See *Fl. Brit. India* 6(17): 221. 1890, *Revis. Gen. Pl.* 2: 697. 1891 and *Bull. Misc. Inform. Kew* 1912(10): 401, 1912, *Icon. Pl. Formosan.* 5: 213. 1915, *Nat. Pflanzenfam.*, ed. 2. 15a: 564. 1930, *Edinburgh Journal of Botany* 48(1): 24. 1991, *Acta Phytotax. Sin.* 33: 499. 1995, *Acta Phytotax. Sin.* 34: 204. 1996, *Telopea* 8: 375. 1999

(Rhizome stimulant, stomachic, antiseptic, astringent, a paste applied on burns.)

in China: tu tian qi

in India: walkham

Stanleya Nutt. Brassicaceae

For the English ornithologist Edward Smith Stanley, 1775–1851, 13th Earl of Derby; see Henry Salt (1780–1827, d. Alexandria), *A Voyage to Abyssinia and travels into ... that country ... in ... 1809 and 1810*. (Appendix. Zoology, with descriptions of the Birds by J. Latham, and additional remarks on them by Lord Stanley, afterwards 13th Earl of Derby. Botany, list of new and rare plants by R. Brown) London 1814, *The Genera of North American Plants* 2: 71–72. 1818, *Journal of the Academy of Natural Sciences of Philadelphia* 7: 85. 1834 John Edward Gray (1800–1875), *Gleanings from the Menagerie and Aviary at Knowsley Hall*. Knowsley 1846 and *Hoofed Quadrupeds*. Knowsley 1850.

Stanleya pinnata (Pursh) Britton (*Cleome pinnata* Pursh; *Stanleya arcuata* Rydb.; *Stanleya canescens* Rydb.; *Stanleya fruticosa* Nutt.; *Stanleya glauca* Rydb.; *Stanleya heterophylla* Nutt.; *Stanleya pinnata* var. *arcuata* (Rydb.) Britton ex Beath, Gilbert & Eppson, nom. inval.; *Stanleya pinnata* (Pursh) Britton var. *typica* Rollins, nom. inval.; *Stanleya pinnatifida* Nutt.)

North America. Perennial subshrub, shrub or herb, boiled leaves edible

See *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 739. 1813, *The Genera of North American Plants* 2: 71–72. 1818, *A Flora of North America*: containing ... 1(1): 97. 1838, *Journal of the Academy of Natural Sciences of Philadelphia* 1(2): 180. 1848, *Transactions of the New York Academy of Sciences* 8(3–4): 62. 1889 and *Bulletin of the Torrey Botanical Club* 29(4): 232. 1902, *Bulletin of the Torrey Botanical Club* 31(7): 409. 1904, *American Journal of Botany* 26(5): 308. 1939, *Lloydia* 2(2): 116. 1939, *Am. J. Bot.* 96(6): 1075–1085. 2009

(Fresh leaves considered poisonous. Selenium hyperaccumulator. Crushed roots made into a paste applied for throat pain, earache, rheumatic pains.)

in English: prince's plume

Stanleya pinnata (Pursh) Britton var. *pinnata* (*Cleome pinnata* Pursh; *Stanleya arcuata* Rydb.; *Stanleya canescens* Rydb.; *Stanleya fruticosa* Nutt.; *Stanleya glauca* Rydb.; *Stanleya heterophylla* Nutt.; *Stanleya pinnata* subsp. *inyoensis* Munz & J.C. Roos; *Stanleya pinnata* subsp. *pinnata*; *Stanleya pinnata* var. *arcuata* (Rydb.) Britton ex Beath, Gilbert & Eppson, nom. inval.; *Stanleya pinnata* var. *inyoensis* (Munz & J.C. Roos) Reveal; *Stanleya pinnatifida* Nutt.)

North America. Perennial subshrub, shrub or herb, leaves edible when boiled many times to remove poisons

See *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 739. 1813, *The Genera of North American Plants* 2: 71–72. 1818, *A Flora of North America*: containing ... 1(1): 97. 1838, *Journal of the Academy of Natural Sciences of Philadelphia* 1(2): 180. 1848, *Transactions of the New York Academy of Sciences* 8(3–4): 62. 1889 and *Bulletin of the Torrey Botanical Club* 29(4): 232. 1902, *Bulletin of the Torrey Botanical Club* 31(7): 409. 1904, *American Journal of Botany* 26(5): 308. 1939, *Aliso* 3(2): 115–116, f. 4–5. 1955, *Great Basin Naturalist* 33(1): 22. 1973, *Am. J. Bot.* 96(6): 1075–1085. 2009

(Poisonous leaves. Selenium hyperaccumulator. Plant paste applied to glandular swellings, venereal diseases.)

in English: prince's plume

Stapelia L. Asclepiadaceae (Apocynaceae)

After the Dutch physician Jan Bode van Stapel (Johannes Bodaeus Stapelius), botanist, d. circa 1636, author of *Disputatio medica inauguralis de variolis et morbillis*, etc. Lugduni Batavorum [Leyden] 1625, editor of Theophrastus's work on plants; see *Theophrastii Eresii De historia plantarum libri decem, graece et latine, ... latinam Gazae versionem nova interpretatione ad margines: ... item rariorum plantarum iconibus illustravit Joannes Bodaeus a Stapel*, medicus Amstelodamensis, etc. Amstelodami 1644, Carl Linnaeus, *Species Plantarum*. 1: 217. 1753, *Genera Plantarum*. Ed. 5. 102. 1754, Haworth, Adrian Hardy (1767–1833), *Synopsis plantarum succulentarum ... 27, 32–34, 36–37*. Londini: Typis Richardi Taylor et Socii, 1812, *Caii Plinii Secundi Historiae naturalis libri XXXVII*, etc. (vol. 5–9. Cum selectis ... Bodaei ... notis et excursibus) 1831, *Primae Lineae Systematis Naturae* 70. 1834, *Genera Plantarum* 598. 1838 and *The Stapelieae ... 2*: 411, 417. 1937, Gilbert Westacott Reynolds, *The Aloes of South Africa*. 3, 73, 75. Balkema, Rotterdam 1982, Edward Lee Greene, *Landmarks of Botanical History*. Edited by Frank N. Egerton. 459–460. 1983, *Taxon* 41: 570. 1992, *Calyx* 3(1): 37–38. 1993, *Taxon* 44: 611–612. 1995.

Stapelia gigantea N.E. Br. (*Carapelia tarantuloides* (R.A. Dyer) Rowley; *Gonostemon giganteus* (Phillips) P.V. Heath; *Gonostemon giganteus* nothovar. *pallidus* (Phillips) P.V. Heath; *Gonostemon giganteus* var. *marlothii* (N.E. Br.) P.V. Heath; *Gonostemon giganteus* var. *nobilis* (N.E. Br. ex Hook. f.) P.V. Heath; *Gonostemon giganteus* var. *youngii* (N.E.

Br.) P.V. Heath; *Gonostemon x meintjesii* (Verd.) P.V. Heath; *Stapelia cyclista* C.A. Lüchh.; *Stapelia gigantea* var. *pallida* Phillips; *Stapelia marlothii* N.E. Br.; *Stapelia meintjesii* Verd.; *Stapelia nobilis* N.E. Br.; *Stapelia nobilis* N.E. Br. ex Hook. f.; *Stapelia tarantuloides* R.A. Dyer; *Stapelia youngii* N.E. Br.)

South Africa. Stem succulent, fleshy pubescent, flowers yellow-brown with transverse lines of purple-brown and purple hairs, flowers very fetid smelling

See *Species Plantarum* 1: 217. 1753, *On the Asclepiadeae* 14. 1810, *Syn. Pl. Succ.* 27. 1812, *Gardener's Chronicle & Agricultural Gazette* 1: 684, f. 112. 1877 and *Botanical Magazine* t. 7771. 1901, *Bulletin of Miscellaneous Information Kew* 1908: 436. 1908, *Stapelien und Kleinien einschliesslich einiger ...* 103. 1910, *Bulletin of Miscellaneous Information Kew* 43. 1931, *Flowering Plants of South Africa* 18: t. 717. 1938, *Flowering Plants of South Africa* 23: t. 917. 1943, *Repertorium Plantarum Succulentarum* 23: 6. 1974, *Taxon* 25: 631–649. 1976, *Proceedings of the Indian Science Congress Association* 75(3-vi): 233–234. 1988, *International Organization of Plant Biosystematists Newsletter* 11: 10–12. 1988, *International Organization of Plant Biosystematists Newsletter* 15: 11. 1990, *Kromosomo* 61: 2068–2077. 1991

(Fleshy stalks used for hysteria.)

in English: giant stapelia, giant toad plant, Zulu-giant

in Japan: chii-oo-saiku

in South Africa: uZililo (Zulu)

Stathmostelma K. Schum. Asclepiadaceae

From the Greek *stathmos* “threshold, door” and *stelma*, *stelmatos* ‘a girdle, belt, crown, garland, wreath’, *stello* ‘to bring together, to bind, to set’, *stathmon* “weight”.

Stathmostelma pedunculatum (Decne.) K. Schum. (*Gomphocarpus pedunculatus* Decne.)

East Africa, Tanzania. Herb, erect, leaves decussate, perianth red, calyx pale green, corolla pale red, stamens brown, fruit cream, seeds brown surrounded by silky wool, plant producing milky juice when cut, tuber said to be edible, in wooded grassland

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 558. 1844, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 129, 132. 1893, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 24, 41. 1894

(Cattle poison.)

Staudtia Warb. Myristicaceae

After the German botanist and botanical collector Alois Staudt, d. 1897 (Johann-Albrechtshöhe [Kumba], Cameroon);

see G.W.J. Mildbraed (1879–1954), *Notizbl. Bot. Gart. Berl.* 8: 317–324. 1923, Frank Nigel Hepper, “Botanical collectors in West Africa, except French territories, since 1860.” in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69–75. Lisbon 1962, H. Walter, “Afrikanische pflanzen in Hamburg.” in *Mitt. Geog. Gesell. Hamburg.* 56: 92–93. Hamburg 1965, Anthonius Josephus Maria Leeuwenberg, “Isotypes of which holotypes were destroyed in Berlin.” in *Webbia.* 19: 861–863. 1965, René Letouzey (1918–1989), “Les botanistes au Cameroun.” in *Flore du Cameroun.* 7: 1–110. Paris 1968, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa.* 76. 1971.

Staudtia gabonensis Warb. (*Staudtia congensis* Vermeesen; *Staudtia niouhue* Pierre; *Staudtia stipitata* Warb.)

Tropical Africa. Red sap

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 384. 1904, *Fl. Cameroun* 18: 104. 1974

(Magico-religious beliefs, ritual.)

in French: arbre à pagayes, arbre à pagaies

in Cameroon: bambele, bopana, bope, bope bambale, ekop, hikob, ikop, malanga, m'bonda, mbonda, mbondjo, mbounde, mbounde, oho, ongom, ovos

in Central Africa: molanga, oropa

in Congo: adjua, bokolofe, bokolombe, bope, bososa, bufuki, bwanga zanga, gobe, kafi, kamashi, m'soma, mbu, menga menga, meobe, mohanga, molanga, moobe, mvingi, ngubi, okole, onanga, sofi menga, somve menge, sunzu menga, susu menga

in Gabon: bobé, m'boum, m'boun, mbassina, mbona, mbonn, mboun, mbounde, mogoubi, mooum, mougoubi, mugubi, muguvi, mulanga, nbounde, ndjolz, ngakombo, ngobye, ngubo, nikoubi, ninegone, niobe, niogo, niohe, niouhue, niowe, niové, nkubi, nyowe, ogobe, ogoweni, ohohé, olangi, todo, ungubu

in Nigeria: abala, afo, amoje, amuje, babasheje, bopae, bope-bambali, ekop, erubabaseje, hikob, icha, ichala, itshi, itchi, itsha, iyipokoyo, mbundi, metange, nja, niowe, niovi, oropa, oropo, oropupa, ukpufem-obo, ukpufemme, umaza

Staudtia kamerunensis Warb.

East Africa. Large tree, bark light coloured, copious blood red exudate, outside of fruit green-yellowish inside bright orange-red and bright red, leaves eaten by gorillas

See *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 129, 241. 1897

in Central African Republic: malanga

in Nigeria: bopae, bopai, bope, ekop, hikob, metange

Stauntonia DC. Lardizabalaceae

For the English (b. Galway) naturalist Sir George Leonard Staunton, 1737–1801 (d. London), diplomat, plant collector in China, physician, 1785 Baronet, Fellow of the Royal Society of London (1787) and of the Linnean Society (1789); see *Florae Peruvianaе, et Chilensis Prodrum* 143. 1794, *Syst. Nat.* [Candolle] 1: 511, 513. 1817 [1818 publ. 1–15 Nov 1817], *Transactions of the Linnean Society of London* 13(1): 212. 1821, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 15: 394. 1837, *Archives du Muséum d'Histoire Naturelle* 1: 190. 1839 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 318. 1965.

Stauntonia obovatifoliola Hayata subsp. *urophylla* (Handel-Mazzetti) H.N. Qin (*Stauntonia brachyanthera* Handel-Mazzetti var. *minor* Diels ex Y.C. Wu; *Stauntonia brachybotrya* T.C. Chen, nom. inval.; *Stauntonia hexaphylla* (Thunberg) Decaisne f. *intermedia* Y.C. Wu; *Stauntonia hexaphylla* (Thunberg) Decaisne var. *urophylla* Handel-Mazzetti)

China.

See *Ann. Sci. Nat., Bot.* sér. 2, 12: 105. 1839 and *Icon. Pl. Formos.* 8: 4. 1919, *Anz. Akad. Wiss. Wien, Math.-Naturwiss. Kl.* 1921, 58: 90. 1921, *Anz. Akad. Wiss. Wien, Math.-Naturwiss. Kl.* 59: 102. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 370. 1936, *Cathaya* 8–9: 164. 1997, *Fl. Reipubl. Popularis Sin.* 29: 40–41, 308. 2001

(Antinociceptive, antiinflammatory, antifungal, antiphlogistic, tonic, contraceptive, antimicrobial.)

in China: wei ye na teng

Stauranthera Benth. Gesneriaceae

From the Greek *stauros* ‘a cross’ and *anthera* ‘anther’, referring to the anthers, coherent and forming a cross, see Bentham, George (1800–1884), *Scrophularineae Indicae*: a synopsis of the East Indian Scrophularineae contained in the collections presented by the East India Company to the Linnaean Society of London, and in those of Mr. Royle and others: with some general observations on the affinities and sub-divisions of the order/by George Bentham. London, 1835, *Notulae ad Plantas Asiaticas* 4: 154. 1854.

Stauranthera grandifolia Benth.

India. Herb, terete branches, serrate pubescent elliptic leaves, white flowers in axillary racemes

See *Scrophularineae Indicae* 57. 1835, *Fl. Brit. India* [J.D. Hooker] 4: 372. 1884 and *Beitr. Biol. Pflanzen* 70: 445–470. 1997

(Pounded mixture of leaves of *Ixora acuminata* with leaves of *Millettia caudata* and roots of *Stauranthera grandifolia* applied on snakebite.)

in India: laungla-mak

Staurogyne Wallich Acanthaceae

From the Greek *stauros* ‘cross’ and *gyne* ‘a woman, female’, referring to the stigma; see Nathaniel Wallich (1786–1854), *Plantae Asiaticae rarior.* 2: 80, t. 186. London 1831, *Pl. Asiat. Rar.* (Wallich). 3: 75, 80. 1832 and *Contr. U.S. Natl. Herb.* 31(1): 5. 1951, *Notes Roy. Bot. Gard. Edinburgh* 31(3): 380. 1972, *Sida* 15(3): 367–372. 1993.

Staurogyne debilis (T. Anderson) C.B. Clarke ex Merr. (*Ebermaiera debilis* T. Anderson; *Ebermaiera elongata* Nees; *Ebermaiera elongatus* Fern.-Vill.; *Erythracanthus elongatus* Nees)

SE Asia, Malay Peninsula.

See *Prodr.* (DC.) 11: 79, 721. 1847, *Journal of the Linnean Society, Botany* 9: 452, in nota. 1866 [1867 publ. 1866], *Novissima appendix* 152. 1880, *Revis. Gen. Pl.* 2: 497. 1891 and *Philippine Journal of Science* 2(4): 302. 1907

(Root and leaves diuretic.)

Staurogyne elongata (Blume) Kuntze (*Ebermaiera elongata* Nees; *Ebermaiera elongatus* Fern.-Vill.; *Staurogyne elongata* Kuntze)

Indonesia. Perennial herb

See *Prodr.* (DC.) 11: 721. 1847, *Novissima appendix* 152. 1880, *Revis. Gen. Pl.* 2: 497. 1891

(Root and leaves diuretic.)

in Indonesia: godong kedji, reundeu

Steganotaenia Hochst. Apiaceae (Umbelliferae)

Greek *steganos* ‘covered, secret’ (*stegane* ‘a covering’, *stegē* ‘roof’) and *tainia* ‘fillet’, Latin *taenia*, *ae* ‘band, ribbon’, see *Flora* 27(1, Bes. Beil.): 4. 1844.

Steganotaenia araliacea Hochst. (*Peucedanum araliaceum* (Hochst.) Benth. & Hook.f.; *Peucedanum araliaceum* Benth. & Hook.f. ex Vatke; *Peucedanum araliaceum* (Hochst.) Benth. & Hook. f. ex Vatke; *Peucedanum araliaceum* (Hochst.) Hiern; *Peucedanum araliaceum* var. *fraxinifolium* (Hiern ex Oliv.) Engl.; *Peucedanum fraxinifolium* Oliv.; *Peucedanum fraxinifolium* Hiern ex Oliv.; *Steganotaenia araliacea* var. *foliis-setoso-serratis* A. Rich.)

Tropical Africa.

See *Flora* 27(Beibl.): 4. 1844, *Transactions of the Linnean Society of London* 29(2): 79, t. 42. 1873, *Linnaea* 40: 188. 1876, *Flora of Tropical Africa* 3: 21. 1877, *Die Pflanzenwelt*

Ost-Afrikas C: 300. 1895 and R. Sutherland Rattray, *Some Folk-Lore Stories and Songs in Chinyanja*. London 1907

(Leaves and exudate diuretic, astringent, carminative, depurative, febrifuge, for diarrhea, toothache, stomachache. Stem and roots abortifacient, for sore throat, colds, asthma. To cure malaria and edema, schistosomiasis and gonorrhoea, root decoction drunk with *Mucuna poggei* Taub., *Carvalhoa macrophylla* K. Schum., *Euphorbia tirucalli* L., *Triclisia sacleuxii* (Pierre) Diels.)

in English: carrot tree, pop-gun tree

in Angola: mupandalolo

in Kenya: muvuavui, bisugu

in Malawi: mpoloni

in Mozambique: psukula

in Nigeria: hano, raken giwa

in Southern Africa: geelwortelboom; morobolo (Tswana: Western Transvaal, northern Cape, Botswana); muBama, muBojana, muKetu, muPombohlove, muSante, muShoriwondo, muSumfu, muSodzambudzi (Shona)

in Zimbabwe: popgun tree

Stegnosperma Benth. Stegnospermataceae (Phytolaccaceae)

Greek *stegos* 'covered, sheltered', Greek *stegane* 'covering', *stegē* 'roof' and *sperma* 'seed', possibly referring to the aril covering the seeds, see *The botany of the voyage of H.M.S. Sulphur* 17. 1844 and *Journal of Japanese Botany* 18: 108. 1942, *Fieldiana, Bot.* 24(4): 192–202. 1946, *Syst. Bot.* 5(4): 419–439. 1980 [1981], *Fieldiana, Bot.*, n.s. 13: 199–213. 1983, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1924–1928. 2001.

Stegnosperma halimifolium Benth. (*Stegnosperma alimifolia* Benth.; *Stegnosperma cubense* A. Rich.; *Stegnosperma scandens* (Lunan) Standl.; *Stegnosperma scandens* (A. Rob. ex Lunan) Standl.; *Trichilia scandens* Lunan, Meliaceae; *Trichilia scandens* A. Rob. ex Lunan, Meliaceae)

Mexico, Baja California.

See *Hortus Jamaicensis* 2: 319–320. 1814, *The botany of the voyage of H.M.S. Sulphur* 17, t. 12. 1844, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 10: 309. 1845 and *Publications of the Field Museum of Natural History, Botanical Series* 23(1): 6. 1943, *Syst. Bot.* 5(4): 419–439. 1980 [1981]

(Leaves paste if bitten by a rattlesnake, rub it on the bite. To relieve a headache leaves cooked with leaves of *Bursera microphylla* and the mixture used as a shampoo.)

Stelechocarpus Hook.f. & Thomson Annonaceae

Greek *stelechos* 'branch, the crown of the root, stool, trunk, stem' and *karpos* 'fruit', see Blume, Carl Ludwig von (1796–1862), *Flora Javae nec non insularum adjacentium*. Bruxelles: Sumtibus Librariae J. Frank, Typis H. Remy, 1828 [1828–1851], *Hooker's J. Bot. Kew Gard. Misc.* 3: 207. 1851, *Fl. Ind.* [Hooker f. & Thomson] i. 94. 1855.

Stelechocarpus burahol (Blume) Hook. f. & Thomson (*Stelechocarpus burahol* Hook.f. & Thomson; *Uvaria burahol* Blume)

SE Asia, Java, India. Tree, aromatic, ripe fruit eaten fresh

See *Bijdr. Fl. Ned. Ind.* 1: 14. 1825, *Flora Javae* 21–22: 13. 1830, *Flora Indica*: being a systematic account of the plants. 1: 94. 1855 and *Plant Systematics and Evolution* 144: 165–177. 1984

(Pulp diuretic. Consumption of keppel apples causes all bodily excretions to smell like violets)

in English: keppel apple, keppel fruit, keppel tree

in Indonesia: burahol, kecindul, kepel

Stelechocarpus cauliflorus (R. Scheffer) R.E. Fr. (*Sageraea cauliflora* R. Scheffer; *Stelechocarpus cauliflorus* (Scheff.) J. Sinclair)

Indonesia.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 207. 1851, *Annales du Jardin Botanique de Buitenzorg* 2: 5. 1885 and *Gard. Bull. Singapore* 14: 43. 1953, *Arkiv för Botanik, Andra Serien* 3(2): 42. 1953, *Nat. Pflanzenfam.*, ed. 2 [Engler & Prantl] xvii a. II. 73. 1959

(Two flavonoids, dihydroflavonol glycosides, engeletin and astilbin, displayed therapeutic potential in the prevention and treatment of diabetic complications.)

Stellaria L. Caryophyllaceae

Latin *stella*, *ae* 'a star', *stellaris*, *e* 'starry', the flowers are star-shaped; see Carl Linnaeus, *Species Plantarum*. 1: 421–423, 425. 1753, *Genera Plantarum*. Ed. 5. 193. 1754, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* [Moench] 225. 1794, *Flora Germanica Excursoria* 795. 1832 and *Novosti Sistematiki Vysshchikh Rastenii* 14: 78. 1977.

Stellaria dichotoma L. var. *lanceolata* Bunge (*Stellaria dichotoma* fo. *lanceolata* (Bunge) Kitag.; *Stellaria dichotoma* var. *heterophylla* Fenzl; *Stellaria dichotoma* var. *stephaniana* (Willd. ex Schldl.) Regel; *Stellaria gypsophiloides* Fenzl; *Stellaria gypsophiloides* Fenzl var. *lanceolata* (Willd. ex Schldl.) Kozhev.; *Stellaria stephaniana* Willd. ex Schldl.)

China, Mongolia. Perennial herb, erect, pubescent or glandular, root cylindrical, leaves opposite sessile lanceolate, solitary flowers, green calyx lanceolate, oblong petals 2-lobed at the top, capsule subglobose, on dry grassland

See *Species Plantarum* 1: 421–423. 1753, *Berlinisches Magazin* 1816: 194. 1816, *Flora Altaica* Suppl. 34. 1836, *Flora Rossica* 1: 379–380. 1842, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(91): 237. 1862 and *Journal of Japanese Botany* 40: 183. 1965

(Roots used for fever and infant malnutrition.)

in English: lanceolate starwort

in China: yin chai hu

Stellaria media (L.) Vill. (*Alsine media* L.; *Stellaria apetalata* Ucria ex Roem.; *Stellaria hiemalis* Raunk.; *Stellaria media* Sibth., nom. illeg.; *Stellaria media* (L.) J.C. Sowerby & Sm., nom. illeg., non *Stellaria media* (L.) Vill.; *Stellaria media* (L.) Cirillo, comb. illeg.; *Stellaria media* Cirillo, nom. inval.; *Stellaria media* fo. *malachioides* Macloskie; *Stellaria media* var. *normalis* Speg.; *Stellaria media* var. *procera* Klatt & Richt.; *Stellaria monogyna* D. Don; *Stellaria vulgaris* Raunk.)

East Africa. Annual herb, sprawling, weak, prostrate, many-branched, rooting at nodes, fibrous roots at nodes, leaves opposite, lower leaves stalked, flowers white stalked, fruit a capsule, reddish brown round seeds used as a food for birds, leaves and tender parts eaten, a weed of arable fields

See *Species Plantarum* 1: 272. 1753, *De Essentialibus Nonnullarum Plantarum Characteribus Commentarius* 36. 1784, *Histoire des Plantes de Dauphiné* (Villars) 3(2): 615. 1789, *Fl. (Plant paste antiinflammatory, applied on burns, boils, wounds, as a plaster to broken bones and swellings. Leaves used in fomentation for bruises; dew from the leaves applied on eyes.)

in English: bindweed, chickweed, chickweed starwort, common chickweed, satin flower, starweed, starwort, stitchwort, tonguegrass, white bird's eye, winterweed

Stellaria monosperma Buch.-Ham. ex D. Don

India, Pakistan.

See *Prodromus Florae Nepalensis* 215. 1825

(Plant decoction for body pain and rheumatism.)

in China: du zi fan lu

in India: buchbucha

Stellaria patens D. Don (*Stellaria fenzeliana* Klotzsch; *Stellaria fenzliana* Klotzsch; *Stellaria longissima* Wall.; *Stellaria mollis* Klotzsch)

India, Nepal.

See *Prodromus Florae Nepalensis* 215. 1825, *Cat. no. 632. 1828, Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 141, f. 29. 1862, *The Flora of British India* 1(2): 232. 1874

(Plant paste applied around the anus to get relief from pain in piles.)

in China: bai mao fan lu

Stellera L. Thymelaeaceae

For the German (b. Windsheim) botanist Georg Wilhelm Steller (Stöller), 1709–1746 (Siberia), physician, naturalist, traveller and explorer, plant collector in Russia and Alaska, geographer, 1738–1742 on the second Bering Expedition, his major work is *Beschreibung von dem Lande Kamtschatka*. Frankfurt, Leipzig 1774; see *Species Plantarum* 1: 559. 1753, *Hortus Kewensis* 328. 1768, *Atti Reale Accad. Sci. Napoli* 1787: 245. 1788, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 1: 359. 1843, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, *Revisio Generum Plantarum* 2: 584. 1891, *Annales des Sciences Naturelles; Botanique*, sér. 7, 17: 199. 1893 and *Fl. Malesiana* 6: 28. 1960, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 323. 1965, Peter [Pyotr] Simon Pallas (1741–1811), *A Naturalist in Russia. Letters from Peter Simon Pallas to Thomas Pennant*. Edited by Carol Urness. Minneapolis [1967], Sten Lindroth, in *D.S.B.* 13: 28–29. 1981, *Notes Roy. Bot. Gard. Edinburgh* 40(1): 213–221. 1982, *Fl. Bhutan* 2(1): 208–213. 1991, *Fam. Gen. Vasc. Pl.* 5: 373. 2003.

Stellera chamaejasme L. (*Chamaejasme stelleriana* Kuntze; *Daphne hypericifolia* Wall., nom. nud.; *Passerina chamaejasme* Fisch. ex Meisn.; *Passerina concinna* (Edgew.) Walp.; *Passerina dichotoma* (Fisch. ex Sweet) Steud.; *Passerina stelleri* Wikstr., nom. illeg.; *Stellera bodinieri* H. (Indole alkaloids.)

Stemodia L. Scrophulariaceae (Plantaginaceae)

Greek *stemon* ‘stamen’ and *dis* ‘two, double’, referring to the anthers; see C. Linnaeus, *Systema Naturae*. Ed. 10. 1091, 1118, 1374. 1759 and *Fieldiana, Bot.* 24(9/4): 319–416. 1973.

Stemodia ericifolia K. Schum. (*Chodaphyton ericifolium* Minod; *Chodaphyton ericifolium* (Kuntze) Minod; *Stemodia ericifolia* (Kuntze) K. Schum.; *Stemmodiacra ericifolia* Kuntze)

South America.

See *Revis. Gen. Pl.* 3[3]: 239. 1898 and *Bot. Jahresber. (Just)* 26, pt. 1: 395. 1900, *Repert. Spec. Nov. Regni Veg.* 8: 210. 1910, *Bull. Soc. Bot. Genève sér. 2*, 10: 236, fig. 35. 1918

(A contraceptive, a decoction of the whole plant.)

Stemodia lythrifolia F. Muell. ex Benth.

Australia. Small plant, blue flowers, pungent scent

See *Fl. Austral.* 4: 486. 1868

(Scented plants used to treat headaches, put them in water until the water has acquired flavour.)

in W. Australia: bunu bunu

Stemodia maritima L.

West Indies.

See *Systema Naturae*, Editio Decima 2: 1118. 1759 and *Regnum Veg.* 127: 91. 1993

(An infusion for stomachache, body pain, to ease swellings and dropsy.)

in English: broomhead, goma-bush, pond crab, poor man's strength, Robert bush

Stemodia viscosa Roxb.

Sri Lanka, India.

See Roxburgh, William (1751–1815), *Plants of the coast of Coromandel*: selected from drawings and descriptions presented to the Hon. Court of Directors of the East India Company, by William Roxburgh; published by their order under the direction of Sir Joseph Banks. London, George Nicol, 1795–1819

(Infusion of dried plant demulcent. Leaf paste for chronic eczema and skin diseases; crushed leaves applied on forehead as a febrifuge.)

in India: antu bode sara, antu kaamini gida, bodasarum, bodasaramu, cherangu poondu, guntakaaminamu, guntakaminam, nukachuni

Stemona Lour. Stemonaceae

Greek *stemon* 'stamen', referring to the protruding and foliaceous stamens; see João (Joannes) de Loureiro (1717–1791), *Flora cochinchinensis* 401, 404. [Lisboa] 1790.

Stemona australiana (Benth.) C.H. Wright (*Roxburghia javanica* var. *australiana* Benth.; *Stemona versteegii* Schltr.)

S. New Guinea to N. Australia.

See *J. Linn. Soc., Bot.* 32: 496. 1896 and *Bot. Jahrb. Syst.* 59: 542. 1925

(Crushed leaves used to treat snakebite.)

Stemona burkillii Prain

W. Indochina.

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 73: 43. 1902

(Tuberous roots used as an insecticide, and also to treat skin diseases.)

Stemona collinsiae Craib

Thailand. Low erect herb

See *Bull. Misc. Inform. Kew* 1920: 305. 1920

(Tuberous roots used to treat skin diseases; roots eaten and rubbed on umbilicus for stomachaches.)

Stemona curtisii Hook.f. (*Stemona minor* Hook.f.)

Sri Lanka, Thailand to Pen. Malaysia. Tall climber

See *Fl. Brit. India* 6: 298. 1892

(Tuberous roots used to treat skin diseases.)

Stemona japonica (Blume) Miquel (*Helwingia argyi* H. Léveillé & Vaniot; *Roxburghia japonica* Blume; *Stemona argyi* (H. Léveillé & Vaniot) H. Léveillé; *Stemona ovata* Nakai)

China.

See *Enum. Pl. Javæ* 1: 9. 1827, *Prolus. Fl. Jap.* 386. 1867 and Ji Zhanhe. *Stemonaceae*. In: Wu Kuo-fang, ed., *Fl. Reipubl. Popularis Sin.* 13(3): 254–260. 1997

(Roots stomachic, astringent.)

in China: bai bu

Stemona javanica (Kunth) Engl. (*Roxburghia gloriosoides* Zoll. ex Kunth; *Roxburghia javanica* Kunth; *Stemona asperula* J.J. Sm.; *Stemona papuana* Schltr.; *Stemona sulensis* J.J. Sm.)

Java, New Guinea.

See *Bot. Jahrb. Syst.* 59: 542. 1925

(Tuberous roots used as a fish poison; an extract from the stem given as a drink after childbirth for purification and cooling.)

Stemona parviflora C.H. Wright

China.

See *J. Linn. Soc., Bot.* 32: 496. 1896

(Postpartum remedy.)

in China: xi hua bai bu

Stemona phyllantha Gagnep.

Thailand.

See *Bull. Soc. Bot. France* 81: 147. 1934

(The root applied as a shampoo to kill head lice.)

Stemona sessilifolia (Miquel) Miquel (*Roxburghia sessilifolia* Miquel; *Stemona erecta* C.H. Wright)

China.

See *Ann. Mus. Bot. Lugduno-Batavi* 2: 211. 1866, *Prolus. Fl. Jap.* 386. 1867, *Bull. Misc. Inform. Kew* 1895: 117. 1895

(Postpartum remedy, stomachic, astringent.)

in China: zhi li bai bu

Stemona tuberosa Lour. (*Roxburghia gloriosa* Pers.; *Roxburghia gloriosoides* Roxb.; *Roxburghia stemona* Steud.; *Stemona acuta* C.H. Wright; *Stemona gloriosoides* Voigt; *Stemona moluccana* (Blume) C.H. Wright)

Trop. & Subtrop. Asia. A glabrous, perennial, herbaceous, fleshy yellow or black tuberous fusiform roots, leaves opposite, inflorescence axillary racemose, fruit a pendulous capsule, 2 valves, vesicular aril, flowers have an unpleasant smell

See *Flora Cochinchinensis* 2: 401, 404. 1790, *Pl. Coromandel* 1: 29. 1795, *Syn. Pl.* 1: 412. 1805, *Nomenclator Botanicus*.

Editio secunda 2: 475. 1841, *Hortus Suburbanus Calcuttensis* 650. 1845, *Journal of the Linnean Society, Botany* 32: 493–494. 1896

(Toxic principles. Roots antibacterial, antitussive, anthelmintic, antiseptic, insecticides, and also to treat skin diseases; roots/tubers decoction taken for tuberculosis and fever; tuber powder taken with honey for gynaecological disorders.)

in English: tuber stemona

in China: bai bu, pai pu, da bai bu

in India: kai-mam, konda tamara

in Indonesia: isoratu, kanyalut, ngabalo

in Malaysia: kemili hutan

in Thailand: non taai yaak

in Vietnam: b[as]ch b[ooj], bach bo, c[ur] ba m[uw][ow]i, d[aa]y d[ej]t [as]c

Stemonurus Blume Icacinaeae

Greek *stemon* and *oura* ‘a tail’, referring to the tufted stemens; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 13: 648. Batavia (Jan.) 1826.

Stemonurus secundiflorus Blume (*Lasianthera apicalis* Benth. & Hook.f.; *Lasianthera secundiflora* Miq.)

India. Tree, thick leaves, axillary flowers, cup-shaped calyx

See *Bijdr. Fl. Ned. Ind.* 13: 649. 1826, *Fl. Ned. Ind., Eerste Bijv.* 3: 342, t. 2. 1861, *Gen. Pl.* [Bentham & Hooker f.] 1(1): 350. 1862 [Alternate title: *Flora Indiae Batavae*,... Supplementum Primum. *Prodromus Florae Sumatranae*.]

(Leaves to cure swellings.)

Stenandrium Nees Acanthaceae

From the Greek *stenos* ‘narrow’ and *aner, andros* ‘man, male, stamen, anther’, see *A Natural System of Botany* 444. 1836 and *Journal of Botany, British and Foreign* 44: 153–154, t. 478B. 1906.

Stenandrium guineense (Nees) Vollesen (*Crossandra elatior* S. Moore; *Crossandra guineensis* Nees; *Stenandriopsis guineensis* (Nees) Benoist)

Tropical Africa. See also *Crossandra*

See *Prodr.* (DC.) 11: 281. 1847 and British Museum (Natural History). Department of Botany. *Catalogue of the plants collected by Mr. & Mrs. P.A. Talbot in the Oban district South Nigeria* ... by A.B. Rendle (1865–1938), E.G. Baker (1864–1920), H.F. Wernham (1879–1941), Spencer Le Marchant Moore and others. 79. London: Printed by order of the Trustees, 1913, *Bulletin du Muséum d’Histoire Naturelle*, sér. 2 15: 235. 1943, *Kew Bull.* 47(2): 182. 1992

(Leaves astringent, for diarrhea and skin diseases.)

Stenocereus (A. Berger) Riccobono Cactaceae

Greek *stenos* ‘narrow’ with *Cereus*.

Stenocereus thurberi (Engelm.) Buxb. (*Cereus thurberi* Engelm.; *Lemaireocereus thurberi* (Engelm.) Britton & Rose; *Marshallocereus thurberi* (Engelm.) Backeb.; *Rathbunia thurberi* (Engelm.) P.V. Heath) (*Lemaireocereus* Britton & Rose, for the French botanist Antoine Charles Lemaire, 1801–1871, naturalist, horticultural journalist, specialist on Cactaceae.)

North America.

See *American Journal of Science, and Arts*, ser. 2, 17: 234–235. 1854 and *Contributions from the United States National Herbarium* 12(10): 426. 1909, *Cactus and Succulent Journal* 23(4): 121. 1951, *Botanische Studien* 12: 101. 1961

(Fresh slice for rheumatism and aching parts of the body. Alkaloids present.)

Stenochlaena J. Sm. Blechnaceae (Stenochlaenaceae, Stenochlaenoideae)

Greek *stenos* and *chlaena, chlaenion* ‘a cloak, blanket’, referring to the sporophyll; see Presl, Carl (Karl, Carel, Carolus) Borivoj (Boriwog, Boriwag) (1794–1852), *Tentamen Pteridographiae: seu genera filicacearum praesertim juxta venarum decursum et distributionem exposita*. Pragae, 1836, J. Smith, *Hooker’s Journal of Botany*. 3: 401. 1841; 4: 149. 1841, *Epimel. Bot.* 166. 1851, Beddome, Richard Henry (1830–1911), *Handbook to the ferns of British India, Ceylon and the Malay Peninsula*. Calcutta and London, 1883–1892.

Stephania Lour. Menispermaceae

Greek *stephein* ‘to crown’, *stephanos* ‘a crown’, referring to the arrangement of the stamens or to the nature of the seeds; the genus *Stephania* Willd. is dedicated to the German botanist Christian Friedrich Stephan, 1757–1814, physician, professor of botany and chemistry at Moscow, from 1811 Director of the Forestry Institute St. Petersburg, author of *Icones plantarum mosquensium*. Mosquae 1795. See *Flora Cochinchinensis* 598, 608. 1790 and *Das Pflanzenreich* 94(Heft 46): 264. 1910, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 324. 1965.

Stephania abyssinica (Quart.-Dill. & A. Rich.) Walp. (*Clypea abyssinica* Quart.-Dill. & A. Rich.)

Ethiopia. Vine, glabrous, slender, twining, climber, trailing, scrambling, woody at the base, leaves with cordate base with felty indumentum, inflorescences in loose axillary panicles, yellow to pink green minute flowers, fruit red when ripe, in riverine forest

See *Flora Cochinchinensis* 598, 608. 1790, *Bijdragen tot de flora van Nederlandsch Indië* 26. 1825, *Annales des Sciences Naturelles; Botanique, sér. 2*, 14: 263. 1840, *Repertorium Botanicum Systematicum*. 1: 96. 1842 and *Kew Bulletin* 1, 10–25. 1937, *Journal of Ethnopharmacology* 18: 147–165. 1986, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 110: 516–525. 2007

(Stem and root bark antimicrobial, tonic, aphrodisiac, a mild purgative, for labor pain, fevers. Grind roots for a disease caused by *kuruba* anthrax. Aerial parts or leaves for diarrhea, mastitis, rabies, syphilis, stomachache. Roots decoction

for nematodes. Magico-religious beliefs, to formulate a wish, psychosis against a spell or bewitchment.)

in Burundi: umuhanda, umuvugo

China. See *Das Pflanzenreich* IV. 94: 275. 1910

(Tuberous roots for skin diseases.)

in China: bai xian shu

Stephania dicentrinifera H.S. Lo & M. Yang

China.

See *Bulletin of Botanical Research* 2(1): 48–49. 1982

(Tuberous root of this species contains large amount of alkaloids.)

in China: he bao di bu rong

Stephania dinklagei (Engl.) Diels (*Cissampelos dinklagei* Engl.) (For the German merchant and plant collector Max Julius Dinklage, 1864–1935, in West Africa (Liberia, from 1894 to 1922 ten visits); see (obituary in) *Notizbl. Bot. Gart. Berl.* 12: 413–415. 1935, F.N. Hepper, “Botanical collectors in West Africa, except French territories, since 1860.” in *Comptes Rendus de l’Association pour l’étude taxonomique de la flore d’Afrique*, (A.E.T.F.A.T.). 69–75. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. 1965, Anthonius Josephus Maria Leeuwenberg, “Isotypes of which holotypes were destroyed in Berlin.” *Webbia*. 19: 861–863. 1965, René Letouzey, “Les botanistes au Cameroun.” in *Flore du Cameroun*. 7: 1–110. Paris 1968, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 25. Utrecht 1971.)

West Africa. Herbaceous vine, climber, liana, slender, young stem ridged, leaves papery with reddish nervation beneath, inflorescence branches red, on old leafless branches flowers greenish, fruits depressed-globose, in secondary deciduous forest

See *Species Plantarum* 2: 1031–1032. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und*

Pflanzengeographie 26: 399. 1899 and *Das Pflanzenreich* IV, 94: 265. 1910, *Journal d’Agriculture Tropicale et de Botanique Appliquée* 17: 295–339. 1970, *Journal of Natural Products* 43(1): 123–129. 1980, *Journal of Ethnopharmacology* 8: 53–63. 1983, *Planta Medica* 69: 867–868. 2003, *Journal of Ethnopharmacology* 89: 185–191. 2003

(Plant decoction used to induce menstruation; a plant extract taken as a cough remedy; stems taken as a sedative and analgesic. A large number of alkaloids have been isolated from the plant. Roots and leaves vermifuge, astringent, for dysentery. Sedative, antispasmodic, anthelmintic, postpartum remedy, antitussive, hypnotic, a fresh infusion of young leaves given to children with stomachache; women who wish to become pregnant eat the leaves cooked with rice, and wrap the tender stem around the hips; leaves used as an aphrodisiac and to treat impotence in men. Root used against internal parasites; scrapings of the fresh root applied in a hot poultice to the ribs to relieve pain in the sides. Seeds used against leprosy. Pounded stems in the preparation of a fish poison.)

in Yoruba: agbagi-akokko

Stephania elegans Hook. f. & Thomson

India, Nepal.

See *Flora Indica*: being a systematic account of the plants . . . 1: 195. 1855 and *Taxon* 30: 842–843. 1981

(Veterinary medicine, root juice given to remove worms from calf stomach.)

in China: ya li qian jin teng

in Nepal: taro lahara

Stephania epigaea Lo (*Stephania delavayi* Diels)

China. Creeping vine, leaves rounded and peltate, large tuber

See *Das Pflanzenreich* IV. 94: 275. 1910, *Acta Phytotaxonomica Sinica* 16(1): 34–36, pl. 7, f. 1–3. 1978

(Root tubers of this species are rich in alkaloids. Sliced, stewed bulb, used for general well-being.)

in China: di bu rong

Tibetan name: gai bu gu tu

Stephania forsteri (DC.) A. Gray (*Cocculus forsteri* DC.; *Cocculus japonicus* DC. var. *timoriensis* DC.; *Stephania forsteri* A. Gray; *Stephania japonica* (Thunberg) Miers var. *timoriensis* (DC.) Forman; *Stephania japonica* var. *timoriensis* (DC.) J. Florence)

Asia.

Sterculia L. Malvaceae (Sterculiaceae)

Sterculius (and also Stercutus, Sterculus, Sterculinius and Sterces were all epithets of Saturnus or Picumnus; see Q. Serenus Sammonicus, 3rd century A.C., author of a *liber medicinalis*) was the Roman god of privies, a Roman god who presided over cultivation and manuring; from the Latin *stercus, oris* 'dung, manure', it refers to unpleasant smell of the flowers and leaves of some species, see *Species Plantarum* 2: 1007–1008. 1753, *Histoire des plantes de la Guiane Française* 2: 694–695, t. 279. 1775, *The Paradise Londinensis* sub t. 69. 1807, *Florae Fluminensis* 382. 1825[1829], *Reliquiae Haenkeanae* 2(2): 140–141. 1835 and *Fieldiana, Bot.* 24(6): 403–428. 1949, *Botanisk Tidsskrift* 67(4): 317. 1973, *Notes Roy. Bot. Gard. Edinburgh* 42: 121–149. 1984.

Sterculia africana (Lour.) Fiori (*Cola cordifolia* sensu Sim; *Sterculia guerichii* K. Schum.; *Sterculia ipomoeifolia* Garcke; *Sterculia tomentosa* sensu Sim; *Sterculia triphaca* R. Br.; *Sterculia triphaca* var. *rivaei* K. Schum.; *Triphaca africana* Lour.)

East Africa. Tree, deciduous, fluted trunk, smooth flaking bark, resinous, rounded crown, erect spreading branches, flowers sexes separate on the same tree, no petals, green-yellow sepals joined together, woody beaked fruits, blue-grey seeds, leaves edible, flour from the seeds, in hot dry areas, on rocky hills, woodlands

See *Flora Cochinchinensis* 577. 1790, *Plantae Javanicae Rariores* 228. 1844 and *Agricultura Coloniale* 5, Suppl.: 37. 1911

(Boiled bark and roots used for fever and influenza; bark infusion a remedy for mental disorders and snakebite; leaves and bark decoction inhaled to treat fever and influenza. Irritating hairs along lip of suture of fruits.)

in English: African star chestnut, mopopoja tree, tick tree

in East Africa: mluze, muusya, ngoza

in Nigeria: kukuki

in Southern Africa: muKukubuyu, muNera, muNgoza, muRere (Shona); mopopoja (Subya: Botswana, eastern Caprivi); mokokobuyu (Kololo: Barotseland); omumbambahako (Herero)

in Tanzania: mboza, meza, mfune, mhoja, mhozya, mkomboo, mkorogomwa, mluze, moza, mtakaa, mtumbwi, muhoja, muhozya, muluze, muoza, mwoze, sagwia, tlágwa

(Injuries caused by irritating hairs on the inside the fruits; seeds are edible, they have a purgative effect if consumed in large quantities. Diuretic, diaphoretic.)

in English: Panama, Panama tree

in Tropical America: anacaguitas, bellota, camajon duro, camaruca, castaño, mejor que el mani, panama

in Bolivia: sujo

in Mexico: bellota, castañas

in Panama: kupu, mejor que el mani (the seeds)

Sterculia appendiculata K. Schum. (*Sterculia appendiculata* K. Schum. ex Engl.)

Tanzania. Tree, straight, deciduous, dense rounded crown, clear bole, bark smooth, branchlets densely rusty, young shoots producing white sap when cut, large maple-like leaves at the end of branches, young leaves densely woolly with rusty hairs, green-yellow-brown flowers in hairy few-flowered

terminal racemes or panicles, calyx campanulate, fruit splitting into 2–3 carpels brown tomentellous outside, seeds dark brown with a yellow soft aril, seeds roasted or cooked and eaten, coastal and riverine forest

See *Abh. Preuss. Akad. Wiss.* (1894) 36 1894, *Die Pflanzenwelt Ost-Afrikas* C: 271–272, t. 13, 29. 1895

(Roots soaked increase potency in men; roots decoction to treat bilharzia and prevent miscarriage in pregnant women. Bark and leaves decoction a remedy for convulsions, paralysis and impotence.)

in English: tall sterculia

in Tanzania: mfune, mgude, mharata-nyani, mjale, mkunya

Sterculia foetida L. (*Clompanus foetida* Kuntze; *Clompanus foetidus* (L.) Kuntze; *Clompanus molucanus* Raf.; *Sterculia mexicana* R. Br. var. *guianensis* Sagot)

India. Large tree, digitate leaves, bright red or yellow stinking flowers, woody fruits, smooth gray seeds, unpleasant smell, fiber plant, edible seeds

See *Species Plantarum* 2: 1008. 1753, *Histoire des plantes de la Guiane Française* 773. 1775, *Sylva Telluriana* 73. 1838, *Annales des Sciences Naturelles, Botanique* (Paris) 6(11): 153. 1881, *Revisio Generum Plantarum* 1: 77. 1891 and *Journal of Cytology and Genetics* 7–8: 98–105. 1973, *Acta Botanica Brasilica* 5(2): 37–51. 1991

(Injuries caused by irritating hairs on the inside the fruits; seeds are edible, they have a purgative effect if consumed in large quantities. Bark and young leaves decoction diuretic, diaphoretic, abortifacient. Fresh leaf juice insect repellent. Fruit decoction astringent, in gonorrhoea, diarrhoea. Seed oil laxative; seeds abortifacient, if swallowed by any means in raw form cause nausea and giddiness.)

in English: great sterculia, hazel sterculia, horse almond, Indian almond, Java olive

in China: xiang ping po

in India: badam, jangal beddam

in Indonesia: djankang, kepuh

Malayan names: kelumpang jari, kelumpang

in Philippines: kalumpang

in Sri Lanka: kadutenga, kaduteynga, pinari, telambu, telembu

in Vietnam: trom hoi

Sterculia guttata Roxb. & G. Don (*Sterculia guttata* Roxb.; *Sterculia guttata* Roxb.)

India. Deciduous small tree, furrowed-cracked grey bark, straight bole, stout twig, entire sparsely hairy leaves, caducous ensiform stipules, flowers in racemes, follicles orange-red, roasted seeds eaten in scarcity, inner bark for cordage

See *Hortus Bengalensis*, or a catalogue ... 50. 1814, *Fl. Ind.* (Roxburgh) 3: 148. Oct-Dec 1832 and *Phil. J. Sci.* 7: 413–415. 1912

(Juice of crushed stem bark with leaves of *Pogostemon parviflorus* and *Eclipta alba* as febrifuge. Seeds eaten raw as painkiller.)

in India: kukrul, thondi

Sterculia hamiltonii (Kuntze) Adelb. (*Clompanus hamiltonii* Kuntze)

India. Small trees, gray bark, simple leaves, pale pink flowers, edible seeds, bark for cordage, young fruits edible after cooking

See *Revis. Gen. Pl.* 1: 77. 1891 and *Blumea* 5: 506. 1945

(Febrifuge.)

Sterculia indica Merr. (*Sterculia coccinea* Wall.; *Sterculia coccinea* Jack; *Sterculia coccinea* Roxb. & G. Don; *Sterculia coccinea* Roxb.)

India. Tree, grey warty bark, simple lanceolate leaves, greenish yellow flowers in axillary drooping panicles, scarlet follicles, tender fruits eaten cooked, mature seeds eaten fried or roasted

See *Hort. Bengal.* 50. 1814, *Malayan Misc.* i. (1820) n. I. 20. 1820, *Numer. List* [Wallich] n. 1122. 1829, *Gen. Hist.* 1: 516, descr. 1831, *Fl. Ind.* 3: 151. 1832 and *J. Arnold Arbor.* 32: 246. 1952

(Leaves and bark decoction to treat fever, inflammation and influenza.)

in India: kaun-kelau-araung

Sterculia javanica R.Br.

Indonesia, Java.

See Brown, Robert (1773–1858), *Pterocymbium*, with observations on Sterculieæ, the tribe to which it belongs. [alt. title: *Plantae Javanicae rariores*] London: [s.n.] 1844

(Seeds used for chest complaints.)

in Indonesia: hantap gedè, kalongan, pranadjiwa manis

Sterculia murex Hemsley (from the Latin *murex* 'prickly')

South Africa, Transvaal. Tree, spreading, palmately compound velvety leaves, waxy yellow flowers, woody five-lobed fruits covered with hard spines, seeds eaten by baboons and monkeys, roasted seeds eaten by humans

See *Bull. Misc. Inform. Kew* (1893) 155. 1893, *Hook. Icon. pl.* xxiii. (1894) t. 3278. 1894

(Stinging hairs irritating on contact with the skin or eyes.)

in English: lowveld chestnut

in Southern Africa: laevelde kastaiing, laeveldekastaiing, mohlatsane, umBhaba

Sterculia parviflora Roxb. (*Sterculia parviflora* Roxb.; *Sterculia parviflora* Roxb. ex G. Don; *Sterculia parviflora* (Ducke) E.L. Taylor ex Brako & Zarucchi; *Sterculia parviflora* (Ducke) E.L. Taylor, nom. illeg.)

India. Small tree, scaly, inner bark fibrous, glabrous leaves trinerved at base, velvety fruits, black seeds

See *Gen. Hist.* 1: 516. 1831, *Flora Indica*; or, descriptions of Indian Plants (Roxburgh) 3: 147. 1832 and *Arch. Jard. Bot. Rio de Janeiro* 4: 130. 1925, *Monographs in Systematic Botany from the Missouri Botanical Garden* 45: 1259. 1993

(Purgative.)

Sterculia rhyngocarpa K. Schum.

Tropical Africa.

See *Bot. Jahrb. Syst.* 34(3): 323. 1904

(Stem bark for stomachache and fevers.)

Sterculia rubiginosa Vent. (*Sterculia rubiginosa* Zoll. ex Miq.)

India. Deciduous tree of the lower canopy, oblong leaves, blade bears long stiff hairs down the lower midrib, short leaf stalk, scarlet fruits, black seeds

See *Jardin de la Malmaison* t. 91. 1805, *Fl. Ned. Ind., Eerste Bijv.* 3: 399. 1861 [Alternate title: *Flora Indiae Batavae*,... Supplementum Primum. *Prodromus Florae Sumatranæ*]

(Leaf decoction taken for cough and asthma; to treat stomachache, leaves of *Cordia grandis* and *Sterculia rubiginosa* pounded and taken in water. Fruits mildly laxative. Plant paste of *Phymatodes scolopendria* along with leaves of *Clerodendrum paniculatum* L. and *Sterculia rubiginosa* given to check the flow of blood with urine.)

in India: fuk

Sterculia scaphigera Wall. ex G. Don (*Clompanus scaphigera* (Wall. ex G. Don) Kuntze; *Clompanus scaphigera* Kuntze; *Scaphium scaphigerum* (Wall. ex G. Don) G. Planch.; *Scaphium wallichii* Schott & Endl.; *Scaphium wallichii* (Wall. ex G. Don) Schott & Endl.; *Sterculia scaphigera* Wall. ex Mast.; *Sterculia scaphigera* Wall., nom. inval.; *Sterculia scaphigera* G. Don; *Sterculia scatigera* G. Don)

Malay Peninsula.

See *Numer. List* [Wallich] n. 1130. 1829, *A General History of the Dichlamydeous Plants* 1: 517. 1831, *Meletemata Botanica* 33. 1832, *Fl. Brit. India* [J.D. Hooker] 1(2): 361. 1874, *Revisio Generum Plantarum* 1: 78. 1891

(Seeds astringent and stomachic.)

Malay name: kembang semangkok

Sterculia tragacantha Lindl.

Sierra Leone. Tree, deciduous, aromatic smelling, long cylindrical bole, corky deeply fissured bark, glandular flowers

red-purple, cone-like flower heads, woody follicles beaked boat-shaped, splitting fruit red-golden-brown, mature fruit capsules open to release 2–3 grey-blue edible seeds, gum and sapwood and other parts of the tree eaten by chimpanzees, riverbank, swamp, streamside

See *Edwards's Botanical Register* 16: t. 1353. 1830

(Shoots, bark and seeds astringent, vermifuge, generally healing, laxative, antiinflammatory, for digestive disorders, applied as poultice for boils and whitlow. Bark for dropsy, swellings, edema, gout, nasopharyngeal affections and pulmonary troubles; bark and leaves for diarrhea and dysentery. Fruit and seeds for stomachache.)

in English: African tragacanth, parasol tree

in Cameroon: efok afum, mboli, popoko, vebolu

in Central Africa: dototo, efok, fembe, libolu, mbandamaka

in Gabon: ezelfou

in Guinea: barquelei, búè, ereitô, freitô, mandandja, umbufuré

in Ivory Coast: poré-poré

in Nigeria: oloko, omorin, owun, okagbo, woran-woran, oporipor, omu, udo-gohoho, eyong, yebel, wonron-wonron, paupau, pio, ndo-toto, etude, lengui, langue, botopia, poripori, apompom, aloyefun, tutumbo, kukukin-rafi, lakale, rofo-rofo; kukukin rafi (Hausa); nyichi kuso (Nupe); alawefun (Yoruba); oporipor (Edo); apompor (Kwale); oloko (Igbo); kemuan (Boki); udot eto (Ibibio)

in Senegal: forko, tiukud

in Tanzania: kakubabolo, lufifia, mkubukubu

in Yoruba: alawefan, ikakaale, ilakaale ogun, iwanranwanran, okaagbo, omorun, owun, wanranwanran

in Zaire: diolofo

Sterculia urens Roxb. (*Kavalama urens* (Roxb.) Raf.; *Kavalama urens* Raf.)

India. Tree, palmate velvety leaves, greenish-yellow flowers with a bright red centre borne in panicles, pubescent follicles with stinging hairs, seeds eaten after roasting, gum and fruits eaten

See *Plants of the Coast of Coromandel* 1: 25, t. 24. 1795, *Sylva Telluriana* 72. 1838 and *Journal of Cytology and Genetics* 19: 115–117. 1984, *Journal of Cytology and Genetics* 22: 95–101. 1987

(Used in Ayurveda and Sidha. Gum externally applied on scorpion stings, pain in joints; gum with sugar mixed in water given as a postpartum remedy; gum makes a jelly in water, mixed with cold milk, given to women in menorrhagia, and also for piles as astringent and cooling; gum resin mixed with curd taken to cure blood dysentery, constipation, diarrhea; gum eaten for leucorrhoea. Leaves applied to wounds, fractures and cracked skin, also to cure throat infection. The

bark pounded and given before childbirth to facilitate delivery; dried stem bark decoction given in skin diseases, rheumatism, rheumatoid arthritis; bark powder given as emetic; bark decoction of *Hymenodictyon orixense* with barks of *Sterculia urens* and *Madhuca longifolia* var. *latifolia* and root of *Carissa congesta* given as analgesic and to facilitate delivery; stem bark juice given to treat piles, also gum soaked in water and applied locally. Paste of roots applied in dislocation of bones and fractures; root pounded and taken with water for fever. Veterinary medicine, leaves for pneumonia in cattle. Stem bark and leaves as fish poison.)

in English: kutira gum

Sterculia villosa Roxb. (*Sterculia armata* Mast.; *Sterculia lantsangensis* Hu; *Sterculia ornata* Wall. ex Kurz; *Sterculia ornata* Wall. ex Voigt; *Sterculia villosa* Roxb. ex Sm.; *Sterculia villosa* Roxb. ex DC.)

India. Trees, deciduous, grey-white bark, lobed leaves crowded at the end of branches, yellow flowers in panicles, scarlet woody coriaceous rusty fruits, black seeds edible after roasting pericarp

See *Hort. Bengal.* 50. 1814, *Cycl.* (Rees) 34: *Sterculia* no. 16. 1816, *Flora Indica*; or, descriptions of Indian Plants (Roxburgh) 3: 153–154. 1832, *Hort. Suburb. Calcutt.* 105. 1845, *Fl. Brit. India* [J.D. Hooker] 1: 355, 357. 1874 and *Bulletin of the Fan Memorial Institute of Biology* 8(1): 42. 1937

(Gum laxative. Decoction of bark given for constipation, a paste with ginger applied on hydrocele; paste rubbed over the body to check fever; bark juice with *Pongamia pinnata*

oil used on ulcers. Root tonic, root made into a paste with table sugar and given to children in blood dysentery. Seeds paste with ginger applied on painful swelling of scrotum. Veterinary medicine, gum employed.)

in China: rong mao ping po

in India: anai-nar, araung, arni vakenua, bilidale, chekaung, chikaung, chikaung-araung, gudgudala, gulkandar, jinje-kaung, kaung-kulu, marattham, massu, murattham, osha, othla, palhandi, sardol, savaya, theng-chi-kaung-laung, udal, udalla, udar, udial, vakka

Stereospermum Cham. Bignoniaceae

From the Greek *stereos* 'solid, firm, tight' plus *sperma* 'seed', see *Linnaea* 7: 720. 1833, *Flora* 25 (2, Beibl.): 28. 1842, *Notul. Pl. Asiat.* (Posthum. Pap.) 4: 564. 1854, *Bull. Mens. Soc. Linn. Paris* 707–708. 1887.

Stereospermum acuminatissimum K. Schum.

West Africa, Guinea, Cameroon. Tree, straight, slightly buttressed, wood white, savanna forest, pale pink-purple red flowers

See *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4, 3B: 243. 1895

(Stem bark and leaves dressing for sores and wounds. Bark hemostatic, used on sores and wounds.)

in Ghana: esono-tokwa kufu, nufutene, osontokwakofuo, tokwakufuo

in Guinea: moro iri

in Ivory Coast: balié, demontué, duo, fara, tchuo, urte, vué-buri iri

in Mali: moro iri

in Niger: kavogu, nali limebu, sansami

in Nigeria: akoko-igbo, alakiriti, eru yeyè, eru iyeye, oshuobon, osuobon, paripakoje; eru yeye (Yoruba); oshuobon (Edo)

in Senegal: bani, bolnac, fèhr, golumbi, moro iri

in Sierra Leone: bumbusoi, yale-na

in Upper Volta: nali limebu

in Yoruba: eru iyeje

Stereospermum chelonoides DC. (*Bignonia chelonoides* L.f.; *Bignonia suaveolens* Roxb.) (*Bignonia* L., named in honor of Abbé Jean Paul Bignon, 1662–1743, librarian to King Louis XIV. See Carl Linnaeus, *Species Plantarum* 2: 622–625. 1753 and *Genera Plantarum* Ed. 5. 273. 1754, *Genera Plantarum* 137. 1789, Henry C. Andrews, *The Botanist's Repository.* 2: t. 86. London 1800.)

India. Deciduous tree, flowers sweetly fragrant borne in large hairy panicles

See *Suppl. Pl.* 282. 1782 [1781 publ. Apr 1782], *Linnaea* 7: 720. 1833, *Bibliothèque Universelle de Genève* 17: 124. 1838

(Used in Ayurveda and Sidha. Root bitter, astringent, cardiotoxic, cooling, diuretic and tonic, to treat inflammations, vomiting, dyspepsia, flatulence, asthma, fevers, anasarca, diseases of the blood. Bark ground and mixed with water taken for stomachache, cholera, liver trouble, indigestion, dysentery and malaria; bark decoction or bark paste applied on burn, wounds; a decoction used as febrifuge. Flowers mixed with honey given to check hiccup and also taken as aphrodisiac. Contact therapy, a necklace of seeds is worn to cure headache. Veterinary medicine, to stop bleeding, antiseptic, crushed leaves applied on wounds. Ceremonial, worship tree, rain making through sacrifices in the sacred forest.)

in English: trumpet

in India: adri, ambuvaasini, dieng psiar, dieng sir, gallugudu, goddalipukusu, hadari, hadri, isakarasi, ishakarasi, ishakarasi, ishirashi, kacasthali, kalagora, kalagori, kalagoru, kalgari, kalighootroo, kaligoru, kaligothu, kaligottu, kalladi, kalludure, kalmanasingi, kaludi, kanemaanse bringi, karannavu, karanyavu, kariguddada hoo, kariguddada kalludure, karingkura, karinkara, karivudure, kastapatala, kirsal, kokess, kuberaakshi, kuberaksha, kuberakshi, magavaepa, magavepa, malaili, malevudure, mallali, mallalli, mogavapa, mokagapa, mokayapa, mokkapu, mookavepa, musutong, najudi, paadari, paadari chettu, paatala, paathali, padal, padar, pader, padhel, padiri, padri, padrie vayr, patala, patali, pathiri, patla, pega, pisul, pudikekadunirudure, pudikekatniruli, pulakail, pulakevalamu, pumbadiri, pupadiri, puruli, puvvulave, ser phang, sungpet, tagada, thagu, zinghal

Stereospermum colais (Buch.-Ham. ex Dillwyn) Mabb. (*Bignonia colais* Buch.-Ham. ex Dillwyn; *Bignonia colais* Buch.-Ham. ex Wall.; *Dipterosperma personatum* Hassk.; *Stereospermum colais* var. *puberula* (Dop) D.D. Tao; *Stereospermum personatum* (Hassk.) Chatterjee; *Stereospermum personatum* var. *puberula* Dop; *Stereospermum tetragonum* DC.)

SE Asia, China. Tree, deciduous, opposite pinnate leaves, fragrant yellowish-white flowers in terminal paniculate cymes, curved quadrangular elongated terete capsules, winged seeds

See *Numer. List* [Wallich] sub n. 6501. 1832, *Bibliothèque Universelle de Genève* 17: 124. 1838, *A review of the references to the Hortus malabaricus* ... 6(26): 28. 1839, *Flora* 25(Beibl. 28): 2. 1842, *Prod.* (DC.) 9: 210. 1845, *FBI* 4: 382. 1884 and *Bulletin of the Botanical Society of Bengal* 2(1): 70. 1948, *Taxon* 26(5-6): 533. 1977, *Taxon* 27: 553. 1978, *Flora Reipublicae Popularis Sinicae* 69: 25. 1990

(Used in Ayurveda and Sidha. Bark juice given in stomachache and vomiting. Heartwood decoction taken against rheumatism. Roots, leaves and flowers decoction used as febrifuge. Tender leaves with rice cake as vermifuge; leaves decoction febrifuge; leaves juice applied on itches; leaf juice mixed with lime and used in madness, hysteria, nervous

breakdown. Root paste applied on the region of scorpion sting. Flowers and fruits used in scorpion sting. Magico-religious beliefs, ritual, leafy twigs used in worship.)

in Bangladesh: chaincha

(Roots and flowers infusion drunk to treat dysentery.)

in Mexico: manzanilla de agua

Stiburus Stapf Poaceae (Gramineae)

Possibly from the Latin *stibi*, *is* and *stibium*, *ii* ‘antimony, black antimony’; or from Greek *stibi* and *oura* ‘a tail’, or *sibe* ‘stipa’, sometimes referred to as *Eragrostis*, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, O. Beccari (1843–1920), *Malesia: raccolta di osservazioni botaniche intorno alle piante dell’arcipelago Indo-Malese e Papuano* pubblicata da Odoardo Beccari, destinata principalmente a descrivere ed illustrare le piante da esso raccolte in quelle regioni durante

i viaggi eseguiti dall’anno 1865 all’anno 1878 ... Genova 1877–1890, *Flora Capensis* 7: 318. 1898, *Hooker’s Icones Plantarum* 27: t. 2612. 1899 and *Flora Capensis* 7(4): 696–697. 1900, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81–115, 219, 230. 2001.

Stiburus alopecuroides (Hack.) Stapf (*Eragrostis alopecuroides* Balansa; *Eragrostis tinctoria* S.M. Phillips; *Lasiochloa alopecuroides* Hack.; *Triphlebia alopecuroides* (Hack.) Stapf)

South Africa, Zimbabwe. Perennial, tufted, rhizomatous, leaf blade flattened and hairy, ligule a short inconspicuous fringed membrane, inflorescence a contracted cylindrical spike-like panicle, dark glumes and lemmas densely hairy, grazing value unknown, common in veld, open velds, slopes, sourveld, wet areas, around seepages

See *Révision des Graminées* 2: 556. 1832, *Journal de Botanique (Morot)* 4(9): 168. 1890, *Bulletin de l’Herbier Boissier* 3(8): 393. 1895 and *Flora Capensis* 7: 697. 1900, *Kew Bulletin* 37(1): 159. 1982

(The South African traditional healers use it to wash away bad luck.)

in English: Pongwa grass

in South Africa: koperdraadgras, morakela, morakapele

Stichoneuron Hook.f. Stemonaceae (Crooniaceae)

Greek *stichos* ‘a row, line’ and *neuron* ‘nerve’, see *Genera Plantarum* [Bentham & Hooker f.] 3(2): 747. 1883.

Stichoneuron caudatum Ridl.

Malaysia, Thailand.

See *J. Straits Branch Roy. Asiat. Soc.* 57: 107. 1911

(Tonic, eat the leaves with betel; it is said that if leaves are eaten with betel, it causes abortion.)

Malay name: kayu mati hidup

Stictocardia Hallier f. Convolvulaceae

From the Greek *stiktos* ‘spotted, punctured’ and *kardia* ‘heart’, referring to the spotted leaves, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18(1–2): 159. 1893 and *Candollea* 14: 11–60. 1952, *Fl. Madagasc.* 171: 3–287. 2001.

Stictocardia campanulata (L.) Merrill (*Argyreia beraviensis* (Vatke) Baker; *Argyreia campanulata* (L.) Alston; *Argyreia tiliifolia* (Desr.) Wight; *Convolvulus campanulatus* (L.) Basel 1996, S.W.L. Jacobs, J. Everett, M.E. Barkworth and C. Hsiao, “Relationships with the Stipoid grasses (Gramineae).” 75–82. 2000 in S.W.L. Jacobs and J. Everett (Editors), *Proceedings of the Third International Symposium on Grass Systematics and Evolution*. CSIRO, Canberra, Australia, *Contributions from the United States National Herbarium* 48: 15–18, 119, 126, 383–384, 402–409, 421, 432, 455–467, 495–504, 590–591, 614, 617–650, 657–658. 2003.

Stipa rudis Spreng. (*Austrostipa rudis* (Spreng.) S.W.L. Jacobs & J. Everett)

New South Wales, Victoria, Tasmania, Queensland. Perennial tussock grass, tall, erect, wiry, open, caespitose, extravaginal shoots, ligule ovate and lacinate, auricles present, blade inrolled and ribbed, leaves flat and coarse, seedheads large and drooping down, panicle exerted, purple swollen nodes, spikelets gaping, glumes subequal, lemma tuberculate and reddish, callus reddish to white and curved, awn twice bent, sharply pointed and hooked seeds dark purple, invasive pest, grows in open woodlands, bush margins and grasslands, forms dense stands in pasture, unpalatable to stock, prolific seeding habit

See *Systema Vegetabilium, editio decima sexta* 4: Cur. Post. 31. 1827 and *Telopea* 6(4): 588. 1996

(Barbed and sharp seeds may blind livestock.)

in English: needle grass, speargrass, veined speargrass

Stipa sibirica (L.) Lam. (*Achnatherum extremiorientale* (Hara) Keng; *Achnatherum extremiorientale* (Hara) Hara, nom. illeg., non *Achnatherum extremiorientale* (Hara) Keng; *Achnatherum extremiorientale* (Hara) Keng ex P.C. Kuo, nom. illeg., non *Achnatherum extremiorientale* (Hara) Keng; *Achnatherum sibiricum* (L.) Keng; *Achnatherum sibiricum* (L.) Keng ex Tzvelev, nom. illeg., non *Achnatherum sibiricum* (L.) Keng; *Avena sibirica* L.; *Oryzopsis sibirica* (L.) Beal; *Stipa extremiorientalis* Hara; *Stipa japonica* (Hack.) Hack.; *Stipa japonica* Hack. ex Honda, nom. illeg., non *Stipa japonica* (Hack.) Hack.; *Stipa sibirica* var. *japonica* Hack.)

Europe, Russia, Mongolia, Siberia, India. Mountain meadows, dark soil, rocky hillside, dry mountain steppe, very rocky and gravelly soil, heavily grazed areas

See *Species Plantarum* 1: 79. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 158. 1791, *Grasses of North America for Farmers and Students* 2: 226. 1896, *Bulletin de l'Herbier Boissier* 7(9): 647. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13–18): 207. 1921, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 212. 1930, *Journal of Japanese Botany* 15(7): 459. 1939, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclature Systematica* 107, 212. 1957, *Flora Illustralis Plantarum Primarum Sinicarum: Gramineae* 9(3): 590, f. 525. 1959, *Fl. Tsinlingensis*. 1(1): 153. 1976, *Bot. Zhurn.* (Moscow & Leningrad) 75: 1783–1786. 1990, *Bot. Zhurn.* (Moscow & Leningrad) 79(2): 135–139. 1994, *Taxon* 49(2): 248. 2000

(Poisonous to horses and other domestic animals, young plants may be fatal to the grazing animals. The poisonous properties reported for some members of this complex are due to the presence of cyanogenic glycosides.)

in English: needlegrass, poisonous grass of Kashmir

in India: gobu, gogu, gumai, gumin, gurghas

in China: yu mao

Stipa spartea Trin. (*Hesperostipa curtisetata* (Hitc.) Barkworth; *Hesperostipa spartea* (Trin.) Barkworth; *Stipa curtisetata* (Hitc.) Barkworth; *Stipa robusta* Nutt. ex Trin.; *Stipa robusta* Nutt. ex Trin. & Rupr.; *Stipa spartea* var. *curtisetata* A.S. Hitc.)

Northern America, USA, Canada, British Columbia. Perennial bunchgrass, erect and leafy, basal leaves, sheaths are open and there are no auricles, flat to inrolled leaf blades, thickened ligule, flowerhead somewhat narrowed, one-flowered spikelets, glumes almost equal, lemmas hardened, sharp-pointed callus covered in stiff hairs, lemma surface smooth or covered in hairs, extremely long and twisted awns, slender awns twist many times from the tip of the lemma and bend once or more along their length, awn tip usually straight, reproduces sexually, dominant or subdominant, occurs as a pioneer species, difficult to establish by seed, forage of good palatability, Native Americans of the Missouri River Region used the stiff awns to make hair brushes, considered rare in Ontario, grows in open and grassy habitats of lower valley slopes, dry sandy soils, in plains grasslands, prairie, foothills prairie, mountain meadows, on small disturbed or denuded areas, included by some authors in *Hesperostipa* (Elias) Barkworth

See *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 82. 1830, *Species Graminum Stipaceorum* 69. 1842 and *Contributions from the United States National Herbarium* 24(7): 230. 1925, Melvin Randolph Gilmore, *Uses of plants by the Indians of the*

(Leaf used in placentary retention and diarrhea.)

in English: alfa, alfa grass, Algerian grass, esparto, esparto grass, halfa

in Arabic: halfa

in Morocco: alfa, l-halfa, halfa, talamt, l-geddîm, geddim, âguddîm, âggurî, âruiy, âwrî, ârî, arri, tizzi, tigarzi, âdaf, l-bûs, demmûg, sparte

in Spanish: esparto, atocha, atochon

Stipa trichoides P.A. Smirnov (*Stipa turkestanica* subsp. *trichoides* (P.A. Smirn.) Tzvelev)

Russia, USSR (former), Himalaya. Rare species, good fodder grass

See *Trudy Imp. S.-Peterburgsk. Bot. Sada* 26: 59. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 21(588–600): 233. 1925, *Novosti Sist. Vyss. Rast.* 11: 17. 1974

(Poultice.)

in India: pilli

Stipagrostis Nees Poaceae (Gramineae)

From the Greek *stypē* ‘tow’, like *Stipa*, and *Agrostis*, or *agrostis*, a fodder grass; sometimes included in *Aristida* L., type *Stipagrostis capensis* Nees, see *Species Plantarum* 1: 82. 1753, *Neues Journal für die Botanik* 3: 255. 1809, *Linnaea* 7(3): 290–291. 1832, *Species Graminum Stipaceorum* 163. 1842, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 252. 1852, *Genera Plantarum* 3(2): 1141. 1883 and *Meded. Rijks.-Herb.* 54: 9. 1926, *Mededeelingen van's Rijks-Herbarium* 58: 34, 35–36, 45–46, 62. 1929, *Kirkia* 3: 133. 1963, *Genera Graminum* 184–186. 1986, *Flora of Ethiopia and Eritrea* 7: 86–87. 1995, *African Journal of Ecology* 37(1): 69–80. 1999, *Journal of Animal Ecology* 68(4): 672–683. 1999, *Journal of Animal Ecology* 70(4): 561–567. 2001, *African Journal of Ecology* 40(2): 103–109. Jun 2002, Loutfy Boulos, “Surviving the extremes of the Central Sahara.” and “The flora of the Jebel Uweinat massif, Sahara.” *Journal of Biogeography* 30(12): 1937–1938. Dec 2003, *Oikos* 105(2): 325–335. Apr 2004, *Journal of Animal Ecology* 74(3): 567–578. May 2005.

Stipagrostis ciliata (Desf.) De Winter (*Aristida ciliata* Desf.; *Aristida plumosa* Desf., non L.; *Arthratherum ciliatum* Nees)

Algeria, Sudan, Namibia, Yemen, Pakistan. Perennial, densely tufted, erect or sometimes geniculate, unbranched, large, tussocky, conspicuous nodes densely villous, young growth more or less palatable, high nutritive value, useful for erosion control, a sandbinder, extremely drought resistant, growing on open hillsides, dry areas, on steep stony slopes, red sandy soil, sandy soils with lime substratum

See *Neues Journal für die Botanik* 3: 255. 1809 and *Kirkia* 3: 133. 1963

(A poultice for skin diseases, stomachic.)

in English: tall bushman grass

in Morocco: senyal, ataf

in South Africa: bewimpertes federgras, langbeenboesman-gras, langbeentwa

Stipagrostis ciliata (Desf.) De Winter var. *capensis* (Trin. & Rupr.) De Winter (*Aristida ciliata* sensu Desf., non Steud. & Hochst. ex Steud.; *Aristida ciliata* Desf. var. *capensis* Trin. & Rupr.; *Aristida ciliata* Desf. var. *pectinata* Henrard; *Aristida ciliata* Desf. var. *tricholaena* Hack.; *Aristida ciliata* Desf. var. *villosa* Hack.; *Arthratherum ciliatum* (Desf.) Nees; *Schistachne ciliata* (Desf.) Fig. & De Not.)

Namibia, South Africa. Perennial, densely or loosely tufted, erect or geniculate, nodes with a white ring of hairs, palatable and nutritious grass, high grazing value, valuable pasture, resistant to drought, suitable as a binder of sand, generally found in sandveld, riverbeds, dry riverbeds, gravel plains, on coarse sandy soil

See *Neues Journal für die Botanik* 3: 255. 1809, *Linnaea* 7(3): 289. 1832, *Species Graminum Stipaceorum* 164. 1842, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 252. 1852, *Bulletin de l'Herbier Boissier* 4 (Append. 3): 18. 1896 and *Meded. Rijks-Herb.* 54: 93, 95. 1926, *Bothalia* 4: 110. 1941, *Kirkia* 3: 133. 1963

(A poultice for skin diseases, stomachic, astringent.)

in English: large bushman grass, tall bushman grass

in South Africa: langbeenboesmangras

Stipagrostis pungens (Desf.) De Winter (*Aristida pungens* Desf.; *Arthratherum pungens* (Desf.) P. Beauv.)

North Africa, Egypt to Morocco, Algeria, Sudan, Iran. Hollow, coarse, stiff, strong, leaves pungent, while young good forage for camels and stock, famine grain, culms used for weaving into mats and baskets, found on sand dunes, dry waste places

See *Flora Atlantica* 1: 109, t. 35. 1798, *Essai d'une Nouvelle Agrostographie* 33, 152, t. 8, f. 9. 1812 and *Mededeelingen van's Rijks-Herbarium* 54(B): 477. 1928, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 218. 1941, *Kirkia* 3: 135. 1963, *Willdenowia* 6(1): 163. 1970, *Willdenowia* 6(2): 297. 1971, *Annali di Botanica* 45: 75–102. 1987

(Used to heal wounds and for rheumatic pains.)

in Algeria: drinn

in Arabic: drinn, hasaknit, ibitt, loul (grains), mioukou, rechig (grains), sabat, sbat, sbot, sbott, sebbit, shouk el-ghazal, talout, tarhi, toulloult

in Mali: drinn, tulult

in Mauritania: sbot, shot

in Morocco: drinn, sabat, sbet

in Niger: drinn, madiugu, madjiugu, mayugu, sbat, tilult, tulul, telant

in Sahara: sbott, toulloult, tullult, tulul

in Sudan: shot

Stipagrostis zeyheri (Nees) De Winter subsp. *sericans* (Hack.) De Winter (*Aristida capensis* var. *dieterleniana* Schweick.; *Aristida sericans* Hack.)

South Africa. Perennial, densely tufted, robust, erect, hard, leaf blade rolled, ligule a fringe of hairs, hard leaves, narrow contracted panicle few-spikeleted, three awns persistent shortly plumose, low or unknown grazing value, used for making soft brooms, usually on rocky and stony places, low lying areas, grassland, disturbed lands, uncultivated areas, old lands, savanna, in sandy soils of rocky areas

See *Bulletin de l'Herbier Boissier* 3(8): 381. 1895 and *Meded. Rijks-Herb.* 54(A): 556. 1927, *Bulletin of Miscellaneous Information Kew* 1939: 653. 1939, *Kirkia* 3: 136. 1963

(Sharp grain can cause severe irritation in an animal's mouth.)

in English: Cape Bushman grass

in Southern Africa: drieveerboesmangras, lefielo

Stipularia P. Beauv. Rubiaceae

Latin *stipula*, *ae* 'a stalk, blade, straw, stem', see *Flore d'Oware* 2: 26. 1810.

Stipularia africana P. Beauv. (*Sabicea africana* (P. Beauv.) Hepper)

W. Trop. Africa to Zambia. Shrub, erect, abaxial side of leaf with white indumentum, large red stipules, flowering bracts fused into a 4-lobed urceolate structure, flowers with white corollas, axillary greenish yellow fruits with red remains of calyx, sweet pink pulp, in wet grassland, on river banks

See *Histoire des plantes de la Guiane Française* 1: 192. 1775, *Flore d'Oware* 2: 26, t. 75. 1807 and *Kew Bulletin* 13: 292. 1958

(Used for the treatment of senile dementia.)

Stixis Lour. Capparaceae (Capparidaceae)

From the Greek *stizo*, *stizein* 'to prick', *stixis* 'a marking with a pointed instrument, puncture', see *Flora Cochinchinensis* 1: 290, 295. 1790, *Hort. Bengal.* 42. 1814, Roxburgh, William (1751–1815), *Plants of the Coast of Coromandel* 3: 86. London, 1795–1819, *Fl. Ind.* 2: 643. 1832.

Stixis suaveolens (Roxburgh) Pierre (*Roydsia suaveolens* Roxburgh) (*Roydsia* Roxb., after Sir John Royds, 1750–1817 (India), botanist, Judge Supreme Court of Bengal, a patron of science; see William Roxburgh, *Plants of the Coast of Coromandel*. 3: 87. London 1819.)

India. Woody climber, coriaceous leaves, white fragrant flowers in axillary racemes, orange ellipsoid fruits, sweet yellow aromatic pulp eaten

See *Hort. Bengal.* 42. 1814, *Plants of the Coast of Coromandel* 3: 87, t. 289. 1819, *FBI* 1: 180. 1872, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(82): 654. 1887

(Fruit decoction for cough, pneumonia. Leaves infusion stomachic, diuretic.)

in China: ban guo teng

in India: tam-hidi

Stomatanthes R.M. King & H. Robinson Asteraceae

From the Greek *stoma*, *stomatos* 'mouth, opening' and *anthos* 'flower'.

Stomatanthes africanus (Oliv. & Hiern) R.M. King & H. Rob. (*Eupatorium africanum* Oliv. & Hiern; *Vernonia humilis* C.H. Wright; *Vernonia malosana* Baker)

Tropical Africa, Ghana. Slender herbaceous plant, subshrub, erect, tufted, perennial, flower-heads in a crowded terminal inflorescence, sweetly scented white cream flowers in numerous small heads clustered at branched tips, achenes pubescent

See *Flora of Tropical Africa* [Oliver et al.] 3: 301. 1877, *Kew Bulletin* 1897: 269. 1897, *Kew Bulletin* 1898: 148. 1898 and *Phytologia* 19: 430. 1970, *Compositae Newslett.* 20/21: 12–15. 1992

(Rootstock decoction against diarrhea and cough; leaves decoction a remedy for thrush.)

Streblus Lour. Moraceae

Possibly from the Latin *strebula*, *ae* and *strebula* (*stribula*), *orum*, the flesh about the haunches, possibly referring to the base of the fruit; or from the Greek *streblos* 'twisted, crooked', indicating the twisted branches or trunk of the type species, see *The Civil and Natural History of Jamaica* in Three Parts 357. 1756, *Systema Naturae*, Editio Decima 1289. 1759, Loureiro, João de (1710–1791), *Flora Cochinchinensis*. Ulyssipone: typis, et expensis academicis, 1790, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 1(Suppl.): 31. 1816, *Bijdragen tot de flora van Nederlandsch Indië* 10: 488. 1825 [7 Dec 1825–24 Jan 1826], *Fl. Filip.* [F.M. Blanco] 698. 1837, *Ann. Sci. Nat., Bot.* sér. 3, 8: 122, t. 3. 1847, *Museum Botanicum* 2: 77, 80–81. 1856, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 212–215, 219, 234, 250. 1873, *Histoire des Plantes* 6: 191. 1877, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 13(3–4): 294–295. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 573. 1907, *Hooker's Icones Plantarum* pl. 2947. 1911, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 426. 1914, *Bulletin du Muséum d'Histoire Naturelle* 27: 441. 1921, *J. Arnold Arbor.* 8: 21. 1927, *Bulletin de la Société Botanique de France* 75: 98. 1928, *The Gardens' Bulletin Singapore* 19: 216–218. 1962, *Blumea* 18: 393. 1970, *Bull.*

Jard. Bot. Belg. 47: 267–407. 1977, *Proc. Kon. Ned. Akad. Wetensch.*, C 91(4): 345–362. 1988, *Fl. Zambesiaca* 9(6): 13–76. 1991

Streblus asper Lour. (*Achymus pallens* Soland. ex Blume; *Calius lactescens* Blanco; *Cudrania crenata* C.H. Wright; *Diplothorax tonkinensis* Gagnep.; *Epicarpurus orientalis* Blume; *Streblus lactescens* Blume; *Trophis aculeata* Roth; *Trophis aspera* Retz.; *Trophis cochinchinensis* Poir.; *Vanieria crenata* (C.H. Wright) Chun; *Vanieria crenata* Chun)

SE Asia, Vietnam. Shrub or small tree, profusely branched, white latex, irregularly toothed rough leaves, minute axillary white-greenish flowers, white anthers, ripe fruits eaten

See *Observationes Botanicae* (Retzius) 5: 30. 1788, *Fl. Cochinch.* 2: 615. 1790, *Encycl.* (Lamarck) 8: 123. 1808, *Nov. Pl. Sp.* 368. 1821, *Fl. Filip.* [F.M. Blanco] 698. 1837, *Mus. Bot.* 2(1–8): 79–80. 1856, *FBI* 5: 491. 1888, *Journal of the Linnean Society, Botany* 26(178): 469. 1899 and *Bulletin de la Société Botanique de France* 75: 98–99. 1928

(Used in Ayurveda and Sidha. Twigs insect repellent, used as toothbrushes in pyorrhea. Milky juice antiseptic, sedative, astringent, latex massaged over the aching parts of the body, applied to chapped hands and sore heels, applied to cure redness of eyes and to promote clarity of vision. Root juice antidote to snakebite, antiseptic, astringent, for fever, ulcers, and excessive menstrual bleeding; root bark powder applied for toothache; dry roots powder applied on ulcers and snakebite. Bark extract in urinary diseases and gingivitis; latex of *Euphorbia neriifolia* mixed with dry powdered barks of *Ficus auriculata* and *Streblus asper* given in discharge of blood in urine; stem bark powdered together with black peppers given to alleviate fever; stem bark with the root bark of *Holarrhena antidysenterica* crushed together and the extract given in leucorrhea; for stomachache the bark decoction taken with warm water; bark decoction in fever, dysentery and diarrhea. Leaf juice for giddiness. Veterinary medicine, stem bark extract given in babesiosis. Ceremonial, rituals, festivals, the leafy branches.)

in English: crooked rough bush, sand paper tree, Siamese rough bush

in Bangladesh: wahnebang

in China: que shen sh

in India: akhor moranu, akshadhara, baranika, baraniki, baranki, barinika, barinki, barivenkachettu, barrinka, bhutavasa, bhutavriksha, cheroot-pathi, chiri-hetsau, cinacika, cinika, cinnapala, culppiray, culppiraymaram, curppiray, curppiraymaram, daheya, dahya, dhukavasa, dieng-sohkhyrdang, dieng sohkhyrdang, gavakshi, jindi, kakkabedi, karchanua, karera, karkashachhada, karvati, kaushikyaja, kausikyaya, kavati, khaksa, khaksi, kharachhada, kharanchibol, kharoli, kharota, kheksi, khorua, kshiranasha, kurripla, kuttippirai, mettisoppu, mitle mare, mitlemare, mitligade, pakki, parava, paraya, paruka, paruva, pasuna, patrollekhataruh, pira, piraayamaram, piray, pirayam, pishachandru,

pitaphala, pitaphalaka, poi, ponalige, prayam, pukki, punje, rukshapatra, rusa, saahaadaa, sahada, sahara, sahor, sahora, sahra, sahuda, sakhotaka, saora, sakata, sakhota, sakhotah, sakhotaka, sarero, sehora, sehora, serphang, shakhota, shakhotaka, shakotaka, shankhinivasa, shaorha, sheora, shihor, sihora dahya, siora, sitanike, sithanike, tinda-parua, tintap-paruva, tintapparuya, vittil, vittila, vittilamaram

in Malaysia: kesinah, kesinai, serinai

in Nepal: chhohara, kakshi

in Philippines: aludig, ampas, bagtak, calios

in Sri Lanka: géta-netul, patpiray, pirasu

Streblus usambarensis (Engl.) C.C. Berg (*Neosloetiopsis kamerunensis* Engl.; *Neosloetiopsis kamerunensis* Engl. & J. Léonard; *Sloetiopsis usambarensis* Engl.)

Tropical Africa. Shrub or small tree, white flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 573. 1907, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 426, t. 1. 1914, *Bull. Jard. Bot. État Bruxelles* 18: 146. 1947, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 91(4): 357. 1988

(Leaves for skin diseases and infections, fever, yellow fever, conjunctivitis.)

Streptocaulon Wight & Arnott Asclepiadaceae (Apocynaceae)

From the Greek *streptos* ‘twisted, pliant, turned’ and *kaulos* ‘stem, stalk’, see *Contributions to the Botany of India* 64. 1834.

Streptocaulon baumii Decne.

Philippines.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 496. 1844 and *Fl. Manila* 375–381. 1912

(Latex vulnerary, rubefacient.)

in Philippines: hingiu-na-puti

Streptocaulon juvenas (Loureiro) Merrill (*Apocynum juvenas* Loureiro; *Streptocaulon griffithii* J.D. Hooker; *Streptocaulon tomentosum* Wight & Arnott; *Streptocaulon tomentosum* Wight; *Tylophora juvenas* (Lour.) Woodson; *Tylophora juvenas* Woodson)

SE Asia, Vietnam.

See *Flora Cochinchinensis* 1: 167–168. 1790, *Contributions to the Botany of India* 64. 1834, *The Flora of British India* [J.D. Hooker] 4(10): 10. 1883 and *Annals of the Missouri Botanical Garden* 17: 146. 1930, *Transactions of the American Philosophical Society*, new series, 24(2): 315–316. 1935

(Roots for the treatment of dysentery and stomachache. Leaves used for the treatment of snake poisoning, wounds, boils and abscesses.)

in English: Griffith streptocaulon, infant streptocaulon

in China: ma lian an

in Vietnam: ha thu o trang, sung bo

Streptogyna P. Beauv. Poaceae (Gramineae)

From the Greek *streptos* ‘twisted’ and *gyne* ‘female, ovary’, referring to the nature of the ovary, very similar to *Streptochaeta*, type *Streptogyna crinita* P. Beauv., see *Essai d'une Nouvelle Agrostographie* 80, t. 16, f. 8. 1812, *Flora Brasiliensis* 2(3): 171. 1880 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76: 311. 1954, *J. Jap. Bot.* 33: 364–366. 1958, *Nature* 182: 1619–1620. 1958, *Bulletin de la Société Botanique de France* 118: 657. 1973, *Smithsonian Contributions to Botany* 44: 18. 1980, *Fieldiana, Botany, New Series* 4: 1–608. 1980, *Genera Graminum* 69. 1986, *Annals of the Missouri Botanical Garden* 74(4): 871–888. 1987, *Smithsonian Contributions to Botany* 65: 1–27. 1987, *Flora of the Guianas. Series A, Phanerogams* 622–625. 1990, *Ruizia* 13: 1–480. 1993, *Flora Mesoamericana* 6: 220. 1994, *Am. J. Bot.* 87: 96–107. 2000, *American Bamboos* 6, 49, 122, 126, 131–132. 2000, *Contributions from the United States National Herbarium* 39: 113, 114. 2000.

Streptogyna crinita P. Beauv. (*Streptogyna gerontogaea* Hook.f.)

India, Sri Lanka, Kenya, Uganda, Zaire, Central African Republic. Perennial, erect, herbaceous, unbranched, spreading, scaly rhizomes, leaf blades narrowly elliptic acuminate, inflorescence racemiform stiffly erect with several overlapping spikelets 5–7-flowered, lemmas linear-oblong, strongly barbed awns, callus bearded, 2 stamens, ovary villous, 2 long-exserted spinulose stigmas coiled and tangled at maturity, medicinal use, noxious pest, found along roadsides and footpath, moist lowland forests, clearings, swampy places, forest floor, forest undergrowth, cultivated fields, light shade

See *Essai d'une Nouvelle Agrostographie* 80, t. 16, f. 8. 1812, *Enum. Pl. Zeyl.* 374. 1864 and *A Hand-book to the Flora of Ceylon* 5: 301. 1900, *Grasses of Burma ...* 649. 1960

(Infusion used as enema for women's stomach ache.)

in Congo: mana mango, manamango

in Ghana: detshenga, etwà, kyeretwè, wundu wundu

in Ivory Coast: atierfos, dontré, kpa mussé, kwamossé, kwamurè, pamussè, yoè

in Liberia: giekia ku, giekiaku, jekiaku

in Nigeria: ako ozo

in Senegal: damor degad, damordegad, emokok

in Sierra Leone: buragai, dilag boinyondo, esul, kaiyowo, kasarek, kayowo, kongengi, malomboenda, naganaga, naganage, nanaka, nanana, sibile, sibire, tuabiya, yoyavi

in Yoruba: apala odo

Streptopus Michx. Liliaceae (Convallariaceae)

Greek *streptos* ‘twisted’ and *pous, podos* ‘foot’, referring to the peduncles, see *Flora Boreali-Americana* 1: 200–201, pl. 18. 1803.

Streptopus amplexifolius (L.) DC. (*Convallaria amplexifolia* (L.) E.H.L. Krause; *Convallaria dichotoma* Thibaud ex Pers.; *Streptopus amplexifolius* f. *indivisus* Lepage; *Streptopus amplexifolius* subsp. *americanus* (Schult. & Schult. f.) Á. Löve & D. Löve; *Streptopus roseus* var. *curvipes* (Vail) Fassett; *Streptopus roseus* var. *longipes* (Fernald) Fassett; *Streptopus roseus* var. *perspectus* Fassett;

Streptopus roseus var. *typicus* Fassett, nom. inval.; *Uvularia lanceolata* Aiton; *Uvularia rosea* (Michx.) Pers.)

North America. Shrub, moist woods, river banks

See *Taxon* 30: 850. 1981, *Phytologia* 74: 187–188. 1993, *Flora of North America Editorial Committee. Flora of North America North of Mexico* 26: 1–723. Oxford University Press, New York, Oxford. 2002

(Low toxicity. Fruit cathartic, plant tonic, infusion used for coughs; flowers diaphoretic, used in the treatment of colds and fevers; Infusion of blossoms taken to cause sweating. An infusion of the roots used in the treatment of a fallen womb, a cough syrup can be made from the root.)

in English: mandarin, rosy twistedstalk, scootberry, twistedstalk, twistedstalk

Striga Lour. Scrophulariaceae (Orobanchaceae)

Referring to the roughness and habit of the plants, Latin *striga* (*strix, strigis*) ‘a witch, hag’, Latin *striga* ‘a furrow, streak, swath, a row of grain’, Latin *stria, ae* ‘a channel, furrow’, Akkadian *sir’u, sirihu* ‘a furrow’; see *Species Plantarum* 2: 630. 1753, João de Loureiro, *Flora cochinchinensis*. 17, 22. [Lisboa] 1790 and *Kew Bulletin* 41(1): 205–221. 1986, William T. Stearn, *Botanical Latin* 506. [“Striga: striga, a straight rigid close-pressed rather short bristle-like hair.”] 1993, *Adansonia* 15: 3–21. 1993, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 576, 577. 1994, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen* 614. 1996, *Annals of the Missouri Botanical Garden* 88(1): 60–103. 2001.

Striga angustifolia (D. Don) C.J. Saldanha (*Buchnera angustifolia* D. Don)

India.

See *Prodromus Florae Nepalensis* 91. 1825 and *Bull. Bot. Surv. India* v. 70. 1963

(Given as appetite stimulant.)

in China: xia ye du jiao min

Striga asiatica (Linnaeus) Kuntze (*Buchnera asiatica* Linnaeus; *Striga asiatica* var. *humilis* (Bentham) D.Y. Hong; *Striga hirsuta* Bentham; *Striga hirsuta* var. *humilis* Bentham; *Striga lutea* Loureiro; *Striga lutea* var. *bicolor* Kuntze)

China. Annual herb, delicate, minute, highly variable, simple or branched, often with rough hairs, roots much reduced, leaves linear, bright red flowers alternate, spikes terminal, calyx 10-ribbed, fruit a capsule, numerous minute dark seeds, the roots attached to roots of host plants, parasitic on maize and millet, weed of sorghum and sugar cane fields

See *Species Plantarum* 2: 630. 1753, *Flora Cochinchinensis* 1: 22. 1790, *Prodromus Systematis Naturalis Regni*

Vegetabilis 10: 502–503. 1846, *Revisio Generum Plantarum* 2: 466. 1891, *Revis. Gen. (Used in Ayurveda and Sidha. Whole plant antiviral, used for treating intestinal parasites.)

in English: Asiatic witchweed, buri, common mealie-witchweed, isona weed, Matabele flower, mealie poison, mealie witchweed, red witchweed, scarlet lobelia, striga, tobacco jasmine, witchweed

in China: du jiao gan, du jiao jin

in India: agnivriksha, bili kasa, cirakacitam, cirakacitapuntu, cullu, cutaparpini, jolada baeru maari, kalu-polapen, kancikam, kancikapputu, kevalikapputu, kevarikam, kirumimulam, kollaippalli, kollankutakam, kollankutakappuntu, kshetrabhusha, kshetranashini, kurandika, kuranti, kutiyotippuntu, laghukurandika, ninritamtincan, palli-ppuntu, pallipoondu, pallippundu, pallippuntu, pallipputu, payirerippaval, payirerittapavi, rathi badamika, visantiyancan

Malay name: rumput siku siku

in Comoros: alafi hanga, shiroumboua matsou

in East Africa: akarebwa omwe, ekeyongo, emoto

in Southern Africa: gewone mielierooibloom, kopseerblommetjie, mieliegif, rooibloom, rooiblombossie, vuurbossie; bisi (Shona); isona (Zulu), seona (South Sotho)

in Yoruba: irokodu, oloyin

Striga densiflora (Benth.) Benth. (*Buchnera densiflora* Benth.)

India.

See *Scrophularineae Indicae* 41. 1835, *Companion to the Botanical Magazine* 1: 363. 1836

(Given as appetite stimulant.)

in China: mi hua du jiao jin

Striga gesnerioides (Willd.) Vatke ex Engl. (*Buchnera gesnerioides* Willd.; *Buchnera orobanchoides* R. Br.; *Striga chloroleuca* Dinter; *Striga gesnerioides* Vatke ex Engl.; *Striga gesnerioides* (Willd.) Vatke; *Striga gesnerioides* Vierh.; *Striga orobanchoides* (R. Br.) Benth.; *Striga orobanchoides* Benth.)

Cameroon, Tanzania. Parasitic herb, root parasite, erect, semi-succulent, stems purple, corollas pink to red, sap and flowers used to colour, widespread weed, near marshy area, forest understory

See *Species Plantarum*. Editio quarta 3: 338. 1800, *Oesterreichische Botanische Zeitschrift* 2: 388, t. 2. 1832,

Companion to the Botanical Magazine 1: 361, t. 19. 1836, *Oesterreichische Botanische Zeitschrift* 25: 11. 1875, *Abh. Preuss. Akad. Wiss.* (1894) 28, nomen. 1894 and *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* lxxi. 455. 1907, *Feddes Repertorium* 104: 497–501. 1993, *Journal of Ethnopharmacology* 56(1): 55–60. 1997, *European Journal of Pharmacology* 391(1–2): 193–197. 2000, *Journal of Ethnopharmacology* 76(2): 197–200. 2001, *Phytomedicine* 10(2–3): 233–260. 2003, *Weed Research* 44(4): 265–270. 2004

(Cytotoxic plant, antifertility, antiinflammatory, antispasmodic and antihistaminic activities. Powdered plant sprinkled on wounds, a paste applied against swollen neck glands; crushed seeds of *Diplocyclos palmatus* and ash of *Striga orobanchoides* mixed in jaggery and given during pregnancy for birth of a male child. Rootstock paste applied to injuries between the toes.)

in English: cowpea witchweed, purple witchweed, tobacco witchweed

in Southern Africa: rooibloommetjie, bloublom; iGalo (Xhosa)

in Tanzania: Kichawi nke

in India: baeru maari gida, bilichigan, chikhalya (chikhal, mud), gaddi badamika, gwal-mehndi, hothe, lalagia, missi

Striga hermonthica (Delile) Benth. (*Buchnera hermonthica* Delile; *Striga hermontheca* (Del.) Benth.; *Striga senegalensis* Benth.)

Nigeria. Herb, erect, stiff, much or sparsely branched, corolla pink-purple to light orange, capsule, a root parasitic weed, normally parasitic on sorghum plants, in seasonally swampy grassland

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 2(2): 245, t. 34(3). 1813, *Companion to the Botanical Magazine* 1: 365. 1836, *Revisio Generum Plantarum* 2: 466. 1891 and *Flora Zambesiaca* 8(2): 1–179. 1990, *Feddes Repertorium* 104: 497–501. 1993, *Agronomy Journal* 96(5): 1349–1356. 2004 [Induction and inhibition of *Striga hermonthica* (Del.) Benth. germination by extracts of traditional Chinese medicinal herbs.]

(Whole plant used for stomachache, headache, diabetes, applied in leprosy and ulcers. Powder of dried flowers applied to infected eyes; Antifertility activity of the flowers. Veterinary medicine, leaves and roots decoction for stomachache.)

in English: purple witchweed, striga

in Benin: manli

in Burkina-Faso: waango

in East Africa: ekeyongo, emoto, hayongo, kayongo, kituha

in Kenya: hayongo

in Niger: gawguyé, kudjiji, mâ lli, ngudugi, tegallat

in Nigeria: kuduji gogai, makasha, soki

in Senegal: i-bí, ndoghum, ndohum, ndokum, neand, néaud, nhohum, ségé, silo

in Sudan: al-buda, buda

in Togo: yuabn

in West Africa: manli

Striga macrantha (Benth.) Benth. (*Buchnera macrantha* Benth.; *Striga macrantha* A. Chev.)

West Africa, Ghana. Herb, robust, erect, coarse, purple, roughly hairy, leaves stiff roughly scabrid, flowers white with yellow throat, inflorescence a very dense terminal spike, styles persistent, a hemi-parasite of wild grasses, savanna

See *Species Plantarum* 2: 630. 1753, *Companion to the Botanical Magazine* 1: 366. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 503. 1846 and *Exploration Botanique de l'Afrique Occidentale Française ...* 477. 1920, Kamal I. Mohamed, Lytton John Musselman, Charles R. Riches, "The Genus *Striga* (Scrophulariaceae) in Africa." *Annals of the Missouri Botanical Garden*, Vol. 88, No. 1 (Winter, 2001): 60–103. 2001

(Magico-religious beliefs, ritual, supernatural, superstitions, aphrodisiac, love potion.)

in Nigeria: anikasigbo, kudujii

in Sierra Leone: bambanangbale, efo di strong, kanyenyi, kele, maiava

Strobilanthes Blume Acanthaceae

Greek *stobilos* 'a cone' and *anthos* 'a flower', leaves and bracts enclose the flowers, see *Bijdragen tot de flora van Nederlandsch Indië* 14: 781, 796. 1826, *Plantae Asiaticae Rariores* 3: 87. 1832 and *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen*. Batavia [Jakarta] 41(1): 63, 256. 1944, *J. Cytol. Genet.* 32(1): 29–33. 1997. Fresh bark juice of *Bauhinia variegata* with the juice of the flowers of *Strobilanthes* given as an expectorant.

Strobilanthesacrocephala T. Anderson

Himalaya.

See *J. Linn. Soc., Bot.* 9: 473. 1867

(Leaf juice applied on skin diseases.)

Strobilanthesanfractuosa C.B. Clarke

Thailand.

See *Bot. Jahrb. Syst.* xli. 66. 1907

(To treat broken bones, leaves and stems pounded up with *Solanum*, *Iresine* and *Peucedanum*. To treat earache, leaves boiled with *Peucedanum*.)

Strobilanthesauriculata Nees

India.

See *Pl. Asiat. Rar.* (Wallich). 3(12): 69 (86; t. 295). 1832 and *Kew Bulletin* 58(1): 92. 2003

(Leaves paste on wounds and skin diseases.)

in India: ankaravalli, kapur miger, kapur mingar, kapur minngar, kapurmingar, kurinci, ramting

Strobilanthes callosa Nees (*Carvia callosa* (Nees) Bremek.) (*Carvia* Bremek., the Marathi name in Maharashtra for *Carvia callosa* (Nees) Bremek.)

India.

See Behl, P.N. and Captain, R.M. *Skin-Irritant and Sensitizing Plants Found in India*. New Delhi. 1979, *Taxon* 31: 593–595. 1982

(Poisonous. This species may cause painful itching, swelling, and blistering when handled. Leaf paste applied on burns and cuts.)

in India: karvi

Strobilanthes crispa (L.) Bremek. (*Saricocalyx crispus* (L.) Bremek.; *Strobilanthes crispus* (L.) Bremek.)

SE Asia. Undershrub

See *Bijdragen tot de flora van Nederlandsch Indië* 781, 796. 1826 and Ismail, M., Manickam, E., Danial, A.M., Rahmat, A., Yahaya, A. "Chemical composition and antioxidant activity of *Strobilanthes crispus* leaf extract." *J. Nutr. Biochem.*, 11(11–12): 536–542. 2000, Fadzelly, A.B., Asmah, R., Fauziah, O. "Effects of *Strobilanthes crispus* tea aqueous extracts on glucose and lipid profile in normal and streptozotocin-induced hyperglycemic rats." *Plant Foods Hum. Nutr.* 61(1): 7–12. 2006

(Antidiabetic, diuretic, laxative, high antioxidant, anti-AIDS and anticancer, commonly consumed in the form of herbal tea, infusion.)

in Malaysia: lidah jin

Strobilanthes cusia (Nees) Kuntze (*Baphicacanthus cusia* (Nees) Bremek.; *Goldfussia cusia* Nees; *Strobilanthes cusia* Kuntze; *Strobilanthes cusia* (Nees) Imlay; *Strobilanthes flaccidifolia* Nees; *Strobilanthes flaccidifolius* Nees)

China, Myanmar. Subshrub, erect, rootstock terete, leaves opposite, corolla purple, glabrous capsule, seeds compressed, often in *Baphicacanthus*

See *Bijdragen tot de flora van Nederlandsch Indië* 781, 796. 1826, *Revis. Gen. Pl.* 2: 499. 1891 and *Bull. Misc. Inform. Kew* 1939, 115. 1939, Honda, G. and Tabata, M. "Isolation of antifungal principle tryptanthrin, from *Strobilanthes cusia* O. Kuntze." *Planta Medica* 36(1): 85–86. 1979, *CIS Chromosome Information Service* 54: 3–5. 1993, Li, L. et al. "[Chemical studies of *Strobilanthes cusia*]." *Yao Xue Xue Bao.* 28(3): 238–40. 1993, *Edinburgh J. Bot.* 51: 216, 223. 1994

(Roots and leaves for fever and headache, influenza, sore throat, tonsillitis, conjunctivitis, pyogenic infection. Fresh

juice from the leaves used for athlete's foot; crushed leaves applied on rat bite. Anticancer and hypotensive.)

in English: Assam indigo

in China: ma lan

in India: ting

Strobilanthes dalhousieanus C.B. Clarke (*Goldfussia dalhousieana* Nees; *Strobilanthes dalhousianus* C.B. Clarke)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 174. 1847, *The Flora of British India* 4: 460. 1884

(Roots and leaves for fever and headache.)

in India: machine mashian

Strobilanthes flaccidifolius Nees (*Strobilanthes flaccidifolia* Nees)

India.

See *Prodr.* (DC.) 11: 194. 1847

(Leaves for cough.)

in India: khum, khuma, raspat, rum

Malay names: tarum, tarum siam

Strobilanthes heyneanus Nees (*Strobilanthes heyneana* Nees)

India. Small glabrous herb, hispid stem, densely pubescent ovate leaves, small blue axillary flowers

See *Pl. Asiat. Rar.* (Wallich). 3: 85. 1832

(As a postpartum remedy.)

in India: karimkurinji, kurunji

Strobilanthes scaber Nees (*Hemigraphis flava* Kurz; *Strobilanthes scaber* T. Anderson)

India.

See *Pl. Asiat. Rar.* (Wallich). 3: 84. 1832, *Enumeratio Plantarum Zeylaniae* [Thwaites] 227, partim. 1858–1864, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 40(1): 74. 1871

(Young leaves applied for body itching.)

in India: kimchat, sam siphra

Strombosia Blume Olacaceae

Greek *strombos* 'a spinning-top, turban', Latin *strombus*, *i* 'a kind of spiral snail', in reference to the nature of the disc; see *Bijdr. Fl. Ned. Ind.* 17: 1154. [Oct 1826–Nov 1827], *Bulletin de la Société Botanique de France* 43: 565. 1896 and J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique Centrale*. CTA, Ede/Wageningen 1989.

Strombosia grandifolia Hook.f. ex Benth. (*Lavalleopsis grandifolia* (Hook. f.) Tiegh. ex Engl.; *Lavalleopsis grandifolia* Tiegh. ex Engl.)

Tropical Africa. Tree, yellowish green flowers

See *Niger Flora* [W.J. Hooker]. 258. 1849, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 1: 148. 1897

(Tannins, cyanogenetic glycosides, polyacetylenic fatty acids, flavonoids, and polysulfides.)

in Cameroon: edjip, epinedo, mbang mbazoa

in Central African Republic: embongo, mandjoubou, mbili moto

in Congo: bongomu, kpongomu, nghila

in Gabon: ezipt

in Ghana: afina

in Nigeria: arememila, poyi; aramemila (Edo); itako pupa (Yoruba)

in Zaire: bongomu, kpongomu, nghila; booko (Basankusu); botaka (Lokundu); bowlisangu, gwarzabiri (Azande); dengele (Babua); ebelakalaka, okwelekwelesi (Turumbu); etaka (Maindombe lake); kambukozi (Kiombe); moa tembo (= the tree that kills the elephant) (Maniéma); muhika (Kinyaruanda); tshipulupulu (Tshiluba)

Strombosia philippinensis (Baill.) Rolfe (*Strombosia philippinensis* S. Vidal)

Philippines, Asia-Pacific. Tree

See Vidal, Sebastian (1842–1889), *Phanerogamae Cumingiana Philippinarum* 23, 102. Manila, 1885

(Used as an antidote for *Lophopetalum* poisoning. Tannins, cyanogenetic glycosides, polyacetylenic fatty acids, flavonoids, and polysulfides.)

in Philippines: tamoya

Strombosia pustulata Oliv. (*Strombosia glaucescens* Engl.)

Nigeria. Tree, white petals

See *Hooker's Icon. Pl.* 23: t. 2299. 1894 and *Notizbl. Königl. Bot. Gart. Berlin*, Append. 21: 6. 1909

(Stem and roots for cough.)

in Cameroon: adjip, bombongo, bongongo, komondip, mbang mbazoa, nkemelo

in Congo: ngeuge, ngeuge

in Gabon: gnossi, mbazork, mbeza, mouguiba

in Ghana: afina

in Ivory Coast: azoubé, fognan, heilé, poé

in Nigeria: arembadi, atako, itako, odogbo, otingbo, poyi, ubaelu, ubelu; ubelu (Edo); itako (Yoruba)

in Yoruba: itako, otingbo, odogbo

in Zaire: botaka (Lokundu); dalakadaba (Tshofa); dandala, n'zugambakala, tshipulupulu tshitoke (Tshiluba); dzuwe (Basankusu); ikelenge (Mbelo); ikwanga mbongo (Turumbu); mpaniate (lake Mai-Ndombe)

Strombosia scheffleri Engl.

Tanzania. Tree, petals yellow-green tinged red-purple at base

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 3: 84. 1900, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 5, app. 21: 4, f. a-c. 1909, *Tanzania Journal of Health Research* 11(1): 23–28. 2009

(Antimicrobial, used to treat bacterial infections, diarrhea and heal wounds.)

in Buundi: umuhiga, umushiga

in Cameroon: epinedo, mbazoa

in Tanzania: kisengeti, mfwandilo dume, msangara, mti mjiru, mtinyiruwaliumie, mtuhua ng'ombe, mwafindilo dume

Strombosiosis Engl. Olacaceae

Resembling the genus *Strombosia* Blume.

Strombosiosis tetrandra Engl.

Tropical Africa. Tree, slender, red latex, creamy flowers

See *Die Natürlichen Pflanzenfamilien* II-IV: 148. 1897

(Stomachic, vermifuge.)

in Cameroon: bazoa, bosiko, edipmbazoa, edoup, mandjoc, oyen, pindé

in Central African Republic: embongo, njobe

in Congo: tip

in Gabon: egipt, engomegom

in Zaire: kodu, kodú, tip; bogwane (Kisangani); botaka (Lokundu); fifulula (Tshofa); ebelakabelaka, obwelekwelesi (Turumbu); epopo, puika (Kiswahili); etaka (lake Mai-Ndombe); tshipulupulu tshifike (Tshiluba)

Strongylodon Vogel Fabaceae

Greek *strongylos* 'round' and *odous, odontos* 'a tooth', referring to the teeth of the calyx; see *Linnaea* 10: 585. 1836.

Strongylodon macrobotrys A. Gray

Philippines. Evergreen twining vine, thick woody stems, bluish green claw shaped flowers in huge hanging clusters

See *United States Exploring Expedition* 1: 448, pl. 49. 1854 and *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Ann. Tsukuba Bot. Gard.* 17: 51–54. 1998

(Stomachic.)

in English: emerald creeper, jade vine

in China: lu yu teng

in the Philippines Isl.: bayou, tayabak

in Hawaii: nuku 'i'iwi

Strongylodon ruber Vogel

Pacific. Climber, hollow stems, narrow and curved bright or orange-red flowers in huge pendulous racemes

See *Linnaea* 10: 585. 1836 and *Phytologia* 39(5): 307–319. 1978

(Astringent, for wounds, cuts.)

in Hawaii: ka'i'iwi, nuku, nuku 'i'iwi

Strophanthus DC. Apocynaceae

Greek *strophe* 'twist, turning', *strophos* 'twisted cord or band', *strephein* 'to twist' and *anthos* 'a flower', referring to the twisted petal appendages or tails or corolla lobes; see *Bull. Sci. Soc. Philom. Paris* 3: 122, t. 8. 1802, *Bull. Mens. Soc. Linn. Paris* 1: 757. 1888 and *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 2(1): 45–140. 1949, *Fl. Madagasc.* 169: 1–317. 1976, Beentje, H.J. *A Monograph on Strophanthus DC. (Apocynaceae)*. Mededelingen Landbouwhogeschool Wageningen 82–84. Wageningen, Netherlands. 1982, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1288. 1988, *Journal of Ethnopharmacology* 25: 1–41. 1989, Harris, D.J. *The Vascular Plants of the Dzanga-Sangha Reserve, Central African Republic*: 1–274. National Botanic Garden (Belgium), Meise. 2002, Calane da Silva, M., Izdine, S. & Amuse, A.B. *A Preliminary Checklist of the Vascular Plants of Mozambique*. Pretoria. 2004, Strugnell, A.M. "A checklist of the Spermatophytes of Mt. Mulanje, Malawi." *Scripta Botanica Belgica* 34: 1–199. 2006, Sosef, M.S.M. et al. "Check-list des plantes vasculaires du Gabon." *Scripta Botanica Belgica* 35: 1–438. 2006.

Strophanthus amboensis (Schinz) Engl. & Pax (*Strophanthus amboensis* Engl. & Pax ex Pax; *Strophanthus gossweileri* H. Hess; *Strophanthus hirsutus* H. Hess; *Strophanthus intermedius* Pax; *Strophanthus longicalyx* H. Hess; *Strophanthus paxii* H. Hess; *Strophanthus petersianus* var. *amboensis* Schinz; *Strophanthus schuchardtii* Pax)

Zaire, Namibia. Shrub or liana, white exudate, inflorescence a terminal dichasial cyme, a variable species

See *Verh. Bot. Vereins Prov. Brandenburg* 30: 259. 1888, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 376. 1892, *Nouv. Arch. Mus. Paris, Sér. III.* v.(1893) 289. 1893 and *Helvetica Chimica Acta* 34(6): 1821–1833. 1951, *Ber. Schweiz. Bot. Ges.* 62: 92, 94. 1952, *Journal of the American Pharmacology Association* 44(7): 438. 1955, *Helvetica Chimica Acta* 39(1): 64–79. 1956,

Phytochemistry 27: 3475–3479. 1988, *Phytochemistry* 28: 1093–1097. 1989, Curtis, B. & Mannheimer, C. *Tree Atlas of Namibia*. The National Botanical Research Institute, Windhoek. 2005

(Harmful to people or animals. Roots or leaves against rheumatism, venereal diseases, scabies. Seeds used in the preparation of arrow poison.)

Strophanthus barteri Franch.

West Africa and western Central Africa. A slender liana

See *Journal de Botanique* (Morot) 7: 323. 1893

(Stem bark decoction taken to treat diarrhea.)

Strophanthus boivini Baillon (*Roupellina boivinii* (Baillon) Pichon; *Roupellina boivinii* var. *angustifolia* (H. Perrier ex Pichon) Pichon; *Roupellina boivinii* var. *boivinii*; *Roupellina boivinii* var. *grandiflora* (Pichon) Pichon; *Roupellina boivinii* var. *typica* Pichon; *Strophanthus arboreus* Boivin ex Franch., nom. nud.; *Strophanthus aurantiacus* hort. ex Duncan, nom. nud.; *Strophanthus boivinii* var. *angustifolius* H. Perrier ex Pichon; *Strophanthus boivinii* var. *grandiflorus* Pichon; *Strophanthus grevei* Baill.)

Madagascar. Shrub or small tree, white latex, orange-brown flowers, ellipsoid 2-valved follicles tapering into a narrow apex, densely hairy seeds spindle-shaped

See *Cat. Pl. Roy. Bot. Gard. Mauritius* 88. 1863, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 757. 1888, *Nouvelles archives du muséum d'histoire naturelle* 5: 252. 1893 and *Ann. Inst. Bot.-Geol. Colon. Marseille*, ser. 2, 8: 373–468. 1910, *Notulae Systematicae*. Herbarium du Muséum de Paris 13: 211. 1948, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 2: 64, 66–67. 1949, *Hooker's Icon. Pl.* 35: t. 3483. 1950, *Helvetica Chimica Acta* 35(3): 442–446, 673–686, 730–745. 1952, *Helvetica Chimica Acta* 44(5): 1293–1330. 1961, *Fitoterapia* 64: 117–129. 1993

(All parts toxic when ingested. Bark decoction drunk to treat colic, also rubbed for wounds and itch. Aerial parts decoction to treat gonorrhoea and fever. Used to poison dogs and pest animals.)

in English: wood shaving flower

in Madagascar: befe, hiba, kabocala, lalondo, saritangena, tambio

Strophanthus caudatus (L.) Kurz (*Apocynum floristratum* Noronha; *Echites caudatus* L.; *Nerium caudatum* (L.) Lam.; *Nerium scandens* Lour.; *Strophanthus caudatus* var. *lanceolatus* Franch.; *Strophanthus caudatus* var. *macrophyllus* Franch.; *Strophanthus cumingii* A. DC.; *Strophanthus dichotomus* DC., nom. illeg.; *Strophanthus erectus* Merr.; *Strophanthus giganteus* Pierre, nom. nud.; *Strophanthus griffithii* Wight; *Strophanthus horsfieldianus* Miq.; *Strophanthus letei* Merr.; *Strophanthus letei* Merr. ex Wiells & Garcia; *Strophanthus longicaudatus* Wight; *Strophanthus macrophyllus* (Franch.) Pierre;

Strophanthus pierrei Baill.; *Strophanthus scandens* Reinw. & Schult.; *Strophanthus scandens* (Lour.) Roem. & Schult.; *Strophanthus terminalis* Blume)

China, Vietnam to Malesia. A shrub or woody liana, branches dark brown, leaves elliptical, sepals acute, corolla tube white turning yellow then red, corona lobes red turning purple, follicles divergent, in primary or secondary forest, in forest margins

See *Mantissa Plantarum* 1: 52. 1767, *Bull. Sci. Soc. Philom. Paris* 3: 122. 1802, *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 46(2): 257. 1877, *Bull. Mens. Soc. Linn. Paris* 2: 1151. 1894 and *Bull. Soc. Bot. France* 52: 491. 1905, *Philipp. J. Sci.*, C 3: 261. 1908, *Philipp. J. Sci.* 26: 9. 1925

(Seeds used as a heart stimulant. Latex and bark an ingredient of arrow poison, also a fish poison.)

in English: ovate-sepal strophanthus

in China: luan e yang jiao niu

in Malaysia: tandok-tandok, akar tandok hitam, akar sewai

in Philippines: abuhab-baging (Tagalog), lanot (Iloko), lasuiu

in Thailand: khrueta nong, yaang nong khrueta

in Vietnam: d[aa]y v[of]i, s[uwf]ng tr[aa]u du[oo]i

Strophanthus courmontii Sacleux ex Franch.

Trop. Africa. Climber, lianescent, white latex, stem dark brown with white dots, leaves green, inflorescence a terminal dichasial cyme, flowers erect, petals dark red outside, corolla tube dark pink on outside, anthers and stigma fused, ellipsoid 2-valved follicles, densely hairy seeds spindle-shaped, sweet smell, in coastal forest

See *J. Bot.* (Morot) 7: 300 (or 322). 1893, *Nouv. Arch. Mus. Paris*, Sér. III. v. (1895) 286, t. 10. 1895

(From unripe seeds various cardiac glycosides highly toxic. Root decoction drunk to treat rheumatism and also as an aphrodisiac. Seeds used to make ordeal poison and arrow poison.)

in East Africa: kiaja mamba, kila-dya mamba, mbuba, msoto, mtowe, wakama

in Tanzania: kia ja mamba

Strophanthus divaricatus (Lour.) Hook. & Arn. (*Emericia divaricata* (Lour.) Roem. & Schult.; *Faskia divaricata* (Lour.) Lour. ex B.A. Gomes; *Nerium chinense* Hunter ex Roxb.; *Pergularia divaricata* Lour.; *Periploca divaricata* (Lour.) Spreng.; *Streptocaulon divaricatum* (Lour.) G. Don; *Strophanthus chinensis* G. Don, nom. illeg.; *Strophanthus divergens* Graham; *Vallaris divaricata* (Lour.) G. Don)

China, Vietnam. Liana or shrub, sarmentose, branches dark grey, flowers sometimes fragrant, corolla tube white turning yellow, corona lobes white or greenish yellow, follicles divergent, in primary and secondary forest

See *Flora Cochinchinensis* 1: 169. 1790, *Systema Vegetabilium* 4: 401. 1819, *Systema Vegetabilium*, editio decima sexta 1: 836. 1825 (1824), *Edinburgh New Philosophical Journal* 177. 1827, *A Numerical List of Dried Specimens* n. 1642. 1829, *Flora Indica*; or, descriptions of Indian Plants 2: 9. 1832, *A General History of the Dichlamydeous Plants* 4: 79, 85, 162. 1837, *The Botany of Captain Beechey's Voyage* 199. 1837 and *Phytochemistry* 26(8): 2351–2355. 1987

(Leaves and seeds to treat scabies, rheumatism. Seeds used as an insecticide, to relieve itching and kill worms.)

in English: divaricate strophanthus

in China: yang jiao niu, yang liao ao

in Vietnam: thuoc ban, sung de, s[uwɸ]ng d[ee], thu[oos]c b[aws]n, s[uwɸ]ng d[ee]

Strophanthus eminii Asch. ex Pax (*Strophanthus fischeri* Aschs. & K. Schum. ex Franch.; *Strophanthus stuhlmannii* Pax, nom. inval.; *Strophanthus wittei* Staner)

Zaire, Tanzania, Zambia. Scandent shrub or small tree, scrambling, drooping, sprouting, straggling, woody climber, deciduous, many-branched, arching branches, stem grey-dark brown, cut twigs yield a clear gummy aromatic exudate, shoots and leaves velvety, flowers pink sweetly scented, in dry scrub, dry rocky places, *Julbernardia* and miombo woodland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 366, t. 10–11. 1892 and *Ann. Soc. Sci. Bruxelles, Sér. B* 52: 90. 1932, *Helvetica Chimica Acta* 31(3): 883–892. 1948, *Helvetica Chimica Acta* 33(3): 639–650. 1950, *Helvetica Chimica Acta* 40(7): 2110–2129. 1957

(Various cardiac glycosides highly toxic. Seeds and roots emetic, febrifuge and anthelmintic. Roots eaten to increase appetite; an infusion drunk as emetic and anthelmintic; root infusion applied to skin diseases and wounds. Treats sexually transmitted diseases such as gonorrhoea, when mixed with other tree species also cures stomach gases. Young twigs chewed against the effects of snakebites, such as of black mamba and cobra. Seeds and stem in arrow poisons. Veterinary medicine, heartwater in goat, a rickettsial disease of ruminants.)

in English: poison arrow vine, spider tresses

in East Africa: efeso, ifeso, msegwe, msungulu, msungululu, msungururu, mtondo, mtowo, mverevere, mveriveri, mwelewele, sungululu

in Tanzania: mbembesi, mhunguti, mlunduli, msogati, msungalulu, msungululu, mtondo, mhunguti, mhungutwi, sungululu

in Zambia: bulembè, mununga, musamwezilonda, mushimba

Strophanthus gardeniiflorus Gilg

Congo, Zambia and Angola. Closely related to *Strophanthus thollonii*

See *Monogr. Afrik. Pflanzen-Fam.* 7: 20. 1903

(Seeds used for arrow poison.)

Strophanthus gerrardii Stapf

Mozambique, Swaziland, S. Africa. Climber, lianescent shrub, stems green-brown with white lenticels, white latex, green leaves smooth, fruits in pairs olive green to brown with white lenticels, in woodland

See *Bull. Misc. Inform. Kew* 1907: 52. 1907

(Harmful to people or animals, latex used as a spear poison. Fruit decoction taken to treat hysteria. Magical plant.)

Strophanthus gracilis K. Schum. & Pax (*Strophanthus gracilis* K. Schum. & Pax ex Pax; *Strophanthus klainei* De Wild.; *Strophanthus minor* Blondel, nom. inval.; *Strophanthus scaber* Pax)

Tropical Africa, Nigeria, Gabon.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 370. 1892, *Nouv. Arch. Mus. Paris, Sér. III.* v.(1893) 277. 1893 and *Ann. Mus. Congo Belge, Bot.*, IV, 1: 106. 1903

(High content of cardiac glycosides, seeds and latex used in arrow and fish poisons.)

Strophanthus gratus (Wall. & Hook.) Baill. (*Nerium guineense* Brongn. ex Perrot & Vogt; *Roupalia grata* (Wall. & Hook.) T. Moore & Ayres; *Roupellia grata* Wallich & Hooker; *Strophanthus chopraie* M.R. Almeida; *Strophanthus glaber* Cornu ex Holmes; *Strophanthus gratus* Baill.; *Strophanthus gratus* Franch., nom. illeg.; *Strophanthus gratus* (Wallich & Hooker) Franchet, nom. illeg., non *Strophanthus gratus* (Wall. & Hook.) Baill.; *Strophanthus ouaboio* Holmes, nom. inval.; *Strophanthus perrotii* A. Chev., nom. nud.; *Strophanthus stanleyanus* Hook.)

Trop. Africa. Woody vine, liana, climber, plants with clear juice turning gelatinous and sticky resembling vaseline, branches dark or purplish brown densely lenticellate, leaves coriaceous, flowers fragrant, calyx green with dark reddish edge, corolla tube pale brown to purple-brown, lobes dark reddish at base to lilac at edge, fruits greenish-tan paired extremely hard and heavy, in primary and secondary forest, forest margins, river banks

See *Botanical Magazine* 75: t. 4466. 1849, *Gard. Mag. Bot.* 2: 33. 1850, *Histoire des Plantes* (Baillon) 10: 171. 1889, *Journal of Botany, British and Foreign* 7: 321. 1893 and *Trav. Lab. Matière Méd. École Supér. Pharm. Paris* 9: 61. 1912 publ. 1913, *Explor. Bot. Afrique Occ. Franç.* 1: 421. 1920, *Helvetica Chimica Acta* 48(1): 202–219. 1965, *Helvetica*

Chimica Acta 50(1): 179–193. 1967, *Aroideana* 5(1): 3–7. 1982, *Journal of Ethnopharmacology* 44(2): 99–108. 1994, *Cancer Research* 60: 3807–3812. 2000, *Fl. Maharashtra* 3A: 216. 2001, *Fitoterapia* 72(1): 80–82. 2001, *European Journal of Biochemistry* 269: 2440–2448. 2002

(Seeds very toxic, used in the preparation of arrow poison; also used as a cardiac and vascular stimulant, cardiotonic. Leaves and seeds for severe constipation. Leaf infusion taken to treat constipation and fevers. Leaf paste applied to snakebites, sores, Guinea worm sores. Leaf and stem decoction drunk to treat gonorrhoea. Root decoction an aphrodisiac. Juice from stem bark or roots used as an arrow poison, hunting poison. Seeds as fish poison. Magico-religious beliefs, rituals, good luck charm.)

in English: climbing oleander, poison arrow vine, spider tresses, spiny-flower strophanthus, twisted flower

in China: xuan hau yang jiao niu

in Thailand: baan thon, hom peenang, yan peenang

Strophanthus hispidus DC. (*Strophanthus bariba* Boye & Bereni; *Strophanthus hirtus* Poir.; *Strophanthus niger* Blondel, nom. nud.; *Strophanthus tchabe* Boye & Bereni; *Strophanthus thierryanus* K. Schum. & Gilg)

Trop. Africa, Tanzania, Angola. Climbing shrub, scandent, woody liana, scrambling, stems red-black with stiff tan hairs and white raised lenticels, yellow-brown translucent exudate, young shoots rough pubescent, white lenticels on branches, leaves papery with stiff hairs, corolla lobes yellow with yellow appendages, hairy calyx green-cream tinged with red, sweetly fragrant, in grassland, closely related to *Strophanthus kombe* Oliv.

See *Bull. Soc. Philom. Paris* 3: 123, t. 8. 1802, *Arch. Méd. Navale* 68: 403, 405. 1897 and *Bot. Jahrb. Syst.* 32: 158. 1902, *Aroideana* 5(1): 3–7. 1982, *Journal of Ethnopharmacology* 42(3): 179–182. 1994, *Journal of Ethnopharmacology* 44(2): 99–108. 1994

(Seeds greatly toxic; the glycosides extracted from the seeds, cardiac and vascular stimulant, in treating heart failure and blood circulation disorders. Powdered roots febrifuge, antiinflammatory. Roots decoctions used externally to treat skin diseases, leprosy and ulcers, and internally to treat parasites, rheumatic afflictions, malaria, dysentery and gonorrhoea. Bark decoction or leaf sap drunk against snakebites. Leaves for cough. Latex and seeds used to make arrow poison.)

in English: brown strophanthus, hairy strophanthus, poison arrow vine, Transvaal strophanthus

in China: jian du yang jiao niu

in Nigeria: isa, isa gidi, isa ogbugu, isa giri, isa gere, oro, iwase dudu, kwankwani, sagere

Strophanthus holosericeus K. Schum. & Gilg

Congo, Zambia. A deciduous liana, shrub, scrambling, clear sticky sap, brown paired follicles

See *Bot. Jahrb. Syst.* 32: 157. 1902

(Seeds used as arrow poison and ordeal poison.)

Strophanthus kombe Oliv. (*Strophanthus hispidus* DC. var. *kombe* (Oliv.) Holmes)

Kenya, S. Africa. Shrub, liana, straggling, rambling, climber, stem with thick projections at nodes, flowers white red-streaked inside with long yellowish tails, paired fruits dull green with lighter brown lenticels, clear yellow exudate from cut fruit, in coastal forest, closely related to *Strophanthus hispidus* DC.

See *Hooker's Icones Plantarum* 11: t. 1098. 1871 and *Curtis's Botanical Magazine* 17(4): 202–207. 2000, *South African Journal of Botany* 69(3): 382–395. 2003

(The glycoside mixture from the seeds used as a heart stimulant, useful in treating heart failure and blood circulation disorders. Seeds and roots used in the preparation of arrow poison. Magico-religious beliefs, rituals, ceremonial, leaves to make a charm, in a cleansing ritual.)

in East Africa: mbiliti, msugu

in Tanzania: mchoki, mlibiti

in Zambia: bulembè, mununga, musamwezilonda, mushimba

Strophanthus luteolus Codd

Mozambique, S. Africa. Shrub, climber

See *Bothalia* 7: 454. 1961

(Harmful to people or animals, latex used as a spear poison. Fruit decoction taken to treat hysteria. Magic.)

Strophanthus mirabilis Gilg

Somalia to E. Kenya. Shrub or small shrub, straggling, woody climber, lianescent, resinous, branches sometimes lianescent, leaves elliptic to lanceolate-elliptic very small, fragrant flowers white with trailing petals orange-yellow-red, corolla appendages red with yellow in the centre near the base, fruit brown-purple streaked with white, roots considered edible when cooked, in dry bushland

See *Bot. Jahrb. Syst.* 32: 159. 1902

(Seeds used as ordeal poison.)

in East Africa: dumadera, goi-or-gusho, marajis

Strophanthus mortehanii De Wild.

Tropical Africa, Cameroon, Gabon, Congo. Shrub, related to *Strophanthus hispidus*

See *Bull. Jard. Bot. État Bruxelles* 5: 102. 1915

(Crushed seeds mixed with the latex of *Periploca nigrescens* Afzel. and used as an arrow poison.)

Strophanthus nicholsonii Holmes (*Strophanthus asper* Oliv. ex L. Planch.)

Malawi, Zambia, Zimbabwe and Mozambique. Shrub

See Planchon, Louis (1858–1915), *Produits fournis à la matière médicale par la famille des apocynées*, 61. Montpellier, Impr. centrale du Midi (Hamelin frères) 1894, *Pharm. Journ.* 1897, 209. 1897

(Seeds used as a hunting poison and ordeal poison.)

Strophanthus parviflorus Franch. (*Strophanthus dewevrei* De Wild. & T. Durand)

Tropical Africa, Gabon, Congo.

See *Journal de Botanique* (Morot) 7: 321. 1891 (publ. 1893), *Nouv. Arch. Mus. Paris*, Sér. III. v. (1893) 281, t. 11b. 1893 and *Ann. Mus. Congo Belge, Bot.*, II, 1(2.1): 40. 1900

(Seeds used to make arrow poison.)

Strophanthus petersianus Klotzsch (*Strophanthus grandiflorus* Gilg; *Strophanthus grandiflorus* (N.E. Br.) Gilg; *Strophanthus petersianus* var. *grandiflorus* N.E. Br.; *Strophanthus sarmentosus* DC. var. *verrucosus* Pax; *Strophanthus verrucosus* (Pax) Stapf; *Strophanthus verrucosus* Stapf)

Tropical Africa, Kenya to S. Africa. Climber, shrub or liana, white or reddish exudate, stem black, leaves greenish yellow, sweet-scented erect flowers, calyx pale green tinged red-purple, corolla lobes and upper part of tube red-purple outside

See *Bull. Soc. Philom. Paris* 3: 123, pl. 8, f. 1. 1802, *Naturw. Reise Mossambique* [Peters] 6(*Bot.*, 1): 276. 1861, *Bot. Jahrb. Syst.* 15: 374. 1892, *Bull. Misc. Inform. Kew* 1892: 126. 1892 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 181. 1902, *Bot. Jahrb. Syst.* 32: 161. 1902

(Seeds used to make arrow poison. Magico-religious beliefs, a charm against evil.)

in East Africa: mbuba, mpamba mwitu, mvariso

in Tanzania: mvariso

Strophanthus preussii Engl. & Pax (*Strophanthus bracteatus* Franch.; *Strophanthus preussii* Engl. & Pax ex Pax; *Strophanthus preussii* f. *crebrinervis* Monach.; *Strophanthus preussii* f. *multinervis* Monach.; *Strophanthus preussii* f. *paucinervis* Monach.; *Strophanthus preussii* var. *scabridulus* Monach.)

West and Central Africa, Cameroon. Liana or shrub, white exudate, inflorescence a terminal dichasial cyme, fragrant flowers with very long narrow spreading corolla tails, young leaves cooked and eaten as a vegetable, related to *Strophanthus barteri* Franch. and *Strophanthus gracilis* K. Schum. & Pax

See *Bot. Jahrb. Syst.* 15: 369. 1892, *Nouv. Arch. Mus. Paris*, Sér. III. v. (1893) 279. 1893 and *Phytologia* 3: 478–479. 1951, *Helvetica Chimica Acta* 36(4): 787–801. 1953

(Leaf decoction as a postpartum remedy. The latex or the young leaves crushed in water and applied to treat gonorrhoea; latex put on sores and wounds. Latex or seeds used in arrow poison mixtures.)

in English: poison arrow vine, spider tresses

Strophanthus sarmentosus DC.

Trop. Africa, Uganda. Shrub, liana, scrambling, climbing, long trailing stems reddish-brown with raised lenticels, white sap or almost colourless sticky latex, papery leaves, flowers dark red inside and whitish red outside, sepals green-brown and petals purple outside and yellow inside, stamens reddish white, flowers with strong sweet fragrance, fruits paired, edge of a secondary forest, in montane forest

See *Bull. Soc. Philom. Paris* 3: 123, t. 8, f. 1. 1802 and *Nigerian Journal of Natural Products and Medicine* 1: 16–18. 1997, *Curtis's Botanical Magazine* 17(4): 202–207. 2000

(Leaf decoction emetic, astringent, taken to treat diarrhea and as a remedy against snakebites. Latex applied to wounds and sores. Root decoction vermifuge, drunk to treat gonorrhoea and leprosy. Crushed seeds applied to scabies, skin diseases and to the head to kill lice. Twigs decoction taken to treat rheumatoid arthritis, arthritis. Seeds for arrow poison. Ceremonial, in circumcision.)

in English: arrow-poison strophanthus, poison arrow vine, spider tresses

in China: xi fei yang jiao niu

in Central African Republic: abuli

in Mali: kuna, kunankale, mangana

in Nigeria: isha kere, isha wewe

in West Africa: gugu, ra-yari

in Yoruba: ilagba omode, irewu, isa kekere, lagba omode

Strophanthus speciosus (Ward & Harv.) Reber (*Christya speciosa* Ward & Harv.; *Strophanthus capensis* A. DC.; *Strophanthus speciosus* Reber)

Zimbabwe, Swaziland, S. Africa. Shrub, climber, white exudate

See *Journal of Botany*, being a second series of the Botanical Miscellany 4: 134, t. 21. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 419. 1844, *Der Fortschr.* 3: 299. 1887, *Nouv. Arch. Mus. Paris*, Sér. III. v.(1893) 287. 1893 and *Helvetica Chimica Acta* 35(2): 442–446. 1952, *Genetica* 68: 3–35. 1985

(Harmful to people or animals, also used as an arrow poison and for criminal purposes. To treat snakebites in humans and cattle.)

in English: common poison rope, corkscrew-flower, forest poison rope

in Southern Africa: gewone giftou, osdoring; amaSebele, umHlazazane (Zulu); umKhukhumeza (Xhosa)

Strophanthus thollonii Franch. (*Strophanthus pierreanus* De Wild.)

Nigeria, Cameroon, Central African Republic, Gabon. Evergreen liana or shrub, vine, scrambling, straggling, woody, white exudate, fragrant pink-orange-yellow flowers, similar to *Strophanthus gratus*

See *Journ. Bot. (Morot)* 7: 299. 1893, *Nouv. Arch. Mus. Paris*, Sér. III. v.(1893) 257, t. 8. 1893 and *Ann. Mus. Congo Belge, Bot.*, IV, 1: 102. 1903, *Helvetica Chimica Acta* 40(4): 980–1015. 1957, *Helvetica Chimica Acta* 49: 1844. 1966

(Cardiac glycosides from the highly poisonous seeds. Crushed or boiled seeds to prepare hunting poison.)

in Central African Republic: ndemele, nea

Strophanthus wallichii A. DC. (*Nerium caudatum* Roxb., nom. illeg.; *Strophanthus caudatus* Kurz, nom. illeg.; *Strophanthus caudatus* (Roxb.) Kurz; *Strophanthus caudatus* (L.) Kurz; *Strophanthus robustus* (Pierre ex Gilg) Pierre ex Pit.; *Strophanthus wallichii* var. *robustus* Pierre ex Gilg)

India, Pen. Malaysia. Climber, yellowish flowers with purple or brown streaks

See *Encycl. (Lamarck)* 3(2): 458. 1792, *Hortus Bengalensis*, or a catalogue ... 84. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 418. 1844, *Journal of the Asiatic Society of Bengal* 46(2): 257. 1877, *Forest Fl. Burma* 2: 192. 1877 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 7: 16. 1903, *Flore Générale de l'Indo-Chine* 3: 1198. 1933, *Taxon* 30: 153. 1981

(Cardiac tonic, cathartic, an overdose produces nausea, abnormalities in blood pressure.)

in English: Wallich strophanthus

in China: yun nan yang jiao niu

in India: mei rengblang

Strophanthus welwitschii (Baill.) K. Schum. (*Strophanthus angusii* F. White; *Strophanthus ecaudatus* Rolfe; *Strophanthus gillettii* De Wild.; *Strophanthus katangensis* Staner; *Strophanthus parvifolius* K. Schum.; *Strophanthus verdickii* De Wild.; *Strophanthus welwitschii* K. Schum.; *Zygonerion welwitschii* Baill.)

Tanzania, Zambia, Angola. Lianescent shrub or small tree, climber, fragrant flowers, corolla white tinged dull yellow on tube and lower half of throat and bright red-purple on upper half of throat, calyx purple at base light green on lobes, in woodland

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 758. 1888, *Bol. Soc. Brot.* 11: 85. 1893, *Nat. Pflanzenfam.* [Engler & Prantl] 4(2): 182. 1895 and *Nat. Pflanzenfam., Nachtr.* [Engler & Prantl] 2: 59. 1900, *Ann. Mus. Congo Belge,*

Bot., IV, 1: 103, 105. 1903 [1902–1903 publ. Jan 1903], *Ann. Soc. Sci. Bruxelles*, Sér. B 52: 94. 1932, *Helvetica Chimica Acta* 35: 152–160. 1952, *Forest Fl. N. Rhodesia*: 351. 1962, *Journal of Ethnopharmacology* 8: 257–264. 1983

(Root infusion drunk to treat gonorrhoea; root powder mixed with oil applied to treat scabies and skin diseases. Seed decoction administered orally to treat respiratory diseases in children. Seeds used to produce arrow poison.)

in East Africa: miteke

Strophanthus wightianus Wall. ex Wight (*Strophanthus wightianus* Wall.)

India.

See *Icones Plantarum Indiae Orientalis* 4: t. 1301. 1848

(Plant paste consumed with milk for leg pain, paste also applied on body; leaves cathartic.)

in India: aatusenguruthipatchilai, kambetti, naithal kizhangu, neivalli

Struchium P. Browne Asteraceae (Compositae)

See *The Civil and Natural History of Jamaica* in Three Parts 312–313, pl. 34, f. 2. 1756, *Definitiones Generum Plantarum* 154. 1760, *Decas plantarum rariorum horti upsaliensis* 1: t. 1. 1762, *Exposition des Familles Naturelles* 1: 406. 1805 and *Fieldiana, Bot.* 24(12): 4–32, 455–465. 1976, *Fieldiana, Bot.*, n.s. 5: 22–73. 1980, *Kew Bulletin* 43(2): 195–277. 1988

Struchium sparganophorum (L.) Kuntze (*Ethulia sparganophora* L.; *Ethulia struchium* Sw.; *Sparganophorus africanus* (P. Beauv.) Steud.; *Sparganophorus africanus* Steud.; *Sparganophorus fasciatus* Lam.; *Sparganophorus fasciatus* Poir.; *Sparganophorus fasciculatus* Steud.; *Sparganophorus fuscatus* Steud.; *Sparganophorus sparganophora* (L.) (Leaves juice administered orally or rectally to babies with thrush, sometimes in combination with juice from *Gossypium* spp. and *Scoparia dulcis*; juice also applied to cuts, syphilis and ulcers; leaf decoction given in fever; leaves paste applied for the treatment of scald. Whole plant infusion to relieve colds, wheezing, asthma or backache.)

in English: ant's bush

in India: hinan

in Sarawak: ruteng

Struthanthus Martius Loranthaceae

Greek *strouthion* 'a small bird, small sparrow', *strouthos* 'a sparrow, ostrich' and *anthos* 'flower'.

Struthanthus cassythoides Millsp. ex Standl. (*Struthanthus gentlei* Lundell; *Struthanthus interruptus* (Kunth) Blume; *Struthanthus interruptus* (Kunth) G. Don)

Mexico.

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 440–441. 1818[1820], *Systema Vegetabilium* 7(2): 1731. 1830, *A General History of the Dichlamydeous Plants* 3: 413–414. 1834 and *Publications of the Field Columbian Museum, Botanical Series* 8(1): 7. 1930, *Contributions from the University of Michigan Herbarium* 6: 7. 1941

(Leaves decoction applied to fractures to promote healing.)

Struthanthus haenkei (C. Presl) Standl. (*Spirostylis haenkei* C. Presl; *Struthanthus haenkei* (C. Presl) Engl.; *Tupeia haenckeana* (C. Presl) Miers)

North America.

See *Linnaea* 3: 203. 1828, *Systema Vegetabilium* 7(1): 163–164. 1829, *Flora* 13(1): 102–104. 1830, *Die Natürlichen Pflanzenfamilien Nachtr.* 1: 134. 1897 and *Contributions from the United States National Herbarium* 20(6): 212. 1919

(Leafy twigs infusion taken to cure diarrhea with blood.)

Strychnos L. Loganiaceae (Strychnaceae)

Greek name for many and different poisonous plants, from *strychnon*, *strychnos* 'acid, bitter'; Latin *strychnos* or *trychnos* for a kind of nightshade; see Carl Linnaeus, *Species Plantarum*. 1: 189. 1753, *Genera Plantarum*. Ed. 5. 86. 1754, *Histoire des plantes de la Guiane Française* 1: 93–95, t. 36. 1775, *Characteres Generum Plantarum* 23. 1776, *Genera Plantarum* 75. 1789, *Florae Fluminensis* 108. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 9:

15. 1845, *Flora Brasiliensis* 6(1): 271, 277, 280, t. 79. 1868 and Watt, J.M. & Breyer-Brandwijk, M.G. *The Medicinal and Poisonous Plants of Southern and Eastern Africa*, edn 2. Oliver & Boyd, Edinburgh. 1963, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1432. New York 1967, *Memoirs of the New York Botanical Garden* 20(1): 57, 68. 1969, *Lloydia* 35(3): 193–271. 1972, Helmut Genoust, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 616. 1996.

Strychnos aculeata Soler. (*Strychnos mortehani* De Wild.)

Sierra Leone, Uganda, Angola and Zambia. Liana, woody vine, armed, prickly, climbing, tendrils, leaves coriaceous, inflorescence an axillary thyrse, small purple-pinkish flowers, very hard yellow-green globose berry, large fruit eaten by elephants, occurs in rainforest, secondary forest

See *Die Natürlichen Pflanzenfamilien* 4(2): 40. 1892 and *Bulletin du Jardin Botanique de l'État* 5: 50. 1915

(Fruits and seeds very poisonous. Emetic, expectorant, abortifacient, febrifuge, for urinary, genital and pulmonary infections, food poisoning, gonorrhoea, Guinea worm infections, edema and scrotal elephantiasis. Seeds rubbed into a paste used as arrow poison, the fruit and a paste from the seed used as fish poison.)

in Central African Republic: bombé

Strychnos acuminata Wall. (*Strychnos rufa* C.B. Clarke)

India. Climber, small white fragrant flowers in axillary compound cymes, globular berries

(Poisonous.)

Strychnos aenea A.W. Hill

India. Endangered

See *Bull. Misc. Inform. Kew* 1917, 138. 1917

(Sacred grove.)

in India: kuchilalata, vallikanhram

Strychnos afzelii Gilg

Senegal, Nigeria. Liana, aromatic, tendrils, blunt spines, flowers white creamy or pale yellowish green, fruit a laterally compressed hard orange berry, secondary forest, coastal swamp forest, on river banks

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 572. 1893

(Febrifuge, antiinflammatory, antibacterial, antifungal, aphrodisiac. Ground seeds eaten for stomachache.)

Strychnos andamanensis A.W. Hill

India.

See *Bull. Misc. Inform. Kew* 1917, 146. 1917

(Leaves decoction drunk for urinary troubles.)

Strychnos angolensis Gilg (*Strychnos angolensis* var. *lacourtiana* (De Wild.) P.A. Duvign.; *Strychnos lacourtiana* De Wild.)

Cameroon, Gabon. Liana, woody vine, lianescent shrub or small tree, climbing, scandent, small opposite leaves, tendrils, white or yellow flowers, orange-red aromatic fruits, riverbanks

See *A General History of the Dichlamydeous Plants* 4: 485. 1837, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 571. 1893 and *Compagnie du Kasai* 382. 1910, *Lejeunia* 11: 71. 1947

(Antiplasmodial. Used as ordeal poison; branches used to make arrow shafts.)

Strychnos angustiflora Bentham (*Strychnos usitata* Pierre ex Dop var. *cirrosa* Dop)

China.

See *Journal of the Linnean Society, Botany* 1: 102. 1857 and *Mémoires de la Société Botanique de France* 19: 19. 1910

(Seeds, bark, and young leaves poisonous, used to treat sore throats and for antiswelling.)

in English: narrow-flower poison nut

in China: niu yan ma qian

Strychnos axillaris Colebr.

Malaysia.

See *Transactions of the Linnean Society of London* 12(2): 356–357, pl. 15. 1818, *Journal of the Linnean Society, Botany* 1: 108. 1856 and *Lloydia* 35(3): 193–271. 1972

(Used in the preparation of arrow poison. Leaves used as a suppurative and the seeds internally as a febrifuge.)

Strychnos barteri Soler.

Guinea, Cameroon. Large liana, climbing, tendrils, leaves coriaceous, white flowers, orange berry, on riverbanks, rainforest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27: 556. 1839

(Stem and bark potent convulsant. Fruit used as a fish poison.)

Strychnos camptoneura Gilg & Busse (*Scyphostrychnos psittaconyx* J. Duvign.; *Scyphostrychnos talbotii* S. Moore)

Liberia, Central African Republic, Congo. Liana, climbing, tendrils, unarmed, large opposite coriaceous leaves, axillary inflorescence, corolla creamy-white to pale yellow, axillary fruits on branchlet, in rainforest, secondary forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 93. 1905, *British Museum, Natural History. Catalogue of the plants collected by Mr. & Mrs. P.A. Talbot in the Oban district South Nigeria ...* 71, t. 10. 1913, *Mémoires de l'Académie Royale*

des Sciences, Lettres et Beaux-arts de Belgique. Classe des Sciences 34: 98, f. 1. 1948

(Antimalarial. A tea from the stem bark taken to treat stomachache, kidney pain. Stem bark and root bark extracts strong muscle relaxant activity, clonic and tonic convulsions. Arrow poison, root bark of *Strychnos camptoneura* mixed with plant sap of *Periploca nigrescens* Afzel. Fruits and crushed roots used as a fish poison.)

Strychnos castelnaeana Wedd. (*Strychnos castelnaei* Wedd.) (for the English (b. London) French naturalist François Louis Nompur de Caumat de Laporte Castelnau, 1810–1880 (Melbourne), entomologist, traveller, plant collector in Florida, 1843–1847 to South America (collected plants in Bolivia and Peru), 1856–1857 at Cape (South Africa), 1862–1880 French Consul at Melbourne, author of *Mémoire sur les Poissons de l'Afrique australe*. Paris 1861. See *Expédition dans les parties centrales de l'Amérique du Sud, de Rio de Janeiro à Lima, et de Lima au Para; exécutée ... pendant ... 1843 à 1847, sous la direction de F. de Castelnau*. Paris 1850–1859; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 115. 1981; John H. Barnhart, *Biographical Notes upon Botanists*. 1: 321. 1965.)

South America. Liana, vine, in sandy soil, forest

See *Expédition dans les parties centrales de l'Amérique du Sud* 5: 22–23. 1851, *Journal of the Linnean Society, Botany* 1: 108. 1856

(Used to prepare the gourd or calabash curare.)

Strychnos cathayensis Merrill (*Strychnos cathayensis* var. *cathayensis*; *Strychnos henryi* Merrill & Yamamoto)

China. Liana, semi-woody, climbing, white flowers

See *Lingnan Science Journal* 13(1): 44. 1934, *Journal of the Society of Tropical Agriculture* 7: 145. 1935

(Leaves and seeds poisonous.)

in China: hua ma qian

Strychnos cocculoides Baker (*Strychnos suberosa* De Wild.)

South Africa. Shrub or small tree, spreading, sparsely crowned, branchlets armed with strong paired recurved spines, corolla white or pale green, hard woody yellow fruits, sweet juicy fruit flesh sucked from the kernel, wood not durable, browsed by giraffe, not browsed by goat, fruit eaten by people and chimps, baboon, elephant and kudu, common on riverside, in woodland and deciduous woodlands, in *Brachystegia* woodland

See *Bulletin of Miscellaneous Information Kew* 1895: 98. 1895 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo sér. 5* 1: 177. 1904

(Seeds and bark of this tree are poisonous. Fruits eaten in large quantities can cause stomach pain and diarrhea. The decoction of middle part of the bark provides a cure for stomach pain. Leaves used for healing wounds, pounded

and applied on sores. Unripe green fruits used for inducing vomiting. Roots decoction used to treat venereal diseases and stomach disorders.)

in English: corky-bark monkey orange, corky bark strychnos, monkey orange

in Namibia: punguvlei, vasekele

in Southern Africa: kurkbasklapper, liguni, maguni, omusu, suurklapper; mogorugorwana (Kwena dialect, Botswana); mohoruhoru (Tawana dialect, Ngamiland); morapa (North Sotho); mohoruhoru, mohoruhorwana (Kololo, Barotseland); umi (Mbukushu); uguni (Deiriku); omukwakwa (Ovambo); muOno, mutamba (Shona)

in Tanzania: libwaje, lidongansanga, lifumbu, linyowa, litongawai, m'milwa, mdonga, mnywewa, mpera mwitu, mtonga, mtongatonga, mtongawali, mumilwa, nkome mayi

Strychnos congolana Gilg (*Strychnos lecomtei* A. Chev. ex Hutch. & Dalziel; *Strychnos viridiflora* De Wild.)

West and northern Central Africa, tropical Africa. Spiny

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 120. 1899 and *Plantae Bequaertianae* 2: 101. 1923, *Flora of West Tropical Africa* 2: 22. 1931

(Ground roots of *Strychnos congolana* and seeds of *Aframomum melegueta* made into a paste administered as a suppository to treat dysmenorrhea, also used as an aphrodisiac. Leaf pulp applied to treat snakebites.)

Strychnos decussata (Pappe) Gilg (*Atherstonea decussata* Pappe; *Strychnos atherstonei* Harv.; *Strychnos boinensis* Jumelle & Perrier; *Strychnos madagascariensis* Poir.) (genus *Atherstonea* named for the English (b. Nottingham) botanist William Guybon Atherstone, 1814–1898 (d. Grahamstown, C.P., South Africa), physician and plant collector, geologist, naturalist; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 82–83. Cape Town 1981)

South Africa, tropical Africa. Shrub or small tree, erect, slender, twiggy, rounded crown, branches lenticellate, leaves deep green coriaceous, inflorescences axillary, white cream fragrant flowers, orange pendulous berries, pulp edible, dry forest, woodland

See *Encyclopédie Méthodique, Botanique* 8: 696. 1808, *Silva Capensis* 2: 29. 1862, *Thesaurus Capensis* 2: 41, t. 164. 1863, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 569. 1893, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 121. 1899 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille sér. 2* 5: 403. 1907, *J. Nat. Prod.* 44(4): 415–21. 1981, *Planta Med.* 42: 32–36. 1981, *Planta Med.* 43: 353–359. 1981, *South African Journal of Botany* 72(4): 656–660. 2006

(Bark and fruits poisonous especially when green. Roots and bark used for stomach problems, muscle relaxant. Alkaloids

from the stem bark. Veterinary medicine, to treat roundworm. Magic, ceremonial, mixed with crocodile fat, for protection against lightning; ceremonial stick for the king.)

in English: Cape teak, Chaka's wood, king's tree, panda's walking stick

in Kenya: horocha, kikolakolania, kikwakwa, mangula, mangura, mkwakwa, mtonga, muhonga, mujaje, musikiro

in Madagascar: hazomainty, hazomby, jaobiampototra, jobiampototra, relefo, vakakoana, vakakoanalaha, voapendela

in Southern Africa: Kaapse kiat, Kaapse kiaathout, umnonono; iNama, umGangele, umHlamahlala, umKhangala, umKhombazulu (= to point the lightning), umLahlankosi, umPhatha-wenkosi, umPhathankosi, umPhathankosi omhlophe, umPathawenkosi, umPhathawenkosi-emhlophe (Zulu); umHlamahlala, umHlamalala, umKhangele (Xhosa)

Strychnos densiflora Baill. (*Strychnos chlorocarpa* Gilg; *Strychnos hirsutostylosa* De Wild.; *Strychnos suaveolens* Gilg)

Cameroon. Liana, woody vine, yellow corolla, mature fruits lemon yellow, montane secondary forest, on riverbanks

See *Adansonia* 12: 369. 1879, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 566. 1893, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 129. 1899 and *Bulletin du Jardin Botanique de l'État* 5: 43. 1915

(Fruits, leaves and roots, applied externally for pains. Used as ordeal poison.)

Strychnos diaboli Sandwith (*Strychnos cogens* Benth.; *Strychnos dinklagei* Gilg)

Guyana. Vine, climber, rough bark, slash pale crimson, inflorescences of terminal corymbose cymes, corolla white with rusty hairs, orange-yellow mature fruit

See *Journal of Botany*, being a second series of the *Botanical Miscellany* 3: 241. 1841 and *Bulletin of Miscellaneous Information Kew* 1931: 486. 1931

(Bark and stem boiled and the liquid used as an aphrodisiac; a tonic made from the bark also used to treat the loss of libido. A snakebite cure.)

in English: black devil-doer, bush rope, devil doer

Strychnos dinklagei Gilg

Guinea, Ghana. Liana, climbing, paired tendrils, white or greenish white bell-shaped corolla, soft orange berry, in rainforest, riverbanks, secondary forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 121. 1899

(Stem bark extract strongly antimicrobial, antibacterial. Leaf and bark extracts muscle relaxant and convulsant. Bark

decoction applied in small amounts to the tongue to treat palpitations, tachycardia.)

Strychnos diplotricha Leeuwenb.

Madagascar.

See *Mededelingen Landbouwhogeschool Wagen., Nederl.* 69(1): 110, f. 7, 8–14, carte 16. 1969

(Used as an antimalarial.)

Strychnos elaeocarpa Gilg ex Leeuwenb.

Cameroon. Small tree, sweet scented flowers

See *Meded. Landbouwh. Wagen., Nederl.* lxxix. No. 1, 114. 1969, *Fl. Madagasc.* 167: 1–107. 1984

(Used as arrow poison and fish poison.)

in Cameroon: kouaa, kwa

Strychnos erichsonii R.H. Schomb. ex Progel (*Strychnos bovetiana* Pires; *Strychnos erichsonii* M.R. Schomb., nom. nud.; *Strychnos urbanii* Barb. Rodr.)

South America, Colombia, Brazil. Vine, white fragrant flowers, orange fruit

See *Reisen in Britisch-Guiana* 3: 1082. 1848[1849], *Flora Brasiliensis* (Martius) 6(1): 274, t. 84, f. 2. 1868, *Vellozia* (ed. 2) 1: 38, t. 4, f. A. 1885 and *Darwiniana* 8(4): 476–480. 1949, *Boletim Técnico do Instituto Agronômico de Norte* 38: 40. 1960, *Phytologia* 25(1): 49–54. 1972, *Lloydia* 35(3): 193–271. 1972, *Phytologia* 27(2): 97–107. 1973, *Acta Bot. Venez.* 9(1–4): 63–118. 1974, *Phytologia* 33(5): 305–322. 1976, *Phytologia* 36(1): 17–22. 1977, *Phytologia* 50(2): 73–79. 1982

(Used in preparing an arrow poison.)

Strychnos floribunda Gilg (*Strychnos henriquesiana* Gilg; *Strychnos littoralis* A. Chev. ex Hutch. & Dalziel; *Strychnos malifolia* Baker; *Strychnos marquesi* Baker; *Strychnos microcarpa* Baker; *Strychnos moloneyi* Baker; *Strychnos welwitschii* Gilg)

Sierra Leone, Central African Republic, Angola. Climbing shrub or liana, solitary tendrils, corolla tube cylindrical white or greenish white, soft orange berry, in rainforest, riverbanks, secondary forest

See *Encyclopédie Méthodique, Botanique* 8: 696. 1808, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 566, 573. 1893, *Kew Bulletin* 1895: 97. 1895, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 75. 1895 and *Flora of Tropical Africa* 4(1): 525. 1903, *Flora of West Tropical Africa*, ed. 1, 2: 24. 1931

(Antimicrobial, antidiarrheal, astringent, antibacterial. Stem bark muscle relaxant and convulsive. Decoction of stem and root bark taken to treat kidney diseases. Bark decoction applied in small amounts to the tongue to treat palpitations, tachycardia.)

Strychnos gossweileri Excell (*Strychnos coespitosa* Good)

Cameroon, Zambia. Shrub, white flowers, savanna

See *Journal of Botany, British and Foreign* 67, Suppl. 2: 102. 1929

(Plant extracts used to treat malaria.)

Strychnos guianensis (Aubl.) Mart. (*Lasiostoma cirrhosa* Willd.; *Lasiostoma curare* Kunth; *Lasiostoma divaricata* G. Mey.; *Lasiostoma rouhamon* J.F. Gmel.; *Rouhamon divaricatum* DC.; *Rouhamon guianensis* Aubl.; *Rouhamon guianensis* var. *ecirrhosum* DC.; *Strychnos calantha* Gilg ex Ule, nom. nud.; *Strychnos curare* (Kunth) Benth.; *Strychnos darienensis* Seem.; *Strychnos geoffraeana* Baill.; *Strychnos cogens* Benth.; *Strychnos guianensis* var. *trichina* J.F. Macbr.; *Strychnos lanceolata* Spruce ex Benth.; *Strychnos manaoensis* Barb. Rodr.; *Strychnos oblonga* Gilg; *Strychnos papilosa* Barb. Rodr.; *Strychnos rivularia* Barb. Rodr.; *Strychnos rouhamon* Benth.; *Toxicaria americana* Schreb.)

South America. Liana or small tree, woody, climbing, scrambling, decumbent, dark green foliage, hooked tendrils, flowers white very aromatic, fruits red-orange, pericarp fleshy, savanna

See *Histoire des plantes de la Guiane Française* 1: 93–95, t. 36. 1775, *Der Naturforscher* 19: 146. 1783, *Genera Plantarum* 75. 1789, *Species Plantarum*. Editio quarta 1: 624. 1791, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 248. 1791, *Primitiae Florae Essequiboensis* ... 83. 1818, *Nova Genera et Species Plantarum* (quarto ed.) 7: 210. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 241. 1841, *Systema Materiae Medicae Vegetabilis Brasiliensis* 121. 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 17. 1845, *The Botany of the Voyage of H.M.S. Herald* 166–167. 1854, *Journal of the Linnean Society, Botany* 1: 105–106, 108. 1856, *Adansonia* 12: 378. 1879, *Vellozia* (ed. 2) 1: 36, t. 2, f. B, t. 4, f. C. 1891, *Vargasia* 1: 36, t. 4, 5. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(Beibl. 60): 37. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 138. 1907, *Candollea* 5: 401. 1934, *Lloydia* 35(3): 193–271. 1972, *Acta Botanica Venezuelica* 9(1–4): 63–118. 1974

(Used to prepare the gourd or calabash curare.)

in English: bush rope, devil doer

in Colombia: nee-má

Strychnos henningsii Gilg (*Strychnos albersii* Gilg & Busse; *Strychnos barbata* Chiov.; *Strychnos elliotii* Gilg & Busse; *Strychnos holstii* Gilg; *Strychnos holstii* fo. *condensata* Duvign.; *Strychnos holstii* fo. *laxiuscula* Duvign.; *Strychnos holstii* var. *reticulata* (Burt-Davy & Honore) J. Duvign.; *Strychnos innocua* Delile subsp. *dysophylla* (Benth) Verd.; *Strychnos innocua* subsp. *gerrardii* (N. E. Brown) Verd.; *Strychnos ligustroides* Gossweiler & Mendonça; *Strychnos myrcioides* S. Moore; *Strychnos pauciflora* Gilg; *Strychnos*

procera Gilg & Busse; *Strychnos reticulata* Burt-Davy & Honore; *Strychnos sennensis* Baker) (after the German mycologist and amateur poet Paul Christoph Hennings, 1841–1908, cryptogamist, professor, author of *Botanische Wanderungen durch die Umgebung Kiel's ...* Kiel 1879; see J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 158. 1965; Staffeu and Cowan, *Taxonomic Literature*. 2: 157–159. 1979; S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 220. 1973; Elmer Drew Merrill, in *Contr. U.S. Natl. Herb.* 30(1): 148. 1947)

East Africa, Madagascar, South Africa. Small tree or shrub, gnarled, spreading rounded crown, inflorescences axillary, greenish yellow to creamy or white fragrant flowers, orange-red or dark purple fruit, in woodland and open forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 569. 1893, *Abh. Preuss. Akad. Wiss.* 36. 1894, *Kew Bulletin* 1895: 97. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 121. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 97, 99, f. 1. 1905, *Journal of Botany, British and Foreign* 45: 52. 1907, *Flora Somalia* 2: 305, f. 178. 1932, *Kew Bulletin* 1932: 270. 1932, *Cart. Fitogeogr. Angola* 120. 1939, *Bull. Inst. Roy. Col. Belg.* 20: 588. 1949, *Flore de Madagascar et des Comores* 167: 1–107. 1984

(Bark said to be poisonous; stem bark alkaloids shown convulsive, hypotensive and cardiac depressant activities; bark boiled in a little water and used for backache. Antimalarial, analgesic, antiinflammatory, antispasmodic, purgative, anthelmintic, astringent, used for stomach, intestinal complaints and rheumatism. Fresh roots chewed to treat snakebites. Used for tapeworm, pounded roots eaten to treat hookworm infections; a decoction from roots and leaves drunk in soup or honey to treat malaria and rheumatism. General tonic, roots used to treat pneumonia and coughs and reduce fatigue; roots, stems and stem bark commonly boiled in soup for fitness and painful joints or general body pains. Stem bark and roots used to poison rats and mice, and also for criminal purposes. Veterinary medicine for diarrhea, dysentery.)

in English: coffee-bean strychnos, coffee hard pear, hard pear, Natal teak, panda's walking stick, red bitterberry

in Angola: (mu) tolo

in Kenya: chapkamkam, entuyesi, hadesa, karaa, karrah, maset, mbathe, muchimbi, mutambi, muteta, nchipilikwa, oltipilikwa

in Madagascar: tsinanimboa, tsivoanino

in Southern Africa: koffiehardpeer, rooibitterbessie; umQalothi, uManana, umNono, umDunye (Zulu); umNonono (Xhosa); umNonono (Swazi)

in Tanzania: mkangala, mkangara

Strychnos icaja Baill. (*Strychnos alnifolia* Baker; *Strychnos dewevrei* Gilg; *Strychnos dundusanensis* De Wild.; *Strychnos inocua* Delile; *Strychnos inocua* subsp. *inocua*; *Strychnos inocua* var. *pubescens* Solereder; *Strychnos kipapa* Gilg; *Strychnos mildbraedii* Gilg; *Strychnos pusilliflora* S. Moore; *Strychnos triclisioides* Baker; *Strychnos unguacha* A. Rich.; *Strychnos unguacha* var. *pubescens* (Solereder) Gilg; *Strychnos venulosa* Hutch. & M.B. Moss)

Guinea, Central African Republic, Angola. Liana, climbing, solitary tendrils, roots bright red, flowers white, bad smelling, leaves glabrous opposite, greenish yellow or yellowish white flowers, globose dark yellow indehiscent fruits, secondary forest, swamp, rainforest, gallery forest

See *Adansonia* 12: 368. 1879, *Bulletin of Miscellaneous Information Kew* 1895: 98, 150. 1895, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 256. 1899, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 119. 1899 and *British Museum, Natural History. Catalogue of the plants collected by Mr. & Mrs. P. A. Talbot in the Oban district South Nigeria ...* 70. 1913, *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 2: 531, t. 73 (A–D). 1914, *Bulletin du Jardin Botanique de l'État* 5: 48. 1915, *Flora of West Tropical Africa* ed. 1 2: 24. 1931

(Toxic, violent convulsions, cardiotoxic. Leaves, roots and stem abortifacient, muscle-relaxant, anesthetic, cytotoxic, antiplasmodial, antimalarial, stimulator of the nervous system, snake repellent, anthelmintic, diuretic, a treatment of skin diseases and malaria; a cold infusion for painful gastrointestinal complaints. Magico-religious beliefs, used to protect the house. Root or root bark infusion, or a stem bark extract, or root of young plants, used as an ordeal poison. Root bark an ingredient in arrow poison. Whole plants, root bark, leaves and fruits used as a fish poison; bark and leaves of *Pentaclethra macrophylla* used as fish poison mixed with *Piptadenia africana* (*Piptadeniastrum africanum*), *Strychnos icaja* and *Manilkara* sp.)

in English: curare, icaja, strychnos

in Congo: esuwesuwe, n'samba, osamba

in Zulu: umKuhlu

Strychnos ignatii P.J. Bergius (*Ignatia amara* Linnaeus f.; *Ignatiana philippinica* Loureiro; *Strychnos beccarii* Gilg; *Strychnos hainanensis* Merrill & Chun; *Strychnos ovalifolia* Stokes; *Strychnos ovalifolia* Wallich ex G. Don; *Strychnos ovalifolia* Wall. & G. Don; *Strychnos ovalifolia* Wall.; *Strychnos tieute* Lesch.)

Philippines, Java. Liana, woody vine, bark brown or grey, tendrils simple, inflorescence axillary, fruit globose pale yellowish and brown, seeds silky embedded in a soft pulp, squash-like odor, in dense forest, dipterocarp forest, sandy soil, mixed rain forest, river banks

See *Materia Medica* 1: 146. 1778, *Flora Cochinchinensis* 1: 5, 125–126. 1790, *Ann. Mus. Par.* xvi. (1810) 479, 480. t. 23. 1810, *Bot. Mat. Med.* i. 412. 1812, *Numer. List* [Wallich] n. 1592. 1829, *A General History of the Dichlamydeous Plants* 4: 65. 1837 and *Sunyatsenia* 2(3–4): 306–307, pl. 69. 1935, *Lloydia* 39(5): 263–325. 1976, *Feddes Repertorium* 98(1–2): 75–104. 1987, *Journal of Ethnopharmacology* 36(1): 57–62. 1992

(Used in Sidha. All parts, but mainly the roots, very poisonous. Leaves used to treat diabetes. Seed used as antitoxin, vermifuge, tonic, emmenagogue, anthelmintic and colic, used for cardialgia, fever and insect bite, to treat cholera, asthma, dropsy and rheumatism, and as a tonic and vermifuge. Seeds and bark stomachic, febrifuge, antimalarial, anticholeric, astringent and tonic. Roots used as arrow poison, and sometimes as a fish poison.)

in English: Hainan poison nut, Ignatius bean, St. Ignatius's bean

in China: lu song guo, lu sung kuo

in India: kaippankottai, kayap-pankottai, kayapan-kottai, kayappankottai, papita, pipita

in Indonesia: bina, cetek, pokru, tjetek, upas radja, upas tieuté

in Malaysia: akar ipoh, belai hitam, ipoh akar besar

in Philippines: igasod, igasud, kabalonga, katbalonga, leita, pepita-sa-katbalogan, San Ignacio, St. Ignatius bean

in Thailand: phayaa mue lek

in Vietnam: lo[af]ng n[af]n

Strychnos innocua Delile

South Africa. Small tree or shrub, straight, simple opposite leaves, flowers yellow-green-cream in stalked clusters beside leaves, round woody thick yellow-orange fruit, roots food for monkeys, fruit eaten by chimpanzees and rarely by baboons, yellow sweet seed aril eaten, a source of bee forage, woodland and deciduous woodland, in moist savanna woodland, *Brachystegia* woodland, in coastal lowlands

See Delile, Alire Raffeneau, *Centurie de plantes d'Afrique du voyage à Méroé* recueillies par M. Caillaud. Paris, 1826

(If eaten in large quantities can cause stomach pain and diarrhea. Roots decoction drunk for stomach pains, as an aphrodisiac and to treat gonorrhoea and venereal diseases; pounded roots for snakebite. An infusion from bark and twigs drunk by pregnant women to put the baby in the right position and to ease childbirth. Fish poison.)

in English: dull-leaved mukwakwa, dull-leaved strychnos, Kaffir orange

in Mali: gongoroni, kulegan

in Nigeria: kokirmo (Hausa)

in N. Rhodesia: mukolo

in Southern Africa: dull-leaved mukwakwa; muDo, mujuni, muKwakwa (Shona)

in Tanzania: bunkundu, e'kegheke, endugai, furudou, gheke, impwingo, kankundu, lugulanguha, madonga, madonga choyo, mambuha, mangurungundu, mbaya, mchenga, mdonga, mgu-lungulu, mgulungungulu, mkome, mkulungundu, mkulwa, mkwakwa, mkwata, mng'ulung'ulu, mngulungulu, mnhulwa, mpundu, msege, mshongo, mtanga, mtonga, mukomu, mum-pundu, mumundu, umuhongo kome, umukome

in Zambia: kabulukulu, mulungi, muteme, mwabo

Strychnos longicaudata Gilg (*Strychnos bequaerti* De Wild.; *Strychnos brevicymosa* De Wild.)

South Africa, Central African Republic, Congo. Liana or shrub, woody vine, climbing, solitary tendrils, corolla greenish white, smooth soft orange or yellow-green berries

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 570. 1893 and *Revue de zoologie et de botanique africaines* 10: B5-B6. 1922

(Antidiarrheal, antimalarial, antiplasmodial, spasmolytic, aphrodisiac. An ingredient of arrow poison.)

in Zaire: apamema

Strychnos lucens Baker

Tanzania. Woody climber, liana, inflorescence yellow, olive-green very hard spherical fruits shortly stalked, slimy yellow pulp

See *Bulletin of Miscellaneous Information Kew* 1895: 97. 1895

(Ground roots eaten to treat hookworm infections.)

in Tanzania: kabamba, kasolia

Strychnos lucida R. Br. (*Strychnos ligustrina* Blume; *Strychnos lucida* Wall.)

Indonesia. Shrub or small deciduous tree, bole spiny when young, tendrils absent, inflorescence terminal, fruit globose, seeds densely short pubescent, monsoon climate, teak forest, in secondary forest, in scrubs and savannas, on limestone hills

See *Prodromus Florae Novae Hollandiae* 469. 1810 and *Lloydia* 37(1): 62–107. 1974, *Lloydia* 39(5): 263–325. 1976, Mitsunaga, K. et al., "Ligustrinoside, a new bisiridoid glucoside from *Strychnos ligustrina*." *Chemical and Pharmaceutical Bulletin* 39(10): 2737–2738. 1991, *Journal of Veterinary Medical Science* 67(8): 829–831. 2005, Atsuko Itoh et al. "A quinic acid ester from *Strychnos lucida*." *Journal of Natural Medicines* 60(2): 146–148. 2006

(Antimalarial. Counters eczema and applied on wounds; apply the fruit pulp to the skin to treat skin complaints such as scabies, rashes, burns, leprosy, sores and cuts. Bark, wood and roots used to treat fever, snakebites, sores, wounds,

eczema, and as stomachic and vermifuge; roots used to treat diabetes. Leaves and fruits used as a fish poison.)

in China: xian ye ma qian

in Indonesia: bidara laut, dara laut, kayu ular

in Thailand: phayaa mue lek, phayaa muun lek, sieo duuk

in Vietnam: m[ax] ti[eef] l[as]ng

Strychnos madagascariensis Poir. (*Strychnos baronii* Baker; *Strychnos behrensiana* Gilg & Busse; *Strychnos burtonii* Baker; *Strychnos dysophylla* Benth.; *Strychnos dysophylla* subsp. *engleri* (Gilg) E.A. South Africa. Tree, fruit pulp eaten, bitter seeds edible, confused with *Strychnos spinosa*

See *Journal of the Linnean Society, Botany* 1: 103. 1857, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 246, 275. 1880, *Journal of the Linnean Society, Botany* 22: 504. 1886, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 564. 1893, *Kew Bulletin* 1895: 98. 1895, *Kew Bulletin* 1896: 162. 1896 and *Bulletin de l'Herbier Boissier, sér. 2, 1(6):* 577. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 175. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 96, 101, 103–104, f. 2, B. 1905, *Kew Bulletin* 1956: 272, 275, 563, 567. 1956, *Bothalia* 7: 12. 1958, *Flora of Southern Africa* 26: 147. 1963

(Emetic.)

in English: black monkey orange, kaffir-orange, shiny-leaved mukwakwa, spineless monkey orange

in Southern Africa: botterklapper, gulagula, klapper, mkwakwa, mogorwagorwana, morapa, mukwakwa, swartklapper; umKwakwa, umNconjwa, umGluguza, umGuluguhla, umGuluguza (Zulu); umGulugula (Xhosa); anKwakwa (Thonga or Tsonga); iHlala (Swazi); Nkwaka, nkwakwa (Tsonga); mookgwane (North Sotho)

Strychnos malchairii De Wild.

Congo. Woody vine, slender tree, buds green-yellow

See *Bulletin du Jardin Botanique de l'État* 5: 44. 1915

(Pounded bark used to make an arrow poison; stems used to make arrow shafts. Ground roots applied as a paste to treat ulcers.)

Strychnos melastomatoides Gilg

Guinea, Sierra Leone. Liana

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 201. 1896

(Young leaves ground, the paste to treat wounds.)

Strychnos minor Dennst. (*Strychnos colubrina* auct. non L.; *Strychnos laurina* Wallich ex DC.; *Strychnos multiflora* Benth.)

India, Sri Lanka and Myanmar. Liana, tendrils double, fruit globose, seeds lenticular minutely densely tomentose, in primary and secondary forest, in *Araucaria* forest

See *Schlüssel Hortus indicus malabaricus, ...* 33. 1818 and *Taxon* 20(4): 537–543. 1971, *Taxon* 52(2): 364–365. 2003

(Used in Ayurveda.)

in English: snakewood

in India: anjanaki, balli kaasaraka, cerukattuvallikanniram, cherukattuvallikkaniram, devakadu, dhavo-khajro, goagari lakei, goagarilakri, kajar wel, kajarvael, kajarvel, kajarwel, kanal, kanel, karuskaralata, kausukandira, kavasukandira, kavusukandira, kongu-kandira, konsu-kandira, kuchila lata, kuchilalata, madura kanjiram, modira-caniram, modira-kanni, modira-kanniram, modiracaneram, modirakaniram, modirakanni, motirakkanniram, naaga-mushadi, naaga-ushti, naagamushti, naagamusti, naga malligai, nagamalligai, nagamusadi, nagamushti, nnagamusti, scheru-katu-vallikaniram, tansoopaum, tansupaum, taral, thigemushti, tigemushti, tindukia

in Indonesia: ipu tanah, ranosandang, wale ammelaum

in Malaysia: lengkoyan, semiyo akar

in Philippines: bugahin, bukuan, pamulaklakin

in Thailand: tum kaa daeng, tum kaa khao

in Vietnam: kim lu[oo]ng, thu[oor]c m[oj]i

Strychnos mitscherlichii M.R. Schomb. (*Strychnos mitscherlichii* Schomb.)

Guianas, Ecuador. Climber, very rough bark, inflorescences of compact axillary cymes, rough fruit

See *Reisen in Britisch-Guiana* 2: 451. 1848

(Chips of bark used to make a tonic which is taken as an aphrodisiac, also used as an arrow poison. A source of calabash curare.)

in English: bush rope, common devil doer, devil doer, white devil doer

Strychnos mostueoides Leeuwenb.

Madagascar. Shrub, white flowers, fruit a globose berry, in forest, near riverbanks

See *Mededelingen Landbouwhogeschool* 69(1): 194, f. 30, 13–19, c. 24. 1969

(Aphrodisiac, sympatholytic, hypotensive, antimalarial. A decoction of the aerial parts is taken to treat malaria.)

in Madagascar: ratendrika, retendrika

Strychnos multiflora Benth.

Philippines.

See *J. Proc. Linn. Soc., Bot.* 1: 102. 1856 [1857 publ. 1856]

(Used for throat troubles.)

in Philippines: bukuan

Strychnos myrtooides Gilg & Busse

Tanzania, Madagascar. Shrub or small tree, many-branched, arching branches, white flowers, red-orange fruits, open forest, in *Brachystegia* woodlands

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 178. 1902

(Antimalarial, effect of enhancing the action of chloroquine in case of chloroquine-resistance; an infusion or decoction together with chloroquine taken to treat malaria.)

in Madagascar: kifafa, maravokely, marovelo, ratendrika, retendrika, tsihahanimboany, tsimahamasatsokina, tsimahomasatsokina

Strychnos nitida G. Don (*Strychnos cheliensis* Hu; *Strychnos kerrii* A.W. Hill; *Strychnos nitida* Gagnep.; *Strychnos wallichiana* Steudel ex A. DC. var. *intermedia* A.W. Hill; *Strychnos wallichiana* var. *ovata* A.W. Hill; *Strychnos yunnanensis* S.Y. Bao, nom. nud.)

Myanmar, China, Thailand. In evergreen forest

See *A General History of the Dichlamydeous Plants* 4: 66. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 13. 1845 and *Bulletin of Miscellaneous Information Kew* 1917(4–5): 199. 1917, *Bulletin of Miscellaneous Information Kew* 1925(10): 426. 1925, *Bulletin of the Fan Memorial Institute of Biology* 10(3): 163. 1940, *Notulae Systematicae. Herbarium du Museum de Paris* 14(1): 22. 1950, *Flora Yunnanica* 1191. 1984

(Fruit medicinal, seeds poisonous.)

in English: south Yunnan poison nut

in China: mao zhu ma qian

Strychnos nux-blanda A.W. Hill (*Strychnos nux-blanda* var. *hirsuta* A.W. Hill; *Strychnos nux-vomica* var. *grandifolia* Dop)

India, Cambodia. Tree, papery leaves, axillary thyrses, corolla white, globose berries

See *Mémoires de la Société Botanique de France* 19: 18. 1910, *Bulletin of Miscellaneous Information Kew* 1917(4–5): 189–193. 1917

(Tonic, stimulant.)

in English: strychnine tree

in China: shan ma qian

in India: khizila, kuchila

in Myanmar: hkapaung:kri

Strychnos nux-vomica L. (*Strychnos ligustrina* Blume; *Strychnos nux-vomica* var. *oligosperma* Dop; *Strychnos spireana* Dop)

SE Asia, Indonesia, India. Evergreen tree, sometimes a liana, crooked thick trunk, sometimes with axillary thorns, shiny leaves opposite short stalked, small greenish-white funnel shape flowers, globose fruit with a smooth hard rind or shell orange when ripe, fruit filled with a soft white jelly-like pulp, seed very hard with a dark grey horny endosperm in which the small embryo is embedded, no odour but a very bitter taste, root very bitter, flowers with a disagreeable smell, from the seeds obtained nux-vomica and strychnine of commerce, edge of dense forest, on river banks and along the shore

See *Species Plantarum* 1: 189. 1753, *Rumphia* 1: 68, t. 25. 1836 and *Mémoires de la Société Botanique de France* 19: 18. 1910, *Lloydia* 36: 189. 1973, *Taxon* 29: 353–355. 1980

(Used in Ayurveda, Unani and Sidha. Strychnine very poisonous; seeds deadly poisonous, also used for poisoning arrow blades and killing wild animals. Paste prepared from leaves, ripe fruits and seeds applied to treat poisonous bites. Bitter, tonic, increasing appetite; it stimulates peristalsis in chronic constipation due to atony of the bowel often combined with cascara and other laxatives with good effects. Leaves have strong allelopathic properties; leaf paste applied all over the body against the fever. Seeds analgesic, antiinflammatory, anti-ulcer, cytotoxic, antioxidant, uterine stimulant activity, respiratory and cardiac stimulant, depurative, diuretic, diaphoretic, nervine, stomachic, tonic, aphrodisiac, antidiabetic; seed paste applied for vitiligo, snakebite and scorpion stings. Alleviates spasms, fruit and leaf; relaxes muscles, root bark. Fruit used to treat inflammation, sore throat, stomach complaints. Fruit and bark pesticide, insecticide. Antimalarial activity of wood water extract of *Strychnos ligustrina* Blume. Wood cures fever, snakebite, ulcer, acne, syphilis and chicken pox; as stomach tonic, as poultice and anthelmintic; bark juice with lemon useful for cholera, acute diarrhea. Applied for burns, against boils and rashes and cures scabies. Root decoction for snakebite. Veterinary medicine, root paste poulticed with stem bark extract of *Ceriscoides turgida* (Roxb.) Tirveng. given orally for snakebite; fruits jelly applied on the tongue of convalescing cattle; seeds along with stem bark of *Terminalia arjuna* and stem of *Tinospora cordifolia* pounded and the extract given orally in insect bite. Crushed fruits as fish poison.)

in English: crow fig, dog button, nux-vomica, nux-vomica tree, poison nut, poison nut tree, Quaker button, snake wood, snakewood, strychnine, strychnine plant, strychnine tree, vomit nut, vomit weed

in Cambodia: slaêng, slaêng thom

in China: fan mu pieh, ma chien, ma qian zi

Strychnos odorata A. Chev.

Tropical Africa.

See *Revue internationale de botanique appliquée et d'agriculture tropicale* 27: 373. 1947

(Leaves for fevers.)

Strychnos panamensis Seem. (*Strychnos hachensis* H. Karst.; *Strychnos hirtiflora* (Standl.) Lundell; *Strychnos longissima* Loes.; *Strychnos panamensis* var. *hirtiflora* Standl.; *Strychnos tabascana* Sprague & Sandwith; *Strychnos tepicensis* Standl.)

Panama, Mexico. Shrub, slender woody vines, armed with stiff short spines, acute-acuminate opposite leaves, flowers in short terminal or axillary cymes, globose yellow-orange

fruits, disk-like seeds embedded in an orange firm pulp with a strong bitterish taste

See *The Botany of the Voyage of H.M.S. ~Herald~* 166. 1854 and *Bulletin of Miscellaneous Information Kew* 1927(3): 128–129. 1927, *Field Museum of Natural History, Botanical Series* 11(4): 138–139. 1932, *Bulletin of the Torrey Botanical Club* 64(8): 556. 1937, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 207–217. 2007

(Seeds highly poisonous. Roots decoction taken for snakebite.)

in English: snakewood

in Honduras: chicoloro, guaco

in Mexico: cabalonga de Tabasco, luch maax, mata perros, veneno del diablo

in Panama: fruta de murcielago

in Salvador: guacamico, huacal de mico

Strychnos phaeotricha Gilg (*Strychnos thyrsoflora* Gilg)

Ghana, Congo. Liana, climber, paired tendrils, hairy leaves, corolla cream-yellow, pubescent inflorescences on branchlets, hairy round orange fruits, in rainforest, secondary forest, gallery forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 105, t. 3. 1905, *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 2: 532, t. 74. 1914

(Seeds burned and the smoke inhaled to treat tuberculosis in children. Alkaloids of the bark have weak muscle-relaxant and convulsant activities.)

in Zaire: lisi

Strychnos potatorum L.f. (*Strychnos heterodoxa* Gilg; *Strychnos stuhlmannii* Gilg) (Latin *potator*, *oris* "drinker")

East Africa, India. Tree or shrub, several stemmed, straggling, bark smooth with light patches, heavily foliaged, white fragrant flowers in axillary cymes, smooth blue-black softly fleshy ripe fruits, browsed by elephant and giraffe, fruit not eaten by humans, fruit eaten by goat, giraffe, swala (antelope), dikdik, seeds used to purify water and to clear muddy water, seeds a source of polysaccharide gum, common in forest, in gallery forest, in *Brachystegia* woodland, in semi-evergreen bushland, on river banks, along roadside, on termite mound, near stream, in dry woodland

See *Supplementum Plantarum* 148. 1781, *Genera Plantarum* 2: 108. 1873, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 570. 1893, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 118. 1899 and *Flore de Madagascar et des Comores* 167: 1–107. 1984, *E-Journal of Chemistry* 4(4): 510–518. 2007

(Used in Ayurveda, Unani and Sidha. Antioxidant, antimalarial. Used for treating microbial infections, diarrhea and diabetes. Leaves and roots decoction for cough. Seeds bitter, astringent to bowels, aphrodisiac, tonic, diuretic and good for liver, kidney complaints, gonorrhoea, colic, diabetes and eye diseases; seed paste applied to relieve pain due to poisonous sting of scorpions, also applied on forehead for headache; seed paste mixed with buttermilk used for gonorrhoea and diabetes; seed extract drops applied in the eyes to treat jaundice. Fruits emetic, diaphoretic, alexiteric, useful in eye diseases, thirst, poisoning and hallucinations. Seeds acrid, alexipharmic (= antidote against poisoning or infection), lithotriptic, to cure strangury, urinary discharges, headache. Pounded fruits, crushed bark, powdered seeds, used for poisoning fish. Veterinary medicine, seeds used as tonic nervine and sexual stimulant; seed infusion dropped into the eyes for conjunctivitis; stem bark extract given to treat babesiosis in cattle.)

in English: black bitterberry, clearing nut, clearing nut tree, grape strychnos, kataka, kataka nuts, water filter tree

in Southern Africa: swartbitterbessie; ntsupa (Tsonga or Thonga)

in Tanzania: mkalakala, mpande, mpaude

in Zambia: kanungunungu, mubanga chulu, mubangachulu, mulombelombe, musisi

in Tibet: ka ta ka

Strychnos pubescens Clarke

India.

See *The Flora of British India* [J.D. Hooker] 4(10): 89. 1883

(Arrow or dart poison.)

Malayan names: blay besar, talun

Strychnos pungens Soler. (*Strychnos occidentalis* Soler.; *Strychnos pungens* Gagnep.)

East Africa, Tanzania. Small tree, stem rough, bark dark brown, leathery leaves glabrous, leaves apex has a hard sharp spine, small flowers in green-whitish clusters, large yellow fruits, several large seeds covered by a creamy white pulp, seeds bitter, pulp tasteless, from the pulp a viscous nourishing liquid which is drunk, very ripe fruits eaten in small quantities, savanna, in woodland, in miombo woodland

See *Die Natürlichen Pflanzenfamilien* 4(2): 40. 1892 and *Notulae Systematicae. Herbarium du Museum de Paris* 14(1): 23. 1950

(Fruits said to be poisonous. Seeds are known to be poisonous. Leaves provide a cure for treating coughs. A decoction of roots used as a remedy for stomachache and bronchitis; an infusion from the leaves a lotion for sore eyes.)

in English: kaffir orange, monkey orange, spine-leaved monkey orange, spiny-leaved monkey orange

in Namibia: pungvlei, vasekele

in Southern Africa: klapper, botterklapper (word based on the butter-like pulp), blouklapper, bobbejaanklapper, kierieklapper, grootklapper; mohwahwa (Kwena dialect, Botswana); mokgwaha (North Sotho); iHlala, muNgono, muTamba (Shona); mukubudu, muramba (Venda); mutu (Mbukushu); matu (Sambui); omuoni (Ovambo)

in Tanzania: ikome, litangadasi, mbaya, mhandagi, mkome, mtangadasi, mtonga

Strychnos quadrangularis A.W. Hill (*Strychnos quadrangularis* Mildbr.)

Malay Peninsula.

See *Bull. Misc. Inform. Kew* 1917, 205. 1917, *Wiss. Ergebn. Zweit. Deut. Zentr.-Afr. Exped. (1910–11)*, Bot. 2: 190, nomen. 1922

(Dart poison.)

Strychnos rufa C.B. Clarke

Burma.

See *Fl. Brit. India* [J.D. Hooker] iv. 89. 1872–1897

(Used to prepare an arrow poison.)

Strychnos samba P.A. Duvign.

Cameroon, Nigeria, Central African Republic, Congo. Liana, climbing, paired tendrils, inflorescence axillary or terminal, greenish flowers, soft pale green smooth berry, in rainforest, secondary forest, in moist areas

See *Bull. Mus. Roy. Hist. Nat. Belgique* 19: 216. 1948 [*Bull. Seanc. Inst. Roy. Col. Belge*]

(Root bark of *Strychnos samba*, mixed with root bark of *Penianthus longifolius* Miers, used to make arrow poison. Root bark used as ordeal poison. Pounded fruit used as a fish poison.)

Strychnos solimoesana Krukoff

Brazil.

See *Brittonia* 4(2): 280–281. 1942

(Arrow poison.)

in Brazil: jadadakaikapihai

Strychnos spinosa Lam. (*Brehmia spinosa* Harv.; *Strychnos buettneri* Gilg; *Strychnos cardiophylla* Gilg & Busse; *Strychnos carvalhoi* Gilg; *Strychnos cuneifolia* Gilg & Busse; *Strychnos djaloni* A. Chev., nom. nud.; *Strychnos emarginata* Baker; *Strychnos euryphylla* Gilg & Busse; *Strychnos flacurtii* Desvaux ex Dubuisson & Thouars; *Strychnos gillettii* De Wild.; *Strychnos gracillima* Gilg; *Strychnos gracillima* var. *paucispinosa* De Wild.; *Strychnos harmsii* Gilg & Busse; *Strychnos laxa* Soler.; *Strychnos leiosepala* Gilg & Busse; *Strychnos lokua* A. in West Africa: gbéssègbwékou, goulogoy, n'kangolo, pinpedora, potohoka

in Yoruba: ata oro, eekannase adiyé, robo

in Zambia: mutamba

Strychnos staudtii Gilg (*Strychnos densiflora* Baill.)

Cameroon. Small tree or shrub, white-pink smooth fruits

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 1: 182. 1896

(Used as arrow poison and fish poison.)

Strychnos tchibangensis Pellegr.

Cameroon, Central African Republic, Gabon, Congo. Liana

See *Bulletin du Muséum National d'Histoire Naturelle* 32: 394. 1926

(Bark decoction taken as an anthelmintic; pulverized bark used for cicatrisation of wounds.)

Strychnos ternata Gilg ex Leeuwenb.

Cameroon. Tree

See *Acta Botanica Neerlandica* 14: 224–226. 1965

(Used as arrow poison and fish poison.)

Strychnos tieute Lesch.

Java. Climbing shrub

See *Ann. Mus. Par.* xvi. (1810) 479, 480. t. 23. 1810

(Juice as an arrow or dart poison.)

Malayan name: akar lampong

Strychnos toxifera R.H. Schomb. ex Benth. (*Strychnos dariensis* Seem.; *Strychnos syntoxica* Sprague & Sandwith; *Strychnos toxifera* var. *acuminata* Klotzsch ex M.R. Schomb., nom. nud.; *Strychnos toxifera* var. *latifolia* Klotzsch ex M.R. Schomb., nom. nud.; *Strychnos toxifera* var. *obliqua* Klotzsch ex M.R. Schomb., nom. nud.)

South America. Vine, climber, woody liana, scandent, pubescent, white fragrant flowers, corolla hirsute outside, shiny smooth fruit

See *Prodromus Florae Novae Hollandiae* 454. 1810, *Nova Genera et Species Plantarum ... 2*: 133. 1827, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 240–241. 1841, *Reisen* 3: 950. 1848, *The Botany of the Voyage of H.M.S. Herald* 166–167. 1854 and *Bulletin of Miscellaneous Information Kew* 1927(3): 129–130. 1927, *Lloydia* 35(3): 193–271. 1972, *Acta Botanica Venezuelica* 9(1–4): 63–118. 1974

(Used to prepare the gourd or calabash curare. Used to poison arrows. Fish poison. Magico-religious beliefs, a beena or a charm for protection or aphrodisiac purposes.)

in English: bush rope, devil doer

in Guianas: curaro, ourari

in Venezuela: mankowa

Strychnos trinervis (Vell.) Mart. (*Gardenia trinervis* Vell.; *Strychnos blumenaviensis* Gilg; *Strychnos gomesiana* Casar.; *Strychnos triplinervia* Mart.)

Brazil. Tree

See *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Florae Fluminensis* 102. 1825, *Flora* 24(Beibl. 2): 83. 1841, *Novarum Stirpium Brasiliensium Decades* 14. 1842, *Systema Materiae Medicae*

Vegetabilis Brasiliensis 121. 1843, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(Beibl. 60): 36. 1898 and *Lloydia* 35(3): 193–271. 1972

(Antidiarrheal, cytotoxic, antimalarial, antimicrobial, spasmolytic.)

Strychnos umbellata (Loureiro) Merrill (*Cissus umbellata* Loureiro; *Strychnos paniculata* Champion ex Bentham)

Asia, China.

See *Species Plantarum* 1: 117. 1753, *Flora Cochinchinensis* 1: 84. 1790, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 56. 1853 and *Philippine Journal of Science* 15(3): 252–253. 1919. 1920

(The seeds and roots poisonous, poisonous alkaloids.)

in English: umbella-flowered poison nut

in China: san hua ma qian

Strychnos usambarensis Gilg (*Strychnos cerasifera* Gilg; *Strychnos decussata* (Pappe) Gilg; *Strychnos micans* S. Moore; *Strychnos usambarensis* Gilg ex Engl.)

Ghana, Guinea, Nigeria, Congo, Kenya, South Africa. Liana, shrub or small tree, climbing, solitary tendrils, stiff coriaceous leaves, inflorescence axillary white-yellow or orange flowers, soft fruit yellow-orange, variable and adaptable species, in woodland, in lowland and upland rainforest, in secondary forest, in gallery forest, semi-evergreen and coastal evergreen bushland, along seasonal stream

See *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1894: 36. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 311. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 121. 1899 and *Journal of the Linnean Society, Botany* 40: 146. 1911

(Toxic. Root bark and leaves arrow poison. Calabash curare. Muscle paralyzing, curare-like effect of root bark. Stem bark and leaves local pain relief, tonic, antiplasmodial, antimalarial, antiprotozoal, potential anticancer.)

in English: blue bitterberry, Dingaan's wood, little monkey orange, stipe-fruited monkey orange, stipe-fruited strychnos

in Madagascar: voapiandela

in Southern Africa: bloubitterbessie; mukangala (Venda); chiKwakwani, Tamba we hlanzi (Shona); umDlamalala, uNdlunye (Xhosa); umPhathawenkosi-onmyama, iNdlunye, uNdlunye, umPhathankosi-lemnyama (Zulu)

Strychnos vanprukii Craib

Asia, India.

See *Phytochemistry* 64(4): 897–901. 2003, *Fitoterapia* 75(7–8): 623–628. 2004, *Natural Product Research* 20(10): 966–968. 2006

(Antioxidant from the stem. The root bark used to prepare an arrow poison.)

in Thailand: thao chang

Strychnos variabilis De Wild.

Congo. Small tree, white corolla

See *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 178. 1904

(An ethyl acetate and a methanolic extract of the root showed significant anti-malarial activity in vitro.)

Strychnos wallichiana Steudel ex A. DC. (*Strychnos bourdillonii* Brandis; *Strychnos cinnamomifolia* Thwaites; *Strychnos cinnamomifolia* var. *wightii* A.W. Hill; *Strychnos cirrhosa* Stokes; *Strychnos colubrina* Linnaeus; *Strychnos gauthierana* Pierre ex Dop; *Strychnos ligustrina* Zipp. ex Span.; *Strychnos pierriana* A.W. Hill; *Strychnos rheedei* C.B. Clarke; *Strychnos tubiflora* A.W. Hill; *Strychnos wallichiana* Benth.; *Strychnos wallichiana* Steud.)

India, Vietnam.

See *Linnaea* 15: 325. 1841, *Nomencl. Bot.* [Steudel], ed. 2. 2: 648. 1841, *Prodr.* (DC.) 9: 13. 1845, *J. Proc. Linn. Soc., Bot.* 1: 102. 1856 [1857 publ. 1856], *Enumeratio Plantarum Zeylaniae* 201. 1860, *The Flora of British India* 4(10): 87–88. 1883 and *Indian Trees* 474. 1906, *Bulletin de la Société Botanique de France* 57(Mém. 19): 17. 1910, *Bulletin of Miscellaneous Information Kew* 1917(4–5): 194–198. 1917

(Poisonous, used to treat rabies, leprosy, rheumatism, skin diseases, and as an aphrodisiac.)

in China: chang zi ma qian

in India: naagamushti

Stylochaeton Lepr. Araceae (Aroideae)

Greek *stylos* ‘a column’ and *chiton* ‘a tunic, covering’, see *Ann. Sci. Nat., Bot.* sér. 2, 2: 184. 1834, *Aroideae* 10. 1855.

Stylochaeton hypogaeus Lepr. (*Stylochaeton barteri* N.E.Br.; *Stylochaeton baguirmiensis* A. Chev., nom. nud.; *Stylochaeton similis* N.E.Br.; *Stylochiton hypogeum* Lepr.)

Tropical Africa. Herb, thick rhizome, hastate leaves, purplish hooded spathe

See *Annales des Sciences Naturelles, Botanique* 2: 185. 1834 and *Fl. Trop. Afr.* 8: 194. 1901, *Études Fl. Afr. Centr. Franc.* 1: 335. 1913

(Roots used for earache; rhizomes boiled, mashed and applied to boils.)

in English: Barter’s ground arum

in Ghana: gwadaba

in South Africa: umFana-ka’-sihlanjana (Zulu)

Stylochaeton lancifolius Kotschy & Peyr. (*Stylochaeton chevalieri* Engl.; *Stylochaeton dalzielii* N.E.Br.; *Stylochaeton hostiifolius* Engl.; *Stylochaeton warneckeii* Engl.)

Senegal, Nigeria. Herb, fleshy bright yellow rhizome, glaucous glabrous hastate leaves, mucronate lanceolate spathe purplish outside and creamy white inside, famine food

See *Plantae tinneanae sive descriptio plantarum in ...* 42. 1867 and *Bot. Jahrb. Syst.* 36: 238–239. 1905, *Bull. Soc. Bot. France* 54(8): 23. 1907, *Bull. Misc. Inform. Kew* 1910: 58. 1910

(Dried powdered stem bark taken to cure mouth ulcers. Rhizomes for skin diseases, boils.)

in English: Warneck’s ground arum

in Nigeria: sheke

Stylogyne A. DC. Myrsinaceae (Primulaceae)

From the Greek *stylos* ‘a column, style’ and *gyne* ‘a woman, female’, see *Annales des Sciences Naturelles; Botanique*, sér. 2, 16: 78, 91. 1841 and *Sida* 17(3): 591–597. 1997, *Sida* 20(3): 919–922. 2003, *Monogr. (Against Trypanosoma and Leishmania.)

Stylosanthes Sw. Fabaceae (Aeschynomeneae)

Greek *stylos* and *anthos* ‘a flower’, the flowers have a long style; see Olof Peter Swartz (1760–1818), *Nova genera et species plantarum seu Prodromus* 108. Stockholm, Uppsala & Åbo, 1788 and *Ann. Missouri Bot. Gard.* 44(3): 299–354. 1958, *J. S. African Bot.* 31: 95–110. 1965.

Stylosanthes erecta P. Beauv. (*Ononis coriifolia* Reichb. ex Guillemin & Perrottet, nom. inval.; *Stylosanthes erecta* var. *acuminata* Welw. ex Baker; *Stylosanthes erecta* var. *guineensis* (Schumach. & Thonn.) Vogel; *Stylosanthes guineensis* G. Don; *Stylosanthes guineensis* Schumach.; *Stylosanthes guineensis* Schumach. & Thonn.)

Tropical Africa. Perennial non-climbing shrub, herb, spreading, prostrate, yellow flowers

See *Beskrivelse af Guineiske planter* 357. 1827, *A General History of the Dichlamydeous Plants* 2: 281. 1832, *Linnaea* 12: 68. 1838, *Flora of Tropical Africa* 2: 156. 1871

(Whole plant, roots and leaves aphrodisiac, poison antidote, for colds.)

in English: Nigerian stylo

in Madagascar: salazamby

Stylosanthes hamata (L.) Taub. (*Hedysarum hamatum* L.; *Hedysarum hamatum* Burm. f.; *Hedysarum hamatum* Heyne ex Baker; *Stylosanthes eriocarpa* S.F. Blake; *Stylosanthes hamata* Taub.; *Stylosanthes humilis* Hemsl.; *Stylosanthes humilis* Rich. ex Hemsley, nom. inval.; *Stylosanthes procumbens* Sw., nom. illeg.) (Latin *hamus* ‘hook, a fish-hook’, *hamatus* ‘hooked, crooked’)

West Indies. Perennial non-climbing herb

See *Nat. Hist. Jamaica* 1: t. 119, f. 2. 1707, *Systema Naturae*, Editio Decima 2: 1170. 1759, *Flora Indica ... nec non Prodromus Florae Capensis* 167. 1768, *Nova Genera et Species Plantarum seu Prodromus* 108. 1788, *The Flora of British India* 2(4): 157. 1876, *Biologia Centrali-Americana; ... Botany ...* 1(3): 272. 1879, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 32(1): 22. 1890 and *Contributions from the United States National Herbarium* 24(1): 4–5. 1922, *Trop. Grasslands* 21: 182–188. 1987

(Used for fevers, teething children.)

in English: Caribbean stylo, cheesy toes, donkey weed, mother-sea-gel, pencil flower

in China: you gou zhu hua cao

Stylosanthes scabra Vogel (*Stylosanthes diantha* S.F. Blake; *Stylosanthes gloiodes* S.F. Blake; *Stylosanthes glutinosa* Kunth; *Stylosanthes nervosa* J.F. Macbr.; *Stylosanthes plicata* S.F. Blake; *Stylosanthes suffruticosa* Mohlenbr.; *Stylosanthes tuberculata* S.F. Blake)

Tropical America. Perennial non-climbing shrub, woody, erect to suberect, creamy yellow irregular flowers, fruit a biarticulating pod, low palatability

See *Nova Genera et Species Plantarum seu Prodromus* 7, 108. 1788, *Nova Genera et Species Plantarum* (quarto ed.) 6: 507, pl. 595. 1823[1824], *Linnaea* 12: 69–70. 1838 and *Proceedings of the Biological Society of Washington* 33(9): 45–47, 49–50. 1920, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Revista Brasil. Genét.* 10(3): 599–602. 1987, *Plant Systematics and Evolution* 208: 99–105. 1997

(Roots, branches and leaves used for regulating fertility, a sterilizer. Acaricidal.)

in English: pencilflower, shrubby stylo

in Indonesia: stylo perduan

in South America: alfafa do nordeste, Capitan Juan, pata de terecay, poha po'i, sai po'i

Styphnolobium Schott ex Endl. Fabaceae (Sophoreae)

From the Greek *styphnos*, *stryphnos*, *styphelos* ‘sour, harsh, rough, astringent’ and *lobos* ‘pod, capsule, lobe’, see *Wiener*

Zeitschrift für Kunst, Litteratur, Theater und Mode 3: 844. 1830 and *Annals of the Missouri Botanical Garden* 80(1): 270–283. 1993.

Styphnolobium japonicum (L.) Schott (*Ormosia esquirolii* H. Lév.; *Robinia mitis* Lour.; *Sophora japonica* L.; *Sophora japonica* L. fo. *pendula* Zabel; *Sophora japonica* var. *pubescens* (Tausch) Bosse; *Sophora korolkowii* Dieck; *Sophora mairei* H. Lév., nom. illeg., non *Sophora mairei* Pamp.; *Sophora pubescens* Tausch; *Sophora sinensis* Forrest)

East Asia, China, Japan, Vietnam. Perennial non-climbing tree, deciduous, spreading, round-headed, leaves alternate, inflorescence a loose terminal panicle, white fragrant flowers, petals shortly unguiculate, calyx persistent, free stamens, cylindrical fleshy pod

See *Species Plantarum* 1: 373–374. 1753, *Species Plantarum* 2: 722–723. 1753, *Mantissa Plantarum* 1: 68. 1767, *Flora Cochinchinensis* 455. 1790, *Transactions of the Linnean Society of London* 10: 360. 1811, *Flora* 17: 489. 1834, *Vollständiges Handbuch der Blumengärtnerei* ed. 2 3: 408. 1842, *Revue Horticole* 1899: 157. 1899 and *Flore du Kouy-Tchéou* 240. 1915, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 48. 1915, *North American Flora* Ser. II(7): 1–53. 1972, *Taxon* 29: 722–723. 1980, *Memoirs of the New York Botanical Garden* 25(3): 1–264. 1981

(Seeds poisonous, toxic if eaten. Floral buds and flowers used for hemorrhoids, melaena, diarrhea, metrorrhagia.)

in English: Chinese scholar tree, Japanese pagoda tree, pagoda tree, sofora, tree of success in life, umbrella tree

in Italian: robinia del Giappone

in Argentina: acacia del Japon, sofora llorona, sofora pendula

in China: huai hua, huai

in Indochina: hoe

in Japan: emju, en-shu, enju (ju = tree)

in Vietnam: hoe, hoe hoa, hoe me

Styrax L. Styracaceae

Latin *styrax* or *storax*, *acis* for a tree and also the resinous gum of that tree, storax; the classical Greek name used by Theophrastus (*HP*. 9.7.3) and Dioscorides, *styrax*, *styrakos*, a corruption of the Arabic or Semitic name *assthirak* for *Styrax officinalis* L., see *Species Plantarum* 1: 444. 1753.

Styrax benzoides Craib

China, Thailand. Tree, leaf lower surface white hairy

See *Bulletin of Miscellaneous Information Kew* 1912(6): 267. 1912

(Bark infusion drunk as febrifuge and analgesic.)

in China: dian nan an xi xiang

Styrax benzoin Dryand.

Sumatra, Java. Trees, grey-white bole, inner bark deep red, alternate leaves glaucous below, white bisexual flowers in racemose panicles, corolla deeply lobed, calyx cup-shaped with shallow teeth, globose glaucous berry on persistent calyx, resinous exudate, humid lowland forest, evergreen broad-leaved lowland forest, secondary forest

See *Philosophical Transactions of the Royal Society of London* 77(2): 308, t. 12. 1787 and Hwang Shu-mei in Wu Rong-fen (as Wu Young-fen) & Hwang Shu-mei, eds. *Styracaceae. Fl. Reipubl. Popularis Sin.* 60(2): 77–150. 1987

(Mixed with egg yolk or the leaves of *Duranta repens* an oral remedy for measles, with coconut milk a remedy for coughs with vomiting. Externally applied to snakebites.)

in English: styrax, Sumatra snowbell

in China: an xi xiang, an hsi hsiang

in Indonesia: kaju kemenjan, kemenyan, kemenyan hitam, kemenyan putih, keminjin

in Malaysia: gum benjamin, kemenyan, kemian

Suaeda Forssk. ex Scopoli

Chenopodiaceae (Amaranthaceae)

Suiwed mullah, *suivada*, *suwayd*, *suweid*, *suwed*, *suda*, *sauda*, *sawad*, *souïda* 'salty', Arabic names for *Suaeda baccata* or *Suaeda aegyptiaca*, see *Species Plantarum* 2: 989–991. 1753, *Flora Aegyptiaco-Arabica* 70. 1775, *Onomatologia botanica completa*, oder Vollständiges botanisches Wörterbuch. Frankfurt 8: 797. 1776, *Introductio ad Historiam Naturalem* 333. 1777, *Genera Plantarum* 87–88. 1789, *Flora Altaica* 1: 370, 394–395. 1829, *Chenopodearum Monographica Enumeratio* 124. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 47, 159, 167. 1849, *Die Natürlichen Pflanzenfamilien* 79[III, 1a]: 80. 1893 and *Sovetskaja botanika* 5: 46–47. 1936.

Suaeda inflata Aellen (*Suaeda maritima* (Torr.) S. Watson, nom. illeg.; *Suaeda maritima* Torr.; *Suaeda maritima* (L.) Dumort.)

SE Asia, Japan.

See *Species Plantarum* 1: 221. 1753, *Institutiones Rei Herbariae* 1: 108. 1766, *Encyclopédie Méthodique, Botanique* 7: 291. 1806, *Florula belgica*, opera majoris prodromus, auctore ... 22. 1827, *Flora Altaica* 1: 400. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 161. 1849, Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel*: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, *Botany*. Washington: Government Printing Office, 294. 1871, *Revisio Generum Plantarum* 1: 549. 1891, *Annals of Scottish Natural History* 1896: 42. 1896

and *Flora Malesiana* 4: 99–106. 1954, *Sida* 7(2): 147–173. 1977, *Preslia* 69: 327–332. 1997, *Opera Bot.* 137: 1–42. 1999

(Fresh leaves to relieve constipation and to treat ringworm.)

in Japan: hama-matsu-na

in Pakistan: righat, right

Suaeda maritima (L.) Dumort. (*Atriplex maritima* (L.) Crantz; *Chenopodina australis* Moq.; *Chenopodina maritima* (L.) Moq.; *Chenopodina maritima* var. *vulgaris* Moq.; *Chenopodium australe* R. North America. Perennial subshrub or shrub, herb

See *Species Plantarum* 1: 221. 1753, *Atlantic Journal* 1(4): 146. 1832, *Proceedings of the American Academy of Arts and Sciences* 9: 88. 1874 and *North American Flora* 21(1): 89–90. 1916, *Contributions from the Gray Herbarium of Harvard University* 56: 50. 1918, *Sida* 7(2): 147–173. 1977, *Canad. J. Bot.* 56: 581–591. 1978

(Analgesic, antiseptic, for kidney and bladder trouble, bleeding bowels, itching and sores. Root infusion taken to relieve a cold. Ceremonial, ritual.)

in English: Mojave seablite

Suckleya A. Gray Chenopodiaceae (Amaranthaceae)

For George Suckley, 1830–1869, surgeon, naturalist, explorer; see *Proceedings of the American Academy of Arts and*

Sciences 11: 103. 1876 and Joseph Ewan, *Rocky Mountain Naturalists*. 243, 317. The University of Denver Press 1950.

Suckleya suckleyana (Torr.) Rydb. (*Atriplex suckleyana* (Torr.) S. Watson; *Obione suckleyana* Torr.; *Suckleya petiolaris* A. Gray)

North America.

See *Species Plantarum* 2: 1052–1054. 1753, *De Fructibus et Seminibus Plantarum...* 2: 198, pl. 126. 1791, *Pacif. Railr. Rep.* 12(2): 47, pl. 4. 1860, *Proceedings of the American Academy of Arts and Sciences* 9: 111. 1874, *Proceedings of the American Academy of Arts and Sciences* 11: 103. 1876 and *Memoirs of the New York Botanical Garden* 1: 133. 1900, Thorp, F., Deem, A.W. "Suckleya suckleyana, a poisonous plant." *J. Am. Vet. Med. Assoc.*, 47: 192–197. 1938

(This plant has caused losses of cattle and possibly sheep. It contains an unknown cyanogenic glycoside that upon ingestion of sufficient quantity can release cyanide in the animal system, resulting in cytotoxic hypoxia. Experiments with cattle, sheep, laboratory rabbits, and guinea pigs have shown the cyanogenic potential of poisonous *suckleya*.)

in English: poison suckleya

Suregada Roxburgh ex Rottler Euphorbiaceae

From *suregada*, a Telugu name (from India), *soora gade*, for *Suregada multiflora* (Juss.) Baill., see *De Fructibus et Seminibus Plantarum...* 2: 271. 1791, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 206. 1803 and M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 336. Dehra Dun 1985, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 621. Basel 1996.

Suregada glomerulata (Blume) Baill. (*Erythrocarpus glomerulatus* Blume; *Erythrocarpus spicatus* Blume; *Gelonium aequoreum* var. *hainanense* Hemsl.; *Gelonium borneense* Pax & K. Hoffm.; *Gelonium glomerulatum* (Blume) Hassk.; *Gelonium meliocarpum* Elmer; *Gelonium microcarpum* Pax & K. Hoffm.; *Gelonium mindanaense* Elmer; *Gelonium papuanum* Pax; *Gelonium philippinense* Pax & K. Hoffm.; *Gelonium pulgarensis* Elmer; *Gelonium rubrum* Ridl.; *Gelonium spicatum* (Baill.) Hassk.; *Gelonium subglomerulatum* Elmer; *Suregada borneensis* (Pax & K. Hoffm.) Croizat; *Suregada meliocarpa* (Elmer) Croizat; *Suregada microcarpa* (Pax & K. Hoffm.) Croizat; *Suregada mindanaensis* (Elmer) Croizat; *Suregada papuana* (Pax) Croizat; *Suregada philippinensis* (Pax & K. Hoffm.) Croizat; *Suregada pulgarensis* (Elmer) Croizat; *Suregada rubra* (Ridl.) Croizat; *Suregada spicata* Baill.; *Suregada subglomerata* (Elmer) Croizat)

China.

See *Catalogus Plantarum in Horto Botanico Bogoriensi Cultarum Alter* 237. 1803, *Bijdragen tot de flora van Nederlandsch Indië* 605. 1825, *Étude générale du groupe des*

Euphorbiacées 396. 1858, *Journal of the Linnean Society, Botany* 26(177): 444. 1894 and *Leaflet Philipp. Bot.* 4: 1292–1293. 1911, *Leaflet Philipp. Bot.* 7: 2640. 1915, *Bull. Misc. Inform. Kew* 1926: 81. 1926, *Bull. Jard. Bot. Buitenzorg, sér.* 3. 17: 216–217. 1942

(Leaves decoction for fever.)

in English: false lime

in Malaya: lima, limau hantu, limau limau, melima, merlimau, penawa puteh, penawar puteh, ruas puas

Suregada lanceolata (Willd.) Kuntze (*Gelonium angustifolium* Müll.Arg.; *Gelonium lanceolatum* Willd.; *Suregada angustifolia* (Müll.Arg.) Airy Shaw; *Suregada angustifolia* Baill., nom. nud.; *Suregada lanceolata* Kuntze)

India, Sri Lanka.

See *Sp. Pl.* 4: 832. 1806, *Étude Euphorb.*: 396. 1858, *Prodr.* 15(2): 1128. 1866, *Revis. Gen. Pl.* 2: 619. 1891 and *Kew Bull.* 23: 128. 1969

(Seed paste applied to treat leprosy.)

in India: kaaru guggilam, kurudu nandi, surgada, velidabba, velladabba, yelladabba

Suregada multiflora (A. Juss.) Baill. (*Gelonium aequoreum* var. *hainanense* Hemsl.; *Gelonium affine* S. Kuntze; *Suregada sumatrana* (S. Moore) Croizat; *Suregada tenuifolia* (Ridl.) Croizat)

India, Sulawesi. Slender tree or shrub, dioecious, twigs with ring-like stipular scars, leaves bear rectangular translucent gland dots, stipules deciduous, short petiole with a ring scar at the node, unisexual flowers in clusters opposite leaves, round fleshy fruit tardily splitting, orange fruit leaf-opposed

See *De Fructibus et Seminibus Plantarum...* 2: 271. 1791, *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis* 18 illustratum 111, pl. 10, f. 31A. 1824, *Fl. Ind.* ed. 1832, 3: 831–832. 1832, *Étude Euphorb.*: 396. 1858, *Journal of the Linnean Society, Botany* 26(177): 444. 1894 and *Bull. Jard. Bot. Buitenzorg*, III, 17: 216–217. 1942, *Kew Bull.* 25: 550. 1971, *Kew Bull.* 32: 81. 1977

(Root decoction in fever. Bark purgative, in liver complaints. Ripe fruits after boiling in mustard oil are applied to boils. Leaves pounded in coconut oil applied on the belly for stomachache.)

in China: bai shu

in India: mongeng

Sutera A.W. Roth Scrophulariaceae

After the Swiss botanist Johann Rudolf Suter, 1766–1827, Dr. med. 1794, physician, 1820–1827 professor of philosophy and Greek at Berne, author of *Helvetiens Flora*. Zürich 1802; see Roth, Albrecht Wilhelm (1757–1834), *Botanische Bemerkungen und Berichtigungen*. Leipzig, 1807, *Nomencl. Bot.* [Steudel] 820. 1821, *Nov. Pl. Sp.* 291. 1821, *Companion to the Botanical Magazine* 1: 374, 377. 1836, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 855. 1852 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 348. 1965, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 787. Stuttgart 1993, Hilliard, Olive Mary (1926–), *The Manuleae: A Tribe of Scrophulariaceae*. Edinburgh: Edinburgh University Press, 1994.

Sutera atropurpurea Hiern (*Jamesbrittenia atropurpurea* (Benth.) Hilliard; *Lyperia atropurpurea* Benth.; *Lyperia dinteri* Diels ex Pilg.; *Lyperia longituba* Dinter; *Manulea atropurpurea* Kuntze; *Sutera brunnea* Hiern)

Tropical Africa. Shrub or subshrub, ascending, dark-red-brown flowers

See *Companion to the Botanical Magazine* 1: 380. 1836, *Revis. Gen. Pl.* 3[3]: 235. 1898 and *Flora Capensis* (Harvey) 4(2.2): 305–306. 1904, *Bot. Jahrb. Syst.* xlviii. 440. 1912, *Repert. Spec. Nov. Regni Veg.* 19: 94. 1923, *Edinburgh Journal of Botany* 49(2): 227. 1992

(Leaves for anxiety, headache.)

in South Africa: saffraanbossie, verfbossie

Sutherlandia R. Br. Fabaceae (Galegeae)

For the Scottish (b. Edinburgh) botanist James Sutherland, circa 1639–1719 (d. Edinburgh), 1699 King's Botanist for Scotland, Superintendent of the Royal Botanical Garden and professor of botany at Edinburgh, author of *Hortus medicus edinburgensis*. Edinburgh 1683, sent plants to James Petiver (1658–1718); see Francis Wall Oliver (1864–1951), ed., *Makers of British Botany*. 281–282. Cambridge 1913, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, *Revista Sudam. de Botan.* 1: 69–80. 1934, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 349. 1965, H.R. Fletcher and W.H. Brown, *Royal Botanic Garden Edinburgh, 1670–1970*. Edinburgh 1970, Arthur D. Chapman, ed., *Australian Plant Name Index*. 2784. 1991, B.D. Schrire and S. Andrews, “*Sutherlandia*: Part I.” *The Plantsman*. 14(2): 65–69. September 1992.

Sutherlandia frutescens (L.) R.Br. ex W.T. Aiton (*Colutea frutescens* L.; *Colutia frutescens* (L.) Medik.; *Lessertia frutescens* (L.) Goldblatt & J.C. Manning; *Sutherlandia frutescens* (L.) R.Br.; *Sutherlandia frutescens* R.Br.)

South Africa, Botswana, Namibia. Perennial non-climbing shrub, red flowers, standard white-streaked, inflated bladder-like pods, vegetative parts and flowers browsed, bitter leaves

See *Species Plantarum* 2: 723. 1753, *Vorles. Churpfälz. Phys.-Öcon. Ges.* ii. 366. 1787, *Philosophische Botanik* 1: 210. 1789, *Hortus Kewensis* (W.T. Aiton), ed. 2. 4: 327. 1812 and *Taxon* 46(3): 466. 1997, *Strelitzia* 9: 708. 2000

(Used for influenza and stomach ailments.)

in English: balloon pea, bladder senna, cancer bush, duck plant, turkey flower

in South Africa: aandjies, cancer bush, gansies, gansies keur, hoenderbel, kalkoenbelletjie, kankerbos, kipkippers, kippiebos

Swartzia Schreber Fabaceae (Caesalpinieae, Swartzieae)

After the Swedish botanist Olof Peter Swartz (Svartz, Svartz, Swarts, Swarz), 1760–1818, traveller, physician; see *Histoire des plantes de la Guiane Française* 549–551, 934–935, t. 218. 1775, *Genera Plantarum* 364. 1789, *Genera Plantarum* 2: 518. 1791, *Species Plantarum*. Editio quarta ed. 4, 2(2): 1220. 1799, *Nova Genera et Species Plantarum* (quarto ed.) 7: 267. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 422. 1825, *Genera Plantarum* 1: 561. 1865, *Flora Brasiliensis* 15(2): 15–16, 19. 1870 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, *North American Flora* 23: 348. 1930, *Annals of the Missouri Botanical Garden* 37(3): 401. 1950, R.E.G. Pichi Sermolli, “Names and types of fern genera - 2. Angiopteridaceae, Marattiaceae, Danaeaceae, Kaulfussianaceae, Matoniaceae, Parkeriaceae.” *Webbia*. 12(2): 339–373. 1957, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 351. 1965, *Fl. Neotrop.* 1: 1–228. 1968, T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 390. 1972, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 262. Regione Siciliana, Palermo 1988, *Brittonia* 49(1): 1. 1997, *Systematic Botany* 29(2): 358–365. 2004.

Swartzia brachyrachis Harms

South America. Perennial non-climbing tree

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 6: 309. 1915, *Journal of Ethnopharmacology* 122(2): 333–362. 2009

(Isoflavonoids.)

in English: ironwood

in Peruvian Amazon: cuma ceba

Swartzia langsdorffii Raddi (*Mimosa pulchra* Vell.; *Mimosa pulchra* Dum.-Cours.; *Swartzia brasiliensis* Vogel; *Touatea langsdorffii* Kuntze; *Tunatea langsdorffii* (Raddi) Kuntze)

South America. Perennial non-climbing tree

See *Memoria di Matematica e di Fisica della Società Italiana delle Scienze Residente in Modena, Parte contenente le Memorie di Fisica* 18(2): 396–397. 1820, *Linnaea* 11: 169. 1837, *Revisio Generum Plantarum* 1: 211. 1891 and *Mem. Inst. Oswaldo Cruz.* 98(5): 713–718. 2003, *J. Nat. Prod.* 68(8): 1290–1292. 2005

(Molluscicidal activity of the roots, leaves, seeds and fruits. Swartziarboreol diterpenes from the roots.)

Swartzia longistipitata Ducke

South America, Brazil. Perennial non-climbing tree

See *Boletim Técnico do Instituto Agrônomo de Norte* 2: 22. 1944

(Leaves infusion as a bath in amenorrhoea.)

Swartzia polyphylla DC. (*Swartzia acuminata* Willdenow ex Vogel; *Swartzia acuminata* Vogel; *Swartzia acuminata* var. *platygyne* Benth.; *Swartzia acuminata* var. *puberula* (Taub.) Glaz.; *Swartzia acuminata* var. *tridynamia* Huber; *Swartzia opacifolia* J.F. Macbride; *Swartzia platygyne* (Benth.) Ducke; *Swartzia urubuensis* Ducke; *Touatea acuminata* (Willd. ex Vogel) Taub.; *Touatea acuminata* (Vogel) Taub.; *Touatea acuminata* (Vogel) Taub. var. *puberula* Taub.; *Touatea oblonga* (Benth.) Taub.; *Touatea polyphylla* (DC.) Taub.; *Touatea acuminata* (Vogel) Kuntze; *Touatea acuminata* (Willd. ex Vogel) Kuntze; *Touatea polyphylla* (DC.) Kuntze)

South America. Perennial non-climbing tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 424. 1825, *Linnaea* 11: 173. 1837, *Flora Brasiliensis* 15(2): 37. 1870, *Revisio Generum Plantarum* 1: 211. 1891, *Botanisches Centralblatt* 47: 390, 392. 1891 and *Bulletin de la Société Botanique de France* 53, Mém. 3b: 155. 1906, *Archivos do Jardim Botânico do Rio de Janeiro* 3: 127. 1922, *Publications of the Field Museum of Natural History, Botanical Series* 13(3/1): 226. 1943, *Candollea* 37(1): 17–62. 1982, *Chem. Pharm. Bull.* (Tokyo). 40(11): 2970–2974. 1992, *J. Nat. Prod.* 58(4): 629–632. 1995, *Chem. Pharm. Bull.* (Tokyo). 54(2): 278–279. 2006

(Larvicidal, antibacterial, antimycobacterial and antifungal.)

in English: black paddle wood, black paddlewood

in Brazil: maracutaca, muiracutaca, paracutaca, paracutaca-da-terra-firme, pitaíca, pitaíca-da-terra-firme, pracuíba, tachi-pequeno

in Suriname: blakka kabisie, boegoe-boegoe, bois pagaies, jaroroballi, kharemero-jaroro, larakusana, parakusan, sepietoena, toepoera apoekoetja, zwart parelhout

Swartzia recurva Poepp. (*Swartzia aptera* DC. var. *recurva* (Poepp.) Ducke; *Swartzia arenicola* Ducke; *Swartzia bracteata* Ducke; *Touatea recurva* (Poepp.) Taub.; *Touatea recurva* (Poepp.) Kuntze)

South America, Brazil. Perennial non-climbing tree, small tree

See *Nova Genera ac Species Plantarum* 3: 61. 1845, *Revisio Generum Plantarum* 1: 211. 1891, *Botanisches Centralblatt* 47: 392. 1891 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 124–125. 1922, *Archivos do Jardim Botânico do Rio de Janeiro* 4: 292. 1925, *Tropical Woods* 90: 17–18. 1947, *Flora Neotropica* 1: 21. 1968

(Pods cooked and eaten to treat malaria, fatigue, age.)

Swartzia sericea Vogel (*Swartzia erythrocarpa* Benth.; *Swartzia erythrocarpa* Spruce ex Benth.; *Touatea sericea* Kuntze; *Touatea sericea* (Vogel) Kuntze; *Touatea sericea* Taub.)

South America, Brazil. Perennial non-climbing tree

See *Linnaea* 11: 176. 1837, *Flora Brasiliensis* 15(2): 28. 1870, *Revisio Generum Plantarum* 1: 211. 1891, *Bot. Centralbl.* xlvii. (1891) 390, 391. 1891

(Leaves toxic, leaves and bark used as fish poison.)

Swertia L. Gentianaceae

For the Dutch herbalist Emanuel (Emmanuel) Swert (Sweerts, Sweert), 1552–1612, florist, cultivator of bulbs, author of *Florilegium*. Frankfurt 1612; see Pierre Vallet (circa 1575–circa 1657), *Le Jardin du Roy tres chrestien Henry IV.* [Paris] 1608, Jean Théodore de Bry (1561–1623), *Florilegium Novum*. Oppenheim 1611, Carl Linnaeus, *Species Plantarum* 1: 226–227. 1753, *Genera Plantarum* Ed. 5. 107. 1754, *Flora Caroliniana*, secundum ... 9, 87–88. 1788, *Bull. Sci. Soc. Philom. Paris* 1824: 176. 1824, *Flora* 13: 221. 1830, *Flora Telluriana* 3: 26. 1836[1837], *Transactions of the Linnean Society of London* 17: 522, 524. 1837, *A General History of the Dichlamydeous Plants* 4: 178. 1837, *Genera et Species Gentianearum* adjectis observationibus quibusdam phytogeographicis 309, 311–312, 318. 1839[1838], *Bulletin de la Société Impériale des Naturalistes de Moscou* 1840(2): 165. 1840, *Bull. Soc. Imp. Naturalistes Moscou* 22(2): 337. 1849, *Proceedings of the California Academy of Sciences* 2: 142–144, 146, f. 41. 1863, *Flore de Département des Hautes-Pyrénées* 449. 1867, *Bull. Calif. Acad. Sci.* 1: 142. 1885 and *Journal of the Linnean Society, Botany* 48(321): 207. 1929, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 262. 1988, *Fl. Madagasc.* 168: 1–167. 1990, Kunjani Joshi, “*Swertia* L. (Gentianaceae) in Nepal: Ethnobotany and agenda for sustainable management.” *Ethnobotanical Leaflets* 12: 1–6. 2008.

Swertia alata Royle ex D. Don

Himalaya.

See *Trans. Linn. Soc. London* 17(4): 523. 1837, *The Flora of British India* 4(10): 125. 1883 and *Journal of the College of Science, Imperial University of Tokyo* 25(19): 168–169. 1908

(Used in Ayurveda.)

in India: chiratta, kiratatikta

Swertia albomarginata Kuntze (*Frasera albomarginata* S. Watson; *Frasera albomarginata* S. Watson var. *induta* (Tidestr.) Card; *Leucocraspedum albomarginatum* (S. Watson) Rydb.; *Swertia albomarginata* (S. Watson) Kuntze)

North America. Perennial herb

See *Flora Caroliniana*, secundum ... 9, 87–88. 1788, *Reports of explorations and surveys*: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War 5: 280. 1871, *Revisio Generum Plantarum* 2: 431. 1891

in English: desert elkweed, desert fraseria

Swertia angustifolia Buch.-Ham. ex D. Don (*Swertia angustifolia* Burkill)

Northern India, Himalaya. Erect, branched, white or pale blue corolla

See *Prodromus Florae Nepalensis* 127–128. 1825

(Used in Unani. Shoots crushed in fever and as a tonic for digestive tract, stomachache, fever, constipation, malarial fever, bronchial asthma and also as a blood purifier and laxative.)

in English: beautiful swertia

in China: xia ye zhang ya cai

in India: bettachiraayatha, chiraaaito, chiraeta shireen, chiraita, chirata, khawsik-damdawi, pahadikiraita, pahari, pahari chirayata, pahari kiretta

Swertia angustifolia Buch.-Ham. ex D. Don var. **pulchella** (D. Don) Burkill (*Ophelia pulchella* D. Don; *Ophelia pulchella* D. Don ex G. Don; *Swertia affinis* C.B. Clarke; *Swertia affinis* Knobl.; *Swertia esquirolii* H. Lév.; *Swertia vacillans* Maxim.)

India.

See *Prodromus Florae Nepalensis* 127–128. 1825, *London and Edinburgh philosophical magazine and journal of science* 8: 77. 1836, *The Flora of British India* [J.D. Hooker] 4(10): 126. 1883, *Bot. Centralbl.* 1x. (1894) 394. 1894 and *Journal of the Asiatic Society of Bengal* 2: 375. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 12(317–321): 187. 1913

(Dried plant powder taken for snakebite; plant infusion taken as febrifuge, tonic, antiperiodic.)

in China: mei li zhang ya cai

in India: champhai-dam-dawi, chiraaaito, chiraeta shireen, chiraita, chirata, milakainangai

Swertia bimaculata (Siebold & Zucc.) Hook. f. & Thomson ex C.B. Clarke (*Ophelia bimaculata* Siebold & Zucc.; *Silene*

esquirolii H. Lév.; *Swertia bimaculata* Hook.f. & Thomson ex C.B. Clarke; *Swertia bimaculata* (Siebold & Zuccarini) Hook.f. & Thomson; *Swertia bimaculata* var. *macrocarpa* Nakai; *Swertia platyphylla* Merrill)

India, Himalaya. Herb

See *A General History of the Dichlamydeous Plants* 4: 178. 1837, *Trans. Linn. Soc. London* 17: 524. 1837, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 159. 1846, *Journal of the Linnean Society, Botany* 14(78): 449. 1875 and *Flore du Kouy-Tchéou* 174. 1914, *Botanical Magazine* 47(556): 262. 1933, *Lingnan Science Journal* 15(3): 424–425, f. 1. 1936

(Roots for bone fracture, fever.)

in English: twospotted swertia

in China: zhang ya cai

Swertia chirayita (Roxb. ex Fleming) Karst. (*Gentiana chirata* Wall.; *Gentiana chirarta* Roxb.; *Gentiana chirayita* Roxb. ex Fleming; *Ophelia chirata* Wall.; *Swertia chirata* (Wall.) C.B. Clarke; *Swertia tongluensis* Burkill)

Northern India, Himalaya. Annual or biennial, robust, profusely branched, erect, rotate greenish-yellow flowers in panicles, pastures and slopes

See *Indian J. Exp. Biol.* 29(7): 674–675. 1991, *Planta Med.* 57(2): 102–104. 1991, *Indian J. Exp. Biol.* 34(4): 351–355. 1996, *Journal of Non-Timber Forest Products* 3: 7–9. 1996, *Journal of Ethnopharmacology* 84(1): 105–108. 2003

(Used in Ayurveda. Stimulant, cooling, hypoglycemic, anthelmintic, strongly bitter tonic, laxative, a remedy for a weak stomach, indigestion and bloating, nausea, dyspepsia, stomach disorders, fever, cough, asthma, intermittent fevers, malaria, constipation, diabetes, leprosy, protect the liver; powdered plant mixed with honey taken by a pregnant woman to stop vomiting; taken with white sandalwood paste to stop internal hemorrhage of stomach. Bitter infusion of the plant used as a blood purifier and for skin diseases. Dried plant powdered and taken to avoid cholera, gastroenteritis, fevers and malaria.)

in English: brown chirata, Indian gentian, white chirata

in India: anaryatikta, ardhatikta, bhunimba, charayata, chiraaayitha, chiraeta talkh, chirat, chirata, chiratata, chiratika, chiratikta, chirato, chirayta, chiret, chireta, chireto, chiretta, chirowto, chirta, chraita, cirattakucci, cirayata, haima, jvarantaka, jwaranthakah, kaade kiraaith, kairaka, kairata, kanditiktaka, kiraaith, kiraatha kaddi, kiraatha thiktha, kiranta, kirata, kirata-tikta, kirataka, kiratatikta, kirata-tiktah, kiratatiktaka, kiryat-charayatah, naditiktaka, naipala, nela baevu, nelabevu, nelavaema, nelaveru, nepalanimba, nepalanimbah, nepalinim, nidrari, nila, qasab-uz-zarirah, qasabuzzarirah, ramasenaka, sannipatha, sutiktaka, tikta, tilaghas, trinanimba, uttarakiriyattu, viktaka

in Lepcha: rung kyen

in Nepal: chiraita, chiratika, kairata, khuple, tida, timda

Swertia ciliata (D. Don ex G. Don) B.L. Burtt (*Ophelia ciliata* D. Don ex G. Don; *Ophelia purpurascens* Wall. ex D. Don; *Ophelia purpurascens* D. Don; *Swertia ciliata* (G. Don) B.L. Burtt; *Swertia ciliata* Royle ex D. Don)

India.

See *Philosophical Magazine and Journal* 8: 77. 1836, *A General History of the Dichlamydeous Plants* 4: 178. 1837, *Trans. Linn. Soc. London* 17(4): 524, 526. 1837 and *Notes from the Royal Botanic Garden, Edinburgh* 26(3): 272. 1965

(Used in Ayurveda. Whole plant antibacterial, tonic, febrifuge, used for cold and cough, typhoid fever, headache, malaria, fevers, jaundice, wounds, gall bladder and liver problems. Powdered dried plant for chronic fever, constipation and dyspepsia. Roots decoction given as febrifuge; roots chewed as a vermifuge. Leaves used in fevers.)

in China: pu lan zhang ya cai

in India: chiraita, chirata, chirayata, chiretta, kiraatha thiktha, kiratatikta, safed chirotu

in Nepal: tiktha

in Tibet: rgya-tig

Swertia corymbosa Wight ex Griseb. (*Ophelia corymbosa* Wight ex Griseb.; *Swertia corymbosa* Knobl.; *Swertia corymbosa* Wight)

India.

See *Trans. Linn. Soc. London* 17: 524. 1837, *A General History of the Dichlamydeous Plants* 4: 178. 1837, *Genera et Species Gentianearum* adjectis observationibus quibusdam phytogeographicis 317. 1839[1838], *Field. & Gardn. Sert. Pl.* t. 71. 1838 [1839 publ. 1838], *Bot. Centralbl.* 1x. (1894) 394. 1894

(Dried powdered plant taken to get relief from stomachache.)

in India: milakainangai

Swertia decussata Nimmo

India.

See *The Flora of British India* 4(10): 127. 1883

(Used in Ayurveda.)

in India: bhunimbaha, kadu, shilajatu

Swertia hookeri C.B. Clarke

India. Perennial herb, erect, purplish flowers with blue nerves, seeds narrowly winged

See *The Flora of British India* 4(10): 127. 1883

(Sedative, nervine, febrifuge, roots for bone fracture.)

in China: cu zhuang zhang ya cai

Swertia lawii Burkill

India.

See *Journal of the Asiatic Society of Bengal* 2: 379. 1906

(Used in Ayurveda.)

in India: kiraatha thiktha, kiratatikta

Swertia nervosa (Wall. ex G. Don) C.B. Clarke (*Agathotes nervosa* Wall. ex G. Don; *Agathotes nervosa* G. Don; *Swertia cavaleriei* H. Lév.; *Swertia nervosa* Wall.)

Nepal, China, Himalaya.

See *Numer. List* [Wallich] n. 4383. 1831, *A General History of the Dichlamydeous Plants* 4: 177. 1837, *Transactions of the Linnean Society of London* 17: 522. 1837, *The Flora of British India* 4(10): 125. 1883 and *Repertorium Specierum Novarum Regni Vegetabilis* 12(317–321): 187. 1913

(Crushed whole plant decoction given in malaria and fevers; aerial parts decoction drunk as a febrifuge.)

in China: ye mai zhang ya cai

in Nepal: chiraito, teete, tite

Swertia paniculata Wall. (*Swertia dilatata* C.B. Clarke)

India.

See *Numer. List* [Wallich] n. 4374. 1831, *Plantae Asiaticae Rariores* 3: 3, t. 205. 1832, *The Flora of British India* [J.D. Hooker] 4(10): 122. 1883

(Used in Ayurveda.)

in China: kuan si zhang ya cai

in India: charaita, charayata, chiraayitha, chiraeta talkh, chirat, chirata, chiratata, chiratika, chiratikta, chirato, chirayta, chiret, chireta, chireto, chiretta, chiroto, chirta, chraitha, kiraatha thiktha, kiratatikta

Swertia pedicellata Banerji

Nepal.

See *Bull. Misc. Inform. Kew* 1924, 263. 1924

(Paste of leaves and roots taken with water to treat headache.)

in Nepal: syumju tikta

Swertia petiolata D. Don (*Swertia petiolata* Royle)

India, Himalaya. Perennial rhizomatous, bluish flowers, reddish brown seeds

See *Ill. Bot. Himal. Mts.* [Royle] 277. 1833–1840, *Trans. Linn. Soc. London* 17: 519. 1837

(Whole plant decoction given against fever, bodyache, headache, gall bladder and liver disorders.)

in India: heising, tikta, zadtig

Swertia purpurascens Boiss. (*Swertia purpurascens* Wall.)

India. Erect, branched, glabrous herbs, corolla pale red-purple, sessile oblong capsule

See *Numer. List* [Wallich] n. 4379. 1831, *Flora Orientalis* [Boissier] Suppl. 347. 1888

(Shoots tonic, febrifuge, laxative.)

Swertia purpurea Royle

Himalayas.

See *Ill. Bot. Himal. Mts.* [Royle] 277. 1833–1840

(Antibacterial.)

Swertia radiata (Kellogg) Kuntze (*Frasera angustifolia* (Rydb.) Rydb. *Frasera macrophylla* Greene; *Frasera speciosa* Douglas ex Griseb.; *Frasera speciosa* Douglas ex Griseb. var. *angustifolia* Rydb.; *Frasera speciosa* Douglas ex Griseb. var. *stenosepala* Rydb.; *Frasera stenosepala* (Rydb.) Rydb.; *Swertia radiata* (Kellogg) Kuntze var. *macrophylla* (Greene) H. St. John; *Tessaranthium angustifolium* (Rydb.) Rydb.; *Tessaranthium macrophyllum* (Greene) Rydb.; *Tessaranthium radiatum* Kellogg)

North America. Perennial herb

See *Flora Boreali-Americana* 2(8): 66–67, pl. 153. 1838, *Revisio Generum Plantarum* 2: 430. 1891 and *Flora of the Rocky Mountains* 1065. 1917

(Leaves applied to the forehead for headache. Infusion of dried, powdered leaves or roots taken for diarrhea, dysentery; roots decoction or infusion used for colds, asthma, gonorrhea, digestive upsets, stomachache. Veterinary medicine, crushed plant on wound when castrating.)

in English: columbo, elkweed, green gentian, showy fraseria

Swertia thomsonii C.B. Clarke

Himalaya. Perennial herb, erect, rhizomatous, flowers greenish-blue, winged seeds

See *The Flora of British India* 4(10): 129. 1883

(Plant decoction in headache and fever.)

Swietenia Jacquin Meliaceae

For the Dutch (b. Leiden) botanist and physician Gerard L.B. van Swieten, 1700–1772 (d. Vienna), *Protomedicus*, studied medicine (M.D. 1725) and pharmacy at Louvain and Leyden/Leiden under Herman Boerhaave, 1745 physician to the Empress Maria Theresa of Austria, 1754 a founder of the Vienna University Botanical Garden, founder of the first Vienna medical school and Director of the Medical Faculty of the University of Vienna, his works include *Gerardi van Swieten Commentaria in Hermannii Boerhaave aphorismos de cognoscendis et curandis morbis*. Lugduni Batavorum 1745–1772 and *Description abrégé des maladies qui regnent le plus communément dans les armées, avec la méthode de*

les traiter. Amsterdam 1761; see Johann Georg Hasenöhrle (1729–1796), *Historia medica morbi epidemici sive febris petechialis quae ab anno 1757, etc.* [8vo, the account of the Vienna plague of 1758–1759.] Vienna 1760, *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 4, 20. 1760, Anton Störck (1731–1803), *Annus medicus quo sistuntur observationes circa morbos acutos et chronicos*. [Two vols, 8vo, records of dissections.] Vienna 1760, 1761, *Familles des Plantes* 2: 343, 573. 1763 and *Fieldiana, Bot.* 24(5): 444–468. 1946, *Field Mus. Nat. Hist., Bot. Ser.* 13(3/2): 717–777. 1949, Garrison and Morton, *Medical Bibliography*. 2152, 2200, 4488. 1961, Peter W. van der Pas, in *D.S.B.* 13: 181–183. 1981.

Swietenia macrophylla King (*Swietenia belizensis* Lundell; *Swietenia candollei* Pittier; *Swietenia krukovii* Gleason; *Swietenia macrophylla* var. *marabaensis* Ledoux & Lobato; *Swietenia tessmannii* Harms)

Latin America, Peru, Brazil. Tree

See *Hooker's Icones Plantarum* 16: t. 1550. 1886 and *Journal of the Washington Academy of Sciences* 10: 33. 1920, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 180. 1927, *American Journal of Botany* 23: 21, t. 1. 1936, *Contributions from the United States National Herbarium* 6: 36. 1941, *Estud. Florest. Estuar. Amaz.* 15: 1. 1972, *Int. J. Green Pharm.* 2: 224–227. 2008

(Seeds antidiabetic, hypoglycemic, hypolipidemic, powdered seed in empty stomach successfully employed for the treatment of diabetes.)

in English: big-leaf mahogany, broad-leafed mahogany, Honduras mahogany, large leaf mahogany

in Peru: aguano, caoba, mahogani, pasich, tuxw

in Japan: ôba-mahogani

Swietenia mahagoni (L.) Jacq. (*Cedrela mahagoni* L.; *Cedrus mahagoni* (L.) P. Miller; *Swietenia acutifolia* Stokes; *Swietenia fabrilis* Salisb., nom. nud.; *Swietenia mahagoni* Lam., nom. illeg., non *Swietenia mahagoni* (L.) Jacq.; *Swietenia mahagoni* DC., nom. illeg., non *Swietenia mahagoni* (L.) Jacq.; *Swietenia mahagoni* var. *praecociflora* Hemsl.; *Swietenia mahogani* C. DC.; *Swietenia mahogani* L.; *Swietenia mahogani* Lam.)

West Indies. Tree, monoecious, dense-crowned, leaves even-pinnate, cream flowers in axillary panicles, flowers borne on the new growth on lateral branches, pollen of male flowers is sticky, woody 5-lobed oblong-globose capsules standing erect on trees, numerous winged seeds clustered around the central persistent column

See *Systema Naturae*, Editio Decima 2: 940. 1759, *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 20. 1760, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, *Encyclopédie Méthodique, Botanique* 3(2): 678. 1792, *Prodr. Stirp. Chap. Allerton* 317. 1796, *A Botanical Materia Medica* 2: 479. 1812, *Monographiae Phanerogamarum* 1: 730. 1878

and *Icones Plantarum* 28, t. 2786. 1905, *Economic Botany* 29(4): 318–319. 1975, *Journal of Ethnobiology* 3(2): 149–156. December 1983

(Seed powder antidiabetic; paste from the seeds applied for leucorrhea. Bark aphrodisiac, bitter, astringent, febrifuge, antiseptic; a decoction applied to wounds. Drinking a large quantity of the boiled bark decoction is said to induce hemorrhage and thus abortion. Magic, love potion, the leafy twig.)

in English: Cuba mahogany, hardback, Madeira, Madeira redwood, mahogany, mahogany tree, small leaf mahogany, Spanish mahogany, West Indian mahogany

in French Guiana: acajou rouge

in China: tao hua xin mu

in India: mahagani, mahagoni

in Japan: mahogany

Swintonia Griffith Anacardiaceae

After the British writer George Swinton, 1780–1854, translator, 1802 East India Company, 1827 Chief Secretary in Bengal, (circa 1840) a senior official of East India Company in Bengal, plant collector for N. Wallich, friend of William Griffith (1810–1845); see Abu Talib Ibn Muhammad Khan, Isfahani. [Masnavi.] (Poem in praise of Miss Julia Burrell.) With an English translation by G. Swinton. London [1802?].

Swintonia floribunda Griffith (*Swintonia griffithii* Kurz; *Swintonia helferi* Hook. f.; *Swintonia penangiana* King; *Swintonia puberula* Pearson)

Burma. Tree, light yellow flowers

See *Proc. Linn. Soc. London* 1: 283. 1846 and *Philip. J. Sci. C Bot.* 4: 409. 1909, Hublet, P. et al. “Étude sur les accidents cutanés et muqueux provoqués par les bois tropicaux dans l’industrie du bois en Belgique.” *Archs Belg. Méd. Soc.* 38: 314. 1972, *Gard. Bull. Singapore* 36(2): 196. 1984 [1983 publ. 1984]

(Dangerous and poisonous as *Melanorrhoea* species. Mucocutaneous reactions, skin irritating.)

Common names: bagel, kedondong rabuk, kereta, merpauh daun runching, merpeau, mirah

Malayan names: balau, bermi, mempenai, mepauh, merpauh periang, rengas

Syagrus Mart. Arecaceae (Palmae)

Latin *syagrus*, *i* used by Plinius for a kind of palm-tree; possibly from the Greek *sys* ‘pig’ and *agrius*, *agrimaios* (*agra*) ‘wild’, referring to the habitat, see *Mem. Mat. Fis. Soc. Ital.* 18(2): 345, 347. 1820, *Palmarum familia*: 18–19. 1824, *Linnaea* 28: 247, 250. 1856, *Flora Brasiliensis* 3: 401–402.

1881, *Voyage dans l’Amérique Méridionale* 134. 1881, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 3: 81. 1887, *Malpighia* 1: 339, 349–350, 352–353. 1887, *Plantas Novas Cultivadas no Jardim Botânico do Rio de Janeiro* 1: 5–6. 1891 and *Agricultura Coloniale* 10: 445–446, 465–467. 1916, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 679. 1937, *Principes* 7: 109. 1963, *Fieldiana, Botany* 32(15): 228, 230–231. 1970.

Syagrus inajai (Spruce) Beccari (*Calappa speciosa* (Barb. Rodr.) Kuntze; *Cocos aequatorialis* Barb. Rodr.; *Cocos chavesiana* Barb. Rodr. ex Becc.; *Cocos inajai* (Spruce) Trail; *Cocos speciosa* Barb. Rodr.; *Maximiliana inajai* Spruce; *Syagrus aequatorialis* (Barb. Rodr.) Barb. Rodr.; *Syagrus chavesiana* (Barb. Rodr. ex Becc.) Barb. Rodr.; *Syagrus speciosa* (Barb. Rodr.) Barb. Rodr.)

Tropical America. Trunk smooth and irregularly swollen, panicle bearing two bracts, fruits with a small apical stigmatic residue

See *Journal of the Linnean Society, Botany* 11: 163. 1869, *Enumeratio palmarum novarum quas valle fluminis Amazonum inventas et ad sertum palmarum collectas* 38. 1875, *Journal of Botany, British and Foreign* 15: 79. 1877, *Malpighia* 1: 445. 1887, *Vellozia* 1: 52. 1888, *Revisio Generum Plantarum* 2: 982. 1891 and *Agricultura Coloniale* 10: 467. 1916, *Fieldiana, Botany* 32(15): 230. 1970, *Field Guide Palms* 297. 1995

(For skin diseases.)

Vernacular names: churúbay, oróboto

in Brazil: buruarana, jararana, pirima, piririma, pupunha brava, pupunha de porco, pupunharana

Syagrus romanzoffiana (Cham.) Glassman (*Arecastrum romanzoffianum* (Cham.) Becc.; *Arecastrum romanzoffianum* subvar. *minus* Becc.; *Arecastrum romanzoffianum* var. *australe* (Mart.) Becc.; *Arecastrum romanzoffianum* var. *ensifolium* (Drude) Becc.; *Arecastrum romanzoffianum* var. *genuinum* Becc.; *Arecastrum romanzoffianum* var. *micropindo* Becc.; *Calappa acrocomioides* (Drude) Kuntze; *Calappa australis* (Mart.) Kuntze; *Calappa datil* (Drude & Griseb.) Kuntze; *Calappa martiana* (Drude & Glaz.) Kuntze; *Calappa plumosa* (Hook.f.) Kuntze; *Calappa romanzoffiana* (Cham.) Kuntze; *Cocos acrocomioides* Drude; *Cocos arechavaletana* Barb. Rodr.; *Cocos australis* Mart.; *Cocos australis* Drude & Brandt; *Cocos botryophora* var. *ensifolia* Drude; *Cocos datil* Drude & Griseb.; *Cocos geriba* Barb. Rodr.; *Cocos martiana* Drude & Glaz. ex Drude; *Cocos martiana* Drude & Glaz.; *Cocos plumosa* Lodd. ex Hook.; *Cocos plumosa* Hook.f.; *Cocos romanzoffiana* Cham.)

Brazil to NE. Argentina.

See *Species Plantarum* 2: 1188. 1753, *Voyage dans l’Amérique Méridionale* 95, t. 1, f. 2, t. 30C. 1844, *Botanical Magazine* 86: t. 5180. 1860, *Symbolae ad Floram Argentinam*

(Roots decoction and tea used for regulating fertility. Seeds, therapeutic potential as hypoglycemic agents.)

in English: queen palm

in Japan: giri-ba-yashi

in Argentina: coquito

in Brazil: baba de bio, baba de boi, coco babão, coco de cachorro, coco de catarro, coco de sapo, coqueiro, coqueiro datil, coqueiro de Santa Catarina, coqueiro juvena, coqueiro pindaba, coqueiro pindoba, gerivá, jervivá, pindó, yarivá

in Paraguay: pindó

in Portuguese: coqueiro de jardim

Symphonia L.f. Clusiaceae (Guttiferae)

Greek *syn* ‘with, together’ plus *phone* ‘voice, sound’, Latin *symphonia* ‘concord, harmony, symphony’, referring to the stamens, united, see *Supplementum Plantarum* 49, 303. 1782 [1781 publ. Apr 1782], *Histoire des Végétaux Recueillis dans les Isles Australes d’Afrique* 71. 1806, *Symbolae botanicae ...* 1: 71. 1832 and *Fl. Madagasc.* 136: 1–92. 1951, *Botanical Museum Leaflets* 17(1): 1–36. 1955, *Fieldiana, Bot.* 24(7/1): 36–61. 1961, *Ceiba* 22(1): 41–64. 1978, *Garcia de Orta, Sér. Bot.* 6: 187–202. 1983–1984.

Symphonia globulifera L.f. (*Chrysopia microphylla* Cambess. & Bojer ex Cambess.; *Chrysopia microphylla* Hils. & Bojer ex Cambess.; *Moronobea coccinea* Aubl.; *Moronobea globulifera* Schltld.; *Moronobea globulifera* (L.f.) Schltld.; *Symphonia coccinea* (Aubl.) Oken; *Symphonia gabonensis* (Vesque) Pierre; *Symphonia gabonensis* Pierre ex Vesque; *Symphonia gabonensis* Pierre; *Symphonia globulifera* var. *gabonensis* Vesque; *Symphonia microphylla* R.E. Schult.; *Symphonia microphylla* Benth. & Hook.f. ex Vesque; *Symphonia microphylla* (Hils. & Bojer ex Cambess.) Benth. & Hook. f. ex Vesque; *Symphonia microphylla* subsp. *microphylla*; *Symphonia utilissima* R.E. Schult.)

Suriname. Tree, thick yellow latex, red flowers

See *Histoire des plantes de la Guiane Française* 2: 789, t. 313. 1775, *Supplementum Plantarum* 302. 1782 [1781 publ. Apr 1782], *Mémoires du Muséum d’Histoire Naturelle* 423–424, t. 4. 1828, *Linnaea* 8: 190. 1833, *Journ. Arn. Arb.* xxxi. 285. 1841, *Allgemeine Naturgeschichte* 3(2): 431. 1841, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 8: 231–232. 1893, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1228. 1896 and *Bot. Mus. Leaflet*. 17: 20, 22, tab. 10.

1955, *Phytologia* 36: 392. 1977, *Biotropica* 20(2): 100–106. 1988, *Phytochemistry*. 70(1):75–85. 2009, *Phytochemistry*. 71(8–9): 964–974. 2010

(Medicinal resin/latex, oleoresin; extract obtained from the root barks exhibited a strong antiplasmodial activity; resinous bark burned to ashes and applied on ulcers. Fruits and leaves diuretic, wound dressing, for venereal diseases. Ceremonial, rapidly coagulating latex used in making dancing masks.)

in English: chewstick, doctor gum, hog plum, sambo gum

in Cameroon: gambé, mokoá, onié, sisako, nom onié à fleur rouge

in Central Africa: agberigbedi, beu, bon

in Congo: niang-nianga, sondzo

in Gabon: monianga, osodou, osongho, ossol

in Ivory Coast: arquane, aruane, beu

in Nigeria: agberigbede, agberigbedi, arkwani, arquani, manil, ogolo, okilolo, osoe, ossol, ovien-edun-eze, ovien edun eze, umochoneze; agben (Yoruba); ovien edun eze (Edo); okilolo (Ijaw)

in Zaire: bolaka, bolongo, bombiko, botete, bulungu, dake, ilungu, mbiko, nsongia, ulundu

Symphorema Roxburgh Lamiaceae (Symphoremataceae, Verbenaceae)

From the Greek *symphorema* ‘brought together, compound’, *symphoreo* ‘to bring together, collect’, referring to the flowers or to the capitate cymes within the involucre, see Roxburgh, William (1751–1815), *Plants of the Coast of Coromandel*. London: George Nicol, 1795–1819, *Icones Plantarum Indiae Orientalis* 4(3): 13. 1849.

Symphorema involucreatum Roxb.

India.

See *Numer. List* [Wallich]. n. 1740. 1828–1849

(Root juice given to eradicate worms.)

in China: liu bao teng

in India: betta thakkaali, cokantua, budamarri, esaparatiga, gubbadaara, gubbadara, isaparathige, isaparathige, konda-thekkali, nagura, naguru, pendithige, penditige, suroodoo, surudu, tellappipili, thellappipili

Symphorema polyandrum Wight

India.

See *Plants of the Coast of Coromandel* 2: 46. 1805

(Seed decoction a cure for eye sores; seeds powdered with black peppers and snuffed in snakebite; root and seeds made into a paste with black pepper and given as an antidote for

snakebite, cat bite, mad dog bite and mosquito bite; powdered root snuffed and paste applied on head in snakebite. Magic, ritual, fruit tied as an amulet on waist to cure rickets among children.)

in India: badichang, katauta

Symphoricarpos Duhamel Caprifoliaceae

Greek *symphoreo* 'to bring together, collect' and *karpos* 'fruit', referring to the clustered fruits, see *Traité des Arbres et Arbustes* (Duhamel) 2: 295. 1755, Ludwig, Christian Gottlieb (1709–1773), *Definitiones plantarum in usum auditorum*: collectae, nunc auctae et emendata. [Ed. 3.] Edidit D.G.R. Boehmer. Lipsiae, 1760, *Gen. Pl.* [Jussieu] 211. 1789 and *Fieldiana, Bot.* 24(11/4): 275–296. 1976.

Symphoricarpos albus (L.) S.F. Blake (*Symphoricarpos albus* K. Koch; *Symphoricarpos albus* (L.) S.F. Blake; *Vaccinium album* L.)

North America. Perennial shrub, subshrub

See *Species Plantarum* 1: 349–352. 1753, *Traité des Arbres et Arbustes* 2: 295. 1755, *Dendrologie* 2(1): 48. 1872, *Methodus* (Moench) 503. 1794 and *Rhodora* 16(187): 118. 1914, Lewis, W.H. "Snowberry (*Symphoricarpos*) poisoning in children." *J. Am. Med. Assoc.*, 242: 2663. 1979, *Acta Biologica Cracoviensia, Series Botanica* 22: 129–153. 1980

(Poisonous, low toxicity. The white berries contain the isoquinoline alkaloid chelidonine, as well as other alkaloids; this chemical is also found in greater celandine (*Chelidonium majus*). Ingesting the berries causes mild symptoms of vomiting, dizziness, and slight sedation in children. The risk of severe poisoning does not appear great because of vomiting that occurs after ingestion. Children should be discouraged from eating the attractive white fruit. Fruits or leaves crushed and applied to wet sores, chapped or injured skin, burns. Emetic berries eaten as an antidote for poisoning.)

in English: common snowberry, coralberry, snowberry, thin-leaved snowberry, waxberry

Symphoricarpos albus (L.) S.F. Blake var. ***albus*** (*Symphoricarpos albus* var. *pauciflorus* (J.W. Robbins) S.F. Blake; *Symphoricarpos albus* (L.) S.F. Blake var. *pauciflorus* (W.J. Rob. ex A. Gray) S.F. Blake; *Symphoricarpos pauciflorus* W.J. Rob. ex A. Gray; *Symphoricarpos racemosus* Michx.)

North America. Perennial shrub, subshrub

See *Species Plantarum* 1: 349–352. 1753, *Traité des Arbres et Arbustes* 2: 295. 1755, *Meth.* 503. 1794 and *Rhodora* 16(187): 118. 1914, Lewis, W.H. "Snowberry (*Symphoricarpos*) poisoning in children." *J. Am. Med. Assoc.*, 242: 2663. 1979, *Acta Biologica Cracoviensia, Series Botanica* 22: 129–153. 1980

(Poisonous berries. Fruits or leaves crushed and applied to wet sores, chapped or injured skin, burns. Emetic berries eaten as an antidote for poisoning.)

in English: common snowberry, snowberry, thin-leaved snowberry

Symphoricarpos occidentalis Hook. (*Symphoricarpos occidentalis* Hook., orthographic variant)

See M.R. Gilmore, *Uses of plants by the Indians* ... 64. 1991

(Low toxicity. Leaves infusion used for inflamed eyes.)

in North America: black snake food, buck brush, eye-lotion plant, wolf berry, zuzecha-ta-wote sapsapa (Dakota)

Symphyotrichum Nees Asteraceae

From the Greek *symphyes* 'born with one, congenital, grown together, coalescing', *symphyo*, *symphyein* 'grow together' and *thrix*, *trichos* 'hair', see Nees von Esenbeck, Christian Gottfried Daniel (1776–1858), *Genera et species Asterearum*. Recensuit, descriptionibus et animadversionibus illustravit, synonyma emendavit Christianus Godofredus Nees ab Esenbeck. 9–10, 135–136. Vratislaviae, Sumtibus I.D. Grúison, 1832 and *Brittonia* 32: 234. 1980.

Symphyotrichum ciliolatum (Lindl.) Á. Löve & D. Löve (*Aster ciliolatus* Lindl.; *Aster ciliolatus* fo. *comatus* (Fernald) Fernald; *Aster ciliolatus* var. *borealis* (J. Rousseau) Dutilly & Lepage; *Aster ciliolatus* var. *comatus* (Fernald) A.G. Jones; *Aster ciliolatus* var. *maccallae* (Rydb.) A.G. Jones; *Aster ciliolatus* var. *wilsonii* (Rydb.) A.G. Jones; *Aster foliaceus* Lindl. ex DC. var. *subgeminatus* Fern.; *Aster lindleyanus* Torr. & A. Gray; *Aster lindleyanus* Torr. & A. Gray var. *borealis* J. Rousseau; *Aster lindleyanus* Torr. & A. Gray var. *ciliolatus* (Lindl.) A. Gray; *Aster lindleyanus* var. *comatus* Fernald; *Aster lindleyanus* Torr. & A. Gray var. *eximius* E.S. Burgess; *Aster maccallae* Rydb.; *Aster wilsonii* Rydb.; *Aster saundersii* Burgess; *Aster subgeminatus* (Fern.) Boivin; *Aster wilsonii* Rydb.; *Symphyotrichum ciliolatum* var. *comatum* (Fernald) G.L. Nesom; *Symphyotrichum ciliolatum* (Lindl.) A. & D. Löve var. *maccallae* (Rydb.) Nesom; *Symphyotrichum ciliolatum* var. *wilsonii* (Rydb.) G.L. Nesom; *Symphyotrichum subgeminatum* (Fern.) Nesom)

North America. Perennial herb

See *Species Plantarum* 2: 872–877. 1753, *Genera et Species Asterearum* 9–10, 135–136. 1832, *Flora Boreali-Americana* 2(7): 9. 1834, *A Flora of North America: containing* ... 2(1): 122–123. 1841 and *Rhodora* 6(66): 142–143. 1904, *Bulletin of the Torrey Botanical Club* 37(3): 138. 1910, *Rhodora* 51(605): 95. 1949, *Systematic Botany* 2: 334–347. 1977, *American Journal of Botany* 67: 1027–1039. 1980, *Brittonia* 32: 240–261. 1980, *Taxon* 31(2): 344–360. 1982, *Brittonia* 35(2): 140–146. 1983, *Le Naturaliste Canadien* 110: 171–178. 1983, *Phytologia* 55(6): 379. 1984, *Rhodora* 87: 517–527. 1985, *Sida* 11: 483–485. 1986, *Rhodora* 89: 41–45. 1987, *Rhodora* 91: 296–314. 1989, *Rhodora* 94: 48–62. 1992, *Rhodora* 95: 234–253. 1993, *Phytologia* 77(3): 277–278. 1994 [1995], *J. Environ. Manage.* 77(3): 194–204. 2005

(Strongly scented roots boiled to make eye drops; the smoke from burning roots used to revive people who had fainted in sweat baths.)

in English: ciliate wood aster, ciliated aster, ciliolate aster, fringed blue aster, Lindley's aster, MacCalla's aster, northern heartleaf aster

Symphyotrichum cordifolium (L.) G.L. Nesom (*Aster cordifolius* L.; *Aster cordifolius* subsp. *laevigatus* (Porter) A.G. Jones; *Aster cordifolius* subsp. *sagittifolius* (Wedem. ex Willd.) A.G. Jones; *Aster cordifolius* var. *alvearius* E.S. Burgess; *Aster cordifolius* var. *furibishiae* Fernald; *Aster cordifolius* var. *incisus* Britton; *Aster cordifolius* var. *laevigatus* Porter; *Aster cordifolius* var. *lanceolatus* Porter; *Aster cordifolius* var. *moratus* (Shinners) Shinners; *Aster cordifolius* var. *polycephalus* Porter; *Aster cordifolius* var. *racemiflorus* Fernald; *Aster cordifolius* var. *sagittifolius* (Wedem. ex Willd.) Jones; *Aster finkii* Rydb. var. *moratus* Shinners; *Aster leiophyllus* Porter; *Aster lowrieanus* Porter; *Aster lowrieanus* var. *bicknellii* Porter; *Aster lowrieanus* var. *incisus* (Britton) Porter; *Aster lowrieanus* var. *lanceolatus* (Porter) Porter; *Aster lowrieanus* var. *lanceolatus* Porter; *Aster plumarius* Burgess; *Aster sagittifolius* Wedem. ex Willd.; *Symphyotrichum cordifolium* var. *furibishiae* (Fernald) G.L. Nesom; *Symphyotrichum cordifolium* var. *lanceolatum* (Porter) G.L. Nesom; *Symphyotrichum cordifolium* var. *moratum* (Shinners) G.L. Nesom; *Symphyotrichum cordifolium* var. *polycephalum* (Porter) G.L. Nesom; *Symphyotrichum cordifolium* var. *racemiflorum* (Fernald) G.L. Nesom; *Symphyotrichum lowrieanum* (Porter) G.L. Nesom; *Symphyotrichum sagittifolium* (Wedem. ex Willd.) G.L. Nesom)

North America. Perennial herb, multistemmed clumps, heart-shaped leaves, flowers in a dense rounded panicle, flowers light blue to purple or sometimes white with a yellow center, attractive to bees, butterflies and/or birds

See *Species Plantarum* 2: 875. 1753, *Species Plantarum*. Editio quarta 3(3): 2035. 1803, *Bulletin of the Torrey Botanical Club* 16(3): 67–68. 1889, *Bulletin of the Torrey Botanical Club* 19(7): 224. 1892, *Bulletin of the Torrey Botanical Club* 20(6): 255. 1893, *Bulletin of the Torrey Botanical Club* 21(3): 121. 1894, *Memoirs of the Torrey Botanical Club* 5(21): 325. 1894, *Proceedings of the Portland Society of Natural History* 2: 129. 1897, *An Illustrated Flora of the Northern United States* 3: 363. 1898 and *Brittonia* 32: 249. 1980, *Phytologia* 63(2): 131. 1987, *Phytologia* 77(3): 278, 291. 1994[1995]

(Root used to make smoke or incense to attract wild animals.)

in English: arrow-leaf aster, blue heart-leaf aster, blue heart-leaved aster, blue wood aster, broad-leaved aster, common blue wood aster, common wood aster, heart-leaved aster, heartleaf aster, starwort

Symphyotrichum cusickii (Gray) Nesom (*Aster cusickii* A. Gray; *Aster foliaceus* Lindl. ex DC. var. *cusickii* (A. Gray) Cronquist)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 228. 1836, *Notes on Some Compositae* 99–100. 1880 and *American Midland Naturalist* 29(2): 443. 1943, *Brittonia* 35: 189–196. 1983, *Phytologia* 77(3): 278. 1994[1995]

(Dried powdered stems infusion as ear drops for earaches.)

in English: Cusick's aster

Symphyotrichum divaricatum (Nutt.) G.L. Nesom (*Aster divaricatus* (Nutt.) Torr. & A. Gray, nom. illeg., non L.; *Aster exilis* Elliot, nom. dub.; *Aster neomexicanus* Wootton & Standl.; *Aster subulatus* var. *ligulatus* Shinners; *Symphyotrichum subulatum* var. *ligulatum* (Shinners) S.D. Sundb.; *Tripolium divaricatum* Nutt.)

North America. Annual or biennial, herbaceous, weedy, leaf sharply toothed, white to purplish flowers

See *Species Plantarum* 2: 873. 1753, *Transactions of the American Philosophical Society*, new series, 7: 296. 1840, *A Flora of North America*: containing ... 2(1): 163. 1841 and *Contributions from the United States National Herbarium* 16(4): 187. 1913, *Field & Laboratory* 21(4): 159–160. 1953, *Phytologia* 77(3): 279. 1994[1995], *Sida* 21(2): 907. 2004, *Sida* 21(4): 2125–2140. 2005

(Roots decoction a wash for headache, mashed roots applied for toothache.)

in English: annual saltmarsh aster, saltmarsh aster, slender aster, southern annual saltmarsh aster, white wood aster, wireweed

Symphyotrichum ericoides (L.) G.L. Nesom (*Aster ericoides* L.; *Lasallea ericoides* (L.) Semple & L. Brouillet; *Virgulus ericoides* (L.) Reveal & Keener)

North America. Herb, perennial, woody-based, disk yellow, rays deep lilac, in open area, sandy soil

See *Species Plantarum* 2: 875. 1753, *Flora Caroliniana*, secundum ... 209. 1788, *Hortus Kewensis*; or, a catalogue ... 3: 203. 1789, *Species Plantarum*. Editio quarta 3(3): 2027. 1803, *Syn. Pl.* 2: 443. 1807, *Genera et Species Asterearum* 9–10, 135–136. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 242. 1836, *Synoptical Flora of North America* 1(2): 185. 1884, *Revisio Generum Plantarum* 1: 313. 1891, *Rhodora* 1(10): 187–188. 1899 and *Bulletin of the Torrey Botanical Club* 28(9): 505. 1901, *Bulletin of the Torrey Botanical Club* 33(3): 153. 1906, *Contributions from the United States National Herbarium* 25: 560. 1925, *Rhodora* 32(379): 138. 1930, *Journal of the Washington Academy of Sciences* 30(11): 470. 1940, *Rhodora* 51(605): 96. 1949, *Rhodora* 80: 332. 1978, *Phytologia* 77(3): 280–281. 1994 [1995], *Rhodora* 103: 202–218. 2001

(Weed dermatitis. Stimulant, sweatbath.)

in English: heath aster, many flowered aster, white heath aster
in Honduras: estrellitas

Symphyotrichum ericoides (L.) G.L. Nesom var. ***ericoides*** (*Aster ciliatus* Muhl. ex Willd., nom. illeg., non *Aster ciliatus* Walter; *Aster commutatus* (Torr. & A. Gray) A. North America. Perennial herb

See *Synoptical Flora of North America* 1(2): 185. 1884 and *Bulletin of the Torrey Botanical Club* 28(9): 504–505. 1901, *Le Naturaliste Canadien* 89(2): 67. 1962, *Taxon* 32(30): 509. 1983, *Rhodora* 80(823): 340. 1978, *Phytologia* 63(2): 131. 1987, *Phytologia* 77(3): 281–282. 1994[1995], *Cultivated and Native Asters of Ontario* (Compositae: Astereae) 134. 2002

(Used to wash newborn. Plant decoction taken and used as lotion for snakebite.)

in English: cluster aster, rough white prairie aster, white prairie aster

Symphyotrichum foliaceum (Lindl. ex DC.) G.L. Nesom (*Aster foliaceus* Lindl. ex DC.)

North America. Perennial herb, foliage rather succulent, corolla yellow and pink lavender

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 228. 1836 and *Bulletin of the Torrey Botanical Club* 29(11): 646. 1902, *Rhodora* 34(397): 14–16. 1932, *Phytologia* 77(3): 282. 1994[1995], *Rhodora* 103: 202–218. 2001

(Roots decoction stomachic, taken for loss of appetite, stomach swelling, syphilis, dyspepsia and indigestion. Veterinary medicine, whole plant decoction used as wash for sores on a horse's back.)

in English: alpine leafybract aster

Symphyotrichum foliaceum (Lindl. ex DC.) G.L. Nesom var. ***foliaceum*** (*Aster foliaceus* Lindl. ex DC.; *Aster foliaceus* var. *sublinearis* Eaton & Grisc.; *Aster foliaceus* var. *sublinearis* Griscom & R.J. Eaton; *Aster vaccinus* Piper)

North America. Perennial herb, foliage rather succulent, corolla yellow and pink lavender

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 228. 1836 and *Bulletin of the Torrey Botanical Club* 29(11): 646. 1902, *Rhodora* 34(397): 14–16. 1932, *Phytologia* 77(3): 282. 1994[1995]

(Roots decoction stomachic, taken for loss of appetite, stomach swelling, syphilis, dyspepsia and indigestion. Veterinary medicine, whole plant decoction used as wash for sores on a horse's back.)

in English: alpine leafybract aster

Symphyotrichum frondosum (Nutt.) G.L. Nesom (*Aster frondosus* (Nutt.) Torr. & A. Gray; *Brachyactis frondosa* (Nutt.) A. Gray; *Tripolium frondosum* Nutt.)

North America. Annual

See *Genera et Species Asterearum* 10, 152–158. 1832, *Transactions of the American Philosophical Society*, new series, 7: 296. 1840, *A Flora of North America*: containing ... 2(1): 165. 1841, *Flora Rossica* 2: 495. 1845, *Proceedings of the American Academy of Arts and Sciences* 8: 647. 1873 and *Phytologia* 77(3): 282. 1994[1995]

(Antirheumatic, infusion of stems and flowers.)

in English: leafy rayless aster, short-rayed alkali aster

Symphyotrichum laeve (L.) Á. Löve & D. Löve (*Aster falcidens* Burgess; *Aster laevis* L.; *Aster laevis* var. *falcatus* Farw.; *Aster steeleorum* Shinnery)

North America. Perennial rhizomatous herb, rays pale blue, disks yellow turning dark funnelliform

See *Species Plantarum* 2: 876. 1753 and *Syst. Bot.* 2: 334–347. 1977, *Amer. J. Bot.* 67: 1027–1039. 1980, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Taxon* 31(2): 344–360. 1982, *Brittonia* 35(2): 140–146, 189–196. 1983, *Castanea* 48: 212–217. 1983, *Naturaliste Canad.* 110: 171–178. 1983, *Rhodora* 89: 41–45. 1987, *Darwiniana* 30: 115–121. 1990, *Phytologia* 77(3): 283. 1994[1995], *Journal of Ethnopharmacology* 108(2): 161–184. 2006

(Stimulant, medicinal smokes, sweatbath.)

in English: smooth aster, smooth blue aster

Symphyotrichum laeve (L.) Á. Löve & D. Löve var. *laeve* (*Symphyotrichum laeve* var. *concinnum* (Willd.) G.L. Nesom)

North America. Perennial rhizomatous herb, rays pale blue, disks yellow turning dark funnelliform

See *Species Plantarum* 2: 876. 1753 and *Taxon* 31(2): 359. 1982, *Phytologia* 77(3): 283. 1994[1995], *Rhodora* 103: 202–218. 2001, *Journal of Ethnopharmacology* 108(2): 161–184. 2006

(Stimulant, medicinal smokes, sweatbath.)

in English: smooth aster, smooth blue aster

Symphyotrichum lanceolatum (Willd.) G.L. Nesom var. *hesperium* (A. Gray) G.L. Nesom (*Aster coerulescens* var. *wootonii* (Greene) Wiegand; *Aster durus* Lunell; *Aster fluvialis* Osterh.; *Aster hesperius* var. *laetevirens* (Greene) Cronquist; *Aster hesperius* A. Gray; *Aster hesperius* var. *wootonii* Greene; *Aster laetevirens* Greene; *Aster lanceolatus* subsp. *hesperius* (A. (Magic, ritual, decoction used as lotion for protection from witches and evil spirits and ghosts.)

in English: aromatic aster

Symphyotrichum praealtum (Poir.) G.L. Nesom (*Aster praealtus* Poir.; *Aster salicifolius* Aiton, nom. illeg.)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 3: 203. 1789, *Encyclopédie Méthodique. Botanique* ... Supplément 1(2): 493. 1811 and *Phytologia* 77(3): 289. 1994[1995]

(Whole plant infusion taken for stomachache, and as a stimulant. Ceremonial medicine, decoction used for snakebite.)

in English: veiny-lined aster, willowleaf aster

Symphyotrichum praealtum (Poir.) G.L. Nesom var. ***praealtum*** (*Aster caeruleus* DC.; *Aster coeruleus* DC.; *Aster novi-belgii* L. var. *litoreus* A. Gray; *Aster praealtus* Poir.; *Aster praealtus* Poir. var. *caeruleus* (DC.) A.G. Jones; *Aster praealtus* Poir. var. *imbricatifolius* Wiegand; *Aster praealtus* var. *texicola* Wiegand; *Aster salicifolius* Aiton, nom. illeg.; *Symphyotrichum novi-belgii* (L.) G.L. Nesom var. *litoreum* (A. Gray) G.L. Nesom; *Symphyotrichum praealtum* var. *texicola* (Wiegand) G.L. Nesom)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 3: 203. 1789, *Encyclopédie Méthodique. Botanique* ... Supplément 1(2): 493. 1811 and *Phytologia* 77(3): 289. 1994[1995]

(Whole plant infusion taken for stomachache, and as a stimulant. Ceremonial medicine, decoction used for snakebite.)

in English: veiny-lined aster, willowleaf aster

Symphyotrichum prenanthoides (Muhl. ex Willd.) G.L. Nesom (*Aster prenanthoides* Muhl. ex Willd.)

North America. Perennial herb

See *Species Plantarum*. Editio quarta 3(3): 2046. 1803 and *Phytologia* 77(3): 290. 1994[1995]

(Roots decoction for colds, fevers, for kidneys troubles.)

in English: crookedstem aster

Symphotrichum puniceum (L.) Á. Löve & D. Löve (*Aster puniceus* Torr. & A. Gray; *Aster puniceus* L.; *Aster puniceus* Elliott)

North America. Perennial herb, erect, stout rhizome, usually purple stems, clasping leaves, lilac to pale blue ray flower heads, yellow disk florets, open leafy panicle, crushed plant aromatic

See *Species Plantarum* 2: 875. 1753, *Sketch Bot. S. Carolina* [Elliott] 2: 255. 1823, *A Flora of North America: containing ...* (Torr. & A. Gray) 2(1): 140. 1841 and *Brittonia* 32: 240–261. 1980, *Amer. J. Bot.* 67: 1027–1039. 1980, *Taxon* 30: 703–704. 1981, *Taxon* 31(2): 359. 1982, *Rhodora* 87: 517–527. 1985, *Rhodora* 89: 41–45. 1987

(Roots diaphoretic, abortifacient, emmenagogue and febrifuge, decoction used in the treatment of colds, typhoid, pneumonia and fevers, for facial paralysis, to promote menstruation. Chewed root applied to an aching tooth. Ceremonial, ritual hunting medicine.)

in English: bristly aster, glossy-leaved aster, purple-stem aster, purple-stemmed aster, purplestem aster, red-stalked aster, shining aster, swamp aster

Symphotrichum puniceum (L.) Á. Löve & D. Löve var. ***puniceum*** (*Aster blandus* Pursh; *Aster calderi* B. Boivin; *Aster conduplicatus* Burgess; *Aster firmus* Nees; *Aster forwoodii* S. (Roots diaphoretic, abortifacient, emmenagogue and febrifuge, decoction used in the treatment of colds, typhoid, pneumonia and fevers, for facial paralysis, to promote menstruation. Chewed root applied to an aching tooth. Ritual hunting medicine.)

in English: bristly aster, glossy-leaved aster, purple-stem aster, purple-stemmed aster, purplestem aster, red-stalked aster, shining aster, swamp aster

Symphotrichum shortii (Lindl.) G.L. Nesom (*Aster camp-tosorus* Small; *Aster shortii* Lindl.)

North America. Perennial herb

See *Flora Boreali-Americana* 2(7): 9. 1834, *Bulletin of the Torrey Botanical Club* 24(7): 339. 1897 and *Phytologia* 77(3): 291. 1994[1995]

(Infusion of flowering tops used medicinally.)

in English: midwestern blue heart-leaf aster, Short's aster

Symphotrichum simmondsii (Small) G.L. Nesom (*Aster simmondsii* Small; *Aster sulznerae* Small)

North America. Perennial herb, ray florets corollas pale lilac or lavender to pale purple, disc florets corollas yellow becoming reddish

See *Flora of Miami* 190, 200. 1913, *Phytologia* 77(3): 291. 1994[1995]

(Infusion of plant used for sunstroke.)

in English: Simmonds' aster

Symphytum L. Boraginaceae

Growing together, *symphyo* and *phyton*, Greek *symphyton* used by Dioscorides for a plant, comfrey, a species of *Symphytum*, or for low pine, a kind of *Coris*; Latin *symphyton*, *i* applied by Plinius to the wallwort, comfrey, boneset or to a plant, called also *helenion*.

Symphytum asperum Lepechin (*Symphytum armeniacum* Bucknall)

Europe, Eurasia.

See *Species Plantarum* 1: 136. 1753, *Nova Acta Academiae Scientiarum Imperialis Petropolitanae. Praecedit Historia ejusdem Academiae* 14: 442. 1805 and *Watsonia* 10: 296–297. 1975, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 78: 182–188. 1975, *Proceedings of the*

Koninklijke Nederlandse Akademie van Wetenschappen, *Series C: Biological and Medical Sciences* 81: 162–172. 1978, *Botaniceskij Žurnal SSSR* 70(12): 1698–1699. 1985, *Chromosome Information Service* 38: 21–23. 1985, Huxtable, R.J. “Human health implications of pyrrolizidine alkaloids and herbs containing them.” Pages 41–86 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, USA. 1989

(This plant contains pyrrolizidine alkaloids such as echimidine. These alkaloids cause veno-occlusive symptoms in animals leading to liver cirrhosis. The plant can also accumulate toxic amounts of nitrates. Animals do not normally eat the plant because of the bristly hairs on the leaves.)

in English: prickly comfrey

Symphytum officinale L. (*Symphytum officinale* L. subsp. *uliginosum* auct. non (Kern.) Nyman; *Symphytum uliginosum* auct. non Kern.)

Europe. Perennial herb

See *Species Plantarum* 1: 136. 1753 and *Watsonia* 10: 296–297. 1975, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 81: 162–172. 1978, *Taxon* 29: 538–542. 1980, *Plant Systematics and Evolution* 140: 279–292. 1982, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 29: 1–25. 1982, *Gorteria* 10: 227–229. 1983, *Ann. Fac. Biol. Univ. Skopje* 36: 73–86. 1983, *Ann. Missouri Bot. Gard.* 71: 1063. 1984, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 104: 519–536. 1984, *Gorteria* 12: 156–158. 1985, *Izvestiia Akademii Nauk Belorusskoi SSR: Serii Biologicheskikh Nauk* 6: 3–8. 1985, *Chromosome Information Service* 38: 21–23. 1985, *Acta Botanica Neerlandica* 36: 33–37. 1987, *Folia Geobotanica et Phytotaxonomica* 23: 375–381. 1988, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 92: 179–187. 1989, Ridker, P.M., McDermott, W.V. “Comfrey herb tea and hepatic veno-occlusive disease.” *Lancet* 1989: 657–658. 1989, Huxtable, R.J. “Human health implications of pyrrolizidine alkaloids and herbs containing them.” Pages 41–86 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, USA. 1989

(This plant contains several pyrrolizidine alkaloids, which cause veno-occlusive symptoms, liver cirrhosis, and death. Humans have been affected after ingesting herbal teas and medicines. Astringent, laxative, for diarrhea, heartburn, gonorrhea, sprains, bruises.)

in English: bone knit, comfrey, common comfrey, healing herb, wound knit

in China: ju he cao

Symphytum peregrinum Ledeb. (*Symphytum x uplandicum* Nym.)

Russia.

See *Species Plantarum* 1: 136. 1753 and *Botanisk Tidsskrift* 69: 245–247. 1975, *Acta Phytotaxonomica Sinica* 21: 55–59. 1983, *Botanica Helvetica* 93: 169–192. 1983, *Chromosome Information Service* 38: 21–23. 1985

(Russian comfrey contains pyrrolizidine alkaloids and should not be taken internally as a herb remedy.)

in English: Russian comfrey

Symplocarpus Salisb. ex Nutt. Araceae

Greek *symploke* ‘combination, connection’, *symplokos* ‘entwined, interwoven’ and *karpos* ‘fruit’, referring to the ovaries coalescing into a compound fruit; see D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Symplocarpus foetidus (Linnaeus) Salisbury ex W. Barton (*Dracontium foetidum* Linnaeus; *Ictodes foetidus* (L.) Bigelow; *Pothos foetidus* (L.) Aiton; *Pothos foetidus* (L.) Michx., nom. illeg., non *Pothos foetidus* Aiton; *Pothos putorii* Barton; *Spathyema angusta* Raf.; *Spathyema foetida* (Linnaeus) Rafinesque; *Spathyema lanceolata* Raf.; *Spathyema latifolia* Raf.; *Symplocarpus foetidus* (Linnaeus) Nuttall; *Symplocarpus foetidus* (Linnaeus) Salisbury; *Symplocarpus foetidus* f. *variegatus* Otsuka)

North America. Perennial herb, large heart-shaped leaves, small flowers in a dark spadix surrounded by a purple-brown spathe, foul-smelling

See *Species Plantarum* 2: 967–968. 1753, *Enum. Syst. Pl.* 5, 24. 1760, *Flora Boreali-Americana* 2: 186. 1803, *Medical Repository*, ser. 2, 5: 352. 1808, *Transactions of the Horticultural Society of London* 267. 1812, *Vegetable materia medica of the United States* 1: 123–124. 1817, *The Genera of North American Plants* 1: 105–106. 1818, *Flora Telluriana* 4: 13. 1836 [1838] and Williams, K.A. “A botanical study of skunk cabbage, *Symplocarpus foetidus*.” *Torreyia* 19: 21–29. 1919, Shull, J.M. “*Spathyema foetida*.” *Bot. Gaz.* 79: 45–59. 1925, *Journal of Japanese Botany* 17: 638. 1944, Barabé, D. “Vascularisation de la fleur de *Symplocarpus foetidus* (Araceae).” *Canad. J. Bot.* 60: 1536–1544. 1982, Wu Rong-fen (as Wu Young-fen) in Wu Young-fen & Hwang Shu-mei, eds. *Symplocaceae. Fl. Reipubl. Popularis Sin.* 60(2): 1–77. 1987

(All parts poisonous and irritant; presence of calcium oxalate in all parts of the plant. Ingesting the plant can cause intense pain and irritation in the mouth area after chewing the roots or leaves; the root must be thoroughly dried or cooked before being eaten. Used for swellings, coughs, hay fever, whooping cough, catarrh, bronchitis and asthmatic conditions, consumption, rheumatism, wounds, convulsions, epilepsy, cramps, hemorrhages, toothaches, and headaches, for treating diseases of respiratory organs, nervous disorders,

rheumatism, and dropsy. Root antispasmodic, diaphoretic, diuretic, emetic, expectorant and slightly narcotic. Externally, it has been used as a poultice to draw splinters and thorns, to heal wounds and to treat headaches.)

in English: purple skunk cabbage, skunk cabbage

in China: chou song

in North America: skunk cabbage, purple skunk cabbage, Eastern skunk cabbage, skunk weed, meadow cabbage, polecat weed, collard, stinking poke, fetid hellebore, tabac-du-diabli, chou puant

Symplocos Jacq. Symlocaceae

Greek *symploke* ‘combination’, *symplokos* ‘entwined, interwoven’ (*syn* ‘with, together’ and *pleko* ‘to twist, twine, tie, enfold’), referring to the stamens (united at the base) or to the ovary, see *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 5, 24. 1760, *Systema Naturae*, ed. 12 2: 509. 1767, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 23. 1828, *A General History of the Dichlamydeous Plants* 4: 2–3. 1837, *Genera Plantarum* 2: 669. 1876, *The Flora of British India* 3: 572. 1882 and *Das Pflanzenreich* 6(IV. 242): 30, 32, 73. 1901, *Acta Phytotaxonomica Sinica* 24(3): 193. 1986, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2441–2443. 2001, *Fl. Chiapas* 6: 33–40. 2005.

Symplocos adenophylla Wall. & G. Don (*Dicalix punctomarginatus* (A. Chev. ex Guill.) Migo; *Symplocos adenophylla* Wall.; *Symplocos constricta* Brand; *Symplocos fulvosa* King & Gamble; *Symplocos iteophylla* Miq.; *Symplocos maclurei* Merr.; *Symplocos palawanensis* Brand; *Symplocos pruniflora* Ridl.; *Symplocos punctomarginata* A. Chev. ex Guill.; *Symplocos stewardii* Sleumer)

Vietnam, China. Tree or shrub, reddish brown, papery coriaceous glandular leaves, racemes or spikes, drupes ellipsoid-cylindric, leaves point earthwards, wood used for light construction

See *Flora Cochinchinensis* 663. 1790, *A General History of the Dichlamydeous Plants* 4: 3. 1837, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 476. 1861 and *Pflanzenr.* (Engler) *Symploc.* 41. 1901, *Philipp. J. Sci.*, C 3: 10. 1908, *Philippine Journal of Science* 23(3): 260. 1923, *Bulletin de la Société Botanique de France* 79: 174–175. 1932, *Repertorium Specierum Novarum Regni Vegetabilis* 42(1086–1090): 266–267. 1937, *Bulletin of the Shanghai Science Institute* 13(3): 204. 1943, *Noot. Rev. Symp.* 121. 1975, *Fl. Cambodge, Laos & Vietnam* 16. 1977, *Fl. China* 15: 245. 1996

(Magic, believed that the leaves, if carried in the quiver with the darts, act as charms bringing them success in hunting.)

Common names: magalas, palawan agosip, ta pan co

in China: an ye shan fan

in Indonesia: kayu kain, kayu lattan, kayu porugis

in Malaysia: mendong, menugan

in Vietnam: bo cau, d[uj]ng tr[aa]u

Symplocos celastriifolia Griff. ex Clarke (*Eugeniodes celastriifolia* Kuntze; *Eugeniodes celastriifolius* auct.; *Eugeniodes celastriifolius* Kuntze; *Symplocos candicans* Brand; *Symplocos hutchinsonii* Brand; *Symplocos nigricans* Brand; *Symplocos peninsularis* Brand)

SE Asia, Malaysia. Shrub or tree, smooth glabrous twigs, elliptic leaves smooth, upper surface of the leaf dark, scented flowers creamy-coloured to whitish, flower cluster branched at the base, calyx smooth, fruit round pink, green, yellow or dark blue, a viable seed, sterile locules filled with air, fruits obviously buoyant, wood for fire, usually in coastal forests, primary or secondary lowland forests, especially in the transition between mangrove and freshwater swamp

See *Fl. Brit. India* [J.D. Hooker] iii. 575. 1882, *Revis. Gen. Pl.* 2: 975. 1891 and *Pflanzenr.* (Engler) *Symploc.* 49. 1901, *Philipp. J. Sci.*, C 4: 109–110. 1909, *Noot. Rev. Symp.* 138. 1975, R.E. Salter et al., “Habitat use, ranging behaviour, and food habits of the proboscis monkey, *Nasalis larvatus* (van Wurmb), in Sarawak.” *Primates* 26(4): 436–451. 1985

(Leaves for diarrhea and dysentery.)

Common names: adad, bintangur pantai, kayu tanyong, kayu tyanyong, kendung, krunjing, kulimbabok, makanang, mangkinang tikus, purup, tanjong Jawa, tanjong-tanjong, tawi

Symplocos cochinchinensis (Lour.) S. Moore (*Dicalix cochinchinensis* Lour.; *Dicalyx cochinchinensis* Lour.; *Symplocos cochinchinensis* S. Moore; *Symplocos ferruginea* Roxb.)

Malaysia. Shrub or tree, stem bark smooth and green, elliptic papery coriaceous shiny leaves, white flowers, inflorescence a branched spike, ribbed globose blue-black fruits, lowland rain forest

See *Flora Cochinchinensis* 2: 663–664. 1790, *Hort. Bengal.* 40. 1814, *Fl. Ind.* 2: 542. 1832, *FBI* 3: 574. 1882 and *Journal of Botany, British and Foreign* 52(6): 148–149. 1914, *Noot. Rev. Symploc.* 151, 154, 156, 158. 1975, *Fl. Cambodge, Laos & Vietnam* 16. 1977

(Antimicrobial. Ceremonial, seeds used for making garlands; dried fruits used for sorceries.)

in English: Cochinchina sweetleaf, sweetleaf

in China: yue nan shan fan

in India: parala, pasari, sum-lay-araung, sum-leg-araung

in Indonesia: jirak sapi

in Malaysia: medan hitam

in Philippines: tabu

in Sri Lanka: bobu, bombu

(Powdered bark given with honey to cure biliousness, fever, cough, ulcers, swellings, uterine complaints, vaginal diseases, menstrual disorders, hemorrhages, diarrhea, dysentery, gonorrhoea and diseases of the eyes; dried bark powder boiled in water and taken for urinary diseases. A paste of the leaves, boiled in oil, is applied to diseases of the scalp. Ritual, ceremonial, rosaries are being made out of fruits.)

in English: laurel sweet-leaf

in India: kambili vetti, pachotti, pithakkottai, vaspamaram

Symlocos fasciculata Zoll. (*Symlocos fasciculata* Roxb. ex Vesque; *Symlocos fasciculata* Roxb. ex A. DC.)

China. Small tree

See *Prodr.* (DC.) 8: 259. 1844, *Systematisches Verzeichniss der im Indischen Archipel* (Zollinger) 136. 1854, *Bull. Soc. Bot. France* 42: 153. 1895

(Young leaves infusion dropped for sore eyes.)

in Borneo: kayuh

Symlocos glomerata King ex C.B. Clarke (*Dicalix glomeratus* (King ex C.B. Clarke) Migo; *Symlocos wenshanensis* Huang & Y.F. Wu in Y.F. Wu; *Symlocos yizhangensis* Y.F. Wu)

India, Himalaya, China. Small trees or shrubs, light yellow flowers, cylindric fruits

See *The Flora of British India* 3(9): 577. 1882 and *Bulletin of the Shanghai Science Institute* 13(3): 201. 1943, *Acta Phytotaxonomica Sinica* 24(3): 193, 199–202, pl. 8, 9. 1986

(Green fruits made into a paste and eaten to check dysentery.)

in China: tuan hua shan fan

in India: kharaney, singhum

Symplocos kurgensis C.B. Clarke

India.

See *Fl. Brit. India* [J.D. Hooker] iii. 576. 1882

(Powered bark boiled in water and the liquid drunk for giddiness.)

in India: boodagani, melande

Symplocos odoratissima (Blume) Choisy ex Zoll. (*Dicalix odoratissimus* Blume; *Dicalyx odoratissimus* Blume; *Eugeniodes odoratissima* (Blume) O. Kuntze; *Eugeniodes odoratissima* Kuntze; *Pygeum grandiflorum* King; *Pygeum viride* Baker.f.; *Symplocos acuminatissima* Merr.; *Symplocos aluminosa* Brand; *Symplocos apoensis* Elmer; *Symplocos bulusanensis* Elmer; *Symplocos ciliata* Benth.; *Symplocos ciliata* Miq.; *Symplocos ciliata* Presl; *Symplocos dagamensis* Brand; *Symplocos elmeri* Brand; *Symplocos floridissima* Brand; *Symplocos floridissima* var. *serrata* Brand; *Symplocos megabotrys* Merr.; *Symplocos odoratissima* Choisy; *Symplocos odoratissima* Choisy ex Zoll.; *Symplocos odoratissima* var. *aluminosa* K. & V.; *Symplocos odoratissima* var. *divaricata* Brand; *Symplocos odoratissima* var. *leptocarpa* S. (Two glycosides, symploracemoside and symplomoside, showed inhibitory activity against snake-venom phosphodiesterase I. Wood of this plant and *pipuli* (*Piper longum*), honey and cow milk made into a paste and given for checking miscarriage. Bark astringent, blood-purifier, antipyretic, antidiarrheal, antiinflammatory, for the treatment of diarrhea, dysentery, liver complaints, skin diseases and wounds, menorrhagia and various female disorders; stem bark chewed in pyorrhea; bark decoction used to check bleeding.)

in English: lodh bark, lodh tree, lotus bark, racemose sweetleaf

in China: zhu zi shu

in India: boligpok, hura, laudar, loda pathani, lodduga chekka, lodh, lodhar, lodhra, lodhuga-chettu, ludho, pachetta, pachotti, pelotili, velli-lothi

in Malaysia: melilin, mempatu

in Nepal: chamluni, dabdabe

in Sanskrit: lodhra, rodhra, srimata, tilaka

Symplocos ramosissima Wall. ex G. Don (*Dicalix myrianthus* (Rehder) Migo; *Symplocos fasciculata* Zoll. var. *chinensis* Brand; *Symplocos myriantha* Rehder; *Symplocos ramosissima* var. *salwinensis* Hand.-Mazz.; *Symplocos stapfiana* H. Lévl.; *Symplocos stapfiana* var. *leiocalyx* Hand.-Mazz.)

India, China.

See *Flora Cochinchinensis* 663. 1790, *A General History of the Dichlamydeous Plants* 4: 3. 1837 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(40–41): 217. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 444–445. 1911, *Plantae Wilsonianae* 2(3): 596. 1916, *Symbolae Sinicae* 7(4): 808. 1936, *Benchmark Papers in Ecology* 13(3): 202. 1943, *Beihefte zum Botanischen Centralblatt* 62(2): 26–27. 1943

(Antiinflammatory.)

in China: duo hua shan fan

in India: kharane, tungchong

Symplocos rubiginosa Wall. (*Symplocos rubiginosa* Wall. ex DC.)

Malaysia. Trees or shrub, grey-brown bole, inner bark yellow, buds and young twigs rusty hairy, leaves spirally arranged, leaves margin strongly toothed, white or greenish-white flowers, bright blue fruits

See *Numer. List* [Wallich] n. 4432. 1828–1849 and *Fl. Malesiana* 1, 8: 271. 1988

(To cure the enlargement of spleen. Fruits reported to be stupefying.)

Malay name: kelap

Synandrospadix Engl. Araceae

Greek *syn* ‘with, together’, *aner*, *andros* ‘stamen, man’ and *spadix* ‘a palm frond, palm branch, spadix’; see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 4: 61. 1883 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 176. Berlin & Hamburg 1989.

Synandrospadix vermitoxicus (Griseb.) Engl. (*Asterostigma vermitoxicum* Griseb.; *Lilloa puki* Speg.; *Staurostigma vermitoxicum* (Griseb.) Engl.)

Peru, Argentina.

See *Bulletin de la Classe Physico-Mathématique de l’Académie Impériale des Sciences de Saint-Petersbourg* 3: 148. 1845, *Allgemeine Gartenzeitung* 16: 129. 1848, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 247–248. 1874, *Pl. Lorentz*. 199–200. 1874, *Flora Brasiliensis* 3(2): 203. 1878, *Bot. Jahrb. Syst.* 4: 62. 1883, *Revista de la facultad de agronomía; universidad nacional de La Plata* 2: 389. 1896, *Pl. Nov. Crit. Argentina* 3: 10. 1897

(Toxic. Tubers used to kill harmful insects.)

Synaptolepis Oliver Thymelaeaceae

Greek *synapto* ‘join together’ and *lepis* ‘scale’, referring to the disk, see *Hooker’s Icones Plantarum* 11: 59–60, pl. 1074. 1870 and *Fl. Trop. E. Africa, Thymelaeaceae* 1–37. 1978, *Fl. Somalia* 1: 200–202. 1993, *Fam. Gen. Vasc. Pl.* 5: 373. 2003, *Strelitzia* 14: 928. 2003, *Fl. Zambesiaca* 9(3): 85–117. 2006.

Synaptolepis alternifolia Oliv. (*Synaptolepis longiflora* Gilg)

East tropical Africa. Shrub or liana, woody herb, suffrutex, scandent, climber, scrambling, woody rootstock, woody tendrils, damaged plant producing inconspicuous watery latex, small leaves, white-cream aromatic flowers, petal-like sepals, dark orange fruits, sweet pulp of ripe fruit eaten raw, at forest edge, riverine forest, wooded grassland, open woodland, in disturbed forest, *Brachystegia* woodland

See *Hooker's Icones Plantarum* 11: 59. 1870, *Hooker's Icones Plantarum* 12: 81–82, pl. 1194. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19(2): 276. 1894

(Roots chewed and the juice swallowed as a remedy for stomachache and snakebite. Roots as fish poison.)

in Mozambique: bassinga, kukuttjula

in Tanzania: kiga-nungu, kijamugu, kwavi, mbibikiu, mkatu, ntongotongo-lya-huluka, nzukumbi

Synaptolepis kirkii Oliv. (*Synaptolepis bussei* Engl., nom. nud.; *Synaptolepis macrocarpa* Gilg; *Synaptolepis pachyphylla* Gilg)

Tanzania. Small lianescent shrub, woody, slender, scandent, twining, climber, scrambling, tuberous swollen roots, dark reddish brown bark, woody tendrils, cream-white fragrant tubular flowers, fleshy yellow fruit, sweet fleshy fruit pulp eaten raw, lowland, dry evergreen forest edges, *Brachystegia* woodland, coastal and secondary bushland

See *Hooker's Icones Plantarum* 11: 59–60, pl. 1074. 1870, *Die Pflanzenwelt Ost-Afrikas* C 2: 284. 1895 and *Die Vegetation der Erde* 9(1): 390. 1910

(Root decoction a remedy for snakebite, birth control, impotence and vomiting. Magic, ritual, a charm for success in business and love affairs.)

in Tanzania: kichooko, lukubi wa msitu, mbibiki, mbibikiu, mfunza waume, mjirambiri, mkatu, munjirembiri, muzanira-kuzimu

Synclisia Benth. Menispermaceae

From the Greek *synkleisis* 'shutting up, closing up, safe storage', genus closely related to *Albertisia*, see *Genera Plantarum* 1: 36. 1862, *Annals and Magazine of Natural History* 20: 171. 1867.

Synclisia scabrida Miers

Tropical Africa, Nigeria. Dioecious liana with twining stems

See *Annals and Magazine of Natural History* ser. 3, 20: 171. 1867 and *Journal of Ethnopharmacology* 6(3): 255–261. 1982, *Journal of Ethnopharmacology* 18(2): 173–185. 1986, *Planta Medica* 42(6): 42–43. 1989, *Fitoterapia* 67: 469–471. 1996, *Indian Journal of Medical Research* 103: 282–284. 1996, *Indian Journal of Pharmacology* 29(5): 366–372. 1997, *BMSA* 8: 1–5. 1997, *Journal of Ethnopharmacology*

62(2): 123–127. 1998, *Indian Journal of Pharmacology* 32: 239–241, 381–383. 2000, *African Journal of Biotechnology* 4(9): 946–952. 2005

(Leaves antihistaminic, antiulcerogenic, papaverine-like, bactericidal and anticholinergic; leaf decoction drunk for gastrointestinal problems, gastric ulcers. Root extract bitter, aphrodisiac, antibacterial, oestrogen-like, uterotonic, to treat malaria, asthma, venereal diseases, to prevent threatened abortion and as a sedative in mental disorders. Magic, ceremonial, contact therapy, pregnant women tie a piece of liana around the waist to avoid spontaneous abortion; root decoction used in trial-by-ordeal ceremonies, constipation or diarrhea, innocent or guilty.)

in English: goat weed

Synedrella Gaertner Asteraceae

Greek *synedrion* (syn 'with, together' and *hedra* 'a seat, chair') 'a sitting together, council', referring to the clustered flowers, see *Phytologia* 76(1): 39–51. 1994.

Synedrella nodiflora (L.) Gaertner (*Blainvillea gayana* Cass.; *Blainvillea gayana* Benth.; *Synedrella nodiflora* Gaertn.; *Ucacou nodiflorum* Hitchc.; *Ucacou nodiflorum* (L.) Hitchc.; *Verbesina nodiflora* L.)

South America. Branched herb, weed, erect, pubescent, axillary flower-heads, small golden-yellow florets

See *Centuria I. Plantarum ...* 28. 1755, *De Fructibus et Seminibus Plantarum ...* 2(3): 456, t. 171. 1791, *Dictionnaire des Sciences Naturelles* [ed. 2] [F. Cuvier] 47: 90–92. 1827, *Niger Fl.* [W.J. Hooker]. 434, in syn. 1849, *Annual Report of the Missouri Botanical Garden* 4: 100. 1893

(Whole plant for body pain. Flowers and roots crushed with betel nut and lime used in diarrhea. Leaf juice applied in case of eczema; poultice applied to Guinea worm and rheumatism; boiled leaves laxative, hemostatic, a decoction drunk for skin troubles, malaria, fevers, heart troubles and used as an enema for epilepsy. For earache, pound the leaves and seed of *Nigella sativa* and place in the ear. Soft swollen seeds in water applied to swelling, boils and abscesses.)

in English: nodeweed

in India: kaattukkolai, mirgijhar, mudiyendra-pacha, syndrela

in Japan: fushi-zaki-sô

Malay name: getang

in Sarawak: seri padang

in Congo: ndongu

in Nigeria: alugen, ebi

in Yoruba: aluganbi, apa iwofa, apawofa, arasan, iba igbo, ogbugbo

Syneilesis Maxim. Asteraceae (Compositae)

From the Greek *syneilesis* ‘rolling up, synthesis, rolling one-self up’, see *Primitiae Florae Amurensis* 165. 1859.

Syneilesis aconitifolia (Bunge) Maxim. (*Cacalia aconitifolia* Bunge; *Cacalia aconitifolia* Miq. ex Maxim.; *Senecio aconitifolius* Turcz.; *Senecio aconitifolius* (Bunge) Turcz.; *Syneilesis aconitifolia* Maxim.)

China, Eurasia.

See *Enum. Pl. Chin. Bor.* 37. 1833, *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 2: 75–148. 1835, *Bull. Soc. Imp. Naturalistes Moscou* (1837) n. VII. 155. 1837, *Primitiae Florae Amurensis* 165, pl. 7, 8, f. 8–18. 1859

(Roots and whole plants used to relax and activate the tendons, alleviate pain of the waist and the lower extremities, and to treat injuries.)

in China: tu er san

Syngonium Schott Araceae

From the Greek *syn* ‘together’ and *gone* ‘womb, ovary’, referring to the united ovaries; see *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 780. 1829, *Linnaea* 6(Lit.): 53. 1831, *Meletemata Botanica* 19. 1832, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 366–367. 1834, *Prodr. Syst. Aroid.* 199–200. 1860, *Monographiae Phanerogamarum* 2: 289–291. 1879 and *Fieldiana, Bot.* 304–363. 1958, *Taxon* 16: 518. 1967, *Ann. Missouri Bot. Gard.* 68(4): 565–651. 1981 [1982], D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Syngonium podophyllum Schott (*Syngonium podophyllum* var. *typicum* Engl., nom. inval.)

Mexico to Trop. America. Perennial, evergreen, climbing herb, vine, the most widespread and variable species in the genus

See *Species Plantarum* 2: 964, 968. 1753, *Bot. Zeitung* (Berlin) 9(5): 85. 1851 and *Pflanzenr.* (Engler) 4, Fam. 23 E: 129. 1920

(Dangerous, moderate toxicity. The plant, roots, leaves and stems, contains irritating crystals of calcium oxalate, which, if ingested, can be irritating to internal tissue, severe pain in the mouth if eaten; crystals are not poisonous. Antiinflammatory, anti-bacterial, milky latex from spadix applied to burns, sores, swellings, fungus, itching, arthritis, rheumatism. Leaf extract used to cure asthma.)

Common names: African evergreen, arrowhead vine, consuelda, contra hierba, hinchazón, hop-ya, nephthytis, tri-leaf wonder

Syngonium podophyllum Schott var. *podophyllum* (*Arum auritum* Vell., nom. illeg., non *Arum auritum* L.; *Caladium arboreum* hort.; *Philodendron riedelianum*

hort.; *Pothos auritus* Willd. ex Schult.; *Pothos auritus* Willd.; *Syngonium affine* Schott; *Syngonium amazonicum* Engl.; *Syngonium decipiens* Schott; *Syngonium gracile* (Miq.) Schott; *Syngonium podophyllum* var. *multisectum* Engler; *Syngonium podophyllum* var. *vellozianum* Croat; *Syngonium poeppigii* Schott; *Syngonium riedelianum* Schott; *Syngonium ruizii* Schott; *Syngonium ternatum* Gleason; *Syngonium vellozianum* Schott; *Syngonium vellozianum* var. *decipiens* (Schott) Engl.; *Syngonium vellozianum* var. *latilobum* Engl.; *Syngonium vellozianum* var. *poeppigii* (Schott) Engl.; *Syngonium vellozianum* var. *riedelianum* (Schott) Engl.; *Syngonium willdenowii* Schott; *Syngonium xanthophilum* Schott; *Xanthosoma gracile* Miq.)

Mexico to Trop. America. Vine

See *Species Plantarum* 2: 964, 968. 1753, *Systema Naturae*, Editio Decima 2: 1251. 1759, *Florae Fluminensis* 9: t. 113. 1825, *Mantissa* 3: 301. 1827, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 780. 1829, *Florae Fluminensis* Icones 9: t. 113. 1831, *Meletemata Botanica* 19. 1832, *Botanische Zeitung. Berlin* 9(5): 85. 1851, *Oesterreichisches Botanisches Wochenblatt* 4(52): 418. 1854, *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis. I* 1856: 67–70. 1856, *Prodr. Syst. Aroid.* 214. 1860, *Flora Brasiliensis* 3(2): 130. 1878 and *Das Pflanzenreich* IV 23E(Heft 71): 128–129. 1920, *Bulletin of the Torrey Botanical Club* 56: 13–14. 1929, *Proceedings of the Indian Science Congress Association* 74(3,VI): 198. 1987, *BMC Complement. Altern. Med.* 1: 10. 2001, *J. Ethnopharmacol.* 81(2): 211–215. 2002, *J. Ethnopharmacol.* 87(1): 103–107. 2003

(Dangerous, moderate toxicity. Juice from the crushed leaves specific against asthma. Antiinflammatory, anti-bacterial, used for sores, swellings, fungus, itching, arthritis, rheumatism. Veterinary medicine.)

Synotis (C.B. Clarke) C. Jeffrey & Y.L. Chen Asteraceae

Greek *syn* ‘united, together’ and *ous, otos* ‘an ear’, see *Compositae Indicae* 177. 1876 and *Kew Bulletin* 39(2): 285. 1984.

Synotis alata (Wall.) C. Jeffrey & Y.L. Chen (*Senecio alatus* Wall.; *Senecio alatus* Sessé & Moc.; *Senecio alatus* var. *oligocephalus* Y.L. Chen & K.Y. Pan; *Senecio cymato-crepis* Diels)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 368. 1838, *Plantae Nouae Hispaniae...* 140. 1890 and *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 192–193. 1912, *Acta Phytotaxonomica Sinica* 19(1): 94. 1981, *Kew Bulletin* 39(2): 306. 1984

(Plant emetic, used in jaundice; a decoction purgative, emetic. Veterinary medicine, paste of leaves and roots given to cattle for the expulsion of gas from the stomach.)

in India: chi-patra

Synotis wallichii (DC.) C. Jeffrey & Y.L. Chen (*Senecio wallichii* DC.)

China, Nepal.

See *Species Plantarum* 2: 866–872. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 364. 1838 and *Kew Bulletin* 39(2): 305. 1984

(Root paste applied to treat headache and joint ache.)

in Nepal: tasyu

Synsepalum (A. DC.) Daniell Sapotaceae

From the Greek *syn* ‘united, together’ and Latin *sepalum*, referring to the nature of the sepals, see *Pharmaceutical Journal and Transactions* 11: 446. 1852, *Histoire des Plantes* 11: 286. 1891 and P. Goldblatt, *The Genera of Sapotaceae*. Kew, Royal Botanic Gardens 1991.

Synsepalum afzelii (Engl.) T.D. Penn. (*Afrosersalisia afzelii* (Engl.) A. Chev.; *Pachystela micrantha* (A. Chev.) Hutch. & Dalziel; *Pouteria afzelii* (Engl.) Baehni; *Richardella afzelii* (Engl.) Baehni; *Sersalisia afzelii* Engl.; *Sersalisia micrantha* (A. Chev.) Aubrév. & Pellegr.)

Ghana, Sierra Leone, Cameroon, Gabon. Tree, fluted, white latex, leaves arranged spirally, flowers in fascicles on branches below the leaves, sweetly sour fruit pulp edible, in lowland evergreen forest

See *Histoire des plantes de la Guiane Française* 1: 85–86, pl. 33. 1775, *Prodromus Florae Novae Hollandiae* 529. 1810, *Notes Botaniques Sapotacees* 1: 19–20. 1890 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 8: 30, t. 10, f. B. 1904, *Candollea* 9: 320. 1942, *Revue de Botanique Appliquée et d’Agriculture Tropicale* 23: 292–293. 1943, *Boissiera*. 11: 96. 1965, *The Genera of Sapotaceae* 248. 1991

(Both the leaves and bark contain tannins and sterols.)

Synsepalum brevipes (Baker) T.D. Penn. (*Bakeriella brevipes* (Baker) Dubard, nom. illeg.; *Pachystela brevipes* (Baker) Engl.; *Pachystela brevipes* (Baker) Baill. ex Engl.; *Pachystela brevipes* (Baker) Dubard; *Pouteria brevipes* (Baker) Baehni; *Sersalisia brevipes* (Baker) Baill.; *Sideroxylon brevipes* Baker)

Tanzania. Tree, many-branched, spreading branches, white milky latex, strongly fluted straight bole, flowers in fascicles on branches below the leaves, small fragrant yellow-cream flowers, yellow-orange edible fruit, shiny seed with a large scar, sweetly sour fruit pulp eaten by human beings, monkeys and birds, in forest, savanna, on riverside, lowland rainforest, riverine forest, margins of lakes

See *Species Plantarum* 1: 192. 1753, *Histoire des plantes de la Guiane Française* 1: 85–86, pl. 33. 1775, *Prodromus Florae Novae Hollandiae* 529. 1810, *Flora of Tropical Africa* 3: 502. 1877, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 947. 1891, *Annales du mus. du Congo. Série 1, Botanique*, sér. 2 1(1): 32. 1899 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 8: 37. 1904, *Notul. Syst. (Paris)* 2: 89. 1911, *Annales de l’Institut Botanico-Géologique Colonial de Marseille* 10: 27. 1912, *Candollea* 9: 290. 1942, *The Genera of Sapotaceae* 248. 1991

(Fruit and stem bark for nausea and jaundice. Bark decoction drunk to treat swellings. Latex from the fruit applied as a galactagogue; fruit pulp for jaundice and nausea. Sap from the roots and bark drunk to treat coughs, colds, and stomachache. Leaves used against hookworm. Root decoction antimalarial and aphrodisiac.)

in Central African Republic: mokendjendje

in Kenya: kang’o, msamvi, mtsami

in Tanzania: mchamvia, mchocho jike, mchocha mke, mdumgelezi, mkarati, msambia, msambia wa kike, msambia wa kiume, msambwa, msamvia, ndobilobe

Goldblatt, *The Genera of Sapotaceae*. 249. 1991

(Astringent resin from the bark.)

in Ghana: asaba

in Guinea: colodomo

in Kenya: msolo, mtsami

in Tanzania: mchocho dume, mdu, mgelezi, mkarati, mkumbulu, mnyohoyo, msambia, msambia mbega, msambwa, msamvia, msanyanzale, ndobilobe

in Zaire: amambalabala

Synsepalum pobeguianum (Pierre ex Lecomte) Aké Assi & L. Gaut. (*Pachystela pobeguianiana* Pierre ex Lecomte)

West Africa.

See *Bull. Mus. Natl. Hist. Nat.* 1919, xxv. 191. 1919, *Candollea* 55(2): 282. 2000

(Leaves used against hookworm. Bark decoction drunk to treat swellings. Root decoction antimalarial and aphrodisiac. Sap from the roots and bark drunk to treat coughs, colds, and stomachache. Latex from the fruit applied as a galactagogue; fruit pulp for jaundice and nausea.)

Synsepalum stipulatum (Radlk.) Engl. (*Pouteria stipulata* (Radlk.) Baehni; *Stironeurum stipulatum* Radlk.)

Nigeria, Central African Republic, Gabon, Congo. Small tree, latex, red pink fruit, sweetish fruit pulp edible, leaves and fruit eaten by gorillas

See *Annales du musée du Congo. Série 1, Botanique*, sér. 2 1(1): 31. 1899 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 8: 33. 1904, *Candollea* 9: 278. 1942

(A water infusion from the bark applied as eardrops to treat earache and a bark decoction drunk as a galactagogue.)

in English: blacksmiths' charcoal wood

in Central African Republic: mokengendje, mokengenge, mokengenje, mokinjinji, mosima

in Congo: iphilonga, maphilonga, tonga

in Nigeria: azimomo, ogeromo, udalaeuwe

Syringa L. Oleaceae

Greek *syrix* 'a pipe, tube', referring to the stems; see *Species Plantarum* 1: 9. 1753, *Characteres Essentiales Familiarum* 115. 1847 and G. Semerano, *Le origini della cultura europea*.

Dizionari Etimologici. Basi semitiche delle lingue indeuropee. Dizionario della lingua Greca. 2(1): 281. 1994, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 625. 1996.

Syringa emodi Wall. ex Royle (*Syringa emodi* Wall.; *Syringa emodi* Wall. ex G. Don; *Syringa emodi* Wall. & G. Don; *Syringa villosa* subsp. *emodi* (Wall. ex Royle) A.E. Murray; *Syringa villosa* Vahl subsp. *emodi* (Royle) A.E. Murray; *Syringa villosa* var. *emodi* (Wall. ex Royle) Rehder; *Syringa vulgaris* L. var. *emodi* (Wall. ex Royle) Jaub.)

India, Himalaya.

See *Numer. List* [Wallich] n. 2831. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 267. 1835, *Gen. Hist.* iv. 51. 1837 and *Cyclopedia of American Horticulture* 1762. 1902, *Kalmia* 13: 31. 1983

(Bitter seeds astringent. Leaves for catarrh, rheumatic pains, colic, stomachache.)

in India: ban phunt, lolti

Syringa reticulata (Blume) H. Hara subsp. ***amurensis*** (Ruprecht) P.S. Green & M.C. Chang (*Ligustrina amurensis* Ruprecht; *Ligustrina amurensis* var. *mandshurica* Maximowicz; *Syringa amurensis* Ruprecht; *Syringa reticulata* var. *amurensis* (Ruprecht) Pringle; *Syringa reticulata* var. *mandshurica* (Maximowicz) H. Hara)

China.

See *Museum Botanicum* 1(20): 313. 1850[1851], *Bull. Cl. Phys.-Math. Acad. Imp. Sci. Saint-Petersbourg* 15: 371. 1857 and *Journal of Japanese Botany* 17(1): 21. 1941, *Bulletin of the National Science Museum* 31: 91. 1952, *Phytologia* 52(5): 286. 1983, *Novon* 5(4): 329. 1995

(Bark, trunks, and branches as antiphlogistic and diuretic.)

in China: bao ma ding xiang

Syzygium Gaertner Myrtaceae

Greek *syzygos* 'coupled, joined, jointed', from *syn* 'together' and *zygon*, *zygos* 'yoke'; the allusion is to the paired branches and leaves, or to the calyprate petals, see *Species Plantarum* 1: 515. 1753, *Familles des Plantes* 2: 88, 564. 1763, *De Fructibus et Seminibus Plantarum...* 1: 166–167, pl. 33, f. 1. 1788, *Flora Cochinchinensis* 304, 308. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 262, 286. 1828, *The Flora of British India* 2: 471. 1878 and *Taxon* 5: 164. 1956, *Ann. Missouri Bot. Gard.* 45(2): 165–201. 1958, *Acta Botanica Yunnanica* 4(1): 18. 1982, *Fl. Lesser Antilles* 5: 463–532. 1989, *Brenesia* 31: 53–73. 1989, *Blumea* 55(1): 96–98. 2010.

Syzygium alternifolium (Wight) Walp. (*Eugenia alternifolia* Wight)

India to Assam.

See *Icon. Pl. Ind. Orient.* 2: t. 537. 1842, *Repert. Bot. Syst.* 2: 179. 1843 and *Phytomedicine* 8(2): 88–93. 2001

(Antihyperglycemic activity of seed.)

in India: manchi mogi, manchi movi, manchi-moyadi, mogi, movi chettu, moyi chettu

Syzygium aqueum (Burm.f.) Alston (*Cerocarpus aqueus* (Burm.f.) Hassk.; *Eugenia alba* Roxb.; *Eugenia aquea* Burm.f.; *Eugenia callophylla* Reinw. ex de Vriese; *Eugenia callophylla* (Miq.) Reinw. ex de Vriese; *Eugenia javanica* Lam.; *Eugenia malaccensis* Lour., nom. illeg.; *Eugenia mindanaensis* C.B. Rob.; *Eugenia nodiflora* Aubl.; *Eugenia obversa* Miq.; *Eugenia stipularis* (Blume) Miq.; *Gelpkea stipularis* Blume; *Jambosa alba* (Roxb.) G. Don; *Jambosa ambigua* Blume; *Jambosa aquea* (Burm.f.) DC.; *Jambosa callophylla* Miq.; *Jambosa madagascariensis* Blume; *Jambosa obtusissima* (Blume) DC.; *Jambosa subsessilis* Miq.; *Jambosa timorensis* Blume; *Malidra aquea* (Burm.f.) Raf.; *Myrtus obtusissima* Blume; *Myrtus timorensis* Zipp. ex Span.; *Syzygium aqueum* Alston; *Syzygium obversum* (Miq.) Masam.)

Trop. Asia to N. Queensland. Tree, trunk short and crooked, wood reddish and hard, branched near the base, leaves opposite more or less aromatic when bruised, inflorescences terminal and axillary, petals yellow-white, fruit a white to red glossy berry crowned by the fleshy calyx segments, small rounded seeds, edible fruits juicy and watery

See *Philipp. J. Sci.*, C 4: 363. 1909, *Annals of the Royal Botanic Gardens. Peradeniya* 11: 204. 1929, *Enum. Phan. Born.* 535. 1942

(Leaves infusion drunk to relieve stomachache and dysentery; new young leaves chewed and swallowed to treat stomachache. Antibiotic, the bark, leaves and roots. To treat malaria and pneumonia, dry leaves boiled with vegetables or fresh leaves eaten raw.)

in English: bell fruit, water apple, water rose-apple,

in Indonesia: jambu air, jambu air mawar

in Malaysia: jambu air, jambu air mawar, jambu ayer, jambu chili

in Papua New Guinea: aruhi, laulau, nas, nokehawada

in Philippines: tambis

in Thailand: machomphu-pa

Syzygium aromaticum (L.) Merr. & L.M. Perry (*Caryophyllus aromaticus* L.; *Caryophyllus hortensis* Noronha; *Caryophyllus silvestris* Teijsm. ex Hassk.; *Eugenia aromatica* (L.) Baillon, nom. illeg.; *Eugenia caryophyllata* Thunb.; *Eugenia caryophyllus* (Spreng.) Bullock & S.G. Harrison; *Jambosa caryophylla* (Spreng.) Nied.; *Jambosa caryophyllus* (Thunb.) Nied.; *Myrtus caryophyllus* Spreng.)

Indonesia, Moluccas. Small tree, slender, evergreen, aromatic, young leaves pink, leaves opposite, simple, inflores-

cence terminal paniculate, red bisexual flowers, overlapping petals, dark red fleshy drupe, widely cultivated for cloves

See *Species Plantarum* 1: 515. 1753, *De Fructibus et Seminibus Plantarum...* 1: 166. 1788, *Nat. Pflanzenfam.* 3(7): 85. 1893 and *Memoirs of the American Academy of Arts and Science, new series* 18(3): 196. 1929, *Kew Bull.* 13: 52. 1958, *The Gardens' Bulletin Singapore* 44: 135–139. 1992, *Journal of Ethnopharmacology* 96: 295–301. 2005 [An extract of *Syzygium aromaticum* represses genes encoding hepatic gluconeogenic enzymes.]

(Used in Ayurveda, Unani and Sidha. Dried unopened flower buds associated with chewing. Fruits and leaves carminative, wound dressing, for pneumonia, cough, mouth sores, toothache. Cloves stimulant, carminative, contraceptive, antifungal, bactericide and nematocidal, antispasmodic, anthelmintic, antiseptic dressing for wounds, cough sedative, for headache, paralysis. Flower bud applied to cure toothache and rheumatism, and induce warm feeling and infertility; dry flower buds as a household item to keep in sugar pots to protect from ants, red and black. A potential role for compounds derived from clove as insulin-mimetic agents.)

in English: clove, clove tree, cloves, Zanzibar red head

in Arabic: qoronfel

in Kenya: mkarafuu

in Madagascar: girofle, jirofo, jorofo, karafofy

in Tanzania: karafuu, mkarafuu

in Burma (Myanmar): lay-hnyin

in Cambodia: khan phluu, khlam puu

in China: ding xiang, ting hsiang, ting tzu hsiang

in India: bhadrasriya, daevakusuma, devakusuma, devakusumamu, devapuspa, haricandana, ilavankam, kaaravallu, kala phur, karampu, karayampu, kiraambu, kirambu, kirampu, labanga, laung, laung-patra, lavang, lavanga, lavangaka, lavangalu, lavangam, lavangamu, lawngpar, varala

in Indonesia: cengkeh, cenkeh, tjengkeh

in Laos: do:k chan, ka:nz ph'u

in Malaysia: chengkeh, chingkeh

in Philippines: clavo de comer, klabong pako

in Sri Lanka: karabu neti, karambu

in Thailand: chan jee, kan pluu, kanphlu

in Vietnam: dinh h[uw][ow]ng

in Central America: clavo, clavo de olor

in Mexico: castilla cica queechi-quiba, guiña, guiña xtila cica guechi-guiba

Syzygium caryophyllaeum Gaertn.

India.

See *De Fructibus et Seminibus Plantarum...* 1: 166, t. 33. 1788

(Used in Ayurveda and Sidha.)

in India: jambu, kattukkaravampu, narunaruvili, nyara

Syzygium caryophyllatum (L.) Alston (*Eugenia corymbosa* Lam.; *Jambosa caryophyllata* (L.) Bedevian; *Myrtus caryophyllata* L.; *Syzygium corymbosum* (Lam.) DC.)

S. India, Sri Lanka.

See *Species Plantarum* 1: 472. 1753 and *A Hand-book to the Flora of Ceylon* 6: 116. 1931

(Used in Ayurveda. Antiinflammatory.)

in India: bhedsi, hrasvajambuh, jaman, jambuh, kunta naerale, lavang, lavanga, nara, naval, njara, ran-lavang

in Sri Lanka: dan, rin-dan

Syzygium chloranthum (Duthie) Merr. & L.M. Perry (*Eugenia chlorantha* Duthie)

Malesia.

See *Fl. Brit. India* 2: 487. 1878 and *Mem. Amer. Acad. Arts* 18: 173. 1939

(For itch, poultice with the roots.)

Malay name: jambu ayer

Syzygium confertum (Korth.) Merr. & L.M. Perry (*Eugenia calvinii* Elmer; *Eugenia densipunctata* Koord. & Valetton; *Jambosa conferta* Korth.; *Jambosa cuspidata* (Blume) Blume ex Miq.; *Jambosa trifida* (Blume) Miq.; *Microjambosa conferta* (Korth.) Blume; *Microjambosa cuspidata* Blume; *Microjambosa trifida* Blume; *Syzygium calvinii* (Elmer) Masam.)

Indonesia, Philippines. Tree

See *Nederlandsch Kruidkundig Archief. Verslangen en Mededelingen der Nederlandsche Botanische Vereeniging* 1: 202. 1847, *Museum Botanicum* 1: 118–119. 1850, *Fl. Ned. Ind.* 1(1): 435. 1855, *Bull. Inst. Bot. Buitenzorg* 2: 6. 1899 and *Leaflet Philipp. Bot.* 4: 1419. 1912, *Mem. Amer. Acad. Arts* 18: 177. 1939, *Enum. Phan. Born.*: 525. 1942

(Young leaves decoction drunk to treat stomachache and diarrhea.)

in Indonesia: kayu besuk

Syzygium cordatum Hochst. ex Krauss (*Eugenia cordata* (Hochst. ex Krauss) Lawson, nom. illeg.; *Eugenia cordata* (Hochst.) Laws.; *Jambosa cymifera* E. Mey.; *Syzygium cymiferum* E. Mey. ex Presl)

Uganda to S. Africa. Shrub or tree, multi-branched, waxy simple leaves, flowers in dense panicles, corolla pink-white creamy, sweet juicy fleshy fruits purple-black eaten raw, fruits eaten by birds and monkeys, goat fodder, bee forage, ripe fruits eaten by birds, fast growing, good species

for water conservation, montane woodlands, on river bank, tall grassland, secondary forest, on swamp forest border, on savanna edge, stream bank

See *Flora* 27: 425. 1844, *Fl. Trop. (Stem bark and leaves decoction astringent, analgesic, convulsant and respiration stimulant, drunk to treat gonorrhoea, asthenia and dysentery, also to expel intestinal worms. Sap and roots as fish poison.)

in La Réunion Isl.: bois de lait

Tabernaemontana psorocarpa (Pierre ex Stapf) Pichon (*Gabunia psorocarpa* Pierre ex Stapf)

Tropical Africa, Liberia to Gabon. Liana, white latex, sweetly fragrant white flowers

See *Fl. Trop. Afr.* 4(1): 137. 1902, *Notulae Systematicae*. *Herbier du Museum de Paris* 13: 253. 1948

(Latex used to treat skin infections. Leaves with strong anti-moebic activity.)

Tabernaemontana recurva Roxb. (*Ervatamia recurva* (Roxb. ex Lindl.) Lace; *Testudipes recurva* (Roxb.) Markgr.; *Tabernaemontana recurva* Sagot ex Miers; *Tabernaemontana recurva* Roxb. ex Lindl.; *Tabernaemontana recurva* Hohen. ex Hook. f.)

India.

See *Hortus Bengalensis*, or a catalogue ... 20. 1814, *Botanical Register*; consisting of coloured ... 13: t. 1084. 1827, *On the Apocynaceae of South America* 80. 1878, *The Flora of British India* 3(9): 646. 1882 and *List Trees Shrubs Cl. Burma* 91. 1913, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12(115): 547. 1935

(Paste of leaves and bark applied as a poultice for the treatment of black patches on the cheeks.)

in India: kaktadogor

Tabernaemontana retusa (Lam.) Palacký (*Conopharyngia retusa* (Lam.) G. Don; *Conopharyngia ventricosa* (Hochst. ex A. DC.) Stapf; *Pandaca retusa* (Lam.) Markgr.; *Plumeria retusa* Lam.; *Plumeria retusa* Bout. ex A. DC., nom. inval.; *Tabernaemontana noronhiana* Bojer ex A. DC.; *Tabernaemontana retusa* (Lam.) Pichon)

Madagascar.

See *Encyclopédie Méthodique, Botanique* 2: 542. 1788, *Hortus Maurit.* 210. 1837, *A General History of the Dichlamydeous Plants* 4: 95. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 370–371, 392. 1844 and *Catalogus Plantarum Madagascariensium* 3: 30. 1907, *Notulae Systematicae*. *Herbier du Museum de Paris* 13: 243. 1948, *Adansonia* n.s., 10(1): 32. 1970

(Leaves applied as an emollient and against lung conditions.)

Tabernaemontana rostrata Wall. (*Ervatamia calyculata* Markgr.; *Ervatamia curtisii* King & Gamble; *Ervatamia cylindrocarpa* King & Gamble; *Ervatamia evrardii* (Pit.) Pichon; *Ervatamia garciniifolia* (Pierre ex Pit.) Kerr; *Ervatamia pitardii* (Gagnep.) Kerr; *Ervatamia rostrata* (Roxb. ex Wallich) Markgr.; *Ervatamia rostrata* (Wall.) Markgr.; *Tabernaemontana crispa* auct. non Roxb.; *Tabernaemontana cylindrocarpa* (King & Gamble) Merr.; *Tabernaemontana evrardii* Pit.; *Tabernaemontana garciniifolia* Pierre ex Pit.; *Tabernaemontana micrantha* Voigt; *Tabernaemontana nicobarica* Liebm.; *Tabernaemontana parviflora* Roxb.; *Tabernaemontana pitardii* Gagnep.; *Tabernaemontana rostrata* Roxb. ex Wallich)

Bangladesh, Andaman, Philippines. Shrub

See *Hort. Malab.* 1: t. 46. 1678, *Hortus Bengalensis*, or a catalogue ... 20. 1814, *Fl. Ind.* 1: 20. 1820, *Edwards's Bot. Reg.* 15: t. 1273. 1829, *Fl. Ind.* ed. 1832, 2: 25. 1832, *Hort. Suburb. (Bark as arrow poison. Fish poison.)

in Brazil: pau de colher

Tabernaemontana sphaerocarpa Blume (*Ervatamia sphaerocarpa* (Blume) Burkil; *Pagiantha fagraeoides* (Miq.) Markgr.; *Pagiantha sphaerocarpa* (Blume) Markgr.; *Tabernaemontana fagraeoides* Miq.; *Tabernaemontana javanica* Miq.)

Indonesia. Tree

See *Bijdragen tot de flora van Nederlandsch Indie* 1028. 1827 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 546. 1935, *Bulletin of Miscellaneous Information Kew* 1935: 317. 1935

(All parts of the plant are considered poisonous. Bark decoction febrifuge, rubbed on the skin against fever. Latex for skin diseases. Chopped roots as arrow poison.)

in Indonesia: cempirit, gembirit, hamperu badak

Tabernaemontana stapfiana Britten (*Conopharyngia bequaertii* De Wild.; *Conopharyngia johnstonii* Stapf; *Conopharyngia stapfiana* (Britten) Stapf; *Sarcopharyngia stapfiana* (Britten) Boiteau; *Tabernaemontana johnstonii* (Stapf) Pichon)

Trop. Africa, Zimbabwe and Mozambique, Uganda. Tree, spreading crown, white latex, inflorescence a rather lax corymb, white scented flowers, subglobose indehiscent follicles pendulous green speckled yellow-green, bee plant, in forest, disturbed forest margin

See *Transactions of the Linnean Society of London, Botany* 4: 25. 1894 and *Fl. Trop. Afr.* 4(1): 147. 1902, *Pl. Bequaert.* 1: 397. 1922, *Notul. Syst.* (Paris) 13: 251. 1948, *Journal of Pharmaceutical Sciences* 67(2): 249–251. 1978, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* 1981: 233. 1981, *Journal of Ethnopharmacology* 40: 167–180. 1993, *African Study Monographs* 20(1): 1–72. 1999, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Latex applied to wounds. Leaves decoction abortifacient, for agalactia, lactation disorders, colic. Roots and stem barks decoction taken for pneumonia, chest pain, problems in delivery; bark, seeds and roots against high blood pressure. Rituals, magic.)

in English: soccerball fruit, wild magnolia

in Burundi: umudwedwe

in Kenya: mabondet

in Tanzania: ikede, mbelebele, mwambe

Tabernaemontana stenosphon Stapf (*Conopharyngia stenosphon* (Stapf) Stapf)

São Tomé.

See *Bulletin of Miscellaneous Information Kew* 1: 23. 1895 and *Flora of Tropical Africa* 4(1): 147. 1902

(Latex emetic, purgative. Root decoction tonic and febrifuge.)

Tabernaemontana undulata Vahl (*Anacampta albescens* (Rusby) Markgr.; *Anartia meyeri* (G. Don) Miers; *Anartia meyeri* Miers; *Bonafousia obliqua* Miers; *Bonafousia perrottetii* (A. DC.) (For wounds, skin irritations, snakebites.)

Tabernaemontana ventricosa Hochst. ex A. DC. (*Conopharyngia rutshuruensis* De Wild.; *Conopharyngia usambarensis* (K. Schum. ex Engl.) Stapf; *Conopharyngia ventricosa* (Hochst. ex A. DC.) Stapf; *Domkeocarpa pendula* Markgr.; *Sarcopharyngia ventricosa* (Hochst. ex A. DC.) Boiteau; *Tabernaemontana usambarensis* K. Schum. ex Engl.)

Trop. Africa, Congo. Shrub or small tree, low branching, spreading crown, copious sticky milky sap, dark green leaves, white sweet-smelling salver-shaped flowers, dark green smooth dehiscent follicles with fleshy orange pulp, usually two fruits joined at the base, leaves browsed by game, monkeys and birds eat the fruit, young growth with red waxy exudate, riverine forests

See *A General History of the Dichlamydeous Plants* 4: 70, 94–95. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 366. 1844, *Abh. Königl. Preuss. Akad. Wiss., Phys.-Math. Cl.* 1894: 36. 1895 and *Fl. Trop. Afr.* 4(1): 148. 1902, De Wildeman, Émile August(e) Joseph (1866–1947), *Plantae Bequaertianae. Études sur les récoltes botaniques du Dr. J. Bequaert ... au Congo belge, etc.* 1: 399. 1922, *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 421. 1941, *Adansonia* n.s., 16: 272. 1976, *Taxon* 27: 375–392. 1978, *Taxon* 28: 636–637. 1979, *Genetica* 68: 3–35. 1985, *Journal of Natural Products* 49(4): 733–735. 1986, *South African Journal of Botany* 69(3): 301–363. 2002

(Seeds, bark and roots for nervous problems and high blood pressure. Bark antibacterial, antifungal, antimalarial, febrifuge. Latex to treat wounds and sore eyes.)

in English: fever tree, forest toad tree, nomfi tree, small-fruited toad tree, swollen-on-one-side tabernaemontana

in Southern Africa: bospaddaboom, inKamamasana, iNomfi-yehlathi, koorsboom, ruChene, uKhamamasane, umCiki-manzi, umKhahlu, uNomfi (= bird-lime)

in Tanzania: mranga, mwambe ziwa

Tabernanthe Baillon Apocynaceae

Latin *taberna* 'hut, stall' or the genus *Tabernaemontana* plus Greek *anthos* 'flower', see *Bull. Mens. Soc. Linn. Paris* i. (1889) 783. 1889, *Naturl. Pflanzenfam.* [Engl. & Prantl] iv. 2 (1895) 146. 1895.

Tabernanthe iboga Baill. (*Iboga vateriana* Braun-Blanq. & K. Schum.; *Tabernanthe albiflora* Stapf; *Tabernanthe bocca* Stapf; *Tabernanthe mannii* Stapf; *Tabernanthe pubescens* Pichon; *Tabernanthe subsessilis* Stapf; *Tabernanthe tenuiflora* Stapf)

Trop. Africa. Tree or shrub, white latex, yellowish root, leaves broadly ovate, flowers rather variable in colour, hypocrateriform corollas with twisted lobes, calyx deeply divided into five parts, elongated fruit beaked, gorillas eat leaves

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 783. 1889, *Icon. pl.* xxiv. (1894) t. 2337. 1894, *Bull. Misc. Inform. Kew* 1898: 305. 1898 and *Fl. Trop. Afr.* 4(1): 122–123. 1902, *Bull. Mus. Natl. Hist. Nat.*, II, 25: 637. 1954, *Genetica* 68: 3–35. 1985, *Natural Product Letters* 16(1): 71–76. 2002, *Eur. J. Pharmacol.* 552(1–3): 11–14. 2006 [Ibogaine affects brain energy metabolism.], Kontrimavičiūtė Violeta et al. "Distribution of Ibogaine and Noribogaine in a man following a poisoning involving root bark of the *Tabernanthe iboga* shrub." *Journal of Analytical Toxicology* 30(7): 434–440. 2006, *Bioorg. Med. Chem.* 15(11): 3919–3925. 2007

(Root bark a powerful stimulant and aphrodisiac, antimalarial and antileishmanial. Roots and stem bark hallucinogenic, aphrodisiac, febrifuge, psychodysleptic, stimulant, narcotic, tonic, for neurasthenia, fevers. The alkaloid ibogaine showed activity against the gram-positive *Bacillus subtilis*. Magic, ritual, used in initiation rites.)

Native names: bana, bocca, boga, diboga, dibuga, dibugi, dibuyi, éboga, ébogé, gifuma, iboga, kuta mbasoke, lébogo, lébuga, liboka, libuga, mbasoka, moabi

Tacazzea Decne. Asclepiadaceae (Apocynaceae, Periplocaceae)

An Ethiopian river, Takazze, between Semien and Tigre; see *Prodr.* (DC.) 8: 492. 1844 and J.B. Gillett, "W.G. Schimper's botanical collecting localities in Ethiopia." *Kew Bulletin* 27(1): 127. 1972.

Tacazzea apiculata Oliv. (*Periploca apiculata* (Oliv.) Roberty; *Tacazzea apiculata* var. *benedicta* Scott-Elliott;

(Toxic, acrid, caustic, poisonous tubers of this plant yield edible starch if prepared correctly. Tuber used as an aphrodisiac; watery paste of tubers applied on boils; warmed tuber slices applied over abdominal region after delivery. Rootstock bitter, antipyretic, rubefacient, anthelmintic, vermifuge, astringent in diarrhea and dysentery. Root decoction applied externally for headache and sores, also given in leprosy. Stem roasted and the sap squeezed out and used in the form of ear drops as a remedy for earache; stem bark powder made into a paste given orally to treat asthma and cough. Flowers rubbed on snakebite. Veterinary medicine, tuber paste applied inside mouth for ulcers, or tubers rubbed inside the mouth.)

in English: African arrow lily, arrowroot, East Indian arrowroot, Polynesian arrowroot, South Sea arrowroot, Tahiti arrowroot

in Spanish: anicillo, tuna anís

in Mexico: anisillo, curucumín, flor de Santa María, Santa María, hierba anís, pericón, periquillo, manzanilla

Tagetes lucida Cav. (*Tagetes anethina* Sessé & Moc.; *Tagetes florida* Sweet; *Tagetes gillettii* De Wild.; *Tagetes lucida* fo. *florida* (Sweet) Voss; *Tagetes pineda* La Llave; *Tagetes schiedeana* Less.; *Tagetes seleri* Rydb.)

Mexico.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 3(2): 33, t. 264. 1794[1795–1796]

(Entire plant for diarrhea, malaria, spitting blood, potion taken internally. Leaves and stems infusion sedative.)

in English: sweet mace, sweet marigold, sweet-scented marigold, sweet-scented Mexican marigold

in Mexico: pericón, yauhtli (= niebla, nube = cloud), guie laga zaa, quie laga zaa, yerbanis

Tagetes micrantha Cav. (*Tagetes fragrantissima* Sessé & Moc.)

Mexico.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 3(2): 31, t. 352. 1794[1795–1796]

(Febrifuge, decoction used as a wash, leaves plus flax seeds. Leaves decoction taken internally for stomach pain.)

Tagetes minuta L. (*Tagetes bonariensis* Pers.; *Tagetes glandulifera* Schrank; *Tagetes glandulosa* Link; *Tagetes glandulosa* Schrank ex Link; *Tagetes porophyllum* Vell.)

Brazil, Peru, Argentina. Annual, weedy, strongly aromatic

See *Species Plantarum* 2: 887. 1753, *Syn. Pl. (Persoon)* 2(2): 459. 1807, *Enum. Hort. Berol. Alt.* 2: 339. 1822, *Fl. Flumin. Icon.* 8: t. 116. 1831 [1827 publ. 29 Oct 1831]

(Used for treatment of ringworm infections; oil from flowers and leaves exhibited antifungal activity. Vermifuge, stimulant, diaphoretic, hysteria remedy, blood purifier, menstrual stimulant, purgative, stomachic, entire plant decoction taken internally. Mild laxative, gastritis, indigestion, flower extract taken internally, also applied in the treatment of ulcers.)

in English: khaki bush, khaki weed, master-John-Henry, Mexican marigold, muster-John-Henry, stinking Roger, stinkweed, tall khaki weed

in Peru: huacatai, huacatay, huatacay

in East Africa: ang'we, anyach, bhangi, mubangi, muvangi, nyanjaga, nyanjagra, omotioku, omubazi gwemhazi

in Lesotho: lechuchutha, monkthane

in Southern Africa: Africander bossie, kakiebos, klein-afrikander, langkakiebos, stinkbos, stinkkhakibos, Transvaalsekakiebos; jeremane (Sotho); mbanje (Ndebele); mbanje (Shona)

in Hawaii: 'okole'oi'oi

in India: janglijafar

Tagetes multiflora Kunth (*Tagetes andina* M. Ferraro; *Tagetes erythrocephala* Rusby; *Tagetes multiflora* var. *rup-estris* Wedd.)

Ecuador, Peru. Consumed by livestock

See *Nova Genera et Species Plantarum* (folio ed.) 4: 154. 1820[1818], *Chloris Andina* 1(3): 72. 1855[1856] and *Bulletin of the New York Botanical Garden* 8(28): 133. 1912, *Boletín de la Sociedad Argentina de Botánica* 6(1): 37. 1955

(Leaves infusion against bladder diseases, for colic and stomachache.)

in Chile: soiko

in Ecuador: chil-chil negro

Tagetes terniflora Kunth (*Tagetes cabreræ* M. Ferraro; *Tagetes gigantea* Carrière; *Tagetes graveolens* L'Hér.)

Ecuador.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 154. 1820[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 644. 1836, *Revue Horticole* 58: 107. 1886 and *Boletín de la Sociedad Argentina de Botánica* 6(1): 38, f. 2. 1955

(Infusion for colic and stomachache.)

in Ecuador: chil-chil blanco

Tagetes zypaquinensis Bonpl. (*Tagetes pectinata* Turcz.; *Tagetes zypaquirensis* Bonpl.)

Mexico, Ecuador.

See *Plantae Aequinoctiales* 2: 18, t. 73. 1809 [1808–1809], *Bulletin de la Société Impériale des Naturalistes de Moscou* 24: 71. 1851

(Leaves infusion, a wash, sedative.)

in Ecuador: inga-rosa amarilla

Talinum Adans. Portulacaceae (Talinaceae)

Derivation of the name is obscure, perhaps from the Greek *thaleia* ‘full of bloom, blooming, luxuriant’, *thalia* ‘bloom’, or from *tali* a native African (Senegal) name for one species, *Erythrophleum guineense* G. Don, see *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 22. 1760, *Familles des Plantes* (Adanson) 2: 245, 609. 1763, *Genera Plantarum* 312. 1789, *Philosophische Botanik* 1: 95. 1789, *De Fructibus et Seminibus Plantarum...* 2: 219. 1791, *Species Plantarum*. Editio quarta 2(2): 862. 1799, *Medical Repository* 5: 350. 1808, *Specchio delle Scienze* 1: 86. 1814, *American monthly magazine and critical review* 2: 175. 1818, *Revisio Generum Plantarum* 1: 57. 1891 and *American Midland Naturalist* 4: 90. 1915, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 562–573. 1937, *Fieldiana, Bot.*, n.s. 13: 217–222. 1938, *Fieldiana, Bot.* 24(4): 207–214. 1946, *Fl. Ecuador* 55: 28–53. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2180–2183. 2001.

in North East Africa: athl, tarfa

in Arabic: etel

in India: aslularmar, erraisirusaru, errayerusaru, erusaru, ettashirisaru, ettaverusaru, farash, gaz-angabin, gazesurkh, gazmazaj, gazmaju, gazmazak, jhao, jhau, jhav, jhavu, jhavuka, jhavukam, khoragaz, lal-jhau, sarru, sivappattushavukku, sivappukkottashavukku, sivappusirushavukku, tarfal ahmar

in Pakistan: gaz, gaz khor

Tamarix dioica Roxb. ex Roth (*Tamarix dioica* Roxb.)

India. Large shrub

See *Hort. Bengal*. 22. 1814, *Novae Plantarum Species* 185. 1821

(Used in Ayurveda, Unani and Sidha. Twigs and galls astringent, in spermatorrhea, leucorrhoea, diarrhoea. Root antiviral, hypothermic. Leaves powder taken to cure liver disorders.)

in India: arrumari, arruppucevakam, attumari, jau, jhao, jhao ki lakriyan, jhau, jhaubon, jhav, jhavu, jhavuka, jhavukam, jhsu, lal-jhau, laljhou, palivela, palligi, penpa, picula, pisula

Tamarix ericoides Rottl.

India. Shrubs, pink flowers shortly pedicelled, capsules 3-valved

(Used in Ayurveda. Plants used in fever. Bark infusion a mild laxative. Few leaves cooked with rice and given to children to relieve cough. Root paste applied to skin diseases and fever. Veterinary medicine, tender twigs crushed and the extract given for respiratory diseases of cattle, and infectious bursal disease, IBD, Gumboro, of chickens.)

in India: arseli, atechavuku, dzane, fersah, gajri, jahu, javuro, jhau, jhavuka, khad sherni, manna, pabba, pabbasa, pempa, poboso, saru, tharthari

Tamarix gallica L. (*Tamarix gallica* Thunb.; *Tamarix pentandra* Pall.)

India.

See *Species Plantarum* 1: 270–271. 1753, *Fl. Jap.* (Thunberg) 126. 1784, *Fl. Ross.* (Pallas) 1(2): 72. 1789 [dt. 1788, issued Jan-Jun 1789] and *Canadian Journal of Botany* 55: 1891–1907. 1977, *Acta Bot. Croat.* 69(2): 229–235. 2010

(Used in Ayurveda, Unani and Sidha. Leaves decoction for skin diseases. Bark decoction for skin diseases. Galls astringent, for dysentery. Root-nodule decoction given in diarrhea and sprue.)

in India: atru-sha-vaku, atru-shavakku-maram, badimayi, bari-main, ciru cavukku, darakhte-gaz, eri-saru-manu, erracirusaru, erraerusaru, errashirisaru, errayerusaru, eru-saru, erusarumanu, gaz-angabin, gazmazaj, gazmaju, gazmazak, jhao, jhav, jhavu, jhavuka, jhavukam, kota-shavukku, kotta-shavukku-marm, laljhau, macika, manna, mayeen kalan, mayinklan, mena, pakki, palligi, pallivi, prakke, prans, samaratul-asl, samaratut-tarfa, shavak, shavaka, shiri-saru, shiri-saru-manu, shiru-shavukku-maram, shirisaru, shirushavakku, shor-gaz, sirasaru

Tamarix indica Willd.

Pakistan.

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 214. 1803

(Used in Ayurveda and Sidha. Shoots and leaves to help heal skin wounds and traumatic injuries of humans and domestic animals.)

in India: erraisirusaru, errayerusaru, erusaru, jhao, jhav, jhavu, jhavuka, jhavukam, kattu chavukku, pakke, pakki, palivi, palligi, prakke, shiri-saru, shiri-saru-manu, shiru-shavukku-maram, shirisaru, shirushavakku, sirasaru

in Pakistan: gaz

Tamarix stricta Boiss.

Iran.

See *Diagn. Pl. Orient.* ser. 2, 2: 57. 1856 [Nov–Dec 1856]

(Green portions of the plant to strengthen muscle. Veterinary medicine, the bark tonic, to treat weakness and pain of limb joints in animals, cows, camels, goats.)

in Pakistan: gaz

Tamarix troupii Hole

India.

See *Indian Forester* 45: 248. 1919

(Used in Ayurveda, Unani and Sidha. Fruits, leaves and bark used in skin diseases; galls for dysentery.)

in India: apalam, aphala, arralari, arruccavukku, arrumaruntu, attalari, attarali, attuchavakku, bahugranthika,

civapparruccavukku, civappucirucavukku, civappukkota-iccavukku, erusaru, ettasirusaru, ettayerusaru, gaz, gaz-angabin, gazmazaj, gazmaju, gazmazak, gazshakar, irattakancinai, jaheva, jhabuka, jhao, jhav, jhavu, jhavuka, jhavukam, luni jhaun, pakke, pakkepakki, palligi, paluvi, patravasa, peyvarali, peyvaralicceti, pichula, shavaka, shorgaz, sirasaru, sirusavukku, sivappattuchavukku, sivappukkodaichavukku, tarfa, turfah

Tamilnadia Tirveng. & Sastre Rubiaceae

From Tamil Nadu State, India, see *Mauritius Institute Bulletin* 8(4): 84. 1979.

Tamilnadia uliginosa (Retz.) Tirveng. & Sastre (*Catunaregam uliginosa* (Retz.) Sivar.; *Gardenia pomifera* Wall., nom. nud.; *Gardenia uliginosa* Retz.; *Posoqueria uliginosa* (Retz.) Roxb.; *Posoqueria uliginosa* Roxb.; *Posoqueria uliginosa* (Willd.) Roxb.; *Randia uliginosa* Poir.; *Randia uliginosa* (Retz.) Poir.; *Solena uliginosa* D. Dietr.; *Solena uliginosa* (Retz.) D. Dietr.; *Xeromphis uliginosa* (Retz.) Maheshwari)

India, Sri Lanka. Unripe fruits cooked as a vegetable

See *Observ. Bot.* (Retzius) 2: 14. 1781, *Encycl.*, (Lamarck) Suppl. 2: 829. 1812, *Fl. Ind.* ed. Carey & Wall. 2: 563. 1824, *Prod.* (DC.) 4: 386. 1830, *Fl. Ind.*, ed. Carey, i. 712. 1832, *Synopsis Plantarum* (D. Dietrich) 1: 799. 1839, *Numer. List* [Wallich] n. 8296. 1847 and *Bulletin of the Botanical Society of the University of Saugar* 10: 39. 1958 [publ. 1961], *Bull. Bot. Surv. Ind.* 3: 92. 1962, *Mauritius Inst. Bull.* 8(4): 84–85. 1979, *Fl. Calicut*: 132. 1982

(Small piece of fresh root chewed in mouth ulcer. Ripe fruits used for dysentery; immature fruits applied for bleeding piles; unripe fruits given to small children with milk for cough; fresh fruits pounded with buttermilk given orally to women for total sterility. Boiled extract of root bark as a wash for wound and sores. For diphtheria, seeds ground with stem bark of *Wrightia tomentosa* and water given to human beings and cattle. Leaf decoction in bronchitis. Stem bark or crushed unripe fruits as fish poison. Veterinary medicine, for diphtheria.)

in India: bhidhara, gangad, gegadi, kare maram, katul, periya goddu kaarai, pindalu, pindar, pindara, pinder, pinditak, pindra, pindru, pindu, rada, telko, thelko

Tanacetum L. Asteraceae

Greek *athanasia* ‘immortality’, the Medieval Latin *tana-zita*; see Carl Linnaeus, *Species Plantarum*. 2: 843–845. 1753, *Genera Plantarum*. Ed. 5. 366. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 128. 1837 and *Anales del Instituto Botánico A. J. Cavanilles* 12(2): 324–325. 1953, *Anales del Instituto Botánico A. J. Cavanilles* 32: 181. 1975, *Fieldiana: Botany*, New Series 7: 1–21. 1981, Fuller, T.C., McClintock, E. *Poisonous Plants of California*.

Univ. California Press. 1986, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 628–629. 1996, *Opera Botanica* 137: 1–42. 1999.

Tanacetum cinerariifolium (Trevis.) Sch. Bip. (*Chrysanthemum cinerariifolium* (Trevisan) Visiani; *Pyrethrum cinerariifolium* Trevisan)

China.

See *Species Plantarum* 2: 843–845, 887. 1753, *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae* 237. 1775, *Index Seminum* (Bratislava) 2: 2. 1820, *Ueber die Tanacetee*n 58. 1844, *Flora Dalmatica* 2: 88. 1847

(Capitula used as an insecticide.)

in China: chu chong ju

Tanacetum dolichophyllum (Kitam.) Kitam. (*Chrysanthemum dolichophyllum* Kitam.; *Hippolytia dolichophylla* (Kitam.) K. Bremer & Humphries)

India, Nepal. Erect aromatic perennial herb, yellow flower heads in dense terminal cluster

See *Acta Phytotaxonomica et Geobotanica* 23: 73. 1968, *Enumeration of the Flowering Plants of Nepal* 3: 45. 1982, *Bulletin of the Natural History Museum, London (Botany)* 23(2): 106. 1993

(Roots and whole plant for colic, dysentery, gastroenteritis, against intestinal worms, also used as insect repellent.)

in India: gugga, guggal, seigmanlo

Tanacetum gracile Hook. f. & Thomson (*Ajania gracilis* (Hook. f. & Thomson) Poljakov; *Chrysanthemum gracile* (Hook. f. & Thomson) B. Fedtsch.; *Chrysanthemum gracile* (Hook. f. & Thomson) H. Ohashi & Yonekura)

Tibet, India. Hairy perennial grey herb, aromatic yellow flower-heads in cluster

See *The Flora of British India* 3: 318. 1881 and *Flora URSS* 26: 407. 1961, *Journal of Japanese Botany* 79(3): 189. 2004

(Leaves and flowers decoction given in small doses in fevers, against intestinal worms in children. Veterinary medicine, plant extract along with milk given for foot-and-mouth disease.)

in India: kamchu, khamchu, thorchokma

Tanacetum longifolium Wall. ex DC. (*Tanacetum longifolium* Wall.; *Tanacetum longifolium* Thunb.)

India, Himalayas. Erect, pubescent, unbranched, aromatic herbs, woody rootstock, bright yellow heads in close woolly corymbs, narrowly obovoid achenes with 5 strong ribs

See *Prodr. Pl. Cap.* 147. 1800, *Numer. List* [Wallich] n. 3231. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 130. 1838 [1837 publ. early Jan 1838]

(Aromatic, stimulant, antiinflammatory, disinfectant, antiseptic, germicide, vermifuge, anthelmintic, useful in gout, rheumatism. Leaves and flowers for jaundice, also used as incense. Oil as a liniment for rheumatism, bruises, chronic ulcers and wounds, drunk as a vermifuge, but toxic in large doses.)

in India: guggal dhoop, guggul

Tanacetum vulgare L. (*Chrysanthemum tanacetum* Visiani; *Chrysanthemum vulgare* (L.) Bernhardt, nom. illeg.; *Chrysanthemum vulgare* var. *boreale* (Fischer ex DC.) Makino; *Chrysanthemum vulgare* var. *boreale* (Fisch. ex DC.) Makino ex Makino & Nemoto; *Pyrethrum vulgare* (L.) Boissier; *Tanacetum boreale* Fischer ex DC.; *Tanacetum crispum* Steudel; *Tanacetum umbellatum* Gilib.; *Tanacetum vulgare* subsp. *boreale* (Fisch. ex DC.) Á. Löve & D. Löve; *Tanacetum vulgare* var. *boreale* (Fischer ex DC.) Trautvetter & C.A. Meyer)

China, Europe. Perennial herb, short stout rootstock, alternate fern-like leaves with saw-toothed margins, yellow strong-scented flowers in flat-topped clusters at the tops of the plant

See *Species Plantarum* 2: 843–845, 887. 1753, *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae Physicum* 237. Mannheim, 1775, Gilibert, Jean Emmanuel (1741–1814), *Caroli Linnæi ... Systema plantarum Europae*. Coloniae-Allobrogum: sumptibus Piestre & Delamolliere, 1785–1787 [t. I. Nomenclator linnæanus. Gilibert.], *Systematisches Verzeichniss* 144. 1800, *Nomenclator Botanicus* 825. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 128. 1837, *Fl. Dalm.* 2: 84. 1847, Middendorff, Alexander Theodor von (1815–1894), *Reise in den äussersten Norden und Osten Sibiriens während der Jahre 1843 und 1844: mit Allerhöchster Genehmigung auf Veranstaltung der Kaiserlichen Akademie der Wissenschaften zu St. Petersburg ausgeführt und in Verbindung mit vielen Gelehrten/herausgegeben von A. Th. v. Middendorff*. Erster Band. St. Petersburg, 1847–1856 [Lfg. 3. Trautvetter, E.R. und Meyer, C.A., *Florula Ochotensis Phaenogama* 54. 1856], *Flora Orientalis* 3: 352. 1875 and *Fl. Jap.* 43. 1925, *Biologicheskii Zhurnal Armenii* 28: 87–89. 1975, *Botaniska Notiser* 128(4): 521. 1975 [1976], *Taxon* 28: 400–401. 1979, *Taxon* 30: 515–516. 1980, *Fragmenta Floristica et Geobotanica* 27: 581–590. 1981, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Izvestiia Akademii Nauk Belorusskoi SSR: Seriya Biologicheskikh Nauk* 2: 7–12. 1983, *Botaniceskij Zhurnal SSSR* 68(5): 660–664. 1983, *Le Naturaliste Canadien* 111: 447–449. 1984, *Sida* 12: 409–417. 1987, *Botaničeskij Zhurnal* (Moscow & Leningrad) 75: 116–118, 1622–1624. 1990, *Botaničeskij Zhurnal* (Moscow & Leningrad) 76: 473–476, 769–771. 1991, *Watsonia* 19: 134–137. 1992, *Regnum Veg.* 127: 92. 1993, *Biologia* 48: 441–445. 1993, *Chromosome Science* 1: 77–82. 1997

(Low toxicity, all parts of the plant have a strong scent and contain a bitter essential oil that can be toxic or moderately toxic, all animals may be affected. Plant used for fevers, rheumatism, bruises, chronic ulcers. Whole plant used as an insecticide. Crushed leaves used to poultice burns, for stomach cramps, it settles the stomach; a decoction of leaves and flowering tops used as tonic, stimulant. Flowers bitter tasting.)

Common names: common tansy, ponso, tanse, tansy

in China: ju hao

in India: peilmundi

Tanaecium Sw. Bignoniaceae

Probably from the Greek *tanaekes* 'with long point, tall', referring to the appearance of the plants, see *Prodr.* (Swartz) 91–92. 1788, Meissner, C. F. (Carl Friedrich) (1800–1874), *Plantarum vascularium genera, secundum ordines ...* Lipsiae, 1836–1843, *Feldiana, Bot.*, n.s. 41: 77–161. 2000.

Tanaecium jaroba Sw. (*Tanaecium albiflorum* A. DC., nom. illeg.; *Tanaecium exsertum* Griseb.; *Tanaecium praelongum* Miers)

South America.

See *Prodr.* (Swartz) 92. 1788, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 9: 245. 1845, *Ann. Mag. Nat. Hist.*, ser. 3. 8(44): 117. 1861, *Fl. Brit. W.I.* [Grisebach] 450. 1862 and *Journal of Ethnopharmacology* 69(2): 127–137. 2000

(Antimalarial.)

Tanaecium nocturnum (Barb. Rodr.) Bureau & K. Schum. (*Osmhydrophora nocturna* Barb. Rodr.; *Tanaecium nocturnum* Bureau & K. Schum.)

Brazil. Leaves pungent

See *Nova Genera et Species Plantarum seu Prodromus* 6, 91. 1788, *Flora Brasiliensis* (Martius) 8(2): 185. 1896 and *Economic Botany* 31: 129–139. 1977

(Narcotic stuff, toxic, aphrodisiac. A tea from the leaves, mixed with leaves of a Leguminosae, a remedy for diarrhea; leaves decoction rubbed onto the skin for itching.)

in Brazil: koribó, pum-ap, samedu-ap

Tapinanthus (Blume) Reichb. Loranthaceae

Greek *tapeinos* 'low, humble, depressed' and *anthos* 'a flower', possibly referring to the size of the flowers, see *Flora Javae* 15. 1830, *Der Deutsche Botaniker Herbarienbuch* (1): 73. 1841

Tapinanthus bangwensis (Engl. & K. Krause) Danser (*Loranthus bangwensis* Engl. & K. Krause; *Loranthus*

riggenbachii Engl. & Krause; *Loranthus talbotiorum* Sprague; *Loranthus thonningii* Schumach. & Thonn., non DC.; *Loranthus winkleri* Engl.; *Phragmanthera talbotiorum* (Sprague) Balle; *Tapinanthus globifer* (A. Rich.) Tiegh. subsp. *bangwensis* (Engl. & K. Krause) Balle; *Tapinanthus globiferus* (A. Rich.) Tiegh. subsp. *bangwensis* (Engl. & K. Krause) Balle; *Tapinanthus thonningii* Danser)

Tropical Africa. Parasite, stems rust-tan pubescent, lenticellate twigs reddish, waxy leaves papery-coriaceous, inflorescences axillary, flowers from top to base, style green, fruits grey-blue glaucous tinged red, in forest, in savanna

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Beskrivelse af Guineiske planter* 179–180. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 199–200. 1828, *Der Deutsche Botaniker Herbarienbuch* [1]: 73. 1841, *Bulletin de la Société Botanique de France* 42: 261, 267. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 407. 1909, *Flora of Tropical Africa* 6(1): 1–26. 1910, *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 29 (6): 108. 1933, *Kew Bulletin* 1956: 168. 1956, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Enumération des Plantes à Fleurs d'Afrique Tropicale* 2: 1–257. 1992

(Veterinary medicine. Febrifuge, the decoction of the leaves of *Guiera senegalensis*, *Piliostigma thonningii*, *Piliostigma reticulatum*, *Tapinanthus bangwensis*, *Tapinanthus dodoneifolius* (DC.) Danser (*Agelanthus dodoneifolius* (DC.) Polhill & Wiens), *Tapinanthus ophiodes* (Sprague) Danser.)

in Benin: goussourou, itchè

in Burkina Faso: a-oualba, do, goula, kobi-sa, kolo, lado, nyama, welbré, wélébré

in Ivory Coast: kokobiako, kokoyako

in Nigeria: itchè, kawshyi

in Senegal: futânbalad, tob, tonawi

in Togo: djenghessu, okarga

in West Africa: goussourou, itché, kokobiak

Tapinanthus ophiodes (Sprague) Danser (*Loranthus ophiodes* Sprague)

Tropical Africa.

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Collection de mémoires* 6: 29, t. 9. 1830, *Bulletin de la Société Botanique de France* 42: 265. 1895 and *Bulletin de la Société Botanique de France (1911)* 58: *Mém.* 8: 202. 1912, *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. (Whole plant used in blisters and wounds, fevers, antidote, blood purifier. Crushed plant given in snakebites, for stomach and intestinal disorders; plant paste taken to get rid of altitude sickness. Latex bitter, laxative, diuretic, stomachic, tonic, for liver complaints; latex of leaves and stalks applied for the treatment of corns and warts. Flowers decoction with

sugar or honey given for the treatment of cough. Root decoction diuretic, tonic, febrifuge, blood purifier, taken for kidney and liver ailments, gastric ulcers, bowel complaints, headache, vertigo; roots infusion for diarrhea; leaves and roots diuretic; crushed roots or paste taken with water in case of urinary trouble, liver disorders and constipation. Leaves for general fatigue and weakness, an infusion a wash to treat anal rash of infants; leaves as a postpartum remedy, used as a vegetable; cooked young leaves eaten to purify blood; paste of leaves applied on dislocated joints. Veterinary medicine, powdered roots as diuretic.)

in English: common dandelion, dandelion, Irish daisy, lion's tooth

in Italian: tarassaco

in Latin America: achicoria, amargón, botón de oro, diente de león, lechuguilla, nocuana gueta, nocuana queeta, taraxaco

in South Africa: irwabe lenyoka, perdeblom, platdissel

in Bhutan: khur mong

in China: Chiang nou tsao, chin tsan tsao, pu gong ying, pu kung ying

in India: aachak, bathur, dudhalee, dudhee, dudhi, dudhia ghass, dudhli, dulai, dulal, ganiathal, han, handh, kan kaphlya, kan kaphyla, kanphool, kanphul, karhati, karhatu, sanma, yamngi

in Japan: seiyo-tanpo-po, tanpupu

in Nepal: dudal, gobesag, khumang, tuki phul

in Sanskrit: dugdhapheni

in Tibet: khur mong

in Hawaii: lauhele, laulele

Tarchonanthus L. Asteraceae

Tarchon or *tarkon* is the Arabian name for *Artemisia dracunculus*, *anthos* 'flower', in allusion to the resemblance of its flower-heads to those of that plant, see *Species Plantarum* 2: 842. 1753 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 630. 1996. According to some authors the generic name from the Greek *tarchos* 'funeral rites, a solemn funeral', *tarchyo*, *tarchuo* 'to bury solemnly'.

Tarchonanthus camphoratus L. (*Tarchonanthus abyssinicus* Sch.Bip.; *Tarchonanthus abyssinicus* Sch.Bip. ex Schweinf.; *Tarchonanthus camphoratus* Houtt. ex DC.; *Tarchonanthus camphoratus* var. *litakunensis* (DC.) Harv.; *Tarchonanthus litakunensis* DC.; *Tarchonanthus minor* Less.)

East Africa. Shrub or small tree, bushy, bark peeling, wood hard and heavy, silvery-white leaves camphor-scented, dioecious flowers, tiny seeds, in evergreen or semi-deciduous

bushland, grassland and bushed grassland, in stony soils, aromatic leaves used as a deodorant

See *Species Plantarum* 2: 842. 1753, *Syn. Gen. Compos.* 208. 1832, *Prodr.* (DC.) 5: 430–431. 1836, *Beitr. Fl. Aethiop.* 287. 1867

(Splinters poisonous, septic sores slow to heal. Smoke from the plant inhaled for asthma, headaches and rheumatism. Infusions and tinctures of the leaves and twigs used to treat stomach disorders, headaches, abdominal pains, asthma, toothache and bronchitis. Leaves analgesic, sedative, for hysteria, anxiety states.)

in English: African fleabane, camphor bush, camphor bush tree, camphor bush wood, camphor tree, camphor wood, leleshwa bush, sagewood, wild camphor bush, wild cotton, wild sage

in East Africa: mkalambati, mururicua, ol-leleshwa

in Southern Africa: siri, siriehout, wildekanferbos, kanferboom, kanferbos, kanferhout, kapokboom, wildesalie, salie, saliehout, basterolien, vaalbos, bastervaalbos, bergvaalbos, kleinvaalbos, olienvaalbos, veldvaalbos, waaibos, witbos; qoboqobo (Swati); isiDuli selindle, mathola (Xhosa); isiDuli-sehlathi, iGqeba-elimhlophe (Zulu); mofahlana (South Sotho); sefahla (North Sotho); mohatlha, mohata (Tswana: Western Transvaal, northern Cape, Botswana); moologa (Venda); omuteatupa (Herero); umgebe, umNgebe (Shona); umnqebe (Ndebele)

Tarenna Gaertner Rubiaceae

Tarana is a Sinhalese name, the type-species was collected in Sri Lanka, see *Gen. Pl.*, ed. 8[a]. 2: 794. 1791, *The Flora of British India* [J.D. Hooker] 3: 104. 1880 and *Austrobaileya* 7(1): 33, 40. 2005.

Tarenna alpestris (Wight) N.P. Balakr. (*Coffea alpestris* Wight; *Coffea grumelioides* Wight; *Ixora lucens* (Hook.f.) Kuntze; *Ixora lucens* Kuntze; *Pavetta lucens* R.Br. ex Wall., nom. nud.; *Pavetta lucens* R.Br.; *Stylocoryna alpestris* (Wight) C.B. Rob.; *Stylocoryna brevifolia* Schltld. ex Hook.f.; *Stylocoryna brevifolia* Schlecht. ex Hook.f.; *Stylocoryna lucens* (Hook.f.) Gamble; *Webera lucens* Hook.f.)

India.

See *Numer. List* [Wallich] 6168. 1832, *Icones Plantarum Indiae Orientalis* [Wight] tt. 1040, 1041. 1845, *Fl. Brit. India* [J.D. Hooker] 3: 106. 1880, *Revis. Gen. Pl.* 1: 278. 1891 and *Proceedings of the American Academy of Arts and Sciences* 45(17): 408. 1910, *Fl. Madras*: 635. 1921, *Bull. Bot. Surv. India* 22: 175. 1980 (publ. 1982)

(Leaves and flowers made into a paste consumed with honey for headache and earache; a paste of leaves, flowers and tender fruits consumed with water for general health; leaves and flowers paste consumed with *Borassus flabellifer* for nervous problems.)

in India: kalnilaptchilai, thanninilaptchilai

Tarenna asiatica (L.) Kuntze ex K. Schum. (*Canthium corymbosum* (Willd.) Pers.; *Chomelia asiatica* (L.) Kuntze; *Chomelia corymbosa* (Willd.) K. Schum.; *Chomelia kotoensis* Hayata; *Cupia corymbosa* (Willd.) DC.; *Gardenia pavetta* Roxb. ex Wight & Arn.; *Genipa pavetta* (Roxb. ex Wight & Arn.) Baill.; *Pavetta wightiana* Wall., nom. nud.; *Polyozus maderaspatana* DC.; *Rondeletia asiatica* L.; *Stylocoryna attenuata* Voigt; *Stylocoryna incerta* (Koord. & Valeton) Elmer; *Stylocoryna rigida* Wight; *Stylocoryna webera* A. Rich.; *Tarenna asiatica* (L.) Kuntze ex Alston; *Tarenna corymbosa* (Willd.) Pit.; *Tarenna gracilipes* var. *kotoensis* (Hayata) T. Yamaz.; *Tarenna gyokushinkwa* Ohwi; *Tarenna gyokushinkwa* var. *yaeyamensis* (Masam.) Hatus.; *Tarenna incerta* Koord. & Valeton; *Tarenna kotoensis* (Hayata) Masam.; *Tarenna kotoensis* var. *yaeyamensis* Masam.; *Tarenna zeylanica* Gaertn.; *Webera asiatica* (L.) Bedd.; *Webera cerifera* Moon; *Webera corymbosa* Willd.; *Webera glomeriflora* Kurz)

Trop. & Subtrop. Asia, Sri Lanka, India. Shrub or small tree, glossy coriaceous leaves, buds resinous, flowers faintly sweet-scented borne in terminal cymes, corolla white, depressed-globose black berries, persistent calyx, seeds black, sandy soil, forest

See *Sp. Pl.* 1: 172. 1753, *De Fructibus et Seminibus Plantarum...* 1: 139, pl. 28. 1788 and *Bot. Tidsskr.* 24: 332. 1902, *Meded. Lands Plantentuin* 59: 269. 1902, *Leaflet. (Ceremonial.)

in English: pond cypress

in China: chi shan

Taxodium mucronatum Ten. (*Taxodium distichum* var. *mexicanum* (Carrière) Gordon; *Taxodium distichum* var. *mucronatum* (Ten.) A. Henry; *Taxodium mexicanum* Carrière; *Taxodium montezumae* Decne.)

Mexico.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 19: 355. 1853 and *The trees of Great Britain & Ireland* 1: 175. 1906, *Fieldiana, Bot.* 24(1): 56–60. 1958, *Fl. Veracruz*. 25: 1–6. 1982, *Ceiba* 44(2): 105–268. 2003 [2005]

(A root decoction drunk to cure catarrhal conditions with fever. Gummy resin used to cure skin diseases, wounds, ulcers, gout, and toothaches. Pitch produced by burning woodchips used as a cure for bronchitis. Leaves used as a relaxant and a cure for itching; the bark used as a diuretic and an emmanagogue. May have been considered sacred by some Mexican civilizations.)

in English: Montezuma bald cypress

Taxus L. Taxaceae

The Latin name *taxus*, *i* for the yew tree (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 1040. 1753, *Genera*

Plantarum. Ed. 5. 462. 1754 and Jones, I. and E.V. Lynn. "Differences in species of *Taxus*." *J. Amer. Pharm. Assoc.* 22: 528–531. 1933, *Fieldiana, Bot.* 24(1): 60–63. 1958. The foliage, bark, and seeds, but not the fleshy red aril, of most *Taxus* species are toxic due to the presence of taxine. Taxine (taxin), is a complex mixture of alkaloids that is rapidly absorbed from the digestive tract and interferes with heart action. Ingesting leaves, bark, or seeds can cause poisoning in all animals. The bark of the tree is a natural source of taxol, a drug for treating various cancers. Taxine A and taxine B, the toxic alkaloids of *Taxus*, block cardiac sodium and calcium channels causing nausea, vomiting, abdominal pain, cardiac arrhythmias, respiratory distress, coma, seizures, and death in yew poisoning.

Taxus baccata L. (*Taxus baccata* Hooker; *Taxus baccata* Thunb., nom. illeg.; *Taxus baccata* L. var. *aurea* Carriere; *Taxus baccata* L. var. *fastigiata* (Lindl.) Loudon; *Taxus baccata* L. var. *fastigiata-aurea* Seneclauze; *Taxus baccata* L. var. *washingtonii* (R. Sm.) Beissn.)

North America, Europe. Perennial tree or shrub, small evergreen tree, male flowers in catkins subglobose solitary in the leaf axils, female flowers solitary axillary leaf-buds like, bright red succulent fruits cup-shaped

See *Species Plantarum* 2: 1040. 1753, *Flora Japonica*, ... (Thunberg) 275. 1784, *Flora Boreali-Americana* (Hooker) 2: 167. 1803 and *Watsonia* 19: 134–137, 169–171. 1993, *Clinical Toxicology* (Philadelphia, Pa.) 48(5): 463–465. 2010

(Used in Ayurveda, Unani and Sidha. Extremely toxic, death is likely. *Taxus baccata* has caused poisoning and death in cattle, horses, livestock, pets and birds, and humans. Stem and leaves abortifacient, diaphoretic, antirheumatic, anti-inflammatory, purgative, for rheumatism, malaria, epilepsy, coughs, tuberculosis, cold. Tincture from the young shoots used to control headache, giddiness, diarrhea and biliousness. Bark used in cough and cold. Pounded leaves given orally for asthma, bronchial disorders and indigestion.)

in English: English yew, Himalayan yew, Irish yew, yew

in India: barahmi, barhmi, barmi, birch, birmi, brahmi, burmie, dhengre salla, granthi parna, manduparni, neyamdal, rakhal, sala, sthaaneyaka, sthouneyaka, talees patr, taleesapatri, talica pattiri, talicapattiri, talis, talis patra bina chhana hua, talis patra chhana hua, talisam, talisapatra, talispatra, talisapatram, thaaleesapathram, thalisa pathri, thalispatra, thuna, thuneer, thuner, thuno, zirubbirmi

in Nepal: barma salla

in Tibet: ma thu-i, ma thui

Taxus baccata L. subsp. *wallichiana* (Zucc.) Pilg. (*Taxus baccata* var. *wallichiana* (Zucc.) C.K. Schneid. ex Silva Tar.; *Taxus wallichiana* Zucc.)

Himalayan forests. Tree, fluted, thin reddish bark

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3:

803, t. 5. 1843 and *Das Pflanzenreich* IV 5(Heft 18): 112. 1903, *Freiland-Nadelgeholtz* 276. 1913

(Used in Ayurveda and Unani. Liver and cardio protective, anticancer.)

in English: Himalayan yew

in India: birmi, sthaaneyaka, sthauneyaka, sthouneyaka, thuner, thuno

Taxus brevifolia Nutt. (*Taxus baccata* subsp. *brevifolia* (Nutt.) Pilg.; *Taxus baccata* var. *brevifolia* (Nutt.) Koehne; *Taxus baccata* var. *canadensis* Benth., non Gray; *Taxus boursieri* Carrière; *Taxus lindleyana* A. Murray bis)

North America, Himalaya. Evergreen tree, perennial, the fleshy fruit pulp is considered to be nontoxic or low in toxicity

See *Species Plantarum* 2: 1040. 1753, *Gen. Pl.* ed. 5, 462. 1754, *The North American Sylva* 3: 86, pl. 108. 1849, *Revue Horticole*, sér. 4, 228. 1854, *Edinburgh New Philosophical Journal* II 1: 294. 1855, *Plantas Hartwegianas imprimis Mexicanas* 338. 1857, *Deutsche Dendrologie* 6. 1893 and *Das Pflanzenreich* IV 5(Heft 18): 112. 1903, *N. Y. State J. Med.*, 79: 1576–1577. 1979, *Davidsonia* 12(4): 89–94. 1981, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 33: 85–92. 1986, *Vet. Hum. Toxicol.*, 30: 563–564. 1988, *Regnum Veg.* 127: 93. 1993, *Watsonia* 19: 134–137, 169–171. 1993

(Seeds considered poisonous. The foliage, bark, and seeds, but not the fleshy red aril, of most *Taxus* species are toxic due to the presence of taxine; this alkaloid, however, was not found in *Taxus brevifolia*. Although horses, cattle, and humans have been poisoned by ingesting yew leaves and seeds, the fresh foliage of *Taxus canadensis* is browsed by deer, and that of *Taxus brevifolia* by moose. Diaphoretic, burn dressing, stomachic, blood purifier, analgesic, antiseptic, anticancer. Branches decoction with leaves taken for lung troubles. Ceremonial, ritual.)

in English: Californian yew, common yew, Pacific yew, Western yew, yew

in India: birmi, thuner

Taxus canadensis Marshall (*Taxus baccata* L. subsp. *canadensis* (Marshall) Pilger; *Taxus baccata* var. *canadensis* (Marshall) A. Gray; *Taxus baccata* var. *minor* Michaux; *Taxus minor* (Michaux) Britton; *Taxus procumbens* Loddiges)

North America. Perennial shrub

See *Species Plantarum* 2: 1040. 1753, Humphry Marshall (1722–1801), *Arbustrum Americanum: the American grove...* 151. Philadelphia 1785, *Flora Boreali-Americana* 2: 245. 1803, *A Manual of the Botany of the Northern United States* ed. 2: 425. 1856, *Flora of the southern United States* 436. 1860, *Memoirs of the Torrey Botanical Club* 5(2): 19. 1894 and *Das Pflanzenreich* 4.5(18): 113. 1903, Bruce, E.A. "Astragalus campestris and other stock poisoning plants of British Columbia." *Agric. Can. Publ.*, 88. 1927, Thomson,

G.W., Barker, I.K. "Japanese yew (*Taxus cuspidata*) poisoning in cattle." *Can. Vet. J.*, 19: 320–321. 1978, *Taxon* 29: 535. 1980, *Phytologia Memoirs* 7: 72. 1984

(Leaves, twigs and seeds are poisonous. Only the red arils, the fleshy outer parts of the fruits, are considered non-toxic. Although horses, cattle, and humans have been poisoned by ingesting yew leaves and seeds, the fresh foliage of *Taxus canadensis* is browsed by deer. Antirheumatic, postpartum remedy, stimulant, diuretic, diaphoretic, analgesic, febrifuge, abortifacient, for rheumatism, scurvy, fever, colds, coughs, weakness, irregular menses, stomachaches, bowel and internal troubles, gonorrhoea.)

in North America: American yew, Canada yew, ground-hemlock, li du Canada, sapin trainard

Taxus cuspidata Siebold & Zuccarini (*Taxus baccata* Linnaeus subsp. *cuspidata* (Siebold & Zuccarini) Pilger; *Taxus baccata* subsp. *cuspidata* var. *latifolia* Pilger; *Taxus baccata* var. *latifolia* Pilg.; *Taxus baccata* var. *microcarpa* Trautvetter; *Taxus caespitosa* Nakai; *Taxus cuspidata* var. *caespitosa* (Nakai) Q.L. Wang; *Taxus cuspidata* var. *latifolia* (Pilger) Nakai; *Taxus cuspidata* var. *microcarpa* (Trautvetter) Kolesnikov; *Taxus cuspidata* var. *microcarpa* (Trautv.) S.Y. Hu, isonym)

Eurasia. Perennial tree

See *Species Plantarum* 2: 1040. 1753, *Abh. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss.* 4(3): 232, pl. 3. 1846, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Assoc.*, 170: 314–316. 1977, Thomson, G.W., Barker, I.K. "Japanese yew (*Taxus cuspidata*) poisoning in cattle." *Can. Vet. J.*, 19: 320–321. 1978, Cooper, M.R. and A.W. Johnson. *Poisonous Plants in Britain and Their Effects on Animals and Man*. London. [Minist. Agric., Fisheries & Food Ref. Book 161.] 1984, Ogden, L. "*Taxus* (yews)—a highly toxic plant." *Vet. Hum. Toxicol.*, 30: 563–564. 1988, Veatch, J.K., Reid, F.M., Kennedy, G.A. "Differentiating yew poisoning from other toxicoses." *Vet. Med.*, 83: 298–300. 1988, *Clavis Pl. Chinae Bor.-Or.*, ed. 2 73. 1995, *Acta Botanica Yunnanica* 20(3): 329–333. 1998, *Acta Phytophysiological Sinica* 26(3): 263–266. 2000

(Extremely toxic, death is likely. Two Eurasian species, *Taxus baccata* Linnaeus (English yew) and *Taxus cuspidata* Siebold & Zuccarini (Japanese yew), are best known and documented for toxicity; affected all animals, livestock, pets and birds. Oil from the seeds, and a compound used to treat diabetes is extracted from the wood, bark, leaves, and roots.)

in English: Japanese yew

in China: dong bei hong dou shan

Taxus floridana Nuttall ex Chapman (*Taxus baccata* L. var. *floridana* (Nuttall ex Chapman) Pilger)

North America.

See *Fl. South. U.S.* 436. 1860

(Used in asthma, cough.)

in English: Florida yew

Taxus fuana Nan Li & R.R. Mill

China.

See *Novon* 7: 263–264. 1997

(Wormicide, against malaria, bronchitis, scorpion sting.)

in China: mi ye hong dou shan

Taxus wallichiana Zucc. (*Taxus baccata* L. subsp. *wallichiana* (Zucc.) Pilg.; *Taxus chinensis* (Pilg.) Rehder var. *yunnanensis* (W.C. Cheng & L.K. Fu) L.K. Fu; *Taxus wallichiana* var. *yunnanensis* (W.C. Cheng & L.K. Fu) C.T. Kuan; *Taxus yunnanensis* W.C. Cheng & L.K. Fu)

China, Himalaya, India. Evergreen small tree, dioecious, leaves in spirals, male and female strobili solitary axillary, red fleshy aril, berries eaten, bark and leaves used for making *namkeen* tea, leaves are fed to cattle

See *Sp. Pl.* 2: 1040. 1753, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3: 803, pl. 5. 1843 and *Das Pflanzenreich* IV 5(Heft 18): 112. 1903, *Acta Hort. Berg.* 14(8): 355. 1948, *Acta Phytotaxonomica Sinica* 13(4): 86–87, pl. 52, f. 4–7. 1975, Cheng Wan-chün, Fu Li-kuo & Chu Cheng-de. *Taxaceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 437–467. 1978, *Flora Sichuanica* 2: 215. 1983, *Vascular Plants of the Hengduan Mountains* 1: 214. 1993, *Novon* 7: 263–264. 1997, *Acta Bot. Yunnan.* 20(3): 329–333. 1998

(Fruit used as sedative and antiseptic. Young shoots for the treatment of headache, giddiness, cold, asthma, cough, diarrhea, biliousness, scorpion sting. Leaves for the treatment of hysteria, epilepsy and nervous breakdown; leaves infusion against fever, asthma, bronchitis, cough, epilepsy, diarrhea, cold, also to keep body warm. Bark to keep body warm; stem bark infusion drunk for cold. A compound recently isolated from the leaves and bark may prove promising as an antitumor agent, to cure uterine and breast cancers. Ceremonial, needles as incense in *hawan*.)

in English: Himalayan yew

in China: xu mi hong dou shan

in India: barmi, birmi, brahmi talish, gallu, manduparni, rakhal, talispatar, talispatra, thalispatra, thun, thuner, thuno, thyunor, van-chiapati, yamdhal

Teclea Delile Rutaceae

After St. Takla Hemanout, a legendary protagonist of the history of Coptic Church; he was a son of an Ethiopian Orthodox priest, the Coptic Church recognize him as a saint.

Teclea simplicifolia (Engl.) I. Verd. (*Toddalia simplicifolia* Engl.; *Vepris simplicifolia* (Engl.) Mziray)

East Africa. Shrub, small evergreen tree, many-branched, dark grey smooth bark, tapering leaves simple dark green above, very small greenish yellow scented flowers, corolla and filaments dull yellow, anthers yellow-brown, fruit orange or red, in dry forest, riverine thickets, wooded grassland, sometimes included in *Vepris* Comm. ex A. Juss.

See *Mémoires du Muséum d'Histoire Naturelle* 12: 509. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 90. 1843, *Die Pflanzenwelt Ost-Afrikas* C: 228. 1895 and *Bulletin of Miscellaneous Information Kew* 1926: 410. 1926, *Acta Universitatis Upsaliensis: Symbolae Botanicae Upsaliensis* 30(1): 75. 1992

(A leaf or bark decoction used against pleurisy. A bark decoction used in the treatment of malaria and hepatitis. Root claimed to be poisonous.)

in East Africa: kuriot (Kipsigis), munderendu (Kikuyu), olgelai (Maasai)

Tecoma Juss. Bignoniaceae

The name *Tecoma* origins from the Mexican name *teco-maxochitl*, which is given by the local people to all those plants with flowers tubular, or trumpet-like or ship-like, etc., see *Genera Plantarum* [Jussieu] 139. 1789, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 3: 144. 1818, *J. Bot.* 1: 19. 1863 and *Bot. Not.* 132: 475–482. 1979, *Kurtziana* 26: 179–189. 1998.

in N. Rhodesia: kapasa

Tecomanthe Baillon Bignoniaceae

The generic name *Tecoma* and *anthos* 'flower', see *Histoire des Plantes* (Baillon) 10: 41. 1888 and *Bulletin du Jardin Botanique de Buitenzorg* 3(10): 204. 1928.

***Tecomanthe dendrophila* K. Schum.**

Moluccas, Malesia. Woody liana, leaves imparipinnate, pink-reddish flowers in racemes, corolla tubular, fruit a beaked cylindrical capsule

See *Genera Plantarum* 137. 1789, *Histoire des Plantes* 10: 41. 1888 and *Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 539. 1900 [1901 publ. Nov 1900]

(Bark sap for respiratory problems.)

in Papua New Guinea: babaneng, hahato

Tecomella Seemann Bignoniaceae

The diminutive of the genus *Tecoma*, see *Ann. Mag. Nat. Hist.* ser. 3, 10: 30. 1862, *The Journal of Botany*, ed. Seem., i. 18. 1863.

***Tecomella undulata* (Sm.) Seem.** (*Tecoma undulata* G. Don; *Tecomella undulata* Seem.)

India, Arabia. Deciduous or nearly evergreen tree, a large shrub or small tree, deep-orange flowers in few flowered corymbose racemes, fruit slightly curved smooth capsule, seed winged, hard tough wood, very hardy and drought resistant, a soil-binding tree, a windbreak and helps in stabilizing shifting sand dunes, provides shelter for desert wildlife, high durability against termites, desert, arid and semi arid regions, on flat and undulating areas, hill slopes, in ravines

See *Ann. Mag. Nat. Hist.* ser. 3, 10: 30. 1862 and *Planta Med.* 52(5): 359–362. 1986, Ahmad, F. “Preliminary screening of methanolic extracts of *Celastrus paniculatus* and *Tecomella undulata* for analgesic and antiinflammatory activities.” *J. Ethnopharmacol.* 42(3): 193–198. 1994, *Biochem. Syst. Ecol.* 28(8): 803–804. 2000

(Plant parts used for syphilis and eczema; tender branches bark chewed to cure syphilis. Stem bark mild relaxant, analgesic, antidiabetic, astringent, styptic, cooling, cardiogenic, for syphilis, urinary disorders, gynaecological troubles, enlargement of spleen, gonorrhoea, liver diseases; stem bark paste applied on scabies; bark used internally, mainly in treatment of liver- and spleen-related troubles both alone and in combination with other herbs, also useful in treatment of old wounds; bark decoction given to force abortion, also used in diarrhoea and diabetes. Flowers in leucorrhoea. Ground root bark mixed with honey and taken with milk to cure leucorrhoea. Seeds used against abscess. Used in religion and magico-religious beliefs, flowers offered to the deities.)

in English: desert teak, Marwar teak

in India: dadimpushpa, ragat rohido, rakta, roheda, rohida, rohido, rohira, rohiro, rohitaka, roila

in Pakistan: parduk

Tectaria Cavanilles Tectariaceae (Dryopteridaceae)

Latin *TECTUM*, i ‘a covering’ and the adjectival suffix *-ARIA*, referring to the indusia of some species, see *Anales de Historia Natural* 1(2): 115. 1799, *Journal für die Botanik* 1800(2): 4, 29. 1801, *Descripción de las Plantas* 249. 1802, *Synopsis Filicum* 43. 1806, *Tentamen Pteridographiae* 86–87, 150–151, pl. 2, f. 22–25. 1836, *Genera Filicum* t. 62. 1840, *Filicum Species* 99, 114. 1841, *Epimeliae Botanicae* 52–53. 1851, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 411–412. 1851, *Mémoires sur les Familles des Fougères* 5: 286, 314–315. 1852, *The Botany of the Voyage of H.M.S. ~Herald~* 229. 1857, *Gartenflora* 15: 336. 1867, *Botanisches Centralblatt* 11: 77. 1882 and *Philippine Journal of Science* 2(3): 170. 1907, *Philippine Journal of Science* 37(4): 408–410. 1928, *Acta Phytotaxonomica et Geobotanica* 5: 142. 1936, *Bulletin of the Fan Memorial Institute of Biology*: 8(5): 304, 312–313. 1938, *Notulae Systematicae*. *Herbier du Museum de Paris* 7(2): 86. 1938, *Fern Gaz.* 11(23): 141–162. 1975, *Acta Phytotax. zeylanica (Houtt.) Copel.; *Tectaria zeylanica* (Houtt.) Sledge) (*Helminthostachys* Kaulf., Ophioglossaceae, Greek *helmins*, *helminthos* ‘a worm’ and *stachys* ‘a spike, ear’, referring to the segment, to the fertile spikes and the arrangement of the sporangia; some suggested from *elyo* ‘to wind’ and *minthos* ‘human ordure’; see Georg Friedrich Kaulfuss, *Enumeratio filicum*. 28. Lipsiae 1824.)

China, Malaysia. Terrestrial fern, fleshy rhizome long creeping, dark globose spores, tender parts cooked as vegetable

See *Species Plantarum* 2: 1063. 1753, *Natural History* (Houttuyn) 2(14): 43, t. 94. 1783, *Observationes Botanicae* (Retzius) 6: 39. 1791, *Schrad. Journ.* 1800 [2]. 111. 1801, *Schrad. Neues Journ.* 1 [2]. 20. 1806, *Mém. Soc. Linn. Paris* 6(2): 195. 1827, *Gen. Fil.* [Hooker] t. 47. 1840 and *Index Filicum*, fasc. 7: 388. 1906, *Philippine Journal of Science* 37(4): 409–410, f. 52. 1928, *Kew Bulletin* 27(3): 422–423. 1972

(Fronds antiviral, antipyretic, antiinflammatory, anodyne. The gargle with fronds decoction to treat sore throat; decoction taken to treat constipation. Leaves chewed for mouth ulcer, blisters on the tongue. Tonic, febrifuge, analgesic, aperient, intoxicant, anodyne, pound the rhizome and eat it with betel; powdered mixture of rhizomes of *Helminthostachys zeylanica* and *Acorus calamus* taken to treat impotency; rhizome powder given in waist pain, spermatorrhea and for improving memory; rhizome decoction used to treat cough, whooping cough, cold, impotency, acute diarrhea and dysentery. Root of *Tectaria zeylanica* made into a paste with that of *Lygodium flexuosum* and prescribed/given in jaundice; root powder given for impotence and to make the sexual organs stronger; contact therapy, roots of *Helminthostachys zeylanica* tied to the neck for swellings of the joint, rheumatism.)

in English: flowering fern

in India: bara-meshintap, kaamraj, kamraj, meshintap

in Japan: Miyako-jima-hana-warabi (= Miyako Isl. flower bracken)

Malay names: akar tunjok langit, duri kabu, jelai

in Nepal: kamaraj

in Okinawa: nakajigusa

in the Philippines: tukod langit

Tectona L.f. Lamiaceae (Labiatae, Verbenaceae)

Greek *tekon*, *onos* ‘carpenter, worker in wood’; Portuguese *teca*, Malayalam and Tamil *tekka* or *theku*, *tekku* for *Tectona grandis* L.f., see *Familles des Plantes* (Adanson) 2: 445. 1763, *Supplementum Plantarum* 20, 151. 1782 [1781 publ. Apr 1782], *Pl. Asiat. Rar.* (Wallich). 3: 68, t. 294. 1832, *Trans. Linn. Soc. London* 17(2): 185. 1835 [1837 publ. 25 May 1835], *Gen. Pl.* [Bentham & Hooker f.] 2(2): 1152. 1876.

Tectona grandis L.f. (*Jatus grandis* (L.f.) Kuntze; *Jatus grandis* Kuntze; *Tectona grandis* (L.f.) Lam.; *Tectona grandis* fo. *canescens* Moldenke; *Tectona theka* Lour.; *Theka grandis* (L.f.) Lam.; *Theka grandis* Lam.)

India. Timber tree, deciduous, blood red juice comes out by rubbing the young leaves, flowers in large branched tomentose panicles, white corolla, used for rearing insects and producing lacs

See *Supplementum Plantarum* 151. 1782 [1781 publ. Apr 1782], *Flora Cochinchinensis* 137. 1790, *Tableau Encyclopédique et Méthodique ... Botanique* 2: 111. 1793, *Revisio Generum Plantarum* 2: 508. 1891 and *Phytologia* 31(1): 28. 1975

(Powdered wood made into a paste applied on forehead for headache and swellings, also a remedy for snakebite and scorpion sting. Leaves decoction taken for cholera; young leaves cooked and eaten as blood purifier; leaf juice applied to cure mouth sore and syphilis; leaves for stored grain pests. Oil from wood chips used for eczema and ringworm; oil from the fruits used in dressing to treat itches, skin diseases, eczema and ringworm. Flowers and seeds to promote the flow of urine; flowers tied to the ear of the side of affected eye. Roasted seeds given to women to avoid pregnancy. Bark astringent, febrifuge, for bronchitis; bark boiled with that of *Calotropis* and child bathed with the liquid. Bark of teak and root of *Cassia* spp. mixed and used against dysentery, cholera and vomiting. Veterinary medicine, stem bark extract given for debility. Magic, contact therapy, leaves kept under mattress to reduce weight.)

Telfairia Hook. Cucurbitaceae

For the Irish (b. Belfast, Co. Antrim) surgeon Charles Telfair, 1778–1833 (d. Mauritius, Port Louis), a keen amateur naturalist, botanist, plant collector, 1810 to Mauritius, he was appointed Superintendent of Pamlemousses Gardens, he was the first

President of the Société d'Histoire Naturelle de l'Ile Maurice (founded in 1829; later became the Royal Society of Arts and Sciences of Mauritius), owner of Bois Chéri, Bel Ombre, Beau Manguier and Bon Espoir, his writings include *Some account of the state of slavery in Mauritius*, since the British occupation in 1810. Mauritius 1830, *An account of the conquest of the Island of Bourbon* [by an Officer of the Expedition.] London 1811 and "Rodrigues in 1809." *Revue Retrospective de l'Ile Maurice*. 6: 311–312. 1955, husband of Annabella Telfair née Chamberlain (d. 1832, Port Louis, Mauritius). See W.J. Hooker, *Botanical Magazine* 54: t. 2751–2752. 1827, *Mém. Soc. Hist. Nat. Paris* 3: 318. 1827, *Botanical Miscellany* 1(3): 291. 1830, Nathaniel Wallich, *Plantae Asiaticae rariores*. 2: 78–79. London 1832, and Jules Desjardins, *Notice historique sur Charles Telfair, Esq.*, Fondateur et Président de la Société d'Histoire Naturelle de l'Ile Maurice. Port Louis, Ile Maurice 1836 and Ernest Nelmes and William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827–1927*. 15–16. [1931], Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 675. 1994, *Journal of Food Composition and Analysis* 11(4): 292–297. 1998.

Telfairia occidentalis Hook.f.

West and Central Africa, Guinea, Sierra Leone. Perennial, dioecious herb, climbing, coiled often branched tendrils, leaves arranged spirally, female flowers solitary in leaf axils, male inflorescence an axillary raceme, fruit a drooping ellipsoid ribbed berry, fruit pulp yellow, eaten as a vegetable, fodder for livestock

See *Flora of Tropical Africa* [Oliver et al.] 2: 524. 1871 and *Medicinal Plants* 38: 339–343. 1980, *Economic Botany* 37(2): 145–147. 1983, *New Phytologist* 93: 591–597. 1983, *Feddes Repertorium* 98: 505–508. 1987, *Economic Botany* 44(1): 29–39. 1990, *Food Chemistry* 45(3): 175–178. 1992, *Food Chemistry* 70(2): 235–240. 2000

(Toxicity of extract of roots and leaves. Root very poisonous, rodenticide, used in ordeal poisons. Leaf juice blood purifier, postpartum remedy, tonic; leaves laxative.)

in English: fluted gourd, fluted pumpkin

in Nigeria: ugu-ala, ugu-elu

in Tropical Africa: krobonko

in Yoruba: ila iroko

Telotoxicum Moldenke Menispermaceae

Latin *toxicum* for a poison in which arrows were dipped, *toxicon* for a kind of laudanum (Plinius); Greek *toxōn* 'bow', *toxikos* 'for the bow, belonging to the bow, to archery' (*toxikon pharmakon* 'poison for smearing arrows with', Aristoteles, *Mirabilia*; *toxikon*, orig. a poison in which the arrows were dipped, hence a poison), see *Brittonia* 3: 42, 49. 1938, *Phytologia* 33(5): 323–341. 1976, *Phytologia* 50(2): 80–111. 1982.

Telotoxicum glaziovii Moldenke

South America, Brazil.

See *Brittonia* 3: 47. 1938, *J. Nat. Prod.* 66(1):115–118. 2003

(Telazolone and teladiazolone, oxoaporphines.)

Telotoxicum peruvianum Moldenke

South America, Colombia. Small tree

See *Brittonia* 3: 45. 1938, *J. Nat. Prod.* 66(1):115–118. 2003

(An ingredient of curare. Crushed leaves applied to ulcers, wounds and infections. Telazolone and teladiazolone, oxoaporphines.)

Telosma Coville Asclepiadaceae (Apocynaceae)

From the Greek *tele* ‘far, distant’ and *osme* ‘smell, odour, perfume’, see *Flora Brasiliensis* 6(4): 326. 1885 and *Contributions from the United States National Herbarium* 9: 384–385. 1905, *Bulletin of Miscellaneous Information Kew* 1907: 325. 1907, *Taxon* 26: 557–565. 1977, *Proc. Indian Sci. Congr. Assoc.* (III, C) 67: 57. 1980, *Taxon* 30: 696. 1981.

Europe. Annual or biennial herb

See *Species Plantarum* 2: 866–872, 924–925. 1753, *Species Plantarum*, Editio Secunda 1242–1243. 1763, *Chloris Melvillianiana* 39: 21, 51. 1823, *Flora Boreali-Americana* 1: 334. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 363. 1837 [1838], *Der Deutsche Botaniker* 87. 1841, *Flora Saxonica* 146. 1842, *Flora Rossica* 2: 648. 1845, *Beiträge zur Pflanzenkunde des Russischen Reiches* 44. 1845, *Annales de la Société Linnéenne de Lyon*, sér. 2, 16: 404. 1868 and *Repertorium Specierum Novarum Regni Vegetabilis* 48:

264. 1940, *Rhodora* 47(560): 256. 1945, *Bulletin of the Torrey Botanical Club* 81(1): 33. 1954, *Folia Geobotanica et Phytotaxonomica* 9(3): 272. 1974, *Botaničeskij Žurnal* (Moscow & Leningrad) 61(7): 963–969. 1976, *Sida* 12: 409–417. 1987

(Used for tapeworm, nausea, stomach and intestinal disorders. *Senecio congestus* considered poisonous, plant and roots.)

in English: marsh fleabane

Tephrosia Pers. Fabaceae (Millettieae)

Greek *tephros*, *tephra* ‘ashen, ash-coloured’, referring to the leaves of many species, to the gray pubescence on the leaves; see *Synopsis Plantarum* (Persoon) 2(2): 328–330. 1807 and *Rhodora* 51: 193–231, 233–302, 305–364, 369–384. 1949, *Feddes Rep.* 73: 184–215. 1966, *Webbia* 26: 267–364. 1972, William W. Megeeney, *A Bahian Heritage*. University of North Carolina at Chapel Hill 1978, *Ann. Missouri Bot. Gard.* 67(3): 523–818. 1980[1981], *Proc. 3rd All Indian Congr. Cytol. Genet.* 3: 493–499. 1981, Maria Helena Farelli, *Plantas que curam e cortam feitiços*. Rio de Janeiro 1988, *Fl. Lesser Antilles* (Dicotyledoneae—Part 1) 4: 334–538. 1988, *Cuscatlania* 1(2): 1–16. 1989, Pierre Fatumbi Verger, *Ewé: The Use of Plants in Yoruba Society*. São Paulo 1995, Celia Blanco, *Santeria Yoruba*. Caracas 1995.

Tephrosia angustissima Shuttlew. ex Chapman (*Tephrosia angustissima* Engl.; *Tephrosia angustissima* Chapm.; *Tephrosia purpurea* sensu auct.)

North America. Perennial non-climbing shrub, subshrub

See *Fl. South. U.S.* 96. 1860, *Bot. Jahrb. Syst.* 10(1–2): 29. 1888

(Poisonous.)

in English: narrowleaf hoarypea

Tephrosia angustissima Shuttlew. ex Chapman var. *angustissima* (*Cracca angustissima* (Shuttlew. ex Chapm.) Kuntze; *Cracca angustissima* Kuntze; *Tephrosia purpurea* sensu auct.; *Tephrosia purpurea* var. *angustissima* (Shuttlew. ex Chapm.) B.L. Rob.)

North America. Perennial non-climbing shrub, subshrub

See *Fl. South. U.S.* 96. 1860, *Bot. Jahrb. Syst.* 10(1–2): 29. 1888, *Revisio Generum Plantarum* 1: 174. 1891, *Botanical Gazette* 28(3): 201. 1899

(Poisonous.)

in English: narrowleaf hoarypea

Tephrosia apollinea (Delile) DC. (*Cracca apollinea* (Delile) Lyons; *Galega apollinea* Delile; *Tephrosia apollinea* Link; *Tephrosia apollinea* Guill. & Perr.; *Tephrosia apollinea* Klotzsch)

Pakistan, India, Sudan. Perennial non-climbing shrub

See *Species Plantarum* 2: 714. 1753, *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 288, t. 33. 1814, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 252. 1822, *Naturwissenschaftliche Reise nach Mossambique ...* 47. 1861 and *Annals of the Missouri Botanical Garden* 81: 792–799. 1994

(Root bark to relieve constipation in children; fresh aerial parts tonic.)

in Pakistan: mairo, matke nok

Tephrosia candida DC. (*Cracca candida* (Roxb.) Kuntze; *Cracca candida* (DC.) Kuntze; *Cracca candida* Kuntze; *Kiesera candida* (DC.) Reinw.; *Kiesera sericea* Blume, nom. nud.; *Kiesera sericea* Reinw.; *Robinia candida* Roxb.; *Robinia candida* (DC.) Roxb.; *Robinia sericea* C. Presl; *Robinia sericea* Sieber ex C. Presl, nom. inval.; *Xiphocarpus candidus* Endl.; *Xiphocarpus candidus* (DC.) Hassk.; *Xiphocarpus candidus* (Roxb.) Endl. ex Hassk.; *Xiphocarpus martinicensis* C. Presl)

SE Asia, India. Perennial non-climbing tree, herb, shrub or small tree, erect, straggling, imparipinnate leaves spirally arranged, inflorescence a pseudoraceme, white silky flowers eaten as vegetable, pod linear silky

See *Hort. Bengal.* 56. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 249. 1825, *Sylloge Plantarum Novarum* 2: 11. 1828, *Symbolae botanicae ...* 1: 13–14, t. 7. 1830, *Flora Indica*; or, descriptions of Indian Plants 3: 327. 1832, *Cat. Pl. Hort. Bogor.* 271. 1844, *Revisio Generum Plantarum* 1: 173. 1891 and *Economic Botany* 24(2): 134–136. 1970, *Phytochemistry* 25(4): 961–962. 1986, *J. Agric. Food Chem.* 40(7): 1208–1210. 1992

(Used in Ayurveda. Toxins. Bark, roots, pods, seeds used as fish poison; seeds insecticidal. Powdered leaves and stems used as insecticide, insect antifeeding.)

in English: white hoary pea, white tephrosia

in Congo: mbaha

in China: bai hui mao dou

in India: ban tor, bangali dadigdiga, bangara, bilakshani, bilokhoni, bilookhoni, boga medaloo, boga medalo, boga-medeloo, bol mendu, bolmendu, dieng toh, ghirdi, kaashi agasthe, koggi gida, kolinji, kulthi, lashita, lashtia, masethi, samander, samendu, sarapunkha

in Indonesia: enceng-enceng, kapeping badah, poko tom

in Papua New Guinea: pis pea

Tephrosia cephalantha Baker var. *decumbens* Baker (*Tephrosia cephalantha* Welw. ex Baker var. *decumbens* Welw. ex Baker)

Namibia, Angola. Perennial non-climbing herb, erect, dark stipules

See *Flora of Tropical Africa* 2: 119. 1871, *Revisio Generum Plantarum* 1: 174. 1891 and *Boletim da Sociedade Broteriana* 2, 41: 219–393. 1968, *Bothalia* 17: 7–15. 1987

(Roots infusion drunk for treating colds.)

in Namibia: gaieku, geiku

Tephrosia falciformis S.V. Ramaswamy

India. Perennial non-climbing shrub

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 12: 125. 1916

(Dried herb as a tonic, diuretic, in bronchitis, boils, bleeding piles, liver and kidney disorders. Root decoction in dyspepsia, rheumatism, asthma and urinary disorders.)

in India: rati biyani

Tephrosia hamiltonii J.R. Drummond

India. Undershrub, pink-rose flowers, hairy pods

See *Flora of the Presidency of Madras* 320. 1918

(Blood purifier, useful in bronchitis and liver, spleen and kidney troubles.)

in India: unhali

Tephrosia hookeriana Wight & Arn. (*Tephrosia hookeriana* Baker, nom. illeg.)

India.

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 212. 1834, *The Flora of British India* 2(4): 113. 1876 and *Taxon* 28: 276–277. 1979

(Fish poison.)

Tephrosia kraussiana Meisn. (*Cracca kraussiana* (Meisn.) Kuntze; *Cracca kraussiana* Kuntze)

South Africa. Perennial non-climbing shrub

See *Syn. Pl.* 2: 328. 1807, *London Journal of Botany* 2: 87. 1843, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853(1–2): 8. 1854, *Revisio Generum Plantarum* 1: 175. 1891

(Roots for chest complaints, chronic coughing.)

in South Africa: inTsangwana (Zulu)

Tephrosia leiocarpa A. Gray (*Cracca affinis* (S. Watson) Rose; *Cracca calva* Rydb.; *Cracca leiocarpa* (A. Gray) Kuntze; *Cracca leiocarpa* Kuntze; *Tephrosia affinis* Domin, nom. illeg.; *Tephrosia affinis* S. Watson; *Tephrosia viridis* M.E. Jones)

Mexico. Perennial non-climbing shrub

See *Smithsonian Contributions to Knowledge* 5(6): 36. 1853, *Proceedings of the American Academy of Arts and Sciences* 21: 424. 1886, *Revisio Generum Plantarum* 1: 175. 1891 and *Contr. W. Bot.* 12: 7. 1908, *Contributions from the United*

States National Herbarium 12(7): 269. 1909, *North American Flora* 24(3): 161. 1923, *Bibliotheca Botanica* 89: 200. 1926

(Large root piscicide; crushed roots as a poultice to kill lice on animals and humans.)

in Mexico: nawé, nawéke

Tephrosia linearis (Willd.) Pers. (*Galega linearis* Willd.; *Tephrosia discolor* E. Mey.; *Tephrosia linearis* subsp. *discolor* (E. Mey.) J.B. Gillett; *Tephrosia linearis* var. *discolor* (E. Mey.) Brummitt; *Tephrosia rutenbergiana* Vatke; *Tephrosia seminuda* Baker; *Tephrosia seminuda* Bojer ex Baker)

Tropical Africa. Perennial non-climbing herb

See *Species Plantarum*. Editio quarta 2(2): 1249. 1799, *Synopsis Plantarum* 2(2): 330. 1807, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 7: 246. 1881, *Journal of Botany, British and Foreign* 20: 68. 1882, *Revisio Generum Plantarum* 1: 175. 1891

(A decoction prepared from a mixture of aerial parts of the plant and those of *Parinari curatellifolia*, *Syzygium cordatum* and *Desmodium adscendens* drunk to cure palpitations.)

in Madagascar: felatsifotra, mandombafero, sitiky, vetsinakoho

in Tanzania: kamilikamno

in Yoruba: weje

Tephrosia lupinifolia DC. (*Cracca lupinifolia* (DC.) Kuntze; *Cracca lupinifolia* Kuntze; *Lupinophyllum lupinifolium* (DC.) Hutch.)

Africa tropical. Annual non-climbing herb, woody rootstock, trailing, vine, prostrate, calyx reddish-green, standard and wings red-purple

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 255. 1825, *Revisio Generum Plantarum* 1: 175. 1891 and *Gen. Fl. Pl.* 2: 626. 1967

(Toxins. Roots hot decoction drunk to treat cough; roots infusion febrifuge. Root bark abortifacient, also used for committing suicide.)

in Namibia: djoa'numa, tschoa'numa

in Zambia: kansamba, wuwa

Tephrosia macropoda (E. Mey.) Harv. (*Apodynomene macropoda* E. Mey.; *Tephrosia diffusa* (E. Mey.) Harv.; *Tephrosia spathacea* sensu H.M.L. Forbes)

South Africa. Perennial non-climbing herb

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 213. 1834, *Commentariorum de Plantis Africae Australioris* 111–112. 1836, *Flora Capensis* 2: 210. 1862 and *Bothalia* 4: 953–1006. 1948, *Bothalia* 17: 12. 1987

(Root for febrile complaints, sores, skin diseases; roots and leaves vermin killer.)

in South Africa: iLozane, uQuengu (Zulu)

Tephrosia nicaraguensis Oerst. (*Cracca nicaraguensis* (Oerst.) Kuntze; *Cracca nicaraguensis* Kuntze; *Cracca talpa* (S. Watson) Rose; *Cracca talpa* Rose; *Tephrosia talpa* S. Watson)

Mexico, Nicaragua. Perennial non-climbing shrub

See *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853(1–2): 6–7. 1854, *Proceedings of the American Academy of Arts and Sciences* 22: 405. 1887, *Revisio Generum Plantarum* 1: 175. 1891 and *Cuscatlania* 1(2): 1–16. 1989

(Roots piscicide.)

Tephrosia noctiflora Baker (*Cracca noctiflora* (Bojer ex Baker) Kuntze; *Cracca noctiflora* (Baker) Kuntze; *Cracca noctiflora* Kuntze; *Tephrosia coronillifolia* sensu auct.; *Tephrosia hirta* Bojer; *Tephrosia hookeriana* sensu auct.; *Tephrosia hookeriana* Wight & Arnott var. *amoena* Prain; *Tephrosia noctiflora* Bojer ex Baker; *Tephrosia noctiflora* Bojer; *Tephrosia subamoena* Prain)

Tropical Africa. Perennial non-climbing shrub, herb, sparsely branched, densely pubescent, leaves imparipinnately compound, standard green-purple, wings white-purple, keel purple, inflorescence a pseudoraceme, flowers in clusters, pod rusty hairy, seed reniform, often confused with *Tephrosia purpurea* (L.) Persoon

See *Hortus Maurit.* 93. 1837, *Flora of Tropical Africa* 2: 112. 1871, *Revisio Generum Plantarum* 1: 175. 1891, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 87. 1897 and *Taxon* 28: 276–277. 1979

(Toxins. Fish poison.)

in China: chang xu hui mao dou

in Indonesia: nila hutan, tom gatal, tom sapi

in Malaysia: kacang bulu, kolo thakarai, petai balong kecil

in Tanzania: katupa kadodo, mkangu, mpasua

Tephrosia oxygona Baker (*Cracca oxygera* Kuntze; *Cracca oxygona* (Welw. ex Baker) Kuntze; *Cracca oxygona* Kuntze; *Tephrosia oxygona* Welw. ex Baker)

Namibia. Perennial non-climbing shrub, herb, leaves and petioles hairy

See *Flora of Tropical Africa* [Oliver et al.] 2: 114. 1871, *Revisio Generum Plantarum* 1: 175. 1891

(Roots hot decoction drunk to treat cough.)

in Namibia: ang-ang

Tephrosia phaeosperma Benth. (*Cracca phaeosperma* (F. Muell. ex Benth.) Kuntze; *Cracca phaeosperma* (Benth.) Kuntze; *Cracca phaeosperma* Kuntze; *Tephrosia phaeosperma* Benth.; *Tephrosia phaeosperma* F. Muell. ex Benth.)

Australia, Queensland. Small bush, silver-grey leaves, purple flowers

See *Flora Australiensis: a description ...* 2: 208. 1864, *Revisio Generum Plantarum* 1: 175. 1891

(Roots used as a fish poison, salt water.)

in W. Australia: leini

Tephrosia pumila (Lam.) Pers. (*Cracca dichotoma* (Desv.) Kuntze; *Cracca dichotoma* Kuntze; *Galega procumbens* Buch.-Ham.; *Galega pumila* Lam.; *Tephrosia commersoni* Scott-Elliot; *Tephrosia dichotoma* Desv.; *Tephrosia hirsuta* Schumach. & Thonn.; *Tephrosia procumbens* Gamble; *Tephrosia procumbens* (Buch.-Ham.) Benth.; *Tephrosia procumbens* sensu auct.; *Tephrosia procumbens* (Buch.-Ham.) Gamble; *Tephrosia purpurea* (L.) Pers. var. *pumila* sensu Cronquist; *Tephrosia purpurea* (L.) Pers. var. *pumila* (Lam.) Baker; *Tephrosia quartiniana* Cufod. var. *inflexa* (Chiov.) Cufod.; *Tephrosia timoriensis* DC.; *Tephrosia uniflora* sensu Hepper)

Tropical Africa, India. Perennial non-climbing shrub, often as *Tephrosia purpurea*

See *Species Plantarum* 2: 752. 1753, *Species Plantarum*, ed. 3 1172. 1759, *Encyclopédie Méthodique, Botanique* 2(2): 599. 1788, *Synopsis Plantarum* 2(2): 329–330. 1807, *Hortus Bengalensis*, or a catalogue ... 57. 1814, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 252. 1822, *Transactions of the Linnean Society of London* 13: 545. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 251–252. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 213. 1834, *Smithsonian Contributions to Knowledge* 5(6): 36. 1853, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853(1–2): 8–9. 1854, *The Flora of British India* 2(4): 113. 1876, *Journal of Botany, British and Foreign* 20: 68. 1882, *Memoirs of the Torrey Botanical Club* 3(3): 18. 1893, *Botanical Gazette* 28: 201. 1899 and *Contributions from the United States National Herbarium* 12(7): 271. 1909, *Catalogue des Plantes de Yun-Nan* 155. 1916, *Journal of Botany, British and Foreign* 55: 35. 1917, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 9: 21–22. 1920, *North American Flora* 24(3): 180. 1923, *Bothalia* 4: 974. 1948, *Rhodora* 51: 193–231, 233–302, 305–364, 369–384. 1949, *Boletim da Sociedade Broteriana*, ser. 2 41: 245. 1968, *Taxon* 28: 276–277. 1979, *Ann. SE Asia, Malesia and Madagascar. Perennial non-climbing shrub, many-branched, erect or suberect, red or purple flowers, flattened pods slightly curved

See *Boletim da Sociedade Broteriana*, ser. 2 41: 245. 1968 and *Flora of the Presidency of Madras* 320. 1918, *Notulae Systematicae*. *Herbier du Museum de Paris* 14(1): 62. 1950

(Toxins. Plant used internally as a blood purifier, laxative, tonic, anthelmintic. Roots alexipharmic, for dyspepsia and chronic diarrhea; root decoction in bleeding piles; water extract of root taken in abdominal pain; root chewed and the juice swallowed to settle stomachache; pounded root taken in abdominal pain; root paste applied in rheumatism, rheumatoid arthritis. Antitussive, dried leaves smoked along with tobacco; leaf extract in jaundice. Magico-religious beliefs. Veterinary medicine, leaves of *Jasminum auriculatum* along with those of *Ocimum sanctum*, roots of *Tephrosia purpurea* pounded and the extract given orally for cough.)

in English: wild indigo

in India: ban-nil gachh, dhamasia, sar-phokha, sarabhuka, sarapunkha, sarapunkhah, sarpankhado, sarpankho, sarphamka,

sarphoka, sarphonka, sarphunkha, sarpokha, sarponkha, sarphooka, sarphuka, sarpunk, sarpunka, sayakapunkha, shara-puchhha, sharapunkha, sharpunka, sharpunkha (shar, arrow; punkha, wing, or, pinion of an arrow), yempali

Tephrosia sinapou (Buc'hoz) A. Chev. (*Cracca schiedeana* (Schltdl.) Standl.; *Cracca toxicaria* (Sw.) Kuntze; *Cracca toxicaria* Kuntze; *Galega sericea* Buch.-Ham., nom. illeg.; *Galega sericea* Lam.; *Galega sericea* Thunb., nom. illeg.; *Galega sinapou* Buc'hoz; *Galega toxicaria* Sw.; *Orobos sericeus* Sessé & Moc., nom. illeg.; *Orobos sericeus* Boiss. & Balansa; *Tephrosia emarginata* Kunth; *Tephrosia emarginata* M. Martens & Galeotti, nom. illeg.; *Tephrosia schiedeana* Schltdl.; *Tephrosia toxicaria* (Sw.) Pers.)

Central and South America, Tropics. Perennial non-climbing shrub, velvety pubescent, white petals

See *Histoire universelle du règne végétal* 10: pl. 4. 1775, *Nova Genera et Species Plantarum seu Prodrromus* 108. 1788, *Encyclopédie Méthodique, Botanique* 2(2): 596. 1788, *Prodrromus Plantarum Capensium*, ... 134. 1800, *Synopsis Plantarum* 2(2): 329. 1807, *Transactions of the Linnean Society of London* 13: 545. 1822, *Nova Genera et Species Plantarum* (quarto ed.) 6: 461–462. 1823, *Linnaea* 12: 299. 1838, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 48. 1843, *Flora Orientalis* 2: 621. 1872, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 1, app. 118. 1889, *Revisio Generum Plantarum* 1: 175. 1891 and *Contributions from the United States National Herbarium* 23(2): 474. 1922, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 180: 1522. 1925, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 107: 169. 1939

(Toxins. Leaves crushed and applied on sores; macerated leaves used for washing hair to get rid of lice. Stem and leaves crushed and used as a fish poison.)

in English: Suriname poison

in South America: barbasco, cube, cube ordinario, huasca barbasco, kkumu, kumu, kunali, motuy kube, muyuy cube, tingui de cayenne, tirana barbasco, yarro cunali, yarro-conalli, yawrukunan

Tephrosia spinosa (L.f.) Pers. (*Cracca spinosa* (L.f.) Kuntze; *Cracca spinosa* Kuntze; *Galega spinosa* L.f.)

India. Perennial non-climbing shrub

See *Supplementum Plantarum* 335. 1781, *Synopsis Plantarum* 2(2): 330. 1807, *Revisio Generum Plantarum* 1: 175. 1891

(Used in Ayurveda and Sidha.)

in India: cekkavuri, cekkavuricceti, kantapunkha, karcu-rai, karcuranceti, mukavaliver, mulkolingi, mulloyampalli, mullu kolingi, mullu kolinji, muluvempali, muluvempeli, mutka velai, mutkavelai, mutkavelai ver, sarapunkha

Tephrosia tinctoria Pers. (*Cracca tinctoria* L.; *Galega heyneana* Roxb.; *Galega tinctoria* (L.) L.; *Tephrosia*

(Used in Ayurveda and Sidha. Whole plant for nervous disorders. Pods astringent, blood purifier, stomachic, febrifuge, sedative, for rheumatism, nervous disorders, catarrh, bleeding. Powdered roasted seeds put in eyes for conjunctivitis.)

in English: blue wiss

in India: aakkimonje, adavi uddu, araniya kulattikai, ardamasha, ardamasha, ashvapuchhi, atmodbhava, bahuphala, ban-kultha, ghana, hansamasha, hayapuchhi, hayapuchhika, hayapuchika, kakamudga, kalyani, kamboji, karu minumullu, kattu uzhundu, kattulunnu, krishka, krishnavanta, krishnavrinta, kudu-udid, maasparani, maasparni, mahasaha, manasparni, mangalya, mansamasha, marjara-gandhika, masaparni, mash parni, masha-parui, mashani, mashaparni, mashaparnika, mashoni, mashparni, mashparui, masparni, mooshaparni, mudgaparni, na-vrinta, panduloma, pandulomasha, pandulomashaparnini, pandura, parnini, ran udid, ran-udid, ran-udida, saha, shaliparni, sinhamukhi, sinhapuchhi, sinhapuchhika, sinhavinna, sulabha, surpaparni, suryaparni, svayambhu, swadamasha, trashiprokta, vajramuli, valiyovelo, vishambika, wal-kollu

in Tibet: mon sran gre-u-i-dab ma, mon sran gro-u-i-dab ma

in Madagascar: teloravina, vahilandy

in Yoruba: adagbudu

Terminalia L. Combretaceae

Latin *terminus* 'end', referring to the leaves borne in whorls close to ends of the shoots, branchlets and branches; *Terminus* was also the name of the Roman god of boundaries and frontiers, and *Terminalia* was the festival (celebrated on 23rd February); see *The Civil and Natural History of Jamaica* in Three Parts 221. 1756, *Genera Plantarum* 76. 1789, Roxburgh, William (1751–1815), *Plants of the coast of Coromandel*: selected from drawings and descriptions presented to the Hon. Court of Directors of the East India Company, by William Roxburgh; published by their order under the direction of Sir Joseph Banks. London, 1795–1819, *De Fructibus et Seminibus Plantarum*... 2: 206, t. 127. 1791, *Exposition des Familles Naturelles* 178. 1805, *Nova Genera et Species Plantarum* (quarto ed.) 7: 253, pl. 656. 1825, *Flora Brasiliensis* 14(2): 81–82. 1867 and *Bull. Mus. Hist. Nat.* (Paris) 29: 108. 1923, *Annals of the Missouri Botanical Garden* 76(4): 1126. 1989.

Terminalia alata Roth (*Pentaptera tomentosa* Roxb. ex DC., nom. illeg., nom. superfl.; *Terminalia tomentosa* Wight & Arn., nom. illeg., nom. superfl.)

Nepal.

See *Nov. Pl. Sp.* 379. 1821, *Prodr.* (DC.) 3: 14. 1828, *Cat. Ind. Pl.* 63. 1833, *Prodr. Fl. Ind. Orient.* 314. 1834

(Used in Ayurveda. Bark juice applied to treat wounds, cuts, skin diseases, diarrhea; bark for anemia. Gum edible for stomach disorders. Leaves paste given in vomiting; boiling leaves vapor inhaled to relieve headache; tender leaves chewed and applied along with saliva to bleeding wounds and bandaged. Magico-religious beliefs, logs of this wood are worshipped, a very sacred tree avoided for suicide by hanging; articles associated with Gods and shrines are made of this wood and also funerary pillars; shrines made under this tree.)

in English: Indian laurel

in India: ain, aini, arjuna, asain, asan, asana, asin, asna, banappu, banapu, banavu, bhudri, dellamadoo, egin, haini, hebbulive, hebbuluve, inna maddi, inumaddi, jaranadruma, karamarudam, karee matthi, kareematthi, karimaddi, karimathi, karimatthi, karramarda, karumarudam, kempu matthi, kola sahaja, kudure kivigena, madath, maddi, madmaram, maradum-puttay, mardhi, mardu, matthi mara, matthimara, nallamaddi, nalla maddi, nelamadu, panda sajo, sadada, sadri, sadura, sahaia, sahaja, sain, saj, saja, saradru, soj, unapu mara, yen

in Nepal: darsin, sas

Terminalia argentea Mart. (*Myrobalanus argentea* Kuntze; *Terminalia biscutella* Eichler; *Terminalia modesta* Eichler;

Terminalia modesta Tul.; *Terminalia sericea* Cambess.; *Terminalia sericea* Burch. ex DC.)

South America. Shrub or small tree, see also *Terminalia sericea*

See *Nova Genera et Species Plantarum* ... 1: 43. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 13. 1828, *Annales des Sciences Naturelles, Botanique* 6: 102. 1856, *Flora Brasiliensis* 14(2): 87–88, pl. 33, f. 5, 6. 1867, *Revisio Generum Plantarum* 1: 237. 1891

(Leaves infusion to treat cough. Roots antibacterial, antimicrobial, antifungal, cytotoxic, used in bilharzia and stomach troubles. Chewed bark to cure coughing. Leaves, roots or stem bark decoction for diarrhea, stomachache, bleeding wounds, fever and hypertension.)

Terminalia arjuna Wight & Arn. (*Pentaptera arjuna* Roxb.; *Terminalia arjuna* (Roxb.) Wight & Arn.; *Terminalia arjuna* (Roxb. ex DC.) Wight & Arn.; *Terminalia berryi* Wight & Arn.; *Terminalia glabra* Wight & Arn.; *Terminalia glabra* (Roxb.) Wight & Arn.; *Terminalia glabra* R.Br. ex Benth.)

Sri Lanka, India. Large tree, smooth bark, outer bark flaking off in pieces, inner bark whitish, exuding red resin, fruit gelatinous, hard and heavy timber greyish-brown with dark streaks, very sandy soil, common along rivers, gallery forest along river and river banks

See *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 14. 1828, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 314 (477). 1834, *Fl. Austral.* 2: 501. 1864, *Fl. Sylv.* 1: 28. 1869 and *Taxon* 28: 274–275. 1979, *Taxon* 30: 513–514. 1981, *Plant Systematics and Evolution* 200: 225–232. 1996

(Used in Ayurveda, Unani and Sidha. Bark styptic, tonic, febrifuge, astringent, an ingredient, with *Nyctanthes arbor-tristis*, in a medicine for pains and heart diseases; in allergy powdered bark given with *khir*; crushed bark applied on wounds, cuts; stem bark used to stimulate sexual desire in men and women; a decoction of the bark of *Premna bengalensis*, *Mimusops elengi* and *Terminalia arjuna* applied in paralysis; bark decoction with milk given as a nourishment, tonic, astringent and cooling, to stimulate sexual desire, also in rheumatism and arthritis; dried stem bark powdered and taken with water or chewed to reduce high blood pressure; fresh bark juice given in heartburn and as blood purifier; bark pulp applied as bandage around a fractured bone. Twigs used to cure blisters or ulcers of the mouth. Contact therapy, root tied to the waist to cure fevers, malaria. Veterinary medicine, stem bark infusion disinfectant, used as an ointment for wounds; seeds of *Strychnos nux-vomica* along with stem bark of *Terminalia arjuna* and stem of *Tinospora cordifolia* pounded and the extract given orally in insect bite; stem bark of *Canthium parviflorum* along with those of *Terminalia arjuna* and *Tinospora cordifolia* pounded and the extract given in insect bite. Ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies.)

Terminalia cuneata Roth (*Pentaptera cuneata* (Roth) DC.)

India.

See *Novae Plantarum Species praesertim Indiae Orientalis* 380. 1821, *Prodr.* (DC.) 3: 15. 1828

(Root paste mixed with sugar and water, boiled, and the solution given to women having white discharge. Leaves decoction given for diarrhea; leaf juice for earache. Bark for ulcers, powdered bark for heart troubles. Roasted seeds in diarrhea and fever; seed powder with oil in skin diseases.)

in India: arjun, kahu, kalua, koha, murudhu, neermaruthu, nir maruth

Terminalia edulis Blanco (*Terminalia edulis* F. Muell., nom. illeg.)

Philippines.

See *Flora de Filipinas* [F.M. Blanco] 265. 1845, *Fragmenta Phytographiae Australiae* (Mueller) 2(16): 151. 1861 and *Fl. Australia* 18: 326, 286, nom. nov. 1990

(Fruit as an eyewash, in skin diseases, eczema, herpes.)

in Philippines: kalumpit

Terminalia elliptica Willd. (*Terminalia elliptica* Pancher ex Guillaumin)

India. Trees, bark deeply cracked, yellowish-brown flowers in panicles, dark brown fruits

See *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 969. 1806 and *Ann. Mus. Col. Marseille*, 1911, Sér. II. ix. 142. 1911

(Bark infusion in menstrual disorders.)

in India: ain, karimaruthu

Terminalia glaucescens Planch. ex Benth.

Tanzania, Central African Republic. Tree, inflorescence pale greenish white, flowers with fetid odor

See *Niger Flora* 336. 1849

(Used for burns, headache, stomachache, skin fungal infections, coughs, wounds, AIDS.)

in Tanzania: mpulu

Terminalia ivorensis A. Chev.

Tropical Africa. Tree, flowers light yellow, sweetly fragrant

See *Vég. Utiles Afrique Trop. Franç.* 5: 152. 1909, *Explor. Bot. Afrique Occ. Franc.* i. 257. 1920

(Stem bark and leaves diuretic, for piles and arthritis.)

Terminalia kaiseriana F. Hoffm.

Tanzania. Tree, bark yellow-brown to dark brown, glabrous leaves, fruits yellow-green red when mature, open woodland

See *Beitr. Kenntn. Fl. Centr.-Ost-Afr.* 26. 1889 and *Plantae Bequaertianae* 4: 344. 1928

(Poisonous. Roots and leaves antibacterial, roots antifungal and cytotoxic. Roots decoction drunk for dysentery, for fever; leaves pounded and mixed with water, drunk to stop diarrhea. Dried roots, leaves and stem bark decoction for vomiting, diarrhea and gonorrhoea. The roots together with *Combretum molle* for diabetes. Bilharzia medicine.)

in East Africa: maselenge, mpululu, msima, mzima

in Tanzania: bena, ikisya, ivate, mpululu

Terminalia kilimandscharica Engl.

East Africa. Tree, dense, rounded, stem white-grey, hard durable wood, flowers white or cream, fruit yellowish to reddish, on rocky outcrops, in dry deciduous bushland, wooded grassland

See *Die Pflanzenwelt Ost-Afrikas* C: 294. 1895

(The bark used to treat colds.)

in East Africa: biress, mbambaro, muhuku

in Tanzania: mbukwe, muruku

Terminalia laxiflora Engl. & Diels

West Africa. Treelet, strong, short trunk, bark black and grey linear strips, leaves elliptic, flowers cream, slender axillary spikes, anthers yellow, winged fruits, musky sweet fragrance, in savanna

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 4: 12, f. 2/B. 1900

(Decoction of fresh leaves febrifuge; an infusion of dried leaves for insomnia. Roots decoction used for jaundice.)

in Burkina Faso: kodayorou, koh, kondré, li-sakouali, wolo

in Central African Republic: kongodo

in Ivory Coast: koma, koma ba, won

in Nigeria: farin baushe, idi inu odan, orin idi

Terminalia littoralis Seem. (*Terminalia littoralis* Pancher ex Guillaumin)

USA, Hawaii, Fiji Islands. Spreading tree, fruits red

See *Flora Vitiensis* [Seemann] 94. 1866 and Hedrick, U.P., editor. *Sturtevant's Notes on Edible Plants. Report of the New York Agricultural Experiment Station for the Year 1919 II*. Albany, J.B Lyon Company, State Printers. 1919

(Wound and chronic ulcers.)

in Tonga: telie 'a manu

Terminalia macroptera Guill. & Perr. (*Terminalia chevalieri* Diels; *Terminalia macroptera* Mart.)

Tropical Africa. Tree, short trunk, spreading crown, black fissured bark, leaves alternate, axillary spikes, flowers whitish or greenish yellow, winged fruits glabrous, in flooded plains

See *Florae Senegambiae Tentamen* 1: 276, t. 63. 1832 and *Journal of Ethnopharmacology* 92: 233–244. 2004

(Dried leaves infusion a tonic. Decoction of leaves and roots febrifuge. For abdominal pains a decoction made from leafy twigs. Decoction of the roots added to those of *Cochlospermum planchonii* used for jaundice; decoction of the roots used for diarrhea and dysentery.)

in Burkina Faso: badamier du, bodévi, kodpoko, kôdpôko, olofira, volo-ba, volo-mouso

in Sudan: kamba, ouolo, ouolo fâ

in Togo: assinntiru

in West Africa: bodévi, bouhinkabon, cassaoulé, vuolo, wolomuso

Terminalia mollis M.A. Lawson

Tanzania. Tree or treelet, stem crooked with rough bark dark blackish, reddish brown inner bark, leaves densely pubescent, fragrant flowers greenish-cream, anthers yellow, fruits green then red with dusty white pubescence, in savanna, woodland

See *Flora of Tropical Africa* 2: 417. 1871

(Infusion stated to have caused death.)

in East Africa: mkerenge

in Nigeria: baushen giwa

in Tanzania: mgongolo, mhongolo, muhongolo, muruka, musalaka

Terminalia myriocarpa Van Heurck & Müll.Arg.

India. Trees, elliptic to oblong leaves with parallel nerves, flowers in dense axillary spikes, reddish inflorescence, red-orange winged fruits

See Van Heurck, Henri Ferdinand (1838–1909), *Observationes Botanicae et descriptiones plantarum novarum herbarii van Heurckiani*. 215. Anvers, Berlin, 1870–1871, *FBI* 2: 448. 1878, *Revisio Generum Plantarum* 1: 237. 1891 and *Phytologia* 38(5): 369–383. 1978

(Used in Ayurveda. Bark cardiac stimulant, diuretic, a paste diluted with warm water taken for chest pain, constipation and stomach disorders.)

in China: qian guo lan ren

in India: char, chorpui, dieng maraoditar, hallok, hollock, holok, jhaluka, kakubha, mezok, panisaj, rakseng, sanglak kunj, tolhao, turtung-araung

Terminalia pallida Brandis

India.

See *Indian Trees* 308. 1906

(Used in Sidha. Roots in combination with fruit kernel used to treat venereal diseases and peptic ulcer. Fruit antipyretic, purgative, to cure diarrhea, cough, cold, swellings, piles, fever, ulcers. Bark antiinflammatory. Veterinary medicine, fruits for laminitis.)

in India: aiyam, aymalikakkay, aymalikam, niraviyam, niraviyamaram, palkantitam, palkantitamaram, palkatukkay, parkatukkay, tella karaka, tella karakoi, tellakaraka, thellakaraka, thellakarakaaya, tokalayam, tokalayamaram, turukunatiyakkay, turukunatiyam, velama karaka, velama-karaka, vellai-katukkay, vellaikkadukkay, vellaikkatukkay, venkatukkay

Terminalia paniculata Roth

India.

See *Nov. Pl. Sp.* 383. 1821

(Used in Ayurveda and Sidha. Bark diuretic and cardiogenic, bark juice for earache.)

in India: asvakarnah, hanalu, holematti, honagal, honal, honalu, hulive, huluva, huluve, hunab, maruva, matti, pamarutu, pilamaruthu, pilavumarudu, pillamarda, pillamarudu, pilleimaruthu, poomarda, poomardu, poomarida, poomaridu, poomurda, pulamarada, pullamarutu, pumarda, pumardu, pumarutha, pumarutu, vellamaruth, vellamarutu, vemmarudu, vemmarutu, venmaruthu

Terminalia sambesiaca Engl. & Diels

Mozambique, Tanzania. Tree

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 4: 13, f. 4/A. 1900

(Roots and stem bark antibacterial, roots antifungal and cytotoxic, stem bark cytotoxic. Used for bloody diarrhea, gastric ulcers, appendicitis.)

Terminalia sericea Burch. ex DC. (*Terminalia argentea* Mart.; *Terminalia sericea* Cambess.)

Central Africa, Tanzania. Shrub or small tree, bole branched from base, branches ascending, stem flaking, flower spikes, fruit reddish-brown winged, flowers with very musty unpleasant odor, flowers good for bees, browsed by elephant and by kudu when accessible, in *Brachystegia* woodland

See *Nova Genera et Species Plantarum ...* 1: 43. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 13. 1828

(Leaves infusion to treat cough. Roots antibacterial, antimicrobial, antifungal, cytotoxic, used in bilharzia and stomach troubles. Chewed bark cure coughing. Leaves, roots or stem bark decoction for diarrhea, stomachache, bleeding wounds, fever and hypertension.)

in English: assegai wood, sand yellow wood, silky terminalia, silver cluster-leaf, silver terminalia, silver tree, Transvaal silver leaf, Transvaal silver tree, wild quince

in East Africa: jimya, mchuimbo, mchuyu, mnganje, mpululu, mzima, njima

in Namibia: ndjao

in N. Rhodesia: mufunji

in Southern Africa: bloubos, bosvaalbos, geelhout, geelhoutboom, sandgeelhout, sandsalie, sandvaalboom, sandvaalbos, silwerboom, vaalboom, vaalbos; mangwe (Ndebele); muHonono, chiJuju, iKonono, namasimba, muSoso, muSusu, muTabvu (Shona); umKhonono, amangwe-amhlope, aMangwe amhlope, uMangwe, amaNgwe-amhlope (Zulu); umHonono (Swazi); nkonola (Tsonga); mognonono (Western Transvaal, northern Cape, Botswana); mushosho (Mbukushu: Okavango Swamps and Western Caprivi); mokuba (Malet dialect, Botswana); mogo-nono, moxonono (North Sotho); mususu (Venda); mususu (Kalanga: Northern Botswana); mususu (Shona); omuseasetu (Herero)

in Tanzania: kaselenge, mfuru, mima, mofuru, mopuru, mpululu, mpuni, mufuru, muphuru, mupuru, namatipo

Terminalia spinosa Engl. (*Bucida correlliana* Wilbur; *Bucida spinosa* Jenn.; *Terminalia spinosa* Northr., nom. illeg., non *Terminalia spinosa* Engl.)

Tanzania, Somalia. Small tree, spreading, branches spiny, scented white flowers, winged fruits

See *Systema Naturae*, Editio Decima 2: 1025, 1368. 1759, *Die Pflanzenwelt Ost-Afrikas* C: 294. 1895 and *Memoirs of the Torrey Botanical Club* 12: 54–55, t. 13. 1902, *Annals of the Carnegie Museum* 11: 201. 1917, *Taxon* 37(2): 467. 1988

(Leaves and boiled roots used to treat hernia. Leaves antifungal, fresh leaves used for malaria. Bark decoction for jaundice, or to remove afterbirth.)

in Kenya: epetait

in Somalia: harar

in Tanzania: muangaa

Terminalia stenostachya Engl. & Diels

Malawi, Tanzania. Tree, flowers creamy white, pungent smell, winged red-pink fruits, browsed by giraffe

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 4: 16, f. 7/B. 1900, *J. Linn. Soc., Bot.* 55: 888. 1959

(Leaves antifungal, stem bark antibacterial, cytotoxic and antifungal. Roots boiled and drunk for fever, gonorrhoea, for stomachache. Used for treatment of epilepsy and poisoning.)

in Tanzania: ilamata, ivale, polulu

Terminalia superba Engler & Diels

Cameroon, Ghana. Shrub or tree, buttressed, watery sap, leaves coriaceous, flower pale yellow, green winged samara, forest, fertile soils of alluvial origin, in the rain and savanna forests, in deciduous moist forest and evergreen rain forest, in secondary forest along logging road

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* [Engler] 4: 26, t. 14B. 1899 and Gledhill, D. *West African Trees*. London, Longman. 1972, Groulez, J. and Wood, P.J. *Terminalia superba: A Monograph*. Centre Technique Forestier Tropical, Nogent-sur-Marne, France and Commonwealth Forestry Institute, Oxford, UK. 1985, Betti, J.L. "An ethnobotanical study of medicinal plants among the Baka pygmies in the Dja biosphere reserve, Cameroon." *African Study Monographs*. 25: 1–27. 2004, Fyhrquist, P. et al. "Antifungal Activity of Selected Species of *Terminalia*, *Pteleopsis* and *Combretum* (Combretaceae) collected in Tanzania." *Pharmaceutical Biology*. 42: 308–317. 2004, *Pharmazie* 61: 470–3. 2006, *J. Ethnobiol. Ethnomedicine*. 2: 7. 2006

(Fruits, bark and leaves for piles, labor, diarrhea and dysentery. Inner bark used as a macerate for mouthwash to treat gingivitis and thrush. A bark macerate used as an antiseptic on sores and wounds, on swellings and areas of general pain. Vasorelaxant, laxative, antidiabetic, antivenin, antifungal.)

in Cameroon: akom, ende, lande, ngolu

in Central Africa: akom, moganga, n'ganga, ngolou, offram, yasa

in Congo: limba, mulimba, mulomba

in Gabon: akom

in Ivory Coast: fra, frake, fraké, fram, kobaté

in Nigeria: aaha, afa, afara, afi-eto, afram, akom, bokome, edo, ega-en, eghoin, eghoin-nofua, egonni, end, epion, frake, fraki, gbarada, jombe, mikoma, moukonia, nfako, nkombi, nkon, offram, umwomon-ron; eji (Nupe); afara (Yoruba); eghoin-nofwa (Edo); egonni (Itsekiri); unwonron (Urhobo); gbarada (Ijaw); edo (Igbo); afia eto (Efik)

in Sierra Leone: kojagei

in Yoruba: afa, afara

in Zaire: limba

in Honduras: guayabo

Terminalia tomentosa Wight & Arn.

India.

See *Taxon* 29: 164. 1980, *J. Econ. Taxon. Bot. Additional Series*, 12, pp. 367–372. 1996

(Used in Ayurveda and Sidha. Superstitions, taboo.)

in India: arjuna, asana, asanabijaka, dharaphala, jivaka, kakubhah, krishnatvaka, matti chakke, mayokpha, nissaraphalaka, parthah, sajada, sanjivaka, saradru, shyamasaraka, usan, vanajavriksha, viravrikshaka

in Tibet: spyi-zur

Ternstroemia Mutis ex L.f. Theaceae (Pentaphylacaceae)

Named for the Swedish clergyman Christopher Tärnström (Ternström), 1703–1746 (d. Indochina, Poeloe Candor, Pulo Condor, Poulo Condor or Palicandre), student of Linnaeus, traveller in China and Southeast Asia, chaplain in the Swedish East-Indian Company, teacher, botanist, author of *De Alandia*. Upsaliae 1739, collected plants for Linnaeus; see *Familles des Plantes* 2: 501. 1763, *Histoire des plantes de la Guiane Française* 1: 569, t. 227, 228. 1775, *Suppl. Pl.* 39, 264. 1782 [1781 publ. Apr 1782], *Essai sur les Propriétés Médicales des Plantes*, ed. 2 203. 1816 and *J. Arnold Arbor.* 23: 464–478. 1942, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 360. 1965, *Ann. Missouri Bot. Gard.* 54(1): 41–56. 1967, Frans A. Stafleu, *Linnaeus and the Linnaeans*. The spreading of their ideas in systematic botany, 1735–1789. 148. Utrecht 1971, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2443–2448. 2001.

Ternstroemia lineata DC. (*Taonabo pringlei* Rose; *Ternstroemia cuneifolia* Sessé & Moc., nom. illeg.; *Ternstroemia cuneifolia* Pav. ex Choisy; *Ternstroemia cuneifolia* Gardner; *Ternstroemia pringlei* (Rose) Standl.; *Ternstroemia pringlei* Standl.)

Mexico. Tree, aromatic white flowers

See *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 1: 409–410, t. 1. 1821 (1822), *London Journal of Botany* 4: 100. 1845, *Flora Mexicana*, ed. 2 128. 1894 and *Contributions from the United States National Herbarium* 8(4): 322. 1905, *Publications of the Field Columbian Museum, Botanical Series* 4(8): 234. 1929, *Novon* 7(1): 14–16. 1997

(Flowers infusion antitussive, heart tonic, pectoral, sedative, nerve))

Ternstroemia toquian F. Villar

Philippines.

See *Flora de Filipinas*, ed. 3 [F.M. Blanco] Nov. App. 19. 1877–1883

(Fruit and bark for poisoning fish.)

Ternstroemia wallichiana Ridl. (*Ternstroemia wallichiana* (Griff.) Engler)

Peninsula Mal.

See *Fl. Malay. Penin.* i. 198. 1922

(Analgesic, sedative.)

Tetracera L. Dilleniaceae

From the Greek *tetra* 'four' and *keras* 'a horn', an allusion to the curved fruits; see Carl Linnaeus, *Species Plantarum*. 1: 504, 530, 533. 1753, *Genera Plantarum*. Ed. 5. 231, 737. 1754, *Iter Hispanicum* 191. 1758, *Familles des Plantes* 2: 442. 1763, *Histoire des plantes de la Guiane Française* 2: 917–918, t. 350. 1775, *Natuurlijke Historie* 2(5): 275. 1775, *Characteres Generum Plantarum* 1: 41. 1775, *Vollständiges Pflanzensystem* 4: 40. 1779, *Kongl. Vetenskaps Akademiens Nya Handlingar* 11: 215. 1790, *Flora Cochinchinensis* 332, 341–342. 1790, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 396, 401, 410. 1817 [1818 publ. 1–15 Nov 1817], *Schlüssel Hortus indicus malabaricus*, ... 31. 1818, *Flora Brasiliae Meridionalis* (quarto ed.) 1: 19. 1824, *Sylva Telluriana* 161–162, 165. 1838, *Annales Botanices Systematicae* 2: 18. 1851, *Flora van Nederlandsch Indië* 1(2): 9–10. 1858 and *Philippine Journal of Science* 19: 366. 1921, *Ann. Missouri Bot. Gard.* 52(4): 579–598. 1966, *Mitteilungen der Botanischen Staatssammlung München* 8: 1–98. 1970.

Tetracera alnifolia Willd. (*Diploter alnifolia* (Willd.) Raf.; *Tetracera alnifolia* var. *demeusii* De Wild. & T. Durand; *Tetracera alnifolia* var. *podotricha* (Gilg) Staner; *Tetracera demeusii* (De Wild. & T. Durand) De Wild.; *Tetracera djalonica* A. Chev. ex Hutch. & Dalziel; *Tetracera leiocarpa* Stapf; *Tetracera macrophylla* A. Chev., nom. nud.; *Tetracera obovata* DC.; *Tetracera podotricha* Gilg; *Tetracera podotricha* A. Chev.; *Tetracera podotricha* var. *glabrescens* De Wild.; *Tetracera rugosa* Guill., Perrier & A. Rich.; *Tetracera scabra* Hook. f.; *Tetracera senegalensis* DC.)

West Africa. Liana, woody vine, creeping and weakly twining, stems rough, bark red flaky, coriaceous leaves slightly scabrous, white flowers, corolla pale violet, fruits dark pinkish red, persistent reddish calyx, seed covered by orange aril, mangrove forest, in understory, in gallery forest

See *Species Plantarum*. Editio quarta [Willdenow] 2(2): 1243. 1799, *Regni Vegetabilis Systema Naturale* 1: 401. 1817, *Florae Senegambiae Tentamen* 1: 3, t. 1. 1831, *Sylva Telluriana* 165. 1838, *Niger Flora* 203. 1849 and *Bulletin de la Société Botanique de Belgique* 39: 53. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 200. 1902, *Journal of the Linnean Society, Botany* 33: 81. 1905, *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 290–291. 1906, *Flore de l'Afrique Centrale Française, Énumération des Plantes Récoltées* 1: 4. 1913, *Flora of West Tropical Africa* ed. 1 1: 156. 1927, *Flore Vivante de l'Afrique Occidentale*

Française 1: 65. 1938, *Bulletin du Jardin Botanique de l'État* 15: 304. 1939, *Mitt. Bot. Staatssamml. München* 8: 54. 1970

(Leaves with blood-clotting properties.)

in West Africa: katetei/ndopanei, no-nothe

Tetracera asperula Miq. (*Tetracera grandiflora* Eichler; *Tetracera ovalifolia* DC.; *Tetracera rotundifolia* Sm.)

Guianas. Climbing shrub or small tree, racemes from the axils of the upper leaves, follicles dark shiny brown, black glossy seeds, aril deeply lacerate

See *Regni Vegetabilis Systema Naturale* 1: 400. 1818[1817], *The Cyclopaedia*; or, universal dictionary of arts, ... 35: *Tetracera* no. 7. 1819[1817], *Linnaea* 19: 133. 1847, *Flora Brasiliensis* 13(1): 92, t. 22, f. 2. 1863 and *Mitt. Bot. Staatssamml. München* 8: 74. 1970

(Bark decoction to treat syphilis.)

in Guiana: kabaduli

Tetracera boiviniana Baill.

Kenya. Shrub or small tree, suffrutex. many-branched, scabrid leaves, seeds with feathery orange arils

See *Adansonia* 7: 300, t. 7. 1867

(Roots antiseptic, antiviral, used after maternity, a postpartum remedy. Ritual.)

Tetracera indica (Christm. & Panz.) Merr. (*Assa indica* Christm. & Panz.; *Assa indica* Houtt. ex Christm. & Panz.; *Tetracera assa* DC.; *Tetracera dichotoma* Blume; *Tetracera indica* (Houtt. ex Christm. & Panz.) Merr.)

Thailand, Peninsular Malaysia. A small shrub, or a liana, leaves elliptical to oblong, inflorescence terminal, very fragrant, petals reddish white, stamens red, carpels with a few rigid hairs on the back, capsule globular, seed ovoid, aril bright red, in open places, open forest, bushland

See *Natuurlijke Historie* 2(5): 275. 1775, *Vollständiges Pflanzensystem* 4: 40. 1779 and *An Interpretation of Rumphius's Herbarium Amboinense* 367. 1917, *Planta Medica* 60(5): 493–494. 1994

(Roots and leaves used to treat itch. Crushed twigs made into a poultice and put on bites of poisonous snakes. Plant reputed to be a fish poison.)

in Indonesia: akar mempelas, areuy ki asahan, bo

in Thailand: rotsukhon daeng, thao orakhon, yaan pot

in Vietnam: ch[aw]c ch[if]ju [aas]n

Tetracera laevis Vahl (*Eleiastis laevis* (Vahl) Raf.)

India.

See *Sylva Telluriana* 165. 1838 and *Taxon* 29: 165–166. 1980

(Used in Sidha.)

in India: anaitticcal, piripu, puliyaranai, yanaitticcal

Tetracera loureiri (Finet & Gagnep.) Pierre ex Craib (*Tetracera loureiroi* Pierre ex Craib; *Tetracera sarmentosa* var. *loureiri* Finet & Gagnep.)

Thailand. Climber, very fragrant

See *Symbolae Botanicae*, ... 3: 70. 1794 and *Kew Bulletin* 1922: 165. 1922

(Hepatoprotective and antioxidant, used in some liver disorders. Whole plant decoction for dysuria with urinary stones.)

Tetracera macrophylla Wall. ex Hook. f. & Thoms. (*Tetracera grandis* King; *Tetracera macrophylla* A. Chev., nom. nud.; *Tetracera scaberrima* Miq.)

Peninsular Malaysia, Sumatra. Liana, climber, branches strongly scabrid to smooth, leaves elliptical to oblong, petiole winged, inflorescence terminal, capsule ovoid beaked, seed ovoid glossy black, in dry forest and swamp forest

See *Flora Indica*: being a systematic account of the plants. [Hooker f. & Thomson] 1: 63. 1855 and *Flore de l'Afrique Centrale Française, Énumération des Plantes Récoltées* 1: 4. 1913

(Stem sap drunk for cough. Roots and leaves pounded and applied to the skin for itch, and as a poultice on ulcers. Root sap drunk as a poison antidote; roots decoction taken for diarrhea and dysentery.)

in Indonesia: akar ampaleh riambu, akar tembara

in Malaysia: ampelas lidah kucing, ampelas rimba, empalas

in Sarawak: akar empalas, akar empelas, ampas ganje

Tetracera nordtiana F. Muell.

Australia, Malaysia. Shrub, climber, inflorescence terminal, a variable species

See *Fragmenta Phytographiae Australiae* 5: 1. 1865

(Whole plant febrifuge; stem sap drunk to treat headache and pneumonia.)

in Papua New Guinea: kauwang, quinzin

Tetracera poggei Gilg (*Tetracera fragrans* Ridl.; *Tetracera fragrans* De Wild. & T. Durand; *Tetracera malangensis* Exell; *Tetracera marquesii* Gilg)

Malaysia, Gabon. Liana, woody climber, stem exuding copious amount of watery sap, leaves with gland dots, white petals

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 71. 1895, *Ann. Mus. Congo Belge, Bot. sér.* 1, 1(3): 55. 1899, *Bol. Soc. Brot.* 16: 60. 1899 and *Bot. Jahrb. Syst.* 33(1): 199. 1902, *J. Straits Branch Roy. Asiat. Soc.* 59: 62. 1911, *J. Bot.* 70(Suppl. 1): 205. 1932

(Leaves poulticed for itch.)

in Malaysia: mempelas

Tetracera potatoria Afzel. ex G. Don (*Tetracera obtusata* Planch. ex Oliv.)

Sierra Leone. Shrub, straggling liana, woody climber, twiner, scrambling, bark brown corky peeling, stem exuding watery liquid, leaves alternate, flowers white, sepals green, fruit green, in open forest

See *A General History of the Dichlamydeous Plants* 1: 69. 1831, *Flora of Tropical Africa* [Oliver et al.] 1: 12. 1868

(Leaves for cough or to relieve toothache. A medicinal bath for the treatment of venereal diseases.)

in English: water tree

in French: liane à eau

in Congo: ndili, ngooto

in West Africa: a-noet, ndopa nei, wata tik

in Yoruba: atoyipo, owere

Tetracera sarmentosa (L.) Vahl (*Delima sarmentosa* L.; *Seguieria asiatica* Lour., Phytolaccaceae; *Tetracera asiatica* (Lour.) Hoogland; *Tetracera levinei* Merr.; *Tetracera sarmentosa* Vahl)

Vietnam, Sri Lanka, eastern India. Woody vine, small shrub, creeping, leaves very rough, flowers white yellowish, inflorescence terminal, *Tetracera sarmentosa* now often included in *Tetracera scandens*

See *Syst. Nat.*, ed. 10, 2: 1706, *Species Plantarum* 2: 980–981. 1753, *Genera Plantarum* ed. 5 231. 1754, *Syst. Nat.*, ed. 10, 1076. 1759, *Herbarium Amboinense* 18. 1754, *Iter Hispanicum* 191. 1758, *Flora Cochinchinensis* 1: 341. 1790, *Symbolae Botanicae* ... (Vahl) 3: 70. 1794 and *An Interpretation of Rumphius's Herbarium Amboinense* 365. 1917, *Philippine Journal of Science* 13(3): 147. 1918, *Flora Malesiana Bulletin* Ser. 1, Spermat. 1(4): 143. 1951, *Regnum Veg.* 127: 42. 1993

(Plant diuretic, febrifuge, cooling, tonic and depurative. Bark astringent, febrifuge, an infusion drunk for diarrhea and dysentery. Crushed twigs made into a poultice applied on bites of poisonous snakes; clear sap used as eye drops for eye diseases and painful eyes. Crushed young leaves mixed with water and taken for diarrhea.)

in India: hruithindeng, pongikongchatong

in Indonesia: sengkerit akar

in Malaysia: mempelas rimau

in Vietnam: ch[awj]c ch[if]ju, d[aa]y chi[eef]ju

Tetracera scandens (L.) Merrill (*Delima sarmentosa* Linnaeus; *Delima scandens* (Merr.) Burkill; *Seguieria asiatica* Lour., Phytolaccaceae; *Tetracera asiatica* (Lour.) Hoogland; *Tetracera hebecarpa* (DC.) Boerl.; *Tetracera hebecarpa* Boerl.; *Tetracera levinei* Merr.; *Tetracera monocarpa* Blanco; *Tetracera sarmentosa* Vahl; *Tetracera*

sarmentosa (L.) Vahl; *Tetracera scandens* Merr.; *Tetracera scandens* Gilg & Werderm.; *Tragia scandens* Linnaeus, Euphorbiaceae)

Vietnam, Sri Lanka, eastern India. Woody vine, climbing, small shrub, creeping, scabrid branches, leaves very rough to scabrid, inflorescence terminal, light green to whitish flowers, ovoid beaked fruits, ovoid arillate seeds, in primary forest and secondary forest, along roadsides, hedges, *Tetracera sarmentosa* now often included in *Tetracera scandens*

See *Syst. Nat.*, ed. 10, 2: 1706, *Species Plantarum* 2: 980–981. 1753, *Genera Plantarum* ed. 5 231. 1754, *Herbarium Amboinense* (Linn.) 18. 1754, *Iter Hispanicum* 191. 1758, *Syst. (Abortifacient, bactericide, cytotoxic, astringent, for diarrhea, headache, rheumatism, swelling, skin diseases, melanoma.)

in English: Arar tree, Arartree, California juniper, Juniper gum tree, Sandarac gum tree, Sandarac tree, Sandarach tree, thuja

in Arabic: azouka, imijad, tazout

in Morocco/S. Spain: Araar, arar, alerce, thuya

Tetradenia Benth. Lamiaceae (Labiatae)

From the Greek *tetra*, *tetras* 'four' and *aden* 'a gland', see *Consp. Regn. Veg.* 171, in adnot. 1828, *Edwards's Botanical Register* 15: no. 1300. 1830 and *Fl. Cap.* (Harvey) 5(1): 298. 1910.

Tetradenia multiflora (Benth.) Phillipson (*Basilicum multiflorum* (Benth.) Kuntze; *Basilicum multiflorum* Kuntze; *Iboza multiflora* (Benth.) E.A. Bruce; *Moschosma multiflorum* Benth.; *Plectranthus multiflorus* Hochst. ex Benth.)

Ethiopia.

See *Prodr.* (DC.) 12: 49. 1848, *Revis. Gen. Pl.* 2: 512. 1891 and *Bulletin of Miscellaneous Information Kew* 1940: 66. 1940, *Adansonia*, III, 30(1): 187. 2008

(Whole plant and leaves for fevers, catarrh, cough, parasitic skin diseases.)

Tetradenia riparia (Hochst.) Codd (*Basilicum multiflorum* Kuntze; *Basilicum multiflorum* (Benth.) Kuntze; *Basilicum*

myriostachyum Kuntze; *Basilicum myriostachyum* (Benth.) Kuntze; *Basilicum riparium* Kuntze; *Basilicum riparium* (Hochst.) Kuntze; *Iboza bainesii* N.E. Br.; *Iboza galpinii* N.E. Br.; *Iboza multiflora* (Benth.) Bruce; *Iboza riparia* N.E. Br.; *Iboza riparia* (Hochst.) N.E. Br.; *Iboza urticifolia* (Baker) Bruce; *Gumira ferruginea* (A. Rich.) Kuntze; *Moschosma multiflorum* Benth.; *Moschosma myriostachyum* Benth.; *Moschosma myriostachyum* Benth. & Hook.f.; *Moschosma riparium* Hochst.; *Moschosma urticifolium* Baker; *Plectranthus multiflorus* Hochst. ex Benth.; *Plectranthus riparius* Hochst.; *Premna ferruginea* A. Rich.)

Eritrea to S. Africa. Shrub, erect, spreading, succulent, weak, many branched at woody base, bark pale brown, more or less leafless when flowering, leaves soft pubescent, corolla blue-white, anthers blue-purple, calyx pale green tinged brown, whole plant with pleasant odor, in open forest, in *Brachystegia* woodland, riverine forest edge

See *Conspectus Regni Vegetabilis* 171. 1828, *Edwards's Botanical Register* 15: no. 1300. 1830, *Flora* 28: 67. 1845, *Prodr.* (DC.) 12: 49. 1848, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 1173. 1876, *Revis. Gen. Pl.* 2: 507, 512. 1891 and *Fl. Trop. Afr.* [Oliver et al.] 5: 353. 1900, J.H. Patterson, *In the grip of the Nyika*. London 1909, *Fl. Cap.* 5(1): 298, 300–301. 1910, *Bulletin of Miscellaneous Information Kew* 1940: 66. 1940, *Bothalia* 14(2): 181. 1983, *Adansonia* 30(1): 187, 194. 2008

(Used for intestinal worms and stomach disorders. Roots boiled and drunk for tuberculosis and dropsy. Leaves for chest complaints, expectoration of blood.)

in English: ginger bush

in Honduras: mirro

in East Africa: fukufuku (Nyika); honwa (Marakwet); lilaaku (Lunyore); mshunshu (Baroka Distr.); mwache (Pare); mwaraka (Meru)

in Southern Africa: chaRogwa, chiRurwe, chororgwe, sharorwe (Shona); iBoza (Zulu)

in Tanzania: hache, mhache, muravumba, omushunshu

Tetradenia urticifolia (Baker) Phillipson (*Iboza urticifolia* (Baker) E.A. Bruce; *Moschosma urticifolium* Baker; *Tetradenia urticifolia* Phillipson)

Tanzania. Shrub

See *Fl. Trop. Afr.* [Oliver et al.] 5(2): 353. 1900, *Bull. Misc. Inform. Kew* 1940: 66. 1940, *Adansonia*, III, 30(1): 194. 2008, *Tanzania Journal of Health Research* 11(1): 23–28. 2009

(Antimicrobial, used to treat bacterial infections, diarrhea and heal wounds.)

Tetradium Lour. Rutaceae

Greek *tetras* 'four', referring to the flowers; Greek *tetradion* is a guard of soldiers, normally consisting of four men; Latin

tetradium, ii 'the number four, quaternion, tetrad', see *Flora Cochinchinensis* 1: 91–92. 1790.

Tetradium trichotomum Lour. (*Ampacus trichotoma* (Lour.) Kuntze; *Brucea trichotoma* (Lour.) Spreng.; *Euodia colorata* Dunn; *Euodia hainanensis* Merr.; *Euodia lenticellata* C.C. Huang; *Euodia trichotoma* (Lour.) Pierre; *Euodia trichotoma* var. *pubescens* C.C. Huang; *Euodia viridans* Drake)

India.

See *Flora Cochinchinensis* 1: 91. 1790, *Systema Vegetabilium*, editio decima sexta 1: 441. 1825, *Revisio Generum Plantarum* 1: 98. 1891, *Journal de Botanique* (Morot) 6(15–16): 273–274. 1892, *Flore Forestière de la Cochinchine* 3: t. 287. 1893 and *Bulletin of Miscellaneous Information Kew* 1906(1): 2–3. 1906, *Philippine Journal of Science* 21(4): 346. 1922, *Acta Phytotaxonomica Sinica* 6(1): 98–100, pl. 24. 1957, *Acta Phytotaxonomica Sinica* 16(2): 83–84. 1978

(Fruit and bark paste taken for dysentery; powdered dried fruits and seeds applied for rheumatism, hysteria and madness.)

in China: me lien, niu dou wu yu

in India: metsupon tsungram mengzu

Tetradymia DC. Asteraceae

From the Greek *tetradymos* 'fourfold', referring to the 4-flowered heads of some species, see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 440. 1838 [1837 publ. early Jan 1838], *Proceedings of the American Academy of Arts and Sciences* 9: 207. 1874, *Proceedings of the American Academy of Arts and Sciences* 19: 50. 1883 and Strother, J.L. "Taxonomy of *Tetradymia* (Compositae: Senecioneae)." *Brittonia* 26(2): 177–202. 1974. *Tetradymia* species are one of the most economically important causes of phototoxicity in livestock. Other Senecionids are known for poisoning of livestock, mainly by alkaloids in *Senecio* spp. (mostly cattle and horses) and by furanoremerophilanes in *Tetradymia* spp. (mostly sheep).

Tetradymia axillaris A. Nelson var. ***longispina*** (M.E. Jones) Strother (*Tetradymia longispina* (M.E. Jones) Rydberg; *Tetradymia spinosa* Hooker & Arnott var. *longispina* M.E. Jones)

North America. Perennial subshrub

See *J. Phys. Chim. Hist. Nat. Arts.* 88: 196. 1819, *Prodr.* (DC.) 6: 440. 1838, *Proc. Calif. Acad. Sci.*, ser. 2, 5(18): 698. 1895 and *Botanical Gazette* 37(4): 277. 1904, *Bulletin of the Torrey Botanical Club* 37(9): 471. 1910, *Brittonia* 26(2): 197. 1974, *J. Natl. Cancer Inst.* 69(1): 253–258. 1982

(Photosensitization in livestock.)

in English: longspine horsebrush

Tetradymia canescens DC. (*Tetradymia canescens* DC. var. *inermis* (Rydb.) Payson; *Tetradymia canescens* var. *inermis* (Nutt.) A. Gray; *Tetradymia inermis* Nutt.)

North America. Perennial subshrub

See *Prodr.* (DC.) 6: 440. 1838, *Transactions of the American Philosophical Society*, new series, 7: 415. 1841, *Geological Survey of California, Botany* 1: 408. 1876

(Tonic, cathartic, analgesic, disinfectant, postpartum remedy, emetic, abortifacient, febrifuge, used for colds, cough, fever, venereal diseases, stomachache, backache. Ceremonial, witchcraft medicine, used as for protection from witches and ghosts.)

in English: spineless horsebrush

Tetradymia comosa A. Gray

North America. Perennial subshrub

See *Proceedings of the American Academy of Arts and Sciences* 12: 60. 1877

(Used for colds, cough, pneumonia, fever, influenza, venereal diseases, diarrhea, stomachache, backache, swellings, cuts, bruises.)

in English: hairy horsebrush

Tetradymia glabrata A. Gray (*Tetradymia glabrata* Torr. & A. Gray)

North America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 440. 1837 [1838], *Pacific Railr. Rep.* 2, Pt. 2, *Bot.* (Beckwith & Gunnison) 122, t. 5. 1855 [*Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean/made under the direction of the secretary of war, in 1852–1856. Washington: Beverly Tucker, etc., 1855–1861.*] and *Am. J. Vet. Res.* 35(12): 1583–1585. 1974, *Can. J. Comp. Med.* 38(4): 406–410. 1974, *J. Org. Chem.* 39(23): 3392–3398. 1974, *J. Org. Chem.* 41(26): 4078–4081. 1976, *J. Natl. Cancer Inst.* 69(1): 253–258. 1982

(Toxic.)

Tetradymia stenolepis Greene

North America. Perennial subshrub

See *Bulletin of the California Academy of Sciences* 1(3): 92. 1885 [1886 publ. 28 Feb 1885]

(Spines used for warts.)

in English: Mojave cottonthorn

Tetragastris Gaertner Burseraceae

Greek *tetras*, *tetra* ‘four’ with *gaster* ‘belly, paunch’, referring to the form of the fruits, see *Species Plantarum*, Editio Secunda 1: 471. 1762, *De Fructibus et Seminibus Plantarum...* 2: 130. 1790, *Annales des Sciences Naturelles* (Paris) 2: 346. 1824 and *Fieldiana, Bot.* 24(5): 434–444. 1946, *Field Mus. Nat. Hist., Bot. Ser.* 13(3/2): 703–717. 1949.

Tetragastris panamensis (Engl.) Kuntze (*Hedwigia panamensis* Engl.; *Tetragastris panamensis* var. *grandifolia* Swart; *Tetragastris panamensis* var. *hirtella* Swart; *Tetragastris paraensis* Cuatrec.; *Tetragastris stevensonii* Standl.)

Panama, Brit. Honduras.

See *De Fructibus et Seminibus Plantarum...* 2: 130. 1790, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 42. 1881, *Revisio Generum Plantarum* 1: 107. 1891 and *Trop. Woods* No. 17, 23. 1929, *Publications of the Field Columbian Museum, Botanical Series* 4(8): 216–217. 1929, *Recueil des Travaux Botaniques Néerlandais* 39: 207. 1942, *Bol. Mus. Paraense “Emilio Goeldi,” N.S., Bot.* 11: 7. 1961 [Boletim do Museu Paraense “Emilio Goeldi.” Nova Serie, Botanica. Belem], *Acta Botanica Neerlandica* 15: 56. 1966, *Mus. Nac. Hist. Nat. (Bolivia) Com.* 10: 32–52. 1990, *Revista Boliviana Ecol. Cons. Amb.* 7: 93–114. 2000

(Stimulant, tonic.)

Tetragonia L. Aizoaceae

Greek *tetras* with *gonia* ‘an angle, corner’, in reference to the shape of the fruit of some species; see Carl Linnaeus, *Species Plantarum*. 1: 480. 1753, *Genera Plantarum*. Ed. 5. 215. 1754, Pallas, Peter (Pyotr) Simon von (1741–1811), *Enumeratio plantarum quae in horto viri illustris atque excell. Dni. Procopii à Demidof Moscuæ vigent* 150. Petropoli: Typis Acad. Imder. [i.e., Imper.] Scientiarum, 1781 [Demidov, Prokofii Akinievich, 1710–1786], *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 452. 1828, *An Introduction to the Natural System of Botany* 209. 1836 and *Syst. Bot.* 19(4): 575–589. 1994, *J. Pl. Biol.* 39: 15–22. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 48–49. 2001.

Tetragonia tetragonoides (Pallas) Kuntze (*Demidovia tetragonoides* Pallas; *Demidovia tetragonoides* Pall.; *Tetragonia expansa* Murray; *Tetragonia expansa* Thunb., nom. illeg.; *Tetragonia tetragonoides* (Pall.) Kuntze; *Tetragonia tetragonoides* Kuntze)

Australia to New Zealand. Perennial herb, spreading, creeping, sprawling, fleshy, flat thick roundish leaves, small yellowish flowers, young leaves eaten as a vegetable

See Murray, Johann Andreas (1740–1791), *Commentatio de Arbuto uva ursi exhibens descriptionem eius botanicam analysin chemicam eiusque in medicina et oeconomia varium usum ...* Gottingae, Apud Pockwitzium et Barmeierum, 1765, *Enum. Hort. Demidof* 150 (–157, t. 1). 1781, Cook, James (1728–1779), *A voyage to the Pacific ocean: undertaken, by the command of His Majesty, for making discoveries in the northern hemisphere. Performed under the direction of Captains Cook, Clerke, and Gore, in His Majesty’s ships the Resolution and Discovery; in the years 1776, 1777, 1778, 1779, and 1780 ...* Vol. I. and II. written by Captain James Cook, F.R.S. Vol. III. by Captain James King, LL.D. and

F.R.S.; published by order of the Lords Commissioners of the Admiralty. London, 1785, *Trans. Linn. Soc. London* 2: 335. 1794, *The three voyages of Captain James Cook around the world*. London, 1821, *Revis. Gen. Pl.* 1: 264. 1891 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 558–562. 1937, *Flora of Australia* 19–62. 1984

(Formation of insoluble oxalate crystals. Juice of leaves and stems tonic, antiscorbutic, antiinflammatory, digestive, hypoglycemic, diuretic, laxative, depurative, for pulmonary and gastrointestinal complaints, diarrhea, scurvy and anemia, arthritis.)

in English: Baguio spinach, New Zealand ice-plant, New Zealand spinach, Warrigal cabbage

Maori name: kokihi, rengamutu

in Rodrigues Isl.: épinard

in Australia: Warragul cabbage, Warrigal cabbage

in China: fan xing

in Japan: tsuru-na

in Philippines: espinadas

Tetrameles R. Br. Datisceaceae (Tetramelaceae)

Greek *tetras*, *tetra* ‘four’ and *melos* ‘a limb, part, member’, referring to the calyx lobes, 4-merous flowers; see Dixon Denham (1786–1828), Hugh Clapperton (1788–1827) and Walter Oudney (1790–1824), *Narrative of Travels and discoveries in Northern and Central Africa. 1822–1824*. [Botany by R. Brown.] 230. London 1826, *Plantae Javanicae Rariores* (Bennett) 79. 1838, *A Catalogue of the Plants Growing in Bombay and its Vicinity* 252. 1839. Datisceaceae closely related to Begoniaceae and Cucurbitaceae.

Tetrameles nudiflora R. Br. (*Anictoclea grahamiana* Nimmo; *Tetrameles grahamiana* (Nimmo) Wight; *Tetrameles grahamiana* Wight; *Tetrameles grahamiana* var. *ceylanica* A. DC.; *Tetrameles rufinervis* Miq.)

India, Sri Lanka. Tree, deciduous, dioecious, bole columnar, pale yellow sapwood, stout twigs with prominent leaf scars, unisexual 4-merous flowers, small yellow unisexual flowers in axillary or terminal inflorescences, petals wanting, male flowers fragrant, female flowers sessile, ovoid to globular-urceolate flat-topped ridged-veined fruits, narrowly oblong seeds slightly flattened

See *Plantae Javanicae Rariores* (Bennett) 79, t. 17. 1838, *Icones Plantarum Indiae Orientalis* [Wight] t. 1956. 1840, *Flora van Nederlandsch Indië* 1(1): 726. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 412. 1864, *FBI* 2: 657. 1879

(Used in Sidha. Bark laxative and diuretic, a decoction given in rheumatism, edema, ascites and jaundice. Leaf sap extract for skin diseases.)

in China: si shu mu

in India: awak, bhelu, bol bok, bolu, bolur, bondaale, bondsa, cheeni, chini, cini, dumbong, erimali, erimalu, ernal, jermalu, jiraal, jungli dungy, kaadu bende, kadbende, kadubende, kapong, kapsin, pag-araung, pak-araung, piyai, piyei, pontham cheeni, sidhom, sompong, thingdawl, ugada, vella-cheeni, vellacini, vellapacca, vellapasa, vellapassa, yermal

Malay name: mengkundor

Tetrapanax (K. Koch) K. Koch Araliaceae

Greek *tetra* ‘four’ and the genus *Panax*, referring to the four seeds or to the flowers, in four, see *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 70, 371. 1859.

Tetrapanax papyrifer (Hook.) K. Koch (*Aralia mairei* H. Lév.; *Aralia papyrifera* Hook.; *Didymopanax papyrifer* (Hook.) K. Koch; *Echinopanax papyrifera* (Hook.) Kuntze; *Fatsia papyrifera* (Hook.) Benth. & Hook. f. ex F.B. Forbes & Hemsl.; *Fatsia papyrifera* (Hook.) Miq. ex Witte; *Panax papyrifer* (Hook.) F. Muell.)

China. Shrub, small tree, monocaulous, stout, stem pith cylindrical, large alternate leaves deeply palmate, stout cylindrical petiole, membranous stipules, greenish flowers, inflorescence of numerous umbels arranged in a large woolly panicle, receptacle obconical, 2-celled ovary, styles diverging, small dark fruit, pith usually cut into thin slices for medicinal use

See *Species Plantarum* 1: 273–274. 1753, *Hooker’s Journal of Botany and Kew Garden Miscellany* 4: 50, 53, pl. 1–2. 1852, *Revue Horticole* (Paris), Sér. 4 3: 105. 1854, *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 69, 371. 1859, *Fl. Jardins Pays-Bas* 4: 87. 1861, *Fragmenta Phytographiae Australiae* 4: 122. 1864, *Journal of the Linnean Society, Botany* 23(156): 341. 1888, *Revisio Generum Plantarum* 1: 271. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(368–369): 342. 1914, *J. Pharmacobiodyn.* 5(6): 379–87. 1982, *J. Pharmacobiodyn.* 6(5): 287–94. 1983, *J. Ethnopharmacol.* 12(2): 231–5. 1984, *Flore des Mascareignes: la Réunion, Maurice, Rodrigues* 106: 1–20. 1990, *Contact Dermatitis.* 35(2): 106–7. 1996, *China Journal of Chinese Materia Medica* 22(8): 454–8, 510. 1997 [Survey of botanical origin of tongcao (*medulla Tetrapanax*) and identification of its commercial products.], *J. Ethnopharmacol.* 81(2): 277–80. 2002, *Phytochemistry.* 68(5): 631–5. 2007

(Pith antithrombin, antiinflammatory, antihepatotoxic, used for edema, dysuria, agalactia. The pollen may cause severe dermatitis.)

in English: Chinese rice-paper plant, pith-paper tree, rice-paper plant, rice-paper tree

in China: tong cao, tung to mu, tung tsao

in Japan: kami-yatsu-de, tsû-datsu-boku

Tetrapleura Benth. Fabaceae (Mimoseae)

From the Greek *tetras* ‘four’ and *pleura*, *pleuro*, *pleuron* ‘side, rib’, referring to the fruit, see *Journal of Botany*, being a second series of the Botanical Miscellany 4: 345. 1841.

Tetrapleura tetraptera (Schumach. & Thonn.) Taub. (*Adenanthera tetraptera* Schumach. & Thonn.; *Amblygonocarpus andongensis* (Welw. ex Oliv.) Exell & Torre; *Tetrapleura tetraptera* Taub.; *Tetrapleura thonningii* Benth.)

West Africa. Guinea. Perennial non-climbing tree, fern-like foliage, branches reddish brown, leaves bipinnate, flowers yellow-orange-pinkish, perianth pale pink-red, fruits green 4-winged, fruits added to stews as flavoring, fruit eaten by gorilla

See *Species Plantarum* 1: 384. 1753, *Beskrivelse af Guineiske planter* 213–214. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 233–234. 1828, *Journal of Botany, being a second series of the Botanical Miscellany* (Hooker) 4: 345. 1841, *Flora of Tropical Africa* 2: 331. 1871, *Botanisches Centralblatt* 47: 395. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 29: 42. 1955

(Fruit tonic and stimulant, anticonvulsant. Bark pounded and mixed with honey or sugar or sugarcane juice then drunk to treat poisoning. Powdered fruit, fish poison and treatment of skin diseases. Decoction of roots for fevers and malaria. Bark, fruits and leaves used as fish poison.)

in Cameroon: akpa, dawo, djaga, esesié, essanga sanga, essesse, kpwa, ora

in Central Africa: angulu, ekombele, ekombolo, ekoumbolo

in Congo: badiok, eyaka, ezibil, kiaka

in Gabon: cocso, enkagouma, mbaghesa, nkouarsa, ogagoume, ouogueso

in Ghana: esem

in Ivory Coast: belfou, esehese, esse-hesse, m'bekrèhia, tchiek boue, tické

in Nigeria: aidan, apapa, aqua, aridan, ayidan, bokomake, dawo, ebuk, edeminang, esekeseke, esisang, ighimiaki, ighimiakia, ighirehimi, ikoho, imiminje, iminiyi, igirihimi, kalangon-daji, kombolo, mfe, osakirisa, oshosho, osshoshsha, osshoshsha, sassas, sekokbagu, ushosho

in Tanzania: mnandangao, omuetanjula

in Togo: prekese

in Zambia: kapapata, mukaba, munengenenge, munyenye

Tetrapterys Cav. Malpighiaceae

Greek *tetras*, *tetra* ‘four’ and *pteron* ‘wing’, referring to the winged samaras, see Cavanilles, Antonio Jose (1745–1804), *Monadelphiae Classis Dissertationes Decem* 9: 433. 1790

[*Diss. 9, Nona Diss. Bot.* 433, tt. 260–262. Matriti: Ex typographia regia prostant Matriti apud D. Antonium Baylo [et] Parisiis apud D. Firminum Didot, [1785]–1790], *Ann. Sci. Nat., Bot. sér.* 2, 13: 261. 1840 and *Taxon* 43: 125. 1994.

Tetrapterys methystica R.E. Schult. (*Tetrapteris methystica* R.E. Schult.)

Colombia, Brazilian Amazon.

See *Bot. Mus. Leaflet*. 16: 202, tab. 30. 1954

(A narcotic drink from the bark.)

Tetrastigma (Miq.) Planchon Vitaceae

Greek *tetras* ‘four’ and *stigma*, referring to the four-lobed stigma, see *Annales Museum Botanicum Lugduno-Batavi* 1: 72. 1863, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 320, 423. 1887 and *The Gardens' Bulletin Singapore* 36(2): 225. 1983[1984], *Chin. J. Appl. Environ. Biol.* 1(4): 314, 322, 329, 331. 1995.

Tetrastigma glabratum (Blume) Planch. (*Cissus glabrata* Blume; *Tetrastigma glabratum* Planch.)

Borneo, Sumatra. Liana, pink tepals, food plants eaten by proboscis monkeys

See *Monogr. Phan.* [A. DC. & C. DC.] 5: 430. 1887

(Febrifuge, narcotic.)

Tetrastigma harmandii Planch.

Philippines.

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 425. 1887

(Plant decoction drunk as diuretic, and as a lotion to cure scabies.)

in Philippines: ayo

Tetrastigma hemsleyanum Diels & Gilg (*Tetrastigma alatum* Li; *Tetrastigma bioritsense* (Hayata) Hsu & Kuoh; *Tetrastigma dentatum* (Hayata) H.L. Li; *Vitis bioritsensis* Hayata; *Vitis dentata* Hayata; *Vitis esquirolii* H. Lév. & Vaniot; *Vitis labordei* H. Lév. & Vaniot)

China, India. Liana, herbaceous vine

See *Species Plantarum* 1: 202–203. 1753, *Monographiae Phanerogamarum* 5: 320, 423. 1887 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 463. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 3(27–28): 20–21. 1906, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 62–63. 1911, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 5: 31. 1915, *Woody Fl. Taiwan* 528. 1963, *Bulletin de la Société d'Agriculture, Sciences et Arts de la Sarthe* 40: 40. 1988, *Biomed. Environ. Sci.* 21(4): 325–331. 2008 [Immunoregulatory effects of

ethyl-acetate fraction of extracts from *Tetrastigma hemsleyanum* Diels et Gilg on immune functions of ICR mice.]

(Root depurative, febrifuge, used in the treatment of boils and ulcers, traumatic bleeding, snakebites, rheumatoid aches and pains in the back and legs.)

in English: Hemsley's rockvine

in China: san ye ya pa teng

Tetrastigma lanceolarium (Roxb.) Planch. (*Cissus lanceolaria* Roxb.; *Vitis lanceolaria* (Roxb.) Wall.; *Vitis lanceolaria* Wall.; *Vitis lanceolaria* Wight)

India. Large climbing shrubs

See *Flora Indica*; or descriptions of Indian Plants (Carey & Wallich ed.) 1: 430. 1820, *A Numerical List of Dried Specimens* [Wallich] no. 6013. 1832 [1831–1832], *Monographiae Phanerogamarum* 5: 423. 1887

(Poultice of leaves applied to boils and to the body for ague.)

in India: tinfuk

Tetrastigma leucostaphylum (Dennst.) Alston (*Cissus leucostaphyla* Dennst.; *Cissus leucostaphyla* Steud.; *Tetrastigma leucostaphylum* (Dennst.) Balakrishnan; *Vitis leucostaphylum* (Dennst.) B.D. Jacks.)

India.

See *Schlüssel Hortus indicus malabaricus*, ... 17, 19, 33. 1818, *Nomenclator Botanicus*. [Steudel], ed. 2. 1: 372. 1840 and *Taxon* 26(56): 539. 1977, *Fl. Jowai* 1: 138. 1981, *Taxon* 37: 173. 1988

(Crushed plants applied over boils.)

in India: pashala kodi

Tetrastigma papillosum (Blume) Planch.

Borneo, Java, Sabah. Climber, fragrant pale greenish flowers

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 320, 423. 1887

(Alkaloids.)

in Moluccas: gumi besa besa

Tetrastigma pedunculare (Wallich ex Lawson) Planch. (*Tetrastigma pedunculare* Planch.; *Vitis peduncularis* Wallich ex Lawson; *Vitis peduncularis* Wallich)

India. Climber

See *Numer. List* [Wallich] n. 6024. 1831–1832, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 438. 1887

(Roots decoction drunk for gonorrhoea and blood in urine.)

in Borneo: akar pou

Tetrastigma serrulatum (Roxb.) Planch. (*Cissus serrulata* Roxb.; *Cissus serrulatus* Roxb.; *Tetrastigma serrulatum* Planch.; *Vitis capreolata* D. Don)

India, Nepal. Climber, slender, serrate lanceolate leaflets, flowers in axillary terminal cymes, black globose fruits, leaves and shoots used as vegetable

See *Hort. Bengal.* 11. 1814, *Flora Indica*; or descriptions of Indian Plants (Carey & Wallich ed.) 1: 432. 1820, *Prodr. Fl. Nepal.* 188. 1825, *Fl. Ind.*, ed. Carey, 1: 414. 1832, *FBI* 1: 695. 1875, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 432. 1887

(Plant paste applied to aid setting of dislocated bones.)

in China: xia ye ya pa teng

in India: han-phaurpaup

in Nepal: ghugi

Tetrastigma sulcatum (Lawson) Gamble (*Tetrastigma sulcatum* Gamble; *Vitis sulcata* Lawson)

India. Climber, twiner

See *Fl. Brit. India* [J.D. Hooker] 1: 661. 1875 and *Flora of the Presidency of Madras* 229. 1918, *Curr. Sci.* 49: 37–38. 1980

(Ground fruits used as a fish poison.)

in India: meenkollivally

Tetrorchidium Poeppig Euphorbiaceae

Greek *tetras* 'four' and *orchis*, *orchidos* 'a testicle', referring to the anthers, see *Nova Genera ac Species Plantarum* (Poeppig & Endlicher) 3: 23. 1841 and *Fieldiana, Bot.* 24(6): 25–170. 1942, *Taxon* 31(3): 559. 1982, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Tetrorchidium didymostemon (Baillon) Pax & K. Hoffm. (*Gelonium angolense* Prain; *Hasskarlia didymostemon* Baill.; *Hasskarlia minor* Prain; *Suregada angolensis* (Prain) Croizat; *Tetrorchidiopsis minor* (Prain) Rauschert; *Tetrorchidium minus* (Ducke) Ducke; *Tetrorchidium minus* (Prain) Pax & K. Hoffmann)

Tropical Africa. Tree or shrub, foul smelling, watery white sticky latex, gorillas eat leaves and bark

See *Adansonia: recueil périodique d'observations botanique*, n.s. [Baillon] 1: 52. 1860 and *Bull. Misc. Inform. Kew* 1911: 233. 1911, *Bull. Misc. Inform. Kew* 1912: 231. 1912, *Das Pflanzenreich* (Engler) Euphorb.-Addit. IV, 147, XIV: 53. 1919, *Bull. Jard. Bot. Buitenzorg*, III, 17: 216. 1942, *Boletim Tecn. Inst. Agron. do Norte* no. 19: 45. 1950, *Taxon* 31(3): 559. 1982, *Willdenowia* 21: 233–238. 1991

(Stem bark and leaves purgative, febrifuge, for edema; roots for chest and rib pains.)

in Central African Republic: akpa, zozé

in Congo: onlili, oulili

in Ivory Coast: oulogbaoue, amene, bredoue

in Liberia: plor-plor

in Nigeria: oruru; ofun-oke (Yoruba); iheni (Edo)

in Yoruba: ofun oke

in Zaire: samaki

Teucrium L. Lamiaceae (Labiatae)

Greek *teukrion*, possibly for Teucer (Teukros) the founder of the town of Salamis in Cyprus; Latin *teucrion*, *ii* for a plant, the germander, *Teucrium chamaedrys* L., the herb spleenwort, *Teucrium flavium* L.; see *Species Plantarum* 2: 562–567. 1753, *Flora Germanica Excursoria* 314. 1831, *Labiatarum Genera et Species* 660, 665, 671–672, 674. 1836, *Journal of the Linnean Society, Botany* 26(175): 311. 1890 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2: 296. 1929, *Brittonia* 5(5): 491–510. 1946, *Acta Botanica Sinica* 10: 250. 1962, *Memórias da Sociedade Broteriana* 27: 27–75. 1974, *Taiwania* 41(2): 81–90. 1996, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 638. Basel 1996.

Teucrium anlungense C.Y. Wu & S. Chow

China.

See *Acta Phytotax. Sin.* 10(4): 338–339, pl. 71, f. 8–13. 1965

(Antiinflammatory.)

in China: an long xiang ke ke

Teucrium betonicum L'Hér. (*Chamaedrys betonicifolia* (Jacq.) Raf.; *Scorodonia betonicifolia* (Jacq.) Moench; *Teucrium betonicifolium* Jacq.; *Teucrium canescens* G. Forst.; *Teucrium maderense* Lam.)

Europe, Madeira.

See *Collectanea* 1: 145. 1787, *Stirpes Novae aut Minus Cognitae* 83, t. 40. 1788, *Encycl.* 2: 692. 1788, *Comment. Soc. Regiae Sci. Gott.* 9: 58. 1789, *Suppl. Meth.*: 133. 1802, *Fl. Tellur.* 3: 85. 1837

(Flowers stomachic, tonic.)

in Portugal: abrotona

Teucrium bidentatum Hemsley (*Kinostemon bidentatum* (Hemsley) Kudô; *Plectranthus hanceiformis* H. Léveillé; *Teucrium bidentatum* Hemsley var. *purpureum* Diels)

China, Taiwan, Myanmar.

See *J. Linn. Soc., Bot.* 26(175): 312. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 552. 1900, *Cat. Pl. Yun-Nan* 141. 1916, *Trans. Nat. Hist. Soc. Taiwan* 19: 1–2. 1929

(Stimulant, stomachic, astringent.)

in English: two-dentate germander

in China: er chi xiang ke ke

Teucrium chamaedrys L. (*Teucrium officinale* Lam.; *Teucrium stevenianum* Klokov; *Teucrium veronicifolium* (L.) Salisb.; *Teucrium veronicifolium* Salisb., nom. illeg.)

Europe.

See *Species Plantarum* 2: 565. 1753, *Prodr. Stirp. Chap. Allerton*: 76. 1796 and *Fl. Ukraine SSR* 9: 637. 1960 [*Fl. RSS Ukr./ Flora URSS*], *Candollea* 50(2): 457–493. 1995, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 31: 11–12. 1999

(Stimulant, diuretic, stomachic, antiseptic, depurative, astringent, febrifuge.)

in English: common germander, ground oak, wall germander

in Arabic: bellout el-ard

Teucrium cubense Jacq. (*Melosmon cubense* (Jacq.) Small; *Melosmon laevigatum* (Vahl) Small; *Teucrium chamaedrifolium* Mill.; *Teucrium cubense* L., nom. illeg.; *Teucrium cubense* subsp. *chamaedrifolium* (Mill.) Epling; *Teucrium cubense* subsp. *cubense*; *Teucrium cubense* subsp. *depressum* (Small) E.M. McClint. & Epling; *Teucrium cubense* subsp. *laevigatum* (Vahl) E.M. McClint. & Epling; *Teucrium cubense* var. *densum* Jeps.; *Teucrium cubense* var. *laevigatum* (Vahl) Shinnars; *Teucrium depressum* Small; *Teucrium laevigatum* Banks & Sol., nom. illeg.; *Teucrium laevigatum* Vahl)

South America, Mexico, Caribbean.

See *Species Plantarum* 2: 562–567. 1753, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 25. 1760, *Mantissa Plantarum* 80. 1767, *Symbolae Botanicae*, ... 1: 40. 1790, *The Natural History of Aleppo* ed. 2, 2: 255. 1794, *Flora Telluriana* 3: 85. 1836, *Flora Orientalis* 4: 804. 1879 and *Flora of the Southeastern United States* 1019, 1337. 1903, *Man. Fl. Pl. Calif.* 861. 1925, *Ann. Missouri Bot. Gard.* 12: 112. 1925, *Brittonia* 5(5): 503–505, f. 7–8. 1946, *Sida* 4: 275. 1971, *Fl. Il. Entre Ríos*. 6(5): 294–346. 1979

(Bath to relieve itching.)

in English: jemimah bush, small coastal germander

Teucrium decaisnei C. Presl (*Teucrium pilosum* (Decne.) Asch. & Schweinf.; *Teucrium polium* var. *pilosum* Decne.; *Teucrium sinaicum* Boiss., nom. illeg.)

Sinai.

See *Ann. Sci. Nat., Bot.*, sér. 2, 2: 250–251. 1834, *Abh. Königl. Böhm. Ges. Wiss.*, V, 3: 530. 1845, *Diagn. Pl. Orient.* 12: 91. 1853, *Mémoires de l'Institut Égyptien* 2: 189. 1887 and *Acta Phytotaxonomica Sinica* 10(4): 335, pl. 68, f. 1. 1965

(For cold, cough, influenza.)

Teucrium flavum L. (*Chamaedrys flava* (L.) Moench)

Mediterranean.

See *Species Plantarum* 2: 565. 1753, *Methodus* 383. 1794

(Aperient, alterative.)

Teucrium japonicum Houtt. (*Teucrium japonicum* Willdenow)

China, Japan.

See *Nat. Hist.* 9: 282. 1778, *Species Plantarum*. Editio quarta 3(1): 23. 1800

(Antiseptic, disinfectant.)

in English: Japanese germander

in China: sui hua xiang ke ke

Teucrium japonicum Houtt. var. ***pilosum*** Pampanini (*Teucrium pilosum* (Pampanini) C.Y. Wu & S. Chow, nom. illeg.)

China.

See *Natural History* 9: 282, t. 56, f. 1. 1778 and *Nuovo Giorn. Bot. Ital.*, n.s., 17: 711. 1910, *Acta Phytotax. Sin.* 10: 335. 1965

(Antiseptic, disinfectant.)

in China: chang mao xiang ke ke

Teucrium lucidum L. (*Chamaedrys lucida* (L.) Moench)

Europe.

See *Syst. Nat.* ed. 10, 2: 1095. 1759, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 383. 1794

(For wounds, boils, swellings.)

Teucrium marum L. (*Chamaedrys marum* (L.) Moench)

Mediterranean, Spain, Egypt.

See *Sp. Pl.*: 564. 1753, *Methodus*: 384. 1794

(Expectorant, diuretic, stimulant, diaphoretic.)

Teucrium polium L. (*Chamaedrys polium* (L.) Raf.)

Mediterranean.

See *Species Plantarum* 566. 1753, *Fl. Tellur.* 3: 85. 1837 and *Taxon* 30: 852. 1981

(For wounds, abscesses, boils, piles, swellings, antiinflammatory, antiseptic.)

Teucrium pyrenaicum L. (*Polium pyrenaicum* (L.) Mill.)

Europe, Spain.

See *Species Plantarum* 2: 566. 1753, *The Gardeners Dictionary*: ... eighth edition 6. 1768

(For stomachache.)

Teucrium quadrifarium Buchanan-Hamilton (*Teucrium fortunei* Benthams; *Teucrium fulvoaureum* H. Léveillé; *Teucrium fulvum* Hance; *Teucrium kouytchense* H. Lévé; *Teucrium kouytchouense* H. Léveillé; *Teucrium quadrifarium* Wight ex Hook.f.; *Teucrium quadrifarium* Buchanan-Hamilton ex D. Don; *Teucrium quadrifarium* var. *kouytchense* (H. Lévé.) McKean; *Teucrium vestitum* Wall. ex Steud., nom. inval.)

Pakistan, India, China.

See *Prodr. Fl. Nepal.* 108–109. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 583. 1848, *Ann. Bot. Syst.* 3: 270. 1852 and *Repert. Spec. Nov. Regni Veg.* 8(182–184): 426. 1910, *Notes Roy. Bot. Gard. Edinburgh* 40: 188. 1982

(Stimulant, stomachic, for intestinal problems.)

in English: fourfile germander

in China: tie zhou cao

Teucrium scordium Linnaeus (*Chamaedrys scordium* (L.) Moench)

Europe, China.

See *Species Plantarum* 2: 565. 1753, *Methodus* 384. 1794, *Flora Germanica Excursoria* 314. 1831 and Wu Cheng-yih & Li Hsi-wen, eds. *Labiatae. Fl. Reipubl. Popularis Sin.* 65(2): 1–649, 66: 1–647. 1977

(Diuretic, astringent, antiseptic, to treat wounds, fevers, inflammations.)

in China: suan wei xiang ke ke

Teucrium scordium L. subsp. ***scordioides*** (Schreb.) Arcang. (*Scordium scordioides* (Schreb.) Fourr.; *Teucrium amplexicaule* Wallr.; *Teucrium corbariense* Pourr. ex Nyman; *Teucrium lanuginosum* Hoffmanns. & Link; *Teucrium petkovii* Urum.; *Teucrium scordioides* Schreber; *Teucrium scordioides* var. *lanuginosum* (Hoffmanns. & Link) Nyman; *Teucrium scordium* subsp. *scordioides* (Schreb.) Maire & Petitm.)

Europe, China.

See *Plantarum Verticillatarum Unilabiatarum Genera et Species* 37. 1774, *Fl. Portug.* 1: 84. 1809, *Linnaea* 14: 594. 1840, *Ann. Soc. Linn. Lyon*, n.s., 17: 138. 1869, *Consp. Fl. (Diuretic, astringent, antiseptic, to treat wounds, boils, rash, fevers, inflammations.)

in China: zhao ze xiang ke ke

Teucrium scorodonia L. (*Monochilon cordifolius* Dulac; *Scorodonia heteromalla* Moench; *Scorodonia scorodonia* (L.) H. Karst., nom. inval.; *Scorodonia solitaria* Stokes; *Scorodonia sylvestris* (Lam.) Link; *Scorodonia trivialis* Raf.; *Scorodonia vulgaris* Raf.; *Scorodonia vulgaris* (L.) Raf.; *Teucrium salviifolium* Salisb.; *Teucrium scorodonia* subsp. *gasparrinii* Nyman, nom. nud.; *Teucrium sylvestre* Lam.)

Europe, Tunisia.

See *Species Plantarum* 2: 564–565. 1753, *Methodus* 384. 1794, *Prodr. Stirp. Chap. Allerton*: 76. 1796, *Bot. Mat. Med.* 3: 37. 1812, *Specchio delle Scienze* 2: 171. 1814, *Labiatarum Genera et Species* 674. 1836, *Fl. Tellur.* 3: 85. 1837, *Fl. Hautes-Pyrénées*: 406. 1867, *Consp. Fl. Eur.*: 564. 1881,

Deutsche Flora. Pharmaceutisch-medicinische Botanik... 1016. 1883 and *Watsonia* 19: 134–137. 1992

(Stomachic, astringent, antiseptic, diuretic, to treat wounds, boils, rash, fevers, dropsy.)

Teucrium stocksianum Boiss.

Arabian Pen. to NW India.

See *Diagn. Pl. Orient.*, II, 4: 58. 1859

(Aerial parts as a tonic, to treat jaundice, fever and malaria, skin irritation, itching, to treat insect bites, to reduce stomach gas.)

in Pakistan: hussain booti, kalpura

Teucrium trifidum Retz. (*Ajuga capensis* (Thunb.) Pers.; *Teucrium capense* Thunb.; *Teucrium trifidum* Schldl.)

South Africa.

See *Observ. Bot.* 1: 21. 1779, *Prodr. Pl. Cap.*: 95. 1800, *Syn. Pl.* 2: 109. 1806, *Linnaea* 20: 609. 1847

(Leaves infusion stomachic, for piles.)

Teucrium viscidum Blume

Trop. & Subtrop. Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 14: 827. 1825 and *Taiwania* 41(2): 81–90. 1996

(To treat wounds, boils, rash, fevers.)

in English: viscid germander

in China: shan huo xiang, xue jian chou

Thalia L. Marantaceae

Named for the German physician Johannes Thal (Thalius), 1542/1543–1583, botanist, *Stadtphysikus* in Stolberg am Harz, author of *Sylva Hercynia*. Francofurto ad Moenum [Frankfurt a.M.] 1588; see Carl Linnaeus, *Species Plantarum*. 2: 1193. 1753 and *Genera Plantarum*. Ed. 5. 3. 1754, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 874. Ansbach 1852 and *Anales Inst. Biol. Univ. Nac. Mexico* 21(2): 319–343. 1951, *Fieldiana, Bot.* 24(3): 207–221. 1952, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 369. 1965, Richard J. Durling, *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 806. Bethesda, Maryland 1967, *Nordic J. Bot.* 1(1): 48–56. 1981, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 638. 1996.

Thalia dealbata Fraser (*Malacarya dealbata* (Fraser) Raf.; *Maranta dealbata* (Fraser) A. Dietr.; *Peronia stricta* F. Delaroché; *Spirostalis biflora* Raf.; *Spirostylis biflora* Raf.; *Thalia barbata* Small; *Thalia dealbata* Link, nom. illeg.; *Thalia dealbata* Fraser)

North America.

See *Thaiszia* t. 1. 1794, *Transactions of the Linnean Society of London* 8: 340. 1807, *American monthly magazine and critical review* 1: 190. 1819, *Jahrbücher der Gewächskunde* 1(3): 21. 1820, *Species Plantarum* 1: 24. 1831, *Fl. Tellur.* 4: 51. 1838, Bentley, R. and H. Trimen. *Medicinal Plants...* 4 vols. in 42 parts. London. Vol. 4, p. 265. [1875–]1880 and *Flora of the Southeastern United States* 308, 1329. 1903

(A remedy for cough.)

in English: powdery thalia, water canna

Thalia geniculata L. (*Maranta flexuosa* C. Presl; *Maranta geniculata* (L.) Lam.; *Renalmia geniculata* (L.) D. Dietr.; *Thalia altissima* Klotzsch; *Thalia angustifolia* C. Wright ex Griseb.; *Thalia coerulea* Ridl.; *Thalia dipetala* Gagnep.; *Thalia divaricata* Chapm.; *Thalia erecta* Vell.; *Thalia geniculata* fo. *rheumoides* Shuey; *Thalia geniculata* var. *pubescens* Körn.; *Thalia geniculata* var. *villosa* Körn. ex K. Schum.; *Thalia schumanniana* De Wild.; *Thalia trichocalyx* Gagnep.; *Thalia welwitschii* Ridl.)

Tropical Africa, South America.

See *Species Plantarum* 2: 1193. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 9, t. 1, f. 2. 1791, *Reliquiae Haenkeanae* 1(2): 107. 1827, *Florae Fluminensis Icones* 1: t. 17. 1827[1831], *Synopsis Plantarum* 1: 14. 1839, *Reisen in Britisch-Guiana* 3: 917. 1848, *Flora of the southern United States* 465. 1860, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35: 74. 1862, *Catalogus plantarum cubensium ...* 256–257. 1866, *Journal of Botany, British and Foreign* 25: 132. 1887 and *Das Pflanzenreich* 4: 173. 1902, *Bulletin de la Société Botanique de France* 51: 180–182. 1904, *Darwiniana* 6(2): 127–178. 1943, *Anales Inst. Biol. Univ. Nac. Mexico* 21(2): 319–343. 1951, *Fieldiana, Bot.* 24(3): 207–221. 1952, *Darwiniana* 11(3): 457–561. 1957, *Fl. Prov. Buenos Aires* 4(1): 520–535. 1968, *Rhodora* 77: 211. 1975, *Nordic J. Bot.* 1: 55. 1981, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 629–665. 2003

(Leaves astringent, febrifuge, for diarrhea and fevers. Magic, ritual, stem as divining rod.)

Thalictrum L. Ranunculaceae

Taliktron is a name used by Dioscorides for a plant with coriander-like leaves, Latin *thalictrum* or *thalitrium* applied by Plinius to a plant, meadow-rue; see *Species Plantarum* 1: 545–547. 1753, *Regni Vegetabilis Systema Naturale* 1: 171. 1818[1817], Lecoyer, J.C. “Monographie du genre *Thalictrum*.” *Bull. Soc. Roy. Bot. Belgique* 24: 78–324. 1885 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(98): 877–880, f. 15. 1929, *Rhodora* 46(551): 391–445. 1944, *Fieldiana, Bot.* 24(4): 243–256. 1946, *J. Fac. Sci. Univ. Tokyo, Bot.* 11(3–4): 107, 125–126. 1972, *Fl. Reipubl. Popularis Sin.* 27: 541, 588–589, 616–621. 1979, *Taxon* 41: 574. 1992, *Acta Phytotax. Geobot.* 43(1): 55–57. 1992, *Taxon* 44: 611–612. 1995, H. Genaust, *Etymologisches*

Wörterbuch der botanischen Pflanzennamen. 638. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2190–2192. 2001, *Turczaninowia* 7(1): 78. 2004. *Thalictrum* is a taxonomically difficult genus.

Thalictrum alpinum L. (*Thalictrum alpinum* var. *hebetum* B. Boivin; *Thalictrum cheilanthoides* Greene; *Thalictrum duriusculum* Greene; *Thalictrum elegantulum* Greene; *Thalictrum leiophyllum* Greene; *Thalictrum monoense* Greene; *Thalictrum scopulorum* Greene; *Thalictrum subspensum* Greene)

India.

See *Sp. Pl.* 1: 545. 1753 and *Leaflets of Botanical Observation and Criticism* 2(5): 89–94. 1910, *Rhodora* 46(550): 356–358. 1944, *Flora Reipublicae Popularis Sinicae* 27: 589. 1979, *Not. Syst. Geogr. Inst. Bot. Akad. Nauk. Gruzinsk.* (Tbilisi). 36: 75–76. 1980, *Bot. Zhurn.* 65 (1): 51–59. 1980

(Root decoction tonic, purgative, diuretic, stimulant, used for dyspepsia, convalescence.)

in India: mamira, mamiran, mamri

Thalictrum aquilegifolium L.

Europe.

See *Species Plantarum* 1: 547. 1753 and *Nordic J. Bot.* 20: 520. 2001

(Roots infusion a bitter tonic, used for intestinal troubles, catarrh and for small wounds.)

in Japan: arikko, arikko-kutter

Thalictrum cultratum Wall. (*Thalictrum deciternatum* B. Boivin)

China, Pakistan, India. Herb, stalked ovate leaflets, small greenish-white flowers in lax many-branched clusters, ribbed flattened short-stalked achenes, slender curved beak

See *Plantae Asiaticae Rariores* (Wallich). 2: 26. 1831 and *Journal of the Arnold Arboretum* 26(1): 112–113, 115, pl. 1, f. 4–7, 23–24. 1945, *Taxon* 28: 627–628. 1979, *Taxon* 29: 712. 1980

(Leaves and flowers antibacterial, used for fever, diarrhea, boils, wounds, skin diseases. Root decoction used for convalescence, fevers, tonic, stimulant, against food poisoning.)

in China: gao yuan tang song cao

in India: mamri

in Nepal: nagghunensa

Thalictrum dasycarpum Fisch. & Avé-Lall. (*Leucocoma dasycarpum* (Fisch. & Avé-Lall.) Nieuwl.; *Thalictrum dasycarpum* var. *hypoglaucom* (Rydberg) B. Boivin; *Thalictrum hypoglaucom* Rydb.; *Thalictrum purpurascens* L. var. *dasycarpum* (Fisch. & Avé-Lall.) Trel.)

North America. Perennial herb, a variable species

See *Species Plantarum* 1: 545. 1753, *Gen. Pl.* ed. 5, 242. 1754, *Index Sem. Hort. Petrop.* 8: 72. 1842 and Boivin, B. “American Thalictra and their Old World allies.” *Rhodora* 46: 337–377, 391–445, 453–487. 1944, M.R. Gilmore, *Uses of Plants by the Indians ...* 28. 1991, Tamura, M. “A new classification of the family *Ranunculaceae*.” *Acta Phytotax. Geobot.* 43: 53–58. 1992

(Numerous alkaloids have been identified from plants of the genus, some with pharmacologic potential. Some exhibit antimicrobial activity; others inhibit growth of tumors or lower blood pressure in mammals. Used to reduce fever, cure cramps, as a stimulant for horses. A love charm.)

in English: meadow rue, purple meadow-rue

in North America: nisude-hi (Omaha-Ponca), skadiks, skariks (Pawnee), wazimna (Dakota)

Thalictrum delavayi Franchet

China.

See *Bull. Soc. Bot. France* 33: 367. 1886

(Stimulant.)

in China: pian chi tang song cao

Thalictrum delavayi Franchet var. ***delavayi*** (*Thalictrum delavayi* var. *parviflorum* Franchet; *Thalictrum diptero carpum* Franchet; *Thalictrum duclouxii* H. Léveillé)

China.

See *Bull. Soc. Bot. France* 33: 367–368. 1886 and *Repertorium Specierum Novarum Regni Vegetabilis* 7(137–139): 98. 1909

(Stimulant.)

in China: pian chi tang song cao

Thalictrum dioicum Linnaeus

North America. Perennial herb, leafy, leaves tripartite, clusters of drooping greenish-white flowers on long stalks

See *Sp. Pl.* 1: 545. 1753

(Roots used to treat diarrhea and vomiting and for heart palpitations.)

in North America: early meadow-rue, pigamon dioïque, quicksilver-weed

Thalictrum elegans Wall. ex Royle (*Thalictrum elegans* Jord.; *Thalictrum elegans* Wall.; *Thalictrum samariferum* B. Boivin)

Nepal.

See *Numer. List* [Wallich] n. 4728. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 51. 1834 and *Journal of the Arnold Arboretum* 26(1): 114, pl. 1, f. 31–32. 1945

(Plant paste applied to treat aching joints.)

in China: xiao ye tang song cao

in Nepal: chyaksep

Thalictrum fendleri Engelm. ex A. Gray (*Thalictrum amissum* Greene; *Thalictrum fendleri* var. *platycarpum* Trelease; *Thalictrum fendleri* var. *wrightii* (A. Gray) Trelease; *Thalictrum fendleri* var. *wrightii* Trel.; *Thalictrum platycarpum* (Trel.) Greene, nom. illeg.)

North America. Perennial herb

See *Mem. Amer. Acad. Arts*, ser. 2. 4(1): 5. 1849, *Proceedings of the Boston Society of Natural History* 23: 304. 1886, *Pittonia* 1(11): 166. 1888

(Decoctions prepared from the roots used to cure colds and gonorrhoea, and in ceremonies.)

in English: Fendler's meadow-rue

Thalictrum fendleri Engelm. ex A. Gray var. *fendleri* (*Thalictrum fendleri* var. *platycarpum* Trelease)

North America. Perennial herb

See *Mem. Amer. Acad. Arts*, ser. 2. 4(1): 5. 1849

(Decoctions prepared from the roots used to cure colds and gonorrhoea. Ceremonial.)

in English: Fendler's meadow-rue

Thalictrum foetidum L. (*Thalictrum foetidum* Gouan; *Thalictrum minus* L. var. *foetidum* (L.) Hook. f. & Thomson)

India, Himalaya, Pakistan, Central Nepal. Many-branched leafy perennial herb, wiry-stemmed, glandular hairy leaves, numerous small nodding greenish yellow flowers, ribbed flattened glandular achenes, enlarged lanceolate beak

See *Species Plantarum* 1: 545. 1753, *Flora Indica*: being a systematic account of the plants . . . 17. 1855 and *Taxon* 30: 702. 1981, *Bot. Zhurn.* 66(12): 1751–1755. 1981

(Useful in eye complaints. Veterinary medicine, insect repellent for domestic animals.)

in English: lesser meadow rue

in China: xian mao tang song cao

in India: haichingshah, mobje-dung chakchhoo

Thalictrum foliolosum DC. (*Thalictrum dalingo* Buch.-Ham. ex DC.; *Thalictrum foliolosum* Hook. f. & Thomson)

Nepal, Kashmir, SE Tibet, Burma. Tall perennial herb, erect, rigid, small yellow white flowers, panicles many-branched, green or purple sepals, strongly ribbed achenes, curved beak

See *Regni Vegetabilis Systema Naturale* [Candolle] 1: 175. 1817 [1818 publ. 1–15 Nov 1817], *Fl. Ind.* [Hooker f. & Thomson] 1: 14. 1855

(Used in Unani/Unani-Tibb medicine. Bitter, pungent tonic, slightly purgative, believed to improve the eyesight and relieve toothache. Pounded root eaten to cure malarial

fever. Roots decoction or powder antiperiodic, antiinflammatory, diuretic, aperient, purgative, tonic, to treat eye and skin diseases, fever and jaundice; root extract applied for the treatment of eye ailments; root juice for peptic ulcer and indigestion; root powder against snakebites; root paste applied around the forehead in headache, and also applied to treat itching of skin. Ash of the roots used for eye trouble. A paste made from *mamiri* roots and from seeds of *Datura stramonium* used for eczema. Veterinary medicine, root poultice to cure foot and mouth diseases of animals; root paste along with *Allium cepa* given orally for treating fever and shuffle in cattle.)

in India: barmat, bhamrol, chaitra, chireta, chitramul, gurbiani, jhalamala, keraita, makori, mami-ranchini, mamira, mamiran-chini, mamiri, mamiri shuprak, mimiri, pashmaran, peelijari, peelipari, penglajari, phalijari, pilagor, pilajari, pili jari, pili jarin, piligarhi, pilijari, piyaranga, shuprak, thangre-jhar, ubyakati

in Nepal: bajuri, bathuri, bhajuri, masino pate

Thalictrum glandulosissimum (Finet & Gagnepain) W.T. Wang & S.H. Wang (*Thalictrum foetidum* Linnaeus var. *glandulosissimum* Finet & Gagnepain)

China.

See *Bull. Soc. Bot. France* 50: 618. 1903, *Fl. Reipubl. Popularis Sin.* 27: 567. 1979

(Emetic.)

in China: jin si ma wei lian

Thalictrum glandulosissimum (Finet & Gagnepain) W.T. Wang & S.H. Wang var. *glandulosissimum* (*Thalictrum foetidum* Linnaeus var. *glandulosissimum* Finet & Gagnepain)

China.

See *Bull. Soc. Bot. France* 50: 618. 1903, *Fl. Reipubl. Popularis Sin.* 27: 567. 1979

(Emetic.)

in China: jin si ma wei lian

Thalictrum javanicum Blume

Java, China.

See *Bijdragen tot de flora van Nederlandsch Indië* 2. 1825, *Plantae Delavayanae* 16, pl. 5. 1889 and *Bulletin de l'Herbier Boissier*, sér. 2, 6(6): 504. 1906, *Fl. Reipubl. Popularis Sin.* 27: 617. 1979, *Cytologia* 50: 759–768. 1985, *Bot. J. Linn. Soc.* 152: 15–26. 2006

(Leaves germicidal, used in skin disorders and sores. Leaf paste and its decoction applied on sores and other skin diseases. Roots febrifuge, also for eyes troubles. Veterinary medicine, leaves crushed with mustard oil and applied on the bodies of animals as a germicidal.)

in China: zhao wa tang song cao

in India: kerotseidaru, mamiri

Thalictrum javanicum Blume var. ***javanicum*** (*Thalictrum argyi* H. Léveillé & Vaniot; *Thalictrum glyphocarpum* Wight & Arnott; *Thalictrum lecoyeri* Franchet; *Thalictrum sessile* Hayata)

Java, China.

See *Bijdr. Fl. Ned. Ind.* 2. 1825, *Prodr. Fl. Ind. Orient.* 1: 2. 1834, Franchet, Adrien René (1834–1900), *Plantae Delavayanae*: plantes de Chine/recueillies au Yun-nan par l'Abbe Delavay et decrites par A. Franchet. Paris, 1889 [*Plantae Delavayanae* sive Enumeratio plantarum quas in provincia chinensi Yun-nan, collegit J.-M. Delavay ...] and *Bulletin de l'Herbier Boissier*, sér. 2, 6(6): 504. 1906, *Icon. Pl. Formosan.* 3: 6. 1913, *Fl. Reipubl. Popularis Sin.* 27: 617. 1979

(Leaves germicidal, used in skin disorders and sores. Leaf paste and its decoction applied on sores and other skin diseases. Roots febrifuge, also for eyes troubles. Veterinary medicine, leaves crushed with mustard oil and applied on the bodies of animals as a germicidal.)

in China: zhao wa tang song cao

in India: kerotseidaru, mamiri

Thalictrum minus L. (*Thalictrum caffrum* Eckl. & Zeyher; *Thalictrum kochii* Fr.; *Thalictrum transsilvanicum* Schur)

Europe.

See *Species Plantarum* 1: 546. 1753, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 1. [Dec 1834–Mar 1835], *Verh. Siebenb. Ver. Naturw.* iii. (1852) 84. 1852 and *Nat. Monspel., Sér. Bot.* 29: 1–64. 1979

(Roots in fever and eye complaints. Leaves infusion useful in fever.)

in China: ya ou tang song cao

in India: mabje dung

Thalictrum minus L. subsp. ***majus*** (Crantz) Rouy & Fauc. (*Thalictrum majus* Crantz; *Thalictrum minus* var. *majus* (Crantz) Hook. f. & Thomson)

India, Europe.

See *Species Plantarum* 1: 546. 1753, *Stirpium Austriarum Fasciculus* 2: 80. 1763, *Flora Indica*: being a systematic account of the plants . . . 17. 1855, *Flore de France* 1: 16. 1893

(Roots applied in eye disorders. Roots and leaves useful in fever and eye complaints.)

Thalictrum occidentale A. Gray (*Thalictrum occidentale* var. *macounii* B. Boivin; *Thalictrum occidentale* var. *palousense* H. St. John)

North America. Perennial herb

See *Proc. Amer. Acad. Arts.* 8: 372. 1872 and *Fl. S.-E. Washington* (St. John) 158. 1937, *Rhodora* 46(552): 454–455. 1944

(Dried seeds infusion used for headaches, colds, chills, eye trouble, sore legs, catarrh, fever, and to improve blood circulation.)

in English: meadowrue, western meadow-rue

Thalictrum pauciflorum Royle (*Thalictrum pauciflorum* Raf.; *Thalictrum pauciflorum* Steph. ex Lecoy.; *Thalictrum pauciflorum* Schur)

Himalaya.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 52. 1834

(Roots used in eye diseases.)

in India: chota mamira

Thalictrum pedunculatum Edgew.

India, Himalaya.

See *Transactions of the Linnean Society of London* 20(1): 27. 1846 [1851 publ. 29 Aug 1846]

(Root extract taken as a tonic, purgative, also in eye troubles.)

Thalictrum polycarpum (Torrey) S. Watson (*Thalictrum fendleri* Engelmann ex A. Gray var. *polycarpum* Torrey)

North America. Perennial herb

See *Pacif. Railr. Rep.* 4(5): 61. 1857, *Proc. Amer. Acad. Arts.* 14: 288. 1879

(Stems and roots poisonous when ingested by humans or cattle. A wash for headaches, an applications for sprains, and a universal charm and panacea.)

in English: tall western meadow-rue

Thalictrum przewalskii Maximowicz

China.

See *Bull. Acad. Imp. Sci. Saint-Petersbourg* sér. 3, 23: 305. 1877

(Febrifuge.)

in China: chang bing tang song cao

Thalictrum pubescens Pursh (*Thalictrum canadense* Mill. var. *hebecarpum* (Fernald) House; *Thalictrum carolinianum* Bosc ex DC. var. *subpubescens* DC.; *Thalictrum perelegans* Greene; *Thalictrum polygamum* Muhlenberg ex Sprengel; *Thalictrum polygamum* Sprengel, an invalid name; *Thalictrum polygamum* var. *hebecarpum* Fernald; *Thalictrum polygamum* var. *intermedium* B. Boivin; *Thalictrum polygamum* var. *pubescens* (Pursh) K.C. Davis; *Thalictrum pubescens* var. *hebecarpum* (Fernald) B. Boivin; *Thalictrum pubescens* Pursh var. *hepaticum* (Greene) Keener; *Thalictrum viride* Greene)

North America. Perennial herb

See *The Gardeners Dictionary*: ... eighth edition n. 5. 1768, *Trans. Amer. Philos. Soc.* 3: 172. 1793, *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 388–389. 1813, *Regni Vegetabilis Systema Naturale* 1: 174. 1817[1818] and *Minnesota Botanical Studies* 2: 514. 1900, *Rhodora* 10(111): 49. 1908, *Leaflets of Botanical Observation and Criticism* 2(3): 56. 1910, *New York State Museum Bulletin* 254: 346. 1924, *Rhodora* 46(552): 479–480, f. 112a-b. 1944, *Le Naturaliste Canadien* 93(5): 646. 1966

(A wash for head and neck, to stop nosebleeds, and to treat gall.)

in English: king-of-the-meadow, late meadow-rue, meadow-weed, muskrat-weed, pigamon pubescent, tall meadow-rue

Thalictrum pubescens Pursh var. *pubescens*

North America. Perennial herb

See *The Gardeners Dictionary*: ... eighth edition n. 5. 1768, *Trans. Amer. Philos. Soc.* 3: 172. 1793, *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 388–389. 1813, *Regni Vegetabilis Systema Naturale* 1: 174. 1817[1818] and *Minnesota Botanical Studies* 2: 514. 1900, *Rhodora* 10(111): 49. 1908, *Leaflets of Botanical Observation and Criticism* 2(3): 56. 1910, *New York State Museum Bulletin* 254: 346. 1924, *Rhodora* 46(552): 479–480, f. 112a-b. 1944, *Le Naturaliste Canadien* 93(5): 646. 1966

(A wash for head and neck, to stop nosebleeds, and to treat gall.)

in English: king-of-the-meadow, late meadow-rue, meadow-weed, muskrat-weed, pigamon pubescent, tall meadow-rue

Thalictrum ramosum B. Boivin

China.

See *J. Arnold Arbor.* 26(1): 115, pl. 1, f. 12–15. 1945

(Blood purifier, tonic.)

in China: duo zhi tang song cao

Thalictrum reniforme Wall. (*Thalictrum menthosma* Stocks ex Lecoy.; *Thalictrum neurocarpum* Royle)

India, Central Nepal, Bhutan, Himalaya. Slender perennial, leaflets and flower clusters glandular or minutely hairy, hanging large mauve flowers

See *Plantae Asiaticae Rariores* (Wallich). 2: 26. 1831, *Ill. Bot. Himal. Mts.* [Royle] 51. 1833–1840, *Bull. Soc. Roy. Bot. Belgique* xxiv. (1885) 291. 1885

(Used in Unani. Aerial parts used as general antidote, anti-malarial, analgesic. Roots purgative, diuretic, tonic, blood purifier. Juice from the roots used for treating eye problems, cataract, toothache, skin diseases, acute diarrhea, abdominal pain, intermittent fevers, dyspepsia, applied in piles, eczema, boils.)

in Bhutan: sngo-sprin

in India: mamira

Thalictrum reticulatum Franchet

China.

See *Bulletin de la Société Botanique de France* 33: 371. 1886, *Pl. Delav.* 17. 1889 and *Flora Reipublicae Popularis Sinicae* 27: 618. 1979

(For kidney troubles.)

in China: wang mai tang song cao

Thalictrum reticulatum Franchet var. *reticulatum*

China.

See *Bull. Soc. Bot. France* 33: 371. 1886, *Pl. Delav.* 17. 1889 and *Flora Reipublicae Popularis Sinicae* 27: 618. 1979

(For kidney troubles.)

in China: wang mai tang song cao

Thalictrum rhynchocarpum Quart.-Dill. & A. Rich. (*Thalictrum chymocarpum* Dill. ex Walp.; *Thalictrum chymocarpum* Walp.; *Thalictrum innitens* B. Boivin; *Thalictrum longepedunculatum* Hochst. ex Steud.; *Thalictrum longepedunculatum* Hochst. & Steud. ex Steud., nom. inval.; *Thalictrum longepedunculatum* Sennen; *Thalictrum mannii* Hutch.; *Thalictrum mannii* Hutch. ex Hutch. & Dalziel)

Ethiopia. Herb, hollow, erect, brittle, leaning, weak, purple-brown flowers

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 14: 262. 1840, *Nomenclator Botanicus* [Steudel], ed. 2. 2: 676. 1841, *Annales Botaniques Systematicae* (Walpers) 2: 5. 1851 and *Kew Bull.* 1927, 154. 1927, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 66. 1927, *Bull. Žurn.* (Moscow & Leningrad) 76: 905–907. 1991, *The Canadian Field-Naturalist* 108(1): 93. 1994

(Veterinary medicine, magic, the flowers and ground plants.)

in English: few-flower meadow-rue, few-flowered meadow-rue, fewflower meadowrue, mountain meadow-rue

in China: san hua tang song cao

Thalictrum squamiferum Lecoyer (*Schlagintweitiella fumarioides* Ulbrich; *Schlagintweitiella glareosa* (Handel-Mazzetti) Ulbrich; *Thalictrum cultratum* Wallich var. *tsangense* Brühl; *Thalictrum glareosum* Handel-Mazzetti)

China.

See *Pl. Asiat. Rar.* (Wallich). 2: 26. 1831, *Bulletin de la Société Royale de Botanique de Belgique* 16: 227. 1880 [1877], *Annals of the Royal Botanic Garden. Calcutta.* 5(2): 72, pl. 102, f. 3, 6, 7, 11, 15, 18. 1896 and *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse.* Wien 62: 218. 1925, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(98): 877–880, f. 15. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12(113): 355. 1935, *Flora Reipublicae Popularis Sinicae* 27: 620. 1979

(Astringent, for diarrhea, for rheumatism.)

in China: shi li tang song cao

Thalictrum thalictroides (L.) A.J. Eames & B. Boivin (*Anemone thalictroides* L.; *Anemonella thalictroides* (L.) Spach; *Syndesmon thalictroides* (L.) Hoffmanns.; *Syndesmon thalictroides* (L.) Hoffmanns. ex Britton; *Thalictrum anemoides* Maxim.)

North America. Perennial herb, slender, small ovate stem leaves, basal leaves whorled tripartite, open white flowers

See *Species Plantarum* 1: 542. 1753, *Flora* 15(2, Intelligenzbl. 4): 34. 1832, *Histoire Naturelle des Végétaux. Phanérogames* 7: 240. 1839 and *Bulletin de la Société Botanique de Belgique* 89: 319. 1957, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 19–20. 1995

(Potentially poisonous. Roots antiemetic, astringent, an infusion taken for diarrhea, to check vomiting, piles.)

in English: rue-anemone, windflower

Thalictrum uncatum Maximowicz

China.

See *Flora Reipublicae Popularis Sinicae* 27: 617–618. 1979

(For fevers, malaria.)

in China: gou zhu tang song cao

Thalictrum venulosum Trel. (*Leucocoma lunellii* (Greene) Lunell; *Leucocoma thyrsoides* (Greene) Lunell; *Leucocoma thyrsoides* unranked *sylvana* (Lunell) Lunell; *Thalictrum campestre* Greene; *Thalictrum lunellii* Greene; *Thalictrum thyrsoides* Greene; *Thalictrum thyrsoides* var. *silvanum* Lunell)

Canada, USA.

See *Proceedings of the Boston Society of Natural History* 23: 302. 1886

(On wounds and blisters.)

in English: northern meadow-rue, veined meadow-rue, veiny meadow-rue

Thamnosma Torrey & Frémont Rutaceae

Greek *thamnos* ‘a shrub, bush’ with *osme* ‘smell, odour, perfume’, see *Report of the Exploring Expedition to the Rocky Mountains in the year 1842.* 313. 1845.

Thamnosma montanum Torrey & Frémont (*Thamnosma montana* Torr. & Frém.)

North America. Perennial subshrub

See *Report of the Exploring Expedition to the Rocky Mountains in the year 1842.* 313. 1845

(Plant decoction for gonorrhoea. Stem decoction taken as analgesic, tonic, for chest pain, smallpox, cold, female complaints. Leaves decoction emetic, laxative. Powdered plant used to keep snakes away. Ceremonial, magico-religious beliefs, spiritual, plant infusion drunk by medicine men as hallucinogen. Veterinary medicine.)

in English: turpentine-broom, turpentinebroom

Thaumatococcus Benth. Marantaceae

Greek *thauma*, *thauastos* ‘a wonder’, *thauastos* ‘wonderful, marvellous, strange’ and *kokkos* ‘berry’, see *Genera Plantarum* 3: 652. 1883.

Thaumatococcus daniellii (Benn.) Benth. (*Donax danielii* (Benn.) Roberty; *Monostiche daniellii* Horan.; *Phrynium danielii* Benn.; *Thaumatococcus daniellii* (Benn.) Benth. & Hook. f.)

Tropical Africa. Herb, slender creeping rhizomes, flowers white, 3-winged crimson fruits, hard shining black seeds

with creamy aril and surrounded by very sweet gelatinous pulp, fruits and seeds eaten

See *Pharmaceutical Journal* 14: 161. 1855, *Gartenflora* 7: 88. 1858, *Prodr. Monogr. Scitam.*: 13. 1862, *Genera Plantarum* 3: 652. 1883 and *Fl. Ouest-Afr.*: 360. 1954

(Fruits and leaves laxative, for liver disorders. Roots decoction sedative, used for madness and insanity.)

in Ghana: aklamakpa, ana, anworam, aworamaba, aworamase
in Yoruba: katemfe, kekerenfe, ketenfe

in Zaire: kasabulxu

Thelasis Blume Orchidaceae

Greek *thele* ‘nipple’, presumably referring to the shape of the rostellum, emarginate and attenuate; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 385, t. 75. Batavia (Sep.-Dec.) 1825.

Thelasis micrantha (Brongn.) J.J. Sm. (*Oxyanthera decurva* (Hook.f.) Hook.f.; *Oxyanthera decurva* Hook.f.; *Oxyanthera micrantha* Brongn.; *Phreatia contracta* (Blume) Miq.; *Thelasis carinata* Rchb.f., nom. illeg.; *Thelasis carinata* Blume; *Thelasis contracta* Blume; *Thelasis decurva* Hook.f.; *Thelasis micrantha* J.J. Sm.)

New Guinea, Vietnam. Epiphyte

See *Bijdr. Fl. Ned. Ind.* 8: 386. 1825, *Voy. Monde, Phan.* [Duperrey] 197. t. 37. 1829, *Mus. Bot.* 2(9–12): 187. 1856, *Bonplandia* (Hannover) 5: 37. 1857, *Fl. Ned. Ind.* 3: 655. 1859, *Fl. Brit. India* [J.D. Hooker] 6: 87. 1890, *Hooker's Icon. Pl.* 22: t. 2157. 1892 [1894 publ. Oct 1893] and *Orch. Java*: 495. 1905

(Pseudobulbs decoction drunk for gastritis.)

Thelepaepale Bremek. Acanthaceae

Greek *thele* ‘nipple’ and *pale* ‘pollen, any fine dust, ashes’, *paipale* ‘the finest flour or meal’, referring to the nipple-like spinules on the pollen grains, see *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde*, Tweede Sectie 41(1): 59, 187. 1944.

Thelepaepale ixiocephala (Benth.) Bremek. (*Strobilanthes ixiocephalus* Benth.; *Thelepaepale ixiocephalus* Bremek.)

India. Good fodder plant

See *Bijdragen tot de flora van Nederlandsch Indië* 781, 796. 1826 and *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Tweede Sect. 41(1): 188. 1944, Behl, P.N. and Captain, R.M. *Skin-Irritant and Sensitizing Plants Found in India*. New Delhi. 1979

(This species may cause painful itching, swelling and blistering when handled.)

in India: gangali, vakad, waiti

Thelepogon Roth ex Roemer & Schultes Poaceae (Gramineae)

Greek *thele* ‘nipple’ and *pogon* ‘beard’, possibly referring to the stamens. One species, tropical Africa, Asia, Indonesia. Panicoideae, similar to *Ischaemum*, type *Thelepogon elegans* Roth, see *Observationes Botanicae* 3: 25. 1783, *Systema Vegetabilium* 2: 46, 788. 1817, *Novae Plantarum Species* 62. 1821, *Systema Vegetabilium, editio decima sexta* 1: 299. 1825 [1824], *Synopsis Plantarum Glumacearum* 1: 360. 1854 and *Austrobaileya* 4(1): 105, f. 1. 1993.

Thelepogon elegans Roth (*Andropogon princeps* A. Rich.; *Jardinea abyssinica* Steud.; *Meoschium elegans* (Roth) Arn. & Nees; *Rhiniachne princeps* (A. Rich.) Hochst. ex Steud.; *Rhytachne principis* (A. Rich.) T. Durand & Schinz; *Sehima elegans* (Roth) Roberty; *Thelepogon elegans* Roth ex Roem. & Schult.; *Thelepogon elegans* Roem. & Schult.)

Tropical Africa, Namibia, Indonesia, SE Asia. Annual, coarse, stout, tufted, stilt-rooted, branching from the base, leaf blades lanceolate with clasping base, inflorescence a cluster of very fragile racemes, sessile spikelet awned, pedicelled spikelet absent or minutely vestigial, lower glume of sessile spikelet narrowly ovate, upper glume ridged, good pasturage, eaten by cattle when young, fodder, common in wet ground, disturbed sites, on black soil, ligh soil, weedy places

See *Flora Aegyptiaco-Arabica* 178. 1775, *Gramineae* 67–68. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 199–200. 1843, *Tentamen Florae Abyssinicae ...* 2: 470. 1850 and *Petite Flore de l'Ouest-Africain* 410. 1954

(Veterinary medicine, fed to horses as a bitter tonic.)

in Niger: bir-nya, bir-nya hâmo, borla, d'wâtamna, dhâtayia, han-handé, hârbigi

in Nigeria: âshârboen, daatà daatàà, daatanniyàà, daatanniyààr daacii, dachi, daddàatàà, dandata, data data, datanniya, datarniya, dwaatanna, dwaatarniya, gishirin dawaakii, han-hande, kagera kagum, labaho, tagarawal

in Senegal: engen etyerun, ondeuss

in India: donga tudi, gaddi poolu, ghasatki, kadi, karmod, thirpa, tirpha, tolia, tori barta

Thelypteris Schmidel Thelypteridaceae

Greek *thelypteris*, *thelys* ‘female’ and *pteris* ‘fern’, name used by Theophrastus (*HP*. 9.18.8) and Dioscorides for a fern, bracken; Latin *thelypteris*, *is*, Plinius applied to the female plant of the *filix* (fern polypody), see *Species Plantarum* 2: 1071–1077. 1753, *Icones Plantarum* 3, 45–48, t. 11, 13. 1763, *Familles des Plantes* 2: 20. 1763, *Genera Plantarum* 2: 757. 1791, *Journal für die Botanik* 1800(2): 16. 1801, *Dictionnaire classique d'histoire naturelle* 6: 588. 1824, *Enumeratio Plantarum Javae* 2: 172–173. 1828, *Hortus Regius Botanicus*

Berolinensis 2: 128. 1833, *Tentamen Pteridographiae* 146, 181–183, pl. 7, f. 9–11. 1836, *Plantae Javanicae Rariores* 5. 1838, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 18. 1840, *Botanische Zeitung* (Berlin) 6: 114–115. 1848, *Epimeliae Botanicae* 51. 1849, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 410–411. 1849, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 618–619. 1851, *Mémoires sur les Familles des Fougères, Gen. (Tuber powder with honey given for gastrointestinal disorders, small intestinal injuries and stomachache.)

in India: doda, tangya

Thermopsis R. Br. Fabaceae (Thermopsidae)

Like a lupin, from the Greek *thermos* 'lupin' and *opsis* 'like', referring to the yellow flower heads, see *Hortus Kewensis*;

or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 3: 3–4. 1811, *The Genera of North American Plants* 1: 282. 1818 and *Ann. Missouri Bot. Gard.* 27(2): 245–258. 1940.

Thermopsis barbata Benth. (*Anagyris barbata* Wall., nom. nud.; *Thermopsis atrata* Czefr.)

India, Bhutan. Perennial non-climbing herb

See *A Numerical List of Dried Specimens* [Wallich] n. 5341. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* 196, pl. 32, f. 1. 1835 and *Botaniceskie materialy Gerbarija Botaniceskogo instituta Uzbekistanskogo filiala Akademii nauk SSSR* 16: 218, f. 3. 1954

(Veterinary medicine, flowers and leaves given to cattle to expel gas from their stomachs.)

in China: zi hua ye jue ming

in India: binswa

Thermopsis inflata Cambess.

China. Perennial non-climbing herb

See *Voyage dans l'Inde* 4(Bot.): 35. 1835–1844

(Leaves used locally as an expectorant.)

in China: lun sheng ye ye jue ming

in India: shatmar

Thermopsis macrophylla Hook. & Arn. (*Thermopsis macrophylla* var. *agnina* J.T. Howell; *Thermopsis macrophylla* var. *macrophylla*)

North America. Perennial non-climbing herb

See *Ann. Missouri Bot. Gard.* 27(2): 245–258. 1940, *Ann. Missouri Bot. Gard.* 81: 714–742. 1994

(Cold decoction of leaves a wash for sore eyes.)

in English: California goldenbanner, false lupine, golden pea, Santa Inez goldenbanner

Thermopsis montana Torr. & A. Gray (*Thermopsis angustata* Greene; *Thermopsis fabacea* (Pall.) DC.; *Thermopsis fabacea* Torr.; *Thermopsis fabacea* var. *montana* (Nutt.) A. Gray; *Thermopsis rhombifolia* (Nutt. ex Pursh) Richardson; *Thermopsis rhombifolia* var. *montana* (Nutt.) Isely; *Thermopsis rhombifolia* var. *montana* (Nutt. ex Torr. & A. Gray) Isely; *Thermopsis stricta* Greene)

North America. Perennial non-climbing herb

See *Narrative of a Journey to the Shores of the Polar Sea* 737. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 99. 1825, *A Flora of North America: containing ...* 1(3): 388. 1840 and *Plantae Bakerianae* 3: 34. 1901, *Plantae Bakerianae* 3: 34. 1901, *Taxon* 24: 671–678. 1975, *Brittonia* 30(4): 470. 1978, *Ann. Missouri Bot. Gard.* 81(4): 732. 1994

(Plant decoction for cough, analgesic, for sore eyes. Poison-bean causes poisoning in cattle. Magic, ritual, plant used as a lotion for protection from witches.)

in English: mountain goldenbanner, poison bean

Thermopsis rhombifolia (Pursh) Richardson (*Cytisus rhombifolius* Nutt. ex Pursh; *Cytisus rhombifolius* Pursh; *Drepilia rhombifolia* (Pursh) Raf.; *Drepilia rhombifolia* (Nutt. ex Pursh) Raf.; *Scolobus rhombifolius* (Pursh) Raf.; *Scolobus rhombifolius* (Nutt. ex Pursh) Raf.; *Sophora fabacea* Pall.; *Thermia rhombifolia* (Nutt. ex Pursh) Nutt.; *Thermia rhombifolia* (Pursh) Nutt.; *Thermopsis angustata* Greene; *Thermopsis annulocarpa* A. Missouri Bot. Gard.* 81(4): 723, 732, 736. 1994

(This plant has been suspected since the late 1800s to be poisonous to cattle and horses. Flowers dried and used in fumigation for rheumatism; dried leaves burned and smoke inhaled for headaches, colds.)

in English: false lupine, golden-bean, poison-bean, prairie thermopsis

Thesium L. Santalaceae

Latin *thesion* and *thesium*, *ii*, an ancient name for a species of *Linaria*, toad flax, used by Plinius. According to some authors the genus was named after Theseus, hero of mythical legend, son of Aegeus, king of Athens, and Aethra, daughter of Pittheus, king of Troezen (in Argolis), or of the sea god, Poseidon, and Aethra; Greek *theseion* ‘the temple of Theseus’; see Carl Linnaeus, *Species Plantarum*. 1: 207–208. 1753, *Genera Plantarum*. Ed. 5. 97. 1754 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 378. 1989, *Preslia* 65(4): 319. 1993[1994], H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 640–641. 1996.

Thesium chinense Turczaninow (*Thesium decurrens* Blume ex A. Candolle; *Thesium rugulosum* Bunge ex A. DC.)

China.

See *Bull. Soc. Imp. Naturalistes Moscou* 10(7): 157. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 649. 1857 and *Fl. Pl. Herb. Chin. Bor.-Orient.* 2: 107. 1959

(Cardiac glycosides.)

in China: bai rui cao

in Japan: kana-biki-sô

Thesium laciniatum A.W. Hill (*Thesium cruciatum* A.W. Hill)

South Africa.

See *Bull. Misc. Inform. Kew* 1915: 33–34. 1915, *Bull. Misc. Inform. Kew* 1916, 231. 1916

(To treat gonorrhoea.)

Thesium lineatum L.f. (*Thesium ephedroides* A.W. Hill; *Thesium lineatum* Willd. ex A. DC.)

South Africa.

See *Suppl. Pl.* 162. 1782 [1781 publ. Apr 1782], *Prodr.* (DC.) 14(2): 672. 1857 and *Bulletin of Miscellaneous Information Kew* 1910: 183. 1910

(Fatal poisoning of cattle, goats and sheep. To treat gonorrhoea and uterine problems.)

Thesium viride A.W. Hill

Central African Republic. Hemiparasitic subshrub

See *Bulletin of Miscellaneous Information Kew* 1910: 238. 1910, *South African Journal of Chemistry* 41(2): 39–41. 1998

(Powdered aerial parts eaten for jaundice; branches decoction to treat liver problems, jaundice.)

Thespesia Soland. ex Corrêa Malvaceae

Greek *thespesios* ‘divine, wonderful’, referring to *Thespesia populnea*, a sacred plant in Tahiti, see *Annales du muséum national d’histoire naturelle* 9: 290–291, pl. 25, f. 1. 1807, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 477. 1824 and *Symbolae Antillarum* 7: 281. 1912, *Dansk Botanisk Arkiv* 4(7): 7–8, pl. 1. 1924, *Bulletin of the Torrey Botanical Club* 76: 97. 1949, *Fieldiana, Bot.* 24(6): 324–386. 1949, *Proc. Indian Acad. Sci.*, B 85: 156–159. 1977, *Cytologia* 46: 149–160. 1981.

Thespesia acutiloba (Baker f.) Exell & Mendonça (*Thespesia populnea* var. *acutiloba* Baker f.)

Mozambique, Natal, South Africa. Shrub or small tree

See *Journal of Botany, British and Foreign* 35: 51. 1897

(A decoction of the bark is taken against chronic dysentery.)

in English: small-leaves tulip tree, wild tulip tree

Thespesia danis Oliv.

Ethiopia, Somalia, Kenya and Tanzania. Shrub or small tree, edible fruit

See *Hooker’s Icon. Pl.* 14: t. 1336. 1881 and *Fl. Somalia* 2: 28. 1932

(Root decoctions taken against gonorrhoea, stomachache, pain in the spinal region, hematuria and swelling of the abdomen.)

in Tanzania: mkorwe

Thespesia lampas (Cav.) Dalzell & A. Gibson (*Azanza lampas* Alef.; *Azanza lampas* (Cav.) Alef.; *Bupariti lampas* (Cav.) Rothm.; *Hibiscus callosus* Blume; *Hibiscus lampas* Cav.; *Hibiscus tetralocularis* Roxb.; *Paritium gangeticum* G. Don; *Thespesia lampas* (Cav.) Dalzell ex Dalzell & A. Gibson; *Thespesia lampas* (Cav.) Dalzell; *Thespesia lampas* var. *thespesioides* (Benth.) Fryxell; *Thespesia sublobata* Blanco; *Thespesia thespesioides* (Benth.) Fryxell) (*Azanza* Alef., probably from *azania*, an old word meaning *black* in Zanzibar, or from a vernacular Mexican name.)

India, Vietnam, East Africa. Shrub or small tree, erect, slightly branched, branchlets stellate-tomentose, leaves ovate somewhat 3-lobed or nearly entire, flowers large borne in threes in the apex of the branches or at the axils of the

leaves, calyx green, corolla yellow bell-shaped, capsules ovoid with 4 or 5 valves, seeds with a brownish woolly floss, the glutinous substance from the inside of the rind of the fruit eaten

See *Species Plantarum* 2: 693. 1753, *Sem. Pl. Arbres* 5: 1760, *Monadelphiae Classis Dissertationes Decem* 3: 154, pl. 56, f. 2. 1787, *Annales du muséum national d'histoire naturelle* 9: 290. 1807, *Flora Brasiliae Meridionalis* (quarto ed.) 1: ed. fol. 198; ed. qu. 255. 1825, *Bijdragen tot de flora van Nederlandsch Indië* 2: 67. 1825, *A General History of the Dichlamydeous Plants* 1: 485. 1831, *The Bombay Flora* ... 19. 1861, *Botanische Zeitung. Berlin* 19: 298. 1861 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 53: 7. 1944, *Proceedings, Indian Academy of Sciences. Section B, Biological Sciences* 85: 156–159. 1977, *Taxon* 29: 535–536. 1980, *Cytologia* 47: 109–116. 1982, *J. Southw. Agric. Univ. (Chungking)* 9: 185–187. 1987

(Used in Ayurveda and Sidha. Root paste in water applied over ulcers and boils, also taken for diabetes; roots an antidote for snakebite; root juice given to treat typhoid; powdered root bark for malaria. Roots and fruits a remedy for gonorrhoea and syphilis. Fruits eaten against stomachache. Seeds given to children as an anthelmintic. Leaf decoction antiinflammatory. Twigs as toothbrush for bad breath. Magic, ritual, ceremonial, root tied with white thread on waist of delivering mother for quick delivery, after childbirth it should be taken off immediately.)

in China: bai jiao tong mian

(Poisonous, extremely toxic, all parts. Sap and seeds deadly toxic, poisonous to domestic animals and human beings; seed paste eaten for committing suicide. Latex reported to be irritant in some individuals; the milky juice highly toxic on account of its cardiac glycoside content, cardenolides are naturally occurring plant toxins which act primarily on the heart. Latex used as a vesicant, applied for suppuration of boils. Leaves boiled in water and bath taken to treat itching; leaves decoction antifertility; ghee applied on the leaf, warmed and tied over the wounds. Kernel used in external application for skin infections. Bark a powerful antiperiodic and febrifuge, diuretic, molluscicidal, larvicidal, antifungal, piscicidal, cathartic. Seed paste an arrow or ordeal poison. Crushed roots made into a paste applied on ulcers, venereal diseases and rubbed on penis to cure impotence; roots decoction used as wash in sore mouth and tongue, also taken in menstrual disorders. Ceremonial, flowers used for religious worship. Bark as fish poison.)

in Kenya: dika, gadu, kitungulu, kukube, mtunguru, muizu-wa-arisa, muizu wa kirisa, mutunguru, ohia

in Southern Africa: komkommerbos; isiKonze (Zulu); nko-bva (Eastern Transvaal)

in Tanzania: kishangalaji, mdudu, mtungu, mtunguru, mutungu, mwimachigulu, shingaaazi, umududu

Thilachium thomasii Gilg (*Thylachium thomasii* Gilg)

East Africa, Kenya. Shrub or bushy tree, evergreen, many-branched, brittle, rough leaves subsucculent, flowers white yellow, filaments milk white and crimson at the base, fruit longitudinally ribbed, horseradish-like smell, famine food

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 229. 1903

(Roots poisonous or potentially toxic.)

in East Africa: mtungulu, mtunguru

Thinouia Triana & Planch. Sapindaceae

See *Annales des Sciences Naturelles; Botanique*, série 4 18: 368–369. 1862 and *Fieldiana, Bot.* 24(6): 234–273. 1949.

Thinouia mucronata Radlk. (*Thinouia obliqua* Radlk.; *Thinouia repanda* Radlk.)

South America.

See *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 282. 1878, *Die Natürlichen Pflanzenfamilien* 3(Abt. 5): 308. 1895 and *Publ. Field Mus. Nat. Hist., Bot.* Ser. 13(3A/2): 291–391. 1956, *Bol. Soc. Argent. Bot.* 33(1–2): 77–83. 1997, *Bol. Soc. Argent. Bot.* 33(3–4): 185–190. 1998

(Stem used as fish poison.)

Thladiantha Bunge Cucurbitaceae

Greek *thlao*, *thlaein* ‘to break, to crush, pound’, *thladias* ‘eunuch’ and *anthos* ‘flower’, referring to the suppression of stamens, see *Enumeratio Plantarum, quas in China Boreali* 29–30. 1833 and *Kew Bulletin* 15: 363. 1962, *Guihaia* 4(1): 30. 1984, *Acta Phytotaxonomica Sinica* 31(1): 52. 1993.

Thladiantha cordifolia (Blume) Cogn. (*Luffa cordifolia* Blume)

SE Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 929. 1826, *Monographiae Phanerogamarum* 3: 424. 1881

(Roots for sores and swellings.)

Thladiantha dubia Bunge

China.

See *Enumeratio Plantarum, quas in China Boreali* 29–30. 1833

(Used for breast disorders, scrofula, carbuncle, lactation deficiency, softening hard masses, reducing swelling. Fruit and roots to treat bone fractures, dysentery, as an expectorant; root extract anti-hyperplasia of mammary gland.)

in China: chi bao, chih pao, tu kua, wang kua

Thladiantha henryi Hemsl.

China.

See *Journal of the Linnean Society, Botany* 23(155): 316. 1887

(Tubers for fever and headache.)

Thladiantha hookeri C.B. Clarke

India, China.

See *The Flora of British India* 2(6): 631. 1879

(Roots stomachic and analgesic.)

Thladiantha nudiflora Hemsl.

China.

See *Journal of the Linnean Society, Botany* 23(155): 316–317, pl. 8. 1887

(Roots antiseptic.)

Thladiantha sessilifolia Handel-Mazzetti (*Thladiantha sessilifolia* var. *sessilifolia*)

China.

See *Symb. Sin.* 7(4): 1061–1062. 1936, *Bull. Bot. Res.* 1: 76. 1981

(Roots antiseptic.)

in China: duan bing chi bao

Thlaspi L. Brassicaceae (Cruciferae)

From *thlaspi*, *thlaspis*, a Greek name for a cress (*thlao*, *thlaein* 'to break, to crush, pound'); Latin *thlaspi*, used by A. Cornelius Celsus and Plinius for a cress; see Carl Linnaeus, *Species Plantarum*. 2: 645–647. 1753, *Genera Plantarum*. Ed. 5. 292. 1754, *Mémoires du Muséum d'Histoire Naturelle* 7(1): 234. 1821, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 2: 289. 1831 and *Opera Botanica* 137: 1–42. 1999, Holmgren, N.H., P.K. Holmgren & A. Cronquist, "Vascular Plants of the Intermountain West, U.S.A., subclass Dilleniidae." *Intermountain Flora* 2B: 1–488. 2005.

Thlaspi alpestre L. (*Lepidium thlaspidioides* Pall.; *Thlaspi alpestre* Jacq.; *Thlaspi alpestre* C.C. Gmel.; *Thlaspi alpestre* Vill.; *Thlaspi alpestre* Luce; *Thlaspi thlaspidioides* (Pall.) Kitag.)

India. Leaves cooked as vegetable

See *Enum. Stirp. Vindob.* 116, 260. 1762, *Sp. Pl.*, ed. 2. 2: 903. 1763, *Reise durch verschiedene Provinzen des russischen Reichs* 3: 161. 1776 and *Report of the Institute of Scientific Research, Manchoukuo* 2: 293. 1938, *Taxon* 51(2): 536. 2002

(Dried powdered fruits taken to treat cough, kidney problems and vaginal discharge.)

in India: brega, treka

Thlaspi arvense Linnaeus (*Crucifera thlaspi* E.H.L. Krause; *Teruncius arvense* (L.) Lunell; *Teruncius arvensis* Lunell; *Thlaspi arvernense* Jord. ex Boreau)

Cosmopolitan. Weedy

See *Species Plantarum* 2: 645–647. 1753, *Fl. Centre France*, ed. 3 [Boreau] 2: 61. 1857 and *Deutschlands Flora, Abtheilung II, Cryptogamie* (Sturm) 6: 31, 150. 1902, *American Midland Naturalist* 4: 364. 1916, *Mem. Real Acad. Cienc. Art. "Chromosome counts of vascular plants of the island Seili in Nauvo, southwestern Finland." *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3:

1–12. 1982, *Botaniceskij Žurnal SSSR* 69(4): 511–517. 1984, *Le Naturaliste Canadien* 111: 447–449. 1984, *Sida* 13: 241–250. 1988, *Cathaya* 2: 191–197. 1990, Majak, W., McDiarmid, R.E., Benn, M.H., Willms, W.D. "Autolysis of *Thlapsi arvense* in bovine rumen fluid." *Phytochemistry (Oxf.)*, 30: 127–129. 1991, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 1174–1178. 1991, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Watsonia* 20: 63–66. 1994, *Watsonia* 21: 365–368. 1997

(The plant contains sufficient quantities of glucosinolates to be toxic, the allylthiocyanate (a glucosinolate) content is sufficient to cause sickness and death in cattle; poisoning, death and abortion occurred. Whole plant in renal disorders; aerial parts in swelling, edema and gonorrhoea, pneumonia, kidney disorders. Leaves used in washing wounds and cuts, also applied over wounds. Seeds diuretic, blood purifier, stimulant, applied for the treatment of lung diseases and kidney diseases, fevers, headaches, urinary tract disorders. Said that cattle feeding on the plant develop tainted milk.)

in English: fan weed, fanweed, field penny cress, French weed, Mithridate mustard, penny cress, stinkweed

in Bhutan: bre-ga

in China: xi ming, hsi ming, ta chi (= large shepherd's burse)

in India: bre-ga, bul-buli, bulbuli

in Tibetan: bre-ga

Thlaspi cochleariforme DC. (*Noccaea cochleariformis* (DC.) Á. Löve & D. Löve; *Noccaea exauriculata* (Kom.) Czerep.; *Thlaspi exauriculatum* Kom.)

India.

See *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 381. 1821 and *Botaniska Notiser* 128(4): 513. 1975[1976], *Bot. Zhurn.* 65 (5): 651–659. 1980, *Sosud. Rast. SSSR* 140. 1981

(Astringent, blood purifier, diuretic, used for rheumatism. Seeds stimulant.)

in China: shan xi ming

Thomandersia Baill. Thomandersiaceae

Thomandersia hensii De Wild. & T. Durand (*Scytanthus laurifolius* T. Anderson ex Benth.; *Scytanthus laurifolius* var. *sine-nomine* Büttner; *Thomandersia laurifolia* (T. Anderson ex Benth.) Baill.)

W. Tropical Africa. Shrub, erect, corolla cream-purplish

See *Genera Plantarum* 2: 1093. 1876, *Histoire des Plantes* (Baillon) 10: 456. 1891 and *Bulletin Jard. Botanique Etat* 36: 218, 224. 1966

(Leaves and bark antimalarial, febrifuge, for anemia.)

in Zaire: kasongo, tosongo

Thonningia Vahl Balanophoraceae

After the Danish botanist and traveller Peter Thonning, 1775–1848, plant collector, 1799–1803 with the Danish Ole Haaslund Smith (d. 1802) on a botanical expedition to Danish Guinea, now in Ghana; see Martin H. Vahl (1749–1804), *M. Vahlil ... Enumeratio Plantarum*. Hauniaie (& Lipsiaie) [1804–] 1805–1806, *Skripter af Naturhistorie-Selskabet* 6: 124. 1810, Heinrich Christian Friedrich Schumacher (1757–1830), *Beskrivelse af Guineiske Planter som ere fundne af Danske Botanikere isaer af Etatsraad Thonning*. [Copenhagen 1828–1829], A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Joseph Vallot (1854–1925), “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882 and Carl Frederik Albert Christensen (1872–1942), *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926 and *Den danske botaniske litteratur 1880–1911*. Kopenhagen 1913, C.D. Adams, “Activities of Danish botanists in Guinea, 1783–1850.” in *Transactions of the Historical Society of Ghana*. 3: 30–46. 1957, R.W.J. Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, Georg Nørregaard, *Danish settlements in West Africa 1658–1850*. Boston 1966, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 41, 80. 1971, Frank N. Hepper, *The West African Herbaria of Isert & Thonning*. Kew 1976, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Thonningia sanguinea Vahl (*Thonningia angolensis* Hemsl.; *Thonningia coccinea* Mangenot; *Thonningia dubia* Hemsl.; *Thonningia elegans* Hemsl.; *Thonningia sessilis* Lecomte; *Thonningia ugandensis* Hemsl.)

Tropical Africa. Herb, root parasitic, rhizomatous, woody horizontal stem, leaves reduced to spiny scales, scales bright red, red flower emerging alone from ground

See *Skripter af Naturhistorie-Selskabet* 6: 125, t. 6. 1810, *Journal de Botanique* (Morot) 10: 234. 1896 and *Bulletin of Miscellaneous Information Kew* 1911: 151–152. 1911

(Whole plant pounded used as an astringent and aphrodisiac, for dysentery and venereal diseases. Plant poultice drunk for palpitation of the heart; rhizome poultice for malaria, yaws and as a vermifuge. Flower heads vermifuge, used for sore throat, and for babies who have difficulty with walking. Flowers, roots and stem vermifuge, for bronchial asthma, skin diseases, dysentery, sore throat. Arrow poison.)

in Yoruba: ade ile, adele, oyaile, oyale

in Congo: lilanda

in Gabon: eyeta ngomba, tatunoungi

in Ghana: kwabedwaa, nantenten

Thottea Rottb. Aristolochiaceae

See *Nye Samling af det Kongelige Norske Videnskabers Selskabs Skrifter* 2: 529. 1783.

Thottea dependens (Planch.) Klotzsch (*Lobbia dependens* Planch.; *Thottea dependens* Klotzsch)

Malaysia.

See *Nye Samling af det Kongelige Norske Videnskabers Selskabs Skrifter* 2: 529. 1783, *London Journal of Botany* 6: 144, t. 3. 1847, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 589. 1859

(Reported to be irritant. The bark is rubefacient. For skin complaints, pound the leaves and poultice.)

Malay name: telinga beruang

Thottea grandiflora Rottb.

Malaysia. Shrub or treelet, simple leaves densely velvety hairy below, funnel-shaped purplish flowers, 4-angled capsule finely hairy

See *Nye Samling af det Kongelige Norske Videnskabers Selskabs Skrifter* 2: 529–530, t. 2. 1783 and *Beitrag zur Biologie der Pflanzen* 68: 51–71. 1994

(Roots tonic, antiseptic, for skin complaints.)

Malay name: seburut

Thottea hainanensis (Merr. & Chun) Ding Hou (*Apama hainanensis* Merr. & Chun)

China.

See *Encyclopédie Méthodique, Botanique* 1: 91. 1783 and *Sunyatsenia* 2(3–4): 220–221, pl. 43. 1935, *Blumea* 27(2): 321. 1981

(For skin complaints.)

in China: hai nan xian guo dou ling

Thottea macrophylla Becc.

Borneo. Herb

See *Nuovo Giorn. Bot. Ital.* ii. (1870) 5. 1870

(Roots decoction drunk for gastric pain.)

in Sarawak: udu mayang daun

Thottea parviflora Ridley

Malaysia.

See *Journal of the Straits Branch of the Royal Asiatic Society* 57: 89. 1911

(For coughs, chew the root with betel. Veterinary medicine, leaf crush/poultice for dermatitis in dog.)

Malay name: chudok

Thottea siliquosa (Lam.) Ding Hou (*Apama siliquosa* Lam.; *Thottea siliquosa* Lam.)

India, SE Asia, Sri Lanka. Shrub or undershrub, pinkish-purple flowers in axillary cymes, linear cylindrical capsules 4-gonous

See *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 91. 1783 and *Blumea* 27(2): 327. 1981

(Fruits eaten to cure stomachache. Leaves juice for stomach ailments. Roots and leaves as sedative to treat snakebites; ground root mixed with water taken against snake poison; root chewed and consumed as an antidote for snakebite, especially green viper; root paste applied for spider and scorpion poison, also over the forehead for headache; root decoction taken against stomachache, digestive disorders, chest pain, cough; pounded roots along with water given for diarrhea and dysentery.)

in India: alpam, chakraanika, chakranike, kodakkashayam, kodasari, kotaashori, kottashari, kurukonhi, kuttalvayana, mirsagni, neeru vaate, neeruvaate, padamchurukki, pampoli, thellayishwari

Thottea tomentosa (Blume) Ding Hou (*Apama tomentosa* (Blume) Engl.; *Apama tomentosa* Engl.; *Bragantia tomentosa* (Blume) Blume; *Ceramium tomentosum* Blume; *Cyclodiscus tomentosus* (Blume) Klotzsch)

Malaysia.

See *Bijdragen tot de flora van Nederlandsch Indië* 1134. 1826, *Enumeratio Plantarum Javae* 82. 1827, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 592. 1859, *Die Natürlichen Pflanzenfamilien* 3(1): 272. 1888

(Roots and leaves diuretic. Crushed leaves applied on chest to control cough and fever; poulticing in skin diseases and boils. Stems and leaves pounded and the juice swallowed in coughs, as a poultice applied against snakebite and stings.)

in India: udupet

Thouinia Poiteau Sapindaceae

After the French (b. Paris) horticulturist André Thouin, 1747–1824 (d. Paris), botanist, traveller and botanical collector, a student of Bernard de Jussieu and Buffon; see *Bull. Sci. Soc. Philom. Paris* 3: 137. 1802, *Ann. Mus. Natl. Hist. Nat.* 3: 70–71, tt. 6, 7. 1804, Hamilton, William (1783–1856), *Prodromus Plantarum Indiae Occidentalis* 36. Londini [London]: Treuttel et Würtz, 1825 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Fieldiana, Bot.* 24(6): 234–273. 1949, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 381. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 400. 1972, P. Jovet & M. Mallet, in *D.S.B.* 13: 390. 1981.

Thouinia discolor Griseb. (*Thyana discolor* Hitchc.)

Bahamas.

See *Flora of the British West Indian Islands* [Grisebach] 127. 1860, *Rep. (Annual) Missouri Bot. Gard.* 4: 72. 1893 and *Journal of Ethnobiology* 3(2): 149–156. December 1983

(Leaves applied to heal sores, an infusion for weakness; bark for back pain, fevers. Love potion, the leafy twig.)

in English: Cat Island bush, hard bark, spoon bush, three finger

Thrasya Kunth Poaceae (Gramineae)

From the Greek *thrasys* ‘bold’, some species of *Thrasya* within *Paspalum*, type *Thrasya paspaloides* Kunth, see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Nova Genera et Species Plantarum* 1: 120–121, t. 39. 1815 [1816], *Species Graminum* 3: t. 280. 1829–1830, *Flora Brasiliensis* 2(2): 295–296, pl. 37. 1877, *Genera Plantarum* 3(2): 1101. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 35. 1887 and *Österreichische Botanische Zeitschrift* 51: 367. 1901, *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Annals of the Missouri Botanical Garden* 30(2): 175–176. 1943, *Fieldiana: Botany, New Series* 4: 1–608. 1980, *Brittonia* 32(2): 217–221. 1980, *Acta Botanica Venezuelica* 14(4): 7–93. 1985 [1987], *Genera Graminum* 288–289. 1986, *Ann. Missouri Bot. Gard.* 74: 434–436. 1987, *Bol. Mus. Para. Emilio Goeldi, Sér. Bot.* 4(2): 235–241. 1988, *Flora of the Guianas. Mazorra, “The nature of savanna heterogeneity in the Orinoco Basin.” *Global Ecology and Biogeography* 7(6): 441–455, Nov 1998, N. Trillo and G.H. Rúa, “Sobre la monofilia del género *Paspalum*: el problema de *Thrasya* y del grupo Decumbentes.” *II Reunión Argentina de cladística y biogeografía, Buenos Aires*. 1999, *Am. J. Bot.* 88: 1988–1992, 1993–2012. 2001, S. Denham, F. Zuloaga and O. Morrone, “A systematic revision and phylogeny of *Paspalum* subgenus *Ceresia* (Poaceae: Panicoideae: Paniceae).” *Annals of the Missouri Botanical Garden* 89(3): 337–399. 2002, G.H. Rúa and S. Aliscioni, “A morphology-based cladistic analysis of *Paspalum* sect. *Pectinata*.” *Systematic Botany* 27(3): 489–501. 2002, *Contributions from the United States National Herbarium* 46: 443–527, 613–616. 2003, *Am. J. Bot.* 90: 796–821. 2003.

Thrasya petrosa (Trinius) Chase (*Panicum petrosum* Trin.; *Panicum petrosum* var. *mollis* Pilg.; *Thrasya petrosa* (Trin.) Kuhl., nom. illeg., non *Thrasya petrosa* (Trin.) Chase; *Tylothrasya petrosa* (Trin.) Döll)

Mexico, Bolivia, Brazil. Perennial, erect, tufted, robust, simple or branched, nodes bearded, internodes glabrous or hairy, rhizomatous, sheaths compressed and keeled, leaf blades

linear attenuate or acuminate, solitary racemes exerted terminal or axillary, pilose spikelets elliptic-lanceolate gaping at maturity, small lower glume flexuous, upper glume oblong 5-nerved obtuse or acuminate, lower floret male, lower lemma grooved on the back and splitting into two halves, anthers purple to orange, in pasture, grassland, stony places, woodland, sandy soil, campos, savanna and dry savanna, damp ground, in shade, resembles *Thrasya thrasyoidea*

See *Species Graminum* 3: t. 280. [1829–1830], *Flora Brasiliensis* 2(2): 296, pl. 37. 1877 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 134. 1901, *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas*, *Botanica* 67 (Bot. 11): 93. 1922, *Fl. Suriname* 1(1): 332. 1943, *Annals of the Missouri Botanical Garden* 81(4): 768–774. 1994

(Mild laxative, diuretic, applied as emollient for swollen liver.)

in Brazil: barba de bode

Thrixspermum Loureiro Orchidaceae

Greek *thrix*, *trichos* ‘hair’ and *sperma* ‘seed’, the hair-like seeds are long and thin; see *Flora Cochinchinensis* 2: 516, 519. 1790, *Prodromus Florae Novae Hollandiae* 332. 1810, *Bijdragen tot de flora van Nederlandsch Indië* 7: 286. 1825 and Post, Thomas Erik von (1858–), *Lexicon generum phanerogamarum* inde ab anno MDCCXXXVII cum nomenclatura legitima internationali et systemate inter recentia medio, auctore Tom von Post. Opus revisum et auctum ab Otto Kuntze. Stuttgart, Deutsche Verlags-Anstalt, 1904 [Kuntze, Carl(Karl) Ernst(Eduard) Otto (1843–1907)], Schlechter, Rudolf (1872–1925), *Die Orchidaceen von Deutsch-Neuguinea*. 1911–1914, *Bull. Jard. Bot. Buitenzorg* Ser. 3. 3: 303. 1921, B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville*. Royal Botanic Gardens, Kew 1991.

Thrixspermum pardale (Ridl.) Schltr. (*Dendrocolla pardalis* (Ridl.) Ridl.; *Dendrocolla pardalis* Ridl.; *Sarcochilus pardalis* Ridl.; *Thrixspermum pardale* Schltr.; *Thrixspermum pardale* Carr; *Thrixspermum pardale* (Ridl.) Carr)

Malesia.

See *Transactions of the Linnean Society of London, Botany* 3(9): 371. 1893 [1888–1894 publ. Nov 1893], *Journal of the Linnean Society, Botany* 32: 382. 1896 and *Orchids* 5: 56. 1911, *Gardens' Bulletin, Straits Settlements* 5: 37. 1929

(Plant applied as a poultice for ulcers of the nose.)

Thuidium Bruch & Schimp. Thuidiaceae

Thuidium delicatulum (Hedw.) Schimp. var. *delicatulum* (*Hypnum erectum* (Duby) Lesq. & James; *Tamariscella ventrifolia* Müll. Hal.; *Thuidium delicatulum* (Hedw.) Mitt.;

Thuidium erectum Duby; *Thuidium schlumbergeri* Schimp. ex Besch.; *Thuidium subrobustum* Cardot)

Europe, Caucasus, Siberia, Asia. A terrestrial moss, mat-forming growth habit, stems monopodially branched, green to yellow, tiny branched threads, small bumps covering their stem and cell surface, each branch is twice-pinnately branched, the gametophyte resembles a tiny fern, sporophyte composed of a setae and a capsule, the plants are not glossy, fern-like appearance of leaves, used by horticulturists for orchid cultivation, very humid conditions and shade

See *Bryologia Europaea* 5: 164. 1852, *Flora* 61: 284. 1878, *Manual of the Mosses of North America* 1884 and Anderson and Crum, Howard. *Mosses of Eastern North America* Vol. II. Columbia University Press. New York. 1981, *J. Bryol.* 11: 609–689. 1981[1982], Crum, Howard. *Mosses of the Great Lakes Forest* third ed. University of Michigan. Ann Arbor, Michigan. 1983, Glime, Janice. *The Elfin World of Mosses and Liverworts*. Isle Royale Natural History Association. Houghton. 1993, *Mem. New York Bot. Gard.* 69: 873–887. 1994

(Insect repellent.)

in English: the delicate fern moss, feather moss

Thuja L. Cupressaceae

Greek *thyia*, for a kind of resinous tree or a juniper (Theophr.), *thyo*, *thyein* ‘to sacrifice, to burn a victim’; Latin *thya* or *thuya* is the Greek name for the citrus-tree (Plinius), adj. *thyinus*, *a*, *um* ‘made of the citrus-tree’; see *Species Plantarum* 2: 1002. 1753 and E. Zaccaria, *Raccolta di voci affatto sconosciute o mal note ai lessicografi ed ai filologi*. Marradi 1919, E. Zaccaria, *L'elemento iberico nella lingua italiana*. Dizionario della lingua Greca*. 2(1): 121. 1994, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 643. Basel 1996.

Thuja compacta Standish ex Gordon

China, India.

See *Pinetum Suppl.* 103. 1862

(Leaf juice taken for gonorrhoea; plant ash snuffed to stop fits.)

in India: morpankhi

Thuja excelsa Bong.

North America.

See *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 164. 1832

(Used for syphilis.)

Thuja occidentalis L. (*Thuja obtusa* Moench; *Thuja obtusa* Mast.; *Thuja occidentalis* L. var. *fastigiata* H. Jaeger; *Thuja occidentalis* L. var. *nigra* L.H. Bailey; *Thuja occidentalis* L. var. *pyramidalis* Zederb.; *Thuja occidentalis* L.f. *malonyana* C.K. Schneid.; *Thuja theophrasti* C. Bauhin ex Nieuwland)

China, North America. Perennial tree

See *Species Plantarum* 2: 1002. 1753, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 691. 1794, *Journal of the Proceedings of the Linnean Society, Botany*, Supplement 18: 491, f. 4. 1881 and *American Midland Naturalist* 2(10): 284. 1912, *Acta Botanica Yunnanica* 18(4): 439–444. 1996

(For spermatorrhea, menstrual disorders, colic, headaches, stomachache, toothache, colds, cough, pneumonia, fevers, smallpox, rheumatism, sprains, swellings, soreness, burns, rashes and skin irritations, cuts, bruises and sores, postpartum remedy, to increase the milk flow and as abortifacient. Ceremonial.)

in English: American arbor-vitae, arbor-vitae, arborvitae, eastern arborvitae, eastern white cedar, northern white cedar, white cedar

in China: bei mei xiang bai

Thuja plicata Donn ex D. Don (*Thuja gigantea* Nutt.)

China, North America. Perennial tree

See *A Description of the Genus Pinus* 2: (19). 1824, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 52–53. 1834 and *Acta Bot. Yunnan.* 18(4): 439–444. 1996

(Poisonous, boughs infusion said to be toxic in large doses. Tonic, postpartum remedy, analgesic, astringent, antidiarrheal, antirheumatic, counterirritant, expectorant, abortifacient, stomachic, for rheumatism, wounds, sores and swellings, venereal disease sores, carbuncles, heart trouble, fevers, cold, coughs, tuberculosis, bronchitis, kidney trouble, stomachache, diarrhea, toothaches. Ceremonial, ritual.)

in English: giant arbor-vitae, western arbor-vitae, western red cedar

in China: bei mei qiao bai

Thuja tetragona Hook.

India.

See *London Journal of Botany* 3: 148, t. 4. 1844

(For chronic piles.)

in India: morpankh

Thunbergia Retzius Acanthaceae (Thunbergiaceae)

The generic name honors the Swedish botanist and physician Carl Peter Thunberg, 1743–1828 (Tunaberg, near

Uppsala, Sweden), 1772 Dr. med. at Uppsala, a pupil of Carl Linnaeus, plant collector, explorer, traveller, naturalist, professor of botany and medicine at Uppsala, to the Cape and interior with the British gardener and plant collector Francis Masson (1741–1805); see *Physiographiska Sällskapets Handlingar* 1(3): 163–165. 1776 [1780] and Thorgny Ossian Bolivar Napoleon Krok, *Bibliotheca botanica suecana.* 705–716. Stockholm, Uppsala 1925, M.C. Karsten, “Carl Peter Thunberg. An early investigator of Cape Botany.” *Journal of South Africa Botany.* 5: 1–27 and 87–155. 1939, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 254. 1964, J.H. Barnhart, *Biographical Notes upon Botanists.* 3: 382. 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa.* 80. 1971, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 400. 1972, S. (Aerial parts decoction taken to prevent conception, or during labor pains. Stem decoction in stomach disorders. Leaves infusion, internal and external, for cough, backache, wound dressings, fever; leaves ground into paste, mixed with hen’s egg and taken for gastric troubles, applied to relieve

headache; leaves decoction drunk for stomach complaints and indigestion.)

in English: black-eyed Susan, black-eyed Susan vine

in Tanzania: ishitato, mkunguzi

Thunbergia coccinea Wall. (*Hexacentris coccinea* (Wall.) Nees; *Hexacentris coccinea* Nees)

Nepal. Twiner, glabrous, tetragonous stem, ovate-lanceolate leaves, red flowers in drooping racemes

See *Prodromus Florae Nepalensis* 120. 1825, Wallich, Nathaniel (1786–1854), *Tentamen Florae Nepalensis* 1: 48–49, t. 37. Calcutta, 1826, *Plantae Asiaticae Rariores* (Wallich). 3: 78. 1832, *FBI* 4: 393. 1884

(Plant juice applied locally to treat fresh wounds. Roots chewed to treat boils on the tongue and toothache. Juice of leaves with leaves of *Thunbergia grandiflora* given in stomach pain.)

in India: laung-laung

in Nepal: gau lahara, kaulunthunga

Thunbergia fragrans Roxb. (*Thunbergia convolvulifolia* Baker; *Thunbergia fragrans* C. Presl; *Thunbergia fragrans* Wall.; *Thunbergia fragrans* Hutch. & Dalziel; *Thunbergia fragrans* Drege ex C. Presl; *Thunbergia humbertii* Benoist; *Thunbergia hyalina* S. Moore; *Thunbergia volubilis* Pers.)

India, East Africa. Glabrous twining shrub, stem 4-gonous, yellowish or orange flowers

See *Plants of the Coast of Coromandel* 1: 47, t. 67. 1795, *Numer. List* [Wallich] n. 767, partim. 1829, *Abh. Königl. Böhm. Ges. Wiss.* ser. 5, 3: 524. 1845, *Botanische Bemerkungen* (C. Presl): 94. [Jan–Apr 1846], *Journal of Botany, British and Foreign* 1880: 195. 1880, *Journal of the Linnean Society, Botany* 21: 428. 1885 and *Bulletin du Muséum National d'Histoire Naturelle* 32: 151. 1926, *Flora of West Tropical Africa* 2: 250. 1931, *Cat. Pl. Madag., Acanth.* 2(24): 7–32. 1939

(Used in Sidha. Tender twigs made into a paste applied all over the body against the fever. Leaves used as poultice in skin diseases; tender leaf juice poured in nose and the paste applied on face for giddiness, and on forehead for headache; crushed leaves decoction drunk for paralysis; leaf paste applied on cuts and wounds; leaves ground with cumin mixed in water and taken orally as abortifacient. Fresh root juice used as eye drops. Magico-religious beliefs, to keep off evil spirits and ghosts, flowers paste applied all over the body and fruits tied as a necklace.)

in English: sweet clock vine, white thunbergia

in India: benne balli, chakrakedar, chimiti, hegala balli, indrapushapa, indrapushpa balli, indrathige, indratige, intiraputpi, jimandaarathige, koligokke, kolikka, kolikokka, kolikokkai, koliokokkai, noorvan valli, palatheega, simiti, vengachchaan poovu

in Japan: yahazu-kazura

Thunbergia grandiflora Roxb. (*Flemingia grandiflora* Roxb. ex Rottler, nom. illeg. superfl.; *Thunbergia cordifolia* Nees; *Thunbergia fragrans* Roxb.)

East Africa, Pakistan, India. Woody climber, liana, herbaceous, scandent, scrambling, twining, procumbent, prostrate, creeping, flowers pale-blue in dense raceme, food for cattle

See *Physiographiska Sällskapet Handlingar* 1(3): 163. 1776[1780], *Plants of the Coast of Coromandel* 1: 47, pl. 67. 1795, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 202–203. 1803 [*Neue Schriften, Gesellschaft Naturforschender Freunde zu Berlin. Ind.* (Roxburgh) 3: 34. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 35. 1847, *FBI* 4: 392. 1884 and *J. Agric. Sci.* (Tokyo) 8: 49–62. 1962, *Journal of Palynology* 17: 93–102. 1981, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Baileya* 23: 86–93. 1989, *Austrobaileya* 5(4): 651–659. 2000

(Leaves decoction drunk for stomach complaints and indigestion; leaves paste used as poultice in skin diseases, cuts; juice of leaves with leaves of *Thunbergia coccinea* given in stomach pain. Sap from the stem given in eye troubles. Roots, leaves and whole plant decoction applied to snakebites.)

in English: Bengal clock vine, Bengal trumpet, blue sky-flower, blue trumpet vine, clock vine, sky vine, skyflower

in Kenya: cheptereret

in Tanzania: bangiliko, enyuru, wankula

in Bangladesh: lachuia-nui

in China: tong gu xiao

in India: jermi khnong, khakkhu, koktsulitong, kokua loti, kukua loti, kukualoti, molloti, mulluta, naung-naung-rikang, nul lata, nung-nung, nungnung, seng-taru, swending, syntiew jyrni chankhlaw, thanghadurangnu, tille ienru, vako, vakohrui, zawngafian

Malay name: patok tuwauh

in Vietnam: bong bao, day bong xanh, madia

Thunbergia hossei C.B. Clarke

Thailand.

See *Bot. Jahrb. Syst.* xli. 64. 1907

(Poultice to reduce swelling and hasten healing of a broken bone or a cut.)

Thunbergia laevis Nees (*Thunbergia fragrans* Roxb. var. *laevis* (Nees) C.B. Clarke ex Hook.f.; *Thunbergia laevis* Wall. & Nees)

India. Weak twiners, slender

See *Plants of the Coast of Coromandel* 1: 47, pl. 67. 1795, *Plantae Asiaticae Rariores* (Wallich). 3: 77. 1832, *The Flora of British India* 4: 391. 1884 and *Revised Handb. Fl. Ceylon* 12: 12–13. 1998

(Fresh roots chewed and eaten to ease coughs. Crushed flowers extract dropped into infected eyes. For vesicles, contact therapy, small pieces of plant tied on the arm or neck of children.)

in India: chimine, vengachchaan poovu, warva

Thunbergia laurifolia Lindl. (*Thunbergia grandiflora* Roxb. var. *laurifolia* (Lindl.) Benoist)

SE Asia, India. Climber, blue flowers

See *Botanical Register*; consisting of coloured ... 6: pl. 495. 1820, *Gardener's Chronicle & Agricultural Gazette* 1856: 260. 1856 and *Flore Générale de l'Indo-Chine* 4: 618. 1935

(Leaves juice applied in ears for deafness, also against boils and cuts; for boils, cuts, pound the leaves and poultice; for excessive menses, pound the leaves and swallow the juice.)

in English: purple allamanda

Malay names: akar tuwauh, daun patok ketuwah, daun patok tuwah, rumput melian, tuwauh

Thunbergia lutea T. Anderson

Himalaya.

See *J. Linn. Soc., Bot.* 9: 448. 1866 [1867 publ. 1866]

(Seed paste taken orally for abortion.)

Thylacospermum Fenzl Caryophyllaceae

From the Greek *thylakos* 'a bag, sack, pouch' and *sperma* 'a seed', see *Commentationes de Leguminosarum Generibus* 56. 1837, *Genera Plantarum* 967. 1840, *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 172. 1842.

(Antifungal, antiseptic.)

in China: nang zhong cao

in India: spang, tegarcan

Thymus L. Lamiaceae (Labiatae)

The ancient Greek name used by Dioscorides probably for this plant, *thymon* or *thymos* (*thymiao* 'perfume'); Latin *thymum*, *i* was used for *Thymus vulgaris* L. and *Satureia capitata* L. (Plinius, Vergilius, M.T. Quintilianus); see Carl Linnaeus, *Species Plantarum* 2: 590–592. 1753, N. Tommaseo & B. Bellini, *Dizionario della lingua italiana*. Torino 1865–1879 and Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1504. 1967, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 5: 1339. Zanichelli, Bologna 1988.

Thymus linearis Benth.

Afghanistan, Nepal, Himalaya. Herb, sprawling, prostrate, spreading, perennial, many-branched, highly aromatic, leaves gland-dotted, pink or pale purple flowers in capitate spikes or dense terminal cluster, leaves and flowers are pickled

See *Pl. Asiat. Rar.* 1: 31 1830

(Whole plant a postpartum remedy. Aerial parts decoction antiseptic, taken to cure cough, asthma, bronchitis, cold, skin diseases, fever, body pains, gastric complaints, nervous breakdown. Leaves infusion for itch and skin eruptions; leaves juice emetic. Leaves and seeds for whooping cough and stomach disorders. Seeds a remedy for stomach complaints, cough, cold. Leaves and floral shoots for the treatment of whooping cough, epilepsy, menstrual problems. Powder of flowers given as a vermicide.)

in English: wild thyme

in India: ban ajwain, banajwain, javind, jungli ajwain, tumbrak

in Nepal: ghoremachhau, tena

Thymus serpyllum L. (*Origanum serpyllum* (L.) Kuntze; *Serpyllum vulgare* Fourr.; *Thymus angustifolius* Pers. var. *pycnotrichus* Uechtr.; *Thymus pycnotrichus* (Uechtr.) Ronniger; *Thymus serpyllum* subsp. *pycnotrichus* Uechtr.)

China, Europe to Siberia. Creeping undershrub, tufted, perennial, purplish flowers in dense clusters

See *Species Plantarum* 2: 590–591. 1753, *Revis. Gen. Pl.* 2: 528. 1891 and *Ruizia* 3: 216. 1986

(Whole plant anthelmintic, antioxidant, strongly antiseptic, antispasmodic, carminative, deodorant, diaphoretic, disinfectant, expectorant, sedative and tonic. Internally, taken in the

treatment of bronchitis, catarrh, laryngitis, flatulent indigestion, painful menstruation, colic and hangovers. Externally, applied to minor injuries, mastitis, mouth, throat and gum infections. Leaves for cough, cold, stimulant; paste of leaves and floral tops applied in toothache. Veterinary medicine, crushed seeds to produce heating effect.)

in English: mother of thyme, wild thyme

in India: banajwain, banajwan, javend, tumba, tumbruk

Thymus vulgaris L. (*Origanum thymus* Kuntze; *Thymus collinus* Salisb., nom. superfl.; *Thymus collinus* M. Bieb.; *Thymus vulgaris* Sibth. & Sm.; *Thymus vulgaris* M. Bieb.; *Thymus vulgaris* Willk.)

Europe, W. Medit., Italy.

See *Species Plantarum* 2: 591. 1753, *Revis. Gen. Pl.* 2: 528. 1891, *Prodr. Stirp. Chap. Allerton*: 86. 1796, *Fl. Graec. Prodr.* 1(2): 419. 1809, *Fl. Taur.-Caucas.* 3: 401. [Dec 1819 or early 1820] and *Ruizia* 3: 216. 1986

(Whole plant as a sleep inducer, for labor pains, abdominal colic, cough, colds, bronchitis, toothache. Leaves as a post-partum remedy.)

in English: common thyme, garden thyme, thyme

in Portugal: segurelha

in Arabic: za'ater

in South Africa: tiemie

in China: she xiang cao

in India: zaater

Thysanolaena Nees Poaceae (Gramineae)

Greek *thysanos* 'a fringe, tassel' and *chlaena*, *chlaenion* 'a cloak', referring to the inflorescence, to the fringed upper lemma, to the pubescent fringe on the fertile lemmas, type *Thysanolaena agrostis* Nees, see *Observationes Botanicae* 4: 19. 1786, *Edinburgh New Philosophical Journal* 18: 180. 1835, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842–1844* 101. 1846, *The Flora of British India* 7(22): 305. 1897 [1896] and *Bulletin de la Société Botanique de France* 66(7): 303. 1919 [1920], *Repertorium Specierum Novarum Regni Vegetabilis* 17(477–480): 86. 1921, *Botanisches Archiv* 1(1): 27. 1922, *J. (Used in Ayurveda. Whole plant hypotensive and spasmolytic. Leaf paste of *Litsea lancifolia* mixed with the leaf paste of *Thysanolaena maxima* and given in dysentery. Seeds powdered and given to women before childbirth to facilitate delivery, the flour used as abortifacient, contraceptive. Roots decoction used as mouthwash in fever; root extract taken against intestinal worms; root decoction to induce abortion and to treat mumps, ulcers, boils and abscesses; a paste applied to boils, carbuncles; root paste is believed to cause abortion. Veterinary medicine, roots applied in worm diseases of cattle. Magico-religious beliefs, protection, in case of witch attack; whole plant to ward off bad dreams.)

in English: Asian broom grass, bamboo grass, bouquet grass, broom grass, tiger grass

in India: alensunn, alphak, amlisho, amliso, barucha, beddum, bushnia, chir, chiten, deobahari, garajono, hmunphiah, jharu, jurna, jurnahva, karsar, konda cheepuru, kondacipuru,

kuchcho, kuchi, kucho, omliso, ophi, pasyur, pholjaru, phulbadhuni, phuljanta, phuljharu, pirlu, saper, sarfi, simu, smu, synsar, umlisa

in Indonesia: awis, lantebung, menjalin wuwu

in Laos: dok khein, kh'èèm kh'ôông

in Malaysia: buloh teberau, rumput buloh

in Nepal: amriso

in the Philippines: bugubui, buybui, buybuy, eagadu, gatbo, lasa, tagadeu, tagisa, talankaran, tambu

in Thailand: khoei laa, khoei la, lao laeng, laolaeng, toing kong, tong koong, tong kong, ya kap phai yai, yaa kaap phai yai, ya mai kwat, yaa mai kwaan, yaa yuung, ya yung

in Tibet: khre rgod

in Vietnam: cay le, dong trung ha thao, đông trung hóa tha'o, dot, dó, ong anh, say

Tiarella L. Saxifragaceae

The diminutive of the Greek *tiara* 'a Persian diadem, a small crown', Latin *tiara* or *tiaras* 'the head-dress of the Oriental, a turban, tiara', an allusion to the shape of the fruits, see *Species Plantarum* 1: 405–406. 1753, Watson, Sereno (1826–1892), *Bibliographical index to North American Botany*. Washington, 1878 [*Smithson. Misc. Contrib.* n. 258.].

Tiarella cordifolia L.

North America. Perennial herb, underground stem, long-stalked sharply toothed leaves palmately lobed, spiky feathery white flowers in elongated inflorescences, ground cover

See *Species Plantarum* 1: 405–406. 1753 and *Syst. Bot.* 5: 17–29. 1980, *Syst. Bot.* 9(4): 441–447. 1984, *Phytologia* 71: 480. 1991, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(Leaves infusion as a mouthwash, and drops for sore eyes. Roots paste applied to wounds; an infusion as a diuretic and astringent for diarrhea.)

in English: coolwort, eastern foamflower, false miterwort, foamflower, heartleaf foamflower

Tiarella cordifolia L. var. *cordifolia* (*Tiarella macrophylla* Small p.p.)

North America. Perennial herb

See *Species Plantarum* 1: 405–406. 1753 and *Flora of the Southeastern United States* 502, 1331. 1903, *Taxon* 29: 534–535. 1980, *Syst. Bot.* 5: 17–29. 1980, *Syst. Bot.* 9(4): 441–447. 1984, *Phytologia* 71: 480. 1991, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(Leaves infusion as a mouthwash, and drops for sore eyes. Roots paste applied to wounds; an infusion as a diuretic and astringent for diarrhea.)

in English: coolwort, eastern foamflower, false miterwort, foamflower, heartleaf foamflower

Tiarella trifoliata L. (*Tiarella trifoliata* James)

North America. Perennial herb

See *Species Plantarum* 1: 406. 1753

(Raw leaves chewed as a cough sedative.)

in English: foamflower, lace-flower, threeleaf foamflower

Tiarella trifoliata L. var. *trifoliata*

North America. Perennial herb

See *Species Plantarum* 1: 406. 1753 and *Syst. Bot.* 9(4): 441–447. 1984

(Raw leaves chewed as a cough sedative.)

in English: foamflower, lace-flower, threeleaf foamflower

Tidestromia Standley Amaranthaceae

After the Swedish-born American botanist Ivar Frederick Tidestrom (Tidestrøm), 1864–1956, to the United States 1880, assistant to Edward Lee Greene (1843–1915), botanical collector; see *Journal of the Washington Academy of Sciences* 6(3): 70. 1916, E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, Joseph Ewan [b. 1865], *Rocky Mountain Naturalists*. 321–322. The University of Denver Press 1950, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 383. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. 101. New York and London 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 401. 1972.

Tidestromia lanuginosa (Nutt.) Standl. (*Achyranthes lanuginosa* Nutt.; *Achyranthes lanuginosa* Schinz; *Alternanthera lanuginosa* Moq.; *Alternanthera lanuginosa* (Nutt.) Moq.; *Cladanthrix lanuginosa* Nutt. ex Moq.; *Cladanthrix lanuginosa* (Nutt.) Nutt. ex S. Watson; *Cladanthrix lanuginosa* Nutt. ex S. Watson; *Tidestromia lanuginosa* Standl.; *Tidestromia lanuginosa* (Nutt.) Standl. var. *eliassoniana* (Sánchez. Pino & Flores Oliv.) S.L. Welsh; *Tidestromia lanuginosa* subsp. *eliassoniana* Sánchez-del Pino & Flores Olvera)

North America.

See *Transactions of the American Philosophical Society*, new series, 5: 166. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 359–360. 1849, *Geological Survey of California, Botany* [W.H. Brewer] 2: 43. 1880 [Geological Survey of California. J. D. Whitney, State Geologist. Botany. Cambridge, MA], *Pflanzenw. Ost-Afrikas* C. (1895) 174. 1895, *Bot. Jahrb.* 21: 186. 1895 and *Journal of the Washington Academy of Sciences* 6(3): 70. 1916, *Novon* 12(3): 401 (–406; figs. 2B–C, 3G–I, 4–5). 2002, *Utah Fl.*, ed. 3. 32. 2003

(For relief of aching feet. Twigs or herbage cooked in water and used as a shampoo to cure a headache.)

Tieghemella Pierre Sapotaceae

The generic name honors the French (b. Bailleul) botanist Philippe Édouard Léon van Tieghem, 1839–1914 (d. Paris), professor of botany, author of *Traité de Botanique*. Paris 1881–1884 and *Éléments de botanique ...* Paris 1886; see *Notes Bot. Sapot.* 18. 1890 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 425. 1965, A. Nougarede, in *D.S.B.* 13: 405–406. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 793. Stuttgart 1993. Closely related to *Mimusops*.

Tieghemella africana Pierre (*Baillonella africana* (Pierre) Baehni; *Dumoria africana* (Pierre) Dubard; *Lecomtedoxa vazii* Dubard; *Mimusops africana* (Pierre) Lecomte; *Tieghemella jollyana* Pierre)

Cameroon, Equatorial Guinea, Gabon, Congo, W. & WC Trop. Africa. Very large tree, straight and cylindrical, leaves arranged spirally, creamy white flowers in fascicles in the leaf axils, fragrant large ovoid smooth berry, heavy seeds in a yellowish pulp, fruits eaten by elephants, heartwood resistant to marine borers, termites and fungi

See *Notes Botaniques Sapotacees* 18. 1890, *Ann. Inst. Bot.-Géol. Colon. Marseille* 1(2): 2. 1893 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 3(3): 32, 41. 1915, *Boissiera* 11: 121. 1965, *African Study Monographs*, Suppl. 28: 7–24. November 2003

(High silica content, care should be taken when sawing douka wood, dust from sawn wood may cause irritation to skin and mucous membranes; highly hemolytic saponin isolated from the wood. Fat used externally to treat rheumatism.)

in English: cherry mahogany, makore

in Central Africa: douka, duka, n'duka, nduka, okala, ukola

in Cameroon: nom adjap elang

in Congo: fou, ifou, n'duka

in Gabon: okola

Tieghemella heckelii (A. Chev.) Pierre ex Dubard (*Baillonella heckelii* (A. Chev.) Baehni; *Dumoria heckelii* A. Chev.; *Mimusops heckelii* (A. Chev.) Hutch. & Dalziel; *Tieghemella heckelii* Pierre ex A. Chev.)

W. Trop. Africa. Large tree, straight and cylindrical, leaves arranged spirally, creamy white flowers in fascicles in the leaf axils, juicy yellow fruits sticky with an unpleasant smell and bitter taste, heavy seeds in a yellowish pulp, fruits eaten by elephants and bush-pigs, heartwood resistant to marine borers, termites and fungi

See *Compt. Rend. Hebd. Séances Acad. Sci.* 145: 267. 1907, *Les végétaux utiles de l'Afrique tropicale Française* 2: 172.

1907, *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 3(3): 33. 1915, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] 2: 14. 1931, *Petite Flore de l'Ouest-Africain*: 79. 1954, *Boissiera* 11: 121. 1965, *Phytotherapy Research* 16(5): 497–502. 2002, *Journal of Natural Products* 65(12): 1942–1944. 2002, *Journal of Liquid Chromatography & Related Technologies* 25(18): 2873–2882. 2002, *Journal of Ethnopharmacology* 101: 90–94. 2005, *Journal of Liquid Chromatography & Related Technologies* 31(2): 250–262. 2008

(High silica content, care should be taken when sawing makore wood, the wood can cause dermatitis, conjunctivitis and respiratory symptoms. Bark for blenorrhoea and toothache; young buds used to treat snakebites; seeds used for skin disorders, contain antiviral saponins.)

in English: African cherry, cherry mahogany, dumori butter, makore, makoré, makore butter

in Sierra Leone: abaku, agamokwe, baku

Tilia L. Tiliaceae

From the Latin name for the linden or lime tree; see *Species Plantarum* 1: 514. 1753, *Species Plantarum* 2: 687–690. 1753, *Genera Plantarum* 271, 289. 1789 and M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 5: 1338. Zanichelli, Bologna 1988, *Flora Reipublicae Popularis Sinicae* 49(1): 53. 1989, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 380. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 666. 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 645. 1996.

Tilia americana L. (*Tilia americana* L. var. *neglecta* (Spach) Fosberg; *Tilia glabra* Vent.; *Tilia neglecta* Spach; *Tilia palm-eri* F.C. Gates; *Tilia truncata* Spach; *Tilia venulosa* Sarg.)

North America. Perennial tree

See *Anales de Historia Natural* 2(4): 68–69. 1800, *Arboretum et Fruticetum Britannicum* 1: 375. 1838

(Depurative, diuretic, anthelmintic, emetic, astringent, antidote, used for dysentery, worms, tuberculosis, lung trouble, eyewash, coughs, boils, injuries, burns or scalds, wounds, suppurating wounds, snakebite, internal hemorrhage, for heartburn, weak stomach and bowels during pregnancy.)

in English: American basswood, American lime, basswood, whitewood

in North America: hinde-hi (Omaha-Ponca)

Tilia americana L. var. *heterophylla* (Vent.) Loudon (*Tilia eburnea* Ashe; *Tilia heterophylla* Vent.; *Tilia heterophylla* Vent. var. *michauxii* (Nutt.) Sarg.; *Tilia lasioclada* Sarg.; *Tilia michauxii* Nutt.; *Tilia monticola* Sarg.)

North America. Perennial tree

See *Anales de Historia Natural* 2(4): 68–69. 1800, *Arboretum et Fruticetum Britannicum* 1: 375. 1838

(Depurative, diuretic, anthelmintic, emetic, astringent, antidote, used for dysentery, worms, tuberculosis, lung trouble, eyewash, coughs, boils, injuries, burns or scalds, wounds, suppurating wounds, snakebite, internal hemorrhage, for heartburn, weak stomach and bowels during pregnancy.)

in English: American basswood

Tilia europaea L. (*Tilia cordifolia* Besser; *Tilia platyphyllos* Scop. subsp. *cordifolia* Schneid.; *Tilia platyphyllos* subsp. *grandifolia* Hayek)

Europe.

See *Species Plantarum* 1: 514. 1753, *Fl. Carniol.*, ed. 2. 1: 373. 1772, *Flora Taurico-Caucasica* 2: 6. 1808, *Verz. Pfl. Casp. Meer.* (C.A. von Meyer). 224. 1831

(Relaxant, used for anxiety and irritability, fevers, colds, and flu, restores the nerves, reduces muscle tension and spasm, controls low blood pressure, induces sweating.)

Tiliacora Colebr. Menispermaceae

The native name in Bengal for *Tiliacora acuminata* Miers, see *Transactions of the Linnean Society of London* 13(1): 53, 67. 1821 and *The Alkaloids* 54: 1–190. 2000, *Adansonia*, sér. 3, 31(1): 47–87. 2009.

Tiliacora acuminata Miers

Indonesia, West Africa. Liana, woody vine, yellow flowers in raceme

See *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 39. 1851 and *Taxon* 29: 165–166. 1980

(Used in Sidha. Stem and roots stimulant, aphrodisiac. Fresh leaf juice poured into the ear to kill parasitic insect of the ear; a decoction from leaves of *Tiliacora acuminata* with roots of *Andrographis paniculata* and water given for chronic stomach ailments, stomachaches. For snakebite and fevers, fresh juice root drunk on an empty stomach. Veterinary medicine, leaves given in insect bite.)

in India: adavi thamalapaaku, bagamushada, bidara, chatakattu thiga, kappa teega, kappathige, kappatiga, karwanth, kuri balli, naagamushini, nallathige, nalla tige, paa-taeru, paatavaeru, perunkattukkoti, rangoi, theega mushidi, theenra, thigemushini, tiliakora, tivva mushini, valli-caniram, vallikannimaram, verri chitramulamu, verrichithra moolamu

in Nepal: rukh kane

in Ghana: kalokpe, susanfo

in Nigeria: gbegeedi

Tiliacora funifera (Miers) Oliv. (*Hypserpa funifera* Miers; *Tiliacora funifera* Oliv.; *Tiliacora johannis* Exell; *Tiliacora warneckei* Engl. ex Diels)

Tropical Africa. Robust, climber, variable, flexible, dioecious, woody liana, male inflorescences in clusters among leaves, drupelets orange or yellow, woody furrowed endocarp, fruits eaten

See *Annals and Magazine of Natural History*, ser. 2 7: 36, 40. 1851, *Annals and Magazine of Natural History*, ser. 3 14: 365. 1864, *Fl. Trop. Afr.* [Oliver et al.] 1: 44. 1868 and *Pflanzenr.* (Engler) *Menispermac.* 64. 1910, *J. Bot.* 73(Suppl.): 7. 1935, *Planta Medica* 16(2): 158–165. 1968, *Journal of Pharmaceutical Science* 66(9): 1242–1244. 1977, *Lloydia* 40(6): 561–565. 1977, *Lloydia* 41: 658. 1978, *Phytochemistry* 19(8): 1882–1883. 1980, *African Journal of Biotechnology* 8(14): 3332–3335. 2009

(Leaf and rhizome extracts anticancer; leaf sap against insanity. Root and stem extracts antiplasmodial. Root extract taken by women to increase fertility and for menstrual problems.)

in English: elbow-leaf, stem-fruit climber

Tiliacora gabonensis Troupin (*Tiliacora chrysobotrya* Welw. ex Ficalho; *Tiliacora mayumbensis* Exell)

Tropical Africa. Liana, woody vine, flowers on trunk

See *Journal of Botany, British and Foreign* 64, Suppl. 1: 11. 1926, *Bulletin du Jardin Botanique de l'État* 30: 26. 1960

(Roots analgesic, anthelmintic, febrifuge.)

Tiliacora leonensis (Scott-Elliot) Diels (*Synclisia leonensis* Scott-Elliot; *Tiliacora dielsiana* Hutch. & Dalziel; *Tiliacora dinklagei* Engl.)

Tropical Africa, Sierra Leone. Dioecious, robust liana, small flowers in clusters, inflorescence an axillary many-flowered panicle, compressed-ovoid drupelets, fruits edible

See *J. Linn. Soc., Bot.* 30: 72. 1894 [1893–1895 publ. 1894], *Bot. Jahrb. Syst.* 26(3–4): 402. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* (Engler) *Menispermac.* 67. 1910, *Kew Bull.* 1927, 155. 1927, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] i. 71. 1927, *Lloydia* 38(3): 210–212. 1975, *Lloydia* 39(4): 213–217. 1976, *Experientia* 30(8): 847–348. 1976, *Journal of Ethnopharmacology* 9: 1–83. 1983, *Journal of Natural Products* 46(3): 342–349. 1983, *Journal of Ethnopharmacology* 90(2): 221–227. 2004

(Extract of the aerial parts taken against dysentery. Root antimalarial and antimicrobial, a decoction taken against fever, gastric pain, edema of the legs and anemia; crushed leaves applied to wounds; bark, leaves and root taken to treat cough, amenorrhea and tachycardia.)

Tiliacora louisii Troupin (*Tiliacora polygyna* Diels ex Mildbr.)

Tropical Africa, Guinea and Sierra Leone. Woody liana, twining, smooth orange-red obovoid drupe, fleshy pulp

See *Repert. Spec. Nov. Regni Veg.* 41: 249, nomen. 1937, *Bulletin du Jardin Botanique de l'État* 19: 412. 1949

(Crushed leaves applied to wounds, skin diseases.)

Tiliacora racemosa Colebr.

India, Java.

See *Transactions of the Linnean Society of London* 13(1): 67. 1821 and *Taxon* 29: 360–361. 1980, *Phytotherapy Research: PTR* 18(8): 595–600. 2004, *Magnetic Resonance in Chemistry: MRC* 48(10): 823–828. 2010

(Used in Ayurveda and Sidha. Fruits antibacterial. Cytotoxic effect of root extract, for the treatment of cancerous diseases.)

in India: kappatige, koliciti, nagamusadi, nagamushini, nakamutti, nallatige, pataveru, pateru, tigamushadee, tigamushadi, tigamushini, tigamushti, tigemushidi, tigemushini, tivvamushidi, tivvamusidi, vallikkanniram, verricitramulam, vullycaniram, yerricitramolam

Tiliacora triandra (Colebr.) Diels (*Tiliacora triandra* Diels)

Thailand. Shrub, climbing, slender, dioecious, large tuber underground, inflorescence in axillary panicles, fruits orange-red, drupelets, in waste places, secondary forest

See *Transactions of the Linnean Society of London* 13: 53, 67. 1821 and *Pflanzenr.* (Engler) *Menispermac.* 62. 1910, *Planta Med.* 54(6): 516–519. 1988

(Root decoction a remedy for fevers, laxative, detoxicant; leaves detoxicant.)

in Thailand: choi naang, thao wan khieo, ya-nang, yaa naang

Tillaea L. Crassulaceae

For the Italian botanist Michelangelo Tilli (Michael Angelus Tillius), 1655–1740, scientist, professor of botany, a Fellow of the Royal Society of London, from 1685 to 1740 Praefectus of the Botanical Garden of the University of Pisa, Italy, author of *Catalogus plantarum horti Pisani*. Florentiae 1723. A member of the family, Giovanni Lorenzo Tilli, published an *Enumeratio stirpium in horto academico Pisano viventium*. Pisa 1806–1807 and 1810. See Carl Linnaeus, *Species Plantarum*. 1: 128–129, 282–283. 1753 and *Genera Plantarum*. Ed. 5. 62. 1754, *Exposition des Familles Naturelles* 2: 123. 1805 and *Fieldiana, Bot.* 24(4): 404–415. 1946, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 62. Cape Town 1981, L. Amadei, “Note sull’*Herbarium Horti Pisani*: l’origine delle collezioni.” *Museol. Scient.* 4(1–2): 119–129. 1987, F.A. Stafleu, “Die Geschichte der Herbarien.” *Bot. Jahrb. Syst.* 108(2/3): 155–166. 1987, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell’Orto Botanico di Palermo*. 270. Palermo 1988, Fabio Garbari (born 1937), L. Tomasi Tongiorgi and A. Tosi, *Giardino dei Semplici: L’Orto Botanico di Pisa dal XVI al XX secolo*. Pisa 1991, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997, *Fl. Ecuador* 73: 4–16. 2004.

Tillaea schimperi (Fisch. & C.A. Mey.) M.G. Gilbert, H. Ohba & K.T. Fu (*Combesia schimperi* (Fisch. & C.A. Mey.) Schweinf.; *Crassula pentandra* (Royle ex Edgew.) Schönland; *Crassula schimperi* Fisch. & C.A. Mey.; *Disporocarpa pentandra* (Royle ex Edgew.) Aschers.; *Tillaea pentandra* Royle ex Edgew.)

East Africa, India, Himalaya. Tufted, gregarious herb, unbranched, rooting from lower few nodes, terminal flowers, curved stigma

See *Index Seminum* [St. Petersburg] 8: 56. 1841, *Transactions of the Linnean Society of London* 20: 50. 1846, *Beitrag zur Flora Aethiopiens ...* 80, 271. 1867, *Die Natürlichen Pflanzenfamilien* 3(2a): 37. 1890 and *Novon* 10(4): 366–367. 2000

(Decoction taken for relieving kidney ailments and urinary infections.)

in China: wu rui dong zhao cao

Tillandsia L. Bromeliaceae

Named in honor of the Swedish physician Elias Erici Tillands (Tillander, Tillandz, Til-Landz, Til-Lands), 1640–1693, botanist, Dr. med. Leiden 1670, professor of medicine at Åbo, wrote *Disputatio de atrophia*. Lugduni Batavorum [Leyden] 1670, *Catalogus plantarum*. Aboae 1673 and Eliae Til-Landz ... *Icones novae*. Aboae 1683; see Carl Linnaeus, *Species Plantarum*. 1: 286. 1753 and *Genera Plantarum*. Ed. 5. 138. 1754, *Familles des Plantes* 2: 67, 532. 1763, *Genera Plantarum* 405. 1789, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. Rich. ex DC.; *Timonius forsteri* DC., nom. superfl.; *Timonius polygamus* (G. Forst.) Rob., nom. illeg.)

Pacific.

See *Supplementum Carpologiae* 92, t. 196. 1806, *Nova Genera et Species Plantarum seu Prodromus* 4: 445. 1830, *Nederlandsch Kruidkundig Archief. Verslangen en Mededelingen der Nederlandsche Botanische Vereeniging* 2(2): 211. 1851 and *Proc. Amer. Acad. Arts* 45: 408. 1910, *Botanical Journal of the Linnean Society* 157: 120. 2008

(For skin diseases, irritant.)

Tinomisium Miers ex Hook. f. & Thomson Menispermaceae

Greek *mischos* 'a stalk', see *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 44. 1851, *Flora Indica*: being a systematic account of the plants . . . 1: 205. 1855.

Tinomisium petiolare Hook. f. & Thomson (*Tinomisium petiolare* Miers; *Tinomisium tonkinense* Gagnep.)

India. Woody cauliflorous vine, climber, liana, milky latex, leaves coriaceous, flowers greenish-white, inflorescence racemose, sweet edible seeds

See *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 44. 1851, *Flora Indica*: being a systematic account of the plants . . . 1: 205. 1855 and *Bulletin de la Société Botanique de France* 55: 43–44. 1908

(Milky latex used in rheumatism. Fruits as fish poison.)

in China: da ye teng

Tinomisium philippinense Diels

Philippines.

See *Pflanzenr.* (Engler) *Menispermac.* 116. 1910

(Milky latex used as an eyewash.)

in Philippines: bayating, lagtang, timbang-imbang

Tinomisium phytocrenoides Kurz (*Tinomisium phytocrenoides* Kurz ex Teijsm. & Binn.)

Indonesia. Liana, milky juice

See *Tijdschr. Nederl. Ind.* xxvii: 36. 1864

(Juice drunk against fevers. Pounded stem used as a rat poison.)

in Indonesia: seriawan susun

Tinospora Miers Menispermaceae

Possibly from the Latin *tinus* 'a plant, laurustinus' and Greek *sporos, spora* 'a seed', see *Atlantic Journal* 1(6): 177. 1833, *Flora* 27: 21. 1844, *Annals and Magazine of Natural History*, ser. 2 7(37): 35, 38. 1851, *Annals and Magazine of Natural History*, ser. 3 20: 261. 1867, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 403. 1899 and *Das Pflanzenreich* IV. 94(Heft 46): 126, 168. 1910, *South African Journal of Botany* 74(1): 2–9. 2008.

Tinospora bakis (A. Rich.) Miers (*Cocculus bakis* A. Rich.)

Tropical Africa. Dioecious, deciduous liana, drupes

See *Regni Vegetabilis Systema Naturale* 1: 511, 515–531. 1818 [1817], *Niger Flora* 215. 1849, *Annals and Magazine of Natural History* ser. 2 7(37): 35, 38. 1851, *Annals and Magazine of Natural History* ser. 3, 13: 322. 1864 and *Sciences et Techniques* 22(1): 38–46. 1996, *Dakar Médical* 42(1): 15–18. 1997, *Sciences et Techniques* 23(1): 70–79. 1998, *Dakar Médical* 44(2): 211–214. 1999, *Dakar Médical* 47(1): 60–63. 2002, *Dakar Médical* 48(1): 29–33. 2003, *African Journal of Traditional, Complementary and Alternative Medicines* 3(1): 75–81. 2006

(Root diuretic, febrifuge, hepatoprotective, antipyretic, emmenagogue, for jaundice, gonorrhoea, malaria, schistosomiasis, hematuria, bilious fever and yellow fever, liver and gall bladder problems, skin diseases. Liana and roots, depurative, diuretic, antidote, for jaundice, malaria, liver diseases, yellow fever, syphilis, stomachache. Roots and leaves tonic, febrifuge, astringent. Leaves cholagogue, diuretic and tonic.)

in Senegal: abolo, bakani, bakis, m'bakisse, peis

Tinospora caffra (Miers) Troupin (*Desmonema caffra* Miers)

Tropical Africa, Central African Republic, Mozambique, South Africa. Dioecious, climbing herb, inflorescence an axillary elongated false raceme, ovoid orange knobby drupes

See *Ann. Mag. Nat. Hist.* ser. 3, 20: 260. 1867 and *Bull. Jard. Bot. État Bruxelles* 25: 137. 1955

(Pounded leaves juice antiseptic, astringent, applied to wounds. Fish poison.)

in English: Orange grape creeper

Tinospora cordifolia (Willd.) Miers (*Menispermum cordifolium* Willd.; *Tinospora cordifolia* (Willd.) Hook.f. & Thomson; *Tinospora cordifolia* Miers)

India. Large climbing shrubby herb, glabrous, rather succulent, corky bark, long filiform fleshy aerial roots from the branches, cordate membranous leaves, yellow flowers, male flowers clustered and female usually solitary, red pea-sized drupes ovoid glossy succulent

See *Species Plantarum* 1: 340–341. 1753, *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 826. 1806, *Annals and Magazine of*

Natural History, ser. 2, 7(37): 35, 38. 1851, *Fl. Indica* 1: 184. 1855 and *Taxon* 29: 360–361. 1980, *Proceedings of the Indian Science Congress Association* 74(3,VI): 184–185. 1987, *Nucleus* 32: 173–179. 1989, *Ethnobotany* 14: 87–92. 2002, *Indian Journal of Pharmacology* 35: 83–91. 2003, *Ethnobotany* 16: 139–140. 2004

(Used in Ayurveda, Unani and Sidha. Plant decoction tonic, stomachic, antiperiodic, aphrodisiac, hepatoprotective, antidiabetic, antiinflammatory, antipyretic, antiarthritic, antioxidant, antiallergic, antistress, immunomodulatory, antimalarial, antispasmodic; plant used to improve the immune system and the body's resistance to infections, in general debility, dyspepsia, fever and urinary diseases; a decoction of the root of *Barleria strigosa* with *Barleria cristata* and *Tinospora cordifolia* is given in fevers with honey and long pepper. Stem bitter, stomachic, diuretic, stimulates bile secretion, used in dyspepsia, general debility, digestive disturbances, fevers and urinary and venereal diseases, rheumatic disorders; fruits or roots of *Helicteres isora*, seeds of *Pongamia glabra* and stem bark of *Tinospora cordifolia* mixed and crushed into powder eaten to cure diabetes; leaves of *Ziziphus glaberrima* together with stem of *Tinospora cordifolia*, stem bark of *Azadirachta indica* and tubers of *Cyperus rotundus* made into a decoction given in fevers; for snakebite, stem infusion drunk, or stem paste applied as antidote; decoction of root of *Fagonia arabica* with leaf of *Azadirachta indica* and stem of *Tinospora cordifolia* used as blood purifier; fresh stem extract useful in skin diseases, jaundice, liver enlargement, diabetes, fever and general debility; pith and wood for asthma and fever. Root antistress and antimalarial. Seeds oil for tuberculosis. Leaf extract taken against intestinal worms; fresh leaves decoction used to treat leucorrhoea. Veterinary medicine, a mixture of pith and wood along with crushed seeds of *Glycine max* given to buffaloes for stomach trouble; stem pieces fed to cattle in hematuria; for panting, root extract with those of *Tylophora asthmatica* given orally; roots of *Aristolochia indica* along with stem of *Tinospora cordifolia* pounded, boiled in water and the decoction given in insect bite; seeds of *Strychnos nux-vomica* along with stem bark of *Terminalia arjuna* and stem of *Tinospora cordifolia* pounded and the extract given orally in insect bite; stem bark of *Canthium parviflorum* along with those of *Terminalia arjuna* and *Tinospora cordifolia* pounded and the extract given in insect bite; stem infusion given for poultry diseases; bark juice given to cattle as anthelmintic; root paste fed to cattle as galactagogue; roots of *Indigofera trita* along with stem bark of *Balanites aegyptiacus*, stem of *Cissus quadrangularis* and *Tinospora cordifolia* pounded and the extract given in impaction; bark extract of *Bombax ceiba* pounded with leaves of *Tinospora cordifolia* given in dysentery; leaves along with those of *Dodonaea viscosa* pounded and the extract applied over the fractured area and bandaged. Magico-religious beliefs, contact therapy, stem as necklace to cure jaundice, fever and general weakness.)

in Bangladesh: fabronoi

in India: agniballi, amara, amarada balli, amarlota, ambarvel, amridavalli, amrita, amrita balli, amrta (= immortal, imperishable), amrtu, amrytaballi, amrytu, apriya, gadu, gaduval, galo, garjetunm, geloyi, ghado, giloe, giloy, gloe, gloya, goluchi, gudajvel, guduchi, gulvel, gul-bel, gulanca, gulancha, gulbel, gulchimala, guluchi, guluchi-lata, guluchimaala, gulvel, gurach, gurch, gurj, gurja, guruch, harjor, irakingphum, kaadu haaku kaare, latgulanj, limbvel, metulli, neem-gilol, ningthouk-hongli, nyam-rat, panilata, pittaghi (pitta, bile; agni, fire, destroying), seenthil, soma valli, somalatika, somavalli, surakrita, tambam teega, tantri, theisawntlung, thippathiga, tippa teega, tippateega, tittamirtam, tittaparuvan, tulavai, turupulappam, turuputkarakkoti, turuputkaram, turuputpam, uddhara, upavam, upavari, upavarikkoti, vaccakani, vaccatani, vaccatanikkoti, vacikaram, vallika, vallikkakoti, vallikkantam, vanci, vapamatu, vara, vataraktari, vatsadani, vayamatu, vayastha, vayatikakkoti, vellaiccintil, vencintil, vencintirkoti, venkaipatukani, verarku, vetiyati, vicalikkoti, virutalatanam, vishalya

in Nepal: gurjo

in Tibet: sle tras, sle-tres, sle tres

Tinospora crispa (L.) Hook.f. & Thomson (*Menispermum crispum* L.; *Tinospora gibbericaulis* Handel-Mazzetti; *Tinospora mastersii* Diels; *Tinospora rumphii* Boerl., nom. illeg.; *Tinospora thorelii* Gagnepain; *Tinospora tuberculata* (Lam.) Beumée ex K. Heyne)

Vietnam, Philippines. Creeping liana, woody climber, latex white, older stems warted with numerous prominent protrusions, very long filiform aerial roots, leaves broadly heart-shaped, small yellow flowers, fruits globose yellow-red, seeds with aril, primary rainforests, in evergreen forests, mixed deciduous forests

See *Species Plantarum* 1: 340–341. 1753, *Species Plantarum*, Editio Secunda 1468. 1763, *Flora Indica*: being a systematic account of the plants . . . 1: 183. 1855 and *Cat. Hort. Bogor.* 116. 1901, *Bulletin de la Société Botanique de France* 55: 46–47. 1908, *Das Pflanzenreich* IV. 94: 140. 1910, *Anzeiger der Akademie der Wissenschaften in Wien. Mathematisch-naturwissenschaftliche Klasse. Wien* 60: 95. 1923

(Dried stem antimalarial, antibacterial, bitter tonic. Roots febrifuge and tonic. Root and leaves, insulinotropic, tonic, antioxidant, antiperiodic, diuretic, for the treatment of diabetes, hypertension and lumbago; many traditional uses for the treatment of the skin. A decoction of the stems, leaves and roots used to treat fever, cholera, diabetes, rheumatism and snakebites; an infusion of the stem drunk as a vermifuge; a decoction of the stem used for washing sore eyes and syphilitic sores; the crushed leaves applied on wounds and made into poultice for itch; fresh juice for scabies.)

in Cambodia: bandaul pech

in China: bo ye qing dan

in Indonesia: andawali, bratawali, brotowali, putrawali, putrowali

Tinospora fragosa (Verdoorn) Verdoorn & Troupin (*Desmonema fragosum* Verdoorn; *Tinospora fragosa* Verdoorn & Troupin; *Triclisia fragosa* (Verdoorn) Verdoorn & Troupin)

South Africa, Botswana, Zimbabwe. Twining, semisucculent-succulent-stemmed, deciduous climber, grey-green thick fleshy stems, tuberous roots, branches are grey-green, grey-green heart-shaped leaves, inflorescence of false drooping racemes, male and female flowers on different branches, oval orange-red fruits, fast growing, forming aerial roots, bushveld

See *Atlantic Journal* 1(6): 177. Summer 1833, *Annals and Magazine of Natural History*, ser. 3 20: 261. 1867 and *J. S. African Bot.* vii. 209. 1941, *Mém. Acad. Roy. Sci. Outre-Mer, Sci. Nat. & Méd.* 8vo n.s. xiii. Fasc. 2, 196. 1962

(For boils, ulcers, skin rash, carbuncle. Parts of the plant boiled and used as a medicinal bath for rheumatism and body pains; leaves and twigs infusion taken against anthrax. Veterinary medicine, whole plant fed to cattle for anthrax.)

in English: Aaron's rod, marvel creeper, Moses' staff, wonder plant

in South Africa: Aaron-se-staf, wonderplant

Tinospora glabra (Burm.f.) Merr. (*Tinospora coriacea* (Blume) Beumée ex K. Heyne; *Tinospora reticulata* Miers)

Andaman Islands. A woody climber, thin papery bark, domatia usually present, fruit ellipsoidal red, often confused with *Tinospora crispa*, in littoral rain forest, in mangrove vegetation, on sandy beaches, in disturbed forest and thickets, on limestone

See *J. Arnold Arbor.* xix. 340. 1938

(Burnt leaves used to treat pinworms; ground bark applied to sore breasts of nursing mothers.)

in Indonesia: pancasona, tajungan, wase wages

in Philippines: makabuhay, papaitan, sangawnaw

Tinospora oblongifolia (Engl.) Troupin (*Desmonema oblongifolium* Engl.)

Kenya and Tanzania. Liana, semi-succulent, climber, warted stem, flowers in long pendulous racemes, globose lobed fruits

See *Bot. Jahrb. Syst.* 26(3–4): 408. 1899 and *Bull. Jard. Bot. État Bruxelles* 25: 137. 1955

(A decoction or infusion of the roots drunk as a purgative.)

Tinospora sagittata (Oliver) Gagnepain (*Limacia sagittata* Oliver; *Tinospora capillipes* Gagnepain; *Tinospora imbricata* S.Y. Hu; *Tinospora sagittata* Gagnep.; *Tinospora szechuanensis* S.Y. Hu)

China. Vine, climber, evergreen, perennial

See *Flora Cochinchinensis* 600, 620. 1790, *Hooker's Icones Plantarum* 18(2): t. 1749. 1888 [1887–1888 publ. Mar 1888] and *Bulletin de la Société Botanique de France* sér. 4 55: 45–46. 1908, *J. Arnold Arbor.* xxxv. 195–196. 1954, *Journal of Ethnopharmacology* 85(1): 61–67. 2003

(Antiinflammatory. Roots anodyne, antiphlogistic, depurative and febrifuge. A decoction used internally, or the mashed root used as a poultice, in the treatment of laryngitis, dysentery, boils, abscesses and poisonous snakebites)

in China: qing niu dan

Tinospora sagittata (Oliver) Gagnepain var. ***craveniana*** (S.Y. Hu) H.S. Lo (*Tinospora craveniana* S.Y. Hu; *Tinospora intermedia* S.Y. Hu)

China. Vine

See *Bulletin de la Société Botanique de France* sér. 4 55: 45–46. 1908, *Journal of the Arnold Arboretum* 35(2): 194–195, t. 1, f. 6. 1954, *Iconographia Cormophytorum Sinicorum, Supplementum I*: 490. 1982, *Planta Med.* 57(5): 505. 1991

(Antiinflammatory.)

in China: e mei qing niu dan

Tinospora sagittata (Oliver) Gagnepain var. ***sagittata*** (*Limacia sagittata* Oliver; *Tinospora capillipes* Gagnepain; *Tinospora imbricata* S.Y. Hu; *Tinospora szechuanensis* S.Y. Hu)

China. Vine

See *Flora Cochinchinensis* 600, 620. 1790, *Hooker's Icones Plantarum* 18(2): t. 1749. 1888 and *Bulletin de la Société Botanique de France* sér. 4 55: 45–46. 1908

(Antiinflammatory.)

in China: qing niu dan

Tinospora sinensis (Lour.) Merr. (*Campylus sinensis* Lour.; *Cocculus tomentosus* Colebrooke; *Menispermum malabaricum* Lamarck; *Menispermum tomentosum* (Colebrooke) Roxburgh; *Tinospora malabarica* (Lamarck) J.D. Hooker & Thomson; *Tinospora tomentosa* Miers; *Tinospora tomentosa* (Colebrooke) J.D. Hooker & Thomson)

China, Nepal, Assam, S. India. Climbing shrub, deciduous, liana, subwoody, stem with prominent scattered lenticels, milky latex, dense hairs covering all plant parts, male and female flowers seen separately in the same plant, fruits orange-red, along streams

See *Species Plantarum* 1: 340–341. 1753, *Flora Cochinchinensis* 94, 113. 1790, *Encyclopédie Méthodique, Botanique* 4: 96. 1797, *Regni Vegetabilis Systema Naturale* 1: 511, 515–531. 1818 [1817], *Transactions of the Linnean Society of London* 13(1): 59–60. 1821, *Flora Indica*; or descriptions of Indian Plants 3: 813. 1832, *Flora Indica*: being a systematic account of the plants . . . 1: 183. 1855 and *Sunyatsenia* 1: 193. 1934

(Used in Ayurveda and Sidha. Tonic, immunostimulant, anti-inflammatory, antiallergic, antimalarial, antidiabetic, hepatoprotective, nutrient, used for treating arthritis and chronic rheumatism, good revitalizer for old age diseases, increases appetite and digestion for elderly. Stems for treating bronchitis, asthma, piles, ulcerated wounds, liver complaints, chronic rheumatism and also as muscle relaxant; stem juice febrifuge. Leaf extract used as ear drop.)

in China: zhong hua qing niu dan

in India: amradvalli, amratavalli, amrta, calon, chittamratam, cittamrtu, culavarini, culavarinikkoti, gane gurjoo, gilai, giloe, giloei, guduci, gulancha, gulvel, gurch, hogunilot, kattu amirthu, kodipurru tige, koyivahimaada, padmagulancha, paiyamratam, pee-amerdu, podmoguloci, por cintil, porcintil, potchindil, seendil, sindilkodi, sudarsan, sudarsana, sudarsana balli, sudarshana balli, thippa theega, thipatheega, tiloe, tippatega, tuparakkoti, tuparam, vankaihni, vatsadani, vhadli-amrutvel

in Nepal: gurjo-ko-laharaa

Tibetan name: le te

Tinospora smilacina Benth.

India. Vine

See *Journal of the Linnean Society, Botany* V(Suppl. II): 52. 1861

(Used in countering snake venom.)

in English: snakevine

Tinospora tenera Miers (*Desmonema tenerum* Diels; *Tinospora stuhlmannii* Engl.)

Tropical Africa, Tanzania, Mozambique, Swaziland. Semi-succulent liana

See *Ann. Mag. Nat. Hist.* ser. 3, 13: 322. 1864, *Bot. Jahrb. Syst.* 26(3–4): 404. 1899 and *Pflanzenr.* (Engler) *Menispermac.* 154. 1910

(Leaf extract analgesic, sexual tonic for men, drunk against pain in the joints; leaves decoction as a wash against venereal sores, wounds. Leaves and roots steam inhaled to treat

influenza; leaves and roots decoction drunk against kidney stones.)

Tinospora tuberculata (Lam.) Beumée (*Menispermum tuberculatum* Lam.; *Tinospora tuberculata* Beumée ex K. Heyne)

Indonesia. Climber, papery warted bark

See *Encycl.* (Lamarck) 4(1): 96. 1797, *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 38. 1851 and *Cat. Hort. Bogor.* 116. 1901, *Nutt. Pl. Ned.-Ind.* ed. 2 i. 619. 1927, *Pharm. Acta Helv.* 36: 65–68. 1961, Yokozawa Takako et al. “Effects of aqueous extract of *Tinospora tuberculata* on hypercholesterolaemic rats.” *Journal of Traditional Medicines* 15(5): 398–399. 1998, *Biol. Pharm. Bull.* 22(12): 1306–1309. 1999, *Phytother. Res.* 14(1): 51–53. 2000, *Biol. Pharm. Bull.* 24(10): 1153–1156. 2001

(Whole plant bitter, tonic, antipyretic, antidiabetic, a remedy for scabies, wounds, itch.)

in Indonesia: andawali, bratawali

Tipuana (Benth.) Benth. Fabaceae (Dalbergieae)

From the South American name, *tipu*, see *Synopsis Plantarum* 2(2): 276. 1807, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 267. 1853, *Journal of the Proceedings of the Linnean Society* 4(Suppl.): 72. 1859[1860] and *Darwiniana* 5: 279–298. 1941, *Phytologia* 28(5): 475–478. 1974, *Darwiniana* 19(2–4): 458–489. 1975

Tipuana tipu (Benth.) Kuntze (*Machaerium fertile* Griseb.; *Machaerium tipu* Benth.; *Tipuana speciosa* Benth., nom. illeg.; *Tipuana tipa* Lillo)

Argentina, Bolivia. Perennial non-climbing tree, yellow-purplish flowers in loosely branched terminal panicles, winged pods

See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 127. 1874, *Revisio Generum Plantarum* 3(3): 72. 1898 and *Contr. Conoc. Arb. Argent.* 58. 1910, *Rhodora* 82: 475–481. 1980, *Biodiversity and Conservation* 15(8): 2565–2594. 2006, *Medical Mycology* 47(2): 177–184. 2009

(Leaves used in veterinary medicine.)

in English: pride of Bolivia, tipa tree, tipu tree

in Latin America: palo mortero, tipa, tipa blanca, tipu

in China: da ban mu

Tiquilia Pers. Boraginaceae (Ehretiaceae)

Vernacular or native South American name, see *Synopsis Plantarum* (Persoon) 1: 157. 1805.

Tiquilia atacamensis (Phil.) A.T. Richardson (*Coldenia elongata* Rusby; *Coldenia parviflora* Phil.)

Chile. Roots consumed by sheep

See *Species Plantarum* 1: 125. 1753, *Florula Atacamensis seu Enumeratio ...* 211. 1860 and *Descriptions of Three Hundred New Species of South American Plants* 107. 1920, *Sida* 6(3): 236. 1976, *Rhodora* 79(820): 474, 506, 510, 530, 550, 560. 1977

(Aboveground parts may be toxic to livestock.)

in Chile: catamasa

Tiquilia latior (I.M. Johnst.) A.T. Richardson (*Coldenia hispidissima* (Torr. & A. Gray) A. Gray var. *latior* I.M. Johnst.; *Coldenia hispidissima* A. Gray var. *latior* I.M. Johnst.; *Coldenia hispidissima* (Torr.) A. Gray var. *latior* I.M. Johnst.)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 5: 340. 1862 and *Contributions from the Gray Herbarium of Harvard University* 68: 92. 1923, *Sida* 6(3): 236. 1976, *Rhodora* 79: 467–572. 1977

(Plant used for gastrointestinal disorders.)

in English: matted crinklemat

Tiquilia palmeri (A. Gray) A.T. Richardson (*Coldenia palmeri* A. Gray; *Tiquiliopsis palmeri* (A. Gray) Rydb.; *Triquiliopsis palmeri* (A. Gray) Rydb.)

North America.

See *Species Plantarum* 1: 125. 1753, *Genera Plantarum* 128. 1789, *Proceedings of the American Academy of Arts and Sciences* 5: 341. 1862, *Proceedings of the American Academy of Arts and Sciences* 8: 292 (-293). 1870 and *Muhlenbergia; a journal of botany* 2(2A): 239. 1906, *Flora of the Rocky Mountains* 711, 1066. 1917 [31 Dec 1917, as *Triquiliopsis*], *Sida* 6(3): 236. 1976

(Roots infusion a remedy for stomachache or a cold.)

Tirpitzia Hallier f. Linaceae

Tirpitzia ovoidea Chun & F.C How ex W.L. Sha

China. Subshrub, corolla white, styles 5, ovary 5-locular

See *Beihefte zum Botanischen Centralblatt* 39(2): 5. 1921, *Guihaia* 2(4): 189–190, f. 1–6. 1982, *Thai Forest Bulletin* 34: 201–205. 2006, *Systematic Botany* 34(2): 386–405. 2009

(Emollient, demulcent, healing.)

in China: mi nian ba

Tirpitzia sinensis (Hemsley) Hallier f. (*Reinwardtia sinensis* Hemsley; *Tirpitzia candida* Handel-Mazzetti; *Tirpitzia sinensis* H. Hallier)

China. Subshrub, corolla white, styles 4, ovary 4-locular

See *Commentationes Botanicae* 19. 1822, *Icones Plantarum* [Hooker] 26(6): t. 2594. 1899 and *Anzeiger der*

Akademie der Wissenschaften in Wien. Mathematisch-naturwissenschaftliche Klasse. Wien 69: 248. 1922

(Astringent, emollient.)

in China: qing li chai

Tithonia Desf. ex Juss. Asteraceae

After Tithonus, a young man favourite and companion of Aurora, the goddess of dawn, see *Genera Plantarum* 189. 1789 and *Fieldiana, Bot.* 24(12): 181–361, 503–570. 1976, *Compositae Newslett.* 27: 7–10. 1995, *Amer. J. Bot.* 86(7): 1003–1013. 1999.

Tithonia diversifolia (Hemsley) A. Gray (*Helianthus quinquelobus* Sessé & Moc.; *Mirasolia diversifolia* Hemsl.; *Tithonia diversifolia* var. *glabriuscula* S.F. Blake; *Tithonia triloba* Sch. Bip. ex Klatt; *Urbanisol tagetiflora* fo. *grandiflorus* Kuntze; *Urbanisol tagetiflora* var. *diversifolius* (Hemsl.) Kuntze; *Urbanisol tagetiflora* var. *flavus* Kuntze; *Urbanisol tagetifolius* fo. *grandiflorus* Kuntze; *Urbanisol tagetifolius* subfo. *flavus* Kuntze; *Urbanisol tagetifolius* var. *diversifolius* (Hemsl.) Kuntze)

Mexico. Undershrub, robust, solitary yellow heads on long peduncles

See *Biologia Centrali-Americana; ... Botany ...* 2(8): 168, pl. 47. 1881, *Proceedings of the American Academy of Arts and Sciences* 19: 5. 1883, *Revisio Generum Plantarum* 1: 370–371. 1891, *Bulletin de la Société Botanique de Belgique* 31(1): 203. 1892, *Flora Mexicana*. 193. 1894

(Used orally to treat malaria and other forms of fever and topically to treat hematomas and muscular cramps, also used as a liniment. Flower heads for wounds and bruises. Leaf juice or whole plant a remedy for gastrointestinal complaints, acidity, an antiinflammatory, a treatment for wounds and skin eruptions; leaves ground with those of *Bidens pilosa* and the paste applied all over the body against the fever. Leaves infusion drunk for stomachache, leaves also heated over fire and placed on sore stomach.)

in English: Mexican sunflower, tree marigold

in Mexico: arnica, arnica de la montaña

in India: pappan, ran zendu, sooryakanthi

Tithonia rotundifolia (Mill.) S.F. Blake (*Helianthus speciosus* Hook.; *Leighia speciosa* (Hook.) DC.; *Tagetes rotundifolia* Mill.; *Tithonia aristata* Oerst.; *Tithonia heterophylla* Griseb.; *Tithonia macrophylla* S. Watson; *Tithonia speciosa* (Hook.) Hook. ex Griseb.; *Tithonia speciosa* (Hook.) Klatt; *Tithonia tagetiflora* Desf.; *Tithonia tagetiflora* Lam.; *Tithonia uniflora* J.F. Gmel.; *Tithonia vilmoriniana* Pamp.; *Urbanisol aristatus* (Oerst.) Kuntze; *Urbanisol heterophyllus* (Griseb.) Kuntze; *Urbanisol tagetiflora* var. *normalis* Kuntze; *Urbanisol tagetiflora* var. *speciosus* Kuntze)

India. Soft wooded shrub, orange-red flowers, compressed obscurely 4-angled achenes, yellowish-brown persistent pappus

See *The Gardeners Dictionary: ... eighth edition no. 4.* 1768, *Systema Naturae ... editio decima tertia, aucta, reformata* 1259, t. 2. 1792, *Annales du muséum national d'histoire naturelle* 1: 49, t. 4. 1802, *Botanical Magazine* 61: t. 3295. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 583. 1836, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(5–7): 114. 1853, *Catalogus plantarum cubensium ...* 155. 1856, *Bonplandia* (Hanover) 6(1): 9. 1858, *Revisio Generum Plantarum* 1: 370–371. 1891, *Proceedings of the American Academy of Arts and Sciences* 26: 140. 1891, *Bulletin de la Société Botanique de Belgique* 31(1): 203–204. 1892[1893] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 492. 1905, *Bolletino della Società Botanica Italiana* 1908: 133. 1908, *Contributions from the Gray Herbarium of Harvard University* 52: 41. 1917, *Taxon* 27: 519–535. 1978, *Compositae Newslett.* 27: 7–10. 1995

(Antiinflammatory, antiseptic, a treatment for wounds and skin diseases.)

Toddalia Juss. Rutaceae

Kaki-toddali, koka-toddali, koka-toddali (kaka = crow, tudali = waist chain) is a Malayalam name for *Toddalia asiatica* (L.) Lam., see *Hort. Malab.* 5: 81–82. t. 41. 1685, *Genera Plantarum* [Jussieu] 371. 1789 and *Bull. Misc. Inform. Kew* 1926: 389–416. 1926.

Toddalia asiatica (L.) Lam. (*Aralia labordei* H. Lév.; *Paullinia asiatica* L.; *Toddalia aculeata* Pers.; *Toddalia angustifolia* Lam.; *Toddalia asiatica* Lam.; *Toddalia asiatica* S.Y. Hu; *Toddalia asiatica* Baill.; *Toddalia asiatica* var. *floribunda* (Wall.) Kurz; *Toddalia asiatica* var. *gracilis* Gamble; *Toddalia asiatica* var. *obtusifolia* Gamble; *Toddalia floribunda* Wall.; *Toddalia nitida* Lam.; *Toddalia rubricaulis* Roem. & Schult.; *Toddalia tonkinensis* Guillaumin)

China, Himalaya. Straggling shrub, climbing, prickly, leaves highly aromatic, yellow flowers, ripe berries pickled

See *Species Plantarum* 1: 365. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 2: 116. 1797, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 5: 323. 1819, *Plantae Asiaticae Rariores* (Wallich). 3: 17, pl. 232. 1832, *Bot. Med.* ii. 862. 1884 and *Bull. Misc. Inform. Kew* 1926: 389–416. 1926, *Bull. Soc. Bot. France* 91: 215. 1945, *Silvae Genet.* 22: 182–188. 1973, *Journal of the Arnold Arboretum* 61: 81. 1980

(Used in Ayurveda and Sidha. Root contains poisonous resin. Whole plant aromatic, tonic, useful in debility during convalescence; leaves and stem decoction febrifuge. Leaves and roots for fevers, inflammation, insect bites and cough. Leaves and buds ground with rice flour and used against cough and colds in children. Fresh leaves eaten for pain in the bowels; leaves chewed in stomach disorders and indigestion. Fruits

eaten for relief from the burning sensation in stomach and stomachache, and also for fever, headache, dyspepsia, diarrhea, cough, ulcers, wounds; fruit juice taken internally for dysentery; dried fruits mixed with stem bark of *Cassia fistula*, ground and the powder given in scabies. Root antipyretic, astringent, for diarrhea, fever; whole plant of *Drosera peltata* along with the roots of *Toddalia asiatica* and rhizomes of *Hemionitis arifolia* ground together and used for mental disorders, nervous breakdown. Root bark aromatic, pungent, diaphoretic, stomachic, antipyretic, antimalarial; an infusion given in mild fevers and diarrhea, gonorrhoea, cough, influenza; a decoction for malaria and to treat rat bites and sores; ground root applied on cuts and wounds; juice of root and bark used as a bitter tonic, stimulant, stomachic, febrifuge. Contact therapy, stem tied around the wrist to check vomiting sensation.)

in English: forest pepper, Lopez root, Lopez tree, wild orange tree

in Rodrigues Isl.: bambara, patte de poule à piquants

in Southern Africa: iGado, ruKato, Nyachara (Shona)

in Tanzania: lumbulo

in China: fei long zhang zue

in India: anomochi, borimti, cankitam, cantikantam, cantiramulikai, chingatti, cimaikkiccilikkilanku, condacashinda, dahan (= burning), dahana, dodda kaadu menasu, erigonchi, errakasinda, ilishingi, jangli-kali-mirch, jangli-kalimirc, jangli-kalimirch, janglikalimirch, junglikaalimirchi, junglikalimirchi, kaadu haaku kaare, kaadu kaake kaare, kaadu menasina gida, kaadamenasu, kaattunarakam, kaccolam, kaccoram, kaccuram, kada-hakukare, kada-todali, kadakare, kadu manasige hambu, kaduhakukare, kadukare, kadumaraju, kadumenasu, kaiccolam, kaiccoram, kaka-toddali, kakatoddali, kakka-totalli, kakkatoddali, kakkattutali, kakkattuttali, kanc, kancana, kancanah, kanchan, kanchana, kandvi, kanj, kantapalaci, kantham kolunthu, kar, kara, karamullu, karppuraver, kattu milaku, kattukarimilaku, kattukarimulaku, kattukariveppila, kattukurimulaku, kattumilagu, kattumilaku, kaypele, kentimulam, kepula, kiccili, kiccilik karanai, kichilikaranai, konda-kashinda, konda kasinda, konda-kasinda-chettu, konda mirapa, kondakaasinda, kondakashinda, kondakasinda, kondakasinds, kondamirapu, kondamirepu, konta kasinda, konta kasindri, leemari, limbadi, limri, maachi mullu, maacimullu, maashi mullu, macchimullu, machige, machige chedy, macimullu, magiche, manger, mashimullu, masimullu, menger, merapugandra, milagaranai, milagarannai, milagucharanai, milakaranai, milakarani, milakaranti, milaku, milakukaranai, milkaranai, minepagandra, mirapa-kandra, mirapa kandra, mirapagandra, mirapakaandra, mirapakanda, mirapakandra, mirapakondra, mulaka-tani, mulakaranai, mulakurunai, mulakutali, mulakutanni, mulla korinda, mullakorinda, mullamorinda, mullu maachige, mullu mashi, mullu-mastige, mullukkarani, mullukorinda, mullumaacige, mullumacige, mullumashige, mullumasige, musimullu, nachi wagum,

in Indonesia: akar kutjing, kait besis

in Japan: sara-kachâ, saru-kake-mikan

Toddalia bilocularis Wight & Arn.

India.

See *Prodr. Fl. Ind. Orient.* 1: 149. 1834

(Used in Ayurveda.)

in India: devadarom, krishna-aguru

Tolmiea Torrey & A. Gray Saxifragaceae

After the British (b. Inverness) botanist William Fraser Tolmie, 1812–1886 (d. Victoria, B.C., Canada), physician, plant collector, fur trader, a pupil of W.J. Hooker, with G.M. Dawson wrote *Comparative vocabularies of the Indian Tribes of British Columbia*. 1884; see *A Flora of North America: containing ...* (Torr. & A. Gray) 1(4): 582–583. 1840 and John T. Walbran, *British Columbia Coast Names, 1592–1906. To Which are Added a Few Names in Adjacent United States Territory, Their Origin and History*. First Edition. Ottawa: Government Printing Bureau, 1909, Howard Atwood Kelly and Walter Lincoln Burrage, *Dictionary of American Medical Biography*. New York 1928, R. Tanghe (sous la direction de), *Bibliographie des Bibliographies Canadiennes*, T. U. of T. Press 1960, William Fraser Tolmie, *The Journals of William Fraser Tolmie: Physician and Fur Trader*. Mitchell Press Limited, Vancouver 1963, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 255. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 389. 1965, Wilson Duff, *The Indian History of British Columbia*. Anthropology in British Columbia. Memoir no. 5. Royal British Columbia Museum 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 403. Boston, Mass. 1972, G.P.V. Akrigg & Helen B. Akrigg, *British Columbia Place Names*. Victoria: Sono Nis Press, 1986, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 179. 1989.

Tolmiea menziesii (Hook.) Torrey & A. Gray (*Heuchera menziesii* (Pursh) Hook.; *Heuchera menziesii* Hook.; *Leptaxis menziesii* Raf.; *Leptaxis menziesii* (Pursh) Raf.; *Tiarella menziesii* Pursh; *Tiarella menziesii* Pursh; *Tolmiea menziesii* Torr. & A. Gray)

North America. Perennial herb, leaves spotted or mottled with cream or gold, flowers in erect clusters

See *Sp. Pl.* 1: 405. 1753, *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 313. 1813, *Flora Boreali-Americana* (Hooker) 1(5): 237. 1832, *Flora Telluriana* 2: 77. 1837 [1836 publ.

Jan-Mar 1837], *A Flora of North America: containing ...* (Torr. & A. Gray) 1(4): 582. 1840 and *Syst. Bot.* 5: 17–29. 1980, *Taxon* 31: 764–765. 1982, *Canad. J. Bot.* 63: 1309–1312. 1985

(All parts poisonous, skin irritation, dermatitis, itching, blisters, allergic reactions.)

in English: pickaback plant, pig-a-back plant, piggyback plant

Tolypanthus (Blume) Reichb. Loranthaceae

From the Greek *tolype* ‘a ball of wool, lump’ and *anthos* ‘flower’, see *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 7(2): 1731. 1830, *Flora Javae* 18. 1830, Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Der Deutsche Botaniker*: i-ii. Dresden, Leipzig, 1841–1842 [Bd. i: *Repertorium herbarii*, sive nomenclator generum plantarum ... das Herbarienbuch: i-ii--bd. ii: *Flora saxonica: die Flora von Sachsen, ein botanisches Excursionsbuch ...* 1842.] and *Taxon* xvii. 158. 1968. Genus name not validly published.

Tolypanthus involucratus Blume (*Loranthus involucratus* Roxb.; *Tolypanthus involucratus* (Roxb.) M.R. Almeida; *Tolypanthus involucratus* (Roxb.) Tiegh.)

India. Parasitic herb, woody branches, coriaceous elliptic-ovate leaves, pinkish flowers

See *Hort. Bengal.* 87. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 208. 1824, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1731. 1830, *Fl. Ind.*, ed. Carey, 1: 552. 1832, *FBI* 5: 218. 1886, *Bull. Soc. Bot. France* 42: 248. 1895 and *Fl. Maharashtra* 4A: 272. 2003

(A decoction of flowers of *Mesua ferrea* with stems of *Tolypanthus involucratus* and roots of *Ricinus communis* given in bodyache. A decoction of rhizome of *Curcuma aromatica* with roots of *Urena lobata* and leaves of *Tolypanthus involucratus* given to expel catarrh. Contact therapy, a piece of stem is tied around the wrist in skin diseases.)

in India: tak-chari

Tonestus A. Nelson Asteraceae

Anagram of *Stenotus*, see *Bot. Gaz.* 37: 262. 1904.

Tonestus pygmaeus (Torrey & A. Gray) A. Nelson (*Aster stenotus* Kuntze; *Haplopappus pygmaeus* (Torrey & A. Gray) A. Gray; *Haplopappus pygmaeus* A. Gray; *Haplopappus pygmaeus* Clem. & E.G. Clem.; *Stenotus pygmaeus* Torrey & A. Gray; *Stenotus pygmoeus* Torr. & A. Gray; *Tonestus pygmaeus* A. Nelson)

North America.

See *Revis. Gen. Pl.* 1: 317. 1891 and *Fl. N. Amer.* (Torr. & A. Gray) 2: 237. 1842, *Amer. J. Sci.* Ser. II, xxxiii. (1862) 239. 1862 and *Bot. Gaz.* 37: 262. 1904, *Rocky Mt. Flowers* 277. 1914

(For skin diseases, antiinflammatory.)

in English: pygmy serpentweed

Tongoloa H. Wolff Apiaceae

See *Species Plantarum* 1: 245–246, 263–264. 1753 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(84): 279–280. 1925.

(Plant and seeds anthelmintic, carminative, digestive, laxative, pectoral, for hookworm, tapeworms, pinworms and roundworms.)

in English: kaya nut

in China: fei, ri ben fei shu

Toricellia DC. Torricelliaceae (Cornaceae)

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 257. 1830 and *Bulletin of the Fan Memorial Institute of Biology* 5: 311. 1934, *Kew Bulletin* 26: 492. 1972, Hu Wenkuang. *Toricellia*. In: Fang Wenpei & Hu Wenkuang, eds., *Fl. Reipubl. Popularis Sin.* 56: 38–108. 1990, *Novon* 2(3): 239. 1992, *Novon* 9(4): 551–552. 1999, *Flora of China* 14: 233. 2005.

Toricellia angulata Oliver

China. Shrub or tree, deciduous, bark gray, leaf blade margin entire or dentate, staminate inflorescence densely pubescent, calyx of carpellate flowers bell-shaped glabrous

See *Hooker's Icon. Pl.* 19: t. 1893. 1889 and *Bot. Jahrb. Syst.* 29: 507. 1901, *J. Arnold Arbor.* 13: 336. 1932

(Alcoholic beverages infused with the roots or bark are used to cure injuries. Veterinary medicine, macerated roots and bark are used as pastes to cure injuries to livestock.)

in China: jiao ye qiao bing mu

Toricellia tiliifolia DC. (also *tiliaefolia*)

China, India, Himalaya. Small tree or shrub, deciduous, branches spreading, leaf blade unlobed margin serrate, forest margins, open slopes

See *Prodr.* (DC.) 4: 257. 1830 and *Acta Phytotax. Geobot.* 45(1): 15–22. 1994

(Alcoholic beverages infused with the roots or bark used to cure injuries. Veterinary medicine, macerated roots and bark are used as pastes to cure injuries to livestock.)

in China: qiao bing mu

Tournefortia L. Boraginaceae

For the French (b. Aix-en-Provence) botanist Joseph Pitton de Tournefort, 1656–1708 (d. Paris), physician, naturalist, professor of medicine and botany, traveller, he is the father of generic concept (first to define genus and genera); see *Species Plantarum* 1: 140–141. 1753, *Definitiones Generum Plantarum* 507. 1760, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 8: 315. 1763, *Sylva Telluriana* 167. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 514–515. 1845 and H.N. Cloude, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 255. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 394. 1965, *Fieldiana, Bot.* 24(9/1–2): 111–167. 1970, *Botanical Journal of the Linnean Society* 65(2): 256. 1972, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait*

Collection. 404. 1972, Jean F. Leroy, *D.S.B.* 13: 442–444. 1981, Stafleu and Cowan, *Taxonomic Literature*. 6: 412–415. Utrecht 1986, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 272–273. 1988, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988, *Taxon* 41: 571. 1992, *Taxon* 44: 611–612. 1995.

Tournefortia argentea L.f. (*Argusia argentea* (Linnaeus f.) Heine; *Messerschmidia argentea* (Linnaeus f.) I.M. Johnston; *Tournefortia arborea* Blanco) (*Argusia*, Latin Argus and Greek Argos was the hundred-eyed keeper of Io.)

Indo-Pacific. Tree or shrub, spreading, scandent, slow growing, silky pubescent leaves, inflorescence pubescent, numerous small greenish white sessile flowers arranged in multi-branched terminal panicle cymes, smooth greenish white fruit, leaves as pig fodder, a barrier to salt spray, a windbreak on exposed coasts, often found near the water's edge

See *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 8: 315. 1763, *Supplementum Plantarum* 133. 1782 [1781 publ. Apr 1782], *Flora de Filipinas*: 129. 1837 and *Journal of the Arnold Arboretum* 16(2): 164. 1935, *Flore de la Nouvelle Calédonie et Dépendances* 7: 109, pl. 24. 1976

(Inner bark taken for asthma. Roots febrifuge, a decoction used in tuberculosis and rheumatism. Infusion or leaf juice applied to infected cuts and stings from certain poison fish; leaves infusion drunk to treat poisoning caused by eating tainted fish; leaves for childrens' rashes, diarrhea, to stop bleeding and cover bruises; leaves of *Heptapleurum venulosum* mixed with leaves of *Messerschmidia argentea* and *Scaevola taccada* are pounded with coconut oil and rubbed on body during fever; for lumbago, rubbed on body, coconut oil and macerated leaves of *Messerschmidia argentea*. Ritual, ceremonial, leaves to cure diseases caused by the violation of sea taboos.)

in English: beach heliotrope, tree heliotrope, velvet-leaf tree

in China: yin mao shu

in India: gondhuri, ka-vap, kafap, kavap

in Japan: monpa-no-ki, hama-suki

in Pacific: amolaset, chen, evu, hunig, hunek, hunik, irin, kiden, roronibebe, sesen sruhsruh, tahinu tai'inu, tau'unu, taihuni, tauhunu, tausuni, tchel, te re, te ren, titin, touhuni

in Papua New Guinea: ginewa, parah

in Rodrigues Isl.: veloutier

Tournefortia brevilobata K. Krause

Colombia.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 630. 1906

(Postpartum remedy, leaves infusion drunk by women after childbirth.)

in Ecuador: guaracallo pequeño

Tournefortia gnaphalodes (L.) R. Br. ex Roem. & Schult. (*Argusia gnaphalodes* (L.) Heine; *Heliotropium gnaphalodes* L.; *Mallotonia gnaphalodes* (L.) Britton; *Messerschmidia gnaphalodes* (L.) I.M. Johnst.)

North America.

See *Systema Naturae*, Editio Decima 2: 913. 1759, *Systema Vegetabilium* 4: 538. 1819 and *Annals of the Missouri Botanical Garden* 2: 47. 1915, *Journal of the Arnold Arboretum* 16(2): 165–166. 1935, *Flore de la Nouvelle Calédonie et Dépendances* 7: 108. 1976

(Leaf decoction taken for venereal disease, as antidote for fish poisoning. Decoction used externally for rheumatism. Leaf decoction, taken with *Krameria ixine*, is a strong abortifacient. Leaves burned in house to drive out fleas.)

in Curaçao: tabacu di piscado

Tournefortia maculata Jacq. (*Tournefortia guadalupensis* Urb.; *Tournefortia paniculata* Cham.; *Tournefortia peruviana* Poir.; *Tournefortia sagraeana* DC.; *Tournefortia syringifolia* Vahl; *Tournefortia volubilis* L.)

Colombia.

(Antiinflammatory in homeopathic dilution. A cause of delayed contact dermatitis, allergic contact dermatitis to *Rhus* is uncommon; oral or parenteral exposure to certain contact allergens may elicit an eczematous skin reaction in sensitized individuals. Systemic contact dermatitis may occur in contact-sensitized individuals.)

in English: eastern poison oak, oak leaf ivy

Toxicodendron vernicifluum (Stokes) F.A. Barkley (*Rhus succedanea* L. var. *himalaica* Hook. f.; *Rhus vernicifera* DC.; *Rhus vernicifera* var. *silvestrii* Pamp.; *Rhus verniciflua* Stokes; *Toxicodendron vernicifera* (DC.) E.A. Barkley & F.A. Barkley)

Japan, China. Tree, milky latex black when exposed to air

See *Species Plantarum* 1: 265–267. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1.* 1754, *Mantissa Plantarum* 2: 221. 1771, *A Botanical Materia Medica* 2: 164. 1812, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 68. 1825, *The Flora of British India* 2(4): 12. 1876 and *Nuovo Giornale Botanico Italiano*, n.s. 17(3): 416. 1910, *Annals of the Missouri Botanical Garden* 24(2): 263. 1937, *American Midland Naturalist* 24: 680. 1940, *Acta Botanica Boreali-Occidentalia Sinica* 5(4): 314, f. 1. 1985, *Food Chem. Toxicol.* 39(3): 229–237. 2001, *Biol. Pharm. Bull.* 29(8): 1603–1607. 2006, *J. Eur. Acad. Dermatol. Venereol.* 20(2): 212–213. 2006, *Apoptosis.* 12(7): 1289–1298. 2007, *Biol. Pharm. Bull.* 30(1): 111–116. 2007

(*Rhus verniciflua* is a flavonoid-rich herbal medicine that has long been used as a food additive, as healing of inflammatory diseases and antitumor agent. Antioxidant, hypolipidemic, antirheumatoid arthritis, antifibrogenic, antinociceptive, antiproliferative, antimutagenic and apoptotic. Lacquer dermatitis, severe allergic contact dermatitis. Cross-sensitivity to other anacardiaceous plants.)

in English: Japanese lacquer tree

in Japan: urushi

Toxicodendron vernix (L.) Kuntze (*Rhus venenata* DC.; *Rhus vernix* L.; *Sorindeia madagascariensis* Thouars ex DC.; *Toxicodendron vernix* Kuntze; *Toxicodendron vernix* (L.) Shafer, nom. illeg.)

North America. Perennial shrub or small tree, inflorescences with fluffy hairs, white hard fruits in hanging clusters

See *Species Plantarum* 1: 265–267. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1.* 1754, *Genera*

Nova Madagascariensia 23. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 80. 1825, *Museum Botanicum* 1: 1–396. 1841, *Revisio Generum Plantarum* 1: 153. 1891 and *North American Trees* 610. 1908, *J. Am. Acad. Dermatol.* 4(1): 99–114. 1981, *Naturaliste Canad.* 111: 447–449. 1984

(All parts poisonous, skin irritation following direct or indirect contact; humans are highly sensitive to allergic reaction; mild to severe dermatitis can result from exposure to poison sumac. The sap of *Rhus vernix* contains the allergen urushiol. The chemical is released when plant tissue is damaged, a pale cream-coloured thick poisonous juice exudes in abundance.)

in English: poison ash, poison dogwood, poison elder, poison sumac, poison tree, poison wood, swamp sumac

Toxicodendron wallichii (Hook. f.) Kuntze (*Rhus juglandifolia* Wall. ex D. Don; *Rhus juglandifolia* Wall., nom. nud.; *Rhus juglandifolia* Willd. ex Schult.; *Rhus wallichii* Hook. f.; *Rhus wallichii* Sweet; *Toxicodendron wallichii* Kuntze)

India.

See *Species Plantarum* 1: 265–267. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1.* 1754, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 6: 649. 1820, *Prodr. Fl. Nepal.* 248. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 996. 1828 [1829], *Hort. Brit.* [Sweet], ed. 2. 118. 1830, *The Flora of British India* [J.D. Hooker] 2(4): 11. 1876, *Revisio Generum Plantarum* 1: 154. 1891 and *Journal of Cytology and Genetics* 25: 36–42. 1990

(Recorded that the juice of the leaves of *Rhus wallichii* is corrosive.)

Common names: akoria, arkol, kambul, red lac sumach

Toxicoscordion Rydb. Melanthiaceae (Liliaceae)

Greek *skorodon*, *skordon* ‘garlic’, see *Bulletin of the Torrey Botanical Club* 30(5): 272–273. 1903.

Toxicoscordion brevibracteatum (M.E. Jones) R.R. Gates (*Anticlea fremontii* Torr.; *Toxicoscordion brevibracteatum* R.R. Gates; *Toxicoscordion brevibracteatus* (M.E. Jones) R.R. Hall; *Zygadenus fremontii* Torr.; *Zigadenus fremontii* (Torrey) Torrey ex S. Watson; *Zigadenus fremontii* (Torrey) Torrey ex S. Watson var. *brevibracteatus* M.E. Jones) (*Zigadenus* Michaux, from the Greek *zygon* ‘a yoke’ and *aden* ‘a gland’, referring to the floral glands.)

S. California to Mexico, Baja California, Sonora.

See *Fl. Bor.-Amer.* 1: 213, plate 22. 1803 and *Bull. Torrey Bot. Club* 1903, 273. 1903, *Contr. W. Bot.* 12: 78. 1908, *Univ. Calif. Publ. Bot.* 6: 165. 1915, *J. Linn. Soc., Bot.* 44: 158. 1918

(All parts containing toxic alkaloids. The common name “death camas” is derived from the illness or death resulting from ingesting bulbs of *Zigadenus* that were mistaken for the edible ones of *Camassia*, an unrelated plant. Many alkaloids found in *Veratrum* have been isolated from most species of *Zigadenus*, including zygadenine and zygacine. All fresh parts of the plant (leaves, bulbs, flowers) are toxic. Dried parts (especially seeds and capsules) are even more potent, presumably because the alkaloids are more concentrated. Ingestion of *Zigadenus* by humans may result in severe illness and occasionally death even for adults. Livestock (sheep and cattle) poisoning is a serious problem in some rangeland areas of the western United States. Analgesic, antirheumatic, and emetic, a snakebite remedy.)

in North America: desert death camas

Toxicoscordion exaltatum (Eastwood) A. Heller (*Zigadenus exaltatus* Eastwood)

California.

See *Bot. Gaz.* 41: 283. 1906, *Muhlenbergia* 6: 83. 1910

(Toxic.)

in English: giant death camas

Toxicoscordion fremontii (Torr.) Rydb. (*Anticlea fremontii* Torr.; *Anticlea fremontii* Torrey; *Toxicoscordion fremontii* Rydb.; *Toxicoscordion fremontii* var. *minor* R.R. Gates; *Zigadenus douglasii* Torr.; *Zygadenus fremontii* Torr.; *Zigadenus fremontii* (Torrey) Torrey ex S. (Approximately 250 sheep were poisoned and died from ingesting death camas (*Zygadenus paniculatus*) within a 2-day period on a foothill range in southeastern Idaho. Ataxia, muscular weakness, trembling, incoordination, discharge of frothy saliva from the mouth and nose, vomiting, dyspnea, collapse and death were the most common clinical signs. Gross changes included severe pulmonary congestion and subcutaneous hemorrhage. Microscopic lesions were those of severe pulmonary congestion. Analgesic, emetic, poultice of bulb or roots used for neuralgia, rheumatism, sprains, swellings, toothache.)

in English: death camas, foothill death camas, sand-corn

Toxicoscordion venenosum (S. Watson) Rydberg (*Toxicoscordion arenicola* A. Heller; *Toxicoscordion salinum* (A. Nelson) R.R. Gates; *Zigadenus diegoensis* Davidson; *Zigadenus salinus* A. Nelson; *Zigadenus venenosus* S. Watson; *Zigadenus venenosus* var. *ambiguus* M.E. Jones)

North America, Baja California.

See *Flora Boreali-Americana* 1: 213–214, pl. 22. 1803, *Proceedings of the American Academy of Arts and Sciences* 14: 279. 1879 and *Bulletin of the Torrey Botanical Club* 30(6): 272. 1903, *Muhlenbergia* 2: 182. 1906, *Contr. W. Bot.* 12: 77. 1908, *Bot. Gaz.* 54: 406. 1912, *J. Linn. Soc., Bot.* 44: 156. 1918, *Bull. S. Calif. Acad. Sci.* 23: 105. 1924, Cameron, K. “Death camas poisoning.” *Northwest Med.*, 1952: 682–683. 1952, Spoerke, D.G., Spoerke, S.E. “Three cases of *Zigadenus* (death camas) poisoning.” *Vet. Hum. Toxicol.*, 21: 346–347. 1979, Long, R. “Some liliaceae of British Columbia.” *Davidsonia* 12: 85–88. 1981, Panter, K.E., James, L.F. “Death camas-early grazing can be hazardous.” *Rangelands* 11: 147–149. 1989, *Novon* 19: 295–296. 2009

(The plant is one of the most toxic springtime plants, especially to sheep. Humans have also been poisoned after ingesting the bulbs, which were mistaken for other plants such as onions (*Allium* spp.) or camas (*Camassia quamash*). These plants should be considered poisonous to all livestock and humans. Steroidal alkaloids, including zygacine, have been found in these plants. Death camas is considered to be the most toxic members of the genus *Zigadenus*. Analgesic, emetic, poultice of bulb or roots used for neuralgia, rheumatism, sprains, swellings, toothache.)

in English: death camas, meadow death camas

Toxicarpus Wight & Arnott Asclepiadaceae (Apocynaceae)

From the Greek *toxos* ‘bow’ and *karpos* ‘fruit’, referring to the follicles, see *Contributions to the Botany of India* 61. 1834, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 362. 1843 and *Sunyatsenia* 4: 66, 76. 1939.

Toxicarpus griffithii Decne.

Burma, Malaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 505. 1844 and *Pertanika J. Tropical Agric. Science* 22(2): 85–94. 1999

(Fruits eaten raw for general well-being.)

in Indonesia: melati hutan

Toxicarpus villosus (Blume) Decne. (*Secamone villosa* Blume; *Toxicarpus villosus* Decne.)

Laos, SE Asia, Indonesia. Liana, woody vine, white latex, yellowish-green flowers

See *Bijdragen tot de flora van Nederlandsch Indië* 16: 1050. 1826 [Oct 1826–Nov 1827], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 506. 1844

(Rhizome tonic, stomachic, for gastritis.)

in China: mao gong guo teng

in Laos: kheua pa song, sout kheua

Toxicarpus wightianus Hooker & Arnott (*Schistocodon meyenii* Schauer; *Secamone wightiana* K. Schum.; *Secamone wightiana* (Hooker & Arnott) K. Schumann; *Toxicarpus ovalifolius* Tsiang)

China, Himalaya.

See *The Botany of Captain Beechey's Voyage* 200. 1837, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 363. 1843, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(2): 263. 1895 and *Sunyatsenia* 2: 193. 1934, *Economic Botany* 61(1): 14–30. 2007

(Antioxidant, all parts are used externally for the treatment of traumatic injury and boils.)

in English: oval-leaf toxicarpus, Wight toxicarpus

in China: gong guo teng

in Vietnam: dâ y qua cong, tien qua lá xoan, tien qua wight

Trachelospermum Lemaire Apocynaceae

Greek *trachelos* ‘a neck’ and *sperma* ‘a seed’, see *Jardin Fleuriste* 1, pl. 61. 1851 and *Taxon* 49(2): 267. 2000.

Trachelospermum axillare Hooker f. (*Maesa scandens* H. Léveillé; *Melodinus chaffanjonii* H. Lév.; *Periploca astacus* H. Lév.)

China, India, Sikkim.

See *Species Plantarum* 1: 211–212. 1753, *Flora Aegyptiaco-Arabica* 66. 1775, *Characteres Generum Plantarum* 37, pl. 19. 1776, *The Flora of British India* [J.D. Hooker] 3(9): 668. 1882 and *Repertorium Specierum Novarum Regni Vegetabilis* 2(21): 114. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 10(257–259): 375. 1912, *Flore du Kouy-Tchéou* 43. 1914

(Whole plant used for the treatment of injury, pulmonary tuberculosis, bronchitis, and rheumatism.)

in English: purple-flower star jasmine

in China: ya zhou luo shi, zi hua luo shi

Trachelospermum dunnii (H. Léveillé) H. Léveillé (*Melodinus dunnii* H. Léveillé; *Trachelospermum dunnii* H. Lév.; *Trachelospermum eglandulatum* D. Fang; *Trachelospermum rubrinerve* H. Léveillé; *Trachelospermum tenax* Tsiang)

China.

See *Characteres Generum Plantarum* 37, pl. 19. 1776 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 453. 1911, *Flore du Kouy-Tchéou* 31–32. 1914–1915, *Sunyatsenia* 3(2–3): 146–148, pl. 16. 1936, *Acta Phytotaxonomica Sinica* 18(2): 228–229, pl. 2. 1980

(The young leaves used as medicine for injury.)

in English: Dunn star jasmine, firmbark star jasmine

in China: xiu mao luo shi

Trachelospermum fragrans Hook. f.

India, Himalaya.

See *The Flora of British India* 3(9): 667. 1882

(Bark tonic, astringent, useful in malaria, diarrhea, dysentery; milky juice applied to ulcers.)

in Lepcha: yaok chyaon rik

Trachelospermum jasminoides (Lindley) Lemaire (*Rhynchospermum jasminoides* Lindley; *Trachelospermum adnascens* Hance; *Trachelospermum jasminoides* var. *heterophyllum* Tsiang; *Trachelospermum jasminoides* var. *variegatum* W.T. Miller)

Vietnam, China. Shrub, evergreen woody vine, climbing, twining, prostrate, bark smooth, terete, reddish-brown to dark brown, many branched, aerial roots, white milky latex, stiff shiny leaves opposite, white flowers very fragrant sweet smelling, inflorescence a sparse long-pedunculate cyme, corolla a short tube, 5 oblong lobes twisted to the left, calyx 5-parted, 2 long slender follicles, flowers yield perfumed oil

See *Species Plantarum* 1: 208. 1753, *Sylloge Plantarum Novarum* 2: 7. 1825, *Journal of the Horticultural Society of London* 1: 74. 1846, *Jardin Fleuriste* 1: pl. 61. 1851 and *Sunyatsenia* 2(2): 146–147, f. 15. 1934, *Genetica* 68: 3–35. 1985, *Sida* 17(19): 197–213. 1996

(The whole plant is poisonous, low toxicity. Stem used for the treatment of rheumatism and injury. Stem with leaves used for rheumatic pains, muscular spasm, pain in limbs and knees, pharyngitis, skin inflammation and injuries.)

in English: Chinese ivy, Chinese star jasmine, Confederate jasmine, diversifolious star jasmine, star jasmine

in China: lo shih, luo shi, luo shi teng, nai tung (= enduring the winter), wan lan

Trachycarpus H.A. Wendl. Arecaceae (Palmae)

Greek *trachys* with *karpos* ‘fruit’, referring to the rough surface of the fruits, see *Species Plantarum* 2: 1187. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 473. 1789, *Bulletin de la Société Botanique de France* 8: 429. 1863.

Trachycarpus fortunei (Hooker) H. Wendl. (*Chamaerops excelsa* Thunb.; *Chaemaerops fortunei* Hooker; *Rhapis*

excelsa (Thunb.) A. Henry; *Trachycarpus caespitosus* Becc.; *Trachycarpus excelsus* H. Wendl.; *Trachycarpus excelsus* (Thunb.) H. Wendl.; *Trachycarpus wagnerianus* Becc.)

Myanmar to China.

See *Flora Japonica*, ... 130. 1784, *Bot. Mag.* 86: t. 5221. 1860, *Bull. Soc. Bot. France* 8: 429. 1861 and *Bull. Soc. Tosc.ortic.*, III, 20: 164. 1915, *Webbia* 5: 70. 1921, *Journal of the Arnold Arboretum* 11(3): 153. 1930, *Subtrop. Forest Sci. Technol.* 4: 50–56. 1986, *Economic Botany* 41(3): 411–417. 1987, *Chin. Traditional Herbal Drugs* 20(6): 34–35. 1989, *Acta Bot. Austro Sin.* 5: 161–176. 1989, *Bot. Acta* 106: 170–182. 1993

(Palm fiber and petiole hemostatic. From the seeds the hemostatic drug *hsuen an*, used to stop bleeding of the uterus. Magic, mystical power.)

in English: Chinese windmill palm, Chusan palm, dwarf ground rattan, fan palm, hemp palm, windmill palm

in Brazil: palmeira moinho de vento, palmeira moinho de vento da China

in China: ping lu, tsung lu, zi buo zai, zong lu zi

in Japan: shuro, tojuro

in Okinawa: chigu, suru

Trachydium Lindley Apiaceae (Umbelliferae)

Greek *trachys* ‘rough’, see *Illustrations of the Botany ... of the Himalayan Mountains* ... 1: 232. 1835.

Trachydium roylei Lindley (*Aulacospermum roylei* (Lindl.) Kachroo, U. Dhar & Naqshi)

Himalaya, China.

See *Flora Altaica* 4: 334. 1833, *Ill. Bot. Himal. Mts.* 1: 232. 1835 and *J. Bot.* 76: 229–233. 1938

(Stomachic, stimulant, carminative.)

in China: liu guo qin shu, liu guo qin

Trachyphrynium Benth. Marantaceae

From the Greek *trachys* ‘rough’ and *Phrynium*, see *Genera Plantarum* 3: 651. 1883.

Trachyphrynium braunianum Baker (*Hybophrynium braunianum* K. Schum.)

Tropical Africa. Lianescent herb, shrubby, straggling, terminal scented white flowers with yellow centre, spiny to deeply 3-lobed orange fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 428. 1892, *Flora of Tropical Africa* 7: 319. 1898

(Seeds for boils, wounds. Young shoots chewed as aphrodisiac.)

in Central African Republic: mbonge

in Congo: meiatete, moiatete

in Gabon: kàtititèré, nkomi

in Ghana: babadua, mmbabadua

Trachypogon Nees Poaceae (Gramineae)

From the Greek *trachys* 'rough' and *pogon* 'a beard', the female-fertile spikelet has plumose awns, see *Trachypogon montufarii* (Kunth) Nees, see *Species Plantarum* 2: 1045. 1753, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 341–343. 1829, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 257. 1832 and *Mémoires de la Société Botanique de France* 8(b): 103. 1908, *Cytologia* 19: 97–103. 1954, J. Blydenstein, "La sabana de *Trachypogon* del Alto Llano." *Boletín de la Sociedad Venezolana de Ciencias Naturales* 102: 139–139. 1962, *Flora of Tropical East Africa* 451–898. 1982, J.J. San José and M.R. Fariñas, "Changes in tree density and species composition in a protected *Trachypogon* savanna, Venezuela." *Ecology* 64: 447. 1983, J.J. San José and M. R. Fariñas, "Temporal changes in the structure of a *Trachypogon* savanna protected for 25 years." *Acta Ecológica* 12: 237. 1991, *Flora Mesoamericana* 6: 380–381. 1994, *Restoration Ecology* 5(2): 147–155. Jun 1997, *Global Ecology and Biogeography* 7(6): 441–455. Nov 1998, *Journal of Biogeography* 26(6): 1307–1321. Nov 1999, *African Journal of Ecology* 38(3): 188–201. Ethiopia, Egypt. Herb, erect, roots fusiform, leaves pinnate, linear bracts, fruit ovoid compressed

See *Mantissa Plantarum* 56. 1767, *Encyclopédie Méthodique, Botanique* 1: 635. 1785, *Amenidades Naturales de las Españas* 1(2): 101. 1821, *Allgemeine Naturgeschichte* 3(3): 1831. 1841, *Flora of Tropical Africa* 3: 12. 1877, *The Flora of British India* 2: 683. 1879 and *Flora of Bermuda* 279. 1918, *Bull. Misc. Inform. Kew.* 1929: 228. 1929, *Fl. Trop. E. Africa, Umbelliferae* 45. 1989

(Used in Ayurveda, Unani and Sidha. Essential oil strongly antiseptic, pungent, antibacterial, fungitoxic, mosquito larvicidal, molluscicidal, anthelmintic. Fruit antispasmodic, vermifuge and abortifacient, aromatic, stomachic, stimulant, carminative, tonic, used in diarrhea, gastric ulcer, indigestion, stomachache, gas in the abdomen, intestinal and liver problems, sore throat, cough, rheumatism and asthma; fruits pasted in water and taken against intestinal worms; fruits of cumin (*Cuminum cyminum*) and carum powdered and smoked in a cigarette to treat scorpion bite. Seed with curd given for indigestion; powdered seeds given to treat irregular or scanty menstruation, abortifacient if taken in high dose; fried seeds with lemon juice given for amenorrhea. Root diuretic and carminative. Stem bark of *Salvadora persica* crushed with

Trachyspermum ammi taken to cure peptic ulcers. Veterinary medicine, leaf paste of *Nicotiana tabacum* along with paste of *Trachyspermum ammi* applied on sprain; powdered bark of *Mallotus philippensis*, cumin seeds, asafoetida and seeds of *Trachyspermum ammi* pounded and given orally to cure hypocalcemia and Downer Cow Syndrome.)

in English: ajowan oil, bishop's weed

in Burma: samok, samwat

in China: xi ye cao guo qin

in India: ajamoda, ajamodika, ajamola, ajamoola, ajjwain, ajmo, ajmodika, ajowan, ajowan, ajuan, ajvaana, ajvain, ajwain, brahmadarbha, carom, carum, deepyaka, dipyaka, ivano, jowan, joyain, jwano, kaatu ommam, kamun muluki, kamun-ul-muluk, nankhah, oma, omaan, omam, omu, omum, onva, sat ajwain, ugragandha, vamu, wal ajwain, yavaanika, yamani, yamanika, yavani, yavanika, yavsaha

in Indonesia: mose, mungsi, musi

in Malaysia: hajimuju, jemuju, mungsi

in Nepal: agnimantha ajowan, jwano, jwanu

in Pakistan: izboothak

in Philippines: damoro, lamudio

in Thailand: phakchee

in Tibet: la la bud, la la phud

Trachyspermum roxburghianum (DC.) H. Wolff (*Apium involucratum* Roxburgh; *Carum roxburghianum* (DC.) Kurz; *Carum roxburghianum* Benth. ex Kurz; *Carum stictocarpum* C.B. Clarke; *Pimpinella involucrata* (Roxb.) Wight & Arn.; *Ptychotis involucrata* (Roxb.) Lindl.; *Ptychotis roxburghiana* DC.; *Trachyspermum involucratum* (Roxb.) H. Wolff; *Trachyspermum roxburghianum* (DC.) Craib; *Trachyspermum stictocarpum* (C.B. Clarke) H. Wolff)

India. Annual, erect, branched, white flowers, ovoid fruits with a knob-like broadly ovoid stylopodium structure at apex

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 109. 1830 and *Das Pflanzenreich* IV 228(Heft 90): 129. 1927

(Used in Ayurveda, Unani and Sidha. Fruits bitter, strongly aromatic, antibiotic, antispasmodic, diuretic, anthelmintic, stimulant, digestive, carminative, used in diarrhea, flatulence, indigestion, stomachache, dyspepsia, intestinal and liver problems, pharyngitis, cough, bronchitis, asthma; producing slight irritation to tongue.)

in China: dian nan cao guo qin

in India: acamata, acamatakam, acamatakovomam, acamata, acamotakam, acamotam, acamtakam, acamtaomam, acatti, acuvam, acuvan, ajamoda, ajamodhavoma, ajmod, ajmodavama, ajmot, ajmud, ajmuda, ajowan, ajumoda, ajumodavomam, ajumodavomaru, asamtavomam, ashamtagam, ashamtagam, ashamtavomam, ashmata-omam,

Tradescantia Ruppius ex L. Commelinaceae

For the British (b. Meopham, Kent) naturalist and botanist John Tradescant, 1608–1662 (d. South Lambeth, Surrey), traveller, plant collector in Virginia, from 1638 gardener to Queen Henrietta Maria (Keeper of His Majesty's Gardens at Oatlands), author of *Musaeum Tradescantianum*. London 1656, and for his father John Tradescant, circa 1570/1575–1638 (d. South Lambeth, Surrey), traveller and botanical collector, friend of John Parkinson (1567–1650), gardener to Robert Cecil (Earl of Salisbury) and to Sir Wotton, 1618 went to Russia (the first western European botanist), 1630 Keeper of His Majesty's Gardens at Oatlands. See Carl Linnaeus, *Species Plantarum*. 1: 288. 1753, *Species Plantarum* 2: 1028. 1753, *Genera Plantarum*. Ed. 5. 139. 1754, Richard Pulteney, *Historical and biographical sketches of the progress of botany in England*. 1: 175–179. [genus dedicated to John Tradescant, c. 1570–1638] 1994.

Tradescantia occidentalis (Britton) Smyth (*Tradescantia virginiana* L. var. *occidentalis* Britton)

North America. Perennial herb, food

See *Species Plantarum* 1: 288. 1753, *An Illustrated Flora of the Northern United States* 1: 377. 1896, *Transactions of the Kansas Academy of Science* 16: 163. 1899 and *Taxon* 30: 699–701. 1981, *Sida* 17(1): 259–263. 1996

(Diuretic. Veterinary medicine, aphrodisiac.)

in English: prairie spiderwort

Tradescantia occidentalis (Britton) Smyth var. ***occidentalis*** (*Tradescantia occidentalis* (Britton) Smyth var. *typica* E.S. Anderson & Woodson)

North America. Perennial herb, food

See *Species Plantarum* 1: 288. 1753, *An Illustrated Flora of the Northern United States* 1: 377. 1896, *Transactions of the Kansas Academy of Science* 16: 163. 1899 and *Contributions from the Arnold Arboretum of Harvard University* 9: 101. 1935, *Taxon* 30: 699–701. 1981, *Sida* 17(1): 259–263. 1996

(Disinfectant, aphrodisiac.)

in English: prairie spiderwort

Tradescantia pallida (Rose) D.R. Hunt (*Setcreasea jamaicensis* Matuda; *Setcreasea lanceolata* Faruqi, Mehra & Celarier; *Setcreasea pallida* Rose; *Setcreasea purpurea* Boom)

Mexico. Trailing reclining herb, thick succulent stems, smooth purple stalkless leaves, small pinkish flowers embraced by two purple bracts

See *Contr. U.S. Natl. Herb.* 13: 294. 1911, *Acta Bot. Neerl.* 4: 167. 1955, *Rhodora* 64: 330. 1962, *Kew Bulletin* 30(3): 452–453. 1975

(Both stems and leaves contain an irritant watery juice; contact with the juice results in itching, fine red rashes and blisters. Juice used as a rubefacient; ladies rub it on their cheeks to redden them.)

in English: purple queen

Malay name: setkrisia ungu

Tradescantia pinetorum Greene (*Aneilema pinetorum* (Greene) Matuda; *Cyanotis tuberosa* (Roxb.) Schult. & Schult. f.; *Tonningia tuberosa* (Roxb.) Kuntze; *Tonningia tuberosa* Kuntze; *Tradescantia tuberosa* Roxb.)

North America. Perennial herb

See *Systema Vegetabilium*, editio decima sexta 7: 1153. 1830, *Revisio Generum Plantarum* 2: 722. 1891, *Erythea* 1(12): 247. 1893 and *Anales del instituto de Biología de la Universidad Nacional de México* 26: 310. 1956

(Veterinary medicine, aphrodisiac.)

in English: pinewoods spiderwort

Tradescantia spathacea Swartz (*Ephemerum bicolor* Moench; *Ephemerum discolor* Moench; *Rhoeo discolor* (L'Hér.) Hance ex Walp.; *Rhoeo discolor* (L'Héritier) Hance; *Rhoeo spathacea* (Swartz) Stearn; *Rhoeo spathacea* f. *concolor* (Baker) Stehlé; *Rhoeo spathacea* f. *variegata* (Hook.) Stehlé; *Tradescantia discolor* L'Héritier; *Tradescantia discolor* var. *concolor* Baker; *Tradescantia discolor* var. *variegata* Hook.; *Tradescantia versicolor* Salisb.) (*Rhoeo* Hance, derivation of the name unknown, perhaps from the Latin *rhoëas*, *adis* or *rhoëa*, *ae* used by Plinius for the wild-poppy, Greek *rhoias* applied by Theophrastus (*HP.* 9.12.4) and

Dioscorides to the corn poppy, a species of *Papaver*, or from Greek *rhoë*, *rhoëa* 'river, stream, flowing of sap'.)

Mexico, Guatemala. Herb, see also *Rhoeo*

See *Prodr. descriptionum Vegetabilium ... Ind. Occ.*: (Swartz) 57. 1788, L'Héritier de Brutelle, Charles Louis (1746–1800), *Sertum Anglicum* 8, pl. 12. Parisii: Typis P.-F. Didot, 1788–1792 [Redouté, Pierre Joseph (1759–1840), Sowerby, James (1757–1822)], *Prodr. Stirp. Chap. Allerton*: 216. 1796, *Suppl. Meth.*: 78. 1802, *Annales Botanices Systematicae* 3: 660. 1852, *Bot. Mag.* 84: t. 5079. 1858 and *Fieldiana, Bot.* 24(3): 1–42. 1952, *Baileya* 5: 198. 1957, *Bull. Soc. Bot. France* 117: 77. 1970, *Chromosoma* 71: 109–127. 1979, *Fl. Mesoamer.* 6: 157–173. 1994

(Plant sap poisonous, stinging and itching; severe pain in the mouth if ingested. The flower used for the treatment of dysentery, hemoptysis; leaves or flowers infusion drunk for cough, whooping cough.)

in English: boat lily, cradle lily, man in a boat, men in a boat, Moses in his cradle, Moses in the bulrushes, Moses on a raft, oyster plant, purple leaved spiderwort, three men in a boat

in China: bang lan ye, zi bei wan nian qing

in Japan: fuiri-murasaki-omoto

in Philippines: bangka-bangkaan

Tradescantia virginiana L. (*Ephemerum congestum* Moench; *Tradescantia brevicaulis* Raf.; *Tradescantia congesta* (Moench) Penny ex Loudon; *Tradescantia congesta* (Moench) D. Don; *Tradescantia congesta* Penny ex W.H. Baxter; *Tradescantia congesta* M. Martens & Galeotti; *Tradescantia rupestris* Raf.; *Tradescantia speciosa* Buckley, nom. illeg.; *Tradescantia speciosa* L.f.; *Tradescantia speciosa* Salisb.; *Tradescantia speciosa* Kunth; *Tradescantia virginiana* L. var. *alba* Hook. ex Raf.; *Tradescantia virginiana* L. var. *barbata* Raf.)

North America. Perennial herb

See *Species Plantarum* 1: 288. 1753, *Supplementum Plantarum* 192. 1782 [1781 publ. Apr 1782], *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* [Moench] 238. 1794, *Prodr. Stirp. Chap. Allerton* 216. 1796, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 1: 263. 1815[1816], *Atlantic Journal* 1(4): 150. 1832, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 377. 1842, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1862: 9. 1863 and *Taxon* 29: 726–727. 1980, *J. Cytol. Genet.* 21: 115–132. 1986

(Analgesic, stomachic, laxative, antihemorrhagic, for stomachache, kidney troubles, insect bites.)

in English: Virginia spiderwort

Tradescantia zebrina Bosse (*Cyanotis zebrina* (Bosse) Nees; *Zebrina pendula* Schnizlein)

Colombia, Mexico.

See *Vollst. Handb. Blumengart.* 4: 655. 1849

(Leaves applied to reduce swellings.)

in English: inch plant, wandering jew

in China: diao zhu mei

in Japan: Hakata-kara-kusa

Tragia L. Euphorbiaceae

Named after the German botanist Hieronymus (Jerome) Bock (*latine* Tragus), 1498–1554, physician and teacher, herbalist, with Brunfels and Fuchs one of the German fathers of botany; see Carl Linnaeus, *Species Plantarum*. 2: 980–981. 1753, *Genera Plantarum*. Ed. 5. 421. 1754, *Flora Telluriana* 4: 111. 1838 and Garrison and Morton, *Medical Bibliography*. 1806 and 1803. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 206. 1965, *Adansonia: recueil périodique d'observations botanique*, n.s. 11(3): 439. 1971, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 42. 1972, Stafleu and Cowan, *Taxonomic Literature*. 1: 243–245. 1976, Jerry Stannard, in *D.S.B.* 2: 218–220. 1981, *Journal of Ethnopharmacology* 16: 1–13. 1986, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 44. 1988, *Novon* 4(4): 331. 1994, *Economic Botany* 49(3): 297–308. 1995, *Journal of Ethnopharmacology* 46: 31–47. 1995. Some suggested the genus was named from the Greek *tragos* 'a billy-goat, he-goat', referring to hairs on the margins of the leaves.

Tragia benthamii Baker (*Tragia cordifolia* Benth., nom. illeg.; *Tragia cordifolia* J. Vahl; *Tragia kassiliensis* Beille; *Tragia keniensis* Rendle; *Tragia mitis* Hochst. ex A. Rich. var. *kirkii* Müll.Arg.)

Tropical Africa. Herb, climbing, trailing, twining, stinging hairs, white-yellow perianth

See *Symbolae Botanicae ...* 1: 76. 1790, *Niger Fl.*: 501. 1849, *Tentamen Florae Abyssinicae ...* 2: 244. 1850, *Flora* 47: 435. 1864 and *Bulletin de la Société Botanique de France* 57(8): 126. 1910, *Bull. Misc. Inform. Kew* 1910: 128. 1910

(Leaves and stem cause itching. Root decoction purgative; roots and leaves decoction drunk to promote conception; roots extract taken as abortifacient and to ease child delivery. Leaf extract drunk for gonorrhoea, stomachache, diarrhoea, dysentery, to kill internal parasites, tapeworm. Fruits antimicrobial)

in Tanzania: nsusa, washawasha

in Yoruba: esisi funfun

Tragia brevipes Pax (*Tragia velutina* Pax; *Tragia volkensii* Pax)

Zambia. Zimbabwe. Shrub, climbing vine, straggling, scandent, twining, irritating stinging hairs, fruit with stinging hairs, confused with *Tragia benthamii*

See *Bot. Jahrb. Syst.* 19: 103–104. 1894, *Pflanzenw. Ost-Afrikas*, C: 240. 1895 and *Journal of Ethnopharmacology* 16: 1–13. 1986

(Itching plant, leaf with irritating pubescence. Root decoction purgative, vermifuge; roots and leaves decoction drunk to promote conception. Leaf extract drunk for gonorrhoea, stomachache, diarrhoea, dysentery, to kill internal parasites, tapeworm. Fruits antimicrobial.)

in English: climbing nettle

in Burundi: isusa

in Tanzania: chavi, weni

Tragia furialis Bojer (*Tragia angustifolia* Benth.; *Tragia angustifolia* var. *furialis* (Bojer) Müll.Arg.; *Tragia angustifolia* var. *furialis* Müll.Arg.; *Tragia furialis* Bojer ex Prain; *Tragia furialis* var. *eufurialis* Pax & K. Hoffm., nom. inval.; *Tragia furialis* var. *scheffleri* (Baker) Pax & K. Hoffm.; *Tragia scheffleri* Baker)

Tanzania, Kenya. Woody herb, vine, twining, creeping, climbing, urticating pubescence

See *Hortus Mauritianus* 286. 1837, *Prodr.* 15(2): 939. 1866 and *Bull. Misc. Inform. Kew* 1908: 440. 1908, *Flora of Tropical Africa* 6(1): 996. 1913

(Irritating urticating stinging. Ash of burnt plants rubbed into the skin to cure headache. Plant decoction drunk or root powder applied to snakebites. A leaf infusion used as a wash to relieve skin irritation caused by the hairs of plants.)

in Madagascar: agilahy

in Tanzania: imbavi, imbawi

Tragia hildebrandtii Müll.Arg. (*Tragia cannabina* var. *hildebrandtii* (Müll.Arg.) Pax & K. Hoffm.; *Tragia gallabatensis* Prain; *Tragia hildebrandtii* subsp. *glaucescens* Pax; *Tragia mombassana* Vatke ex Prain)

Ethiopia. Shrub, shiny white pubescence

See Buchenau, Franz Georg Philipp (1831–1906), *Abh. Naturw. Ver. Bremen* 7(1): 26. Bremen, 1880 [*Reliquiae Rutenbergianae.*], *Bot. Jahrb. Syst.* 19: 103. 1894 and *Bull. Misc. Inform. Kew* 1909: 51. 1909, *Fl. Trop. Afr.* 6(1): 978. 1913

(Leaves to treat uterine complaints.)

Tragia hispida Willd. (*Tragia involucrata* L.; *Tragia involucrata* var. *angustifolia* Hook.f.; *Tragia involucrata* var. *hispida* (Willd.) Müll.Arg.)

India, Bangladesh. Twining herb, hispid stinging hairs

See *Systema Plantarum* 4: 323. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 943. 1866, *Fl. Brit. India* 5: 465. 1888 and *Cat. Pl. Madag., Euphorb.* 2(23): 1–51. 1935

(Irritant, contact with the skin produces severe irritation.)

in India: sengel sing

Tragia insuavis Prain

Kenya, Tanzania. A slender, twining or trailing perennial herb, woody rootstock, very small and inconspicuous yellow-green flowers, lobed capsule breaking into rounded sections, tender leaves cooked and eaten, plant used for fodder

See *Bull. Misc. Inform. Kew* 1912: 237. 1912

(Stinging hairs on stems and leaves cause itching.)

in Tanzania: mbawa, nyaluvafya

Tragia involucrata L. (*Croton urens* L.; *Tragia cordata* Michx.; *Tragia cordata* B. Heyne ex Wall., nom. inval.; *Tragia cordata* A. Rich.; *Tragia cordata* Burttt Davy; *Tragia cordata* Willd.; *Tragia involucrata* var. *genuina* Müll.Arg., nom. inval.; *Tragia involucrata* var. *rheediana* Müll.Arg.; *Tragia trifida* Wall., nom. inval.)

India, Bangladesh, Sri Lanka. Slender twining herbs with stinging hairs, small greenish flowers in terminal and leaf-opposed axillary racemes

See *Species Plantarum* 2: 980, 1005. 1753, *Fl. Bor.-Amer.* (Michaux) 2: 176. 1803, *Systema Plantarum* ed. 4 [Willdenow] 4(1): 322. 1805, *Numer. List* [Wallich] n. 7791 A, 7795. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 943. 1866, *Fl. Brit. India* 5: 465. 1888 and *Ann. Transvaal Mus.* iii. 122. 1912, *Cat. Pl. Madag., Euphorb.* 2(23): 1–51. 1935, *Ethnobotany* 11: 18–21. 1999

(Used in Ayurveda and Sidha. Whole plant causes irritation. Stinging hairs cause burning or itching sensation; highly poisonous to cattle. Whole plant hypoglycemic, alterative, febrifuge, diaphoretic. Fruit paste applied on forehead to relieve headache; alopecia juice of *Citrus aurantifolia* and *Hibiscus rosa-sinensis* applied after rubbing the head with the fruit of *Tragia involucrata*. Roots in asthma, blood purification, fevers, diarrhea, vomiting, skin diseases; root infusion given in dysentery and diarrhea; fresh roots juice for treatment of epilepsy and snakebite; root powder for pain in the legs and arms. A mixture of leaves and root paste given orally for blood dysentery and stomachache; leaves and stem ground with *Allium cepa* and made into a paste applied to skin diseases.)

in English: Indian stinging-nettle

in India: ambu, antusurasurige, barhanta, bicchuti, bichati, bichhuati, bichuti, cherukodithuva, china-dulogondi, chinnadulagondi, chorinnanam, choriyanam, cinugantatiga, corinnanam, corinnanam, coriyanam, doolagondi, doostparisha, dumuni chorat, dulagondi, dulagundi, durabhigra, duradagantatiga, duralabha, duralambha, duralba, dusparcha, dusparsa (du, bad, sparsa, touch), dustparisha, grahini, kaanchakuree, kacchura, kachchura, kasaghini, kasaghni, kasaginnie, katiccakacceti, katiccakam, katiccavayttaticcan, katiccavayttutaiccan, katiccavaytutaiccan, kayavacam,

(Extract of the roots drunk to prevent pregnancy.)

Tragia senegalensis Müll.Arg.

Tropical Africa. Vine, creeper

See *Linnaea* 34: 182. 1865

(Root sap and root powder taken to treat hysteria, madness.)

in Central African Republic: àzòwàì

Tragia spathulata Benth.

Tropical Africa, Ghana. Climber, slender, pubescent, twiner, armed with stinging hairs

See *Niger Fl.* [W.J. Hooker]. 502. 1849

(Irritant. Powdered plants applied on chronic wounds; decoction drunk for impotence. Leaf sap applied to cure headache.)

Tragia tenuifolia Benth. (*Tragia calvescens* Pax; *Tragia klingii* Pax; *Tragia manniana* Müll.Arg.; *Tragia zenkeri* Pax)

Tropical Africa, Ghana. Climber, slender, pubescent, twiner, armed with stinging hairs

See *Niger Flora* [W.J. Hooker]. 502. 1849, *Flora* 47: 436. 1864, *Bot. Jahrb. Syst.* 19: 105. 1894, *Bot. Jahrb. Syst.* 23: 528. 1897 and *Bot. Jahrb. Syst.* 43: 324. 1909

(Leaves infusion drunk as a remedy for frequent stools in children and against threatening abortion; leaves poultice rubbed on the abdomen of a pregnant woman to induce fetal movement.)

in Sierra Leone: morlinyényé

Tragia vogelii Keay (*Tragia angustifolia* Benth., nom. illeg.; *Tragia angustifolia* Nutt.; *Tragia angustifolia* var. *genuina* Müll.Arg., nom. inval.)

Ivory Coast. Greenish flowers, armed with stinging hairs

See *Trans. Amer. Philos. Soc.* ser. 2, 5: 172. 1835, *Niger Flora* [W.J. Hooker]. 502. 1849 and *Kew Bull.* 10: 139. 1955

(Irritant. A remedy for wounds, sores.)

Tragia volubilis L. (*Croton scandens* Sieber ex C. Presl; *Croton scandens* Vell.; *Tragia amoena* Müll.Arg.; *Tragia diffusa* Vell.; *Tragia gayana* Baill.; *Tragia guatemalensis* Lott; *Tragia haguensis* Goudot ex Baill.; *Tragia ibaguensis* Goudot ex Müll.Arg., nom. illeg.; *Tragia infesta* Mart. ex D. Dietrich) 5: 256. 1852, *Étude Euphorb.* 461. 1858, *Étude générale du groupe des Euphorbiacées* 460–461. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 936. 1866, *Flora Brasiliensis* (Martius) 11(2): 414–415. 1874, *Anales de Sociedad Científica Argentina* 11: 51. 1881, *Botanical Gazette* 20(8): 354. 1895 and *Bulletin de l'Herbier Boissier*, sér. 2, 5: 608. 1905, *Das Pflanzenreich* 147,9(Heft 68): 49–50. 1919, *Fl. Jamaica* 4: 305. 1920

(Stinging irritant hairs. Plant analgesic, diuretic, used for muscular pains, spasms. Fresh juice for the treatment of ulcers.)

in English: stinging nettle

in Mexico: ortiguilla

in Nicaragua: indita, pan caliente, pica pica, pringa moxa, pringamoza

Tragia wildemanii Beille (*Tragia akwapimensis* Prain)

Guinea.

See *Bull. Soc. Bot. France* 55(8): 82. 1908, *Bulletin of Miscellaneous Information Kew* 1912: 235. 1912

(Irritant stinging hairs. Cold infusion against venereal diseases.)

Tragopogon L. Asteraceae

Greek *tragopogon*, *tragos* 'he-goat, goat' and *pogon* 'a beard', referring to the hairy or silky pappus; see Carl Linnaeus, *Species Plantarum*. 2: 789–790. 1753 and *Genera Plantarum*. Ed. 5. 346. 1754.

Tragopogon dubius Scop. (*Tragopogon dubius* Scop. subsp. *major* (Jacq.) Voll.; *Tragopogon dubius* Scop. var.

major (Jacq.) O. Bolòs & Vigo; *Tragopogon major* Jacq.; *Tragopogon major* Jacq. subsp. *dubius* (Scop.) Rouy)

Europe. Perennial or biennial herb, coarse smooth hollow stems, milky sap, grass-like pointed clasping leaves, ligules pale lemon-yellow, bracts generally wider than the yellow ray flowers, large feathery seed heads, roots eaten, leaves can be eaten

See *Flora Carniolica*, Editio Secunda 2: 95. 1772, Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Florae austriacae: sive Plantarum selectarum in Austriae archiducatu sponte crescentium icones, ad vivum coloratae, et descriptionibus, ac synonymis illustratae ...* 1: 19. Viennae Austriae: typis Leopoldi Johannis Kaliwoda, 1773–1778 and *Flore de France* 10: 5. 1908, Vollmann, Franz, *Flora von Bayern*. 772. Stuttgart: E. Ulmer, 1914, *Biol. Zurn. Armen.* 28(1): 95–97. 1975, *Taxon* 27: 519–535. 1978, *Taxon* 29: 718–720. 1980, *Folia Bot. Misc.*, 6: 85. 1989, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Diuretic.)

in English: goat's beard, Joseph's flower, western salsify, yellow goat's-beard, yellow goatsbeard, yellow salsify

***Tragopogon porrifolius* L.**

China, North America. Biennial herb

See *Species Plantarum* 2: 789. 1753 and *Inform. Bot. Ital.* 8: 67–74. 1976, *Taxon* 27: 223–231. 1978, *Lagascalìa* 10: 225–256. 1981, *Taxon* 30: 705–706. 1981, *Brittonia* 35: 341–350. 1983, *Fitologija* 31: 71–74. 1986, *Amer. J. (Plant emetic. Root decoction for liver troubles and loss of appetite. Ceremonial.)

in English: Jerusalem star, oyster plant, purple flowered salsify, purple goat's beard, salsify, vegetable oyster, wild salsify

in South Africa: bokbaard, persbokbaard, sydissel

in Hawaii: kalapi

***Tragopogon pratensis* L.**

China, India, Himalaya.

See *Species Plantarum* 2: 789. 1753 and *Canad. J. Bot.* 56: 1466–1471. 1978, *Biologia* (Bratislava) 33: 597–601. 1978, *Naturaliste Canad.* 109: 91–101. 1982, *Taxon* 31: 596–597. 1982, *Naturaliste Canad.* 111: 447–449. 1984, *Lagascalìa* 15 (Extra): 361–367. 1988, *Taxon* 41(3): 548. 1992

(Root decoction given for heartburn, sore throat. Ceremonial. Veterinary medicine, for horses.)

in English: goat's beard, Jack-go-to-bed-at-noon, Johnny-go-to-bed-at-noon, meadow goat's beard, meadow salsify, shepherd's clock, yellow salsify

Tragus Haller Poaceae (Gramineae)

For the German botanist Hieronymus Bock (called Tragus, *bock* being German for goat), 1498–1554, physician, teacher, author of *New Kreütter Buch*. Strassburg 1537, *Teütsche Speiszkammer*. [Small 4to, 2nd edn.] Strasbourg 1555 and *De stirpium, maxime earum, quae in Germania nostra nascuntur*. [Strassburg 1552], with Brunfels and Fuchs one of the German fathers of botany; see Otto Brunfels (1488–1534), *Herbarum vivae eicones ad naturae imitationem summa cum diligentia et artificio effigiatae*. Argentorati 1530–1540; Garrison and Morton, *Medical Bibliography*. 1806 and 1803. 1961; Edward Lee Greene, *Landmarks of Botanical History*. Edited by Frank N. Egerton. Stanford, California 1983; J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 206. 1965; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 44. Regione Siciliana, Palermo 1988; Jerry Stannard, in *D.S.B.* 2: 218–220. 1981; type *Tragus racemosus* (L.) All., see *Fam. Pl.* 2: 31, 581. 1763, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 203. 1768, *Flora Pedemontana* 2: 241. 1785, *Gen. Hack.; *Tragus racemosus* var. *brevispicula* Döll; *Tragus tscheliensis* Debeaux)

Tropical Africa, China, Egypt, America, southwestern Asia, South Africa. Annual, small, ruderal, tufted to loosely tufted, short culms, erect, decumbent or ascending, spreading, sprawling, mat-forming, usually rooting at the lower nodes, branching from base, often shortly stoloniferous, leaf sheath rounded and inflated, ligule a ring of hairs, leaves lanceolate and flattened, leaf margins fringed and hairy, long dense spike-like inflorescence narrowly cylindrical and usually partially enclosed by the sheath of the uppermost leaf, spikelets paired and covered with hooked spines or bristles,

first spikelet fertile, second spikelet rudimental or reduced to an empty glume, glumes hairs hooked, upper glume 5-nerved with prickles hooked at the tip, 3 stamens, sharp prickly seeds, burrs a nuisance in wool, heavy seeder, pioneer grass, useful for erosion control, grazed by all stock, very low grazing value, low vegetative yield, found in arid and semi-arid lands, stony fields, grassland, denuded grasslands, dry grassland, on poor soils and poor sandy soil, natural veld, on muddy pans, along roadsides, compacted soils, open shrubland, bushland, cultivated and uncultivated ground, trampled sites, overgrazed areas, disturbed places, silty clay, sandy soils, open areas

See *Flora Pedemontana* 2: 241. 1785, *Synopsis Plantarum Germaniae* 1: 440. 1792, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 3: 15. 1822, *Mantissa* 2: 205. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 286–287. 1829, *Révision des Graminées* 2: 413. 1831, *Annales des Sciences Naturelles; Botanique, sér. 3* 19: 373. 1853, *Synopsis Plantarum Glumacearum* 1: 112. 1854, *Flora Brasiliensis* 2(2): 123. 1877, *Actes de la Société Linnéenne de Bordeaux* 33: 71. 1879, *Revisio Generum Plantarum* 2: 780. 1891, *Zoë* 4(4): 386. 1894, *The Flora of British India* 7(21): 97. 1897 [1896], *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 12. 1897 and *Österreichische Botanische Zeitschrift* 51(6): 195. 1901, *Anales del Museo Nacional de Buenos Aires* 11: 58. 1904, *Acta Phytotaxonomica et Geobotanica* 10(4): 268. 1941, *Annals of the Missouri Botanical Garden* 81(4): 784–791. 1994, *Bothalia* 24(1): 92–96. 1994, *Austral Ecology* 25(2): 140–149. in Tanzania: ezeya, maya, mbungu, mjaya, mwaya, mzaya

Trema Lour. Cannabaceae (Celtidaceae, Ulmaceae)

Greek *trema* 'hole, aperture', in reference to the pitted stone of the fruit; see João de Loureiro (1717–1791), *Flora cochinchinensis*. 2: 539, 562–563. [Lisboa] 1790 and *Fieldiana, Bot.* 24(4): 1–10. 1946, *Journal of Arnold Arboretum* 51: 18–40. 1970, Fu Likuo, Chen Chiajui & Tang Yancheng. *Ulmaceae*. In: Chun Woonyong & Huang Chengchui, eds., *Fl. Reipubl. Popularis Sin.* 22: 334–413. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2472–2478. 2001.

Trema cannabina Lour. (*Celtis amboinensis* Willd.; *Sponia virgata* Planch.; *Trema amboinensis* (Willd.) Blume; *Trema virgata* (Planch.) Blume)

Asia temperate and tropical. Shrubs or small trees, evergreen or deciduous, monoecious or dioecious, twigs slender and spreading, ovate-oblong alternate membranous leaves slightly hairy along midrib and lateral veins, white apetalous flowers in axillary cymes, perianth persistent in fruit, ovoid drupes reddish orange, seed oil

See *Flora Cochinchinensis* 2: 562–563. 1790 and *Symb. Sin.* 7: 106–107. 1929, *Biochim. Biophys. Acta.* 420 (1):105–11. 1976, *Acta Phytotax. Sin.* 17(1): 50. 1979, *The Traditional Rotuman Medicinal System and Ethnopharmacopoea*. (Part of a thesis presented to the Department of Botany and Range Science Brigham Young University in partial fulfillment of the requirements for the Degree Master of Science by Will C. McClatchey.) April 1993, *Plant Molecular Biology* 39: 389. 1999

(Not poisonous, is injurious to stock. Root decoction for sore tongue. In the traditional Rotuman medicinal system, leaves and bark used to treat *maf pirpir* (lit. "yellow eyes", lack of appetite, *ar u'u matit* (cold palms), general ill health), *tu kiog* (lack of a menstrual cycle, in this case when there is pain in the abdomen), and *mamosa*, lethargy, lack of appetite, weight loss, dry cracked tongue.)

in English: lesser trema, poison bush, smooth trema

in China: guang ye shan huang ma

in Japan: koba-fungi, kiri-enoki, usuba-urajiro-enoki

Malay name: mengkirai

Rotuman name: maragi (the tropical island of Rotuma is found at the junction of Polynesia, Melanesia, and Micronesia.)

in Tonga: mangle

Trema guineensis (Schum. & Thonn.) Ficalho (*Celtis guineensis* Schum. & Thonn.; *Celtis guineensis* Schumach.; *Sponia guineensis* (Schum. & Thonn.) Planch.; *Trema guineense* (Schum. & Thonn.) Ficalho; *Trema guinensis* Priemer)

Tropical Africa. Tree or shrub, often as *Trema orientalis*

See *Beskrivelse af Guineiske planter* 160. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 197. 1873, *Pl. Ut. Afr. Portug.* 261. 1884, *Bot. Jahrb. Syst.* 17(5): 426, 469. 1893 and *Willdenowia* 21: 233–238. 1991, *Bothalia* 29(2): 239–247. 1999

(Toxic. Stem bark and leaves for cough, bronchial congestion, asthma, intestinal worms, pains in female disorders. Leaves decoction for measles and cough. Roots and stem bark for malaria, chronic fever, black tongue, cough, bronchitis, dysentery, pneumonia, intestinal worms. Bark chewed with salt to treat cough and epilepsy; bark decoction in diarrhea. Roots used to treat stomach problem in men. Veterinary medicine, used to stimulate milk production in animals.)

in Angola: musamba-samba, mugudisosola, kipukulo (Kimbundu); maiapa, qipexi, kituense (Umbundu); omuiakalenga (Lunyaneka); nsengue-nsengue (Kikongo); tjimonomon (Kioko); cabra (S. Tomé)

in Cameroon: echen, evekoulou, fafa

in Congo: osocki, ossossi, ombumba, yayaka, muyayaka

in Ivory Coast: adaschia, foué

in Nigeria: ayinyin, uhogo

in Southern Africa: muButibuti, muGubvura, siGungoro, muFeteti, muPutiputi, muTiputi (Shona)

in Zaire: baumba, besesu, bukengi (Katalinga); esesu, inmesu, limesu (Turumbu); kadiabahote (Kaniama); kpewadi, leioso, likefu (Katabira or Kitabira); mangosabolebo, memvo (Tshiluba); mudiankutshi (Kasai); mubeso o mubessu (Tshofa); mukelekele (Kinande); muhelehele, muafu, muhengi (Kimbumba); mushowshow (Kihunde); nkingi (Kipakompe); nsengensenge (Mayombe); pewa (Azande); umunyereso (Shangungu); wesesu (Eala)

Trema lamarckiana (Roem. & Schult.) Blume (*Celtis lamarckiana* Roem. & Schult.)

USA, Florida, West Indies. Tree, evergreen, rigid stiff hairy leaves

See *Species Plantarum* 2: 1043–1044. 1753, *Systema Vegetabilium* 6: 311. 1820, *Museum Botanicum* 2: 58. 1856

(Chewed bark to prevent colds.)

in English: bitroot, bo-hog, West Indian trema

Trema nitida C.J. Chen

China. Tree, dioecious or monoecious, leaf blade lanceolate to narrowly lanceolate, inflorescences shorter than petiole, female flowers shortly pedicellate, drupes blackish purple when mature, strong wood

See *Acta Phytotaxonomica Sinica* 17(1): 49–50, pl. 3. 1979

(Astringent. Tannin from the bark.)

in China: yin mao ye shan huang ma

Trema orientalis (L.) Blume (*Celtis discolor* Brongniart; *Celtis guineensis* Schum. & Thonn.; *Celtis orientalis* L.; *Celtis rigida* Blume; *Sponia affinis* Planch.; *Sponia andaresa* Commerson ex Lamarck; *Sponia argentea* Planchon; *Sponia commersonii* Decaisne ex Planchon; *Sponia glomerata* Hochst.; *Sponia orientalis* (L.) (Used in Ayurveda and Unani. Root bark diuretic, said to be effective in the treatment of schistosomiasis. Latex acrid, vesicant, irritant and purgative. Leaves antihypertensive, active against lymphatic leukaemia cells, applied to cure shingles. Seed emetic and purgative. *Stillingia* oil is poisonous. Unripe fruit and plant sap from all parts of *Sapium sebiferum* are poisonous, low toxicity, nausea, vomiting, diarrhea, skin and eye irritation.)

in English: candleberry tree, chicken tree, Chinese tallow, Chinese tallow tree, Chinese vegetable tallow, Florida aspen, popcorn tree, stillingia oil, tallow tree, vegetable tallow, vegetable tallow tree, white wax berry

in China: pi-yu, ting-yu, wu jiu mu gen pi

in India: agaru, dudhla, makhan, meenadabattimara, momchina, multani pista, pahari-shisham, pippalyang, ronojita, tarcharbi, tarpun, toyapippali, vilayatishisham

in Japan: Nankin-haze, tokaji

Trianaeopiper Trelease Piperaceae

For the Colombian (b. Zipaquirá) botanist José Jerónimo (or Gerónimo) Triana, 1834–1890 (d. Paris), traveller, plant collector, botanical explorer, journalist; see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Proceedings of the American Philosophical Society* 67: 50. 1928, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 400. 1965, Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 406. Boston, Mass. 1972, Enrique Pérez Arbeláez, in *D.S.B.* 13: 463–464. 1981.

Trianaeopiper contraverrugosa Cuatrec.

Colombia. Subshrub

See *Proceedings of the American Philosophical Society* 67: 50. 1928, *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 7: 51, t. 1. 1946

(A remedy for snakebite.)

Trianthema L. Aizoaceae

Greek *treis*, *tria* ‘three’ and *anthemon* ‘flower’, the flowers generally grouped in threes; see Carl Linnaeus, *Species Plantarum*. 1: 89, 223–224. 1753, *Genera Plantarum*. Ed. 5. 105. 1754 and *Fieldiana*, *Bot.* 24(4): 203–207. 1946, *Acta Bot. Indica* 3: 136–141. 1975, *Recent Res. Pl. Sci.* (New Delhi). 7:

261–271. 1979, *J. Palynol.* 16: 85–105. 1980, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 48–49. 2001.

Trianthema decandra L. (*Zaleyia decandra* (L.) Burm. f.; *Zaleyia decandra* Burm.)

India. Herb, see also *Zaleyia decandra*

See *Mant. Pl.* 70. 1767, *Flora Indica ... nec non Prodrum Florae Capensis* (N.L. Burman) 110, t. 31. 1768

(Used in Ayurveda and Sidha. Roots mixed with cow milk, ground and infusion given orally for asthma and fertility; root decoction to treat irregular menstruation. Veterinary medicine, fresh leaf extract given to calves for scours.)

in India: caranai, caratai, caruvelai, catti-c-caranai, catti caranai, catticcaranai, catticcattaranai, gadabani, gajjasoppu, gali-geru, jaija-soppu, phasartani, punarnavi, saaranai ver, saranai, sarvalai, satho, sattichcharanai, siru charanai, tella galijeru, tella-galijeru, tellagalijeru, tellaghalijeroo, vallai-sharunnai, vellai-c-caranai ver, vellai caddic caranai, vellaici cattanai, vellai cattaranai, vellai saaranai, vellaisharunnai, yadaboni

Trianthema govindia Buch.-Ham. (*Trianthema govindia* Buch.-Ham. & G. Don)

India.

See *Numer. List* [Wallich] n. 6838. 1832, *Gen. Hist.* iii. 72. 1834

(Powdered roots with mustard oil rubbed on the body in rheumatism.)

in India: bawra, ganjeli, kempukomme, santer, santhi

Trianthema portulacastrum L. (*Portulacastrum monogynum* (L.) Medik.; *Portulacastrum monogynum* Medik., nom. inval.; *Trianthema flexuosa* Schumach. & Thonn.; *Trianthema flexuosa* Schumach.; *Trianthema littoralis* Cordem.; *Trianthema monanthogyna* L.; *Trianthema monogyna* L., nom. illeg.; *Trianthema procumbens* Mill.)

Tropics, India. Herb, succulent, prostrate or ascending, many-branched, inflorescence a single flower in the leaf axils, fruit a capsule, persistent perianth, fleshy indehiscent operculum, seeds reniform, used as vegetable, a common weed in fields

See *Species Plantarum* 1: 223–224. 1753, *Mantissa Plantarum* 1: 69–70. 1767, *Gard. Dict.*, ed. 8. n. 1. 1768, *Philosophische Botanik* (Medikus) 1: 99. 1789, *Beskr. Guin. Pl.* 221. 1827, *Fl. Réunion* (E.J. de Cordemoy) (1895) 290. 1895 and *Kew Bulletin* 14: 236. 1960, *Fl. Veracruz* 9: 1–13. 1979, *Flora of Australia* 19–62. 1984, *Fl. Mascareignes* 104: 1–13. 1991, *Proc. Indian Sci. in Yoruba: afakale, akisa, akisan, alowo njeja pupa, alowonjeja funfun, atankale

Trianthema triquetra Willd. (*Trianthema crystallina* Vahl; *Trianthema crystallina* sensu J. Black; *Trianthema crystallina* (Forssk.) Vahl; *Trianthema glaucifolia* F. Muell.)

Australia. Diffuse, prostrate herb, pink flowers, small fruits depressed in centre, black rugose orbicular seeds, whole plant as vegetable

See *Symb. Bot.* (Vahl) i. 32. 1790, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 181. 1803, *Fragmenta Phytographiae Australiae* (Mueller) 1(7): 172. 1859 and *Flora of Australia* 19–62. 1984

(Used in Sidha. Plant decoction in heart troubles and anemia. Leaf paste applied on boils. Seeds used on skin diseases.)

in Australia: red spinach, small hogweed

in India: ciru caranai, dappele naayi soppu, lunki, lutanki, naayi soppu

Tribulus L. Zygophyllaceae

Latin *tribulus*, *tribolos*, *i* 'a caltrop'; Greek *tribolos*, *treis*, *tria* 'three' and *bolos* 'a point', the fruit resembling a club-shaped crest with sharp spines (each fruit breaking into five triangular-shaped segments, each with two large spines at the tip and several smaller spines); see Carl Linnaeus, *Species Plantarum* 1: 386–387. 1753 and *Genera Plantarum*. Ed. 5. 183. 1754 and *Feldiana, Bot.* 24(5): 393–398. 1946, *Ann. Missouri Bot. Gard.* 56(1): 1–7. 1969.

Tribulus longipetalus Viv. (*Tribulus alatus* Delile, nom. illeg.)

Pakistan. Annual herb, erect, decumbent, yellow flowers

See *Plantarum aegyptiarum*, decades 4: 10. 1830 and *Taxon* 28: 395. 1979, *Nordic Journal of Botany* 1: 531–534. 1981, *Kromosomo* 42: 1316–1329. 1986

(Ripe fruits powdered and used as snuff to break up thick mucus.)

in Pakistan: gurgandako

Tribulus rajasthanensis Bhandari & Sharma (*Tribulus terrestris* L. var. *rajasthanensis* (Bhandari & V.S. Sharma) F. Al-Hemaid & Jacob Thomas)

India. Annual herb

See *Botaniska Notiser* 129(4): 367. 1977, *Arab Gulf J. Sci. Res.*, 14(2): 437. 1996

(Fruits diuretic, aphrodisiac, useful in urinary disorders, kidney diseases, gout. Leaf paste for bladder stones.)

Tribulus terrestris L. (*Tribulus lanuginosus* L.; *Tribulus maximus* L. var. *roseus* Kuntze; *Tribulus terrestris* Muhl.; *Tribulus terrestris* var. *sericeus* Andersson ex Svens., nom. illeg.)

Tropics. Annual herb, small shrub, hairy, extremely variable in habit, prostrate, spreading, matting, decumbent, creeping, trailing, many-branched, radiating from a central axis, long taproot, opposite pairs of unequal-length leaves, solitary bright yellow flowers in axils of the smaller leaves, hard woody angled spiny fruit, fodder, very palatable plant eaten by both wild animals and livestock, source of bee forage, fresh leaves cooked and eaten as a vegetable, a problematic weed of annual and perennial crops

See *Species Plantarum* 1: 386–387. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 483. 1830, *Revisio Generum Plantarum* 3(3): 30. 1898 and *American Journal of Botany* 33: 457. 1946, *Kew Bulletin* 9: 398. 1954,

Journal of Palynology 16: 85–105. 1980, *Nordic Journal of Botany* 1: 531–534. 1981, *La Kromosomo* 42: 1316–1329. 1986, *Lagascalia* 15: 124–129. 1988, *Regnum Veg.* 127: 95. 1993, *Taiwania* 39(1–2): 61–71. 1994, *Folia Geobotanica et Phytotaxonomica* 30: 445–453. 1995, *Australian Journal of Botany* 44: 191–199. 1996, *Guihaia* 16(2): 161–164. 1996

(Used in Ayurveda. Narcotic, dried and powdered young twigs and mature fruits roasted and dissolved in milk, the liquid taken after meals, reported to cause delirious conditions if taken in excess. Can be very poisonous to livestock and cause *geeldikkop*. Spiny vicious thorns of the fruits can injure the feet of men and animals. Plant decoction for urinary troubles, diarrhea, throat and eye infections; plant mucilaginous infusion taken as a remedy for impotence. Fruit tonic, aphrodisiac, diuretic, used as a pain killer, for kidney diseases, urinary disorders, chronic cystitis and gonorrhoea, impotency, general weakness, cold, cough, asthma; fruits of *Tribulus terrestris* powdered with the seeds of *Sesamum indicum* or *Trigonella foenum-graecum* and taken with milk to cure impotence; fruit extract taken to cure kidney pain; fruit infusion useful in gout. Fruit powder mixed with mustard oil used as corn cure; a syrup from the fruits to relieve urinary tract irritation, burning urination; dried spines of the fruit used in urinary disorders. Leaf paste applied on bald head for hair growth and to prevent hair loss. Contact therapy, fruit to relieve headache.)

in English: burnut, caltrop, cat-head, common dubbeltjie, devil's bush, devil's thorn, goat head, puncture vine

in Arabic: hasak, hasaka

in China: ci ji li, chi li, ji li, pai chi li, sha yuan chi li, tu chi li, tzu

in India: akanti, bethu gokharu, bethugokhru, bhakra, chhotagokhru, chotagokhru, ghokharu, gokharu, gokhru, gokhuru, gokru, goksharu, gokshru, gokshura (go, cow; kshura, hoof), gukhru, kanti, kasaam menthok, kokulla, kokullak rasha, mithu gokharu, mithugokhru, motu gokhru, naggali, neggalumullu, nerunji, njerinjil, rasha, sirunirungil, tale bele gida, thangtsar, zama

in Pakistan: ghur gan

in Tibetan: gzema

in East Africa: esuguru, eziguru, kungu, mbigiri, mbiliwili, okuro, shokolo

in Kenya: esuguru

in Nigeria: tsidau

in Sahara: timegelost

in South Africa: devil's thorn, drie-doring dubbeltjie, dubbeltjie, dubbeltjie doring, duiweltjie, duwweltjie, gewone dubbeltjie, platdubbeltjie, rankdubbeltjie, tshetlo, volstruisdoring, volstruisdubbeltjie

in Tanzania: ikongo, ikonkho, mbigii, mbigili, mbigili ng'ombe, mbigiri, ndaghandaghu

in Yoruba: dagunro, dagunro nla

Tricalysia A. Rich. ex DC. Rubiaceae

The generic name is based on the Greek *treis*, *tria* 'three' and *kalyx*, *kalykos* 'calyx', referring to the true calyx and two epicalyces (or often double), or to the bracteoles beneath the flower, see *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 445. 1830, *Flora* 27: 553. 1844, *Linnaea* 23: 52. 1850, *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 367. 1851, *Flora* 36: 718. 1853, *Hooker's Icones Plantarum* 11: 1091. 1871, *Genera Plantarum* 2: 96. 1873, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 450. 1897 and *Enum. Philipp. Fl. Pl.* 3: 534–535. 1923, *Bull. Mus. Hist. Nat. (Paris)* sér. 2. 3: 187. 1931, *Flore du Gabon* 17: 268. 1970, *Bulletin du Jardin Botanique National de Belgique* 49: 309. 1979, *Annals of the Missouri Botanical Garden* 96(1): 206. 2009.

Tricalysia angolensis A. Rich. ex DC. (*Hypobathrum angolense* (A. Rich. ex DC.) Baill.)

Tropical Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 445. 1830, *Histoire des Plantes* 7: 315. 1880

(A decoction drunk for stomach troubles.)

in Angola: cagondo

Tricalysia tinagoensis Elmer (*Diplospora tinagoensis* (Elmer) S.J. Ali & Robbr.; *Phaleria axillaris* Elmer, Thymelaeaceae)

SE Asia, Philippines, Borneo. Often as *Diplospora tinagoensis*

See *Malayan Miscellanies* 2(7): 59. 1822 and *Leaflets of Philippine Botany* 1: 34. 1906, *Leaflets of Philippine Botany* 8: 2840–2841. 1915, *Blumea* 35(2): 299. 1991

(Irritant, astringent.)

Tricerma Liebm. Celastraceae

From the Greek *treis*, *tria* 'three' and *kerma* 'a small coin, morsel'.

Tricerma phyllanthoides (Benth.) Lundell (*Maytenus phyllanthoides* Benth.)

North America.

See *The botany of the voyage of H.M.S. Sulphur* 54. 1844, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853(3–4): 97–98. 1854 and *Wrightia* 4(5): 158. 1971

(Root bark or leaves infusion taken for dysentery, and a gargle for sore throat.)

Trichanthera Kunth Acanthaceae

From the Greek *thrix*, *trichos* ‘hair’ and *anthera* ‘anther’.

Trichanthera gigantea (Bonpl.) Nees (*Ruellia gigantea* Bonpl.)

Colombia.

See *Species Plantarum* 2: 634–635. 1753, *Plantae Aequinoctiales* 2: 75–77, t. 102. 1809, *Nova Genera et Species Plantarum* (folio ed.) 2: 197. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 218. 1847

(For headache and constipation.)

Trichilia P. Browne Meliaceae

Greek *tricha*, *triche* ‘three parts’, *tricheilos* ‘three-lipped’, referring to the ovary and fruits; see Patrick Browne (1720–1790), *The civil and natural history of Jamaica*. 278. London 1756, *Systema Naturae*, Editio Decima 2: 1020. 1759, *Familles des Plantes* 2: 344. 1763, *Flora Aegyptiaco-Arabica* 127. 1775, *Monadelphiae Classis Dissertationes Decem* 7: 369. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 610. 1791, *Systema Vegetabilium* 5: xli, 511. 1819, *Mémoires du Muséum d’Histoire Naturelle* 19: 238. 1830, *Genera Plantarum* 1051. 1840, *Fam. Nat. Syn. Monogr.* 1: 86, 116. 1846, *Second voyage sur les deux rives de la mer Rouge dans le pays des Adels et le Royaume de Choa* 344. 1846, *Memorie della Reale Accademia delle Scienze dell’ Istituto di Bologna* 2: 269. 1850, *Flora of the British West Indian Islands* 129. 1859, *Flora Brasiliensis* 11(1): 209. 1878, *Die Natürlichen Pflanzenfamilien* 3(4): 306–307. 1896, *Symbolae Antillanae seu Fundamenta Florae Indiae Occidentalis* 1: 328. 1899 and *Contributions from the United States National Herbarium* 8: 65, 258. 1903, *Notulae Systematicae*. *Herbier du Museum de Paris* 11: 163. 1944, *Fieldiana, Bot.* 24(5): 444–468. 1946, *Field Mus. There is much confusion in the literature.

Trichilia sp.

South America, Tropical Africa.

(Antioxidant, antidepressant, aphrodisiac, tonic, antinociceptive.)

in English: bastard cedar

in Cameroon: ebangbemva

in Ivory Coast: asamoiake, konangbri, mutigbanaye rasso

in Nigeria: dissoko, ebangbemva, irere, urere

in Yoruba: ajigbagbo

in Argentina: catigua puita, fe de gozo, guamiri, mangacitara, palo anis, tape rigua

in Belize: cedrillo, si-sin

in Brazil: catigua graudo, catigua miudo, guamichava

in Colombia: manglesito, yayo, yayo colorado

in Cuba: guaban, jubaban, siguraya

in Mexico: bola de tejon (Hidalgo); mi-cha-hi (Chinanteca l., Oaxaca); cabo de hacha (Oaxaca); cauache (Sinaloa); chobenché (Maya, Yucatan); estribillo, cucharillo (Tamaulipas); estribillo (south east San Luis Potosí); garapatilla (Colima; see Richard D. Reynolds, *The Ancient Art of Colima, Mexico*. Walnut Creek, Squibob Press 1993); garbancillo (Sonora)

in Nicaragua: matapiojo

in Peru: chiajap, chuchuhuasi, lechuza caspi

in Puerto Rico: cabo de hacha, caracolillo, go ita, guaita, guayavacon, palo de anastasio

in Salvador: barretero, canelillo, canjuro, jocotillo, ojo de muñeca, pimientillo

Trichilia capitata Klotzsch

Tropical Africa.

See *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 120. 1861

(Used for snakebite.)

Trichilia catigua A. Juss. (*Moschoxylum affine* A. Juss.; *Moschoxylum catigua* A. Juss.; *Trichilia affinis* A. Juss.; *Trichilia alba* Rojas Acosta, nom. nud.; *Trichilia catigua* var. *affinis* (A. Juss.) C. DC.; *Trichilia catigua* var. *glabrior* C. DC.; *Trichilia catigua* var. *longifoliola* C. DC.)

South America. Tree

See *Flora Brasiliae Meridionalis* (quarto ed.) 2: 77–78. 1829, *Mémoires du Muséum d’Histoire Naturelle* 19: 239. 1830, *Flora Brasiliensis* 11(1): 211, 216. 1878, *Bulletin de l’Herbier Boissier* 2: 572. 1894, *Historia Natural de Corrientes* 154. 1897 and *Psychopharmacology* 182(1): 45–53. 2005, *Journal of AOAC International* 89(6): 1532–1537. 2006, *Journal*

of *Natural Products* 70(12): 2010–2013. 2007, *Journal of Electrocardiology* 40(6): 534. 2007

(Bark antioxidant, antidepressant, aphrodisiac, tonic, antinociceptive. Catuama, an herbal drug, a mixture of *Trichilia catigua*, *Paullinia cupana*, *Ptychopetalum olacoides* and *Zingiber officinale*.)

in Brazil: catuaba

Trichilia connaroides (Wight & Arn.) Bentvelzen var. ***connaroides*** (*Heynea trijuga* Roxb.; *Heynea trijuga* var. *microcarpa* Pierre; *Heynea trijuga* var. *pilosula* C. DC.; *Trichilia connaroides* (Wight & Arn.) Benth.; *Trichilia connaroides* var. *microcarpa* (Pierre) Benth.; *Walsura pubescens* Kurz; *Walsura trijuga* Kurz; *Walsura trijuga* (Roxb.) Kurz; *Walsura trijuga* var. *microcarpa* (Pierre) S.Y. Hu; *Zanthoxylum connaroides* Wight & Arn.)

Nepal. Small deciduous tree, small fragrant yellowish-green to white flowers in panicles, reddish subglobose capsule, arilate seeds

See *Species Plantarum* 1: 270. 1753, *Hort. Bengal.* 33. 1814, *Botanical Magazine* 41: t. 1738. 1815, *Flora Indica*; or, descriptions of Indian Plants 2: 386. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 148. 1834, *Journal of the Asiatic Society of Bengal.* Part 2. *Natural history* 41(2): 297. 1872, *Journal of the Asiatic Society of Bengal.* Part 2. *Natural history* 44: 148. 1876 [1875 publ. 13 Jan 1876], *For. Fl. Brit. Burma* 1: 225, 1877, *Monographiae Phanerogamarum* 1: 714. 1878, *Flore Forestière de la Cochinchine* t. 352. 1885 and *Journal of the Arnold Arboretum* 5(4): 229. 1924, *Acta Botanica Neerlandica* 11: 13, 17. 1962

(Bark, leaves and fruits reported to be toxic, tonic; fruit sometimes mixed with opium. Bark and leaves bitter and tonic, a decoction taken in cholera. Leaves decoction taken in cholera. Oil from the seeds applied to treat scabies.)

in China: zhe gu hua

in India: ankhataruwa, ban reetha, ban ritha, chinunji, gundira, kamal-stuli, kapia-kushi, karai, karai-karuvilangum, karivilangu, kariyamaram, karukkati, karuvilangum, kora, kora linihar, korakkadi, limbara, linbara, linabira, mighog-kung, miglio-kung, rolang-phang, sulimaram, theng-are-arong

Malay name: tangis (= weeping) sarang burung (= a bird's nest)

in Nepal: ankhataruwa, askhataruwa, tailung

Trichilia dregeana Sond. (*Trichilia chirindensis* Swynnerton & Bak.f.; *Trichilia dregei* E. Meyer; *Trichilia dregei* var. *oblonga* C. DC.; *Trichilia splendida* A. Chev.)

Tropical Africa. Tree, evergreen, very variable, leaves alternate imparipinnately compound, inflorescence an axillary or terminal panicle, dehiscent capsule slightly 3-lobed, mature fruit bright red and cream, absence of a stipe in the fruit, seeds edible after removal of the seedcoat and boiling, fruits

eaten, in well-watered sites, in forest, moist evergreen forest, closely related and very similar to *Trichilia emetica*

See *Flora Capensis* (Harvey) 1: 246. 1860 and *J. Linn. Soc., Bot.* xl. 39. 1911, *Bull. Soc. Bot. France* 58(Mém. 8d): 147. 1912 [1911 publ. 1912]

(Seeds and bark very poisonous, seedcoat poisonous. Seeds antimicrobial, antiinflammatory, antifeedants and growth regulators of insects; oil from seeds used in the treatment of cuts, bruises, lumbago, rheumatism. Leaves used as a wound healing remedy. Antitrypanosomal, bark, roots and leaves used for stomach and intestinal complaints, dysentery, infestation by parasites. A decoction of roots and bark taken for fever and as a purgative, a strong purgative; bark decoctions drunk as a purgative or abortifacient, and also to treat diarrhea. Fruit emetic and purgative. Bark used as fish poison.)

in English: Cape mahogany, Christmas bells, forest mahogany, forest Natal mahogany, red ash, thunder tree, Umkomaas tree, white mahogany

in Ivory Coast: aribanda, ouagon

in Southern Africa: basteressenhout, bosrooiesenhout, rooiesenhout; umKhuhlu (Xhosa); muKuhlu (Shona); umKhuhlu, uMathunzini, uMantunzini (Zulu); nkuhlu (Tsonga); mmaba (North Sotho); mutuhu, mutshikili (Venda)

in Tanzania: mkangazi, mkoromaji, mkunguma, mkungwina, mtimaji, musunkuti

in Uganda: sekoba

in Zaire: ivundi, soko

Trichilia emetica Vahl (*Elcaja roka* Forssk.; *Trichilia roka* Chiov.; *Trichilia roka* (Forssk.) Chiov.)

East Africa, Ghana, Tanzania. Evergreen tree or shrub, erect, many-branched, red brown bark deeply cracked, branches ascending, hanging foliage, leaves yellow-green imparipinnately compound, small greenish white sweet smelling flowers, grey-brown to reddish velvety pubescent furry fruits, the decorticated kernel eaten in large quantities, seed black with bright red aril, leaves eaten by cattle and goats, seeds relished by baboons and monkeys, in riverine areas, dry woodland, forest edge, closely related and very similar to *Trichilia dregeana* Sond.

See *The Civil and Natural History of Jamaica in Three Parts* 278. 1756, *Flora Aegyptiaco-Arabica* 95, 127. 1775, *Symbolae Botanicae, ...* 1: 31. 1790 and *Bull. Soc. Bot. Ital.* 1923, 115. 1923, *Flora Somala* 2: 131. 1932, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 33: 237–242. 1991, *Journal of Ethnopharmacology* 84(2–3): 279–287. 2003, *Journal of Ethnopharmacology* 91(1): 37–42. 2004, *Journal of Ethnopharmacology* 93: 43–49, 231–241. 2004, *Journal of Ethnopharmacology* 97: 327–336, 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006

(Seeds very poisonous to humans. The oil used in the treatment of cuts and bruises, and to relieve rheumatism. Leaves used as a wound healing remedy. Antitrypanosomal, emetic, tonic, bark, roots and leaves used for stomach and intestinal complaints, dysentery, epilepsy, infestation by parasites. A decoction of roots and bark taken for fever and as a purgative, a strong purgative. An infusion from the bark used as an emetic and for treating pneumonia, to induce abortion and as fish poison.)

in English: Cape mahogany, Christmas bells, Ethiopian mahogany, mafoureira tallow, mafura butter, mafura oil, mafura tallow, mafurra tallow, Natal mahogany

in Benin: adjandjagbezou, adjiposso, atchipoussoukou, bis-sayilade, djandja kpizou, dipouguedi, dirébou, gbèkou, gbek-oudirebou, n'kouna, ouchinko, ogoudou, ouwantchabou, tchivi, wénonlélé, wuyobihoun, wanpirogou

in Tanzania: elkoroshi, kamoko, letakaiko, mafura, mban-gwe, mbwewe, mbindiyo, mchengo, mgolemazi, mgolimazi, mjagengo, mkongoni, mkoromaji, mkungurina, mkungwina, mmbindio, monko-ya-nyika, mpili pili, msukulilo, mtanda-ruka, mtengotengo, mti maji, mtimaji, mtutu, muhukuliro, musikili, muwamaji, mwavai, myembe-mwitu, mzeeituni, ndilolo, nyembemwitu, sungute, taewi

in Togo: adjendjagbéssu, buwompè, diworpobiri, dumefadine, kotadiabli

in Tropical Africa: adyanya peso, mtshigizi

in Uganda: akwirakwir, sekoba

in West Africa: flo-finzan

in Yoruba: karuntan, papa, papa odan

in Zambia: msikiri, mushikishi, musikili

Trichilia emetica Vahl subsp. *suberosa* J.J. De Wilde (*Trichilia roka* (Forssk.) Chiov.)

West Africa. Shrub or small tree, trunk crooked, low-branching, bark fissured, narrow crown, evergreen but with deciduous tendency, twigs rather thick and corky, leaves odd-pinnate, flowers yellowish or whitish in pubescent panicles, loculicidal capsules, arillate seeds, very variable, in savanna, in open savanna woodland, open forest

See *The Civil and Natural History of Jamaica in Three Parts* 278. 1756, *Flora Aegyptiaco-Arabica* 95, 127. 1775, *Symbolae Botanicae, ...* 1: 31. 1790 and *Bull. Soc. Bot. Ital.* 1923, 115. 1923, *Flora Somala* 2: 131. 1932, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 33: 237–242. 1991, *Journal of Ethnopharmacology* 84(2–3): 279–287. 2003, *Journal of Ethnopharmacology* 91(1): 37–42. 2004, *Journal of Ethnopharmacology* 93: 43–49, 231–241. 2004, *Journal of Ethnopharmacology* 97: 327–336, 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006

(Masticatory, antidote, laxative, emetic. Bark stimulant, depressants, astringent, for stomach troubles, dropsy, swellings. Bark and leaves for pulmonary troubles and venereal diseases. Rootbark antiabortifacient.)

in English: mafura, roka

in Burkina Faso: kinkirs-taanga, soula-finzan

in Ivory Coast: soula fizan, zagblo kaha

in Nigeria: goron talaka, gwanja kusa, jan saiwa, jan saye (Hausa); asapa (Yoruba)

in Senegal: agla nigri, bu diènké, bu riet, bugiegé, dafi, ébôkudiâg, énanunul, faxen, ganesy hany, si falfébi, si falsi, ya lékov

in Yoruba: ogoudou

Trichilia gilgiana Harms (*Trichilia bipindeana* C. DC.; *Trichilia hylobia* Harms)

Tropical Africa, Nigeria, Congo. Tree, latex, inflorescence an axillary panicle, seeds black with red aril, seeds eaten by birds

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 161. 1896 and *Annuaire Conserv. Jard. Bot. Genève* x. 161. 1907, *Notizbl. Bot. Gart. Berlin-Dahlem* 7: 231. 1917, *African Study Monographs* 24(1–2): 1–168. 2003, *Antimicrobial Agents and Chemotherapy*

48(8): 3196–3199. 2004, *American Journal of Primatology* 68(1): 51–71. 2006

(The wood dust may cause irritation to the respiratory tracts and skin in wood workers. Bark analgesic, febrifuge, tonic and stimulant, to treat abdominal and chest pains.)

Trichilia gillettii De Wild.

Nigeria, Congo and Angola. Tree, white flowers

See *Ann. Mus. Congo Belge, Bot. sér. 5*, 1[1]: 50. 1903 [1903–1906 publ. Jun 1903]

(Bark febrifuge, purgative; seed oil emetic.)

in Cameroon: eyon

in Gabon: eyou

in Zaire: kanya

Trichilia glabra L. (*Acrilia sloanei* (Macfad.) Griseb.; *Moschoxylum cuneatum* Turcz.; *Moschoxylum emarginatum* Turcz.; *Moschoxylum odoratum* (Andrews) A. (Poisonous. Bark decoction abortifacient, astringent, emmenagogue, stimulant, sudorific, insecticide, flea repellent, used for colds, cough, sore, tumour, fever, administered as an enema to treat abdominal disorders, hemorrhoids. Crushed young leaves applied to syphilitic sores.)

in Cameroon: ebangbemva oswe, mayimbo

in Ivory Coast: banaye

in Nigeria: akika, olomi oyallo

Trichilia monadelpha (Thonn.) J.J. de Wilde (*Limonia monadelpha* Thonn.; *Trichilia acutifolia* A. Chev.; *Trichilia acutifoliata* A. Chev.; *Trichilia candollei* A. Chev.; *Trichilia*

heudelotii Planch. ex Oliv.; *Trichilia integrifilamenta* C. DC.; *Trichilia johannis* Harms)

Tropical Africa, Angola, Central African Republic, Guinea, Congo. Small tree, inflorescence an axillary panicle, greenish sweetly scented flowers, seed black with red aril, closely resembles *Trichilia djaloni* A. Chev. and *Trichilia ornithothena* J.J. de Wilde

See *Beskrivelse af Guineiske planter* 217. 1827, *Fl. Trop. Afr.* [Oliver et al.] 1: 334. 1868 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* x. 157. 1907, *Vég. Utiles Afrique Trop. Franç.* v. 213–214. 1909, *Notizbl. Bot. Gart. Berlin-Dahlem* 7: 231. 1917, *Acta Botanica Neerlandica* 14: 455. 1966, *Journal of Ethnopharmacology* 90(2): 221–227. 2004

(The sawdust may cause irritation to the respiratory tracts in wood workers. Stem, roots and leaves febrifuge, diuretic, aphrodisiac, cardiac. Bark analgesic, antiplasmodial, anthelmintic, applied to wounds, sores, skin diseases, yaws, lumbago and edema, to treat gastro-intestinal complaints; a decoction aphrodisiac, ecbolic and abortifacient, drunk for cough, gonorrhoea and syphilis. Leaf antibacterial, antifungal, a decoction taken to treat heart complaints; pounded leaves for gonorrhoea and lumbago. Roots astringent, aphrodisiac.)

in Central African Republic: mai'mbo, mayembo

in Congo: kinkuma, muheho

in Nigeria: agbigbon, akoledo, okawrere, olomi, ovalo, ovien-urhen; akika, ako ere olomi (Yoruba); oyallo (Edo); ovien urhaen (Sobo); agbigben (Jerki)

in Sierra Leone: njawae

in Yoruba: ako rere, awuya, owatete, rere, rereigbo

Trichilia ornithothena J.J. de Wilde (*Trichilia heudelotii* var. *zenkeri* (Harms) Aubrév.)

Sierra Leone, Liberia to Ghana. Small tree, close to *Trichilia monadelpha*

See *Meded. Landbouwhoogeschool Wageningen* 68(2): 122. 1968

(The sawdust may cause irritation to the respiratory tracts in wood workers. Fruits boiled in water eaten when people are sick. Bark analgesic, antiplasmodial, anthelmintic, applied to wounds, sores, skin diseases, yaws, to treat gastro-intestinal complaints; a decoction aphrodisiac and abortifacient, drunk for cough and syphilis. Leaf antibacterial, antifungal, a decoction taken to treat heart complaints; pounded leaves for gonorrhoea and lumbago. Roots astringent, aphrodisiac.)

in Liberia: djawohi

(Used for headache.)

Trichilia prieuriana A. Juss.

Tropical Africa, Senegal, Uganda Tanzania. Tree or shrub, variable, aromatic odor in crushed leaves and cut stem, inflorescence an axillary panicle, greenish white fragrant flowers, fleshy seed coat edible

See *Mém. Mus. Hist. Nat. Paris* 19: 276. 1830 and *Journal of Ethnopharmacology* 112: 55–70. 2007

(The wood dust may cause irritation to the respiratory tracts in wood workers. Bark aphrodisiac, antidote, febrifuge, to treat venereal diseases, gonorrhea, lumbago, rheumatism, fever, cough, constipation, poisoning. Leaf decoction drunk against anemia, applied as a bath against syphilis; powdered leaves taken to treat stomach spasms; stem with leaves for bronchitis. Leaves, bark and roots antiinflammatory, aphrodisiac, applied against arthritis, backache, rheumatism. Root and pounded leaves to treat gonorrhea; powdered roots purgative, anthelmintic, vermifuge. Veterinary medicine, crushed roots for diarrhea; bark for East Coast fever, anaplasmosis, chest pain.)

in English: monkey apple

in Benin: tchivi

in Central African Republic: iba'aka

in Ethiopia: anonu

in Ghana: aboya, kakadikro

in Ivory Coast: niolo, niorolo, oua, pakourou, wa

in Nigeria: awe, igogo, irere, odofin-igbo, urere; awe, enyiade, odapingbo, olajebane (Yoruba); atantan, eghogho, igogo (Edo)

in Tanzania: mbangamonga

in Uganda: lomaranetulelo

in W. Africa: dilifu

in Yoruba: awe, eyin eye, odofin igbo, odofin oko, oloja ebana
in Zaire: sabka

Trichilia retusa Oliv.

Sudan, Ethiopia, Congo. Shrub or small tree, broadly notched leaflets, fleshy seed coat said to be edible

See *Flora of Tropical Africa* [Oliver et al.] 1: 334. 1868

(Bark scrapings applied to swellings.)

in Nigeria: owo (Aguleri); nyamenyok (Boki)

Trichilia rubescens Oliv. (*Trichilia batesii* C. DC.; *Trichilia derumieri* De Wild.; *Trichilia heudelotii* Planch. ex Oliv.; *Trichilia laurentii* De Wild.; *Trichilia oddoni* De Wild.; *Trichilia papillosa* Pierre ex A. Chevalier; *Trichilia prieuriana* A. Juss.)

Tropical Africa, Uganda, Tanzania. Shrub or small tree, evergreen, well-developed crown, trunk fluted, bole often crooked, slash slightly pink, flowers yellowish, calyx brown, fruits light purplish-white splitting, seeds shiny brown to black with orange aril covering half the seed, galled fruits, fleshy seed coat as famine food, in lowland and submontane rainforest, in understory of rain forest, forest edge

See *Bulletin des sciences naturelles et de géologie* 23: 238. Nov. 1830, *Mém. Mus. Hist. Nat. Paris* 19: 276. 1830, *Flora of Tropical Africa* [Oliver et al.] 1: 334, 336. 1868

(Leaves antiparasitic, antimalarial, for venereal diseases, gonorrhea. Root decoctions anthelmintic and abortifacient, applied to treat colic. Bark laxative, expectorant, used for cough, pulmonary problems, bronchitis, stomachache, stomach troubles, diarrhea, dizziness, insanity and sexual impotence; decoction to treat constipation and abdominal complaints. Bark for making arrow poison.)

in Central African Republic: maiimbo, mavimbo, mombo-mbo, ouya

in Congo: ngbongbo, ngongbo

in Sierra Leone: an thapor, njawie

Trichilia spinosa Willd.

India.

See *Sp. Pl.*, ed. 4 [Willdenow] 2(1): 554. 1799

(Used in Sidha.)

in India: cat korundoo unnay

Trichilia tessmannii Harms (*Trichilia lanata* A. Chev.; *Trichilia lancei* Vermoesen; *Trichilia le-testui* Pellegr.; *Trichilia letestui* Pellegr.; *Trichilia mildbraedii* Harms; *Trichilia montchali* De Wild.; *Trichilia montchalii* De Wild.)

Tropical Africa, Angola, Central African Republic, Guinea, Congo. Tree, straight cylindrical bole, reddish brown flaking bark, white flowers, cooked fruits eaten

See *Bot. Jahrb. Syst.* xlvii. 162. 1911, *Bull. Soc. Bot. France* 58(Mém. 8d): 145. 1912 [1911 publ. 1912], *Bulletin du Jardin Botanique de l'État* 4: 378. 1914, *Notizbl. Bot. Gart. Berlin-Dahlem* 7: 232. 1917, *Rev. Zool. Bot. Africaines* x. Suppl. Bot. 40, 43. 1922, *Notul. Syst.* (Paris) 9: 20. 1940

(Bark purgative, to treat stomachache and as a purgative.)

in Cameroon: lebona, lobona, mayimbonagbanga, nom oswe

in Central African Republic: kpom

in Congo: tobla

in Ivory Coast: aribanda, ndia, bohia, dandi

in Nigeria: aje, iseko, ogiovalo, ogiovallo; ogiovalo (Edo); ubenwenwe (Igbo)

in Yoruba: aje, alaje, iseko, isinko

in Zaire: mboloto

Trichocereus (A. Berger) Riccob. Cactaceae

From the Greek *thrix*, *trichos* 'hair' plus *cereus*, see *Annual Report of the Missouri Botanical Garden* 16: 73, t. 8, f. 1–3. 1905, *Bollettino Reale Orto Botanico e Giardino Coloniale di Palermo* 8: 236. 1909.

Trichocereus macrogonus (Salm-Dyck) Riccob. (*Echinopsis macrogona* (Salm-Dyck) Friedrich & G.D. Rowley)

South America.

See *Cactaeae in Horto Dyckensi Cultae* 203. 1849[1850] and *Bollettino Reale Orto Botanico e Giardino Coloniale di Palermo* 8: 236. 1909, *International Organization for Succulent Plant Study Bulletin* 3(3): 96. 1974

(Mescaline.)

Trichocereus terscheckii (Parm. ex Pfeiff.) Britton & Rose (*Cereus terscheckii* Parm. ex Pfeiff.; *Echinopsis terscheckii* (Parm. ex Pfeiff.) Friedrich & G.D. Rowley; *Pilocereus terschenckii* (Parm. ex Pfeiff.) Rumpler ex Pfeiff.)

South America.

See *Allgemeine Gartenzeitung* 5: 370. 1837, *Handbuch der Cacteenkunde* 688. 1885 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family 2: 140–141, f. 203–204. 1920

(Mescaline.)

Trichocereus werdermannianus Backeb. (*Echinopsis werdermanniana* (Backeb.) Friedrich & G.D. Rowley)

South America.

See *Kaktus-ABC* 206, 412. 1935, *International Organization for Succulent Plant Study Bulletin* 3(3): 99. 1974, *Ecología en Bolivia* 34: 45–70. 2000

(Mescaline.)

Trichocladus Pers. Hamamelidaceae

From the Greek *thrix*, *trichos* 'hair' and *klados* 'branch', see *Icones et Descriptiones Plantarum*, quae aut sponte ... 1(3): 56–57. 1791, *Skrifter af Naturhistorie-Selskabet* 2(1): 133. 1792, *Synopsis Plantarum* (Persoon) 2(2): 597. 1807.

Trichocladus ellipticus Eckl. & Zeyh.

Tropical Africa. Shrub or small tree, many-branched, green-yellow flowers

See *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 3: 356. 1837

(Stem bark laxative, antiinflammatory, for indigestion.)

in English: Natal hazel, white hazel

in Southern Africa: onderbos, withaselaar; umGqonci (Zulu); umVa wenyathi, umGqonci (Xhosa)

in Tanzania: muhebeti dume

Trichodesma R. Br. Boraginaceae

Greek *thrix*, *trichos* 'hair' and *desmos* 'a bond, band', referring to the anthers, see *Prodromus Florae Novae Hollandiae* 496. 1810 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(352–354): 81. 1914.

Trichodesma africanum (L.) Lehm. (*Boraginella africana* (L.) Kuntze; *Borago africana* L.; *Borraginoides aculeata* Moench; *Borraginoides africana* (L.) Hiern; *Friedrichsthalia schimperi* Bunge; *Pollichia africana* (L.) Medik.; *Trichodesma africanum* R. Br.; *Trichodesma africanum* (L.) Sm.; *Trichodesma africanum* (L.) R. Br.; *Trichodesma africanum* (L.) Lehm. subsp. *gracile* (Batt.) Le Houér.; *Trichodesma fruticosum* Maire; *Trichodesma giganteum* Quézel; *Trichodesma gracile* Batt. & Trab.)

Ethiopia, India and Afghanistan. Herb, many-branched, stem with rigid tubercle-based prickles, leaves simple and entire, inflorescence a lax terminal or axillary cyme, corolla blue, ovoid smooth brown nutlets, fodder for camels, dry grassland, sandy desert plains, stony wadis

See *Species Plantarum* 1: 137–138. 1753, *Botanische Beobachtungen des Jahres 1783* 248. 1784, *Prodromus Florae Novae Hollandiae* 496. 1810, *The cyclopædia*; or, Universal dictionary of arts, sciences, and literature 36: no. 2. 1817, *Plantae e Familiae Asperifoliarum Nuciferae* 195. 1818, *Revisio Generum Plantarum* 2: 435. 1891, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853--61* 1: 721. 1898

(Leaves decoction diuretic, emollient, antipyretic and anti-inflammatory, used to relieve lung congestion, fevers, pain in the chest and to treat diarrhea. A roots infusion to treat hepatitis. Alkaloids and saponins.)

in Pakistan: charmeng

Trichodesma ambacense Welw. (*Boraginella ambacensis* (Welw.) Kuntze; *Trichodesma hockii* De Wild.)

East and southern Africa. Herb, erect, inflorescence terminal, corolla tube white or cream, single discoid nutlet, in grassland and woodland

See *Revisio Generum Plantarum* 2: 435. 1891 and *Kew Bulletin* 37: 446. 1982

(Woody rhizome applied to incisions made in the skin to treat backache, headache, painful swellings and syphilitic swelling of glands; powdered rhizome taken orally to cure bilharzia. Infusion drunk to dilate the birth canal.)

Trichodesma angustifolium Harv. (*Trichodesma lanceolatum* Schinz)

Namibia, Botswana, Mozambique and South Africa.

See *Verh. Bot. Ver. Brand.* xxx. (1888) 269. 1888

(The pulverized root applied to wounds.)

Trichodesma indicum (L.) Lehm. (*Borago indica* L.; *Trichodesma amplexicaule* Roth; *Trichodesma indicum* DC.; *Trichodesma indicum* R.Br.; *Trichodesma indicum* (L.) R.Br.; *Trichodesma indicum* (L.) Sm.; *Trichodesma indicum* (L.) Lehm. var. *amplexicaule* (Roth) T. Cooke)

Tropical Asia. Herb, erect, procumbent, glandular hairy, leaves stem clasping, flowers blue or white, in grassland, waste localities and coconut fields

See *Species Plantarum* 1: 137–138. 1753, *Prodromus Florae Novae Hollandiae* 496. 1810, *Cyclopaedia*. (Rees) 36: *Trichodesma* no. 1. 1817, Lehmann, Johann Georg Christian (1792–1860), *Plantae e Familiae Asperifoliarum Nuciferae* 193. Berolini, 1818, *Prodr.* (DC.) 10: 172. 1846

(Used in Ayurveda and Sidha. Plant decoction abortifacient, brain tonic, diuretic, febrifuge, cooling, useful for cough; green plants crushed and the paste massaged on the joints for arthritis. Fresh leaves juice applied for eczema; leaves ground and taken in giddiness during summer; leaves and flowers for healing of wounds; leaves poultice applied in joint pain. Root paste to reduce swellings in joints, also applied on superficial injuries of skin; pounded root with water given to stop dysentery in children, also prescribed for the expulsion of dead foetus; roots ground in water drunk as an antidote for snakebites. Flowers used as a sudorific, diuretic and pectoral, as a substitute for *Borago officinalis*. Veterinary medicine, branches tied on the neck of cattle for curing wounds.)

in India: adhahpushpi, adhahpuspi, adhahpushpi, adho mukhi, adhomukha, adhomukhi, agiyakhod, alukaimatu, alukaimatucceti, andhahuli, andhahuli chotta-kulpha, andhaka, andhahpushpi, andhahpuspi, aramai, aramaicceti, arampai, aronikkapali, athomukhi, atomuki, atumpai, atumpaicceti, avakpushpi, avakpuspi, cattiram, celaiyutaittal, chhota kulpha, chhota kulpha, chhotakulpha, chhotaphulya, chotakulpha, chotakulpha, cinkimataluval, cutapasananakatti, darvika, dhenujivha, ekinattumpai, enkanecani, gaavoja,

Trichodesma indicum (L.) Lehm. var. ***amplexicaule*** (Roth) T. Cooke (*Trichodesma amplexicaule* Roth)

India.

See *Nov. Sp. Pl.* 104. 1821 and *The Flora of the Presidency of Bombay* 2: 281. 1967

(Leaves used in dysmenorrhea. Root paste applied on skin injuries.)

Trichodesma physaloides (Fenzl) A. DC. (*Friedrichsthalia physaloides* Fenzl; *Trichodesma physaloides* Hutch. & Dalziel)

Zimbabwe, Malawi, Congo, Tanzania. Herbaceous, woody base, large underground root, pendent white flowers

See *Nov. Stirp. Decades* 53. 1839, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 173. 1846 and *Flora of West Tropical Africa* ed. 1 2: 200. 1931

(Toxic alkaloid. Woody rootstock used in a paste to treat wounds, the powdered rootstock mixed with beer or porridge as an aphrodisiac. Leaves rubbed to treat lumbago. Veterinary medicine, an infusion made of the peduncles given to calves for diarrhea.)

Trichodesma zeylanicum (Burm.f.) R. Br. (*Boraginella zeylanica* (Burm.f.) Kuntze; *Borago zeylanica* Burm.f.; *Boraginoides zeylanica* (Burm. f.) Hiern; *Leiocarya kotschyana* Hochst.; *Pollichia zeylanica* (Burm.f.) F. Muell.; *Trichodesma zeylanicum* forma *longifolium* Brand)

Tropics and subtropics of the Old World. Erect herb, many-branched, rough and hairy, root a taproot, woody based, leaves opposite near base of plant, pale blue to white flowers borne on long stalks from the leaf axils to form a loose panicle, petals fused in a bell shape, shiny grey-brown

nutlets, 5-lobed hairy calyx swelling around the fruit, young leaves and shoots cooked and eaten, camel fodder, flowers a source of bee forage, troublesome weed, cultivated areas, in disturbed dry bushland, disturbed ground, well-drained and marshy areas, grasslands

See *Species Plantarum* 1: 137–138. 1753, *Flora Indica* ... nec non Prodrumus Florae Capensis 41. 1768, *Prodromus Florae Novae Hollandiae* 496. 1810, *Plantae e Familiae Asperifoliarum Nuciferae* 193. 1818, *Systematic census of Australian plants* ... 100. 1882, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 720. 1898 and *Taxon* 24: 501–516. 1975

(Used in Ayurveda and Sidha. Pyrrolizidine alkaloids can cause fatal liver conditions and serious long-term toxic effects, poisoning of livestock. Plant decoction febrifuge, analgesic, wound healing, diuretic, astringent, against fever, dysentery, snakebite, scorpion bite. Flowers sudorific, pectoral. Roots infusion a remedy for tuberculosis, stomachache, poisoning and snakebite; paste of tuberous roots for curing boils. Green leaves and roots chewed and used as a poultice for fresh wounds, boils and snakebite. Irritating hairs.)

in English: camel bush, cattle bush, Ceylon borage, Kuenstler bush, late weed, water bush

in India: ambusirishika, dhadhona, dhindhinika, durbala, eramundi, ethina naalige gida, gaaya maari, hetemuria, jalashirasi, jalasirasa, jhingi, jhingini, kalutaikkali, ondhikulai, pedda gurragutti, sirishika

in Philippines: dilang-usa, mabulo

in East Africa: eileili, machacha, magundulu, nyalak-dede

in Tanzania: ilimi-lya-ng'ombe, inyankumbi, iwasha, mam-bamlele, msasa mlanda, sesemlanda, thaki

Tricholepis DC. Asteraceae

Greek *thrix*, *trichos* 'hair' and *lepis*, *lepidos* 'scale', see *Archives de Botanique* 2: 515. 1833.

Tricholepis glaberrima DC.

India.

See *Taxon* 28: 401–402. 1979

(For sore throat, inflammation, contact therapy, stem pieces with *Phyllocephalum phyllolaenum* stem pieces tied around the neck. Root paste antidote, against snakebites. Powdered plant for the treatment of leprosy. Veterinary medicine, whole plant crushed to treat abdominal distention and diarrhea.)

in India: brahmadandi, tilkatta, utateri

Trichomanes L. Hymenophyllaceae

Greek *trichomanes*, ancient name applied by Theophrastus (*HP*. 7.14.1) and Dioscorides to a fern, bristle or kidney fern;

Latin *trichomanes*, is used by Plinius for a plant resembling *adiantum*; see Carl Linnaeus, *Species Plantarum*. 1097. 1753 and *Genera Plantarum*. Ed. 5. 485. 1754 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 653–654. Basel 1996.

Trichomanes elegans Rich. (*Davalliopsis elegans* (Rich.) Copel.)

French Guiana.

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 114. 1792 and *Philippine Journal of Science* 67(1): 82. 1938

(Used to treat snakebite.)

Trichosanthes L. Cucurbitaceae

Greek *thrix*, *trichos* and *anthos* 'a flower', referring to the fringed corolla; see Carl Linnaeus, *Species Plantarum*. 2: 1008. 1753, *Genera Plantarum*. Ed. 5. 439. 1754 and *Ceylon J. Sci., Biol. Sci.* 24(1): 17–22. 1995, *J. Cytol. Genet.* 31(1): 65–71. 1996.

Trichosanthes anguina L. (*Cucumis anguina* L.; *Trichosanthes cucumerina* L. var. *anguina* (L.) Haines)

China. Used as vegetable

See *Nov. Pl. Gen.* pl. 9. 1729, *Species Plantarum* 2: 1008. 1753, *Systema Naturae*, Editio Decima 1279. 1759, *Helios* 11(9): 133. 1893 and *The Botany of Bihar and Orissa* 388. 1922

(Used in Ayurveda. Leaf latex applied to snakebite. Root and seed used for the treatment of diarrhea, for expelling worms; dried powdered seeds against intestinal worms; crushed seeds for the treatment of intestinal disorders and intestinal worms. Fruits for jaundice, skin diseases, burning sensation and abdominal gases.)

in English: snake gourd, West Indies gherkin

in China: she gua

in India: be-rul, berul, chachinda, chichinda, chichinga, chirvite, puttikai, takmak

Trichosanthes cordata Roxb. (*Involucraria cordata* (Roxburgh) Roemer; *Trichosanthes microsiphon* Kurz)

China. Climbing herb

See *Flora Indica*; or, descriptions of Indian Plants 3: 703–704. 1832, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 97. 1846, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 308. 1872

(Dried flowers given as stimulant. Fruits for coughs, jaundice; fruits and seeds antitussive and expectorant; seeds for coughs and constipation. Roots contraceptive, tonic and oxytoxic, dried and powdered given in enlargement of the spleen and liver; fresh root mixed with oil applied for leprosy.)

in China: xin ye gua lou

in India: bhakhumba, bhumikumara

Trichosanthes cucumerina L. (*Trichosanthes brevibracteata* Kundu; *Trichosanthes cucumerina* Thunb.; *Trichosanthes cucumerina* Wall.; *Trichosanthes cucumerina* Miq.; *Trichosanthes cucumerina* Buch.-Ham. ex Wall.; *Trichosanthes pachyrrhachis* Kundu)

Asia, India. Herb, spreading, climbing, tendril 3-fid, lobed leaves, white flowers with fimbriate petals, female flowers solitary, beaked yellow flowers, tender fruits used as vegetable

See *Species Plantarum* 2: 1008. 1753, *Fl. Jap.* (Thunberg) 332. 1784, *Numer. List* [Wallich] n. 6688 B, 6690 E. 1832, *FBI* 2: 609. 1879 and *Journal of Botany, British and Foreign* 77(10): 9. 1939, *Journal of the Bombay Natural History Society* 43: 373, t. 2. 1942, *Acta Bot. Yunnan.* 16(1): 95–96. 1994, *J. Cytol. Genet.* 31(1): 65–71. 1996

(Used in Ayurveda and Sidha. Plants cardiac tonic, alterative, antipyretic, febrifuge, useful in fever, intestinal worm, skin diseases, menstrual problems. Powder from the dried whole plant taken to treat poisonous bites. Leaves emetic, dry powdered leaves used as snuff in headache and in fever; warm leaf juice applied on skin diseases; leaves poultice rubbed on rheumatic pain; rhizome juice of *Curcuma longa* with leaf juice of *Trichosanthes cucumerina* applied in smallpox. Stem, leaves and seeds in boils, intestinal worms, fever, indigestion, diarrhea; leaves and stems as decoction used in biliousness, skin diseases and as emmenagogue. Fruits purgative, bitter, laxative, cooling, for stomachache and asthma; dry powdered fruits given in stomach trouble; mucilaginous exudate from the ripe fruit streaked on forehead for headache. Roots, fruit and seeds to treat heart disease; roots to hasten parturition and to treat ectopic pregnancy, headache and bronchitis; roots for stomach troubles and bowel complaints; roots juice given in difficult urination and used as cathartic; root of this plant and that of *Cynoglossum glochidiatum* powdered and given for impotence. Seeds antipyretic, anthelmintic, stomachic, hypoglycemic. Veterinary medicine, seed paste applied over hoofrot.)

in English: club gourd, serpent cucumber, serpent gourd, snake gourd, viper's gourd

in French Guiana: anguine amère

in China: gua ye gua lou

in India: amritaphala, banpatal, banpotol, bijagarbha, bonchichinga, cicindah, jangali chichinda, jangli chachinda, jangli-chichonda, jvaranashana, jyotsna, kachhughni, kachhura, kadupatola, kakrilahara, karkasacchadah, karkashachhada, karkashadala, kasabhanjanpatola, kasamaradana, katuka, katupatola, katuphala, kulaja, kulaka, kulakah, kushtari, kushthaha, lataphala, nagaphala, padaaval, padual, pancharajiphala, panduka, panduphala, panjura, patala, patola, patolah (= spreading), patolam, patri, peyppudal, pratika, rajapatola, rajimana, rajiphala, rambel, ranachapadavali, ranpadavala, rihau, svadupatolah, tiktabhadra, tiktaka, tiktotama, uttundiki, vajimana, varatikta

Malayan name: ketola ular

in Pakistan: jangli chachinda

Trichosanthes cucumeroides (Ser.) Maxim. (*Bryonia cucumeroides* Ser.)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 308. 1828, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 1(1): 172. 1873

(Roots for amenorrhea, burns, constipation, dysentery and jaundice. Fruits for jaundice, amenorrhea, laryngitis, pharyngitis; seeds for dysentery and jaundice.)

Trichosanthes cuspidata Lam.

Malay Peninsula.

See *Encycl.* (Lamarck) 1(1): 188. 1783

Leaves poulticed for jaundice, skin diseases, constipation.)

Malay name: akar suntu

Trichosanthes dioica Roxb.

India. Dioecious perennial climber, woolly and hispid, male flowers often paired, seeds compressed, fruit cooked as vegetable, whole plant cooked as a bitter vegetable

See *Flora Indica*; or, descriptions of Indian Plants 3: 701. 1832

(Intake of root causes fatal poisoning, powder of roots may be used for killing wild animals. Fruits laxative. Root, leaf and fruit in fever, leprosy, dropsy, bilious disorders, jaundice, skin diseases, constipation, indigestion, loss of appetite.)

in India: kombuppudalai, kummupotla, parval, parwal, patala, patol

in Pakistan: palwal, parol, parwar, petal

Trichosanthes hylonoma Hand.-Mazz. (*Trichosanthes leishanensis* C.Y. Cheng & C.H. Yueh)

China.

See *Symbolae Sinicae* 7(4): 1066. 1936, *Acta Phytotaxonomica Sinica* 18(3): 342–343, pl. 5, f. 4; pl. 6, f. 8, 21. 1980

(Fruits for coughs, jaundice, swollen joints; fruits and seeds antitussive and expectorant.)

Trichosanthes jinggangshanica Yueh

China.

See *Acta Phytotax. Sin.* 18(3): 342. 1980

(Fruits for coughs, jaundice, swollen joints; fruits and seeds antitussive and expectorant. Roots and fruits used as *tianhua-fen* and *gua-lou*.)

in China: jing gang gua lou

Trichosanthes kirilowii Maxim. (*Trichosanthes obtusiloba* C.Y. Wu)

China.

See *Primitiae Florae Amurensis* 482. 1859 and *Acta Phytotaxonomica Sinica* 12(4): 431–432, pl. 84, f. 2, pl. 88, f. 32. 1974

(Fruits for coughs, jaundice, swollen joints, viral infections and tumours; fruits and seeds antitussive and expectorant; seeds for coughs, lactation, carbuncle and constipation. Roots contraceptive and oxytoxic.)

in English: Mongolian snake gourd, snakegourd

in China: gua lou, kua lou

Trichosanthes laceribractea Hayata (*Trichosanthes hupehensis* C.Y. Cheng & C.H. Yueh; *Trichosanthes koshunensis* Hayata; *Trichosanthes punctata* Hayata; *Trichosanthes schizostroma* Hayata; *Trichosanthes shikokiana* Makino; *Trichosanthes sinopunctata* C.Y. Cheng & C.H. Yueh)

China.

See *Systema Naturae*, Editio Decima 2: 1278. 1759, *Flora Indica*; or, descriptions of Indian Plants 3: 704–705. 1832, *Botanical Magazine* 6: 54. 1892 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 117–118. 1911, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 10: 10, 13. 1921, *Acta Phytotaxonomica Sinica* 12(4): 437–440, pl. 85, f. 4, pl. 86, f. 2, pl. 88, f. 33. 1974

(Fruits for coughs, jaundice, swollen joints; fruits and seeds antitussive and expectorant.)

Trichosanthes lepiniana (Naudin) Cogn. (*Involucraria lepiniana* Naudin; *Trichosanthes lepiniana* Cogn.)

India, Nepal. Climbers, violet striped petals

See *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 3(1): 25, 27, t. 5. 1825, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 377. 1881 and *Acta Botanica Yunnanica* 16(1): 95–96. 1994

(Fruits and seeds antitussive and expectorant; seeds for coughs, mouth ulcers, lactation, carbuncle and constipation; seed oil applied externally for itches and skin diseases. Root decoction orally against food poison and applied as an antiseptic.)

in English: gourd

in India: indreni lahra

in Nepal: indreni

Trichosanthes ovigera Blume (*Trichosanthes chingiana* Hand.-Mazz.; *Trichosanthes himalensis* C.B. Clarke; *Trichosanthes himalensis* var. *indivisa* Chakr.; *Trichosanthes ovigera* var. *sikkimensis* Kundu; *Trichosanthes rostrata* Kitam.)

SE Asia, China, Sikkim.

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 934. 1826, *The Flora of British India* 2(6): 608. 1879 and *Sinensia* 7: 621. 1936, *Acta Phytotaxonomica et Geobotanica* 5(3): 210–211. 1936, *Journal of the Bombay Natural History Society* 43: 382. 1943, *Records of the Botanical Survey of India* 17(1): 51. 1959

(Roots for treatment of nephritis and bone fracture. Fruits and seeds antitussive and expectorant; seeds for coughs, mouth ulcers, lactation, carbuncle and constipation.)

Trichosanthes quinquangulata A. Gray

Philippines.

See *United States Exploring Expedition, Phan.* 1: 645. 1854

(Powdered seeds taken for stomachache; oil from seeds applied to cure itches.)

in Philippines: kabalonga, katimbau, patola-si-gaiang, tabaubatbau, tabugok, timon-timon

Trichosanthes rosthornii Harms

China.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(5): 603–604. 1901

(Dried rind to treat constipation, carbuncle and pharynx pain. Fruits and seeds antitussive and expectorant; seeds for coughs, mouth ulcers, lactation, carbuncle and constipation. The roots and fruits are used medicinally as *tian-hua-fen* and *gua-lou*.)

in China: zhong hua gua lou

Trichosanthes tricuspidata Lour. (*Modecca bracteata* Lam.; *Trichosanthes bracteata* Voigt; *Trichosanthes bracteata* (Lam.) Voigt; *Trichosanthes palmata* Benth.; *Trichosanthes palmata* L.; *Trichosanthes palmata* Hance; *Trichosanthes palmata* Roxb., nom. illeg.; *Trichosanthes palmata* Wall. & Roxb.; *Trichosanthes palmata* Wall.; *Trichosanthes pubera* Blume)

SE Asia, India, China. Large liana, creeper, woody climber, branched tendrils, solitary white axillary flowers, male flowers in axillary racemes, female flowers solitary, red fruits with orange stripes when ripe, fermented crushed fruit eaten as a seasoning

See *Systema Naturae*, Editio Decima 2: 1278. 1759, *Flora Cochinchinensis* 2: 589. 1790, *Encyclopédie Méthodique, Botanique* (Lamarck) 4(1): 208, 210. 1797, *Hort. Bengal.* 70. 1814, *Bijdragen tot de flora van Nederlandsch Indië* 15: 936. 1826, *Numer. List* [Wallich] n. 6688. 1832, *Flora Indica*; or, descriptions of Indian Plants (ed. Carey) 3: 704–705. 1832, *Hortus Suburbanus Calcuttensis* 58. 1845, *Fl. Austral.* 3: 315. 1867, *J. Bot.* 16: 227. 1878 and *Acta Phytotaxonomica Sinica* 12(4): 439–440, t. 86. 1974

(Root has violent purgative properties, used as a cattle poison. Fruit a violent cathartic, considered poisonous, mixed

with rice employed to destroy crows; fruits edible, if the vegetative parts are eaten the result is a severe stomachache and vomiting. Roots contraceptive and oxytoxic, root powder mixed with water given for fever; roots paste applied to snakebite, to swelling of the breast, in painful and difficult lactation, also rubbed on the swollen legs of pregnant woman; root decoction given in fever, dysentery and rheumatism. Roots and seeds extract given for expelling worms and for treating diarrhea and syphilis. Fruits bitter, carminative, purgative, abortifacient, for coughs, jaundice, swollen joints, leprosy, rheumatism, inflammation, epilepsy; fruits and seeds antitussive and expectorant. Seeds emetic and purgative, for coughs, lactation, carbuncle and constipation; dried seeds powder emetic and taken in snakebite. Leaf paste applied to burns; leaves and stem crushed and applied as a poultice to treat sores caused by stinging insects; tender leaves decoction taken for bleeding dysentery. Veterinary medicine, in lung diseases of cattle; fruit given to cattle to start menstrual discharge.)

in English: snake gourd

in India: ilaaru, indrain, indrayani, janni kovai, kaakka koththi pazham, kagemari balli, lal indrayan, marang, mezurongmoli, narikkovai, rata indramana, rata indrana, vishala

in Indonesia: aka kuwik

in Japan: ô-karasu-uri

Malayan names: akar ketomenan, ketola ular, suntoh

Trichosanthes truncata C.B. Clarke

Sikkim.

See *The Flora of British India* 2(6): 608. 1879

(Fruits for coughs, jaundice, swollen joints; fruits and seeds antitussive and expectorant; seeds for coughs, lactation, carbuncle and constipation.)

Trichosanthes villosa Blume

SE Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 934. 1826

(Fruits and leaves cooked and eaten as a tonic.)

Trichosanthes wallichiana (Ser.) Wight (*Involucraria wallichiana* Ser.; *Trichosanthes grandibracteata* Kurz; *Trichosanthes palmata* var. *scotantus* C.B. Clarke; *Trichosanthes wallichiana* Wight)

India. Jungle vine, deep crimson fruits, bitter inedible gourd

See *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 3(1): 31, pl. 5. 1825, *Madras Journal of Literature and Science* 12: 52. 1840, *Ann. Mag. Nat. Hist.* 8: 270, 1842, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 98. 1877, *The Flora of British India* 2(6): 607. 1879 and *Symbolae Sinicae* 7(4): 1065. 1936

(Poisonous fruits used for killing monkeys. Roots and seeds for ulcers, tumours. Miscarriage, leaves applied upon the abdomen. Fruits used for headache.)

in India: muzum-tong

Malay names: jari buaya, men timum dendang, pedendang

Trichoscypha Hook.f. Anacardiaceae

From the Greek *thrix*, *trichos* and *skyphos* 'a cup, goblet', referring to the disc, see *Genera Nova Madagascariensia* 23. 1806, *Florae Senegambiae Tentamen* 148. 1831, *Genera Plantarum* [Bentham & Hooker f.] 1(1): 423. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 22. 1899 and *Adansonia*, sér. 3, 23(2): 247–264. 2001.

Trichoscypha acuminata Engl. (*Schubea heterophylla* Pax; *Sorindeia mannii* Oliv.; *Trichoscypha braunii* Engl.; *Trichoscypha buettneri* Engl.; *Trichoscypha congoensis* Engler ex De Wilde; *Trichoscypha ferruginea* Engl.)

Tropical Africa.

See *Flora of Tropical Africa* 1: 442. 1868, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 425. 1881, *Bot. Jahrb. Syst.* xv. (1892) 111–113, f. A-D, t. 4. 1892, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 23. 1899 and *Ann. Mus. Congo Belge, Bot.* sér. 5, 1[3]: 283, nomen. 1906 [1903–1906 publ. Jan 1906]

(Diaphoretic. Magic.)

in Cameroon: abut, amvut, ekong, levboda, ndoi, ngoyo

in Central Africa: abambe, avbambe

in Congo: seng

in Gabon: amvut

Trichoscypha longifolia (Hook.f.) Engl. (*Dupuisia longifolia* Hook.f.; *Dupuisia longifolius* Hook.f.; *Sorindeia longifolia* Oliv.; *Sorindeia longifolia* (Hook.f.) Oliv.; *Trichoscypha longifolia* Engl.)

Sierra Leone and Liberia. Tree, evergreen, dioecious, clear sticky pungent resin, inflorescence a lax panicle

See *Niger Flora* [W.J. Hooker]. 287. 1849, *Flora of Tropical Africa* [Oliver et al.] 1: 442. 1868, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(4): 425. 1881

(Bark decoction antiseptic, a wash for sores and wounds. Leaves applied to heal ulcers.)

Trichoscypha patens (Oliv.) Engl. (*Sorindeia patens* Oliv.; *Trichoscypha paniculata* Engl.; *Trichoscypha patens* Engl.; *Trichoscypha victoriae* Engl.)

Tropical Africa.

See *Flora of Tropical Africa* [Oliver et al.] 1: 441. 1868, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(4): 425. 1881 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 224. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 413. 1909, *Adansonia* sér. 3 26(1): 122. 2004

(For skin diseases, rubefacient, astringent.)

Trichostema L. Lamiaceae (Labiatae)

Greek *thrix*, *trichos* 'hair' and *stema* 'stamen', see *Species Plantarum* 2: 598. 1753.

Trichostema lanatum Benth. (*Trichostema lanatum* var. *denudatum* A. Gray)

North America.

See *Labiatarum Genera et Species* 659–660. 1835, *Syn. Fl. N. Amer.* 2(1): 459. 1886

(For skin diseases.)

in English: bluecurls, woolly bluecurls

Trichostema lanceolatum Benth.

North America. Annual herb

See *Labiatarum Genera et Species*: 659. 1835

(Crushed fresh leaves used as a fish poison.)

in English: vinegar weed

Trichuriella Bennet Amaranthaceae

The diminutive of the genus *Trichurus*, from the Greek *thrix*, *trichos* 'hair' and *oura* 'tail'.

Trichuriella monsoniae (L.f.) Bennet (*Achyranthes monsoniae* (L.f.) Pers.; *Achyranthes setacea* Roth; *Aerva monsoniae* (L.f.) Mart.; *Celosia monsoniae* (L.f.) Retz.; *Illecebrum monsoniae* L.f.; *Trichurus monsoniae* (L.f.) C.C. Towns.)

India. Herbs, rose flowers in dense axillary spikes

See *Supplementum Plantarum* 161. 1781, *Obs.* 2: 13. 1781, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 13(1): 291. 1825 and *Kew Bulletin* 29(3): 466. 1974, *Indian Journal of Forestry* 8: 86. 1985

(Used in Sidha. Leaf juice in cholera.)

in China: zhen ye xian

in India: varapoola-chedi

Triclisia Benth. Menispermaceae

From the Greek *treis*, *tria* 'three' and *kleis* 'lock, key, bar', see *Genera Plantarum* 1: 39. 1862.

Triclisia patens Oliv.

West tropical Africa. Liane, climbing, leaves coriaceous with pale brown prominent venation, flowers yellow or orange, anthers yellow turning brown after pollination, fruit orange-yellow in bunches, fruits cauliflorous on old stems and in axils on newer growth, lowland rain-forest

See *Genera Plantarum* 1: 39. 1862 and *Flora of Tropical Africa* 1 1: 49. 1986

(Used to treat anemia and pains in the joints, edema, syphilitic sores, convulsions, spasm. Root febrifuge; root sap stimulant; roots and stem used in the treatment of pain in the waist.)

in Senegal: bu gongo

in Sierra Leone: arana, foklobe, ka, konkoferbe, mangombu, mangonibui, mbau, mondaka, na konko ferbe, ndawi

Triclisia sacleuxii (Pierre) Diels (*Pycnostylis sacleuxii* Pierre; *Triclisia sacleuxii* Diels)

Tanzania. Twining, liana, woody, corolla pale green-white-yellow

See *Bulletin Mensuel de la Société Linnéenne de Paris* n.s. 82. 1898 and *Das Pflanzenreich* (Engler) Menispermac. 94: 72. 1910

(Schistosomiasis and gonorrhea: root decoction drunk with *Steganotaenia araliacea* Hochst., *Carvalhoa macrophylla* K. Schum., *Euphorbia tirucalli* L., *Mucuna poggei* Taub.)

Tridax L. Asteraceae

Ancient name for another plant, from the Greek *tridaknos* 'thrice-bitten, eaten-in-three-bites'; Latin *thridax*, *acis* and Greek *thridax* 'a kind of wild lettuce'; Latin *tridacna* 'a kind of oysters'; see Carl Linnaeus, *Species Plantarum*. 900. 1753, *Genera Plantarum*. Ed. 5. 382. 1754 and *Brittonia* 17(1): 47–96. 1965, *Rhodora* 77: 171–195. 1975, *CIS Chromosome Inform. Serv.* 20: 32–33. 1976, *Amer. J. Bot.* 64: 791–798. 1977, *Taxon* 30: 78. 1981, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Compositae Newslett.* 27: 7–10. 1995, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 655. 1996, *Fl. Chiapas* 5: 1–232. 1999, *Nuev. Cat. Fl. Vas. Venezuela* 1–860. 2008.

Tridax procumbens L. (*Amellus pedunculatus* Ortega ex Willd., nom. inval.; *Balbisia canescens* Pers.; *Balbisia canescens* Rich. ex Pers.; *Balbisia divaricata* Cass.; *Balbisia elongata* Willd.; *Balbisia pedunculata* Ortega ex Hoffmanns., nom. illeg.; *Balbisia pedunculata* Hoffmanns.; *Chrysanthemum procumbens* Lour.; *Chrysanthemum procumbens* Sessé & Moc.; *Chrysanthemum procumbens* (L.)

Sessé & Moc., nom. illeg.; *Tridax procumbens* var. *canescens* (Pers.) DC.; *Tridax procumbens* L. var. *canescens* (Rich. ex Pers.) DC.; *Tridax procumbens* var. *ovatifolia* B.L. Rob. & Greenm.)

India, Mexico. Herb, weed, weak, straggling, procumbent or erect, trailing, hairy, hispid, solitary heads on erect hirsute glandular peduncles, ray florets white, disc florets yellow, very hairy silky pilose turbinate achenes, eaten by cattle, feed for rabbits

See *Species Plantarum* 2: 900. 1753, *Flora Cochinchinensis* 2: 499–500. 1790, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 2214. 1803, *Synopsis Plantarum* (Persoon) 2(2): 407. 1807, *Enum. Pl.* [Willdenow] 2: 916. 1809, *Verzeichniss der Pflanzenkulturen* 228. 1824, *Annales des Sciences Naturelles* (Paris) 23: 90. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 679. 1836, *Flora Mexicana* ed. 2 190. 1894 [1896], *Proceedings of the American Academy of Arts and Sciences* 32: 7. 1896 and *Flora de Venezuela* 10: 694. 1964

(Used in Ayurveda and Sidha. Astringent, antitrypanosomal, antibacterial, antimicrobial, antimycobacterial, antifungal, insecticidal, insect repellent, diuretic, hyglycemic, anti-inflammatory, wound healing. Paste of the plant used as ointment antiseptic on wounds, whitlow; whole plant laxative and astringent, used internally in the treatment of jaundice, spermatorrhea, fevers, coughs, general weakness; a paste taken in diarrhea; plant extract applied on cuts, piles and wounds; *Kleinia grandiflora* leaf juice mixed with *Tridax procumbens* plant juice applied for insect bite, itching. Crushed roots given in fever and skin diseases. Crushed leaves applied on scorpion sting, fresh cuts to check bleeding, wounds, piles; leaf paste applied to open sores; leaf extract aphrodisiac for male; fresh juice of leaves insecticide, stops bleeding, antiseptic in wounds, blisters and cuts, dropped in eye for conjunctivitis; fresh leaves chewed for toothache and dyspepsia. Veterinary medicine, leaf paste applied on the wounds as a styptic; leaf juice applied on fresh cuts and wounds. Leaves juice piscicide. Believed this plant as an analogue to the mythological medicinal plant *Bisalyakarani* of the epic *Ramayana*.)

in English: coat buttons, daisy, Mexican daisy, tridax daisy, wild daisy

in South Africa: aster

in Yoruba: iyo esin, aaragba

in India: addike gida, aekadaandee, atkat, balapaaku, bellamaku, bhuchapa, bichatigand, bisalyakarani, dagadi burad, dagadi-pala, dagadipala, dobhi, dools dondi, ekadandi, gaayapaaku, gabbu gida, gabbu sanna shaavanthi, gabbu sanna shavanti, gabbu shaavanthi, gaddichamanthi, ganthiyu, gayapaku, ghamra, gorkh-mundi, ilisppu, jayanti, kaachaghni, kalal, kaliya, kanphuli, kanphuliya, karibelli, kateri, kenattuppuntu, kottumani, kumra, kurdy, mamaji-re-topi, muriyan pachilai, nada murukana gida, netta gabbu, pabulaka-mocha, panaphad, pankando, pardeshi bhangro, pardesi

in Japan: kôto-buki-giku

in Malaysia: rumpit kanching baju

in Papua New Guinea: otikagena, poamepoame

in Central America: cadillo, chisaaca, curagusano, hierba de San Juan, hierba del toro, romerillo, San Juan del monte

Tridynamia Gagnepain Convolvulaceae

Greek *dynamis* ‘power, a store’, *tridynamos* ‘of three powers’, see *Notulae Systematicae*. *Herbier du Museum de Paris* 14: 26. 1950.

Tridynamia megalantha (Merrill) Staples (*Porana megalantha* Merrill; *Porana spectabilis* Kurz var. *megalantha* (Merrill) F.C. How ex H.S. Kiu)

China.

See *Lingnan Sci. J.* 14(1): 53–55, fig. 18. 1935, *Flora Hainanica* 3: 475, f. 867. 1974, *Novon* 3(2): 201. 1993

(Whole plant used for treatment of swelling, pain and severe fevers.)

in China: da hua san chi teng

Trientalis L. Primulaceae

Latin *trientalis*, *e* ‘that contains a third of a foot’, see *Species Plantarum* 1: 344. 1753.

Trientalis borealis Raf. (*Trientalis americana* Pursh; *Lysimachia borealis* (Raf.) U. Manns & Anderb.)

North America. Perennial herb

See *Species Plantarum* 1: 344. 1753, *Medical Repository*, ser. 2, 5: 354. 1808 and *Taxon* 31(2): 344–360. 1982, *Willdenowia* 39(1): 51. 2009, *Taxon* 59(3): 981. 2010

(Plant infusion for tuberculosis, tonic, stimulant.)

in English: maystar, starflower

Trientalis borealis Raf. subsp. *borealis*

North America. Perennial herb

See *Species Plantarum* 1: 344. 1753, *Medical Repository*, ser. 2, 5: 354. 1808 and *Taxon* 31(2): 344–360. 1982, *Willdenowia* 39(1): 51. 2009, *Taxon* 59(3): 981. 2010

(Plant infusion for tuberculosis, tonic, stimulant.)

in English: maystar, starflower

Trientalis borealis Raf. subsp. ***latifolia*** (Hook.) Hultén (*Trientalis europaea* L. var. *latifolia* (Hook.) Torr.; *Trientalis latifolia* Hook.)

North America. Perennial herb

See *Flora Boreali-Americana* 2(9): 121. 1838, *Pacif. Railr. Rep.* 4(5): 118. 1857, *Manual of the Botany of the Region of San Francisco Bay* ... 238. 1894 and *Arkiv för Botanik, Andra Serien* 7(1): 105. 1967[1968], *Kalmia* 12: 25. 1982

(Infusion of plant juice used as an eyewash.)

in English: broadleaf starflower

Trifolium L. Fabaceae (Trifolieae)

Latin *trifolium* 'three-leaved grass, trefoil' (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 764–773. 1753, *Genera Plantarum*. Ed. 5. 337. 1754, *Enumeratio Methodica Plantarum* 171. 1759, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 260. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 203. 1825, *Symbolae botanicae* ... (Presl) 1: 43, 46, 49–50. 1831, *Spicilegium florum rumelicarum et bithynicarum* ... 1(1): 31. 1843, *Oesterreichische Botanische Zeitschrift* 24: 41. 1874, *Nuovo Giornale Botanico Italiano* 15: 125, 220. 1883, *Flora Europae* 25: 341. 1891, *Mem. Reale Accad. Sci. Torino* ser. 2, 41: 197. 1891, *Mem. Acad. Sci. Torino*, ser. 2, 44: 233. 1894 and *Kew Bull.* 7: 367–404. 1952, *Notes from the Royal Botanic Garden, Edinburgh* 23: 438, 446, 459. 1961, *Botaničeskij Žurnal* (Moscow & Leningrad) 52: 1598. 1967.

Trifolium burchellianum Ser.

South Africa. Perennial non-climbing herb, small red flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 200. 1825 and *Taxon* 44: 183–191. 1995

(Blossom eaten as a sedative, hypotensive, blood purifier, also for heartburn and stomach cramps, colic.)

in English: Burchell's clover

in Lesotho: musa-pelo moroko

Trifolium dubium Sibth. (*Chrysaspis dubia* (Sibth.) E.H. Greene; *Chrysaspis dubia* (Sibth.) Desv.; *Trifolium filiforme* sensu auct.; *Trifolium filiforme* subsp. *dubium* (Sibth.) Gams; *Trifolium filiforme* var. *dubium* (Sibth.) Fiori & Paoletti; *Trifolium filiforme* var. *dubium* (Sibth.) Fiori; *Trifolium minus* Smith; *Trifolium parviflorum* Bunge ex Nyman, nom. illeg.; *Trifolium praticola* Sennen; *Trifolium procumbens* sensu auct.; *Trifolium procumbens* L., nom. ambig.)

Europe, North America. Annual non-climbing herb, forage, weed

See *Species Plantarum* 2: 772–773. 1753, *Flora Oxoniensis* 231. 1794, *Fl. Cantab.* (ed. 2) 290. 1802, *Pittonia* 3: 206. 1897 and *Flor. Ital.* 4: 140. 1907, *Genética Ibérica* 30–31: 129–160. 1979, *Opera Botanica* 137: 1–42. 1999

(To stop bleeding. Ceremonial, emetic.)

in English: cow hop clover, Irish shamrock, least hop clover, little hop clover, low hop clover, shamrock, small hop clover, suckling clover, yellow clover, yellow suckling clover

in China: huang shu cao

in South Africa: kleingeelklawer

Trifolium hybridum L. (*Amoria hybrida* (L.) C. Presl; *Trifolium elegans* Savi; *Trifolium hybridum* E.H.L. Krause; *Trifolium hybridum* Pollich; *Trifolium hybridum* Savi; *Trifolium hybridum* L. subsp. *elegans* (Savi) Asch. & Graebn.; *Trifolium hybridum* L. var. *elegans* (Savi) Boiss.; *Trifolium hybridum* var. *pratense* Rabenh.)

Cosmopolitan. Perennial non-climbing herb, honey plant

See *Species Plantarum* 2: 764–773. 1753, *Hist. Pl. Palat.* 2: 330. 1777, *Flora Pisana* 2: 90. 1798, *Symbolae botanicae* ... 1(3): 43, 47. 1831, *Fl. Lusit.* 1: 198. 1839, *Oesterreichische Botanische Zeitschrift* 24: 41. 1874, *Nuovo Giornale Botanico Italiano* 15: 125, 220. 1883 and *Fl. Deutschland* (Sturm - ed. 2) 9: 177. 1901, Fincher, M.G., Fuller, H.K. "Photosensitization - trifoliosis - light sensitization." *Cornell Vet.*, 32: 95–99. 1942, *Notes from the Royal Botanic Garden, Edinburgh* 23: 459. 1961, *New Zealand Journal of Botany* 18: 215–220. 1980, *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, Traub, J.L. et al. Pract.*, 63: 307–309. 1982, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Genética Ibérica* 35: 75–86. 1983, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1671–1673. 1989, *Annals of Botany* 64: 613–624. 1989, Nation, P.N. "Alsike clover poisoning: a review." *Can. Vet. J.*, 30: 410–415. 1989, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 118–120. 1990, *Studia Botanica, Universidad de Salamanca* 14: 103–128. 1996, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(Low toxicity. Cases of photosensitization have occurred, sometimes accompanied by liver damage and enlargement; this problem has occurred mostly in horses and occasionally in cattle; there is also a potential for nitrate poisoning. Plant infusion as a wash to increase milk flow. Veterinary medicine, plant infusion as a wash to increase milk flow.)

in English: Alsike clover (from Alsike near Uppsala), Swedish clover

in China: za zhong che zhou cao

Trifolium pratense L. (*Trifolium borysthenicum* Gruner; *Trifolium bracteatum* Schousb.; *Trifolium lenkoranicum* (Grossh.) Roskov; *Trifolium pratense* L. var. *frigidum* auct. non Gaudin; *Trifolium pratense* var. *lenkoranicum* Grossh.; *Trifolium pratense* var. *sativum* Schreb.; *Trifolium pratense* var. *sativum* (Mill.) Schreb.; *Trifolium ukrainicum* Opperman)

Europe and northern Asia. Perennial or biennial non-climbing herb, short, rounded flower heads, forage

See *Species Plantarum* 2: 764–773. 1753 and *Euphytica* 29: 441–450. 1980, *Boletim da Sociedade Broteriana* 53: 885–887. 1981, *Acta Biologica Cracoviensia, Series Botanica* 24: 113–126, 159–189. 1982, *Taxon* 31: 596–597. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Sci. Vet. J.*, 30: 331–338. 1989, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 118–120. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 473–476, 769–771. 1991, *Botanical Research* 1: 60–61. 1993, *Regnum Veg.* 127: 96. 1993, *Botaničeskij Žurnal* (Moscow & Leningrad) 79(2): 135–139. 1994, *Taxon* 44: 183–191. 1995, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995, *Watsonia* 21: 365–368. 1997, *Journal of Dalian University* 21(2): 86–87, 90. 2000

(Cases of photosensitization have occurred. Ingesting of this plant can cause bloat in animals. This plant is also involved in a condition called congenital joint laxity and dwarfism. This disorder results in teratogenic problems in beef calves. Red clover can also develop phytoestrogens, which affect fertility in livestock. Flowering tops alterative, antispasmodic, detergent, diuretic, expectorant, sedative and tonic, used to treat blood disorders, boils, arthritis, stomachache. Plant infusion for whooping cough, cough, eczema, psoriasis, menopausal complaints, fevers, kidney problems, blood purifier. Veterinary medicine, used as fodder to increase lactation and also for reducing tiredness.)

in English: cow clover, meadow clover, purple clover, red clover

in China: hong che zhou cao

in India: buksum, chit batto, kuth, mitla, treparta, trepatra

in Japan: murasaki-tsume-kusa, ake-tsume-kusa

in Mexico: quie tuu xtilia, quie too castilla

Trifolium repens L. (*Amoria repens* (L.) C. Presl; *Lotodes repens* (L.) Kuntze; *Trifolium repens* Walter; *Trifolium repens* subsp. *giganteum* (Lagr.-Fossat) Ponert; *Trifolium repens* L. var. *atropurpureum* hort.; *Trifolium repens* var. *giganteum* Lagr.-Fossat)

Europe and northern Asia. Perennial non-climbing herb, creeping, cream-white flowers, fodder, pasture and hay, highly variable

See *Species Plantarum* 2: 764–773. 1753, *Flora Caroliniana*, secundum ... 183. 1788, *Symbolae botanicae* ... 1(3): 43,

47. 1831, *Fl. Tarn. Garonne* 95. 1847, *Revisio Generum Plantarum* 1: 193–194. 1891 and *Feddes Repertorium* 83(9–10): 636. 1972 [1973], *Ann. Missouri Bot. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 13–14. 1997, *Guihaia* 19(4): 349–354. 1999

(Toxins. White clover can cause bloat in livestock. It has caused laminitis in horses and cattle; after they are ingested, some varieties can liberate HCN, causing cyanogenic poisoning in animals. Cyanogenic glycosides. Plant infusion anti-rheumatic, astringent, depurative, tonic, eyewash, for fevers, eyes troubles, asthma, colds, cough; whole plant decoction given for fever; plant juice for fever. Veterinary medicine, forage plant to increase lactation.)

in English: Dutch clover, ladino clover, white clover, white Dutch clover

in South Africa: Brabantse klawer, geelklawer, witteklawer

in China: bai che zhou cao, san xiao cao

in India: nyuse, shaftal, shotul

in Japan: shiro-tsume-kusa

in Nepal: seto behuli

Triglochin L. Juncaginaceae

Greek *treis* plus *glochis*, *glochis* ‘a point, projecting point’, *triglochis*, *triglochinos* ‘three-barbed’, the capsules or carpels of some species have three angles or points; see Carl Linnaeus, *Species Plantarum*. 1: 338–339. 1753, *Plantae Veronenses* 3: 90. 1754, *Genera Plantarum*. Ed. 5. 157. 1754.

Triglochin maritima Linnaeus (*Triglochin concinna* Burt Davy; *Triglochin concinna* var. *debilis* (M.E. Jones) J.T. Howell (also *debile*); *Triglochin debilis* (M.E. Jones) Á. Löve & D. Löve (also *debile*); *Triglochin elata* Nuttall;

Triglochin maritima Thunb.; *Triglochin maritima* var. *debilis* M.E. Jones; *Triglochin maritima* var. *elata* (Nutt.) A. Gray)

North America.

See *Species Plantarum* 1: 338–339. 1753, *The Genera of North American Plants* 1: 237. 1818, *Flora Capensis* ed. 2 2: 346. 1820, *A Manual of the Botany of the Northern United States*. Second Edition 437. 1856, *Erythea* 3(7): 117–118. 1895, *Proceedings of the California Academy of Sciences*, Series 2, 5: 722. 1895 and Beath, O.A., Draize, J.H., Eppson, H.F. “Arrow grass—chemical and physiological considerations.” *Univ. Wyo. Agric. Exp. Stn. Bull.*, 193. 1933, *Leaflets of Western Botany* 5(1): 18. 1947, Löve, Á. and D. Löve. “Biosystematics of *Triglochin maritimum*.” *Le Naturaliste Canadien* 85(6–7): 156–165. 1958, Majak, W. et al. “Seasonal variation in the cyanide potential of arrow-grass (*Triglochin maritima*).” *Can. J. Plant Sci.*, 60: 1235–1241. 1980, *Taxon* 30: 699–701. 1981, *Journal of Science of Hiroshima University, Series B, Division 2 (Botany)* 22: 271–352. 1989, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 476–479. 1991, *Watsonia* 21: 365–368. 1997, *Acta Biologica Cracoviensia, Series Botanica* 39: 63–67. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 28: 14–16. 1997, *Journal of Phytogeography and Taxonomy* 46: 195–199. 1998, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999, *Opera Botanica* 137: 1–42. 1999

(*Triglochin maritima* is important in livestock management because it is quite toxic: it is a cyanide producer. This plant contains cyanogenic glycosides, triglochinin and taxiphil-lin, which can release HCN during mastication by animals. Poisoning occurs primarily with ruminants, including cattle and sheep.)

in North America: arrow grass, seaside arrow-grass, troscart maritime

Triglochin palustris L. (*Triglochin andina* Phil.; *Triglochin fonticola* Phil.)

South America.

See *Species Plantarum* 1: 338–339. 1753, *Florula Atacamensis seu Enumeratio plantarum ...* 223. Halis Saxonum [Halle] 1860, *Anales de la Universidad de Chile* 43: 538. 1873 and *Flora Patagónica* 8(2): 28–32. 1969, Majak, W. et al. “Seasonal variation in the cyanide potential of arrowgrass (*Triglochin maritima*).” *Can. J. Plant Sci.*, 60: 1235–1241. 1980, *Boletim da Sociedade Broteriana* 53: 995–1012. 1981, *Regnum Veg.* 127: 96. 1993, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 28: 14–16. 1997, *New Zealand Journal of Botany* 37: 511–521. 1999

(A cyanogenic glycoside, triglochinin, is found in the plant; this chemical is also the main toxic component of seaside arrow-grass. In all animals, symptoms of poisoning are similar to those of cyanide poisoning.)

in English: marsh arrow-grass

Trigonella L. Fabaceae (Leguminosae, Trifolieae)

Diminutive of the Latin *trigonum*, i ‘a triangle’, *trigonus*, a, um ‘three-cornered’, Greek *trigonos*, referring to the appearance of the corolla of *Trigonella foenum-graecum* L.; see Carl Linnaeus, *Species Plantarum*. 2: 776–778. 1753, *Genera Plantarum*. Ed. 5. 338. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 181–182. 1825, *Diagnoses plantarum orientalium novarum*, ser. 2, 3(6): 46. 1859 and *Advances in Legume Systematics* 3: 180. 1987, *Willdenowia* 16(2): 447. 1987, *J. Econ. Tax. Bot.* 16 (2): 305–334. 1992.

Trigonella balansae Boiss. & Reut. (*Trifolium corniculatum* L.; *Trigonella balansae* Boiss. & Reut. subsp. *sartorii* (Halacsy) Vierh.; *Trigonella corniculata* (L.) L.; *Trigonella corniculata* Sibth. & Sm.; *Trigonella euboica* Rech. f.)

India, South Europe, Asia Minor. Annual non-climbing herb

See *Sp. Pl.* 2: 766. 1753, *Syst. Nat.*, ed. 10. 2: 1180. 1759, *Diagnoses plantarum orientalium novarum*, ser. 2, 3(5): 79. 1856 and *Anz. Österr. Akad. Wiss., Math.-Naturwiss. Kl.* xciii. 95. 1956, *Recent Res. Pl. Sci.* (New Delhi). 7: 252–260. 1979

(Used in Ayurveda, Unani and Sidha. Bitter fruit astringent, styptic, applied to swellings, bruises.)

in India: aagasti, champa methi, dandi methi, kasturi methi, kasuri methi, kotikam, malya, marwari methi, nakaputpi, pardeshi methi, pikmal, pirang, piring, prkka, sheekai, sprkka, tirapa

Trigonella emodi Benth. (*Melilotus emodi* Wall.; *Melilotus emodi* Graham ex Wall., nom. nud.; *Trigonella emodi* Benth. var. *himalaica* Sirj.)

India, Nepal, Himalaya. Perennial non-climbing shrub

See *A Numerical List of Dried Specimens* n. 5941. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* 197. 1835 and *Grassl. China* 4: 52–54. 1997

(Root juice given in indigestion.)

in China: xi ma la ya hu lu ba

in India: bhuk-chung, kuchona

in Nepal: jangali methi

Trigonella foenum-graecum L. (*Foenum-graecum officinale* Moench var. *tibetanum* Alef.; *Medicago tibetana* (Alef.) Vassilcz.; *Trigonella foenum-graecum* [Habl.] Desc.; *Trigonella foenum-graecum* [Habl.]; *Trigonella foenum-graecum* Sibth. & Sm.; *Trigonella foenum-graecum* Suter; *Trigonella tibetana* (Alef.) Vassilcz.; *Trigonella tibetica* Vassilcz.)

Mediterranean. Annual non-climbing herb, erect, aromatic, smooth, pale yellow flowers, tender leaves and stems as vegetables, dried plant used to drive out harmful insects

See *Species Plantarum* 2: 776–781. 1753, *Methodus Plantas Horti Botanici ...* (Moench) 142. 1794, *Landwirthschaftliche Flora* 71–72. 1866 and *Acta Inst. Bot. Acad. Sci. URSS*, ser. 1

Fasc. 10, 243. 1953, *Plant Systematics and Evolution* 153: 1–5. 1986, *Science and Culture* 52: 310–312. 1986, *New Botanist* 15: 19–22. 1988, *Cytologia* 53: 525–534. 1988, *Cytologia* 54: 51–64. 1989, *Journal of Cytology and Genetics* 25: 24–28, 173–219. 1990, *Cytologia* 56: 403–408. 1991, *Annals of the Missouri Botanical Garden* 81: 792–799. 1994, *Grassland of China* 4: 52–54. 1997, *Grassland of China* 2000(5): 1–5. 2000, *Journal of Ethnopharmacology* 77: 175–182. 2001, *Journal of Ethnopharmacology* 82: 97–103. 2002, *Journal of Ethnopharmacology* 86: 149–158. 2003, *Journal of Ethnopharmacology* 105: 358–367. 2006

(Used in Ayurveda. Whole plant as a galactagogue. Seeds and leaves antidiabetic, cooling, tonic, febrifuge, for liver and spleen disorders, gastric sedative, general stomach disorders, indigestion, cough, rheumatism. Seeds carminative, tonic, stomachic, antiviral, antidiabetic, aphrodisiac, astringent, for high blood pressure and for contraction of uterus, to prevent falling of the hair; fruits of *Tribulus terrestris* powdered with the seeds of *Sesamum indicum* or *Trigonella foenum-graecum* and taken with milk to cure impotence; seeds taken with water for abdominal pain, stomach complaints, diarrhea, dyspepsia, loss of appetite; seeds decoction given orally for bleeding piles and rheumatism; seeds powdered or cooked and employed in rheumatism, gout and arthritis. Leaves juice taken in the morning helpful in controlling diabetes; leaves poultice for swellings and burns.)

in English: classical fenugreek, common fenugreek, cultivated trigonella, fenugreek, Greek clover, Greek hay

in Arabic: helba, helbe, houlba, hulba, hulbah

in Algeria: ibedliouen, helba

in Ethiopia: abacham, abacheh, abish, sunko

in Morocco: I-helba, el-halba, el-halfa, halba, tifidas

in Sudan: hilba

in China: hu lu ba, hu lu pa, ku tou

in Nepal: methi

in Tibetan: shu-mo-sa, shu-mo-sa

***Trigonella gracilis* Benth.**

Nepal, India. Perennial non-climbing herb

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 197. [1833] 1839[–1840]

(Plant paste applied to treat skin diseases.)

in Nepal: jyaso serpo

***Trigonella occulta* Delile (*Trigonella occulta* Ser.)**

India, Egypt. Annual non-climbing herb

See Delile, Alire Raffeneau. *Flore d'Égypte*. Explication des planches. Histoire des plantes cultivées. Memoire sur les plantes qui croissent spontanément dans ce pays. Planches. [Paris, 1812–1817]

(Astringent seeds used for dysentery.)

Trigonopleura Hook.f. Euphorbiaceae

Greek *trigonos* 'three-cornered, triangular' and *pleura, pleuro, pleuron* 'rib', see *The Flora of British India* 5: 399. 1887.

***Trigonopleura malayana* Hook.f. (*Trigonopleura borneensis* Merr.)**

Borneo, Indonesia. Tree

See *Fl. Brit. India* 5: 399. 1887 and *Philipp. J. Sci., C* 11: 76. 1916

(Crushed leaves of *Annona muricata* mixed with a red paste from the leaves of *Trigonopleura malayana* applied as a rubefacient to treat stomachache and diarrhea. Veterinary medicine, young leaves juice boiled and dried to a paste rubbed on skin to treat scabies, skin diseases and dog mange.)

in English: true kelelei tree

in Indonesia: kayu kelelei lan

Trigonospora Holttum Thelypteridaceae

Greek *trigonos* 'three-cornered, triangular' and *spora* 'seed, spore, offspring', see *Hortus Regius Botanicus Berolinensis* 2: 128. 1833 and *Blumea* 19(1): 29. 1971, *Taxon. Revis. Indian Subcontinental Pteridophytes*. 590. 2008.

***Trigonospora caudipinna* Sledge (*Trigonospora caudipinna* (Ching) Sledge)**

India.

See *Bull. Brit. Mus. (Nat. Hist.), Bot.* 8(1): 15. 1981, *J. Cytol. Genet.* 22: 156–161. 1987, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 20–21. 1995, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 22–23. 1998, *Fern Gaz.* 16(4): 177–190. 2001, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 33: 25–26. 2001, *Sci. & Cult.* 69: 345–347. 2003

(Poultice, antiinflammatory.)

Trigonostemon Blume Euphorbiaceae

Greek *trigonos* 'three-cornered, triangular' and *stemon* 'thread, stamen', see Karl Ludwig von Blume (1796–1862),

Bijdragen tot de flora van Nederlandsch Indië. 600. Batavia 1825–1826.

***Trigonostemon elmeri* Merr.**

Borneo. Herb

See *Univ. Calif. Publ. Bot.* 15: 162. 1929

(Bark smoked for cough.)

***Trigonostemon flavidus* Gagnep.** (*Trigonostemon heterophyllus* Merr.)

Vietnam, China.

See *Bulletin de la Société Botanique de France* 69: 749. 1922[1923],

Chemical & Pharmaceutical Bulletin 53(10): 1321–1323. 2005, Li, P.T., Zhuang, X.Y., Huang, J.X. & He, S.Y. “Notes on *Trigonostemon* (Euphorbiaceae) for the *Flora of China*.” *Harvard Papers in Botany* 11: 117–120. 2006

(Acaricidal.)

***Trigonostemon reidioides* (Kurz) Craib** (*Baliospermum reidioides* Kurz)

Vietnam.

See *Bulletin of Miscellaneous Information Kew* 1911: 464. 1911, *Tetrahedron Letters* 43(16): 2941–2943. 2002, *J. Nat. Prod.* 67(2): 228–231. 2004, *Chemical & Pharmaceutical Bulletin* 53(10): 1321–1323. 2005

(Cytotoxic to various cancer cell lines. Acaricidal activity on *Dermatophagoides pteronyssinus*, Thai common house dust mite and against fleas.)

Trilepisium Thouars Moraceae

Greek *treis* ‘three’ and *lepis* ‘scale’, in reference to the scales among the stamen and the pistil.

***Trilepisium madagascariense* Thouars ex DC.** (*Bleekrodea madagascariensis* Blume; *Bosqueia angolensis* Ficalho; *Bosqueia boiviniana* Baill.; *Bosqueia boiviniana* Lecomte, nom. illeg., non *Bosqueia boiviniana* Baill.; *Bosqueia calcicola* Leandri; *Bosqueia carvalhoana* Engl.; *Bosqueia cerasifolia* Volkens ex Engler; *Bosqueia danguyana* Leandri; *Bosqueia gynandra* Baker; *Bosqueia manongarivensis* Leandri; *Bosqueia occidentalis* Leandri; *Bosqueia orientalis* Leandri; *Bosqueia phoberos* Baill.; *Bosqueia thouarsiana* Baill.; *Bosqueia thouarsiana* var. *acuminata* Baill.; *Bosqueia thouarsiana* var. *pyriformis* Baill.; *Bosqueia welwitschii* Engl.; *Pontya excelsa* A. Chev.; *Streblus dimepate* (Bureau) C.C. Berg)

West Tropical Africa. Tree, twisted, fluted, densely crowned, white latex, drooping branches, branchlets with circular leaf-scars, leaves coriaceous, both male and female flowers develop inside the bell-shaped receptacle, oval receptacle

(false fig) purple-black, ripe fleshy sweet fruits eaten raw, fruits used as famine food, latex from the bark used as lime for trapping birds, black lemurs eat flowers, in forest, rainforest, riverine

See *Species Plantarum* 2: 1059–1060. 1753, *The Civil and Natural History of Jamaica in Three Parts* 357. 1756, *Systema Naturae*, Editio Decima 1289. 1759, *Flora Cochinchinensis* 2: 754. 1790, *Genera Nova Madagascariensis* 22. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 639. 1825, *Genera Plantarum ad Familias Suas Redacta* 13. 1835, *Museum Botanicum* 2: 87–88. 1856, *Adansonia* 3: 338–340, t. 10. 1863, *Adansonia* 8: 72, t. 4. 1867, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 214, 234, 250. 1873, *Flora of Mauritius and the Seychelles ...* 283. 1877, *Nat. São Paulo 1995, Celia Blanco, *Santeria Yoruba*. Caracas 1995

(Bark for arthritis, rheumatism, stomach troubles, venereal diseases; roots for cutaneous, subcutaneous parasitic infection; bark, leaf, leaf sap for dysentery and diarrhea; latex for eye treatments. Roots infusion mixed with porridge made out of finger millet flour, the porridge is drunk as a remedy for impotence. Medicine for cows. Magic.)

in English: bastard fig, false fig, urn fig

in Angola: muguengue ia muxito (Kimbundu); okakuana, muholo (Umbundu); nsekenhe, munkenhe (Kikongo)

in Cameroon: arasalia, dingbimi, fongi, osombo, osomzo, pongi

in Central African Republic: mopongi

in Congo: kid

in Ethiopia: juya, shoro

in Ivory Coast: bakie, béhio, bli, daoco, daocu, hésiriwa, mbaki, mbaki-bakié, metchi, n’kuihia paa, nantié, niandien, paa, triwa, uaka mle

in Madagascar: andromena, beronono, dimpaty, fotsidinty, fotsidity, fotsy didy, fotsy dinty, fotsy dity, fotsydite, hasina, lanjy, lonjo, lonjy lahy, mahanoro rano, nankovia, ombavy, tsipatika beravina, voalelintsaikatra

in Nigeria: koko eram, gangaran, saworo (Yoruba); ukputu (Edo); igobe (Itsekiri); otukhurhu (Urhobo); binu (Ijwa); oze (Igbo); katep nkim (Boki)

in Southern Africa: muphopho-madi (= exudes water in drops), muvhadela-phanga (Venda)

in Tanzania: dokoro, mfilafila, mguso, mgusu, mluhua ng'ombe, mrua, msisingololo, mtuhuang'ombe, mugusu, mzughu, mzugo, mzugu

in Yoruba: apongbe, gangaran, ikobe, saworo

in Zaire: kid; agbute (Azande); bofonge (Lokundu); bongge, bonke, boonge (Turumbu); bopongi (Tumba); kalanda kakunze (makunze, kakunze = red, in allusion to the latex) (Tshiluba); mukobakoba mukunze (Bakuba); mulamba, mupelenge (Tshofa); mungagnya, sacagne (Mayumbe); nsuga, n'zungwa (Bambesa); sehenie (Kiombe); the seeds are: mangeria, muscagna (Mayumbe), tofolio (Turumbu)

Trillium L. Melanthiaceae (Liliaceae, Trilliaceae)

Latin *tri-* 'triple, three', many of its parts in threes; see *Species Plantarum* 1: 339–340. 1753, *Amer. Mounthly Mag. & Crit. Rev.* 4: 192. 1819, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 91: 72. 1820, *Enum. Pl.* 5: 120. 1850, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 898f. Ansbach 1852, *Gen. Pl.:* 60. 1866 and *Kalmia* 13: 32. 1983, *Kalmia* 14: 20–24. 1984, Samejima, K. and J. Samejima. *Trillium Genus Illustrated.* Sapporo. 1987, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 181. 1989, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 657. Basel 1996, Case, F.W. and R.B. Case. *Trilliums.* Portland. 1997. Fruits, seeds, and rhizomes of trilliums generally considered to be poisonous. Several species of *Trillium* contain sapogenins that have been used medicinally as astringents, coagulants, expectorants, and uterine stimulants, hence the common names birthwort and Indian balm.

Trillium cernuum L. (*Trillium cernuum* Barton; *Trillium cernuum* Michx.; *Trillium cernuum* f. *billingtonii* Farw.; *Trillium cernuum* f. *lalondei* R. Cayouette & J. Cay. *Trillium cernuum* f. *marginatum* R. Cayouette & J. Cay.; *Trillium cernuum* f. *tangerae* Wherry; *Trillium cernuum* f. *viride* R. Cayouette & J. Cay.; *Trillium cernuum* f. *walpolei* Farw.; *Trillium cernuum* var. *declinatum* Farw.; *Trillium cernuum* L. var. *declinatum* (A. Gray) Farw.; *Trillium cernuum* var. *macranthum* Eames & Wiegand; *Trillium cernuum* var. *terrae-novae* B. Boivin; *Trillium cernuum* var. *typicum* Wherry, nom. inval.; *Trillium glaucum* Raf.; *Trillium hamosum* Raf.; *Trillium latifolium* Raf.: *Trillium medium* Raf.)

North America. Herb, small plant, whorled leaves, drooping white-pinkish flowers, petals curved back at the tips

See *Species Plantarum* 1: 339–340. 1753, *Fl. Bor.-Amer.* (Michaux) 1: 216. 1803, *Fl. N. Amer.* (Barton) 2: 13, t. 40. 1821 and *Bull. Torrey Bot. Club* 33: 390. 1906, *Rep. (Annual) Michigan Acad. Sci.* 21: 363–364. 1920, *Rhodora* 25: 191. 1923, *Bartonia* 23: 49. 1945, *Rhodora* 55: 101. 1953, *Naturaliste Canad.* 111(3): 326–327. 1984, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995

(Fruits, seeds and rhizomes generally considered to be poisonous.)

in North America: nodding trillium, trille penché

Trillium chloropetalum (Torrey) Howell (*Trillium chloropetalum* (Torr.) Howell var. *chloropetalum*; *Trillium giganteum* (Hook. & Arn.) A. Heller var. *chloropetalum* (Torr.) R.R. Gates; *Trillium sessile* L. var. *chloropetalum* Torr.)

North America. Perennial herb

See *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 4(5): 151. 1857 and *A Flora of Northwest America* 6: 661. 1902, *Annals of the Missouri Botanical Garden* 4: 50. 1917

(Analgesic, burn dressing, wound healing.)

in English: giant trillium, giant wakerobin

Trillium chloropetalum (Torrey) Howell var. *chloropetalum*

North America. Perennial herb

See *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 4(5): 151. 1857 and *A Flora of Northwest America* 6: 661. 1902, *Annals of the Missouri Botanical Garden* 4: 50. 1917

(Analgesic, burn dressing, wound healing.)

in English: giant trillium, giant wakerobin

Trillium erectum L. (*Trillium erectum* L. var. *album* Pursh; *Trillium erectum* L. var. *album* (Michx.) Pursh; *Trillium erectum* L. var. *flavum* Torr.; *Trillium erectum* Stell.)

North America. Perennial herb, stinking red-purple flowers, drooping stalks

See *Sp. Pl.* 1: 340. 1753, *Fl. Bor.-Amer.* 1: 215. 1803, *Fl. Amer. Sept.* (Pursh) 1: 245. 1813 and *Skr. Norske Vidensk.-Akad. Oslo, Mat.-Natkurvidensk. Kl.* 1958(1): 1–36. 1958, *Canadian Journal of Genetics and Cytology* 20: 475–481. 1978, *Science Reports of Tokyo Woman's Christian University* 76–79: 943–961. 1987, *Bull. Amer. Rock Gard. Soc.* 51: 162–168. 1993, *International Organization of Plant Biosystematists Newsletter* 25: 9–10. 1995

(Root used during childbirth and menopause. Tonic for menstrual cramps, menstrual disorders, bowel complaints, asthma, ulcers, cough.)

in North America: birthwort, Indian balm, purple trillium, red trillium, stinking Benjamin, stinking Willie, wake robin, wakerobin

Trillium govonianum Wall. ex Royle (*Trillidium govonianum* (Wall. ex Royle) Kunth; *Trillidium govonianum* (Wall. ex D. Don) Kunth; *Trillium govonianum* Wall.)

India, Himalaya.

See *Numer. List* [Wallich] n. 812, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 384, t. 93, f. 1. 1839, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 120. 1850

(Tubers useful in dysentery.)

in China: xi zang yan ling cao

in India: satwa

Trillium grandiflorum (Michaux) Salisbury (*Trillium chandleri* Farw.; *Trillium chandleri* f. *foliaceum* Farw.; *Trillium chandleri* f. *gladewitzii* Farw.; *Trillium chandleri* f. *palaceum* Farw.; *Trillium chandleri* f. *plenum* Farw.; *Trillium chandleri* f. *subulatum* Farw.; *Trillium erythrocarpum* Curtis, nom. illeg., non Michaux; *Trillium grandiflorum* f. *dimerum* Louis-Marie; *Trillium grandiflorum* f. *divisum* Louis-Marie; *Trillium grandiflorum* f. *elongatum* Louis-Marie; *Trillium grandiflorum* f. *petalosum* Louis-Marie; *Trillium grandiflorum* f. *regressum* Louis-Marie; *Trillium grandiflorum* f. *striatum* Louis-Marie; *Trillium grandiflorum* var. *minimum* N. Coleman; *Trillium lirioides* Raf.; *Trillium lirioides* f. *albomarginatum* Farw.; *Trillium lirioides* f. *giganteum* Farw.; *Trillium lirioides* f. *subsessile* Farw.; *Trillium lirioides* f. *ungulatum* Farw.; *Trillium lirioides* f. *variegatum* Farw.; *Trillium lirioides* f. *vegetum* Farw.; *Trillium lirioides* var. *longipetiolatum* Farw.; *Trillium obcordatum* Raf.; *Trillium rhomboideum* Michaux var. *grandiflorum* Michaux; *Trillium scouleri* Rydb.)

North America. Perennial herb, large white flowers, corolla white, three pointed petals, stamens creamy yellow, on streamsides and wooded slopes, woodland, leaves eaten

See *Flora Boreali-Americana* 1: 216. 1803, *Parad. Lond.* 1: plate 1. 1805 and *Rep. (Annual) Michigan Acad. Sci.* 20: 157–159. 1918, *Mich. Acad. Sc. Rep.* 1918, xx. 158. 1919, *Amer. Midl. Naturalist* 11: 51. 1928, *Rev. Oka Agron. Inst. Agric.* 14: 146–149. 1940, *Chromosoma* 40: 307–320. 1973, *Canadian Journal of Genetics and Cytology* 20: 475–481. 1978, *Annals of the Carnegie Museum* 49: 265–305. 1980, *Canadian Journal of Genetics and Cytology* 22: 81–91. 1980, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *International Organization of Plant Biosystematists Newsletter* 24: 19–20. 1995

(Fruits, seeds, and rhizomes of trilliums are generally considered to be poisonous. Antirheumatic, diuretic, abortifacient, analgesic, disinfectant.)

in North America: great white trillium, large-flower trillium, large-flowered trillium, snow trillium, trille grandiflore, white trillium, white wake-robin

Trillium ovatum Pursh

North America. Perennial herb, low growing, white three-petalled flowers

See *Fl. Amer. Sept.* 1: 245. 1813

(Plant considered poisonous. Used for boils, sore eyes. Love charm.)

in English: Pacific trillium, western trillium, western wakerobin

Trillium ovatum Pursh var. *ovatum* (*Trillium californicum* Kellogg; *Trillium crassifolium* Piper; *Trillium obovatum* Hook., nom. illeg.; *Trillium ovatum* f. *maculosum* Case & R.B. Case; *Trillium ovatum* var. *stenosepalum* R.R. Gates; *Trillium venosum* R.R. Gates)

North America. Perennial herb

See *Fl. Amer. Sept.* 1: 245. 1813, *Fl. Bor.-Amer.* 2: 180. 1838, *Proc. Calif. Acad. Sci.* 2: 50. 1863, *Erythea* 7: 104. 1899 and *Ann. Missouri Bot. Gard.* 4: 61, 66. 1917, *Trilliums*: 118. 1997

(Plant considered poisonous. Used for boils, sore eyes. Love charm, aphrodisiac.)

in English: Pacific trillium, western trillium, western wakerobin

Trillium petiolatum Pursh (*Trillium petiolatum* f. *luteum* V.G. Soukup)

North America. Perennial herb

See *Fl. Amer. Sept.* 1: 244. 1813 and *Phytologia* 50: 290. 1982

(Roots used as an appetizer.)

in English: Idaho trillium

Trillium sessile L. (*Esdra sessilis* (L.) Salisb.; *Esdra sessilis* Salisb.; *Phyllantherum sessile* (L.) Nieuwl.; *Phyllantherum sessile* Nieuwl.; *Trillium isanthum* Raf.; *Trillium longiflorum* Raf.; *Trillium membranaceum* Raf.; *Trillium rotundifolium* Raf.; *Trillium sessile* f. *viridiflorum* Beyer; *Trillium sessile* var. *boreale* Nutt.; *Trillium tinctorium* Raf.)

North America. Perennial herb

See *Sp. Pl.*: 1: 340. 1753, *Med. Fl.* 2: 97–98. 1830, *Trans. Amer. Philos. Soc.*, n.s., 5: 154. 1835, *Gen. Pl.* [Salisbury] 60. 1866 and *Amer. Midl. Naturalist* 3: 112. 1913, *Torreya* 27: 83. 1927, *Ann. Carnegie Mus.* 49: 265–305. 1980, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 19–20. 1995

(Plant considered poisonous. Used for boils, sore eyes.)

in English: toadshade

Trillium undulatum Willd. (*Trillium cleavelandicum* Alph. Wood; *Trillium erythrocarpum* Michx.; *Trillium erythrocarpum* Curtis; *Trillium pictum* Pursh; *Trillium undulatum* f. *cleavelandicum* (Alph. Wood) Fernald; *Trillium undulatum* f. *enotatum* T.S. Patrick; *Trillium undulatum* f. *polymerum* Vict. ex Louis-Marie; *Trillium undulatum* f. *striatum* Louis-Marie)

North America. Perennial herb

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 422. 1801 [*Neue Schriften Ges. Naturf. Freunde Berlin*], *Flora Boreali-Americana* 1: 216. 1803, *Botanical Magazine* 22: t. 855. 1805, *Fl. Amer. Sept.* 1: 244. 1813, *Class-book Bot.*, ed. 2a: 546. 1847 and *Rev. Oka Agron. Inst. Agric.* 14: 152. 1940, *Rhodora* 45: 517. 1943, *Taxon* 31: 766–768. 1982, *Rhodora* 87: 157. 1985, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(Flowers, sepals and leaves eaten to accelerate the delivery.)

in English: painted trillium

Trimeria Harvey Flacourtiaceae (Salicaceae)

Greek *trimereia* ‘division into three parts’, referring to the flowers, see *Gen. S. Afr. Pl. Suppl.* 417. 1838.

Trimeria grandifolia (Hochst.) Warb. (*Monospora grandifolia* Hochst.; *Monospora rotundifolia* Hochst.; *Trimeria alnifolia* Harv.; *Trimeria alnifolia* (Hook.) Harv.; *Trimeria rotundifolia* Gilg; *Trimeria rotundifolia* (Hochst.) Gilg; *Trimeria rotundifolia* (Hochst.) Gilg ex Engl.)

South Africa. Tree or straggling shrub, multi-branched shrub, small fruits green to red, seeds with a bright orange aril

See *The genera of South African plants*, arranged ... 417. 1838, *Flora* 24: 660–662. 1841, *Fl. Cap.* (Harvey) 1: 69. 1860, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] III 6a: 37. 1893 and *Nat. Pflanzenfam.*, ed. 2 [Engler & Prantl] xxi. 430. 1925

(Leaves used for stomach and intestinal complaints. Used to treat coughs.)

in English: big ears, big-leafed trimeria, elephant’s ears, wild mulberry

in Southern Africa: wildemoerbe, grootblaarysterhout, lindeboom, olifants oor; iDlebenlendlovu (Zulu); iDlebenlendlovu, iTabatane, iGqabi, iliTye, iXabelo, iGqabela, umNqabane (Xhosa); isiCandamashane, maHlebe (Swazi); mufhanza, muhasha-phande (Venda)

in Tanzania: oledeti

Trimezia Salisb. ex Herbert Iridaceae

Greek *treis*, *tria* ‘three’ and *meizon* ‘greater’, *mezas* ‘big, large, great’, the outer perianth segments are bigger than the inner.

Trimezia martinicensis (Jacq.) Herb. (*Cipura martinicensis* (Jacq.) Kunth; *Cipura semiaperta* Heynh.; *Ferraria lurida* Salisb.; *Iris martinicensis* Jacq.; *Lansbergia caracasana* de Vriese; *Lansbergia martinicensis* (Jacq.) Baker; *Lansbergia meridensis* Klatt; *Marica martinicensis* (Jacq.) Ker Gawl.; *Poarchon fluminensis* Allemão; *Remaclea funebris* C. Morren; *Trimezia caracasana* (de Vriese) Benth. & Hook.f. ex B.D. Jacks.; *Trimezia lurida* Salisb., nom. superfl.; *Trimezia meridensis* Herb.; *Tritonia riparia* Cordem.; *Sisyrinchium fluminense* Vell.; *Vieusseuxia martinicensis* (Jacq.) DC.; *Xanthocromyion herbertii* H. Karst.)

Antilles to Bolivia.

See *Species Plantarum* 1: 38–40. 1753, *Enumeratio Systematica Plantarum* 12. 1760, *Annales du muséum national d’histoire naturelle* 2: 138. 1803, *Annals of Botany* 1: 245. 1805, *Transactions of the Horticultural Society of London* 1: 308. 1807, *Nova Genera et Species Plantarum* (quarto ed.) 1: 321. 1815[1816], *Edwards’s Bot. Reg.* 30(Misc.): 88. 1844, *Journal of the Linnean Society, Botany* 16: 127. 1877 and *Fieldiana, Bot.* 24(3): 159–178. 1952

(Astringent. Corm tea for flu, oliguria, amenorrhea.)

in English: dragon’s blood

Triopterys L. Malpighiaceae

From the Greek *treis*, *tria* ‘three’ and *pteron* ‘wing’, an allusion to the winged samaras.

Triopterys jamaicensis L.

Jamaica.

See *Species Plantarum* 1: 428. 1753 and *Regnum Veg.* 127: 96. 1993

(Used for cough.)

in English: cough-vine

Triosteum L. Caprifoliaceae

From the Greek *treis*, *tria* ‘three’ and *osteon* ‘bone’, referring to the fruit, see *Species Plantarum* 1: 176. 1753, *Genera Plantarum* 210–211. 1789.

Triosteum himalayanum Wall. (*Echium connatum* H. Lév.; *Triosteum erythrocarpum* Harry Sm.; *Triosteum fargesii* Franch.)

India, Himalaya. Herb

See *Flora Indica*; or descriptions of Indian Plants 2: 180–181. 1824, *Journal de Botanique* (Morot) 10(19): 318–319. 1896 and *Catalogue des Plantes de Yun-Nan* 22. 1915, *Svensk Botanisk Tidskrift* 39: 46. 1945

(Ripe fruit for blood purification.)

Triosteum perfoliatum L.

Europe.

See *Hort. Eltham* t. 293, f. 378. 1732, *Species Plantarum* 1: 428. 1753 and *Regnum Veg.* 127: 96. 1993

(Febrifuge.)

in English: fever root, tinker's weed

Triphasia Lour. Rutaceae

Greek *triphaios* 'triple, threefold' (*tri-* and *phasis* 'an appearance, apparition'), referring to the parts of the flowers; see João de Loureiro, 1717–1791, *Flora cochinchinensis: sistens plantas in regno Cochinchina nascentes*. 1: 96, 152. Ulyssipone [Lisboa] 1790.

Triphasia trifolia (Burm.f.) P. Wils. (*Limonia trifolia* Burm.f.; *Triphasia aurantiola* Lour.)

SE Asia. Erect evergreen shrub, glabrous, armed with sharp spines, leaves distichous, fragrant white flowers, fleshy gland dotted red berry, pulp very viscid

(Leaves for stomachache, diarrhea, bowel complaints, colic and skin diseases. Mucilaginous fruits against cough and catarrh.)

in English: lime berry, myrtle lime

in Cambodia: kroch chen

in Indonesia: djeruk kingkit

in Malaysia: limau kaya, limau kiah, limau kelingket, limau kikir, limau kingkit

in Philippines: dayap, kalamansito, kamalitos, limoncito, limonsitong-kastila, sua-sua, suang-kastila, tagimunao

in Thailand: manao-thet

in Vietnam: kim quít

Triphyphyllum Airy Shaw Flacourtiaceae (Dioncophyllaceae)

From the Greek *triphyes* 'of threefold nature, threefold, with three stems, of threefold form' and *phyllon* 'leaf', see *Kew Bulletin* 1951: 341. 1952.

Triphyphyllum peltatum (Hutch. & Dalziel) Airy Shaw (*Dioncophyllum peltatum* Hutch. & Dalziel)

Tropical Africa.

See *Flora of West Tropical Africa* 1: 165. 1927, *Kew Bulletin* 1951: 342, t. 4 & 5. 1952, *Phytochemistry* 31(11): 4015–4018. 1992, *Phytochemistry* 36(4): 1057–1061. 1994, *Journal of Ethnopharmacology* 54(2–3): 125–130. 1996, *Phytochemistry* 53(3): 339–343. 2000, *Phytochemistry* 62(2): 345–349. 2003

(Larvicidal, antiprotozoal, against the malaria vectors.)

Triplaris Loefl. ex L. Polygonaceae

Latin *triplaris* 'triple, threefold', referring to the calyx, stamens and styles.

Triplaris americana L. (*Ruprechtia martii* Meisn.; *Triplaris americana* Aubl., nom. illeg.; *Triplaris americana* Rottb.; *Triplaris americana* Vahl; *Triplaris boliviana* Britton; *Triplaris brasiliensis* Cham.; *Triplaris estriata* Kuntze; *Triplaris euryphylla* Blake; *Triplaris felipensis* Wedd.; *Triplaris formicosa* S. Moore; *Triplaris guanaiensis* Rusby; *Triplaris laxa* Blake; *Triplaris noli-tangere* Wedd.; *Triplaris pavonii* Meisn.; *Triplaris poeppigiana* Wedd.; *Triplaris pyramidalis* Jacq.; *Triplaris schomburgkiana* Benth.; *Triplaris striata* Kuntze; *Triplaris williamsii* Rusby)

South America.

See *Systema Naturae*, Editio Decima 2: 881, 1360. 1759, *Histoire des plantes de la Guiane Française* 2: 910, t. 347. 1775, *Descriptiones Plantarum Rariorum* 1776: 5, t. 3. 1776, *Symbolae Botanicae, ...* 2: 100. 1791 and *Ann. Missouri Bot. Gard.* 47(4): 323–359. 1960 [1961], *Nordic J. Bot.* 6(5): 545–570. 1986, *Phytomedicine*. 11(6): 516–22. 2004

(To treat inflammatory processes.)

in Panama: satteuala

Triplaris weigeltiana (Rchb.) Kuntze (*Blochmannia weigeltiana* Rchb.; *Triplaris americana* Aubl.; *Triplaris americana* Rottb.; *Triplaris americana* Vahl; *Triplaris martiana* Fisch. & C.A. Mey. ex C.A. Mey.; *Triplaris martiana* var. *oblongifolia* Meisn.; *Triplaris siphonopetala* H. Gross; *Triplaris surinamensis* Cham.; *Triplaris surinamensis* var. *benthiana* Meisn.; *Triplaris surinamensis* var. *chamissoana* Meisn.; *Triplaris surinamensis* var. *crassifolia* Benth.; *Triplaris vahliana* Fisch. & C.A. Mey. ex C.A. Mey.)

South America.

See *Revisio Generum Plantarum* 3(2): 270. 1898

(Antiinflammatory.)

Triplochiton K. Schumann Sterculiaceae

From the Greek *triploos* 'triple, threefold' and *chiton* 'a tunic, covering', referring to the flowers; see Y. Tailfer, *La Forêt dense d'Afrique centrale*. CTA, Ede/Wageningen 1989; J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985.

Triplochiton scleroxylon K. Schum. (*Samba scleroxylon* (K. Schum.) Roberty)

in English: whitewood

in Cameroon: ayos, ayous, mbado, ngo

in Central Africa: mbado, bado

in Congo: eguess

in Gabon: ayous

in Ghana: wawa

in Ivory Coast: samba

in Nigeria: arere, asigka, ayous, digiten, eba-lebe, egin-fifen, ewowo, nkom, obeche, okp, opobo, samba, uvori, lomangeni, di, dee, nwelechi, wawa, eruku; arere (Yoruba); dihitin (Ijaw); obeche (Edo); askikga (Etsako); ewowo (Urhobo); egin-fifen (Itsekiri); uvori (Engenni); okpobo (Igbo)

in Yoruba: arere, igioro

Tripodanthus (Eichler) Tieghem Loranthaceae

Greek *tripodeios*, *tripodios* 'three-footed' and *anthos* 'flower'.

Tripodanthus acutifolius (Ruiz & Pav.) Tiegh. (*Gaiadendron eugenioides* (Kunth) G. Don; *Loranthus acutifolius* Ruiz & Pav.; *Loranthus eugenioides* Kunth; *Loranthus ligustrifolius* Willd. ex Roem. & Schult.; *Loranthus ligustrinus* Willd. ex Roem. & Schult.; *Loranthus suaveolens* Kunth; *Phrygilanthus acutifolius* (Ruiz & Pav.) Eichler; *Phrygilanthus eugenioides* (Kunth) Eichler; *Phrygilanthus ligustrinus* (Willd. ex Roem. & Schult.) Eichler; *Phrygilanthus repens* Pacz.; *Phrygilanthus suaveolens* (Kunth) Eichler; *Psittacanthus acutifolius* (Ruiz & Pav.) G. Don; *Tripodanthus eugenioides* (Kunth) Tiegh.; *Tripodanthus ligustrinus* (Willd. ex Roem. & Schult.) Tiegh.; *Tripodanthus suaveolens* (Kunth) Tiegh.) (*Phrygilanthus* Eichler, from the Greek *phrygilos* 'a finch, chaffinch' and *anthos* 'a flower'; see Carl (Karl) Friedrich Philipp von Martius (1794–1868), *Flora Brasiliensis*. 5(2): 45. (Jul.) 1868.)

Brazil.

See *Flora Peruviana* 3: 48, t. 274. 1802, *A General History of the Dichlamydeous Plants* 3: 417. 1834, *Flora Brasiliensis* 5(2): 49. 1868, *Bulletin de la Société Botanique de France* 42: 178–179. 1895 and *Fl. Ecuador* 24: 113–194. 1986

(Added to *ayahuasca* beverage.)

in Peru: kohobo, miya

Tripogandra Raf. Commelinaceae

Greek *treis*, *tria* 'three', *pogon* 'beard' and *aner*, *andros* 'man, stamen', referring to the three longer stamens; see C.S. Rafinesque, *Flora Telluriana*. 2: 16. 1836 [1837] and E.D. Merrill, *Index Rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 84. Jamaica Plain, Massachusetts, USA 1949, *Cuscatlania* 1(6): 1–29. 1991, *Fl. Novo-Galiciana* 13: 130–201. 1993, *Fl. Mesoamer.* 6: 157–173. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 386–409. 2003.

Tripogandra serrulata (Vahl) Handlos (*Commelina serrulata* Vahl; *Descantaria balbisii* Hassk. ex C.B. Clarke; *Descantaria elongata* (G. Mey.) G. Brückn.; *Descantaria elongata* (G. Mey.) G. Brückn.; *Descantaria schlechtendalii* Hassk. ex C.B. Clarke; *Tradescantia balbisii* Kunth; *Tradescantia congesta* M. Martens & Galeotti; *Tradescantia cumanensis* Kunth; *Tradescantia cumanensis* var. *glabrior* C.B. Clarke; *Tradescantia elongata* G. Mey.; *Tradescantia elongata* var. *schlechtendalii* (Kunth) C.B. Clarke; *Tradescantia guianensis* Miq.; *Tradescantia schlechtendalii* Kunth; *Tradescantia schomburgkiana* Kunth; *Tripogandra cumanensis* (Kunth) Woodson; *Tripogandra cumanensis* fo. *glabrior* (C.B. Clarke) Standl. & Steyerl.; *Tripogandra elongata* (G. Mey.) Woodson)

South America, Mexico, West Indies. Perennial, trailing and rooting, long flowering stem, inflorescences pedunculate from the uppermost leaf-axils, green sepals, pink or white petals, fruit a capsule

See *Eclogae Americanae* 2: 4. 1798, *Primitiae Florae Essequiboensis* ... 146. 1818, *Loudon's Hortus Britannicus*. A catalogue ... 15. 1830, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 377. 1842, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 94, 96, 663. 1843, *Linnaea* 18: 374. 1844, *Linnaea* 26: 140. 1853, *Monographiae Phanerogamarum* 3: 303–304. 1881 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(91): 56. 1927, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 15a: 172. 1930, *Annals of the Missouri Botanical Garden* 29: 152. 1942, *Fieldiana, Botany* 24(3): 36. 1952, *Baileya* 17: 33. 1970

(Infusion for kidney disorders. Red zeb grass, *Scoparia dulcis* and *Momordica charantia* are boiled together and the liquid is drunk as purgative. A decoction of zeb grass and *Persea americana* Mill. leaves taken for biliousness.)

in English: red zeb grass, white zeb grass, zeb grass

Tripterygium Hook.f. Celastraceae

Greek *treis*, *tria* 'three' and *pteron* 'wing', *pteryx* 'wing', *pterygos* 'small wing', an allusion to the winged fruits.

Tripterygium wilfordii Hook. f. (*Aspidopterys hypoglauca* H. Lév.; *Tripterygium hypoglaucum* (H. Lév.) Hutch.; *Tripterygium regelii* Sprague & Takeda)

China.

See *Genera Plantarum* 1: 360, 368. 1862

(Antiinflammatory, can be toxic when used in high amounts. Insecticidal, very toxic, powdered roots used for the control of vegetable insects.)

in English: thunder-god vine

in China: lei kung ting

Tryptilion Ruiz & Pav. Asteraceae

Greek *treis*, *tria* ‘three’ and *ptilon* ‘feather’, referring to the divisions of the pappus, see *Gen. Pl.* [Jussieu] 175. 1789, *Florae Peruvianaes, et Chilensis Prodrumus*, sive novorum generum plantrum peruvianum, et chilensium descriptiones et icones. 102, t. 22. 1794 and *Darwiniana* 24(1–4): 364. 1982.

Tryptilion spinosum Ruiz & Pav. (*Nassauvia spinosa* (Ruiz & Pav.) D. Don; *Nassauvia spinosa* D. Don; *Nassauvia spinosa* (J. Rémy) Reiche; *Nassauvia spinosa* Reiche; *Nassauvia spinosa* Phil.; *Tryptilion bulbosum* Remy; *Tryptilion diffusum* DC.; *Tryptilion diffusum* D. Don; *Tryptilion digitatum* Phil.; *Tryptilion millefolium* Phil.; *Tryptilion pectinatum* Phil.; *Tryptilion pectinatum* var. *millefolium* Reiche; *Tryptilion ramulosum* Phil.; *Tryptilion spinosum* var. *eriochlaenum* DC.; *Tryptilion spinosum* var. *integrifolium* Reiche; *Tryptilion spinosum* var. *remyanum* Reiche)

South America.

See *Syst. Veg. Fl. Peruv. Chil.* 1: 185. 1798, *Trans. Linn. Soc. London* 16(2): 221. 1830, *Philosophical Magazine and Journal* 11: 390. 1832, *Prodr.* (DC.) 7(1): 51. 1838, *Fl. Chil.* [Gay] 3(3): 358. 1848, *Anales Univ. Chile* 87: 81, 91, 94–95. 1894 and *Anales Univ. Chile* 115: 577. 1905, *Anales Univ. Chile* 116: 172–173. 1905, *Flora de Chile* [Reiche] 4: 386, 394–395. 1905

(Diuretic.)

in Peru: siempre viva

Triraphis R. Br. Poaceae (Gramineae)

From the Greek *treis* ‘three’ and *rhaphis*, *rhaphidos* ‘a needle’, referring to the three-awned lemmas, to the awns of the flowering glume; see Robert Brown, *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 185. London (Mar.) 1810.

About 6–10 species, southern tropical Africa and South Africa, Australia. Chloridoideae, Eragrostideae, Eleusininae, or Chloridoideae, Cynodonteae, Eleusininae, annual or short-lived perennial, caespitose, erect to ascending, slender, herbaceous, glabrous nodes, solid internodes, ligule more or less membranous and fringed to ciliate, auricles absent, leaf blade bristle-like and involute, leaves narrow and mostly basal, plants bisexual, inflorescence an open or contracted panicle, pedicellate and solitary spikelets compressed laterally and disarticulating between the florets, pedicels without glands, 3–10 bisexual florets, the uppermost floret barren or reduced, two glumes subequal and shorter than the spikelets, upper glume 2-toothed and 1-nerved, lemmas 3-veined and 3-awned, hairy or bearded callus, membranous palea 2-keeled and 2-nerved, 2 small lodicules free and fleshy or membranous, 3 stamens, ovary glabrous, two plumose white stigmas, small trigonous fruit, open habitats, sandy or stony soils, savanna, close to *Neyraudia*, type *Triraphis pungens* R. Br., see *Prodromus Florae Novae Hollandiae* 185. 1810 and *Fl. Afrique Nord* 2: 191. 1953, *Grasses Central Australia*

245–246. 1970, *Annals of the Missouri Botanical Garden* 75: 866–873. 1988, *Contributions from the United States National Herbarium* 41: 231–232. 2001.

Triraphis mollis R. Br. (*Sesleria mollis* (R. Br.) Sprengel; *Sesleria mollis* (R. Br.) Sprengel)

New South Wales, Northern Territory, Queensland, South Australia, Victoria, Western Australia. Biennial or short-lived perennial or annual, loosely tufted or tussocky, purplish, glabrous, erect stems and leaves, leaves filiform and more or less channelled, soft and compact panicle, lower glume mucronate, upper glume 2-toothed, lemma narrow, very short acute callus, seedheads purple or green, individual seeds thin, grazed, low palatability, low forage value, useful for erosion control, common on sandy soils and sand dunes, coastal plains, arid and semi-arid areas, hind dunes, on creek banks and floodouts, sandplains, lower dune slopes, sand mounded areas, also on red earths

See *Prodromus Florae Novae Hollandiae* 185. 1810, *Syst. Veg.* 1: 329. 1825[1824], *Flora Australiensis: a description ...* 7: 604. 1878

(Suspected of causing cyanide poisoning in animals.)

in English: needle grass, purple heads, purple needle grass, purple plume grass

Trisetum Pers. Poaceae (Gramineae)

From *tri-* ‘three’ and Latin *saeta* (*seta*), *ae* ‘a bristle, hair’, referring to the three awns of the lemmas, similar to *Helictotrichon* and *Festuca*, intergeneric hybrids with *Koeleria* and *Sphenopholis*, the taxonomic situation around *Koeleria* and *Trisetum* is unsatisfactory, extreme variations within the species, nomenclatural confusion, type *Trisetum flavescens* (L.) P. Beauv., see *Species Plantarum* 1: 79–82. 1753, *Florulae Insularum Australium Prodrumus* 8. 1786, *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 43, 88, 153, t. 18, f. 1. 1812, *Systema Vegetabilium* 2: 676. 1817, *Encyclopédie Méthodique, Botanique Suppl.* 5: 365. 1817, *Syst. Veg. Mant.* 3: 526. 1827, *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 61. 1830, *Lotos* 4: 104. 1854, *Fl. Canad.* 689. 1862, *Mexicanas Plantas* 2: 109. 1886 and *U.S.D.A. Bull.* 772: 107–109. 1920, *Transactions and Proceedings of the New Zealand Institute* 57: 60. 1926, *N.Z. J. Sci. Tech.* 38A: 742–751. 1957, *Svensk Bot. Tidskr.* 53: 203–228. 1959, *Grasses of Burma, Ceylon, India and Pakistan* 447–448. 1960, *Bot. Not.* 118: 210–224. 1965, *Preslia* 37: 201. 1965, *Folia Geobot. Phytotax.* 5: 447–448. 1970, *Gard. Bull. Singapore* 36: 125–135. 1983, *Taxon* 36: 75. 1987, *Agrociencia* 71: 71–102. 1988, *Fragmenta Floristica et Geobotanica* 35: 97–99. 1991, *Fragmenta Floristica et Geobotanica* 37: 443–475. 1992, *Fragmenta Floristica et Geobotanica Suppl.* 2(1): 279–288. 1993, *New Zealand J. Bot.* 36: 539–564. 1998, *Contributions from the*

United States National Herbarium 48: 19, 601–602, 605, 659–676. 2003, *Am. J. Bot.* 92: 422–431. 2005.

Trisetum flavescens (L.) P. Beauv. (*Avena flavescens* L.; *Avena sikkimensis* Hook.f.; *Rebentischia flavescens* Opiz; *Trisetaria flavescens* (L.) Baumg.; *Trisetaria flavescens* (L.) Maire, nom. illeg., non *Trisetaria flavescens* (L.) Baumg.; *Trisetum pratense* Pers.; *Trisetum sikkimense* (Hook.f.) Chrtk)

North Africa, Asia, Europe, Mediterranean. Perennial, tufted, slender, ligule obtuse and membranous, auricles absent, basal leaf sheaths not keeled, leaves mostly basal rough or glabrous, leaf blade flat, foliar structure often present, pallid and green erect and contracted panicle, chasmogamous spikelets, upper glume longer than the lower one, lemmas awned, palea gaping and oblanceolate, anthers yellow or purple, ovary glabrous, ornamental and nutritious, cultivated for fodder and hay, good forage grass, native pasture species, making fine turf in lawns, found along roadsides and in grassland, fields, meadows, mountain areas

See *Species Plantarum* 80. 1753, *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *Enumeratio Stirpium Transsilvaniae* 3: 263. 1816, *Lotos* 4: 104. 1854, *Enumeratio Plantarum Transsilvaniae* 758. 1866, *The Flora of British India* 7: 280. 1896, *Bulletin de l'Herbier Boissier* 7(9): 702–703. 1899, *Synopsis der mitteleuropäischen Flora* 2: 265. 1899 and *Botanical Magazine* (Tokyo) 26(307): 215. 1912, *Botanical Magazine* (Tokyo) 45(532): 192. 1931, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 92. 1942, *Acta Universitatis Carolinae: Biologica* 1967: 104. 1968, *Novosti Sist. Zhurn.* (Moscow & Leningrad) 78(4): 36–47. 1993, *Taxon* 49(2): 247. 2000, *Journal of Applied Ecology* Volume 42, Issue 1: 13–24. Feb 2005

(Toxic. Producing vitamin D in ultraviolet.)

in English: golden oat grass, yellow oats, yellow oat grass, yellow trisetum

in Spanish: avena amarilla, avena rubia, pasto dorado

in Italian: gramigna bionda

in French: avoine dorée, avoine jaunâtre, trisète jaunâtre

in Arabic: hachichet errih

Tristachya Nees Poaceae (Gramineae)

From the Greek *treis* and *stachys* 'spike', type *Tristachya leiostachya* Nees, see *Flora Brasiliensis seu Enumeratio*

Plantarum 2: 458, 460. 1829, *Reliquiae Haenkeanae* 1(4–5): 324, t. 44. 1830, *Flora* 24(2): 713. 1841, *Index seminum regii horti botanici genuensis* 24. 1852, *Synopsis Plantarum Glumacearum* 1: 238. 1854, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895, *Bulletin de l'Herbier Boissier* 3(8): 384. 1895 and *Bulletin of Miscellaneous Information Kew* 1936(5): 320, 321, 322. 1936 [also *Kew Bulletin*], *N. Amer. Flora* 17(8): 578. 1939, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2–3): 226–354. 1957, *Kirkia* 4: 105–107, 109–110, 113, t. 10. 1964, *Kirkia* 5(2): 232–233, 235–258. 1966, *Kew Bulletin* 21(1): 119–124. 1967, *Kew Bulletin* 26(1): 111–123. 1971, *Genera Graminum* 318. 1986, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 285, 297, 627–628. 2003.

Tristachya superba (De Not.) Schweinf. & Asch. (*Loudetia superba* De Not.; *Trichopteryx gigantea* Stapf; *Trichopteryx gigantea* var. *gracilis* Rendle; *Trichopteryx gigantea* var. *phalagrotos* Peter; *Trichopteryx gigantea* var. *spiciformis* Pilg.; *Trichopteryx homblei* De Wild.; *Trichopteryx hookei* De Wild.; *Trichopteryx superba* (De Not.) Bagl. ex Chiov.; *Tristachya pedicellata* Stent)

Tropical Africa, Malawi, Mali, Zambia, Angola. Perennial, tufted, erect, robust, hard, hairy, stiff, bulbous base, spikelets in triads, pasture, common in sandy soil, in low-lying areas, moist meadows, rocky sites

See *Index seminum regii horti botanici genuensis* 24. 1852, *Beitrag zur Flora Aethiopiens ...* 302. 1867, *Bulletin of Miscellaneous Information Kew* 1897: 295–296. 1897, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 2(1): 215. 1899 and *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911–1912, unter Leitung von Eric Graf von Rosen* 2: 209. 1916, *Nuovo Giornale Botanico Italiano* n.s., 26: 79. 1919, *Annales de la Société Scientifique de Bruxelles* 39(3): 154. 1920, *Annales de la Société Scientifique de Bruxelles* 39(3): 155. 1920, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 95. 1930

(Roots used as an aphrodisiac.)

in English: giant trident grass, hairy trident grass

in Tanzania: mahua kinyaturu, mahwa kinyaturu

Tristellateia Thouars Malpighiaceae

Latin *tri-* 'three' and *stellatus, a, um* 'starry, star shaped', referring to the three star-like samaras; see Louis-Marie Aubert Aubert du Petit-Thouars, 1758–1831, *Genera nova madagascariensia*. 14. [Paris 1806], *Encyclopédie Méthodique. Botanique ... Supplément* 5: 367. 1817.

Tristellateia australasiae A. Rich. (*Tristellateia australasica* Benth.; *Tristellateia australis* A. Rich.)

Borneo, New Guinea. Climber

See *Voyage de Découverts de l'~Astrolabe~ ... Botanique Atlas*: pl. 15. 1833

(Pounded leaves applied in inflammation and swelling.)

in China: san xing guo

in Japan: Kôshun-kazura

Malay name: jemalang tanah

in Philippines: bagnít

Tristemma A.L. Juss. Melastomataceae

Greek *treis*, *tria* and *stemma*, *stematatos* 'a garland, crown', referring to the hypanthium; see A.L. de Jussieu, *Genera Plantarum* 329. (Aug.) 1789.

Tristemma coronatum Benth.

Tropical Africa. Herb, erect

See *Niger Flora* [W. J. Hooker]. 354. 1849

(Leaves antiseptic, febrifuge, wound healing.)

Tristemma mauritianum J.F. Gmel. (*Melastoma virusanum* (Juss.) D. Don; *Osbeckia virusana* (Juss.) Baill.; *Tristemma acuminatum* A. Fern. & R. Fern.; *Tristemma angolense* Gilg; *Tristemma coronatum* Benth.; *Tristemma fruticosum* Gilg; *Tristemma grandifolium* Gilg; *Tristemma grandifolium* var. *congolatum* De Wild.; *Tristemma incompletum* R. Br.; *Tristemma incompletum* var. *grandifolium* Hiern; *Tristemma kassneranum* Kraenzl.; *Tristemma mauritiana* A. Juss.; *Tristemma mauritianum* Pers.; *Tristemma mildbraedi* auct.; *Tristemma quadriannulatum* De Wild.; *Tristemma schumacheri* Guill. & Perr.; *Tristemma schumacheri* var. *grandifolium* Cogn.; *Tristemma virusanum* Juss.)

Mauritius, Gabon, Madagascar. Herb, undershrub, rose-white flowers, bristly calyx

See *Species Plantarum* 1: 389. 1753, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 693. 1791, *Narrative of an Expedition to Explore the River Zaire* 435. 1818, *Memoirs of the Wernerian Natural History Society* 4: 290. 1823 and *Wiss. Ergebn. Deutsch. Zentr. Afr.-Exped.* 1910–11, ii. 189. 1922

(Leaves antiseptic, tonic, used as an enema to cure waist pains.)

in Madagascar: vatotroka

Tristerix Mart. Loranthaceae

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* ... Vindobonæ: J. P. Kraus, 1762. 1762, *Flora* 13(1): 108–109. 1830, *Flora Brasiliensis* 5(2): 21, 45–47. 1868, *Bulletin de la Société Botanique de France* 42: 164. 1895 and *Ann. Missouri Bot. Gard.* 47(4): 263–290. 1960

[1961], *Fl. Ecuador* 24: 113–194. 1986, *Syst. Bot. Monogr.* 19: 1–61. 1988, *Taxon* 43(2): 192. 1994.

Tristerix verticillatus (Ruiz & Pav.) Barlow & Wiens (*Loranthus poeppigii* DC.; *Loranthus sternbergianus* Schult. f.; *Loranthus verticillatus* Ruiz & Pav.; *Loranthus verticillatus* Benth. & Hook.f.; *Loranthus verticillatus* Hoffmanns. ex Schult.f.; *Metastachys verticellatus* (Ruiz & Pav.) in Thailand: khao saa lee, saalee

Tritoniopsis L. Bolus Iridaceae

Resembling *Tritonia*, Greek *triton* 'a vane, a weathercock, weathervane', in allusion to the variable direction of the

stamens in different species; Triton was the legendary son of Poseidon and Amphitrite, or of Neptune and Salacia, of semi-human form, represented as human to the waist and dolphin below; see *Curtis's Botanical Magazine*. 581. 1802 and *South African Gardening* 19: 123. 1929, *S. African J. Bot.* 56(5): 580. 1990, *Contr. Bolus Herb.* 13: 61. 1991.

Tritoniopsis ramosa (Eckl. ex Klatt) G.J. Lewis var. ***unguiculata*** (Baker) G.J. Lewis (*Antholyza sudanica* A. Chev.; *Exohebe unguiculata* (Baker) R.C. Foster; *Gladiolus unguiculatus* (Baker) N.E. Br., nom. illeg.; *Hebe unguiculata* (Baker) L. Bolus; *Tritonia nervosa* Baker, nom. illeg.; *Tritonia unguiculata* Baker)

South Africa. Slender herb, flowering stem with very short leaves closely appressed, white-purplish flowers

See *Linnaea* 32: 734. 1863, *Handbook of the Irideae* 196. 1892 and *Journal of the Linnean Society, Botany* 48: 27. 1928, *South African Gardening* 19: 123. 1929, *Contributions from the Gray Herbarium of Harvard University* 127: 36, 39. 1939, *Journal of South African Botany* 25: 326, 329–330. 1959

(Liquid from the poultice of bulb as an enema for waist pains; corm given as an emetic for snakebite.)

Triumfetta L. Tiliaceae (Malvaceae)

For the Italian botanist Giovanni Battista Trionfetti, 1658–1708, author of *Observationes de ortu ac vegetatione Plantarum cum novarum stirpium historia iconibus illustrata*. Romae 1685 and *Syllabus plantarum horto medico Romanae Sapientiae*. 1688; see Marcello Malpighi (1628–1694), *Opera posthuma*, cura Faustini Gavinelli, edita objectionibus circa plantas Johannis Baptistae Trionfetti. Venetiis 1698, Carl Linnaeus, *Species Plantarum*. 1: 444. 1753, *Genera Plantarum*. Ed. 5. 203. 1754 and *Biochemical Journal* 31: 1575–1578. 1937, *Fieldiana, Bot.* 24(6): 302–324. 1949, *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 413–442. 1956, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 17: 295–339. 1970, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 277. Regione Siciliana, Palermo 1988, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2452–2468. 2001, *Journal of Medicinal Plants Research* 2(8): 197–206. 2008.

Triumfetta annua L. (*Triumfetta annua* fo. *piliger*a Sprague & Hutch.)

SE Asia, Nigeria, Ethiopia, South Africa. Shrub, woody-based herb, erect, hairy leaves, inflorescence a cyme in uppermost leaf axils, flowers yellow to orange, dehiscent capsule with prickles or hooked spines, cooked and eaten as a leafy vegetable, slimy substance from the bark used as baby food, weed, in meadows, in bushland, woodland, forest edges, miombo woodland, often confused with *Triumfetta pentandra* and *Triumfetta rhomboidea*

See *Mantissa Plantarum* 1: 73. 1767 and *Taxon* 29: 535–536. 1980, *Acta Botanica Austro Sinica* 5: 161–176. 1989

(Injuries caused by spiny burs. Bark eaten as tonic food.)

in English: burweed

in Tanzania: ilufu, mlenda

Triumfetta bartramii L. (*Bartramia indica* L.; *Triumfetta bartramia* L.; *Triumfetta indica* Buch.-Ham. ex Wall.; *Triumfetta indica* Lam., non (L.) Lam.; *Triumfetta rhomboidea* Jacq.)

Tropical America, Philippines.

See *Species Plantarum* 1: 389, 444. 1753, *Systema Naturae*, Editio Decima 2: 1044. 1759, *Amoen. Acad.*, Linnaeus ed. 4: 124. 1759, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis vicinaque Americae continente detexit novas... 22. (Bark and fresh leaf for diarrhea; leaf and flower for leprosy; crushed leaf and twig made into a paste applied on sores. Leaf paste applied on cuts, and to the root of the nail to reduce swelling, also eaten to reduce labor pain; leaf infusion drunk to treat colic and diarrhea; an extract drunk as a purgative. Roots extract taken for intestinal disorders and acidity.)

in English: hairy ropebark

in China: chang gou ci shuo ma

in India: aadavotti, eruma chappu, vattai gida

Triumfetta cana Blume (*Triumfetta tomentosa* Bojer; *Triumfetta tomentosa* var. *calvescens* Franch.)

SE Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 1: 126. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 103. 1843

(Leaves for dysentery and diarrhea.)

in China: mao ci shuo ma

Triumfetta cordifolia Guill., Perr. & A. Rich. (*Triumfetta cordifolia* Sessé & Moc.; *Triumfetta cordifolia* A. Rich.; *Triumfetta cordifolia* Sessé & Moc.)

Tropical Africa. Shrub or subshrub, erect, herb, fragrant leaves, yellow-orange flowers, prickly fruits, leaf eaten as a cooked vegetable, browsed by livestock and elephants

See *Florae Senegambiae Tentamen* 1: 91, t. 18. 1831, *Naturaleza* (Mexico City) ser. 2, 1, app. 77. 1888 and *Drug Development Research* 66(3): 200–203. 2006, *Helvetica Chimica Acta* 91(7): 1326–1335. 2008

(Stem mucilaginous and pungent. Leaves for dysentery, diarrhea and fevers. The sap of the root or leaf taken to ease childbirth, to expel the placenta, and for treatment of sterility in women. Leaves and flowers decoction febrifuge, laxative, for malaria, fevers. The bark of green shoots as postpartum remedy. Powdered root eaten for the treatment of diarrhea. Magic, ritual, sap of leafy twigs drunk in case of insanity or possession. Veterinary medicine, leaf sap given for the treatment of diarrhea.)

in English: burweed, cordleaf burbark

in Congo: mponga, mpounga, mpunga

in Gabon: langouri

in Nigeria: abiko

in Tanzania: mufundwa

in Yoruba: akeriri, amaramo, esura, orisemayin

Triumfetta cordifolia Guill., Perr. & A. Rich. var. ***tomentosa*** Sprague

Gabon. Shrub, erect, stems with starry pubescence, leaves trilobed with dense white tomentum, staminal tube orange, rounded capsules covered with hooked bristles, a source of bee forage, weed, in savanna

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 1. 1754, Medikus, Friedrich Kasimir (1736–1808), *Ueber einige künstliche Geschlechter aus der Malvenfamilie, denn der Klasse der Monadelphien*. 28. 1787, *Florae Senegambiae Tentamen* 1: 91, t. 18. 1831 and *Bulletin of Miscellaneous Information Kew* 1908: 232. 1908

(A leaf decoction taken against rhinitis, as a galactagogue and to induce labor. Emetic, astringent, antiemetic, leaves to treat diarrhea and dysentery. Veterinary medicine, leaf sap given for the treatment of diarrhea.)

in Rwanda: umusáareendá

in Tanzania: fyofyokoe, kidwanga, lihana, mchochokoe, msosokolwe, murenda, sosokolwe, ununvumweupe

Triumfetta malebarica J. Koenig ex Rottb.

India. Herb, suffrutex, yellow flowers in cymes, spines pubescent with hooked bristly points

See *Pl. Horti Univ. Rar. Progr.* (Hafn.) 16. 1773 and *Taxon* 33(3): 439. 1984

(Roots infusion given to cure congestion in chest.)

in India: mendul, mendurl

Triumfetta pentandra A. Rich. (*Triumfetta neglecta* Wight & Arn.; *Triumfetta pentandra* Guill., Perr. & A. Rich.; *Triumfetta pentandra* L.)

Tropical Africa. Herb, erect, leaf eaten as a cooked vegetable, indehiscent ovoid spiny capsule, closely related to *Triumfetta rhomboidea* Jacq.

See *Florae Senegambiae Tentamen* 1: 93, t. 19. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 75. 1834 and *Adansonia*, n.s. 3: 91–129. 1963, *Bull. Bot. Surv. India* 24(1–4): 209. 1982 [publ. 1983]

(Bark a source of mucilage. Fresh root applied on sores and wounds. Veterinary medicine, leaf sap given for treatment of theileriosis.)

in English: fivestamen burbark

in India: chinmarlumathangi

Triumfetta repens (Blume) Merrill & Rolfe (*Porpa repens* Blume; *Triumfetta procumbens* Forst.f.; *Triumfetta procumbens* non Forster, sensu Bojer; *Triumfetta radicans* Bojer)

Pacific. Prostrate, semi-woody, leaves alternate round-ovate, yellow flowers in axillary umbellate clusters, fruits with pubescent bristles

See *Species Plantarum* 1: 444. 1753, *Florulae Insularum Australium Prodrumus* 35. 1786, *Bijdragen tot de flora van Nederlandsch Indië* 117–118. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 103. 1843 and *Philippine Journal of Science* 3: 111. 1908, *Adansonia*: recueil périodique d'observations botanique, n.s. 3: 91–129. 1963

(Leaves for skin diseases.)

in China: pu di ci shuo ma

in Tonga: mo'osipo

Triumfetta rhomboidea Jacq. (*Bartramia indica* L.; *Triumfetta angulata* Lam.; *Triumfetta bartramia* L., nom. illeg.; *Triumfetta bartramii* L.; *Triumfetta glandulosa* Lam.; *Triumfetta indica* Lam., non (L.) (For gas troubles and pain.)

in China: fei dao ci shuo ma

Triumfetta tomentosa Bojer ex Bouton (*Triumfetta tomentosa* Telfair ex Wall.; *Triumfetta tomentosa* Noronha; *Triumfetta tomentosa* Bojer)

Tropical Africa. Shrub, dehiscent globose bristly capsule, twigs and leaves fed to cattle and goats, easily confused with *Triumfetta pilosa*

See *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 27. 1790, *Numer. List* [Wallich] n. 1080. 1829, *Rapport annuel sur les travaux de la société d'histoire naturelle del'Île Maurice* 12: 19. 1842

(Stem and green bark a source of mucilage. Leaf decoction as a postpartum remedy; leaf extract taken for treatment of dysentery.)

in English: tomentose burbark

in India: lamgi leehing

Trixis P. Browne Asteraceae

Greek *trixos*, *trissos* 'threefold', Latin *triplex*, referring to the angled fruit or to the outer corolla lip, see *Civ. Nat. Hist. Jamaica* 312. 1756, *Prodr.* (Swartz) 7, 115. 1788, *Proc. Calif. Acad. Sci.* 2: 182. 1863.

Trixis californica Kellogg

North America.

See *The Civil and Natural History of Jamaica* in Three Parts 312, pl. 33, f. 1. 1756, *Proceedings of the California Academy of Sciences* 2: 182–184, f. 53. 1863 and *Rhodora* 77: 171–195. 1975, *Amer. J. Bot.* 64: 680–686. 1977

(Roots infusion taken by a woman before delivery to hasten the birth.)

Trochomeria Hook.f. Cucurbitaceae

Greek *trochos* 'a wheel' and *meris* 'a portion, part', see *Genera Plantarum* [Bentham & Hooker f.] 1(3): 822. 1867 and *The Flowering Plants of Africa* 30: t. 1168. 1954, *Bothalia* 8: 85–91. 1962.

Trochomeria macrocarpa Hook. f. (*Trochomeria macrocarpa* Harv.; *Trochomeria macrocarpa* (Sond.) Hook.f.)

South Africa. Climber, variable, dioecious, ellipsoid-ovoid tuber, red juicy fruits, seeds enclosed in white jelly

See *Gen. S. Afr. Pl.* ed. 2, 125. 1868, *Flora of Tropical Africa* 2: 524. 1871 and Watt, J.M. & Breyer-Brandwijk, M.G.

Medicinal and Poisonous Plants of Southern and Eastern Africa, edn 2. Livingstone, Edinburgh & London. 1962, *Flora of tropical East Africa*: 85–90. 1967, *Flora Zambesiaca* 4: 456–460. 1978

(Poultice for wounds and sores.)

in South Africa: bobbejaankomkommer

Tropaeolum L. Tropaeolaceae

The leaf suggesting a shield and the flower a helmet, from the Greek *tropaion* 'trophy', Latin *tropaeum* or *trophaeum*, *i* 'a trophy'; see Carl Linnaeus, *Species Plantarum*. 1: 345. 1753 and *Genera Plantarum*. Ed. 5. 162. 1754, *Familles des Plantes* 2: 388. 1763, *Icones et Descriptiones Plantarum*, quae aut sponte ... 65, t. 395. 1797, *Flora Peruviana* 3: 76–77, t. 313, 314. 1802, *Nova Genera et Species Plantarum* (quarto ed.) 5: 251–252. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 683. 1824, *Transactions of the Linnean Society of London* 17(1): 13–14. 1834, *Annales de la Société Royale d'Agriculture et de Botanique de Gand: Journal d'Horticulture et des Sciences Accessoires* 1: 225, t. 22. 1845, *Botanical Magazine* 73: t. 4337. 1847, *Bulletin de la Société Impériale des Naturalistes de Moscou* 36(1): 592–593. 1863, *Revisio Generum Plantarum* 1: 97. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 163. 1895 and C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1545. New York 1967, *Ann. Missouri Bot. Quechua names: mashua, añu, apiñu, apiña-mama, yanaoca

Aymara names: isau, issanu, kkayacha

in Colombia: puel

in Spanish: mashua, majua, mafua, mauja, maxua, mashuar, añú, anyú, cubios, navios, navo, isaño, isañu, apilla, ysaño

Tropidia Lindley Orchidaceae

Greek *tropis*, *tropidos* ‘a keel’, referring to the shape of the labellum; see *Edward’s Botanical Register*. 19 (Oct.) 1833, *The Genera and Species of Orchidaceous Plants* 497. 1840.

Tropidia angulosa (Lindl.) Blume (*Cnemidia angulosa* Lindl., nom. nud.; *Cnemidia semilibera* Lindl.; *Decaisnea angulosa* Lindl., nom. nud.; *Decaisnea angulosa* Lindl. ex Wall., nom. inval.; *Decaisnea angulosa* (Lindl.) Wall.; *Govindooia nervosa* Wight; *Tropidia barbeyana* Schltr.; *Tropidia bellii* Blatt. & McCann; *Tropidia calcarata* Ames;

Tropidia govindovii Blume; *Tropidia semilibera* (Lindl.) Blume)

Malesia, Bhutan. Terrestrial, white flowers

See *A Numerical List of Dried Specimens* 7388. 1832, *Edwards’s Botanical Register* 19: ad pl. 1618. 1833, *Icones Plantarum Indiae Orientalis* 6: 34, t. 2090. 1853, *Collection des Orchidées* 122. 1859 [1858 publ. before Dec 1859] and *Bulletin de l’Herbier Boissier*, sér. 2, 6: 300. 1906, *Philippine Journal of Science* 7: 7. 1912, *Journal of the Bombay Natural History Society* 35: 730. 1932, *Harvard Pap. Bot.* 5(2): 383–466. 2001

(Plant extract used for malaria. Root decoction for diarrhea.)

in China: kuo ye zhu jing lan

Tropidia curculigoides Lindl. (*Schoenomorphus capitatus* Thorel ex Gagnep.; *Tropidia assamica* Blume; *Tropidia curculigoides* Benth., non Lindl.; *Tropidia formosana* Rolfe ex Hemsl.; *Tropidia graminea* Blume; *Tropidia hongkongensis* Rolfe; *Tropidia squamata* Blume)

E. Himalaya, Pacific. Terrestrial, petals white-green

See *Gen. Sp. Orchid. Pl.*: 497. 1840, *Flora Hongkongensis* 359. 1861

(Infusion for malaria. Roots decoction for diarrhea.)

Malay names: ranchang hantu, serugat

Tryplostemma Harvey Passifloraceae

Greek *tryphos* ‘a piece, fragment’ and *stemma* ‘a crown’, referring to the corona rays, see Harvey, William Henry (1811–1866), *Thesaurus Capensis* 1: 32, t. 51. Dublin: Hodges, Smith, and co., 1859–1863, *Botanische Zeitung* (Berlin) 17: 101. 1859, *Sitzb. Acad. Wien. Math. Nat.* xxxviii. (1860) 569. 1860, *Die Natürlichen Pflanzenfamilien* 3(6a): 81. 1893 and *Blumea* 21: 327–356. 1973.

Tryplostemma longifolium Harms (*Basananthe longifolia* (Harms) R. Fern. & A. Fern.)

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 389. 1891 and *Bot. Jahrb. Syst.* 33(1): 149. 1902, *Flora Zambesiaca* 4: 380. 1978

(Leaves and roots for wound dressing, antidote for snakebite.)

Tsuga Carrière Pinaceae

From the Japanese name; see *Synopsis Coniferarum* 83. 1847, *Traité Général des Conifères* 185. 1855 and *Kalmia* 14: 17–19. 1984, *Notes from the Royal Botanic Garden, Edinburgh* 45: 390. 1989, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 661. 1996.

Tsuga canadensis (L.) Carrière (*Pinus canadensis* L.; *Pinus canadensis* Bong.; *Tsuga canadensis* Carrière)

North America. Perennial tree

See *Le Botaniste Cultivateur*, ... 3: 774. 1802, *Flora Boreali-Americana* 2: 206. 1803, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles Sci. Math.* 2: 163. 1832, *Traité Général des Conifères* 189. 1855

(Astringent, diaphoretic, diuretic, styptic. Infusion of twigs taken for dysentery; twigs and bark infusion taken for colds, fever, to induce sweating. Infusion of inner bark taken for colds, diarrhea, abdominal pains and as a postpartum remedy; decoction of inner bark applied externally to eczema, cuts, wounds, bleeding wounds and other skin diseases; powdered inner bark applied to wounds as a styptic. Antirheumatic, diaphoretic, infusion of leaves taken for rheumatism; decoction of smashed needles taken for colds. Root chewed for diarrhea.)

in English: Canada hemlock, Canadian hemlock, eastern hemlock, white hemlock

Tsuga caroliniana Engelm.

North America. Perennial tree

See *Botanical Gazette* 6(6): 223–224. 1881 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 16: 94. 1907[1908]

(Astringent, diaphoretic, diuretic, styptic. Root chewed for diarrhea. Poultice of bark used for itching. Infusion of inner bark taken for colds, diarrhea, abdominal pains and as a postpartum remedy.)

in English: Carolina hemlock

Tsuga chinensis (Franch.) Pritz. (*Abies chinensis* Franch.; *Tsuga brunoniana* (Wall.) Carrière var. *chinensis* (Franch.) Mast.)

China.

See *Traité Gén. Conif.* 188. 1855, *Journal de Botanique* (Morot) 13(8): 259–260. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 217. 1900, *Journal of the Linnean Society, Botany* 26(179–180): 556. 1902

(The bark is astringent, diaphoretic and diuretic.)

Tsuga dumosa (D. Don) Eichler (*Abies dumosa* (D. Don) Loudon; *Abies yunnanensis* Franch.; *Pinus brunoniana* Wall.; *Pinus dumosa* D. Don; *Tsuga brunoniana* Carrière; *Tsuga brunoniana* (Wall.) Carrière; *Tsuga calcarea* Downie; *Tsuga chinensis* subsp. *wardii* (Downie) A.E. Murray; *Tsuga dumosa* Eichl.; *Tsuga dumosa* subsp. *leptophylla* (Hand.-Mazz.) A.E. Murray; *Tsuga dumosa* var. *yunnanensis* (Franch.) Silba; *Tsuga dura* Downie; *Tsuga intermedia* Hand.-Mazz.; *Tsuga leptophylla* Hand.-Mazz.; *Tsuga wardii* Downie; *Tsuga yunnanensis* (Franch.) E. Pritz.; *Tsuga*

yunnanensis (Franch.) Mast.; *Tsuga yunnanensis* subsp. *dura* (Downie) A.E. Murray)

Nepal, Himalayas. Large evergreen tree, young shoots pubescent, pendulous branchlets, flowers monoecious, cones solitary and terminal, winged seeds

See *A Description of the Genus Pinus* 2: 55. 1824, *Plantae Asiaticae Rariores* 3: 24, pl. 247. 1832, *Arboretum et Fruticetum Britannicum* 4: 2325. 1838, *Traité Général des Conifères* 188. 1855, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 2(1): 80. 1887, *Journal de Botanique* (Morot) 13(8): 258–259. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 217, in obs. 1901, *Journal of the Linnean Society, Botany* 26(179–180): 556. 1902, *Notes from the Royal Botanic Garden, Edinburgh* 14(67): 16–18, f. 2, 4. 1923, *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 61: 82–83. 1924, *Kalmia* 12: 26. 1982, *Phytologia* 68: 73. 1990, *J. Int. Conifer Preserv. Soc.* 15(2): 65. 2008

(Sudorific, astringent.)

in English: Himalayan hemlock

in Bhutan: ba shing

in China: yun nan tie shan

in India: patri, raghi, tansin, thansin

in Nepal: ke, tengre salla, thigre salla

Tsuga heterophylla (Raf.) Sarg. (*Abies heterophylla* Raf.; *Abies heterophylla* K. Koch, nom. illeg.)

North America. Perennial tree

See *Atlantic Journal* 1(3): 119. 1832, *Linnaea* 22: 295. 1849, *The Silva of North America* 12: 73. 1898

(Bark emetic, laxative, astringent, diaphoretic and diuretic. Decoction of pounded bark taken for tuberculosis, syphilis, fever; infusion of bark taken for hemorrhage, bruises, sore throats, influenza, colds; poultice of bark applied to obstinate sores, indolent ulcers. Antirheumatic, the gum, warm gum applied to cuts, and to the chest for heart trouble. Poultice of chewed needles applied to burns, bleeding wounds. Plants infusion used as wash for sore eyes, skin sores. Ceremonial, protection, ritual, to negate the effects of evil spirits.)

in English: Alaskan pine, western hemlock

Tsuga mertensiana (Bong.) Carrière (*Abies hookeriana* A. Murray; *Abies pattoniana* Jeffrey ex A. Murray; *Hesperopeuce mertensiana* (Bong.) Rydb.; *Hesperopeuce pattoniana* (Jeffrey ex A. Murray) Lemmon; *Picea hookeriana* (A. Murray) Bertrand; *Pinus hookeriana* (A. Murray) McNab; *Pinus mertensiana* Bong.; *Pinus pattoniana* (Jeffrey ex A. Murray) Parl.; *Tsuga crassifolia* Flous; *Tsuga hookeriana* (A. Murray) Carrière; *Tsuga pattoniana* var. *hookeriana* (A. Murray) Lemmon; *Tsuga x picea hookeriana* (A. Murray) M. Van Campo-Duplan and H. Gaussen)

North America. Perennial tree

See *Edinburgh New Philosophical Journal* 1: 289, pl. 9, f. 11–17. 1855, *Traité général des conifères* 252. 1867, *Annales des Sciences Naturelles* (Paris) 20: 89. 1874, *Proceedings of the Royal Irish Academy* 2: 212. 1876, *Cone-bearing Trees of the Pacific Slope*, ed. 3 54. 1895 and *Travaux du Laboratoire Forestier de Toulouse* 69: 412. 1936, *J. Fudan Univ., Nat. Sci. Ed.* 39(4): 432–435. 2000

(Bark emetic, laxative, astringent, diaphoretic and diuretic. Poultice of chewed needles applied to burns. Warm gum applied to cuts. Infusion of bark taken for hemorrhage, bruises, sore throats, influenza, colds. Ritual.)

Tugarinovia Iljin Asteraceae

Tugarinovia mongolica Iljin

Russia, Mongolia.

See *Izvestija Glavnogo Botaničeskogo Sada SSSR* 27: 356–357, f. 1. 1928

(Febrifuge, stomachic.)

in China: ge bao ju

Tulbaghia L. Amaryllidaceae (Alliaceae, Liliaceae)

The genus was named to honor of the Dutch (bapt. Utrecht, Holland) Ryk (Rijk) Tulbagh, 1699–1771 (d. Cape Town, South Africa), Dutch Governor of the Cape of the Good Hope 1751–1771, sent plant specimens, bulbs and seeds to Linnaeus; see *Mantissa Plantarum Altera* 148, 223. 1771, *Sertum Anglicum* 10. 1788 [1789], *The Genera of Plants* 87. 1866, Peter MacOwan, “Personalia of botanical collectors at the Cape.” *Trans. S. Afr. Philos. Soc.* 4(1): xxxiv. 1884–1886 and Carolus Linnaeus, *Correspondence between Carl von Linné and C. Rijk Tulbagh, Governor of the Dutch Colony*. London 1918, Burbidge, R.B. “A Revision of the Genus *Tulbaghia* (Liliaceae).” *Notes from the Royal Botanic Garden, Edinburgh* 36: 77–103. 1978, Mary Gunn and Leslie Edward W. Codd, *Botanical Exploration of Southern Africa*. 55–60, 83, 352. Cape Town 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 182. Berlin & Hamburg 1989.

Tulbaghia acutiloba Harv. (*Omentaria acutiloba* (Harv.) Kuntze; *Omentaria acutiloba* Kuntze)

South Africa. Bulbous, long thin bluish-green leaves

See *Thesaurus Capensis* 2: 51. 1863, *Revisio Generum Plantarum* 2: 713. 1891 and *J. S. African Bot.* 45: 127–132. 1979, *Caryologia* 53: 83–112. 2000

(Antiseptic, antibiotic, blood purifier, a remedy for stomach infection, gastrointestinal disorders, diarrhea in children, low or high blood pressure.)

in English: wild garlic

in Lesotho: sefotha-fotha

Tulbaghia alliacea L.f. (*Omentaria alliacea* (L.f.) Kuntze; *Omentaria alliacea* Kuntze; *Tulbaghia affinis* Link; *Tulbaghia alliacea* Ker Gawl.; *Tulbaghia brachystemma* Kunth; *Tulbaghia cernua* Avé-Lall. ex Fisch., C.A. Mey. & Avé-Lall.; *Tulbaghia cernua* Avé-Lall.; *Tulbaghia inodora* Gaertn.; *Tulbaghia narcissiflora* Salisb.; *Tulbaghia narcissifolia* Salisb.)

South Africa.

See *Mantissa Plantarum* 148, 223. 1771, *Prodr. Stirp. Chap. Allerton* 219. 1781, *Supplementum Plantarum* 193. 1782 [1781 publ. Apr 1782], *De Fructibus et Seminibus Plantarum*... 1: 57. 1791, *Prodr. Stirp. Chap. Allerton* 219. 1796, *Bot. Mag.* 21: t. 806. 1805, *Enum. Hort. Berol. Alt.* 1: 310. 1821, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 4: 483. 1833, *Index Seminum* [St. Petersburg] 9, Suppl.: 25. 1844, *Revisio Generum Plantarum* 2: 713. 1891 and *Caryologia* 53: 83–112. 2000, *Journal of Ethnopharmacology* 86(2–3): 235–241. 2003, Thamburan, S. et al. “*Tulbaghia alliacea* phytotherapy: a potential anti-infective remedy for candidiasis.” *Phytother. Res.* 20(10): 844–850. 2006

(Antifungal properties of two indigenous South African species of garlic, namely *Tulbaghia alliacea* and *Tulbaghia violacea*, used as folk medicines for a variety of infections. All parts of the plants, when bruised, have a strong odour of garlic.)

in Southern Africa: iVimba ‘mpunzi (Xhosa)

Tulbaghia leucantha Baker (*Tulbaghia dieterlenii* Phillips)

Zimbabwe to S. Africa.

See *Mantissa Plantarum* 148, 223. 1771, *Supplementum Plantarum* 193. 1781, *Flora Capensis* (Harvey) 6(3): 404. 1897 and *Annals of the South African Museum* 16: 300. 1917, *Journal of South African Botany* 45: 127–132. 1979, *Caryologia* 53: 83–112. 2000

(All parts of the plants, when bruised, have a strong odour of garlic. Whole plant for bronchial congestion, asthma, insanity, hysteria, madness, mental disorders.)

Tulbaghia violacea Harv. (*Omentaria cepacea* (L.f.) Salisb., nom. inval.; *Omentaria cepacea* Salisb.; *Tulbaghia cepacea* L.f.; *Tulbaghia cepacea* var. *maritima* Vosa; *Tulbaghia cepacea* var. *robustior* Kunth; *Tulbaghia violacea* var. *minor* Baker; *Tulbaghia violacea* var. *obtusata* Baker; *Tulbaghia violacea* var. *robustior* (Kunth) R.B. Burb.)

South Africa. Bulbous, leaves and flowers as vegetables

See *Mantissa Plantarum* 148, 223. 1771, *Supplementum Plantarum* 194. 1782 [1781 publ. Apr 1782], *Bot. Mag.* 64: t. 3555. 1837, *Gen. Pl.* [Salisbury] 88. 1866, *J. Linn. Soc., Bot.* 11: 372. 1870 and *Ann. Bot.* (Italy) 34: 116. 1975 (publ. 1977), *Notes Roy. Bot. Gard. Edinburgh* 36(1): 101. 1978, *Cytologia*

53: 157–161. 1988, Duncan, A.C., Jäger, A.K., van Staden, J. “Screening of Zulu medicinal plants for angiotensin converting enzyme (ACE) inhibitors.” *J. Ethnopharmacol.* 68(1–3): 63–70. 1999, *Caryologia* 53: 83–112. 2000, Motsei, M.L. et al. “Screening of traditionally used South African plants for antifungal activity against *Candida albicans*.” *Journal of Ethnopharmacology* 86(2–3): 235–241. 2003, *Phytother. Res.* 20(10): 844–850. 2006

(Anti-hypertensive, antibacterial and antifungal, antiseptic, anti-infections, used for the treatment of high blood pressure, tuberculosis, cough, cold; crushed leaves used to cure sinusitis and headaches. A snake and moles repellent, planted around homes.)

in English: wild garlic

in South Africa: wild garlic, wilde knoffok, wildeknoffel

Tulipa L. Liliaceae

See Augier (Ogier) Ghislain de Busbecq (1522–1592), A.-Gislenii Busbequii *omnia quae extant*. (Tulips contain an allergen, tuliposide A, which causes dermatitis in sensitive individuals. Poisoning of humans and dogs has also been reported when tulip bulbs mistaken for onions were ingested.)

in English: tulip

Tupidanthus Hook.f. & Thomson Araliaceae

Greek *tupis* ‘a mallet’ and *anthos* ‘flower’, referring to the shape of the flower buds, see *Bot. Mag.* 82: t. 4908. 1856.

Tupidanthus calyptratus J.D. Hooker & Thomson (*Aralia elliptica* K. Koch; *Aralia pulchra* Van Houtte ex Jäger; *Heptapleurum pulchrum* (Van Houtte ex Jäger) Voss; *Paratropia pulchra* Decne. & Planch., nom. nud.; *Paratropia wallichiana* Planch.; *Schefflera pueckleri* (K. Koch) Frodin; *Sciodaphyllum pulchrum* Wall., nom. nud.; *Sciodaphyllum pulchellum* Griff., nom. nud.; *Tupidanthus pueckleri* K. Koch)

China, Himalaya.

See *Bot. Mag.* 82: t. 4908. 1856, *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 348. 1859 and *Baileya* 23: 10. 1989

(Diuretic.)

in China: duo rui mu

Turbina Raf. Convolvulaceae

Latin *turbo*, *turbinis* ‘a whirlwind, a spinning-top, a spinning object’, referring to the flowers; see Constantine Samuel

Rafinesque (1783–1840), *Flora Telluriana*. 4: 81. Philadelphia 1836 [1838] and Blas Pablo Reko, *Mitobotánica Zapoteca*. [Appended by an analysis of “Lienzo de Santiago Guevea”] Tacubaya 1945, Elmer D. Merrill, *Index Rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 201. 1949, R. Gordon Wasson, “Notes on the Present Status of Ololiuhqui and the Other Hallucinogens of Mexico.” from *Botanical Museum Leaflets, Harvard University*. Vol. 20(6): 161–212. Nov. 1963. Nomenclature and taxonomy of the Convolvulaceae are in a state of confusion.

Turbina cordata (Choisy) D.F. Austin & Staples (*Ipomoea cordata* (Choisy) D.F. Austin & Staples; *Ipomoea martii* Meisn., nom. illeg. superfl.; *Ipomoea subincana* Meisn.; *Rivea cordata* Choisy)

Brazil. Vine, tuberous roots

See *Species Plantarum* 1: 159–162. 1753, *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 6: 407. 1833, *Flora Telluriana* 4: 81. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 326. 1845, *Flora Brasiliensis* 7: 337, t. 96. 1869 and *J. Arnold Arbor.* 64: 488. 1983, Austin, D.F. & G.W. Staples, “A revision of the neotropical species of *Turbina* Raf. (Convolvulaceae).” *Bulletin of the Torrey Botanical Club* 118(3): 265–280. 1991, *Toxicon* 49(1): 111–116. 2007

(Poisonous. A disease of the central nervous system in goats was observed, the disease was produced experimentally in two goats by the administration of dry *Turbina cordata* mixed with grain.)

Turbina corymbosa (L.) Raf. (*Convolvulus sidaefolia* Kunth; *Convolvulus corymbosus* L.; *Convolvulus dominicensis* Desr.; *Convolvulus laevicaulis* Willd. ex Roem. & Schult.; *Convolvulus multiflorus* Kunth; *Convolvulus prolifer* Willd. ex Roem. & Schult., nom. illeg.; *Convolvulus prolifer* Vahl; *Convolvulus sidaefolius* Kunth; *Ipomoea antillana* Millsp.; *Ipomoea burmannii* Choisy; *Ipomoea corymbosa* (L.) Roth ex Roem. & Schult.; *Ipomoea cymosa* Lindl.; *Ipomoea domingensis* (Desr.) House; *Ipomoea sidaefolia* Choisy; *Ipomoea sidaefolia* (Kunth) Choisy; *Ipomoea sidaefolia* (Kunth) Sweet; *Legendrea corymbosa* (L.) Ooststr.; *Legendrea corymbosa* var. *mollissima* (Webb & Berthel.) Ooststr.; *Legendrea mollissima* Webb & Berthel.; *Rivea corymbosa* (L.) Hallier f.; *Rivea corymbosa* Hallier f.; *Rivea corymbosa* var. *mollissima* (Webb & Berthel.) Hallier f.; *Turbina corymbosa* fo. *mollissima* (Webb & Berthel.) Stearn)

Mexico. Woody vine, twining

See *Pl. Amer.* t. 89, f. 2. 1693, *Systema Naturae*, Editio Decima 923. 1759, *Encyclopédie Méthodique, Botanique* 3: 554. 1789, *Eclogae Americanae* 1: 18. 1796, *Nova Genera et Species Plantarum* (quarto ed.) 3: 99–100. 1818[1819], *Systema Vegetabilium* 4: 232, 302–303. 1819, *Systema Vegetabilium* 6: 241. 1820, *Hortus Britannicus* 372. 1830, *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 6: 459. 1833, *Flora Telluriana* 4: 81. 1838, *Edwards’s Botanical*

Register 29: t. 24. 1843, *Histoire Naturelle des Îles Canaries* 3(2): 26–27, t. 137. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 350. 1845, *The Botany of the Voyage of H.M.S. ~Herald~* 171. 1854, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18: 157. 1893 and *Publications of the Field Columbian Museum, Botanical Series* 2(1): 84–85. 1900, *Muhlenbergia*; a journal of botany 3(3): 38. 1907, *Blumea* 5: 355. 1943, *Botanical Museum Leaflets* 20(6): 161–212. 1963, *Cuad. Bot. Canaria* 21: 7. 1974, *Bull. Torrey Bot. Club* 118: 273. 1991

(Diuretic. Seed with anesthetic narcotic properties, LSD-like. Religious and magic rites, divinatory, psychotomimetic, narcotic, hallucinogenic, ceremonial, ritual.)

in English: snake-planrt

in Mexico: badoh shnaash, bejicco, bidoh shnaash, coatl-xoxouhiqui, coaxihuitl (= snake plant), hiedra, ololiuhqui (= round thing), ololiuqui, ololuique, quahn shnaash, semilla de la Virgen

Turnera L. Turneraceae

For the English (b. Morpeth, Northumberland) botanist Rev. William Turner, circa 1508–1568 (d. London), physician, herbalist, naturalist, zoologist, clergyman, friend of Conrad von Gesner (1516–1565); see *Species Plantarum* 1: 271. 1753 and Charles Webster, in *D.S.B.* 13: 501–503. New York 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 697. 1994, *Bonplandia* (Corrientes) 14(3–4): 164 (–165). 2005, *Bonplandia* (Corrientes) 17(2): 307. 2008.

Turnera diffusa Willd. ex Schult. (*Turnera aphrodisiaca* Ward; *Turnera diffusa* var. *aphrodisiaca* (Ward) Urb.)

Mexico, USA, Texas, West Indies, Central and South America. Small shrub, aromatic serrate leaves, small yellow flowers, small fruits

See *Species Plantarum* 1: 271. 1753, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 6: 679. 1820, *Virginia Med. Month.* 3(1): 48 (–49). 1876, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 2: 127. 1883 and *Fieldiana, Bot.* 24(7/1): 109–115. 1961

(Leaves infusion tonic and aphrodisiac, antidepressant and central nervous system depressant, antianxiety, a male and female sexual stimulant, for mood disorders, for nervous stomach, colic and dyspepsia; whole plant infusion to treat infertility in women.)

in English: damiana, Mexican damiana, Mexican holly, old woman's broom, rosemary

in Central America: chac-mixib, damiana, hierba de la pastora, hierba del venado, mejorana, misibcoc, oreganillo

Turnera subulata Sm. (*Turnera elegans* Otto ex Nees; *Turnera elegans* Nees; *Turnera mollis* Kunth; *Turnera peruviana* Willd. ex Schult.; *Turnera peruviana* Willd. ex

Roem. & Schult.; *Turnera sericea* Kunth, nom. illeg. superfl.; *Turnera trioniflora* Sims; *Turnera ulmifolia* L. var. *elegans* (Otto ex Nees) Urb.; *Turnera virgata* Willd. ex Schult.)

Tropical America. Perennial herb, bushy, corolla with a deep purple eye, clawed petals, ovoid capsules

See *The Cyclopaedia*; or, universal dictionary of arts, ... 36: n. 2. 1817, *Horae Physicae Berolinenses* [Nees] 36. 1820, *Botanical Magazine* 47: t. 2106. 1820, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 6: 678–679. 1820, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 6: 126–127. 1823, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 2: 139. 1883 and *Econ. Prod. Malay Pen.* 2233. 1966 *Bonplandia* (Corrientes) 5: 211–226. 1983, *Syst. Bot.* 10: 308–321. 1985, *Evolution* 41: 340–354. 1987, *Bonplandia* (Corrientes) 6: 1–21. 1987, *Bonplandia* (Corrientes) 6: 93–102. 1989, *Canad. J. Bot.* 69: 1302–1308. 1991, *Bonplandia* (Corrientes) 7: 101–118. 1993, *Bonplandia* (Corrientes) 14(3–4): 115–318. 2005

(Roots poulticed for boils.)

Malay name: bunga padang

Turnera ulmifolia L. (*Turnera alba* Liebm.; *Turnera angustifolia* Mill.; *Turnera caerulea* DC.; *Turnera coerulea* DC.; *Turnera coerulea* Sessé & Moc. ex DC.; *Turnera mollis* Kunth; *Turnera peruviana* Willd. ex Schult.; *Turnera peruviana* Willd. ex Roem. & Schult.; *Turnera trioniflora* Sims; *Turnera ulmifolia* Sessé & Moc.; *Turnera ulmifolia* L. var. *angustifolia* (Mill.) DC.; *Turnera ulmifolia* var. *angustifolia* (Mill.) Willd.; *Turnera ulmifolia* var. *velutina* (C. Presl) Urb.; *Turnera velutina* C. Presl; *Turnera velutina* Benth.)

West Indies, Mexico. Perennial dense compact herbaceous shrub, erect, suffruticose, freely branching, sharply toothed glandular leaves, bright yellow terminal flowers, ovoid capsule, the leaves of this plant have a pungent odor when crushed that some people find offensive

See *Species Plantarum* 1: 271. 1753, *Gard. Dict.*, ed. 8. n. 2. 1768, *Bot. Mag.* 47: t. 2106. 1820, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 6: 679. 1820, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 6: 126. 1823, *Prodr.* (DC.) 3: 346. 1828, *J. Bot.* (Hooker) 4: 116. 1841, *Index Seminum* [Copenhagen] 1847: 12. 1848, *Ann. Sci. Nat., Bot.* sér. 3, 9: 318. 1848, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 2: 141. 1883, *Fl. Mexic.*, ed. 2 77. 1894 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 82–85. 1941, *Fl. Madagasc.* 142: 1–12. 1950, *Candollea* 40: 175. 1985, *Syst. Bot.* 10: 308–321. 1985, *Evolution* 41: 340–354. 1987, *Canad. J. Bot.* 69: 1302–1308. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2471–2474. 2001, *Bioresource Technology* 97(12): 1387–1391. 2006

(Leaves antiinflammatory, antioxidant, a significant antiulcerogenic effect, crushed leaves rubbed on rheumatic joints

and applied on septic ulcers. For fevers and colds; tea used for the treatment of diseases related mainly to gastric dysfunction including gastric and duodenal ulcers. Parts of plant are poisonous if ingested.)

in English: buttercup, Cuban buttercup, sage rose, sundrop, west Indian holly, yellow alder

in Brazil: chanana

Malayan name: lidah kucing, lidah kucing

Turpinia Ventenat Staphyleaceae

After the French (b. Vire) botanical artist Pierre Jean François Turpin, 1775–1840 (d. Paris), naturalist and botanist; see *Mémoires de la Classe des Sciences Mathématiques et Physiques de L'Institut National de France* 1807(1): 3–4. 1807, *Choix Pl.* 31 (t. 31). 1807, *Nova Genera et Species Plantarum* (folio ed.) 5: 109, 143, t. 444. 1821 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Fieldiana, Bot.* 24(6): 223–225. 1949, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 410. 1965, M. Hocquette, in *D.S.B.* 13: 506–507. 1981, *Fl. Veracruz* 57: 1–11. 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen* 14. Aufl. Stuttgart 1993, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2427–2428. 2001.

Turpinia nepalensis Wall. ex Wight & Arn. (*Turpinia nepalensis* Wall.)

India, Nepal. Shrub or tree, imparipinnate leaves, terminal or axillary panicles, globose green fruits

See *Numer. List* [Wallich] n. 4277. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 156. 1834, *FBI* 1: 698. 1875 and *Forest Flora of British Burma* 1: 292. 1911

(Leaves and fruits as poultice rubbed on body pain; paste of the leaf and seeds applied on muscular pain.)

in India: khrang-araung, thebongkok, thekejauai-araung, thekjauai-araung

Turpinia pomifera (Roxb.) DC. (*Dalrympelea pomifera* Roxb.; *Turpinia pomifera* (Roxb.) Wall. ex DC.; *Turpinia pomifera* DC.)

India. Tree, opposite compound leaves, white scar at the nodes, leaf margin serrate, branchlets and inflorescence axes green, fruits violet-black

See *Hort. Bengal.* 17. 1814, *Plants of the Coast of Coromandel* 3: 76. 1820, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 3. 1825

(Alkaloids, antiplasmodial.)

in China: da guo shan xiang yuan

in India: kambili vetti, kanali

Turraea L. Meliaceae

Origin not very clear, possibly after the Italian botanist and physician Antonio Turra (1730–1796), mineralogist, author of *Istoria del arbore della China*. Livorno 1764 and *Florae italicae prodromus*. Vicetiae [Vicenza] 1780; see C. Linnaeus, *Mantissa Plantarum Altera* 150, 237. 1771, *Genera Plantarum* 264. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 656, 682. 1791, *Annales des Sciences Naturelles* (Paris) 9: 401. 1826, *Annales des Sciences Naturelles; Botanique*, sér. 2, 18: 257. 1842, *Familiarum Naturalium Regni Vegetabilis Monographicae* 1: 79, 90. 1846, *Adansonia* 1: 50. 1860, *J. Linn. Soc., Bot.* 21: 317–353, 407–455. 1884–1885, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1160. 1894 and *Berichte der Deutschen Botanischen Gesellschaft* 35: 80. 1917, *Bull. Mus. Natl. Hist. Nat.* 25: 364–366. 1919, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 410. 1965, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 409. 1972, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 383–384. [named for Giorgio dalla Torre (1607–1688), professor of botany at Padua, among his writings are *Catalogus plantarum horti patavini novo incremento locupletior*. Padova 1660 and *Historia plantarum*. Padova 1685] Chipping Norton, N.S.W. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 792. 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 665. 1996.

Turraea africana (Welw.) Cheek (*Naregamia africana* (Welw.) Exell; *Naregamia alata* Wight & Arn. var. *africana* Welw.)

Tropical Africa.

See *Mantissa Plantarum* 2: 150, 237. 1771, *Flora Capensis* 1: 246. 1859–60, *Transactions of the Linnean Society of London* 27: 21. 1869 and *Journal of Botany, British and Foreign* 70(Suppl. 1): 223. 1932, *Prodr. Fl. Ind. Orient.* 1: 117. 1834, *Kew Bulletin* 51(4): 716. 1996

(Bark and leaves for stomach and intestinal complaints.)

Turraea floribunda Hochst. (*Turraea heterophylla* Sond.)

South Africa. Small tree or shrub, erect, lianescent, stem brown with grey patches, semi-scandent, arching branches, pubescent, leaves with yellow dots, strongly sweet-scented flowers appearing with young leaves, calyx green silky-pubescent with 5 teeth, greenish yellow petals, stamens pale yellow, staminal tube white, fruit yellow, seeds have bright orange arils, aromatic

See *Flora* 27: 297. 1844 and *Journal of Agricultural and Food Chemistry* 52(16): 5027–5031. 2004, *Phytochemistry* 65(14): 2031–2037. 2004

(Roots used for heart complaints, rheumatism and swollen painful joints; root bark with mosquito larvicidal activity. Veterinary medicine. Ritual, magic.)

in English: many-flowered turraea, wild honeysuckle tree

in Malawi: chikwisimbi (Chichewa, Nyanja)

in Southern Africa: uMadlozana, uMadlozane, umLulama, uBhugulo, umVuma (Zulu); umHlatholana, umLahlana (Xhosa)

in Tanzania: msonganya (Shambaa)

in Uganda: doctoretulelo, muhojole, pogoliech

Turraea longipes Baill. (*Turraea bracteolata* Harms; *Turraea doniana* Hook. f.; *Turraea komoensis* A. Chev.; *Turraea vignei* Hutch. & Dalziel; *Turraea vogelii* Hook. f. ex Benth.; *Turraea vogelii* Hook. f.; *Turraea zenkeri* C. DC.)

East Africa.

See *Niger Flora* [W.J. Hooker]. 253. 1849 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 10: 129–130. 1907

(Leaves of *Turraea vogelii* poisonous to stock. Roots narcotic. Stem decoction to kill intestinal worms. Leaves, stem and fruits for lymphatic filariasis; leaves eaten in snakebite. Roots for urogenital infection, intestinal complaints; a decoction for skin diseases. Rituals, magic.)

in Central African Republic: kabunu, munja

in Congo: boseke'o'oli, isongotamu

in Yoruba: aha omode, asa omode, omimi

Turraea nilotica Kotschy & Peyr. (*Turraea randii* Baker f.)

East Africa. Shrub or small tree, sprawling, greenish yellow fragrant flowers clustered at ends of shoots, unripe fruits dull yellow, fruits splitting to expose black seeds with orange arils, green leaves eaten

See *Plantae tinneanae* sive descriptio plantarum in expeditione tinneana ad flumen Bahl-el-Ghasal ... 12, t. 6. Vindobonae [Wien] 1867 and Rev. Francisque Marconnés, *A grammar of Central Karanga*. Witwatersrand 1931, E. Colson and Max Gluckman, ed., *Seven Tribes of British Central Africa*. [The tribes being the Lozi, Tonga, Bemba, Ngoni, Nyakyusa, Yao and Shona.] London 1951, Wilfred Whiteley (and J. Slaski), *Bemba and Related Peoples of Northern Rhodesia* (and *Peoples of the Lower Luapula Valley*). London 1951

(Said to be poisonous to stock. Roots to treat abdominal pain, menstrual cramps, venereal diseases, constipation, diarrhea, epilepsy, pneumonia.)

in English: small mahogany

in Eastern Africa: mkobala (Gogo)

in Malawi: mkulabala, msindila, msindira, (Chichewa and Nyanja and Yao)

in Southern Africa: tshigombo (Venda)

in Zimbabwe: chiPindura, muZaramanga, muZaramanya (Shona); muSusi an Singongo (Lozi); muZaramanga (Karanga)

Turraea obtusifolia Hochst. (*Turraea oblancifolia* Bremek.; *Turraea obtusifolia* var. *microphylla* C. DC.; *Turraea obtusifolia* var. *matopensis* Bak.f.)

South Africa. Low arching shrub or small tree, white flowers slightly fragrant at night, green capsule, shiny orange-red kidney-shaped seeds, related to *Turraea floribunda*

See *Flora* 27(1): 296 (err. typ. 962). 1844 and *Ann. Transvaal Mus.* xv. 245. 1933

(Very poisonous, all parts of this plant are poisonous. Leaves antifeedants, insect repellants. Stem bark, root bark and leaves purgative, to treat stomach and intestinal complaints.)

in English: lesser honeysuckle tree, small honeysuckle tree

in Southern Africa: kleinkamperfoelieboom, kleinkanferfoelieboom (Afrikaans); amehlo, inkosikasi (= the Queen's Eyes, the fruits and seeds are very showy), inKunzi, inKunzi ebomvana, amaZulu, umHlatholana (Zulu)

Turraea robusta Guerke (*Turraea nilotica* Kotschy & Peyr.; *Turraea volkensii* Guerke)

East Africa, Tanzania. Small tree or shrub, erect, evergreen, many-branched, rough bark, branchlets densely hairy, dark green glossy leaves ovate or elliptic, fragrant creamy white flowers, perianth creamy white, corolla turning yellow on drying, stigma protruding from flower, round flattened dark green fruits, in wooded grassland, above river bank, in riverine forest, bushland

See *Mantissa Plantarum* 2: 150, 237. 1771, *Plantae tinneanae* sive descriptio plantarum in expeditione tinneana ad flumen Bahl-el-Ghasal ... 12, t. 6. Vindobonae [Wien] 1867, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19 Beibl. 47: 34. 1894

(Poisonous. Stem for fevers and diarrhea. Leaves an antidote against general poisoning. A decoction of boiled roots taken as a remedy for diarrhea, stomachache and other stomach troubles.)

in English: honeysuckle tree

in Eastern Africa: ilandei, kidungwe, kilandi, mdwayu, mgwejameno, mikopora, misuru, mkirika, mlandeye, mlyandehi, mmandeye, mnela, mnera, mnyarandeye, molo, mtandehi, mtenene, muringa, muthithii, mutinere, mwalaga kuku, mwatoa, mzikoziko, ol matata, omukarekare, pipipili; dwayu (Usambara)

in Kenya: enjani engashe

in Tanzania: mndarandeghe, mnyandeghe, mzikoziko

in Uganda: kivunambasa (Lusoga); omukarakare (Lukiga)

Turraea sericea Sm. (*Oncoba capreifolia* Baker; *Turraea macrantha* Danguy; *Xylothea capreifolia* (Baker) Gilg)

Madagascar. Tree or shrub, aromatic, all leaf parts covered with velvety yellow-white tomentum, waxy yellowish or greenish white petals

See *Plantarum Icones Hactenus Ineditae* 12. 1789, *Journal of the Linnean Society, Botany* 21: 320. 1884, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 456. 1908, *Bulletin du Muséum d'Histoire Naturelle* 25: 366. 1919

(Leaves and roots for malaria, constipation, stomachache, jaundice, abortion, neuralgia, toothache, conjunctivitis, sleeping sickness; leaves and bark astringent, for diarrhea. Bark used against fatigue. Magic, ritual, leaves a witchcraft medicine.)

in Madagascar: ambiotsy, fafara, famoandambo, fanagova, fanazava, fanazeva

Turraea wakefieldii Oliv.

Kenya. Small tree, white flowers

See *Icones Plantarum* 15, t. 1489. 1885 and *Phytochemistry* 64(4): 817–823. 2003, *Journal of Agricultural and Food Chemistry* 52(16): 5027–5031. 2004

(Roots used for heart complaints, rheumatism and swollen painful joints; root bark with mosquito larvicidal activity. Veterinary medicine. Ritual, magic.)

Turricula J.F. Macbr. Hydrophyllaceae (Boraginaceae)

From the Latin *turricula*, *ae* 'a little tower, a turret', *turris*, *is* 'a tower', see *Systema Naturae*, Editio Decima 2: 908, 950. 1759, *Bot. Voy. Sulphur* 35. 1844, *Pittonia* 2(7B): 22–23. 1889 and *Contributions from the Gray Herbarium of Harvard University* 49: 42–43. 1917.

Turricula parryi (A. Gray) J.F. Macbr. (*Eriodictyon parryi* (A. Gray) Greene; *Eriodictyon parryi* Greene; *Nama parryi* A. Gray)

North America. Perennial subshrub, herb

See *Geological Survey of California, Botany* [W.H. Brewer] 1: 621. 1876 and *Contributions from the Gray Herbarium of Harvard University* 49: 42. 1917

(Leaves infusion as a wash for rheumatism, swellings.)

in English: common turricula, poodle-dog bush

Turritis L. Brassicaceae (Cruciferae)

Latin *turris* 'a tower', *turrita*, *ae* 'tower-crowned, tower-shaped', referring to the pyramidal appearance of the plant; see Carl Linnaeus, *Species Plantarum*. 2: 660–661, 666. 1753, *Genera Plantarum*. Ed. 5. 298. 1754, *Familles des Plantes* 2: 418, 615. 1763.

Turritis glabra L. (*Arabis crepidipoda* Griseb. ex Pant.; *Arabis glabra* (L.) Bernh.; *Arabis glabra* subsp. *pseudoturritis* (Boiss. & Heldr.) Maire; *Arabis glabra* var. *furcatipilis* M. Hopkins; *Arabis glabra* var. *glabra*; *Arabis macrocarpa*

(Nutt.) Torr.; *Arabis perfoliata* Lam.; *Arabis pseudoturritis* Boiss. & Heldr.; *Erysimum glabrum* Kuntze; *Erysimum glabrum* (L.) Kuntze; *Erysimum glabrum* C. Presl; *Turritis dregeana* Sond.; *Turritis glabra* var. *lilacina* O.E. Schulz; *Turritis macrocarpa* Nutt.; *Turritis pseudoturritis* (Boiss. & Heldr.) Velen.; *Turritis stricta* Host)

Pakistan.

See *Species Plantarum* 2: 664–666. 1753, *Systematisches Verzeichnis* 195. 1800, *Revisio Generum Plantarum* 2: 933. 1891 and *Ann. Sci. Univ. Besançon*, Sér. 4, *Biol. Veg.* 12: 49–56. 1972, *Fl. W. Pakistan* 5: 183. 1973, *Bot. Not.* 129: 123–130. 1976, *Taxon* 31: 769. 1982, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 33: 23. 2001, *Genes Genet. Systems* 81(4): 287–290. 2006

(Plant used for colds.)

in English: tower mustard, tower rockcress

in China: qi gan jie

Tussilago L. Asteraceae

Latin *tussilago*, *inis* 'the herb colt's foot' (Plinius), see *Species Plantarum* 2: 865–866. 1753 and *Acta Biol. Cracov.*, *Ser. Bot.* 19: 107–148. 1976, *Watsonia* 11: 211–223. 1977, *Opera Bot.* 137: 1–42. 1999.

Tussilago farfara L.

China.

See *Species Plantarum* 2: 865. 1753 and *Taxon* 28: 395–397. 1979, *Bot. Zhurn. SSSR* 64 (4): 582–589. 1979, *Watsonia* 19: 134–137. 1992, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Bull. Bot. Res.*, Harbin 20(3): 313–317. 2000

(Flower buds and leaves used for relieving coughs and improving breathing.)

in China: kuan dong

Tylophora R. Br. Asclepiadaceae (Apocynaceae)

From the Greek *tylos* 'lump, knob' and *phoros* 'bearer', referring to the pollen masses or to the tubercled corona; see R. Brown, *Prodromus Florae Novae Hollandiae*. 460. 1810, *Mem. Wern. Soc.* 1: 28. 1810, *The botany of the voyage of H.M.S. Sulphur* pl. 49. 1845, *Journal of the Linnean Society, Botany* 26(173): 111–112. 1889, *Bulletin of the Torrey Botanical Club* 19: 97. 1892 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 262. 1914, *Transactions of the American Philosophical Society*, new series, 24(2): 1–445. 1935, *Annals of the Missouri Botanical Garden* 24: 567. 1937, *Fl. Reipubl. Popularis Sin.* 63: 558. 1977.

Tylophora asthmatica (L.f.) Wight & Arn. (*Asclepias asthmatica* L.f.; *Asclepias vomitoria* Koen. ex Hook.f., nom.

inval.; *Asclepias vomitoria* (Lam.) J. König ex Hook. f.; *Cynanchum vomitorium* Lam.)

India. Perennial climber, greenish flowers, sharp pointed folicles

See *Species Plantarum* 1: 212–217. 1753, *Supplementum Plantarum* 171. 1781, *Encyclopédie Méthodique, Botanique* 2: 235. 1786, *Prodromus Florae Novae Hollandiae* 460. 1810, *Contributions to the Botany of India* 51. 1834, *Fl. Brit. India* [J.D. Hooker] 4(10): 45. 1883 and *Taxon* 26: 257–274. 1977

(Used in Ayurveda and Sidha. Irritant, dermatitis. Plant used for the treatment of asthma and bronchitis, and as an expectorant. Leaf powder mixed with water given to remove poison in stomach. Root paste applied on eye lids to cure jaundice. Veterinary medicine, for panting, root extract with those of *Tinospora cordifolia* given orally.)

in English: Indian ipecacuanha

in India: adumuttada, adumuttada balli, adumuttadagida, adumuttoda, anantamul, antamul, anthamul, anthrapachaka, antomul, caitanniyampayncan, caitanniyampayncankoti, cankam, capalu, carankaceti, carankam, caravanapparkoti, catitiyam, cinkiri, cinkirippalai, cocrinja, coorinja, curakari, curakarikkoti, damni, gandhana, jangli-pikvan, janglipikvan, kacappupalai, kagittam, kagittiram, kakapala, kakatiram, kakimacari, kakimacariceti, kakitam, kakittiram, kalutaippalattankoti, kamanaccetikakkoti, kapamarukkumuli, karetcavacan, karuncili, karuncilikkoti, karunkurınca, karunkurincaceti, karunkurinci, karutakam, karuvecarikkoti, kashuthai palai, kharaki-rasana, kirumanji, kodagam, kondachani, kukka-pala, kukkapala, kurinja, mattukumuttukoni, meka meyani aku, moolinee, mulini, nach-churuppam, nalpalai, nanja-murich-chan, nanjamurichchaan, nanjaruppan, nepala, nepaladaberu, pitakari, pitmari, pittamari, tellavedavela, tellayadala, valli-pala, vallipal, vallippalayila, vallippalayila pacha, veripala, verripala, vettipala, vishakolli

Tylophora brevipes (Turcz.) Fern.-Vill. (*Amblyoglossum brevipes* Turcz.)

Philippines.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 25(2): 310. 1852, *Flora de Filipinas* 4(21A): 134. 1880

(Root decoction emetic, emmenagogue, a substitute for ipecacuanha.)

in Philippines: bugnei, dail, pasuka, sarungkad, sarungkar, sayongkal

Tylophora crebriflora S.T. Blake (*Tylophora floribunda* Benth., nom. illeg.)

Australia.

See *Annales Museum Botanicum Lugduno-Batavi* 2: 128. 1866, *Flora Australiensis: a description ...* 4: 335. 1868 and *Proceedings of the Royal Society of Queensland* 59: 168. 1948

(Skin vesicant action.)

Tylophora dalzellii Hook. f.

India.

See *The Flora of British India* 4(10): 43–44. 1883

(Leaves taken to cure asthma.)

Tylophora fasciculata Buch.-Ham. ex Wight (*Tylophora fasciculata* Thwaites, nom. illeg., non *Tylophora fasciculata* Buch.-Ham. ex Wight)

India.

See *Prodromus Florae Novae Hollandiae* 460. 1810, *Contributions to the Botany of India* 50. 1834, *Enumeratio Plantarum Zeylaniae* [Thwaites] 197. 1864

(Used in Ayurveda. Whole plant pounded and the decoction given in snakebite. Leaves decoction applied on forehead to relieve acute headache and migraine. Root paste given to cure fever and body pain. Fruits refrigerant. Veterinary medicine, whole plant ground with stem bark of *Wrightia tinctoria*, pepper, musk and garlic, given in trypanosomiasis.)

in India: arsi, bhummy-dori, bishnujadi, bunda alumu, gocandana, ishermul, kulnajadi, nelagamate, nelagavate, panglajadi, valantro

Tylophora flava Trimen

India.

See *Prodromus Florae Novae Hollandiae* 460. 1810, *Journal of Botany, British and Foreign* 23: 239. 1885

(Vesicant.)

Tylophora flexuosa R. Br. (*Asclepias tenuissima* Roxb.; *Asclepias tetrapetala* Dennst.; *Hoya flexuosa* (R. Br.) Spreng.; *Hoyopsis dielsii* H. Lévy.; *Tylophora carnosa* Wall. ex Wight; *Tylophora dielsii* (H. Lévy.) Hu; *Tylophora hoyopsis* H. Lévy., nom. illeg.; *Tylophora tenuis* Blume; *Tylophora tenuissima* (Roxb.) Wight & Arn.; *Tylophora tetrapetala* (Dennst.) Suresh; *Vincetoxicum flexuosum* (R. Br.) Kuntze)

SE Asia, India, Australia. Slender twiner, glabrous, milky latex, small purple flowers

See *Species Plantarum* 1: 214–217. 1753, *Genera Plantarum* 130. 1776, *Prodromus Florae Novae Hollandiae* 459–460. 1810, *Schlüssel Hortus indicus malabaricus, ...* 35. 1818, *Systema Vegetabilium*, editio decima sexta 1: 843. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 41–42. 1832, *Contributions to the Botany of India* 49. 1834, *Revisio Generum Plantarum* 2: 424. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 262. 1914, *Flore du Kouy-Tchéou* 44. 1914–15, *Journal of the Arnold Arboretum* 5(4): 232. 1924, *Taxon* 33: 126–134. 1984, *Interpret. Van Rheede's Hort. Malab.* 64. 1988

(Plant used against excessive perspiration, biliousness, urticaria and smallpox; decoction an antidote to arsenic poison)

and snake poison. Crushed leaves of *Tylophora tenuis* and *Morinda citrifolia* mixed in water and drunk as febrifuge. Crushed leaves into a paste applied to treat rheumatism; leaf decoction taken in fever and pain. Ceremonial, religious.)

in China: xiao ye wa er teng

in India: kodi neeli, mufun, nanjaruppan, parparam, putharivally

Tylophora floribunda Miquel (*Tylophora chungii* Merrill ex F.P. Metcalf; *Tylophora floribunda* Benth., nom. illeg. hom.; *Tylophora shikokiana* Matsumone ex Nakai; *Vincetoxicum floribundum* (Miquel) Franchet & Savatier)

Japan, Australia.

See *Genera Plantarum* 130. 1776, *Prodromus Florae Novae Hollandiae* 460. 1810, *Annales Museum Botanicum Lugduno-Batavi* 2: 128. 1866, *Flora Australiensis: a description ...* 4: 335. 1868, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 2: 444. 1877 and *Journal of the College of Science, Imperial University of Tokyo* 31: 91. 1911, *Lingnan Science Journal* 11(2): 264–265. 1932, *Proceedings of the Royal Society of Queensland* 59: 168. 1948

(Roots for the treatment of infantile convulsions, diphtheria, traumatic injury, toothache and snakebites.)

in English: manyflowered tylophora

in China: duo hua wa er teng, wa er teng

Tylophora glabra Costantin (*Tylophora longipedicellata* Tsiang & P.T. Li; *Tylophora renchangii* Tsiang)

SE Asia.

See *Flore Générale de l'Indo-Chine* 4: 109. 1912, *Sunyatsenia* 3(2–3): 232–233, pl. 28. 1936, *Acta Phytotaxonomica Sinica* 12(1): 136–138, pl. 33. 1974

(Roots for the treatment of traumatic injury and fractures, and the leaves for viper bites.)

in English: long-pedicel tylophora, renchang tylophora

in China: chang geng wa er teng

Tylophora indica (Burm.f.) Merr. (*Apocynum reticulatum* Lour., nom. illeg., non *Apocynum reticulatum* L.; *Asclepias asthmatica* L.f.; *Cynanchum indicum* Burm. f.; *Tylophora asthmatica* (L.f.) Wight & Arn.; *Tylophora asthmatica* Wight & Arn.)

India. Twiner, herbs or undershrubs, branching climber, short knotty rootstock, brittle fibrous roots, greenish-reddish-purple flowers in many-flowered umbels, fusiform divaricate foli- cles, yellowish sap

See *Species Plantarum* 1: 212–217. 1753, *Flora Indica ... nec non Prodromus Florae Capensis* 70. 1768, *Supplementum Plantarum* 171. 1781, *Flora Cochinchinensis* 167. 1790, *Contributions to the Botany of India* 51. 1834 and *Philippine Journal of Science* 19: 373. 1921, *Taxon* 29: 360–361. 1980,

Proceedings of the Indian Science Congress Association 75(3-VI): 233–234. 1988, *Thorax* 55(11): 925–9. 2000, *Phytomedicine* 8(5): 348–55. 2001, *Phytomedicine* 8(6): 431–7. 2001, *J. Med. Food*. 7(3): 343–8. 2004

(Used in Ayurveda. Intake of any part of the plant causes fatal poisoning; when drunk the juice produces nausea, vomiting. Roots stimulant, emetic, expectorant, potentially antitumor, stomachic, diaphoretic, antispasmodic, used for the treatment of asthma, bronchitis, whooping cough, dysentery, diarrhea. Leaves emetic, diaphoretic, chewed for asthma; leaf decoction taken for body pain. Roots and leaves used in hydrophobia. *Tylophora* alkaloids inhibit cellular immune responses like contact sensitivity to dinitro-fluorobenzene and delayed hypersensitivity to sheep red blood cells, in vivo; these alkaloids suppress cellular immune responses when administered at any stage during the immune response, have been shown to have antiasthmatic, antiinflammatory and antianaphylactic properties. Cytotoxic alkaloids. Veterinary medicine, leaves ground with those of *Tinospora cordifolia* and goat milk, given in insect bite; leaves along with pepper and garlic made into a paste and given as antidote; entire plant for lung problems and asthma.)

in English: emetic swallow-wort, Indian ipecacuanha

in India: aadumuttadasoppu, adumuttada gida, adumuttoda, aitimula, anantamul, anantamula, ananthamul, antamul, antomul, buidari, damni, damni vel, jangli pikvam, jangli-pikwam, jangli-pikwan, kakapala, kashuthai palai, khodiki raasna, kirumanji, kondachani, kukkapaala, kukkapala, kurinja, mekameyaniku, mekameyani theega, mendi, mulini, nach-churuppan, nanjamurichchaan, nanjaruppan, nanjuruthankodi, nalpalai, nayelate, nayppalai, pitkari, pittamari, rasnabheda, tolyama, vallipaala, vallipal, verri-pala, verripaala

Tylophora kerrii Craib (*Tylophora balansae* Costantin; *Tylophora pseudotenerrima* Costantin)

SE Asia.

See *Bull. Misc. Inform. Kew* 1911(10): 417. 1911, *Flore Générale de l'Indo-Chine* 4: 108, 111. 1912

(Roots used for the treatment of snakebites and swellings.)

in English: Kerr tylophora

in China: ren shen wa er teng

Tylophora koi Merrill (*Tylophora sootepensis* Craib; *Tylophora taiwanensis* Hatusima)

China.

See *Bulletin of Miscellaneous Information Kew* 1911(10): 417. 1911, *Sunyatsenia* 2(1): 17–18, pl. 8. 1934, *Journal of Geobotany; or the Hokuriku Journal of Botany* 12: 10. 1963

(Used for the treatment of snakebites and traumatic injury.)

in English: Ko tylophora

in China: tong tian lian

Tylophora ovata (Lindley) Hooker ex Steudel (*Diplolepis ovata* Lindley; *Gymnema hirsutum* Wight & Arn., nom. illeg.; *Gymnema hirsuta* Wallich; *Gymnema hirsutum* Wall.; *Tylophora atrofolliculata* F.P. Tsiang & P.T. Li; *Tylophora ovata* var. *lanyuensis* (Liu & Lu) S.S. Ying; *Tylophora panzhutenga* Z.Y. Zhu)

India.

See *Prodromus Florae Novae Hollandiae* 460–462. 1810, *On the Asclepiadeae* 30. 1810, *Tentamen Florae Napalensis Illustratae* 50. 1824, *Transactions of the Horticultural Society of London* 6: 268–269. 1826, *Contributions to the Botany of India* 44–45, 49. 1834, *Nomenclator Botanicus*. [Steudel], Editio secunda 2: 726. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 610. 1844, *Numer. List* [Wallich] n. 8202. 1847 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 196–197. 1911, *Lingnan Science Journal* 11(2): 265–266, f. 1. 1932, *Acta Phytotax. Sin.* 12(1): 134. 1974, *Bulletin of Botanical Research* 3(2): 153–155, pl. 1. 1983, *Mem. Coll. Agric. Nation. Taiwan Univ.* 29(2): 54. 1989

(The roots are used for the treatment of leukemia, asthma, snakebites, and traumatic injury. Potential antitumor.)

in English: ovate tylophora

in China: wa er teng, san shii liu dang

in India: dudhi, lerni, terni

Tylophora perrottetiana Decne.

Philippines.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 609. 1844

(Leaves vulnerary.)

in Philippines: kul-langem, maraipus ti bakes

Tylophora sylvatica Decne. (*Tylophora bojeriana* Decne.; *Vincetoxicum sylvaticum* (Decne.) Kuntze)

Tropical Africa. Perennial pubescent twiner, dark red-purple flowers in clusters, linear fruits, seeds crowned with a coma of silky hairs

See *Genera Plantarum* 130. 1776, *Ann. Sci. Nat., Bot.* sér. 2, 9: 273–274. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 607–608. 1844, *Revisio Generum Plantarum* 2: 425. 1891 and *Acta Phytotaxonomica Sinica* 12: 94. 1974

(Decoction drunk to arrest abortion, for soothing coughs. Healing sores, rheumatism and skin diseases. Magic, protection against lightning.)

Tylosema (Schweinf.) Torre & Hillcoat Fabaceae (Caesalpinaceae, Cercideae, Leguminosae)

From the Greek *tylos* ‘lump, knob’ and *sema* ‘standard, a sign, mark’, referring to the large seeds. Some taxonomists do not consider *Tylosema* a separate genus, but include it in *Bauhinia*, see *Flora Zambesiaca* 4: 433–434. 1978, van Wyk, B.-E. and Gericke, N. *People’s Plants. A Guide to Useful Plants of Southern Africa*. Briza Publications, Pretoria 2000, *Botanical Bulletin of Academia Sinica Taipei* 44(3): 223–228. 2003, Castro, S. et al. “Systematic studies in *Tylosema* (Leguminosae).” *Botanical Journal of the Linnean Society* 147(1): 99–115. 2005.

Tylosema esculentum (Burch.) A. Schreib. (*Bauhinia bainesii* Schinz; *Bauhinia burkeana* (Benth.) Harv.; *Bauhinia esculenta* Burch.; *Phanera burkeana* Benth.; *Tylosema esculentum* A. Schreib.)

Kalahari desert, South Africa. Perennial climbing shrub, prostrate, trailing, creeping, herbaceous or woody, huge tuberous root, deeply bilobed leaves, inflorescence a lateral raceme, petals yellow to reddish, woody pods, seeds eaten boiled or roasted, immature seeds and stems eaten cooked as a vegetable, young tubers eaten, tubers emergency source of water, pods and tubers eaten by animals, a source of oil from the seeds, drought-adaptive mechanisms, arid and semi-arid regions

See *Mitteilungen der Botanischen Staatssammlung München* 3: 611. 1960, *Kew Bulletin* 31(2): 219–220. 1976, *Economic Botany* 41(2): 216–220. 1987

(Recorded presence of toxic constituents or antinutritional factors in the seeds and tubers. Antioxidant, believed to contain phenolic compounds considered as potential phytochemical protectants because they act as antioxidants. Antibacterial, antiviral, antioxidant and antifungal activity of bean extracts.)

in English: camel’s foot, gemsbok bean, gemsbuck bean, marama bean, morama bean

in Namibia: noukom, tjhng, tschnng

in South Africa: braaiboontjie, elandsboontjie, gami, marama, maramaboontjie, marumama, morama, ombanui, tsi, tsin

Tylosema fassoglensis (Schweinf.) Torre & Hillc. (*Bauhinia cissoides* Oliv.; *Bauhinia fassoglensis* Kotschy ex Schweinf.; *Bauhinia fassoglensis* Schweinf.; *Bauhinia kirkii* Oliv.; *Bauhinia welwitschii* Oliv.; *Tylosema fassoglense* (Kotschy ex Schweinf.) Torre & Hillc.; *Tylosema fassoglense* (Schweinf.) Torre & Hillc.; *Tylosema fassoglensis* (Kotschy) Torre & Hillc.; *Tylosema fassoglensis* (Kotschy ex Schweinf.) Torre & Hillc.)

Eastern and central tropical Africa. Perennial non-climbing shrub, extremely variable, vine, trailing, clambering, spreading, straggling, prostrate, climbing, herbaceous or woody,

stout, large underground tuber, axillary forked tendrils, alternate heart-shaped bilobed leaves, inflorescence a lateral raceme, crinkled petals light yellow to pink-orange, broad flat leathery pods, seeds baked and eaten or boiled and roasted, young pods eaten raw or cooked, fresh seeds eaten raw, cattle and goat fodder, leaves and young branches grazed, bee forage, water obtained from the tubers, sap from the shoots used as potable water, in *Adansonia-Commiphora* bushland, woodland, grassland, forest edge, dry *Acacia* bushland

See *Species Plantarum* 1: 374–375. 1753, *Flora* 29: 598. 1846, *Reliquiae Kotschyanae* 14, pl. 12. 1868, *Fl. Trop. Afr.* [Oliver et al.] 2: 287–288. 1871 and *Bol. Soc. Brot. sér. 2*, 29: 38. 1955, *Cahiers Agricultures* 3(5): 323–328. 1994

(Stem and leaves astringent, stomachic, febrifuge, for diarrhea. Infusions of powdered flowers drunk against jaundice and hypertension. Roots and flowers decoction drunk to treat impotence; root decoction a remedy for stomachache, gastrointestinal problems, diarrhea, anemia, fever and pneumonia, and after childbirth. Pulverized tuber taken for the treatment of venereal diseases; tubers used for backache. Veterinary medicine, root decoctions administered as a galactagogue to cows before calving. Fish poison and insecticide from the leaves.)

in English: camel's foot, fish poison bean, sprawling bauhinia, yellow creeping bauhinia

in Kenya: bassac, chingaayu, chingayu, dalamboi, esinkarua, imbasa, ivole, kamachayu, kumuchayu, ombasa, wanga

in Tanzania: esinkarua, mbalawala

in Zimbabwe: muMbova, muRama, muTewa (Shona)

Tynanthus Miers Bignoniaceae

Greek *tynnos* 'so small' and *anthos* 'flower', see *Proc. Roy. Hort. Soc. London* 3: 193. 1863 and *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000.

Tynanthus panurensis (Bur.) Sandw. (*Schizopsis panurensis* Bureau; *Tynnanthus panurensis* (Bureau) Sandwith)

Tropical South America, Amazon rainforest. Large woody vine, very small white flowers, elongated flat bean-like fruits, vine bark and root with a distinctive clove-like aroma

See Bureau, Edouard, *Monographie des Bignoniacées*. 44. Paris, 1864, *Adansonia* 5: 373. 1865 and *Kew Bulletin* 1953: 465. 1954

(Analgesic, febrifuge, stimulant, anti-rheumatic, increases libido, relieves pain, stimulates digestion, expels gas, employed for fever, dyspepsia, aching muscles and arthritis pain, an impotency and frigidity remedy, for weak erections, and an effective aphrodisiac for both men and women; also used as an adjunctive ingredient in various Ayahuasca recipes. Fresh sap or resin from the root of the plant used as a toothache remedy. Magic, ritual, ceremonial.)

Common names: cipó cravo, cipó trindade, clavo huasca, clavohuasca, clove vine, white clove

Typha L. Typhaceae

Typhes, *tiphe* applied by Theophrastus, Dioscorides and Aristoteles (*Historia animalium*) to a kind of grass or straw or other aquatic plants used for stuffing beds and bolsters, Aristophanes (*The Acharnians*) and Claudius Aelianus (*De natura animalium*) applied to a species of water bug or beetle; Latin *tiphe*, *es* for a kind of grain, Peter's corn, one-grained wheat (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 971. 1753, *Genera Plantarum*. Ed. 5. 418. 1754, *Genera Plantarum* 25. 1789 and *Fieldiana, Bot.* 24(1): 63–67. 1958, *Darwiniana* 14: 413–429. 1967, *Fl. Prov. Buenos Aires* 4(1): 273–278. 1968, *Fl. in Pakistan: kul

in Philippines: balangot, homai-homai, kaidked, lampakanai, tubal-tubal

Maori names: raupo, hune (= pappus of the seeds)

in Kenya: ekamate

in Madagascar: vondro

in Yoruba: ewu egungun

Typha australis K. Schum. & Thonner (*Typha angustata* Bory & Chaub.; *Typha angustifolia* subsp. *angustata* (Bory & Chaub.) Briq.; *Typha angustifolia* subsp. *australis* (Schumach.) Kronf.; *Typha angustifolia* L. var. *angustata* (Bory & Chaub.) Jordanov; *Typha angustifolia* var. *australis* (Schumach.) Rohrb.; *Typha australis* Schumach.; *Typha domingensis* var. *australis* (Schumach.) Gèze; *Typha salgirica* A. Krasnova)

India. Perennial herb, leaves acuminate, very minute unisexual flowers, male and flowers separated, minute nutlets, shoots as fodder

See *Species Plantarum* 2: 971. 1753, *Beskrivelse af Guineiske planter* 401. 1827, *Expéd. Sci. Morée, Bot.* 338. 1832, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 11: 83. 1870, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien* 39: 156. 1889 and *Prodrome de la Flore Corse* 1: 643. 1910, *Bulletin de la Société Botanique de France* 58: 459. 1911

(Ash of inflorescence applied externally on wounds to prevent pus formation. Rhizomes astringent, diuretic. Plant cause pollen allergy.)

in India: ghabajariu, ghav-bajara, kander, patar, ramban

Typha domingensis (Pers.) Steud. (*Massula angustifolia* (L.) Dulac; *Typha abyssinica* Rchb.f. ex Rohrb.; *Typha aequalis* Schnizl.; *Typha aethiopica* Kronf.; *Typha americana* Rich. ex Rohrb.; *Typha angustata* Bory & Chaub.; *Typha angustata* subsp. *aethiopica* (Rohrb.) Acad. Sin.* 30: 220. 1989

(Said to be non-toxic to sheep.)

in English: bulrush, cat tail, reed-mace, small bulrush, southern cat tail, southern cattail

in Arabic: bardi, berdi

in Australia: narrow-leaved bulrush, narrow-leaved cumbungi

in India: kander

in Japan: hime-gama

in Okinawa: kama, hama

in China: xiang pu

in Yoruba: ewu egungun

Typha elephantina Roxb. (*Typha elephantina* var. *schimperii* (Rohrb.) Graebn.; *Typha latifolia* subsp. *maresii* (Batt.) Batt.; *Typha maresii* Batt.; *Typha schimperii* Rohrb.)

China, Sahara. Perennial/biennial rhizomatous herbs, erect, tall, hardy, prostrate cylindrical articulated underground rhizome, roasted seeds edible, paludal areas, leaves fodder

See *Flora Indica*; or, descriptions of Indian Plants ed. 1832, 3: 566–567. 1832, *Verh. Bot. Vereins Prov. Brandenburg* 11: 95. 1869, *Bull. Soc. Bot. France* 34: 389. 1887, *Fl. Algérie* 1(2): 18. 1895 and *Pflanzenr.*, IV, 8: 11. 1900

(Plant aphrodisiac, good for eyes and spleen enlargement. Rhizomes diuretic, astringent, antibacterial, used in dysentery, gonorrhoea, measles; a decoction in ear as drop for treatment of purulent discharge from ear. Root paste for dropsy, skin eruption, madness; rootstock used in dysentery and gonorrhoea. Stamens and pollens astringent and styptic. Ripe fruit applied on wounds and ulcers. Ripe fruit and the soft woolly inflorescence of the male spadix applied to wounds and ulcers. Veterinary medicine, ash made by burning inflorescences mixed with mustard oil applied to septic wounds of cattle. Magico-religious beliefs.)

in China: xiang pu

in India: dal nabad, ghabajario, hogla, jammugaddi, jangli bajri, kalroon, pankanis, patera, petch, sambu

Typha latifolia L. (*Massula latifolia* (L.) Dulac; *Typha ambigua* Schur ex Rohrb.; *Typha angustifolia* proles *brownii* Kronf.; *Typha angustifolia* lusus *uechtritzii* Kronf.; *Typha angustifolia* var. *elatior* (Boenn.) (Oslo)* 30: 10–15. 1999

(Poultice of crushed roots disinfectant, applied to wounds, bleeding navels, bleeding wounds and cuts, carbuncles and boils, sores, infections; root chewed by women for gonorrhoea; roots and leaves for abdominal cramps. A sterilizer, a decoction of the rhizomes mixed with *Catasetum fimbriatum* for regulating fertility. Leaves used for sores. Stalks decoction taken for whooping cough. Ceremonial, whole plant emetic, leaves used in the Sun Dance ceremony. Veterinary medicine, roots used as a wash for horses with bleeding cuts.)

in English: broad-leaved cat tail, broadleaf cattail, bullrush, cat tail, cat's tail, common cat's tail, common cattail, great reedmace, nailrod

in North America: hawahawa, kirit-tacharush, ksho-hi, wahab' igaskonthe, wihuta-hu

in Paraguay: memby ve y ja, poha marangatu, poha tavyterá

in China: kuan ye xiang pu, xiang pu

Typha orientalis C. Presl (*Typha latifolia* var. *orientalis* (C. Presl) Rohrb.; *Typha orientalis* var. *brunnea* Skvortsov; *Typha shuttleworthii* Lehm., nom. illeg.; *Typha shuttleworthii* subsp. *orientalis* (C. Presl) Graebn.; *Typha shuttleworthii* var. *orientalis* (C. Presl) Rohrb.)

SE Asia. Reed, sometimes submerged in water, made bread from the edible pollen

See *Flora* 28: 343. 1845, *Plantae Preissianae* 2: 1. 1846, *Epimeliae Botanicae*. 239. Pragae [Prahá], 1851 [Reprinted from: *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 361–624, pl. 1–15, 1851], *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 599. 1851, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 11: 80. 1869 and Cockayne, Leonard (1855–1934), *New Zealand Plants and Their Story*. Wellington, Govt. Print., 1967, *J. Phytogeogr. Taxon.* 37(2): 120. 1989

(Root stalk astringent and diuretic.)

in English: broad-leaved bulrush, bulrush

in Australia: broad-leaved cumbungi

Maori name: raupo

in China: dong fang xiang pu, hsiang pu

Typhonium Schott Araceae

Greek *typhonios*, *typhonion* applied by Dioscorides (3.26) to a kind of lavandula, *typhonia* is the plant *stoichas*, see *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 732. 1829 and *Das Pflanzenreich* IV 23F(Heft 73): 109, 114. 1920, *Cytologia* 43: 289–303. 1978, *Genét. Ibér.* 30–31: 161–188. 1979, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, *Botanical Journal of the Linnean Society* 109(3): 428, 430. 1992, Hay, A. “The genus *Typhonium* (Araceae - Araceae) in Australasia.” *Blumea* 37: 345–376. 1993, Sriboonma, D., J. Murata & K. Iwatsuki, “A revision of *Typhonium* (Araceae).” *J. Fac. Sci. Univ. Tokyo*, III, 15: 255–313. 1994, *Blumea* Suppl. 8: 1–161. 1995, Helmut Genauast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 666. Basel 1996, *Edinburgh J. Bot.* 54(3): 329–336. 1997.

Typhonium angustilobum F. Muell. (*Typhonium millari* Bailey)

Australia

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 732. 1829, *Fragmenta Phytographiae Australiae* (Mueller) 10(83): 66. 1876, *Dept. Agric. Brisbane Bot. Bull.* 2: 20. 1891 and *Plant Physiology* 25: 1053–1058. 1984

(The rhizomes of this species are acrid.)

Vernacular name: wanjallo

Typhonium blumei Nicolson & Sivadasan (*Typhonium divaricatum* auct. non Blume, nom. illegit.)

China.

See *Blumea* 27(2): 494. 1981, *Botanical Bulletin of Academia Sinica* 37: 159–163. 1996

(The tuber is poisonous. It is used as medicine for treatment of traumatic injury, abscesses, snake and insect bites, lymphotuberculosis and vasculitis.)

in China: li tou jian

Typhonium brownii Schott

Asia.

See *Aroideae* 11, t. 15. 1855

(The rhizomes of this species are acrid.)

Typhonium diversifolium Wall. ex Schott (*Heterostalis diversifolia* (Wall. ex Schott) Schott; *Heterostalis huegeliana* (Schott) Schott; *Heterostalis huegeliana* Schott; *Typhonium diversifolium* Wall., nom. nud.; *Typhonium diversifolium* Schott ex Lindl.; *Typhonium diversifolium* var. *huegelianum* (Schott) Engl.; *Typhonium huegelianum* Schott)

India. Tuberous roots eaten in time of famine

See *A Numerical List of Dried Specimens* n. 8933 A. 1832, *Aroideae* 1: 13, t. 19, 20. 1853, *Oesterreichisches Botanisches*

Wochenblatt 7: 261. 1857, *Monographiae Phanerogamarum* 2: 618. 1879

(Roots poisonous in nature. Tuber decoction astringent, for diarrhea; small quantity of root powder mixed with honey avoid feeling of hunger for some days. Flowers stimulate menstruation. Fruit used in case of poisoning, suffocation.)

in India: jurasi, nagdoon, nak, nakdoom, nakdoon

in Tibet: dwa ba

Typhonium flagelliforme (Loddiges) Blume (*Arum angulatum* Griff.; *Arum cuspidatum* Blume; *Arum flagelliforme* Loddiges; *Arum flagelliforme* Roxb. ex Loddiges; *Heterostalis flagelliformis* (Lodd.) Schott; *Typhonium cuspidatum* (Blume) Decaisne; *Typhonium cuspidatum* Decne.; *Typhonium hastiferum* Miq.; *Typhonium reinwardtiana* Vriese & Miq. ex Miq.)

China. Tuberous, erect, stemless herbs

See *Species Plantarum* 2: 964. 1753, *Botanical Cabinet*; consisting of coloured delineations . . . t. 396. 1819, *Catalogus* ... 101. 1823, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 732. 1829, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 367. 1834, *Rumphia* 1: 134. 1837, *Oesterreichisches Botanisches Wochenblatt* 7: 261. 1857 and *Plant Physiology* 25: 1053–1058. 1984, *Planta Med.* 63(6): 580. 1997, *J. Ethnopharmacol.* 77(1): 129–131. 2001, *Journal of Chinese Medicinal Materials* 24(10): 735–738. 2001, *Phytother. Res.* 15(3): 260–262. 2001, *Journal of Chinese Medicinal Materials* 27(3): 173–175. 2004, *Guang Pu Xue Yu Guang Pu Fen Xi.* 24(4): 427–430. 2004, *Z. Naturforsch. [C].* 60(7–8): 600–604. 2005

(*Typhonium cuspidatum* contains irritating crystals of calcium oxalate, crystals are not poisonous. Tuber used for treatment of cough and reducing phlegm, chronic bronchitis, externally for traumatic injury and abscesses. Antiasthmatic, analgesic, cytotoxic, anti-inflammation and sedation; often used as an essential ingredient of herbal remedies for alternative cancer therapies. A cerebroside with significant anti-hepatotoxic activity and a phenylpropanoid glycoside were isolated from *Typhonium flagelliforme*.)

in English: false shui banxia, rodent tuber

in China: bian yan li tou jian

in India: nelenschena major

in Pacific: pantake

Typhonium giganteum Engler (*Typhonium giganteum* var. *giraldii* Baroni; *Typhonium giraldii* (Baroni) Engler; *Typhonium giraldii* Engl.; *Typhonium stoliczkae* Engler)

China.

See *Nuovo Giornale Botanico Italiano* 4: 189, t. 6. 1879, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 4(1): 66. 1883 and *Das Pflanzenreich* IV. 23F (Heft 73): 110. 1920, *Phytother. Res.*

14(1): 24–29. 2000, *J. Asian Nat. Prod. Res.* 3(4): 277–283. 2001, *China Journal of Chinese Materia Medica* 29(10): 974–977. 2004 [Detection of differentially expressed genes in hepatocellular carcinoma cells SMMC-7721 treated with *Typhonium giganteum* extract by mRNA differential display.], *Planta Med.* 71(6): 580–584. 2005, *Cell Biol. Int.* 31(9): 908–915. 2007

(Used for treatment of stroke and for the relief of pain. Tuber used for the treatment of traumatic injury, lymphotuberculosis and tetanus.)

Common name: baifuzi (the dried root tuber)

in China: du jiao lian, tu chio lien

Typhonium hunanense H. Li & Z.Q. Liu

China.

See *Bulletin of Botanical Research* 3(1): 155–156, f. 1. 1983

(Used for treatment of swellings, abscesses and snakebites.)

in China: hu nan li tou jian

Typhonium roxburghii Schott (*Arum divaricatum* L.; *Arum diversifolium* Blume; *Arum roxburghii* Thwaites; *Arum trilobatum* Roxb.; *Arum trilobatum* Thunb., nom. illeg., non *Arum trilobatum* L.; *Typhonium divaricatum* (L.) Decne.; *Typhonium javanicum* Miq.; *Typhonium mottleyanum* Schott; *Typhonium roxburghii* Baker; *Typhonium schottii* Prain; *Typhonium trilobatum* var. *schottii* (Prain) Engler)

Sri Lanka, India. Subterranean, stem subglobose to globose

See *Species Plantarum* 2: 964, 966. 1753, *Catalogus* ... 102. 1823, *Flora Indica*; or, descriptions of Indian Plants 3: 505. 1832, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 367. 1834, *Aroideae* 1: 12, t. 17. 1855, *Enumeratio Plantarum Zeylaniae* 432. 1864 and *Blumea* 27: 483–497. 1981, *Plant Physiology* 25: 1053–1058. 1984, *Z. Naturforsch.* [C]. 60(7–8): 600–604. 2005

(The tuber is very irritant, rubefacient. Corms used in skin eruptions and diarrhea; juice for yaws.)

in India: khajiri-suram

in Malay Peninsula: keladi puyoh

in Philippines: gabigabihan

Typhonium schottii Prain (*Typhonium divaricatum* (L.) Decne. var. *schottii* (Prain) Engl.; *Typhonium trilobatum* var. *schottii* (Prain) Engler)

India. Tuberous herb, leaves hastate, small greenish-yellow spathe, leaves as vegetable

See *Species Plantarum* 2: 966. 1753, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 367. 1834, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 67: 303. 1898 and *Das Pflanzenreich* 4, 23F: 118. 1920

(Tubers applied in skin diseases.)

Typhonium trilobatum (L.) Schott (*Arum orixense* Roxb.; *Arum orixense* Roxb. ex Andrews; *Arum trilobatum* L.; *Arum trilobatum* Thunb., nom. illeg.; *Arum trilobatum* Roxb.; *Desmesia orixensis* Raf.; *Desmesia orixensis* (Roxb. ex Andrews) Raf.; *Dracunculus trilobatus* Raf.; *Dracunculus trilobatus* (L.) Raf.; *Typhonium orixense* (Roxb. ex Andrews) Schott; *Typhonium orixense* Schott; *Typhonium siamense* Engl.; *Typhonium trilobatum* Schott; *Typhonium triste* Griff.)

India, Sri Lanka. Tuberous herbs, erect, glabrous, stemless, tuber globose or subglobose, leaves 3-partite, spathe ovate narrowed into long slender point, exerted spadix, globose seeds, young leaves sometimes used as vegetable, tubers eaten boiled

See *Species Plantarum* 2: 965. 1753, *Flora Japonica*, ... 234. 1784, *Botanist's Repository*, for new, and rare plants 5: t. 356. 1804, *Prodromus Florae Novae Hollandiae* 336. 1810, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 72. 1829, *Linnaea* 6(Lit.): 54. 1831, *Flora Indica*; or, descriptions of Indian Plants 3: 503–505. 1832, *Flora Telluriana* 3: 63, 65. 1837 [1836 publ. Nov–Dec 1837], *Notulae ad Plantas Asiaticas* 3: 145. 1851, *Monographiae Phanerogamarum* 2: 615. 1879, *FBI* 6: 509. 1890 and *Bull. Bot. Survey India* 18(1–4): 19. 1976, *Bangladesh Journal of Botany* 10: 182–186. 1981, *Bot. Commelins* 46. 1983

(Used in Sidha. Lukewarm stem juice along with salt dropped in ear for earache. Latex applied on abscess and pimples. Tuber powder given in cancer of uterus and skin diseases. Rootstock stimulant, expectorant, as a poultice for hemorrhages, bronchitis, tonsillitis, skin diseases, snakebites, stomach complaints, rheumatism, taken internally for the treatment of piles. Leaves and petioles made into a sauce a remedy for piles and bodyache. Veterinary medicine, raw tubers with banana to the cattle against worm infection.)

in India: anaiyatikkilanku, aracokanaku, arecanacetti, arecanam, arecankantu, cakunam, cakunakkilanku, cattikaranai, chema kachu, choma-kachu, chomahu, curalam, ghet kachu, hen-wa, kanbansuri, karakkaranai, karanai, karanakkilanku, kararkaranai, karicckilanku, karikkaranai, karkaranai, karkaranai, karppavakkilanku, karppavam, karu karunai kilanku, karunai, karunai-k-kilanku, karunai kizhangu, karunai thandu, karunaikkilanku, karunkaranai, karunkura, karunkurakkilanku, katumpalai, katumpalam, kharkon, narkaranai, nattukkarunai, nirbish, pidikaranai, pitikaranai, somakachu, vitarukakkilanku, vitarukam

India. Tuberos herbs, large globose tubers, flowers monoecious

See *Species Plantarum* 2: 964. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 315. 1789, *Prodr. Stirp. Chap. Allerton* 260. 1796, *Systema Vegetabilium*, editio decima sexta 3: 769. 1826, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 732. 1829, *Plantae Asiaticae Rariores* 2: 10–11, t. 115. 1831, *Meletemata Botanica* 1: 17. 1832, *Rumphia* 1(7–9): 109 (–110). 1836, *Flora Telluriana* 3: 63. 1837 [1836 publ. Nov–Dec 1837], *Hortus Britannicus* 631. 1839, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 3: 281. 1841, *Oesterreichische Botanische Zeitschrift* 8: 349. 1858, *Wochenschrift für Gärtnerei und Pflanzenkunde* 1: 263. 1858 and *Das Pflanzenreich* IV. 23B (Heft 37): 73(iv. 23F): 125. 1920, *Cytologia* 41: 55–61. 1976, *Taxon* 25: 631–649. 1976, *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 110. 1978, *Proc. Indian Sci. Congr. Assoc.* 78(3,VIII): 136–137. 1991, *Immunol. Invest.* 24(5): 845–855. 1995, *Aroideana* 23: 48–55. 2000, *Z. Naturforsch.* [C]. 60(7–8): 600–604. 2005

(Highly irritant. Root paste applied to skin infections. Tubers applied to the bite of venomous snakes, and also at the same time given orally. Corms used as a stimulating poultice; corm powder with honey given for tuberculosis, bleeding piles and in blood disorders; fresh corm paste applied over scorpion sting. Mitogenic potential towards

human peripheral blood lymphocytes. Veterinary medicine, fresh tubers ground and applied on the sores of animals, and also when bitten by snakes.)

in English: monarch of the East, red calla, voodoo lily

in India: bhasamkand, bhuisitaphal, chamus, sap-ki-kheti

Typhonodorum Schott Araceae

Greek *typhos* ‘a furious whirlwind, typhoon, stormy wind, a waterspout’ and *doron* ‘a gift’, in Greek legend Typhon or Typhaon was a hundred-headed monster buried by Zeus in Tartarus under Mt. Aetna; see *Oesterreichisches Botanisches Wochenblatt* 7: 69–70. 1857 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 666. 1996.

Typhonodorum lindleyanum Schott (*Arodendron engleri* Werth; *Typhonodorum madagascariense* Engl.)

Tanzania, W. Indian Ocean. Perennial herb, aquatic, giant, erect false-stems, thick rootstock eaten, white leaf-like spathe, columnar spadix flesh-pink, large yellow round berries famine food, in fresh water swamps

See *Oesterreichisches Botanisches Wochenblatt* 7: 69–70. 1857, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(2): 188. 1880 and *Flore de Madagascar et des Comores* 31: 1–71. 1975

(Roots edible but poisonous unless repeatedly boiled and the water discarded. Tubers often cause itching in the throat.)

Common names: mangaoka, mangibo, viha, via

in English: giant aroid

in Tanzania: mgombakofi, mtongonya

U

Uapaca Baillon Phyllanthaceae (Euphorbiaceae, Uapacaceae)

A Madagascan vernacular name; see *Étude Euphorb.* 595. 1858 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 667. Basel 1996, Werner Rauh, *Succulent and Xerophytic Plants of Madagascar.* 1: 42, 43, 92. 1995 and 2: 287. 1998.

Uapaca corbisieri De Wild. (*Uapaca esculenta* A. Chev. ex Aubrév. & Leandri)

W. & WC Trop. Africa. Tree, flaking bark, stilt roots, inner bark contains a red sap, flowers yellow, fruit edible, wood hard, sapwood pale yellow, heartwood light pink, good charcoal, in swamp, damp rainforest

See *Comptes Rendus des Séances et Mémoires de la Société de Biologie (Paris)* 96: 118. 1927, *Bull. Soc. Bot. France* 82: 52. 1935

(Tonic, emetic.)

in English: black rikio, sugar plum

in Central African Republic: mo singi, mosingi

in Ghana: alohowa, kontan-miri, kuntammiri

in Guinea: zong'o

in Ivory Coast: admellébié, alohua, borikio, boué, bué, kantu, kebi, kébi, namby, nanby, sana, somon

in Liberia: beyor, karro, soang-ti

in Nigeria: asisa, gagara (Yoruba)

in Sierra Leone: nja kondi, suane

in Zaire: bossenge, mole

Uapaca guineensis Müll.Arg. (*Uapaca bingervillensis* Beille)

Tropical Africa. Tree, dioecious, many-branched, fast growing, flaking bark, stilt roots, straight fluted bole, flowers yellow, fruits brown-green eaten when ripe, fruits eaten by flying foxes, monkeys, chimpanzees and gorillas, forest edge, in seasonally flooded forest, along rivers, savanna edge, in lowland forest, in rainforest

See *Étude générale du groupe des Euphorbiacées* 595. 1858, *Flora* 47: 517. 1864 and *Bulletin de la Société Botanique de France* 55 Mém. 8: 66. 1908

(Roots tonic, antiplasmodial, antiamebic, emetic, aphrodisiac and to treat male impotence, a blocked nose, pulmonary

afflictions, fever, edema, gastro-intestinal problems, headache; a root bark decoction taken to treat female sterility, toothache, rheumatism and piles. Bark infusion drunk as a remedy for stomach complaints. A decoction of leaves, stem bark or root bark taken to treat dysentery, diarrhea, stomachache and venereal diseases. Unripe fruits a cough medicine. Flowers and bark enter into arrow poison preparations.)

in English: false mahogany, red cedar, sugar plum

in Cameroon: asam, assam, banka, bossambi, lissamba, lesambo, sengui, singi

in Central African Republic: dobo, mo singi, moingalé, mosiwgi

in Congo: bokangu, bossenghe, kisamfi, makala, makangu, matela, molengo, n'samvi, n'sanvi, ndzara, samfi

in Gabon: assam, ossambi, rikio, yambi

in Ivory Coast: elehoha, kebi, nan, rikio

in Liberia: beyor, kindi

in Nigeria: abo, abo amido, abo-emido, abua-agom, achi, ajegbe, ajele, berong, bosambi, cosomon, emido, goramfi, ile, kafafogo, likamba, nderiti, obia, obubit nkpenek, ogbom, okon, oreng, oriang, ovia, oyen, rikio, sam, shem, ubia, ujobe, umpwenek, yere, yeye

in Sudan: somo

in Tanzania: mchenza mwitu

in West Africa: an lil, kendi

Uapaca heudelotii Baill. (*Uapaca benguelensis* Müll.Arg.; *Uapaca marquesii* Pax)

W. & WC Trop. Africa. Tree, stilt-rooted, adventitious aeration roots, dense crown, low-branching, sapwood tinged with red, inner bark sticky red sap, fruit edible

See *Adansonia* 1: 81. 1860–61, *Journal of Botany, British and Foreign* 2: 332. 1864, *Bot. Jahrb. Syst.* 23: 522. 1897 and *Taxon* 31: 360. 1982

(Sap emetic. Stem bark anti-abortifacient, tonic, used on skin-affections and as an emetic; leaf sap used for subcutaneous parasitic infection.)

in Cameroon: asam, ebam

in Ghana: alokoba, dua baa kpakyi-alokoba, kuntan, kuntan-akoa, kweidzabalā, kweidzabra

in Ivory Coast: alohua, dambrohia, ialagué tiangol, ko-somo, ko-somon, kosomo, niguri-kahie, nion, nobi, rikio, sannaba

in Liberia: jah-dah, soang-puh

in Nigeria: ighen, ile, onyen, otehor; senchi (Nupe); akun, yeye (Yoruba); oyen (Edo); ighen (Itsekiri); ile (Ijaw); otehor (Urhobo); ibia-ile (Igbo); odang (Boki)

in Sierra Leone: an-lil, bondilo, koondi

in W. Africa: ko somon

in Yoruba: abo akun, abo emido, abo emidó, akun, opon, opon atakun yere, yèré, yeye, yèyé

in Zaire: bossenge

Uapaca kirkiana Müll.Arg. (*Uapaca albida* De Wild.; *Uapaca dubia* De Wild.; *Uapaca goetzei* Pax; *Uapaca greenwayi* Suess.; *Uapaca homblei* De Wild.; *Uapaca kirkiana* var. *dubia* (De Wild.) P.A. Duvign.; *Uapaca kirkiana* var. *goetzei* Pax; *Uapaca kirkiana* var. *kwangoensis* P.A. Duvign.; *Uapaca kirkiana* var. *sessilifolia* P.A. Duvign.; *Uapaca munamensis* De Wild.; *Uapaca neomasuku* De Wild.)

Tanzania, S. Trop. Africa. Tree, many-branched, spreading rounded crown, resinous bark exuding a viscous transparent fluid, greenish yellow male and female flowers on different trees, inflorescences usually borne below the leaves, red-orange-yellow fruits with powdery orange coating, sweet pulpy fleshy ripe fruits edible by humans, wild animals and insects, in woodland understory, deciduous woodland, tall grassland, in miombo woodland, *Brachystegia* woodlands, *Uapaca* woodland

See *Flora* 47: 517. 1864 and *Bull. Inst. Roy. Colon. Belge* 20: 891. 1949, *Trans. Rhodesia Sci. Assoc.* 43: 85. 1951, *Taxon* 31: 360. 1982

(Antioxidant. Roots decoction a remedy for indigestion and intestinal problems.)

in English: wild loquat

in S. Central Africa: mahobo-hobo, mduku

in Southern Africa: mahobohobo; muHobohobo, muJanje, muShugu, muShuku, muSuko, muTsangidze, muZhanje (Shona)

in Tanzania: hekela, ikusu, mahuko, makusu, masuku, mguhu, mhungu, mkusu, umugusu

in Zaire: makoom-makooba

in Zambia: mohobohobo, msuku, musuku

Uapaca paludosa Aubrév. & Leandri (*Uapaca guineensis* Müll.Arg.)

W. Trop. Africa to Tanzania. Tree, stilt-rooted, many-branched, slash pink-red, stiff leaves long-hairy beneath, yellow-green flowers surrounded by golden yellow bracts, yellow-green fruits, pulp eaten fresh in moderate amounts, in lowland forest, riverine forest, in swamp and lakeside forest, fruits eaten by fruit bats, monkeys, chimpanzees and gorillas

See *Flora* 47: 517. 1864 and *Bulletin de la Société Botanique de France* 82: 50, t. 1. 1935

(Tonic, expectorant, astringent, antiplasmodial, anti-abortifacient. Bark ground and drunk as remedy for stomach complaints. Stem bark and root bark used for diarrhea, dysentery, female sterility and food poisoning. Roots used for naso-pharyngeal affections, headache, pulmonary troubles.)

in Gabon: rikio

in Nigeria: gagara (Yoruba)

in Tanzania: mchenza mwitu

Uapaca togoensis Pax (*Uapaca guignardii* A. Chev. ex Beille; *Uapaca somon* Aubrév. & Léandri)

W. & WC Trop. Africa. Tree, stilt-rooted, sap clear, bark rough, leaves coriaceous, fruit green-brown, in gallery forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 371. 1904, *Bull. Soc. Bot. France* 55(8): 66. 1908, *Bull. Soc. Bot. France* 82: 50. 1935, *Journal of Ethnopharmacology* 93: 43–49. 2004

(Tonic, antibacterial, febrifuge, emetic, stimulant. Veterinary medicine.)

in Benin: hounkandou

in Central African Republic: dozo

in Ivory Coast: béla, gbéla, rikio des montagnes, somon

in Nigeria: kafafago (Hausa); bakurehi (Fula); senchi (Nupe); shase (Tiv); ajegbe (Yoruba); onyen (Edo); obia (Igbo); odang (Boki); goramfi (Kanuri)

in W. Africa: lisogho, somon

Ullucus Caldas Basellaceae

A native name from Latin America, Peru; see *Semanario del Nuevo Reino de Granada* 2: 185. Bogotá, 1809, *Flora Telluriana* 3: 44. 1837, *The Gardeners' Chronicle & Agricultural Gazette* 1847: 685. 1847 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 573–578. 1937, Henri François Pittier (1857–1950), *Manual de las Plantas Usuales de Venezuela y su Suplemento*. Caracas 1971, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989.

Ullucus tuberosus Caldas (*Basella tuberosa* Kunth; *Chenopodium tuberosum* Ruiz, nom. nud.; *Gandola tuberosa* Moq.; *Melloca peruviana* Moq.; *Melloca tuberosa* (Kunth) Lindl.; *Melloca tuberosa* Lindl.; *Ullucus aborigineus* Brücher; *Ullucus kunthii* Moq.; *Ullucus tuberosus* fo. *albiflorus* Kuntze; *Ullucus tuberosus* fo. *rubriflorus* Kuntze; *Ullucus tuberosus* subsp. *aborigineus* (Brücher) Sperl; *Ullucus tuberosus* subsp. *aborigineus* Sperl)

South America, Andes. Tuberous crop

See *Semanario del Nuevo Reino de Granada* 2: 185. 1809, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 2: 189. 1817, *Gard. Chron.* 42: 685. 1847, *Bibl. Univ. Genève* 11: 80. 1849, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 224–225. 1849, *Revisio Generum Plantarum* 3(3): 267. 1898 and *Publications of the Field Museum of Natural History, Botanical Series* 21. 1940, *Berichte der Deutschen Botanischen Gesellschaft* 80: 379. 1967, *Econ. Bot.* 43: 58–72. 1989, *Bollettino della Società italiana di biologia sperimentale.* 67(12): 1053–1058, 1059–1065. 1991, *Caryologia* 45: 229–235. 1992, *Monographs in Systematic Botany from the Missouri Botanical Garden* 45: 1253. 1993, *J. Agric. Food Chem.* 56(17): 7730–7737. 2008

(Whole plant infusion taken as an expectorant and a postpartum remedy.)

in English: melloco, ulluco

in Spanish: camarones de tierra, chigua, chuguas, hubas, lisas, melloco, michiruí migurí, michuri, mucuchi, olloco, olluco, papa lisa, papa lisas, ruba, rubas, rubia, ruhuas, timbós, tiquiño, ulluca, ulluco, ulluma

Aymara names: ulluma, ullucu

in Peru: oca quina, olloco, papa lisa, tuna ullush, uljucu, ullucu

Quechua name: ullucu

in Venezuela: migurí, mucuchí, ruba, timbós, tiquiño

Ulmus L. Ulmaceae

The classical Latin name for an elm-tree; Akkadian *u'ulum* 'to bind', *u'iltu* 'bond'; see Carl Linnaeus, *Species Plantarum*. 1: 225–226. 1753, *Genera Plantarum*. Ed. 5. 106. 1754, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1850(1–3): 76–78. 1850 and *Oesterr. Bot. Z.* 66: 31. 1916, Ernest Weekley, *An Etymological Dictionary of Modern English*. 1: 502. Dover Publications, New York 1967, *Bot. Zhurn.* (Moscow & Leningrad) 60(2): 168. 1975, *Acta Phytotax. Sin.* 17(1): 45–46. 1979, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XI: 882. UTET, Torino 1981, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 828. Zanichelli, Bologna 1985, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 598. 1994, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 667. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2472–2478. 2001.

Ulmus americana L. (*Ulmus americana* Planch.; *Ulmus americana* Ait.; *Ulmus americana* var. *aspera* Chapman; *Ulmus americana* var. *floridana* (Chapman) Little; *Ulmus floridana* Chapman)

North America.

See *Sp. Pl.* 1: 225–226. 1753, *Gen. Pl.* ed. 5, 106. 1754, *Hortus Kew.* (W. Aiton) 1: 319. 1789, *Prodr.* (DC.) 17: 155, partim. 1873 and *Phytologia* 4: 306. 1953, Sherman, S.L. and D.E. Giannasi. "Foliar flavonoids of *Ulmus* in eastern North America." *Biochem. Syst. & Ecol.* 16: 51–56. 1988, M.R. Gilmore, *Uses of Plants by the Indians* ... 23. 1991

(For the treatment of coughs and colds, sore eyes, dysentery, diarrhea, broken bones, gonorrhoea, lung troubles.)

in English: American elm, water elm, white elm

in North America: American elm, white elm, pe, pe ikcheka (Dakota), taitako taka (Pawnee), orme d'Amérique

Ulmus brandisiana C.K. Schneid.

Himalaya.

See Sargent, Charles Sprague (1841–1927), *Plantae Wilsonianae*; an enumeration of the woody plants collected in western China for the Arnold Arboretum of Harvard University during the years 1907, 1908, and 1910, by E. H. Wilson, ed. by Charles Sprague Sargent. Cambridge, Mass., 1913–1917 [Wilson, Ernest Henry, 1876–1930]

(Bark and leaves as fish poison.)

in Nepal: dhamina

Ulmus rubra Muhlenberg (*Ulmus crispa* Willdenow; *Ulmus fulva* Michaux; *Ulmus pendula* Willdenow; *Ulmus pendula* Lodd.; *Ulmus pubescens* Walter; *Ulmus rubra* F. Michx.; *Ulmus rubra* Hort. ex Loudon)

North America.

See *Trans. Amer. Philos. Soc.* 5: 169. 1793, *Fl. Bor.-Amer.* (Michaux) 1: 172. 1803, *Enum. Pl.* [Willdenow] 1: 295. 1809 and *Rhodora* 47: 203. 1945, Duncan, W.H. and M.B. Duncan. *Trees of the Southeastern United States*. Athens, Ga. Pp. 234–238. 1988, M.R. Gilmore, *Uses of Plants by the Indians* ... 24. 1991

(Used for inducing labor, soothing stomach and bowels, treating dysentery, coughs, colds, and catarrhs, dressing burns and sores; the fresh inner bark boiled and the decoction drunk as a laxative.)

in English: red elm, slippery elm

in North America: red elm, slippery elm, pe tututupa (Dakota), wakidikidik (Winnebago), taitako pahat (Pawnee), orme rouge

Ulmus wallichiana Planch.

India. Tree, leaves a good fodder

See *Annales des Sciences Naturelles* sér. 3, 10: 277. 1848, *Compt. Rend. Acad. Sci. Paris* lxxiv. (1872) I. 1498. 1872

(Bark for toothache, also dipped in water for washing hair.)

in India: amroi, bresi, mored, pubuna, umbuk

Umbellularia (Nees) Nutt. Lauraceae

Latin *umbella*, *ae* ‘a sunshade, parasol’, dim. of *umbra*, *ae* ‘shade, shadow’, referring to the inflorescence, umbel in upper axils, see *Systema Laurinarum* 464. 1836, *The North American Sylva* [Nuttall] 1(2): 87. 1842.

Umbellularia californica (Hooker & Arnott) Nuttall (*Tetranthera californica* Hooker & Arnott)

North America.

See *Bot. Beechey Voy.*, 159. 1833, *The North American Sylva* [Nuttall] 1: 87. 1842 and *Leaflet W. Bot.* 4: 166. 1945

(Insecticide.)

in English: California bay, California laurel, California olive, myrtle-wood, Oregon-myrtle, pepperwood

Uncaria Schreber Rubiaceae (Naucleaceae)

Latin *uncus*, *i* ‘a hook’, referring to the petioles and inflorescence axes, see *Histoire des plantes de la Guiane Française* 1: 177, t. 68. 1775, *Genera Plantarum* 1: 125. 1789, *Flora Cochinchinensis* 639. 1790, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 370. 1791, *Annales Générales des Sciences Physiques* 6: 82. 1820, *A General History of the Dichlamydeous Plants* 3: 471. 1834, *Sylva Telluriana* 148. 1838, *Repertorium Botanices Systematicae*. 2: 512. 1843, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 228. 1879, *Revisio Generum Plantarum* 1: 301. 1891.

Uncaria acida Roxb. (*Nauclea acida* Hunt.; *Ourouparia acida* (Hunter) Baill.; *Uncaria acida* Hunter; *Uncaria acida* (Hunt.) Roxb.; *Uncaria acida* var. *papuana* Valetton; *Uncaria ovalifolia* Roxb.; *Uruparia acida* Kuntze; *Uruparia acida* (Hunter) Kuntze)

Vietnam, New Guinea, Burma (Myanmar), SE Asia. Climber, slender, hooks, papery leaves ovate glabrous, domatia underneath, stomata on upper surface, stipules deeply bifid, flowers sessile white, corolla tube pubescent, capsule oblong pointed, incidentally used in gambier/gambir production, leaves eaten, in humid primary and secondary forest, along rivers, on swampy localities

See *Trans. Linn. Soc. London* 9: 223. 1808, *Hort. Bengal.* 86. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 129. 1824, *Fl. Ind.*, ed. Carey, 1: 520. 1832, *Fl. Brit. India* [J.D. Hooker] 3: 31. 1880, *Revis. Gen. Pl.* 1: 301. 1891 and *Journal of Herbs, Spices & Medicinal Plants* 3(3): 55–69. 1996

(Properties and uses similar to those of black catechu derived from *Acacia catechu*. Leaves used for rubbing on the body to relieve pain; for dysentery, diarrhea and bleeding stool, pound young leaves of *Uncaria acida* with young leaves of *Cordyline fruticosa* and drink the juice.)

in English: pale catechu

in Borneo: engkelait

in Malaysia: gambir-gambir, kait-kait

in Vietnam: dây vuot chua, vu[oos]t chua

Uncaria africana G. Don (*Nauclea africana* (G. Don) Walp.; *Nauclea africana* Willd.; *Ourouparia africana* (G. Don) Baill.; *Ourouparia africana* K. Schum., nom. illeg.; *Ourouparia madagascariensis* Baill.; *Uncaria africana* subsp. *africana*; *Uncaria africana* subsp. *angolensis* (Havil.) C.E. Ridsdale; *Uncaria africana* subsp. *lacus-victoriae* Verdc.; *Uncaria africana* var. *madagascariensis* (Baill.) Haviland; *Uncaria madagascariensis* Baill.; *Uruparia africana* (G. Don) Kuntze; *Uruparia africana* Kuntze)

Trop. Africa, Tanzania, Madagascar. Scrambling shrub, scandent tree, woody climber armed with recurved hooks, waxy leaves, flowers pale yellow, fruits green with dark red tips

See *Sp. Pl.*, ed. 4 [Willdenow] 1(2): 929. 1798, *A General History of the Dichlamydeous Plants* 3: 471. 1834, *Repertorium Botanices Systematicae* 2: 512. 1843, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 219, 225. 1879, *Nat. Pflanzenfam.* 4(4): 57. 1891, *Revisio Generum Plantarum* 1: 301. 1891, *Journal of the Linnean Society, Botany* 33: 76. 1897 and *Kew Bull.* 31(1): 181. 1976, *Blumea* 24(1): 43–100. 1978, *Plant Systematics and Evolution* 149: 89–118. 1985, *American Journal of Botany* 89: 1027–1041. 2002, M. Lamidi et al. “In vitro cytotoxic, antileishmanial and antifungal activities of ethnopharmacologically selected Gabonese plants.” *Journal of Ethnopharmacology* 102(2): 185–190. 2005

(Stem bark and roots cough sedative, expectorant, aphrodisiac. Antileishmanial, cytotoxic and antifungal. Used for impotence and toothache.)

in Madagascar: rohavitra

in Sierra Leone: e-gbaka, horse wip, kooka

Uncaria callophylla Blume ex Korth. (*Uncaria avenia* Valetton; *Uncaria jasminiflora* Hook.f.; *Uncaria jasminiflora* Wall. ex Hook.f.; *Uncaria jasminiflora* var. *macrophylla* King & Gamble; *Uncaria luzoniensis* Merr.; *Uncaria wrayi* King; *Uruparia callophylla* Kuntze; *Uruparia callophylla* (Blume ex Korth.) Kuntze; *Uruparia jasminiflora* (Wall. ex Hook.f.) Kuntze; *Uruparia jasminiflora* Kuntze)

Malesia to New Guinea. Climber, woody, slender, 4-angled branches, leathery leaves lacking hairy domatia, forest

See *Revis. Gen. Pl.* 1: 301. 1891 and *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 72(2): 133. 1904, *Philipp. J. Sci.* 27: 57. 1925, *Bot. Jahrb. Syst.* 60: 59. 1925, *J. Ethnopharmacol.* 25(2): 213–215. 1989 [Cardiovascular effects in the rat of dihydrocorynantheine isolated from *Uncaria callophylla*.], *J. Ethnopharmacol.* 36(3): 219–223. 1992 [Cardiovascular responses in the normotensive rat produced by intravenous injection of gambirine isolated from *Uncaria callophylla* Blume ex Korth.], *Phytochemistry* 66(1): 5–29. 2005

(Hypotensive. Leaves may be used as a substitute for gambier.)

Uncaria cordata (Lour.) Merr. (*Restiaria cordata* Lour.; *Uncaria cordata* Merr.; *Uncaria sclerophylla* Roxb.; *Uncaria sclerophylla* DC.; *Uncaria sclerophylla* Hunter; *Uncaria sclerophylla* Wall.)

Vietnam, Indonesia to New Guinea. Liana, climbing, hook-shaped tendrils, leaves dark green above, flowers brownish yellow, ovary tinged orange, watery sap

See *Fl. Cochinch.* 639. 1790, *Hort. Bengal.* 86. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 130. 1824, *Numer. List* [Wallich] n. 6105. 1831–1832, *Fl. Ind.*, ed. Carey, 1: 520. 1832 and *Interpr. Herb. Amboin.* 479. 1917

(A decoction of the root used as an antidiarrheal. Magico-religious beliefs, to ensure a good harvest.)

in English: hook vine

in Borneo: akar kelait

in Indonesia: aka kelawit

Uncaria gambir (Hunter) Roxb. (*Nauclea gambir* Hunter; *Ourouparia gambir* (Hunter) Baill.; *Uncaria gambier* Roxb.; *Uncaria gambir* var. *latifolia* S. Moore; *Uruparia gambier* Kuntze; *Uruparia gambir* (Hunter) Kuntze; *Uruparia gambir* Kuntze)

W. Malesia. Shrub, liana, straggling, climbing, strong curved thorns, leaves opposite coriaceous, yellowish flowers in axillary bunches, corolla hypocrateriform, septicidal capsule sparsely pubescent and crowned by the calyx, very tiny seeds, widely cultivated for the production of gambir

See *Genera Plantarum* 1: 125. 1789, *Trans. Linn. Soc. London* 9: 218. 1808, *Hort. Bengal.* 86. 1814, *Flora Indica*; or, descriptions of Indian Plants 1: 517. 1832, *Hist. Pl.* 7: 350. 1880, *Revis. Gen. Pl.* 1: 301. 1891 and *J. Bot.* 62(Suppl.): 47. 1924, Tan, H.T.W., Chua, K.S. & Turner, I.M. "Rubiaceae of the Bukit Timah nature reserve." *Gardens' Bulletin. Singapore*, Suppl. 3: 29–59. 1995, Turner, I.M. "A catalogue of the Vascular Plants of Malaya." *Gardens' Bulletin. Singapore* 47: 347–655. 1995 [1997]

(Used in Ayurveda and Sidha. Stem bark and leaves astringent, antiseptic, mouthwash, wound dressing. Astringent, an infusion of fresh leaves given against diarrhea, dysentery. The resinous substance extracted from the leaves and twigs used as an antiseptic in wound dressing, also a stimulant chewed with betel nut (*Areca catechu* L.), lime and the leaf of *Piper betle* L. A mouthwash.)

in English: gambir, kath, pale catechu, white cutch

in China: gou teng, kou teng, tiao teng

in India: ankudu-karra, ankudu-kurra, ankudukurra, gambier, gambir, ganbir, kampirceti, kath, kath guda, kaththak-kambu, kathkutha, kaththakkaambu, kattak-kampu, kattakkampu, kattampuceti, khadir, khadira, kutha, otalai maram, otalaimaram

in Indonesia: gambir, kacu

in Malaysia: gambier, gambir, kancu

in Tibetan: gadur khyung-sder dkar-po, khyung-sder, byi-tsher khyung-sder smug-po

Uncaria guianensis (Aubl.) J.F. Gmel. (*Nauclea aculeata* (Willd.) Willd.; *Nauclea aculeata* Willd.; *Nauclea aculeata* Kunth; *Nauclea guianensis* Poir.; *Nauclea guianensis* (Aubl.) Poir.; *Ourouparia guianensis* Aubl.; *Uncaria aculeata* Willd.; *Uncaria guianensis* J.F. Gmel.; *Uncaria spinosa* Raeschel; *Uruparia versicolor* Raf.)

Trinidad to Trop. South America. Woody vine, thick woody stems, claw-like projections, bright green oval-shaped leaves, reddish-orange flowers, elliptical capsules, in secondary forest

See *Species Plantarum*, Editio Secunda 1: 243. 1762, *Histoire des plantes de la Guiane Française* 1: 177, t. 68. 1775, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 370. 1791, *Delect. Tropical Africa.

See *Enum. Syst. Pl.* 13. 1760, *A General History of the Dichlamydeous Plants* 4: 83. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 422. 1844, *Hortus Suburbanus Calcuttensis* 523. 1845, *Linnaea* 30: 444. 1860

(Stem bark and roots arrow poison, purgative, for skin diseases.)

Urelytrum Hackel Poaceae (Gramineae)

From the Greek *oura* 'a tail' and *elytron* (*elyo* 'to wind') 'a sheath, a cover', type *Urelytrum agropyroides* (Hack.) Hack., see *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 2(2): 22, 25. 1887, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 6: 272. 1889 and *Flora of Tropical Africa* 9: 47. 1917, *Flore Agrostologique du Congo Belge* 1: 51. 1929, *Kew Bulletin* 1949: 366, 368–370, 376. 1949, *Gen. S. African Fl. Pl.* ed. 2. 81. 1951, *Bulletin de la Société Botanique de France* 105: 244. 1958, *Bulletin de la Société Botanique de Belgique* 90: 221. 1958, *Kew Bulletin* 20: 257. 1966, *Boletim da Sociedade Broteriana*, ser. 2 41: 58, t. 1. 1967, *Kew Bulletin* 32(3): 665–672. 1978, *Kew Bulletin* 32(4): 767–771. 1978, *Genera Graminum* 361–362. 1986.

Urelytrum agropyroides (Hackel) Hack. (*Elionurus agropyroides* (Hack.) Roberty; *Rottboellia agropyroides* Hack.; *Urelytrum squarrosus* Hack.)

Tropical Africa, Madagascar. Perennial, hard, coarse, aromatic, submontane, unbranched, tufted, tussock forming, leaf sheath round, ligule an elongated membrane, single flattened raceme, spikelets paired, one spikelet sessile and awnless, one spikelet pedicellate with a flattened awn, awns bend outwards, medicinal use, unpalatable, very low grazing value, occurs in grassland and open bushveld, wooded grassland, on stony slopes, hillsides, in sandy soils

See *Supplementum Plantarum* 13, 114. 1781 [1782], *Species Plantarum. Editio quarta* 4(2): 941. 1806, *Boletim da Sociedade Broteriana* 3: 135. 1885, *Monographiae Phanerogamarum* 6: 272. 1889 and *Fl. Ovest Afr.* 409. 1954

(For fevers, malaria.)

in English: centipede grass, quinine grass

in Nigeria: ande

in South Africa: varkstertgras

Urelytrum muricatum C.E. Hubb.

West tropical Africa. Perennial, tufted, erect, tough, culms bitter tasting, low grazing value, open areas, wooded savanna

See *Kew Bulletin* 1949: 367. 1949

(For frequent miscarriage, unextruded placenta, along with *Andropogon schirensis* Hochst. ex A. Rich.)

in Nigeria: gargarin tudu, rumaya, rumiya, yaman gargarin tudu

Urena L. Malvaceae

Urena is a Malabar vernacular name used by van Rheede in *Hortus Indicus Malabaricus*; see Carl Linnaeus, *Species Plantarum*. 2: 692. 1753, *Genera Plantarum*. Ed. 5. 309. 1754 and *Bull. Herb. Boissier*, sér. 2, 1(6): 549–587. 1901, *Fieldiana, Bot.* 24(6): 324–386. 1949, *Ceiba* 20(2): 58–68. 1976, *Ceiba* 22(1): 41–64. 1978, *Revista Biol. Trop.* 43(1–3): 75–115. 1995, *Proc. Calif. Acad. Sci.*, ser. 4, 57(7): 247–355. 2006, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 313–373. 2007.

1874, *Biologia Centrali-Americana; ... Botany ...* 1(2): 116. 1879, *Flora Brasiliensis* (Martius) 12(3): 471, pl. 84. 1892 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 5: 141. 1901, *Blumea* 14(1): 140, 14–143. 1966, *Quart. J. Forest Res.* 21(3): 61–72. 1999

(Used in Ayurveda and Sidha. Whole plant paste applied for the treatment of rheumatic pains, rheumatism, rheumatoid arthritis.)

in India: antursa

Urera Gaudich. Urticaceae

From the Latin *uro*, *-is*, *ussi*, *ustum*, *urere* ‘to burn, burn up, to sting’, referring to the powerful stinging hairs; see Charles Gaudichaud-Beaupré (1789–1854), [Botany of the Voyage.] *Voyage autour du Monde ... sur ... l’Uranie et la Physicienne, pendant ... 1817–1820*. 496–497. Paris 1826 [–1830], *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 35, 98. 1869 and *Ann. Missouri Bot. Gard.* 96(2): 268–285. 2009.

Urera acuminata (Poir.) Gaudich. ex Decne. (*Urera acuminata* Gaudich.; *Urera acuminata* Miq.; *Urtica acuminata* Poir.)

Tropical Africa. Small shrub, liane, climbing, creeping, branched, adventitious roots, milky juice, stinging hairs, flowers green-white in axillary inflorescences, red fruits

See *Species Plantarum* 2: 983–985. 1753, *Encyclopédie Méthodique. Botanique ... Supplément* 4: 226. 1816, *Nouvelles Annales du Museum d’Histoire Naturelle*, sér. 3, 3: 490. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 97–98. 1869, *Journal of the Linnean Society, Botany* 21: 445–446. 1885 and *Annales de l’Institut Botanico-Géologique Colonial de Marseille*, sér. 6, 7–8: 30. 1950, *Flore de Madagascar et des Comores* 56: 24. 1965

(Very urticant, irritating to the eyes and skin.)

in Madagascar: ampibe, ampy, miana

in Mauritius: liane à gratter

Urera acuminata (Poir.) Gaudich. ex Decne. var. *cameroonensis* (Wedd.) Leandri (*Urera cameroonensis* Wedd.; *Urera sphaerophylla* Baker; *Urera trinervis* (Hochst. apud Krauss) Friis & Immelman; *Urera trinervis* (Hochst.) Friis & Immelman; *Urera woodii* N.E. Br.)

West Tropical Africa. A liane, vine, woody or soft-wooded, climber, scrambler, succulent, adventitious roots, reddish fruits, sometimes in *Urera trinervis* (Hochst.) Friis & Immelman

See *Nouvelles Annales du Museum d’Histoire Naturelle*, sér. 3, 3: 490. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 97–98. 1869, *Journal of the Linnean Society, Botany* 21: 445–446. 1885 and *Annales de l’Institut Botanico-Géologique Colonial de Marseille*, sér. 6, 7–8: 30. 1950, *Flore de Madagascar et des Comores* 56: 24. 1965

(Very urticant. Sap used for tachycardia.)

in English: climbing nettle

in Central African Republic: manjembe

in Mauritius: liane à gratter

in South Africa: rankbrandnetel

Urera baccifera (L.) Gaudich. ex Wedd. (*Urera baccifera* (L.) Wedd.; *Urera baccifera* (L.) Gaudich., nom. illeg.; *Urera baccifera* Gaudich.; *Urera baccifera* var. *horrida* (Kunth) Wedd.; *Urtica baccifera* L.; *Urtica horrida* Kunth)

Tropical America. Shrub or small tree, weak-stemmed, leaves coarsely dentate, fleshy accrescent calyx, leaves and stems covered with stout sharp stinging spine-like hairs

See *Species Plantarum* 2: 983–985. 1753, *Species Plantarum*, Editio Secunda 2: 1398. 1763, *Nova Genera et Species Plantarum* (quarto ed.) 2: 41. 1817, *Voy. Uranie, Bot.* 497. 1830, *Annales des Sciences Naturelles; Botanique*, sér. 3 18: 199. 1852, *Archives du Muséum d’Histoire Naturelle* 9(1–2): 151. 1856 and Morton J., *Atlas of Medicinal Plants of Middle America*. Charles Thomas, New York. 1981, *Rev. Biol. Trop.* 47(3): 365–371. 1999

(Severe skin irritation, burning, itching, reddening, blistering, severe pain, rash, swelling, fever and ulcers can occur. Antirheumatic, antiarthritic, analgesic, antinociceptive, antiinflammatory, leaves used as an herbal remedy both orally as an infusion and topically applied; stinging leaves pressed onto affected region for aches, body pain, headache; rubefacient, employed on rheumatic pains. Amerindians chastised themselves with branches of *ortiga brava* in a toughening ritual.)

in English: cow-itch, cowitch, nettle tree, scratch brush, scratch bush, stinging nettle

in Colombia: pringamoza

in Costa Rica: chichicaste, ortiga, ortiga brava

in Cuba: chichicaste, chichicastre, chichicate

in El Salvador: chichicaste, chichicaste cuyanigua, chichicaste nigua, chichicaston, nigua, niguilla

in Mexico: chichicaste, chichicastle, laal, ortiga de caballo

in Nicaragua: ortiga de frutos rosados y blancos

in Panama: ñenge

in Paraguay: pyno guasu

Urera batesii Rendle

West Tropical Africa. A trailing or climbing liane

See *Journal of Botany, British and Foreign* 54: 368. 1916

(Very urticant.)

Urera caracasana (Jacq.) Gaudich. ex Griseb. (*Urera acuminata* Miq.; *Urera capitata* Wedd. var. *pavonii* Wedd.; *Urera*

caracasana Griseb.; *Urera caracasana* Gaudich. ex Griseb.; *Urera caracasana* var. *miquelii* (Wedd.) Wedd.; *Urera caracasana* var. *subpeltata* (Miq.) Wedd.; *Urera caracasana* var. *subpeltata* (Miq. ex Mart.) Wedd.; *Urera caracasana* var. *tomentosa* Wedd.; *Urera jacquini* Wedd.; *Urera jacquini* var. *miquelii* Wedd.; *Urera jacquini* var. *subpeltata* (Miq.) Wedd.; *Urera subpeltata* Miq.; *Urtica caracasana* Jacq.; *Urtica verrucosa* Liebm.)

Central America, Venezuela. Shrub, scandent, shrubby vine, slender, stinging hairs, crenate-dentate leaves, flowers white-green, fruits in axillary panicles, fleshy orange perianth, divergences in taxonomical classification

See *Species Plantarum* 2: 983–985. 1753, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 71, t. 386. 1798, *Nouvelles Annales du Muséum d'Histoire Naturelle* 3: 490. 1834, *Kongelige Danske videnskaberne Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 295. 1851, *Annales des Sciences Naturelles; Botanique*, sér. 3 18: 201. 1852, *Flora Brasiliensis* 4(1): 190. 1853, *Archives du Muséum d'Histoire Naturelle* 9(1–2): 145. 1856, *Flora of the British West Indian Islands* 154. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 90, 92. 1869 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 331–367. 1937, Allen, P.H., “Poisonous and injurious plants of Panama.” *American Journal of Tropical Medicine* 23(Suppl): 3–76. 1943, *Fieldiana, Bot.* 24(3): 396–430. 1952, *Annals of the Missouri Botanical Garden* 47(2): 81–203. 1960, *Fieldiana, Bot.* 40: 218–283. 1977, *Lilloa* 37: 97–98. 1990, *Journal of Tropical Ecology* 13(6): 805–831. 1997, *Acta Botánica Mexicana* 71: 39–42. 2005

(Irritant, urticant, injurious, burning and inflammation on contact with the skin, strong itchiness. Leaves and stem for pain and rheumatism; infusion taken for inflammation.)

in English: flameberry, scratch brush, scratch bush

in Mexico: mal hombre, mala mujer, quemador

in South America: ambaibauva, chichicaste, chichicastle, husna, mal hombre, mala mujer, ortiga, ortiguilla mansa, palo pachon, quemador, teochichicastle, tzhanná

Urera cordifolia Engl.

West Tropical Africa, Cameroon. Liane, stinging hairs, branches with prickly-like protuberances, adventitious roots, inflorescence an axillary lax panicle, yellow-reddish flowers, leaves eaten in soup, mucilaginous cooked vegetable

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 121. 1902, *The Journal of Ecology* 44(1): 83–117. 1956

(Whole plant diuretic, urticant; leaves antiinflammatory and analgesic. Leaf sap, leaf decoctions and dried powdered leaves used for dysentery, neuralgia, diarrhea with blood, chest pain, ear problems, male impotency, as an aphrodisiac and laxative. Small red fruits used as a bait in bird traps. A

component of arrow poison; sap of crushed inflorescences taken as a poison antidote.)

in Yoruba: esagbonrin, esigala, esisi agbonrin, jagbonrin

Urera hypselodendron (Hochst. ex A. Rich.) Wedd. (*Urera acuminata* (Poir.) Gaudich. ex Decne.; *Urera acuminata* Gaudich.; *Urera acuminata* Miq.; *Urera crenulata* Engl.; *Urera hypselodendron* (Steud.) Wedd.; *Urtica hypselodendron* Hochst. ex A. Rich.; *Urera hypselodendron* Wedd.; *Urera hypselodendron* (Hochst.) Wedd.; *Urera hypselodendron* Engl.; *Urera hypselodendron* (A. Rich.) Wedd.; *Urera hypselodendron* (Hochst. ex A. Rich.) Wedd. var. *platyrrhachis* Hauman; *Urera schimperii* Wedd., nom. illeg.; *Urtica hypselodendron* Hochst. ex A. Rich.; *Urtica hypselodendron* A. Rich.) (from the Greek *hypselos* ‘high’)

Tropical Africa. Liane, shrub, woody or soft-stemmed, leaning, climber, stinging hairs, adventitious roots, inflorescences elongated, lax cymes, orange-reddish fruits, leaves cooked with the leaves of *Basella alba* and eaten, bark and leaves eaten by gorillas, riverine forest

See *Voy. Uranie, Bot.* 497. 1830, *Ann. Sci. Nat., Bot.* sér. 3, 18: 203. 1852, *Pflanzenw. Ost-Afrikas* A, 130. 1895 and *Mountain Research and Development*, Vol. 8, No. 2/3, *African Mountains and Highlands*, pp. 243–247. 1988, *Journal of Tropical Ecology* 13(6): 805–831. 1997, *Systematics and Geography of Plants*, Vol. 71, No. 2, *Plant Systematics and Phytogeography for the Understanding of African Biodiversity* (2001), pp. 223–236. 2001, *International Journal of Primatology* 25(5): 1043–1072. 2004

(Leaves urticant. Leaves decoction laxative, purgative. Decoction of stems mixed with milk given to pregnant women for abdominal pains. Veterinary medicine.)

in Burundi: umuse

in Congo: kaololo ka boanga, mushambia, toololo ta boanga

in Ethiopia: xoqonuu

in Guinea: nórroi

in Tanzania: khangaya, olnyaal

in Uganda: omushe

Urera keayi Letouzey

Liberia, Ghana, Tropical Africa. Herb, creeping, climbing, adventitious roots, weedy

See *Adansonia*, sér. 2, 7: 299. 1967

(Urticant. Leaves for menstrual cycle; sap diuretic, for kidney problems.)

in Ivory Coast: baffin, bon wazani, bu wazani, ntôtô

Urera mannii (Wedd.) Benth. & Hook. f. ex Rendle (*Scepocarpus mannii* Wedd.; *Urera mannii* (Wedd.) Benth. & Hook. f.) (from the Greek *skepas*, *skepe* ‘covering, shelter’, *skepasma* ‘covering, covering membrane’)

West Tropical Africa. Shrub or tree, climber, liane, leaves eaten as spinach, fruit for fodder

See *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 35, 98. 1869, *Gen. Pl.* 3: 383–384. 1880 and *Journal of Botany, British and Foreign* 65: 370. 1916 [*J. Bot.* 54(648): 370. 1916 [Dec. 1916].], *Economic Botany* 6(1): 23–40. 1952

(Leaves irritating. Leaf decoction taken for dysentery. Small fruits used as a bait in bird traps. Magic, ritual.)

in Ghana: ahyehyew nsa, tán

in Nigeria: èèsìn, èèsìn-agbóná, ewé iná, ntan

***Urera oblongifolia* Benth.**

West Tropical Africa. Liane, woody, climbing, epiphytic, slender, adventitious roots, edible mucilaginous leaves, succulent orange-red fruits, species consumed by gorillas

See *Niger Fl.* [W.J. Hooker]. 515. 1849 [Nov–Dec 1849] and *Oikos* 23(2): 200–205. 1972, *Primates* 18(1): 183–204. 1977, *The Journal of Ecology* 71(2): 601–627. 1983

(Urticant. Leaves lactation stimulants, used for external treatment of tumours. Veterinary medicine.)

in Nigeria: owéí omb

in Sierra Leone: an-thombo, e-ruk, gumatele, kboyo, kelonto, ma-thenthres, ma-thenthres-ma-bana, poponda, silintambi, tunturu

***Urera obovata* Benth.**

Tropical Africa. Liane, shrub, armed, scrambling, adventitious roots, irritant stinging hairs, prickle-like protuberances, inflorescence an axillary lax panicle, orange-red fruits, leaves eaten as a cooked vegetable, fruits edible, fleshy perianth, closely related to *Urera oblongifolia* Benth.

See *Niger Fl.* [W.J. Hooker]. 516. 1849 [Nov–Dec 1849]

(Urticant, irritant. Leaves abortifacients, astringent, for diarrhea, dysentery, genital troubles; leaf decoction used to treat dysentery and as an aphrodisiac.)

in English: scratchbush

in Sierra Leone: dogbo moli, fase, gondo-moli, mole, moli, pupehelo, tintis-bombom-de, yore

***Urera rigida* (Benth.) Keay (*Boehmeria rigida* Benth.; *Urera elliotii* Rendle; *Urtica rigida* G. Don. ex Benth.)**

West Tropical Africa. Liane, armed, slender protuberances on the stem, stinging hairs, colourless gum, orange-red fruits

See *Enumeratio Systematica Plantarum* 9, 31. 1760, *Niger Flora* 519. 1849 and *Kew Bulletin* 1955, 141. 1955 [*Bulletin of Miscellaneous Information Kew* 1955: 141. 1955]

(Urticant, poisonous or repellent, antidote. Abortifacients, diuretic, pain killer, astringent, for diarrhea, dysentery, kidney problems.)

in Liberia: bie a yi, bie y

in Sierra Leone: fase, gasi, gondo-moli, mole, moli, ngangā-fase, pupehelo, sakai, tintis-bombom-de

***Urera robusta* A. Chev.**

Tropical Africa, Ivory Coast. Liane, shrub, woody, epiphyte, stinging hairs

See *Bull. Soc. Bot. France* 61(Mém. 8e): 301. 1917 [1914 publ. 1917], *Explor. Bot. Afrique Occ. Franc.* i. 610. 1920, *The Journal of Ecology* 71(2): 601–627. 1983

(Urticant.)

in Ghana: nne-kwasie

***Urera trinervis* (Hochst.) Friis & Immelman (*Elatostema trinerve* Hochst.; *Elatostema trinervis* Hochst.; *Urera acuminate* (Poir.) Gaudich. ex Decne. var. *cameroonensis* (Wedd.) Leandri; *Urera arborea* De Wild. & T. Dur.; *Urera cameroonensis* Wedd.; *Urera cameroonensis* var. *laurentii* (De Wild.) Rendle; *Urera gillettii* De Wild.; *Urera laurentii* De Wild.; *Urera usambarensis* Rendle; *Urera woodii* N.E. Br.)**

Tropical Africa. Liane, shrub-like, sometimes epiphytic, softly woody, semi-succulent, scrambling, tangled, climber, scandent, straggling, adventitious roots, stinging hairs, clear watery sap, inflorescence an axillary lax panicle, mature fruits yellow-reddish, fleshy perianth, cooked vegetable, in rainforest, deciduous forest, in lowland rainforest, forest margin, riverine forest, along riverbank, coastal forest

See *Nouvelles Annales du Museum d'Histoire Naturelle*, sér. 3, 3: 490. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 97–98. 1869, *Journal of the Linnean Society, Botany* 21: 445–446. 1885 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 6, 7–8: 30. 1950, *Flore de Madagascar et des Comores* 56: 24. 1965, *Nordic Journal of Botany* 7: 126. 1987

(Urticant. Leaves used to treat scabies. Leaves chewed and the juice swallowed to treat bilious disorders. Leaf sap drunk to treat intestinal disorders. The stems yield potable water when cut, this water drunk to treat tachycardia.)

in English: climbing nettle

in Central African Republic: manjembe

in Congo: teka

in Mauritius: liane à gratter

in Nigeria: oghai

in South Africa: rankbrandnetel

Urmenetea Phil. Asteraceae

***Urmenetea atacamensis* Phil. (*Onoseris atacamensis* (Phil.) Hoffm.)**

Chile.

See *Species Plantarum*. Editio quarta 3(3): 1702. 1803, *Viage al Desierto de Atacama* 201. 1860, *Florula Atacamensis seu Enumeratio* ... 26. 1860, *Die Natürlichen Pflanzenfamilien* 4(5): 335, fig. 152. 1893

(Leaves chewed as substitute for coca. Infusion for high altitude sickness.)

in Chile: coquilla

Urochloa P. Beauv. Poaceae (Gramineae)

From the Greek *oura* 'a tail' and *chloe*, *chloa* 'grass', referring to the awns, very closely related to and most species formerly referred to *Brachiaria* (Trin.) Griseb. and vice versa, type *Urochloa panicoides* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Systema Naturae*, *Editio Decima* 2: 870. 1759, *Icones Plantarum Rariorum* 1: 2, t. 13. 1781, *Essai d'une Nouvelle Agrostographie* 52, 53, t. 11, f. 1. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2–3): 193, 208. 1834, *Flora Rossica* 4(14): 469. 1853, *Synopsis Plantarum Glumacearum* 1: 37. 1855 [1853] and *Contributions from the United States National Herbarium* 15: 20, 28, 35, 78. 1910, *North American Flora* 3(2): 200, 202–203. 1915, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 244. 1930, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 242. 1931, *Manual of the Grasses of the United States* (ed. 2, revised by A. Chase) 680. 1950 [1951], *Mitteilungen der Botanischen Staatssammlung München* 8: 158. 1970, *Folia Primatologica* 15: 1–35. 1971, *Journal of Human Evolution* 10: 565–583. 1981, *Genera Graminum* 284–285. 1986, *Folia Primatologica* 48: 78–120. 1987, *Grass Syst. Evol.* 296. 1987, *Darwiniana* 31: 43–109. 1992, O. Morrone & F.O. Zuloaga, "Sinopsis del género *Urochloa* (Poaceae: Panicoideae: Paniceae) para México y América Central." *Darwiniana* 32(1–4): 59–75. 1993, *Flora Mesoamericana* 6: 331–333. 1994, *Flora of Ethiopia and Eritrea*, vol. 7: 229–232. 1995, *Memoirs of the New York Botanical Garden* 78: 509–540. 1996 [Flora of St. John, U.S. Virgin Islands], *Am. Bot.* 90: 796–821. 2003.

Urochloa brizantha (Hochst. ex A. Rich.) R.D. Webster (*Brachiaria brizantha* (Hochst. ex A. Rich.) Stapf; *Brachiaria brizantha* var. *angustifolia* Stent & Rattray; *Brachiaria decumbens* Stapf; *Panicum brizanthum* Hochst.; *Panicum brizanthum* Hochst. ex A. Rich.; *Panicum brizanthum* var. *lasiochloa* Chiov.; *Panicum brizanthum* var. *latifolium* Oliv.; *Panicum brizanthum* var. *pandanifolium* Peter; *Panicum brizanthum* var. *polystachyum* De Wild. & T. Durand; *Urochloa decumbens* (Stapf) R.D. Webster)

Tropical and southern Africa. Perennial, leafy, very variable in habit, rhizomatous or stoloniferous, densely or loosely

tufted, sword-forming, many stems, stout erect culms or sometimes geniculately ascending, leaf sheath rounded and hairy, ligule a ring of short white hairs, narrow and linear leaves, racemes 1-rowed, overlapping and rounded spikelets with long purplish hairs, glumes separated by a short internode, lower glume clasping, upper lemma granulose, very palatable, valuable pasture grass, forage, native pasture species, cultivated fodder, utilised as cultivated pasture in many countries, good nutritional value, naturalized and introduced into most tropical countries, propagated by seed, economic and useful plant, withstands moderate drought, can endure heavy grazing, useful for erosion control, binds loose soils, will not tolerate flooding, toxic, the seed can be used for grain, in Zimbabwe seeds are sun-dried, winnowed, ground into flour and cooked into a thick porridge, grows in sandy soil, undisturbed veld, undisturbed areas, in grassland and open woodlands, on disturbed soils, along roadsides, next to streams and under trees, alluvial soil

See *Flora* 24(Intell. 1): 19. 1841, *Tentamen Florae Abyssinicae* ... 2: 363. 1850, *Transactions of the Linnean Society of London* 29: 170. 1875 and *Pl. Thonn. Cong.* 3. 1900, *Flora of Tropical Africa* 9: 528, 531. 1919, *Nuovo Giornale Botanico Italiano, new series* 26: 65. 1919, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 171, 178 & Anhang, 31, t. 19, f. 4. 1930, *Proceedings of the Rhodesia Scientific Association* 32: 23. 1933, *Ciencia e Cultura (São Paulo)* 29: 1032–1034. 1977, *The Australian Paniceae (Poaceae)* 233–234. 1987, *Journal of Cytology and Genetics* 25: 140–143. 1990, *Bothalia* 21(2): 163–170. 1991, *Blumea* 41: 417. 1996, *Flora Fanerogamica do Estado de São Paulo* 1: i-xxv, 1–292. 2001

(Severe photosensitization in sheep.)

in English: bread grass, bread signal grass, broad leaved false paspalum, Ceylon sheep grass, common signal grass, large seeded millet grass, large seeded panic grass, palisade, palisade grass, signal grass, St. Lucia grass, Surinam grass, upright brachiaria, upright false paspalum

in Mexico: señal

in Spanish: estrella de Africa, pasto alambe, yerba signal

in S. Rhodesia: iMunga

in Southern Africa: broodgras, broodsinjaalgras; imunga (Ndebele); ipunte (Zulu); phetola (Sotho)

Urochloa decumbens (Stapf) R.D. Webster (*Brachiaria decumbens* Stapf; *Urochloa brizantha* (Hochst. ex A. Rich.) R.D. Webster)

Uganda, Tanzania, Kenya. Perennial, herbaceous, trailing, strongly stoloniferous, ligule a row of cilia or hairs, sheath more or less glabrous, spikelets hairy to distinctly glabrous, lower glume asymmetric and glabrous, lower lemma male or sterile, palea sometimes absent, a weed, economic plant, animal food, highly palatable to stock, readily grazed, forage, withstands drought but not waterlogging, valuable grass for erosion control, withstands heavy grazing, naturalized

elsewhere in tropics and subtropics, fairly high-yielding, suitable for humid areas, well-drained sandy soils, on poor and rocky soils, savannas, wet tropics

See *Tentamen Florae Abyssinicae* ... 2: 363. 1850 and *Flora of Tropical Africa* 9: 528. 1919, *Ciencia e Cultura (São Paulo)* 29: 1032–1034. 1977, *The Australian Paniceae (Poaceae)* 233–234. 1987, *Canad. J. Bot.* 65: 2297–2309. 1987, *Journal of Cytology and Genetics* 25: 140–143. 1990

(Reported to cause scouring if eaten continually for a long time.)

in English: basilisk signal grass, Kenya sheep grass, sheep grass, signal grass, Surinam grass, Suriname grass

in Spanish: pasto alambre, pasto braquiaria, pasto chontalpo, pasto de la palizade, pasto de las orillas, pasto peludo, pasto prodigio, pazto undari, zacate prodigio, zacate Surinam

in Ecuador: shoshovi

Urochloa mutica (Forssk.) T.Q. Nguyen (*Brachiaria glabrinodis* (Hack.) Henrard; *Brachiaria mutica* (Forssk.) Stapf; *Brachiaria numidiana* (Lam.) Henrard; *Brachiaria purpurascens* (Raddi) Henrard; *Panicum amphibium* Steud.; *Panicum barbinode* Trin.; *Panicum equinum* Salzm. ex Steud.; *Panicum glabrinode* Hack.; *Panicum guadaloupense* Spreng. ex Steud.; *Panicum molle* Griseb., nom. illeg., non *Panicum molle* Sw.; *Panicum muticum* Forssk.; *Panicum numidianum* Lam.; *Panicum numidianum* J. Presl, nom. illeg., non *Panicum numidianum* Lam.; *Panicum numidianum* Sieber ex Schult., nom. illeg., non *Panicum numidianum* Lam.; *Panicum paraguayense* Steud. ex Döll; *Panicum pictigluma* Steud.; *Panicum punctatum* Burm.f.; *Panicum punctulatum* Arn. ex Steud.; *Panicum purpurascens* Raddi; *Panicum sarmentosum* Benth.; *Paspalum glabrinode* (Hack.) Morrone & Zuloaga; *Urochloa mutica* (Forssk.) R.D. Webster ex Zon) (Latin *muticus*, a, um ‘blunt’)

Pantropical. Perennial and stoloniferous, straggling, scandent, emergent, semi-aquatic or aquatic, coarse sprawling stems, robust, stout and very vigorous, simple or narrowly branched, ascending from prostrate or long decumbent base, rooting at the lower nodes, flowering culms erect, leaf nodes swollen and with dense shaggy hairs, sheaths loose and overlapping, hairy leaves and sheaths, ligule a fringed ciliolate rim, several lateral racemes on a common axis, glabrous spikelets green-purplish and elliptic, winged rachis, pedicels solitary or paired with discoid tips, lower florets usually male, fertile floret subacute, glumes dissimilar, upper lemma obtuse and mucronate, a poor seed producer, seeds rarely viable, economic plant introduced into most tropical countries and widely cultivated, one of the best of tropical grasses for pasture, forage grass, often used as green chopped forage, not suitable for silage, used as fodder grass and for water treatment, stems and leaves very palatable, troublesome weed in cultivation, it may become a pest, forms dense monotypic stands, floating layers of vegetation, a pest of irrigation ditches and ponds, troublesome

weed of sugar cane crops, useful for erosion control, useful for stream bank and stream erosion control, it does not withstand heavy grazing, tolerant of drought and of brackish water, grows well only in poorly drained soils in high-rainfall areas or on seasonal wetland, along irrigation ditches and ponds, marshes, disturbed sites, abandoned orchards, wet areas and wet pastures, wet grasslands, wet fields and ditches, alluvial soils, in both running water and temporary waterholes, in standing and running water, in swamps and shallow streams, on deep loamy soils overlying saline clays, swampy places and stream banks

North America. Perennial herb, inflorescence light green, stinging hairs, young leaves cooked

See *Species Plantarum* 2: 983–985. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 341. 1789, *Species Plantarum*. Editio quarta 4(1): 353. 1805, *Linnaea* 7: 141. 1832, *Archives du Muséum d'Histoire Naturelle* 9(1–2): 78. 1856, *Proceedings of the American Academy of Arts and Sciences* 10: 348. 1875, *Pittonia* 1: 281–282. 1889 and *A Flora of Western Middle California* 147. 1901, *Bulletin of the Torrey Botanical Club* 39(7): 305–306. 1912, *Svensk Botanisk Tidskrift* 41(2): 271. 1947, *Vascular Plants of the Pacific Northwest* 2: 91. 1964, *Can. J. Plant Sci.*, 57: 491–498. 1977, *Canadian Journal of Botany* 56(2): 190. 1978, *Systematic Botany* 7: 269–281. 1982, *Syst. Bot.* 7: 282–290. 1982

(Irritant, toxic. Alterative, diaphoretic, counter-irritant, general tonic, diuretic, expectorant, antirheumatic, antispasmodic, antiasthmatic, used for rheumatism, upset stomach, childbirth, paralysis, fevers, colds, tuberculosis. Magico-religious beliefs, ritual, a witchcraft medicine. Insect repellent.)

in North America: California nettle, hanuga-hi, manazhihihi (Omaha-Ponca), nettle, stinging nettle

Urtica dioica L. subsp. ***holosericea*** (Nutt.) Thorne (*Urtica breweri* S. Watson; *Urtica dioica* L. var. *holosericea* (Nutt.) C.L. Hitchc.; *Urtica dioica* L. var. *occidentalis* S. Watson; *Urtica gracilis* fo. *densa* Jeps.; *Urtica gracilis* fo. *greenei* Jeps.; *Urtica gracilis* Aiton subsp. *holosericea* (Nutt.) W.A. Weber; *Urtica gracilis* var. *densa* (Jeps.) Jeps.; *Urtica gracilis* Aiton var. *greenei* (Jeps.) Jeps.; *Urtica gracilis* Aiton var. *holosericea* (Nutt.) Jeps.; *Urtica holosericea* Nutt.; *Urtica serra* Blume; *Urtica trachycarpa* Weddell)

North America. Perennial

See *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848, *Museum Botanicum* 2: 140. 1856,

Proceedings of the American Academy of Arts and Sciences 10: 348–349. 1875 and *A Flora of California* 1: 367. 1909, *A Manual of the Flowering Plants of California* ... 281. 1923, *Vascular Plants of the Pacific Northwest* 2: 91. 1964, *Aliso* 6(3): 68. 1967, *Phytologia* 58(6): 384. 1985

(Antirheumatic, analgesic, counterirritant, used for rheumatism, sore limbs and back, arthritic joints, sores, headaches. Magico-religious beliefs, ceremonial, witchcraft medicine.)

in English: stinging nettle

Urtica hyperborea Jacq. ex Wedd. (*Urtica hyperborea* Jacq.; *Urtica hyperborea* Jacquem. ex Weddell; *Urtica kunlunshanica* Chang Y. Yang, invalidly published)

Himalaya, Tibet, Kashmir to Bhutan. Herb, pubescent under-shrub, stout, caespitose to densely tufted, stinging hairs, woody thick rhizomes, small crowded coarsely toothed leaves, panicle of cymes axillary, greenish-purple flowers in short dense axillary clusters, young leaves cooked, alpine meadows

See *Ann. Sci. Nat.* sér. 4, 1: 180. 1854, *Arch. Mus. Par.* ix. (1856) 68. 1856 [*Archives du Muséum d'Histoire Naturelle. Monogr. Urtic.* 68. 1856.], DC., *Prodr.* 16 (1): 45. 1869, *Fl. Brit. Ind.* 5: 548. 1885 and *Claves Plantarum Xinjiangensium* 2: 84, pl. 4, f. 1–2. 1982

(Irritant to the kidneys and to the skin. Insect repellent. Fresh leaves cooked and eaten for fever, cough and cold, a good source of energy.)

in China: gao yuan qian ma

in India: bichhu, dzatsutt, zazut

Urtica incisa Poir. (*Urtica incisa* B. Heyne ex Wall.; *Urtica lucifuga* Hook.f.)

Australia.

See *Encycl.* (Lamarck) Suppl. 4. 224. 1816, *Numer. List* [Wallich] sub n. 4603. 1831, *London J. Bot.* 6: 285. 1847 and *New Zealand J. Bot.* 40: 1–23. 2002

(Severely irritant.)

in English: Australian native nettle, native nettle, scrub nettle, stinging nettle

Urtica massaica Mildbr. (*Laportea alatipes* Hook. f.)

Tanzania. Herb, erect, stinging hairs, little branched, extensive creeping rhizomes, double-toothed leaf margin, green-white axillary long inflorescences, tender leaves eaten boiled or unboiled, famine food, a bad weed, in disturbed ground, *Acacia abyssinica* woodland, clearings, moist evergreen bushland

See *Journal of the Linnean Society, Botany* 7: 215. 1864 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 275. 1923

(Stinging hairs very irritating and painful; leaves as a repellent against rats and for protection of crops from grazing)

cattle. Used for stomachache, malaria, hepatic diseases, venereal diseases, injuries, bruises, rheumatism.)

in English: forest nettle, Maasai stinging nettle, stinging nettle

in Kenya: entamejoi, entamejoi, hatha, intameijo, kimeley, meleyi, mucururi, siwot, thaa, thabai, thatha, siwon

in Tanzania: endamejoi, entamejoi, intameijo, ivasha, ivava, mpupu, olmatjo, olmbasa, olnyal, ormatejo, tufia

***Urtica parviflora* Roxb.**

India. Herb, undershrub, branched, erect, slender, hispid stinging hairs, leaves very variable, small white-green unisexual flowers clustered on the branches of lax spreading axillary cymes, young leaves and flowers cooked and eaten as vegetable

See *Flora Indica*; or, descriptions of Indian Plants 3: 581–582. 1832, *FBI* 5: 548. 1888

(Irritant. Insect repellent. Plant decoction used in the treatment of fevers. Roots used for fractures and dislocation; root juice applied in case of throat pain, also taken for gonorrhea; roots decoction given in dog bite. Branches with leaves applied externally on sprains and swellings for their counter-irritant properties; young leafy shoot taken as vegetables to get relief from rheumatic pain. Leaves boiled supposed to be effective for gout and rheumatic pains; leaf paste applied on wounds caused by dog bite. Veterinary medicine, poultice from the root applied to alleviate inflammation of the fractured or injured parts of domestic animals. Magico-religious beliefs, the plant is supposed to do away with evil spirits and ghosts.)

in English: Himalayan nettle

in India: anachoriyanom, bap-kang-cham, berain, bichhu, bichhu-buti, bichu, bichua, bichubuti, charia seusni, gharia sishun, jujjuli, kandali, kandari, kaniyali, kuga, kugas, lovie, paharah-bicchuti, paharah-bichuti, seumi, seusni, shishona, shishoon, shisno, shisoon, shokham, sisnu (bhangre), sisuna, sisuyuna

in Lepcha: kazoo

***Urtica pilulifera* L.**

Europe. Herb, young leaves cooked

See *Species Plantarum* 983. 1753 and *Anales del Jardín Botánico de Madrid* 39: 199–206. 1982, *Botaniceskij Žurnal SSSR* 69(11): 1525–1530. 1984, *Isis* 76(3): 319–330. 1985, *Informatore Botanico Italiano* 20: 637–646. 1988, *Bocconeae, Monographiae Herbarii Mediterranei Panormitani* 1: 303–364. 1991, *Flora Mediterranea* 6: 223–243. 1996, *Webbia* 53(2): 193–239. 1999, *Journal of Ethnopharmacology* 84(2–3): 241–245. 2003

(Stinging, irritating. Leaves and roots tonic, expectorant, for asthma, kidney and urinary problems. Antiasthmatic, astringent, depurative, blood purifier, diuretic, galactagogue, hemostatic, hypoglycemic, tonic; externally used to treat

arthritic pain, gout, sciatica, neuralgia and hemorrhoids; an infusion taken to treat anemia, excessive menstruation, hemorrhoids, arthritis, rheumatism and skin complaints, eczema. Fresh leaves infusion healing and soothing, a lotion for burns, bites and stings.)

in English: Roman nettle

in Italian: ortica a campanelli, ortica romana

in Arabic: horreiq, horriqua, qorreis

in Pakistan: bichu booti, kharash booti

***Urtica simensis* Hochst. ex A. Rich. (*Urtica simensis* Steud.) (Simien Mountains, Debark.)**

Ethiopia. Dioecious, erect, perennial herb, non-branched, rhizome creeping, axillary lax cymose panicle, leaves and young shoots eaten mainly in times of famine, whole plant covered with stinging hairs, a weed in fields and pastures, in grassland, in disturbed localities, highlands

See *Tentamen Florae Abyssinicae seu Enumeratio Plantarum hucusque in perisque Abyssiniae*. 2: 260. 1847–1850

(Itching from the stinging hairs. Used to ease aching joints and for liver complaints.)

in Ethiopia: samma

***Urtica spiralis* Domb. ex Wedd. (*Urtica spiralis* Blume; *Urtica spirealis* Blume)**

Mexico. A gum weeping from the cuts on the branches

See *Ann. Sci. Nat., Bot.* sér. 3, 18: 232. 1852, *Museum Botanicum* 2(9–12): 152. 1856

(As a poultice.)

***Urtica urens* Linnaeus (*Urtica chamaedryoides* Pursh; *Urtica urens* Bert. ex Steud.)**

Europe. Low herb, weedy, erect, stinging hairs, many-branched, stems reddish-purple, flowers yellow, young plants cooked as vegetable

See *Species Plantarum* 2: 983–985. 1753, *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 113. 1814 [1813] and *Journal of Cytology and Genetics* 19: 117. 1984, *Botaniceskij Žurnal SSSR* 69(11): 1525–1530. 1984, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Watsonia* 20: 63–66. 1994, *Flora Mediterranea* 6: 223–243. 1996, *Egyptian Journal of Botany* 37(2): 129–156. 1997, *Opera Botanica* 137: 1–42. 1999, *Webbia* 53(2): 193–239. 1999

(Intense burning sensation. Blood purifier, antispasmodic, antiseptic, anti-acidity, analgesic, for impotency and barrenness, anemia, heart diseases, tuberculosis, asthma, for sweat-baths and for pain from rheumatism, stomach ulcers. Leaf poultice used to treat rheumatism.)

in English: annual stinging nettle, burning nettle, bush nettle, bush stinging nettle, dog nettle, dwarf nettle, dwarf stinging

nettle, lesser stinging nettle, nettle, small nettle, small stinging nettle, stinging nettle

in Ecuador: ortiga negra

in Paraguay: ortiga blanca, pyno-i

in Peru: ishguin

in Arabic: horrei, hurraikha, qorreis

in Lesotho: bobatsi

in Southern Africa: bosbrandnetel, bosbrandnekel, brandblare, brandnetel, brandneukel, brandneuker, klein brandnetel, perde brandnetel; bubati (Pedi); imBhabazane, umbabazane (Zulu); umbabazane (Xhosa)

Urvillea Kunth Sapindaceae

Named for the French traveller and explorer Jules Sébastian César Dumont d'Urville, 1790–1842, plant collector, a member of the Linnean Society and the Société de Géographie, he took part in the voyage of the *Coquille* (commanded by L.I. Duperrey), from 1825 commander of the *Astrolabe* (former *Coquille*), his writings include *Enumeratio Plantarum quas in insulis archipelagi aut littoribus Ponti-Euxinii, annis 1819 et 1820, collegit atque detexit J. Dumont D'Urville*. Parisiis 1822, *Voyage au Pôle Sud and dans l'Océanie sur les corvettes L'Astrolabe et La Zélée*. Paris 1841–1846 and *Voyage de Découvertes autour du Monde ... sur la corvette L'Astrolabe pendant les Années 1826–1829*. Paris 1832–1848; see *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 5: 105–107, pl. 440. 1821, Gaston Meissas, *Les grands voyageurs de notre siècle*. Paris 1889 and *Fieldiana, Bot.* 24(6): 234–273. 1949, R. Glenn, *The Botanical Explorers of New Zealand*. Wellington 1950, J.H. DC.; *Utricularia stellaris* var. *dilatata* Kamienski; *Utricularia stellaris* var. *filiformis* Kamienski; *Utricularia trichoschiza* Stapf)

India. Aquatic insectivorous herb

See *Supplementum Plantarum* 86. 1781, *A Numerical List of Dried Specimens* [Wallich] n. 1429. 1829, *Flora Telluriana* 4: 109. 1836[1838], *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 3. 1844, *Berichte der Deutschen Botanischen Gesellschaft* 12: 3. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 108, 110. 1902, *Flora of Tropical Africa* 4: 488. 1906, *Mitteilungen der Botanischen Staatssammlung München* 4: 96. 1961, *Taxon* 29: 360–361. 1980

(Used in Sidha. Flowers used as antiseptic.)

in India: arkazavar, jhangli, kutapaci

Uvaria L. Annonaceae

Latin *uva* 'cluster, cluster of grapes, bunch of grapes', referring to the fruits; see Carl Linnaeus, *Species Plantarum*. 1: 536. 1753, *Genera Plantarum*. Ed. 5. 140. 1754, *Flora Javae* 1(Annonaceae): 13. 1830 and *Bull. Misc. Inform.* 1923: 256. 1923, *Fl. Madagasc.* 78: 7. 1958. Annonaceae have been commonly described in traditional medicine as remedies against head lice and for their insecticidal and acaricidal properties.

Uvaria acuminata Oliv.

Mozambique, Tanzania. Shrub or liane, woody, flexible, climbing, erect, creeping, scandent, straggling, spreading, leaves citrus scented, 3 distinct sepals cover the petals in bud, aromatic flowers hanging down, white-yellow thin or fleshy petals, yellow or orange rusty carpels in a bunch on a stalk, bee forage, sweet ripe fruits pulp eaten raw, in forest, coastal bushland, dry forest

See *Species Plantarum* 536. 1753, *Flora of Tropical Africa* 1: 21. 1868, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 878. 1890 and *Acta Horti Bergiani* 10: 51. 1931, *Chem. Pharm. Bull.* (Tokyo) 52(1): 138–141. 2004

(Roots decoction used for the treatment of dysentery, snake-bite, painful menstruation, convulsions, stomachache and breast disorders. Showed considerable cytotoxicity toward human promyelocytic leukemia HL-60 cells. Leaves used in tunguri, a fetish gourd. Boiled roots mixed with roots of *Xeroderris stuhlmannii* to treat convulsions in babies.)

in Kenya: cirmaan booy, mdzala, mganda-simba, mgweni, mlori, mudzala, mukukuma, mulori, mumbweni, mwaacha, ngukuma, ri, shiyole, tomur, tumorr, vilolro

in Tanzania: ihulungula, mchofu, mganda simba, mgweni, mhuanu, mladhaladha, mleko, mshofu, msofi, msofu, msofusimba, mudzala, muhou, mumbweni, muunguana, mwacha

Uvaria afzelii Scott-Elliot

Tropical Africa.

See *Journal of the Linnean Society, Botany* 30: 70. 1895

(Leaves tonic, for inflammation of bladder and kidneys.)

Uvaria cordata (Dunal) Alston (*Uvaria cordata* Schumacher & Thonn.)

SE Asia, Papua New Guinea. Woody climber, leaves coriaceous, flowers dark red in few-flowered cymes, 3 yellow-green sepals, distinct succulent carpels berry-like ovoid to globose orange, dark brown seeds

See *Monographie de la famille des Anonacées* 129–130, t. 30. 1817, *Beskrivelse af Guineiske planter* 255. 1827 and *A Hand-book to the Flora of Ceylon*, Part 6 suppl. 6: 4. 1931, *Cytologia* 55: 187–196. 1990, *Fitoterapia* 69(2): 177–178. 1998

(Antimicrobial, antibacterial.)

in Malaysia: akar pisang-pisang jantan, bunga jari hutan

in Thailand: kluai muu sang, laa-koh, nom chaang

Uvaria doeringii Diels

Ghana. Tree or shrub, scrambling, strongly aromatic, small green fruits eaten

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 435. 1915, *J. Org. Chem.* 34: 3898–3902. 1969, *Bioorg. Chem.* 6: 393–396. 1977,

Pakistan J. Sci. Ind. Res. 21: 189–194. 1978, *Tetrahedron Lett.* 23, 4299–4302. 1982, *Phytochemistry* 44(2): 359–364. 1997

(Antimalarial. Oxygenated pyrenes. Roots, mixed with *Capsicum* sp. rubbed onto sore skin; leaf concoction drunk for liver problems, jaundiced conditions, yellow fever, also taken for piles, palpitations and pain.)

in Ghana: agbana

in Togo: agbana

Uvaria grandiflora Roxb. (*Unona grandiflora* DC.; *Uvaria grandiflora* Roxb. ex Hornem.; *Uvaria grandiflora* Wall.; *Uvaria platypetala* Champ. ex Benth.; *Uvaria purpurea* Blume; *Uvaria rhodantha* Hance)

SE Asia. A sturdy climber with large leaves, flowers red to purplish solitary or in 2–3-flowered cymes, fruit of distinct carpels, fruitlet berry-like cylindrical orange and fleshy

See *Species Plantarum* 536. 1753, *Supplementum Plantarum* 44, 270. 1782, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 90. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 1: 11. 1825, *Kew Jour. Bot.* 3: 257. 1851, *Annales Botanices Systematicae* 2: 19. 1851 and *Taxon* 33(3): 438. 1984, *Zhongguo Zhong yao za zhi = Zhongguo zhongyao zazhi = China Journal of Chinese Materia Medica* 24(8): 476–477, 510–511. 1999 [A study on major chemical components of *Uvaria grandiflora*.], *J. Nat. Prod.* 69(4): 692–694. 2006

(Cytotoxic acetogenins. Leaves and roots applied against stomachache, abdominal pains, skin diseases; leaves and roots infusion taken against stomachache; eat the leaf with rice for flatulence.)

in Indonesia: kalak, pisang akar, tali pisang

in Malaysia: akar larak, akar pisang-pisang tandok, larak tahu kuching, medang salak, medang se-nanah, meroyan otak

in Philippines: banauak

in Thailand: kluai muu sang, kluai phangphon

Uvaria hamiltonii Hook. f. & Thomson

India. Shrub, fruits eaten

See *Species Plantarum* 536. 1753, *Flora Indica*: being a systematic account of the plants . . . 1: 96. 1855 and *Fitoterapia* 74(1–2): 159–163. 2003, *Acta Pharm.* 54(1): 57–63. 2004

(Antibacterial activity and cytotoxicity from stem bark. Magic, ritual, stem bark tied to the cot of a patient to keep off evil spirits.)

in India: panaamu

Uvaria hookeri King

India.

See *Ann. Bot. Gard. Calc.* iv. I. 28, t. 22. 1893 and *J. Ethnopharmacol.* 40(3): 181–186. 1993

(Antimicrobial and anthelmintic.)

in India: ganavaara, goiciria, jvaraankusha

Uvaria kirkii Oliv. ex Hook. f.

East Africa. Scandent shrub, woody climber, lianescent, suffrutescent, erect, straggling, spreading, twining, flexible, pendulous branches, clasping branches, aromatic leaves, large showy creamy white flowers stinking of sour milk or with banana-like fragrance, yellow-orange verrucose fruits in dense cluster, bee forage, sweet ripe fruit pulp eaten fresh, in coastal areas, grassland, in secondary thicket, coastal bushland, in woodland, *Brachystegia* woodland, *Hyphaene* palm savanna

See *Botanical Magazine* 98, t. 6006. 1872 and *J. Nat. Prod.* 48(6): 999–1000. 1985

(Suspected of poisoning. A cure for venereal diseases. Essential oil in the root bark.)

in Tanzania: mcho, mchofu, mkonjiganga, msofu, msofu-simba

Uvaria klaineana Engler & Diels (*Uvaria klaineana* var. *chrysophylla* Pellegr.)

Tropical Africa.

See *Species Plantarum* 536. 1753 and *Phytochemistry* 59(8): 885–888. 2002, *Planta Med.* 68(2): 167–169. 2002, *Phytother. Res.* 17(4): 364–367. 2003

(Antiplasmodial and antiprotozoal activity.)

Uvaria kurzii (King) P.T. Li (*Uvaria hamiltonii* var. *kurzii* King)

India. Climber, robust, red solitary flowers

See *Species Plantarum* 536. 1753, *Flora Indica*: being a systematic account of the plants . . . 1: 96. 1855, *Materials for a Flora of the Malayan Peninsula* 1(4): 263. 1892 and *Acta Phytotaxonomica Sinica* 14(1): 106. 1976, *Fitoterapia* 74(1–2): 159–163. 2003, *Acta Pharm.* 54(1): 57–63. 2004

(Antibacterial, the stem bark.)

Uvaria lucida Bojer ex Benth. (*Uvaria gazensis* Baker f.; *Uvaria nyassensis* Engl. & Diels; *Uvaria virens* N.E. Br.)

Kenya, Tanzania. Liane or scandent shrub, erect or straggling, climbing, arching, apple green-yellow-orange to light pink flowers, strongly reflexed petals, monocarps rusty tomentose, cup-like calyx, shiny seeds, ripe fruits fleshy sweetish eaten raw, in shrubland, wooded grassland, in riverine forest and *Brachystegia* woodland

See *Transactions of the Linnean Society of London* 23: 465. 1862 and *Phytochemistry* 44(2): 359–364. 1997

(Stem and root bark antimalarial. Roots are said to be poisonous.)

in English: large cluster pear

in Southern Africa: groottrospeer; mavumba, uMavumba

in Tanzania: mganda simba, mchofu, mshofu, msofu, mudzala

Uvaria lucida Bojer ex Benth. subsp. ***lucida*** (*Uvaria dielsii* R.E. Fries; *Uvaria fruticosa* Engl.; *Uvaria kirkii* sensu Engl. & Diels)

Kenya, Tanzania. Liane or scandent shrub, erect or straggling, climbing, arching, apple green-yellow-orange to light pink flowers, strongly reflexed petals, monocarps rusty tomentose, shiny seeds, ripe fleshy sweetish fruits edible, in shrubland, wooded grassland, in riverine forest and *Brachystegia* woodland

See *Transactions of the Linnean Society of London* 23: 465. 1862 and *Phytochemistry* 44(2): 359–364. 1997

(Stem and root bark antimalarial. Roots are said to be poisonous.)

in English: large cluster pear

in Kenya: halas, mganda-simba, mudzaladowe

in Tanzania: mganda simba, mchofu, mshofu, msofu, mudzala

Uvaria macrophylla Roxb.

China. Evergreen tree

See *Species Plantarum* 536. 1753 and *Chinese Chemical Letters* 12(9): 791–792, 2001, *Chinese Chemical Letters* 13(9): 857–858, 2002, *Yao Xue Xue Bao.* 37(2): 124–127. 2002 [Studies on chemical constituents of *Uvaria macrophylla*.], *Huaxue xuebao* 61(7): 1090–1096. 2003 [Studies on the chemical constituents of the roots of *Goniothalamus cheliensis* and *Uvaria macrophylla*.], *J. Asian Nat. Prod. Res.* 5(1): 17–23. 2003, *Journal of Asian Natural Products Research* 7(5): 687–694. 2005

(Used medicinally, anticancer, strong cytotoxic activities against a number of human cancer cell lines.)

in Malaysia: akar pisang-pisang jantan, bunga jari hutan

in Thailand: kluai muu sang, nom chaang, laa-koh

Uvaria mocoli De Wild. & T. Dur.

Tropical Africa.

See *Species Plantarum* 536. 1753, *Ann. Mus. Congo Belge, Bot.* sér. 2, 1(1): 3. 1899 [1899–1900 publ Jul 1899] and *Phytother. Res.* 17(4): 364–367. 2003

(Acaricidal activity.)

Uvaria narum (Dunal) Bl. (*Uvaria narum* Wall.)

India. Essential oil from the leaves

See *Species Plantarum* 536. 1753 and *Cytologia* 55: 187–196. 1990, Padmaja, V., Thankamany, V., Hisham, A. “Antibacterial, antifungal and anthelmintic activities of root barks of *Uvaria hookeri* and *Uvaria narum*.” *J. Ethnopharmacol.* 40(3): 181–186. 1993, *Indian Journal of Pharmaceutical Sciences* 59(4): 193–194. 1997

(Used in Ayurveda and Sidha. Antimicrobial, antibacterial, anthelmintic, leaves for urogenital disorders. The aromatic root bruised in salt water used as an application to skin diseases; root used in erysipelas.)

in India: bugadee balli, bugadee hoo, gunavaara, kaalaa apak-araa, kala-apkaro, karee beelu, kareeballi, kariballi, karibilu, kuril, narampanal, narum-panel, narumpanal, narumpanel, nilavalli, pandel, pandil, pannil, puliccan, pulikkan, pulippiccan, pulippunari, pulippunarikkoti, unamini, unaminigida, vallisakhotah

Uvaria pandensis Verdc. (*Uvaria acuminata* Oliv.; *Uvaria lucida* subsp. *virens* (N.E. Br.) Verdc.)

Tanzania. Tree or shrub, lianescent, scandent, leaves aromatic, flower yellowish

See *Transactions of the Linnean Society of London* 23: 465. 1862, *Flora of Tropical Africa* 1: 21. 1868, *Bulletin of Miscellaneous Information Kew* 1896: 16. 1896 and *Kew Bulletin* 25: 7. 1971, *Kew Bulletin* 43: 99. 1988, *Nat. Prod. Rep.*, 6: 433–474. 1989, *Phytochemistry* 28(3): 2402–2403. 1989

(Antimalarial.)

Uvaria pauci-ovulata Hook. f. & Thomson (*Uvaria pauci-ovulata* Hook.f. & Thomson)

India.

See *The Flora of British India* [J.D. Hooker] 1: 51. 1872 and *Planta Med.* 66(2): 173–175. 2000

(Acaricidal effects of bark extracts.)

Uvaria rosenbergiana Scheffer

Papua New Guinea. Liana, leaves alternate, single ellipsoid fruit

See *Annales du Jardin Botanique de Buitenzorg* 1: 2. 1876

(Stem sap drunk to relieve fever or malaria.)

in Papua New Guinea: namachaaloc

Uvaria rufa Blume (*Unona setigera* Blanco; *Uvaria ridleyi* Blanco; *Uvaria rufa* (Dunal) Blume; *Uvaria rufa* Wall.; *Uvaria setigera* Blanco; *Uvaria solanifolia* Blanco)

Asia, Philippines. Shrub or tree, climbing, long rounded leathery leaves, dark red fragrant extra-axillary solitary flowers, fleshy red fruits

See *Flora Javae* 19, t. 4, 13c. 1828

(The bark contains active alkaloids and affects the parasympathetic nervous system; alcoholic tincture of the roots used as an ecboic.)

in Philippines: allagat, batag-kabalang, hilagak, hinlalagak, iniu, pedped, susung-damulag, susung-kabayo, susung-kalabau, susung kalabaw

Uvaria scheffleri Diels

Kenya, Uganda. Vine or scrambling shrub, small tree, liane, flowers golden yellow to cream or yellow, fruits divided into finger-like carpels bright yellow to orange-red, sweet acid ripe fruits edible, close to *Uvaria caffra* Sond., on rocky hill-sides, bushland, thickets and forest edges

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 41: 329. 1908, *Planta Med.* 57(4): 341–3. 1991, *Phytochemistry* 65(4): 399–404. 2004, *Pharmaceutical Biology* (formerly *International Journal of Pharmacognosy*) 42(4–5): 269–273. 2004

(Root bark antimalarial. Antibacterial, febrifuge and anti-fungal, for stomachache and chest pain.)

in Kenya: kilali, malkach, malkatwa, mareer booy, maza-ladowe, mikisia, molkech, mudzaladowe, mukukuma, mzaladowe, tamalak, tamanges, tamangesig, tamangesyat, tamrenwo, tamuketwo, tarnanges, tomekekwo, tomolokwo

in Tanzania: nsilimbu

Uvaria tonkinensis Finet & Gagnep.

China.

See *Species Plantarum* 536. 1753 and *Bulletin de la Société Botanique de France* 53(Mém. 4): 74, pl. 14a. 1906, Chen, Y., Yu, D.Q. “Tonkinecin, a novel bioactive annonaceous acetogenin from *Uvaria tonkinesis*.” *J. Nat. Prod.* 59(5): 507–509. 1996

(Antimicrobial, antiparasitical and anthelmintic activities.)

Uvaria versicolor Pierre ex Engler & Diels (*Unona macrocarpa* (Baill.) Baill.; *Unona macrocarpa* Vahl ex Dunal; *Unona macrocarpa* Vahl ex DC.; *Uvaria angolensis* Welw. ex Oliv.; *Uvaria angolensis* subsp. *guineense* Keay; *Uvaria bukobensis* Engl.; *Uvaria chamae* P. Beauv.; *Uvaria nyasensis* auct.; *Uvaria variabilis* De Wild.; *Xylopiastrum macrocarpum* (DC. ex Dunal) Roberty)

Gabon. Lianescent shrub, sarmentose, dense, leaves alternate, flowers fasciculate and axillary, perianth pale green-white, corolla green, stamens white, ovaries yellow the centre like a fried egg, fruits brown-green

See *Species Plantarum* 536. 1753, *Supplementum Plantarum* 44, 270. 1782, Palisot de Beauvois, Ambroise Marie Francois Joseph (1752–1820), *Flore d’Oware et de Benin en Afrique*. Paris, Fain [1805–1821], *Regni Vegetabilis Systema Naturale* 1: 489. 1817, *Monographie de la famille des Anonacées* 103. 1817, *Adansonia* 8: 316–317. 1868, *Flora of Tropical Africa* [Oliver et al.] 1: 22–23. 1868, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 339. 1882 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 16–17. 1901, *Plantae Bequaertianae* 1(4): 461. 1922, *Kew Bulletin* 1953: 71. 1953, *Bull. Inst. Franç. Afrique Noire* 15: 1397. 1953, *IARC Sci Publ.* (63): 59–88. 1984, *Taxon* 39(4): 675–690. 1990, *Pharmazie* 55(9): 688–689. 2000, Addae-Kyereme, J. et al. “Antiplasmodial activities of some Ghanaian plants

traditionally used for fever/malaria treatment and of some alkaloids isolated from *Pleiocarpa mutica*; in vivo antimalarial activity of pleiocarpine.” *J. Ethnopharmacol.* 76(1): 99–103. 2001, *Phytother. Res.* 17(4): 364–367. 2003, *Dakar Med.* 48(2): 112–116. 2003 [Antiparasitic effect of Senegalese Annonaceae used in traditional medicine: *Annona senegalensis*, *Uvaria chamae* and *Xylopiia aethiopica*.], *J. Nat. Prod.* 67(6): 1041–1043. 2004, Okokon, J.E., Ita, B.N., Udokpoh, A.E. “The in-vivo antimalarial activities of *Uvaria chamae* and *Hippocratea africana*.” *Ann. Trop. Med. Parasitol.* 100(7): 585–590. 2006, *Planta Med.* 72(10): 938–940. 2006

(Stem bark and roots for liver disorders, skin diseases. Acaricidal, tonic, cytotoxic, antiparasitical (the stem barks and roots of *Uvaria chamae* on *Trypanosoma brucei*) and antimalarial. Decoction of roots laxative. Leaves, stem and roots for hemorrhoids, malaria, kidney and liver infections. The juice of roots, stem, or leaves applied to wounds and sores, and leaf infusion used as a lotion for injuries, swellings, ophthalmia. Fruit juice for cuts and wounds. Leaves decoction and slices of lemon taken daily as a beverage for fever; leaves decoction taken for toothache.)

in English: finger root

in Burkina Faso: bou-hil, bou-karal, bou-riay, kelen-balè

in Nigeria: agbalin, agbannan, akisan, akossa, iru-ugu, kas kaifi

in Senegal: hasao

in West Africa: an lanne, finga, ndosbe njele

in Yoruba: agako, eerugbo, eeruiju, eeruju, eroudjou

Uvariopsis Engl. & Diels Annonaceae

Like *Uvaria*, from the genus *Uvaria* and the Greek *opsis* ‘aspect, resemblance, appearance’, see *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 298. 1899.

Uvariopsis guineensis Keay (*Uvaria spectabilis* DC. ex Dunn; *Uvaria spectabilis* DC.; *Uvaria spectabilis* A. Chev.)

Tropical Africa.

See *Syst. Nat.* [Candolle] 1: 484. 1817 [1818 publ. 1–15 Nov 1817], *Monogr. Anon.* 92. 1817 and *Explor. Bot. Afrique Occ. Franc.* 1: 7. 1920, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] 1: 47, 50. 1927, *Ann. Soc. Sc. Brux.* liii. Sér. B, 314. 1933, *Kew Bulletin* 1952: 152. 1952

(Root bark analgesic, antispasmodic, tonic.)

Uvularia L. Colchicaceae (Convallariaceae, Liliaceae, Uvulariaceae)

Latin *uva*, *ae* ‘cluster, cluster of grapes’, *uvula* ‘the soft palate’, the flowers were thought to resemble the uvula;

see *Species Plantarum* 1: 304–305. 1753, *Prodromus Florae Nepalensis* 50. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 199. 1843 and Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 673. 1996.

Uvularia grandiflora Sm. (*Uvularia grandiflora* f. *latifolia* Louis-Marie; *Uvularia grandiflora* f. *rotundifolia* Louis-Marie; *Uvularia grandiflora* f. *variegata* Louis-Marie)

North America. Perennial herb, bright yellow flowers

See *Exotic Botany* 1: 99, t. 51. 1805 and *Rev. Oka Agron. Inst. Agric.* 14: 145, 153, fig. 10, n. 4. 1940, *Pl. Syst. Evol.* 147: 289–297. 1984

(Plant used for swellings. Root used for stomach pain, backache.)

in English: large-flowered bellwort, largeflower bellwort, largeflowered bellwort

Uvularia perfoliata L. (*Anonymos pudica* Walter, nom. inval.; *Erythronium americanum* Ker Gawl. f. *carolinianum* (J.F. Gmel.) Voss; *Erythronium carolinianum* J.F. Gmel.; *Uvularia caroliniana* (J.F. Gmel.) Wilbur; *Uvularia flava* Sm.; *Uvularia perfoliata* var. *major* Michx.; *Uvularia perfoliata* var. *minor* Michx.; *Uvularia pudica* Fernald, nom. illeg.)

North America. Perennial herb, perfoliate leaves, flowers with orange markings, food

See *Species Plantarum* 1: 304–305. 1753, *Fl. Carol.* [Walter] 123. 1788, *Syst. Nat.*, ed. 13[bis]. 2(1): 546. 1791, *Fl. Bor.-Amer.* (Michaux) 1: 199. 1803, *Exot. Bot.* 1: 97, t. 50. 1805, *Botanical Magazine* 28: pl. 1113. 1808, *Vilmorin's Blumengärtnerei*. ed. 3, 1: 1115. 1895 and *Rhodora* 41(491): 536. 1939, *Rhodora* 63(746): 39. 1961, *Rhodora* 64: 90. 1962, *Ann. Carnegie Mus.* 49: 265–305. 1980, *Taxon* 41: 586. 1992

(Roots for eye troubles and cough.)

in English: bellwort, perfoliate bellwort

Uvularia sessilifolia L. (*Oakesia sessilifolia* (L.) S.Watson; *Oakesia sessilifolia* S. Watson; *Oakesiella sessilifolia* (L.) S. Watson; *Oakesiella sessilifolia* (L.) Small; *Oakesiella sessilifolia* Small)

North America. Perennial herb, leaves eaten

See *Species Plantarum* 1: 304–305. 1753, *Proceedings of the American Academy of Arts and Sciences* 14: 221, 269. 1879 and *Flora of the Southeastern United States* [Small] 271–272, 1328. 1903

(Infusion of roots taken as a blood purifier, used as a poultice for broken bones.)

in English: sessile bellwort, sessileleaf bellwort, wild oats

V

Vaccaria Wolf Caryophyllaceae

Latin *vacca*, *ae* 'a cow', fodder, pastures, referring to the milk production of cows, the roots are galactagogue, the plant was regarded as good fodder; see *Genera Plantarum* 3. 1776, Medikus, Friedrich Kasimir (1736–1808), *Philosophische Botanik* (mit kritischen Bemerkungen). 1: 96. Mannheim, 1789–1791 and *Acta Bot. Neerl.* xv. 160. 1966, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 673. 1996.

Vaccaria hispanica (Miller) Rauschert (*Saponaria hispanica* Miller; *Saponaria segetalis* Necker; *Saponaria vaccaria* Linnaeus; *Saponaria vaccaria* var. *grandiflora* Fisch. ex DC.; *Vaccaria pyramidata* Medikus; *Vaccaria pyramidata* subsp. *grandiflora* (Fisch. ex DC.) Hayek; *Vaccaria pyramidata* var. *grandiflora* (Fisch. ex DC.) Cullen; *Vaccaria segetalis* (Necker) Garcke ex Asch.; *Vaccaria vaccaria* Britton; *Vaccaria vaccaria* Huth; *Vaccaria vaccaria* (L.) Britton, nom. inval., tautonym; *Vaccaria vaccaria* (L.) Huth, nom. inval., tautonym; *Vaccaria vulgaris* Host)

India.

See *Species Plantarum* 1: 408–409. 1753, *The Gardeners Dictionary*: ... eighth edition no. 4, in errata. 1768, *Deliciae gallo-belgicae* 1: 194. 1768, *Genera Plantarum* 3. 1776, *Philosophische Botanik* 1: 96. 1789, Host, Nicolaus Thomas (1761–1834), *Flora Austriaca* 1: 518. (The saponin-containing seeds of this species are poisonous upon ingestion. Mucilaginous sap of the plant febrifuge, tonic, for scabies, skin diseases, itch. Seeds powdered with black pepper and stem bark of *Wrightia tomentosa* given in the treatment of diphtheria.)

in English: cockle, cow cockle, cow herb, cow soapwort, dairy pink

in China: mai lan cai, wang pu liu hsing

in India: musna, panjhara, subaani

in Arabic: foul el-'arab

in South Africa: akkerkoeikruid

in North America: cowcockle, cowherb, saponaire des vaches

Vaccinium L. Ericaceae

Vaccinium (Plinius), a Latin name for the blueberry, whortleberry, a corruption of the Greek *hyakinthos* 'the hyacinth, purple, dark red', Bakinthos; Akkadian *bakkitu* 'professional mourner, paid mourner', *bakku* 'lachrymose', *bakum*, *bikitu* 'lamented'; see *Species Plantarum* 1: 349–352. 1753, *Genera Nova Madagascariensia* 11. 1806, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 653–654. 1809, *Skrifter af Naturhistorie-Selskabet* 6: 120. 1810, *Dictionnaire des Sciences Naturelles* [Second edition] 7: 310. 1817, Presl, Carl (Karl, Carel, Carolus) Borivoj (Boriwog, Boriwag) (1794–1852), *Epistola de Symphysis*, nova genere plantarum: ad illustrissimum Liberum Baronem Josephum de Jacquini/data a C. Vaccinium angustifolium Aiton (*Cyanococcus angustifolium* (Aiton) Rydb.; *Vaccinium angustifolium* Benth.)

Mexico.

See *Species Plantarum* 1: 349–352. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 11. 1789, *Plantas Hartwegianas imprimis Mexicanas*: 45. 1840 and *Beihefte zum Botanischen Centralblatt* 18(2): 521. 1905, *Brittonia* 1(2): 94. 1931, *British Journal of Nutrition* 88: 389–397. 2002, *Phytomedicine* 13(9–10): 612–623. 2006, *The Journal of Nutritional Biochemistry* 17(2): 109–116. 2006

(Antidiabetic, antioxidant. One of the richest sources of antioxidants among fruits and vegetables.)

in English: blueberry, wild blueberry

Vaccinium bracteatum Thunberg (*Andromeda chinensis* Lodd.)

China, Taiwan. Shrub or small tree, alternate leaves chartaceous to coriaceous, bisexual flowers in axillary racemes, corolla white, globose berries black with many compressed-ellipsoid seeds

See *Syst. Veg.*, ed. 14. 363. 1784, *Fl. Jap.* 156. 1784

(Used in the treatment of cancer, wounds, boils, swellings.)

in English: Asiatic bilberry, sea bilberry

in China: nan zhu, nan zhu zi

in Japan: shashan-bo

in Malaya: kelampadang, mempadang

Vaccinium caespitosum Michaux (*Vaccinium cespitosum* Michx.; *Vaccinium geminiflorum* Kunth)

North America. Perennial, food

See *Flora Boreali-Americana* (Michaux) 1: 234. 1803, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 3: 267, pl. 252. 1818[1819] and *Brittonia* 51(2): 231–254. 1999

(Berries a source of vitamin C.)

in English: dwarf bilberry, dwarf blueberry

Vaccinium corymbosum L.

North America.

See *Taxon* 25: 341–346. 1976, *J. Amer. Soc. Hort. Sci.* 108: 339–342. 1983, *J. Wuhan Bot. Res.* 11: 289–292. 1993, *Amer. J. Bot.* 85(5): 698–703. 1998

(Antioxidant.)

in English: North American highbush blueberry

Vaccinium fragile Franchet

China.

See *J. Bot.* (Morot) 9: 366. 1895

(Astringent, stomachic.)

in China: wu ya guo

Vaccinium globulare Rydb.

North America.

See *Memoirs of the New York Botanical Garden* 1: 300–301. 1900, *Brittonia* 56(3): 253. 2004

(Roots or stems infusion drunk for heart troubles; roots decoction applied for rheumatic and arthritic pains. Leaves infusion drunk for kidney trouble.)

in English: huckleberry

Vaccinium keysseri Schltr.

New Guinea. Shrub or tree, erect, stiff, straggling, flowers in racemes, fleshy pink campanulate corolla, fruit a blackish berry

See *Bot. Jahrb. Syst.* Ixii. 488. 1929

(Leaves crushed and eaten for internal sores.)

in Papua New Guinea: utitava

Vaccinium membranaceum Douglas ex Torr. (*Vaccinium coccineum* Piper; *Vaccinium globulare* Rydb.; *Vaccinium membranaceum* Douglas ex Hook.; *Vaccinium membranaceum* Douglas ex Torr. var. *rigidum* (Hook.) Fernald; *Vaccinium membranaceum* var. *rigidum* Fernald)

North America. Perennial shrub

See *Fl. Bor.-Amer.* (Hooker) 2: 32. 1834, *United States Exploring Expedition* 17(2): 377–378. 1874 and *Mem. New York Bot. Gard.* 1: 300. 1900, *Proc. Biol. Soc. Washington* 31: 75. 1918, *Brittonia* 51(2): 231–254. 1999

(Berries a source of vitamin C.)

in English: blue huckleberry, thinleaf huckleberry

Vaccinium microcarpum (Turcz. ex Rupr.) Schmalh. (*Oxycoccus microcarpus* Turcz. ex Rupr.; *Oxycoccus palustris* Pers. var. *pusillus* Dunal; *Oxycoccus pusillus* (Dunal) Nakai)

China.

See *Species Plantarum* 1: 349–352. 1753, *The British Herbal* 324. 1756, *Syn. Pl.* 1: 419. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 577. 1839, *Beiträge zur Pflanzenkunde des Russischen Reiches* 4: 56. 1845 and *Botanical Magazine* 31(369): 246. 1917, *Taxon* 29: 725–726. 1980, *Taxon* 31(2): 344–360. 1982, *Acta Societatis Botanicorum Poloniae* 52: 87–99. 1983, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 64: 147–155. 1994

(Antifungal, antiseptic, antibacterial, astringent.)

in China: xiao guo hong mei tai zi

Vaccinium minus Vorosch. (*Rhodococcum minus* Avror.; *Vaccinium minus* (Avrorin) Vorosch.; *Vaccinium minus* (Lodd.) Maximova; *Vaccinium vitis-idaea* subsp. *minus*

(Lodd., G. Lodd. & W. Lodd.) Hultén; *Vaccinium vitis-idaea* var. *minus* Lodd., G. Lodd. & W. Lodd.; *Vaccinium vitis-idaea* L. var. *punctatum* Moench)

Europe, North America. Perennial shrub or subshrub

See *Botanical Cabinet*; consisting of coloured delineations. 11(3): t. 1023. 1825, *Flora Ingrica* 670. 1860 and *Flora of the Aleutian Islands* 268. 1937, *Botaničeskij Žurnal* (Moscow & Leningrad) 43: 1721. 1958, *Novosti Sist. Vyssh. Rast.* 12: 269. 1975, *Taxon* 31(2): 344–360. 1982, *Willdenowia* 19: 199–213. 1989

in English: northern mountain cranberry

Vaccinium myrtilloides Michx. (*Vaccinium angustifolium* var. *myrtilloides* (Michx.) House)

North America.

See *Species Plantarum* 1: 349–352. 1753, *Flora Boreali-Americana* [Michaux] 1: 234. 1803 and *Taxon* 31(2): 344–360. 1982

(Antiseptic, antibacterial.)

Vaccinium myrtilus L. (*Vaccinium myrtilum* St.-Lag.; *Vaccinium myrtilus* Cham. & Schldl.; *Vaccinium myrtilus* subsp. *oreophilum* (Rydb.) Á. Löve, D. Löve & B.M. Kapoor; *Vaccinium myrtilus* var. *oreophilum* (Rydb.) Dorn; *Vaccinium oreophilum* Rydb.)

China.

See *Species Plantarum* 1: 349–350. 1753, *Linnaea* 1: 525. 1826, *Florula belgica*, opera majoris prodromus, auctore ... 53. 1827, *Synopsis Florae Germanicae et Helveticae* 474. 1837, *Ann. Soc. (Antifungal, antiseptic, antibacterial, antioxidant, astringent; blueberries used to facilitate blood glucose regulation in type 2 diabetes.)

in English: bilberry, blaeberry, blueberry, European blueberries, Slovenian bilberries, whortleberry

in China: hei guo yue ju

Vaccinium ovalifolium Sm.

North America. Perennial shrub

See *The Cyclopaedia*; or, universal dictionary of arts, ... 36(2): *Vaccinium* no. 2. 1819[1817] and *Brittonia* 51(2): 231–254. 1999

(Berries a source of vitamin C.)

in English: mathers, oval-leaf blueberry

Vaccinium ovatum Pursh (*Vaccinium ovatum* Pursh var. *saporousum* Jeps.)

North America. Perennial shrub or subshrub

See *Flora Americae Septentrionalis*; or, ... [Pursh] 1: 290. 1813 and *Man. Fl. Pl. Calif.* [Jepson] 751. 1925

(Leaves decoction taken for diabetes.)

in English: California huckleberry

Vaccinium scoparium Leiberg ex Cov. (*Vaccinium erythrococtum* Rydb.; *Vaccinium microphyllum* Reinw. ex Blume; *Vaccinium microphyllum* (Hook.) Rydb.; *Vaccinium myrtilus* var. *microphyllum* Hook.; *Vaccinium scoparium* Leiberg; *Vaccinium scoparium* Coville)

North America. Perennial shrub, fruits eaten fresh

See *Bijdragen tot de flora van Nederlandsch Indië* 851. 1825–26, *Flora Boreali-Americana* 2(7): 33. 1834, *Mazama* 1(2): 196–197. 1897, *Contributions from the United States National Herbarium* 5(2): 103. 1897 and *Memoirs of the New York Botanical Garden* 1: 301. 1900, *New Man. Bot. Centr. Rocky Mts. (Vasc. Pl.)* 372. 1909, *Brittonia* 51(2): 231–254. 1999

(Antibacterial, astringent.)

in English: littleleaf huckleberry

Vaccinium uliginosum L. (*Vaccinium occidentale* A. Gray; *Vaccinium uliginosum* L. subsp. *alpinum* (Bigelow) Hultén; *Vaccinium uliginosum* L. subsp. *gaultherioides* (Bigelow) S.B. Newslett.* (Zurich) 24: 15–19. 1995, *Opera Bot.* 137: 1–42. 1999

(Antifungal, stomachic, antiseptic, antibacterial, astringent.)

in English: cowberry, cranberry, foxberry, lingberry, lingtonberry

in China: yue ju ye

Vachellia Wight & Arnott Fabaceae (Acacieae, Mimosaceae)

After the English (b. Littleport, Cambridgeshire) Rev. George Harvey Vachell, b. 1799, chaplain to the Hon. East India Company at Macao from 1825 to 1836, collected plants in China; see *Prodromus Florae Peninsulae Indiae Orientalis* 1: 272. 1834 and Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981, *Phytologia* 87(3): 139–178. 2005 [2006].

Vachellia farnesiana (Linnaeus) Wight & Arnott (*Acacia acicularis* Humb. & Bonpl. ex Willd.; *Acacia acicularis* Willd.; *Acacia caven* (Molina) Molina; *Acacia densiflora* Morrison; *Acacia densiflora* (Small) Cory; *Acacia densiflora* (Alexander ex Small) Cory, nom. illeg., non *Acacia densiflora* Morrison; *Acacia edulis* Humb. & Bonpl. ex Willd.; *Acacia farnesiana* (Linnaeus) Willd.; *Acacia farnesiana* (L.) Wall.; *Acacia farnesiana* fo. *pedunculata* (Willd.) Kuntze; *Acacia farnesiana* var. *farnesiana*; *Acacia farnesiana* var. *lenticellata* (F. Muell.) F.M. Bailey; *Acacia ferox* M. Martens & Galeotti; *Acacia lenticellata* F. Muell.; *Acacia minuta* (M.E. Jones) R.M. Beauch.; *Acacia minuta* subsp. *densiflora* (Small) R.M. Beauch.; *Acacia minuta* subsp. *densiflora* (Alexander ex Small) R.M. Beauch.; *Acacia minuta* subsp. *minuta* (M.E. Jones) R.M. Beauch.; *Acacia pedunculata* Willd.; *Acacia smallii* Isely; *Farnesia odora* Gasp.; *Farnesiana odora* Gasp.; *Mimosa acicularis* Poir.; *Mimosa caven* Molina; *Mimosa farnesiana* Linnaeus; *Mimosa indica* Poir.; *Mimosa pedunculata* (Willd.) Poir.; *Mimosa suaveolens* Salisb.; *Pithecellobium acuminatum* M.E. Jones; *Pithecellobium minutum* M.E. Jones; *Popanax farnesiana* (L.) Raf.; *Popanax farnesiana* (L.) Raf.; *Popanax venosa* Britton ex Britton & Killip; *Racosperma densiflorum* (Morrison) Pedley; *Vachellia densiflora* Alexander ex Small; *Vachellia densiflora* Small; *Vachellia farnesiana* Wight & Arn.)

Vachellia Wight & Arnott Fabaceae (Acacieae, Mimosaceae)

Central America. Perennial non-climbing tree, often in *Acacia farnesiana* (Linnaeus) Willd.

See *Species Plantarum* 1: 516–523. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1*. 1754, *Enumeratio Methodica Plantarum* 400. 1763, *Saggio sulla Storia Naturale del Chili ... 1*: 174. 1782, *Species Plantarum*. Queensland Pl.* 164. 1913, *Manual of the Southeastern Flora* 655, 1505. 1933, *Rhodora* 38(455): 406. 1936, *Annals of the New York Academy of Sciences* 35(3): 139–140. 1936, *Annals of the Missouri Botanical Garden* 37(2): 184–314. 1950, *Catálogo ilustrado de las plantas de Cundinamarca* 3: 1–136. 1968, *Sida* 3(6): 384. 1969, *Bothalia* 11: 471–472. 1975, *Phytologia* 46(1): 5–7. 1980, *Flora Illustrada de Entre Ríos (Argentina)* 6(3): 134–136, 442–738. 1987, *Las Leguminosas en la Agricultura Boliviana: Revisión de Información* 409–423. 1996, *Austrobaileya* 6(3): 460. 2003, *Phytologia* 87(3): 139–178. 2005 [2006]

(Stem bark decoction for malaria. For swellings, pound the roots and poultice. Flowers and bark used in preparation, applied externally and taken orally as treatment for various mental disorders; juice of bark in stomach pain. Flowers an ingredient in an oral remedy for anemia with gastrointestinal bleeding and epigastric pain. Repellent to rodents and snakes.)

Vahlia Thunberg Saxifragaceae (Vahliaceae)

For the Norwegian-born Danish botanist Martin Vahl, 1749–1804, traveller, studied under Linnaeus, professor of botany, father of the Danish botanist Jens Laurentius (Lorenz) Moestue Vahl (1796–1854); see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 419. 1965, Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 412. Boston, Mass. 1972, Stafleu and Cowan, *Taxonomic literature*. 6: 628–631. 1986, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 279. Regione Siciliana, Palermo 1988.

Vahlia digyna (Retz.) Kuntze (*Haloragis jerosoides* H. Perrier; *Vahlia digyna* Kuntze; *Vahlia menyharthii* Schinz; *Vahlia ramosissima* DC.; *Vahlia sessiliflora* DC.; *Vahlia viscosa* Roxb.)

East Africa. Erect, petals and stamens orange-yellow

See *Characteres Generum Plantarum* 61, pl. 31. 1775, *Nova Genera Plantarum* 2: 36. 1782, *Observationes Botanicae* 4: 23. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 54. 1830, *Flora Indica*; or descriptions of Indian Plants 2: 89. 1832, *Revisio Generum Plantarum* 1: 227. 1891 and *Notulae Systematicae*. *Herbier du Museum de Paris* 14: 305–306. 1952, *Acta Botanica Neerlandica* 15: 84, 85. 1966

(For jaundice, drink roots and meat decoction.)

in Kenya: lonyang

Valeriana L. Valerianaceae (Caprifoliaceae)

A plant from Valeria, ancient name of a province of low Pannonia, or from the personal name Valerius; see *Species Plantarum* 1: 31–34. 1753, *Tabula Affinitatum Regni Vegetabilis* 227. 1802, *Nova Genera et Species Plantarum* (quarto ed.) 3: 333. 1818, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 3: 41, 52. 1882, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 436. 1899 and *Genera Siphonogamarum* 512. 1905, V. Bertoldi, “Il nome botanico Valeriana.” *Archivum romanicum*. X: 210–216. Genève & Firenze 1926, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(6/2): 287–321. 1937, *Annals of the Missouri Botanical Garden* 38(4): 420, 437, 441, 461, 479. 1951, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1578. Dover Publications, New York 1967, [John Lemprière, 1765?–1824], *Lemprière’s Classical Dictionary of Proper Names Mentioned in Ancient Authors*. 3rd edn. 442. London and New York 1984, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1410. 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 183. Berlin & Hamburg 1989, *Gayana* 48: 121–126. 1991, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 674. Basel 1996.

Valeriana adscendens Turcz.

Ecuador. Herb, rhizome short-creeping, bracts and sepals pale green tipped with reddish-purple, corolla white, in grass páramo

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 25(2): 173. 1852 and Luteyn, J.L. “Páramos, a checklist of plant diversity, geographical distribution, and botanical literature.” *Memoirs of the New York Botanical Garden* 84: viii–xv, 1–278. 1999, A. Capasso and V. De Feo, “Central nervous system pharmacological effects of plants from Northern Peruvian Andes: *Valeriana adscendens*, *Iresine herbstii* and *Brugmansia arborea*.” *Pharmaceutical Biology* 40(4): 274–293. 2002, *Phytotherapy Research* 17(6): 661–664. 2003, *Medicinal Chemistry* 3(6): 599–604. 2007

(Ritual, magic-therapeutic, traditional healers use it with the ritual aim to expel bad spirits from the body. Neuroleptic activity of methanolic extract of the plant.)

Valeriana capensis Thunb.

Tropical Africa. Herb, tuberous roots, white flowers

See *Prodromus Plantarum Capensium*, ... 1: 7. 1784

(Roots for hysteria, madness, nervous disorders, epilepsy, convulsions.)

Valeriana chaerophylloides Sm. (*Astrephia chaerophylloides* (Sm.) DC.; *Astrephia laciniata* (Ruiz & Pav.) Dufr.; *Boerhavia chaerophylloides* (Sm.) Willd.; *Fedia chaerophylloides* (Sm.) Kunth; *Valeriana chaerophylla* Pers.; *Valeriana laciniata* Ruiz & Pav.) (*Astrephia* Dufr., from the Greek *a* ‘without, not’ and *strepho* ‘to twist, to twine’, *astraphes* ‘fixed, immovable’.)

Peru. Herb, scrambling, weak-stemmed, corolla white, invasive

See *Species Plantarum* 1: 3, 31–34. 1753, *Plantarum Icones Hactenus Ineditae* 3: 53, t. 53. 1791, *Species Plantarum*. Editio quarta 1: 22. 1797, *Flora Peruviana* 1: 42, t. 69. 1798, *Histoire Naturelle et Médicale de la Famille des Valérianées* 50, 52. 1811, *Nova Genera et Species Plantarum* (quarto ed.) 3: 334. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 629. 1830 and *Field Mus. Nat. Hist., Bot. Ser.* 13(6/2): 287–321. 1937

(Roots sedative.)

Valeriana connata Ruiz & Pav. (*Valeriana connata* var. *nutans* Graebn.)

South America.

See *Flora Peruviana* [Ruiz & Pavon] 1: 39, t. 67. 1798 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 444. 1906, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(6/2): 287–321. 1937

(Crushed roots applied as a poultice to set bones.)

Valeriana decussata Ruiz & Pav. (*Valeriana clematoides* Graebn.; *Valeriana decussata* Bonpl. ex Wedd.; *Valeriana decussata* subsp. *polemonioides* (Kunth) B. Eriksen; *Valeriana melanocarpa* Killip; *Valeriana polemonioides* Kunth)

South America.

See *Flora Peruviana* [Ruiz & Pavon] 1: 42, t. 70. 1798, *Nova Genera et Species Plantarum* (quarto ed.) 3: 332. 1818[1819], *Chlor. And.* 2: 19. 1859 [1857 publ. 7 Mar 1859] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 437. 1906, *Journal of the Washington Academy of Sciences* 15: 453. 1925, *Taxon* 32: 504. 1983, *Flora of Ecuador* 34: 52. 1989

(Roots for hysteria, madness, nervous disorders, epilepsy, convulsions, insomnia.)

Valeriana dioica L.

India.

See *Species Plantarum* 1: 31. 1753 and *Taxon* 29: 723. 1980, *Watsonia* 19: 134–137. 1992, *Watsonia* 19: 169–171. 1993, *Opera Bot.* 137: 1–42. 1999

(Leafy shoots juice dropped for earache.)

in India: tagar

Valeriana edulis Nutt. ex Torr. & A. Gray (*Valeriana edulis* Nutt.)

North America. Perennial herb, cooked root eaten

See *A Flora of North America: containing ...* (Torr. & A. Gray) 2(1): 48. 1841 and *Ann. Missouri Bot. Gard.* 38(4): 377–503. 1951, *Phytologia* 56(1): 55–60. 1984, *Acta Bot. Mex.* 62: 31–64. 2003

(Raw roots considered poisonous.)

in English: edible valerian, tobacco root

Valeriana edulis Nutt. ex Torr. & A. Gray var. *edulis*

North America. Perennial herb

See *A Flora of North America: containing ...* (Torr. & A. Gray) 2(1): 48. 1841 and *Phytologia* 56(1): 55–60. 1984

(Raw roots poisonous.)

in English: edible valerian, tobacco root

Valeriana globiflora Ruiz & Pav. (*Valeriana globifera* Pers.)

South America.

See *Flora Peruviana* [Ruiz & Pavon] 1: 43, t. 65. 1798, *Synopsis Plantarum* 1: 37. 1805

(Crushed roots applied as a poultice to set bones.)

Valeriana hardwickii Wall. (*Valeriana hardwickii* var. *arnottiana* Wight; *Valeriana hardwickii* var. *hoffmeisteri* Klotzsch; *Valeriana hardwickii* var. *leiocarpa* Miq.; *Valeriana helictes* Graebn.; *Valeriana rosthornii* Graebn.)

Himalaya, Kashmir to Bhutan, India. Succulent herb, pubescent, terrestrial, fibrous roots, stem leaves pinnate, white flowers in numerous axillary stalked compound corymbs forming a long terminal lax panicle

See *Flora Indica*; or descriptions of Indian Plants 1: 166–167. 1820, *Icones Plantarum Indiae Orientalis* t. 1045–1046. 1846, *Reis. Pr. Waldem. Bot.* 84. 1862, *Annales Museum Botanicum Lugduno-Batavi* 3: 115. 1867 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(5): 599–601. 1901

(Dried powdered leaves and young stems used to protect the clothes from insects. Leaves juice applied against poisonous stings of insects and scorpions. Root in snakebite, epilepsy; powder of dried roots used to relieve cough as well as for stimulating the nervous system; a decoction soporific, antispasmodic, antiseptic, stimulant, carminative, sedative, in hysteria, nervous breakdown, epilepsy, to wash wounds. Roots as incense during *hawan* and religious fairs.)

in English: Indian valerian

in India: asarun, mushkbala, nahani, nakuni, nihani, samawa, sameoa, samerva, sameva, tagar, tagar ganth, taggar, taggar ganthoda

in Indonesia: gedebes, lompong alas, semprettan

in Nepal: sugandhawala

Valeriana interrupta Ruiz & Pav. (*Astrephia interrupta* (Ruiz & Pav.) Dufur.; *Astrephia interrupta* Dufur.; *Valeriana interrupta* var. *minor* Ball; *Valeriana pedicularioides* Graebn.)

South America.

See *Flora Peruviana* [Ruiz & Pavon] 1: 43, t. 65. 1798, *Synopsis Plantarum* 1: 37. 1805, *Histoire Naturelle et Médicale de la Famille des Valérianées* 41, 51. 1811, *Journal of the Linnean Society, Botany* 22: 43. 1885 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 442. 1906

(Crushed roots applied as a poultice to set bones.)

Valeriana jatamansi Jones (*Valeriana harmsii* Graebn.; *Valeriana jatamansi* var. *frondosa* Hand.-Mazz.; *Valeriana jatamansi* var. *glabra* Merr.; *Valeriana jatamansi* var. *hygrobia* Hand.-Mazz.; *Valeriana mairei* Briq.; *Valeriana wallichii* DC.)

Temperate Himalaya, Kashmir, Bhutan. Herb, dioecious, perennial, pubescent, strongly fragrant thick rootstock, radical leaves long-petioled, cauline leaves short-stalked, flowers white or pinkish in terminal corymbs or clusters, open forest

See *Asiatic Researches* 2: 405, 416. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 640. 1830, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(Beibl. 59): 32. 1898 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 17: 330. 1914, *Acta Horti Gothoburgensis* 9(8): 171–173. 1934, *Journal of the Arnold Arboretum* 23(2): 196. 1942, *Taxon* 32: 321. 1983

(Used in Ayurveda. Leaf juice taken to check diarrhea in children. Roots aromatic, stimulant, carminative, antispasmodic, used in epilepsy, hysteria, hypochondria, snakebite, digestion, stomachache, urine troubles; oil used for rheumatism, sprains, contusions and dislocation of joints. Root paste used in headache and eye diseases; root juice applied on the forehead to relieve severe headaches, also as a nasal drop to overcome nosebleed. Roots as incense, *dhoop*, during *hawan* and religious fairs.)

in English: Indian valerian

in China: ma ti xiang

in India: amrut jata, asarun, bala, balamushk, char, char godar, dala, dhoop, gur-balchor-ak, mah-kak, masi, mushakbala, mushkbala, mushkwala, mushkwali, muskbala, nahani,

nakhanihani, nihani, sameva, samyo, sugandh bala, sumaiya, tagar, tagarganthoda, taggar, wala

in Nepal: muskhabata, pangbu, soman, sugandhabal, sugandhawal, sugandhawala, tagar

Valeriana microphylla Kunth (*Valeriana alophis* Graebn.; *Valeriana amphiphis* Graebn.; *Valeriana bonplandiana* Wedd.; *Valeriana gonatolophis* Graebn.; *Valeriana hieronymii* Graebn.; *Valeriana origanifolia* Turcz.; *Valeriana revoluta* Diels)

Ecuador.

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 325, t. 273. 1818[1819]

(Sedative.)

Valeriana mussooriensis V. Prakash, Aswal & Mehrotra

India. Herb, perennial, fragrant, prostrate, acaulescent, small inflorescence, 4-lobed anthers, allied to *Valeriana jatamansi*

(Antiseptic, antiinflammatory.)

See *Ethnobotany* 1(1–2): 47–49. 1989 (publ. 1990)

Valeriana oblongifolia Ruiz & Pav.

South America, Colombia, Peru.

See *Flora Peruviana* [Ruiz & Pavon] 1: 40, t. 65. 1798

(Crushed roots applied as a poultice to set bones.)

Valeriana paniculata Ruiz & Pav.

South America, Colombia, Peru.

See *Flora Peruviana* [Ruiz & Pavon] 1: 40, t. 70. 1798

(Roots for hysteria, madness, nervous disorders, insomnia, epilepsy, convulsions.)

Valeriana pilosa Ruiz & Pav. (*Valeriana longifolia* Kunth; *Valeriana longifolia* var. *pilosa* (Ruiz & Pav.) Wedd.; *Valeriana pilosa* Phil.)

South America, Colombia, Peru.

See *Flora Peruviana* [Ruiz & Pavon] 1: 39, t. 66, fig. a. 1798, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 3: 330. 1818[1819], *Linnaea* 28: 702. 1858, *Chloris Andina* 2: 21. 1859 [1857 publ. 7 Mar 1859] and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(6/2): 287–321. 1937, *Fl. Ecuador* 34: 1–60. 1989

(Leaves infusion drunk as a stimulant. Crushed roots applied as a poultice to set bones.)

Valeriana pinnatifida Ruiz & Pav.

South America, Peru.

See *Flora Peruviana* [Ruiz & Pavon] 1: 40, t. 69. 1798

(Used to cure *mal de maico*, stinging sores and rashes caused by a species of *Schinus*.)

Common name: albergilla

Valeriana rigida Ruiz & Pav. (*Phyllactis rigida* (Ruiz & Pav.) Pers.; *Phyllactis rigida* Pers.)

South America, Peru.

See *Flora Peruviana* [Ruiz & Pavon] 1: 39, t. 65. 1798, *Synopsis Plantarum* (Persoon) 1: 39. 1805 and *Taxon* 29: 537–538. 1980, *Nordic J. Bot.* 6(4): 427–446. 1986, *Darwiniana* 27: 527–557. 1986

(Crushed roots applied as a poultice to set bones.)

Valeriana urbanii Phil. (*Valeriana grisebachiana* Borsini)

Chile. Páramos

See *Anales Mus. Nac., Santiago de Chile* 1891: 29. 1891 and *Lilloa* 8: 358, f. 2D, t. 2, 3. 1943

(Dressing to reduce swelling and heal wounds)

in Chile: waje

Vallis Burm.f. Apocynaceae

Latin *vallis*, *e* ‘belonging to a rampart’, *vallum*, *i* ‘a wall, rampart’, *vallus* ‘a stake in a palisade, a stake’, referring to the nature of these plants, used for fences, see *Fl. Ind.* (N.L. Burman) 51. 1768, *Tent. Fl. Nep.* 14. t. 7. 1824 and *Bull. Mus. Natl. Hist. Nat.* sér. 2, 20: 382. 1948.

Vallis indecora (Baillon) Tsiang & P.T. Li (*Beaumontia indecora* Baillon; *Parabeaumontia indecora* (Baillon) Pichon; *Vallis grandiflora* Hemsley & E.H. Wilson)

China.

See *Bull. Mens. Soc. Linn. Paris* i. (1888) 759. 1888 and *Bull. Misc. Inform. Kew* 1906, 162. 1906, *Bull. Mus. Natl. Hist. Nat.* sér. 2, 20: 382. 1948, *Acta Phytotax. Sin.* 11 (4): 375. 1973

(All parts are used to treat worm diseases.)

in English: giant vallaris

in China: da niu zi hua

Vallis solanacea (Roth) Kuntze (*Peltanthera solanacea* Roth; *Vallis heynei* Spreng.; *Vallis heynii* Spreng.; *Vallis solanacea* Kuntze; *Vallis solanacea* (Roth) K. Schum.)

China. Woody climber, white smooth bark, simple opposite leaves, white flowers in cymes, fruit a follicle

See *Novae Plantarum Species* 132. 1821, *Syst. Veg.* (ed. 16) [Sprengel] 1: 635. 1824 [dated 1825; publ. in late 1824], *FBI* 3: 650. 1882, *Revisio Generum Plantarum* 2: 417. 1891, *Die Natürlichen Pflanzenfamilien* 4(2): 186. 1895

(Latex irritant. Milky latex to treat old sores, wounds, swellings, nail sores. Small branch introduced into vagina for abor-

tion. Veterinary medicine, leaf juice in eye diseases of cattle; crushed leaves made into a paste applied to bone fracture.)

in China: niu zi hua

in India: haparmali, mani pushpan, mesau-ripak, phulkati

Vallesia Ruiz & Pav. Apocynaceae

After the Spanish physician Francisco de Vallés (Franciscus Vallesius), 1524–1592, his writings include *Tratado de las aguas destiladas, pesos, y medidas de que los boticarios deven usar*. Madrid 1592, *De iis quae scripta sunt physice in libris sacris, sive de sacra philosophia*. Lugduni 1592 and *Methodus medendi*. Venetiis 1589; see *Florae Peruviana, et Chilensis Prodromus* 2: 26. 1794, M. Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. Madrid 1858 and E. Ortega and B. Marcos González, *Francisco de Valles*. 1914, Richard J. Durling, comp., *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. Bethesda, Maryland 1967, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Vallesia glabra (Cav.) Link (*Rauwolfia glabra* Cav.; *Vallesia chiococoides* Kunth; *Vallesia cymbifolia* Ortega; *Vallesia dichotoma* Ruiz & Pav.; *Vallesia glabra* var. *pubescens* (Andersson) Wiggins; *Vallesia inedita* Guib.; *Vallesia pubescens* Andersson; *Vallesia punctata* Spreng.)

Mexico to N. Argentina.

See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 207. 1821 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/1): 363–455. 1959, *Darwiniana* 23(2–4): 367–474. 1981, *Fl. Prov. Jujuy*. 13(8): 84–116. 1983

(Leaves burned and the ashes rubbed on the body as a remedy for measles.)

Vallisneria L. Hydrocharitaceae (Vallisneriaceae)

After the Italian (b. Lucca province) physician Antonio Vallisneri (or Vallisneri), 1661–1730 (d. Padova), biologist, naturalist, botanist, 1700–1710 professor of practical medicine at the University of Padua and from 1710 to 1730 professor of theoretical medicine, 1705 member of the Royal Society of London, 1718 knighted by the Duke Rinaldo I of Modena, showed that all parasitic insects of plants derive from eggs (to demonstrate the fallacy of spontaneous generation), his writings include *Dialoghi sopra la curiosa origine di molti insetti*. Venezia 1700, *Istoria del camaleonte Affricano e di varj animali d'Italia*. [4to, first edn., a monograph on the chameleon, salamander and other animals.] Venezia 1715 and *Istoria della generazione dell'uomo, e degli animali*. Venezia 1721. See *Opere fisico-mediche stampate e manoscritte del ... Antonio Vallisneri raccolte da Antonio suo figliuolo*. Venezia 1733, Carl Linnaeus, *Species*

Plantarum. 2: 1015. 1753 and *Genera Plantarum*. Ed. 5. 446. 1754, Jan Swammerdam (1637–1680), *Historia Insectorum Generalis ... Ex Belgica Latinam fecit Henricus Christianus Henninius*. Editio Nova. [The third Latin edition; originally published in Dutch in 1669.] Leyden 1733 and *The Book of Nature; or the History of Insects ... With the life of the author, by Herman Boerhaave*. [First edition in English, first published under the title *Biblia Naturae* in a Dutch/Latin edition in 1737–38.] London 1758, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 917. 1852 and Donald Culross Peattie (1898–1964), *De natuur ontsloten in de werken van Marcello Malpighi, Jan Swammerdam, etc.* Den Haag 1937, *Fieldiana, Bot.* 24(1): 84–86. 1958, Garrison and Morton, *Medical Bibliography*. 302. New York 1961, *Ceiba* 19(1): 1–118. 1975, Giuseppe Montalenti, in *D.S.B.* 13: 562–565. New York 1981, *Proc. Indian Sci. Congr. Assoc.* 80(3:VIII): 150. 1993, *Fl. Mesoamer.* 6: 10–12. 1994, *Proc. Indian Sci. Congr. Assoc.* 82(3:VIII): 79–80. 1995, Mario Sabia, *Le opere di Antonio Vallisneri. Bibliografia ragionata*. Rimini 1996, Asher Rare Books & Antiquariaat Forum, *Catalogue Natural History*. item no. 148. The Netherlands 1998.

Vallisneria americana Michx. var. **biwaensis** (Miki) Lowden (*Vallisneria asiatica* Miki var. *biwaensis* Miki; *Vallisneria natans* var. *biwaensis* (Miki) H. Hara; *Vallisneria spiralis* L.)

India. Submerged fresh-water herb, tufted, stemless, creeping rhizomes, stoloniferous, glabrous, dioecious, fibrous roots

See *Species Plantarum* 2: 1015. 1753, *Flora Boreali-Americana* 2: 220. 1803 and *Botanical Magazine* 48: 329. 1934, *Contr. Inst. Bot. Univ. Montreal* 46: 1–38. 1943, *Journal of Japanese Botany* 49: 136. 1974, *Taxon* 29: 360–361. 1980, *Taxon* 30: 699–701. 1981, *Aquatic Botany* 13: 293. 1982, *Proc. Indian Sci. Congr. Assoc.* 79(3:VIII): 125–126. 1992, *J. Indian Bot. Soc.* 71: 99–101. 1992

(Plant stomachic, paste used in skin diseases, diarrhea, leucorrhea.)

in India: jalsarpolia, patscola, sewar

Vallisneria natans (Lour.) H. Hara (*Physkium natans* Lour.; *Vallisneria asiatica* Miki; *Vallisneria gigantea* Graebn.; *Vallisneria physkium* (Lour.) Juss. ex Spreng.; *Vallisneria spiraloides* Roxb.)

SE Asia, India.

See *Flora Cochinchinensis* 2: 663. 1790, *Systema Vegetabilium*, editio decima sexta 3: 900. 1826, *Flora Indica*; or, descriptions of Indian Plants 3: 750. 1832 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49(1): 68–69. 1912, *Botanical Magazine* 48(569): 329–333, f. 4A-F, 5A, t. 1A-B. 1934, *Journal of Japanese Botany* 49(5): 136. 1974, *Guihaia* 11(2): 153–156. 1991

(Plants stomachic, used in leucorrhea.)

in India: sawal, siyal

Vancouveria C. Morren & Decne. Berberidaceae

After the British explorer Captain George Vancouver, Royal Navy, 1757–1798, navigator, with Captain James Cook on his second and third voyages, 1791–1795 survey of the Pacific coast of North America (with Archibald Menzies on the Voyage of the *Discovery* and *Chatham*, commanded by William Broughton), 1794 promoted Captain, wrote *A Voyage of Discovery to the North Pacific Ocean and round the World*. [Completed by his brother John, aided by Peter John Puget, 1765–1822.] London 1798; see *Annales des Sciences Naturelles; Botanique*, sér. 2, 2: 351. 1834 and John T. Walbran, *British Columbia Coast Names, 1592–1906*. To Which are Added a Few Names in Adjacent United States Territory, Their Origin and History. First Edition. Ottawa: Government Printing Bureau, 1909, Archibald Menzies, *Menzies' Journal of Vancouver's Voyage, April to October, 1792*. Edited, with ... notes, by C.F. Newcombe ... and a biographical note by J. Forsyth. Victoria 1923 [Archives of British Columbia. Memoir no. 5], E. Bell, ed., "The log of the *Chatham* (by Peter Puget)." *Honolulu Mercury*. 1, 4. 1929, G. Godwin, *Vancouver: A Life 1757–1798*. London 1930, B. Anderson, *Surveyor of the Sea: The Life and Voyages of George Vancouver*. Seattle 1960, W. Kaye Lamb, ed., *The Voyage of George Vancouver 1791–1795*. London 1984, G.P.V. Akrigg & Helen B. Akrigg, *British Columbia Place Names*. Sono Nis Press, Victoria 1986, Jonathan Wantrup, *Australian Rare Books, 1788–1900*. Sydney 1987, John Dunmore, *Who's Who in Pacific Navigation*. 254–256. Honolulu 1991.

Vancouveria chrysantha E. Greene (*Vancouveria hexandra* (Hook.) C. Morren & Decne. var. *chrysantha* (Greene) Greene)

North America. Perennial herb

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 2: 351. 1834, *Pittonia* 2(8C): 100. 1890 and *Taxon* 25: 631–649. 1976, *J. Sci. Hiroshima Univ., Ser. B, Div. 2, Bot.* 22: 159–269. 1989

(Used for cough, fever, colds.)

in English: golden inside-out flower, northern inside-out flower, Siskiyou inside-out-flower

Vancouveria hexandra (Hook.) C. Morren & Decne. (*Epimedium hexandrum* Hook.; *Vancouveria brevicula* Greene; *Vancouveria parvifolia* Greene; *Vancouveria picta* Greene)

North America. Perennial herb

See *Flora Boreali-Americana* 1(1): 30–31, pl. 13. 1829, *Annales des Sciences Naturelles; Botanique*, sér. 2, 2: 351. 1834, *Pittonia* 2(8C): 100. 1890 and *Taxon* 25: 631–649. 1976, *J. Sci. Hiroshima Univ., Ser. B, Div. 2, Bot.* 22: 159–269. 1989

(Used for cough, fever, colds.)

in English: northern inside-out flower, white insideout flower

Vanda W. Jones ex R. Br. Orchidaceae

From a Sanskrit word applied to *Vanda tessellata* (Roxb.) G. Don or *Vanda roxburghii* R. Br., see *Asiatic Researches* 4: 302, 1795, *Botanical Register*; consisting of coloured ... 6: pl. 506. 1820, *Die Natürlichen Pflanzenfamilien* 2(6): 214. 1889 and *Lexikon Generum Phanerogamarum* 584. 1903.

Vanda spathulata (L.) Spreng. (*Aerides maculata* Buch.-Ham. ex Sm.; *Cymbidium spathulatum* (L.) Moon; *Cymbidium spathulatum* Moon; *Epidendrum spathulatum* L.; *Limodorum spathulatum* Willd.; *Limodorum spathulatum* (L.) Willd.; *Taprobanea spathulata* (L.) Christenson; *Vanda spathulata* Spreng.)

India, Sri Lanka. Epiphyte, golden yellow flowers

See *Sp. Pl.*: 952. 1753, *Sp. Pl.* 4: 125. 1805, *Cycl.* 39: 9. 1818, *Cat. Pl. Ceylon*: 60. 1824, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 719. 1826 and *Lindleyana* 7: 91. 1992

(Plant powder for dysentery and diarrhea. Flower powder useful for asthma, tuberculosis and epilepsy. Crushed leaves and stem used as an ointment for skin diseases.)

in India: ponnampu-maravara

Vanda tessellata (Roxb.) Hook. ex G. Don (*Aerides tessellata* (Roxb.) C. Wright; *Cymbidium allagnata* Buch.-Ham. ex Wall., nom. inval.; *Cymbidium tessellatum* (Roxb.) Sw.; *Cymbidium tesselloides* Roxb.; *Epidendrum tessellatum* Roxb.; *Vanda roxburghii* R. Br.; *Vanda roxburghii* var. *wrightiana* Rchb.f.; *Vanda tessellata* Hook. ex G. Don; *Vanda tesselloides* Rchb.f.; *Vanda tesselloides* (Roxb.) Rchb.f.)

India, SE Asia, Vietnam. Epiphytic, yellowish green flowers in racemes, ribbed capsules, in dry deciduous forests

See *Pl. Coromandel* 1: 34. 1795, *Nova Acta Regiae Soc. Sci. Upsal.* 6: 75. 1799, *Bot. Reg.* 6: t. 506. 1820, Loudon, J. C. (John Claudius) (1783–1843), *Loudon's Hortus Britannicus*. A catalogue ... 372. London, 1830, *Fl. Ind.* ed. 1832, 3: 463. 1832, *Numer. List*: 7318, 7327. 1832, *Ann. Bot. Syst.* (Walpers) 6: 864. 1864 and *Taxon* 28: 392. 1979, *Taxon* 30: 704–705. 1981

(Used in Ayurveda, Unani and Sidha. Hypnotic. Plant paste, mixed with hen egg and small quantity of water, applied in the treatment of bone fractures; plant ash with mustard oil used for bone fracture; whole plant paste applied on acne and to knee joints to relieve rheumatic pains; whole plant juice given internally to hasten the healing of bone fracture. Smelling flowers to relieve migraine and headache. Leaf juice applied on pus formation in the ears; leaf paste applied externally and bandaged to set bone fractures; leaf extract applied externally to reduce the fever. Roots juice taken as a contraceptive and for infertility; root paste applied for joint pain and arthritis; seed oil of *Sesamum indicum* with roots of *Vanda tessellata* applied in rheumatism, rheumatoid arthritis; root decoction given for cholera; root paste a postpartum remedy, given to avoid any complications after childbirth; roots burnt and fumes inhaled for fever. Leaves of

Urena lobata along with velamen root of *Vanda roxburghii* prepared into a paste applied to skin diseases. Veterinary medicine, root paste applied for rheumatism; dried powdered leaves given for weakness; leaf extract dropped in the ear for earache; fruit ground into a paste and given internally to cattle to get rid of intestinal worms.)

in India: aanka, akash-bel, akashvel, akipucam, atirasa, badanika, badanike, balnar, banda, bandanike, bangaali raasna, bhujangakshi, chekitola, chhatraki, chinta changa, chitteduru, chittiveduri, chittiveduru, chittivedwi, cittiveduru, dare-banki, dronagandhika, elaparni, gandhanakuli, gandhanakull, gatch ranga, harjodi, ilkum, ippa vajinika, jeevanthige, jeevrakhya (jee, life, rakhya, saving, protecting), jkeevanthige, jodtod, kanapa badanika, kanapa chettu badanike, kanapabadanika, kanapabandanika, kanapachettu, kanapachettubadanika, kanpabadanika, kanphora, kantanakuli, kapauphool, kharkittan, khurgasar, kodikalla chettu, kourbanda, marabaale, maravalai, maravazhai, mardaaru, mardaru, marsaru, muktarasa, nai, nakuleshta, nakuli, near-danchettu, palankapa, perasara, persara, raasna, rasadhya, rasana, rasma, rasna, rasna nai, rasya, saga, sakamini, sarpagandha, shreyasi, sugandha, sugandhimula, surasa, suvaha, trnrasna, vadanika, vadanike, vanda, vandaka, vandaka gida, vandanika, vriksharuha, yuktarasa

Vanda testacea (Lindl.) Rehb.f. (*Aerides testacea* Lindl.; *Aerides wightiana* Lindl.; *Aerides wrightiana* Lindl. ex Wall., nom. nud.; *Aerides wrightiana* Lindl., nom. nud.; *Vanda parviflora* Lindl.; *Vanda vitellina* Kraenzl.)

India, China. Epiphyte, flowers yellow with pink

See *Numer. List*: 7320. 1832, *Gen. Sp. Orchid. Pl.*: 238. 1833, *Gard. Chron.*, n.s., 8: 166. 1877

(Leaves crushed and applied on wounds and cuts; leaves warmed with mustard oil applied over swollen parts to reduce pain; leaf juice for earache.)

in India: ilkum, kiriraasna, vajnik

Vangueria Juss. Rubiaceae

From the local Madagascan names *voa vanguer*, *vavangue* for a species of *Vangueria*, see *Gen. Pl.* [Jussieu] 206. 1789 and *Kew Bulletin* 42(1): 186. 1987.

Vangueria agrestis (Schweinf. ex Hiern) Lantz (*Fadogia agrestis* Schweinf. ex Hiern)

Trop. Africa, Sudan. Woody herb, small shrub, erect, multi-stemmed, yellowish stem, leaves leathery below, yellow flowers, small axillary cymes, green to orange fruits, in savanna

See *Reliq. Kotsch.* 47. 1868, *Flora of Tropical Africa* [Oliver et al.] 3: 154. 1877 and *Pl. Syst. Evol.* 253(1–5): 179. 2005

(Leaves decoction febrifuge. Leafy twig for kidneys, diuretics. Roots tonic, astringent, aphrodisiac, for diarrhea, dysentery, stomach troubles, venereal diseases.)

in Burkina Faso: bit-kobre

in Ivory Coast: abunaré, popirae, souroukou gnégné, woné

in Nigeria: bakin gagai

Vangueria apiculata K. Schum. (*Vangueria longicalyx* Robyns)

Trop. Africa. Shrub or small tree subscaudent, spreading, often with drooping or horizontally spreading leafy branches, inflorescences short, flowers yellow greenish, calyx tubular, flower clusters at nodes, fruit yellow-brown, sweet ripe fruits eaten raw, at forest edge, in evergreen forest (*Juniperus*, *Podocarpus*), riverine, in mixed woodland, bushland, open woodland and grassland, wetland forests, thickets

See *Die Pflanzenwelt Ost-Afrikas* C: 385. 1895 and *Bulletin du Jardin Botanique de l'État* 11: 278. 1928, *Kew Bulletin* 36: 493–557. 1981, *Plant Systematics and Evolution* 149: 89–118. 1985, *Journal of Ethnobiology and Ethnomedicine* 2: 35. 2006

(Roots oxytotic. Leaves used to treat stomachache. Roots decoction ascaricidal, used to treat intestinal worms.)

in English: small wild medlar, tangle-flowered wild medlar, triangle-flowered wild-medlar

in Kenya: buruuri, chinkomoni, emaler, emardanyi, engumieker, enkomoni, igikomani, ikikumuni, ilgum, kimolwet, lkoromasei, lkoromosyei, lkoromosyeoi, mubiru, mukomoa, muvuma, olgumi, omokomoni, shikomoli, shimanyamunyi, taparper, toperpirwo, toperpirwo

in Tanzania: emardenya, engumi, engumieker, ilgum, kaworo, kiviroe, mdaria, mdowo, mgugunwa, mkondikondo, msambalawe, muvuma, mviru, mviru-mbago, ndawiro, olgumi, umugugunwa

in Uganda: amatuguda, ntugunda

in Zimbabwe: munzvuru

Vangueria infausta Burch. (*Canthium infaustum* Baill.; *Canthium infaustum* (Burch.) Baill.; *Canthium infaustum* Baill.; *Vangueria tomentosa* Hochst.)

Tropical and South Africa, Kenya. Small tree or shrub, deciduous, small greenish white to yellowish flowers, good edible fleshy soft sweet-sour fruit

See *Trav. S. Africa* 2: 258. 1824, *Bot. Mag.* 57: t. 3014. 1830, *Flora* 25: 238. 1842, *Fl. Cap.* 3: 14. 1865, *J. Linn. Soc., Bot.* 16: 248–280. 1878, *Adansonia* 12: 191. 1878 and *J. Linn. Soc., Bot.* 40: 92. 1911, *Kew Bull.* 36: 493–557. 1981, *Veld & Flora* 72: 89. 1986, *Pl. Syst. Evol.* 230(3–4): 173–187. 2002

(Stem, leaves and roots for fevers and parasitic diseases; roots and leaves purgative, to treat malaria, ringworms, chest ailments, bronchitis, pneumonia. Leaves warmed and used as a poultice for swellings; an infusion for the relief of toothache. Bark decoction drunk as a postpartum remedy. Roots cooked

into a gruel for colic. Magic, ritual, magical properties, the tree is considered to possess evil powers.)

in English: large wild medlar, wild medlar

in Mozambique: mjululu

in Rhodesia: munjiro

in South Africa: amantulwane, mavelo, Mmilo, mothwanyê, Mpfilwa, muzwilu, umbizo, umTulwa, umVile, umVilo, umViyo, wilde mispel

in Tanzania: msharia

Vangueria infausta Burch. subsp. **infausta** (*Vangueria barnimiana* Schweinf.; *Vangueria infausta* var. *virescens* Sond.; *Vangueria munjiro* S. Moore; *Vangueria tomentosa* Hochst.; *Vangueria velutina* Hook.)

Rwanda. Small tree or shrub, good edible fruit

See *Bot. Mag.* 57: t. 3014. 1830, *Flora* 25: 238. 1842, *Fl. Cap.* 3: 14. 1865 and *J. Linn. Soc., Bot.* 40: 92. 1911, Teichler, G., "Über die anthelmint. Wirkung der Wurzelrinde von *Vangueria tomentosa*." Leipzig, 1935

(Leaves warmed and used as a poultice for swellings. Bark decoction drunk as a postpartum remedy. Roots cooked into a gruel for colic.)

in English: large wild medlar, wild medlar

in Mozambique: mjululu

in Rhodesia: munjiro

Vangueria infausta Burch. subsp. **rotundata** (Robyns) Verdc. (*Vangueria campanulata* sensu Dale & Eggeling; *Vangueria rotundata* Robyns; *Vangueria tomentosa* sensu Dale & Eggeling)

Trop. Africa. Small tree or shrub, straggling, multi-stemmed, flowers greenish-white densely clustered on a branched inflorescence, greenish brown ripe fruits much relished, sweet soft brown mealy pulp eaten raw, leaves occasionally browsed by animals, in *Acacia* bushland, dry evergreen forest, woodland with *Cussonia arborescens*, *Bridelia micrantha*, *Heteropyxis*

See *Travels in the interior of South Africa* 2: 258, f. p. 259. 1824 and *Bulletin du Jardin Botanique de l'État* 11: 300, f. 27, 28. 1928, Haerdi, F. "Die Eingeborenen-Heilpflanzen des Ulanga-Distriktes Tanganjikas (Ostafrika)." *Acta Tropica*. Supplement 8: 1–278. 1964, *Kew Bulletin* 36: 549. 1981, Hedberg, I. et al. "Inventory of plants used in traditional medicine in Tanzania. I. Plants of the families Acanthaceae-Cucurbitaceae." *J. Ethnopharmacol.* 6: 29–60. 1982, *Plant Systematics and Evolution* 149: 89–118. 1985, Pia Fyhrquist, "Traditional medicinal uses and biological activities of some plant extracts of African *Combretum* Loeffl., *Terminalia* L. and *Pteleopsis* Engl. species (Combretaceae)." Academic dissertation, University of Helsinki, 2007

(Roots boiled and the liquid used as treatment for venereal diseases; roots decoction for stomachache, infertility and

intestinal worms. Roots chewed and applied on the site of a snakebite. To treat snakebites a mixture of small chips of the roots of *Combretum molle* and roots of *Markhamia obtusifolia* (Baker) Sprague (Bignoniaceae) and *Vangueria rotundata* Robyns is applied to the bite and wounds from poisoned arrows are treated in the same way.)

in English: false medlar, wild medlar

in Kenya: anyuka, apindi, emaler, engumi-etari, kimolik, kimolwet, komolik, komolwo, kumukhomoli, Ikoromosien, Ikoromosyo, mbiruiru, mboghombogho, mubiru, mughomoli, mukhomoli, mukomoa, mukomora, muteleli, muviru, mviru, olgum, olgumi, omokomoni, omuya, shikomoli

in Tanzania: babaxchet, barangu, engumi, engumi-etari, olgumi, imumua, kaworo, lindikiti, loshoro, malharimo, malharimog, mapendo, masada, mavilo makubwa, mbowe, mdaria, mkungu-lusuli, mnyabwita, msada, msambalawe, msanda, mufitanda, mukungulusuli, mulade-mujenghuma, mururu, musada, muviru, mvilu, mviru, mvuu, ndawiro, ndowo, ngobalo, olmadanyi

Vangueria lasiantha (Sond.) Sond. (*Canthium discolor* Baill., nom. illeg.; *Cuviera australis* K. Schum.; *Lagynias discolor* E. Mey. ex Robyns; *Lagynias discolor* E. Mey.; *Lagynias lasiantha* (Sond.) Bullock; *Pachystigma lasianthum* Sond.; *Vangueria lasiantha* Sond.)

Mozambique to S. Africa.

See *Genera Plantarum* 206. 1789, *Zwei Pflanzengeogr. Docum.* (Drège) 197. 1843, *Fl. Cap.* (Harvey) 3: 14. 1865 and *Bulletin du Jardin Botanique de l'État* 11: 312. 1928, *Bull. Misc. Inform. Kew 2003 [as *Lagynias lasiantha*.], Calane da Silva, M., Izidine, S. & Amuse, A.B. *A Preliminary Checklist of the Vascular Plants of Mozambique*. Pretoria 2004

(Leaves for dysentery and diarrhea.)

in South Africa: uDulmuthwa (Zulu)

Vangueria madagascariensis J.F. Gmel. (*Canthium edule* (Vahl) Baill.; *Canthium edule* Baill.; *Vangueria acutiloba* Robyns; *Vangueria commersonii* Jacq.; *Vangueria cymosa* C.F. Gaertn.; *Vangueria edulis* Lam.; *Vangueria edulis* Vahl; *Vangueria edulis* (Vahl) Vahl; *Vangueria floribunda* Robyns; *Vangueria robynii* Tennant; *Vangueria tomentosa* Hochst.; *Vangueria venosa* Robyns; *Vavanga chinensis* V. Rohr; *Vavanga edulis* Vahl, nom. illeg.)

Trop. & S. Africa, Madagascar, Tanzania. Small tree or shrub, erect, many-branched, flowers greenish white borne on a branched inflorescence, ripe juicy sweet yellow-red rounded fruits edible, fruit eaten by elephants, on forest margin, riverine forest, woodland, bushland, *Brachystegia-Combretum* woodlands

See *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *Systema Naturae* ... editio decima tertia, aucta,

reformata 2: 367. 1791, *Skrifter af Naturhistorie-Selskabet* 2(1): 207. 1792, *Symbolae Botanicae, ...* 3: 36. 1794, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 20, t. 44. 1797, *Supplementum Carpologiae* 75, pl. 193, f. 1. 1805, *Encyclopédie Méthodique, Botanique* 2: 235. 1819, *Flora* 25: 238, adnot. 1842, *Museum Botanicum* 1: 178. 1850, *Adansonia* 12: 191. 1878 and *Bulletin du Jardin Botanique de l'État* 11: 285–286, 290. 1928, *Kew Bulletin* 22: 443. 1968, *Annalen des Naturhistorischen Museums in Wien* 77: 21. 1973, *Kew Bulletin* 36: 493–557. 1981, *Phytother. Res.* 20(3): 228–231. 2006

(Roots decoction used to treat intestinal worms, colics. Leaves for influenza and diabetes; warmed leaves as a poultice for swellings; a cold extract of leaves anti-allergic. Bark for malaria; a decoction as a postpartum remedy. Tree associated with magic and witchcraft and cattle fertility.)

in English: common wild medlar, Spanish tamarind, tamarind of the Indies, wild medlar

in Kenya: anyuka, apindi, buriri, chinkomoni, enkomoni, irigormosso, kikomoa, kimolwet, komol, komolik, komolwo, lkormosiyoi, lkoromosien, mbiru, mdaria, mubiru, mukhomoli, muluet, mviru, olgumi, omokomoni

in Madagascar: vandrika, vandriky, vavandrika, vavandrike, vavangue, voa vanga, voa vanger, voavandrika, voavandriky

in Tanzania: babaxchet, barangu, emadanyi, emardanyi, engumi, erakwtu, imumua, irakwtu, kaworo, lindikiti, loshoro, malharimog, mbiro, mdaria, mfitanda, mkungu-lusili, mkungu-lusuli, mlade, msada, msambalawe, msambalawo, msambarau, mubilu, mulade, mulade-mujenghuma, musada, muviru, mviku, mviro, mviru, ndawiro, ndowo, olgumi, olmadanyi

Vangueria pygmaea Schltr. (*Pachystigma pygmaeum* (Schltr.) Robyns; *Pachystigma pygmaeum* Robyns; *Pachystigma rhodesianum* Robyns; *Pachystigma rhodesianum* (S. Moore) Robyns; *Vangueria nana* K. Schum. ex Robyns; *Vangueria rhodesiana* S. Moore; *Vangueria setosa* Conrath)

Tanzania to Northern Prov. Woody rootstock, white flowers

See *Bull. Jard. Bot. État* 11: 119, 122. 1928, Govaerts, R. *World Checklist of Selected Plant Families Database in ACCESS*. Kew 2003 [as *Pachystigma pygmaeum*.]

(Leaves very poisonous to sheep, causing a disease known in South Africa as *gousiekte*.)

Vangueria volkensis K. Schum. (*Vangueria linearisepala* K. Schum.) (after the German botanist Georg Ludwig August Volkens, 1855–1917, in 1884–1885 traveller in the Egyptian-Arab Desert, explorer; see John H. Barnhart, *Biographical Notes upon Botanists* 3: 443. 1965; Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection* 421. Boston, Mass. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University* Cambridge, Mass. 1917–1933; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 308. 1947.)

Tanzania. Small tree or shrub, spreading, arching, flowers green cream, sweet ripe dark brown fruits eaten fresh, evergreen forest margins, associated with *Juniperus* and *Podocarpus*, in riverine forests, wet valleys, grassland, bushland, rocky places

See *Histoire des plantes de la Guiane Française* 1: 192, 194, t. 76. 1775, *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *Pflanzenw. Ost-Afrikas*, C: 384. 1895 and *Mem. New York Bot. Gard.* 17(1): 307. 1967

(Tonic, antiparasitic.)

in English: wild medlar

in Kenya: kikomoa, kimolwet, kimolwet-ne-mingin, komohro, komoluet, lgumi, lmludai, maldai, mdaria, mubiru, mubiru-ng'ombe, mubiruiaru, muiru, mukomboiru, mukomoa, muluet, ngururusu, ngururusia, olgumi, tabirir, tabirirwo, tapirpirwa

in Tanzania: emardany, emardanyi, engumi, erigumi, mdaria, mgugunwa, mlade, msada, msambalawe, mulade, mvilu, mviru, mviru, olgumi, olmadanyi

Vangueriopsis Robyns Rubiaceae

From *Vangueria* and the Greek *-opsis*, resembling the genus *Vangueria*.

Vangueriopsis lanciflora (Hiern) Robyns (*Canthium lanciflorum* Hiern; *Canthium platyphyllum* Hiern; *Plectronia lanciflora* (Hiern) Eyles; *Plectronia platyphylla* (Hiern) K. Schum.; *Vangueria lateritia* Dinter; *Vangueriopsis lanciflora* (Hiern) Robyns ex Good; *Vangueriopsis lanciflora* Robyns ex R.D. Good; *Vangueriopsis lancifolia* Greenway)

Zaire to S. Africa. Small tree or shrub, spreading, many-branched, inflorescences densely yellowish velvety pubescent, sweet scented flowers shallow-tubular with markedly recurved lobes, petals curl back, yellow-brown fleshy juicy sweet edible fruit, bee forage, fruits eaten by people, birds and monkeys, found in deciduous woodlands and open grassland, in *Brachystegia-Julbernardia* woodland, rocky places, wooded grassland, associated with *Albizia-Combretum*, *Brachystegia-Julbernardia*, *Parinari*, *Monotes*, *Burkea-Pterocarpus-Copaifera*

See *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *Genera Plantarum* 206. 1789, *Flora of Tropical Africa* 3: 146. 1877 and *Trans. Roy. Soc. South Africa* 5: 493. 1916, *J. (Tonic, antiparasitic, wound dressing.)

in English: crooked false medlar, false wild medlar, Rhodesian wild medlar, Zimbabwe wild medlar

in Namibia: valsmispel

in Southern Africa: muTofu, muTufu (Shona)

in N. Rhodesia: musole, musori

in Tanzania: mgelelya, msambalawe lulenga, mungelelya

in Zambia: chitowasilu, mangolovya, mtowasilu, mtowasisu, mufilu, umufilo

in Zimbabwe: amadumbutshenene, mutufu, mutupfu, umso-mosomo, umviyo, umyiyo

Vanilla Miller Orchidaceae

Spanish *vaina* and *vainilla*, referring to the cylindrical and sheath-like pod, Latin *vagina* 'a sheath', the fruits appear like little pods; see *The Gardeners Dictionary* ... Abridged ... fourth edition no. 3. 1754, *The Gardeners Dictionary*: ... eighth edition no. 1. 1768, *Elementa botanica* ... 3: 134. 1790, F. D'Alberti di Villanuova, *Dizionario universale, critico, enciclopedico della lingua italiana*. Lucca 1797–1805, *The Paradisus Londinensis* 2(1): t. 82. 1807, *Botanist's Repository*, for new, and rare plants 8: t. 538. 1808, *A Key to Structural, Physiological and Systematic Botany* 73. 1835, *Annales Générales d'Horticulture* 17: 97, t. 1769. 1867–1868 and *Kulturpflanze* 2: 587. 1959, *Le Vanillier et la Vanille dans le monde* 159. 1959, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1580. New York 1967, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1412. 1988, *Harvard Pap. Bot.* 5(2): 383–466. 2001, *Lankesteriana* 9(3): 355–398. 2010.

Vanilla andamanica Rolfe

India, Andaman, Nicobar. Climber, white flowers

See *Bulletin of Miscellaneous Information Kew* 237. 1918

(Flowers carminative, febrifuge.)

Vanilla griffithii Rchb. f. (*Vanilla tolypephora* Ridl.)

W. Malesia. Climber, fleshy, slightly milky latex, fleshy fruit a banana-like capsule, fruits sweet and edible

See *Bonplandia* (Hannover) 2: 88. 1854, *Trans. Linn. Soc. London, Bot.* 3: 376. 1893

(Flowers febrifuge, pounded and rubbed on the body against fever. Stem and leaves contain a whitish irritating latex, produces a very unpleasant irritation of the skin. Used to stimulate hair growth, irritating juice from the leaves rubbed into the hair; reported case of allergic contact dermatitis in a hair tonic.)

in Peninsular Malaysia: akar penubal, akar punubal, telinah kerbau bukit, telinga kerbau

Vanilla planifolia Jacks. ex Andrews (*Myrobroma fragrans* Salisb., nom. illeg.; *Notylia planifolia* (Jacks. ex Andrews) Conz.; *Notylia planifolia* (Andrews) Conz.; *Notylia sativa* (Schiede) Conz.; *Notylia sylvestris* (Schiede) Conz., nom. illeg.; *Notylia sylvestris* L.B. (Fruits aphrodisiac, carminative, febrifuge, spasmolytic, emmenagogue and stimulant. Dermatitis from vanilla, dermatitis of the hands and face, skin, eczema, erythema, pustular eruption, conjunctivitis; contact dermatitis in workers with vanilla. Juice irritates the mouth. Vanillin has sensitising properties and cross-sensitivity is observed with some constituents of balsam of Peru. Repeated contact may cause allergic dermatological reaction.)

in English: Bourbon vanilla, Mexican vanilla, Reunion vanilla, vanilla

in Italian: vaniglia, vainiglia

in Madagascar: vanila, vanilina, vanille

in Mexico: vainilla, siisbik (= aromático, oloroso), tlilxochitl (= flor negra)

in Indonesia: panili

in Philippines: vanilla

in Thailand: wanila

Vanilla walkeriae Wight

India, Sri Lanka. Epiphyte, white flowers

See *Icones Plantarum Indiae Orientalis* 3: t. 932. 1845

(Plant extract as an appetizer and digestive, also used in case of poisoning.)

Vasconcellea A. St.-Hil. Caricaceae

See *Species Plantarum* 2: 1036. 1753, *Deuxième Mémoire sur les Résédacées* 12–13. 1837, *Repertorium Botanices*

Guatemala. Herb, erect, perennial, fruits with strongly lobed longitudinal segments, bright yellow fruits with tart flavor edible raw or usually cooked and used as a vegetable, male and female flowers borne on either the same plant or different plants, although most plants are dioecious

See *Species Plantarum* 2: 1036. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Deuxième Mémoire sur les Résédacées* 12–13. 1837, *Index Seminum [Berlin]* 12. 1854, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 418–419. 1864, *Botanical Magazine* (ser. 3) 31: t. 6198. 1875, *Flora Brasiliensis* 13(3): 185. 1889, *Revisio Generum Plantarum* 1: 253. 1891 and *Annals of the Missouri Botanical Garden* 45(1): 30–31, f. 6. 1958, *Agricultura Tecnología (Chile)* 48: 39–42. 1988, *Ernstia* 6(4): 201. 1997, *Ernstia* 10(2): 74–79. 2000, Silva, C.A. et al. “A mitogenic protein fraction in latex from *Carica candamarcensis*.” *Planta Medica* 69(10): 926–932. 2003

(Irritant. Fruits used for blood system, skin, digestive system applications.)

in English: mountain papaya, mountain paw paw

in Indonesia: gedang memedi

Vatairea Aubl. Fabaceae (Dalbergieae)

A popular name, see *Histoire des plantes de la Guiane Française* 2: 755, pl. 302. 1775 and *Arch. Jard. Bot. Rio de Janeiro* 26: 173–213. 1982.

Vatairea guianensis Aubl. (*Andira amazonum* Benth.; *Andira amazonum* Mart. ex Benth.; *Andira bracteosa* Benth.; *Ormosia pacimonensis* Benth.; *Vatairea surinamensis* Kleinhoonte; *Vuacapua amazonum* (Mart. ex Benth.) Kuntze; *Vuacapua amazonum* (Benth.) Kuntze)

French Guiana, Brazil. Perennial non-climbing tree, corolla deep lilac

See *Histoire des plantes de la Guiane Française* 2: 755–756, pl. 302. 1775, *Commentationes de Leguminosarum Generibus* 43. 1837, *Journal of the Linnean Society, Botany*

4(Suppl.): 119. 1860, *Revisio Generum Plantarum* 1: 212. 1891 and *Recueil des Travaux Botaniques Néerlandais* 22: 403, f. 14. 1926, *Acta Amazonica* 18(3–4): 185–187. 1988, *Pharmaceutical Biology* 40(8): 603–616. 2002, *Journal of Ethnopharmacology* 126(1): 159–175. 2009

(Skin-irritating. Antifungal, for skin diseases, sores, eczema, ulcers, itches, ringworm. Fruit juice febrifuge.)

in South America: amarjosa, ana caspi, fava-de-empigem, fava-mutum, fava-of-impinge, gele kabbes

Vatairea macrocarpa (Benth.) Ducke (*Andira cinerascens* Mart.; *Machaerium macrocarpum* Benth.; *Machaerium mucronatum* Benth.; *Tipuana amazonica* Ducke; *Tipuana cinerascens* (Benth.) Malme; *Tipuana macrocarpa* (Benth.) Benth.; *Tipuana macrocarpa* var. *cinerascens* Benth.; *Tipuana mucronata* J.F. Macbr.; *Tipuana mucronata* (Benth.) J.F. Macbr.; *Vatairea macrocarpa* var. *cinerascens* (Benth.) Ducke)

Brazil. Perennial non-climbing tree

See *Herbarium florum brasiliensis* n. 1156. 1837–1841, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 67. 1840, *Journal of the Linnean Society, Botany* 4(Suppl.): 72. 1860, *Flora Brasiliensis* 15(1B): 259–260, pl. 86, f. 1. 1862 and *Archivos do Jardim Botânico do Rio de Janeiro* 1(1): 35. 1915, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 18(17): 14. 1924, *Archivos do Jardim Botânico do Rio de Janeiro* 5: 139, 141. 1930, *Candollea* 6: 10. 1934, *Acta Amazonica* 18: 351–352. 1988, *Phytochemistry* 49: 675–680. 1998, *Journal of Applied Microbiology* 101(1): 111–116. 2001, *Protein and Peptide Letters* 11(2): 195–200. 2004, *Naunyn-Schmiedeberg's Archives of Pharmacology* 374(4): 275–282. 2007, *Journal of Ethnopharmacology* 115(3): 515–519. 2008

(Antimicrobial, antidiabetic. Lectins from the seeds may be useful in antiadhesion therapeutics.)

in Brazil: amargo, amargoso, sucupira preta

Vataireopsis Ducke Fabaceae (Dalbergieae)

Vataireopsis araroba (Aguiar) Ducke (*Andira araroba* Aguiar; *Vouacapoua araroba* (Aguiar) Lyons)

Brazil. Perennial non-climbing tree, bee plant

See *Histoire des plantes de la Guiane Française* 2(Suppl.): 9, pl. 373. 1775, *Genera Plantarum* 363. 1789, *Gazeta Medica da Bahia* 10(8): 353. 1878 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 473. 1932, *Annaes da Academia Brasileira de Sciencias* 8: 26. 1936, *Rodriguésia* 32(54): 21–40. 1980

(The medullary matter of the stem and branches, dried and powdered (Goa powder), the internal dose in pill or powder is a gastro-intestinal irritant, producing large watery stools and vomiting. Vermifuge, antispasmodic, laxative, detergent, used in eczema, psoriasis, ringworm and other skin diseases.)

in English: Bahia powder tree, Goa powder, Goa tree

in Brazil: angelim amarelo, angelim amargoso, angelim araroba

Vataireopsis surinamensis Lima (*Vataireopsis surinensis* H.C. Lima)

French Guiana, Surinam. Perennial non-climbing tree

See *Rodriguésia* 32(54): 30–31, f. sn. 1980

(For leishmaniasis, fever, dermatitis, skin diseases, sores, cuts, wounds, erysipelas.)

Vateria L. Dipterocarpaceae

For the German physician Abraham Vater, 1684–1751, botanist, his writings include *Catalogus plantarum inprimis exoticarum horti Academici Wittenbergensis*. Wittenbergae 1721–1724 and *Catalogus variorum exoticorum ... quae in Museo suo ... possidet* A.V. Wittembergae 1726; see J.H.S. Formey, *Éloges des académiciens de Berlin, II*. Berlin 1757, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch* 919. Ansbach 1852, *Kew Journ.* vi. (1854) 67. t. 2. 1854 and Garrison and Morton, *Medical Bibliography*. By Leslie T. Morton. 976. New York 1961, Henry Guerlac, in *D.S.B.* 6: 169–175. 1981, Bruno von Freyberg, in *D.S.B.* 8: 146–148. 1981, Pietro Franceschini, in *D.S.B.* 10: 266–268. 1981, *Regnum Veg.* 127: 98. 1993.

Vateria indica L. (*Vateria indica* C.F. Gaertn.; *Vateria malabarica* Blume)

India. Evergreen tree, resinous, leathery elliptical leaves, white fragrant flowers in axillary panicles, oblong 3-valved capsule, resinous substance oozing from the bark

See *Hort. Malab.* 4: t. 15. 1683, *Species Plantarum* 1: 515. 1753 [1 May 1753], *Suppl. Carp.* 53 (t. 189). 1805 [24–26 Jun 1805] and *Journal of Physics D: Applied Physics* 5: 1027–1030. 1972, *Tetrahedron Letters* 42(34): 5909–5912. 2001, *Journal of Experimental Therapeutics and Oncology* 3(5): 283–288. 2003, *Tetrahedron* 59(8): 1255–1264. 2003

(Used in Ayurveda, Unani and Sidha. Resin in cough, asthma, leprosy, skin eruptions, whitlow, wounds, ulcers, dysentery, diarrhea, gonorrhoea, bronchitis, ringworm, tuberculosis. Antitumor, antibacterial, from the stem bark. Dhupa butter emollient, for skin care. Fatty oil antibacterial, anti-inflammatory, useful in chronic rheumatism. Plant resin burnt for incense.)

in English: copal tree, dhupa fat, East Indian anime, gum anime, Indian copal tree, Malabar tallow, Malabar white pine, piney varnish, piney varnish tree, safed damar, white dammar, white dammar tree, white damor, white dhamar, white dhup

in India: ajakarna, ajakarnah, ajakarua, attam, baine, bilagagala, bilee daamar, bilee guggula, bili guggulu, bilidaamaru,

Vatica L. Dipterocarpaceae

Latin *vates, is (vatis)* ‘a foreteller, prophet’; *vatica herba*, a plant called also *Apollinaria*, see Pseudo Apuleius Barbarus, *Herbarium* 74 and *Mantissa Plantarum Altera* 2: 152, 242. 1771.

Vatica astrotricha Hance

Cambodia.

See *J. Bot.* 14: 241. 1876 and *BMC Complementary and Alternative Medicine* 9: 29. 2009

(Anti-HIV agents, activities against HIV-1 replication, from an extract of the leaves and stem.)

Vatica cinerea King

Malaya, Vietnam.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 62(2): 104. 1893 [12 Aug 1893] and *J. Nat. Prod.* 66(2): 263–268. 2003

(Anti-HIV agents, antiretroviral activity, from an extract of the leaves and stem.)

Vatica diospyroides Symington

Thailand.

See *Gard. Bull. Straits Settlements*. 9: 347. 1938, *J. Org. Chem.* 64(19): 6976–6983. 1999

(Cytotoxic.)

Vatica lanceifolia (Roxburgh) Blume (*Vateria lanceaeifolia* Roxb.; *Vateria lanceifolia* Roxburgh; *Vatica lanceaeifolia* Blume)

India, Himalaya. Trees, grey bark, leaves elliptic or oblong-lanceolate, yellow-white fragrant axillary flowers in panicles or solitary, 3-furrowed globose capsule

See *Species Plantarum* 515. 1753, *Mantissa Plantarum* 2: 152, 242. 1771, *Fl. Ind.* 2: 601. 1824, *Museum Botanicum* 2(1–8): 31. 1856

(Fresh extract of the bark given in dysentery. Aromatic gum resin burnt as incense.)

in China: xi zang qing mei

in India: dieng langknow, dieng sohkania, jammi-rang-rang, janmi-rang-rang, kham-khor, kham khor, mir-gaum-phaur, mir-kum-phaur, morakur, morhal

Vatica oblongifolia Hook.f.

Borneo.

See *Trans. Linn. Soc. London* 23(1): 160. 1860 [after 1 Nov 1860] and *J. Nat. Prod.* 65(11): 1554–1559. 2002

(Antimicrobial, from the stem bark.)

Vatica odorata Symington (*Hopea faginea* Wallich; *Hopea faginea* A. DC., nom. inval.; *Perissandra laotica* Gagnepain (Violaceae); *Synaptea dyeri* Pierre; *Synaptea faginea* Dyer; *Synaptea faginea* Pierre; *Synaptea odorata* Griff.; *Vatica astrotricha* Hance; *Vatica curtisii* King; *Vatica dyeri* Pierre; *Vatica dyeri* King; *Vatica faginea* Dyer; *Vatica fleuryana* Tardieu; *Vatica grandiflora* Dyer; *Vatica odorata* (Griff.) Gagnepain (1866–1952).], *Journal of the Malayan Branch of the Royal Asiatic Society* xix: 156. 1941, *Notul. Syst.* (Paris) 10: 137. 1942, *Bull. Soc. Bot. France* 95(1): 27. 1948, *Gard. Bull. Singapore* 31(1): 23. 1978

(Antibacterial.)

in Vietnam: tau mat

Vatica rassak Blume (*Vateria rassak* Walp.; *Vatica rassak* (Korth.) Blume)

Borneo.

See *Mus. Bot.* 2(1–8): 31. 1856 and *Phytochemistry* 54(1): 63–69. 2000, *Tetrahedron Letters* 41(41): 7929–7932. 2000, *Tetrahedron* 57(34): 7309–7321. 2001, *Heterocycles* 55: 557–567. 2001, *Phytochemistry* 63(8): 913–917. 2003

(Antibacterial and antitumor, cytotoxicity against KB cells, scavenging activity of super oxide, from the stem bark.)

Vatovaea Chiovenda Fabaceae (Phaseoleae)

After the Italian botanist Aristocle Vatova, born 1897, plant collector (Ethiopia and Somalia), author of *Compendio della flora e fauna del Mare Adriatico presso Rovigno*. Venezia 1928; see *Webbia* 8: 231. 1951.

Vatovaea pseudolablab (Harms) J.B. Gillett (*Phaseolus cibellii* Chiov.; *Vatovaea biloba* Chiov.; *Vatovaea biloba* Chiov. ex Chiarugi; *Vigna pseudolablab* Harms)

Kenya, Uganda, Tanzania. Perennial climbing herb, branched, liana, purple to blue and green flowers, softly hairy slightly curved pod, seeds eaten raw or cooked, juicy fibrous tuberous roots eaten raw as food and a source of water, leaves cooked as a vegetable, immature pods, flowers and leaves cooked and eaten, cattle and camel fodder, in dry grassland or bushland

See *Nuovo Giornale dei Letterati* 8: 113. 1824 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 451. 1913, *Annali di Botanica* 43: 382. 1915, *Webbia* 8: 231. 1951, *Bulletin du Jardin botanique de l'État a Bruxelles* 25(3): 273–344. 1955, *Kew Bulletin* 20(1): 103–111. 1966, *Bulletin du Jardin botanique national de Belgique/Bulletin van de National Plantentuin van België* 48(1/2): 183–220. 1978, *Economic Botany* 35(1): 96–130. 1981, *World Archaeology* 17(2), *Ethnoarchaeology* (Oct., 1985): 131–148. 1985

(Nutritious, tonic, stomachic.)

in Ethiopia: kullayya

in Kenya: egilae, egilai, eglae, emare, gaabbe, gabbe, gabe, gele, henadi, hinaadi, kahabele, kela, kelowo, kilukyo, kobwo, lnanyo, nanyoi, njasi, olkalei, orkalei

Ventilago Gaertner Rhamnaceae

Latin *ventilo*, *avi*, *atum* 'to swing, to move, to fan', *ventus* 'wind', an allusion to the winged fruits, see *De Fructibus et Seminibus Plantarum*... 1: 223, pl. 49, f. 2. 1788.

Ventilago calyculata Tul.

Himalaya. Climber

See *Annales des Sciences Naturelles; Botanique*, série 4 8: 124. 1857

(Root applied on wounds; paste of plant for earache and infection in ear with pus. Lower parts of stems and roots, when put in fire, give an exudate which is applied on headache. Seed oil used as abortifacient. Stembark and black pepper decoction for stomach ulcer. Bark pounded and applied on sprains.)

in China: mao guo yi he guo

in India: asi, asvel, bongas-sarjom, erraciratalivva, lal-beli, pittoli, raidhui, raktolohara, yerrachictali

Ventilago denticulata Willd.

India. Woody climbing shrub, liana, greenish white flowers in panicles, samaroid fruits

See *Ges. Naturf. Fr. Neue Schr.* iii. 417. 1801

(Small piece of twig applied for headache, also as toothbrush to get relief from toothache; ash obtained from the twigs applied on wounds. Sap of the wood to relieve earache. Root applied on wounds and earache; powdered root with mustard oil applied in scabies; root bark juice given to treat stomachache. Bark pounded and applied on sprains; bark kept overnight in a glass of water and consumed for curing painful urination and spermatorrhea; stem bark decoction given to treat diarrhea and dysentery; stem pulp mixed with curd and given to cure eye inflammation. Fresh leaf paste applied for sprains. Stem bark and leaves as fish poison. Veterinary medicine, bark decoction for bone fracture in cattle.)

in India: ardashish, arshisi, asi, asvel, boppili chekke, erraciralata tige, errashiralathige, gapsandi balli, gopsandi, haruge, ithaala beelu, keonti, khaand vaela, kunti, kivti, kuriyadi, lal-bel, luhamalo, nallathiga, pipali boddi, piwalvel, piwalveli, raidhani, raktapita, sakala vaela, sakalyel, suragudu, saragudu teega, surati chakke, surati chekka, surul, vembadam

Ventilago dichotoma Merr. (*Ventilago luzoniensis* S. Vidal)

Philippines.

See *Revis. Pl. Vasc. Filip.* 90. 1886

(Bark poultice applied in skin diseases.)

in Philippines: pakpak-tutubi, salapau, silipau

Ventilago leiocarpa Bentham

China.

See *J. Linn. Soc., Bot.* 5: 77. 1861

(Roots used for improving the circulatory system and tendons, and treating numbness in limbs, injuries and trauma.)

in China: yi he gou

Ventilago maderaspatana Gaertn. (*Ventilago bracteata* Heyne ex Wallich, nom. nud.; *Ventilago maderaspatana* Benth.; *Ventilago maderaspatana* Roxb.; *Ventilago maderaspatana* J. Gaertner)

China, India. Woody climbers, many-branched, greenish yellow flowers in terminal and axillary panicles, winged capsules

See *De Fructibus et Seminibus Plantarum*... 1: 223, pl. 49, f. 2. 1788, *Hooker's J. Bot. Kew Gard. Misc.* 4: 42. 1852 and *Rev. Handb. Fl. Ceylon* 10: 376. 1996

(Used in Ayurveda and Sidha. Bark for skin diseases; stem juice applied for eye pain. Root bark for stomachache and fevers. Dried leaf powder mixed with fruit pulp of *Solanum pubescens* applied to itches.)

in China: yin du yi he gou

in India: amantacikam, atittiyavalli, ayaccempicci, caturt-tayam, caturttayappattai, cayappattai, cempacci, cempaccipattai, cempirankam, cenkatari, cenkattari, cenkattari pattai, cerukoti, citalaviranarokini, curiyavalli, curiyavallicam, curul, curulappattai, curuluppattai, curutpattai, dinesavalli, errachilatali, errachiratali, erraciratalivva, errachirathali, errashirathalathivva, errasurugudi, errasurugudu, ettashirattalativva, ettasurugudu, ettasurugudumanikkodi, iyakam, kaivartika, kevati, khandvel, lokhandi, malai maithra, malamaitra, mei bynoh, pampli, papli, paplichakka, pappali, papalicakke, pappili, pittu, raktapita, raktavalli, rohitakalata, sakalyel, surabi, suralatige, surate-cheka, suratighekkka, suratipattetige, suril pattai, surul, suralathige, surathi thige, surulbattaikkodi, surulbattaikkoti, surulpattai, tamravalli, thakittu vempaada, velunku, vembadam, vembadam pattai, vempadam, vempadon, vempata, vempataikkoti, vempatam, vempatampattai, yerra-chairatali, yerra surugudu, yerrachicalli, yerrachicatti, yerrachictali, yerrachiratalaboddutheega, yerrachiratalativva, yerraciratalativva, yerrasurugudu

Ventilago oblongifolia Blume

China.

See *Bijdragen tot de flora van Nederlandsch Indië* 17: 1144. 1826

(Against cholera, a poultice of the leaves applied all over the body.)

in China: ju ye yi he guo

Malay name: akar penak

Vepris Comm. ex A. Juss. Rutaceae

Latin *vepres*, is ‘a bramble, thorny bush, spiny shrub’, the generic name is not clear as the genus is unarmed; many species live in scrub and thorn thicket; see *Prodromus Plantarum Capensium*, ... 1: [vi], 32. 1794, *Mémoires du Muséum d’Histoire Naturelle* 12: 509. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 90. 1825, *Synopsis Plantarum* 1: 552. 1839, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 90. 1843, *Hooker’s Journal of Botany and Kew Garden Miscellany* 2: 38. 1850, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 70. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 306. 1917.

Vepris bilocularis Engler (*Toddalia bilocularis* Wight & Arn.)

Tree, leaves 3-foliolate, leaflets elliptic-lanceolate, small terminal flowers

See *Prodr. Fl. Ind. Orient.* 1: 149. 1834

(Root decoction given in biliousness. Wood boiled in oil used in eye and ear diseases, asthma, rheumatism.)

in Nepal: agur, Krishna agur

Veratrum L. Melanthiaceae (Liliaceae)

Latin *veratrum*, *i* used by Plinius et al. for a plant, hellebore; see *Species Plantarum* 2: 1044–1045. 1753, *Flora Americae Septentrionalis*; or, ... 1: 242. 1814, *Annals of the Lyceum of Natural History of New York* 4: 119. 1837, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 4: 189. 1843, *Middend. Reise (Fl. Ochot.* 94., t. 28). 1847, *Reise Sibir.* 1(2.2): 48 (t. 28). 1856 and *Verh. Bot. Vereins Prov. Brandenburg* 68: 140, 142. 1926, *J. Jap. Bot.* 13: 633. 1937, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana* 5: 1425. Bologna 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen* 4. Aufl. 184. 1989, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen* 677–678. 1996, *Syst. Bot.* 28(2): 266. 2003. *Melanthium*, often wholly or partly included in the closely related *Veratrum*. Resolution of the problematical *Melanthium-Veratrum* species series will require full molecular and phylogenetic analysis of the group.

Veratrum album L. (*Helleborus albus* (L.) Gueldenst.; *Melanthium album* (L.) Thunb.; *Melanthium bracteolare* Desr.; *Melanthium virens* Thunb.; *Veratrum album* (L.) Ait.; *Veratrum album* var. *bosniacum* (Beck) Nyman; *Veratrum album* var. *croaticum* Beck; *Veratrum album* var. *flavum* Griseb.; *Veratrum album* var. *spatulatum* Beck; *Veratrum album* var. *viride* Lapeyr.; *Veratrum album* var. *viridiflorum* Mert. & W.D.J. Koch; *Veratrum album* var. *virescens* Gaud.; *Veratrum bosniacum* Beck; *Veratrum lobelianum* Bernh.; *Veratrum parviflorum* Bong., nom. illeg.; *Veratrum polygamum* Gilib.; *Veratrum viride* Röhl., nom. illeg.)

Europe to Russian Far East. Herb, rhizome geophyte, species highly variable

See *Species Plantarum* 2: 1044. 1753, *Schrad. Neues Journ.* ii. II. (*Neues Journal für die Botanik*) 356. 1807, *Bull. Soc. Imp. Naturalistes Moscou* 13: 79. 1840 and *Fl. Saghalin.* 484. 1915, Kupchan, M.S., J.H. Zimmermann, and A. Afonso. “The alkaloids and taxonomy of *Veratrum* and related genera.” *Lloydia* 24: 1–26. 1961, *Lagascalia* 7: 191–216. 1978, *Bot. Zhurn.* 72: 1069–1074. 1987, *Regnum Veg.* 127: 98. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995

(Alkaloids with hypotensive properties and others highly toxic to humans and livestock; types and concentrations of alkaloids vary with the species, plant part, and season. Veraloid, a standard mixture of the most hypotensive *Veratrum* alkaloids, widely prescribed until late in the nineteenth century, when emetic side effects greatly curtailed its use.)

in English: white false hellebore, white hellebore, white veratrum

in China: li lu, shan tsung

in Italian: elabro, elleboro bianco, veratro comune

Veratrum californicum Durand (*Veratrum eschscholtzii* var. *watsonii* Baker; *Veratrum eschscholtzii* A. Gray var. *watsonii* Baker; *Veratrum jonesii* A. Heller; *Veratrum speciosum* Rydberg; *Veratrum tenuipetalum* A. Heller)

North America, Mexico. Perennial herb, robust, upright, branches spreading to horizontal, inflorescence terminal, flowers in clusters at the top of a single unbranched stalk, corolla white to cream, seed pods turn black as they ripen, this plant can be weedy or invasive, in damp or seepage areas, meadows, on hillsides

See *Ann. Lyceum Nat. Hist. New York* 4: 119. 1837, *J. Linn. Soc., Bot.* 17: 471. 1879, Durand, Elias Judah (1870–1922), *Plantae Prattenianae Californicae*: an enumeration of a collection of California plants, made in the vicinity of Nevada, by Henry Pratten, Esp., of New Harmony, with critical notices and descriptions of such of them as are new, or get unpublished in America. 1885 [*Journal of the Academy of Natural Sciences of Philadelphia*, ser. 2. 3(2): 79–104. 1855], *Bull. Torrey Bot. Club* 26: 588. 1899 and *Bull. Torrey Bot. Club* 27(10): 531–532. 1900, *Muhlenbergia* 1(3): 39–40. 1904, *Muhlenbergia* 1(7): 124. 1905, *Vasc. Pl. Pacif. N.W.* 1: 809. 1969

(Dangerous, poisonous, teratogen, severe poisoning in sheep, cattle and goats; toxicity decreases as plants mature. Used as an antirheumatic, burn dressing, poison, cardiac depressant, contraceptive and emetic, as well as a skin, respiratory, blood, cold, snakebite, throat, and toothache aid; to kill cockroaches.)

in English: Californian false hellebore, cow cabbage, false hellebore, wild corn

Veratrum californicum Durand var. ***californicum*** (*Veratrum speciosum* Rydb.)

North America, Mexico. Perennial herb, robust, upright, branches spreading to horizontal, inflorescence terminal, flowers in clusters at the top of a single unbranched stalk, corolla white to cream

See *Journal of the Academy of Natural Sciences of Philadelphia*, ser. 2. 3(2): 79–104. 1855, *Bull. Torrey Bot. Club* 26: 588. 1899 and *Vasc. Pl. Pacif. N.W.* 1: 809. 1969

(Dangerous, poisonous, teratogen, severe poisoning in sheep, cattle and goats; toxicity decreases as plants mature. Used as an antirheumatic, burn dressing, poison, cardiac depressant, contraceptive and emetic, as well as a skin, respiratory, blood, cold, snakebite, throat, and toothache aid; to kill cockroaches.)

in English: Californian false hellebore, cow cabbage, false hellebore, wild corn

Veratrum viride Aiton (*Helonias viridis* (Aiton) Ker Gawl.; *Veratrum eschscholtzianum* (Schult. & Schult. f.) Rydb. ex A. Heller; *Veratrum eschscholtzii* A. Gray; *Veratrum eschscholtzii* A. Gray var. *incriminatum* B. Boivin; *Veratrum viride* Roehl.; *Veratrum viride* Röhl., nom. illeg.; *Veratrum viride* Aiton subsp. *eschscholtzii* (A. Gray) A. Löve & D. Löve; *Veratrum viride* Aiton var. *eschscholtzii* (A. Gray) Breitung)

North America. Clumped perennial herb, erect, strap-like leaves clasping at the base, flowers pale green in a large terminal cluster, fruit a capsule

See *Species Plantarum* 1: 342. 1753, *Species Plantarum* 2: 1044–1045. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 422. 1789, *Botanical Magazine* 27: pl. 1096. 1808 and *Le Naturaliste Canadien* 109: 91–101. 1982, Jaffe, A.M., Gephardt, D., Courtemanche, L. "Poisoning due to ingestion of *Veratrum viride* (false hellebore)." *J. Emerg. Med.*, 8: 161–167. 1990

(The plant contains several steroidal alkaloids. Some deaths may have occurred. The roots, rhizome, and young shoots are most toxic and dangerous. Humans have been poisoned after ingesting the plant. The steroidal alkaloid jervine has been isolated from false hellebore; this alkaloid can exert teratogenic effects in several animal species. Root used as decongestant.)

in North America: American false hellebore, false hellebore, green false hellebore, hellebore, Indian poke, vérâtre verti

Veratrum viride Aiton var. *eschscholtzianum* (Roemer & Schultes) Breitung (*Veratrum eschscholtzianum* Loesener; *Veratrum eschscholtzianum* Rydberg ex A. Brandenburg* 68: 136. 1926, *Repertorium Specierum Novarum Regni Vegetabilis* 24: 66. 1927, *Naturaliste Canad.* 75: 224. 1948, *The Canadian Field-Naturalist* 71(2): 49. 1957, *University of Colorado Studies: Series in Biology* 17: 18. 1965

(Used as an analgesic, antirheumatic, emetic, laxative, and poison, as well as a cold, blood, heart, orthopedic, and skin aid.)

Veratrum viride Aiton var. *viride*

North America.

See *Hortus Kewensis*; or, a catalogue ... 3: 422. 1789

(Some deaths may have occurred. The roots, rhizome, and young shoots are most toxic. Used as an antirheumatic and analgesic as well as a cold, skin, and orthopedic aid. Colonial settlers soaked corn seeds in an infusion of the plant to kill marauding birds. Plant extracts used for hypertension and as an insecticide.)

in English: false hellebore

Verbasum L. Scrophulariaceae

Ancient Latin name for the plant used by Plinius, *verbasum*, *i*, mullein; see Carl Linnaeus, *Species Plantarum* 1: 177–179. 1753, *Species Plantarum* 2: 621. 1753 and *Genera Plantarum* Ed. 5. 83. 1754 and *Mitteilung der Thüringischen Botanischen Gesellschaft* 2(1): 55. 1960, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana* 5: 1425. 1988.

Verbasum chinense (L.) Santapau (*Celsia coromandeliana* Vahl; *Scrophularia chinensis* L.; *Verbasum coromandelianum* (Vahl) Kuntze; *Verbasum sinense* H. Lév. & Giraud)

China, India. Herb, solitary flowers at each node, raceme simple or branched, corolla yellow, persistent calyx, glandular ovoid capsule

See *Mantissa Plantarum* 2: 250, 619–621. 1771, *Symbolae Botanicae*, ... 3: 79. 1794, *Revisio Generum Plantarum* 2: 468. 1891 and *Fl. Purandhar*. 90. 1958, *Cytologia* 52: 529–541. 1987, *J. Econ. Taxon. Bot.* Vol. 19 No. 3. 1995, *Hindustan Antibiot. Bull.* 39(1–4): 56–60. 1997

(Whole plant juice as a febrifuge and for skin eruption. Antifungal, astringent, sedative, leaves juice in acute and chronic dysentery, diarrhea, in skin disorders; leaf decoction in liver disorders; fresh leaves eaten with water to cure jaundice. Crushed plants and leaves as fish poison.)

in China: qin ye mao rui hua

in India: akhphooti, bhutakeshi, gadar-tambaku, gadartambaku, gaderi tamakhu, gyamsar menthok, hanuman sanjeevani, kaadu hoge soppu, kalhar, kokhima, kolhala, kor poddur, kukshima, kutki, meno, neeti tummi, sanslo, sunslo

Verbascum thapsus L. (Greek *thapsia*, Latin *thapsia* or *thapsos* for a poisonous shrub, *Thapsia asclepium* L.)

Asia, Europe. Perennial or biennial herb, erect, thick rootstock, felt-like leaves, corolla yellow, ability of adapting to a variety of site conditions, on rocky slope, in uncultivated fields, waste ground, in neglected meadows, pasture lands

See *Species Plantarum* 1: 177. 1753 and *Taxon* 28: 395–397. 1979, *Acta Biologica Cracoviensia, Series Botanica* 22: 129–153. 1980, *Rev. Handb. Fl. Ceylon* 3: 389. 1981, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Cytologia* 52: 529–541. 1987, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Watsonia* 18: 415–417. 1991, *Opera Botanica* 137: 1–42. 1999

(Used in Unani. Hairs on the leaves irritant. Root decoction astringent, for diarrhea, kidney disorders, cramps, migraine, headache, urinary tract troubles and blockage. Leaves anodyne, antiseptic, bactericidal, astringent, demulcent, emollient, expectorant, diuretic, narcotic, odontalgic, vulnerary, antiinflammatory, a respiratory sedative and stimulant, a substitute for tobacco. A poultice of the leaves applied to ulcers, tumours, wounds and piles; dried leaves smoked for cough and asthma; leaves decoction taken for asthma and pulmonary diseases. Powered dried leaves and flowers taken orally to treat vomiting, pulmonary diseases, cough. Leaves contain rotenone and coumarin; rotenone used as an insecticide, a fish poison; coumarin can prevent the blood from clotting. Seeds aphrodisiac and narcotic, used for poisoning fishes; whole plant piscicide. Ceremonial, magic, ritual, plant used to drive out ghost spirits from the houses. Veterinary medicine, leaves to cure diarrhea.)

in English: Aaron's rod, common mullein, cow's lungwort, flannel mullein, flannel plant, flannelleaf, great mullein, hag-taper, mullein, torches, velvet dock, velvet plant, woolly mullein

in Bhutan: shing-gi-gser-bye

in India: akkalveer, akulbir, ban tambacoo, ban tambaku, bantamaku, bhamakhu, bhootlankra, bhotiya-chi, budabudhi, gaddi tamaku mullein, gidar-tamakhu, gidar tamaku, gidar tobacco, gidar tobacoo, giddar tamaku, gyamsar menthok, jangli tambaku, jawarna-loudi, kaadu hogesoppu, kakri tamakhu, mahi zehraj

in Nepal: ganapuchhre, guna puchhare, hikusin

Verbena L. Verbenaceae

Verbena, ae, the Latin name for a plant sacred to the Romans, 'sacred boughs, etc.'; Akkadian *erum, arum, harum* 'branch', *banu* 'to engender, to produce, to create: said of deity', *binu* 'son'; usually in plur., Latin *verbenae, arum* 'foliage, leaves, twigs and branches sacred boughs, laurel, olive, myrtle, etc.', *verber, eris* 'a lash, whip, scourge, rod', *verbero, avi, atum, are* 'to lash, whip, scourge, beat'; see Carl Linnaeus, *Species Plantarum*. 1: 18–21. 1753, *Genera Plantarum*. Ed. 5. 12. 1754, *Systema Naturae* ... editio decima tertia, aucta, reformata 2(2): 886, 920. 1792 [1791 publ. late Apr–Oct 1792], *A Specimen of the Botany of New Holland* 1: 1, pl. 1. 1793, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 369. 1794, La Tourrette, Marc Antoine Louis Claret de Fleurieu de (1729–1793), *Démonstrations élémentaires de botanique*. Rob. & Greenm.; *Verbesina scabra* Benth.; *Verbesina scabra* Phil.; *Ximenesia encelioides* Cav.; *Ximenesia microp-tera* DC.)

North America.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 2(3): 60, pl. 178. 1793[1793–1794], *Geological Survey of California, Botany* [W.H. Brewer]1: 350. 1876 [*Bot. California*], *Proc. Amer. Acad. Arts* 34: 544. 1899 and *Bull. Torrey Bot. Club* 33: 154. 1906, *Amer. Midl. Naturalist* 76: 478. 1966

(To treat boils and other skin diseases.)

in English: butter daisy, crownbeard, golden crownbeard, wild sunflower

in South Africa: wilde sonneblom

Verbesina virginica L. (*Verbesina laciniata* Walter; *Verbesina virginica* var. *laciniata* A. Gray)

North America.

See *Species Plantarum* 2: 901. 1753, *Flora Caroliniana, secundum* ... 213. 1788, *The Genera of North American Plants* 2: 170. 1818, *Proceedings of the American Academy of Arts and Sciences* 19: 11. 1883

(Used in postpartum.)

Vernicia Lour. Euphorbiaceae

Latin *vernix*, *icis* ‘varnish, paint’, it is possible to make varnish from the oily seeds; see João (Joannes) de Loureiro, 1717–1791, *Flora cochinchinensis: sistens plantas in regno Cochinchina nascentes*. 2: 541, 586. Ulyssipone [Lisboa] 1790.

Vernicia fordii (Hemsl.) Airy Shaw (*Aleurites fordii* Hemsl.; *Vernicia fordii* Airy Shaw)

China, Vietnam, SE Asia. Tree or shrub, deciduous, alternate simple long-stalked heart-shaped leaves, flowers pale pink to white in large clusters, green globular fruits

See *Characteres Generum Plantarum* 111, pl. 56. 1775, *Flora Cochinchinensis* 541, 586. 1790, *Hooker's Icones Plantarum* 29, pls. 2801, 2802. 1906, *Bulletin of the Imperial Institute of Great Britain* 11: 460. 1913, *Kew Bulletin* 20: 394. 1966, *Acta Botanica Austro Sinica* 5: 161–176. 1989

(Highly toxic, may be fatal if eaten, all parts, but mainly the seeds; symptoms are severe stomach pain, vomiting, diarrhea, weakness, slowed breathing and poor reflexes. Veterinary medicine, kernel oil anthelmintic and for skin diseases.)

in English: tung nut, tung oil tree, tungoil tree

in Paraguay: tun

Vernicia montana Lour. (*Aleurites montana* (Lour.) E.H. Wilson; *Aleurites vernicia* (Corrêa) Hassk.; *Dryandra vernicia* Corrêa, nom. illeg.; *Elaeococca montana* (Lour.) Oken)

China, Taiwan, Vietnam. Tree, ovate leaves heart-shaped, white or pink flowers

See *Flora Cochinchinensis* 2: 541, 586. 1790 and *Bulletin of the Imperial Institute of Great Britain* 11: 460. 1913

(Plant poisonous, emetic. Fruit sap used to treat conjunctivitis. Bark as a postpartum remedy.)

in English: mu-oil, mu tree, South China wood oil, Tung tree, wood-oil tree

in Japan: Kanton-abura-giri

in Fiji: tung

Vernonanthura H. Rob. Asteraceae

From the Greek *anthos* 'flower' and *oura* 'tail', see *Species Plantarum* 2: 1205. 1753 and *Phytologia* 73(2): 65–76. 1992, *Smithsonian Contr. Bot.* 89: 1–116. 1999.

Vernonanthura serratuloides (Kunth) H. Rob. (*Cacalia serratuloides* (Kunth) Kuntze; *Perezia nervata* M.E. Jones; *Perezia paniculata* A. Gray; *Perezia vernonioides* A. Gray; *Vernonia camporum* A. Chev.; *Vernonia camporum* M.E. Jones; *Vernonia jaliscana* Gleason; *Vernonia serratuloides* Kunth; *Vernonia serratuloides* subsp. *vernonioides* (A. Gray) S.B. Jones; *Vernonia sinclairii* Benth.; *Vernonia umbellifera* Gleason; *Vernonia vernonioides* (A. Gray) Bacig.; *Vernonia vernonioides* (Sch. Bip. ex Walp.) Cufod., nom. illeg.)

Tropical Africa, Mexico. Erect herb, weed

See *Nova Genera et Species Plantarum* (folio ed.) 4: 26, t. 316. 1820[1818], *The botany of the voyage of H.M.S. Sulphur* 109. 1845, *Proceedings of the American Academy of Arts and Sciences* 21: 393. 1886, *Revisio Generum Plantarum* 2: 971. 1891 and *Bulletin of the New York Botanical Garden* 4(13): 198–200. 1906, *Mémoires de la Société Botanique de France* 8e: 259. 1917, *Contributions from the Gray Herbarium of Harvard University* 97: 77. 1931, *Contributions to Western Botany* 18: 69, 74. 1933, *Rhodora* 78: 200. 1978, *Phytologia* 73(2): 73. 1992

(Root decoction drunk or fresh root chewed for cough.)

Vernonia Schreber Asteraceae

In honor of the English botanist William Vernon, 1666/1667–circa 1715, bryologist, 1702 Fellow of the Royal Society, traveller and plant collector in North America, Maryland 1698, with David Krieg (c. 1670–1710); see James Petiver, *Museii Petiveriani*. London 1695–1703, *Species Plantarum* 2: 818. 1753, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 57–58. London 1790, *Genera Plantarum* 2: 541. 1791, *Synopsis Plantarum* 2(2): 404. 1807, *Bull. Sci. Soc. Philom. Paris* 1817: 66. 1817, *Dictionnaire des Sciences Naturelles* [Second edition] 3(Suppl.): 38. 1817, *Dictionnaire des Sciences Naturelles* 26: 21. 1823, *Transactions of the Linnean Society of London* 14(2): 218–219. 1824, *Botanical Magazine* 51: tab 2477. 1824, *Dictionnaire*

East and West Africa, Senegal, Nigeria. Shrub or woody herb, multi-stemmed, woody rootstock, silvery green leaves, white dense inflorescence with an involucre or small green bracts, tiny seeds hairy, firewood, building huts, in disturbed bushland or grassland, montane forest, savanna, along forest edge

See *Genera Plantarum* 2: 541. 1791, *Methodus Plantas Horti Botanici ...* 578. 1794, *Flora* 25 (Beibl.): 134, 1842, *Repertorium Botanices Systematicae*. 2: 946–947. 1843, *Transactions of the Linnean Society of London* 29: 92, t. 57. 1873, *Flora of Tropical Africa* 3: 290–291. 1877, *Transactions of the Linnean Society of London* ser.2, 4: 17. 1894, *Bulletin of Miscellaneous Information Kew* 1898: 147. 1898 and *Journal of Botany, British and Foreign* 46: 39. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 73. 1911, *Feddes Repertorium* 13: 206. 1914, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 59, Beibl. 133: 5. 1924, *Journal of the Linnean Society, Botany* 47: 266. 1925, *Systematic Botany* 4: 29–43. 1979, *Kew Bulletin* 43(2): 195–277. 1988, *Proceedings of the Biological Society of Washington* 103(1): 250. 1990, *Journal of Ethnopharmacology* 110: 516–525. 2007, *African Journal of Ecology* 45 (Suppl.1): 76–83. 2007

(Roots or leaves as anthelmintic. A root infusion for stomach pains and disorders, for sterility, promotes reproduction. Bitter roots digestive and appetizer. Leaves crushed in cold water and used in the treatment of tick-bite sores; leaves for catarrh and febrile complaints; pain to the back hump, warm pounded roots and leaves to massage the hump.)

in English: apple bossom, ironweed, vernonia

in East Africa: kuom-tepengwet (Kipsigis), nyang'onyakuodi (Luo), ol-ekoru (Maasai)

in Ethiopia: umel-iruuq, aba-musa

in Nigeria: cika fageé, domashi, ewuro-odan, ewuro-oko, kumburà fageé, oriwò

in South Africa: uHlonyane (Zulu)

in Tanzania: ilolozya

in Uganda: alete, okelokelo - atino

in Yoruba: ero oko, ewuro odan, ewuro oko, orubu

Vernonia amygdalina Delile (*Gymnanthemum amygdalinum* (Delile) Sch. Bip. ex Walp.; *Keringa amygdalina* (Delile) Raf.; *Vernonia amygdalina* A. Chev.; *Vernonia eritreana* Klatt; *Vernonia giorgii* De Wild.; *Vernonia randii* S. Moore; *Vernonia vogeliana* Benth.) ('like an almond', from the Greek *amygdale* 'almond')

South Africa. Shrub or tree, young twigs with brown pubescence, leaves with grey-brown pubescence, pappus white-yellow, corollas white, leaves used as vegetables, flowers fed on by many hornets, savanna, coastal savanna

See *Genera Plantarum* 2: 541. 1791, *Bull. Sci. Soc. Philom. Paris* 1817: 10. 1817, *Cent. Pl. Afr. Voy. Méroé* 41. 1826–1827, *Sylva Telluriana* 144. 1838, *Repertorium Botanices Systematicae*. 2: 948. 1843, *Niger Flora* 427. 1849, *Bulletin de l'Herbier Boissier* 4: 826. 1896, *Journal of Botany, British and Foreign* 37: 369. 1899 and *Bulletin du Jardin Botanique de l'État* 5: 92. 1915, *Exploration Botanique de l'Afrique Occidentale Française ...* 352. 1920, *Systematic Botany* 4: 29–43. 1979, *Opera Botanica* 121: 159–172. 1993, *Journal of Ethnopharmacology* 25(3): 339–359. 1998, *Feddes Repertorium* 110: 541–553. 1999, *Journal of Ethnopharmacology* 99: 273–279. 2005

(Root very poisonous, abortifacient, hypotensive. Young branches as chewing stick. Leaves and stem bark tonic, pectoral, stomachic, febrifuge, antiseptic, for cough. Leaves for gastrointestinal disorders; leaves chewed against snakebite; leaves decoction for anorexia, cough, malaria, fevers, acute pain, piles, ringworm, venereal diseases. Bark pounded together with other plants to make an arrow poison.)

in English: bitter leaf

in Burkina Faso: koo safande, kosafne

in Burundi: umupfumya, umubirizi

(Leaves and stem bark tonic, febrifuge. Leaves decoction used for fever, intestinal worms; the extract of fresh leaves applied to the wounds. The extract of the crushed bark of the stalks for abdominal pain. Leafy twigs decoction for dermatosis.)

in Burkina Faso: ko safna, koa safandé

in Ivory Coast: abovi, abowi, aovi, ko saflan, todzo

in Nigeria and Senegal: ewuro, ndumburghat, shiwaka, zidor

Vernonia conferta Benth. (*Monosis conferta* (Benth.) C. Jeffrey; *Vernonia conferta* A. Chev.; *Vernonia conferta* Sch. Bip. ex Baker)

Sierra Leone. Small tree, soft-wooded, green big leaves, flowers white, inflorescence terminal panicles, leaves used in truth ceremony, fruit and pith eaten by gorillas, in meadow

See *Niger Flora* [W.J. Hooker]. 427. 1849, *Flora Brasiliensis* (Martius) 6(2): 124. 1873 and *Exploration Botanique de l'Afrique Occidentale Française ...* 353. 1920, *Feddes Repertorium* 110: 541–553. 1999, *Mansfeld's Encycl.* 4: 2048 (6: 2826). 2001

(Leaves, stems and roots antiparasitic, anthelmintic, for coughs, stomachache. Magic ritual, psychosis, neurosis.)

in Nigeria: orungo, shapo, agori, oluworoworo, bagashi, domashi, oruwenni; sapo (Yoruba); oriweni (Edo); ubol (Igbo)

Vernonia conyzoides DC. (*Cyanthillium conyzoides* (DC.) H. Rob.; *Vernonia conyzoides* Hutch. & Dalziel; *Vernonia conyzoides* Thwaites; *Vernonia conyzoides* Chodat; *Vernonia conyzoides* Wight)

India.

See *Bull. Herb. Boissier sér. 2*, 2: 303. 1902, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] ii. 165, in clavi, 168. 1931, *Cytologia* 41: 401–406. 1976, *Proc. Biol. Soc. Washington* 112(1): 229. 1999

(Plant ground with lime applied over wounds.)

in India: kaliyamman pathiri chedi

Vernonia divergens (DC.) Edgew. (*Decaneurum divergens* DC.; *Vernonia divergens* (Roxb.) Edgew.; *Vernonia divergens* Benth.; *Vernonia divergens* Edgew.)

India.

See *Archives de Botanique* 2: 516. 1833, *Contributions to the Botany of India* [Wight] 8. 1834, *Ueber die Tanaceteen* 44–46. 1844, *J. Asiat. Soc. Bengal* 21(2): 172. 1852 and *Cytologia* 41: 401–406. 1976, *Taxon* 30: 153. 1981, *Cytologia* 48: 679–690. 1983, *Glimpses Pl. Res.* 8: 1–177. 1988, *J. Cytol. Genet.* 24: 96–105. 1989

(Root paste or leaf paste given orally for cold. Leaves paste applied on cuts.)

in India: ambugani, appale

Vernonia gerberiformis Oliv. & Hiern subsp. ***macrocyanus*** (O. Hoffm.) C. Jeffrey (*Vernonia macrocyanus* O. Hoffm.; *Vernonia towaensis* De Wild.)

Angola. Low suffrutex, basal rosette of lanceolate toothed leaves, large heads of blue flowers

See *Flora of Tropical Africa* 3: 285. 1877, *Boletim da Sociedade Broteriana* 13: 20. 1897 and *Bulletin du Jardin Botanique de l'État* 5: 96. 1915, *Kew Bulletin* 43(2): 195–277. 1988, *Compositae Newsletter* 20/21: 12–15. 1992

(Used as poison, fish poison.)

Vernonia guineensis Benth. (*Baccharoides guineensis* (Benth.) H. Rob.)

Tropical Africa. Erect herb

See *Niger Flora* [W.J. Hooker]. 427. 1849 and *Syst. Bot.* 4: 29–43. 1979, *Proceedings of the Biological Society of Washington* 103(1): 250. 1990

(Root and leaves emetic, febrifuge, aphrodisiac, for jaundice and snakebites.)

Vernonia hildebrandtii Vatke (*Vernonia hildebrandtii* Baker, nom. illeg., non *Vernonia hildebrandtii* Vatke)

Angola. Scandent shrub, tough, many-branched, prostrate, erect, scrambling, woody herb, leaves crenate, flowers light purple to white in terminal branched panicles, flowers much liked by butterflies, leaves much eaten by caterpillars, in clearings

See *Oesterreichische Botanische Zeitschrift* 25: 323. 1875, *Journal of the Linnean Society, Botany* 25: 324. 1890 and *Journal of Botany, British and Foreign* 38: 154. 1900, *Taxon* 30: 701. 1981, *Kew Bulletin* 43(2): 195–277. 1988

(Leaves infusion given to children for cough. Root decoction very bitter, emetic, reported used as poison.)

in Tanzania: mpata

Vernonia hirsuta Sch.Bip. (*Hilliardiella hirsuta* (Sch.Bip. ex Walp.) H. Rob.; *Vernonia hirsuta* Sch.Bip. ex Walp.; *Vernonia hirsuta* (DC.) Sch.Bip.; *Vernonia hirsuta* var. *obtusifolia* Harv.)

South Africa, Angola. Herb, erect, woody rootstock, hairy stems, thick stalkless silvery quilted hairy leaves, deep purple flowers, in grassland, scrub, on forest margins

See *Proc. Biol. Soc. Washington* 112(1): 230. 1999

(Used to treat colic, sore throats, coughs, headaches and rashes. The Zulu common name means 'cure for the gall-bladder'.)

in English: quilted-leaved Vernonia

in South Africa: wildesonsoekertjie, ikhambi lenyongo (Zulu)

Vernonia hymenolepis A. Rich. (*Baccharoides calvoana* (Hook.f.) M.A. Isawumi; *Vernonia calvoana* (Hook. f.) Hook. f. var. *mesocephala* C.D. Adams; *Vernonia homilocephala* S. Moore; *Vernonia leucocalyx* O. Hoffm.)

Ethiopia, Uganda. Shrub or small tree, perennial, soft-wooded, leaves green, flowers purple-pink, inflorescence a head arranged in terminal compound umbel-like cymes, involucre bracts with white tips, edible leaves

See *Tentamen Florae Abyssinicae* ... 1: 378. 1848 and *Journal of the Linnean Society, Botany* 35: 322. 1902, *Journal of the West African Science Association* 3: 118. 1957, *Journal of the American Society of Chemistry* 90: 3596–3597. 1968, *Feddes Repertorium* 104(5–6): 309–326. 1993, *Fragmenta Floristica et Geobotanica* 40(2): 547–717. 1995

(Used for pneumonia, to stop wound bleeding; root decoction used as a purgative and to treat abdominal pains; juice from crushed leaves to treat diarrhea in babies and jaundice.)

in English: bayangi bitterleaf, bitterleaf, sweet bitterleaf

in Cameroon: ndole, ndolé

Vernonia natalensis Oliv. & Hiern (*Vernonia aristata* Less.; *Vernonia natalensis* Sch.Bip. ex Walp.; *Webbia aristata* DC.)

South Africa, Angola, Zambia, Zimbabwe and Malawi. Shrub, upright herbaceous perennial, woody perennial rootstock, silky silver leaves, many branched flowerheads, tiny dark mauve-purple flowers, pointed petals, purple stigmas, among rocks and on open grassy slopes

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 73. 1836, *Repertorium Botanices Systematicae* (Walpers). 1842–1847, *Flora of Tropical Africa* 3: 277. 1877

(Used to treat coughs, malaria and other fevers, headache, pains and hemorrhoids. An ingredient in medicines known as *isihlambezo* that are prescribed for pregnant women and taken during pregnancy. A mixture of leaves and roots is sometimes used to induce abortion, a treatment that has occasionally also killed the mother. Leaves and roots used as charms against lightning and in Zimbabwe the leaves are burned and inhaled to drive away evil spirits.)

Vernonia neocorymbosa Hilliard (*Gymnanthemum corymbosum* (Thunb.) H. Rob.; *Staehelina corymbosa* L. ex B.D. Jacks.; *Staehelina corymbosa* Thunb.; *Staehelina corymbosa* Wight ex DC.; *Vernonia corymbosa* (L.f.) Less.)

South Africa. Shrub

See *Prodr. Pl. Cap.* 143. 1800, *Prodr.* (DC.) 6: 364. 1838 [1837 publ. early Jan 1838] and *Index Linn. Herb.* 141. 1912, *Notes Roy. Bot. Gard. Edinburgh* 32(3): 385, nom. nov. 1973, *Proc. Biol. Soc. Washington* 112(1): 241. 1999

(Used for impotency and barrenness.)

in South Africa: uHlungu-lungu (Zulu)

Vernonia nigriflora Oliv. & Hiern (*Linzia nigriflora* (Oliv. & Hiern) C. Jeffrey; *Linzia nigriflora* (Oliv. & Hiern) Isawumi)

Tropical Africa.

See *Flora of Tropical Africa* [Oliver et al.] 3: 288. 1877 and *Mansfeld's Encycl.* 4: 2046 (6: 2826). 2001, *Compositae Newslett.* 46: 39. 2008

(Stem, leaves and root diuretic, purgative, laxative, emetic, febrifuge, antiparasitic.)

Vernonia oligocephala (DC.) Sch. Bip. ex Walp. (*Vernonia kraussii* Sch. Bip. ex Walp.; *Vernonia oligocephala* Klatt; *Vernonia oligocephala* Sch. Bip. ex Walp.; *Vernonia oligocephala* Gardner, nom. illeg.; *Vernonia oligocephala* Edgew.; *Webbia oligocephala* DC.)

Tropical Africa, South Africa. Erect, corollas bright red mauve-purple

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 73. 1836, *Repertorium Botanices Systematicae*. 2: 947. 1843, *Trans. Linn. Soc. London* 20(1): 63. 1846 [1851 publ. 29 Aug 1846], *London Journal of Botany* 6: 420. 1847 and *Kew Bull.* 43(2): 195–277. 1988

(Leaves stomachic, for diabetes, rheumatism.)

Vernonia patula (Dryander) Merr. (*Cacalia patula* (Dryand.) Kuntze; *Conyza patula* Dryand.; *Cyanthillium patulum* (Dryand.) H. Rob.; *Vernonia chinensis* (L.) Less.; *Vernonia patula* Mart. ex Baker, nom. inval.)

Northeast India, Burma. Shrubby herb, polymorphic, many-branched, roots crowded, leaves very variable, inflorescence a widely branched panicle or corymb consisting of many heads, head campanulate, corolla tubular, fruit angular with prominent ribs, pappus uniseriate caducous setaceous white, young shoots consumed as a vegetable

See *Species Plantarum* 2: 834. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 184–185. 1789, *Bijdragen tot de flora van Nederlandsch Indië* 15: 889–890. 1826, *Linnaea* 6: 105, 674. 1831, *Synopsis Generum Compositarum* ... 203–204. 1832, *Flora Brasiliensis* 6(2): 70. 1873, *Revisio Generum Plantarum* 1: 324. 1891 and *Philippine Journal of Science* 3(6): 439–440. 1908, *Proceedings of the Biological Society of Washington* 103(1): 252. 1990, *Smithsonian Contr. Bot.* 89: 1–116. 1999

(Diaphoretic, a decoction of roots and leaves applied to treat colds and fevers. Plant used as a tonic and against diarrhea; paste of the herb as a poultice for the suppuration of boils.)

in India: monikher

in Indonesia: sarap, yawun

in Malaysia: perasi putih, ruku gajah, sampu angin

in Vietnam: b[aj]c d[aaf]u

Vernonia purpurea Sch. Bip. ex Walp. (*Vernonia duemmeri* S. Moore; *Vernonia inulaefolia* Steud. ex Walp.; *Vernonia jaceoides* A. Rich.; *Vernonia pascuosa* S. Moore; *Vernonia rigorata* S. Moore; *Vernonia scabrata* C.H. Wright)

Senegal. Erect, stiff, herb, simple or branched, ribbed, woody-based, florets purple or reddish-purple, achenes villous

See *Repertorium Botanices Systematicae*. 2: 946. 1843, *Tentamen Florae Abyssinicae* ... 1: 376. 1848 and *Journal of Botany, British and Foreign* 41: 155. 1903, *Bulletin of Miscellaneous Information Kew* 1906: 21. 1906, *Journal of Botany, British and Foreign* 52: 91. 1914, *Journal of the Linnean Society, Botany* 47: 263. 1925, *Kew Bulletin* 43(2): 195–277. 1988

(Leaf poultice drunk to cure impotence.)

Vernonia ramoswamii Hutch.

India.

See *Bull. Misc. Inform. Kew* 1916, 35. 1916, *Curr. Sci.* 48: 1003–1004. 1979

(Leaves and flowers paste consumed with *Borassus flabelifer* for skin diseases and infections.)

in India: kaattusirumallipatchilai

Vernonia revoluta Buch.-Ham.

Himalaya.

See *Trans. Linn. Soc. London* 14(2): 218. 1824 [15 Nov 1824]

(Whole plant paste mixed with mustard oil used in the treatment of blisters, boils.)

in India: lampati

Vernonia scorpioides (Lam.) Pers. (*Cacalia scorpioides* (Lam.) Kuntze; *Cacalia tournefortioides* (Kunth) Kuntze; *Conyza scorpioides* Lam.; *Cyrtocymura scorpioides* (Lam.) H. Rob.; *Lepidaploa scorpioides* (Lam.) Cass.; *Staelhina solidaginoides* Willd. ex Less.; *Vernonia breviramosa* Rusby; *Vernonia flavescens* Less.; *Vernonia lanuginosa* Gardner; *Vernonia longeracemosa* Mart. ex DC.; *Vernonia saepia* Ekman; *Vernonia scorpioides* var. *centriflora* DC.; *Vernonia scorpioides* var. *longeracemosa* DC.; *Vernonia scorpioides* var. *longifolia* DC.; *Vernonia scorpioides* var. *subrepanda* DC.; *Vernonia scorpioides* var. *subtomentosa* DC.; *Vernonia subrepanda* Pers.; *Vernonia tournefortioides* Kunth)

See *Encyclopédie Méthodique, Botanique* 2(1): 88. 1786, *Dictionnaire des Sciences Naturelles* [Second edition] 2: 16. 1823 and *Fieldiana, Bot.*, n.s. 5: 22–73. 1980, *Proceedings of the Biological Society of Washington* 100(4): 844–855. 1987, *Fl. Venez. Guayana*. 3: 177–393. 1997, *Smithsonian Contr. Bot.* 89: 1–116. 1999

(Leaf baths for bewitchment; tea of roots aphrodisiac.)

in English: wild patchouli

Vernonia squarrosa (D. Don) Less. (*Acilepis squarrosa* D. Don; *Vernonia rigiophylla* DC.; *Vernonia squarrosa* var. *orientalis* Kitam.; *Vernonia teres* Wall. ex DC.)

Nepal, India. Herb, white flowers, violet flower bracts

See *Prodromus Florae Nepalensis* 169. 1825, *Linnaea* 6(4): 627. 1831, *Linnaea* 6(5): 678. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 15. 1836 and *Acta Phytotaxonomica et Geobotanica* 24(1–2): 16. 1969

(Powdered seeds for diarrhea; fruits for diarrhea.)

in India: banrasi

Vernonia stellulifera (Benth.) C. Jeffrey (*Cyanthillium stelluliferum* (Benth.) H. Rob.; *Herderia stellulifera* Benth.; *Triplotaxis stellulifera* (Benth.) Hutch.)

Sierra Leone. Herb, weed, erect, decumbent, slender, very small flower-heads, purple-mauve florets, turgid achenes

See *Bijdragen tot de flora van Nederlandsch Indië* 15: 889–890. 1826, *Niger Flora* 425. 1849 and *Kew Bulletin* 1914: 356. 1914, *Syst. Bot.* 4: 29–43. 1979, *Kew Bulletin* 43(2): 225. 1988, *Proceedings of the Biological Society of Washington* 103(1): 250, 252. 1990

(Leaves decoction a cough cure for children. Dried pulverized leaves a remedy for head lice.)

Vernonia suprafastigiata Klatt (*Vernonia brachylaenoides* S. Moore; *Vernonia lescrauwaetii* De Wild.; *Vernonia multiflora* De Wild.)

Tropical Africa. Shrub, purple flowers, in *Brachystegia* woodland

See *Bulletin de l'Herbier Boissier* 4: 458. 1896 and *Journal of Botany, British and Foreign* 51: 184. 1913, *Feddes Repertorium* 13: 208. 1914, *Bulletin du Jardin Botanique de l'État* 4: 228. 1914, *Kew Bull.* 43(2): 195–277. 1988

(Leaves and stem tonic, anthelmintic, antiseptic, cough remedy, for skin diseases.)

Vernonia volkameriifolia DC. (*Conyza volkameriifolia* Wall., nom. nud.; *Eupatorium volkameriifolium* Wall., nom. nud.; *Punduana volkameriifolia* (DC.) Steetz; *Vernonia esquirolii* H. Lév.; *Vernonia leveillei* Fedde ex H. Lév., nom. illeg.; *Vernonia leveillei* Vaniot)

Thailand.

See *Species Plantarum* 2: 836–839. 1753, *A Numerical List of Dried Specimens* n. 3001. 1831, *Synopsis Generum Compositarum* ... 203–204. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 32. 1836, *Naturwissenschaftliche Reise nach Mossambique* ... 345. 1864 and *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 304–305. 1912, *Flore du Kouy-Tchéou* 109. 1914

(Roots decoction taken for urinary problems.)

Vernonia wakefieldii Oliv.

Tanzania. Succulent herb, flowers blue-green

See *Transactions of the Linnean Society of London* ser. 2, 2: 337. 1887

(Used as poison.)

Veronica L. Scrophulariaceae (Plantaginaceae)

A derivation from *vetonica/vettonica/betonica* (Plinius) or named in honor of Saint Veronica; see G.P. Bergantini, *Voci italiane d'autori approvati dalla Crusca*, nel *Vocabolario d'essa non registrate* ... Venezia 1745, Carl Linnaeus, *Species Plantarum*. 1: 9. 1753, *Genera Plantarum*. Ed. 5. 10. 1754, *Gen. Hist.* 4: 567. 1837, *Syn. Fl. Germ. Helv.* 524, 527. 1837, *Prodr.* (DC.) 10: 469, 485. 1846 and *Repert. Spec. Nov. Regni Veg. Beih.* 50: 33, 60, 123. 1928, *Bot. Jahrb. Syst.* lxii. 490. 1929, P. Sella, *Glossario latino emiliano*. Città del Vaticano 1937, *Fl. URSS* 22: 809. 1955, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1590. Žurn.* (Moscow & Leningrad) 86(8): 144–147. 2001

(Plant juice in piles; seeds anthelmintic.)

in English: field speedwell

in India: kalijiri

Veronica americana Schwein. ex Benth. (*Veronica americana* (Raf.) Schwein.)

North America. Perennial

See *Prodr.* (DC.) 10: 468. 1846

(Ceremonial, emetic.)

in English: America brooklime, American speedwell, brooklime

Veronica anagallis-aquatica Linnaeus

Nepal. Young plants edible, fruit are abnormally swollen when parasitized by insects, these galls, used medicinally, are called *xian tao cao*

See *Sp. Pl.* 1: 12. 1753

(Diuretic, blood purifier. Juice of plant given to treat malaria, fevers; root decoction taken to treat acidity. Leaves used as fish poison.)

in English: blue speedwell, long-leaved water speedwell, pink speedwell, water pimpernel, water speedwell

in Arabic: habaq

in Southern Africa: ereprys, waterereprys; moqhoboqhobo-o-monyenyane (Sotho)

in China: bei shui ku mai

in India: feshi, sada, sadevi

in Nepal: bhatik tikta, tite

Veronica beccabunga L. (*Veronica hjuleri* Paulsen)

Tibet.

See *Species Plantarum* 1: 12. 1753 and *Botanisk Tidsskrift* 27: 313. 1906

(Herb given in scurvy. Plant juice purgative. Bruised plant applied externally for healing ulcers, burns.)

in English: brooklime, European brooklime

Veronica biloba L. (*Pocilla biloba* (L.) W.A. Weber; *Veronica biloba* Bourg. ex Boiss.; *Veronica chantavica* Pavlov; *Veronica nevskii* Boriss.)

China, Himalaya.

See *Mantissa Plantarum* 2: 172. 1771, *Fl. Orient.* [Boissier] 4(2): 464. 1879 and *Vestnik Akad. Nauk Kazak. SSR* No. 5 (86) 92. 1952, *Fl. URSS* xxii. 396. 1955, *Phytologia* 58(6): 384. 1985

(Herb used as antiscorbutic, blood purifier, a remedy for skin diseases. Unripe fruit paste given for dysentery.)

in China: liang lie po po na

in India: shupka

Veronica biloba L. var. *minima* N.C. Nair (*Veronica biloba* L. var. *minima* K. Koch; *Veronica minima* (K. Koch) K. Koch; *Veronica minima* Chandra Sek. & S.K. Srivast., nom. illeg.)

China, Himalaya.

See *Mantissa Plantarum* 2: 172. 1771, *Linnaea* 17: 288. 1843, *Linnaea* 22: 700. 1849, *Fl. Orient.* [Boissier] 4(2): 464. 1879 and *Vestnik Akad. Nauk Kazak. SSR* No. 5 (86) 92. 1952, *Fl. URSS* xxii. 396. 1955, *Bull. Bot. Surv. India* 5: 327. 1963, *Phytologia* 58(6): 384. 1985, *Fl. Pin Valley Natl. Park* 180. 2009

(Whole plant paste or juice given for dysentery.)

in China: liang lie po po na

in India: shupka, tsa aataungra

Veronica ciliata Fischer subsp. *cephaloides* (Pennell) D.Y. Hong (*Veronica cephaloides* Pennell; *Veronica nana* Pennell)

China.

See *Mém. Soc. Imp. Naturalistes Moscou* 3: 45. 1812 and *Acad. Nat. Sci. Philadelphia Monogr.* 5: 84. 1943, *Acta Phytotax. Sin.* 16(3): 24. 1978

(Blood purifier.)

in China: chang guo po po na, la sa chang guo po po na

Veronica himalensis D. Don

Himalaya.

See *Prodromus Florae Nepalensis* 92–93. 1825

(Whole plant used for ulcers, boils, wounds, hemorrhage.)

in Bhutan: ldom-nag-l dom-mkhri

in China: da hua po po na

Veronica officinalis L.

North America. Perennial

See *Sp. Pl.* 1: 11. 1753 and *Plantsman* 10(4): 214. 1989

(For coughs, earaches, chills, fever, boils, to ease childbirth. Ceremonial, witchcraft, protection, emetic. Veterinary medicine.)

in English: common gypsyweed, common speedwell, gypsyweed

Veronica peregrina L. subsp. *xalapensis* (Kunth) Pennell (*Veronica peregrina* L.f. *xalapensis* (Kunth) Kitag.; *Veronica peregrina* L. var. *xalapensis* (Kunth) Pennell; *Veronica peregrina* var. *xalapensis* (Kunth) Kitag.; *Veronica peregrina* var. *xalapensis* H. St. John; *Veronica sherwoodii* M. Peck; *Veronica xalapensis* Kunth)

North America. Annual

See *Sp. Pl.* 1: 14. 1753, *Nov. Gen. Sp.* [H.B.K.] 2: 389. 1818 and *Torreya* 19: 167. 1919, *Northw. Sci.* 2, no. 3: 90. 1928, *Acad. Nat. Sci. Philadelphia Monogr.* 1: 342. 1935, *Neolin. Fl. Manshur.* 573. 1979

(Disinfectant. Ceremonial, witchcraft, protection, good luck charm, fumigant, emetic.)

in English: hairy purslane speedwell

Veronica serpyllifolia L. (*Veronica serpyllifolia* Bourg. ex Willk. & Lange; *Veronica serpyllifolia* subsp. *nummularioides* (Lecoq & Lamotte) Peev; *Veronica serpyllifolia* L. var. *nummularioides* Lecoq & Lamotte; *Veronicastrum serpyllifolium* Fourr.; *Veronicastrum serpyllifolium* (L.) Fourr.)

North America. Annual

See *Sp. Pl.* 1: 12. 1753, *Ann. Soc. Linn. Lyon sér. 2*, 17: 128. 1869, *Prodr. Fl. Hispan.* 2(3): 598. 1870

(For coughs, earaches, chills, fever, boils, skin diseases, to ease childbirth. Ceremonial, witchcraft, protection, emetic. Veterinary medicine.)

in English: thyme-leaved speedwell, thymeleaf speedwell

Veronica undulata Wallich ex Jack (*Veronica anagallis-aquatica* Linnaeus subsp. *undulata* (Wallich ex Jack) Elenevsky)

China.

See *Fl. Ind.* 1: 147. 1820

(Plants with galls are used to stimulate blood circulation, relieve pains, stimulate menstrual flow, and stop bleeding.)

in China: shui ku mai

Veronicastrum Heister ex Fabricius Scrophulariaceae (Plantaginaceae Juss.)

Incompletely resembling the genus *Veronica* L., see *Enumeratio Methodica Plantarum* 111. 1759, *The Genera of North American Plants* 1: 7. 1818, *Scroph. Ind.* 44. 1835 and *Hooker's Icones Plantarum*, t. 2670. 1900, *Journal of the Faculty of Science: University of Tokyo, Botany* 7: 126–127, 131. 1957, *Flora Reipublicae Popularis Sinicae* 67(2): 230. 1979.

Veronicastrum caulopterum (Hance) T. Yamazaki (*Calorhabdos cauloptera* Hance; *Veronica martini* H. Léveillé)

China.

See *J. Bot.* 15: 298. 1877 and *J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot.* 7: 127. 1957

(Used to treat dysentery and sore throat.)

in China: si fang ma

Veronicastrum stenostachyum (Hemsley) T. Yamazaki subsp. *stenostachyum* (*Calorhabdos fargesii* Franchet; *Calorhabdos stenostachya* Hemsley; *Calorhabdos venosa* Hemsley p.p.)

Japan.

See *J. Linn. Soc., Bot.* 26: 196. 1890 and *J. Jap. Bot.* 27: 66. 1952, *J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot.* 7: 128. 1957, *Fl. Reipubl. Popularis Sin.* 67(2): 236, 401. 1979

(Stomachic.)

in China: fu shui cao

Veronicastrum villosulum (Miquel) T. Yamazaki var. ***glabrum*** T.L. Chin & D.Y. Hong

China.

See *Fl. Reipubl. Popularis Sin.* 67(2): 402. 1979

(Used for fever caused by snail-borne diseases.)

in China: tie diao gan

Veronicastrum villosulum (Miquel) T. Yamazaki var. ***villosulum*** (*Botryopleuron macrophyllum* H.L. Li; *Botryopleuron villosulum* (Miq.) Makino; *Calorhabdos villosula* (Miq.) Benth. & Hook. f. ex Makino; *Paederota villosula* Miquel)

Japan.

See *Opera Varia* 200. 1758, *Enumeratio Methodica Plantarum* 111. 1759, *Edwards's Botanical Register* ad 1770, (3). 1835, *Annales Museum Botanicum Lugduno-Batavi* 2: 118. 1866, *Botanical Magazine* (Tokyo) 10(113): 252. 1896 and *Hooker's Icones Plantarum*, pl. 2670. 1900, *Botanical Magazine* (Tokyo) 20(237): 87–88. 1906, *Journal of the Faculty of Science: University of Tokyo, Botany* 7(2): 130–131, f. 20, 11–12. 1957, *Botanical Bulletin of Academia Sinica* 1(1): 21. 1960, *Fl. Reipubl. Popularis Sin.* 67(2): 401–402. 1979

(Used for fever caused by snail-borne diseases.)

in China: mao ye fu shui cao (yuan bian zhong)

Veronicastrum virginicum (L.) Farw. (*Leptandra virginica* (L.) Nutt.; *Leptandra virginica* Nutt.; *Veronica virginica* L.; *Veronicastrum virginicum* Farw.)

North America. Perennial herb

See *Sp. Pl.* 1: 9. 1753, *Gen. N. Amer. Pl.* [Nuttall]. 1: 7. 1818 and *The Druggists' Circular* 61: 231. 1917 [*Druggist's Circular and Chemical Gazette*], *Taxon* 31(2): 344–360. 1982

(Poisonous. Stomachic.)

in English: blackroot, bowman's root, Culver's root

Vetiveria Bory Poaceae (Gramineae)

Malayalam and Tamil names of the plant *Vetiveria zizanioides* (L.) Nash, in Malayalam *veti* 'cut' and *ver* 'root', referring to the method of propagation; sometimes in *Chrysopogon*, type *Vetiveria odoratissima* Bory, see *Species Plantarum* 2: 1045, 1047. 1753, *Flora Cochinchinensis* 538, 552. 1790, *Essai d'une Nouvelle Agrostographie* 128, 150, t. 22, f. 11. 1812, *Pl. Pugill.* 2: 10. 1815, *Fundamenta Agrostographiae* 187–188. 1820, *Bull. Sci. Soc. Philom. Viburnum corylifolium Hook. f. & Thomson

China.

See *Journal of the Linnean Society, Botany* 2: 174. 1858

(Fruits used for fishing.)

in India: soh lang

Viburnum cotinifolium D. Don

India, Himalaya, Bhutan. Shrub, edible fruits

See *Prodromus Florae Nepalensis* 141–142. 1825 and *Taxon* 29: 353–355. 1980

(Fresh leaves paste for boils, wounds, cuts; leaves juice used internally in menorrhagia, postpartum hemorrhage.)

in India: ghenu, guch, jiana, rich uklu

Viburnum dentatum L. (*Viburnum canbyi* Sargent; *Viburnum dentatum* Thunb.; *Viburnum dentatum* var.

scabrellum Torr. & A. Gray; *Viburnum scabrellum* (Torrey & A. Gray) Chapm.; *Viburnum scabrellum* Chapm.) (after William Marriott Canby, 1831–1904, Delaware botanist, traveller and plant collector, editor of the autobiography of August Fendler (1813–1883), merchant, banker, accompanied Henry Villard's Northern Transcontinental Survey with C.S. Sargent; see Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Joseph William Blankinship (1862–1938), "A century of botanical exploration in Montana, 1805–1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1–31. 1904; J.W. Harshberger, *The botanists of Philadelphia and their work*. Philadelphia 1899)

North America. Perennial shrub or tree

See *Species Plantarum* 1: 268. 1753, *Fl. Jap.* (Thunberg) 122. 1784, *A Flora of North America*: containing ... (Torr. & A. Gray) 2(1): 16. 1841, *Flora of the southern United States* 172. 1860

(Stimulant, kinnikinnick.)

in English: arrow wood, southern arrow wood, southern arrowwood

Viburnum dentatum L. var. ***dentatum*** (*Viburnum carolinianum* Ashe; *Viburnum carolinianum* Ashe var. *cismontanum* McAtee; *Viburnum carolinianum* Ashe var. *deamii* (Rehder) McAtee; *Viburnum crenatum* McAtee; *Viburnum dentatum* L. var. *deamii* (Rehder) Fernald; *Viburnum dentatum* L. var. *indianense* (Rehder) Gleason; *Viburnum dentatum* L. var. *scabrellum* Torr. & A. Gray) Chapm.; *Viburnum scabrellum* (Torr. & A. Gray) Chapm. var. *dilutum* McAtee; *Viburnum semitomentosum* (Michx.) Rehder)

North America. Perennial shrub or tree

See *Species Plantarum* 1: 268. 1753, *Fl. Jap.* (Thunberg) 122. 1784, *A Flora of North America*: containing ... (Torr. & A. Gray) 2(1): 16. 1841, *Flora of the southern United States* 172. 1860

(Stimulant, kinnikinnick.)

in English: arrow wood, southern arrow wood, southern arrowwood

Viburnum edule (Michx.) Raf. (*Viburnum pauciflorum* La Pylaie ex Torr. & A. Gray)

North America. Perennial shrub, food

See *Medical Repository*, ser. 2, 5: 254. 1808 and *Taxon* 31(2): 344–360. 1982

(Stimulant, tonic.)

in English: mooseberry viburnum, squashberry

Viburnum erubescens Wall.

India. Perennial shrub, flowers epigynous, ripe fruit edible

See *Plantae Asiaticae Rariores* [Wallich] 2: 29, pl. 134. 1831, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 12: 295. 1860

(Astringent, stomachic.)

Viburnum foetens Decne. (*Viburnum grandiflorum* Wall. ex DC. f. *foetens* (Decne.) N.P. Taylor & Zappi)

India, Himalaya. Deciduous shrub with pinkish-white flowers

See *Numer. List* [Wallich] n. 466. 1829, *Prodr.* (DC.) 4: 329. 1830 and *Curtis's Bot. Mag.* 14(3): 122. 1997

(Leaves sweet and nourishing for cattle.)

in India: kul mauch

Viburnum foetidum Wall.

China.

See *Plantae Asiaticae Rariores* 1: 49, pl. 61. 1830

(Fruits used as fish poison.)

in India: soh lang

Viburnum grandiflorum Wall. ex DC. (*Solenotinus nervosus* Oerst.)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 329. 1830, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 12: 295. 1860

(Bark paste to cure wounds and cuts.)

in India: kalatimlya

Viburnum inopinatum Craib

Thailand.

See *Bulletin of Miscellaneous Information Kew* 1911(10): 385. 1911

(Upper part plant decoction taken for stomachache.)

Viburnum lentago L.

North America. Edible fruits

See *Species Plantarum* 1: 268. 1753 and *Taxon* 31(2): 344–360. 1982

(Stomachic.)

in English: black haw, cowberry, nanny plum, nannyberry, nannyberry viburnum, sheepberry, sweet viburnum, sweet-berry, tea plant, wild raisin

in North America: akiwasas, black haw, black haw bush, mna, mna-hu (Dakota), nannyberry, wuwu (Winnebago)

Viburnum mullaha Buch.-Ham. ex D. Don

Nepal.

See *Prodromus Florae Nepalensis* 141. 1825

(Juice of ripe fruits given to relieve indigestion.)

in Nepal: malcho

***Viburnum opulus* L.**

North America, China.

See *Species Plantarum* 1: 267–268. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 328. 1830 and *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 23: 1–23. 1974, *Acta Biol. Cracov., Ser. Bot.* 19: 107–148. 1976, *Fl. North. Caucasus* 2: 51–62. 1976, *Taxon* 28: 277–278. 1979, *Botaničeskij Žurnal* (Moscow & Leningrad) 65(5): 659–668. 1980, Frohne, D., Pfander, H.J. *A Colour Atlas of Poisonous Plants*. London. 1983, *Acta Botanica Boreali-Occidentalia Sinica* 10: 203–210. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 769–771. 1991, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Botanica Acta* 106: 183–191. 1993, *Watsonia* 21: 365–368. 1997, *Fl. Medit.* 15: 719–728. 2005

(Humans who ingest the berries may experience mild symptoms.)

in English: crampbark, cranberry bush, European cranberry bush, guelder rose, high-bush cranberry, pembina, snowball plant, snowball tree, summerberry, whitten tree

in China: hsueh chiu

in North America: nepin-minan (Chippewa)

***Viburnum trilobum* Marshall** (*Viburnum americanum* sensu Dipp.; *Viburnum opulus* subsp. *trilobum* (Marshall) R.T. Clausen; *Viburnum opulus* var. *americanum* Ait.)

North America. Shrub, food

See *Arbustrum Americanum* 162. 1785 and *Cornell University Agricultural Experiment Station Memoir* 291: 10. 1949, *Taxon* 31(2): 344–360. 1982

(Fruits rich in vitamin C.)

Common names: American cranberry bush, crampbark, cranberry, cranberry bush, cranberry tree, grouseberry, high-bush cranberry, kalyna, pembina, pimbina, squawbush, summerberry, tree cranberry

Vicia L. Fabaceae (Vicieae)

Latin *vicia*, *ae* ‘a vetch’ (Plinius, Marcus Porcius Cato, L. Junius Moderatus Columella, Marcus Terentius Varro, Palladius Rutilius Taurus Aemilianus and Vergilius), possibly related to *vinco*, *-is*, *vici*, *victum*, *vincere* ‘to be victorious’ (“herba vicia, id est victorialis”, Isidorus or Saint Isidore, Archbishop of Seville); see Carl Linnaeus, *Species Plantarum*. 2: 734–737, 752. 1753, *Genera Plantarum*. Ed.

5. 327. 1754, *The Gardeners Dictionary ... (Plant poisonous to cattle. Seeds toxic to human being, lathyrism. Paste of leaves applied to treat cuts, sores, ulcers and wounds. Root juice drunk to cure fever.)

in English: narrow-leaved vetch

in China: zhai ye ye wan dou

in India: matra

in Nepal: kuteli kosa, narkat

Vicia bakeri Ali (*Vicia pallida* sensu Baker; *Vicia pallida* sensu auct. non Turcz.; *Vicia sylvatica* Benth.)

India. Perennial climbing herb, tender fruits cooked as vegetable

See *Botaniska Notiser* 120: 52. 1967

(Paste of leaves applied to treat cuts and wounds.)

in China: cha yu ye wan dou

in Nepal: bakula

Vicia caroliniana Walter (*Vicia hugeri* Small)

North America. Perennial non-climbing herb

See *Flora Caroliniana*, secundum ... 182. 1788

(Plant infusion analgesic, emetic, for dyspepsia, rubbed on stomach cramps, rheumatism.)

in English: Carolina vetch

Vicia faba L. (*Faba bona* Medik.; *Faba equina* Medik.; *Faba faba* (L.) House, nom. illeg., tautonym; *Faba major*

Desf.; *Faba minor* Roxb.; *Faba sativa* Bernh.; *Faba vulgaris* Moench; *Orobis faba* Brot.; *Vicia equina* Steud.; *Vicia esculenta* Salisb.; *Vicia vulgaris* Gray)

West Asia. Annual non-climbing herb or vine

See *Species Plantarum* 2: 728, 734–737. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Vorlesungen der Churpfälzischen physikalisch-ökonomischen Gesellschaft* 2: 360. 1787, *Methodus Plantas Horti Botanici ...* (Moench) 150. 1794, *Prodr. Stirp. (Used in Sidha. Broad beans are not poisonous to humans in the conventional sense, but they cause favism, a hemolytic anemia, in susceptible individuals. These individuals have a genetically transmitted, male sex-linked deficiency to the enzyme glucose-6-phosphate dehydrogenase. Certain groups such as Oriental Jews, Mediterranean Europeans, Arabs, Asians, and blacks may have the deficiency. The disease can cause death in severe cases. Flour from seeds used as emollient and resolvent. Ceremonial medicine.)

in English: broad bean, common bean, English bean, European bean, faba bean, fava bean, field bean, garden bean, horse bean, pigeon bean, small bean, tick bean, Windsor bean

in Peru: haba, lipta

in China: can dou, tsan tou

(Hairy vetch causes systemic granulomatous inflammation. This plant causes poisoning in cattle, horses, and poultry. Various syndromes occur in cattle, including a dermatitis that resembles photosensitization in many respects, except that the skin lesions appear on pigmented skin as well. Mortality occurs in cattle and poultry. Compound infusion with dried leaves taken for sores, stomach pain.)

in English: hairy vetch, large Russian vetch, Russian vetch, winter vetch

in South Africa: harige wieke

Vigna Savi Fabaceae (Phaseoleae)

After the Italian botanist Domenico Vigna, d. 1647, professor of botany and Director of the Botanical Garden of Pisa (in 1614, 1616–1617 and 1632–1634), author of *Animadversiones, sive observationes in libro de Historia, et de Causis Plantarum Theophrasti*. Pisis 1625; see *Kew Bulletin* 24: 507–569. 1970, *Boissiera* 28: 1–273. 1978, P.E. Tomei and Carlo Del Prete, “The Botanical Garden of the University of Pisa.” *Herbarist.* 49: 47–71. Concord, Mass. 1983, L. Amodei, “Note sull’*Herbarium Horti Pisani*: l’origine delle collezioni.” *Museol. Scient.* 4(1–2): 119–129. 1987, *Bull. Bot. Surv. India* 27: 1–28. 1987.

Vigna aconitifolia (Jacq.) Maréchal (*Dolichos dissectus* Lam.; *Phaseolus aconitifolius* Jacq.; *Phaseolus palmatus* Forssk.; *Vigna aconitifolia* (Jacq.) Verdc., nom. illeg., non *Vigna aconitifolia* (Jacq.) Maréchal; *Vigna aconitifolius* (Jacq.) Maréchal)

India, Pakistan and China. Annual non-climbing herb, slender, erect, prostrate, inflorescence an axillary head-like dense false raceme, calyx campanulate, corolla yellow, fruit a cylindrical pod, forage, hay, green manure, green pods and ripe seeds eaten cooked

See *Species Plantarum* 2: 723–725. 1753, *Observationum Botanicarum* 3: 2–3, pl. 52. 1768, *Flora Aegyptiaco-Arabica* 214. 1775, *Encyclopédie Méthodique, Botanique* 2(1): 300. 1786 and *Bulletin du Jardin Botanique National de Belgique* 39(2): 160. 1969, *Kew Bulletin* 23(3): 464. 1969, *J. Vigna angularis (Willdenow) Ohwi & Ohashi (*Azuki angularis* (Willdenow) Ohwi; *Dolichos angularis* Willdenow; *Phaseolus angularis* W.F. Wight; *Phaseolus angularis* (Willd.) W.F. Wight; *Phaseolus chrysanthos* Savi; *Phaseolus mungo* auct. non L.; *Phaseolus nipponensis* Ohwi)

Japan, China and Nepal. Annual non-climbing herb, erect, prostrate, rooting at the nodes, inflorescence an axillary false raceme, corolla bright yellow, fruit a cylindrical pendulous pod slightly constricted between the seeds, dried pulse used as a human food, dried seeds eaten, sprouted beans used as a vegetable, crop grown for forage and green manure, in subtropical and warm temperate climates

See *Species Plantarum* 2: 723–725. 1753, *Species Plantarum*. Editio quarta 3(2): 1051. 1802 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 137: 17. 1909, *Flora of Japan* 690–691. 1953, *Journal of Japanese Botany* 44(1): 29. 1969, *Boissiera* 28: 214. 1978, *American Journal of Botany* 67: 595–602. 1980, *Journal of Agricultural and Food Chemistry* 46(9): 3698–3701. 1998

(Used in Ayurveda. Antilipemic. Beans and seeds used to treat kidney trouble, constipation, abscesses, threatened miscarriage, retained placenta and nonsecretion of milk. Leaves febrifuge. Cultural value, the red seeds related to birth, wedding and death.)

in English: adanka bean, aduki bean, adzuki bean, azuki bean

in China: chi xiao dou

in India: gharrada uddu, mudgaparni, rayans, soonthiya

in Japan: akamâmii, azicha, azuki

Vigna capensis (E. Mey.) Walp. (*Dolichos capensis* L.; *Phaseolus capensis* Thunb.; *Strophostyles capensis* E. Mey.; *Vigna capensis* (L.) Walp.; *Vigna capensis* Walp.)

South Africa, Mauritius. Perennial climber, fusiform roots, see also *Dolichos capensis*

See *Prodromus Plantarum Capensium*, ... 130. 1800, *Commentariorum de Plantis Africae Australioris* 147. 1836, *Linnaea* 13: 533. 1839 and *A Manual of the Flowering Plants and Ferns of the Transvaal* 2: xxxiv, 420. 1932, *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Kew Bull.* 24: 507–569. 1970

(For skin diseases.)

in India: hadundo

in Mauritius: pois du Cap

Vigna dalzelliana (Kuntze) Verdc. (*Phaseolus dalzellianus* Kuntze; *Phaseolus dalzellii* Cooke; *Phaseolus pauciflorus* Dalzell; *Phaseolus pauciflorus* Sessé & Moc. ex G. Don)

Thailand, Cambodia, Laos. Perennial non-climbing herb, twining or creeping, yellow flowers, fodder

See *Species Plantarum* 2: 723–725. 1753, *A General History of the Dichlamydeous Plants* 2: 356. 1832, *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 209. 1851, *Revisio Generum Plantarum* 1: 202. 1891 and *Kew Bulletin* 24(3): 558. 1970

(Used in Ayurveda.)

in India: aranyamudgu, kattulunnu, masaparni, mudgavalli, mugavaine, mugavel, ranmug

Vigna grahamiana (Wight & Arn.) Verdc. (*Dolichos grahamianus* (Wight & Arn.) Niyomdham; *Dolichos subcarnosus* Wight & Arn.; *Phaseolus grahamianus* Wight & Arn.; *Wajira grahamiana* (Wight & Arn.) Thulin & Lavin)

India. Perennial climbing herb

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 244. 1834 and *Kew Bulletin* 24(3): 562. 1970, *Nordic Journal of Botany* 12(3): 341. 1992, *Systematic Botany* 29(29): 908. 2004

(Juice from the crushed tuberous roots poured inside nose for curing nasal troubles.)

in India: murugal

Vigna luteola (Jacq.) Benth. (*Calopogonium pendunculatum* Standl.; *Dolichos gangeticus* Roxb.; *Dolichos luteolus* Jacq.; *Dolichos luteus* Sw.; *Dolichos niloticus* Delile; *Dolichos repens* L.; *Orobis trifoliatius* Sessé & Moc.; *Phaseolus luteolus* (Jacq.) (Bark and fresh leaves infusion taken as strongly emetic and as a purgative.)

Vinca L. Apocynaceae

Contracted from the Latin *vincapervinca* and *vicapervica*, *ae* (Plinius), *vica pervica* (Pseudo Apuleius Barbarus), perhaps related to *vincio*, *-is*, *vinxi*, *vinctum*, *vincire* ‘to bind, to wind about’, or to *vinco*, *is*, *vici*, *vistum*, *vincere* ‘to overcome, to be victorious’, *pervinco*, *vici*, *victum*, *ere* ‘to conquer completely, to achieve’, *pervicax*, *acis* ‘determined, obstinate’; see Carl Linnaeus, *Species Plantarum*. 1: 209. 1753, *Genera Plantarum*. Ed. 5. 98. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Anleit. zum Gründlichen Studien der Botanik* 273, 299. 1818 and E. Weekley, *An Etymological Dictionary of Modern English*. 2: 1072. 1967, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 613. 1994, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 47(1): 140–184. 2009.

Vinca difformis Pourret

Europe.

See *Species Plantarum* 1: 209. 1753 and *Nat. Prod. Res.* 19(6): 615–617. 2005

(Cultivated for medicine, alkaloids, vincamine is the major alkaloid, used clinically as an hypotensive agent. Contact dermatitis.)

Vinca erecta Regel & Schmalhausen

Eurasia.

See *Species Plantarum* 1: 209. 1753, *Act. Hort. Petrop.* 6: 330. 1879 and *Doklady Akademii nauk SSSR* 162(1): 102–103. 1965

(Cultivated for medicine, alkaloids, vincamine is the major alkaloid, used clinically as an hypotensive agent. Contact dermatitis.)

Vinca herbacea Waldst. & Kit.

Europe.

See *Descriptiones et Icones Plantarum Rariorum Hungariae* 1: 8, pl. 9. 1802 and *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Taxon* 30: 829–842. 1981, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, Wu, M.L. et al. “Severe bone marrow depression induced by an anticancer herb *Catharanthus roseus*.” *J. Toxicol. Clinical Toxicol.* 42(5): 667–671. 2004

(Cultivated for medicine, alkaloids, vincamine is the major alkaloid, used clinically as an hypotensive agent, myorelaxant. Contact dermatitis.)

Vinca major Linnaeus (*Pervinca major* (L.) Garsault; *Vinca major* Brot.; *Vinca major* var. *variegata* Loudon)

Europe.

See *Species Plantarum* 1: 209. 1753 and *Vinca Alkaloids* 79. 1973, *Informatore Botanico Italiano* 15: 188–194. 1983, *Kromosomo* 34: 1073–1078. 1984, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 47(1): 140–184. 2009

(Cultivated for medicine, alkaloids, hypotensive, antimetabolic, antitumor. Contact dermatitis.)

in English: band plant, blue buttons, blue periwinkle, greater periwinkle, periwinkle

in Spanish: vinca

in South Africa: gewone opklim, maagdepalm

in China: man chang chun hua

Vinca minor Linnaeus (*Pervinca minor* (L.) Garsault)

China.

See *Species Plantarum* 1: 209. 1753 and *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 23: 1–23. 1974, *Acta Biologica Cracoviensia, Series Botanica* 21: 31–63. 1978, *Taxon* 27: 519–535. 1978, *Informatore Botanico Italiano* 15: 188–194. 1983, *International Organization of*

Plant Biosystematists Newsletter 13: 17–19. 1989, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(Cultivated for medicine, alkaloids, hypotensive, antimetabolic, antitumor. Contact dermatitis.)

in English: common periwinkle, lesser periwinkle, myrtle, running myrtle

in China: hua ye man chang chun hua

Vinca sardoa (Stearn) Pignatti (*Vinca difformis* Pourr. subsp. *sardoa* Stearn)

Europe, Italy.

See *Botanical Journal of the Linnean Society* 65: 255. 1972, *Giornale Botanico Italiano* 111: 50. 1977, *Heterocycles* 31(9): 1663–1667. 1990, *Giorn. Bot. Ital.* 129(2): 255. 1995, *Phytochemistry* 47: 149–151. 1998, *Phyton* 39, 265–275. 1999, *Nat. Prod. Res.* 19(6): 615–617. 2005

(Hypotensive, antidiabetics.)

in Italian: brunica, froinca, pervinca sarda, pervinca di Sardegna, pruinca

Vincetoxicum Wolf Asclepiadaceae (Apocynaceae)

Latin *vinco* ‘to conquer, overcome’ and *toxicum* ‘poison’, an antidote to the snakebite, see *Species Plantarum* 1: 212–213. 1753, *Genera Plantarum* 130. 1776, *Flora Caroliniana, secundum ...* 13, 104. 1788, *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae* 6(Phys.): 404. 1790, *Annales de la Société Botanique de Lyon* 7: 67. 1880 and *Flora URSS* 18: 674, 677. 1952, *Novosti Sistematiki Vysshchikh Rastenii* 10: 340–341. 1973, *Acta Phytotaxonomica Sinica* 12: 94. 1974, *Neo-Lineam. Fl. Manshur.* 523. 1979, *Novon* 15(4): 620–641. 2005.

Vincetoxicum officinale Moench (*Alexitoxicon officinale* (Moench) St.-Lag.; *Antitoxicum officinale* (Moench) Pobedim.)

Europe.

See *Genera Plantarum* 130. 1776, *Methodus Plantas Horti Botanici ...* 717. 1794, *Annales de la Société Botanique de Lyon* 7: 67, 120. 1880 and *Flora URSS* 18: 674, 677, 697, pl. 38: 2. 1952, *Fitoterapia*. 71(5): 584–586. 2000

(Vesicant.)

Viola L. Violaceae

Latin *viola*, *ae* and Greek *ion* ‘violet’, Akkadian *asu* and Hebrew *js* ‘to grow, to turn, to come from’, Akkadian *isum* ‘plant’; see Carl Linnaeus, *Species Plantarum*. 2: 933–937. 1753, *Genera Plantarum*. Ed. 5. 402. 1754, *Tabula Affinitatum Regni Vegetabilis* 57. 1802 and Manlio Cortelazzo & Paolo

Zolli, *Dizionario etimologico della lingua italiana*. 5: 1440. 1988, *Novon* 2(3): 237. 1992, Giovanni Semerano, *Le origini della cultura europea. Don) Ridl.; *Viola patrinii* var. *laotiana* H. Boissieu; *Viola patrinii* var. *nepaulensis* Ging.)

India.

See *The Cyclopaedia*; or, universal dictionary of arts, ... 37(1): *Viola* no. 7. 1817, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 293. 1824, *Prodromus Florae Nepalensis* 205. 1825 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54(5, Beibl. 120): 166, 172. 1917, *Botanical Magazine* 36(423): 37. 1922, *Journal of Botany, British and Foreign* 73(1): 17–18. 1935

(Dried flowers for cough and cold. Flowers used as blood purifier.)

in China: ji ye jin cai

in India: banaksha, phori, vanafsa, vanfsa

Viola bicolor Pursh (*Viola bicolor* Gilib.; *Viola kitaibeliana* auct. non Schult.; *Viola kitaibeliana* Roem. & Schult. var. *rafinesquei* (Greene) Fernald; *Viola rafinesquei* Greene)

North America. Annual herb

See Gilibert, Jean Emmanuel (1741–1814), *Caroli Linnæi ... Systema plantarum Europae*. Coloniae-Allobrogum: sumptibus Piestre & Delamolliere, 1785–1787 [t. I. Nomenclator linnæanus. *Flora lithuanica inchoata*; seu, Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert.], *Flora Americae Septentrionalis*; or, ... 1: 175. 1814[1813], *Pittonia* 4(20B): 9. 1899 and *Rhodora* 40(479): 443. 1938, *Taxon* 29: 718–720. 1980, *Flora Analítica de la Provincia de Valencia* 369. 1987, *Castanea* 67(4): 369–379. 2002

(Antidiarrheal, tonic, blood purifier, analgesic, for headache, dysentery, cough, catarrh, colds, boils. Insecticide.)

in English: field pansy

Viola biflora L. (*Chryson biflora* (L.) Spach)

India, China. Perennial herb, erect or decumbent, glabrous or pubescent, yellow flowers solitary terminal, oblong capsule

See *Species Plantarum* 2: 936. 1753 and *Taxon* 30: 857–860. 1981, *Kromosomo* 79–80: 2760–2766. 1995, *Acta Bot. Boreal.-Occid. Sin.* 16(3): 310–318. 1996, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Whole plant decoction for cough, dysentery and acute bronchitis; shoots for fever, cold; mashed plant taken with mustard oil to cure dysentery. Leaves emollient, laxative and antiseptic, for skin eruptions; crushed leaves taken as a remedy for constipation. Leaves and flowers for cold and cough. Flowers for skin irritation, pectoral, diaphoretic and antiseptic. Roots emetic.)

in English: arctic yellow violet, sweet violet, twoflower violet

in China: shuang hua jin cai

in India: banafsa, banafsha, banapsa, banfsa, dundi birali, mainguni

Viola canadensis L. (*Lophion canadense* (L.) Spach; *Lophion rydbergii* (Greene) Nieuwl. & Lunell; *Viola canadensis* subsp. *rydbergii* (Greene) House; *Viola canadensis* var. *neomexicana* (Greene) House; *Viola geminiflora* Greene; *Viola muriculata* Greene; *Viola neomexicana* Greene; *Viola rydbergii* Greene)

North America. Perennial herb, small plant, long heart-shaped leaves finely toothed, white fragrant flowers

See *Sp. Pl.* 2: 936. 1753, *Histoire Naturelle des Végétaux. Phanérogames* 5: 517. 1836, *Fl. N. Amer.* (Torr. & A. Gray) 1: 143. 1838 and *Pittonia* 5(26A): 27–29. 1902, *Flora of Colorado* 233. 1906, *American Midland Naturalist* 4: 478. 1916, *Canad. J. Bot.* 65: 653–655. 1987

(Root decoction analgesic. Leaves and roots used as emetic.)

in English: Canada violet, Canadian white violet

Viola canadensis L. var. **canadensis** (*Viola canadensis* L. var. *corymbosa* Nutt. ex Torr. & A. Gray)

North America. Perennial herb, small plant, long heart-shaped leaves finely toothed, white fragrant flowers

See *Sp. Pl.* 2: 936. 1753, *Fl. N. Amer.* (Torr. & A. Gray) 1: 143. 1838

(Root decoction analgesic. Leaves and roots used as emetic.)

in English: Canada violet, Canadian white violet

Viola canescens Wall. (*Viola canescens* Wall. ex Roxb.; *Viola serpens* Wall. ex Ging. var. *canescens* (Wall.) Hook. f. & Thomson)

India, Himalaya. Small perennial herb with runners, stems very short, long leafy runners, fringed stipules, lilac flowers, globose capsule

See *Flora Indica*; or descriptions of Indian Plants 2: 450–451. 1824, *The Flora of British India* 1(1): 184. 1872

(Whole plant blood purifier, stomachic, in constipation and during fever. Leaves decoction for cold and cough; dried leaves infusion a treatment for cold, cough and malaria; crushed leaves mixed with mustard oil to relieve headache. Flowers emollient, demulcent, used in lung troubles; flower decoction to cure cough. Rhizome infusion diuretic, emetic, taken to relieve cough and bronchitis.)

in India: banafasha, banafsha, banaksha, banfsa, banksha, banshafa, banspatti, dundibarali, sanabsa

Viola cinerea Boiss.

India.

See *Diagnoses plantarum orientalium novarum*, ser. 1, 1: 7. 1842

(Used in Ayurveda.)

in India: banafasha, banafsha, banaksha, banfsa, banksha, banshafa, banspatti, dundibarali, sanabsa

Viola cucullata Ait. (*Viola cucullata* Moc. & Sessé ex Ging.; *Viola cucullata* Bigel. ex Ging.; *Viola cucullata* Aiton var. *microtitis* Brainerd; *Viola obliqua* Hill)

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 283. 1789, *Prodr.* (DC.) 1: 289, 294. 1824

(Analgesic, astringent, blood purifier, tonic, antidiarrheal, taken for colds, cough, headache, diarrhea, dysentery. Crushed roots applied to boils. Insecticide.)

in English: marsh blue violet

Viola diffusa Ging. (*Viola diffusa* subsp. *tenuis* (Benth.) W. Becker; *Viola diffusa* var. *brevibarbata* Ching J. Wang; *Viola*

diffusa var. *brevisejala* W. Becker; *Viola diffusa* var. *glabella* H. Boissieu; *Viola diffusa* var. *glaberrima* W. Becker; *Viola diffusa* var. *tomentosa* W. Becker; *Viola diffusoides* Ching J. Wang; *Viola kiusiana* Makino; *Viola tenuis* Benth.; *Viola wilsonii* W. Becker)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 298. 1824, *Journal of Botany*, being a second series of the Botanical Miscellany 1: 482. 1842 and *Bulletin de l'Herbier Boissier*, sér. 2, 1(11): 1077. 1901, *Botanical Magazine* 16(184): 138–139. 1902, *Beihefte zum Botanischen Centralblatt* 20(2): 127. 1906, *Philippine Journal of Science* 19(6): 714–715. 1921, *Bulletin of Miscellaneous Information Kew* 1928(6): 251–252. 1928, *Bulletin of Botanical Research* 8(2): 19, pl. 1–9. 1988, *Acta Botanica Yunnanica* 13(3): 264–265. 1991

(Roots and leaves paste applied on belly and forehead for headache and typhoid fever; an aqueous extract taken orally for indigestion and constipation.)

in China: qi xing lian

in India: ducherek

Viola labradorica Schrank (*Viola adunca* Sm. var. *minor* (Hook.) Fernald; *Viola conspersa* Reichb.)

North America. Perennial herb

See *Rhodora* 51: 57. 1949, *Taxon* 31(2): 344–360. 1982, *Canad. J. Bot.* 65: 653–655. 1987, *Michigan Bot.* 28(4): 217. 1989, *Castanea* 67(4): 369–379. 2002

(Whole plant infusion drunk for heart trouble.)

in English: American dog violet

Viola nephrophylla Greene (*Viola maccabeana* M.S. Baker; *Viola maccabeiana* M.S. Baker; *Viola nephrophylla* Greene var. *arizonica* (Greene) Kearney & Peebles; *Viola nephrophylla* Greene var. *cognata* (Greene) C.L. Hitchc.; *Viola pratincola* Greene; *Viola retusa* Greene)

North America. Annual or perennial herb

See *Pittonia* 3: 144–145. 1896, *Pittonia* 4: 6, 64. 1899 and *Pittonia* 5: 33. 1902, *J. Wash. Acad. Sci.* 29: 487. 1939, *Madroño* 5: 226, tab. 22, fig. 5, tab. 23. 1940, *Vasc. Pl. Pacific NorthW.* 3: 445. 1961

(Ceremonial, emetic.)

in English: northern bog violet

Viola odorata L.

Cosmopolitan. Herb, short tufted rootstock, cordate leaves

See *Species Plantarum* 2: 934. 1753 and *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich). 24: 15–19. 1995, *Opera Bot.* 137: 1–42. 1999

(Used in Ayurveda and Unani. Leaves decoction useful in asthma, bleeding piles, cough, fever, headache and skin

diseases. Paste of leaves and flowers applied externally in throat ache; dried powdered flowers taken in bad cold, cough, lung problems and headache, mixed with honey for headache and cough. Powdered root for the treatment of respiratory disorders, asthma.)

in English: common violet, English violet, florist's violet, garden violet, sweet viola, sweet violet, violet, violet tea

in China: xiang jin cai

in India: bagabanosa, banafasha, banafsa, banafsha, banafshah, banaksha, banapsa, banfsa, banfsha, banksha, banshafa, banspatti, bhulaa banaphsha, bunaf sah, dundibarali, gulbanfsa, gul banfasha, gulbanafsha, gule bankasha, gulebanafsha, gulebanfsha, gulerbanpasa, sanabsa, vanaphsa, vanspika

in Peru: laram ajjiri, violeta

in South Africa: viooltjie

in Arabic: banaf sag

Viola palustris L. (*Viola epipsila* Ledeb.; *Viola epipsila* Ledeb. subsp. *repens* (Turcz. ex Trautv. & C.A. Mey.) Becker; *Viola epipsiloides* Á. Löve & D. Löve; *Viola palustris* subsp. *brevipes* M.S. Baker; *Viola palustris* var. *brevipes* (M.S. Baker) R.J. Davis; *Viola repens* Turcz.; *Viola repens* Turcz. ex Trautv. & C.A. Mey.; *Viola repens* Schwein.)

North America. Perennial herb

See *Species Plantarum* 2: 934. 1753, *Index Seminum*. Dorpat 5. 1820, *American Journal of Science, and Arts* 5(1): 70–71. 1822, *Reise in den Äussersten Norden und Osten Sibiriens* 1(2,3): 18. 1856, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 23(2): 323–324. 1877 and *Madroño* 3(6): 235–237, pl. 11, f. 6. 1936, *Madroño* 11(3): 144. 1951, *Botaniska Notiser* 128(4): 516. 1975[1976], *Nat. Ging. ex DC.; *Viola pedata* L. var. *ranunculifolia* DC.)

North America. Perennial

See *Sp. Pl.* 2: 933. 1753, *Prodr.* (DC.) 1: 291. 1824 and *Amer. Midl. Naturalist* 3: 210. 1914, *Rhodora* 51: 56. 1949, *Fl. New England* ed. 2. 602. 1982

(Analgesic, tonic, blood purifier, antiseptic, antidiarrheal, for headache, cough, catarrh, colds, dysentery, boils. Insecticide.)

in English: birdfoot violet

Viola philippica Cav. var. ***philippica*** (*Viola alisoviana* Kiss; *Viola alisoviana* Kiss fo. *candida* (Kitag.) Taken.; *Viola chinensis* G. Don; *Viola chinensis* fo. *alboviolacea* Skvortsov; *Viola chinensis* fo. *anomala* Skvortsov; *Viola chinensis* fo. *communis* Skvortsov; *Viola chinensis* fo. *dissecta* Skvortsov; *Viola chinensis* fo. *glabra* Skvortsov; *Viola patrinii* DC. ex Ging.; *Viola patrinii* var. *chinensis* Ging.; *Viola philippica* fo. *candida* (Kitag.) Kitag.; *Viola philippica* subsp. *munda* W. Becker; *Viola yedoensis* Makino; *Viola yedoensis* fo. *candida* Kitag.)

China, Japan. Annual herb, short, hairy, main root thick, leaves basal, fruit a capsule

See *Species Plantarum* 2: 933–937. 1753, *Icones et Descriptiones Plantarum*, quae aut sponte ... 6: 19. 1801, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 293. 1824 and *Botanical Magazine* 26(305): 148–151. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54(5, Beibl. 120): 175–176. 1917, *Botanical Magazine* 48(566): 102. 1934, *Lineamenta Florae Manshuricae* 322. 1939, *Chinese Bulletin of Botany* 2(1): 43–44. 1984, *Acta Botanica Boreali-Occidentalia Sinica* 16(3): 310–318. 1996

(Whole plant used for skin inflammation, jaundice, genital discharge, boils, snakebites.)

in English: Tokyo violet, wild Chinese violet

in China: zi hua di ding

Viola pilosa Blume (*Viola pogonantha* W.W. Sm.; *Viola serpens* Wall. ex Ging.; *Viola serpens* subsp. *gurhwalensis* W. Becker; *Viola serpens* var. *pseudoscotophylla* Boiss.)

India, Himalaya. Small herb, cordate leaves, bluish white flowers

See *Catalogus ...* 57. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 296. 1824 and *Notes from the Royal Botanic Garden, Edinburgh* 12(59): 228–229. 1920

(Used in Ayurveda. Roots emetic, antipyretic, chewed in case of fever; powdered root for the treatment of respiratory disorders, asthma. Dried flowers used as a purgative and, when boiled with tea, for coughs and colds. Flowers and leaves for treating wounds and fever. Leaves pain killer, a decoction for cold, catarrh, sore throat and cough.)

in China: pu fu jin cai

in India: amo, banafsa, banafsha, banafshah, banakasha, banaksha, banapsa, banspatti, banksha, bili kaamakast-hoori, giddar tamaku, gulbanapsha, heele, vanaphsa

Viola pubescens Aiton (*Crocion eriocarpum* Nieuwl. & Kaczm.; *Viola eriocarpa* Schwein.; *Viola eriocarpon* (Nutt.) Schwein.; *Viola pensylvanica* Michx.; *Viola pubescens* Aiton f. *eriocarpa* (Nutt.) Farw.; *Viola pubescens* Aiton var. *eriocarpa* Nutt.; *Viola pubescens* Aiton var. *eriocarpa* (Schwein.) N.H. Russell; *Viola pubescens* Aiton var. *eriocarpon* Nutt.)

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 290. 1789, *Gen. N. Amer. Pl.* [Nuttall]. 1: 150. 1818, *Amer. J. Sci. Arts* 5(1): 75 (–76). 1822 and *Amer. Midl. Naturalist* 3: 214. 1914, *Pap. Michigan Acad. Sci.* 2: 33. 1923, *Sida* 2: 78. 1965

(Analgesic, tonic, blood purifier, antiseptic, antidiarrheal, for headache, cough, catarrh, sore throat, colds, heart diseases, dysentery, boils, indigestion. Insecticide.)

in English: downy yellow violet, smooth yellow violet

Viola pubescens Aiton var. ***pubescens*** (*Crocion eriocarpum* Nieuwl. & Kaczm.; *Viola eriocarpa* Schwein.; *Viola eriocarpon* (Nutt.) Schwein.; *Viola pensylvanica* Michx.; *Viola pubescens* Aiton f. *eriocarpa* (Nutt.) Farw.; *Viola pubescens* Aiton var. *eriocarpa* Nutt.; *Viola pubescens* Aiton var. *eriocarpa* (Schwein.) N.H. Russell; *Viola pubescens* Aiton var. *eriocarpon* Nutt.)

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 290. 1789, *Gen. N. Amer. Pl.* [Nuttall]. 1: 150. 1818, *Amer. J. Sci. Arts* 5(1): 75 (–76). 1822 and *Amer. Midl. Naturalist* 3: 214. 1914, *Pap. Michigan Acad. Sci.* 2: 33. 1923, *Sida* 2: 78. 1965

(Analgesic, tonic, blood purifier, antiseptic, antidiarrheal, for headache, cough, catarrh, sore throat, colds, heart diseases, dysentery, boils, indigestion. Insecticide.)

in English: downy yellow violet, smooth yellow violet

Viola rotundifolia Michx. (*Viola rotundifolia* Hook.; *Viola rotundifolia* Hegetschw.)

North America. Perennial

See *Fl. Bor.-Amer.* (Michaux) 2: 150. 1803, *Fl. Schweiz*, 246. 1839, *Lond. Journ. Bot.* vi. (1847) 73. 1847

(Analgesic, tonic, blood purifier, antiseptic, antidiarrheal, for headache, cough, catarrh, sore throat, colds, dysentery, boils, indigestion. Insecticide.)

in English: roundleaf yellow violet

Viola sagittata Ait.

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 287. 1789, *Gen. N. Amer. Pl.* [Nuttall]. 1: 147. 1818, *Ann. Lyceum Nat. Hist. New York* ii. (1828) 142. 1828, *Pittonia* 3: 316. 1898, *Bot. Gaz.* 26: 340. 1898 and *Canad. J. Bot.* 65: 653–655. 1987

(Magic, ritual, witchcraft medicine.)

in English: arrowleaf violet

Viola sagittata Ait. var. *sagittata* (*Viola* × *cestrica* House; *Viola emarginata* Le Conte; *Viola emarginata* (Nutt.) J. Le Conte; *Viola emarginata* (Nutt.) Leconte; *Viola emarginata* (Nutt.) Leconte var. *acutiloba* Brainerd; *Viola sagittata* Aiton var. *subsagittata* (Greene) Pollard; *Viola sagittata* var. *subsagittata* Pollard)

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 287. 1789, *Gen. N. Amer. Pl.* [Nuttall]. 1: 147. 1818, *Ann. Lyceum Nat. Hist. New York* ii. (1828) 142. 1828, *Pittonia* 3: 316. 1898, *Bot. Gaz.* 26: 340. 1898

(Magic, ritual, witchcraft medicine.)

in English: arrowleaf violet

Viola sempervirens Greene (*Viola sarmentosa* Douglas ex Hook.; *Viola sarmentosa* Douglas; *Viola sarmentosa* M. Bieb.)

North America. Perennial herb

See *Flora Taurico-Caucasica* 1: 172. 1808, *Flora Boreali-Americana* 1(2): 80–81. 1830, *Pittonia* 4(20A): 8. 1899

(Ceremonial, ritual.)

in English: evergreen violet

Viola sororia Willd. (*Viola floridana* Brainerd; *Viola latiuscula* Greene; *Viola palmata* Patr. ex Ging.; *Viola palmata* var. *sororia* Pollard; *Viola palmata* L. var. *sororia* (Willd.) Pollard; *Viola papilionacea* Pursh p.p.; *Viola papilionacea* Pursh var. *priceana* (Pollard) Alexander; *Viola priceana* Pollard)

North America. Perennial or annual herb, low growing, heart-shaped leaves on short stalks

See *Sp. Pl.* 2: 933. 1753, *Hort. Berol.* [Willdenow] T. 72. 1806, *Prodr.* (DC.) 1: 293. 1824, *Fl. N. Amer.* (Torr. & A. Gray) 1: 137. 1838, *Bot. Gaz.* 26: 332. 1898 and *Pittonia* 5:

93. 1902, *Proc. Biol. Soc. Washington* 16: 127. 1903, *Bull. Torrey Bot. Club* 37: 524. 1910

(Analgesic, tonic, blood purifier, antiseptic, antidiarrheal, for headache, cough, catarrh, sore throat, colds, dysentery, boils, indigestion. Leaves high in vitamins. Insecticide.)

in English: common blue violet

Viola striata Aiton (*Viola striata* Hook.)

North America. Perennial herb

See *Hortus Kew.* (W. Aiton) 3: 290. 1789, *Lond. Journ. Bot.* vi. (1847) 72. 1847 and *Michigan Bot.* 25(3): 108. 1986, *Michigan Bot.* 28(4): 217. 1989, *Castanea* 58(1): 2–3. 1993

(Magico-religious beliefs, ceremonial, emotional, spiritual, witchcraft.)

in English: striped cream violet

Viola sylvatica Fries (*Viola sylvatica* Fr. ex Hartm.)

India.

See *Bot. Not.* 1841: 81. [1841]

(Whole herb used for cough, cold, lung troubles, biliousness.)

Viola thomsonii Oudem.

India. Herbs, inflorescence cleistogamous, small pink flowers

See *Annales Museum Botanicum Lugduno-Batavi* 3: 74. 1867

(Leaf juice applied to cure eczema, fungal infections, skin allergies.)

in China: mao jin cai

in India: dimbungpat, heele

Viola tricolor L. (*Viola tricolor* var. *hortensis* DC.)

Cosmopolitan.

See *Species Plantarum* 2: 935–936. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 303. 1824 and *Taxon* 29: 709–710. 1980, *Taxon* 30: 829–842. 1981, *Amer. J. Bot.* 82(1): 104–111. 1995

(Powdered root for the treatment of respiratory disorders, asthma.)

in English: European wild pansy, field pansy, heart's ease, heartease, herb trinity, Johnny-jump-up, love-in-idleness, miniature pansy, pansy, pink of my John, wild pansy

in China: san se jin

in Arabic: belesfendj

in Peru: juacallicma, pensamiento, trinitaria

Virectaria Bremek. Rubiaceae

Latin *virectum*, *i* 'a place overgrown with grass, a green place, greenness'.

Virectaria multiflora (Sm.) Bremek. (*Phyteumoides hirsutus* Smeathman ex DC.; *Virecta multiflora* Sm.)

Tropical Africa. Herb, erect, hairy, white or pink funnel-shaped flowers in dense terminal clusters

See *The Cyclopaedia*; or, universal dictionary of arts, ... 37: n. 4. 1817 and *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 21. 1952

(Raticide, an infusion mixed with the bait.)

Virola Aublet Myristicaceae

A native name for *Virola sebifera* Aublet, this tree is called *dayapa* and *virola* by the Galibis, French Guiana, see *Enchiridion Botanicum* 419. 1841, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 163, 165. 1897 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 766–784. 1938, *Fieldiana, Bot.* 24(4): 294–299. 1946, *Botanical Museum Leaflets*—Harvard University 22(6): 229–240. 1974, *Botanical Museum Leaflets*—Harvard University 28(3): 215–234. 1980.

Virola calophylla (Spruce) Warb. (*Myristica calophylla* Spruce; *Otoba incolor* H. Karst.; *Palala calophylla* (Spruce) Kuntze; *Virola calophylloidea* Markgr.; *Virola incolor* H. Karst. ex Warb.; *Virola lepidota* A.C. Sm.)

Venezuela. Trees, reddish bark resin

See *Journal of the Linnean Society, Botany* 5: 4. 1861, *Revisio Generum Plantarum* 2: 567. 1891, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 231–233. 1897 and *Brittonia* 2(2): 152–153. 1936

(Hallucinogenic narcotic snuff.)

Virola elongata (Benth.) Warb. (*Myristica cuspidata* Spruce ex Benth.; *Myristica cuspidata* var. *globifera* Spruce ex A. DC.; *Myristica cuspidata* var. *rufula* A. (Used in Ayurveda, Unani and Sidha. Anthelmintic, wound healing, anodyne, antiviral, larvicidal, bitter tonic, hepatoprotective, fungicide, antiandrogenic, expectorant, diaphoretic and diuretic, astringent, febrifuge, galactagogue, emmenagogue, antigestralgic. Magic, possession, squeeze into the eye a drop of the juice to expel an evil spirit.)

in English: common blue vitex, Indian privet, Indian wild pepper, seashore vites, shrub chaste tree, threeleaf chaste tree

in China: man ching, man jing, man jing zi

in India: asla, banj-angashte-abi, banj-angushteabi, begundia, bile-nekki, cara-nosi, caranosi, caranoochie, cepalikai, chin-duvaram, chiru vavili, chiruvaavili, chiruvavili, cirunocci, ciruvavili, erikuliran, hakrani, indrani, indranika, indrasur-asa, jalanirgundi, karanuchi, karinekki, karinocci, karinocchi, karinoochi, karnucci, karunocchi, karunocci, karunochi, kashanashini, kotiyankuni, kotiyankunni, krishnanirgundi, lagondi, lakki, lakkili, lakkli, leckee, lingur, lingura, maralu lakki, mewri, nalla-vavili, narcitti, neelavaavili, neelavayalie, neer ghunga, neer lakki, neer nochi, neer-nochie, neergundi, neerinochi, neerinochil, neerlakki, neeruvaavili, nekki, nekki nochi, nekinocci, nelavavili, nichinda, nilanirgundi, nilavavili, nili, nilika, nilivavili, nir-noch-chi, nir-nochi, nira-lakki-gida, nirgandi, nirgunda, nirgundi, nirkkunti, nirlakki, nirnocchi, nirnocci, nirnocccetti, nirnochchi, nirnochi, nirnoschi, niru-vavili, nirulakki, niruvavili, nishinda, nisinda, nocci, noccoli, nochali, nochchi, nochi, nochili, notchi, pani-ke-sanbhalu, pani-samalu, pani-ki-samhalu, pani-ki-sanbhalu, pani-ki-shambalu, paniki-shumbala, panikisanbhalu, panisamalu, panj-angushtaabi, que abi, sakkli, sambhalu, samudra lakki, saphed-samhalu, sawbhalu, sephalika, shiru-noch-chi, shiru-vavili, shirunoch-chi, shiruvavili, shuklaprishthaka, sindhuka, sindhukara, sindhuvar-uma, sindukara, sinduvara, sinduvarah, sirunocci, sirunochi, sufed-sanbhalu, sufedsanbhalu, surasa, surasa-vrikshaha, svetaushpa, svetasurasa, tellavavili, thellavaalli, ukkiram, ulokaveticii, urikshibi, vaavili chiruvaavili, valuru, vavili, vavili chettu, vellai-noch-chi, vennocci, veyala, visugandhaka, vrikshaha

in Indonesia: galumi, lagundi, legundi, segalu gundi

in Japan: hôgâgii, mitsu-ba-hama-gô

in Laos: kok pa pay, 'phi 'sua noy

in Malaysia: demundi, lagundi, legundi, lemuning, lenggundi, muning

in Papua New Guinea: pitipitikoto

in Philippines: lagunding-dagat, dangla, tigau

in Thailand: khon dinso, khon thiso, phee suea noi

in Tibetan: si ndu ba ra

in Vietnam: mac nim, man kinh, d[e]jn ba l[as], m[a]jn kinh, quan [aa]m

Vitis L. Vitaceae

The Latin name for the grapevine, Latin *vieo*, -es, -etum, -ere 'to bend, plait, weave', Akkadian *ebitu* 'to be tied, girt'; see Carl Linnaeus, *Species Plantarum*. 1: 117, 202–203. 1753, *Genera Plantarum*. Ed. 5. 95. 1754, *Familles des Plantes* 2: 408. 1763, Rafinesque, Constantine Samuel (1783–1840),

Medical flora; or, *Manual of the medical botany of the United States of North America*, Philadelphia: Atkinson & Alexander, 1828–1830, *Manual* (Gray), ed. 2. 78. 1856, *Annales Museum Botanicum Lugduno-Batavi* 1: 72. 1863, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5(2): 320, 322–324, 423. 1887 and *Flora of the Southeastern United States* 756, 1335. 1903, *Manual of Cultivated Trees and Shrubs* 601. 1927, *Fieldiana, Bot.* 24(6): 293–302. 1949, *Ann. Missouri Bot. Gard.* 55(2): 81–92. 1968, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne.* 2(2): 613, 616. Leo S. Olschki Editore, Firenze 1994, *J. Trop. Subtrop. Bot.*, 8(1): 3–4, 6–9. 2000.

Vitis cinnamomea Wall.

India. Climber, succulent red fruit

See *Flora Indica*; or descriptions of Indian Plants 2: 483. 1824

(For wounds, crush the leaves and apply as a poultice. Roots for edema; a roots decoction of *Labisia pumila* drunk as a postpartum remedy, and also eat the roots along with *Elephantopus scaber*.)

Malay names: akar sabunka, charek putri, daun pakan, gundak api

in Sarawak: akar engkarandak

Vitis diffusa Miq. (*Cissus diffusa* (Miq.) Amshoff; *Cissus diffusus* (Miq.) Amshoff)

Malay Peninsula.

See *Annales Museum Botanicum Lugduno-Batavi* 1: 83. 1863

(Leaves and roots for headache.)

Malay name: daun lakom

Vitis flexuosa Thunb. (*Vitis cavaleriei* H. Lév. & Vaniot; *Vitis flexuosa* Hort.; *Vitis flexuosa* fo. *parvifolia* (Roxb.) Planch.; *Vitis flexuosa* var. *chinensis* H.J. Veitch; *Vitis flexuosa* var. *parvifolia* (Roxb.) Gagnep.; *Vitis flexuosa* var. *wallichii* (DC.) F.S. Wang; *Vitis parvifolia* Roxb.; *Vitis purani* Buch.-Ham. ex D. Don; *Vitis vulpina* var. *parvifolia* (Roxb.) Regel; *Vitis wallichii* DC.; *Vitis wallichii* Kurz)

India, Himalaya.

See *Transactions of the Linnean Society of London* 2: 103, 332. 1794, *Hortus Bengalensis*, or a catalogue ... 18. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 634. 1824, *Flora Indica*; or descriptions of Indian Plants 2: 475–476. 1824, *Prodr. Fl. Nepal.* 188. 1825, *Fl. Ind.*, ed. Carey, 1: 662. 1832, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 41(4): 302. 1872, *Gard. Chron.* (1882) II. 491. 1882, *Monographiae Phanerogamarum* 5: 348. 1887 and *Journal of the Horticultural Society of London* 28: 393, f. 107. 1904, *Bulletin de la Société d'Agriculture, Sciences et Arts de la Sarthe* 40: 36. 1905, *Plantae Wilsonianae* 1(1): 103. 1911,

Bull. Fruit Tree Res. Stn. E. 4: 1–6. 1982, *Journal of Tropical and Subtropical Botany* 8(1): 5. 2000

(Leaves astringent, used in diarrhea; unripe fruit juice for sore throat.)

in China: chang chun teng, chien sui lei, ge lei pu tao, ge lei zhi

in Japan: sankaku-tsuru

Vitis hastata (Miq.) Miq. (*Cissus hastata* Miq.)

India, China, Himalaya.

See *Species Plantarum* 1: 117, 202–203. 1753

(For stomachache apply as a poultice; for boils pound and apply as a poultice to boils before they ripen.)

Malay names: asam riang, riang riang

Vitis heyneana Roem. & Schult. subsp. *heyneana* (*Vitis ficifolia* Bunge var. *pentagona* Pamp.; *Vitis kelungensis* Momiy.; *Vitis lanata* Wight & Arn.; *Vitis lanata* Roxb.; *Vitis pentagona* Diels & Gilg; *Vitis pentagona* var. *honanensis* Rehder; *Vitis quinquangularis* Rehder; *Vitis thunbergii* Siebold & Zucc. var. *yunnanensis* Planch. ex Franch.)

India, China. Leaves as fodder

See *Hortus Bengalensis*, or a catalogue ... 18. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 474. 1824, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 131. 1834, *Bulletin de la Société Botanique de France* 33: 457. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 460–461. 1900, *Nuovo Giornale Botanico Italiano*, new series 17(3): 427–428. 1910, *Gentes Herbarum*; occasional papers on the kind of plants 1: 36. 1920, *Journal of Japanese Botany* 11(7): 527–528. 1935, *Journal of the Arnold Arboretum* 26: 480. 1944

(Stem juice dropped into eyes for sores. Veterinary medicine, juice from the stem to cure eye problems in livestock.)

in China: mao pu tao

in India: patand luar, sohmanjuren

in Japan: kelung-budo

Vitis lanceolaria (Roxb.) Wall. (*Cissus lanceolaria* Roxb.; *Tetrastigma lanceolarium* (Roxb.) Planch.)

India. Large evergreen woody climbing shrubs, simple tendrils, pale yellow flowers in axillary cymes, globose berries, see also *Tetrastigma lanceolarium*

See *Species Plantarum* 1: 117, 202–203. 1753, *Hort. Bengal.* 11. 1814, *Flora Indica*; or descriptions of Indian Plants 1: 430. 1820, *A Numerical List of Dried Specimens* 206: 6013. 1832, *Monographiae Phanerogamarum* 5: 423. 1887

(Poultice of leaves applied to boils and to the body for ague.)

in India: tinfuk

Vitis lawsonii King

India.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 64: 394–395. 1896

(For fever in infants leaves as a poultice in the neighbourhood of the spleen. For boils heat the leaf and apply warm.)

Malay names: akar noh keroh, akar noh papan

Vitis novemfolia Wall.

Singapore.

(Febrifuge, leaves decoction, a bath; for skin complaints leaves as a poultice.)

Malay names: akar kum papan, asam papan, kepayang

Vitis obtecta Wall. ex M.A. Lawson (*Tetrastigma obtectum* (Wall. ex M.A. Lawson) Planch. ex Franch.; *Vitis obtecta* Wall.)

India, Himalaya.

See *Numer. List* [Wallich] n. 6026. 1831–1832, *The Flora of British India* 1(3): 657. 1875, *Monographiae Phanerogamarum* 5: 434. 1887

(Plant juice used as eye ointment.)

in China: ya pa teng

in India: omoketi-naa

Vitis papillosa (Blume) Backer (*Cissus papillosa* Blume)

SE Asia.

See *Species Plantarum* 1: 117, 202–203. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 183. 1825 and *Schoolflora voor Java* 252. 1911

(Poulticed.)

Vitis vinifera L. (*Cissus vinifera* (L.) Kuntze; *Cissus vinifera* Kuntze; *Vitis vinifera* Marshall)

Europe. Deciduous woody climber, greenish white flowers, fruits edible

See *Species Plantarum* 1: 117, 202–203, 293. 1753, *Arbust. Amer.* 166. 1785, *Um die Erde* 501. 1881 and *Fl. Libya* 83: 2. 1980, *Cytologia* 50: 83–88. 1985, *Listados Florísticos de México* 4: i–v, 1–246. 1986, *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, *Journal of the Japanese Society for Horticultural Science* 62: 249–255. 1993, *AAU Reports* 34: 1–443. 1994

(Used in Ayurveda. Leaves and tendrils chewed to relieve toothache. Mustard oil spread on the leaf, mildly warmed and applied for boils. Stem mixed with *Solanum nigrum* and *Cestrum parqui* and applied to treat inflammation.)

in English: common grape vine, cultivated grape, European grape, grape, grapes, wine grape

in Chile: parra, parron, vida, viña

in Mexico: bicholi yaha castilla

in China: pu tao

in India: anab, angur, angura, angurphal, dachh, dakh, dakha, darakh, drakh, draksha, draksha-pondu, drakshai, drakshi, drakshya, drakya, drakhyaluta, dush, gostani, gostanidraksha, gostoni, gun, kismis, kishmish, manakka, mridirka, mudraka, mundiri, onguro, sougi

in Japan: budô

in Arabic, anba, dalia, anab

Vitis vulpina L. (*Vitis cordifolia* Roth ex Roem. & Schult.; *Vitis cordifolia* Darl. & Guss.; *Vitis cordifolia* Lam.; *Vitis cordifolia* Michx.; *Vitis cordifolia* Michx. var. *foetida* Engelm.; *Vitis cordifolia* Michx. var. *sempervirens* Munson; *Vitis cordifolia* Michx. var. *vulpina* (L.) Eaton; *Vitis illex* L.H. Bailey; *Vitis muscadina* Raf.; *Vitis vinifera* var. *vulpina* Kuntze; *Vitis vinifera* var. *vulpina* (L.) Kuntze; *Vitis vulpina* Jacq.; *Vitis vulpina* Muhl.; *Vitis vulpina* Bartram ex le Conte)

North America. Perennial vine

See *Species Plantarum* 1: 203. 1753, *Fl. Bor.-Amer.* (Michaux) 2: 231. 1803, *Pl. Rar. Hort. Schoenbr.* 4: 13, t. 425. 1804, *Manual of Botany of the Northern States*. Second Edition. 497. 1818, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 5: 318. 1819, *Amer. Man. Grape Vine*. 16–17. 1830, *Medical Flora* 2: 132–133. 1830, *Revisio Generum Plantarum* 1: 132. 1891, *Rev. Vitic.* 5: 165. 1896 and *Found. Amer. Grape Cult.* 74, pl. 25. 1909, *Gentes Herb.* 3: 217. 1934

(Twigs infusion used by children as antidote for poisoning. Roots infusion taken for diabetes.)

in English: chicken grape, frost grape

Vittaria Smith Vittariaceae (Adiantaceae, Pteridaceae)

Latin *vitta*, *ae* (*vieo*, *-es*, *-etum*, *-ere* ‘to bend, twist together’; Akkadian *ebet*, *ebitu*, *ebiu* ‘to be tied, girt’) ‘a band, fillet, ribbon’, linear fronds with linear sori, see *Mémoires de l’Académie Royale des Sciences* 5: 413, 421, pl. 9, f. 5. 1793, *Enumeratio Filicum* 197, 282. 1824, *Tentamen Pteridographiae* 141, pl. 5, f. 21. 1836, *Genera Filicum* t. 76B. 1841, *Filicum Species* 140. 1841, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 67. 1842, *Bot. Zeitung* (Berlin) 12: 545. 1854 and *Pittonia* 4(22): 105–106. 1900, *Contributions from the United States National Herbarium* 10: 487. 1908, *Bull. Torrey Bot. Club* 38: 166. 1911, *Sunyatsenia* 5(4): 210, 232. 1940, *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Phytoecologica Sinica* 16(3): 11. 1978, *Fl. Veracruz* 69: 1–96. 1992, *Syst. Bot.* 22(3): 514. 1998 [1997 publ. 1998].

Vittaria graminifolia Kaulf. (*Vittaria dimorpha* Müll. Berol.; *Vittaria filifolia* Fée; *Vittaria flavicosta* Mickel & Beitel)

Guatemala, Mexico. Epiphytic fern

See *Enumeratio Filicum* 192. 1824, *Mémoires sur les Familles des Fougères* 3: 20, t. 3, f. 6. 1851, *Botanische Zeitung. Berlin* 12: 547, pl. 13, f. 3. 1854 and *Rhodora* 66: 114. 1964, *Pterid. Fl. Oaxaca (Mem. New York Bot. Gard.)* 46: 399. 1988

(Stomachic, fronds infusion drunk to treat colic.)

Vittaria guineensis Desv. (*Haplopteris elongata* (Sw.) E.H. Crane; *Haplopteris guineensis* (Desv.) E.H. Crane; *Oetosis lineata* (L.) Greene; *Pteris guineensis* (Desv.) Desv.; *Pteris lineata* L.; *Taeniopsis lineata* (L.) J. Sm.; *Vittaria deppeana* Müll. Berol.; *Vittaria elongata* Sw.; *Vittaria lineata* (L.) Sm.; *Vittaria lineata* (L.) Sw.; *Vittaria lineata* var. *guineensis* Desv.)

Nigeria. Epiphyte, fern

See *Species Plantarum* 2: 1073. 1753, *Journal für die Botanik* 1800: 72. 1801, *Synopsis Filicum* 109, 302. 1806, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 325. 1811, *Mémoires de la Société Linnéenne de Paris* 6: 293. 1827 and *Systematic Botany* 22(3): 514. 1997

(Roots and leaves for headache.)

Vittaria microlepis Hieron.

Sri Lanka. Epiphytic herbs

See *Hedwigia* 57. 202. 1915

(An ointment from the dried rhizome antiinflammatory, applied over legs to ward off leeches.)

in India: thiriyapatta

Voacanga Thouars Apocynaceae

From the vernacular Madagascan name, see *Genera Nova Madagascariensia* 10. 1806, *Bijdragen tot de flora van Nederlandsch Indië* 1026. 1826, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 135. 1841, *Flora* 24: 670. 1841, *Genera Plantarum Suppl.* 2: 56. 1842, *Flora van Nederlandsch Indië* 2: 417. 1857.

Voacanga africana Stapf ex Scott-Elliot (*Voacanga africana* var. *glabra* (K. Schum.) Pichon; *Voacanga angolensis* Stapf ex Hiern; *Voacanga angustifolia* K. Schum.; *Voacanga bequaertii* De Wild.; *Voacanga boehmii* K. Schum.; *Voacanga eketensis* Wernham; *Voacanga glaberrima* Wernham; *Voacanga glabra* K. Schum.; *Voacanga klainii* Pierre ex Stapf; *Voacanga klainii* Pierre ex Stapf; *Voacanga lemosii* Philipson; *Voacanga lutescens* Stapf; *Voacanga magnifolia* Wernham; *Voacanga puberula* K. Schum.; *Voacanga schweinfurthii* Stapf; *Voacanga schweinfurthii* var. *puberula*

(K. Schum.) Pichon; *Voacanga spectabilis* Stapf; *Voacanga talbotii* Wernham)

Trop. Africa. Small tree or shrub, spreading, latex white, dark green glossy leaves opposite obovate acuminate, flowers in axillary or terminal loosely branched glabrous inflorescence, corollas yellowish white, sepals spreading, fleshy fruits dark green mottled with white, latex used for trapping birds, in open meadows

See *Genera Nova Madagascariensia* 10. 1806, *Journal of the Linnean Society, Botany* 30(206): 87–88. 1894 [1893–1895 publ. 1894], *Die Natürlichen Pflanzenfamilien* 4(2): 149. 1895, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 668. 1898 and *Fl. Trop. Afr.* 4(1): 155–157. 1902, British Museum, Natural History. *Catalogue of the plants collected by Mr. & Mrs. P.A. Talbot in the Oban district South Nigeria ...* 62–63. 1913, *Journal of Botany, British and Foreign* 52: 25. 1914, *Pl. Bequaert.* 1: 402. 1922, *Cat. Vasc. Pl. S. Tome* 241. 1944, *Bull. Mus. Natl. Hist. Nat.*, II, 19: 410. 1948, *Taxon* 26: 257–274. 1977, *Genetica* 68: 3–35. 1985

(Stem bark and root diuretic, tonic, a decoction used in the treatment of mental disorders. Magic, rituals.)

in Congo: lima

in Nigeria: ako dodo (Yoruba); pete-pete (Igbo)

in Yoruba: ako dodo, ajik(un)efun, dodo nla, farajoyan

in China: fei zhou ma ling guo

Voacanga globosa (Blanco) Merr. (*Tabernaemontana globosa* Blanco; *Tabernaemontana globosa* Naves ex F. Villar; *Voacanga cumingiana* Rolfe; *Voacanga dolichocalyx* Quisumb. & Merr.; *Voacanga globosa* Merr.; *Voacanga latifolia* Quisumb. & Merr.)

Philippines.

See *Flora de Filipinas* [F.M. Blanco] 116. 1837, *J. Linn. Soc., Bot.* 21: 313. 1884 [1886 publ. 1884], *Hist. Pl.* (Baillon) 10: 171. 1889 and *Philippine Journal of Science*, C 4: 319. 1909, *Philipp. J. Sci.* 37: 192–193. 1928

(Pounded fruits used to stupefy eels.)

Vochysia Aublet Vochysiaceae

From the native name in Tropical America, see *Histoire des plantes de la Guiane Française* 1: 18, pl. 6. 1775, *Encycl.* (Lamarck) 8: 681. 1808, *Mémoires du Muséum d'Histoire Naturelle* 6: 265. 1820 and *Fieldiana, Bot.* 24(6): 2–5. 1949.

Vochysia laxiflora Stafleu

South America.

See *Acta Botanica Neerlandica* 3: 407, fig. 2c-d. 1954

(Leaves boiled with the leaves of coca to prepare an infusion taken for painful or difficult urination.)

Volkameria L. Lamiaceae (Labiatae, Verbenaceae)

Probably dedicated to the German botanist Johann Georg Volckamer or Volcamer, the Younger (Joannes Georgius Volcamerus, filius), 1662–1744, author of *Flora Noribergensis*. Noribergae 1700, *Dissertatio ... de lethargo*. Altdorffii [1684], *Epistola de Stomacho*. Altdorii [sic] Noricorum 1682 and *Opobalsami orientalis in Theriaces confectionem Romae revocati examen*, etc. Norimbergae 1644; see Antonio Colmenero de Ledesma, *Chocolata Inda*. Opusculum de qualitate & natura chocolatae ... in Latinum traslatum. Norimbergae 1644, Marcus Aurelius Severinus (Marco Aurelio Severino) (1580–1656), *Zootomia Democritaeae id est Anatome generalis totius animantium opificii*. Noribergae 1645, Carl Linnaeus, *Species Plantarum*. 2: 637. 1753, *Genera Plantarum*. Ed. 5. 284. 1754 and Gilbert Westacott Reynolds (1895–1967), *The Aloes of South Africa*. 79–80. Balkema, Rotterdam 1982, Blanche Henrey, *No Ordinary Gardener—Thomas Knowlton, 1691–1781*. Edited by A.O. Chater. British Museum (Natural History). London 1986, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 284–285. Palermo 1988.

Volkameria aculeata L. (*Clerodendrum aculeatum* (L.) Griseb.; *Clerodendrum aculeatum* (L.) Schldtl.; *Clerodendrum aculeatum* f. *acutifolium* Kereszty; *Clerodendrum aculeatum* f. *lanceolatum* Kereszty; *Clerodendrum aculeatum* f. *mucronatum* Kereszty; *Clerodendrum aculeatum* f. *orientale* Kereszty; *Clerodendrum aculeatum* f. *rotundatum* Kereszty; *Clerodendrum aculeatum* var. *gracile* Griseb. ex Moldenke; *Clerodendrum aculeatum* var. *grandifolium* Kuntze; *Clerodendrum aculeatum* var. *parvifolium* Kuntze; *Clerodendrum angustifolium* (Poir.) Spreng., nom. illeg.; *Clerodendrum duckei* Moldenke; *Clerodendrum ternifolium* Kunth; *Clerodendrum ternifolium* var. *mexiae* Moldenke; *Clerodendrum ternifolium* var. *serratifolium* Moldenke; *Clerodendrum ternifolium* var. *velutinosum* Moldenke; *Ovieda aculeata* (L.) Hitchc.; *Ovieda aculeata* (L.) Baill., nom. illeg.; *Volkameria angustifolia* Poir.)

West Indies, Tropical America.

See *Species Plantarum* 2: 637. 1753, *Encycl.* 8: 688. 1808, *Nov. Gen. Sp.* 2: 244. 1818, *Syst. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Clerodendrum aculeatum*.], *Taxon* 59(1): 125–133. 2010

(Roots made into a paste and taken to cure intestinal disorders, stomachache, flatulence.)

in India: modathe

Volutarella Cass. Asteraceae

See *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 44: 36. 1826.

Volutarella ramosa (Roxb.) Santapau (*Volutarella ramosa* (Roxb.) Kitam.)

India.

See *Pl. Saurashtra* 22. 1953, *Pl. W. Pakist. & Afghan.* (Res. Kyoto Univ. Sci. Exped. Karak. & Hinduk. 1955, iii.) 159. 1964 (Plant tonic, aperient, deobstruent, febrifuge, used in cough.)

in India: badaward

Vossia Wallich & Griffith Poaceae

For the German poet Johann Heinrich Voss, 1751–1826, remembered chiefly for his translations of Homer, or the Dutch Gerhard Johann Voss (Vossius) (1577–1649), Dutch Humanist theologian, one of the foremost scholars of the Dutch Republic's "Golden Age" and father of the distinguished classical scholar Isaac Vossius (1618–1689); see *Species Plantarum* 2: 1049. 1753, *Familles des Plantes* 2: 243. 1763, *Journal of the Asiatic Society of Bengal* 5: 572. 1836 and *African Studies Monographs* 3: 109–130. 1983, *Genera Graminum* 363. 1986, Frans A. Stafleu and Richard S. Cowan, *Taxonomic Literature*. 6: 784. [genus named for the German poet J.G. Voss] 1986, W.P.U. Jackson, *Origins and Meanings of Names of South African Plant Genera*. 37. [genus named for the Belgian botanist L. Voss, 17th cent.] Rondebosch 1990, *African Journal of Ecology* 37(4): 457–470. Dec 1999, *Conservation Biology* 17(2): 500–511. Apr 2003, *Journal of Fish Biology* 63(1): 120–128. Jul 2003, *Journal of Biogeography* 31(1): 5–18. Jan 2004, *Ecology of Freshwater Fish* 13(1): 37–45. Mar 2004, *African Journal of Ecology* 42(s1): 6–13, 108–113. Aug 2004.

Vossia cuspidata (Roxb.) Griffith (*Ischaemum cuspidatum* Roxb.; *Vossia procera* Wall. & Griff.)

Tropical Africa, India. Perennial, aquatic, herbaceous, robust, submerged or sometimes floating, stout, erect, rhizomatous, rooting at submerged nodes, trailing, noxious weed, grazed by cattle and buffaloes, food for elephants and hippopotamus, pith eaten by chimpanzees

See *Hortus Bengalensis, or a catalogue ...* 81. 1814, *Flora Indica; or descriptions ...* 1: 325. 1820, William Griffith (1810–1845), *Notulae ad Plantas Asiaticas* 12. Calcutta 1851 and *Bulletin de la Société Botanique de France* 108: 5. 1961

(Leaf sheaths sometimes with irritant hairs. Medicinal salt.)

in English: floating grass, hippo-grass

in Congo: n'sekeseke, osekeseke

in Mali: temboro

in Nigeria: barugu, burugu, damba, daura, falfoli, lambami, lingurehu, lonyo, milla, tattakya, tsamba

in Senegal: hay

in South Africa: um-soof reed

in Tanzania: luvoya

in Upper Volta: barugu, burgu, burugu

Vulpia C.C. Gmelin Poaceae (Gramineae)

According to Helmut Genast (see *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 691. 1996) the genus was named after the German chemist Johann Samuel Vulpius, 1760–1840 (or 1846), pharmacist and amateur botanist of Baden, Germany; or from the Latin *vulpes*, is ‘a fox’, indicating the appearance of the plants; the weedy annual species once included in *Festuca* L., hybrids with *Festuca*, type *Vulpia myuros* (L.) C.C. Gmelin, see *Species Plantarum* 1: 73. 1753, *Species Plantarum. Editio quarta* 1(1): 419. 1797, *Flora Badensis Alsatica* 1: 8. 1805, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 92. 1821, *Neogenyton* 4. 1825, *Genera Plantarum* 101. 1836, *Compendium Florae Germaniae. Editio altera* 1: 193. 1836, *Linnaea* 17(4): 398. 1844, *Index Sem. Hort. Genuensis* 26. 1847, *Flore du Département des Hautes-Pyrénées* 67, 91. 1867, *Die Natürlichen Pflanzenfamilien* 2(2): 75. 1887 and *Contr. U.S. Natl. Vulpia fasciculata (Forssk.) Fritsch (*Bromus hordeiformis* Lam.; *Festuca fasciculata* Forssk.; *Festuca uniglumis* Sol.; *Festuca uniglumis* Aiton; *Festuca uniglumis* Aiton var. *uniglumis*; *Vulpia fasciculata* (Forssk.) Samp.; *Vulpia membranacea* auct., non (L.) Dumort.; *Vulpia membranacea* subsp.

fasciculata (Forssk.) O. Bolòs, Masalles & Vigo; *Vulpia uniglumis* (Sol.) Dumort.; *Vulpia uniglumis* (Aiton) Dumort.)

Mediterranean, Europe. Annual, vigorous, coarse, unbranched, solitary or loosely tufted, erect or geniculate or decumbent, auricles absent, ligule membranous and erose, leaves setaceous, plants bisexual, inflorescence racemose or paniculate, usually chasmogamous spikelets, distal florets sterile, long-awned upper glume, female lemmas awned, callus pointed, anthers yellow, fruit laterally compressed and longitudinally furrowed, cultivated, weed, grows on coastal sand dunes, gardens, open habitats, coastal grasslands, in disturbed areas, in sandy soils, weedy disturbed places, sandy shores, dry areas, this species often confused with *Vulpia membranacea* (L.) Dumort.

See *Flora Aegyptiaco-Arabica* 22. 1775, *Hortus Kewensis; or, a catalogue ...* 108. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 195. 1791, *Agrost. Belg.* 100. 1824 and *Excursionsfl. Oesterreich* ed. 2, 74. 1909, Gonçalo António da Silva Ferreira Sampaio (1865–1937), *Lista das espécies representadas no Herbário português ...* Porto [1913], *Excursionsflora für Österreich*, ed. 3, 674. 1922, *Bull. Jard. Bot. Belg.* 47: 131. 1977, *Watsonia* 15: 38–39. 1984, *Collect. Bot.* 17(1): 96. 1987[1988]

(The small seeds can cause injury to animals, the mature seed heads are dangerous for lambs.)

in English: dune fescue

Vulpia myuros (L.) C.C. Gmelin (*Avena muralis* Salisb.; *Distomomischus myuros* (L.) Dulac; *Festuca myuros* L.; *Festuca myuros* Muhl.; *Festuca megalura* Nutt.; *Festuca megalura* Nutt. var. *hirsuta* (Hack.) Asch. & Graebn.; *Festuca monandra* Elliott; *Festuca muralis* Kunth; *Festuca myuros* Muhl., nom. illeg., non *Festuca myuros* L.; *Festuca myuros* var. *muralis* Kunth ex Speg.; *Festuca pseudomyuros* Soy.-Will.; *Vulpia megalura* (Nutt.) Rydb.; *Vulpia muralis* (Kunth) Nees; *Vulpia myuros* (L.) C.C. Gmel. subsp. *myuros* var. *pseudomyuros* (Soy.-Will.) Fiori; *Vulpia myuros* (L.) C.C. Gmel. subsp. *pseudomyuros* (Soy.-Will.) Maire & Weiller; *Vulpia myuros* (L.) C.C. Gmel. var. *hirsuta* Hack.; *Vulpia pseudomyuros* (Soy.-Will.) Rchb.; *Zerna myuros* Panz. ex B.D. Jacks.)

Europe, Mediterranean, Eurasia, Africa. Annual, low-growing, glabrous or scabrous, densely or loosely tufted or solitary, densely fascicled, slender culms erect or geniculate at the base, auricles absent, ligule membranous and smooth, sheaths glabrous, leaf blades setaceous and filiform, inflorescence partially enclosed in uppermost leaf sheath, raceme or a linear erect panicle curved or nodding at maturity, cleistogamous spikelets in the leaf sheath, spikelets with 3–7 female florets, glumes setaceous, lower glume scale-like, upper glume acute, lemmas glabrous and awned, palea hyaline to membranous, anthers yellow or purple, compressed fruit grooved or furrowed, naturalized elsewhere, shade species, useful for erosion control and revegetation of disturbed areas, open fields, weed of lawns and roadsides, roadside embankment, disturbed areas, waste places, dry fields, dry

sand, moist sand, wet sand of stream, arid areas, fine sandy loam, in dry rocky or sandy habitats, damp bare soil, banks in sandy soil, along streams, moist gravel

See *Species Plantarum* 1: 74–75. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 22. Londini [London] (Nov.-Dec.) 1796, *Flora Badensis Alsatica* 1: 8. 1805, *A Sketch of the Botany of South-Carolina and Georgia* 1: 170. 1816, *Descriptio uberior Graminum* 160. 1817, *Synopsis Plantarum* 1: 218. 1822, *Linnaea* 19(6): 694. 1847, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Index Kewensis* 2: 1249. 1865, *Flore du Département des Hautes-Pyrénées* 91. 1867, *Contribucion al estudio de la flora de la Sierra ...* 74. 1896 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Acta Horti Gothoburgensis* 9: 161. 1934, *Grasses of Burma ...* 564. 1960, *Acta*

Botanica Academiae Scientiarum Hungaricae 17(1–2): 117. 1971[1972], *Madroño* 22: 217–230. 1974, *Watsonia* 11(1): 72–73. 1976, *Bulletin du Jardin Botanique National de Belgique* 47(1–2): 117–137. 1977, *Bot. Rice, “The mark of Zorro: effects of the exotic annual grass *Vulpia myuros* on California native perennial grasses.” *Restoration Ecology* 8(1): 10–17. Mar 2000

(Has been found to act as a host for the nematode that causes annual ryegrass toxicity in livestock.)

in English: rat’s tail fescue, rat-tail fescue, rattail fescue, vulpia hair grass, six weeks fescue, silver grass, annual fescue, foptail fescue

in South Africa: langbaardswenkgras, wildegars

W

Wahlenbergia Schrader ex Roth Campanulaceae

For the Swedish botanist Georg (Göran) Wahlenberg, 1780–1851 (d. Uppsala), plant geographer, physician, traveler, naturalist, professor of botany and medicine (succeeding C.P. Thunberg 1828–1829) at Uppsala; see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, Thorgny Ossian Bolivar Napoleon Krok (1834–1921), *Bibliotheca botanica suecana*. 741–745. Stockholm, Uppsala 1925, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 619. 1965, Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 423. Boston, Mass. 1972, *Symb. Bot. Upsal.* 21(1): 1–223. 1975, *Fl. Madagasc.* 187: 1–25. 1978, *Ogasawara Res.* 4: 1–24. 1981, Gunnar Eriksson, in *D.S.B.* 14: 116–117. 1981, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 285. Regione Siciliana, Palermo 1988, *New Zealand J. Bot.* 33: 489–496. 1995.

Wahlenbergia marginata (Thunb.) A. DC. (*Campanula agrestis* Wall.; *Campanula dehiscens* Roxb., nom. nud.; *Campanula gracilis* (Forster f.) A. DC.; *Campanula lavandulifolia* Reinw. ex Blume; *Campanula marginata* Thunb.; *Campanula quadrifida* R. Br.; *Wahlenbergia agrestis* A. DC.; *Wahlenbergia dehiscens* A. DC.; *Wahlenbergia gracilis* (G. Forst.) A. DC.; *Wahlenbergia indica* A. DC.; *Wahlenbergia lavandulifolia* A. DC.; *Wahlenbergia marginata* A. DC.; *Wahlenbergia quadrifida* (R. Br.) A. DC.; *Wahlenbergia sieberi* A. DC.; *Wahlenbergia trichogyne* Stearn)

India, East Asia. Perennial herb, hairy, thin stems, upper leaves reduced to linear bracts, small blue flowers

See *Flora Japonica*, ... 89. 1784, *Hortus Bengalensis*, or a catalogue ... 85. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 97–98. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 13: 726. 1825, *Monographie des Campanulées* 143–146. 1830, *Flora van Nederlandsch Indië* 2: 567. 1857 and *Phytochemistry* 45(2): 411–415. 1997, *Phytochemistry* 48(7): 1245–1250. 1998

(Antibacterial, roots in pulmonary infections, for skin diseases. Crushed plants in skin troubles.)

in English: Australian bluebell, gentian rock-bell, Southern rockbell, sprawling bluebell

Waldheimia Karelin & Kirilov Asteraceae

After the German palaeobiologist (Johann) Gotthelf (Friedrich) Fischer von Waldheim, 1771–1853, entomologist,

in 1805 founder of the Société Impériale des Naturalistes de Moscou, his works include *Spicilegium entomographiae Rossicae*. [Moscow 1844], *Oryctographie du Gouvernement de Moscou*. Moscou 1837, *Entomographia Imperii Russici*. Mosquae 1820–1828 and *Bibliographia Palaeontologica animalium systematica*. Mosquae 1834. See *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 125–126. 1842 and Günther Schmid, *Chamisso als Naturforscher*. Eine Bibliographie. Leipzig 1942, *Flora URSS* 26: 267. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 544. 1965, Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 126. Boston, Mass. 1972, F.A. Stafleu and Richard S. Cowan, *Taxonomic literature*. 1: 840. 1976.

Waldheimia glabra (Decne.) Regel (*Allardia glabra* Decne.; *Waldheimia tridactylites* subsp. *glabra* (Decne.) Podl.)

India. Perennial herb, loosely tufted, aromatic, mat-forming, purple flower-heads

See *Voyage dans l'Inde* 4(Bot.): 87, t. 96. 1841–1844 and *Mitteilungen der Botanischen Staatssammlung München* 13: 497. 1977

(Whole plant paste applied against septic wounds. Ceremonial, *dhoop* for worship, flowers and leaves used in religious ceremonies.)

in India: mendok chukar, palu, pullunakpu, solomarp

Waldheimia stoliczkae (C.B. Clarke) Ostenf. (*Allardia stoliczkae* C.B. Clarke; *Waldheimia korolkowii* Regel & Schmalh.; *Waldheimia stoliczkai* Ostenf.)

India, Himalaya.

See *Compositae Indicae* 145. 1876, *Trudy Imp. S.-Peterburgsk. Bot. Sada* vi. (1879) 308, 310. 1879 and *Southern Tibet, Botany* 6(3): 38. 1922

(Young floral buds ground with young twigs of *Polygonum plebeium*, the paste mixed with curd and given for dysentery.)

in India: gyari chensa

Waldheimia tomentosa (Decne.) Regel (*Allardia tomentosa* Decne.; *Waldheimia tomentosa* Regel)

India, Himalaya. Loosely tufted aromatic perennial herb, whitish-pink flower-heads

See Jacquemont, Victor (1801–1832), *Voyage dans l'Inde* 4(Bot.): 87, t. 95. Paris: Firmin Didot freres, 1841–1844 [Added title: *Plantae rariores*, quas in India orientali collegit

Victor Jacquemont.], *Trudy Imp. S.-Peterburgsk. Bot. Sada* vi. (1879) 308, 310. 1879

(Leaves paste applied in rheumatism; paste of leaves and flowers applied externally against sprains, rheumatism and wounds; leaves decoction used for sprains and rheumatism. Veterinary medicine, dried plant burnt, the smoke as insect repellent for sheep and goats. Ceremonial, *dhoop* for worship, flowers and leaves used in religious ceremonies.)

in India: chhamai, lukmikpa, makungla

Wallichia Roxburgh Arecaceae (Palmae)

For the Danish (b. Copenhagen) physician Nathaniel Wallich (originally Nathan Wulff or Wolff), 1786–1854 (d. London), botanist and botanical collector, 1815–1846 Superintendent of the Calcutta Botanic Garden (his predecessor W. Roxburgh), 1818 Fellow of the Linnean Society, 1829 Fellow of the Royal Society; see *Plants of the Coast of Coromandel* 3: 91. 1820 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 454. 1965, Theodore W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 425. Boston, Mass. 1972, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 369–370. 1981, Daniel Merriman, in *D.S.B.* 14: 145–146. 1981.

Wallichia densiflora Mart. (*Harina densiflora* (Mart.) Walp.; *Harina oblongifolia* (Griff.) Griff.; *Wallichia oblongifolia* Griff.)

India.

See *Historia Naturalis Palmarum* 3: 189. 1823, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 5: 486. 1845, *Palms of British East India* 175. 1850, *Annales Botanices Systematicae* 3: 1032. 1853

(Soft tender shoots and pith of the leaf-base eaten raw for cough, cold and fever.)

in India: taleh

Wallichia disticha T. Anderson (*Didymosperma distichum* (T. Anderson) Hook.f.; *Wallichia yomae* Kurz)

Himalaya, India, China.

See *Pl. Coromandel* 3: 91. 1820, *J. Linn. Soc., Bot.* 11: 6–7. 1869 [1871 publ. 1869], *Forest Fl. British Burma* 2: 533. 1877, *Rep. Progr. Condition Roy. Bot. Gard. Kew* 1882: 61. 1884 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970

(The berries and perhaps the leaves of this species have irritant properties.)

in English: distichous fishtail palm, foxtail palm, Wallich palm

in Brazil: palmeira rabo de peixe

Wallichia nana Griff. (*Arenga nana* (Griff.) H.E. Moore; *Blancoa nana* (Griff.) Kuntze; *Didymosperma nanum* (Griff.) H. Wendl. & Drude; *Harina nana* (Griff.) Griff.)

India.

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 5: 488. 1845, *Palms of British East India* 176. 1850, *Les Palmiers* 243. 1878, *Genera Plantarum* 3: 917. 1883, *Revisio Generum Plantarum* 2: 727. 1891 and *Principes* 4: 114. 1960, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2005 [as *Arenga nana*.]

(Veterinary medicine, young shoots ground and applied to diseases of hooves of cows, buffaloes.)

in India: tialong

Walsura Roxb. Meliaceae

A Telugu name for *Walsura trifolia* (A. Juss.) Harms (*Walsura trifoliolata* (A. Juss.) Harms), see *Flora Indica*; or, descriptions of Indian Plants 2: 386. 1832 and *Nat. Pflanzenfam.* ed. 2. 19b(1): 118. 1940.

Walsura piscidia Roxb.

India.

See *Flora Indica*; or, descriptions of Indian Plants 2: 386. 1832

(Bark, fruit pulp, fish poison.)

Malay name: ikan tuba

Walsura robusta Roxb.

Thailand. Treelet, bark with corky warts, leaves imparipinnate, papery leaflets, white flowers in panicles

See *Fl. Ind.* 2: 386. 1824, *Flora Indica*; or, descriptions of Indian Plants 2: 386. 1832, *Hortus Bengalensis*, or a catalogue ... 32. 1814, *FBI* 1: 565. 1875 and Supayang Voravuthikunchai et al., "Effective medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7." *Journal of Ethnopharmacology* 94(1): 49–54. 2004, *Songklanakarinn Journal of Science and Technology* 27, Suppl. 2: 525–534. 2005, *Journal of Food Protection* 69(10): 2336–2341. 2006

(Fresh or dry bark chewed as masticatory. Antibacterial, antimicrobial, bactericidal, astringent, traditional remedy for treating diarrhea.)

in China: ge she shu

in India: arkeng-alau, arpi-haue-wai, theng-rali

Walsura trifoliolata (A. Juss.) Harms (*Heynea trifoliolata* A. Juss.; *Walsura trifolia* (A. Juss.) Harms; *Walsura trifoliata* (A. Juss.) Harms)

India.

See *Botanical Magazine* 41: pl. 1738. 1815, *Bull. Sci. Nat. Geol.* 23: 238. 1830 and *Nat. Pflanzenfam.*, ed. 2 [Engler & Prantl] 19(b1): 119. 1940, *Flora of Hassan District, Karnataka, India* 396. New Delhi: Amerind Pub. Co., 1978 [editors, Cecil J. Saldanha, Dan H. Nicolson; with contributions by T.P. Ramamoorthy ... et al.], Nair, N. Chandrasekharan (1927–), *Flora of Tamil Nadu, India: Analysis*. Coimbatore: Botanical Survey of India, Dept. of Environment, c1983–1989, Matthew, Koyapillil Mathai (1930–2004), *Fl. of Tamilnadu Carnatic* ser. 3, 1: 242. South America, Peru. Tree

See *Nova Genera et Species Plantarum* (quarto ed.) 6: 54–55, t. 524. 1823, *Flora Peruviana* 4: t. 334. 1830, *Edinburgh New Philosophical Journal* 9: 89. 1830, *Linnaea* 36: 606. 1870, *Revisio Generum Plantarum* 1: 228. 1891 and *Annali di Botanica* 2: 70, 79–82. 1905, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 1038–1063. 1938, *Lloydia* 11(3): 199. 1949

(Antiinflammatory, for rheumatic pains.)

in Spanish: encino, encino de páramo

Weinmannia pubescens Kunth var. *popayanensis* (Hieron.) Killip & A.C. Sm. (*Weinmannia ayavacensis* O.C. Schmidt; *Weinmannia popayanensis* Hieron.; *Weinmannia pubescens* var. *popayanensis* Killip & A.C. Sm.)

South America, Venezuela. Tree

See *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 6: 56. 1823, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(Beibl. 49): 26. 1895 and *Bulletin of the Torrey Botanical Club* 56: 376. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 772. 1929

(Antiinflammatory, resinous leaves rubbed for relief of rheumatic pains.)

in Spanish: encino

Weinmannia racemosa L.f.

New Zealand.

See *Suppl. Pl.* 227. 1782 [1781 publ. Apr 1782] and *J. Pharm. Pharmacol.* 43(12): 817–822. 1991

(Bark for stomach pain. Honey with some antibacterial activity.)

in New Zealand: kamahi, tauhero, tawhero, towai (Maori names)

Weinmannia sylvicola Sol. ex A. Cunn.

New Zealand.

See *Ann. Nat. Hist.* 2(11): 357. 1839

(Bark for burns, cuts.)

in New Zealand: tauhero, tawhero

Weinmannia trianaea Wedd. (*Weinmannia polyphylla* Moric. ex DC. var. *macrocarpa* Pamp.; *Weinmannia sulcata* Engl.; *Weinmannia trianaea* var. *sulcata* (Engl.) Cuatrec.; *Weinmannia trianaea* var. *sulcata* (Engl.) Cuatrec.)

South America, Ecuador, Colombia.

See *Chloris Andina* 2: 211, t. 72b. 1857, *Linnaea* 36: 624. 1870 and *Annali di Botanica* 2: 84. 1905, *Lloydia* 11(3): 205. 1949, *Novon* 15(2): 327–331. 2005

(Crushed leaves poulticed on open wounds, on swollen and painful joints.)

in Spanish: encin, encino

Welfia H. Wendl. Arecaceae

Welfia regia H. Wendl. (*Welfia georgii* H. Wendl.; *Welfia georgii* H. Wendl. ex Burret; *Welfia microcarpa* Burret; *Welfia regia* Mast.; *Welfia regia* H.L. Wendl. ex André)

Central America to W. Ecuador.

See *Gardener's Chronicle & Agricultural Gazette* 1869: 1236. 1869, *Gartenflora* 18: 242. 1869 and *Bot. Jahrb. Syst.* 63: 129. 1930, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 201–293. 2003

(For bone fractures.)

Wendlandia Bartling ex DC. Rubiaceae

To honor the German botanist Johann Christoph Wendland, 1755–1828, gardener, author of *Hortus herrenhusanus*. Hannoverae 1798–1801 and *Ericarum icones et descriptiones*. Hannover [1798–] 1804–1823; see Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 411. 1830 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 476. 1965, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 396. [genus named for Johann Christian Wendland] NSW 1981, *Proc. Indian Acad. Sci.*, B 47: 708–715. 1981, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 289. Palermo 1988.

Wendlandia heynei (Schult.) Santapau & Merchant (*Rondeletia cinerea* Wall.; *Rondeletia exserta* Roxb.; *Rondeletia heynei* Schult.; *Rondeletia orissensis* Roth; *Rondeletia thyrsoiflora* Roth; *Wendlandia cinerea* DC.; *Wendlandia exserta* (Roxb.) DC.; *Wendlandia exserta* Blanco, nom. illeg.)

India. Tree, white flowers

See *Hortus Bengalensis*, or a catalogue ... 14. 1814, *Systema Vegetabilium*, editio decima sexta 5: 234. 1819, *Nov. Pl. Sp.*: 141. 1821, *Fl. Ind.* 2: 135, 141. 1824, *Prodr.* 4: 411–412. 1830, *Flora de Filipinas* 104. 1845 and *Bull. Bot. Surv. India* 3: 110. 1962

(Bark decoction in urinary complaints and swellings. Root made into a paste and given for three days after menses for

preventing conception. Veterinary medicine, magic, if twigs are placed on the door of cattle shed, the liver enlargement disease does not affect the cattle; root or leaf paste given for liver enlargement.)

in India: birsa, padgira, til bad, tilai, tilli jhar

Wendlandia paniculata (Roxb.) DC. (*Gardenia burha* Buch.-Ham. ex Wall., nom. nud.; *Rondeletia paniculata* Roxb.; *Wendlandia paniculata* var. *genuina* (Roxb.) Valeton; *Wendlandia paniculata* var. *genuina* Valeton, nom. inval.)

Vietnam, New Guinea.

See *Fl. Ind.* 2: 133. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 411. 1830 and *Bot. Jahrb. Syst.* 60: 4. 1925

(For boils on the head, pound the leaves and poultice.)

Malay name: kait-kait merah

Wendlandia thyrsoides (Roth) Steud. (*Canthium thyrsoides* Schult.; *Cupia thyrsoides* (Roth) DC.; *Ixora montana* Miq. ex Hook.f., nom. illeg.; *Webera thyrsoides* Roth; *Wendlandia lawii* Hook.f.; *Wendlandia montana* K. Schum.; *Wendlandia notoniana* Wall. ex Wight & Arn.; *Wendlandia thyrsoides* var. *lawii* (Hook.f.) Cowan)

India. Small tree, light yellow fragrant flowers

See *Nomencl. Bot.*, ed. 2, 2: 786. 1841, *Nat. Pflanzenfam.* 4(4): 37. 1891 and *Notes Roy. Bot. Gard. Edinburgh* 16: 282. 1932

(Bark sedative, to relieve cramps in patients suffering from cholera.)

in India: aannamaram, chendukare, kadamban, perulcadamban, teneri, thekkii, velleithalachedi

Wendlandia tinctoria (Roxb.) DC. (*Rondeletia tinctoria* Roxb.; *Wendlandia tinctoria* var. *normalis* Hook.f., nom. inval.)

Himalaya. Tree or shrub, white aromatic flowers

See *Fl. Ind.* 2: 134–135. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 411. 1830, *Fl. Brit. India* 3: 38. 1880

(Stems and leaves decoction given in stomach pain.)

in India: tilai

Werneria Kunth Asteraceae

For the German (born in Osiecznica, Poland) geologist Abraham Gottlob Werner, 1749–1817 (d. Dresden), professor of mineralogy at Freiburg, gave his name to the Wernerian or Neptunian theory of deposition; see *Nova Genera et Species Plantarum* (folio ed.) [H.B.K.] 4: 189, tt. 368, 369. 1820 and Alexander B. Adams, *Eternal Quest. The Story of the Great Naturalists*. [b. 1750] New York 1969, Alexander Ospovat, in *D.S.B.* 14: 256–264. 1981, *Gayana, Bot.* 42: 1–157. 1985.

Werneria glaberrima Phil.

Chile. Herb

See *Anales Mus. Nac., Santiago de Chile* 1891: 40. 1891

(Used to heal fractures.)

in Chile: marancel

Whitfieldia Hook. Acanthaceae

For the British Thomas Whitfield (Withfield), plant collector in Sierra Leone and Gambia (for Lord Derby); see *Bot. Mag.* 71: t. 4155. 1845 and John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 85. 1971, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 186. Berlin & Hamburg 1989, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 736. London 1994.

Whitfieldia elongata (P. Beauv.) De Wild. & T. Durand (*Ruellia elongata* P. Beauv.; *Whitfieldia elongata* De Wild. & T. Durand; *Whitfieldia elongata* C.B. Clarke; *Whitfieldia longifolia* T. Anderson; *Whitfieldia longifolia* var. *perglabra* (C.B. Clarke) Hutch. & Dalziel; *Whitfieldia perglabra* C.B. Clarke; *Whitfieldia subviridis* C.B. Clarke; *Whitfieldia tanganyikensis* C.B. Clarke)

Tropical Africa. Lianescent shrub or small tree, climber, scandent to semi-scandent, liana, many-branched, scrambling, bright red-white flowers

See *Flore d'Oware* 1: 45, t. 26. 1806, *Journal of the Linnean Society, Botany* 7: 27. 1863 [1864 publ. 1863], *Flora of Tropical Africa* [Oliver et al.] 5(1): 66–67. 1899, *Bulletin de la Société Botanique de Belgique* 38: 110. 1899 and *Flora of West Tropical Africa* 2: 248. 1931, *Tanzania Journal of Health Research* 11(1): 23–28. 2009

(Antimicrobial, antifungal, used to treat bacterial infections, diarrhea and heal wounds. Stem and seeds for skin diseases, snakebite. Magic, love potion.)

in Central African Republic: indolou

in Tanzania: mboniyati

Wigandia Kunth Boraginaceae (Hydrophyllaceae)

After Johannes Wigand, 1523–1587, Bishop of Pomerania, “Preussens erster Botaniker”, writer on Prussian plants, author of *Vera historia de succino borussico; de alce borussica, et de herbis in Borussia nascentibus*. Jenae 1590; see *Sp. Pl.*, ed. 2. 1: 328. 1762, *Nov. Gen. Sp.* [H.B.K.] 3: 126–128 (ed. qu.); 98 (ed. f.). 1819, *Revis. Gen. Pl.* 2: 434. 1891 and Kurt Wein, in *Sudhoffs Arch. Gesch. Med. Naturw.* 35(3–4): 160–205. 1942, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(5A/2): 101–112. 1967, *Fieldiana, Bot.* 24(9/1–2): 99–111. 1970, Francis Aubie Sharr, *Western Australian Plant Names and Their Meanings*. 75. University of Western Australia

Press, Nedlands, Western Australia 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1154–1156. 2001. According to some authors the genus was named for the German physician Justus Heinrich Wigand, 1769–1817, see G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 934. Ansbach 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 186. 1989, H. Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 692. Basel 1996.

Wigandia urens (Ruiz & Pav.) Kunth (*Ernstamra urens* (Ruiz & Pav.) Kuntze; *Ernstamra urens* Kuntze; *Hydrolea urens* Ruiz & Pav.; *Wigandia caracasana* Kunth; *Wigandia caracasana* Hort. ex E. Vilm.; *Wigandia caracasana* var. *calycina* Brand; *Wigandia caracasana* var. *macrophylla* (Schltdl. & Cham.) Brand; *Wigandia caracasana* var. *viscosa* (Brand) J.F. Macbr.; *Wigandia darii* Ram. Goyena; *Wigandia kunthii* Choisy, nom. illeg.; *Wigandia kunthii* var. *eu-kunthii* Brand; *Wigandia kunthii* var. *eukunthii* Brand, nom. inval.; *Wigandia kunthii* var. *intermedia* Brand; *Wigandia kunthii* var. *macrophylla* (Schltdl. & Cham.) (Leaves toxic, dangerous, emetic, cathartic. Fresh bark or branches used for catarrh, lung troubles.)

in English: round-leaf salago

Wikstroemia ridleyi Gamble (*Daphne ridley* (Gamble) Halda)

Malaysia. Evergreen shrub, branched, green flowers, calyx tube and lobes yellow-greenish, red juicy fruits

See *Bulletin of Miscellaneous Information Kew* 1912: 200–201. 1912, *Fl. Malesiana* 6: 34. 1960, *Acta Musei Richnoviensis* 6(3): 208. 1999

(Eat the leaves for constipation.)

Malay name: depu

Willughbeia Roxb. Apocynaceae

For the British (b. Middleton, Warwickshire) botanist Francis Willughby (Willoughby), 1635–1672 (d. Middleton), naturalist, traveller and plant collector, 1663 Fellow of the Royal Society, his works include *De historia piscium libri quatuor ... totum opus recognovit ... supplevit, librum etiam primum et secundum integros adjecit J. Raius*. [Folio, first edition, one of the most important English illustrated books of the seventeenth century.] *Ozonii* 1686 and *Ornithologiae libri tres ... Totum opus recognovit, digessit, supplevit J. Raius*. Londini 1676, a friend of John Ray and Sir Philip Skippon; see *Hortus Bengalensis*, or a catalogue ... 20. 1814, *Plants of the Coast of Coromandel* 3: 77, t. 280. 1820, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 935. 1852, *Theoria Systematis Plantarum* 256. 1858, *Naturwissenschaftliche Reise nach Mossambique ...* [Peters] 6(Bot., 1): 281. 1861, *The Flora of British India* 3: 623. 1882 and C.E. Raven, *John Ray Naturalist, His Life and Works*. 368. Cambridge 1942, C.E. Raven, *English Naturalists from Neckam to Ray*. Cambridge 1947, W. Blunt, *The Art of Botanical Illustration*. 68. in Yoruba: ewé ifin, ifin, lagbo, lagbo funfun

in Mexico: hierba malva

Wisteria Nuttall Fabaceae (Leguminosae, Millettieae)

For the American (b. Philadelphia, Pennsylvania) physician Caspar Wistar, 1761–1818 (d. Philadelphia), professor of chemistry, from 1792 professor of anatomy at the University of Pennsylvania, abolitionist; see David Hosack, *A tribute to the memory of the late C. Wistar, M.D.* New York 1818, Thomas Nuttall (1786–1859), *The Genera of North American Plants*, and catalogue of the species, to the year 1817. 2: 115–116. Philadelphia 1818, C. Edwards Lester, *Life and Public Services of Charles Sumner*. (Printed and Bound by John F. Trow & Son for the) United States Publishing Company, New York 1874 and Whitfield J. Bell, Jr., in *D.S.B.* 14: 456–457. 1981, Peter Valder, *Wisterias*. Balmain, NSW, Florilegium 1995. The seed of all members of this genus is poisonous.

Wisteria floribunda (Willd.) DC. (*Dolichos japonicus* Spreng.; *Glycine floribunda* Willd.; *Kraunhia floribunda* (Willd.) Taub.; *Millettia floribunda* (Willd.) Matsum.; *Phaseolodes floribundum* (Willd.) Kuntze; *Rehsonia floribunda* (Willd.) Stritch; *Wisteria multijuga* Van Houtte)

Asia, Japan. Perennial non-climbing tree, long racemes of scented lilac-blue flowers, large seed pods, the tender young leaves are sometimes eaten and are also used as a tea substitute, flowers cooked

See *Species Plantarum*. Editio quarta 3(2): 1053, 1066. 1802, *Medical Repository* 352. 1808, *The Genera of North American Plants* 2: 115. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 390. 1825, *Revisio Generum Plantarum* 1: 201. 1891, *Die Natürlichen Pflanzenfamilien* 3(3): 271. 1894 and *Phytologia* 56(3): 183. 1984, Lampe, K.F., McCann, M.A. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc. Chicago, Ill., USA. 1985, *Journal of Ethnopharmacology* 102(1): 10–14. 2005

(Toxins. All parts of the plant are toxic or poisonous, especially the seeds. A glycoside, wistarine, has been found in the plant, it also contains a poisonous lectin. Ingesting 1–2 seeds can cause serious poisoning in a child. Extracts from galls grown on *Wisteria floribunda* are used as an antitumoral preparation in oriental traditional medicine. Seeds diuretic.)

in English: Fuji, Japanese wisteria

in China: duo hua zi teng

in Japan: fuji

Withania Pauquy Solanaceae

According to many authors the genus was named possibly (misspelling included!) after the English (b. Minster Acres, Northumberland) palaeobotanist Henry Thomas Maire Witham (né Silvertop), 1779–1844 (d. Lartington Hall, Yorkshire), geologist, 1829 founded the Natural History Society of Northumberland, Durham, and Newcastle upon Tyne, author of *Observations on fossil vegetables*.

Edinburgh, London 1831 and *The internal structure of fossile vegetables*. Edinburgh, London 1833; see Pauquy, Charles Louis Constant, *De la Belladone*. Paris, 1825 and Francis Wall Oliver (1864–1951), ed., *Makers of British Botany*. Cambridge 1913, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 509. 1965, Albert G. Long, in *D.S.B.* 14: 462–463. 1981, Stafleu and Cowan, *Taxonomic Literature*. 4: 114–115. 1983, Arthur D. Chapman, ed., *Australian Plant Name Index*. 2992. Canberra 1991.

Withania coagulans (Stocks) Dunal (*Puneeria coagulans* Stocks; *Withania coagulans* Dunal)

Afghanistan, India. Perennial undershrub, endangered species

See *De la Belladone...* 14. 1825, *J. Roy. Asiat. Soc. Bombay*. 3: 54–56. 1849, *Prodr.* (DC.) 13(1): 685. 1852 and *Journal of Ethnopharmacology* 93(2–3): 261–264. 2004, *Journal of Arid Environments* 65(3): 337–350. 2006

(Used in Ayurveda and Unani. Fruits hypoglycemic, hypolipidemic, tonic, cooling, emetic, diuretic, stomachic, to relieve liver ailments, upset stomach, dyspepsia, stomachache, skin rash, acute cough, asthma. Leaves used as an intoxicant.)

in English: vegetable rennet

in India: akri, amakiregadday, amukara, amukiram, amukkura, asvagandha, asvagandhi, binputakah, hab kaknaj, hire maddina gida, paneer bandh, paneer dodhi, paneer-dodi, panir bed, panir dodi, panirband, panirdodi, pannerbandh, panneru-gadda, pennerugadda, punir, rasna

in Pakistan: panirbad, paraband

Withania somnifera (L.) Dunal (*Physalis somnifera* L.; *Physaloides somnifera* (L.) Moench; *Physaloides somnifera* Moench; *Withania kansuensis* K.Z. Kuang & A.M. Lu; *Withania microphysalis* Suess.; *Withania mucronata* Chiov.; *Withania somnifera* var. *macrocalyx* Chiov.)

Africa, Asia. Shrub, herb, erect, woody-based, many-branched, hairy stems, corolla white-yellow, calyx pale green, filaments pale green, anthers yellow, red globose fruits with sheath, inflated and membranous calyx, ungrazed and unpalatable

See *Species Plantarum* 1: 182–184. 1753, *Methodus* (Moench) 473. 1794, Charles Louis Constant Pauquy (1800–1854), *De la Belladone...* 14. Woodfordia R.A. Salisbury Lythraceae

Presumably for the English gardener E. John (or James? see Stafleu and Cowan, *Taxonomic Literature*. 7: 442. 1988) Alexander Woodford (fl. 1790s), owner of a garden at Belmont house, Vauxhall, London. Despite statements by some authors this genus was not named after the British physician James Woodforde, 1771–1837, botanist, Dr. med. Edinburgh 1825, Fellow of the Linnean Society 1826, author of *A Catalogue of the indigenous Phenogamic Plants growing in the neighbourhood of Edinburgh*; and of certain species of the class Cryptogamia: with reference to their localities. Edinburgh 1824; see Salisbury, R. A. (Richard Anthony) (1761–1829), *The Paradisus Londinensis* 1(2): t. 42. London, Printed by D. N. Shury, and published by William Hooker, 1805–1807 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 517. 1965, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 754. London 1994, *Syst. Bot.* 20(4): 482–502. 1995.

Woodfordia fruticosa (L.) Kurz (*Grislea punctata* Buch.-Ham. ex Sm.; *Grislea tomentosa* Roxb., nom. illeg.; *Lythrum fruticosum* L.; *Lythrum hunteri* DC.; *Woodfordia floribunda* Salisb., nom. illeg.; *Woodfordia fruticosa* Kurz; *Woodfordia*

fruticosa fo. *genuina* Kurz ex Koehne, nom. inval.; *Woodfordia tomentosa* Bedd., nom. illeg.)

India, Sri Lanka, Himalaya. Shrub, many-branched, reddish brown bark, spreading arching branches, whorled leaves oblong-lanceolate with numerous black dots beneath, red flowers in dense axillary clusters, nectar very sweet

See *Systema Naturae*, Editio Decima 2: 1045. 1759, *Plants of the Coast of Coromandel* 1: 29, t. 31. 1795, *The Paradisus Londinensis* t. 42. 1806, *The Cyclopaedia*; or, universal dictionary of arts, ... [Rees] 17(1): 2. 1811, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 83. 1828, *The Flora Sylvatica for Southern India* 117, t. 14, f. 4. 1871, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 40(2): 56. 1871, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 334. 1881 and *Fl. W. Pakist.* 78: 6. 1975, *Ethnobotany* 16: 52–58. 200

(Used in Ayurveda. Decoction of the aerial parts taken orally to reduce boils and swelling of the body. Stem bark boiled and the paste applied on burnt body parts; bark extract of *Woodfordia fruticosa* along with extract of barks of *Oroxylum indicum*, *Mangifera indica*, *Bauhinia racemosa* and *Dalbergia lanceolaria* given for jaundice. Fruit paste applied to cure eye inflammation. Leaf juice in ringworm; crushed leaves massaged in rheumatism, rheumatoid arthritis; leaf paste applied in skin diseases, eczema; leaves smoke as mosquito and insect repellent. Crushed roots for rheumatism and cough, colds; root of *Woodfordia fruticosa* along with apical bud of *Phoenix acaulis* pounded and given to control leucorrhea; root extract of *Woodfordia fruticosa* along with extract of *Helicteres isora* given as antidote in snakebite; paste of roots and vegetative buds taken orally against dysentery; root paste given internally to terminate pregnancy. Seeds and roots paste given with *ghee* at the time of labor pains to facilitate childbirth. Decoction of leaves and flowers given after delivery as a postpartum remedy, for strength. Flowers decoction tonic, astringent, for diarrhea and dysentery; dried flowers astringent, stimulant, used for hemorrhoids, dysentery and in pregnancy; dried flowers eaten to cure dysentery and diarrhea; flowers juice drunk before copulation for the formation of male child in womb; flower juice given to treat dysentery with bloody stools (Doctrine of Signatures); a paste of the flowers given for cough and applied on ulcers; flower paste given with root paste of *Mangifera indica* to control bleeding during menstruation. Veterinary medicine.)

in English: fire-flame bush

in China: xia zi hua

in India: chaparandhawi, chilbelli, daul, dhaatuki, dhae, dhadki, dhataki, dhating, dhatki, dhatuk, dhatum phula, dhaul, dhaula, dhavai, dhawai, dhawi, dhayati, dheira, dhoran, ichak, ittol, jaji, kaktoni, parvati (parvata, hill, mountain), puliaayila, surteli, tendka gachha

in Indonesia: sidawajah

(Used to treat skin ailments.)

in English: oblong woodsia, rusty cliff fern, rusty woodsia

Woodsia mexicana Fée (*Woodsia pusilla* E. Fourn.; *Woodsia pusilla* var. *mexicana* (Fée) T.M.C. Taylor)

Mexico. Perennial herbaceous

see *Mémoires sur les Familles des Fougères* 7: 66. 1857, *Bulletin de la Société Botanique de France* 19: 329. 1872 and *American Fern Journal* 37: 86. 1947

(Used to treat skin ailments.)

Woodwardia J.E. Smith Blechnaceae (Blechnoideae)

After the English (b. Huntingdon) botanist Thomas Jenkinson Woodward, 1745–1820 (d. Diss, Norfolk), 1789 a Fellow of the Linnean Society, contributor to Philip Miller (1691–1771), *The gardener's and botanist's dictionary ... newly arranged ...* by Thomas Martyn. London 1807, with Samuel Goodenough (1743–1827) wrote *Observations on the British Fuci*. London 1797; see *Mémoires de l'Académie Royale des Sciences* 5: 411–412, pl. 9, f. 3. 1793, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Prodromus Florae Novae Hollandiae* 151. 1810, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 431–432. 1851 and *Acta Phytotaxonomica Sinica* 9(1): 37–39, pl. 4. 1964, John H. Wulfenia carinthiaca Jacq.

Europe.

See *Fl. Medit.* 7: 262–267. 1997, Arnold, U., Zidorn, C., Ellmerer, E. P., Stuppner, H. “Iridoid and phenolic glycosides from *Wulfenia carinthiaca*.” *Z. Naturforsch. C.* 57(11–12): 969–975. 2002, *Z. Naturforsch. C.* 59(3–4): 255–262. 2004, *Phytochemistry*. 67(3): 286–301. 2006

(Antioxidant, antiinflammatory.)

X

Xanthisma DC. Asteraceae

From the Greek *xanthisma* ‘that which is dyed yellow, dyed’, referring to the flowers, see *Genera et Species Asterearum* 13, 224–225. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 94–95. 1836, *Genera Plantarum* 2(1): 272. 1873, *Notes on Some Compositae* 99. 1880.

Xanthisma grindelioides (Nutt.) D.R. Morgan & R.L. Hartm. (*Aster nuttallii* (Torr. & A. Gray) Kuntze; *Eriocarpum grindelioides* Nutt.; *Haplopappus nuttallii* Torr. & A. Gray; *Machaeranthera grindelioides* (Nutt.) Shinners; *Machaeranthera grindelioides* var. *grindelioides*; *Sideranthus grindelioides* (Nutt.) Britton ex Rydb.; *Sideranthus grindelioides* (Nutt.) Britton)

North America. Perennial, subshrub

See *Dictionnaire des Sciences Naturelles* 56: 168. 1828, *Transactions of the American Philosophical Society*, new series, 7: 320–321. 1840, *A Flora of North America*: containing ... 2(2): 242. 1842, *Revisio Generum Plantarum* 1: 318. 1891 and *Bulletin of the Torrey Botanical Club* 27(12): 620. 1900, *Field & Laboratory* 18(1): 40. 1950, *Sida* 20(4): 1403. 2003

(From the roots a tea for treating coughs.)

in English: rayless aster, rayless tansyaster

Xanthium L. Asteraceae

Greek *xanthion* ‘a plant used for dyeing yellow’; see Carl Linnaeus, *Species Plantarum*. 2: 987. 1753, *Genera Plantarum*. Ed. 5. 424. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 523. 1836, *Ann. Soc. Linn. Lyon sér. 2* 17: 110. 1869 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 693–694. 1996.

Xanthium indicum Koenig ex Roxb. (*Xanthium indicum* Klatt, nom. illeg., non *Xanthium indicum* Koenig ex Roxb.)

India.

See *Hort. Bengal.* 67. 1814, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 280. 1880

(Leaf decoction in fever and jaundice; leaf juice applied to boils between toes; leaves chewed for toothache. Roots bitter tonic; root powder stomachic. Fruits cooling, demulcent.)

in India: bada gokhru, dodda vante, kandrimoni, lapetua, laptewa, marlumutta

Xanthium sibiricum Patrin ex Widder (*Xanthium strumarium* subsp. *sibiricum* (Patrin ex Widder) Greuter)

Cosmopolitan. Annual herb, erect, stout, rough, shortly hairy, pubescent leaves alternate long petiolate, floral heads monoecious, female heads biflorous, fruit an achene enclosed in the persistent involucre coriaceous and spiny, on waste ground

See *Species Plantarum* 2: 987. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 20: 32–38, pl. 1, f. 6–8. 1923, *Recent Res. Pl. Sci.* (New Delhi) 7: 261–271. 1979, *Willdenowia* 33(2): 249. 2003

(Fruit used for common cold, fever, joint pain; external use for urticaria.)

in English: Siberian clotbur, Siberian cocklebur

in China: cang er zi

Xanthium sibiricum Patrin ex Widder var. *sibiricum* (*Xanthium japonicum* Widder; *Xanthium sibiricum* var. *subinerme* Widder)

China.

See *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 20: 32–38, pl. 1, f. 6–8. 1923

(Fruit for smallpox.)

in China: t’sang-erh

Xanthium spinosum L. (*Acanthoxanthium spinosum* Fourr.; *Acanthoxanthium spinosum* (L.) Fourr.; *Acanthoxanthium spinosum* Fourr. subsp. *catharticum* (Kunth) D. Löve; *Xanthium ambrosioides* Hook. & Arn.; *Xanthium catharticum* Kunth; *Xanthium spinosum* L.f. *inerme* (Bel) O. Bolòs & Vigo; *Xanthium spinosum* var. *inerme* Bel)

Chile, Portugal.

See *Species Plantarum* 2: 987. 1753, *Nov. Gen. Sp.* [H.B.K.] 4: 274. 1820, *J. Bot.* (Hooker) 3: 310. 1841, *Annales de la Société Linnéenne de Lyon*, sér. 2, 17: 110. 1869 and *Lagascalia* 5 (1): 64. 1975, *Collect. Bot.* (Barcelona) 17(1): 90. 1988 [1987 publ. 1988]

(Aqueous extract of roots taken as stomachic.)

in Chile: cepacaballo, clonqui, concil

Xanthium strumarium L. (*Xanthium americanum* Walter; *Xanthium canadense* Mill.; *Xanthium cavanillesii* Schouw; *Xanthium chasei* Fernald; *Xanthium chinense* Mill.; *Xanthium curvescens* Millsp. & Sherff; *Xanthium cylindricum* Millsp. & Sherff; *Xanthium echinatum* Murray;

Xanthium echinatum subsp. *italicum* (Moretti) O. Bolòs & Vigo; *Xanthium echinatum* var. *cavanillesii* (Schouw) O. Bolòs & Vigo; *Xanthium echinatum* var. *italicum* (Moretti) O. Bolòs & Vigo; *Xanthium echinellum* Greene ex Rydb.; *Xanthium globosum* C. Shull; *Xanthium inflexum* Mack. & Bush; *Xanthium italicum* Moretti; *Xanthium macrocarpum* DC. subsp. *italicum* (Moretti) Nyman; *Xanthium macrocarpum* var. *glabratum* DC.; *Xanthium natalense* Widder; *Xanthium orientale* L.; *Xanthium orientale* subsp. *italicum* (Moretti) Greuter; *Xanthium oviforme* Wallr.; *Xanthium pensylvanicum* Wallr.; *Xanthium pungens* Wallr.; *Xanthium speciosum* Kearney; *Xanthium strumarium* Lour., non L.; *Xanthium strumarium* subsp. *cavanillesii* (Schouw) D. Löve & Dans.; *Xanthium strumarium* subsp. *italicum* (Moretti) D. Löve; *Xanthium strumarium* var. *canadense* (Mill.) Torr. & A. Gray; *Xanthium strumarium* var. *cavanillesii* (Schouw) D. Löve & Dans.; *Xanthium strumarium* var. *glabratum* (DC.) Cronquist; *Xanthium varians* Greene; *Xanthium wootonii* Auct.; *Xanthium wootonii* Cockerell; *Xanthium wootonii* Cockerell ex de Vries; *Xanthium wootonii* de Vries)

Cosmopolitan, South America. Herb or undershrub, ovate lobed crenate glandular leaves, horned achenes, brown involucre, young leaves and tender tops used as vegetable

See *Species Plantarum* 2: 987. 1753, *Species Plantarum*, Editio Secunda 2: 1400. 1763, *The Gardeners Dictionary: ...* eighth edition no. 2, 4. 1768, *Commentarii Societatis Regiae Scientiarum Gottingensis* 6: 32. 1784, *Flora Caroliniana*, secundum ... 231. 1788, *Flora Cochinchinensis* 563. 1790, *Flore Française* 6: 356. 1815, *Giornale di Fisica, Chimica e Storia Naturale ...* ser. 2, 5: 326. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 523. 1836, *A Flora of North America: containing ...* 2(2): 294. 1842, *Beiträge zur Botanik* 2: 231, 236, 240. 1844, *Annales des Sciences Naturelles; Botanique*, sér. 3 12: 357. 1849, *FBI* 3: 303. 1881, Nyman, Carl Frederik (1820–1893), *Conspectus florae europaeae: seu Enumeratio methodica plantarum phanerogamarum Europae indigenarum*, indicatio distributionis geographicae singularum etc. Berlin, 1886, *Bulletin of the Torrey Botanical Club* 24: 574. 1897, *Pittonia* 4(21A): 59–60. 1899 and *Annual Report of the Missouri Botanical Garden* 16: 106–107. 1905, *Science* 42: 870. 1915, *Botanical Gazette* 59(6): 482–483, f. 1, 7. 1915, *Publications of the Field Columbian Museum, Botanical Series* 4: 4, pl. 3, 5. 1918, *Publications of the Field Columbian Museum, Botanical Series* 4: 25. 1919, *Manual of the Southeastern Flora* 1301–1302. 1933, *Rhodora* 47(564): 403. 1945, *Rhodora* 48(568): 66–74, pl. 1013, f. 1, pl. 1014. 1946, *Canadian Journal of Botany* 37: 204–205. 1959, *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Flora Europaea* 4: 103–410. 1976, *Journal of the Linnean Society, Botany* 71: 271. 1976, *CIS Chromosome Information Service* 20: 32–33. 1976, *American Journal of Botany* 64: 680–686. 1977, *Botaniceskij Žurnal SSSR* 64(4): 582–589. 1979, *Journal of Palynology* 16: 85–105. 1980, Cole, R.J. et al. “Isolation and redefinition of the toxic agent from cocklebur (*Xanthium strumarium*).” *J. Boca Raton, Fla., USA. 1989, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Compositae Newsletter* 27: 7–10. 1995, *Egyptian Journal of Botany* 37(2): 129–156. 1997, *Willdenowia* 33(2): 249. 2003

(Used in Ayurveda and Sidha. High toxicity, poisonous to cattle, swine, sheep and poultry; can produce allergic contact dermatitis in susceptible humans. The toxic glycoside carboxyatractyloside is found in the seeds and the cotyledons of seedlings; livestock most commonly poisoned after ingesting the cotyledons of young seedlings; the toxin quickly dissipates as the seedlings grow. Plant sedative, aphrodisiac, diaphoretic, sialogogue, for malaria, urinary disorders. Fruit tonic, diuretic, sedative, mildly narcotic, a wash after confinement, cooling and demulcent, infusion taken to relieve kidney pain, also in smallpox, scurvy, renal calculi, malaria and urinary complaints; fruit decoction given in urinary and renal complaints; ripe prickly fruits kept in the ear to cure headache. Leaf extract with honey given in fever and cough; bath in leaf decoction for malaria; leaves pounded and applied on ulcers infested with worms; leaf juice with black pepper and sugar given to cure blood dysentery. Root emmenagogue, bitter, tonic, abortifacient, used in the treatment of pulmonary diseases; a decoction taken with sugar for diarrhea. Seed oil for rheumatism; paste of cotyledons applied on wounds. Magico-religious beliefs, contact therapy, a traditional remedy through plant wreath, to cure night-blindness or headache fruits are worn on neck or arm or waist; fruit or root tied around children’s wrists to ward off evil spirits. Veterinary medicine, dry leaf powder macerated in human urine and the mixture given as galactagogue; leaf paste applied to kill wound maggots.)

in English: broad cocklebur, burweed, clotbur, cocklebur, common cocklebur, large cocklebur

in Arabic: shabka

in Southern Africa: groot boetebossie, kankerroos; hlaba-hlabane (Sotho)

in China: chuan erh, hsi erh, tsang erh

in India: adasisi, adhasisi, agara, agora, agra, arishta, arista, artagala, ban-okra, banokra, bheri jat, bhulagna, bichhu-butti, bishhaphal, bonokra, brahma-dundi, chanda, chhota-gokhru, chhotagokhru, chota-gokhru, chirchita, dumundi, dutundi,

gadariu, gadariya, gadariyu, godariya, gokharu, gokhru, gokshuru, gukhru, hameng-sampakpi, horgoba, hur-huring-ba, itara, jarjatia, kacchaka, kakubha, kambumalini, kambupuspha, kandri gatcho, kiriti, kutva, kutwa, landga, latakni, lokra, malavinashini, mangalvanamalini, mangalyakamalani, maralu teege, marla matangi, marlumutta, maruloomathai, marul umattai, marula-matangi, marulumathai, marhematta, marlu-mutta, marul-umathan, marulamatangi, marulutige, medhya, mir-chathang, ogoro, okra, parau-han-thaur, parsvapu, pitapushpi, raktapushpi, sankeshwara, sarpakshi, shankeshvara, shankeshwar, shankhagalini, shankhahuli, shankhacusuma, shankhapuspi, shankhavha, shankine, shwetakusuma, sukshmapatra, supushpi, talnoppi, urcing, usuma, veratelnep, yakusuma

in Japan: nan-mumi, o-namomi

in Malaysia: bua anjang, anjang

in Nepal: bhede kuro

in Thailand: ka-chap, khi-on, kiang-na, ma-khat-nat-nam, ya-phom-yung

in Tibetan: antargala, byi-tsher, byi-tsher khyung-sder smug-po, ka tstshu ra, u sa ka

in Hawaii: kikania

Xanthocercis Baillon Fabaceae (Sophoreae)

Yellow *Cercis*, from the Greek *xanthos* 'yellow' and the genus *Cercis*, Greek *kerkis*, *kerkidos* 'a measuring rod, shuttle', related to *Angylocalyx*, see *Adansonia* 9: 293. 1870 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 162. 1902.

Xanthocercis zambesiaca (Baker) Dumaz-le-Grand (*Pseudocadia zambesiaca* (Baker) Harms; *Sophora zambesiaca* Beker)

South Africa, Malawi. Perennial non-climbing tree, dense, evergreen, riverine, massive trunk gnarled and crooked, leaves imparipinnate, white to cream sprays grow at the end of the branches, small sweet-scented flowers with a prominent stamen, grape-like edible fruits dark yellowish brown, fruit eaten by a wide variety of birds as well as by monkey and baboon, classified as vulnerable in the IUCN Red list of threatened species

See *Species Plantarum* 1: 373–374. 1753, *Flora of Tropical Africa* 2: 253. 1871 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 162. 1902, *Pflanzenw. Afr.* 3(1): 524. 1915, *Bulletin de la Société Botanique de France* 99: 314. 1953, *Taxon* 41: 570. 1992, *Journal of Natural Products* 61(3): 397–400. 1998

(Toxins, strongly irritating nose and throat during working. Hypoglycemic, antihyperglycemic.)

in English: Nyala berry, Nyala tree

in Southern Africa: hoenderspoor, nhlaru, Njalaboom; nhlahu (Thonga); motha (Mangwato dialect, Botswana); muChetuchetu, muSharo, muTsha (Shona)

Xanthophyllum Roxb. Polygalaceae (Xanthophyllaceae)

Greek *xanthos* 'yellow' and *phyllon* 'leaf'; see William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. 3: 81. London 1795–1820. Often confused with *Trigonostrium*.

Xanthophyllum lanceatum J.J. Sm. (*Skaphium lanceatum* Miq.)

Sumatra, Thailand.

See *Flora van Nederlandsch Indie*, Eerste Bijv. 3: 357. 1861 [Dec 1861] and *Icon. Bogor.* [Boerlage] 4: t. 334. 1912 [25 Apr 1912]

(Stem bark for eczema, lymphatic disorders.)

Xanthorhiza Marshall Ranunculaceae

From the Greek *xanthos* 'yellow' and *rhiza* 'root', see *Arbust. Amer.* 167–168. 1785, *Med. Repos.* 5: 160. 1802.

Xanthorhiza simplicissima Marshall (*Xanthorhiza apiifolia* L'Héritier)

North America.

See *Arbust. Amer.* 167–168. 1785, *Stirp. Nov.* 79 (t. 38). 1788

(The yellow inner bark and roots contain a bitter principle. Bundles of yellowroot for treatment of gastrointestinal disorders and fever blisters. Used to treat ulcerated stomachs, colds, jaundice, piles, sore mouth, sore throat, cramps, and as a blood tonic.)

in English: brook-feather, shrub yellowroot, yellowroot

Xanthosoma Schott Araceae

From the Greek *xanthos* with *soma* 'a body', referring to the stigma or to the yellow inner tissues; see *Meletemata Botanica* 19. 1832, *Index Seminum* [Berlin] 1853: 13. 1853 and *Fieldiana, Bot.* 304–363. 1958, *Taxon* 24: 345. 1975, D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 15–25. 1988.

Xanthosoma auriculatum Regel (*Urospatha sagittifolia* (Rudge) Schott)

N. Brazil.

See *Aroideae* 1: 4. 1853, *Index Seminum* [St. Petersburg] 1868 (1869) 81. 1869

(Irritant. The sap from the crushed inflorescence an excellent wound healing medicine; sap from the leaves effective in treating severe wounds and skin diseases.)

in Brazil: folha santa, flor santa

in Pacific: yantia

Xanthosoma belophyllum (Willd.) Kunth (*Caladium acuminatum* F. Dietr.; *Caladium belophyllum* Willd.; *Caladium caracasenum* Engl.; *Xanthosoma belophyllum* var. *caracasenum* K. Koch; *Xanthosoma belophyllum* var. *kunthii* Engl.; *Xanthosoma caracasenum* Schott; *Xanthosoma versicolor* Schott)

Colombia, N. South America.

See *Enum. Pl.* 3: 44. 1841

(Acrid juice.)

Xanthosoma brasiliense (Desf.) Engl. (*Acontias hastifolius* Schott; *Caladium brasiliense* Desf.; *Philodendron fontanesii* Kunth; *Xanthosoma hastatum* Eggers; *Xanthosoma hastifolium* sensu Duss)

Caribbean to Brazil.

See *Description des Plantes Nouvelles ... Jardin de J. M. Cels* 30. 1801, *Tableau de l'École de Botanique* 7, 386. 1829, *Meletemata Botanica* 19. 1832, *Flore phanérogamique des Antilles françaises ...* 481. 1897 and *Das Pflanzenreich* IV, 23E: 58. 1920, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: i-xi, 1–586. 1979

(Irritant, all parts of the plants contain, to a varying degree, calcium oxalate raphides.)

in English: Tahitian spinach

Common names: belembe, calalou, quelembe

Xanthosoma conspurcatum Schott (*Acontias conspurcatus* Schott; *Acontias conspurcatus* (Schott) Schott)

South America.

See *Syn. Aroid.*: 61. 1856, *Prodr. Syst. Aroid.*: 193. 1860

(Irritant, poisonous to touch.)

Xanthosoma helleborifolium (Jacq.) Schott (*Acontias helleborifolius* (Jacq.) Schott; *Acontias plumieri* Schott; *Acontias variegatus* (Desf.) Kunth; *Arum helleborifolium* Jacq.; *Arum sagittifolium* Link, nom. illeg.; *Arum venosum* Balb. ex Engl.; *Caladium hastifolium* Steud.; *Caladium helleborifolium* (Jacq.) Vent.; *Caladium variegatum* Desf.; *Xanthosoma angustisectum* Engl.; *Xanthosoma hastifolium* K. Koch; *Xanthosoma helleborifolium* f. *variegatum* (Desf.) Engl.; *Xanthosoma helleborifolium* f. *viride* Engl.; *Xanthosoma helleborifolium* var. *angustisectum* (Engl.) Engl.; *Xanthosoma helleborifolium* var. *weberbaueri* Engl.; *Xanthosoma plumieri* (Schott) Schott; *Xanthosoma variegatum* (Desf.) Schott)

Trop. America. Tuberous root stalks eaten, leaves cooked with other herbs

(Leaves infusion taken internally for snakebite.)

Xanthosoma mexicanum Liebm. (*Caladium holtonianum* (Schott) N.E. Br.; *Caladium pilosum* (K. Koch & Augustin) N.E. Br.; *Caladium puberulum* Engl.; *Xanthosoma croatanum* L.D. Gómez & Gómez-Laur.; *Xanthosoma holtonianum* Schott; *Xanthosoma kerberi* Engl.; *Xanthosoma pilosum* K. Koch & Augustin)

Mexico to Venezuela.

See *Vidensk. Meddel. Naturhist. Foren. Kjøbenhavn* 1: 15. 1849

(Fruits said to be poisonous to snakes, used to kill them.)

in Guatemala: quequeshue de culebra

Xanthosoma pentaphyllum (Schott) Engl. (*Acontias pentaphyllum* Schott; *Arum pentaphyllum* Vell., nom. illeg.)

Brazil.

See *Fl. Bras.* 3(2): 197. 1878

(Petioles used internally for gonorrhoea and externally for orchitis.)

in Brazil: canno do brejo

Xanthosoma robustum Schott

Mexico to Central America. Large species, huge leaves, roots cooked as a starchy food, young leaves cooked and eaten

See *Oesterr. Bot. Wochenbl.* 3: 370. 1853

(Roots said to be poisonous, used for asthma, colds, coughs and pulmonary complaints.)

in Guatemala: marac, quequeshue

in Honduras: quiscamo, quiscamote

in Mexico: capote, pixi

Xanthosoma sagittifolium (L.) Schott (*Alocasia talihan* Elmer ex Merr.; *Arum nigrum* Vell., nom. illeg.; *Arum nigrum* Schott; *Arum orientale* M. Bieb. var. *nigrum* (Vell.) Engl.; *Arum sagittifolium* L.; *Arum xanthorrhizon* Jacq.; *Caladium edule* G. Mey.; *Caladium mafaffa* Engl.; *Caladium sagittifolium* (L.) Vent.; *Caladium utile* Engl.; *Caladium xanthorrhizon* (Jacq.) Willd.; *Philodendron nigrum* Kunth, nom. nud.; *Xanthosoma appendiculatum* Schott; *Xanthosoma atrovirens* K. Koch & C.D. Bouché; *Xanthosoma atrovirens* Fournet; *Xanthosoma atrovirens* var. *appendiculatum* (Schott) Engl.; *Xanthosoma atrovirens* var. *hybridum* K. Koch; *Xanthosoma atrovirens* var. *kochii* Engl.; *Xanthosoma atrovirens* var. *moritzii* Engl.; *Xanthosoma atrovirens* var. *panduriforme* Engl.; *Xanthosoma atrovirens* var. *versicolor* K. Koch; *Xanthosoma blandum* Schott; *Xanthosoma edule* (G. Mey.) Schott; *Xanthosoma ianthinum* K. Koch & C.D. Bouché; *Xanthosoma jacquinii* Schott, nom. illeg.; *Xanthosoma mafaffa* Schott; *Xanthosoma mafaffa* var. *blandum* (Schott) Engl.; *Xanthosoma mafaffa* var. *typicum* Engl., nom. inval.; *Xanthosoma nigrum* Stellfeld; *Xanthosoma nigrum* (Vell.) Mansf.; *Xanthosoma peregrinum* Griseb.;

Xanthosoma poeppigii Schott; *Xanthosoma poeppigii* var. *mafaffa* (Schott) J.F. Macbr.; *Xanthosoma roseum* Schott; *Xanthosoma sagittifolium* K. Koch, nom. illeg.; *Xanthosoma utile* K. Koch & C.D. Bouché; *Xanthosoma violaceum* Schott; *Xanthosoma xanthorrhizon* (Jacq.) K. Koch; *Xanthosoma xanthorrhizon* (Jacq.) K. Koch)

Trop. America. Knobby corms, tuber edible after cooking, starchy foodstuff

See *Species Plantarum* 2: 964, 966. 1753, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 32, t. 188. 1797, *Magasin Encyclopédique* 4(16): 471. 1801, *Description des Plantes Nouvelles ... Ethnopharmacol.* 96(3): 563–568. 2005

(Irritant, severe irritation of the mouth and throat occurs if fresh material is eaten. *Xanthosoma jacquinii* has acrid milky sap and a fetid odour. High fever, plant decoction for bathing. Fresh leaves applied to relieve swelling of the liver and spleen; boiled leaves a laxative for infants. Antifungal, the ingestion of leaves may have a protective effect against oxidative stress caused by vitamin A deficiency. Tubers used to reduce swelling. Magico-religious beliefs, rituals, ceremonial.)

Common names: badu, cebugabi, coco, cocoyam, danchi, malanga cochon, malanga colorada, malanga morada, malangay, malango, ocumo morado culin, otó, quequesque, quequexque, rascadera, sunin, sunin honolulu, tajar, tampa taja, tannia, tayove, vinola, yantia, yautia, yautia hueca, yautia palma, yautia silvestre

in English: black malanga, blue ape, blue tannia, blue taro, dark leaf malanga, giant tanier, tania, tannia

in Brazil: mangareto, taioba

in Panama: tarkwa

in Peru: daledale, mairino, malanga, mangará, mangareto, pituca, taiazes, taro, yantia, yautia

in Japan: taro-imo, yabane-imo

Malay name: birah hitam

in Okinawa: seiban-imo

Xanthosoma striatipes (K. Koch & C.D. Bouché) Madison (*Acontias striatipes* (K. Koch & C.D. Bouché) Schott; *Caladium angustifolium* Engl.; *Caladium heterotypicum* S. Moore; *Caladium striatipes* (K. Koch & C.D. Bouché) Schott; *Caladium striatipes* var. *subhastata* Chodat & Hassl.; *Cyrtospadix striatipes* (K. Koch & C.D. Bouché) K. Koch; *Philodendron striatipes* K. Koch & C.D. Bouché)

Trop. South America.

See *Selbyana* 5: 364. 1981

(The sap of the crushed rhizome used as a gargle for angina.)

in Brazil: banana de brejo, canna de brejo

Xanthosoma undipes (K. Koch & C.D. Bouché) K. Koch (*Alocasia undipes* K. Koch & C.D. Bouché; *Arum xanthorrhizon* Jacq.; *Xanthosoma jacquinii* Schott, nom. illeg.; *Xanthosoma sagittifolium* Liebm., nom. illeg.; *Xanthosoma xanthorrhizon* (Jacq.) K. Koch)

Costa Rica to Trop. America. A fetid odour

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 32, t. 188. 1797, *Meletemata Botanica* 19. 1832, *Hortus Britannicus* 631. 1839, *Oesterreichisches Botanisches Wochenblatt* 4: 410. 1854, *Bonplandia* 4(1–2): 4. 1856 and *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: i-xi, 1–586. 1979

(Acrid milky sap.)

Common names: giant tanier, malanga cochon, tannia, yautia, yautia hueca, yautia palma, yautia silvestre

Xanthoxalis Small Oxalidaceae

From the Greek *xanthos* ‘yellow’ and the genus *Oxalis* L., *oxys* ‘acid, sour, sharp’, see *Species Plantarum* 1: 433–435. 1753, Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Oxalis*. Vienna, apud Christianum F. Wappler; [etc., etc.] 1794 and *Flora of the Southeastern United States* 666–669, 1332–1333. 1903, *Das Pflanzenreich* IV 130(Heft 95): 46, 52. 1930, *Bradea*, *Boletim do Herbarium Bradeanum* 7(2): 201–629. 2000.

Xanthoxalis dillenii (Jacq.) Holub (*Acetosella chinensis* (Haw. ex G. Don) Kuntze; *Acetosella fontana* (Bunge) Kuntze; *Ceratoxalis coloradensis* (Rydb.) Lunell; *Ceratoxalis cymosa* (Small) Lunell; *Oxalis bushii* (Small) Small; *Oxalis chinensis* Haw. ex G. Don; *Oxalis coloradensis* Rydb.; *Oxalis*

North America. Perennial herb

See *Species Plantarum* 1: 435. 1753, *Oxalis*. Monographia, Iconibus Illustrata 28. 1794, *Synoptical Flora of North America* 1(1[2]): 365. 1897 and *Flora of the Southeastern United States* 666–667, 1332. 1903, *Taxon* 31: 596–597. 1982, *Naturaliste Canad.* 111: 447–449. 1984, *Flora Reipublicae Popularis Sinicae* 43(1): 13. 1998, *Biologia* (Bratislava) 56: 53–56. 2001

(Astringent, febrifuge, blood purifier; juice of fresh leaves applied to cuts, wounds, swellings and insect stings. Ceremonial, medicine, anti-witch and evil spirits.)

in English: common yellow oxalis, Florida yellow wood-sorrel, southern yellow wood-sorrel, yellow wood-sorrel

Xerochrysum Tzvelev Asteraceae

Greek *xeros* ‘dry’ and *chrysos* ‘gold’, Latin *helichrysos* and *helichrysum* for the herb marigold, Greek *helisso*, *helissein* ‘to wind, to turn round’ and *chrysos* ‘gold, golden’, some suggested from *helios* ‘sun’.

Xerochrysum bracteatum (Vent.) Tzvelev (*Bracteantha bracteata* (Vent.) Anderb. & Haegi; *Helichrysum bracteatum* (Vent.) Andrews; *Helichrysum bracteatum* (Vent.) Haw.; *Xeranthemum bracteatum* Vent.)

Europe, Asia.

See *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Jardin de la Malmaison* pl. 2. 1803, *Botanist's Repository*, for new, and rare plants 6: pl. 428. 1805 and *Opera Botanica* 104: 102, 105, f. 45A. 1991

(Tonic, decoction taken.)

in English: golden everlasting, strawflower, yellow paper daisy

in Japan: mugi-wara-giku

Xeroderris Roberty Fabaceae (Millettieae)

From the Greek *xeros* ‘dry’ and *derris* ‘a skin, a leather covering, leather coat’, see *Bull. Inst. Franc. Afr. Noire Sér. A.* 16: 353. Apr 1954, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981.

Xeroderris stuhlmannii (Taub.) Mendonça & Sousa (Aganope *stuhlmannii* (Taub.) F. Adema; *Deguelia stuhlmannii* Taub.; *Derris stuhlmannii* (Taub.) Harms; *Lonchocarpus argenteus* A. Chev.; *Ostryoderris chevalieri* (Dunn) Roberty; *Ostryoderris chevalieri* Dunn; *Ostryoderris stuhlmannii* (Taub.) Dunn ex Baker f.; *Ostryoderris stuhlmannii* (Taub.) Harms; *Ostryoderris stuhlmannii* (Taub.) Dunn ex Harms) (for the German botanical collector in East Africa Franz Ludwig Stuhlmann, 1863–1928, Director of the Biological-agricultural institute at Amani 1903–1908, author of *Mit Emin Pasha ins Herz von Afrika*. Berlin 1894 and *Beiträge zur Kulturgeschichte von Ostafrika*. Berlin 1909; see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933; Alain White and Boyd Lincoln Sloane, *The Stapelieae*. Pasadena 1937, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 343. 1965. According to some authors the species named after Franz Ernst Stuhlmann, one time Acting Governor of Tanganyika and collector of plants.) (*Ostryoderris* Dunn, possibly from the Greek *ostreion*, *ostreon* ‘an oyster’.)

Tropical Africa. Perennial non-climbing tree, spreading, exuding a red sap when cut, rounded crown, imparipinnate leaves crowded at the ends of branches, white to greenish white flowers in branched axillary and terminal sprays, leathery pods with a prominent winged rim

See *An Introduction to the Natural System of Botany* 148. 1836, *Die Pflanzenwelt Ost-Afrikas* C 218. 1895 and *Bulletin of Miscellaneous Information Kew* 1911: 363. 1911, *Die Pflanzenwelt Ost-Afrikas* 3(1): 644. 1915, *The Leguminosae of Tropical Africa* 2: 563. 1929, *Boletim da Sociedade Broteriana*, ser. 2 43: 273. 1968, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Journal of Ethnopharmacology* 29: 295–323. 1990, *Thai Forest Bull., Bot.* 28: 10. 2000, *Journal of Ethnopharmacology* 99(2): 273–279. 2005

(Whole plant and roots for colds, cough, elephantiasis, eye inflammation. Bark astringent, for diarrhea, dysentery, stomach troubles, pulmonary troubles, malaria; root bark for arthritis, rheumatism. Stem bark and roots for skin diseases, inflammation, fevers, earache.)

in English: wingbean

in Benin: nyamade, siro, betti-penyarou, nyanmare, tchahouloum, tchalawari, tiamolon, tinyandoyi

in Mali: atcokoi, bèbè, dani rameji, funjaa, jira bwamene, kalajege, kalajige, kungodugaranin, mugioro, muso sanan, musonsanan

in Mauritania: bani ndaneewi

in Nigeria: durbi, erumaki

in Senegal: a-médé, a-nèd, a-nédé, bāgo kabu, bāndanéyi, bāngokob, bani dan, banidanewi, banidanèy, dané da, danéranéd, gi-nédi

in Southern Africa: murumanyama, muzamalowa, vlerkboom

in Tanzania: mnonondo, mnyinga, mondogondo, mumundu

in Togo: tchalawaré, tchalemдем

in W. Africa: kalajege, kalajige

in Zimbabwe: muchemavanhu, mudzugu, mumwambizi, muriravanhu, murumanyama, umthundulu

Xerophyllum Michaux Melanthiaceae (Liliaceae)

Greek *xeros* 'dry' and *phyllon* 'leaf', an allusion to the dry, tough and grass-like leaves.

Xerophyllum asphodeloides (L.) Nuttall (*Helonias asphodeloides* L.; *Helonias tenuifolia* Salisb.; *Xerophyllum setifolium* Michx., nom. superfl.)

North America.

See *Sp. Pl.* ed. 2, 1: 485. 1762, *Prodr. Stirp. Chap. Allerton* 250. 1796, *Fl. Bor.-Amer.* 1: 210. 1803, *Gen. N. Amer. Pl.* 1: 235. 1818 and Utech, F.H. "Comparison of the vascular floral anatomy of *Xerophyllum asphodeloides* (L.) Nutt. and *X. tenax* (Pursh) Nutt. (Liliaceae-Melanthioideae)." *Ann. Carnegie Mus.* 47: 147–167. 1978

(Alkaloids.)

in English: mountain asphodel, Turkey beard

Xerophyllum tenax (Pursh) Nuttall (*Helonias tenax* Pursh; *Melanthium spicatum* Walter, nom. illeg.; *Melanthium spicatum* Burm.f.; *Xerophyllum douglasii* S. Watson; *Xerophyllum tenax* Nutt.)

North America. Herb, perennial, stout flower stalks, many tiny white flowers in a dense cylindrical elongated raceme, bulbous rhizomes roasted for several days before being eaten

See *Fl. Ind.* (N.L. Burman) *Prodr. Fl. Cap.*: 11. 1768, *Fl. Carol.* [Walter] 125. 1788, *Fl. Amer. Sept.* (Pursh) 1: 243, plate 9. 1813, *Gen. N. Amer. Pl.* [Nuttall] 1: 235. 1818, *Proc. Amer. Acad. Arts* 14: 284. 1879 and Maule, S.M. "Xerophyllum tenax, squawgrass, its geographic distribution and its behavior on Mount Rainier, Washington." *Madroño* 15: 39–48. 1959

(Grated roots used for bleeding; poultice of chewed roots applied to wounds, to wash sores; roots decoction applied to the scalp as a hair restorer.)

in English: bear grass, beargrass, common bear grass, elk grass, Indian basket grass, squaw grass

Xerophyta Juss. Velloziaceae

From the Greek *xeros* 'dry' and *phyton* 'plant', see *Florae Lusitanicae et Brasiliensis Specimen* 21, 32, t. 1. 1788, *Genera Plantarum* [Jussieu] 50. 1789, *Systema vegetabilium* 1: 530. 1796, Mikan, Johann Christian (1769–1844), *Delectus Florae et Faunae Brasiliensis* 2: pl. 1. Vindobonae [Vienna], 1820–[25], *Theoria Systematis Plantarum* 9. 1858 and *Kew Bull.* 29(1): 181–205. 1974.

Xerophyta equisetoides Baker (*Vellozia equisetoides* (Baker) Baker; *Xerophyta retinervis* Baker var. *equisetoides* (Baker) Coetzee)

Tropical Africa. Shrub, many-branched

See *Journal of Botany, British and Foreign* 13: 233. 1875, *Flora Capensis* 6: 245. 1896 and *Dinteria: Contributions to the Flora of South West Africa* 9: 4. 1973

(Roots and whole plant abortifacient, hemostatic.)

Xerophyta spekei Baker (*Barbacenia aequatorialis* (Rendle) Harms; *Barbacenia helenae* Buscalioni & Muschler; *Barbacenia spekei* Harms; *Barbacenia spekei* (Baker) Harms; *Barbacenia tomentosa* Mart.; *Barbacenia tomentosa* Pax; *Vellozia aequatorialis* Rendle; *Vellozia spekei* Baker; *Vellozia spekei* (Baker) Baker; *Vellozia spekei* (Baker) Jackson; *Vellozia tomentosa* Pohl; *Vellozia tomentosa* Baker; *Vellozia tomentosa* (Pax) Baker; *Xerophyta aequatorialis* (Harms) N.L. Menezes; *Xerophyta aequatorialis* (Rendle) N.L. Menezes; *Xerophyta tomentosa* T. Durand & Schinz; *Xerophyta tomentosa* (Pax) T. Durand & Schinz)

Tropical Africa. Shrub or treelet, herb

See *Nova Genera et Species Plantarum ...* (Martius) 1: 18, t. 11. 1823, *Plantarum Brasiliae Icones et Descriptiones hactenus ineditae.* (1826–) 1827–1831 (–1833), *Journal of Botany, British and Foreign* 13: 234. 1875, *Transactions of the Linnean Society of London* 29(3): 156. 1875, *Bot. Jahrb. Syst.* 15(1): 144. 1892, *Consp. Fl. Afr.* [T.A. Durand & H. Schinz] 5: 272. 1894 [1893 publ. Dec 1894], *Journal of the Linnean Society, Botany* 30: 409. 1895 [1893–1895 publ. 1895], *Index Kewensis* 1173. 1895, *Die Pflanzenwelt Ost-Afrikas* 146. 1895, *Flora of Tropical Africa* [Oliver et al.] 7(3): 412. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 462. 1913, *Ciencia e Cultura* 23(3): 422. 1971

(Stem bark antiinflammatory, hemostatic, postpartum remedy, for body ache, postpartum hemorrhage.)

in Tanzania: msae

Xerospermum Blume Sapindaceae

From the Greek *xeros* 'dry' and *sperma* 'a seed', referring to the nature of the seeds, see *Rumphia* 3: 99–100. 1849.

Xerospermum glabratum (Kurz) Radlk. (*Xerospermum glabratum* Radlk.; *Xerospermum glabratum* Pierre)

India.

See *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* viii. (1878) 300, 310. 1878 and ix. (1879) 516. 1879, *Fl. Forest. Cochinch.* Fasc. 21 (1895) sub t. 320, 322. 1895

(Ripe fruit eaten for potency and for improving memory.)

in India: kuranchi

Ximения L. Olacaceae

The genus was named in honor of the Spanish monk and botanist Francisco Ximenez, a native of Luna in the Kingdom of Aragon, in 1605 he came to New Spain, in 1612 (25th February) he became a lay brother of the Convento de Santo Domingo de Mexico; he edited and translated, by the Spanish physician Francisco Hernandez (1514–1587), *Quatro libros de la naturaleza y virtudes de las plantas y animales que estan recevidos en el uso de Medicina en la Nueva España ... Traduzido, y aumentados muchos simples, y Compuestos y otro muchos secretos curativos, por Fr. Francisco Ximenez ... Mexico 1615, and Rerum Medicarum Novae Hispaniae Thesaurus. Romae 1651; see Francisco Guerra, Bibliografia de la Materia Medica Mexicana. 319 (under Ximenez, 203 fol.) Mexico City 1950; Mario Sartor, "Libri dell'altro mondo." *La Bibliofilia. Anno XCLX. 1: 1–37. 1997; Carl Linnaeus, Species Plantarum 1193. 1753 and Genera Plantarum Ed. 5. 500. 1754 and Rhodora 71: 439–443. 1969.**

in Zimbabwe: mutsvanzva

Xiphidium Aublet Haemodoraceae

From the Greek *xiphos* 'a sword, dagger', the diminutive *xiphidion*, see *Histoire des plantes de la Guiane Française* 1: 33, t. 11. 1775 and *Fieldiana, Bot.* 24(3): 100–103. 1952, *Fl. Neotrop.* 61: 1–44. 1993, *Fl. Mesoamer.* 6: 47–48. 1994.

Xiphidium caeruleum Aubl. (*Ixia xiphidium* Loeffl.; *Xiphidium albidum* Lam., nom. superfl.; *Xiphidium album* Willd.; *Xiphidium caeruleum* var. *albidum* (Lam.) Backer; *Xiphidium floribundum* Sw.; *Xiphidium floribundum* var. *albiflorum* Hook.f., nom. inval.; *Xiphidium floribundum* var. *caeruleum* (Aubl.) Hook.f., nom. illeg.; *Xiphidium foceanum* Miq.; *Xiphidium giganteum* Lindl.; *Xiphidium loeflingii* Mutis; *Xiphidium rubrum* D. Don)

French Guiana, Mexico to Trop. America.

See *Histoire des plantes de la Guiane Française* 1: 33, t. 11. 1775, *Nova Genera et Species Plantarum seu Prodrum* 17. 1788, *Species Plantarum*. Editio quarta 1(1): 248. 1798, *Edinburgh New Philosophical Journal* 13: 235. 1832, *Linnaea* 17: 63. 1843, *Edwards's Botanical Register* 32: t. 66. 1846, *Botanical Magazine* 84, t. 5055. 1858

(A snakebite cure. Used for female infirmities. Leaves rubbed on feet and knees of child learning to walk.)

in English: walk fast

in Panama: soskia, soso

Xylia Benth. Fabaceae (Leguminosae, Mimosaceae, Mimoseae)

From the Greek *xylon* 'wood', the timber is very hard, see *J. Bot.* (Hooker) 4: 417–418. 1842 and *Rec. Bot. Surv. India* 9: 1–218. 1921, *Union Burma J. Life Sci.* 4: 1–37. 1971, *Guide to Philippine Flora & Fauna* 3: 199–230. 1986. Related to *Calpocalyx*.

Xylia evansii Hutch.

Tropical Africa. Perennial non-climbing tree, inflorescence an axillary head, fruit a narrowly oblong flattened woody pod, roasted seeds edible

See *Bulletin of Miscellaneous Information Kew* 1908: 258. 1908

(Twigs and leaves wound dressing, for mouth ulcers; a decoction of leafy twigs taken as a cholagogue and tonic.)

Xylia hoffmannii (Vatke) Drake (*Parkia hoffmannii* Vatke; *Parkia perrieri* (Drake) Palacky; *Schleinitzia hoffmannii* (Vatke) Guinet; *Xylia hildebrandtii* Baill.; *Xylia hoffmanni* Drake; *Xylia perrieri* Drake)

Madagascar.

See *Linnaea* 43: 338–339. 1882, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(45): 353–354. 1883, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1301–1302. 1896 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 49. 1902[1903], *Travaux de la Section Scientifique et Technique, Institut Français de Pondichéry* 9: 33, 291. 1969

(Pod decoction taken as a tonic.)

in Madagascar: araky, bonara, haraka, harka, hazompily, menahy, tsiasoka, tsimahasasatra, tsiroka, tsirokaka, voankazomeloka

Xylia xylocarpa (Roxb.) Taub. (*Acacia xylocarpa* (Roxb.) Willd.; *Acacia xylocarpa* Willd.; *Acacia xylocarpa* Benth., nom. illeg.; *Acacia xylocarpa* A. Cunn. ex Benth., nom. illeg.; *Inga xylocarpa* (Roxb.) DC.; *Mimosa xylocarpa* Roxb.; *Xylia dolabriformis* Benth.; *Xylia xylocarpa* Taub.; *Xylia xylocarpa* (Roxb.) W. Theobald)

Thailand, India. Perennial non-climbing tree, deciduous, unarmed, bark smooth reddish grey exfoliating, leaves bipinnate, glands on the rachis between the upper leaflets, flowers white to yellowish white, in globose heads crowded on short branchlets, flat woody pods, brown seeds eaten as vegetable

See *Plants of the Coast of Coromandel* 1: 68, pl. 100. 1795, *Species Plantarum*. Editio quarta [Willdenow] 4(2): 1055. 1806 [Apr 1806], *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 439. 1825, *London Journal of Botany* 1: 370. 1842, *Journal of Botany*, being a second series of the Botanical Miscellany 4(32): 417–418. 1842, Mason, Francis, 1799–1874, *Burmah, its people and productions, or, Notes on the fauna, flora, and minerals of Tenasserim, Pegu, and Burma*/by F. Mason; rewritten and enlarged by W. Theobald. [3rd ed.] 2: 541. Hertford: Published by order of the Chief Commissioner of British Burma by S. Austin, 1882–1883, *Botanisches Centralblatt* 47: 395. 1891 and *Taxon* 34(1): 152–156. 1985, Sinha, R.K. *Ethnobotany. The Renaissance of Traditional Herbal Medicine*. Ina Shree Publishers, Jaipur, India 1996, *Journal of Ethnopharmacology* 98(3): 307–312. 2005

(Used in Ayurveda and Sidha. Bark powder vermifuge, for vomiting, swellings, gonorrhea, diarrhea and ulcers; stem bark chewed with salt crystal for dysentery; decoction of bark for leprosy, worms, ulcers, gonorrhea, diarrhea, vomiting. Young leaves crushed and applied to subdue the allergic effects of *Tragia*. Seed oil given in rheumatism, piles, leprosy. Crushed stem bark as fish poison.)

in English: ironwood, ironwood of Burma

in Burma: cam ne, mai sa-lan, pkhay, praing, pran, pyin, pyingado

in China: mian dian tie mu

Annonaceae.]” *Comptes rendus des séances de la Société de biologie et de ses filiales* 170(6): 1187–1188. 1976

(Whole plant and roots antispasmodic, wound dressing, for bronchitis, mouthwash. The soft inner bark of *Xylophia quintasii* is beaten, and rubbed on hands with knotty swellings. Bark and leaves as fish poison.)

in Cameroon: mfoenga, njie, otouan, otungui, pene

in Central Africa: bombaya, elo, mossangi, mvoma, mvouma, nséli, omviala

in Ivory Coast: elo

in Liberia: gbay, gbay-dee

in Nigeria: aghako, awonka, ofun, opalifon, ovonien; opalifon (Yoruba); ovunien (Edo); udaofia (Igbo); bolonge (Boki)

Xylopiopsis benthamii R.E. Fr. (*Xylopiopsis benthamii* var. *dolichopetala* R.E. Fr.; *Xylopiopsis benthamii* var. *subnuda* R.E. Fr.; *Xylopiopsis ulei* Diels)

Venezuela, Colombia. Small tree

See *Kongliga Svenska Vetenskapsakademiens Handlingar* 10(5): 35, t. 5, f. 2–4. 1900, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 47: 133. 1905, *Acta Horti Bergiani* 10(2): 333. 1931, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 33A(9): 8–9. 1947, *Proc. Kon. Ned. Akad. Wetensch.*, C 89(3): 249–278. 1986

(Sedative infusion, a tranquilizer. Leaves and stems infusion drunk to induce sleep.)

Xylopiopsis discreta (L.f.) Sprague & Hutch. (*Unona discreta* L.f.; *Xylopiopsis discreta* Sprague & Hutch.)

Venezuela. Tree, sweetly fragrant creamy-green flowers

See *Suppl. Pl.* 270. 1782 [1781 publ. Apr 1782] and *Bull. Misc. Inform. Kew* 1916, 160. 1916, *Parasite Immunology* 31(10): 623–630. 2009

(Antileishmanial and immunomodulatory activity.)

Xylopiopsis emarginata Mart.

Brazil.

See *Flora Brasiliensis* (Martius) 13(1): 42. 1841 and *Acta Horti Berg.* 12: 209. 1934, *Journal of Ethnopharmacology* 110(1): 165–170. 2007

(Antiplasmodial, the root bark.)

Xylopiopsis ferruginea (Hook.f. & Thomson) Hook.f. & Thomson) (*Habzelia ferruginea* Hook.f. & Thomson)

India. Tree

See *Flora Indica*: being a systematic account of the plants . . . 1: 123. 1855, *The Flora of British India* 1: 83. 1872

(Leaves and bark decoction taken to stop vomiting.)

Malayan names: antoi jangkang, jangkak, jangkang betina, jangkang bukit, jangkang merah, jangkang paya, jari ayam, medang kenanga, pisang pisang jari, stilted antoi

Xylopiopsis hypolampra Mildbr. (*Xylopiopsis brieyi* De Wild.; *Xylopiopsis hypolampra* Mildbr. & Diels)

Gabon.

See *Notizbl. Königl. Bot. Gart. Berlin*, Append. 27: 18. 1913, *Bull. Jard. Bot. État Bruxelles* 4: 385. 1914, *Bot. Jahrb. Syst.* 53: 444. 1915

(Bark and leaves as fish poison.)

in Cameroon: moley, nom akwi, sangu

in Central Africa: abies, biez, lukangua, moinzou, moley, ndong-éli, sangu

in Congo: biez

in Gabon: ndong-eli

Xylopiopsis langsdorffiana A.St.-Hil. & Tulasne (*Xylopiopsis langsdorffiana* A.St.-Hil. & Tul.)

Brazil.

See *Ann. Sci. Nat., Bot.* sér. 2, 17: 133. 1842 and *Journal of Natural Products* 69(6): 960–962. 2006, *Zeitschrift für Naturforschung. C, Journal of Biosciences* 64(9–10): 650–656. 2009

(Xylodiol, a potential antitumoural agent, inhibited human leukemia cell growth in vitro.)

Xylopiopsis malayana Hook.f. & Thomson

Malaysia. Tree, bole without stilt roots, glabrous leaves, small fleshy corolla with spreading tepals, 3–4 ripe pink carpels with 2–7 seeds in two rows

See *Flora Indica*: being a systematic account of the plants . . . 125. 1855

(Roots decoction as a postpartum remedy.)

Malay names: jangkang, meroyan angin

Xylopiopsis parviflora (Guill. & Perr.) Engl. & Diels (*Coelocline acutiflora* (Dunal) A. DC.; *Coelocline oxypetala* A. DC.; *Coelocline oxypetala* (De Candolle) A. DC.; *Coelocline parviflora* A. Bot.* 64(Suppl. 1): 8. 1926, *Flora of West Tropical Africa* 1: 53. 1927, *Journal of Natural Medicines* 64(1): 9–15. 2010

(Stem bark febrifuge, antinociceptive, for colds, skin diseases, infections. Bark and leaves as fish poison.)

in Central African Republic: sangi tingoo

in Nigeria: sesedo (Yoruba); aghako (Edo); kimba (Hausa)

in Yoruba: sesedo

in Zaire: sange

in South America: espintana de varillal

Xylophia parvifolia Schltdl. (*Xylophia parvifolia* Hook.f. & Thomson)

India, Sri Lanka.

See *Linnaea* 9: 327. 1834, *Fl. Ind.* [Hooker f. & Thomson] i. 125. 1855

(Used in Sidha.)

in India: chidda-vintai, kalpootta, kalpottan, kallupottan, karporuttal, saanthu, santhu, santu, ulli

Xylophia pierrei Hance

Indochina. Tree, deciduous, leaves alternate, calyx tubular 3-lobed, petals linear, stamens spirally arranged, hairy ovary, fruit ovoid berry-like woody dehiscent, very aromatic seeds ovoid with a yellow aril, wood hard and flexible, in mountain forest, closely related to *Xylophia parviflora* A. Richard

See *J. Bot.* 15: 328. 1877

(Bark very astringent, chewed with betel.)

in Indochina: yen trang

Xylophia sericea A. St.-Hil. (*Mayna sericea* Spreng.; *Unona carminativa* Arruda; *Unona fluminensis* Vell.; *Xylophia carminativa* (Arruda) R.E. Fr.; *Xylophia intermedia* R.E. Fr.; *Xylopicrum carminativum* (Arruda) Kuntze)

Brazil.

See Camara, Manoel Arruda da (1752–1810), *Dissertação sobre as plantas do Brazil*. Rio de Janeiro, 1810, *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde*

2: 153. 1821, Velloso, José Mariano da Conceição (1742–1811), *Florae fluminensis*. 1825 [1829]–1827, Saint-Hilaire de, Auguste (1779–1853), *Flora Brasiliae Meridionalis*. Parisiis: Apud A. Belin, 1825–1833, *Revisio Generum Plantarum* 1: 8. 1891 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(5): 32. 1900, *Revista Boliviana Ecol. Cons. Amb.* 7: 93–114. 2000, *Mutation Research* 701(2): 153–163. 2010

(Kaurane diterpenes anticancer chemotherapeutic agents.)

in Bolivia: pequi, piraquina negra

Xylophia staudtii Engler & Diels (*Xylophia mayombensis* De Wild.; *Xylophia staudtii* Engl.)

Tropical Africa. Tree, copious red sap, flowers orange-yellow, seed black with red arils

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 298. 1899 and *Bull. Jard. Bot. État Bruxelles* 4: 386. 1914, *Proc. Kon. Ned. Akad. Wetensch.*, C 89(3): 249–278. 1986

(Stem bark and fruits for headache, colds, cough.)

in Cameroon: mbanbana, ntouleng, odjobi

in Central Africa: adjobi, adouébé, bosanghe, dungamufiki, efomou, fondé, ishenge, iole mukunze, lupusu, ndunga mufike, niombe, nsanghe, ntsua, odjwé

in Gabon: ntsua

in Ivory Coast: fondé

Xylophia vielana Pierre

Thailand and Indochina. Evergreen tree, reddish bark, leaves alternate entire simple, flowers solitary or 2–3 together in leaf axils, calyx tubular fleshy, petals linear purplish tomentose, fleshy oblong hairy style, fruit berry-like purplish pubescent, seed ovoid with a purplish aril, similar to *Xylophia malayana* Hook.f. & Thomson

See *Flore Forestière de la Cochinchine* 1: t. 34. 1881 and *Phytochemistry* 64(4): 811–816. 2003

(Essential oil from the aromatic seeds; dimeric guaianes from the leaves.)

in Indochina: gien do, krat, kray lan

in Thailand: kluai noi, sa thaang, taa laeo

in Vietnam: c[aa]y d[eef]n

Xylophia villosa Chipp

Tropical Africa.

See *Bull. Misc. Inform. Kew* 1923, 183. 1923

(Stem bark and leaves for headache, fevers, colds, cough.)

in Nigeria: unien; palufon dudu (Yoruba); aghako (Edo); uda (Igbo)

Xylorhiza Nutt. Asteraceae

From the Greek *xylon* ‘wood’ and *rhiza* ‘root’, woody root, see *Transactions of the American Philosophical Society*, new series, 7: 297–298. 1840 and *Brittonia* 9(4): 239. 1957.

Xylorhiza tortifolia (Torr. & A. Gray) Greene (*Aplopappus tortifolius* Torr. & Gray; *Aster abatus* S.F. Blake; *Aster goodingii* Onno; *Aster mohavensis* Coville, nom. illeg., non *Aster mohavensis* Kuntze; *Aster tortifolius* Michx.; *Aster tortifolius* (Torr. & A. Gray) A. Gray, nom. illeg., non *Aster tortifolius* Michx.; *Haplopappus tortifolius* Torr. & A. Gray; *Machaeranthera tortifolia* (Torr. & A. Gray) Cronquist & D.D. Keck; *Sericocarpus tortifolius* (Michx.) Nees; *Xylorhiza lanceolata* Rydb.; *Xylorhiza scopulorum* A. Nelson)

USA, California. Perennial, woody base, suffrutescent, many-branched, tomentose when young, leathery aromatic leaves coarsely spine-toothed, flowers that can vary from violet to lavender to almost white, flowers solitary on the ends of leafless peduncles, dry flat areas, on dry rocky slopes and in washes and canyons of the Mojave and northern Colorado Deserts, creosote scrub community

See *Species Plantarum* 2: 872–877. 1753, *Flora Boreali-Americana* 2: 109. 1803, *Dictionnaire des Sciences Naturelles* 56: 168. 1828, *Genera et Species Asterearum* 10, 13, 148–152, 224–225. 1832, *Boston J. Nat. Hist.* 5(1): 109. 1845, *Proceedings of the American Academy of Arts and Sciences* 7: 353. 1868, *Contributions from the United States National Herbarium* 4: 126. 1893, *Pittonia* 3(14B): 48. 1896 and *Botanical Gazette* 37(4): 270. 1904, *Bulletin of the Torrey Botanical Club* 37(3): 146. 1910, *Contributions from the United States National Herbarium* 25: 562. 1925, *Brittonia* 9(4): 239. 1957, *Brittonia* 29: 210. 1977, Richard W. Stoffle et al. “Calculating the cultural significance of American Indian plants: Paiute and Shoshone ethnobotany at Yucca Mountain, Nevada.” *American Anthropologist*, New Series, 92(2): 416–432. 1990, *Phytologia* 68: 462. 1990, *Rhodora* 94: 48–62. 1992, *Sida* 15: 649–653. 1993

(Ceremonial, incense and fragrance. Poisons for mammals. Larval food plant for the moths *Schinia labe*, *Schinia lanul*, *Schinia ligeae* and *Schinia jaegeri*.)

in English: desert aster, hurt-leaf woody-aster, Mojave aster, Mojave woodyaster

Xylorhiza venusta (M.E. Jones) A. Heller (*Aster venustus* M.E. Jones; *Machaeranthera venusta* (M.E. Jones) Cronquist & D.D. Keck)

Noth America. Low desert scrub

See *Species Plantarum* 2: 872–877. 1753, *Genera et Species Asterearum* 13, 224–225. 1832, *Transactions of the American Philosophical Society*, new series, 7: 297–298. 1840, *Zoë* 2(3): 247. 1891 and *Muhlenbergia*; a journal of botany 1(1): 8. 1900, *Brittonia* 9(4): 239. 1957, *Madroño* 25: 205–210. 1978

(It belongs to the class of “secondary selenium accumulators”, the woody aster is capable of accumulating selenium from soils rich in this element.)

in English: woody aster

Xylosma Forster f. Flacourtiaceae (Salicaceae)

Fragrant wood, from the Greek *xylon* ‘wood’ and *osme* ‘smell, odour, perfume’; see *Characteres Generum Plantarum* no. 63. 1775, Johann Georg Adam Forster (1754–1794), *Florulae insularum australium prodromus*. 72. (Oct.–Nov.) 1786, *Kongl. Vetenskaps Akademiens Nya Handlingar* 13: 32, 35. 1792 and *Taxon* 58(3): 1014. 2009.

Xylosma latifolia Hook.f. & Thomson

India.

See *Fl. Brit. India* [J.D. Hooker] 1: 194. 1872

(Root or stem bark ground and the paste applied on boils of children.)

in India: kappali-gida

Xylosma longifolia Clos (*Xylosma congesta* (Lour.) Merr. var. *kwangtungensis* F.P. Metcalf; *Xylosma racemosa* (Siebold & Zucc.) Miq. var. *kwangtungensis* (F.P. Metcalf) Rehder)

China, India. Deciduous tree, yellowish-brown bark, oblong coriaceous leaves, yellow fragrant flowers in dense axillary racemes, red globose fruits

See *Ann. Sci. Nat., Bot.* sér. 4, 8: 230. 1857, *Ann. Mus. Bot. Lugduno-Batavi* 2: 155. 1866 and *Philipp. J. Sci.* 15: 247. 1920 [dt. 1919; issued 1920], *Journal of the Arnold Arboretum* 12(4): 272. 1931, *Journal of the Arnold Arboretum* 15(2): 102. 1934

(Dry powdered bark given for stomachache, vermifuge, intestinal worms.)

in China: chang ye zuo mu

in India: thegpi-ani-araung, thegpi-kani-araung

Xylothea Hochst. Flacourtiaceae (Achariaceae)

Greek *xylon* ‘wood’ and *theke* ‘case’, *xylotheke* ‘wood-house’, the fruit is a woody capsule, see *Flora* 26: 69. 1843.

Xylothea kraussiana Hochst. (*Oncoba kraussiana* Planch.; *Oncoba kraussiana* (Hochst.) Planch.; *Xylothea kotzei* Phill.; *Xylothea kraussiana* var. *glabrifolia* Wild) (for the German (b. and d. Stuttgart) botanist and traveller Christian Ferdinand Friedrich von Krauss, 1812–1890, zoologist, botanical explorer, 1838–1840 plant collector in South Africa; see Christian Ferdinand Hochstetter (1787–1860), “Pflanzen des Cap- und Natal-landes, gesammelt und zusammengestellt von Dr. Ferdinand Krauss.” *Flora*. 28: 337–344, 753–764. 1845

and 29: 113–129, 129–138, 209–219. 1846; Mary Gunn and Leslie E. Codd, *Botanical exploration of southern Africa*. 210–212. Cape Town 1981; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. 2: 386. Utrecht 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 195. 1964; O.H. Spohr, *Ferdinand Krauss: Travel Journal/Cape to Zululand. Observations by a Collector and Naturalist 1838–40*. Cape Town 1973; J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 319. 1965; T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 219. 1972; Stafleu and Cowan, *Taxonomic Literature*. 2: 668. 1979)

Southern Africa, from Transkei to Mozambique. Small shrub or treelet, multi-stemmed, spineless, white sweetly scented flowers, an ovoid woody capsule with pointed apex, reddish black seeds, bright red pulp around seeds eaten by birds and children

See *Flora* 26: 69. 1843, *London J. Bot.* 6: 296. 1847 and *Bull. Misc. Inform. Kew* 1922, 193. 1922

(Emetic. Magic, roots used in love charm.)

in English: African dog-rose, umbalekani tree

in Southern Africa: Afrikaanse hondroos; umDubu (Xhosa); umBhalekani, umBalekani, umNaminami, uNamnyani, uMavuthwa-emfuleni, isiNkankanka, isiShwashwa (Zulu)

Xylotheca tettensis (Klotzsch) Gilg (*Chlanis tettensis* Klotzsch; *Oncoba tettensis* (Klotzsch) Harv.; *Xylotheca tettensis* Gilg)

Tropical Africa. Shrub, white fragrant flowers, woody capsule

See *Flora Capensis* 2: 584. 1862 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 456. 1908

(Roots chewed as an aphrodisiac, or drunk as decoction.)

in Tanzania: machekachoka

Xylotheca tettensis (Klotzsch) Gilg var. *kirkii* (Oliv.) Wild (*Oncoba kirkii* Oliv.; *Oncoba tettensis* var. *kirkii* (Oliv.) S. Hul & Breteler; *Xylotheca kirkii* Gilg)

Tanzania, Kenya. Shrub or small tree, creeping, erect, lianescent, many-branched, white fragrant flowers, hard capsule, sweet ripe fruits eaten raw, bee forage, at forest edge, disturbed areas, lowland, woodland

See *Flora Aegyptiaco-Arabica* cxiii, 103–104. 1775, *Flora* 26: 69. 1843, *Naturwissenschaftliche Reise nach Mossambique ...* 1: 145. 1861, *Flora Capensis* 2: 584. 1862, *Flora of Tropical Africa* [Oliver et al.] 1: 116. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 455–456. 1908, *Boletim da Sociedade Broteriana*, ser. 2 32: 55. 1958, *Adansonia*, Sér. 3 19: 261. 1997

(Roots used as an aphrodisiac.)

in English: Northern African dog-rose

in Tanzania: mchekaucha, mchekwa, mchemka, mkekena, mkekwa, mkwema, mlimia mbopo, mnywanywa, mripuripu, mseka, msekaseka, msekuli, msekwasekwa, njabu, njaunabonde

Xyris L. Xyridaceae

Xyris, Greek name for an aromatic plant, a species of *Iris*, so called from its razor-like leaves, *xyron* 'a razor', Latin *xyris*, *idis* applied by Plinius to a wild iris; see Carl Linnaeus, *Species Plantarum*. 1: 42. 1753, *Genera Plantarum*. Ed. 5. 25. 1754, *Flora Brasiliensis* 3(1): 211. 1855 and *Fieldiana, Bot.* 24(1): 370–373. 1958, *Fl. Mesoamer.* 6: 174–177. 1994.

Xyris complanata R. Br. (*Xyris anceps* Vahl, nom. illeg.; *Xyris elongata* Rudge; *Xyris laevis* R.Br.; *Xyris malaccensis* Steudel; *Xyris scabra* R.Br.; *Xyris walkeri* Kunth)

China, Trop. Asia, Australia. Herb, perennial, leaves linear flattened in enfolded pairs, petals yellow, scapes flat to subterete, sterile bracts often keeled, fertile bracts obovate, lateral outer tepals obovate, moist sandy soil in coastal areas, in damp or swampy areas, wastelands

See *Species Plantarum* 1: 42. 1753, *Gen. Pl.* ed. 5: 25. 1754, *Prodromus Florae Novae Hollandiae* 256. 1810, *Transactions of the Linnean Society of London* 10: 289, pl. 15, f. 1. 1811, *Enum. Pl.* 4: 19. 1843, *Synopsis Plantarum Glumacearum* 2: 287. 1855, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 19. 1861 and Wu Kuo-fang, *Xyridaceae*. In: Wu Kuo-fang, ed., *Fl. Reipubl. Popularis Sin.* 13(3): 11–19. 1997

(Antifungal, antibacterial.)

in English: Hawai'i yelloweyed grass

in China: ying ye cong cao

Xyris jupicai Rich. (*Xyris acuminata* Miq. ex Steud.; *Xyris anceps* Pers., nom. illeg.; *Xyris arenicola* Miq.; *Xyris communis* Kunth; *Xyris guianensis* Klotzsch, nom. nud.; *Xyris gymnoptera* Griseb.; *Xyris jupicai* Michx., nom. illeg.; *Xyris jupicai* var. *brachylepis* Malme; *Xyris jupicai* var. *humilis* (Kunth) Malme; *Xyris laxifolia* var. *minor* Mart.; *Xyris laxifolia* var. *sellowiana* (Kunth) Seub.; *Xyris macrocephala* Vahl; *Xyris macrocephala* f. *minor* (Mart.) Malme; *Xyris macrocephala* var. *minor* (Mart.) L.A. Nilsson; *Xyris macrocephala* fo. *minor* (Mart.) M. Kuhl. & Kuhn; *Xyris partita* Chapm. ex Ries; *Xyris sellowiana* Kunth; *Xyris sellowiana* f. *humilis* Kunth; *Xyris surinamensis* Miq., nom. illeg.)

French Guiana, Brazil, Trop. & Subtrop. America.

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 132. 1791, *Actes de la Société d'Histoire Naturelle de Paris* 1: 106. 1792, *Flora Boreali-Americana* 1: 23. 1803, *Flora* 24(Beibl. 2): 53. 1841, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 12–13. 1843, *Linnaea* 18: 75. 1844, *Synopsis Plantarum Glumacearum* 2: 284. 1855 and

Svensk Botanisk Tidskrift 21: 394. 1927, *Fl. Mesoamer.* 6: 174–177. 1994

(A sterilizer, the juice of the whole plant.)

in Paraguay: piri pyta, piri taja

Xyris pauciflora Willd. (*Synoliga pauciflora* (Willd.) Raf.; *Xyris pauciflora* Willd. var. *oryzetorum* Miq.)

India, Indonesia. Tufted erect annual herbs, many fibrous roots, acuminate scabrous leaves, yellowish-brown flowers in a head, minute linear seeds, bulbs are eaten

See *Phytographia* 1: 2, pl. 1, f. 1. 1794, *Flora Telluriana* 2: 15. 1837, *Flora van Nederlandsch Indië* 3: 529. 1855

(The herb to cure sleeplessness.)

in China: cong cao

Xyris savanensis Miq. (*Xyris americana* Vahl, nom. illeg.; *Xyris glabrata* (Seub.) Griseb.; *Xyris pumila* Pohl ex Seub.; *Xyris savanensis* f. *primaria* Malme; *Xyris savanensis* f. *procera* Malme; *Xyris savanensis* var. *glabrata* Seub.; *Xyris savanensis* var. *procera* (Malme) Malme)

Trop. South America.

See *Linnaea* 18: 605. 1845 and *Ark. Bot.* 13(3): 53. 1913

(A sterilizer, the juice of the macerated roots.)

in Paraguay: piri pyta, piri taja

Xysmalobium R. Br. Asclepiadaceae (Apocynaceae)

Greek *xysme*, *xysma* 'shavings, particles, a scar, fragment' and *lobos* 'lobe, division', *lobion* dim. from *lobos*, referring to the crown or corona, see *Mem. Wern. Soc.* i. (1809) 38. 1809, *On the Asclepiadeae* 27. 1810, *Hortus Kewensis*; or, a catalogue ... The second edition 2: 79. 1811, *Commentariorum de Plantis Africae Australioris* 218–9. 1838 and *Kew Bull.* 1952: 413. 1952.

Xysmalobium heudelotianum Decne. (*Schizoglossum heudelotianum* (Decne.) Roberty)

Tropical Africa. Perennial, erect, creeping herb, carrot-shaped tuberous roots full of latex, greenish-yellow to purple petals, flowers in small clusters, narrow fruits, flat seeds

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 520. 1844 and *Bulletin de l'Institut Française d'Afrique Noire* 15: 1430. 1953

(Tuber bitter, tonic, eaten for stomach troubles.)

in Yoruba: disoke

Xysmalobium involucratum (E. Mey.) Decne. (*Gomphocarpus involucratus* (E. Mey.) D. Dietr.; *Gomphocarpus involucratus* D. Dietr.; *Gomphocarpus involucratus* (E. Mey.) Schltr.; *Gomphocarpus involucratus*

Schltr.; *Lagarinthus involucratus* E. Mey.; *Xysmalobium involucratum* Decne.)

South Africa. Perennial, erect, herb, milky latex, carrot-like stem-tuber, long narrow green leaves, flowers in compact heads, more or less scented, erect beaked fruits, grazed by livestock and game

See *Commentariorum de Plantis Africae Australioris* (Meyer) 203. 1838, *Synopsis Plantarum* (D. Dietrich) 2: 900. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 520. 1844, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18(Beibl. 45): 8. 1894

(Magic, stem-tuber used as a protective charm.)

in English: scented xysmalobium

in South Africa: hongersnoodbossie, hongersnoodwortel, melkbossie, udambisomkhulu, udelunina

Xysmalobium undulatum (L.) R.Br. (*Asclepias undulata* Jacq.; *Asclepias undulata* L.; *Gomphocarpus undulatus* Turcz.; *Gomphocarpus undulatus* Schltr.; *Gomphocarpus undulatus* (L.) Schltr.; *Xysmalobium ensifolium* Burch. ex S. Elliot; *Xysmalobium undulatum* R.Br.; *Xysmalobium undulatum* (L.) Ait.; *Xysmalobium undulatum* (L.) R.Br. ex Schult.; *Xysmalobium undulatum* var. *undulatum*)

South Africa. Herb, robust and strong, milky sap, hard hairy wavy leaves, round clusters of cream-green to yellow flowers, erect lobe flowers with recurved hairy tips, inflated fruits covered with long curly hairs

See *Species Plantarum* 1: 214. 1753, *Enum. Syst. Pl.* 17. 1760, *Mem. Wern. Soc.* i. (1809) 39. 1809, *Memoirs of the Wernerian Natural History Society* 1: 39. 1810, *Hortus Kew.* (W.T. Aiton), ed. 2. 2: 79. 1811, *Systema Vegetabilium* 6: 89–90. 1820, *Bull. Soc. Imp. Naturalistes Moscou* xxi. (1848) I. 259. 1848, *Journal of Botany, British and Foreign* 28: 364. 1890, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18(4, Beibl. 45): 10. 1894 and *The Flowering Plants of South Africa* 6: t. 215. 1926, *Transactions of the Royal Society of South Africa* 14(4): 353–365. 1927

(Sap from the plant extremely bitter. Stem as an emetic in poisoning. Crushed and boiled roots used as an antacid to the stomach, to expel intestinal worms, for colic and abdominal troubles. Powdered root as a snuff to relieve headache; root decoction or the powdered root alone as a dysentery and diarrhea remedy. Magic, plant as a protective charm to divert storms.)

in English: bitter root, milk bush, milkwort, uzura, wave-leaved xysmalobium, wild cotton

in South Africa: bitterhout, bitterhoutwortel, bitterwortel, iShinga, ishongwane, iShongwane, iShongwe, iyeza elimhlophe, leshokoa, melkbos, nwachaba, poho-tšehla, pohotsehla

Y

Youngia Cass. Asteraceae

According to Cassini the genus was named after two Englishmen, a famous poet and writer (possibly Edward Young, 1684–1765) and a physician (presumably Thomas Young, 1773–1829); according to other authors the generic name honors Charles, James and Peter Young, nurserymen at Epson, Surrey, during the early 19th century. See *Species Plantarum* 2: 805–808. 1753, Alexandre Henri Gabriel Comte de Cassini (1781–1832), in *Annales des Sciences Naturelles*. (Paris) sér. 1. 23: 88. 1831, Hudson Gurney, *Memoir of the Life of Thomas Young*. London 1831 and *Publ. Carnegie Inst. Wash.* 484: 5. 1937, Alexander Wood and Frank Oldham, *Thomas Young, Natural Philosopher 1773–1829*. Cambridge 1954, *Mem. Coll. Sci. Kyoto Imp. Univ., Ser. B, Biol.* 22: 120. 1955, *Fl. URSS* 29: 727. 1964, *Taxon* 41: 561. 1992, *Taxon* 44: 611–612. 1995, *Acta Phytotax. Sin.* 39(6): 553. 2001, *Komarovia* 5(2): 108 (–109). 2008.

Youngia japonica (L.) DC. (*Chondrilla japonica* Lam.; *Chondrilla japonica* (L.) Lam.; *Crepis japonica* Benth.; *Crepis japonica* (L.) Benth.; *Prenanthes japonica* L.; *Youngia japonica* DC.; *Youngia mauritiana* DC.)

India. Herb, leaves ovate crenate-toothed rosette, naked flowering stalk, pale pink heads, leaves and young shoots used as vegetable

See *Mantissa Plantarum* 1: 107. 1767, *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 79. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 192, 194. 1838, *Flora Hongkongensis* 194. 1861, *FBI* 3: 395. 1881 and *Rhodora* 80: 431–440. 1978, *J. Pl. Biol.* 39: 15–22. 1996, *Amer. J. Bot.* 86(7): 1003–1013. 1999

(Leaves extract given in dyspepsia.)

in India: dudhli, han-jang-sikli

Youngia stenoma (Turczaninow) Ledebour (*Crepis stenoma* Turcz.; *Crepis stenoma* Turczaninow ex DC.; *Hieracioides stenoma* (Turczaninow) Kuntze; *Prenanthes spathulata* Turczaninow ex Herder; *Youngia stenoma* Ledeb.)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 164. 1838, *Flora Rossica* (Ledeb.) 2(2,7): 837. 1846 [Aug 1846], *Bulletin de la Société Impériale des Naturalistes de Moscou* 43: 192. 1870, *Revisio Generum Plantarum* 1: 346. 1891

(All parts of this herb used for clearing away heat and for mainly treating serious cases of furuncle.)

in China: jian huang an cai

Yucca L. Asparagaceae (Agavaceae)

The vernacular name in Peru or in the Carib for manihot or cassava, misapplied to these plants, *yuca* for *Manihot esculenta*; see Carl Linnaeus, *Species Plantarum*. 1: 319. 1753, *Genera Plantarum*. Ed. 5. 150. 1754, F. D'Alberti di Villanuova, *Dizionario universale, critico, enciclopedico della lingua italiana*. Lucca 1797–1805, *Theoria Systematis Plantarum* 8. 1858, Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys*. Vol. 5, *Botany*. Washington: Government Printing Office, 496–497. 1871 and *Annual Report of the Missouri Botanical Garden* 13: 41–42. 1902, *N. Amer. Trees* 151. 1908, G. Friederici, *Amerikanisches Wörterbuch*. Hamburg 1947, *Fieldiana, Bot.* 24(3): 59–100. 1952, *Fl. Mesoamer.* 6: 36–37. 1994, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.

Yucca aloifolia L. (*Sarcocolla aloifolia* (L.) Lindling.; *Yucca aloifolia* fo. *genuina* (L.) Engelm.; *Yucca aloifolia* var. *yucatanana* (Engelm.) Trel.; *Yucca serrulata* Haw.; *Yucca yucatanana* Engelm.)

North America.

See *Species Plantarum* 1: 319. 1753, *Supplementum Plantarum Succulentarum ...* 32. 1819, *Transactions of the Academy of Science of St. Louis* 3: 35, 37. 1873 and *Annual Report of the Missouri Botanical Garden* 13: 93–94. 1902, *Beihefte zum Botanischen Centralblatt* 50(1): 446. 1933, *The Botany of the Commelins*, 140–232. 1983, *Phytochemistry* 31(2): 706–707. 1992, *Flora Mesoamericana* 6: 36–37. 1994, Kanerva, L., Estlander, T., Petman, L., Mäkinen-Kiljunen, S. “Occupational allergic contact urticaria to yucca (*Yucca aloifolia*), weeping fig (*Ficus benjamina*), and spathe flower (*Spathiphyllum wallisii*).” *Allergy* 56(10): 1008–1011. 2001

(Positive skin prick tests to this plant in individuals who presented with occupational contact urticaria. A spirostanol glycoside from *Yucca aloifolia*.)

in English: aloe yucca, dagger plant, Spanish bayonet, yucca

in Bolivia: yuca

in Japan: chimo-ran

in South Africa: yucca

Yucca angustissima Engelm. ex Trel. (*Yucca angustissima* Engelm.)

North America.

See *Rep. (Annual) Missouri Bot. Gard.* 13: 58–59, pl. 23–24. 1902

(Used for snake or insect bites. Roots as a strong laxative. Ceremonial.)

in English: narrowleaf yucca

Yucca angustissima Engelm. ex Trel. var. *angustissima*

North America.

See *Rep. (Annual) Missouri Bot. Gard.* 13: 58–59, pl. 23–24. 1902

(Used for snake or insect bites. Roots as a strong laxative. Ceremonial.)

in English: narrowleaf yucca

Yucca baccata Torrey (*Sarcocoyucca baccata* (Torr.) Linding.; *Yucca baccata* f. *genuina* Engelm., nom. inval.; *Yucca circinata* Bak.)

North America.

See *Rep. U.S. Mex. Bound. Bot.* [Emory] 2(1): 221. 1858, *Gardeners' Chronicle*. London, (1870) 1088. 1870, *Trans. Acad. Sci. St. Louis* 3: 44. 1873 and *Beih. Bot. Centralbl.* 50(1): 446. 1933

(Cathartic, emetic/antiemetic, against vomiting, for heartburn, postpartum remedy, to remove placenta. Ceremonial.)

in English: banana yucca, blue yucca, Spanish bayonet

Yucca baileyi Woot. & Standl. (*Yucca baileyi* Woot. & Standl. var. *navajoa* (J.M. Webber) J.M. Webber; *Yucca navajoa* J.M. Webber)

Yucca standleyi McKelvey)

North America.

See *Contr. U. S. Natl. Herb.* 16: 114. 1913, *Madroño* 8: 105. 1945, *Yuccas Southw. U.S.* 2: 108. 1947, *Agric. Monogr. U.S.D.A.* 17: 51. 1953

(Plant used as a laxative. Ceremonial.)

in English: Navajo yucca

Yucca decipiens Trel. (*Sarcocoyucca decipiens* (Trel.) Linding.)

NE. Mexico.

See *Rep. (Annual) Missouri Bot. Gard.* 18: 228–229. 1907, *Beih. Bot. Centralbl.* 50(1): 446. 1933

(Roots and leaves used for fish stupefaction.)

in Mexico: siriki

Yucca elata (Engelm.) Engelm. (*Yucca angustifolia* var. *elata* Engelm.; *Yucca elata* Engelm.)

North America.

See *Trans. Acad. Sci. St. Louis* 3: 50. 1873, *Bot. Gaz.* 7: 17. 1882

(Ceremonial.)

in English: soap tree, soap weed, soaptree yucca

in Spanish: palmella

Yucca filamentosa L. (*Yucca concava* Haw.; *Yucca concava* Hort. ex Baker; *Yucca filamentosa* Wood; *Yucca filamentosa* Riddell; *Yucca filamentosa* f. *genuina* Engelm., nom. inval.; *Yucca filamentosa* var. *bracteata* Engelm.; *Yucca filamentosa* var. *elmensis* Sprenger; *Yucca filamentosa* var. *laevigata* Engelm.; *Yucca filamentosa* var. *latifolia* Engelm.; *Yucca filamentosa* var. *mexicana* S. Schauer; *Yucca filamentosa* var. *maxima* Carrière; *Yucca filamentosa* var. *media* Carrière; *Yucca filamentosa* var. *nobilis* Sprenger; *Yucca filamentosa* var. *patens* Carrière; *Yucca filamentosa* var. *ramosa* Carrière; *Yucca filamentosa* var. *recurvifolia* Alph.Wood; *Yucca filamentosa* var. *variegata* Carrière)

North America. Perennial shrub or subshrub, herbaceous

See *Species Plantarum* 1: 319. 1753, *Suppl. Pl. Succ.* 34. 1819, *Linnaea* 19: 703. 1847, *Rev. Hort.* 1860: 213, 215–216. 1860, *Class-book Bot.*: 709. 1861, *Trans. Acad. Sci. St. Louis* 3: 51–52. 1873, *J. Linn. Soc., Bot.* 18: 226. 1880 [1881 publ. 1880] and *Boll. Reale Soc. Tosc. Ort.* 1906: 132. 1906

(Sedative, antiseptic, roots rubbed or applied on the body for skin diseases, itch, scabies, sores, sprains. Ceremonial. Crushed roots as fish poison.)

in English: Adam's needle, needle palm, spoonleaf yucca

Yucca glauca Nutt. (*Yucca angustifolia* Pursh; *Yucca angustifolia* Carrière, nom. illeg.; *Yucca angustifolia* fo. *genuina* (Pursh) Engelm.; *Yucca angustifolia* f. *stricta* (Sims) Voss; *Yucca angustifolia* var. *stricta* (Sims) Baker; *Yucca glauca* subsp. *albertana* Hochstätter; *Yucca glauca* subsp. *stricta* (Sims) Hochstätter; *Yucca glauca* Nutt. var. *glauca*; *Yucca glauca* var. *gurneyi* McKelvey; *Yucca glauca* var. *stricta* (Sims) Sprenger; *Yucca glauca* var. *stricta* (Sims) Trel.; *Yucca stenophylla* Steud.; *Yucca stricta* Sims)

USA, Mexico. Perennial shrub or subshrub, basal rosette of long linear sword-like pointed leaves, hairy edges, hanging white flowers bowl-shaped

See *Catalogue of New and Interesting Plants Collected in Upper Louisiana* no. 89. 1813, *Flora Americae Septentrionalis*; or, ... [Pursh] 1: 227. 1813, *Botanical Magazine* 48: t. 2222. 1821, *Nomencl. Bot.*, ed. 2, 2: 795. 1841, *Revue Horticole* IV, 8: 398. 1859, *Transactions of the Academy of Science of St. Louis* 3: 50. 1873, *Journal of the Linnean Society, Botany* 18: 227. 1880, *Vilmorin's Blumengärtnererei*. Assoc.* (III, C) 65: 91. 1978, *Cactaceae Rev.* 1(2): 21. 1999, *Piante Grasse* 20: 2. 2000

(Antirheumatic, antifungal, antiarthritic, contraceptive, abortifacient, stimulant, laxative, hemostat, roots rubbed or applied on the body for skin diseases, skin irritations, itch, scabies, sores, sprains, inflamed and bleeding cuts; powdered roots infusion taken for stomachache. A source of arrow-tip poison. Veterinary medicine, roots decoction applied to saddle sores. Ceremonial.)

in English: small soapweed, soapweed yucca

***Yucca gloriosa* L.**

Mexico, USA. Shrub or tree-like, evergreen, single or multi-stemmed, pointed leaves, creamy white flowers in large panicles

See *Species Plantarum* 1: 319. 1753, *Gen. Pl.* ed. 5, 150. 1754, *Transactions of the Academy of Science of St. Louis* 3: 39, 41. 1873 and Dewidar, A.M., el-Munajjed, D. "The steroid sapogenin constituents of *Agave americana*, *A. variegata* and *Yucca gloriosa*." *Planta Med.* 19(1): 87–91. 1970, *Proceedings of the Indian Science Congress Association* (III, C) 65: 91. 1978, *Taxon* 31: 576–579. 1982, *Proceedings of the Indian Science Congress Association* 71(3-VI): 76. 1984, Favel, A., Kemertelidze, E., Benidze, M., Fallague, K., Regli, P. "Antifungal activity of steroidal glycosides from *Yucca gloriosa* L." *Phytother. Res.* 19(2): 158–161. 2005

(Irritant. Used in steam bath for swelling. The antifungal activity of a crude steroidal glycoside extract from *Yucca gloriosa* flowers, named alexin, was investigated in vitro against a panel of human pathogenic fungi, yeasts as well as dermatophytes and filamentous species.)

in English: Adam's needle, mound-lily yucca, palm lily, Roman candle, Spanish bayonet, Spanish dagger, sword leaf

***Yucca guatemalensis* Baker** (*Yucca elephantipes* Regel, nom. inval.; *Yucca elephantipes* Regel ex Trel., nom. illeg. superfl.)

Central America.

See *Species Plantarum* 1: 319. 1753, *Gartenflora* 8: 35. 1859, *Refugium botanicum*; or, figures and descriptions ... 5: t. 313. 1872 and *Annual Report of the Missouri Botanical Garden* 1902: 94–96. 1902, *Fieldiana, Botany* 24(3): 59–100. 1952, *Fl. Guatemala* 24(3): 89. 1955, Panouse, J.J., Mamlok, L. "[On the sterol sapogenins in the stalks and leaves (fresh and fermented) of *Yucca guatemalensis* Baker.]" *Ann. Pharm. Fr.* 21: 735–41. 1963, *Flora Mesoamericana* 6: 36–37. 1994, *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 29–34. 2003, *Ceiba* 44(2): 105–268. 2003 [2005]

(The plant bears spine-tipped leaves that are capable of inflicting mechanical injury.)

in English: bluestem yucca, Spanish bayonet

***Yucca schidigera* Roez**l ex Ortgies (*Yucca californica* Nuttall ex Baker; *Yucca californica* Groenl.; *Yucca mohavensis* Sargent)

Mexico.

See *Species Plantarum* 1: 319. 1753, *Gen. Pl.* ed. 5, 150. 1754, *Revue Horticole* 1858: 434. 1858, *Gartenflora* 20: 110. 1871, *Garden & Forest* 9: 104. 1896 and *Manual of the Trees of North America* (exclusive of Mexico) ed. 2: 113. 1922, Cheeke, P., Piacente, S., Oleszek, W. "Antiinflammatory and anti-arthritic effects of *Yucca schidigera*: A review." *J. Inflamm.* (Lond.). 3: 6. 2006

(*Yucca* extracts anti-arthritic and antiinflammatory. It is a rich source of steroidal saponins and is used commercially as a saponin source. Saponins have diverse biological effects, including anti-protozoal activity. *Yucca* is also a rich source of polyphenolics, including resveratrol and a number of other stilbenes (yuccaols A, B, C, D and E). These phenolics have antiinflammatory activity. Capsules made from inflorescence stalks are sold as natural health products.)

in English: Mohave yucca

in Spanish: palmilla

Yushania Keng f. Poaceae

Of Yushan, Taiwan, some taxonomic confusion concerning this genus, type *Yushania niitakayamensis* (Hayata) Keng f., see *J. Linn. Soc. Bot.* 19: 31. 1881 and *Journal of Japanese Botany* 11(1): 1. 1935, *Acta Phytotaxonomica Sinica* 6(4): 355–356. 1957, *Primates* 10: 103–148. 1969, *Smithsonian Contributions to Botany* 9: 1–148. 1973, *Smithsonian Contributions to Botany* 44: 1–27. 1980, *Journal Nanjing University. (Worshipped.)

in China: mi jia

Z

Zaleya Burm.f. Aizoaceae

Presumably from the Greek *zaleia*, ancient name applied by Dioscorides to the *daphne Alexandria*; or named from the corruption of an Indian name, *vallai-sharunai*; see *Species Plantarum* 1: 223–224. 1753, *Flora Indica ... nec non Prodrumus Florae Capensis* 110 (t. 31). 1768 and James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 402. Chipping Norton, N.S.W. 1981, *Fl. Mascareignes* 104: 1–13. 1991.

Zaleya decandra (L.) Burm.f. (*Trianthema decandra* L.; *Zaleya decandra* Burm.f.)

Africa, India and the Philippines. Herb, leaves eaten in times of scarcity, a widespread weed, see also *Trianthema decandra*

See *Fl. Ind.* (N.L. Burman) 110. t. 31. 1768

(Whole plant powdered used in toothache, pyorrhea, infected gums. Root used against hepatitis and asthma; roots decoction given to males against syphilis and swellings of genitalia, and to treat irregular menstruation; root juice drops applied in eye to treat jaundice. Leaves cooked and eaten for removing gas troubles. Plant suspected of poisoning sheep, due to the triterpenes or steroids it contains. Veterinary medicine, fresh leaf extract given to calves for scours.)

in India: bilee komme, bilikomme, charanai, gajja soppu, gajja soppu, galijaeru, kamerlagadda, khari-buti, sathasaaranetti, satho, tella galijeru, tella galiyexi, tellagalijeru, thellagalijaeru, yadaboni

Zaleya govindia (Buch.-Ham. ex G. Don) N.C. Nair

India. Spreading prostrate or decumbent succulent herb, pink axillary sessile flowers

See *Bull. Bot. Surv. India* viii. 86. 1966

(Whole plant paste used on boils.)

in India: bawra, kempu komme, santer, santhi

Zaleya pentandra (L.) C. Jeffrey (*Trianthema pentandra* L.; *Trianthema redimita* Melville; *Zaleya redimita* (Melville) H.E.K. Hartmann; *Zaleya redimita* (Melville) Bhandari)

India. Diffuse prostrate herb, axillary sessile solitary flowers, black rugose seeds, whole plant as vegetable

See *Species Plantarum* 1: 223–224. 1753, *Mantissa Plantarum* 1: 70. 1767 and *Kew Bulletin* 14: 238. 1960, *Fl. Indian Desert*: 185. 1978

(Used in Sidha. Toxic, dangerous. Plant juice astringent, for abortion, abdominal diseases, snakebites, jaundice.)

in India: mukkarattai, sakthichaaranai

Zamia L. Zamiaceae (Cycadaceae)

Possibly from Latin *zamia* or *samia*, *ae* ‘hurt, loss, damage, detrimentum’, or from *azaniae nuces* (Greek *azano* ‘to dry up’), used by Plinius for a kind of pine-cone or pine-nuts; see Hermann, Paul (1646–1695), *Paradisus batavus*, continens plus centum plantas affabre aere incisas & descriptionibus illustratas. Cui accessit Catalogus plantarum, quas pro tomis nondum editis, delineandas curaverat Paulus Hermannus... Opus posthuman. Lugduni Batavorum, apud Abrahamum Elzevier, 1698 [Edited by W. Sherard, 1659–1728], *Familles des Plantes* 2: 21, 587. 1763, C. Linnaeus, *Species Plantarum*. Editio Secunda 2: 1659. 1763, *Primae Lineae Systematis Naturae* 45. 1834, *Outlines of Botany* 483–484, 490. 1835, *Prodrumus Systematis Naturalis Regni Vegetabilis* 16(2): 538. 1868, *Gartenflora* 25: 140, 143. 1876 and *Das Pflanzenreich* IV. 1(Heft 99): 133, 136. 1932, *Taxon* 5: 189. 1956, *Fieldiana, Bot.* 24(1): 11–20. 1958, Eckenwalder, J.E. “Taxonomy of the West Indian cycads.” *J. Schust.; *Zamia loddigesii* var. *longifolia* J. Schust.; *Zamia loddigesii* var. *spartea* (DC.) J. Schust.; *Zamia spartea* DC.)

Central America.

See *Catalogue of plants and seeds* 20. 1777, *Fragmenta Botanica* 1: 27, no. 91. 1809, *Flora* 8(2): 733. 1825, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 72–73. 1843, *Linnaea* 17: 719. 1844–44, *Linnaea* 19: 425. 1846–47, *Prodr.* (DC.) 16(2.2): 539, 541. 1868, *Biologia Centrali-Americana*; ... *Botany* ... 3(16): 195. 1884 and *Journal of the Washington Academy of Sciences* 14(4): 93, f. 1. 1924, *Das Pflanzenreich* IV. 1(Heft 99): 147–148. 1932, *Fieldiana, Bot.* 24(1): 11–20. 1958

(Root as a rodent poison bait.)

Zamia pumila L. (*Zamia floridana* var. *umbrosa* (Small) D.B. Ward; *Zamia silvicola* Small; *Zamia umbrosa* Small)

Philippines.

See *Species Plantarum*, Editio Secunda 2: 1659. 1763, *Revisio Generum Plantarum* 2: 803. 1891 and *Journal of the New York Botanical Garden* 22(259): 136–137. 1921, *Mem. New*

York Bot. Gard. 57: 200–206. 1990, *Cytologia* 64: 449–458. 1999, *Novon* 11(3): 363. 2001

(Toxic to cattle and sheep. Gum from the stem used for skin diseases and ulcers. Roots chewed for cough.)

Zamia skinneri Warsz. ex A. Dietr. (*Aulacophyllum skinneri* Regel; *Aulacophyllum skinneri* (Warsz. ex A. Dietr.) Regel; *Zamia skinneri* Warsz.)

Panama.

See *Allgemeine Gartenzeitung* (Otto & Dietrich) 19: 146. 1851, *Gartenflora* 25: 143. 1876 and *Brittonia* 45(1): 1–16. 1993

(Seeds for skin diseases.)

Zamioculcas Schott Araceae

From *Zamia* plus *Colocasia* or *Culcasia*, Araceae; see Schott, H. W. (Heinrich Wilhelm) (1794–1865), *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis*. I 71. 1856 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Zamioculcas zamiifolia (Lodd.) Engl. (*Caladium zamiifolium* Lodd.; *Zamioculcas lanceolata* Peter; *Zamioculcas loddigesii* Schott; *Zamioculcas zamiifolia* Engl.)

Tropical Africa. Erect or suberect, herb, succulent

See *Botanical Cabinet*; consisting of coloured delineations . . . 15: t. 1408. 1829, *Syn. Aroid.* 71. 1856 and *Das Pflanzenreich* 4, (Engler) Arac.-Poth. 23B: 305. 1905, *Nachrichten von der Gesellschaft der Wissenschaften zu Göttingen. Mathematisch-physikalische Klasse Heft 3 (Arac. Deutsch. Ostaf.)* 185–225. 1929

(Leaves for earache and skin diseases.)

Zanha Hiern Sapindaceae

Meaning uncertain, genus perhaps dedicated to the German plant collector K.H. Zahn; see *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* (Hiern) i. 128. 1896 and René Letouzey, “Les botanistes au Cameroun.” in *Flore du Cameroun*. 7: 1–110. Paris 1968, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 87. 1971.

Zanha africana (Radlk.) Exell (*Dialiopsis africana* Radlk.)

East Africa, Tanzania, Mozambique. Tree or shrub, sprouting, bark flaking covered with rusty pubescence, leaves drooping, flowers yellow-green in short clusters, fruit orange-pink to brownish yellow, sweet fleshy yellow pulp eaten raw in small quantities, roots crushed to protect maize against post-harvest pests, stem and root bark contain saponin, found in miombo, deciduous woodland

See *Catalogue of the African Plants collected by Dr. F. Welwitsch* in 1853–61 1: 128. 1896 and *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] iii. 208. 1907, *Fl. Zambes.* 2: 537. 1966

(Both roots and fruits said to be poisonous; fruits believed to cause severe diarrhea. Leaves and stem for diarrhea, dysentery, colds, scabies, sores, fungal infection. Dried pounded bark used as snuff to treat colds, fever, headache and convulsions. Roots galactagogue, for epilepsy, constipation, labor induction; a decoction a remedy for colds, pneumonia, nose bleeding, prevent miscarriage (bleeding), convulsions, hernia, hysteria, mental illness, impotence, diarrhea, dysentery, typhoid fever, intestinal worms, stomachache, constipation, scabies, fungal infection; crushed roots inhaled to treat epilepsy.)

in English: velvet-fruited zanha

in East Africa: kivanga, mdaula, mjuju, mkalia, mkalya, mkarye, mukalia, muula, movanga, muzuu, mwaya, myuyu

in Kenya: mukolekya

in Southern Africa: muChenyua, muChenyura, muChenyuwa (Shona)

in Tanzania: chimanyi, duma, gulungu, kalya, kivangaduma, mdaula, mjuju, mkalya, mkwanga, mnjulu, mnughumo, mnuhu, mujulu, movanga duma, muyuyu, mwanga, ng'walya, sikalia, sikalya, sitalia, umukakili

Zanha golungensis Hiern (*Balsamea fraxinoides* Hiern; *Commiphora fraxinoides* (Hiern) K. Schum.; *Commiphora fraxinoides* K. Schum.; *Zanha golungensis* Hiern & A. Chev.)

Tropical Africa, Tanzania. Tree or shrub, leaves glabrous when mature, male flowers olive green or yellowish, inflorescence a congested subspherical thyrse, yellow-light orange-pink glabrous fruit with persistent sepals and style, fodder, bee forage, aril eaten by baboon, monkeys and birds, woodland, savanna, termite mounds, evergreen forest

See *Histoire des plantes de la Guiane Française* 1: 349, pl. 136. 1775, *Niger Fl.* 250. 1849, *Annales des Sciences Naturelles; Botanique*, sér. 5, 15: 374–375. 1872, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 345. 1878, *Die Pflanzenwelt Ost-Afrikas* C: 250. 1895, *Catalogue of the African Plants collected by Dr. F. Welwitsch* in 1853–61 1: 125, 128. 1896 and *Bull. Mus. Natl. Hist. Nat.* 1933, Sér. II. v. 156. 1933, *Plant Biology* 2 (1): 83–92. 2000

(Seeds poisonous or repellent. Bark febrifuge, pain-killer, lactation stimulant, for naso-pharyngeal affections, pulmonary troubles; bark powder used as a local medicine for headache. Roots decoction a remedy for colds, dropsy, convulsions, swellings, impotence, intestinal worms, stomachache, constipation, hernia, mental illness, dysentery, edema, fungal infection. Ordeal poison.)

in English: smooth-fruited zanha

in Guinea: ko-minkon, kuom dia

in Senegal: ko minkon

in Southern Africa: muGarayezhe (Shona)

in Tanzania: chimanyi, duma, gulungu, kalya, kivangaduma, mdaula, mjuju, mkalya, mkwanga, mnjulu, mnughumo, mnuhu, mujulu, movanga duma, muyuyu, mwanga, ng'walya, sikalia, sikalya, sitalia, umukakili

in Zaire: kuruwe, mane, ndingo, penzi

in Zimbabwe: muchenya

Zannichellia L. Zannichelliaceae (Potamogetonaceae)

After the Italian botanist Giovanni Gerolamo (Gian Girolamo) Zannichelli (Zanichelli), 1662–1729, physician, pharmacist, among his works are *Istoria delle piante che nascono ne' lidi intorno a Venezia* opera postuma di GianGirolamo Zanichelli ... Venezia 1735 and *Considerazioni ... intorno ad una pioggia di terra caduta nel Golfo di Venezia, e sopra l'incendio del Vesuvio*. Venezia 1737; see Carl Linnaeus, *Species Plantarum*. 2: 969. 1753, *Genera Plantarum*. Ed. 5. 416. 1754, *The British Herbal* 480. 1756, *Supplementum Plantarum* 32. 1782, *Flore Générale des Environs de Paris* 2: 256. 1827, Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 12. 1845, *Flore de Département des Hautes-Pyrénées* 43. 1867 and *Anales Mus. Nac. Buenos Aires* 24: 289–443. 1913, *American Midland Naturalist* 4: 162. 1915, *Field Mus. Nat. Hist., Bot. Ser.* 13(1/1): 87–89. 1936, *Darwiniana* 5: 369–416. 1941, *Darwiniana* 7(3): 401–496. 1947, *Darwiniana* 11(3): 457–561. 1957, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 268. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 537. 1965, *Fl. Prov. Buenos Aires* 4(1): 288–290. 1968, *Fl. Patagónica* 7(2): 24–25. 1969, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 448. 1972, *Anales Inst. Patagonia, Ser. Ci. Nat.* 5(142): 107–119. 1974, *Bol. Centro Pampeano Est. Cis. Nat. y Agron.* 4: 32–49. 1982, *Fl. Novo-Galiciana* 13: 45–47. 1993.

Zannichellia palustris L. (*Algoides palustre* (L.) Lunell; *Pelta palustris* (L.) Dulac; *Zannichellia major* (Hartm.) Boenn. ex Rchb.; *Zannichellia palustris* subsp. *pedicellata* (Wahlenb. & Rosen) Hook. f.; *Zannichellia palustris* subsp. *pedicellata* Wahlenb. & Rosen; *Zannichellia palustris* subsp. *repens* (Boenn.) Schübl. & G. Martens; *Zannichellia palustris* subsp. *repens* Rothm.; *Zannichellia palustris* subsp. *repens* (Boenn.) Rothm.; *Zannichellia palustris* subsp. *repens* (Boenn.) Koch; *Zannichellia palustris* subsp. *repens* (Boenn.) Uotila; *Zannichellia palustris* L. var. *major* (Hartm.) W.D.J. Koch; *Zannichellia palustris* var. *pedicellata* Wahlenberg & Rosen; *Zannichellia palustris* var. *repens* (Boenn.) W.D.J. Koch; *Zannichellia palustris* L. var. *stenophylla* Asch. &

Graebn.; *Zannichellia pedicellata* (Wahlenb. & Rosen) Fr.; *Zannichellia repens* Boenn.)

Pakistan. Submerged aquatic perennial, herb growing under water, stem white, fruit cream, perianth green, a single variable species

See *Species Plantarum* 2: 969. 1753, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 8: 227, 254. 1821, *Novitium Florae Suecicae Mantissa* 1: 18. 1832, *Flora von Württemberg* 579. 1834, *Synopsis Florae Germanicae et Helveticae* 679. 1837, *Flore de Département des Hautes-Pyrénées* 43. 1867, *The Flora of British India* 6: 568. 1892, *Revis. Gen. Pl.* 3(2): 329. 1898 and *American Midland Naturalist* 4: 162. 1915, *Fl. Iran.* 85: 2. 1971, *New Zealand Journal of Botany* 21: 13–20. 1983, *Fl. Novo-Galiciana* 13: 47. 1993, *Watsonia* 21: 365–368. 1997

(For skin diseases.)

in English: horned-pondweed

in China: jiao guo zao

Zanonia L. Cucurbitaceae

After the Italian botanist Giacomo Zanoni, 1615–1682, author of *Rariorum stirpium Historia*. Bologna 1742 (first published as *Istoria botanica*. Bologna 1675); see Carl Linnaeus, *Species Plantarum*. 2: 1028. 1753, *Genera Plantarum*. Ed. 5. 454. 1754, *Species Plantarum*, Editio Secunda 2: 1457. 1763 and Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 295. Palermo 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 671. Stuttgart 1993.

Zanonia indica L.

India.

See *Hort. Malab.* 8: t. 49. 1688 and *Fl. Cambodge Laos Viêt-Nam* 15: 18. 1975, *Fasc. Fl. India* 11: 126. 1982

(Fruits extract in water drunk against stomachache; powdered seeds taken with water for colic, spasms.)

in India: lalruanga dawī bur

Zantedeschia Sprengel Araceae

After the Italian botanist Francesco Zantedeschi, 1798–1873, professor of physics at Padua; see *Mém. Mus. Hist. Nat.* Paris 4: 433. 1818, *Syst. Veg.* (ed. 16) [Sprengel] 3: 756, 765. 1826, *New Fl.* (Rafinesque) ii. 90. 1836, *Fl. Tellur.* iv. 8. 1836, *Ind. Sem. Hort. Berol.* (1854) App. 9. 1854 and *Madroño* 11: 147. 1951, *Fieldiana, Bot.* 304–363. 1958, *Bothalia* 11, 1&2: 5–26. 1973, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, W.P.U. Jackson, *Origins and Meanings of Names of South African Plant*

Genera. 39. [genus named for Francesco Zantedeschi, 1797–1873] Rondebosch 1990, R.K. Brummitt and C.E. Powell, *Authors of Plant Names*. 724. [dates: 1773–1846, Giovanni Zantedeschi] Royal Botanic Gardens, Kew 1992, William T. Stearn, *Stearn's Dictionary of Plant Names for Gardeners*. 314. [named for Francesco Zantedeschi, b. 1797] Cassell, London 1993, H. Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 697. [1773–1846] Basel 1996, Francis Aubie Sharr, *Western Australian Plant Names and Their Meanings*. 77. [for Giovanni Zantedeschi, 1773–1806, or Francesco Zantedeschi, 1797–1873] University of Western Australia Press, Nedlands, Western Australia 1996, S. *African J. Bot.* 62(6): 324. 1996.

Zantedeschia aethiopica (L.) Spreng. (*Arodes aethiopica* Kuntze; *Arodes aethiopicum* (L.) Kuntze; *Calla aethiopica* L.; *Calla aethiopica* Gaertn.; *Calla ambigua* Salisb.; *Calla moschata* Moench, nom. illeg.; *Colocasia aethiopica* (L.) (Bark vasodilator, infusion of bark taken for colds, coughs, fever, heart and pulmonary troubles; infusion of inner bark rubbed on itchy area; bark decoction a wash for itching, taken to promote miscarriage and for worms; inner bark put into cavity and packed around the tooth for toothache. Leaf, fruit, stem, bark and root antifungal and tonic. Roots, wood, bark and fruits to treat rheumatic pains, toothaches, sore throats and burns, a wash for swollen joints, and also for the treatment of upper respiratory, skin and urogenital infections associated with fungal infections. Decoction of root used as a wash for paralysis and to strengthen child's legs and feet, gargled or taken for sore throat; roots powder used for burns, fever. Veterinary medicine, fruits used as a remedy for horses in case of retention of urine.)

in North America: common pricklyash, hakasits (Pawnee), Northern prickly ash, prickly ash

in English: toothache tree

Zanthoxylum apiculatum (Sandwith) P.G. Waterman (*Fagara apiculata* Sandwith; *Fagara dellomei* Albuq.; *Zanthoxylum dellomei* (Albuq.) P.G. Waterman)

Tropical America. Slender tree, spiny branches, flowers greenish white

See *Bulletin of Miscellaneous Information Kew* 1935: 120. 1935, *Taxon* 24(2–3): 363. 1975

(Sap of fresh inner bark to relieve toothache.)

in Guyana: sada

Zanthoxylum armatum DC. (*Zanthoxylum alatum* Roxb.)

Temperate Himalaya, Kashmir, SE Asia, SW China. Small tree or shrub, dioecious, corky bark, stems and branches armed with prickles or straight spines, leaves with stipular spines at the base, leaflets gland-dotted, small whitish green-yellow flowers in short branched lateral clusters, globular wrinkled aromatic capsules, shining black seeds, reddish globose fruits used as condiment and also pickled

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 727. 1824 and *Silvae Geneticae* 22: 182–188. 1973

(Used in Ayurveda, Unani and Sidha. Bark decoction to relieve fever, dyspepsia, cholera, toothache, throat complaints, sores and ulcers in the tongue; stem bark placed in dental cavity to treat toothache. Fresh leaf juice carminative. Fruit carminative, stomachic, leech repellent, fungistatic, insect repellent, used in fever, cholera, toothache. Powdered seeds aromatic, antibacterial, anthelmintic, carminative, eaten in dyspepsia, stomach disorders, indigestion and cholera. Fruits and seeds for dental complaints. Leaves applied to prevent insect and fungal infections in stored grain and rice. Fresh bark, fruits and leaves as fish poison. Ceremonial, ritual, twigs regarded as sacred, used in religious ceremonies.)

of *Ethnopharmacology* 93: 231–241. 2004, *Journal of Ethnopharmacology* 98: 281–285. 2005

(Roots, stem and leaves for toothache, chewing sticks. Heartwood antiinflammatory, analgesic, choleric, hypotensive and sedative. Stem bark febrifuge, aphrodisiac, insecticidal, molluscicidal, sedative, hypothermic, antidiuretic, taken against colic, venereal diseases; a decoction taken against urogenital problems, kidney complaints, diarrhea, dysentery, cholera, gonorrhoea, as a vermifuge; applied externally to treat cough, colds, skin complaints and smallpox. Bark and leaves used in the treatment of coughs and colds, constipation, severe colds and stomachache. Bark and roots oxytocic, antimalarial, analgesic, postpartum remedy, used to induce labor childbirth, to treat burns, rheumatism, headache, stomachache, toothache. Stem bark juice on the arrow head as poison; maceration of crushed stem bark into a river course as fish poison.)

in English: African satinwood, African stainwood, white African mahogany

in Cameroon: akombo, bolongo, bongo, elongo, eyeyongo, eyidi, ledjon, longue, olon, timba, timba eyidi, wongo

in Central African Republic: molongo, molongu

in Congo: bephanga, ditsende-isende, empende, endongo, mapanga, nungu-tsende, tshephanga

in East Africa: munyenye, sagawoita

in Gabon: nongo, olon, olonvogo, olonvongo

in Ghana: ahenkyen, okuo, yea

in Ivory Coast: bahe, g'pon, gbessi, hanwgo, hanwogo, kengue, kingue, mene hane, n'pahe, pahe

in Nigeria: ata igbo (Yoruba); okor (Edo); uko (Igbo)

in Rwanda: umuturirwa

in Uganda: muremankobe

in Zaire: ditsende-isende, empende, endongo, mapanga, nungu-tsende

Zanthoxylum heitzii (Aubrév. & Pellegr.) Waterman (*Fagara brieyi* Vermoesen ex G.C.C. Gilbert; *Fagara heitzii* Aubrév. & Pellegr.)

Central Africa, Guinea. Tree, many woody prickly-bearing protuberances, often confused with *Zanthoxylum gillettii*

See *Notulae Systematicae*. *Herbier du Museum de Paris* 14(1): 60. 1950, *Taxon* 24 (2–3): 363. 1975, *Contact Dermatitis* 16(4): 231–232. 1987, *Phytochemistry* 37(3): 867–869. 1994, *Systematics and Geography of Plants*, Vol. 71, No. 2, *Plant Systematics and Phytogeography for the Understanding of African Biodiversity* (2001), pp. 661–678. 2001, *African Study Monographs* 23(2): 47–64. 2002, *Revue de Médecines et Pharmacopées Africaines* 17: 121–130. 2003, *Toxicicon* 44(4): 417–430. 2004, *Biochemical Systematics and Ecology* 33(8): 845–847. 2005

(The sawdust may be irritant; allergic contact dermatitis has been recorded in workers. Bark analgesic, to treat gonorrhoea, abscesses, rheumatism and male sexual impotence. Scrapings from the stem bark applied to treat malaria, and to soothe toothache. Bark as fish poison.)

in Cameroon: bolongo, bongo, timba-eyidi

in Congo: m'banza

in Gabon: nongo, olon

in Zaire: lisumba, mbanza

Zanthoxylum integrifoliolum (Merr.) Merr. (*Fagara integrifolia* Merr.; *Zanthoxylum integrifoliolum* Merr.; *Zanthoxylum integrifolium* (Merr.) Merr.)

Taiwan and the Philippines.

See *Systema Naturae*, Editio Decima 2: 897. 1759 and *Philippine Journal of Science* 1(Suppl. 1): 68. 1906, *An Enumeration of Philippine Flowering Plants* ii. 327. 1923, *Planta Med.* 62(2): 175–6. 1996, *Journal of Natural Products* 62(6): 833–837. 1999

(Bark used as a remedy for snakebites. Anticoagulant, antiplatelet aggregation principles.)

Zanthoxylum myriacanthum Wall. ex Hook. f. (*Fagara myriacantha* (Wall. ex Hook. f.) Engl.; *Zanthoxylum diabolicum* Elmer; *Zanthoxylum myriacanthum* Dunn & Tutchter; *Zanthoxylum rhesoides* Drake)

India, Vietnam, China. Tree, spiny, aromatic, branches with straight prickles, cymose inflorescence, tiny flowers white, pale yellow to violet, follicle subglobose, in forest

See *Systema Naturae*, Editio Decima 2: 897. 1759, *The Flora of British India* 1(3): 496. 1875, *Die Natürlichen Pflanzenfamilien* 3(4): 118. 1896 and *Kew Bulletin*, Additional Series 10: 55. 1912, *Acta Hort.* (ISHS) 678: 153–157. 2005, *Biochemical Systematics and Ecology* 35(2): 114–117. 2007

(Fruits antibacterial. Seeds burned and the smoke inhaled to heal syphilitic ulceration of the nose. Fish poison.)

in English: thorny ivy-rue

in Malaysia: chengkring, kabu-kabu utan

in Philippines: madbad

in Vietnam: ho[af]ng m[ooj]c nhi[ee]f]u gai, s[er]n l[as] to

Zanthoxylum nepalense Babu

Nepal.

See *Bull. Bot. Surv. India* 16(1–4): 60. 1974 (publ. 1977)

(Bark decoction to relieve fever, dyspepsia, cholera, toothache, throat complaints, sores and ulcers in the tongue; stem bark placed in dental cavity to treat toothache. Fruit carminative, stomachic, leech repellent, fungistatic, insect repellent.)

lent, used in fever, cholera, toothache. Fruits and seeds for dental complaints.)

in Nepal: ban timur

Brazil. Essential oil from the leaves

See *Systema Naturae*, Editio Decima 2: 897. 1759, *Encyclopédie Méthodique, Botanique* 2: 39. 1786, *Prodr.* (DC.) 1: 726. 1824, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 12(1): 17. 1824, *Botanical Miscellany* 3: 168. 1833, *Flora* 20(2, Beibl.): 97. 1837, *Ann. Sci. Nat., Bot.* sér. 2, 17: 141. 1842, *Bot. Jahrb. Syst.* 21(5): 570. 1896, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 117–118. 1896 and *Bull. Herb. Boissier* sér. 2, 4: 1283. 1904, *Bull. Soc. Bot. France* 58(Mém. 8d): 144. 1912 [1911 publ. 1912], *Meded. Rijks-Herb.* 27: 80. 1915, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3, 2): 667. 1949, *Acta Amaz.* vol. 37 no. 2 Manaus, June 2007

(Essential oil cytotoxic, employed against inflammatory, microbial and malaria processes. Dried spines used medicinally)

Zanthoxylum schreberi (J.F. Gmel.) Reynel (*Fagara monophylla* Lam.; *Zanthoxylum monophyllum* (Lam.) P. Wilson; *Zanthoxylum monophyllum* P. Wilson)

Tropical America.

See *Bulletin of the Torrey Botanical Club* 37(2): 86. 1910

(Bark antibacterial, and toxic to fish.)

Zanthoxylum tetraspermum Wight & Arn.

Sri Lanka, India.

See *Prodromus Florae Peninsulae Indiae Orientalis* 148. 1834 and *Phytochemistry* 56(8): 857–861. 2001

(Used in Sidha and Unani. Antibacterial, antiinflammatory, antifungal, spermicidal, insecticidal.)

in India: ayutcatam, calamalipattiram, campanacaram, campanacaramaram, captacatai, captaparani, carata, cattaparani, cattaparni, cattaparuni, cattaparunippalai, cattiparuni, cattiparunimaram, cattiyaruni, ciranayirucuvam, cukkilarparani, cuparani, cuttilapparani, elilaippinnai, elilaippunnai, elilaivalai, incopitam, incovitamaram, irulpalai, jimmi, jummina, kantaparani, kanuppalai, kuccappurati, kuccappuratimaram, kuccaputpam, mukkanpalai, nuccilai, nuccilaippalai, palai, puttapalai, seshike, sesige, shettiga, tacaputtam, tamanoyirutti

Zanthoxylum usambarensis (Engl.) Kokwaro (*Fagara usambarensis* Engl.)

Kenya. Tree or shrub, stem with thorns, spreading crown, drooping branches, leaves with lemon smell, flowers cream, red fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 242. 1905, *Kew Bulletin* 32: 798. 1978

(Antibacterial, antiinflammatory, antifungal, antiviral. Leaves boiled in soup used for malaria. Boiled roots for stomach problems in women; dried pounded roots used to treat wounds. Bark and roots decoction for malaria, body pains, body swellings, coughs, scorpion- and snakebite, edema, anemia, and a gargle for toothache. Fruits chewed by women for fever; fruit infusion a tonic for children. Veterinary medicine, leaves infusion for coughs in camels and cattle, cold extract of bark used for diarrhea in camels and for general goat diseases.)

in Kenya: mugucwa, muheheti, oloisugi

in Tanzania: mbangwe

Zanthoxylum zanthoxyloides (Lam.) B. Zepern. & Timler (*Fagara senegalensis* (DC.) A. Chev.; *Fagara zanthoxyloides* Lam.; *Zanthoxylum senegalense* DC.)

Tropical Africa. Shrub, spiny branches, leaves coriaceous with distinct lemon smell, dehiscent fruit green to red, one bluish-black seed

See *The Gardeners Dictionary*: ... eighth edition. 1768, *Encyclopédie Méthodique, Botanique* (Lamarck) 2(2): 446. 1788, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 726. 1824, Schön, James Frederick (eigentl. Jakob Friedrich), *Grammar of the Hausa Language*. 1. Ausgabe. London, Church Missionary House, 1862 and *Exploration Botanique de l'Afrique Occidentale Française* ... 1: 101. 1920, *Willdenowia* 11(2): 361. 1981, *Journal of Ethnopharmacology* 4: 75–98. 1981, *Plant Systematics and Evolution* 146: 13–30. 1984, *Journal of Ethnopharmacology* 18: 257–266. 1986, *Journal of Ethnopharmacology* 21: 109–125. 1987, *Planta Med.* 69(4): 316–20. 2003, *J. Helminthol.* 79(1): 29–33. 2005, *Planta Med.* 72(8): 746–50. 2006, *J. Ethnopharmacol.* 110(1): 99–104. 2007

(Roots and stem for sickle cell anemia, venereal diseases, toothache. Root bark analgesic, vermifuge, anthelmintic, anti-parasitic, antiseptic, tonic, antimicrobial, antileishmanial, antiinflammatory, antifungal and antioxidant, for drepanocytosis, cardiac pains. Powder barks on swelling.)

in English: candlewood

in Benin: execi, hé, igui ata, xeti, xetin

in Congo: wankare, wankaré

in Guinea: bule barke, bullè barkè, wo

in Ivory Coast, Burkina Faso: bi, gan, diégama, fasa kwari, hango, inkama, kaingué, kékéliké, kiengué, kohané iri, ouo, tiendé, wo, woho

in Mali: bulebarkele, nkologo, wo, wuo

in Nigeria: ufu otachacha; fasa kwari (Hausa); fasakorihi (Fula); ata (Yoruba); ughanhan (Edo); atufio (Etsako); atako (Itsekiri); ujo (Urhobo); korokumo (Ijaw)

in Senegal: barkeley, bulabarkele, bulé barkalé, dori, fasa-huari, gozo ngua, guene gui deg, horompolé, kalinkit, wo

in Togo: droubiaou hetin, ehé, ehéti, héti, igui - ota, kélé-maon, klémaon, kokalawé, opol, polu, pobru, pobry, xe, xeti

Zapoteca H.M. Hern. Fabaceae (Ingeae, Mimosaceae)

The Zapotecs and Zapoteca language, Oaxaca, Mexico; see Blas Pablo Reko, *Mitobotánica Zapoteca*. [Appended by an analysis of “Lienzo de Santiago Guevea”] Tacubaya 1945, *Ann. Missouri Bot. Gard.* 37(2): 184–314. 1950, Joseph W. Whitecotton, *The Zapotecs: Princes, Priests, and Peasants*. New World, Mexico, Central America. Annual, solid, coarse, stout, tall and robust, straight, growing in dense stands, cultivated as a food crop plant for humans and domesticated animals, palatability excellent for all green matter, ground as flour, alcohol production, the main use of the whole plant is as silage, dry weather at pollination time seriously affects pollination, maize is subject to many diseases, a glue is made from the starch in the seed, numerous cultivars are available throughout the world

in South Laos: (people Nya Hön) plää hlii, plää hlii duan (= corn with small grains), plää hlii maat (= corn with large grains)

in Thailand: bue khe sa, fot, khaao khae, khaao phot, khaao saalee, saalee

in Vietnam: ngo, bap, ho bo, ma khau ly

Zehneria Endl. Cucurbitaceae

Possibly after the botanical artist Jos Zehner, author of some plates in H.W. Schott and S.F.L. Endlicher, *Meletemata botanica*. Vindobonae [Wien] 1832, in Heinrich Wilhelm Schott (1794–1865), *Rutaceae*. Vindobonae [Wien] 1834, and in S.F.L. Endlicher, *Flora posoniensis*. Posen [Poznan] 1830 and *Iconographia generum plantarum*. Wien [1837–] 1838 [1841-]; or Nicol. Zehner, author of the plates of *Skizzen oesterreichischer Ranunkelen sectionis Allophanes*. Wien 1852, by H.W. Schott. See *Species Plantarum* 1: 35. 1753, *Prodromus Florae Norfolkicae* 69. 1833, *Index Seminum* [Goettingen] 1835: 5. 1835, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 3: 275. 1841, *The Flora of Jamaica* 2: 142. 1850 and *Kew Bull.* 15(3): 337–371. 1962.

Not.* 126: 473. 1973, *Taxon* 30: 845–851. 1981, Panter, K.E., James, L.F. “Death camas-early grazing can be hazardous.” *Rangelands* 11: 147–149. 1989, *Man. Vasc. Pl. Northeast. U.S. & Adjacent Canada*, ed. 2: 864. 1991, *Flora of North America* Editorial Committee. *Flora of North America North of Mexico*. Oxford University Press, New York, Oxford. 2002

(The plant contains several steroidal alkaloids, including zygacine, which can poison livestock and humans. White camas has caused poisoning in sheep and may have been involved in poisoning cattle. Ingesting the bulbs can also cause poisoning. This plant is considered to be about seven times less toxic than death camas, *Zigadenus venenosus*.)

in English: death camas, mountain deathcamas, white camas

Zigadenus nuttallii (A. Gray) S. Watson (*Amianthium nuttallii* A. Gray; *Anticlea nuttallii* (A. Gray) Torr.; *Helonias angustifolia* Nutt., nom. illeg.; *Leimanthium nuttallii* (A. Gray) Hook.; *Melanthium nuttallii* (A. Gray) D. Dietr.; *Toxicoscordion nuttallii* (A. Gray) Rydberg; *Toxicoscordion texense* Rydberg; *Zigadenus texensis* (Rydberg) J.F. Macbride)

North America. Perennial herb

See *Ann. Lyceum Nat. Hist. New York* 4: 123. 1837, *Pacif. Railr. Rep. Parke, Bot.* 4: 144. 1857, *Botany (Fortieth Parallel)*. 343. 1871 and *Bull. Torrey Bot. Club* 30: 272. 1903, *Contr. Gray Herb.* 53: 4. 1918

(Toxic. Bulbs considered poisonous. Plant used for venereal affections.)

in English: Nuttall’s death camas

Zigadenus paniculatus (Nuttall) S. Watson (*Gomphostylis paniculata* (Nutt.) Raf.; *Helonias paniculata* Nuttall; *Helonias paniculatus* Nutt.; *Toxicoscordion paniculatum* (Nuttall) Rydberg)

North America. Perennial herb

See *J. Acad. Nat. Sci. Philadelphia* 7: 57. 1834, *Fl. Tellur.* 2: 30. 1837, *Botany (Fortieth Parallel)*. 343. 1871 and *Bull. Torrey Bot. Club* 30: 272. 1903, Panter K.E., Ralphs M.H., Smart R.A., Duelke B. “Death camas poisoning in sheep: a case report.” *Vet. Hum. Toxicol.* 29(1): 45–48. 1987

(Approximately 250 sheep were poisoned and died from ingesting death camas (*Zigadenus paniculatus*) within a 2-day period on a foothill range in southeastern Idaho. Ataxia, muscular weakness, trembling, incoordination, discharge of frothy saliva from the mouth and nose, vomition, dyspnea, collapse and death were the most common clinical signs. Gross changes included severe pulmonary congestion and subcutaneous hemorrhage. Microscopic lesions were those of severe pulmonary congestion. Analgesic, emetic, poultice of bulb or roots used for neuralgia, rheumatism, sprains, swellings, toothache.)

in English: death camas, foothill death camas, sand-corn

Zigadenus venenosus S. Watson (*Toxicoscordion arenicola* A. Heller; *Toxicoscordion salinum* (A. Nelson) R.R. Gates; *Toxicoscordion venenosum* (S. Watson) Rydberg; *Zigadenus diegoensis* Davidson; *Zigadenus salinus* A. Nelson; *Zigadenus venenosus* var. *ambiguus* M.E. Jones)

North America, Baja California. Perennial herb

See *Flora Boreali-Americana* 1: 213–214, pl. 22. 1803, *Proceedings of the American Academy of Arts and Sciences* 14: 279. 1879 and *Bulletin of the Torrey Botanical Club* 30(6): 272. 1903, *Muhlenbergia* 2: 182. 1906, *Contr. W. Bot.* 12: 77. 1908, *Bot. Gaz.* 54: 406. 1912, *J. Linn. Soc., Bot.* 44: 156. 1918, *Bull. S. Calif. Acad. Sci.* 23: 105. 1924, Cameron, K. “Death camas poisoning.” *Northwest Med.*, 1952: 682–683. 1952, Spoerke, D.G., Spoerke, S.E. “Three cases of *Zigadenus* (death camas) poisoning.” *Vet. Hum. Toxicol.*, 21: 346–347. 1979, Long, R. “Some liliaceae of British Columbia.” *Davidsonia* 12: 85–88. 1981, Panter, K.E., James, L.F. “Death camas-early grazing can be hazardous.” *Rangelands* 11: 147–149. 1989, *Novon* 19: 295–296. 2009

(The plant is one of the most toxic springtime plants, especially to sheep. Humans have also been poisoned after ingesting the bulbs, which were mistaken for other plants such as onions (*Allium* spp.) or camas (*Camassia quamash*). These plants should be considered poisonous to all livestock and humans. Steroidal alkaloids, including zygacine, have been found in these plants. Death camas is considered to be the most toxic member of the genus *Zigadenus*. Analgesic, emetic, poultice of bulb or roots used for neuralgia, rheumatism, sprains, swellings, toothache.)

in English: death camas, meadow death camas

Zingiber Boehmer Zingiberaceae

Greek *zingiberis* for ginger or an Arabian spice (Dioscorides, Galenus, Soranus and Oribasius), late Latin *gingiber*, ancient Indian *srngavera*, Malayalam *inchiver* (*inchi* ‘root’), Latin *zingiberi* or *zimbiperi*, also *zingiber* ‘ginger’; see *The Gardeners Dictionary ... Abridged ... fourth edition* no. 3. 1754, *Definitiones Generum Plantarum* 89. 1760, *Transactions of the Linnean Society of London* 8: 348. 1807, *Plantarum vascularium genera secundum ordines ...*

Zingiber capitatum Roxb. (*Dymczewiczia capitata* (Roxb.) Horan.)

India, Himalaya. Leafy stem, linear sessile leaves, terminal subcylindrical spikes, yellow flowers, oblong capsules

See *Asiatic Researches* 11: 348. 1810, *Prodrum Monographiae Scitaminearum* 26. 1862

(Rhizome of this plant and those of *Tectaria cicutaria* ground and given for menstrual troubles, also as antimicrobial.)

in India: bhutanasan, bon ada, jangli adrak, machi kanda

Zingiber cernuum Dalzell

India.

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 342. 1852

(Fleshy rhizome in throat troubles. Veterinary medicine, rhizome to increase lactation.)

in India: jangli adu

Zingiber chrysanthum Roscoe (*Zingiber flavescens* Link ex A. Dietr.)

Himalaya.

See *Monandr. Pl. Scitam.* 3–4: t. 86. 1824, *Sp. Pl.* 1: 54. 1831

(Rhizome juice rubbed in body pain and given to cure internal hemorrhage and injuries.)

in India: dikgikadi, kikgi-kadi

Zingiber chrysostachys Ridl.

Thailand, Malaysia. Herb, rhizomatous, leafy shoots, inflorescence spiciform, spike cylindrical, bracts bright yellow, corolla pale yellow, labellum crimson, in evergreen forest, in dry bamboo forest

See *J. Straits Branch Roy. Asiat. Soc.* 32: 129. 1899 and *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984

(A decoction of leaves against fever.)

in Malaysia: lempui

Zingiber corallinum Hance

China to Thailand.

See *J. Bot.* 18: 301. 1880

(Worms in children.)

in China: shan hu jiang

Zingiber griffithii Baker (*Zingiber citrinum* Ridl.; *Zingiber griffithii* var. *citrinum* (Ridl.) Holttum)

Malaya, Borneo. Herb, rhizomatous, leafy shoots, inflorescence spiciform, bracts pink to red, spike fusiform to cylindrical, corolla white to pale yellow, labellum white to pale yellow, fruit a glabrous capsule, in lowland evergreen forest, in secondary forest, in damp shady areas

See *Fl. Brit. India* 6: 246. 1892, *J. Straits Branch Roy. Asiat. Soc.* 32: 129. 1899 and *Gard. Bull. Singapore* 13: 61. 1950, *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984

(Poultice, whole plant to alleviate fever.)

in Malaysia: tepus huma, tepus kechil, tepus merah

Zingiber longipedunculatum Ridl.

Borneo. Herb, shrub-like, creeping rhizomes, white flowers, ripe fruits cooked and eaten

See *J. Straits Branch Roy. Asiat. Soc.* 50: 149. 1908

(Stalk pith eaten to treat dysentery; pith decoction drunk for diarrhea and dysentery. Veterinary medicine, inflorescence nectar applied as an ointment to treat dog mange.)

in Indonesia: tekorak lalaut, ubut bele sua

Zingiber longyanjiang Z.Y. Zhu

China.

See *Bull. Sichuan School Chin. Mat. Med.* 30(2): 28. 1992

(For dyspepsia, cough, asthma.)

in China: long yan jiang

Zingiber macrostachyum Dalzell

India.

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 342. 1852

(Rhizomatous parts against cough and ophthalmic complaints.)

in India: jangali adrak

Zingiber mioga (Thunberg) Roscoe (*Amomum mioga* Thunberg; *Zingiber echuanense* Y.K. Yang; *Zingiber mijooka* Siebold; *Zingiber mioga* var. *variegatum* Makino; *Zingiber oligophyllum* K. Schumann; *Zingiber sjooka* Siebold)

China, Japan.

See *Syst. Veg.*, ed. 14, 51. 1784, *Trans. Linn. Soc. London, Bot.* 8: 348. 1807, *Verh. Batav. Genootsch. Kunsten* 12: 18. 1830 and *J. Jap. Bot.* 6: 10. 1929, *Acta Phytotax. Sin.* 26: 158. 1988

(Used in Ayurveda. Stimulant, rubefacient.)

in English: Japanese ginger, mioga ginger

in China: rang he, jang ho

in India: sunthi

in Japan: myôga

Zingiber montanum (J. König) Link ex A. Dietr. (*Amomum cassumunar* (Roxb.) Donn; *Amomum montanum* J. König; *Amomum montanum* J. Zizania aquatica L. (*Ceratochaete aquatica* (L.) Lunell; *Hydropyrum esculentum* Link; *Stipa angulata* L. ex Steud.;

Zizania aquatica var. *subbrevis* B. Boivin; *Zizania clavulosa* Michx.; *Zizania effusa* Munro; *Zizania palustris* L.)

Northern America. Annual, aquatic, robust, erect, large branched flower panicles, only staminate flowers in the basal part and only pistillate flowers in the terminal part of the inflorescence, slender seeds, medicinal value, grains eaten by ducks and wild fowl, was a staple food of American Indians, found in fresh water, on the edges of lakes and rivers, mud flats along rivers

See *Mantissa Plantarum* 295. 1771, *Flora Boreali-Americana* 1: 75. 1803, *Nomenclator Botanicus. (Heart-leaved Golden Alexanders) Conservation and Research Plan for New England. New England Wild Flower Society, Framingham, MA, USA. 2003 (Apterin. Used for wounds, headaches and fever.)

in English: golden alexander, heart-leaved golden alexanders, meadow zizia

Zizia aurea (L.) Koch (*Thaspium barbinode* (Michaux) Nutt.)

North America. Herb, aromatic, divided leaves with toothed edges, twice-ternate compound lower leaves, ternate to irregularly compound upper leaves, tiny yellow flowers in a flat-topped cluster, flowers cooked vegetable, floodplain, wet meadows and thickets, swamps

See *The Genera of North American Plants* 1: 196–197. 1818 and *Taxon* 30: 77–78. 1981, *Taxon* 31: 119–120, 583–587. 1982, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989

(The root might be toxic. Vulnerary, wound-healing, febrifuge, hypnotic, used as a tea to cure fevers, hysteria, epilepsy, to induce sleep and for alleviating syphilis.)

in English: common golden alexanders, golden zizia

Ziziphus Miller Rhamnaceae

From the Persian *zizfum* or *zizafun*; from the Arabian *zizouf*, the name for *Ziziphus lotus* Lam.; Latin *ziziphus*, *zizyphus*, the jujube-tree (Plinius and Columella), *ziziphum*, *zizyphum*, the fruit jujube (Plinius); the Greek *zizouphon*, *zizyphon* for the tree, and *zizoula* for the fruit; see *The Gardeners Dictionary ... Abridged ... fourth edition no. 1. 1754, The Gardeners Dictionary: ... eighth edition Ziziphus no. 1. 1768 and Fieldiana, Bot.* 24(6): 277–293. 1949, *Brittonia* 14: 367. 1962, Giovanni Semerano, *Le origini della cultura europea. Ziziphus abyssinica Hochst. ex A. Rich.

Kenya, Tanzania. Shrub or small tree, slender, thorny, many-branched, sprawling, branches drooping bending,

rounded crown, spiny branches zigzag, single or paired dark brown thorns, one straight and one curved back, small flowers green-yellow in dense axillary star-like clusters, bad unpleasant sharp strong smell, rounded smooth shiny red-brown fruit, famine food, sweet bitter fruits eaten, sweet edible flesh, leaves and fruits as camel and goat fodder, bee forage, very similar to *Ziziphus mucronata*, open woodland and along riverbanks, seasonally flooded grassland, in *Acacia* woodland

See *Encyclopédie Méthodique, Botanique* 3(1): 319. 1789, *Tentamen Florae Abyssinicae ... 1: 136.* 1847 and *Cent. Afr. J. Med.* 37(3): 80–83. 1991, *Fitoterapia* 70(5): 493–497. 1999, *African Journal of Biotechnology* 3(9): 481–483. September 2004, *Natural Product Radiancance* 5: 361–365. 2006

(Root bark emetic, febrifuge, laxative. Roots pounded, the powder rubbed on the chest, after scarification, to treat pneumonia. Roots decoction taken for afterbirth pains, indigestion, fever, diarrhea, dysentery, stomachache, venereal diseases, snakebite and to induce abortion. A decoction of roots, mixed with those of *Rhynchosia resinosa*, drunk for stomachache. Roots and leaves abortifacient, ecboic, *in vitro* antitrypanosomal activity; antimicrobial, antifungal, extracts of both the barks and leaves. Leaves for naso-pharyngeal affections, boiled as a steam bath for pneumonia; a fomentation of steaming hot leaves soaked in boiling water used on the chest to treat pneumonia. Ripe fruits taken raw to stop bedwetting in children and adults. Fruits fish poison. Veterinary medicine, roots pounded and added to drinking water for poultry suffering from diarrhea.)

Ziziphus truncata Blatt. & Hallb.

India. Small perennial shrub, edible fruits, leaves as fodder

See *J. Bombay Nat. Hist. Soc.* xxvi. 234. 1918

(Leaves laxative, used in throat troubles.)

in India: boti

Ziziphus xylopyrus Willd. (*Rhamnus xylopyrus* Retz.; *Zizyphus caracutta* Roxb.; *Ziziphus xylopyrus* Hochst.; *Ziziphus xylopyrus* Hochst. ex A. Rich.; *Ziziphus xylopyrus* (Retz.) Willd.)

India, Sri Lanka. Tree or shrub, straggling, sparsely armed, spines in pairs on younger branches, flowers yellowish green, dense inflorescence axillary, fruit a globose drupe tomentose, leaves as fodder, ripe fruits and seeds eaten, the kernel of the fruit consumed by people

See *Observ. Bot.* (Retzius) 2: 11. 1781, *Sp. Pl.*, ed. 4 [Willdenow] 1(2): 1104. 1798, *Tentamen Florae Abyssinicae* ... 1: 136. 1847

(Used in Ayurveda and Sidha. Fruit in stomach ailments. Leaf paste applied on forehead in headache; leaves chewed in case of urinary troubles. Bark astringent, fresh bark taken to relieve stomachache; stem bark for massage for fever and cold in infants; stem bark decoction along with paste of long pepper and ginger used in hysteria. Veterinary medicine, powdered dried fruit made into a paste applied on horn cancer.)

in India: challe, chotte, chotti, chulna, chunkuli, chutti, chuttimullu, cotte, cottomullu, cottukotta, dodchotte, dodda chotti, doddacotte, ghatbor, ghat-bor, ghonta, ghontaphala, ghoti bora, ghunt, gocci, gochi, godachi, gonagalu, gooti chettu, gopaghonta, gorji, gote, gotee, gothi, goti, gotika chettu, gotivi, gotta, gotte, gottemullu, gotti, guti, jangli ber, kaante gutee, karkat, kartigai, katalcirai, kathber, khaark-kee, kodachi, kodaci, kokosina mullu, kokosmamulu, kotta, kottai, kottai elandai, kotte, kotte mullu, kottemullu, kotti, kukuru, mullukare, mullukkuppai, mullukottai, mullutuppai, padanaborero, ranbor, reegotti, soddakotta, sothakkotta, sotte, sottomullu

Zornia J. Gmelin Fabaceae (Aeschynomeneae)

After the German pharmacist Johannes Zorn, 1739–1799, botanist, author of *Icones plantarum medicinalium*. Nürnberg 1779 [–1790]; see *Systema Naturae* ... editio decima tertia, aucta, reformata 2(2): 1076, 1096. 1791[1792], Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks* London 1796–1800, *Journal de Botanique, Appliquée à l’Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 121. 1813 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University* Cambridge, Mass. 1917–1933, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Webbia* 16(1): 1–141. 1961, John H. Barnhart, *Biographical Notes upon Botanists* 3: 543. 1965, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992.

Zornia brasiliensis Vogel

Brazil.

See *Linnaea* 12: 62–63. 1838 and *Fitoterapia*. 78(3): 215–218. 2007

(Radical scavenging, antioxidant and cytotoxic activity.)

Zornia diphylla (L.) Pers. (*Hedysarum conjugatum* Willd.; *Hedysarum diphyllum* L.; *Zornia conjugata* (Willd.) Sm.;

Zornia diphylla (L.) Pers. var. *conjugata* (Willd.) Trimen;
Zornia diphylla (L.) Pers. var. *zeylonensis* (Pers.) Benth.;
Zornia surinamensis Miq.; *Zornia zeylonensis* Pers.)

India. Perennial non-climbing herb

See *Species Plantarum* 2: 747. 1753, *Species Plantarum*.
Editio quarta 2(2): 1178. 1799, *Synopsis Plantarum* 2(2): 318.
1807, *The Cyclopaedia*; or, universal dictionary of arts, ...
39(1): *Zornia* no. 2. 1818, *Flora Brasiliensis* 15(1A): 81–82.
1859 and *Rhodora* 82: 475–481. 1980, *Phytomedicine*. 6(5):
367–371. 1999

(Used in Sidha. Whole plant mixed with butter or shea butter
rubbed on the body for fever and feverish chills. Spasmolytic,
antimicrobial, used for the treatment of gastrointestinal dis-
orders. Leaf powder mixed with cow's milk drunk as tonic.
Root used to induce sleep in children.)

in India: birmoch, cirupalatai, gewani, jimhari, kurkia tasad,
luduludiatasad, mallam-tsjulli, nelammari, taudijhapni

Zornia gibbosa Spanoghe (*Zornia angustifolia* sensu
Bojer; *Zornia angustifolia* sensu auct.; *Zornia angustifolia*
Sm.; *Zornia cantonensis* Mohlenbr.; *Zornia cantoniensis*
Mohlenbrock; *Zornia diphylla* sensu auct.; *Zornia diphylla*
var. *angustifolia* (Sm.) Baill.; *Zornia gibbosa* var. *cantonen-*
sis (Mohlenbr.) H. Ohashi; *Zornia gibbosa* var. *cantoniensis*
(Mohlenbrock) H. Ohashi; *Zornia graminea* Span.; *Zornia*
pratensis sensu Mohlenbr.)

Vietnam. Perennial non-climbing herb, prostrate, yellow
flowers, flat pods, fodder for cattle

See *Linnaea* 15: 192. 1841, *Bulletin Mensuel de la Société*
Linnéenne de Paris 1(54): 429. 1884 and *Webbia* 16(1): 124,
f. 45 & 84. 1961, *Flora of Eastern Himalaya* 1: 166. 1966

(Plant juice for dysentery. Root decoction sedative, tran-
quillizer, given to children to induce sleep. Root and whole
plant sedative, for dysentery, stomachache, cramps, colic.
Leaf powder mixed with cow's milk drunk as tonic; juice of
leaves, mixed with honey, given as tonic and febrifuge.)

in China: ding gui cao

in India: gadi hullu, godimaadu, gewani, harada hachhaga,
haredachhaga, jeepirghas, jhipri, landegu, naala barki,
nelam-mari, nellu chollu soppu, nellu jollu soppu

in Nepal: jhyap

Zornia latifolia Sm. (*Zornia diphylla* (L.) Pers. subsp. *graci-*
lis (DC.) Malme; *Zornia diphylla* var. *gracilis* (DC.) Benth.;
Zornia diphylla var. *pubescens* (Kunth) Benth.; *Zornia graci-*
lis DC.; *Zornia pubescens* Kunth; *Zornia surinamensis* Miq.)

Tropical South America, Sudan. Perennial non-climbing
herb, wiry, prostrate, yellow flowers, hispid segmented fruits,
fodder for stock

See *The Cyclopaedia*; or, universal dictionary of arts, ...
39: no. 4. 1819, *Nova Genera et Species Plantarum* (quarto
ed.) 6: 515–516. 1823, *Prodromus Systematis Naturalis*

Regni Vegetabilis 2: 316. 1825, *Annals and Magazine of*
Natural History 11: 14. 1843, *Flora Brasiliensis* 15(1A):
82–83. 1859 and *Arkiv för Botanik utgivet av K. Svenska*
Vetenskapsakademien 23A(13): 76. 1931, *Boletín de la*
Sociedad Argentina de Botánica 34(1–2): 119–122. 1999

(Plant decoction laxative. Leaves taken as a vermifuge.
Poultice applied to scorpion bite.)

in Yoruba: emu

Zornia leptophylla (Benth.) Pittier (*Zornia diphylla* (L.)
Pers. var. *leptophylla* Benth.)

South America. Annual non-climbing herb

See *Synopsis Plantarum* 2(2): 318. 1807, *Flora Brasiliensis*
(Martius) 15(1A): 83, tab. 22, f. 2. 1859 and *Boletín de la*
Sociedad Venezolana de Ciencias Naturales 6(44): 196. 1940

(Dried powdered leaves and stems used as insect repellent.)

Zosima Hoffm. Apiaceae

Zosima absinthifolia Link (*Zosima absinthifolia* auct.)

Pakistan.

See *Genera Plantarum Umbelliferarum* xxx, 145. 1814,
Enum. Hort. Berol. Alt. 1: 274 (as *apsinthifolia*). 1821 [16
Mar-30 Jun 1821], *An Introduction to the Natural System of*
Botany 21. 1836

(Powdered aerial parts to relieve indigestion and
stomachache.)

in Pakistan: bara gwathak, gwathak

Zostera L. Zosteraceae (Potamogetonaceae)

Greek *zoster* 'a girdle', referring to the leaves, Latin *zoster*,
eris for Plinius is a kind of sea shrub, called also *prason*;
see Carl Linnaeus, *Species Plantarum*. 2: 968. 1753, *Genera*
Plantarum. Ed. 5. 415. 1754, *Analyse des Familles de Plantes*
65–66. 1829, *Linnaea* 35: 165–166. 1868 and *Rep. Danish*
Oceanog. Exp. Med. 2: 17. 1918, *Botanical Magazine* 47:
851. 1933, *Proceedings of the National Academy of Sciences*
of the United States of America 19: 816. 1933, *American*
Naturalist 69: 570. 1935, *Verhandelingen der Koninklijke*
Nederlandsche Akademie van Wetenschappen. Afdeling
Natuurkunde; Tweede Sectie 59(1): 114. 1970.

Zostera marina L. (*Zostera marina* var. *stenophylla*
Ascherson & Graebner)

North America. Used for food

See *Sp. Pl.* 2: 968. 1753 and Phillips, R.C. "Comprehensive
Bibliography of *Zostera marina*." Washington. U.S.D.I. Fish
Wildlife Serv., Special Sci. Rep. Wildlife 79. 1964, Harrison,
P.G. "Reproductive strategies in intertidal populations of two
co-occurring seagrasses (*Zostera* spp)." *Canad. J. Bot.* 57:

2635–2638. 1979, Cock, A.W.A.M. de. “Flowering, pollination and fruiting in *Zostera marina* L.” *Aquatic Bot.* 9: 201–220. 1980, Backman, T.W.H. “Genotypic and phenotypic variability of *Zostera marina* on the west coast of North America.” *Canad. J. Bot.* 69: 1361–1371. 1991, Nomme, K.M. and P.G. Harrison. “A multivariate comparison of the seagrasses *Zostera marina* and *Zostera japonica* in monospecific versus mixed populations.” *Canad. J. Bot.* 69: 1984–1990. 1981

(For a child suffering from diarrhea.)

in English: barnacle grass, eel-grass, grasswrack

in North America: eel-grass, zostère, zostère marine

in China: hai dai

Zygophyllum L. Zygophyllaceae

Greek *zygon* ‘a yoke’ and *phyllon* ‘leaf’, usually the leaves are bifoliolate; see Carl Linnaeus, *Species Plantarum*. 1: 385–386. 1753, *Genera Plantarum*. Ed. 5. 182. 1754, *Abh. Königl. Akad. Wiss. Berlin* 2: 13. 1896 and *Novosti Sist. Vyssh. Rast.* 7: 241–243. 1971 [1970 publ. 1971], *Pl. Syst. Evol.* 240(1–4): 37. 2003.

Zygophyllum coccineum L. (*Zygophyllum coccineum* Lepech.)

Saudi Arabia.

See *Species Plantarum* 1: 385–386. 1753 and *Taxon* 28: 395. 1979

(Stomachic.)

Zygophyllum eurypterum Boiss. & Buhse (*Halimiphyllum eurypterum* Boriss.)

Syria.

See *Species Plantarum* 1: 385–386. 1753, *Nouv. Mém. Soc. Imp. Naturalistes Moscou* 12: 49. 1860

(Dried fruits and leaves to relieve heart burn, stomach gas, stomachache, also a tonic.)

in Pakistan: aloonj

Zygophyllum foetidum Schrad. & Wendl. (*Roepera foetida* (Schrad. & J.C. Wendl.) Beier & Thulin; *Zygophyllum foetidum* Eckl. & Zeyh.; *Zygophyllum foetidum* E. Mey.)

Tropical Africa. Yellow flowers

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 96. [Dec 1834–Mar 1835], *Zwei Pflanzengeogr. Docum.* (Drège) 230. 1843–1844 and *Pl. Syst. Evol.* 240(1–4): 31. 2003

(Leaves antiseptic, insecticide, wound healing, dressing for chronic sores and ulcers.)

Zygophyllum pterocarpum Bunge (*Kallstroemia cistoides* (L.) Endl.; *Tribulus alacranensis* Millsp.; *Tribulus cistoides* L.; *Tribulus cistoides* fo. *anacanthus* Svenson; *Tribulus cistoides* var. *anacanthus* B.L. Rob.; *Tribulus cistoides* var. *galapagensis* Svenson; *Tribulus macranthus* Hassk.; *Tribulus moluccanus* Decne.; *Tribulus sericeus* Andersson; *Tribulus sericeus* var. *erectus* Andersson; *Tribulus sericeus* var. *humifusus* Andersson; *Tribulus taiwanense* T.C. Huang & T.H. Hsieh; *Tribulus terrestris* L. var. *cistoides* (L.) Oliv.; *Tribulus terrestris* var. *moluccensis* Blume; *Tribulus terrestris* var. *sericeus* Andersson ex Svens., nom. illeg.; *Zygophyllum pterocarpum* var. *microcarpum* Y.X. Liou)

Tropical Africa.

See *Species Plantarum* 1: 387. 1753, *Flora Altaica* 2: 103. 1830, *Flora of Tropical Africa* 1: 284. 1868 and *American Journal of Botany* 33: 457. 1946

(Plant tonic, stimulant, antirheumatic. Root decoction given to children when teeth hurt; root diuretic.)

Zygophyllum simplex L.

Saudi Arabia, Namibia, Somalia. Prostrate succulent annual, herb, sprawling, flowers yellow

See *Mantissa Plantarum* 1: 68. 1767

(Drop of leaf extract used to treat eye redness.)

in Arabic: kharmeel

in Sahara: moïlhe

Zygophyllum waterlotii Maire

North Africa.

See *Species Plantarum* 1: 385–386. 1753 and *Bulletin de la Société d’Histoire Naturelle de l’Afrique du Nord* 28: 348. 1937

(Stomachic. Veterinary medicine.)

in Sahara: aghei

Quod erat demonstrandum.
