leaves juice applied on snakebite. Roots of *Blumea laciniata* along with those of *Butea superba* and *Vitis repanda* used for snakebite; crushed roots made into a paste taken for snakebite.)

in India: khuanglawi

Blumea tomentosa A. Rich. (*Laggera tomentosa* (A. Rich.) Oliv. & Hiern; *Laggera tomentosa* (A. Rich.) Sch. Bip. ex Oliv. & Hiern; *Laggera tomentosa* Sch. Bip., nom. nud.)

East Africa, Ethiopia. Herb, sweet strong pleasant smell

See *Flora* 24(1 Intell.): 26. 1841, *Tentamen Florae Abyssinicae* ... 1: 394. 1848 and *Phytochemistry* 52: 1491–1494. 1999, *Chem. Ind. Forest Prod.* 19: 43–47. 1999, *J. Essent. Oil Res.* 12: 345–349. 2000, *Journal of Essential Oil Research: JEOR* Mar/Apr 2003

(Carminative, diuretic, febrifuge, astringent, anthelmintic. High percentage of oxygenated monoterpenes and a relatively low percentage of oxygenated sesquiterpenes. Chrysanthenone reported to be an effective component in toothpaste for the removal of tobacco stains. Veterinary medicine, stomachic, for colic.)

in Ethiopia: keskeso

Blumea virens DC. (*Blumea hymenophylla* DC.; *Blumea lapsanoides* DC.)

India. Herbs, pubescent toothed leaves, yellow flowers, ribbed achenes with spreading hairs

See *Contributions to the Botany of India* 14–15. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 444. 1836 and *Cytologia* 40: 365–370. 1975, *Bombay Nat. Hist. Soc.* 92: 314–321. 1995

(Sudorific, carminative, diuretic, febrifuge, astringent, anthelmintic.)

Blumeopsis Gagnepain Asteraceae

Resembling the genus *Blumea* DC., see *Bulletin du Muséum National d'Histoire Naturelle* 26: 75. 1920.

Blumeopsis flava (DC.) Gagnep. (*Blumea flava* DC.; *Laggera flava* (DC.) Benth. & Hook. f.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 439. 1836, *Genera Plantarum* 2: 290. 1873 and *Bulletin du Muséum National d'Histoire Naturelle* 26(1): 76. 1920

(Root in jaundice. Whole plant juice applied on burns.)

in India: mural pocha, murva

Blyxa Noronha ex Thouars Hydrocharitaceae

Possibly from the Greek *blyzo* 'gush forth', *blyzein* 'to bubble, flow out', referring to the habitat; see Louis-Marie

Aubert Aubert du Petit-Thouars (1758–1831), *Genera Nova Madagascariensis*. 4. [Paris 1806] and *Fl. Madagasc.* 26: 1–13. 1946, *Aquatic Bot.* 15: 1–52. 1983, *Contributions from the United States National Herbarium* 45: 1–590. 2003.

Blyxa octandra (Roxb.) Planch. ex Thwaites (*Blyxa aubertii* Rich.; *Blyxa ceylanica* Hook. f.; *Blyxa coreana* (Lév.) Nakai; *Blyxa ecaudata* Hayata; *Blyxa graminea* Steud., nom. illeg.; *Blyxa griffithii* Planch. ex Hook. f.; *Blyxa malayana* Ridl.; *Blyxa muricata* Koidz.; *Blyxa octandra* (Roxb.) Thwaites; *Blyxa octandra* Planch. ex Thwaites; *Blyxa oryzetorum* (Decne.) Hook. f.; *Blyxa roxburghii* Rich., nom. illeg.; *Blyxa saivala* Steud., nom. superfl.; *Diplosiphon oryzetorum* Decne.; *Hydrolirion coreanum* Lév.; *Vallisneria octandra* Roxb.; *Vallisneria spiralis* L.)

Australia, Sri Lanka, India. Annual, tufted, acaulescent, aquatic dioecious herb, growing in water, leaves radical sheathing, flowers unisexual, sepals pinkish tinged, inflorescence emergent, linear fruit

See *Species Plantarum* 2: 1015. 1753, *Plants of the Coast of Coromandel* 2: 34, t. 165. 1802, *Mémoires de la Classe des Sciences Mathématiques et Physiques de L'Institut National de France* 12(2): 19–23, 77, pl. 4. 1812, *Nomenclator Botanicus*. Editio secunda 212. 1840, *Voyage dans l'Inde* 4: 166–167. 1844, *Enumeratio Plantarum Zeylanicae* [Thwaites] [pt. 5]: 332. 1864, *The Flora of British India* 5: 661. 1888, *Transactions of the Linnean Society of London, Botany* 3: 358. 1893 and *Repertorium Specierum Novarum Regni Vegetabilis* 11: 67. 1912, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 5: 208, f. 77c-f. 1915, *Botanical Magazine* 31: 258. 1917, *Journal of Japanese Botany* 19: 247. 1943

(Used in Ayurveda. “The plants, whose womb is the avaki (*Blyxa octandra*), whose essence are the waters, shall with their sharp horns thrust aside evil!” Atharva-veda, the fourth Veda. Hymn to all magic and medicinal plants, used as a universal remedy.)

in India: naachu, nacchu, nilika, paachi, paathala banthi, pata siala, saivala

in Japan: marumi-subuta

Bobgunnia J.H. Kirkbr. & Wiersema Fabaceae (Leguminosae, Swartzieae)

See *Brittonia* 49(1): 1–23. 1997.

Bobgunnia madagascariensis (Desv.) J.H. Kirkbr. & Wiersema (*Swartzia madagascariensis* Desv.; *Swartzia marginata* Benth.; *Swartzia sapini* De Wild.; *Tounatea madagascariensis* (Desv.) Baill.)

Tanzania. Tree or shrub, perennial, non-climbing, creamy white petals, dark brown snake-like pod, common in woodland

See *Histoire des plantes de la Guiane Française* 1: 549, pl. 218. 1775, *Genera Plantarum* 2: 518. 1791, *Annales des*

Sciences Naturelles (Paris) 9: 424. 1826, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 87–88. 1840, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(56): 446. 1885 and *East Afr. Med. J.* 68(10): 827–830. 1991, *Brittonia* 49(1): 1–23. 1997, *Toxicon*. 44(4): 417–430. 2004, *African Journal of Traditional, Complementary and Alternative Medicines* 3(1): 75–81. 2006, *Journal of Ethnopharmacology* 114(1): 44–53. 2007, *Bioresour. Technol.* 99(6): 2037–2045. 2008

(Toxins. Antimalaria, insecticidal, molluscicidal. Pods used to kill fish in streams and ponds.)

in English: ironheart tree, snake bean tree

in East Africa: kasanda

in Nigeria: bayama, bogo-zage, gama-fada, gwanja-kusa, gwaskiya; bayama (Hausa); hil ighgom (Tiv); yawolawogi (Nupe)

in North Nigeria: bayama, bozo zage, gamma fada, guazkiya

in N. Rhodesia: mutete

in Southern Africa: moshakashela (Mbukushu); muCherechedzi, muCherechese, muCherekese, muChezeze, muChiakacha, muPondo, muShakasehe, muTeherenge, muTseketsa, muTshakatsha, muWengerezi (Shona)

in Tanzania: ching'eng'e, kasanda, mnyenye, msekeseke, mukhangosi

in Togo: subando

in W. Africa: samakara, samagara

in Zaire: kabi, n'daale, ndale, pampi

in Zambia: bayama, bozo zage, gamma fada, guazkiya, kapwipwi, mchelekete, Mpingo, mulundu, mushakashela, ndale

Bocagea A. St.-Hil. Annonaceae

See *Flora Brasiliae Meridionalis* (quarto ed.) 1: ed. folio. 33; ed. qu. 41, t. 9. 1825, *Kew Journ.* iii. (1851) 207. 1851

Bocagea dalzellii Hook.f. & Thomson

India.

See *Fl. Brit. India* [J.D. Hooker] 1: 92. 1872

(Leaves bitter, pungent, for cold and influenza.)

in India: andi, undi

Bocconia L. Papaveraceae

To honor the Italian monk Paolo (afterwards Silvio) Boccone (Bocconi or Pauli Bocconis), 1633–1704, physician, naturalist, professor of botany at Padua, plant collector and traveller, appointed botanical preceptor to Ferdinand II, in 1682 he entered the order of Cistercian monks at

Florence. See *Icones & descriptiones rariorum plantarum Siciliae, Melitae, Galliae, & Italiae*, etc. [Edited by Robert Morison.] E Theatro Sheldoniano [Oxford] 1674, Giuseppe M. Mira, *Bibliografia Siciliana*. 1: 111–112. Palermo 1881 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 933–936. 1938, J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 134. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 205. 1965, *Economic Botany* 39(3): 346–362. 1985, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 42–44. 1988, *Fl. Ecuador* 52: 1–13. 1995.

Bocconia arborea S. Watson

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 25: 141–142. 1890 and *Archives of Medical Research* 29(2): 191–194. 1998, *Journal of Ethnopharmacology* 66(2): 223–226. 1999

(Antimicrobial, for infectious diseases.)

Bocconia frutescens L. (*Bocconia frutescens* var. *cernua* Moc. & Sessé ex DC.; *Bocconia glauca* Salisb.; *Bocconia pearcei* Hutch.; *Bocconia quercifolia* Moench; *Bocconia sinuatifolia* Stokes; *Bocconia subtomentosa* L'Hér. ex Stahl)

Central and South America. Evergreen shrub or small tree, perennial, soft-wooded, branched, yellowish orange translucent bitter sap, small greenish-purple apetalous flowers in terminal panicles densely branched, bracts lanceolate, bright red aril attached to the shiny black seeds, noxious weed very invasive, multiple-trunked bushy growth habit, pulpy aril material attractive to birds

See *Species Plantarum* 1: 505. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 121. 1824 and *Bulletin of Miscellaneous Information Kew* 1920(8): 78. 1920, *Fl. Veracruz* 22: 1–16. 1982, *Fl. Lesser Antilles* 4: 276. 1988, *Pharmaceutical Biology* 44(7): 540–543. 2006, *Journal of Ethnopharmacology* 103(1): 66–70. 2006, *PTR. Phytotherapy Research* 22(4): 557–559. 2008

(All parts of this plant are poisonous. Abortifacient, purgative, astringent, analgesic, sedative, hypnotic, antiseptic, antiinflammatory, antimicrobial, antimycobacterial, anti-secretory, vermifuge, to treat skin ulcer, dermatitis, gastrointestinal disorders, diarrhea and some respiratory tract infections. Roots and bark infusion drunk to treat kidney or abdominal pains. Orange sap for ulcers and skin eruptions, cutaneous and mucocutaneous leishmaniasis, to alleviate bronchitis, and as a local anesthetic, when the leaves have been heated and applied to wounds.)

in English: John Crow bush (= John Crow Mountains, Portland Parish, Jamaica), parrotweed, plume poppy, tears of blood, tree celandine, tree poppy

in Central America: biábia, chocolate blanco, gordolobo, guacamayo, llorasangre, palo amarillo, palo de toro, pan cimarrón, panilla, saúco, tabaquillo, trompeto, yagrumito

Bocconia integrifolia Bonpl. (*Bocconia frutescens* var. *integrifolia* (Bonpl.) Kuntze; *Bocconia macbrideana* Standl.; *Bocconia pearcei* Hutch.; *Bocconia pubibractea* Hutch.)

Central America.

See *Plantae Aequinoctiales* 1: 119, t. 35. 1807, *Revisio Generum Plantarum* 3(2): 4. 1898 and *Bulletin of Miscellaneous Information Kew* 1920(8): 278–279. 1920, *Publications of the Field Museum of Natural History, Botanical Series* 13(2–3): 935. 1938

(Antimicrobial, antiinflammatory, cytotoxic, antitumor and antiviral, used to treat endemic diseases such as cutaneous and mucocutaneous leishmaniasis.)

Boechera Á. Löve & D. Löve Brassicaceae (Cruciferae)

Boechera fendleri (S. Watson) W.A. Weber (*Arabis fendleri* (S. Watson) Greene; *Arabis fendleri* var. *spatifolia* (Rydb.) Rollins; *Arabis holboellii* var. *fendleri* S. Watson; *Arabis porphyrea* Woot. & Standl.; *Arabis spatifolia* Rydb.; *Boechera fendleri* subsp. *spatifolia* (Rydb.) W.A. Weber; *Boechera fendleri* var. *spatifolia* (Rydb.) Dorn)

North America.

See *Synoptical Flora of North America* 1(1[1]): 164. 1895, *Pittonia* 3(16A): 156. 1897 and *Flora of the Rocky Mountains* 361, 1062. 1917, *Rhodora* 43(512): 394. 1941, *Phytologia* 51(6): 370. 1982, *Vascular Plants of Wyoming* (ed. 3) 375. 2001, *Harvard Papers in Botany* 11(1): 84. 2006

(Plant infusion for stomachache.)

in English: false arabis, Fendler's rockcress

Boechera holboellii (Hornem.) Á. Löve & D. Löve var. ***holboellii*** (*Arabis holboellii* Hornem.; *Erysimum holboellii* (Hornem.) Kuntze)

North America, Europe.

See *Species Plantarum* 2: 660–661, 664–666. 1753, *Flora Danica* 11(2): 5, pl. 1879. 1827, *Revisio Generum Plantarum* 2: 933. 1891 and *Botaniska Notiser* 128(4): 513. 1975[1976]

(Cereemonial.)

in English: Holboell's rockcress

Boechera perennans (S. Watson) W.A. Weber (*Arabis angulata* Greene ex Wooton & Standl.; *Arabis arcuata* var. *perennans* (S. Watson) M.E. Jones; *Arabis eremophila* Greene; *Arabis gracilentata* Greene; *Arabis perennans* S. Watson; *Arabis recondita* Greene)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 6: 187. 1864, *Proceedings of the American Academy of Arts and Sciences* 22(2): 467. 1887, *Proceedings of the California Academy of Sciences, Series 2*, 5(18): 621. 1895 and *Pittonia* 4(23): 195. 1900, *Phytologia* 51(6): 370. 1982

(Anticonvulsive, analgesic.)

in English: perennial rockcress

Boechera puberula (Nutt.) Dorn (*Arabis arida* Greene; *Arabis bruceae* M.E. Jones; *Arabis lignipes* var. *impar* A. Nelson; *Arabis puberula* Nutt.; *Arabis sabulosa* M.E. Boerhavia L. Nyctaginaceae

After the Dutch physician and botanist Herman Boerhaave, 1668–1739, humanist, professor of botany and medicine, one of the most influential clinicians and scientific teachers of the 18th century, he helped to revive the Hippocratic method of bedside instruction. See Carl Linnaeus, *Species Plantarum*. 3. 1753, *Genera Plantarum*. Ed. 5. 4. 1754, Jan Swammerdam (1637–1680), *The Book of Nature*; or the History of Insects ... With the life of the author, by Herman Boerhaave. [First edition in English, first published under the title *Biblia Naturae* in a Dutch/Latin edition in 1737–38.] London 1758 and Menno Hertzberger, *Short-title catalogue of books written and edited by Herman Boerhaave*. Amsterdam 1927, *Fieldiana, Bot.* 24(4): 174–192. 1946, Garrison and Morton, *Medical Bibliography*. 581, 2199, 1830. 1961, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 135. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 208. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 43. 1972, G.A.

(Antitumor, antiviral and cytotoxic, spermicidal and contraceptive, antiinflammatory and antineoplastic-promoting effects, bulbs a treatment for mastitis, male contraception, tuberculosis, tumors, as well as for detoxication.)

in China: jia bei mu, tu bei mu

Bolusanthus Harms Fabaceae (Sophoreae)

Genus named after the South African (British born, Nottingham) businessman and botanist Harry Bolus, 1834–1911 (d. Surrey), collector and founder of the Bolus Herbarium in the University of Cape Town, his works include *Sketch of the flora of South Africa*. Cape-Town 1886, with Anthony Hurt Wolley-Dod (1861–1948) wrote *A list of the flowering plants and ferns of the Cape Peninsula*. 1903; see Ernest Nelmes and William Cuthbertson, *Curtis’s Botanical Magazine Dedications, 1827–1927*. 271–272. [1931], Alain White (1880–1951) and Boyd Lincoln Sloane (1886–1955),

The Stapelieae. Pasadena 1937, J.H. Barnhart, *Biographical Notes upon Botanists* 1: 214. 1965, Mary Gunn and Leslie E. Codd, *Botanical exploration of southern Africa*. Cape Town 1981, Gilbert Westacott Reynolds, *The Aloes of South Africa*. Balkema, Rotterdam 1982, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 84. London 1994.

Bolusanthus speciosus (Bolus) Harms (*Lonchocarpus speciosus* Bolus)

South Africa, Swaziland. Perennial non-climbing tree, deciduous, non-invasive root system, straight stems, very slow-growing, arching and drooping branches, fissured bark, compound leaves, long sprays of fragrant drooping purple-pea flowers, fruit in pendent clusters, monkeys, giraffe and grey duiker eat the pods and leaves, attracts butterflies

See *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 260. 1825, *Journal of the Linnean Society, Botany* 25: 161. 1889 and *Repertorium Specierum Novarum Regni Vegetabilis* 2: 15. 1906, *Proc. 3rd All Indian Congr. Cytol. Genet.* 3: 493–499. 1981, *Pure Appl. Chem.* 73(7): 1197–1208. 2001, *Phytochemistry* 56(8): 837–841. 2001, *Planta Medica* 68(7): 615–620. 2002, *Phytochemistry* 65(7): 875–880. 2004, *African Journal of Biotechnology* 4(12): 1458–1460. 2005

(Antimicrobial and antioxidant flavonoids from the root wood and stem bark; roots to alleviate stomach problems and the inner bark used to treat abdominal cramps; dried inner bark to treat abdominal pains, vomiting and tuberculosis.)

in English: elephant's wood, Rhodesian tree wistaria, Rhodesian wistaria, Rhodesian wisteria tree, South African wistaria, tree wistaria, tree wisteria, wild wistaria, wild wisteria

in Southern Africa: kisa, muRutsa, mogamba, olifantshout, pakwa, umPaca, Vanwykshout, Van Wijk's Hout; iNjjenje, Mukwashanyama, muKweshemgoma, muKweshenyama, muNyati, muPangamabwe, muRutsa, muRutsu, muSingamara, muTswingamara (Shona); umHohlo, umHolo (Zulu); umHohlo (Swazi); mpfimbahongonyi (Tsonga or Thonga: Eastern Transvaal); motsokophala, nsukungaphala (Mangwato dialect, Botswana); kgomo-nahlabana (North Sotho: North and north east Transvaal); mukamba, muswanga-phala (= impala-blinder) (Venda); nsungamola (Kalanga: Northern Botswana)

Bomarea Mirbel Alstroemeriaceae (Amaryllidaceae, Liliaceae)

For the French (b. Rouen) naturalist Jacques-Christophe Valmont de Bomare (Valmont-Bomare), 1731–1807 (d. Paris), mineralogist, professor of natural history, his writings include *Dictionnaire raisonné universel d'histoire naturelle*. Paris 1764, *Articolo ... sopra il Vesuvio ed altri vulcani*. 1779, *Minéralogie ou nouvelle exposition du Règne minéral*. Paris

1762 and *Notice des Travaux du Citoyen Valmont de Bomare*. [Paris 1800]; see E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 421. 1965, John G. Burke, in *D.S.B.* 13: 565–566. 1981, *Fl. Mesoamer.* 6: 48–51. 1994, *Heredity*. 84(Pt 5): 564–569. 2000, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 46–50. 2003, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Bomarea carderi Mast. (*Bomarea allenii* Killip; *Bomarea comata* Sodiro; *Bomarea williamsiae* Mast.)

Central and South America. Vine, liana, herbaceous, sepals bright pink, petals pink with dark purple spots

See *Histoire Naturelle des Végétaux*, Classés par Familles 9: 71. 1802, *Gardener's Chronicle & Agricultural Gazette* 1: 795. 1876 and *Ann. Missouri Bot. Gard.* 32: 16. 1945, Guin J.D., Franks H. "Fingertip dermatitis in a retail florist." *Cutis*. 67(4): 328–330. 2001

(Leaves, stems, and flowers contain small quantities of tuliposide A from which the allergenic lactone tulipalin A may be produced if the plant material is damaged.)

in Colombia: corta pico, petacas

Bomarea edulis (Tussac) Herbert (*Alstroemeria affinis* M. flammea (Ulbr.) Bakh.; *Gossampinus reflexa* Bakhuisen; *Gossampinus reflexa* subsp. *reflexum* Robyns)

Tropical Africa.

See *Flore d'Oware* 2: 42, t. 83, 1. 1816 and *Journal of the Linnean Society, Botany* 37: 500. 1906, *Bulletin of Miscellaneous Information Kew* 1909: 306. 1909, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 530, 534, 537, f. 1, 2. 1913, *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 5: 190–192. 1924, *Bulletin du Jardin Botanique de l'État* 33: 108. 1963

(Leaves for venereal diseases, constipation, infections.)

Bombax ceiba L. (*Bombax ceiba* Burm.f.; *Bombax malabaricum* DC.; *Gossampinus malabarica* (DC.) Merr.; *Gossampinus malabarica* Merr.; *Salmalia malabarica* (DC.) Schott & Endl.; *Salmalia malabarica* Schott. & Endl.) (*Gossampinus* Schott & Endl., a variant of *gossypinus*, a Latin name used by Plinius for the cotton tree, *Gossypium arboreum* L.; see Heinrich Wilhelm Schott (1794–1865) and Stephan Friedrich Ladislaus Endlicher, *Meletemata botanica*. 35. Wien 1832.) (*Salmalia* Schott & Endl., from *salmali*, a Sanskrit name for *Salmalia malabarica*.)

Tropical India. Tree, deciduous, woody thorns, hard conical prickles on the trunk and branches all over, leaves palmately compound, leaflets entire acuminate, bright red flowers, woody capsule, small smooth seeds enveloped in floss, flowers and flowers buds cooked as vegetable

See *Hort. Malab.* 3: 61, t. 52. 1682, *Sp. Pl.* 1: 511. 1753, *Fl. Ind.* (N.L. Burman) 145. 1768, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 479. 1824, *Meletemata Botanica* 35. 1832, *FBI* 1: 349. 1874 and *Lingnan Science Journal* 5(1–2): 126. 1928 [1927 publ. 1928], *Taxon* 10: 160. 1961, *Taxon* 28: 370. 1979, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda, Unani and Sidha. Whole plant used for wounds, ulcers, skin diseases, hemorrhoids, urinary calculus, cystitis, inflammations, cough, bronchitis. Spines pounded and applied as paste on abscesses; water extract of thorns used for treating pimples. Vegetable from the unripe fruit eaten to cure dysentery; freshly crushed fruits applied on the wounds as a pain killer; flower and fruits useful in snakebite. Roots stimulant, aphrodisiac, tonic, emetic, astringent, given for cough, impotency, heart and lung disease, for urinary complaints, gallbladders, diarrhea; the resin or powder of dry root bark given for nocturnal pollution; taproots of the young plants given with jaggery and milk for spermatorrhea and impotence; root decoction taken with water to promote conception, to prevent miscarriage and to cure menorrhagia and sexual weakness. Paste of the bark applied over skin eruptions, boils, pimples, acne; bark decoction given to relieve fever, piles, diarrhea, to regulate menstruation; stem bark antiangiogenic; bark juice used for jaundice; juice or gum from the bark used in diarrhea, dysentery, stomach pains during menses and menorrhagia. Gum astringent, aphrodisiac, for diarrhea, dysentery, wounds, leucorrhoea, menorrhagia

and general debility. Magic, ritual, used in ceremonies of worship, a piece of wood tied around the wrist is believed to prevent cholera, to drive off deities believed to cause cholera. Veterinary medicine, seeds as a prophylaxis against pox; bark extract pounded with leaves of *Tinospora cordifolia* given in dysentery.)

Bombax rhodognaphalon K. Schum. var. *rhodognaphalon*

Tanzania. Tree, palmately compound leaves, pinkish flowers, often in *Rhodognaphalon* Roberty

See *Die Pflanzenwelt Ost-Afrikas* C: 269. 1895 and *Bulletin du Jardin Botanique de l'État* 27: 666. 1957

(Bark used to treat diarrhea. Leaves and roots used as a charm against witchcraft.)

in Mozambique: muma

Bombax rhodognaphalon K. Schum. var. *tomentosum* Robyns

Tanzania, Mozambique. Tree, straight bole, yellow green smooth bark, leaves compound, calyx bell shaped, red stamens, brown woody capsule, seeds in dark red-brown fluffy kapok, seeds roasted and eaten, often in *Rhodognaphalon* Roberty

See *Die Pflanzenwelt Ost-Afrikas* C: 269. 1895 and *Bulletin du Jardin Botanique de l'État* 27: 666. 1957

(Bark used to treat diarrhea. Leaves and roots used as a charm against witchcraft.)

in English: East African cotton tree, wild kapok tree

in Tanzania: mfuma, mkaranga mti, mng'uma, msufi mwitu, msufi pori, msyavala, mwale, mwali

Bombax vaeletonii Hochr. (*Bombax larutensis* Ridley; *Gossampinus vaeletonii* (Hochr.) Bakh.; *Gossampinus vaeletonii* Bakh.; *Salmalia vaeletonii* (Hochr.) Corner) (For the Dutch botanist Theodorice Valetton, 1855–1929, bacteriologist, scientist, traveller; see R. Zander, F. Encke, G. Buchheim and Stafleu and Cowan, *Taxonomic Literature*. 6: 649–651. 1986, S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993.)

Indonesia. Tree, deciduous, flat crown, thorny trunk and twigs, palmate leaves, flowers at the end of the branches, light green calyx, white corolla, fruit a large kapok-filled capsule, forest, lowland forest clearings

See *Bull. Jard. Bot. Buitenzorg* ser. III, vi. 191. 1924, *Telopea* 10 (1): 81–98. 2003

(Suckers from the base of the trunk cut and the juice blown into eyes to relieve soreness and swelling of the eyelids.)

in Indonesia: dangdeur leuweung, gabok, gambob, kabu-kabu, kapuk rimba, kebabu, kekabu hutan, kékabu rimbeu, krai, ngiu paa, ngui pa, nun pa, randu alas

Bonamia Thouars Convolvulaceae

After the French physician François Bonamy [Bonami], 1710–1786, botanist, author of *Florae nannetensis prodromus*. Nannetis [Nantes] 1782. See Louis-Marie Aubert du Petit-Thouars (1758–1831), *Histoire des Végétaux Recueillis sur les Isles de France, la Réunion (Bourbon) et Madagascar* ... 33–34, t. 8. Paris 1804 [ante 22 Sep 1804], *Prodromus Florae Novae Hollandiae* 487–488. 1810, *Encyclopédie Méthodique. Botanique* ... Supplément 1: 677. 1810, *Annales des Sciences Naturelles* (Paris) 4: 497. 1825, *Icones Plantarum* 3: pl. 666. 1844, *Linnaea* 28: 437–438. 1856[1857], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 16(4–5): 530. 1893 and *Flora Hawaiensis* 307. 1932, *Candollea* 14: 31. 1952, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 215. 1965, *Phytologia* 17: 121–239. 1968, *Burma Journal Life Sciences* 1: 31, 34. 1968, *Fieldiana, Bot.* 24(9): 4–85. 1970.

Bonamia mossambicensis (Klotzsch) Hallier f. (*Bonamia mossambicensis* Hallier f.; *Prevostea mossambicensis* Klotzsch)

Tropical Africa. Herb, liana, climber, twining, creeper, white sap when cut, purple-pale blue corolla

See *Naturwissenschaftliche Reise nach Mossambique* ... [Peters] 6(Bot., 1): 244, t. 39. 1861, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18: 91. 1894 and *Taxon* 30: 701. 1981

(Powdered roots or leaves applied over wounds.)

in Tanzania: kalanzulu, mlipu

Bonatea Willd. Orchidaceae

After the Italian botanist Giuseppe Antonio Bonato, 1753–1836, professor of botany at Padua, from 1794 to 1835 Praefectus of the Botanical Garden of Padua, author of *Pisaura automorpha e Coreopsis formosa*, piante nuove. Padova 1793 and *Catalogus Plantarum Horti Botanici Patavini Anno MDCCCXII*. Padova 1812. See the Italian botanist and professor of botany Giulio Pontedera (1688–1757), *Epistolae ac dissertationes*. Opus posthumum in duos tomos distributum, praefatione et notis auctum ab *Josepho Antonio Bonato*. Patavii 1791, *Species Plantarum*. Editio quarta [Willdenow] 4(1): 5. 43. 1805 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 215. 1965, T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 44.

1972, *Nordic Journal of Botany* 12: 39–61. 1992, *Nordic Journal of Botany* 17: 5–10. 1997.

Bonatea steudneri (Rchb.f.) T. Durand & Schinz (*Bicornella arabica* Deflers; *Bonatea arabica* (Deflers) Cortesi; *Bonatea eminii* (Kraenzl.) Rolfe; *Bonatea kayseri* (Kraenzl.) Durand & Schinz; *Bonatea sudanensis* Rolfe; *Bonatea ugandae* Rolfe; *Habenaria arabica* (Deflers) Kraenzl.; *Habenaria eminii* Kraenzl.; *Habenaria ecaudata* Kraenzl.; *Habenaria kayseri* Kraenzl.; *Habenaria philippsii* Rolfe; *Habenaria steudneri* Rchb. f.; *Habenaria sudanensis* (Rolfe) Schltr.)

Tropical Africa, South Africa.

See Reichenbach, H. G. (Heinrich Gustav) (1824–1889), *Otia Botanica Hamburgensis* 2: 101. Hamburgi: Theodor Theophil. Meissneri, 1871–1881, Deflers, Albert, *Voyage au Yemen*. Journal d'une excursion botanique faite en 1887 dans les montagnes de L'Arabie heureuse ...: 208. Paris, 1889, *Bot. Jahrb. Syst.* 19: 245. 1894, *Abh. Königl. Akad. Wiss. Berlin* 1894: 62. 1894, *Consp. Fl. Afr.* [T.A. Durand & H. Schinz] 5: 90. 1894 [1892 publ. Dec 1894], *Bull. Misc. Inform. Kew* 1895: 227. 1895, *Pflanzenw. Ost-Afrikas*, C: 152. 1895, *Orchid. Gen. Sp.* 1: 184. 1897, *Fl. Trop. Afr.* 7: 254–255. 1898 and *Ann. Bot.* (Rome) 2: 362–363. 1905, *Orchid Rev.* 14: 368. 1906, *Bull. Misc. Inform. Kew* 1910: 162. 1910, *Bot. Jahrb. Syst.* 53: 508. 1915

(Roots anthelmintic, carminative, for cold, cough.)

Bonellia Bertero ex Colla Theophrastaceae (Primulaceae)

See *Hortus Ripulensis* 21–22. 1824 and *Nordic J. Bot.* 9(1): 15–30. 1989, *Novon* 14(1): 115–118. 2004, *Fl. Mesoamer.* 4(1): 1–855. 2009. Confusion with *Jacquinia*.

Bonellia flammea (Millsp. ex Mez) B. Ståhl & Källersjö (*Jacquinia flammea* Millsp. ex Mez)

South America.

See *Das Pflanzenreich* IV. 236a(Heft 15): 40. 1903, *Nordic Journal of Botany* 9(1): 27. 1989, *Novon* 14(1): 116. 2004, *Nat. Prod. Commun.* 5(3): 365–368. 2010

(Sakurasosaponin as a cytotoxic principle from *Jacquinia flammea*.)

Bonellia macrocarpa (Cav.) B. Ståhl & Källersjö subsp. **panamensis** (Lundell) B. Ståhl & Källersjö (*Jacquinia macrocarpa* Cav. subsp. *panamensis* (Lundell) B. Ståhl; *Jacquinia panamensis* Lundell)

Central America, West Indies.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... [Cavanilles] 5: 55–56, t. 483. 1799 and *Annals of the Missouri Botanical Garden* 27(3): 329–330. 1940, *Nordic Journal of Botany* 9(1): 23. 1989, *Novon* 14(1): 117. 2004

(All parts of the plant reported to be used as a fish poison.)

Vernacular names: barbasco, manzanillo de la playa

Bongardia C.A. Mey. Berberidaceae

Named after a German botanist H.G. Bongard, see *Verzeichniss Pfl. Casp. Meer.* (C.A. von Meyer). 174. 1831

Bongardia chrysogonum (L.) Spach (*Bongardia chrysogonum* Boiss.; *Bongardia margalla* R.R. Stewart; *Bongardia margalla* R.R. Stewart ex Qureshi & Chaudhri; *Bongardia olivieri* C.A. Mey.; *Bongardia rauwolfii* C.A. Mey.; *Leontice chrysogonum* L.)

Greece, E. Mediterranean, Pakistan. Small perennial herbs with scapes, erect, tuberous rhizome, hairy radical leaves, racemes branched or paniculate in the upper half of the naked scapes, golden yellow flowers, inflated bladder-like fruits, sourish leaves eaten raw or cooked, tubers baked or boiled, very variable species

See *Verz. Pfl. Casp. Meer.* (C.A. von Meyer). 174–175. 1831, *Ench. Bot.* 441. 1841, *Fl. Orient.* [Boissier] 1: 99. 1867 and *Pakistan Syst.* 3(1): 21. 1987, *J. Nat. Prod.* 52(4): 818–821. 1989, (Acta-hortic. Wageningen) *International Society for Horticultural Science* 333: 175–179. 1993, *Pharmaceutical Biology* 33(4): 317–323. 1995, *Pure & Appl. Chem.* 70(2): 403–406. 1998, *Phytochemistry* 50(2): 333–336. 1999, *Pharmaceutical Biology* 38(3): 171–175. 2000, *J. Nat. Prod.* 63(2): 251–253. 2000, *Toxicol.* 46(2): 119–129. 2005

(Tubers decoction to treat urinary tract infections, prostate hypertrophy and hemorrhoid, improves glucose homeostasis, renal hemodynamics and arterial pressure. Antispasmodic, antiviral, boiled extracts used locally as a treatment for epilepsy. Veterinary medicine, leaves used in curing sore eyes in horses. Alkaloids, saponins.)

in English: golden rod, lady's nightcap, rooster's cockcomb

in Jordan: uruf-el-deek

in Pakistan: pucca tutuka, shrin

in Turkey: çatlak otu

Bontia L. Myoporaceae (Scrophulariaceae)

See *Primae Lineae Systematis Naturae* 77. 1834.

Bontia daphnoides L. (*Bontia daphnifolia* Salisb.; *Bontia daphnoides* var. *menor* (Gaertn. f.) A. DC.; *Bontia menor* Gaertn. f.; *Myoporum laetum* G. Forst.)

Caribbean, West Indies. Shrub or small tree, much-branched from base, thick light brown furrowed bark, solitary axillary tubular flowers, tubular yellow corolla with purple hairy blotches, yellowish green fruits hanging, provides food and cover for wildlife

See *Hort. Eltham*. t. 49, fig. 57. 1732, *Species Plantarum* 2: 638. 1753, *Iter Hispanicum* 193. 1758, *Florulae Insularum Australium Prodrum* 44. 1786 and *Regnum Veg.* 127: 25. 1993, *Insect Science and its Application* 14(5): 697–700. 1993, *Brenesia* 41–42: 73–80. 1994, *Philippine Journal of Science* 126(2): 155–162. 1997, *Insect Science and its Application* 18(2): 149–155. 1998, *J. Ethnobiol. Ethnomed.* 2: 45. 2006

(Leaf infusion for nephritis, diabetes, jaundice, hypertension, cold, cough, cytotoxic; extracts of the plant used to control intestinal worms, herpes, inflammation, insect bites, ulcers and wounds; leaves steeped and the brew administered to people suffering from fish poisoning. Insecticidal, acaricidal.)

in English: button wood, kidney bush, mangle bobo, olive bush, white alling, wild olive

Boophone Herb. Amaryllidaceae (Liliaceae, Alliaceae)

Greek *bous* ‘an ox’ and *phonos* ‘murder’, referring to the poisonous properties of one species, *Boophone disticha*, see Nordal, I. *Amaryllidaceae. Flora of Tropical East Africa*: 1–30. 1982.

Boophone disticha (L.f.) Herb. (*Amaryllis disticha* L.f.; *Ammocharis taveliana* Schinz - p.p.; *Boophane disticha* (L.f.) Herb.; *Boophane longipedicellata* Pax; *Boophone intermedia* M. Roem.; *Boophone longepedicellata* Pax; *Boophone longipedicellata* Pax; *Boophone toxicaria* (L.f. ex Aiton) Herb.; *Brunsvigia ciliaris* (L.) Ker Gawl.; *Brunsvigia disticha* (L.f.) Sweet; *Brunsvigia rautanenii* Baker; *Brunsvigia toxicaria* (L.f. ex Aiton) Ker Gawl.; *Haemanthus ciliaris* L.; *Haemanthus distichus* (L.f.) L.f. ex Savage; *Haemanthus lemairei* De Wild.; *Haemanthus robustus* Pax; *Haemanthus sinuatus* Thunb. ex Schult. & Schult.f.; *Haemanthus sinuatus* Schult. & Schult.f.; *Haemanthus toxicarius* L.f. ex Aiton, nom. superfl.)

Sudan, S. Africa. Herb, deciduous, bulb above ground, stem white, peduncle green-white, succulent, perianth pinkish red, sweetly scented flowers dark pink, fruit yellow-red, flower-heads attract bees and flies

See *Species Plantarum* 1: 325. 1753, *An Appendix* 18. 1821, *Botanical Magazine* 52, sub t. 2578. 1825 and *Herbertia* 4: 97. 1937, *Journal of Ethnopharmacology* 19: 67–80. 1987, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 52: 95–100. 1996, *Journal of Ethnopharmacology* 67: 327–332, 347–354. 1999, *Hum. Exp. Toxicol.* 20(5): 277–278. 2001 [Poisoning with *Boophane disticha*: a forensic case.], *Journal of Ethnopharmacology* 79: 109–112. 2002, *Journal of Ethnopharmacology* 96(3): 385–388. 2005, *South African Journal of Botany* 73: 384–390. 2007

(Plants known to be poisonous to cattle and sheep. Bulb very poisonous if eaten, irritant to the skin, internal use

dangerous; concoctions of the bulb taken orally cause sedation, analgesia, visual hallucinations, irrational behaviour, coma or death. Fresh leaves used to stop bleeding of wounds. Bulb scales used as wound dressing after circumcision and as general wound dressing, treating boils, septic wounds. Bulb infusion antibacterial and antiinflammatory, external application on sores, wounds, rheumatic pain. Used for the external treatment of various skin and inflammatory conditions. Arrow poison. Veterinary medicine, a remedy for redwater disease in cattle; bulb scales abortifacient. Ceremonial, rituals.)

in English: bushman poison bulb, candelabra flower, Cape poison, Cape poison bulb, Cape poison bush, century plant, fan-leaved boophane, kaffir onion, poison bulb, red posy, sore-eye, sore-eye flower, tumbleweed

in Southern Africa: boesmangifbol, gifbol, gifui, ibadi, ibhade, incotha, incotho, incoto, incumbe, inCwadi, incwadi, inKoto, ishwadi, kopseerblom, kxutsana-yanaha, leshoma, malgif, malkopgif, motlatsisa, muMandwe, muwandwe, perdeskop, perdespook, seeroogblom, seerooglelie, siphahluka, siphaluka

Bopusia Presl Scrophulariaceae

See David Don (1799–1841), *Prodrum Florae Nepalensis*, sive enumeratio Vegetabilium quae ... Ann. 1802–1803 detexit atque legit F. Hamilton (*olim* Buchanan). 88. London 1825.

Bopusia scabra C. Presl (*Bopusia scabra* (L.f.) Presl; *Gerardia scabra* L.f.; *Graderia scabra* (L.f.) Benth.; *Sopubia scabra* (L.f.) G. Don)

South Africa.

See *Supplementum Plantarum* 279. 1781, *Prodrum Florae Nepalensis* 88. 1825, *A General History of the Dichlamydeous Plants* 4: 560. 1837, *Botanische Bemerkungen* 91. 1844, *Abhandlungen der Böhmisches Gesellschaft der Wissenschaften, nebst der Geschichte derselben* 3: 521. 1845, *Prodrum Systematis Naturalis Regni Vegetabilis* 10: 514. 1846

(Leaves for stomach and intestinal complaints. Roots for gangrenous rectitis, skin diseases, body sores. Inner root bark for febrile complaints and enteric fever.)

in English: graderia, wild penstemon

in South Africa: iBheja, inKunzi, uGweje

Borago L. Boraginaceae

Possibly from the Arabic *abu 'araq* ‘sudorific’, or from the Latin *burra*, *ae* (*burrus*, *a*, *um* ‘rufus, rubens’; Akkadian *burruru* ‘with reddish face and red hair’) ‘a shaggy garment, hairy garment’. See Carl Linnaeus, *Species Plantarum*.

137–138. 1753, *Genera Plantarum*. Ed. 5. 67. 1754 and V.A. Llorente Maldonado de Guevara, *Misc. Griera*. 2: 65–77. Barcelona 1955–1960.

***Borago officinalis* L.**

Europe.

See *Species Plantarum* 1: 137. 1753 and *Fl. Libya* 68: 8. 1979, *Ann. Missouri Bot. Gard.* 75(2): 460. 1988, *Regnum Veg.* 127: 25. 1993

(Used in Unani. Demulcent, depurative, diaphoretic, mildly diuretic, emollient, expectorant, febrifuge, hypotensive, mildly sedative, nervine tonic. Leaves infusion for colds, premenstrual tension, fever and neuralgia. Repellent.)

in English: bee bread, borage, common borage, common bugloss, cool-tankard, cow's tongue plant, herb borage, starflower, starflower oil, tale-wort

in Arabic: bou krish, bou sassal, bou shenaf, boukhrich, harsha

in French: bourrache

in Italian: borragine

Borassus L. Arecaceae (Palmae)

Greek *borassos* for the growing and immature spadix of the date palm, or for the membrane surrounding the date, name applied by Linnaeus to the date palm spathe; see Carl Linnaeus, *Species Plantarum*. 2: 1187. 1753, *Genera Plantarum*. Ed. 5. 494. 1754, *Fam. Pl.* 2: 25. 1763 and *Principes* 20: 83–90. 1976, *Economic Botany* 41: 247–266. 1987, *Economic Botany* 42(3): 420–441. 1988, *Principes* 36: 148–155. 1992.

***Borassus aethiopum* Mart.** (*Borassus aethiopum* var. *bagamojense* Becc.; *Borassus aethiopum* var. *senegalense* Becc.; *Borassus deleb* Becc.; *Borassus flabellifer* L. var. *aethiopum* (Mart.) Warb.; *Borassus madagascariensis* (Jum. & H. Perrier) Jum. & H. Perrier; *Borassus madagascariensis* (Jum. & H. Perrier) Bojer ex Jum. & H. Perrier; *Borassus sambiranensis* Jum. & H. Perrier)

Trop. & S. Africa. Very slow growing, unbranched, slightly bottle shaped stem, very large fan-shaped leaves, male and female flowers on different trees, male flowers producing branched spikes, large orange fruits in bunches, enlarged calyx cup, edible oily fibrous pulp, dark brown seeds strongly attached to the fibers in the pulp, white-translucent endosperm, high sugar content, sap fermented into a palm wine, along watercourses, in floodplains, in wooded savanna grassland, often in dense stands

See *Historia Naturalis Palmarum* 3(7): 220–221. 1838, *Pflanzenw. Ost-Afrikas*, B: 20. 1895 and *Ann. Inst. Bot.-Géol. Colon. Marseille*, III, 1(1): 67. 1913, *Webbia* 4: 334, 337, 339. 1914, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Journal of Ethnopharmacology* 114: 44–53. 2007

(Fruits and sap for cough, asthma, bronchial complaints. Juice stem for parotitis and earache. Roots antibacterial, for cough, wounds, angina and bronchitis, against internal parasites. Seeds aphrodisiac, for impotency. Veterinary medicine, antifungal.)

See *Species Plantarum* 2: 632–633. 1753, *Linnaea* 3(2): 132–134. 1828, *Flora Boreali-Americana* 2: 91, pl. 167. 1840 and *Fl. Europ. Ross.* 896. 1910, *Publications of the Field Columbian Museum, Botanical Series* 8(5): 325. 1931

(Parasitic on species of *Alnus* Miller. Whole plant tonic, an extract applied locally to cure wounds and bruises.)

in English: northern groundcone

in China: cao cong rong

in Japan: eba

Boscia Lamarck Capparaceae (Capparidaceae)

After the French naturalist Louis Auguste (Augustin) Guillaume Bosc (*olim* Bosc d'Antic or Dantic), 1759–1828 (d. Paris), botanist, horticulturist, author of *Mémoire sur les différentes espèces de chênes qui croissent en France.* Paris (Baudouin) 1808; see *Expos. Fam. Nat.* 2: 3. 1805 and John H. Barnhart, *Biographical Notes upon Botanists.* 1: 225. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 46. 1972, Jean-François Leroy, in *D.S.B.* 2: 321–323. 1981, *Economic Botany* 48(1): 90–95. 1994. According to some other authors the genus was named for a French professor of agriculture, Louis A.G. Bosc, 1777–1850.

Boscia albitrunca Gilg & Gilg-Ben. var. ***albitrunca*** (*Boscia albitrunca* Gilg & Ben.; *Boscia albitrunca* (Burch.) Gilg & Ben.; *Boscia albitrunca* (Burch.) Gilg & Gilg-Ben.; *Boscia pechuellii* Kuntze; *Boscia pechuellii* Kuntze; *Boscia peuchellii* Kuntze; *Boscia puberula* Pax; *Boscia transvaalensis* Pest.; *Capparis albitrunca* Burch.; *Capparis oleoides* auct., sensu Marloth, misapplied name; *Capparis punctata* Wall.; *Capparis punctata* Burch.)

Namibia, Southern Africa. Tree, evergreen, usually single-stemmed, dense round to spreading crown, leathery grey-green leaves in clusters, heavily scented yellowish green inconspicuous star-shaped flowers borne in clusters on short lateral shoots usually on old wood, wanting petals, yellowish smooth brittle-skinned fruits, very nutritious leaves valuable fodder for both domestic and wild animals, giraffe and gemsbok and kudu browse the tree, hardy and drought-resistant, closely related to *Boscia foetida* subsp. *rehmanniana*

See *Prodr.* (DC.) 1: 248. 1824 and *Bot. Jahrb. Syst.* liii. 212. 1915

(Root to treat hemorrhoids; green fruit used to treat epilepsy. Veterinary medicine, an infusion of the leaves used to treat eye infections in cattle.)

in English: caper bush, coffee tree, shepherd's tree, tree of live, white stem, white-stemmed boscia, white trunk

in Namibia: /hunib, omunghudi, omutendereti, weissstamm

in Southern Africa: hunis, matoppie, mohlôpi, siPhiso, umTopi, witgat, witgatboom, witstam, witteboom, xukutsi; muDobe, muDowe, muPama, muTobi (Shona); isiKhwelampisi, isiNama, umVithi, umFithi (Zulu); umGqomogqomo (Xhosa); umbombwe, umhlope, umHlophe (Central and southern Transvaal); motlhopi, motlopi (Western Transvaal, northern Cape, Botswana); mohlopi (North and north east Transvaal); muthobi, muvhombwe (Venda); omutendereti (Central South West Africa)

Boscia angustifolia A. Rich. var. ***angustifolia*** (*Boscia angustifolia* fo. *mesetorum* Roberty; *Boscia caloneura* Gilg; *Boscia corymbosa* Gilg; *Boscia dawei* Sprague & Green; *Boscia engleri* Gilg; *Boscia firma* Radlk., p.p.; *Boscia fischeri* Pax; *Boscia integrifolia* Brunner; *Boscia intermedia* Hochst. ex A. Rich.; *Boscia patens* Sprague & M.L. Green; *Boscia reticulata* Hochst. ex A. Rich.; *Boscia tenuifolia* A. Chev.; *Maerua crassifolia* Forssk.)

Tanzania, Sahel. Shrub or small evergreen tree, sweetly scented yellow-green flowers clustered in short simple terminal racemes, rough skinned yellowish bitter fruit, bee forage, seeds eaten cooked, browsed by elephant, foliage consumed by camels and small livestock

See *Flora Aegyptiaco-Arabica* 104. 1775, *Florae Senegambiae Tentamen* 1: 26, t. 6. 1831 and *Kew Bulletin* 16: 82. 1962, *J. Ethnopharmacol.* 46: 31–47. 1995, *J. Ethnopharmacol.* 67: 347–354. 1999, *J. Appl. Microbiol.* 86: 985–990. 1999, *Afr. J. Biotechnol.* 9: 317–321. 2003, *Afr. J. Biotech.* 3 (9): 481–483. 2004, *African Journal of Biotechnology* 5(18): 1602–1607. 2006

(Bark stated to be poisonous. Leaves and roots used for the treatment of diarrhea, pneumonia, boils, chest pain, wound infection, urinary infection and typhoid fever, burns and headache; leaves cholagogue; pulverized roots for chest pains and the treatment of bacterial diseases. Bark applied on swollen feet, for dropsy, swellings, edema, gout, kidney problems; fruit a laxative. Veterinary medicine, pounded leaves a tonic and astringent for horses and camels; berries crushed in water given to cause purging.)

in English: rough-leaved shepherd's tree, tree of the head

in Arabic: sehel, sereh, shajeret almarfin

in Gambia: nos

in W. Africa: beli, bere, tegelena

Bosea L. Amaranthaceae (Chenopodiaceae)

Bosea amherstiana Hook.f. (*Bosea amherstiana* (Moq.) Hook. f.; *Rodetia amherstiana* Moq.)

Himalaya, Pakistan. Shrub, large, much-branched, straggling, arching, flowers solitary or in few-flowered clusters, inflorescence of axillary and terminal spikes, famine food, young shoots fried in butter and eaten, ripe fruits eaten raw

See *Species Plantarum* 1: 225. 1753, *Genera Plantarum* 87–88. 1789, *Prodr.* (DC.) 13(2): 323. 1849, *The Flora of British India* [J.D. Hooker] 4: 716. 1885 and *Ann. Cat. Vasc. Pl. W. Pakistan* 231. 1972

(Leaves astringent, antiseptic, used on sores and eczema.)

in India: bhengoi, kotibilge

Boswellia Roxb. ex Colebr. Burseraceae

Named in honor of the Scottish (b. Ayrshire) botanist John Boswell, 1710–1780 (d. Edinburgh), physician. He was uncle of James Boswell, 1740–1795, advocate, traveller, friend and biographer of Dr. Samuel Johnson (1709–1784); James Boswell wrote *The Life of Samuel Johnson*. London 1791 and *The Journal of a Tour to the Hebrides with Samuel Johnson*. London 1785. See *Species Plantarum*, Editio Secunda 1: 471. 1762, *Asiatic Researches* 9: 379, 382 in nota. 1807, *Pl. Corom.* iii. 4. t. 207. 1819, *Annales des Sciences Naturelles* (Paris) 2: 346. 1824, *Endl. Nov. Stirp. Dec.* 39. 1839, George Christopher Molesworth Birdwood (1832–1917), “On the genus *Boswellia*, with descriptions and figures of three new species,” *Trans. Linn. Soc. London* 27(2): 111–148. 1870 and E. Marston, *Sketches of some booksellers of the time of Dr. Samuel Johnson*. London 1902, M. Thulin & A.M. Warfa, “The Frankincense Trees (*Boswellia* spp., Burseraceae) of Northern Somalia and Southern Arabia.” *Kew Bulletin* 42(3): 487–500. 1987, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 88. 1994, *Nordic Journal of Botany* 26: 223–225. 2008. Frankincense resin is obtained from trees of the genus *Boswellia*.

Boswellia carteri Birdw. (*Boswellia carterii* Birdw.)

East Africa and China, India and the Middle East. Tree

See *Transactions of the Linnean Society of London* 27: 143. 1870 and *BioFactors* 13: 225–230. 2000, *Anticancer Res.* 22: 2853–2862. 2002, *Clin. Diag. Lab. Immunol.* 12: 575–580. 2005, *J. Ethnopharmacol.* 107: 249–253. 2006, *Biol. Pharm. Bull.* 29: 1976–1979. 2006, *BMC Complementary and Alternative Medicine* 9: 6. 2009

(Resin antiinflammatory, used for the treatment of rheumatoid arthritis, colitis, Crohn’s disease, other inflammatory diseases. Boswellic acid, one of the main components of frankincense oil, known to have antineoplastic properties.)

in English: African elemi, Bible frankincense, mastic tree

in China: ru xiang

Boswellia dalzielii Hutch. (*Boswellia odorata* Hutch., p.p.)

Tropical Africa. Tree, papery bark, whitish gum resin, white fragrant flowers

See *Bull. Misc. Inform. Kew* 137. 1910, *J. Ethnopharmacol.* 60: 85–89. 1998, *J. Ethnopharmacol.* 62: 123–127. 1998, *Journal of Ethnopharmacology* 67: 225–228. 1999, *African Journal of Biotechnology* 3(5): 284–288. 2004, *J. Pharmacy Bioresour.* 2: 131–136. 2005, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Indian J. Pharmacol.* 38: 359–360. 2006, *J. Pharmacol. Toxicol.* 1: 591–596. 2006, *Asian Journal of Biochemistry* 2(5): 359–363. 2007

(Gum resin used along with other medicines as a stomachic and for the treatment of venereal diseases. Oil from the leaves antibacterial and antifungal. Leaves decoction to prevent

abortion. Fresh bark eaten to induce vomiting; bark boiled to make a wash for fever, rheumatism, arthritis and also taken internally for gastrointestinal troubles; stem bark antibacterial, antiulcer, antispasmodic, astringent, antidiarrheal, reduced gastrointestinal motility; aqueous bark extract may strengthen the liver, may be used in the management of hepatic disorders. Root decoction boiled along with *Hibiscus sabdariffa* used for the treatment of syphilis; root decoction with *Daniellia oliveri* for wounds healing; bark root antidote, venomous stings, bites. Veterinary medicine, young leaves for diarrhea, dysentery; extract from the leaves used for the treatment of diarrhea in poultry.)

in English: frankincense tree

in Burkina Faso: condrényogho, gondregneogo, koubré niango, pianwogu, piengwogu

in Ghana: kabona, pianwogu, piengwogu

in Ivory Coast: condrényogho, koubré niango, pianwogu, piengwogu

in Niger: andakehi gorki, hano

in Nigeria: anndakehi, ararabi, ararrabi, ba-samu, cibdi, d’an magami, ebe ghimwin, hano, hánoó, hánoó kai, hánuú, hararrabi, harrabi, harrarrabi, janauhi, janawhi, juguhi, kadayan, káfi dukkán, shabilabi, tarmasika

in Upper Volta: condrényogho, gonéniogo, komhenyegho, kubré niango, pianwogu, piengwogu

Boswellia frereana Birdw.

Tropical Africa, Somalia. Small tree

See *Trans. Linn. Soc. London* 27(2): 146, t. 31. 1870 and *Kew Bull.* 43: 494. 1987

(Masticatory.)

in English: African elemi, Coptic frankincense, elemi frankincense, maydi frankincense, moxor trees, yigaar tree

in Arabic: luban lami

in Somalia: fas kebir (kabeer), fas saghir (saqeer), foox, jabaanjib, maydi, mujarwal, mushaad, shorta, slif, yagar, yagcar

in Yemen: yegaar

Boswellia hildebrandtii Engl.

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 98. 1893

(Roots diuretic, wound dressing, for gonorrhoea, venereal diseases.)

Boswellia neglecta S. Moore (*Boswellia bricchettii* auct. - sensu Vollesen; *Boswellia campestris* Engl.; *Boswellia elegans* Engl.; *Boswellia hildebrandtii* Engl., non Baker;

Boswellia holstii Engl.; *Boswellia microphylla* Chiov.; *Boswellia multifoliolata* Engl.)

Uganda, Tanzania. Shrub, greenish white flowers, reddish fruits, goat and camel fodder, bark used for making tea, resin from bark used as chewing gum, found in *Acacia-Commiphora* bushland

See *Journal of Botany, British and Foreign* 15: 67, t. 185. 1877 and *Phytochemistry* 66: 1499–1514. 2005

(Bark decoction added to milk and given to children as tonic. Dried ground bark put into wounds; root decoction drunk for enlarged spleen. Resin burned during peace prayers. Insect repellent.)

in English: frankincense

in Kenya: dakar, dakara, dakkar, dakkar gurate, dakkara, dong'od-nee-dhieroka, ekinyate, halale, hancha-dakkara, hancha-lubadin, hanja, kinondo, lecholoo, Ikinoo, magafur, mirafur, murfur-madbe, sungululwo, ubani

Boswellia odorata Hutch.

Nigeria. Tree, pale papery bark, whitish gum-resin, leaves pinnately compound, fragrant white flowers, pear-shaped fruit 3-valved, savanna forest

See *Asiatic Researches* 9: 379. 1807 and *Bulletin of Miscellaneous Information Kew* 1910: 137. 1910

(Eating the fresh bark causes vomiting. A mixture of root and bark used as an antidote for arrow poison. Gum stomachic and a treatment for syphilis.)

Boswellia papyrifera Hochst.

Ethiopia.

See *Flora* 26: 81. 1843

(Febrifuge, sedative. Magic, control of evil spirits.)

in Ethiopia: itan

Boswellia sacra Flueck. (*Boswellia bhar-dajiana* Birdw.; *Boswellia bhar-dajiana* var. *serrulata* Engl.; *Boswellia carteri* Birdw. var. *undulato-crenata* Engl.; *Boswellia undulato-crenata* (Engl.) Engl.)

Arabia.

See *Lehrb. Pharmak.* 31. 1867

(Abortifacient, astringent, antiinfection, antiinflammatory, oxytocic; antiseptic in wound healing and application for swollen joints.)

in English: frankincense, olibanum, yagcar trees

Boswellia serrata Roxb. (*Boswellia glabra* Roxb. ex Colebr.; *Boswellia glabra* Roxb.; *Boswellia serrata* Roxb. ex Colebr.; *Boswellia thurifera* Colebr.; *Boswellia thurifera* Roxb. ex Flem.)

India. Tree, bark exudes black gum, white flowers, trigonous drupes

See *Asiat. Res.* 9: 379, t. 5. 1807, *Pl. Coromandel* 3: 4. 1811 and *Taxon* 28: 403. 1979, *Agents Actions* 18: 407–412. 1986, *Agents Actions* 24: 161–164. 1988, *European Journal of Herbal Medicine* 3: 511–514. 1998, *Planta Medica* 64: 328–331. 1998, *Phytochem. Anal.* 12: 374–376. 2001, *Planta Medica* 67: 391–395, 778–780. 2001, *Phytomedicine* 10: 3–7. 2003, *Indian J. Exp. Biol.* 41: 1460–1462. 2003

(Used in Ayurveda, Unani and Sidha. Resin diuretic, stimulant, demulcent, emmenagogue, hypoglycemic, astringent, antiinflammatory, antibacterial and antifungal, used for the treatment of rheumatoid arthritis, reumatism, joint pain, toothache, Crohn's disease, chronic ulcers, asthma, back-pain, other inflammatory diseases; resin mixed with rice water applied for skin eruptions; a mixture of gum and red ochre consumed to check the nocturnal emissions. Bark and gum-resin to treat bronchitis, asthma, cough, chronic laryngitis, stomatitis, dysentery, ulcers, hemorrhoid, skin diseases, fever, convulsions, syphilitic diseases, jaundice, arthritis, rheumatism, conjunctivitis; stem bark decoction to relieve body aches and to treat dysuria, in small doses given internally to cure chronic cough and cold; stem bark paste given for indigestion; stem bark paste applied to wounds; stem bark powder made into a paste and applied on forehead to relieve headache; stem bark pounded together with *Curcuma longa* and applied in traumatic pain. Resin used as incense, dry gum burns easily. Bark with root of *Leea asiatica* made into a paste and used in snakebite. Aromatic leaves and twigs used as repellent for flies, termites and insects. Veterinary medicine, bark juice for fracture of limb; pounded bark juice applied on the broken part of the limb. Sacred plant.)

in English: Indian frankincense, Indian olibanum

(Poisonous to rabbits. Plant maceration for agalactia, constipation. Roots stomachic, sedative, for gastro-enteritis, colic. Leaves antiplasmodial, anthelmintic, antibacterial, stomachic, pain killer, purgative, laxative, oxytocic, carminative, for nausea, mental confusion, dysentery, diarrhea, malaria, conjunctivitis, to treat amoebas and convulsions (*degedege*) in children. Magic, against the bad spirits, hallucinations, psychosis.)

in Burundi: umubebe

in Congo: idubo, kahenekeru, kikanzu, lusele, lwibaye, mushi ya paa, uruhehe

in Kenya: sunoni

in Rwanda: igihehe

in Tanzania: botto, ornalipe

in Uganda: ekyoganyanja

Bothriocline ugandensis (S. Moore) M.G. Gilbert (*Erlangea ugandensis* S. Moore)

Uganda, Burundi. Shrub, erect, corolla mauve

See *Flora* 36: 34. 1853, *Hooker's Icones Plantarum* 12: 1133. 1873 and *Journal of the Linnean Society, Botany* 37: 165. 1905, *Bulletin du Jardin Botanique National de Belgique* 45: 421–445. 1975, *Kew Bulletin* 36: 594. 1981, *African Study Monographs* 19(1): 13–33. 1998, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Fitoterapia* 72(4): 351–368. 2001

(Leaves juice for pharyngitis, stomachache. Veterinary medicine, for infection of eyes, blindness, conjunctivitis and related ocular affections, for rabies, madness, anaplasmosis, diarrhea,agalactia. Magic, against the bad spirits, hallucinations, psychosis.)

in Burundi: umuhana

in Congo: cirhabirhabi

in Rwanda: igicumucumu

Botrychium Swartz Ophioglossaceae (Botrychiaceae)

Greek *botrys* 'a cluster, a bunch of grapes, cluster of grapes', referring to the fronds or to the indusia, see *Journal für die Botanik* 1800(2): 8, 110. 1800[1801], *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 19: 96. 1869 and *Memoirs of the Torrey Botanical Club* 19(2): 1–177. 1938, *Ferns of the Southeastern States* 377, 482. 1938, *Fl. Ecuador* 66: 107–170. 2001.

Botrychium australe R. Br. subsp. *negeri* (H. Christ) R.T. Clausen (*Botrychium negeri* H. Christ; *Botrychium ternatum* (Thunb.) Sw.; *Botrychium ternatum* Hook. & Baker; *Sceptridium negeri* (H. Christ) Holub)

South America.

See *Schrad. Journ.* 1800 [2]. 111. 1801, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 3: 336. 1884 and *Bulletin of the Torrey Botanical Club* 32: 222, pl. 6. 1905, *Botanical Gazette* 40(6): 458. 1905, *Arkiv för Botanik utgivet av K. Nishida; *Osmunda cicutaria* Savigny; *Osmunda virginiana* L.; *Osmundopteris virginiana* (L.) Small)

North America. Evergreen fern, boiled and eaten

See *Journal für die Botanik* 1800(2): 111. 1800[1801], *Flora Boreali-Americana* 2: 274. 1803, *Fl. Tasm.* 2: 154, t. 169. 1850 and *Memoirs of the Torrey Botanical Club* 19(2): 97. 1938, *Ferns of the Southeastern States* 377. 1938, *Journal of Japanese Botany* 33: 202. 1958, *Preslia* 45(3): 277. 1973

(Plant diaphoretic, emetic, astringent, expectorant, used against dysentery. Roots infusion emetic, vulnerary, induces sweating and expectorant, used in the treatment of lung ailments; a poultice from the roots applied to snake-bites, bruises, cuts and sores.)

in English: rattlesnake fern

Bougainvillea Comm. ex Juss. Nyctaginaceae

Dedicated to the French (b. Paris) explorer Louis-Antoine de Bougainville, 1729–1811 (Paris), navigator, scientist, mathematician, from 1766 to 1769 the first Frenchman to sail around the world, searched for the mythical Davis Land (said to be off the coast of Chile), he made an unsuccessful attempt to colonize the Falkland Islands, Fellow of the Royal Society of London, he made the first charts of longitude in the Pacific, his writings include *Traité du calcul intégral*. Paris 1754–1756 and *Voyage autour du monde par la frégate du Roi “La Boudeuse” et la flute L’Etoile” en 1766–1769*. Paris 1771; see *Genera Plantarum* [Jussieu] 91. 1789, *Species Plantarum*. Editio quarta 2(1): 348. 1799, *Hist. Nat. Vég.* (Spach) 10: 516. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 437. 1849, *Theoria Systematis Plantarum* 364. 1858 and “Le Premier Voyage Français autour du Monde.” in *Revue Hebdomadaire*. 22–36. 1907, J. Dorsenne, *La vie de Bougainville*. Paris 1930, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 518–546. 1937, “Routier Inédit d’un Compagnon de Bougainville.” in *La Géographie*. 69: 112–114. 1939, C.G.M. de La Roncière, *Bougainville*. Paris 1942, *Fieldiana, Bot.* 24(4): 174–192. 1946, Wilma George, in *D.S.B.* 2: 342–343. 1981.

Bougainvillea glabra Choisy (*Bougainvillea spectabilis* Willd. var. *glabra* (Choisy) W.J. Hooker)

China. Shrubs, vine-like, stems thick, branches pendent, spines axillary, chartaceous leaf blade ovate or ovate-lanceolate, foliaceous chartaceous purple or magenta bracts oblong or elliptic, ribbed perianth tube greenish distinctly angled

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 437. 1849 and *Contr. U.S. Natl. Herb.* 13(11): 394. 1911, Lu Dequan. *Nyctaginaceae*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 26: 1–14. 1996, *Journal of Ethnopharmacology* 62: 183–193. 1998

(Steroidal component in the leaves. Leaves antidiarrheal, antiulcer, antiinflammatory, antimicrobial. Flowers included in remedies for fever, also an essential ingredient in an oral remedy for anemia associated with gastrointestinal bleeding and epigastric pain; an infusion of the flowers a treatment for low blood pressure. Roots and flowers included in a complex preparations smeared on the body to treat mental disorders.)

in English: bougainvillea, paper flower, paper plant

in Congo: livetso

in China: guang ye zi hua

in Indonesia: bunga melati, bunga melur, bunga meru

Bougainvillea spectabilis Willd. (*Bougainvillea virescens* Choisy)

Brazil. Perennial shrub, spreading, arching, thorny, bracts bright reddish, red calyx

See *Species Plantarum*. Editio quarta [Willdenow] 2(1): 348. 1799 and *Indian Journal of Pharmaceutical Sciences* 46(5): 187–188. 1984, *Indian Journal of Indigenous Medicines* 8(2): 65–7. 1992, *Advances in Biological Research* 2(1–2): 1–5. 2008

(Used in Sidha. Antiviral, antiinflammatory, antidiabetic, helpful in non-insulin diabetes. Roots boiled to make strength medicine; a decoction of dried stems for hepatitis. Leaves antiinflammatory, expectorant, laxative, hypoglycemic, antimicrobial, febrifuge, for diarrhea, diabetes, cough, sore throat and to reduce stomach acidity; leaves boiled in water and taken as laxative.)

in English: Brazil bougainvillea, great bougainvillea, paper flower

in South America: bombilia, buganvillea, camelina, gutembilla, hasta-lasta, Jerusalém, Napoleón, papelillo, pompilia, santa rita, veranera

in Bali: bungan kertas

in India: bogana malli, boganvel, boganvilla, huh jupeang, kaagadada hoo gida, kagithala puvvu, kemputhuraayi, kirusnakeli, kiruttinakeli, sarawan

in Indonesia: bugenvil

in Japan: ikada-kazura (= raft vine)

in Philippines: bogambilya, bongabilya

Bourreria P. Browne Boraginaceae

The name to commemorate Johann Ambrosius Beurer who was a friend of Ehret, but the name when published in 1756 was misspelled *Bourreria*, corrected becoming *Beurreria* or *Beureria*.

Bourreria ovata Miers (*Bourreria revoluta* Kunth; *Bourreria succulenta* Jacq.; *Morelosia ovata* (Miers) Kuntze)

Bahamas, Jamaica. Tree, somewhat weedy, tubular flowers with white spreading lobes, conspicuous terminal inflorescences, fruit a rounded berry ripening red and with a persistent style, four angular seeds

See *The Civil and Natural History of Jamaica in Three Parts* 168–169, pl. 15, fig. 2. 1756, *Novorum Vegetabilium Descriptiones* 1: 1–2. 1824, *Annals and Magazine of Natural History*, ser. 4 3: 203–204. 1869, *Revisio Generum Plantarum* 2: 439. 1891 and *Journal of Ethnobiology* 3(2): 149–156. December 1983

(A leaf infusion to treat colds, flu, bedwetting children, blood complaints. Love potion, the leafy twig.)

in English: strongback, strongbark

Bourreria succulenta Jacq. var. *revoluta* (Kunth) O.E. Schulz (*Bourreria revoluta* Kunth; *Bourreria succulenta* Jacq.; *Crematomia revoluta* (Kunth) Miers; *Crematomia*

revoluta Miers; *Ehretia havanensis* Willd.; *Ehretia havanensis* Willd. ex Roem. & Schult.; *Ehretia havanensis* Roem. & Schult.; *Ehretia laevis* var. *cymosa* Roem. & Schult.; *Ehretia revoluta* DC.; *Ehretia revoluta* (Kunth) DC.; *Ehretia tomentosa* var. *havanensis* M. (Infusion used internally and externally for sore throat. Ashes applied to sores.)

in English: mat grama, matted grama

in Mexico: navajita simple, navajita anual

Bowenia Hook. ex Hook.f. Boweniaceae (Cycadaceae, Stangeriaceae, Zamiaceae)

After the Irish-born Right Hon. Sir George Ferguson Bowen, 1821–1899 (Brighton, Sussex), in 1854 Chief Secretary for the Ionian Islands, Governor successively of Queensland, New Zealand, Victoria, Mauritius, and Hong Kong, in 1887 to Malta, wrote *Mount Athos, Thessaly, and Epirus: a diary of a journey from Constantinople to Corfu*. London 1852, *The Federation of the British Empire*. A paper read before the Royal Colonial Institute. London 1886, *Ithaca in 1850*. London 1854 and *Thirty years of Colonial Government*. A

selection from the despatches and letters of ... Sir G.F. Bowen ... Edited by Stanley Lane-Pool. London 1889; see *Species Plantarum* 2: 1188. 1753, *Curtis's Botanical Magazine*. 89: t. 5398, 6008. 1863 and *Pathologia Veterinaria* 5(1): 26–34. 1968, *American Journal of Botany* 68: 1114. 1981, *J. Am. Vet. Med. Assoc.* 191: 1410–1412. 1987, *Mem. New York Bot. Gard.* 57: 200–206. 1990.

Bowenia serrulata (W. Bull) Chamb. (*Bowenia serrulata* Chamberlain; *Bowenia spectabilis* var. *serrulata* W. Bull)

Australia.

See *Catalogue de l'Établissement Horticole de Louis van Houtte à Gand* 4: t. 5. 1878, *A Retail List of New Beautiful & Rare Plants offered by William Bull* 1878 and *Botanical Gazette (London)* 54: 419. 1912

(Very poisonous to cattle, cycad neurotoxicity, causing staggers syndrome in cattle.)

in English: byfield fern

Bowenia spectabilis Hook. ex Hook.f. (*Bowenia spectabilis* Hook.; *Bowenia spectabilis* Hook.f.)

Australia.

See *Botanical Magazine* 89: t. 5398. 1863

(Poisonous to stock, cycad neurotoxicity, causing staggers syndrome in cattle.)

in English: zamia fern

in Australia: chiroo, gunyoo, ja-yur, julbin (Aboriginals name)

Bowiea Harvey ex Hook.f. Hyacinthaceae (Liliaceae, Asparagaceae)

After the English (b. London) Kew gardener James Bowie, circa 1789–1869 (Claremount, Cape Town), botanical collector, he wrote “Sketches of the botany of South Africa.” *S. Afr. Quart. J.* 1: 27–36. 1830 (A list of 209 Cape plants); see *Botanical Magazine* 93: t. 5619. 1867 and John Hutchinson, *A Botanist in Southern Africa*. 623–624. London 1946, A.M. Coats, *The Quest for Plants*. 263–265. London 1969, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 101–102. Cape Town 1981, Harold B. Carter, *Sir Joseph Banks (1743–1820). A Guide to Biographical and Bibliographical Sources*. 476–479 and 501. Winchester 1987, Germishuizen, G. & Meyer, N.L. (eds.) “Plants of Southern Africa: an annotated checklist.” *Strelitzia* 14: i–vi, 1–1231. National Botanical Institute, Pretoria. 2003.

Bowiea volubilis Harv. ex Hook. f. (*Bowiea kilimandscharica* Mildbr.; *Bowiea volubilis* Harv.; *Bowiea volubilis* Hook. f.; *Ophiobolus volubilis* (Harv.) Skeels; *Ophiobolus volubilis* (Harv. ex Hook. f.) Skeels; *Schizobasopsis volubilis* (Harv.) J.F. Macbr.; *Schizobasopsis volubilis* (Harv. ex Hook.f.) J.F. Macbr.)

Tropical Africa, S. Africa. Perennial, fleshy, climber, slender, twining and sprawling, trailing, branched, depressed-globose scaly bulb, strap-shaped basal leaves, branched flower stem, small yellow-green flowers, fruits 3-angled, seeds flattened, scented of sour musk, tepals and stamens accrescent and green

See *Bull. Bur. Pl. Industr. U.S.D.A.* 223: 45. 1911, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 202. 1934, *Nordic Journal of Botany* 7: 53–65. 1987, *Nordic J. Bot.* 15: 601. 1995, *Journal of Ethnopharmacology* 71(1–2): 281–292. 2000, *Journal of Ethnopharmacology* 97(1): 107–115. 2005, *Journal of Ethnopharmacology* 103(1): 139–142. 2006

(Entire plant poisonous, toxic if large quantities eaten; not to be eaten, containing cardiac glycosides, internal use not safe, not recommended; contact with bulb can cause irritation of wet skin. Cardiotoxic, laxative, irritant, emetic, antiinflammatory, antibacterial and antifungal, used externally for edema, dropsy, ascites, headache, infertility, sterility, venereal diseases. Rodenticide.)

in English: climbing onion, climbing potato, climbing sea onion, sea onion, South African climbing sea onion, Zulu potato

in Southern Africa: gifisila, igibisila, knoklimop, umagaqana, umGaqona

in Swaziland: gibizisila

Brachiaria (Trin.) Griseb. Poaceae (Gramineae)

Latin *brachium*, *ii* (*bracchium*) ‘the arm, the forearm’, referring to the shape of the grass or to the racemes, arm-like; Greek *brachion*; serious taxonomic problems and relationships between *Brachiaria*, *Panicum* and *Urochloa*, particularly difficult to separate from *Panicum* L. and from a number of other genera, *Brachiaria* has been nearly completely reduced to *Urochloa* P. Beauv., see also *Panicum* L. and *Urochloa* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Flora Graeca* 1(2): 44, t. 59. 1808, *De Graminibus Paniceis* 51, 125, 266. 1826, *Mémoires de l’Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. (Used in Ayurveda. Found to increase the milk yield.)

in English: signal grass, summer grass, sweet signal grass, sweet summer grass

in Mauritius: mehenki

in India: antu garike hullu, chimpigyan hullu, chinari, chinwari, domakalu gaddi, guhria, khariu, loidan siput, sarpot, sarput, seprut, sheput, shimpi, shimpigyan hullu, sipi, tiliya, tuvara

in Somalia: kule-kule, kulekule

in Southern Africa: kgalane, kgalane, khalane, litjiesinjaalgras, litjiesrysgras, soetgras, soetlitjiesrysgras, umfisane, umkraut armgras

in Sudan: um sileika

Brachiaria ramosa (L.) Stapf (*Brachiaria regularis* (Nees) Stapf; *Brachiaria regularis* var. *nidulans* (Mez) Täckh. & G. Täckh.; *Echinochloa ramosa* (L.) Roberty; *Panicum arvense* Kunth; *Panicum brachylachnum* Steud.; *Panicum breviradiatum* Hochst.; *Panicum canescens* Roth ex Roem. & Schult.; *Panicum cognatissimum* Steud.; *Panicum nidulans* Mez; *Panicum pallidum* Peter; *Panicum patens* Bojer, nom. illeg., non *Panicum patens* L.; *Panicum petiveri* var. *puberulum* Chiov.; *Panicum ramosum* L.; *Panicum sorghum* Delile ex Steud.; *Panicum supervacuum* C.B. Clarke; *Urochloa ramosa* (L.) R.D. Webster; *Urochloa ramosa* (L.) T.Q. Nguyen; *Urochloa supervacua* (C.B. Clarke) Noltie)

Tropics of Old World. Annual, variable, loosely tufted, branching, spreading, erect or geniculate, ascending, sometimes rooting at the lower nodes, grown as a cereal, edible grains used in preparing traditional foods, palatable, grazed, straw and grains readily eaten by baboons and cattle, bird feed, a weed of cultivation, closely related to *Brachiaria deflexa* (Schumach.) C.E. Hubb. ex Robyns, can be confused with *Brachiaria villosa*

See *Mantissa* 29–30. 1767, *Systema Vegetabilium* 2: 457. 1817, *De Graminibus Paniceis* 144. 1826, *Révision des Graminées* 2: 391, t. 109. 1831, *Hortus Mauritianus* 365. 1837, *Synopsis Plantarum Glumacearum* 1: 58, 62, 69. 1854, *Flora* 38: 195. 1855, *Journal of the Linnean Society, Botany* 24(164): 407–408, f. in Indonesia: au kawunga, rebha pereng-perengan

Brachyglottis Forst. & Forst.f. Asteraceae

From the Greek *brachys* 'short' and *glossa* 'a tongue', referring to the ligulate corollas of the ray florets, see *Charact. Gen.* 91, t. 46. 1776 and *Fl. New Zealand* 1: 757. 1961.

Brachyglottis repanda Forst. & Forst.f. (*Brachyglottis repanda* Forst.)

New Zealand. Small shrub, white felt covering the underside of the leaves, flower heads in branching clusters of small white daisy florets, leaves used as a substitute for toilet paper

See *Char. Gen. Pl.* 46. 1775 and *New Zealand J. Bot.* 11(4): 743. 1973

(Poisonous to stock, causing staggers; wild honey found near this plant is very poisonous. Leaves antiseptic, placed over the wounds, applied to boils as a poultice.)

in English: potato fern, the bushman's friend

Maori name: pukapuka, rangiora, wharangi

Brachylaena R. Br. Asteraceae

Greek *brachys* 'short' and *chlaena*, *chlaenion* 'cloak', the involucre is usually shorter than the florets, see *Observations on the Natural Family of Plants called Compositae* 115. 1817, *Trans. Linn. Soc. London* 12(1): 75–142. 1817 (publ. 25 Feb 1818) and *Kirkia* 7: 121–136. 1968.

Brachylaena discolor DC. (*Brachylaena natalensis* Sch. Bip.)

South Africa. Shrub or small tree, evergreen, silvery-blue, dense, spreading, single or multi-stemmed, hairy leaves silvery-white, nectar rich creamy-white flowers grouped together in large terminal panicles, male and female flowers borne on separate trees, leaves very bitter and unpalatable, bee tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 430. 1836, *Repertorium Botanices Systematicae*. 2: 972. 1843

(Leaves infusion a tonic for intestinal parasites, diabetes, to treat kidney conditions, for chest pain. Roots infusion an enema to stop bleeding of the stomach. Magic, ritual, roots and stem.)

in English: coast silver leaf, coast silver oak

in Southern Africa: bosvaalbos, iPhahla, isiPhaluga, kreu-
kelboom, kusvaalbos, lepelboom, mphahla, muAkawura,
muPasa, phahla, umDuli, umPhahla, vaalbos

Brachylaena ilicifolia (Lam.) E. Phillips & Schweick.
(*Baccharis ilicifolia* Lam.; *Brachylaena ilicifolia* Phill.
& Schweick.; *Brachylaena racemosa* (Thunb.) DC.;
Brachylaena racemosa (Thunb.) Less.; *Brachylaena rac-*
emosa Less.; *Tarchonanthus racemosus* Thunb.)

South Africa.

See *Bothalia* iii. 212. 1937

(Veterinary medicine, leaves for diarrhea.)

in English: small bitter-leaf

in Southern Africa: bitterblaar, fynbitterblaar, iGqeba,
umgqheba, umPhahla

Brachystegia Benth. Fabaceae (Caesalpinaceae, Detarieae, Leguminosae)

The name is based on Greek *brachys* 'short, flattened' and *steges*, *stegos* 'roof, cover', possibly referring to the small bracteoles, see *Gen. Pl.* [Bentham & Hooker f.] 1(2): 582. 1865 [19 Oct 1865].

Brachystegia boehmii Taub. (*Brachystegia boehmii* var.
katangensis (De Wild.) Hoyle; *Brachystegia ferruginea* De
Wild.; *Brachystegia ferruginea* var. *angustifoliolata* De
Wild.; *Brachystegia ferruginea* var. *interrupta* De Wild.;

1928, *Contrib. Fl. Katanga*, Suppl. 2, 47, 55. 1929, *Proc.*

& *Trans. Rhodesia Sci. Assoc.* 43: 16 (sphalm. Hopkinson).
1951, *Journal of Ethnopharmacology* 21: 253–277. 1987

(Roots decoction for sterility, infertility, impotence, stom-
achache; bark infusion laxative, for constipation, lumbago.)

in English: Prince of Wales' feathers, Prince of Wales' feath-
ers tree

in Malawi: mombo

in Southern Africa: muFuti, muPfute, muPfuti, umvombo

in Tanzania: chifula, mnyenye, mvomaro, myombo, myombro

in Zimbabwe: chabela, itshabela, muFute, mfuti, mupfuti,
muPombo, umTshabela

***Brachystegia eurycoma* Harms**

Tropical Africa. Tree

See *Botanische Jahrbücher für Systematik, Pflanzenge-
schichte und Pflanzengeographie* 49: 424. 1913

(Seeds and leaves anthelmintic.)

in Cameroon: ekop naga

in Nigeria: akolodo, okwein; akolodu (Yoruba); okwen (Edo);
eku (Ishan); akpakpa (Ijaw); achi (Igbo); ukung (Efik); etare
(Ekoi); kepuruk (Boki)

in Yoruba: akolo, eku, ojiji itakun

Brachystegia laurentii (De Wild.) Louis ex Hoyle
(*Brachystegia laurentii* (De Wild.) Hoyle; *Brachystegia lau-*
rentii (De Wild.) Louis ex J. Léonard; *Macrobium laurentii*
De Wild.)

Cameroon, Gabon. Perennial non-climbing tree

See *Flore du Congo Belge et du Ruanda-Urundi* 3: 461. 1952

(A remedy for severe cough. Veterinary medicine.)

in Cameroon: leke

in Congo: bokumbo, bomanga, laanga, manga, mu'ulu,
mubangu, mukulu, muti-a-milim

in Gabon: andoung, nzobeu

***Brachystegia nigerica* Hoyle & A.P.D. Jones**

Nigeria. Perennial non-climbing tree

See *Kew Bulletin* 2(1): 68–71. 1947, *International Journal of*
Medicinal Mushrooms 5: 313–319. 2003, *Afr. J. Biotechnol.*
2: 444–447. 2003, *Environmental Practice* 7(4): 246–256.
2005, *African Journal of Food Science* 3(1): 7–10. 2009

(Growth of the edible medicinal mushroom *Lentinus squar-*
rosulus (M.) Singer on sawdust.)

Brachystegia spiciformis Benth. (*Brachystegia appendicu-*
lata Benth.; *Brachystegia bragaei* Harms; *Brachystegia edu-*

Deng; *Brassaiopsis speciosa* Decne. & Planchon; *Hedera floribunda* Wallich ex G. Don, nom. illeg.; *Hedera glomerulata* (Blume) DC.; *Macropanax glomerulatus* (Blume) Miquel)

South and SE Asia. Small tree or large shrub, branches prickly, palmate digitate leaves, small white-greenish flowers in glomerulous heads, inflorescence terminal, subglobose fruits crowned by persistent style

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 872–873. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 265. 1830, *A General History of the Dichlamydeous Plants* 3: 394. 1834, *Flora van Nederlandsch Indië* 1(1): 764. 1855, *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 365. 1859, *Gartenflora* 12: 275, pl. 411. 1863, *Journal of Botany, British and Foreign* 2(22): 292. 1864 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 24(294): 143. 1914, *Notes from the Royal Botanic Garden, Edinburgh* 10(46): 11. 1917, *Sinensia* 3(8): 197. 1933, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 2: 57–58, f. 9. 1942, *Acta Botanica Yunnanica* 24(5): 604. 2002, *Phytochemistry Letters* 2(1): 29–33. 2009

(Bark used as tonic drug, antiinflammatory, antipyretic, diuretic, to treat rheumatism and back pain, to promote urination and assist in lactation; bark juice taken for digestion and to alleviate constipation; bark paste to treat bone fractures and sprains. Crushed leaves kept in bed to drive out bed bugs. Extracts of the leaves were found to inhibit aromatase.)

in China: luo san

in India: arti-sam-phru

in Nepal: kalo chuletro, seto chuletro

Brassaiopsis speciosa Decne. & Planch. var. *hirta* C.B. Clarke (*Brassaiopsis glomerulata* var. *hirta* (C.B. Clarke) Mahesw.)

India. Tender bitter leaves eaten

See *The Flora of British India* 2: 737. 1879 and *Bulletin of the Botanical Society of India* 2: 375. 1960

(Leaves with rice to cure diarrhea, stomachache, throat pain.)

in India: tago

Brassica L. Brassicaceae (Cruciferae)

From *brassica*, *ae*, the Latin classical name for cabbage (Plinius, T. Maccius Plautus); see Carl Linnaeus, *Species Plantarum*. 2: 666–668. 1753, *Genera Plantarum*. Ed. 5. 299. 1754, *Genera Plantarum* 237. 1789, *Outlines of Botany* 854, 1093, 1123. 1835, *Edinburgh New Philosophical Journal* 24: 416. 1838 and *Fieldiana, Bot.* 24(4): 354–380. 1946, *Ann. Missouri Bot. Gard.* 35(1): 99–106. 1948. All these vegetables are capable of forming toxic quantities of SMCO, a chemical that can cause hemolytic anemia in livestock. These plants also contain glucosinolates, which can cause goiter. In general, these widely used vegetables are safe for human consumption. Cases of livestock poisoning occur when they are used almost exclusively as fodder for animals. SMCO is most abundant in young leaves and growing points. There is some confusion in the literature about mustards.

Brassica campestris L. var. *sarson* Prain (*Brassica rapa* L. subsp. *sarson* (Prain) Denford; *Brassica rapa* var. *sarson* (Prain) Mehrotra & Aswal)

India.

See *Agric. Ledger* 5: 24 (tt. 5–7). 1898 and *Bot. Not.* 128: 456. 1975, *Journal of Economic and Taxonomic Botany* 6: 587. 1985

(Oil from the seeds depurative, used as massage on chest for cough and cold. Ceremonial, seeds used in marriage ceremony.)

in India: sarsav, sarson

Brassica carinata A. Braun (*Brassica carinata* A. Braun; *Brassica integrifolia* (West) Rupr.; *Brassica integrifolia* (West.) O.E. Schulz, nom. illeg., non *Brassica integrifolia*

(H. West) Rupr.; *Brassica integrifolia* var. *carinata* (A. Braun) O.E. Schulz; *Sinapis integrifolia* West; *Sinapis integrifolia* Willd.)

Kenya, Ethiopia. Erect herb, often branched, yellow flowers borne in a long terminal inflorescence, capsule, small seeds, oil crop, leaves used as a vegetable, fodder for livestock, seeds to feed birds, a weed of cultivation, unclear taxonomic position and doubtful origin

See *Bidrag til Beskrivelse over Ste Croix ...* 296. 1793, *Flora* 24: 267. 1841, *Flora Ingrica* 1: 96. 1860 and *Symbolae Antillarum* 3(3): 509–511. 1903

(Seed to treat stomachache; seeds oil used for rubbing on the skin.)

in English: Abyssinian cabbage, Abyssinian mustard, African cabbage, Ethiopian cabbage, Ethiopian kale, Ethiopian mustard, Ethiopian rape, texsel greens

in Ethiopia: gomen zer

in Kenya: chinkongonyira, likabichi lya manyonyi kandhira, kanzira-sukuma

Brassica juncea (L.) Czern. (*Brassica integrifolia* O.E. Schulz; *Brassica integrifolia* (H. West) O.E. Schulz, nom. illeg., non *Brassica integrifolia* (H. West) Rupr.; *Brassica juncea* (L.) Hook.f. & Thomson; *Brassica juncea* (L.) Czern. & Coss.; *Brassica juncea* (L.) Coss., nom. illeg., non *Brassica juncea* (L.) Czern.; *Brassica juncea* var. *crispifolia* L.H. Bailey; *Raphanus junceus* (L.) Crantz; *Raphanus junceus* Crantz; *Sinapis integrifolia* H. West; *Sinapis integrifolia* Walp.; *Sinapis juncea* L.)

Cosmopolitan, Western and Central Asia. Erect, annual to biennial herb, glabrous

See *Species Plantarum* 2: 666–669. 1753, *Bidrag til Beskrivelse over Ste Croix ...* 296. 1793, *Consp. Pl. Charc.* 8. 1859, *Bulletin de la Société Botanique de France* 6: 609–610. 1860 [1859 publ. (Used in Ayurveda, Unani and Sidha. This plant can contain large quantities of toxins that are common to the genus

Brassica. Acute mustard seed toxicosis in beef cattle; oil cake poisonous to cattle. Anodyne, febrifuge, antidysenteric, aperient, diuretic, stomachic, emetic, diaphoretic, anthelmintic and rubefacient. Leaves applied to the forehead to relieve headache; leaves eaten in soups to treat bladder inflammation or hemorrhage. Seeds to treat abscesses, colds, arthritis, tumours, footache and sores, lumbago, rheumatism and stomach disorders; seed paste smeared on the forehead for headache; powdered or roasted seeds eaten for stomach pain; oil used against skin eruptions and ulcers; seeds decoction given in indigestion, cough; seed paste. Odor repellent to mosquitoes. Veterinary medicine, roots given to cows to promote milk production; crushed seeds to promote reproduction. Magico-religious beliefs, ritual, ceremonial, seeds used to perform rites to ward off evil eyes and spirits on children and cattle.)

in English: brown mustard, Chinese mustard, common Indian mustard, Dijon mustard, Indian mustard, Japanese greens, kai choy, leaf mustard, mustard cabbage, mustard greens, ostrich-plume, sarepta mustard, southern cole, swatow mustard

in Malawi: mpiru

in Nigeria: laulau

in Tanzania: haradali, mastadi

(Used in Ayurveda, Unani and Sidha. These plants can accumulate toxic quantities of SMCO (S-methyl-L-cysteine sulfoxide), which has poisoned several types of livestock after they have ingested sufficient quantities. Stimulant, diuretic, emetic, rubefacient, antidote, used externally for bronchitis and rheumatic pains. Crushed seeds infusion for liver pain; powdered seeds a tea for colds, fever and influenza; a decoction of the leaves or stems used in the treatment of cancer; fresh juice from bulb of *Allium cepa* and oil from *Brassica campestris* given to drink as an emetic in snakebite; seeds of *Raphanus sativus* boiled with *Brassica campestris* oil massaged on penis to cure impotency. Insecticide. Ritual, magico-religious beliefs, emotional, spiritual, seeds to avoid evil spirits; seeds used in birthday celebrations. Veterinary medicine, given to cows after delivery for the removal of placenta; leaf juice applied over wounds.)

in English: bird rape, bird's-rape, bird's-rape mustard, bok choi, bok choy, braze, caisim, caisin, celery cabbage, Chinese cabbage, field mustard, mustard, neep crops, pak-choi, pe-tsai, petsai, rape, rapeseed, turnip, turnip rape, white turnip, wild rape, wild turnip

Maori name: pohata

in China: song cai, huang ya bai cai, man jing, wu jing

in India: an-tam, antam, aukar, bangasarson, baralai, bhutaghana, bimbata, dain, dainlai, duradharsha, grahagna, grnjanakam, grunjanakam, jadiya, jariya, kadamba, kadambada, kadambaka, kadugu, kala-sarshapa, kalamohare, kalasarshapa, kalerai, kalisarson, kappusasoe, karupakatuka, karuppukkadugu, katukasveha, katusneha, katusveha, khardale-asvad, khardaleasvad, khetiya, lahi, lahota, lai, nalla avalu, nallaavalu, niuma, nuskar, rajakshavaka, rajika, rakshitaphala, rakta-sarshapa, raktasarshapa, roghan sarson, salgam, sarishapa, sarsapa, sarshapa, sarsive, sarson, sarsoon, shalgam, shalgom, sherasa, shulgam, siddhaartha, siddharthah, sidhaprayojana, sidhartha, sipandane-siyah, sipandane siyah, sorshey, tantubha, tantuka, til gogul, tukhm shalijam, tukhm shaljam, tuverika, ugragandha

in South Laos: bat huy (bat = weeds or edible herbs) (people Nya Hön)

in Tibetan: nyung-ma, yun ba, yums kar, yuns-dkar

in Congo: loundif

in South Africa: beesraap, raap, sweissoldeer, wilde raap

Breonadia Ridsdale Rubiaceae

The generic name probably after Jean Nicolas Bréon, 1785–1864, plant collector in Mauritius, author of *Catalogue des Plantes cultivées aux Jardins Botanique et de Naturalisation de l'Île Bourbon par N. Bréon*. Saint-Denis, Ile Bourbon 1825; see J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954, *Fl. Trop. E. Africa* 415–747. 1988.

Breonadia salicina (Vahl) Hepper & J.R.I. Wood (*Adina galpinii* Oliver; *Adina lasiantha* K. Schum.; *Adina lasiantha* var. *parviflora* Hochr.; *Adina microcephala* (Del.) Hiern; *Adina microcephala* var. *galpinii* (Oliv.) Hiern; *Adina spathellifera* (Baker) Oliv.; *Breonadia microcephala* (Del.) Ridsdale; *Breonadia salicina* var. *galpinii* (Oliv.) Hepper & J.R.I. Wood; *Cephalanthus coriaceus* K. Schum.; *Cephalanthus spathellifer* Baker; *Cephalanthus spathelliferus* Baker; *Galium proliferum* A. Gray; *Nauclea microcephala* Del.; *Nauclea verticillata* Baill.; *Nerium salicinum* Vahl) (*Adina* from the Greek *adinos* 'clustered, plentiful', in allusion to the clustered flowers)

Trop. & S. Africa. Shrub or tree, evergreen, single trunk, irregular canopy, verticillate coriaceous leaves green with pinkish patches on both sides, inconspicuous small fragrant yellowish

flowers in compound axillary spherical heads, yellow-brown fruiting heads, infructescences composed of numerous separate fruits, on rocky river bank, medium- and low-altitude riparian vegetation, in shade, on sandy soil by river

See *Species Plantarum* 1: 95, 105–108. 1753, *Symbolae Botanicae ...* 2: 45. 1791, *Flora Chilena* 3: 180. 1848, *Smithsonian Contributions to Knowledge* 3(5): 80. 1852, *Smithsonian Contributions to Knowledge* 5(6): 67. 1853, *Fl. Trop. Afr.* [Oliver et al.] 3: 40. 1877, *Journal of Botany, British and Foreign* 20: 137. 1882, *Pflanzenw. Ost-Afrikas*, C: 378. 1895, *Hooker's Icon. Pl.* 24: t. 2386. 1895, *Cat. Afr. Pl.* 1: 434. 1898 and *Annuaire Conserv. Jard. Bot. Genève* 11–12: 95. 1908, *Blumea* 22: 549. 1975, *Kew Bulletin* 36: 860. 1982, *Kew Bull.* 38: 85. 1983, *Journal of Ethnobiology and Ethnomedicine* 4: 10. 2008

(Bark for stomach problems and as children's tonic, bark soaked in water to prevent influenza and fever; a wash of the bark infusion a remedy for kwashiorkor and a protection against witches; stem bark anthelmintic; bark boiled with *Ocimum* leaves a remedy for headache. Bitter roots used to treat vertigo, chewed for colic. Leaves febrifuge. Wood used during traditional ceremonies, purification rites. Veterinary medicine, to treat livestock diseases.)

in English: African teak, Rhodesian redwood, Transvaal teak, wild oleander

in Ethiopia: erba

in Madagascar: soaravy, sohihy

in Nigeria: kadanyar rafi

in Southern Africa: basterkiaat, matome, matumi, mingerhout, mohlomê, umfomfo, water matumi, watermatoemie; muOnya, muWana, muWona (Shona); umHlume, umFula (Zulu); Thlume, umHlume (Swazi); mhlume (Tsonga); moh-lome (North Sotho); mutu-lume (Venda)

Breonia A. Rich. ex DC. Rubiaceae

See *Herb. Amb.* 3: 36, t. 19. 1743, *Mémoire sur la famille des Rubiacées* 21, 157–158, 210. 1830, *Prodr.* 4: 620. 1830, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 477. 1885, *Revis. A. Rich.; *Cephalidium*

citrifolium A. Rich.; *Nauclea citrifolia* Poir.; *Sarcocephalus richardianus* Baill.; *Sarcocephalus richardii* Drake)

Madagascar. Tree, fast growing, cylindrical bole, spreading branches, flowering heads terminal solitary, flowers in dense ball-like clusters, corolla yellow to orange, fruitlets fleshy

See *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 678. 1785, *Encycl.* (Lamarck) 4(2): 435. 1798, *Mémoire sur la famille des Rubiacées* 21, 157. 1830, *Mém. Soc. Hist. Nat. Paris*, v. 238, 290. 1834, *Repertorium Botanices Systematicae.* (Walpers) 2: 491. 1843, *Flora* 28: 231. 1845, *Adansonia* 12: 312. 1879, *Revis. Gen. Pl.* 1: 276. 1891, *Hist. Phys. Madagascar* 36: t. 457. 1897, *J. Linn. Soc., Bot.* 33: 35–36. 1898 and *Fl. Indo-Chine* 3: 33. 1922, *Adansonia*, n.s., 13: 472. 1973 [1974], *Blumea* 22(3): 545. 1975, *Adansonia*, sér. 3. 21(1): 93–95. 1999

(Used in Ayurveda. Bark scraped and mixed with water along with the scraped bark of *Dysoxylum variabile* Harms to treat severe boils. Bark febrifuge, tonic, astringent, for dysentery, snakebite; a paste of bark or root said to decrease fertility in women; bark juice given to treat syphilis. Leaves decoction for gargling in stomatitis, aphthae; extract of fresh leaves or powdered leaves with water given to children against intestinal worms; a poultice from the pounded leaf applied to the chest for fevers. For malaria, smear the leaves with coconut oil, heat, and apply hot to the abdomen.)

in English: Chinese anthocephalus, common bur-flower tree

in Brunei: bangkal, kaatoan bangkal

in East Asia: kadam, kaddam, kadam, laran

in India: apathyada mara, arisina thaega, atuthekku, bale, banphar, begada, dhaaruja kaare, dieng sohalngpathi, etthakada, halipriya, hellthaega, helthige, kaada balige, kada pode, kadabolige, kadaga, kadaha, kadahada, kadahada mara, kadam, kadamb, kadamba, kadamba mara, kadambah, kadambakamu, kadambam, kadambamu, kadambaryya, kadambe, kadambole, kadambu, kadamchal, kadappai, kadava, kadaval, kadavala, kadavara, kadayaala, kaddabailu, kadimi, kadubale, kadubalige, kaduve, kadvala, kadwal, kalamb, kalampam, kalempayan, kapam, karanapurakkiyam, karnapuraka, karnapurakam, katamba, katampa, katampacivam, katampai, katampam, katampamaram, katampu, katappai, katappaimaram, katappam, katarvayura, kathambu, katousjaka, kattuccakka, kattuchakka, kodawaala, kodeyaala, kodivaala, kokalamaram, kokali, kola aiyila, kolayilal, kucitam, kutsitangah, kuyilenamaram, laungchu-araung, mi bol, mogulu kadimi, neepamu, neeronje, neerpaala kadam-bamu, nhiv, nipa, niv, peddakambo, prenkhanamu, priyaka, priyakamu, rudraakshakamba, thole, vrattapuspa

in Indonesia: emajang, jaban, kelampajang, laran

in Malaya: kelampayan, kelapayan, kelempai, kelempayan, kelempoyan, kelepayan, kelumpang, kelumpang, kempoyan, kepayang kayu, laran, lempayang, lempoyan, selimpoh

in Nepal: kadam

in Papua New Guinea: gaping

in Philippines: kaatoan bangkal

in Sabah: laran

in Sarawak: selimpoh

in Thailand: krathum, krathum bok, takoo

in Tibet: ka da mba, ka da mpa

in Vietnam: c[aa]y g[as]o, c[af] tom, g[as]o tr[aws]ng

Brexia Noronha ex Thouars Celastraceae (Brexiceae, Escalloniaceae, Grossulariaceae, Saxifragaceae)

Greek *brecho* 'to rain', *brexis* 'rain', referring to the large and coriaceous leaves, see *Genera Nova Madagascariensia* 20. 1806, *A Voyage to Terra Australis* 2: 554. 1814 and *Bull. Soc. Bot. France.* 80: 198–214. 1933, *Adansonia*, Sér. 3 26(1): 67–81. 2004.

Brexia madagascariensis (Lam.) Ker Gawl. (*Brexia acanthifolia* Noronha; *Brexia acanthifolia* Noronha ex Tul.; *Brexia amplifolia* Noronha; *Brexia amplifolia* Noronha ex Tul.; *Brexia chrysophylla* Sweet; *Brexia digyna* Noronha ex Tul.; *Brexia digyna* Noronha; *Brexia heterophylla* Noronha ex Bojer; *Brexia heterophylla* Bojer; *Brexia madagascariensis* Thou. ex Ker Gawl.; *Brexia madagascariensis* Thouars; *Brexia madagascariensis* var. *mossambicensis* Oliv.; *Brexia microcarpa* Tul.; *Brexia ovatifolia* Noronha; *Brexia ovatifolia* Noronha ex Tul.; *Brexia serrata* Presl; *Brexia spinosa* Lindl.; *Brexia spinosa* Spreng.; *Brexia spinosa* Colla; *Clavija serrata* (Hoffmanns.) Mez; *Theophrasta serrata* Hoffmanns.; *Thomassetia seychellana* Hemsl.; *Thomassetia seychellarum* Hemsl.; *Venana madagascariensis* Lam.)

Madagascar. Shrub or small tree, much-branched, dense, evergreen, thick leathery leaves, flowers in loose branched clusters beside leaves, spreading thick fleshy curling backwards petals pale yellow or green-white, woody fibrous fruits, dark seeds, ripe fruit edible, along the coasts, edges of saline water, swamp forest, mangrove swamps

See *Botanical Register*; consisting of coloured ... 9, t. 730. 1823, *Hortus Mauritianus* 52. 1837 and *Hooker's Icones Plantarum* 28: t. 2736. 1902

(Roots boiled and the liquid drunk to treat stomachache and yaws.)

in Madagascar: voakarepokala, voalava, voambilanona, voananana, voantalanona, voatalagna, voatalegny

in Tanzania: mfukufuku, mfurugudu, mkurufu, mkuvufu, mpumbuti

Breynea Forster & Forster f.
Phyllanthaceae (Euphorbiaceae)

In honor of the naturalist Jacob (Jakob) Breynia (Breynius), 1637–1697, merchant in Danzig and botanical collector, and his son Johann Philipp Breynia, 1680–1764, botanist and physician in Danzig. See J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 145–146, t. 73. (Nov.) 1775, *Introductio ad Historiam Naturalem* 98. 1777, *Linnaea* 32: 74. 1863, P. MacOwan, “Personalia of botanical collectors at the Cape.” *Trans. S. Afr. Philos. Soc.* 4(1): xxxiii–xxxiv. 1884–1886 and H.N. Nat. Hist. Mus. Lond. (Bot.)* 28(2): 67–113. 1998.

***Brillantaisia cicatricosa* Lindau**

Tanzania. Herbaceous shrub, scandent, lianescent, straggling, flowers purple to green, inflorescence axillary

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 4. 1895 and *African Study Monographs* 19(1): 13–33. 1998

(Leaves decoction for malaria, snakebite, insect sting, fevers, enema, kwashiorkor, colic, psychosis, cicatrizing effect, antivenomous, antiinflammatory, antinecrosis, antiedema. Magic, ritual, psychosis, against bad spirits, spell, stems with leaves. Veterinary medicine, for snakebites, grass tetany also called grass staggers and wheat pasture poisoning.)

in Burundi: igihoza, ikivusa

in Congo: ikirogora, majoka-joka, mbobo, mushegemanjoka, namadwi

in Rwanda: ikigorora, ikirogora

***Brillantaisia kirungae* Lindau (*Brillantaisia ulugurica* Lindau)**

Tanzania. Robust herb, shrub, sparingly branched, gorilla foods

See *Bot. Jahrb.* 22: 112. 1895

(Antimicrobial.)

in Cameroon: noukango

***Brillantaisia lamium* Benth. (*Leucorhaphis lamium* Nees)**

Tropical Africa. Herb, glandular-pilose, coarse, erect, straggling, weed, rooting at lower parts, blue flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 97. 1847, *Niger Fl.* [W.J. Hooker]. 477. 1849 [Nov–Dec 1849]

(Leaves decoction antiinflammatory.)

***Brillantaisia nitens* Lindau**

Cameroon. Multi-branched shrub or small tree, quadrangular, herbaceous, erect, straggling, weed, glandular pubescent, flowers blue-purple

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 102. 1893 and *Internat. J. Epidemiology* 27: 181–185. 1998, *Journal of Ethnopharmacology* 111(1): 104–109. 2007, *Pharmacologyonline* 1: 495–510. 2007

(Leaves for diarrhea, yaws, skin infections, pain, toothache. Dried leaves decoction vasorelaxant, hypotensive, used for the treatment of cardiovascular disorders, especially hypertension.)

in Nigeria: ogwumadibia

***Brillantaisia owariensis* P. Beauv. (*Brillantaisia bauchiensis* Hutch. & Dalziel; *Brillantaisia madagascariensis* T. Anderson ex Lindau; *Brillantaisia nitens* Lindau; *Brillantaisia nyanzarum* Burkill; *Brillantaisia vogeliana* (Nees) Benth.; *Brillantaisia vogeliana* Benth.)**

Tropical Africa, Nigeria. Perennial shrub, erect, herbaceous, woody based, stout, papery leaves, winged petioles, blue-purple flowers

See *Niger Fl.* [W.J. Hooker]. 477. 1849, *Bot. Jahrb. Syst.* xvii (1893) 102–103. 1893, *Fl. Trop. Afr.* [Oliver et al.] 5(1): 39. 1899 and *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] 2: 253–254. 1931

(Roots and leaves stomachic, cathartic.)

***Brillantaisia palisotii* Lindau**

Tropical Africa.

See *Bot. Jahrb. Syst.* 17: 99. 1893 and *Journal of Ethnopharmacology* 102(3): 377–381. 2005

(Stem extracts antinociceptive, peripheral and spinal analgesic activity; leaves antiinflammatory and antinociceptive.)

***Brillantaisia patula* T. Anderson (*Brillantaisia alata* T. Anderson ex Oliv.)**

Gabon. Shrubby, robust

See *Journal of the Linnean Society, Botany* 7: 21. 1863 and *Ethnopharmacologia* 26: 23–30. 2000, *International Journal of Botany* 4(2): 176–185. 2008

(Leaves decoction antiinflammatory, sedative, for respiratory diseases, chest pain, asthma, yaws, diarrhea, anemia, toothache, malaria, arthritis, rheumatism, infertility and sterility, to ease childbirth and for menstrual pains and stomachache; leaves juice analgesic and psychotropic, for cardiac pain, gastritis, bronchitis, cough, epilepsy, convulsion, psychosis. Magical power, to exorcise evil spirits.)

in Congo: dilelembe, leelemba, lelembe, lembelembe, lementoko, malee-lembe, mbuli, muinmunene, muinwamula, nvuli, poli, yeko

in Gabon: délèmbètogo, dilèmbètogo, èèmbèmbè-a-pombo, élèm-betogo-a osongo, élèmbotogo, gitotu-gilèmba, givola-gilèmba, ilèmbotogo-inomé, ivola-ilèmba, iwèlè-wèlè, lèmba, lembe-lembe, lèmbè-lembe, lèmbè-lèmbè-ny'opomlo, lilèmbètogo la bavili, nyar-élöc

in Nigeria: owo

Brillantaisia vogeliana Benth. (*Brillantaisia preussii* Lindau; *Leucorhaphis vogeliana* Nees)

Tropical Africa. Erect herb, quadrangular, axillary terminal paniculate inflorescence, purplish blue flowers, leaves browsed by sheep and goats

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 97. 1847, *Niger Fl.* [W.J. Hooker]. 477. 1849 [Nov–Dec 1849], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 100. 1893

(Mild laxative, leaves eaten by pregnant women to increase the flow of urine.)

Brodiaea Sm. Asparagaceae (Alliaceae, Liliaceae)

For a Scottish plantsman, James Brodie, 1744–1824 (d. Elgin), algologist, 1795 Fellow of the Linnean Society, 1797 Fellow of the Royal Society; see Lewis Weston Dillwyn (1778–1855), *British Confervae*. London [1802–] 1809, James Sowerby (1757–1822) and J.E. Smith, *English Botany, or Coloured Figures of British Plants*. London 1790–1814, *Parad. Lond.*: t. 98. 1808, *Trans. Linn. Soc. London* 10(1): 2, t. 1. 1810, *Edwards's Bot. Reg.* t. 1590. 1833, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 469–470. 1843, *Bergen's Elements of Botany*: key and flora: Pacific Coast Edition. Boston, 26. 1897–1901 [Alice Eastwood, Joseph Young Bergen] and *Univ. Calif. Publ. Bot.* 60: 48. 1971, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 69. 1989, James C. Hickman, ed., *The Jepson Manual: Higher Plants of California*. 1180. Berkeley 1993.

Brodiaea californica Lindl. ex Lem. (*Brodiaea californica* (Torr.) Jeps., nom. illeg.; *Brodiaea californica* Jeps.;

Brodiaea californica Lindl.; *Hookera californica* (Lindl.) Greene; *Hookera californica* (Lindl. ex Lem.) Greene; *Hookera californica* Greene)

North America, California.

See *Journal of the Horticultural Society of London* 4: 84. 1849, *Fl. Serres Jard. Eur.* 5: 428b. 1849, *Bull. Calif. Acad. Sci.* 2(6): 136. 1886 [1887 publ. 1886] and *A Flora of Western Middle California* [Jepson], ed. 2. 101. 1911

(Reported the bulb is poisonous.)

Brodiaea coronaria (Salisb.) Engl. (*Brodiaea coronaria* Jeps.; *Brodiaea coronaria* (Salisb.) Jeps.; *Brodiaea coronaria* (Salisb.) Hort.; *Hookera coronaria* Salisb.)

North America, British Columbia. Perennial herb, corms eaten

See *Parad. Lond.*: t. 98. 1808, *Trans. Linn. Soc. London* 10: 2. 1810, *Revis. Gen. Pl.* 2: 712. 1891, *Vilm. Blumengärtn.*, ed. 3. 1: 1116. 1895 and *Madroño* 1: 61. 1917

(Tonic.)

in English: crown brodiaea

Brodiaea coronaria (Salisb.) Engl. subsp. ***coronaria*** (*Brodiaea grandiflora* Sm., nom. illeg.; *Brodiaea grandiflora* (Lindl.) J.F. Macbr.; *Hookera grandiflora* (Sm.) Kuntze; *Hookera grandiflora* Kuntze)

North America, British Columbia. Perennial herb, corms eaten by sheep

See *Trans. Linn. Soc. London* 10: 2. 1810, *Revis. Gen. Pl.* 2: 712. 1891

(Tonic, stomachic.)

in English: crown brodiaea, harvest clusterlily

Brodiaea elegans Hoover

North America. Perennial herb, long narrow basal leaves, trumpet-shaped purple to violet flowers on a leafless stalk, food

See *Amer. Midl. Naturalist* 22(3): 555–558. 1939

(Tonic, stomachic.)

in English: elegant brodiaea, grass nuts, harvest brodiaea

Brodiaea elegans Hoover subsp. ***elegans*** (*Brodiaea coronaria* var. *mundula* Jeps.; *Brodiaea elegans* subsp. *hooveri* T.F. Niehaus; *Brodiaea elegans* Hoover var. *mundula* (Jeps.) Hoover)

North America. Perennial herb, food

See *Fl. Calif.* [Jepson] 1: 287. 1921, *Amer. Midl. Naturalist* 22(3): 555, 557. 1939, *University of California Publications in Botany* 60: 48, f. 11, 12a-d. 1971, *Plant Life* 29: 47. 1973

(Tonic, stomachic.)

in English: elegant brodiaea, harvest brodiaea

Brodiaea minor (Benth.) S. Watson (*Brodiaea grandiflora* (Lindl.) J.F. Macbr. var. *minor* Benth.; *Brodiaea minor* S. Watson; *Brodiaea minor* (Benth.) S. Kunze; *Hookera minor* Kuntze; *Hookera minor* Britton ex Greene; *Hookera minor* (Benth.) Britten ex Greene; *Hookera minor* (S. Watson) Britten ex Greene; *Hookera minor* var. *multiflora* Britten; *Hookera purdyi* A. Heller)

North America. Perennial herb, food

See *Pl. Hartw.*: 340. 1857, *Proc. Amer. Acad. Arts* 45: 236. 1870, *J. Bot.* 24: 51. 1886, *Bulletin of the California Academy of Sciences* 2(6): 136. 1886 [1887 publ. 1886], *Revis. Gen. Pl.* 2: 712. 1891, *Man. Bot. San Francisco* 318. 1894, *Proc. Calif. Acad. Sci.*, II, 6: 427, pl. 58. 1896 and *Muhlenbergia* 6: 83. 1910, *Amer. Midl. Naturalist* 22: 566. 1939

(Tonic, stomachic.)

in English: vernalpool brodiaea, vernalpool clusterlily

Bromelia L. Bromeliaceae

After the Swedish botanist Olof Bromel (Olaus Bromelius), 1629 (1639?)–1705, physician in Göteborg, among his writings are *Disputatio medica inauguralis, de lumbricis terrestribus* illorumque in medicina proprietatibus atque recto usu. Lugduni Batavorum 1673, *Chloris gothica*. [Göthenburg] 1694 and *Catalogus generalis*. Gothoburgi [1698], he was the father of the Swedish geologist and mineralogist Magnus von Bromell (Bromelius 1679–1731, d. Stockholm); see Plumier, Charles (1646–1704), *Nova plantarum americanarum genera*. Parisiis, 1703 [“*Catalogus plantarum americanarum, quarum genera in Institutionibus rei herbariae jam nota sunt, quasque p. Carolus Plumier ... descripsit & delineavit in insulis americanis.*”], Dillenius, Johann Jakob (1684–1747), *Hortus Elthamensis*, seu *Plantarum rariorum quas in horto suo Elthami in Cantio coluit vir ornatissimus et praestantissimus Jacobus Sherard ... Londini, 1732, Species Plantarum* 1: 285. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Familles des Plantes* (Adanson) 2: 67, 591. 1763, *The Gardeners Dictionary: ... eighth edition* 1. 1768, *De Fructibus et Seminibus Plantarum...* 1: 30. 1788, *Genera Plantarum* 49–50. 1789, *Analyse des Familles de Plantes* 54. 1829, Beer, Johann Georg (1803–1873), *Die Familie der Bromeliaceen* 16, 35–36. Wien, 1856 [1857 publ. Sep–Oct 1856], *Gartenflora* 17: 67. 1868, *La Belgique Horticole* 22: 131. 1872, *Handbook of the Bromeliaceae* 13. 1889, *Flora Brasiliensis* 3(3): 185. 1891, *Monographiae Phanerogamarum* 9: 12–13. 1896 and *Rep. Bot. Exch. Cl. Brit. Isles* 3: 432. 1913, *Fieldiana, Bot.* 24(1): 380–476. 1958, *Fl. Neotrop.* 14(3): 1493–2142. 1979, Sten Lindroth, in *D.S.B. (or Dictionary of Scientific Biography. Editor in Chief Charles Coulston Gillispie.)* 2: 490. New York 1981, *Novon*

2(3): 235. 1992, *Fl. Mesoamer.* 6: 148–150. 1994, *Selbyana* 16(2): 230–234. 1995.

Bromelia pinguin L. (*Agallostachys antiacantha* (Bertol.) (Injuries caused by stout recurved spines. Fruits vermifuge.)

in English: pinguin, wild pineapple

in Guatemala: muta

in Mexico: aguama, guamara

in South America: maya, piña corredora, piña de garrobo, piñuela, piñuela casera, pinguin, piro

in Venezuela: chigue-chigue

Bromheadia Lindley Orchidaceae

After Sir Edward Thomas Ffrench (French) Bromhead, Bart., 1789–1855 (Thurlby Hall, Newark, Notts), the second baronet of the family, High Steward of Lincoln, 1817 a Fellow of the Royal Societies of London and Edinburgh, 1844 Fellow of the Linnean Society, a member of Gonville and Caius Colleges at Cambridge, in 1813 was called to the bar, wrote *Attempts at Christian Psalmody*. Lincoln [1853], *Bromhead's Fireside A B C Book*. Lincoln [1853] and *The*

Remains of Stesichorus, in an English version. 1849, a friend of Lindley; see J. Lindley, in *Edwards's Botanical Register*. 27: misc. p. 89. 1841.

Bromheadia finlaysoniana (Lindl.) Miq. (*Bromheadia finlaysoniana* Rchb.f.; *Bromheadia finlaysoniana* (Lindl.) Rchb.f.; *Bromheadia finlaysoniana* var. *palustris* (Lindl.) J.J. Sm.; *Bromheadia palustris* Lindl., nom. illeg., nom. superfl.; *Bromheadia palustris* var. *papuana* J.J. Sm.; *Bromheadia sylvestris* Ridl.; *Coelogyne caulescens* Griff.; *Grammatophyllum finlaysonianum* Lindl.)

Vietnam, New Guinea, SE Asia.

See *Gen. Sp. Orchid. Pl.* 173. 1833, *Fl. Ned. Ind.* 3: 709. 1859, *Annales Botanices Systematicae* 6(4): 630–882. 1863, *Ann. Bot. Syst.* (Walpers) 6(6): 882. 1864, *J. Linn. Soc., Bot.* 28: 337. 1891 and *Nova Guinea* 8: 26. 1909, *Pharmaceutical Biology* 11(2): 1727–1734. 1971

(Rheumatism and pain in the joints, roots decoction, both internal and external treatment; male root tonic.)

Bromus L. Poaceae (Gramineae)

Latin and Greek *bromos* 'oats' (Hippocrates, *De victus ratione*. 2.43, Plinius, etc.); see Carl Linnaeus, *Species Plantarum*. 76. 1753, *Genera Plantarum*. Ed. 5. 33. 1754 and *Contr. U.S. Natl. Herb.* 24(8): 291–556. 1927, *Publ. Mus. Michigan State Univ., Biol. Ser.* 3(5): 465–519. 1968, *Fl. Patagónica* 3: 77–93. 1978, *Caldasia* 15(71–75): 15–34. 1986, *Gayana, Bot.* 43(1–4): 47–110. 1986, *Blumea* 35: 483–497. 1991, *Darwiniana* 35(1–4): 75–114. 1998, *Contr. U.S. Natl. Herb.* 48: 154–191. 2003. Genus taxonomically difficult, confused with *Festuca* and *Helictotrichon*, very similar to *Poa*.

Bromus carinatus Hook. & Arn. (*Bromus californicus* Nutt. ex Buckley; *Bromus carinatus* var. *californicus* (Nutt. ex Buckl.) Shear; *Bromus carinatus* var. *californicus* Shear; *Bromus carinatus* var. *densus* Shear; *Bromus carinatus* var. *hookerianus* (Thurb.) Broussonetia papyrifera (L.) L'Hér. ex Vent. (*Broussonetia papyrifera* Vent.; *Broussonetia papyrifera* (L.) Vent.; *Morus papyrifera* L.; *Papyrius papyrifera* (L.) Kuntze; *Smithiodendron artocarpioides* Hu)

China, Japan. Treelet or shrub, woody vine or climbing, latex white, light to dark green foliage, flowers in elongate male spikes and female axillary globose heads, steamed young leaves eaten, sweetish fruits edible, leaves fed to pigs and to silkworms

See *Species Plantarum* 2: 986. 1753, *Revisio Generum Plantarum* 2: 629. 1891 and *Sunyatsenia* 3(2–3): 106–109, pl. 6. 1936, *Bishop Museum Bulletin in Anthropology* 7: 1–55. 1997

(Stem bark hemostatic, antioxidant, antifungal; bark decoction for ascites, to reduce swelling or edema; ash of burnt tapa for treating thrush. Slimy sap laxative and vulnerary, used externally for neurodermatitis, tinea infection, eczema, bee sting, insect bites. Leaves antidiarrheal, hemostatic, astringent, stomachic, for hemorrhage, uterine bleeding, excess menstrual bleeding, bleeding stomach, bleeding wounds, dysentery, enteritis; rushed leaves infusion taken as a potion for treating stomach pains and abdominal pains; leaf juice diaphoretic, astringent and laxative, also used in the treatment of dysentery, poulticed onto various skin disorders and bites. Fruit diuretic, ophthalmic, stimulant, stomachic and tonic; prolonged ingestion of the fruits said to weaken the skeletal structure. Root cooked with other foods as a galactagogue. Bark cloth used ceremonially, in burial wrapping and other funerary customs.)

in English: paper mulberry, tapa-cloth-tree

in China: chu, chu shi, chu shi zi, chu tao, gou shu, gu shi, ku shu

in India: jangali toot, kaagada uppu naerale, kaagda

in Japan: kabigi, kaji-no-ki (ki = tree)

in Pacific: ai masi, aute, hiapo, lafi, po'a'aha, tutu, u'a, ute, wauke

in Taiwan: lu-a-shu

in Thailand: por-gra-saa, por-saa, ton-saa

Brownea Jacq. Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

Named after the Irish naturalist Patrick Browne, c. 1720–1790 (Rushbrook, Co. Mayo), physician, M.D. Leyden 1743, friend of Linnaeus, explorer, plant collector, 1746–1755 on the Caribbean islands, author of *The civil and natural history of Jamaica in three parts*. [The third part mentioned in the title was never published.] London 1756. See *Iter Hispanicum* 229, 278. 1758, *Enum. Syst. Pl.* 6, 26. 1760, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 349. 1790 and *Contr. U.S. Natl. Herb.* 18(4): 143–171. 1916, *Ann. New York Acad. Sci.* 35(3): 101–208., *Ann. Missouri Bot. Gard.* 38(1): 1–94. 1951, J.H. Barnhart, *Biographical Notes upon Botanists* 1: 265. 1965, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 70. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 686. 1993.

Brownea ariza Benth. (*Brownea ariza* Lindl. ex Paxton; *Brownea princeps* Linden; *Brownea princeps* Linden ex Otto; *Brownea rosa-de-monte* Bergius; *Hermesias ariza* Kuntze)

South America, Venezuela, Colombia. Perennial non-climbing tree, bright red flowers

See *Phil. Trans.* (1771) 171. t. 8, 9. 1771, *Plantas Hartwegianas imprimis Mexicanas* 171. 1845, *Allg. Gartenzeitung* (Otto & Dietrich) 23: 147. 1855, *Revisio Generum Plantarum* 1: 191. 1891

(Flowers infusion drunk as emetic, to regulate menstrual disorders and bleeding.)

in Spanish: ariza, arizá, caleno, palo de cruz

Brownea coccinea Jacq. subsp. *capitella* (Jacq.) D. Velasquez & Agostini (*Brownea capitella* Jacq.; *Brownea coccinea* subsp. *capitella* (Jacq.) D. Velasquez; *Brownea latifolia* Jacq.; *Brownea racemosa* Jacq.; *Hermesias capitella* (Jacq.) Kuntze; *Hermesias latifolia* (Jacq.) Kuntze; *Hermesias racemosa* (Jacq.) Kuntze)

South America. Perennial non-climbing tree or shrub, red flowers, mucilage in flowers

See *Selectarum Stirpium Americanarum Historia* ... 194–195, pl. 121. 1763, *Fragmenta Botanica* 25–26, pl. 16–19. 1809, *Revisio Generum Plantarum* 1: 191. 1891 and *Novon* 2(2): 173–175. 1992

(Abortifacient, astringent, febrifuge. Flowers infusion for amenorrhea, colds, cough; root infusions for influenza, hypertension, scorpion stings. Bark applied fresh to bleeding wounds. Cooked fruit for fever.)

in English: Cooper hop, lantern brownea, mountain rose, rose of Venezuela, scarlet brownea, scarlet flamebean

Brucea J.F. Miller Simaroubaceae

For the Scottish explorer James Bruce, 1730–1794 (Kinnaird), botanical collector, traveller in Africa, 1776 Fellow of the Royal Society of London, the first European to set out in search of the source of the Nile, he did discover the source of the Blue Nile (but not the true Nile as he claimed), author of *Travels to discover the source of the Nile in the years 1768, 1769, 1770, 1771, 1772 and 1773*. [First Edinburgh Edition.] Edinburgh 1790. See *Icones Animalium et Plantarum* t. 25. 1779, Richard Wharton, *Observations on the authenticity of Bruce's Travels in Abyssinia*. Newcastle upon Tyne 1800, Alexander Murray (1798–1838), *Account of the life and writings of James Bruce*. [or rather, by H. Salt, with considerable additions and emendations by A. Murray.] Edinburgh 1808, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 209. 1811, John Stackhouse (1742–1819), *Extracts from Bruce's Travels in Abyssinia* Bath 1815, Sir Francis Bond Head (Major), *The life of Bruce, the African traveller* London 1830, Sir Robert Lambert Playfair, *Travels in the footsteps of Bruce in Algeria and Tunis* London 1877 and J.H. Barnhart, *Biographical Notes upon Botanists* 1: 266. 1965, Bert Hansen, in *D.S.B.* 2: 530. 1981, *Chemistry & Biodiversity* 6(1): 57–70. 2007.

Brucea antidysenterica J.F. Mill. (*Brucea antidysenterica* Lam.; *Brucea erythraeae* Chiov.; *Brucea ferruginea* L'Hér.; *Brucea salutaris* A. Chev.; *Trichilia siderotricha* Chiov.)

Old World tropics, Abyssinia. Shrub or treelet, male and female flowers in separate inflorescences in compact clusters, flowers brownish green, bitter fruit

See *Encyclopédie Méthodique, Botanique* 1: 471. 1785, *Cimelia Botanica*, t. 25. 1796 and *Antimicrob. Agents Chemother.* 22(2): 342–345. 1982, *J. Nat. Prod.* 49(3): 428–434. 1986, *Journal of Natural Products* 58(12): 1915–1919. 1995

(Fruit poisonous or repellent, toxic to livestock, especially sheep; crystals of calcium oxalate present in the bark, leaves and roots. Leaves amebicidal, febrifuge, astringent, stomachic, used to treat parasitic skin diseases, dysentery, diarrhea, dropsy, swellings, edema, pulmonary troubles. Roots for venereal diseases, sores, rabies, malaria; root bark antimicrobial, antineoplastic, cytotoxic antileukemic. Bark, fruit and roots anthelmintic, febrifuge, used against dysentery. Bark, fruit, seeds, leaves and roots (sometimes boiled) used as a remedy for diarrhea, indigestion and stomachache. Leaves and roots cooked with meat, or infused with milk (for children) to relieve asthma. Veterinary medicine, fruits, leaves and twigs used on skin galls and sores, and the powdered leaves to relieve bloating and colic in cattle.)

in Tanzania: engilelekuru, ijinanguve, mchumbavai

Brucea ferruginea L'Hér.

Tropical Africa.

See *Stirpes Novae aut Minus Cognitae* 19. 1785

(Leaves for fevers, constipation, stomachache.)

Brucea javanica (L.) Merr. (*Brucea amarissima* (Lour.) Desv. ex Gomes; *Brucea amarissima* (Lour.) Gomes; *Brucea amarissima* (Lour.) Merr.; *Brucea amarissima* Merr.; *Brucea amarissima* Desv. ex Gomes; *Brucea sumatrana* Roxb.; *Gonus amarissimus* Lour.; *Rhus javanica* L.)

India, Indonesia, China, Vietnam. Small tree or shrub, leaves compound, tiny purple flowers, petals villous, ovary with 4 free carpels, fruit a drupe, cotyledons contain abundant oil, one single seed, aromatic dried fruit black

See *Species Plantarum* 1: 265–267. 1753, *Flora Cochinchinensis* 641, 658. 1790, *Hortus Bengalensis*, or a catalogue ... 12. 1814, *Mem. Acad. Sc. Lisboa* n.s., iv. pars 1, 30. 1872 and *Phil. J. Sci.* 7: 413–415. 1912, *Philipp. J. Sci.*, C 10: 18. 1915, *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 611. 1917, *Journal of the Arnold Arboretum* 9(1): 3. 1928, *J. Econ. Taxon. Bot.* 10(1): 155. 1987, *J. Cytol. Genet.* 25: 36–42. 1990

(Amebicidal, bitter, febrifuge, antiperiodic, astringent, toxic, stomachic, used to treat dysentery, diarrhea, dropsy, swellings, malaria, edema, pulmonary troubles. For scurf, remittent fever, pound the leaves and apply as a poultice; astringent leaves for dysentery. Swallow seeds from ripe fruits to cure malaria. Fresh fruits for stomachache; fruit powder for dysentery, diarrhea; fresh fruits of *Rhus javanica* taken against stomachache and dysentery. Fruit and roots in amebic dysentery, cholera, malaria, hemorrhoids, ulcers; roots decoction

a remedy for internal poisoning, abdominal pains, coughs. Insecticide. Magico-religious beliefs, in India, Arunachal Pradesh, people avoid burning the plant as they are afraid of the sound produced by it.)

in English: Java brucea, kosam, kosam seed, Macassar kernels

in Cambodia: damli thnang, pramat monus

in China: ya dan zi

in India: heining, khawm ham, tamo, tsohmhu

Seu Solanorum historiae editionis secundae summarium, ad characteres differentiales redactum, seriem naturalem, habitationes stationesque specierum breviter indicans 6. 1816, *A General History of the Dichlamydeous Plants* 4: 475. 1838, *Gartenflora* 42: 33. 1893 and *Flora de Veracruz* 49: 1–191. 1986, *Guía de Árboles de Bolivia* 1–958. 1993

(Flowers and fruits hallucinogenic, said to be toxic, poisonous. Leaves and flowers used for asthma, respiratory

congestion with fever; fresh leaves applied as poultice on bruises and contusions; leaves boiled in mustard oil and applied thoroughly on and around neck and chest to get relief from severe cough and cold. Bark scraped poultice applied to bone breaks, sprains, aching body parts; bark scraped and cold infusion drunk to sleep, scraped bark infusion (cold water) drunk once a day for body pain. Veterinary medicine, given to lazy dogs to make them good hunters.)

in English: angel's trumpet, moonplant

in South America: campanilla, chocho pana, diego de noche, flor de campana, floripan, floripon, floripondia, floripondio, guantu, guantug, huandue, lumucha wandu, magia floripondia, maikiua, maíkua, maricawa, tzajal kampananichim, wahashupa, xupú

in Bali: bungan kecubung

in India: dattura, dhatura, dhokrey phul, dodda ummatthi gida, slatohtoh

in Indonesia: kecubung, kecubung hutan

in Japan: kidachi-chôsen-asa-gao, kiuyu

Bruguiera Sav. Rhizophoraceae

The generic name honors the French botanist and traveler Jean Guillaume Bruguère, 1750–1798, who took part in the Kerguelen Expedition to Antarctic islands (discovered in 1772 by the French navigator Yves-Joseph de Kerguelen-Trémarec (1745–1797) and later explored by the British explorer Captain James Cook), his writings include *Histoire naturelle des vers*. (tom 2, 3. par Bruguère et De Lamarck, continuée par Mr. G.P. Deshayes) Paris [1789-] 1792 and *Vers, coquilles, mollusques et polypiers*. Paris 1827. See *Tableau Encyclopédique et Méthodique ... Botanique*, pl. 397. 1793, *Encyclopédie Méthodique, Botanique* (Lamarck) 4(2): 696. 1798, Georges Léopold Chrétien Frédéric Dagobert Cuvier, (1769–1832), *Notice biographique sur Bruguères, etc.* [Rapport général des travaux de la Société Philomatique de Paris] [1799], *Genera Nova Madagascariensia* 21. 1806, J.D. Hooker, *Observations on the Botany of Kerguelen Island*. [Royal Society of London. Philosophical Transactions. Vol. CLXVIII.] London 1879 and G.A. Doumani, ed., *Antarctic Bibliography*. Gard.* 85(1): 494–496. 2001.

Brunellia colombiana Cuatrec.

South America, Colombia.

See *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 5: 33, f. 20–22. 1942

(The smoke is irritant.)

Vernacular name: jobo

Brunellia comocladifolia Bonpl. (*Brunellia comocladifolia* Humb. & Bonpl.)

South America, Colombia, Costa Rica, Ecuador.

See *Plantae Aequinoctiales* [Humboldt & Bonpland] 1(8): 211–213, t. 59. 1808

(Febrifuge.)

Brunellia sibundoya Cuatrec. (*Brunellia antioquensis* (Cuatrec.) Cuatrec.; *Brunellia coroicoana* Cuatrec.; *Brunellia sibundoya* subsp. *antioquensis* Cuatrec.; *Brunellia sibundoya* subsp. *sebastopola* Cuatrec.)

Colombia, Ecuador. Tree

See *Revista Acad. Colomb. Ci. Exact.* 5: 35. 1942, *Flora Neotropica* 2: 81–86. 1970, *Flora Neotropica Monogr.* 2(Suppl.): 48f. 6. 1985

(A very hot tea of the leaves of *Brunellia sibundoya* with the mucilaginous fruits of *Saurauia brachybotrys* taken in treating pulmonary troubles, influenza, pneumonia.)

Brunellia stuebelii Hieron.

South America, Colombia.

See *Bot. Jahrb. Syst.* 21: 317. 1895

(Febrifuge.)

Brunfelsia L. Solanaceae

For the German botanist Otto Brunfels, 1488–1534, monk, physician, in 1521 he left the Carthusian monastery and the Catholic faith, graduated M.D. at Basle, author of *Herbarum vivae eicones ad naturae imitationem summa cum diligentia et artificio effigiatae*. 3 vols. [The drawings by Hans Weiditz.] Argentorati 1530–1540 and *Theses seu communes loci, totius rei medicae. Item. De usu pharmacorum, deque artificio suppressam alvum ciendi, liber*. Edited by Johannes Munterus. Strasbourg 1532. See *Species Plantarum* 1: 191. 1753, *Plantarum Brasiliae Icones et Descriptiones* 1: 1, t. 1–17. 1826 and Garrison and Morton, *Medical Bibliography*. 1803. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 269. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 56. 1972, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974, *Bot. J. Linn. Soc.* 76(4): 294. 1978, Jerry Stannard, in *D.S.B.* 2: 535–538. 1981, *Taxon* 38: 510. 1989, *Taxon* 42: 693. 1993, *Fieldiana, Bot.* 39: 77–84. 1995.

Brunfelsia chiricaspi Plowman

Colombia.

See *Botanical Museum Leaflets* 23(6): 255, pl. XVII. 1973

(Leaves used by shamans to prepare hallucinogen, harsh side effects, toxic.)

Brunfelsia grandiflora D. Don (*Brunfelsia hopeana* Benth.)

Amazon regions. Shrub or treelet, leaves coriaceous, flowers blue or pinkish purple

See *Species Plantarum* 1: 191. 1753, *Edinburgh New Philosophical Journal* 7: 86. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 200. 1846 and *Journal of Ethnopharmacology* 50(2): 91–96. 1996, *Journal of Ethnopharmacology* 52(1): 45–51. 1996, *Journal of Ethnopharmacology* 99(2): 309–312. 2005, *Chem. Pharm. Bull.* (Tokyo) 56(1): 93–96. 2008

(Hallucinogen, ritual, an additive in the preparation of Ayahuasca. Oil/latex from the stem taken orally as a purgative, and to treat ulcers and digestive diseases. Whole plant decoction used externally to treat snake wounds. Root, bark, abortifacient, aphrodisiac, antibacterial, antiinflammatory, venereal, antirheumatic, febrifuge, diaphoretic, diuretic, emmenagogue, hypotensive, narcotic, convulsant, analgesic,

anesthetic, laxative, purgative; stem bark ground and rubbed on sting ray wounds. Root used for yellow fever, impotence, syphilis, snakebite, lung diseases, bronchitis, cold, anemia. Leaves leishmanicidal; leaves rubbed on the body to treat external mycosis. Piscicide.)

in English: Brazil raintree, largeflower brunfelsia, today and tomorrow, vegetable mercury, yesterday-today-tomorrow

in South America: borrachero, chiri-sanango, chiric sanango, chiricsanango, chirisanango, chuchuwasha, gambá, jeratacaca, manacá, manacán, managá caa, manaka, moca pari

Brunfelsia tastevini Benoist

Brazilian Amazon.

See *Bull. Soc. Bot. France* 75: 295. 1928

(Hallucinogenic drink.)

Brunfelsia uniflora (Pohl) D. Don (*Brunfelsia uniflora* D. Don; *Franciscea uniflora* Pohl)

Amazon. Shrub or treelet

See *Plantarum Brasiliae Icones et Descriptiones* 1: 1–2, f. 1–17. 1826, *Edinburgh New Philosophical Journal* 7: 85. 1829

(Root reported to have toxicity in large doses. Root extract analgesic, antispasmodic, sedative, central nervous system depressant, anesthetic, abortive, aphrodisiac, antiinflammatory, diaphoretic, febrifuge, anticoagulant, insecticide, refrigerant, laxative, lymphatic stimulant, for arthritis and rheumatism, snakebite, venereal diseases, to relieve menstrual pain, for colds, flu and fevers. A magic, ceremonial, sacred and spiritual plant used in Ayahuasca, and for bad luck.)

in English: Christmas bloom, good night, Paraguay jasmine, vegetable mercury, white tree

in South America: caá-gambá, camgaba, chiric sanango, chuchuwasha, gambá, geratacaca, geratacaca, jasmim do Paraguai, jeratacaca, jeratacaca, jeratatica, manacá, manacá-cheiroso, manacam, manacán, managá caa, manaka, mercúrio vegetal, moca pari, moka pari, santa maria, umburapuama

Brunsvigia Heister Amaryllidaceae (Alliaceae, Liliaceae)

After Carl Wilhelm Ferdinand (1713–1780), Duke of Brunswick-Lüneburg, patron of the arts and sciences, see Heister, Lorenz (1683–1758), *Beschreibung eines neuen Geschlechts ... 3, cum ic.* Braunschweig, 1755, *Primae Lineae Systematis Naturae* 51. 1834. Brunsvigias are rich in alkaloids that can be extremely toxic.

Brunsvigia bosmaniae F.M. Leight. (*Brunsvigia appendiculata* F.M. Leight.)

South Africa, Namibia. Herb, geophyte, tongue-shaped leaves, rounded candelabra-like pink scented flower heads, trumpet-shaped flowers pollinated at night, fruits dehiscent

See *South African Gardening* 22: 137, 143. 1932

(Magic, ceremonial, ritual, bulbs decoctions to enhance the accuracy of the dice thrown by local diviners.)

in South Africa: maartblom, pienkmaartblom

Brunsvigia elandsmontana Snijman (Wellington, Elandsberg Private Nature Reserve.)

South Africa's Northern Cape province. Herb, bulb geophyte, elongated pedicels

See *Bothalia* 31(1): 34–37. 2001

(Magic, ritual, ceremonial, bulb decoction to enhance the accuracy of bone-interpretation by diviners. Bulb rich in alkaloids; they can be extremely toxic!)

Brunsvigia gregaria R.A. Dyer

Cape Prov. Herb, pink flowers, fruits dehiscent

See *Plant Life* 6: 79. 1950, *Plant Life* 7: 62. 1951, *Planta Med.* 61(6): 581. 1995

(Alkaloids.)

in English: candelabra flower

in Southern Africa: iKunzi emhlophe, kandelaar

Brunsvigia josephinae (Delile) Ker Gawl. (*Amaryllis gigantea* Marum; *Amaryllis josephinae* Delile; *Amaryllis josephiniana* Herb.; *Brunsvigia gigantea* (Marum) Traub, nom. illeg.; *Brunsvigia gigantea* Heist.; *Brunsvigia glauca* Salisb., nom. inval.; *Brunsvigia gydobergensis* D. Müll.-Doblies & U. Müll.-Doblies; *Brunsvigia josephinae* Ker-Gawl.; *Brunsvigia josephinae* [Ker-Gawl.]; *Brunsvigia josephinae* var. *angustifolia* Ker Gawl.; *Coburgia josephinae* (Delile) Herb. ex Sims)

South Africa. Herb, dark red and orange-yellow tubular flowers carried on open widely spreading umbels, nectar-eating sugarbirds pollinate the flowers

See *Bot. Reg.* 3: t. 192, 193. 1817, *Gen. Pl.* [Salisbury] 117. 1866 and *Herbertia* 5: 135. 1938, *Feddes Repert.* 105(5–6): 352. 1994, *Phytochemistry* 40(3): 961–965. 1995

(Alkaloids. Dry bulb tunics used as a wound dressing.)

in South Africa: Josephine's lily, kandelaarsblom, lantanter

Brunsvigia litoralis R.A. Dyer

Cape Prov.

See *Plant Life* 7: 62. 1951, *Planta Med.* 64(1): 91–3. 1998

(Alkaloids from the bulbs exhibited both antimalarial and cytotoxic activity.)

Brunsvigia natalensis Baker

S. Africa.

See *Fl. Cap.* (Harvey) 6(2): 208. 1896

(Straighten child's bones.)

in Swaziland: lilula

Brunsvigia orientalis (L.) Aiton ex Eckl. (*Amaryllis multiflora* D. Dietr., nom. illeg.; *Amaryllis nobilis* Salisb.; *Amaryllis orientalis* L.; *Brunsvigia gigantea* Heist.; *Brunsvigia multiflora* W.T. Aiton; *Brunsvigia orientalis* Aiton ex Eckl.; *Brunsvigia rubricaulis* M. Roem.; *Coburgia multiflora* (W.T. Aiton) Herb. ex Sims; *Crinum candelabrum* M. Roem.; *Haemanthus orientalis* (L.) Thunb.)

Cape Prov. Bulb geophyte, flowers in large spherical umbel bright to light red

See *Hortus Kew.* 2: 230. 1811, *Topogr. Verz. Pflanzensamml. Ecklon:* 7. 1827, *Fam. Nat. Syn. Monogr.* 4: 57. 1847 and *Phytochemistry* 43(6): 1379–1384. 1996

(Alkaloids.)

in South Africa: candelabra flower, koningskandelaar, perdespookbossie

Brunsvigia radulosa Herb. (*Brunsvigia burchelliana* Herb.; *Brunsvigia cooperi* Baker)

S. Africa. Herb, rough tough leaves very thick, deep pink to pale purple flowers individually pedicelled-stalked, papery capsule, fleshy seeds

See *Amaryllidaceae* t. 22. 1837 and *J. Ethnopharmacol.* 2(4): 323–335. 1980 [Antineoplastic constituents of some Southern African plants: *Urginea capitata*, *Raphionacme hirsuta* and *Cheilanthes contracta*, *Brunsvigia radulosa*, *Amaryllis belladonna*.], *Phytochemistry* 53(5): 587–591. 2000 [Bioactive alkaloids from *Brunsvigia radulosa*.]

(Poisonous. Infusions used for abdominal troubles. Straighten child's bones, to treat barrenness in women.)

in English: candelabra flower, tumbleweed

in South Africa: kandelaarblom, misryblom

Bryonia L. Cucurbitaceae

Latin and Greek *bryonia* used by Dioscorides and Plinius; see Carl Linnaeus, *Species Plantarum.* 2: 1012–1013. 1753, *Genera Plantarum.* Ed. 5. 442. 1754, *Prodromus Florae Norfolkicae* 1: 68. 1833, *Chloris Hanoverana* 6, 112. 1836, *A Flora of North America: containing ...* 1: 540. 1840, *Systema Materiae Medicae Vegetabilis Brasiliensis* 79. 1843 and *Lexikon Generum Phanerogamarum* 278. 1903.

Bryonia alba L.

Europe.

See *Species Plantarum* 2: 1012. 1753 and *Kew Bull.* 23: 455. 1969, *Fl. Medit.* 7: 213–218. 1997

(Diuretic, cathartic and purgative, rubefacient, antiinflammatory, cytotoxic, diaphoretic, expectorant, pectoral and

vermifuge. Toxic, irritant, this plant should be used with great caution.)

in English: white bryony

Bryonia dioica Jacq. (*Bryonia cretica* L. subsp. *dioica* (Jacq.) Tutin; *Bryonia dioica* Sessé & Moc., nom. illeg.; *Bryonia dioica* M. Bieb., nom. illeg.; *Bryonia ruderalis* (Jacq.) Salisb.; *Bryonia scarlatina* (Jacq.) Dumort.)

Europe.

See *Florae Austriacae* 2: 59–60, pl. 199. 1774, *Prodr. Stirp. Chap. Allerton* 158. 1796, *Flora Taurico-Caucasica* 3: 625. 1819, *Florula belgica*, opera majoris prodromus, auctore ... 54. 1827, *Flora Mexicana* 229. 1894 and *Taxon* 28: 395–397. 1979, *Taxon* 30: 856–857. 1981, *Watsonia* 20: 63–66. 1994, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Toxic, this plant should be used with great caution, irritant, cathartic and purgative, rubefacient, antiinflammatory, cytotoxic, diaphoretic, expectorant, pectoral and vermifuge.)

in English: common bryony, cow's-lick, English mandrake, red-berried bryony, red bryony, snake bryony, tetter-berries, white bryony, white wild vine, wild hop, wild nep, woman drake

in Arabic: dalia beida, fashira

in Brazil: briônia, fogo ardente, ipeca indígena, nabo de diabo, norça branca

Bryonia rostrata Rottler (*Aechmandra rostrata* (Rottler) Arn.; *Kedrostis rostrata* (Rottler) Cogn.; *Kedrostis rostrata* Cogn.)

India.

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 212–213. 1803, *Journal of Botany, British and Foreign* 3: 274. 1841, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 636. 1881

(Used in Sidha.)

in India: appakovai, appakovay kalung

Bryonopsis Arn. Cucurbitaceae

Resembling the genus *Bryonia* L., see *Madras J. Lit. Sci.*, 12: 49. 1840, *Hooker's Journal of Botany*. 3: 274. 1841.

Bryonopsis laciniosa (L.) Naudin (*Bryonia laciniosa* L.; *Bryonopsis laciniosa* Naudin; *Bryonopsis laciniosa* var. *typica* (L.) Domin; *Bryonopsis laciniosa* var. *typica* Domin; *Cayaponia laciniosa* (L.) C. Jeffrey)

India. Slender climber, perennial rootstock, tendrils, membranous leaves, white flowers, red fruits with white vertical lines, young fruit eaten

See *Species Plantarum* 2: 1013. 1753, *Journal of Botany, being a second series of the Botanical Miscellany* 3: 274.

1841, *Ann. Sci. Nat.*, Bot. sér. 4, 12: 141. 1860, *Annales des Sciences Naturelles; Botanique*, sér. 5, 6: 30. 1866 and *Bibliotheca Botanica* 89: 634. 1929, *Kew Bulletin* 15(3): 346–347. 1962

(Used in Ayurveda and Sidha. Seeds antiinflammatory, spasmolytic, tonic, for venereal diseases; powdered seeds given to childless women to help conception, to increase chances for pregnancy. Roots for fertility of barren women. Leaf paste for boils. Plant supposed to be efficacious for snakebite.)

in India: aiveli, aiviral, aivirali, aivirarkovvai, aiyaveli, aiyaviral, ancuvirali, ankali, ankuli, ayvirali, bahuputara, baja, bajguriya, bilanja, cataimutiyonpalattulvacu, cilettimaceti, cilettimam, cilettumanacini, citraphalah, chitraphalaa, civamurai, civanarpakal, civanarpakam, garunaru, i-virali kovai, ilinkakkovai, ilinkapputol, ilinkaputol, inkulinkapicam, ishari, ivoralikovai, iyaveli, iyaviraali, iyvirali, kaumdali, kovai, lingadonga, lingini, mala, nayival, neyyunni, palavarpala, pampukkuvai, shivalingani, shivalingi, shivlingi, sivalingi, syapa karyal, vaduballi

Bryophyllum Salisbury Crassulaceae

Greek *bryo* 'to sprout, to grow' and *phyllon* 'a leaf', in allusion to the new plantlets that sprout from the leaves; see *Familles des Plantes* 2: 248. 1763, *Plantarum historia succulentarum* 17: pl. 100. 1802, R.A. Salisbury, *The Paradisus Londinensis*. 1: t. 3. 1805, *Ann. Sci. Nat.*, Bot. ser. 4, 8: 44–163. 1857 and *Bull. Herb. Boissier* 8: 17–48. 1908, *Fieldiana, Bot.* 24(4): 404–415. 1946.

Bryophyllum pinnatum (L.f.) Oken (*Bryophyllum calycinum* Salisb.; *Bryophyllum germinans* Blanco; *Bryophyllum pinnatum* Kurz; *Bryophyllum pinnatum* (Lam.) Bryophyllum proliferum Bowie (*Bryophyllum calycinum* Salisb.; *Bryophyllum proliferum* Bowie ex Hook.; *Kalanchoe prolifera* (Bowie) Raym.-Hamet; *Kalanchoe prolifera* (Bowie ex Hook.) Raym.-Hamet)

Madagascar. Succulent herb, shrub, erect, leaves very fleshy, inflorescence a terminal erect cyme, corollas green apex orange-red, flowers pendulous

See *Familles des Plantes* 2: 248. 1763, *Botanical Magazine* t. 5147. 1859 and *Bulletin de l'Herbier Boissier*, sér. 2, 8: 17–48. 1908

(Leaves antiinflammatory, antiseptic, counterirritant and sedative; fresh leaves used as a poultice in the treatment of boils, wounds, burns and scalds.)

in India: patharshila

in Indonesia: buntiris

Buchanania Sprengel Anacardiaceae

After the Scottish botanist Francis Hamilton (*olim* Buchanan), 1762–1829 (Leny, Scotland), M.D. Edinburgh 1783, surgeon in the East India Company (Bengal Medical Service), plant collector, explorer and naturalist, 1806 Fellow of the Royal Society and in 1816 of the Linnean Society. See *Species Plantarum* 1: 383. 1753, *Journal für die Botanik* 1800(2): 234. 1801 [1802], *Narrative of an Expedition to Explore the River Zaire* 431. 1818, *Pl. Corom.* iii. 79. t. 282. 1819, *Claim of Dr. Francis Hamilton Buchanan of Spittal*. (A statement of the claim of the family of Buchanan of Spittal to be considered the chief of the name.) Edinburgh 1826, Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 138–141. Paris, Leipzig 1845 and D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. London 1914, Isaac Henry

Burkill, *Chapters on the History of Botany in India*. Delhi 1965, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992.

Buchanania angustifolia Roxb. (*Buchanania angustifolia* Benth., nom. illeg.; *Buchanania muelleri* (Benth.) Engl.)

India.

See *Plants of the Coast of Coromandel* 3: 58. 1820, *Fl. Austral.* 1: 490. 1863, *Monographiae Phanerogamarum* 4: 190. 1883

(Used in Unani and Sidha.)

in India: cara, chara, cheru, habb-us-samena, induba, kalma, kanma, kattuma, kattumankay, malamavu, moralli, morli, mudma, mutama, peddamorali, peddamoralli, pulima, sara, sarapappu, tsara

Buchanania arborescens (Blume) Blume (*Buchanania arborescens* F. Muell.; *Buchanania arborescens* Blume; *Buchanania florida* Schauers; *Buchanania florida* A. Gray; *Buchanania florida* var. *arborescens* Pierre; *Buchanania florida* var. *dongnaiensis* Pierre; *Buchanania lucida* Blume; *Buchanania muelleri* Engl.; *Buchanania muelleri* (Benth.) Engl.; *Buchanania platyphylla* Merr.; *Coniogeton arborescens* Blume)

Tropical Asia. Tree, slender, shiny evergreen foliage, very small white to cream flowers in panicles, reddish to purple-black edible fruit

See *Novorum Actorum Academia Caesarea Leopoldinae-Carolinae Germanicae Naturae Curiosorum* 19(Suppl. 1): 481. 1843, *Museum Botanicum* 1: 183. 1850, *U.S. Expl. Exped.*, *Phan.* 15: 366. 1854, *Flore Forestière de la Cochinchine* 5: t. 372B, 381. 1898 and von Reis Altschul S. *Drugs and Foods from Little-Known Plants*. Notes in Harvard University Herbaria. Cambridge, MA. 1973

(The juice of this species reported to produce itching. For headache pound the leaves and use as a poultice. The black sap of *Buchanania* species is said to be non-irritant, or may be an irritant in those susceptible. Root expectorant; leaf juice aphrodisiac, psychoactive, purgative.)

in English: bush currant, green plum, lightwood, little gooseberry tree, satinwood, sparrows' mango

in China: shan xian zi

Malay name: otak hudang, otak udang, otak udang tumpul

in SE Asia: balinghasai, belino-beluno, chaa muang, getasan, katak udang, kepala tundang, ketak udang, luaet khwai, mamuang khee kratai, pauh pipit, popohonan, puan, rawarawa pipit, rengas ayam, rengas laut, terentang tikus

in Vietnam: c[aa]y m[uw]ng ri

Buchanania axillaris (Desr.) T.P. Ramamoorthy (*Mangifera axillaris* Desr.)

India.

See *Fl. Hassan Distr. Karnataka, India*: 374. 1976

(Used in Ayurveda, Unani and Sidha. Leaves laxative, depurative, cooling, aphrodisiac, cardiotoxic, astringent, wound healing; leaf juice digestive, expectorant, aphrodisiac, purgative. Seeds tonic to body and brain; kernel laxative, febrifuge. Gum mixed with goat milk and *Eleusine coracana* flour applied externally to treat pain in heart.)

in English: Buchanan's mango, Cudapah almond, Cuddapah almond

in India: chaara, char, chinasarapappu, habb-us-simanaa, induba, kattuma, kola-mavu, kolamavu, kulamavu, marharia, moradi, moralli, morave, morli sara, motachar, mudaima, mudama, mundamah, muradi, murkaalu, pedda moralli, pedda-mori, pedda morli, peddamoralli, piyala, priyaal, saaraparuppu, sarapappu, sarapappu-kernei, saaraparuppu, shaara pappu, yemme murukalu mara, yemme murukelu gida

Buchanania cochinchinensis M.R. Almeida

India.

See *Flora of Maharashtra State* 1: 287. 1996

(Fruit and leaves for burns, wounds, mumps; leaves for wounds. Eaten in impotency and spermatorrhea. Stem bark decoction taken for indigestion.)

in India: chaara, char, charodi

Buchanania lanzan Spreng. (*Buchanania latifolia* Roxb.)

Tropical Asia, India. Tree, straight cylindrical trunk, black rough bark, young branches with silky hairs, coriaceous leaves, small greenish white flowers in panicles, black lenticular fruits, ripe fruits and kernels eaten, in dry deciduous forest

See *Hort. Bengal.* 32. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 385–386. 1832 and *Quarterly Journal of the Mythic Society* 54: 73–94. 1963, Sengupta A., Roychoudhury S.K. "Triglyceride composition of *Buchanania lanzan* seed oil." *J. Sci. Food Agric.* 28(5): 463–468. 1977, *Indian Journal of Pharmaceutical Sciences* 40(6): 227–228. 1978, *Taxon* 28: 403. 1979, *Journal of Tree Sciences* 3: 126–127. 1984, *Journal of Cytology and Genetics* 25: 36–42, 308–320. 1990, *Journal of Ethnopharmacology* 71(1–2): 89–92. 2000, *J. Environ. Biol.* 22(3): 229–231. 2001

(Used in Ayurveda, Unani and Sidha. Leaves laxative, depurative, cooling, aphrodisiac, cardiotoxic, astringent. Seeds tonic to body and brain; kernel laxative, febrifuge; kernel ash mixed with latex of *Jatropha glandulifera* made into a paste and applied for itches. Leaves crushed and applied to wounds; leaves soaked in water overnight and drunk for spermatorrhea; leaf juice digestive, expectorant, aphrodisiac, purgative, blood purifier. Pounded bark in water given to women for excessive bleeding during menstruation; in case of dysentery and diarrhea, bark is given with milk; young bark grounded with water made into a paste rubbed on the snakebitten part; stem bark made into a paste with water applied on forehead to treat headache in indigestion.

Paste of gum applied on wounds, cuts and boils, and given in diarrhea. A sweet drink prepared out of roots of this plant, *Piper nigrum* and candy given in venereal diseases. Immunostimulant activity of dry fruits and plant materials used for mothers after childbirth. Piscicide. Magico-religious beliefs, a taboo to cook the fruits until the Kaksadh festival, a particular inaugural ceremony. Veterinary medicine, bark juice for fracture of limb.)

in English: almondette, almondette tree, Buchanan's mango, calumpang nuts, calumpang nut, charoli kernel, cheronjee, chirauli nut, chirauli nut tree, chironji kernel, Cudapah almond, Cuddapah almond, Hamilton mombin

in China: dou fu guo

in Nepal: chiraunjee

in Thailand: hak phuu, mamuang maeng wan, rak muu

Buchloe Engelm. Poaceae (Gramineae)

From the Greek *bous* 'an ox' and *chloe*, *chloa* 'grass, young grass', type *Buchloe dactyloides* (Nutt.) Engelm., see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Hooker's Journal of Botany and Kew Garden Miscellany* 8: 18. 1856, *Plantas Hartwegianas imprimis Mexicanas* 347. 1857, *Transactions of the Academy of Science of St. Louis* 1: 432. 1859, *Revisio Generum Plantarum* 2: 763. 1891 and *Phytologia* 37(4): 317–407. 1977, *Flora Mesoamericana* 6: 293–295. 1994, *Las Gramíneas de México* 2: 1–344. 1987, *Contributions from the United States National Herbarium* 41: 20–33. 2001.

Buchloe dactyloides (Nutt.) Engelm. (*Anthephora axilliflora* Steud.; *Bouteloua dactyloides* (Nutt.) Columbus; *Bouteloua mutica* Griseb. ex E. Fourn.; *Bulbilis dactyloides* (Nutt.) Raf. ex Kuntze; *Calanthera dactyloides* (Nutt.) Kunth ex Hook.;

Casiostega dactyloides (Nutt.) E. Fourn.; *Casiostega hookeri* Rupr. ex E. Fourn.; *Lasiostega humilis* Rupr. ex Munro; *Melica mexicana* Link ex E. Fourn.; *Sesleria dactyloides* Nutt.

Northern America, USA, Mexico. Tufted, sward-forming, unbranched above, leaf sheath glabrous, ligule ciliate, leaf blade flat, curly leaves, florets unisexual, female spikelets crowded together and burr-like, male spikelets on a raceme, short basal bracts, cultivated, ornamental, good forage, useful for erosion control, open habitats

See *The Genera of North American Plants* 1: 65. 1818, *Synopsis Plantarum Glumacearum* 1: 111. 1854, *Hooker's Journal of Botany and Kew Garden Miscellany* 8: 18. 1856, *Plantas Hartwegianas imprimis Mexicanas* 347. 1857, *Bulletin de la Société Botanique de Belgique* 15: 470–471. 1876, *Revisio Generum Plantarum* 2: 763. 1891 and *Aliso* 18: 63. 1999

(For skin diseases and to make the hair grow.)

in English: buffalo grass, buffalograss

in Spanish: hierba búfalo, zacate búfalo

in Mexico: zacate búfalo, zacate chino

Buchnera L. Scrophulariaceae (Orobanchaceae)

Presumably named in honor of the German naturalist Johann Gottfried Buchner (or Buechner or Büchner), 1695–1749, author of *Umständliche Erzählung verschiedener Exempel recht sonderbarer Vermehrung der Feldfrüchte*. Schneeberg 1718 and *Dissertationes epistolicae de memorabilibus Voigtlandiae ex regno vegetabili*. [Greizae 1743]; or after the physician Andreas Elias Buchner (or Buechner or Büchner), 1701–1769, a German naturalist author of *Dissertatio inauguralis medica de atrocissimo sequioris sexus flagello, sive passione hysterica*, etc. Exfordia [1721] and *An easy and very Practicable Method to enable Deaf Persons to Hear ...* London 1770. See Carl Linnaeus, *Species Plantarum*. 2: 630. 1753 and *Genera Plantarum*. Ed. 5. 278. 1754, *Academiae Sacri Romani Imperii Leopoldino-Carolinae Naturae Curiosorum historia, conscripta ab eiusdem praeside A.E. Büchnero* 1755, *Skånes Flora*, ed. 2 979. 1870 and *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Fragm. Florist. Geobot.* 41(1): 97, 99, 120, 161. 1996, *Fieldiana, Bot.*, n.s. 41: 1–69. 2000.

***Buchnera ciliata* Pennell**

New Guinea, Indonesia.

See *Journal of the Arnold Arboretum* 24(3): 263. 1943, *Economic Botany* 17(1): 16–22. 1963

(Raw plant eaten for alleviating birth pains and in accelerating the expulsion of the placenta.)

in New Guinea: bogle

Buchnera cruciata Buchanan-Hamilton ex D. Don (*Buchnera cruciata* Buch.-Ham.; *Buchnera densiflora* Hooker & Arnott; *Buchnera stricta* Bentham)

Tropical Asia, China, Nepal.

See *Prodr. Fl. Nepal.* 91. 1825, *Scrophularineae Indicae* 41. 1835, *Companion to the Botanical Magazine* 1: 363, 367. 1836, *The Botany of Captain Beechey's Voyage* 203. 1837

(Yin deficiency.)

in China: gui yu jian, hei cao, heicao, kwei yü chien, kui-u-chi, yü chien

Buchnera hispida Buch.-Ham. ex D. Don (*Buchnera browniana* Schinz; *Striga schimperiana* Hochst.)

East Africa. Herb, erect, slender, rather brittle-stemmed, blue purplish-pink flowers, long corolla tube and five whorled spreading lobes, inside throat very hairy

See *Flora Cochinchinensis* 1: 22. 1790, *Prodromus Florae Nepalensis* 91. 1825

(Whole plants cooked with bony beef, decoction taken with food to remedy malaria.)

Buckleya Torr. Santalaceae

See *American Journal of Science, and Arts* 45(1): 170. 1843 and *International Journal of Plant Science* 162(S6): S41–S52. 2001

***Buckleya graebneriana* Diels**

China. Shrub, deciduous, semiparasitic, flowers dioecious, yellow fruits edible after cooking

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 306. 1900

(For burns and boils.)

in English: flour jar

in China: mian weng, mien weng, qin ling mi mian weng

***Buckleya henryi* Diels**

China. Shrub, semiparasitic, flowers dioecious

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 194. 1845, *Catalogus musei botanici lugduno-batavi* 79. 1870 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 306. 1900

(Fresh leaves and bark poisonous.)

in English: rice flour jar

in China: mi mian weng, mi mien weng

Buddleja L. Buddlejaceae (Loganiaceae, Scrophulariaceae)

After the English botanist Rev. Adam Buddle, c. 1660–1715 (Gray's Inn, London), grasses and mosses collector. See

Carl Linnaeus, *Species Plantarum* 1: 112. 1753, *Genera Plantarum*. Ed. 5. 51. 1754, *Prodromus Florae Novae Hollandiae* 454. 1810, *Nova Genera et Species Plantarum* ... 2: 133. 1827 and J. Britten, *The Sloane herbarium* ... revised and edited by J.E. Dandy. 95. 1958, *Field Mus. Nat. Hist., Bot. Ser.* 13(5/1): 239–269. 1959, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 140–141. 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 277. 1965, *Gentes Herb.* 10(1): 47–114. 1967, *Fieldiana, Bot.* 24(8/4): 276–302. 1969, *Fl. Ecuador* 16: 1–24. 1982, *Fl. (Antioxidant, immunosuppressive, cytotoxic, antiinflammatory, diuretic, molluscicidal, antifungal, wound healing, antibacterial, analgesic, sedative, for the treatment of liver diseases, bronchial complaints; a poultice of leaves applied on the wounds.)

in English: butterfly bush, orange-eye butterfly bush, summer lilac

in China: da ye zui yu cao

Buddleja elegans Cham. & Schltdl. subsp. *angustata* (Benth.) E.M. Norman (*Buddleja angustata* Benth.; *Buddleja*

cambara Arechav.; *Buddleja campestris* (Velloso) Walp.; *Buddleja fiebrigiana* Kraenzl.; *Buddleja grisea* Kraenzl.; *Buddleja malmei* Kraenzl.; *Buddleja thyrsoides* Lam.; *Buddleja vetula* var. *angustata* (Benth.) Chodat; *Buddleja vetula* var. *majori* Schmidt)

Argentina, Uruguay. Shrub, white yellow flowers

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 291. 1792, *Florae Fluminensis* 1: 55, t. 146. 1829[1825], *Repertorium Botanices Systematicae*. 3: 330. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 443. 1846, *Flora Brasiliensis* 8: 284. 1862 and *Bulletin de l'Herbier Boissier*, sér. 2, 2: 822. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 311. 1908, *Anales Museo Nacional Montevideo*, ser. 2 1: 63–65, f. 2. 1911, *Kurtziana* 24: 192. 1995

(Pectoral.)

Buddleja fallowiana I.B. Balfour & W.W. Smith (*Buddleja fallowiana* var. *alba* Sabourin) (in honor of George Fallow, a gardener at the Royal Botanic Garden, Edinburgh, killed in Egypt.)

China. Deciduous shrub, erect, compact, whitish lavender flowers in terminal erect panicles

See *Notes from the Royal Botanic Garden, Edinburgh* 10(46): 15–16. 1917

(Antioxidant, antibacterial, antiinflammatory.)

in China: zi hua zui yu cao

Buddleja globosa Hope (*Buddleja capitata* Jacq.; *Buddleja connata* Ruiz & Pav.; *Buddleja globifera* Duhamel; *Buddleja globosa* Lam.)

Chile. Shrub

See *Verhandelingen uitgegeeven door de hollandse maatschappij der weetenschappen, te Haarlem* 20(2): 417–418, pl. 11. 1782 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/1): 239–269. 1959

(Antimicrobial, aqueous extract of leaves taken as stomachic, also to treat wounds, warts and ulcers.)

in English: orange ball tree

in Chile: matico, pañil

Buddleja glomerata Wendl.f. (*Buddleja lobulata* (Benth.) Phillips; *Chilianthus lobulatus* (Benth.) A. DC.; *Nuxia lobulata* Benth.)

South Africa.

(The pollen of the flower can cause sneezing.)

in English: cockroach, Karoo sagewood, sneezebush

in South Africa: Karoo-salie, hoesbos, kakkerlak (= cockroach), niesbos (= sneezebush)

Buddleja incana Ruiz & Pav. (*Buddleja bullata* Kunth; *Buddleja incana* var. *pannulosa* Diels; *Buddleja longifolia* Kunth; *Buddleja rugosa* Kunth)

Peru.

See *Flora Peruviana* 1: 52, pl. 80, f. b. 1798, *Nova Genera et Species Plantarum* (quarto ed.) 2(ed. quarto): 347–349, pl. 186. 1818 and *Bibliotheca Botanica* 116: 124. 1937, *Fl. Neotrop.* 81: 149, 152. 2000

(Plant antimicrobial, stomachic, to treat wounds, warts and ulcers. Branches infusion taken for colds and catarrh.)

Vernacular names: colle, quishuara, quisoar

Buddleja lindleyana Fortune (*Adenoplea lindleyana* (Fortune) Small; *Buddleja lindleyana* var. *sinuatodentata* Hemsley) (named for the British botanist John Lindley, 1799–1865, Horticultural Society of London, from 1828 professor of botany London University, author of *The Genera and species of Orchidaceous Plants*. London 1830–1840; see J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 386. 1965, Stafleu and Cowan, *Taxonomic Literature*. 3: 49–60. 1981, William T. Stearn, in *D.S.B.* 8: 371–373. Nov. 1998.)

China.

See *Edwards’s Botanical Register* 30 (Misc.): 25. 1844, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 8: 406–407. 1883, *Journal of the Linnean Society, Botany* 26(173): 120. 1889

(Antioxidant, molluscicidal, antiinflammatory, poisonous.)

in English: Chinese buddleja, Lindley butterfly bush

in China: zui yu cao

in Japan: Ryûkyû-fuji-utsugi

Buddleja macrostachya Wall. ex Benth. (*Buddleja cylindrostachya* Kraenzl.; *Buddleja hancockii* Kraenzl.; *Buddleja henryi* Rehder & E.H. Wilson var. *hancockii* (Kraenzl.) C. Marquand; *Buddleja hookeri* C. Marquand; *Buddleja hosseusiana* Kraenzl.; *Buddleja macrostachya* Benth.; *Buddleja martii* Schmidt)

China, Himalaya, Bhutan. Shrub or small tree

See *Scrophularineae Indicae* 42. 1835, *Journal of Botany, British and Foreign* 6: 228, 245. 1868 and *Annalen des K. K. Naturhistorischen Hofmuseums* 26: 396. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(2–3, Beibl. 111): 46. 1913, *Bulletin of Miscellaneous Information Kew* 1930(5): 191–192. 1930, *Economic Botany* 33(1): 52–56. 1979

(Bark chewed with betel leaf. Leaves paste warmed and applied in venereal diseases.)

in China: da xu zui yu cao

in India: dieng jalawkren, jalong krem, jalong kren, tipokra-moli

Buddleja madagascariensis Lam. (*Adenoplea madagascariensis* (Lam.) Eastwood; *Buddleja heterophylla* Lindl.; *Nicodemia madagascariensis* (Lam.) R. Parker)

East Africa.

See *Encyclopédie Méthodique, Botanique* 1(2): 513. 1785, *Tabl. Encycl.* 1: 291. 1792, *Edwards's Botanical Register* 15: t. 1259. 1839, *Catalogo ... Orto Botanico di Napoli ...* 88. 1845 and *For. Fl. Punjab* 2: 357. 1924, *Leaflets of Western Botany* 1(17): 197. 1936

(Antioxidant, antiinflammatory, for cough, asthma, bronchitis.)

in English: butterfly bush, smoke bush

in Madagascar: ramandravaka, seva, sevafotsy, sevalahy

in China: jiang guo zui yu cao

Buddleja marrubifolia Benth.

Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 441. 1846

(Diuretic.)

in English: woolly butterfly bush

Buddleja officinalis Maxim. (*Buddleja officinalis* Maxim. var. *macrantha* Lingelsheim)

China.

See *Bull. Acad. Imp. Sci. Saint-Pétersbourg.* 26(3): 496–497. 1880 and Li Ping-tao in Chang Mei-chen & Qiu Lian-qing, eds. *Loganiaceae. Fl. Reipubl. Popularis Sin.* 61: 223–309. 1992, *American Journal of Chinese Medicine* 38(3): 585–598. 2010

(Antioxidant, antibacterial, antiinflammatory, in atherosclerosis, vascular inflammation.)

in English: pale butterfly bush

in China: mi meng hua

Buddleja paniculata Wall. (*Buddleja acutifolia* C.H. Wright; *Buddleja gynandra* C. Marquand; *Buddleja lavandulacea* Kraenzl.; *Buddleja mairei* H. Lév.)

India, Vietnam. Treelet or shrub, herb, white flowers with orange center

See *Flora Indica*; or descriptions of Indian Plants 1: 412. 1820, *Bulletin of Miscellaneous Information Kew* 1896(109): 24. 1896 and *Botanische Jahrbücher für Systematik*,

Pflanzengeschichte und Pflanzengeographie 50(2–3, Beibl. 111): 45. 1913, *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 258. 1914, *Bulletin of Miscellaneous Information Kew* 1930(5): 184. 1930

(Ritual, ceremonial, offered to God, waving a bunch of it before the God. Pounded young leaves as fish poison.)

in China: hou yao zui yu cao

in India: suddar, sundwar

in Nepal: narayan pati, narayanpati

Buddleja perfoliata Kunth (*Buddleja sphaerantha* Schldtl. & Cham.)

Mexico.

See *Nova Genera et Species Plantarum* (quarto ed.) 2(ed. quarto): 346. 1818, *Linnaea* 5: 104. 1830 and *Gentes Herb.* 10: 99–100. 1967, *Fl. Neotrop.* 81: 132. 2000

(Leaves, stems and twigs infusion sudorific, anodyne, for cold, cough, catarrh.)

in English: butterfly bush

Buddleja saligna Willd. (*Buddleja salicifolia* Jacq.; *Callicarpa paniculata* Lam.; *Chilianthus arboreus* Benth.; *Chilianthus arboreus* A. DC.; *Chilianthus arboreus* (L.f.) A. DC.; *Chilianthus arboreus* var. *rosmarinaceus* Kuntze; *Chilianthus oleaceus* Burch.; *Nuxia saligna* (Willd.) Benth.; *Scoparia arborea* L.f.)

South Africa. Shrub or tree, fast growing, trunk short often gnarled and crooked, crown dense rounded or domed-shaped, foliage greyish green, scented tiny creamy white flowers in dense terminal sprays

See *Enum. Pl.* [Willdenow] 1: 159. 1809, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 435. 1846 and *BMC Complement. Altern. Med.* 9: 21. 2009

(Leaves and stem antibacterial, antioxidant. Bark and leaf decoctions to treat colic, coughs, colds, sore eyes, urinary problems and as purgative. Leaves used to treat coughs and colds; roots as a purgative. Wild olives traditionally used to lower blood pressure.)

in English: bastard olive, false olive, olive buddleia, olive buddleja, wild buddleja

in South Africa: basterolienhout, bergolienhout, bossalie, lelothwane, mothlwane, saliehout, troubos, iGqebaelimhlope, iGqeba-elimhlophe, umBatacwepe, umGeba, umGqeba, umNceba, unGqeba, witolien, witolienhout

Buddleja salviifolia (L.) Lam. (*Buddleja aurantiaco-maculata* Gilg; *Buddleja salviifolia* Lam.; *Lantana salviifolia* L.; *Lantana salviifolia* Cham.; *Lantana salviifolia* Jacq.)

South Africa. Shrub or small tree, semi-evergreen to evergreen, fast growing, drooping branches, small fragrant lavender flowers borne in large panicles, leaves browsed by game

See *Syst. Nat.*, ed. 10. 2: 1116. 1759, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 513. 1785, *Pl. Rar. Hort. Schoenbr.* 3: 18, t. 285. 1798, *Linnaea* 7: 125. 1832 and *Bot. Jahrb. Syst.* 30(3–4): 377. 1901, *Journal of Ethnopharmacology* 120(3): 382–386. 2008

(Powder from the leaves causes itchiness on the skin and in the eyes. Leaves antimalarial, antiplasmodial, stomachic, antiemetic, tonic, antispasmodic, carminative, antiproliferative, antiinflammatory and cytotoxic; leaves infusion applied as an eye lotion. Roots decoction for cough and colic.)

in English: buddleja with leaves like a salvia, butterfly bush, mountain sage, sage-leaved butterfly bush, sagewood, South African sagewood, wild buddleja, wild sage, winter buddleja

in Southern Africa: bergsalie, bergsaliehout, chipambati, chiPambati, cwangi, iGqange, iGwangi, iLoshane, iLothane, iLotyane, kleinsaliehout, lelothoane, lelothwane, muPambati, salie, salieboom, saliehout, umBatacwepe, vaalbos, wildesalie, witsalie

Buddleja scordioides Kunth (*Buddleja scordioides* var. *capitata* S. Watson)

Mexico.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 345–346, pl. 183. 1818, *Proceedings of the American Academy of Arts and Sciences* 18: 116. 1883 and *Gentes Herb.* 10: 100, 102. 1967, *Flora Neotropica* 81: 132, 134. 2000

(For dyspepsia.)

Buddleja sessiliflora Kunth (*Buddleja barbata* Kunth & Bouché; *Buddleja melliodora* Kunth & Bouché; *Buddleja pringlei* A. Gray; *Buddleja pseudoverticillata* M. Martens & Galeotti; *Buddleja verticillata* Kunth; *Buddleja verticillata* Sessé & Moc.; *Buddleja verticillata* Kunth; *Buddleja wrightii* B.L. Rob.)

Mexico, North America.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 345–346, pl. 148, 182. 1817, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 12: 24. 1845, *Proceedings of the American Academy of Arts and Sciences* 19: 86. 1883, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 1: app. 15. 1887, *Botanical Gazette* 16(12): 341–342. 1891 and *Fl. Neotrop.* 81: 145. 2000

(Antioxidant, antiinflammatory, wound healing.)

(Astringent, stimulant.)

Bulbine Wolf Xanthorrhoeaceae (Asphodelaceae, Liliaceae)

Greek *bolbine*, *bolbos* ‘a bulb, onion’, Sanskrit *pûl* ‘to accumulate, to gather’, Latin *bulbine*, *es*, old name used by Plinius for a species of little onion or bulb; see Nathaniel Matthaeus von Wolf (1724–1784), *Genera plantarum vocabulis characteristicis definita*. 84. [Danzig] 1776, *De Fructibus et Seminibus Plantarum...* 1: 41–42. 1788, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 372. 1809.

Bulbine abyssinica A. Rich. (*Bulbine asphodeloides* Spreng. var. *filifolioides* De Wild.; *Bulbine asphodeloides* var. *monticola* Poelln.; *Bulbine asphodeloides* var. *xanthobotrys* (Engl. & Gilg) Weim.; *Bulbine decurvata* Peter ex Poelln.; *Bulbine hamata* Peter ex Poelln.; *Bulbine huilensis* Poelln.; *Bulbine latitepala* Poelln.; *Bulbine xanthobotrys* Engl. & Gilg)

Ethiopia, Yemen, S. Africa. Herb, perennial, succulent, bushy, bright yellow flowers, often confused with *Bulbine asphodeloides*

See *Kunene-Sambesi Exped.*: 186. 1903, *Syll. Fl. Congol.*: 567. 1909, *Bot. Not.* 1937: 420. 1937, *Bol. Soc. Brot.*, II, 17: 155–156. 1943, *Repert. Spec. Nov. Regni Veg.* 53: 49–50. 1944, *Planta Medica* 65(8): 757–758. 1999, *Pure Appl. Chem.* 73(7): 1197–1208. 2001

(Antiplasmodial, astringent, to treat dysentery, bilharzia. Fresh leaf sap applied to the skin to cure ringworm, cracked lips and rash; sap disinfectant applied to wounds to promote healing; crushed leaves a dressing for burns.)

in English: bushy bulbine

in South Africa: geelkatstert, ibhucu, intelezi, moetsa-mollo, wildekopieva

in Tanzania: in'tepa

Bulbine alooides (L.) Willd. (*Anthericum aloifolium* Salisb.; *Anthericum alooides* L.; *Bulbine acaulis* L.; *Bulbine alooides* Willd.; *Bulbine macrophylla* Salm-Dyck; *Bulbine platyphylla* Baker; *Phalangium alooides* (L.) Kuntze)

S. Africa. Flowers yellow

See *Prodr. Stirp. Chap. Allerton* 250. 1796, *Enum. Pl.* 1: 372. 1809, *Hort. Dyck.* 333. 1834, *Revis. Gen. Pl.* 2: 713. 1891

(Roots taken to counteract vomiting, diarrhea, lumbago and urinary infections. Veterinary medicine, a decoction of the root used to treat Redwater, Babesiosis or cattle tick fever.)

in South Africa: rooiwortel

Bulbine asphodeloides (L.) Spreng. (*Anthericum altissimum* Mill.; *Anthericum asphodeloides* L.; *Anthericum longiscapum* Jacq.; *Anthericum succulentum* Salisb., nom. illeg.; *Bulbine altissima* (Mill.) Fourc.; *Bulbine asphodeloides* Spreng.; *Bulbine asphodeloides* Willd.; *Bulbine asphodeloides* (L.) Willd.; *Bulbine crocea* L. Guthrie; *Bulbine dielsii* Poelln.; *Bulbine longiscapa* (Jacq.) Willd.; *Bulbine mettinhii* Ten.; *Bulbine pallida* Baker; *Phalangium altissimum* (Mill.) Kuntze; *Phalangium asphodelodes* (L.) Kuntze; *Phalangium longiscapum* (Jacq.) Kuntze)

Mozambique, South Africa.

See *Prodr. Stirp. Chap. Allerton* 250. 1796, *Syst. Veg.* (ed. 16) [Sprengel] 2: 85. 1825, *Revis. Gen. Pl.* 2: 713. 1891, *Revis. Gen. Pl.* 3(2): 317. 1898 and *Ann. Bolus Herb.* 4: 30. 1925, *Trans. Roy. Soc. South Africa* 21: 78. 1932, *Repert. Spec. Nov. Regni Veg.* 53: 40. 1944

(Leaf sap applied to promote wound healing. A decoction of the rhizomes drunk to cure scrophula, venereal diseases and diarrhea. Veterinary medicine.)

Bulbine capitata Poelln. (*Bulbine asphodeloides* var. *otavensis* Poelln.; *Bulbine lydenburgensis* Poelln.; *Bulbine stenophylla* Verd.)

South Africa. Perennial herb, yellow flowers

See *Feddes Repert. Spec. Nov. Regni Veg.* 52: 113. 1943, *Repert. Spec. Nov. Regni Veg.* 53: 37, 44. 1944, *Fl. Pl. Africa* 27: t. 1044. 1948, *Phytochemistry* 46(6): 1063–1067. 1997, *Pure Appl. Chem.* 73(7): 1197–1208. 2001, *Planta Medica* 67: 340–344. 2001

(Antiplasmodial. Root decoction applied to the skin to cure rashes and sexually transmitted diseases, also taken orally as a mild purgative and to cure gonorrhoea.)

Bulbine frutescens (L.) Willd. (*Anthericum frutescens* L.; *Anthericum fruticosum* Salisb.; *Anthericum incurvum* Thunb.; *Anthericum multiceps* Poelln.; *Anthericum rostratum* Jacq.; *Bulbine caulescens* L.; *Bulbine frutescens* var. *incurva* (Thunb.) Rowley; *Bulbine frutescens* var. *rostrata* (Jacq.) Rowley; *Bulbine incurva* (Thunb.) Spreng.; *Bulbine rostrata* Willd.; *Bulbine triebneri* Straub; *Bulbine triebneri* Dinter; *Phalangium frutescens* (L.) Kuntze; *Phalangium rostratum* (Jacq.) Kuntze)

South Africa. Succulent perennial herb, branched, small star shaped flowers yellow or sometimes orange

See *Enum. Pl.*: 372. 1809 and *Repert. Spec. Nov. Regni Veg.* 52: 113. 1943, *Natl. Cact. Succ. J.* 28: 6. 1973, *African Journal of Biotechnology* 4(12): 1458–1460. 2005

(Used for the treatment of diabetes, infusion made from fresh boiled roots and taken orally. Fresh leaf juice for burns,

rashes, blisters, insect bites, cracked lips, acne, cold sores, mouth ulcers. An infusion of a few fresh leaves taken for coughs, colds and arthritis.)

in English: burn jelly plant, cat's tail, snake flower

in South Africa: balsem kopieva, copaiva, geelkatstert, ibhucu, kopieva, wildekopieva

Bulbine latifolia (L.f.) Spreng. (*Anthericum latifolium* L.f.; *Bulbine brunsvigiaefolia* Baker; *Bulbine latifolia* (L.f.) Roem. & Schult.; *Bulbine natalensis* Baker; *Phalangium latifolium* (L.f.) Kuntze, nom. illeg.)

Trop. & S. Africa. Succulent, yellowish fleshy roots, small yellow flowers, spreading petals, small blackish flattened wind dispersed seed, rapidly growing, often a pioneer

See *Syst. Veg.* 2: 86. 1825, *Revis. Gen. Pl.* 2: 713. 1891, *Fl. Cap.* 6: 366. 1896 and *Bothalia* 14: 215–217. 1983, *African Journal of Biotechnology* 4(12): 1458–1460. 2005

(Leaves for skin diseases, eczema. Used for the treatment of diabetes, infusion made from fresh boiled roots and taken orally; roots taken orally for urinary complaints, against vomiting and diarrhea.)

in South Africa: ibhucu, iBhucu, rooiwortel

Bulbine narcissifolia Salm-Dyck (*Bulbine densiflora* Baker; *Bulbine latibracteata* Poelln.; *Phalangium densiflorum* Kuntze; *Phalangium densiflorum* (Baker) Kuntze; *Phalangium narcissifolium* (Salm-Dyck) Kuntze; *Phalangium narcissifolium* Kuntze)

S. Africa. Succulent, grey-green, stemless, perennial herb, rhizomatous base, bluish-green flat twisted leaves, yellowish exudate, small bright yellow flowers

See *Hort. Dyck.* 333. 1834, *J. Linn. Soc., Bot.* 15: 347. 1876, *Revis. Gen. Pl.* 2: 713. 1891 and *Repert. Spec. Nov. Regni Veg.* 53: 43. 1944, *Journal of Natural Products* 64: 1368–1372. 2001

(Used for wound healing, diabetes, rheumatism, blood problems, and as a mild purgative; fresh leaf sap applied to wounds to promote healing, as a wart and corn remedy, and to cure ringworm and rash; cold infusion of the leaves purgative. Roots taken to counteract vomiting, diarrhea and urinary infections; roots infusion healing womb tumours and clean ovaries; roots decoction taken to relieve rheumatic pain and to induce pregnancy.)

in English: snake flower, strap-leaved bulbine

in Southern Africa: geelslangkop, khomo-ea-balisa, khomo-ea-basemane, kopiva, lintblaar bulbine, serelelele, slangkop, wildekopieva, wildekopiva

Bulbophyllum Thouars Orchidaceae

Greek *bolbos* 'bulb' and *phyllon* 'a leaf', referring to the leafy and single-noded pseudobulbs, the inflorescence

arising at the base of the prominent pseudobulbs, fleshy solitary leaves born from the pseudobulbs; see *Nouveau Bulletin des Sciences*, publié par la Société Philomatique de Paris 1: 319. 1809, Louis-Marie Aubert du Petit-Thouars, *Histoire particulière des plantes orchidées*. Paris 1822, *Sylloge Plantarum Novarum* 2: 4–5. 1828[1825], *The Genera and Species of Orchidaceous Plants* 45, 58. 1830, *Botanische Zeitung*. Berlin 10: 934. 1852, *Annales Botanices Systematicae* 6: 259. 1861 and *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 93. 1978, *Harvard Pap. Bot.* 5(2): 383–466. 2001, *Flora of China* 25: 417, 427. 2009.

Bulbophyllum fischeri Seidenf. (*Bulbophyllum gamblei* (Hook.f.) J.J. Sm., nom. illeg.; *Bulbophyllum thomsonii* (Hook.f.) J.J.Sm., nom. illeg.; *Cirrhopetalum gamblei* Hook.f.; *Cirrhopetalum thomsonii* Hook.f.; *Phyllorkis gamblei* (Hook.f.) Kuntze; *Phyllorkis hookeri* Kuntze)

India, Sri Lanka. Epiphyte, yellowish green flowers

See *Fl. Brit. India* [J.D. Hooker] 5: 778, 786. 1890, *Revis. Gen. Pl.* 2: 676–677. 1891, *Hook. Icon. Pl.* xxi. (1891) t. 2058, 2059. 1891 and *Bull. Jard. Bot. Buitenzorg*, II, 8: 24, 28. 1912, *Dansk Bot. Ark.* 29: 202. 1973 (publ. 1974)

(Used in Ayurveda. A general tonic.)

Bulbophyllum neilgherensis Wight (*Bulbophyllum neilgherrense* Wight; *Phyllorchis nilgherensis* (Wight) Kuntze)

India. Small epiphytic herb, globular conical pseudobulbs, brownish-yellow or greenish purple flowers in many flowered erect raceme, stout scape

See *Icon. Pl. Ind. Orient.* t. 1650. 1851, *Fl. Brit. India* [J.D. Hooker] 5: 761. 1890, *Revisio Generum Plantarum* 2: 677. 1891 and *Leaflets of Philippine Botany* 5: 1, t. 1680. 1912, *Pl. Madras* 1418. 1928, *Taxon* 30: 704–705. 1981

(Powdered dried plant given as tonic, stimulant, corroborant. Bulbs and leaves ground into fine paste mixed with cow's milk and given to drink for leucoderma.)

in India: kallukai, kalmel pulluruvi

Bulbostylis Kunth Cyperaceae

Greek *bolbos* 'a bulb' and *stylos* 'style, column', the style has a bulb-like base; see Carl Sigismund Kunth, *Enumeratio Plantarum*. 2: 205. 1837 and *Fieldiana, Bot.* 24(1): 90–196. 1958, *Willdenowia* 22: 133–142. 1992, *Fl. Mesoamer.* 6: 452–455. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 458–551. 2003.

Bulbostylis barbata (Rottb.) C.B. Clarke (*Abildgaardia barbata* (Rottb.) P. Beauv.; *Bulbostylis barbata* (Rottb.) Kunth; *Bulbostylis fimbriata* (Nees) C.B. Clarke; *Bulbostylis floridana* (Britton ex Nash) Fernald; *Cyperus barbata* (Rottb.) Poir.; *Fimbristylis barbata* (Rottb.) Benth.; *Iria barbata* (Rottb.) Kuntze; *Isolepis barbata* (Rottb.) R. Br.; *Oncostylis fimbriatus* Nees; *Scirpus barbatus* Rottb.; *Scirpus*

barbatus Rottb.; *Scirpus barbatus* Rottb.; *Scirpus dus-sii* Boeck.; *Scirpus fimbriatus* (Nees) Boeck.; *Stenophyllus barbatus* (Rottb.) Britton; *Stenophyllus barbatus* (Rottb.) Fyson, nom. illeg.; *Stenophyllus barbatus* (Rottb.) T. Cooke; *Stenophyllus fimbriatus* (Nees) Britton; *Stenophyllus floridanus* Britton ex Nash)

India. Tufted annual sedge, cattle feed

See *Descriptiones Plantarum Rariorum* 27. 1772, *Descriptionum et Iconum Rariores* 52, pl. 17, f. 4. 1773, *Prodromus Florae Novae Hollandiae* 1: 222, 312. 1810, *Flore d'Oware* 2: 47. 1816, *Encyclopédie Méthodique. Botanique* ... Supplément 5: 186. 1817, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 2: 208. 1837, *Flora Brasiliensis* 2(1): 88. 1842, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1869: 138. 1869, *Linnaea* 36: 749. 1870, *Flora Australiensis: a description* ... 7: 321. 1878, *Beiträge zur Kenntniss der Cyperaceen* 2: 38. 1890, *Revisio Generum Plantarum* 2: 753. 1891, *Index Kewensis* 1: 1237. 1893, *The Flora of British India* 6(19): 651. 1893, *Bulletin of the Torrey Botanical Club* 22(4): 161. 1895 and *Symbolae Antillarum* 2(1): 87. 1900, *The Flora of the Presidency of Bombay* 2(2): 887. 1908, *Bulletin of the Torrey Botanical Club* 43: 446. 1916, *Bot. Bull. Pres. Coll. Madras* 1: 64. 1919, *Rhodora* 40(478): 392. 1938

(Plants infusion given in dysentery.)

in India: masa, piazì

Bunchosia Rich. ex Juss. Malpighiaceae

From the Arabian name for a substitute of coffee, *bunchos* or *bonkhos*, referring to the fruit, see *Annales du Museum d'Histoire Naturelle Par.* xviii. 481. 1811, *Linnaea*, xiii. 248. 1839, *Revis. Gen. Pl.* 1: 87. 1891 and *Fieldiana, Bot.* 24(5): 468–500. 1946, *Field Mus. Nat. Hist., Bot. Ser.* 13(3/3): 781–871. 1950.

Bunchosia glandulosa (Cav.) DC. (*Bunchosia glandulosa* DC.; *Malpighia glandulosa* Cav.)

Tropical America, West Indies. Shrub or tree, perennial, yellow flowers, considerable confusion about this species

See *Species Plantarum* 1: 425–427. 1753, *Enumeratio Systematica Plantarum* 21. 1760, *Monadelphiae Classis Dissertationes Decem* 8: 411, t. 239. 1789, *Nova Genera et Species Plantarum* (quarto ed.) 5: 153. 1821[1822], *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 581. 1824, *Flora of the British West Indian Islands* 115–116. 1859 and *Taxon* 17: 317. 1968, *Economic Botany* 29(4): 307–332. 1975

(A woman medicine, a tea from the roots for the fertility. Magic, ritual, ceremonial, to sweep away evil winds or spirits.)

Vernacular names: cafe forastero, siip che', stinkwood, zip che

Bunchosia nitida (Jacq.) DC. (*Bunchosia cornifolia* Kunth; *Bunchosia glauca* Kunth; *Bunchosia glauca* Seem. ex

Hemsl., nom. inval.; *Bunchosia lanieri* S. Watson; *Bunchosia nitida* (Jacq.) A. Rich.; *Malpighia nitida* Jacq.; *Malpighia nitida* Sw.; *Malpighia nitida* Mill.; *Malpighia nitida* Cav.; *Malpighia nitida* Crantz)

South America.

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 21. 1760, *Inst. Rei Herb.* 2: 478. 1766, *The Gardeners Dictionary*: ... eighth edition no. 5. 1768, *Observ. Bot.* (Swartz) 180–181. 1791, *Annales du muséum national d'histoire naturelle* 18: 481. 1811, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 5: 154. 1821[1822], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 582. 1824, *Biologia Centrali-Americana*; ... *Botany* ... 1(2): 147. 1879, *Proceedings of the American Academy of Arts and Sciences* 21: 461. 1886 and *Fieldiana, Bot.* 24(5): 468–500. 1946, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 253–312. 2007

(Seeds purgative, antiemetic.)

Vernacular names: ciruela del fraile, ciruela del país

Bunchosia swartziana Griseb. (*Bunchosia swartziana* var. *yucatanensis* Nied.)

Tropical America, West Indies. Shrub or tree, perennial, yellow flowers, small round red fruits, considerable confusion about this species

See *Enumeratio Systematica Plantarum* 21. 1760, *Flora of the British West Indian Islands* 115–116. 1859 and *Das Pflanzenreich* [Heft 94] 4, Fam. 141: 649. 1928

(For epilepsy, convulsions. Magic, ritual, ceremonial, to sweep away evil winds or spirits.)

Mayan names: sip che, zip-ché

Bunium L. Apiaceae (Umbelliferae)

From *bounion*, a Greek classical name used by Dioscorides for a plant, the earth-nut, *Bunium ferulaceum*, Latin *bunion*, *ii* for a kind of Swedish turnip (Plinius), see *An Introduction to the Natural System of Botany* 21. 1836.

Bunium persicum B. Fedtsch. (*Bunium persicum* (Boiss.) B. Fedtsch.; *Carum bulbocastanum* auct.; *Carum bulbocastanum* W.D.J. Koch; *Carum persicum* Boiss.)

Central Asia to Northern India. Perennial herb, branched, tiny white flowers in umbel, root eaten as a vegetable, aromatic ripe fruits contain essential oil, fragrant seeds as condiment for flavouring dishes

See *Species Plantarum* 1: 243, 263. 1753, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 12(1): 121. 1824, *Ann. Sci. Nat., Bot.* sér. 3, 1: 138. 1844 and *Rastit. Turkest.* 612. 1915, *Phytomedicine*

11(5): 411–415. 2004, *Natural Product Research: Formerly Natural Product Letters* 20(9): 882–886. 2006, *Journal of Chemical Ecology* 33(11): 2123–2132. 2007, *Plant Foods for Human Nutrition* 63(4): 183–188. 2008, *Pak. J. Pharm. Sci.* 22(1): 30–35. 2009, *Pak. J. Pharm. Sci.* 23(3): 300–304. 2010, *World J. Gastroenterol.* 16(36): 4504–4514. 2010, *Pharmaceutical Biol.* 49(2): 146–151. 2011

(Used in Ayurveda. Fruits and essential oil antiinflammatory and analgesic, antifungal, antioxidant, antispasmodic, antihistaminic, carminative, antiseptic, stimulant, anthelmintic, hypoglycemic, antiobesity, lactagogue, useful in painful and inflammatory conditions, diabetes and obesity, inflammatory bowel disease, abdominal pain, colic pain, dysmenorrhea, diarrhea, dyspepsia, fever, flatulence, stomachache, piles, hiccup.)

in English: black caraway, black cumin, black jeera, black zira, imperial cumin, Kashmiri cumin, king's cumin, mountain cumin, royal cumin, wild cumin

in India: Himali jira, kal jiru, kala jeera, kala jira, kala jirah, kala zera, kala zira, kala zirah, kalajeera, kalajira, kalazera, kalazira, Kashmiri jira, Kashmir zireh, Kashmiri zireh, Kasmiri jira, koshur zur, Krishnajeerak, Krishna jiira, pilappu shiragam, sajira, shah jeerun, shah zira, shahajirige, shahi jira, shemaishiragam, shime jeerige, siah zeera, siah-zirah, simajilakara, thayan, zeur, zireh e irani, zireh kohi, zireh kuhi

in Iran: zire kermani

in Japan: burakku-kumin

in Nepal: Himali jira, kalo jira

in Pakistan: kala zira

Bupleurum L. Apiaceae (Umbelliferae)

From *boupleuron*, *boupleuros* (*bous* 'an ox' and *pleura*, *pleuron* 'rib'), a Greek name for hare's-ear and bishop's weed, *Ammi majus*; Latin *bupleuron*, *i* for *Bupleurum baldense* Host; see Carl Linnaeus, *Species Plantarum*. 1: 236–239. 1753, *Genera Plantarum*. Ed. 5. 110. 1754 and *Taxon* 41: 572. 1992, *Taxon* 44: 611–612. 1995, Bradley M. Deane, *Sho-Saiko-To: Scientific Evaluation and Clinical Applications*. CRC Press 2004, Sheng-Li Pan (edited by), *Bupleurum Species: Scientific Evaluation and Clinical Applications*. CRC Press/Taylor and Francis 2006. The roots of several species of *Bupleurum* are famous for their use as the traditional Chinese medicine *chai hu* for treatment of coughs, common cold, fevers, irregular menstruation, and influenza. Almost all of the species are recorded in the literature as regional substitutes for *chai hu* or for other local medicinal purposes. However, caution should be applied as a very few species are toxic (e.g., *Bupleurum longiradiatum*) and can result in "toxic strike" if misused as such substitutes.

Bupleurum angustissimum (Franchet) Kitagawa (*Bupleurum falcatum* f. *angustissimum* (Franchet) C. Pei & R.H. Shan; *Bupleurum falcatum* subf. *angustissimum* (Franchet) H. Wolff; *Bupleurum falcatum* var. *angustissimum* Franchet; *Bupleurum scorzonerifolium* subsp. *angustissimum* (Franchet) Kitagawa; *Bupleurum scorzonerifolium* var. *angustissimum* (Franchet) Y. Huei Huang)

China. Perennial, yellow flowers

See *Plantae Davidianae ex Sinarum Imperio* 1: 138. 1883 and *Report of the Institute of Scientific Research, Manchoukuo* 4: 105. 1940, *J. Jap. Bot.* 21(5–6): 97. 1947, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 6: 197. 1977

Burasia Thouars Menispermaceae

From Bourasaha, the name of the plant in Madagascar.

Burasia madagascariensis DC.

Madagascar. Tree

See *Genera Plantarum* 284–285. 1789, *Genera Nova Madagascariensia* 18. 1806, *Regni Vegetabilis Systema Naturale* 1: 514. 1818[1817]

(Bark boiled and liquid drunk to treat dysentery.)

in Madagascar: hazon-dahy

Burkea Hook. Fabaceae

(Caesalpinieaceae, Caesalpinieae)

Named after the British (b. Bristol) botanist and collector Joseph Burke, 1812–1873 (d. Harrisonville, U.S.A.), collector of animals and plants for Earl of Derby, sailed from England on brig *Joanna* on 1839 and arrived in Table Bay on March 1840, he met up with Carl L.P. Zeyher (1799–1858) on 14 July 1840 in Uitenhage; after several collecting expeditions Burke left Zeyher in Capetown and left for England in July 1842, emigrated to USA in 1848. See Alain Campbell White and Boyd Lincoln Sloane, *The Stapelieae*. Pasadena 1937, *Bothalia* 3: 237. 1937, John Hutchinson (1884–1972), *A botanist in South Africa*. 642. London 1946, Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950, M. Gunn and L.E. Codd, *Botanical Exploration of Southern Africa*. 110–111. Cape Town 1981.

Burkea africana Hook. (*Burkea africana* var. *andongensis* Oliv.; *Burkea africana* var. *cordata* Welw. ex Oliv.)

Tanzania, South Africa. Perennial non-climbing tree, deciduous, branched near base, flowers white cream, flat elliptic brown pods, browsed by game, leaves food resource of some kinds of edible caterpillars, resin edible

See *Hooker's Icones Plantarum* pl. 593–594. 1843 and *Phytotherapy research* 16(2): 148–153. 2002

(Toxins. Bark toxic to stock, foliage toxic to all stock. Leaves febrifuge. Fruit for dysentery, diarrhea. Roots for stomach pain and toothache. Bark antioxidant, stimulant, radical scavenging activity, decoction for cough, colds, stomach obstruction; infusion against gonorrhoea and syphilis. Arrow poison antidote. Poisonous to fish, pounded bark used as fish stupefiant. Ritual, magic, ash from charred roots.)

Jamaica, West Indies. Tree, semi-deciduous, very rapidly-growing, reddish-brown lustrous scaling bark, vigorous erect suckers, odd-pinnate green leaves with 5–9 asymmetrical leaflets borne on hairy twigs, inconspicuous flowers with creamy white or greenish petals, seeds very hard covered by a thin red flesh, leaves fed to sheep and goats, living fence post

See *Species Plantarum* 2: 1026. 1753, *Enumeratio Systematica Plantarum* 3, 19. 1760, *Species Plantarum*, Editio Secunda 2: 471. 1762, *Selectarum Stirpium Americanarum Historia* ... 94, t. 65. 1763, *Histoire des plantes de la Guiane Française* 1: 470, t. 188. 1775, *Linnaea* 17: 248. 1843, *Annales des Sciences Naturelles; Botanique*, sér. 3 4: 368. 1846, *Annales des Sciences Naturelles; Botanique*, série 4 14: 303. 1872, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 43. 1881, *Monographiae Phanerogamarum* 4: 40. 1883, *Garden & Forest* 3(218): 260. 1890 and *North American Flora* 25: 246–247. 1911, *Die Natürlichen Pflanzenfamilien* ed. 2, 19a: 425. 1931, *Phytologia* 1(6): 216. 1937, *Journal of Ethnobiology* 3(2): 149–156. December 1983, *Bot. Commelin* 55. 1983, *Fl. Veracruz* 94: 21. 1996

(Antiinflammatory, purgative, antimicrobial, for fever and colds, back pain, rheumatism, diarrhea, dermatitis. *Bursera simaruba* is known as the antidote to skin burns produced by the *chechen*, *Metopium brownei*. Flowers and fruits remedies for snakebite and diarrhea; branches and leaves for cold, fever and diarrhea. Bark used for cleaning wounds, spider bites, fever, nose bleeding, and muscle pain and an infusion of the wood decoction is said to help lose weight. Hot sap mixed with sugar as a blood tonic taken by pregnant women; resin plastered onto strain areas of the body. Leaves used for ulcers, measles, infected gums, asthma, bloody stools and pain, headache, stomachache and toothaches; leaves infusion for rash. Love potion. the leafy twig.)

in English: aerial yam, American elemi, gum elemi, gumbo limbo, incense tree, naked indian, red gumbolimbo bark, turpentine, West Indian birch, West Indian elemi

in Central America: almácigo, bastard gommier, cajha, chacah, chakah, chibou, chinacahuite, chino, copal, copal-cuahuitl, ginicuite, golamine, gommali, gommalmi, gomyé wouj, gumbo limbo, Indio desnudo, jiote, palo jiote, palo mulato, pom, solpiem, tacamahaca, xacago-que

Butea Roxb. ex Willd. Fabaceae (Phaseoleae)

Named for John Stuart, 3rd Earl of Bute, 1713–1792 (b. Edinburgh, d. London), botanist, a patron of science as well as of literature and art, Prime Minister 1762–1763, plantsman, introduced many new species to Kew, author of *Botanical tables*, containing the different families of British plants. [London 1785?]. See *Plants of the Coast of Coromandel* 1: 22. 1795, *Species Plantarum*. Editio quarta 3(2): 917. 1802 and J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 291. 1965, Frans A. Stafleu, *Linnaeus and the Linnaeans*. The spreading of their ideas in systematic botany, 1735–1789. 231. [“the botanophilic Lord Bute...”] Utrecht 1971, Blanche Henrey, *British Botanical and Horticultural Literature before 1800*. 2: 242–243. Oxford 1975, George Taylor, in *D.S.B.* 1: 88. 1981.

Butea buteiformis (Voigt) Grierson & D.G. Long (*Butea buteiformis* (Voigt) Grierson; *Butea buteiformis* (Voigt) Mabb.; *Butea minor* Baker; *Butea minor* Buch.-Ham. ex Baker; *Butea minor* Buch.-Ham. ex Wall.; *Butea xizangensis* X.Y. Zhu & Y.F. Du; *Megalotropis buteiformis* (Voigt) Griff.; *Meizotropis buteaeformis* Voigt; *Meizotropis buteiformis* Voigt; *Plaso minor* (Baker) Kuntze)

India. Perennial non-climbing shrub, erect, tomentose, see also *Meizotropis*

See *Numer. List* [Wallich] n. 5439. 1831–1832, *Hort. Suburb. Calcutt.* 239. 1845, *Notulae ad Plantas Asiaticas* 4: 441. 1854, *The Flora of British India* 2: 195. 1876, *Revis. Gen. Pl.* 1: 202. 1891 and *Notes from the Royal Botanic Garden, Edinburgh* 37(2): 346. 1979, *Bot. Hist. Hortus Malabaricus* 96. 1980, *Taxon* 29(5–6): 605. 1980, *Bull. Bot. Surv. India* 29(1–4): 199–225. 1987, *Fitoterapia* 66(2): 149–155. 1995, *Legumes of China* 627–630, f. 1–2, t. 1. 2007

(Anthelmintic, seed paste mixed with water drunk to kill intestinal worms; seed powder given as anthelmintic.)

in China: xi zang zi kuang

in India: diengla palang, fu, thual thu, thual tu

in Nepal: bhujetro, dibhar

Butea monosperma (Lam.) Taub. (*Butea braamania* DC.; *Butea braamiana* DC.; *Butea frondosa* Wall., nom. nud.; *Butea frondosa* Roxb.; *Butea frondosa* Willd.; *Butea frondosa* Roxb. ex Willd., nom. illeg.; *Butea frondosa* K.D. Koenig ex Roxb.; *Butea frondosa* Wall.; *Butea frondosa* var. *lutea* (Witt.) Maheshw.; *Butea monosperma* Kuntze, nom. nud.; *Butea monosperma* Taub.; *Erythrina monosperma* Lam.; *Plaso monosperma* (Lam.) Taub.; *Plaso monosperma*

Kuntze; *Plaso monosperma* (Lam.) Kuntze; *Plaso monosperma* var. *flava* Kuntze; *Plaso monosperma* var. *rubra* Kuntze; *Rudolphia frondosa* (Willd.) Poir.; *Rudolphia frondosa* Poir.)

Sri Lanka, India, Myanmar. Perennial non-climbing tree, deciduous, small tree, crooked trunk, red latex, rough greyish-brown fibrous bark, branchlets densely pubescent, leaves trifoliolate, coriaceous leaflets silky tomentose, bright orange flowers densely clustered on leafless branches, silky tomentose oblong flat swinging single-seeded pod, ellipsoid flattened seeds, used for rearing insects and producing lacs

See *Species Plantarum* 2: 706–707. 1753, *Familles des Plantes* 2: 325. 1763, *Encyclopédie Méthodique, Botanique* 2(1): 391–392. 1786 (also *Encycl.* (Lamarck) 1(2): 391. 1785 [1 Aug 1785], IPNI record), *Asiatic Researches* 3: 469–474. 1792, *Plants of the Coast of Coromandel* 1: 21, 23, t. 22. 1795, *Species Plantarum*. Editio quarta [Willdenow] 3(2): 917. 1802, *Encycl.* (Lamarck) 6(1): 333. 1804, *Prodr.* (DC.) 2: 415. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 5569. 1831–1832, *Revisio Generum Plantarum* 1: 202. 1891, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(3): 366, f. 131M-N. 1894 and *Journal of Tree Sciences* 2: 101–103. 1983, *Cytologia* 54: 51–64, 91–95. 1989, *Journal of Cytology and Genetics* 25: 173–219, 308–320. 1990, *J. Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996, *Ethnobotany* 13: 118–120. 2001

(Used in Ayurveda, Unani and Sidha. Powdered seeds purgative, diuretic, very unpleasant, wormicide, anthelmintic (this use is not always considered safe in humans!), insect repellent, bactericidal and fungicidal, used to kill maggots and round worms, mixed with juice of the rhizome of *Cyperus rotundus* given for delirium; seeds pounded with lemon juice a powerful rubefacient, antiviral; seed paste used for cooling effect; seeds powdered and dissolved in hot water given for birth control by prevention of pregnancy; seed oil spermicidal, muscle toner, contraceptive. Roots boiled in water and the vapor directed to the face to cure muscular pain and swelling, also root paste applied all over the body. Leaf and flower diuretic, astringent, aphrodisiac, emmenagogue; leaves or flowers decoction antidiabetic; bark, leaves and flowers for diarrhea and dysentery; bark, leaves and fruits for ringworm and urinary diseases. Flowers for liver and kidney disorders, diarrhea, sexual debility, spermatorrhea, severe stomachache and eye diseases; flower infusion given in acute diarrhea; pounded flowers given with honey in urinary troubles. Leaves juice antibacterial, used externally to cure skin diseases; leaves for regulating fertility, a slow sterilizer. Red exudate a powerful astringent, applied in cases of diarrhea and diabetes. Bark astringent, styptic, anthelmintic, antifungal, stem bark infusion drunk for snakebite; stem bark boiled in water and the filtered water used for bathing when suffering from jaundice; sap from bark applied to eyes to cure jaundice; stem bark juice rubbed for itches; bark and flower for diabetes. Stem bark crushed and dropped in water as fish poison. Sacred plant, used in religion and magico-religious

beliefs, a sacred tree of Buddhists; ceremonial, spiritual, ritual, superstitions, emotional, ingredient of Patra *pooja* in different religious *pooja* ceremonies; flowers on Dhuleti festival; in Hindu religion, during Chatrumas Mahatma, the tree is worshipped as the trifoliate leaves symbolize Gods Brahma, Vishnu and Shiva; contact therapy, root tied to the arm of a woman to get rid of barrenness. Flowers are worn in ear by Hindu women. Veterinary medicine, stem bark extract given in babesiosis; crushed roots made into a paste applied for stomachache of cattle.)

in English: bastard teak, Bengal kino, butea gum, flame of the forest, muduga oil, tisso flowers

in Burma: pouk-pen

in Cambodia: chaa

in China: zi kuang

in Tibetan: ma-ru-tse, ma-ru-tse srin-bu dmar-leb, rgya skyegs, rgya skyegs sin, tshos-sin

Butea superba Roxb. (*Plaso superba* (Willd.) Kuntze; *Rudolphia superba* (Willd.) Poir.; *Rudolphia superba* Poir.)

India, Thailand. Perennial climbing, crawling, very large twining shrub, a giant liana, long underground tuberous roots, red flowers, plant is a lac-host, used for rearing insects and producing lacs

See *Familles des Plantes* 2: 325. 1763, *Asiatic Researches* 3: 473–474. 1792, *Species Plantarum*. Editio quarta 3(2): 917. 1802, *Encyclopédie Méthodique, Botanique* 6(1): 332. 1804

(Used in Ayurveda and Sidha. Paste of leaflets applied on cuts, wounds and boils. Tuberous roots given to increase lactation after childbirth and as postpartum remedy and stomachic. Roots hypotensive, sex enhancer, tonic and virility

enhancer, given for lactation after childbirth, and also against stomachache, to enhance libido, to improve sexual performance and the erectile function; roots of *Blumea laciniata* along with those of *Butea superba* and *Vitis repanda* used for snakebite; paste of roots used to join fractured bones, also applied in skin diseases, eczema. Seeds sedative, anthelmintic, hypotensive. Juice from stem bark has healing effects on cuts; stem bark made into a paste given in hematuria.)

in English: climbing palas, red kwao krua

in India: baaranki chettu, badli, badli palasa, balli-muttaga, bari okhat, bel-palas, beltivas, bodla, chhola-ki-bel, chihunt, dagadar, dotaragan, gadha palas, gandha palasa, hruichun, hruidum, ipparathi, kaithi, kesu, kesuphool, khakhar vel, kimsuka, kodi-murukkam, kodi-palasham, koti murukkan, kotimurukkam, kotippalacam, lal palash, lataa-palaash, latapalasa, latapalash, latapalasha, latpalash, moduga, modugaige, modugatheega, modugatige, mothugatiga, mullu mutthuga, mullumuttuga, murukkan pishin, mutthugada balli, muthugabilu, muthugina-baili, muthuginaballi, muttugada balli, muttuginaballi, muttanabilu, nari murup, palas, palas lata, palas-vel, palas-wail, palasavela, palasbel, palashaniryasam, palasha-pishin, palasini, palaslata, palasvel, pharsabel, phul kesu, teegamoduga, theegeomoduga, thigamoduga, thivvamoduga, tiga moduga, tigamoduga, tige-palashamu, tigemoduga, tivvamoduga, valavarai, valli-murukka, valli-palasa, valliplach-cha, yelparas

Butomus L. Butomaceae

Greek *bous* 'an ox' and *tome* 'division, section, cutting', *tome*, *tomos*, *temno* 'division, section, to slice', referring to the sharp leaf-margins; *boutomos*, *boutomon* was the ancient Greek name for a sedge, *Carex riparia*, Theophrastus, *HP*. 1.10.5; see *Species Plantarum* 1: 372. 1753 and Franco Montanari, *Vocabolario della Lingua Greca*. 419. Torino 1995.

Butomus umbellatus L.

North America. Stout, perennial, umbellate, scapigerous herb, rhizomes horizontal

See *Species Plantarum* 1: 372. 1753 and *Taxon* 28: 405. 1979, *Taxon* 29: 707–709. 1980, *Folia Geobot. Phytotax.* 28: 385–411. 1993, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 26/27: 15–18. 1997

(Roots extract for intestinal disorders. Leaves paste applied for relieving throat ache.)

in English: flowering rush, grassy-rush, water-gladiolus

in India: kounji tour

Buxus L. Buxaceae

Latin *buxus*, *i* 'boxwood, the box-tree', classical name used by Vergilius and Plinius; Greek *pyxos* used also for *Buxus sempervirens*; see Carl Linnaeus, *Species Plantarum*. 2: 983.

1753, *Genera Plantarum*. Ed. 5. 423. 1754, *Hooker's Icones Plantarum* 14: 78. 1882, *Annales des Sciences Naturelles Botanique*, sér. 8 5: 326. 1897.

Buxus microphylla Siebold & Zucc. var. *japonica* (Müll. Arg.) Rehder & E.H. Wilson

North America. Evergreen shrubs, small opposite simple leaves, small flowers in axillary clusters

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 142. 1843, *Ann. Mus. Lugd.-Bat.* 3: 128. 1867 and *Plantae Wilsonianae* 2(1): 168. 1914

(Low toxicity if eaten; contact with cell sap may cause skin irritation.)

in English: Japanese boxwood

Buxus rolfiei S. Vidal

Philippines.

See *Revision de Plantas Vasculares Filipinas* 233. 1886

(Fruits as a fish poison, dried and finely cut.)

Buxus sempervirens L. (*Buxus sempervirens* Thunb.)

Europe. Evergreen shrubs, small opposite simple leaves, small flowers in axillary clusters

See *Species Plantarum* 2: 983. 1753, *Fl. Jap.* (Thunberg) 77. 1784 and *Boxwood Bull.* 1973(10): 21. 1973, *Taxon* 29: 725–726. 1980, *Watsonia* 20: 63–66. 1994

(Low toxicity if eaten; contact with cell sap may cause skin irritation. Stem and leaves infusion taken as sedative, tranquillizer.)

in English: Anatolian box, boxwood, common box, common box tree, European box, Turkish boxwood

in Arabic: baqs, beuqs

in Italian: bosso, bosso comune, bosso verde

in French: buis

in China: huang yang mu

in Japan: asama-tsuge

in Mexico: yaga buxe guvi

Buxus wallichiana Baill. (*Buxus sempervirens* sensu Stewart & Brandis) (the specific name honors the Danish physician and botanical collector Nathaniel Wallich, 1786–1854; see Carl Frederik Albert Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926)

E. Asia, Himalayas. Evergreen shrubs or small trees, monoecious, straight, many-branched, young branches hirsute, dense racemose clusters, flowers greenish-yellow, ovoid 3-beaked coriaceous capsule, horns of the capsule divergent,

glossy-black compressed-ovoid caruncled seeds, foliage pungently scented and bitter

See *Species Plantarum* 2: 983. 1753, *Monogr. Bux. et Styloc.* 63. 1859 and *Tropical Ecology* 47(1): 145–148. 2006, *Iranian Journal of Basic Medical Sciences* 11(4): 236–241. 2009

(Poisonous. Wood diaphoretic, antioxidant, bark febrifuge. Leaves bitter, antioxidant, vermifuge, analgesic, diaphoretic and purgative, useful in the treatment of rheumatism and syphilis. The bitter leaves have been reported to be fatal to cattle and other browsing animals except goats.)

in English: Himalayan box, Himalayan boxwood, Himalayan boxwood tree

in Afghanistan: shanda laghune

in India: chickri, chikdi, chikri, cikri, paapari, papar, papari, paprang, papri, samshad, sansad, sansadu, shamshaad, shamshad, shumaj

in Pakistan: chikri, sansad, shamshad

Byrsonima Rich. ex Kunth Malpighiaceae

From the Greek *byrsa* ‘a hide’ and *nema* ‘thread, filament’, referring to the bark of some species, see *Nova Genera et Species Plantarum* (quarto ed.) 5: 147, 149. 1821[1822] and *Fieldiana, Bot.* 24(5): 468–500. 1946, *Field Mus. Nat. Hist., Bot. Ser.* 13(3/3): 781–871. 1950, *Ceiba* 44(2): 105–268. 2003 [2005].

Byrsonima crassifolia (L.) Kunth (*Byrsonima biacuminata* Rusby; *Byrsonima coriacea* (Sw.) DC.; *Byrsonima cotinifolia* Kunth; *Byrsonima crassifolia* Lunan ex Griseb., nom. illeg.; *Byrsonima crassifolia* Steud., nom. illeg.; *Byrsonima crassifolia* fo. *kunthiana* Nied.; *Byrsonima cubensis* Juss.; *Byrsonima cumingiana* A. Juss.; *Byrsonima fagifolia* Nied.; *Byrsonima fendleri* Turcz.; *Byrsonima ferruginea* Kunth; *Byrsonima karwinskiana* A. Juss.; *Byrsonima lanceolata* DC.; *Byrsonima laurifolia* Kunth; *Byrsonima laurifolia* var. *guatemalensis* Nied.; *Byrsonima moritziana* Turcz.; *Byrsonima panamensis* Beurl.; *Byrsonima pulchra* Sessé & Moc. ex DC.; *Byrsonima rufescens* Bertol.; *Malpighia coriacea* Sw.; *Malpighia crassifolia* L.; *Malpighia moureila* Aubl.; *Malpighia pulchra* Sessé & Moc.)

South America. Tree or shrub, evergreen, slow-growing, variable, dull orange-red flowers, red-hairy erect racemes, white juicy oily pulp, fruits eaten raw or cooked

See *Species Plantarum* 1: 426. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 5: 149. 1821[1822], *Nomenclator Botanicus* ed. 2, 1: 242. 1840, *Novi Commentarii Academiae Scientiarum Institutii Bononiensis* 4: 418–419. 1840, *Flora of the British West Indian Islands* 114. 1859 and *Contr. Univ. Michigan Herb.* 19: 341–354. 1993, *Journal of Pharmacy and Pharmacology* 53(12): 1653–1669. 2001

(A decoction of the dry bark used to treat asthma, bronchitis, colds, coughs, fevers, tonsillitis and skin infections; infusion against diarrhea, gastrointestinal diseases, chronic colitis, chest colds, pulmonary complaints, wounds, skin diseases, stomachache, taken as an antidote for snakebite. Pounded bark poulticed on wounds, pulverized bark applied on ulcers. Leaves and bark to treat diarrhea, the bark ground in water and applied directly to the skin to treat measles. Bark as a poison fish.)

in English: golden spoon, wild cherry, wild craboo

in Central and northern South America: bwa tan, changugu, chaparro, chaparro de chinche, chaparro de sabana, chaparro manteca, chi, chí, crabo, craboo, crapoo, doncela, hicha, hori, huizaa, huria, maache, manero manteco, manteco merey, manteco sabanero, mantequera, maricao, maricao verde, mowisif, nananche, nance, nance agrio, nance verde, nancen, nanche, nanche de perro, nanchi, nancito, nantzin, nanzi, nanzin, natzincuahuitl, noro, peralejo, peralejo blanco, peralejo de sabana, sabana kwari moeleidan, sabana mango, sèwet, tapal, yaca, yaga huizaa, yuco, zacpah

Byrsonima spicata (Cav.) DC. (*Byrsonima coriacea* (Sw.) DC.; *Byrsonima coriacea* fo. *angustifolia* Nied.; *Byrsonima coriacea* var. *spicata* (Cav.) Nied.; *Byrsonima propinqua* Benth.; *Malpighia coriacea* Sw.; *Malpighia spicata* Cav.)

Central America. Tree or shrub, terminal racemes, yellow flowers, petals clawed, globose yellow drupe

See *Nova Genera et Species Plantarum seu Prodrum* 74. 1788, *Monadelphiae classis dissertationes decem.* 8: 409. 1789, *Prodrum Systematis Naturalis Regni Vegetabilis* 1: 580–581. 1824, *London Journal of Botany* 7: 120. 1848 and *Das Pflanzenreich* IV. 141(Heft 94): 700. 1928

(Bark decoction an antidote for rattlesnakebites and also a purgative and febrifuge.)

in Dominica: bwa tan, mowisif, sèwet

in Guyana: hicha, huria

Byrsonima verbascifolia (L.) DC. (*Byrsonima verbascifolia* (L.) Rich. ex Juss.; *Byrsonima verbascifolia* var. *denudata* Cuatrec.; *Malpighia verbascifolia* L.)

South America.

See *Species Plantarum* 1: 426. 1753, *Prodrum Systematis Naturalis Regni Vegetabilis* 1: 579. 1824

(Saponins.)

Byttneria Loefl. Sterculiaceae (Malvaceae)

See Henri Louis Duhamel du Monceau (1700–1782), *Traité des arbres et arbustes qui se cultivent en France en pleine terre.* Paris 1755, Miller, Philip (1691–1771), *Figures of ... Plants ... in the Gardeners Dictionary* 184, pl. 276. 1758 [“The plates are engravings of drawings by G.D. Ehret, J.

Mexico, Venezuela. Vine, climbing shrub, perennial, wiry, stout recurved thorns, long archin canes, troublesome, snake habitat

See *Enumeratio Systematica Plantarum* 2, 17. 1760, *Selectarum Stirpium Americanarum Historia ...* 76–77. 1763, *Selectarum stirpium Americanarum Historia*, ed. 1780–1781 41. 1780, *Encyclopédie Méthodique, Botanique* 1(2): 523. 1785, *Dissertationes Botanicae* 5: 292, t. 149, f. 2. 1788, *Flora Peruviana* 3: 10. 1802, *Systema Vegetabilium* 5: 470. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 487. 1824, *Systema Vegetabilium*, editio decima sexta 1: 849. 1824, *Reliquiae Haenkeanae* 2(2): 144–145. 1835, *Plantas Hartwegianas imprimis Mexicanas* 115. 1843, *Bulletin de la Société Impériale des Naturalistes de Moscou* 36(1): 569. 1863, *Memoirs of the Torrey Botanical Club* 6(1): 11. 1896 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 55(2): 171–172. 1913, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(102): 135–146. 1931, *Occasional Papers*

of the Bernice Pauahi Bishop Museum 14(16): 313–315. 1939, *American Journal of Tropical Medicine* 23(Suppl.): 3–76. 1943

(Emmenagogue, depurative, for venereal and skin diseases. Inflamed and slow healing, cuts and scratches from the thorns.)

in English: snake's pillow

in Costa Rica: uña de gato

in Latin America: bacot mítica, espina hueca, espino hueco, rabo de iguana, rangay, zarza

in Mexico: arrendador, varilla prieta, xtexak, zarza

in Venezuela: zarza hueca

Byttneria africana Mast. (*Byttneria catalpifolia* Jacq. subsp. *africana* (Mast.) Exell & Mendonça)

Tropical Africa. Vine, woody liane, dry prickly fruit

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 21–22, t. 46. 1797, *Flora of Tropical Africa* [Oliver et al.] 1: 239. 1868 and *Conspectus Florae Angolensis* 1: 197. 1951

(Stem and leaves cough sedative, expectorant, tonic.)

Byttneria andamanensis Kurz

India, Burma. Vine, climbing shrub, leaves ovate, yellowish pink flowers, capsules armed with many short stiff sharp prickles

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 40(1): 47. 1871, *Flora* 54: 277. 1871

(Aqueous extract of leaves given during delivery.)

in India: lafech

Byttneria aspera Colebr. ex Wall. (*Byttneria aspera* Colebr.; *Byttneria grandifolia* DC.; *Byttneria nepalensis* Turcz.; *Byttneria siamensis* Craib; *Commersonia aspera* (Colebr. ex Wall.) G. Don; *Commersonia aspera* G. Don)

India. Woody climber, succulent branchlets, cordate orbicular leaves, globose woody armed prickly capsule

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 383–385. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 486–487. 1824, *A General History of the Dichlamydeous Plants* 1: 523. 1831, *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 207. 1858 and *Bulletin of Miscellaneous Information Kew* 48(9): 300. 1920

(Macerated stems for washing wounds, hairs.)

in China: ci guo teng

in India: barauk-pau, warpauk-pau

Byttneria cordata Lam. (*Byttneria aculeata* Dombey ex Lam., nom. inval.; *Byttneria corchorifolia* Turcz.; *Byttneria sulcata* Ruiz & Pav.)

Peru. Shrubby liana, trunk with small spines, green white flowers, somewhat spiny fruits

See *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 523. 1785

(Poultice of leaves for warts and insect sting.)

in Peru: yerba de araña

Byttneria herbacea Roxb. (*Byttneria cordata* Willd. ex Roxb., nom. inval.; *Byttneria cordata* Lam.; *Commersonia herbacea* (Roxb.) G. Don; *Commersonia herbacea* G. Don)

India. Herb, prostrate to ascending, purple flowers

See *Encycl.* (Lamarck) 1(2): 523. 1785, *Plants of the Coast of Coromandel* 1(1–2): 28, t. 29. 1795, *Flora Indica*; or descriptions of Indian Plants 2: 382. 1824, *A General History of the Dichlamydeous Plants* 1: 523. 1831

(Powdered stem used in treating broken bones, swelling of legs. Rhizome paste applied to cure old ulcers. Root or leaf paste for cholera, dysentery, diarrhea, cough, asthma, swelling; the paste of whole plant used in fracture of limbs and sprains, also applied externally in inflamed body. Young leaves chewed to stop dysentery. Veterinary medicine, leaf paste given for dysentery.)

in India: adaaubol, adavi janumu, deku, dekusindoor, kombraj, masvasi, potu chettu, samarkai, samarkhai, samarkhoi, sarkapired, sindur, yerra katla tiga

Byttneria hirsuta Ruiz & Pav. (*Chaetanea hirsuta* (Ruiz & Pav.) Rusby; *Chaetanea hirsuta* Rusby)

Peru. Scandent shrub, spreading, spiny branches, greenish white flowers

See *Flora Peruviana* [Ruiz & Pavon] 3: 10. 1802, *Memoirs of the Torrey Botanical Club* 3(3): 10. 1893

(Plant decoction for warts.)

in South America: kari kari, uña de gato

Byttneria pilosa Roxb. (*Buettneria pilosa* Roxb.; *Byttneria elegans* Ridl.; *Byttneria pilosa* var. *pellita* Gagnep.; *Byttneria velutina* Wall.; *Byttneria velutina* Wall. ex Mast.; *Chaetanea pilosa* (Roxb.) Adelb.; *Commersonia pilosa* (Roxb.) G. Don; *Commersonia pilosa* G. Don)

Indonesia, Malaysia. Lianas, climbing shrub, woody, serrate membranous leaves, capsules with thin barbed bristles

See *Hort. Bengal.* 18. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall., 2: 381–382. 1824, *A*

General History of the Dichlamydeous Plants 1: 524. 1831, *Fl. Ind.*, ed. Carey, i. 618. 1832, *The Flora of British India* 1(2): 377. 1874 and *Journal of the Straits Branch of the Royal Asiatic Society* 57: 25. 1911 [Jan 1911], *Flore Générale de l'Indo-Chine* 1(5): 517. 1910, *Beknopte Flora van Java* (Nood Unitgave) Fam. 107, 4b: 11. 1944

(Anthelmintic, roots pounded with *Imperata* rhizome. Decoction of leaves of *Ficus semicordata* Buch.-Ham. ex Sm. var. *conglomerata* (Roxb.) Corner together with those of *Byttneria pilosa* and *Phyllanthus fraternus* and bark of *Callicarpa arborea* taken for jaundice and liver complaints. Macerated stems for washing wounds, hairs. Veterinary medicine, leaf paste applied on sores of cattle.)

in China: cu mao ci guo teng

in India: champat-a-rikang, champhat, champhat-a-rikang

in Vietnam: quà gai lông, trôm leo lông thò

Byttneria scabra L. (*Buettneria scabra* Aubl.; *Byttneria longifolia* Turcz.; *Byttneria pohliana* Steud., nom. illeg. superfl.; *Byttneria salicifolia* C. (For venereal diseases.)

Byttneria scabrida Ridl.

Borneo, Sarawak. Climber

See *Bulletin of Miscellaneous Information Kew* 6: 225. 1938

(Roots together with the leaves of *Macaranga tanarius* boiled and the liquid drunk for blood dysentery.)

in Borneo: akar sengela

C

Caccinia Savi Boraginaceae

See *Genera Plantarum* 128. 1789, *Cose Botaniche* 1, 7, pl. 1. 1832.

Caccinia crassifolia Kuntze (*Caccinia glauca* Savi; *Caccinia macranthera* var. *glauca* (Savi) Govaerts)

India.

See *Cose Bot.* 1. t. 1. f. 1–6. 1832, *Trudy Imp. S.-Peterburgsk. Bot. Sada* x. (1887) 212. 1887 and *World Checklist of Seed Plants* 3(1): 9. 1999

(Used in Unani. Leaves diuretic, demulcent, antiinflammatory, for asthma, cough.)

in India: gaozabaan

Cadaba Forssk. Capparaceae (Capparidaceae)

The Arabic common plant name *kadhab*, for *Cadaba rotundifolia* Forssk., collected in Yemen, Al Luhayyah [“Lohaja frequens”], Jan. 1763; see P. Forsskål, *Flora aegyptiaco-arabica*. 67–68. Copenhagen 1775, *Genera Plantarum* 242–243. 1789. Different *Cadaba* species were reported to contain alkaloids and sesquiterpene lactones; some *Cadaba* species were reported as toxic plants.

Cadaba aphylla (Thunb.) Wild (*Cadaba juncea* Harv.; *Cadaba juncea* Szyszyl.; *Cadaba juncea* (Sparrm.) Harv. ex Hook. f., nom. illegit.; *Cadaba juncea* Harv. ex Hook. f., nom. illegit.; *Cleome aphylla* Thunb.; *Cleome juncea* Sparrm.)

Namibia. Shrub, evergreen and leafless, spiky stems, tangled, dense, twigs spinescent, deep red to yellow glandular flowers, warty sticky fruits, small black seeds covered with a sticky bright orange pulp, only younger branches browsed by game and livestock, frost and drought resistant

See *Gen. S. Afr. Pl.* ed. 2, 13. 1868 and *Flora Zambesiaca*: Mozambique, Federation of Rhodesia and Nyasaland, Bechuanaland Protectorate. Volume 1, part 1 / edited by A.W. Exell and Hiram Wild, on behalf of the editorial board. London, 1960

(Toxic to sheep. Roots potentially poisonous, roots strongly purgative, an overdose might be toxic. Moist powdered plant applied as a poultice to draw boils and abscesses.)

in English: black storm, desert broom, leafless wormbush

in South Africa: bloustam, bobbejaanarm, swartstorm

Cadaba farinosa Forssk. (*Cadaba dubia* DC.; *Cadaba mombassana* Gilg & Gilg-Ben.; *Streblocarpus fenzlii* Parl.; *Stroemia farinosa* (Forssk.) Vahl)

East and West Africa, Yemen. Slender shrub, weak, tangled, spreading, many-branched from the base, densely twigged, arching branches, yellow-green flowers, cylindrical pods, black seeds surrounded by orange aril, leaves and young twigs edible, pounded leaves cooked in couscous, bark eaten with cereals, edible fruit, plant browsed by all stock

See *Flora aegyptiaco-arabica*. 68. 1775, *Symbolae Botanicae*, ... 1: 19. 1790 and *Journal of Ethnopharmacology* 35: 25–63. 1991, *Journal of Ethnopharmacology* 105: 387–399. 2006

(Leaves analgesic, antiviral, antirheumatic, antiphlogistic, antiscorbutic, tonic, stimulant, astringent, antihelmintic, purgative, antidote against food poisoning, emmenagogue; leaves decoction for gonorrhoea; ground leaf powder for ulcers and skin complaints. Roots infusion used for protection against sexually transmitted diseases. Plant ash rubbed for body pains. Magic, ritual, charm, superstition, good luck, marriage. Veterinary medicine, roots and leaves used to treat anthrax in cattle.)

in Arabic: asal, el bejad, korraeb, saerah, toraeb

in India: viluti

in Benin: kobokayé

in East Africa: kibalazi-mwitu, mvunja-vumo, ol-amalogi

in Guinea: berekunan, kesebere tamba niogu, quinquemini

in Kenya: arerenion, eren, ereng, kalkacha hare, larasoro, luharamira, mchachale, orosoro

in Mali: abago, azrom, balamji, hassu ueil, kwemkwemini, minzin, to-magny, uggar

in Mauritania: azrom, szrom, zerom, zrum

in Niger: abago, abogu, bagahy, bagaie, bagayi, bagey, balamji, gursimé, harikanelifi, harkanelifi, hassu ueil, marga, tchuma, ugar, uggar

in Nigeria: anza, bagaji, bagayi, balamji, baldamhi, beelidamhi, beldamhi, bultù, dangarafa, guno, hadza, handja, hanza, surreih

in Senegal: azrom, balamji, bere kuna, demadugu, gavargi, kesebere tamba, n-debarka, ndebaré, ndebarga, ndebargé, ndegareg, ndegarek, nogu, sinsin, sinsini, szrom, tensen, tomani, tsinsini, zerom, zrum

in Somalia: geed-maaluugeed

in Tanzania: endamologi, eren, ereng, kaningwa, larasoro, luharamira, mchachale, mpambue, ol ameloki, ol jani el sirgon, sangwa sangwa

Cadaba farinosa Forssk. subsp. *adenotricha* (Gilg & Gilg-Ben.) R.A. Graham

Tanzania. Shrub, herb, succulent, stem cream, dense-crowned, leaves glaucous, flower pale green yellowish, exocarp pale green, endocarp orange

See *Flora Aegyptiaco-Arabica* 68. 1775 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 227. 1915, *Kew Bulletin* 17: 161. 1963

(Roots poisonous.)

Cadaba fruticosa (L.) Druce (*Cadaba fruticosa* Druce; *Cleome fruticosa* L.)

India. Shrub, flowers dirty white

See *Species Plantarum* 2: 671. 1753 and *Rep. Bot. Exch. Club Soc. Brit. Isles* 3: 415. 1914, *Pharmacologyonline* 3: 136–142. 2008

(Used in Sidha. Leaves and roots antiphlogistic, purgative, anthelmintic, antipyretic, emmenagogue, analgesic, deobstruent, antimicrobial, antirheumatic, used to treat ulcer, syphilis, sores, vitiligo, worm infection; leaf juice to reduce swelling, in rheumatism; leaf juice boiled in castor oil applied for fracture and snakebite. Roots decoction in uterine obstructions. Veterinary medicine, leaves decoction given orally to cure tympany; leaf extract applied in boils, blisters, ulcers and wounds.)

in English: Indian cadaba

in India: aadamorinika, adamorinika, ayamiyamakki, ayattaiyamakki, carapattiram, chaayagavache, chavukuttiyanuku, cheganike, chegaviche, chekonadi, chemudu, chikonadi, chikondi, chimurudu poola, ciramota, ciramotakaceti, ciramotakam, ciramotan, cirmotan, ciruviluticeti, cumirutam, curapicitti, dabi, habal, itankali, itankalimaram, kacitti, kadhab, kainaci, karppakalakkiruti, katagatti, kattakatti, keganike, kegnike, kodab, kodhab, konda mirapa, kunkilatikaceti, kunkilatikam, kutippanikam, mangare, maragacha, maragache, maragada, maragade, maragadegida, maravili, maraviliceti, margade, mattametikam, mattametikamaram, mirchikand, mota, motti, nacukatitam, narcitti, narivili, narivili, nariviliceti, palavili, palaviliceti, pattirakam, piluka, pittavaram, polumorinika, puttiracutanam, tarunikam, tarunikamaram, tatakam, tirucupattiram, uruvaracam, uruvaracamaram, uruvaraccammatti, uttarakarikai, vaelivee, vanamulam, veludhu, vilimmi, viliti, viluti, visanacini, vittuki, vittukiceti, vizhivi, vizhuthi, vizuthi, vutarasi chettu, vutharasi chettu

Cadaba glandulosa Forssk.

East and West Africa, Mali, Niger. Low shrub, erect, woody, leafy, viscid, many-branched, closely packed glandular-hispid round leaves, small inconspicuous yellow ligulate flowers, eaten by goats, sheep, camels, cattle and donkeys

See *Flora Aegyptiaco-Arabica* 68. 1775 and *Journal of Ethnopharmacology* 35: 25–63. 1991

(Flavonol glycosides. Drink roots infusion for stomach-ache; stems and roots antiinflammatory; pounded leaves on wounds. Magic.)

in Arabic: taennaim

in Kenya: emakak

in Mali: hassu, tabeibaret, tahalist, tarbéret, téhanizt, teheist, teis, todi farssa, uadagoré

in Niger: doburu, taïs, teera

in Somalia: qalanqal

in Sudan: kurmut, sogheir

Cadaba indica Lam.

India.

See *Indian Journal of Pharmaceutical Sciences* 67(5): 637–638. 2005, *Pharmacologyonline* 3: 136–142. 2008

(Used in Sidha. Leaves antibacterial, antidiabetic, antifungal.)

in India: adamorinika, cavukuttiyanuku, cegavice, cekodi, cekodisakada, chekodi, chekonisi, chemoorda, chikonadi, chimurudu, cimurudu, kattakatti, manatukkurntu, maragace, maragade, margadde, polumorinika, sagedapu, vilathi, vili, viluti, vishuthi, vizhudi

Cadaba natalensis Sond.

South Africa. Woody shrub, small scrambling tree, sepals mauve or purplish, pink nectary guide not clasping the androgynophore, long narrow cylindrical worm-like fruit, seeds embedded in a powdery reddish pulp

See *Linnaea* 23: 8. 1850

(Roots to induce vomiting, to treat chest pain. Magic, ritual.)

in English: green-leaved wormbush, Natal worm-bush

in South Africa: amaNgwe emnyama, amaNgwe-ezidlayo, groenblaarwurmbos, Natalwurmbos, umAnzimane, uNoqungwa, uPhaphane

Cadaba rotundifolia Forssk.

Arabia, Abyssinia.

See *Flora Aegyptiaco-Arabica* 68. 1775 and *Veterinary and Human Toxicology* 29(2): 133–137. 1987

(For bronchitis, inhalation from leaves, also juice from crushed leaves; chewed leaves on wounds. Plant poisoning, the clinical signs in goats fed with the plant were pronounced depression, diarrhea, frothing at the mouth, dyspnea, ataxia,

loss of condition and recumbency. The lesions consisted of diffuse hemorrhage in the abomasum, heart and lungs, catarrhal enteritis, erosions on the intestinal mucous membrane, degeneration and/or necrosis of the cells of the renal tubules, and fatty change and necrosis in the liver. Veterinary medicine, leaves for diarrhea, dysentery.)

in Arabic: kadhab

in Ethiopia: adangali

in Kenya: epuu

Cadaba termitaria N.E. Br. (*Cadaba macropoda* Gilg)

Tropical Africa. Many-branched shrub, slender, straggling, scandent, flowers solitary or clustered, green sepals, red nectary guide clasping the androgynophore, long narrow cylindrical worm-like fruit, seeds embedded in a powdery reddish pulp

See *Hooker's Icon. Pl.* 26: t. 2527. 1897 and *Z. Naturforsch.* 57c, 216–220. 2002

(Caused death in murder trials.)

in English: grey-leaved wormbush, pink cadaba

in South Africa: vaalblaarwurmbos

Cadaba trifoliata Wight & Arn.

India.

See *Cat. Ind. Pl.* 7. 1833, *Prodr. Fl. Ind. Orient.* 1: 24. 1834

(Used in Ayurveda. Boiled leaves vapors inhaled to relieve cough and cold.)

in India: balaya, chekonadi, chikondi, kodikaalu, kodikallu, kodikalu, mallaguru, manudukkurundu, nallagaara, nallagara, peddachikonadi, peddacionadi, peddasivakonita, purana, purna, viluti

Caesalpinia L. Fabaceae (Caesalpinieae, Caesalpinieae, Leguminosae)

Named for the Italian botanist Andrea Cesalpino (Andreas Caesalpinus), 1519–1603, naturalist, botanical collector, philosopher and physician, systematist, physician to Pope Clement VIII, professor of medicine and botany at Pisa and at Sapienza in Rome. See Carl Linnaeus, *Species Plantarum*. 1: 380–381. 1753, *Genera Plantarum*. Ed. 5. 178. 1754, *A Voyage to Terra Australis* 2: 551. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 481–483. 1825, *Linnaea* 5: 192. 1830, *Linnaea* 11(3): 406. 1837, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 75. 1840, *Revisio Generum Plantarum* 1: 164. 1891 and U. Viviani, *Vita e opere di Andrea Cesalpino*. Arezzo 1922, *North American Flora* 23(5): 319, 327. 1930, A. Castiglioni, “Cesalpino Andrea.” *Enciclopedia Italiana*. 9: 866. Roma 1931, *Notulae Systematicae*. Herbarium du Museum de Paris 13(4): 349. 1948, Garrison and Morton, *Medical Bibliography*. 755–756. 1961,

J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 327. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 69. 1972, *Journal of the Arnold Arboretum* 55(3): 426. 1974, G. Moggi, “Andrea Cesalpino botanico.” *Atti Mem. Accad. Petrarca Lett. Arti Scienze*. 42: 236–249. Arezzo 1976–1978, *Kew Bulletin Addn. Ser. 7*: 97–119. 1980, Karl Mägdefrau, in *D.S.B.* 15: 80–81. 1981, *Flora of the Lesser Antilles, Leeward and Windward Islands* (Dicotyledoneae—Part 1) 4: 334–538. 1988, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 2: 1–481. 1988, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell’Orto Botanico di Palermo*. 68. 1988, *Annals of the Missouri Botanical Garden* 77(4): 854. 1990, *Flora Malesiana* I, 12, 2: 409–784. 1996, *Proc. Calif. Acad. Sci.*, ser. 4, 57(7): 247–355. 2006.

Caesalpinia benthamiana (Baill.) Herend. & Zarucchi (*Mezoneuron benthamianum* Baill.; *Mezoneuron benthamianum* Baill.)

West and Central Africa, Benin, Ghana. Perennial climbing shrub, straggling, armed with recurved spines, inflorescence a branched or unbranched terminal raceme, fruit a flattened indehiscent winged pod

See *Adansonia* 6: 196. 1866 and *Ann. Miss. Bot. Gard.* 77(4): 854–855. 1990

(A decoction of roots, bark and leaves to cure urethral discharge; root decoction for dysentery and diarrhea; stems and roots aphrodisiac. Leaves antibacterial, mildly laxative, applied as a paste to treat snakebites, wounds, skin infections, piles and ulcers; young leaves eaten for hookworm or Guinea worm. Stem liquid dropped in the eye to cure inflammation and cataract.)

Caesalpinia hildebrandtii (Vatke) Baill. (*Mesoneuron grevei* Baill.; *Mesoneuron hildebrandtii* Vatke; *Mezoneuron grevei* Baill.; *Mezoneuron hildebrandtii* Vatke; *Mezoneuron hildebrandtii* Vatke; *Mezoneuron grevei* Baill.; *Mezoneuron hildebrandtii* Vatke)

Madagascar. Perennial non-climbing shrub, woody, spiny, liana, spreading, sprawling and scrambling, strongly perfumed flowers, terminal erect dense branched thorny inflorescences

See *Linnaea* 43: 338. 1882, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 371. 1883, *Hist. Pl. Madag.*, Atlas pl. 24B-C. 1886

(Used to counteract poison.)

in Madagascar: kitomba, tsiafakomby, tsirofonta

Caesalpinia jayabo M. Gómez

Caribbean. Perennial climbing shrub

See *Anales de la Sociedad Española de Historia Natural* 19: 234. 1880

(Leaves decoction given in bodyache.)

in India: gacha, gajjiga, heggajjiga, kaccuram, kachuram, kalal, kalanji, kalanei, kalargodi, kalarsi, kalarsikkodi, kar-churam, kitta, kuberaksi, vaknuato

Caesalpinia latisiliqua (Cav.) Hattink (*Bauhinia latisiliqua* Cav.; *Caesalpinia torquata* Blanco; *Mezoneuron balansae* Gagnep.; *Mezoneuron cabadbarensense* Elmer; *Mezoneuron glabrum* sensu Fern.-Vill.; *Mezoneuron keo* Gagnep.; *Mezoneuron latisiliquum* (Cav.) Merr.; *Mezoneuron oxyphyllum* Gagnep.; *Mezoneuron platycarpum* Merr.; *Mezoneuron rubrum* Merr.; *Mezoneuron balansae* Gagnep.; *Mezoneuron latisiliquum* (Cav.) Merr.; *Mezoneuron oxyphyllum* Gagnep.; *Mezoneuron procumbens* Blanco; *Mezoneuron cabadbarensense* Elmer; *Mezoneuron glabrum* Desf.; *Mezoneuron keo* Gagnep.; *Mezoneuron latisiliquum* Merr.; *Mezoneuron oxyphyllum* Gagnep.; *Mezoneuron platycarpum* Merr.; *Mezoneuron procumbens* Blanco; *Mezoneuron rubrum* Merr.)

Philippines, Brunei. Perennial climbing shrub

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 5: 5. 1799, *Fl. Filip.*, ed. 2 [F.M. Blanco] 235. 1845 and *Philippine Journal of Science*, C 4: 268. 1909, *Philipp. J. Sci.*, C 11: 85. 1916, *Leaflet Philipp. Bot.* x. 3757. 1939, *Bull. Mus. Natl. Hist. Nat.* sér. 2, 24: 318–319. 1952, *Reinwardtia* 9(1): 37. 1974

(Leaves decoction given for relief of asthma.)

Caesalpinia mimosoides Lam. (*Caesalpinia mimosoides* Heyne ex Wall.; *Caesalpinia resupinata* Roxb.; *Caesalpinia simora* Roxb.)

India, China. Perennial non-climbing tree, many-branched, erect, climbing, creeping, armed, densely hispid, bristly, inflorescence in terminal raceme, flowers yellow, falcate recurved bristly pod, branchlets emitting a characteristic acid odour when broken

See *Encyclopédie Méthodique, Botanique* 1(2): 462. 1785, *A Numerical List of Dried Specimens* [Wallich] n. 5837. 1831 and *Food Chemistry* 92(3): 491–497. 2005, *Food Chemistry* 100(3): 1044–1048. 2007

(Used in Sidha. Antimicrobial, antioxidant, antiinflammatory, fibrinolytic activity. Fresh young twigs eaten as vegetable for hypotension; paste of young shoots and onion used in the treatment of ulcer. Leaves used as blood tonic and for vertigo; tender leaves cooked as vegetable and eaten to cure chest pain.)

in English: thorny flower of the Panya

in India: chingamullu, chingey, cinje, cinnamullu, eejimullu, engeeri, ganajali, ganajile, ganajilu, ganijele, ijemullu,

ijimullu, kal-toddavaddi, kandige, kenchige, kencige, kilansadu, kombe, kombe gida, komme, komme gida, lajri, malanteri, nallagane, nallaganne, nallekane, nallikane, nar-kati, pulinakkagonrai, punaikkalarci, shimullu, simullu, siy-ije, timullu, timulu, vaisakhamantha

in Myanmar: gyabo-zawnan, sukyanbo, tikayan-gyi

in Thailand: chalueat, dok nam panya, nham pu ya, phak pu ya

Caesalpinia minax Hance (*Caesalpinia globulorum* sensu auct.; *Caesalpinia minax* var. *burmanica* Prain; *Caesalpinia morsei* Dunn)

Vietnam, China. Perennial climbing shrub, creeping, sarmentose, lianescent, armed, petals green-white, upper petals red-purple, immature pods softly spiny

See *Herb. Amb.* 5, 89, t. 48. 1747, *Journal of Botany, British and Foreign* 22(12): 365. 1884 and *Journal of the Linnean Society, Botany* 35(247): 492–493. 1903, *Blumea* 12(1): 62. 1963

(Roots and leaves analgesic and sedative, prescribed for insomnia, pains, toothache.)

in China: hui jia yun shi

Caesalpinia pulcherrima (L.) Swartz (*Caesalpinia pulcherrima* G. Don; *Caesalpinia pulcherrima* Sw.; *Caesalpinia pulcherrima* (L.) Sw. var. *flava* Bailey & Rehder; *Poinciana bijuga* Lour.; *Poinciana elata* Lour.; *Poinciana pulcherrima* L.)

Cosmopolitan, South America. Perennial non-climbing tree, shrub or small tree, unarmed or with a few straight prickles, yellow-red flowers, raceme or panicle axillary and terminal

See *Exot. Pl. Cent.* t. 22. 1678, *Species Plantarum* 1: 380. 1753, *Flora Cochinchinensis* 260–261. 1790, *Observ. Bot.* (Swartz) 166. 1791, *A General History of the Dichlamydeous Plants* 2: 431, non Sw. 1832 and *Webbia* 13: 214. 1957

(Used in Ayurveda and Sidha. Toxins. Bark juice abortifacient and febrifuge, tonic, stimulant. Roots abortifacient, emmenagogue, used for infantile convulsions; root juice given to treat peptic ulcer. Flowers for intestinal worms, coughs and chronic catarrh. Fruits and leaves febrifuge, astringent. Leaves emmenagogue, purgative, antifungal, abortifacient, to relieve constipation; leaf paste applied to treat boils, pimples and ringworm. Seed paste applied on infected teeth and ringworm; fresh seeds decoction used for inflamed gums.)

in English: Barbados flower fence, Barbados pride, bird of paradise flower, dwarf poinciana, flamboyant, flamboyant tree, flower-fence poinciana, flowering-fence, gold mohur, paradise-flower, peacock flower, peacock tree, poinciana, pride-of-Barbados

in Latin America: angel sisa, carzazo, clavellina, clavellina colorado, fleur du paradis, flor del angel, flor de la Virgen,

guacamaya, guacamayo, krere-krere, macata, pauwebloem, poincillade, rosa Santa Maria, sin k'in

in Cambodia: dok fang, fang ham, kan gok meas

in China: chin feng hua, feng huang chang

in India: cekkmandaram, cemmairkkonrai, channakeshava gida, chekkmandaram, chettimandaram, chinaturayi, cinnaturayi, cirontakam, cirontakamaram, cittimantarai, cittimantaram, eejimullu, gul-tora, guleturaa, guletura, gulu tora, hote seege, irattinakanti, kanjage, kapura maddi, kenchige, kencige, kendge, keneige, kenji gida, kenjige, kenjige mara, kenjigemara, kenjuga, kittimantaram, komari, kotinalal, krishanchura, krishnachuda, krishnachura, krishnachuudaa, maikkonrai, mailkondarai, mancika, mayikonai, mayil-konai, mayilkonnai, mayilkonrai, mayirkkonrai, mayirkonrai, mayirpelavam, mayirpelavamaram, mayurakonnai, mayuram, mayuramaram, mucuppira, mucuppiramaram, muyarcevitakkonnai, muyarcevitam, nalal, nalligaane, narikkonrai, padangam, paidithangedu, pamidi tangedu, pamiditangedu, pamidithangedu, perumayirkonrai, peydi-tangedu, pillicarikai, pillicarikaimaram, pirayakaceti, piriyaakam, ponmayirkkonrai, puccilakkonnai, pumalekkinam, puraiphul, ratanagandhi, rathnagandhi, ratna gandhi, ratnagandhi, ratnagandi, ratnaganhi, sankeshvara, sankeshwara, settimandaram, shankasur, sidhakhya, sidhanasha, sidheshwara, sinnathuraayi, sinnaturayi, sirumayirkonrai, tarra, techimandaram, teccimandaram, thuraayi, tsettmandaram, tsjetti-mandarum, torai, tuccimam, tuccimamaram, turayi, vatamatakki

in Indonesia: bunga merak, bungan merak, kembang merak (merak = peacock), kembang patra, kemerakan

in Japan: ô-gochyô

in Malaya: chana, jambul merak

in Nepal: areli, bhas bhul

in Philippines: bulaklak ng paraiso, caballero

in Thailand: khwaang yoi, som pho, haang nokyuung thai

in Vietnam: di[eej]p ta, di[eej]p c[us]ng, kangok meas, kim phuong, kim ph[uw][owj]ng

Caesalpinia sappan L. (*Biancaea sappan* (L.) Tod.; *Biancaea sappan* Tod.)

India, Myanmar and Thailand. Perennial non-climbing tree, shrub, prickly, yellow flowers, upper petal with a red spot at the base, dehiscent strongly flattened shiny pod

See *Species Plantarum* 1: 381. 1753, *Nuovi Gen. Sp. Orto Palermo* 21–22. 1858 and *Recent Res. Pl. Sci.* (New Delhi) 7: 252–260. 1979

(Used in Ayurveda, Unani and Sidha. Heartwood decoction or infusion emmenagogue, astringent, antidiarrheal, cytotoxic, antibiotic, antifungal, antibacterial, antioxidative, vulnerary, hemostatic, antiinflammatory, hepatoprotective, hypoglycemic, antifertility, to ease pain, to stop menstrual

pain, to cure wounds, skin diseases, tuberculosis, diarrhea and dysentery; vomiting blood, boil the red wood and drink the decoction. Seeds sedative.)

in English: Brazil-wood, bukkum wood, false sandalwood, Indian redwood, narrow-leaved braziletto, sappan tree, sappan wood tree, sappanwood

in Burma: teing-nyet

in Cambodia: sbaèng, sbeng

in China: su fang mu, su mu

in India: anaikuntrumani, bakaanu chekka, bakam, bakami-kirmyz, bakamu, bakanu, bakanu-chekka, bakapu, bakarucakka, bakaruchakka, bakasu chekka, bakkapu, bakkapu-chekka, bakkom, baqam, baqqam, baqum, bharyavriksha, bukkamu, bukkapu, bukkapuchettu, bukkum, cappan, cappanam, cappanga, cappankam, cappanki, cappanku, cappannam, cayamaram, cemmaram, chapenga, chappanam, chappanga, chappannam, ciyapankam, isiapangam, isiyapangam, kaparimaddi, kapuramaddi, kashtha, kuchandana, lohitaranga, okaanu, okanu, okanu-katta, padangam, parthangi, patamg, patamgam, patang, patang-ki-lakri, patanga, patanga-chekke, patanga-katta, patangachekke, patangada, patangah, patangam, patankam, patankan, patanku, pataranjaka, pathang, pathanga, pathanga chakka, pathangee, pathimukham, patranga, patrangah, patrangam, pattanga, pattangi, pattanki, pattaranga, pattaranjaka, pattaranjakah, pattraanga, pattranya, pattura, patunga, patungam, raktaka, raktamukta, raktasaara, raktasar, ranjana, rogakashtha, ruktamukta, sapangu, sappamgu, sappan, sappanga, sappangu, sappannam, sayamaram, suranga, surangada, tairi, tsiapangum, tsja-pangan, tsjampangam, varatanci, varattangi, vartangi, varttanki, varttankikkattai, vattangi, vattanki, vattankattai, vattekkku, vatunghe cuttay, vetteku, vurthingi

in Indonesia: kaju setjang, kayu secang, secang, soga jawa

in Laos: faang dèng

in Malaysia: bakapu, sapang, sepang, sipang

in Philippines: sapan, sapang, sibucan, sibukau

in Thailand: faang, faang som, ngai

in Tibetan: shing bo-kka'i shing-kun

in Vietnam: cay vang, co vang, may vang, vang, vang nhuôm, vang nhu[o]m, tô môc, to moc, t[oo] m[o]c, to phuong

Caesalpinia spinosa (Molina) Kuntze (*Caesalpinia pectinata* Cav.; *Caesalpinia spinosa* Kuntze; *Caesalpinia tara* Ruiz & Pav.; *Caesalpinia tinctoria* (Kunth) Benth. ex Reiche; *Caesalpinia tinctoria* Dombey ex DC., nom. nud.; *Caesalpinia tinctoria* (Kunth) Benth.; *Caesalpinia tinctoria* DC.; *Coulteria tinctoria* (Molina) Kunth; *Coulteria tinctoria* Kunth; *Poinciana spinosa* Molina; *Tara spinosa* Britton & Rose; *Tara spinosa* (Molina) Britton & Rose)

South America. Perennial non-climbing tree

See *Saggio sulla Storia Naturale del Chili ...* 158. 1782, *Descripción de las Plantas* (Cavanilles) 467. 1799, *Flora Peruviana* [Ruiz & Pavon] 4: pl. 374. 1802, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 6: 331–332, pl. 569. 1823[1824], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 481. 1825, *Revis. Gen. Pl.* 3[3]: 54. 1898 and *North American Flora* 23(5): 320. 1930, *Anales del Instituto Botánico A. J. Cavanilles* 14: 731. 1956, *Bol. Soc. Peruana Bot.* 7(1/2): 40–68. 1974, *Legum. Agric. Boliv.* 409–423. 1996

(Infusion or decoction as purgative, laxative.)

Common name: tara

Caesalpinia sumatrana Roxb. (*Caesalpinia sumatrana* Wall.; *Mezoneuron koordersii* Backer; *Mezoneuron peekelii* Harms; *Mezoneuron sulfureum* Miq.; *Mezoneuron sumatranum* (Roxb.) Wight & Arn.; *Mezoneuron sumatranum* (Roxb.) Wight & Arnott ex Miq.; *Mezoneuron koordersii* Backer ex Koord.-Schum.; *Mezoneuron peekelii* Harms; *Mezoneuron sulfureum* Miq.; *Mezoneuron sumatranum* Wight & Arn. ex Voigt; *Mezoneuron sumatranum* Wight & Arn.)

Peninsular Malaysia, Sumatra, Borneo. Perennial climbing shrub, liana, branchlets sometimes armed, panicle supra-axillary or terminal

See *Hortus Bengalensis*, or a catalogue ... 23. 1814, *A Numerical List of Dried Specimens* [Wallich] n. 5831 B-C. 1831, *Prodr. Fl. Ind. Orient.* 1: 283. 1834 and *Syst. Verz.* i. Fam. 128, 36. 1911, *Bot. Jahrb. Syst.* lv. 58. 1917

(Leaves decoction vermifuge, for intestinal complaints, diarrhea, a postpartum remedy; worms in children, pound the leaves and poultice with them.)

in Malaysia: darah belut, gorek, kelichi rimba, mati chaching, matchang, mentiong, tampu rengat

in Philippines: siit

Caesalpinia trothae Harms (*Caesalpinia trothae* Harms)

Ethiopia, Somalia, Kenya and Tanzania. Perennial non-climbing shrub, leaves a good browse for camels

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 277. 1899 and *Kew Bulletin* 17(2): 201. 1963

(Fruits poisonous.)

Caesalpinia volkensii Harms (*Caesalpinia bonduc* (L.) Roxb.; *Caesalpinia major* sensu Brenan)

Tropical Africa, Ethiopia, Tanzania. Perennial climbing shrub, woody or herbaceous, liana, straggling, armed with recurved and straight prickles, yellow flowers, prickly flattened fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 304. 1910

(Leaves decoction to treat malaria; leaf decoction taken to fight pains during pregnancy, to relieve stomachache. Roots aphrodisiac eaten cooked or raw; roots boiled and mixed with other species as male aphrodisiac, also to treat gonorrhoea and bilharzia. Seeds for cure stomach ulcers. Crushed flower buds applied for eye problems.)

in Tanzania: kete, msoo, msoro

Caesalpinia welwitschiana (Oliv.) Brenan (*Mezoneuron welwitschianum* Oliv.; *Mezoneuron welwitschianum* Oliv.; *Mezoneuron welwitschianum* Oliv.)

Central, East and southern Africa. Perennial climbing shrub, liana, fiercely armed, yellow petals

See *Flora of Tropical Africa* [Oliver et al.] 2: 261. 1871 and *Kew Bulletin* 17(2): 203. 1963

(Leaf sap instilled in the nostrils to treat madness.)

Caesulia Roxb. Asteraceae

Latin *caesullae*, *caesullarum* ‘having gray eyes’, *caesius* ‘bluish gray’, referring to the flowers, see *Plants of the Coast of Coromandel* 1: 64. 1795[1798].

Caesulia axillaris Roxb.

India. Ascending to prostrate herb with narrowly lanceolate leaves tapering at both the ends

See *Taxon* 26: 107–109. 1977, *J. Cytol. Genet.* 33(2): 201–205. 1988, *Proc. Indian Sci. Congr. Assoc.* 83(3:VIII): 77. 1996

(Plant poisonous for sheep. Whole plant juice given to cure amebic dysentery, indigestion and loss of appetite. Leaves kept in pulses as insecticide; leaf extract sprayed as pesticide. Oil from the seeds applied in rheumatic pains.)

in India: akshaphula, borasda, nichini

Caiophora Presl Loasaceae

Greek *kaiein* ‘to burn’ and *phoros* ‘bearing’, referring to the stinging hairs, see *Göttingische gelehrte Anzeigen unter der Aufsicht der Königl....* 1825: 1705. 1825, *Reliquiae Haenkeanae* 2(1): 41–42, t. 56. 1831, *Nat. Pflanzenfam.* [Engler & Prantl] 3(6a): 119. 1894 and *Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 76: 270–271, 329. 1900, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 143–181. 1941, *Sendtnera* 4: 221–242. 1997, *Darwiniana* 45(1): 45–67. 2007.

Caiophora cirsiifolia C. Presl (*Blumenbachia contorta* (Desr.) Benth. & Hook.f. ex Hieron.; *Blumenbachia contorta* Benth. & Hook.f. ex Hieron.; *Blumenbachia contorta* Hook.f.; *Blumenbachia contorta* Griseb.; *Blumenbachia punicea* Ruiz & Pav. ex G. Don; *Blumenbachia punicea* G. Don; *Blumenbachia sepiaria* Ruiz & Pav. ex G. Don; *Blumenbachia sepiaria* G. Don; *Caiophora cinerea* Urb. & Gilg; *Caiophora contorta* C. Presl; *Caiophora contorta*

(Desr.) C. Presl; *Caiophora contorta* (Desr. ex Lam.) C. Presl; *Caiophora contorta* Urb. & Gilg, nom. illeg.; *Caiophora cymbifera* Urb. & Gilg; *Caiophora lechleri* Urb. & Gilg; *Caiophora pachylepis* Urb. & Gilg; *Caiophora preslii* Urb. & Gilg; *Caiophora sepiaria* (Ruiz & Pav. ex G. Don) J.F. Macbr.; *Cajophora contorta* (Desr.) C. López; *Loasa punicea* Phil.; *Loasa sepiaria* Ruiz & Pav.)

South America.

See *Encyclopédie Méthodique, Botanique* 3: 579. 1789, *Reliquiae Haenkeanae* 2(1): 41–42, t. 56. 1831, *A General History of the Dichlamydeous Plants* 3: 62. 1834, *Die Natürlichen Pflanzenfamilien* 3(6a): 119. 1894 and *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 76: 281, 288, 306, 321. 1900, *Candollea* 8: 23. 1940, *Anales Inst. Bot. Cavanilles* 16: 416, tab. 446. 1958, *Sendtnera* 4: 221–242. 1997

(Infusion or decoction drunk to induce menstruation.)

Vernacular name: pomaysancca

Cajanus DC. Fabaceae (Leguminosae, Phaseoleae)

From the Malayan vernacular names *catjuna* or *katjang* or *katchang* for the pigeon pea; see *Fam. Pl.* (Adanson) 2: 326, 529. 1763, *Catalogus plantarum horti botanici monspeliensis*. 85. 1813, *Sylva Tellur.* 25. 1838, Mueller, Ferdinand Jacob Heinrich von (1825–1896), *Essay on the plants collected by Mr. Eugene Fitzalan, during Lieut. Smith's expedition to the estuary of the Burdekin*. Melbourne: J. Ferres, Government Printer, [1860?], *Helios* 11: 133. 1893.

Cajanus albicans (Wight & Arn.) Maesen (*Atylosia albicans* (Wight & Arn.) Benth., nom. nud.; *Atylosia albicans* Benth.; *Cajanus albicans* Graham ex Wallich; *Cajanus albicans* Graham; *Cajanus wightianus* Graham; *Cajanus wightii* Wight & Arn.; *Cantharospermum albicans* Wight & Arn.)

India. Perennial climbing shrub

See *A Numerical List of Dried Specimens* [Wallich] n. 5582, 5583. 1831, *Prodr. Fl. Ind. Orient.* 1: 256. 1834, *Plantae Junghuhnianae* 2: 243. 1852 and *Agricultural University Wageningen Papers* 85(4): 55. 1985 [publ. 1986]

(Terminal parts including flowers boiled in water and the decoction drunk to cure severe cold. Veterinary medicine, used as galactagogue.)

in India: amanchi, kollukoppankodi, wal-kollu

Cajanus cajan (L.) Millsp. (*Cajan cajan* (L.) Millsp., nom. inval.; *Cajan cajan* (L.) Huth, nom. inval.; *Cajan inodorum* Medik.; *Cajan inodorum* Medik.; *Cajanum thora* Raf.; *Cajanus bicolor* DC., nom. illeg.; *Cajanus cajan* (L.) Druce; *Cajanus cajan* (L.) Merr.; *Cajanus cajan* (L.) Huth; *Cajanus*

in India: atta-tora, et-tora, kadukadale, kadutogari, katutogari, katutogaridai, thevarai, thevari, tifiy, tiviri

Caladium Vent. Araceae

Kaladi or *kelady*, a common vernacular name in Malaya for this genus and herbs of tropical origin; some suggest Greek *kalathion* ‘a small cup, small basket’; see Étienne Pierre Ventenat, *Description des plantes nouvelles et peu connues cultivés dans le jardin de J.M. Cels.* t. 30. Paris [1800–1803] and *Selbyana* 5(3–4): 342–377. 1981, *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 59–200. 2003. Stinging oxalate crystals are common to many members of the family Araceae and are capable of causing intense irritation and dermatitis. Can cause burning and irritation of the lips. The plant can be a problem to children who ingest the leaves as well as to family pets that might nibble on the foliage.

Caladium bicolor (Aiton) Vent. (*Alocasia rex* N.E. Br., nom. nud.; *Alocasia roezlii* N.E. (Infected with ergot.)

in English: bluejoint, bluejoint reedgrass, Canada bluejoint, Canada reedgrass, marsh pinegrass, marsh reedgrass, meadow pinegrass

Calamovilfa (A. Gray) Hack. Poaceae (Gramineae)

From the Greek *kalamos* 'reed' plus the genus *Vilfa* Adans., type *Calamovilfa brevipilis* (Torr.) Hack. ex Scribn. & Southw., see *A Manual of the Botany of the Northern United States* 582. 1848, *True Grasses* 113. 1890 and *U.S.D.A. Bull.* 772: 126. 1920, *Brittonia* 12: 71–77. 1960, J.W. Thieret, "Synopsis of the genus *Calamovilfa* (Gramineae)." *Castanea* [The Journal of the Southern Appalachian Botanical Society] 31(2): 145–152. 1966, *Bulletin of the Torrey Botanical Club* 94: 199–200. 1967, *Contributions from the United States National Herbarium* 41: 35–36. 2001, *Restoration Ecology* 9(1): 60–70. Mar 2001.

Calamovilfa gigantea (Nutt.) Scribn. & Merr. (*Calamagrostis gigantea* Nutt.; *Toxemia gigantea* Nutt. ex Scribn. & Merr.)

Utah, Nebraska, Arizona, Texas. Perennial, tall, mostly solitary, ligule a ring of hairs, rhizomes elongate and scaly, panicle long exserted and open, panicle branches ascending to strongly divergent, spikelets flattened and 1-flowered, glumes unequal and straight, lemmas straight and pubescent, excellent sand binding, grows on sand dunes, sandy banks, prairies, river banks, flood plains

See *Transactions of the American Philosophical Society, new series*, 5: 143. 1837 and *Circular, Division of Agrostology, United States Department of Agriculture* 35: 2. 1901

(Ceremonial, medicine.)

in English: big sand reed, giant sand reed

Calamus L. Arecaceae (Palmae)

Latin *calamus* and Greek *kalamos* 'a reed, cane'; see Carl Linnaeus, *Species Plantarum*. 1: 325. 1753, *Genera Plantarum*. Ed. 5. 152. 1754, *Definitiones Generum Plantarum* 395. 1760, *Familles des Plantes* 2: 24, 599. 1763, Geoffroy, Etienne-Francois (1672–1731), *Description, vertus et usages de sept ceuts dix-neuf plantes ... : et de cent trente-quatre animaux, en sept cents trente planches, gravées en taille-douce, sur les desseins d'après natures, de m. de Gersault* [Garsault, Francois Alexandre Pierre de, 1691–1778], par mm. de Fehrt, Prevost, Duflos, Martinet, & c. / et rangées suivant l'ordre du livre intitulé *Matiere medicale* de m. Geoffroy... Paris: P.F. Didot le jeune, 1767 [Vols. 2,5 have title: *Les figures des plantes et animaux d'usage en medecine*, décrits dans *Matiere medicale* de m. Geoffroy ... dessinés d'après nature par m. de Garsault... Paris, L'auteur.], *Transactions of the Linnean Society of London* 24: 432. 1864, *Les Palmiers* 230. 1878, *Genera Plantarum*

3: 937. 1883, *Revisio Generum Plantarum* 2: 731. 1891 and *Annals of the Royal Botanic Garden. Calcutta*. 11(1): 496. 1908, *Gardens' Bulletin* ser. 3. 14: 518, 523, 525. 1955, Kiew, R. "Conservation status of palms in Peninsular Malaysia. Utilization of palms in Peninsular Malaysia." *Malayan Naturalist* 43(1 & 2): 3–15 and 43–67. 1989.

India.

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 5: 39. 1845, *Journal of the Linnean Society, Botany* 11: 9. 1869, *Revisio Generum Plantarum* 2: 733. 1891, *The Flora of British India* [J.D. Hooker] 6(18): 448. 1893 and *Acta Phytotaxonomica Sinica* 27(2): 134–137, pl. 1, f. 1–12. 1989, *World Checklist of Seed Plants* 3(1): 11. 1999

(Antiinflammatory, astringent, antidiarrheal. Flagellum for catching small animals.)

in China: yun nan sheng teng

in India: esong

Calamus andamanicus Kurz (*Palmijuncus andamanicus* (Kurz) Kuntze)

India. Climber

See *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 43(2): 211. 1874, *Revisio Generum Plantarum* 2: 733. 1891

(For skin diseases.)

in India: motabet

Calamus brandisii Becc.

India.

See *Fl. Brit. India* [J.D. Hooker] 6: 448. 1892

(For earache.)

in India: sural

Calamus caesius Blume (*Calamus glaucescens* Blume, nom. illeg.; *Palmijuncus caesius* (Blume) Kuntze; *Palmijuncus glaucescens* Kuntze; *Rotang caesius* (Blume) Baill.)

Thailand, Philippines. Rattan, clustering, high-climbing, dioecious, short horizontal stolons. compact cluster of aerial stems, leaf-sheath dull green armed with triangular spines, rachis with reflexed spines on the lower surface, leaflets usually in alternate pairs, male flower greenish-yellow, female flower larger than the male, mature fruit 1-seeded ovoid, seed

with an outer fleshy seed-coat, closely related to *Calamus optimus* Becc. and *Calamus trachycoleus* Becc., found in the lowlands on alluvial flats, seasonally flooded river banks, margins of freshwater or peat-swamp forest

See *Species Plantarum* 1: 325. 1753, *Rumphia* 3: 57, 65. 1847, *Revis. Gen. Pl.* 2: 733. 1891 and Dransfield, J. "C. caesius and C. trachycoleus compared." *Gardens' Bulletin, Singapore* 30: 75–78. 1979, *Plant Systematics and Evolution* 189: 83–122. 1994

(Irritant to the mucous membranes.)

in Indonesia: rotan sega, rotan sego, rotan taman

in Philippines: sega, seka, sika

in Thailand: takathong, wai ta kha thong

Calamus castaneus Griff. (*Calamus castaneus* Becc.; *Calamus castaneus* var. *griffithianus* (Mart.) Furtado; *Calamus griffithianus* Mart.; *Palmijuncus griffithianus* (Mart.) Kuntze)

Thailand, Sumatra. Clustering, leaf-sheaths spiny

See *Calcutta J. Nat. Hist.* 5: 28. 1845, *Revis. Gen. Pl.* 2: 733. 1891 and *Gard. Bull. Singapore* 15: 50. 1956

(Immature fruits used for cough.)

in Malaysia: rotan cucor

in Thailand: wai-chakkaao, wai-khao

Calamus draco Willd. (*Calamus draconis* Oken; *Daemonorops draco* (Willd.) Blume; *Daemonorops draco* Blume; *Palmijuncus draco* Kuntze; *Palmijuncus draco* (Willd.) Kuntze)

India.

See *Sp. Pl.*, ed. 4 [Willdenow] 2(1): 203. 1799, *Allg. Naturgesch.* iii. (1) 648. 1841, *Revisio Generum Plantarum* 2: 732. 1891 and *Journ. Arn. Arb.* xxxi. 272. 1950

(Used in Sidha.)

in India: catikkilanku, curalkilanku, kandamoorgarittum, prappankilanku, tevattirattal

Calamus erectus Roxb. (*Calamus collinus* Griff.; *Calamus erectus* var. *birmanicus* Becc.; *Calamus erectus* var. *collinus* (Griff.) Becc.; *Calamus erectus* var. *macrocarpus* (Griff. ex Mart.) Becc.; *Calamus erectus* var. *schizospathus* (Griff.) Becc.; *Calamus macrocarpus* Griff. ex Mart.; *Calamus schizospathus* Griff.; *Palmijuncus collinus* (Griff.) Kuntze; *Palmijuncus erectus* (Roxb.) Kuntze; *Palmijuncus macrocarpus* (Griff. ex Mart.) Kuntze; *Palmijuncus schizospathus* (Griff.) Kuntze)

SE Asia, China, Vietnam. A non-climbing rattan palm, densely tufted, clump-forming, spiny green stems, dark brown ovoid-oblong fruits subtended by spreading perianth, fruits edible after removing the pericarp, bitter shoots can be eaten, pioneer species

See *Hort. Bengal.* 72. 1814, *Fl. Ind.* ed. 1832, 3: 774. 1832, *Calcutta J. Nat. Hist.* 5: 31–32. 1845, *Revis. Gen. Pl.* 2: 733. 1891, *Fl. Brit. India* 6: 439. 1892 and *Rec. Bot. Surv. India* 2: 197. 1902, *Ann. Roy. Bot. Gard.* (Calcutta) 11: 125. 1908, *Pharmaceutical Biology* 27(2): 65–73. 1989

(Tender young shoots eaten for skin diseases, stomach problems, removal of worms, chest complaints and gastrointestinal disorders. Masticatory, seeds used in place of betel nut. Seeds eaten for indigestion and stomachache.)

in English: viagra palm

in India: arotong, azotong, jeng, jengu, nelapoka, pre, tare, taur

Calamus extensus Roxb.

India.

See *Hort. Bengal.* 77. 1814, *Fl. Ind.* ed. 1832, 3: 777. 1832

(Used in Ayurveda. Pulp of the ripe fruit surrounding the seeds astringent, also for snakebites.)

in India: berisu, bet, betasu, bettam, jatayurkuli, vetasa

Calamus flagellum Griff. ex Mart. (*Calamus flagellum* var. *furvifurfuraceus* S.J. Pei & San Y. Chen; *Calamus flagellum* var. *karinensis* Becc.; *Calamus karinensis* (Becc.) S.J. Pei & San Y. Chen; *Calamus polygamus* Roxb.; *Palmijuncus flagellum* (Griff. ex Mart.) Kuntze; *Palmijuncus polygamus* (Roxb.) Kuntze)

China.

See *Flora Indica*; or, descriptions of Indian Plants 3: 780. 1832, *Historia Naturalis Palmarum* 3: 333, pl. 176, f. 9. 1849, *Revisio Generum Plantarum* 2: 733. 1891 and *Annals of the Royal Botanic Garden. Calcutta.* 11(1): 129–130, t. 6. 1908, *Acta Phytotaxonomica Sinica* 27(2): 133. 1989

(Young tender shoots eaten for stomach problems, removal of worms, dysentery, cold and coughing. Edible fruits used as betel nut. Magic, leaves and stem kept in the vicinity of the house to prevent the entry of evil spirit.)

in China: chang bian teng

in India: ramang, resin

Calamus gamblei Becc. (*Calamus gamblei* Becc. ex Becc. & Hook.f.; *Calamus gamblei* var. *sphaerocarpus* Becc.)

India. Palm, long and sharp spines

See *Fl. Brit. India* [J.D. Hooker] 6: 453. 1893

(Religious and supernatural beliefs, conserved in sacred groves.)

in India: pachchooral

Calamus gracilis Roxb. (*Calamus gracilis* Thwaites, nom. illeg.; *Calamus blancoi* (Blanco) Kunth; *Calamus gracilis* Blanco, nom. illeg.; *Calamus hainanensis* C.C. Chang & L.G. Xu ex R.H. Miao; *Palmijuncus gracilis* (Roxb.) Kuntze)

India.

See *Hort. Bengal.* 73. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 781–783. 1832, *Flora de Filipinas* 267. 1837, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 3: 595. 1841, *Enumeratio Plantarum Zeylaniae* 330. 1864, *Revisio Generum Plantarum* 2: 733. 1891 and *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1981(3): 116. 1981

(Ceremonial, ritual, worship, leaves used in poojas.)

in China: hai nan sheng teng, xi jing sheng teng

in India: yoyee

Calamus javensis Blume (*Calamus amplexens* Becc.; *Calamus borneensis* Miq.; *Calamus borneensis* Becc., nom. illeg.; *Calamus equestris* Blume, nom. illeg.; *Calamus filiformis* Becc.; *Calamus javensis* subvar. *intermedius* Becc.; *Calamus javensis* subvar. *penangianus* Becc.; *Calamus javensis* subvar. *polyphyllus* Becc.; *Calamus javensis* subvar. *purpurascens* Becc.; *Calamus javensis* subvar. *tenuissimus* Becc.; *Calamus javensis* var. *acicularis* Becc.; *Calamus kemamanensis* Furtado; *Calamus tetrastichus* Blume; *Palmijuncus amplexens* (Becc.) Kuntze; *Palmijuncus borneensis* (Miq.) Kuntze; *Palmijuncus javensis* (Blume) Kuntze; *Palmijuncus tetrastichus* (Blume) Kuntze)

Thailand, Malesia, Philippines. Sparsely spiny, spiny leaf-sheaths, in tropical rain forest

See *Rumphia* 3: 62. 1847, *Revis. Gen. Pl.* 2: 733. 1891, *Fl. Brit. India* 6: 443. 1892 and *Ann. Roy. Bot. Gard.* (Calcutta) 11(1): 185. 1908, *Gard. Bull. Singapore* 15: 170. 1956

(The edible raw cabbage for curing coughs.)

Common names: arorog, arurug, coonk stook, hoe cating, howe cacing, lempinit ular-ular, pelus, pelus mingay, pelus susu, penjalin cacing, pulut putih, rattan, rotan cacing, rotan lilin, rotan mendon, rotan opot, rote batu, timai, uwai peladas, uwai podos, wai kuan, wai tek, wi anak, wi peladas

in Indonesia: howe cacing, rotan lilin, rotan opot

in Malaysia: coonk stook, lempinit ular-ular, rotan lilin

in Philippines: arorog, arurug, rotan cacing

in Thailand: rote batu, wai kuan, wai tek

Calamus latifolius Roxb. (*Calamus humilis* Roxb.; *Calamus inermis* T. Anderson; *Calamus inermis* var. *menghaiensis* San Y. Chen; *Calamus latifolius* Kurz, nom. illeg.; *Calamus latifolius* var. *marmoratus* Becc.; *Calamus macracanthus* T. Anderson; *Palmijuncus humilis* Kuntze; *Palmijuncus humilis* (Roxb.) Kuntze; *Palmijuncus inermis* Kuntze; *Palmijuncus inermis* (T. Anderson) Kuntze; *Palmijuncus latifolius* (Roxb.) Kuntze; *Palmijuncus macracanthus* (T. Anderson) Kuntze; *Palmijuncus macroacanthus* Kuntze)

China, Nepal, Himalaya. Robust climbing cane, leaf sheaths armed

See *Hortus Bengalensis*, or a catalogue ... 72–73. 1814, *Fl. Ind.* ed. 1832, 3: 751, 775. 1832, *J. Linn. Soc., Bot.* 11: 10–11. 1869 [1871 publ. 1869], *Journal of the Asiatic Society of Bengal*. Gard.* (Calcutta) 12: 107. 1918, *Acta Bot. Yunnan.* 24(2): 202. 2002

(Young tender shoots taken for cold and coughing. Stems for fracture. Ceremonial, ritual, leaves used in poojas, at the time of marriage or shifting houses.)

in Bangladesh: karat-bet

in India: katu-tsjurel, peddapemu, perim-tsjurel, pre, takat, takit, taur

Calamus longispatus Ridley

Peninsular Malaysia. Clustering, thicket-forming, low climbing, without leaf-sheaths

See *Mat. Fl. Malay. Penins.* 2: 209. 1907

(The fruits astringent.)

in Malaysia: rotan kunyung

Calamus macrorrhynchus Burret

China.

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13(120): 590–592. 1937

(Astringent.)

Calamus nambariensis Becc. (*Calamus banlingensis* Chang Y. Yang, Zheng H. Yang & J. Lu; *Calamus doriaei* Becc.; *Calamus giganteus* var. *robustus* S.J. Pei & S. Yang Chen; *Calamus inermis* T. Anderson; *Calamus inermis* var. *menghaiensis* S. Yung Chen, S.J. Pei & K.L. Wang; *Calamus khasianus* Becc.; *Calamus multinervis* var. *menglaensis* S. Yung Chen, S.J. Pei & K.L. Wang; *Calamus platyacanthus* var. *mediostachys* S.J. Pei & S. Yang Che; *Calamus polydesmus* Becc.; *Calamus wailong* S.J. Pei & S. Yang Chen; *Palmijuncus inermis* (T. Anderson) Kuntze)

China, India. Young tender bitter shoots eaten

See *Journal of the Linnean Society, Botany* 11: 11. 1871, *Revisio Generum Plantarum* 2: 733. 1891, *The Flora of British India* 6: 456. 1893 and *Annals of the Royal Botanic Garden. Calcutta.* 11(1): 430–431, 433–436, 442–444, t.

193–194, 198. 1908, *Lingnan Science Journal* 13(1): 54. 1934, *Acta Phytotaxonomica Sinica* 27(2): 138–144, pl. 2–3. 1989, *Acta Botanica Yunnanica* 24(2): 202–203. 2002, *World Bamboo Rattan* 5(4): 25. 2007

(Ceremonial, ritual, leaves used in poojas, at the time of marriage or shifting houses.)

in China: nan ba sheng teng

in India: takit

Calamus ornatus Blume (*Palmijuncus ornatus* (Blume) Kuntze; *Rotang ornatus* (Blume) Baill.)

Thailand, Sumatra, Java, Borneo. Rattan, massive clustering, climbing, dioecious, minute terminal leaflets, stem without leaf-sheaths, nodes rather prominent, armed with flattened triangular black spines with yellowish bases, flagellum armed with short black yellow-based spines inflorescence flagelliferous, ripe fruit short beaked, seed ellipsoid angular, related to *Calamus scipionum* Lour. and *Calamus peregrinus* Furt., in secondary to primary forest, tropical rain forest

See *Rumphia* 3: 58. 1847, *Revis. Gen. Pl.* 2: 733. 1891

(Water from the raw cabbage used to cure stomachache and diarrhea. During childbirth, women may drink the extract of the roots to alleviate pain. Ash of the stem used to cure yaws.)

in Indonesia: rotan buku dalam, rotan kesup, rotan lambang

in Malaysia: rotan dok, rotan saga badak, sek batang, we maliang

in Philippines: borongan, limuran, rimoran

in Thailand: waai chaang

Calamus paspalthus Becc. (*Calamus intumescens* (Becc.) Ridl.; *Daemonorops intumescens* Becc.)

Malaysia, Borneo. Rattan, solitary, creeping, stem without leaf-sheaths, adventitious roots develop at almost every node near the ground, ripe fruit edible, young shoot eaten, in primary forest

See *Fl. Brit. India* 6: 450. 1893 and *Rec. Bot. Surv. India* 2: 222. 1902, *Mat. Fl. Malay. Penins.* 2: 200. 1907

in Malaysia: rotan sirikis, wi (= lempinit) singkau (= tingkau), wi lohong

(For skin diseases.)

Calamus pseudotenuis Becc. (*Calamus pseudo-tenuis* Beccari ex Becc. & Hook. f.; *Calamus pseudotenuis* Beccari ex Becc. & Hook. f.; *Calamus pseudotenuis* Becc. & Hook. f.)

India, Sri Lanka.

See *Fl. Brit. India* [J.D. Hooker] 6: 445. 1892

(Seed paste taken against sterility.)

in India: pirambu

Calamus rheedei Griff. (*Daemonorops rheedei* Mart.; *Daemonorops rheedei* (Griff.) Mart.; *Palmijuncus rheedei* (Griff.) Kuntze; *Palmijuncus rheedei* Kuntze)

India.

See *Calcutta J. Nat. Hist.* 5: 73. 1845, *Revis. Gen. Pl.* 2: 732. 1891

(Seeds powdered and applied in ulcer.)

in India: kattucural

Calamus rotang L. (*Calamus monoecus* Roxb.; *Calamus roxburghii* Griff.; *Draco rotang* Crantz; *Palmijuncus monoecus* (Roxb.) Kuntze; *Palmijuncus monoecus* Kuntze; *Rotang linnaei* Baill.; *Rotanga calamus* Crantz)

India, Sri Lanka.

See *Species Plantarum* 1: 325. 1753, *Calcutta J. Nat. Hist.* 5: 43. 1845, *Revis. Gen. Pl.* 2: 733. 1891 and *Ann. Roy. Bot. Gard.* (Calcutta) 11(1): 271–272. 1908, *Proceedings of the Indian Science Congress Association* 63(3): 123. 1976, *Cell and Chromosome Research* 8: 69–73. 1985, *Proceedings of the Indian Science Congress Association* 73(3-vi): 157. 1986

(Used in Ayurveda, Unani and Sidha. Astringent, tonic, spasmolytic, antidote, antiinflammatory, antidiarrheal, for snakebites, chronic fevers, piles, strangury, convulsions. Roots a remedy for dysentery, biliousness and febrifuge. Wood vermifuge. A fungus present on the canes. Magico-religious beliefs and performances.)

in English: chair bottom cane

in India: abhrapushpa, arini, bed, bedisu, bemt, bet, betham, bethama, bethamu, bethasu, betta, bettam, bettamu, bettha, betthada balli, betthama, betthamu, betthapu chettu, catikkilanku, choorai, chooral, chural, churei, churel, cural, curalkilanku, dirghapatraka, dirghavalli, dodda bettha, gandhapusha, habbe, hebbe, hejje, jatayarkuli, kalana, latavamsa, manjarinamra, mellisuppirambu, naagabettha, naagara bettha, nagabetta, neeruprabha, nichula, niruprabba, nirvanji, nirvanni, paemu bethamu, pemu, pepa, perambu, pirambu, pirampu, pirapan kizhangu, pirappan, pisin, prabba, prabbali, prabbili, prabha, prabili, prappankilanku, punampu, purampu, ratha, rathabhra, rattan, rotang, sadi, sannabethamu, sannabethamu, shita, sothu perambu, sural, suralbetta, sushena, suvedagandam, suvedam, tevattirattal, vaanira, vaeth, vaethasamu, vanira, vaniram, vanjula, vetagra, vetasa, vetasah, vetasi, vetra, vetrah, vettiram, vetus, vidula

in Sri Lanka: wewel

Calamus tenuis Roxb. (*Calamus amarus* Lour.; *Calamus heliotropium* Buch.-Ham. ex Kunth; *Calamus horrens* Blume; *Calamus royleanus* Griff.; *Calamus stoloniferus* Teijsm. & Binn., nom. inval.; *Calamus tenuis* Thwaites, nom. illeg. hom.; *Palmijuncus amarus* Kuntze; *Palmijuncus amarus* (Lour.) India, Bangladesh, Sri Lanka.

See *Hort. Bengal.* 73, *Fl. Ind.* ed. 1832, 3: 780. 1832, *Enumeratio Plantarum Zeylaniae* 330. 1864, *Revis. Gen. Pl.* 2: 733. 1891 and *Economic Botany* 56(2): 147–153. 2002

(Used in Ayurveda. Astringent, tonic, spasmolytic, antidote, antiinflammatory, antidiarrheal, for snakebites, chronic fevers, piles, strangury, convulsions. Roots a remedy for dysentery, biliousness and febrifuge. Wood vermifuge.)

in English: bareilly cane

in India: bernt, jail bet, jali bet, kashri-bet, vetasa, vetra

Calamus thwaitesii Becc. (*Calamus thwaitesii* var. *canaranus* Becc.)

India, Sri Lanka.

See *Fl. Brit. India* [J.D. Hooker] 6: 441. 1893 and *Journal of Ethnopharmacology* 47(3): 149–158. 1995

(Stem sap as antifertility drug.)

in India: handi beettha, jiddu bettha, kumaari bettha

in Sri Lanka: ma wewel

Calamus travancoricus Bedd. ex Becc. (*Calamus travancoricus* Bedd. ex Hook.f.)

India. Slender climbing canes

See *Fl. Brit. India* [J.D. Hooker] 6: 452. 1893 [Sep 1893]

(Used in Ayurveda. Young tender leaves for worms, dyspepsia and ear disease. Religious and supernatural beliefs, conserved in sacred groves.)

in English: cane

in India: baale bettha, erucural, kannichchooral, kattucural, manichooral, maniperambu, naayi bettha, naibetta, nayibetta, pirambu, tsjeratsjurel, tsjeru-tsjurel, tsjerutsjurel, vethra, vetra

Calamus viminalis Willd. (*Calamus extensus* Mart., nom. illeg.; *Calamus fasciculatus* Roxb.; *Calamus fasciculatus* subvar. *andamanicus* Becc.; *Calamus fasciculatus* subvar. *bengalensis* Becc.; *Calamus fasciculatus* subvar. *cochinchinensis* Becc.; *Calamus fasciculatus* subvar. *pinangianus* Becc.; *Calamus litoralis* Blume; *Calamus pseudorotang* Mart. ex Kunth; *Calamus viminalis* subvar. *pinangianus* Becc.; *Calamus viminalis* var. *andamanicus* Becc.; *Calamus viminalis* var. *bengalensis* Becc.; *Calamus viminalis* var. *cochinchinensis* Becc.; *Calamus viminalis* var. *fasciculatus* (Roxb.) Becc.; *Palmijuncus fasciculatus* (Roxb.) Kuntze; *Palmijuncus litoralis* (Blume) Kuntze; *Palmijuncus pseudorotang* (Mart. ex Kunth) Kuntze; *Palmijuncus viminalis* (Willd.) Kuntze; *Rotang viminalis* (Willd.) Baill.)

India, China. Clumping, armed petioles, vicious spines, large clusters of hooks

See *Sp. Pl.* Editio quarta 2(1): 203. 1799, *Rumphia* 3: 43. 1847, *Revis. Gen. Pl.* 2: 732–733. 1891 and *Ann. Roy. Bot. Gard.* (Calcutta) 11(1): 206–207. 1908

(Used in Ayurveda and Sidha.)

in English: bitter rattan palm, lawyer palm, rattan

in Cambodia: piidau

in India: amalavetasamu, ambuветаса, amlavetasamu, bet, betham, bettamu, cerucural, chural, cirupirappankilanku, cural, kyeingka, kyenka, naadeyi, nadeyi, niruhabbe, papatige, parambu, pepa, pepabettamu, pirambu, pirampu, purampu, tsjerutsjurel, umbavetus, vetra

Calandrinia Kunth Portulacaceae (Montiaceae, Talinaceae)

For the Swiss botanist Jean Louis Calandrini, 1703–1758, professor of mathematics and philosophy at Geneva, traveller, author of *Theses physicae de vegetatione et generatione plantarum*. Geneva 1734; see *Familles des Plantes* 2: 245, 609. 1763, Sir William Watson (1715–1787), *Observations upon the effects of lightning*, with an account of the apparatus proposed to prevent its mischiefs to buildings ... being answers to certain questions proposed by Mr. Calandrini. London 1764, Bonpland, Aimé (1773–1858), *Nova Genera et Species Plantarum*. [H.B.K.] Lutetiae Parisiorum: Sumtibus Librairie Graeco-Latino-Germanicae, 1815–1825, *Philos. Mag. Ann. Chem.* 2(1): 123. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 358. 1828, *Edinburgh Journal of Science* 3: 356. 1831, *Histoire Naturelle des Végétaux. Phanérogames* 5: 229. 1836, Lilja, N. (Nils) (1808–1870), *Flora Öfver Sveriges Odlade Vexter* Stockholm: Zacharias Haeggström, 1839, *Novarum Stirpium Decades* 84. 1839, *Berichte der Deutschen Botanischen Gesellschaft* 15: 500–502. 1897 and *Fieldiana, Bot.* 24(4): 207–214. 1946, *Boletín de la Sociedad Argentina de Botánica* 5: 28. 1953, *Parodiana* 3(2): 330. 1985, *Gayana, Bot.* 42: 1–157. 1985, *Fl. Veracruz* 51: 1–38. 1986, *Phytologia* 60(3): 172. 1986, *Phytologia* 70(3): 223. 1991, *Phytologia* 74(4): 277. 1993, *Molecular Phylogenetics and Evolution*. 15(3): 419–439. 2000.

Calandrinia monandra Hershkovitz (*Calandrinia monandra* DC.; *Monocosmia corrigioloides* Fenzl, nom. illeg.; *Monocosmia monandra* (Ruiz & Pav.) Baill.; *Monocosmia monandra* Baill.; *Talinum monandrum* Ruiz & Pav.)

South America.

See *Fl. Peruv. Prodr.* 65, in obs. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 118. 1798, *Prodr.* (DC.) 3: 359. 1828, *Novarum Stirpium Decades* 93. 1839, *Histoire des Plantes* (Baillon) 9: 72, fig. 86. 1888

(Antioxidant and antiseptic.)

Calandrinia Kunth Portulacaceae (Montiaceae, Talinaceae)

Calanthe R. Br. Orchidaceae

Greek *kalos* ‘beautiful’ and *anthos* ‘a flower’, pretty flowers; see Robert Brown, *Edwards’s Botanical Register*. 7: sub t. 573. 1821, *Botanical Register*; consisting of coloured ... 9: ad t. 720. 1823, *Mémoires de la Société d’Histoire Naturelle de Paris* 4: 39. 1828 and B. Lewis and Phillip Cribb, *Orchids of Vanuatu*. Royal Botanic Gardens, Kew 1989, B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville*. Royal Botanic Gardens, Kew 1991, *Die Orchidee* 45(2): 52, 54–55. 1994.

Calanthe monophylla Ridl.

Malaysia. Orchid

See *J. Fed. Malay States Mus.* 4: 70. 1909

(Magic, the smell from the burning leaves to scare away ghosts.)

Calanthe plantaginea Lindl. (*Alismorchis lindleyana* Kuntze; *Alismorkis lindleyana* (Lindl.) Kuntze; *Calanthe plantaginea* Griff., nom. illeg.)

India, Himalaya, China. Small erect terrestrial herb, white or pale lilac flowers, oblong capsule

See *Numer. List* [Wallich] n. 7346. 1832, *Gen. Sp. Orchid. Pl.*: 250, 252. 1833, *Notulae ad Plantas Asiaticas* 3: 368. 1851, *Revisio Generum Plantarum* 2: 650. 1891 and *Die Orchidee* 45(2): 52, 54–55. 1994

(Root made into a paste and applied on wounds and cuts.)

in China: che qian xia ji lan

Calanthe tricarinata Lindl. (*Alismorchis tricarinata* Kuntze; *Alismorkis tricarinata* (Lindl.) Kuntze; *Calanthe lamellata* Hayata; *Calanthe megalopha* Franch.; *Calanthe undulata* Schltr.; *Calanthe undulata* J.J. Taiwan 1: 204. 1996, *Fragm. Florist. Geobot.* 43(1): 41. 1998, *Austral. Orchid Res.* 5: 8. 2006

(Plant juice relieves gastro-intestinal problems. Roots poultice to cure swollen hands; roots chewed to cure diarrhea. Flower extract taken as a pain killer.)

in English: scrub lily

in Japan: tsuru-ran

in Thailand: ueang kao tog

in Vanuatu: natapak

Calathea G. Meyer Marantaceae

Greek *kalathos* 'a basket' and Latin *calathus* 'a wicker basket, the cup of a flower, the calyx', in allusion to the flower cluster of these plants or to one of the uses of the leaves or to the form of the stigma, see *Anales Inst. Biol. Univ. Nac. Mexico* 21(2): 319–343. 1951, *Fieldiana, Bot.* 24(3): 207–221. 1952, *Fl. Ecuador* 32: 11–192. 1988.

Calathea latifolia (Willd. ex Link) Klotzsch (*Allouya americana* (Lam.) A. Chev.; *Alpinia latifolia* Willd. ex Link; *Calathea allouga* Steud.; *Calathea allouia* Lindl.; *Calathea allouia* (Aubl.) (A tincture of the leaf used for cystitis; leaves diuretic.)

in English: Guinea arrowroot, sweet corn root, sweet corn tuber

in Caribbean: faldita morada, leren

Calathodes Hook.f. & Thomson Ranunculaceae

Resembling a *kalathos* ‘a basket, a basket narrow at the base’, *kalathoeides* ‘basket-shaped, narrow at the base’, in allusion to the flowers, see Wang Wen-tsai, Wang Shu-hsiou & Hsiao Pei-ken. *Ranunculaceae* subfam. *Helleboroideae* and subfam. *Thalictroideae*. In: *Fl. Reipubl. Popularis Sin.* 27: 59–601. 1979, Wang Wen-tsai, Chang Meichen, Fang Ming-yuan, Ling Ping-ping, Ting Chih-tsun, Wang Shu-hsiou & Liou Liang. *Ranunculaceae* subfam. *Ranunculoideae*. In: Wang Wen-tsai, ed., *Fl. Reipubl. Popularis Sin.* 28: 1–345. 1980.

Calathodes oxycarpa Sprague (*Calathodes palmata* J.D. Hooker & Thomson var. *appendiculata* Brühl)

China. Herb, simple or branched, white sepals, persistent style

See *Bull. Misc. Inform. Kew.* 1919(10): 403. 1919

(Whole plant used for treating rheumatism, improving blood circulation and as an agent for hair growth. Fracture-treating medicated liquor made up by using Chinese medicinal material: *Cynanchum wallichii*, *Calathodes oxycarpa*, *Scindapsus officinalis*, *Toricellia angulata* and also for rheumatic arthritis, traumatic injuries, rheumatic numbness, rheumatic arthralgia and myalgia.)

in China: ji zhua cao

Calceolaria L. Scrophulariaceae

Latin *calceolus* ‘a slipper’, referring to the flowers, slipper flowers; see C. Linnaeus, in *Kongl. Vetenskaps Academiens Handlingar.* 31: 286, t. VIII. Stockholm 1770.

Calceolaria stellariifolia Phil.

Chile.

See *Anales del Museo Nacional de Chile. Primera Sección — Zoolojía* 71. 1891

(Leaves infusion to warm the body.)

in Chile: zapatilla

Caldesia Parlato Alismataceae

After the Italian botanist Ludovico (Lodovico) Caldesi, 1822–1884, politician, mycologist, naturalist, in 1866 member of the national parliament, author of “Flora faventinae tentamen.” in *Nuovo Giornale Botanico Italiano.* 1879–1880; see *A Manual of the Botany of the Northern United States* 460. 1848, *Nuovi*

Generi e Nuove Specie di Piante Monocotiledoni 57. 1854, Filippo Parlatore (1816–1877), *Flora Italiana.* 3(2): 598. 1860 and Ethelyn Maria Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists.* 1: 299. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 63. 1972, A.R. Gentilini, ed., *Bibliotheca botanica.* Erbario e libri dal Cinquecento al Settecento del naturalista Lodovico Caldesi. Catalogo della Mostra. Faenza, Palazzo Milzetti 1985.

Caldesia reniformis (D. Don) Makino (*Alisma calophyllum* Wall.;

Alisma damasonium Willd.; *Alisma dubium* Willd.; *Alisma parnassifolium* L.; *Alisma reniforme* D. Don; *Caldesia parnassifolia* (Bassi ex L.) Parl.; *Caldesia parnassifolia* subsp. *euparnassiifolia* (L.) Asch. & Graebn.; *Caldesia parnassifolia* var. *minor* (L.) Bouché; *Caldesia reniformis* Makino; *Echinodorus parnassifolius* Engelm.)

Madagascar. Glabrous aquatic herbs, elliptic yellowish-brown achenes

See *Systema Naturae*, ed. 12 2: 230. 1767, *Prodr. Fl. Nep.* 22. 1825, *Synopsis der Mitteleuropäischen Flora* 1: 385. 1879, *Fl. Brit. India* 6: 560. 1893 and *Das Pflanzenreich* IV, 15: 16. 1903, *Bot. Mag.* (Tokyo) xx. 34. 1906

(Leaves infusion astringent, diuretic, diaphoretic, vulnerary.)

Calea L. Asteraceae

From the Greek *kalos* ‘beautiful’, in allusion to the showy flowers; see C. Linnaeus, *Species Plantarum.* Editio Secunda 2: 1179. 1763, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 1(2): 140. 1807, *Elenchus plantarum:* quae in Horto Regio Botanico Matritensi colebantur anno mdcccxxv. Cum novarum, aut minus cognitarum stirpium diagnosi, nonnullarumque descriptionibus contractis. Matriti: ex Typographia Regia, 1816, *Genera et species plantarum* [Lagasca] 31. Matriti: Typographia Regia, 1816, *Trans. Linn. Soc. London* 12: 108–109. 1817, *Linnaea* 5: 158. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 669–670, 672, 675. 1836, *Sertum Orchidaceum* t. 10. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(1): 293. 1838, *Journal of Botany*, being a second series of the Botanical Miscellany 2: 44. 1840, *Linnaea* 19: 716. 1847, *London Journal of Botany* 7: 411–412. 1848, *Genera Plantarum* 2(1): 390–391. 1873, *Proceedings of the American Academy of Arts and Sciences* 32(1): 21. 1896 and *University of California Publications in Botany* 6(4): 75. 1914, *Arquivos do Instituto de Biologia Vegetal* 17: 19, f. a-c. 1962, *Brittonia* 20: 166–168. 1968, *Rhodora* 77: 171–195. 1975, *Syst. (Hallucinogen, leaves in infusion for divination.)

in Mexico: thle-pela-kano

Calendula L. Asteraceae

From *calendae* or *kalendae, arum*, Latin for the Calends or the first day of each month, referring to the long flowering period; see Carl Linnaeus, *Species Plantarum*. 2: 921–922. 1753, *Genera Plantarum*. Ed. 5. 393. 1754 and *Inform. Bot. Ital.* 6: 37–43. 1974, *Israel J. Bot.* 23: 169–201. 1974, *Norweg. J. Bot.* 22: 71–76. 1975, *Nucleus* 19: 8–12. 1976, *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 26: 1–42., *Bot. Not.* 131: 391–404. 1978, *Bocconea* 3: 229–250. 1992,

Willdenowia 23: 211–238. 1993, *Biologia* (Bratislava) 48: 441–445. 1993, *Thaiszia* 7: 75–88. 1997, *Cytologia* 64: 181–196. 1999, *Bocconea* 11: 117–169. 1999, *Amer. J. Bot.* 86(7): 1003–1013. 1999.

Calendula arvensis L. (*Calendula arvensis* M. Bieb.; *Calendula arvensis* Boiss.)

Europe.

See *Species Plantarum*, Editio Secunda 2: 1303–1304. 1763, *Fl. Taur.-Caucas.* 3: 596. [Dec 1819 or early 1820], Boissier, Pierre Edmond (1810–1885), *Voyage botanique dans le midi de l'Espagne* pendant l'année 1837. Paris: Gide et cie, 1839–1845

(Antiphlogistic, antiseptic, antispasmodic, astringent, cholagogue, diaphoretic, emmenagogue, vulnerary, a remedy for skin problems, applied externally to bites, stings, sprains, wounds, sore eyes, varicose veins. Leaves diaphoretic; flowers antispasmodic, emmenagogue and stimulant.)

in English: field marigold

in Arabic: 'ain el-baqar

Calendula officinalis L. (*Calendula officinalis* Hohen.)

Cosmopolitan. Aromatic, annual herb, erect, elongated toothed fleshy leaves, yellow orange flowers

See *Species Plantarum* 2: 921. 1753, *Bull. Soc. Imp. Naturalistes Moscou* (1833) 256. 1833 and *Fl. Libya* 107: 148. 1983

(Used in Unani and Sidha. Essential oil antibacterial. Flowers wound healing, emmenagogue, sedative, anti-hemorrhagic, antifungal, antiinflammatory, antimicrobial, antiseptic, antispasmodic, astringent, styptic, febrifuge, antiprotozoal, a remedy for skin problems, applied externally to bites, stings, sprains, wounds, sore eyes, varicose veins, gastric and duodenal ulcers; flower infusion for jaundice. Mouthwash for toothache.)

in English: calendula, common marigold, garden marigold, hen and chickens, marigold, pot marigold, ruddles, Scotch marigold

in Arabic: djamir, djoumaira

in China: jin zhan ju, chin chan hua

in India: roja, sushi phul, thulvkka saamanthi, zendu, zergul

in Japan: tō-kin-sen-ka

in Tibetan: bod-gur-gum

Calla L. Araceae

Said to be a variant of Latin *calsa*, a plant name used by Plinius; see Carl Linnaeus, *Species Plantarum* 2: 968. 1753, *Genera Plantarum*. Ed. 5. 414. 1754. A. Bonavilla, *Dizionario etimologico di tutti i vocaboli usati nelle*

scienze, arti e mestieri, che traggono origine dal greco. Milano 1819–1821 and Wilson, K.A. “The genera of the Arales in the southeastern United States.” *J. Arnold Arbor.* 41: 47–72. 1960, Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. Prentice-Hall Inc., Englewood Cliffs, N.J., USA. 1964, Plowman, T. “Folk uses of New World aroids.” *Econ. Bot.* 23: 97–122. 1969, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 1: 187. 1979, Airaksinen, M.M. et al. “Toxicity of plant material used as emergency food during famines in Finland.” *Journal of Ethnopharmacology* 18(3): 273–296. 1986. The whole plant, particularly the rhizome, is irritant and poisonous on ingestion, acrid and caustic. Calcium oxalate crystals occur, which can cause severe pain-irritation of the mouth and throat, vomiting, edema and difficulty of speaking, dysphagia, hoarseness, nausea; washing or heating the rhizome can inactivate the oxalates. Watery sap very irritant on contact.

Calla palustris L. (*Calla brevis* (Raf.) Á. Löve & D. Löve; *Calla cordifolia* Stokes; *Calla generalis* E.H.L. Krause; *Calla ovatifolia* Gilib.; *Calla palustris* f. *ariformis* Asch. & Graebn.; *Calla palustris* f. *gracilis* Asch. & Graebn.; *Calla palustris* f. *polyspathacea* Vict. & J. Rousseau; *Callaion bispatha* (Raf.) Raf.; *Callaion brevis* (Raf.) Raf.; *Callaion heterophylla* (Raf.) Raf.; *Callaion palustris* (L.) Raf.; *Dracunculus paludosus* Montandon; *Provenzalia bispatha* Raf.; *Provenzalia brevis* Raf.; *Provenzalia heterophylla* Raf.; *Provenzalia palustris* (L.) Raf.)

Asia temperate, Europe, North America. Small herb, perennial, erect, emergent, semi-aquatic, long-stalked heart-shaped leaves, tiny yellow flowers on a spadix clasped by a white petal-like spathe, fruits a round cluster of red berries, famine food, flour can be made from the seeds and the ground rhizome used as flour for bread, pond edges, bogs, swamps

See *Species Plantarum* 2: 968. 1753, *Gen. Pl.* ed. 5, 414. 1754, *Exerc. Phyt.* ii. 452. 1792, *Bot. Mat. Med.* iv. 326. 1812, *Am. Monthly Mag. Crit. Rev.* 2: 267. 1818, *New Fl. N. Am.* 2: 90. 1836 [1837] and *Deutschl. Fl.* (Sturm), ed. 2 1: 180. 1906, Dudley, M.G. “Morphological and cytological studies of *Calla palustris*.” *Bot. Gaz.* 98: 556–571. 1937, *Contr. Inst. Bot. Univ. Montréal* 36: 68. 1940, *Bot. Not.* 128(4): 505. 1975 (publ. 1976), *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 25: 1–18. 1976, *Botaniceskij Žurnal SSSR* 70(7): 997–999. 1985, *Botaniceskij Žurnal SSSR* 71: 1145–1147. 1986, *Plant Systematics and Evolution* 158: 97–106. 1988, *Scripta Facultatis Scientiarum Naturalium Universitatis Purkynianae Brunensis* 19: 301–322. 1989, *Regnum Veg.* 127: 28. 1993, *Can. Vet. J.* 47(8): 787–789. 2006

(All parts poisonous, cause severe pain in the mouth if eaten, burning and swelling of lips, mouth, tongue, and throat, difficulty of speaking. Antirheumatic, for colds and influenza; as a poultice on swellings and snakebites; aerial stems in the treatment of sore legs.)

in English: bog arum, calla, calla lily, female water dragon, marsh calla, water arum, water dragon, wild calla, wild calla lily

Callaeum Small Malpighiaceae

Probably from the Greek *kallos* ‘beauty’ or *kallaion* ‘cock’s comb’, see *Actes de la Société d’Histoire Naturelle de Paris* 1: 109. 1792 and *Index Lectionum in Lyceo Regio Hosiano Brunsbergensi: Banisteria* 12. 1901, *North American Flora* 25(2): 128. 1910, *Arquivos do Serviço Florestal* 2(1): 13. 1943, *Fl. Neotrop.* 30: 176. 1982, *Syst. Bot.* 11(2): 335–353. 1986.

Callaeum antifebrile (Griseb.) D.M. Johnson (*Banisteria antifebrilis* Griseb.; *Cabi paraensis* Ducke; *Mascagnia psilophylla* fo. *peruviana* Nied.; *Mascagnia psilophylla* (A. Juss.) Griseb. var. *antifebrilis* (Griseb.) Nied.)

Eastern Amazon, Brazil.

See *Linnaea* 22: 15. 1849 and *Arbeiten aus dem Botanischen Institut des Königl. Lyceums Hosianum in Braunsberg* 3: 28. 1908, *Das Pflanzenreich* 141(Heft 93): 121. 1928, *Arquivos do Serviço Florestal* 2, no. 1: 13–14, tab. 1. 1943, *Boletim do Instituto de Química Agrícola* (Rio de Janeiro) 34: 17–27. 1954, *Naunyn-Schmiedeberg’s Archives of Pharmacology* 291(2): 201–212. 1975, *Systematic Botany* 11(2): 349. 1986

(Closely allied to *Banisteriopsis*, but apparently not employed as a hallucinogen.)

Callerya Endl. Fabaceae (Millettieae)

Callerya atropurpurea (Wall.) Schot (*Adinobotrys atropurpurea* (Wall.) Dunn; *Adinobotrys atropurpureus* (Wall.) Dunn; *Millettia atropurpurea* (Wall.) Benth.; *Millettia atropurpurea* Ridl.; *Padbruggea atropurpurea* (Wall.) Craib; *Padbruggea pubescens* Craib; *Phaseolodes atropurpureum* (Wall.) Kuntze; *Pongamia atropurpurea* Wall.; *Whitfordiodendron atropurpurea* (Wall.) Merr.; *Whitfordiodendron atropurpureum* (Wall.) Merr.; *Whitfordiodendron atropurpureum* Dunn; *Whitfordiodendron pubescens* (Craib) Burkill)

Cambodia, Indonesia, Malay Peninsula. Perennial non-climbing tree

See *A Numerical List of Dried Specimens* n. 5910. 1831, *Plantae Junghuhnianae* 2: 249. 1852, *Flora van Nederlandsch Indië* 1(1): 150. 1855, *Revisio Generum Plantarum* 1: 201. 1891 and *Leaflet Philipp. Bot.* ii. 689, 743. 1910, *Bulletin of Miscellaneous Information Kew* 1911(4): 194, 197. 1911, *Bull. Misc. Inform. Kew* 1912, 364. 1912, *Bulletin of Miscellaneous Information Kew* 1927(2): 61. 1927, *Pap. Michigan Acad. Sci.* xix. 160. 1934, *Dict. Econ. Prod. Mal. Penins.* ii. 2256. 1935, *Bull. Misc. Inform. Kew* 1935, 319. 1935, *Blumea* 39(1–2): 15. 1994

(Root used as fish poison.)

in Burma: danyinnie

in Malay: chicha, girah payah, merbong, tulang daeng

Callerya cinerea (Benth.) Schot (*Millettia bockii* Harms; *Millettia cinerea* sensu auct.; *Millettia cinerea* Benth.; *Millettia cinerea* var. *yunnanensis* Pamp.; *Millettia congestiflora* T.P. Chen; *Millettia dielsiana* Diels; *Millettia dorwardii* Collett & Hemsl.; *Millettia dowardi* Collett & Hemsl.; *Millettia gentiliana* H. Lev.; *Millettia longipedunculata* Z. Wei; *Millettia obovata* Gagnep.; *Millettia oosperma* Dunn; *Millettia sericosema* Hance; *Millettia sphaerosperma* Z. Wei; *Pongamia cinerea* Graham; *Pongamia heterocarpa* Baker; *Pongamia oblonga* Graham; *Pongamia palustris* Graham; *Pongamia paniculata* Graham)

India, Bhutan, Burma, China. Perennial climbing shrub, woody vine, purple-violet-green flowers

See *Plantae Junghuhnianae* 2: 249. 1852, *Journal of Botany, British and Foreign* 20(237): 259. 1882, *Journal of the Linnean Society, Botany* 28(189–191): 40. 1890, *Revisio Generum Plantarum* 1: 201. 1891 and *Nuovo Giornale Botanico Italiano*, new series 17(1): 25. 1910, *Journal of the Linnean Society, Botany* 41(280): 157. 1912, *Notulae Systematicae*. *Herbier du Museum de Paris* 2(12): 361. 1913, *Acta Phytotaxonomica Sinica* 3(3): 362–363. 1955[1954], *Acta Phytotaxonomica Sinica* 23(4): 285–287, pl. 10, 11. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Blumea* 39(1–2): 17. 1994, *Flora Yunnanica* 10: 407. 2006, *Legumes of China* 453. 2007

(Stem anti-anemic, to enrich the blood and promote blood circulation.)

in China: hui mao ya dou teng, jixueteng, mi hua ya dou teng, qiu zi ya dou teng

Callerya megasperma (F. Muell.) Schot (*Kraunhia megasperma* (F. Muell.) Greene; *Millettia megasperma* (F. Muell.) Benth.; *Phaseolodes megaspermum* (F. Muell.) Kuntze; *Wisteria megasperma* F. Muell.)

New South Wales, Queensland. Perennial climbing shrub

See *Medical Repository* 352. 1808, *Fragmenta Phytographiae Australiae* (Mueller) 1(1): 13. 1858 [Mar 1858], *Flora Australiensis: a description ...* 2: 211. 1864, *Pittonia* 2: 175. 1891, *Revisio Generum Plantarum* 1: 201. 1891, *Proceedings of the Linnean Society of New South Wales* 6(4): 679–681. 1891 and *Blumea* 39(1–2): 25. 1994

(Exudation of the cut vine is very astringent.)

in English: Australian wisteria, native wisteria

Callerya reticulata (Benth.) Schot (*Millettia championii* Benth.; *Millettia cognata* Hance; *Millettia kiangsiensis* Z. Wei; *Millettia purpurea* Yatabe; *Millettia reticulata* Benth.; *Phaseolodes reticulatum* (Benth.) Kuntze)

East Asia, China. Perennial non-climbing shrub, climber, deciduous

See *Genera Plantarum* Suppl. 3: 104. 1843, *Plantae Junghuhnianae* 2: 249. 1852, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 74–75. 1852, *Journal of Botany, British and Foreign* 18(213): 260. 1880, *Revisio Generum Plantarum* 1: 201. 1891, *Tokyo Bot. (Bot.)* 41: 123–243. 1912, *Acta Phytotaxonomica Sinica* 23(4): 283–284, pl. 9. 1985, *Blumea* 39(1–2): 1–40. 1994, *Flora Yunnanica* 10: 404. 2006, *Legumes of China* 450. 2007

(Stem anti-anemic, to enrich the blood and promote blood circulation. Emmenagogue, antitumour, oxytoxic, stomachic, tonic, to treat menstrual problems. Roots and stem emmenagogue and stomachic, decoction for menstrual irregularities, vaginal discharge, backache, seminal emission, gonorrhoea and stomachache. Insecticide.)

in China: ji xue teng, jiang xi ya dou teng, kun ming ji xue teng, wang mai ya dou teng

in Japan: murasaki-natsu-fuji

Calliandra Benth. Fabaceae (Ingeae, Leguminosae, Mimosaceae)

Greek *kalli* 'beautiful' and *aner, andros* 'male, anther, stamen'; see George Bentham (1800–1884), *Hooker's Journal of Botany*. 2: 138. 1840 and *Ann. New York Acad. Sci.* 35(3): 101–208. 1936, *Ann. Missouri Bot. Gard.* 37(2): 184–314. 1950, *Phytologia* 48(1): 1–71. 1981, *Arnaldia* 9(2): 43–110. 2002 [2003], *Harvard Pap. Bot.* 7(2): 381–398. 2003.

Calliandra haematocephala Hassk. (*Anneslia haematocephala* (Hassk.) Britton & P. Wilson; *Calliandra boliviana* Britton; *Calliandra inaequilatera* Rusby; *Feuilleea haematocephala* (Hassk.) Kuntze)

Tropical America. Perennial non-climbing tree, shrub, evergreen, rambling, spreading, compound leaves, legume linear-lanceolate, calyx white to pink, corolla pink with green lobes or white, powder-puff-like balls of conspicuous bright red to dark crimson stamens, explosively dehiscent flattened pod

See *Retzia*, sive, *Observationes botanicae, quas de plantis horti botanici Bogoriensis* 1: 216–219. 1855, *Bulletin of the Torrey Botanical Club* 16(12): 327. 1889, *Revisio Generum Plantarum* 1: 188. 1891, *Memoirs of the Torrey Botanical Club* 6(1): 28. 1896, *Revisio Generum Plantarum* 3(3): 63. 1898 and *Scientific Survey of Porto Rico and the Virgin Islands* 6: 348. 1926, *J. Arnold Arbor.* 52 (1): 69–85. 1971, *Geophytology* 9: 175–183. 1979, *Fitoterapia* 64(6): 516–517. 1993, *Memoirs of the New York Botanical Garden* 74(3): 110. 1998, *Nigerian Journal of Natural Products and Medicine* 3: 58–60. 1999, *Natural product research* 20(10): 927–934. 2006

(Antioxidant, antibacterial.)

in English: blood red tassel flower, powder puff bush, powderpuff tree, red powderpuff, stickpea

Calliandra surinamensis Benth. (*Acacia fasciculata* (Willd.) Poir.; *Acacia magdalenae* Bertero ex DC.; *Acacia magdalenae* DC.; *Anneslia fasciculata* (Willd.) Kleinhoonte; *Calliandra angustidens* Britton & Killip; *Calliandra magdalenae* (DC.) Benth.; *Calliandra magdalenae* Benth.; *Calliandra magdalenae* (Bertero ex DC.) Benth.; *Calliandra tenuiflora* Benth.; *Feuilleea fasciculata* Kuntze; *Feuilleea fasciculata* (Willd.) Kuntze; *Feuilleea tenuiflora* (Benth.) Kuntze; *Inga fasciculata* Willd.)

South America, Tanzania, Papua New Guinea. Perennial non-climbing tree, low branching, shrub or small tree with multiple trunks, many-branched, spreading, long arching branches, silky leaflets, showy fragrant bloom, big puffs of watermelon pink and white silky stamens, persistent dehiscent brown pods, rapid growth

See *Species Plantarum*. Editio quarta 4(2): 1022. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 455. 1825, *London Journal of Botany* 3: 105. 1844, *London Journal of Botany* 5: 102. 1846, *Transactions of the Linnean Society of London* 30(3): 547. 1875, *Fl. Bras.* 15(3): 416–417. 1876, *Revisio Generum Plantarum* 1: 185, 188–189. 1891 and *North American Flora* 23(1): 60. 1928, *Flora of Suriname* 2(2): 322. 1940

(Leaves used as an ingredient for a medicine against an eye sickness.)

in English: pink calliandra, pink powderpuff, pink tassel flower, powder puff flower, powderpuff, shaving brush, Surinam calliandra, Surinam powder puff, Surinamese stickpea

in Borneo: daun assam Jawa

Callianthemum C.A. Meyer Ranunculaceae

Greek *kalli*, *kallos* ‘beautiful, beauty’ and *anthos* ‘flower’, see *Ledeb. Flora Altaica* 2: 269, 336. 1830.

Callianthemum taipaicum W.T. Wang

China. Perennial herbs, rhizomatous, flowers bisexual, petals basally brown, sepals bluish purple

See *Flora Tsinlingensis* 1(2): 274, 604, f. 235. 1974

(Chinese herbal medicine.)

in China: tai bai mei hua cao

Callicarpa L. Lamiaceae (Labiatae, Verbenaceae)

From the Greek *kalli* ‘beautiful’ and *karpos* ‘fruit’; see Carl Linnaeus, *Species Plantarum*. 1: 111. 1753, *Genera Plantarum*. Ed. 5. 127. 1754, *Das Pflanzenreich* 4(3a): 166. 1897 and *Acta Phytotaxonomica Sinica* 1(1): 273, 298. 1951, *Fieldiana, Bot.* 24(9/1–2): 167–236. 1970, *Flora Reipublicae Popularis Sinicae* 65(1): 30, 65, 211. 1982, Chen, T.T., Chaw, S.M. & Yang, Y.P. “A revision of *Callicarpa* (Verbenaceae) of

Taiwan.” *Taiwania* 43(4): 330–345. 1998, *Current Bioactive Compounds* 4(1): 15–32. 2008.

Callicarpa acuminata Kunth (*Callicarpa acuminata* Roxb., nom. illeg. hom.; *Callicarpa minutiflora* Rusby)

Mexico, Guatemala to Colombia. Shrub or small tree, corolla white, fragrant flowers in small branched axillary clusters, dark purple to black fruit

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 252. 1817[1818], *Flora Indica*; or descriptions of Indian Plants 1: 408. 1820 and *Memoirs of the New York Botanical Garden* 7: 339. 1927

(Cold-water infusion of the crushed leaves for diarrhea, dysentery.)

Callicarpa americana L. (*Burchardia americana* (L.) Duhamel; *Burchardia callicarpa* Crantz; *Callicarpa americana* Blanco; *Callicarpa americana* Lour., nom. illeg.; *Callicarpa americana* f. *lactea* (F.J. Müll.) Rehder; *Callicarpa americana* var. *alba* Rehder; *Callicarpa americana* var. *lactea* F.J. Müll.; *Callicarpa serrata* Moench; *Callicarpa viburnifolia* Salisb.; *Johnsonia americana* (L.) Mill.)

North America, Cuba. Shrub, slender, small bluish lavender flowers in axillary clusters, purple violet fruits, fruit edible raw but insipid

See *Species Plantarum* 1: 111. 1753, *Prodr. Stirp. Chap. Allerton*: 53. 1796, *Flora de Filipinas* 517. 1837 and *Repert. Spec. Nov. Regni Veg.* 39: 306. 1936, *Bibl. Cult. Trees*: 584. 1949

(Root to treat skin cancer, essential oils antialgal and phyto-toxic. Fruit astringent, causes puckering of the mouth a few minutes after eating a little.)

in English: American beauty-berry, beauty-berry, French mulberry

Callicarpa arborea Roxb. (*Aganion umbellata* Raf.; *Callicarpa arborea* Wall., nom. illeg. hom.; *Callicarpa arborea* Miq. ex C.B. Clarke, nom. illeg.; *Callicarpa magna* Schauer; *Callicarpa tectonaefolia* Wall.; *Callicarpa tectoniifolia* Wall., nom. nud.; *Callicarpa tomentosa* var. *magna* (Schauer) Bakh.; *Callicarpa villosissima* Ridl.; *Premna arborea* Roth; *Premna arborea* (Roxb.) Roth; *Premna arborea* Farw.)

Himalaya, China, Bhutan, Cambodia, India. Tree, fast growing, densely tomentose, corky rough bark, twig broad and flat at the nodes, coriaceous leaves stellate-tomentose beneath, truncate calyx cup-shaped, pink purple corolla, stamens much longer than corolla, fruit purple-brown

See *Hort. Bengal.* 10. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wallich, 1: 405–406. 1820, *Nov. Pl. Sp.* 287. 1821, *Numer. List* [Wallich] nn. 1826, 1827. 1829, *Fl. Ind.*, ed. Carey, i. 390. 1832, *Sylva Tellur.* 161. 1838, *Prodr.* (DC.) 11: 641. 1847 and *J. Fed. Malay States Mus.*

10: 110. 1920, *Bull. Jard. Bot. Buitenzorg*, III, 3: 22. 1921, *Pharmacologyonline* 1: 1095–1103. 2009

(Used in Unani. Young shoots ground into a paste, mixed with water and drunk for gastric troubles; young tender shoots eaten for gastric problems. Bark aromatic, bitter, carminative, tonic; bark decoction applied to cutaneous diseases; bark chewed with betel leaves as substitute for betel nut; bark and roots decoction used in liver troubles; inner bark of the roots and stems eaten as masticatory along with betel nut; paste of bark or leaf applied on sting of scorpion. For wounds, sores, pound the leaves and poultice; leaves decoction for stomachache; decoction of leaves of *Ficus semicordata* Buch.-Ham. ex Sm. var. *conglomerata* (Roxb.) Corner together with those of *Byttneria pilosa* and *Phyllanthus fraternus* and bark of *Callicarpa arborea* taken for jaundice and liver complaints. Leaves and bark used for the treatment of rheumatism, cutaneous diseases, scorpion sting; ground leaves and bark applied on cuts to stop bleeding. Juice of fruit relieves fever. Fruit juice taken for ulcers of the tongue. Rhizome of *Lygodium microphyllum* mixed with root of *Callicarpa arborea* squeezed and the juice given for stomach troubles. Contact therapy, a piece of root tied on the loin of babies in unhealthy growth. Ceremonial, leaves used in prayers.)

Koenig ex Vahl, nom. illeg.)

Thailand, China.

See *Symbolae Botanicae, ...* 3: 13, pl. 53. 1794, *Flora Indica*; or descriptions of Indian Plants 1: 407–408. 1820, *Fl. Brit. India* 4: 568. 1885, *Darjeeling List* 60. 1896. and *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 456. 1911, *Flore du Kouy-Tchéou* 440. 1915

(Used in Ayurveda, Unani and Sidha. Inner bark ground into a paste and applied on cuts and wounds as a hemostatic. Leaves antirheumatic, stomachic, warmed and applied. Fruit paste, or wood paste, used in the treatment of boils and blisters on the tongue. Fruits chewed to treat sores of the tongue and mouth. Seeds and roots stomachic; roots antirheumatic, stomachic.)

in English: big-leaf beauty berry

in China: da ye zi zhu

in India: anganaapriya, anganapriya, bhirmoli, bonmala, chimpompil, chinpompil, chokkala, cimpompil, dahiya, daia, daiya, daya, dayya, gandhaphali, gandhpali, gandhpriyangu, ghiwala, gnazhal, habb-ul-mihlb, huahkhar, kaantaa, kaantaahvaa, kanta, khap, mathara, mondol-panamana, nalal, nalalu, njaazhalpoovu, phalin, phalini, phool pirangu, priyaka, priyamgu, priyangu, priyangu beej, priyangu phool, priyangu puspha, priyanguka, priyangukaa, shyamaa, socu, syama, tong loti, vanita, vanitaa

in Nepal: dahigun, mala buru, tichangsa

in Tibet: ga ndha pri yam ku, gandha pri ya nku, gandha priya nku, pri-yam-ku, pri yan, pri-yan-ku

Callicarpa maingayi King & Gamble

Thailand. Tree, small trees, angled hairy twigs, leaves pale silvery hairy below, regular pale lilac flowers in cymes, red drupes

See *Bulletin of Miscellaneous Information Kew* 1908: 106. 1908

(Bark used as a substitute for betel.)

in Malaysia: tampang besi

Callicarpa nudiflora Hook. & Arn. (*Callicarpa acuminata* Roxburgh, nom. illeg., non Kunth; *Callicarpa acuminata* var. *angustifolia* Metcalf; *Callicarpa macrophylla* Vahl var. *sinensis* C.B. Clarke; *Callicarpa nudiflora* Vahl; *Callicarpa reevesii* Wall., nom. nud.; *Callicarpa reevesii* Wallich ex Schauer; *Callicarpa reevesii* Wall. ex Walp.)

India, China, Pen. Malaysia. Shrubs or small trees

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 252. 1817[1818], *Flora Indica*; or descriptions of Indian Plants 1: 408. 1820, *The Botany of capt. Beechey's Voyage*; comprising an account of the Plants collected by Messrs. Lay and Collie ... during the voyage to the Pacific and Bering's Strait, performed in H.M.S. *Blossom* ... 1825–1828. 206. London [1830–] 1841, *Repert. Bot. Syst.* 4: 125. 1845, *Fl. Brit. India*

4(12): 568. 1885 and *Lingnan Sci. J.* 11(3): 407. 1932, *Journal of Ethnopharmacology* 79(2): 205–211. 2002

(Disinfectant, antiseptic, dried leaves to treat suppurative skin infections and burns. Cytotoxic, antiviral activities against respiratory syncytial virus, RSV.)

in English: naked-flower beauty berry

in China: luo hua zi zhu

Callicarpa pedunculata R.Br. (*Callicarpa cuspidata* Roxb.; *Callicarpa dentata* Roth; *Callicarpa pedunculata* H.J. Lam & Bakh.; *Callicarpa pedunculata* var. *typica* H.J. Lam, nom. inval.; *Callicarpa tiliifolia* Teijsm. & Binn. ex C.B. Clarke, nom. inval.; *Callicarpa viridis* Domin)

Vietnam, Malaysia, Indonesia, Papua New Guinea. An evergreen shrub or small tree, stem and branches densely tomentose, leaves glandular, densely glandular calyx minutely 4-toothed, corolla purple or mauve, stamens exserted, pale mauve or violet-purple glandular fruits

See *Prodromus Florae Novae Hollandiae* 513. 1810, *Fl. Brit. India* 4: 569. 1885 and *The Verbenaceae of the Malayan Archipelago* 56. 1919, *Bulletin du Jardin Botanique de Buitenzorg* 3: 24. 1921, *Biblioth. Bot.* 89: 554. 1928

(A roots decoction an ingredient of a poultice used to mature boils and ulcers. Leaves infusion, together with leaves of *Ocimum basilicum* L., drunk after parturition and as an emmenagogue. Roots an antidote for poisonous fish, crabs and toadstools.)

in Indonesia: memeniran, meniran, ringan-ringan

Callicarpa pentandra Roxb. (*Callicarpa acuminatissima* Teijsm. & Binn.; *Callicarpa acuminatissima* Liu & Tseng; *Callicarpa affinis* Elmer; *Callicarpa clemensorum* Moldenke; *Callicarpa cumingiana* Schauer; *Callicarpa hexandra* Teijsm. & Binn.; *Callicarpa pentandra* f. *celebica* Bakh.; *Callicarpa pentandra* f. *dentata* Bakh.; *Callicarpa pentandra* f. *farinosa* (Blume) Bakh.; *Callicarpa pentandra* f. *furfuracea* Bakh.; *Callicarpa pentandra* f. *hexandra* (Teijsm. & Binn.) serrulata f. *anisophylla* (Hallier f.) Moldenke; *Geunsia subternata* Hallier f.)

Thailand, Malesia. Small tree

See *Fl. Ind.* 1: 409. 1820, *Fl. Ind.* 1: 395. 1832, *Prodr.* (DC.) 11: 644. 1847, *Tijdschr. Nederl. Ind.* xxv. (1863) 409. 1863 and *Leaflet Philipp. Bot.* iii. 864. 1910, *Quart. J. Taiwan Mus.* x. 55. 1957

(Used for vertigo; ground bark used for swellings.)

Malay name: membatu puteh

Callicarpa rubella Lindl.

Himalaya. Shrub, erect, inflorescence axillary, flowers pink, fruits purple-violet, tender shoots cooked as vegetable

See *Bot. Reg.* 11: t. 883. 1825

(Bark to treat tumors of the large intestine. Leaf extract applied on injuries to stop bleeding.)

in China: hong zi zhu

in India: dieng lakhangwet, dieng lakso miaw, jalang kwai, mondol, nin rasu, soh eitksar, wazanu jaba

Callicarpa tomentosa (L.) L. (*Callicarpa arborea* Miq. ex C.B. Clarke, nom. inval.; *Callicarpa farinosa* Roxb. ex C.B. Clarke, nom. inval.; *Callicarpa lanata* L., nom. illeg.; *Callicarpa lobata* C.B. Clarke; *Callicarpa rheedei* Kostel.; *Callicarpa tomentosa* Lam., nom. illeg.; *Callicarpa tomentosa* (L.) (Used in Ayurveda. Bark and root juice for high fever, stomachache and malaria; root juice of *Hymenodictyon orixense* mixed with the bark juice of *Callicarpa tomentosa* given for fever; root juice with root juice of *Streblus asper* for irregular menstruation and menorrhagia. Bark slightly bitter, masticatory, chewed when there are no betel leaves. Plant pounded,

used to poultice sores. Religious and supernatural beliefs, related with sowing and harvesting ceremonies.)

in English: great woolly Malayan lilac

in Bangladesh: taramah

in India: aarathi soppu, aardir, aardri, ardri, arthigidu, arti, ayamsar, bastra, bodiga chettu, cheruthekkku, dodda naathada gida, doddanaathada gida, ibanne, ibbani, ibbanne, insara, isvar, kaarivaati, karavati, katkomal, kattukkumil, mashandari, naikumbil, nallapompil, nallarappalu, picenkala, pichenkala, pichenkale, pondee, pondi, puru, rishipathri, ruchi katthi, ruchipatri, rucipatri, seembakkulthu, temperuvallam, teregam, thinperivelum, timperuvellam, tom-dikharvanti, tondatti, tondi, tondi-teregam, tonditeragam, tonditterakam, tonti, tontitterakam, uennattekka, umathekka, umathekku, urnnatekka, vettilai-pattai, vettilaipattai, vettilaipattai, yarphu-changne, yibbani

in Malaya: derdap dapur, tumah dapur

Callichilia Stapf Apocynaceae

From the Greek *kalli* 'beautiful' and *cheilos* 'a lip, margin', see *Fl. Trop. Africa* [Oliver et al.] 4(1.1): 130–131. 1902, *Mém. Mus. Natl. Hist. Nat. sér. 2*, 27: 225. 1948, *Helvetica Chimica Acta* 50(7): 1939–1960. 1967, *Helvetica Chimica Acta* 53(4): 749–754. 1970, *Helvetica Chimica Acta* 60(8): 2830–2853. 1977, *African Journal of Biomedical Research* 5: 77–79. 2002.

Callichilia barteri (Hook. f.) Stapf (*Callichilia barteri* Stapf; *Hedranthera barteri* (Hook. f.) Pichon; *Tabernaemontana barteri* Hook. f.)

Tropical Africa, Ghana, Benin, Nigeria and Cameroon. Liana, erect shrub, white latex in all parts, showy and fragrant flowers, paired dull orange dehiscent juicy fleshy fruits

See *Botanical Magazine* 96: t. 5859. 1870 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 133. 1902, *Mémoires du Muséum National d'Histoire Naturelle* 27: 225. 1948

(Leaves infusion as a laxative for children; leaves antioxidant, sedative, applied against tumours, swellings, wounds. An extract of the fruit is taken as a vermifuge, to prevent miscarriage and as a treatment against gonorrhoea. Magic, ritual.)

Callichilia subsessilis (Benth.) Stapf (*Callichilia subsessilis* Stapf; *Tabernaemontana subsessilis* Benth.)

Tropical Africa. Herb, shrub, erect, sticky milky latex, paired dull orange fruits

See *Niger Flora* [W.J. Hooker]. 448. 1849 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 132. 1902

(Leaves infusion as a laxative for children. Roots and stem bark anthelmintic, for venereal infections, swellings, tumours.)

Calligonum L. Polygonaceae

From the Greek *kalli* 'beautiful' and *gony* 'joint, a knee', see *Species Plantarum* 1: 530. 1753.

Calligonum azel Maire

Sahara, Tunisia. Shrub, many-branched, small white flowers

See *Bull. Soc. Hist. Nat. Afrique N.* 1932, xxiii. 211. 1932, *Novosti Sist. Vyssh. Rast.* 11: 97. 1974

(Antifungal, for eczema, itch.)

in Sahara: annag

Calligonum comosum L'Hér. (*Calligonum polygonoides* L. subsp. *comosum* L'Hér.; *Calligonum polygonoides* subsp. *comosum* (L'Hér.) Soskov; *Calligonum polygonoides* subsp. *comosum* (Herit.) Soskov)

Egypt, North Africa. Tall woody shrub, perennial, psammophil, many-branched from the base, stiff branches, small tepals, conspicuous red anthers, fruit a single circular hairy carpel, fresh flowers eaten, camels eat the filaments and the roots

See *Species Plantarum* 1: 530. 1753, *Transactions of the Linnean Society of London* 1: 180. 1791 and *Novosti Sist. Vyssh. Rast.* 12: 153. 1975, *Fitoterapia* 72(5): 487–491. 2001, *Fitoterapia* 75(2): 149–161. 2004, *Asian J. Plant Sci.* 5(4): 570–579. 2006, *Zeitschrift für Naturforschung. C, Journal of biosciences (Z. Naturforsch. C)* 62(9–10): 656–660. 2007

(Antifungal, antimicrobial, antiinflammatory, antiulcer, cytotoxic and antioxidant, for stomach ailments; roots decoction for gum sores; for eczema, itch, young shoots and leaves powdered used externally as an ointment; stems and leaves chewed for curing toothache. Veterinary medicine, to treat scabies in dromedaries.)

in English: orta tree

in Arabic: abal, arach, aresu, âresû, arta, ârta, arta'a, awarach, âwarâs, larta, orta, orti, ouarach

in Sahara: warash

Calligonum leuocladum (Schrenk) Bunge (*Calligonum alatiforme* Pavlov; *Calligonum alatiforme* subsp. *roseum* Sosk.; *Calligonum androssowii* Litv.; *Calligonum anfractuosum* Bunge; *Calligonum aralense* Borszcz.; *Calligonum batibola* Litv.; *Calligonum dubianskyi* Litv.; *Calligonum golbeckii* Drobow; *Calligonum gracile* Litv.; *Calligonum gypsaceum* Drobow; *Calligonum karakalpakense* Drobow; *Calligonum lanciculatum* Pavlov; *Calligonum leuocladiforme* Drobow; *Calligonum leuocladum* Bunge; *Calligonum lipskyi* Litv.; *Calligonum obtusum* Litv.; *Calligonum orthocarpum* Drobow; *Calligonum physopteron* Pavlov; *Calligonum plicatum* Pavlov; *Calligonum quadripterum* Korov. ex Pavl.; *Calligonum roseum* Drobow; *Calligonum turbineum* Pavlov; *Calligonum uzunachmatense* Tkatsch.; *Pterococcus aphyllus*)

Kar. & Kir., not Pallas; *Pterococcus leucocladus* Schrenk; *Pterococcus persicus* Boiss. & Buhse)

China, Turkestan.

See *Reise Russ. Reichs*, ii. 738. 1773, *Reise*, App. 738. t. 5. 1776, *Reise Russ. Reich*. ii. App. 43. 1777, *Bull. Soc. Imp. Naturalistes Moscou* xv. (1842) 443. 1842, *Flora* 25(2, Beibl.): 41. 1842, *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Pétersbourg* 3: 211. 1845, *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 7: 485. 1851, *Nouv. Mém. Soc. Imp. Naturalistes Moscou* 12: 191. 1860 and *Trav. Mus. Bot. Acad. Petersb.* 1913, xi. 55. 1913, *J. Nat. Prod.* 67(6): 1044–1046. 2004, *International Journal of Integrative Biology* 5(3): 148. 2009

(Antioxidant, from the dried aerial parts. Plant poultice an antidote against poisonous harmful plants and heavy doses of opium.)

in China: dan zhi sha guai zao

Calligonum polygonoides L.

India. Evergreen xerophytic shrub, red roots, small succulent fruits, tender green phyllodes fodder for camels

See *Species Plantarum* 1: 530. 1753, *Transactions of the Linnean Society of London* 1: 180. 1791 and *Novosti Sist. Vyssh. Rast.* 12: 153. 1975

(Used in Ayurveda. Plant decoction antifungal, antiinflammatory, antiulcer, a gargle for sore gums. Flower buds effective in treating sun stroke.)

in English: desert locust, orta tree

in India: phog, phoga, phogaro, phoglo, phogro, sphurjaka

Callilepis DC. Asteraceae

From the Greek *kallos* ‘beauty’, *kalos*, *kalli* ‘beautiful’ and *lepis*, *lepidos* ‘scale’.

Callilepis laureola DC. (*Callilepis glabra* DC.; *Callilepis hispida* DC.; *Callilepis laureola* var. *glabra* (DC.) Harv.; *Callilepis laureola* var. *hispida* (DC.) Harv.)

South Africa. Perennial herb, tufted, large woody tuberous rootstock, simple or branched from the base, ray florets pure white, dark purple disc-florets tubular

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 671. 1836 and *South African Med. J.* 45(30): 832–833. 1971, *South Afr. Med. J.* 55(8): 290–292. 1979, *Hum. Exp. Toxicol.* 18(10): 594–597. 1999, *Clinical Biochemistry* 35(1): 57–64. 2002, *Clinical Biochemistry* 35(3): 179–180. 2002, *Clinical Biochemistry* 35(6): 499. 2002, *Human & Experimental Toxicology* 21(12): 643–647. 2002, *Mutation Research/Genetic Toxicology and Environmental Mutagenesis* 581(1–2): 35–42. 2005

(Tubers very poisonous, virulent poison, hepatotoxic, hypoglycemic, can cause acute fatal hepatocellular necrosis, hepatic and renal dysfunction, especially in children. Roots decoction antioxidant, vermifuge, used for tapeworms, snakebite, whooping cough, infertility; an infusion for coughs and as a purgative; crushed root paste applied directly to open wounds, burns. Macerated leaf an external disinfectant. Veterinary medicine, root paste to kill maggots in cattle. Magic, ritual, roots as protective charms placed under the pillow to stop bad dreams.)

in English: ox-eye daisy, pine thistle

in Southern Africa: amafuthomhlaba, ihlamvu, impila, imPila, mila, wildemargriet

Callilepis leptophylla Harv.

South Africa. Erect, slender herb, terminal flower-head usually solitary

See *Therapeutic Drug Monitoring* 22(6): 641–649. 2000

(Veterinary medicine, roots ground to a paste for killing maggots in cattle.)

in English: velvet sweetberry

in South Africa: bergbitterbossie, imphila, imphilane, impila

Callirhoe Nutt. Malvaceae

After Kallirhoe or Callirrhoe ‘fair flow, beautiful flowing’, one of the Oceanids, in the Greek mythology the daughter of the river god Achelous and wife of Alcmaeon, see *Journal of the Academy of Natural Sciences of Philadelphia* 2(1): 181–182. 1822.

Callirhoe involucrata (Torr. & A. Gray) A. Gray (*Callirhoe involucrata* A. Gray; *Malva involucrata* Torr. & A. Gray)

North America. Perennial herb

See *A Flora of North America: containing ...* 1(2): 226. 1838, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 16, adnot. 1849

(Root decoction taken for colic, abdominal pain.)

in English: purple poppy mallow

Callirhoe involucrata (Torr. & A. Gray) A. Gray var. *involucrata* (*Callirhoe involucrata* (Torr. & A. Gray) A. Gray f. *novomexicana* (Baker f.) Waterf.; *Callirhoe involucrata* (Torr. & A. Gray) A. Gray var. *novomexicana* Baker f.)

North America. Perennial herb

See *A Flora of North America: containing ...* 1(2): 226. 1838, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 16, adnot. 1849, *J. Bot.* 29: 49. 1891 and *Field & Lab.* 19: 111. 1951

(Analgesic root decoction taken for colic, abdominal pain.)

in English: purple poppy mallow, purple poppymallow

Callisia Loeffling Commelinaceae

From the Greek *kallos* ‘beauty’, see *Species Plantarum* 1: 40–42. 1753, *Iter Hispanicum* 305. 1758, *Species Plantarum*, Editio Secunda 1: 62. 1762, *Histoire naturelle, générale et particulière, des plantes* 8: 177. 1804 and *Sci. Surv. Porto Rico* 5: 147. 1923, *Kew Bulletin* 38(1): 131–133. 1983, *Kew Bulletin* 41(2): 407–412. 1986, *Fl. Novo-Galiciana* 13: 130–201. 1993, *Fl. Mesoamer.* 6: 157–173. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 386–409. 2003, *Journal of Ethnopharmacology* 111(1): 63–81. 2007.

Callisia fragrans (Lindl.) Woodson (*Rectanthera fragrans* (Lindl.) O. Deg.; *Spironema fragrans* Lindl.; *Spironema orthandrum* Lindb.)

Mexico. Perennial herb, procumbent, creeping, white flowers

See *Edwards’s Botanical Register* 26(3): pl. 47, misc. 26. 1840, *Acta Societatis Scientiarum Fennicae* 10: 127, t. 4. 1871, *Monographiae Phanerogamarum* 3: 302. 1881 and *Proc. Amer. Acad. Arts* 39: 70. 1903, *Flora Hawaiensis* 1: 62. 1932, *Ann. Missouri Bot. Gard.* 29(3): 154. 1942, *Veterinary Dermatology* 17(1): 70–80. 2007

(Stomachic, diseases of gastrointestinal tract, gall bladder, spleen, and also for pulmonary diseases, bronchial asthma, allergy, itch, wounds, burns, injuries and fractures, dermatitis, lichens, ulcers. Hypersensitivity to leaf extracts, contact dermatitis in dogs.)

in English: basketplant, gold whisker, golden tendril, inch plant

Callisia gracilis (Kunth) D.R. Hunt (*Aneilema gracilis* (Kunth) Steyerl., nom. illeg.; *Aneilema gracilis* f. *bicolor* (Kunth) Steyerl.; *Commelina bicolor* Poepp. ex Kunth; *Phyodina gracilis* (Kunth) Raf.; *Tradescantia bicolor* Kunth; *Tradescantia debilis* Kunth; *Tradescantia diaphana* Willd. ex Schult. & Schult.f.; *Tradescantia elegans* Pritz.; *Tradescantia gracilis* Kunth; *Tradescantia gracilis* var. *bicolor* (Kunth) C.B. Clarke)

South America, Ecuador. Herb, sprawling, creeping, prostrate, white flowers

See *Species Plantarum* 1: 288. 1753, *Prodromus Florae Novae Hollandiae* 270. 1810, *Nova Genera et Species Plantarum* (quarto ed.) 1: 261–262, t. 672. 1815[1816], *Flora Telluriana* 2: 16. 1836[1837], *Enum. Pl.* 4: 88–89. 1843, *Iconum Botanicarum Index* 1110. 1854, *Monogr. Phan.* 3: 298. 1881 and *Fieldiana, Botany* 28(1): 152. 1951, *Mem. Inst. Oswaldo Cruz, Rio de Janeiro*, 94(4): 531–535. 1999

(Antiherpetic. Used for warts. Leaf and flower infusion taken for high blood pressure, rheumatism, intestinal troubles.)

in Latin America: calcha, calso, crespinillo

Callisia repens (Jacq.) L. (*Callisia repens* var. *ciliata* Roem. & Schult.; *Callisia repens* var. *mandoni* (Hassk.) C.B. Clarke; *Callisia repens* var. *mandonii* (Hassk.) C.B. Clarke; *Commelina hexandra* var. *mandonii* Hassk.; *Hapalanthus repens* Jacq.; *Spironema robbinsii* C. Wright; *Tradescantia callisia* Sw.)

North and Tropical America. Herb, prostrate, epiphyte, leaning, procumbent, white flowers, inflorescences erect

See *Enumeratio Systematica Plantarum* 1, 12. 1760, *Fl. Ind. Occid.* 1: 603. 1797, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 1: 528. 1817, *Flora Telluriana* 4: 92. 1836[1838], *Anales Acad. Ci. Méd. Habana* 7: 609. 1870, *Flora Cubana. Enumeratio ...* 158. 1873, *Monogr. Phan.* [A. DC. & C. DC.] 3: 311. 1881 and *FOC* 24: 39. 2000

(Leaf infusion febrifuge, relaxant, antiinflammatory, anti-septic, taken for gangrene, gastritis, high blood pressure, internal infections, rheumatism.)

in English: Bolivian jew, creeping inchplant, turtle vine

in China: yang zhu cao

in Latin America: calcha, tripa de pollo, yerba de coyuntura

Callitriche L. Callitrichaceae (Plantaginaceae)

Latin *callithrix* and Greek *kallithrix* for a plant used for coloring the hair, also called *trichomanes* (Plinius); Latin *callitrichos* and Greek *kallitrichos* for a plant commonly called *adiantum* or *Capillus veneris*, maidenhair (Plinius); Greek *kalli* ‘beautiful’ Greek *thrix*, *trichos* ‘hair’, referring to its appearance and branching, slender stems; see Carl Linnaeus, *Species Plantarum*. 2: 969. 1753, *Genera Plantarum*. Ed. 5. 1754 and *Fieldiana, Bot.* 24(6): 171–172. 1949, *Rhodora* 53(632): 185–194. 1951, *Fl. Canada* 3: 547–1115. 1978, *Taxon* 53(1): 169–172. 2004.

Callitriche fehmedianii Majeed Kak & Javeid

India. Submerged, auricled leaves, male and female flowers covered by transparent white spongy bracts

See *Journal of the Bombay Natural History Society* 79: 167. 1982

(Crushed plants applied as poultice over the cuts, burns and wounds.)

in China: xi nan shui ma chi

Callitriche palustris L. (*Callitriche anceps* subsp. *subanceps* Á. Löve & D. Löve; *Callitriche androgyna* L.; *Callitriche elegans* Petrov; *Callitriche fallax* Petrov; *Callitriche minima* (L.) Hoppe; *Callitriche palustris* var. *minima* L.; *Callitriche palustris* var. *verna* (L.) Fenley ex Jeps.; *Callitriche subanceps* Petrov; *Callitriche verna* L.; *Callitriche verna* subvar. *minima* (L.) Nyman; *Callitriche verna* var. *minima* (L.) Dumort.; *Callitriche vernalis* var. *minima* (L.) Lange)

Europe. Submerged or floating, translucent, globular fruits deep-grooved near the base

See *Species Plantarum* 2: 969. 1753, *Flora Suecica*, Editio Secunda Aucta et Emendata 2. 1755, *Centuria I. Plantarum* ... 31. 1775, *Florula belgica*, opera majoris prodromus, auctore ... 90. 1827, *Conspectus florum europaeae: seu Enumeratio methodica plantarum phanerogamarum Europae indigenarum, indicatio distributionis geographicae singularum etc.* 250. 1879 and *A Flora of California* 2(4): 435. 1936, *Rhodora* 96: 383–386. 1994

(Leaf poultice applied to sores, also to relieve the pain of urinary bladder.)

in English: swamp water starwort, water starwort

in China: shui ma chi

Callitriche stagnalis Scop. (*Callitriche palustris* subsp. *stagnalis* (Scop.) Schinz & Thell.; *Callitriche stagnalis* Scop. emend. Kutz)

Europe. Submerged herb, upper leaves in rosette, axillary sessile flowers, surrounded by 2 spongy bracts, food for insects and fishes

See *Flora Carniolica*, Editio Secunda 2: 251. 1772 and *Die Flora der Schweiz* ed. 2, 1: 322. 1905, *Inform. Bot. Ital.* 12: 113–116. 1980, *Gött. Floriste Rundbriefe* 20(2): 79–100. 1986, *Rhodora* 96: 383–386. 1994, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 28: 16–18. 1997, *Watsonia* 21: 365–368. 1997

(Leaves applied as poultice on wounds.)

in English: common starwort, European water-starwort, water starwort

Callitropsis Oerst. Cupressaceae

See *A Description of the Genus Pinus* 2: 18. 1824, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 6: 32. 1864 and *Journal of the Linnean Society, Botany* 45: 432. 1922, *Regnum Veg.* 100: 266. 1979, *Acta Phytotax. Sin.* 34(2): 117–123. 1996.

Callitropsis lusitanica (Mill.) D.P. Little (*Cupressus benthamii* Endl.; *Cupressus benthamii* var. *knightiana* (Perry ex Gordon) Mast.; *Cupressus benthamii* var. *lindleyi* (Klotzsch ex Endl.) Mast.; *Cupressus knightiana* Perry ex Gordon; *Cupressus lindleyi* Klotzsch ex Endl.; *Cupressus lusitanica* Mill.; *Cupressus lusitanica* subsp. *mexicana* (Koch) Maire; *Cupressus lusitanica* var. *benthamii* (Endl.) Carrière; *Cupressus lusitanica* var. *knightiana* Rehder; *Cupressus macnabiana* var. *nevadensis* (Abrams) Abrams; *Hesperocyparis lusitanica* (Mill.) Bartel; *Neocupressus lusitanica* (Mill.) de Laub.)

Mexico, Guatemala. Evergreen, fast-growing, straight trunk, bark red-brown

See *The Gardeners Dictionary*: ... eighth edition no. 3. 1768 and *Torreya* 19(5): 92. 1919, *Illustrated Flora of the Pacific*

States 1: 73. 1923, *Agros* (Lisbon) 28: 23. 1945, *Kalmia* 12: 19. 1982, *Madroño* 18(6): 164. 1966, *Systematic Botany* 31(3): 474. 2006, *Novon* 19(3): 304. 2009, *Phytologia* 91(1): 181. 2009

(Diuretic.)

in English: Mexican cypress, Portuguese cypress

in East Africa: mtarakwa (Chagga), muturakawa (Kikuyu), omobakora (Kisii)

Callitropsis nevadensis (Abrams) D.P. Little (*Cupressus arizonica* subsp. *nevadensis* (Abrams) A.E. Murray; *Cupressus arizonica* var. *nevadensis* (Abrams) Little; *Cupressus lusitanica* Mill.; *Cupressus macnabiana* var. *nevadensis* (Abrams) Abrams; *Cupressus nevadensis* Abrams)

North America.

See *The Gardeners Dictionary*: ... eighth edition no. 3. 1768 and *Torreya* 19(5): 92. 1919, *Illustrated Flora of the Pacific States* 1: 73. 1923, *Agros* (Lisbon) 28: 23. 1945, *Kalmia* 12: 19. 1982, *Madroño* 18(6): 164. 1966, *Systematic Botany* 31(3): 474. 2006, *Novon* 19(3): 304. 2009, *Phytologia* 91(1): 181. 2009

(Analgesic, for cold, cough.)

Calluna Salib. Ericaceae

Greek *kallunein*, *kallyno* ‘to sweep, adorn, cleanse’, the branches are used as brooms; see R.A. Salisbury, *Transactions of the Linnean Society of London. Botany.* 6: 317, in obs. 1802.

Calluna vulgaris (L.) Hull (*Calluna vulgaris* Salisb.; *Erica vulgaris* L.; *Ericoides vulgaris* (L.) Merino; *Ericoides vulgaris* (Salisb.) B.Merino)

Europe.

See *Species Plantarum* 1: 352. 1753, *Trans. Linn. Soc. London* 6: 317. 1802, *Brit. Fl.*, ed 2 (Hull) 114. 1808 and Merino, Baltasar 1845–1917), *Flora descriptiva é ilustrada de Galicia*. Tomo I-III. Santiago, Tipografía Galaica, 1905–1909, *Taxon* 29: 725–726. 1980, *Anales Jard. Bot. Madrid* 39: 533–539. 1983, *Acta Bot. Fenn.* 130. 1985, *Rerum Nat. Univ. Comenianae, Bot.* 33: 69–72. 1986, *Acta Biol. Cracov., Ser. Bot.* 32: 175–177, 181. 1990, *Lagascalía* 24: 175–182. 2004, *Pharmazie*. 64(10): 656–659. 2009

(Antioxidant.)

in English: common heather, heather, Scotch heather, Scottish heather, white heather

Calocedrus Kurz Cupressaceae

From the Greek *kallos* ‘beauty’, *kalos*, *kalli* ‘beautiful’ and *kedros* ‘cedar’, see *Species Plantarum* 2: 1002. 1753,

Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse 3: 311. 1833, *Synopsis Coniferarum* 42. 1847, *Journal of Botany, British and Foreign* 11: 196, t. 133. 1873 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 16: 88. 1907[1908].

Calocedrus decurrens (Torrey) Florin (*Heyderia decurrens* (Torr.) K. Koch; *Libocedrus decurrens* Torrey; *Thuja decurrens* (Torr.) Voss)

North America. Perennial tree

See *Smithsonian Contributions to Knowledge* 6(2): 7–8, pl. 3. 1853, *Dendrologie* 2(2): 179. 1873 and *Taxon* 5: 192. 1956, *Acta Bot. Yunnan.* 18(4): 439–444. 1996, *Journal of Experimental Therapeutics & Oncology* 2(4): 228–236. 2002

(Deoxydopodophyllotoxin as the active compound. Decoction of leaves taken for stomach troubles; leaves infusion steam inhaled for colds.)

in English: incense cedar

in Mexico: cedro incienso

Calochortus Pursh Liliaceae (Calochortaceae)

Greek *kalos* ‘beautiful’ and *chortos* ‘green herbage, grass’, alluding to the grass-like leaves. See Friedrich Traugott Pursh (1774–1820), *Flora Americae Septentrionalis*. 1: 240. London 1814 [Dec 1813–Jan 1814], *Brit. Fl. Gard.* 3: t. 273. 1828, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1868: 168. 1868 and Marion Ownbey, “A monograph of the genus *Calochortus* Pursh.” in *Annals Missouri Botanical Garden*. 27: 371–560. 1940, *Leaflets of Western Botany* 4(1): 1. 1944, Gerritsen, M.E. & Parsons, R. *Calochortus: Mariposa Lilies & Their Relatives*. Timber Press, Inc. Portland, U.S.A.. 2007.

Calochortus amabilis Purdy (*Calochortus pulchellus* Douglas ex Benth. var. *amabilis* (Purdy) Jeps.; *Calochortus pulchellus* var. *amabilis* Jeps.; *Calochortus pulchellus* var. *maculosus* S. Watson ex Purdy; *Calochortus pulchellus* var. *maculosus* S. Watson)

North America. Perennial herb, bulbs eaten

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 412. 1835, *Zoe* 1: 245. 1890 [Zoë] and *Proc. Calif. Acad. Sci.*, III, 2(4): 119, pl. 19, f. 1. 1901, *A Flora of Western Middle California* [Jepson] 113. 1901

(Tonic, stimulant, stomachic.)

in English: Diogenes’ lantern

Calochortus aureus S. Watson (*Calochortus nuttallii* var. *aureus* (S. Watson) Ownbey)

North America. Perennial herb, food

See *Amer. Naturalist* 7(5): 303. 1873 and *Ann. Missouri Bot. Gard.* 27(4): 493. 1940

(Bulb stimulant, tonic. Ceremonial, ritual.)

in English: golden mariposa lily

Calochortus gunnisonii S. Watson

North America. Perennial herb, food

See *Botany* [Fortieth Parallel]: 348. 1871

(Plant infusion or decoction taken for swellings, postpartum remedy. Ceremonial. Veterinary medicine.)

in English: Gunnison’s mariposa lily

Calochortus gunnisonii S. Watson var. ***gunnisonii*** (*Calochortus gunnisonii* var. *immaculatus* Cockerell; *Calochortus gunnisonii* var. *kreglagii* Regel; *Calochortus gunnisonii* var. *krelagei* Regel; *Calochortus gunnisonii* var. *maculatus* Cockerell; *Calochortus gunnisonii* var. *purus* Cockerell)

North America. Perennial herb, food

See *Botany* [Fortieth Parallel]: 348. 1871, *Gartenflora* 22: 213. 1873, *Gartenflora* 23: 129. 1874, *W. Amer. Sci.* 5: 17. 1888, *West. Am. Sci.* 6: 135. 1889

(Plant infusion taken for swellings. Ceremonial. Veterinary medicine.)

in English: Gunnison’s mariposa lily

Calochortus macrocarpus Douglas (*Mariposa macrocarpa* (Douglas) Hoover)

North America. Perennial herb, stout, straight, fan-like petals, narrow pointed sepals, food, forage

See *Trans. Hort. Soc. London* 7: 276. 1830 and *Leafl. W. Bot.* 4: 2. 1944

(Crushed bulbs made into a paste applied to the skin for skin diseases, poison ivy.)

in English: green-banded mariposa, sagebrush mariposa lily

Calochortus macrocarpus Douglas var. ***macrocarpus*** (*Calochortus acuminatus* Rydb.; *Calochortus cyaneus* A. Nelson; *Calochortus douglasianus* Schult.f.; *Calochortus macrocarpus* var. *cyaneus* (A. Nelson) J.F. Macbr.; *Calochortus macrocarpus* var. *cyaneus* J.F. Macbr.; *Calochortus pavonaceus* Fernald)

North America. Perennial herb, food, forage

See *Bijdr. Natuurk. Wetensch.* 4: 127. 1829, *Trans. Hort. Soc. London* 7: 276. 1830, *Bot. Gaz.* 19: 335. 1894, *Bull. Torrey Bot. Club* 24: 189. 1897 and *Bot. Gaz.* 53: 219. 1912, *Contr. Gray Herb.* 56: 14. 1918, *Leafl. W. Bot.* 4: 2. 1944

(Crushed bulbs made into a paste applied to the skin for skin diseases, poison ivy.)

in English: green-banded mariposa, sagebrush mariposa lily

Calochortus nuttallii Torr. & A. Gray (*Calochortus luteus* Nutt., nom. illeg.; *Calochortus luteus* Douglas ex Lindl.;

Calochortus luteus Douglas ex Kunth; *Calochortus nuttallii* Torr.; *Calochortus rhodotheus* Clokey; *Calochortus watsonii* M.E. Jones)

North America. Perennial herb, stout straight erect stem, narrow linear leaves, bowl-shaped white flowers, broad rounded petals, pointed sepals, edible bulb

See *Edwards's Bot. Reg.* 19: t. 1567. 1833, *Enum. Pl.* [Kunth] 4: 233. 1833–1850, *J. Acad. Nat. Sci. Philadelphia* 7: 53. 1834, *An Expedition to the Valley of the Great Salt Lake of Utah* 397. 1852 and *Contr. W. Bot.* 14: 26. 1912, *Bull. S. Calif. Acad. Sci.* 37: 1. 1938

(Ceremonial, ritual, the flowers.)

in English: sago lily, sego-lily

Caloncoba Gilg Flacourtiaceae

From the Greek *kalos* 'beautiful' and the genus *Oncoba*, see *Stirpes Novae aut Minus Cognitae* 3: 59. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 255. 1824 and *Blumea—Journal of Plant Taxonomy and Plant Geography* 53(1): 1–222. 2008.

Caloncoba brevipes (Stapf) Gilg (*Oncoba brevipes* Stapf)

West Tropical Africa. Tree, seeds eaten

See *Journal of the Linnean Society, Botany* 37: 84. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 459. 1908, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* 19: 256. 1997

(Bark pain-killer, inner bark and leaves for headache. Seed oil for subcutaneous parasitic infection, skin diseases, craw-craw and scrofula.)

in Ivory Coast: butue, dolié, dule

in Liberia: kene kene, kênê kênê, klehn

in Sierra Leone: gene, kene, kenne, kenye

Caloncoba echinata (Oliv.) Gilg (*Caloncoba echinata* Gilg; *Oncoba echinata* Oliv.)

Tropical Africa. Shrub or small tree, perennial, erect, wood very hard, stiff wavy leaves, small white flowers with yellow center, yellow spiny ripe fruits, fruit pulp edible, seeds sweet and oily

See *Flora Aegyptiaco-Arabica* cxiii, 103–104. 1775, *Flora of Tropical Africa* 1: 118–119. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 458, 464. 1908, *Journal of Natural Products* 65(12): 1764–1768. 2002

(Fruits and leaves for sores, skin eruptions and inflammation. Seed oil used for the treatment of leprosy, pustular eruptions, malaria and skin infections, toothache. Leafy twig tonic, laxatives, used for smallpox, chicken pox, measles. Seeds

insecticide, arachnicide, pounded seeds against lice and mange.)

in English: elephant's comb

in Cameroon: gorli

in Ghana: esono ankyi, gbogble, marhebomuane, obafufu, okyere, orbafufu, wanka

in Guinea: kuêuêui

in Ivory Coast: gbétélibé, katupo

in Liberia: dooh, flanchu

in Nigeria: gorli, kakandika, otienne, udara-nwewe

in Sierra Leone: fen-kone, goli, gorli, kè-nanafira, komehumda, kulukukenyo, kumin-kanya, kumin-kone, nikawumbi, nyanyando

in Paraguay: chamulgra

Caloncoba gilgiana (Sprague) Gilg (*Oncoba gilgiana* Sprague)

Sierra Leone. Shrub or small tree, straggling, thorny, arching branches, fragrant white flowers

See *Bulletin de l'Herbier Boissier*, sér. 2, 5(12): 1164–1166. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40(3): 460–461. 1908

(Antidote to poison, purgative.)

in Ghana: asratoa, aweawu, efiohle, gbogble, kotowiri, nwoantia, okyere, sissiru

in Ivory Coast: kauanunguessé

in Nigeria: iroko-ojo

in Sierra Leone: gene, kenye, kokwi, singo

in Togo: efiohle

Caloncoba glauca (P. Beauv.) Gilg (*Lindackeria dentata* (Oliv.) Gilg; *Oncoba glauca* (P. Beauv.) Planch.; *Ventenatia glauca* P. Beauv.)

Nigeria. Small tree, edible orange-yellow spiny fruits, shining black seeds with a red aril

See *Flore d'Oware* 30. 1805, *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 296. 1847, *Flora of Tropical Africa* 1: 119. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 459, 465. 1908

(Hydrocyanic acid in the leaves, bark and roots. Seed oil used for the treatment of leprosy, yaws, pustular eruptions, venereal diseases, malaria and skin infections, toothache. Leafy twig tonic, laxatives, used for smallpox, chicken pox, measles; leaf sap pain killer. Seeds insecticide, rodenticide, arachnicide; leaf decoction to kill fleas. Bark root astringent;

root decoction drunk and root ash rubbed on areas of edema. Magic, ritual, leaf sap to keep the spirits of the dead away.)

in Ghana: asratoa

in Ivory Coast: boua, dédébroguissé

in Nigeria: gorli, kakandika, kankan dika, kánkán òkà, ntuebi, oru kpakokwa, otienne, otienme, otiosa, pomuseghe, udalà ènwè, udallaenwe, udara-nwewe

in Sierra Leone: bewo, boku, fulo, fulo-kpokpo, hengwa, maiyungbe, ngaingainge, sime, toya-hina, xaienyi

Caloncoba mannii (Oliv.) Gilg (*Camptostylus mannii* (Oliv.) Gilg; *Oncoba mannii* Oliv.)

Tropical Africa. Tree, white flowers, fruit eaten by monkeys

See *Flora of Tropical Africa* 1: 117. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 462. 1908, *Die Natürlichen Pflanzenfamilien* 21: 398. 1925

(Bark decoction febrifuge, to dress sores. Powdered root sedative, astringent, made into snuff for head colds, nasopharyngeal affections and headache.)

in Central African Republic: mwangalé, mwangali

Caloncoba subtomentosa Gilg (*Oncoba subtomentosa* (Gilg) S. Hul & Breteler)

Tropical Africa. Small tree or shrub, white flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 463. 1908, *Adansonia* sér. 3, 19: 260. 1997

(Bark vermifuge.)

in Congo: n'sendesende, osendesende

Caloncoba welwitschii (Oliv.) Gilg (*Oncoba welwitschii* Oliv.)

Tropical Africa. Small tree, scented white flowers, prickly fruits, elephants eat leaves, monkeys and elephants eat fruit

See *Flora of Tropical Africa* 1: 117. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 462. 1908

(Seed oil used for the treatment of leprosy, skin infections. Leaves for dropsy, edema, swellings, gout; leaf sap pain killer. Leafy twig tonic, laxatives, used for smallpox, chicken pox, measles. Seeds insecticide, repellent, arachnicide. Hydrocyanic acid in the leaves, bark and roots. Dried powdered seeds poisonous.)

in Central African Republic: esoko, gbgolo, isoko

in Congo: nteela

in Gabon: ditouk di kari, niam 'n 'gom

in Tanzania: muwabo

Calophyllum L. Clusiaceae (Guttiferae)

From the Greek *kalos* 'beautiful' and *phyllon* 'a leaf'; see Carl Linnaeus, *Species Plantarum*. 1: 513–514. 1753, *Genera Plantarum*. Ed. 5. 229. 1754, *An Introduction to the Natural System of Botany* 74. 1836 and *Fl. Bermuda* 246. 1918, *J. Arnold Arbor.* 61: 117–699. 1980, *Quimica Nova* 29(3): 549–554. 2006, *Chemistry & Biodiversity* 6(3): 313–327. 2009.

Calophyllum apetalum Willd. (*Calophyllum decipiens* Wight)

India. Tree, rusty tomentose, young branches quadrangular, sticky watery sap, white flowers in axillary panicle

See *Mag. Neuesten Entdeck. Gesammten Naturk. Ges. Naturf. Freunde Berlin* 5: 79. 1811 and *Fl. Karnataka* 1: 202. 1996, *Fl. Madras* 1: 76. 1997

(Used in Sidha. Gum used as an astringent.)

in India: arrupunna, attupunna, bobbe, bobbi, bobbi mara, boobi mara, calhonne, cheruponne, cherupunna, cherupunayari, chiraponne, cirupunnai, erai, haraluponne, holi honne, holihonne, irai, iray, kal honne, kala honne, kalhonne, kalla honne, kallonne, kalponne, kalpoone, kalpoovu, kirihonne, lahan-undi, manja punna, manjapunna, punna, punnai, punnai vittu, punnakam, shri hone, shrihonne, valuzhavam

Calophyllum austroindicum Kosterm. ex P.F. Stevens (*Calophyllum trapezifolium* sensu Anders.)

India. Tree, clear latex, white flowers in axillary panicle

See *J. Arnold Arbor.* 61(2): 250. 1980, *Phytochemistry* 43(3): 681–685. 1996, *Fl. Karnataka* 1: 202. 1996, *Fl. Madras* 1: 76. 1997, *Current Medicinal Chemistry* 10(1): 1–12. 2003

(Antibacterial.)

in English: rhomb leaved poon

in India: cheru pinnai, kattupunna

Calophyllum biflorum M.R. Hend. & Wyatt-Sm.

Indonesia. Tree

See *The Gardens' Bulletin Singapore* 15: 349. 1956

(Crushed fresh bark as fish poison.)

in Indonesia: kayu betao

Calophyllum blancoi Planch. & Triana (*Calophyllum changii* N. Robson)

China, Philippines. Erect tree, long terminal bud, flowers creamy white, hairy panicles

See *Annales des Sciences Naturelles; Botanique*, série 4, 15: 272. 1861 and *Austral. J. Bot.* 22: 206–218. 1974, *Flora of Taiwan* 2: 621. 1976, *Chemical & Pharmaceutical Bulletin* 52(4): 402–405. 2004, *Chemical & Pharmaceutical Bulletin* 53(2): 244–247. 2005

(Antiviral, anti-coronavirus, anticarcinogenic, from the roots. Sap of the bark used locally as a cure for boils and wounds; for asthma, a cloth kept moist with the sap applied on the breasts.)

in China: lan yu hong hou ke

in Philippines: basangal, bitangol, bitanhol, bitaog-bakil, bitaol, bitaong, botol, hitaog, palo Maria, palo Maria del monte, palumut, pameklaten, pamitaogen, pamitaoyen, pamitaugen, pamitlatiin, tadak

Calophyllum brasiliense Cambess. (*Calophyllum antillanum* Britton; *Calophyllum brasiliense* var. *antillanum* (Britton) Standl.; *Calophyllum ellipticum* Rusby; *Calophyllum lucidum* Benth.; *Calophyllum piaroanum* An. Castillo & C. Gil; *Calophyllum rekoi* Standl.)

Brazil.

See *Species Plantarum* 1: 514. 1753, *Selectarum Stirpium Americanarum Historia* ... 269. 1763, *Flora Brasiliae Meridionalis* (quarto ed.) 1: 247–248, t. 67. 1825, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 370. 1843 and *Contributions from the United States National Herbarium* 20(6): 192. 1919, *Scientific Survey of Porto Rico and the Virgin Islands* 5(4): 584. 1924, *Memoirs of the Torrey Botanical Club* 7: 303. 1927, *Tropical Woods* 30: 7. 1932, *Ernstia* (2nd series) 1(1): 41, f. 1. 1991, *Journal of Chemical Ecology* 23(7): 1901–1911. 1997, *J. Nat. Prod.* 66(3): 368–371. 2003, *Parasitology Research* 101(3): 715–722. 2007, *Journal of Pharmacy and Pharmacology* 59(5): 719–725. 2007

(Antifungal, antileishmanial, antiproliferative, cytotoxic and antitumour. Moist sawdust caused persistent dermatitis and folliculitis.)

in Tropical America: galba, guaranandi, jacareúba, jaca-reuba, landim, leche María, Maria, olandi, palo de Maria, palo de Santa Maria (references are to the mother of Christ), Santa Maria

Calophyllum calaba L. (*Calophyllum antillanum* Britton; *Calophyllum calaba* Griseb.; *Calophyllum calaba* Jacq., nom. illeg. hom.)

India. Tree, scented flowers, milky yellowish latex

See *Species Plantarum* 1: 514. 1753, *Selectarum Stirpium Americanarum Historia* ... 269. 1763, *Monogr. Phan.* [A. DC. & C. DC.] 8: 594. 1893 and *Scientific Survey of Porto Rico and the Virgin Islands* 5(4): 584. 1924, *Regnum Veg.* 127: 28. 1993

(To treat skin diseases.)

in English: Santa Maria tree

in India: tsjerou-ponna

Calophyllum caledonicum Vieill. ex Planch. & Triana

New Caledonia.

See *Annales des Sciences Naturelles; Botanique*, série 4 15: 291. 1861 and *J. Nat. Prod.* 63(11): 1471–1474. 2000, *Planta Medica* 68(1): 41–44. 2002, *Molecules* 7(1): 38–50. 2002, *Life Sciences* 75(25): 3077–3085. 2004

(Antifungal, antimalarial, diuretic.)

Calophyllum dispar P.F. Stevens

Singapore, Sumatra, Borneo.

See *J. Arnold Arbor.* 61(3): 524. 1980, *J. Nat. Prod.* 64(5): 563–568. 2001, *Phytochemistry* 58(4): 571–575. 2001

(Cytotoxic.)

Calophyllum elatum Bedd.

India.

See *The Flora Sylvatica for Southern India* 1: t. 2. 1869

(Used in Sidha.)

in India: kattu punnai, kattuppinnai

Calophyllum gracilipes Merr.

Philippines.

See *Philipp. J. Sci.*, C 5: 197. 1910

(Strongly cytotoxic, useful for the treatment of melanoma.)

Calophyllum inophyllum L. (*Balsamaria inophyllum* (L.) Loureiro; *Calophyllum calaba* Jacq.; *Calophyllum inophyllum* Sieber ex Presl; *Calophyllum inophyllum* Lam.; *Calophyllum tacamahaca* Willd.) (Greek *is*, *inos* 'fiber, strength' and *phyllon* 'leaf')

India. Shade tree, spreading crown, leaning, latex, leathery leaves, very fragrant white flowers in axillary racemes, white petals and yellow stamens, globose fruit coarsely wrinkled, bark contains tannin, common on beaches

See *Species Plantarum* 1: 513–514. 1753, *Encycl. (Lamarck)* 1(2): 552. 1785, *Flora Cochinchinensis* 2: 464, 469–470. 1790, *Mag. Neuesten Entdeck. Gesammten Naturk. Ges. Naturf. Freunde Berlin* 5: 79. 1811, *Isis*, xxi. (1828) 274. 1828 and *Ann. Missouri Bot. Gard.* 67: 972. 1980

(Used in Ayurveda and Sidha. Fruits, seeds and leaves poisonous. Sap irritates the skin and eyes, allergic contact dermatitis. Seed oil rubefacient, irritant, vermifuge, used for ringworm and rheumatism; pounded seeds tied to scrotum to reduce hydrocele. Resin from the mast-wood tree emetic and purgative. Stem bark for skin disorders. Decoction and powder of bark, leaves and flowers to treat eye disease. Leaves and bark rubefacient. Leaves for skin inflammation and infections, ulcers, wounds, scabies, sores; tender leaves juice as eye drops; leaves heated and applied to cuts and sores. Milky yellow latex from the leaves diluted with water and applied to irritated eyes; milky latex from tender twigs and midribs of leaves applied as eye drops; latex applied for killing lice; sap used as arrow poison. Fruits pesticide, against

fungal infection. Flowers presented to God during worship. Fruits, seeds and leaves as fish poison.)

(Used in Ayurveda, Unani and Sidha. Poisonous; flowers, green seedpods and seeds should not be eaten. Stem and roots used for diarrhea and dysentery. Fresh flowers with jaggery are given as a remedy against rabid dog bites. Fresh foliage usually regarded as poisonous, and nectar from the flowers said to be poisonous too; for abortion, a stick introduced in vagina and kept for few minutes. Leaves and bark contain a caustic latex used as a blistering agent, can be violently irritant, immunological and allergenic responses against the latex, bullous eruption, intense inflammatory response of the skin and mucous membranes upon accidental exposure; milky latex used in scorpion sting, cold and cough, fever and asthma, as a rubefacient, to extract Guinea worms, to remove spines and prickles, for preparation of antimalarial paste eaten like a sweet dish. Root insect repellent, an infusion a remedy for coughs and snakebite; touch/contact therapy, root tied with a red thread on the affected part to relieve filariasis; roots decoction emetic and in the treatment of hookworm; dried ground roots mixed with milk and drunk for the treatment of gonorrhoea and venereal diseases; root powder taken in menstrual disorders. In small doses, root bark, mild stimulant diaphoretic and expectorant, used in a soup to treat colic and as a stomachic. Burnt root made into an ointment for skin eruptions and ulcers. Leaves extract hepatoprotective, cardiotoxic, anti-hyperglycemic, cytotoxic, antioxidant, antiinflammatory, larvicidal, nematicidal, fungicidal, pesticide, anthelmintic, expectorant, stomachic, diaphoretic, emetic; warmed or fresh leaves bandaged in rheumatic pain; tuber of *Gloriosa superba* ground into paste applied as bandage with leaves of *Calotropis procera* for skin eruptions; leaves extract of *Ricinus communis*, *Calotropis procera* and *Ocimum sanctum* taken to cure jaundice. Bark and leaves used for the treatment of leprosy and asthma. Veterinary medicine, for cough in camels drink infusion of roots; paste of leaves of *Pergularia extensa* and *Calotropis procera* applied for muscular pains; warmed leaves applied on boils, swellings and swollen cheeks of cattle; roots kept in nostrils for epistaxis; flowers for ephemeral fevers; milky juice applied over the cut tail of buffalo. Sacred plant, spiritual, ceremonial, magic, ritual, emotional, used in religion and magico-religious beliefs, special powers in witchcraft; flowers offered to Lord Shiva and Hanuman; plants with white flowers worshipped since it is believed that the knotted roots of the plant are abode of Lord Shiva and Ganesh.)

Calpocalyx Harms Fabaceae (Leguminosae, Mimosaceae, Mimoseae, Mimosoideae)

From the Greek *kalpis* 'an urn, jug, a drinking cup' and *calyx* 'calyx', see *Nat. Pflanzenfam.* Nachtr. II-IV [Engler & Prantl] 1: 191. 1897 and *Bulletin du Muséum National d'Histoire Naturelle*, 4e série, section B, *Adansonia* 6(3): 297-311. 1984. Related to *Xylia*.

***Calpocalyx aubrevillei* Pellegr.**

Sierra Leone, Liberia, Ivory Coast. Perennial non-climbing tree, seeds edible after cooking, sometimes confused with *Calpocalyx brevibracteatus*

See *Bulletin de la Société Botanique de France* 80: 467. 1933

(Pounded seeds mixed with palm oil made into a paste applied to treat women's breasts troubles.)

***Calpocalyx brevibracteatus* Harms**

Ghana, Ivory Coast, Sierra Leone to Cameroon. Perennial non-climbing tree, hollow branches, papery leaves, pinkish to orange flowers, inflorescence axillary or terminal, strongly flattened woody dehiscent pod, seeds edible after cooking

See *Bull. Soc. Bot. France* 58(Mém. 8d): 155. 1912 [1911 publ. 1912]

(Crushed bark applied to treat sores, a mouthwash; inner bark used as stomachic.)

in Ghana: kotoprepre, samanta, tre-tre

in Ivory Coast: pétépré

in Liberia: kpu-ah

***Calpocalyx dinklagei* Harms** (*Calpocalyx crawfordianus* Mendes; *Erythrophleum dinklagei* Taub.; *Xylia dinklagei* (Taub.) Roberty; *Xylia dinklagei* (Harms) Roberty)

Nigeria, Cameroon. Perennial non-climbing tree, small tree, yellow-cream flowers, sometimes confused with *Calpocalyx klainei* Pierre ex Harms

See *Narrative of Travels and Discoveries in Nothern and Central Africa* 235. 1826, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(3): 386. 1894, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 191. 1897 and *Bull. Inst. Franç. Afrique Noire*, sér. A 16: 347. 1954, *Bol. Soc. Brot.* sér. 2, 37: 163. 1963

(Powdered bark applied to wounds.)

in Gabon: mississe

Calpocalyx heitzii Pellegrin

Tropical Africa, Gabon. Perennial non-climbing tree, canopy tree, inflorescence an axillary pendent spike, dehiscent pods

See *Bull. Soc. Bot. France* 84: 643. 1938 [1937 publ. 1938]

(Antiseptic, for skin diseases, venereal diseases.)

in Cameroon: amia, bebamme, bon, endoa, motoudon, miama, ékang, minsi

in Central Africa: mississé

in Gabon: koumaouma, mbôngo, miama, moamba

Calpocalyx klainei Pierre ex Harms (*Calpocalyx klainei* Pierre; *Calpocalyx klainei* Harms)

Cameroon, Equatorial Guinea and Gabon. Perennial non-climbing tree

See *Bull. Soc. Bot. France* 58(Mém. 8d): 156. 1912 [1911 publ. 1912]

(Powdered bark used as an anodyne.)

in Cameroon: amia, bebamme, bon, endoa, miama, motoudon

in Central Africa: mississé

in Gabon: miama

**Calpurnia E. Meyer Fabaceae
(Leguminosae, Sophoreae)**

The genus resembles *Virgilia*, after the Latin poet Publius Vergilius Maro (70–19 BC.), and therefore bears the name of a supposed imitator of him, Calpurnius; see Jean François Drège (1794–1881) and Ernst Heinrich Friedrich Meyer (1791–1858), *Commentariorum de plantis Africae australioris*. 2. 1835 [1836, 1838] and *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980, *Memoirs of the New York Botanical Garden* 25(3): 1–264. 1981, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Bothalia* 29: 5–23. 1999, *Phytotherapy Research* 15: 62–69. 2001, *Journal of Ethnopharmacology* 112(1): 55–70, 152–161. 2007, *Journal of Ethnopharmacology* 121(2): 324–329. 2009.

Calpurnia aurea (Aiton) Benth. subsp. ***aurea*** (*Calpurnia aurea* Baker; *Calpurnia aurea* (Lam.) Benth.; *Calpurnia*

Caltha alba Cambess.

India, Kashmir.

See *Species Plantarum* 1: 558. 1753, *The Flora of British India* 40. 1855

(Whole plant made into a paste applied locally in rheumatism. Roots decoction for high fever. Leaves extract applied to the shoulders and neck for muscular pain. A source of *ganja*.)

in India: traker

Caltha leptosepala DC. (*Caltha biflora* DC.; *Caltha biflora* subsp. *howellii* (Huth) Abrams; *Caltha biflora* var. *rotundifolia* (Huth) C.L. Hitchc.; *Caltha howellii* (Huth) Greene; *Caltha leptosepala* var. *rotundifolia* Huth; *Caltha leptosepala* var. *sulfurea* C.L. Hitchc.)

North America. Herb, perennial, erect, fleshy, white bluish flowers, erect clusters of follicles

See *Systema Vegetabilium* 1: 310. 1817, *Proceedings and Transactions of the Royal Society of Canada* 2(Sect. 4): 69. 1884, *Pittonia* 4: 79. 1899, *Helios* 9: 68. 1891 and *Illustrated Flora of the Pacific States* 2: 175. 1944, *Vascular Plants of the Pacific Northwest* 2: 335, 337. 1964, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 72(1): 26. 1969, *Phytologia* 51(6): 375. 1982

(Whole plant toxic, poisonous, strongly irritant; antispasmodic and expectorant, applied to wounds, warts.)

in English: mountain marsh-marigold, western marsh marigold, white marshmarigold

Caltha palustris L. (*Caltha arctica* R. Brown; *Caltha asarifolia* DC.; *Caltha cornuta* Schott, Nym. & Kotschy; *Caltha laeta* Schott, Nym. & Kotschy; *Caltha palustris* subsp. *arctica* (R. Brown) Hultén; *Caltha palustris* subsp. *asarifolia* (DC.) Hultén; *Caltha palustris* var. *arctica* (R. Brown) Huth; *Caltha palustris* var. *asarifolia* (DC.) Huth; *Caltha palustris* var. *flabellifolia* (Pursh) Torrey & A. Gray; *Caltha palustris* var. *radicans* (T.F. Forst.) A. Gray; *Caltha polypetalae* Hochst. ex Lorent; *Caltha radicans* T.F. Forst.)

North America, India, China. Herb, perennial, erect or sprawling, sepals yellow or orange, red seeds

See *Transactions of the Linnean Society of London* 8: 324, t. 17. 1807, *Flora Americae Septentrionalis*; or, ... 2: 390, pl. 17. 1814[1813], *Systema Vegetabilium* 1: 309. 1817, *Supplement to the Appendix of Captain Parry's Voyage* 265. 1824, *A Flora of North America: containing ...* 1(1): 27. 1838, *Wanderungen* 339. 1845, *Helios* 9: 70–71. 1891, *Synoptical Flora of North America* 1(1[1]): 39. 1895 and *Acta Universitatis Lundensis*, n.s. 40(1): 712–713. 1944, *Arkiv för Botanik*, Andra Serien 7(1): 56. 1967[1968], *Acta Fac. Rerum Nat. Univ. Comenianaes, Bot.* 23: 1–23. 1974, *Botaniska Notiser* 128(4): 510–511. 1975[1976], *Bot. Zhurn.* 66 (12): 1751–1755. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 8–9. 195, *Bot. Žurn.* (Moscow & Leningrad) 83(10): 143–147. 1998, *Acta Phytotax. Sin.* 40(1): 52–65. 2002, *Bot. Žurn.* (Moscow & Leningrad) 87(11): 131–133. 2002, *Bot. J. Linn. Soc.* 150: 267–289. 2006, *Bot. J. Linn. Soc.* 152: 15–26. 206

(Whole plant toxic only if large quantities eaten, poisonous, acrid, strongly irritant, sap can irritate sensitive skin, raw root or leaves should not be eaten. Roots anodyne, acrid, anti-spasmodic, antirheumatic, diaphoretic, emetic, astringent, laxative, diuretic, expectorant, rubefacient, to treat colds, gonorrhoea, tuberculosis, warts, sores, itching, constipation, headache, diarrhoea, anemia. Magic, a protection against love charms. Veterinary medicine, powdered leaves used to keep maggots out of cattle wounds.)

in English: american cowslip, buttercup, colt's foot, cow-flock, cowslip, ground ivy, king's-cup, kingcup, kingcups, mare-blebs, mare-blobs, marsh-marigold, May blob, may-blob, meadow bright, meadow bouts, palsywort, water-blobs, water bouts, water dragon, yellow marsh marigold

in North America: populage des marais, soucis d'eau

in China: lu ti cao, ma ti ye

in India: baringun, mamiri, maniru, traker

Caltha palustris L. var. ***alba*** (Cambess.) Hook. f. & Thomson (*Caltha alba* Cambess.; *Caltha alba* Jacquem.)

India. Perennial herbs, rootstock thick, reniform cordate leaves

See *Species Plantarum* 1: 558. 1753, *The Flora of British India* 40. 1855

(Whole plant made into a paste applied locally in rheumatism. Roots decoction for high fever. Leaves extract applied to the shoulders and neck for muscular pain.)

in India: traker

Caltha palustris L. var. ***palustris*** (*Caltha asarifolia* DC.; *Caltha natans* Pall. ex Georgi var. *asarifolia* (DC.) Huth; *Caltha natans* Pall. var. *asarifolia* (DC.) Huth; *Caltha palustris* L. subsp. *asarifolia* (DC.) Hultén; *Caltha palustris* L. var. *asarifolia* (DC.) Rothr.; *Caltha palustris* L. var. *flabellifolia* (Pursh) Torr. & A. Gray)

North America, India, China. Perennial herb, erect or sprawling, sepals yellow or orange

See *Transactions of the Linnean Society of London* 8: 324, t. 17. 1807, *Flora Americae Septentrionalis*; or, ... 2: 390, pl. 17. 1814[1813], *Systema Vegetabilium* 1: 309. 1817, *Supplement to the Appendix of Captain Parry's Voyage* 265. 1824, *A Flora of North America*: containing ... 1(1): 27. 1838, *Wanderungen* 339. 1845, *Helios* 9: 70–71. 1891, *Synoptical Flora of North America* 1(1[1]): 39. 1895 and *Acta Universitatis Lundensis*, n.s. 40(1): 712–713. 1944, *Arkiv för Botanik*, Andra Serien 7(1): 56. 1967[1968], *Botaniska Notiser* 128(4): 510–511. 1975[1976]

(Whole plant toxic, poisonous, acrid, strongly irritant, sap can irritate sensitive skin, raw root or leaves should not be eaten.)

in English: american cowslip, buttercup, colt's foot, cow-flock, cowslip, ground ivy, king's-cup, kingcup, kingcups, mare-blebs, mare-blobs, marsh-marigold, May blob, may-blob, meadow bright, meadow bouts, palsywort, water-blobs, water bouts, water dragon, yellow marsh marigold

in North America: populage des marais, soucis d'eau

Calvoa Hook. f. Melastomataceae

See *Genera Plantarum* [Bentham & Hooker f.] 1(3): 732, 755. 1867.

Calvoa orientalis Taub. (*Calvoa sessiliflora* Cogn. ex De Wild. & T. Durand; *Calvoa sessiliflora* Cogniaux ex De Wildeman; *Calvoa sessiliflora* De Wild. & Th. Dur.)

Tropical Africa. Herb or shrub, subshrub, succulent, pink-purple corolla

See *Abh. Preuss. Akad. Wiss.* (1894) 46. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 296. 1895, *Ann. Mus. Congo Belge, Bot. sér. 2*, 1(1): 22. 1899 [1899–1900 publ Jul 1899] and *Phytologia* 47: 199–220. 1980

(Roots poison antidote, tonic, diuretic.)

Calycanthus L. Calycanthaceae

Greek *kalyx* 'calyx' and *anthos* 'flower', the same colour for calyx and petals, the receptacle is hollow; see C. Linnaeus, *Systema Naturae*. Ed. 10. 1053, 1066, 1371. 1754, *Traité des Arbres et Arbustes* 1: 113. 1755, *Iter Hispanicum* 313–314. 1758 and Wood, C.E., Jr. "The genera of the woody Ranales in the southeastern United States." *J. Arnold Arbor.* 39: 296–346. 1958, Nicely, K.A. "A monographic study of the *Calycanthaceae*." *Castanea* 30: 38–81. 1965. Calycanthine, an alkaloid similar to strychnine, toxic to humans and livestock.

Calycanthus floridus L. (*Butneria florida* (L.) Kearney; *Butneria florida* (L.) Kearney)

North America. Deciduous shrub, aromatic flowers axillary, strap-like petals

See *Systema Naturae* ed. 10. 2: 1066. 1759, *Flora Caroliniana, secundum* ... 151. 1788, *Flora Boreali-Americana* 1: 305. 1803, *Enumeratio Plantarum Horti Botanici Berolinensis* ... 559. 1809, *A Sketch of the Botany of South-Carolina and Georgia* 1(6): 576–577. 1821, *Alsographia Americana*. 7–8. Philadelphia 1838, *Fl. N. Amer.* 1(3): 475. 1840, *Revisio Generum Plantarum* 1: 5. 1891, *Bulletin of the Torrey Botanical Club* 21: 175. 1894 and *Illustriertes Handbuch der Laubholzkunde* 1(3): 344. 1905, *The Standard Cyclopaedia of Horticulture* 2: 638. 1914, *Journal of the American Pharmaceutical Association* 4(4): 433–434. 1915, *Journal of the Arnold Arboretum* 1(2): 143. 1919, *Regnum Veg.* 127: 29. 1993

(Seeds poisonous, toxic only if large quantities eaten. Fruits poisonous to sheep. Bark emmenagogue, diuretic, eye medicine, for urinary complaints, urticaria; root strongly emetic; sap applied to children's skin sores. Insect repellent.)

in English: Carolina-allspice, eastern sweetshrub, pineapple-shrub, strawberry-shrub, sweet bubbly bush, sweetshrub

Calycanthus floridus L. var. *glaucus* (Willdenow) Torrey & A. Gray (*Beurera ferax* (Michx.) Kuntze; *Beurera fertilis* (Walter) Kuntze; *Butneria fertilis* (Walter) Kearney; *Butneria fertilis* var. *ferax* (Michx.) C.K. Schneid.; *Butneria fertilis* var. *glauca* (Willd.) C.K. Schneid.; *Butneria nana* (Loisel.) Small; *Calycanthus ferax* Michx.; *Calycanthus fertilis* Walter; *Calycanthus fertilis* var. *ferax* (Michx.) Rehder; *Calycanthus fertilis* var. *glaucus* (Willd.) Rehder; *Calycanthus fertilis* var. *oblongifolius* (Nutt.) Rehder; *Calycanthus floridus* var. *inodorus* (Elliott) Torr. & A. Gray; *Calycanthus floridus* var. *laevigatus* (Willdenow) Torrey & A. Gray; *Calycanthus floridus* var. *oblongifolius* (Nuttall) Boufford & Spongberg; *Calycanthus glaucus* Willdenow; *Calycanthus glaucus* var. *oblongifolius* Nutt.; *Calycanthus inodorus* Elliott; *Calycanthus laevigatus* Willd.; *Calycanthus nanus* Loisel.; *Calycanthus nanus* Small; *Calycanthus nanus* (Loisel.) Small; *Calycanthus pennsylvanicus* Loddiges ex Loudon; *Calycanthus reticulatus* Raf.; *Calycanthus verrucosus* Raf.)

North America. Deciduous shrub

See *Syst. Nat.* ed. 10. 2: 1066. 1759, *Flora Caroliniana, secundum* ... 151. 1788, *Flora Boreali-Americana* 1: 305. 1803, *Enumeratio Plantarum Horti Botanici Berolinensis* ... 559. 1809, *A Sketch of the Botany of South-Carolina and Georgia* 1(6): 576–577. 1821, *Alsographia Americana*. 7–8. Philadelphia 1838, *Fl. N. Amer.* 1(3): 475. 1840, *Revisio Generum Plantarum* 1: 5. 1891, *Bulletin of the Torrey Botanical Club* 21: 175. 1894 and *Illustriertes Handbuch der Laubholzkunde* 1(3): 344. 1905, *The Standard Cyclopaedia of Horticulture* 2: 638. 1914, *Journal of the American Pharmaceutical Association* 4(4): 433–434. 1915, *Journal of the Arnold Arboretum* 1(2): 143. 1919, *Regnum Veg.* 127: 29. 1993

(Fruits poisonous to sheep. Bark emmenagogue, diuretic, eye medicine, for urinary complaints, urticaria; root strongly emetic; sap applied to children's skin sores. Insect repellent.)

in English: Carolina-allspice, eastern sweetshrub, pineapple-shrub, strawberry-shrub, sweetshrub

Calycanthus occidentalis Hooker & Arnott (*Butneria occidentalis* (Hooker & Arnott) Greene)

North America. Deciduous shrub, strongly aromatic

See *Syst. Nat.* ed. 10. 2: 1066. 1759, *The Botany of Captain Beechey's Voyage* ... 340, plate 84. 1839, *Erythea* 1(10): 207. 1893

(Bark expectorant, stomachic, for sore throats, catarrh, colds, chest colds, stomachache.)

in English: California allspice, California spicebush, California sweet-shrub, spicebush, strawberry shrub, sweet-shrub, western sweetshrub

Calycobolus Willd. ex J.A. Schultes Convolvulaceae

Greek *kalyx* 'calyx' and *bolis*, *bolos* 'casting, throwing away', referring to the early deciduous corolla, see *Genera Plantarum* 132. 1789, *Systema Vegetabilium* 5: II, 4. 1819 and *African Study Monographs* 25(1): 1–27. March 2004.

Calycobolus africanus (G. Don) Heine (*Breweria alternifolia* (Planch.) Radlk.; *Breweria codonanthus* Baker ex Oliv.; *Codonanthus africana* G. Don; *Codonanthus alternifolius* Planch.; *Prevostea africana* (G. Don) Benth.; *Prevostea nigerica* Rendle)

Gabon, Cameroon. Liane, woody vine, climbing, white corolla, calyx green and purple

See *Prodromus Florae Novae Hollandiae* 487. 1810, *Annales des Sciences Naturelles* (Paris) 4: 497. 1825, *A General History of the Dichlamydeous Plants* 4: 166. 1838, *Niger Flora* 469, t. 46. 1849, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 7: 1883. 1883, *Index Kew.* 1(1): 337. 1893, *Hooker's Icones Plantarum* t. 2276. 1894 and British Museum, Natural History. *Catalogue of the Plants Collected by Mr. & Mrs. P. A. Talbot in the Oban District South Nigeria* ... 72. 1913, *Kew Bulletin* 15: 388. 1963, *Burma Journal Life Sciences* 1: 31. 1968, *Phytologia* 17: 134. 1968

(Aphrodisiac, febrifuge.)

Calycophyllum DC. Rubiaceae

From the Greek *kalyx* 'calyx' and *phyllon* 'a leaf', referring to the calyx teeth, see *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 367. 1830 and *N. Amer. Fl.* 32: 113. 1921, *Field Mus. Nat. Hist., Bot. Ser.* 13(6/1): 3–261. 1936, *Novon* 2(4): 438–442. 1992, *Fl. Ecuador* 50: 1–112. 1994, *Annals of the Missouri Botanical Garden* 82(3): 421–422. 1995, *Arnaldoa* 9(2): 43–110. 2002 [2003].

Calycophyllum megistocaulum (K. Krause) C.M. Taylor (*Calycophyllum acreanum* Ducke; *Remijia megistocaula* K. Krause; *Remijia megistocaula* K. Krause; *Semaphyllanthus megistocaula* (K. Krause) L. Andersson)

South America. Tree, erect, reddish smooth bark, outer bark peeling in papery sheets, aromatic white flowers, on alluvial soils, in marshy soils

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 319. 1908, *Arquivos do Instituto de Biologia Vegetal* 2: 70. 1935, *Flora of Ecuador* 50: 1–112. 1994

(Bark antidiabetic, contraceptive, antiparasitic, stimulant, antiseptic, antibacterial, antifungal, antioxidant, astringent, insecticidal and wound-healing. Toasted and powdered bark used against mycosis, for wounds, apply directly to wound until it heals.)

in South America: capirona, capirona de monte, dabayube, guayaboche, mamalu, oyuhue, uwachaunim, uyugue, uyuhue

Calycophyllum obovatum (Ducke) Ducke (*Calycophyllum obovatum* Ducke; *Semaphyllanthus obovata* (Ducke) L. Andersson; *Warszewiczia obovata* Ducke)

Colombia, Guyana. Tree, smooth, leaves glossy, inflorescence with enlarged bract or sepal reddish

See *Flora* 36: 716. 1853, *Monatsberichte der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1853: 497. 1853 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 475. 1932, *Tropical Woods* 49: 2. 1937

(Bark antifungal, anticandidal, astringent, insecticidal, contraceptive, emollient, wound healer, vulnerary, for burns, cuts, wrinkles, diabetes, fungal infections, skin parasites, malaria and wounds.)

in Venezuela: guayabón

Calycophyllum spruceanum (Benth.) Hook.f. ex K. Schum. (*Calycophyllum spruceanum* (Benth.) K. Schum.; *Calycophyllum spruceanum* f. *brasiliensis* K. Schum.; *Calycophyllum spruceanum* f. *peruvianum* K. Schum.; *Eukylista spruceana* Benth.)

Ecuador, Brazil. Tree, smooth bark, reddish gray outer bark peeling in papery sheets, small white flowers very fragrant, the tree shedding its bark annually

See *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 230. 1853, *Flora Brasiliensis* 6(6): 191–192. 1889 and *Phytochemistry* 64(2): 549–553. 2003

(Bark antibacterial, antitrypanosomal, contraceptive, antiaging, antifungal, antioxidant, astringent, parasiticide, insecticidal and wound-healing; bark decoction to treat diabetes, malaria, bleeding cuts, diarrhea, eye infections, infected wounds, wrinkles and scars; a poultice topically in treating cuts, wounds and burns. Magic, ritual, ceremonial, bark used as an admixture in the Ayahuasca rituals.)

in English: firewood tree, naked tree

in South America: ashi, asho, capirona, capirona de bajo, capirona negra, chiquitano, cojeshe, corusicao, escorregamacaco, guarayo, guayaboche, guayabochi, haxo, huiso asho, huiso asho nahui, mulateiro, mulateiro-da-várzea, nahua, oquiurrubis, palo amarillo, palo mulato, pau-marfim, pau mulato, pau-mulato-da-várzea, uhuachaunin, urayepiru

Calylophus Spach Onagraceae

From the Greek *kalyx* ‘calyx’ and *lophos* ‘a crest, back of the neck, ridge, tuft’, see *Histoire Naturelle des Végétaux. Phanérogames* 4: 349–350. 1835, *A Flora of North America*: containing ... 1(3): 501. 1840, *Die Natürlichen Pflanzenfamilien* 96[III,7]: 217. 1893, *Memoirs of the Torrey Botanical Club* 5(16): 236. 1894 and *Systematic Botany Monographs* 83: 147–148. 2007.

Calylophus hartwegii (Benth.) P.H. Raven (*Galpinsia hartwegii* (Benth.) Britton; *Oenothera hartwegii* Benth.; *Salpingia hartwegii* (Benth.) Raim.)

North America. Perennial subshrub, herb

See *Plantas Hartwegianas imprimis Mexicanas* 5–6. 1839, *Die Natürlichen Pflanzenfamilien* 96[III,7]: 217. 1893, *Memoirs of the Torrey Botanical Club* 5(16): 236. 1894 and *Brittonia* 16(3): 286. 1964

(Hemostat, for internal bleeding.)

in English: Hartweg’s sundrops

Calylophus hartwegii (Benth.) P.H. Raven subsp. *fendleri* (A. Gray) Towner & P.H. Raven (*Galpinsia hartwegii* var. *fendleri* (A. Gray) Small; *Oenothera fendleri* A. Gray; *Oenothera hartwegii* subsp. *fendleri* (A. Gray) W.L. Wagner & Hoch; *Oenothera hartwegii* Benth. var. *fendleri* (A. Gray) A. Gray)

North America. Perennial subshrub, herb

See *Plantas Hartwegianas imprimis Mexicanas* 5–6. 1839, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 45–46. 1849, *Smithsonian Contributions to Knowledge* 5(6): 58. 1853, *Die Natürlichen Pflanzenfamilien* 96[III,7]: 217. 1893, *Memoirs of the Torrey Botanical Club* 5(16): 236. 1894, *Bulletin of the Torrey Botanical Club* 23(5): 186. 1896 and *Brittonia* 16(3): 286. 1964, *Madroño* 20(5): 243. 1970, *Systematic Botany Monographs* 83: 212. 2007

(Hemostat, for internal bleeding.)

in English: Hartweg’s sundrops

Calyпсо Salisb. Orchidaceae

In honor of the nymph Calypso or Kalypso, daughter of Atlas and Queen of Ogygia, where Odysseus was shipwrecked, referring to the rarity or to the habitat of this orchid.

Calyпсо bulbosa (L.) Oakes (*Calyпсо borealis* Salisb.; *Calyпсо borealis* (Sw.) Salisb., nom. superfl.; *Calyпсо bulbosa* fo. *occidentalis* Holz.; *Calyпсо bulbosa* subsp. *occidentalis* (Holz.) Calder & Roy L. Taylor; *Calyпсо bulbosa* var. *occidentalis* (Holz.) B. Boivin; *Calyпсо occidentalis* A. Heller; *Calypsodium boreale* (Sw.) Link, nom. superfl.; *Cymbidium boreale* Sw., nom. superfl.; *Cypripedium bulbosum* L.; *Cytherea borealis* (Sw.) Salisb., nom. superfl.; *Cytherea bulbosa* (L.) House; *Limodorum boreale* (Sw.) Sw., nom. superfl.; *Norna borealis* (Sw.) Wahlenb., nom. superfl.; *Orchidium arcticum* Sw., nom. inval.; *Orchidium boreale* (Sw.) Sw., nom. superfl.)

Subarctic & Temp. northern Hemisphere. Perennial herb, erect, tuber geophyte, single sweet-scented nodding magenta flower, bulb eaten raw or cooked

See *Species Plantarum* 2: 951. 1753, *Catalogue of Vermont Plants* 1: 28, 200. 1842, *Contributions from the United States National Herbarium* 3: 251. 1895, *Bulletin of the Torrey Botanical Club* 25: 193. 1898 and *Bulletin of the Torrey Botanical Club* 32(7): 382. 1905, *Canadian Journal of Botany* 43(11): 1393. 1965, *Le Naturaliste Canadien* 94: 522. 1967, *Taxon* 30: 845–851. 1981

(Antispasmodic, anticonvulsive. Magic, charm.)

in English: fairy slipper, fairyslipper orchid

Calyptranthes Sw. Myrtaceae

Greek *kalyptra* ‘veil, lid’ and *anthos* ‘a flower’, referring to the operculum of the flowers, lid-like dehiscence of the calyx; see Olof Peter Swartz (1760–1818), *Nova genera et species plantarum seu Prodrromus*. 5, 79. Stockholm, Uppsala & Åbo 1788.

Calyptranthes zuzygium (L.) Sw. (*Calyptranthes chytraculia* var. *zuzygium* (L.) O. Berg; *Calyptranthes zuzygium* Blanco; *Chytraculia chytraculia* var. *zuzygium* (L.) Sudw.; *Chytraculia zuzygium* (L.) Kuntze; *Myrtus zuzygium* L.)

Tropical America, West Indies. Tree or shrub, petals absent, 1–2 seeded red purple-black fruits

See *Systema Naturae*, Editio Decima 2: 1056. 1759, *Nova Genera et Species Plantarum seu Prodrromus* 79. 1788, *Linnaea* 27(1): 28. 1854[1855], *Revisio Generum Plantarum* 1: 238. 1891, *Division of Forestry*: Bulletin [U.S. Department of Agriculture] 14: 305. 1897 and *Brenesia* 41–42: 73–80. 1994

(For skin diseases, stomachic, astringent.)

in English: myrtle-of-the-river

Calystegia R. Br. Convolvulaceae

Greek *kalyx* ‘calyx’ and *stega*, *stegos* ‘covering, cover’, referring to the large bracteoles; see Robert Brown (1773–1858), *Prodrromus florum Novae Hollandiae*. 483. 1810 and

Candollea 14: 11–60. 1952, *Lilloa* 29: 87–348. 1959, *Syst. Bot.* 4: 72–102. 1979, *Kew Bulletin* 35: 327–334. 1980.

Calystegia affinis Endl. (*Convolvulus affinis* (Endl.) Maiden; *Ipomoea denticulata* Choisy) (the epithet means allied to, and refers to a close relationship with *Calystegia marginata* R. Br.)

Norfolk Island. Creeper, twining

See *Prodromus Florae Norfolkicae* 51. 1833 and *Proc. Linn. Soc. New South Wales* 28(4): 711. 1903 (publ. 1904)

(For treating chickenpox.)

in Samoa: lautaffi

Calystegia longipes (S. Watson) Brummitt (*Convolvulus linearilobus* Eastw.; *Convolvulus longipes* S. Watson)

North America. Perennial vine, herb

See *American Naturalist* 7(5): 302. 1873 and *Proceedings of the California Academy of Sciences*, Series 4, 20(5): 152. 1931, *Annals of the Missouri Botanical Garden* 52(2): 214. 1965, *Sida* 14(3): 443–457. 1991

(Roots decoction taken for gonorrhoea.)

in English: Paiute false bindweed

Calystegia occidentalis (A. Gray) Brummitt subsp. ***fulcrata*** (A. Gray) Brummitt (*Calystegia fulcrata* (A. Gray) Brummitt; *Convolvulus fulcratus* (A. Gray) Greene; *Convolvulus luteolus* A. Gray var. *fulcratus* A. Gray; *Convolvulus luteolus* (Jacq.) Spreng. var. *fulcratus* A. Gray)

North America. Perennial vine, herb

See *Proceedings of the American Academy of Arts and Sciences* 11: 90. 1876, *Bulletin of the California Academy of Sciences* 1: 208. 1885 and *Annals of the Missouri Botanical Garden* 52(2): 214–215. 1965, *Kew Bulletin* 29(3): 502. 1974

(Aphrodisiac.)

in English: chaparral false bindweed

Calystegia sepium (L.) R.Br. (*Calystegia sepium* R.Br.; *Calystegia sepium* var. *maritima* (Gouan) Choisy; *Calystegia sepium* var. *sepium*; *Convolvulus sepium* L.; *Volulus sepium* (L.) Junger; *Volulus sepium* Junger; *Volulus sepium* Medik.)

Cosmopolitan. Perennial vine, climber, creeping, twining, trailing, flexible, fleshy creeping rhizome, white funnel-shaped flowers, globose capsule, noxious weed, see also *Convolvulus sepium*

See *Species Plantarum* 1: 153. 1753, *Philos. Bot.* (Medikus) 2: 42. 1791, *Prodromus Florae Novae Hollandiae* 483. 1810, *Prodr.* (DC.) 9: 433. 1845, *Oesterreichische Botanische Zeitschrift* 41(4): 133–134. 1891 and *Phytochemistry* 58(6): 883–889. 2001

(Root demulcent, diuretic, febrifuge, strongly purgative, potentially dangerous.)

in English: bear bind, bindweed, bracted bindweed, devil's guts, devil's vine, great bindweed, greater bindweed, hedge bindweed, hedge false bindweed, hedge glory bind, hedge-lily, hedge morning-glory, hedgebell, large bindweed, lily-bind, milk convolvulus, old man's cap, Rutland beauty, wild morning-glory

Maori names: pohue, pohuhe

in China: hsuan hua, ou xuan hua

in South America: campanillas de lomas

Calystegia soldanella (L.) R.Br. (*Calystegia reniformis* R.Br.; *Calystegia soldanella* (L.) Roem. & Schult.; *Calystegia soldanella* (L.) Choisy; *Calystegia soldanelloides* Makino; *Convolvulus asarifolius* Salisb.; *Convolvulus maritimus* Lam.; *Convolvulus reniformis* Cat.; *Convolvulus reniformis* Poir.; *Convolvulus reniformis* (R.Br.) Poir.; *Convolvulus reniformis* (R.Br.) Spreng.; *Convolvulus reniformis* Roxb.; *Convolvulus soldanellus* L.)

SE Asia, China. Found growing on sandy seashores

See *Species Plantarum* 1: 159. 1753, *Flore Françoise* 2: 265. 1778, *Prodr. Stirp. Chap. Allerton* 125. 1796, *Prodromus Florae Novae Hollandiae* 483–484, 486. 1810, *Hortus Bengalensis*, or a catalogue ... 14. 1814, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 4: 184, 251. 1819, *Fl. Ind.*, ed. Carey & Wall., ii. 67, 1824, *Fl. Ind.*, ed. Carey, i. 481. 1832 and *Taxon* 30: 695–696. 1981, *Watsonia* 19: 169–171. 1993, *J. Pl. Biol.* 39: 15–22. 1996

in English: sea bindweed

in China: shen ye da wan hua

in Japan: hama-hiru-gao

(The juice which oozes from the stalks and root hardens into a type of resin and is used as a purge.)

Camassia Lindley Asparagaceae (Anthericaceae, Hyacinthaceae, Liliaceae)

From the North American Indian plant names *lakamas*, *camass* or *kamass* or *kamas* (*Camassia esculenta*), an edible bulb eaten raw or cooked; see *Amer. Monthly Mag. & Crit. Rev.* 2(4): 265. 1818, *Edwards's Botanical Register* 18: pl. 1486. 1832, *Flora Telluriana* 2: 25 and 3: 53 1837 [1836 publ. Jan–Mar 1837], *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 4: 681. 1843 and [compiled by John Gill], *Gill's Dictionary of the Chinook Jargon*. 54. Portland, Oregon 1933, Gould, F.W. "A systematic treatment of the genus *Camassia* Lindl." *Amer. Midl. Naturalist* 28: 712–742. 1942, Ranker, T.A. and A.F. Schnabel. "Allozymic and morphological evidence for a progenitor-derivative species pair in *Camassia* (Liliaceae)." *Syst. Bot.* 11: 433–445. 1986, *Kew Bull.* 46: 307–316. 1991.

Camassia cusickii S. Watson (*Quamasia cusickii* (S. Watson) Coville; *Quamasia cusickii* Coville)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 22(2): 479. 1887, *Proceedings of the Biological Society of Washington* 11(13): 64. 1897 and *Phytochemistry*. 30(11): 3721–3727. 1991, *Canadian Journal of Physiology and Pharmacology* 79(11): 953–958. 2001 [Two steroidal saponins from *Camassia cusickii* induce L1210 cell death through the apoptotic mechanism.]

(Steroidal saponins.)

Camassia leichtlinii (Baker) S. Watson (*Camassia esculenta* Lindl. var. *leichtlinii* Baker; *Camassia esculenta* Lindl. var. *leichtlinii* (Baker) Baker; *Camassia leichtlinii* subsp. *typica* Gould, nom. inval.; *Chlorogalum leichtlinii* Baker; *Quamasia leichtlinii* Coville; *Quamasia leichtlinii* (Baker) Coville)

North America, British Columbia. Perennial herb, food plant, bulbs can be cooked and eaten

See *Edwards's Bot. Reg.* 18: t. 1486. 1832, *The Gardeners' Chronicle*, new series 1: 689. 1874, *Bot. Mag.* 103: t. 6287. 1877, *Proc. Amer. Acad. Arts* 20: 376. 1885, *Proceedings of the Biological Society of Washington* 11(13): 63. 1897 and *Leaflets of Botanical Observation and Criticism* 1: 91. 1904, *Amer. Midl. Naturalist* 28(3): 722. 1942, *Chem. Pharm. Bull.* (Tokyo). 49(6): 726–731. 2001 [Steroidal glycosides from the bulbs of *Camassia leichtlinii* and their cytotoxic activities.], *Anticancer Res.* 21(2A): 959–964. 2001 [Cytotoxic activity of saponins from *Camassia leichtlinii* against human oral tumor cell lines.]

(Steroidal glycosides from the bulbs.)

in English: large camas

Camassia quamash (Pursh) Greene (*Anthericum quamash* (Pursh) Steud.; *Camassia esculenta* Lindl.; *Camassia esculenta* (Ker Gawl.) B.L. Rob.; *Camassia esculenta* (Nutt.) B.L. Rob.; *Camassia quamash* (Pursh) Greene subsp. *teapeae* (H. St. John) H. St. John; *Phalangium quamash* Pursh; *Quamasia quamash* (Pursh) Coville; *Quamasia quamash* Coville)

North America. Herb, perennial, slender, food plant, bulbs can be cooked and eaten, highly variable morphologically

See *Fl. Amer. Sept.* (Pursh) 1: 226–227. 1814 [Dec 1813], *Nomencl. Bot.* 1: 54. 1821, *Edwards's Bot. Reg.* 18: t. 1486. 1832, *Man. Bot. San Francisco* 313. 1894, *Proc. Biol. Soc. Wash.* 11(13): 64. 1897, *Bull. Torrey Bot. Club* 26: 547. 1899 and *Rhodora* 10(110): 31. 1908, *Proc. Biol. Soc. Wash.* 29: 81. 1916, *Mol. Ecol.* 18(18): 3918–3928. 2009

(Roots infusion or decoction taken to induce labor; plant infusion taken for vaginal bleeding.)

in North America: blue camas lily, camas, camash, camass, camosh, common camas, common camus lily, quamash, small camas, small camas lily

Camellia L. Theaceae

For the Jesuit missionary Georg Joseph (Georgius Josephus) Kamel (Camellus, Camel, Camelli), 1661–1706, born at Brno in Moravia, pharmacist, traveller and plant collector, author of *Herbarium aliarumque stirpium in insula Luzone Philippinarum primaria nascentium syllabus*, in John Ray, *Historiae plantarum* tomus tertius, App. 1–96. London 1704. See *Species Plantarum* 2: 698. 1753, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Essai sur les Propriétés Médicales des Plantes*, ed. 2 978. 1816, L. Colla, *Camelliografia* ossia tentativo di una nuova disposizione naturale delle varietà della camellia del Giappone e loro descrizione. Torino 1843, Ambroise Colette Alexandre Verschaffelt (1825–1886), *Nouvelle iconographie des Camellias*. Gand [Gent] 1848–1860, *The Flora of British India* 1: 292. 1874 and *Mededeeling van het Proefstation Oost-Java* 40: 69. 1916, C. Battisti & G. Alessio, *Dizionario etimologico italiano*. Firenze 1950–1957, Sealy, Joseph Robert (1907–2000), *A revision of the genus Camellia* London: Royal Horticultural Society, 1958, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 268. 1965, L. Polgar, *Bibliography of the History of the Society of Jesus*. Rome 1967, *Acta Sci. Nat. Univ. Sunyatseni* 1979(3): 69–71. 1979, *Acta Sci. Nat. Univ. (Medicinal value.)

in English: goldeneggs

Camissonia tanacetifolia (Torr. & A. Gray) P.H. Raven (*Oenothera tanacetifolia* Torr. & A. Gray; *Taraxia tanacetifolia* (Torr. & A. Gray) Piper)

North America. Perennial herb

See *Reports of explorations and surveys : to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 2(1): 121, pl. 4. 1857 and *Contributions from the United States National Herbarium* 11: 405. 1906, *Brittonia* 16(3): 283. 1964

(For skin diseases, boils, ulcers.)

in English: tansyleaf evening primrose

Camissonia tanacetifolia (Torr. & A. Gray) P.H. Raven subsp. *tanacetifolia* (*Camissonia tanacetifolia* subsp. *quadriperforata* P.H. Raven; *Oenothera tanacetifolia* Torr. & A. Gray)

North America. Perennial herb

(For skin diseases, boils, sores, ulcers.)

See *Reports of explorations and surveys : to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 2(1): 121, pl. 4. 1857 and *Brittonia* 16(3): 283. 1964, *Contributions from the United States National Herbarium* 37(5): 248–249, f. 24. 1969

in English: tansyleaf evening primrose

Campanula L. Campanulaceae

The diminutive of the Latin word *campana* 'a bell', referring to the corolla shape; see Carl Linnaeus, *Species Plantarum*. 163. 1753, *Genera Plantarum*. Ed. 5. 77. 1754, *Genera Plantarum* 163. 1789 and *Rhodora* 65: 329. 1963, Lammers, Thomas G. *Prodromus Monographiae Campanuloidearum*. 1994.

Campanula americana L. (*Campanula acuminata* Michx.; *Campanula americana* Mill.; *Campanula americana* Hort. ex Steud.; *Campanula americana* f. *albiflora* M.L. Grant; *Campanula americana* f. *tubuliflora* Fernald; *Campanula americana* var. *illinoensis* (Fresen.) Farw.; *Campanula americana* var. *subulata* A. DC.; *Campanula asteroides* Lam.; *Campanula declinata* Moench; *Campanula illinoensis* Fresen.; *Campanula nitida* Aiton; *Campanula obliqua* Jacq.; *Campanula planiflora* Lam.; *Campanula subulata* P. Beauv. ex A. DC.; *Campanulastrum americanum* Small; *Campanulastrum americanum* (L.) Small; *Phyteuma americanum* Hill; *Specularia americana* (L.) Morgan ex J. James)

North America. Erect, herbaceous, hollow, slightly winged, milky sap, thick roots, corolla blue-purple, axillary flowers in upper portion of stems, flowers subtended by 3 foliaceous bracts, stigma purple slightly curved at apex

See *Species Plantarum* 1: 164. 1753, *Gard. Dict.*, ed. 8. n. 13. 1768, *Tabl. Encyc.* 2: 55. 1796, *Flora Boreali-Americana* 1: 108. 1803, *Monographie des Campanulées* 314, 344. 1830, *Index Seminum Hort. Bot. Francofurt.* [unpaged]. 1836, *Nomencl. Bot.* [Steudel], ed. 2. 1: 266. 1840, *Journal of the Cincinnati Society of Natural History* 7: 74. 1884 and *Flora of the Southeastern United States* 1141, 1338. 1903, *Report of the Michigan academy of science, arts and letters* 20: 191. 1918, *Rhodora* 44(528): 458. 1942, *Proc. Iowa Acad. Sci.* 60: 148. 1953

(For pulmonary ailments, cough, tuberculosis.)

in English: American bellflower, tall bellflower

Campanula aparinoides Pursh (*Campanula aparinoides* var. *erinoides* (Michx.) Alph.Wood; *Campanula aparinoides* var. *erinoides* Alph.Wood; *Campanula aparinoides* var. *grandiflora* Holz.; *Campanula aparinoides* var. *multiflora* A. DC.; *Campanula aparinoides* var. *rosea* Coleman; *Campanula aparinoides* var. *uliginosa* (Rydb.) Gleason; *Campanula erinoides* Michx.; *Campanula erinoides* Muhl., nom. illeg.; *Campanula uliginosa* Rydb.)

North America. Perennial herb, tangling, weak, short hooking bristles, pale blue to white flowers solitary nodding long-stalked funnel-shaped

See *Cat. Pl. Amer. Sept.*: 22. 1813, *Flora Americae Septentrionalis*; or, ... 1: 159. 1814[1813], *Monogr. Campan.*: 290. 1830, *Class-book Bot.* (ed. 1861). 479. 1861, *Kent Sci. Inst. Misc. Publ.* 2: 24. 1874, *Bull. Geol. Nat. Hist. Surv.* 9: 566. 1896 and *Manual of the Flora of the northern States and Canada* 885. 1901, *Phytologia* 4: 25. 1952

(Emetic, pectoral. Stem decoction taken to induce childbirth.)

in English: bedstraw flower, eastern marsh bellflower, marsh bellflower, marsh harebell, small vine

Campanula divaricata Michx. (*Campanula divaricata* f. *alba* Fosberg; *Campanula flexuosa* Michx.)

North America. Perennial herb, erect, slender, very numerous drooping flowers in compound panicles, corolla light blue, style long exserted

See *Fl. Bor.-Amer.* 1: 109. 1803, *Castanea* 20: 60. 1955

(Antidiarrheal, root infusion.)

in English: Appalachian bellflower, small bonny, small bonny bellflower, southern bellflower, southern bluebell, southern harebell

Campanula isophylla Moretti (*Campanula floribunda* Viv.; *Campanula isophylla* f. *alba* Voss; *Campanula mayi* auct.)

Italy.

See *Giorn. Fis.* II. vii. 44, 98. 1824, *Gard. Chron.*, III, 26: 96, 126. 1899

(Dermatitis, skin eruptions due to local irritants.)

Campanula latifolia L. (*Campanula eriocarpa* M. Bieb.; *Campanula latifolia* var. *canescens* Trautv.; *Campanula latifolia* var. *eriocarpa* (M. Bieb.) Fisch. ex A. DC.; *Campanula latifolia* var. *intermedia* Trautv.; *Campanula latifolia* var. *leiocarpa* Trautv.; *Campanula latifolia* var. *macrantha* Fisch. ex Sims; *Campanula macrantha* (Fisch. ex Sims) Hook.; *Campanula macrantha* var. *polyantha* Hook.; *Drymocodon latifolium* (L.) Fourr.; *Trachelioides latifolia* (L.) Opiz)

Europe, Himalaya. Perennial herb, clump-forming, light blue flower

See *Species Plantarum* 1: 165. 1753, *Flora Taurico-Caucasica* 1: 149. 1808, *Monographie des Campanulées* 265. 1830, *Bot. Mag.* 61: t. 3347. 1834, *Ann. Soc. Linn. Lyon*, n.s., 17: 111. 1869

(Flowers emetic.)

in English: bellflower, giant bellflower, great bellflower, large campanula, wide-leaved bellflower

Campanula medium L. (*Campanula bourdiniana* Gand.; *Campanula florida* Salisb.; *Campanula grandiflora* Lam., nom. illeg.; *Campanula grandiflorum* Lam.; *Campanula medium* Lapeyr.; *Campanula medium* f. *alba* Voss; *Campanula medium* f. *caesia* Voss; *Campanula medium* f. *calycantha* Voss; *Campanula medium* f. *coerulea* Voss; *Campanula medium* f. *rosea* Voss; *Campanula medium* f. *striata* Voss; *Campanula medium* var. *bourdiniana* (Gand.) Nyman; *Campanula medium* var. *calycanthema* Nicholls; *Campanula meyeriana* Rupr.; *Campanula saxifraga* M. Bieb. subsp. *meyerana* (Rupr.) Ogan.; *Marianthemum medium* (L.) Schur; *Medium grandiflorum* Spach; *Medium*

grandiflorum (Lam.) Fourr.; *Rapuntia medium* (L.) Chevall.; *Sykoraea hortensis* Opiz; *Talanelis medium* (L.) Raf.)

Europe, Belgium. Evergreen herb

See *Species Plantarum* 1: 167. 1753, *Flore Française*. Troisième Édition 3: 706. 1805, *Flora Taurico-Caucasica* 1: 155. 1808, *Hist. Nat. Vég.* (Spach) 9: 553. 1840, *Bull. Acad. Petersb.* 11: 207. 1867, *Ann. Soc. Linn. Lyon*, sér. 2 17: 111. 1869 and *Bot. Zurn.* 78 (3): 148. 1993

(Dermatitis, contact sensitivity, skin eruptions due to local irritants. For throat problems.)

in English: Canterbury bells

Campanula pallida Wall. (*Campanula colorata* Wall.; *Campanula colorata* var. *moorcroftiana* A. DC.; *Campanula colorata* var. *ramulosa* (Wall.) Hook. f. & Thomsen; *Campanula colorata* var. *tibetica* Hook. f. & Thomson; *Campanula himalayensis* Klotzsch; *Campanula hoffmeisteri* Klotzsch; *Campanula microcarpa* C.Y. Wu; *Campanula nepetifolia* Levl. & Van; *Campanula pallida* var. *tibetica* (Hook. f. & Thomson) Hara; *Campanula ramulosa* Wall.; *Prismatocarpus nitidus* L'Hér. var. *ovatus* Adamson; *Prismatocarpus pauciflorus* Adamson)

India, Himalaya.

See *Asiatic Researches* 13: 375. 1820, *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall. 2: 100–102. 1824, *A Numerical List of Dried Specimens* [Wallich] n. 1286. 1829, *Monographie des Campanulées* 293. 1830, *Journal of the Proceedings of the Linnean Society* 2: 23. 1858, *Bot. Ergebn. Reise Waldemar* 73–74. 1862 and *Journal of South African Botany* 17: 120, 126. 1951, *Taxon* 25: 631–649. 1976

(Stem decoction taken by women to induce childbirth.)

Campanula parryi A. Gray (*Campanula langsdorffiana* A. Gray, nom. illeg.; *Campanula parryi* var. *idahoensis* McVaugh; *Campanula parryi* var. *parryi*; *Campanula planiflora* Engelm., nom. illeg.; *Campanula rentonae* Senior; *Campanula rentoniae* Senior)

North America. Perennial, single purple erect flower

See *Encycl.* (Lamarck) 1(2): 580. 1785, *Enum. Pl.* [Willdenow] 1: 210. 1809, *Amer. J. Sci. Arts*, II, 34: 254. 1862, *Synoptical Flora of North America* 2(1): 395. 1878, *Bot. North America, Europe. Perennial herb, taprooted, erect, round basal leaves, deep purplish blue nodding flowers in racemes, sepals spreading, deer resistant

See *Species Plantarum* 1: 164–165. 1753, *Prodr.* (DC.) 7(2): 484. 1839 and *Magyar Bot. Lapok* 29: 157–158, 165, 169–171, 174–175. 1930, *Magyar Bot. Lapok* 33: 128, 130, 241. 1934, *Acta Bot. Acad. Sci. Hung.* 12: 365–366. 1966, *Mitt. Bot. Staatssamml. München* 8: 213. 1970, *Fragm. Florist. Geobot.* 17: 231, 233. 1971, *Fl. Great Britain & Ireland* 4: 530. 2006

(Antifungal, anti-depressant, cytotoxic, antimicrobial, antiviral, sedative, disinfectant. Root chewed for heart and lung problems, an infusion used as ear drops. Magic, ceremonial, associated with fairies and witches, the juice was an element in some of the witches ‘flying ointments’, rubbed on the body of those bothered by witches.)

in English: aul man’s bells, bellflower, blaewort, blaver, blue blavers, bluebell, bluebell of Scotland, cuckoo’s hood, cuckoo’s thimbles, dead man’s bells, dead men’s bells, devil’s bells, fairies’ thimbles, harebell, lady’s thimble, milk-ort, thimbles, old man’s bells, Scotch bellflower, Scottish bluebell, witch bells, witch’s thimbles

Campanula uniflora L. (*Campanula uniflora* Georgi; *Campanula uniflora* Gorter; *Campanula uniflora* Honck.; *Campanula uniflora* Schult.; *Campanula uniflora* Vill.)

Northern hemisphere, North America. Perennial herb, taprooted, erect or decumbent, small blue solitary flowers slightly nodding at anthesis, narrow sepals and five fused bell-shaped campanulate petals

See *Species Plantarum* 1: 163. 1753, *Prosp. Hist. Pl. Dauphiné* 22. 1779 and *Annals of the Missouri Botanical Garden* 2(1/2, Anniversary Proceedings): 59–108. 1915

(Ceremonial, ritual.)

in English: alpine bluebell, arctic bellflower

Campanumoea Blume Campanulaceae

Resembling a *campana* ‘a bell’, Greek *homoios*, *homios* ‘resembling, similar’, see *Bijdr. Fl. Ned. Ind.* 13: 726. 1826 [24 Jan 1826], *Notul.* iv. 277. 1854.

Campanumoea javanica Blume subsp. *javanica* (*Campanula javanica* (Blume) D. Dietr.; *Campanumoea cordata* Maxim.; *Campanumoea cordata* Miq.; *Campanumoea javanica* Blume; *Campanumoea labordei* H. Lévl.; *Codonopsis cordata* Hassk.; *Codonopsis cordifolia* Kom.; *Codonopsis javanica* (Blume) Hook.f. & Thomson; *Codonopsis javanica* Hook.f. & Thomson; *Codonopsis javanica* (Blume) Hook.f.)

Himalaya, Japan. Perennial climber, herbaceous vine, flowers light yellowish-green

See *Flora Indica*; or descriptions of Indian Plants 2: 103. 1824, *Bijdragen tot de flora van Nederlandsch Indië* (13): 727. 1826, *Syn. Pl.* 1: 759. 1839, *Ill. Himal. Pl.*: t. 16 B. 1855, *Natuurwetenschappelijk Tijdschrift* 10: 9. 1856, *Flora van Nederlandsch Indië* 2: 566. 1857, *Bulletin de l'Académie Impériale des Sciences de Saint-Petersbourg* 12: 68. 1868 and *Bulletin de la Société d'Agriculture, Sciences et Arts de la Sarthe* 39: 323. 1904

(Roots diuretic, expectorant, lactogenic, stomachic, used for anemia, jaundice, dyspepsia, diarrhea, nephritis, hemorrhoids, edema and diseases of the lymphatic system.)

Camptosperma Thwaites Anacardiaceae

Greek *kamptos* 'curved', *kampto* 'to bend, to turn', and *sperma* 'seed', see *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 65. 1854 and *Adansonia*, Sér. 3 20(2): 285–293. 1998 [A revision of *Camptosperma* (Anacardiaceae) in Madagascar.], *Economic Botany* 57(3): 354–364. 2003.

Camptosperma auriculatum (Bl.) Hook. f. (*Buchanania auriculata* Bl.; *Buchanania oxyrhachis* Miq.; *Camptosperma auriculata* Hook.f.; *Camptosperma auriculatum* var. *wallichii* (King) Ridl.; *Camptosperma griffithii* (non Marchand) Hook.f.; *Camptosperma oxyrhachis* Engl.; *Camptosperma wallichii* King)

India, Indonesia. Trees, flat-topped crown, inner bark reddish, spiral arrangements of the leaves, unisexual flowers, reddish-purple drupe

See *Fl. Brit. India* [J.D. Hooker] 2: 41. 1876

(Wood sap may cause dermatitis, sap from the wood can be harmful to people. Antiplasmodial, leishmanicidal and antitrypanosomal.)

in English: terentang-oil

in Borneo: hamtangen, manlanga, tapau

in Indonesia: madang rimuëng

in Malaysia: serantang, serentang, telatang, telatang pelanuk, terentang, terentang daun besar

Camptosperma brevipetiolatum Volkens (*Camptosperma brevipetiolata* Volk.)

Indonesia, Pacific.

See *Botanische Jahrbucher für Systematik, Pflanzengeschichte und Pflanzengeographie* 31: 466. 1902, *J. Arnold Arbor.* 22: 535. 1941, *Flora Malesiana*, Series 1, 530, Fig. 59. 1978

(Oil, mixed with soot, an application to the body in order to give protection from lice and fleas. Antiplasmodial, leishmanicidal and antitrypanosomal.)

in English: tigaso-oil

Camptosperma coriaceum (Jack) Hallier f. ex Steenis (*Buchanania macrophylla* Bl.; *Buchanania racemiflora* Miq.; *Camptosperma griffithii* Marchand; *Camptosperma macrophylla* (Blume) Hook f.; *Coelopyrum coriaceum* Jack)

See *Malayan Miscellanies* 2(7): 65. 1822 and *Fl. Males. Bull.* 1(3): 74. 1948

(The wood sap of this tree may cause dermatitis. Antiplasmodial, leishmanicidal and antitrypanosomal.)

in Borneo: terentang paya, terentang

in Malaysia: ambacang rawang, cedrol, hotong otan, huasum, kaauwe, kelinting, melumut, meranti daun lebar, nangprong, oreywood, paul lebu, sangtrang, serentang, terentang, terentang malung, terentang simpoh, tumus, terentang kelintang

Camptosperma macrophylla Hook. f. (*Camptosperma macrophylla* (Blume) Hook f.)

SE Asia.

See *Fl. Brit. India* [J.D. Hooker] 2: 41. 1876

(The wood sap of this tree may cause dermatitis.)

in Malaysia: serantang, serentang, telatang, telatang, terentang

Camptosperma minus Corner

SE Asia, Malaysia.

See *Gard. Bull. Straits Settle.* 10: 255. 1939

(The wood sap of this tree may cause dermatitis.)

Common name: terentang jantung

Camptosperma panamense Standl. (*Camptosperma panamensis* Standl.)

South America. Tree, erect, straight, watery latex, stilt roots, greenish cream flowers

See *Journal of the Arnold Arboretum* 2(2): 111–112. 1920, *Flora of Ecuador* 30: 9–50. 1987, *Ceiba* 23(2): 85–92. 1979, *Journal of Ethnopharmacology* 78(2–3): 193–200. 2001, *Fitoterapia* 75(7–8): 764–767. 2004, *Proceedings of the California Academy of Sciences*, Series 4, 57(7): 247–355. 2006

(The plant showed good or very good antiprotozoal activity in vitro, antimalarial and leishmanicidal.)

in English: orey wood

in South America: auree, aures, hoary, laulu, miskitia, nusmas, orey, ori, ori-gria, orin, sajo, vaquerá

Campomanesia Ruiz & Pav. Myrtaceae

For the Spanish diplomatist Pedro Rodríguez Campománes y Sorrida, 1723–1803, jurist, studied political economy, member of the Philosophical Society of Philadelphia, Director of the Royal Academy of History at Madrid, among his works are *Dissertationes historicas del orden y cavalleria de los Templarios*. Madrid 1747, *Itinerario de las Carreras de Posta de dentro y fuera del Reyno*. Madrid 1761, *Tratado de la Regalia de Amortizacion*. Madrid 1765 and *Tratado de la Regalia de España*. ... Lo publica del manuscrito original ... Don V. Salvà. Paris 1830; see *Florae Peruvianaes, et Chilensis Prodrum* 72. 1794, *Systema Vegetabilium Florae Peruvianaes et Chilensis* 128. 1798, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 150. 1852, *Linnaea* 27(2–3): 348–349. 1854[1856], *Die Natürlichen Pflanzenfamilien* 3(7): 73. 1893, *Enumeratio Myrtacearum Brasiliensium* 8. 1893 and *Fl. Suriname* 3: 56–158. 1951, *Fl. Guayane Française* 3: 138–167. 1953, *Field Mus. Nat. Hist., Bot. Ser.* 13(4/2): 569–818. 1958, *Loefgrenia* 26: 18, 22, 26, 28, 35. 1967, *Mem. New York Bot. South America, Trinidad. Shrub, edible fruit

See *Histoire des plantes de la Guiane Française* 1: 485. 1775, *Prodrum Plantarum Indiae Occidentalis* 44. 1825, *Sylva Tellur.* 106. 1828, *Prodrum Systematis Naturalis Regni Vegetabilis* 3: 236, 240, 263, 268. 1828, *Linnaea* 27: 198, 432. 1856, *Flora Brasiliensis* 14(1): 435, 444, 453. 1857, *Flora Brasiliensis* 14(1): 610. 1859, *Flora of the British West Indian Islands* 242. 1860, *Enum. Myrt. Bras.*: 15–16. 1893, *Revisio Generum Plantarum* 3(3): 91. 1898 and *Candollea* 5: 394. 1934

(Leaves for vaginal steam bath.)

in English: guava strawberry, guavaberry

in South America: andoya, guayabita arrayana, guayabita de arrayan

Campomanesia lineatifolia Ruiz & Pav. (*Campomanesia cornifolia* Kunth; *Campomanesia rivularis* (Mart. ex DC.) Nied.; *Campomanesia rivularis* (DC.) Nied.; *Psidium lineatifolium* (Ruiz & Pav.) Pers.; *Psidium rivulare* Mart. ex DC.; *Psidium rivulare* DC.)

South America. Small tree or shrub, aromatic, yellow skinned edible fruit

See *Systema Vegetabilium Florae Peruvianaes et Chilensis* 128. 1798, *Synopsis Plantarum* 2: 27. 1806, *Nov. Gen. Sp.* 6: 150. 1823, *Prodrum Systematis Naturalis Regni Vegetabilis* 3: 233. 1828, *Nat. Pflanzenfam.* 3(7): 73. 1893 and *Phytochemistry* 66(14): 1736–1740. 2005

(Antimicrobial.)

in South America: arani ma'nya, chamba, champa, gabiroba, guabiraba, guabiroba, guayaba de leche, masika ma'nya, michinche, palillo, palillo caspi

Campomanesia phaea (O. Berg) Landrum (*Abbevillea phaea* O. Berg; *Campomanesia phaea* (O. Berg) Mattos; *Campomanesia phaea* var. *lauroana* (Mattos) Mattos;

Paivaea langsdorffii O. Berg; *Paivaea langsdorffii* var. *lauroana* Mattos; *Paivaea phaea* (O. Berg) Mattos; *Paivaea phaea* var. *lauroana* (Mattos) Mattos

Brazil. Small tree, white flowers, edible fruit

See *Fl. Bras.* (Martius) 14(1): 435. 1857, *Fl. Bras.* 14(1): 614. 1859 and *Brittonia* 36(3): 241. 1984, *Loefgrenia* 90: 4. 1989, *Loefgrenia* 94: 8. 1989, *Loefgrenia* 99: 6. 1990, *Loefgrenia* 110: 1. 1997

(Bark astringent, antioxidant.)

in Brazil: cambuci

Campomanesia xanthocarpa O. Berg (*Campomanesia xanthocarpa* (Mart.) O. Berg; *Eugenia xanthocarpa* Mart.)

Brazil. Tree, green-yellow skinned fruit, essential oil

See *Species Plantarum* 1: 470–471. 1753, *Flora Peruviana, et Chilensis Prodrum* 72. 1794, *Syst. Nat. Med. Veg. Bras.* 31, 62. 1843, *Flora Brasiliensis* 14(1): 451. 1857 and *Fl. Neotrop.* 45: 66–70. 1986, *Phytotherapy Research* 17(3): 269–273. 2003, *J. Ethnopharmacol.* 93(2–3): 385–389. 2004, *Journal of Ethnopharmacology* 94(1): 55–57. 2004

(Astringent, antidiarrheal, mutagenic, for ulcer and hypercholesterolemia treatment. Leaves infusion taken for parasitosis, stomachache and diarrhea; an infusion of *Campomanesia xanthocarpa* leaves and the herb *Cuphea carthagenensis* (Jacq.) J.F. Macbr. (Lythraceae) (*sete-sangrias*) used for weight control, to treat obesity, high levels of cholesterol and triglycerides.)

in South America: gabirola, gabirolbeira, guabirá, guabirola, guabirola do campo, guabirola-do-mato, guabirolbeira (= yb-mbe-yrob = árvores de casca amarga = trees with bitter bark; see Luíz Caldas Tibiriçá, *Dicionário Tupi-Português*. Traço Editora, Liberdade 1984), guabirolbeira do mato, guariba, guariroba, guavira, guavira pyta, guaviroveira, guayabito, guayabo de leche, guayubirá

Campsandra Benth. Fabaceae (Caesalpiniaceae, Caesalpinieae, Leguminosae)

From the Greek *kampsis* ‘bending, a bend’ and *aner, andros* ‘male, anther, stamen, man’, see *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 2(10): 93–94. 1840, *Fl. Brasiliensis* (Martius) 15(2): 1–254, t. 1–66. 1870 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3/1): 1–506. 1943, *Memoirs of the New York Botanical Garden* 8(2): 103–119. 1953, *Mem. New York Bot. Gard.* 10(4): 65–87. 1961, *Mem. New York Bot. Gard.* 15(1): 112–128. 1966, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Campsandra angustifolia Spruce ex Benth. (*Campsandra angustifolia* Benth.)

Tropical America. Perennial non-climbing tree, small white pinkish fragrant flowers with red stamens, large bean pod

See *Flora Brasiliensis* (Martius) 15(2): 55. 1870

(Febrifuge, vulnerary, antirheumatic, antiarthritic, anti-ulcer, astringent, for malarial fever, arthritis and rheumatism, sores and ulcers, wounds, diarrhea.)

in English: authentic huacapurana, chigo-flour

in South America: acapu de igapo, acapu do igapo, acapurana, amanagwe, apikara, caacapoc, chigo, comanda assu, cumandá, gapo, huacapu-rana, huacapurana, pampa-huacapu-rana, pampa huacapurana, pimakaru'ywa

Campsandra comosa Benth. var. ***laurifolia*** (Benth.) R.S. Cowan (*Campsandra comosa* Benth.; *Campsandra implexicaulis* Stergios; *Campsandra laurifolia* Benth.; *Campsandra rosea* Poepp.; *Campsandra rosea* Poepp. & Endl.)

South America, Brazil. Perennial non-climbing tree, small tree or shrub, white corolla

See *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 94. 1840, *Nova Genera ac Species Plantarum* (Poeppig & Endlicher) 3: 62. 1845 and *Memoirs of the New York Botanical Garden* 8(2): 112. 1953, *Novon* 6(4): 437, 439–441, 448–450, f. 1A, 2. 1996

(Bark infusion antimalarial, vulnerary, tonic, astringent, antirheumatic, postpartum tonic, treating fever, sores and ulcers, wounds, dysentery, malaria, dysentery, arthrosis.)

in South America: acapu de igapo, acapurana, amanagwe, caacapoc, chiga, chigo, comanda assu, cumandá, gapo, huacapu-rana, huacapurana, pampa-huacapu-rana, pampa huacapurana

Campsandra guayanensis Stergios

Venezuela. Perennial non-climbing tree

See *Novon* 6(4): 447–448. 1996, *Journal of Natural Products* 69(2): 240–246. 2006

(Febrifuge, vulnerary, antirheumatic, anti-ulcer, astringent, for malarial fever, arthritis and rheumatism, diarrhea.)

Campsis Lour. Bignoniaceae

Greek *kampsis* ‘bending, a bend’, *kampe* ‘bending, bend, flexure, something bend’, *kampsos* ‘crooked, bent’, referring to the stamens; see J. de Loureiro, *Flora cochinchinensis*. 358, 377. 1790.

Campsis grandiflora (Thunberg) Schumann (*Bignonia chinensis* Lamarck; *Bignonia grandiflora* Thunberg; *Campsis adrepens* Loureiro; *Campsis chinensis* (Lam.) Voss; *Tecoma chinensis* (Lam.) K. Koch; *Tecoma grandiflora* Loisel.; *Tecoma grandiflora* (Thunb.) Loisel.)

China, Japan. Woody vine, creeping, scandent, deciduous, few aerial roots, large orange-red trumpet shaped flowers grouped in terminal clusters, flattened pods, winged seeds

See *Flora Japonica*, ... 253. 1784, *Flora Cochinchinensis* 2: 358, 377–378. 1790, *Dendrologie* 2(1): 307. 1872, *Die Natürlichen Pflanzenfamilien* 4(3b): 230. 1894 and Jin, Jing Ling et al. “Anti-platelet pentacyclic triterpenoids from leaves of *Campsis grandiflora*.” *Archives of Pharmacological Research* 27(4): 376–380. 2004, *Arch. Pharm. Res.* 28: 550–556. 2005, *Planta Med.* 71: 578–580. 2005, *Journal of Pharmaceutical and Allied Sciences* 3(1): 274–278. 2005, *Journal of Ethnopharmacology* 103(2): 223–228. 2006

(Used in Ayurveda. Pollen considered harmful to humans. Flowers antioxidative, antiinflammatory, carminative, depurative, diuretic, abortifacient, tonic and febrifuge, emmenagogue, used for women’s complaints, diabetes, acne, inflammation related to skin disorders, acute skin inflammation; flowers decoction for menstrual disorders, rheumatoid pains, traumatic injuries, difficult urination, itching. Flowers, leaves and roots used to promote blood circulation and remove blood stasis in diseases caused by blood stagnation; flowers and leaves antidiabetic; leaves with pesticidal, larvicidal and insecticidal activities.)

in English: Chinese trumpet creeper, Chinese trumpet flower, Chinese trumpet vine, Indian trumpet creeper, trumpet creeper, trumpet vine

in China: ling hsiao, ling hsiao hua, ling tiao, ling xiao, ling xiao hua, tzu wei

in India: delaun, rohitakalata

in Japan: nôzen-kazura

in Nepal: ghata puspa lata

Campsis radicans (L.) Bureau (*Bignonia radicans* L.; *Campsis radicans* (L.) Seem.; *Gelsemium radicans* (L.) Kuntze; *Gelsemium radicans* Kuntze; *Tecoma radicans* (L.) Juss.)

North America. Woody vine, tubular orange-yellow to red flowers in clusters, elongated slender capsule with many winged seeds

See *Species Plantarum* 2: 624–625. 1753, *Genera Plantarum* 139. 1789, *Monographie des Bignoniacées*. 2e these 2(Atlas): 16. 1864, *Journal of Botany, British and Foreign* 5: 372. 1867, *Revisio Generum Plantarum* 2: 479. 1891

(Leaves and flowers poisonous, low toxicity if eaten; skin irritation with redness and swelling.)

in English: cow-itch, trumpet creeper, trumpet honeysuckle, trumpet vine

Camptosema Hook. & Arn. Fabaceae (Phaseoleae)

Greek *kamptos* ‘curved’ and *sema* ‘standard, a sign, mark’, see *Botanical Miscellany* 3: 200. 1833 and *Darwiniana* 4(2–3): 323–331. 1942, *Darwiniana* 16(1–2): 175–218. 1970.

Camptosema paraguariense (Chodat & Hassl.) Hassl. var. ***parviflorum*** Hassl. (*Camptosema paraguariense* Hassl. var. *parviflorum* Hassl.)

South America. Shrub

See *Bulletin de l’Herbier Boissier*, sér. 2, 4(9): 900. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 16: 228. 1919, *Economic Botany* 31(3): 302–306. 1977

(A contraceptive, the decoction of leaves, branches and roots.)

Camptotheca Decne. Cornaceae (Nyssaceae)

Greek *kamptos* ‘curved, bent’ and *theke* ‘a case’, see *Bulletin de la Société Botanique de France* 20: 157. 1873.

Camptotheca acuminata Decne. (*Camptotheca acuminata* var. *rotundifolia* B.M. Yang & L.D. Duan; *Camptotheca acuminata* var. *tenuifolia* W.P. Fang & Soong; *Camptotheca yunnanensis* Dode)

China.

See *Bulletin de la Société Botanique de France* 55: 651, f. c. 1908, *Acta Phytotaxonomica Sinica* 13(2): 86, pl. 14, f. 3. 1975, *Nat. Sci. J. Hunan Norm. Univ.* 11(1): 63–63. 1988, *Ethnobotany* 11: 85–91. 1999, *Phytochemistry* 65(20): 2735–2749, *Current Pharmaceutical Biotechnology* 8(4): 196–202. 2007, *BMC Plant Biology* 10: 69. 2010

(A major natural source of the terpenoid indole alkaloid camptothecin, two semi-synthetic derivatives, topotecan and irinotecan, are currently prescribed as anticancer drugs.)

in English: China’s tree of joy

Campylandra Baker Asparagaceae (Convallariaceae, Liliaceae)

From the Greek *kampylos* ‘curved’ and *aner, andros* ‘male, anther’, see *Flora Telluriana* 4: 15. 1836[1838], *J. Linn. Soc., Bot.* 14: 582, t. 20. 1875.

Campylandra aurantiaca Baker (*Rohdea aurantiaca* (Baker) N. Tanaka; *Rohdea aurantiaca* (Baker) Yamashita & M.N. Tamura; *Tilcusta nepalensis* Raf.; *Tupistra aurantiaca* (Baker) Wall. ex Hook.f.)

India, Himalaya. Erect herb

See *Fl. Tellur.* 4: 15. 1838, *Journ. Linn. Soc., Bot.* 14: 582. 1875, *Fl. Brit. India* 6: 325. 1892 and *Novon* 13(3): 331. 2003, *Journal of Plant Research. Botanical Society of Japan.* Tokyo 117(5): 369. 2004

(Flowers cooked as vegetable and eaten as a postpartum remedy and blood purifier, to cure general body pain, diabetes. Roots febrifuge.)

in India: nakima, thullo nakima

Campylospermum Tieghem Ochnaceae

Greek *kampylos* 'curved' and *sperma* 'seed', see *Histoire des plantes de la Guiane Française* 1: 397, pl. 152. 1775, *Genera Plantarum* 291. 1789, *Annales du muséum national d'histoire naturelle* 17: 415. 1811 and *J. Bot.* (Morot) 16: 35, 202. 1902, *Taxon* 16: 421. 1967, *Candollea* 23: 177–228. 1968.

Campylospermum flavum Farron (*Campylospermum flavum* (Schumach.) Farron; *Gomphia flava* Schumach.; *Gomphia flava* Schumach. & Thonn.; *Monelasmum flavum* Tiegh.; *Ouratea flava* Hutch. & Dalziel ex Stapf; *Ouratea flava* (Schumach. & Thonn.) Hutch. & Dalziel ex Stapf; *Ouratea laurentii* De Wild.)

Nigeria, Gabon. Treelet or shrub, coriaceous leaves, yellow flowers

See *Beskrivelse af Guineiske planter* 216–217. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 236–237. 1828 and *Revue de Zoologie et de Botanique Africaines* 7, Suppl. Bot.: B57. 1920, *Botanical Magazine* 149: t. 9023. 1924, *Bulletin du Jardin Botanique de l'État Bruxelles* 35: 397. 1965

(Leaves laxative, stomachic. Leaves and roots for snakebite.)

in Nigeria: akpagha

Campylospermum squamosum (A. DC.) Farron (*Gomphia squamosa* A. DC.; *Ochna squamosa* Kuntze; *Ouratea squamosa* Engl.; *Ouratea squamosa* (A. DC.) Engl.)

Gambia, Nigeria. Straggling shrub or small tree, bright yellow flowers solitary or in bunches, fruit composed of 5 drupelets

See *Annales du muséum national d'histoire naturelle* 17: 418. 1811, *Flora Brasiliensis* (Martius) 12(2): 318. 1876, *Revis. Gen. Pl.* 1: 106. 1891 and *Bulletin du Jardin Botanique de l'État Bruxelles* 35: 402. 1965

(Bark or pounded leaves used in poultices to relieve bodypain.)

Campylotropis Bunge Fabaceae (Desmodieae, Leguminosae)

From the Greek *kampylos* 'curved, bent' and *tropis*, *tropidos* 'a keel, the keel of a vessel', referring to the shape of the flowers, to the curved keel of the flowers, see *Pl. Monghol.-Chin.* 6. 1835 and *Annals of the Missouri Botanical Garden* 78(2): 338–358. 1991.

Campylotropis bonatiana (Pampanini) Schindler (*Campylotropis bonatiana* Schindler; *Campylotropis franchetiana* Lingelsheim & Borza; *Campylotropis trigonoclada* (Franchet) Schindler var. *bonatiana* (Pampanini) Iokawa & H. Ohashi; *Lespedeza bonatiana* Pampanini)

China.

See *Flora Boreali-Americana* 2: 70–71, pl. 39–40. 1803 and *Nuovo Giornale Botanico Italiano*, new series 17(1): 19–21, f. 6. 1910, *Repert. Spec. Nov. Regni Veg.* 11(296–300): 429. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 13(370–372): 387. 1914, *Acta Phytotax. Sin.* 30(4): 346–348. 1992

(Whole plant used for treating strokes, influenza, nephritis and skin diseases. Ointment.)

in China: ma niao teng

Campylotropis delavayi (Franchet) Schindler (*Campylotropis delavayi* Schindler; *Lespedeza atrokermesina* Forrest; *Lespedeza atrokermesina* W.W. Sm.; *Lespedeza delavayi* Franch.)

China. Shrub, purple corolla

See *Flora Boreali-Americana* 2: 70–71, pl. 39–40. 1803, *Pl. Monghol.-Chin.* 6. 1835, *Rev. Hort.* 225, f. 70. 1890, *Plantae Delavayanae* 165. 1890 and *Repert. Spec. Nov. Regni Veg.* 11(296–300): 426. 1912, *Notes from the Royal Botanic Garden, Edinburgh* 10(46): 44. 1917

(Root febrifuge.)

in China: xi nan hang zi shao

Campylotropis hirtella (Franch.) Schindl. (*Campylotropis hirtella* Schindler; *Lespedeza hirtella* Franch.; *Lespedeza mairei* Pamp.)

China.

See *Plantae Delavayanae* 167. 1890 and *Nuovo Giornale Botanico Italiano*, new series 17(1): 22–23, f. 7. 1910, *Repert. Spec. Nov. Regni Veg.* 11(296–300): 428. 1912, *J. Agric. Food Chem.* 56(16): 6928–6935. 2008, *Chemical & pharmaceutical bulletin* (The Pharmaceutical Society of Japan) 56(9): 1338–1341. 2008, *Natural Product Research* 22(11): 990–995. 2008, *Bioorganic & Medicinal Chemistry Letters* 19(13): 3389–3391. 2009

(Dried roots used for the treatment of benign prostate hyperplasia. Immunosuppressive activity.)

Campylotropis pinetorum (Kurz) Schindl. subsp. *velutinum* (Dunn) H. Ohashi (*Campylotropis pinetorum* (Kurz) Schindl. subsp. *velutina* (Dunn) H. Ohashi; *Campylotropis velutina* (Dunn) Schindler; *Campylotropis velutina* Schindler; *Lespedeza pinetorum* auct. non Kurz; *Lespedeza velutina* Dunn; *Millettia cavaleriei* H. Lévy)

China. Perennial non-climbing shrub

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 230. 1873 and *Hooker's Icones Plantarum* 27(4): pl. 2700. 1901, *Repertorium Specierum Novarum Regni Vegetabilis* 11(296–300): 429. 1912, *Flore du Kouy-Tchéou* 238. 1914, *Repertorium Specierum Novarum Regni Vegetabilis* 20(561–576): 286. 1924, *J. Jap. Bot.* 49(2): 43–44. 1974, *Acta Phytotax. Sin.* 30(4): 346–348. 1992

(Root astringent and pain reliever.)

in China: mian nan hang zi shao, rong mao hang zi shao

Campylotropis polyantha (Franchet) Schindler
(*Campylotropis muehleana* (Schindler) Schindler;
Campylotropis neglecta Schindl.; *Campylotropis polyantha*
f. *macrophylla* P.Y. Fu; *Campylotropis polyantha* f. *souliei*

Novarum Regni Vegetabilis 11(296–300): 430–431. 1912,
Acta Phytotaxonomica Sinica 30(4): 346–348. 1992

(Whole plant used for reducing fever and relieving coughs.
Root for treating mastitis and stroke.)

in China: san leng zhi hang zhi shao

Cananga (DC.) Hook.f. & Thomson Annonaceae

From the Malayan vernacular name, *kenanga*; see *Hist. Pl.*
Guiane 1: 607, t. 244. 1775, *Syst. Nat.* (Candolle) 1: 485.
1817, *Flora Indica*: being a systematic account of the plants
. . . 129–130. 1855, *Histoire des Plantes* 1: 213. 1868 and
Fieldiana, Bot. 24(4): 270–294. 1946, *Ceiba* 44(2): 105–268.
2003 [2005].

Cananga latifolia (Hook.f. & Thomson) Finet & Gagnepain
(*Cananga latifolia* Finet & Gagnep.; *Canangium latifolium*
(Hook.f. & Thomson) Ridley; *Unona brandisana* Pierre;
Unona latifolia Hook.f. & Thomson)

Myanmar, Thailand, Malaysia. Tree, grey shaggy bark, alter-
nate soft velvety aromatic leaves, inflorescence a raceme with
fragrant flowers, sepals 3, lanceolate greenish petals, fruit of
many separate hairy carpels, flowers can be used like those
of ylang-ylang

See *Bulletin de la Société Botanique de France* 53, Mém.
4(2): 84. 1906, *Cytologia* 55: 187–196. 1990, *Journal of*
Ethnopharmacology 107(1): 12–18. 2006

(Wood infusion febrifuge, antiplasmodial; bark a remedy for dizziness.)

in Cambodia: chker sreng

in China: da ye yi lan

in Laos: may ka seng

in Malaysia: kenanga, tho shui tree

in Thailand: khae saeng, nao, raap, sakae saeng

in Vietnam: c[aa]y tai nghe, th[oo]m shui, s[uw] t[aa]y

Cananga odorata (Lam.) Hook.f. & Thomson (*Cananga odorata* Hook.f. & Thomson; *Cananga scortechinii* King; *Canangium fruticosum* Craib; *Canangium odoratum* (Lam.) Baill. ex King; *Canangium odoratum* (Lam.) Baillon; *Unona odorata* (Lam.) Dun.; *Unona odorata* (Lam.) Baill.; *Uvaria axillaris* Roxb.; *Uvaria odorata* Lam.)

Australia, Pacific islands, SE Asia. Tree, evergreen, straggling, pendulous, pale yellow-green sweetly fragrant flowers on short leafless axillary shoots, flowers hang in loose bunches, fruits dark green, brown seeds embedded in yellow oily pulp

See *Species Plantarum* 536. 1753, *Supplementum Plantarum* 44, 270. 1782, *Encyclopédie Méthodique, Botanique* 1(2): 595. 1785, *Genera Plantarum* 283. 1789, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 61(2): 41–42. 1892 and *Flore de Madagascar et des Comores* 78: 1–103. 1958, *Taxon* 31: 576–579. 1982, *Plant Systematics and Evolution* 144: 165–177. 1984, *Plant Systematics and Evolution* 159: 49–79. 1988, *Parasitol. (Antibacterial, antifungal.)

in English: shrubby cananga

in Thailand: kradang nga songkhla

Canarina L. Campanulaceae

From the Canary Islands, see *Mantissa Plantarum Altera* 2: 148, 225, 588. 1771 and *Ind. Gen. Vasc. Pl.* 1753–74 (Regn. Veg.li.) 36. 1967.

Canarina eminii Asch. & Schweinf. (*Canarina elegantissima* T.C.E. Fr.; *Canarina eminii* Asch. ex Schweinf.; *Canarina eminii* Asch. & Schweinf. var. *elgonensis* T.C.E. Fries)

Tropical Africa. Epiphytic or terrestrial, erect or scandent, climber, pendent, herbaceous, weak stem, thick root, latex when cut, funnel-shaped corolla pink yellow-orange with red-purple lines, stems and petioles eaten

See *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1892: 173. 1892 and *Notizbl. Bot. Gart. Berlin-Dahlem* 8: 392, 395. 1923, *International Journal of Primatology* 26(6): 1345–1373. 2005

(For psychosis, madness. Magic, ritual.)

in Rwanda: umuhurura

Canarium L. Burseraceae

From the Moluccan vernacular name *kanari* or *kenari*; see C. Linnaeus (1707–1778), *Amoenitates academicae*. 4: 121, 143, adnot. Holmiae [Stockholm] et Lipsiae [Leipzig] 1749[–1769] and Herman Johannes Lam (1892–1977), “The Burseraceae of the Malay Archipelago and Peninsula, with annotations concerning extra-Malayan species especially of *Dacryodes*, *Santiria* and *Canarium*.” *Bull. Jard. Bot. Buitenzorg*, sér. III. 12(3–4): 281–561, pl. 1–14. 1932.

Canarium album (Lour.) Raeusch. (*Canarium album* Raeusch.; *Pimela alba* Lour.)

SE Asia, China, Vietnam. Tree, white aromatic resinous sticky sap, yellowish-green flowers in axillary raceme, raw fruit edible, douc langurs (*Pygathrix nemaeus* L.) eat the leaves and fruits

See *Flora Cochinchinensis* 2: 407–408. 1790, *Nomenclator Botanicus*, ed. 3, 287. 1797, *Prodromus* 2: 80. 1825, *Fl. Filip.* [F.M. Blanco] 793. 1837 and *Blumea* 9(2): 402–405, f. 24. 1959, *Primates* 19: 101–114. 1978, *Australian Primatology* 8: 5–6. 1993, *Asian Primates* 4: 4–6. 1995, *Proceedings [of] 10th Asian Chemical Congress: Sessions. 2. Medical Chemistry & Natural Products*. Hanoi, 2003: 45–48. 2003, *Food Chemistry* 102(3): 808–811. 2007, *Food Chemistry* 105(3): 1307–1311. 2007, *European Food Research and Technology* 226(5): 1191–1196. 2008, *J. Zhejiang Univ. Science B*. 9(5): 407–415. 2008

(Olive leaf extract powerful antiviral, detoxificant, antioxidant, sedative, antibacterial, antifungal and antiinflammatory, shown to be effective in the treatment of many conditions where antibiotics have been found to be ineffective, against HIV and tuberculosis, sore throat, cough, malaria, fish or crab poisoning, to remove heat. Raw fruit to help indigestion and combat drunkenness. Antioxidant, tannins extracted from leaves, twigs and stem bark.)

in English: Chinese olive, Chinese white olive

in China: ch'ing kuo, gan lan, kan lan, kan lang

in Japan: kanran

in Vietnam: ca na, cay bui, tram trang

Canarium amboinense Hochr.

Papua New Guinea.

See Hochreutiner, Benedict Pierre Georges (1873–1959), *Plantae bogorienses exsiccatae novae vel minus cognitae* [!] quae in horto botanico coluntur, auctore B.P.G. Hochreutiner ... 55. [Buitenzorg] typis Instituti botanici bogoriensis. 1904.

(Against boils.)

Canarium bengalense Roxb.

India, China. Tree, fragrant amber coloured oleoresin, imparipinnate leaves, lanceolate leaflets, inflorescences axillary, dark purple spindle-shaped aromatic drupes, persistent

calyx disk-shaped, infructescences extra-axillary or axillary, ripe fruits eaten fresh

See *Hort. Bengal.* 49. 1814, *Flora Indica*; or, descriptions of Indian Plants ed. 1832, 3: 136. 1832, *FBI* 1: 534. 1875 and *Blumea* 9(2): 412–414. 1959, *Current Science* 32(4): 162–163. 1963, *Pharmaceutical Biology* 37(3): 225–230. 1999

(Leaves for bronchitis, leprosy, jaundice; juice of leaves with ginger juice administered in cough and respiratory diseases; smoke of the leaves inhaled as cigar in asthma; leaves infusion drunk for dysentery; leaves powder pesticide, insecticide, against fungal infection. Leaves and roots for chronic bronchitis; leaves juice or root decoction given for respiratory diseases; ashed leaves and wood mixed with honey used for coughs and asthma. Leaves and bark antiphlogistic, antiseptic, antibacterial, febrifuge, abortifacient, antiasthmatic, anti-allergic, for setting broken bones, relieving pain, resolving phlegm, used externally for rheumatic swellings, inflammations. Latex in the treatment of wounds and gum infection. Antifungal. Bark resin, incense, used in worshipping.)

in English: East Indian copal, green myrobalan

in China: fang lan

in India: bero, berothing, bisjang, borsamphol, dhuna, hijung-araung, inghet-ki-ik-araung, keruta, mathek-araung, mekruk, narockpa, nerebi, tekreng, umchhiang

in Nepal: goguldhup, gokul

Canarium commune L. (*Canarium commune* Blanco; *Canarium commune* Wight & Arn.)

India, Panama. Tree, clear sticky sap, sepals and petals greenish creamy white

See *Mantissa Plantarum* 1: 127. 1767, *Prodr. Fl. Ind. Orient.* 1: 175. 1834, *Fl. Filip.* [F.M. Blanco] 791. 1837

(Used in Sidha. For stomach problems and coughs.)

in English: Chinese olive, elemi gum, Java almond, Java almond tree, wild almond

in India: cimaivatumai, cinappicinmaram, jaava badaami, jangli baadaam, kaggali beeja, kaggali mara, karaiccenkari, sambrani, shambrani

Canarium euphyllum Kurz

India, Andaman. Large tree, white aromatic resin, leaf with a pair of awl-like stipules, nearly sessile hairy leaflets with toothed margins

See *Journ. As. Soc. Beng.* xli. (1872) II. 295. 1872

(Resin burnt as mosquito repellent. Resin used for burning in ceremonies.)

in English: Indian white mahogany

in India: dhup, moye

Canarium harveyi Seem. (*Canarium sapidum* Hems.)

Tonga. Tree, dense canopy

See Seemann, Berthold (1825–1871), *Flora Vitiensis*: a description of the plants of the Viti or Fiji islands, with an account of their history, uses, and properties. 35. London: L. Reeve and co. 1865

(Resin for ulcers; fruit laxative.)

in English: canarium nut, galip nut, ngali nut, Santa Cruz ngali nut

in Tonga: 'ai, ai, kaunicina, kaunigai, nangae, nangai

Canarium indicum L. (*Canarium amboinense* Hochr.; *Canarium commune* L.; *Canarium grandistipulatum* Lauterbach; *Canarium mehenbethene* Gaertn.; *Canarium moluccanum* Blume; *Canarium nungi* Guill.; *Canarium polyphyllum* Krause; *Canarium shortlandicum* Rech.; *Canarium subtruncatum* Engl.; *Canarium zephyrinum* Rumphius)

Indonesia, New Guinea, N. Hebrides. Tree, flowers in terminal panicles, large infructescences, fruit an ovoid purple to black drupe, kernels edible

See *Amoen. Acad.*, Linnaeus ed. 4: 143. 1759 and *Bot. Jahrb. Syst.* lvi. 321. 1920, *J. Arnold Arbor.* 1931, xii. 236. 1931

(Resin for ulcers; fruit laxative, a preparation from the bark used for chestpain. Dried nuts eaten to induce sterility. Ritual incense.)

in English: canarium nut, galip nut, Java almond, nangai nuts, ngali nut, south-sea almond

in Indonesia: jal, kanari bagéa, kenari ambo

in Pacific: nangai, ngali

in Papua New Guinea: angal, galip, hinuei, kenari, lawele, uele

Canarium littorale Blume (*Canarium acutum* Engl.; *Canarium bennettii* Engl.; *Canarium flavum* Ridl.; *Canarium giganteum* Engl.; *Canarium glaucum* Bl.; *Canarium pruinosum* Engl.; *Canarium pseudocommune* Hochr.; *Canarium pseudocommune* var. *genuinum* Hochr.; *Canarium pseudocommune* var. *subelongatum* Hochr.; *Canarium purpurascens* Benn.; *Canarium rufum* Benn.; *Canarium secundum* Benn.; *Canarium serricuspe* Miq.; *Canarium serrulatum* Miq.; *Canarium subtruncatum* Baker, non Engl.; *Canarium tomentosum* Bl.; *Canarium tomentosum* var. *flavum* Bl.; *Canarium tomentosum* var. *typicum* Bl.)

Java. Canopy tree, dioecious, black resin, stout twigs rusty red tomentose, kidney-shaped stipules, inflorescences paniculate and axillary, yellow-reddish-purple unisexual flowers densely ferruginous hairy, blue-black drupe with thin leathery flesh

See *Bijdr. Fl. Ned. Ind.* 17: 1164. [Oct 1826–Nov 1827] and *Bull. Misc. Inform. Kew* 1930, 81. 1930, *Blumea* 9(2): 337–339. 1959

(For hemorrhoids.)

in Borneo: asam, bekatan, damar kahingai, jelemu, karamu barawou, kawangang, kurihang, mekos, rupai, sala, seladah

in Singapore: kedondong, kedondong bulan

Canarium luzonicum Miq. (*Canarium album* Blanco; *Canarium carapifolium* Perk.; *Canarium commune* F. Vill.; *Canarium polyanthum* Perk.; *Canarium triandrum* Engl.; *Canarium villosum* Blume; *Pimela luzonica* Blume)

Philippines. Tree, clustered flowers on large compound inflorescences

See Miquel, Friedrich Anton Wilhelm (1811–1871), *Flora van Nederlandsch Indie*. i. II. 651. Amsterdam. 1855[–59].

(Resin stimulant, rubefacient, antirheumatic, stomachic, antiseptic, antispasmodic, antibacterial, fungicidal and insecticidal, cough remedy, used externally for swellings of the legs, indolent ulcers, burns, sores, boils, abscesses, furuncles, arthritis and rheumatism.)

in English: elemi gum, elemi resin, Java almond, Manila elemi

in Philippine Isl.: alangi, alanki, antang, anteng, arbol a brea, bakan, bakoog, belis, brea blanca, bulau, malapili, pilauai, pilau, pili, pisa, sahing, tugtugin

Canarium madagascariense Engl. (*Canarium boivinii* Engl.; *Canarium greveanum* Engl.; *Canarium harami* Bojer; *Canarium liebertianum* Engl.; *Canarium multiflorum* Engl.; *Canarium obtusifolium* Scott-Elliot; *Canarium pulchrebracteatum* Guillaumin)

Tanzania, Madagascar. Tree, extremely variable, bark containing a turpentine-odoured white clear resin, white campanulate flowers

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 111–112. 1883 and *Blumea* 9(2): 275–475. 1959, *International Journal of Primatology* 18(2): 207–216. 1997, *Acta Horticulturae* 675: 133–137. 2005

(Resin insecticide and disinfectant, for the treatment of urinary complaints, dental caries, rheumatism, wounds; after heating vapor inhaled against headache, immersion in its vapor is believed to protect against infections. Fresh bark for colic, hemorrhoids and jaundice; bark decoction in treating dysentery, hypertension, cough, chest pain. Leaves boiled with other herbs and the decoction used to treat coughs; stem exudate and leaves sedative, analgesic. The seeds roasted and pounded and the resulting powder mixed with skin oil or jelly to treat wounds.)

in Madagascar: aramy, ramy

in Tanzania: mbani, mpafu

Canarium manii King

India, Andaman.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 62(4): 247. 1894 [1893 publ. 6 Mar 1894] and *Planta Medica* 58(6): 493–495. 1992

(Hepatoprotective.)

Canarium oleosum (Lam.) Engl.

Papua New Guinea. Tree, colourless bark exudate, inflorescence axillary

See *Nat. Pflanzenfam.* [Engler & Prantl] iii. 4: 241. 1896 and *Flora Malesiana*, Series 1, 278–279, fig. 20, 21, 41. 1956

(Stimulating hair oil. Against itchiness.)

in English: grey canarium

in Indonesia: kanari minyak, kayu rasamala, rani kalang bahi

Canarium ovatum Engl.

Philippines. Tree, erect and spreading, yellowish fragrant flowers borne on cymose inflorescences at the leaf axils of young shoots

See *Plant Foods for Human Nutrition* (Formerly *Qualitas Plantarum*) 57(2): 107–204. 2002

(Ointment for healing wounds. Seed kernel laxative, fresh nuts purgative.)

in English: Manila elemi, Philippine nut, pili nut

Canarium paniculatum (Lam.) Benth. ex Engl. (*Canarium paniculatum* (Lam.) Benth.)

Mauritius. Tree, endangered

See *Pharmaceutical Biology* 35(4): 237–254. 1997, *Pure Appl. Chem.* 77(1): 41–51. 2005

(A leaf poultice and the resin applied for rheumatism, leaf poultice also applied on ulcerations. Extracts of the stem, wood and bark have shown antibacterial and antifungal activities.)

in Mauritius: bois colophane, élemi de Maurice

Canarium pilosum Bennett (*Canarium grandiflorum* Bennett)

Indonesia, Malaya, Sumatra, Brunei. Tree, dioecious, inner bark creamy, few-flowered inflorescences, flowers tomentose, oblong drupe with a 3-sided stone, sweet seeds edible

See *Flora of British India*. By J.D. Hooker assisted by Various botanists. Published under the authority of the Secretary of State for India in council. [Hooker, Joseph Dalton, Sir (1817–1911)] i. 533. London, L. Reeve. 1872–1897

(Resin used for wounds. Leaves and bark for yaws.)

in Indonesia: damar kunang, damar lilin, medang serababa

in Malaysia: kedondong, kedondong kerut, kejam penggeli, keramoh batu

Canarium pimela K.D. Koenig (*Canarium nigrum* Roxb.; *Canarium nigrum* Engl.; *Canarium nigrum* (Lour.) Engl., nom. illeg.; *Canarium pimela* Zoll. ex Engl.; *Canarium pimela* Blume; *Canarium pimela* Blanco; *Canarium pimela*

Leenh.; *Canarium pimeloides* Govaerts, nom illeg. superfl.; *Canarium tramdenum* C.D. Dai & Yakovlev; *Chirita nigrum* (Lour.) Engl., nom. illeg.; *Pimela nigra* Lour.)

Southern China, Vietnam. Tree, resiniferous, evergreen, small flowers in axillary panicles, long-stalked fruits, edible fruit a purple-black drupe

See *Flora Cochinchinensis* 407. 1790, *Annals of Botany* 1: 361, pl. 7, f. 1. 1805, *Hortus Bengalensis*, or a catalogue ... 49. 1814, *Bijdr. Fl. Ned. Ind.* 17: 1162. [Oct 1826–Nov 1827], *Fl. Filip.*, ed. 2 [F.M. Blanco] 545. 1845, *Die Natürlichen Pflanzenfamilien* 3(4): 240. 1896 and *Blumea* 9(2): 406, 408, f. 25. 1959, *Botaničeskij Žurnal* (Moscow & Leningrad) 70(6): 784. 1985, *World Checklist of Seed Plants* 3(1): 12. 1999, *Taxon* 54: 550. 2005

(Leaf nutrient and sedative, used to treat herpes, lacquer poisoning. Fruit astringent, sedative, antiinflammatory, increases salivation, appetite stimulant, antidote for eating poisonous fish, used for sore throat, toothache, diarrhea. Powdered seed to treat earache, inflammation and to dissolve lodged fishbones.)

in English: black canarium, black canary tree fruit, black Chinese canarium, canarium kernel, Chinese black olive, Chinese olive, kenari-nut tree, preserved black canarium

Malay name: kacang kacang

Canella P. Browne Canellaceae

Latin *canna* 'a reed', Greek *kanna*, referring to the tightly rolled bark; see *The Civil and Natural History of Jamaica* in Three Parts 275, pl. 27, f. 3. 1756, *Nova Genera et Species Plantarum ...* 3: 168, 170. 1832, Endlicher, Istvan Laszlo (1804–1849), *Enchiridion Botanicum* 428. Lipsiae, Sumptibus Guil. Engelmann, 1841, N. Tommaseo & B. Bellini, *Dizionario della lingua italiana*. Torino 1865–1879 and *Pollen. Bot. Gaz.* 125(3): 192–197. 1964, *Amer. J. Bot.* 53(4): 336–343. 1966, Manlio Cortelazzo and Paolo Zolli, *Dizionario Etimologico della Lingua Italiana*. 1: 195–196. Zanichelli, Bologna 1979, *Mem. New York Bot. Gard.* 78: 1–581. 1996.

Canella winterana (L.) Gaertn. (*Canella alba* Murray; *Canella canella* (L.) H. Karst.; *Laurus winterana* L.; *Winterana canella* L.)

Jamaica, West Indies, USA. Shrub or small tree, perennial, slow-growing, dense canopy, purple and white lightly fragrant flowers, bright red berries clustered near the tips of branches, aromatic and pungent bark, not known to be invasive, once established it is extremely drought and salt tolerant

See *Species Plantarum* 1: 369, 371. 1753, *Systema Naturae*, Editio Decima 2: 1045. 1759, *Syst. Veg.* (ed. 14). 443–444. 1784, *De Fructibus et Seminibus Plantarum...* 1: 373. 1788, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 626. 1882 and *Ess. Oil Res.* 2: 163–165. 1990, *Phytochemistry* 38(4): 909–915. 1995

(Leaves and stems toxic to chickens. Bark emmenagogue, cytotoxic, antifungal and antimicrobial, used to relieve headaches; inner bark infusion to treat fevers and inflamed tonsils, indigestion, to induce abortion. To relieve headache and hangover, smoke the chipped dried wood in a pipe. Leaves applied externally to relieve rheumatism and headache; for rheumatism, boil the leaves for a bath. Phytotoxic sesquiterpenoids. Leaves and bark as fish poison; bark insecticidal.)

in English: Bahama whitewood, canella, canella bark, cinnamon bark, Jamaican cinnamon tree, pepper cinnamon, white cinnamon bark, white cinnamon tree, wild cinnamon, wild cinnamon tree, winter cinnamon

in India: kiliyuram pattai

Canna L. Cannaceae

Greek *kanna*, *kanne* 'a reed', Latin *canna*, *ae* 'a reed, cane', Akkadian *qanu* 'reed', Hebrew *qane* 'reed'; see Carl Linnaeus,

Species Plantarum 1: 1. 1753, *Genera Plantarum* Ed. 5. 1. 1754 and *Fl. Veracruz* 11: 1–8. 1980, Wu Te-lin & Chen Sen-jen. *Cannaceae*. In: Wu Te-lin, ed., *Fl. Reipubl. Popularis Sin.* 16(2): 152–158. 1981, *Flora of Ecuador* 32: 1–9. 1988, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, *Makinoa*, n.s., 1: 1–74. 2001.

Canna flaccida Salisbury (*Canna anahuacensis* Kraenzl.; *Canna angustifolia* Walter, nom. illeg. hom.; *Canna fintelmanni* Bouché; *Canna flaccida* Roscoe, nom. illeg.; *Canna flava* Michx. ex Lam., nom. subnud.; *Canna glauca* Walter, nom. illeg. hom.; *Canna glauca* var. *flaccida* Willd.; *Canna glauca* var. *flava* (Michx. ex Lam.) Willd.; *Canna reevesii* Lindl.; *Eurystylus flaccida* (Salisb.) Bouché; *Eurystylus flacidus* (Salisb.) Bouché; *Eurystylus reevesii* (Lindl.) Bouché)

North America. Herbaceous perennial, leaf bases clasp the stem, leaves upright thick succulent, bright yellow flowers in a terminal cluster, modified style and modified stamens, one of the petal-like stamens bears pollen

See *Flora Caroliniana*, secundum ... 59. 1788, *Icones Stirpium Rariorum* 3, plate 2. 1791, *Journ. Nat. Hist. Par.* 1: 416. 1792, *Species Plantarum*. Editio quarta 1: 4. 1797, *Trans. Linn. Soc.
