Gilmore, *Uses of Plants by the Indians* ... 23. 1991

(This plant contains toxic tannins that have caused poisoning and death in cattle and horses, all animals may potentially be affected. Sheep may have also been poisoned by this oak. The leaves and acorns are toxic. The immature acorns contain more toxin than the mature acorns. Poisoning can lead to depression, anorexia, loss of condition, and kidney damage. Kidney failure usually results in death. The toxic agents are polyhydroxyphenolic compounds (tannins) including gallic acid, pyrogallol, and tannic acid. Leaves bitter and astringent; for the treatment of sores, weakness, lung problems, sore throat, dysentery, indigestion, chapped skin, chills and fevers, asthma, cough, milky urine, bowel trouble, blood diseases.)

in English: Northern red oak, red oak, red tree, uta, uta-hu (Dakota), buude-hi (Omaha-Ponca), Nahata-pahat (Pawnee), chêne rouge

Quercus semecarpifolia Sm. (*Quercus obtusifolia* D. Don; *Quercus obtusifolia* (A. DC.) Rydb., nom. illeg.)

India, Himalaya.

See *Prodromus Florae Nepalensis* 56–57. 1825

(Crushed roots applied on cuts and wounds. Dried roots, leaves and fruits used as insecticides.)

in China: gao shan li

in India: kharsu

(Bark infusion to treat diarrhea.)

Quercus stellata Wangenheim (*Quercus minor* (Marshall) Sargent; *Quercus minor* Gand., nom. inval.; *Quercus minor* Ridl., nom. illeg., non *Quercus minor* (Marshall) Sarg.; *Quercus obtusiloba* Michaux)

North America.

See *Species Plantarum* 2: 994–997. 1753, *Arbustum Americanum* 120. 1785, *Beytrag zur Teutschen holzgerichten Forstwissenschaft...*, 78, plate 6, fig. 15. 1787, *Flora Boreali-Americana* 2: 194. 1803, *Garden & Forest* 2: 471. 1889, *Flora Europae* 21: 41. 1890 and *Journal of the Straits Branch of the Royal Asiatic Society* 57: 95. 1911

(Used for indigestion, chronic dysentery, mouth sores, chapped skin, milky urine, as an antiseptic and a wash for fever and chills.)

in English: post oak

Quercus velutina Lamarck (*Quercus tinctoria* W. Bartram, nom. nud.; *Quercus velutina* Lindl. ex Wallich, nom. illeg. hom.; *Quercus velutina* L'Hér. ex A. DC.)

North America.

See *Species Plantarum* 2: 994–997. 1753, *Encyclopédie Méthodique, Botanique* 1(2): 721. 1783, *Travels Through North and South Carolina* 37. 1794, *Plantae Asiaticae Rariores* 2: 41. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 21. 1864, *Revisio Generum Plantarum* 2: 642. 1891 and *Plantae Wilsonianae* 3(2): 236. 1916, Sandusky, G.E. et al. “Oak poisoning of cattle in Ohio.” *J. Am. Vet. Med. Assoc.*, 171: 627–629. 1977, Cockrill, J.M., Beasley, J.N. “Renal damage to cattle during acorn poisoning.” *Vet. Med. Small Anim. Clin.*, 74: 82, 84–85. 1979, Basden, K.W., Dalvi, R.R. “Determination of total phenolics in acorns from different species of oak trees in conjunction with acorn poisoning in cattle.” *Vet. Hum. Toxicol.*, 29: 305–306. 1987

(The acorns contain significant quantities of toxic phenolics. This plant caused sickness and death in cattle after they ingested acorns on autumn pastures, immature acorns contain more toxin than mature acorns. Used for indigestion, chronic dysentery, mouth sores, chills and fevers, chapped skin, milky urine, lung trouble, sore eyes, as a tonic, antiseptic, emetic.)

in English: black oak

Quercus virginiana Miller (*Quercus virginiana* var. *eximea* Sargent; *Quercus virens* Ait.)

North America, Atlantic Coastal Plain. Tree, evergreen, monoecious, open spreading irregular crown, stout trunk, massive branches, glabrous glossy leaves, male and female flowers on separate spikes, younger trees develop suckers

See *Species Plantarum* 2: 994–997. 1753, *The Gardeners Dictionary*, ed. 8. *Quercus* no. 16. 1768, *Hortus Kewensis*; or, a catalogue ... 3: 356. 1789, *Alsographia Americana* 28. 1838 and *Botanical Gazette* 65(5): 447–448. 1918, *Journal of the Arnold Arboretum* 52: 159–195. 1971

(Used for healing dysentery, utilized oil pressed from the acorns.)

in English: live oak, southern live oak

Quiina Aublet Quiinaceae (Ochnaceae)

A vernacular name, see *Histoire des plantes de la Guiane Française* 2(Suppl.): 19, t. 379. 1775 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2187–2188. 2001.

Quiina leptoclada Tul.

South America. Small tree

See *Histoire des plantes de la Guiane Française* 2(Suppl.): 19, pl. 379. 1775, *Ann. Sci. Nat., Bot. sér.* 3, 11: 159. 1849

(Leaves chewed for severe toothache.)

Quiina longifolia Spruce ex Planch. & Triana

South America. Tree

See *Annales des Sciences Naturelles; Botanique*, série 4, 15: 314. 1861

(Hot poultice applied over a snakebite to reduce swelling.)

Quillaja Molina Rosaceae (Quillajaceae)

Spanish *quillay*, from the vernacular Araucani name *quillai*, *killai*; see Molina, Giovanni Ignazio (1740–1829), *Saggio sulla Storia Naturale del Chili ...* 354–355. 1782, *Edinburgh New Philosophical Journal* 10: 229. 1831 and *Contr. Gray Herb.* 184: 1–223. 1958, S. Battaglia, *Grande dizionario della lingua italiana*. XV: 152. 1994, H. Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 524. 1996.

Quillaja saponaria Molina (*Quillaja molinae* (Molina) DC., nom. superfl.; *Quillaja molinae* DC.; *Quillaja poeppigii* Walp.; *Quillaja saponaria* Poir.)

Chile. Small tree, narrowly cylindrical, bark in flat strips, branches pendulous, flowers greenish-white, acrid and astringent taste

See *Saggio sulla Storia Naturale del Chili ...* 175, 354–355. 1782, *Encycl. (Lamarck)* 6(1): 33. 1804, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 547. 1825, *Repertorium Botanices Systematicae*. (Stem, roots and leaves antiinflammatory, antiviral, expectorant, cough sedative, immunostimulant, antinociceptive, detergent, cleansing and analgesic, emulsifying agent, cosmetic, tonic, antihelminthic, antiparasitic. Bark decoction used in hysteria, madness. For the inflammation of the mucous membrane, for coughs and convulsions, used to treat bronchitis especially in the early stages of the illness; it is not recommended for use with dry coughs.)

in English: Chilean soapbark tree, Panama wood, soap bark tree

in Chile: quillai, quillay

Quintinia A. DC. Saxifragaceae (Escalloniaceae, Grossulariaceae, Paracryphiaceae)

After the French horticulturist Jean (Johannis) de la Quintinie (Quintinye), 1626–1688 (or 1685, see Brian Halliwall in *Curtis's Botanical Magazine*. Volume 14. 3: 173. August 1997), botanist, he was appointed Director-General of the Royal vegetable gardens by King Louis XIV, wrote *L'Art ou la Manière particulière et seure de tailler des arbres fruitiers*.

Amsterdam 1699, *Instruction pour les Jardins Fruitiers et Potagers, avec un Traité des Orangers*. Amsterdam 1692 and *Le Parfait Jardinier*. Paris, Genève 1695; see A.P. de Candolle, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 5. 1830, *Monogr. Campan.* 92, in adnot. 1830 and *J. Linn. Soc., Bot.* 45: 306. 1921, *Kew Bulletin* 18: 265. 1965, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 223. Palermo 1988.

Quintinia ledermannii Schltr.

Papua New Guinea. Tree, forest

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 5. 1830 and *Bot. Jahrb. Syst.* lii. 125. 1914

(Inner bark applied to sores, wounds, cuts, boils.)

in Papua New Guinea: solahe

Quisqualis L. Combretaceae

Which and of what kind, Latin *quis* ‘which? who?’ and *qualis* ‘what kind? what?’; the name is based on Rumphius (Rumpf) (Georg Eberhard or Everard, 1628–1702) observation and astonishment of the very variable growth habit of the plant. See C. Linnaeus, *Species Plantarum*. Ed. 2. 1: 556. 1762 and [Rumphius], *Rumphius Gedenkboek 1702–1902*. Haarlem, Koloniaal Museum 1902, *Journal of Botany, British and Foreign* 69(820): 120. 1931, G. Ballintijn, *Rumphius de blinde ziener van Ambon*. Utrecht 1944, *Fl. Mesoamer.* 4(1): 1–855. 2009.

Quisqualis conferta (Jack) Exell (*Quisqualis densiflora* Wallich ex Miq.; *Quisqualis prostrata* Craib; *Quisqualis thorelli* Exell; *Sphalanthus confertus* Jack)

Thailand, SE Asia. A prostrate shrub or woody climber, in margins of primary forest

See *Malayan Miscellanies* 2(7): 55–56. 1822 and *Journal of Botany, British and Foreign* 69: 122. 1931, *Taxon* 29: 712–713. 1980

(A decoction of the leaves or juice from the pounded roots used as a vermifuge.)

in Malaysia: akar dani, dani, redani, selimpas, setandok, sumang

in Thailand: lep mue naang

in Vietnam: [laf]ng nhi[eef]u hoa, d[aa]y giun nh[or]

R

Radermachera Zollinger & Moritz Bignoniaceae

Named after the Dutch botanist Jacobus Cornelius Matthaëus Radermacher, 1741–1783, amateur plant collector in Java, official in the Dutch East Indies, founder of the *Bataviaasch Genootschap van Kunsten en Wetenschappen*, author of *Naamlijst der planten*. Batavia 1780–1782. See Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 3: 181. London 1800, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, *Systematisches Verzeichniss der im Indischen Archipel* 3: 53. 1854 and *Rec. Trav. Bot. Neerl.* 1927, xxiv. 953, descr. emend. 1927, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 122. 1965.

Radermachera xylocarpa (Roxb.) Roxb. ex K. Schum. (*Bignonia xylocarpa* Roxb.; *Radermachera xylocarpa* K. Schum.; *Spathodea xylocarpa* (Roxb.) T. Anderson ex Brand; *Spathodea xylocarpa* T. Anderson ex Brand.; *Tecoma xylocarpa* (Roxb.) G. Don; *Tecoma xylocarpa* G. Don)

India. Tree, deciduous, yellow white fragrant flowers in terminal panicles, funnel-shaped corolla, elongated woody rough flat capsules covered with tubercles

See *Flora Indica*; or, descriptions of Indian Plants 3: 108. 1832, *A General History of the Dichlamydeous Plants* 4: 225. 1838, *The forest flora of North-West and Central India* 349. 1874, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(3b): 243. 1895 and *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda. Leaf paste applied on cuts and wounds; leaves smeared in castor oil and tied around the sprained part. Inner bark infusion given against snakebites; extract of bark along with bark extract of *Soymida febrifuga* given as antidote and emetic in snakebite; extract of bark along with bark extract of *Soymida febrifuga* given in stomachache; bark extract given in urinary complaints; bark along with barks of *Holoptelea integrifolia* and *Moringa concanensis* powdered and applied in stomach pain; decoction of bark along with that of bark of *Oroxylum indicum* given in jaundice; paste of bark applied on wounds; stem bark used for skin diseases, eczema, psoriasis; pounded bark boiled and the decoction applied on body and also given to treat snakebite and bodyache; bark of *Radermachera xylocarpa* along with barks of *Lannea coromandelica* and *Ziziphus rugosa* crushed into a paste and applied and bandaged over the fractured bone. Oil-resin from wood for skin diseases, eczema. Root paste applied locally and given orally in snakebite, mad dog bite and cat bite as an antidote; root juice given to treat snakebite. Pod decoction given in dysentery; for snakebite, placental cord in fruit made into a paste applied against viper

venom and also taken internally (Doctrine of Signatures). Seed powder inhaled as an antidote for snakebite. Veterinary medicine, crushed roots given with water to treat abdominal gases. Fruit kept inside the house wards off snakes.)

in English: padri tree

in India: aane thanthu, aanethanthu vaaluka, akash garud, alambal, ambaalahude, ambaari hode, ambalahude, ambari hode, anetantuvaluka, barathakhonnan, bersinge, dag-daua, dholte, edankorna, garud, genasaga, genasing, ghana shringi, ghanashringa, ghanashrynga, ghanasinga, jainmangal, hude, hulave, huvvulave, kaananakombu, kadalathi, kadalatti, kadashing, kalpadiri, kanana kombu, kanakakombu, khadshing, kharsheng, kharsing, kharsingi, kharsing, kharsinge, khurshing, konana kombu, konana kombu mara, konana kombumara, linga dhari, lingnodaari oodi mara, malaiyudi, manjakadambe, mankombu, nagadundilam, naguru, onthi, oodi mara, padiri, padirimilaidal, pathiri, pannimuringa, patala, pathiri, patirevetamkaruna, patiri, pudi mara, savadi, sirakkora, svetapatala, tetu, udi, vadancarni, vadencarni, valuka, vedamkurunai, vedanguruni, vedinkorana, vetamkaruna

Radyera Bullock Malvaceae

Named after the South African botanist Robert Allen Dyer, 1900–1987 (d. Pretoria), Director of the Botanical Research Institute at Pretoria (1944–1963), he is best known for his *Ceropegia*, *Brachystelma* and *Riocreuxia* in *Southern Africa*. Rotterdam 1983, *The Vegetation of the Divisions of Albany and Bathurst*. Pretoria 1937, “The cycads of Southern Africa.” *Bothalia*. 8: 405–516. 1965 and *The Genera of Southern African Flowering Plants*. Pretoria 1975–1976. See *Species Plantarum* 2: 687–690. 1753, *Genera Plantarum* 271. 1789 and *Proceedings of the Royal Society of Victoria* ser. 2. 22: 7. 1909, Alain Campbell White (b. 1880), *The Succulent Euphorbieae (Southern Africa)*. Pasadena 1941, *Journal of South African Botany* 10: 33. 1944, Arthur Allman Bullock (1906–1980), in *Kew Bulletin* for 1956. 23: 454. (Feb.) 1957, Sima Eliovson, *Discovering Wild Flowers in Southern Africa*. Cape Town 1962, Cythna Letty (1895–1985), *Wild Flowers of the Transvaal*. [Pretoria] 1962.

Radyera urens Bullock (*Allenia urens* Phillips; *Hibiscus urens* L.f.)

South Africa. Herb, prostrate, shrub, spreading, robust, axillary flowers, corolla scarlet, calyx and epicalyx very densely hairy

See *Species Plantarum* 2: 693, 695. 1753, *Suppl. Pl.* 309. 1782 [1781 publ. Apr 1782] and *Proceedings of the Royal Society of Victoria* ser. 2. 22: 7. 1909, *Journal of South African Botany* 10: 33. 1944, *Kew Bull.* 1956, 454. 1957

(Hairs extremely irritating.)

Randia L. Rubiaceae

After the British botanist Isaac Rand, d. 1743, London apothecary, gardener, a member of the Botanical Society, 1719 Fellow of the Royal Society, 1724–1743 *Praefectus Horti Chelsiani* and Demonstrator of plants of the Chelsea Physic Garden. See Carl Linnaeus, *Species Plantarum*. 2: 1192. 1753, *Genera Plantarum*. Ed. 5. 74. 1754, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 102. London 1790, *Genera Plantarum* 2: 82. 1873 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 176. London 1904, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 612. 1964, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 229. 1964, J.H. 1982, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Candollea* 46: 303. 1991, *Anales del Jardín Botánico de Madrid* 54: 166–178. 1996

(Astringent.)

in English: lesser spearwort, spearwort

Ranunculus glaberrimus Hooker (*Ranunculus glaberrimus* Hook. var. *glaberrimus*; *Ranunculus glaberrimus* Hook. var. *typicus* L.D. Benson)

North America. Perennial herb

See *Species Plantarum* 1: 548–556. 1753, *Flora Boreali-Americana* 1(1): 12, pl. 5, f. A. 1829, *Pittonia* 2: 110. 1890, *Fl. Francisc.* 1: 298. 1891

(Recorded to be poisonous; skin irritant. Crushed plants applied as a poultice for burn blisters and open running sores, warts. Flowers or the whole plant on arrow points as a poison.)

in English: buttercup, sagebrush buttercup

Ranunculus hederaceus Linnaeus

North America.

See *Species Plantarum* 1: 548–556. 1753

(*Ranunculus* subg. *Batrachium* (DC.) A. Gray, unlike most species of *Ranunculus*, members of this subgenus are not poisonous.)

Ranunculus hirtellus Royle

India. Perennial hairy herb with yellow flowers

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 53. 1834

(Plant extract in skin diseases. Veterinary medicine, aerial parts of the plant have a cooling effect in cattle.)

in China: ji long mao gen

in India: goodi, jangli palak, mangol

Ranunculus hispidus Michx. (*Ranunculus repens* L. var. *hispidus* (Michx.) Chapm.)

North America. Perennial herb, fibrous roots, thickened root-stocks, rosette of basal leaves, axillary solitary flowers

See *Fl. Carol.* [Walter] 159. 1788, *Flora Boreali-Americana* (Michaux) 1: 321. 1803, *Encycl.* (Lamarck) 6(1): 125. 1804, *Fl. Amer. Sept.* (Pursh) 2: 395. 1813, *Syst. Club* 68: 486. 1941, *Field & Lab.* 17: 84. 1950, *University of California Publications in Botany* 77: 44. 1980

(Analgesic, for toothache.)

in English: bristly buttercup, hispid buttercup, swamp buttercup

Ranunculus inamoenus Greene (*Ranunculus affinis* R. Br. var. *micropetalus* Greene; *Ranunculus alpeophilus* A. Nelson; *Ranunculus inamoenus* var. *alpeophilus* (A. Nelson) L.D. Benson; *Ranunculus inamoenus* Greene var. *inamoenus*; *Ranunculus inamoenus* Greene var. *typicus* L.D. Benson)

North America. Perennial herb, roots for food

See *Species Plantarum* 1: 548–556. 1753, *Proc. Amer. Acad. Arts* 21: 370. 1886, *Pittonia* 3: 91. 1896, *Bulletin of the Torrey Botanical Club* 26(7): 350. 1899 and *Amer. J. Bot.* 27: 187. 1940, *Bulletin of the Torrey Botanical Club* 68(9): 651. 1941

(Ritual, ceremonial, magico-religious beliefs, effective hunting medicine, used to protect hunters from their prey.)

in English: graceful buttercup

Ranunculus laetus Wall. ex Hook. f. & J.W. Thomson (*Ranunculus laetus* Wall. ex Royle; *Ranunculus laetus* Wall.; *Ranunculus laetus* Salisb.)

India. Fodder

See *Prodr. Stirp. Chap. Allerton* 373. 1796, *Numer. List* [Wallich] n. 4702. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 53. 1839, *Flora Indica*: being a systematic account of the plants . . . 36. 1855

(Plant juice antibacterial, febrifuge, antifungal and antimalarial, used in intermittent fevers, gout and asthma. Paste made from the leaves used for gas troubles and joint pains.)

in China: huang mao gen

in India: chip-chi, kakandel

Ranunculus lapponicus Linnaeus (*Coptidium lapponicum* (L.) Á. Löve & D. Löve ex Tzvelev; *Coptidium lapponicum* (L.) Tzvelev; *Coptidium lapponicum* (L.) Á. Löve & D. Löve; *Coptidium lapponicum* (L.) Gand. ex Rydb.; *Coptidium lapponicum* (L.) Gand.; *Ranunculus lapponicus* Vill.; *Ranunculus lapponicus* Soleirol ex Nyman; *Ranunculus lapponicus* Oeder)

Europe, North America. Perennial herb

See *Species Plantarum* 1: 548–556. 1753, *Hist. Pl. Dauphiné* (Villars) 3(2): 743. 1789, *Consp. Fl. Eur.* 1: 10. 1878 and *Fl. Rocky Mts.* 302. 1917, *Bot. Not.* 114(1): 39. 1961, *Taxon* 31: 583–587. 1982, *Botaniceskij Žurnal SSSR* 70(10): 1346–1354. 1985, *Botaničeskij Žurnal* (Moscow & Leningrad) 73: 605–607. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1059–1061. 1989, *Willdenowia* 19: 199–213. 1999

(Stomachic, stimulant.)

in English: Lapland buttercup

in North America: renoncule de Lapponie

Ranunculus lingua L.

China. Marshy perennial herb, heterophyllous, fistular stem, submerged leaves lanceolate, stigma persistent, globular heads

See *Species Plantarum* 1: 549. 1753 and *Nordic J. Bot.* 14: 161. 1994, *Opera Bot.* 137: 1–42. 1999

(Plant decoction to relieve pain of swollen parts of both humans as well as domesticated animals. Veterinary medicine.)

in English: greater spearwort

in China: tiao ye mao gen

Ranunculus lobbii (Hiern) A. Gray (*Ranunculus hydrocharis* Spenn. fo. *lobbii* Hiern)

North America.

See *Species Plantarum* 1: 548–556. 1753, *Flora Friburgensis* 3: 1007. 1829, *Journal of Botany, British and Foreign* 9: 66, pl. 114. 1871, *Proceedings of the American Academy of Arts and Sciences* 21: 364. 1886

(*Ranunculus* subg. *Batrachium* (DC.) A. Gray, unlike most species of *Ranunculus*, members of this subgenus are not poisonous.)

in English: Lobb's aquatic buttercup

Ranunculus macounii Britton (*Ranunculus macounii* var. *oreganus* (A. Gray) K.C. Davis)

North America.

See *Species Plantarum* 1: 548–556. 1753, *Transactions of the New York Academy of Sciences* 12: 3. 1892 and *Minnesota Botanical Studies* 2: 469. 1900, *Taxon* 31: 120–126. 1982

in French: renoncule de Macoun

Ranunculus multifidus Forssk. (*Ranunculus emirnensis* Bojer; *Ranunculus lagascanus* (Lag.) DC.; *Ranunculus membranaceus* Fresen.; *Ranunculus pinnatus* Poir.; *Ranunculus pinnatus* Sessé & Moc., nom. illeg.; *Ranunculus pubescens* Lag., nom. illeg.; *Ranunculus pubescens* Thunb.; *Ranunculus rutenbergii* Freyn; *Ranunculus striatus* Hochst. ex A. Rich.; *Ranunculus udus* Freyn.)

East Africa. Perennial herb, procumbent, spreading, succulent, soft, hairy, branching, flowers bright yellow, small fruit clustered in round heads, in swamp, along river, wet ground, grassland, in damp soil among rocks, in moist to saturated soil, in shallow standing water, riverine bushland, along irrigation channel, along stream, in disturbed forest, at edge of pond, on moist river bank

See *Flora Aegyptiaco-Arabica* 102. 1775, *Prodromus Plantarum Capensium*, ... 94. 1800, *Encyclopédie Méthodique, Botanique* 6: 126. 1804, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 43. 1824, *Flora* 21: 28. 1841, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 7: 9–10. 1880 and *Fl. Madagasc.* 76: 4. 1950, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 1: 85–94. 1981

(Toxic to sheep, suspected of poisoning stock, sheep. Leaves used for sore throat, purge, scabies, mumps, cough, catarrh, urinary complaints, syphilis, venereal diseases.)

in English: buttercup, wild buttercup

in Southern Africa: botterblom, brandblare, geelbotterblom, hlapi, kankerblare, rhenoster, uXhaphozi

in Tanzania: nyauinkau

Ranunculus muricatus L. (*Ranunculus lobatus* Moench; *Ranunculus muricatus* var. *brasiliensis* DC.)

Mediterranean. Annual, diffuse herb, achenes 5–12 in globose head on small receptacle

See *Species Plantarum* 1: 555. 1753, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 214. 1794, *Regni Vegetabilis Systema Naturale* 1: 299. 1818 and *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *J. Palynol.* 16: 85–105. 1980, *Taxon* 30: 842–843. 1981, *Lagascalia* 17: 71–86. 1993, *Anales Jard. Bot. Madrid* 54: 166–178. 1996

(Not fed to cattle as it leads to indigestion. Plant decoction used in fevers, asthma, gout.)

in English: rough-seed buttercup, sharp buttercup, spiny-fruit buttercup

in China: ci guo mao gen

in India: dhassia

Ranunculus occidentalis Nuttall (*Ranunculus eisenii* Kellogg; *Ranunculus howellii* Greene; *Ranunculus howellii* Greenm.; *Ranunculus occidentalis* Freyn; *Ranunculus occidentalis* var. *dissectus* L.F. Hend.; *Ranunculus occidentalis* var. *eisenii* (Kellogg) A. Gray; *Ranunculus occidentalis* var. *howellii* Greene; *Ranunculus occidentalis* Nutt. var. *howellii* (Greene) Greene; *Ranunculus occidentalis* Nutt. var. *occidentalis*; *Ranunculus occidentalis* var. *rattanii* A. Gray; *Ranunculus occidentalis* Nutt. var. *typicus* L.D. Benson; *Ranunculus occidentalis* var. *ultramontanus* Greene)

North America. Perennial herb, seeds eaten

See *Species Plantarum* 1: 548–556. 1753, *Syst. Nat.* 1: 290. 1817, *A Flora of North America*: containing ... 1(1): 22. 1838, *Proc. Calif. Acad. Sci.* 7(8): 115. 1877 [1876 publ. 1877], *Proceedings of the American Academy of Arts and Sciences* 21: 373. 1886, *Pittonia* 3: 13–14. 1896, *Fl. N.W. Amer.* 1: 17. 1897 and *Muhlenbergia*; a journal of botany 6: 11. 1910, *Rhodora* 32(374): 25. 1930, *Bulletin Torrey Bot. Club* 68: 166–167. 1941, *Amer. Midl. Naturalist* 40: 44. 1948

(Poison, juice of the flowers could be slipped into food to poison the person who ate it.)

in English: western buttercup

Ranunculus pallasii Schldl. (*Coptidium pallasii* (Schldl.) Tzvelev; *Coptidium pallasii* Á. Löve & D. Löve)

North America. Perennial herb, food, young tender shoots cooked and eaten

See Schlechtendal, Diederich Franz Leonhard von (1794–1866), *Animadversiones Botanicae in Ranunculeas Candollii* 1: 15. Berolini, Typ. J. F. Starckii, 1819–1820 and *Taxon* 31: 583–587. 1982

(Raw fresh young shoots poisonous.)

in English: Pallas' buttercup

Ranunculus pensylvanicus L.f. (*Ranunculus pensylvanicus* Pursh)

North America. Annual or perennial herb

See *Species Plantarum* 1: 548–556. 1753, *Supplementum Plantarum* 272. 1781 and *Taxon* 31: 120–126. 1982

(Plant astringent, used to raise blisters. Hunting medicine, ceremonial.)

in English: buttercup, Pennsylvania buttercup

in French: renoncule de Pennsylvanie

in India: laslluke

Ranunculus recurvatus Poir. (*Ranunculus recurvatus* Bong.; *Ranunculus recurvatus* var. *adpressipilis* Weatherby; *Ranunculus recurvatus* Poir. var. *typicus* L.D. Benson)

North America. Perennial herb

See *Species Plantarum* 1: 548–556. 1753, *Encyclopédie Méthodique. Botanique ... Supplément* (Lamarck) 6(1): 125. 1804 and *Rhodora* 31(368): 164. 1929, *Amer. Midl. Naturalist* 40: 74. 1948

(Used as a sedative, analgesic, laxative, antiseptic, astringent, for abscesses, boils, venereal diseases, toothache.)

in English: blisterwort

in North America: renoncule recourbée

Ranunculus recurvatus Poir. var. **recurvatus** (*Ranunculus recurvatus* var. *adpressipilis* Weatherby)

North America. Perennial herb

See *Species Plantarum* 1: 548–556. 1753, *Encyclopédie Méthodique. Botanique ... Supplément* 6: 125. 1804 and *Rhodora* 31(368): 164. 1929

(Used as a sedative, analgesic, laxative, antiseptic, astringent, for abscesses, boils, venereal diseases, toothache.)

in North America: renoncule recourbée

(Plant contains a toxic irritant acrid juice that produces protoanemonin upon mastication; ranunculin, a glycoside, becomes a volatile irritant, protoanemonin, after enzyme-mediated conversion through mastication. All types of livestock can become ill upon ingestion, but cattle are most commonly affected. Horses and goats have also been poisoned. A strong fungicidal, anodyne, used in skin disorders; leaves ground with *Brassica* oil and applied externally on eczema. Herb emmenagogue, galactagogue. Plant juice given in bronchitis, cough; plant crushed and tied on ulcers on feet; paste of roots with mustard oil used on swellings; paste regularly applied on penis for increasing erectile power and against impotence. Whole plant decoction as insecticide. Powdered plant mixed with flour and sugar and used for rat poisoning. Leaves vesicant. Poison for arrow points.)

in English: buttercup, celery-leaved buttercup, celeryleaf buttercup, cursed buttercup, cursed crowsfoot, water crowsfoot

in India: bandhanya, bir-mani, bon-dhoniya, chambul, changeri, jal-dhana, jal dhanian, jaldhanian, jaldhaniya, kabi-kaj, minkali

Ranunculus sceleratus L. var. *multifidus* Nuttall (*Ranunculus sceleratus* subsp. *multifidus* (Nuttall) Hultén)

India. Erect annual or perennial herb, many-branched

See *Species Plantarum* 1: 548–556. 1753, *A Flora of North America*: containing ... 1(1): 19. 1838 and *Acta Universitatis Lundensis*, n.s. 40: 768. 1944

(Plant poisonous, used as a poison for arrow points.)

in English: blister buttercup, cursed buttercup

Ranunculus sceleratus L. var. *sceleratus* Linnaeus (*Hecatonia scelerata* (L.) Fourr.; *Ranunculus sceleratus* L. var. *typicus* L.D. Benson)

India. Erect annual or perennial herb, many-branched

See *Species Plantarum* 1: 548–556. 1753 and *Sida* 13: 241–250. 1988

(Plant contains a toxic irritant acrid juice. A poison for arrow points.)

in English: cursed buttercup

in India: bandhanya, bir-mani, bon-dhoniya, chambul, changeri, jal-dhana, jal dhanian, jaldhanian, jaldhaniya, minkali

Ranunculus trichophyllus Chaix (*Ranunculus trichophyllus* Locos)

India, Himalaya.

See *Hist. Pl. Dauphiné* (Villars) 1: 335. 1786

(Plant used in fevers, rheumatism, asthma.)

in India: hill, tohlun

Ranunculus tricuspis Maxim. (*Halerpestes tricuspis* (Maxim.) Hand.-Mazz.)

Himalaya.

See *Flora Tangutica* 12. 1889 and *Pittonia* 4: 207. 1900, *Acta Horti Gothoburgensis* 13(4): 135–136. 1939, *Acta Phytotax. Sin.* 39(5): 405–422. 2001

(Whole plant for cough, cold, body ache, eye inflammations and toothache.)

in Bhutan: chu-rug-be-la

in China: san lie jian mao gen

in India: sercharg

(Used in Ayurveda, Unani and Sidha. This plant contains glucosinolates in the seeds, which can cause poisoning if eaten in sufficient quantities by livestock. Plant juice drunk to expel kidney stones; juice applied in scorpion or poisonous insect bite. Seeds laxative and diuretic, used in gonorrhea; seed powder given orally to treat irregular menstruation; seeds of *Raphanus sativus* boiled with *Brassica campestris* oil massaged on penis to cure impotency; seeds ground with mustard oil and made into a paste applied on skin eruption and leprosy. Root juice given in stomachache and urinary complaints; roots given against kidney stone, jaundice and scorbutic condition. Leaves antibacterial, rubbed with powdered lime, applied to cuts; juice of fresh leaves diuretic and laxative. Tubers for piles and urinary complaints. Ceremonial, rituals, festivals, whole plant.)

(Has been used in African anticancer medicines. Roots for scrofula.)

in English: false gentian

in Southern Africa: inTsema (Xhosa)

Raphionacme jurensis N.E. Br.

Tropical Africa.

See *Fl. Trop. Afr.* [Oliver et al.] 4(1.2): 272. 1902 [Dec 1902]

(Reported to be toxic.)

Rauwolfia L. Apocynaceae

The generic name honors the German (b. Augsburg, Bavaria) physician and botanist Leonhart (Leonhardus, Leonhard) Rauwolff (Rauwolf, Rawolff, Rauwolfius), 1535–1596 (d. Waitzen/Vac, Hungary, fighting the Turks), traveller, plant collector, M.D. Valence 1562, 1573–1576 visited the Near East, described the riparian flora of the Euphrates. See Carl Linnaeus, *Species Plantarum*. 1: 208. 1753, *Species Plantarum* 2: 1043. 1753, *Genera Plantarum*. Ed. 5. 98. 1754, Johan Frederik (Jan Fredrik, Johannes Fridericus) Gronovius (1686–1762), *Flora orientalis*, sive recensio plantarum, quas botanicorum coryphaeus Leonhardus Rauwolf annis 1573–75 in Syria, Arabia, Mesopotamia, Babylonia, Assyria, Armenia et Judaea crescentes observavit et collegit ...

Lugduni Batavorum [Leyden] 1755, *Flora Cochinchinensis* 95, 137. 1790, *Systema Vegetabilium* 4: 805. 1819, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 241. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 339, 341. 1844, *Verslagen Meded. Afd. Natuurk. Kon. Akad. Wetenschappen* 6: 191. 1857, *Flora* 53: 168. 1870 and *Repertorium Specierum Novarum Regni Vegetabilis* 20: 113, 116, 118. 1924, *Bulletin de la Société Botanique de France* 94: 32–33, 38. 1947, *Ann. Missouri Bot. Gard.* 43(3): 253–354. 1956, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 131. 1965, K.H. Dannenfeldt, *Leonard Rauwolf, Sixteenth Century Physician, Botanist and Traveler*. Cambr. Mass. 1968, Karl H. Dannenfeldt, in *D.S.B.* 11: 311–312. 1981, *Bull. Jard. Bot. Belg.* 61: 21–69. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009. This genus is the source of the rauwolfia alkaloids, and in particular reserpine which is used medicinally as an antihypertensive and sedative.

Rauwolfia amsoniifolia A. DC. (*Cyrtosiphonia amsoniifolia* (A. DC.) Miq.)

Malesia, Philippines. A shrub or small tree, leaves verticillate, flowers with campanulate-infundibuliform corolla tube, in lowland rain forest and in secondary thickets

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 338. 1844, *Flora van Nederlandsch Indië* 2: 402. 1856

(Young buds for stomachache of infant, young leaves used to treat stomach disorders in babies. Bark decoction used as a stomachic. A decoction of the leaves used as a laxative and febrifuge, and to stimulate delivery, the bark to treat framboesia which is caused by the spiral-shaped bacteria *Treponema pertenuis* or *Treponema pallidum pertenuis*.)

in Indonesia: pamedang, parempasa

in Philippines: alibutbut, banogan, batikoling, maladita, maraandarayan, sibakong

Rauwolfia caffra Sond. (*Rauwolfia goetzei* Stapf; *Rauwolfia gonioclada* K. Schum. ex Stapf; *Rauwolfia inebrians* K. Schum.; *Rauwolfia leucopoda* K. Schum.; *Rauwolfia tchibangensis* Pellegr.; *Rauwolfia verticillata* A. Chev., nom. nud.; *Rauwolfia welwitschii* Stapf)

Tropical and S. Africa. Tree, twigs brown tinged dark blue-brown with brown lenticels, sticky milky white juice, near the ends of branches leaves in whorls, flowers in terminal branched inflorescences, corolla shading to white towards lobes, pendulous clusters of dark green shiny fruits with white spots, often only one carpel develops, used to make furniture, whole plant producing milky latex when cut, in riverine forest, in seasonally flooded gallery forest, along river banks and streams, in woodland along valley, in fringing forest

See *Species Plantarum* 1: 208. 1753, *Linnaea* 23: 77. 1850 and *Fl. Trop. Afr.* 4(1): 113. 1902, *Bulletin Misc. Inform. Kew* 1908: 407. 1908, *Genetica* 68: 3–35. 1985, Strugnell, A.M. “A checklist of the Spermatophytes of Mt. Mulanje, Malawi.” *Scripta Botanica Belgica* 34: 1–199. 2006, Sosef, M.S.M. et al. “Check-list des plantes vasculaires du Gabon.” *Scripta Botanica Belgica* 35: 1–438. 2006

(Root and bark used medicinally. Toxic bark. Stem bark and leaves for general body swelling, pneumonia and rheumatism. Bark boiled in water to produce tooth brushing mixture; bark for febrile complaints. Bark of root for scrofula.)

in English: quinine tree

in Central Africa: esoma, esombi, mosinga, sambo

in Malawi: moubamvula

in Nigeria: wada (Hausa); awa (Yoruba)

in Southern Africa: kinaboom, umHlambamanzi, koorsboom; muKadhlu, muGaururu, iDzurungu, Dzurungu, muKashu, muKaururu, muSingwizi, muZungurwi (Shona); umKhadlukungu, umHlambamasi (= the sour milk cleanser), umHlambhamanzi, umJele (Zulu); nchongo (Tsonga); munadzi (Venda); umThundisa, umJelo, umJela, umHlamb’amasu (Xhosa)

in Tanzania: iberebere, irato, mfuti, muula ula, muvenvene, mvelevele, mwereti, mweti, ng’weti

in Yoruba: alagba

in Zimbabwe: mudzurungu, mukamamasanhi, mukashu, mukaurura, musingwiswi, mutowamakaka, muzungurwi

Rauwolfia javanica Koord. & Valetton

S. Sumatra to Lesser Sunda Is. Small tree, leaves 3–4-verticillate, flowers with campanulate-infundibuliform corolla tube at most twice the length of the calyx, in lowland, lower montane rain forest, in open places

See *Species Plantarum* 1: 208. 1753 and *Bijdr. Kennis Boomsoorten Java* 1: 91. 1894

(Toxic. Pounded leaves used externally to treat wounds.)

in Indonesia: lameh, lameh utan

Rauwolfia ligustrina Willd. ex Roem. & Schult. (*Rauwolfia alphonsiana* Müll.Arg.; *Rauwolfia indecora* Woodson; *Rauwolfia ligustrina* Roem. & Schult.; *Rauwolfia parvifolia* Bertero ex Spreng.; *Rauwolfia parvifolia* var. *cubana* A. DC.; *Rauwolfia parvifolia* var. *tomentella* Müll.Arg.; *Rauwolfia ternifolia* Kunth)

S. Mexico to Trop. America, Colombia.

See *Systema Vegetabilium* 4: 805. 1819, *Linnaea* 30: 394. 1860 and *Ann. Missouri Bot. Gard.* 24: 12. 1937, *Ann. Missouri Bot. Gard.* 43(3): 253–354. 1956, *Darwiniana* 43(1–4): 90–191. 2005

(Infusion or decoction of root drunk for snakebite and scorpion stings. Central nervous system depressant, anxiolytic-like effect.)

Rauvolfia mannii Stapf (*Rauvolfia cardiocarpa* K. Schum.; *Rauvolfia cumminsii* Stapf; *Rauvolfia ivorensis* A. Chev., nom. nud.; *Rauvolfia liberiensis* Stapf; *Rauvolfia longiacuminata* De Wild. & T. Durand; *Rauvolfia obscura* K. Schum.; *Rauvolfia preussii* K. Schum.; *Rauvolfia rosea* K. Schum.)

Tropical Africa. Shrub or subshrub or treelet, erect, straggling, climber, stem green-brown with white swollen dots, white latex, leaves whorled, flowers white with a red centre, petals whitish pink with red spots, style white-pubescent, heart shaped bilobed fruit bright red when ripe, sympodial growth, whole plant produces white latex when cut, close to water, in forest and in open forest, understory, on forest floor, in forest shade, in partly shaded area of forest, in secondary scrub

See *Bulletin of Miscellaneous Information Kew* 1894(1): 21. 1894, *Nat. Pflanzenfam.* 4(2): 154. 1895, *Pflanzenw. Ost-Afrikas*, C: 317–318. 1895, *Bull. Soc. Roy. Bot. Belgique, Compt.-Rend.* 38: 205. 1899 and *Fl. Trop. Afr.* 4(1): 114. 1902, *Fl. Trop. Afr.* 4(1): 601. 1904, *Explor. Bot. Afrique Occ. Franç.* 1: 412. 1920, *Taxon* 28: 636–637. 1979, *Genetica* 68: 3–35. 1985, Harris, D.J. *The Vascular Plants of the Dzanga-Sangha Reserve, Central African Republic*. National Botanic Garden (Belgium), Meise. 2002

(Roots very poisonous. Arrow poison. Stem and roots used to treat pimples. Scraping of bark mixed with seeds or bark of *Strophanthus* sp. and used as arrow poison.)

in Central African Republic: kibula, mbom, mwako

in Tanzania: mbozamakii, mpilipili

Rauvolfia mombasiana Stapf

Nigeria, Tropical Africa. Tree or shrub, sticky milky white latex, flowers white-green

See *Bulletin of Miscellaneous Information Kew* 1894(1): 21. 1894

(Roots and stem bark for fevers, malaria, hysteria.)

in Tanzania: mpilipili pori

Rauvolfia pentaphylla Ducke (*Rauvolfia duckei* Markgr.; *Rauvolfia pentaphylla* (Huber) Ducke; *Rauvolfia pentaphylla* Huber ex Ducke)

Brazil to Peru. Tree or shrub, white latex, dark green leaves, fruits green

See *Species Plantarum* 1: 208. 1753 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 244. 1922, *Repertorium Specierum Novarum Regni Vegetabilis* 20: 117, 121. 1924

(The wood causes symptoms similar to those produced by *Aspidosperma* species.)

Rauvolfia serpentina (L.) Benth. ex Kurz (*Ophioxylon album* Gaertn.; *Ophioxylon majus* Hasskarl; *Ophioxylon obversum* Miq.; *Ophioxylon salutariferum* Salisb.; *Ophioxylon serpentinum* L.; *Ophioxylon trifoliatum* Gaertn.; *Rauvolfia major* (Hassk.) G. Nicholson; *Rauvolfia obversa* (Miq.) Baill.; *Rauvolfia trifoliata* (Gaertn.) Baill.)

Himalaya to W. Malesia. An erect perennial herb or small shrub, usually unbranched slender stem, prominent tuberous usually unbranched root, long irregularly nodular yellowish rootstock, leaves whorled, white flowers in irregular corymbose cymes, narrowly cylindrical tube much longer than calyx, shining black drupes

See *Species Plantarum* 1: 208. 1753, *Species Plantarum* 2: 1043. 1753, *Flora* 28: 263 bis (= 265). 1845, *Forest Flora of British Burma* 2: 171. 1877, *The Illustrated Dictionary of Gardening*, ... 3: 279. 1886 and *J. Econ. Bot.* 4: 349–365. 1954, *Indian J. Med. Sci.* 11(7): 479–82. 1957 [Effect of reserpine free extract of *Rauvolfia serpentina* on gastric acidity in man.], *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 3: 41–42. 1976, *Proceedings of the Indian Science Congress Association* (III, C) 66: 78–79. 1979, *Science and Culture* 48: 152–154. 1982, *Acta Pharmacol. Toxicol.* (Copenh). 59 Suppl 7: 344–347. 1986, *Cytologia* 54: 723–728. 1989, *Nucleus* 34: 170–173. 1991, *Regnum Veg.* 127: 71, 81. 1993, *Ethnobotany* 9: 59–64. 1997, *J. Nat. Prod.* 64(5): 686–687. 2001, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda and Unani. Root and stem decoction given for fever. Roots sedative, hypnotic, bitter, acrid, heating, sharp, pungent, antiarrhythmic, antihypertensive, antidote, febrifuge, galactagogue, anthelmintic, snake repellent, used in the treatment of leucorrhea, diarrhea, dysentery, hypertension, rheumatism and various central nervous system disorders associated with psychosis, schizophrenia, insanity, insomnia, epilepsy; root juice applied on wounds; root decoction given in rheumatism; root decoction used to increase uterine contractions for abortion or in labor; root powder taken orally in case of snakebite. Bark, leaves and roots against snake and scorpion poisoning. Leaf juice applied against opacity of the cornea and to treat wounds and itch. In snakebite or poisonous bite, antidote, anti-venom, latex directly applied on the wound and drops of latex with water used orally. Veterinary medicine, root used as a vermifuge. Roots as fish poison.)

in English: Indian snakeroot, Java devil pepper, rauvolfia root

in Sierra Leone: kowogae

in Zaire: bam'mbákambáká, m'mbákambáká

in China: cui tu luo fu mu

Rauwenhoffia R. Scheffer Annonaceae

After the Dutch botanist Dr. Nicolaas Willem Pieter Rauwenhoff, 1826–1909, plant physiologist, in 1871

successor to F.A.W. Miquel at Utrecht, from 1871 to 1896 professor of botany and Director of the Botanical Garden at Utrecht, his works include *Charles Robert Darwin*. Utrecht 1882 and *La génération sexuée des Gleicheniacées*. Haarlem 1890. See *Genera Plantarum* 283. 1789, Rudolph Herman Christiaan Carel Scheffer (1844–1880), *Annales du Jardin Botanique de Buitenzorg*. 2: 21. 1885 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 131. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 325. 1972, Stafleu and Cowan, *Taxonomic Literature*. 4: 593–595. Utrecht 1983.

Rauwenhoffia siamensis R. Scheffer

Thailand.

See *Annales du Jardin Botanique de Buitenzorg* 2: 23. 1885
(Leaves boiled and the liquid drunk as tonic, also put on cuts.)

Ravenala Adans. Strelitziaceae (Musaceae)

From the native name in Madagascar, see *Familles des Plantes* (Adanson) 2: 67. 1763, *Introductio ad Historiam Naturalem* 96. 1777, *Voyage aux Indes Orientales* 2: 223. 1782, *Syst. Nat.* ed. 13[bis]. 2(1): 567. 1791, *Prodromus Florae Norfolkicae* 35, 98. 1833, *Annals of Botany*. Oxford 7: 203. 1893 and *Canadian Journal of Plant Science* 61(3): 691–695. 1981, *Taxon* 39(1): 131–132. 1990, *Taxon* 42: 874. 1993, *American Journal of Botany* 81(5): 542–551. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2438. 2001.

Ravenala madagascariensis Sonn. (*Heliconia ravenala* Willemet; *Ravenala madagascariensis* Adans.; *Ravenala madagascariensis* J.F. Gmel.; *Urania madagascariensis* Raeusch.; *Urania madagascariensis* (Sonn.) Raeusch.; *Urania ravenala* (Willemet) A. Rich.; *Urania ravenalia* Rich.; *Urania speciosa* Willd.)

Madagascar. Palm-like, unbranched, 2-ranked fan-shaped leaves, inflorescence axillary, bracts filled with mucilage, edible seeds, sugar can be extracted from the sap of the trunk

See *Mantissa Plantarum* 2: 147, 211. 1771, Sonnerat, Pierre (1748–1814), *Voyage aux Indes Orientales et à la Chine: fait par ordre du roi, depuis 1774 jusqu'en 1781. Dans lequel on traite des mœurs de la religion, des sciences & des arts des Indiens, des Chinois, des Pégouins & des Madé-gasses; suivi d'observations sur le Cap de Bonne-Espérance, les Isles de France & de Bourbon, les Maldives, Ceylan, Malacca, les Philippines & les Moluques, & de recherches sur l'histoire naturelle de ces pays*. 2: 223, pl. 124–126. 1782, *Genera Plantarum* 1: 212. 1789, *Annalen der Botanick*. ed. Usteri 18: 22. 1796, *Nomenclator Botanicus*, ed. 3 91. 1797, *Species Plantarum*. (Seed oil antiseptic. The fruit cooked and eaten to treat anorexia.)

in English: traveller's palm, traveller's tree

in India: pantho padop, panthopadop

in Japan: ogi-bashô

in Madagascar: ravenala

Rehmannia Libosch. ex Fischer & C.A. Meyer Scrophulariaceae (Gesneriaceae)

After the Russian physician Joseph Rehmann, 1779 (or 1753, in Pritzel)–1831; see *Index Seminum* [St. Petersburg] 1: 36. 1835, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 754. 1852, *Journal of the Linnean Society, Botany* 26(174): 195. 1890, *Botanical Magazine*, t. 7191. 1891 and *Berichte der Deutschen Botanischen Gesellschaft* 27: 393, 399. 1909, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 530. 1996.

Rehmannia glutinosa (Gaertn.) Libosch. ex Fischer & C.A. Meyer (*Digitalis glutinosa* Gaertner; *Rehmannia chinensis* Liboschitz ex Fischer & C.A. Meyer; *Rehmannia glutinosa* f. *huechingensis* (Chao & Shih) P.G. Hsiao [Xiao], *Rehmannia glutinosa* f. *purpurea* Matsuda; *Rehmannia glutinosa* var. *hemsleyana* Diels; *Rehmannia glutinosa* var. *huechingensis* Chao & Shih)

China. Perennial herb, orange tuberous root, black root sections, basal leaves fasciculate, scape bearing reddish purple tubular flowers

See *Species Plantarum* 2: 621–622. 1753, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14: 544, pl. 20. 1770, *Index Sem. Hort. Petrop.* 1: 36. 1835 (*Index Seminum* [St. Petersburg]) and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 569. 1900, *Botanical Magazine* 32: 141. 1918, *Acta Pharmaceutica Sinica* 1: 41. 1957, *Fl. Chin. Trad. Med.* 1: 197. 1959, *Chinese Bulletin of Botany* 2(1): 43–44. 1984

(Tuberous roots used for thirst, hyperpyrexia, constipation, anemia, weakness, night sweats.)

in English: glutinous rehmannia

in China: di huang, gan di huang, shen di huang, shou di huang, shu di huang, ti huang

in Vietnam: dia hoang, sinh dia

Reichardia Roth Asteraceae

After the German botanist Johann Jacob (Jakob) Reichard, 1743–1782, physician, from 1773 to 1782 supervisor of the botanical garden and library of the Senckenberg Foundation, his works include *Flora moeno-francofurtana*. Francofurti ad Moenum [Frankfurt am Main] 1772–1778 and *Enumeratio*

stirpium horti botanici senckenbergiani, qui Francofurti ad Moenum est. Francofurti ad Moenum 1782; see Albrecht Wilhelm Roth (1757–1834), in *Botanische Abhandlungen und Beobachtungen*. 35. 1787, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, G. Schmid, *Goethe und die Naturwissenschaften*. Halle 1940, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 139. 1965, *Bot. Not.* 133: 515–520. 1980, *Lagascalia* 9: 149–158. 1980, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 227. Regione Siciliana, Palermo 1988, *Anales Jard. Bot. Madrid* 45: 483–494. 1989, *Willdenowia* 23: 211–238. 1993, *Fl. Medit.* 8: 245–251. 1998, *Amer. J. Bot.* 86(7): 1003–1013. 1999, *Compositae Newsllett.* 41: 9–28. 2004.

Reichardia tingitana (L.) Roth (*Picridium tingitanum* Desf.; *Picridium tingitanum* (L.) Desf.; *Reichardia orientalis* (L.) Hochr.; *Reichardia orientalis* Hochr.; *Reichardia tingitana* Roth; *Reichardia tingitana* (L.) Pau; *Scorzonera orientalis* L.; *Scorzonera tingitana* L.; *Sonchus tingitanus* (L.) Lam.; *Sonchus tingitanus* Lam.)

Mediterranean.

See *Species Plantarum* 791. 1753, *Botanische Abhandlungen und Beobachtungen*. 35. 1787, *Encyclopédie Méthodique, Botanique* (Lamarck) 3(2): 397. 1792, *Flora Atlantica* 2: 220. 1799 and *Bot. Not.* 131: 391–404. 1978, *Taxon* 31: 768. 1982, *Bocconea* 5: 211–220. 1996, *Bocconea* 11: 117–169. 1999, *Cytologia* 64: 181–196. 1999

(Antiseptic, for skin diseases.)

in English: false sow-thistle, reichardia

in Arabic: huwwa

Reinwardtia Dumortier Linaceae

To remember the Dutch scientist Caspar Georg Carl Reinwardt, 1773–1854 (d. Leiden, Holland), botanist, plant collector, traveller, 1823–1845 professor of natural history at the University of Leyden, author of *Enumeratio plantarum in horto Lugduno-Batavo coluntur*. [Leyden] 1831; see Barthélemy Charles Joseph Dumortier (1797–1878), *Commentationes Botanicae*. 19. Tournay 1822, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 755. 1852, *Bot. Zeitung* (Berlin) 21: 282. 1863 and J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 142. 1965, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 329. Boston, Mass. 1972, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 294. Cape Town 1981, R. Zander, F. Encke, G. Buchheim &

S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. 768. 1993.

Reinwardtia indica Dumortier (*Kittelocharis trigyna* (Reichenbach) Alefeld; *Linum cicanobum* Buch.-Ham. ex D. Don; *Linum cicanobum* Buch.-Ham.; *Linum repens* Buch.-Ham. ex D. Don; *Linum repens* Buch.-Ham.; *Linum trigynum* Roxburgh, nom. illeg., not Linnaeus; *Macrolinum trigynum* Reichbenbach; *Reinwardtia trigyna* Planch.; *Reinwardtia trigyna* (Reichenbach) Planchon; *Reinwardtia trigyna* Dalzell & A. Gibson; *Reinwardtia trigyna* (Roxb.) Planch.)

India.

See *Asiatic Researches* 4: 357. 1799, *Commentat. Bot.* 19. 1822, *Prodr. Fl. Nepal.* 217. 1825, *Handb. Nat. Pfl.-Syst.* 306. 1837, *London Journal of Botany* 7: 522–523. 1848, *Bot. Zeitung* (Berlin) 21: 282. 1863

(Paste of plant applied to treat scabies, whitlow and boils. Fresh leaf juice to cure cuts and wounds; crushed leaves applied to wounds infested with maggots. Crushed flowers mixed with mustard oil used on wounds and boils. Paste of roots applied to treat boils; root juice to treat typhoid. Tradition, myth, the appearance of the plant considered as the first sign of spring. Veterinary medicine, crushed leaves and stem applied to maggot-infested wounds in animals.)

in English: yellow flax

in China: shi hai jiao

in India: basant, basant phool, basanthi, peoli, pinguni, rangon

in Nepal: niphin, piunli

Reissantia N. Hallé Celastraceae (Hippocrateaceae)

Reissantia cassinoides (DC.) Ding Hou (*Hippocratea beccarii* Tuyn.; *Hippocratea glaga* Korth.)

Thailand, Sumatra. Liana, leaves decussate, inflorescence cymose, small subsessile flowers, petals pale yellow or yellowish-green, fruit a capsule, in lowland forest

(Leaves used as an ingredient of sambal, and medicinally, mixed with *Alyxia* sp. (*adas pulasari*), against rheumatism. Juice from the stem drunk against fever.)

in Indonesia: areuy mangender

Reissantia grahamii (Wight) Ding Hou (*Hippocratea grahamii* Wight; *Pristimera grahamii* (Wight) A.C. Smith)

Philippines, India.

See *Species Plantarum* 2: 1191. 1753, *Ann. Mus. Bot. Lugduno-Batavi* 4: 153. 1869 and *Philipp. J. Sci.* 17: 273. 1920, *Bull. Mus. Hist. Nat. (Paris)* Sér. 2, 30: 466. 1958, *Blumea* xii. 33. 1963, *J. Econ. Taxon. Bot.* 3: 663–664. 1982, *Phytochemistry* 29(6): 2027–2029. 1990, *Phytochemistry*

38(1): 275–276. 1995, *Journal of Ethnopharmacology* 104(1–2): 286–289. 2006

(Antibacterial, antiinflammatory, used for cough, rheumatic pain.)

Remusatia Schott Araceae

After the French botanist Jean Pierre Abel Rémusat, 1788–1832, physician, orientalist, author of *Éléments de la Grammaire Chinoise*. Paris 1822 and *Mélanges Asiatiques*. Paris 1825, 1826; see *Fl. Madagasc.* 31: 1–71. 1975, *Acta Bot. Yunnan.* Supp. 5: 28, 32. 1992.

Remusatia vivipara (Roxb.) Schott (*Arum viviparum* Roxb.; *Caladium viviparum* Lodd.; *Caladium viviparum* (Roxb.) Nees; *Caladium viviparum* Nees; *Colocasia vivipara* (Roxb.) Thwaites; *Colocasia vivipara* Thwaites; *Remusatia bulbifera* Hort. ex Vilm.; *Remusatia bulbifera* Hort.)

Tropics and Subtropics, India. Terrestrial or epiphytic herbs, bulbiferous shoots, short spadix with male inflorescence, leaves and tubers cooked and eaten as vegetable

See *Hort. Malab.* 12: tab. 9. 1703, *Hort. Bengal.* 65. 1814, *Botanical Cabinet*; consisting of coloured delineations . . . t. 281. 1820, *Meletemata Botanica* 1: 18. 1832, *Fl. Ind.* (ed. 1832) 3: 496. 1832, *Enumeratio Plantarum Zeylaniae* [Thwaites] 336. 1864, *Vilmorin's Blumengärtnerei. Dritte Neubearbeitung* Aflage 1: 1163. 1895 and *Phil. J. Sci.* 7: 413–415. 1912, *Cytologia* 43: 289–303. 1978

(Used in Ayurveda. Plant used as an antidote for snake poison. Aromatic roots made into a paste and mixed with *Curcuma longa* and employed as a remedy for itch and skin diseases. Paste of tuber applied internally to cure piles. Pounded corms with *Curcuma longa* a remedy for itch, its juice with cow's urine considered as alexipharmic; corm paste in castor oil applied on swollen rheumatic joints.)

in India: bacchanabhi, kadu gadde, kattu cheppai, laksmana, marachembu, marakesu, maravara-tsjembu, piparkand, rukh-alu, rukhalu, teliakand

Renealmia L.f. Zingiberaceae

For the French physician Paul Reneaulme (Paulus Renealmus), 1560–1624, botanist, author of *Specimen Historiae Plantarum*. Parisiis 1611, *P. Renealmi ... ad medicorum quorundam libellum responsio*. [Paris? 1615?] and *Ex curationibus observationes quibus videre ets [sic] morbus tuto ... possa debellari: si praecipue Galenicis praeceptis chymica veniant subsidio*. Parisiis 1606, editor of J.A. de Thou, the Elder, *I.A. Th[ou] Crambe, Viola, Lilium*, etc. 1611. See *Species Plantarum* 1: 2. 1753, *Supplementum Plantarum* 7, 79. 1781[1782], Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, *Asiatic Researches* 11: 350–352. 1810, *Transactions of the Horticultural Society of*

(Leishmanicidal and antimalarial.)

Rennellia Korth. Rubiaceae

For the English (b. Devon) geographer James Rennell, 1742–1830 (d. London), a former naval officer, 1764–1777 Surveyor

General to the East India Company in Bengal, traveller and explorer, 1781 Fellow of the Royal Society, his works include *An Account of the Ganges and Burrampooter Rivers ...* Read at the Royal Society January 25, 1780. London 1781, *A Chart of the Bank of Lagullus*. [A detailed chart of the Agulhas Bank and Cape showing the coast line from Table Bay to Algoa Bay, giving soundings and prevalent currents.] London 1778, *War with France, the only Security of Britain ...* By an Old Englishman. 1794, *The Geographical System of Herodotus* examined and explained by a comparison with those of other ancient authors. London 1800, *Memoir of a Map of Hindoostan, or, the Mogul Empire*. London 1788 and *The Marches of the British Armies in the Peninsula of India during the campaigns of 1790 and 1791 ...* explained by reference to a map. London 1792. See Mungo Park (1771–1806), *Abstracts of Mungo Park's Travels ... in the years 1795–1797*, with geographical illustrations ... by Major J. Rennell. 1790, Charles Athanase Walckenaer, *Notice historique sur la vie et les ouvrages de M. le Major Rennell*. 1842, *Ned. Kruidk. Arch.* 2(2): 254–255. 1851, Sir Clements Robert Markham (1830–1916), *Major James Rennell and the Rise of Modern English Geography*. London 1895 and *Bull. Jard. Bot. Buitenzorg*, III, 13: 426. 1935, Joan M. Eyles, in *D.S.B. (or Dictionary of Scientific Biography)*. Editor in Chief Charles Coulston Gillispie.) 11: 376. 1981.

Rennellia paniculata King & Gamble

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(3): 89. 1904, Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. Kew. 2003 [as *Rennellia morindiformis*.]

(Rasp the bark and apply the powder to wounds.)

Malay names: akar bumi, urap gundur

Rennellia speciosa (Wall. ex Kurz) Hook.f. (*Morinda speciosa* Wall. ex Kurz; *Rennellia speciosa* Benth. & Hook.f.)

Malay Peninsula, India.

See *Gen. Pl.* [Bentham & Hooker f.] 2(1): 118. 1873, *Forest Fl. Burma* 2: 62. 1877, *Fl. Brit. India* 3: 158. 1880

(Roots for rheumatism and dropsy.)

Malay name: lempedu tanah, mengkudu rimba

Retama Raf. Fabaceae (Genisteae, Leguminosae)

From the Arabic *retem* or *retam*, *ratama* for the broom bush; see Constantine Samuel Rafinesque, *Sylva Telluriana*. 22. 1838, Boissier, Pierre Edmond (1810–1885), *Voyage botanique dans le midi de l'Espagne* pendant l'année 1837. Paris, 1839–1845 and *Ann. Missouri Bot. Gard.* 80(1): 270–283. 1993.

Retama monosperma (L.) Boiss. (*Lygos monosperma* (L.) Heywood; *Retama rhodorhizoides* Webb & Berthel.; *Spartium monospermum* L.; *Spartium monospermum* Viv.)

(*Lygos* Adans., Greek *lygos*, ancient name for *agnus castus*, hence twigs, withes; Latin *lygos*, *i* for a plant, the chaste tree, *agnus castus*, Abraham's balm, in late Latin *Vitex*.)

Algeria, Egypt, Morocco, Mediterranean. Perennial non-climbing shrub

See *Species Plantarum* 2: 708–709. 1753, *Flora Libycae Specimen* 39. 1824, *Otia Hispanica* 24. 1839, *Voyage botanique dans le midi de l'Espagne* 2: 144. 1840 and *Feddes Repertorium* 79(1–2): 53. 1968, *Bol. Soc. Brot.*, sér. 2, 52: 79–164. 1978

(Alkaloids.)

in English: bridal broom, white broom

Retama monosperma (L.) Boiss. subsp. ***bovei*** (Spach) Maire (*Lygos raetam* (Forssk.) Heywood var. *bovei* (Spach) Tackh. & Boulos; *Retama bovei* Webb; *Retama raetam* Webb & Berthel. subsp. *bovei* (Spach) Talavera & P.E. Gibbs)

Algeria, Egypt, Morocco, Mediterranean. Perennial non-climbing shrub

See *Species Plantarum* 2: 708. 1753, *Otia Hispanica* 24. 1839, *Voyage botanique dans le midi de l'Espagne* 2: 144. 1840 and *Feddes Repertorium* 79(1–2): 53. 1968

(Alkaloids.)

in English: bridal broom, white broom

Retama raetam (Forsskål) Webb (*Genista raetam* Forsskål; *Genista retama* Nicholson; *Genista rhodorhizoides* Webb & Berth.; *Lygos raetam* (Forssk.) Heyw.; *Retama duriaei* Webb; *Retama duriaei* (Spach) Webb; *Retama raetam* (Forssk.) Webb & Berthel.; *Retama raetam* Webb & Berthel.; *Retama raetum* (Forssk.) Webb; *Spartium raetam* (Forssk.) Spach)

Algeria, Egypt, Libya. Perennial non-climbing shrub, white flowers

See *Flora Aegyptiaco-Arabica* 214. 1775, *Histoire Naturelle des Îles Canaries* 2: 56. 1836, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 279, 288. 1843 and *Anales Jard. Bot. Madrid* 8: 357–431. 1948, *Feddes Repertorium* 79(1–2): 53. 1968, *African Journal of Environmental Science and Technology* 2(7): 157–171. 2008

(Alkaloids.)

in English: white broom, white weeping broom, white Spanish broom

in Arabic: r'tem, retem, retem behan

Retama raetam (Forssk.) Webb subsp. ***raetam*** (Forssk.) Webb (*Genista monosperma* sensu auct.; *Lygos raetam* (Forssk.) Heywood)

Algeria, Egypt, Libya, Morocco, Tunisia. Perennial non-climbing shrub

See *Willdenowia* 15(2): 429. 1986

(Alkaloids. Strong hypertensive action on the blood pressure.)

Retama webbii Coss. (*Retama webbii* Webb)

Morocco. Perennial non-climbing shrub

See *Otia Hispanica* 24. 1839, *Bulletin de la Société Botanique de France* 22: 57. 1875

(Abortive.)

Reutealis Airy Shaw Euphorbiaceae

An anagram of the generic name *Aleurites* J.R. Forst. & G. Forst., see *Kew Bulletin* 20: 394. 1966.

Reutealis trisperma (Blanco) Airy Shaw (*Aleurites saponaria* Blanco; *Aleurites trisperma* Blanco; *Camerium trispermum* (Blanco) Kuntze; *Camerium trispermum* Kuntze)

Philippines.

See *Flora de Filipinas* [F.M. Blanco] 755. 1837, *Fl. Filip.*, ed. 2 [F.M. Blanco] 519. 1845, *Revis. Gen. Pl.* 2: 595. 1891 and *Kew Bulletin* 20: 395. 1966

(Oil from the seeds used as an insecticide. Bark sap as hair tonic.)

in English: soft lumbang

in China: san zi tong

in Philippines: bagilumbang, lumbang

Reynosia Griseb. Rhamnaceae

See *Species Plantarum* 1: 193–195. 1753, *Genera Plantarum* 376–377. 1789, *Catalogus plantarum cubensium* ... 33–34. 1866 and *N. Amer. Trees* 673. 1908.

Reynosia septentrionalis Urb.

West Indies. Tree, thick rigid leaves conspicuously recurved below, flowers on the new growth, flowers without petals, purple drupes, fruits mostly solitary at each node

See *Catalogus plantarum cubensium* ... 33. 1866, *Symbolae Antillarum* 1(2): 356. 1899

(Tonic, leaves boiled for weakness.)

in English: darling plum, Dollen Darling plum, Torm Dollen plum

Rhabdadenia Müll.Arg. Apocynaceae

Greek *rhabdos* 'a rod, stick, a magic wand' and *aden* 'gland', see *Fl. Bras.* (Martius) 6(1): 173–174. 1860, Miers, John (1789–1879), *On the Apocynaceae of South America*: with some preliminary remarks on the whole family. London, 1878 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132.

2001, *Darwiniana* 43(1–4): 90–191. 2005, *J. Bot. Res. Inst. Texas* 3(2): 541–564. 2009, *Darwiniana* 47(1): 140–184. 2009.

Rhabdadenia biflora (Jacq.) Müll.Arg. (*Apocynum cordatum* Mill.; *Apocynum cordatum* Thunb.; *Apocynum nervosum* Mill.; *Chariomma scandens* Miers; *Echites biflorus* Jacq.; *Echites bilbergii* Beurl.; *Echites ehrenbergii* Schltldl.; *Echites paludosus* Vahl; *Exothostemon paludosa* (H.B.K.) G. Don; *Exothostemon paludosum* (Vahl) G. Don; *Exothostemon paludosus* G. Don; *Rhabdadenia biflora* Müll. Arg.; *Rhabdadenia cordata* (Mill.) Miers; *Rhabdadenia cordata* Miers; *Rhabdadenia ehrenbergii* (Schltldl.) Müll. Arg.; *Rhabdadenia ehrenbergii* Müll.Arg. ex Griseb.; *Rhabdadenia macrantha* Donn. Sm.; *Rhabdadenia nervosa* Miers; *Rhabdadenia nervosa* (Mill.) Miers; *Rhabdadenia paludosa* (Vahl) Miers; *Rhabdadenia paludosa* Miers)

South America. Slender woody vines, reddish stem, milky latex, oval-linear oblong leaves, white pinkish flowers, slender pendent seed-pods

See *The Civil and Natural History of Jamaica* in Three Parts 182. 1756, *Enumeratio Systematica Plantarum* 13. 1760, *Gard. Dict.*, ed. 8. n. 9, 10. 1768, *Eclogae Americanae* 2: 19. 1798, *A General History of the Dichlamydeous Plants* 4: 70, 82–83. 1837, *Flora Brasiliensis* 6(1): 173–175, t. 52. 1860, *On the Apocynaceae of South America* 119. 1878 and *Botanical Gazette* 40(1): 7. 1905, *Bahama Fl.* 337. 1920, *Ceiba* 42(1): 1–71. 2001 [2002], *Darwiniana* 43(1–4): 90–191. 2005

(The latex is said to be vesicant in susceptible subjects.)

in English: mangrove vine

Rhamnus L. Rhamnaceae

Greek *rhamnos* ‘a kind of prickly plant or spiny shrub’, Latin *rhamnos* ‘buckthorn, Christ’s-thorn’ (Plinius), perhaps from the root of the Greek *rhabdos* ‘a rod, stick, a magic wand’, Akkadian *rapasu* ‘to beat’, *rappu*, Sumerian *rab* ‘stick, branch’; see Carl Linnaeus, *Species Plantarum*. 1: 193–195. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Genera Plantarum*. Ed. 5. 89. 1754, *Methodus* (Moench) 686. 1794, *A Natural Arrangement of British Plants* 2: 621. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 26. 1825 and *Fieldiana, Bot.* 24(6): 277–293. 1949, E. Vuolo, in *Cultura neolatina*. XVI: 170–171. Modena 1956, *Feddes Repert. Spec. Nov. Regni Veg.* 65: 44. 1962, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 1029. Zanichelli, Bologna 1985, Giovanni Semerano, *Le origini della cultura europea. Dizionari Etimologici. Basi semitiche delle lingue indeuropee. Dizionario della lingua Greca*. 2(1): 246–247. Leo S. Olschki Editore, Firenze 1994, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XV: 410. Torino 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2192–2200. 2001.

Rhamnus alnifolia L’Hér. (*Rhamnus alnifolia* Pursh)

North America. Shrub, perennial

See *Species Plantarum* 1: 193–195. 1753, *Sertum Anglicum* 5. 1789, *Fl. Amer. Sept.* (Pursh) 166. 1813 and *Taxon* 31(2): 344–360. 1982

(Antidote, plant infusion taken and poultice applied to swellings and bite.)

in English: alder buckthorn, alderleaf buckthorn

Rhamnus arguta Maximowicz var. ***arguta*** (*Rhamnus arguta* var. *betulifolia* Liou & Li; *Rhamnus arguta* var. *cuneifolia* Wang & Li; *Rhamnus arguta* var. *rotundifolia* Wang & Li)

China.

See *Species Plantarum* 1: 193–195. 1753, *Mémoires de l’Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 10: 11. 1866 and *Ill. Fl. Lign. Pl. N.-E. China* 566. 1955, *International Organization of Plant Biosystematists Newsletter* 10: 11. 1988

(Bark infusion blood purifier. Stems, leaves, and seeds used for making insecticide.)

in China: rui chi shu li

Rhamnus bungeana J.J. Vassiljev

China, Eurasia.

See *Species Plantarum* 1: 193–195. 1753 and *Bot. Mater. Gerb. Bot. Inst. Acad. Nauk SSSR* 8: 335. 1949, *International Organization of Plant Biosystematists Newsletter* 10: 11. 1988

(Cathartic.)

in China: luan ye shu li

Rhamnus cathartica Linnaeus (*Rhamnus cathartica* var. *dahurica* Maximowicz)

China. Perennial small tree or shrub, spines on the branches and trunks

See *Species Plantarum* 1: 193–195. 1753, *Mémoires de l’Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 10: 9. 1866 and *Taxon* 30: 77–78. 1981, *Biologie-Ecologie Méditerranéenne* 10: 273–289. 1987, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Watsonia* 19: 134–137. 1992, *Regnum Veg.* 127: 81. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Opera Botanica* 137: 1–42. 1999

(This plant contains glycosides, which upon hydrolysis yield anthraquinones such as emodin; these chemicals have a purgative action. Emodin has been used in laxative preparations. The bark and fruits contain chemicals that have a strong purgative action that can affect humans. Severe poisoning is rare. The fruit is used medicinally, often used for treating constipation; bark and fruit used as a cathartic.)

in English: common buckthorn, European buckthorn, purging buckthorn, Rhine berries

in Italian: ramno catartico, ramno purgativo

in China: yao shu li

Rhamnus crenata Siebold & Zuccarini (*Frangula crenata* (Siebold & Zucc.) Miq.; *Frangula crenata* Miq.; *Rhamnus crenata* Baker & S. Moore)

China.

See *Species Plantarum* 1: 193–195. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 146. 1843, *Annales Museum Botanicum Lugduno-Batavi* 3: 32. 1867, *J. Linn. Soc., Bot.* 17: 380. 1879 [1880 publ. 1879]

(The roots are poisonous. The roots and bark are often used as an insecticide.)

in China: chang ye dong lu, li la gen

Rhamnus davurica Pallas

Eurasia, Russia, China.

See *Species Plantarum* 1: 193–195. 1753, *Reise durch verschiedene Provinzen des russischen Reichs* 3: append. 721. 1776, *Fl. Brit. India* 1(3): 639. 1874 and *International Organization of Plant Biosystematists Newsletter* 10: 11. 1988

(Infusion of plant taken and poultice applied to swelling, also antidote.)

in China: shu li

Rhamnus erythroxylon Pallas

China. The leaves are strongly fragrant

See *Species Plantarum* 1: 193–195. 1753, *Reise durch verschiedene Provinzen des russischen Reichs* 3: append. 722. 1776

(Bark infusion of bark given as a tonic, physic and as blood purifier.)

in China: liu ye shu li

Rhamnus frangula Linnaeus (*Frangula alnus* Miller; *Frangula frangula* (L.) H. Karst., nom. inval., tautonym; *Rhamnus sanguinea* Pers.)

Europe.

See *Species Plantarum* 1: 193–195. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Gardeners Dictionary: ... eighth edition*. 1768, *Syn. Pl.* 1: 239. 1805, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 868. 1882 and Cooper, M.R., Johnson, A.W. *Poisonous Plants in Britain and Their Effects on Animals and Man*. London. 1984

(Several purgative chemicals, including emodin, occur in the bark and in the purple-black fruits. This plant causes usually mild symptoms if ingested by children. The bark is used medicinally for stomach pain and as laxative.)

in English: alder buckthorn

in China: ou shu li

Rhamnus globosa Bunge (*Rhamnus chlorophora* Decaisne; *Rhamnus tinctoria* Hemsl., nom. illeg., non *Rhamnus tinctoria* Waldst. & Kit.)

China.

See *Species Plantarum* 1: 193–195. 1753, *Mémoires des Savantes Etrangers Acad. St. Petersburg* 2: 88. 1833, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 44: 1140. 1857, *Journal of the Linnean Society, Botany* 23(153): 129–130. 1886 and *Bull. Bot. Res., Harbin* 8(2): 99. 1988

(Astringent. Decoction of bark used for itch.)

in China: yuan ye shu li

Rhamnus hainanensis Merrill & Chun

China.

See *Species Plantarum* 1: 193–195. 1753 and *Sunyatsenia* 2(3–4): 273–375, f. 32. 1935

(A tonic.)

in China: hai nan shu li

Rhamnus heterophylla Oliver (*Rhamnus cavaleriei* H. Lév.; *Rhamnus heterophylla* var. *oblongifolius* E. Pritzel)

China.

See *Species Plantarum* 1: 193–195. 1753, *Hooker's Icones Plantarum* 18(3): pl. 1759. 1888 and *Hooker's Icones Plantarum* 29: 459. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 9(214–216): 326. 1911

(Blood purifier.)

in China: yi ye shu li

Rhamnus ilicifolia Kellogg (*Rhamnus crocea* Nutt. subsp. *ilicifolia* (Kellogg) C.B. Wolf; *Rhamnus crocea* Nutt. var. *ilicifolia* (Kellogg) Greene)

North America. Perennial shrub or tree

(Decoction of roots and bark analgesic, stimulant, for headaches, colds, coughs, for stomach disorders and the spleen, liver, kidneys, boils and carbuncles; roots decoction diuretic, laxative, for gonorrhoea. Plant smoke inhaled for rheumatism.)

in English: hollyleaf redberry

Rhamnus japonica Maxim.

Japan.

See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 10(11): 11. 1806

(Purplish black fruit used as a tonic laxative.)

in Japan: kiskinni, yuk-numa

Rhamnus leptophylla C.K. Schneider (*Rhamnus inconspicua* Grubov)

China.

See *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 5(43): 77–78. 1908, *Not. Syst. Inst. Bot. Acad. Sci. URSS* 12: 129. 1950

(Bark infusion a tonic.)

in China: bao ye shu li

Rhamnus longipes Merrill & Chun (*Frangula longipes* (Merrill & Chun) Grubov)

China.

See *Species Plantarum* 1: 193–195. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754 and *Sunyatsenia* 2(3–4): 272–273, f. 31. 1935, *Act. Inst. Bot. Acad. Sci. URSS* ser. 1 8: 266. 1949, *Act. Phytotax. Sin.* 7(1): 62. 1958

(Inner bark a physic, cathartic.)

in China: chang bing shu li

Rhamnus nepalensis (Wall.) M.A. Lawson (*Ceanothus nepalensis* Wall.; *Ceanothus nipalensis* Wallich; *Celastrus tristis* H. Lévl.; *Rhamnus nepalensis* (Wall.) M.A. Lawson; *Rhamnus nipalensis* M.A. Lawson; *Rhamnus paniculiflora* C.K. Schneider)

India, Himalaya. Straggling shrub, oblong leaves shining above, flowers in axillary panicles, dark red obovate fruits, ripe fruits eaten

See *Species Plantarum* 1: 193–197. 1753, *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall. 2: 375–376. 1824, *The Flora of British India* [J.D. Hooker] 1(3): 640. 1875 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 263. 1914, *Plantae Wilsonianae* (Sargent) 2(1): 233–234. 1914

(Fruits pounded and macerated in vinegar and prescribed in herpes. Powder of the fruit with *Sesamum* used as snuff for headache; powder of the seed given as a vermifuge. Bark extract of *Alstonia scholaris* with *Cuscuta reflexa* and bark of *Rhamnus nepalensis* given to kill intestinal worms.)

in China: ni bo er shu li

in India: nakaling-araung, rikang-ak-ik-araung, ringkang-ak-ik-araung

Rhamnus prinoides L'Hérit. (*Celtis rhamnifolia* Presl, nom. illegit.) (Greek *prinos* 'the scarlet oak', Latin *prinus* 'ilex, the holm-oak, great scarlet oak')

East Africa. Small tree or shrub, evergreen, multi-branched, weak, spreading, straggling, climbing, leaning, lianescent, bright shiny green leaves, minute greenish flowers, small fruits green then red-purple to black when ripe, montane forest, in degraded forest, at forest edge, in wet forest

See *Sertum Anglicum* 6, t. 9. 1788, *Abh. Königl. Böhm. Ges. Wiss.* ser. 5, 3: 467. 1845

(Insect repellent. Black roots bitter, used for sprains. Leaf decoction for malaria; an infusion drunk to purify kidneys and bladder. Magic, ritual, ceremonial, used for spiritual practices against witchcraft.)

in English: dogwood

in Southern Africa: blinkblaar, dark blinkblaar, hondepis (it is an ancient pioneer name which alludes to the unpleasant taste of the fruits), hondepishout, mofifi (= darkness); uNy-enya, umNyenye, uNyenye, umGilindi, umHlinye (Zulu); liNyenye (Swazi); umNyenye, umGlindi (Xhosa); mofifi (South Sotho); muBariro, muBerere, Mandara, Sukuchuma, Tsonga, Vunambezu

in Tanzania: engonyil, olkbuanyeli, orkonyil, orokwanyeri, orokwanyi

Rhamnus purshiana DC.

Europe, North America.

See *Species Plantarum* 1: 193–197. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 25. 1825

(Bark infusion drunk as laxative, emetic, purgative; bark decoction as purgative, violent and dangerous effects. Compound decoction of roots taken for gonorrhoea.)

in English: barberry, buckthorn, cascara

in Spanish: cascara sagrada

Rhamnus tangutica J. J. Vassiljev (*Rhamnus leptophylla* C.K. Schneider var. *scabrella* A. Rehder; *Rhamnus potaninii* J.J. Vassiljev; *Rhamnus virgata* Roxburgh var. *parvifolia* Maximowicz)

Russia, India.

See *Species Plantarum* 1: 193–197. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 351–353. 1824, *Flora Tangutica* 203. 1889 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 5(43): 77–78. 1908, *Journal of the Arnold Arboretum* 9(2–3): 93. 1928, *Not. Syst. Inst. Bot. Acad. Sci. URSS* 8: 127, f. 15 a-c. 1940

(Wash for sore and inflamed eyes. Blood purifier.)

in China: gan qing shu li

Rhamnus triquetra (Wall.) Brandis (*Rhamnus triquetra* Wall.)

India, Himalaya. Evergreen shrubs, unarmed, yellow-green solitary flowers, 3-lobed fruits purplish-black

See *The forest flora of North-West and Central India* 92. 1874

(Bark astringent, tonic, a decoction taken for skin diseases.)

Rhamnus utilis Decaisne

China.

See *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 44: 1141. 1857

(Cathartic, purgative.)

in China: dong lu

Rhamnus virgata Roxb.

India, Nepal.

See *Flora Indica*; or descriptions of Indian Plants 2: 351–353. 1824

(Fruits used for spleen affections.)

in English: Indian buck thorn

in China: zhou zhi shu li

in India: chhedula, lakoa

Rhaphidophora Hassk. Araceae

Greek *rhaphis*, *rhaphidos* ‘a needle, pin’ and *phoros* ‘carrying’, referring to the points on the fruits; see Justus Carl Hasskarl (1811–1894), *Flora oder allgemeine Botanische Zeitung*. 25(2 Beibl. 1): 11. (Jul.) 1842 and *Nat. Pflanzenfam. Nachtr.* 3: 31. 1906, *Genética Ibérica* 30–31: 161–188. 1979, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, *The Genera of Araceae*. i–v, 1–370. 1997, *Bangladesh Journal of Plant Taxonomy* 8(2): 19–34. 2001.

Rhaphidophora calophylla Schott

India, Himalaya, China.

See *Prodr. Syst. Aroid.* 380. 1860

(Leaves decoction as a remedy for gastric troubles and stomachache.)

in India: aechay

Rhaphidophora decursiva (Roxburgh) Schott (*Monstera decursiva* (Roxb.) Schott; *Monstera decursiva* Schott; *Monstera multijuga* K. Koch ex Ender, nom. inval.; *Pothos decursivus* Roxburgh; *Raphidophora decursiva* (Roxb.) A. Schott; *Rhaphidophora affinis* Schott; *Rhaphidophora eximia* Schott; *Rhaphidophora grandis* Schott; *Rhaphidophora insignis* Schott; *Scindapsus decursivus* (Roxb.) Schott; *Scindapsus decursivus* Schott; *Scindapsus decursivus* Moritzi)

Himalaya, SE Asia, Vietnam.

See *Species Plantarum* 2: 968. 1753, *Familles des Plantes* 2: 470. 1763, *Genera Plantarum* 23. 1789, *Hort. Bengal.* 11. 1814, *Flora Indica*; or descriptions of Indian Plants (Carey & Wallich ed.) 1: 456–457. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1830(4): 1028. 1830, *Meletemata Botanica* 1: 21. 1832, *Flora* 25 (2, Beibl.): 11. 14 Jul 1842, *Bonplandia* 5: 45. 1857 and *Nat. Pflanzenfam. Nachtr.* 3: 31. 1906, *Taxon* 27: 519–535. 1978

(Root stock of *Diplazium maximum* crushed with those of *Angiopteris evecta*, *Colysis hemionitidea* and stems of *Raphidophora decursiva* and *Raphidophora hookeri* and applied on fracture. Stems and leaves used for the treatment of traumatic injury, fractures, swellings, colds, lumbago, snakebites and against coughs and bronchitis. Plants used on festivals to keep the evil spirit away.)

in China: pa shu long

in India: tachitali

Rhaphidophora gigantea Ridl. (*Epipremnum giganteum* Schott)

Malay Peninsula. Huge climbing jungle shrub, leaves coriaceous, very narrow flowers, spike of green flowers wrapped in a large spathe

See *Bonplandia* 5: 45. 1857 and *Materials for a Flora of the Malayan Peninsula* 3: 45. 1907

(Liquid in the spathe is very irritating. Poison for arrows and darts.)

Malay names: buah rengut (the fruit), ringut

Rhaphidophora glauca (Wall.) Schott (*Rhaphidophora glauca* Schott; *Scindapsus glaucus* (Wall.) Schott; *Scindapsus glaucus* Schott)

Himalaya. Scrambling climber on tree

See *Plantae Asiaticae Rariores* 2: 45, t. 156. 1831, *Meletemata Botanica* 21. 1832, *Bonplandia* 5: 45. 1857 and *J. Econ. Taxon. Bot.* 10(1): 155. 1987

(Aqueous stem extract given in bodyache. According to folk belief, the fruits of this plant are eaten by the devil.)

in India: chulu, tinkling

Rhaphidophora hongkongensis Schott (*Pothos obliquus* Wall. ex Hook.f.; *Pothos obliquus* Wall.; *Rhaphidophora tonkinensis* Engler & Krause)

China, Vietnam.

See *Numer. List* [Wallich] n. 4446. 1831, *Flora* 25 (2, Beibl.): 11. 14 Jul 1842, *Fl. Brit. India* 6: 555. 1893 and *Das Pflanzenreich* IV. 23B (Heft 37): 34. 1908, *Bonplandia* 5: 45. 1957

(For the treatment of traumatic injury, fractures, lumbago, rheumatism and internal fever, snakebite and scorpion stings.)

in China: shi zi wei

Rhaphidophora hookeri Schott

India, Vietnam, Himalaya. Hemi-epiphytic climber, fascicles of leaves

See *Flora* 25 (2, Beibl.): 11. 14 Jul 1842, *Prodr. Syst. Aroid.* 381. 1860

(Root stock of *Diplazium maximum* crushed with those of *Angiopteris evecta*, *Colysis hemionitidea* and stems of *Raphidophora decursiva* and *Raphidophora hookerii* and applied on fracture. Stems used for fractures; crushed stem juice mixed with fatty oil given to a pregnant woman for a smooth delivery. Paste of leaves and roots for snake and dog bites, extract taken orally and paste applied on the injury.)

in China: mao gou shan long

in India: dhukentri, thiallawn

Raphidophora minor Hook.f. (*Raphidophora celebica* K. Krause)

Thailand. Climber

See *Fl. Brit. India* 6: 544. 1893 and *Notizbl. Bot. Gart. Berlin-Dahlem* 11: 331. 1932

(Stem for delayed confinements.)

in Malay Peninsula: kulamayang ayer

Raphidophora montana (Blume) Schott (*Anadendrum montanum* (Blume) Schott; *Calla montana* Blume; *Raphidophora angulata* (Miq.) Schott; *Raphidophora burkilliana* Ridl.; *Raphidophora fallax* Schott; *Scindapsus angulatus* Miq.; *Scindapsus montanus* (Blume) Kunth)

China, Malay Peninsula. Vine, herbaceous liane

See *Catalogus ...* 62. 1823, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 64. 1841, *Fl. Ned. Ind.* 3: 219. 1856, *Bonplandia* (Hannover) 5: 45. 1857, *Prodr. Syst. Aroid.*: 379. 1860, *Ann. Mus. Bot. Lugduno-Batavi* 1: 128. 1863 and *Fl. Malay Penins.* 5: 121. 1925

(Roots for headache. Base of the stem applied as a poultice in the extraction of stinging hairs of insects.)

in Indonesia: aka bakung

Malay names: akar meroyan sumbang, sugunja

Raphidophora peepla (Roxburgh) Schott (*Monstera peepla* (Roxb.) Schott; *Pothos peepla* Roxburgh, also *peeplus*; *Pothos pipila* Schult.; *Raphidophora dunniana* A. Lév.; *Raphidophora lancifolia* Schott; *Raphidophora peepla* Thwaites; *Scindapsus peepla* (Roxb.) Schott)

Tropical Asia, India.

See *Species Plantarum* 2: 968. 1753, *Familles des Plantes* 2: 470. 1763, *Flora Indica*; or descriptions of Indian Plants 1: 454. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1830(4): 1028. 1830, *Meletemata Botanica* 1: 21. 1832, *Flora* 25 (2, Beibl.): 11. 14 Jul 1842, *Bonplandia* 5: 45. 1857 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970

(For the treatment of fractures, traumatic injury, snakebite and scorpion stings, rheumatic arthralgia, angina pectoris, bronchitis and cough.)

in China: da ye nan su

Raphidophora pertusa (Roxb.) Schott (*Monstera pertusa* (Roxb.) Schott; *Pothos pertusus* Roxb.; *Raphidophora lacera* Hassk., nom. illeg.; *Scindapsus peepla* Thwaites; *Scindapsus pertusus* (Roxb.) Schott)

Tropical Asia, India, Bangladesh, Sri Lanka.

See *Flora Indica*; or descriptions of Indian Plants 1: 455–456. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1830(4): 1028. 1830, *Meletemata Botanica* 21. 1832, *Flora* 25(2 Beibl.): 11. 1842, *Bonplandia* (Hannover) 5: 45. 1857, *Prodr. Syst. Aroid.* 382. 1860, *Enum. Pl. Zeyl.*: 336. 1864

(Aerial roots and leaves used in healing bone fracture, cuts and wounds.)

Raphidophora spuria (Schott) Nicolson (*Cuscuaria spuria* Schott; *Raphidophora graeffei* Engl.; *Raphidophora peepla* var. *storckiana* (Schott) Engl.; *Raphidophora reineckeii* Engl.; *Raphidophora storckiana* Schott)

Papua New Guinea, Fiji and Samoa. Entire-leaved

See *Flora* 25 (2, Beibl.): 11. 14 Jul 1842, *Bonplandia* (Hannover) 9: 367. 1861, *Bonplandia* (Hannover) 10: 346. 1862, *Bot. Jahrb. Syst.* 25: 9. 1898 and *Allertonia* 1: 348. 1978

(Analgesic, used for snakebite and scorpion stings.)

Raphiostylis Planchon ex Benth. Icacinaceae

Greek *rhaphis* and *stylos* 'pillar, column, style', see *Linnaea* 12 (1838) 136. 1838, *J. Bot.* (Hooker) 3: 155. 1840, *Niger Fl.* [W.J. Hooker], 259. 1849.

Raphiostylis beninensis (Hook.f. ex Planch.) Planch. ex Benth. (*Apodytes beninensis* Hook.f. ex Planch.; *Apodytes beninensis* Hook.f.; *Raphiostylis beninensis* Planch. ex Benth.)

Tropical Africa. Liana, small tree, vine, climbing, papery leaves, orange-cream fragrant flowers, red fleshy fruits

See *Hooker's Icones Plantarum* 4: t. 778. 1848, *Niger Flora* 259, t. 28. 1849

(Seeds and leaves febrifuge, tonic, for sores.)

in Central African Republic: zèrèngbò

in Yoruba: ajasile, igbehin, itapara

Rhapis L.f. ex Aiton Arecaceae (Palmae)

Greek *rhapis* 'a rod', referring to the leaf segments or to the awns of the corolla.

Rhapis excelsa (Thunberg) Henry (*Chamaerops excelsa* Thunberg; *Chamaerops kwanwortsik* Siebold ex H. Wendl., nom. nud.; *Rhapis aspera* W. Baxter, nom. nud.; *Rhapis cordata* W. Baxter, nom. nud.; *Rhapis divaricata* Gagnep.;

Rhapis excelsa (Thunberg) Henry ex Rehder; *Rhapis flabeliformis* L'Hér. ex Aiton, nom. illeg.; *Rhapis humilis* Blume; *Rhapis kwamwonzick* Siebold ex Linden; *Rhapis major* Blume; *Trachycarpus excelsus* (Thunb.) H. Wendl.

China, Vietnam. Small shrub-like palm, fleshy fruits

See *Flora Japonica*, ... 130. 1784, *Hortus Kew.* 3: 473. 1789, *Bulletin de la Société Botanique de France* 8: 429. 1861 and *J. Arnold Arbor.* 11(3): 153. 1930

(Root and leaf-sheaths for skin diseases, boils.)

in English: bamboo palm, Buddha's bamboo, dwarf ground rattan, ground rattan, lady palm, large lady palm, miniature fan palm

in Brazil: palmeira ráfia, palmeira rápis

in Japan: Kannon-chiku (= Buddha's bamboo, from Kannonzan, Ryukyu Islands) (chiku = bamboo)

in Okinawa: kwan-nun-chiku, urada-chingu

Rhaponticum Ludw. Asteraceae

Latin *radix Pontica*, Greek *rheon*, *rha* 'roots and rhizomes (from Iran)', the *rha* of Pontus, Greek *Rha* (said to be from the ancient name of the river Volga/Wolga), Latin *Rha* 'the Volga, on whose banks grew the radix pontica, *Rha ponticum*, rhubarb, *Rheum rhaponticum* L., which thence received its name'; see *Species Plantarum* 2: 915. 1753, *Inst. Reg. Veg.* ed. 2 123. 1757 and C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1234. [rhubarb] 1967, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 1017. 1985, R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. 475. 1993, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XV: 176, 966. 1994, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 532, 533–534. 1996.

Rhaponticum carthamoides (Willdenow) Iljin (*Centaurea carthamoides* (Willdenow) Bentham; *Cirsium carthamoides* (Willdenow) Link; *Cirsium centauroides* Willdenow; *Cirsium uniflorus* Sievers; *Cnicus carthamoides* Willdenow; *Cnicus uniflorus* Siev.; *Halocharis carthamoides* M. Bieb. ex DC.; *Leuzea altaica* Fischer ex Schauer; *Leuzea carthamoides* (Willdenow) DC.; *Serratula carthamoides* (Willd.) Poir.; *Serratula cynarifolia* Poiret; *Stemmacantha carthamoides* (Willdenow) Dittrich)

China. Sometimes as *Stemmacantha carthamoides*

See *Species Plantarum*. Editio quarta 3(3): 1686. 1803, *Encyclopédie Méthodique, Botanique* 6(2): 561. 1805, *Annales du muséum national d'histoire naturelle* 16: 205. 1810, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 303. 1822, *Genera Plantarum* 2: 479. 1873 and *News Sib. Depart. Acad. Sci. USSR, Ser. Biol.* 15(3): 46–52. 1976,

Bot. Zhurn. SSSR 64 (4): 582–589. 1979, *Candollea* 39: 46. 1984, *Bot. Žurn.* (Moscow & Leningrad) 79(2): 135–139.

(Rhizomes for fever, cough, cold.)

in China: lu cao

Rhazya Decne. Apocynaceae

Possibly from the Greek *rhazein*, *rhazo* 'snarl as a dog', see *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 80. 1835.

Rhazya stricta Decne.

Arabian Pen., Iran, Yemen, India.

See *Annales des Sciences Naturelles, Botanique*, sér. 2, 4: 80. 1835

(Powdered dried fruits and leaves to relieve stomach gas, stomachache; dried flowers and leaves to relieve colic and stomachache; leaves cooling, to purify blood. Plant juice to relieve sore and swollen eyes. Root to treat jaundice; aerial parts to treat gastrointestinal parasites.)

in Arabic: harmal

in Pakistan: hisawarg, ishrek, ishrek phali, kawil, sahi, siar, sihar

Rheedia L. Clusiaceae (Guttiferae)

For the Dutch botanist Hendrik (Henricum, Henricus, Henric) Adriaan (Adrien) van Rheede (Reede) tot Draakestein (Draakensteen, Drakestein, Drakenstein) (Rheedius a Drackensteen), 1637–1691, colonial administrator, with the Dutch East India Company, 1669–1676 Malabar, from 1684 India, among his works the famous *Hortus indicus malabarius*. Amstelodami 1678[–1703]; see *Species Plantarum* 1: 443–444. and 2: 1193. 1753, Lewis Weston Dillwyn (1778–1855), *A review of the references to the Hortus malabaricus of Henry van Rheede van Draakenstein*. Swansea 1839, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 759. Ansbach 1852 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 149. 1965, Frans A. Stafleu, *Linnaeus and the Linnaeans. The spreading of their ideas in systematic botany, 1735–1789*. Utrecht 1971, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 330. Boston, Mass. 1972, Stafleu and Cowan, *Taxonomic Literature*. 4: 750–753. Utrecht 1983, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 230. Regione Siciliana, Palermo 1988, *Novon* 18(4): 524–537. 2008.

Rheedia acuminata (Planch. & Triana) Miers (*Garcinia acuminata* Planch. & Triana; *Garcinia acuminata* Pierre; *Garcinia acuminata* A. Chev., nom. nud.; *Rheedia acuminata* (Ruiz & Pav.) Planch. & Triana)

South America. Sour ripe fruit eaten raw, taxonomical confusion

See *Annales des Sciences Naturelles; Botanique*, série 4 14: 314–315, 355. 1860, *Flore Forestière de la Cochinchine* 5: 36. 1883 and *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 53. 1920

(Leaf juice or bark extract given in dropsy and low blood pressure.)

in India: thizru

Rheum L. Polygonaceae

Greek *rheon*, *rha* 'roots and rhizomes (from Iran)', Dioscorides used *rha* for the rhubarb, the *rha* of Pontus, Greek *Rha* (said to be from the ancient name of the river Volga/Wolga), Latin *Rha* 'the Volga, on whose banks grew the radix pontica, *Rha ponticum*, rhubarb, *Rheum rhaponticum* L., which thence received its name'; see Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1234. [rhubarb] 1967, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 4: 1017. Bologna 1985, R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. 475. 1993, S. Battaglia, *Grande dizionario della lingua italiana*. XV: 176, 966. 1994, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 532, 533–534. 1996.

Rheum acuminatum Hook. f. & Thomson (*Rheum orientalexizangense* Y.K. Yang, J.K. Wu & Gasang.)

India. Herb

See *Botanical Magazine* 81: pl. 4887. 1885 and *Acta Botanica Boreali-Occidentalia Sinica* 12(4): 313. 1992

(Leaves and young parts for bodyache, muscular pain.)

in China: xin ye da huang

Rheum australe D. Don (*Rheum emodi* Wall.; *Rheum emodii* Wall.; *Rheum emodii* Wall. ex Meisn.; *Rheum emodium* Wall. ex Nees & Eberm.)

Himalaya, Nepal, Sikkim. Herb, robust, stem hollow, roots stout, lower leaves orbicular or broadly ovate, small dark purple flowers, purple angled fruits, petioles pickled, tender leaves as vegetable

See *Species Plantarum* 1: 371–372. 1753, *Prodromus Florae Nepalensis* 75. 1825, *Numer. List* [Wallich] n. 1727 C. 1829, *The Flora of British India* 5: 56. 1886

(Used in Ayurveda. Rhizomes and roots purgative, digestive, astringent, tonic, stomachic, spasmolytic; powder of rhizome to treat diarrhea, dysentery, cough, cold. A water-paste of the roots used for cuts, sprains, boils, wounds and swellings. Dried powdered leaves rubbed on the skin for the treatment of headache, bone ache, sores, ulcers, muscle pain; vegetable from the leaves given in piles and chronic bronchitis.)

in English: Himalayan rhubarb, Indian rhubarb

in Bhutan: churtsa

in India: archa, archu, chhirchey, chuchi, chukri, dalu, dholu, dolu, gandhini, pambchalen, ravandchini, revandchini, revatchini

in Nepal: akase chuk, amalbed, chulthi amila, chyurcha, padam chal, padamchal

Rheum nobile Hook. f. & Thomson (*Rheum nobile* Hook. f.)

India, Himalaya.

See *Illustrations of Himalayan Plants*, pl. 19. 1855

(Roots eaten raw to cure dysentery.)

in China: ta huang

in India: kejo

Rheum officinale Baill.

China.

See *Species Plantarum* 1: 371–372. 1753, *Adansonia* 10: 246. 1871

(Astringent.)

in English: Chinese rhubarb, rhubarb

in China: chiang chun (= captain general), da huang, huang liang (= yellow efficacy), ta huang, yao yong da huang

in Mexico: nocuana lanini castilla

Rheum palmatum Linnaeus (*Rheum potaninii* Losinskaja; *Rheum qinlingense* Y.K. Yang et al.)

Northern and western China and Tibet. Herb, erect, perennial, rhizome and roots thick branched, leaves in a radical rosette borne on a thick subcylindrical petiole, inflorescence a loose hairy panicle with racemiform branches, flowers bisexual, fruit a trigonous winged nutlet, in grassland

See *Species Plantarum* 1: 371–372. 1753, *Systema Naturae*, ed. 10. 2: 1010. 1759 and *Trudy Botanicheskogo Instituta Akademii Nauk S S S R. Ser. 1, Flora i Sistematika Vysshikh Rastenii. Moscow & Leningrad* 3: 78. 1936, *Acta Botanica Boreali-Occidentalia Sinica* 12(4): 309–311. 1992, Li Anjen, Kao Tsoching, Mao Zumei & Liu Yulan. *Polygonaceae*. In: Li Anjen, ed., *Fl. Reipubl. Popularis Sin.* 25(1): 1–209. 1998

(Whole herb as purgative. Roots and rhizomes laxative, mild purgative, febrifuge, tonic, astringent, antiinflammatory, anti-hypertensive, used against constipation, dysentery, swollen gums, sore throat, sores, furuncles, burns, acute fevers, jaundice, strangury and after childbirth.)

in English: Chinese rhubarb, medicinal rhubarb, rhubarb, Turkish rhubarb

in China: zhang ye da huang

in India: lacchu

in Indonesia: kalembak, kelembak, talembak

in Ladakhi: Ichumtsa

in Malaysia: kelembak

in Tibetan: lcum-rtsa

in Vietnam: d[aj]i ho[af]ng ch[aa]n v[ij]t

Rheum rhabarbarum Linnaeus (*Rheum franzenbachii* Münter; *Rheum franzenbachii* var. *mongolicum* Münter; *Rheum undulatum* L.; *Rheum undulatum* var. *longifolium* C.Y. Cheng & T.C. Kao)

China.

See *Species Plantarum* 1: 371–372. 1753, *Gen. Pl.* ed. 5, 174. 1754, *Species Plantarum*, Editio Secunda 2: 531. 1762, *Acta Congr. Bot. Amst.* 1877: 212. 1879 and Chin, T.C. and H.W. Youngken. “The cytotaxonomy of *Rheum*.” *Amer. J. Bot.* 34: 401–407. 1947, *Acta Phytotaxonomica Sinica* 13(3): 79. 1975, *Nordic J. Bot.* 14: 154. 1994

(All parts of the plant contain oxalic acid, which has been implicated in cases of poisoning. However, other potentially poisonous compounds also are produced, including citric acid and anthraquinone glycosides. Raw or cooked leaf blades are poisonous to humans and livestock if ingested in sufficiently large quantities. The petioles typically are used as food and contain mostly malic acid, which is nontoxic.)

in North America: garden rhubarb, pie-plant, rhubarbe, wine-plant

Rheum rhaponticum L. (*Rheum rhaponticum* Herder)

Europe, Mediterranean. Herbaceous perennial, hollow stems, heavy rootstock, heart-shaped leaves, greenish-white flower clusters

See *Species Plantarum* 1: 371–372. 1753 and Robb, H.F. “Death from rhubarb leaves due to oxalic acid poisoning.” *J. Am. Med. Assoc.*, 73: 627–628. 1919 *Taxon* 30: 77–78. 1981, *Fitologija* 30: 78–79. 1985, *Flora Mediterranea* 7: 204–213. 1997

(The plant contains oxalate crystals, which have been reported to cause poisoning when large quantities of raw or cooked leaves are ingested; all animals may be affected. Rhubarb leaves contain the highest amounts of oxalates and perhaps anthraquinones, which may be partly responsible for toxicity. Anthraquinones (glycosides) have been implicated more recently in poisoning. The toxic content is much lower in the stalks. Humans have been poisoned after ingesting the leaves.)

in English: pie plant, rhubarb

Rheum spiciforme Royle (*Rheum aplostachyum* Kar. & Kir.; *Rheum moorcroftianum* Royle; *Rheum reticulatum* Losinsk.; *Rheum rhizostachyum* Schrenk; *Rheum scaberrium* Lingelsh.)

India. Perennial herb, rhizomatous, radical leaves, reddish pink flowers in dense-flowered racemes, sour fleshy petioles eaten

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 1: 315, 318, pl. 78. 1839, *Bulletin scientifique (publié par l’) Académie Impériale des Sciences de Saint-Pétersbourg* 10: 254. 1842, *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 422. 1842 and *Repertorium Specierum Novarum Regni Vegetabilis* 12: 358. 1929

(Used in Ayurveda. Root powder applied on cuts and wounds; root paste applied in muscular pains, sprains, contusions, injuries, cuts, wounds, mumps and to forehead in headache; a watery extract given in stomach pains, constipation, dysentery, swelling of the throat, tonsillitis. Fresh peduncles eaten raw as aphrodisiac.)

in China: luan guo da huang, sui xu da huang, wang mai da huang, zhi sui da huang

in India: amlaparni, archa, chichi, chukri, dolu, dolya, jome lachi

Rheum webbianum Royle (*Rheum webbiana* Royle)

Himalaya, Nepal, Sikkim. Perennial herb, robust, stem hollow, roots stout, lower leaves orbicular or broadly ovate, small dark purple to yellowish-white flowers, purple angled fruits, petioles pickled, leaf extract to prepare curry, tender leaves used as vegetable

See *Species Plantarum* 1: 371–372. 1753, *Prodromus Florae Nepalensis* 75. 1825, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 318, t. 78 A. 1839, *The Flora of British India* 5: 56. 1886

(Rhizomes and roots purgative, astringent, tonic, stomachic. A water-paste of the roots used for cuts, boils, wounds, sprains and swellings. Dried and powdered leaves, mixed with the rhizomes of *Curcuma longa* and fried with *ghee* are rubbed for the treatment of headache, ulcers, sores, muscle pain. Leaves eaten for the treatment of piles and chronic bronchitis.)

in English: Himalayan rhubarb, Indian rhubarb, rhubarb

in China: xu mi da huang

in India: chu-rtsa, dolu, lachhu, pamb-hak, pambhaak, tatri

in Nepal: amalbed, padamchal

Rhexia L. Melastomataceae

An ancient Greek name, *rhegnymi* ‘to break, break asunder, rend’, *rhexis* ‘breaking, bursting, cleft’; Plinius applied Latin *rhexia*, *ae* to a plant, also called *onochilis*; see *Species Plantarum* 1: 346. 1753, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 759. 1852 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 534–535. 1996.

Rhexia princeps Kunth (*Dissotis princeps* (Kunth) Triana; *Rhexia princeps* Humb. & Bonpl.)

South Africa. Shrub, erect, weak, purple flowers, famine food, see also *Dissotis*

See *Species Plantarum* 1: 346. 1753, *Monographia Melastomacearum* 2: 122, t. 46. 1821, *Transactions of the Linnean Society of London* 28(1): 57. 1871[1872] [8 Dec 1871–13 Jan 1872] and Dyer, R.A. “Dissotis princeps.” *The Flowering Plants of Africa* 32: t. 1250. 1952

(Leaves are used to treat dysentery and diarrhea. Roots eaten as an aphrodisiac.)

in English: purple dissotis, purple wild tibouchina, royal dissotis, wild tibouchina

in South Africa: kalwerbossie, sichobochoho, umpongamponga

Rhexia virginica L. (*Rhexia stricta* Pursh; *Rhexia stricta* Humb. & Bonpl.; *Rhexia virginica* L. var. *purshii* (Spreng.) C.W. James; *Rhexia virginica* L. var. *septemnervia* (Walter) Pursh)

North America. Perennial herb, elliptical toothed leaves, pink flowers with long arched yellow stamens

See *Species Plantarum* 1: 346. 1753, *Flora Caroliniana, secundum ...* 130. 1788, *Fl. Amer. Sept.* (Pursh) 1: 258. 1813, *Systema Vegetabilium*, editio decima sexta 5: 590. 1828 and *Brittonia* 8: 226–227. 1956, *Journal of Ethnopharmacology* 1: 49–68. 1979, *American Journal of Botany* 86(4): 502. 1999

(Leaves and stems used for sore throat.)

in English: deergrass, handsome Harry, meadow-berry, Virginia meadow beauty

Rhinacanthus Nees Acanthaceae

Greek *rhis*, *rhinos* ‘snout, nose’ and *akantha*, *akanthos* ‘thorn’, alluding to the shape of the corolla or to the nature of the thorns, see *Plantae Asiaticae Rariores* (Wallich). 3: 76, 108. 1832.

Rhinacanthus calcaratus (Wall.) Nees (*Justicia calcarata* Wall.)

China, Vietnam, Myanmar, India. Shrub, erect, branchless, stout, glabrous, leaves small, small subulate bracts and bracteoles shorter than calyx segment, flowers small, corolla hypocrateriformis, corolla tube very short, stamens 2, capsule clavate, seeds ovoid

See *Plantae Asiaticae Rariores* 3: 76, 108–109. 1832

(Used for skin diseases.)

in China: hua ye ling zhi cao

Rhinacanthus gracilis Klotzsch (*Rhinacanthus communis* Nees; *Rhinacanthus gracilis* Bojer ex Nees)

Tropical Africa. Perennial, shrub or sub-shrub, woody-based herb, white flowers with dark pink base

See *Plantae Asiaticae Rariores* 3: 109. 1832, *Prodr.* (DC.) 11: 506. 1847, *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 218. 1861 and *Taxon* 25: 631–649. 1976

(Roots and leaves diuretic, for indigestion, flatulence, stomachache.)

Rhinacanthus nasutus (L.) Kuntze (*Justicia nasuta* L.; *Pseuderanthemum connatum* Lindau; *Rhinacanthus communis* Nees; *Rhinacanthus nasuta* Kurz; *Rhinacanthus nasutus* (L.) Kurz; *Rhinacanthus nasutus* Kuntze; *Rhinacanthus nasutus* (Linnaeus) Lindau; *Rhinacanthus osmospermus* T. Anderson; *Rhinacanthus osmospermus* Bojer ex Nees)

China, Thailand. Perennial, shrub or sub-shrub, woody-based herb, sparsely branched, twigs green with white pubescence, calyx 5-partite, corolla pale yellow-cream, style filiform, capsule 2-valved

See *Species Plantarum* 1: 15–16. 1753, *Plantae Asiaticae Rariores* 3: 76, 108–109. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 443. 1847, *J. Proc. Linn. Soc., Bot.* 7: 51. 1863 [1864 publ. 1863], *J. Proc. Linn. Soc., Bot.* 9: 522. 1868, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 39(2): 79. 1870, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 13: 282. 1883, *Revisio Generum Plantarum* 2: 494. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 40–41. 1894, *Pflanzenw. Ost-Afr.* [Engl.] C (1895) 371. 1895, *Naturl. Pflanzenfam.* [Engl. & Prantl] iv. 3b(1895) 329. 1895 and *Catalogue des Plantes de Madagascar, Acanth.* 2(24): 7–32. 1939, *Taxon* 25: 631–649. 1976

(Seeds for scabies, eczema, skin diseases. Root, leaves and seeds a remedy for ringworm. Roots and leaves, with lemon juice, used for scabies, eczema, skin diseases; roots decoction drunk against snake venom and taken to cure impotency in male; root paste applied for eczema, ringworm. Liquid from striked leaves for treating wart; crushed leaves applied over the snakebitten part; stem and leaves used for tuberculosis, cough, high blood pressure. Veterinary medicine, whole plant.)

in Myanmar: anitia

in China: ling zhi cao

in India: naaga malli, nagamalli, nagamulla

in Indonesia: daun burung, tarebak, tereba jepang

in Laos: thong kan sang

Malay name: ubat kurap

in Philippines: cinco-llagas na puti, ibon-ibonan, parajito, silisilihan, tagak-tagak, taging-tagak

in Thailand: thong khan chang, thong phan chang, yaa man kai

in Vietnam: b[aj]ch h[aj]c, ki[ees]n c[of]

Rhinacanthus virens Milne-Redh. (*Leptostachya virens* Nees; *Rhinacanthus communis* Nees; *Rhinacanthus dewevrei* De Wildeman & T. Dur; *Rhinacanthus parviflorus* T. Anderson ex De Wildeman; *Rhinacanthus parviflorus* T.

Anderson ex De Wild. & T. Durand; *Rhinacanthus subcaudatus* C.B. Clarke; *Rhinacanthus virens* (Nees) Milne-Redh.)

Tropical Africa. Perennial, shrub or sub-shrub, straggling, erect woody-based herb, white flowers with dark pink base

See *Plantae Asiaticae Rariores* 3: 109. 1832, *Prodr.* (DC.) 11: 378. 1847 and *Supplement to the Catalogue of the Vascular Plants of S. Tomé*: (with Principe and Annobon)/by Arthur Wallis Exell (1901–1993). London: Printed by order of the Trustees of the British Museum, 1956 [British Museum (Natural History). Department of Botany], *Taxon* 25: 631–649. 1976

(Roots and leaves diuretic, for indigestion, flatulence, stomachache.)

Rhipogonum Forst. & Forst.f. Rhipogonaceae (Liliaceae, Ripogonaceae, Smilacaceae)

Greek *rhips*, *rhipos* ‘wicker-work, willow branch, mat, young twig’ and *gony* ‘a joint, a knee’, referring to the many jointed stalks, or from *gone* ‘offspring, generation, descent’; see Johann Reinhold Forster (1729–1798) and his son Johann Georg Adam (1754–1794), *Characteres generum plantarum*. 49, t. 25. Londini [London] (Aug.) 1776 and H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987.

Rhipogonum scandens Forst. & Forst.f. (*Rhipogonum parviflorum* R.Br.; *Rhipogonum scandens* Forst.; *Ripogonum scandens* J.R. Forst. & G. Forst.; *Smilax ripogonum* G. Forst.)

New Zealand. Climber, bright red harmless edible berries

See *Char. Gen. Pl.* t. 25. 1776 [or 29 Nov 1775], *Fl. Ins. Austr.*: 70. 1786, *Prodr. Fl. Nov. Holl.*: 293. 1810

(Diuretic, tonic, alterative. Stems bruised and the juice applied for venereal diseases.)

in English: supplejack

in New Zealand: kareao, karewao, pirita (Maori names)

Rhipsalis Gaertner Cactaceae

Greek *rhips*, *rhipos* ‘wicker-work, willow branch, mat, young twig’, referring to the flexible branches; Akkadian *rapa’u* ‘to heal’, Hebrew *rafa* ‘to bind: a wound to heal’, see *De Fructibus et Seminibus Plantarum*... 1: 137–138, pl. 28, f. 1. 1788 and *Fl. Madagasc.* 145: 109–123. 1983, *Fl. Ecuador* 35: 1–79. 1989, *Fl. Mascareignes* 103: 1–8. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 509–519. 2001.

Rhipsalis baccifera (J.S. Miller) Stearn (*Cactus caripensis* Kunth; *Cactus parasiticus* Lam.; *Cassytha baccifera* J.S. Muell.; *Cassytha baccifera* Mill. ex DC.; *Cereus caripensis* (Kunth) DC.; *Hariota cassytha* Lem.; *Hariota parasitica*

(Lam.) Kuntze; *Rhipsalis baccifera* (J.S. Muell.) Stearn; *Rhipsalis bartlettii* Clover; *Rhipsalis bermejensis* F. Ritter, nom. nud.; *Rhipsalis caripensis* (Kunth) Web.; *Rhipsalis cassutha* Gaertn.; *Rhipsalis cassytha* Gaertn.; *Rhipsalis cassytha* var. *mauritiana* DC.; *Rhipsalis cereuscula* Haw.; *Rhipsalis comorensis* F.A.C. Weber; *Rhipsalis comorensis* F.A.C. Weber; *Rhipsalis coralloides* Rauh; *Rhipsalis delphinensis* Barthlott; *Rhipsalis fasciculata* (Willd.) Haw.; *Rhipsalis heptagona* Rauh & Backeb.; *Rhipsalis horrida* Baker; *Rhipsalis madagascariensis* F.A.C. Weber; *Rhipsalis madagascariensis* var. *dasyerca* F.A.C. Weber; *Rhipsalis madagascariensis* Weber ex Weber; *Rhipsalis mauritiana* (DC.) Barthlott; *Rhipsalis mauritiana* var. *ellipticarpa* Barthlott; *Rhipsalis minutiflora* K. Schum.; *Rhipsalis parasitica* (Lam.) Haw.; *Rhipsalis parasiticus* Haw.; *Rhipsalis pendulina* A. Berger; *Rhipsalis pilosa* F.A.C. Weber ex K. Schum.; *Rhipsalis prismatica* (Lem.) Rumlper; *Rhipsalis saxicola* Rauh; *Rhipsalis suareziana* F.A.C. Weber; *Rhipsalis tetragona* Web.)

South America. Epiphyte, terete, fleshy, small white flowers, berry-like yellowish fruit, viscous shiny seeds

See *Illustratio systematis sexualis Linnaei Class. I, ord. I* [t. 2a], t. 29. 1771 [Miller, John (1715–1790?), *Illustratio systematis sexualis Linnaei* ... : an illustration of the sexual system of Linnaeus. London: The author, 17[70–]77 and *Illustratio systematis sexualis Linnaei*/Denuo edita, revisa ac translatione Germanica locupletata per Mauritium Balthasarem Borckhausen. Adjectis tabulis CVIII ad originale Millerianum aeri incisus et coloratis. Francofurti ad Moenum: Varrentrapp et Wenner, 1804.], *Encyclopédie Méthodique, Botanique* 1: 541. 1783, *De Fructibus et Seminibus Plantarum*... 1: 137, t. 28. 1788, *Synopsis plantarum succulentarum* ... 187. 1812, *Nova Genera et Species Plantarum* (quarto ed.) 6: 66. 1823, *Mém. Mus. Hist. Nat. Paris* 17: 81. 1828, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 467. 1828, *Cactearum Genera Nova Speciesque Novae* 75. 1839, *Revisio Generum Plantarum* 1: 262. 1891, *Revue Horticole* 6: 425. 1892 and *Bulletin of the Torrey Botanical Club* 65(8): 567, 570, f. 6–7. 1938, *Cactus Journal* [Croydon] 7(4): 107, in adnot. 1939, *Das Kakteenlexikon* 388. 1966

(Stem juice a cough cure for children.)

in La Réunion Isl.: cactus-gui, la perle

Rhizanthus Dumort. Rafflesiaceae

From the Greek *rhiza* ‘root’ and *anthos* ‘a flower’, parasites, see *Synopsis Plantarum* 1: 216. 1805, *Bijdragen tot de Natuurkundige Wetenschappen* 2: 422. 1827, Dumortier (Du Mortier), Barthélemy-Charles Joseph (1797–1878), *Analyse des Familles des Plantes* 14. Tournay, 1829 and *Fedde, Repert.* xxxvi. 286. 1934, *Blumea* 33: 329–342. 1988, *Natural History Bulletin of the Siam Society* 44: 113–142. 1996, *Curtis’s Botanical Magazine* 26(4): 286–313. 2010.

Rhizanthus deceptor Bänziger & B. Hansen (specific name referring to Rhizanthus's ability in deceiving flies and scientists alike...)

Sumatra, Indonesia.

See *Natural History Bulletin of the Siam Society* 48(1): 117–143. 2000

(Immature bud charred and powdered, mixed with water and the suspension drunk as stomachic and astringent in diarrhea and stomachache.)

Rhizanthus infanticida Bänziger & B. Hansen (alluding to the flower's pollination syndrome which leads to the death of the pollinators' brood.)

Thailand, Malaysia.

See *Nat. Hist. Bull. Siam Soc.* 43: 337–365. 1995, *Nat. Hist. Bull. Siam Soc.* 48(1): 117–143. 2000

(Astringent, stomachic.)

Rhizophora L. Rhizophoraceae

Greek *rhiza* 'a root' and *phoros* 'bearing, carrying', *rhizophorus* 'root bearing', referring to the aerial roots from stem and branches; see Carl Linnaeus, *Species Plantarum*. 1: 443. 1753, *Genera Plantarum*. Ed. 5. 202. 1754, *Synopsis Plantarum* 2(1): 2. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 32. 1828, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 310. 1834, William Griffith (1810–1845), *Notulae ad plantas asiaticas*. 665. 1854 and Ding Hou, "A review of the genus *Rhizophora* with special reference to the Pacific species." *Blumea* 10(2): 625–634. 1960, *Phytologia* 74(3): 176. 1993, Tomlinson, P.B., *The Botany of Mangroves*. Cambridge University Press, Cambridge. 1994, *Novon* 9(4): 550–551. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2200–2201. 2001.

Rhizophora apiculata Blume (*Rhizophora candelaria* DC.; *Rhizophora candelaria* Wall.; *Rhizophora candelaria* J. Macrae ex Blume)

India, Java. Tree, fodder, fruits boiled in water and eaten

See *Enumeratio Plantarum Javae* 1: 91. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 32. 1828, *Numer. List* [Wallich] n. 4878. 1831–1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 310. 1834, *Mus. Bot.* 1(9): 137. 1850 [Dec 1849 publ. Oct 1850]

(Used in Sidha. Tonic, nutritious. Respiratory roots chewed and applied to treat fish bite. Bark decoction given in dysentery and in stomach pain.)

in China: hong shu

in India: char, cirugandal, daboja, kaaki ponna, kaakiponna, kaandla, kandal, kantal, pee-kandel, ponna, rai, turu, uppu ponna

Rhizophora mangle L. (*Rhizophora americana* Nutt.; *Rhizophora mangle* var. *samoensis* Hochr.; *Rhizophora samoensis* (Hochr.) Salvoza)

South America, South Florida. Tree, ever growing, arching aerial roots, opposite pairs of smooth dark-green elliptic leaves, numerous black dots on the lower leaves surface, pendulous seedlings attached to the shoots, yellowish-white petals, flowers usually in group of 3, individual flowers finally pendulous, seedling is the unit of dispersal

See *Species Plantarum* 1: 443. 1753 and *Kew Bull.* 8(1): 123. 1953, *Fl. Veracruz.* 12: 1–8. 1980

(The bark used for sores and swellings. Dry fruit made into tea taken on the onset of dysentery. Seeds infusion for bed-wetting children.)

in English: American mangrove, mangle, mangle colorado, mangrove, red mangrove

in Panama: aili kinnut

Rhizophora mucronata Lam. (*Mangium candelarium* Rumphius; *Rhizophora candelaria* Wight & Arn.; *Rhizophora candelaria* Wall.; *Rhizophora candelaria* DC.; *Rhizophora candelaria* J. Macrae ex Blume; *Rhizophora longissima* Blanco; *Rhizophora macrorrhiza* Griff.; *Rhizophora mucronata* Náves)

East Africa. Tree, straight, aerial prop roots, soft brittle branches, reddish bark, leathery dark green leaves, fleshy creamy white flowers, smooth green fruits, seeds germinate while the fruit still on the tree, leaves as fodder, on muddy soils

See *Herbarium Amboinense* 3: 108. 1743, *Introductio ad Historiam Naturalem* 218. 1777, *Tabl. Encycl.* 2: 517, pl. 396, f. 2, 1794, *Encyclopédie Méthodique, Botanique* (Lamarck) 6(1): 189. 1804, *Prodr.* (DC.) 3: 32. 1828, *Numer. List* [Wallich] n. 4878. 1831–1832, *Prodr. Fl. Penins. Ind. Or.* 1: 310. 1834, *Transactions of the Medical and Physical Society of Calcutta* 8: 8, f. 2, 4–7. 1836, *Mus. Bot.* 1(9): 137. 1850 [Dec 1849 publ. Oct 1850], *Not. Pl. Asiat.* 4: 664. 1854, *Fl. Filip.*, ed. 3 [F.M. Blanco] t. 135. [1877–1883]

(Used in Sidha. Bark astringent and a source of tannin, the juice used for diabetes and to stop bleeding; fresh bark boiled and filtered and the water used for mouth gargling against sore throat and stomatitis. Freshly collected pneumatophores made into a paste and applied to stop bleeding.)

in English: four-petaled mangrove, long-fruited red mangrove, red mangrove, true mangrove

in East Africa: mkaka, mkoko

in Southern Africa: beebasboom, rooiwortelboom; umNgombamkhonto, umHlume, umHluma (Zulu); umHluma (Xhosa)

in China: hong qie dong

in India: adavi ponna, adaviponna, bairada, bhara, bhora, coripunnai, jumuda, kaandla, kamdlam, kamdli, kamo, kandaale, kandal, kandale, kandia, kandla, kandlaa, kandle,

in Japan: funiki, ôba-hirugi, pushiki, Yaeyama-hirugi

in Malaysia: bakau belukap, bakau jangkar, bakau kurap, belukap, lenggayong

Rhizophora racemosa G. Mey. (*Rhizophora mangle* var. *racemosa* (G. Mey.) Engl.; *Rhizophora racemosa* Hieron.)

Tropical Africa. Shrub or tree, spreading, stilt-rooted, flowers cream colored

See *Primitiae Florae Essequeboensis* ... 185. 1818, *Flora Brasiliensis* 12(2): 427. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 61. 1895 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2200–2201. 2001

(Stem bark and leaves for dysentery, fevers, cough.)

in French: palétuvier

in Central Africa: ntan, ntana, tanda

in Cameroon: tanda

in Gabon: ntan

in Nigeria: agala, egba, igba-dudu, litanda, ngala, odo nowe, odonowe, tanda, urher-nwere; egba (Yoruba); odo nowe (Edo); odo (Itsekiri); urheruwerim (Urhobo); agala (Ijaw); ngala (Igbo); nunung (Efik); nunung (Ibibio)

in Yoruba: egba, igba dudu

Rhizophora stylosa Griff. (*Rhizophora mucronata* var. *stylosa* (Griff.) Schimp.)

India. Leaves for fodder

See *Notulae ad Plantas Asiaticas* 4: 665. 1854, *Botanische Mitteilungen aus den Tropen* 3: 92. 1891 and *J. Trop. & Subtrop. Bot.* 6(1): 40–46. 1998, *Austral. J. Bot.* 50: 601–605. 2002

(Tannin from the bark.)

in China: hong hai lan

Rhodamnia Jack Myrtaceae

Greek *rhodon* ‘rose’ and *amnion* ‘the amnion, a bowl, the membrane around the fetus’, referring to the red unripe fruits, or from Greek *rhodamnos*, *rhadamnos* ‘a young branch, sprout, shoot’, from the size of the plant; see William Jack (1795–1822), in *Malayan miscellanies*. 2(7): 48. Bencoolen 1822.

Rhodamnia cinerea Jack (*Monoxora spectabilis* (Blume) Wight; *Myrtus globosa* Korth.; *Myrtus spectabilis* Blume;

Rhodamnia cinerea var. *concolor* (Miq.) Blume; *Rhodamnia cinerea* var. *laxiflora* Blume; *Rhodamnia cinerea* var. *macrophylla* Blume; *Rhodamnia concolor* Miq.; *Rhodamnia globosa* (Korth.) Blume; *Rhodamnia nageli* Miq.; *Rhodamnia spectabilis* (Blume) Blume; *Rhodamnia subtriflora* Blume; *Rhodamnia trinervia* var. *concolor* (Miq.) King; *Rhodamnia trinervia* var. *spectabilis* (Blume) King)

Vietnam, Malesia. Small trees, red inner bark, leaves opposite, blade glaucous below, white flowers in clusters from leaf axils, berry crowned by calyx

See *Malayan Misc.* 2(7): 48. 1822, *Mus. Bot.* 1: 78–79. 1850, *Ann. Mus. Bot. Lugduno-Batavi* 1: 78. 1863 and *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 70: 74. 1901

(Roots decoction for stomachache; roots and leaves infusion a postpartum remedy.)

Malay names: jaing, jeing, mempoyan, poyan

Rhodiola L. Crassulaceae

The diminutive from the Greek *rhodon* ‘rose’, referring to the scented roots, see *Species Plantarum* 2: 1035. 1753 and *Sedum of North America* 474. 1975.

Rhodiola heterodonta (Hook.f. & Thomson) Boriss. (*Rhodiola heterodonta* (Hook.f. & Thomson) H. Jacobsen; *Rhodiola viridula* Boriss.; *Rhodiola wallichiana* (Hook.) S.H. Fu; *Sedum asiaticum* DC.; *Sedum crassipes* Wall. ex Hook.f. & Thomson; *Sedum crassipes* Wall., Hook.f. & Thomson; *Sedum crassipes* Wall.; *Sedum heterodontum* Hook.f. & Thomson; *Sedum rosea* (L.) Scop. var. *heterodontum* (Hook.f. & Thomson) Fedtschenko ex Froderstrom; *Sedum wallichianum* Hook.)

China. Leaves and tender shoots eaten

See *Species Plantarum* 1: 430–432. 1753, *Species Plantarum* 2: 1035. 1753, *Flora Carniolica*, Editio Secunda 1: 326. 1771, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 401. 1828, *Numer. List* [Wallich] n. 7234. 1832, *Icones Plantarum*; or Figures, with Brief Descriptive Characters and Remarks of New or Rare Plants. 7: t. 604. 1844, *Journal of the Proceedings of the Linnean Society* 2: 95, 99. 1857 [1858 publ. 1857] and *The genus Sedum* 40. 1930, *Report of the First Scientific Expedition to Manchoukou* 1: 30. 1934, *Flora URSS* 9: 26, 32, 476. 1939, *Acta Phytotaxonomica Sinica*, Additamentum 1: 125. 1965, *Sukkulent. Lex.* 288. 1970, *Sedum of North America* 474. 1975, *Taxon* 41: 569. 1992, *Taxon* 44: 611–612. 1995

(Plant emollient, vulnerary.)

in China: cu jing hong jing tian

in India: shro-lo-dkar-po

Rhodiola himalensis (D. Don) S.H. Fu (*Chamaerhodiola himalensis* (D. Don) Nakai; *Sedum himalense* D. Don; *Sedum quadrifidum* var. *himalense* (D. Don) Fröd.

Himalaya.

See *Prodromus Florae Nepalensis* 212. 1825 and *Report of the First Scientific Expedition to Manchoukou* 1: 28. 1934, *Acta Phytotaxonomica Sinica*, Additamentum 1: 121. 1965

(Roots for lung disorders, cough and cold, tonic, stimulant.)

in Bhutan: sro-lo-dmar-po

in China: xi ma hong jing tian

Rhodiola imbricata Edgew. (*Sedum imbricatum* (Edgew.) Walp.; *Sedum imbricatum* Walp.)

India, Himalaya. Whole plant as vegetable, grazed by sheep and yak

See *Transactions of the Linnean Society of London* 20: 47. 1846, *Annales Botanices Systematicae* (Walpers) 1: 325. 1848, *Journ. Linn. Soc.* ii. (1858) 101. 1858

(Leaf decoction a remedy for cough and asthma. Roots tonic, useful to restore memory. Shade-dried roots made into a powder and given against lung problems, cold and cough, fever.)

in India: sholo, shro-lo-marpo

Rhodiola quadrifida (Pall.) Schrenk (*Chamaerhodiola quadrifida* (Pall.) Nakai; *Kirpicznikovia quadrifida* (Pall.) Á. Löve & D. Löve; *Rhodiola quadrifida* Fisch. & Mey.; *Sedum quadrifidum* Pall.)

China, Himalaya, India.

See *Reise durch verschiedene Provinzen des russischen Reichs* 3: 730. 1776, *Enumeratio Plantarum Novarum* 1: 69. 1841 and *Botaniska Notiser* 128(4): 515. 1975[1976], *J. Jap. Bot.* 70: 334–338. 1995, *Chromosome Sci.* 7: 55–60. 2003

(Plant for ascites and urogenital disorders. Flowers emetic, pectoral, expectorant.)

in China: si lie hong jing tian

Rhodiola tangutica (Maximowicz) S.H. Fu (*Rhodiola algida* Ledebour var. *tangutica* (Maximowicz) S.H. Fu; *Sedum algidum* (Ledebour) Fischer & C.A. Meyer var. *tanguticum* Maximowicz)

China.

See *Bull. Acad. Imp. Sci. Saint-Pétersbourg*, Sér. 3, 29: 126. 1883 and *Bull. Bot. Res., Harbin* 6(4): 158. 1986

(Emollient, stomachic.)

in China: tang gu hong jing tian

Rhodiola tibetica (Hook. f. & Thomson) S.H. Fu (*Chamaerhodiola stracheyi* (Hook. f. & Thomson) Nakai; *Chamaerhodiola tibetica* (Hook. f. & Thomson) Nakai; *Sedum quadrifidum* var. *tibeticum* (Hook. f. & Thomson) Fröd.; *Sedum stracheyi* Hook. f. & Thomson; *Sedum tibeticum* Hook. f. & Thomson; *Sedum tibeticum* var. *stracheyi* (Hook. f. & Thomson) C.B. Clarke)

India, China. Herb, young roots used as pot herb

See *Journal of the Proceedings of the Linnean Society* 2: 96. 1857 [1858 publ. 1857], *The Flora of British India* 2: 418. 1878 and *Report of the First Scientific Expedition to Manchoukou* 1: 31. 1934, *Acta Phytotaxonomica Sinica*, Additamentum 1: 121. 1965

(Young roots stomachic, laxative, tonic.)

in China: xi zang hong jing tian

in India: kimlut, kindut

Rhodiola wallichiana (Hook.) S.H. Fu var. *wallichiana* (*Chamaerhodiola crassipes* (Wall. ex Hook. f. & Thomson) Nakai; *Rhodiola crassipes* (Wall. ex Hook. f. & Thomson) Boriss.; *Sedum crassipes* Wall. ex Hook. f. & Thomson; *Sedum wallichianum* Hook.)

India.

See *Species Plantarum* 1: 430–432. 1753, *Species Plantarum* 2: 1035. 1753, *Icon. Pl.* 7: pl. 604. 1844, *Journal of the Proceedings of the Linnean Society* 2: 99. 1858 and *Report of the First Scientific Expedition to Manchoukou* 1: 30. 1934, *Flora URSS* 9: 476. 1939, *Acta Phytotaxonomica Sinica*, Additamentum 1: 125. 1965, *Sedum of North America* 474. 1975, *Taxon* 41: 569. 1992, *Taxon* 44: 611–612. 1995

China.

See *J. Bot. (Morot)* 10: 286. 1896 and *Acta Phytotax. Sin.*, Addit. 1: 126. 1965

(For backache.)

in China: yun nan hong jing tian

Rhododendron L. Ericaceae

Greek *rhodon* ‘a rose, rose garden’ and *dendron* ‘a tree’, possibly referring to the bunches of flowers, Latin *rhododendros* and *rhododendron* and *rhododaphne* for the rose-bay, oleander (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 392–393. 1753 and *Genera Plantarum*. Ed. 5. 185. 1754 and V. Bertoldi, “Per la storia del lessico botanico popolare.” in *Archivum romanicum*. XI: 14–30. 1927, E. Weekley, An

Etymological Dictionary of Modern English. 2: 1234. 1967, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 4: 1101. Bologna 1985, A.J.C. Grierson & D.G. Long, *Flora of Bhutan*. 2(1): 357–387. Edinburgh 1991, *Fl. Neotrop.* 66: 131–132. 1995, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 536. 1996. Polymorphic and complex genus. Andromedotoxins are toxic diterpenoids that are present in all the poisonous members of the heath family, Ericaceae.

Rhododendron albiflorum Hook. (*Azalea albiflora* (Hook.) Kuntze; *Azaleastrum albiflorum* (Hook.) Rydb.)

North America. Perennial shrub

See *Species Plantarum* 1: 150, 392–393. 1753, *Flora Boreali-Americana* 2(7): 43, pl. 133. 1834, *Revisio Generum Plantarum* 387. 1891 and *Memoirs of the New York Botanical Garden* 1: 297. 1900

(Plant toxic to sheep, contains andromedotoxins (grayanotoxins) that can cause sickness and death after they are ingested by animals. Bark decoction taken for stomach troubles. Buds decoction taken for colds, sore throats, cough; buds chewed and eaten for gastric ulcers. Powdered burned wood poulticed with grease and applied to swellings, cuts.)

in English: cascade azalea, white rose-bay

Rhododendron anthopogon D. Don (*Rhododendron anthopogon* Wall.; *Rhododendron anthopogon* var. *album* Davidian) (from the Greek *anthos* ‘flower’ and *pogon* ‘beard’)

India, Himalayan range, Nepal. Shrub, evergreen, aromatic, erect, young shoots scaly and pubescent, ovate drooping leaves with lower surface covered with red-brown scales, dusty yellow-white to pink bell-shaped flowers clustered in terminal cymes

See *Memoirs of the Wernerian Natural History Society* 3: 409–410. 1821, *Numer. List* [Wallich] n. 759, partim. 1829 and *Quart. Bull. Amer. Rhododendron Soc.* 34(4): 215. 198

(Used in Ayurveda. Leaves, stem and flowers antibacterial, used for fever, pains in limbs and waist, inflammation of limbs. Leaves sedative, stimulant, aromatic, expectorant, an infusion for cough, insomnia, anxiety, to induce sleep; leaves decoction drunk as a stimulant; fresh leaves mixed with mustard oil and paste useful in wounds and cuts; dried leaves crushed and the powder for cold and cough; tender leaves applied on the forehead to relieve headache. Ceremonial, young shoots used as incense, *dhoop*, during Yajana ceremonies, Griha Pravesh; leaves burnt along with *Juniperus* incense in the *gompas*.)

in English: rose tree

in Bhutan: dva-li-dkar-po, palu

in China: ran hua du jian

in India: atarasu, ballu, bharunpati, bhotia chai, dhoop, kai zaban, kodya, kotya, mera, morua, mutashang, nera, nichni,

nichnii, palu, pasupa, phaleu, poksini, ratankait, rattankat, tacakism, takkar, talis, talis-faz, talis-fazz, talisa, talisapatra, talisiri, talispatra (the leaves a source of...), talisri, talshi, tarjhippan, tazak tsum, tazaktsum

in Nepal: balu karmo, dhali karmo, palu

Rhododendron arboreum Smith

India, Himalaya. Tree or small tree, evergreen, many-branched, pink-reddish brown bark, flowers blood-reddish crowded in large rounded corymbs, corolla campanulate, mealy curved cylindrical capsule

See *Species Plantarum* 1: 392–393. 1753, *Exotic Botany* 1: 9, pl. 6. 1805

(Used in Ayurveda and Sidha. Flowers sour-sweetish in taste and flowers are eaten, but when consumed in excess they are said to cause intoxication. Stamen and young leaves said to be poisonous, have been reported to produce toxic symptoms when eaten by livestock. Tender stem extract applied on forehead to allay vertigo; bark used in preparation of a kind of snuff. Juice of the young leaves applied to forehead for headache, also used for rheumatic pains; tender leaves applied to forehead for headache. Flowers in treating coughs and fever, also a remedy for dysentery and bloody dysentery; fresh and dried petals efficacious in checking diarrhea and blood dysentery; corolla used to cure diarrhea. Androecium often used to poison the rats. Young leaves used to poison fish. Magic, the name of this flower said when a bone of a fish stuck in the throat while eating fish and once said the bone goes down in the intestine.)

in English: rose-tree, tree-rhododendron

in China: shu xing du jian

in India: alingi, alingil, ardawal, aru, baras, bhorans, bili, bili mara, bilipu, billee, billi, billimaram, billy, brah, bras, brass, brda, broa, brons, bruans, brus, buranh, burans, buras, burus, chacheon, cheo, cheu, chhan, chin, chiu, dieng-tin-thuin, dotial, etok, ghonas, gurans, guras, ittok, kamri, kattupoovarasu, kattupuvaracu, kattupuvarasu, khenio, khorom-leishak-angamba, lalguras, lali gurans, malai-pupuaracu, malaippupuaracu, mandal, nilakiripumaram, parag, poo, pu, pullasa, pumaram, rato guras, taggu, tiew awbah, tiew saw, tin-saw, yetu

in Lepcha: aetok koong, etok

in Nepal: lali gurans, gurans, gurass, pata, patsar, takro, tango

in Tibet: kara ba ka, kera ba ka

Rhododendron aureum Georgi (*Rhododendron chrysanthum* Pall.; *Rhododendron officinale* Salisb.)

China.

See *Bemerkungen einer Reise im Russischen Reich im Jahre 1772* 1: 51, 214. 1775, *Reise Durch Verschiedne Provinz*. 3: 729. 1776, *The Paradise Londinensis* pl. 80. 1807, *Journal*

de Botanique (Morot) 9(21): 394–394. 1895 and *Komarov Lectures*. 20: 47–61. 1973, *Bot. Zhurn.* 65 (1): 51–59. 1980, *Bot. Žurn.* (Moscow & Leningrad) 79(2): 135–139. 1994

(Homeopathy.)

in China: niu pi du juan

in Tibet: da li

Rhododendron barbatum Wall. ex G. Don (*Rhododendron barbatum* G. Don; *Rhododendron lancifolium* Hook. f.)

India, Himalayan range, Bhutan. Evergreen tree or large shrub, often procumbent, purple-red bark, red-crimson fleshy flowers crowded in corymbs, corolla campanulate, curved capsule longitudinally ribbed

See *Methodus* (Moench) 45. 1794, *A General History of the Dichlamydeous Plants* 3: 844. 1834, Hooker, Joseph Dalton, Sir (1817–1911), *The Rhododendrons of Sikkim-Himalaya: being an account, botanical and geographical, of the rhododendrons recently discovered in the mountains of eastern Himalaya, from drawings and descriptions made on the spot, during a government botanical mission to that country/by Joseph Dalton Hooker ...*, edited by Sir W.J. Hooker ... pl. 4. London 1849 [1851]

(Leaves and shoots extract showed a respiratory depressant action. Leaf paste effective for taking out the fish bone from throat. Plant reported to be poisonous to fish.)

in English: giant blood rhododendron

in Bhutan: kemu, lalchimal

in China: ying ci du juan

in India: chimmal, chinula, guras, kato chimal, semru

Rhododendron calendulaceum (Michx.) Torr. (*Azalea calendulacea* Michx.; *Azalea lutea* auct. non L.; *Rhododendron calendulaceum* Torr.)

North America. Perennial shrub

See *Sp. Pl.* 1: 150. 1753, *Flora Boreali-Americana* (Michaux) 1: 151. 1803, *A Flora of the Northern and Middle Sections of the United States* 1(2): 425. 1824

(Antirheumatic, twigs rubbed on rheumatism. Leaves infusion taken for menstrual disorders.)

in English: flame azalea, yellow azalea

Rhododendron campanulatum D. Don

India, Bhutan, Himalayan range. Evergreen shrub or small tree, spreading to procumbent, white flowers tinged with mauve and lilac, corolla campanulate, more or less curved capsule longitudinally furrowed, compressed linear-oblong seeds

See *Memoirs of the Wernerian Natural History Society* 3: 410–411. 1821 and *Notes Roy. Bot. Gard. Edinburgh* 37(2): 329. 1979

(Young leaves poisonous for cattle. Flowers yield a pungent aromatic oil. Inner parts of the pods purgative, a remedy for digestive disorders. Leaves and twigs used in cold, skin diseases, cough, fever. Fresh leaves mixed with mustard oil and paste useful in wounds and cuts; dried leaves crushed and the powder for cold and cough; mixed with tobacco and used as snuff to cure headache and colds; leaves decoction against syphilis, rheumatism and sciatica.)

in China: zhong hua du juan

in India: atarasu, awom, cheraidhu, cherailu, cherial, cheriala, chimul, chimula, chimura, gaggar vurmi, gaggar wurmii, gaggar yurmi, gaggar yursmit, gentaboras, ghentaboras, Kashmiri patha, Kashmiri patta, nichnai, nilo chimal, nilo chintal, ratpa, samgar, sarangar, sarnagar, sarngar, semru, semuru, shargar, shinwala, simris, simru, simrung, sirmang, teotosa, teotossa

in Nepal: nilo chimal, nilo chintal

Rhododendron cinnabarinum Hook.f.

India, Himalaya. Large shrub, very variable, purplish thin bark, reddish flowers in terminal racemes, scaly capsules

See *The Rhododendrons of Sikkim-Himalaya* 1: t. 8. 1849

(Leaves poisonous to livestock; smoke from leaves and wood causes inflammation of the eyes. Honey from flowers reported to be poisonous.)

in China: zhu sha du juan

in India: balu, chirmal, kecchung, kechung, kema, kemia, sanu chimal

in Nepal: chirmal, sanu chimal

Rhododendron dalhousiae Hook.f. (*Rhododendron dalhousiae* Hook.f.)

India, Himalaya.

See *Rhododendr. Sikkim-Himalaya* 1: tt.1- 2. 1849

(Aqueous stem extract applied on headache.)

in China: chang yao du juan

in India: tinkling

in Nepal: lahare chimal

Rhododendron dauricum L.

China.

See *Species Plantarum* 1: 392–393. 1753

(Expectorant, used in the treatment of chronic bronchitis.)

in English: daurian rhododendron

in China: man shan hong, yeh tu chuan

Rhododendron decipiens Lacaïta

India, Sikkim, Bengal. Small tree, large tomentose leaves, pale pink flowers

See *J. Linn. Soc., Bot.* xliii. 473. 1916, *Phytother. Res.* 21(12): 1135–1141. 2007

(Antiulcerogenic, antihyperlipidemic and antihypertensive.)

Rhododendron decorum Franch.

China. Shrub, white flowers, cooked flowers eaten

See *Bulletin de la Société Botanique de France* 33: 230. 1886, *Nouv. Arch. Mus. Paris*, sér. 2, 10: 45 (1887–1888)

(Leaves poisonous. Buds used as antiinflammatory. Worshipped, burned as incense.)

in China: da bai du juan, nuo mei wei luo

in Tibet: da ma, dajin yuba, dama

Rhododendron delavayi Franch. (*Rhododendron arboreum* subsp. *delavayi* (Franch.) D.F. Chamb.)

China.

See *Bulletin de la Société Botanique de France* 33: 231. 1886 and *Notes from the Royal Botanic Garden, Edinburgh* 37(2): 328. 1979

(Worshipped.)

in China: ma ying du juan, mei wei luo

Rhododendron falconeri Hook.f.

India, Sikkim, Nepal. Evergreen tree, reddish bark, creamy-white flowers, woody ridged warted capsules

See *The Rhododendrons of Sikkim-Himalaya* t. 10. 1849

(Leaves poisonous to livestock. Leaves and stems contain Andromedotoxin, glycoside toxin or grayanotoxin. Flower buds fish poison.)

in India: kegu, kalma, korling, korlinga

in Nepal: korling, korlinga

Rhododendron fulgens Hook.f.

India, Nepal. Small tree or large shrub, red scarlet flowers

See *The Rhododendrons of Sikkim-Himalaya*. London 1849 [1851] and *Notes from the Royal Botanic Garden, Edinburgh* 37: 336. 1979

(Plants contain Andromedotoxin.)

in China: xing hong du juan ya zu

in Nepal: chireal

Rhododendron grande Wight (*Rhododendron argenteum* Hook.f.; *Rhododendron longifolium* Nutt.; *Waldemaria argentea* Klotzsch; *Waldemaria argentea* (Hook.f.) Klotzsch)

India, Nepal, Bhutan. Evergreen tree, creamy white flowers with purple blotches

See *Calcutta J. Nat. Hist.* 8: 176. 1847, *The Rhododendrons of Sikkim-Himalaya*. t. 9. 1849, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 366. 1853, Klotzsch, Johann Friedrich (1805–1860), *Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 99. Berlin 1862

(Antiulcerogenic, antihyperlipidemic and antihypertensive.)

in English: wight-silvery rhododendron

in China: da ye du juan

in India: kali guraras, patu karling

in Nepal: patle korlinga

Rhododendron hodgsonii Hook.f.

India, Himalayas. Small tree, dark magenta to purple flowers

See *The Rhododendrons of Sikkim-Himalaya* 2: t. 15. 1851

(Leaves toxic. Antiulcerogenic, antihyperlipidemic and antihypertensive. Flower buds fish poison.)

in China: duo lie du juan

in Nepal: korling, korlinga

Rhododendron hypenanthum Balf. f. (*Rhododendron anthopogon* D. Don subsp. *hypenanthum* (Balf. f.) Cullen; *Rhododendron anthopogon* var. *hypenanthum* (Balf. f.) H. Hara)

Himalaya.

See *Notes from the Royal Botanic Garden, Edinburgh* 9: 291. 1916, *Notes from the Royal Botanic Garden, Edinburgh* 37(2): 327. 1979

(Leaves infusion for colds.)

in China: mao hua du juan

in India: talsi

Rhododendron lepidotum Wall. ex G. Don (*Rhododendron sinolepidotum* Balf. f.)

Nepal, India, China. Low shrub, petals dark pink to magenta, lobes spreading rounded, ribbed oblong capsule tapering upwards, stout persistent curved style, dried leaves mixed in preparation of incense

See *A General History of the Dichlamydeous Plants* 3: 845. 1834 and *Notes from the Royal Botanic Garden, Edinburgh* 10(47–48): 155–157. 1917

(Plant paste taken to purify blood.)

in China: lin xian du juan

in India: atarasu, simris, sumral, taghisha, talisha, talshi

in Nepal: bahle, balu marpo, balu sun pate, bhale sunpate, bhalunakpo, saluma, sang balu, sunpatie, suru

Rhododendron lochia F. Muell. (*Rhododendron lochae* F. Muell.) (after Lady Loch, wife of Sir Henry Brogham Loch, former Governor of Victoria, Australia; see [Great Britain—South Africa], *Correspondence relating to the Liquor Traffic in certain native territories in South Africa*. Presented to both Houses of Parliament by Command of Her Majesty, July 1890. [Correspondence between Sir Henry B. Loch, Governor; Sir George Baden-Powell; and others concerning Basutoland and British Bechuanaland.] London 1890)

Australia. Shrub, red flowers

See *Victorian Naturalist*; Journal and Magazine of the Field naturalist's Club of Victoria 3: 157. 1887 and *Edinburgh J. Bot.* 57(1): 1–7. 2000

(Said to be toxic.)

in English: Australian rhododendron

Rhododendron macgregoriae F. Muell.

New Guinea. Shrub or treelet, leathery leaves, flowers in umbels, corolla tubular, fruit a capsule slightly curved

(This plant causes vomiting and diarrhea. Leaves crushed and mixed with water applied to tropical ulcers. Poisonous to mules.)

in Papua New Guinea: kanama, womp

Rhododendron macrophyllum D. Don ex G. Don (*Hymenantes macrophylla* (D. Don ex G. Don) H.F. Copel.; *Rhododendron californicum* Hook.)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 392–393. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 862. 1826, *A General History of the Dichlamydeous Plants* 3: 843. 1834, *Botanical Magazine* 81: t. 4863. 1855, *Revisio Generum Plantarum* 2: 387. 1891 and *American Midland Naturalist* 30(3): 614. 1943, *Leaflets of Western Botany* 5(8): 140. 1948, Klein-Schwartz, W., Litovitz, T. “*Azalea* toxicity: an overrated problem?” *Clin. Toxicol.*, 23: 91–101. 1985, Casteel, S., Wagstaff, J. “*Rhododendron macrophyllum* poisoning in a group of goats and sheep.” *Vet. Hum. Toxicol.*, 31: 176–177. 1989

(This plant has poisoned goats and sheep; animals and humans poisoned after ingesting the foliage, nectar, or honey made from these plants. Andromedotoxins (grayanotoxins) are the toxins involved. Magic, ceremonial, sweat-house, dance wreaths, good luck charm.)

in English: California rose-bay, Pacific rhododendron

Rhododendron maximum L. (*Hymenantes maxima* (L.) H.F. Copel.; *Rhododendron ashleyi* Coker; *Rhododendron maximum* Thunb.)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 392. 1753, *A General History of the Dichlamydeous Plants* 3: 846. 1834 and *J. Elisha Mitchell*

Sci. Soc. li. 189. 1935, *American Midland Naturalist* 30(3): 614. 1943

(Leaves poultice applied for headache; leaves infusion taken for heart troubles; leaves decoction analgesic, taken for rheumatism. Ceremonial.)

in English: great laurel, great rhododendron, rose-bay rhododendron, white-laurel

Rhododendron mucronatum (Blume) G. Don (*Azalea indica* var. *alba* Lindl.; *Azalea mucronata* Blume; *Azalea rosmarinifolia* Burm. f.; *Rhododendron argyi* H. Lév.; *Rhododendron ledifolium* G. Don; *Rhododendron rosmarinifolium* (Burm. f.) Dippel)

India, cultivated. Evergreen spreading shrub, white flowers in terminal or lateral branches

See *Flora Indica* ... nec non *Prodromus Florae Capensis* 43, pl. 3, f. 3. 1768, *Catalogus* ... 44. 1823, *Botanical Magazine* 10: t. 811. 1824, *A General History of the Dichlamydeous Plants* 3: 846. 1834 and *Repertorium Specierum Novarum Regni Vegetabilis* 12(312–316): 102. 1913

(Disinfectant, pesticide.)

in English: snow azalea

in China: bai hua du juan

Rhododendron nilagiricum Zenker

India.

See Zenker, Jonathan Carl (Karl) (1799–1837), *Plantae Indicae*, quas in montibus Coimbatouricis coeruleis, Nilagiri s. Nilgherries dictis, collegit Rev. Bernhardus Schmid/illustravit Jonathan Carolus Zenker. 1835–[1837 (or 1836)]

(Honey with the pollen poisonous and laxative. Ceremonial, ritual, flowers used during festivals.)

in India: alanji

Rhododendron occidentale (Torrey & A. Gray) A. Gray (*Azalea occidentalis* Torr. & A. Gray; *Azalea occidentalis* Torr. & A. Gray ex Torr.; *Rhododendron occidentale* W. Wats.; *Rhododendron occidentale* A. Gray; *Rhododendron occidentale* (Torr. & A. Gray) A. Gray var. *occidentale*)

North America. Perennial shrub

See *Bot. California* [W.H. Brewer] i. 458. 1876–1880 [Geological Survey of California. J. D. Whitney, State Geologist. Botany. Cambridge, MA], *Gard. Chron.* (1886) ii. 104 fig. 21. 1886

(Used as antidote for poisoning. Ceremonial, flowers used for dance wreaths.)

in English: western azalea

Rhododendron occidentale (Torrey & A. Gray) A. Gray var. *occidentale* (*Azalea occidentalis* Torr. & A. Gray)

North America. Perennial shrub

See *Bot. California* [W.H. Brewer] i. 458. 1876–1880 [Geological Survey of California. J. D. Whitney, State Geologist. Botany. Cambridge, MA], *Gard. Chron.* (1886) ii. 104 fig. 21. 1886

(Used as antidote for poisoning. Ceremonial, flowers used for dance wreaths.)

in English: western azalea

***Rhododendron ponticum* L.**

Europe, Turkey. Evergreen shrub or small tree, light violet to purple flowers

See *Sp. Pl.*, ed. 2. 1: 562. 1762 and *The Species of Rhododendron* 567. 1930, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 546. 1949, *Fl. Turkey & E. Aegean Is.* 11: 322. 2000 (publ. 2001)

(Plant said to be poisonous to sheep; honey from the flowers toxic or poisonous. Leaves and flowers reported with narcotic properties, used in rheumatism, gout, arthritis. Plant may be used as an insecticide.)

in China: chang xu du juan ya zu

***Rhododendron przewalskii* Maximowicz subsp. *przewalskii* (*Rhododendron dabanshanense* Fang ex S.X. Wang; *Rhododendron kialense* Franchet)**

China.

See *Species Plantarum* 1: 392–393. 1753, *Bull. Acad. Imp. Sci. Saint-Petersbourg* 23(2): 350. 1877, *Journal de Botanique* (Morot) 9(21): 392–393. 1895 and *Acta Botanica Sinica* 20: 356. 1978

(Astringent.)

in China: long shu du juan

***Rhododendron simsii* Planch. (*Azalea indica* L.; *Azalea indica* var. *simsii* (Planch.) L.H. Bailey; *Azalea indica* var. *simsii* (Planch.) Rehder; *Azalea macrantha* Bunge; *Rhododendron breynii* Planch.; *Rhododendron danielsianum* Planch.; *Rhododendron decumbens* D. Don ex G. Don; *Rhododendron eriocarpum* (Hay.) Nakai; *Rhododendron hannoense* Nakai; *Rhododendron indicum* (L.) Sweet; *Rhododendron indicum* (L.) Sweet var. *eriocarpum* Hayata; *Rhododendron indicum* var. *simsii* (Planch.) Maxim.; *Rhododendron lateritium* Planch.; *Rhododendron macranthum* (Bunge) G. Don)**

Cultivated. Twiggy evergreen bush, red flowers in clusters

See *Species Plantarum* 1: 150. 1753, *Hortus Britannicus* 343. 1830, *Mém. Acad. Imp. Sci. St.-Petersbourg Divers Savans* 2: 115. 1833, *A General History of the Dichlamydeous Plants* 3: 846. 1834, *Flore des Serres et des Jardins de l'Europe* 9: 78–80. 1853–1854, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg, Septième Série* (Sér. 7) 16(9): 38. 1870 and *Cyclopedia of American Horticulture* 1: 122. 1900, *Botanical Magazine* 29: 261. 1915

(Ursolic acid, antiinflammatory, antitumor and antimicrobial, antibacterial and antifungal activity, used in ointments to treat burns.)

in English: macranthum azalea, red azalea, Sims's azalea

in China: du juan, du juan hua, gao yue du juan, hung chih chu, hung tu chuan, tu chuan, ying shan hung

in Japan: kikazô, maruba-satsuki, satsuki

***Rhododendron thomsonii* Hook. f.**

India, Sikkim, Nepal. Large shrub, deep blood-red flowers

See *The Rhododendrons of Sikkim-Himalaya* 2: t. 12. 1851 and *The Species of Rhododendron* 735. 1930, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 545. 1949

(Flowers contain Andromedotoxin, glycoside toxin or grayanotoxin.)

in China: ban yuan ye du juan, mi xian du juan ya zu

***Rhododendron vaccinioides* Hook. (*Rhododendron sinovaccinioides* Balf. f. & Forrest)**

India, Nepal, Assam. Small shrub, pinkish flowers

See *The Rhododendrons of Sikkim-Himalaya* 2: 3. 1851 and *Notes from the Royal Botanic Garden, Edinburgh* 13(65): 295–297. 1922

(Antiulcerogenic, antihyperlipidemic and antihypertensive.)

in China: yue ju du juan

***Rhododendron veitchianum* Hook.**

Burma. Shrub, white flowers

See *Bot. Mag.* 83: t. 4992. 1857

(Quercetin, antiinflammatory, anti-allergic and antitoxic effects, for the improvement of cardiovascular health, reducing risk for cancer, protection against osteoporosis.)

***Rhododendron vidalii* Rolfe (*Rhododendron verticillatum* S. Vidal; *Rhododendron verticillatum* Low ex Lindl.)**

Philippines, Borneo.

See *Journ. Hort. Soc.* iii. (1848) 86. 1848, *Journal of Botany, British and Foreign* 24: 348. 1886, *Revis. Pl. Vasc. Filip.* 171. 1886 and *Folia Malaysiana* 4(2): 119. 2003

(A remedy for itches.)

in Philippines: ayalea

Rhodognaphalon (Ulbr.) Roberty Bombacaceae

Greek *rhodon* 'red' and *gnaphalon*, *knaphallon* 'flock of wool, pillow', formerly included in *Bombax*, see *Species Plantarum* 1: 511. 1753, *Malvaceae, Buttneriaceae, Tiliaceae* 5. 1822.

Rhodognaphalon brevicuspe (Sprague) Roberty (*Bombax brevicuspe* Sprague; *Bombax chevalieri* Pellegr.; *Bombax rhodognaphalon* K. Schum.)

Tropical Africa. Large, deciduous tree, unarmed, straight, leaves digitately compound, white or pinkish red fragrant flowers, persistent campanulate calyx, obovoid to oblong capsule dehiscent with 5 valves, seeds pear-shaped embedded in abundant yellowish or reddish brown floss

See *Die Pflanzenwelt Ost-Afrikas* C: 269. 1895 and *Bull. Misc. Inform. Kew* 1909, 306. 1909, *Bulletin du Muséum National d'Histoire Naturelle* 27: 445–446. 1921, *Bulletin de l'Institut Fondamental d'Afrique Noire, Série A, Sciences Naturelles* 15: 1404. 1953, *Journal of Ethnopharmacology* 73(3): 347–377. 2000

(Powdered root applied to swellings, boils, dropsy, gout, arthritis, rheumatism; a paste of the root powder mixed with water taken to treat rheumatism, tumour and dysentery, diarrhea. Bark emetic, used for treatment of boils and venereal diseases, to promote wound healing, to prevent abortion; a decoction gargled to treat sore throat.)

in English: East African bombax, red ekuo, vulture's akpu

in Benin: kpatin dehun

in Cameroon: bouma, boumadanga, buma, enonu, ovong, ovonga, tenonu

in Congo: n'demo

in Gabon: alone, koma, ogumalanga

in Ghana: anyinakobin, ekuba, engyakobini, kuntunkun, kuntunkuni, kuntunkuri, kuobene, kwaseantwa, onyaa koben, onyina koben, onyina kobin, onyinakoben

in Ivory Coast: akogaouan, kondroti, kouobene, kuobéné

in Liberia: ju-eh, ju-ihn, swa-uh

in Mozambique: meguza, mungusa

in Nigeria: ákpu ùdèlè, akpudele, awori, gúrjýaá, kúrýaá, kúrýaá, nyamenyok, ògiúgbòkhà, ogiukpogha

in Sierra Leone: sangulo

in Tanzania: mfume

Rhodognaphalon schumannianum A. Robyns (*Bombax mossambicense* A. Robyns; *Bombax rhodognaphalon* K. Schum.; *Bombax rhodognaphalon* var. *rhodognaphalon*; *Bombax rhodognaphalon* var. *tomentosum* A. Robyns; *Bombax stolzii* Ulbr.; *Rhodognaphalon mossambicense* (A. Robyns) A. Robyns; *Rhodognaphalon stolzii* (Ulbr.) A. Robyns; *Rhodognaphalon tanganyikense* A. Robyns)

Kenya, Tanzania, Malawi and Mozambique. Tree, straight, leaves digitately compound, red to pale yellow or white flowers, ellipsoid to obovoid dehiscent capsule splitting into 5 valves, seeds embedded in reddish brown floss, roasted seeds eaten like groundnuts

See *Bull. Jard. Bot. État Bruxelles* 33: 263. 1963, *South African Journal of Botany* 69(3): 382–395. 2003

(Roots used to treat asthma, coughs and diarrhea; bark against diarrhea and malaria. Magic, ritual, leaves used in cleansing rituals; leaves and roots used as medicine against bewitchment.)

in English: East African bombax, fleece fruit, wild kapok tree

in Tanzania: mfume, msufi mwitu, msufi pori

Rhodomyrtus (DC.) Reichenbach Myrtaceae

Myrtle-like flowers, from the Greek *rhodon* 'red, rose' and *myrtos* 'myrtle, branch of myrtle', Akkadian *murdudu* and Sumerian *mur-du-du* 'a plant'; see *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 240. 1828, Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Der Deutsche Botaniker ... das Herbarienbuch*. 1: 177. Dresden, Leipzig, 1841–1842, Wight, Robert (1796–1872), *Spicilegium Neilgherrense*, or, a selection of Neilgherry plants ... Madras, [1846]–1851.

Rhodomyrtus macrocarpa Benth.

Australia.

See *Flora Australiensis: a description ...* 3: 273. 1867

(Toxic fruit, blindness.)

in English: Cooktown loquat, finger cherry, native loquat

Rhodomyrtus parviflora Alston (*Rhodomyrtus parviflora* Craib; *Rhodomyrtus tomentosa* var. *parviflora* (Alston) A.J. Scott)

India.

See *Hortus Kewensis* (W. Aiton) 2: 159. 1789, *Flora Cochinchinensis* 1: 311–312. 1790, *Flora* 25(2, Beibl.): 35. 1842 and *Bull. Soc. Bot. France* 54(Mém. 3c): 209, nomen. 1908 [1907 publ. 22 Feb 1908], *J. Fed. Malay States Mus.* 6: 253. 1916, *Bull. Misc. Inform. Kew* 1928, 70. 1928, *Hand-Book Fl. Ceylon* (Trimmen) vi. Suppl., 111. 1931, *Kew Bulletin* 33(2): 315. 1978

(Used in Sidha.)

in India: gudda nelli, guddade, kattukkoyya, koratta, koratti, malaiccirukoyya, tavittukkoyya, tavittuppalam, tavuti, thaontay, thavattu, tungla

Rhodomyrtus tomentosa (Aiton) Hassk. (*Cynomyrtus tomentosa* (Ait.) Scriv.; *Cynomyrtus tomentosa* Scrivenor; *Myrtus canescens* Lour.; *Myrtus tomentosa* Ait.; *Myrtus tomentosa* Glaz.; *Myrtus tomentosus* Glaz.; *Rhodomyrtus parviflora* Alston; *Rhodomyrtus parviflora* Craib; *Rhodomyrtus tomentosa* Hassk.; *Rhodomyrtus tomentosa* Wight; *Rhodomyrtus tomentosa* var. *parviflora* (Alston) A.J. Scott)

Tropical and Subtrop. Asia. Shrub, erect, petals and filaments pink-violet, ripe sweet fruits eaten

See *Hortus Kewensis* (W. Aiton) 2: 159. 1789, *Flora Cochinchinensis* 1: 311–312. 1790, *Flora* 25(2, Beibl.): 35. 1842 and *Bull. Soc. Bot. France* 54(Mém. 3c): 209, nomen. 1908 [1907 publ. 22 Feb 1908], *J. Fed. Malay States Mus.* 6: 253. 1916, *Bull. Misc. Inform. Kew* 1928, 70. 1928, *Hand-Book Fl. Ceylon* (Trimen) vi. Suppl., 111. 1931, *Kew Bulletin* 33(2): 315. 1978

(Roots decoction for diarrhea and as a postpartum remedy. For stomachache, boil the leaves and the roots with the leaves of *Sideroxylon ferrugineum* and drink the decoction.)

in English: downy myrtle, downy rosemyrtle, hill gooseberry, hill guava, rose myrtle

in China: shan ren zi, tao jin niang

in India: havatte, kirattan, koratta, kuratta, tavante, tavuti, thaontay, thaonty, thavattukoyya, thavithu

in Japan: satagi-ima, tennin-ka

in Malaya: kemunting

in Vietnam: hong sim, pieu nim, sim

Rhodopentas Kårehed & K. Bremer Rubiaceae

From the Greek *rhodon* ‘red, rose’ and the genus *Pentas*, see *Bulletin du Jardin Botanique de l’État* 23: 296. 1953, *Taxon* 56(4): 1076. 2007.

Rhodopentas bussei (K. Krause) Kårehed & B. Bremer (*Pentas bussei* K. Krause; *Pentas bussei* f. *brevituba* Verdc.; *Pentas bussei* f. *glabra* Verdc.; *Pentas bussei* f. *minor* Verdc.; *Pentas coccinea* Stapf; *Pentas flammea* Chiov.)

Tanzania, Zambia.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 134. 1909, *Bot. Mag.* 149: t. 9005. 1924, *Fl. Somalia* 2: 231. 1932, *Bull. Jard. Bot. État* 23: 302. 1953, *Taxon* 56: 1076. 2007

(Stem bark and leaves for fevers, diarrhea, dysentery. Roots decoction for gonorrhoea, syphilis and dysentery.)

in Tanzania: kiruma nyuki

Rhodotypos Siebold & Zucc. Rosaceae

Greek *rhodon* ‘a rose’ and *typos* ‘a type’; Akkadian *wurduin* ‘rose’, see *Flora Japonica* (Siebold) 1: 187, pl. 99. 1841.

Rhodotypos scandens (Thunberg) Makino (*Corchorus scandens* Thunberg; *Kerria tetrapetala* Siebold; *Rhodotypos kerrioides* Siebold & Zuccarini; *Rhodotypos tetrapetala* (Siebold) Makino)

Japan, Korea, China. Deciduous shrub, reddish, solitary flowers, clustered shiny black drupes

See *Trans. Linn. Soc. London* 2: 335–336. 1794, *Verhandeligen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 12: 69. 1830, *Fl. Jap.* 1: 185, 187, pl. 99, f. 1. 1841 and *Botanical Magazine* 17(191): 13. 1903, *Bot. Mag.* (Tokyo) 27(318): 126. 1913

(Fruits poisonous, amygdalin, a cyanogenic glycoside, highly toxic if ingested. Antiinflammatory, a decoction of the flowering shoots in the treatment of coughs and women’s complaints.)

in English: black jet-bead, jetberry bush, Makino-black jet-bead

in China: ji ma

in Japan: shiro-yama-buki (= white *Kerria japonica*)

Rhoeo Hance Commelinaceae

Derivation of the name unknown, perhaps from the Latin *rhoeas*, *adis* or *rhoea*, *ae* used by Plinius for the wild-poppy, Greek *rhoias* applied by Theophrastus (*HP.* 9.12.4) and Dioscorides to the corn poppy, a species of *Papaver*, or from Greek *rhoe*, *rhoa* ‘river, stream, flowing of sap’.

Rhoeo spathacea (Swartz) Stearn (*Ephemerum bicolor* Moench; *Ephemerum discolor* Moench; *Rhoeo discolor* (L’Hér.) Hance ex Walp.; *Rhoeo discolor* (L’Héritier) Hance; *Rhoeo spathacea* f. *concolor* (Baker) Stehlé; *Rhoeo spathacea* f. *variegata* (Hook.) Stehlé; *Tradescantia discolor* L’Héritier; *Tradescantia discolor* var. *concolor* Baker; *Tradescantia discolor* var. *variegata* Hook.; *Tradescantia spathacea* Swartz; *Tradescantia versicolor* Salisb.)

Mexico, Guatemala. Herb, succulent, small flowers at base of leaves, fruit a capsule, see also *Tradescantia*

See *Prodr. descriptionum Vegetabilium ... Ind. Occ.*: (Swartz) 57. 1788, L’Héritier de Brutelle, Charles Louis (1746–1800), *Sertum Anglicum* 8, pl. 12. Parisii: Typis P.-F. Didot, 1788–1792 [Redouté, Pierre Joseph (1759–1840), Sowerby, James (1757–1822)], *Prodr. Stirp. Chap. Allerton*: 216. 1796, *Suppl. Meth.*: 78. 1802, *Annales Botanicæ Systematicæ* 3: 660. 1852, *Bot. Mag.* 84: t. 5079. 1858 and *Fieldiana, Bot.* 24(3): 1–42. 1952, *Baileya* 5: 195, 198. 1957, *Bull. Soc. Bot. France* 117: 77. 1970, *Proc. Indiana Acad. Sci.* 83: 79–82. 1974, *Phytomorphology* 27: 308–314. 1977, *Chromosoma* 67: 97–108. 1978, *Chromosoma* 71: 109–127. 1979, *Ci. & Cult.* (Sao Paulo) 35: 190–193. 1983, *Chromosoma* 90: 72–83. 1984, *Genetica* 74: 219–224. 1987, *Fl. Mesoamer.* 6: 157–173. 1994, *Pakistan J. Bot.* 26(1): 63–67. 1994, *Cytologia* 60: 319–327. 1995, *Cytologia* 64: 45–49. 1999, *Caryologia* 56: 31–35. 2003

(Plant sap poisonous, stinging and itching; severe pain in the mouth if ingested. The flower used for the treatment of dysentery, hemoptysis; leaves or flowers infusion drunk for cough, whooping cough.)

in English: boat lily, cradle lily, man in a boat, men in a boat, Moses in his cradle, Moses in the bulrushes,

Moses-in-the-cradle, Moses on a raft, oyster plant, purple leaved spiderwort, three men in a boat

in China: bang lan ye, zi bei wan nian qing

in Japan: fuiri-murasaki-omoto

in Philippines: bangsa-bangkaan

Rhoicissus Planchon Vitaceae

Presumably from the Latin *rhoicus*, *a*, *um* 'belonging to the *Rhus*, to the sumach' and *cissos*, *i* 'ivy', or from the Greek *rhoia* 'pomegranate' and *kissos* 'ivy', see *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 463, 467, 469. 1887 and *Nat. Pflanzenfam.* ed. 2. 20d: 329. 1953, *Adansonia* 19: 175–198. 1979.

Rhoicissus revoilii Planch. (*Cissus rhomboidea* E. Mey. ex Harv.; *Rhoicissus cymbifolius* C.A. Sm.; *Rhoicissus rhomboidea* Planch.; *Rhoicissus rhomboidea* (E. Mey. ex Harv.) Planch.; *Rhoicissus schlechteri* Gilg & Brandt; *Vitis rhomboidea* (E. Mey. ex Harv.) Szyszyl.)

Tropical Africa.

See *Flora Capensis* 1: 252. 1859, *Monographiae Phanerogamarum* 5: 467, 469. 1887 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 438. 1911, *Adansonia* 19: 175–198. 1979

(Roots analgesic, wound healing.)

in English: bitter forest grape

in Southern Africa: bitterbosdruiif; isiNwasi (Zulu); isAqoni, isaQoni (Xhosa)

Rhoicissus tomentosa (Lam.) Wild & R.B. Drumm. (*Cissus capensis* Willd.; *Cissus cornifolia* (Baker) Planch.; *Cissus cuneifolia* Eckl. & Zeyh.; *Cissus cussonioides* Schinz; *Cissus lonicerifolia* C.A. Sm.; *Cissus tomentosa* Lam.; *Cissus tridentata* (L.f.) Eckl. & Zeyh.; *Rhoicissus capensis* (Burm. f.) Planch.; *Rhoicissus cirrhiflora* (L.f.) Gilg & M. Brandt; *Rhoicissus cuneifolia* (Eckl. & Zeyh.) Planch.; *Rhoicissus erythrodes* (Fresen.) Planch.; *Rhoicissus tridentata* (L.f.) Wild & R.B. Drumm.; *Rhoicissus cuneifolia* (Eckl. & Zeyh.) Planch.; *Rhoicissus tridentata* subsp. *cuneifolia* (Eckl. & Zeyh.) Urton; *Rhus tridentatum* L.f.; *Vitis capensis* Thunb.; *Vitis capensis* Burm. f.; *Vitis cornifolia* Baker; *Vitis cuneifolia* (Eckl. & Zeyh.) Szyszyl.; *Vitis cussonioides* (Schinz) Kuntze)

Tropical Africa, Tanzania. Erect shrub, or scrambler, large swollen fire-resistant rootstock, thick hairy shoots, very swollen nodes, stems woody at the base, tendrils absent, leaves membranous, very small flowers, green-yellow-cream triangular 4 hooded petals, flowers in stalked clusters, edible red-purple-black smooth juicy berries, ripe fruit borne in large clusters, in *Brachystegia* woodland, thickets, grasslands

See *Species Plantarum* 1: 117, 202–203. 1753, *Flora Indica ... nec non Prodromus Florae Capensis* 7. 1768, *Supplementum*

Plantarum 184. 1781, *Tableau Encyclopédique et Méthodique... Botanique* 1: 330. 1791, *Prodromus Plantarum Capensium*, ... 1: 44. 1794, *Enumeratio Plantarum Africae Australis Extratropicae* 56, n. 431. 1835, *Flora of Tropical Africa* 1: 390. 1868, *Monographiae Phanerogamarum* 5: 463, 466, 492. 1887, *Bulletin de l'Herbier Boissier* 2: 195. 1894, *Revisio Generum Plantarum* 3(2): 41. 1898 and *A Manual of the Flowering Plants and Ferns of the Transvaal* 2: 474, 475. 1932, *Kirkia* 3: 18. 1963, *Adansonia* 19: 175–198. 1979, *South African Journal of Botany* 52: 393. 1986

(Rootstock a medicine for stomachache; roots used to treat hernia and bilharzia.)

in English: wild grape

in Ghana: sinkantora

in Tanzania: mpangamwaka, mtandamwaka

Rhoicissus tridentata (L.f.) Wild & R.B. Drumm. (*Cissus capensis* Willd.; *Cissus cuneifolia* Eckl. & Zeyh.; *Cissus tomentosa* Lam.; *Rhoicissus capensis* (Burm. f.) Rhus ovata S. Watson (*Neostyphonia ovata* (S. Watson) Abrams; *Rhus ovata* S. Watson var. *traskiae* F.A. Barkley p.p.; *Schmaltzia ovata* (S. Watson) F.A. Barkley; *Schmaltzia ovata* var. *traskiae* (F.A. Barkley) F.A. Barkley)

North America. Perennial tree or shrub, berries eaten

See *Proceedings of the American Academy of Arts and Sciences* 20: 358–359. 1885 and *Bulletin of the New York Botanical Garden* 6(21): 403. 1910, *Annals of the Missouri Botanical Garden* 24(3): 368–369, pl. 20, f. 2. 1937, *American Midland Naturalist* 24(3): 651–652. 1940

(Analgesic, anthelmintic, physic, cathartic, carminative, anti-convulsive, for an easy delivery, colds, coughs, chest pain.)

in English: sugar bush, sugar bush sumac, sugar sumac

Rhus parviflora Roxb.

Nepal. Shrub, compound leaves, terminal panicles

See *Hortus Bengalensis*, or a catalogue ... 22. 1814, *Fl. Ind.* 2: 100. 1824

(Used in Ayurveda and Unani. Leaves decoction astringent. Seeds eaten raw to treat stomachache. Ripe fruit juice vermifuge, stomachic. Rootbark paste used in sun stroke; crushed roots purgative.)

in India: murthi, tunga

in Nepal: raitung, samandarphal, satibro, saunla, tintidika, tintrini, tumra, tung, tungala, tungia, tungla

Rhus perrieri (Courchet) H. Perrier (*Protorhus perrieri* Courchet)

Madagascar.

See *Species Plantarum* 1: 265–267. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 377, 420. 1881 and *Ann. Mus. Col. Marseille*, sér. 2, 5: 43. 1907, *Mémoires du Muséum National d'Histoire Naturelle* 18: 255. 1944

(Resin used as a depilatory.)

Rhus punjabensis Stewart

India.

See *Species Plantarum* 1: 265–267. 1753, *For. Fl. Brit. Ind.* 120. 1874 and *Taxon* 29: 355–357. 1980, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Journal of Cytology and Genetics* 25: 36–42. 1990

(The leaves, bark, fruit, and sap can produce dermatitis.)

in India: amlara, askhor, dasmila, rikhal, tillari, titari, titri, titri, tung

Rhus pyroides Burch. (Greek *pyr* 'fire' and *eidos*, *oides* 'resemblance')

South Africa, Tanzania. Shrub

Tree, with spreading branches, edible fruit light green maturing red

See *Species Plantarum* 1: 265–267. 1753, *Travels in the interior of South Africa* 1: 340. 1822 and Watt J.M. and Breyer-Brandwijk M.G. *The Medicinal and Poisonous Plants of*

Southern and Eastern Africa. 2nd ed. Edinburgh. 1962, *Phytochemistry*. 53(8): 1005–8. 2000, *Pure and Applied Chemistry* 73: 1197–1208. 2001, *J. Nat. Prod.* 66(5): 599–604. 2003, *Mol. Phylogenet. Evol.* 33(3): 861–879. 2004, *J. Ethnopharmacol.* 103(2): 276–280. 2006

(Used in the treatment of epilepsy. A scratch or prick from the sharp point of a twig (the plant has no thorns) is extremely painful and burns like fire. Cytotoxic, anticancer, antifeedants.)

in English: firethorn

in South Africa: Brandtaaibos

in Tanzania: mchengele

Rhus pyroides Burch. var. ***pyroides*** (*Rhus baurii* Schönl.; *Rhus intermedia* Schönl.; *Rhus longipes* Engl.; *Rhus vulgaris* Meikle)

Tanzania, South Africa. Shrub or small tree, spreading, multi-stemmed, multi-branched, spiny, flowers yellow-green in terminal loose heads or from upper leaf axils, slightly flattened edible dull red fruits, root used to make drinks, unripe or sweetish acid ripe tiny fruits occasionally eaten, on steep rocky slope, rocky sites, wooded grassland, at forest edge, bushed grassland, dry forest margins, lake shore, river banks, savanna woodlands and bushland, taxonomic status of this species confused

See *Species Plantarum* 1: 265–267. 1753, *Travels in the interior of South Africa* 1: 340. 1822, *Monographiae Phanerogamarum* 4: 431. 1883 and *Bulletin of Miscellaneous Information Kew* 1915: 290. 1915

(Stems boiled and liquid applied to wounds. Boiled root used to treat women's stomach problems; roots pounded and the powder cooked with porridge which is then drunk to treat gonorrhoea. Bark decoction used as a wash for wounds. Leaves and fruits for diarrhoea, wound dressing. Leaves pounded and used as a treatment for piles. Fruit decoction taken for diarrhoea.)

in English: common wild currant, fire thorn

in East Africa: mutheu, muthigi, ol-munyushi

in Kenya: awayo, busangura, ekwatet, ekwayu, emungushi, engarachi, epwatet, ilmisigyio, kumu-sangura, lejoro, mbwana nyahi, mirimamuthua, mirimuthu, mkonochuma, mlama-mwitu, mlishangwe, mon-foronat, monjororriat, mrinja-kondo, msigwe, mubebiaiciya, muthanguta, mutheru, mutheu, mutheu munene, muthigio, muthigi, muthigi, muthigi, muthigi, njowaruwa, obusangura, olmisigyio, omusangura, seria, sioloran, siriewo-kaptamu, suriet, terere, vikunguu

in Southern Africa: brandtaaibos, gewone taaibos, rooi kareeboom, taaibos; iNhlakoshiyane, inHlokoshiyane (Zulu); koditshane (South Sotho); mogodiri (Hebron dialect, central Transvaal); mogodiri, mogwediri (Ngwaketse dialect, Botswana); modupaphiri (Tawana dialect, Ngamiland); mogodiri, mogweriri (North Sotho)

in Tanzania: aambalangw, ambalaki, datei, datlali, datlii, emungushi, emusigiloi, emusikiyoi, engarachi, ichube, ilm-isigyio, lidzadzi, lisekelu, lisekeru-dume, mbulagankuku, mbwananyahi, mchengele, mkenekene, mkenikeni, mkono chuma, mlama mwitu, mlishangwe, mpangulu, mpungulu, mrinja kondo, msakasaka, msigwe, mtuntano, muhehefu, muizi, mukundi, mwiizi, nyungu, olmisigyio, ormisigyio, ormungushi, ormusikiyoi, pungu, sirong, umukeri, umusagara

Rhus radicans L. (*Rhus toxicodendron* f. *radicans* (L.) Engler; *Rhus toxicodendron* f. *radicans* (L.) McNair; *Rhus toxicodendron* subsp. *radicans* (L.) R.T. Clausen; *Rhus toxicodendron* var. *radicans* (L.) Torr.; *Toxicodendron radicans* (L.) O. Ktze; *Toxicodendron radicans* O. Kuntze)

North America. Perennial, see also *Toxicodendron radicans*

See *Species Plantarum* 1: 266. 1753, *Flora Peruviana* 3: 29, t. 252, f. a. 1802, *Florula Ludoviciana*, or, a flora of the state of ... 107. 1817, *Systema Vegetabilium* 6: 649. 1820, *A Flora of the Northern and Middle Sections of the United States* 1: 324. 1824, *A Numerical List of Dried Specimens* [Wallich] n. 996. 1828 [1829], *Linnaea* 21(5): 592–593. 1848, *Revisio Generum Plantarum* 1: 153. 1891 and *Leaflet Bot. Observ. Crit.* 1: 124. 1905, *Fieldiana, Bot.* 24(6): 177–195. 1949, *N. Y. State J. Med.*, 56: 2255–2259. 1956, *Rhodora* 73(795): 377. 1971, *J. Pharm. Sci.* 64(10): 1715–1718. 1975, *Can. J. Plant Sci.*, 57: 515–523. 1977, *J. Pharm. Sci.* 67(4): 483–485. 1978, *J. Pharm. Sci.* 69(5): 587–589. 1980, *Int. J. Dermatol.* 19(2): 81–82. 1980, *J. Am. Acad. Dermatol.* 4(1): 99–114. 1981, Schwartz, R.S. "Erythema multiforme associated with *Rhus* contact dermatitis." *Cutis* 27: 85–86. 1981, Goldsmith, M.F. "Sensitivity test may aid in avoiding 'poison' plant-induced dermatitis." *J. Am. Med. Assoc.*, 251: 1389–1390. 1984, Gayer, K.D., Burnett, J.W. "*Toxicodendron* dermatitis." *Cutis* 42: 99–100. 1988, *Wilderness Environ. Med.* 17(2): 120–128. 2006

(Urushiol is the allergenic agent found in most parts of the plant. Damage to plant tissues causes the nonvolatile chemicals to be exposed. Humans are often sensitized. Poison ivy is probably responsible for more cases of plant dermatitis than any other plant. The urushiol is not volatile and can contaminate clothing, tools, and domestic animals. The occurrence of cross-sensitivity between the urushiols of poison ivy (*Toxicodendron radicans* (L.) Kuntze) and those of cashew nut shell liquid has long been recognised.)

in English: American poison ivy, markweed, poison ivy, poison vine, poor man's liquid amber, three-leaved ivy

in Mexico: dominguilla, guau, hiedra, hiedra mala, hiedra venenosa, hinch huevos, mala mujer, zumaque, sumaque; mexie, meye (Otomi I., Hidalgo); fuego (Pueblo Nuevo, Solistahuacan, Chiapas); betz-tzaj (Huasteca I., south east San Luis Potosí); bemberecua, huembereua (Michoacán); chechen (Yucatan); guadalagua (Jalisco); lachi-golilla, lachi-cobilla, yaga-beche-topa, yaga-peche-topa (Zapoteca I., Oaxaca)

Rhus simarubaefolia A. Gray

Pacific.

See *U.S. Expl. Exped., Phan.* 15: 367, t. 44. 1854

(This plant can produce dermatitis.)

Common names: sumac, wael mango

Rhus taitensis Guill.

Pacific, Micronesia, Polynesia. Tree, cream to white flowers in terminal panicles, fruit a black drupe

See *Annales des Sciences Naturelles sér. 2*, 7 1837

(A dangerous medicine, irritant, dermatitis. Bark to treat severe boils and ulcers. Astringent, for diarrhea.)

in Guam: lemayo, sumac

in Papua New Guinea: qarawec

in Tonga: tavahi

Rhus tenuinervis Engl. (*Rhus commiphoroides* Engl. & Gilg.; *Searsia tenuinervis* (Engl.) Moffett)

Ethiopia and Sudan south to South Africa. Shrub or small tree, twiggy, flowers greenish yellow borne on large branched inflorescences, small angled compressed brownish yellow edible fruits, sour young shoots and leaves chewed like khat, found in *Combretum* bushland and bushed grassland

See *Bothalia* 37(2): 172. 2007

(Leaves used for heartburn.)

in Kenya: kitheu, olmisigiyo

in Southern Africa: hyaena taaibos; modupaphiri (= scented by hyaena), morupapiri (Western Transvaal, northern Cape, Botswana)

Rhus trilobata Nutt. (*Rhus aromatica* Aiton subsp. *flabelliformis* (Shinners) R.E. Brooks; *Rhus aromatica* subsp. *trilobata* (Nutt.) W.A. Weber; *Rhus aromatica* var. *flabelliformis* Shinners; *Rhus aromatica* var. *trilobata* (Nutt.) A. Gray ex S. Watson; *Rhus trilobata* (ex Torrey & A. Gray) Nutt.; *Schmaltzia trilobata* (Nutt.) Greene; *Schmaltzia trilobata* (Nutt.) Small; *Schmaltzia trilobata* Small; *Toxicodendron trilobatum* O. Kuntze; *Toxicodendron trilobatum* (Nutt.) Kuntze; *Toxicodendron triphyllum* var. *trilobatum* (Nutt.) Kuntze; *Toxicodendron triphyllum* var. *trilobatum* O. Kuntze)

North America. Perennial shrub, berries eaten

See *A Flora of North America: containing ...* (Torr. & A. Gray) 1(2): 219. 1838 and *Flora of the Southeastern United States* 728, 1334. 1903, *Leaflets of Botanical Observation and Criticism* 1(10): 132. 1905, *Phytologia* 67(6): 426. 1989

(Analgesic, hemostat, diuretic, emetic, postpartum remedy, aphrodisiac, anthelmintic, physic, deodorant, burn dressing, cathartic, carminative, anticonvulsive, for an easy delivery and for colds, coughs, sore gums, toothache, bleeding,

smallpox, chest pain, stomachache, as a lotion for poison ivy dermatitis. Insect repellent, insecticide. Veterinary medicine. Ceremonial, ritual, magic, snake repellent, sacred baskets.)

in English: skunk-brush, skunk-bush, skunkbrush, skunkbush

in Mexico: lambrisco; agrito (Guadalcazar, San Luis Potosí); landrisco (Tamaulipas)

Rhus trilobata Nutt. var. *pilosissima* Engelm. (*Rhus aromatica* Aiton subsp. *pilosissima* (Engelm.) W.A. Weber; *Rhus aromatica* Aiton var. *mollis* Ashe; *Rhus aromatica* Aiton var. *pilosissima* (Engelm.) Shinners; *Rhus trilobata* Nutt. var. *malacophylla* (Greene) Munz; *Rhus trilobata* Nutt. var. *pilosissima* Engl.; *Schmaltzia trilobata* (Nutt.) Small var. *pilosissima* (Engelm.) F.A. Barkley; *Schmaltzia trilobata* var. *pilosissima* (Engl. ex DC.) F.A. Barkley)

North America. Perennial shrub, berries eaten

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 386–387. 1883 and *American Midland Naturalist* 24(3): 661. 1940, *Field & Laboratory* 19(2): 86–87. 1951, *Brittonia* 33(3): 326. 1981

(Anthelmintic, physic, burn dressing, cathartic, emetic, postpartum remedy. Ceremonial, ritual.)

in English: pubescent skunkbush sumac

Rhus trilobata Nutt. var. *trilobata* (*Rhus aromatica* Aiton subsp. *flabelliformis* (Shinners) R.E. Brooks; *Rhus aromatica* Aiton subsp. *trilobata* (Nutt.) W.A. Weber; *Rhus aromatica* Aiton var. *flabelliformis* Shinners; *Rhus aromatica* Aiton var. *trilobata* (Nutt.) A. Gray ex S. Watson; *Schmaltzia trilobata* (Nutt.) Small)

North America. Perennial shrub

See *A Flora of North America: containing ...* (Torr. & A. Gray) 1(2): 219. 1838 and *Flora of the Southeastern United States* 728, 1334. 1903, *Leaflets of Botanical Observation and Criticism* 1(10): 132. 1905, *Phytologia* 67(6): 426. 1989

(Analgesic, hemostat, diuretic, emetic, postpartum remedy, aphrodisiac, anthelmintic, physic, deodorant, burn dressing, cathartic, carminative, anticonvulsive, for an easy delivery and for colds, coughs, sore gums, toothache, bleeding, smallpox, chest pain, stomachache, as a lotion for poison ivy dermatitis. Insect repellent, insecticide. Veterinary medicine. Ceremonial, ritual, magic, snake repellent, sacred baskets.)

in English: skunk-brush, skunk-bush, skunkbrush, skunkbush

Rhus typhina L. (*Datisca hirta* L.; *Rhus hirta* (L.) Sudw., nom. illeg., non *Rhus hirta* Harv. ex Engl.; *Toxicodendron typhinum* (L.) Kuntze)

North America. Perennial shrub

See *Species Plantarum* 1: 265–267. 1753, *Species Plantarum* 2: 1037. 1753, *The Gardeners Dictionary ... Abridged ...* fourth edition no. 1. 1754, *Centuria II. Plantarum ...* 14.

1756, *Revisio Generum Plantarum* 1: 154. 1891, *Bulletin of the Torrey Botanical Club* 19(3): 81. 1892 and *Pharmazie*. 15: 83–9. 1960 [On some ingredients of the fruits of staghorn sumac (*Rhus typhina* L.)], *Dermatosen in Beruf und Umwelt*. 31(5): 140–8. 1983 [Contact allergy to Anacardiaceae. A review and case reports of poison ivy allergy in central Europe.], *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *Phytochemistry* 58(5): 657–61. 2001, *Planta* 216(1): 168–72. 2002, *Phytochemistry* 65(20): 2809–13. 2004, *Phytochemistry* 66(17): 2001–11. 2005

(This plant can produce dermatitis, the leaves are said to contain irritating sap. Antirheumatic, anthelmintic, tonic, emetic, analgesic, stomachic, blood purifier, for sunburn blisters, boils, colds, coughs, sore throats, mouth sores, tuberculosis, fever, stomach pain, diarrhea, rheumatism, venereal disease. Ceremonial.)

in English: dyer's sumach, staghorn sumach, sumach, velvet sumac, Virginian sumac

in Canada: sumac amarante, sumac de Virginie, vinaigrier

Rhynchanthus Hook.f. Zingiberaceae

From the Greek *rhynchos* and *anthos* 'flower', see *Botanical Magazine* 112: pl. 6861. 1886.

Rhynchanthus longiflorus Hook.f.

India.

See *Bot. Mag.* 112: t. 6861. 1886

(Rhizome paste given against stomachache and cough.)

Rhynchelytrum Nees Poaceae (Gramineae)

From the Greek *rhynchos* 'horn, beak, snout' and *elytron* 'sheath, cover, scale, husk', referring to the upper glume and lower lemmas, a difficult genus of closely related species, sometimes referred to *Melinis* and *Tricholaena*, sometimes synonymized with *Melinis*, see *Species Plantarum* 1: 54–55. 1753, *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Mantissa* 2: 8, 163. 1824, John Lindley, *A Natural System of Botany*. (Hydrocyanic acid.)

in English: fairy grass, Natal grass, Natal red top, Natal red top grass, red Natal grass, red top, red top grass, ruby grass

in Mexico: cola de zorra, pasto carretero, pasto del Senegal, pasto ilusión, pasto natal, pasto Senegal, pasto senegalés, zacate natal

in Angola: capim favorito, lusonde, ohulungumbe

in Benin: sogbédia

in South Africa: bergrooigras, blinkgras, ferweelgras, meerjarige ferweelgras, eenjarige ferweelgras, einjähriges seiden-gras, haargras, hangegras, kopersaadgras, Natal blinkgras, Natalse rooipluim, rooihaargras, rooiwolsaadgras, wolgras, ausdauerndes seiden-gras

in Yoruba: eeran eye, owu, sokodoya

Rhynchoglossum Blume Gesneriaceae

From the Greek *rhynchos* 'beak, snout' and *glossa* 'tongue', see *Bijdragen tot de flora van Nederlandsch Indië* 741. 1826, *Linnaea* 8: 248–249. 1833 and *Fieldiana, Bot.* 24(10/3): 240–313. 1974.

Rhynchoglossum lazulinum A.S. Rao & Joseph

India.

See *Bull. Bot. Surv. India* ix. 280. 1968

(Leaves pound and the juice taken as an appetizer.)

in India: taklan

Rhynchoglossum obliquum Blume (*Loxotis obliqua* (Wall.) Benth.; *Rhynchoglossum hologlossum* Hayata; *Rhynchoglossum obliquum* (Wall.) A. DC.; *Rhynchoglossum obliquum* fo. *albiflorum* Kuntze, nom. invalid.; *Rhynchoglossum obliquum* fo. *coeruleum* Kuntze; *Rhynchoglossum obliquum* var. *hologlossum* (Hayata) W.T. Wang; *Rhynchoglossum obliquum* var. *parviflorum* C.B. Clarke; *Rhynchoglossum zeylanicum* Hook.; *Wulfenia obliqua* Wall.)

SE Asia, India. Herbs, acuminate leaves, flowers in lax terminal racemes, filiform bracteoles, corolla tube cylindrical, ellipsoid capsule 2-valved

See *Bijdragen tot de flora van Nederlandsch Indië* 14: 741. 1826, *Tentamen Florae Napalensis Illustratae* 45, pl. 35. 1826, *Plantae Javanicae Rariores* 102. 1832, *Plantae Asiaticae Rariores* 3: 65. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 275. 1845, *Botanical Magazine* 71: pl. 4198. 1845 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 5: 131–133, pl. 11. 1915, *Bulletin of Botanical Research* 4(1): 31. 1984, *Beitr. Biol. Pflanzen*. 70: 445–470. 1997

(Leaves paste applied for skin diseases, sores or boils between the toes.)

in China: jian she ju tai

in India: tipri-char

Rhynchosia Lour. Fabaceae (Phaseoleae)

Greek *rhynchos* 'horn, beak, snout', referring to the style or the flowers with beaked keels; see J. de Loureiro, *Flora cochinchinensis*. 460. [Lisboa] (Sept.) 1790 and *Darwiniana* 4(2–3): 323–331. 1942, *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *Ann. Missouri Bot. Gard.* 67(3): 523–818. 1980 [1981], *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994.

Rhynchosia adenodes Eckl. & Zeyh. (*Rhynchosia effusa* (E. Mey.) Druce)

South Africa. Perennial non-climbing herb, sprawling, yellow flowers

See *Enumeratio Plantarum Africae Australis Extratropicae* 254. 1836 and *Bothalia* 1: 113–138. 1923, *Journal of Ethnopharmacology* 67(3): 347–354. 1999

(Anti-bacterial and antiinflammatory.)

Rhynchosia beddomei Baker

India. Perennial non-climbing shrub

See *The Flora of British India* 2(4): 222. 1876 and *Fitoterapia* 72(5): 579–582. 2001, *Journal of Applied Biological Sciences* 3(1): 31–32. 2009

(Antimicrobial, a source of flavonoids. Leaves used for wounds, cuts, boils and rheumatic pains.)

in India: adavivuluva, konda kandi

Rhynchosia cana (Willd.) DC. (*Glycine cana* Willd.)

India, Myanmar. Perennial non-climbing shrub

See *Species Plantarum*. Editio quarta 3(2): 1063. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 386. 1825 and *Indian. J. Exp.*

Biol. 35(12): 1310–1314. 1997

(Antiinflammatory and antipyretic.)

in India: gas-kollu

Rhynchosia heynei Wight & Arn. (*Rhynchosia coodoorensis* Bedd.)

India. Perennial non-climbing shrub

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 240. 1834 and *Pharmaceutical Biology* 47(11): 1067–1070. 2009

(Antimicrobial, essential oil obtained from the leaves by steam distillation.)

Rhynchosia himalensis Baker (*Rhynchosia himalensis* Benth. ex Baker)

Nepal, India, Himalaya. Perennial climbing herb, tender fruits cooked as vegetable

See *The Flora of British India* 2(4): 225. 1876

(Paste of roots applied on forehead to relieve headache.)

in China: xi ma la ya lu huo

in Nepal: ban simi

Rhynchosia hirta (Andrews) Meikle & Verdc. (*Cyanospermum tomentosum* (Roxb.) Wight & Arn.; *Cylista albiflora* Sims; *Cylista tomentosa* Roxb.; *Cylista villosa* Aiton; *Dolichos hirtus* Andrews; *Dolichos hirtus* Hort. ex DC.; *Rhynchosia albiflora* (Sims) Alston; *Rhynchosia albiflora* (Sims) Alston; *Rhynchosia cyanosperma* Baker; *Rhynchosia tomentosa* (Roxb.) Baill.)

Tropical Africa, India. Perennial climbing shrub, trailing, liana, robust, semi-woody, twining, leaning, herbaceous, scrambler, greenish-white to yellowish flowers in axillary racemes, standard white veined with red, seeds blue with white aril

See *Hortus Kewensis* (W. Aiton) 3: 36 (512). 1789 [7 Aug-1 Oct 1789], *Hortus Bengalensis*, or a catalogue ... 55. 1814, *Botanical Magazine* pl. 1859. 1816, *Prodr.* (DC.) 2: 389. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 260. 1834, *Flora of Tropical Africa* 2: 218. 1871, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(49): 387. 1883 and *Hand-Book Fl. Ceylon* 6: Suppl. 85. 1931, *Mémoires de la Société Botanique de France* 1953–54: 6. 1954, *Taxon* 16: 462. 1967, *J. Bombay Nat. Hist. Soc.* 82: 489–500. 1984

(For menstrual and gall bladder disorders.)

in India: hin-garadiya

in Malawi: namalopa

in Rwanda: inganigani, umuháruukú

in Sri Lanka: heen garadiya

Rhynchosia longeracemosa M. Martens & Galeotti (*Dolicholus longeracemosus* (M. Martens & Galeotti) Rose; *Dolicholus longiracemosus* (M. Martens & Galeotti) Rose; *Rhynchosia longiracemosa* M. Martens & Galeotti)

Mexico. Perennial non-climbing shrub

See *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 198–199. 1843 and *Contributions from the United States National Herbarium* 10(3): 101. 1906

(Toxic seeds. Poison, narcotic, divinatory, hallucinogen, aphrodisiac, for coughs, impotence.)

in Mexico: piule

Rhynchosia luteola (Hiern) K. Schum. (*Rhynchosia baumii* sensu Hauman; *Rhynchosia sericosemium* Harms; *Rhynchosia verdickii* De Wild.)

Tropical Africa. Perennial non-climbing shrub, yellowish brown flowers, velvety brown sticky pods

See *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 269. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie*

30: 91. 1901, *Just's botanischer Jahresbericht*. 27(1): 496. 1901, *Annales du musée du Congo*. Série 1, *Botanique*, sér. 4 1: 199. 1903, *Kunene-Sambesi-Expedition* 263. 1903, *Kew Bulletin* 25(1): 65–169. 1971

(Roots charred and the ashes rubbed for pneumonia. Bark decoction for dysentery.)

in Malawi: chitedze, matangaza, matema, mteme

Rhynchosia minima (L.) DC. (*Dolicholus flavus* Medik., nom. illeg.; *Dolicholus minimus* (L.) Medik.; *Dolicholus minimus* Medik.; *Dolichos medicagineus* Lam.; *Dolichos minimus* L.; *Glycine lamarckii* Kunth; *Glycine littoralis* DC.; *Glycine littoralis* M. Vahl ex DC., nom. nud.; *Glycine reflexa* Nutt.; *Rhynchosia aureo-guttata* Andersson; *Rhynchosia candollei* Decne.; *Rhynchosia ervoidea* DC.; *Rhynchosia exigua* Andersson; *Rhynchosia hockii* De Wild.; *Rhynchosia ischnoclada* Harms; *Rhynchosia mexicana* Steud.; *Rhynchosia mexicana* Hook. & Arn.; *Rhynchosia microphylla* Wall.; *Rhynchosia minima* DC.; *Rhynchosia minima* var. *diminifolia* Walraven; *Rhynchosia minima* var. *lutea* Eggers; *Rhynchosia minima* var. *pauciflora* Kuntze; *Rhynchosia nuda* DC.; *Rhynchosia punctata* DC.; *Rhynchosia rhombifolia* (Willd.) DC.; *Rhynchosia rhombifolia* (Willd.) DC. var. *timoriensis* DC.)

Old World, Tropics and Subtropics. Perennial non-climbing herb, twining or trailing annual, yellow flowers in short-peduncled racemes, flat pods, palatable pasture plant, leaves readily eaten by white-tailed deer and cattle

See *Species Plantarum* 2: 726. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 297. 1786, *Vorlesungen der Churpfälzischen physikalisch-ökonomischen Gesellschaft* 2: 354. 1787, *The Genera of North American Plants* [Nuttall]. 2: 115. 1818, *Nova Genera et Species Plantarum* (quarto ed.) Research.* 6: 155–157. 1992, *Journal of Applied Toxicology* 17(6): 391–395. 1997, *International Journal of Pharmaceutical Sciences and Nanotechnology* Volume 1, Issue 2, July–September 2008, *African Journal of Biotechnology* 8(5): 721–724. 2009

(Used in Sidha. Toxins. Seeds bitter and poisonous, molluscicide. Flowers, leaves and tubers for snakebite, insect bite and skin diseases; leaf infusion in piles and asthma; leaves decoction abortifacient. Roots infusion drunk for anemia; a mixture of water extract of roots of *Celastrus paniculatus*, *Helicteres isora*, *Imperata cylindrica* and *Rhynchosia minima* given as

an antidote for snake poison. Essential oil from leaves anti-fungal, antioxidant, antibiotic, antimicrobial, abortifacient, anthelmintic. For cerebral malaria, a cold infusion from a dry powdered mixture of aerial parts of the plant with aerial parts of *Indigofera asparagoides* Taub. (*Microcharis asparagoides* (Taub.) Schrire), *Antherotoma naudinii* Hook. f., *Cassia gracilior* (Ghesq.) Steyaert (*Chamaecrista gracilior* (Ghesq.) Lock), *Dissotis brazzae* Cogn., *Justicia matammensis* (Schweinf.) Oliv. (*Justicia anselliana* (Nees) T. Anderson) and *Pentas zanzibarica* (Klotzsch) Vatke. Toxic to fish.)

in English: horse rub down, jumby bean, least snoutbean, rhyngo, rhynchosia, ryncho

in Angola: oka kunde

in Malawi: nakamwazi

in Tanzania: mnkambi

in China: xiao lu huo

in India: baunhran, bettadaavare, bettavare, bharatbaal, chhoti bansen, chiri morio, chiri motio, chirimorio, dariavel, dhaktarangheveda, gaddi-chikkudu, gadichikkudukaya, gadichikudukaaya, gattavare, ghattadavare, ghattavare, kali, kaliyanatuvarai, kaliyantuvurai, kalta, kaltha, kalyanatuvarai, karunkunri, kattukkol, maha-wal-kollu, mashparui, mraalu vudathpani, mugriyal, nahani-kamalavel, nela alumu, nila alumu, trapan, tripanivel

in Japan: hime-no-azuki

in Sri Lanka: maha wal kollu

Rhynchosia nyasica Baker (*Rhynchosia imbricata* Baker)

Tropical Africa. Perennial non-climbing shrub, herb, erect, trailing, very sticky, keel greenish tinged with purple, wings golden yellow, banner yellow with dark purple veins

See *Bulletin of Miscellaneous Information Kew* 1897(128–129): 263. 1897

(Root decoction for bilharzia.)

in Malawi: mkhungudzu, mkhungusa

Rhynchosia pyramidalis (Lam.) Urb. (*Dolicholus phaseoloides* (Sw.) Kuntze; *Dolicholus phaseoloides* (Sw.) Rusby; *Dolicholus phaseoloides* (Sw.) Millsp.; *Dolicholus pyramidalis* (Lam.) Britton & Wilson; *Dolichos pyramidalis* Lam.; *Glycine phaseoloides* Sw.; *Rhynchosia phaseoloides* (Sw.) DC.; *Rhynchosia phaseoloides* (Sw.) DC. var. *precatorea* Griseb.; *Rhynchosia precatorea* (Humb. & Bonpl. ex Willd.) DC.)

Central America, Caribbean. Perennial climbing herb, vine, yellow flowers

See *Encyclopédie Méthodique, Botanique* 2(1): 296–297. 1786, *Nova Genera et Species Plantarum seu Prodromus* 105. 1788, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 755–756. 1809, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 385. 1825, *Catalogus plantarum cubensium*

[Appended by an analysis of "Lienzo de Santiago Guevea"] Tacubaya 1945, R. Gordon Wasson, "Notes on the Present Status of Ololiuhqui and the Other Hallucinogens of Mexico." *Botanical Museum Leaflets*—Harvard University. 20(6): 161–212. Nov. 22, 1963, *Amer. J. Bot.* 67: 595–602. 1980

(Toxic seeds. Poison, narcotic, divinatory, hallucinogen, aphrodisiac, for coughs, impotence.)

in English: virility vine

in Mexico: colorines, piule

Rhynchosia resinosa (A. Rich.) Baker (*Rhynchosia mildbraedii* Harms)

Tanzania. Perennial non-climbing shrub

(Leaves are mixed with leaves of *Croton macrostachyus* and *Vangueria acutiloba* and the infusion taken as a remedy to stomachache.)

in Tanzania: mnyafwali

Rhynchosia rufescens (Willd.) DC. (*Cyanospermum javanicum* Miq.; *Cylista suaveolens* Graham; *Flemingia rothiana* DC.; *Glycine pondicheriensis* Spreng.; *Glycine rufescens* Willd.; *Hallia trifoliata* Roth; *Lespedeza indica* Spreng.; *Lespedeza indica* Schindl.; *Rhynchosia rufescens* DC.)

India. Perennial non-climbing shrub, suberect or twining or climbing, yellow flowers in racemes, ovoid pods, causes green manure

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 222. 1803, *Novae Plantarum Species* 352. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 351, 387. 1825, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 196, 202. 1826, *A Numerical List of Dried Specimens* n. 5587. 1831, *Flora van Nederlandsch Indië* 1(1): 167. 1855 and *Repertorium Specierum Novarum Regni Vegetabilis* 9: 515. 1911

(Roots pounded in water and suspension given to cure dysentery.)

in China: dan hong lu huo

in India: kaattakolu, malaikollu, walmoyada

Rhynchosia suaveolens (L.f.) DC. (*Rhynchosia suaveolens* DC.)

India.

See *Supplementum Plantarum* 326. 1781, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 387. 1825 and *Indian Bot. Reporter* 9(1): 34–35. 1990

(Veterinary medicine, leaves and ginger made into a paste given to cure tympany.)

in India: adavi kandi

Rhynchosia sublobata (Schum.) Meikle (*Glycine sublobata* Schum.; *Glycine sublobata* Schumach. & Thonn.; *Rhynchosia caribaea* sensu auct.; *Rhynchosia inflata* Bojer, nomen nudum; *Rhynchosia sublobata* (Schumach. & Thonn.) Meikle; *Rhynchosia transjubensis* Chiov.)

Tropical Africa, Madagascar. Perennial non-climbing herb, twining, prostrate, scrambler, trailing, leaning, creeping, climber, scandent, vine, perennial woody rootstock, standard cream-white with red-purple lines, wings yellow, keel cream-white with red-purple tip, inflated fruits, weed, eaten by goats

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 384–385. 1825, *Beskrivelse af Guineiske planter* 347. 1827, *Hortus Mauritianus* 104. 1837 and *Flora Somala* 2: 169. 1932, *Kew Bulletin* 6(2): 176. 1951

(Roots decoction drunk by boys and girls when in puberty, for menstrual problems.)

in Madagascar: teloravina

in Malawi: chinyambata, mbuto yachule, mbutoyachule

in Rwanda: igikuyokuyo

Rhynchosia viscosa (Roth) DC. subsp. ***violacea*** (Hiern) Verdc. (*Dolichos violaceus* Hiern; *Rhynchosia violacea* (Hiern) K. Schum.)

India, Angola, Ghana. Perennial non-climbing herb, trailing or climbing, glandular-viscid, yellow flowers, pods with long yellow viscid hairs

See *Novae Plantarum Species* 349. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 387. 1825, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 269. 1896 and *Just's botanischer Jahresbericht*. 27(1): 496. 1901, *Kew Bulletin* 25(1): 86. 1971

(Leaf juice drunk during parturieny. Plant abortifacient.)

Rhynchosia volubilis Lour.

China, Japan. Perennial climbing herb, edible

See *Flora Cochinchinensis* 2: 460. 1790 and *Acta Bot. Austro Sin.* 7: 26–39, pl.1. 1991, *Biological & pharmaceutical bulletin* 24(12): 1443–1445. 2001, *Life Sci.* 78(1): 30–40. 2005, *Journal of the American Mosquito Control Association* 22(2): 292–295. 2006

(Seeds used on diabetes, to prevent postmenopausal osteoporosis, to improve the renal function, to treat constipation; eaten for a clear and better eye view. Antiproliferative, extract of the seeds. Essential oil mosquito larvicide.)

in English: drug bean

in China: lao tou, lu huo, lu tou, yeh lu tou

in Japan: tankiri-mame

in Korea: yak-kong

Rhynchospora Vahl Cyperaceae

Greek *rhynchos* and *spora*, *sporos* 'seed, spore', referring to the achenes; see *Flora Boreali-Americana* 1: 37. 1803, Martin H. Vahl (1749–1804), *M. Vahlilii ... Enumeratio Plantarum* 2: 229, 236. Hauniae (& Lipsiae) 1806, *Linnaea* 9(3): 295–297. 1834, *Annals of the Lyceum of Natural History of New York* 3: 359–361. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 2: 393. 1840, *Flora Brasiliensis* 2(1): 115, 134. 1842, *Synopsis Plantarum Glumacearum* 2: 155–156. 1854, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 7: 271. 1857, *Genera Plantarum* 3: 1059–1060. 1883 and *Bulletin of Miscellaneous Information: Additional Series* 8: 118–120. 1908, *Fieldiana, Bot.* 24(1): 90–196. 1958, *Fl. Gilmore, *Uses of Plants by the Indians ...* 32. 1991

(A strong decoction of the root taken as a remedy for kidney trouble; roots decoction used by women for uterine trouble; infusion of roots and bark emetic; root bark used to expel intestinal worms; poultice of bark used for swellings. Infusion of branches taken as antidote for poison. Magic, ritual, decoction of bark taken for fortune telling or divination.)

in English: American black currant, wild black currant

in North America: chap-ta-haza (Dakota), pezi nuga (Omaha-Ponca)

in China: mei zhou cha biao zi

Ribes aureum Pursh (*Chrysobotrya aurea* (Pursh) Rydb.; *Chrysobotrya aurea* Rydb.)

North America. Shrub, berries used for food

See *Flora Americae Septentrionalis*; or, ... 1: 164. 1814 [1813], *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 18. 1835, *Contributions from the U.S. National Herbarium* 5(2): 87–110. 1897 and *American Anthropologist* 11: 27–40. 1909, *Memoirs of the American Anthropological Association* 2(5): 331–405. 1911, *Flora of the Rocky Mountains* 399, 1062. 1917, *University of California Publications in American Archaeology and Ethnology* 33(3): 233–250. 1933, *University of California Publications in American Archaeology and Ethnology* 34: 246–345. 1936

(Dried, pulverized inner bark sprinkled on sores; decoction of inner bark taken for leg swellings.)

in English: golden currant

Ribes aureum Pursh var. **villosum** DC. (*Ribes odoratum* H. Wendl.)

North America. Shrub, fruits eaten for food

See *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 483. 1828 and *Papers of the Michigan Academy of Science, Arts and Letters* 25: 517–542. 1940

(Snakebite remedy, poultice of plant parts applied to snakebites. Hunting and fishing item, stems used to make arrows.)

in English: buffalo currant, golden currant

Ribes bracteosum Douglas (*Ribes bracteosum* Dougl. ex Hook.; *Ribes bracteosum* Douglas ex Bong.)

North America, British Columbia. Shrub, fruits used for food, forage, berries eaten by bears

See *Mém. Acad. Imp. Sci. St.-Pétersbourg, Sér. 6, Sci. Math.* 2: 138. 1832 [Aug 1832] and *National Museum of Canada Bulletin* 56: 47–68. 1929, *Economic Botany* 25(1): 63–104, 335–339. 1971, *Syesis* 6: 193–220. 1973, *Economic Botany* 27: 257–310. 1973

(Decoction of berry taken for gonorrhoea; berries eaten as a laxative; berries could cause stomachache; roots used as a birthing aid. Plant used for impetigo; infusion of stems given to children for colds.)

in English: stink currant

Ribes cereum Dougl. (*Ribes reniforme* Nutt.; *Ribes viscidulum* A. Berger)

North America. Shrub, fruits used for food, forage, berries eaten by grouse and pheasant

See *Transactions of the Horticultural Society of London* 7(4): 512–514. 1830, *American Anthropologist* 9: 14–21. 1896, *Contributions from the U.S. National Herbarium* 5(2): 87–110. 1897 and *University of California Publications in*

American Archaeology and Ethnology 31(3): 67–210. 1932, *Botanical Museum Leaflets (Harvard University)* 8(8): 153–168. 1940, *Tebiwa* 9(1): 45–51. 1966

(Fruit emetic; branches decoction pediatric aid. Gastrointestinal aid, used for stomach pains; berries eaten for diarrhea. Infusion of inner bark used to wash sore eyes. Hunting and fishing item, stems made into arrow shafts.)

in English: wax currant

Ribes cereum Dougl. var. **pedicellare** A. Gray (*Ribes cereum* var. *inebrians* (Lindl.) C.L. Hitchc.; *Ribes cereum* var. *pedicellare* Brewer & S. Wats.; *Ribes inebrians* Lindl.)

North America. Shrub, fruits eaten fresh

See *Geological Survey of California, Botany* 1: 207. 1876 and *Wisconsin Archeologist* 8: 143–61. 1929, *University of New Mexico Bulletin* 4(1): 1–44. 1935, *Plateau* 18: 18–20. 1943, *Papers of the Peabody Museum of American Archaeology and Ethnology* 40(4): 1–94. 1952

(Poultice of plant applied to sores. Emetic. Ceremonial medicine. Hunting and fishing item, stems made into arrow shafts.)

in English: whisky currant

Ribes cynosbati L. (*Grossularia cynosbati* (L.) Mill.; *Ribes cynosbati* L. var. *atrox* Fernald; *Ribes cynosbati* var. *glabratum* Fernald; *Ribes cynosbati* var. *inerme* (Rehder) L.H. Bailey; *Ribes huronense* Rydb.)

North America, Canada, Japan. Shrub, fruit used fresh

See *Species Plantarum* 1: 202. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *The Gardeners Dictionary*: ... eighth edition *Grossularia* no. 5. 1768 and *Bulletin of the Public Museum of the City of Milwaukee* 4: 1–174, 175–326, 327–525. 1928, *Bulletin of the Public Museum of the City of Milwaukee* 7: 1–230. 1933, *Rhodora* 87: 220. 1985

(Roots gynecological aid, root bark a uterine remedy; roots infusion for sore eyes.)

in English: eastern prickly gooseberry

Ribes divaricatum Dougl. (*Grossularia divaricata* (Douglas) Coville & Britton; *Ribes divaricatum* var. *glabriflorum* Koehne; *Ribes divaricatum* var. *rigidum* M. Peck; *Ribes suksdorfii* A. Heller)

North America, Canada. Shrub, ripe black juicy berries used for food

See *Transactions of the Horticultural Society of London* 7(4): 515–516. 1830 and *Contributions from the U.S. National Herbarium* 7: 295–408. 1902, *North American Flora* 22(3): 224. 1908, *Memoirs of the American Anthropological Association* 2(5): 331–405. 1911, *National Museum of Canada Bulletin* 56: 47–68. 1929, *Anthropological Records* 13(6): 377–392. 1952, *Economic Botany* 25(1): 63–104, 335–339. 1971,

(Burned stems rubbed on neck sores. Stiff, sharp thorns used as probes for boils and for removing splinters. Roots used with wild cherry roots to wash newborn children for intelligence. Decoction of bark or root used as an eyewash for soreness; infusion of bark used as an eyewash; inner bark chewed and juice swallowed for colds and for sore throats; infusion of roots taken for venereal disease; roots boiled for sore throats and tuberculosis.)

in English: spreading gooseberry

Ribes glaciale Wall. (*Ribes glaciale* var. *glandulosum* Jancz.)

China, India. Shrub, edible fruits

See *Flora Indica*; or descriptions of Indian Plants 2: 513. 1824 and *Bulletin International de l'Académie des Sciences de Cracovie: Classe des Sciences Mathématiques et Naturelles* 1910: 4. 1910

(Root paste as an ointment to cure eye diseases.)

in China: bing chuan cha biao zi

in India: darbag

Ribes himalense Royle ex Decne. (*Ribes himalayense* Royle ex Decne.; *Ribes himalense* Royle; *Ribes himalense* Decne.)

India. Shrub, edible fruits

See *Voyage dans l'Inde* 4(Bot.): 66, pl. 77. 1844

(Paste of roots as an ointment to cure eye diseases. Leaves for dysentery, cuts and wounds.)

in China: tang cha biao zi

in India: kaladani, kimkolia

Ribes hirtellum Michx. (*Grossularia hirtella* (Michx.) Spach; *Grossularia hirtella* (Michx.) Coville & Britton; *Ribes gracile* Jancz.; *Ribes hirtellum* var. *calcicola* (Fernald) Fernald; *Ribes hirtellum* var. *saxosum* (Hook.) Fernald; *Ribes oxyacanthoides* L. var. *calcicola* Fernald; *Ribes oxyacanthoides* var. *hirtellum* (Michx.) Scoggan; *Ribes oxyacanthoides* var. *saxosum* (Hook.) Coville)

North America, Canada. Shrub, berries used for food

See *Contributions from the U.S. National Herbarium* 5(2): 87–110. 1897

(Tonic.)

in English: American gooseberry, currant gooseberry, hairystem gooseberry, low wild gooseberry, northern gooseberry, smooth gooseberry

Ribes hudsonianum Richardson

North America, British Columbia. Shrub, berries used for food, forage, berries eaten by bears

See *Narrative of a Journey to the Polar Sea* (ed. 2) 734–735. 1823 and *Wisconsin Archeologist* 7(4): 230–248. 1928, *Economic Botany* 25(1): 63–104, 335–339. 1971, *Syesis* 8: 29–51. 1975, *Taxon* 31(2): 344–360. 1982

(Decoction of stem sections alone or with wild gooseberry stems used for sickness after childbirth; infusion of branches for colds; decoction of stems and leaves taken for colds, sore throats and stomach troubles; roots and decoction of leaves and berries taken for sickness; roots for tuberculosis; raw currants eaten for colds.)

in English: Hudson Bay currant, northern black currant

Ribes indecorum Eastw. (*Ribes malvaceum* Sm. var. *indecorum* (Eastw.) Jancz.)

North America. Shrub, woody, creamy white corolla

See *The Cyclopaedia*; or, universal dictionary of arts, ... 30(1): *Ribes* no. 13. 1819 [1815] and *Proceedings of the California Academy of Sciences, Series 3*, 2(7): 243–244, pl. 23, f. 3a-b. 1902, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 35(3): 325. 1907, *University of California Publications in American Archaeology and Ethnology* 8(4): 187–234. 1908

(Roots used for toothaches.)

in English: whiteflower currant

Ribes lacustre (Pers.) Poir. (*Limnobotrya lacustris* (Pers.) Rydb.; *Ribes lacustre* var. *parvulum* A. Gray; *Ribes oxycanthoides* L. var. *lacustre* Pers.)

North America, British Columbia. Perennial shrub, spreading, cream flowers, glandular fruits, berries used for food

See *Syn. Pl.* 1: 252. 1805, *Encyclopédie Méthodique, Botanique* Suppl. 2(2): 856. 1812 and *Memoirs of the American Anthropological Association* 2(5): 331–405. 1911, *National Museum of Canada Bulletin* 56: 47–68. 1929, *Economic Botany* 25(1): 63–104, 335–339. 1971, *Syesis* 6: 193–220. 1973, *Syesis* 8: 29–51. 1975, *Taxon* 31(2): 344–360. 1982, *Northwest Anthropological Research Notes* 23(1): 35–52. 1989

(Plant and stiff sharp thorns considered poisonous; thorns used as probes for boils and for removing splinters. Bark decoction taken during childbirth, and also a wash for sore eyes. Twigs decoction taken for body aches; branches decoction taken for diarrhea and colds; wood decoction for stomachache. Leaves or bark chewed and applied on sores caused by the pricklers of plant; roots decoction taken for constipation. Ritual, magic, ceremonial, used as a deterrent against snakes, roots used with wild cherry roots to wash newborn children.)

in English: bristly black currant, prickly currant, swamp black currant

Ribes laxiflorum Pursh (*Ribes coloradense* Coville)

North America, Canada. Shrub, vine, berries used for food

See *Flora Americae Septentrionalis*; or, ... 2: 731. 1814 [1813] and *National Museum of Canada Bulletin* 56: 47–68. 1929, *Economic Botany* 25(1): 63–104, 335–339. 1971, *Syesis* 6: 193–220. 1973, *Economic Botany* 27: 257–310. 1973, *Syesis* 8: 29–51. 1975, *Northwest Anthropological Research Notes* 23(1): 35–52. 1989

(Roots and branches infusion used as an eyewash. Leaves and twigs decoction taken as a general tonic; bark decoction for cold; bark and roots decoction taken for tuberculosis.)

in English: trailing black currant

Ribes lobbii Gray (*Grossularia lobbii* (A. Gray) Coville & Britton)

North America, Canada. Shrub, berries used for food

See *American Naturalist* 10(5): 274. 1876 and *North American Flora* 22(3): 217. 1908, *Economic Botany* 25(1): 63–104, 335–339. 1971, *Economic Botany* 27: 257–310. 1973

(Roots used for diarrhea; poultice of roots applied to sores, boils, mouth sores and blisters; thorns used for boils and for removing splinters. Ritual, magic, ceremonial, roots used with wild cherry roots to wash newborn children.)

in English: gummy gooseberry

Ribes malvaceum Sm. (*Ribes malvaceum* var. *clementinum* Dunkle; *Ribes watkinsii* Eastw.)

North America. Shrub, berries used for food

See *The Cyclopaedia*; or, universal dictionary of arts, ... 30(1): *Ribes* no. 13. 1819 [1815] and *University of California Publications in American Archaeology and Ethnology* 8(4): 187–234. 1908, *Bulletin of the Southern California Academy of Sciences* 42(1): 32. 1943

(Roots used for toothaches.)

in English: chaparral currant

Ribes oxycanthoides L. (*Grossularia oxycanthoides* (L.) Mill.)

North America, Canada. Shrub, berries used for food

See *Species Plantarum* 1: 201. 1753, *The Gardeners Dictionary*: ... eighth edition no. 4. 1768 and *Memoirs of the American Anthropological Association* 2(5): 331–405. 1911, *Wisconsin Archeologist* 7(4): 230–248. 1928, *Rhodora* 87: 228. 1985

(Stems and wild black currant stems decoction used for sickness after childbirth; berries decoction analgesic.)

in English: Canada gooseberry, Canadian gooseberry

Ribes oxycanthoides L. subsp. *irriguum* (Douglas) Q.P. Sinnott (*Grossularia irrigua* (Douglas) Coville & Britton; *Grossularia nonscripta* A. Berger; *Ribes divaricatum* Douglas var. *irriguum* (Douglas) A. Gray; *Ribes irriguum* Douglas; *Ribes leucoderme* A. Heller; *Ribes nonscripta* (A. Berger) Standl.; *Ribes oxycanthoides* var. *irriguum*

(Douglas) Jancz.; *Ribes oxycanthoides* var. *leucoderme* (A. Heller) Jancz.)

North America, Canada. Shrub, berries used for food, forage, berries eaten by bears

See *Transactions of the Horticultural Society of London* 7(4): 516. 1830. and *Rhodora* 87(850): 233. 1985

(Roots decoction taken for stomachache; berries decoction analgesic.)

in English: Idaho gooseberry

Ribes pinetorum Greene (*Grossularia pinetorum* (Greene) Coville & Britton)

North America. Shrub, erect, armed with recurved thorns, leaves glandular, berries eaten

See *Botanical Gazette* 6(1): 157. 1881 and *North American Flora* 22(3): 217. 1908, *University of New Mexico Bulletin* 4(5): 1–63. 1936, *Papers of the Peabody Museum of American Archaeology and Ethnology* 40(4): 1–94. 1952

(Ceremonial, leaves emetic. Stems and thorns used to make arrow shafts and points.)

in English: orange gooseberry

Ribes rotundifolium Michx. (*Grossularia rotundifolia* (Michx.) Coville & Britton; *Ribes stamineum* Hornem.; *Ribes triflorum* Willd.)

North America. Shrub, berries eaten

See *Flora Boreali-Americana* 1: 110–111. 1803 and *Flora North America Report(s)* 22(3): 223. 1908

(Bark infusion taken for diarrhea, measles; leaves infusion sedative. Magic, ritual, bark decoction taken for divination.)

in English: Appalachian gooseberry

Ribes rubrum Linnaeus (*Ribes rubrum* var. *sativum* Rchb.; *Ribes sativum* Syme; *Ribes scandicum* Hedlund; *Ribes spicatum* E. Robson; *Ribes sylvestre* Syme; *Ribes sylvestre* (Lam.) Mert. & W.D.J. Koch; *Ribes vulgare* Lam.; *Ribes vulgare* var. *macrocarpum* Jancz.; *Ribes vulgare* var. *sylvestre* Lam.)

Europe. Shrub, berries eaten

See *Sp. Pl.* 1: 200. 1753 and *Botaniska Notiser* 99. 1901, *Wisconsin Archeologist* 7(4): 230–248. 1928

(Leaves contain the toxin hydrogen cyanide. Plant febrifuge, tonic, depurative, stomachic, digestive, diuretic, laxative, astringent, antirheumatic, antiscorbutic, sialagogue. Used externally to relieve rheumatic symptoms; fruits purgative, laxative, astringent, eaten for upset stomach.)

in English: cherry-currant, cultivated currant, garden red currant, garnetberry, red currants, redcurrant, white currant, wineberry

in China: hong cha biao zi

in India: dak, kinkolia, phulanch

Ribes triste Pall. (*Coreosma tristis* (Pall.) Lunell; *Ribes albinervium* Michaux; *Ribes melancholicum* Sievers ex Pallas; *Ribes propinquum* Turczaninow; *Ribes rubrum* L. var. *alaskanum* (A. Berger) B. Boivin; *Ribes rubrum* L. var. *propinquum* (Turcz.) Trautv. & C.A. Mey.; *Ribes triste* Turcz.; *Ribes triste* Pall. var. *albinervium* (Michx.) Fernald; *Ribes triste* var. *triste*)

North America, Canada. Perennial shrub, berries eaten

See *Species Plantarum* 1: 200–202. 1753, *Nova Acta Academiae Scientiarum Imperialis Petropolitanae. Praecedit Historia ejusdem Academiae* 1(Hist.): 238. 1797, *Nova Acta Acad. Sci. Imp. Petrop. (Abortifacient. Decoction of root and stalk taken for urinary troubles; stems decoction, without the bark, a wash for sore eyes.)

in English: red currant, swamp red currant

in China: ai cha biao zi

Ribes uva-crispa L.

Europe.

See *Species Plantarum* 1: 201. 1753 and *Nordic J. Bot.* 22: 73. 2002

(Tonic, cathartic.)

in English: English gooseberry, European gooseberry, feaberry, gooseberry

in India: amlanch, baikunti

Ribes uva-crispa L. var. ***sativum*** DC. (*Grossularia reclinata* (L.) Mill.; *Ribes grossularia* L.; *Ribes uva-crispa* subsp. *reclinatum* (L.) Rchb.)

Europe. Shrub, perennial, noxious, pest

See *Journal of Ethnopharmacology* 1: 49–68. 1979

(Cathartic, bark and roots used as a physic.)

in English: European gooseberry

Ribes viscosum Ruiz & Pav. (*Coreosma dombeyana* Spach; *Ribes dombeyanum* Spach; *Ribes glandulosum* Grauer ex Weber; *Ribes glandulosum* Grauer; *Ribes glandulosum* Ruiz & Pav.; *Ribes peruvianum* Jancz.; *Ribes praecox* J.F. Macbr.; *Ribes prostratum* L'Hér.; *Ribes resinum* Pursh)

North America. Shrub, fruit used for food, stem used to make a bitter tea

See *Plantarum Minus Cognitarum Decuria* 2. 1784, *Flora Peruviana* 3: 13, pl. 233. 1802, *Ann. Sci. Nat.* vol. 2. 4: 25. 1835 and *Bulletin International de l'Académie des Sciences de Cracovie: Classe des Sciences Mathématiques et Naturelles* 1905: 759. 1905, *Field Mus. Trop. & Subtrop. America. Hispid herb, white flowers, edible by cattle

See *Species Plantarum* 1: 330. 1753, *Flora Peruviana* 3: 50. 1802, *Nova Genera et Species Plantarum* (quarto ed.) 3: 350, t. 279. 1819, *Plantes Usuelles des Brésiliens* 8: 1. 1824, *Historia Fisica Política y Natural de la Isla de Cuba, Botanica* 2: 31. 1853, *Flora of Tropical Africa* 3: 242. 1877, *Fl. Mexic.*, ed. 2: 83. 1894 and *Brittonia* 26: 282. 1974, *Brittonia* 57: 133. 2005

(Roots emetic, diaphoretic.)

in English: false ipecac, Florida pusley, Mexican clover, undulated ipecac

Ricinodendron Müll.Arg. Euphorbiaceae

Ricinus plus the Greek *dendron* ‘a tree’, referring to the leaves, see *Flora* 47: 533. 1864 and *Forest Fl. Port. E. Afr.*: 103. 1909.

Ricinodendron heudelotii (Baill.) Heckel (*Jatropha heudelotii* Baill.; *Ricinodendron heudelotii* (Baill.) Pierre ex Pax)

Tropical Africa. Deciduous tree

See *Adansonia* 1: 64. 1860, *Annales de l'Institut Botanique-Géologique Colonial de Marseille* 5(2): 40. 1898

(Latex and leaves purgative, anthelmintic, for Guinea worm extraction. Roots used to treat diarrhea, anemia and constipation. Bark, root, seeds, protection against evil spirits.)

Ricinodendron heudelotii (Baill.) Heckel subsp. ***africanum*** (Müll.Arg.) J. Léonard (*Barrettia umbrosa* Sim; *Ricinodendron africanum* Müll.Arg.; *Ricinodendron gracilius* Mildbr.)

Tropical Africa. Deciduous tree, straight trunk, spreading rounded crown, whorled branches arching upwards, at the base of the leaf stalk fan-shaped persistent leafy stipules, small green-white-yellow flowers, capsules 2–3 lobed slightly fleshy and smelling of rotten apples, red-brown-black seeds, edible oil from the seeds

See *Species Plantarum* 2: 1006–1007. 1753, *Adansonia* 1: 64. 1860, *Flora* 47: 533. 1864 and *Annales de l'Institut Botanique-Géologique Colonial de Marseille* 5(2): 40. 1898 and *Forest Flora and Forest Resources of Portuguese East Africa* 103. 1909, *Das Pflanzenreich Euph.* 3: 46, f. 13, C-D, & 16. 1911, *Bulletin du Jardin Botanique de l'État* 31: 398. 1961

(Used for anemia. Roots used to treat diarrhea and constipation. Bark, root, seeds, protection against evil spirits.)

in English: cork-wood tree

in Cameroon: andjejang, avemp, bosisang, djansan, eko, esang, essang, essesang, essessang, gobo, n'gaha, n'zoo aille, njangsang, njansang, njouli, nyangsang, osok, timboa moundanga, wonjangasanga, wonjasanga

in Central Africa: musodo

in Congo: isongo, kingela, kitililundu, masongo, moboto, mongongome, mulela, musonga, peke, sanga-sanga

in Gabon: engessan, ensesang, enzesang, esoang, essang, essasang, essegang, essesang, essessang, gesanga, gesantgala, issanguila, mosongo, mugela, mughele, mundzangala, mungembe, ngele, nsasanga, osongosongo, ozaneguilia, ozangilya

in Ghana: anwama, assomah, epuwi, ewai, ewan, kpedi, ngwama, nwuama, okao koodo, okuduru, onwama, onwana, oua oua, owama, wama, wamba, sosali

in Ivory Coast: agqui, eho, haipi, hapi, hobo, hoho, mbob, nbor, oho, poposi, popossi, sosau, tsain

in Liberia: gbolei, koor

in Nigeria: awmawdan, bisse, bissi, bonjangsang, bonjasanga, eke, ekwo, erimado, erinmado, erinmodan, es-es-ang, esang, gayio kimi, ishang, isisang, jan-jang, njansang, nsa-sana, ogbodo, okengbo, okhuen, okhuen nebo, okhui, okingbo, okponum, okpunum, okue, okwe, okwen, okwenseba, omodon, ookwe, ovovo, poposi, potopoto, putu-putu, putuputu, wawankurmi, wonjangasanga; wawanputu kurmi (Hausa); erinmado (Yoruba); okhuen (Edo); eke (Urhobo); okengbo (Ijaw); okwe (Igbo); okue (Itsekiri)

in Tanzania: maua, mkangaula, mkungunolo, mtondoro, mtwatwa, muawa, nnjunju, sitobaga

in Uganda: kishongo, musodo

in W. Africa: assomah, bon jasanga, kingele

in Yoruba: ajagbo, erinmado, erinmodan, ologbo igbo, oro, omodan, potopoto, putuputu

Ricinus L. Euphorbiaceae

Latin *ricinus* for a thick, tick, a louse, a kind of vermin that infests sheep and dogs, etc. (see Marcus Porcius Cato and Marcus Terentius Varro), referring to the seeds; C. Plinius Secundus used the name for this genus, for a plant called also *cici* and *croton*, and for the germ of the mulberry; Latin *cicinus* ‘an aperient oil expressed from the fruit of the *cici*, castor-oil’, *cici* ‘an Egyptian tree, *palma Christi* or castor-oil tree, also called *croton*’; Greek *kiki* ‘castor-oil, the castor-oil tree’, *kikinos* ‘made from the kiki-tree’, *kikion elaiou*; see Carl Linnaeus, *Species Plantarum*. 2: 1007. 1753, *Genera Plantarum*. Ed. 5. 437. 1754 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, *Annals of the Missouri Botanical Garden* 75(3): 1087–1144. 1988, Salvatore Battaglia, *Grande dizionario della lingua italiana*. J. Pathol., 151: 221–229. 1987, *Acta Botanica Boreali-Occidentalia Sinica* 7: 246–251. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Informatore Botanico Italiano* 20: 637–646. 1988, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Biologia* 48: 441–445. 1993, *Candollea* 48(1): 221–230. 1993, *Cytologia* 64: 229–234. 1999, *Ecología en Bolivia* 34: 45–70. 2000, Ajose, Frances O. A. “Some Nigerian plants of dermatologic importance.” *International Journal of Dermatology*, vol. 46, Suppl. 1, pp. 48–55. 2007

(Used in Ayurveda, Unani and Sidha. The seeds (and to a much lesser extent the leaves) contain ricin, a protein, which is highly toxic in small quantities. Humans as well as cattle, dogs, goats, horses, poultry, rabbits, sheep, and swine have been poisoned after ingesting the seeds. Humans who ingested the seeds became ill and died. The toxin has been used for suicide and assassination. Two to four chewed seeds can cause death in children. DO NOT ALLOW THESE PLANTS TO SET SEEDS!! Purgative, astringent and emollient, laxative, antiviral. Leaves are tied on forehead to relieve headache; a poultice of seeds of *Brassica napus* with roots of *Moringa oleifera* is applied on rheumatic pain and covered with leaves of *Ricinus communis*; leaf paste applied locally in case of piles; tender leaf decoction along with the whole plants of *Phyllanthus fraternus* and *Eclipta alba* given for the treatment of jaundice and liver diseases; leaf extract mixed with milk and given to cure jaundice; leaves extract of *Ricinus communis*, *Calotropis procera* and *Ocimum sanctum* taken to cure jaundice. Roots for toothache, a decoction from the boiled roots taken for abdominal troubles and as an appetite stimulant; a decoction of flowers of *Mesua ferrea* with stems of *Tolypanthus involucreatus* and roots of *Ricinus communis* given in bodyache; root decoction along with roots of *Cassia fistula* given for rheumatism, rheumatoid arthritis; root juice given in early months of pregnancy as abortifacient. The juice from pounded stem and leaves a remedy for ulcers, earache, diarrhea and stomachaches. Inside of fruit roasted, pounded, boiled to make oil used as body lotion. Sacred plant, used in religion and magico-religious beliefs, very effective against evil magic, to protect a woman during menstruation period. Veterinary medicine, ground seeds applied on sprains; leaves paste applied on swellings and wounds.)

in English: castor bean, castor bean tree, castor oil, castor oil bush, castor oil plant, castor oil tree, castor seed tree, castor seeds, palma Christi, red castor oil plant, wonder tree

Rinorea Aublet Violaceae

Meaning quite obscure, or from a vernacular name in French Guinea, or from the Greek *rhis*, *rhinos* 'nose' and *oros* 'hill, mountain', or referring to the anthers; see Jean Baptiste Christophore Fusée Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 1: 235, t. 93. Paris 1775, *Histoire des Végétaux Recueillis dans les Isles Australes d'Afrique* 55, 57, t. 17, f. 1. 1805 and *Mém. Inst. Sci. Madagascar, Sér. B, Biol. Vég.* 2(2): 311–331. 1949.

Rinorea arborea (Thouars) Baill. (*Alsodeia arborea* Thouars; *Rinorea arborea* Baill.; *Rinorea arborea* Kuntze)

Tropical Africa.

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 583. 1886, *Revis. Gen. Pl.* 1: 42. 1891

(Roots for abdominal pain and fevers.)

Rinorea bengalensis (Wall.) Kuntze (*Alsodeia bengalensis* Wall.; *Alsodeia wallichiana* Hook. f. & Thomson; *Rinorea bengalensis* (Wall.) Gagnep.; *Rinorea glandulosa* Merr.; *Rinorea wallichiana* (Hook. f. & Thomson) Kuntze)

India. Shrub

See *Histoire des Végétaux Recueillis dans les Isles Australes d'Afrique* 55. 1805, *Transactions of the Medical and Physical Society of Calcutta* 7: 224. 1864, *The Flora of British India* 1(1): 187. 1872, *Revisio Generum Plantarum* 1: 42. 1891 and *Observationes Botanicae* 1: 190. 1939

(Leaves pounded and rubbed on face to treat headache. Bark paste applied on chest, also a solution given to treat chest pain, colds, cough and dysentery.)

in China: san jiao che

in India: tavo

Rinorea flavescens (Aubl.) Kuntze (*Alsodeia flavescens* (Aubl.) Spreng.; *Conohoria flavescens* Aubl.)

French Guiana.

See *Histoire des plantes de la Guiane Française* 1: 239, t. 95. 1775, *Systema Vegetabilium*, editio decima sexta 1: 806. 1824, *Revisio Generum Plantarum* 1: 42. 1891 and *Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 56–82. 1941

(Bark febrifuge, astringent, bitter.)

Rinorea macrophylla (Decne.) Kuntze

India.

See *Revisio Generum Plantarum* 1: 42. 1891

(Bark and leaves powdered and made into paste and applied on breast to promote lactation.)

in India: gene, takhkho

Rinorea sclerocarpa (Burgersdijk) M. Jacobs (*Rinorea sclerocarpa* Melch.)

Indonesia. Tree

See *Histoire des plantes de la Guiane Française* 1: 235, pl. 93. 1775

(Roots boiled and included in a preparation applied externally to musculo-skeletal disorders.)

in Indonesia: aging

Ritchiea R. Br. ex G. Don f. Capparaceae (Capparidaceae)

Named after the British explorer and traveller Joseph Ritchie, d. 1821, surgeon and plant collector in Africa, who attempted to determine the course of the Niger River; see George Francis Lyon (1795–1832), *A Narrative of Travels in Northern Africa, in the years 1818, 1819, and 20*, accompanied by geographical notices of Soudan, and of the course of the Niger. London, 1821, Denham, Clapperton and Oudney, *Narrative of Travels and discoveries in Northern and Central Africa. 1822–1824*. [Botany by R. Brown.] London, 1826, Hugh Clapperton and Richard Lander, *Journal of a Second Expedition into the Interior of Africa from the Bight of Benin to Soccatoo ... to which is added, the Journal of Richard Lander from Kano to the Sea-coast*. Philadelphia, 1829 (1st American edition; first published in London in the same year), Don, George (1798–1856), *A General History of the Dichlamydeous Plants* 1: 225, 270, 276–277. London, 1831–1838, Robert Huish, *The Travels of Richard and John Lander ... for the discovery of the course ... of the Niger, ... with a prefatory analysis of the previous travels of Park, Denham, Clapperton, Adams, G.F. Lyon, J. Ritchie, etc. into the hitherto unexplored countries of Africa*. London, 1836, Richard and John Lander, *Journal of an Expedition to Explore the Course and Termination of the Niger*. NY: Harpers Family Library, 1836, William Henry Giles Kingston, *Travels of Mungo Park, Denham, and Clapperton*. London, [1886].

Ritchiea albersii Gilg (*Ritchiea balbi* Chiov.; *Ritchiea chlorantha* Gilg; *Ritchiea mildbraedii* Gilg; *Ritchiea penaphylla* auct.; *Ritchiea stella-aethiopica* Pax)

Africa tropical. Shrub or small tree, many-branched, short thick trunk, stems arising from underground tubers, flowers cream-white, inflorescence terminal on long leafy branches, racemose inflorescences terminal or axillary, linear clawed petals, grooved pendulous capsules, tuber famine food, roots boiled and eaten during food scarcity, forest margin, montane forest

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 208. 1903

(The tubers are known to be toxic if not well prepared. Leaves used as medicine for stomachache and for snakebites.)

in Tanzania: lubalilo, mdudu, mtunguru, mwaza-njama, mwoza-nyama, punkukuma

Ritchiea capparoides (Andrews) Britten (*Crateva capparoides* Andrews; *Ritchiea albersii* Gilg; *Ritchiea capparoides* Britten)

Tropical Africa, Ghana, Tanzania. Shrub, liana or lianescent, climbing, stem with brown lenticels, peeling thin bark, petals cream, flowers with sugary fragrance, fruit green with white seeds

See *Species Plantarum* 1: 444. 1753, *Flora Cochinchinensis* 328, 342. 1790, *Botanist's Repository*, for new, and rare plants t. 176. 1801, *A General History of the Dichlamydeous Plants* 1: 270, 276. 1831 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 208. 1903, *Journal of Botany, British and Foreign* 55: 279. 1917

(Roots poisonous, used for sleeping sickness, filariasis, Guinea worm.)

Ritchiea reflexa (Thonn.) Gilg & Gilg-Ben. (*Capparis reflexa* Thonn. & Schum.; *Capparis reflexa* Thonn.; *Ritchiea reflexa* Gilg & Gilg-Ben.)

Tropical Africa. Lianescent shrub, vine, leaves papery coriaceous, white flowers, orange fruits

See *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 4: 11. 1828, *Flora of Tropical Africa* 1: 98. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 183. 1915

(Roots antiinflammatory, anthelmintic, analgesic, earache remedy.)

Rivea Choisy Convolvulaceae

For the Swiss physician Auguste de la Rive or from the Latin *rivus* 'a small stream of water'; see *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 6: 407, 409. 1833, *Flora Telluriana* 4: 81. 1838, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie*

18: 156. 1893 and Blas Pablo Reko, *Mitobotánica Zapoteca*. [Appended by an analysis of "Lienzo de Santiago Guevea"] Tacubaya 1945, *Taxon* 6: 151. 1957, R. Gordon Wasson, "Notes on the Present Status of Ololuhqui and the Other Hallucinogens of Mexico." from *Botanical Museum Leaflets, Harvard University*. 20(6): 161–212. 1963, *J. Cytol. Genet.* 13: 99–106. 1978, M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 300. Dehra Dun 1985, *Edinburgh Journal of Botany* 64: 213–223. 2007.

Rivea hypocrateriformis Choisy

India.

See *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 6: 408. 1833 and *J. Cytol. Genet.* 13: 99–106. 1978

(Used in Sidha. Plant juice used in piles, on boils and swellings. Crushed leaves applied as antiinflammatory, astringent, anodyne, antiseptic, in skin diseases; leaves eaten as vegetable as blood purifier, in erysipelas. Root decoction taken with milk to check spermatorrhea.)

in India: ajantsi, ajara, aparajita, bainaryshak, ban pui, boddi gida, boddi tige, boddikoora, boddikura, boddithige, bodditige, boorditiga, dzungaru, faang, fang, gwal-kakri, jirna, jirnadaru, junjura, kalmilat, kindupata, kusum, muchuttai, mucuntai, mucuttai, mucuval, mucuvarkoti, musuttai, neer boddi, neeruboddi, niruboddi, ondranoi, padma, phand, phang, phanji, phanjika, rotabel, sukshmapatra, supushpika, takaria alu, vatta thiruppi

Rivea ornata (Roxb.) Choisy (*Argyreia ornata* (Roxb.) Sweet; *Convolvulus dinteri* Pilg.; *Convolvulus multifidus* Hallier f.; *Convolvulus ocellatus* var. *ornatus* (Engler) A. Meeuse; *Convolvulus ornatus* (Roxb.) Wall.; *Lettsomia ornata* Roxb.; *Rivea ornata* Aitch.; *Rivea ornata* var. *griffithii* C.B. Clarke; *Rivea roxburghii* Prain ex Brandis)

India, Sri Lanka. Woody climber, stout, white flowers, persistent calyx deeply 5-lobed, indehiscent globose shining fruit

See *Species Plantarum* 1: 153–159. 1753 and *The Wealth of India. A Dictionary of Indian Raw Materials and Industrial Products*. (Raw Materials 9). Council Scientific Industrial Research, New Delhi. 1972, *Industrial Crops and Products* 12(2): 93–96. 2000

(Used in Ayurveda and Sidha. Tonic. A source of vernolic acid.)

in India: ajantsi, ajara, aparajita, boddi gida, boddi tige, boddithige, bodditige, jirna, jirnadaru, muchuttai, mucuntai, mucuttai, mucuval, mucuvarkoti, musuttai, ondranoi, padma, phand, phang, phanji, phanjika, sukshmapatra, supushpika, takaria alu, vatta thiruppi

Rivina L. Phytolaccaceae (Petiveriaceae)

Named for the German (b. Leipzig) botanist Augustus Quirinus Rivinus (Bachmann), 1652–1723 (d. Leipzig),

physician, M.D. Helmstedt 1676 and Leipzig 1677, professor of botany and physiology, professor of therapy, author of *Introductio generalis in rem herbariam*. Lipsiae 1690, he was the son of the German physician Andreas Bachmann (1600–1656). See *Bibliotheca riviniana ... Praemissa est vita Rivini descripta per M. Georg Samuel Hermann*. Lipsiae [1727], Carl Linnaeus, *Species Plantarum* 1: 121. 1753 and *Genera Plantarum* Ed. 5. 57. 1754, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, Joseph Ruland, *Ueber das botanische System des Rivinus*. Würzburg 1832, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Ernst Huth (1845–1897), *Clavis riviniana*. Frankfurt a.O. 1891 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, *Fieldiana, Bot.* 24(4): 192–202. 1946, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 161. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 333. 1972, Blanche Henrey, *British Botanical and Horticultural Literature before 1800*. 1975, Huldrych M. Koelbing, in *D.S.B.* 1: 368–370. 1981, Edward Lee Greene, *Landmarks of Botanical History*. Edited by Frank N. Egerton. Stanford, California 1983, Blanche Henrey, *No ordinary gardener—Thomas Knowlton, 1691–1781*. Edited by A.O. Chater. British Museum (Natural History). London 1986.

Rivina humilis L. (*Rivina humilis* var. *glabra* L.; *Rivina humilis* var. *laevis* (L.) Millsp.; *Rivina humilis* var. *laevis* Millsp.; *Rivina laevis* L.; *Rivina paraguayensis* D. Parodi; *Rivina portulacoides* Nutt.; *Rivina purpurascens* Schrad.)

Tropical America. Perennial herb, small groundcover, sometimes woody at base, sprawling, upright or straggling, wavy leaves, white to pink flowers in loose slender racemes, salt tolerant, bright red fruits loved by birds

See *Species Plantarum* 1: 121–122. 1753, *Mantissa* 1: 41. 1767, *Commentarii Societatis Regiae Scientiarum Gottingensis* 16: 125–140. 1808, *Transactions of the American Philosophical Society* ser. 2, 5: 167. 1835, *Anal. Soc. Cient. Argent.* 5: 206. 1878 and *Field Museum of Natural History, Botanical Series* 2(1): 41. 1900, *Journal of Ethnopharmacology* 114(3): 468–471. 2007

(Poison, fruit, roots and leaves toxic if ingested. Leaves bacteriostatic, antifungal, astringent, for coughs, cold, diarrhea, gonorrhea, jaundice, catarrh, stomachache, fevers, wounds.)

in English: baby pepper, bloodberry, coralberry, coralito, dog blood, jumbee, pepper bush, pigeonberry, rouge-plant, small pokeweed, woody rougeberry

in China: shu zhu shan hu

Robinia L. Fabaceae (Robinieae)

After the French botanist Jean Robin, 1550–1629, royal gardener, herbalist to Henry IV of France, from 1590 at the Jardin des Plantes, Paris, author of *Catalogus Stirpium tam*

indigenarum quam exoticarum quae Lutetiae coluntur. Paris 1601 and *Histoire des Plantes trouvées en l'Isle Virgine ...* Paris 1620. See Pierre Vallet (c. 1575–c. 1657), *Le Jardin du Roy tres chrestien Henry IV*. [Paris] 1608, Carl Linnaeus, *Species Plantarum*. 722. 1753 and *Genera Plantarum*. Ed. 5. 322. 1754 and J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 164. 1965, *Brittonia* 20(2): 148–161. 1968, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 334. 1972, *Castanea* 49(4): 187–202. 1984, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 3. [d. 1628] Torino 1995.

Robinia hispida L. (*Robinia fertilis* Ashe; *Robinia grandiflora* Ashe; *Robinia grandiflora* auct. non Ashe nec L. nec C.K. Schneid.; *Robinia hispida* var. *fertilis* (Ashe) R.T. Clausen; *Robinia hispida* L. var. *hispida*; *Robinia longiloba* Ashe; *Robinia pallida* Ashe; *Robinia pauciflora* Ashe; *Robinia rosea* Marshall; *Robinia speciosa* Ashe)

North America. Perennial non-climbing tree, small tree or shrub

See *Mantissa Plantarum* 1: 101–102. 1767, *Arbust. Amer.* 134. 1785, *Flora Boreali-Americana* 2: 65. 1803 and *Journal of the Elisha Mitchell Scientific Society* 37: 176. 1922, *Rhodora* 25(298): 181–183. 1923, *Bulletin of the Torrey Botanical Club* 50(11): 362. 1923, *Gentes Herbarum*; Occasional papers on the kind of plants 4: 291. 1940

(Root bark chewed as an emetic, held on tooth for toothache. Veterinary medicine, infusion given to cows as a tonic.)

in English: bristly locust, moss locust, rose acacia

in China: mao yang huai

in Japan: hana-akashia

Robinia neomexicana A. Gray (*Robinia breviloba* Rydb.; *Robinia coloradensis* Dode; *Robinia luxurians* (Dieck) C.K. Schneid. ex Tarouca & C.K. Schneid.; *Robinia neomexicana* var. *albiflora* Kusche; *Robinia neomexicana* var. *luxurians* Dieck; *Robinia neomexicana* var. *neomexicana*; *Robinia neomexicana* var. *subvelutina* (Rydb.) Kearney & Peebles; *Robinia rusbyi* Wootton & Standl.; *Robinia subvelutina* Rydb.)

North America, New Mexico. Perennial non-climbing tree, spiny shrub or small tree, forms large thorny thickets, branches have stipular spines, purplish-pink fragrant flowers in many flowered racemes, sap wood lighter yellow

See *Plantae Novae Thurberianae* 314. 1854, *Gard. Chron.*, ser. 3, 12: 669. 1892 and *Bulletin de la Société Botanique de France* 55(8): 650–651. 1909, *Mitt. Deutsch. Dendrol. (High to moderate toxicity. The plant should be considered toxic to all animals if ingested; horses are particularly at risk. Seeds, bark and leaves contain toxic proteins that have caused sickness and death in cattle, horses, poultry, sheep and humans. Children were poisoned (with rare reports of fatalities) after chewing on plant material, especially the bark. Seeds antibacterial, astringent, cholagogue, diuretic, emetic, emollient, laxative, purgative, sedative, tonic. Root bark chewed as an emetic, held on tooth for toothache. Veterinary medicine, infusion given to cows as a tonic.)

in English: black locust, black locust tree, false acacia, locust tree, silverleaf milkvetch, white acacia, yellow false acacia, yellow locust

in Italian: falsa acacia, pseudoacacia

in South Africa: vals-akasia

in China: ci huai hua

in India: kikar

in Japan: hari-enju

Rolandra Rottb. Asteraceae

For the Swedish botanist Daniel Rolander, 1725–1793, traveler and plant collector; see Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and Carl Frederik Albert Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 173. Boston 1965.

Rolandra fruticosa (L.) Kuntze (*Echinops fruticosus* L.; *Echinops nodiflorus* Lam.; *Rolandra argentea* Rottb.; *Rolandra diacantha* Cass.; *Rolandra monacantha* Cass.)

South America.

See *Species Plantarum* 2: 815. 1753, *Revisio Generum Plantarum* 1: 360. 1891 and *Arnaldoa* 7(1–2): 13–18. 2000 [2001], *Proc. Calif. Acad. Sci.*, ser. 4. 57(7): 247–355. 2006

(Leaves used for heat, amenorrhea, fever, sores and sprains. A medicine to improve the female's ability to make tapestry.)

in Panama: niagurgin

Roldana La Llave Asteraceae

Roldana hartwegii (Benth.) H. Rob. & Brettell (*Cacalia tepicana* M.E. Jones; *Senecio hartwegii* Benth.; *Senecio seemannii* Sch.Bip.)

Mexico. Large shrub

See *Novorum Vegetabilium Descriptiones* 2: 10. 1825, *Plantas Hartwegianas imprimis Mexicanas* 18. 1839 and *Phytologia* 27(6): 420. 1974, *Phytologia* 87(3): 204–249. 2005 [2006]

(Large leaves and roots piscicide.)

in Mexico: sopepari

Rollinia A. St.-Hil. Annonaceae

Named for the French historian Charles Rollin, 1661–1741, professor of eloquence in the Royal College, among his writings are *Ad illustrissimum virum Franciscum Michaelem Le Tellier, marchionem de Loubois ... cum ejus filius Camillus de Louvois ... de Theocrito publice reseponderet*. Paris 1689, *De la Manière d'enseigner et d'étudier les Belles-Lettres*, par raport à l'esprit et au coeur. Paris 1726–1728, *Histoire Romaine*. Paris 1738–1741 and *Histoire ancienne des Égyptiens, des Carthaginois, des Assyriens, des Babyloniens, des Mèdes, et des Perses, des Macédoniens, des Grecs*. Paris 1730–1738; see H. Ferté, *Rollin. Sa vie, ses oeuvres*. 1902; F.M. de Marsy, *Histoire moderne de Chinois, des Japonnois ... pour servir de suite à l'Histoire ancienne de M. Rollin*. 1755; Luíz Caldas Tibiriçá, *Dicionário Guarani-Português*. 34. Traço Editora, Liberdade 1989.

Rollinia mucosa (Jacq.) Baill. (*Annona biflora* Ruiz & Pav. ex G. Don; *Annona biflora* Sessé & Moc.; *Annona excelsa* Kunth; *Annona humboldtiana* Kunth; *Annona humboldtii* Dun.; *Annona laevis* Kunth; *Annona longifolia* Sessé & Moc.; *Annona microcarpa* R. & P. ex G. Prod.* 1990 53(1): 23–41. 1990, *Flora Neotropica* 57: 1–188. 1992, *Phytochemistry*. 45(4): 719–723. 1997, *Estudios sobre diversidad y ecología de plantas* 97–122. 1997, *J. Nat. Prod.* 66(2): 279–281. 2003 [A novel constituent from *Rollinia mucosa*, rollicosin, and a new approach to develop annonaceous acetogenins as potential antitumor agents.], *Life Sci.* 72(25): 2853–2861. 2003, *J. Org. Chem.* 71(4): 1416–1429. 2006

(Used in Ayurveda and Sidha. The juice that exudes from cut branches is so acrid and irritant that it produces severe inflammation if it comes into contact with the conjunctiva. Several cytotoxic agents from the plants. Annonaceous acetogenins are a group of potential anti-neoplastic agents isolated from Annonaceae plants. Hard seeds very toxic, but can be swallowed whole with no ill effects; all non-fruit parts quite toxic. Leaves used against worms and abscesses. Unripe fruits and

the bark used against diarrhea and dysentery. Seeds, leaves and young fruits insecticidal.)

in English: bullock's heart, common custard apple, custard apple, soursop, sugar apple

in Peru: anón cimarrón, cachiman morveux

in Tropical America: biribá

in Rodrigues Isl.: coeur de boeuf

in Central America: anona

Ronabea Aubl. Rubiaceae

Ronabea has long been considered closely related to or synonymous with *Psychotria* L., see Bremekamp, C.E.B. "Notes on the Rubiaceae of Surinam." *Recueil Trav. Bot. Néerl.* 31: 248–308. 1934, Steyermark, J.A. *Psychotria*. In: B. M. Maguire & Collaborators, *Flora of the Guayana Highlands. Mem. New York Bot. Gard.* 23: 406–717. 1972

Ronabea emetica (L.f.) A. Rich. (*Cephaelis emetica* (L.f.) Pers.; *Evea emetica* (L.f.) Stellfeld; *Psychotria emetica* L.f.; *Uragoga emetica* (L.f.) Baill.)

Central America to Peru. Low shrubs, opposite leaves drying membranaceous to papyraceous, small white flowers, axillary inflorescences with bracts, purple-black drupaceous fruits, oily endosperm, strong-smelling roots

See *Mém. Rubiac.*: 90. 1830 and Govaerts, R. *World Checklist of Selected Plant Families*. Kew. 2003 [as *Psychotria emetica*.], Piesschaert, F. et al. "Searching for the taxonomic position of the African genus *Colletocema* (Rubiaceae):

morphology and anatomy compared to an rps12-intron analysis of the Rubioideae.” *Canadian J. Bot.* 78: 288–304. 2000

(Febrifuge. Used as a substitute of ipecacuanha.)

in English: false ipecac, Peruvian ipecac

Ronabea latifolia Aubl. (*Appunia parviflora* Lundell; *Coffea subsessilis* Benth., nom. illeg.; *Mapouria subsessilis* Müll.Arg.; *Mapouria subsessilis* var. *angustifolia* Müll.Arg.; *Mapouria subsessilis* var. *genuina* Müll.Arg., nom. inval.; *Mapouria subsessilis* var. *latifolia* Müll.Arg.; *Psychotria axillaris* Willd., nom. illeg.; *Psychotria erecta* (Aubl.) Standl. & Steyerf.; *Psychotria erecta* f. *fluctuans* (Standl.) Steyerf.; *Psychotria fluctuans* Standl.; *Psychotria fluctuans* var. *angustifolia* Standl.; *Psychotria fluctuans* var. *latifolia* (Müll.Arg.) Standl.; *Psychotria morindoides* (A. Rich. ex DC.) Lemée, nom. illeg.; *Ronabea erecta* Aubl.; *Ronabea latifolia* var. *hispidula* Bremek.; *Ronabea morindoides* A. Rich. ex DC.; *Ronabea viscoides* A. Rich.; *Uragoga latifolia* (Aubl.) Kuntze)

Trinidad, Trop. Central & South America. Shrubs, leaves drying stiffly papyraceous to chartaceous, oily endosperm

See *Hist. Pl. Guiane* 1: 154, 156. 1775, *Sp. Pl.* 1: 962. 1798, *Hooker's J. Bot. Kew Gard. Misc.* 3: 232. 1841, *Revis. Gen. Pl.* 2: 961. 1891 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 7: 446–448. 1931, *Contr. Univ. Michigan Herb.* 4: 28. 1940, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 23: 24. 1943, *Fl. Guyane Franc.* 3: 564. 1954, *Mem. New York Bot. Gard.* 23: 713. 1972, Schultes, R.E. and R.F. Raffauf. *The Healing Forest: Medicinal and Toxic Plants of the Northwest Amazonia*. Dioscorides Press, Portland, Or. 1995, Bremer, B. & J.-F. Manen. “Phylogeny and classification of the subfamily Rubioideae (Rubiaceae).” *Pl. Syst. Evol.* 225: 43–72. 2000, Taylor, C.M. “The neotropical genus *Ronabea* (Rubiaceae, Lasiantheae).” *Systematics and Geography of Plants* 74: 35–42. 2004

(The fruit is extremely toxic, used in preparation of one of the forms of curare.)

Rorippa Scop. Brassicaceae (Cruciferae)

Possibly from a Saxon vernacular name, *rorippen*. See Euricius Cordus (1486–1535), *Botanologicon*. Coloniae 1534, Giovanni Antonio Scopoli (1723–1788), *Flora Carniolica*. 520. Viennae 1760. William Curtis (1746–1799), *Flora Londinensis*. London [1775–] 1777–1798, *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 4: 109–110. 1812, *Enumeratio Plantarum* 27. 1821, *Index Seminum* [St. Petersburg] 1: 39. 1835 and *Fieldiana, Bot.* 24(4): 354–380. 1946, *Ann. Missouri Bot. Gard.* 35(1): 99–106. 1948, *Sida* 4(4): 292. 1972, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 163. 1989.

Rorippa cochlearioides (Roth) Al-Shehbaz & Jonsell (*Alyssum cochlearioides* Roth; *Cochlearia cochlearioides*

(Roth) Santapau & Mahesw.; *Cochlearia flava* Buch.-Ham. ex Hook.f. & T. Anderson, nom. illeg.; *Cochlearia flava* Buch.-Ham. ex Roxb., nom. inval.; *Trochiscus cochlearioides* (Roth) O.E. Schulz)

India.

See *Hort. Bengal.* 48. 1814, *Nov. Pl. Sp.* 322. 1821, *Fl. Brit. India* [J.D. Hooker] 1: 145. 1872 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 66: 94. 1933, *Journal of the Bombay Natural History Society* 54: 804. 1957, *Novon* 10(4): 344–345. 2000

(Febrifuge.)

in India: khaksir

Rorippa heterophylla (Blume) R.O. Williams (*Cardamine sublyrata* Miq.; *Nasturtium heterophyllum* Blume; *Nasturtium indicum* auct. non (Linnaeus) DC.; *Rorippa indica* auct. non (Linnaeus) Hiern)

East Asia, Japan, Myanmar. Short-lived herb, erect or decumbent, rooting at the nodes, terminal or axillary inflorescences, rachis not flexuose, yellow flowers, green cylindrical silique, style persistent, seeds arranged in two rows

See *Synopsis Plantarum* 2: 199. 1807, *Bijdragen tot de flora van Nederlandsch Indië* 2: 50–51. 1825, *Annales Museum Botanicum Lugduno-Batavi* 2: 73. 1865. Rosa eglanteria Mill. (*Rosa eglanteria* Graebn.; *Rosa eglanteria* L.; *Rosa rubiginosa* L.; *Rosa rubiginosa* Brot.; *Rosa rubiginosa* Coss. ex Déségl.; *Rosa rubiginosa* Webb ex Ball)

Himalaya, India.

See *Gard. Dict.*, ed. 8. n. 4. 1768, *Mantissa Plantarum* 2: 564–565. 1771, *Fl. Lusit.* 2: 311. 1805, *Bull. Soc. Roy. Bot. Belgique* xv. (1876) 344. 1876, *J. Linn. Soc., Bot.* 16: 446. 1878 and *Botanical Journal* (London) 75: 40. 1904, *Folia Geob. Phytotax.* (Czech.). 17: 97–98. 1982, *Taxon* 45: 565. 1996

(Roots taken in cold, cough, influenza. Seeds emetic, astringent, used for piles, dysentery.)

in English: eglantine, sweetbriar, sweetbrier, wild rose

Rosa foetida Herrm. (*Rosa fedorovii* Sumn. ex Chrshan.; *Rosa lutea* Mill.)

India.

See *The Gardeners Dictionary*: ... eighth edition no. 11. 1768 and *Notulae Systematicae ex Herbario Instituti Botanici Academiae Scientiarum Uzbeckistanicae* 13: 41. 1952, *Bot. Zhurn. Ukraine*, 9(4): 66. 1952

(Flowers stomachic.)

in English: Austrian briar, Austrian yellow rose

Rosa gymnocarpa Nutt.

North America. Perennial subshrub

See *A Flora of North America*: containing ... (Torr. & A. Gray) 1(3): 461. 1840

(Spines and hips considered poisonous, toxic.)

in English: dwarf rose, wood rose

Rosa hookeriana Wall.

Himalaya.

See *Numer. List* [Wallich] n. 691. 1829

(Whole plant of *Pedicularis pectinata* ground with fruits of *Rosa hookeriana*, the paste given for dysentery.)

in India: ciya

Rosa indica L. (*Rosa cymosa* Tratt.; *Rosa fukienensis* F.P. Metcalf)

India.

See *Species Plantarum* 1: 492. 1753, *Rosacearum Monographia* 1: 87. 1823 and *Journal of the Arnold Arboretum* 21(2): 274–275. 1940

(Fruits of *Solanum erianthum* ground with the rhizome of *Canna indica*, the flowers of *Rosa indica*, seeds of *Papaver somniferum* and sugar, given to cure syphilis.)

in China: xiao guo qiang wei

Rosa laevigata Michaux (*Rosa amygdalifolia* Seringe; *Rosa argyi* H. Léveillé; *Rosa cucumerina* Trattinnick; *Rosa laevigata* var. *kaiscianensis* Pampanini; *Rosa laevigata* var. *leio-carpa* Y.Q. Wang & P.Y. Chen; *Rosa nivea* DC.; *Rosa ternata* Poiré; *Rosa triphylla* Roxburgh; *Rosa triphylla* Roxburgh ex Lindl., nom. nud.)

China, Vietnam, Japan. Evergreen climbing vine, sprawling shrub, hooked prickles, leaves alternate, solitary flowers fragrant, corolla white, calyx a cupuliform tube hairy, reddish receptacle covered with stiff hairs and crowned with the persistent calyx, sugar extracted from the fruit which is also used to ferment wine, root bark contains tannin used for tanning, on sunny slopes

See *Species Plantarum* 1: 491–492. 1753, *Fl. Bor.-Amer.* 1: 295–296. 1803, *Encyclopédie Méthodique, Botanique* 6(1): 284. 1804, *Catalogus plantarum horti botanici monspeliensis* 137. 1813, *Rosarum Monographia* 138. 1820, *Rosacearum Monographia* 2: 181. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 601. 1825 and *Bulletin de la Société Botanique de France* 55: 56. 1908, *Nuovo Giornale Botanico Italiano*, n. s. 17(2): 294–295. 1910, *Bull. Bot. Res., Harbin* 1(4): 17. 1981, *Journal of Tropical and Subtropical Botany* 3(1): 33, f. 3. 1995

(The roots, leaves, flowers, and fruit all used medicinally; the fruit for diarrhea, dysentery, cold and cough, night sweats, enuresis, seminal emissions, constipation, leucorrhea.)

in English: Cherokee rose

in China: chin ying tsu, chin yin tzu, jin ying gen, jin ying zi

in Vietnam: kim anh, thich le tu

Rosa macrophylla Lindl.

Nepal, China. Shrub, leaf bud scales reddish, petals hot pink, edible flowers

See *Rosarum Monographia* 35, t. 6. 1820

(Flowers stomachic. Fruit laxative, antidote, used for cough, cold, liver disorders, abscesses; a paste regarded good for eyesight.)

in China: da ye qiang wei

in Nepal: alo sanglo, siya

Rosa moschata Mill. (*Rosa moschata* Benth.; *Rosa moschata* Herrm.)

India.

See *Fl. Hongk.* 106. 1861 and *J. Cytol. Genet.* 24: 179–183. 1989

(Used in skin and eyes diseases, biliousness.)

in English: musk rose, musk-scented rose

in India: kobjaka, kuja, kujai

Rosa multiflora Thunberg var. *cathayensis* Rehder & E.H. Wilson (*Rosa calva* (Franchet & Savatier) Boulenger var. *cathayensis* (Rehder & E.H. Wilson) Boulenger; *Rosa cathayensis* (Rehder & E.H. (Astringent.)

in China: fen tuan qiang wei, ye qiang wei

Rosa omeiensis Rolfe (*Rosa sericea* Lindley f. *aculea-toeglandulosa* Focke; *Rosa sericea* f. *inermieglandulosa* Focke; *Rosa sorbus* H. Léveillé)

China.

See *Bot. Mag.* 138: t. 8471. 1912

(Petals decoction used to wash the eyes to treat ophthalmia.)

in China: e mei qiang wei

in Nepal: rauli

Rosa roxburghii Trattinnick (*Rosa microphylla* Desfontaines var. *glabra* Regel)

China.

See *Ros. Monogr.* 2: 233. 1823 and *Pl. Wilson.* 2: 318. 1915

(For skin diseases, stomachic, stimulant.)

in China: sao si hua

Rosa sericea Lindl. (*Rosa tetrapetala* Royle; *Rosa wallichii* Tratt.; *Rosa wallichii* Sabine)

China, Nepal. Shrub, flowers cream with yellow stamens, fruits bright green, ripe fruits eaten

See *Numer. List [Wallich]* n. 687. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 208, t. 42. 1835, *Journal of the Royal Horticultural Society* 11: 226. 1889, *Bull. Soc. Bot. Belg.* 11: 226. 1889 and *Bulletin of Botanical Research* 1(4): 2. 1981, *J. Cytol. Genet.* 24: 179–183. 1989

(Flower paste applied to treat headache, eye diseases, also given for liver complaints.)

in China: juan mao qiang wei

in India: sisichungchung

in Nepal: marpalang, sebi mendo, sekar, sewa karmo

Rosa webbiana Wall. ex Royle (*Rosa webbiana* Wall.)

India, Himalaya. Shrub, slender branches, pink-red fragrant flowers, edible fruits, young shoots or twigs eaten

See *Numer. List* [Wallich] n. 683. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 208, t. 42, f. 2. 1835 and *Bulletin of Botanical Research* 1(4): 4. 1981

(Flowers for stomach pain, paste applied to treat headache, eye diseases, also given for liver complaints; buds made into a paste and applied to boils. Ceremonial, flowers used in religious ceremonies, to decorate the temples, *gompas*, monasteries, houses.)

in English: wild rose

in China: zang bian qiang wei

in India: kugina, manyar, shayah, siah, siah-marpo, sikanda, siya

Rosa woodsii Lindl.

North America.

See *Rosarum Monographia* 21. 1820 and *Fl. Canada* 3: 547–1115. 1978

(An infusion of the petals, the bark, or the roots used for sore eyes.)

in English: western rose, western wild rose, wild rose, Wood's rose

Roscoea Smith Zingiberaceae

Named for William Roscoe, 1753–1831 (Liverpool), botanist, historian, in 1802 founded the Liverpool Botanical Garden, 1804 a Fellow of the Linnean Society. See *Exotic Botany* 2: 97, pl. 108. 1806, Henry Roscoe, *The life of William Roscoe*, by his son. Boston, 1833, Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 539. 1845 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 177. 1965, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 338. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. 354. 1973, R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. 771. 1993, Jill Cowley & Richard Wilford, “*Roscoea tumjensis*.” in *Curtis's Botanical Magazine*. 15(4): 220–225. November 1998, Jill Cowley & Richard Wilford, “*Roscoea capitata*.” in *Curtis's Botanical Magazine*. 15(4): 226–230. November

1998, Cowley, Elizabeth Jill (1940–), *The genus Roscoea* Jill Cowley; with contributions from Richard Wilford and Roland Bream; edited by J.M. Lock. Kew: Royal Botanic Gardens, Kew, 2007.

Roscoea alpina Royle (*Roscoea intermedia* Gagnep.)

India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* 1: 361, pl. 89, f. 1. 1839 and *Bulletin de la Société Botanique de France* 48: 73. 1901

(Flowers decoction used in the treatment of urinary disorders; crushed flowers applied for the treatment of urinary disorders and tuberculosis.)

in China: gao shan xiang ya shen

in India: daruk, daruk haldi, haldi

Roscoea purpurea Smith (*Roscoea procera* Wall.; *Roscoea purpurea* f. *alba* Cowley; *Roscoea purpurea* f. *rubra* Cowley; *Roscoea purpurea* var. *gigantea* Wall.; *Roscoea purpurea* var. *procera* (Wall.) Baker)

India, Himalaya.

See *Exotic Botany* 2: 97, t. 108. 1805–1808, *Plantae Asiaticae Rariores* 3: 22, t. 242. 1832, *The Flora of British India* 6: 208. 1890 and *Cytologia* 44: 233–240. 1979, *Gen. Roscoea*: 55. 2007

(Root antiseptic, astringent, tonic, powdered mixed with black pepper applied on boils for suppuration and quick healing.)

in India: kakoli, musli

Rosmarinus L. Lamiaceae (Labiatae)

Latin name for the plant, from *ros*, *roris* ‘dew’ and *marinus* ‘maritime’, *ros marinus*, *ros maris*, *marinus ros*; see Carl Linnaeus, *Species Plantarum*. 1: 23. 1753, *Genera Plantarum*. Ed. 5. 14. 1754 and Pietro Bubani, *Flora Virgiliana*. 97–98. [Ristampa dell'edizione di Bologna 1870] Bologna 1978, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 1106. 1985, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 543. 1996.

Rosmarinus officinalis L. (*Rosmarinus angustifolius* Mill.; *Rosmarinus communis* Noronha, nom. inval.; *Rosmarinus flexuosus* Jord. & Fourr.; *Rosmarinus latifolius* Mill.; *Rosmarinus laxiflorus* Noë; *Rosmarinus officinalis* race *latifolius* (Mill.) Rouy; *Rosmarinus officinalis* subsp. *laxiflorus* (Noë ex Lange) Nyman; *Rosmarinus officinalis* subsp. *laxiflorus* (Noë) Nyman; *Rosmarinus officinalis* subsp. *palaui* (O. Bolòs & Molin.) (Whole plant infusion sedative, carminative, sudorific, cardiac stimulant, antiinflammatory, antirheumatic, diuretic, digestive, antiseptic, antispasmodic.)

in English: common rosemary, rosemary

in Arabic: ikلیل, ikلیل el-gabal, klil

in Italian: rosmarino

in China: mi die xiang, mi tieh hsiang

in India: rasmari, rusmari

in Mexico: guixi cicanaca yala-rillaa, quixi cicanaca yala-tillaa, romero

Rostellularia Reichb. Acanthaceae

Latin *rostellum*, a little beak, a small snout, *rostrum*, *i* ‘the beak of a bird’, *rodo*, *is*, *si*, *sum*, *ere* ‘to gnaw, eat away, corrode’, referring to a small basal appendage on the lower anther cell; see *Species Plantarum* 1: 15–16. 1753, Heinrich Gottlieb L. Reichenbach (1793–1879), *Handbuch des natürlichen Pflanzensystems* nach allen seinen Classen, Ordnungen und Familien, etc. 190. Dresden & Leipzig 1837 and *Taxon* 41: 564. 1992, *Taxon* 44: 611–612. 1995. See also genus *Justicia*.

Rostellularia procumbens (L.) Nees (*Justicia diffusa* Willd.; *Justicia diffusa* Buch.-Ham. ex Wall.; *Justicia diffusa* Sm. ex T. Anderson; *Justicia procumbens* L.; *Justicia procumbens* Blume; *Justicia procumbens* Thib. ex Nees; *Justicia procumbens* T. Anderson ex Nees; *Justicia procumbens* Wall.; *Rostellularia trichochila* Miq.)

China.

See *Sp. Pl.* 1: 15. 1753, *Species Plantarum*. Editio quarta [Willdenow] 1(1): 87. 1797, *Bijdr. Fl. Ned. Ind.* 14: 788. 1826, *Numer. List* [Wallich] n. 2441, 2443. 1830, *Plantae Asiaticae Rariores* 3: 100–101. 1832, *Prodr.* (DC.) 11: 263, 353, 371. 1847, *Journ. Bot. Neerl.* i. (1861) 118. 1861, *J. Proc. Linn. Soc., Bot.* 7: 117. 1863 [1864 publ. 1863]

(Plant paste or powdered plant applied to treat cuts and wounds, boils and blisters. Root juice given to treat typhoid. Leaves astringent, alterative, antiviral, expectorant, cytotoxic, laxative and diuretic, postpartum remedy, and an infusion or decoction used to treat asthma, fever, coughs, pharyngolaryngeal swelling, rheumatism, backache and flatulence; leaf juice squeezed into eyes. Veterinary medicine, decoction given to animals in fever.)

in China: jue chuang

in India: chirudumbe

in Nepal: aangdyan jhar

Rosularia (DC.) Stapf Crassulaceae

Latin *rosula*, *ae* ‘a little rose’, referring to the leaf-rosettes, see *Species Plantarum* 1: 429. 1753, *Bull. Sci. Soc. Philom. Paris* 3: 1. 1801, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 399. 1828 and *Botanical Magazine* 149, pl. 8985. 1923, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 18a: 466. 1930, *Novosti Sist. Vyssh. Rast.* 6: 119. 1970.

Rosularia adenotricha (Wall. ex Edgew.) C.-A. Jansson (*Cotyledon papillosa* Aitch. & Hemsl. ex Aitch.; *Cotyledon tenuicaulis* Aitch. & Hemsl. ex Aitch.; *Sedum adenotrichum* Wall. ex Edgew.; *Sedum anoicum* Praeger; *Umbilicus papillosa* (Aitch. & Hemsl. ex Aitch.) Boiss.; *Umbilicus tenuicaulis* (Aitch. & Hemsl. ex Aitch.) Boiss.)

India, Pakistan.

See *Transactions of the Linnean Society of London* 20(1): 48. 1864, *Journal of the Linnean Society, Botany* 18: 57–58. 1880, *Flora Orientalis* 244. 1888 and *Journal of Botany, British and Foreign* 57: 52. 1919, *Flora Iranica: Flora des Iranischen Hochlandes und der Umrahmenden Gebirge: Persien, Afghanistan, Teile von West-Pakistan, Nord-Iraq*, (cont) 72: 1–32. 1970

(Dried plant crushed and applied in injuries.)

in India: surati

Rosularia rosulata (Edgew.) H. Ohba (*Sedum pyriforme* Royle ex Raymond-Hamet, nom. inval.; *Sedum rosulatum* Edgew.; *Umbilicus radicans* Klotzsch)

India, Himalaya.

See *Transactions of the Linnean Society of London* 20: 48. 1846, *Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 143, t. 44. 1862

and *Candollea* 4: 45. 1929, *Journal of Japanese Botany* 52(1): 9. 1977

(Paste of leaves to cure hurt.)

in India: arhu

Rotala L. Lythraceae

Latin *rotalis* 'wheeled, wheel-like, having a wheel, having wheels', *rota* 'a wheel', referring to the whorled leaves; see C. Linnaeus, *Mantissa Plantarum*. 2: 143–144, 175. 1771 and *Acta Bot. Mex.* 17: 45–51. 1992, *Brenesia* 47–48: 37–53. 1997.

Rotala indica (Willd.) Koehne (*Ameletia indica* (Willd.) DC.; *Ameletia uliginosa* Miq.; *Peplis indica* Willd.; *Rotala densiflora* var. *formosana* Hayata; *Rotala elatinomorpha* Makino; *Rotala indica* var. *koreana* Nakai; *Rotala indica* var. *uliginosa* (Miq.) Koehne; *Rotala koreana* Nakai; *Rotala koreana* (Nakai) Mori; *Rotala uliginosa* (Miq.) Nakai)

China, India. Dwarf, erect or suberect herb, flowers solitary in opposite leaf axils, petals shorter than sepals, capsule enclosed in persistent calyx, angular seeds

See *Species Plantarum*. Editio quarta 2(1): 244. 1799, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 3(2): 2. 1825, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(2): 172. 1880 and *Bot. Mag.* (Tokyo) xxiv. 100. 1910, Mori, Tamezo (1884–1962), *An enumeration of plants hitherto known from Corea*: July 1921. Seoul, Corea: Govt. of Chosen, 1922

(Bitter herb, for stomach and respiratory disorders.)

in English: Koehne-Indian tooth-cup, tooth-cup

in China: jie jie cai

Rotala rosea (Poir.) C.D.K. Cook ex H. Hara (*Ammannia leptopetala* Blume; *Ammannia littorea* Miq.; *Ammannia pentandra* Roxb.; *Ammannia rosea* Poir.; *Rotala leptopetala* (Blume) Koehne; *Rotala littorea* (Miq.) Nakai; *Rotala pentandra* (Roxb.) Blatt. & Hallb.; *Rotala rosea* (Poir.) C.D.K. Cook)

Nepal, India.

See *Flora Indica*; or descriptions of Indian Plants 1: 448. 1820, *Museum Botanicum* 2: 134. 1856, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(2): 162. 1880 and *Journal of the Bombay Natural History Society* 25: 707. 1918, *Enumeration of the Flowering Plants of Nepal* 2: 173. 1979, *Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 29: 86. 1979

(Fever in children, contact therapy, whole plant hung around the neck.)

Rothmannia Thunberg Rubiaceae

After the Swedish physician and botanist Dr. Georg (Göran) Rothman, 1739–1778, M.D. Uppsala 1763, a friend of Thunberg and a student of Linnaeus, traveller and plant collector through North Africa, author of *De Raphania dissertatio medica* ... Praes. C. v. Linné, etc. Upsaliae [May 1763]; see Johan Gottschalk Wallerius (Wallerio) (1709–1785), *De origine oleorum in vegetabilibus*. Upsaliae (Mar.) 1761, C.P. Thunberg, in *Kongl. Vetenskaps Academiens Handlingar*. 37: 65. Stockholm 1776 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 183. 1965, [Librairie Paul Jammes–Paris], Cabinets de Curiosités. Collections. Collectionneurs. [Item no. 381.] 1998.

Rothmannia capensis Thunb. (*Gardenia capensis* (Thunb.) Druce; *Gardenia rothmannia* L.f.; *Genipa rothmannia* (L.f.) Baill.; *Randia bellatula* K. Schum.)

S. Africa. Tree, evergreen erect, dense roundish crown, glossy green leaves, domatia in the axils of the veins, creamy white with purplish red streaks bell-shaped strongly sweet scented flowers borne singly, fruits with a leathery skin, edible but unpleasant fruits, non-aggressive root system, baboons and monkeys eat the green and ripe fruits, in woodland

See *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Kongl. Vetensk. Acad. Handl.* 1776: 65, 67, t. 2. 1776, *Supplementum Plantarum* 165. 1781 and *Bot. Jahrb. Syst.* 33: 342. 1903, *Bot. Soc. Exch. Club Brit. Isles* 4: 624. 1917

(Fruit antibacterial. Powdered roots for rheumatism and leprosy. Juice from fruit for wounds and burns.)

in English: candlewood, Cape gardenia, common rothmannia, wild gardenia

in Southern Africa: aapsekos, bergkatjiepiering, bobbejaanappel, Kaapse katjiepiering, kershout (kers means both 'cherry' and 'candle'), wildekatjiepiering; umPhazane-mkhulu, umPhazana omkhulu (Zulu); umGupa, isiThebe, umZukuza, iBolo (Xhosa); modula-tshwene, modulatshwene (North Sotho); mukubudu, muratha-mapfene (Venda)

Rothmannia engleriana (K. Schum.) Keay (*Leptactina benguelensis* (Welw. ex Benth. & Hook. f.) R.D. Good subsp. *benguelensis*; *Randia engleriana* K. Schum.; *Randia katenantiae* De Wild.; *Randia kuhniiana* F. Hoffm. & K. Schum.;

Randia lacourtiana De Wild.; *Randia lemairei* De Wild.; *Randia ternifolia* Ficalho & Hiern; *Rothmannia engleriana* var. *ternifolia* (Ficalho & Hiern) Somers; *Rothmannia kuhniiana* (F. Hoffm. & K. Schum.) Fagerl.)

Tanzania to S. Trop. Africa. Shrub or small tree, rounded or flat-topped crown, rusty inner bark, waxy leaves, sweet scented creamy white trumpet-shaped flowers hanging down in terminal heads, tubular calyx, fruit olive green to dull red-brown with rusty brown pubescence, brown seeds surrounded by soft edible pulp, ripe fruit pulp juicy sweet fragrant edible, fruits eaten by chimpanzees, along roadsides, woodland, on Kalahari sands in thickets, in *Brachystegia* woodland, on rocky slopes

See *Ann. Mus. Congo Belge, Bot.*, IV, 1: 155. 1903, *Compagnie du Kasai*: 418. 1910, *Repert. Spec. Nov. Regni Veg.* 13: 140. 1914, *Journal of Botany, British and Foreign* 64, Suppl. 2: 9. 1926, *Bulletin du Jardin Botanique de l'État* 28: 57. 1958, *Bull. Jard. Bot. Natl. Belg.* 61: 298. 1991

(Roots chewed and swallowed or pounded and soaked in cold water and the infusion used to treat snakebite and stomachache. Leaves infusion drunk for cough.)

in Tanzania: kihonyamulyango, mfotofot, mfotofoto, mkondokondo, mkumba, mlozilozzi, mpumba, muharangundo, mupumba, mutwinya, umtelama

in Rhodesia: mupulupumpi

Rothmannia globosa (Hochst.) Keay (*Gardenia amoena* Sims; *Gardenia gerrardiana* Sond.; *Gardenia globosa* Hochst.; *Gardenia neuberia* Eckl. & Zeyh.; *Rothmannia microphylla* (Schumann) Garcia)

S. Africa. Small tree, slender, shiny simple leaves, creamy white scented bell-shaped flowers, edible fruits, monkeys, baboons and birds eat the fruit, in coastal and dune bush along riverbanks, in evergreen forest

See *Flora* 25: 237. 1842 and *Bull. Jard. Bot. État* 28: 56. 1958

(Powdered roots for leprosy.)

in English: bell gardenia, september bells

in Southern Africa: kafferklapper, klokkies-valsakatjiepiering, septemberklokkies; umPhazane, isiCelankobe, isiG-catha-inkobe, isiCathangobe, imBhikihla, isiQhoba (Zulu); umGubhe (Xhosa); Thudwane (Venda); siKoba (Swati)

Rothmannia hispida (K. Schum.) Fagerl. (*Gardenia spathicalyx* K. Schum. ex Wernham; *Randia hispida* K. Schum.; *Randia pynaertii* De Wild.)

W. & WC Trop. Africa, Guinea, Congo. Shrub or small tree, lianescent, cauliflorous, leaf sap and fruit juice used to draw black designs on the body and to blacken tattoos

See *Annales du muséum national d'histoire naturelle* 9: 218. 1807, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 437. 1896 and *J. Bot.* 57: 280. 1919, *Arkiv för Botanik utgivet av K. Svenska*

Vetenskapsakademien 30A, 7: 39. 1943, *Taxon* 31: 595–596. 1982, *Mary Slessor Journal of Medicine* 5(2): 21–24. 2005

(Leaf sap and fruit juice mixed with palm oil and applied on the skin against fungal infections. Hypoglycemic action.)

in Cameroon: ndubu, nduku

Rothmannia longiflora Salisb. (*Gardenia jasminiflora* Zipp. ex Span., nom. illeg.; *Gardenia speciosa* A. Rich., nom. illeg.; *Gardenia stanleyana* Hook. ex Lindl.; *Randia longiflora* (Salisb.) Th. Dur. & Schinz, nom. illeg.; *Randia maculata* DC.; *Randia sapinii* De Wild.; *Randia spathacea* De Wild.; *Randia stanleyana* (Hook. ex Lindl.) Walp.; *Randia thomasii* Hutch. & Dalziel; *Rothmannia maculata* (DC.) Fagerl., nom. inval.; *Rothmannia stanleyana* (Hook. ex Lindl.) Benth.; *Solena maculata* (DC.) D. Dietr.)

Trop. Africa, Gambia, Sudan, Kenya. Shrub or small tree, often with climbing stems, leaves papery, large attractive sweetly scented solitary trumpet-shaped white or pink flowers terminal on short axillary branches, globose to ellipsoid green-blackish edible berry, calyx persistent

See *Species Plantarum* 2: 1192. 1753, *The Paradiseus Londinensis* t. 65. 1807, *Mém. Rubiac.*: 160. 1830, *Prodr.* 4: 388. 1830, *Syn. Pl.* 1: 801. 1839, *Linnaea* 15: 315. 1841, *Bot. Reg.* 31: t. 47. 1845, *Niger Fl.*: 383. 1849, *Ann. Bot. Syst.* 2: 794. 1852, *Études Fl. Congo* 1: 159. 1896 and *Ann. Mus. Congo Belge, Bot.*, V, 3: 287. 1910, *Fl. W. Trop. Afr.* 2: 7778. 1931, *Ark. Bot.* 30A(7): 39. 1943

(Fruits and leaves for measles, jaundice. Febrifuge and analgesic; a decoction of the leaves, twigs, bark and roots applied internally or externally in lotions, washes and baths. Leaf pulp used as an enema against kidney pain and diarrhea with blood, and drinking the leaf juice is said to help during labor and childbirth; leaves used to treat itching skin diseases. Fruit pulp emetic also used to treat psoriasis. Seed used for ulcers. Roots used to treat bowel complaints; root infusion for throat abscesses, toothache and leprosy. Rituals, cosmetic paints.)

Rothmannia lujae (De Wild.) Keay (*Randia coriacea* K. Schum. ex Hutch. & Dalziel, nom. illeg.; *Randia lujae* De Wild.; *Rothmannia coriacea* Fagerl.)

Nigeria, Tropical Africa, Congo. Tree, seeds used to make a dye used by women for painting patterns on the skin

See *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 138: 913. 1904, *Ark. Bot.* 30A(7): 39. 1943, *Bulletin du Jardin Botanique de l'État* 28: 53. 1958

(A bark decoction drunk against abdominal troubles; the bark, leaf and root contain tannin. Ritual, cosmetic paint.)

Rothmannia macrophylla (Hook.f.) Bremek. (*Randia macrophylla* Hook.f.)

Malaya, Indonesia, Sumatra. Very small understory treelet, shrub, hairy triangular stipules with long narrow tip, bisexual bell-shaped flowers borne singly or in pairs from the leaf

axil, white pendent corolla with purple in the throat, green many-seeded berries

See *Fl. Brit. India* 3: 114. 1880 and *Proc. Kon. Ned. Akad. Wetensch.* C 60: 7. 1957, Ling, S.K. et al. The chemical study of Malaysian medicinal plants: *Rothmannia macrophylla*. The 47th Symposium of the Japanese Society of Pharmacognosy, Tokyo, 7–8 September, 2000, *Journal of Natural Medicines* 64(6): 796–798. 2001

(Iridoid glucoside.)

Malay name: hidung babi

Rothmannia octomera (Hook.f.) Fagerl. (*Gardenia octomera* Hook.; *Randia cunliffeae* Wernham; *Randia galtonii* Wernham; *Randia octomera* (Hook. f.) Benth.; *Randia octomera* (Hook.) Hook. f.)

Nigeria, Tropical Africa, Congo. Shrub or small tree, flowers 7–8-merous, corollas greenish-white, fruits subcylindrical, the fruit juice used to draw black designs on the body and to blacken tattoos, in forest

See *Species Plantarum* 2: 1192. 1753, *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Botanical Magazine* t. 5410. 1863, *Genera Filicum* 2: 89. 1873, *Genera Plantarum* 2: 89. 1876 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 30A, 7: 39. 1943

(Pulped roots applied against pneumo-bronchial troubles.)

Rothmannia urcelliformis (Hiern) Bullock ex Robyns (*Gardenia riparia* K. Schum.; *Gardenia tigrina* Welw. ex Hiern; *Gardenia urcelliformis* Hiern; *Gardenia urcelliformis* Schweinf. ex Hiern; *Massularia acuminata* (G. Don) Bullock ex Hoyle; *Randia spathicalyx* De Wild.; *Randia stenophylla* K. Krause; *Randia urcelliformis* (Schweinf. ex Hiern) Eggeling; *Randia urcelliformis* (Hiern) Schweinf. ex Hiern; *Randia violascens* Hiern; *Rothmannia arcuata* Bremek.; *Rothmannia fischeri* (K. Schum.) Bullock subsp. *fischeri*; *Rothmannia riparia* (K. Schum.) Fagerl.; *Rothmannia spathicalyx* (De Wild.) Fagerl.; *Rothmannia urcelliformis* (Schweinf. ex Hiern) Bullock ex Robyns)

Trop. Africa. Evergreen, small tree or shrub, slender, spindly, bark smooth and rough, sweeping branches, solitary strongly scented erect trumpet-shaped creamy white flowers, fruit egg-shaped, wood for hot fires, riverine forest, in highland forest

See *Species Plantarum* 2: 1192. 1753, *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *De Fructibus et Seminibus Plantarum...* 1: 139, pl. 28. 1788, *Flora of Tropical Africa* 3: 104. 1877 and *Annals of the Transvaal Museum* 17: 224. 1937, *Check list of the Gold Coast* 110, 115. 1937, *The indigenous trees of the Uganda Protectorate* 202. 1940, *Ark. Bot.* 30A(7): 39–40. 1943, *Flore des Spermatophytes du Parc National Albert* 2: 340. 1947, *Suppl. Cat. Vasc. Pl. S. Tome* 23. 1956

(Bark used in the treatment of malaria, also tonic. Roots a panacea for evil spirits. Fruits said to be poisonous and have molluscicidal property; powdered dry fruits used alone or mixed into a hunting poison.)

in English: forest rothmannia

in Cameroon: molonjo

in East Africa: mukombokombo, munyaburo

in Nigeria: uli obwe (Igbo)

in Southern Africa: tamba we bungu (Shona)

in Zaire: bilitu

Rothmannia whitfieldii (Lindl.) Dandy (*Gardenia malleifera* Hook.; *Gardenia whitfieldii* Lindl.; *Genipa malleifera* (Hook.) Baill.; *Randia eetveldiana* De Wild. & T. Durand; *Randia cuvelierana* De Wild.; *Randia homblei* De Wild.; *Randia malleifera* (Hook.) Hook.f.; *Randia malleiflora* Walp.; *Randia stolzii* K. Schum. & K. Krause; *Rothmannia eetveldiana* (De Wild. & T. Durand) Fagerl.; *Rothmannia malleifera* (Hook.) Benth.)

Trop. Africa. Small tree or shrub, trailing to semi-erect, scrambler, slender to weak, sprawling branches, shiny glossy leaves papery coriaceous, large pendulous solitary sweet-scented flowers terminal on short axillary branches, corolla yellowish white, lobes overlapping to left, ridged brown fruits often infested with ants, persistent calyx, fruit juice and fresh seeds contain a blue-black dye, riverine forest, woodland, in forest undergrowth, in old secondary forest, savanna woodland

See *Edwards's Botanical Register* 31, t. 47. 1845 and *Ann. Mus. Congo Belge, Bot.*, V, 1: 79. 1906, *Repert. Spec. Nov. Regni Veg.* 13: 139. 1914, *Ark. Bot.* 30A(7): 39. 1943, *Fl. Pl. Anglo-Egyptian Sudan* 2: 461. 1952

(Fruits and roots for dysmenorrhea. Febrifuge, expectorant, astringent, antidiarrheal, antiasthma and ecboic. The fruit juice applied to sores and wounds to promote healing, and to leprosy areas of the skin, to eczema on the toes. Root ash used as a cicatrizant on wounds and to treat eczema on the toes.)

in Central African Republic: manjobé

in Sudan: mbiongo rimama

in Zaire: ebembe, epembeyabamama

Rothmannia wittii (Craib) Bremek. (*Byrsocarpus baronii* Baker; *Randia wittii* Craib)

Thailand.

See *Bull. Misc. Inform. Kew* 1911: 392. 1911, *Proc. Kon. Ned. Akad. Wetensch.* C 60: 7. 1957, *Journal of Natural Medicines* 60(4): 322–324. 2006

(Iridoid glucoside.)

Rottboellia L.f. Poaceae (Gramineae)

After the Danish botanist Christen Friis Rottboell (Rottbøll), 1727–1797, physician, M.D. Copenhagen 1755, pupil of Linnaeus, traveller, 1770–1797 Director of the Copenhagen Botanical Garden, 1776–1797 professor of medicine, among his writings are *Descriptiones plantarum rariorum*. Havniae [Copenhagen] 1772, *Plantas Horti Universitatis rariores* programme ... describit C.F. Rottbøll, etc. Hafniae 1773 and *Descriptiones rariorum plantarum, nec non materiae medicae atque oeconomicae e terra surinamensi* ... Havniae [1776]; see *Mantissa Plantarum* 2: 164. 1767, *Introductio ad Historiam Naturalem* 233. 1777, *Supplementum Plantarum* 13, 114. 1781 [1782], *Flora Cochinchinensis* 1: 34, 51. 1790, *Supplementum Carpologiae* 1(1): 3, t. 181, f. 3. 1805, *Prodromus Florae Novae Hollandiae* 207. 1810, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Essai d'une Nouvelle Agrostographie* 116–117, 168, 177, t. 20, f. 10. 1812, *The Genera of North American Plants* 1: 83–84. 1818, *Révision des Graminées* 1: 153. 1829, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], J.W. Hornemann, *Naturh. Tidsskr.* 1: 566–567. 1837, *Spicilegium florum rumelicarum et bithynicarum* ... 2: 423. 1844 [1846], *Flora Brasiliensis* 2(4): 309–310. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Indian Forester* 20: 1. 1894, *The Flora of British India* 7(21): 152. 1897 [1896] and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Contr. U.S. Natl. Herb.* 24: 201. 1925, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 368. 1930, *Blumea, Supplement* 3: 15, 17. 1946, *Bot. Not.* 115: 1–17. 1962, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 183. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 340. 1972, *Blumea* 31(2): 281–307. 1986, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 236–237. L.f.; *Rottboellia exaltata* L.f., nom. illeg., non *Rottboellia exaltata* (L.) L.f.; *Rottboellia exaltata* f. *arundinacea* (Hochst. ex A. Rich.) Hack.; *Stegosia cochinchinensis* Lour.; *Stegosia exaltata* (L.f.) Nash)

Throughout Old World tropics. Annual or perennial, fast growing, herbaceous to cane-like, tufted, erect, robust, leafy, coarse, solid, simple or branched, stilt roots from the lower nodes, stems prickly, grain ovate, grains eaten by local people, manure, used as hay and silage, fodder grass,

relished by cattle, occasionally used as forage for horses and sheep, spikes eaten by baboons, potential seed contaminant, considered one of the most noxious and serious weeds in crops

See *Mantissa Plantarum* 575. 1771, *Nova Graminum Genera* 40, t. 1. 1779, *Supplementum Plantarum* 114. 1781 [1782], *Flora Cochinchinensis* 51. 1790, *Tentamen Florae Abyssinicae ... 2*: 444. 1850, *Boletim da Sociedade Broteriana* 5: 215. 1887, *Revisio Generum Plantarum* 2: 779. 1891 and *North American Flora* 17(1): 84. 1909, *Kew Bulletin* 35(4): 817. 1981, *Journal of Cytology and Genetics* 20: 205–206. 1985, *Cytologia* 51: 43–50. 1986, *Cytologia* 54: 335–342. 1989, *Journal of Cytology and Genetics* 25: 140–143. 1990, *Journal of the Indian Botanical Society* 73: 289–293. 1994

(Unpalatable when tall as its stiff hairs cause irritation. Leaves anodyne. Roots antiseptic, astringent.)

in English: corn grass, Guinea-fowl grass, horse corn, Kelly grass, kokoma grass, itch grass, prickle grass, Raoul grass, Saloum grass, shamva grass, white gungui

in French: l'herbe Bette-Elise

in Latin America: alesi grasi, caminadora, herbe à canne, herbe à riz, paja peluda, zèb a diri, zèb a kann

in Angola: nsongo, nsonso

in East Africa: ewokiwok, mbaya, mwamba nyama, nyamrungru

in Gambia: safala, saloum barra

in Ghana: kalinyada, nyehin

in Mali: gambé, kuono, niélo, niélo yelori, sian, wanga

in Niger: gasamma, naniérého

in Nigeria: achala nkita, agahama, agumbogo, cilà, dààwàà dààwàà, daddawàà, gyaazamàà, holo, loyo, nyalo

in Senegal: falèmbal, kananar, pellen, vaga sian

in Sierra Leone: akepkaruni, anwo, fofole, fovo, fovu, gongo levu, gongo levu hina, gungu, haha, kale, kali, kalona, khalona, ngongo, sanwania musuma, sanwanya musuma, sensenden, sensene kaima

in South Africa: tarentaalgras

in Upper Volta: gandjanga, kaliniaga, kalinjango, karyaga, lawula, nelooje, neloori, sian

in India: bara swati, barsali, bhursali, bura swooate, gunit, hutia, kinangu pillu, konda panookoo, konda panuku, pedda panuku, pedda panuku gaddi, sontha, sothu alagu pillu

in Japan: tsuno-ai-ashi

in Okinawa: yamatsu-gusa

in the Philippines Isl.: girum, talangiu

in Thailand: yaa khayong, ya khayong, ya ko, yaa ko, ya prong khai, yaa prong khaai

Rotula Lour. Boraginaceae (Ehretiaceae)

Latin *rotula*, *ae* 'a little wheel', see *Flora Cochinchinensis* 1: 121. 1790, *Icones et Descriptiones Plantarum*, quae aut sponte ... 5: 22. 1799, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 509. 1845.

Rotula aquatica Lour. (*Carmona viminea* (Wall.) G. Don; *Carmona viminea* G. Don; *Ehretia viminea* Wall.; *Rhabdia viminea* (Wall.) Dalziel ex Hook.; *Rhabdia viminea* Dalz. ex Hook.)

India.

See *Fl. Cochinch.* 1: 121. 1790, *A Numerical List of Dried Specimens* [Wallich] n. 906. 1828 [1828–1849], *Icon. Pl.* 9: t. 823. 1851 [1852 publ. Apr–Dec 1851] and *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda. A specific remedy against kidney and bladder stones (Doctrine of Signatures). Plant decoction sudorific, diuretic, for urinary disorders, venereal diseases, piles.)

in English: water rotula

in China: lun guan mu

in India: dandratchu, kalloorvanchi, kallurvanci, kaloorvanchi, la khawang, machim, pasanabheda, pasanabhedah, pasanbheda (pasan, stone, rock, bheda, breaking), pashanabheda, seppunerinji, singkhantha

in Philippines: aposotes, buntut-buaia, kulatai, makabra, puntalefante, takad, trompalipanti

Roucheria Planchon Linaceae (Lineae)

For the French poet Jean Antoine Roucher, 1745–1794, his works include *Hymne funèbre chanté au Champ de la Fédération*, le 3 juin 1792 ... pour honorer la mémoire de J.G. Simoneau, Maire d'Estampes. Paris [1792], *Maximilien Jules Léopold Duc de Brunswick-Lunebourg*, poème. Paris 1786 and *Les Mois*, poème en douze chants. Paris 1779; see *London Journal of Botany* 6: 141, 142, t. 2. 1847, Antoine Guillois, *Pendant le Terreur*. Le poète Roucher, 1745–1794. Paris 1890.

Roucheria griffithiana Planch.

Moluccas.

See *London Journal of Botany* 6: 143. 1847

(Arrow or dart poison.)

in Malaysia: bhoi, ipoh akar putih, akur putih

Roupala Aublet Proteaceae

From the native name in Guiana; see Jean B.C.F. Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 83–84, t. 32. Paris 1775 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 367–375. 1937, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2185–2186. 2001, *Fl. Ecuador* 69: 3–48. 2002.

Roupala monosperma (Ruiz & Pav.) I.M. Johnst. (*Andriapetalum ferrugineum* Meisn.; *Embothrium monospermum* Ruiz & Pav.; *Panopsis ferruginea* (Kunth) Pittier; *Panopsis ferruginea* (Meisn.) Pittier; *Roupala dolichopoda* Diels; *Roupala ferruginea* Kunth; *Roupala monosperma* I.M. Johnst.; *Roupala obovata* Kunth; *Roupala obovata* var. *ecuadoriensis* Steyerm.; *Roupala peruviana* R.Br.)

South America, Colombia.

See *Flora Peruviana* [Ruiz & Pavon] 1: 63, t. 98. 1798, *Trans. Linn. Soc. London* 10(1): 192. 1810, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 2: 152–153. 1817, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(1): 345. 1856 and *Árboles y arbustos nuevos de Venezuela* 21–22. 1923, *Contributions from the Gray Herbarium of Harvard University* 73: 42. 1924, *Phytologia* 9(6): 342. 1964

(Crushed leaves applied to contusions; crushed powdered leaves to dry up ulcers.)

in Peru: ají, cedro bordado, cedrorana, louro faia

Rourea Aublet Connaraceae

From the native name in Guiana; see *Flora Zeylanica* 192. 1747, *Species Plantarum* 2: 675. 1753, *Familles des Plantes* 2: 344, 530. 1763, Jean B.C.F. Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 1: 467, t. 187. (Toxic, poisonous. Whole plant and fruits antimalarial, febrifuge, antiinflammatory, for venereal diseases, jaundice, fevers. Fruits, leaves and stem astringent and febrifuge, for diarrhea, dysentery. Roots decoction for diarrhea, venereal diseases, also a prophylactic against tick fever and for treating headaches. Antiinflammatory and antidiarrheal effect of the aqueous leaf extract of *Byrsocarpus coccineus*, in the treatment of inflammation, arthritic conditions, diarrhea and dysentery.)

in Madagascar: hibaka, hibaky, kitsongô

in Malawi: tathanyerere

in Tanzania: hombo-kisogo, kisogo, liyenzi, mhombo, msitu, msogo

Rourea similis Blume (*Santaloides similis* (Blume) Kuntze)
Malaysia.

See *Museum Botanicum* 1: 264. 1850, *Revisio Generum Plantarum* 1: 155. 1891

(Roots decoction as a postpartum remedy. For boils, pound the roots with the leaves of *Carallia suffruticosa* and poultice.)

Malay names: petai-petai, ribu hutan jantan

Rourea volubilis Merr. (*Rourea heterophylla* Planch.)

Philippines. Vine

See *Linnaea* 23: 419. 1850, *Fl. Trop. Afr.* [Oliver et al.] 1: 456. 1868

(Fruits poisonous.)

Roureopsis Planch. Connaraceae

Resembling *Rourea* Aubl., see *Linnaea* 23: 423. 1850, *Genera Plantarum* 1: 431, 433–434. 1862 and *Pflanzenr.* IV. 127(Heft 103): 107, 1938, *Agricultural University Wageningen Papers* 89(6): 314. 1989.

Roureopsis obliquifoliolata (Gilg) G. Schellenb. (*Rourea adiantoides* Gilg; *Rourea fasciculata* Gilg; *Rourea obliquifoliolata* Gilg; *Roureopsis obliquifoliolata* G. Schellenb.)

Congo. Liane, flowers with long white petals and red-brown to yellow-green sepals, red fruits, shiny brown seeds

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 328. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 213. 1896 and *Beiträge zur Vergleichenden Anatomie und zur Systematik der Connaraceen* 28. 1910 [Mitteilungen aus dem Botanischen Museum der Universität Zürich. Zürich], *Fitoterapia* 72(3): 291–294. 2001

(Root extract antidiarrheal.)

in Cameroon: elende

in Central African Republic: elende, elendge

in Zaire: ndindimya

Royena L. Ebenaceae

For the Dutch botanist Adriaan (Adrianus) van Royen, 1704–1779, physician, 1730–1754 Director of Botanic Garden at Leyden, see G. Murray, *History of the collections contained in the Natural History Departments of the British Museum* 1: 178. 1904, Ethelyn Maria Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University* 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists* 3: 187. 1965.

Royena lucida L.

South Africa.

See *Species Plantarum* 1: 397. 1753 and *Fl. Southern Africa* 26: 69. 1963

(Used for impotency and barrenness.)

in English: African bladder-nut, blackbark, bladder-nut, Cape blackwood, Hottentots' cherry, wild coffee

in Southern Africa: swartbas, bostolbos, kraaibes-sie; mwanda (Venda); muKaza, Nyatswipa, muShanguru (Shona); uManzimane, umTimatane, umNqandane, umKhaze, isiNywane (Zulu); umKhaza, umTenatane, inTsanzimane (Xhosa)

Roylea Wallich ex Bentham Lamiaceae (Labiatae)

After the British (b. in India) botanist John Forbes Royle, 1800–1858 (d. Middx), traveller, physician, plant collector, 1833 Fellow of the Linnean Society, 1837 Fellow of the Royal Society, in Bengal (surgeon, East India Company), professor of materia medica, Curator Saharanpur Botanical Garden; see E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 654. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 187. 1965, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 237. Palermo 1988, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 598. 1994.

Roylea cinerea (D. Don) Baill. (*Ballota cinerea* D. Don; *Phlomis calycina* Roxb.; *Roylea calycina* (Roxb.) Briq.; *Roylea elegans* Wall.; *Stachys emodi* Hedge; *Stachys sericea* Wall. ex Benth.; *Stachys splendens* Wall.)

India. Fodder for goats and sheep

See *Prodromus Florae Nepalensis* 111. 1825, *Edwards's Botanical Register* 15: pl. 1289. 1829, *Histoire des Plantes* 11: 36. 1891

(Crushed leaves put on the head for cooling effect; leaves decoction given in fevers; leaves paste in tonsils and diabetes, also given to smell to stop bleeding from nose. Powdered roots used to cure pimples and stomach problems.)

in India: kadu, kadwo, karanoi, karuain, tita pati, titpati, tumria

Rubia L. Rubiaceae

Latin *herbam rubiam*, Latin *ruber*, *rubra*, *rubrum* 'red', a reddish dye from the roots is used in dyeing; Plinius and Vitruvius used *rubia*, *ae* for madder; see Carl Linnaeus, *Species Plantarum*. 1: 109. 1753, *Genera Plantarum*. Ed. 5. 47. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 590. 1830 and Salvatore Battaglia, *Grande dizionario*

della lingua italiana. XVII: 1–2. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Rubia cordifolia L. (*Galium cordifolium* (L.) Kuntze; *Galium cordifolium* Kuntze; *Rubia cordifolia* subsp. *pratensis* (Maxim.) Kitam.; *Rubia cordifolia* var. *pratensis* Maxim.)

Greece, South Africa. Herb, trailing, climbing, rambling, twining, scrambling, creeping, hispid, scabrid, sticky, viscid, prickly, brittle, roots brownish pink, quadrangular stem with strong recurved prickles, exstipulate whorled variable leaves, very small flowers yellow-green to red in terminal and axillary dichasial cymes, fleshy globose 1-seeded berries, a troublesome weed

See *Species Plantarum* 1: 109. 1753, *Systema Naturae*, ed. 12 3(app.): 229. 1768, *Revisio Generum Plantarum* 3(3): 119. 1898 and *Linzer Biologische Beiträge* 9: 203–212. 1978, *Plant Systematics and Evolution* 154: 213–223. 1986, *Cytologia* 52: 343–356. 1987, *Glimpses in Plant Research* 8: 177–244. 1988, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Folia Geobotanica et Phytotaxonomica* 30: 445–453. 1995, Tanaka, N., Koyama, T. & Murata, J. “The flowering plants of Mt. Popa, central Myanmar—Results of Myanmar-Japanese joint expeditions, 2000–2004.” *Makinoa* 5: 1–102. 2005

(Used in Ayurveda and Unani. Whole plant used for lung, kidney, blood purifier. Stem used in cobra bite and scorpion sting; paste of shoot to cure itches; leafy twig extract taken orally to expel placenta and as a postpartum remedy; roots and stems for stomachache in children. Roots antibacterial, febrifuge, anodyne, postpartum remedy, antiphlogistic, expectorant, sedative, astringent, diuretic, emmenagogue, styptic, tonic and vulnerary, used for fever, blood, impotency and barrenness; crushed roots for poisonous stings of insects and caterpillars; root paste applied for snakebite. Roots decoction an antidote for general poisoning and stomach disorders; gargled to treat toothache and mouth sores; roots juice in treating eye and ear troubles. Leaves infusion to treat diarrhea and stomachache; leaves smeared with salt and applied on skin diseases, on the infected part; crushed leaves applied to ulcers, sores, wounds. Magic, small portion of root put in a copper ring, the women wear this ring on the toe to stop the menstrual cycle; root juice as nasal drops to keep off evil spirits; piece of root worn as an amulet to relieve headache.)

Rubus multibracteatus H. Léveillé & Vaniot var. *demangei* H. Léveillé)

SE Asia, Indonesia. Shrub, climbing, prickly, woody, rambling, creeping, leaves variable, white flowers, red juicy edible fruit, young leaves eaten, invasive weed

See *Encyclopédie Méthodique, Botanique* 6(1): 247. 1804 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 11: 99–101. 1902 [*Bulletin de la Société d'Études Scientifiques d'Angers* 11(149–150): 99–101. 1902], *Bibliotheca Botanica* 17 Heft 72(1): 79–81, 83, f. 31. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 11(304–308): 548. 1913, *Icon. Pl. Formosan.* 3: 91. 1913, *Journal of the College of Science, Imperial University of Tokyo* 34(2): 154. 1913, *Sunyatsenia* 5(1–3): 72. 1940, *Flora Reipublicae Popularis Sinicae* 37: 160. 1985

(Used against fever and inflammation, poultice with the leaves. Roots infusion or decoction to treat dysentery, urinary trouble. A cold flowers infusion an ingredient in an oral remedy for anemia associated with gastro-intestinal bleeding and epigastric pain.)

in English: invasive bramble

in China: cu ye xuan gou zi

in Indonesia: bunga cekaner

Malay names: asam susok, tampu rengat

in Comoros: boamarita

Rubus allegheniensis Porter (*Rubus allegheniensis* L.H. Bailey; *Rubus allegheniensis* Porter var. *populifolius* Fernald; *Rubus attractus* L.H. Bailey; *Rubus auroralis* L.H. Bailey; *Rubus fissidens* L.H. Bailey; *Rubus longissimus* L.H. Bailey; *Rubus nigrobaccus* L.H. Bailey; *Rubus nuperus* L.H. Bailey; *Rubus pennus* L.H. Bailey; *Rubus rappii* L.H. Bailey; *Rubus separ* L.H. Bailey)

North America. Perennial subshrub, berries eaten

See *Flore des Environs de Spa* 2: 317. 1813, *Bulletin of the Torrey Botanical Club* 23(4): 153. 1896 and *Rhodora* 51(603): 47 (t. 1130, fig. 2). 1949, *Preslia* 70: 225–245. 1998

(Astringent, diuretic, stomachic, analgesic, stimulant, anti-inflammatory, antidote, blood purifier, postpartum remedy, for rheumatism, tuberculosis, sore throat, colds, cough, headaches, diarrhea, piles, urinary troubles, venereal diseases; infusion of roots taken by pregnant women threatened with miscarriage; root decoction used as an antidote for poison. Magico-religious beliefs, ritual, witchcraft medicine.)

in English: Alleghany blackberry, Allegheny blackberry, sow-teat blackberry

Rubus allegheniensis Porter var. *allegheniensis* (*Rubus allegheniensis* Porter var. *plausus* L.H. Bailey; *Rubus allegheniensis* Porter var. *populifolius* Fernald; *Rubus attractus* L.H. Bailey; *Rubus auroralis* L.H. Bailey; *Rubus fissidens* L.H. Bailey; *Rubus longissimus* L.H. Bailey; *Rubus*

nigrobaccus L.H. Bailey; *Rubus nuperus* L.H. Bailey; *Rubus pennus* L.H. Bailey; *Rubus rappii* L.H. Bailey; *Rubus separ* L.H. Bailey)

North America. Perennial subshrub, berries eaten

See *Flore des Environs de Spa* 2: 317. 1813, *Bulletin of the Torrey Botanical Club* 23(4): 153. 1896 and *Rhodora* 51(603): 47 (t. 1130, fig. 2). 1949, *Preslia* 70: 225–245. 1998

(Astringent, diuretic, stomachic, analgesic, stimulant, anti-inflammatory, antidote, blood purifier, postpartum remedy, for rheumatism, tuberculosis, sore throat, colds, cough, headaches, diarrhea, piles, urinary troubles, venereal diseases; infusion of roots taken by pregnant women threatened with miscarriage; root decoction used as an antidote for poison. Magico-religious beliefs, ritual, witchcraft medicine.)

in English: Alleghany blackberry, Allegheny blackberry, sow-teat blackberry

Rubus antennifer Hook. f.

India, Himalaya.

See *The Flora of British India* [J.D. Hooker] 2: 337. 1878

(Plant astringent. Roots juice astringent, given in diarrhea, dysentery.)

Rubus apetalus Poir. (*Rubus adolfi-friedericii* Engl.; *Rubus adolfi-friedericii* var. *rubristylus* Gust.; *Rubus borbonicus* Pers.; *Rubus ecklonii* Focke; *Rubus exsuccus* Steud. ex A. Rich.; *Rubus interjungens* Gust.; *Rubus malagassus* Focke; *Rubus pinnatifidus* Gust.; *Rubus rigidus* Sm.)

West Africa, Tanzania, South Africa. Shrub, bushy, scrambling, trailing, scandent, straggling, lianescent, tangled, hairy, woody, armed with hooked prickles, small pink-white scented flowers in loose hairy terminal heads, fleshy purple-black compound fruits, a very variable species, fruits for fodder, ripe sweet-acid fruits eaten raw, montane forest edge, grassland, riverine forest, roadsides

See *Encyclopédie Méthodique, Botanique* 6: 242. 1804, *Syn. Pl.* 2: 51. 1807, *Tentamen Florae Abyssinicae* ... 1: 256. 1848, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 4: 174, 176. 1874, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 8(2): 473–474. 1884 and *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 223. 1911, *Bothalia* 15: 591–596. 1985

(Antioxidant. Ripe fruits boiled in water, stirred and filtered, sugar added and the liquid drunk to treat anemia. Fruit and leaves, boiled, orally used for diseases of ear, nose and throat; leaves infusion for diabetes.)

in Kenya: bukararambi, mutare, ndaindai, obukararambi

in Madagascar: voaray

in Tanzania: iwero, lidoni, lidung'o, lumwino, mdung'o, mshaa, mtelia, ngayakujji, utonge, utongonya

in Zaire: amambombombombo

Rubus arcticus L. (*Cylactis arcticus* (L.) Raf. ex B.D. Jacks.)

North America. Perennial subshrub, herb, food

See *Hereditas* 91: 83–89. 1979, *Bot. Zhurn.* 65(1): 51–59. 1980, *Taxon* 30: 857–860. 1981, *Bot. Zhurn.* 67(6): 778–787. 1982, *Phytologia* 58(6): 383. 1985, *Korean J. Pl. Taxon.* 35: 129–142. 2005

(Astringent, stimulant, tonic, diuretic, stomachic.)

in English: Arctic blackberry, Arctic bramble, crimson-berry, crimson blackberry, crimson bramble

in China: bei xuan gou zi

Rubus arcticus L. subsp. *arcticus* (*Rubus arcticus* L. var. *pentaphylloides* Hultén)

North America. Perennial subshrub, herb, food

See *Arkiv för Botanik, Andra Serien* 7(1): 71. 1967[1968], *Hereditas* 91: 83–89. 1979, *Bot. Zhurn.* 65(1): 51–59. 1980, *Taxon* 30: 857–860. 1981, *Taxon* 31(2): 344–360. 1982, *Bot. Zhurn.* 67(6): 778–787. 1982, *Korean J. Pl. Taxon.* 35: 129–142. 2005

(Astringent, stimulant, tonic, diuretic, stomachic.)

in English: Arctic blackberry, Arctic bramble, crimson-berry, crimson blackberry, crimson bramble

Rubus argutus Link (*Rubus abundiflorus* L.H. Bailey; *Rubus betulifolius* Small; *Rubus floridensis* L.H. Bailey; *Rubus floridus* Tratt.; *Rubus incisifrons* L.H. Bailey; *Rubus koehnei* H. Lévy; *Rubus louisianus* A. Berger; *Rubus maucicola* Focke; *Rubus penetrans* L.H. Bailey; *Rubus rhodophyllus* Rydb.)

North America. Perennial subshrub, fruit for food

See *Enum. Hort. Berol. Alt.* 2: 60–61. 1822 and *Repert. Spec. Nov. Regni Veg.* 10: 121. 1911, *Biblioth. Bot.* lxxxiii. 37. 1914

(Astringent, tonic, diuretic, stomachic, analgesic, stimulant, anti-inflammatory, antidote, blood purifier, postpartum remedy, for rheumatism, tuberculosis, sore throat, colds, cough, headaches, diarrhea, piles, urinary troubles, venereal diseases; infusion of roots taken by pregnant women threatened with miscarriage. Magic, ritual, witchcraft medicine.)

in English: high-bush blackberry, prickly Florida blackberry, sawtooth blackberry, southern blackberry

in Hawaii: 'ohelo 'ele'ele

Rubus barbatus Edgew. (*Rubus barbatus* Fritsch; *Rubus nutans* Wall. ex G. Don, nom. illeg.)

Himalaya. Shrub, white flower, fruits edible

See *Gen. Hist.* 2: 538. 1832, *Trans. Linn. Soc. London* 20(1): 46 (45–46). 1846 and *Excursionsfl. Oesterreich* (Ed. 3). 215, in clavi. 1922

(Unarmed shrub, astringent, stomachic.)

Rubus biflorus Buch.-Ham. ex Sm.

China, Himalaya. Deciduous shrub, white flowers, edible fruits

See *The Cyclopaedia*; or, universal dictionary of arts, ... [Rees] 30: *Rubus* no. 9. 1819

(Root decoction or leaves infusion given in diarrhea and to stop bleeding.)

in China: fen zhi mei

in India: achnoi, akhreri, chanch, dher, hinsara

Rubus brassii Merr. & L.M. Perry

Solomon Islands. Shrub, straggling, climbing, unarmed, petals white, orange-red fruit

See *Journal of the Arnold Arboretum* 21(2): 182. 1940

(Stem sap extract drunk as a tonic.)

in Papua New Guinea: fapa

Rubus chamaemorus L. (*Rubus pseudochamaemorus* Tolm.)

China. Small herbaceous plant, perennial subshrub, fruit eaten raw or cooked, bogs, tundra, and open forests

See *Species Plantarum* 1: 494. 1753 and *Acta Biologica Cracoviensia, Series Botanica* 21: 31–63. 1978, *Taxon* 31(2): 344–360. 1982, *Botaniceskij Žurnal SSSR* 67(3): 360–365. 1982, *Izvestiia Akademii Nauk Belorusskoi SSR: Seriya Biologicheskikh Nauk* 6: 3–8. 1985, *Watsonia* 19: 134–137. 1992, *Preslia* 69: 289–310. 1997

(Febrifuge, antimicrobial. Leaves infusion employed in cystic pain and dropsy. Root in the treatment of coughs, fevers and consumption. Roots decoction used as ‘woman’s medicine’; a decoction of the root and lower stem used by barren women to become pregnant. Berries a source of vitamin C.)

in English: bake apple, baked apple, baked apple berry, cloudberry, malka, salmonberry, yellow berry

in China: xing an xuan gou zi

Rubus chingii H.H. Hu (The specific epithet honors the collector of the type specimen, R.C. Ching.)

China. Shrub, lianescent, leaves simple, inflorescences terminal on short branchlets, petals white, the very sweet fruit eaten fresh and also used for making jam, jelly, and various drinks, including wine, found in broad-leaved evergreen forests on hills, coniferous forests

See *Journal of the Arnold Arboretum* 6(3): 141–142. 1925, *J. Arnold. Arbor.* 7(1): 70. 1926, *Sinensia* 2(10): 124–125. 1932, *Chem. Pharm. Bull. (Tokyo)* 35(7): 3021–4. 1987, *Journal of Japanese Botany* 67: 270–275. 1992, *Life Sciences* 72(3): 329–338. 2002

(Antioxidant, the fruit, roots, and leaves used for impotence, to benefit the kidney, and arrest seminal discharge and excessive urination. Diterpene glycosides from leaves.)

in English: palmleaf raspberry

in China: zhang ye fu pen zi, hua dong fu pen zi

Rubus chingii H.H. Hu var. ***chingii*** (*Rubus officinalis* Koidzumi; *Rubus palmatus* Hemsley, non Thunberg; *Rubus septemlobus* H.L. Li)

China. Shrub, lianescent, Leaves palmately 5-parted

See *Botanical Magazine* 44(518): 105. 1930, *J. Arnold Arbor.* 26: 62. 1945, *Chem. Pharm. Bull. (Tokyo)* 35(7): 3021–4. 1987

(Antioxidant.)

in China: zhang ye fu pen zi

Rubus chingii H.H. Hu var. ***suavissimus*** (S. Lee) L.T. Lu (*Rubus suavissimus* S. Lee)

China. Leaves palmately parted, leaves rich in sugar and used to make a sweet tea, in broad-leaved evergreen forests on hills, coniferous forests

See *Guihaia* 1(4): 17. 1981, *Chem. Pharm. Bull. (Tokyo)* 35(7): 3021–4. 1987, *Acta Phytotaxonomica Sinica* 38(3): 280–281. 2000

(Antioxidant. Diterpene glycosides from fruits.)

in China: tian cha

Rubus cissooides A. Cunn. (*Rubus australis* G. Forst. var. *cissooides* (A. Cunn.) Focke)

New Zealand. Twiner, climber, along the midribs of the leaves backward pointing spikes or prickles, sweet juicy yellow berry, fruits can be eaten raw

See *Florulae Insularum Australium Prodrromus* 40. 1786, *Annals of Natural History* 3(17): 245. 1839 and *Bibliotheca Botanica* 17(Heft 72(2)): 220. 1911

(Postpartum remedy, laxative. Leaves infusion drunk for cough, sore throat, congestion of the chest; leaves chewed and swallowed for stomachache.)

in English: bush lawyer

in New Zealand: taramoa, tataramoa

Rubus cochinchinensis Trattinnick (*Rubus fruticosus* Loureiro, non Linnaeus, nom. illeg., non *Rubus fruticosus* L.; *Rubus playfairii* Hemsley)

SE Asia, Vietnam, China. Climbing shrub, woody vine, creeping, branchlets with curved small prickles, leaves palmately compound, white flowers, inflorescences terminal, calyx campanulate densely tomentose, aggregate fruit black at maturity, in open places

See *Flora Cochinchinensis* 1: 325. 1790, *Rosacearum Monographia* 3: 97. 1823, *Journal of the Linnean Society, Botany* 23(154): 235–236. 1887 and *Phytochemistry* 50(3): 463–465. 1999

(Fruit and roots used to treat constipation and hepatitis.)

in English: five leaved blackberry

in China: she pao jin, wu yeh p'ao

Rubus corchorifolius Linnaeus f. (*Rubus althaeoides* Hance; *Rubus arisanensis* Hayata; *Rubus arisanensis* var. *horishaensis* Hayata; *Rubus corchorifolius* fo. *glaber* (Matsum.) Focke; *Rubus corchorifolius* fo. *oliveri* (Miq.) Focke; *Rubus corchorifolius* f. *roseolus* Z.X. Yu; *Rubus corchorifolius* var. *glaber* Matsumura; *Rubus corchorifolius* var. *oliveri* (Miquel) Focke; *Rubus involucratus* Focke; *Rubus kerrifolius* H. Léveillé & Vaniot; *Rubus oliveri* Miquel; *Rubus otophorus* Franchet; *Rubus shinkoensis* Hayata; *Rubus suishaensis* Hayata; *Rubus vaniotii* H. Léveillé & Vaniot; *Rubus villosus* Thunberg)

China. Shrub, erect, climbing, branchlets prickly hairy, whitish flowers, red edible fruits, fresh fruit used for making jam, drinks and wine, waste places, sunny slopes

See *Supplementum Plantarum* 263. 1781 [1782], *Flora Japonica*, ... 218. 1784, *Annales des Sciences Naturelles; Botanique*, série 4 15: 223. 1861, *Prolus. Fl. Japan* 2: 223. 1866, *Plantae Delavayanae* 205. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 391. 1900, *Botanical Magazine* 15(178): 157. 1901, *Bulletin de l'Académie Internationale de Géographie, Botanique* 11(149–150): 100–101. 1902, *Repertorium Specierum Novarum Regni Vegetabilis* 5(93–98): 280–281. 1908, *Bibliotheca Botanica* 17(Heft 72(2)): 131–132. 1911, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 95–96. 1911, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 3: 87–88. 1913, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 7: 6–9, 15, f. 5b, 12c. 1918, *Bulletin of Botanical Research* 11(1): 53. 1991, *Journal of Japanese Botany* 68: 159–165. 1993, *Journal of Medicinal Food* 8(1): 107–109. 2005

(The fruit, seeds, and roots astringent. Stems and roots a source of tannin. Anti-HIV protease activity.)

in China: shan mei

Rubus cuneifolius Pursh (*Bossekia parviflora* (Nutt.) Greene; *Rubacer parviflorum* (Nutt.) Rydb.; *Rubacer parviflorus* (Nutt.) Rydb.; *Rubus chapmanii* L.H. Bailey; *Rubus cuneifolius* Pursh var. *angustior* L.H. Bailey; *Rubus cuneifolius* Pursh var. *spiniceps* L.H. Bailey; *Rubus cuneifolius* Pursh var. *subellipticus* Fernald; *Rubus dixiensis* Davis, Fuller & Davis; *Rubus nutkanus* Moc. ex Ser. var. *parviflorus* (Nutt.) Focke; *Rubus parviflorus* Nutt.; *Rubus parviflorus* Nutt. var. *bifarius* Fernald; *Rubus parviflorus* Nutt. var. *grandiflorus* Farw.; *Rubus parviflorus* Nutt. var.

heteradenius Fernald; *Rubus parviflorus* Nutt. var. *hypomalacicus* Fernald; *Rubus parviflorus* Nutt. var. *parvifolius* (A. Gray) Fernald; *Rubus pascuus* L.H. Bailey; *Rubus triphyllus* Thunb.)

North America. Shrub or subshrub, perennial, fruits eaten fresh

See *Flora Americae Septentrionalis*; or, ... 1: 347. 1814[1813], *The Genera of North American Plants* 1: 308–309. 1818 and *Bulletin of the Torrey Botanical Club* 30(5): 274. 1903, *Leaflets of Botanical Observation and Criticism* 1(15): 211. 1906, *Bibliotheca Botanica* 17(Heft 72[2]): 124. 1911, *Gentes Herbarum*; occasional papers on the kind of plants 5(6): 440–442, f. 200. 1943, *Preslia* 70: 225–245. 1998

(Stem and leaves infusion drunk for diarrhea. Tonic, stimulant, emetic, antiemetic, for burns, wounds, chest disorders, blood spitting, menstrual troubles.)

in English: American bramble, Chinese raspberry, Gozard's curse, native raspberry, salmonberry, sand blackberry, sand bramble, small-leaf bramble, thimbleberry, western thimbleberry

in China: hao tian biao

in Japan: munjuru-ichubi, nawa-shiro-ichigo

in South Africa: Amerikaanse braambos, sandbraam

Rubus delavayi Franchet (*Rubus duclouxii* H. Léveillé)

China. Shrub, erect, branchlets with short curved prickles, leaves imparipinnate usually 3-foliolate, inflorescences terminal or axillary, white petals, aggregate fruit orange-red

See *Plantae Delavayanae* 205. 1890 [*Plantae Delavayanae* sive Enumeratio plantarum quas in provincia chinensi Yun-nan, collegit J.-M. Delavay ...] and *Repertorium Specierum Novarum Regni Vegetabilis* 6(107–112): 111. 1908

(Fruit astringent, stimulant, stomachic.)

in English: Yunnan raspberry

in China: san ye xuan gou zi, tao kou tz'u

Rubus doyonensis Handel-Mazzetti

China. Shrubs, scandent, branchlets with sparse curved minute prickles, leaves simple, inflorescences terminal, petals white, aggregate fruit black

See *Symbolae Sinicae* 7(3): 487. 1933

(Antiseptic, for wounds, cuts, boils, sprains.)

in China: bai ru

Rubus duthieanus N.P. Balakr. (*Rubus fasciculatus* Duthie, nom. illeg.)

Himalaya, India. Evergreen shrub, sarmentose, white flowers, edible fruits

See *Flora* 41: 182. 1858 and *Annals of the Royal Botanic Garden, Calcutta*. 9(1): 39–40, pl. 48. 1901, *J. Bombay Nat. Hist. Soc.* lxxvii. 58. 1970

(Astringent, stimulant, tonic.)

in India: hinssar

Rubus ellipticus Sm. (*Rubus ellipticus* var. *obcordatus* Focke; *Rubus flavus* D. Don; *Rubus flavus* Buch.-Ham. ex D. Don; *Rubus gowreepful* Roxb.; *Rubus rotundifolius* Wall.; *Rubus rotundifolius* Reinw. ex Miq.; *Rubus rotundifolius* F. Krašan; *Rubus rotundifolius* Royle; *Rubus rotundifolius* Bloxam; *Rubus rotundifolius* Weihe ex Focke; *Rubus rotundifolius* P.J. Müll.)

Nepal, Himalayas, India. Vigorous, stout, evergreen, weedy shrub, thorny, densely woolly with red bristles and prickles, ascending, rambling, scrambling or climbing, spreading, underground shoots and root suckers, light green oval leaves growing in a three-leaflet pattern along the stem, leaf tip rounded, flowers white, fruit yellow-orange, highly nutritive juicy sweet fruits relished by all, a pest of forests and pastures, forming impenetrable thickets, birds and mammals eat the fruit, hermaphrodite flowers pollinated by insects, nutritious tender leaves browsed by goats and sheep

See *Hort. Bengal.* 39. 1814, *The Cyclopaedia*; or, universal dictionary of arts, ... 30: *Rubus* No. 16. 1819, *Prodromus Florae Nepalensis* 234. 1825, *Numer. List* [Wallich] n. 730. 1829, *Ill. Bot. Himal. Mts.* [Royle] 203. 1835, *Fl. Ned. Ind.* 1(1): 384. 1856 and *Bibliotheca Botanica* 17(Heft 72(2)): 198. 1911, *Silvae Geneticae* 22: 188–190. 1973, *Blumea* 27: 75–113. 1981, *Cell and Chromosome Research* 12: 19–21. 1989, *Journal of Japanese Botany* 67: 270–275. 1992, *Flora of Ecuador* 56: 1–151. 1996, *J. Econ. Taxon. Bot.* 27(2): 354–357. 2003

(Young leaves infusion taken to stop diarrhea. Young stems debarked and chewed to cure dysentery; stem pith eaten for indigestion. Roots and young shoots used to cure colic pains, stomachache; fruits and crushed roots given to cure dysentery. Roots decoction in the treatment of fever, colic, stomach problems, whooping cough, dysentery, intestinal worms and food poisoning; roots boiled in water along with roots of *Leucas zeylanica* and the decoction taken for malaria and fevers; root extract applied on cuts and wounds; dried powdered roots made into a paste and taken in jaundice; root juice drunk for stomachache; roots descending from branches made into a paste and prescribed in cases of indigestion; decoction of root bark and tender shoots taken for malaria, fevers and stomachache. Inner bark used as a renal tonic and antidiuretic. Ritual, magico-religious beliefs, spiritual, anti-witchcraft, emotional, fresh branches kept on the main door of a house to ward off from the evil spirits and ominous things.)

in English: Asian wild raspberry, broadleafed bramble, Ceylon blackberry, cheeseberry, golden evergreen raspberry, Himalayan yellow raspberry, Molucca berry, Molucca

raspberry, oval-leaf bramble, oval-leaves bramble, raspberry, robust blackberry, wild blackberry, wild raspberry, yellow bramble, yellow Himalayan raspberry, yellow raspberry

in Fiji: soni, wa ngandongandro, wa sori, wa votovotoa

Boulay; *Rubus rosulentus* P.J. Mull.; *Rubus suberectus* Sm. subsp. *plicatus* (Weihe & Nees) Corb.)

Cosmopolitan. Shrub, scrambling, sprawling, rambling, vigorous growth, prickly, rooting at the nodes, papery leaves, white flowers, an aggregate of a vast number of apomictic microspecies, noxious invasive weed, plant pest, hard plant to eradicate, fruits eaten

See *Species Plantarum* 1: 492–494. 1753, *Hist. Pl. Palat.* 2: 58. 1777, *Arbust. Amer.* 137. 1785, *Tent. Fl. Germ.* 1: 220. 1788, *Flora Cochinchinensis* 1: 325. 1790, *Oekon. Fl. Wetterau* 2: 236. 1800, *Rubi German.* 15, 24, t. 1. 1822, *Flora Bostoniensis...* . second edition 199–200. 1824, *Fl. Schweiz* 485. 1839, *Journal of the Linnean Society, Botany* 20: 136. 1883 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 1–208. 1902[1903], *Plant Systematics and Evolution* 150: 281–290. 1985, *Bot. Jahrb. Syst.* 106: 293. 1986, *Taxon* 41: 573. 1992, *Preslia* 70: 33–50. 1998

(Leaves infusion for chest ailments, bleedings, diabetes and as an astringent for diarrhea and dysentery; leaves chewed in cough; juice of fresh leaves given with honey in cough and respiratory disorders. Root decoction in cough, whooping cough, dysentery; root or bark decoction taken for dysentery. Powdered fruits a remedy for relaxed bowels.)

in English: blackberry, European blackberry, shrubby blackberry

in India: akhi, alish, kanachi

Rubus glomeratus Blume (*Rubus glomeratus* E. Barber; *Rubus glomeratus* Figert; *Rubus moluccanus* var. *glomeratus* (Blume) Backer)

Borneo.

See *Species Plantarum* 1: 492–494. 1753, *Species Plantarum* 2: 1197. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 17: 1111. 1827 [Oct 1826–Nov 1827], *FBI* 2: 330. 1878 and *Schoolflora voor Java* 458. 1911, *Abh. Nat. Ges. Gorlitz* xxvii. 382. 1911, *Blumea* 29(2): 346. 1984, *Plant Systematics and Evolution* 152: 211–218. 1986

(Roots of *Scleria purpurascens* together with roots of *Areca catechu* and *Rubus glomeratus* boiled together and the extract drunk as an astringent for diarrhea.)

Malay name: tampuringet

Rubus hastifolius H. Léveillé & Vaniot (*Rubus rufo-lanatus* Chang; *Rubus rufolanatus* H.T. Chang)

China. Shrubs, evergreen, scandent, branches with sparse short prickles, inflorescences terminal or axillary, white petals, aggregate fruit purplish black

See *Bulletin de la Société Botanique de France* 51: 218. 1904, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1: 8. 1972

(Antiseptic.)

in China: ji ye xuan gou zi

Rubus hawaiiensis A. Gray (*Rubus hawaiiensis* A. Gray var. *inermis* Wawra; *Rubus hawaiiensis* A. Gray)

North America. Perennial subshrub

See *United States Exploring Expedition, Phan.* 15: 504, t. 56. 1854 [Vol. 15, Part 1 in 1854]

(Emetic, antiemetic.)

in English: Hawaii blackberry

in Hawaii: 'akala, 'akalakala, kala

Rubus himalayense Royle ex D. Don (*Rubus himalaicus* Kuntze)

Himalaya. Shrub, pink flowers

See *Meth. Sp.-Besch. Rubus* 66. 1879

(Root paste applied on eyelids to cure eye infection.)

in India: darbag

Rubus hirsutus Thunberg (*Rubus hirsutus* Hayata, nom. illeg., non *Rubus hirsutus* Thunb.; *Rubus hirsutus* Wimm., nom. illeg., non *Rubus hirsutus* Thunb.; *Rubus hirsutus* Wirtg., nom. illeg., non *Rubus hirsutus* Thunb.; *Rubus stephanandria* H. Lévl.; *Rubus thunbergii* Siebold & Zucc.; *Rubus thunbergii* var. *glabellus* Focke)

Asia temperate. Deciduous shrub, fruit eaten raw or cooked, slopes, roadsides, waste places

See *Diss. Bot.-Med. de Rubo* 7. 1813, *Prodr. Fl. Rheinl.* 413. 1841, *Flora von Schlesien*, ed. 3 3(Aufl.): 627. 1857 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 1: 227. 1911, *Acta Hort.* 112: 180. 1980, *Journal of Japanese Botany* 67: 270–275. 1992

(Juice of the bruised leaves in the treatment of ophthalmia. Fruit used to promote fertility, strengthen virility.)

in China: peng lei

Rubus hirsutus Thunberg var. ***hirsutus*** (*Rubus argyi* H. Léveillé; *Rubus hirsutus* var. *argyi* (H. Léveillé) Nakai; *Rubus stephanandria* H. Léveillé; *Rubus talaikiaensis* H. Bailey; *Rubus strigosus* Michx. var. *arizonicus* (Greene) Kearney & Peebles; *Rubus strigosus* Michx. var. *canadensis* (Richardson) House)

North America. Perennial subshrub

See *Flora Boreali-Americana* 1: 297. 1803, *Florula belgica, opera majoris prodromus, auctore ...* 94. 1827, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 17(2): 161. 1872 and *Leaflets of Botanical Observation and Criticism* 1(19): 238. 1906, *Bibliotheca Botanica* 17(Heft 72[2]): 209. 1911

(Emetic, analgesic, stomachic, cathartic, antihemorrhagic, astringent, tonic, stimulant, for sore eyes, bowel trouble, dysentery, diarrhea, measles, stomachache.)

in English: American raspberry, grayleaf red raspberry

Rubus imperialis Cham. & Schltldl.

South America. Shrub, scandent, woody or semi-woody, white flowers, red-black fleshy fruits

See *Species Plantarum* 1: 492–494. 1753, *Linnaea* 2: 13. 1827 and *Z. Naturforsch.* 57c, 272–276. 2002, *J. Pharm. Pharmaceut. Sci.* 8(1): 63–68. 2005, *Journal of Pharmacy and Pharmacology* 58(12): 1669–1675. 2006

(Antispasmodic, antinociceptive, hypoglycemic, antibacterial, antiallergic, antiasthmatic, used for the treatment of intestinal disorders, diabetes, pains.)

in Brazil: mora branca, mora do mato

Rubus irenaeus Focke

Asia temperate, China. Shrub, trailing vine, flowering branches arising from rhizomes, large rounded evergreen alternate leaves, weak prickles, inflorescences terminal, corymbs or subracemes, white petals, red aggregate fruits, fresh fruit used for jam and wine, groundcover, forest, slopes

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 394–395. 1900, *Chinese Traditional and Herbal Drugs* 34(5): 394–406. 2003

(Roots and young plants tonic, astringent.)

in English: bigleaf raspberry

in China: hui mao pao

Rubus ledermannii Focke

New Guinea.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56: 79. 1916

(Used as a tonic.)

Rubus leucanthus Hance (*Rubus glaberrimus* Champion ex Benth; *Rubus leucanthus* var. *paradoxus* (S. Moore) F.P. Metcalf; *Rubus leucanthus* var. *villosulus* Cardot; *Rubus paradoxus* S. Moore)

China, Laos, Thailand. Shrub, climbing, woody vine, branchlets with sparse curved prickles, leaves imparipinnate 3-foliolate, corymbose inflorescences terminal on lateral short branchlets, white petals, aggregate fruit red, open places, along stream and rivers, along road, open wet slopes, on forest border

See *Annales Botanices Systematicae* 2: 468. 1852, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 80–81. 1852, *Journal of Botany, British and Foreign* 16(185): 132. 1878 and *Notulae Systematicae. Herbarium du Museum de Paris* 3: 306. 1914, *Lingnan Science Journal* 19(1): 30. 1940

(Edible fruit and roots tonic, astringent.)

in English: white-flowered raspberry

in China: bai hua xuan gou zi

Rubus leucodermis Douglas ex Torrey & A. Gray (*Melanobatus leucodermis* (Douglas ex Torr. & A. Gray) Greene; *Rubus leucodermis* Torr. & A. Gray; *Rubus occidentalis* L. var. *leucodermis* (Douglas ex Torr. & A. Gray) Focke)

North America. Perennial subshrub, vine

See *A Flora of North America: containing ...* 1(3): 454. 1840, *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 4: 147. 1874 and *Leaflets of Botanical Observation and Criticism* 1(19): 243. 1906

(Emetic, analgesic, stomachic, cathartic, antihemorrhagic, astringent, tonic, stimulant, for sore eyes, wounds and cuts, bowel troubles, dysentery, diarrhea, measles, stomachache, influenza.)

in English: blackcap blackberry, whitebark raspberry

Rubus lucens Focke

India. Scandent shrub, quadrangular prickly stem, red drupes enclosed in the calyx, ripe fruits eaten

See *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 4: 199–200. 1874, *FBI* 2: 338. 1878

(Antiemetic, emetic, for stomachache, gastritis.)

in China: guang liang xuan gou zi

in India: sum-hal

Rubus macilentus Cambess. (*Rubus macilentus* Jacquem.; *Rubus macilentus* Genev.)

India, Himalaya. Shrub, edible fruit

See *Mém. Soc. Acad. Maine Loire* xxviii. (1872) 42. 1872

(Astringent, tonic.)

in China: xi shou xuan gou zi

in India: hinsula

Rubus macraei A. Gray

North America. Perennial subshrub

See *U.S. Expl. Exped., Phan.* 15: 505, t. 57. 1854

(Antiemetic, emetic, for stomachache, gastritis.)

in Hawaii: 'akala, 'akalakala, kala

Rubus moluccanus L. (*Rubus glomeratus* auct. non Blume)

SE Asia, Himalayas, N. Australia. Scandent shrub, prickly, straggling, scrambling, climber, stems and leaves armed with medium-sized spines, simple leaves large and lobed, flowers in axillary or terminal racemes, corolla white or red, pointed sepals usually silky hairy, fruit bright red eaten raw or cooked, a serious pest, noxious weed, can spread via runners that sprout when they touch the ground, rainforest, wetlands

See *Species Plantarum* 1: 492–494. 1753, *Species Plantarum* 2: 1197. 1753, *FBI* 2: 330. 1878 and *Blumea* 29(2): 346. 1984, *Plant Systematics and Evolution* 152: 211–218. 1986

(Fruit astringent, hypotensive, antispasmodic, a remedy for the bed-wetting, nocturnal micturation of children. Roots decoction for dysentery; paste of roots applied on cuts for blood clotting and to prevent swelling; roots and leaves for cough; roots chewed in toothache; roots of *Scleria purpurascens* together with roots of *Areca catechu* and *Rubus moluccanus* boiled together and the extract drunk as an astringent for diarrhea. Leaves juice abortifacient, astringent and emmenagogue; leaves chewed and the juice swallowed to produce abortion; leaves water extract drunk to induce abortion; leaf decoction given in joint pain; leaves taken internally for diarrhea and as an abortifacient. Sap from the leaves or stems applied to eye diseases; stem sap drunk for diarrhea or dysentery; young stems, tendrils, decoction drunk to treat stomachache; sap from young shoots drunk in a single dose to induce labor. Magico-religious beliefs, twigs on the altar in the farm to ensure a good harvest.)

in English: black cherry, bramble, broad-leafed bramble, eelkek, hawk raspberry, Molucca bramble, Molucca raspberry, Queensland bramble, wild blackberry, wild bramble, wild raspberry

in Fijian: soni, wa ngandrondro, wa sori, wa votovotoa, wa vuka, wagadogadro, wavotovotoa, wavuka

in India: bipen kanta, katsoi, katsol, katson, soh nybbah, suf-okji, thekhi sembok, sumahar-a-rikang, voknuto

in Indonesia: berete, hareueus, karembang ne langkow, pidang pelaki

in Lepcha: safok jyu

in Malaysia: akar kupor, akar kupur, tempo ranak, tampuringet

in Pacific: kohkihl, kwalo faraka'u

in Papua New Guinea: auiteteya, fapa, laolo, si'imu, yakekituwa

in Philippines: bunut, dagamit, sapinit

in Thailand: som kung

in Vietnam: dum molucca

Rubus nepalensis Hort. (*Rubus nepalensis* (Hook.f.) Kuntze; *Rubus nutans* Wall. ex G. Don, nom. illeg.; *Rubus nutans* Wall.; *Rubus nutans* Vest)

Himalaya. Prostrate, shrub or undershrub, prickly, pinkish flowers, edible fruits

See *Numer. List* [Wallich] n. 738. 1829, *Gen. Hist.* 2: 538. 1832 and *J. Jap. Bot.* 65(6): 187. 1990

(Root paste applied externally on burns and scalds.)

in India: anchu, gangoor

(Hallucinogenic drink from the root extract. Crushed leaves decoction febrifuge. Root extract/juice antiseptic, for wounds, cuts, stomachache, as an antidote in snakebite; root part applied on swellings. Berries laxative and diuretic; fruit eaten raw to treat headache; fruits a remedy to cure children suffering of bedwetting at night; fruit extract given in dismenorrhea; crushed fruits applied on skin diseases and itching. Young shoots and roots antioxidant, radical scavenging activity, used for the treatment of diabetes mellitus, eaten for stomachache. Stem used for cooling. Magico-religious beliefs, ritual, ceremonial, anti-witchcraft medicine; leafy twigs as an antidote to snakebite.)

in English: black raspberry, Ceylon raspberry, hill raspberry, Java bramble, Mahabaleshwar raspberry, Mysore raspberry, raspberry, snowpeaks raspberry, wild raspberry

in Kenya: bukararambi, engaiyagut, kitae, maratua, matoje, momonwo, momoon, monmonwo, monmoon, mtoje, mutare, ndae, ndaendae, ndaindai, ndandai, ndare, mowonwo, obukararambi, tangaimamiet

in China: hong pao ci teng

in India: acchi, achhein, anchi, anchu, ballo, chaunch, chaus, daru (a drink prepared from the root extract), gauriphal, gowriphal, gunacha, hinsalu, hisal, hisalu, hisau, hisol, huftoo, jempensu tenakla, jenkinsu-tongtenkla, kachpan (a drink prepared from the root extract), kachpani (a drink prepared from the root extract), kala, kala hinsalu, kala hisalu, kala hissar, kalahisalu, kalahisar, kalawar, kale hinure, kali, kali anchhi, kalianchhi, kallanchhi, kalo aselu, kandiara, kandiari, karim cheechi, katrana, kharmuch, kolalinda, komuli,

mulli, oche, shongho katei shi, surganch, valiya cheechi kurangu mullu

in Nepal: kalo aselu, marphulang

in Philippines: pinit

in Tibetan: kandakari

in Ecuador: mora de monte, mora silvestre

Rubus occidentalis L. (*Melanobatus occidentalis* (L.) Greene; *Melanobatus occidentalis* Greene; *Rubus occidentalis* H. Lév., nom. illeg.; *Rubus occidentalis* Bol.; *Rubus occidentalis* Georgi; *Rubus occidentalis* L. var. *pallidus* L.H. Bailey)

North America. Perennial subshrub

See *Species Plantarum* 1: 493. 1753 and *Leaflets of Botanical Observation and Criticism* 1(19): 243. 1906, *Bibliotheca Botanica* 17(Heft 72(2)): 201. 1911, *Castanea* 63(4): 423. 1988, *J. Wuhan Bot. Res.* 11: 289–292. 1993, *Preslia* 69: 289–310. 1997

(Analgesic, astringent, antirheumatic, stomachic, emetic, purgative, cathartic, expectorant, for rheumatism, back pain, gonorrhoea, tuberculosis, cough, whooping cough, boils, sore eyes, sores, diarrhoea, diarrhoea with blood, bowel complaint, stomachache, toothache, menstrual problems. Magic, ceremonial, ritual, witchcraft medicine.)

in English: black cap, black raspberry, thimbleberry

Rubus odoratus L. (*Bossekia odorata* (L.) Greene; *Bossekia odorata* Greene; *Rubacer odoratum* (L.) Rydb.; *Rubacer odoratum* Rydb.; *Rubacer odoratus* (L.) Rydb.)

North America. Perennial subshrub

See *Species Plantarum* 1: 494. 1753 and *Bulletin of the Torrey Botanical Club* 30(5): 274, pl. 13, fig. 6. 1903, *Leaflets of Botanical Observation and Criticism* 1(15): 210–211. 1906, *Castanea* 63(4): 420. 1988, *Preslia* 70: 225–245. 1998

(Analgesic, astringent, antirheumatic, blood purifier, stomachic, emetic, purgative, laxative, cathartic, diuretic, expectorant, postpartum remedy, for rheumatism, back pain, gonorrhoea, venereal diseases, tuberculosis, colds, cough, whooping cough, boils, sore eyes, sores, diarrhoea, bowel and kidney complaints, stomachache, toothache, menstrual problems. Magic, ceremonial, ritual, witchcraft and protection medicine.)

in English: flowering raspberry, purple-flowering raspberry, purpleflowering raspberry, thimbleberry

Rubus paniculatus Sm. (*Rubus paniculatus* Schldl. ex Link; *Rubus paniculatus* Schlecht. ex Link; *Rubus paniculatus* Moon; *Rubus paniculatus* Roxb.; *Rubus paniculatus* C.B. Clarke)

China, Nepal. Evergreen rambling shrub, white flowers, edible fruits

See s 39. 1814, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 61. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 560. 1825, *J. Linn. Soc., Bot.* 15: 140. 1876 [1877 publ. 1876]

(Leaf paste applied to treat sprains and skin diseases.)

in India: hinsar, kala akhi, kantula

in Nepal: me pulan

Rubus parvifolius L. (*Rubus parvifolius* subvar. *subconcolor* (Cardot) Masamune; *Rubus parvifolius* var. *subconcolor* (Cardot) Makino & Nemoto; *Rubus parvifolius* var. *triphyllus* (Thunberg) Nakai; *Rubus pauciflorus* Baker; *Rubus taquetii* H. Léveillé; *Rubus triphyllus* Thunberg; *Rubus triphyllus* var. *eglandulosus* L.H. Bailey; *Rubus triphyllus* var. *subconcolor* Cardot)

China. Shrub, often quite prostrate, arching branches, branchlets with soft hairs and sparse curved prickles, leaves imparipinnate 3–5-foliolate, inflorescences terminal corymbose, petals pink to purplish red, aggregate fruit red, fruit eaten raw, young plants used as a substitute for tea, the stems and roots a source of tannin, clearings, roadsides, waste places, slopes

See *Species Plantarum* 2: 1197. 1753, *Flora Japonica*, ... 215. 1784 and *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1675–1678. 1989, *Journal of Hokkaido University of Education: Section IIB* 40: 19–30. 1990, *Zhongguo Zhong Yao Za Zhi* 15(7): 427–9, 447. 1990, *Cytologia* 56: 151–156. 1991, *Investigatio et Studium Naturae* 12: 48–65. 1992, *Cytologia* 58: 217–221. 1993, *Journal of Japanese Botany* 71: 333–337. 1996, *J. (Fruits eaten to treat stomachache.)

in China: shi sheng xuan gou zi

in India: chal chal, shol shol

Rubus schottii Pohl ex Focke

South America.

See *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 4: 157–158. 1874

(Fruit used in magic rituals, procedure before fishing, to hit the target.)

Rubus sellowii Cham. & Schltdl.

South America, Brazil.

See *Linnaea* 2(1): 15–16. 1827

(Fruit used in magic rituals, procedure before fishing, to hit the target.)

Rubus steudneri Schweinf.

East Africa, Burundi, Tanzania. Climbing shrub, scrambling, hairy, stout, hooked prickles, grey-green stems, leaves dark green, edible fruits dark red to black

See *Species Plantarum* 1: 492–494. 1753, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 18: 669. 1868 and *Ethiopian Pharmaceutical Journal* 25(2): 103–110. 2007

(A root decoction taken as a remedy for indigestion. Antioxidant, used for the treatment of diabetes mellitus.)

in East Africa: engaiyagut, mutare, tagaimamiet

in Tanzania: iwero, lidoni, lidung'o, lumwino, mdung'o, mshaa, mtelia, ngayakuji, nkenene, utonge, utongonya

Rubus ulmifolius Schott

South America.

See *Species Plantarum* 1: 492–494. 1753, *Isis* oder encyclopädische Zeitung 5: 821. 1818 and *Gayana, Botánica* 42: 1–157. 1985, *Flora Ilustrada de Entre Ríos (Argentina)* 6(3): 2–6, 55–56, 69, 89–97, 225–230. 1987, *Lagascalia* 15: 269–282. 1990, *Preslia* 70: 33–50. 1998

(For diabetes.)

Rubus wallichianus Wight & Arn. (*Rubus ellipticus* Sm. subsp. *fasciculatus* (Duthie) Focke; *Rubus ellipticus* var. *fasciculatus* (Duthie) Masam.; *Rubus erythrolasius* Focke; *Rubus fasciculatus* Duthie, nom. illeg., non *Rubus fasciculatus* P.J. Müll.; *Rubus pinfaensis* H. Lév. & Vaniot)

China, India. Shrub, straggling, bristly, spiny, white petals, orange aggregate fruit

See *The Cyclopaedia*; or, universal dictionary of arts, ... 30: *Rubus* No. 16. 1819, *Catalogue of Indian Plants* 61. 1833 and *Annals of the Royal Botanic Garden. Calcutta.* 9(1): 39–40, pl. 48. 1901, *Bulletin de la Société d'Agriculture, Sciences et Arts de la Sarthe* 39: 320. 1904, *Bibliotheca Botanica* 17(Heft 72(2)): 197, 199, f. 79. 1911, *Annual Reports of the Taihoku Botanic Garden* 2: 129. 1932, *Arboretum Kórnickie* 42: 101–110. 1997

(Antibacterial, antinociceptive. Religious, stems used for fires in temple.)

in India: melli

Rubus xanthocarpus Bureau & Franchet (*Rubus sitiens* Focke; *Rubus tibetanus* Franch.; *Rubus tibetanus* Focke, non Franchet; *Rubus xanthocarpus* var. *tibetanus* (Focke) Cardot)

E. Asia, China. Shrub or subshrub, erect, branched or not branched, with sparse long needle-like prickles, woody creeping rhizomes, leaves imparipinnate 3-foliolate, inflorescences terminal or axillary, petals white, aggregate fruit orange-yellow, fruit eaten fresh or cooked, noxious invasive, slopes, forests, rocky ravines, roadsides

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 221. 1885 [1886], *Journal de Botanique (Morot)* 5(3): 46–47. 1891 and *Bibliotheca Botanica* 17(Heft 72(1)): 29, 117. 1910, *Bulletin du Muséum National d'Histoire Naturelle* 23(4): 274. 1917, *Journal of Wuhan Botanical Research* 11: 289–292. 1993, *Arboretum Kórnickie* 42: 101–110. 1997, *Preslia* 70: 33–50. 1998

(Root juice drunk for stomachache. Pentacyclic triterpenoids.)

in English: orange raspberry

in China: huang guo xuan gou zi, ti mei tzu

Rudbeckia L. Asteraceae

After the Swedish botanist Olaus (Olof) Olai Rudbeck (Rudbeckius), 1660–1740, physician, M.D. Utrecht 1690, professor of anatomy and botany, traveller, teacher of Linnaeus,

he was father of the Swedish natural scientist Johan Olof Rudbeck (1711–1790); according to Stearn the name commemorates also the Swedish physician and botanist Olaus (Olof) Johannis Rudbeck (1630–1702, b. Västerås, d. Uppsala), father of O.O. Rudbeck; see *Species Plantarum* 2: 906–907. 1753, *Dictionnaire des Sciences Naturelles* [Second edition] 35: 273–274. 1825, *Dictionnaire des Sciences Naturelles* [Second edition] 38: 17. 1825, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 78. 1834, *Transactions of the American Philosophical Society*, new series, 7: 355. 1840, *A Flora of North America: containing ...* (Torr. & A. Gray) 2(2): 312. 1842, *Synoptical Flora of North America* 1(2): 263. 1884 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917–1933, Garrison and Morton, *Medical Bibliography.* 1097, 1098. New York 1961, J.H. Barnhart, *Biographical Notes upon Botanists.* 3: 188. 1965, T.W. (Antioxidant.)

Rudbeckia hirta L. (*Echinacea purpurea* var. *serotina* (Nutt.) L.H. Bailey; *Echinacea serotina* (Nutt.) DC.; *Helianthus hirtus* (L.) E.H.L. Krause; *Rudbeckia amplexens* T.V. Moore; *Rudbeckia brittonii* Small; *Rudbeckia hirta* L. var. *brittonii* (Small) Fernald; *Rudbeckia hirta* L. var. *hirta*; *Rudbeckia hirta* L. var. *monticola* (Small) Fernald; *Rudbeckia hirta* var. *serotina* (Nutt.) Core; *Rudbeckia monticola* Small; *Rudbeckia purpurea* var. *serotina* Nutt.; *Rudbeckia serotina* Nutt.; *Rudbeckia serotina* (Nutt.) Sweet)

North America. Herb, annual, biennial or perennial, rough-stemmed plant, bristly-hairy leaves, daisy-like flowers, yellow rays, cone/dome-shape brown central disk

See *Species Plantarum* 2: 907. 1753, *The Genera of North American Plants* 2: 178. 1818, *The British Flower Garden*, ... 1: pl. 4. 1823, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 80–81. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 554. 1836 and *The Standard Cyclopedia of Horticulture* 2: 1088. 1914, *Castanea* 27: 62. 1962, *Taxon* 30: 514. 1981

(Plant antioxidant, antiinflammatory, anti-HIV, anti-HBV. Roots anthelmintic, for menstrual disorders, colds, earache, dropsy, colds, snakebites, sores; a wash for sores and snakebites; root juice to treat earache.)

in English: black-eyed Susan, blackeyed Susan, hairy coneflower

Rudbeckia hirta L. var. ***angustifolia*** (T.V. Moore) Perdue (*Rudbeckia divergens* T.V. Moore; *Rudbeckia floridana* T.V. Moore var. *angustifolia* T.V. Moore)

North America.

See *Pittonia* 4(23): 176–178. 1900, *Rhodora* 59(708): 296. 1957[1958]

(Analgesic, febrifuge, for headache, fevers.)

in English: black-eyed Susan, blackeyed Susan

Rudbeckia laciniata L. (*Helianthus lacinatus* (L.) E.H.L. Krause; *Rudbeckia laciniata* L. var. *hortensis* L.H. Bailey; *Rudbeckia laciniata* L. var. *laciniata*)

Europe, North America. Perennial subshrub, herbaceous, erect, leafy branching stems, solitary large flower head, drooping yellow ray florets

See *Species Plantarum* 2: 904–907. 1753 and *J. Sturm's Flora von Deutschland* (ed. 2) 13: 164. 1905, Skidmore, L.V., Peterson, N.F. "Observations on the toxicity of golden glow (*Rudbeckia laciniata*) to swine and other animals." *J. Am. Vet. Med. Assoc.*, 34: 655–662. 1932, *Rhodora* 50: 171. 1948, *American Journal of Botany* 64: 680–686, 791–798. 1977, *Taxon* 31(2): 344–360. 1982, *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 34: 21–25. 1987, *Annals of the Missouri Botanical Garden* 74: 432–433. 1987, *Compositae Newsletter* 27: 7–10. 1995, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995

(A remedy for delayed menstruation, and for vaginal discharges; not for use during pregnancy; roots infusion to relieve indigestion; flowers in a poultice applied to burns. Experiments on sheep and swine have shown that some symptoms of toxicity can occur, although animals generally refuse to eat the unpalatable plants. Animal poisoning by this plant should be considered unlikely.)

in English: coneflower, cut-leaf coneflower, cut-leaved coneflower, golden glow, lance-leafed coneflower

in Spanish: dormilon

Rudbeckia laciniata L. var. ***ampla*** (A. Nelson) Cronquist (*Obeliscotheca ampla* (A. Nelson) Nieuwl. & Lunell; *Rudbeckia ampla* A. Nelson; *Rudbeckia laciniata* subsp. *ampla* (A. Nelson) W.A. Weber)

North America. Perennial subshrub, herbaceous, erect, leafy branching stems, solitary large flower head, drooping yellow ray florets

See *Familles des Plantes* 2: 128. 1763 and *Bulletin of the Torrey Botanical Club* 28(4): 234–235. 1901, *American Midland Naturalist* 5(3): 62. 1917, *Vascular Plants of the Pacific Northwest* 5: 280. 1955, *Phytologia* 51(6): 375. 1982

(Roots infusion to relieve indigestion; flowers in a poultice applied to burns.)

in English: coneflower, cut-leaf coneflower, cut-leaved coneflower, golden glow, lance-leafed coneflower

Rudbeckia serotina (Nutt.) Sweet (*Echinacea purpurea* (L.) Moench var. *serotina* (Nutt.) L.H. Bailey; *Echinacea serotina* (Nutt.) DC.; *Rudbeckia hirta* var. *serotina* (Nutt.) Core; *Rudbeckia purpurea* var. *serotina* Nutt.; *Rudbeckia serotina* Nutt.)

North America, Europe.

See *Species Plantarum* 2: 904–907. 1753, *Methodus Plantas Horti Botanici* ... 591. 1794, *The Genera of North American Plants* 2: 178. 1818, *The British Flower Garden*, ... 1: pl. 4. 1823, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 80–81. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 554. 1836 and *The Standard Cyclopedia of Horticulture* 2: 1088. 1914, *Castanea* 27: 62. 1962, *Taxon* 30: 514. 1981, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Taxon* 50: 1172. 2001

(Ingesting plants caused poisoning in cattle and swine. Symptoms mild. Poisoning from this plant is unlikely.)

in English: black-eyed Susan

Rudgea Salisbury Rubiaceae

For the English (b. Evesham, Worcs) botanist Edward Rudge, 1763–1846 (d. Evesham), antiquary, 1802 Fellow of the Linnean Society, 1805 Fellow of the Royal Society, author of *Plantarum Guianae rariorum icones et descriptiones*. Londini 1805[–1806] and (presumably) of *Memoir* [of Anna Rudge], the botanist Samuel Rudge (1727–1817) was his uncle. London [1836?]; see *Transactions of the Linnean Society of London* 8: 327. 1807 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 178. London 1904, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold*

Arboretum of Harvard University. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 188. Boston 1965, *Mem. New York Bot. Gard.* 17: 396. 1967, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 598–599. 1994.

Rudgea viburnoides (Cham.) Benth. (*Coffea viburnoides* Cham.)

South America, Brazil.

See *Species Plantarum* 1: 172. 1753, *Linnaea* 9: 228. 1834, *Linnaea* 23: 458. 1850

(Bark for rheumatism.)

in Brazil: congonha-de-bugre, cotó-cotó

Ruellia L. Acanthaceae

For the French (b. Soissons) botanist Jean Ruel (Joannes Ruellius, Jean de la Ruelle, du Ruel), 1474–1537 (Paris), physician, herbalist to François I of France, translator of Dioscorides into Latin, obtained a canonry at Notre-Dame Cathedral, author of *De natura stirpium libri tres*. Parisiis 1536. See Scribonius Largus, *De compositionibus medicamentorum liber unus*, antehac nusquam excusus: *Joanne Ruellio doctore medico castigatore*. Parisiis 1529, Leodegarius a Quercu [pseud., i.e. Léger Duchesne] [–1588], *In Ruellium De Stirpibus Epitome*. Parisiis [1539], Carl Linnaeus, *Species Plantarum*. 2: 634–635. 1753, *Genera Plantarum*. Ed. 5. 283. 1754, *The Civil and Natural History of Jamaica* in Three Parts 261. 1756, *Systema Naturae*, Editio Decima 2: 1120. 1759, *Plantae Asiaticae Rariores* 3: 75, 81–82. 1832, *An Introduction to the Natural System of Botany* 444. 1836, *Linnaea* 16: 298. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 197. 1847, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 775. 1852, Ernst H.F. Meyer, *Geschichte der Botanik*. IV: 249–253 and II: 26–39. Königsberg 1854–1857, *Fl. Austral.* 4: 545 (–546). 1868, *Nat. Pflanzenfam.* [Engler & Prantl] 4(3b): 311. 1895 and *Verh. Ned. Akad. Wetensch., Afd. Natuurk.*, Tweede Sect. 45: 15. 1948, Richard J. Mallet, in *D.S.B.* 11: 594–595. 1981, *Bot. J. Linn. Soc.* 107(1): 80. 1991, *Pl. Syst. Evol.* 180(3–4): 221. 1992, Daniel, T.F. “The Acanthaceae of California and the Peninsula of Baja California.” *Proc. Calif. Acad. Sci.* 49: 309–403. 1997, *Austrobaileya* 5(4): 651–659. 2000, *Taxon* 58(3): 893–906. 2009.

Ruellia californica (Rose) I.M. Johnst. (*Calophanes californica* Rose; *Calophanes californica* Rose ex Vasey & Rose; *Ruellia californica* I.M. Johnst.)

Mexico, USA.

See *The British Flower Garden*, ... series 2 2: t. 181. 1833, *Contributions from the United States National Herbarium*

1: 85. 1890 and *Proceedings of the California Academy of Sciences*, Series 4, 12: 1171. 1924

(Tea made from the leaves taken for dizziness, the same liquid used as a shampoo for headache.)

Ruellia patula Burkill & C.B. Clarke (*Ruellia patula* Salzm. ex Nees; *Ruellia patula* Oliv.; *Ruellia patula* Jacq.; *Ruellia patula* Hort. Par. ex Nees)

Tropical Africa.

See *Prodr.* (DC.) 11: 126, 135. 1847, James, Frank Linsly (1851–1890), *The unknown horn of Africa*. An exploration from Berbera to the Leopard River. By F.L. James ... With additions by James Godfrey Thrupp ... The map by W.D. James and Percy Aylmer. The narrative illustrations by Rose Hake, and the drawings of the fauna by K. Keuleman, from specimens chiefly collected by E. Lort-Phillips. London [etc.]: G. Philip & son, 1888, *Flora of Tropical Africa* 5: 45. 1899 and *Taxon* 30: 79–80. 1981

(Leaves analgesic, febrifuge.)

Ruellia repens L. (*Dyschoriste repens* Kuntze; *Ruellia repens* Wall.; *Ruellia repens* Burm.f.; *Ruellia repens* Blanco; *Ruellia repens* (Nees) Angely; *Ruellia repens* Ruiz ex Nees; *Ruellia repens* Ruiz; *Ruellia repens* Hort. Madr. ex Nees)

Burma, Malaysia.

See *Mantissa Plantarum* 1: 89. 1767, *Fl. Ind.* (N.L. Burman) 135, t. 41, f. 2. 1768, *Numer. List* [Wallich] n. 2384. 1830, *Fl. Filip.* [F.M. Blanco] 493. 1837, *Prodr.* (DC.) 11: 109, 124. 1847, *Revis. Gen. Pl.* 2: 486. 1891 and *Fl. Analit. Fitogeogr. Sao Paulo* 5: 923. 1970 [publ. 1971]

(Whole plant poulticed for infantile diseases. For ulcers, cuts, toothache, pound the leaves and poultice with them.)

Malay names: daun patok tuwauh, dras malam, rumput halir, rumput halyor, seranam

Ruellia tuberosa L.

Jamaica. Perennial herb, procumbent, suffrutex, thick elongated fusiform fascicled roots, shoots erect, corolla trumpet-shaped mauve to bluish-purple, straight capsule

See *Species Plantarum* 2: 634–635. 1753, *Synoptical Flora of North America* 2(1): 325. 1878 and *Rhodora* 78: 17–24. 1976, *Berichte der Schweizerischen Botanischen Gesellschaft* 86: 152–203. 1976, *Journal of Cytology and Genetics* 15: 90–92. 1980, *Cytologia* 48: 491–504. 1983, *Lutukka* 5: 67–70. 1989, *Austrobaileya* 5(4): 651–659. 2000

(Plant decoction antacid, in indigestion and stomachache; plant and roots decoction taken internally for urinary troubles. Leaf paste for eczema; leaf decoction drunk by pregnant women for cold in the body. Roots infusion for oliguria, heat, fever, influenza, venereal diseases, constipation; root decoction diuretic and aphrodisiac. A paste made of root and few peppers is taken to cure stomachache. Tuber poultice for swelling, joint pain.)

in English: blue bell, manyroots, meadow-weed, menow weed, minnie root

in Peru: ipeca de flor roja, ipecacuanha de flor rosa

in India: chatpati, chetapatakaayala mokka, ghabri, jalvarkur, jurbula, ote sirka ba, tapas kaaya, vedikaichedi

Ruizia Pav. Monimiaceae

For the eminent Spanish (b. Burgos Province) botanist and traveller Hipólito Ruíz López, 1754–1815 (d. Madrid), plant collector, explorer, studied under the Spanish botanist Casimiro Gómez de Ortega (1740–1818), 1777–1778 in Peru and Chile (a French-Spanish expedition, with Joseph Dombey), his writings include *Quinología*. Madrid 1792, *Memoria de las virtudes y usos de la raíz de la planta llamada Yallhoy en el Perú*. Madrid 1805, he is best remembered for [in collaboration with José Antonio Pavón y Jiménez] *Flora peruviana, et chilensis prodromus*. Madrid 1794 and *Flora peruviana, et chilensis*. Madrid 1798–1802. See *Sag. Stor. Nat. Chili* 185, 350. 1782, *Fl. Peruv. Prodr.* 135, t. 29. 1794 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 178. London 1904, August Weberbauer, *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 2–4. Leipzig 1911, R.E.G. Pichi Sermolli, “Le collezioni cedute da J. Pavón a F.B. Webb e conservate nell’Herbarium Webbianum.” in *Nuovo Giorn. Bot. Ital.*, ser. 2. 56(4): 699–701. 1950 [1949], E. Alvarez López, “Algunos aspectos de la obra de Ruíz y Pavón.” *Anales Inst. Bot. Cavanilles*. 12(1): 5–111. 1954 and “Comentario sobre *Laurus* de Ruíz y Pavón, con notas de Dombey acerca de algunas de sus especies.” *Anales Inst. Bot. Cavanilles*. 13: 71–78. 1955, Arthur R. (Ingesting large quantities of the plants caused poisoning and death in sheep. Oxalate crystals are found in sheep sorrel. Under certain circumstances, nitrates can accumulate in sufficient quantity to cause poisoning. The crystal can accumulate in the kidneys and brain causing renal failure and nervous disorders. Several sheep in New Zealand were poisoned and died. Used for toothache; mixed with *Asclepias humilis* employed as laxative. Veterinary medicine, crushed roots as a laxative and to relieve biliousness.)

in English: dock, field sorrel, sheep sorrel, sorrel

in India: chuk, chuka-palam, chukapalam, chutrika

in Panama: ruibarbillo

in Lesotho: khamane

Rumex alpinus Linnaeus

Europe.

Žurn.* (Moscow & Leningrad) 74: 120–123. 1989, *Verh. Zool.-Bot. Ges. Wien* 133: 301–318. 1996

(Leaves laxative, resolutive, blood purifier, to cure throat sores and respiratory disorders.)

in English: monk's rhubarb, patience dock, patience herb, spinach dock

in Italian: erba pazienza, lapazio, romice domestica

in Peru: huacho, hualtata, lengua de vaca

in India: shommena, soma

Rumex scutatus L. (*Acetosa scutata* Mill.)

India.

See *Species Plantarum* 1: 337. 1753 and *Taxon* 28: 635–636. 1979, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Used in Ayurveda.)

in English: French sorrel, garden sorrel

in India: ambavati, amrula, changeri, surlove

Rumex usambarensis (Dammer) Dammer (*Rumex nervosus* var. *usambarensis* Dammer; *Rumex trinervius* Rech. f.; *Rumex usambarensis* Dammer ex Peter; *Rumex usambarensis* (Engl. ex Dammer) Dammer)

Tanzania. Shrub, herb, weak, woody-stemmed, climber, straggling, erect, scrambling, hastate leaves somewhat succulent, tiny flowers purple-red to yellow, inflorescence a many-branched slender leafless panicle, flowers in fascicles on filiform pedicels, fruiting sepals pale green tinged pink, nut trigonous, fodder, bee forage, leaves eaten raw or cooked as a vegetable, raw stems chewed for their sour taste, tall grassland, montane grassland, near swamps, disturbed areas, grassland thicket, at forest edge

See *Symb. Bot.* (Vahl) i. 27. 1790 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 38: 61. 1905, *Repert. Spec. Nov. Regni Veg. Beih.* 40(2): 199. 1932, *Oesterr. Bot. Z.* 99: 523. 1952

(Leaves infusion to treat coughs, malaria, rheumatism, stomachache and to reduce gas in the stomach. Leaves astringent. Roots used in the treatment of scabies; roots decoction drunk to treat smallpox. A medicine for cows.)

in English: sorrel

in Kenya: bule, enkaisijoi, enkaiswishoi, kinyonywe, kyongonywe, mindeiywet, mindoywet, msheshere, mugagatio, mwakiserere

in Tanzania: angasunjwe, engaisijoi, engotsijoi, enkaisijoi, enkaiswishoi, gentamana, ghamba, kambu, kiweriweri, linyimbili, mchachu, mchumvichumvi, mdoda, mwanywa, nkambu, nywanywa

Rumex venosus Pursh (*Lapathum venosus* (Pursh) Lunell; *Lapathum venosum* Lunell)

North America.

See *Species Plantarum* 1: 333–338. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Flora Americae Septentrionalis*; or, ... 2: 733. 1814 [1813] and *American Midland Naturalist* 4(7): 302. 1916, Dickie, C.W., Hamann, M.H., Carroll, W.D., Chow, F. "Oxalate (*Rumex venosus*) poisoning in cattle." *J. Am. Vet. Med. Assoc.*, 173: 73–74. 1978, *Taxon* 31(2): 344–360. 1982

(Poisoning of cattle; sickness and death resulted after large amounts of the plants were ingested. Oxalate crystals in the aboveground parts of the plant, if sufficient quantity of plant material is ingested the oxalates combine with systemic

calcium ions to form insoluble calcium oxalate, causing functional hypocalcemia in acute cases.)

in English: sour greens, veined dock, veiny dock, wild begonia, wild hydrangea, winged dock

***Rumex vesicarius* L.**

From Mauritania and Mali, Sudan, Ethiopia and Somalia. Herb, annual or perennial, shrubby, rhizomatous, strongly branched from the base, triangular to oblong-triangular alternate simple leaves, inflorescence a dense axillary or terminal panicle, fruit a trigonous nut, leaves eaten raw or cooked, a famine food eaten as a vegetable, grazed by livestock

See *Species Plantarum* 1: 336–337. 1753 and *Candollea* 45: 65–74. 1990, *Berichte des Geobotanischen Institutes der Eidgenössische Technische Hochschule Stiftung Rübel* 56: 142–149. 1990, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 3: 229–250. 1992

(Used in Ayurveda, Unani and Sidha. Leaves tonic, aperient, astringent, diuretic and cooling. Seed cooling, roasted and used in the treatment of dysentery. Juice of the plant cooling and astringent, useful in treating stomachache, the pain of toothache and to check nausea.)

in English: bladder dock, rosy dock, sorrel

in India: ambari, ambat chuka, amla, amlabhedaka, amlanayaka, amlankusha, amalavitcam, amlasara, amlavastuka, amlaveta, amlavetasa, amlavetasah, bhedana, bhedi, bhima, bodhi, bun palung, casahasrajita, cataveti, chaakavath, chooka, chuka, chuka sak, chukaavij, chukka, chukka kura, chukkakoora, chukkakoora aaku, chukkanghkirai, chukki soppu, chukra, chukrika, cukkankirai, cukkay kirai, cukki, cukkiram, cukkukkirai, cukra, gulmaha, gulmaketu, hamaz, hammaz, humarbostani, humbijit, hummaz, kommatikkirai, kravarti, mahakshara, mansadravi, palak, palan sag, phalamla, piracutakkirai, piracutam, rajamla, raktasara, rasamla, sahasravedhi, satavedhi, shakkan kirai, shakkankirai, shankadravi, shatavedhi, shukkan-kirai, shukku-kuraku, shutavedhi, sookan keeray, sulenimbu, tukhm hummaz, torongkhongchak, tursak, turshah, turshumuk, varabhida, varangi, vedhaka, velikayakirai, velikayam, vetasamla, viramla

in Tibet: tsu kri ka rnam-gcig

***Rumex violascens* Rech. f.**

Mexico, USA.

See *Repertorium Specierum Novarum Regni Vegetabilis* 39(10–25): 171–172. 1936, *Publ. Field Mus. Nat. Hist., Chicago, Bot. Ser.*, 17: 131. 1937

(A whole plant decoction to disinfect and cure sores.)

Rungia Nees Acanthaceae

After Rungia, a well-known Indian botanical artist of Robert Wight; see Nathaniel Wallich, *Plantae Asiaticae rariores*. 3:

77, 109. London (Aug.) 1832, Robert Wight, *Icones plantarum Indiae orientalis*, or figures of Indian plants. Madras [1838–] 1840–1853 and M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 304. Dehra Dun 1985, *J. Trop. Subtrop. Bot.* 15(6): 549. 2007.

***Rungia parviflora* Nees**

India.

See *Plantae Asiaticae Rariores* 3: 110. 1832 and *Cytologia* 41: 283–290. 1976, *Ber. Schweiz. Bot. Ges.* 86: 152–203. 1976, *Taxon* 28: 630–631. 1979, *Taxon* 29: 358–360. 1980

(Used in Ayurveda.)

in India: parpata, pindi, pindikunda, punaka-pundu, punaka-pundu, punnaka-p-puntu, tavasumurungi

***Rungia pectinata* (L.) Nees** (*Justicia pectinata* L.; *Rungia parviflora* Nees var. *pectinata* (L.) C.B. Clarke; *Rungia pectinata* var. *clarkeana* Handel-Mazzetti)

China, India. Small herb

See *Species Plantarum* 1: 15–16. 1753, *Amoenitates academicae* ... 4: 299. 1760, *Plantae Asiaticae Rariores* 3: 77, 109. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 469. 1841 and *Symbolae Sinicae* 7(4): 898. 1936, *Taxon* 28: 630–631. 1979, *Journal of Palynology* 17: 93–102. 1981, *Indian Journal of Botany* 5: 7–12. 1982, *Journal of Cytology and Genetics* 22: 151–155. 1987

(Plant juice to treat cuts and wounds, a decoction given in measles. Bruised leaves applied to contusions. Leaf juice aperient, cooling, for indigestion and gastric problems, given to children suffering from smallpox; leaf decoction spray kills bedbugs.)

in Bangladesh: krebuchi

in China: hai er cao

in India: bir lopong arak, chhotosibjata, pindi

in Nepal: bisaune jhar

***Rungia repens* (L.) Nees**

India.

See *Species Plantarum* 1: 15. 1753

(Used in Ayurveda and Sidha. Dried powdered plant given in fever and cough.)

in India: cataikkaranti, cayacutani, ghatipitpapada, karuro-man, kharmar, kharmor, kodaga saale gida, kodaga saleh, kodagasaale gida, kodagasalai, kodagasaleh, kotaculi, kotacari, kotacuri, kotakacalai, maram, palakavelli, parpata, parpatha

***Rungia wightiana* Nees**

India.

See *Plantae Asiaticae rariores*. 3: 110. 1832

(Leaves and flowers made into a paste consumed with honey for gastric complaints and giddiness.)

in India: kaattupatchaikuring

Ruscus L. Asparagaceae (Liliaceae, Ruscaceae)

Latin *ruscum*, *rustum*, *rustum ex rubus* ‘butcher’s broom’; see *Species Plantarum* 2: 1041. 1753 and *Fl. Pyren.* (Bubani) 4: 121. [Dec 1901–Feb 1902], Yeo, Peter Frederick (1929–2010), “A Contribution to the taxonomy of the genus *Ruscus*.” *Notes R. Bot. Gdn Edinb.*, 28: 237–264. 1968, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 549–550. Firenze 1994.

Ruscus aculeatus L. (*Oxymyrsine pungens* Bubani; *Ruscus aculeatus* f. *pumilus* Druce; *Ruscus aculeatus* var. *angustifolius* Boiss.; *Ruscus flexuosus* Mill.; *Ruscus laxus* Sm.; *Ruscus parasiticus* Gueldenst.; *Ruscus ponticus* Woronow)

Pacific, Europe to Medit.

See *Species Plantarum* 2: 1041. 1753, *Gard. Dict.*, ed. 8. n. 6. 1768, *Trans. Linn. Soc. London* 3: 334. 1797 and *Sched. Herb. Fl. Cauc.* Fasc. VII. 50. 1916, *Bot. Soc. Exch. Club Brit. Isles* 9: 471. 1931, *Inform. Bot. Ital.* 10: 421–465. 1978, *Naturalia monspeliensia. Série botanique*. 30: 1–27. 1979, *Taxon* 28: 629. 1979, *Proceedings of the Indian Science Congress Association* 71(3–vi): 76. 1984, *Godishen Zbornik Biologija Prirodno-Matematichki Fakultet na Univerzitetot Kiril i Metodij* 39–40: 353–365. 1989, *Regnum Veg.* 127: 83. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Novosti Sist. Vyssh. Rast.* 36: 223. 2004, *Contact Dermatitis* 54(1): 60. 2006, *J. Pharmacol. Sci.* 108(2): 198–205. 2008, *International Angiology: A Journal of the International Union of Angiology* 29(6): 525–532. 2010, *Journal der Deutschen Dermatologischen Gesellschaft* 8(11): 866–873. 2010

(In the treatment of chronic venous disorders, can reduce edema in chronic venous insufficiency. Allergic contact dermatitis to ruscogenins.)

in English: box-holly, butcher’s broom, knee holly

in Arabic: khizana

Ruscus colchicus Yeo (*Platyruscus colchicus* (Yeo) A.P. Khokhr. & V.N. Tikhom.)

Turkey.

See *Feddes Repert.* 73: 18. 1966, *Byull. Moskovsk. Obshch. Isp. Prir., Otd. Biol.*, n.s., 98(4): 93. 1993, *Phytochemistry* 70(17–18): 2078–2088. 2009

(Steroidal glycosides from the leaves.)

Ruscus hypoglossum L. (*Platyruscus hypoglossum* (L.) A.P. Khokhr. & V.N. Tikhom.; *Ruscus alexandrinus* Garsault; *Ruscus humilis* Salisb., nom. superfl.; *Ruscus hypoglossum*

var. *laticladodia* Yalt.; *Ruscus hypophyllum* var. *hypoglossum* (L.) Baker; *Ruscus troadensis* E.D. Clarke)

Turkey, Europe.

See *Sp. Pl.*: 1041. 1753, *Prodr. Stirp. Chap. Allerton*: 255. 1796, *Trav. Var. Eur.* 2: 146. 1812, *J. Linn. Soc., Bot.* 14: 630. 1875 and Maire, R. *Flore de l’Afrique du Nord* 5: 1–307. Paul Lechevalier, Paris. 1958 [as *Ruscus hypophyllum*.], *Notes Roy. Bot. Gard. Edinburgh* 28: 16. 1967, *Fitoterapia* 73(7–8): 583–596. 2002, *Phytochemistry* 69(3): 729–737. 2008

(Steroidal sapogenins and sterols in the rhizomes.)

Ruscus hypophyllum L. (*Platyruscus hypophyllum* (L.) A.P. Khokhr. & V.N. Tikhom.; *Ruscus lugubris* Salisb., nom. superfl.)

North Africa, Europe. A host of plant-parasitic nematodes

See *Sp. Pl.*: 1041. 1753, *Prodr. Stirp. Chap. Allerton*: 255. 1796, *Trav. Var. Eur.* 2: 146. 1812, *J. Linn. Soc., Bot.* 14: 630. 1875 and *Notes Roy. Bot. Gard. Edinburgh* 28: 16. 1967, *J. Nematol.* 25(2): 312–314. 1993, *Phytochemistry* 69(3): 729–737. 2008

(Steroidal glycosides.)

Ruta L. Rutaceae

Latin *ruta*, *ae* ‘rue, bitterness, a bitter herb, unpleasantness’ (Plinius), Greek *rhyte*, *peganon*; Akkadian *ratu*, *retu* ‘to make firm, fortify’, Hebrew *ratam* ‘to bind fast’; Akkadian *pahu*, *pehu* ‘to close’; see Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 550. Firenze 1994.

Ruta angustifolia Pers.

Mediterranean. Herb, erect, woody based, glaucous leaves glandular, strong smelling, culinary herb

See *Species Plantarum* 1: 383–384. 1753 and *Ciencia e Cultura (Sao Paulo)* 35: 190–193. 1983, *Plant Systematics and Evolution* 146: 13–30. 1984

(Rubefacient, anti-aphrodisiac, anthelmintic, antispasmodic, anti-epileptic, emmenagogue, febrifuge; leaf sap used as eardrops for earache, leaves an ingredient of a mixture for coughs. Oil blistering the skin. Plant potentially toxic and carcinogenic when consumed orally, can produce dermatitis when touched. Veterinary medicine, emmenagogue.)

in Indonesia: anruda busu, daun inggu, godong minggu, inggu

in Malaysia: aruda, sadal

in Vietnam: [aa]n h[uw][ow]ng, c[uwr]u l[ys] h[uw][ow]ng

Ruta chalepensis L. (*Ruta bracteosa* DC.; *Ruta chalepensis* Wall.)

Mediterranean, cultivated. Herb, erect, woody based, leaves glandular strong smelling, petals fringed, capsule glabrous

See *Species Plantarum* 1: 383–384. 1753, *Mantissa Plantarum* 1: 69. 1767, *Prodr.* (DC.) 1: 710. 1824, *Numer. List* [Wallich] n. 7113. 1832 and *Plant Systematics and Evolution* 146: 13–30. 1984, *Caryologia* 38: 335–346. 1985

(Whole plant molluscicidal, bitter, laxative, tonic, digestive, diuretic, sedative, antibacterial, antifertility, rubefacient, anti-aprodisiac, anthelmintic, antispasmodic, anti-epileptic, emmenagogue, febrifuge. Leaves infusion abortifacient and emmenagogue, used to treat earache; mashed leaves applied to relieve snakebite, headache, wounds, sore ears, swellings, rheumatism; leaf paste applied all over the body against fever; leaves crushed and inhaled for giddiness. Oil blistering the skin, plant potentially toxic, phototoxic. Veterinary medicine, emmenagogue.)

in English: fringed rue

in Arabic: fidjel, fidjla, shadhab, shathab

in India: erumul, kadaka mere, nagadali, sadab

in Indonesia: daun inggu, godong minggu

in Malaysia: aruda, sadal

in Vietnam: c[uwr]u l[ys] h[uw][ow]ng

Ruta graveolens L. (*Ruta hortensis* Mill.)

S. Europe, N. Africa. Small, bluish, shrublike, perennial herb, leaves aromatic, fruit a capsule

See *Species Plantarum* 1: 383–384. 1753 and *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, *Plant Systematics and Evolution* 146: 13–30. 1984, *Regnum Veg.* 127: 83. 1993

(Used in Ayurveda, Unani and Sidha. Plant potentially toxic to lethal, irritant, skin irritation, blistering, phototoxic, phytophotodermatitis, dermatosis, erythema; ingestion may be fatal. Leaves and juice for fevers, colds, cough, typhoid, convulsions in children and infants. Herb abortifacient, antibacterial, anti-tuberculosis, anticonvulsant, antispasmodic, used in hysteria, amenorrhea; plant boiled with garlic and the bark of *Vernonia arborea* a remedy for epigastric pain and urinary tract disorders; plant decoction taken in case of difficult childbirth. Insect repellent; included in a complex lotion applied to various muscular aches and pains; included in an oral remedy for menstrual disorders in young girls. Leaves and stem decoction and tea used for regulating fertility; bark of *Dalbergia latifolia* pounded with leaves of *Ruta graveolens* along with little water and the extract rubbed over the body as a febrifuge. Powdered dried leaves given to children in pneumonia. Ceremonial medicine, ritual, magic.)

in English: common rue, countryman's treacle, garden rue, herb of grace, herb of repentance, rue

in Paraguay: ruda

in Southern Africa: binnewortel, wynruit, wynryk; tloro (Sotho)

in China: chou cao, yun hsiang tsao

in India: arooda, arruda, arud, aruda, arudu, aruta, aruvada, aruvadam, aruvadana, aruvata, arvada, arvadau, arvata, barge sudab, brahmi, isband, burg-i-sudab, burg sudab, cantiravallari, catamurkkam, catamurkkan, catamurk-kappuntu, catapalai, catappilai, catappilaiceti, catappu, catappuyilai, cataputpam, cimaiccatappilai, citeviputpi, comalatai, cupika, cupikappuntu, cuppiyam, enneymuriy-ilaiceti, enneymuriyillai, fejan, fidjel, guchhapatra, haavu nanjina gida, havunanjina, havunanjinagida, havunanju, ilemporukam, kallampitacceti, kallampitam, kentakam, kentikam, kenturam, macci, maccikappuntu, maccitam, maycci, naagadaali, nagadali, akatali, pambugolli, pampukolli, pismarum, pitapushpa, sadaapa, sadaashoo, sadab, sadabu, sadap, sadapa, sadapaha, sadapaka, sadapaku, sadapu, sarpadanshta, satap, satapa, satari, sathaapu elai, seeme sadapu, shivaddali soppu, sitaba, som lata, soma, somalata, somarayam, somarayan, sudab (burg-e-sudab), sudabu, sudabugida, sudah, suddhahuaku, tukhm sudab, uparpavam, uparpavapputu, vishapaha

in Indonesia: hinggu, inggu, minggu

in Japan: henruda

in Arabic: fijel

Ruthalicia C. Jeffrey Cucurbitaceae

See *Gen. Pl.* [Bentham & Hooker f.] 1(3): 827. 1867 and *Kew Bulletin* 15(3): 360. 1962.

Ruthalicia eglandulosa (Hook. f.) C. Jeffrey (*Adenopus eglandulosus* Hook. f.; *Phyzedra eglandulosa* (Hook. f.) Hutch. & Dalziel; *Phyzedra eglandulosa* Hutch. & Dalziel)

Ghana, Sudan, Nigeria. Twiner, climber, pale yellow flowers, bright red spherical fruits with yellow spots

See *Flora of Tropical Africa* 2: 529, 553. 1871 and *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 183. 1927, *Kew Bull.* 1928, 216. 1928, *Kew Bull.* 8: 82. 1953, *Kew Bulletin* 15(3): 337–371. 1962

(Very poisonous. Fatal poison. Whole plant decoction as a wash to kill parasites; leaf juice to treat jaundice.)

Ryania Vahl Flacourtiaceae (Salicaceae)

After J. Ryan, a plant collector, see *Actes Soc. Hist. Nat. Paris* 1: 110. 1792, *Eclogae Americanae* 1: 51–52, t. 9. 1796, *Exposition des Familles Naturelles* 2: 93. 1805, *Nomencl. Bot.* [Steudel], ed. 2. 1: 342. 1840.

Ryania angustifolia (Turcz.) Monach. (*Patrisia acuminata* (Spruce ex Eichler) Kuntze; *Patrisia acuminata* Kuntze;

Ryania acuminata Spruce ex Eichler; *Ryania acuminata* Spruce; *Tetracoryne angustifolia* Turcz.)

South America, Colombia. Small tree

See *Flora Brasiliensis* 13(1): 492. 1871, *Revisio Generum Plantarum* 1: 45, 106. 1891 and *Lloydia* 12: 21. 1949

(Roots considered poisonous.)

Ryania dentata (Kunth) Miq. (*Patrisia affinis* Kunth; *Patrisia dentata* Kunth; *Ryania dentata* Miq.; *Ryania kunthii* Miq.)

South America.

See *Nova Genera et Species Plantarum* (quarto ed.) 5: 357–358. 1821[1823], *Annals and Magazine of Natural History* 11: 16. 1843 and *Caldasia* 3: 267. 1945

(Ingredient of an arrow poison.)

Ryania pyrifera (Rich.) Uittien & Sleumer (*Patrisia chocoensis* Triana & Planch.; *Patrisia chocoensis* Warb.; *Patrisia pyrifera* Rich.; *Ryania pyrifera* var. *subuliflora* Sandwith; *Ryania pyrifera* Uittien & Sleumer; *Ryania speciosa* Vahl; *Ryania tomentosa* Miq.)

Trinidad, Peru. Confused with *Ryania speciosa*

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 110. 1792, *Eclogae Americanae* 1: 51–52. 1796, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 6a (1893) 50. 1893 and *Flora of Suriname* 3: 286. 1935

(High toxicity of the plant. Insecticidal, alkaloids toxic to many kinds of insects and to rats, to European corn borer, oriental fruit moth. Bark and leaves poison for animals and humans, a fish and caiman poison.)

in Brazil: kapahasa

Ryania speciosa Vahl var. *minor* Monach. (*Patrisia bicolor* DC.; *Patrisia chocoensis* Triana & Planch.; *Patrisia chocoensis* Warb.; *Patrisia parviflora* A. DC.; *Patrisia tomentosa* Pulle; *Patrisia tomentosa* (Miq.) Roemer; *Ryania bicolor* (DC.) Eichler; *Ryania candollei* Miq.; *Ryania casiquiarensis* Steyererm.; *Ryania parviflora* (A. DC.) Griseb.; *Ryania parviflora* Eichler; *Ryania pyrifera* var. *subuliflora* Sandwith; *Ryania speciosa* Vahl; *Ryania speciosa* var. *bicolor* (DC.) Monach.; *Ryania speciosa* var. *stipularis* (Linden & Planch.) Monach.; *Ryania speciosa* var. *subuliflora* (Sandwith) Monach.; *Ryania speciosa* var. *tomentosa* (Miq.) Monach.; *Ryania tomentosa* Miq.)

Amazonian Colombia, Venezuela, Guianas, Peru and Brazil. Confused with *Ryania pyrifera*

See *Eclogae Americanae* 1: 51–52. 1796, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 256. 1824, *Ann. Mag. Nat. Hist.* 11: 16. 1843, *Flora of the British West Indian Islands* 296. 1860 and *Enum. Pl. Surinam* 316. 1906, *Lloydia* 12: 15. 1949, *Economic Botany* 26(3): 233. 1972

(Poison, the stem bark mixed with food, employed by old people for suicide.)

in Brazil: caramã

Ryparosa Blume Flacourtiaceae (Achariaceae)

Greek *rhyparos* 'dirty', possibly referring to the dirty hairs; see Karl Ludwig von Blume (1796–1862), *Bijdragen tot de flora van Nederlandsch Indië*. 600–601. (Jan.) 1826, *Die Natürlichen Pflanzenfamilien* 1: 256. 1897.

Ryparosa javanica (Blume) Kurz ex Koord. & Valeton (*Ryparosa javanica* Koord. & Valeton)

India, Java.

See *Meded. Lands Plantentuin* xxxiii. 11; et xl. 185. 1884–1904

(Leaf decoction for urinary troubles.)

Ryticaryum Becc. Icacinaceae

Greek *rhytis*, *rhytidos* 'a wrinkle' and *karyon* 'walnut, nut', referring to the fruit; see Odoardo Beccari (1843–1920), *Malesia*. Firenze-Roma 1877–1890.

Ryticaryum longifolium K. Schum. & Lauterb.

New Guinea. Shrub or small tree, sprawling, leaves spirally arranged, flowers yellow or greenish in male or female spikes, fruit red-orange, leaves cooked and eaten

See *Die Flora der Deutschen Schutzgebiete in der Sudsee* 1900

(Sap powdered and sniffed to clear a blocked nose.)

in Papua New Guinea: nangoka

Rytidostylis Hooker & Arn. Cucurbitaceae

From the Greek *rhytis*, *rhytidos* 'a wrinkle' and *stylos* 'style, column', see *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 9, 31. 1760, *The Botany of Captain Beechey's Voyage* 424–425, t. 97. 1840 and *Ceiba* 19(1): 1–118. 1975, *Fieldiana, Bot.* 24(11/4): 306–395. 1976, *Ann. Missouri Bot. Gard.* 65(1): 285–366. 1978, *Fl. Venezuela* 5(1): 11–202. 1992, *Fl. Veracruz* 74: 1–133. 1993, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001, *Etnoffl. Yucatanense* 22: 1–315. 2004.

Rytidostylis carthagenensis (Jacq.) Kuntze (*Elaterium amazonicum* Mart. ex Cogn.; *Elaterium carthagenense* Jacq.; *Elaterium carthagenense* var. *cordatum* (Hook. f.) Svenson; *Elaterium ciliatum* Cogn.; *Elaterium ciliatum* var. *major* Cogn.; *Elaterium cordatum* Hook. f.; *Elaterium filiforme* Cogn.; *Elaterium gracile* (Hook. & Arn.) Cogn.; *Elaterium*

gracile var. *ottonianum* Cogn.; *Elaterium gracile* var. *triloba* Cogn.; *Elaterium heterophyllum* Brandegee; *Elaterium longiflorum* Cogn.; *Elaterium macrophyllum* Standl. & Steyerl.; *Elaterium quinquelobum* Cogn.; *Elaterium saepicola* Brandegee; *Elaterium trilobatum* Schldl.; *Rytidostylis amazonica* (Mart. ex Cogn.) Dieterle; *Rytidostylis trilobata* (Schldl.) Kuntze)

South America.

See *The Botany of Captain Beechey's Voyage* 425, t. 97. 1840, *Transactions of the Linnean Society of London* 20: 224. 1851, *Linnaea* 26: 639. 1855, *Diagnoses de Cucurbitacées nouvelles et observations sur les espèces critiques ...* Premier fascicule 2: 51–56. 1877, *Monographiae Phanerogamarum* 3: 863. 1881, *Revisio Generum Plantarum* 1: 258. 1891 and *University of California Publications in Botany* 4(19): 387. 1913, *University of California Publications in Botany* 6(4): 72. 1914, *American Journal of Botany* 22: 256. 1935, *Publications of the Field Museum of Natural History, Botanical Series* 23(2): 94–95. 1944, *Fieldiana, Botany* 24(11): 372, f. 28. 1976

(Poison.)

Rytigynia Blume Rubiaceae

Greek *rhytis*, *rhytidōs* ‘a wrinkle’ and *gyne* ‘a woman, female’, referring to the ovary; see *Mus. Bot.* 1: 178. 1850 and J.R. Tennant, in *Kew Bulletin*. 19(2): 279–280. 1965.

Rytigynia canthioides (Benth.) Robyns (*Canthium benthamianum* Baill.; *Rytigynia canthioides* var. *glabra* K. Schum.; *Vangueria canthioides* Benth.)

Tropical Africa. Shrub, large liana, long sharp hooks, leaves papery

See *Niger Flora* 408. 1849, *Adansonia* 12: 190. 1878, *Bot. Jahrb. Syst.* 23: 457. 1897 and *Bulletin du Jardin Botanique de l'État* 11: 188. 1928

(To treat malaria and fever.)

Rytigynia kigeziensis Verdc.

Uganda.

See *Kew Bull.* 40: 656. 1985

(A worm remedy, bark decoctions to treat intestinal parasites.)

in Uganda: nyakibazi

Rytigynia kiwuensis (K. Krause) Robyns (*Vangueria kiwuensis* K. Krause)

Uganda. Shrub

See *Bot. Jahrb. Syst.* 57: 35. 1920, *Bull. Jard. Bot. État* 11: 156. 1928

(Magic, ritual, leaves decoction and steam bath against bad spirits. Veterinary medicine, leaves juice in nose for East Coast fever, refusal of nursing.)

in Burundi: umukondokondo

Rytigynia monantha (K. Schum.) Robyns var. *monantha* (*Rytigynia castanea* Robyns)

Tanzania. Many-stemmed shrub, scandent, fruit eaten by chimpanzees

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 493. 1900, *Bulletin du Jardin Botanique de l'État* 11: 153. 1928, *Expl. Parc Nat. Kagera* 1: 139. 1948

(Leaves for metrorrhagia. Roots for urinary complaints.)

in Burundi: umukondokondo

in Tanzania: ngusho

S

Saba (Pichon) Pichon Apocynaceae

Saba is a vernacular name in Mali for *Saba senegalensis*.

Saba comorensis (Bojer ex A. DC.) Pichon (*Landolphia comorensis* (Bojer) K. Schum.; *Landolphia comorensis* (Bojer) Benth.; *Landolphia comorensis* (Bojer ex A. DC.) K. Schum., invalid; *Landolphia comorensis* var. *florida* (Benth.) K. Schum.; *Landolphia cordata* (Klotzsch) K. Schum.; *Landolphia dubia* Lassia; *Landolphia florida* Benth.; *Landolphia florida* var. *comorensis* (Bojer ex A. DC.) A. Chev.; *Landolphia florida* var. *leiantha* Oliv.; *Landolphia martretii* A. Chev. ex De Wild.; *Landolphia mayottensis* Pierre ex Poiss.; *Pacouria comorensis* (Bojer ex A. DC.) Roberty; *Pacouria dubia* (Lassia) Pichon; *Pacouria florida* (Benth.) Hiern; *Saba comorensis* (Bojer) Pichon; *Saba comorensis* var. *florida* (Benth.) Pichon; *Saba florida* (Benth.) Bullock; *Vahea comorensis* Bojer; *Vahea comorensis* Bojer ex A. DC.; *Vahea florida* (Benth.) F. Muell.; *Willughbeia cordata* Klotzsch)

Trop. Africa, Comoros, Madagascar. Liana, shrub, woody climber, scrambling, creeping, long strong climbing tendrils, sticky milky white latex, conspicuous small lenticels along the twigs, hairless reddish stems dotted with white breathing pores, glossy papery coriaceous opposite leaves, white tubular flowers sweetly scented in dense terminal bunches, fruit flattened at base, pinkish red sweet edible flesh around the seeds, sweet-acid fruits eaten by human beings and monkeys, bee forage, in forest, in thicket vegetation, rainforest, in bushland above stream bank, in riverbank fringe, in riverine forest

See *Histoire des plantes de la Guiane Française* 268. 1775, *Flore d'Oware* 1: 54. 1806, *Plants of the Coast of Coromandel* 3: 77, t. 280. 1820, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 328. 1844, *Niger Flora* 444. 1849, *Naturwissenschaftliche Reise nach Mossambique ...* 283. 1862, *Transactions of the Linnean Society of London* 29: 107. 1875, *Genera Plantarum* 2: 693. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 402, 404, 406. 1893, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 662. 1898 and *Recherches sur la Flore Méridionale de Madagascar* 162–163. 1912, *Mascarenhasia et Landolphia, Madagascar* 78. 1927, *Mémoires du Muséum d'Histoire Naturelle*, n.s., 24: 144. 1948, *Revue internationale de botanique appliquée et d'agriculture tropicale* 28: 395. 1948, *Mémoires de l'Institut Français d'Afrique Noire* 35: 302–303, 309. 1953, *Kew Bulletin* 13(3): 391. 1959

(Roots decoction drunk as a treatment for rheumatism and infertility in women. Leaves decoction diuretic, depurative; leaves infusion used to treat hypertension; fruits sucked for “coated tongue”. Veterinary medicine.)

in Benin: doctobou

in Cameroon: dadangi, pembe

in Congo: ebeiye, kbeka, mataufepo

in Kenya: abuna, abune, bungo, dhangalow, dongola, ivungu, jobune, kamachabungwe, kilia, kiongwa, kumuchabungwe, kyongoa, loguo, mameru, mbungo, meru, mongoa, mpira, mungo, ndimu, ochon, rwonge, rwongi

in Tanzania: ibungobungo, ibungu-kubua, ilombo, lizwana, m'bungo, mabungo-makubwa, mawungu, mbungo, mbungo-wa-wame, mbungu, mdungo, mpira, mtegeti, mubungu, muungo, muungoungo, ngombe, omubungo, umubungo

in Togo: bulongtchi

Sabal Adanson Arecaceae (Palmae)

From a South American vernacular name for these palms, see *Familles des Plantes* 2: 495, 599. 1763, *Analyse des Familles de Plantes* 55. 1829, *Natürliches System des Pflanzenreichs* 317. 1832, *Genera Plantarum* 252. 1837 and *Bull. Torrey Bot. Club* 28: 529–530. 1901, *Aliso* 12: 583–660. 1990, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. Kew. 2005.

Sabal minor (Jacq.) Pers. (*Brahea minima* (Nutt.) H.Wendl.; *Chamaerops acaulis* Michx.; *Chamaerops arundinacea* (Aiton) Sm.; *Chamaerops glabra* Mill.; *Chamaerops louisiana* Darby; *Chamaerops sabaloides* Baldwin ex Darl.; *Corypha minor* Jacq.; *Corypha pumila* Walter; *Rhapis acaulis* (Michx.) Walter ex Willd.; *Rhapis arundinacea* Aiton; *Sabal adansonii* Guerns., nom. illeg.; *Sabal adiantina* Raf.; *Sabal caroliniana* Poir., nom. nud.; *Sabal deeringiana* Small; *Sabal floribunda* Katzenstein; *Sabal glabra* (Mill.) Sarg.; *Sabal glabra* Mill.; *Sabal glabra* Sarg.; *Sabal louisiana* (Darby) Bomhard; *Sabal minima* Nutt.; *Sabal pumila* (Walter) Elliott; *Sabal pumila* Elliott; *Sabal serrulata* var. *minima* (Nutt.) Alph. Wood)

North America. Perennial tree or shrub

See *Species Plantarum* 2: 1187. 1753, *Familles des Plantes* 2: 495, 599. 1763, *Hortus Botanicus Vindobonensis* 3: 8, pl. 8. 1776, *Hort. Kew.* 3: 474. 1789, *Syn. Pl.* 1: 399. 1805, *Sp. Pl.* 4: 1093. 1806, *Sketch Bot. S. Carolina* 1: 430. 1817, *American Journal of Science, and Arts* 5(2): 293. 1822,

Genera Plantarum 252. 1837, *Les Palmiers* 235. 1878 and *Torreya* 26: 34. 1926, *Journal of the Washington Academy of Sciences* 25: 44. 1935, *Botanica Acta* 106: 170–182. 1993, *Field Guide Palms* 295. 1995

(Eye medicine, hypotensive, stimulant.)

in English: blue palm, blue palmetto, blue stem, bush palmetto, dwarf palm, dwarf palmetto, scrub palm, scrub palmetto

in Brazil: sabal acaule, sabal anão

in Japan: miki-nashi-sabaru-yashi

Sabal palmetto (Walter) Lodd. ex Schult. & Schult. f. (*Chamaerops palmetto* (Walter) Michx.; *Chamaerops palmetto* Michx.; *Corypha palmetto* Walter; *Corypha umbraculifera* L.; *Corypha umbraculifera* Jacq., nom. illeg.; *Inodes blackburniana* (Schult. & Schult.f.) O.F. Cook; *Inodes blackburniana* O.F. Cook; *Inodes palmetto* O.F. Cook; *Inodes palmetto* (Walter) O.F. Cook; *Inodes schwarzii* O.F. Cook; *Sabal bahamensis* (Becc.) L.H. Bailey; *Sabal blackburnia* Glazebr.; *Sabal blackburniana* Schult. & Schult.f.; *Sabal blackburniana* Glazebr.; *Sabal blackburnianum* Glazebr.; *Sabal jamesiana* Small; *Sabal jamesianum* Small; *Sabal palmetto* Lodd. ex Schult.f.; *Sabal palmetto* Hort.; *Sabal palmetto* (Walter) Lodd. ex Schult.; *Sabal palmetto* Rein, nom. illeg., non *Sabal palmetto* (Walter) Lodd. ex Schult. & Schult. f.; *Sabal palmetto* var. *bahamensis* Becc.; *Sabal parviflora* Becc.; *Sabal schwarzii* (O.F. Cook) Becc.; *Sabal schwarzii* Becc.; *Sabal umbraculifera* Mart.; *Sabal umbraculiferum* Mart.; *Sabal umbraculiferum* Hort. ex Mart.; *Sabal viatoris* L.H. Bailey)

North America, Cuba. Perennial tree, palm, inflorescences arising from the axil of crown leaves, perfect flowers radially arranged, creamy white petals, fruit usually a one-seeded berry, fleshy mesocarp, bony endosperm, flowers produce nectar

See *Species Plantarum* 2: 1187. 1753, *Familles des Plantes* 2: 495, 599. 1763, *Fl. Carol.* [Walter] 119. 1788, *Fl. Bor.-Amer.* (Michaux) 1: 206. 1803, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 7(2): 1487. 1830, *Bericht über die Senckenbergische Naturforschende Gesellschaft in Frankfurt am Main* 150. 1873 and *Bull. Torrey Bot. Club* 28: 531–532. 1901, *Webbia* 2: 38–39, 43. 1907, *Journal of the New York Botanical Garden* 28: 182, fig. 1. 1927, *Gentes Herb.* 6: 403, 417, fig. 209–211. 1944

(Analgesic, febrifuge. Irritant. Plant used for fish poisoning.)

in English: blue palmetto, cabbage palm, cabbage palmetto, cabbage tree, common palmetto, palmetto, serpent palm, South Carolina palmetto, swamp cabbage

in Brazil: sabal da Flórida, palmeto

Sabatia Adanson Gentianaceae

Presumably for the Italian botanist Liberato Sabbati, b. 1714, gardener; see *Familles des Plantes* (Adanson) 2: 503. 1763, *Methodus Plantas Horti Botanici et Agri Marburgensis:*

a staminum situ describendi [Moench] 386. 1794, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.* London 1800, Grisebach, August Heinrich Rudolph (1814–1879), *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 120, 125. Stuttgartiae, J. G. Cotta, 1839, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch.* 778. 1852 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum.* 1: 179. London 1904, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists.* 3: 197. 1965, *Rhodora* 73(795): 362. 1971, Stafleu and Cowan, *Taxonomic literature.* 4: 1021. 1983, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo.* 240. Regione Siciliana, Palermo 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 164. 1989, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 549. 1996.

Sabatia angularis (L.) Pursh (*Sabatia angularis* Pursh)

North America. Annual herb, slender branching square stem, small clasping ovate leaves, star-like pink scented flowers

See *Flora Americae Septentrionalis* (Pursh) 1: 137. 1813

(Roots infusion taken as analgesic, astringent, used for eye disease, headache, menstrual pains, high fever and diarrhea.)

in English: bitter-bloom, bitterbloom, marsh-pink, rose-pink

Sabatia campanulata (L.) Torr. (*Chironia campanulata* L.; *Sabbatia campanulata* (L.) Torr.; *Sabatia campanulata* Britton; *Sabatia campanulata* Torr. ex Griseb.; *Sabatia campanulata* (L.) Torr. var. *gracilis* (Michx.) Fernald; *Sabatia gracilis* Salisb.; *Sabatia gracilis* (Michx.) Salisb.; *Sabatia gracilis* Elliott)

North America. Perennial herb

See *Species Plantarum* 1: 190. 1753, *Gen. Sp. Gent.* 120. 1838 [1839 publ. 1838], *Memoirs of the Torrey Botanical Club* 5: 259. 1894 and *Rhodora* 39: 444. 1937

(Roots infusion taken as analgesic, astringent, used for eye disease, headache, menstrual pains, high fever and diarrhea.)

in English: slender rose gentian

Sabia Colebr. Sabiaceae

A Hindi name, see *Transactions of the Linnean Society of London* 12(2): 355, t. 14. 1819, *Museum Botanicum* 1: 368. 1851 and *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 3: 15. 1943, *Diversity and Classification of Flowering Plants* 304. 1997, *Molecular Phylogenetics and Evolution* 31(1): 16–30. 2004, *Am. J. Bot.* 92: 1737–1748. 2005.

Sabia schumanniana Diels

India, China.

See *Transactions of the Linnean Society of London* 12: 355. 1819 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 451. 1900

(This species is used medicinally.)

in China: si chuan qing feng teng

Sabicea Aubl. Rubiaceae

See *Histoire des plantes de la Guiane Française* 1: 192, 194, t. 75. 1775, *Genera Plantarum* 123. 1789, *Florae Fluminensis* 104. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin.* Icon. 3: t. 16. 1831. [1827 publ. 29 Oct 1831], *Bot. Jahrb. Syst.* 23: 430. 1896 and Wernham, Herbert Fuller (1879–1941), *A Monograph of the genus Sabicea*. London, 1914, *Adansonia*, n.s., 3: 170. 1963, *Mem. New York Bot. Gard.* 17(1): 307. 1967.

Sabicea brasiliensis Wernham

South America, Brazil, Bolivia. Shrub, lower leaf surfaces silvery, corolla white, reddish fruits edible

See *Monogr. Sabicea* 51. 1914

(Antiseptic, leaves applied to cuts and wounds.)

in Brazil: peidoreira, sangue de Cristo

Sabicea calycina Benth. (*Sabicea barteri* Wernham; *Sabicea calycina* var. *hirsutiflora* Wernham)

Trop. Africa, Uganda. Climbing herb, slender, scandent, twining, creeping, prostrate, rooting at each node, leaves papery, flowers in clusters, corollas white, sepals greenish-white, fruits dark purple, each fruit surrounded by 3 purple bracts, forest, secondary forest, deciduous forest, wetland, open areas, streambeds, sandbinder

See *Histoire des plantes de la Guiane Française* 1: 192. 1775, *Niger Flora* 399. 1849 and *Monogr. Sabicea* 64. 1914

(Roots wound dressing, for rheumatism. Laxative. Crushed leaves applied to cuts and wounds, arthritis, rheumatism; leaves infusion good for memory. Religion, superstitions, magic.)

in Ghana: anansentoromahama

in Ivory Coast: tale

in Nigeria: anyamiriakwa, ili nabulede, isó àparò, jire, nruchi uku

Sabicea cinerea Aubl. (*Sabicea eriantha* DC.; *Sabicea grisea* Cham. & Schldt.; *Schwenkfelda cinerea* (Aubl.) Sw.; *Schwenkfelda eriantha* (DC.) D. Dietr.)

Trop. America.

See *Histoire des plantes de la Guiane Française* 1: 192. 1775, *Fl. Ind. Occid.* 1: 452. 1797, *Linnaea* 4: 192. 1829

(Limb strengthener.)

Sabicea ferruginea (G Don) Benth. (*Cephaelis ferruginea* G. Don; *Sabicea ferruginea* var. *lasiocalyx* (Stapf) Wernham; *Sabicea lasiocalyx* Stapf)

Sierra Leone, Tropical Africa, Ghana. Climbing shrub

See *Niger Flora* 397. 1849 and *J. Linn. Soc., Bot.* 37: 106. 1905, *Monogr. Sabicea* 60. 1914

(Religion, superstitions, magic, to confer protection against enemy witchcraft. Leaves or fruits used for prolonged menstruation.)

in Ivory Coast: iruwlo

in Liberia: gor-vah

in Sierra Leone: kongaiabwe

Sabicea glabrescens Benth. (*Sabicea aspera* var. *glabrescens* (Benth.) K. Schum.; *Sabicea trinitensis* Standl.)

South America, Trinidad to W. Brazil.

See *Hooker's J. Bot. Kew Gard. Misc.* 3: 219. 1841 and *Bull. Torrey Bot. Club* 48: 339. 1922, Berry, P.E., Yatskievych, K. & Holst, B.K. (eds.) *Flora of the Venezuelan Guayana* 8: 1–874. Missouri Botanical Garden. 2004

(Antidysenteric, antispasmodic, used for colic, stomachache.)

Sabicea villosa Willd. ex Schult. (*Paiva verticillata* Vell.; *Sabicea aspera* var. *scandens* K. Schum.; *Sabicea hirsuta* Kunth; *Sabicea hirsuta* var. *adpressa* Wernham; *Sabicea hirsuta* var. *sellowii* Wernham; *Sabicea villosa* Ruiz & Pav.; *Sabicea villosa* Willd. ex Roem. & Schult.; *Sabicea villosa* var. *adpressa* (Wernham) Standl.; *Sabicea villosa* var. *sellowii* (Wernham) Steyererm.; *Schwenkfelda hirsuta* (Kunth) Spreng.)

Trop. America. Weedy vine, liana, twining, climbing, spreading, green-white pubescent leaves, corollas white, fruit red and juicy, along rivers, open pasture, secondary growth

See *Genera Plantarum* 123. 1789, *Systema Vegetabilium* 5: 265. 1819, *Nova Genera et Species Plantarum* (quarto ed.) 3: 417. 1818 [1820], *Systema Vegetabilium*, editio decima sexta 1: 765. 1825 and *Monogr. Sabicea* 55–56. 1914, *Publications of the Field Columbian Museum, Botanical Series* 7: 52. 1930, *Mem. New York Bot. Gard.* 17: 314. 1967

(Antidysenteric, antimalarial, antispasmodic, used for colic, stomachache.)

Sabicea vogelii Benth.

Trop. Africa. Shrub, slender, climbing, semi-woody, soft white berries, undergrowth of wet forest or jungle

See *Niger Fl.* 398. 1849

(Leaves or fruits used for prolonged menstruation.)

in English: blood seed

in Guinea: kunkuré sembé

in Sierra Leone: komalondo, mindo, namate, nametei, ngawe, tegebenyugi, ubwesi

Saccharum L. Poaceae (Gramineae)

Greek *sakcharon* 'sugar'; Indian *sarkara* 'the juice prepared from sugarcane', *uch*, *uchari* 'sugar'; Malay *singkara*; Sanskrit *hascha* 'pleasure', *ha*, *hu* 'good', *ikshu*, *ikshuka*, *ikshuraka* 'sugarcane', *ikshurasa* 'juice of sugarcane'. Hybridization with genera *Erianthus* Michaux, *Imperata* Cirillo, *Miscanthidium* Stapf, *Miscanthus* Andersson, *Narenga* Bor, *Sclerostachya* (Hackel) Camus and *Sorghum* Moench, awned species were formerly placed in *Erianthus*, type *Saccharum officinarum* L., see Sir Hans Sloane (1660–1753), *A Voyage to the Islands Madera, Barbados, Nieves, S. Christophers and Jamaica* 1: t. 66. London 1707–1725, *Species Plantarum* 1: 54. 1753, *Species Plantarum* 2: 1045. 1753, *Genera Plantarum*. Ed. 5. 28. 1754, *Familles des Plantes* 2: 31, 530. 1763, *Genera Plantarum* 2: 787. 1791, *Journal für die Botanik* 1800(2): 127. 1801, *Flora Boreali-Americana* 1: 54–55. 1803, *Syn. Pl.* 1: 103. 1805, *Bot. Mat. Med.* 1: 131. 1812, *Essai d'une Nouvelle Agrostographie* 8. 1812, *Fundamenta Agrostographiae* 169. 1820, *Flora Indica; or descriptions ...* 1: 241. 1820, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 315–316. 1829, *Synopsis Plantarum Glumacearum* 1: 123, 407. 1854, *Öfversigt af Förhandlingar: Kongl. Grassl; *Saccharum ciliare* Andersson; *Saccharum moonja* Royle; *Saccharum munja* Roxb.; *Saccharum procerum* Roxb.; *Saccharum sara* Roxb.; *Saccharum spontaneum* L.) (*Erianthus* Michaux, from the Greek *erion* 'wool')

and *anthos* 'flower', referring to the appearance of the inflorescence; see André Michaux, *Flora Boreali-Americana*. 1: 54. Paris 1803.)

India, Pakistan, Indomalaysia, Asia tropical and temperate. Clumped, stout, erect, very leafy at the base, growing in clumps, cattle eat the young and immature leaves, yields very valuable fibre used for cordage and ropes, young leaves for fodder, ornamental, used for erosion control, sand binder, common on alluvial sandy soils. See *Mantissa Plantarum* 183. 1771, *Observationes Botanicae* 5: 16. 1789, *Flora Indica; or descriptions ...* 1: 248–250. 1820, *Mantissa* 2: 166. 1824, *Illustrations of the Botany ... of the Himalayan Mountains ...* 416. 1839, *Öfversigt af Förhandlingar: Kongl. (*Saccharum palisotii* Tausch named the French botanist Ambroise Marie François Joseph Palisot de Beauvois (Pallisat de Beauvois), 1752–1820, traveller and explorer.)

Tropical Africa, Asia temperate and tropical, Europe. Perennial, vigorous, erect and coarse, very polymorphic, very variable, rhizomatous with extensive and stout rhizome system, slender, clumped to densely tufted, an enormous root system, grain as famine food, tender shoots eaten as a vegetable, provides poor fodder normally not relished by cattle, used to feed buffaloes in India, fodder only in time of scarcity, noxious and invasive weed, soil stabiliser, a

vigorous coloniser of bare ground, revegetator, potential in erosion control

(Antiseptic.)

Salacia L. Celastraceae (Hippocrateaceae)

After Salacia, the Roman goddess of the spring water; when Neptunus, the Roman god of freshwater, by 399 BC. was identified with the Greek Poseidon, the god of the sea, she was identified and equated with the latter's wife Amphitrite; Greek *salos* ‘any unsteady motion, Latin *salum*, *i* ‘the sea, the high sea, the stream’; see C. Linnaeus, *Mantissa Plantarum* 2: 159–160, 293. 1771, *Opuscoli scientifici ... Università di Bologna* 3: 410. 1819, *Denkschriften der Königlichen Akademie der Wissenschaften zu Muenchen* 7: 244, t. 15. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 570. 1824, *Flora Telluriana* 4: 101. 1838, *Annales des Sciences Naturelles; Botanique*, sér. 5, 16: 374. 1872, *Transactions of the Linnean Society of London* 28: 331, 382, 398–400. 1872, *Die Natürlichen Pflanzenfamilien* 3(5): 229. 1893 and *Bot. Jahrb. Syst.* 39: 172. 1907, *Brittonia* 3(3): 341–555. 1940, *Fieldiana, Bot.* 24(6): 218–222. 1949, *Ann. Missouri Bot. Gard.* 52(1): 81–98. 1965, *Fl. Guianas*, ser. A, *Phanerog.* 16: 3–81. 1994, *Fl. Paraguay* 36: 1–36. 2001, *Fl. Fanerogam. Estado Sao Paulo* 3: 109–122. 2003.

Salacia chinensis L. (*Salacia latifolia* Wall.; *Salacia latifolia* Wall. ex King; *Salacia prinoides* DC.; *Salacia prinoides* (Willd.) DC.; *Tontelea prinoides* Willd.)

Tropical Africa, India. Liana or scandent shrub or small tree, opposite-subopposite elliptic leaves broadly toothed, fragrant yellowish green flowers in axillary clusters, fruit a globose drupe red or orange-red when ripe, fruits eaten, in forests, sandy river banks, in lowland primary forest, along sea-shores

See *Mant. Pl. Altera* 293. 1771, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 184. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 571. 1824, *Numer. List* [Wallich] n. 4222. 1831, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 366. 1896 and *Blumea* 12: 34. 1963, *J. Econ. Taxon. Bot.* 14(1): 127. 1990

(Used in Ayurveda and Sidha. Stembark hypoglycemic, a decoction for healing indolent ulcers and wounds. Roots astringent, abortifacient, a decoction for amenorrhea and venereal diseases. Leaves of this liana and *Azadirachta indica* made into a paste and rubbed on the belly to relieve labor pains. Fresh fruits purgative.)

in India: courondi, cuntan, karukkuvai, lana-cho, nerani, saptacakra, saptarangi

in Indonesia: akan pelanduk, kajipot, mata kantjil, wolè sèroso

in Malaysia: mata kuching hutan, rakiat kechil

in Papua New Guinea: odi

in Philippines: matang-úlang

in Thailand: lum nok, matom kai

Thailand, western Malesia, South America. Small tree, liana, climbing, woody vine, light brown, dense spreading crown, branches arching, leaves coriaceous, greenish flowers, inflorescences short, fruit a drupe pinkish to red edible when ripe, flowers contain many sulphur-like particles, in lowland forest, riverside, in swamp

See *Annales du muséum national d'histoire naturelle* 18: 486. 1811, *Mantissa* 1: 253, 348. 1822, *Systema Vegetabilium*, editio decima sexta 1: 178. 1825, *Flora Brasiliae Meridionalis* (quarto ed.) 2: 105–106. 1829, *A General History of the Dichlamydeous Plants* 1: 628. 1831, *Repertorium Botanicæ Systematicæ* 1: 400. 1842, *Reisen in Britisch-Guiana* 1183. 1848, *Transactions of the Linnean Society of London* 28: 382, 391–393, 395. 1872, *Flora Brasiliensis* 11(1): 157–159. 1878, *Index Kewensis* 2: 1088. 1895 and *Bulletin of the Torrey Botanical Club* 66(4): 247. 1939, *Brittonia* 3(3): 341–555. 1940

(Laxative, astringent, bark boiled and mixed with bark of *Triplaris* and taken orally for diarrhea.)

in Bolivia: asambáka, asambakái, guapomō, nutachens

in Indonesia: areuy langari, ki-hapiet, manggong

in Laos: ta kai dong

Salacia grandiflora Kurz (*Anthodon grandiflorus* Benth.; *Salacia grandiflora* (Benth.) Peyr., nom. illeg., non *Salacia grandiflora* Kurz; *Salacia grandiflora* Peyr., nom. illeg., non *Salacia grandiflora* Kurz)

Southern India, Burma, peninsular Thailand. Liana or scandent shrub, leaves shiny, fruit an orange-pink drupe, persistent calyx and corolla, 2 or more seeds, pulp eaten fresh, wood for building houses, in lowland forests

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 10. 1852, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 41(2): 300. 1872, *Flora Brasiliensis* 11(1): 157. 1878

(Roots decoction used after childbirth to encourage the return of the menses, as a postpartum remedy.)

in Indonesia: andor solpu

in Malaysia: (akar) mepedal ayam, nasi séjuk, serapat akar

Salacia korthalsiana Miq. (*Salacia philippinensis* Merr.)

Peninsular Thailand, Java. Liana, or erect shrub, fruit a subglobose drupe, floral parts contain sulphur-like particle, pulp of fresh fruits eaten, in forests and thickets

(A decoction from the roots drunk against cracked lips.)

in Indonesia: a'roy kúluk l'ökük, tjantel wesi

in Malaysia: akar beting, akar menjela

in Philippines: aropit

Salacia kraussii (Harv.) Harv. (*Diplestes kraussii* Harv.; *Salacia alternifolia* Hochst.; *Salacia kraussii* Harv.)

Tropical Africa, South Africa.

See *London Journal of Botany* 1: 18–19. 1842, *Flora* 27: 306. 1844, *Flora Capensis* (Harvey) 1: 230. 1860

(Roots and stem anthelmintic, for tapeworm, epilepsy in children.)

Salacia macrophylla Blume (*Salacia flavescens* Kurz; *Salacia macrophylla* Miq., nom. illeg., non *Salacia macrophylla* Blume; *Thermophila macrophylla* (Blume) Miers)

India. Liana or sprawling bush, fruit a subglobose drupe, in lowland forests, in freshwater swamps, on limestone rock, near the coast

See *Bijdragen tot de flora van Nederlandsch Indië* 221. 1825, *Stirpes Surinamensis Selectae* 85. 1851, *Transactions of the Linnean Society of London* 28: 331, 398–399. 1872

(A decoction of the roots used after childbirth as a postpartum remedy. Pounded leaves applied against bellyache and eczema.)

in Indonesia: areuy ki gangarangan, areuy mata pöljang, kiciput

in Malaysia: hempedal itek, nasi sejuk, rajah beraleh, serapat, sireh iput

in Thailand: khop naang, krado hot

Salacia macrosperma Wight

India. Climbing shrub, lianas, greenish yellow flowers in panicles, fringed sepals, orange-yellow fruits wrinkled when mature

See *Fl. British India* 1: 628. 1875

(Root bark against diabetes.)

in India: aanakoranti, anakoranti, dhanvel, dharsi, lendphal

Salacia oblonga Wall. (*Salacia oblonga* Wall. ex Wight & Arn.)

Sri Lanka, India. A small tree or climbing shrub, leaves ovate or ovate-lanceolate, flowers greenish yellow in short congested cymes, fruits globose tuberculate light brown or orange when ripe, seeds angular imbedded in pulp, rain forest

See *Indian J. Physiol. Pharmacol.* 43(4): 510–514. 1999, *Pharmaceutical Biology* (formerly *International Journal of Pharmacognosy*) 38(2): 101–105. 2000

(Used in Sidha/Siddha. Antidiabetic, antiseptic and anti-obesity, anti-oxidative activity. The roots and stems used in Ayurveda and traditional Indian medicine for the treatment for diabetes. Roots bark boiled in oil or as decoction or as powder used for the treatment of rheumatism, gonorrhoea, itches, asthma, thirst and ear diseases.)

in India: kadalainjil, ponkoranti, saptrangi

Salacia prinoidea (Willd.) DC. (*Comocladia errata* Blanco; *Salacia prinoidea* Willd.; *Salacia sinensis* Blanco; *Tonetelea prinoidea* Willd.)

Papua New Guinea, India. Climbing, smooth shrub, leaves oblong, flowers borne in clusters in the axils of the leaves, very small sepals, five petals, fruit ovoid or round one-seeded, in riverine rainforests

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 184. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 571. 1824, *Transactions of the Linnean Society of London* 28: 382. 1872

(Roots decoction abortive, antidiabetic, used for dysmenorrhea, amenorrhea.)

in Philippines: matang-ulang, ope

in Sri Lanka: himbutu

Salacia reticulata Wight

Sri Lanka, India. Small tree

See *J. Nutr.* 132(7): 1819–1824. 2002, *Journal of Ethnopharmacology* 81(1): 81–100. 2002, *Bioorg. Med. Chem.* 10(5): 1547–1554. 2002, *Pharmaceutical Biology* (formerly *International Journal of Pharmacognosy*) 43(3): 219–225. 2005

(Used in Ayurveda. Roots antidiabetic, antioxidant, hypoglycemic, anti-hyperglycemic, bitter, acrid, vulnerary, liver tonic and stomachic, for gonorrhoea, rheumatism, skin diseases, to prevent obesity and diabetes; decoction of roots given in diabetes.)

in India: anukudu cettu, ekanaayakam, ekanayakam, karanti, koranti, pitika, ponkoranti, vairi

in Sri Lanka: kotala himbutu, kotala himbutu, kothalahimbutu

Salacia roxburghii Wall.

India. Woody climber, globose pinkish-red berry, thick leathery rind, red gelatinous pulp, ripe fruit pulp eaten

See *Numer. List* [Wallich] n. 4217. 1831, *FBI* 1: 627. 1875

(Stimulant, vulnerary, liver tonic and stomachic.)

in India: kangat

Salacia senegalensis (Lam.) DC. (*Hippocratea senegalensis* Lam.; *Salacia angustifolia* Sc. Elliot.; *Salacia dalzielii* Hutch. & M.B. Moss; *Salacia demousei* De Wild. & Dur.; *Salacia euryoides* Hutch. & M.B. Moss; *Salacia johannis-albrechti* Loes. & Winkl.; *Salacia macrocarpa* Welw. ex Oliv.; *Salacia oblongifolia* Oliv., not Blume; *Salacia olivriana* Loes.)

West Africa. Shrub, erect or climbing, liana, variable leaves papery dark green, flowers fragrant, petals white or pale greenish cream, fruits orange or yellow

See *Species Plantarum* 2: 1191. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 570. 1824

(Roots used for dysentery, leaves for coughs.)

in West Africa: e-kep, giboi, malombo

Salacia verrucosa Wight (*Anthodon verrucosus* Griseb.; *Raddia verrucosa* (Griseb.) Miers; *Salacia verrucosa* C. Wright ex Griseb., nom. illeg., non *Salacia verrucosa* Wight; *Salacia verrucosa* C. Wright)

SE Asia. Liana, ripe fruits eaten

See *Flora Peruviana, et Chilensis Prodromus* 1: 45. 1798, *Opuscoli scientifici d'una Società di professori della Pontificia Università di Bologna* 3: 410. 1819, *Memoirs of the American Academy of Arts and Science*, new series 8: 172. 1861, *Transactions of the Linnean Society of London* 28: 395. 1872

(Used for gastritis. Roots, stems and branches were boiled with water for curing purgative.)

in Laos: ta kouang

in Thailand: ta klai, ta kluang

Salicornia L. Chenopodiaceae (Amaranthaceae, Salicorniaceae)

Latin *salicornia*, French *salicorne*, from *salicor*, the name of a plant, from the Arabic *sala al-qarab*; see Carl Linnaeus, *Species Plantarum*. 1: 3–4. 1753 and *Genera Plantarum*. Ed. 5. 4. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 780. Ansbach 1852 and *Journal of Botany, British and Foreign* 49(582): 178. 1911, *Botanical Journal of the Linnean Society* 75(4): 366. 1977 [1978], Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 402. Torino 1995, Helmut

Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 551–552. 1996.

Salicornia maritima S.L. Wolff & Jefferies (*Salicornia europaea* auct. non L.; *Salicornia europaea* L. var. *prostrata* auct. non (Pall.) Fernald; *Salicornia herbacea* auct. non (L.) L.; *Salicornia prostrata* auct. non Pall.; *Salicornia ramosissima* auct. non J. Woods)

North America. Annual herb

See *Canadian Journal of Botany* 65(7): 1424–1425, f. 1. 1987 (Poultice.)

in English: slender grasswort

Salicornia virginica L.

North America. Annual herb, food

See *Species Plantarum* 1: 4. 1753

(Analgesic, antirheumatic, for arthritic pain, headache, rheumatism, joint pain, bodyache and swelling)

in English: lead-grass, perennial glasswort, woody glasswort, Virginia glasswort

Salix L. Salicaceae

Latin *salix*, *salicis* ‘willow, sallow’ (Marcus Terentius Varro, 116–27 BC. et al.); Akkadian *salihu* ‘sprinkler of water’, *salahu* ‘to moisten’; Celtic *sal* ‘near’ and *lis* ‘water’; Irish *saile* ‘saliva’. See Carl Linnaeus, *Species Plantarum*. 2: 1015–1022. 1753, *Genera Plantarum*. Ed. 5. 447. 1754, *Physiographiska sällskapetets Arsberättelse* 2: 34–35. 1825, *Sylloge Plantarum Novarum* 2: 36. 1828, *Alsographia Americana* 15. 1838, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien* 10(2): 241. 1860, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2[2]): 240, 273. 1868 and *Fieldiana, Bot.* 24(3): 342–348. 1952, *Taxon* 37: 165–166. 1988, *Taxon* 41: 573. 1992, G. Semerano, *Dizionario della Lingua Latina e di Voci Moderne*. 2(2): 553. 1994, *Taxon* 44: 611–612. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2306. 2001.

Salix acmophylla Boiss. (*Salix daviesii* Boiss.; *Salix persica* Boiss.)

Iran.

See *Diagnoses plantarum orientalium novarum*, ser. 1, 7: 98. 1846

(Leaves and stems to relieve symptoms of jaundice.)

in India: changma

in Pakistan: gait

Salix alaxensis (Andersson) Coville (*Salix alaxensis* (Andersson) Coville var. *obovalifolia* C.R. Ball; *Salix speciosa* Hook. & Arn., nom. illeg.; *Salix speciosa* Host; *Salix*

speciosa Nutt.; *Salix speciosa* Hook. & Arn. var. *alaxensis* Andersson)

North America. Perennial tree or shrub

See *The Botany of Captain Beechey's Voyage* 130. 1832, *The North American Sylva* 1(2): 58–60, pl. 17. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2[2]): 275. 1868 and *Proceedings of the Washington Academy of Sciences* 2(13): 280. 1900, *Taxon* 31: 120–126. 1982, *Bot. Zhurn.* 68(1): 29–38. 1983

(Young tender leaves and shoots sources for vitamin C.)

in English: felt-leaf willow, feltleaf willow

Salix alaxensis (Andersson) Coville var. *alaxensis* (*Salix alaxensis* (Andersson) Coville var. *obovalifolia* C.R. Ball; *Salix speciosa* Hook. & Arn., non Host nec Nutt.; *Salix speciosa* Hook. & Arn. var. *alaxensis* Andersson)

North America. Perennial tree or shrub

See *The Botany of Captain Beechey's Voyage* 130. 1832, *The North American Sylva* 1(2): 58–60, pl. 17. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2[2]): 275. 1868 and *Proceedings of the Washington Academy of Sciences* 2(13): 280. 1900, *Taxon* 31: 120–126. 1982, *Bot. Zhurn.* 68(1): 29–38. 1983

(Young tender leaves and shoots sources for vitamin C.)

in English: felt-leaf willow, feltleaf willow

Salix alba L. (*Salix alba* Thunb.)

Europe. Tree, leaves as fodder for sheep and yak

See *Species Plantarum* 2: 1021–1022. 1753, *Fl. Jap.* (Thunberg) 25. 1784, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien* 10(2): 185. 1860 and *Fieldiana, Bot.* 24(3): 342–348. 1952, *Bot. Zhurn. SSSR* 42(2): 33–34. 1985, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 11–14. 1995

(Astringent, used for diarrhea and dysentery.)

in English: cricket-bat willow, Huntingdon willow, swallow-tailed willow, white willow

in China: bai liu

in India: mulchang

in Arabic: khilaf, safsaf abiad

Salix babylonica L. (*Salix lasiogyne* Seem.; *Salix matsudana* Koidz.)

China. Tree, leaves as fodder

See *Species Plantarum* 2: 1017. 1753 and *Bot. Mag.* (Tokyo) 29: 312. 1915

(Leaves and bark analgesic, febrifuge, wound dressing, for rheumatism. Extract of leaves or bark applied to wounds; bark decoction used internally for fever. Leaves boiled in

water and used for washing feet to produce a cooling effect. Worshipped.)

in English: Babylon weeping willow, Chinese weeping willow, weeping willow, willow tea

in China: chui liu, hsiao yang, liu, liu zhi, yang liu, yi mi zai

in India: arruppaalai, attuppalai, badha, majnu, majnum, mulchang, shon

in Japan: shidare-yanagi

in Nepal: bainsh, tissi

in Okinawa: tai-yanagi

in Southern Africa: huilwilgerboom, makwilgerboom, treurboom, treurwilger, wilgerboom, wilgerhout; moluoane (Sotho)

Salix capensis Thunb. (*Salix capensis* var. *gariiepina* Anders.; *Salix mucronata* Thunb. var. *caffra* Burtt Davy; *Salix mucronata* var. *integra* Burtt Davy)

Tropical Africa.

See *Prodromus Plantarum Capensium*, ... 6. 1794

(Leaves and bark analgesic, febrifuge.)

Salix caprea L.

China.

See *Species Plantarum* 2: 1015–1022. 1753

(Used in Ayurveda and Unani. Emetic.)

in English: goat willow, kilmarnock willow, pussy willow

in China: huang hua liu

in India: aarqe-bede-mushk, arq baid mushk, balqiya, bed-mushk, bede-mushk, bedmushk, garba-e-baid, gul baid mushk, jalavetasa, khilaf, ma-el-khilaf, maul-khilaf, mushk-e-baid, qilaf balaqi, vajjula, vanjula, varnara, vetasa, vidula

in Tibet: lecan-ma

Salix cavaleriei H. Lév. (*Pleiarina cavaleriei* (H. Lév.) N. Chao & G.T. Gong; *Salix polyandra* H. Lév.; *Salix pyi* H. Lév.; *Salix yunnanensis* H. Lév.)

China.

See *Bulletin de la Société Botanique de France* 56: 298, 300. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 6(125–130): 377–378. 1909, *Journal of Sichuan Forestry Science and Technology* 17(2): 4. 1996

(Worshipped.)

in China: dian da ye liu, ye mi zai

Salix denticulata Andersson (*Salix elegans* Wall. ex Andersson; *Salix elegans* Wall.; *Salix elegans* Besser; *Salix elegans* Host, nom. illeg.)

India, Nepal.

See *Enum. Pl.* [Besser] 77. 1822, *Fl. Austriac.* 2: 652. 1831, *Numer. (Vermifuge, febrifuge, diaphoretic, chewed plants applied to boils, wasp stings.)

in English: prickly Russian thistle, Russian thistle, tumbleweed

Salvadora L. Salvadoraceae

The generic name after the Spanish apothecary and botanist Juan Salvador y Bosca, 1598–1681, plant collector; see *Species Plantarum* 1: 122. 1753, *Noticia historica de la familia de Salvador de la ciudad de Barcelona* por Don Pedro Andres Pourret. Barcelona 1796, *An Introduction to the Natural System of Botany* 269. 1836 and *Novon* 2(3): 239. 1992, *Phytologia* 74(3): 174. 1993.

Salvadora oleoides Decne.

Pakistan.

See Jacquemont, Victor (1801–1832), *Voyage dans l'Inde*. Paris: Firmin Didot freres, 1841–1844 [The part of v. 4 dealing with botany: “Description des collections: botanique” has the separate title of: *Plantae rariores*, quas in India orientali collegit Victor Jacquemont/J. Cambessedes.]

(Fresh fruits taken orally to induce vomiting, in case of food poisoning. Leaves chewed to treat cough and as a purgative; juice of leaves given in cough, piles, asthma and bronchitis. Seed powder and leaves used as insecticide. Roots to reduce toothache. Twigs used as toothbrush. Veterinary medicine, scabies.)

in India: jal, pilu

in Pakistan: jar, khabbar, peelu

Salvadora persica L. (*Salvadora crassinervia* Hochst. ex T. Anderson; *Salvadora paniculata* Zucc. ex Steud.)

East Africa, Tanzania. Shrub or small tree, large leafy bush, evergreen, climbing, trailing, crooked stem, convoluted or prostrate, widely spreading crown, flexible drooping branches, tiny flowers in axillary and terminal clusters, perianth white-cream, small purple-red juicy fruits, leaves and fruit heavily grazed by camels and goats, ripe fruits eaten raw also with honey, volatile oil from the leaves, stem used as a toothbrush, very drought resistant, an important indicator of saline soils, in dry bushland, secondary forest, along rivers and lakes, arid, semi-arid and coastal regions in riverine vegetation, wooded grassland

See *Species Plantarum* 1: 122. 1753, *Nomencl. Bot.* [Steudel], ed. 2. ii. 503. 1840–1841, *J. Proc. Linn. Soc., Bot.* 5(Suppl. 1): 30. 1860 and *Cytologia* 53: 87–92. 1988, *Nat. Prod. Res.* 17(3): 189–194. 2003

(Used in Ayurveda, Unani and Sidha. Plant used for worms, edema, fever, malaria; plant juice as a female contraceptive. Latex used in the treatment of skin sores. Seed oil massaged on joints pains, lumbago, rheumatism. Fruits and roots decoction used to reduce rheumatic pains; fruits and seeds for deworming. Root decoction a remedy for gonorrhoea, ulcer, stomachache, catarrh, as a gargle for toothache; the decoction, mixed with meat soup, used for body and chest pain, backache, stomachache; boiled root infusion given to breast-feeding mothers to increase milk. Root ground and the powder rubbed on the forehead to relieve headache. Leaves decoction a remedy for generalized body pains, backache, stomachache and chest pains; pounded leaves used as a poultice for wounds; leaves juice given in piles, stomatitis and cough; leaves, bark and flowers healing wounds, blood clotting. Bark infusion drunk for treating sore throat; bark as toothbrush to cure bleeding gums; stem bark crushed with *Trachyspermum ammi* taken to cure peptic ulcers. Veterinary medicine, leaves applied on infected wounds to kill worms; leaves juice applied on wounds and mastitis.)

in English: mustard tree, saltbush, tooth-brush bush, tooth-brush tree

(Antioxidant, anti-HIV activity, antibacterial and antiphlogistic.)

in English: Yunnan sage

in China: yun nan shu wei cao

Salvinia Séguier Salviniaceae

After the Italian Antonio Maria Salvini, 1633–1729, professor of Greek in Florence, a friend of the Italian botanist Pier'Antonio Micheli (1679–1737), among his writings *Discorsi accademici sopra alcuni dubbj proposti nell'Accademia degli Apatisti*. Firenze 1695, *Prose toscane*. Firenze 1715–35 and *Prose sacre*. Firenze 1716; see Jean François Séguier (1703–1784), *Plantae veronenses*. 3: 52. Veronae 1754, *Familles des Plantes* 2: 15. 1763, *Encyclopédie Méthodique, Botanique* 1(1): 343. 1783, *Analyse des Familles de Plantes* 67. 1829.

Salvinia adnata Desv. (*Salvinia auriculata* auct.; *Salvinia auriculata* Aubl.; *Salvinia hispida* Kunth; *Salvinia molesta* D.S. Mitch.; *Salvinia radula* Baker; *Salvinia rotundifolia* Willd.)

India, Sri Lanka, Brazil, Botswana. Food, green manure

See *Histoire des plantes de la Guiane Française* 2: 969, t. 367. 1775, *Species Plantarum*. Editio quarta [Willdenow] 5: 537. 1810, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 1: 44. 1815[1816], *Mémoires de la Société Linnéenne de Paris* 6(2): 177. 1827, *Journal of Botany, British and Foreign* 24: 98–99. 1886 and Elizabeth Colson, *The Social Organization of the Gwembe Tonga. Human Problems of Kariba*. Manchester 1960, Barrie Reynolds, *The Material Culture of the Peoples of the Gwembe Valley*.

Kariba Studies Vol. III. Manchester, University Press for the National Museums of Zambia 1968, *British Fern Gazette* 10(5): 251–252. 1972, *Indian J. Bot.* 2: 51–54. 1979, *Aquatic Bot.* 10: 81–84. 1981

(Plant antifungal.)

in English: African pyle, giant salvinia, Kariba-weed, salvinia

in South Africa: watervaring

Salvinia natans (L.) All. (*Marsilea natans* L.; *Salvinia natans* All.; *Salvinia natans* Pursh, nom. superfl.)

Paraguay.

See *Flora Pedemontana* 2: 289. 1785, *Flora Americae Septentrionalis*; or, ... 2: 672. 1814[1813]

(Whole plants boiled and eaten for consumptive disease and eczema; fresh plant extract taken to get relief from acidity; fresh plants paste applied to treat ringworm and eczema, furuncle and scald, inflammatory diseases, redness of skin.)

in China: huai ye ping, tzu ping

in India: jalmaganiya

Samanea (Benth.) Merr. Fabaceae (Ingeae, Mimosaceae)

From the native Spanish or South American name *saman* or *zaman*, see *London Journal of Botany* 3: 197. 1844 and *Journal of the Washington Academy of Sciences* 6(2): 46. 1916.

Samanea dinklagei (Harms) Keay (*Albizia dinklagei* (Harms) Harms; *Albizia dinklagei* Harms; *Albizia leptophylla* Harms; *Arthrosamanea leptophylla* (Harms) Gilbert & Boutique; *Cathormion dinklagei* Hutch. & Dandy; *Cathormion dinklagei* (Harms) Hutch. & Dandy; *Cathormion leptophyllum* (Harms) Keay; *Mimosa dinklagei* Harms; *Pithecellobium dinklagei* (Harms) Harms; *Samanea leptophylla* (Harms) Brenan & Brummitt)

Tropical Africa. Perennial non-climbing tree, shrub

See *Species Plantarum* 1: 516–523. 1753, *Magazzino toscano* 3(4): 13–14. 1772, *Flora* 20(2): Beibl. 114. 1837, *Retzia* 1: 231. 1855, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 253. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 455. 1915, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8(72): 145. 1922, *Flora of West Tropical Africa* 1(2): 364. 1928, *Bulletin of Miscellaneous Information Kew* 1928(10): 401. 1928, *Annals of the New York Academy of Sciences* 35(3): 128. 1936, *Bulletin du Jardin Botanique de l'État* 22: 182. 1952, *Kew Bulletin* 8(4): 488–489. 1953 [1954], *Bol. Soc. Brot.* ser. 2, 39: 201. 1965

(Dry sawdust urticant, irritant. Bark febrifuge, laxative, for stomach troubles; leaves for eyes problems.)

in Senegal: bansabule, bu daha, ko néré ko, ko téri, kuré néri, mblelod, sindialai, sindialal

Sambucus L. Caprifoliaceae (Adoxaceae, Sambucaceae)

Etymology uncertain, Latin *sambucus*, *i* and *sabucus*, used by Plinius for an elder tree; *sambucum*, *i* 'the fruit of the elder, elder-berries'; see Carl Linnaeus, *Species Plantarum*. 1: 269–270. 1753 and *Genera Plantarum*. Ed. 5. 130. 1754 and P. Aebischer, in *Vox Romanica*. XII: 82–94. 1951–1952, G. Bonfante, in *Bollettino del centro di studi filologici e linguistici siciliani*. I: 58–60. Palermo 1953, J. Hubschmid in *Revue de linguistique romane*. 27: 380–381. Paris 1963, G. Rohlf, in *Bollettino del centro di studi filologici e linguistici siciliani*. IX: 97. Palermo 1965, *Fieldiana, Bot.* 24(11/4): 275–296. 1976, *Bot. Zhurn.* (Moscow & Leningrad) 71(11): 1558. 1986, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1125. Zanichelli, Bologna 1988, Tewe, O.O., Iyayi, E.A. *Cyanogenic glycosides*. Pages 43–60 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. II. *Glycosides*. Boca Raton, Fla. 1989, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 553–554. Basel 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 585–586. 2001. Leaves and stems of some members of this genus are poisonous.

***Sambucus canadensis* L.** (*Sambucus bipinnata* Schldtl. & Cham.; *Sambucus caerulea* Raf. var. *mexicana* (C. Presl ex DC.) L.D. Benson; *Sambucus canadensis* var. *laciniata* A. Sambucus nigra L. subsp. *cerulea* (Raf.) Bolli (*Sambucus caerulea* Raf.; *Sambucus caerulea* Raf. var. *neomexicana* (Woot.) Rehder; *Sambucus caerulea* var. *velutina* (Durand & Hilg.) Schwerin; *Sambucus cerulea* Raf.; *Sambucus cerulea* var. *neomexicana* (Woot.) Rehder; *Sambucus cerulea* var. *velutina* (Durand & Hilg.) Schwerin; *Sambucus glauca* Nutt.; *Sambucus mexicana* C. Presl ex DC. subsp. *caerulea* (Raf.) E. Murray; *Sambucus mexicana* subsp. *cerulea* (Raf.) E. Murray; *Sambucus mexicana* var. *caerulea* (Raf.) E. Murray; *Sambucus mexicana* var. *cerulea* (Raf.) E. Murray; *Sambucus neomexicana* Woot.; *Sambucus neomexicana* var. *vestita* (Woot. & Standl.) Kearney & Peebles; *Sambucus nigra* subsp. *caerulea* (Raf.) R. Bolli; *Sambucus velutina* Durand & Hilg.)

North America. Shrub or tree

See *Alsographia Americana* 48. 1838 and *Atlas of the Vascular Plants of Texas* 6. 2003

(Roots decoction taken for dyspepsia, diarrhea, bladder troubles. Bark infusion astringent, for diarrhea; bark decoction a wash for swelling, pain, arthritis. Flowers infusion febrifuge, for measles; flowers decoction for syphilis. Leaves decoction purgative, blood purifier, for colds; poultice of bruised leaves applied to burns. Infusion of leaves and flowers analgesic, for headache. Ceremonial.)

in English: blue elder, blue elderberry, blueberry elder, Mexican elder

Sambucus nigra L. subsp. *nigra* (*Sambucus laciniata* Mill.; *Sambucus nigra* L. var. *laciniata* L.)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 269–270. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 3: 429. 1818[1820], *Systema Vegetabilium* 6: 641. 1820 and *Journal of Cytology and Genetics* 3: 60–65. 1968, *Taxon* 28: 395–397. 1979, *Taxon* 31: 367. 1982, *Informatore Botanico Italiano* 16: 251–260. 1984, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Watsonia* 19: 134–137. 1992, *Regnum Veg.* 127: 84. 1993, *Botanica Acta* 106: 183–191. 1993, *Journal of Wuhan Botanical Research* 11: 289–292. 1993, *Dissertationes Botanicae* 223: 177. 1994, *Opera Botanica* 137: 1–42. 1999, *Taxon* 49: 5–16. 2000

(Fetid pithy shrub. This shrub contains cyanogenic glycosides. Berries eaten raw can cause nausea and vomiting in humans, cooking destroys the toxin. Children should not be allowed to ingest the berries. Hydrocyanic acid can be released in animals by the action of plant enzymes after ingestion. Flowers infusion febrifuge, diuretic, emetic, diaphoretic, cathartic. Infusion of berry for rheumatism. Leaves disinfectant, to wash sores.)

in English: arn tree, black elder, black elderberry, bourtree, common elder, common European elder, elder tree, elderberry, European black elder, European elder

Sambucus pubens Michx. (*Sambucus racemosa* L. subsp. *pubens* (Michx.) House; *Sambucus racemosa* var. *pubens* (Michx.) Koehne; *Sambucus racemosa* var. *pubens* (Michx.) S. Watson)

North America. Deciduous shrubs, leaves pinnately divided with 5–7 leaflets, toothed on the margin, small flowers creamy white in large rounded clusters, fruit a small red berry

See *Species Plantarum* 1: 269–270. 1753, *Flora Boreali-Americana* 1: 181. 1803, Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany.* Washington: Government Printing Office, 133. 1871, *Deutsche Dendrologie* 532. 1893 and *Flora of the Aleutian Islands* 308. 1937, *Novosti Sist. Vyssh. Rast.* 23: 165. 1986

(All parts poisonous. This species may have toxic potential, cyanogenic glycosides are found in elders. Children should not be allowed to chew the stems or berries. Red fruits inedible. A treatment for fever, a diuretic; a face wash for acne.)

in English: American red elder, elder flower, red-berried elder, stinking elder

in Spanish: flor sauco

Sambucus racemosa L. (*Sambucus miquelii* (Nakai) Kom. & Klob.-Alis.; *Sambucus racemosa* var. *racemosa*)

Europe, North America. Perennial tree or shrub

See *Species Plantarum* 1: 270. 1753 and *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 23: 1–23. 1974, *Acta Biol. Cracov., Ser. Bot.* 19: 107–148. 1976, *Taxon* 25: 631–649. 1976, *Acta Biologica Cracoviensia, Series Botanica* 22: 173–188. 1980,

Taxon 30: 856–857. 1981, *Taxon* 31: 583–587. 1982, *Turun Yliopiston Julkaisuja, Sar. A 2, Biol.-Geogr.* 3: 1–12. 1982, *Fitologija* 23: 30–44. 1983, *Blyttia* 1985: 7–15. 1985, *Novosti Sist. Vyssh. Rast.* 23: 165. 1986

(Berries potentially poisonous when raw, should always be eaten cooked; decoction of inner bark said to be dangerous. Blossoms used for measles. Roots infusion analgesic, emetic, stomachic, purgative, for stomachache; roots chewed as an emetic, laxative; roots rubbed as an antirheumatic. Bark laxative, laxative, emetic, as a postpartum remedy; root bark cathartic, antidote, emetic, purgative, stomachic; bark decoction emetic for food poisoning; bark infusion drunk by women to help deliver the placenta. Magic, ritual, for evil witchcraft victims.)

in English: elderberry, European red elder, Pacific red elder, red-berried elder, red elderberry, scarlet elderberry

in China: chieh ku mu, hsu ku mu, mu so tiao

Sambucus racemosa L. var. ***melanocarpa*** (A. Gray) McMinn (*Sambucus melanocarpa* A. Gray)

North America. Perennial tree or shrub

See *Proceedings of the American Academy of Arts and Sciences* 19: 76. 1883 and *An Illustrated Manual of California Shrubs* 529. 1939

(Flowers decoction for coughs, blossoms decoction taken for tuberculosis, colds, coughs. Roots decoction taken for diarrhea, dysentery. Dried ripe berries eaten for diarrhea. Leaves poultice applied to bruises, bleeding wounds.)

Sambucus racemosa L. var. ***racemosa*** (*Sambucus callicarpa* Greene; *Sambucus microbotrys* Rydb.; *Sambucus pubens* Michx.; *Sambucus pubens* var. *arborescens* Torr. & A. Gray; *Sambucus racemosa* subsp. *pubens* (Michx.) House; *Sambucus racemosa* var. *arborescens* (Torr. & A. Gray) A. Gray; *Sambucus racemosa* var. *laciniata* W.D.J. Koch ex DC.; *Sambucus racemosa* var. *leucocarpa* (Torr. & A. Gray) Cronquist; *Sambucus racemosa* var. *microbotrys* (Rydb.) Kearney & Peebles; *Sambucus racemosa* var. *pubens* (Michx.) Koehne)

Europe, North America. Perennial tree or shrub

See *Species Plantarum* 1: 270. 1753 and *Acta Biologica Cracoviensia, Series Botanica* 22: 173–188. 1980, *Taxon* 30: 856–857. 1981, *Novosti Sist. Vyssh. Rast.* 23: 165. 1986

(Berries potentially poisonous when raw, should always be eaten cooked; decoction of inner bark said to be dangerous.)

in English: elderberry, European red elder, Pacific red elder, red-berried elder, red elderberry

Sandoricum Cav. Meliaceae

Sandori or *santoor* is a Moluccan plant name for *Sandoricum koetjape* (Burm.f.) Merr.; see Antonio José Cavanilles

(1745–1804), *Monadelphiae classis dissertationes decem*. 7: 359, tt. 202, 203. Matriti 1786–1787.

Sandoricum indicum Cav. (*Sandoricum nervosum* Blume)

India, Philippines. Tree, fruit yellow, seeds embedded in fleshy pulp

See *Monadelphiae Classis Dissertationes Decem* 7: 359, tt. 202, 203. 1789, *Bijdr. Fl. Ned. Ind.* 4: 163. 1825

(Roots tonic, aromatic, stomachic, antispasmodic. Leaves soaked in water and used in remittent fever; for fever, chew the leaves and bespatter the face of the patient; itch, pound the leaves and apply as a poultice. Pounded bark in ringworm.)

in Malaysia: ketapi, santol, sentol, sentul, seteh, setia, setieh, setoi, setol

Sandoricum koetjape (Burm.f.) Merrill (*Melia koetjape* Burm.f.)

SE Asia. Big canopy tree, leaves trifoliate, white scented bisexual flowers in many-flowered axillary panicles, white free corolla, calyx truncate, many-seeded berry with a yellow leathery exocarp and fleshy white pulp, white latex in pericarp, edible fruits

See *Species Plantarum* 1: 384–385. 1753, *Flora Indica ... nec non Prodrumus Florae Capensis* 101. 1768, *Monadelphiae Classis Dissertationes Decem* 7: 359. 1789 and *Philippine Journal of Science* 7(4): 237. 1912

(Tonic, febrifuge, fresh leaves applied as sudorific.)

in English: red sentol, yellow sentol

in India: hisnay asam

in Malaysia: kechapi, santol, sentol, sentul, seteh, setia, setieh, setoi

in Philippines: katul, santol, santor

Sanguinaria L. Papaveraceae

Latin *sanguinarius*, *a*, *um* ‘blood-, belonging to blood’, *sanguis*, *inis* ‘blood’, referring to the colour of the sap; *sanguinaria* or *sanguinalis herba*, the name of an herb that stanches blood (see Greek *polygonon*), see *Species Plantarum* 1: 505. 1753.

Sanguinaria canadensis L. (*Sanguinaria australis* Greene; *Sanguinaria canadensis* var. *rotundifolia* (Greene) Fedde; *Sanguinaria canadensis* var. *rotundifolia* Fedde; *Sanguinaria dilleniana* Greene)

North America. Perennial herb, rhizome with blood-red juice, bright-orange sap, single basal leaf deeply palmately lobed, solitary flowers, long narrowly pointed white petals, fruit an elongated capsule

See *Sp. Pl.* 1: 505. 1753 and *Pittonia* 5: 307. 1905, *Das Pflanzenreich* (Engler) 4(Fam. 104): 205. 1909, *Acta Biol.*

Cracov., *Ser. Bot.* 29: 19–30. 1987, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989, *Bot. Žurn.* (Moscow & Leningrad) 76: 904–905. 1991, *Bot. Žurn.* (Moscow & Leningrad) 79(3): 70–76. 1994

(Rhizome poisonous, highly toxic, potentially fatal. Although bloodroot is an ingredient of some compound cough remedies, it contains the poisonous alkaloid sanguinarine, and the U.S. Food and Drug Administration has characterized *Sanguinaria canadensis* as an unsafe herb. Abortifacient, tonic, analgesic, heart tonic, used to treat ulcers and sores, cramps, burns, tapeworms, fevers, lung inflammations and croup, catarrh, diarrhea, and irregular periods, in cough syrups, as an emetic and blood purifier, to stop vomiting. Insect repellent. Ceremonial, love charm, aphrodisiac. Veterinary medicine, used as an abortifacient for horses.)

in English: bloodroot, red puccoon

in North America: minigathe maka wau (Omaha-Ponca)

Sanguisorba L. Rosaceae

Latin *sanguis*, *sanguinis* ‘blood’ and *sorbeo*, *bui*, (*ptum*), *ere* ‘to absorb, soak up’, the rootstock has astringent and styptic qualities and properties; see Carl Linnaeus, *Species Plantarum*. 1: 116–117. 1753, *Species Plantarum* 2: 994. 1753 and *Genera Plantarum*. Ed. 5. 53. 1754.

Sanguisorba filiformis (J.D. Hooker) Handel-Mazzetti (*Poterium filiforme* J.D. Hooker)

China.

See *Species Plantarum* 2: 994. 1753, *The Flora of British India* 2(5): 362. 1878 and *Symbolae Sinicae* 7(3): 524. 1933

(Poultice for skin diseases.)

in China: ai di yu

Sanguisorba officinalis Linnaeus (*Poterium officinale* (L.) A. Gray; *Sanguisorba glandulosa* Kom.; *Sanguisorba officinalis* var. *glandulosa* (Kom.) Vorosch.)

Europe, northern Asia, China. Perennial herb, glabrous, root wrinkled and fibrous, leaves alternate compound, inflorescence a compact terminal spike ovoid or oblong, flowers dark-purple caducous, calyx with 4 petaloid segments, petals wanting, separate carpels enclosed in the persistent calyx

See *Species Plantarum* 1: 116–117. 1753, *Species Plantarum* 2: 994. 1753, *Proceedings of the American Academy of Arts and Sciences* 7(2): 340. 1868 and *Taxon* 28: 265–268, 400–401. 1979, *Botaniceskij Žurnal SSSR* 65(1): 51–59. 1980, *Taxon* 30: 70–72. 1981, *Botaniceskij Žurnal SSSR* 67(3): 360–365 and 67(6): 778–787. 1982, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 60: 73–83. 1989, *Bulletin of College of Child Development, Kochi Women’s University* 14: 87–92. 1990, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 476–479.

1991, *Watsonia* 18: 415–417. 1991, *Watsonia* 19: 134–137. 1992, *Botaničeskij Žurnal (Moscow & Leningrad)* 80(3): 85–88. 1995

(The roots used for hematuria, hemorrhoids, diarrhea, bleeding, chronic gastro-enteritis, strengthen stomach, stop loose bowels, treat spleen and tiredness; external use for burns.)

in English: burnet, burnet bloodwort, garden burnet, great burnet, ground elm

in Peru: pimpinela

in China: di yu, ti yu, zi di yu

Sanguisorba stipulata Rafinesque (*Poterium sitchense* (C.A. Meyer) S. Watson; *Sanguisorba canadensis* Torrey & A. Gray; *Sanguisorba canadensis* L.; *Sanguisorba canadensis* subsp. *latifolia* (Hooker) Calder & Roy L. Taylor; *Sanguisorba canadensis* var. *latifolia* Hooker; *Sanguisorba canadensis* var. *sitchensis* (C.A. Meyer) Koidzumi; *Sanguisorba latifolia* (Hooker) Coville; *Sanguisorba sitchensis* C.A. Meyer; *Sanguisorba stipulata* var. *latifolia* (Hooker) H. Hara)

China, Japan. Herb, white flowers

See *Species Plantarum* 2: 994. 1753, *Flora Boreali-Americana* 1: 198. 1832, *Herbarium Rafinesquianum* 47. 1833, *Florula Ochotensis Phaenogama* 34–35. 1856, *Contributions from the United States National Herbarium* 3: 339. 1896 and *Botanical Magazine* 31(365): 137. 1917, *Journal of Japanese Botany* 23(1–2): 31. 1949, *Canadian Journal of Botany* 43(11): 1395. 1965, *Taxon* 28: 265–268, 400–401. 1979

(The roots used for hematuria, hemorrhoids, diarrhea.)

in English: Sitka burnet (Baranof Island, in SE Alaska)

in China: da bai hua di yu

Sanicula L. Apiaceae (Umbelliferae)

Latin *sano, avi, atum, are (sanus)* ‘to heal, cure’, alluding to its healing properties; see *Species Plantarum* 1: 235. 1753, *Das Pflanzenreich* 3(8): 137. 1898 and *Das Pflanzenreich* IV. 228(Heft 61): 52. 1913, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 85. 1830, *University of California Publications in Botany* 25(10): 223. 1951, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 555–556. Basel 1996.

Sanicula astantiifolia H. Wolff ex Kretschmer (*Sanicula astantiifolia* H. Wolff; *Sanicula potaninii* Bobrov)

China.

See *Repert. Spec. Nov. Regni Veg.* 27(741–750): 308–309. 1930

(Stomachic.)

in China: chuan dian bian dou cai

Sanicula bipinnata Hook. & Arn.

North America. Perennial, leaves eaten as vegetable

See *The Botany of Captain Beechey's Voyage* 347. 1839

(Poultice of boiled plant applied to snakebites.)

in English: poison sanicle

Sanicula bipinnatifida Douglas ex Hook. (*Sanicula bipinnatifida* Douglas ex Hook. var. *flava* Jeps.)

North America. Perennial

See *Flora Boreali-Americana* 1: 258, pl. 92. 1832

(Infusion of leaves applied to snakebites.)

in English: purple sanicle

Sanicula caerulea Franchet (*Sanicula dielsiana* H. Wolff; *Sanicula erythrophylla* Bobrov; *Sanicula stapfiana* H. Wolff)

China.

See *Bulletin de la Société Philomatique de Paris* 8(6): 109. 1894 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(188–191): 524. 1910, *Das Pflanzenreich* IV 228(Heft 61): 58. 1913

(Stomachic, astringent.)

in China: tian lan bian dou cai

Sanicula canadensis L. (*Sanicula canadensis* L. var. *floridana* (E.P. Bicknell) H. Wolff; *Sanicula canadensis* L. var. *typica* H. Wolff; *Sanicula floridana* E.P. Bicknell; *Sanicula marilandica* var. *canadensis* (L.) Torr.)

North America.

See *Species Plantarum* 1: 235. 1753, *A Flora of the Northern and Middle Sections of the United States* 302. 1824 and *Bot. J. Linn. Soc.* 92: 171. 1986

(Root decoction for heart trouble.)

in English: Canadian blacksnakeroot

Sanicula chinensis Bunge (*Sanicula europaea* L. subsp. *chinensis* (Bunge) Hultén; *Sanicula europaea* var. *chinensis* (Bunge) Diels; *Sanicula kurilensis* Pobed.)

China.

See *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 2: 106. 1835 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 491. 1900, *Journal of Plant Biology* 39: 15–22. 1996

(Stimulant.)

in China: bian dou cai

Sanicula crassicaulis Poepp. ex DC. (*Aulosolena menziesii* (Hook. & Arn.) Koso-Pol.; *Sanicula crassicaulis* var.

menziesii (Hook. & Arn.) H. Wolff; *Sanicula crassicaulis* var. *tripartita* (Suksd.) H. Wolff; *Sanicula diversiloba* Suksd.; *Sanicula menziesii* Hook. & Arn. var. *foliacea* Jeps.; *Sanicula menziesii* var. *nudicaulis* (Hook. & Arn.) Jeps.; *Sanicula menziesii* var. *pedata* Jeps.; *Sanicula nudicaulis* Hook. & Arn.; *Sanicula tripartita* Suksd.)

North America. Perennial

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 84–85. 1830, *The Botany of Captain Beechey's Voyage* 142. 1832, *The Botany of Captain Beechey's Voyage* 347. 1839 and *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 12(1): 5. 1906, *A Flora of Western Middle California* 290. 1911, *Das Pflanzenreich IV*. 228(Heft 61): 70. 1913, *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 156. 1916, *Madroño* 1(6): 111. 1923, *Werdenda* 1: 29. 1927

(Poultice of leaves used for rattlesnakebites, bruises, burns, boils, wounds. Good luck charm.)

in English: Pacific blacksnakeroot

Sanicula elata Buchanan-Hamilton ex D. Don (*Sanicula capensis* (Cham. & Schldl.) Eckl. & Zeyh.; *Sanicula europaea* L.; *Sanicula europaea* subsp. *elata* (Buchanan-Hamilton ex D. Don) Boiss.; *Sanicula europaea* var. *capensis* Cham. & Schldl.; *Sanicula europaea* var. *elata* (Buch.-Ham. ex D. Don) Boiss.; *Sanicula hermaphrodita* Buchanan-Hamilton ex D. Don; *Sanicula montana* Reinwardt ex Blume; *Sanicula natalensis* Gand.)

Nepal. A widespread and very variable species, whole plant used as vegetable

See *Species Plantarum* 1: 235. 1753, *Prodromus Florae Nepalensis* 183. 1825, *Bijdragen tot de flora van Nederlandsch Indië* 15: 882. 1826, *Linnaea* 1: 352. 1826, *Enumeratio Plantarum Africae Australis Extratropicae* 3: 339. 1837 and *Bulletin de la Société Botanique de France* 53: 421. 1906, *Prop. Brit. Bot.* 138. 1929, *Bulletin du Jardin Botanique de l'État* 45: 421–445. 1975, *Taxon* 29: 543. 1980, *Candollea* 35: 497–510. 1980, *Cytologia* 45: 389–402. 1980, *Taxon* 31: 595–596, 771–772. 1982, *Plant Systematics and Evolution* 154: 11–30. 1986, *Regnum Veg.* 127: 84. 1993, *Opera Botanica* 121: 159–172. 1993

(Whole plant paste for blood dysentery. Root juice given to treat indigestion. Flowers paste antiseptic.)

in China: ruan que hua

in India: okruo

in Nepal: meman

Sanicula hacquetioides Franchet

China.

See *Bull. Soc. Philom. Paris*, sér. 8(6): 110. 1894

(Blood purifier.)

in China: lin guo bian dou cai

Sanicula marilandica L. (*Sanicula canadensis* L. var. *marilandica* (L.) Hitchc.; *Sanicula marilandica* L. var. *petiolulata* Fernald)

North America. Perennial herb

See *Species Plantarum* 1: 235. 1753, *Transactions of the Academy of Science of St. Louis* 5: 497. 1891

(Antidote, abortifacient, emetic, snakebite remedy, febrifuge, roots for rattlesnakebite or any snakebite, irregular menstruation, venereal diseases, kidney trouble, menstrual pain, rheumatism, slow parturition. Witchcraft medicine.)

in English: Maryland sanicle

Sanicula odorata (Raf.) K.M. Pryer & L.R. Phillippe (*Sanicula gregaria* E.P. Bicknell; *Triclinium odoratum* Raf.)

North America. Perennial

See *Florula Ludoviciana*, or, a flora of the state of ... 80. 1817 and *Canadian Journal of Botany* 67(3): 703. 1989

(Analgesic, astringent, for nosebleeds, kidney trouble. Witchcraft medicine.)

in English: clustered blacksnakeroot

Sanicula orthacantha S. Moore var. *brevispina* H. Boissieu
China.

See *Bull. Soc. Bot. France* 53: 421. 1906

(Astringent, cardiotoxic.)

in China: duan ci e jiao ban

Sanicula orthacantha S. Moore var. *orthacantha* (C.B. Clarke) Ridley (*Sanicula costata* H. Wolff; *Sanicula henryi* H. Wolff; *Sanicula nanchuanensis* R.H. Shan; *Sanicula orthacantha* var. *costata* (H. Wolff) K.T. Fu; *Sanicula orthacantha* var. *pumila* H. de Boissieu)

China.

See *Journal of Botany, British and Foreign* 13(152): 227. 1875 and *Das Pflanzenreich IV* 228(Heft 61): 55–56. 1913, *Sinensia* 14: 111. 1943

(Astringent, cardiotoxic.)

in China: ye e jiao ban

Sanicula rubriflora F. Schmidt ex Maximowicz

China.

See *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* (Sér. 7) 9 [Prim. Fl. Amur.]: 123. 1859

(Astringent, antiseptic, disinfectant, cardiotoxic.)

in China: hong hua bian dou cai

Sanicula smallii E.P. Bicknell

North America.

See *Bulletin of the Torrey Botanical Club* 24(12): 578–581. 1897

(Analgesic, hemostat, for nosebleed, stomach cramps and colic.)

in English: Small's blacksnakeroot

Sanionia Loeske Amblystegiaceae

See *Hedwigia* 46: 309. 1907, *Die Natürlichen Pflanzenfamilien* I(3): 1033. 1908, *Conspectus Muscorum Europaeorum* 586. 1954, *Bryol.* 11: 609–689. 1981 [1982], *Ann. Missouri Bot. Gard.* 73: 177–208. 1986, *Ann. Bot. Fenn.* 26: 399–416. 1989, *Fl. Criptog. Tierra del Fuego* 14(10): 5–95. 2001.

Santolina L. Asteraceae

Latin *santolina*, from *santonina*, Latin *santonicus* ‘belonging to the Santoni or Santones, Santonian’, Greek *santonikon* for worm-seed, *Artemisia maritima*; see *Species Plantarum* 2: 842–843. 1753 and *Fieldiana, Bot.*, n.s. 7: 1–21. 1981, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 541. UTET, Torino 1995, H. Genauast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 556. Basel 1996.

Santolina chamaecyparissus L.

North America.

See *Species Plantarum* 2: 842. 1753

(Analgesic.)

in English: french lavender, lavender-cotton

Santolina tinctoria Molina (*Cephalophora tinctoria* (Molina) Guncel; *Heleniastrum tinctorium* (Molina) Kuntze; *Heleniastrum tinctorium* Kuntze; *Helenium tinctorium* (Molina) J.F. Macbr.)

South America.

See *Sag. Stor. Nat. Chili* 142. 1782, *Icones et Descriptiones Plantarum*, quae aut sponte ... 6(2): 79–80. 1801, *Revis. Gen. Pl.* 3[3]: 157. 1898 and *Contr. Gray Herb.* 56: 47. 1918, *Not. Mens. Mus. Nac. Hist. Nat.* 17(197): 9. 1972

(Antiseptic, analgesic.)

Sapindus L. Sapindaceae

Latin *sapo*, *saponis* (Akkadian *sapu* ‘to bathe’, *sapu* ‘dyer’) ‘soap’ and *indicus* ‘Indian, of India’; see Carl Linnaeus, *Species Plantarum*. 1: 367. 1753, *Genera Plantarum*. Ed. 5. 171. 1754 and *Fieldiana, Bot.* 24(6): 234–273. 1949.

Sapindus delavayi (Franchet) Radlkofer (*Pancovia delavayi* Franchet; *Sapindus tomentosus* auct. non Kurz)

China.

See *Species Plantarum*. Editio quarta 2: 285. 1799, *Bull. Soc. Bot. France* 33: 461. 1886, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 20: 233. 1890

(Expectorant, emetic, purgative.)

in China: chuan dian wu huan zi

Sapindus drummondii Hook. & Arn. (*Sapindus acuminatus* S. Watson & Coult.; *Sapindus saponaria* Torr. non L.; *Sapindus saponaria* L. var. *drummondii* (Hook. & Arn.) L.D. Benson)

North America. Perennial tree or shrub, leaves opposite and pinnately divided, small yellow-white flowers, fruit a fleshy drupe

See *The Botany of Captain Beechey's Voyage* 281. 1838 and *American Journal of Botany* 30(8): 630. 1943

(Poisonous fruits, low toxicity, nausea, vomiting, diarrhea. Poultice of sap applied to wounds. Fruit antirheumatic and febrifuge.)

in English: soapberry, western soapberry, wild China tree

Sapindus emarginatus Vahl (*Sapindus emarginatus* Hort. Alger.; *Sapindus trifoliatus* Turcz.; *Sapindus trifoliatus* L.)

Tanzania. Tree, fruit green maturing red, seeds used as soap, often as *Sapindus trifoliatus* L.

See *Species Plantarum* 36(1): 586. 1753, *Bull. Soc. Imp. Naturalistes Moscou* xxxvi. (1863) I. 586. 1863, *Rev. Horticult.* lxxvii. 303. 1895 and *Catalogue des Plantes de Madagascar, Sapind.* 4: 1–14. 1931, *Taxon* 31: 576–579. 1982

(Used in Ayurveda and Unani. Fruits to cure asthma, cholera and diarrhea; fruit paste applied in scorpion sting, snakebites, headache and as leech repellent; rind of fruit made into a paste applied to eyes to cure jaundice; crushed fruits decoction applied for piles. Leaves for earache. Seeds tied in a cloth and introduced in vagina for the delivery. Bark pounded, the decoction given to relieve body pain, labor pain, epilepsy and headache, useful in snakebite; a decoction of root bark of *Mundulea sericea* pounded with stem barks of *Sapindus emarginatus* and *Azadirachta indica* given as postpartum remedy, antiseptic and general tonic. Bark as fish poison. Veterinary medicine, bark decoction when cattle are infected with ulcers from worms. Magico-religious beliefs.)

in English: soap nut tree of South India

in Tanzania: mhariba

in India: antaladha, antalakayi, antarale, antaval, antavala, antawala, antawalakai, aratala, arceta, ardal, areeta, areta, arishta, arishtaka, arishtam, arishtaphalam, arista, aristah, aristaka, aristam, aritala, aritha, artala, arthasadhana, atalakai, bara-ritha, bindake hindi, burugukayi, cavakayi, cavakkaya, chankai, chavakayimaram, chavakay, fandaq, finduk-i-hindi, garbhapatana, guchhaphala, hindi, homi, homie, kankudu, kavadi-pungai, kekru, krishnavarna, kugate, kugatemara, kugati, kukudu, kumbhabijaka, kunkatekaye, kunkudi, kunkudu, kunkudu-chettu, kunkudu-kayalu, kunkullu, kurkudu, mangalya, manipungu, manippunku, muktamaya, muktimonjro, neykottan, nittavanji, nurekayi, nurekayida, oravanci, orinjikai, paccakkotta, pachakkotta, pasaka, pasakotta, phenila, phenilah, phenilam, phenilamu, phenilu, phinilamu, pitaphena, pitha, poerinsii, ponnangottai, ponnankotta, poochakai, poochikai, poovandikottai, poovathikottai, prakirya, pucca, puchankottai, puchikkottai, puchikotte, pulinci, pulinji, punalai, punkumaram, punnan-kotta, puvamkottai, puvandi, puvirinni, raktabija, ratah, reetha, reta, rettia, ringin, rinte, rinti, rishta, rita, ritah, ritha, rithah, rithay ka chilka sufuf kia hua, rithe, rohan, runde, ryshta, savakkaya, somavalkala, somicettu, talemara, thalaymaruthu, thalemara, uravanji, uruangi, urulinji, uruvanji, urvanji, urvanjik-kaya, urvanjikaya, urvvanchi, urvvanci

in Tibet: phud, pud, pud ta

Sapindus laurifolius Vahl (*Sapindus laurifolius* Balb. ex DC.)

India. Small tree, stout, leaves abruptly pinnate, white flowers in terminal rusty brown tomentose panicles

See *Symb. Bot.* (Vahl) iii. 54. 1794, *Prodr.* (DC.) 1: 608. 1824

(Used in Ayurveda. Pericarp nauseant and expectorant, strongly emetic, purgative, abortifacient and fish poison; both

the root and fruit given as anthelmintic. Fruits as detergent for washing hairs and also used as purgative. Paste of fruit applied externally for scorpion sting, mumps, on bites of poisonous insects and animals; applied over the forehead to relieve headache; fruit foam used to wash wounds. Veterinary medicine, fruits and seeds antidote, to cure snakebite. Stem bark and pericarp as fish poison.)

in India: antaladha, antalakayi, antarale, antaval, antavala, antawala, antawalakai, antawalmara, aristakah, aritha, pac-cakkotta, pachakkotta, pasaka, pasakotta, phenila, phenilah, phenilam, phenilamu, phenilu, phinilamu, ponnangot-tai, ponnankotta, poochakai, poochikai, poovandikottai, poovathikottai, prakirya, pucca, puchankottai, puchikkottai, puchikotte, pulinci, pulinji, punalai, punkumaram, punnan-kotta, puvamkottai, puvandi, puvirinni, raktabija, ratah, reetha, reta, rettia, ringin, rinte, rinti, rishta, rita, ritah, ritha, rithah, rithay ka chilka sufuf kia hua, rithe, saban

***Sapindus marginatus* Willd.**

North America.

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... [Willdenow] 1: 432. 1809

(Poisonous.)

***Sapindus rarak* DC.** (*Dittelasma rarak* Hook.f.; *Dittelasma rarak* (DC.) Benth. & Hook.f.; *Dittelasma rarak* (DC.) Hiern)

Asia. Canopy tree, densely foliaged, leaves compound, small white or pale yellow flowers in terminal panicles, fruit wrinkled, round black seed, timber

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 608. 1824, *Genera Plantarum* [Bentham & Hooker f.] 1(1): 395–396. 1862, *The Flora of British India* [J.D. Hooker] 1: 672. 1875

(Poisonous saponin-containing fruits. Roots and fruits for asthma; fruit decoction to kill lice. Seeds for skin diseases, itch. Piscicidal.)

in English: soap nut tree

in Bhutan: nakapani

in China: mao ban wu huan zi

in India: am selenga

in Indonesia: lerak, lerek

Malayan name: lerak

in Nepal: ritha

in Thailand: cha sae, makham dee khwaai, masak, sa le de, sompoi thet

***Sapindus saponaria* L.** (*Cupania saponarioides* Sw.; *Sapindus abruptus* Loureiro; *Sapindus detergens* Roxb.; *Sapindus divaricatus* Cambess., nom. illeg. hom.; *Sapindus forsythii* DC.; *Sapindus inaequalis* DC.; *Sapindus indica* Poir.; *Sapindus marginatus* Willd.; *Sapindus mukorossi*

in Japan: mukuro-ju

in Malaya: buah lerak

in Nepal: chhopra, hathan, ritha, rithha, ritho

Sapindus saponaria L. var. *drummondii* (Hook. & Arn.) L.D. Benson (*Sapindus acuminatus* S. Watson & Coult.; *Sapindus drummondii* Hook. & Arn.; *Sapindus saponaria* Torr. non L.)

North America. Perennial tree or shrub

See *The Botany of Captain Beechey's Voyage* 281. 1838 and *American Journal of Botany* 30(8): 630. 1943

(Poisonous. Poultice of sap applied to wounds. Fruit anti-rheumatic and febrifuge.)

in English: soapberry, western soapberry, wild China tree

Sapindus trifoliatus L. (*Sapindus emarginatus* Vahl; *Sapindus emarginatus* Hort. Alger.; *Sapindus trifoliatus* Turcz.)

Tanzania. Tree, fruit green maturing red, seeds used as soap

See *Species Plantarum* 36(1): 586. 1753, *Bull. Soc. Imp. Naturalistes Moscou* xxxvi. (1863) I. 586. 1863, *Rev. Horticult.* Ixvii. 303. 1895 and *Catalogue des Plantes de Madagascar*, *Sapind.* 4: 1–14. 1931, *Taxon* 31: 576–579. 1982

(Used in Ayurveda, Unani and Sidha. Fruits to cure asthma, cholera and diarrhea; fruit paste applied in scorpion sting, snakebites and as leech repellent; crushed fruits decoction applied for piles. Leaves for earache. Seeds tied in a cloth and introduced in vagina decreases delivery pain. Bark pounded, the decoction given to relieve body pain, labor pain, epilepsy and headache, useful in snakebite. Bark as fish poison. Veterinary medicine, bark decoction when cattle are infected with ulcers from worms. Magico-religious beliefs.)

in English: soap nut tree of South India

in Tanzania: mhariba

in India: antaladha, antalakayi, antarale, antaval, antavala, antawala, antawalakai, aratala, arceta, ardal, areeta, areta,

arishta, arishtaka, arishtam, arishtaphalam, arista, aristah, aristaka, aritala, aritha, artala, arthasadhana, atalakai, bararitha, bindake hindi, burugukayi, cavakayi, cavvakkaya, chankai, chavakkay, fandaq hindi, finduk-i-hindi, garbhapatana, guchhaphala, homi, homie, ithaaphala, kankudu, kavadi-pungai, kekru, krishnavarna, kugate, kugatemara, kugati, kukudu, kumbhabijaka, kunkatekaye, kunkudi, kunkudu, kunkudu-chettu, kunkudu-kayalu, kunkullu, kurkudu, mangalya, manippungu, manippunku, muktamaya, muktimonjro, neykottan, nittavanji, nurekayi, nurekayida, oravanci, orinjikai, paccakkotta, pachakkotta, pasaka, pasakotta, phenila, phenilah, phenilam, phenilamu, phenilu, phinilamu, pitaphena, pitha, poerinsii, ponnangottai, ponnankotta, poochakai, poochikai, poovandikottai, poovathikottai, prakirya, pucca, puchankottai, puchikkottai, puchikotte, pulinci, pulinji, punalai, punkumaram, puvamkottai, puvandi, puvirinni, raktabija, ratah, reetha, reta, rettia, ringin, rinte, rinti, rishta, rita, ritah, ritha, rithah, rithay ka chilka sufukia hua, rithe, rohan, runde, ryshta, savakkaya, somavalkala, somicettu, talemaraadu, thalaymaruthu, thalemaradu, uravanji, uruangi,

in Tibet: phud, pud, pud ta

Sapium Jacq. Euphorbiaceae

Origins obscure, probably from the Latin *sappinus*, *sapinus*, *sappium* 'a kind of fir-tree, pine-tree, the lower smooth part of the fir-tree' (Plinius); some suggested from the Latin *sapio*, *ii* 'savory, witty, tasty', or from Celtic *sap* 'fat', an allusion to the greasy exudation from the wounded trunk, or from Latin *sapo*, *saponis* 'soap', etc.; see Patrick Browne (1720–1790), *The civil and natural history of Jamaica in three parts*. 338. London 1756, *Enum. Syst. Pl.* 9, 31. Aug–Sep. 1760, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 784. Ansbach 1852 and Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 556. Torino 1995.

Sapium marmieri Huber (*Sapium leitera* Gleason; *Sapium peloto* Pax & K. Hoffm.)

Colombia, Ecuador, Peru, Bolivia, Brazil. Tree, white or yellowish latex, leaves serrate glandular, flowers in terminal spike, fruit a capsule, in primary forest

See *Bull. Soc. Bot. France* 49: 49. 1902, *Bull. Torrey Bot. Club* 60: 364. 1933

(Latex purgative, sometimes caustic when in contact with the skin; used as a poison for arrows.)

in Bolivia: leche leche

in Peru: caucho mashan

Saponaria L. Caryophyllaceae

From the Medieval Latin *sapo*, *saponis* 'soap', referring to the mucilaginous juice, Akkadian *sapu* 'to bathe, flood',

Anglo-Saxon *sape*; Old Norse *sapa*; see Carl Linnaeus, *Species Plantarum*. 1: 408–409, 419. 1753, *Genera Plantarum*. Ed. 5. 191. 1754, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 465. 1809, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 366. 1824, *Conspectus Regni Vegetabilis* 206. 1828, *Flora Germanica Excursoria* 817. 1832, *Genera Plantarum* 972. 1840, *Genera Plantarum* 2: 78. 1842, *Flora Rossica* 1: 314. 1842, Grisebach, August Heinrich Rudolph (1814–1879), *Spicilegium florum rumelicarum et bithynicarum* ... 1: 180. Brunsvigae: prostat apud Fridericum Vieweg et filium, 1843–1844, *Flora* 26: 371. 1843, *Flora Orientalis* 1: 529. 1867 and Simmler, Gudrun, *Monographie der Gattung Saponaria*. Wien, 1910 [Denkschr. Akad. Wien, Lxxxv.], *Ann. Naturhist. Mus. Wien* 66: 45–50. 1963, *Acta Biol. Cracov.*, Ser. Bot. 22: 37–69. 1980, *Bot. Zhurn.* (Moscow & Leningrad) 69(11): 1480–1481. 1984, *Contributions from the University of Michigan Herbarium* 19: 157, 161. 1993, *Watsonia* 20: 63–66. 1994, Salvatore Battaglia, *Grande dizionario della lingua italiana*. Biosyst.* (Oslo) 26/27: 15–18. 1997, *Thaiszia* 7: 75–88. 1997, *American Journal of Botany*. 93: 1731–1739. 2006.

Saponaria officinalis Linnaeus (*Lychnis officinalis* (Linnaeus) Scopoli; *Lychnis saponaria* Jessen; *Saponaria officinalis* L. var. *glaberrima* Ser.; *Silene saponaria* Fries ex Willkomm & Lange)

China, Europe. Perennial weedy herb, erect, smooth thick stem, underground stems, long oval leaves, white pinkish phlox-like flowers in rounded terminal clusters, notched petals, fruit a capsule, presence of oil bodies in leaf mesophyll cells

See *Sp. Pl.* 1: 408. 1753, *Gen. Pl.* ed. 5, 191. 1754 and *Guihaia* 19(4): 349–354. 1999, *J. Biol. Chem.* 278(7): 4813–4820. 2003, *Cancer Biol. Ther.* 7(2): 237–242. 2008

(Roots and seeds poisonous, low toxicity, nausea, vomiting, diarrhea. Because of its saponin content the species can be poisonous upon ingestion; dangerous parts of the plant, all parts, especially seeds and roots. Used as a poultice for boils.)

in English: bladder soapwort, bouncing bet, bouncingbet, China cockle, cockle, cow basil, cow cockle, cow foot, cow herb, cow soapwort, fuller's herb, glond, soapwort, spring cockle

in China: fei zao cao

in South Africa: akkerkoeikruid

Saposhnikovia Schischk. Apiaceae

Saposhnikovia divaricata (Turcz.) Schischk. (*Cachrys seseloides* (Hoffm.) M. Bieb.; *Johrenia seseloides* (Hoffmann) Koso-Poljansky; *Laser divaricatum* (Turcz.) Thell.; *Laser divaricatum* Thell.; *Ledebouriella divaricata* (Turcz.) M. Hiroe; *Ledebouriella seseloides* H. Wolff; *Ledebouriella*

seseloides (Hoffmann) H. Wolff; *Rumia seseloides* Hoffmann; *Siler divaricatum* Benth. & Hook.f.; *Siler divaricatum* (Turczaninow) Benth. & J.D. Hooker; *Stenocoelium divaricatum* Turcz.; *Trinia dahurica* Turczaninow ex Besser; *Trinia seseloides* Ledeb.; *Trinia seseloides* (Hoffmann) Ledebour)

Russia, Mongolia, Korea, China, Japan. Perennial herb, erect, glabrous, many-branched, terminal compound umbels, no bracts, calyx with 5 teeth, fruit oblong laterally compressed, mericarp ribbed

See *Species Plantarum* 1: 246. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Oekon.-Techn. Fl. Wetterau* 1: 244, 384. 1799, *Genera Plantarum Umbelliferarum* xxvii, 92. 1814, *Genera Plantarum Umbelliferarum* xxxii, 171, 174. 1816, *Flora Altaica* 1: 297. 1829, *Collection de mémoires Ombell.* 54. 1829, *Flora* 17(Beibl 17): 14, 1834, *Bulletin de la Société Impériale des Naturalistes de Moscou* 17: 734. 1844, *Genera Plantarum* [Benth. & Hooker f.] 1(3): 909. 1867 and *Das Pflanzenreich* IV 228(Heft 43): 191–192. 1910, *Flora URSS* 17: 54, 359. 1951, *Umbellif. (Roots used for common cold, headache, rheumatic arthritis.)

in China: fang feng

Saprosma Blume Rubiaceae

Greek *sapros* 'putrid, rotten' and *osme* 'smell, odour, perfume', see *Bijdragen tot de flora van Nederlandsch Indië* 956. 1826 [Oct 1826–Nov 1827].

Saprosma consimile Kurz

Burma. Shrubs with white flowers in axils

See *Forest Flora of British Burma* 2: 29. 1877

(Leaves for flatulence and as a postpartum remedy.)

Saprosma foetens (Wight) K. Schum. (*Dysodidendron wightii* Gardner, nom. illeg.; *Dysodidendron wightii* (Wight) Gardner; *Lasianthus foetens* Wight; *Mephitidia foetens* (Wight) Walp.; *Saprosma foetens* K. Schum.; *Saprosma wightii* Bedd., nom. illeg.; *Saprosma wightii* (Wight) Bedd.; *Serissa wightii* (Wight) Bedd.; *Serissa wightii* Bedd., nom. illeg.)

India, Sri Lanka. Small tree

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 6: 517. 1846, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 7: 3. 1847, *Annales Botanices Systematicae* 2: 763. 1852, *Madras Journal of Literature and Science* III, 1: 50. 1864, *The Flora Sylvatica for Southern India* 134/11. 1871, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(4): 122. 1891

(Smoke from the burning wood inhaled to cure vomiting and diarrhea in children.)

in India: peenari, theetanari

Saprosma glomerulatum King & Gamble (*Saprosma glomeratum* Bedd.; *Saprosma glomerulatum* var. *angustifolia* King & Gamble)

Malaya.

See *The Flora Sylvatica for Southern India* 134/11. 1871 and *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(3): 98–99. 1904

(Leaves eaten as digestive.)

Malay name: kentut

Saprosma longicalyx Craib

Thailand.

See *Bull. Misc. Inform. Kew* 1932: 485. 1932

(A postpartum remedy.)

Saprosma scortechinii King & Gamble

Malaya. Shrub, all parts with fetid smell, whitish twigs, pale stipules with linear lobes, elliptic leaves, bisexual flowers, calyx with 4–5 linear lobes, fruit with white waxy bloom

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(3): 99. 1904

(Leaves febrifuge.)

Malay name: berkerak

Saprosma ternatum (Wall.) Hook.f. (*Paederia ternata* Wall.; *Saprosma ternatum* Benth. & Hook.f.; *Saprosma ternatum* (Wall. ex Roxb.) Hook.f.; *Saprosma ternatum* var. *glabrum* Pierre ex Pit.; *Serissa ternata* (Wall.) Kurz)

Malaysia, Bhutan. Shrub, angled branchlets, grey bark, leaves with fetid smell, white flowers in trichotomous inflorescence

See *Flora Indica: being a systematic account of the plants ...*, ed. Carey & Wall. 2: 520. 1824, *Report on the Vegetation of the Andaman Islands* 40. 1870, *Genera Plantarum* [Bentham & Hooker f.] 2(1): 131. 1873, *FBI* 3: 193. 1881 and *Fl. Indo-Chine* 3: 404. 1924

(Bark salted juice mixed with black pepper given in indigestion. Leaves eaten for stomachache and flatulence, also poulticed after childbirth; a leaves decoction with ginger given in malaria. Roots juice given in painful urination.)

in India: bhedeli, chaumangpi-nangthu, rekang-manthu, thabai, thabai-banghi, thabaibanghi, wanchu-paban-elau

Malay name: kesimbuk

Saraca L. Fabaceae (Caesalpiniaaceae, Detarieae)

From the Indian word *asoka*, Sanskrit *sara* 'coloured, spotted', see *Systema Naturae*, ed. 12 2: 469. 1767 and *Blumea* 15(2): 413–425. 1968, *Flora Malesiana* I, 12, 2: 409–784. 1996.

Saraca asoca (Roxb.) De Wilde (*Jonesia asoca* Roxb.; *Jonesia confusa* Hassk.; *Jonesia pinnata* Willd.; *Saraca asoca* (Roxb.) Willd.; *Saraca confusa* (Hassk.) Backer; *Saraca indica* L.; *Saraca indica* sensu Bedd.; *Saraca indica* sensu auctt. non L.)

India, Bhutan. Perennial non-climbing tree, alternate pinnate leaves, orange-yellow to pink flowers, flat turgid black pods

See *Mant. Pl.* 98. 1767, *Asiatic Researches* 4: 355. 1795, *Species Plantarum*. Editio quarta 2(1): 287. 1799, *Retzia*, sive, *Observationes botanicae, quas de plantis horti botanici Bogoriensis* 1: 194. 1855, *FBI* 2: 271. 1878 and *Voorl. School fl. Java* 103. 1908, *Blumea* 15: 393, in obs. 1968, *Flora of Ceylon* 7: 34–107. 1991, *Journal of Natural Medicines* 61(4): 480–482. 2007

(Used in Ayurveda and Sidha/Siddha. Bark bitter, antioxidant, astringent, styptic, anthelmintic, stomachic, febrifuge, demulcent, used for dyspepsia, colic, uterine affections, menorrhagia, biliousness, scorpion sting, ulcers, pimples, piles, dysentery; bark infusion used for washing foul ulcers; fresh bark juice given as blood purifier; fresh bark decoction given in urinary troubles, diarrhea, piles, menstrual disorders, menorrhagia, bodyache. Leaves depurative, blood purifier, used for stomachache. Flowers pounded given as uterine tonic, menstrual disorders and itching in vagina; dried flowers in diabetes, biliousness, syphilis and bleeding dysentery; paste of flowers given in diarrhea and dysentery; contact therapy, flower garland worn to cure heart palpitation. Seeds pounded and given with hot water in urinary complaints. Fresh and dried cotyledons used as masticatory. Ritual, ceremonial, a sacred tree planted near the temples; believed to relieve the sorrow of people.)

in English: asoka tree, Indian asoka, Indian sorrowless tree, sorrowless tree

in China: si fang mu

in India: acokam, anganapriya, ashok, ashoka, ashoke, ashopalava, asjogam, asogam, asogha, asok, asoka, asokada, asokah (a, not, shok, sorrow, pain), asokam, asokamu, asupala, diya-ratambala, diya-ratmal, gandapushpa, gatasokah, hemapuspa, kankeli, kankelli, kengalimara, kenkalimara, mir-krem-araung, mual-hawih, tamrapallava, thawgabo, usangid-ba, vanjalamu, vichitrah

in Nepal: asau, asok

Saraca declinata Miq. (*Jonesia declinata* Jack; *Jonesia palembanica* Miq.; *Saraca biglandulosa* Pierre; *Saraca cauliflora* Baker; *Saraca crassifolia* Ridl.; *Saraca declinata* (Jack) Miq.; *Saraca elegans* Ridl.; *Saraca indica* sensu Miq.; *Saraca lanceolata* Merr.; *Saraca longistyla* Ridl.; *Saraca lonistyla* Ridl.; *Saraca macroptera* Miq.; *Saraca macroptera* var. *parvifolia* Prain; *Saraca macroptera* var. *paucijuga* Craib; *Saraca macroptera* var. *siamensis* Craib; *Saraca obtusifolia* Miq.; *Saraca palembanica* Baker; *Saraca palemabanica* (Miq.) Baker; *Saraca thorelii* Gagnep.; *Saraca trianae* Baker; *Saraca zollingeriana* Miq.)

Vietnam, Malesia. Perennial non-climbing tree, small tree, corolla wanting, calyx orange to red, terminal or axillary corymb

See *Asiatic Researches* 4: 355. 1795, *Malay. Misc.* 2(7): 74. 1822, *Flora van Nederlandsch Indië* 1(1): 84–85, 1080. 1855, *The Flora of British India* [J.D. Hooker] 2(5): 272. 1878, *Flore Forestière de la Cochinchine* 4: 387. 1899 and *Notulae Systematicae*. *Herbier du Museum de Paris* 2: 236. 1912, *University of California Publications in Botany* 15: 100. 1929, *Bulletin of Miscellaneous Information Kew* 1933(10): 491–492. 1933, *Bulletin of Miscellaneous Information Kew* 1938: 278–279. 1938, *Taxon* 30: 508–509. 1981

(Root decoction detoxifying agent for food poisoning, tonic. Bark anti-infective, stomachic, astringent, alterative, anthelmintic, female tonic, demulcent and emollient, used in treatment of diarrhea, dyspepsia, colic, stomachache, burning sensation, gynecological and mental disorders, schizophrenia, blood disorders, biliousness, tumours, piles, ulcers, menorrhagia. Magic, ritual, reputed to protect against ill-fortune, astral attacks, spirits.)

in English: ashoka tree, red saraca, sorrowless tree, Sumatra asoka

in India: sita ashok

in Indonesia: kayu buah ala

Malayan names: gapis kunyit, talan kunyit

in Sarawak: babai

in Thailand: sok khao

Saraca dives Pierre (*Saraca chinensis* Merr. & Chun; *Saraca indica* auct. non L.)

China, Laos, Vietnam. Perennial non-climbing shrub, flowers brightly orange

See *Flore Forestière de la Cochinchine* 5: pl. 386B. 1899

(Bark for relieving rheumatism and menorrhagia.)

in China: zhong guo wu you hua

Saraca indica L. (*Jonesia asoca* sensu auct.; *Jonesia confusa* Hassk.; *Jonesia minor* Zoll. & Moritz; *Jonesia pinnata* Willd.; *Saraca arborescens* Burm. f.; *Saraca asoca* sensu auct.; *Saraca bijuga* Prain; *Saraca bijuga* Prain ex King; *Saraca confusa* (Hassk.) (Used in Ayurveda, Unani and Sidha. Ash of plant for external application in rheumatism, arthritis. Blossoms poultice a remedy for dysentery. Bark astringent, juice used against uterine disorders, in gynecological disorders treatment, excessive uterine bleeding, dysmenorrhea, depression in women, menorrhagia, piles; leaf juice of *Tagetes patula* made into a paste with bark powder of *Saraca indica* and taken in menstrual disorders. Bark useful in treating scorpion sting. Dried fruits used in cases of spermatorrhea, diarrhea, phosphaturia, genitourinary diseases, dysuria, gonorrhoea, chronic cystitis, calculus affections, urinary disorders, incontinence of urine, gout and impotence, in uterine disorders after parturition. Roots mixed with roots of *Morinda tomentosa* and boiled and given in leucorrhoea. Sacred tree, all the Buddhists worship this tree, it is said that Lord Buddha was born under this tree; the Buddhists and Hindus plant the tree round their temples; ingredient of Patra pooja in different religious pooja ceremonies.)

in English: ashok, asoka tree, jonesia asoka

in China: wu yu hua

in India: anganapriya, apashoka, ashok, ashoka, asogam, asoka, asokah, chakraguchha, chitra, diya-ratambala, diya-ratmal, dohali, doshahari, gandapushpa, gandhapushpa, gatasoka, hemapushpa, kankali, kankelih, kankelli, kantacharandohada, kantangharidohadah, karnapura, karnapuraka, kelika, kengalimara, kenkalimara, krimikaraka, madhupushpa, madhupuspah, nata, palladru, pindapushpa, pindipushpa, prapallava, raktapallava, raktapallavah, rama, rogitaru, shhaya, shokaharta, shokanasha, sita ashok, sita asok, smaradhivasa, smaradhivasah, sokanasanah, strin-irikshanadohada, subhaga, tamrapallava, thawgabo, vajula, vamanghrighataka, vamankayatana, vanjalamu, vanjuladrumah, vanjuldruma, vichitra, vichitrah, vishoka, vitashoka

in Nepal: ashoka

in Tibet: a so ka, my nan med, mya-nan-med

Saraca thaipingensis Prain (*Jonesia declinata* sensu Binn.; *Saraca biglandulosa* Pierre; *Saraca cauliflora* sensu Prain; *Saraca declinata* sensu auct.; *Saraca thaipingensis* Cantley ex Prain)

Malaysia, Papua New Guinea. Perennial non-climbing tree, yellow-reddish fragrant flowers

See *Malay. Misc.* 2(7): 74. 1822, *Flora van Nederlandsch Indië* 1(1): 84, 1080. 1855, *The Flora of British India* 2(5): 272. 1878, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 211. 1897, *Flore Forestière de la Cochinchine* 4: 387. 1899 and *Biotropica* 11(3): 214–218. 1979, *Taxon* 30: 508–509. 1981, *Reviews of Infectious Diseases* 9(5): 1026–1037. 1987

(Bark extract antioxidant, astringent. Flowers for schistosomiasis, blood dysentery.)

in English: yellow saraca

in China: wu you hua

in Malaysia: gapis

Sarcandra Gardner Chloranthaceae

From the Greek *sarx*, *sarkos* ‘flesh’ and *aner*, *andros* ‘male’, referring to the stamens, see *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 6: 348. 1845.

Sarcandra glabra (Thunberg) Nakai (*Ardisia glabra* (Thunberg) DC.; *Bladhia glabra* Thunberg; *Chloranthus glaber* (Thunberg) Makino)

China.

See *Trans. Linn. Soc. London* 2: 331. 1794

(Astringent, for skin diseases.)

in China: cao shan hu, jiu jie cha

Sarcandra glabra (Thunberg) Nakai subsp. *brachystachys* (Blume) Verdcourt (*Ascarina serrata* Blume; *Chloranthus brachystachys* Blume; *Chloranthus hainanensis* Pei; *Sarcandra hainanensis* (Pei) Swamy & I.W. Bailey)

China, Thailand, Myanmar. Shrub, green stems, pale green inflorescences, yellowish green flowers, shiny orange or yellowish red globose fruits, creamy seeds

See *Flora Javae, Chloranthaceae*: 13: t. 2. 1829 and *Kew Bulletin* 40(1): 216. 1985, *Fl. Malesiana* 1, 10: 136. 1986

(To ward off bedbugs. Stimulant, febrifuge, antispasmodic, in fever, venereal diseases. Plant infusion for headache.)

in China: hai nan cao shan hu

in Philippines: apot, gamuk, gapas, tolal, umu-um

Sarcandra glabra (Thunberg) Nakai subsp. *glabra* (*Chloranthus dentialatus* Cordemoy; *Chloranthus esquirolii* H. Léveillé)

China.

See *Kew Bull.* 39: 66. 1984

(Veterinary medicine, to repel the parasites of the cattle.)

in China: cao shan hu

Sarcanthus Lindley Orchidaceae

Greek *sarx*, *sarkos* ‘flesh’ and *anthos* ‘flower’, referring to the fleshy flowers; see John Lindley, *The Botanical Register*. subt. 817. (Aug.) 1824, *Folia Orchidacea. Acampe* 1. 1853 and Herman Montague Rucker Rupp (1872–1956), in *The Victorian Naturalist*. 57: 218. (Apr.) 1941, Alick William Dockrill, *Australasian Sarcanthinae*. 1967 and *Australian Indigenous Orchids*. Sydney 1969.

Sarcanthus insectifer Rchb. f. (*Pelatantheria insectifera* (Rchb. f.) Ridl.) (*Pelatantheria* Ridley, from the Greek *pelates* ‘neighbouring, a neighbour, approaching’ and *anthera* ‘anther’, referring to the column and the anther cap.)

India, Himalaya. See also *Pelatantheria*

See *Botanische Zeitung*. Berlin 15(10): 159. 1857, *Journal of the Linnean Society, Botany* 32: 371, 373. 1896

(Veterinary medicine, paste made by crushing the plant banded on fractured bone of cattle.)

in India: banadedi

Sarcobatus Nees Chenopodiaceae (Sarcobataceae)

Greek *sarx*, *sarkos* ‘flesh’ and *batia*, *batos* ‘a bush, thicket, a kind of cup’, referring to the bark, see Wied-Neuwied, Maximilian Alexander Philipp zu, *Reise in das Innere von Nord-America in den Jahren 1832 bis 1834* Koblenz. 1839–1841.

Sarcobatus vermiculatus (Hooker) Torrey (*Batis vermiculata* Hooker; *Fremontia vermicularis* (Hook.) Torr.; *Fremontia vermiculata* (Hooker) Torrey; *Sarcobatus maximilianii* Nees; *Sarcobatus vermiculatus* Torr.; *Sarcobatus vermiculatus* (Hook.) Torr. var. *baileyi* (Coville) Jeps.; *Sarcobatus vermiculatus* var. *baileyi* Jeps.)

North America. Perennial shrub, forage, fodder

See *The Civil and Natural History of Jamaica* in Three Parts 357. 1756, *Flora Boreali-Americana* (Hooker) 2(9): 128. 1838, Frémont, John Charles (1813–1890), *Report of the exploring expedition to the Rocky Mountains in the year 1842: and to Oregon and north California in the years 1843–44* 91, 95, 317, t. 3. Washington, 1845, Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance* from Fort Leavenworth in Missouri to San Diego in California: including part of the Arkansas, Del Norte, and Gila Rivers. Washington, 1848 and *Fl. Calif.* [Jepson] 446. 1914, *Weed Sci.* 29: 448–454. 1981, *Phytologia* 54: 309–324. 1983, Scimeca, J.M., Oehme, F.W. “Postmortem guide to common poisonous plants of livestock.” *Vet. Hum. Toxicol.*, 27: 189–199. 1985, *Great Basin Naturalist* 59(4): 301–314. 1999

(Under certain conditions, poisoning of animals, especially sheep; oxalates are present in all parts of the plant but are concentrated in the leaves, the amount increasing

with maturity. Death may occur in a short time when sheep eat large amounts of *Sarcobatus vermiculatus*, and little or nothing else. Plant astringent, antihemorrhagic, antidiarrheal, blood purifier. Leaves infusion emetic; crushed leaves applied to insect bites. Ceremonial. Veterinary medicine, for sprained legs.)

in English: black greasewood, greasewood, saltbush, seepwood

Sarcocaulon (DC.) Sweet Geraniaceae

Greek *sarx*, *sarkos* and *kaulos* 'a stem, a branch or stalk', fleshy shrublets, see *Hortus Britannicus* [Sweet] 73. 1826 and Knuth, Reinhard. *Geraniaceae*. Leipzig, 1912 [*Geraniaceae*. *Das Pflanzenreich* 4.129 (Heft 53): 1–640.], *Bothalia* 12(4): 581–613. 1979, Webb, William J., *The Pelargonium family: the species of Pelargonium, Monsonia, and Sarcocaulon*. 1984, Clifton, Richard Timothy Fred (1943–), *The Geraniaceae group: Geranium family species check list/ Part 1 Erodium, Part 2 Geranium, Part 3 Monsonia, Part 4 Pelargonium, Part 5 Sarcocaulon, Part 6 superseded genera, Part 7 Hypseocharis*. Dover: Geraniaceae Group, 1990–1994, Craib, Charles, *Hystrix: The Sarcocaulons of Southern Africa*. South African Pelargonium and Geranium Society, 1995, *South African Journal of Botany* 62: 343–347. 1996, *South African Journal of Botany* 63: 239–240. 1997. This genus is closely related to *Monsonia*.

Sarcocaulon burmannii Sweet

Tropical Africa.

See *Hortus Britannicus* [Sweet] 73. 1827

(Stem bark and leaves astringent, abortifacient, for diarrhea, dysentery.)

Sarcocaulon salmoniflorum Moffett (*Monsonia lheritieri* DC.; *Monsonia obcordata* E. Mey.; *Monsonia salmoniflora* (Moffett) F. Albers; *Monsonia spinosa* L'Hér.; *Sarcocaulon lheritieri* DC.; *Sarcocaulon lheritieri* Sweet; *Sarcocaulon lheritieri* var. *brevimucronatum* Schinz; *Sarcocaulon lheritieri* Sweet; *Sarcocaulon patersonii* Eckl. & Zeyh.; *Sarcocaulon patersonii* (DC.) G. Don subsp. *badium* Rehm; *Sarcocaulon patersonii* (DC.) G. Don subsp. *curvatum* Rehm; *Sarcocaulon rigidum* Schinz)

South Africa, Namibia. Shrub or shrublet, succulent, spiny, erect to spreading, densely branched, thin spines straight or curved, flowers orange to salmon-pink browsed by small stock and game

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 57. [Dec 1834–Mar 1835] and *Bothalia* 12(4): 590. 1979, *S. African J. Bot.* 62(6): 346. 1996

(An infusion used to treat colds and stomach ailments.)

in English: bushman candle, candle bush

in Southern Africa: boesmankers, heldoring, kersbossie, maagdoring; qorab (Southern Namibia)

Sarcocephalus Afzel. ex Sabine Rubiaceae

Greek *sarx*, *sarkos* and *kephale* 'head', referring to the edible fruits; see Joseph Sabine (1770–1837), in *Transactions of the Horticultural Society*. 5: 442. 1824.

Sarcocephalus latifolius (Sm.) E.A. Bruce (*Cephalina esculenta* (Afzel. ex Sabine) Schumach. & Thonn.; *Nauclea esculenta* (Afzel. ex Sabine) Merr.; *Nauclea latifolia* Sm.; *Nauclea sambucina* T. Winterb., nom. nud.; *Sarcocephalus esculentus* Afzel. ex Sabine; *Sarcocephalus exculentus* Afzel. ex Sabine; *Sarcocephalus esculentus* var. *amaris-sima* A. Chev.; *Sarcocephalus esculentus* var. *velutina* A. Chev.; *Sarcocephalus russeggeri* Kotschy ex Schweinf.; *Sarcocephalus sambucinus* K. Schum.)

Trop. Africa, Kenya. Shrub or tree, sarmentose, arching, straggling, scandent, spreading, stem glabrous, wood extremely soft, thick and fibrous bark grey deeply fissured longitudinally, leaves thick waxy, petioles red, fleshy flowers, inflorescences fragrant solitary with peduncle very short, corolla white or yellowish, fruits red-brown fleshy, small and brownish seeds surrounded by edible sweetly acrid pulp, savanna

See *Species Plantarum*, Editio Secunda 1: 243. 1762, *Account Sierra Leone* 2: 45. 1803, *The Cyclopaedia*; or, universal dictionary of arts, ... 24: 5. 1813, *Transactions of the Horticultural Society of London* 5: 442, t. 18. 1824, *Reliquiae Kotschyanae* 49, t. 33. 1868 and *Journal of the Washington Academy of Sciences* 5: 535. 1915, *Rev. Bot. Appl. Agric. Trop.* 18: 179, 181. 1938, *Kew Bulletin* 1: 31. 1947, *Journal of Ethnopharmacology* 8: 215–223, 257–263, 265–277. 1983, *Plant Systematics and Evolution* 149: 89–118. 1985, *Flora of Tropical East Africa* 415–747. 1988, *Journal of Ethnopharmacology* 25: 115–118. 1989, *Journal of Ethnopharmacology* 88: 279–286. 2003, *Journal of Ethnopharmacology* 97: 327–336, 421–427. 2005, *Journal of Ethnopharmacology* 99: 273–279. 2005, *African Journal of Ecology* 45(Suppl.1): 76–83. 2007

(Roots, stem and fruits febrifuge, antiinflammation, tonic, for hemorrhoids. Leaves, fruits, roots and barks for diabetes. Roots and stem bark febrifuge, antiinflammation, for malaria, fevers. Fruits eaten raw antimalarial. Roots infusion for diarrhea; leaves and roots laxative. Pain to the anus, smear the anus with the powder of the whole plant mixed with oil. The harvested roots plus other plant materials are used to prepare ointment to treat rheumatoid arthritis. Bark for abdominal pain.)

in English: African peach, country fig, Guinea peach

in Benin: dofou, doudourobo, ganyèrou, gounoubi, igbessi, jimoko, kédacharou, ko, kohounkpohoun, n'doudourimbo, tokoui yagba

in Burkina Faso: bara, bari, bati, bou-nahiimbou, bou-nanyiimbou, doudou, gouinga

in Central African Republic: doumba, loumba

in Congo: byeenga, djudju, idzudzu, idzuzuku, iluluku, kienga, mabouobouo, munbuoti, mutumi, mutumo, mutunfi, ntumbi, omboubouo, tseenga, tsienga

in Ghana: awintin, ekusiawa, gongan, gounge, kisia, nyimo, oyefa, telede

in Togo: bakudé, gong, gunga, gwong, kiditchalo, kitchatchalo, koko, kudjipompoè, kussinyon, ngohung, nimon, nyimo

in Uganda: ibele, mutamatama

in Yoruba: agbesi abisi, agbesi ogun, egbesi

Sarcocephalus pobeguinii Hua ex Pobég. (*Nauclea pobeguinii* (Hua ex Pobég.) Merr.; *Nauclea pobeguinii* (Pobég. ex Pellegr.) Merr. ex E.M.A. Petit; *Sarcocephalus pobeguinii* Pobég. ex Pellegr.) (after the French botanist Charles Henri Oliver Pobéguin, 1856–1951, colonial administrator in French Africa, plant collector, author of *Essai sur la flore de la Guinée française produits forestiers, agricoles et industriels*. Paris 1906 and of *Les plantes médicinales de la Guinée*. Paris 1912; see J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 93. 1965; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 65. 1971

Tropical Africa, Senegal to Zambia. Tree or shrub, trunk straight without buttresses, wood yellow-whitish, fissured bark white with dark lines, leaves large dark green on upper surface, petioles twisted greenish, fruit green with brownish prickles, on river bank, in swamp forest, along running stream

See *Trans. Hort. Soc.* 5: 442. 1824 and *Essai Fl. Guinée Franç.* 313. 1906, *J. Wash. Acad. Sci.* 5: 536. 1915, *Bulletin de la Société Botanique de France* 79: 222. 1932, *Bulletin du Jardin Botanique de l'État* 28: 8. 1958, *Bull. Jard. Bot. Brux.* 32: 191. 1962

(Roots, leaves and stem for fevers, urinary tract infections, skin diseases, scabies and fungal infections. Leaves and bark for diabetes. Stem bark for stomach ache.)

in Cameroon: andinding, monse, mosé

in Gabon: ntoma biliba

in Guinea: dunduké tyangol, khure dundukhè, köbadii, ködundu

in Ivory Coast: kobadi, onhon, patouguiné, sibo

in Nigeria: ira, opepe, opepe ira (Yoruba), use-ogo (Igede), wujango (Koma)

in West Africa: assoubo, badi, doundake, doundouké, dountiangol, kobati, kogbati, patouguiné, sibo, soumbala

in Zaire: ekingi

Sarcochlamys Gaudich. Urticaceae

From the Greek *sarx*, *sarkos* 'flesh' and *chlamys*, *chlamy-dos* 'cloak', referring to the female flowers, see Gaudichaud, Charles (1789–1854), *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... Botanique*, pl. 89. Paris, 1844–1846, 1851, 1856 and *Acta Phytotaxonomica Sinica* 23(6): 451–454, pl. 1. 1985.

Sarcochlamys pulcherrima Gaudich. (*Sphaerotylos medogensis* C.J. Chen; *Urtica pulcherrima* Roxb.)

India, China. Shrub

See *Hort. Bengal.* 67. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 588. 1832 and *Acta Phytotaxonomica Sinica* 23(6): 453–454, pl. 1. 1985

(Astringent, blood purifier.)

in China: rou bei ma

in India: mechaki

Sarcococca Lindley Buxaceae

From the Greek *sarx*, *sarkos* and *kokkos* 'a berry', referring to the fleshy kernel, see *Botanical Register*; consisting of coloured ... 12: t. 1012. 1826.

Sarcococca hookeriana Baill.

China. Shrub, fruits green

See *Monog. Buxac.* 53. 1859

(Crushed roots decoction used to massage to treat gout.)

in China: yu mai ye shan hua

in Nepal: telparo

Sarcococca pruniformis Lindl.

India, Himalaya.

See *Botanical Register*; consisting of coloured ... 12: t. 1012. 1826 and *J. Cytol. Genet.* 23: 219–228. 1988

(Poulticed for skin diseases.)

in India: lobha

Sarcococca saligna (D. Don) Müll.Arg. (*Buxus saligna* D. Don; *Sarcococca pruniformis* Lindl. var. *angustifolia* Lindl.; *Sarcococca salicifolia* Baill.; *Sarcococca saligna* Müll.Arg.)

India.

See *Prodromus Florae Nepalensis* 63. 1825, *Botanical Register*; consisting of coloured ... 12: t. 1012. 1826, *Monogr.*

Bux. 47, 49. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 11. 1869

(Powdered roots together with sugar given in spermatorrhea. Leaves decoction in the treatment of fever and rheumatism.)

in China: liu ye ye shan hua

in India: tilhari, tilphari

Sarcococca wallichii Stapf (*Sarcococca coriacea* Sweet; *Sarcococca coriacea* Müll.Arg.)

China, Nepal.

See *Hort. Brit.* [Sweet] 491. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 11. 1869 and *Bulletin of Miscellaneous Information Kew* 1916: 34. 1977

(Root juice to treat fever.)

in China: yun nan ye shan hua

in Nepal: patape

Sarcobus R. Br. Asclepiadaceae (Apocynaceae)

From the Greek *sarx*, *sarkos* 'flesh' and *lobos* 'a pod'; see R. Brown, "On the Asclepiadeae." *Memoirs of the Wernerian Natural History Society*. 1: 34. Edinburgh 1811.

Sarcobus globosus Wall.

India. Small woody climber, shrubby, slender, latex, flowers in small clusters, on the fringes of mangrove swamps, on river banks

See *Asiatic Researches* 12: 568, t. 4. 1816

(Toxic to all species of animals, latex and seeds contain a resinous toxic principle, used to poison dogs, cattle and elephants. Leaf paste applied on cuts and wounds.)

in India: fonghanch

Malay names: akar batu pelir kambing, banuk, kambing-kambing, pelir-kambing, pitis buah (the seeds)

Sarcobus narcoticus Span. ex Miq.

Malay Peninsula. Climbing

See *Flora van Nederlandsch Indië* 2: 502. 1857

(Poisonous.)

Sarcobus spanoghei Miq.

Java. Climbing

See *Flora van Nederlandsch Indië* 2: 502. 1857

(Poisonous.)

Malayan name: wali kambing

Sarcobus virulentus Griffith

Malay Peninsula. Climbing

See *Notulae ad Plantas Asiaticas* 4: 54. 1854

(Poisonous.)

Sarcophrynium K. Schumann Marantaceae

From the Greek *sarx*, *sarkos* 'flesh' and *phrynos* 'a frog', see *Pflanzenr.* IV. 48 (Heft 11): 35. 1902.

Sarcophrynium brachystachyum (Benth.) K. Schum. (*Donax brachystachya* (Benth.) Roberty; *Maranta brachystachys* Benth.; *Phrynium brachystachyum* (Benth.) Körn.; *Phrynium brachystachyum* Körn.; *Phrynium molle* A. Chev.; *Phrynium villosum* Lodd.; *Phrynium villosum* Benth.; *Phrynium villosum* K. Schum., nom. illeg.; *Phrynium villosum* Lodd. ex Sweet; *Phyllodes brachystachya* K. Schum.; *Phyllodes brachystachys* (Benth.) Kuntze; *Phyllodes mollis* (Benth.) Sarcostemma australe R. Br.

Australia. Leafless plant, vine, climber, small creamy-white flowers

See *Prodromus Florae Novae Hollandiae* 463. 1810

(White caustic sap. The milky juice used to treat corns and warts, eye troubles, sandy blight, a healing application to wounds; sap used to induce lactation.)

in English: caustic bush, caustic plant, caustic vine, sarcostemma, Tableland caustic vine

in Australia: ngamul-ngamul

Sarcostemma cynanchoides Decne. (*Funastrum cynanchoides* (Decne.) Schltr.; *Funastrum cynanchoides* var. *subtruncatum* (B.L. Rob. & Fernald) J.F. Macbr.; *Philibertia cynanchoides* (Decne.) Vail; *Philibertia cynanchoides* (Decne.) A. Gray; *Philibertia cynanchoides* var. *subtruncata* B.L. Rob. & Fernald)

North America, Mexico.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 540. 1844, *Proceedings of the American Academy of Arts and Sciences* 12: 64. 1877, *Bulletin of the Torrey Botanical Club* 24(6): 307. 1897 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363/367): 284. 1914, *Ann. Missouri Bot. Gard.* 37(4): 477–560. 1950

(To cure a severe headache the head is washed in a decoction of the branches and leaves. For the bite of a black widow spider a tea made by brewing stems and leaves is taken.)

Sarcostemma intermedium Decne.

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 538. 1844

(Used in Sidha. Plant milk emetic, in case of poisoning. Tender stems and pepper made into a paste and given to stop bleeding.)

in India: cinkavirutcam, inavakkirakkoti, inavakkiram 1, intuvalli, ipekanatamuli, iyattainacamakki, jivanti, jivati, kodikalli, koluntutaimatu, konada balli, konadaballi, konana thale, kurumuniyalaki, makavirutcam, nilaki, nilakikkoti, pullathige, soma, somalata, somalatha, tanuvanamuli, thige jemmudu, tigejimmudu, urkkalli, venturutacai

Sarcostemma jacquini Decne.

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 542. 1844

(Latex reported to be strongly laxative.)

Sarcostemma secamone (L.) Bennett (*Periploca secamone* L.)

India.

See *Mantissa Plantarum* 2: 216. 1771 and *Indian Forester* 95: 692. 1969

(Veterinary medicine, leaves given as galactagogue.)

in Egypt: libbein

in India: chirupaala, dudipaala, dugdhike, kalappalai, maeke kombu balli, nelapaala, paalakikura, pala teega, palakura, pinnapaala, sepa, usippalai

(Fresh or dried plant poisonous, sufficient to kill a sheep. Urticaria on contact with the skin. Apply milky sap to keep flies from wounds. Powdered root used as an emetic in cases of poisoning. Roots for the treatment of gonorrhoea. Latex, cuttings or young twigs used as a fish poison. Veterinary medicine, crushed roots antiinflammatory.)

in English: caustic bush, caustic creeper, caustic vine, leafless milkweed

in India: bhurvel

in East Africa: adwatalela, bakoni, kibaranga, kitupa, loide, nkoni, ojuk, ol dewo

in Kenya: cheporewo, egis, eligoi, endepeu, loiyei, mosolion, ngolinyit, ngololiet, ohao, ol'loilei

in Rodrigues Isl.: liane calé

in Southern Africa: melktou, melkbos, spantoumelkbos, spantou, wolfsmelk; ingotsha (Zulu); ma belabela (Ndebele); umbelebele, umBelenele (Xhosa); ntlalamela (Sotho); morarwane (Tswana); mutungu (Venda); nneta (Tsonga); nyokudomba (Shona)

in Swahili: utupa-wa-pwani

in Tanzania: ikanju, mupempeya

Sarcotoxicum X. Cornejo & H.H. Iltis Capparaceae

Greek *sarx*, *sarkos* 'flesh', Latin *toxicum* for a poison. Greek *toxikos* 'for the bow, belonging to the bow, to archery', *toxikon pharmakon* 'poison for smearing arrows with', Aristoteles, *Mirabilia*; *toxikon*, orig. a poison in which the arrows were dipped, hence a poison; see *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 17. 1879 and *Harvard Papers in Botany* 13(1): 103–116. 2008.

Sarcotoxicum salicifolium (Griseb.) Cornejo & Iltis (*Capparis salicifolia* Griseb.; *Colicodendron salicifolium* (Griseb.) Hutch.)

South America. Shrub, unripe boiled fruit used as food

See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 17. 1879 and *The Genera of Flowering Plants* 2: 309. 1967, *Harvard Pap. Bot.* 13(1): 107–109, f. 1–2. 2008

(Fruit boiled in water taken to induce a drunken sensation; root decoction used externally as an antisyphilitic.)

Sargentodoxa Rehder & E.H. Wilson Lardizabalaceae (Sargentodoxaceae)

For the American botanist Charles Sprague Sargent, 1841–1927; see *Plantae Wilsonianae* (Sargent) 1(3): 350–352. 1913, *The Families of Flowering Plants. I. Dicotyledons* 1: 100. 1926, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 673–674. 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 211. 1965, T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 348. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 359. 1973, Stafleu and Cowan, *Taxonomic Literature*. 5: 51–56. 1985.

Sargentodoxa cuneata (Oliver) Rehder & E.H. Wilson (*Holboellia cuneata* Oliver; *Sargentodoxa cuneata* Rehder & E.H. Wilson; *Sargentodoxa simplicifolia* S.Z. Qu & C.L. Min)

China.

See *Hooker's Icon. Pl.* 19(1): t. 1811. 1889 and *Plantae Wilsonianae* 1(3): 351–352. 1913, *Bulletin of Botanical Research*, Harbin 6(2): 87–88. 1986, *Acta Bot. Boreal.-Occid. Sin.* 14(5): 99–103. 1994, Chen Te-chao. *Lardizabalaceae*. In: Ying Tsun-shen, ed., *Fl. Reipubl. Popularis Sin.* 29: 1–50. 2001

(Stems and roots insecticidal, tonic, anthelmintic, antiviral, antibacterial, antirheumatic, carminative, diuretic, blood purifier and stimulant, used for hookworm disease, sores, wounds, boils, cuts, roundworm, amenorrhea.)

in China: da xue teng

Sarracenia L. Sarraceniaceae

Named by Tournefort for the French physician Michel Sarrazin (Sarracenus), 1659–1734 (or 1735/1736), naturalist, in Québec, plant collector, who sent him the plant; see Arthur Vallée, *Michel Sarrazin, 1659–1735*. (Un biologiste canadien) Sa vie, ses travaux et son temps. Québec. 1927. According to Pritzel the genus was dedicated to the French physician Jean Antoine Sarrasin (Lat. Janus Antonius Saracenus or Sarracenus), 1547–1598, author of *de Peste, commentarius*. Lugduni 1572, editor of G. Fabricii Hildani ... *selectae observationes chirurgicae quinque et viginti*, etc. [Author Fabricius von Hilden, 1560–1634; translated from the French by J. Rheterius.] 1598; see *Species Plantarum*

1: 510. 1753, *Analyse des Familles de Plantes* 53. 1829 and Richard J. Durling, comp., *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 4067–4068. 1967, *Novon* 2(3): 236. 1992, *Preslia* 64(1): 7(–8). 1992, *Phytologia* 79(2): 71. 1995[1996].

Sarracenia purpurea L. (*Sarracenia purpurea* L. subsp. *purpurea* var. *purpurea*; *Sarracenia purpurea* L. subsp. *venosa* (Raf.) Wherry; *Sarracenia purpurea* L. var. *venosa* (Raf.) Fernald)

North America. Perennial insectivorous plant

See *Nat. Hist. Carolina* 2: t. 70. 1738, *Species Plantarum* 1: 510. 1753 and *Bartonia* 15: 3. 1933, *Rhodora* 38: 233. 1936, *Taxon* 31: 344–360, 766–768. 1982, *Taxon* 46: 781. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999, *Taxon* 49(2): 262. 2000

(Homeopathy. Root and leaves diuretic, abortifacient, laxative, postpartum remedy, stomachic and tonic, for liver and kidney complaints, menstrual disorders, smallpox, whooping cough. Magico-religious beliefs, witchcraft medicine.)

in English: huntsman's cup, Indian cup-plant, pitcher-plant, purple pitcherplant, side-saddle-flower, southern pitcher-plant, sweet pitcher-plant

in Italian: sarracenia porporina

Sarracenia purpurea L. subsp. *gibbosa* (Raf.) Wherry (*Sarazina gibbosa* Raf.; *Sarracenia heterophylla* Eaton; *Sarracenia purpurea* L. subsp. *heterophylla* (Eaton) Torr.; *Sarracenia purpurea* L. var. *ripicola* B. Boivin; *Sarracenia purpurea* L. var. *stolonifera* Macfarlane & D.W. Steckbeck; *Sarracenia purpurea* L. var. *terrae-novae* Bach. Pyl.; *Sarracenia purpurea* L. var. *terrae-novae* Bach. Pyl.)

North America. Perennial herb

See *Mém. Soc. Linn. Paris* 6: 389 (–392, 394–395; t. 13). 1827, *Autikon Botanikon* 1(Cent. III): 33. 1840 and *Bartonia* 15: 5. 1933, *Bull. Misc. Inform. Kew* 1933(4): 165 (161–169; tt. 10–11). 1933, *Canad. Field-Naturalist* 65: 21. 1951

(Root decoction for liver and kidney complaints, fevers, tuberculosis, sore throat, pneumonia, venereal diseases, menstrual disorders. Love charm.)

in English: purple pitcherplant

Sarracenia purpurea L. subsp. *purpurea*

North America. Perennial insectivorous plant, herb or subshrub

See *Nat. Hist. Carolina* 2: t. 70. 1738, *Species Plantarum* 1: 510. 1753 and *Bartonia* 15: 3. 1933, *Rhodora* 38: 233. 1936, *Taxon* 31: 344–360, 766–768. 1982, *Taxon* 46: 781. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999, *Taxon* 49(2): 262. 2000

(Homeopathy. Root and leaves diuretic, abortifacient, laxative, postpartum remedy, stomachic and tonic, for liver and

kidney complaints, menstrual disorders, smallpox, whooping cough. Magico-religious beliefs, witchcraft medicine.)

in English: huntsman's cup, Indian cup-plant, pitcher-plant, purple pitcherplant, side-saddle-flower, southern pitcher-plant, sweet pitcher-plant

Sarracenia purpurea* L. var. *purpurea

North America. Perennial insectivorous plant, herb or subshrub

See *Nat. Hist. Carolina* 2: t. 70. 1738, *Species Plantarum* 1: 510. 1753 and *Bartonia* 15: 3. 1933, *Rhodora* 38: 233. 1936, *Taxon* 31: 344–360, 766–768. 1982, *Taxon* 46: 781. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999, *Taxon* 49(2): 262. 2000

(Homeopathy. Root and leaves diuretic, abortifacient, laxative, postpartum remedy, stomachic and tonic, for liver and kidney complaints, menstrual disorders, smallpox, whooping cough. Magico-religious beliefs, witchcraft medicine.)

in English: huntsman's cup, Indian cup-plant, pitcher-plant, purple pitcherplant, side-saddle-flower, southern pitcher-plant, sweet pitcher-plant

Saruma Oliver Aristolochiaceae

Saruma is an anagram of the word *Asarum*, see *Hooker's Icones Plantarum* 19(4): t. 1895. 1889 and *Population Ecology*, 52(1): 223–231. 2010.

***Saruma henryi* Oliver**

China. Endangered herb, rhizomatous, perennial, heart-shaped leaves, rhizomes robust, stems gray-brown pubescent, solitary flowers arise along middle of petiole, cordate-reniform petals yellow or yellow-green, fruit follicular, seeds densely transversely rugose, dense forests, valleys, woodland groundcover, stream banks

See *Hooker's Icones Plantarum* 19(4): t. 1895. 1889 and *Botanical Magazine* 100: 99–101. 1987, *Journal of the Northwestern Teachers College, Natural Science* 1: 64–66. 1988, *Acta Botanica Boreali-Occidentalia Sinica* 14(2): 143–146. 1994

(Stomachic, digestive.)

in English: upright wild ginger

in China: ma ti xiang

***Sasa* Makino & Shibata Poaceae (Gramineae)**

The Japanese name. See *Genera Plantarum* 1: 236. 1789, *Flora Boreali-Americana* 1: 73. 1803, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 745, pl. 5, f. 3. 1843, *Bulletin de l'Herbier Boissier* 7(9): 716. 1899

Japan. Sympodial branching, leaf blades thick, inflorescence laterally issues from the upper branch, shoots eaten by the local people, mountains

See *Bull. Cl. Phys.-Math. Acad. Imp. Sci. Saint-Petersbourg* 8: 121. 1850, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg (Sér. 7)* 12(2): 198. 1868, *Memoirs of the Boston Society of Natural History* 4: 271. 1890, *Revisio Generum Plantarum* 2: 760. 1891, *Bulletin de l'Herbier Boissier* 7(9): 719. 1899 and *Botanical Magazine* 14(index): 61. 1900, *Botanical Magazine* (Tokyo) 15: 18, 27. 1901, *Botanical Magazine* 31: 4, 41. 1916, *Journal of Japanese Botany* 5(2): 4. 1928, *Journal of Japanese Botany* 5(4): 15. 1928, *Journal of Japanese Botany* 6: 12. 1929, *Tennen Kinenbutsu Chosahokoku* 12: 58. 1930 [Preserv. Natural Monuments

Japan], *Journal of the Faculty of Agriculture of the Hokkaido University* 26: 182–183. 1931, *Science Education [Rika Kyō-iku]* 15(6): 71. 1932, *Acta Phytotaxonomica et Geobotanica* 3: 18. 1934, *Journal of Japanese Botany* 10(9): 555–556. 1934, *Acta Phytotaxonomica et Geobotanica* 4: 17. 1935, *Journal of Japanese Botany* 11(12): 818. 1935, *Acta Phytotaxonomica et Geobotanica* 7: 116, 257. 1938, *Hokkaido Ringyō-kaihō* 38: 247, 250. 1940, *Atti della Reale Accademia Nazionale dei Lincei: Rendiconto dell' Adunanza Solenne del ...* 38: 249. 1940, *Acta Phytotaxonomica et Geobotanica* 9: 174. 1940, *Acta Phytotaxonomica et Geobotanica* 11: 314. 1942, *Acta Phytotaxonomica et Geobotanica* 12: 115. 1943, *Journal of Japanese Botany* 18(3): 301. 1964, *Journal of Japanese Botany* 67: 31–34. 1992

(Charred leaf and stalk used as an antidote for fish poisoning.)

in Japan: huru, huru-amam, yayan-top, chishima-zasa, nemagari-dake, suzuko (= the shoots), takara-nemagari (whitish variegation), shimashimofuri-nemagari (with dots and stripes), kikan-shiro-akebono (leaves milky white), shiroakebono-chishima (white leaves with wide stripes), kiakebono-nemagari (variable stripes and dots), kiakebono-chishima (variable stripes and dots), shimofuri-nemagari (white dots), chabo-shimofuri-chishima (white dots) (*chabo* in Japanese are the dwarf hens), chabo-konshima-chishima (navy-blue to dark green stripes), nochizae-kifu-chishima (dots clear later), nochizae-kifu-nemagari (dots clear later), shirofu-chishima (yellow-white stripes), miuro-chishima (with three colors), chabo-makiba-nemagari

Sassafras J. Presl Lauraceae

Spanish *sasafràs*, perhaps from the Latin *saxifragus*, *a*, *um* 'stone-breaking, stone-crushing', or derived from an Indian American name; see *Prir. Rostlin Aneb. Rostl.* 2: 30. 1825, Nees von Esenbeck, Christian Gottfried Daniel (1776–1858), *Systema laurinarum*. Berolini, Sumptibus Veitii et Sociorum, 1836, E. Weekley, *An Etymological Dictionary of Modern English*. 2: 1279. New York 1967, S. Battaglia, *Grande dizionario della lingua italiana*. XVII: 584. Torino 1995, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 560–561. Basel 1996. Safrole is found as a minor component in many *Lauraceae* and as the principal component of sassafras oil. It is suspected of causing contact dermatitis and of being hallucinogenic, especially in large doses; it is also considered to be both carcinogenic and hepatotoxic.

Sassafras albidum (Nuttall) Nees (*Laurus albida* Nuttall; *Laurus sassafras* Linnaeus; *Sassafras albidum* var. *molle* (Rafinesque) Fernald; *Sassafras albidum* (Nutt.) Nees var. *molle* Fernald; *Sassafras officinale* Nees; *Sassafras officinale* Nees & Eberm.; *Sassafras officinale* Siebold; *Sassafras officinale* var. *albidum* (Nutt.) S.F. Blake; *Sassafras officinale* Nees var. *albidum* S.F. Blake; *Sassafras officinale* T. Nees ex C.H. Ebermaier; *Sassafras officinarum* Presl; *Sassafras sassafras* Sudw.; *Sassafras sassafras* (Linnaeus) H. Karsten, nom. inval., tautonym; *Sassafras sassafras* H.

Karst.; *Sassafras triloba* Raf.; *Sassafras triloba* var. *molle* Raf.; *Sassafras variifolium* Kuntze; *Sassafras variifolium* (Salisbury) Kuntze; *Sassafras variifolium* var. *albidum* (Nutt.) Fernald; *Sassafras variifolium* var. *albidum* Fernald; *Tetranthera albida* (Nutt.) Spreng.)

North America. Deciduous tree, yellowish flowers in axillary clusters, fruit a blue-black drupe on a reddish stalk

See *Species Plantarum* 1: 369, 371. 1753, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 59, t. 113. 1797, *The Genera of North American Plants* 1: 259–260. 1818, *Systema Vegetabilium*, editio decima sexta 2: 267. 1825, *O Prirozenosti Rostlin* 2: 30, 67. 1825, *Handbuch der Medicinisch-Pharmaceutischen Botanik* 2: 418. 1831, *Systema Laurinarum* 488, 490. 1836, *Autikon Botanikon* 85. 1840, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* (Karsten) 505. 1881, *Revisio Generum Plantarum* 2: 574. 1891 and *Rhodora* 15(169): 16. 1913, *Rhodora* 20(233): 99. 1918, *Rhodora* 38(449): 179. 1936

(Bark poisonous, low toxicity. Traditionally, sassafras tea was prepared by steeping the bark of the roots, of the young roots. It was once considered a relatively pleasant drink. Several indigenous populations used sassafras twigs as chewing sticks, and sassafras root is used occasionally in commercial dental poultices. Sassafras root was one of the ingredients of root beer; this use has now been banned.)

in North America: filé, gombo fil, sasafras, sassafras, white sassafras

Sassafras tzumu (Hemsl.) Hemsl. (*Lindera camphorata* H. Lév.; *Lindera tzumu* Hemsl.; *Litsea laxiflora* Hemsl.; *Pseudosassafras laxiflora* (Hemsl.) Nakai; *Pseudosassafras laxiflora* (Hemsl.) Nakai; *Pseudosassafras tzumu* (Hemsl.) Lecomte)

China.

See *Nova Genera Plantarum* 64. 1783, *Encyclopédie Méthodique, Botanique* 3(2): 574. 1792, *Journal of the Linnean Society, Botany* 26(176): 392–393, pl. 8. 1891 and *Bulletin of Miscellaneous Information Kew* 1907(2): 55–56. 1907, *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 459–460. 1911, *Notulae Systematicae. Herbarium du Museum de Paris* 2(9): 268–270. 1912, *Journal of Japanese Botany* 16(3): 126. 1940

(Wood yellowish, finely grained, durable, used for boat and furniture making. Root and bark used by natives as a medicine for traumatic injury and rheumatism. Fruit, leaves and roots contain essential oil.)

in China: cha mu

Satureja L. Lamiaceae (Labiatae)

Latin *satureia*, *ae*, the common name for the pot-herb *cunila*, savory (L. Junius Moderatus Columella, Plinius et al.), see *Willdenowia* 38: 363–410. 2008.

Satureja hortensis L. (*Clinopodium hortense* (L.) Kuntze; *Clinopodium pachyphyllum* (K. Koch) Kuntze; *Satureja altaica* Boriss.; *Satureja brachiata* Stokes; *Satureja filicaulis* Schott ex Boiss.; *Satureja laxiflora* C. Koch; *Satureja laxiflora* (Hayata) Matsum. & Kudô; *Satureja laxiflora* subsp. *zuvandica* (D.A. Kapan.) D.A. Kapan.; *Satureja litwinowii* Schmalh. ex Lipsky; *Satureja montana* subsp. *taurica* P.W. Ball; *Satureja montana* L. subsp. *taurica* (Velen.) P.W. Ball; *Satureja officinarum* Crantz; *Satureja pachyphylla* C. Koch; *Satureja viminea* Burm.f., nom. illeg.; *Satureja zuvandica* D.A. Kapan.; *Thymus cunila* E.H.L. Krause)

Europe, Kashmir.

See *Species Plantarum* 2: 567–568. 1753, *Linnaea* 21: 668. 1848, *Revis. Gen. Pl.* 2: 515. 1891 and *Ill. Fl. N. U. S. ed.* 2. 3: 137. 1913, *Taxon* 28: 632. 1979, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 4: 331–339. 1981, *Anales Jard. Bot. Madrid* 38: 385. 1982

(Stimulant, aphrodisiac, expectorant, tonic.)

in English: summer savory

in Italian: erba acciuga, erba cerea, erba di S.Giuliano, santoreggia domestica

Satureja montana L. (*Clinopodium montanum* (L.) Kuntze; *Micromeria montana* (L.) Rechb.; *Satureja confinis* Boriss.; *Saturiastrum montanum* (L.) Fourr.; *Thymus montanus* (L.) Dum.Cours., nom. illeg.)

Europe, Mediterranean.

See *Species Plantarum* 2: 567–568, 590–592. 1753, *Revis. Gen. Pl.* 2: 515. 1891 and *Anales del Jardín Botánico de Madrid* 38: 361–415. 1981, *Rev. Cytol. Biol. Vég. Bot.* 8: 33–62. 1985, *Thaiszia* 7: 75–88. 1997, *Anales del Jardín Botánico de Madrid* 58(1): 163–164. 2000

(Astringent, for diarrhea.)

in Italian: santoreggia montana

Satyrium Swartz Orchidaceae

From the Greek *satyrion* (*satyros* ‘satyr’), an ancient name used by Dioscorides and Plinius for an orchid, the man orchid, *Aceras anthropophorum*, probably because of the supposed aphrodisiacal properties of some species; the satyrs were creatures of the woods and mountains, half man, half beast, lascivious, closely connected with Dionysus.; see *Species Plantarum* 2: 944. 1753, *Kongl. Vetenskaps Akademiens Nya Handlingar* 21: 214. 1800, *Synopsis Plantarum* 2: 508. 1807.

Satyrium macrophyllum Lindl. (*Satyrium brachyrhynchum* Schltr.; *Satyrium buchananii* Rolfe, nom. illeg.; *Satyrium cheiophorum* Rolfe; *Satyrium murrumbalaensis* De Wild.; *Satyrium speciosum* Rolfe; *Satyrium speciosum* Summerh.)

Kenya to S. Africa. Terrestrial orchid, robust, erect, round-oval underground tubers, basal leaves sheathing at base, stem

leaves clasping stem along whole length, pink flowers usually sweet scented, each flower supported by a conspicuous leafy bract, spurs very slender, small ellipsoid capsule, a source of bee forage, tubers cooked and eaten

See *Kongl. Vetenskaps Akademiens Nya Handlingar* 21: 214. 1800, *The Genera and Species of Orchidaceous Plants* 338. 1838, *Fl. Trop. Afr.* 7: 265, 270, 574. 1898 and *Bot. Jahrb. Syst.* 53: 529. 1915

(Emetic.)

in Tanzania: chikande, kikande, nyamachebele, nyamasebele

Satyrium nepalense D. Don

Nepal, India. Terrestrial, pink flowers, roasted tuberous roots eaten

See *Prodromus Florae Nepalensis* 26. 1825 and *Taxon* 29: 348–350, 546. 1980, *Taxon* 30: 512. 1981, *Cell Chromosome Res.* 17(1): 40–47. 1994

(Plant extract as a tonic. Fresh roots eaten for body strength.)

in China: niao zu lan

in India: pad paduwa

Saurauia Willd. Actinidiaceae (Saurauiaceae)

In honor of the Austrian J. von Saurau or Count Friedrich von Saurau, 1760–circa 1832/1840, a patron of arts and science and natural sciences, friend of Willdenow; see *Monadelphiae Classis Dissertationes Decem* 1: 40. 1785, *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 5, ed. 1(Art. 4): 3. 1790, *Florae Peruvianaes, et Chilensis Prodromus* 100, t. 22. 1794, *Systema Vegetabilium Florae Peruvianaes et Chilensis* 181. 1798, Carl Ludwig von Willdenow (1765–1812), in *Der Gesellschaft naturforschender Freunde zu Berlin, neue Schriften.* 3: 407, t. 4. Berlin 1801, *Synopsis Plantarum* 2: 91. 1806[1807], *Encyclopédie Méthodique, Botanique Suppl.* 4: 261. 1816, Du Mortier, B.-C. (Barthélemy-Charles) (1797–1878), *Commentationes Botanicae* 19. Tournay, 1822, *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 1: 419, 426. 1822, *Catalogus ...* 79. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 525–526. 1824, *Sylloge Plantarum Novarum* 1: 96. 1824, *Prodromus Florae Nepalensis* 225. 1825, *Systema Vegetabilium*, editio decima sexta 3: 12, 126. 1826, *Sylloge Plantarum Novarum* 2: 11–12. 1828[1825], *A General History of the Dichlamydeous Plants* 1: 564, 573. 1831, *Plantae Javanicae Rariores* 171. 1840, *Nomenclator Botanicus.* Editio secunda 2: 744. 1841, *Bulletin de la Société Impériale des Naturalistes de Moscou* 20(1): 148–149. 1847, *Proceedings of the American Academy of Arts and Sciences* 3: 49. 1853, *U.S. Expl. Exped., Phan.* 15: 206, t. 15. 1854, *Grundriss der Systematischen Botanik* 98. 1854, *Annales des Sciences Naturelles; Botanique*, série 4 18: 268. 1862, *Fragmenta Phytographiae Australiae* 5: 175,

in obs. 1866, *Victoria Naturalist* 3: 71. 1886, *Bot. Centralbl.* xxix. (1887) 148. 1887 and *Malpighia* 25: 218, 220, 222, 224. 1912, *Caldasia* 2: 319. 1944, *Ann. Missouri Bot. Gard.* 52(4): 579–598. 1966, *Ann. Missouri Bot. Gard.* 53(1): 47–89. 1966, *Fieldiana: Botany*, New Series 2: 20–21, 40, 90. 1980.

Saurauia armata Kurz (*Saurauia cerea* Griff. ex Dyer)

Burma, India. Shrub, young parts scaly, leaves broadly ovate-cuneate, pinkish hairy globose fruits, sweet sticky glutinous pulp, ripe fruit eaten

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 42(2): 59. 1873, *Fl. Brit. India* [J.D. Hooker] 1: 288. 1874

(Ritual, magic, roots used for sorcery.)

in China: la zhi shui dong ge

in India: umpler

Saurauia brachybotrys Turcz. (*Saurauia brachybotrys* var. *macrantha* Buscal.; *Saurauia brachybotrys* var. *scabra* Buscal.; *Saurauia goudotiana* Linden & Planch.; *Saurauia peduncularis* Triana & Planch. var. *veraniana* Buscal.)

South America, Colombia.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 245. 1858, *Troisième Voyage de J. Linden ... Plantae Columbiana* 1: 58. 1863 and *Malpighia* 26: 26–29, 322. 1913, *Malpighia* 28: 31, 33. 1917

(Powdered bark applied to sores. A very hot tea of the leaves of *Brunellia sibundoya* with the mucilaginous fruits of *Saurauia brachybotrys* taken in treating pulmonary troubles, influenza, pneumonia.)

Saurauia bracteosa DC.

Indonesia, Java. Trees, white flowers

See *Mém. Soc. Phys. Genève*. 1: 423, t. 6. 1822

(Bark poultice for boils.)

Saurauia napaulensis DC. (*Saurauia napaulensis* (Royle) Benth. ex Hook.)

Nepal. Very good fodder, edible fruits

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 407, t. 4. 1801, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 1: 421. 1822

(Root bark eaten for stomachache, a decoction given as purgative. Bark juice given to treat fever, kidney and urinary bladder diseases. Veterinary medicine, young plant twigs boiled and decoction given to cows for increasing milk.)

in India: antsutenla, atsutenla, gogun, kasur, metin

in Nepal: amjur, goban

Saurauia punduana Wall.

India, Himalaya.

See *Pl. Asiat. Rar.* (Wallich). 2: 49. 1831

(Veterinary medicine, nutritious and health-giving fodder for cattle.)

in China: da hua shui dong ge

Saurauia roxburghii Wall.

Himalaya.

See *Pl. Asiat. Rar.* (Wallich). 2: 40. 1831

(Bark boiled and pounded applied to boils.)

Sauropus Blume Phyllanthaceae (Euphorbiaceae)

Greek *sauros* and *pous* 'a foot'; see *Herb. Amboin.* (Rumphius) 3: 207. 1743, *Encycl.* (Lamarck) 1(1): 1. 1783, Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 595. (Jan.) 1826, *Revis. Gen. Pl.* 1: 590. 1891 and Balakrishnan, N.P. & Chakrabarty, T. *The Family Euphorbiaceae in India. A Synopsis of Its Profile, Taxonomy and Bibliography*. 2007.

Rob.; *Sauropus sumatranus* Miquel; *Sauropus zeylanicus* Wight)

Trop. & Subtrop. Asia, Indonesia. Shrub, erect, many-branched, glabrous cylindrical stems, minute flowers yellowish green male and female on the same plants, capsule globose valved inflated, often used as vegetable food

See *Mantissa Plantarum* 1: 128. 1767, *Fl. Ind.* ed. 1832, 3: 670. 1832, *Icon. Pl. Ind. Orient.* 6: 6, t. 1951, 1952. 1853, *Linnaea* 32: 72. 1863, *Fl. Brit. India* 5: 333. 1887, *Revis. Gen. Pl.* 2: 591. 1891 and *Bulletin of the Bureau of Forestry, Philippine Islands*. Manila 1: 30. 1903, *Bull. Jard. Bot. Buitenzorg*, III, 6: 82. 1924, *Taxon* 29: 715–716. 1980, *Taxon* 30: 73. 1981, *Proceedings of the Indian Science Congress Association* 68 (Sect. VI): 78. 1981, *Cytologia* 64: 229–234. 1999

(Roots febrifuge, diuretic, yaws. The leaves used as medicine antitussive, tonic and soothing the lungs, febrifugal and

relieve internal fever. For sore eyes, pound the leaves with the root of *Punica granatum* and the leaves of *Jasminum sambac*, and squeeze the juice into the eye. Promotes secretion of milk.)

in China: shou gong mu

in India: sukyamuringa

in Indonesia: babing, cekop manis, karakur, katu, katuk, katukan, memata, simani

Malay names: cekop manis, chekop manis, chekor manis

Sauropus brevipes Müll.Arg. (*Aalius brevipes* (Müll.Arg.) Kuntze; *Aalius brevipes* Kuntze; *Sauropus parvifolius* Ridl.)

Vietnam, Malaysia.

See *Linnaea* 32: 73. 1863, *Revis. Gen. Pl.* 2: 591. 1891 and *J. Straits Branch Roy. Asiat. Soc.* 59: 175. 1911

(Leaves decoction for colic.)

Malay name: merajah santah

Sauropus spatulifolius Beille (*Sauropus changianus* S.Y. Hu)

Vietnam. Shrub, low, evergreen, cauliflorous, procumbent and ascending, roots cord-like, large oblong-lanceolate coriaceous leaves

See *Fl. Gen. Indo-Chine* 5: 652. 1927, *Journal of the Arnold Arboretum* 32(4): 393–394, pl. 1, f. 12–15. 1951

(Antibiotic. Leaves are used as medicine for curing diseases of the respiratory system, cough, sore throat, acute bronchitis.)

in English: dragon tongue

in China: long li ye, lung lei ip, lung li yeh

Saururus L. Saururaceae

From the Greek *sauros* 'lizard' and *oura* 'a tail', see *Sp. Pl.* 1: 341. 1753.

Saururus cernuus Linnaeus

North America. Perennial herb

See *Sp. Pl.* 1: 341. 1753, *Gen. Pl.* ed. 5, 159. 1754 and Johnson, D.S. "On the development of *Saururus cernuus* L." *Bull. Torrey Bot. Club* 27: 365–372. 1900, Holm, T. "*Saururus cernuus* L. A morphological study." *Amer. J. Sci.*, ser. 5, 12: 162–168. 1926, Hall, T.F. "The biology of *Saururus cernuus* L." *Amer. Midl. Naturalist* 24: 253–260. 1940, Baldwin, J.T. and B.M. Speese. "Cytogeography of *Saururus cernuus*." *Bull. Torrey Bot. Club* 76: 213–216. 1949, Tucker, S.C. "Ontogeny of the inflorescence of *Saururus cernuus* (Saururaceae)." *Amer. J. Bot.* 66: 227–236. 1979

(Antiseptic, diaphoretic, antiinflammatory, for rheumatism, tuberculosis, cough, stomachache, venereal diseases, diabetes, colds, cuts and wounds, ulcers and sores.)

in English: lizard's tail, swamp lily

in North America: lezardelle penchée, lizard's-tail

Saururus chinensis (Loureiro) Baillon (*Spathium chinense* Loureiro; *Sauruopsis chinensis* (Loureiro) Turczaninow; *Sauruopsis chinensis* Turcz.; *Sauruopsis cumingii* C. DC.; *Saururus cernuus* Thunberg, non Linnaeus; *Saururus chinensis* Hort. ex Loudon; *Saururus loureiri* Decaisne; *Saururus loureiroi* Decne.)

China.

(Leaf juice applied on all types of skin diseases, sores and boils.)

in English: Chinese lizard's tail, Chinese lizardtail

in China: san bai cao, san pai tsaou

in Japan: han-geshô

in Okinawa: firagusa

Saussurea DC. Asteraceae

For the Swiss scientist Horace Bénédict de Saussure, 1740–1799, philosopher and botanist, mountaineer, meteorologist, naturalist, traveller, 1762–1786 professor at Academy of Geneva; the generic name also honors the Swiss botanist and chemist Nicolas Théodore de Saussure (1767–1845, d. Geneva), son of Horace Bénédict de Saussure, plant physiologist, in 1815 he was a founding member of the Société Helvétique des Sciences Naturelles; see A.P. de Candolle, in *Annales du Muséum National d'Histoire Naturelle.* 16: 156, 196, 198–203, pl. 10–13. Paris 1810, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 538. 1838, *Die Natürlichen Pflanzenfamilien* 4(5): 324. 1893 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists.* 3: 215. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 350. 1972, Albert V. Carozzi, in *D.S.B.* 12: 119–123. 1981, P.E. Pilet, in *D.S.B.* 12: 123–124. 1981, Stafleu and Cowan, *Taxonomic Literature.* 5: 70–73. 1985.

Saussurea arenaria Maximowicz

China.

See *Bulletin de l'Académie Impériale des Sciences de St.-Pétersbourg* 27(4): 490–491. 1881

(To heal wounds.)

in China: sa sheng feng mao ju

Saussurea auriculata (DC.) Sch. Bip. (*Aplotaxis auriculata* DC.; *Cnicus auriculata* Wall.; *Himalaiella auriculata* (DC.) E. von Raab-Straube; *Saussurea auriculata* Hemsl.; *Saussurea auriculata* Franch.; *Saussurea hypoleuca* Spreng. ex DC.; *Theodorea auriculata* Kuntze)

India, Himalayas. Rather slender herb

See *Species Plantarum* 2: 826. 1753, *Archives de Botanique* 2: 330. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 541. 1838, *Linnaea* 19: 331. 1846, *Nouv. Arch. Mus. Hist. Nat. Ser. II, x.* (1888) 40. 1888, *Revisio Generum Plantarum* 1: 367. 1891, *J. Linn. Soc., Bot.* xxix. (1892) 308. 1892 and *Willdenowia* 33(2): 390. 2003

(Used in Ayurveda. Leaves purgative, for venereal diseases.)

in India: chagalkoshtam, chengulva, goshtam, gostan, jathikoshtam, koshta, koshtam, kostu, kosuta, kottam, kust, kustam, kustham, kut, nurya, pokharmul, puskaramulam, seppudday, thimra

Saussurea bracteata Decne. (*Saussurea schultzii* Hook. f.)

India, Himalaya.

See *Voy. Bot.* [Jacquemont] 4: 94, pl. 102. 1844, *The Flora of British India* 3(8): 366. 1881 and *Proc. Indian Natl. Sci. Acad.*, B 55: 177–184. 1989

(Paste of flowering buds applied to cure boils and cuts; powdered flowering buds given against influenza, fever, intestinal pain, poisoning, rheumatism, arthritis.)

in India: jarbag, phansi, span-rtsa-do-bo, spengsetobo

Saussurea costus (Falc.) Lipsch. (*Aplotaxis lappa* Decaisne; *Aucklandia costus* Falconer; *Aucklandia lappa* Decne.; *Saussurea lappa* (Decne.) C.B. Clarke; *Saussurea lappa* (Decaisne) Schultz-Bipontinus; *Theodorea costus* (Falconer) Kuntze; *Theodorea costus* Kuntze)

Northern India and Nepal. Perennial herb, erect, robust, unbranched, thick reddish roots carrot-like, purplish heads, fruit a compressed subcylindrical achene

See *Dict. Sci. Nat.* 47: 500, 513. 1827, *Archives de Botanique* 2: 330. 1833, *Annals and Magazine of Natural History* 6(39): 475. 1841, *Repertorium Botanices Systematicae* 2: 669. 1843, *Trans. Linn. Soc.* 19: 23. 1845, *Linnaea* 19: 313. 1846, *Iconographia Cormophytorum Sinicorum* 4: 643, f. 6700. 1875, *Compositae Indicae* 233. 1876, *Revisio Generum Plantarum* 1: 368. 1891 and *Bot. Zhurn.* (Moscow & Leningrad) 49(1): 131. 1964, *CIS Chromosome Inform. Serv.* 54: 5–6. 1993, *Phytomedicine* 9(5): 433–437. 2002, *Fl. Yunnan.* 13: 579. 2003

(Used in Ayurveda, Unani and Sidha. Roots bitter, aromatic, aphrodisiac, a wash after confinement, universal antidote, carminative, tonic, purgative, antidote of snake venom and scorpion sting, used for coughs, asthma, dyspepsia, stomachache, constipation, flatulence, inflammations,

toothache, fever, typhoid, skin diseases, indigestion, nausea, diarrhea and dysentery; dry root powder infusion given for acute stomach pain; dry powder or paste as a blood purifier for skin infections, boils, warts, dryness; powdered, mixed with mustard oil, warmed and rubbed for rheumatic pain. Roots sometimes smoked as a substitute for opium, producing a marked depression of the cerebral nervous system. *Saussurea lappa*, *Argyrea speciosa* and *Achyranthes aspera* antiinflammatory and anti-arthritic; roots of *Inula racemosa* made into a paste, mixed with *Saussurea lappa* and given against bronchial asthma and gastrointestinal problems. Magic, it is believed that snakes would not enter inside the houses when a part of root is kept inside.)

in English: costus, costus root, kuth

in China: yun mu xiang

in India: agada, amaya, apya, bhasura, cengala, chabi-i-qut, chagal koshtam, changala, chengulva, dushta, gada, gadakhya, gadavha, gadavhaya, goshtam, gostan, gostham, haribhadra, jarana, jathikoshtam, kadakhya, kakala, kankushta, karwa koth, kashmirja, kashtam, kasmira, katakuvayam, kath, kaubera, kinjalka, koont, koostha, koot, kooth, kootha, koshta, koshtam, koshttha, kosta, kostam, kostamu, koshta, kostum, kostu, kosuta, kot, koth, kottam, kur, kura, kushta, kushtam, kushtamu, kushth, kushtha, kushthh, kust, kustam, kutha, kuthah, kutham, kut, kutavapiritam, kuth, kuth meetha, kuth mota, kuthika, kutki, kutsita, kwoth, niruja, oli, ouplet, pachak, padmaka, pakala, pakalam, palaka, paribhadra, paribhavya, pauskara, pavana, pohkar mool, pokharmul, post-khai, pushkarmool, puska, puskaramula, putchuk, putechuk, qaste shireen, qust-i-talkh, quest shirin, qust, qust-shirin, qust shirin, qust talkh, rama, roga, rogavhaya, ruja, ruk, ruka, rusta, seppudday, sepuddy, simakkottam, upaleta, uplet, uplet meethi, uplit, utpala, utpalam, vaniraja, vapy, vyadhi, vyapya

(Mucilage as a children's medicine.)

Saxifraga L. Saxifragaceae

Latin *saxifragus*, *a*, *um* (*saxum frango*) 'stone-breaking, stone-crushing'; see Carl Linnaeus, *Species Plantarum*. 1: 398–405. 1753 and *Genera Plantarum*. Ed. 5. 189. 1754, Haworth, Adrian Hardy (1767–1833), *Synopsis plantarum succulentarum ...* 320. Londni, 1812, Haworth, Adrian Hardy, *Saxifragearum Enumeratio...* accedunt revisiones plantarum succulentarum 39–41, 47. Londini, 1821, *Transactions of the Linnean Society of London* 13: 345. 1821, *Flora Telluriana* 2: 66. 1837 [1836 publ. Jan–Mar 1837], Engler, Heinrich Gustav Adolf (1844–1930), *Monographie der Gattung Saxifraga L.* Breslau, 1872 and *Novosti Sist. Vyssh. Rast.* 15: 158–162. 1979, *Novosti Sist. Vyssh. Rast.* 22: 123–124. 1985, *Bot. J. Linn. Soc.* 95(4): 276–283, 286–288, 291. 1987, *Acta Phytotax. Sin.* 29(1): 5, 9–21. 1991, *Taxon* 40(1): 43. 1991, *Saxifraga Group J.* 2: 43. 1992, *Novosti Sist. Vyssh. Rast.* 29: 92–94. 1993, *Fl. Ecuador* 73: 17–24. Göteborg, Botanical Institute, Göteborg University, 2004 [Harling, Gunnar Wilhelm, 1920–2010], McGregor, Malcolm (1947-), *Saxifrages: A Definitive Guide to 2000 Species, Hybrids and Cultivars*. Portland, Or., London, Timber Press, 2008.

Saxifraga ferruginea Graham (*Hexaphoma ferruginea* (Graham) Raf.; *Hexaphoma ferruginea* Raf.; *Micranthes ferruginea* (Graham) Brouillet & Gornall; *Saxifraga ferruginea* Graham var. *ferruginea*; *Spatularia ferruginea* (Graham) Small)

North America. Perennial herb

See *Edinburgh New Philosophical Journal* 7: 349. 1829, *Flora Telluriana* 2: 66. 1836 [1837] and *North American Flora* 22(2): 150. 1905, *Journal of the Botanical Research Institute of Texas* 1(2): 1020. 2007

(Leaves and roots decoction taken for urinary troubles.)

in English: russethair saxifrage

Saxifraga ferruginea Graham var. ***ferruginea***

North America. Perennial herb

See *Edinburgh New Philosophical Journal* 7: 349. 1829, *Flora Telluriana* 2: 66. 1836[1837] and *North American Flora* 22(2): 150. 1905, *Journal of the Botanical Research Institute of Texas* 1(2): 1020. 2007

(Leaves and roots decoction taken for urinary troubles.)

in English: russethair saxifrage

Saxifraga moorcroftiana (Ser.) Wall. ex Sternb. (*Hirculus moorcroftianus* (Ser.) Losinsk.; *Saxifraga diversifolia* Wall. ex Ser. var. *moorcroftiana* Ser.; *Saxifraga kuana* Zhmylev; *Saxifraga lysimachioides* Klotzsch; *Saxifraga moorcroftiana* Wall.; *Saxifraga nyanangensis* J.T. Pan; *Saxifraga reflexa* T.C. Ku, nom. illeg.; *Saxifraga reflexa* Hook.; *Saxifraga reflexa* St.-Lag.)

Himalaya.

See *Numer. List* [Wallich] n. 453. 1828, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 44. 1830, *Revisio Saxifragarum* Suppl. 2, 28, pl. 24. 1831, *Flora Boreali-Americana* (Hooker) 1(5): 249, pl. 85. 1832, *Bot. Ergebn. Reise Waldemar* 145. 1862 and *Acta Phytotaxonomica Sinica* 16(2): 23, 26, pl. 8. 1978, *Bulletin of Botanical Research*, Harbin 9(4): 4–5. 1989, *Byull. Moskovsk. Obshch. Isp. Prir., Otd. Biol.* 96(3): 129. 1991

(Whole plant used for cough, cold and liver disorders.)

in Bhutan: zangs-tig

in China: nie la mu hu er cao

Saxifraga nelsoniana D. Don (*Micranthes aestivalis* (Fisch. & C.A. Mey.) Small; *Micranthes nelsoniana* (D. Don) Small; *Saxifraga aestivalis* Fisch. & C.A. Mey.; *Saxifraga punctata* L. p.p.; *Saxifraga punctata* L. subsp. *nelsoniana* (D. Don) Hultén; *Saxifraga punctata* L. var. *nelsoniana* (D. Don) Macoun, nom. illeg.; *Saxifraga punctata* var. *nelsoniana* (D. Don) Engl.)

North America. Perennial herb, leaves eaten

See *Species Plantarum* 1: 401. 1753, *Transactions of the Linnean Society of London* 13(2): 355–356. 1822, *Index Seminum* [St. Petersburg] 1: 37. 1835, *Monographie der Gattung Saxifraga* 139. 1872, *Catalogue of Canadian Plants* 1: 153. 1883 and *North American Flora* 22(2): 147. 1905, *Flora of Alaska and Yukon* 5: 929. 1945, *Bot. Zhurn.* 65(1): 51–59. 1980, *Bot. Zhurn.* 65(5): 651–659. 1980, *Bot. Zhurn.* 66(3): 380–387. 1981, *Rhodora* 99: 33–55. 1997

(Leaves a good source of vitamin C and pro-vitamin A.)

in English: heartleaf saxifrage

Saxifraga nelsoniana D. Don subsp. ***nelsoniana*** (*Saxifraga aestivalis* Fisch. & C.A. Mey.; *Saxifraga punctata* L. p.p.; *Saxifraga punctata* L. subsp. *nelsoniana* (D. Don) Hultén; *Saxifraga punctata* L. var. *nelsoniana* (D. Don) Macoun, nom. illeg.; *Saxifraga punctata* var. *nelsoniana* (D. Don) Engl.)

North America. Perennial herb, leaves eaten

See *Species Plantarum* 1: 401. 1753, *Transactions of the Linnean Society of London* 13(2): 355–356. 1822, *Index Seminum* [St. Petersburg] 1: 37. 1835, *Monographie der Gattung Saxifraga* 139. 1872, *Catalogue of Canadian Plants* 1: 153. 1883 and *Flora of Alaska and Yukon* 5: 929. 1945

(Leaves a good source of vitamin C and pro-vitamin A.)

in English: heartleaf saxifrage

Saxifraga parnassifolia D. Don (*Saxifraga diversifolia* Wall. ex Ser. var. *parnassifolia* (D. Don) Ser.; *Saxifraga parnassifolia* Wall.; *Saxifraga parnassifolia* var. *obscuricallosa* J.T. Pan)

Himalaya.

See *Transactions of the Linnean Society of London* 13(2): 405–406. 1822 [3–19 Dec 1822], *Numer. List* [Wallich] n. 451. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 44. 1830 and *Flora Xizangica* 2: 478, f. 158, 23–29. 1985

(Whole plant used for wounds, cough, cold, liver disorders and jaundice.)

in Bhutan: gser-tig

in China: mei hua cao ye hu er cao, yin jia hu er cao

Saxifraga pensylvanica L. (*Micranthes pensylvanica* (L.) Haw.; *Micranthes pensylvanica* (L.) Haw. var. *forbesii* (Vasey) Bush; *Saxifraga forbesii* Vasey; *Saxifraga pensylvanica* L. subsp. *interior* Burns; *Saxifraga pensylvanica* L. subsp. *tenuirostrata* Burns; *Saxifraga pensylvanica* L. var. *forbesii* (Vasey) Engl. & Irmsch.; *Saxifraga pensylvanica* L. var. *forbesii* Engl. & Irmsch.; *Saxifraga pensylvanica* L. var. *purpuripetala* (A.M. Johnson) Bush)

North America. Perennial herb, leaves eaten as vegetable

See *Species Plantarum* 1: 399. 1753, *Saxifragearum Enumeratio...* accedunt revisiones plantarum succulentarum 45. 1821, *American Entomologist* 2: 288. 1870 [*American entomologist and botanist*] and *Pflanzenr.* (Engler) 4, Fam. 117 I: 66. 1916, *Amer. Midl. Naturalist* 11(5): 229, 234. 1928, *Amer. Midl. Naturalist* 28: 151. 1942

(Analgesic, diuretic, blood purifier, for sores, muscle pain, dropsy, boils. Ceremonial, ritual.)

in English: eastern swamp saxifrage, swamp saxifrage, wild beet

Saxifraga pulvinaria Harry Sm. (*Saxifraga imbricata* Royle; *Saxifraga imbricata* Lam.; *Saxifraga imbricata* Bertol.)

India, Himalaya.

See *Fl. Franç.* (Lamarck) 3: 531. 1779 [1778 publ. after 21 Mar 1779], *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 226, t. 49, f. 1. 1835 and *Bulletin of the British Museum (Natural History)*, *Botany* 2(4): 105. 1958

(Used in hysteria, nervous breakdown, madness.)

in China: dian zhuang hu er cao

Saxifraga spicata D. Don (*Micranthes spicata* (D. Don) Small; *Micranthes spicata* Small)

North America. Perennial herb, food

See *Transactions of the Linnean Society of London* 13(2): 354–355. 1822 and *North American Flora* 22(2): 146. 1905

(A useful source of vitamin C.)

in English: spiked saxifrage

Scabiosa L. Caprifoliaceae (Dipsacaceae)

Latin *scabiosus, a, um* (*scabies, em* ‘scurf’, *scabo, scabi* ‘to scratch’) ‘mangy, itchy, rough’, referring to its medicinal uses; see Carl Linnaeus, *Species Plantarum*. 1: 98–101. 1753, *Genera Plantarum*. Ed. 5. 43. 1754, *Oekonomisch-technische Flora Böhmens* 2(1): 222–223. 1838 and *Willdenowia* 19(1): 139. 1989, *Fl. Iranica* [Rechinger] 168: 38. 1991, *Taxon* 41: 569. 1992.

Scabiosa columbaria L. (*Scabiosa anthemifolia* Eckl. & Zeyh.; *Scabiosa austro-africana* Heine; *Scabiosa austroafricana* Heine; *Scabiosa columbaria* Willk. ex Willk. & Lange)

South Africa. Small tufted perennial, white or mauve flowers

See *Species Plantarum* 1: 99. 1753, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 3: 371. 1837, *Prodr. Fl. Hispan.* 2(1): 17. 1865 and *Mitteilungen der Botanischen Staatssammlung München* Heft 9–10, 445. 1954, *Fragm. Florist. Geobot.* 15: 179–184. 1969, *Veröff. Geobot. Inst. ETH Stiftung Rübel Zürich* 52: 1–125. 1975, *Trab. Dept. Bot. Univ. Complutense* 9: 13–18. 1976, *Lagascalia* 10: 225–227. 1981, *Taxon* 31: 583–587. 1982, *Rev. Cytol. Biol. Vég., Bot.* 9: 5–72. 1986, *Inform. Bot. Ital.* 22: 216–226. 1990, *Taxon* 41: 569. 1992, *Watsonia* 19: 134–137. 1992, *Veröff. Geobot. Inst. ETH Stiftung Rübel Zürich* 58: 192–211. 1992, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 20: 4–6. 1993, *Opera Bot.* 137: 1–42. 1999, *Rev. Roumaine Biol., Sér. Biol. Vég.* 45(2): 137–140. 2000

(Roots and leaves to treat colic and heartburn. An infusion of the bulbs of *Eriospermum ornithogaloides*, mixed with *Mentha* sp., roots of *Gunnera perpensa*, *Scabiosa columbaria* and *Eulophia ovalis* used as a womb purifier, to enhance fertility in woman.)

in English: bachelor’s buttons, riceflower

in Southern Africa: isiLawu esikhulu, isiLawu esimhlophe (Xhosa)

Scabrethia W.A. Weber Asteraceae

Scabrethia scabra (Hook.) W.A. Weber (*Wyethia scabra* Hook.) (*Wyethia* Nuttall, for the American explorer Nathaniel Jarvis Wyeth, 1802–1856, plant collector for Nuttall, fur trader, led two expeditions to the Pacific, see *The*

Correspondence and Journals of Captain N.J. Wyeth, 1831–1836. A record of two expeditions for the occupation of the Oregon country. Edited by F.G. Young. [Oregon Historical Society. Sources of the History of Oregon. vol. 1. pt. 3–6.] 1899, Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950, J.W. Harshberger, *The botanists of Philadelphia and their work*. Philadelphia 1899, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 187. Berlin & Hamburg 1989.)

USA.

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 39–40, pl. 5. 1834, *London Journal of Botany* 6: 245–246. 1847 and *Phytologia* 85(1): 20–21. 1998 [1999]

(Emetic, toxic, dangerous.)

in English: mule’s ears

Scadoxus Raf. Amaryllidaceae (Alliaceae, Liliaceae)

Greek *skiadion* ‘umbel, parasol’ and *doxa* ‘glory’; the genus was named by Constantine Samuel Rafinesque (1783–1840): “umb. glor.” (glorious umbel?), see C.S. Rafinesque, *Flora Telluriana*. 4: 19. 1836 [1838].

Scadoxus cinnabarinus (Decne.) Friis & Nordal (*Haemanthus angolensis* Welw.; *Haemanthus brachyanthus* Baker; *Haemanthus cabrae* De Wild. & T. Durand; *Haemanthus cinnabarinus* Decne.; *Haemanthus congolensis* De Wild.; *Haemanthus demeusei* De Wild.; *Haemanthus diadema* Linden; *Haemanthus eetveldeanus* De Wild. & T. Durand; *Haemanthus fascinator* Linden; *Haemanthus germanianus* J. Braun & K. Schum.; *Haemanthus kundanianus* J. Braun & K. Schum.; *Haemanthus laurentii* De Wild.; *Haemanthus lescrauwaetii* De Wild. ex Gentil; *Haemanthus lindenii* N.E. Br.; *Haemanthus longipes* Engl.; *Haemanthus mirabilis* Linden; *Haemanthus radcliffei* Rendle; *Haemanthus rotularis* Baker)

Trop. Africa. Bulb geophyte, underground rhizome, large numerous flowers pink to red-salmon, spherical inflorescence

See *Fl. Trop. Afr.* 7: 391. 1898, *Ann. Mus. Congo Belge, Bot.*, II, 1(1): 56. 1899 and *J. Soc. Natl. Hort. France*, IV, 3: 291–292. 1902, *J. Linn. Soc., Bot.* 37: 223. 1904, *Norweg. J. Bot.* 23: 64. 1976

(Used in conjunction with a number of other plants, as an arrow poison, the bulbs are used to make a fishing poison. Magic, ritual.)

Scadoxus multiflorus (Martyn) Raf. (*Amaryllis multiflora* (Martyn) Tratt.; *Haemanthus multiflorus* Martyn; *Nerissa multiflorus* (Martyn) Salisb., nom. inval.)

Trop. & S. Africa. Erect, fleshy stout bulb geophyte, paired fleshy alternate simple leaves, leaf sheath and lower stem

spotted dark red-purple, crowded red flowers, yellow or purple anthers, fruit an orange to red berry

See *Species Plantarum* 1: 325. 1753, *Flora Telluriana* 4: 19. 1836 [1838] and *CIS Chromosome Information Service* 22: 9–11. 1977, *Proceedings of the Indian Science Congress Association* (III, C) 65: 106. 1978, *Cytologia* 45: 663–673. 1980, *Cytologia* 49: 497–500. 1984, *Journal of Ethnopharmacology* 21: 253–277. 1987, *Guihaia* 18(1): 32–34. 1998

(Bulbs reported as being very poisonous. The juice of *Haemanthus multiflorus* is supposed to produce dangerous swelling of the lips and tongue, salivation, nausea, vomiting and diarrhea. These alkaloids are highly toxic and their indiscriminate use is potentially lethal. Known to be lethal to stock, mainly goats and sheep, and the leaves appear to have exactly the same toxic effects as the bulb. Bulb used for cough and snakebite; pounded leaves for diarrhea and dysentery; roots powder for wounds, ulcers; boiled root infusion against child cough. Used in conjunction with a number of other plants, as an arrow poison, the bulbs are used to make a fishing poison; also used to treat dropsy, scabies and poorly healing wounds.)

in English: African blood lily, blood flowers, blood lily, fire-ball, powderpuff lily, snake lily

in Kenya: kipuwer, psirioch

in Tanzania: mbiba, mbibo, mkorosho, ndalakio

Scadoxus multiflorus (Martyn) Raf. subsp. ***multiflorus*** (*Haemanthus abyssinicus* Herb.; *Haemanthus andrei* De Wild.; *Haemanthus arabicus* M. Roem.; *Haemanthus arnoldianus* De Wild. & T. Durand; *Haemanthus bequaertii* De Wild.; *Haemanthus bivalvis* Beck; *Haemanthus ceciliae* Baker; *Haemanthus colchicifolius* Salisb.; *Haemanthus cruentatus* Schumach. & Thonn.; *Haemanthus delagoensis* Herb.; *Haemanthus eurysiphon* Harms; *Haemanthus filiflorus* Hiern ex Baker; *Haemanthus filiflorus* Baker ex Hiern; *Haemanthus kalbreyeri* Baker; *Haemanthus lynesii* Stapf; *Haemanthus micrantherus* Pax; *Haemanthus mildbraedii* Perkins; *Haemanthus multiflorus* Martyn; *Haemanthus nicholsonii* Baker; *Haemanthus otaviensis* Dinter; *Haemanthus rupestris* Baker; *Haemanthus sacculus* E. Cape Verde, Trop. & S. Africa. Bulb geophyte, stem green at top white at bottom with purple dots, lower stem spotted dark red-purple, flowers red, bracts membranous white with purple dots toward tips, fruits red

See *Species Plantarum* 1: 325. 1753, *Flora Telluriana* 4: 19. 1836 [1838] and *Bot. Mag.* 148: t. 8975. 1923, *Repert. Spec. Nov. Regni Veg.* 29: 258. 1931, *Fl. Pl. South Africa* 14: t. 531. 1934, *CIS Chromosome Information Service* 22: 9–11. 1977, *Proceedings of the Indian Science Congress Association* (III,

C) 65: 106. 1978, *Cytologia* 45: 663–673. 1980, Nordal, I. *Amaryllidaceae. Flora of Tropical East Africa*: 1–30. 1982, *Cytologia* 49: 497–500. 1984, *Guihaia* 18(1): 32–34. 1998

(These alkaloids are highly toxic and their indiscriminate use is potentially lethal. Known to be lethal to stock, mainly goats and sheep, and the leaves appear to have exactly the same toxic effects as the bulb.)

in Tanzania: esusu, ikurufi la mshitu, matendi, olekitulian

Scadoxus puniceus (L.) Friis & Nordal (*Gyaxis puniceus* (L.) Salisb., nom. inval.; *Haemanthus fax-imperii* Cufod.; *Haemanthus goetzei* Harms; *Haemanthus insignis* Hook.; *Haemanthus magnificus* Herb.; *Haemanthus natalensis* Hook.; *Haemanthus natalensis* Pappe ex Hook.; *Haemanthus orchidifolius* Salisb.; *Haemanthus puniceus* L.; *Haemanthus puniceus* var. *fortuita* Herb.; *Haemanthus puniceus* var. *magnificus* Herb.; *Haemanthus redouteanus* M. Roem.; *Haemanthus redouteanus* var. *subalbus* M. Roem.; *Haemanthus rouperi* auct.; *Haemanthus superbus* Baker)

Ethiopia to S. Africa. Bulbous, large underground bulbs, bulb geophyte, numerous fleshy roots, pseudostem (false stem) with red purple speckled scale leaves at the base, leaves glossy green with wavy margins, corollas and filaments bright red-orange, inflorescences borne within bracts, fruits fleshy round shiny red berries, ripe berries eaten by birds and monkeys

See *Species Plantarum* 1: 325. 1753, *Bot. Mag.* 67: t. 3870. 1841, *Fam. Nat. Syn. Monogr.* 4: 38. 1847 and *Bot. Jahrb. Syst.* 30: 276. 1901, *Miss. Biol. Borana, Racc. Bot., Angiosp.-Gymnosp.* 326. 1939, *Norwegian Journal of Botany* 21: 244. 1974, *Norwegian Journal of Botany* 23: 64. 1976, *Plant Systematics and Evolution* 135: 119–126. 1980, *J. Ethnopharmacol.* 2(4): 323–35. 1980 [Antineoplastic constituents of some Southern African plants: *Urginea capitata*, *Raphionacme hirsuta* and *Cheilanthes contracta*, *Haemanthus natalensis*, *Brunsvigia radulosa*, *Amaryllis belladonna*.], *Plant Systematics and Evolution* 135: 119–126. 1980, Nordal, I. *Amaryllidaceae. Flora of Tropical East Africa*: 1–30. 1982, Germishuizen, G. & Meyer, N.L. (eds.) *Plants of Southern Africa: An Annotated Checklist. Strelitzia* 14: i-vi, 1–1231. National Botanical Institute, Pretoria. 2003

(Poisonous, highly toxic, deaths have been reported following the ingestion of the bulb; leaves appear to have exactly the same toxic effects as the bulb. Has been used in African anticancer medicines; widely used in traditional medicine to treat coughs, chest complaints and gastro-intestinal problems, it has also traditionally been used as part of a medicine taken regularly during pregnancy to ensure a safe delivery. *Haemanthus natalensis* has been used in emetics. Extracts of these plants showed significant cytotoxicity in the KB cell culture test-system.)

in English: blood flower, blood lily, paintbrush, paintbrush lily, royal paintbrush, sore eye flower, snake lily, snake flower, april fool

in South Africa: bloedlelie, poeierkwas, rooikwas, seerogblom, skeerkwas; isisphompho, umgola, iDumbhi-lika-ntloyile (Zulu)

Scaevola L. Goodeniaceae

After the Roman hero C. Mucius Scaevola, whose surname means 'left handed', Latin *scaevus*, *a*, *um* 'left', referring to the left-handed twisting and to the incomplete appearance of the corolla; see C. Linnaeus, *Mantissa Plantarum*. 2: 145. 1771, *Systema Vegetabilium*. Editio decima tertia 178. 1774, *An Introduction to the Natural System of Botany* 189. 1830 and *Fl. Madagasc.* 188: 27–32. 1978, *Fl. Ecuador* 14: 175–178. 1981, Arthur D. Chapman, ed., *Australian Plant Name Index*. 2571–2579. Canberra 1991, *Fl. Pl. Africa* 57: 104–107. 2001.

Scaevola plumieri (L.) Vahl (*Cascabela ovata* (Cav.) Lippold; *Cerbera ovata* Cav.; *Cerbera ovata* Sieber ex A. in Tanzania: maua, mkangaula, mkungunolo, mtwatwa, mtondoro, muawa, nnjunju, sitobaga

in Zambia: mkusu, mungongo

Schisandra Michx. Schisandraceae (Magnoliaceae)

Greek *schisis* ‘partage, cleavage, curdling’ and *aner, andros* ‘man, stamen, male, seed’, referring to the anthers; see *Genera Plantarum* 280. 1789, *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803, *Regni Vegetabilis Systema Naturale* 2: 25. 1821 and Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 1035. Torino 1995.

Schisandra chinensis (Turcz.) Baill. (*Kadsura chinensis* Turcz.; *Maximowiczia chinensis* Ruprecht ex Maximowicz; *Maximowiczia chinensis* (Turcz.) Rupr.; *Schisandra chinensis* var. *typica* Nakai)

Korea, China. Woody climbing vine, twining, deciduous, soft wooded, leaves alternate, red globose juicy fruit with a salty taste, skin and pulp of the fruit sweet and sour, kernels pungent and bitter

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803, *Bulletin de la Société Impériale des Naturalistes de Moscou* 7: 149. 1837, *Bulletin de la Classe Physico-Mathématique de l’Académie Impériale des Sciences de Saint-Petersbourg sér. 2* 15: 124, 142. 1856, *Mémoires Présentés à l’Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 9: 31, t. 1. 1859, *Histoire des Plantes* 1: 148. 1868 and *Flora Sylvatica Koreana* 20: 105. 1933, *Botaničeskij Žurnal (Moscow & Leningrad)* 74: 1675–1678. 1989, *Journal of Wuhan Botanical Research* 11: 289–292. 1993

(Tea from the vine and fruits used as an antipyretic and against seasickness. Fruit used for seminal emissions, weakness, neurasthenia, night sweats; berry sedative, tonic for brain and strength, helps sleep.)

in English: Chinese magnolia vine, five flavours fruit, schisandra

in China: wu wei tzu, wu wei zi

in Japan: hure-hat, repnihat-punkar

Schisandra elongata Hook.f. & Thomson (*Schisandra elongata* Baill.)

Himalaya, Java.

See *Histoire des Plantes* 1: 148, f. 182. 1868, *Fl. Brit. India* [J.D. Hooker] 1: 44. 1872 [May 1872]

(Leaves and fruits crushed and the juice given to babies suffering from constipation and stomach disorders.)

in India: mesaw

Schisandra grandiflora (Wall.) Hook. f. & Thomson
(*Kadsura grandiflora* Wall.)

India, Himalaya. Climber, edible fruit

See *Tentamen Florae Nepalensis Illustratae* 10: 10, pl. 14. 1824, *The Flora of British India* 1(1): 44. 1872 and *Taxon* 29: 355–357. 1980

(Antiinflammatory.)

in China: da hua wu wei zi

Schisandra henryi C.B. Clarke

China.

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803 and *Gardener's chronicle*, ser. 3 38: 162, f. 55. 1905, *J. SouthW. Agric. Univ.* 22(2): 177–180. 2000

(Febrifuge.)

in China: yi geng wu wei zi

Schisandra henryi C.B. Clarke var. ***henryi*** (*Schisandra elongata* var. *longissima* Dunn; *Schisandra henryi* subsp. *marginalis* (A.C. Sm.) R.M.K. Saunders; *Schisandra henryi* var. *marginalis* A.C. Smith; *Schisandra hypoglaucula* H. Lév.)

China.

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803 and *Gardener's chronicle*, ser. 3 38: 162, f. 55. 1905, *Journal of the Linnean Society, Botany* 38(267): 354. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 459. 1911, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 7: 115, f. 19. 1947, *J. SouthW. Agric. Univ.* 22(2): 177–180. 2000

(Astringent, for diarrhea, skin diseases.)

in China: yi geng wu wei zi

Schisandra incarnata Stapf

China.

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803 and *Botanical Magazine* 152: t. 9146. 1928

(Astringent, for diarrhea, skin diseases.)

in China: xing shan wu wei zi

Schisandra neglecta A.C. Smith

China.

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803 and *Sargentia* 7: 127, f. 17g, f. 16. 1947

(Sedative, analgesic.)

in China: dian zang wu wei zi

Schisandra sphenanthera Rehder & E.H. Wilson

China. Woody twining vine, climber, immature fruit light green

See *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803 and *Plantae Wilsonianae* 1(3): 414–416. 1913, *J. Jilin Agric. Univ.* 18(4): 40–44. 1996, *J. SouthW. Agric. Univ.* 22(2): 177–180. 2000

(Fruit used for seminal emissions, weakness, neurasthenia.)

in English: orange magnolia vine

in China: hua zhong wu wei zi

Schismatoglottis Zoll. & Moritzi Araceae

From the Greek *schisma*, *schismatos* ‘division, cleft, schism’ and *glotta* ‘tongue’; see D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Schismatoglottis calyptrata (Roxburgh) Zollinger & Morales (*Calla calyptrata* Roxburgh; *Schismatoglottis longipes* Miquel; *Schismatoglottis riparia* Schott; *Zantedeschia calyptrata* Koch)

China.

(Stems tonic, to treat lumbago and arthralgia.)

in China: guang xi luo yan

Schizachne Hackel Poaceae (Gramineae)

Greek *schizo*, *schizein* ‘to split, divide’ and *achne* ‘chaff, glume’, related to *Triniochloa*, resembles *Melica*, type *Schizachne fauriei* Hack., see *Species Plantarum* 1: 66, 79. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 322–323. 1909, *Journal of the Washington Academy of Sciences* 18(8): 203–206. 1928, *Madroño* 7(5): 129–130. 1944, *Grasses: Systematics and Evolution* 61–74. 2000, *Contributions from the United States National Herbarium* 48: 607–608. 2003, William A. Weber, “The Middle Asian element in the Southern Rocky Mountain Flora of the western United States: a critical biogeographical review.” *Journal of Biogeography* 30(5): 649–685. May 2003.

Schizachne purpurascens (Torr.) Swallen (*Avena callosa* Turcz. ex Griseb.; *Avena purpurascens* DC.; *Avena striata* Michx., nom. illeg., non *Avena striata* Lam.; *Avena striata* f. *albicans* Fernald; *Avena torreyi* Nash; *Bromelica striata* (Hitc.) Farw.; *Melica callosa* (Turcz. ex Griseb.) Ohwi; *Melica purpurascens* (Torr.) Hitchc.; *Melica striata* Hitchc.; *Melica striata* f. *albicans* (Fernald) Fernald; *Schizachne callosa* (Turcz. ex Griseb.) Ohwi; *Schizachne fauriei* Hack.; *Schizachne purpurascens* f. *albicans* (Fernald) Fernald; *Schizachne purpurascens* f. *purpurascens*; *Schizachne purpurascens* subsp. *callosa* (Turcz. ex Griseb.) Kitag.; *Schizachne purpurascens* var. *pubescens* Dore; *Schizachne striata* (Hitc.) Hultén; *Trisetum purpurascens* Torr.)

Northern America. Perennial, herbaceous, unbranched, tufted, shortly rhizomatous

See *Encyclopédie Méthodique, Botanique* 1: 332. 1783, *Flora Boreali-Americana* 1: 73. 1803, *Catalogus plantarum horti botanici monspeliensis* 82. 1813, *A Flora of the Northern and Middle Sections of the United States* 1: 127. 1823, *Flora Rossica* 4(13): 416. 1852 and *Rhodora* 7(83): 244. 1905, *Rhodora* 8(95): 211. 1906, *Contributions from the United States National Herbarium* 12(3): 156. 1908, *Rhodora* 10(111): 47. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 323. 1909, *An Illustrated Flora of the Northern United States* 1: 219. 1913, *Rhodora* 21: 77. 1919, *Journal of the Washington Academy of Sciences* 18: 204, f. 1. 1928, *Botanical Magazine (Tokyo)* 45: 195. 1931, *Acta Phytotaxonomica et Geobotanica* 2(4): 279. 1933, *Svensk Botanisk Tidskrift* 30: 518. 1936, *Rhodora* 44(520): 139. 1942, *Canadian Journal of Botany* 42: 862. 1964, *Zlaci SSSR* 546–547. 1976, *Le Naturaliste Canadien* 103(6): 563. 1976, *Phytologia* 43(1): 106. 1979, *Neo-Lineamenta Florae Manshuricae* 109. 1979, *Bot. Zhurn. SSSR* 70(1): 126–128. 1985

(Poultice for headache, stomachache, febrifuge.)

Schizachyrium Nees Poaceae (Gramineae)

From the Greek *schizo*, *schizein* ‘to split, divide’ and *achyron* ‘chaff, husk’, alluding to the glume or referring to the toothed lemma; confusions in taxonomy and nomenclature, very closely related to *Andropogon*, type *Schizachyrium brevifolium* (Sw.) Nees ex Büse, see *Species Plantarum* 2: 1045, 1049. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Annalen der Botanick. ed. Usteri* 18: 11. 1796, *Essai d'une Nouvelle Agrostographie* 43. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 331–332. 1829, *Rel. Haenk.* 1: 331. 1830, *Genera plantarum* ed. 9, 1: 55. 1830, *Révision des Graminées* 2: 571. 1832, *Plantae Junghuhnianae* 3: 359. 1854, *Fl. Ned. Ind.* 3: 495. 1857, *Flora Australiensis: a description ...* 7: 535. 1878, *Genera Plantarum* 3(2): 1127. 1883 and *Flora of Tropical Africa* 9: 182–183. 1917, *Flora of the Netherlands Antilles* 1: 121–203. 1963, *Bulletin du Jardin Botanique de l'État* 33: 400. 1963, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 447–508. 1969, *Kew Bulletin* 39(1): 169–178. 1984, *Genera Graminum* 352–353. 1986, *Flora Mesoamericana* 6: 391–393. 1994, *Flora of Ethiopia and Eritrea* 7: 317–319. 1995, *Gramíneas de Bolivia* 600–605. 1998, *Am. in English: New Mexico bluestem

Schizaea J.E. Smith Schizaeaceae

Greek *schizo* ‘to split, divide’, referring to the lobes; see J.E. Smith, in *Mémoires de l’Académie Royale de Sciences de Turin*. 5: 419, t. 9, fig. 9. Turin 1793 and *Bol. Soc. Brot. sér.* 2, 21: 119–120. 1948, *Fl. Madagasc.* 8: 1–12. 1952, *Quart. J. Taiwan Mus.* 16: 125–142. 1963, *Rech. Développem. Sér. Sci. Biol.* 15: 23–42. 1999

Schizaea dichotoma (L.) Smith (*Acrostichum dichotomum* L.; *Osmunda dichotoma* Spreng.; *Ripidium dichotomum* (Forssk.) Bernh.; *Schizaea cristata* Willd.; *Schizaea dichotoma* (L.) Sw.; *Schizaea forsteri* Spreng.)

India.

See *Species Plantarum* 2: 1068. 1753, *Mémoires de l’Académie des Sciences de Turin* 5: 422, t. 9, f. 9. 1793, *Journal für die Botanik* 268. 1799, *Journal für die Botanik* 1800(2): 127, t. 2, f. 3. 1801, *Anleitung zur Kenntniss der Gewächse* 157. 1804,

Synopsis Filicum 150–151. 1806, *Species Plantarum*. Editio quarta [Willdenow] 5: 88. 1810

(The rhizome a remedy for cough and other complaints of throat, also a postpartum remedy.)

in English: branched comb-fern

Schizaea digitata (L.) Sw. (*Acrostichum digitatum* L.; *Actinostachys boninensis* Nakai; *Actinostachys digitata* (L.) Wall.; *Actinostachys digitata* (L.) Wall. ex J. Sm.; *Actinostachys digitata* var. *boninensis* (Nakai) Tagawa; *Belvisia digitata* (L.) Mirb.; *Schizaea boninensis* (Nakai) H. Ohba; *Schizaea digitata* (L.) Sw.)

China, Indonesia.

See *Species Plantarum* 2: 1068. 1753, *Histoire Naturelle des Végétaux*, Classés par Familles 5: 473. 1802, *Synopsis Filicum* (Swartz) 150, 380, t. 4 f. 1. 1806, *A Numerical List of Dried Specimens* [Wallich] n. 1. 1828, *London Journal of Botany* 2: 285. 1843 and *Journal of Japanese Botany* 13: 140, f. 2. 1937, *Journal of Japanese Botany* 30: 280. 1955, *Science Reports of the Tôhoku Imperial University*, Ser. 4, *Biology* 36: 85. 1971, *Indian Fern J.* 9: 94–101. 1992

(Warmed leaves applied as antifungal, for athlete’s foot.)

Malay name: daun tarai

Schizocapsa Hance Taccaceae (Dioscoreaceae)

Greek *schizo* ‘to split, divide’ and Latin *capsa*, *ae* ‘box, case’, see *Journal of Botany, British and Foreign* 19(226): 292–293. 1881.

Schizocapsa guangxiensis P.P. Ling & C.T. Ting

China.

See *Acta Phytotax. Sin.* 20: 202. 1982, Ling Ping-ping. *Taccaceae*. In: Pei Chien & Ting Chih-tsun, eds., *Fl. Reipubl. Popularis Sin.* 16(1): 42–54. 1985

(For skin diseases, astringent.)

in China: guang xi lie guo shu

Schizocapsa plantaginea Hance (*Tacca plantaginea* (Hance) Drenth.)

China.

See *J. Bot.* 19: 292. 1881

(Antiinflammatory.)

in China: lie guo shu

Schizocarphus J.J.M. v.d. Merwe Asparagaceae (Hyacinthaceae, Liliaceae)

From the Greek *schizo*, *schizein* ‘to split, divide’ and *karphos* ‘chip of straw, chip of wood’.

Schizocarpus nervosus (Burch.) van der Merwe (*Drimia dregeana* Kunth; *Ornithogalum nervosum* Burch.; *Schizocarpus acerosus* (van der Merwe) van der Merwe; *Schizocarpus gerrardii* (Baker) van der Merwe; *Schizocarpus hispidulus* (Baker) Speta; *Schizocarpus rigidifolius* (Kunth) van der Merwe; *Schizocarpus setiferus* (Baker) Speta; *Scilla bakeriana* Poelln.; *Scilla eriospermoides* Engl. & Gilg; *Scilla gerrardii* Baker; *Scilla hispidula* Baker; *Scilla nervosa* (Burch.) J.P. Jessop; *Scilla pallidiflora* Baker; *Scilla pubescens* Baker; *Scilla rigidifolia* Kunth; *Scilla rigidifolia* var. *gerrardii* (Baker) Baker; *Scilla rigidifolia* var. *nervosa* (Burch.) Baker; *Scilla rigidifolia* var. *nervosa* van der Merwe, nom. illeg.; *Scilla setifera* Baker; *Scilla versicolor* Baker, nom. illeg.)

Tanzania to S. Africa.

See *Trav. S. Africa* 1: 537. 1822, *Enum. Pl.* 4: 330, 340. 1843, *Refug. Bot.* 3: t. 179. 1870, *Refug. Bot.* 5: t. 305. 1871, *J. Linn. Soc., Bot.* 13: 237, 242. 1873, *Trans. Linn. Soc. London, Bot.* 1: 248. 1878, *Fl. Trop. Afr.* 7: 549. 1898 and *Kunene-Sambesi Exped.* 195. 1903, *Fl. Pl. S. Africa* 21: t. 821. 1941, *Fl. Pl. South Africa* 23: t. 904–906. 1943, *Ber. Deutsch. Bot. Ges.* 61: 209. 1944, *J. S. African Bot.* 36: 243. 1970, *Phyton (Horn)* 38: 120. 1998, *Pure and Applied Chemistry* 73: 1197–1208. 2001

(Very poisonous. Bulb for rheumatism, used to treat pains associated with rheumatic fever and as purges for children, alleged to enhance female fertility and to treat infections, antitumor activity.)

in English: sand lily, scilla, wild squill

in Southern Africa: sand lelie; ditsonya (Tswana); inGcolo, inGcino

Schizocasia Schott Araceae

Greek *schizo* ‘to split, divide’ plus the genus *Colocasia* Schott.

Schizocasia portei Schott (*Alocasia portei* Schott; *Alocasia portei* Becc. & Engl.)

Tropical Africa.

See *Bonplandia* 10: 148. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 185. 30 Jul 1880 [1881]

(Irritant juice.)

Schizoglossum E. Meyer

Asclepiadaceae (Apocynaceae)

From the Greek *schizo* ‘to split, divide’ and *glossa* ‘tongue’, referring to the corolla.

Schizoglossum cordifolium E. Mey. (*Cynanchum cordifolium* (E. Mey.) D. Dietr.; *Cynanchum cordifolium* Retz.;

Cynanchum cordifolium D. Dietr.; *Schizoglossum aemulum* Schltr.; *Schizoglossum atropurpureum* E. Mey. var. *lineatum* Schltr.; *Schizoglossum cordifolium* E. Mey. var. *centralis* N.E. Br.; *Schizoglossum divaricatum* N.E. Br.; *Schizoglossum hirsutum* Turcz.)

Schizonepeta (Benth.) Briq. Lamiaceae (Labiatae)

Greek *schizo* ‘to split, divide’ plus the genus *Nepeta* L.

Schizonepeta tenuifolia (Benth.) Briq. (*Glechoma tenuifolia* (Benth.) Kuntze; *Nepeta tenuifolia* Benth.)

China, Temp. E. Asia. Annual herb, aromatic, pubescent, erect, quadrangular, upper part branching, leaves opposite, many compact whorls of cymes, calyx campanulate, pink bilabiate corolla, glossy nutlets

See *Labiata. Gen. Spec.*: 468. 1834, *Revis. Gen. Pl.* 2: 519. 1891, *Die Natürlichen Pflanzenfamilien* IV. 3a: 235. 1895 and *Acta Phytotaxonomica Sinica* 22: 243–249. 1984

(Whole plant or inflorescences used for common cold, scabies, sore throat, fever, headache.)

in English: fine-leaved schizonepeta, Japanese catnip

in China: jingjie, jing jie

Schizostachyum Nees Poaceae (Gramineae)

From the Greek *schizo*, *schizein* ‘to split, divide’ and *stachys* ‘spike, ear of corn’, alluding to spacing of spikelets, type *Schizostachyum blumei* Nees, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1820 [1821], *Agrostologia Brasiliensis* 534–535. 1829 [or *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia... Stuttgartiae et Tubingae* 1829–1833], *Pl. Ind. Bat. Or.* 116: 1857, *Transactions of the Linnean Society of London* 26(1): 126, 138–139, 141–143, t. 3, 4. 1868 and *Bulletin du Muséum National d’Histoire Naturelle* 28(1): 100–101. 1922, *The Indian Forester* 59: 707. 1933, *J. Wash. Acad. Sci.* 24: 541–548. 1934, *Lingnan Science Journal* 14: 567–602. 1935, *Blumea* 2: 86–97. 1936, *Bulletin de la Société Linnéenne de Lyon* 9: 185–188. 1945, *Fieldiana, Botany* 24(2): 38–331. 1955, *Taxon* 6(7): 201, 206, 209. 1957, *Gard. Bull. Singapore* 16: 31. 1958, *Acta Phytotaxonomica Sinica* 19(2): 212–214, pl. 7. 1981, *Kew Bulletin* 38(2): 321–331. 1983, *Grass Systematics and Evolution* 225–238. 1987, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 272–283. Calcutta 1989, *Journal of Tropical and Subtropical Botany* 1(1): 5. 1993, *Plant Resources of South-East Asia (PROSEA)* (Pl Res SEAs) Vol. 7: 130–145, 153–154. 1995 [Bamboos], *Reinwardtia* 11(2): 57–152. 1997, *Contributions from the United States National Herbarium* 39: 36, 68, 112. 2000.

Schizostachyum dielsianum (Pilger) Merr. (*Dinochloa dielsiana* Pilg.)

SE Asia. Sprawling, scandent, widely branched, linear leaves with rounded base, inflorescence with slender branches, growing in thickets and forests at low altitude

See *Fragmenta Florae Philippinae* 2: 148. 1904, *Philippine Journal of Science* 1(Suppl.): 391. 1906

(Medicinal, tonic, a refreshing stimulant beverage from a decoction of the rhizomes.)

in the Philippine Isl.: bikal baboy, bikal boboi

Schizostachyum glaucifolium (Rupr.) Munro (*Bambusa glaucifolia* Rupr.)

Pacific, Hawaii. Perennial, subshrub to shrub, used for construction of walls, canals to transport water, fencing, containers for liquids

See *Genera Plantarum* 1: 236. 1789, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 535. 1829, *Bambuseae* 57. 1839, *Transactions of the Linnean Society of London* 26(1): 123, 137. 1868 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 100–101. 1922, *The Indian Forester* 59: 707. 1933, *J. Wash. Acad. Sci.* 24: 541–548. 1934, *Lingnan Science Journal* 14: 567–602. 1935, *Blumea* 2: 86–97. 1936, *Bulletin de la Société Linnéenne de Lyon* 9: 185–188. 1945, *Fieldiana, Botany* 24(2): 38–331. 1955, *Taxon* 6(7): 201, 206, 209. 1957, *Gard. Bull. Singapore* 16: 31. 1958, *Acta Phytotaxonomica Sinica* 19(2): 212–214, pl. 7. 1981, *Kew Bulletin* 38(2): 321–331. 1983, *Grass Systematics and Evolution* 225–238. 1987, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 272–283. Calcutta 1989, *Journal of Tropical and Subtropical Botany* 1(1): 5. 1993, *Plant Resources of South-East Asia (PROSEA)* 7: 130–145, 153–154. 1995 [Bamboos], *Reinwardtia* 11(2): 57–152. 1997, *Contributions from the United States National Herbarium* 39: 36, 68, 112. 2000

(For kidney trouble. Ceremonial, sacred uses.)

in English: Polynesian 'ohe

Malay name: buloh

in Hawaii: 'ohe

in Pacific: 'ofe, 'ofe para, 'ofe tea, 'ofe 'ura, 'ohe

Schizostachyum latifolium Gamble (*Cephalostachyum fuchsianum* Gamble; *Cephalostachyum latifolium* Munro; *Melocanna zollingeri* var. *longispiculata* Kurz ex Munro; *Ochlandra ridleyi* Gamble; *Schizostachyum latifolium* (Munro) Majumdar, nom. illeg., non *Schizostachyum latifolium* Gamble; *Schizostachyum latifolium* (Gamble) Majumdar; *Schizostachyum longispiculatum* Kurz; *Schizostachyum longispiculatum* sensu Holttum, non Kurz; *Schizostachyum longispiculatum* (Kurz ex Munro) Kurz sensu Holttum; *Schizostachyum ridleyi* (Gamble) Holttum)

India, Peninsular Malaysia, Sabah, Indonesia, Borneo. Shrubby, sympodial, tufted, open, scrambling, erect or somewhat erect with long arching tips, slender drooping culm tips,

nodes not swollen, manifold branching, culm sheath long persistent, sheath auricles bristly, blades of culm sheaths ovate-lanceolate and deflexed or spreading, leaves glabrous ovate or ovate-lanceolate and narrowed into a short petiole, leaf sheaths ciliate, long pseudospikelets in clusters at the distal nodes of basally leafy branches, slender spikelets one-flowered with a rachilla extension bearing a vestigial floret, lemma hairy, palea 2-tipped, 3–10 lodicules or exceptionally only one, 6 stamens, 2–3 plumose stigmas, young stalks boiled or baked and eaten as a vegetable, cultivated and wild, culms used in basketry (*seraung*) and for making blow pipes, mats and woven objects, common in tropical lowlands, along roadsides, wastelands, along rivers, at forest edges and riversides streams, secondary forest, disturbed situations, taxonomic difficulties in delimiting this species, often confused with *Schizostachyum blumei* Nees

See *Enumeratio Plantarum Zeylaniae* 376. 1864, *Transactions of the Linnean Society of London* 26(1): 134. 1868, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 39(2): 89, t. 6, f. 1. 1870, *Annals of the Royal Botanic Garden, Calcutta*. 7: 107, 117, 127, t. 94. 1896 and *Gardens' Bulletin, Straits Settlements* 11(4): 296. 1947, *Gard. Bull. Sing.* 16: 48–49. 1958 (as *longispiculatum*), *Kew Bulletin* 38(2): 331. 1983, *Fl. Ind. Enumerat.-Monocot.* 281. 1989

(Veterinary medicine, leaves heated and dried over fire and applied into dog's wounds infested with maggots.)

in English: true bamboo

in Brunei: buluh lacau, buluh lachau, buluh lakaw

in Indonesia: bulo lan, buluh suling

in Malaysia: buloh engkalad, buloh pelupu, buloh pisa, pelupu

in Singapore: buloh kasip

Schizostachyum polymorphum (Munro) Majumdar (*Pseudostachyum polymorphum* Munro)

India, Assam, Meghalaya, Arunachal Pradesh, Sikkim, Myanmar. Shrubby, single culm, flexible, scandent, leaning, solitary, thick-walled, long creeping and jointed rhizome, culm sheaths smaller than the internodes, leaves oblong-lanceolate and rounded at the base into a short petiole, leaf sheaths white-pubescent, large inflorescence paniculate curved, spikelets one-flowered, one glume, paleas 2-keeled and ciliate, 3–5 lodicules, 6 stamens, 2 hairy stigmas, the species flowers frequently, culms can be easily split and are flexible, used for basketry and mat making, toys, occurs in moist areas

See *Transactions of the Linnean Society of London* 26(1): 142, t. 4. 1868 and *Fl. Ind. Enumerat.-Monocot.* 282. 1989, *Edin. J. Bot.* 51: 30. 1994

(In Myanmar used by wizards and priests who roast the stem and then prophesy.)

in India: bajal, filing, nal, paphak, parphok, pheling, purphioik, serrah, silloh, tolli, wachal, wachall

in the Philippine Isl.: bayto

Schizogygia Baillon Apocynaceae

From the Greek *schizo*, *schizein* 'to split, to divide' and *zygon*, *zygos* 'yoke', see *Naturl. Pflanzenfam.* iv. 2 (1895) 146. 1895.

Schizogygia coffaeoides Baill.

Somalia to Angola, Comoros. Evergreen shrub, small tree, many-branched, milky white latex, corolla pale yellow to cream-white, filaments green, fruits dehiscent and paired red when ripe, seed with red aril, timber tree used for boat making, on stream bank, riverine forest

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 752. 1888 and *Genetica* 68: 3–35. 1985

(Fruits are said to be very poisonous. Root and bark used for skin diseases. Roots astringent, for dysentery, sores.)

in East Africa: kibarubaru, kinawinghongoli, mbaika, mbango, mkururu, mpelepele, mwango, nednia-denia

in Tanzania: mcheji

Schkuhria A.W. Roth Asteraceae (Compositae)

After the German botanist Christian Schkuhr, 1741–1811, his writings include *Botanisches Handbuch*. Wittenberg [1787–] 1791–1803 and *Enchiridion botanicum*. Lipsiae [Leipzig] 1805. See *Methodus* (Moench) 566. 1794, Albrecht Wilhelm Roth (1757–1834), *Catalecta botanica*. 1: 116. Lipsiae 1797, *Dict. Sc. Nat.* xlix. 115. 1827, Gustav Kunze (1793–1851), *Die Farrnkräuter in kolorirten Abbildungen naturgetreu erläutert und beschrieben ... Schkuhr's Farrnkräuter*, Supplement. Leipzig 1840–1847, *American Naturalist* 8(4): 213. 1874, *Synoptical Flora of North America* 1(2): 332. 1884 and *Bulletin of the Torrey Botanical Club* 33(3): 154. 1906, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 679. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 228. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 353. 1972, *Fieldiana, Bot.* 24(12): 361–386, 571–580. 1976, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 249. 1988, R. (Insecticide, repellent.)

in English: dwarf marigold, dwarf Mexican marigold, khaki bush, yellow tumbleweed

in Ecuador: escoba de castillo

in East Africa: onyalobiro

in Southern Africa: bitterbossie, bokrambossie, dwerggoudsblom, hardebossie, kakiebossie, klei-gousblom, kleinkakiebos, kousbossie, rolbossie, rolkakiebossie, waai-bossie; letapiso (Sotho)

Schleichera Willdenow Sapindaceae

In honor of the German botanist Johann Christoph Schleicher, 1768–1834, author of *Catalogus plantarum in Helvetia*

cis- et transalpina sponte nascentium. Bex [1800]; see Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, Carl (Karl) L. von Willdenow (1765–1812), *Species Plantarum*. Ed. 4 [Willdenow] (4): 892, 1096. 1806 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 239. 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 229. 1965, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Schleichera oleosa (Lour.) Oken (*Cussambium oleosum* O. Kuntze; *Pistacia oleosa* Lour.; *Schleichera oleosa* (Lour.) Merr.; *Schleichera oleosa* Merr.; *Schleichera trijuga* Willd.; *Schleichera trijuga* Moritzi)

India. Tree, dioecious, crooked, leaves pinnate, leaflets papery to coriaceous, pale yellow or pale green flowers in panicles, pointed fruits, ripe fruits eaten, fleshy aril of the ripe fruits eaten, seed oil edible, young twigs edible, fodder, used for rearing insects and producing lacs, in dry deciduous forests

See *Species Plantarum* 2: 1025–1026. 1753, *Species Plantarum*. Editio quarta 4: 1096. 1806, *Allgemeine Naturgeschichte* 3(2): 1341. 1841 and *Interpr. Rumph. Herb. Amboin*. 337. 1917, *Journ. Arn. Arb.* xxxi. 284. 1950, *Lipids* 6(5): 349–350. 1971, *Taxon* 31: 576–579. 1982, *Journal of Cytology and Genetics* 19: 115–117. 1984

(Used in Ayurveda and Sidha. Cyanogenetic, cyanolipids from the seeds; when swallowed in empty stomach shows the symptoms of irritation, vertigo and dilation of pupils. Seed oil applied to burns, skin rashes, wounds, rheumatism, bodyache, scabies and skin diseases. Fruit decoction tonic. Leaves grain pest repellent. Bark astringent used against skin inflammations and ulcers, a bark infusion taken against malaria; pounded bark in water useful in acute diarrhea; stem bark paste mixed with palm jaggery given orally for inducing abortion till the third month of pregnancy, reputed that repeated usage brings sterility; bark paste applied to cure fractured bone and bark juice taken orally for the same purpose; stem bark along with that of *Commiphora caudata* boiled in water and decoction given for dropsy; bark poultice on sprains; bark pounded with leaves of *Lawsonia inermis* and applied as poultice on sprains; powdered bark in rheumatism. Powdered bark, mixed with lime, red-stone (*giru*) and *haldi* (*Curcuma domestica*), applied on sprained ankle. Small pieces of heartwood kept in water and water taken for diabetes. Veterinary medicine, seed paste used to kill worms; seed oil for curing sores, applied on wounds of cattle to kill worms, maggots; powdered fruits filled in wounds to kill maggots. Stem bark, seeds and crushed fruits as fish poison.)

in English: Ceylon oak, gum-lac tree, honey tree, kussum oil, lac tree, Macassar oil tree

in Cambodia: pongro

in India: akota, arakku, baru-ja, botanga, bushi chettu, busi, calakkam, chagate, chakota, chendaala, chendala, cottilai, ghanaskanda, hulimaaya, hulunaai, jagadi mara, jendalacekota, kaakuta, kakuta, kalma matha, kancivat-iccan, kasimb, kausum, kendaale, kendala, khatamba (khat, sour, amba, mango), kodalipulusu, kohan, kolama, konci, kosam, kosamb, kosamra, koshimb, kosimb, kosum, kosumb, kosumdi, kshimb, ksudramra, kumpatiri, kusum, kusum beeja, kusum phal, kusumb, kusumo, kutiraimacali, laksavrksa, laksavrksah, maavithavitiki, maayirothanga, madakapulusu, madakapusu, mavidavitiki, mirukakkottai, mukulakah, nittiyavanci, paarparthi, poosuga, poovam, poovan, poovanam, poovath, posuku, pulacci, puliccai, pulisari, pullakaaya, pumaram, pumarata, pusi, pusuku putiki, puvam, puvatti, puvattipuvam, raktamrah, roatanga, saagadeposuku, sagade, sagadi mara, sagadipusuku, sati-kukati

in Indonesia: kasambi, kesambi, kosambi

in Laos: dok phen

in Malaysia: kusambi

in Nepal: kusun Thailand: machok, takhro

in Vietnam: c[aa]y van rao, c[oj] ph[ef]n, pongro

(Tubers diuretic.)

Schoepfia Schreber Olacaceae (Schoepfiaceae)

Probably named for the German botanist Johann David Schoepf (Schöpf, Schoepff), 1752–1800, naturalist and physician, M.D. Erlangen 1776, from 1777 to 1783 army physician (as a field surgeon to the Hessian mercenaries) in the English Army during the American War of Liberation, traveller, in 1795 and 1797 President of the medical councils of Ansbach and Bayreuth, his writings include *Materia medica americana* potissimum regni vegetabilis. [8vo, first edition.] Erlangae [Erlangen] 1787, *Beyträge zur mineralogischen Kenntniss des östlichen Theils von Nordamerica und seiner Gebürge*. Erlangen 1787, *Reise durch einige der mittlern und südlichen Vereinigten nordamerikanischen Staaten nach Ost-Florida und den Bahama-Inseln unternommen in den Jahren 1783 und 1784 ...* Erlangen 1788 and Joannis Davidis Schoepff *Historia Testudinum iconibus illustrata*. Erlangae 1792 [–1802]; see *Genera Plantarum* 1: 129. 1789, *Systema Naturae ...* editio decima tertia, aucta, reformata 2(1): 376. 1791, *Skifter af Naturhistorie-Selskabet* 2(1): 206, t. 6. 1792, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, *Florae Peruvianae, et Chilensis Prodrromus* 3: 8, t. 231a. 1802, *Travels in Brazil*. Barnhart, *Biographical Notes upon Botanists*. 3: 237. 1965, *Biotropica* 11: 140–143. 1979, *Blumea* 26(1): 162. 1980, *Fl. Neotrop.* 38: 1–159. 1984, *Fl. Veracruz* 93: 1–15. 1996.

Schoepfia chrysophylloides (A. Rich.) Planch. (*Codonium chrysophylloides* (A. Rich.) Tiegh.; *Diplocalyx chrysophylloides* A. Rich.; *Schoepfia schreberi* J.F. Gmel.)

Tropics. Unarmed trees, root-parasites, alternate ex-stipulate pointed leaves, petals fused, clusters of orange-tinted flowers in complex lateral clusters in the axils of leaves, red to black fleshy drupes

See *Systema Naturae ...* editio decima tertia, aucta, reformata 2(1): 376. 1791, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 11: 81–82, pl. 54. 1853, *Annales des Sciences Naturelles; Botanique*, série 4 2(5): 261. 1854, *Bulletin de la Société Botanique de France* 43: 552. 1896

(Cytotoxic.)

Schotia Jacq. Fabaceae (Caesalpiniaaceae, Detarieae)

After the Dutch traveller and naturalist Richard van der Schot, c. 1730–1819, born in Holland from French parents, head gardener at the palace of Schönbrunn near Vienna, pupil of Jussieu, friend and travelling companion (between 1754–1756) of the Dutch born Austrian botanist Nicolaus (Nicolaas or Nikolaus) Joseph von Jacquin (1727–1817).

Schotia brachypetala Sond. (*Schotia brachypetala* Sond. var. *pubescens* Burttt Davy; *Schotia latifolia* sensu Dale; *Schotia rogersii* Burttt Davy; *Schotia semireducta* Merxm.)

Mozambique, South Africa. Perennial non-climbing tree, perianth bright red

See *Linnaea* 23: 39. 1850 and *Fl. Pl. S. Africa* 20: t. 777. 1940 (Roots used for dysentery and diarrhea.)

in English: African walnut, fuchsia-tree, tree-fuchsia

in Southern Africa: huilboerboon, weeping boer-bean, weeping boerboon; muSamba, muTondochuru, muTondozwi (Shona); umGxamu, uVovovo, iHluze (Zulu); umGxam, iShimnumyane (Xhosa); uVovovo (Swazi); n'wavilombe (Eastern Transvaal); molohe (North Sotho: North and north east Transvaal); mununzwa (Venda)

Schoutenia Korth. Tiliaceae (Malvaceae)

Dedicated to the Dutch navigator Willem Corneliszoon Schouten, 1567?–1625 (Antongil Bay, Madagascar), explorer, in 1615–1616 captained the ship *Eendracht* (Unity, or Concord), discovered the Capo Horn route (Dutch: Kaap Hoorn) and islands in the Tuamotu archipelago, discovered the Drake Passage (through the Le Maire Strait between Tierra Del Fuego and Staten Island and into the Pacific), around the southern tip of South America, connecting the Atlantic Ocean with the Pacific, in October 1616 reached Batavia and Java, wrote *Journal ou Description du Merveilleux Voyage de Guillaume Schouten*. Amsterdam 1618. See Alexander Dalrymple (1737–1808), *An account of the Discoveries made in the South Pacifick Ocean previous to 1764*. London 1767 and *An Historical Collection of the Several Voyages and Discoveries in the South Pacific Ocean*. London 1770–1771, John Callander, *Terra Australis Cognita*; or, *Voyages to the Terra Australis, or Southern Hemisphere, during the sixteenth, seventeenth, and eighteenth centuries*. [A translation, with additions, of the *Histoire des navigations aux terres australes* of Charles de Brosses, Count de Tournay. Paris 1756, the most important general histories of early voyages to the Pacific, from 1502 through 1747] Edinburgh 1766–1768, Pieter Willem Korthals (1807–1892), in *Nederlandsch kruidkundig Archief*. 1: 312. Amsterdam 1848, R. Major, *Early Voyages to Terra Australis*. London 1859, *Flore Forestière de la Cochinchine* sub t. 135. 1888 and John M. Cooper, *Analytical and Critical Bibliography of the*

Tribes of Tierra del Fuego and Adjacent Territory. Bureau of American Ethnology (Smithsonian) Bulletins [relating to the native people of North and South America]. Bull. #63. 1917, *Beih. Bot. Centralbl.* xxxix. 11. 162. 1921, W.A. Engelbrecht and P.J. Van Herweden, *De Ontdekkingsreis van Jacob Le Maire en Willem Cornelisz Schouten in de jaren 1615–1617*. The Hague 1945.

Schoutenia accrescens (Mast.) Merr. (*Schoutenia accrescens* Korth.)

Malaysia. Tree, crown coppery, bole deeply fluted, alternate leaves trinerved at base, flowers in terminal and axillary racemes, large membranous calyx bell-shaped, globular capsule with enlarged persistent papery calyx

See *Journ. Straits Br. Roy. As. Soc.*, Spec. No., 373. 1921

(Bark for stomachache, antiseptic.)

in Malaysia: bayur bukit

Schrebera Roxburgh Oleaceae

The genus was named after the German botanist and zoologist Johann Christian Daniel von Schreber, 1739–1810, author of *De Phasco observationes*, quibus hoc genus muscorum vindicatur atque illustratur ... Cum tabulis aeri incis. Lipsiae 1770 and *Theses medicae*, quas ... praeside ... Carolo Linnaeo ... publico submittet examini Jo. Christ. Dan. Schreber ... ad diem xiv junii anni mdclx ... Upsaliae 1760; see *Plants of the Coast of Coromandel* 2: 1, t. 101. 1799, *Iconographia Familiarum Naturalium Regni Vegetabilis* 2: sub t. 151. 1857–1870 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 240. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 355. 1972, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 251. 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 777. 1993.

Schrebera alata (Hochst.) Welw. (*Nathusia alata* Hochst; *Schrebera argyrotricha* Gilg; *Schrebera gilgiana* Lingelsh.; *Schrebera latialata* Gilg; *Schrebera mazoensis* S. Moore; *Schrebera saundersiae* Harv.)

East Africa. Tree, pale grey bark, wood hard and heavy, leaf stalk winged, sweet scented flowers on short branches, yellow stamens, papery winged seeds, in open woodland, dry forest

See *Flora* 24(1, Intell.): 25. 1841, *Transactions of the Linnean Society of London, Botany* 27: 39. 1869

(Chewed bark or twigs for toothache; chewed leaves applied to cuts as a pain killer.)

in English: bushveld tree-jasmine, forest tree-jasmine, schrebera, wild jasmine, wing-leaved wooden pear, wing-leaved wooden-pear

in East Africa: lamaiyat, mutoma, ol-embenek-uni

in Southern Africa: sandjasmyn, wildejasmyn; muTisi (Shona); umGwenyahlungulu, umGwenyahlungula, isiHlulamanye, umSishane wehlanze, Loziphungwane, umTshwatshwala (Zulu); sEhlulamanye (Swazi); mokauke (Tawana dialect, Ngamiland); mokauke (Subya); mokauke (Kololo, Barotseland)

Schrebera swietenioides Roxb. (*Nathusia swietenioides* (Roxb.) Kuntze; *Nathusia swieteniodes* Kuntze; *Schrebera swietenoides* Roxb.)

India. Tree, ovate to oblong leaflets, white flowers in terminal panicles, drooping verrucose capsules, 2–4 angled seeds, ripe fruits eaten

See *Plants of the Coast of Coromandel* 2: 1, t. 101. 1799, *Revisio Generum Plantarum* 2: 412. 1891 and *Taxon* 28: 402–403. 1979, *New Botanist* 12: 135–141. 1985, *Journal of Cytology and Genetics* 25: 308–320. 1990

(Used in Ayurveda and Sidha. Leaf juice applied to relieve toothache; leaves and stem bark made into a paste applied on cracked skin. Bark pounded in water to prepare a decoction for cough; bark juice given for stomachache. Root extract in leprosy; root paste applied on wounds, leprosy. Veterinary medicine, crushed roots applied to kill worms in wounds of cattle; root juice given orally to kill intestinal worms. Magico-religious beliefs, emotional, spiritual, dried fruits tied to the neck or to the waist to keep off evil spirits and ghosts.)

in English: weaver's beam tree

in India: balla, banpalas, bula, bulaa, bulaa gante, bul-lakaaya, bullakaya, dathabiro, eksira, esugaragi, ganta, gante, ghantapatali, ghanti phal, ghanto, golidha, kalgante, kalgonte, karandi, kastapatola, kattupparutticeti, ksarasrestha, ksarasresthah, kuberaksa, maakodi, maalinga maram, maavlanga, magalinga, magalingam, maggaarathi mara, maggamaram, maggante, maggarti, mahakapitha, makaarathi, makalinkam, makarti, makkam, makkamokob, malamplasu, mmakalinkam, mogalimara, mogalinga, mogalinga balli, mogalinga-maram, mogalingam, mogalingamara, moka, mokadi, mokalapu, mokapu, mokayapa, moke, mokh, mokha, mokhdi, mokho, mokka, mokkalapa, mokkalappa, mokkalinga, mokkalam, mokkalampa, mokkalamu, mokkanu, mokkalapa, mokkalapa, mokkalavepa, mokpb, mok-saka, mokshaka, mucaadi, muccadi, muggante, mukkadi, mukkidi, mukodi, mushka, mushkaka, muskaka, muskakah, muskkakavrksam, nagganti, nakti, neruvodi, pasarai, patali, svetamoksaka, svetamuskaka, thondamukkidi, tondamukkidi, tondamukkidi

in Tibet: mu ksa ca, mu-ska-ka

Schrebera trichoclada Welw. (*Nathusia trichoclada* Kuntze; *Nathusia trichoclada* (Welw.) Kuntze)

Tropical Africa.

See *Transactions of the Linnean Society of London* 27(1): 41. 1869, *Revisio Generum Plantarum* 2: 412. 1891

(Leaves, fruits and roots astringent, antiemetic, for toothache, hydrocele, leprosy, dysentery, anxiety.)

Schumannianthus Gagnepain Marantaceae

For the German botanist Karl Moritz Schumann, 1851–1904, taxonomist, botanical collector; see *Bulletin de la Société Botanique de France* 51: 176. 1904, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 687–688. University of Pennsylvania Press, Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 247. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 356. 1972, Stafleu and Cowan, *Taxonomic Literature*. 5: 400–408. 1985.

Schumannianthus dichotomus (Roxb.) Gagnep. (*Clinogyne dichotoma* (Roxb.) Salisb.; *Clinogyne dichotoma* Salisb.; *Clinogyne dichotoma* Salisb. ex Benth.; *Clinogyne dichotoma* Kuntze; *Maranta dichotoma* Poepp. ex Körn.; *Maranta dichotoma* Wall.; *Maranta dichotoma* (Roxb.) Wall.; *Maranta dichotoma* (Roxb.) D. Dietr.; *Phrynium dichotomum* Roxb.; *Schumannianthus dichotomus* Gagnep.; *Thalia dealbata* Link, nom. illeg.; *Thalia dichotoma* Roxb. ex Link; *Thalia dichotoma* (Roxb.) Roxb. ex Link)

E. Himalaya to Philippines. Shrub, branches knotted at joints, glabrous ovate-oblong leaves, white flowers in branched panicles, ants are attracted by nectar produced from a modified bracteole

See *Asiatic Researches* 11: 324. 1810, *Trans. Hort. Soc. London* 1: 276. 1812, *Jahrbücher der Gewächskunde* 1(3): 21. 1820, *A Numerical List of Dried Specimens* [Wallich] n. 6614. 1832, *Syn. Pl.* (D. Dietrich) 1: 5. 1839, *Bull. Soc. Imp. Naturalistes Moscou* xxxv. (1862) 1. 45. 1862, *Gen. Pl.* [Bentham & Hooker f.] 3(2): 651. 1883, *Revis. Gen. Pl.* 2: 684. 1891, *FBI* 6: 258. 1892 and *Bulletin de la Société Botanique de France* 51: 176. 1904, *Bull. Bot. Survey India* 14: 140. 1972, *Taxon* 54(4): 1084. 2005, *Current Science* 91(5): 648–651. 2006

(Stomachic.)

in India: biti, patidoi, piti

in Thailand: khla

Schumannianthus virgatus (Roxb.) Rolfe (*Arundastrum virgatum* (Roxb.) Kuntze; *Arundastrum virgatum* Kuntze; *Clinogyne virgata* Benth. & Hook.f.; *Clinogyne virgata* (Roxb.) Benth.; *Donax virgata* K. Schum.; *Donax virgata* (Roxb.) Schum.; *Maranta virgata* (Roxb.) A. Dietr.; *Maranta virgata* (Roxb.) Wight; *Maranta virgata* (Roxb.) Wall.; *Phrynium virgatum* Roxb.; *Phyllodes virgata* (Roxb.) Kuntze; *Schumannianthus virgatus* Rolfe)

India. Erect, tall, tuberous rootstock, often as *Maranta virgata* (Roxb.) Wall.

See *Asiatic Researches* 11: 324. 1810, *Species Plantarum* ed. 6. 1: 21. 1831, *A Numerical List of Dried Specimens* [Wallich] n. 6616. 1832, *Icones Plantarum Indiae Orientalis* t. 2015. 1853, *Genera Plantarum* [Bentham & Hooker f.] 3(2): 651. 1883, *Revisio Generum Plantarum* 2: 684, 695. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15(4): 440. 1892 and *Das Pflanzenreich* IV 48(Heft 11) (Engler) *Marant.*: 33. 1902, *Journal of Botany, British and Foreign* 14: 244. 1907

(Rhizome paste in water taken to cure stomach pain. Religious, conserved in sacred grove, leaves used to place material of adoration and to serve food at religious and other ceremonies.)

in India: koova, periya-kuhai-valai, vellakoova

Schumanniphyton Harms Rubiaceae

For the German botanist Karl Moritz Schumann, 1851–1904, see *Bot. Jahrb. Syst.* 23: 444. 1896, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] 1: 313. 1897, *Cat. Afr. Pl.* 1: 464. 1898 and *J. Bot.* 64: 170. 1926, *Compt. Rend. Hebd. Séances Acad. Sci.* 226: 1116. 1948.

Schumanniphyton magnificum (K. Schum.) Harms (*Tetrastigma magnificum* K. Schum.)

Nigeria, Tropical Africa. Shrub or small tree, soft, very large simple leaves, large white stalkless flowers in dense clusters, corolla tube densely hairy, corky woody fruits, seeds with yellow aril, lowland rainforest

See *Bot. Jahrb. Syst.* 23: 445. 1896, *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1: 313. 1897

(Leaves and stem bark for snakebite, dysentery, wound dressing. A decoction of the bark used for dysentery. Fresh leaves and stem extracts used in the treatment of snakebite.)

in Cameroon: abamoto, akito, titimoto

in Central African Republic: goukba

Schweinfurthia A. Braun Scrophulariaceae (Plantaginaceae)

For the German botanist Georg August Schweinfurth, 1836–1925, explorer, traveller, botanical collector in east and north Africa (tropical Africa and Arabia), ethnologist, among many other works he was the author of *Illustration de la flore d’Egypte*. Le Caire 1887, *Sur la flore des anciens jardins arabes d’Egypte*. Le Caire 1888, *The heart of Africa*. London 1873, *Beitrag zur Flora Aethiopiens*. Berlin 1867 and *Novae species aethiopicae*. [Wien 1868]; see *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1866: 24. 1866, Joseph Vallot, “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 191–192. Paris 1882 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H.

Barnhart, *Biographical Notes upon Botanists*. 3: 249. 1965, Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." in *Webbia*. 19: 861–863. 1965, G.E. Wickens, "J.D.C. Pfund, a botanist in the Sudan with the Egyptian Military Expeditions, 1875–1876." *Kew Bulletin*. 24(1): 191–216. 1970, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 357. 1972, G.E. Wickens, "Dr. G. Schweinfurth's journeys in the Sudan." *Kew Bulletin*. 27(1): 129–146. 1972, Stafleu and Cowan, *Taxonomic Literature*. 5: 430–437. 1985.

Schweinfurthia papilionacea Boiss. (*Schweinfurthia sphaerocarpa* A. Braun)

Pakistan, Afghanistan. Erect, glabrous herb, leaves variable, flowers axillary pedicellate, corolla white with purple veins, calyx 5-partite, fruit a globose 2-celled capsule, blackish acutely winged seeds

See *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1866: 24. 1866, *Fl. Orient.* [Boissier] 4(2): 387. 1879 [Apr–May 1879] and *Pakistan Journal of Botany* 14: 117–129. 1982

(Used in Ayurveda. Whole plant decoction tonic, diuretic, antipyretic, useful in typhoid and diabetes, to relieve cough and postparturition pain, also used as snuff for bleeding through nose epistaxis.)

in India: nepalnimbo, sanepat, sanipat, sannipat

in Pakistan: druhund

Schwenckia L. Solanaceae

After the Dutch physician Martin Wilhelm (Martinus Wilhelmus) Schwencke, 1707–1785, botanist, his works include *Dissertatio ... de operatione inguinali*. Lugduni Batavorum 1731, *Novae plantae Schwenckia dictae a celeberrimo Linnaeo in Gen. plant.* ed. VI. p. 567 ex celeb. Davidiis van Rooijen *Charact. mss.* 1761 *communicata brevis descriptio et delineatio cum notis characteristicis*. Hagae Comitum [The Hague] [typ. van Karnebeek] 1766 and *Officinalium plantarum catalogus*. Hagae-Comitum 1752. See *Gen. Pl.*, ed. 6. 577 ["567"]. 1764, *Enumeratio Plantarum ...* 1: 21, 102. 1804 and H. Heine, in *Kew Bulletin* 16(3): 465–469. 1963, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 250. 1965, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974, *Journal of Economic and Taxonomic Botany* 19(3): 653–661. 1995, *Memoirs of the New York Botanical Garden* 85: i–ix, 1–246. 2000, *Economic Botany* 58 (supplement): S239–S252. 2004, *Journal of Ethnopharmacology* 99(1): 1–4. 2005, *Phytothérapie* 6: 252–259. 2005.

Schwenckia americana L. (*Schwenckia americana* Kunth, nom. illeg.; *Schwenckia americana* var. *angustifolia* J.A. Schmidt; *Schwenckia americana* var. *hirta* (Klotzsch) Carvalho; *Schwenckia guianensis* Benth.; *Schwenckia*

guineensis Schumach. & Thonn.; *Schwenckia hirta* Benth., nom. illeg.; *Schwenckia hirta* Klotzsch; *Schwenckia americana* var. *hirta* (Klotzsch) Carvalho)

Mexico, Central and South America. Annual or short-living perennial herb, erect or ascending and spreading

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 375, t. 180. 1818, *Beskrivelse af Guineiske planter* 8–9. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 28. 1828, *Linnaea* 14: 289. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 194–195. 1846, *Flora Brasiliensis* 8(1): 251. 1862 and *Flora of Tropical Africa* 4(2): 260. 1905, *Rodriguésia* 29(44): 429–431. 1978

(Plant decoction given for cough, asthma, rheumatism, chest pain, as cardiac tonic, anthelmintic, as a purgative in cases of poisoning. Stem and leaves antiseptic, analgesic, anti-inflammatory, for rheumatic pains, mouth infections, chest pains; fresh and dried leaves antimicrobial, anthelmintic. Roots chewed to cure respiratory diseases in children; root decoction taken as a laxative. Pounded whole plant used as a fish poison.)

in Nigeria: dandonno, parpatse

Schwenckia guineensis Schumach. & Thonn. (*Schwenckia adscendens* Link; *Schwenckia americana* L.; *Schwenckia americana* var. *angustifolia* J.A. Schmidt; *Schwenckia americana* var. *hirta* (Klotzsch) Carvalho; *Schwenckia angustifolia* Benth.; *Schwenckia guianensis* Benth.; *Schwenckia hirta* Benth., nom. illeg., non *Schwenckia hirta* Klotzsch; *Schwenckia hirta* var. *angustifolia* Benth.; *Schwenckia americana* L.; *Schwenckia americana* var. *hirta* (Klotzsch) Carvalho; *Schwenckia hirta* Klotzsch; *Schwenckia hirta* var. *angustifolia* Benth.)

East and West Africa. Herb, annual or perennial, pubescent, erect, thin, many-branched from the base, leaves elliptic or ovate, stalks shortly hairy, greenish or purple flowers, corolla tubular, cylindrical calyx with pointed lobes, small round capsules, tiny seeds, weed

See *Genera Plantarum ...* ed. 6 577 [567]. 1764, *Genera Plantarum* 124. 1789, *Jahrbücher der Gewächskunde* 1(3): 51. 1820, *Beskrivelse af Guineiske planter* 8–9. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 28. 1828, *Linnaea* 14: 289. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 194–195. 1846, *Flora Brasiliensis* 8(1): 251. 1862 and *Rodriguésia* 29: 429–431. 1978, *Journal of Ethnopharmacology* 8: 257–263, 265–277. 1983, *Regnum Veg.* 127: 86. 1993, *Journal of Ethnopharmacology* 97: 421–427. 2005

(Plant decoction to treat rheumatic pains, yellow fever, barrenness, boils, epilepsy and swellings. Stem and leaves for fevers and mouth infections. Cold infusion of leaves with lime juice given as a drink for snakebite; leaves for abdominal pain. The root extract as a cough medicine, and for the treatment of chest pains and respiratory diseases. Fish poison.)

in Angola: kusuanza

in Benin: adagbonyanman, amakoukwi, handjagoun, kokwé-man, kpabassari, nakpassari, notikivi, tehin, zron

in Ghana: agyennyensu, emenan, moxe, nyabile

in Ivory Coast, Burkina Faso: gbolachi, gnima-gnima, létébo, nomoniensigité

in Niger: dendana, gérôwil, zanka gitty

in Nigeria: dandana, daudanaaor, farfets

in Togo: hundassi, na'yam, nag'yam

in Yoruba: ale odan, igbalè odan

Sciadotenia Miers Menispermaceae

From the Greek *skias*, *skiados* 'canopy, umbel, umbel of plants', *skia* 'shade, shadow' and *tainia* 'fillet', see *Annals and Magazine of Natural History*, ser. 2 7: 37, 43. 1851, *Journal of the Proceedings of the Linnean Society* 5(Suppl. 2): 51. 1861 and *Mem. New York Bot. Gard.* 22(2): 1–89. 1971, *Lloydia* 37(1): 23–29. 1974, *Phytologia* 33(5): 323–341. 1976, *Phytologia* 50(2): 80–111. 1982.

Sciadotenia toxifera Krukoff & A.C. Sm. (*Tylopetalum abutiforme* Barneby & Krukoff)

Ecuador. Woody vine

See *Bulletin of the Torrey Botanical Club* 66: 308. 1939, *Memoirs of the New York Botanical Garden* 20(2): 78. 1970, *J. Nat. Prod.* 66(1):115–118. 2003

(Lakshminine, a new rare oxoisoaporphine alkaloid.)

Scilla L. Asparagaceae (Hyacinthaceae, Liliaceae)

Latin *scilla* and *squilla* 'a sea-onion, sea-leek, squill' (Plinius), Greek *skilla* 'scilla', Latin *scillinos* and Greek *skilinos* for sea-onions or squills, Greek *oxos skillitikos*, *oxos skillinos*, Akkadian *sikillu* for a plant, Sanskrit *kshira* 'milk, sap', *kshiri* 'water' or *kshi* 'to destroy', the bulbs of several *Scilla* species are used medicinally by indigenous people and are potentially poisonous; see Carl Linnaeus, *Species Plantarum*. 1: 308–309. 1753, *Genera Plantarum*. Ed. 5. 146. 1754, *Anleitung zum Studien der Wissenschaftlichen Botanik* 267, 284. 1818, *Novae Plantarum Species* 194–195. 1821, *Botanical Register*; consisting of coloured ... 12: t. 1029. 1826 and E. Weekley, *An Etymological Dictionary of Modern English*. 2: 1292, 1401. 1967, G. Semerano, *Le origini della cultura europea. Dizionari Etimologici. Dizionario della lingua Greca*. 2(1): 267. 1994 H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 568. 1996.

Many *Scilla* species contain cardiac glycosides, scilla-dienolides, which act like digitalis. *Scilla* species may also cause skin irritation in sensitive individuals.

Scilla siberica Haw. (*Othocallis siberica* (Haw.) Speta; *Scilla mordakiae* Speta)

Iran.

See *Species Plantarum* 1: 308–309. 1753, *Botanist's Repository*, for new, and rare plants 6: pl. 365. 1804 and *Chromosoma* 40: 307–320. 1973, *Chromosoma* 43: 269–278. 1973, *Plant Systematics and Evolution* 129: 63–109. 1978, *Nucleus* 22: 32–33. 1979, *Berichte der Deutschen Botanischen Gesellschaft* 94: 249–266. 1981, *Chromosoma* 97: 439–448. 1989, *Phyton* (Horn) 38: 113. 1998

(The entire plant contains cardiac glycosides, which can potentially cause poisoning if ingested.)

in English: Siberian scilla, Siberian squill

Scindapsus Schott Araceae

From *skindapsos*, ancient Greek name for a four-stringed musical instrument, applied also to an ivy-like plant; see *Meletemata Botanica* 21. 1832 and Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVIII: 46. UTET, Torino 1997.

Scindapsus hederaceus Miq. (*Pothos hederaceus* Zoll. & Moritzi, nom. illeg.; *Pothos hederaceus* Aubl.; *Scindapsus hederaceus* Schott; *Scindapsus inquinatus* Schott; *Scindapsus poilanei* Gagnep.; *Scindapsus pothoides* Miq.; *Scindapsus pothoides* Schott)

Vietnam.

See *Hist. Pl. Guiane* 2: 840. 1775, *Syst. Verz.*: 83. 1854, *Fl. Ned. Ind.* 3: 184–185. 1856, *Bonplandia* (Hanover) 5: 45. 1857, *Prodr. Syst. Aroid.* 394. 1860, *Ann. Mus. Bot. Lugduno-Batavi* 1: 283. 1864 and *Notul. Syst.* (Paris) 9: 139. 1941

(Stem for rheumatism.)

Malay names: akar lubang alah, akar ular

Scindapsus officinalis (Roxb.) Schott (*Monstera officinalis* (Roxb.) Schott; *Pothos officinalis* Roxb.; *Scindapsus annamicus* Gagnep.)

SE Asia, India, China. Stout scandent shrub, climbing, adventitious roots, berries red when ripe

See *Fl. Ind.* 1: 452–454. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1830(4): 1028. 1830, *Meletemata Botanica* 21. 1832 and *Not. Syst. Herb. Mus. Paris* ed. Humbert 9: 139. 1941, *Genét. Ibér.* 30–31: 161–188. 1979, *Indian Journal of Traditional Knowledge* 6(3): 494–497. 2007

(Used in Ayurveda. Stem decoction given to treat gastric complaints. Fruit aphrodisiac, stimulant, diaphoretic,

anthelmintic, applied externally for rheumatism; a decoction as expectorant in asthma. Paste from leaves and berries applied in healing bone fracture, rheumatism and bodyache. Veterinary medicine, powdered fruit applied locally on infected wounds to expel worms, to kill maggots.)

in India: anaitippali, attitippili, badipipli, dodda hippali, enugapippalu, gaja pippali, gaja-pippallu, gajapipal, gajapipali, gajpipul, gathiala, guja-pippulee, maidah, vushira

Scindapsus perakensis Hook.f. (*Scindapsus longipetiolatus* Ridl.)

Borneo, Malesia. Herb

See *Fl. Brit. India* [J.D. Hooker] 6: 542. 1893 and *Bull. Misc. Inform. Kew* 1926: 93. 1926

(Leaves paste applied to ease pain caused by poisonous caterpillar sting.)

in Sarawak: gemalong hutan

Scirpus L. Cyperaceae

Latin *scirpus* or sometimes *sirpus* for a rush, bulrush (Plinius), Hebrew *habar* 'to string together, to compose', *haber* 'joined, united'; see Carl Linnaeus, *Species Plantarum*. 1: 47–52. 1753, *Genera Plantarum*. Ed. 5. 26. 1754, *Prodromus Florae Novae Hollandiae* 221–222. 1810, *Spicilegium florae rumelicae et bithynicae* ... 2: 417. 1845, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 2(2): 111. 1887, *Flora Capensis* 7: 211. 1897–1898 and *Kew Bulletin*, Additional Series 8: 111. 1908, *Telopea* 2: 156. 1981, *Taxon* 38: 316. 1989, *Taxon* 42: 691. 1993, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 557. 1994, *Kew Bull.* 57(2): 257–362. 2002.

Scirpus maritimus L. (*Bolboschoenus maritimus* (L.) Palla; *Bolboschoenus maritimus* subsp. *paludosus* (A. Nelson) T. Koyama; *Bolboschoenus maritimus* subsp. *paludosus* (A. Nelson) Á. Löve & D. Löve, nom. illeg., non *Bolboschoenus maritimus* subsp. *paludosus* (A. Nelson) T. Koyama; *Bolboschoenus paludosus* (A. Nelson) Soó; *Schoenoplectus maritimus* (L.) Lye; *Scirpus campestris* Britton var. *paludosus* (A. Nelson) Fernald; *Scirpus maritimus* fo. *cymosus* (Rchb.) T. Koyama; *Scirpus maritimus* var. *cymosus* Rchb.; *Scirpus maritimus* var. *paludosus* (A. Nelson) Kük.; *Scirpus paludosus* A. Nelson; *Scirpus robustus* Pursh var. *paludosus* (A. Nelson) Fernald)

North America.

See *Species Plantarum* 1: 47–52. 1753, *Flora Americae Septentrionalis*; or, ... 1: 56. 1814 [1813], *Flora Germanica Excursoria* 79. 1830, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien Sitzungsber.* 38: 49. 1888, *An Illustrated Flora of the Northern United States* 1: 267, f. 627. 1896, *Bulletin of the Torrey Botanical Club* 26(1): 5. 1899 and *Rhodora* 2(24): 241.

Bot.* 40: 913–937. 1962, *Flora de la Provincia de Buenos Aires* 1: 315–421. 1968, *Acta Botanica Academiae Scientiarum Hungaricae* 16(3–4): 368. 1970 [1971], *Blyttia* 29(3): 145. 1971, *Brittonia* 31(2): 284–293. 1979, *Acta Phytotaxonomica et Geobotanica* 31(4–6): 148. 1980, *Taxon* 30(4): 845. 1981, *South African Journal of Botany* 58(5): 380–385. 1992, *Brittonia* 47(4): 433–445. 1995, *Taxon* 48: 356. 1999

(Laxative, antiemetic.)

Scirpus microcarpus J. Presl & C. Presl (*Eleocharis microcarpa* Torr.; *Scirpus avatschensis* Kom.; *Scirpus expansus* Fernald fo. *globulosus* Fernald; *Scirpus lenticularis* Torr., nom. illeg.; *Scirpus lenticularis* (R. Br.) Poir.; *Scirpus macounii* Holm; *Scirpus microcarpus* (Torr.) Kuntze; *Scirpus microcarpus* subsp. *rubrotinctus* (Fernald) Á. Löve & D. Löve; *Scirpus microcarpus* var. *confertus* (Fernald) House; *Scirpus microcarpus* J. Presl & C. Presl var. *longispicatus* M. Peck; *Scirpus microcarpus* J. Presl & C. Presl var. *rubrotinctus* (Fernald) M.E. Jones; *Scirpus rubrotinctus* Fernald; *Scirpus rubrotinctus* fo. *confertus* (Fernald) Weath.; *Scirpus rubrotinctus* var. *confertus* Fernald; *Scirpus sylvaticus* subsp. *digynus* (Boeck.) T. Koyama; *Scirpus sylvaticus* var. *digynus* Boeck.; *Scirpus sylvaticus* var. *microcarpus* (J. Presl & C. Presl) MacMill.)

North America. Perennial, graminoid

See *Encyclopédie Méthodique. Botanique* ... Supplément 5: 103. 1817, *Reliquiae Haenkeanae* 1(3): 195. 1828, *Annals of the Lyceum of Natural History of New York* 3: 312, 328. 1836, *Linnaea* 36: 727. 1870, *Revisio Generum Plantarum* 2: 758. 1891, *The Metaspermae of the Minnesota Valley* 97. 1892 and *Rhodora* 2(13): 20–21. 1900, *American Journal of Science* 18: 21. 1904, *Biological Series of the Bulletin of the State University of Montana* 15: 20. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 13: 163. 1914, *New York State Museum Bulletin* 233–234: 62. 1922, *Connecticut State Geological and Natural History Survey Bulletin* 48: 29. 1931, *Proceedings of the Biological Society of Washington* 47(34): 185. 1934, *Rhodora* 45(535): 294–295. 1943, *Canadian Journal of Botany* 43(11): 1392. 1965, *Proc. Acad. Nat. Sci. Philadelphia* 119: 295–23. 1967, *Taxon* 30: 517, 849. 1981, *Contr. Univ. Michigan Herb.* 22: 105–119. 1999

(Used for abscesses, sore throats.)

in English: panicled bulrush

Scirpus nevadensis S. Watson var. *remireoides* (Griseb.) Beetle (*Amphiscirpus nevadensis* (S. Watson) Oteng-Yeb.; *Phylloscirpus nevadensis* (S. Watson) Goetgh.; *Schoenoplectus nevadensis* (S. Watson) Soják; *Scirpus nevadensis* S. Watson; *Scirpus remireoides* Griseb.)

North America. Perennial, graminoid, roots eaten raw

See *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany.* Washington: Government Printing Office, 360. 1871, *Plantae Lorentzianae* 19: 266. 1874 and *American Journal of Botany* 33: 663. 1946, *Fl. Patagónica* 8(2): 38–92. 1969, *Notes from the Royal Botanic Garden, Edinburgh* 33(2): 308. 1974, *Genera Cyperacearum* 330. 1986

(Ceremonial.)

in English: Nevada bulrush

Scirpus pallidus (Britton) Fernald (*Scirpus atrovirens* Willd. subsp. *pallidus* (Britton) D. Löve & J.-P. Bernard; *Scirpus atrovirens* Willd. var. *pallidus* Britton)

North America. Perennial, graminoid, roots eaten raw

See *Transactions of the New York Academy of Sciences* 9(1–2): 14. 1889 and *Rhodora* 8(92): 163. 1906, *Svensk Botanisk Tidskrift* 53(4): 379. 1959 [1960], *Proc. Acad. Nat. Sci. Philadelphia* 119: 295–323. 1967, *Rhodora* 98(894): 168–179. 1996

(Ceremonial, emetic.)

in English: cloaked bulrush

Scirpus tuberosus Desf. (*Bolboschoenus tuberosus* (Desf.) Hadac; *Reigera maritimus* var. *tuberosus* (Desf.) Opiz; *Scirpus maritimus* var. *tuberosus* (Desf.) Roem. & Schult.)

India. Erect leafy sedge, spikelets in terminal umbel, nut obovoid

See *Flora Atlantica* 1: 50. 1798, *Systema Vegetabilium* 2: 139. 1817 and *Bulletin of the College of Science* 6: 13. 1961

(Tubers laxative, crushed and given to children in bed wetting.)

in India: dila

Scirpus validus Vahl (*Schoenoplectus lacustris* subsp. *validus* (Vahl) T. Koyama; *Schoenoplectus validus* (Vahl) T. Koyama, nom. illeg., non *Schoenoplectus validus* (Vahl) Á. Löve & D. Löve; *Scirpus lacustris* subsp. *validus* (Vahl) T. Koyama; *Scirpus lacustris* var. *validus* (Vahl) Kük., 1926; *Scirpus lacustris* var. *validus* (Vahl) Kük., 1932)

North America.

See M.R. Gilmore, *Uses of Plants by the Indians* ... 17. 1991

(Ceremonial use.)

Common names: psa, sa-hi, sistat

Scleria P.J. Bergius Cyperaceae

Greek *skleros* 'hard, dry', referring to the fruits; see Peter Jonas Bergius (1730–1790), in *Kongl. Vetenskaps*

Academiens Handlingar. 26: 142, 144, t. 4–5. Stockholm 1765, *Prodromus Florae Novae Hollandiae* 240. 1810, *Edinburgh New Philosophical Journal* 17(34): 267. 1834, *Linnaea* 9(3): 303. 1834, *Flora Brasiliensis* 2(1): 158, 174, 182–183, 186, 196. 1842, *Synopsis Plantarum Glumacearum* 2: 177. 1855, *Catalogus plantarum cubensium* ... 249. 1866, *Journal of the Linnean Society, Botany* 20: 336. 1883, *The Flora of British India* 6: 685–686, 689. 1894, Urban, Ignatz (1848–1931), *Symbolae Antillanae*. Berolini, Parisiis, 1898–1928 and *Bulletin of Miscellaneous Information: Additional Series* 8: 132, 135. 1908, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(1/1): 261–320. 1936, *Brittonia* 2(1): 1–105. 1936, *Fieldiana, Bot.* 24(1): 90–196. 1958, *Blumea* 11(1): 196, 208. 1961, *Journal of the Faculty of Science: University of Tokyo, Botany* 8(3): 135. 1961, *Blumea* 12: 44. 1964, *Mem. Hooker]. 555. 1849, *Synopsis Plantarum Glumacearum* 2: 173. 1855, *Flora of the British West Indian Islands* [Grisebach] 578. 1864, *Linnaea* 38: 504. 1874, *Flora* 65: 30. 1882 and *Symb. Antill.* 2(2): 169. 1900, *Brittonia* 2(1): 97. 1936, *Phytologia* 64(2): 163. 1987, *Iheringia: Botânica* 63: 295–320. 2008

(Painful cuts from the rough edges of the leaves.)

in Panama: cortadera

Scleria sumatrensis Retz. (*Scleria setigera* Roxb.)

Thailand, Trop. & Subtrop. Asia, Australia. Herb

See *Observ. Bot.* 5: 19. 1788, *Fl. Ind.* ed. 1832, 3: 575. 1832

(Root applied as an ointment to soothe irritations caused by stinging hairs of insects. For gonorrhoea, boil the roots with the roots of *Capsicum annuum* and drink the decoction. Young leaves eaten raw or cooked to kill and purge intestinal worms.)

in Indonesia: udu si'ik

Malay name: sialit

Scleria terrestris (L.) Fassett

Thailand, Trop. & Subtrop. Asia.

See *Rhodora* 26(308): 159. 1924 [4 Aug 1924]

(Whole parts of *Cyperus* sp. and *Scleria terrestris* used by women for an abortion. Root paste taken to allay body heat; rhizome paste in spermatorrhea.)

in India: churia, jhurian

Scleria verrucosa Willd. (*Hypolytrum heteromorphum* Nelmex; *Scleria spinulosa* Boeckeler)

Liberia, Sierra Leone. Stout herb, stiff, semi-climbing sedge, stem three-sided, leaf-sheaths strongly winged, brownish flowers, warty whitish-cream fruits

See *Species Plantarum*. Editio quarta 4: 313. 1805, *Synopsis Plantarum* 1: 70. 1805, *Beiträge zur Kenntniss der Cyperaceen* 2: 30. 1890 and *J. Fac. Sci. Univ. Tokyo*, sect. 3, 8: 68. 1961

(Root decoction drunk to correct irregular menstrual flow.)

in Central African Republic: ti yé yé

Sclerocarpus Jacq. Asteraceae

From the Greek *skleros* and *karpos* 'a fruit', referring to the covering of the seeds, see Dalziel, John McEwan (1872–1948), *The useful plants of west tropical Africa*. London 1937, *Compositae Newslett.* 27: 7–10. 1995.

Sclerocarpus africanus Jacq. ex Murray

Ghana. Herb, leaning, erect, annual, florets yellow with bright yellow rays, black fruit with stiff white hairs

See *Icon. Pl. Rar.* [Jacquin] 1: 17, t. 176. 1781, *Systema Vegetabilium*. Editio decima quarta 783. 1784

(A leaf extract in water in which mutton has been cooked taken as remedy for gonorrhoea.)

Sclerocarya Hochst. Anacardiaceae

From the Greek *skleros* 'hard, dry' and *karyon* 'walnut, nut', referring to the nature of seeds, see *Flora* 27(1, Bes. Beil.): 1. 1844.

Sclerocarya birrea (A. Rich.) Hochst. (*Poupartia birrea* (A. Rich.) Aubrév.; *Poupartia birrea* (Hochst.) Aubrév.; *Spondias birrea* A. Rich.)

East Africa. Tree or shrub, a quite variable species, low branched, wide-spreading, when cut exuding watery sticky resin, twigs dark green-brown with pale brown lenticels, damaged fruit and crushed leaves fragrant, yellow fruits, fruit eaten by human beings and elephants, seeds used as spice, in woodland

See *Species Plantarum* 1: 371. 1753, *Genera Plantarum* 372. 1789, *Florae Senegambiae Tentamen* 1: 152, t. 41. 1831, *Flora* 27(1, Bes. Beil.): 1. 1844 and *Flore Forestière Soudano-Guineenne* 405, t. 89, 1–4. 1950, *Planta Med.* 58(2): 174–175. 1992, *J. Ethnopharmacol.* 76(3): 247–252. 2001, *J. Ethnopharmacol.* 85(2–3): 217–220. 2003, *Phytomedicine*. 10(8): 675–681. 2003, *Phytother. Res.* 18(8): 601–608. 2004, *Cardiovasc. J. S. Afr.* 17(3): 117–123. 2006

(This species has an irritant effect. Vasorelaxant, hypotensive, molluscicidal, antimicrobial, hypoglycemic, analgesic, antioxidant, secretagogue, antiinflammatory and antidiabetic; stem bark ethanol extracts exhibited strong activity against *Candida albicans*. Bark used for the treatment of dysentery; bark decoction used for diarrhea, for adults with enlarged spleen as well as for liver diseases. Exudate for skin diseases.)

in English: cider tree, maroola plum, marula, marula tree, morula

in Eastern Africa: mungongo

in Kenya: arol, danya, didisa, ekajikai, ekajiket, fula, ilmang'ua, kotelalam, lmang'wa, lmang'wai, mang'u, mauw'a, mfula, mng'ongo, mngongo, mongo, mufula, mukomothi, mungango, muuw'a, ng'ong'o, olemo, olmang'uai, ong'ong'o, oroluo, oroluwo, tololokwo, tulafula

in Madagascar: sako, sakoanala

in Mali: ngana, nkudanga, nkunan

in Nigeria: danya, heri

in Tanzania: magongopori, mgongo, mng'ongo, mungongwe, ntoregani

Sclerocarya birrea (A. Rich.) Hochst. subsp. *caffra* (Sond.) Kokwaro (*Commiphora subglauca* Engl.; *Poupartia caffra* (Sond.) H. Perrier; *Poupartia silvatica* H. Perrier; *Sclerocarya birrea* (sensu Van der Veken) Hochst., non sensu Hochst.; *Sclerocarya caffra* Sond.; *Sclerocarya schweinfurthiana* Schinz)

East Africa. Tree, bole gnarled, bark reddish when cut exuding watery and sticky resin, strong turpentine scent from

cut twigs, branches spreading widely, young new leaves toothed and tinged red, compound leaves terminal on cylindrical twigs, inflorescence axillary, spicate inflorescences clustered at the end of spur shoots with new leaves, flowers solitary supported by very strong and long pedicels, petals becoming strongly reflexed with the apex incurving, perianth dark-red, calyx dark red-purple, slightly flattened laterally hard fruits green with minute yellowish spots, edible fruit flesh when ripe, kernel edible, leaves and fruits used for fodder, fruits eaten by humans and monkeys and elephants, in dry savanna, in open places, woodland, in disturbed forest

See *Monadelphiae Classis Dissertationes* Decem 2: [App. 1]. 1786, *Genera Plantarum* 372. 1789, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797, *Flora* 27 Bes. Beil. 1. 1844, *Linnaea* 23: 26. 1850, *Flora of Tropical Africa* 1: 227. 1868, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 29: 63. 1883 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 469. 1912, *Mémoires du Muséum National d'Histoire Naturelle* 18: 245, 247–248. 1944, *Kew Bulletin* 34(4): 745–760. 1980, *Boletim da Sociedade Broteriana*, ser. 2 62: 117–130. 1989

(This species has an irritant effect. Fruit refreshing. Leaves of a male tree used for wounds; leaves and fruits chewed for coughs; a decoction of the leaves or bark used to treat diabetes and snakebite. A powder made from the bark mixed with honey and used as a remedy for coughs. Veterinary medicine, fruits and roots decoction used to treat poultry diseases.)

in English: cider tree, maroola plum, marula, marula plum

in Kenya: arol, danya, didisa, ekajikai, ekajiket, fula, ilmang'ua, kotelalam, lmang'wa, lmang'wai, mang'u, mauw'a, mfula, mng'ongo, mngongo, mongo, mufula, mukomothi, mungango, muuw'a, ng'ong'o, olemo, olmang'uai, ong'ong'o, oroluo, oroluwo, tololokwo, tulafula

in Madagascar: sakady, sakoa, sakoada, sakoala, sakoan'ala, sakoana, sakoanala

in Southern Africa: meroola, maroela; mfula (Venda); mfula (Kalanga, northern Botswana); muFuna, muFura, muGanu, iKanyi, muKwakwa, muPfura, muShomo, muSomo, muT-somo (Shona); umGanu (Zulu); umganu (Swazi); nkanyi (Tsonga); morula (Western Transvaal, northern Cape, Botswana); morula (North Sotho: north and north east Transvaal); morwa (Yei, Ngamiland); uge, muge (Deiriku: Okavango Native Territory); omuongo (Herero); omuongo (Northern South West Africa)

in Tanzania: gulgurchandi, igongo, ilmang'ua, mang'we, mango, mbwegele, mbwejele, mng'ong'o, mng'ongo, mngongo, mongo, monyangu, mtondoko, mtumba-mngongo, muangu, mugongo, muhuvu, mumbu, muongo, ng'ongo, olmang'uai, olmang'wai, olmangisai, omongwe

Sclerolobium Vogel Fabaceae (Caesalpinaceae, Caesalpinieae, Leguminosae)

From the Greek *skleros* 'hard, dry' and *lobion* 'a little pod', see *Histoire des plantes de la Guiane Française* 1: 372–374, pl. 143, f. 1. 1775, *Linnaea* 11: 395–396. 1837 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3/1): 1–506. 1943, *Lloydia* 20: 76. 1957, *Ann. Missouri Bot. Gard.* 41(2): 223–260. 1954, *Lloydia* 20(2): 67–118. 1957, *Mem. New York Bot. Gard.* 10(1): 142–156. 1958, *Mem. New York Bot. Gard.* 15(1): 112–128. 1966, Luíz Caldas Tibiriçá, *Dicionário Tupi-Português*. Traço Editora, Liberdade 1984, Luíz Caldas Tibiriçá, *Dicionário Guarani-Português*. 159. [vernacular name *tahû* for ant.] Traço Editora, Liberdade 1989, Timothy J. Killeen, Emilia García E. and Stephan G. Beck, eds., *Guía de Árboles de Bolivia*. 418. Herbario Nacional de Bolivia and Missouri Botanical Garden 1993, *Ann. Missouri Bot. Gard.* 95(4): 618–660. 2008.

Sclerolobium aureum (Tul.) Baill. (*Sclerolobium aureum* Baill.; *Sclerolobium aureum* var. *grandiflorum* Dwyer; *Sclerolobium aureum* var. *polyphyllum* Hassl.; *Sclerolobium aureum* var. *velutinum* Benth.; *Tachigali aurea* Tul.; *Tachigali davidsei* Zarucchi & Herend.; *Tachigali grandiflora* Huber)

South America. Perennial non-climbing tree

See *Archives du Muséum d'Histoire Naturelle* 4: 169. 1844, *Flora Brasiliensis* (Martius) 15(2): 51. 1870, *Histoire des Plantes* (Baillon) 2: 90. 1870 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 5(2): 388. 1909 [*Boletim do Museo Goeldi de Historia Natural e Ethnographia*. Belem], *Feddes Repert. Sp. Nov.* 8: 131. 1910, *Lloydia* 20: 81. 1957, *Flora of the Venezuelan Guayana* (gen. eds. J.A. Steyermark et al.) 4: 116. 1998, *Journal of Ethnopharmacology* 133(2): 420–425. 2011

(Antimicrobial and cytotoxic.)

Sclerolobium guianense Benth. (*Sclerolobium guianense* var. *guianense*; *Sclerolobium guianense* var. *radlkoferi* (Rusby) Dwyer; *Sclerolobium radlkoferi* Rusby; *Tachigali guianensis* Benth.; *Tachigali guianensis* (Benth.) Zarucchi & Herend.)

South America. Perennial non-climbing tree

See *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 237. 1850 and *Lloydia* 20: 98. 1957, *Monographs in Systematic Botany from the Missouri Botanical Garden* 45: 1254. 1993, *Journal of Ethnopharmacology* 69(2): 127–137. 2000, *Ann. Missouri Bot. Gard.* 95(4): 618–660. 2008

(Antimalarial, antimicrobial and cytotoxic, anti-scabies.)

Scleropyrum Arn. Santalaceae

Greek *skleros* 'hard, dry' and *pyros* 'grain, wheat', referring to the drupaceous fruits, see *Allgemeine Medizinisch-Pharmazeutische Flora* 5: 2005. 1836, *Magazine of*

Zoology and Botany 2: 549. 1838 and *Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 300. 1900.

Scleropyrum pentandrum (Dennst.) Mabb.

India.

See *Taxon* 26(5–6): 533. 1977

(Fruits and thorns ground together, paste applied to expel spines; fruit applied to dogbite.)

in India: benduga, bendugali, bendulike, bodige hallu, bodulike hallu, idou-moulli, naaikooli, naaikuli, tiri-itti-canni, vathamparatti

Scleropyrum wallichianum (Wight & Arn.) Arn. (*Sphaerocarya wallichiana* Wight & Arn.)

India. Small trees, dioecious, white trunk with large heavy thorns or long sharp conical spines, low branches, leathery leaves, unisexual flowers in spikes, fleshy fruit

See *Flora Indica*; or descriptions of Indian Plants 2: 371. 1824, *Edinburgh Philosophical Journal* 15: 180. 1832, *Magazine of Zoology and Botany* 2: 549–550. 1838

(A poultice for wounds, cuts, eczema, skin diseases.)

in India: benduga, bendugali, bendulike, bodige hallu, bodlegahallu, bodlige, bodulike hallu, bodulikehallu, idou-moulli, idumalli, irumulli, ittimalli, mullalaka, naaikooli, naaikuli, naikkuli, nayikuli, tiri-itti-canni, tiriitticanni, tiruvittikanni, vathamparatti

in Malaysia: telusok ayam

Sclerostachya (Andersson ex Hackel)

A. Camus Poaceae (Gramineae)

From the Greek *skleros* and *stachys* ‘spike, an ear of grain, ear of corn’, *Andropogon* subgen. *Sclerostachya* Andersson ex Hack., sometimes referred to *Saccharum* and *Miscanthus*, hybrids with *Narenga* and *Saccharum*, see *Species Plantarum* 1: 54. 1753, *Synopsis Plantarum Glumacearum* 1: 411. 1855 [1854], *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165–166. 1855, *Monographiae Phanerogamarum* 6: 119, 121. 1889 and *Contr. U.S. Natl. Herb.* 9: 400. 1905, *U.S. Dept. Agric. Bull.* 772: 254. 1920, *Flore Générale de l’Indo-Chine* 7: 243. 1922, *The Flora of the Malay Peninsula* 5: 194. 1925, *Proceedings of the 14th Congress of the International Society of Sugar Cane Technologists* 1972: 241. 1972, *Caryologia* 37: 351–357. 1984, *Flora Mesoamericana* 6: 378–379. 1994, *Sida* 16(2): 233–244. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768–774. 1994, *Sida* 16(3): 551–580. 1995, *J. Fujian Acad. Agric. Sci.* 11(3): 19–22. 1996, *Journal of Plant Research* 115: 381–392. 2002, *Contributions from the United States National Herbarium* 46: 294–295, 550–557. 2003.

Sclerostachya fusca (Roxb.) A. Camus (*Eriochrysis attenuata* Nees ex Steud.; *Eriochrysis fusca* (Roxb.)

Trin.; *Miscanthus fuscus* (Roxb.) Benth.; *Saccharum fuscum* Roxb.; *Sclerostachya milroyi* Bor; *Tricholaena fusca* (Roxb.) Schult.)

Asia tropical, India, Thailand. Perennial, coarse, tufted, silky, reed-like, ligule a ciliate membrane-like, rigid leaves linear-lanceolate with rough margins, inflorescence paniculate with branches whorled or solitary, spikelets in pairs, used for thatching and light fences, pens and screens, related to *Saccharum officinarum* L., common in moist habitats, in shallow depressions

See *Essai d’une Nouvelle Agrostographie* 8. 1812, *Flora Indica; or descriptions ...* 1: 241. 1820, *Mantissa* 2: 8, 163–164. 1824, *Mémoires de l’Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Fr., nom. illeg., non *Glyceria arundinacea* Kunth; *Grapphephorum arundinaceum* (Roem. & Schult.)

Asch.; *Graphephorum festucaceum* (Willd.) A. Gray; *Schedonorus arundinaceus* Roem. & Schult.; *Schenodorus arundinaceus* Gaudin ex Roem. & Schult.; *Scolochloa arundinacea* (Roem. & Schult.) MacMill.; *Triodia festucacea* (Willd.) Roth

Europe. Succulent rhizomes, spikelets several-flowered, floret callus bearded, lemmas 5–7-nerved

See *Species Plantarum* 1: 63–64, 81. 1753, *Flora Cochinchinensis* 1: 1, 11. 1790, *Utkast til en Svensk Flora* 49. 1792, *Svensk Flora* ed. 2. 47. 1798, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 126. 1809, *Essai d'une Nouvelle Agrostographie* 78, 152, 161. 1812, *Systema Vegetabilium* 2: 700. 1817, *Fundamenta Agrostographiae* 156. 1820, *J. C. Rohlings Deutschlands Flora* 1(2): 664. 1823, *Flora Suecica* 1: 64. 1824, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 136–137. 1827, *Enumeratio Plantarum Phaenogamarum in Germania* 1(1): 382. 1827, *Summa Vegetabilium Scandinaviae* 247. 1846, *Proceedings of the American Academy of Arts and Sciences* 5: 191. 1861, *Flora der Provinz Brandenburg* 1: 852. 1864, *The Metaspermae of the Minnesota Valley* 79. 1892 and *United States Department of Agriculture: Bulletin* 772: 38, f. 11. 1920, *Taxon* 30: 509–511. 1981, *Acta Biologica Cracoviensia, Series Botanica* 27: 57–74. 1985, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 476–479. 1991, *Contributions from the United States National Herbarium* 48: 609. 2003

(For skin diseases, emetic, antiseptic. Ceremonial.)

in English: sprangletop

Scolopia Schreber Flacourtiaceae (Salicaceae)

Greek *skolops*, *skolopos* ‘a thorn, a pointed stick, anything pointed’, *skolos* ‘thorn, prickle’, referring to the youngest shoots and the presence of thorns; see Johann Christian Daniel von Schreber (1739–1810), *Genera Plantarum*, ed. 8[a]. 335. 1789, *Species Plantarum*. Editio quarta 2: 981. 1799 and *Notul. Syst.* (Paris) 15: 3. 1954.

Scolopia crenata Clos

India.

See *Annales des Sciences Naturelles; Botanique*, série 4 8: 250. 1857

(Used in Sidha.)

in India: adicayjaple, adike japle, adikejaple, attakkejabbale, baakshasamaanu, caralu, charalu, chiralu, dodda jaapaala, dodda jabbale, doddajaapaalajaple, doddajabbale, doddajapalu, heccaralu, hechhirlu, hitterloo, hitterlu, jaapaale, jabbale, jabbati, japala, japle, jasle, karim kara, kodali mara, kodalimara, kokkare, kokkari, mullu kara, purusha kaesari, rakshasimanu, sarelmaram

Scolymus L. Asteraceae

Greek *skolymos* ‘cardoon, an edible kind of thistle’; *scolymos*, *i* is the Latin name used by Plinius for *Scolymus hispanicus* L., the Spanish oyster-plant, for an edible kind of thistle, cardoon, *Cynara cardunculus* L.; see Carl Linnaeus, *Species Plantarum*. 2: 813–814. 1753 and *Genera Plantarum*. Ed. 5. 355. 1754.

Scolymus hispanicus Linnaeus

Europe. Herb, considered to be a noxious weed

See *Sp. Pl.* 2: 813. 1753, *Gen. Pl.* ed. 5, 355. 1754

(Disinfectant.)

in English: golden thistle, Spanish oyster, Spanish oyster-plant, Spanish salsify

Scoparia L. Scrophulariaceae (Plantaginaceae)

Broomlike, from the Latin *scopa*, *ae* ‘twigs, shoots, a broom’; see Carl Linnaeus, *Species Plantarum*. 1: 116. 1753, *Genera Plantarum*. Ed. 5. 52. 1754, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 1: 822. 1829 and *Field Museum of Natural History, Botanical Series* 13(5B/3): 461–717. 1971, *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Flora of Ecuador* 21: 1–189. 1984, *Boletín de la Sociedad Botánica de México* 69: 101–121. 2001, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005, *Biodiversidad del estado de Tabasco* Cap. 5: 111–144. 2005, *Proceedings of the California Academy of Sciences, Series 4*, 57(7): 247–355. 2006.

Scoparia dulcis L. (*Capraria dulcis* (L.) Kuntze; *Capraria dulcis* Kuntze; *Gratiola micrantha* Nutt.; *Gratiola micrantha* Franch. & Sav.; *Scoparia grandiflora* Nash; *Scoparia ternata* Forssk.)

Pantropical, tropical America. Herb, semiwoody, suffruticose, twiggy, erect, many-branched, ribbed and glabrous twigs, opposite or whorled leaves gland-dotted beneath, stipules absent, small axillary bisexual actinomorphic flowers, calyx deeply lobed, corolla white or very pale-purple, fruit a subglobose capsule yellowish-brown, seeds oblong-globose to ovoid, a common weed on waste grounds, along roads, in dry deciduous forest and dry rice fields

See *Species Plantarum* 1: 17, 116. 1753, *Species Plantarum* 2: 628. 1753, *Flora Aegyptiaco-Arabica* 30. 1775, *American Journal of Science* 5(2): 287. 1822, Franchet, Adrien René (1834–1900), *Enumeratio plantarum in Japonia sponte crescentium hucusque rite cognitarum*. Scorodocarpus Becc. Olacaceae

Greek *skorodon*, *skordon* 'garlic' and *karpos* 'fruit', onion-scented, see *Nuovo Giornale Botanico Italiano* 10: 274. 1877.

Scorodocarpus borneensis (Baillon) Becc. (*Ximenia borneensis* Baill.)

Malay Peninsula.

See *Adansonia* 11: 271. 1874, *Nuovo Giornale Botanico Italiano* 10: 274. 1877

(The fruit of *Scorodocarpus borneensis* used as antidote to the poison of *Antiaris toxicaria*.)

Malayan names: bawang hutan, kulim, mai kulim, ungsunah

Scorodophloeus Harms Fabaceae (Caesalpinieae, Detarieae)

Greek *skorodon*, *skordon* 'garlic' and *phloios* 'bark of trees', see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 77. 1901.

Scorodophloeus fischeri (Taub.) J. Léonard (*Theodora fischeri* Taub.; *Theodora fischeri* Taub. ex Engl.)

East Africa, Kenya, Tanzania. Perennial non-climbing tree, many-branched, coastal

See *Abh. Preuss. Akad. Wiss.* (1894) 18, 36. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 198. 1895 and *Bulletin du Jardin Botanique de l'État* 21: 419. 1951

(Roots anthelmintic.)

in East Africa: mugodoma, muhande

Scorzonera L. Asteraceae

Italian *scorzona*, *scherzona*, *scorsone*, *scurzona*, *saettonne* 'a snake, an adder', Spanish *escorzonera* or *escuerçonera*, Catalan *escurçonera* (*escurçó* 'viper'), Latin *excurtio*, *onis*, *curtio*, *onis*, spoken Latin *excurtionem*, *curtionem* (*curtus* 'short'), referring to an use as antidote against snakebite; see Carl Linnaeus, *Species Plantarum*. 2: 790–792. 1753, *Genera Plantarum*. Ed. 5. 346. 1754, *Flore Française*. Troisième Édition 4: 61. 1805 and B. Migliorini, *Storia della lingua italiana*. Firenze 1960, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVIII: 265–266. Torino 1997.

Scorzonera ciliata Forssk.

Mediterranean.

See *Fl. Aegypt.-Arab.* 143. 1775

(Viper grass.)

Scorzonera divaricata Turczaninow var. *sublilacina* Maximowicz

China.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 5: 181. 1832, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 32(4): 494. 1888

(For treating serious cases of boils.)

in China: zi hua guai zhou ya cong

Scorzonera tunicata Rech.f. & Koie (alt. names Kōie, Kōie)

Iran.

See Kōie, Mogens Engell (1911–), *Symbolae afghanicae*: enumeration and descriptions of the plants collected by L. Edelberg and M. Kōie on "The 3rd Danish expedition to central Asia" and by W. Koels, [and others] in Afghanistan., in *K. Danske Vidensk. Selsk. Biol. Skr.*, 8–10, 13, 14, 1954–1965

(Tonic, cooling.)

in Pakistan: dagham

Scorzonera virgata DC.

India.

See *Prodr.* (DC.) 7(1): 125. 1838

(Plant decoction given in jaundice; a tincture applied externally to sprains and wounds.)

in India: chughlam, rtsa-mkhris, sanmaho, tharnu

Scottellia Oliver Achariaceae (Flacourtiaceae)

For the English (b. India, Calcutta) botanist George Francis Scott-Elliot, 1862–1934 (d. Dumfries, Scotland), 1890 Fellow of the Linnean Society, botanist on the Sierra Leone Boundary Commission, plant collector in Sierra Leone (1891–1892) and in East Africa (with the British East Africa Expedition, 1893–1894), President of the Antiquarian Society, among his writings are *The flora of Dumfriesshire*. Dumfries 1896 and *A Naturalist in Mid-Africa*: being an account of a journey to the Mountains of the Moon and Tanganyika. London 1896. See *Hooker's Icon. Pl.* 23: t. 2265. 1893 [1894 publ. May 1893] and Benjamin Daydon Jackson (1846–1927), "A list of the contributors to the herbarium of the Royal Botanic Gardens, Kew, brought down to 31st December 1899." *Bull. misc. Inf. Kew.* 1901 and "A list of the collectors whose plants are in the herbarium of the Royal Botanic Gardens, Kew, to 31st December 1899." in *Kew Bulletin*. 1–80. 1901, G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. London 1904, Samuel P. Oliver, *The life of Philibert Commerson*. Edited by G.F. Scott-Elliot. London 1909, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933; Auguste Jean Baptiste Chevalier (1873–1956), *Flore vivante de l'Afrique Occidentale Française*. 1: xxvii–xxx. Paris 1938, [Sotheby's - Marquess of Bute], *Catalogue of a portion of the valuable library from Dumfries House, Ayrshire*. The Property of the Most Hon. The Marquess of Bute. The First Portion: the important collection of mathematical and scientific books. Sale of 3–4 July 1961. The Second Portion: Americana, early printed books, travel, early Italian literature, bibliography, books on the arts and architecture. Sale of 16–18 Oct. 1961. London, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 504. 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 73–74. 1971, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 320. Cape Town 1981.

Scottellia kamerunensis Gilg

Tropical Africa. Tree, small white flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40(4): 447. 1908

(Bark used as fish poison.)

Scrophularia L. Scrophulariaceae

Latin *scrofulae*, *arum* 'scrofula, swelling of the glands of the neck', *scrofa*, *ae* 'swine-breeding', *herba scrophularia*, Greek *choirades* 'scrofula' and *choiros*, *choira* 'a pig', referring to the medicinal properties; see Carl Linnaeus, *Species Plantarum* 2: 619–621. 1753, *Genera Plantarum*. Ed. 5. 271. 1754, *Genera Plantarum* 117–118. 1789, Lindley, John (1799–1865), *Nixus plantarum*. Londini: apud Ridgway et filios, 1833, *Prodromus Systematis Naturalis Regni Vegetabilis*

10: 310. 1846, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 804. 1852 and *Botanischer Jahresbericht* 44: 428. 1910, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 572. 1996, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVIII: 31–313. Torino 1997.

Scrophularia buergeriana Miquel var. *buergeriana* (*Scrophularia oldhami* Oliver)

China, Japan. Herb

See *Ann. Mus. Bot. Lugduno-Batavi*. 2: 116. 1865, *Journal of the Linnean Society, Botany* 9: 167. 1867 and *Fl. Reipubl. Popularis Sin.* 67(2): 395. 1979

(Roots used for tonsillitis, pharyngitis, skin inflammation.)

in China: bei xuan shen

Scrophularia buergeriana Miquel var. *tsinglingensis* P.C. Tsoong

China.

See *Ann. Mus. Bot. Lugduno-Batavi*. 2: 116. 1865 and *Flora Reipublicae Popularis Sinicae* 67(2): 72, 395 (addenda). 1979

(Antiinflammatory.)

in China: bei qin ling xuan shen

Scrophularia deserti Delile

Egypt.

See *Species Plantarum* 2: 619–621. 1753 and *Egyptian Journal of Botany* 37(2): 129–156. 1997, *Taxon* 34: 727–730. 1985

(For skin diseases)

Scrophularia marilandica L.

North America.

See *Species Plantarum* 2: 619–621. 1753 and *Eriogenia* 11: 1–8. 1991

(Antiinflammatory, antiseptic.)

in English: pilewort, carpenter's-square

Scrophularia ningpoensis Hemsley (*Scrophularia microdonta* Franchet; *Scrophularia silvestrii* Bonati & Pampanini)

China. Perennial herb, erect, tetragonal, pubescent, glandular, fleshy roots, leaves opposite and alternate, elongated and loose terminal thyrse, flowers deep brown, calyx campanulate, corolla irregular, obovoid capsule, along streams

See *Journal of the Linnean Society, Botany* 26(174): 178–179. 1890 and *Bulletin de la Société Botanique de France* 47(1): 11–12. 1900, *Nuovo Giornale Botanico Italiano*, n. s. 18(2): 179–180. 1911, *Acta Phytotaxonomica Sinica* 22: 243–249. 1984, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989

(Roots used for tonsillitis, pharyngitis, skin inflammation.)

in English: black figwort, Ningpo figwort

in China: xuan shen

in Vietnam: hac sam

Scurrula L. Loranthaceae

Latin *scurrula*, *ae* 'a little buffoon', *scurra*, *ae* 'a guardsman, a dandy', *scurrantis speciem praebere* 'of a buffoonish parasite' (Quintus Horatius Flaccus), see *Species Plantarum* 1: 110. 1753 and *Flora Reipublicae Popularis Sinicae* 24: 111. 1988.

Scurrula atropurpurea (Blume) Danser (*Cichlanthus philippensis* (Cham. & Schltdl.) Tiegh.; *Loranthus atropurpureus* Blume; *Loranthus philippensis* Cham. & Schltdl.; *Loranthus philippensis* var. *macroantherus* Lecomte; *Scurrula philippensis* (Cham. & Schltdl.) G. Don)

China.

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. Vindobonæ: J.P. Kraus, 1762, *Verhandeligen van het bataviaasch genootschap van kunsten en wetenschappen* 9: 186. 1823, *Linnaea* 3: 204. 1828, *A General History of the Dichlamydeous Plants* 3: 442. 1834, *Bulletin de la Société Botanique de France* 42: 253. 1895 and *Notulae Systematicae*. *Herbier du Museum de Paris* 3: 166. 1915, *Bulletin du Jardin Botanique de Buitenzorg* 10: 349. 1929

(Paste of stembark applied on wounds; stem decoction taken by women to cure vaginal discharge. Pieces of stem, if tied on body of women or female of the cattle, cause infertility. Stem-tips boiled in mustard oil, luke warm oil applied on aching ears.)

in China: li guo ji sheng

in India: begnar banda, sindhar banda, sum

Scurrula fusca G. Don

Indonesia. Woody parasite, ripe fruits eaten by a flower-pecker, host *Citrus* spp.

See *A General History of the Dichlamydeous Plants* 3: 421. 1834

(A decoction of dried leaves and stem, mixed with *Dendrophthoe constricta*, drunk to treat stomachache, dysentery, cholera and diarrhea. Magic, ritual, if the plant is found on bamboo, it is thought to bring good luck.)

in English: flower-pecker fruit

in Indonesia: buah acheng

Scurrula parasitica Linnaeus

China.

See *Species Plantarum* 1: 110. 1753 and Kiu Hua-shing. *Loranthoideae*. In: Kiu Hua-shing & Ling Yeou-ruenn, eds., *Fl. Reipubl. Popularis Sin.* 24: 87–139. 1988

(Shoots decoction taken against body pain. Whole plant made into a paste given to pregnant women for male childbirth. Inflorescence made into a sticky paste for catching birds.)

in China: hong hua ji sheng

in India: dhatki madang, mayingnarotong

in Thailand: teuleu, theuleu

Scurrula parasitica L. var. ***parasitica*** (*Cichlanthus scurrula* (L.) Tiegh.; *Cichlanthus scurrula* Tiegh.; *Loranthus chinensis* var. *formosanus* Lecomte; *Loranthus parasiticus* (L.) Merr.; *Loranthus parasiticus* Merr.; *Loranthus parasiticus* Druce; *Loranthus scurrula* L.; *Taxillus parasiticus* (L.) S.T. Chiu; *Taxillus parasiticus* (L.) T.B. Nguyen)

China.

See *Species Plantarum* 1: 110. 1753, *Species Plantarum*, Editio Secunda 1: 472. 1762, *Bulletin de la Société Botanique de France* 42: 253. 1895 and *Plantae Wilsonianae* 3(2): 316. 1916, *Philippine Journal of Science* 15(3): 232. 1919, *Taiwania* 41(2): 159. 1996

(Stem pieces when tied to a married woman cause infertility.)

in China: hong hua ji sheng

Scutellaria L. Lamiaceae (Labiatae)

Latin *scutella*, *ae* ‘a small shield or dish, saucer’, the upper calyx lip has a crest or a pouch; see Carl Linnaeus, *Species Plantarum*. 2: 598–600. 1753, *Genera Plantarum*. Ed. 5. 260. 1754, *Nova Genera et Species Plantarum* (quarto ed.) 2: 327, t. 157. 1817, *Nova Genera et Species Plantarum* (folio ed.) 2: 262. 1818, *Rheinische Flora* 373. 1843 and *Repert. Spec. Nov. Regni Veg. Beih.* 85: 178. 1936, *Taxon* 41: 569. 1992, *Taxon* 44: 611–612. 1995.

Scutellaria amoena C.H. Wright var. ***amoena*** (*Scutellaria purpureocoerulea* Pax & K. Hoffmann)

China.

See *Repert. Spec. Nov. Regni Veg. Beih.* 12: 476. 1922

(Used against the fever.)

in English: Yunnan skullcap

in China: dian huang qin

Scutellaria baicalensis Georgi (*Scutellaria adamsii* A. Ham.; *Scutellaria baicalensis* f. *albiflora* H.W. Jen & Y.J. Chang; *Scutellaria davurica* Pall. ex Ledeb.; *Scutellaria lanceolaria* Miquel; *Scutellaria macrantha* Fischer ex Rchb.; *Scutellaria speciosa* Fisch. ex Turcz.)

Siberia to Vietnam. Perennial herb, spreading, erect, tetragonal, branching near the base, leaves opposite shortly

petiolate, flowers blue, calyx campanulate bilabiate, corolla tube long

See *Bemerk. Reise Russ. Reich.* 1: 223. 1775, *Iconogr. Bot. Pl. Crit.* 5: 52. 1827, *Esq. Monogr. Scutellaria* 34. 1832, *Fl. Ross.* 3: 397. 1849, *Bull. Soc. Imp. Naturalistes Moscou* 24(2): 389. 1851, *Ann. Mus. Bot. Lugduno-Batavi* 2: 110. 1865 and *J. Beijing Forest. Univ.* 13(3): 3. 1991

(Roots antiviral, antitumour, febrifuge, for relieving fever and diminishing inflammation, for common cold, influenza, jaundice, dysentery, fetal distress, skin inflammation, burns; dried roots in the treatment of suppurative dermatitis, diarrhea and inflammatory diseases.)

in English: Baical skullcap, Baikal skullcap, Chinese skullcap

in China: huang chin, huang qin, huang oin

Scutellaria barbata D. Don (*Scutellaria adenophylla* Miquel; *Scutellaria cavaleriei* H. Léveillé & Vaniot; *Scutellaria komarovii* H. Léveillé & Vaniot; *Scutellaria minor* Linnaeus var. *indica* Benth; *Scutellaria squamulosa* A. Ham.; *Scutellaria rivularis* Wallich ex Benth)

Himalaya to Temp. E. Asia. Annual or perennial herb, glabrous, creeping, quadrangular, leaves opposite, blue flowers axillary, calyx and corolla glabrous or pubescent, calyx 2-lipped, ovary oblique, very minute fruits smooth, on damp shady slopes

See *Species Plantarum* 2: 598–600. 1753, *Prodr. Fl. Nepal.* 109. 1825, *A Numerical List of Dried Specimens* n. 214. 1829, *Pl. Asiat. Rar.* 2: 66. 1831, *Esq. Monogr. Scutellaria* 35. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 427. 1848, *J. Bot. Néerl.* 1: 117. 1861 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(182–184): 402. 1910, *Taiwania* 40(1): 35–36. 1995

(Whole plant a remedy for fatigue, ascites, abdominal pain, pyodermas. Used for traumatic injuries and to reduce inflammation caused by various diseases.)

in English: barbed skullcap

in China: ban zhi lian

Scutellaria discolor Wallich ex Benth var. ***discolor*** (*Scutellaria colebrookiana* Zoll. & Moritzi; *Scutellaria heteropoda* Miq.; *Scutellaria salvia* H. Léveillé; *Scutellaria zollingeriana* Briq.)

Trop. Asia, China. A weed of cultivation

See *Plantae Asiaticae Rariores* 1: 66. 1830, *Syst. Verz.*: 54. 1846, *Fl. Ned. Ind.* 2: 972. 1859, *Annuaire Conserv. Jard. Bot. Genève* 2: 104. 1898 and *Bull. Acad. Int. Géogr. Bot.* 24(295–297): 252. 1914

(Root juice given in case of indigestion and fevers. Leaves for stomachache, skin diseases and snakebite; red water after boiling the leaves given for high fevers, colds, sore throats and enteritis. Veterinary medicine, whole plant fed to cattle for improving lactation.)

in China: yi se huang qin

in India: anedi, lahi

in Nepal: ghundo, mulapate

Scutellaria franchetiana H. Léveillé (*Scutellaria angulosa* Benth. var. *franchetiana* (H. Léveillé) Kudô)

China.

See *Plantae Asiaticae Rariores* 1: 67. 1830 and *Repert. Spec. Nov. Regni Veg.* 9(208–210): 221. 1911, *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2: 171. 1929

(Used in treatment of traumatic swelling, coughs.)

in China: yan huo xiang

Scutellaria galericulata L. (*Cassida galericulata* (L.) Scop.; *Cassida major* Gilib., opus utique oppr.; *Scutellaria adamssii* Spreng.; *Scutellaria epilobiifolia* A. (Used for traumatic injuries.)

in China: han xin cao

Scutellaria lateriflora L. (*Cassida lateriflora* (L.) Moench; *Scutellaria lateriflora* f. *albiflora* Fernald; *Scutellaria lateriflora* f. *rhodantha* Fernald; *Scutellaria lateriflora* var. *albiflora* Farw.; *Scutellaria lateriflora* var. *axillaris* Jenn.)

Canada, North America. Small perennial herb, bushy, erect, rhizomatous, flowers blue, moist soil, marshy soil

See *Species Plantarum* 2: 598–600. 1753, *Suppl. Meth.*: 145. 1802 and *Rep. (Annual) Michigan Acad. Sci.* 19: 249. 1917, *J. Wash. Acad. Sci.* 10: 457. 1920, *Rhodora* 23: 86. 1921, *Systematic Botany* 3: 342–348. 1978, *Caryologia* 33: 339–346. 1980, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 4: 331–339. 1981, *Taxon* 31(2): 344–360. 1982

(Stomachic, antiseptic, antiinflammatory.)

Scutellaria likiangensis Diels

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 239–240. 1912

(Used as a febrifuge, for relieving fever, and diminishing inflammation.)

in China: li jiang huang qin

Scutellaria luzonica Rolfe (*Scutellaria javanica* Jungh. var. *luzonica* (Rolfe) H. Keng; *Scutellaria luzonica* Hemsl.; *Scutellaria playfairi* Kudô)

Philippines.

See *Journal of the Linnean Society, Botany* 21(135): 315. 1884, *Journal of the Linnean Society, Botany* 26(175): 296. 1890 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2(2): 254–255. 1929, *The Gardens' Bulletin Singapore* 24: 171. 1969

(Plant used for stomach pains.)

in Philippines: sidit

Scutellaria obtusifolia Hemsley var. *obtusifolia*

China.

See *Journal of the Linnean Society, Botany* 26(175): 296. 1890

(Used for bacterial dysentery and colds.)

in China: dun ye huang qin

Scutellaria omeiensis C.Y. Wu var. *serratifolia* C.Y. Wu & S. Chow

China. Herb, subtropical broad-leaved forests

See *Flora Reipublicae Popularis Sinicae* 65(2): 215–216, 584–585 (addenda). 1977

(Stomachic, astringent.)

in China: ju ye bian zhong

Scutellaria orthocalyx Handel-Mazzetti

China, N. Vietnam. Herb, flowers blue-violet with base of lip white, growing in open scrub

See *Acta Horti Gothoburgensis* 9(5): 75–76. 1934

(Astringent.)

in China: zhi e huang qin

Scutellaria pontica K. Koch

Turkey.

See *Linnaea* 21: 701. 1849

(Antifungal, insecticide.)

Scutellaria quadrilobulata Sun ex C.H. Hu var. *quadrilobulata*

China.

See *Acta Phytotaxonomica Sinica* 11(1): 41–42, pl. 6, f. 4–6. 1966

(Used as a diaphoretic.)

in China: si lie hua huang qin

Scutellaria salviifolia Benth. (*Scutellaria kurdica* Post; *Scutellaria kurdica* Bornm.)

Turkey.

See *Labiatarum Genera et Species* 433. 1834 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 33. 1917

(Used for the treatment of gastric ailments.)

Scutellaria scandens D. Don (*Scutellaria angulosa* Benth.; *Scutellaria celtidifolia* A. Ham.; *Scutellaria scandens* Buch.-Ham. ex D. Don)

Himalaya, Nepal.

See *Prodr. Fl. Nepal.*: 110. 1825, *Pl. Asiat. Rar.* (Wallich) 1: 67. 1830, *Esq. Monogr. Scutellaria*: 27. 1832 and *Taxon* 30: 515. 1981, *Rev. Cytol. Biol. Vég., Bot.* 7: 5–16. 1984

(Plant decoction used in epilepsy, ague, fever. Root juice applied to treat backaches. Veterinary medicine, root juice given to domestic animals to prevent miscarriage.)

in China: leng jing huang qin

in Nepal: nalsal

Scutellaria scordifolia Fischer ex Schrank var. *scordifolia* (*Scutellaria depressa* Fisch. ex Ledeb.; *Scutellaria gale-riculata* Linnaeus var. *scordifolia* Regel; *Scutellaria reptans* Pall. ex Ledeb.; *Scutellaria scordifolia* f. *glabrescens* Franchet; *Scutellaria scordifolia* var. *subglabra* V. Komarov; *Scutellaria scordiifolia* var. *scordiifolia*)

Siberia to China.

See *Denkschriften der Bayer. Botanischen Gesellschaft in Regensburg* 2: 55. 1822, *Fl. Ross.* 3: 398. 1849, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 4: 118, n. 388. 1861, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 6: 120. 1883

(Rhizome astringent, stomachic.)

in China: bing tou huang qin

Scutellaria tayloriana Dunn (*Scutellaria tayloriana* var. *polytricha* Handel-Mazzetti)

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 8(37): 166–167. 1913, *Symb. Sin.* 7(4): 914. 1936

(Used for coughs, hemoptysis and dysentery.)

in China: pian hua huang qin

Scutellaria violacea B. Heyne ex Benth. (*Scutellaria violacea* B. Heyne ex Wall.)

Himalaya, India.

See *Pl. Asiat. Rar.* (Wallich) 1: 66–67. 1830 and *Flora Reipublicae Popularis Sinicae* 65(2): 578. 1977, *Proc. Indian Sci. Congr. Assoc.* 71(3-VI): 80–81. 1984, *Proc. Indian Acad. Sci.* 94: 619–626. 1985, *J. Indian Bot. Soc.* 65: 304–309. 1986, *Proc. Indian Sci. Congr. Assoc.* 86(3,IV): 99. 1999

(Leaf paste warmed and applied to muscle sprains.)

in India: pande arasi chedy

Scutellaria yunnanensis H. Léveillé var. *yunnanensis*

China to Vietnam.

See *Repertorium Specierum Novarum Regni Vegetabilis* 9(208–210): 221. 1911

(Used for fever and nebula.)

in China: hong jing huang qin

Scutia (DC.) Brongn. Rhamnaceae

Latin *scutum*, *i* ‘a shield’, referring to the form of the disk, see *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 29. 1825, *Mém. Fam. Rhamnées* 55. 1826, *Annales des Sciences Naturelles* (Paris) 10: 362–363. 1827.

Scutia myrtina (Burm.f.) Kurz (*Rhamnus myrtina* Burm.f.; *Scutia commersonii* Brongn.; *Scutia myrtina* Kurz; *Scutia myrtina* Merr.) (the specific name means ‘myrtle-like’)

Kenya, Uganda, South Africa, Madagascar, India, Sri Lanka, Vietnam. Shrub, spiny, scrambling, branches spreading with recurved paired thorns, pale green flowers, sweet edible fruits purple-black

See *Fl. Ind.* (N.L. Burman) 60. 1768, *Mém. Fam. Rhamnées* 56. 1826, *Annales des Sciences Naturelles* (Paris) 10: 363. 1827, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 44(3): 168. 1876 [1875 publ. 13 Jan 1876] and *Philipp. J. Sci.* 19: 363. 1921

(Twigs made into a paste applied all over the body to cure body ache and fever. Roots mixed with those of *Ximenia americana* and eaten mixed with goat and sheep fat in the treatment of gonorrhoea. Leaf paste applied for itching; pounded leaves and a little water used for ringworm.)

in English: cat-thorn

in India: karidihannu, nachakkeran, sooli

in Kenya: kitumbuu, letwa, mbombo-kenya, migodha, murangari, osanankururi, osanankuruti, osinon-kurruti, saiyakirur, sananguri, tsina

in Rodrigues Isl.: bambara

in Southern Africa: bobbejaantou, bos-wag-’n-bietjie, droegies, droog-my-keel (= dry-my-throat), droog-my-keel bossie, katdoring, katdoringnaels, katnael, katnaal, rank-wag-’n-bietjie, spindle, spingle, wag-’n-bietjie; uSondela, isiBinda, isiPinga, uSondeza, uSondelanganga (= approach and let me kiss), umsondeza (Zulu); isiPhingo, isipinga, umSondezo (= that which is brought near), umQapuna, umQaphula, umQokwane (Xhosa)

Scyphiphora C.F. Gaertn. Rubiaceae

Greek *skyphos* and *phero*, *phoreo*, *phorein* ‘to bear’, *phoros* ‘bearing, carrying’, referring to the flowers or to the ridged fruits; see Carl (Karl) Friedrich von Gaertner (1772–1850), *Supplementum carpologiae seu continuati operis Josephi Gaertner de fructibus et seminibus plantarum*. 1806, *Malayan Misc.* 1(5): 12. 1820 and *Annuaire Conserv. Jard. Bot. Genève* 11/12: 35–135. 1908.

Scyphiphora hydrophylacea C.F. Gaertner (*Epithinia malayana* Jack; *Ixora manila* Blanco; *Ixora microphylla* Drake; *Ixora parvifolia* B. Boivin; *Scyphiphora hydrophylacea* C.F. Gaertn.; *Scyphiphora malayana* Bedd.; *Scyphiphora malayana* (Jack) Bedd.)

Trop. Asia, Madagascar. Shrub, greenish-orange flowers

See *De Fructibus et Seminibus Plantarum...* 3: 91, pl. 196, f. 2. 1806, *Malayan Misc.* 1(5): 12. 1820, *Fl. Filip.*: 60. 1837, Beddome, Richard Henry (1830–1911), *The flora sylvatica for southern India*: t. 29, f. 5. Madras: Printed by Gantz Brothers, [1869–1874], *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1307. 1897 and *Opera Botanica Belgica* 6: 143–172. 1993, *J. Trop. Subtrop. Bot.* 15: 249–252. 2007, *Molecules* 15: 2473–2477. 2010

(Cytotoxic. Leaf extract stomachic.)

in English: common scyphiphora, yamstick mangrove

Malayan names: chengam, chingam, sebasah, singam

in Papua New Guinea: akora

in Philippines: nilad

Scyphostegia Stapf Scyphostegiaceae (Malpighiales, Salicaceae)

Greek *skyphos* ‘cup, can’ and *stegē* ‘covering, shelter’, possibly referring to the tubular bracts or to the large nectary glands, see *Transactions of the Linnean Society of London, Botany* 4(2): 217. [1894–1896 publ. Dec 1894] and *The Families of Flowering Plants. I. Dicotyledons* 1: 229. 1926, *Proceedings of the National Institute of Science of India. Part B: Biological Science* 19: 127–142. 1953, van Steenis, C.G.G.J. *Scyphostegiaceae*. Pp. 297–299 in Vol. 5, *Flora Malesiana*, Series 1. 1957, *Blumea* 15: 107–125. 1967, *Kew Bulletin* 57: 141–181. 2002.

Scyphostegia borneensis Stapf (*Scyphostegia borneense* Stapf; *Scyphostegia borneensis* Stapf & Baehni)

Borneo, Malaysia, Sabah, Mt. Kinabalu. Shrubs or small trees, dioecious, toothed and stipulate leaves, inflorescence terminal, telescoping bracts, connate and tubular perianth, fleshy capsules dehiscent from the apex, seeds arillate

See *Transactions of the Linnean Society of London, Botany* 4(2): 218. [1894–1896 publ. Dec 1894] and *Compt. Rend. Soc. Phys. & Hist. Nat. Genève* 1937, liv. 91. 1937

(Veterinary medicine, boiled leaves rubbed to treat mange. Fish poisoning, pound leaves together with roots of *Derris elliptica*.)

in Borneo: delako

in Indonesia: kayu a’tio

Searsia F.A. Barkley Anacardiaceae

Named after Paul B. Sears (1891–1990), head of the Yale School of Botany. *Searsia* is distinct from *Rhus* sensu stricto, limited to the Northern Hemisphere, see *Amer. Midl. Naturalist* 28: 472. 1942, *Fl. Texas* 3: 104. 1943, *Bothalia*

37(2): 165–175. 2007. Genus confused with the genus *Allophylus*, see also *Rhus*. The resinous substance is poisonous in many species such as poison ivy.

Searsia chirindensis (Baker f.) Moffett (*Rhus chirendensis* R. & A. Fernandes; *Rhus chirindensis* Baker f.; *Rhus chirindensis* Bak.f. forma *legatii* (Schönl.) R. & A. Fernandes; *Rhus legatii* Schönl.) (the typical form was first collected near the Chirinda forest in southeast Rhodesia/Zimbabwe near the border)

South Africa. Small tree or shrub, mature tree unarmed, male and female flowers on separate trees, small yellowish green flowers in terminal clusters

See *J. Linn. Soc., Bot.* xl. 49. 1911, *Bothalia* 37(2): 167. 2007

(Bark in the treatment of rheumatism and mental disorders, hysteria.)

in English: bush jarrah, red currant

in Southern Africa: bloedhout, bos-taaibos, bosganna, bostaibos, westelike essenhout; monaatlou, motha-thaa (North Sotho); pegasudza (Shona); iKhababane, inHlokoshiyane-enkulu, isiBanda, umDwendwelencuba, umHlabamvubu (Zulu); muvhadela-phanga (= wood for knife handles) (Venda); inTlokotshane enkulu, umHlakothi, umHlakothi omkhulu (Xhosa)

Searsia discolor (E. Mey. ex Sond.) Moffett (*Rhus discolor* E. Mey. ex Sond., *Rhus discolor* fo. *grandifolia* Schönland; *Rhus discolor* fo. *latifolia* Schönland; *Rhus discolor* fo. *villosissima* Schönland; *Rhus discolor* var. *villosissima* Burt Davy)

South Africa. Small tree or shrub, shrublet, deep root system, leaves trifoliate with a resinous smell when crushed, male and female flowers on separate trees, small yellowish green flowers in clusters, edible drupes, often confused with *Searsia rosmarinifolia*

See *Fl. Cap.* (Harvey) 1: 507. 1860 and *Bothalia* 37(2): 168. 2007

(Branches and leaves believed to be poisonous, edible fruits to cause constipation.)

in English: grassveld currant

in Southern Africa: grasveld taaibos, inHlangushane, inkobeshlungulu, intlokotshane, koppshane, mohlohloane, umnungamabele

Searsia erosa (Thunb.) Moffett (*Rhus erosa* Thunb.)

South Africa. Small tree or shrub, evergreen, small yellowish green flowers

See *Bothalia* 37(2): 168. 2007

(To treat diarrhea. Ceremonial, rainmaking. Veterinary medicine, to treat diarrhea.)

in South Africa: besembos (= broom bush), broom karee, rosyntjebos, soettaaibos, tshilabele

Searsia glutinosa (Hochst. ex A. Rich.) Moffett (*Rhus abyssinica* Oliv.; *Rhus abyssinica* Hochst. ex Oliv.; *Rhus glutinosa* Hochst. ex A. Rich.; *Rhus glutinosa* subsp. *abyssinica* (Oliv.) M.G. Gilbert; *Searsia glutinosa* subsp. *abyssinica* (Hochst. ex Oliv.) Moffett)

Sudan, Eritrea and Ethiopia. Shrub or small tree

See *Fl. Trop. Afr.* [Oliver et al.] 1: 438. 1868 and *Nordic J. Bot.* 6(5): 572. 1986, *Bothalia* 37(2): 168. 2007

(Leaves used to treat influenza. Veterinary medicine, roots to treat udder complaints.)

Searsia gueinzii (Sond.) F.A. Barkley (*Rhus crispa* Schönland; *Rhus crispa* (Harv. ex Engl.) Schönl.; *Rhus gueinzii* Sond.; *Rhus simii* Schönl.; *Rhus simii* Schönl. var. *lydenburgensis* Schönl.; *Rhus spinescens* Diels) (for the German apothecary and collector Wilhelm Gueinzus; see Gustav Kunze, 1793–1851, “Filicum in Promontorio Bonae Spei et ad Portum Natalensum a Gueinzio nuperius collectarum.” *Linnaea*. 18: 113–124. 1844, and also Philipp Bruch, 1781–1847, (with G.W. Bischoff and J.B.W. Lindenberg) “*Musci et Hepatici Kraussiani.*” *Flora*. 29: 132–136. 1846)

Zimbabwe, Mozambique and South Africa. Small tree or shrub

See *Lilloa* xxiii. 253. 1950

(Branches to treat eye complaints; leaf decoction against gall sickness. Root infusion drunk to treat schistosomiasis.)

in English: thorny karree, thorny taaibos

in Southern Africa: doringkaree, inHlangutshane, inHlokoshiyane, motshotlho, nsasane, taaibosdoring, umPhondo

Searsia lancea (L.f.) F.A. Barkley (*Rhus lancea* L.f.; *Rhus lancea* E. Mey. ex Harv. & Sond.; *Rhus viminalis* Ait.; *Rhus viminalis* A. Rich.; *Rhus viminalis* Jacq.)

Zambia, Namibia, South Africa. Tree, evergreen, dioecious shrub or small tree, rough bark, small greenish-yellow inconspicuous flowers, inflorescence an axillary or terminal many-branched panicle, fruits edible, leaves browsed by livestock

See *Supplementum Plantarum* 181. 1782 [1781 publ. Apr 1782], *Hortus Kew.* (W. Aiton) 1: 368. 1789, *Fl. Cap.* (Harvey) 1: 516. 1860 and *Flora of Texas* [C.L. Lundell et al.] 3: 104. 1943, *Australasian Plant Pathology* 32(2): 313–316. 2003, *African Journal of Biotechnology* 7(16): 2787–2789. 2008

(Roots, leaves and stem bark used to treat skin diseases, heart complaints, abdominal and chest complaints, diarrhea, diabetes; roots chewed against stomachache. Leaves of *Rhus lancea* boiled together with *Mentha longifolia* taken to regulate blood pressure.)

in English: African sumac, bastard willow, common karee, karee, karee rhus, karoo tree, karree, willow rhus

in Lesotho: mabelebele (the fruits), tsinabele

in Southern Africa: garas, gewone karee, grootkareehout, hoenderspoorkaree, inHlangutshane, inHlokoshiyane, iQunguwe, kareeboom, kareehout, krieboom, makkaree, mohlwehlwe, mokalabata, monhlohlo, mosabele, moshabela, moshilabele, mosilabele, mosilabelo, mosotlhoana, motlhotlho, motshakhutshakhu, mushakaladza, mutepe, oruso, rivierkaree, rooikaree, rooikareehout, soetkaree, taibos, ucane, waterkaree

Searsia lucida (L.) F.A. Barkley (*Rhus africana* Mill.; *Rhus cavanillesii* DC.; *Rhus lucida* L.; *Rhus lucida* var. *outeniquensis* Schönland; *Rhus lucida* var. *outeniquensis* (Szyszyl.) Schönl.; *Rhus lucida* var. *tipica* Schönl.; *Rhus outeniquensis* Szyszyl.; *Rhus schlechteri* Diels; *Toxicodendron lucidum* (L.) Kuntze)

Zimbabwe and South Africa. Shrub or small tree

See *Species Plantarum* 1: 267. 1753, *Fl. Cap.* (Harvey) 1: 517. 1860 and *Crit. Trad. Conc. Rhus—Monogr. Biol. Soc. Iraq*, iii. (1962–63) 54. 1965, *Bol. Soc. Brot.* 41: 13. 1967, *Fl. S. Afr.*, 19(3:1): 81. 1993, *Bothalia* 37(2): 170. 2007

(Ground bark applied to ringworm infections.)

in English: glossy currant, glossy taibos, shiny leaved rhus, shiny rhus, wild currant

in Southern Africa: besembos, besemkaree, blinktaaibos iNhlkoshiyane, inTlakotshan 'ebomvu, korentbos, kraaibes-sie, rosyntjebos, slaptaaibos, taibos

Searsia natalensis (Bernh. ex Krause) F.A. Barkley (*Rhus natalensis* Bernh. ex Krause; *Rhus natalensis* Bernh.)

South Africa. Small tree

See *Flora* 27: 349. 1844 and *Lilloa* 23: 253. 1950

(Leaf decoctions or infusions drunk to treat measles and pustules.)

in English: Natal karree

in Southern Africa: Nataalkaree, Nataltaaibos; iNhlkoshiyane, inHlokoshiyane (Zulu); umGwele (Xhosa); bikasaza, muKungu, muPuma, muTsonha, muZazati (Shona)

in Tanzania: msigiyo, bujorori, busigyo

in Yoruba: jin, orijin

Searsia paniculata (Wall. ex G. Don) Moffett (*Rhus paniculata* Wall. ex G. Don; *Rhus paniculata* Wall., nom. nud.; *Rhus paniculata* Hook.f.; *Terminthia paniculata* (Wall. ex G. Don) C.Y. Wu & T.L. Ming; *Toxicodendron paniculatum* (Wall. ex G. Don) Kuntze)

Tropical Asia, China.

See *A Numerical List of Dried Specimens* n. 993. 1828, *A General History of the Dichlamydeous Plants* 2: 73. 1832, *Linnaea* 12: 134. 1838 and *Flora Yunnanica* 2: 408. 1979, *Bothalia* 37(2): 171. 2007

(Leaf vapors inhaled to cure cough.)

in Bhutan: khir khobtang, khai roptang shing, prekoptang shing

in China: san ye qi

Searsia pendulina (Jacq.) Moffett (*Rhus pendulina* Jacq.; *Rhus viminalis* auct. non Aiton nec Vahl)

Namibia and South Africa. Small tree, evergreen, slender drooping branches, tiny inconspicuous green flowers, fruits edible, often confused with *Searsia lancea* and *Searsia leptodictya*

See *South African Journal of Botany* 69(2): 199–203. 2003

(Antibacterial, stomachic, sedative, leaves infusion in milk given to children suffering from stomach upsets, colic, spasm.)

in English: river karee, white karee, willow karee

in Southern Africa: garas, kareeboom rosynebos, kareehout, mosilabele, witkaree, rivierkaree, rosyntjebos, wilderosyntjebboom

Searsia pentheri (Zahlbr.) Moffett (*Rhus pentheri* Zahlbr.) (for the Austrian botanical collector and naturalist Arnold Penther, 1865–1931, he published (with the Austrian botanist Emmerich Zederbauer, 1877–1950) *Ergebnisse einer naturwissenschaftlichen Reise zum Erdschias-Dag (Kleinasien)*. Vienna 1905–1906; see also A. Zahlbruckner, *Plantae Pentherianae. Aufzählung der von Dr. A. Penther ... in Südafrika gesammelten Pflanzen*. Wien [Annalen der K.K. Naturhistorischen Hofmuseums] 1900 [–1905])

South Africa.

See *Bothalia* 37(2): 171. 2007

(Stomachic, disinfectant.)

in English: common crow-berry

in Southern Africa: gewone kraaibessie, iNhlkoshiyane, inHlokoshiyane, mutasiri, thornveld taibos

Searsia pyroides (Burch.) Moffett (*Rhus baurii* Schönl.; *Rhus intermedia* Schönl.; *Rhus pyroides* Burch.; *Rhus pyroides* A. Rich.; *Rhus vulgaris* Meikle; *Searsia pyroides* (A. Rich.) T.S. Yi, A.J. Mill. & J. Wen) (Greek *pyr* 'fire' and *eidōs*, *oidēs* 'resemblance')

South Africa. Shrub or small tree, often armed, inconspicuous greenish flowers, pioneer plant, edible sweet-acidic fruits

See *Travels in the interior of South Africa* 1: 340. 1822 and *Molec. Phylog. Evol.* 33(3): 864. 2004, *Bothalia* 37(2): 171. 2007

(May cause a burning sensation.)

in English: common wild currant, fire thorn, fire-thorn karree

in Southern Africa: brandtaaibos, gewone taibos, iNhlkoshiyane, inHlokoshiyane, koditshane, modupaphiri, mogodiri, mogwediri, mogweriri, motshakhutshakhu, mutasiri, ntlokotshane, rooi kareeboom, taibos

Searsia rehmanniana (Engl.) Moffett (*Rhus macowanii* Schonl.; *Rhus macowanii* Schonl. forma *rehmanniana* (Engl.) Schönl.; *Rhus pubescens* Farw. var. *uitenhagensis* Eckl. & Zeyh.; *Rhus rehmanniana* Engl.; *Rhus vulgaris* auct. mult. non Meike) (named for the Austrian–Polish plant collector Anton(i) Rehmann (Rehman), 1840–1917, botanist, geographer, author of *Einige Notizen über die Vegetation der nördlichen Gestade des Schwarzen Meeres*. Brünn 1871 [1872]; see J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 139. 1965, Stafleu and Cowan, *Taxonomic Literature*. 4: 655–656. 1983, G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. 1: 176. 1904, T.W. Aufl. 1993, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 292–294. 1981)

See *Monogr. Phan.* [A. DC. & C. DC.] iv. 422. 1878–1896 and *Bothalia* 37(2): 172. 2007

(Said to be toxic.)

in English: blunt-leaved currant

in Southern Africa: stompblaartaabos, MacOwan's taabos, Rehmann's taabos; iNhlkoshiyane, inHlokoshiyane (Zulu); inTlokolotshane ephakathi (Xhosa); inHlangutshane

Searsia retinorrhoea (Steud. ex Oliv.) Moffett (*Rhus retinorrhoea* Steud. ex Oliv.)

Sudan, Eritrea, Ethiopia. A shrub or small tree

See *Fl. Trop. Afr.* [Oliver et al.] 1: 438. 1868 and *Bothalia* 37(2): 172. 2007

(Leaves antibacterial and antimalarial.)

Sebastiania Sprengel Euphorbiaceae

For the Italian botanist Francesco Antonio Sebastiani, 1782–1821, physician, professor of botany, from 1815 to 1820 Director of the Rome Botanical Garden (first Hortus, behind the fountain of Acqua Paola, Gianicolo), among his publications are *Esposizione del sistema di Linneo*. Romae 1819, *Romanarum plantarum fasciculus primus*. Romae 1813 and *Romanarum plantarum fasciculus alter*. Romae 1815, with Ernesto Mauri (1791–1836) wrote *Florae romanae prodromus*. Romae 1818; see Kurt P.J. Sprengel, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde*. 2: 118–119. Leipzig 1821, *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis* 18 illustratum 48. 1824, *Nova Genera et Species Plantarum ...* 1: 66. 1824, *Neogenyton* 2. 1825, *Archiv für Naturgeschichte* 7: 183, 185. 1841, A. Lasègue, *Musée botanique de Benjamin Delessert*. 1845, *Hooker's Journal of Botany and Kew*

Garden Miscellany 9: 17. 1857, *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 5. 1859 and *Publications of the Field Museum of Natural History, Botanical Series* 2(9): 374–375. 1913, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 254. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 359. 1972, M. Catalano and E. Pellegrini, *L'Orto Botanico di Roma*. Roma 1975, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 254–255. Palermo 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Sebastiania bilocularis S. Watson (*Sapium biloculare* (S. Watson) Pax)

Arizona to Mexico. Tree or shrub, white latex when cut

See *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 2: 118, t. 3. 1820[1821], *Proc. Amer. Acad. Arts* 20: 374. 1885 and *Das Pflanzenreich* 147,5(Heft 52): 221. 1912

(Juice poisonous. Fish poison, and poison for arrows.)

in Spanish: yerba de la flecha

Sebastiania pavoniana (Müll.Arg.) Müll.Arg. (*Gymnanthes pavoniana* Müll.Arg.; *Gymnanthes pringlei* S. Watson ex Pax; *Sebastiania palmeri* Rose; *Sebastiania pavoniana* Müll.Arg.; *Sebastiania pringlei* S. Watson; *Sebastiania ramirezii* Maury)

Mexico to NW. Costa Rica.

See *Linnaea* 32: 106. 1863, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 1189. 1866, *Proc. Amer. Acad. Arts* 26: 149. 1891, *Contr. U. S. Natl. Herb.* 1: 112. 1891

(Juice poisonous. Fish poison, and poison for arrows.)

in Mexico: yerba de la flecha

Secale L. Poaceae (Gramineae)

The classical Latin name *secale* (*sicale*), *secalis* 'a kind of grain, rye, black spelt', *seges*, *segetis* 'a cornfield, a field, ground', Akkadian *se'u*, *sehu* 'grain, corn'. Species of *Secale* L. are outcrossing, taxonomic placement not certain, there is considerable taxonomic confusion concerning this genus, intergeneric hybrids with *Triticum* L., *Agropyron* Gaertner, *Aegilops* L., *Hordeum* L. and *Elytrigia* Desv., see *Species Plantarum* 1: 84. 1753, *Plantae Veronenses* 3: 145. 1754, *Genera Plantarum*. Ed. 5. 36. 1754, *Conspectus Regni Vegetabilis* 48. 1828, N. Tommaseo & B. Bellini, *Dizionario della lingua italiana*. Torino 1865–1879 and *American Journal of Botany* 59(1): 59–70. 1972, *Biol. J. Linn. Soc.* 13: 299–313. 1980, *Feddes Repert.* 95: 425–521. 1984, M. Cortelazzo & P. Zolli,

Dizionario etimologico della lingua italiana. 5: 1174–1175. 1988, Giovanni Semerano, *Le origini della cultura europea*. *Dizionario della lingua Latina e di voci moderne*. 2(2): 559, 560. Apr 2005, *Allergy* 60(5): 619–625. May 2005

(Magic, ritual, ceremonial, a small piece of root is to be tied with a white thread on waist of a pregnant women for safe and easy delivery; just after delivery it should be removed otherwise prolapsus of uterus may result.)

in English: cereal rye, common rye, cultivated rye, rye, silver tip triticale

in Italian: ségale, sécale, sécola, ségala, ségalla, ségla, ségola

in Morocco: seigle cultivé, petit blé dur, orge des chrétiens, skâliya, âsqâliyâ, shqaliya, sentî, âsentîl, ashentil, âsentît, isentî, ishenti, sentiya, tisentît, tishentit, âdkûin, adkuyn, âdkû, qmih, es-sa'îr er-rûmî, 'alas

in Latin America: centeno

in China: mai jiao

in Indonesia: gandum hitam

Secamone R. Br. Asclepiadaceae (Apocynaceae)

Derived from the Arabic name *squamona* used for *Secamone aegyptiaca*; see Robert Brown, *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 464. London 1810.

Secamone afzelii (Schult.) K. Schum. (*Ichnocarpus afzelii* Schult.; *Secamone leonensis* (Scott-Elliot) N.E. Br.; *Secamone leonensis* N.E. Br.; *Secamone myrtifolia* Benth.; *Toxocarpus leonensis* Scott-Elliot)

West Africa. Liana, climbing, twining, scrambling shrub, sticky white latex, dark green smooth papery leaves, flowers yellow-cream, corolla dull yellow turning orange, fruits paired, forest, scrub forest

See *Memoirs of the Wernerian Natural History Society* 1: 61. 1811, *Systema Vegetabilium* 4: 399. 1819, *Contributions to the Botany of India* 61. 1834, *Niger Flora* [W.J. Hooker]. 453. 1849, *Journal of the Linnean Society, Botany* 30: 92. 1894 [1893–1895 publ. 1894], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 234. 1896 and *Flora of Tropical Africa* [Oliver et al.] 4(1.2): 281. 1902

(Plant considered poisonous. Leaves juice antiinflammatory, purgative, used for boils, abscesses, gonorrhoea and stomach pains.)

in West Africa: e-put-e-gboya, ndikpasbaa

Secamone elliptica R. Brown (*Secamone insularis* Miq.; *Secamone lanceolata* Blume; *Secamone micrantha* (Decne.) Decaisne; *Toxocarpus insularis* (Miq.) Bakh. f.; *Tylophora micrantha* Decaisne)

Indonesia. Herbaceous vine, flowers light yellowish-green

See *Prodromus Florae Novae Hollandiae* 464. 1810, *Bijdragen tot de flora van Nederlandsch Indië* 16: 1051. 1826, *Contributions to the Botany of India* 61. 1834, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 377. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 501. 1844, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 3: 557. 1861 and *Beknopte Flora van Java (Nood Unitgave)* 8(a Fam. 173): 25. 1949, *Blumea* 6: 371. 1950

(The roots used for rheumatism and traumatic injury.)

in English: common secamone, secamone

in China: ji yu teng

Secamone emetica (Retz.) R. Br. ex Schult. (*Periploca emetica* Retz.; *Secamone emetica* F. Muell.; *Secamone emetica* (Retz.) R. Br.; *Secamone emetica* (Retz.) Schult.)

India.

See *Observationes Botanicae* 2: 14–5. 1781, *Memoirs of the Wernerian Natural History Society* 1: 55–56. 1810, *Asclepiadeae* 45. 1810, *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 6: 124. 1820, *Fragm.* (Mueller) 5(38): 161. 1866

(Used in Sidha. Veterinary medicine, roots made into a paste and mixed with rice gruel and given to cattle to induce easy delivery.)

in India: ankaravali, ankaravallan, ankaravalli, antat-tankam, cakatam, camalukam, camalukicceti, camalukitam, caraccika, carccikacceti, carcciru, cattiyam, cayakacceti, cayakam, kaluvakatacceti, kaluvakatam, karip-palai, kolip-pacakkoti, kolippacam, kontam, kurampai, kuravaki, kuravakicceti, naipaalai, nattuvariyal, onkari, otukayccavonkari, palupashal, parunkurunci, perunkurinci, siranighambu, tattava, tiruvaratitacan, tottaviralartitan

Secamone filiformis (Linnaeus f.) J.H. Ross

Mozambique. Climbing herb, creeping, milky sap, stem red-brown with brown lenticels, twigs and leaves green, flowers greenish white, fruits green to brown-purple

See *Bothalia* 11(3): 277. 1974, *South African Journal of Science* 97, September/October 2001, *The Veterinary Journal* 173(2): 366–372. 2007

(Veterinary medicine, astringent, anthelmintic, antibacterial and cytotoxic, the stem ground and mixed with cold water and given to cattle to treat diarrhea.)

in South Africa: imbijela, imbijele

Secamone gerrardii Harv. ex Benth. (*Secamone gerrardii* Harv. ex Schltr., nom. illeg., non *Secamone gerrardii* Harv. ex Benth.) (after the British William Tyrer Gerrard (d. 1866, Madagascar), botanical collector in Natal and Madagascar in the 1860s, collected with Mark Johnston McKen (1823–1872); see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 165–166. Cape Town 1981)

South Africa.

See *Genera Plantarum* 2: 746. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18(Beibl. 45): 2. 1894, *Journal of Botany, British and Foreign* 33: 353. 1895

(Roots poisonous, used for spinal disease.)

in South Africa: uGobandhlovu (Zulu)

Sechium P. Browne Cucurbitaceae

From the Greek *sekos* ‘weight’, food for pigs; some suggested from the Greek *sikyos* ‘wild cucumber, gourd’, or from a West Indian name, possibly from vernacular *chacho*; see Patrick Browne (1720–1790), *The civil and natural history of Jamaica in three parts*. 355. London 1756; S. Battaglia, *Grande dizionario della lingua italiana*. UTET, Torino 1997, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 806. Ansbach 1852.

Sechium edule (Jacq.) Sw. (*Chayota edulis* (Jacq.) Jacq.; *Cucumis acutangulus* Descourt.; *Sechium americanum* Poir.; *Sechium chayota* Jacq. ex Hemsl.; *Sicyos edulis* Jacq.; *Sicyos laciniatus* Descourt.)

Latin America, West Indies.

See *Species Plantarum* 2: 1011. 1753, *Enumeratio Systematica Plantarum* 32. 1760, *Flora Indiae Occidentalis* 2: 1150. 1800, *Encyclopédie Méthodique, Botanique* 7: 50–51. 1806

(Leaves for lowering blood pressure; seeds for intestinal disorders; roots for lung ailments.)

in English: chayote, chow chow, Christophine, Madeira marrow, vegetable pear

in Latin America: apa, ape, chayote, chimá, cho-cho, chocho, choco, choko, choyote, gayota, güisquil, guu yau, pataste, perulero, pipinella, yapa, yape, yu yau

in Japan: hayato-uri, chayote

in Philippines: tsayote

in Italian: sechio, zucca centenaria

Securidaca L. Polygalaceae

Latin *securis*, is ‘hatchet, an axe’, *securicula* ‘a little axe’, referring to the shape of dorsal winged samara; Plinius used *securidaca* or *securiclata* for a weed growing among lentils, the hatchet-vetch, see *Species Plantarum* 2: 707. 1753, *Systema Naturae*, Editio Decima 2: 1151, 1155. 1759 and *Fieldiana, Bot.* 24(6): 5–22. 1949, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2154–2167. 2001.

Securidaca inappendiculata Hassk. (*Securidaca bracteata* A.W. Benn.; *Securidaca scandens* Jacq.; *Securidaca scandens* Tussac; *Securidaca scandens* Buch.-Ham. ex Benth.; *Securidaca scandens* Buch.-Ham. ex Wall.; *Securidaca scandens* Lam.; *Securidaca scandens* Vell.; *Securidaca tavoyana* Wall. ex A.W. Benn.; *Securidaca tavoyana* Wall.)

SE Asia, China. Liana

See *Enum. Syst. Pl.* 27. 1760, *Encycl.* (Lamarck) 7: 51. 1806, *Fl. Flumin. Icon.* 7: t. 60. 1831 [1827 publ. 29 Oct 1831], *Numer. List* [Wallich] 4195, 4196. 1832, *Plantae Javanicae Rariores* 295. 1848, *The Flora of British India* 1: 208. 1872 and *Phytochemistry* 58(8): 1245–1249. 2001, *Journal of Chromatographic Science* 39(10): 182–186. 2001 [Capillary

Electrophoretic Behaviors of Pharmacologically Active Xanthenes from *Securidaca inappendiculata* with b-Cyclodextrin as a Buffer Additive.], *Analytica Chimica Acta* 474(1–2): 37–48. 2002, *Chinese Chemical Letters* 13(6): 539–542. 2002, *Journal of Asian Natural Products Research* 7(4): 649–653. 2005 [A new sterol glycoside from *Securidaca inappendiculata*.], *Heterocycles* 65(7): 1685–1690. 2005 [Three new xanthenes from the roots of *Securidaca inappendiculata*.]

(Used for the treatment of rheumatism, enterogastritis and inflammatory disease.)

Securidaca longipedunculata Fresen. (*Securidaca longepedunculata* Fresen.)

Sudan, Tropical Africa. Shrub or a small tree, woody, erect, spreading crown and drooping branches, often thorny, very variable, smooth bark, leaves alternate, magenta or violet flowers sweet-scented in short terminal racemes, flower with smell like an orange, lime-green winged samaras, in dry areas, woodland, savanna, wooded grassland, *Acacia* wooded grassland, bark used as soap

See *Systema Naturae*, Editio Decima 2: 1151, 1155. 1759, *Syn. Pl.* 2: 95. 1806, *Museum Senckenbergianum* 2: 275. 1837 and *Journal of Ethnopharmacology* 9: 237–260. 1983, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 42: 17–182. 1994, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Journal of Ethnopharmacology* 88: 279–286. 2003, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 93: 43–49. 2004, *J. Ethnopharmacol.* 96(3): 507–13. 2005, *Journal of Ethnopharmacology* 97: 327–336. 2005, *Afr. Health Sci.* 6(1): 31–5. 2006 [The in-vitro antibacterial activity of *Annona senegalensis*, *Securidaca longipedunculata* and *Steganotaenia araliacea*—Ugandan medicinal plants.], *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 106: 158–165. 2006

(Roots could be toxic at too strong quantities, remedy against toxic effects a decoction of leaves of *Guiera senegalensis*; overdoses poisonous, if misused can be fatal. Crushed roots inhaled to treat epilepsy; crushed roots mixed with maize grains to protect them from pests. Roots astringent, diaphoretic, antibacterial, antirheumatic, purgative, aromatic, anti-inflammatory, a male aphrodisiac; roots boiled and drunk for stomach worms. Leaves and stem bark purgative, for cough, indigestion, syphilis, tapeworm. Bark used to treat snakebite and stomachache, to protect body against witches; roots and stem bark used to cure stomach worms and toothache. Root bark antifungal and for headache. Ethnoveterinary medicine.)

in English: fibre tree, tree violet, violet tree

in French: arbre à serpents, arbre aux hachettes

in Angola: itata, miyise, mutata

in Benin: atakpawanlwi, fizi, goumenein, ikpata, ipeta, kpata, kpèta, oupomou, pessaa, pouou-porika, pourk, sonnouwan, sonnwan, sonouwa

in Sudan: youro

in Tanzania: chiguruka, chingula, igulua, iguluha, libitu, luguluka, masuke mengi, mbazo, mbazu, mkala, mkwegatangu, mnengonengo, mnguluka, mnguruka, mnyaga-sozi, mtikwi, mulimba, mulyasenga, mwejue, nyakasasi

in Togo: bembuna, dinaputchan'yoka, egbéwoyé, fosè, fozé, fôzi, fozi, ipalg, iparlg, kolèr, kupomoè, pimpinon, tchritu

in Uganda: elila, elilyoi, laliya, mukondwa

in W. Africa: alale, alali, dioro, djomba, joro, juri

in Zambia: bwazi, mpuluka, mupapi, mutata, mwinda

in Arabia: sagat

Securidaca welwitschii Oliv.

East Africa, Cameroon. Shrub, scandent, climber, liane, spiny, leaves petiolate, buds white, flowers white, leaves green, evergreen riparian forests

See *Systema Naturae*, Editio Decima 2: 1151, 1155. 1759, *Flora of Tropical Africa* 1: 135. 1868 and *Phytochemistry* 58(8): 1245–1249. 2001

(Poisonous and repellent. Liane sap for eye troubles.)

Securigera DC. Fabaceae (Loteae)

Latin *securiger*, *gera*, *gerum* 'axe-bearing', see *Flore Française*. Troisième Édition 4: 609. 1805 and *Taxon* 30: 829–842. 1981, *Willdenowia* 19: 60. 1989, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 8–9. 1995, *Taxon* 46(3): 467. 1997.

Securigera securidaca (L.) Degen & Dorfl. (*Bonaveria securidaca* (L.) Halacsy; *Bonaveria securidaca* (L.) Rchb.; *Coronilla parviflora* M. Bieb.; *Coronilla securidaca* L.; *Securigera coronilla* DC.; *Securigera legitima* Gaertn.; *Securigera lutea* Mill.; *Securigera securidaca* (L.) Dalla Torre & Sarnth.; *Securigera securidaca* Degen & Dörfl.)

Morocco, Iran, Europe. Annual non-climbing herb

See *Species Plantarum* 2: 742–743. 1753 and *Flora der gefürsteten Grafschaft Tirol* 6(2): 677. 1909, *Planta Medica* 17(2): 170. 1969, *Feddes Repert.* 89: 598. 1979, *Feddes Repert.* 90: 332. 1979, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981, *Chemistry of Natural Compounds* 23(2): 252. 1987, *Pharmazie* 53(10): 710–715. 1998, *Pharmaceutical Biology* (formerly *International Journal of Pharmacognosy*) 39(1): 62–64. 2001, *PTR. Phytotherapy Research* 16(8): 745–747. 2002, *Iranian Journal of Pharmaceutical Sciences* 2(3): 151–156. 2006, *Pakistan Journal of Biological Sciences* 11(23): 2619–2623. 2008, *Journal of Ethnopharmacology* 126(3): 525–532. 2009

(Seeds antioxidant, diuretic, hypolipidemic, antiulcerogenic, antisecretory, gastroprotective, antihyperglycemic, used for the treatment of hypercholesterolemia, hypertension, parasitic infections, malaria, gastric disturbances, diabetes and epilepsy.)

in English: goat pea

Securigera varia (L.) Lassen (*Coronilla haussknechtii* Boiss.; *Coronilla hirta* Boiss.; *Coronilla varia* L.; *Coronilla*

varia L. subsp. *hirta* (Boiss.) Rech.f.; *Securigera varia* (L.) Lassen subsp. *orientalis* A. Jahn)

Cosmopolitan. Perennial non-climbing herb

See *Species Plantarum* 2: 743. 1753 and *Svensk Botanisk Tidskrift* 83: 86. 1989

(Diuretic, cardiotonic, emetic, antirheumatic, antisecretory, gastroprotective, hypolipidemic, for parasitic infections, malaria, diabetes and epilepsy.)

in English: axseed, crown vetch, purple crown vetch, trailing crown vetch

in China: xiiu qiu xiao guan hua

Seddera Hochst. Convolvulaceae

After a mountain near Mecca, Arabia; see Christian Ferdinand Hochstetter (1787–1860), *Flora oder allgemeine Botanische Zeitung*. 27(1): 7. 1844.

Seddera hirsuta Hallier f.

East Africa. Prostrate woody herb, flowers white, dry *Acacia* woodland

See *Annuario del Reale Istituto Botanico di Roma* 7: 224. 1898

(Laxative, antihelminthic, roots and bark infusion drunk.)

in Kenya: lomanang

Seddera latifolia Hochst. & Steud.

Pakistan.

See *Flora* 27, Beil.: 8, t. 5. 1844

(Dried flowers and leaves when children vomiting undigested milk.)

in Pakistan: tussu

Sedum L. Crassulaceae

Latin *sedum* for houseleek, called also *aizoon* or *digitellum* (Plinius, L. Junius Moderatus Columella); some suggested from the Latin *sedo*, *avi*, *atum*, *are* 'to calm, soothe' or from *sedeo*, *sedes*, *sedi*, *sessum*, *sedere* 'to sit'; see Carl Linnaeus, *Species Plantarum*. 1: 271, 282–283, 430–432. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 73. 1754, *Genera Plantarum*. Ed. 5. 197. 1754, *Brit. Herbal* 36. 1756, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 806. Ansbach 1852 and *Fieldiana, Bot.* 24(4): 404–415. 1946, *Sedum of North America North of the Mexican Plateau* 70. 1975, *Botanical Magazine* 90(1017): 46–55, f. 1–3. 1977, *Taxon* 41: 569. 1992, *Taxon* 44: 611–612. 1995, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 574. Basel 1996

Sedum elatinoides Franchet (*Sedum silvestrii* Pampanini)

China.

See *Bull. Herb. Boissier* sér. 2, 6: 11. 1883

(Emollient.)

in China: xi ye jing tian

Sedum emarginatum Migo (*Sedum makinoi* Maximowicz var. *emarginatum* (Migo) S.H. Fu)

China.

See *J. Shanghai Sci. Inst. Sect.* 3: 224. 1937

(For skin diseases.)

in China: ao ye jing tian

Sedum ewersii Ledeb. (*Hylotelephium ewersii* (Ledeb.) H. Ohba; *Sedum azureum* Royle; *Sedum azureum* Desf.; *Sedum azureum* Wender.; *Sedum rubrum* Royle ex Edgew.; *Sedum rubrum* Royle; *Sedum rubrum* Thell.)

Russia, Himalaya, India.

See *Flora Altaica* [Ledebour]. 2: 191. 1830, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 222, t. 48, f. 2. 1835, *Transactions of the Linnean Society of London* 20: 47. 1846 and *Repert. Spec. Nov. Regni Veg.* 10: 290. 1912, *Botanical Magazine* 90(1017): 46–55, f. 1–3. 1977

(For ascites, diarrhea and urogenital disorders. Leaves and flowers pounded into a paste and applied on forehead to treat headache. Flowers emetic, pectoral, expectorant.)

in China: yuan ye ba bao

in India: gomnii, gomnil, tindi

Sedum lineare Thunberg (*Sedum anhuiense* S.H. Fu & X.W. Wang; *Sedum lineare* Pau)

China.

See *Syst. Veg.*, ed. 14 (J.A. Murray). 430. 1784, *Fl. Jap.* (Thunberg) 187. 1784 and *Bull. Bot. Res., Harbin* 6(4): 137. 1986

(Emollient.)

in China: fo jia cao, fo chia tsao

in Japan: o-no-mannen-gusa

Sedum majus (Hemsley) Migo (*Sedum filipes* Hemsley var. *majus* Hemsley)

China.

See *J. Linn. Soc., Bot.* 23: 284. 1887 and *Bull. Shanghai Sci. Inst.* 14: 293. 1944

(For headache.)

in China: shan piao feng

Sedum sarmentosum Bunge (*Sedum angustifolium* Z.B. Hu & X.L. Huang; *Sedum kouyangense* H. Léveillé & Vaniot; *Sedum sarmentosum* f. *majus* Diels; *Sedum sheareri* S. Moore)

China.

See *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 2: 104. 1833 and *Acta Phytotax Sin.* 19: 311. 1981

(For skin diseases.)

in China: chui pen cao

Sedum telephium L. (*Hylotelephium purpureum* (L.) S.H. Fu; *Hylotelephium purpureum* (L.) Holub; *Hylotelephium telephium* (L.) H. Ohba; *Sedum purpurascens* W.D.J. Koch; *Sedum purpureum* (L.) (Insecticidal, vermifuge, bechic, emetic, purgative.)

Selaginella P. Beauv. Selaginellaceae

The diminutive of the Latin *selago, inis*, a plant resembling the savin-tree (Plinius), genus *Selago* L.; see *Species Plantarum* 2: 629, 1101. 1753, *Plantae Veronenses* 3: 51. 1754, *The Civil and Natural History of Jamaica* in Three Parts 82. 1756, *Definitiones Generum Plantarum* 485. 1760, *Familles des Plantes* 2: 491. 1763, *Histoire Naturelle des Végétaux*, Classés par Familles 3: 477 and 4: 314. 1802, *Exposition des Familles Naturelles* 1: 39. 1805, A.M.F.J. Palisot de Beauvois (1752–1820), *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie*. Les mousses. Les lycopodes. 101, 107, 112. Paris 1805, *Encyclopédie Méthodique. Botanique ... Supplément* 3: 553. 1814, *Anleitung zum Studien der*

Wissenschaftlichen Botanik 2: 163. 1854, *Lehrbuch der Botanik* 116, 124. 1874, *Journal of Botany, British and Foreign* 21: 3–4. 1883, *Revisio Generum Plantarum* 1–2: 824. 1891 and *Botanical Magazine* 57: 255. 1943, *Webbia* 26: 158, 164. 1971, *Fern Gaz.* 11(2–3): 141–162. 1975, *Fern Gazette* 13(2): 118. 1986, *Preslia* 64(2): 154–155. 1992.

Selaginella atroviridis Spring (*Lycopodium atroviride* Wall. ex Hook. & Grev.; *Selaginella atroviridis* (Hook. & Grev.) Spring; *Selaginella atroviridis* (Wall. ex Hook. & Grev.) Spring)

SE Asia.

See *Icon. Filic.* 1: t. 39. 1827, *Flora* 21: 183. 1838

(Plant decoction taken for stomachache; for asthma, rheumatism, pound the plant with *Cleome viscosa* or *Achyranthes aspera* and poultice.)

Malay names: daun ekor merak, paku jambul merak

Selaginella bodinieri Hieron. ex H. Christ

China. Fern

See *Bulletin de l'Académie Internationale de Géographie, Botanique* 11(153–154): 273. 1902

(Magico-religious beliefs, to protect the house or the farm by evil spirits and ghosts.)

Malay name: merigu

Selaginella bryopteris (L.) Baker (*Lycopodium bryopteris* L.; *Lycopodium imbricatum* Forssk.; *Selaginella imbricata* (Forssk.) Spring ex Decne.)

India. Suberect, herb, xerophytic, scaly stem, short spikes, cuspidate sporophylls strongly keeled

See *Sp. Pl.* 2: 1103 (–1104). 1753, *J. Bot.* 22: 376. 1884

(Fresh plant juice taken for dysentery, gonorrhoea, venereal diseases, spermatorrhoea; plant paste mixed with mustard oil used for massage to relieve sciatica; whole plant made into a paste mixed with roots of *Grewia hirsuta* and *Hemidesmus indicus* and taken for gonorrhoea; stem bark of *Sida cordifolia*, crushed with root of *Aristolochia indica*, tubers of *Cyperus scariosus*, whole plant of *Selaginella bryopteris* and *Phyllanthus fraternus* made into pills taken to cure epileptic attacks. To restore energy, agility and vitality, plants finely crushed, mixed with sugar and taken as a cooling syrup, also for stomachache, inflammation of urinary tract and in venereal diseases; tender parts fried in *ghee* and given as a post-partum remedy, to stop bleeding. Magico-religious beliefs.)

in India: amarbooti, kamraj, patharchatti, sanjivan, sanjivani, sanjivanibuti, sanjivini

in Nepal: khumre jhar

Selaginella chrysocaulos (Hook. & Grev.) Spring (*Lycopodioides chrysocaulos* (Hook. & Grev.) H.S. Kung; *Lycopodium chrysocaulos* Hook. & Grev.)

China.

See *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 226, 232, no. 141. 1843 and *Proc. Indian Sci. Congr. Assoc.* 63: 127–128. 1976, *Indian Fern J.* 1: 59–62. 1984, *Flora Sichuanica* 6: 78–80, t. 24, 1–6. 1988

(Plant paste applied on cuts and wounds. Fronds antibacterial.)

in Nepal: kaldar

Selaginella ciliaris (Retz.) Spring (*Lycopodium ciliare* Retz.)

China.

See *Observationes Botanicae* 5: 32. 1789, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 231, no. 136. 1843 and *J. Sci. Engin.* 25: 83–92. 1988

(Plant paste taken for venereal diseases, bleeding piles, pro-lapse of rectum.)

in India: sanjeevani

Selaginella cinerascens A.A. Eaton (*Bryodesma cinerascens* (A.A. Eaton) Soják; *Selaginella bryoides* Underw.)

North America.

See *Fern Bulletin* 7: 33. 1899 and *Preslia* 64(2): 154. 1993 [dt. 1992; issued 1993]

(Leaves infusion drunk to relieve gastrointestinal disorders, heart burns.)

in English: pigmy selaginella

Selaginella delicatula (Desv. ex Poir.) Alston (*Lycopodioides delicatula* (Desv. ex Poir.) H.S. Kung; *Lycopodioides delicatula* (Desv.) H.S. Kung; *Lycopodium delicatulum* Desv. ex Poir.; *Lycopodium delicatulum* Desv.; *Lycopodium flabellatum* L.; *Selaginella canaliculata* (L.) Baker; *Selaginella flabellata* (L.) Spring; *Stachygnandrum flabellatum* (L.) P. Beauv.)

India. Terrestrial herb, stems light purple-red

See *Species Plantarum* 2: 1105. 1753, *Definitiones Generum Plantarum* 485. 1760, *Histoire Naturelle des Végétaux, Classés par Familles* [Lam. & Mirbel] 3: 477 and 4: 312. 1802, *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie* 113. 1805, *Encyclopédie Méthodique. Botanique ... Supplément* 3(2): 554. 1814, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 225, no. 86. 1843, *Journal of Botany, British and Foreign* 23(265): 21. 1885 and *Journal of Botany, British and Foreign* 70(838): 282. 1932, *Journal of Science & Engineering* 25: 83–92. 1988, *Flora Sichuanica* 6: 67–68, t. 20, 1–6. 1988, Lin L.C. et al. "Cytotoxic biflavonoids from *Selaginella delicatula*." *J. Nat. Prod.* 63(5): 627–630. 2000, *Planta Medica* 71(7): 659–665. 2005, *Journal of Ethnopharmacology* 105(1–2): 107–113. 2006

(For the treatment of viral and bacterial infection, plant juice applied over wounds; a paste applied over forehead to get relief from headache. Antineoplastic agents.)

in India: nelampetta

Selaginella doederleinii Hieron. (*Lycopodioides doederleinii* (Hieron.) H.S. Kung)

Asia, Taiwan.

See *Definitiones Generum Plantarum* 485. 1760 and *Hedwigia* 43(1): 41–42. 1904, *Flora Sichuanica* 6: 73, t. 23, 1–6. 1988, *Journal of Science & Engineering* 25: 83–92. 1988, *Crop, Environment & Bioinformatics* 1(4): 229–238. 2004

(Hypertensive. Anticancer therapy, extract of *Selaginella doederleinii*, prepared by boiling, is reported to have the ability to inhibit both human DNA polymerase and murine retroviral reverse transcriptase.)

in China: shi shang bai

Selaginella exaltata (Kunze) Spring (*Lycopodium exaltatum* Kunze)

South America. Herb, terrestrial, multi-branched, erect, scandent, on wet bank, in shade along stream, swamp forest

See *Species Plantarum* 2: 1100–1106. 1753, *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie* 101. 1805, *Linnaea* 9: 8. 1834[1835], *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 234. 1843 and *American Fern Journal* 94(1): 39–46. 2004

(Infusion taken as febrifuge, antispasmodic, diuretic, hepato-protective. Crushed rhizome macerated in cold water, mixed with chicha, traditional beverage made from cassava, and drunk to cure stomachache and diarrhea.)

in Ecuador: toyume

Selaginella geniculata (C. Presl) Spring (*Lycopodium geniculatum* C. Presl; *Selaginella conduplicata* Spring; *Selaginella ferruminata* Spring)

South America. Erect, terrestrial, reddish brown stem, on muddy slopes, in forest, near stream

See *Species Plantarum* 2: 1100–1106. 1753, *Reliquiae Haenkeanae* 1(1): 80. 1825, *Flora Brasiliensis* 1(2): 129. 1840, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 230–231. 1843 and *American Fern Journal* 94(1): 39–46. 2004

(Crushed plant to treat cuts, wounds, bruises. Fronds used in ceremonial forehead bands for adornment at traditional feasts.)

in Ecuador: toyuba

Selaginella helferi Warb.

SE Asia, Thailand. Herb

See *Monsunia, Beiträge zur Kenntniss der Vegetation des Süd- und Ostasiatischen Monsungebietes* 1: 121. 1900

(Powdered leaves applied to burns, also used with *Pteridium* to treat snakebite. Ceremonial, used in worship.)

in English: sea moss

in India: inke moming

Selaginella imbricata (Forssk.) Spring ex Decne. (*Lycopodium imbricatum* Forssk.)

India. Fern, erect to suberect, xerophytic

See *Sp. Pl.* 2: 1103 (–1104). 1753, *Flora Aegyptiaco-Arabica* 125: 187. 1775, *Archives du Muséum d'Histoire Naturelle* 2: 193, t. 7. 1842, *J. Bot.* 22: 376. 1884 and *Brittonia* 53(2): 304–351. 2001

(Fresh plant juice for dysentery, toothache, spermatorrhea. Magico-religious beliefs.)

in India: amarbooti, kamraj, patharchatti, sanjivan, sanjivani, sanjivini

Selaginella kraussiana (Kunze) A. Braun (*Didiclis kraussiana* (Kunze) Rothm.; *Lycopodium kraussianum* Kunze; *Selaginella canescens* Fée; *Selaginella denticulata* Spring; *Selaginella denticulata* (L.) Spring; *Selaginella denticulata* (L.) Link; *Selaginella hortensis* Mett.)

Europe.

See *Sp. Pl.* 2: 1106. 1753, *Flora* 21(10): 149. 1838, *Linnaea* 18: 114. 1844, *Index Seminum* [Berlin] 22. 1860 [Index Seminum in Horto Botanico Berolinensi anno 1859 Collectorum 1859], *Revis. Gen. Pl.* 2: 826. 1891

(Plant antibacterial, antispasmodic, stomachic; whole plant infusion used as antihypertensive.)

in English: garden selaginella, mat spike moss, spreading clubmoss, staghorn moss, trailing spike moss

in Portuguese: musgo das searas, selaginela

in Spain: pinchuíta, selaginela

Selaginella lepidophylla (Hook. & Grev.) Spring (*Lycopodium lepidophyllum* Hook. & Grev.)

South America, Mexico.

See *Icones Filicum* 2(9): 162. 1830, *Flora Brasiliensis* 1(2): 126. 1840

(Plant antibacterial, antispasmodic, stomachic; whole plant infusion astringent and styptic, used for kidney stones.)

in English: resurrection plant, rose of Jericho

Selaginella monospora Spring

China, India.

See *Mémoires de l'Académie Royale des Sciences, Lettres et Beaux Arts de Belgique* 24: 135. 1850

(Fronds antibacterial.)

Selaginella myosurus (Sw.) Alston (*Lycopodium myosurus* Sw.; *Selaginella scandens* P. Beauv.; *Stachygnandrum scandens* P. Beauv.)

West Africa. Climber, scrambling, bright blue, in swamp forest, in disturbed areas, along roadside, edge of forest, in savanna and forest

See *Histoire Naturelle des Végétaux, Classés par Familles* 3: 477. 1803

(Entire plant ground and rubbed for the skin diseases.)

in Congo: larbouoni, larbuoni, malangala

in Sierra Leone: dimoi, ndimoimoi, ra lolem

Selaginella pallescens (C. Presl) Spring (*Lycopodium cuspidatum* Link; *Lycopodium pallescens* C. Presl; *Selaginella cordata* Klotzsch, nom. illeg.; *Selaginella cuspidata* (Link) Link; *Selaginella cuspidata* var. *elongata* Spring; *Selaginella emmeliana* Van Geert; *Selaginella harrisii* Underw. & Hieron.; *Selaginella microdendron* Baker; *Selaginella millspaughii* Hieron.; *Selaginella pallescens* var. *pallescens*; *Selaginella sulcangula* Spring)

South America.

See *Reliquiae Haenkeanae* 1(1): 79. 1825, *Hortus Regius Botanicus Berolinensis* 2: 161. 1833, *Flora Brasiliensis* 1(2): 132. 1840, *Filicum Species* 158. 1841, *Linnaea* 18: 524. 1844, *Mémoires de l'Académie Royale des Sciences, Lettres et Beaux Arts de Belgique* 24: 67, 163. 1849, *Revue Horticole* 10: 220, f. 20. 1884

(Rhizome infusion drunk against insomnia. Crushed leaves paste applied on joints, rheumatism.)

in English: moss fern, sweat plant

Selaginella parkeri (Hook. & Grev.) Spring (*Lycopodium parkeri* Hook. & Grev.; *Selaginella pedata* Klotzsch)

South America. Terrestrial, erect

See *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 146. 1843, *Botanical Miscellany* 2: 388. 1843, *Linnaea* 17: 521. 1844 and *American Fern Journal* 94(1): 39–46. 2004

(A liquid decoction of crushed rhizomes is given to dogs to expel intestinal parasites.)

in Ecuador: toyotome

Selaginella plumosa (L.) C. Presl (*Lycopodium plumosum* L.; *Lycopodium plumosum* C. Presl; *Lycopodium stoloniferum* Sw.; *Selaginella stolonifera* (Sw.) Spring)

China, India.

See *Species Plantarum* 2: 1105. 1753, *Nova Genera et Species Plantarum seu Prodromus* 138. 1788, *Flora* 21: 193. 1838, *Abhandlungen der königlichen Böhmschen Gesellschaft der Wissenschaften* ser. 5, 3: 583. 1845

(Plant extract anticancer.)

Selaginella radicata Hort. ex Alston (*Selaginella radicata* (Hook. & Grev.) Spring)

India.

See *Aspects Pl. Sci.* 6: 119–181. 1983

(Fronds antibacterial.)

Selaginella repanda (Desv. ex Poir.) Spring (*Lycopodium repandum* Desv. ex Poir.; *Selaginella henryi* Koidz.; *Selaginella subcaulescens* Hayata, nom. illeg.)

India.

See *Encyclopédie Méthodique. Botanique ... Supplément* 3(2): 558. 1814, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... Botanique* 1: 329. 1844, *Journal of Botany, British and Foreign* 22: 277. 1884 and *Icones plantarum formosananarum nec non et contributiones ad floram formosanam.* 7: 99–100, f. 64. 1918, *Florae Symbolae Orientali-Asiaticae* 85. 1930, *Indian Fern J.* 13: 22–29. 1996

(Antifungal, whole plant paste applied.)

in India: singharaj

Selaginella rupestris (L.) Spring (*Bryodesma rupestre* (L.) Soják; *Lycopodium rupestre* L.; *Selaginella bourgeaui* Hieron.; *Selaginella rupestris* fo. *bourgeaui* (Hieron.) Clute; *Selaginella sibirica* Hieron.; *Stachygynandrum rupestre* (L.) P. Beauv.)

America. Perennial tufted spikemoss, leaves compound, leaflets very small, flowers solitary and sterile, forming loose spreading mats, in dense wet evergreen forests

See *Species Plantarum* 2: 1101. 1753, *Hist. Nat. Vég.* [Lam. & Mirbel] 3: 477. 1802 [and 4: 312. 1802], *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie* 113–114. 1805, *Flora* 21: 149, 182. 1838 and *Hedwigia* 39: 290. 1900, Chakravarthy, B.K. et al. (Used in Ayurveda. Whole plant for skin diseases, venereal diseases, snake poison, epilepsy, liver complaints, traumatic edema and general debility; whole plant ground with rice wash water and given to drink in leucorrhoea. Leaves antispasmodic, oxytocic, the smoke used as narcotic.)

in English: dwarf lycopod, dwarf spike-moss, festoon pine, northern selaginella, resurrection plant, rock selaginella, rock spike moss

in India: karajodikanda, sanjibani, tirupati

in Malayalam: garudapacha

in Sanskrit: amritachada, garudi, sarpadani

Selaginella schultesii Alston ex Crabbe & Jermy

South America, Colombia.

See *Amer. Fern J.* 63: 141, fig. 7. 1973

(Leaves applied as poultice to hasten the healing of wounds.)

Selaginella speciosa A. Braun (*Selaginella huberi* H. Christ; *Selaginella spinosa* P. Beauv., nom. illeg. superfl.)

South America. Terrestrial, erect, strobili green, growing on rocky wet soil

See *Species Plantarum* 2: 1101. 1753, *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie* 101, 112. 1805, *Annales des Sciences Naturelles; Botanique*, sér. 5, 3: 273. 1865 and *Bulletin de l'Herbier Boissier*, sér. 2, 1: 73. 1901

(Tonic.)

Selaginella stellata Spring (*Selaginella arthritica* Alston; *Selaginella galeottii* Spring)

America, Belize. Perennial herb, terrestrial, fronds spreading and arching, stipe erect, forming colonies on muddy bank, in open areas

See *Prodrome des Cinquième et Sixième Familles de l'Aethéogamie* 101. 1805, *Flora* 21: 194. 1838, *Flora Brasiliensis* 1(2): 129, pl. 8. 1840, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 230. 1843 and *Bull. Atha, "Checklist of the vascular plants of Belize." *Memoirs of the New York Botanical Garden* 85: i-ix, 1–246. 2000, Mickel, J.T. & A.R. Smith, "The Pteridophytes of Mexico." *Memoirs of the New York Botanical Garden* 88: 1–1054. 2004

(Astringent, skin diseases.)

in English: starry spikemoss

Selaginella tamariscina (P. Beauv.) Spring (*Lycopodioides tamariscina* (P. Beauv.) H.S. Kung; *Lycopodioides tamariscina* (P. Beauv.) Tzvelev; *Lycopodium caulescens* Wall. ex Hook. & Grev.; *Lycopodium involvens* Sw.; *Lycopodium tamariscinum* (P. Beauv.) Desv. ex Poir.; *Polypodium tamariscinum* Kaulf.; *Selaginella caulescens* (Wall. ex Hook. & Grev.) Spring; *Selaginella involvens* Hieron.; *Selaginella involvens* (Sw.) Spring; *Selaginella japonica* T. Moore ex W.R. McNab; *Selaginella veitchii* W.R. McNab; *Stachygynandrum tamariscinum* P. Beauv.)

China.

See *Magasin Encyclopédique* 9(5): 483. 1804, *Synopsis Filicum* 182. 1806, *Encyclopédie Méthodique. Botanique ... Supplément* 3(2): 540–541. 1814, *Enum. Filic.* 117. 1824, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 136, no. 6, 9. 1843, *Transactions of the Botanical Society of Edinburgh* 9: 10, pl. 1, f. 1–5. 1867 and *Bulletin du Jardin Botanique de Buitenzorg*, ser. 2, 11:

23. 1913, *J. Sci. Engin.* 25: 83–92. 1988, *Flora Sichuanica* 6: 62–64, pl. 18, f. 4–6. 1988, *J. Pl. Res.* 106: 149–166. 1993, *Novosti Sist. Vyssh. Rast.* 36: 25. 2004, *Journal of Ethnopharmacology* 105(1–2): 107–113. 2006

(The inhibitory effect of sumafavone on AP-1 activation may be associated with the potent NO blocking and antiinflammatory effects of *Selaginella tamariscina* extract. *Selaginella involvens* antibacterial, antiseptic, used in prolapse of rectum, bleeding piles, amenorrhea, cough, gravel.)

in Nepal: simrik jhar, tana

Selaginella tenuissima Fée (*Lycopodium serpens* Desv. ex Poir.; *Selaginella serpens* (Desv. ex Poir.) Spring)

India, Central America.

See *Encyclopédie Méthodique. Botanique ... Supplément* 3: 553. 1814, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(1): 228. 1843

(Decoction drunk against liver problems, jaundice. Magico-religious beliefs, believed to chase away evil spirits, planted near houses.)

in English: snake selaginella

Selaginella wallichii (Hook. & Grev.) Spring (*Lycopodium wallichii* Hook. & Grev.)

SE Asia, Vietnam. Terrestrial, stem ascending, leaves eaten as vegetable

See *Botanical Miscellany* 2: 384. 1831, *Flora Brasiliensis* 1(2): 124. 1840

(Plant decoction as a postpartum remedy.)

Malay name: paku merak

Selaginella willdenovii (Desv. ex Poir.) Bak. (*Lycopodium willdenovii* Desv. ex Poir.)

SE Asia.

See *Encyclopédie Méthodique. Botanique ... Supplément* 3(2): 552. 1814, *Gardener's Chronicle & Agricultural Gazette* 783, 950. 1867

(Febrifuge, drink plant infusion with leaves of *Pericampylus glaucus*.)

in English: peacock fern

Malay name: paku merak

Selinum L. Apiaceae (Umbelliferae)

Greek *selinon*, *selinon* 'parsley, celery', Theophrastus, *HP*. 1.2.2 and 9.11.10, Latin *selinon* for parsley, *apium*, see *Species Plantarum*, Editio Secunda 1: 350. 1762 and *Candollea* 35: 497–510. 1980, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 31: 13–16. 1999.

Selinum candollei DC.

Himalaya. Nutritious herb for cattle

See *Prodr.* (DC.) 4: 165. 1830

(Paste of dried roots to cure rheumatism. Magico-religious beliefs, ceremonial.)

in India: bhutkesi, maur

Selinum elatum (Edgew.) M. Hiroe (*Oreocome elata* Edgew.)

India.

See *Proc. Linn. Soc. London* 1: 253. 1845 and *Umbellif. Asia* No. 1, 154. 1958

(Roots decoction as blood purifier.)

in India: porthu

Selinum tenuifolium Salisb. (*Selinum tenuifolium* Wall.)

India, Himalaya. Perennial aromatic herb, aromatic roots covered with old leaf-sheaths, large finely divided leaves, small white flowers in terminal umbels

See *Prodr. Stirp. Chap. Allerton* 162. 1796, *Numer. List* [Wallich] n. 579. 1829, *The Flora of British India* [J.D. Hooker] 2(6): 700. 1879

(Fruits sedative and aphrodisiac; seeds used in rheumatism and kidney troubles. Roots for stomachache, and also as a sedative in the treatment of hysteria and madness, especially in women. Magico-religious beliefs, ceremonial, whole plant used for the preparation of incense, *dhoop*; powdered root used as a fumigant in tantric rituals for madness, nervous breakdown and hysteria.)

in Bhutan: bam-po

in India: bhootheshi, bhootkeshi, dhoopkesh, kher, khishan

Selinum vaginatum C.B. Clarke

India, Himalaya. Perennial herb, erect or decumbent, branched, stem base fibrous, white polygamous flowers in umbel, oblong fruits

See *Fl. Brit. India* [J.D. Hooker] 2: 700. 1879 [May 1879] and *Taxon* 29: 543. 1980

(Whole plant analgesic, hypertensive; whole herb burnt to get rid of insects and worms. Essential oil from the roots with sedative properties, nervine sedative; roots for skin diseases. Roots as incense.)

in India: bhoe, bhoolkesi, bhoot kesi, bhutkesi, bura, mutoshal

Selinum wallichianum (DC.) Raizada & H.O. Saxena (*Cortia wallichiana* (DC.) Leute; *Ligusticum conifolium* DC.; *Ligusticum tenuifolium* (Wall. ex C.B. Clarke) Franch.; *Ligusticum tenuifolium* Franchet; *Peucedanum wallichianum* DC.; *Pleurospermum cicutarium* Lindley; *Selinum candollei* Edgeworth, non DC.; *Selinum tenuifolium* Wallich; *Selinum tenuifolium* Wallich ex C.B. Clarke; *Selinum tenuifolium* Salisb.; *Selinum wallichianum* L.; *Selinum wallichianum* (DC.) Nasir)

China, Nepal. Herb, young shoots and leaves as vegetable, closely related to *Selinum candollei* DC.

See *Sp. Pl.*, ed. 2. 1: 350. 1762, *Prodr. Stirp. Chap. Allerton* 162. 1796, *Genera Plantarum Umbelliferarum* 8. 1814, *Numer. List* [Wallich] n. 579. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 181. 1830, *Proceedings of the American Academy of Arts and Sciences* 14: 293. 1879, *The Flora of British India* 2(6): 700. 1879 and *Indian Forester* 92: 323. 1966, *Annalen des Naturhistorischen Museums in Wien* 73: 83. 1969, *Fl. W. Pakistan* 20: 119. 1972, *Cytologia* 45: 389–402. 1980

(Roots and plant shoots tonic, postpartum remedy. Roots for piles, asthma, and also as nervine sedative, for hysteria, madness; root decoction taken as a febrifuge; rhizome paste mixed with water and drunk to treat body pain. Powdered root used as incense in magico-religious rites.)

in China: xi ye liang she chuang

in India: bhutkeshi, kalee jeeri, moor, muramansi, muri, thoya

in Nepal: chyawa

Semecarpus L.f. Anacardiaceae

Greek *sema*, *semeion* ‘a sign, mark, token’ and *karpos* ‘fruit’, the juice of the nuts used as an ink to mark clothes or linen; see C. Linnaeus (filius), *Supplementum Plantarum*. 25, 182. 1782, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 807f. Ansbach, 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 361. 1989.

Semecarpus anacardium L.f. (*Anacardium latifolium* Lam.; *Anacardium officinarum* Gaertner; *Anacardium orientale* auct.; *Semecarpus anacardium* Blume; *Semecarpus anacardium* Blanco; *Semecarpus latifolia* Pers.)

Tropical India. Tree, leathery leaves, flowers yellowish-green, black fruits, sweetish orange pulp reported to be edible, pericarp of the nut yields a black corrosive tarry oil

See *Suppl.* 25, 182. 1782 [1781 publ. Apr 1782], *Bijdr. Fl. Ned. Ind.* 17: 1156. [Oct 1826–Nov 1827], *Fl. Filip.* [F.M. Blanco] 217. 1837 and *Taxon* 29: 360–361. 1980, *Taxon* 30: 513–514. 1981, *Journal of Cytology and Genetics* 25: 36–42, 308–320. 1990, *Chem. Biol. Interact.* 162(1): 43–52. 2006, *Vascul. Pharmacol.* 46(6): 419–426. 2007, *Phytother. Res.* 21(6): 574–578. 2007, *Chem. Biol. Interact.* 167(1): 31–40. 2007, *Chem. Biol. Interact.* 167(2): 99–106. 2007, *Journal of Ethnopharmacology* 109(2): 359–363. 2007

(Used in Ayurveda, Unani and Sidha. Corrosive, ulcerogenic, toxic, vesicant and allergenic, the black sap of the fruit shell can cause itching, rashes and blistering; dermatitis may be caused by contact with the timber. The powerful irritant properties of the juice of the pericarp have frequently been

made use of by malingerers in producing ophthalmia and skin lesions, and also in procuring abortions. Kernel boiled in milk and given in diseases of tongue; seed oil given in cough and cold; powdered seeds for snakebites; seeds paste introduced in uterus for abortion; reported that nuts with seeds are kept inside the vagina as a punishment against illegal contact. Nuts enter into the composition of some caustic paints for application to warts and piles. Analgesic, immunomodulatory, antiinflammatory, antipyretic, antidote, anti-neoplastic, cytotoxic, antioxidant. Nuts, oil and flowers to treat skin diseases, chronic skin diseases, vitiligo, alopecia, worms, poisoning, malarial fever, piles, Guinea worm, splenomegaly, scrofula, rheumatism, as aphrodisiac. Whole plant for treatment of snakebite, pulverized, mixed in hot water and drunk; abortion stick introduced into vagina for abortion. Bark for venereal diseases; bark and leaves ground into a paste and rubbed over the body for eczema. Veterinary medicine, crushed seeds for cold infection; seeds juice applied on wounds; a necklace of fruits hung around the neck of a lactating cow to increase lactation. Magico-religious beliefs, a small drop of fruit juice on forehead of newly born babies as safeguard against evil eyes; leafy twigs fixed in shrines and houses during Hareli festival.)

in English: bhilawa tree, Indian marking-nut tree, kidney bean of Malacca, marking nut, marking-nut tree, marking-nut tree of India, oriental cashew nut

in India: aginimukhi, agnika, agnimukha, agnimukhah, agnimukhi, alakkuceru, alakkucheru, anala, anmaram, antasatva, aracavatim, arakkimaram, arralari, arshagni (arsha, piles; agni, fire, destroying), arshohita, arushkara, aruskara, aruskarah, arutkaram, avhala, babari, baladur, balania, balave, bale, banovalia, bar-bhola, bareri, beladin, belatak, bhaalya, bhala, bhalia, bhallaathaka, bhallaathakai, bhallaathamu, bhallatah, bhallatak, bhallataka, bhallatakah, bhallataki, bhallatamu, bhalli, bhallika, bhela, bhelai, bheluan, bhelva, bhelwa, bhelwan, bheyla, bhilamo, bhilanvana, bhilao, bhilauan, bhilava, bhilava magaj, bhilavan, bhilawa, bhilawa beeja, bhilawa phal, bhilwa, bhilway, bhutanashana, bibba, bibbo, bibha, bibo, bibu, bibua, bibwa, bijapadapa, biladur, bilaran, bilva, bol-agal, bonebhalia, cambiri, cemaram, cenkottai, cenkottai, cenkottakimaram, cera, ceran, ceran kottai, cerankottai, cerkkotta, cerkkuru, ceru, cettaru, cevvalankottai, char, chara, charei, charu, cher, chera, cherangkottai, cherkkuru, cherkuru, chermara, cheru, cherunkuru, cintukam, compalam, dahnulefaham, dhanurvriksha, ekin, ekinam, erimugi, erimuki, gaer, gaer beeja, gaer hannu, gaeru kaayi, ganju, geedi, ger, ger-kayi, gera, gerkayi, geru, geru beeja, gerubija, gheru, godambi, godda gaeru, goddugera, goddugeru, gudova, hab-el-kalb, habbul-fahm, habbul-qalb, habbulfahm, habelkalb, habulkalab, idumaram, inqardiya, iruttai, jdcettu, jedimanidi, jeedi, jeedivittulu, jeeri, jidi, jidi-chettu, jidi-vittulu, kaeru, kaerubeeja, kalagam, kampira, karee gaeru, karee geru, karigaeru, karigeri, karigeru, karigeru keru, karigheru, kavaga, ker beeja, kera, keri, keru, kerubija, kharigheru, kiro, kirumikkinam, kittakkanikkottai, kittakkanikkotai, kohka, krimighna, kshatakshataru,

Semecarpus australiensis Engl. (*Semecarpus anacardium* var. *parvifolia* Benth.; *Semecarpus australiensis* var. *macrophyllus* Domin; *Semecarpus australiensis* var. *obtusifolius* Domin)

Australia. Food source

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 482. 1883 and *Nat. Toxins*. 5(3): 96–98. 1997 [Isolation and characterisation of urushiol components from the Australian native cashew (*Semecarpus australiensis*)]

(The black tarry sap causes severe dermatitis. Contact with the seeds at a certain stage of growth can cause severe dermatitis in susceptible individuals; the oily pericarp contains a caustic principle actually poisonous. Sap and wood dust may cause skin lesions, blisters on contact, eye irritation, nose bleeding; the toxic sap can blind if rubbed into the eyes.)

in English: Australian cashew nut, cashew, cedar plum, marking nut, native cashew, tar tree

Semecarpus borneensis Merr.

Sabah.

See *Journ. As. Soc. Straits* lxxxvi. 323. 1922

(The juice of this plant produces a severe inflammation.)

Common name: rengas

Semecarpus cassuvium Roxb. (*Anacardium longifolium* Lam.)

Tropical Asia, New Guinea. Tree, white flowers, swollen pedicel eaten as a fruit, young leaves can be eaten raw

See *Suppl.* 25, 182. 1782, *Hortus Bengalensis*, or a catalogue ... 21–22. 1814 and *Phil. J. Sci.* 7: 413–415. 1912

(The oily fruit has irritant properties. Sap poisonous. Antiviral, analgesic, antiinflammatory. Remedy for shingles.)

in English: poison oak tree, wild cadju tree

in Indonesia: enga, lewer, rotta

Semecarpus cuneiformis Blanco (*Semecarpus elmeri* Perkins; *Semecarpus ferrugineus* Merr.; *Semecarpus lanceolatus* Ridl.; *Semecarpus megabotrys* Merr.; *Semecarpus merrillianus* Perkins; *Semecarpus micranthus* Perkins; *Semecarpus obtusifolius* Merr.; *Semecarpus perrottetii* Marchand; *Semecarpus philippinensis* Engl.; *Semecarpus pilosus* Merr.; *Semecarpus ridleyi* Merr.; *Semecarpus taftianus* Perkins; *Semecarpus thyrsoides* Elmer; *Semecarpus whitfordii* Merr.)

Philippines, China. Shrub or small tree, whitish flowers, reddish fleshy edible fruit

See *Fl. Filip.* [F.M. Blanco] 220. 1837

(Poisonous, contact poison, skin-irritating, rashes, blistering.)

in Philippines: ligas

Semecarpus decipiens Merr. & Perry (*Semecarpus forstenii* Blume)

New Guinea.

See *J. Arnold Arbor.* 22: 539. 1941, von Reis Altschul S. *Drugs and Foods from Little-Known Plants*. Notes in Harvard University Herbaria. Cambridge, MA: Harvard University Press. 1973

(Sap very caustic, burning and taking the skin right off. The bark is macerated and applied to *Tinea* and eruption of the skin.)

Common name: rauhung pagol

Semecarpus forstenii Blume

Borneo, Moluccas.

See *Mus. Bot.* 1. 1850

(Poisonous, contact poison, skin-irritating, rashes, blistering.)

Semecarpus gigantifolia Vidal (*Semecarpus vernicifera* Hayata & Kawak.)

China, Taiwan. Tree, broad-leaved evergreen, fleshy fruit edible

See *Suppl.* 25, 182. 1782, *Syn. Atlas* 22, t. 36, f. A. 1883 and *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 2: 108. 1912, Kumada T. *Poisonous Fishes and Plants in the Tropics* (translated by Musya K). Tokyo: U.S. Geological Survey, Pacific Geological Surveys. Military Geology Branch, U.S.G.S. 1940

(Poison, the juice poisons the skin. The bark contains poisonous sap.)

Common names: anagas, giant-leaved marking-nut, ingas, kasoy-kasoy, lungas delok, manalu, rengas gunung

Semecarpus heterophylla Blume (*Semecarpus glabrescens* Heine)

Java, India.

See *Fl. Brit. India* [J.D. Hooker] 2: 35. 1876 [May 1876] and *Rec. Trav. Chim. Pays-Bas* 57, 225–232. 1938, *Philosophical Transactions: Biological Sciences*, Vol. 354, No. 1391, *Changes and Disturbance in Tropical Rainforest in South-East Asia* (Nov. 29, 1999), pp. 1857–1867. 1999

(The resin produces severe dermatitis; vesicant latex.)

Vernacular name: rengas

Semecarpus kurzii Engl.

India, Nicobar. Tree, large leaves, orange-red fruits seated on fleshy receptacle, fruits edible

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 489. 1883

(Pericarp with acrid juice; fruit paste used externally for cuts and wounds. Seeds applied in injuries, ulcers, cancers. Magico-religious beliefs, twigs used to avoid evil spirits.)

in India: bip, pep, pip

Semecarpus laxiflora K. Schumann

Pacific, New Guinea.

See *Nachtr. Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 302. 1905

(Dermatitis, painful wounds; corrosive sap.)

Semecarpus microcarpa Wall. (*Semecarpus cuneiformis* Blanco; *Semecarpus microcarpa* Wallich ex Hook. f.)

India.

See *Suppl.* 25, 182. 1782, *A Numerical List of Dried Specimens* [Wallich] n. 989. 1828, *Fl. Filip.* [F.M. Blanco] 220. 1837, *The Flora of British India* 2(4): 31. 1876

(Contact poisons, the sap produces violent dermatitis, and the smoke from burning branches produces dermatitis. Oil of the pericarp used as an escharotic.)

Semecarpus obscura Thwaites

Sri Lanka.

See *Phytochemistry* 19: 445–447. 1980

(Oil vesicatory.)

Semecarpus subpeltata Thwaites

Sri Lanka.

See *Phytochemistry* 19: 445–447. 1980

(Oil vesicatory.)

Semecarpus travancorica Beddome

India.

See Beddome, Richard Henry (1830–1911), *The Flora Sylvatica for southern India ... Madras*, [1869–1874]

(Used in Sidha. The juice can cause dermatitis. Food plants of the lion-tailed macaque.)

in English: marking nut tree

in India: avakaram, avukaram, bhilawa, kaadu gaeru, kadu gobbi, kattucenkottai, kattushen-kottai, malamcheru, malanceru, natu sengote, nattucenkottai, periyaceran, thenchera

Semecarpus venenosa Volkart

Pacific, Micronesia.

See Iseki K. “Fall von Dermatitis acuta durch “Aangot”-Baum (*Semecarpus venenosa* Volk.)” *Acta Derm., Kyoto* 19: 31. 1932, *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* No. 34: 141–144. 2001

(The milky sap of the whole plant including leaves is very poisonous and dangerous. Severe skin irritations, dermatitis and rashes can result from contact with the poisonous sap secreted by this plant.)

Semecarpus walkeri Hook. f.

Sri Lanka.

See *Fl. Brit. India* [J.D. Hooker] 2: 33. 1876 and *Phytochemistry* 19: 445–447. 1980

(Fruit vesicatory.)

Semiliquidambar H.T. Chang Hamamelidaceae

From the Latin *semi* ‘half’ plus the genus *Liquidambar* L., see *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1962(1): 35, 40. 1962.

Semiliquidambar cathayensis Hung T. Chang (*Altingia chingii* var. *parvifolia* Chun; *Semiliquidambar cathayensis* var. *fukienensis* Hung T. Chang; *Semiliquidambar cathayensis* var. *parvifolia* (Chun) Hung T. Chang; *Semiliquidambar coriacea* Hung T. Chang)

China.

See *Sunyatsenia* 1(4): 241–242. 1934, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1: 37, 42. 1962

(Antiinflammatory.)

in China: ban feng he

Semiliquidambar chingii (F.P. Metcalf) Hung T. Chang (*Altingia chingii* F.P. Metcalf; *Semiliquidambar chingii* var. *longipes* Y.K. Li & X.M. Wang)

China. Tree, capsules with persistent styles

See *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 5(2): 1. 1790 and *Lingnan Science Journal* 10(4): 413–414. 1931, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1962(1): 35, 37, 42. 1962, *Acta Botanica Yunnanica* 8(3): 275, f. 1. 1986, Chen S., Liu X., Du Q. “[Study on tissue culture of *Altingia chingii*.]” *Zhong Yao Cai*. 25(2): 82–3. 2002

(Antiinflammatory.)

in China: xi bing ban feng he

Senecio L. Asteraceae

Latin *senecio*, *senecionis*, ancient name for a plant, called also *erigeron*, groundsel (Plinius), from Latin *senex*, *senis* ‘old, aged’, possibly referring to the white pappus; Akkadian *santu*, *sattu* ‘year’, *sanu* ‘to change’; Arabic *sanat*; Hebrew *sana* ‘year’, *sin’an* ‘repetition’, *sana* ‘to do second time, to be different’; see Carl Linnaeus, *Species Plantarum*. 2: 866–872, 924, 926. 1753, *Genera Plantarum*. Ed. 5. 373. 1754, *Species Plantarum*, Editio Secunda 1242. 1763, *Journal de Physique, de Chimie, d’Histoire Naturelle et des Arts* 88: 195. 1819, *Nova Genera et Species Plantarum* (folio ed.) 4: 128. 1820, *Der Deutsche Botaniker Herbarienbuch* 87. 1841, *Flora* 25: 441. 1842, *Compositae Indicae* 177. 1876, *Die Natürlichen Pflanzenfamilien* 4: 64. 1894 and *Monographie der nord und centralamerikanisch Arten der Gattung Senecio, I. Teil Allgemeines und Morphologie* 22. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32(1): 19, 22. 1902, *Acta Phytotaxonomica et Geobotanica* 6: 266. 1937, *Lilloa* 5: 70. 1939, *Brittonia* 7(2): 54. 1950, *Fieldiana, Botany* 27(2): 71–72. 1951, *Brittonia* 8: 153. 1955, *Phytologia* 27: 408. 1974, *Phytologia* 31(6): 441. 1975, *Botaniska Notiser* 128(4): 520–521. 1975[1976], *Opera Botanica* 44: 45. 1978, *Kew Bulletin* 39(2): 285. 1984, *Kew Bulletin* 47(1): 65. 1992, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 561–562. Firenze 1994, S. Battaglia, *Grande dizionario della lingua italiana*. XVIII: 620. 1997, *Compositae Newsletter* 31: 2. 1997. High toxicity, *Senecio* is very toxic both fresh and in hay, affected animals often die, all grazing animals may be affected.

Senecio asirensis Boulos & J.R.I. Wood

Saudi Arabia, Yemen. Shrub

See *Kew Bull.* 38(3): 491. 1983

(Leaf decoction febrifuge.)

in Arabic: henna

Senecio asperulus DC.

South Africa. Very aromatic, yellow flowers

See *Prodr.* (DC.) 6: 386. 1838 [1837 publ. early Jan 1838]

(Plant infusion as an antidote for internal poisoning. Leaves infusion as a gargle for sore throat, also used for colds and influenza; mixed with *Cotyledon orbiculata* used as a gargle for sore throats and mouth ulcers. Mixed with *Mentha aquatica* for sore joints; for rheumatic and arthritic joints *Senecio asperulus* mixed with *Helichrysum odoratissimum* and *Mentha longifolia*.)

in Lesotho: mofereferere

Senecio bombayensis N.P. Balakr. (*Senecio reticulatus* C.B. Clarke)

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 431. 1838 [1837 publ. early Jan 1838], *Compos. Ind.* 199. 1876 and *J. Bombay Nat. Hist. Soc.* lxvii. 61. 1970

(Leaf juice for bleeding gums, gastrointestinal disorders and stomachache; leaves chewed for strengthening teeth.)

in India: bhujbal

Senecio brasiliensis (Sprengel) Lessing var. ***tripartitus*** (DC.) Baker (*Cineraria brasiliensis* Spreng.; *Senecio canabinaefolius* Hooker & Arnott; *Senecio cannabinaefolius* Hooker & Arnott; *Senecio cannabinifolius* Hook. & Arn.; *Senecio canabifolius* Less.; *Senecio tripartitus* DC.; *Senecio tripartitus* A. Rich.)

South America. A weed of disturbed sites

See *Species Plantarum* 2: 866–872. 1753, *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 2: 142. 1820 [1821], *Linnaea* 6: 249. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 418. 1838 [1837 publ. early Jan 1838], *J. Bot.* (Hooker) 3: 341. 1841, *Flora Brasiliensis* 6(3): 322. 1884 and *Darwiniana* 25: 217–226. 1984

(Toxic to livestock. Pyrrolizidine alkaloids are found in other toxic members of the genus *Senecio*.)

Senecio burchellii DC. (*Senecio burchellii* (auctt. non DC.); *Senecio burchellii* (DC. p.p.); *Senecio lichtensteinensis* Dinter)

South Africa. Florets all yellow

(Frequent cause of poisoning horses and cattle. Human poisoning.)

in English: guanobush, Molteno disease plant, Molteno disease senecio, ragwort

in Southern Africa: geelgifbossie, Burchell senecio, gifbossie, kovanna, Moltenobossie, sprinkaanbossie; khotolia (Sotho)

Senecio candicans DC. (*Brachypappus candicans* (J. Vahl) Sch. Bip.; *Cacalia candicans* J. Vahl; *Cacalia candicans* Poepp. ex DC., nom. inval.; *Culcitium gayanum* Remy; *Senecio candicans* Wall.; *Senecio culciremey* Cuatrec.)

India.

See *Symb. Bot.* (Vahl) 3: 91, t. 71. 1794, *Numer. List* [Wallich] n. 3123. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 325, 412. 1838 [1837 publ. early Jan 1838], *Flora Chilena* [Gay] 4(2): 130. 1849, *Flora* 38: 120. 1855 and *Fieldiana, Botany* 27(1): 43. 1950

(Stem bark decoction given with honey to treat diarrhea.)

in India: panaso konda

Senecio desfontainei Druce (*Senecio coronopifolius* Desf., nom. illeg.; *Senecio coronopifolius* Burm. f.; *Senecio glaucus* L. subsp. *coronopifolius* (Desf.) Alexander)

India.

See *Flora Indica ... nec non Prodromus Florae Capensis* 181, t. 60, f. 5. 1768, *Flora Atlantica* 2: 273. 1800 and *Brit. Pl. List* 2: 61. 1928, *Notes from the Royal Botanic Garden, Edinburgh* 37(3): 387–428. 1979, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Cytologia* 64: 181–196. 1999

(Decoction of roots of this plant and flowers of *Terminalia bellirica* given in cholera and fevers.)

in India: jaari

Senecio eremophilus Richardson (*Senecio ambrosioides* Rydb., nom. illeg., non *Senecio ambrosioides* Mart. ex Baker)

North America.

See *Species Plantarum* 2: 866–872. 1753, *Narrative of a Journey to the Shores of the Polar Sea* 759. 1823, *Flora Antarctica* 2: 314. 1846, *Bulletin of the Torrey Botanical Club* 26(11): 592. 1899 and *Bulletin of the Torrey Botanical Club* 37(9): 467–468. 1910, *Annals of the Missouri Botanical Garden* 2(3): 598. 1915, *Vascular Plants of the Pacific Northwest* 5: 288. 1955, *Taxon* 26: 257–274. 1977, *Rhodora* 80: 431–440. 1978, *Canadian Journal of Botany* 56(14): 1710. 1978, *Taxon* 31(2): 344–360. 1982

Senecio fistulosus Poepp. ex DC.

Chile. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 418. 1838

(Leaf juice to treat cardiovascular diseases.)

in Chile: hualtata, lampazo

Senecio flaccidus Less. var. ***monoensis*** (Greene) B.L. Turner & T.M. Barkley (*Senecio filicifolius* Greenm.; *Senecio lathyroides* Greene; *Senecio monoensis* Greene; *Senecio pectinatus* A. Nelson)

North America, USA, California.

See *Linnaea* 5(1): 161–162. 1830 and *Leaflets of botanical observation and criticism* 1: 221. 1906, *A Manual of the Flowering Plants of California ...* 1149. 1925, *Phytologia* 69(1): 54. 1990

(Roots infusion a remedy for cold.)

Senecio graveolens Wedd. (*Senecio graveolens* var. *psilochaeniensis* Cabrera)

Chile.

See *Chloris Andina* 1(3): 111. 1855[1856] and *Notas del Museo de la Plata, Botánica* 1: 395. 1936

(Infusion against colds.)

in Chile: chachacoma

Senecio ilicifolius L. (*Senecio quercifolius* Thunb.)

South Africa, Cape. Yellow flowers

(Frequent cause of poisoning, horses and cattle. Human poisoning.)

in English: ragwort

in South Africa: ghwanobos, gifbossie, guanobos, kowanna-bossie, sprinkaanbossie, sprinkaanseencio

Senecio integerrimus Nutt.

See *Species Plantarum* 2: 866–872. 1753, *The Genera of North American Plants* 2: 165. 1818 and Clawson, A.B. “The American groundsels species of *Senecio* as stock poisoning plants.” *Vet. Med. Small Anim. Clin.*, 28: 105–110. 1933, *Taxon* 31(2): 344–360. 1982

(This plant has caused experimentally chronic poisoning of cattle and horses. Ingesting the plant material over long periods causes irreversible liver damage in animals.)

in English: entire-leaved groundsel

Senecio isatideus DC.

South Africa, Lesotho. Numerous stems, flaccid leaves grey-green, florets yellow

(Frequent cause of poisoning, horses and cattle.)

in English: Dan’s cabbage, poisonous ragwort

in Southern Africa: inkanga, blouvlisenecio; lebato (Sotho)

Senecio jacobaea Linnaeus (*Jacobaea vulgaris* Gaertner)

Europe. Perennial herb, erect, terrestrial, lower stems purple, foliage blue-green, leaves papery, rays and disks yellow, involucre bracts green with dark apex

See *Species Plantarum* 2: 866–872. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *De Fructibus et Seminibus Plantarum...* 2(3): 445. 1791 and Pethick, W.H. “Pictou cattle disease.” *Can. Vet. Rec.*, 2: 13–16. 1921, *Watsonia* 11: 211–223. 1977, Pearson, E.G. “Clinical manifestations of tansy ragwort poisoning.” *Mod. Vet. Pract.*, 57: 421–424. 1977, *Taxon* 28: 408. 1979, *Acta Biologica Cracoviensia, Series Botanica* 22: 37–69. 1980, *Informatore Botanico Italiano* 16: 251–260. 1984, Johnson, A.E., Molyneux, R.J. “The pyrrolizidine alkaloid free base and N-oxide content of toxic range plants.” *J. Toxicol. Toxin Rev.*, 5: 256. 1986, *Botanika (Minsk)* 28: 23–33. 1987, *Acta Facultatis Rerum*

Naturalium Universitatis Comenianae, Botanica 34: 3–20. 1987, *Zapovedniki Belorussii Issledovaniia* 12: 3–8. 1988, *Sida* 13: 241–250. 1988, Huxtable, R.J. “Human health implications of pyrrolizidine alkaloids and herbs containing them.” Pages 41–86 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, Inc., Boca Raton, Fla. 1989, Molyneux, R.J., James, L.F. “Pyrrolizidine alkaloids in milk: thresholds of intoxication.” *Vet. Hum. Toxicol.*, 32: 94–103. 1990, *Lagascalia* 15: 269–282. 1990, Bain, J.F. “The biology of Canadian weeds. 96. *Senecio jacobaea* L.” *Can. J. Plant Sci.*, 71: 127–140. 1991, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 476–479. 1991, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(2): 113–114. 1992, *Thaiszia* 9(1): 31–40. 1999, *Biologia* 54: 43–49. 1999, *American Journal of Botany* 86(7): 1003–1013. 1999

(It is toxic to livestock and legally noxious in most states and provinces where it occurs. This plant contains pyrrolizidine alkaloids which primarily cause irreversible liver cirrhosis in animals that ingest them. This plant has poisoned cattle and horses, and possibly goats. Animals and humans may be poisoned if they drink the milk of animals that have ingested this plant. The flowers contain the highest concentration of the toxins.)

in English: ragwort, stinking Willie, tansy ragwort

Senecio jacquemontianus Benth. ex Hook. f. (*Senecio jacquemontianus* (Decne.) C.B. Clarke; *Senecio jacquemontianus* (Decne.) Benth. ex Hook.f.)

India. Perennial herb with yellow heads

See *Compos. Ind.* 208. 1876, *Fl. Brit. India* [J.D. Hooker] 3(8): 350. 1881 [Mar 1881]

(Roots applied for unburst boils.)

in India: pahand

Senecio laetus Edgew. (*Senecio chrysanthemoides* DC., nom. illeg.; *Senecio chrysanthemoides* var. *eustegius* Hand.-Mazz.; *Senecio chrysanthemoides* var. *khasianus* (C.B. Clarke) Hook. f.; *Senecio rosulifer* H. Lév. & Vaniot; *Senecio scapiformis* Y.L. Chen & K.Y. Pan)

China, India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 365. 1838, *Transactions of the Linnean Society of London* 20(1): 74. 1846, *The Flora of British India* 3(8): 339. 1881 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(179–181): 359. 1910, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13(120): 639–640. 1937, *Nucleus* 18: 6–19. 1975, *Taxon* 24: 501–516. 1975, *Acta Phytotaxonomica Sinica* 19(1): 93, pl. 6, f. 1–5. 1981

(Whole plant for rheumatism, fever, abdominal pain.)

Senecio latifolius DC. (*Senecio latifolius* Mast.; *Senecio latifolius* Banks & Sol. ex Hook.f.; *Senecio scleratus* Schweick.)

South Africa, Malawi. Robust herb, perennial, erect, usually one-stemmed, leafy, base of the stems woolly, clustered cylindrical roots, narrow stem-clasping leaves, many-branched inflorescence with yellow flower-heads, glabrous achenes, white pappus

See *Prodr.* (DC.) 6: 387. 1838 [1837 publ. early Jan 1838], *Bot. Antarct. Voy.* II. (*Fl. Nov.-Zel.*) 1: 145. 1852, *Gard. Chron.* (1894) ii. fig. 43. 1894

(Variable toxicity, frequent cause of poisoning, horses and cattle.)

in English: Dan’s cabbage, groundsel, Molteno disease plant, pictou disease, ragwort, Rhodesian ragwort, senecio, stagger’s bush, Winton disease

in Southern Africa: gifbossiesenecio, kraakstewel, krakerbossie; chigurungu (Shona); idwara (Xhosa); mabolo (Ndebele)

Senecio mikanioides Otto ex Walp. (*Delairea odorata* Lem.; *Senecio mikanioides* Otto, nom. subnud.; *Senecio scandens* Buch.-Ham. ex D. Don)

Latin America, South Africa.

See *Prodromus Florae Nepalensis* 178. 1825, *Allgemeine Gartenzeitung* 10: 168. 1842, *Annales des Sciences Naturelles; Botanique*, sér. 3 1: 379–381. 1844, *Allgemeine Gartenzeitung* 13(6): 42. 1845 and *Taxon* 26: 557–565. 1977, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978

(Known to have caused poisoning. Roots given for stomach troubles.)

in English: climbing groundsel, German-ivy

in Portuguese: tasneirinha

in India: aklebir, mug

Senecio nudicaulis Buch.-Ham. ex C.B. Clarke (*Jacobaea nudicaulis* (Buch.-Ham. ex D. Don) B. Nord.; *Senecio blattariifolia* Franch.; *Senecio esquirolii* H. Lév.; *Senecio nudicaulis* Sch.Bip.; *Senecio nudicaulis* Buch.-Ham. ex D. Don; *Senecio pallens* Wall.; *Senecio pallens* Bojer ex DC.; *Senecio pallens* Wall. ex DC.; *Senecio yunnanensis* Franch.)

India, Nepal.

See *Prodromus Florae Nepalensis* 178. 1825, *Numer. List* [Wallich] n. 3132. 1831, *Prodr.* (DC.) 6: 377. 1838 [1837 publ. early Jan 1838], *Compositae Indicae* 191. 1876, *Bull. Soc. Bot. France* 39: 303. 1893 [1892 publ. 1893], *Journ. de Bot.* viii. (1894) 363. 1894, *Journ. de Bot.* 1896, 415. 1896 and *Repert. Spec. Nov. Regni Veg.* 10: 352. 1912, *Compositae Newslett.* 44: 12. 2006

(Plant decoction given in amebic dysentery, to stop bleeding and reduce inflammation. Juice of the leaves as a blood purifier and for fevers; powdered leaves for burns and boils.)

in India: hara nikhada, kakrata, neelkanthi, paran, ratpatti

Senecio pycnanthus Phil.

Chile. Perennial herb

See *Linnaea* 28: 740. 1858, *Anales Univ. Chile* 88: 14. 1894

(Stomachic.)

in Chile: quelén-quelén

Senecio retrorsus DC. (*Senecio graminicolus* C.A. Sm.; *Senecio latifolius* var. *barbellatus* (DC.) Harv.; *Senecio latifolius* var. *retrorsus* (DC.) Harv.; *Senecio latifolius* var. *subedentulus* DC.)

South Africa.

(Frequent cause of poisoning, horses and cattle.)

in English: bushweed, Dan's cabbage, grass stagger's weed, Molteno disease plant, poisonous ragwort, stagger's bush, stagger's senecio

in South Africa: dunsiektebossie, kraakstewel, kraakstewelsenecio, kraakerbossie

Senecio riddellii Torrey & A. Gray (*Senecio filifolius* Nuttall var. *fremontii* Torrey & A. Gray; *Senecio fremontii* (Torr. & A. Gray) Rydb., nom. illeg., non *Senecio fremontii* Torr. & A. Gray; *Senecio riddellii* var. *parksii* Cory; *Senecio spartioides* Torrey & A. Gray; *Senecio spartioides* Torrey & A. Gray var. *fremontii* (Torrey & A. Gray) Greenman; *Senecio spartioides* var. *parksii* (Cory) Shinners; *Senecio spartioides* var. *riddellii* (Torrey & A. Gray) Greenman)

North America.

See *Species Plantarum* 2: 866–872. 1753, *Transactions of the American Philosophical Society*, new series, 7: 414. 1841, *A Flora of North America*: containing ... 2(3): 438, 444. 1843 and *Manual of the Flora of the northern States and Canada* 1028. 1901, *Monographie der nord- und centralamerikanischen Arten der Gattung Senecio* 1: 26. 1901, *Annals of the Missouri Botanical Garden* 23(3): 456. 1936, *Rhodora* 45(532): 164–166. 1943, *Sida* 1(6): 379. 1964, *Phytologia* 56(1): 55–60. 1984, Johnson, A.E., Molyneux, R.J. “The pyrrolizidine alkaloid free base and N-oxide content of toxic range plants.” *J. Toxicol. Toxin Rev.*, 5: 256. 1986

(*Senecio riddellii* is poisonous to livestock. It is now locally scarce because of efforts to eradicate it.)

Senecio ruwenzoriensis S. Moore (*Senecio othonniformis* Fourcade; *Senecio paucifolius* DC., nom. illeg., non *Senecio paucifolius* S.G. Gmel.)

Congo and Cameroons. Perennial hairless herb, stems solitary to few, fleshy stalkless leaves, florets deep yellow with brown anthers, in grassland, stony grassland

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 403. 1838 [1837 publ. early Jan 1838] and *Journal of the Linnean Society, Botany* 35: 355. 1902, *Transactions of the Royal Society of South Africa* 21: 89. 1943

(Suspected of poisoning.)

Senecio speciosus Willd. (*Senecio concolor* DC.)

South Africa. Deep purple flowers

(Leaves and stalks for chest complaints and dropsy.)

in South Africa: iBohlololo (Zulu)

Senecio vulgaris L.

Cosmopolitan.

(This plant contains pyrrolizidine alkaloids, which cause irreversible liver damage after chronic exposure. Cattle and horses have died after ingesting common groundsel. Humans use this plant in teas and herbal remedies in some parts of the world. Death occurred after some species of the genus *Senecio* were ingested. Humans should not ingest foods that contain any plant material from this genus. The highest concentration of pyrrolizidine alkaloids is found in the flowers and the lowest in the roots.)

in English: groundsel, common groundsel

(Used for bites, stings, eczema, thrush, ringworm, scabies, skin rashes, sores. Roots and leaves can be chewed to relieve stomachache.)

in English: money bush, rambling cassia, stiverbush, yellow candle wood

in Tanzania: mkaanga, mwingajini

in Central America: barba jolote, mora hedionda, vainillo

Senna covesii (A. Gray) H.S. Irwin & Barneby (*Cassia covesii* A. Gray; *Earleocassia covesii* (A. Gray) Britton; *Earleocassia covesii* (A. Gray) Britton & Rose)

Mexico, USA. Perennial non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 7: 399. 1868 and *North American Flora* 23(4): 249. 1930, *Phytologia* 44(7): 499–501. 1979

(Roots infusion used in the treatment of measles, also a kidney medicine. Leaves and stems infusion good for the liver and to cure chicken pox.)

Senna didymobotrya (Fresen.) H.S. Irwin & Barneby (*Cassia didymobotrya* Fresen.; *Cassia nairobiensis* L.H. Bailey; *Cassia nairobiensis* Hort. ex L.H. Bailey, not validly published; *Cassia nairobiensis* Aggeler & Musser; *Cassia nairobiensis* L.H. Bailey; *Cassia verdickii* De Wild.)

East Africa. Perennial non-climbing tree, shrub or small tree, bushy, spreading, aromatic with smell of ground nuts, leaves arranged spirally paripinnately compound, erect axillary raceme, petals bright yellow, blackish dehiscent flattened oblong pod, seeds with strong smell when crushed, invasive, grassland, coastal scrub, woodland, roadsides, wasteland, on river banks, along forest edges, damp sites, open disturbed area, riverine, lake-shore areas, deciduous bushland, well-watered sites, used for pest control

See *Species Plantarum* 1: 376–381. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 3*. 1754, *Flora* 22(1): 53. 1839 and *Hortus Second* 146. 1941, *Memoirs of the New York Botanical Garden* 35: 467. 1982, *Journal of Ethnopharmacology* 6(1): 29–60. 1982, *Belgian Journal of Botany* 128(2): 165–175. 1995, *Journal of Ethnopharmacology* 46: 17–23. 1995, *Journal of Ethnopharmacology* 48: 131–144. 1995, *Phytochemistry* 42(5): 1423–1425. 1996, *New Phytologist* 155: 205–217. 2002, *Journal of Ethnopharmacology* 83: 39–54. 2002, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Phytotherapy Research* 18(5): 379–384. 2004, *Journal of Ethnopharmacology* 108: 332–339. 2006, *Journal of Ethnopharmacology* 109: 1–9. 2007, *Journal of Ethnopharmacology* 111: 303–307. 2007, *Journal of Ethnopharmacology* 113: 521–540. 2007, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Toxins. Poisonous plant, may be fatal, leaves cause violent vomiting and dysentery. Plant extracts used in reproductive health care, in therapy for respiratory diseases, asthma. Leaves and pods antioxidant, anti-giardial, antibacterial, antifungal. Leaves infusion as an emetic in the treatment of malaria. Root used to treat round worms and diarrhea. A decoction or infusion from the leaves, stems and roots drunk as a laxative and purgative for the treatment of abdominal pains, while in large quantities taken as an emetic. Leaves and roots used as fish poison. Veterinary medicine, for tick control.)

in English: African wild sensitive plant, candelabra tree, candle bush, peanut cassia, peanut-butter cassia, popcorn bush, popcorn senna, wild senna

in India: at tora, rata tora

(Used in Ayurveda, Unani and Sidha. Plant or seeds paste applied externally in skin diseases, boils, itch, eczema. Root paste used for ringworm, snakebite. Powdered seeds of *Impatiens balsamina* and *Cassia tora* mixed and used for normal delivery. Seeds diuretic, antihepatatotoxic, purgative, used in acute conjunctivitis, glaucoma, skin problems, ascites, infant malnutrition, and also for worms, ringworm, eczema; pounded seeds to treat itching and ringworm; roasted seeds chewed for cough and cold; seeds and *Curcuma longa* made into a paste applied as poultice in gonorrhoea. Leaves laxative, antirheumatic, antiperiodic, antifungal, antimutagenic, aperient, germicide and anthelmintic; leaf juice scorpion repellent, applied also for wasp bite; leaf paste applied on whole body for the treatment of measles; tender leaves eaten to prevent skin diseases, especially in cases of ringworm and itches; leaf infusion taken as vermicide; leaves decoction laxative; leaves pounded and applied on cuts and wounds; leaves and seeds diuretic, antiseptic and antipyretic, in the treatment of ringworm, itches, skin diseases and scabies. Veterinary medicine, seeds given to animals for inducing fatness and for more lactation; crushed leaves or boiled leaves applied on sprains; boiled leaves applied in bruises, contusions. Whole plant as fish poison. Medico-religious beliefs, a traditional remedy through plant wreath, pieces of roots tied in a thread and hung as a necklace for child suffering of chronic fever and stiffness of muscles; leaf tied to the left hand to treat malarial fever.)

Senna truncata (Brenan) Lock (*Cassia truncata* Brenan)

Ethiopia and Somalia. Perennial non-climbing shrub, leaves with spreading hairs, yellow flowers, pods ridged curved, eaten by goats

See *Kew Bulletin* 13(2): 245–246. 1958, *Kew Bulletin* 43(2): 341. 1988

(Seeds are eaten or an infusion of the leaves is drunk, as a purgative.)

Serenoa Hook.f. Arecaceae (Palmae)

For the American (b. Connecticut) botanist Sereno Watson, 1826–1892 (d. Cambridge, Massachusetts), attended Yale College, traveller, plant collector, assistant with Asa Gray at the Gray Herbarium and later Curator, in 1889 elected to the National Academy of Sciences. See *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany.* Washington: Government Printing Office, 1871, *List of plants collected in Nevada and Utah 1867–1869.* Sereno Watson, collector. [Washington, D.C. 1871], *Gen. Bot.* 52: 381–393. 1998, *Prescrire Int.* 19(108): 181–182. 2010 [*Serenoa repens* and benign prostatic hyperplasia: no more effective than placebo.], *Minerva Urol. Nefrol.* 62(4): 335–340. 2010, *Urologia Internationalis* 86(3): 284–289. 2011

(Antiinflammatory, *Serenoa* fruits are the source of a steroidal drug that inhibits the conversion of testosterone to dihydrotestosterone, which binds to receptors in the prostate gland and in hair follicles. This inhibition is the biochemical basis for the use of *Serenoa* extracts in treating benign prostrate swelling and baldness, bladder infections and urinary tract infections. Ceremonial.)

in English: saw palmetto

in Brazil: serenoa

Sericocomopsis Schinz Amaranthaceae

Resembling the genus *Sericocoma* Fenzl, Greek *serikos* ‘silky’ and *kome* ‘hair of the head’, referring to the woolly ovary.

Sericocomopsis hildebrandtii Schinz

East Africa. Shrublet, bushy habit, bracts dull white

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21: 184. 1895

(Emetic, crushed roots decoction taken with meat soup.)

in Kenya: ekabonyo

Serjania Miller Sapindaceae

In honor of the Rev. Father Philippe Sergeant of Caux, France, a monk, botanist, or after the French friar and botanist Paul Serjeant; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London (28 Jan.) 1754, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 809. Ansbach 1852, Radlkofer, Ludwig Adolph Timotheus (1829–1927), *Serjania*; sapindacearum genus monographice descriptum. *Monographie der sapindaceen-gattung Serjania*. München, K.B. Akademie, 1875 and Acevedo-Rodriguez, Pedro (1954–), *Systematics of Serjania* (Sapindaceae): part I: A Revision of *Serjania* Sect. *Platycoccus*. New York, New York Botanical Garden, 1993, H. Genau, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 579. 1996.

South America. Epiphytic fern

See *Species Plantarum* 2: 1082–1094. 1753, *Journal für die Botanik* 2: 26. 1800[1801] and *Repertorium Specierum Novarum Regni Vegetabilis* 6: 314. 1909, *American Fern Journal* 54(3): 144. 1964, *Webbia* 31(1): 248. 1977, *Taxon* 55(4): 929, f. 3F, f. 4L–O. 2006

(Rhizome infusion intoxicating; crushed and mixed with water for kidney infections.)

in Honduras: isiska, kalakwala

Sesamothamnus Welw. Pedaliaceae

The name means ‘the shrubby *Sesamum*’, from the Greek *thamnos* ‘shrub’ and the genus *Sesamum* L., see *Trans. Linn. Soc. London* 27(1): 49–50, t. 18. 1869.

Sesamothamnus busseanus Engl.

Tropical Africa, Tanzania. A spiny shrub or small tree, deciduous, swollen trunk, many straight or slightly recurved spines, on the bare tree sweet-scented flowers white with a crimson tube, woody capsules, winged seeds, in dry *Acacia-Commiphora* bushland, shallow rocky soils, in very dry conditions

See *Trans. Linn. Soc. London* 27: 49. 1869 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 114. 1902

(Leaves infusion drunk as a remedy for constipation and intestinal gas. Pounded leaves and stems applied to fresh wounds to stop bleeding.)

in Tanzania: chung’ungu, ifufu, mlyang’ungu, mulyanhungu

Sesamum L. Pedaliaceae

Latin *sesamum*, *sisamum* ‘sesame, sesame, an oily plant, *sesima* or *sesama* ‘another name for *cici*, the palma Christi, castor oil plant’ (Plinius), Greek *sesamon*, *sasamon*, *sasamon*, *sesame*; Hebrew *shemen* ‘oil’; Akkadian *samasammu*, *samsammu*; see Carl Linnaeus, *Species Plantarum* 2: 634. 1753, *Genera Plantarum* Ed. 5. 282. 1754, *Fam. Pl.* (Adanson) 2: 213. 1763, Lehmann, Johann Georg Christian (1792–1860), *Novarum et minus cognitarum stirpium pugillus I-X/addita enumeratione plantarum omnium in his pugillis descriptorum auctore Christiano Lehmann. Olschki Editore, Firenze 1994, Salvatore Battaglia, *Grande dizionario della lingua italiana.* XVIII: 788–789. UTET, 1997, *Journal of Cytology and Genetics* 34: 69–74. 1999, *Journal of Genetics and Breeding* 54: 5–12. 2000, *Fieldiana, Bot.*, n.s. 41: 162–164. 2000, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1923–1924. 2001, *Economic Botany* 58(3): 329–353. 2004. The consumption of sesame products may cause a not very common but serious food allergy.*

Sesamum alatum Thonn. (*Sesamum alatum* Thonn. ex Schumach.; *Sesamum sabulosum* A. Chev.; *Volkameria alata* (Thonn.) Kuntze)

Mali, Sudan. Herb, erect, annual, leaves mucilaginous very slimy, flowers solitary in leaf axils, corolla rose-red-purplish, calyx campanulate with narrowly triangular lobes densely glandular, capsule dehiscing longitudinally, black winged seeds, eaten by camels, leaves and young shoots a cooked

vegetable, common weed in cultivated fields, in river beds, dry savanna, grassland, sandy red soil, open bushland, in waste ground

See *Species Plantarum* 2: 637. 1753, Schumacher, Heinrich Christian Friedrich (1757–1830), *Beskrivelse af Guineiske planter* 284. Kjöbenhavn 1827, *Revisio Generum Plantarum* 3: 247. 1893, *Revisio Generum Plantarum* 3: 247. 1898 and *Flore de l’Afrique Centrale Française, Énumération des Plantes Récoltées* 1: 229. 1913, *Flore de Madagascar et des Comores* 179: 5–46. 1971, *Phytochemistry* 31: 2911–2912. 1992, *Journal of Cytology and Genetics* 31(1): 31–36. 1996

(Macerated fruits for fevers. Leaves mucilaginous, a solution of this mucilage applied to eyes for any ailment or irritation. Edible oil from the seed used as an aphrodisiac and astringent, for diarrhea and intestinal disorders. Veterinary medicine, leaves decoction given to cattle to promote the fertility. When an infant is teething, the entire plant is tied around its waist for protection, gris-gris.)

in English: camel’s sesame, gazelle’s sesame, sesame of the gazelle, sesamum, wild sesame

in Benin: agban

in Mali: fugajuru, tolukut

in Niger: ataghanfak, hanchin foy, kâjoem-kargimu, korolamti, lamtin barewa, miakaré, poeluel

in Senegal: bemé

in Southern Africa: motlhomaganyane (Tswana)

in Sudan: simsim al ghazal, simsim al jumal

Sesamum angolense Welw.

Tropical Africa, Angola. Shrub, herbaceous or woody, robust, leafy, bad rank-smelling, simple or many-branched, erect to semi-prostrate, mature branches prostrate, leathery rough leaves white tomentose below, tubular solitary flowers in leaf axils, corolla pink to purple, hairy persistent calyx with pointed lobes, 4-side densely hairy capsule with a flat short beak, slimy leaves cooked and eaten, bee forage, in disturbed grassland, roadsides, along river valleys, in open woodlands

See *Species Plantarum* 2: 634. 1753, *Apontamentos Phytogeographicos* 588. 1858[1859] and *Phytochemistry* 27(8): 2677–2679. 1988

(Antiviral, haemostatic, insecticides. Seeds for troubles of indigestion. Leaves for diarrhea, dysentery, to treat constipation and to stop vomiting; leaves or roots decoction or infusion also drunk for cough, catarrh, poisoning, and applied externally to cure wounds, skin diseases, measles and sores. Roots and leaves used for treating measles and poisoning. Used to aid difficult childbirth, leaves being pressed into uterus; roots infusion drunk at the time of labor to hasten delivery. Veterinary remedy, diarrhea, dysentery.)

in Burundi: umurenda, umurendarenda

in Congo: igombe, igonde

in Malawi: chiotwe

in Rwanda: igonde

in Tanzania: delele, enderemet, erenze, ilenda, ilendi, ilendilya-mhonjela, ipela, irenda, lilendi, mkongela, mkuyamani, mlenda, mlenda-gwa-wima, mlenda mtali, mpombo

in Zambia: mukonde

Sesamum calycinum Welw.

Zambia, Zimbabwe. Herb, woody-based, many-branched, erect, spreading, straggling, robust rootstock, tubular corolla light purple to bright pink

See *Die Pflanzenwelt Ost-Afrikas* C: 365. 1895 and *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983

(Used for dyspepsia, headache.)

in Kenya: luta

Sesamum calycinum Welw. var. *angustifolium* (Oliv.) Ihlenf. & Seidenst. (*Sesamum angustifolium* (Oliv.) Engl.; *Sesamum angustifolium* Engl.)

Tropical Africa. Herb, woody-based, many-branched, erect, spreading, straggling, robust rootstock, unpleasant smell of raw chopped leaves, tubular corolla light purple, campanulate calyx persistent in fruit, narrow capsules deeply grooved, oil from the seeds, leaves and flowers eaten fresh or dried during famine, stem used as a vegetable, leaves slimy when crushed used as soap, leaves fodder, very similar to *Sesamum calycinum* Welw., weed, bushland, roadside, grassland and sandy grassland, in abandoned field

See *Trans. Linn. Soc. London* 27(1): 52. 1869, *Die Pflanzenwelt Ost-Afrikas* C: 365. 1895 and *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983, *Journal of Ethnopharmacology* 70: 281–300. 2000

(Aerial parts decoction taken orally to prevent conception. Leaves laxative, antioxidant, astringent, purifies kidneys and spleen. Eating leaves helps treat and prevent anemia; leaves infusion used for diarrhea and dysentery; rubbed mucilaginous leaves in water used to treat eye troubles, burns, wounds, stomachache, diarrhea in children and to ease labor and delivery. Whole plant crushed to soothe an internal injury or use topically, soothing application for measles. Roots decoction emetic and to treat cough; powdered roots infusion drunk for diarrhea and other intestinal disorders. Oil used as medicine for ringworm. Veterinary medicine, laxative, purgative, decongestant, insect repellent, sticky crushed leaves used to trap tsetse flies on cattle.)

in English: wild simsim

Sesuvium L. Aizoaceae

Derived from Latin *sedum*, or perhaps from the Latin *Sesuvii, orum* (*Essui, orum*), a Gallic tribe, west of the Seine; see *The Civil and Natural History of Jamaica in Three Parts* 206. 1756, C. Linnaeus, *Systema Naturae*. Ed. 10. 2: 1052, 1058, 1371. 1759, *Revisio Generum Plantarum* 1: 263. 1891.

Sesuvium portulacastrum (L.) L. (*Halimus portulacastrum* (L.) Kuntze; *Halimus portulacastrum* Kuntze; *Pharnaceum rubens* Adamson; *Portulaca portulacastrum* L.; *Sesuvium ortegae* Spreng.; *Sesuvium pedunculatum* Pers., nom. illeg. superfl.; *Sesuvium revolutifolium* Ortega; *Sesuvium sessile* Pers.; *Sesuvium sessiliflorum* Dombey ex Rohrb., nom. inval.; *Trianthema americana* Gillies ex Arn.)

Pantropical. Succulent, halophyte, perennial herb, trailing reddish stems often rooting at the nodes, suberect, prostrate or creeping, fleshy leaves, single red-purple flowers, small conical capsules, black seeds, leaves and stems cooked and eaten, very salty, fodder, ground cover and pioneer, erosion control, a troublesome weed, saline beach-dunes

See *Species Plantarum* 1: 223–224, 272, 445–446. 1753, *The Civil and Natural History of Jamaica in Three Parts* 206. 1756, *Systema Naturae*, Editio Decima 2: 1052, 1058, 1371. 1759, *Novarum, aut Rariorum Plantarum Horti Reg. Botan. Matrit.* 19. 1797, *Der Botanische Garten der Universität zu Halle, Erster Nachtrag* 1: 36. 1801, *Syn. Pl.* 2: 39. 1806, *Edinburgh Journal of Natural and Geographical Science* 3: 354. 1831, *Flora Brasiliensis* 14(2): 310. 1872, *Revisio Generum Plantarum* 1: 263. 1891 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 32: 433. 1925, *Fl. Origin unknown. Annual, stout, leafy, fast growing, erect, tufted, branching from base, compact inflorescence erect

to pendent to nodding, broad-elliptic to globose spikelets bristled with erect teeth, 2 plumose stigmas, husk papery, yellowish-creamy grains, source of valuable human food and vegetable, roasted and ground as flour, the grain used for feeding cage-birds and poultry, cultivated for the grain and forage for cattle, medicinal, a noxious invasive weed, potential seed contaminant, considered to be derived from *Setaria viridis* (L.) P. Beauv.

Origin paleotropics. Annual, green, weak, tender, sticky habit, scabrid, loosely or narrowly tufted, culms erect or usually decumbent at the base, roots fibrous, nitrogen-loving pioneer, useful grass highly variable and reproducing by seeds, one of the weeds of coffee plantations and many crops, palatable, grazed by cattle when young, suitable for hay-making, seeds eaten by small birds, grain used for an alcoholic drink, a source of food and vegetable salt, inflorescence sticking, seed can attach itself to clothing and to animals, on nitrogen-rich disturbed soils, irrigation ditches, wadi beds, close to and confused with *Setaria viridis* (L.) P. Beauv. and *Setaria adhaerens* (Forssk.) Chiov.

Shepherdia Nuttall Elaeagnaceae

For John Shepherd, 1764–1836 (Liverpool), Curator of the Liverpool Botanic Garden, friend of J.E. Smith and T. Nuttall, wrote *A catalogue of plants in the Botanic Garden, at Liverpool*. Liverpool 1808; see H.N. Clokie, *Account of*

the Herbaria of the Department of Botany in the University of Oxford. 242. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 268. 1965, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 169. 1989.

Shepherdia argentea (Pursh) Nutt. (*Elaeagnus utilis* A. Nelson; *Hippophae argentea* Pursh; *Lepargyrea argentea* (Pursh) Greene)

North America. Perennial, tree or shrub, berries eaten by buffalo

See *Flora Americae Septentrionalis*; or, ... 1: 115. 1814 [1813], *The Genera of North American Plants* 2: 240. 1818, *Pittonia* 2(9): 122. 1890

(Berries eaten for stomach troubles, fevers, as a mild laxative. Ceremonial.)

in English: silver buffaloberry

Shepherdia canadensis (L.) Nutt. (*Elaeagnus canadensis* (L.) A. Nelson; *Hippophae canadensis* L.; *Lepargyrea canadensis* (L.) Greene)

North America, Alaska. Perennial shrub, food

See *Species Plantarum* 2: 1024. 1753, *The Genera of North American Plants* 2: 240. 1818, *Pittonia* 2(9): 122. 1890 and *American Journal of Botany* 22(7): 682. 1935, *Ann. Bot. Fenn.* 17: 258–263. 1980

(Berries acid, poisonous in great quantities. Plant decoction hypotensive, antirheumatic, sedative. Stems decoction taken for constipation, venereal disease. Roots cathartic, purgative, used for tuberculosis; infusion of roots used in childbirth. Fruits eaten fresh against colds.)

in English: buffalo berry, russet buffaloberry

Shepherdia rotundifolia Parry (*Elaeagnus rotundifolia* (Parry) A. Nelson; *Lepargyrea rotundifolia* (Parry) Greene)

North America. Perennial, tree or shrub

See *American Naturalist* 9(6): 350. 1875, *Pittonia* 2(9): 122. 1890 and *American Journal of Botany* 22(7): 682. 1935

(Poison.)

in English: roundleaf buffaloberry

Sherbournia G. Don Rubiaceae

See *Philosophical Transactions of the Royal Society of London* 51(2): 935, t. 23. 1761, *Encycl. Pl.*, new ed., Suppl. 2: 1303. 1855, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 90. 1873.

Shorea Roxb. ex Gaertner f. Dipterocarpaceae

To commemorate Sir John Shore Teignmouth, 1751–1834, first Baron, in 1769 was sent to Bengal as a cadet in the East India Company's civil service, in 1792 was created a baronet, in 1793 appointed successor to Lord Cornwallis and held the office of Governor-General of India till the close of 1797, in 1797 on his return to England he was created an Irish peer by the title of Lord Teignmouth, he was the first President of the British and Foreign Bible Society, his works include *Memoirs of the life, writings and correspondence of Sir William Jones*. London 1804 and *Considerations on the practicability, policy and obligation of communicating to the Natives of India the knowledge of Christianity ...* By a late resident in Bengal. 1808. See *De Fructibus et Seminibus Plantarum...* 3: 47–48, 50. 1805 [Suppl. Carp. 47 (t. 186, f. 1). 1805], *Bijdragen tot de flora van Nederlandsch Indië* 222. 1825, Shore Charles John, *Memoir of the life and correspondence of John, Lord Teignmouth*. By his son, Lord Teignmouth. London 1843, *Prodr.* (DC.) 16(2.2): 626. 1868 and *The Private Record of an Indian Governor-Generalship*. The correspondence of Sir John Shore, Governor-General, with Henry Dundas, President of the Board of Control, 1793–1798. Edited with an introduction and notes by Holden Furber. Cambridge, Mass. 1933, *Gard. Bull. Singapore* 31(1): 38. 1978, *Chinese Wild Plant Resources* 21(3): 4. 2002.

Shorea assamica Dyer (*Shorea assamica* subsp. *yingjian-gensis* Y.K. Yang & J.K. Wu; *Shorea siamensis* Miq. var. *borealis* Y.K. Yang & J.K. Wu)

India.

See *Annales Museum Botanicum Lugduno-Batavi* 1: 214. 1863, *Fl. Brit. India* [J.D. Hooker] 1: 307. 1874

(*Tacca integrifolia* tubers decoction mixed with honey and powdered bark of *Shorea assamica* taken for neck and body pain.)

Shorea robusta Gaertn.

India. Timber tree, deciduous, grey bark, coriaceous shining ovate-oblong leaves, pink-yellowish flowers in panicles, fruits with persistent sepals

See *Supplementum Carpologiae* 48 (t. 186, f. 1). 1805, *FBI* 1: 306. 1874 and *Journal of Cytology and Genetics* 19: 115–117. 1984, *Science and Culture* 59: 55–57. 1993

(Used in Ayurveda, Unani and Sidha. Root paste poured in the vagina before sexual intercourse as vaginal contraceptive. Roots and seeds useful in dysentery. Resin and mustard oil applied for relieving pain; powdered resin with hot milk given to relieve stomach pain. The gum mixed with curd is given in dysentery, gonorrhoea, weak digestion, chest pain, stomachache, and as aphrodisiac. Bark cooling, refrigerant, purgative, a decoction given in dysentery, and also used for washing old wounds; bark powder sprinkled on ulcers for healing; bark poultice applied on unhealing sores, and in cuts to stop bleeding. Fruits pounded and the paste given to treat diarrhoea. Leaf juice used in skin diseases. Ceremonial, ritual, magico-religious beliefs, wood used for constructing shrines and funerary pillars, resin burnt as incense in religious ceremonies. Seeds and stem bark as fish poison.)

(Powdered seeds given with water as a postpartum remedy and also to remove the placenta. Magico-religious beliefs, amulet, ritual, contact therapy, piece of stem tied on the wrist of a patient suffering from bodyache.)

in China: guang su bao dou

in India: koda gunjai

Shuteria suffulta Benth. (*Glycine suffulta* Wall.)

China, Myanmar, Thailand. Perennial climbing shrub

See *A Numerical List of Dried Specimens* [Wallich] n. 5507. 1831, *Plantae Junghuhnianae* 2: 232. 1852 and *Hooker's Icon. Pl.* 27: t. 2626. 1900, [1901 publ. May 1900], *Nordic J. Bot.* 12(3): 345. 1992

(Antifungal.)

Sibangea Oliv. Putranjivaceae (Euphorbiaceae)

See *Hooker's Icon. Pl.* 15: t. 1411. 1883 [1883–1885 publ. Mar 1883] and *American Journal of Botany* 91(11): 1882–1900. 2004.

Sibangea arborescens Oliv. (*Drypetes arborescens* (Oliv.) Hutch.; *Drypetes arborescens* Hutch.)

Cameroon to Gabon. Small tree, yellowish flowers

See *Hooker's Icon. Pl.* 15: t. 1411. 1883 [1883–1885 publ. Mar 1883] and *Fl. Trop. Afr.* [Oliver et al.] 6(1.4): 680. 1912

(Bark and leaves used as fish poison.)

Sibbaldia L. Rosaceae

For the Scottish (b. Edinburgh) physician Sir Robert Sibbald, 1641–1722 (d. Edinburgh), botanist, naturalist, M.D. Leyden 1661, knighted 1682, professor of medicine, among his writings are *Scotia Illustrata*. Edinburgi 1683 and 1684, *Portus, Coloniae, et Castella Romana, ad Bodotriam et ad Taum*. Edinburgi 1711, *Phalainologia nova, sive observationes de rarioribus quibusdam Balaenis in Scotiae littus nuper ejectis, etc.* Edinburgi 1692 and *Memoria Balfouriana*. Edinburgi 1699, with Sir Andrew Balfour (1630–1694) founded the Edinburgh Botanic Garden; see *Species Plantarum* 1: 284. 1753, John Claudius Loudon, *An Encyclopaedia of gardening*. London 1822, Sir William Jardine, *The Birds of Great Britain and Ireland*. (Memoir of Sir R. Sibbald, W. Smellie, J. Walker, A. Wilson). Edinburgi 1839–1843, *Genera Plantarum* 1242. 1840, William Munk, *The roll of the Royal College of physicians of London*. 1: 439–441. London 1878, James W. Cursiter, *List of Books and Pamphlets relating to Orkney and Shetland*. 61. WM. Peace & Son, Kirkwall 1894 and *Man. Fl. Pl. Calif.*, 483. 1925, *Notes R. Bot. Garden Edinb.*, 19: 325–27. 1938 [Chatterjee, Debabrata (1911–1960)], *Flora URSS* 10: 229–230, 615. 1941, H.R. Fletcher and W.H. Brown, *Royal Botanic Garden Edinburgh, 1670–1970*. Edinburgh 1970, *Preslia* 42: 185. 1970, Dikshit, B.K. *The Family Rosaceae in India: (revisionary studies on Potentilla L., Sibbaldia L. and Brachycaulos Dikshit & Panigr.)*. Volume 4/B.K. Dikshit and G. Panigrahi. Dehra Dun: Bishen Singh Mahendra Pal Singh, 1998.

Sibbaldia micropetala (D. Don) Hand.-Mazz. (*Potentilla albifolia* Wall. ex Hook. f.; *Potentilla albifolia* Wall.; *Potentilla mairei* H. Lévl., nom. nud.; *Potentilla micropetala* D. Don; *Potentilla micropetala* (Rydb.) Fedde, nom. illeg.)

Nepal.

See *Prodromus Florae Nepalensis* 231. 1825, *Numer. List* [Wallich] n. 1018. 1829, *The Flora of British India* 2(5): 347. 1878 and *Just's Bot. Jahresber.* 36, pt 2: 494. 1910, *Catalogue des Plantes de Yun-Nan* 232. 1917, *Journal of Ethnopharmacology* 52(3): 157–163. 1996

(Plant juice antiviral, antibacterial, antifungal, astringent, to treat diarrhea and dysentery.)

in China: bai ye shan mei cao

in Nepal: bhui pasari jhar

Sibbaldia procumbens Linnaeus (*Potentilla sibbaldi* Haller f.; *Potentilla sibbaldia* Kurtz; *Potentilla sibbaldia* Griessel.; *Potentilla sibbaldii* Haller f.; *Sibbaldia macrophylla* Turcz. ex Juz.; *Sibbaldia procumbens* var. *macrophylla* (Turcz. ex Juz.) Gubanov)

Canadian Arctic Archipelago. Perennial herbs

See *Species Plantarum* 1: 284. 1753, *Bot. Jahrb. Syst.* 19: 375, 460. 1894 and *Flora URSS* 10: 614. 1941

(Leaves infusion to relieve general stomachache. Roots astringent, tonic, febrifuge.)

in China: shan mei cao

Sibbaldia procumbens Linnaeus var. ***aphanopetala*** (Handel-Mazzetti) T.T. Yu & C.L. Li (*Sibbaldia aphanopetala* Handel-Mazzetti)

China.

See *Sp. Pl.* 1: 307. 1753 and *Acta Horti Gothob.* 13(9): 327–329. 1939, *Fl. Reipubl. Popularis Sin.* 37: 337. 1985

(Leaves infusion stomachic.)

in China: yin ban shan mei cao

Sibbaldia procumbens Linnaeus var. ***procumbens*** (*Potentilla procumbens* (L.) Clairv., nom. illeg.; *Potentilla procumbens* Sibth.; *Potentilla sibbaldi* Haller f.; *Potentilla sibbaldia* Kurtz; *Potentilla sibbaldia* Griessel.; *Potentilla sibbaldii* Haller f.; *Sibbaldia macrophylla* Turcz. ex Juz.; *Sibbaldia procumbens* var. *macrophylla* (Turcz. ex Juz.) Gubanov)

Canadian Arctic Archipelago. Perennial herbs

See *Species Plantarum* 1: 284. 1753, *Flora Oxoniensis* 162. 1794, *Manuel d'Herborisation en Suisse et en Valais* 166. 1811, *Bot. Jahrb. Syst.* 19: 375, 460. 1894 and *Flora URSS* 10: 614. 1941

(Leaves infusion to relieve general stomachache. Roots astringent, tonic, febrifuge.)

in China: shan mei cao

Sida L. Malvaceae

Sida is the ancient Greek name for the waterlily, *Nymphaea alba* L. (Theophrastus) and for pomegranate too; Akkadian *sedum* 'red'; see Carl Linnaeus, *Species Plantarum*. 2: 683–686. 1753, *Genera Plantarum*. Ed. 5. 306. 1754, *Systema Naturae*, Editio Decima 2: 1145. 1759, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 26. 1760, *Monadelphiae Classis Dissertationes Decem* 1: 14,

Sida javensis Cav. (*Sida veronicifolia* Lam. var. *javensis* (Cav.) Baker f.)

SE Asia, India. A prostrate herb, branched at base, stems rooting at the nodes, flowers yellow solitary, along roadsides, in teak forests, secondary growths, forest edges

See *Monadelphiae Classis Dissertationes Decem* 1: 10, pl. 1, f. 5. 1785

(A decoction of the entire plant used against gonorrhoea.)

in China: zhao wa huang hua ren

in Philippines: hapunan-niknik, hapunang-niknik, igat-igat, kolotane-baging, mar-maraipus, marmaraipus, padda-paddak-pusa

in Vietnam: b[as]i java

Sida linifolia Cav. (*Sida angustissima* Miq., nom. illeg.; *Sida angustissima* Saint-Hilaire; *Sida fiebrigii* Ulbr.; *Sida gramini-folia* Rich.; *Sida linearifolia* A. St.-Hil.; *Sida linearifolia* Thonn.; *Sida linifolia* Juss. ex Cav.; *Sida longifolia* Brandege; *Sida miqueliana* Turcz.; *Sida viminea* Fisch. ex Link)

South America.

See *Monadelphiae Classis Dissertationes Decem* 1: 14, pl. 2, f. 1. 1785, *Actes de la Société d'Histoire Naturelle de Paris* 1: 111. 1792, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 202. 1822, *Beskrivelse af Guineiske planter* 303. 1827, *Flora Brasiliae Meridionalis* (quarto ed.) 1: 179–180. 1827, *Stirpes Surinamensis Selectae* 102. 1850, *Bulletin de la Société Impériale des Naturalistes de Moscou* 32: 259. 1859 and *Zoë* 5: 212. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54 (Beibl. 117): 72. 1916, *Fieldiana, Bot.* 24(6): 324–386. 1949, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 313–373. 2007

(Stem bark wound dressing, analgesic.)

in Yoruba: obonibi, iso, obole, obolokolepon

Sida mauritiana Jacq. (*Abutilon mauritianum* (Jacq.) Medik.; *Abutilon mauritianum* (Jacq.) Sweet)

Tanzania.

See *Misc. Austriac.* [Jacquin] 2: 352. 1781 [or 1782], *Icon. Pl. Rar.* t. 137. 1783, Medikus, Friedrich Kasimir (1736–1808), *Ueber einige künstliche Geschlechter aus der Malvenfamilie ...* Mannheim, 1787, *Hort. Brit.* [Sweet] 53. 1826 and *Lundellia* 5: 98. 2002

(Used in Sidha. Whole plant for colitis, gastritis, dyspepsia. Leaves decoction emollient, febrifuge, for diarrhea, dysentery, venereal diseases, fevers; leaves crushed and the infusion used for diarrhea. Roots and bark boiled and the liquid drunk to treat diarrhea, stomachache, colds and coughs.)

in India: tootteeleley

Sida ovata Forssk. (*Sida aurescens* Ulbr.; *Sida dinterana* Hochr.; *Sida flexuosa* Burt Davy; *Sida grewioides* Guill. & Perr.; *Sida hoepfneri* Gürke)

India, Tanzania. Herb, woody based, corollas pale yellow to pale orange

See *Flora Aegyptiaco-Arabica* 116, 124. 1775, *Monadelphiae Classis Dissertationes Decem* 6: 350, pl. 196, f. 2. 1788 and *Willdenowia*. 25: 637–646. 1996

(Ground seeds mixed with sugar and given in lumbago.)

in India: bal, dabi, kharenti

in Tanzania: engonini, imangura

Sida rhombifolia L. (*Malva rhombifolia* (L.) E.H.L. Krause; *Malva rhombifolia* E.H.L. Krause; *Napaea rhombifolia* Moench; *Napaea rhombifolia* (L.) (Roots for dysentery.)

in China: yin du ying zi cao

Silene laciniata Cav. (*Melandrium laciniatum* (Cav.) Rohrb.; *Melandrium laciniatum* Rohrb.)

Mexico, North America. Perennial herb

See *Icones et Descriptiones Plantarum* [Cavanilles] 6: 44, t. 564. 1801, *Monographie der Gattung Silene* 233, 234. 1869 [1868 publ. 1 Jan 1869] and *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 17: 10. 1991

(Crushed plant rubbed on ant bites.)

in English: Mexican campion

Silene laciniata Cav. subsp. ***greggii*** (A. Gray) C.L. Hitchc. & Maguire (*Melandrium laciniatum* var. *greggii* (A. Gray) Rohrb.; *Silene greggii* A. Gray; *Silene laciniata* var. *greggii* (A. Gray) S. Watson)

North America. Perennial herb

See *Icones et Descriptiones Plantarum* [Cavanilles] 6: 44, t. 564. 1801, *Smithsonian Contributions to Knowledge* 5(6): 17. 1853, *Monographie der Gattung Silene* 232–234. 1869 [1868 publ. 1 Jan 1869], *Proceedings of the American Academy of Arts and Sciences* 10: 341. 1875 and *Revision of the North American Silene* 56. 1947 [University of Washington Publications in Biology. Seattle, WA.], *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 17: 10. 1991

(Roots decoction taken for dog or coyote bite, or mad dog or mad coyote bite.)

in English: cardinal catchfly, Gregg's campion

Silene latifolia Poir. (*Lychnis × loveae* B. Boivin; *Lychnis alba* Mill.; *Lychnis pratensis* Raf.; *Lychnis pratensis* Spreng.; *Lychnis vespertina* Sibth.; *Lychnis vespertina* Boiss.; *Melandrium album* Garcke; *Melandrium album* (Mill.) Garcke; *Melandrium dioicum* (L.) Coss. & Germ. subsp. *album* (Mill.) D. Löve; *Silene alba* (Mill.) E.H.L. Krause; *Silene alba* Muhl. ex Rohrb.; *Silene dioica* A. DC., nom. illeg.; *Silene dioica* Fisch. & C.A. Mey.; *Silene dioica* (L.) Clairv.; *Silene latifolia* Gray; *Silene latifolia* Hornem.; *Silene latifolia* Britten & Rendle; *Silene latifolia* subsp. *alba* (Mill.) Greuter & Burdet; *Silene pratensis* (Raf.) Gren. & Godr.; *Silene pratensis* Gren. & Godr.; *Silene pratensis* (Raf.) Godr.)

Europe, China, North America. Perennial herb, many-branched, downy leaves, sweet scented white flowers, male and female flowers on separate plants

See *The Gardeners Dictionary*: ... eighth edition *Lychnis* no. 4. 1768, *Voyage en Barbarie* 2: 165–166. 1789, *Danmarks og Holsteens Flora* 2: 792. 1800, *Manuel d'Herborisation en Suisse et en Valais* 146. 1811, *Suppl. (Emollient.)

in China: nian e ying zi cao

Silphium L. Asteraceae

The Greek name *silphion* for an umbelliferous plant, laserwort; Latin *silphium* for a plant called *laserpitium*,

laserpicium, see *Species Plantarum* 2: 919–920. 1753 and *American Midland Naturalist* 5(3): 62. 1917.

Silphium compositum Michx. (*Silphium compositum* subsp. *ovatifolium* (Torr. & A. Gray) C.R. Sweeney & T.R. Fisher; *Silphium compositum* subsp. *reniforme* (Raf. ex Nutt.) C.R. Sweeney & T.R. Fisher; *Silphium compositum* subsp. *venosum* (Small) C.R. Sweeney & T.R. Fisher; *Silphium compositum* Michx. var. *compositum*; *Silphium compositum* var. *ovatifolium* Torr. & A. Gray; *Silphium compositum* var. *reniforme* (Raf. ex Nutt.) Torr. & A. Gray; *Silphium compositum* var. *venosum* (Small) Kartesz & Gandhi; *Silphium lapsum* Small; *Silphium lapsuum* Small; *Silphium orae* Small; *Silphium ovatifolium* (Torr. & A. Gray) Small; *Silphium ovatifolium* Small; *Silphium reniforme* Raf. ex Nutt.; *Silphium reniforme* Raf.; *Silphium venosum* Small)

North America. Perennial herb

See *Flora Boreali-Americana* (Michaux) 2: 145. 1803, *Transactions of the American Philosophical Society*, ser. 2, 7: 342. 1840, *A Flora of North America: containing ...* (Torr. & A. Gray) 2(2): 276–277. 1842, *Bulletin of the Torrey Botanical Club* 25(9): 478. 1898 and *Flora of the Southeastern United States* [Small] 1242, 1340. 1903, *Manual of the Southeastern Flora* [Small] 1411. 1933, *Ohio Journal of Science* 70: 230, 232. 1970, *Amer. J. Bot.* 75: 652–668. 1988, *Phytologia* 71(4): 272. 1991

(Stimulant, tonic, taken for menstrual disorders.)

in English: kidneyleaf rosinweed

Silphium integrifolium Michx. (*Silphium integrifolium* Michx. var. *integrifolium*; *Silphium laevigatum* Pursh; *Silphium laevigatum* Elliott)

North America. Perennial herb

See *Flora Boreali-Americana* (Michaux) 2: 146. 1803, *Fl. Amer. Sept.* (Pursh) 2: 578. 1813, *Sketch Bot. S. Carolina* [Elliott] 2: 465. 1823 and *Chin. Bull. Bot.* 9(3): 47–49. 1992

(Analgesic, diuretic, for urinary troubles.)

in English: rosinweed, wholeleaf rosinweed

Silphium laciniatum L. (*Silphium laciniatum* Walter; *Silphium laciniatum* L. var. *laciniatum*; *Silphium laciniatum* var. *robinsonii* L.M. Perry)

North America. Perennial herb, stout bristly stems, rough leaves, bright yellow flower heads, dark yellow central disk, green bracts, plant exude a resinous chewable sap

See *Species Plantarum* 2: 919–920. 1753, *Fl. Carol.* [Walter] 217. 1788 and *Rhodora* 39(464): 297. 1937, *Chin. Bull. Bot.* 9(3): 47–49. 1992

(Roots decoction taken as an emetic, a tonic, stimulant; roots infusion for cough, lung problems and asthma. Magico-religious beliefs, ceremonial. Veterinary medicine, roots given to horses as a tonic, stimulant.)

in English: compass plant (= the leaves tend to be aligned north–south), compassplant

Silphium perfoliatum L. (*Resinocaulon perfoliatum* (L.) Lunell; *Resinocaulon perfoliatum* Lunell; *Silphium perfoliatum* L. var. *perfoliatum*)

North America. Perennial herb

See *Systema Naturae*, Editio Decima 2: 1232. 1759 and *American Midland Naturalist* 5(3): 62. 1917, *Grassl. China* 4: 42–43. 1986, *Sida* 13: 241–250. 1988, *Hereditas* (Beijing) 11: 5–8. 1989, *J. Wuhan Bot. Res.* 8: 297–300. 1990, *Chin. Bull. Bot.* 9(3): 47–49. 1992, *J. Wuhan Bot. Res.* 11: 1–4. 1993

(Roots decoction or infusion abortifacient, antirheumatic, stomachic, emetic and antiemetic, analgesic, antihemorrhagic, for menstrual disorders, lumbago and back pains, neuralgia, cold, taken by women to prevent premature birth. Magico-religious beliefs, ceremonial.)

in English: cup plant

Silybum Adans. Asteraceae

Greek *silybos*, *silybon* used for a spiny or thistle-like plant; Latin *sillybus*, *sittybus* ‘a kind of thistle’ (Plinius, M. Tullius Cicero); see Michel Adanson (1727–1806), *Familles des plantes*. 2: 116, 605. Paris 1763 [–1764] and *Kew Bull.* 22: 107–140. 1968.

Silybum marianum (L.) Gaertn. (*Carduus mariae* Crantz; *Carduus mariae* Garsault, nom. inval.; *Carduus marianus* L.; *Carthamus maculatus* (Scopoli) Lamarck; *Carthamus maculatus* Lam.; *Cirsium maculatum* Moench; *Cirsium maculatum* Scopoli; *Cirsium maculatum* Lam.; *Mariana lactea* Hill; *Mariana mariana* (L.) Hill; *Mariana mariana* Hill; *Silybum maculatum* (Scopoli) Moench; *Silybum maculatum* Moench; *Silybum mariae* (Crantz) S.F. Gray; *Silybum mariae* Gray; *Silybum marianum* Gaertn.)

Europe. Young shoots can be boiled and eaten like cabbage and young leaves can be added to salads, the seeds can be used as a coffee substitute

See *Sp. Pl.* 2: 820–826, 830–831. 1753, *Fig. Pl. Med.* 2: t. 200. 1764, *Inst. Rei Herb.* 1: 248. 1766, *Descr. Pl. Anim.* 134. 1767, *Hortus Kewensis* 61. 1768, *Flora Carniolica*, Editio Secunda 2: 130–131. 1772, *Fl. Franç.* (Lamarck) 2: 22. 1779 [1778 publ. after 21 Mar 1779], *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 638. 1785, *De Fructibus et Seminibus Plantarum* 2(3): 378, t. 168. 1791, *Methodus Plantas Horti Botanici ...* (Moench) 555, 557. 1794, *A Natural Arrangement of British Plants* 2: 436. 1821

(A treatment for liver ailments, leaves demulcent.)

in English: blessed milk-thistle, blessed thistle, holy thistle, lady’s thistle, Mary’s thistle, milk thistle, Our Lady’s milk thistle, St. Mary’s thistle, variegated thistle

in Arabic: shouk el-gamal, shouk sinnari, shouk el-gemal

in Spanish: cardo de la alameda

in Central America: cardo de Maria, cardo lechero, cardo santo, lechal

in South Africa: boerkwadissel, disseldoring, gevlekte silybum, Mariendissel, melkdissel

in China: shui fei ji

in North America: blessed milkthistle, chardon Marie

Simaba Aublet Simaroubaceae

Simaba, a native name in Guiana for one species, *Simaba multiflora* A. Juss.; see Jean Baptiste Christophore Fusée Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 1: 400, t. 153. Paris 1775.

Simaba cedron Planch. (*Aruba cedron* (Planch.) Kuntze; *Aruba cedron* Kuntze; *Quassia cedron* (Planch.) Baill.; *Quassia cedron* Baill.)

Colombia. Small tree, unbranched trunk, greenish flowers

See *London Journal of Botany* 5: 566. 1846, *Hist. Pl.* (Baillon) 4: 406. 1873, *Revisio Generum Plantarum* 1: 103. 1891

(Bark and seeds infusion an antidote for snakebites and a febrifuge for mild fevers. Powdered fruits, or a leaves and roots infusion, used to protect against snakes or other enemies. Seeds for fever, snakebite and stomachache. Veterinary medicine, a powder is made from the dried leaves and used as a treatment for mange in dogs and the control of mites and ticks.)

in Guyana: hikuri bianda

Simarouba Aublet Simaroubaceae

Simarouba, a native vernacular name in Guiana for *Simarouba amara* Aublet or *Quassia amara* L., see *Acta Helvetica, Physico-Mathematico-Anatomico-Botanico-Medica* 5: 267. 1762, *Histoire des plantes de la Guiane Française* 2: 859–864, pl. 331–332. 1775, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 209. 1811 and *Fieldiana, Bot.* 24(5): 425–434. 1946.

Simarouba amara Aubl. (*Quassia simarouba* L.f.; *Simarouba amara* var. *opaca* Engl.; *Simarouba amara* var. *typica* Cronquist, nom. inval.; *Simarouba glauca* DC.; *Simarouba glauca* var. *latifolia* Cronquist; *Simarouba opaca* (Engl.) Radlk. ex Engl.; *Simarouba opaca* Radlk. ex F. Boas; *Zwingera amara* (Aubl.) Willd.; *Zwingera amara* Willd.)

South America. Trees, essentially dioecious, straight-boled, finely fissured bark, long pinnate leaves, leaflets shiny above, loose panicles, clusters of purple drupes, seed with a thin flesh

See *Species Plantarum*, Editio Secunda 1: 553. 1762, *Histoire des plantes de la Guiane Française* 2: 860–861, pl. 331–332. 1775, *Supplementum Plantarum* 234. 1781,

keeps evil spirits away, also seeds kept on the bed to keep evil spirits away.)

in English: black mustard, salad mustard, white mustard, wild mustard, yellow mustard

in Italian: senape bianca

in China: bai jie zi, bai jie, chieh, hu chieh

in India: akantanal, apali, avalu, avaya, ayali, ayami, ayccuri, ayccurikam, cacanam, cacinakkatuku, cacinam, cannacalai, cannacalaikkatuku, cannacalakkatuku, cannacalam, carucapam, carucapi, caruvisam, cataikkentam, cimaikkatuku, cinakkatam, cittacatanakkatuku, cittacatanam, cittari, cittarikkatuku, cittarttam, gaurasarsapa, iraccitapalam, kadugu, kanti, katippai, katippakai, kattapati, kattimpam, katukumani, katumpai, katuppai, katutailam, katutitta, katutitta, katutittati, kauram, kaurikam, kevu, khardal, khardal abiad, khardal safed, khardale-abyaz, kurkevu, kurkovu, kutanacani, kutanacini, kuttampokki, mak-num, mohori-pandri, nattacevi, putanacan, putanacanam, recanakkina, safed raai, safed rai, sarshapa-gaura, shveta sarshapa, siddhaartha, siddhartha, siddharthah, sipandane-supid, sufedrai, svetasarisha, svetasarisapah, talnattam, titcanakam, titcanakkatuku, titcanam, tukhm halun, vatai, vella-kadugu, vellai-katuku, vellaikkatuku, vellaiyutam, vellaiyutitam, ven-kadugu, venkadugu, venkali, venkalikkatuku, venkatuku

in Tibetan: yungs-dkar

in Arabic: kabar abiad

(Cattle have been poisoned after ingesting hay containing large quantities of wild mustard seed. This plant contains glucosinolates.)

in English: black mustard, salad mustard, white mustard, wild mustard, yellow mustard

in Italian: senape bianca

in China: bai jie, bai jie zi, chieh, hu chieh

in Tibetan: yungs-dkar

in Arabic: khardal abiad, kabar abiad, khardal

Sindora Miq. Fabaceae (Caesalpinaceae, Detarieae, Leguminosae)

Sindora is a Malay name, see *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 287. 1861 and *Bull. Bot. Gard. Buitz.* ser. III 18(1): 5–82. 1949, *Flora Malesiana* I, 12, 2: 409–784. 1996.

Sindora bruggemanii de Wit (*Sindora sumatrana* Miq. var. *javanica* Koord. & Valetton fide Volkens)

Indonesia. Perennial non-climbing tree, lowland forest

See *Bulletin du Jardin Botanique de Buitenzorg*, ser. 3, 18: 21. 1949

(Leaves included in a complex preparation taken orally and applied externally to treat leprosy.)

in Indonesia: kayu tapak itik

Sindora sumatrana Miq. (*Galedupa sumatrana* Prain)

Indonesia, SE Asia. Perennial non-climbing tree, viscous blood red exudate, prickly flat roundish pods, lowland forest, by rivers

See *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 288. 1861

(Fruit refrigerant. A decoction of leaves of *Psidium guajava* and of saporantu used in bleedings of the uterus. Exudate mixed with *Scoparia dulcis* leaves and alum was taken as a treatment for infections of the urinary tract; *Scoparia dulcis* whole plant ground with the bark of *Sindora sumatrana* and alum taken as a remedy for infections of the urinary tract.)

in Indonesia: kayu sena, saporantu (the fruits), sindur

Sindora supa Merr. (*Sindora wallichii* Fern.-Vill.; *Sindora wallichii* sensu S. Vidal)

Philippines. Perennial non-climbing tree

See *Philippine Journal of Science* 1(Suppl.): 169–246. 1906, *An Enumeration of Philippine Flowering Plants* 2 (3): 241–323. 1923, *Guide to Philippine Flora & Fauna* 3: 199–230. 1986

(For skin diseases.)

Sindora wallichii Benth. (*Galedupa intermedia* Prain; *Galedupa intermediata* Prain; *Galedupa wallichiana* Prain; *Guilandina wallichiana* Graham; *Sindora intermedia* (Baker) Prain; *Sindora intermedia* Prain; *Sindora wallichiana* Prain; *Sindora wallichii* Scott. ex Prain; *Sindora wallichii* Benth. var. *intermedia* Baker)

Malay Peninsula. Perennial non-climbing tree

See *Hooker's Icon. Pl.* 11: t. 1017–18. 1867, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 66: 204–205, 481. 1897 [1898 publ. 1897]

(Pods tonic.)

Malay name: sepa rantu

Sinningia Nees Gesneriaceae

For the German horticulturist Wilhelm Sinning, 1792–1874, head gardener of the Botanical Garden of the University of Bonn; see *Essai sur les Propriétés Médicales des Plantes*, ed. 2 192. 1816, *Annales des Sciences Naturelles* (Paris) 6: 297. 1825 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University* Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists* 3: 282. 1965.

Sinningia tubiflora (Hook.) Fritsch (*Achimenes tubiflora* (Hook.) Britton; *Brachyloma tubiflorum* (Cav.) Oerst.; *Dolichodeira tubiflora* (Hook.) Hanst.; *Gesneria tubiflora* Cav.; *Gesneria tubiflora* (Hook.) Griseb., nom. illeg., non *Gesneria tubiflora* Cav.; *Gloxinia tubiflora* Hook.; *Isoloma tubiflorum* (Cav.) Decne.; *Kohleria tubiflora* (Cav.) Hanst.)

Argentina. Perennial herb, brittle, erect, soft tuberous base, stems reddish, white tubular fragrant flowers in racemes, petal lobes spreading

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 6: 61, t. 584. 1801, *Species Plantarum* 2: 612. 1753, *Syn. Pl.* 2: 164. 1806, *Annales des Sciences Naturelles* (Paris) 6: 297. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 414. 1841, *Botanical Magazine* 69: t. 3971. 1842, *Plantae Preissianae* 1: 304. 1845, *Index Seminum* [Zuerich] [4]. 1847, *Revue Horticole* 20(2): 465. 1848, *Linnaea* 26: 205. 1854, *Centralamericas Gesneraceae* 31. 1858, *Linnaea* 34(4): 442. 1865, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 263. 1879, *Annals of the New York Academy of Sciences* 7: 185. 1893, *Die Natürlichen Pflanzenfamilien* 4(3b): 182. 1894 and *Flora Illustrada de Entre Ríos* (Argentina) 6(5): 530–538. 1979, *Flora del Paraguay* 22: 1–40. 1993

(Purgative.)

Sinocarum H. Wolff Apiaceae (Umbelliferae)

Greek *sinai* ‘the Chinese’ and *Carum* L., see *Sp. Pl.* 1: 263. 1753, *Das Pflanzenreich* (Engler) Umbellif.-Apioid.-Ammin. IV 228(Heft 90): 164. 1927, *Repert.* xxvii. 181. 1929, *Acta Phytotaxonomica Sinica* 18(3): 374. 1980, *Taxon* 49(2): 271. 2000, *Feddes Repert.* 114(5–6): 356. 2003. This taxonomically complex genus is closely related to, and sometimes difficult to distinguish from, *Acronema*.

Sinocarum dolichopodum (Diels) H. Wolff ex R.H. Shan & F.T. Pu (*Carum dolichopodum* Diels; *Sinocarum dolichopodum* (Diels) H. Wolff; *Sinocarum dolichopodum* H. Wolff; *Sinocarum dolichopodum* (Diels) H. Wolff ex F.T. Pu)

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 287–288. 1912, *Das Pflanzenreich* IV 228(Heft 90): 164. 1927, *Acta Phytotax. Sin.* 18: 374. 1980, *Fl. Reipubl. Popularis Sin.* 55(2): 38. 1985

(Antibiotic, antispasmodic, stomachic, diuretic, anthelmintic, stimulant, digestive, carminative, used in diarrhea, flatulence, indigestion.)

in China: chang bing xiao qin

Sinocrassula A. Berger Crassulaceae

From the Greek *sinai* and the genus *Crassula* L., from the Latin *crassus*, *a*, *um* ‘thick’, see *Sp. Pl.* 1: 430. 1753, *Die natürlichen Pflanzenfamilien*, ed. 2 [Engler & Prantl] 18(a): 462–463. 1930, *J. Fac. Sci. Univ. Tokyo*, Sect. 3, Bot. 12(4): 170. 1978.

Sinocrassula indica (Decaisne) A. Berger var. *indica* (*Crassula indica* Decaisne; *Sedum cavaleriei* H. Léveillé; *Sedum cavaleriense* H. Léveillé; *Sedum indicum* Raym.-Hamet; *Sedum indicum* (Decaisne) Raymond-Hamet; *Sedum indicum* var. *silvaticum* Fröderström; *Sedum martini* H. Léveillé; *Sedum scallanii* Diels var. *majus* Pampanini)

China, Himalaya.

See *Voyage dans l'Inde* 4(Bot.): 61. 1844 and *Repert. Spec. Nov. Regni Veg.* 5: 99–100. 1908, *Nuovo Giornale Botanico Italiano*, new series 17(2): 280–281. 1910, *Fl. Kouy-Tcheou* 118. 1914–1915, *Bull. Soc. Bot. France* 74: 271. 1927, *Nat. Pflanzenfam.*, ed. 2 [Engler & Prantl] xviii a. 463. 1930, *Bulletin of the Fan Memorial Institute of Biology*: 7(1): 13. 1936, *J. Jap. Bot.* 74: 228–235. 1999

(Emollient, demulcent.)

in China: shi lian

Sinolimprichtia H. Wolff Apiaceae (Umbelliferae)

For the German botanist Hans Wolfgang Limpricht, b. 1877, traveller, botanical explorer in China and Tibet, wrote *Botanische Reisen in den Hochgebirgen Chinas und Ost-Tibets*. Dahlem bei Berlin 1922, he was son of the German bryologist Karl Gustav Limpricht (1834–1902); see *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 12: 448–449. 1922, E.D. Merrill & Egbert H. Walker, *A Bibliography of Eastern Asiatic Botany*. 273. The Arnold Arboretum of Harvard University, Jamaica Plain, Massachusetts 1938, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 382. 1965, T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 238. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 267 and 268. 1973, *Fl. Reipubl. Popularis Sin.* 55(1): 299. 1979.

***Sinolimprichtia alpina* H. Wolff**

China.

See *Repert. Spec. Nov. Regni Veg. Beih.* 12: 448–449. 1922

(Roots tonic, stomachic, antidote, for skin diseases and fevers.)

in Bhutan: tang-kun-nag-po

in China: zhou ban qin

Sinolimprichtia alpina* H. Wolff var. *alpina

China.

See *Repert. Spec. Nov. Regni Veg. Beih.* 12: 448–449. 1922

(Tonic, stomachic, for skin diseases.)

in China: zhou ban qin

Sinomenium Diels Menispermaceae

From the Greek *sinai* ‘the Chinese’ and *mene* ‘the moon’, see *Das Pflanzenreich* (Engler) Menispermac. 46(IV.94): 254. 1910.

Sinomenium acutum (Thunberg) Rehder & Wilson (*Cocculus diversifolium* auct.; *Cocculus diversifolius* DC.; *Cocculus diversifolius* Miquel, nom. illeg.; *Cocculus diversifolius* var. *cinereus* Diels; *Cocculus heterophyllus* Hemsl. & Wilson; *Menispermum acutum* Thunberg; *Menispermum diversifolium* (Miquel) Gagnepain; *Menispermum diversifolium* Gagnep.; *Menispermum diversifolium* Spreng.; *Menispermum diversifolium* var. *molle* auct.; *Menispermum diversifolium* var. *molle* Gagnep.; *Sinomenium acutum* var. *cinereum* (Diels) Rehder & Wilson; *Sinomenium diversifolium* Diels; *Sinomenium diversifolium* (Miquel) Diels)

China, E. Asia. Climber

See *Fl. Jap.* (Thunberg) 193. 1784, *Systema Vegetabilium*. Editio decima quarta (J.A. Murray). 892. 1784, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 523–524. 1817 [1818 publ. 1–15 Nov 1817], *Syst. Veg.* (ed. 16) [Sprengel] 2: 155. 1825, *Annales Museum Botanicum Lugduno-Batavi* 3: 10. 1867, *Revisio Generum Plantarum* 1: 9. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36(5, Beibl. 82): 45. 1905, *Bulletin of Miscellaneous Information Kew* 1906(5): 150. 1906, *Bulletin de la Société Botanique de France* 55: 38–40. 1908, *Das Pflanzenreich* (Engler) Menispermac. 46(IV.94): 254. 1910, *Plantae Wilsonianae* (Sargent) 1(3): 387–388. 1913, *Bull. Sc. Hort. Inst. Kyushu Imp. Univ.* 1(4): 202, 208. 1925 [Bulteno ciencia de la fakultato terkultura. Kjušu imperia universitato, Fukuoka, Japanujo, 1(4): 202, 208. 1925], *Proceedings of the Biological Society of Washington* 48(9): 39. 1935

(Roots anodyne and carminative, a decoction for edema, rheumatoid arthritis.)

in English: orient vine

in China: feng long, qing feng teng

in Japan: ô-tsuzura-fuji

Sinopodophyllum Ying Berberidaceae

From the Greek *sinai* ‘the Chinese’ and the genus *Podophyllum* L., see *Acta Phytotaxonomica Sinica* 17(1): 15–16. 1979.

Sinopodophyllum hexandrum (Royle) T.S. Ying (*Podophyllum emodi* Wall. ex Royle; *Podophyllum emodi* Wall., Hook.f. & Thomson, nom. nud., invalid; *Podophyllum emodi* Wall.; *Podophyllum emodi* var. *chinense* Sprague; *Podophyllum emodi* var. *hexandrum* (Royle) Chatt. & Muker.; *Podophyllum hexandrum* Royle; *Podophyllum hexandrum* var. *bhootanense* (Chatterjee & Mukerjee) Browicz; *Podophyllum sikkimensis* Chatterjee & Mukerjee; *Sinopodophyllum emodi* (Wall. ex Royle) T.S. Ying; *Sinopodophyllum emodi* T.S. Ying)

India, Nepal. Erect herb, pink flowers, red elliptical fruits, very variable and vulnerable species, see also *Podophyllum emodi*

See *Species Plantarum* 1: 505. 1753, *Numer. List* [Wallich] n. 814. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 2(1): 64. 1834, *Fl. Ind.* [Hooker f. & Thomson] i. 232. 1855 and *Botanical Magazine* 146, t. 8850. 1920, *Beaut. Fl. Kash.* 1: 27. 1928, *Records of the Botanical Survey of India* 16(2): 48. 1953, *Fl. Afghan.* 133. 1960, *Ann. Catl. Vasc. Pl. W. Pakistan & Kashmir* 282. 1972, *Bot. Zhurn.* 64 (11): 1539–1551. 1979, *Acta Phytotaxonomica Sinica* 17(1): 15–16. 1979, *Taxon* 30: 75. 1981, *Flora Xizangica [Tibet]*. [China], 1983, *Genetica* 82: 59–62. 1990, *Acta Botanica Boreali-Occidentalia Sinica* 16(3): 310–318. 1996, *Acta Botanica Yunnanica* 18(3): 325–330. 1996, *Glimpses Pl. Res.* 12: 165–171, 191–198. 1998, *Ethnobotany* 17: 127–136. 2005, *Hanburyana* 4: 36. 2009

(Leaves and roots of *Podophyllum hexandrum* are poisonous; plant highly poisonous, it should not be prescribed for pregnant women. Resin vermifuge, cytotoxic. Fruit paste with honey used in abdomen pain. Roots and fruits used in cough, fever, skin diseases, wounds, cuts, respiratory problems. Rhizomes and roots hepatic stimulant, also for asthma; paste made from root powder applied externally on forehead as a remedy for headache; roots decoction in diarrhea and liver troubles, also helps in promoting conception; roots extract given in small doses to regulate menstrual cycle and burning urination in women.)

in English: Indian podophyllum

in Bhutan: hol-mo-se

in China: tao er qi

in India: angwaly, bajkakri, bankakdi, bankakri, denmokusu, galakada, ghee, giriparpat, kakrya, ol-mose, olmose, papra, rikhpat, shatjalari, wanwangun

Siparuna Aublet Monimiaceae (Siparunaceae)

A vernacular name for a species of *Perebea* Aublet (Moraceae), *Perebea chimicua* J.F. Macbride/*Perebea chimiqua* J.F. Macbr. (= *Perebea xanthochyma* Karsten); see *Histoire des plantes de la Guiane Française* 2: 864–865, t. 333. 1775, *Fl. Peruv. & Chil. Prodr.* 134. t. 29. 1794 and J.R. Perkins, “Monographie der Gattung *Siparuna*.” *Bot. Jahrb. Syst.* 29: 660–705. 1901, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 11: 63. 1931.

(Rootstock carminative, analgesic, febrifuge, antispasmodic, used against inflammation, malaria, fevers, premenstrual syndrome, labor complications and pains. Cyclooxygenase inhibiting activity.)

in Mozambique: natacauisse

in Tanzania: litunguru, mjano, mwanjano

in Yoruba: oburo lela, oburo nla

Siphonostegia Benth. Orobanchaceae (Scrophulariaceae)

From the Greek *siphon* ‘a tube’ and *stegē* ‘roof, cover’, see Hooker, William Jackson, Sir (1785–1865), *The botany of Captain Beechey’s voyage*: comprising an account of the plants collected by Messrs. Lay and Collie, and other officers of the expedition, during the voyage to the Pacific and Behring’s Strait, performed in His Majesty’s ship Blossom, under the command of Captain F.W. Beechey, in the years 1825, 26, 27, and 28/by Sir William Jackson Hooker and G.A. Walker Arnott. London, 1830–1841 [Beechey, Frederick William, 1796–1856], *Edwards’s Botanical Register* 203. 1835.

Siphonostegia chinensis Benth.

China.

See *The Botany of Captain Beechey’s Voyage*, pl. 44. 1841

(Antiviral, antibacterial, fat-reducing.)

in Japan: hiki-yomogi

in China: an lu, jin zhong ying chen, ling yin chen, yin jing cao

Siraitia Merr. Cucurbitaceae

Siraitia grosvenorii (Swingle) C. Jeffrey ex A.M. Lu & Z.Y. Zhang (*Momordica grosvenorii* Swingle; *Thladiantha grosvenorii* (Swingle) C. Jeffrey) (*Thladiantha* Bunge, from the Greek *thlao*, *thlaein* ‘to break, to crush, pound’, *thladias* ‘eunuch’ and *anthos* ‘flower’, referring to the suppression of stamens.)

China.

See *Guihaia* 4(1): 29, t. 1. 1984

(Fruit used for pneumonia, pharyngitis; leaves for chronic tracheitis and pharyngitis.)

in China: luo han guo

Siraitia siamensis (Craib) C. Jeffrey ex Zhong & D. Fang (*Momordica tonkinensis* Gagnepain; *Thladiantha siamensis* Craib)

China.

See *Kew Bull. Misc. Inf.* 1914: 7. 1914, *Guihaia* 4(1): 23, f. 1. 1984

(Tuber for gastritis.)

in China: chi zi luo han guo

Sisymbrium L. Brassicaceae (Cruciferae)

From *sisymbriion*, the Greek name for some sweet-smelling plant, a fragrant herb, a watercress, wildthyme, *Mentha* spp.; Hebrew *sis* ‘flower, festoon, ornament’, *sisā* ‘flower’, *bor* ‘pit, well’; Akkadian *burum* ‘pond, well’; Latin *sisymbrium*, *ii* ‘a herb sacred to Venus’ (Plinius, Ovidius); see Carl Linnaeus, *Species Plantarum*. 657. 1753 and *Genera Plantarum*. Ed. 5. 330. 1754 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 937–983. 1938, *Acta Biol. Cracov., Ser. Bot.* 22: 37–69. 1980, *Taxon* 30: 829–842. 1981, *Fl. Il. Entre Ríos* 6(3): 358–362, 370–389, 392–414. 1987, *Opera Bot.* 137: 1–42. 1999.

Sisymbrium irio L. (*Arabis charbonnelii* H. Lév.; *Crucifera irio* (L.) E.H.L. Krause; *Descurainia irio* (L.) Webb & Berthel.; *Erysimum irio* (L.) Rupr.; *Norta irio* (L.) Britton; *Sisymbrium columnae* Jacq.)

China.

See *Species Plantarum* 2: 659–660. 1753, *Histoire Naturelle des Îles Canaries* 3(1): 73. 1836, *Flora Caucasi* 89. 1869 and *Deutschlands Flora, Abtheilung II, Cryptogamie* 6: 81. 1902, *An Illustrated Flora of the Northern United States* 2: 174. 1913, *American Midland Naturalist* 10: 212. 1927

(Whole herb diuretic, expectorant, astringent. Seeds expectorant, stimulant, an infusion used as eye drops; seeds sprayed on the bed of the patient suffering from smallpox.)

in English: London rocket

in Egypt: figl el-gamal

in India: khabkalan, khubkalan

Sisymbrium loeselii L. (*Crucifera loeselii* (L.) E.H.L. Krause; *Crucifera loeselii* E.H.L. Krause; *Erysimum loeselii* (L.) Farw.; *Erysimum loeselii* (L.) Rupr.; *Hesperis loeselii* (L.) (Roots decoction drunk as laxative, drastic purgative.)

Sisyrinchium montanum Greene (*Bermudiana graminea* (Lam.) Nieuwl., nom. illeg.; *Sisyrinchium angustifolium* auct.; *Sisyrinchium bermudianum* L.; *Sisyrinchium gramineum* Lam.)

Subarctic America, North America.

See *Species Plantarum* 2: 954. 1753, *Encyclopédie Méthodique, Botanique* 1: 408. 1783, *Pittonia* 4(20D): 33–34. 1899 and *American Midland Naturalist* 3: 115. 1913, *Castanea* 48: 212–217. 1983, Lee, W.T. *Lineamenta Florae Koreae*: 1–1688. Soul T'ukpyolsi: Ak'ademi Sojok. 1996 [as *Sisyrinchium angustifolium*.]

(Said to be poisonous. Purgative.)

in English: strict blue-eyed grass

Sisyrinchium montanum Greene var. ***montanum*** (*Sisyrinchium alpestre* E.P. Bicknell; *Sisyrinchium heterocarpum* E.P. Bicknell; *Sisyrinchium strictum* E.P. Bicknell)

Subarctic America, North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 26(7): 348–349. 1899, *Bulletin of the Torrey Botanical Club* 26(8): 453–454. 1899, *Pittonia* 4(20D): 33–34. 1899 and Lee, W.T. *Lineamenta Florae Koreae*: 1–1688. Soul T'ukpyolsi: Ak'ademi Sojok. 1996 [as *Sisyrinchium angustifolium*.]

(Said to be poisonous. Purgative, cathartic.)

in English: strict blue-eyed grass

Sisyrinchium mucronatum Michx. (*Bermudiana mucronata* (Michx.) Lunell; *Bermudiana mucronatum* (Michx.) Lunell; *Sisyrinchium angustifolium* var. *mucronatum* (Michx.) Baker; *Sisyrinchium bermudianum* var. *mucronatum* (Michx.) A. Gray; *Sisyrinchium intermedium* E.P. Bicknell; *Sisyrinchium versicolor* E.P. Bicknell)

North America. Perennial herb

See *A Manual of the Botany of the Northern United States* ed. 5: 517. 1867, *Bulletin of the Torrey Botanical Club* 26(9):

498–499. 1899, *Bulletin of the Torrey Botanical Club* 26(12): 606–607. 1899 and *American Midland Naturalist* 4: 242. 1915, *Taxon* 30: 845–851. 1981

(For respiratory troubles, throat and nose.)

in English: needletip blue-eyed grass

Sisyrinchium nashii E.P. Bicknell (*Sisyrinchium bicknellianum* Fernald; *Sisyrinchium carolinianum* E.P. Bicknell; *Sisyrinchium fibrosum* E.P. Bicknell; *Sisyrinchium floridanum* Raf.; *Sisyrinchium floridanum* E.P. Bicknell; *Sisyrinchium tortum* E.P. Bicknell)

North America. Perennial herb

See *Autikon Botanikon* 66. 1840, *Bulletin of the Torrey Botanical Club* 26(5): 221–224. 1899 and *Flora of the Southeastern United States* 298, 1329. 1903, *Rhodora* 46: 43. 1944

(Analgesic.)

in English: Nash's blue-eyed grass

Sisyrinchium tinctorium Kunth (*Bermudiana bogotensis* (Kunth) Kuntze; *Bermudiana tinctoria* (Kunth) Kuntze; *Bermudiana tinctoria* Kuntze; *Marica bogotensis* (Kunth) Ker Gawl.; *Marica tinctoria* (Kunth) Ker Gawl.; *Sisyrinchium bogotense* Kunth; *Sisyrinchium rigidum* Lehm.; *Sisyrinchium tingens* Steud.)

South America.

See *Nov. Gen. Sp.* 1: 323–324. 1816, *Bot. Reg.* 3: t. 229. 1817, *Irid. Gen.*: 23. 1827, *Neue Allg. Deutsche Garten-Blumenzeitung* 6: 415. 1850, *Revisio Generum Plantarum* 2: 699–700. 1891 and *Bot. Gaz.* 147: 342–354. 1986

(Roots decoction drunk as laxative, drastic purgative.)

Sitanion Raf. Poaceae (Gramineae)

Greek *sitos* 'grain', *setaneios*, *setanios*, *satanius* 'of this year, spring-wheat', *sitanias pyros* 'a branching cereal' (Theophrastus, *HP.* 8.2.3), Latin *sitanium*, *a*, *um* 'of this year, of summer wheat', often included in *Elymus*, type *Sitanion elymoides* Raf., hybrids with *Agropyron*, *Elymus*, *Hordeum* and *Lophopyrum*, see *Species Plantarum* 1: 83–84. 1753, C.S. Rafinesque, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Annals of Natural History* 1: 284. 1838, *Genera Plantarum* 3(2): 1207. 1883, *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 10, 12–13, 15, 17, 19–20, t. 3. 1899 and E.D. Merrill, *Index Rafinesquianus* 76. 1949, *Canad. J. Bot.* 42: 554. 1964, D.R. Dewey, "A worldwide survey of the genus *Elymus*--its phylogeny, taxonomy, and breeding potential." *Proc. (Ceremonial medicine, witchcraft.)

in English: squirrel tail, wild rye

in French: queue d'écureuil

in Mexico: triguillo, triguillo desértico

Sium L. Apiaceae (Umbelliferae)

From the ancient Greek name *sion* for a marsh herb; see Carl Linnaeus, *Species Plantarum*. 1: 251–252, 264–265. 1753, *Genera Plantarum*. Ed. 5. 409. 1754 and *Taxon* 41: 557. 1992, *Taxon* 44: 611–612. 1995.

Sium latijugum C.B. Clarke

India. Robust, ribbed stems, nodes thick, flowers in umbel, essential oil

See *Sci. & Cult.* 40: 465. 1974, *Taxon* 25: 631–649. 1976, *Taxon* 29: 543. 1980, *Pl. Syst. Evol.* 154: 11–30. 1986

(Leaf poultice applied to burns, boils, skin diseases, vermifuge.)

Sium suave Walter (*Apium cicutifolium* (Schrenk) Benth. & Hooker ex Forbes & Hemsley; *Cicuta dahurica* Fischer ex Schultz; *Cicuta dahurica* Fisch.; *Sium cicutifolium* Schrank; *Sium floridanum* Small; *Sium formosanum* Hayata; *Sium nipponicum* Maximowicz; *Sium suave* Walter var. *floridanum* (Small) C.F. Reed)

China. Perennial herb

See *Fl. Carol.* 115. 1788, *Baiersche Flora* 1: 558. 1789, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 18(3): 286. 1873, *Journal of the Linnean Society, Botany* 23(153): 328. 1887 and *Icones plantarum formosananum nec*

non et contributiones ad floram formosanam. 10: 16–17, f. 9. 1921, *Taxon* 29: 707–709. 1980, *Taxon* 31: 583–587. 1982, *Naturaliste Canad.* 114: 105–116. 1987, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 23: 11–12. 1994, *J. Pl. Biol.* 39: 15–22. 1996, *Korean J. Pl. Taxon.* 35: 47–55. 2005

(Flowers, white flowers, poisonous. Leaf poultice applied to burns, boils, skin diseases.)

in English: hemlock waterparsnip

in China: ze qin

Skimmia Thunb. Rutaceae

From the Japanese *shikimi* or *ashiki-mi*, bad or poisonous or harmful fruit; see *Nova Genera Plantarum* [Thunberg] 3: 57. 1783, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 817. Ansbach 1852 and *Kew Bull.* 44: 497–501. 1989, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 170. Berlin & Hamburg 1989, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 591. Basel 1996.

Skimmia anquetilia N.P. Taylor & Airy Shaw

Nepal.

See *Curtis's Bot. Mag.* 182(4): 170. 1979, *Kew Mag.* 4(4): 193. 1987, *Kew Bull.* 44: 503–513. 1989

(Dried leaves and flowers burned in the house as an incense and to ward off evil spirits.)

in Nepal: chillopate, kedarpate, nairpatti

Skimmia arborescens T. Anderson ex Gamble (*Skimmia euphlebia* Merr.; *Skimmia japonica* Thunb. var. *euphlebia* (Merr.) N.P. Taylor; *Skimmia japonica* var. *kwangsiensis* (C.C. Huang) N.P. Taylor; *Skimmia kwangsiensis* C.C. Huang)

India, Nepal, Himalayas. Strongly aromatic perennial shrub, yellowish-white or yellowish-green flowers in terminal panicles, fleshy bright scarlet red ovoid drupes

See *Journal of the Linnean Society, Botany* 43: 491. 1916, *Lingnan Science Journal* 13(1): 32. 1934, *Acta Phytotaxonomica Sinica* 7(4): 354, pl. 70, f. 2. 1958

(Leaves used in smallpox.)

in China: qiao mu yin yu

in India: barru, kathur-chura, nair, ner, nera, nerpati, nihar, nyalpati, patrang, patur, thalangli, timburnyok

Skimmia japonica Thunb. (*Skimmia japonica* Lindl.)

Japan. Low evergreen shrub, alternate leathery aromatic leaves, creamy white fragrant flowers in upright terminal clusters, fruit a bright red drupe

See *Nova Genera Plantarum* [Thunberg] 3: 58. 1783, *Paxton's Flower Garden*. Revised. 2: 56, f. 163. 1851

(Red fruits poisonous, abortifacient, found to be toxic to rabbits and frogs.)

in English: Japanese skimmia

in China: yin yu

in Japan: miyama-shikimi

Skimmia laureola (DC.) Sieb. & Zucc. ex Walp. (*Limonia laureola* DC.; *Limonia laureola* Griff.; *Limonia laureola* Blanco; *Skimmia laureola* Siebold & Zucc. ex Walp.; *Skimmia laureola* (DC.) Decne.; *Skimmia laureola* Franch.)

China, India, Himalaya. Low procumbent shrub, glabrous, strongly aromatic, evergreen, leathery leaves, flowers white or yellow in compact erect terminal panicles, red fleshy ovoid-ellipsoid fruits, leaves eaten in curries, fodder plant

See *Species Plantarum*, Editio Secunda 554. 1762, *Nova Genera Plantarum* [Thunberg] 3: 57. 1783, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 536. 1824, *Voyage dans l'Inde, Bot.* 180. 1844, *Fl. Filip.*, ed. 2 [F.M. Blanco] 251. 1845, *Repertorium Botanicum Systematicum* (Walpers) 5: 405. 1845–1846, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 211. 1886 and *Silvae Geneticae* 22: 182–188. 1973, *Taxon* 29(5–6): 605. 1980, *Kew Bulletin* 44: 503–513. 1989

(Leaves, stem and roots, dried and powdered, employed to protect from the insects. Leaves antiseptic, in smallpox, scabies; leaf juice for rheumatic pain, boils, scabies; dried crushed leaves used as incense, *dhoop*, insecticidal. Berries used in fever. Ceremonial, twigs and leaves offered to deity.)

in Cina: yue gui yin yu

in India: barru, dhoop, guri patta, gurl pata, kakarmool, kali, kashtori pata, kasturi-pata, kasturibati, kathur-chura, kedar pati, kedar patti, kedarpaiti, masturipath, nair, nairpati, nayr, nehar, ner, nera, nerpati, niyar, nyalpati, nyan, patrang, patur, sangli dhoop, sanglidoop, shashra, shashru, shashuri, shuru, singli mingli, thalangli, timburnyok

Sloanea L. Elaeocarpaceae

Named for Sir Hans Sloane (b. Killyleagh, Northern Ireland) 1660–1753 (d. Chelsea, London), physician and naturalist, a founder of the British Museum, traveller and plant collector in West Indies, a pupil of Tournefort and Duverney, in 1685 a Fellow of the Royal Society and from 1727 to 1741 President (following the death of the President, Sir Isaac Newton), 1687 a Fellow of the Royal College of Physicians and in 1719 President, 1687 accompanied Christopher Monck (at that time appointed Governor of Jamaica), 1712 physician to Queen Anne, gave Chelsea Physic Garden to the Apothecaries' Company, editor of the *Philosophical Transactions* of the Royal Society, his works include *Catalogus plantarum quae*

in insula Jamaica sponte proveniunt. Londini 1696, *An Account of a most efficacious medicine for soreness, weakness, and several other distempers of the eyes*. London 1745 and *A voyage to the Islands Madera, Barbados, Nieves, S. Christophers and Jamaica*. London 1707–1725, a friend of Samuel Pepys, John Locke, E. Halley and Newton; see William King, *The Present State of Physick in the Island of Cajamai* [i.e. Jamaica]. To the Members of the Royal Society. [London 1710?], Carl Linnaeus, *Species Plantarum*. 1: 512. 1753, *Genera Plantarum*. Ed. 5. 228. 1754, *Histoire des plantes de la Guiane Française* 1: 585–587, t. 234. 1775, *Histoire des plantes de la Guiane Française* 2(Suppl.): 27, t. 384. 1775, *Genera Plantarum* 366. 1789, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 65–96. London 1790, *Actes de la Société d'Histoire Naturelle de Paris* 1: 110. 1792, *Florae Peruvianae, et Chilensis Prodromus* 57, t. 9. 1794, *Ann. Bot.* (Usteri) x. (Neue Ann. iv.). 90. 1794, *Relation du Voyage à la Recherche de la Pérouse* 2: 235, t. 41. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 516. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 639. 1825, *Bijdr. Sloanea australis (Benth.) F. Muell. (*Echinocarpus australis* Benth.; *Sloanea australis* F. Muell.)

Australia.

See *Fragm.* (Mueller) 4(27): 91. 1864

(The wood injurious to the skin, can cause dermatitis.)

in English: blush carabeen (or carrabeen), maiden's blush

Sloanea rhodantha (Baker) Capuron var. ***rhodantha***

Madagascar.

See *Adansonia*, n.s. 12(3): 375–388. 1972, *Fl. Madagasc.* 125: 1–53. 1985, *Planta Med.* 72(15): 1438–1440. 2006

(Antiplasmodial activity.)

Sloanea terniflora (Moçônio & Sessé ex DC.) Standley (*Dasycarpus quadrivalvis* (Seem.) Oerst.; *Lasiocarpus triflorus* Oerst.; *Lecostemon terniflorum* Moçônio & Sessé ex DC.; *Lecostemon terniflorum* Sessé & Moc. ex DC.; *Lecostemon terniflorum* Moçônio & Sessé ex DC.; *Lecostemon terniflorum* Sessé & Moc. ex DC. [DC. included this species in Rosaceae.]; *Sloanea quadrivalvis* Seemann; *Sloanea reticulata* A.C. Sm.; *Sloanea terniflora* Standl.; *Sloanea terniflora* (Sessé & Moc. ex DC.) Standl.; *Sloanea terniflora* (Moc. & Sessé) Standl.; *Sloanea xylocarpa* Rusby)

South America. Small trees, oblong leaves, axillary flowers, velvety purple seedpods

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 639. 1825, *Nomencl. Bot.* [Steudel], ed. 2. ii. 20. 1841, *The Botany of the Voyage of H.M.S. ~Herald~* 85–86, t. 15. 1853 and *Memoirs of the New York Botanical Garden* 7: 294. 1927, *Bulletin of the Torrey Botanical Club* 61: 194. 1934, *American Journal of Tropical Medicine* 23(Suppl.): 3–76. 1943, *Trop. Woods* 79: 10. 1944, *Ann. Missouri Bot. Gard.* 52(4): 487–495. 1966

(Bristly capsules irritant, and a menace to the eyes.)

in Mexico: huesillo

in Peru: anallo caspi

in South America: casaco, terciopelo

Sloanea zuliaensis Pittier (*Sloanea macropoda* Standl.; *Sloanea microcephala* Standl.) (Venezuela, Zulia)

Venezuela, Panama.

See *Arb. Arbust. Venez.* 2–3: 31. 1923, *Bol. Comercial Industr.* 34. 1923, *Journal of the Washington Academy of Sciences* 15: 478. 1925, *Publications of the Field Museum of Natural History, Botanical Series* 4(6): 152. 1929, *Ann.*

Missouri Bot. Gard. 52(4): 487–495. 1966, *J. Nat. Prod.* 66(11): 1515–1516. 2003

(Potent cytotoxic activity, from the young leaves.)

Smallanthus Mack. Asteraceae

For the American taxonomic botanist John Kunkel Small, 1869–1938, Herbarium of Columbia College, Museum of the New York Botanical Garden, traveller and botanical explorer, author of the monumental *Flora of the Southeastern United States*. 1903. See *Tableau Encyclopédique et Méthodique ... Botanique* t. 712. 1823 and Thomas Conrad Porter, 1822–1901, *Flora of Pennsylvania*. Edited with the addition of analytical keys by John Kunkel Small (1869–1938). Boston 1903, *Flora of Lancaster County* 302, 319. 1913, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Manual of the Southeastern Flora* 1406, 1509. 1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 287. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. New York and London 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 245. 1972, Stafleu and Cowan, *Taxonomic Literature*. 5: 650–657. Utrecht 1985.

Smallanthus fruticosus (Benth.) H. Rob. (*Polymnia arborea* Hieron.; *Polymnia fruticosa* Benth.)

Mexico, Ecuador.

See *Species Plantarum* 2: 926. 1753, *Plantas Hartwegianas imprimis Mexicanas* 209. 1845 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(1): 33–34. 1900, *Phytologia* 39: 49. 1978

(Leaves for rheumatism.)

Smallanthus sonchifolius (Poeppig & Engler) H. Robinson (*Polymnia edulis* Weddell; *Polymnia sonchifolia* Poeppig)

South America.

See *Nova Genera ac Species Plantarum* 3: 47. 1845, *Annales des Sciences Naturelles; Botanique, série 4* 7: 114. 1857 and *Phytologia* 39: 51. 1978, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989

(Leaves antiseptic, stomachic.)

in English: yacon strawberry

in South America: arboloco, aricomá, aricona, jácón, jícama, jíkima, jíquima, jiquimílla, llacjon, llacón, llakuma, llamón, puhe, yacón

Smallanthus uvedalia (L.) Mack. (*Osteospermum uvedalia* L.; *Polymnia uvedalia* (L.) L.; *Polymnia uvedalia* L.; *Polymnia uvedalia* var. *densipilis* S.F. Blake; *Polymnia*

uedalia var. *floridana* S.F. Blake; *Polymniastrum uvedalia* (L.) Small)

North America.

See *Species Plantarum*, Editio Secunda 2: 1303. 1763 and *Flora of Lancaster County* 302. 1913, *Rhodora* 19(219): 47–48. 1917, *Manual of the Southeastern Flora* [Small] 1406, 1509. 1933, *Brittonia* 17: 152. 1965, *Pharmacol. Biochem. Behav.* 79(2): 299–302. 2004

(Antiinflammatory, anti-hyperalgesic, useful in the treatment of inflammatory pain.)

Smeathmannia Solander ex R. Br. Passifloraceae

For the British naturalist Henry Smeathman, d. 1786, botanist, plant collector in Sierra Leone (1771–1772), Madagascar and West Indies (after 1775), associated with Adam Afzelius (1750–1837) in scheme for settling freed slaves in Freetown, Sierra Leone, author of *Elocution and polite literature*. [An announcement of lessons in elocution.] [London 1785?], *Mémoire pour servir à l'histoire de quelques Insectes, connus sous les noms de Termès, ou Fourmis blanches ... Ouvrage rédigé en François par M. C. Rigaud*. Paris 1786, and *Plan of a settlement to be made near Sierra Leona, on the Grain Coast of Africa*. London 1786, friend of John Coakley Lettson (1744–1815); see James Ramsay, *An Essay on the Treatment and Conversion of African Slaves in the British Sugar Colonies*. London 1784, J.C. Lettson, *Memoirs of John Fothergill, M.D.* London 1784, William Wilberforce, [Speech on the motion for the abolition of the slave trade, 12 May 1789.] *Correct copies of the Twelve Propositions submitted ... by Mr. Wilberforce, to the consideration of the committee*. [England. Parliament. House of Commons. Proceedings II.] London 1789, *Narrative of an Expedition to Explore the River Zaire* 439. 1818, *Transactions of the Linnean Society of London* 13(1): 201–234. 1821, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Charles Buxton, ed., *Memoirs of Sir Thomas Fowell Buxton, Baronet*. [Sir T. Buxton was the successor to Wilberforce as leader of the Anti-Slavery party in the House of Commons.] London 1848, H.M. Wheeler, *The slave's champion, or a sketch of the life, deeds and historical days of William Wilberforce*. London 1860, Joseph Vallot (1854–1925), “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882 and Michael Hennell, *William Wilberforce, 1759–1833. The liberator of the slave*. London [1950], R.W.J. Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 288. 1965, James Pope-Hennessy, *Sins of the Fathers. A Study of the Atlantic Slave Traders 1441–1807*. London 1967, *Negro History: 1553–1903*. Philadelphia 1969, C. Bolt, *The Anti-slavery Movement*. Oxford 1969, Johnson U.I. Asiégbu, *Slavery and the Politics of Liberation 1787–1861*. London 1969, F.N. Hepper and Fiona Neate, *Plant Collectors in West*

Africa. 75. 1971, Peter Hogg, *Slavery. The Afro-American Experience*. London 1979, I.H. Vegter, *Index Herbariorum*. Part II (6), *Collectors S. Regnum Vegetabile* vol. 114. 1986, *Feddes Repert.* 99: 98. 1988, *Phytochemistry* 28(1): 127–132. 1989, *Blumea* 44: 343–350. 1999.

Smeathmannia laevigata Soland. ex R. Br.

Tropical Africa. Shrub or small tree

See *Transactions of the Linnean Society of London* 13(1): 221. 1821 and *Journal of Ethnopharmacology* 8: 215–223. 1983

(Stem bark and leaves for skin diseases, toothache, dysentery, fever, back pain and headache; bark decoction astringent, taken for dysentery.)

in Yoruba: moyida

Smeathmannia pubescens Sol. ex R. Br.

Tropical Africa. Shrub or small tree, edible fruits

See *Transactions of the Linnean Society of London* 13(1): 221. 1821 and *Journal of Ethnopharmacology* 8: 215–223. 1983

(Cyanogenic glycosides. Fruits astringent. Bark decoction astringent, for dysentery; inner bark applied as a poultice for toothache. Leaves juice taken to treat acute enteritis and gastrointestinal disorders.)

Smegmadermos Ruiz & Pav. Rosaceae

Greek *smagma*, *smema*, *smama*, *smele* ‘soap, unguent’ and *derma*, *dermatos* ‘skin, bark’, see *Fl. Peruv. Prodr.* 144, t. 31. 1794.

Smegmadermos emarginata Ruiz & Pav.

South America.

See *Syst. Veg. Fl. Peruv. Chil.* 1: 288. 1798

(Bark decoction used for treating hysteria, madness.)

Smilax L. Smilacaceae

Greek *smilax*, *smilakos* (*milax*, *milakos*) ‘a bind-weed’; Sanskrit *mah* ‘to grow’, *mula* ‘root’; Akkadian *melu* ‘height, elevation, ascent’; the Latin name *smilax*, *acis* was used by Plinius for the bindweed, *Smilax aspera* L., but also for the yew-tree and for a species of oak. See Andreas Vesalius (1514–1564), *Radices Chynae usus*. [16mo, pocket edn.] Lyons 1547, Carl Linnaeus, *Species Plantarum*. 2: 1028–1029. 1753, *Genera Plantarum*. Ed. 5. 455. 1754, *Flora of New York* 2: 303. 1843, *A Manual of the Botany of the Northern United States* 486. 1848, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 196, 263. 1850, *Monographiae Phanerogamarum* 1: 59. 1878, *Genera Plantarum* 3(2): 763. 1883 and *Publ. Carnegie Inst. Wash.* 461: 257–290. 1936, Richard J. Durling, comp., *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 4589.

1967, Wallace, G.A. "An overlooked new species of *Smilax* (Smilacaceae) from northern California." *Brittonia* 31: 416–421. 1979, Cowley, E.J. *Smilacaceae. Flora of Tropical East Africa*: 1–4. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 521. Stuttgart 1993, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Greca*. 2(1): 271. Leo S. Olschki Editore, Firenze 1994, Kress, W.J., DeFilipps, R.A., Farr, E. & Kyi, D.Y.Y. "A Checklist of the Trees, Shrubs, Herbs and Climbers of Myanmar." *Contributions from the United States National Herbarium* 45: 1–590. 2003, *Lankesteriana* 4(1): 5–36. 2004.

Smilax anceps Willd. (*Smilax anceps* var. *boutonii* Baker; *Smilax anceps* var. *semialexicaulis* Baker; *Smilax borbonica* A. DC.; *Smilax cynodon* Cordem.; *Smilax goudotiana* A. DC.; *Smilax herbacea* Thunb., nom. illeg.; *Smilax kraussiana* Meisn.; *Smilax kraussiana* var. *dregei* A. DC.; *Smilax kraussiana* var. *morsoniana* A. DC.; *Smilax kraussiana* var. *senegambiae* A. DC.; *Smilax lessertiana* A. DC.; *Smilax morsaniana* Kunth; *Smilax mossambicensis* Garcke; *Smilax semialexicaulis* Bojer, nom. nud.; *Smilax telfaireana* Wall. ex A. DC.; *Smilax telfaireana* A. DC.) (the specific name means 'two-sided, two-headed')

Trop. & S. Africa, W. Indian Ocean. Herbaceous climber, shrubby, liana, stem pale brown-yellow, prickly to thorny, tendrils brown-green tinged pink, young leaves reddish, leaves dull green glabrous, perianth greenish white, fruit at first reddish brown maturing dark purple and slimy when cut, tubers famine food, fruits bark and young shoots eaten by chimpanzees

See *Species Plantarum*. Editio quarta 4: 782. 1806, *Flora* 28: 312. 1845, *Monographiae Phanerogamarum* 171. 1874, *Flore de l'Île de la Réunion* 150. 1895

(A poultice from the plant applied to swellings. Leaves and stem bark for convulsions, fever, syphilis, gonorrhoea, skin diseases, ophthalmia, to hasten child delivery. Roots mixed with other plants used to treat worms and stomachache.)

in English: wild sarsaparilla

in Ghana: ahalika, aklamaku, klamaku, kokora

in Nigeria: irigo

in Southern Africa: iYali, inGqaqabulani, uLimilwenyathi (Zulu); mugarangurwe, muGwanangurwe, muGwenangurwe (Shona); mukokole (Venda); muwaruwaru (Tsonga)

(Used in Ayurveda, Unani and Sidha. Rhizome and roots depurative, antiviral, antidote, against rheumatism, syphilis, postpartum remedy. Roots infusion sudorific, used to relieve rheumatic pains.)

in English: bamboo briar root, China root

in China: ba qia, pa chia, chin kang ken, tieh ling chio, wang kua tsao

in India: China-alla, chobachini, chobchini, copacini, dvi-pantaravaca, dwipantaravaca, dwipautra, gali-chekka, madhusnuhi, parangichekkai, paringay, parinkipatte, pirangi-chekka, shuk-china, wacha

Malayan names: akar restong, gadong china, restong, ubat raja

in Philippines: banal, buanal, ubi-ubihan

Smilax elegans Wall. ex Kunth (*Smilax elegans* A. DC.; *Smilax elegans* Wall.; *Smilax elegans* subsp. *glaucophylla* (Klotzsch) Noltie; *Smilax glaucophylla* Klotzsch; *Smilax*

parvifolia Wall. ex Hook. f.; *Smilax parvifolia* Wall.; *Smilax parvifolia* Sessé & Moc.)

India, Nepal. Climber

See *Numer. List* [Wallich] n. 5117. 1831–1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 163. 1850, *Bot. Erg. Reise Pr. Waldemar* 45, t. 91. 1862, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 107. 1878, *The Flora of British India* 6(18): 304. 1892, *Flora Mexicana*. 232. 1894 and *Edinburgh Journal of Botany* 51(2): 154. 1994

(Root and stem for arthritis, rheumatism, tooth decay, cold and cough.)

in China: xi zang ba qia

in India: chobchini, kukardara, sarya

Smilax glabra Roxburgh (*Smilax blinii* H. Léveillé; *Smilax calophylla* Wallich var. *concolor* C.H. Wright; *Smilax dunni-ana* H. Léveillé; *Smilax glabra* var. *maculata* Bodinier ex H. Léveillé; *Smilax glabra* var. *maculata* H. Lévé.; *Smilax hookeri* Kunth; *Smilax lanceolata* Burm.f., nom. illeg.; *Smilax mengmaensis* R.H. Miao; *Smilax trigona* Warburg)

Assam to Taiwan. Climber, woody vine, fruits black

See *Sp. Pl.* 2: 1028. 1753, *Gen. Pl.* ed. 5, 455. 1754, *Flora Indica*; or, descriptions of Indian Plants 3: 792. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 162. 1850 and *Bot. Jahrb. Syst.* 29(2): 258–259. 1900, *J. Linn. Soc., Bot.* 36(250): 96. 1903, *Liliac. & C. Chine*: 23. 1905, *Repert. Spec. Nov. Regni Veg.* 9(222–226): 446. 1911, *Fl. Kouy-Tchéou*: 256. 1915, *Acta Sci. Nat. Univ. Sunyatseni* 1982(3): 75. 1982

(Used in Ayurveda. Leaves juice applied for skin diseases. Fresh roots juice said to increase fertility in women, for making conception; rhizome decoction drunk for gynaecological problems.)

in China: gong fu ling teng, tu fu ling

in India: bari-chob-chini, bari-chobchini, barichobchini, parangipattai, tluangngil

Smilax havanensis Jacq. (*Smilax coriacea* Spreng.; *Smilax coriacea* Bello, nom. illeg.; *Smilax coriacea* var. *ilicifolia* (Desv. ex Ham.) O.E. Schulz; *Smilax guianensis* var. *subarmata* O.E. Schulz; *Smilax havanensis* Griseb., nom. illeg.; *Smilax havanensis* var. *portoricensis* A. DC.; *Smilax ilicifolia* Desv. ex Ham.; *Smilax subarmata* O.E. Schulz)

West Indies. Herbaceous, children eat the yellow fruit

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 33. 1760, *Prodromus Plantarum Indiae Occidentalis* 58. 1825, *Systema Vegetabilium*, editio decima sexta 2: 103. 1825, *Flora of the British West Indian Islands* 586. 1864, *Anales de la Sociedad Española de Historia Natural* 12: 120. 1883, *Monographiae Phanerogamarum* 1: 124. 1892 and *Symbolae Antillarum* 4: 149–150. 1903, *Symb. Antill.* (Urban). 5(1): 28. 1904

(Infusion of vegetative parts taken as abortifacient, infusion also given to children as vermifuge.)

in English: bell apple

Smilax herbacea L. (*Coprosmanthus consanguineus* Kunth; *Coprosmanthus herbaceus* (L.) Kunth; *Coprosmanthus peduncularis* (Muhlenberg ex Willdenow) Kunth; *Nemexia cerulea* Rafinesque; *Nemexia herbacea* (Linnaeus) Small; *Nemexia nigra* Rafinesque; *Smilax herbacea* Thunb.; *Smilax herbacea* subsp. *crispifolia* Pennell; *Smilax herbacea* var. *peduncularis* (Muhlenberg ex Willdenow) A. DC.; *Smilax herbacea* var. *simsii* A. DC.; *Smilax herbacea* var. *humilis* Farw.; *Smilax herbacea* var. *latifolia* House; *Smilax longifolia* P. Watson, nom. illeg.; *Smilax peduncularis* Muhlenberg ex Willdenow; *Smilax watsonii* Sweet)

North America. Herbaceous vine with tendrils, climbing, leaves and habit quite variable, stems hollow, lower leaf surface pale green, flowers green, mature fruits blue-black

See *Species Plantarum* 2: 1030–1031. 1753, *Dendrol. Brit.* 2: t. 110. 1825, *Neogenyton* 3. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 263–265, 268. 1850, *Monogr. Phan.* 1: 51. 1878 and *Rep. (Annual) Commiss. Parks Boulevards Detroit* 11: 54. 1900, *Flora of the Southeastern United States* 281, 1329. 1903, *Proc. Acad. Nat. Sci. Philadelphia* 62: 559. 1910, *Bull. New York State Mus. Nat. Hist.* 26: 21. 1925, M.R. Gilmore, *Uses of Plants by the Indians of the Missouri River Region*. 19. 1991

(Sarsaparilla, a beverage and medicinal used against rheumatism, is obtained from the rhizomes of various species.)

in English: carrion-flower, Indian coral, Jacob's ladder

in North America: smilax herbacé, toshunuk ahunshke

Smilax kraussiana Meisn. (*Smilax anceps* Willd.; *Smilax anceps* var. *boutonii* Baker; *Smilax anceps* var. *semiamplexicaulis* Baker; *Smilax borbonica* A. DC.; *Smilax cynodon* Cordem.; *Smilax goudotiana* A. DC.; *Smilax herbacea* Thunb., nom. illeg.; *Smilax kraussiana* var. *dregei* A. DC.; *Smilax kraussiana* var. *morsoniana* A. DC.; *Smilax kraussiana* var. *senegambiae* A. DC.; *Smilax lessertiana* A. DC.; *Smilax morsaniana* Kunth; *Smilax mossambicensis* Garcke; *Smilax pseudochina* Sieber; *Smilax pseudo-china* Sieber; *Smilax semi-amplexicaulis* Bojer; *Smilax semiamplexicaulis* Bojer, nom. nud.; *Smilax telfaireana* Wall. ex A. DC.; *Smilax telfaireana* A. DC.) (the specific name means 'two-sided, two-headed')

Trop. & S. Africa. Herbaceous climber, shrubby, liana, stem pale brown-yellow, prickly to thorny, tendrils brown-green tinged pink, young leaves reddish, leaves dull green glabrous, perianth greenish white, fruit at first reddish brown maturing dark purple and slimy when cut, tubers famine food, fruits bark and young shoots eaten by chimpanzees

See *Species Plantarum*. Editio quarta 4: 782. 1806, *Flora* 28: 312. 1845, *Monographiae Phanerogamarum* 171. 1874, *Flore de l'Île de la Réunion* 150. 1895

(A poultice from the plant applied to swellings. Leaves and stem bark for convulsions, fever, syphilis, gonorrhoea, skin diseases, ophthalmia, to hasten child delivery. Roots for venereal diseases, fevers, mixed with other plants used to treat worms and stomachache.)

in English: wild sarsaparilla

in Ghana: ahalika, aklamaku, klamaku, kokora

in Nigeria: irigo

in Tanzania: landula, ligwambe, lukokozi, lushuli, mkokozi, msuli, msulisuli, olushuli, ukokozi

in Yoruba: eekanna magbo, ikan san, iwokuwo, kan san, worewore

in Zaire: amekiki

Smilax lanceifolia Roxb.

India, Nepal. Woody vine

See *Hort. Bengal.* 72. 1814, *Fl. Ind.* ed. 1832, 3: 792. 1832

(Used in Ayurveda. Roots used in rheumatism.)

in China: ma jia ba qia

in India: copacini, gutea shuk china, hindi-chob-chini, hindi-chobchini, kaiha, kwamanbi

Smilax leucophylla Blume (*Smilax dulcis* Desf.; *Smilax glycyphylla* Hassk.; *Smilax latifolia* Blanco, nom. illeg.; *Smilax leucophylla* var. *retusa* (Blume) Kunth; *Smilax retusa* Blume; *Smilax vicaria* Kunth)

New Guinea, Phillipines.

See *Enum. Pl. Javae*: 1: 18. 1827, *Fl. Filip.*, ed. 2: 548. 1845, *Enum. Pl.* 5: 250, 262. 1850

(Roots and rhizomes blood purifier, for syphilis, rheumatism, skin diseases.)

in Phillipines: banal, hampas-tigbalang, kamot-kabag, ronas, zarzaparilla-puti

Smilax luzonensis C. Presl (*Smilax helferi* A. DC.; *Smilax singaporensis* A. DC.)

Phillipines, India.

See *Reliq. Haenk.* 1: 131. 1827, *Monogr. Phan.* 1: 176–177. 1878

(Boils on the head, boil the plant with leaves and poultice. Leaves used as a postpartum remedy.)

Malay name: banar babi

Smilax myosotiflora A. DC.

Thailand, Malaysia, Borneo.

See *Monogr. Phan.* 1: 65. 1878

(For syphilis, eat the leaves and fruit. Sexual tonic, aphrodisiac, eat the rhizome.)

Malay name: akar ali, akar ding, itah visi

Smilax nipponica Miq. (*Coprosmanthus nipponicus* (Miq.) Koidz.; *Coprosmanthus simadae* (Masam.) Masam.; *Coprosmanthus simadai* (Masam.) Masam.; *Smilax herbacea* var. *intermedia* C.H. Wright; *Smilax herbacea* var. *nipponica* (Miq.) Maxim.; *Smilax herbacea* var. *oblonga* C.H. (Antiinflammatory, astringent, disinfectant, to treat skin diseases, rash, scabies, wounds, ulcers, boils. Magico-religious beliefs, ritual, the spiny stems used against evil spirits.)

in China: bao jing ba qia

in India: kurdairi, philang-tung-rikang

Smilax odoratissima Blume

Malesia, Brunei. Herbaceous climber

See *Enum. Pl. Javae*: 19. 1827

(Crushed heated leaves applied as a dressing on burns. Ritual, ceremonial, plant used in ceremonies against malevolent spirits.)

in Indonesia: ata

Smilax orthoptera A. DC. (*Smilax roxburghiana* Wall. ex Hook.f., nom. superfl.; *Smilax roxburghiana* Wall.; *Smilax roxburghiana* Wall. ex A. DC.; *Smilax roxburghiana* (A. DC.) Wall. ex Hook. f.)

Nepal.

See *Numer. List* [Wallich] n. 5115. 1831–1832, *Mém. Soc. Phys. Genève* 7: 314 (–316). 1836, *Monogr. Phan.* [A. DC. & C. DC.] 1: 192. 1878, *Fl. Brit. India* 6: 311. 1892

(Root paste with honey applied externally and also taken orally in venereal diseases and urinary problems.)

in Nepal: kukurdaino

Smilax ovalifolia Roxb. ex D. Don (*Smilax ovalifolia* Roxb.)

India.

See *Species Plantarum*. Editio quarta [Willdenow] 4(2): 786. 1806, *Hortus Bengalensis*, or a catalogue ... 72. 1814, *Prodromus Florae Nepalensis* 49. 1825, *Fl. Ind.* 3: 794. 1832, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 142. 1878

(Used in Ayurveda. Plant paste applied in headache. Crushed leaves applied on new cuts to stop bleeding. Roots to control abnormal white discharge, also in the treatment of gout, venereal diseases, menstrual disorders, dysentery, urinary troubles, rheumatism; roots with those of *Bridelia tomentosa* made into a paste applied on rheumatism and gonorrhoea; root decoction taken for jaundice; roots of *Ardisia paniculata* together with those of *Smilax ovalifolia* and *Bridelia tomentosa* crushed and boiled and the water drunk for jaundice; root powder given orally in piles.)

in China: luan ye ba qia

in India: atkir, copacini, gumbaro, guti, gutvel, jangli-aushbah, jangliushbah, kaihapi, kal-tamara, karivilanti, kistapatamara, konda-dantena, konda-guruva-tige, konda-tamara, kumarika, kummarabaddu, kuri-vilandi, maitri, malai-tamarai, malait-tamarai, malaitamara, ram dana, ramdatan, randatan, romdatwain, sitapa-chettu

Smilax perfoliata Lour. (*Smilax annamensis* Rendle; *Smilax laurifolia* Roxb., nom. illeg.; *Smilax laurina* Kunth; *Smilax perfoliata* Blume, nom. illeg.; *Smilax prolifera* Roxb.; *Smilax prolifera* Wall. ex Roxb.; *Smilax siamensis* T. Koyama)

India, China, Taiwan. Shrub, stout, armed, climber, young leaves cooked and taken as vegetable

See *Fl. Cochinch.* 2: 622. 1790, *Enumeratio Plantarum Javae* 18. 1827, *Flora Indica*; or, descriptions of Indian Plants 3: 795–796. 1832 and *J. Nat. Hist. Soc. Siam* 4: 124. 1921, *Brittonia* 26: 136. 1974, *Economic Botany* 29(4): 314. 1975

(Root and stem for arthritis, rheumatism, tooth decay, cold and cough. Leaves and roots used for urinary complaints and to facilitate delivery. Roots decoction taken for body pains, dysentery; root juice mixed with powder of *Phaseolus mungo*, made into cakes and given with warm milk for rheumatism. An infusion for “anything in your blood.” Magico-religious beliefs, food served on the leaves to cure children suffering of bedwetting at night; a branch is hung over the entrance of the house to keep evil spirits away.)

in China: chuan qiao ba qia

in India: kaiha, mitri, mutrilaha, narang wa, neeru betta balli, phonsar, pirangi chekka, ramdatun, thao-ma-kongrang, tikanibarua

Smilax poeppigii Kunth (*Smilax grandifolia* Poepp. ex A. DC.; *Smilax macrophylla* Roxb.; *Smilax macrophylla* Willd.; *Smilax macrophylla* Poepp. ex A. DC.; *Smilax macrophylla* Griseb.)

Tropical America, Venezuela.

See *Species Plantarum*. Editio quarta [Willdenow] 4(2): 786. 1806, *Hortus Bengalensis*, or a catalogue ... 72. 1814, *Prodromus Florae Nepalensis* 49. 1825, *Fl. Ind.* 3: 794. 1832, *Enum. (Plant paste applied in headache. Crushed leaves applied on new cuts to stop bleeding. Roots in the treatment of gout, venereal diseases, menstrual disorders, dysentery, urinary troubles, rheumatism; root powder given in piles.)

in China: luan ye ba qia

in India: atkir, gumbaro, kaihapi, kaltamara, karivilanti, kistapatamara, kondadantena, kondagarbhatige, kondaguravatige, kumarika, kummarabaddu, kundagurvatiga, kushtaputamara, ramdatan, randatan, romdatwain, sitapa

Smilax pseudochina L. (*Coprosmanthus tamnifolius* (Michx.) Kunth; *Coprosmanthus tamnifolius* Kunth; *Nemexia leptanthera* (Pennell) Small; *Nemexia tamnifolia* (Michx.) Small; *Nemexia tamnifolia* Small; *Smilax farinosa* Raf.; *Smilax hederifolia* Mill.; *Smilax inermis* Walter; *Smilax inermis* Jord., nom. illeg.; *Smilax leptanthera* Pennell; *Smilax pandurata* Raf., nom. illeg.; *Smilax pseudochina* Sieber; *Smilax tamnifolia* Michx.)

North America.

See *Species Plantarum* 2: 1031. 1753, *Flora Caroliniana*, secundum ... 244. 1788, *Fl. Bor.-Amer.* 2: 238. 1803, *Autik.*

Bot.: 129. 1840, *Enum. Pl.* 5: 267. 1850 and *Flora of the Southeastern United States* [Small]. 281, 1329. 1903, *Bull. Torrey Bot. Club* 43(8): 412. 1916, *Man. S.E. Fl.* [Small] 311. 1933

(Used in Sidha.)

in India: akari, akarikkoti, annapurannakkoti, annapurannam, cirripakkattukkoti, cirripam, ilavantikai, kaiccupakkoti, kaiccupam, naintavam, nanaintavakkoti, piramatanti, piramatantikkoti, potikkattu, potikkattukkoti, uppukatti, uppukattikkoti, venkattukkoti

Smilax pumila Walter (*Parillax pumila* (Walter) Raf.; *Parillax pumila* Raf.; *Smilax humilis* Miller, nom. rej.; *Smilax pubera* Michaux; *Smilax puberula* Kunth)

North America. Climbing vine, red pointed fruits, densely pubescent herbage

See *Gard. Dict.* ed. 8: 11. 1768, *Flora Caroliniana*, secundum ... 244. 1788, *Flora Boreali-Americana* 2: 238. 1803, *Neogenyton* 3. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 193. 1850

(Dried leaves infusion for upset stomach.)

in English: sarsaparilla vine

Smilax schomburgkiana Kunth (*Smilax schomburgkiana* Kunth)

Tropical America, Eastern Brazil. Climber, twining, branched, woody roostock, few spines, male and female flowers on separate plants in leafy racemose panicles of umbels from axils of the main stem, berry blackish-red

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 5: 187. 1850

(Root decoction aphrodisiac and tonic; roots infusion to treat diseases of the urinary bladder and nervous.)

in Guianas: cockshun, dorok waropimpla, hameluna-balli

Smilax setosa Miq. (*Smilax barbata* Wall.; *Smilax barbata* (Miq.) Wall. ex A. DC., nom. superfl.; *Smilax barbata* Wall. ex A. DC., nom. superfl.)

Malesia, Singapore. Climber

See *Numer. List* [Wallich] n. 5125. 1831–1832, *Fl. Ned. Ind.*, Eerste Bijv.: 610. 1861 [Alternate title: *Flora Indiae Batavae*, ... Supplementum Primum. Prodr. Florae Sumatranae], *Monographiae Phanerogamarum* 1: 196. 1878

(Fresh rhizome juice as fish poison.)

in Indonesia: padi

Smilax smallii Morong (*Smilax cinnamomiifolia* Small; *Smilax ovata* Pursh, nom. illeg., non Duhamel; *Smilax ovata* var. *buckleyi* A. DC.) (For the American botanist John Kunkel Small, 1869–1938.)

North America. Climbing vine

See *Flora Americae Septentrionalis*; or, ... 1: 249. 1814 [1813], *Bulletin of the Torrey Botanical Club* 21(10): 430–431. 1894, *Bulletin of the Torrey Botanical Club* 25(12): 609. 1898

(For labor pain.)

in North America: cantaque

Smilax wightii A. DC.

India.

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 174. 1878

(Veterinary medicine, roots for amebiasis.)

in India: ghotivel

Smilax zeylanica L. (*Smilax ceylanica* Oken; *Smilax ceylanica* (L.) Oken; *Smilax collina* Kunth; *Smilax elliptica* Desv.; *Smilax elliptica* R.Br.; *Smilax hohenackeri* Kunth; *Smilax indica* Burm.f.; *Smilax javensis* A. DC.; *Smilax ovalifolia* var. *nervulosa* A. DC.; *Smilax villandia* Buch.-Ham. ex Royle; *Smilax zeylanica* var. *penangensis* A. DC.; *Smilax zollingeri* Kunth)

Tropical Asia, India, Sri Lanka. Prickly climber, perennial, robust, tuberous roots, tendrils, male and female flowers separate in the same plant, greenish-white flowers arranged in axillary umbels, shiny smooth globose berries, black ripe fruits and tubers often eaten

See *Species Plantarum* 2: 1029. 1753, *Fl. Ind.* 213. 1768, *Prodr. Fl. Nov. Holland.* 293. 1810, *Prodr. Pl. Ind. Occid.* (Hamilton) 58. 1825, *Allg. Naturgesch.* iii. (1) 616. 1841, *Enum. Pl.* [Kunth] 5: 240–241, 261. 1850, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 175, 191, 200. 1878 and *Journ. Arn. Arb.* xxxi. 285. 1950

(Used in Ayurveda, Unani and Siddha/Sidha. Roots for venereal diseases, dysentery, fevers, skin diseases, rheumatic pain and rheumatism; root juice given in dysentery; a decoction taken for sores, swellings and abscesses; powdered roasted roots and black pepper to promote fertility. Flowers given to a child who passes urine in the bed while sleeping. Leaf and stem juice antidiabetic. Veterinary medicine, leaves paste given for gastric pain of a cow or buffalo; root juice given for dysentery. Magico-religious beliefs, contact therapy, roots to cure fevers, bad dreams, bedwetting.)

in India: adavithamalapaku, antkinari, at-ker, cheekengally, cheekengavally, janglui-aushbah, kaltamara, kamdantan, kareelanchi, kari villanchi, karna lata, kattu-kodi, kon-datamora, kumarika, malaittamaram, mootri, mootrilaha, mumbarai, muter, mutri, mutrideera, mutrilaha, mutturi, nagaubuai, ptachikora, ramdaatun, ramdataun, ramtungur

in Indonesia: tjanar babi, tjanar beurit, tjanar bokor

Smithia Aiton Fabaceae (Aeschynomeneae)

For the British (b. Norwich) botanist Sir James Edward Smith, 1759–1828 (d. Norwich), physician, taxonomist, 1785 Fellow of the Royal Society, 1786 took the degree of Doctor of Medicine at the University of Leyden, 1788–1828 a founder and first President of the Linnean Society of London (re-elected President each year until his death), an extraordinary and prolific writer; see *Familles des Plantes* 2: 323. 1763, *Hortus Kewensis* (W. Aiton) 3: 496, t. 13. 1789 and A.M. Geldart, “Sir James Edward Smith and some of his friends.” *Trans. Norfolk and Norwich naturalists’ Soc.* 9: 647. 1914, A.T. Gage, *A History of the Linnean Society of London*. London 1938, *Reinwardtia* 5(1): 23–36. 1959, *Reinwardtia* 5(4): 419–456. 1960, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 293. 1965, Diana M. Simpkins, in *D.S.B.* (or *Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie.) 12: 471–472. New York 1981, Stafleu and Cowan, *Taxonomic literature*. 5: 678–691. 1985, *J. Econ. Taxon. Bot.* 7: 249–276. 1985.

Smithia conferta Sm. (*Damapana conferta* (Sm.) Kuntze; *Smithia conferta* Sm. var. *geminiflora* (Roth) T. Cooke; *Smithia geminiflora* Roth; *Smithia geminiflora* Roth var. *conferta* Baker; *Smithia geminiflora* var. *conferta* (Sm.) Baker; *Smithia hispidissima* Zoll. & Moritzi)

India. Annual non-climbing shrub, herb, yellow flowers, twisted pods, plant eaten as vegetable, deer eat it

See *Familles des Plantes* 2: 323. 1763, *The Cyclopaedia*; or, universal dictionary of arts, ... 33: *Smithia* n. 2. 1816, *Novae Plantarum Species* 352. 1821, *Natuur-Geneesk. Arch. Ned.-Indie* 3: 76. 1846, *The Flora of British India* 2(4): 149. 1876, *Revisio Generum Plantarum* 1: 179. 1891 and *Economic Botany* 34(3): 273–275. 1980

(Used in Ayurveda. Plant laxative, diuretic, antifungal, antimicrobial, antiinflammatory, antirheumatic, antibilious and tonic, used in the treatment of biliousness, headache, ulcers, sterility in women and rheumatism, alleviates spasms and stimulates the central nervous system, to remove the effects of old age and wrinkles. Warmed leaf paste or leaf extract applied over body in bodyache. Powdered leaves to cure sterility in woman, for regulating fertility or antifertility.)

in China: mi hua po you gan

in India: citalboti, elakanni, kavalu, lakshmana, lakshmana booti, laxamana buti, naichibha, naichi bhaji, thiruthali, titalboti

Smithia purpurea Hook. (*Damapana purpurea* (Hook.) Kuntze; *Damapana purpurea* Kuntze)

India. Annual non-climbing herb, erect or diffuse, leaves and tender stems consumed as green vegetable

See *Bot. Mag.* 73: t. 4283. 1847, *Revisio Generum Plantarum* 1: 179. 1891

(Poultice, antiinflammatory, antirheumatic.)

in India: burkar

Smithia sensitiva Aiton (*Aeschynomene tribuloides* Baill.; *Damapana sensitiva* (Aiton) Kuntze; *Damapana sensitiva* Kuntze; *Petagnana sensitiva* (Aiton) J.F. Gmel.; *Smithia javanica* Benth.; *Smithia sensitiva* Wight & Arn.; *Smithia sensitiva* Zollinger & Moritzi)

India. Perennial non-climbing herb, many-branched, procumbent, yellow flowers

See *Hortus Kewensis*; or, a catalogue ... 3: 496–497. 1789, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 220. 1834, *Systematisches Verzeichniss der im Indischen Archipel* 6. 1854, *Revisio Generum Plantarum* 1: 179. 1891 and *Fitoterapia* 61(4): 325–331. 1990

(Juice of root given in fever. A lotion for headache, herb boiled and given for gravel and difficulty in micturition.)

in China: po you gan

in Madagascar: fanivanjetry, odabrenu, odabrini

in India: dampan, kaola, kavla, loeong masuria, masurising, nala-kashina, nullakashina, oda-brini, odabrenu, odabrini

in Japan: nemuri-hagi

in Nepal: amti

Smodingium E. Meyer ex Sonder Anacardiaceae

Greek *smodix*, *smodingos*, *smodiggos* ‘wheal caused by a blow’, referring to swelling (the plant has irritant properties), or also to indurated mark or hardenend margins of the hard fruits, see *Zwei Pflanzengeogr. Docum.* (Drège) 222. 1843, *Flora Capensis* i. 523. 1859–1860.

Smodingium argutum E. Mey. ex Sond. (*Smodingium argutum* E. Mey.) (the specific epithet refers to the sharply toothed or notched leaves, from the Latin *argutus*, *a*, *um*)

South Africa. Shrub or small tree, erect, climbing, scrambling, slender, trifoliolate leaves, small flowers in hairy panicles, winged fruits, very similar to *Searsia*

See *Flora Capensis* 1: 523. 11–31 Mai 1860 and Watt, J.M. and Breyer-Brandwijk, M.G. *The Medicinal and Poisonous Plants of Southern and Eastern Africa*. Being an account of their medicinal and other uses, chemical composition, pharmacological effects and toxicology in man and animal. 2nd edn. Edinburgh. 1962, *S. Afr. Med. J.* 37: 883–888. 1963, *Contact Dermatitis* 1(6): 388–389. 1975, *S. Afr. Med. J.* 71(7): 440–441. 1987

(Berries sap causes violent skin irritations. Eczema and dermatitis, acute allergic contact dermatitis. Dermatitis of poison ivy type. Latex irritating, itching, swelling, rash, blistering. Sap irritant in high concentrations, a potent sensitizer.)

in English: African poison ivy, African poison oak, pain bush, rainbow leaf

in Southern Africa: pynbos, tovane, tovana; inTovane (Zulu); inTovane, uTovani (Xhosa); Umtomvane (Xhosa and Pondo); tshilabele, kgolo (South Sotho)

Socratea H. Karsten Palmae

Named for the Greek philosopher Socrates (Sokrates), see *Florae Peruvianaee, et Chilensis Prodromus* 149. 1794, *Systema Vegetabilium Florae Peruvianaee et Chilensis* 298. 1798, *Linnaea* 28: 263–264. 1856 [Jan 1857], *Die Natürlichen Pflanzenfamilien* 2(3): 60. 1887 and *Field Mus. Nat. Hist., Bot. Ser.* 13(1/2): 321–418. 1960, *Gentes Herb.* 9: 275–285. 1963, *Field Guide to the Palms of the Americas*. Princeton University Press. New York 1995, *Botanica Acta* 110: 79–89. 1997, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 201–293. 2003.

Socratea exorrhiza (Mart.) H. Wendl. (*Iriartea durissima* Oerst.; *Iriartea exorrhiza* Mart.; *Iriartea exorrhiza* var. *elegans* (H. Karst.) Drude; *Iriartea exorrhiza* var. *orbigniana* (Mart.) Drude; *Iriartea exorrhiza* var. *orbignyana* (Blume ex Mart.) Drude; *Iriartea orbigniana* Mart.; *Iriartea orbignyana* Blume ex Mart.; *Iriartea philonotia* Barb. Rodr.; *Socratea albolineata* Steyerem.; *Socratea durissima* (Oerst.) H. Wendl.; *Socratea elegans* H. Karst.; *Socratea gracilis* Burret; *Socratea hoppii* Burret; *Socratea macrochlamys* Burret; *Socratea orbigniana* (Mart.) H. Karst.; *Socratea orbignyana* (Mart.) H. Karst.; *Socratea philonotia* (Barb. Rodr.) Hook.f.)

Upper Amazon, Nicaragua, Trop. America. Palm, stilt roots densely covered with strong spines, pinnate leaves with clasping sheaths, thickly packed small white blossoms, orange-yellow oval-ellipsoid fruit

See *Historia Naturalis Palmarum* 2(2): 36–37, t. 33–34. 1824, *Hist. Nat. Palm.* 3(7): 187, 189. 1838, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1858(1–4): 30. 1859, *Bonplandia (Hannover)* 8(6): 103. 1860, *Enum. Palm. Gart. Berlin-Dahlem* 11: 232. 1931, *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 1. 1940, *Journal of Ethnopharmacology* 10: 157–179. 1984, *Taxon* 38: 106. 1989, *Fl. Neotrop.* 53: 81. 1990, *Economic Botany* 53(3): 237–260. 1999, *Journal of Ethnopharmacology* 108(2): 161–184. 2006

(Fruit said to be toxic. Exudate from the roots irritant, also used in curare. Leaf or roots decoction a treatment for hepatitis.)

in English: paxiuba palm, stilt palm, walking palm

in Brazil: baxiúba, cashapona, castiçal, coqueiro-acunã, pachiuba, pachiubeira, paxiubá, pona, sacha pona

in Colombia: araco, misibóto

in Ecuador: palma andante, shiquita

in Guianas: awara monpe, boba, boeba, ingi-pina, ingi-prasara, kapichian, moanari, paswoe, peurah, peurat, pioelah, puh-puh, pup

in Panama: eba

in Venezuela: palma de cacho

Solandra Sw. Solanaceae

For the Swedish (b. Piteå, Norrland) botanist Daniel Carl(sson) Solander, 1733–1782 (d. London), naturalist, traveller and plant collector, circumnavigator, 1750–1759 a pupil of Linnaeus at the University of Uppsala, 1764 Fellow of the Royal Society, 1768–1771 accompanied Joseph Banks on Captain Cook's first voyage of exploration in the ship *Endeavour*, from 1771 Bank's secretary and librarian, from 1773 Keeper of the Natural History Department of the British Museum (London), author of *Caroli Linnaei Elementa botanica*. 1756; see Gustavus Brander (1720–1787), *Fossilia Hantoniensia collecta, et in Musaeo Britannico deposita*. London 1766, [Bishop Uno von Troil], *Bref ror-ende en Resa til Island in aaren 1772*. [A collection of letters describing a voyage to Iceland headed by Joseph Banks and Daniel Solander in 1772] Upsala 1777, John Fothergill (1712–1780), *Some accounts of the Cortex Winteranus, or Magellanicus*. in Uganda: omugango

Solanecio tuberosus (Sch. Bip. ex A. Rich.) C. Jeffrey (*Senecio solanoides* Sch. Bip. ex Asch.; *Senecio tuberosus* Sch. Bip. ex A. Rich.)

Central African Republic, Ethiopia. Plants succulent with large tuberous root, annual, flowers bright yellow

See *Tentamen Florae Abyssinicae ...* 1: 434. 1848, *Beitrag zur Flora Aethiopiens ...* 159. 1867 and *Kew Bulletin* 41(4): 921. 1986, *Biochemical Systematics and Ecology* 36(5–6): 399–407. 2008

(Hepatotoxic.)

Solanum L. Solanaceae

Latin *solanum*, a plant name used probably for *Solanum nigrum* (Aulus Cornelius Celsus, *De medicina*. Florentiae 1478), *solanum* applied by Plinius to a plant, called also *strychnos*, nightshade, from the Latin *sol, solis* ‘sun’, the plants of the sun, see also *solago, inis* ‘a plant called also heliotropium’; many authors suggested from the Latin *solor, aris, atus sum, ari* ‘to soothe’, in allusion to the soothing properties of the plant, *solamen, inis* ‘a comfort, consolation’, Akkadian *sululu* ‘happy, glad’, *elelu* ‘jubilation, happiness’, *sulu* ‘to move objects to a higher location’, *elu, alu* ‘to come up, to rise’. See Carl Linnaeus, *Species Plantarum*. 1: 184–188. 1753, *Genera Plantarum*. Ed. 5. 85. 1754, *Jardin de la Malmaison* t. 85. 1805, Dunal, Michel Félix (1789–1856), *Solanorum generumque affinium synopsis, seu, Solanorum historiae editionis secundae summarium, ad characteres differentiales redactum, seriem naturalem, habitationes stationesque specierum breviter indicans* 35. Monspelii, apud Renaud, 1816, *The Genera of North American Plants* 1: 129–130. 1818, *A General History of the Dichlamydeous Plants* 4: 439. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 30, 331. 1852 and *Repertorium Specierum Novarum Regni Vegetabilis* 16: 307. 1923, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1222. [from the Latin *sol, solis* ‘sun’] 1988, Regina Harrison, *Signs, Songs, and Memory in the Andes*. Translating Quechua Language and Culture. 172–195. University of Texas Press, Austin 1989, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 570. 1994, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 593. 1996, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIX: 297. [from the Latin *sol, solis* ‘sun’] 1997, Armando T. Hunziker, *Genera Solanacearum: The Genera of Solanaceae Illustrated, Arranged According to a New System*. Koeltz Scientific Books, Königstein, 2001.

Solanum aculeastrum Dunal

East Africa. Shrub or small tree, thorny, stem green with grey pubescence, petals blue reflexed, anthers yellow, fruit dark shiny green to yellow

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 366. 1852 and *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 16: 165. 1923

(Fruits said to be toxic.)

in English: apple of Sodom, bitter apple, devil’s apple, goat apple, goat bitter apple, poison-apple

in Southern Africa: bokappel, bitterappel, bokbitterappel, gifappel, doodenappel; murulwa (Venda); dungwiza, muTura (Shona); shulwa (Venda); umThuma (for all kinds of *Solanum*) (Xhosa)

in S. Rhodesia: muTura, dungwiza

in Tanzania: lidasi, olndununga, olnturunga, sikordi

Solanum aethiopicum Linnaeus (*Solanum anguivi* Lam.; *Solanum gilo* Raddi; *Solanum incanum* auct. non L.; *Solanum integrifolium* Poirét; *Solanum texense* Engelm. & A. Gray; *Solanum undatum* Jacq.)

Ethiopia, Tanzania. Shrub or woody-based herb, many-branched, inflorescence a lateral racemose cyme, corolla white, juicy shiny red fruits eaten, leaves and shoots used as a cooked vegetable, immature fruits used as cooked vegetables, in grassland, in full sun in woodland savanna

See *Species Plantarum* 1: 186. 1753, *Centuria II. Plantarum ... 2*: 10. 1756, *Amoen. Acad. L.* 4: 307. 1759, *Encyclopédie Méthodique, Botanique* 4: 301. 1797, *Atti della Società dei Naturalisti e Matematici di Modena* 18: 31. 1820, *Boston J. Nat. Hist.* 5(2): 227. 1845 and *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 16: 43. 1923, *Ann. Missouri Bot. Gard.* 61: 704. 1974, *Revista Brasil Genet.* 5: 533–549. 1982, *Cytologia* 48: 35–40. 1983, *Journal of the American Society for Horticultural Science* 108: 10–15. 1983, *Kew Bulletin* 40: 391. 1985, *Nucleus* 29: 101–103. 1986, *Feddes Repertorium* 99: 183–187. 1988, *Willdenowia* 21: 233–238. 1991, *Acta Botanica Brasilica* 5(2): 37–51. 1991, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 20(3/4): 25–41. 1997

(Leaves and fruits for digestive disorders, gastrointestinal troubles, urethritis. Roots and fruits carminative and sedative, to treat colic and high blood pressure; leaves applied to ulcers and sores; leaf juice sedative, antiemetic, to treat tetanus after abortion; crushed macerated fruits as an enema.)

in English: African eggplant, bitter tomato, garden egg, scarlet eggplant

in Brazil: gilô, jilô

in China: hong qie

in Madagascar: angivi

in Tanzania: endemelosa, endemelwa, ndulele, ngogwe, nyanya chungu, omutura kambalure, omutura mahwa

Solanum albicaule Kotschy ex Dunal

India, Uganda. Shrub, thorny, purple flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 204. 1852 and *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 16: 100. 1923

(Plant decoction against ulcers.)

in India: narkanta

Solanum alibile R.E. Schult.

South America, Colombia. Shrub, globose orange-red edible fruit

See *Bot. Mus. Leaflet* 19: 236, tab. 32. 1962

(A source of refreshing, tonic, stimulant beverage.)

Vernacular name: lulo

Solanum americanum Miller (*Solanum americanum* subsp. *nodiflorum* (Jacq.) R.J.F. Henderson; *Solanum americanum* var. *nodiflorum* (Jacq.) Edmonds; *Solanum depilatum* Bitter; *Solanum fauriei* H. (Highly toxic. All kinds of animals can be poisoned after ingesting nightshade including cattle, sheep, poultry, and swine. Black nightshade contains toxic glycoalkaloids, the highest concentration in the green immature fruits, Solanine is poisonous and only partially soluble in water. Ripe berries cause reduced symptoms of mild abdominal pains, vomiting and diarrhea. Leaves eaten yielding a heat-clearing effect; leaves juice used to relieve chronic conjunctivitis; pounded leaves to treat sores and skin problems. Whole plant used for treating inflammation, dissipating blood stasis, and promoting the subsidence of swelling, also clearing away heat and detoxifying. Veterinary medicine, fruits used to treat worms in chicken. Molluscicidal.)

in English: American black nightshade, bitter gumma, bitter nightshade, black calalu, black nightshade, glossy nightshade, nightshade, spinach

in Dominica: zèb amè

(Used in Ayurveda, Unani and Sidha. Toxic, stimulant, narcotic, antioxidant, hypolipidemic. Whole plant ash applied in case of ulcers, venereal diseases; leaves applied to ulcers and sores. Various plant parts used for diabetes, bronchitis, asthma, dysuria, dysentery, cholera, otitis, toothache, hemorrhoids, venereal diseases, syphilis, skin infections, rheumatism. Root juice dropped for earache or toothache; roots infusion of *Clerodendrum viscosum*, *Girardinia palmata* and *Solanum melongena* as a bath in debility and fatigue. Ceremonial, rituals, festivals, the fruit, used in religion and magico-religious beliefs, magical, used as a symbol of protection, good health and female fertility.)

in English: aubergine, brinjal, Chinese eggplant, eggplant, garden eggplant, India eggplant, Jew's apple, mad apple, Thai eggplant

in Congo: kasolo, tosolo

in Tanzania: mbilingani, mbiringanya

in South America: berengena, berenjena, melongena

in China: chieh, kun lun kua (= Kunlun melon), lo su, qie, qie zi

in India: accatti, accattiri, achatti, angana, baange, badane, badanekaya, badanekayi, badangan, badangan, badinjan, baigan, baigana, baigun, baingan, bangan, bartaku, begun, bengan, bengna, begun, bera, bhanaaki, bhanta, bhantaki, badangan, bnatta, brhati, brinjal, cakapilavakaceti, cakapilavankam, cakapillakam, catilikkiceti, cheruvazhuthana, chitraphala, citraphala, dirghavartaki, dushpradharshini, hapi, hindirataka, hingoli, hinguli, jati bengani, jukutam, kahkab, kahkam, kalini, kaliniyam, kantakini, kantalu, kantapatrika, kantavartaki, kateli kalan, kaththiri, katphala, katterikayi, khamen, kuli, mahabrhati, mahahrihati, mahati, mahotika, mansalaphala, mishravarnaphala, mulukutakali, nidralu, nilakantaka, nilaphala, nilavriksha, nripapriyaphala, peetaphala, pitaphala, rajakushmanda, raktphala, shakabilva, shakabilvaka, shakashreshtha, sinhi, vallatimuli, valoothala, valutalaceti, valuthina, valutina, vanga, vangana, vangi, vanikkakaykaripputu, vannikkacaceti, vannikkacikam, vankaya, vankayi, vardaku, varta, vartaka, vartakah, vartaki,

virtaku, varttaksi, varttaku, varttapakaceti, varttapakam, vatigama, vayingana, vayinge, vazhuthan, vazhutina, veku-pattiri, vengan, venvazhuthana, vrintaki, vrittaphala, vrn-taki, wangan, wangi, wangkai, wankai

in Japan: nâshibi, nasu

Malayan names: brinjal, terong

in Philippines: berengena, talong, tarong, tolung

in South Laos: (people Nya Hön) plää trob, plää trob cäh, plää trob lo'ruay, plää trob dang, plää trob dway, plää trob glää iyan, plää trob kuen, plää trob lôb

in Italian: melanzana

Solanum melongena L. var. ***insanum*** Prain (*Solanum insanum* J.B. Fisch.; *Solanum insanum* L.)

India. Tender fruits as vegetable

See *Species Plantarum* 1: 186. 1753, *Mant. Pl.* 46. 1767

(Used in Ayurveda and Sidha. For bronchitis, asthma, dysuria, dysentery. Used in religion and magico-religious beliefs.)

in India: adavi vankaya, brhati, gulla badane, karimulli, karimullikkattatiri, mullankattari, mullikkattiri, mullinkattiri, mullukkattari, mutkattiri, piturkkattari, upacamayakattari, upacamayam, vallatimuli, valoothala, valutalaiceti, valuthina, valutina, vanga, vangana, vangi, vanikkakaykariputu, vannikkacicaceti, vannikkacikam, vankaya, vankayi, verri vanga

Solanum moszkowskii Bitter (*Lycianthes moszkowskii* (Bitter) Bitter)

New Guinea. Sprawling shrub or woody scrambler, vine, leaves paired, white flowers from the leaf axil, fruit fleshy bright red berry, seeds flattened winged, in montane rainforest, disturbed forest

Papua New Guinea.

(Used in Ayurveda. Toxic glycoalkaloids in the plant, the highest concentration in the green immature berries. All kinds of animals can be poisoned after ingesting nightshade including cattle, sheep, poultry and swine. Children have been poisoned after ingesting unripe berries. Plant extract cathartic, diuretic, alterative, used in piles, liver troubles, leprosy and dysentery; shoots given in skin diseases, scabies, eczema and psoriasis. Branches and fruits applied as a vulnerary and antiinflammatory; an infusion drunk as a tonic. Berries bitter, laxative, aphrodisiac, diuretic. Unripe fruits applied to aching teeth and squeezed on baby's gums to ease pain during teething; fruit for jaundice, diarrhea, fever and eye ailments; extract of berries, leaves and stems used for skin diseases. Leaves used for stomachache, female ailments and liver disorders; leaf poultice applied to rheumatic joints; raw leaves eaten to cure mouth and nose blisters; leaves decoction diuretic, laxative, for swellings on the body; leaves and fruits pounded and the extract used for tonsillitis; leaves cooked and eaten to cure jaundice; leaves fried and eaten for cough. Roots boiled in milk and given to children as tonic. Stem of *Vitis vinifera* mixed with *Solanum nigrum* and *Cestrum parqui* and applied to treat inflammation. Magico-religious beliefs, ritual. Veterinary medicine, root mixed with pepper and ginger is fed to cows to reduce gas formation in the stomach.)

Hist. Nat.* (Bolivia) Com. 10: 32–52. 1990

(Insecticide, against head-lice. *Solanum georgicum*, conspicuously spiny on the stems and along the nerves of the leaves, leaves very spiny, flowers greenish-white, perfectly globose fruits. *Solanum topiro*, unarmed, robust, inflorescence a lateral short-peduncled few-flowered cyme, flowers pedicellate, white or greenish-white corolla, orange-red subglobose to ovoid fruit, acidulous pulp, very numerous flat yellowish seeds, edible fruits.)

in South America: betáka, bo-po, cocona, coconilla, cona, dyoxooro, kochari, lulo, lulo topiro, naranjilla, poom-ka, topiro, tupiro, tupiru

Solanum sisymbriifolium Lam. (*Solanum campechiense* L.; *Solanum concisum* Dunal)

Tropical America, Colombia, Argentina. Herb, heavily armed with spines, spiny branches, membranaceous leaves, numerous pale bluish to white flowers, terminal or lateral few-flowered raceme, red globose fruit

See *Tableau Encyclopédique et Méthodique ... Botanique* 2: 25. 1794, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 327. 1852 and *Glimpses Cytogenet. India* 3: 188–198. 1992, *Cytologia* 62: 103–113. 1997

(Roots decoction and infusion used for regulating fertility.)

in South America: mancadera, ñuati pyta, pomas de perro, tapaculo, uchuba colorado, uva de perro

Solanum spirale Roxburgh (*Solanum apoense* Elmer; *Solanum callium* R.J.F. Hend.; *Solanum spirale* var. *tetrasepalum* H. Chu; *Solanum superficiens* Adelb.)

India, Indonesia. Herb, undershrub, unarmed, ridged, elliptic leaves, small white flowers in dense racemes, orange-red globose berries, young bitter leaves eaten as a vegetable, fruits eaten fresh or cooked

See *Fl. Ind.* 1: 566. 1820, *Fl. Ind.* 2: 247. 1824 and *Leaflets of Philippine Botany* 2: 730. 1910, *Blumea* 6: 331. 1948, *Austrobaileya* 1(1): 13. 1977, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 28: 67. 1989, *Acta Botanica Yunnanica* 20(2): 207–210. 1998, *Fl. Neotrop.* 84: 122. 2002

(Leaves eaten to kill intestinal worms. Roots narcotic, diuretic, anesthetic. Ceremonial, symbolic uses, to symbolise the separation.)

in English: coiled-flower nightshade

in China: xuan hua qie

in India: banga, hepi-chakrang, koki vu, kokivu, lam-khamen, lora tita, mungaskajur, titakachi, titakuchi, tukhalap

Solanum stramonifolium Jacq. (*Solanum coconilla* Huber; *Solanum demerarense* Dunal; *Solanum demerarense* Poepp.; *Solanum demerarense* var. *inerme* Dunal; *Solanum orinocense* Kunth; *Solanum platyphyllum* Humb. & Bonpl. ex Dunal; *Solanum platyphyllum* Dunal; *Solanum platyphyllum* Torr.; *Solanum stramonifolium* Jacq.; *Solanum stramonifolium* Pav. ex Dunal; *Solanum stramonifolium* var. *inerme* (Dunal) Whalen; *Solanum toxicarium* Rich.; *Solanum trichocarpum* Miq.; *Solanum undecimangulare* Willd. ex Roem. & Schult.; *Solanum undecimangulare* Roem. & Schult.)

Tropical South America. Shrub, armed with strong straight or curved flattened thorns, calyx cupular, corolla rotate, red globose fruits, closely allied to *Solanum liximitante*, the fruits of *Solanum platyphyllum* is edible

See Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Miscellanea Austriaca ad Botanicam, Chemicam, et Historiam Naturalem Spectantia* 2: 298–299. (The entire plant contains toxic glycoalkaloids but usually in harmless quantities in the edible tubers; two glycoalkaloids, alpha-solanine and alpha-chaconine, are the major alkaloids in potatoes. However, in the presence of light, the tubers photosynthesize and coincidentally increase the amount of toxins. The skin, eyes, and sprouts of the tubers can develop toxic amounts. Even the flesh of the tuber can develop toxic quantities of the glycoalkaloids. Stem and tuber crushed and applied for frostbite. Pieces of boiled potato rubbed on burns and scalds to relieve pain and itching. Ceremonial, rituals, festivals, the tuber.)

in Pakistan: bankakra

Solidago L. Asteraceae

Latin *solido*, *avi*, *atum*, *are* ‘to make firm, to make whole’, *solidus* ‘whole, firm’, decoctions were applied to cure wounds and ulcers; see Carl Linnaeus, *Species Plantarum*. 2: 878–881. 1753, *Genera Plantarum*. Ed. 5. 374. 1754, *Flora Telluriana* 2: 42–43. 1836[1837] and *Flora of the Southeastern United States* 1188, 1339. 1903, *New York State Museum Bulletin* 254: 693. 1924, *Caryologia* 31: 315–330. 1978, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978, *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Taxon* 28: 271–273. 1979, *Taxon* 29: 358–360. 1980, *Invest. Stud. Nat.* 12: 48–65. 1992, *Sida* 15: 649–653. 1993.

Solidago canadensis L. (*Aster asperrimus* Less.; *Aster asperrimus* Nutt., nom. illeg.; *Aster canadensis* (L.) Kuntze;

Aster canadensis Kuntze; *Aster canadensis* (L.) E.H.L. Krause, nom. illeg.; *Aster canadensis* E.H.L. Krause; *Doria canadensis* (L.) Lunell; *Solidago altissima* L.; *Solidago canadensis* L. var. *canadensis*)

North America. Perennial herb, stout hairy stem, long lanceolate hairy veined leaves, tiny yellow flowers

See *Hist. Pl. Rar.*, 13, t. 13, 1728, *Species Plantarum* 2: 863, 878–879. 1753, *Linnaea* 5(1): 142–143. 1830, *Transactions of the American Philosophical Society*, new series, 7: 293–294. 1840, *Revisio Generum Plantarum* 1: 317. 1891, *Annal. Naturh. Hofmus. Wien* ix. (1894) 317. 1894 and *Deutschl. Fl.* (Sturm), ed. 2. 13: 59. 1905, *American Midland Naturalist* 5(2): 43. 1917, *Taxon* 26: 557–565. 1977, *Caryologia* 31: 315–330. 1978, *Canad. J. Bot.* 56: 1466–1471. 1978, *Acta Biol. Cracov., Ser. Bot.* 21: 31–63. 1978, *Taxon* 28: 271–273. 1979, *Taxon* 29: 358–360. 1980, *Sci. & Cult.* 47: 323–325. 1981, *Taxon* 31: 766–768. 1982, *Huntia* 7: 238. 1987, *Sida* 12: 409–417. 1987, *Rhodora* 91: 296–314. 1989, *Rhodora* 94: 48–62. 1992, *Sida* 15: 147–150. 1992, *Invest. Stud. Nat.* 12: 48–65. 1992, *Sida* 17(1): 259–263. 1996

(Analgesic, febrifuge, emetic, sedative, antidiarrheal, toothache remedy, for influenza. Crushed roots to soothe burns. Flower infusion for snakebite and fever. Veterinary medicine, a decoction of plant and wild tarragon used as a wash for horses with cuts and sores. Magico-religious beliefs, good luck charm.)

in English: Canada goldenrod, Canadian goldenrod, goldenrod, meadow goldenrod

in Japan: Kanada-aki-no-kirin-sô

Solidago chilensis Meyen (*Solidago linearifolia* DC.; *Solidago linearifolia* var. *brachypoda* Speg.; *Solidago microglossa* var. *linearifolia* (DC.) Baker)

Argentina, South America.

See *Reise um die Erde* 1: 311. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 341. 1836, *Flora Brasiliensis* 6(3): 10. 1882, *Revista de la facultad de agronomia; universidad nacional de La Plata* 3: 610. 1897 and *Amer. J. Bot.* 66: 173–178. 1979

(Plant used as fish poison.)

Solidago confinis A. Gray (*Solidago confinis* Nutt.; *Solidago confinis* fo. *luxurians* H.M. Hall; *Solidago confinis* var. *luxurians* (H.M. Hall) Jeps.; *Solidago guiradonis* var. *luxurians* (H.M. Hall) Hoover; *Solidago spectabilis* (D.C. Eaton) A. Gray var. *confinis* (A. Gray) Cronquist)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 17: 191–192. 1882 and *University of California Publications in Botany* 3(1): 46. 1907, *A Manual of the Flowering Plants of California ...* 1035. 1925, *The Vascular Plants of San Luis Obispo County, California* 298. 1970,

Amer. J. Bot. 75: 652–668. 1988, *Rhodora* 91: 296–314. 1989, *Rhodora* 94: 48–62. 1992, *Intermountain Flora* 5: 246. 1994

(Infusion of leaves and flowers used as wash for boils, open sores and skin irritations.)

in English: Nevada goldenrod, Southern California goldenrod, southern goldenrod

Solidago flexicaulis L. (*Doria flexicaulis* (L.) Lunell; *Solidago flexicaulis* var. *ciliata* DC.; *Solidago flexicaulis* var. *latifolia* (L.) Pursh; *Solidago latifolia* L.; *Solidago scrophulariifolia* Mill.)

North America. Perennial herb

See *Species Plantarum* 2: 879–880. 1753, *The Gardeners Dictionary*: ... eighth edition n. 12. 1768, *Flora Americae Septentrionalis*; or, ... 2: 542. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 335. 1836 and *American Midland Naturalist* 5(2): 42. 1917, *Rhodora* 80: 431–440. 1978, *Syst. Bot.* 22(2): 245–257. 1997, *Amer. J. Bot.* 86(7): 1003–1013. 1999

(Powdered leaves used for headache. Root chewed for sore throat. Plant decoction for biliousness, an infusion against fevers.)

in English: zigzag goldenrod

Solidago gigantea Aiton (*Aster latissimifolius* Kuntze var. *serotinus* Kuntze; *Aster latissimifolius* (Mill.) Kuntze var. *serotinus* Kuntze; *Doria dumetorum* (Lunell) Lunell; *Doria pitcheri* (Nutt.) Lunell; *Solidago cleliae* DC.; *Solidago dumetorum* Lunell; *Solidago gigantea* Aiton subsp. *serotina* (Kuntze) McNeill; *Solidago gigantea* Aiton var. *leiophylla* Fernald; *Solidago gigantea* Aiton var. *pitcheri* (Nutt.) Gray; *Solidago serotina* var. *minor* Hook.; *Solidago serotinoidea* Á. Löve & D. Löve; *Solidago shinneryi* (Beaudry) Beaudry; *Solidago somesii* Rydb.)

North America. Perennial herb

See *Observationes Botanicae* 2: 26. 1781, *Hortus Kewensis*; or, a catalogue ... 3: 211. 1789, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 101–102. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 331. 1836, *Revisio Generum Plantarum* 1: 314. 1891 and *American Midland Naturalist* 2: 57. 1911, *American Midland Naturalist* 5(2): 43. 1917, *Brittonia* 1(2): 101. 1931, *Rhodora* 41(489): 457. 1939, *Rhodora* 55(658): 322. 1953, *Vascular Plants of the Pacific Northwest* 5: 306. 1955, *Botanical Journal of the Linnean Society* 67(3): 280. 1973, *Le Naturaliste Canadien* 101(6): 932. 1974, *Taxon* 31(2): 358. 1982, *Erigenia* 11: 1–8. 1991, *Bot. Žurn.* (Moscow & Leningrad) 80(2): 87–90. 1995, *Nordic J. Bot.* 17(6): 631–638. 1997

(Leaves infusion cathartic; blossoms infusion febrifuge.)

in English: giant goldenrod, smooth goldenrod

Solidago juncea Aiton (*Solidago arguta* Aiton var. *juncea* (Aiton) Torr. & A. Gray; *Solidago arguta* var. *scabrella* Torr. & A. Gray; *Solidago juncea* fo. *ramosa* (Porter & Britton) Fernald; *Solidago juncea* fo. *scabrella* (Torr. & A. Gray) Fernald; *Solidago juncea* Aiton var. *neoboehemica* Fernald; *Solidago juncea* Aiton var. *ramosa* Porter & Britton; *Solidago juncea* var. *scabrella* (Torr. & A. Gray) A. Gray)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 3: 213–214. 1789, *A Flora of North America*: containing ... 2: 214. 1842, *A Flora of North America*: containing ... 2(3): 414. 1843, *Synoptical Flora of North America* 1(2): 155. 1884, *Bulletin of the Torrey Botanical Club* 18(12): 368. 1891 and *Flora of the Prairies and Plains of Central North America* 792. 1932, *Rhodora* 38(450): 208. 1936, *Caryologia* 31: 315–330. 1978, *Phytologia* 75(1): 11. 1993

(Flowers decoction emetic, stomachic. Root decoction anti-convulsive, febrifuge. Plant infusion for jaundice. Infusion of green leaves antidiarrheal, febrifuge, antiemetic; green leaves chewed for diarrhea, fevers.)

in English: early goldenrod

Solidago mollis Bartl. (*Doria incana* (Torr. & A. Gray) Lunell; *Doria mollis* (Bartl.) Lunell; *Solidago incana* Torr. & A. Gray; *Solidago mollis* Rothr., nom. illeg., non *Solidago mollis* Bartl.; *Solidago mollis* var. *angustata* Shinnery; *Solidago nemoralis* Aiton; *Solidago nemoralis* var. *incana* (Torr. & A. Gray) A. Gray; *Solidago nemoralis* Aiton var. *mollis* (Bartl.) A. Gray)

North America. Perennial

See *Species Plantarum* 2: 878–881. 1753, *Enumeratio Methodica Plantarum* 73. 1759, *Hortus Kewensis*; or, a catalogue ... 3: 213. 1789, *Index Seminum [Goettingen]* 1836: 5. 1836, *A Flora of North America*: containing ... 2(2): 221. 1842, *Proceedings of the American Academy of Arts and Sciences* 17: 197. 1882 and *American Midland Naturalist* 5(2): 43–44. 1917, *Field & Laboratory* 19(1): 34–35. 1951, Beath, O.A. et al. “Poisonous plants and livestock poisoning.” *Wyo. Agric. Exp. Stn. Bull.*, 324. 1953, *Taxon* 31(2): 344–360. 1982, *Brittonia* 36(3): 280–292 [erratum 37: 121] 1984, *Rhodora* 87: 517–527. 1985

(Some goldenrods (*Solidago* spp.) were shown to be poisonous, the presence of a fungal rust on the plants was implicated in the poisoning. The corrosive resins have caused weight loss in calves, sheep and small laboratory animals.)

in English: velvety goldenrod

Solidago multiradiata Aiton (*Aster multiradiatus* Wall.; *Aster multiradiatus* Kuntze; *Aster multiradiatus* (Aiton) Kuntze; *Solidago algida* Piper; *Solidago anticostensis* Fernald; *Solidago cusickii* Piper; *Solidago dilatata* A.

Nelson; *Solidago heterophylla* Nutt. ex A. Gray; *Solidago multiradiata* subsp. *arctica* (DC.) Korobkov & Elven; *Solidago multiradiata* var. *arctica* (DC.) Fernald; *Solidago multiradiata* Aiton var. *multiradiata*; *Solidago multiradiata* var. *scopulorum* A. Gray; *Solidago rubra* Rydb.; *Solidago scopulorum* (A. Gray) A. Nelson; *Solidago virgaurea* var. *arctica* DC.; *Solidago virgaurea* var. *multiradiata* (Aiton) Torr. & A. Gray)

North America. Perennial herb or subshrub

See *Hortus Kewensis*; or, a catalogue ... 3: 218. 1789, *Numer. List* [Wallich] n. 2969. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 339. 1836, *A Flora of North America*: containing ... 2(2): 207. 1842, *Proceedings of the American Academy of Arts and Sciences* 17: 191. 1882, *Synoptical Flora of North America* 1(2): 148. 1884, *Revisio Generum Plantarum* 1: 318. 1891 and *Botanical Gazette* 30(3): 196–197. 1900, *Botanical Gazette* 37(4): 264. 1904, *Bulletin of the Torrey Botanical Club* 31(12): 649. 1904[1905], *Rhodora* 17(193): 4. 1915, *Proceedings of the Biological Society of Washington* 29(23): 100–101. 1916, *Flora URSS* 25: 47. 1959, *Taxon* 28: 265–268, 271–273. 1979, *Bot. (Plant as tonic.)

in English: mountain goldenrod, northern goldenrod, Rocky Mountain goldenrod

Solidago nemoralis Aiton (*Solidago nemoralis* Aiton subsp. *haleana* (Fernald) G.W. Douglas; *Solidago nemoralis* Aiton var. *haleana* Fernald; *Solidago nemoralis* Aiton var. *nemoralis*)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 3: 213. 1789 and *Cytologia* 42: 241–253. 1977, *Caryologia* 31: 315–330. 1978

(Root decoction for jaundice, liver ailments. Leaves decoction disinfectant as a wash for skin diseases; poultice of leaves applied to burns.)

in English: dyersweed goldenrod, gray goldenrod, old field goldenrod

Solidago odora Aiton (*Aster odorus* Kuntze; *Aster odorus* (Aiton) Kuntze; *Solidago odora* fo. *inodora* (A. Gray) Britton; *Solidago odora* var. *inodora* A. Gray; *Solidago odora* Aiton var. *odora*; *Solidago suaveolens* Schoepf)

North America. Perennial herb, smooth stem, lanceolate alternate smooth anise-scented leaves, small flower heads in an open yellow panicle

See *Species Plantarum* 2: 872–881. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 214. 1789, *A Manual of Botany of the Northern United States* (ed. 5) 244. 1867, *Bulletin of the Torrey Botanical Club* 17(5): 124. 1890, *Revisio Generum Plantarum* 1: 318. 1891 and *Manual of the Southeastern*

Flora 1345–1346. 1933, *Brittonia* 36(3): 280–292 [erratum 37: 121] 1984, *American Journal of Botany* 75: 652–668. 1988, *Phytologia* 75(1): 10. 1993, *Sida* 20(4): 1606. 2003

(Abortifacient, antidiarrheal, sedative, tonic, stimulant, blood purifier, for cough, cold, fever, tuberculosis; leaves or dried flowers infusion taken for colic, stomachache, dysentery, colds, measles, and as a wash for rheumatism, neuralgia, headaches.)

in English: anisescented goldenrod, sweet goldenrod

Solidago rugosa Mill. (*Aster rugosus* Kuntze; *Aster rugosus* (Mill.) Kuntze; *Solidago rugosa* Mill. subsp. *rugosa* var. *rugosa*; *Solidago scabra* Muhl. ex Willd., non Muhl.)

North America. Perennial herb, rough very hairy-stemmed, hairy rough wrinkled leaves sharply toothed, small yellow flowers clustered in branching triangular-shaped panicles

See *The Gardeners Dictionary*: ... eighth edition no. 25. 1768, *Revisio Generum Plantarum* 1: 318. 1891 and *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(For liver complaints.)

in English: rough-leaved goldenrod, rough-stemmed goldenrod, wrinkleleaf goldenrod

Solidago rugosa Mill. subsp. *aspera* (Aiton) Cronquist (*Solidago aspera* Aiton; *Solidago celtidifolia* Small; *Solidago drummondii* Torr. & A. Gray; *Solidago rugosa* var. *aspera* (Aiton) Fernald; *Solidago rugosa* Mill. var. *celtidifolia* (Small) Fernald)

North America. Perennial herb

See *The Gardeners Dictionary*: ... eighth edition no. 25. 1768, *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 3: 212. 1789, *Fl. N. Amer.* (Torr. & A. Gray) 2: 217. 1842, *Revisio Generum Plantarum* 1: 318. 1891 and *Fl. S.E. U.S.* [Small]. 1198, 1339. 1903, *Rhodora* 17(193): 7. 1915, *Rhodora* 49(579): 78. 1947, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(Stimulant, tonic.)

in English: rough-leaved goldenrod, wrinkleleaf goldenrod

Solidago simplex Kunth var. *nana* (A. Gray) G.S. Ringius (*Solidago bellidifolia* Greene; *Solidago decumbens* Greene; *Solidago decumbens* Greene var. *oreophila* (Rydb.) Fernald; *Solidago glutinosa* var. *nana* (A. Gray) Cronquist; *Solidago humilis* var. *nana* A. Gray; *Solidago nana* Nutt.; *Solidago oreophila* Rydb.; *Solidago purshii* Porter var. *nana* (A. Gray) Farw.; *Solidago simplex* Kunth subsp. *simplex* var. *nana* (A. Gray) Ringius; *Solidago spatulata* DC. var. *nana* (A. Gray) Cronquist)

North America. Perennial herb

See *The Gardeners Dictionary*: ... eighth edition no. 16. 1768, *Flora Americae Septentrionalis*; or, ... 2: 543.

1814[1813], *Transactions of the American Philosophical Society*, new series, 7: 327–328. 1840, *Synoptical Flora of North America* 1(2): 148. 1884, *Bulletin of the Torrey Botanical Club* 21(7): 311. 1894, *Pittonia* 4(21B): 100. 1899 and *A Flora of Northwest America* 3: 303. 1900, *American Midland Naturalist* 12(2): 72. 1930, *Rhodora* 49(579): 76. 1947, *Vascular Plants of the Pacific Northwest* 5: 311. 1955, *Taxon* 28: 271–273. 1979, *Phytologia* 70(6): 397. 1991

(Stimulant, tonic.)

in English: dwarf goldenrod

Solidago spathulata DC. (*Aster candollei* Kuntze, nom. illeg.; *Aster candollei* Harv.; *Aster spathulatus* Lindl.; *Homopappus spathulatus* (DC.) Nutt.; *Solidago simplex* Kunth subsp. *simplex* var. *spathulata* (DC.) Cronquist; *Solidago simplex* Kunth var. *spathulata* (DC.) Cronquist; *Solidago spathulata* DC. subsp. *spathulata*; *Solidago spiciformis* Torr. & A. Gray)

North America. Perennial herb or subshrub

See *Species Plantarum* 2: 878–881. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 81. 1820 [1818], *Flora Boreali-Americana* 2(7): 8. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 339. 1836, *Transactions of the American Philosophical Society*, new series, 7: 332. 1840, *A Flora of North America*: containing ... 2(2): 202. 1842, *Flora Capensis* 3: 80. 1865, *Revisio Generum Plantarum* 1: 315. 1891 and *Intermountain Flora* 5: 244. 1994

(For skin diseases.)

in English: coast goldenrod, Mt. Albert goldenrod

Solidago speciosa Nutt. (*Aster speciosus* (Nutt.) Kuntze; *Aster speciosus* Kuntze; *Solidago conferta* Mill.; *Solidago harperi* Mack.; *Solidago speciosa* Nutt. var. *speciosa*)

North America. Perennial herb

See *The Genera of North American Plants* 2: 160. 1818, *Revisio Generum Plantarum* 1: 318. 1891 and *Flora of the Rocky Mountains* 868. 1917

(Infusion of root used for burns.)

in English: showy goldenrod

Solidago speciosa Nutt. var. ***rigidiuscula*** Torr. & A. Gray (*Solidago chandonnetii* E.S. Steele; *Solidago rigidiuscula* (Torr. & A. Gray) Porter; *Solidago speciosa* Nutt. var. *angustata* Torr. & A. Gray; *Solidago venulosa* Greene)

North America. Perennial

See *The Genera of North American Plants* 2: 160. 1818, *A Flora of North America*: containing ... 2(2): 205. 1842, *Revisio Generum Plantarum* 1: 318. 1891, *Memoirs of the Torrey Botanical Club* 5(21): 319. 1894 and *Pittonia* 5(27): 138. 1903, *Contributions from the United States National Herbarium* 16(5): 222–223. 1913, *Flora of the Rocky Mountains* 868. 1917

(Root decoction antihemorrhagic, tonic, stimulant, for lung trouble. Infusion of root taken to ease difficult labor.)

in English: showy goldenrod

Solidago squarrosa Nutt. (*Aster muehlenbergianus* Kuntze; *Solidago squamosa* Nutt. ex Hook.; *Solidago squarrosa* fo. *ramosa* (Peck) House; *Solidago squarrosa* var. *ramosa* Peck)

North America. Perennial

See *Catalogus Plantarum Americae Septentrionalis* 76. 1813, *Synoptical Flora of North America* 1(2): 144. 1884, *Die Natürlichen Pflanzenfamilien* 4(5): 150. 1889, *Revisio Generum Plantarum* 1: 316. 1891 and *New York State Museum Bulletin* 139: 36. 1910, *New York State Museum Bulletin* 243–244: 52. 1923, *Caryologia* 31: 315–330. 1978

(Compound infusion of dried leaves and roots emetic, burn dressing, a wash for burns, venereal disease.)

in English: downy ragged goldenrod, stout goldenrod

Solidago uliginosa Nutt. (*Aster terrae-novae* (Torr. & A. Gray) Kuntze; *Aster uliginosus* (Nutt.) Kuntze; *Aster uniligulata* (DC.) Kuntze; *Bigelovia uniligulata* DC.; *Chrysoma uniligulata* (DC.) (Whole plant for cholera, diarrhea and dysentery; plant juice given for fevers and as a tonic during convulsions; whole plant on wounds to relieve pain. Latex astringent, for diarrhea, dysentery, few drops added to cow milk and taken after meals; also applied to wounds. Leaves on cuts and wounds.)

in India: banpalang, dudhli, dudoribon, kaadu sanna hogesoppu, karatu, khomthokpi, musjhar, ping-ahi, ruzadara, shonki

Sonchus dregeanus DC. (*Sonchus ecklonianus* DC.)

South Africa. Perennial herb, long-pointed bluish-green leaves, yellow flowers, edible

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 184. 1838

(Nutritious, given to new mothers during breast-feeding, and also used for skin rashes on infants.)

in English: sowthistle, thistle

in Southern Africa: leharasoana (Sotho)

Sonchus integrifolius Harv.

South Africa. Herb, weedy, bluish-green, leaves pointed at the tip, yellow flowers

See *Fl. Cap.* (Harvey) 3: 528. 1865

(Tonic, nutritious, stimulant.)

in English: sowthistle

in Lesotho: sentlhokojane

Sonchus luxurians (R.E. Fr.) C. Jeffrey (*Sonchus bipontini* fo. *luxurians* R.E. Fr.; *Sonchus luxurians* Schrad. ex Steud.; *Sonchus oliveri-hiernii* Boulos var. *luxurians* (R.E. Fr.) L. Boulos)

Tanzania. Herb, robust, coarse, erect or trailing, succulent, white latex in stems, leaves alternate pinnately divided, central florets yellow, outer ray florets deep orange-yellow, tiny flat achenes, leaves cooked and eaten, fodder for rabbits, sheep and goats, along roadsides, grasslands

See *Nomencl. Bot.* [Steudel] 799. 1821, *Beitrag zur Flora Aethiopiens ...* 160. 1867 and *Acta Horti Bergiani* 8: 102. 1924, *Bulletin du Jardin Botanique de l'État* 32: 105–106. 1962, *Kew Bulletin* 18(3): 427–486. 1966

(Roots boiled and drunk for stomachache and swelling of body. Leaves infusion a remedy for fever and stomach upsets.)

in Tanzania: ipempu, izumba, kwake, mchungu, mshungamboga, pwake, shunga-pwapwa, sunga

Sonchus oleraceus Linnaeus (*Sonchus ciliatus* Lamarck; *Sonchus ciliatus* Perr. ex DC.; *Sonchus mairei* H. Lév.; *Sonchus oleraceus* Wall.)

Eurasia, North Africa. Herb, erect, soft, smooth, hollow, ridged, simple or branched, milky latex, taproot, bluish green leaves alternate, strap-shaped florets surrounded by rows of overlapping bracts, yellow flower heads stalked in a branched terminal inflorescence, achene flattened, hairy white pappus, tender leaves eaten cooked or raw, food for rabbits and poultry, fodder for cattle, in disturbed localities

See *Species Plantarum* 2: 794. 1753, *Flore Française* (Lamarck) 2: 87. 1779 [1778 publ. after 21 Mar 1779], *Numer. List* [Wallich] n. 3252 F. 1831, *Prodr.* (DC.) 7(1): 177. 1838 and *Repert. Spec. Nov. Regni Veg.* 12: 284. 1913

(Used in Sidha. White latex suspected of being mildly poisonous for lambs and horses. Gum from the juice strongly cathartic; latex to treat warts. Infusion of root and leaves tonic and febrifuge; roots purgative, antibacterial, abortifacient, acaricidal and vermifuge. Leaves sedative, stomachic, diuretic, used to treat liver diseases, hepatitis, gastritis, salmonella, kwashiorkor and anemia; leaf paste given for stomachache. Veterinary medicine, to treat diarrhea, vaginal prolapse.)

in English: annual sowthistle, common sowthistle, false brassica, hare's lettuce, milk thistle, prickly leaved sow thistle, smooth leaves sow thistle, smooth sow thistle, sowthistle, thistle, wild thistle

in Peru: achcaña, canacho, cerraaja, eskana, kanapako, llampu-cjana

in Arabic: difef, galawein, godeid, tifef

in East Africa: apuruku, ekijwamate, ekinnyahwa, ekin-yamate, kakovu, lapuku, mahiu, orunyamate, riroria, shunga pwapwa

in Japan: no-geshi, mââfâ

in Hawaii: pualele

Maori names: pororua, puwha, puwha pororua, rauriki, tawheke, tiotio

Sonchus ustulatus Lowe

Europe.

See *Transactions of the Cambridge Philosophical Society* 4: 22. 1831 and *Botanica Macaronésica* 2: 91. 1977 [1976 publ. 1977]

(Leaves demulcent.)

in Portugal: leituga

Sonerila Roxb. Melastomataceae

From *soneri-la*, a Malayalam name used by van Rheede in *Hortus Indicus Malabaricus*. 9: t. 65. 1689, *suwarna* 'beautifully coloured' and *ila* 'leaf', referring to the leaves of *Sonerila wallichii* Benn., or from *sona* 'red' and *aralah* 'bent, curved', referring to the leaves, see *Flora Indica*; or descriptions of Indian Plants 1: 180. 1820 and *Notes from the Royal Botanic Garden, Edinburgh* 8(38): 207. 1914.

Sonerila maculata Roxb. (*Sonerila laeta* Stapf; *Sonerila rivularis* Cogn.)

China, India. Herb or small shrub, flowers pink to red

See *Monographiae Phanerogamarum* 7: 1183–1184. 1891 and *Bulletin of Miscellaneous Information Kew* 1906(3): 73. 1906

(Leaves and roots for labor pain and to facilitate delivery.)

in China: xi bian sang le cao

in India: pak soaga

Sonerila nidularia Stapf & King

Malaysia.

See *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 69: 37. 1900

(Roots decoction a postpartum remedy. Stomachache in children, burn the plant, collect the ashes and administer. Leaves for boils.)

Malay names: akar batu, kachit fatimah, serengan kerbau

Sonerila tinnelveli Fisch.

India. Erect undershrub, woody stem, fibrous spreading roots, flowers pinkish mauve, racemose axillary and terminal inflorescence

See *Kew Bulletin* 1934: 165. 1934

(Leaf extract to cure body swellings.)

in India: kalpuli

Sonneratia L.f. Sonneratiaceae (Lythraceae)

After the French (b. Lyons) botanist Pierre Sonnerat, 1748–1814 (d. Paris), explorer, draughtsman, naturalist and traveller, natural historian, colonial administrator, author of *Voyage aux Indes Orientales et à la Chine: fait par ordre du roi, depuis 1774 jusqu'en 1781. Dans lequel on traite des moeurs de la religion, des sciences & des arts des Indiens, des Chinois, des Pégouins & des Madé-gasses; suivi d'observations sur le Cap de Bonne-Espérance, les Isles de*

France & de Bourbon, les Maldives, Ceylan, Malacca, les Philippines & les Moluques, & de recherches sur l'histoire naturelle de ces 1782; see *Fam. Pl.* (Adanson) 2: 88. 1763, C. Linnaeus (filius), *Supplementum Plantarum*. 38, 252. (Apr.) 1782, Eugène Jacob de Cordemoy (1835–1911), *Flore de l'Île de la Réunion*. Paris 1895 and *La médecine extra médicale à l'Île de la Réunion*. St. Denis, Réunion 1864 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 303. 1965, Madeleine Ly-Tio-Fane, "Pierre Poivre et l'Expansion française dans l'Indo-Pacifique." *Bulletin de l'École Française d'Extrême Orient*. 53: 453–511. 1967, Madeleine Ly-Tio-Fane, *The Career of Pierre Sonnerat*. London 1973, Madeleine Ly-Tio-Fane, in *D.S.B.* 12: 535–538. 1981, Mary Gunn and Leslie E. Codd, *Botanical exploration of southern Africa*. 329–330. [b. 1745] Cape Town 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 171. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 748. 1993, *Taxon* 42: 35–41. 1993, *Acta Bot. Austro Sin.* 9: 60–62. 1994, *J. Trop. & Subtrop. Bot.* 6(1): 40–46. 1998.

Sonneratia alba Smith (*Blatti alba* Kuntze; *Blatti alba* (Sm.) Kuntze; *Chiratia leucantha* Montr.; *Sonneratia acida* Benth.; *Sonneratia acida* L.f.; *Sonneratia iriomotensis* Masam.; *Sonneratia mossambicensis* Klotzsch ex Peters; *Sonneratia mossambicensis* Klotzsch)

East Africa. Tree or shrub, single trunk, rounded crown, spreading branches, peg roots, brown bark, green opposite leaves, flowers green and red, sour fruit said to be edible, leaves camel fodder, flowers much visited by honey bees, at water's edge, mangrove swamp, shoreline, in shallow waters, in areas with a salinity close to that of sea water

See *Suppl. Pl.* 252. 1782 [1781 publ. Apr 1782], *The Cyclopaedia*; or, universal dictionary of arts, ... 33(I): *Sonneratia* no. 2. 1816, *Naturwissenschaftliche Reise nach Mossambique* ... [Peters] 6(Bot., 1): 66, t. 12. 1861, *Fl. Austral.* 3: 301. 1867, *Revis. Gen. Pl.* 1: 238. 1891 and *Trans. Nat. Hist. Soc. Formosa*, 1939, xxix. 272. 1939

(Crushed leaves used in the treatment of stomach upsets. Pound the leaves with broken rice and poultice the body for smallpox.)

in English: white-flowered Pornupan mangrove

in China: bei e hai sang

in Japan: maya-pushiki

Malayan names: berembang, gedabu, pepat, perepat

in Madagascar: farafahonko, farafaka, farahafaka, hazonkoera

in Tanzania: mlilana, mpia, mpira, mrilana, mriyana

Sonneratia apetala Buch.-Ham.

India, Myanmar. Fruits made into chutney and eaten, leaves as fodder

See *Account Embassy Kingd. Ava* ed. 1, 477 (plate). 1800 and *Acta Bot. Austro Sin.* 9: 60–62. 1994, *J. Trop. & Subtrop. Bot.* 6(1): 40–46. 1998

(Boiled fruits toxic to fish.)

in China: wu ban hai sang

in India: keora, kerua, keruan

Sonneratia caseolaris (L.) Engl. (*Blatti acida* (L.f.) Lam.; *Blatti caseolaris* Kuntze; *Rhizophora caseolaris* L.; *Sonneratia acida* Benth.; *Sonneratia acida* L.f.; *Sonneratia caseolaris* Druce; *Sonneratia caseolaris* Engl.; *Sonneratia evenia* Blume; *Sonneratia neglecta* Blume; *Sonneratia obovata* Blume; *Sonneratia ovalis* Korth.)

SE Asia, China. Evergreen tree, fruit edible, leaves as fodder

See *Herbarium Amboinense* (Linn.) 13. 1754, *Supplementum Plantarum* 252. 1781[1782], *Encyclopédie Méthodique, Botanique* 1(2): 429–430. 1789, *Ned. Kruidk. Arch.* i. (1848) 198. 1848, *Mus. Bot.* 1(22): 337. 1851, *Fl. Austral.* 3: 301. 1867, *Revis. Gen. Pl.* 1: 238. 1891, *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1: 261. 1897 and *Rep. Bot. Exch. Cl. Brit. Isles* 1913, iii. 424. 1914, *Journal of Natural Medicines* 60(3): 264–265. 2006, *International Journal Oriental Pharmacy and Experimental Medicine* 7(3): 274–279. 2007

(Stem bark and fruits antioxidant, hemostatic, febrifuge, antinociceptive, antiparasitic and antidiarrheal, a remedy for sprains, swellings and worms. Ripe fruit used to expel intestinal parasites, worms; half-ripe fruit for coughs. Pounded leaves for hematuria, skin diseases, chicken pox and smallpox; pound the leaves with broken rice and poultice the body for chicken pox and smallpox; poultice crushed leaves with salt onto cuts, wounds, boils and bruises, and also on burns on a child.)

in English: crabapple mangrove, mangrove apple, red-flowered Pornupan mangrove

in China: hai sang

in Malaya: beremban, berembang, pedada

Sonneratia griffithii Kurz

Burma.

See Kurz, Sulpiz (1834–1878), *Preliminary report on the forest and other vegetation of Pegu*. Calcutta, 1875, *Forest flora of British Burma*. Calcutta, 1877

(For ringworm pound the root and poultice.)

in Malaya: berembang

Sophora L. Fabaceae (Sophoreae)

From the Arabian names *sophera* or *sufayra*; Linnaeus used first to describe *Sophora alopecuroides* L. (*Goebelia*

alopecuroides (L.) Bunge ex Boiss.; *Vexibia alopecuroides* (L.) Yakovlev; see Carl Linnaeus, *Species Plantarum*. 1: 373–374. 1753, *Genera Plantarum*. Ed. 5. 175. 1754, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 3: 844. 1830, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 822. Ansbach 1852 and *Phytologia* 21: 327. 1971, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. UTET, Torino 1997.

Sophora flavescens Aiton (*Sophora angustifolia* Siebold & Zucc.; *Sophora angustifolia* var. *stenophylla* Makino & Nemoto; *Sophora flavescens* fo. *angustifolia* (Siebold & Zucc.) Yakovlev; *Sophora flavescens* Aiton subsp. *angustifolia* (Siebold & Zucc.) Yakovlev; *Sophora flavescens* var. *angustifolia* (Siebold & Zucc.) Kitag.; *Sophora flavescens* var. *stenophylla* Hayata; *Sophora macrosperma* DC.; *Sophora tetragonocarpa* Hayata)

China, Taiwan. Perennial non-climbing shrub, erect, many-branched, leaves alternate, inflorescence an axillary or terminal cluster, calyx campanulate, showy yellowish unguiculate petals, free stamens, ovary tomentose, pod constricted between the seeds, on slopes, in grassland

See *Species Plantarum* 1: 373–374. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 43. 1789, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 96. 1825, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 118. 1843 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 82–83. 1913, *Flora of Japan* 598. 1931, *Lineamenta Florae Manshuricae* 293. 1939, *Novosti Sistematiki Vysshchikh Rastenii* 12: 228. 1975, *Botaničeskij Žurnal (Moscow & Leningrad)* 74: 268–271. 1989

(Toxins. Roots used for diarrhea, abdominal pain, vaginitis (trichomonas), pruritis vulvae; external use for burns.)

in English: light yellow sophora

in China: ku shen

in Tibet: sle-tres

Sophora microphylla Aiton (*Edwardsia grandiflora* var. *microphylla* (Aiton) Hook. f.; *Edwardsia microphylla* (Aiton) Salisb.; *Sophora microphylla* Meyen; *Sophora tetraptera* L.f.; *Sophora tetraptera* J.F. Miller var. *microphylla* (Aiton) Hook.f.)

New Zealand, Chile.

See *Hortus Kewensis*; or, a catalogue ... 2: 43. 1789, *Transactions of the Linnean Society of London* 9: 299. 1808,

Meyen, Franz Julius Ferdinand (1804–1840), *Reise um die Erde* 1: 407. Berlin, 1834–1835

(Leaves infusion drunk for colds and sore throats. Bark juice taken for gonorrhoea; bark infusion rubbed for skin rashes.)

in New Zealand: kowhai

Sophora mollis (Royle) Baker (*Edwardsia hortensis* Boiss. & Buhse; *Edwardsia mollis* Royle; *Edwardsia persica* Boiss. & Buhse; *Keyserlingia buxbaumii* Bunge ex Boiss.; *Keyserlingia buxbaumii* Boiss.; *Keyserlingia hortensis* (Boiss. & Buhse) Yakovlev; *Keyserlingia mollis* (Royle) Boiss.; *Sophora buxbaumii* (Bunge) B. Fedtsch.; *Sophora hortensis* (Boiss. & Buhse) Rech. f.; *Sophora mollis* Graham; *Sophora mollis* Graham & Baker; *Sophora mollis* Graham ex Baker, nom. nud.; *Sophora mollis* (Royle) Graham ex Baker; *Sophora mollis* Span.)

China, India. Perennial non-climbing shrub

See *A Numerical List of Dried Specimens* n. 5335. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* 196, pl. 32, f. 2. 1835, *Linnaea* 15: 189. 1841, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 147. 1852, *Nouveau Mémoires de la Société Impériale des Naturalistes de Moscou* 12: 77. 1860, *Flora Orientalis* 2: 629–630. 1872, *The Flora of British India* [J.D. Hooker] 2(5): 251. 1878 and *Bot. Zhurn.* 58(6): 837. 1973, *J. Nat. Prod.* 72(7): 1265–1268. 2009

(Seeds anthelmintic, antiplasmodial.)

in English: Himalayan laburnum

in China: chi guo huai

in India: arghavan, bankeinti, brisari, buna, kathi, kohen, kun, malan, peeli sakina, tarni, tilun

Sophora mollis (Royle) Baker subsp. ***griffithii*** (Stocks) Ali (*Edwardsia griffithii* (Stocks) Pilip.; *Keyserlingia griffithii* Boiss.; *Keyserlingia griffithii* (Stocks) Bunge ex Boiss.; *Keyserlingia griffithii* (Stocks) Bunge; *Sophora griffithii* Stocks; *Sophora mollis* (Royle) Baker var. *hydasypica* Baker; *Sophora mollis* (Royle) Baker var. *hydaspidis* Baker)

India. Perennial non-climbing shrub

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 147. 1852, *Flora Orientalis* [Boissier] 2: 630. 1872 [Dec 1872 or Jan 1873], *The Flora of British India* [J.D. Hooker] 2(5): 251. 1878 and *Trees & Shrubs USSR* iv. 73. 1958, *Flora of West Pakistan* 100: 27. 1977, *Acta Phytotaxonomica Sinica* 18(1): 72. 1980, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994

(Roots decoction applied to the forehead to relieve headache. Powdered seeds used to kill lice in the hair. Juice put into sore eyes.)

in India: peeli sakina

Sophora moorcroftiana (Benth.) Baker (*Astragalus moorcroftiana* Benth.; *Astragalus moorcroftianus* Graham, nom.

nud.; *Caragana moorcroftiana* Benth.; *Sophora moorcroftiana* (Benth.) Benth. ex Baker

China, Nepal, India. Perennial non-climbing shrub

See *Enumeratio Methodica Plantarum* 421. 1763, *A Numerical List of Dried Specimens* n. 5933. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* 198. 1835, *The Flora of British India* 2(5): 249. 1878

(Seed paste given to treat gastric troubles, also taken as anti-poison medicine.)

in China: sha sheng huai

in Nepal: ghansinmen

Sophora secundiflora (Ortega) Lagasca ex DC. (*Agastianis secundiflora* (Ortega) Raf.; *Agastianis secundiflora* Raf.; *Agastianis secundiflora* (Gomez-Ortega) Raf.; *Broussonetia secundiflora* Ortega; *Calia erythrosperma* Teran & Berland.; *Calia secundiflora* (Gomez-Ortega) Yakovlev; *Calia secundiflora* (Ortega) Yakovlev; *Calia secundiflora* fo. *xanthosperma* (Rehder) Yakovlev; *Calia secundiflora* (Ortega) Yakovlev subsp. *albofoliolata* Yakovlev; *Cladrastis secundiflora* Raf.; *Dermatophyllum speciosum* Scheele; *Sophora secundiflora* Lag. ex DC.; *Sophora secundiflora* fo. *xanthosperma* Rehder; *Sophora sempervirens* Engelm. ex A. Gray, nom. nud.; *Sophora sempervirens* Engelm.; *Sophora speciosa* (Ortega) Benth. ex A. Gray; *Sophora speciosa* Benth.; *Virgilia secundiflora* Cav.)

Mexico, SW USA. Perennial non-climbing tree, evergreen, fragrant pea-like violet-blue flowers, fruit a woody pod with bright red seeds

See *Nov. Rar. Pl. Descr. Dec.* 61 (t. 7). 1798 [*Hort. Matr.* 61 (t. 7). 1798], *Icones et Descriptiones Plantarum* [Cavanilles] 5: 1, t. 401. 1799, *Cat. Pl. Horti Monsp.* 148. 1813, *New Flora and Botany of North America ...* 3: 85–86. 1836, *Boston J. Nat. Hist.* 6(2): 178. 1850 and *J. Arnold Arbor.* 10: 134. 1929, *Journal of Abnormal and Social Psychology* 42: 294–309. 1947, *Southwestern Journal of Anthropology* 12: 432–436. 1956, *American Anthropologist* 59: 75–87. 1957, *American Anthropologist* 60: 156–160. 1958, *Current Anthropology* 1: 45–60. 1960, *American Anthropology* 64: 946–963. 1962, *Plains Anthropologist* 7: 125–135. 1962, *Rhodora* 70(784): 492–532. 1968, *Economic Botany* 30: 94–96. 1976, Merrill W.L., *An Investigation of Ethnographic and Archaeological Specimens of Mescalbeans (Sophora secundiflora) in American Museums*, Museum of Anthropology, The University of Michigan, Ann Arbor. 1977, *Recent Res. Pl. Sci.* (New Delhi). 7: 252–260. 1979, *Ann. Missouri Bot. Gard.* 80: 284–290. 1993, *Harvard Pap. Bot.* 7(2): 381–398. 2003

(Seeds poisonous; mescal beans capable of causing death. Ceremonial, oracular and divinatory medium, used for visions in initiatory rites.)

in English: mescal beans, mescalbean, mescalbean sophora, red beans, Texas-mountain-laurel

in Latin America: frijolito

Sophora tetraptera J. Miller (*Edwardsia grandiflora* Salisb.; *Sophora tetraptera* J.S. Muell.; *Sophora tetraptera* L.f., nom. illeg.)

New Zealand. Tree, large-leaves, bright yellow flowers hang in clusters, grey-brown hard pods

See *J. Bot.*, 54: 86. 1916

(Leaves infusion drunk for colds and sore throats. Bark juice taken for gonorrhoea; bark infusion rubbed for skin rashes.)

in English: the four wing sophora

in New Zealand: kowhai (= the Maori's word for the yellow colour of the flowers)

in Chile: pelu, pilo

in Peru: mayú, pelú, pilo

Sophora tomentosa L. (*Sophora arenicola* Nees; *Sophora havanensis* Jacq.; *Sophora littoralis* Schrader; *Sophora occidentalis* L.; *Sophora tomentosa* Drake, nom. illeg., non *Sophora tomentosa* L.; *Sophora tomentosa* Hort. ex Dippel, nom. illeg., non *Sophora tomentosa* L.; *Sophora tomentosa* subsp. *havanensis* (Jacq.) Yakovlev; *Sophora tomentosa* subsp. *occidentalis* (L.) Brummitt; *Sophora tomentosa* var. *littoralis* (Schrader) Benth.; *Sophora tomentosa* var. *occidentalis* (L.) Isely; *Sophora tomentosa* var. *truncata* Torr. & A. Gray; *Sorindeia goudotii* Briq.; *Zanthyrus paniculata* Raf.)

China. Perennial non-climbing tree, shrub or small tree, bushy, branched, leaves light green above, leaves hirsute below, flowers yellow, inflorescence terminal, calyx greenish-yellow, mature pods dark green to brown strongly moniliform, along edge of mangroves, on sand ridge, beach, coastal

See *Species Plantarum* 1: 373–374. 1753, *Systema Naturae*, Editio Decima 2: 1015. 1759, *Enumeratio Systematica Plantarum* 20. 1760, *Genera Nova Madagascariensia* 23. 1806, *Flora* 4: 297. 1821, *New Flora and Botany of North America ...* 3: 84. 1836[1838], *A Flora of North America*: containing ... 1(3): 389. 1840, *Flora Brasiliensis* 15(1B): pl. 124. 1862, *Journal de Botanique* (Morot) 5: 21. 1891, *Handbuch der Laubholzkunde* 3: 663. 1893 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 20: 423. 1916–18, *Kirkia* 5: 265–266. 1966, *Proc. Ceylon* 1: 439. 1980, *Ann. Missouri Bot. Gard.* 67: 766. 1980, *Mem. New York Bot. Gard.* 25(3): 253. 1981, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Taxon* 41: 570. 1992, *Annals of the Missouri Botanical Garden* 80: 284–290. 1993

(Toxins, all parts of plant bitter. Roots and seeds very bitter, a remedy for cholera; roots antidote. Seeds purgative; powdered seeds against colic, cholera, dysentery and hemorrhage of the lungs. Leaves or chewed seeds as an external antidote for bites of poisonous fishes; seeds as an antidote after having

eaten poisonous marine animals. Leaves emetic, cathartic, purgative, soporific, toxic in large doses; leaf paste applied on chest in cough. Bark and twigs used as a fish poison.)

in English: coast sophora, sea-coast laburnum, silverbush

in East Africa: mbaazi-mwitu, mnuka-vundo, mpingo

in Madagascar: ambotrimorona, firitsoka, fotsiavadikaranto, latapiso, manganrava, tsipolahina

in Brazil: caquera

in India: moodoomoroonga, mudumurunga, pantangkul

in Indonesia: kaju pebawar, matas kutjing, upas bidji

in Japan: ikaki, iso-fuji

Malayan names: ki-koetjing, pelotok

in Philippines: bangil, baraumaran

in Pacific: kau ni alewa

Sopubia Buch-Ham. ex D. Don Scrophulariaceae (Orobanchaceae)

Probably from a native Indian or Nepalese name, or an anagram of *Bopusia* Presl (Scrophulariaceae); see David Don (1799–1841), *Prodromus Florae Nepalensis*, sive enumeratio Vegetabilium quae ... Ann. 1802–1803 detexit atque legit F. Hamilton (*olim* Buchanan). 88. London 1825.

Sopubia delphinifolia G. Don (*Gerardia delphiniifolia* L.; *Sopubia delphiniifolia* (L.) G. Don)

Sri Lanka. Herb, corolla pink

See *Cent. Pl.* II. 21. 1756, *Companion Bot. Mag.* 1: 204. 1 Feb 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 509, 514. 1846, *Naturwiss. Reise* 6(Bot.): 229. 1862

(Astringent.)

Sopubia simplex (Hochst.) Hochst. (*Raphidophyllum simplex* Hochst.)

Tropical Africa. Herb, erect, woody-based, slender, ribbed, pink-purple flowers

See *Flora* 24: 666–667. 1841, *Flora* 27: 27. 1844

(Juice as an eyewash for conjunctivitis.)

Sorbaria (Ser.) A. Braun Rosaceae

Referring to *Sorbus* L., see *Prodr.* (DC.) 2: 545. 1825 [Nov 1825], *Fl. Brandenburg* 1: 177. 1860.

Sorbaria tomentosa (Lindl.) Rehder (*Schizonotus tomentosus* Lindl.)

China, Nepal.

See *New Flora and Botany of North America* ... 3: 74–75. 1836[1838], *Botanical Register*; consisting of coloured ... 26: Misc., 71. 1840 and *Journal of the Arnold Arboretum* 19(1): 74. 1938

(Seed juice given for liver troubles. Root decoction for fever and biliousness.)

in India: mamari

in Nepal: kantakari

Sorbus L. Rosaceae

Latin *sorbus*, *sorbi* ‘true sorb, service tree’, *Sorbus domestica* L.; *sorbium* for the fruit of the *sorbus*, a sorb-apple, sorb, service-berry; see Carl Linnaeus, *Species Plantarum*. 477. 1753, *Genera Plantarum*. Ed. 5. 213. 1754 and S. Battaglia, *Grande dizionario della lingua italiana*. XIX: 478. 1997.

Sorbus americana Marsh. (*Aucuparia americana* (Marshall) Nieuwl.; *Pyrus americana* (Marsh.) DC.; *Pyrus microcarpa* (Pursh) Spreng.)

North America. Tree or shrub, perennial

See *Arbustrum Americanum* 145. 1785, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 637. 1825 and *American Midland Naturalist* 4: 175. 1915

(Infusion of inner bark tonic, analgesic, expectorant, sedative, nervine, taken for colds; poultice of burned bark for boils.)

in English: American mountain ash

Sorbus aucuparia L. (*Pyrus aucuparia* (L.) Gaertn.; *Sorbus adsharica* Gatsch.; *Sorbus aucuparia* L. var. *xanthocarpa* Hartwig & Rümpler; *Sorbus bachmarensis* Gatsch.; *Sorbus boissieri* C.K. Schneid.; *Sorbus boissieri* var. *adsharica* Sosn.; *Sorbus boissieri* var. *bachmarensis* Sosn.; *Sorbus caucasigena* Kom. ex Gatsch.)

North America. Tree or shrub, perennial

See *Dendrologie* 1: 188. 1869 and *Watsonia* 19: 169–171. 1993, *Nordic J. Bot.* 19(5): 547–559. 1999

(Leaves infusion taken as an emetic, for pneumonia, diphtheria, croup.)

in English: European mountain ash

Sorbus decora (Sarg.) C.K. Schneid. (*Pyrus americana* (Marshall) DC. var. *decora* Sarg.; *Pyrus decora* (Sarg.) Hyland; *Sorbus americana* var. *decora* (Sarg.) Sarg.)

North America. Tree or shrub, perennial

See *The Silva of North America* 14: 101. 1902, *Manual of the Trees of North America* 357. 1905, *Bulletin de l'Herbier Boissier*, sér. 2, 6(4): 313. 1906, *Rhodora* 45(529): 28. 1943

(Astringent, stomachic.)

in English: northern mountain ash, showy mountain ash

Sorbus foliolosa (Wall.) Spach (*Pyrus foliolosa* Wall.; *Pyrus foliolosa* var. *ambigua* Cardot; *Pyrus wallichii* Hook. f.; *Sorbus foliolosa* Spach; *Sorbus wallichii* (Hook. f.) T.T. Yu; *Sorbus wallichii* (Hook.f.) H. Ohashi)

India, Himalaya, Nepal. Tree, edible fruits

See *Numer. List* [Wallich] n. 677. 1829, *Plantae Asiaticae Rariores* (Wallich) 2: 81. 1831, *Histoire Naturelle des Végétaux. Phanérogames* (Spach) 2: 96. 1834, *The Flora of British India* [J.D. Hooker] 2(5): 376–377. 1878 and *Flora Reipublicae Popularis Sinicae* 36: 329–330. 1974, *Fl. E. Himalaya* 3rd. Rep.: 53. 1975, *Taxon* 29: 355–357. 1980, *J. Cytol. Genet.* 23: 219–228. 1988

(Fruits said to be toxic.)

in China: ni po er hua qui

in India: kyans, salau

Sorbus scopulina Greene

North America. Tree or shrub, perennial

See *Pittonia* 4(22C): 130. 1900

(Fruits eaten to alleviate thirst and fatigue. Bark tonic, febrifuge, used for fevers. Leaves and twigs drunk for tuberculosis and coughs.)

in English: Greene mountain-ash, Greene's mountain ash, mountain ash

Sorbus sitchensis M. Roem. (*Pyrus sitchensis* (M. Roem.) Piper; *Sorbus americana* var. *sitchensis* (M. Roem.) Sudw.)

North America. Tree or shrub, perennial

See *Familiarum Naturalium Regni Vegetabilis Monographicae* 3: 139. 1847 and *Mazama* 2(2): 107. 1901, *Checklist of Forest Trees of U.S.* 133. 1927

(Infusion of root and branch bark drunk for rheumatism, stomachache. Berries insecticide.)

in English: Sitka mountain ash

Sorbus sitchensis M. Roem. var. ***grayi*** (Wenz.) C.L. Hitchc. (*Sorbus occidentalis* (S. Watson) Greene; *Sorbus sambucifolia* var. *grayi* Wenz.; *Sorbus sitchensis* subsp. *grayi* (Wenz.) Calder & Roy L. Taylor)

North America. Tree or shrub, perennial

See *Familiarum Naturalium Regni Vegetabilis Monographicae* 3: 139. 1847, *Botanisches Centralblatt* 35: 342. 1888 and *Mazama* 2(2): 107. 1901, *Checklist of Forest Trees of U.S.* 133. 1927, *Vascular Plants of the Pacific Northwest* 3: 189. 1961, *Canadian Journal of Botany* 43(11): 1395. 1965, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 18–22. 1998

(Berries mashed and rubbed on the head for lice.)

in English: western mountain ash

Sorghastrum Nash Poaceae (Gramineae)

From the genus *Sorghum* Moench and *astrum*, a Latin substantial suffix indicating inferiority or incomplete resemblance, related to *Sorghum*, type *Sorghastrum avenaceum* (Michx.) Nash, see *Species Plantarum* 1: 78, 82. 1753, *Species Plantarum* 2: 1045, 1047. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Transactions of the Linnean Society of London* 10: 302. 1811, *Fundamenta Agrostographiae* 187. 1820, *Flora Brasiliensis seu Enumeratio Plantarum* 341. 1829, C.S. Rafinesque, *Seringe Bull. Bot.* 1: 221. 1830 [also *Bulletin Botanique, Genève*], *Nomenclator Botanicus. Editio secunda* 1: 518. 1840 and Nathaniel Lord Britton (1859–1934), *Manual of the Flora of the northern States and Canada*. 71. New York 1901, *Flora of Tropical Africa* 9: 111. 1917, E.D. Merrill, *Index Rafinesquianus*. 76. 1949, *University of California Publications in Botany* 23(6): 324. 1950, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 447–508. 1969, *Journal of Heredity* 75: 196–202. 1984, *Taxon* 35: 195–196. 1986, *Iheringia, Série Botânica* 36: 3–13. 1987, *Annals of the Missouri Botanical Garden* 74: 432–433. 1987, Patricia Dolores Davila Aranda, “Systematic revision of the genus *Sorghastrum* (Poaceae: Andropogoneae).” 175, 185. [Ph.D. Thesis] Ames, Iowa: Iowa State University 1988, *Bothalia* 21(2): 163–170. 1991, *Australian Systematic Botany* 4: 591–635. 1991, *Iheringia, Série Botânica* 42: 25–54. 1992, *Annals of the Missouri Botanical Garden* 81(4): 768–774. 1994, *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: 1–178. 1994, *Flora Mesoamericana* 6: 382–383. 1994, *Contributions from the United States National Herbarium* 46: 214, 542, 594–598. 2003.

Sorghastrum minarum (Nees) Hitchc. (*Andropogon minarum* (Nees) Kunth; *Chrysopogon minarum* (Nees) Benth.; *Chrysopogon stipoides* Trin.; *Sorghum minarum* (Nees) Hack.; *Sorghum nutans* subvar. *minarum* (Nees) Roberty; *Stipa penniglumis* Trin.; *Trachypogon minarum* Nees) (Brazil, Minas Gerais)

Paraguay, Bolivia, Brazil to northern Argentina. Annual or perennial, caespitose or scattered, leaf blades acuminate, hairy inflorescence, oblong panicle erect, spikelets cylindrical, callus pungent, awns geniculate with twisted column, growing in dry areas, fields, campos

See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 349. 1829, *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 77. 1830, *Révision des Graminées* 2(33): 507. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint-Petersbourg. Sixième Série. (Seeds diuretic.)

in Brazil: capim açu

Sorghum Moench Poaceae (Gramineae)

The Italian *sorgo*, *soricum*, *surgus*, *suricum* (12th century), *surico* (10th century), from the spoken Latin *suricum granum* 'grain from Syria', from Suria, a variation of Syria. Stock poisoning, cyanogenic, the young and wilted leaves are particularly poisonous, *Sorghum* contains hydrocyanic acid and the alkaloid hordenine, some species may accumulate toxic amounts of nitrate, varieties differ considerably in HCN poisonings; the whole *Sorghum* taxonomy status still under discussion, taxonomy of the cultivated species is extremely complicated, hybrids with *Saccharum* L., type *Sorghum bicolor* (L.) Moench. See *Species Plantarum* 2: 1045, 1047. 1753, *Familles des Plantes* 2: 38, 606. 1763, Conrad Moench (1744–1805), *Methodus plantas horti botanici et agri Marburgensis a staminum situ describendi*. 207. 1794–1802, *Descriptio Graminum in Gallia et Germania* 28–29. 1802, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *Flora of Tropical Africa* 9: 105, 111. 1917, *Bulletin of Miscellaneous Information Kew* 1935(5): 222. 1935, *Hook. (Used in Ayurveda, Unani and Sidha. Stock poisoning, cyanogenic, the young and wilted leaves are particularly poisonous; immature plants may accumulate toxic amounts of nitrate. *Sorghum* can contain a cyanogenic glycoside that can produce HCN during times of stress or if damaged by frost or mastication. Seed decoction to facilitate childbirth; *Ipomoea obscura* leaves macerated with seeds of *Sorghum vulgare*, ground in buttermilk and the paste applied for furuncles. Stems contain sweet juice, sap made into a very sweet syrup, inflorescence astringent and haemostatic, decoction of the seed demulcent and diuretic; flour given in loose motions. Veterinary medicine, flour fed to animals for dysentery.)

(Pollen can cause hay fever, may accumulate toxic to lethal concentrations of nitrate. Sudan grass can have an HCN potential after damage to the plant.)

in English: broom corn, chicken corn, red kaffir corn, shallu, Sudan grass, sugar millet, sugar reed, sugar sorghum, sweet cane, sweet reed, sweet sorghum, white kaffir corn, wild grain sorghum

in Spanish: pasto Sudan

in Angola: masambala

in Southern Africa: anaguaskoorn, besemkoring, kaffer-koring, witkafferkoring, rooikafferkoring, soetriet, suikerriet, wilde graansorghum, kiepiemannakoring, opblaasgras, Soedangras; imfe (Zulu); nabele (Ndebele); mapfunde (Shona)

in Philippines: batag, bukakau, layagah

in Thailand: ya-sudan

Sorindeia Thouars Anacardiaceae

From the Madagascan vernacular name for *Sorindeia madagascarensis* Thouars ex DC., or from the Greek *soros* 'a heap' and India; see *Genera Nova Madagascariensia* 23. 1806, *Annales des Sciences Naturelles* (Paris) 2: 338–339. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 80. 1825, *Gen. Pl.* [Bentham & Hooker f.] 1(1): 423. 1862, *Rev. Anacard.* 167. 1869 and *Bull. Herb. Boissier*, sér. 2, 1(6): 549–587. 1901, *Annuaire Conserv. Jard. Bot. Genève* 11/12: 35–135. 1908, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 597. Basel 1996, *Adansonia*, sér. 3 19(2): 329–330. 1997, *Adansonia* sér. 3, 25(1): 93–113. 2003.

Sorindeia grandifolia Engl. (*Sorindeia acutifolia* Engl.; *Sorindeia claessensii* De Wild.; *Sorindeia ledermannii* Engl. & K. Krause; *Sorindeia longipetiolulata* Engl. & Brehmer; *Sorindeia mildbraedii* Engl. & Brehmer; *Sorindeia pro-tioides* Engl. & K. Krause; *Sorindeia reticulata* Engl. & Brehmer; *Sorindeia schroederi* Engl. & K. Krause; *Sorindeia schweinfurthii* Engl.; *Sorindeia warneckei* Engl.; *Sorindeia zenkeri* Engl.)

Tropical Africa. Shrub or small tree, erect, woody vine, creeping, cauliflorous, bark with white latex, small pinkish white flowers, green to orange fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11(Beibl. 26): 6–7. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 220–221. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 335–337. 1911, *Bulletin du Jardin Botanique de l'État* 4: 370. 1914, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 309–311. 1917

(Roots and stem for diabetes, painful menstruation, venereal diseases, hysteria, madness.)

Sorindeia madagascariensis Thouars ex DC. (*Aglaia somalensis* Chiov.; *Bursera acutifolia* Sieber; *Mangifera pinnata* Desr.; *Rhus vernix* L.; *Sorindeia elongata* Blume; *Sorindeia glaberrima* Engl.; *Sorindeia glaberrima* Hassk.; *Sorindeia goudotii* Briq.; *Sorindeia heterandra* Marchand; *Sorindeia madagascariensis* DC.; *Sorindeia madagascariensis* Baill.; *Sorindeia obtusifoliolata* Engl. var. *obtusifoliolata*; *Sorindeia pinnata* Desf.; *Sorindeia usambarensis* Engl.; *Toxicodendron vernix* (L.) Kuntze; *Toxicodendron vernix* Kuntze)

Tanzania. Evergreen tree, leaves compound, flowers bright yellow in hanging branched heads, male and female flowers separate, yellow fruits in drooping clusters, soft edible pulp, fleshy sweet ripe fruits eaten raw, bee forage, riverine vegetation, coastal forests

See *Species Plantarum* 1: 200, 265–267. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1*. 1754, *Species Plantarum*, Editio Secunda 1: 471. 1762, *Encyclopédie Méthodique, Botanique* 3: 697. 1789, *Genera Nova Madagascariensis* 23. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 80. 1825, *Tableau de l'École de Botanique* 3: 331. 1829, *Museum Botanicum* 1: 1–396. 1841, *Catalogus Plantarum in Horto Botanico Bogoriensi Cultarum Alter* Alt.: 245. 1844, *Museum Botanicum* 1: 205. 1850, *Rev. Anacardiac.* 166–167. 1869, *Flora Brasiliensis* 12(12): 392. 1876, *Abhandlungen der Preussischen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 1894: 44. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 244. 1895 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 11/12: 35–135. 1908, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 51: 204. 1916, *Annuaire du Conservatoire et Jardin Botaniques de Genève* 20: 423. 1916–18, *Flore de Madagascar et des Comores* 114: 63–82. 1946, *Le Naturaliste Canadien* 111: 447–449. 1984, Gayer, K.D., Burnett, J.W. “*Toxicodendron dermatitis*.” *Cutis* 42: 99–100. 1988, *Adansonia* sér. 3, 19(2): 329–330. 1997

(The sap of *Rhus vernix* contains the allergen urushiol. The chemical is released when plant tissue is damaged. Humans are highly sensitive to allergic reaction, although at least one exposure is needed for sensitization. Mild to severe dermatitis

can result from exposure to poison sumac. Roots used for tuberculosis, schistosomiasis and menstrual problems.)

in English: poison sumac

in Kenya: mkunguma, mkunguruli, msanzanza, mtunguma, mundaraha, mwebebe, nyambembe

in Tanzania: chambula, luhagalanguku, mdarako, mgoda, mgweda, mhilihili, mkunguma, mkungwina, mkwingwina, mlakungu, mndaraho, mng'wang'wa, mpakasi, mpilipili, mpilipili doria, msigisi, msugwe, msungwi, msurupi, mtikiza, mtunguma, muzingilizi, ngomighaa

Soroseris Stebb. Asteraceae

Greek *soros* ‘a heap, mound’ and *seris*, *seridos* ‘chicory, lettuce’, referring to the dwarf habit of the plant, see *Species Plantarum* 2: 805–808. 1753 and *Mem. Torrey Bot. Club* xix. No. 3, 27. 1940, *Taxon* 41: 561. 1992, *Taxon* 44: 611–612. 1995, *Bot. Zhurn.* (Moscow & Leningrad) 92(11): 1753. 2007.

Soroseris erysimoides (Handel-Mazzetti) C. Shih (*Crepis gillii* S. Moore var. *erysimoides* Handel-Mazzetti; *Soroseris hookeriana* (C.B. Clarke) Stebbins subsp. *erysimoides* (Handel-Mazzetti) Stebbins; *Soroseris hookeriana* (C.B. Clarke) Stebbins subsp. *erysimoides* (Handel-Mazzetti) Stebbins)

See *J. Bot.* 37: 170. 1899 and *Acta Horti Gothoburgensis* 12(9): 355–356. 1938, *Mem. Torrey Bot. Club* 19(3): 41, 44–46. 1940, *Acta Phytotax. Sin.* 31(5): 444–445. 1993

(Used for treating fractures.)

in China: kong tong shen

in Tibetan: srol-gong dkar-po/sngon-po

Soroseris hookeriana (C.B. Clarke) Stebbins (*Crepis hookeriana* Ball; *Crepis hookeriana* C.B. Clarke, nom. illeg.; *Crepis hookeriana* Oliv. & Hiern, nom. illeg.; *Soroseris hookeriana* Stebbins, *Soroseris hookeriana* subsp. *typica* Stebbins)

Himalaya.

See *J. Bot.* 11: 371. 1873, *Compositae Indicae* 255. 1876, *Flora of Tropical Africa* [Oliver et al.] 3: 450. 1877 and *Memoirs of the Torrey Botanical Club* 19(3): 45. 1940, *Trav. Inst. Sci. Univ. Mohammed V, Sér. Bot.* 35: 1–168. 1988

(Aerial parts used for wounds, fever and bone fractures.)

in Bhutan: srol-gong-ser-po

Souroubea Aubl. Marcgraviaceae

See *Species Plantarum* 1: 503. 1753, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 2, 17. 1760, *Histoire des plantes de la Guiane Française* 1: 244, t. 97. 1775, *Introductio ad Historiam Naturalem* 236. 1777, *Exposition des Familles Naturelles* 2: 355. 1805, *Prodromus Florae Novae Hollandiae* 454. 1810 and *Rec. (Leaves decoction sedative and tranquilizer, for hysteria, madness, fear.)

Souroubea pachyphylla Gilg

Colombia.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(3, Beibl. 60): 33. 1898

(Dried leaves as an ointment applied to the eyes in cases of infection, conjunctivitis.)

Soymida A. Juss. Meliaceae

Somida is a Telugu name for *Soymida febrifuga* A. Juss., from *swami* ‘god’, see *Genera Plantarum* 263. 1789, *Mémoires du Muséum d’Histoire Naturelle Paris*. 19: 250–251. 1830.

Soymida febrifuga (Roxb.) A. Juss. (*Soymida febrifuga* Juss.)

India. Tree, grey-black bark, paripinnate leaves crowded towards the ends of the branches, flowers greenish white in large terminal or axillary panicles, capsule woody reddish purple, winged seeds, in dry deciduous forests

See *Mém. Mus. Paris*. 19: 251. t. 22. f. 26. 1830 and *Taxon* 30: 513–514. 1981

(Used in Ayurveda, Unani and Sidha. Leaf powder mixed with butter and taken orally for lactation. Root decoction abortifacient. Bark decoction for malaria, menstrual problems, stomachache, arthritis, joint swelling, pain, weakness, dysentery, diarrhea, fever, cold, applied externally to remove blood clots from wounds; extract of bark along with bark extract of *Radermachera xylocarpa* given as antidote and emetic in snakebite, and also in stomachache; powdered bark of *Soymida febrifuga* and leaves of *Pergularia daemia* mixed with sheep milk and applied for bone fracture; extract of bark of *Wattakaka volubilis* with barks of *Soymida febrifuga* and *Ficus benghalensis* taken for bone fracture; stem bark extract applied locally as an antidote for scorpion poison, or the extract given internally for the same purpose; bark extract given for stomach pain and malaria; bark powder given for urinary problems; pounded bark paste applied on cheeks in toothache; crushed or powdered bark kept in home to control pests. Gum helpful in blood pressure and malaria. Veterinary medicine, bark crushed with water and administered for cough and dysentery; stem bark mixed with roots of *Calotropis gigantea* made into a paste and applied on eye and bandaged for opacity of cornea; crushed bark mixed with that of *Madhuca longifolia* applied on sprained parts of cattle.)

(Medicinal value.)

in English: marsh grass, marshy cordgrass, salt marsh cord grass, salt-meadow cord grass, salt meadow hay

in Colombia: esparto

in Mexico: retana

Spartium L. Fabaceae (Genisteae)

Greek *spartion* (*sparton*) ‘a small cord’, a kind of grass or plant used for weaving and cordage, Latin *spartum* or *sparton* for a plant originally growing in Spain, of which ropes and mats were made; see Carl Linnaeus, *Species Plantarum*. 2: 708–709. 1753 and *Genera Plantarum*. Ed. 5. 317. 1754.

Spartium junceum L.

Europe, Mediterranean. Perennial non-climbing shrub

See *Species Plantarum* 2: 708. 1753 and *Regnum Veg.* 127: 90. 1993

(Toxic. Dried flowers smoked for asthma.)

in English: broom absolute, Spanish broom, weaver’s broom

in Arabic: kessaba, tertakh, ratam

in China: ying zhua dou

Spathanthem Schott Araceae

From the Greek *spathe* and *anthos* ‘flower’, referring to the spadix adnate to the spathe, inflorescence epiphyllous; see D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Spathanthem orbignyanum Schott (*Gamochlamys heterandra* Baker; *Spathanthem heterandrum* (Baker) N.E. Br.)

Peru to NW. Argentina.

See *Bonplandia (Hannover)* 7: 165. 1859

(Antidote.)

in English: snake’s potato

in Bolivia: katari papa

Spathiphyllum Schott Araceae

Greek *spathe* and *phyllon* ‘a leaf’, referring to the leaflike spathe; see *Meletemata Botanica* 22. 1832, *Gard. Chron.* ser. 2, 7: 139. 1877, *Monogr. Phan.* [A. DC. & C. DC.] 3: 227–228. 1879 and *Pflanzenr.* (Engler) IV. 23B(Heft 37): 120. 1908, *Taxon* 16: 514. 1967, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, *Aroideana* 15: 21. 1992 (publ. 1993).

Spathiphyllum cochlearispathum (Liebm.) Engl. (*Hydnostachyon cochlearispathum* Liebm.; *Hydnostachyon longirostre* Liebm.; *Massowia heliconiifolia* (Schott) K. Koch; *Massowia lanceolata* K. Koch; *Spathiphyllum heliconiifolium* Schott; *Spathiphyllum lacustre* Lundell; *Spathiphyllum lanceolatum* (K. Koch) K. Koch; *Spathiphyllum liebmannii* Schott; *Spathiphyllum longirostre* (Liebm.) Schott)

Mexico.

See *Contr. Univ. Michigan Herb.* 6: 4. 1941

(Leaves crushed and poulticed on swellings and warts. Sap of the stem poisonous.)

Spathiphyllum floribundum (Linden & André) N.E. Br. (*Amomophyllum floribundum* (Linden & André) Engl.; *Anthurium floribundum* Linden & André; *Spathiphyllum floribundum* var. *cuneatum* Engl.)

Colombia to N. Peru.

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 828. 1829, *Meletemata Botanica* 22. 1832, *L'illustration horticole* 24: 24, t. 159. 1874, *Gardener's Chronicle & Agricultural Gazette* 2: 783. 1878 and *Allergy*. 52(1): 114–115. 1997, *Contact Dermatitis*. 42(6): 369–370. 2000

(Irritant.)

in English: spathe flower

Spathiphyllum friedrichsthalii Schott (*Massowia friedrichsthalii* (Schott) K. Koch; *Spathiphyllum fendleri* Schott; *Spathiphyllum friedrichsthalii* var. *angustifolium* Engl.; *Spathiphyllum friedrichsthalii* var. *brevifolium* Engl.; *Spathiphyllum friedrichsthalii* var. *latifolium* Engl.)

Central America, Mexico, Colombia.

See *Aroideae* 1: 2, t. 4. 1853, *Bonplandia* (Hannover) 4: 11. 1856 and *Mem. N.Y. Bot. Gard.* 10: 35. 1960

(Leaves roasted, placed over infected areas of the skin.)

Spathiphyllum kochii Engl. & K. Krause

Colombia.

See *Pflanzenr.*, (Engler) Arac.-Monster. IV, 23B: 123. 1908

(Irritant, vesicant.)

Spathiphyllum wallisii Regel (*Spathiphyllum wallisii* hort., nom. inval.)

Colombia to Venezuela.

See *Gardener's chronicle*, new series 1: 558. 1875, *Gartenflora* 26: 323, t. 920. 1877 and *Allergy*. 50(2): 174–178. 1995, Kanerva L., Estlander T., Petman L., Mäkinen-Kiljunen S. "Occupational allergic contact urticaria to yucca (*Yucca aloifolia*), weeping fig (*Ficus benjamina*), and spathe flower (*Spathiphyllum wallisii*)."
Allergy 56(10): 1008–1011. 2001

(Occupational contact urticaria, allergy, contact dermatitis and rhinoconjunctivitis, burning of lips, tongue and throat.)

in English: spathe flower

Spathodea P. Beauv. Bignoniaceae

From the Greek *spathe* 'spathe' and *-odes* 'resembling, of the nature of', referring to the calyx; see Ambroise Palisot de Beauvois (1752–1820), *Flore d'Oware et de Benin en Afrique*.

1: 46–47. Paris 1805 and *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Flora Neotropica* 25(2): 1–370. 1992, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000.

Spathodea campanulata P. Beauv. (*Bignonia tulipifera* Thonn.; *Spathodea campanulata* Buch.-Ham. ex DC.; *Spathodea campanulata* subsp. *nilotica* (Seem.) Bidgood; *Spathodea danckelmaniana* Büttner; *Spathodea nilotica* Seem.; *Spathodea tulipifera* (Thonn.) G. Don)

East Africa. Tree or a shrub, rounded compact crown, bark smooth and rough, wood soft and light, short branches, leaves compound, leaflets leathery, inflorescences erect, large trumpet-shaped crimson or flame-red flowers in clusters, woody capsules splitting on the ground, a slightly disagreeable odour, seed said to be more or less edible

See *Species Plantarum* 2: 622–625. 1753, *Flore d'Oware et de Benin en Afrique*. 1: 47–48, t. 27, 28. 1805, *Det Kongelige Danske Videnskabernes Selskabs Naturvidenskabelige og Mathematisk Afhandlinger* 4: 47. 1829, *A General History of the Dichlamydeous Plants* 4: 223. 1838, *Journal of Botany, British and Foreign* 3: 333. 1865, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 31: 87. 1890 and *Journal of Ethnopharmacology* 8: 257–263, 265–277. 1983, *Planta Medica* 54(2): 122–125. 1988, *Phytotherapy Research* 4(2): 53–56. 1990, *Phytomedicine* 6(1): 45–49. 1999, *Journal of Ethnopharmacology* 70: 281–300. 2000

(Stem and leaves antidote, febrifuge, wound dressing, for constipation, gastrointestinal disorders, fevers. Bark insecticide, arachnicide, used for liver complaints, diarrhea, dysentery, edema, venereal diseases, fever and in the treatment of infant skin rash; bark sap for cutaneous problems and subcutaneous parasitic infection; extracts of bark, leaves and flowers used to treat malaria, schistosomiasis, HIV, diabetes mellitus, edema, dysentery, gastrointestinal disorders, ulcers, skin diseases, wounds, fever, urethral inflammation, liver complaints and as a poison antidote. Magico-religious beliefs, ritual, superstitions.)

in English: African tulip tree, Akuakuo's tears, flame of the forest, flame tree, fountain tree, Nandi flame, Nile flame, Nile tulip tree, scarlet bell, tulip tree, Uganda flame

in French: baton du sorcier, tulipier d'Afrique, tulipier du Gabon

in Benin: adada, orourou, oruru, owewe, vikissè

in Burkina Faso: asrélé, assien, biébié biébié, boro, missibo-iri, sinséré, tiéré, zéblé zébré, zibli

in Burundi: umuzenga

in Cameroon: bamileke, bobori, bwele ba mbongo, bwèle ba mbonji, essoussouk, essussuk, etoto, etutu, evovone, evovonne, mafouk, mbako, mbelele, mvouley, todouk, toduk

in Sierra Leone: a-leop-a-ro-bath, baine, dumentili, dundunturi, dununtinidi, gele-go, gobane, ngele-gowo, ngele-gwe, ta gboyo, toambo, toambo-lembi

in Tanzania: kifabakazi

in Togo: adadase, adatsigolo, dadassé, datsigolo, dudu, gbetachi-gbetschi

in Uganda: chemungwa, ekifurafura, ekinyara, etukubai, kichubi, kifabakazi, kijubu, kikussu, lapengwata, opal, mungobe, munyara, omudungudungu, omunyara

in Upper Volta: missiboiri

in Yoruba: oruru, owewin

in Indonesia: bunga merah

in Japan: kaen-boku

Malayan names: panchit, panchut panchut

Spathoglottis Blume Orchidaceae

Greek *spathe* and *glotta* 'tongue', referring to the mid-lobe of the lip; see Karl Ludwig von Blume, *Bijdragen tot de*

flora van Nederlandsch Indië. 400. (Sep.–Dec.) 1825 and B. Lewis and Phillip Cribb, *Orchids of Vanuatu*. Royal Botanic Gardens, Kew 1989, B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville*. Royal Botanic Gardens, Kew 1991.

Spathoglottis plicata Blume (*Bletia angustifolia* Gaud.; *Calanthe poilanei* Gagnep.; *Paxtonia rosea* Lindl.; *Phaius rumphii* Blume; *Spathoglottis angustifolia* (Gaudich.) Benth. & Hook.f.; *Spathoglottis augustorum* Rchb.f.; *Spathoglottis daenikeri* Kraenzl.; *Spathoglottis deplanchei* Rchb.f.; *Spathoglottis lilacina* Griff.; *Spathoglottis plicata* var. *minahassae* Schltr.; *Spathoglottis rosea* (Lindl.) G.Nicholson; *Spathoglottis spicata* Lindl.; *Spathoglottis vieillardii* Reichb.f.)

Trop. & Subtrop. Asia to W. Pacific. Terrestrial tall orchid, pink flowers in racemes

See *Bijdragen tot de flora van Nederlandsch Indië* 8: 401, t. 76. 1825 and *Repert. Spec. Nov. Regni Veg.* 21: 180. 1925, *Bull. Mus. Natl. Hist. Nat.*, II, 22: 625. 1951

(Hot leaves poultice applied for rheumatism and pains in the joints; leaves decoction for rheumatism.)

in English: Malayan ground orchid, Philippine ground orchid

in Japan: kô-tô-shi-ran (named for Kô-tô-shô Isl., Taiwan)

Malay name: wah

in the Solomon Islands: laulau ngwane, molamola, tongoruha

in Vanuatu: evére

Spatholobus Hassk. Fabaceae (Leguminosae, Phaseoleae)

From the Greek *spathe* and *lobos* 'a pod', referring to the nature of the pod; see Justus Carl Hasskarl (1811–1894), *Flora*. 25(2) (Beibl.): 52. 28 Sep. 1842 and *Reinwardtia* 10(2): 139–205. 1985, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992.

Spatholobus acuminatus Benth.

Malaya, Burma. Woody climber, small bright red flowers in axillary panicles, silky pubescent membranous pods

See *Plantae Junghuhnianae* 2: 238. 1852

(Root used in venereal diseases; extract of crushed and boiled roots given as a postpartum remedy.)

Spatholobus ferrugineus (Zoll. & Moritzi) Benth. (*Spatholobus ferrugineus* Benth.)

Indonesia. Perennial climbing shrub, liane

See *Plantae Junghuhnianae* 2: 238. 1852

(To relieve itch, sap from tender young stem rubbed on bites and stings.)

in Indonesia: aka kelese

Spatholobus parviflorus (DC.) Kuntze (*Butea parviflora* Roxb.; *Butea parviflora* DC.; *Butea parviflora* Roxb. ex DC.; *Butea sericophylla* Wall., nom. nud.; *Spatholobus parviflorus* (Roxb.) Kuntze; *Spatholobus parviflorus* (Roxb.) Hu; *Spatholobus roxburghii* Benth.; *Spatholobus roxburghii* var. *denudatus* Baker; *Spatholobus roxburghii* var. *platycarpus* Baker)

SE Asia, India, Burma. Perennial non-climbing tree or shrub, woody, climbing, seed oil edible

See *Species Plantarum*. Editio quarta 3(2): 917. 1802, *A Numerical List of Dried Specimens* n. 5441. 1830, *Flora Indica*; or, descriptions of Indian Plants 3: 248–249. 1832, *Plantae Junghuhnianae* 2: 238. 1852, *Revisio Generum Plantarum* 1: 205. 1891 and *Journal of the Arnold Arboretum* 5(4): 228. 1924, *Reinwardtia* 10: 187. 1985

(Used in Sidha. Gum with sugar given for body pain, arthritis. Bark for toothache and gum troubles; fresh bark decoction given in digestive problems, dropsy, worms, bowel complaints, diarrhea, dysentery, and as an antidote in snakebite. Root used in venereal diseases; extract of crushed and boiled roots given as a postpartum remedy. Stem decoction taken for stomachache and blood circulation; leaves extract of *Knema linifolia* with stem juice of *Spatholobus roxburghii* taken for dysentery; stems and leaves boiled with *Dicranopteris* and liquid applied to broken bone as analgesic. Pounded stems as a fish poison.)

in India: anaippichan, athambu, athambuvalli, attampu, bamdu, bandan, bando, bandu, bandunari, bendo, bodegateega, chihut lar, dumoridhouka, dumri-dhouka, durang, gobang lata, hallot, hati bandhalata, jermei, kadavaare hambu, kallavudu, khontopolaso, mahai, mahula, mal leo, mala, malini, malleo, maloi-lewa, mari, mari-lewa, maribata, maributa, maru, maru lewa, maula, maulu, mauri, modugatige, moru, mudugathige, mukkataballi, mukkatapalli, mukcate balli, mukcateballi, mukkatiballi, mula, murdhabel, murrd, naayivaada, nayivada, noipolaso, noivada, palsa, panlota, peccikatamba, phalsan, pichikatamba, pichikathamba, pilacchi valli, pilacchivalli, pillachavalli, plashivalli, sallata, salmama, senari, tetrobrik, ther-la-moh-dak, ther lamohdak, timano, tou-mudru, yanaitatippu

Malay names: pongpong, popong

in Nepal: debre lahara, debrelara, debrelawa, madane, mahai, sal lahara

Spenceria Trimen Rosaceae

After the English botanist Spencer Le Marchant Moore, 1850–1931 (d. near London), plant collector, explorer, 1872–1879 Kew Herbarium, 1875 Fellow of the Linnean Society, 1880 appointed assistant at British Museum, 1891–1892 to Brazil (Matto Grosso Expedition), 1894–1896 to Western

Australia, his writings include “Six new South African plants.” *J. Bot., Lond.* 43: 169–173. 1905, “New or noteworthy South African plants.” *J. Bot., Lond.* 40: 380–385. 1902, “The genus *Pleiotaxis* Steetz.” *J. Bot., Lond.* 63: 43–50. 1925 and “The genus *Lopholaena* DC.” *J. Bot., Lond.* 67: 274–276. 1929, co-author of volume seven of *Flora of Jamaica* by William Fawcett and Alfred B. Rendle, editor of John Byrne Leicester Warren (1835–1895), *The flora of Cheshire*. 1899, 1877–1879 assistant editor of the *Journal of botany*. See *Journal of Botany, British and Foreign* 17(196): 97–98, pl. 201. 1879 and G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 169. London 1904, Alfred Barton Rendle (1865–1938) et al., “Catalogue of the Plants collected by Mr. and Mrs. P.A. Talbot in the Oban District of South Nigeria.” *British Museum Trustees, Natural History*. [Spencer Le Marchant Moore was co-author.] London 1913, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, E.D. Merrill, in *Bernice P. Bishop Mus. Bull.* 144: 138. 1937 and *Contr. U.S. Natl. Herb.* 30(1): 216–220. 1947, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 510. 1965, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 498. 1994.

Spenceria ramalana Trimen

China.

See *Journal of Botany, British and Foreign* 17(196): 97–98, pl. 201. 1879

(Antimycobacterial, antiinflammatory, emetic and diuretic. Leaves for tapeworm.)

in China: ma ti huang

Spenceria ramalana Trimen var. *parviflora* (Stapf) Kitamura (*Spenceria parviflora* Stapf)

China.

See *J. Bot.* 17: 97. 1879 and *Bot. Mag.* 149: t. 9007. 1923, *Acta Phytotax. Geobot.* 15: 172. 1953

(Antimycobacterial, stomachic, antiinflammatory and diuretic. Leaves for tapeworm.)

in China: xiao hua ma ti huang

Spergularia (Pers.) J. Presl & C. Presl Caryophyllaceae

Referring to *Spergula* L.; see Jan Swatopluk Presl (1791–1849) and K. Presl, *Flora Chechica*. 94. Prague 1819.

Spergularia media (L.) C. Presl (*Arenaria glandulosa* Jacq.; *Arenaria marginata* DC.; *Arenaria media* L.; *Lepigonum marginatum* var. *glabra* L.; *Lepigonum marginatum* var. *glandulosa* Fenzl; *Spergula maritima* (All.) Pedersen; *Spergularia glandulosa* var. *glabrifolia* Fenzl; *Spergularia glandulosa* var. *glandulosa* Gaertn.; *Spergularia marginata*

(DC.) Kitt.; *Spergularia maritima* Chiov.; *Spergularia media* (L.) C. Presl ex Griseb.)

Europe. Herb

See *Species Plantarum* 1: 440–441. 1753, *Species Plantarum*, Editio Secunda 1: 606–607. 1762, *Flora Sicula* (Presl) 1: 161. 1826, *Spicilegium florum rumelicarum et bithynicarum* ... 1: 213. 1843

(Whole plant aqueous extract applied as antiinflammatory.)

in Chile: hierba del pasmo

in China: yuan chi ni qi gu

Spermacoce L. Rubiaceae

Greek *sperma* ‘a seed’ and *akoke* ‘a point’, referring to the fruits; see Carl Linnaeus, *Species Plantarum*. 1: 102. 1753, *Genera Plantarum*. Ed. 5. 44. 1754, *Familles des Plantes* 2: 145. 1763, *Histoire des plantes de la Guiane Française* 1: 180–182, t. 69. 1775, *American monthly magazine and critical review* 1: 442. 1817, *Primitiae Florae Essequeboensis* ... 79, 81, t. 1. 1818, *Systema Vegetabilium*, editio decima sexta 1: 366, 404. 1824, *Beskrivelse af Guineiske planter* 74–75. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 343, 538, 565, 574. 1830, *Flora* 16(2): 690. 1833, *Sylva Telluriana* 146. 1838, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 3: 509. 1845, *Tentamen Florae Abyssinicae* 1: 348. 1848, *Genera Plantarum* 2: 143. 1873, *Fl. Trop. Africa* 3: 240. 1877, *Flora Brasiliensis* 6(6): 29–30. 1888, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 454. 1897, *Revisio Generum Plantarum* 3(3): 123. 1898 and *Contributions from the United States National Herbarium* 18(3): 122. 1916, *Bulletin du Jardin Botanique de l'État* 22: 75. 1952, *Kew Bulletin* 1957: 386. 1958, *Flora de la Provincia de Buenos Aires* 4(5): 342–375. 1965, *Kew Bull.* 30(2): 366. 1975, *Plant Systematics and Evolution* 149: 89–118. 1985, *Taxon* 35: 363–369. 1986, *Journal of Economic and Taxonomic Botany* 20: 639–644. 1996, *Boissiera* 55: 1–322. 1998, *Monographs in Systematic Botany from the Missouri Botanical Garden* 73: 1–177. 1999, *Memoirs of the New York Botanical Garden* 85: i–ix, 1–246. 2000, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 2206–2284. 2001, Harwood, R. & Dessein, S. “Australian Spermacoce (Rubiaceae: Spermacoceae. I. Northern Territory.” *Australian Systematic Botany* 18: 297–365. 2005, *Blumea* 51(2): 199–220. 2006.

Spermacoce alata Aubl. (*Borreria alata* (Aubl.) DC.) (*Borreria* G. Meyer, after the British (b. Henfield) botanist William J. Borrer, the Elder, 1781–1862 (d. Henfield, Sussex), horticulturist, traveller, plant collector, 1835 Fellow of the Royal Society, 1805 Fellow of the Linnean Society. See G.F.W. Meyer (1782–1856), *Primitiae florum essequeboensis*. 79, t. 1. Gottingae 1818 and J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 224. 1965.)

South America.

See *Hist. Pl. Guiane*: 60. 1775

(Root juice given to treat malarial fever.)

in Nepal: ursing

Spermacoce articularis L.f. (*Borreria articularis* (L.f.) F.N. Williams; *Spermacoce flexuosa* Lour.; *Spermacoce hispida* auct.; *Spermacoce longicaulis* R.Br. ex G. Don; *Spermacoce ramosissima* R. Br. ex Wall., nom. nud.; *Spermacoce scabra* Willd.)

Tropical & Subtropical Asia. Common prostrate spreading herbs with purplish flowers, leaves famine food

See *Supplementum Plantarum* 119. 1781 and *Bulletin de l'Herbier Boissier*, sér. 2, 5: 956. 1905, *New Botanist* 2: 88–90. 1975, *Taxon* 32: 140. 1983, *Cytologia* 52: 343–356. 1987, *J. Ethnopharmacol.* 92(2–3): 263–267. 2004 [Evaluation of antioxidant and nitric oxide inhibitory activities of selected Malaysian medicinal plants.]

(Used in Ayurveda and Sidha. Root decoction alterative, a mouthwash in toothache; roots made into a paste and given for stopping childbirth; root inserted into the ear in delayed delivery. Seeds stimulant, astringent, demulcent, used for diarrhea and dysentery. Leaf juice astringent, antioxidant, antiseptic, for hemorrhoids, scabies, skin diseases, conjunctivitis, headache and for the dressing of wounds and ulcers; paste from crushed leaves applied to stop bleeding from cuts.)

in English: shaggy button weed

in India: agio, bikram-pata, ganthiu, gatbhanjan, ghanti-chi-bhaaji, ghanthiu, guthari, kharsatshankhlo, madana-banta-katu, madana ghanti, madanaghanti, madan-ghanti, nathaichoori, phlang-bhoi, satgathiyaa, sollo gonti, sologumtia

Spermacoce chaetocephala DC. (*Borreria chaetocephala* (DC.) Hepper; *Borreria chaetocephala* var. *minor* Hepper; *Borreria compacta* (Hochst. ex Hiern) K. Schum.; *Borreria hebecarpa* Hochst. ex A. Rich.; *Borreria kotschyana* (Oliv.) K. Schum.; *Spermacoce compacta* Hochst. ex Hiern; *Spermacoce hebecarpa* (Hochst. ex A. Rich.) Oliv.; *Spermacoce hebecarpa* var. *major* Hiern; *Spermacoce kotschyana* Oliv.)

Tropical Africa.

See *Tent. Fl. Abyss.* 1: 347. 1848, *Trans. Linn. Soc. London* 29: 88–89. 1873 and *Kew Bulletin* 14: 256. 1960

(Used externally for the treatment of skin diseases.)

Spermacoce filifolia (Schumach. & Thonn.) J.-P. Lebrun & Stork (*Borreria filifolia* (Schumach. & Thonn.) K. Schum.; *Octodon filifolium* Schumach. & Thonn.; *Spermacoce filifolia* Perr. & Lepr. ex DC.)

Tropical Africa. Erect, slender, glabrous herb, simple or branched, weedy, flowers crowded at upper nodes, famine food

See *Beskrivelse af Guineiske planter* 74–75. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 94. 1828, *Nova Genera et Species Plantarum seu Prodrromus* 4: 540. 1830, *Die Natürlichen Pflanzenfamilien* 4(4): 144. 1891 and *Kew Bulletin* 39: 778. 1984

(To mitigate the effect of hunger.)

Spermacoce hispida L. (*Borreria articularis* var. *hispida* (L.) Sivar. & Manilal, nom. inval.; *Borreria hispida* (L.) K. Schum., nom. illeg.; *Spermacoce avana* R.Br. ex G. Don; *Spermacoce mutilata* Blanco; *Spermacoce rigida* Salisb., nom. illeg.)

Tropical & Subtrop. Asia, Sri Lanka. Many-branched prostrate perennial herb, hispid

See *Species Plantarum* 1: 102. 1753, *Gen. Hist.* 3: 621. 1834, *Fl. Filip.*, ed. 2: 43. 1845, *Flora Brasiliensis* 6(6): 62. 1888, *Die Natürlichen Pflanzenfamilien* IV(4): 144. 1891 and *Int. Quart. J. Pl. Sci. Res.* 2: 89. 1975, *J. Ethnopharmacol.* 11: 59–77. 1984, *Phytomedicine* 10: 115–121. 2003, *Food. Chem.* 102: 938–953. 2007, *J. Appl. Biomed.* 6: 165–176. 2008

(Used in Ayurveda. Plant antioxidant, contraceptive, hypolipidemic, acrid, stomachic, astringent, emollient; vapor of the plant inhaled to kill tooth worms. Paste of roots for infertility. Leaves decoction astringent, for piles, diarrhea, dysentery; leaf paste applied on head to have cooling effect. Seed extract a remedy for the treatment of hypertension, internal injuries of nerves and kidney, it can remove signs of old age, purify blood.)

in English: shaggy button weed

in India: bukah, gedo, ghamtachi-bhaji, kotalccurukki, madana, madanabadu, madanabudata, madanaghanti, madanagrandhi, madanagranthi, maiteballi, megidda, modina, nathai choori, nattacuri, nattaicuri, nattaichuri, tartaval, thaarthaaval, thaarthaaval pacha, thathara, vasukah

Malay name: rumput anak temot, rumput sulawa, rumput sumbro

in Philippines: landrina

Spermacoce laevis Lam. (*Borreria laevis* (Lam.) Griseb.; *Spermacoce assurgens* Ruiz & Pav.; *Spermacoce capitellata* Willd. ex Roem. & Schult.; *Spermacoce echioides* Kunth; *Spermacoce guianensis* Bremek.; *Spermacoce riparia* Cham. & Schltdl.; *Spermacoce tenuior* L.; *Tardavel laevis* (Lam.) Standl.)

Trop. & Subtrop. America. Herb

See *Tableau Encyclopédique et Méthodique... Tropical and Subtrop. America. Small shrub, bushy subshrub, leaves papery, small white flowers, calyx green, corolla and anthers white, fruit a drupe dry and dehiscent, small dark seeds, Australian *Spermacoce* species display various types of elaborate petals, common in exposed waste places

See *Species Plantarum* 1: 102. 1753, *Primitiae Florae Essequeboensis* ... 79, 83, t. 1. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 541–542. 1830, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 11(1): 129–130. 1844, *Biologia Centrali-Americana*; ... *Botany* ... 2(7): 58–60. 1881 and *Proceedings of the American Academy of Arts and Sciences* 45(17): 410. 1910

(Antieczema, diuretic and abortifacient. Juice from the aerial parts applied for the treatment of skin diseases; paste of flowers and flower buds with water applied as ointment on cuts and wounds. Herb decoction for heat, fever, colds, diabetes, stomachache, malaria.)

in English: button weed, white broom, white head broom, wild margaret

African names: buruku, damfark'ami, feshe, gudurdel, irawo ile, samtarde, som som

in India: cavinai, ganthiyu

in Thailand: chat sam chan, ya khi kratai

Spermadictyon Roxb. Rubiaceae

From the Greek *sperma* and *diktyon* 'a net', referring to the nature of the seeds, see *Plants of the Coast of Coromandel* 3: 32. 1815.

Spermadictyon suaveolens Roxb. (*Hamiltonia suaveolens* (Roxb.) Roxb.)

China, India, Pakistan. Spreading shrub, pale bluish flowers

See *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Pl. Coromandel* 3: 32, t. 236. 1815, *Flora Indica*; or descriptions of Indian Plants 2: 223. 1824

(Plant used for wound healing. Root paste or powder given in diarrhea and dysentery; root paste given to women after menstruation to prevent conception. Veterinary medicine, bark paste given to treat cough in animals.)

in India: mahabal, mahabel, tribasan

in Nepal: khidand

Sphaeralcea A. St.-Hil. Malvaceae

Globe mallow, from the Greek *sphaira* and *alcea* 'mallow', in reference to the globular fruit; Latin *alcea*, *ae* for *Malva alcea* L. (Plinius); see Auguste François César Prouvençal de Saint-Hilaire (1779–1853), *Flora Brasiliae Meridionalis*. 163. Parisii 1825, *Linnaea* 11: 352. 1837 and Antonio Krapovickas (born 1921), "Las especies de *Sphaeralcea* de Argentina y Uruguay." *Lilloa*. 17: 179–222. 1949, Lloyd Herbert Shinnors (1918–1971), "Three New Varietal Names in *Sphaeralcea* (Malvaceae)." *Sida* 1: 384–385. 1964.

Sphaeralcea ambigua A. Gray (*Sphaeralcea ambigua* A. Gray subsp. *ambigua*; *Sphaeralcea ambigua* A. Gray var. *ambigua*; *Sphaeralcea ambigua* var. *keckii* Munz; *Sphaeralcea macdougalii* Rose & Standl.; *Sphaeroma ambiguum* Kuntze; *Sphaeroma ambiguum* (A. Gray) Kuntze)

North America. Perennial herb or subshrub

See *Proceedings of the American Academy of Arts and Sciences* 22(2): 292. 1887, *Revisio Generum Plantarum* 1: 74. 1891 and *Contributions from the United States National Herbarium* 16(1): 13–14, pl. 5. 1912, *Bulletin of the Southern California Academy of Sciences* 31(2): 68. 1932, *Sida* 15: 639–647. 1993

(Antiemetic, cathartic, stomachic, antirheumatic, spasmolytic. Leaves decoction taken for colds. Root infusion taken as contraceptive, for birth control, abortifacient; root decoction taken for venereal diseases and stomachache. Veterinary medicine, whole plant boiled and applied to cuts on horses.)

in English: apricot globemallow, apricot mallow, desert globemallow, desert mallow

Sphaeralcea ambigua A. Gray subsp. *ambigua* (*Sphaeralcea ambigua* A. Gray var. *ambigua*)

North America. Perennial herb or subshrub

See *Proceedings of the American Academy of Arts and Sciences* 22(2): 292. 1887, *Revisio Generum Plantarum* 1: 74. 1891 and *Contributions from the United States National Herbarium* 16(1): 13–14, pl. 5. 1912, *Bulletin of the Southern California Academy of Sciences* 31(2): 68. 1932, *Sida* 15: 639–647. 1993

(Antiemetic, cathartic, stomachic, antirheumatic, spasmolytic. Leaves decoction taken for colds. Root infusion taken as contraceptive, for birth control, abortifacient; root decoction taken for venereal diseases and stomachache. Veterinary medicine, whole plant boiled and applied to cuts on horses.)

in English: apricot globemallow, apricot mallow, desert globemallow, desert mallow

Sphaeralcea angustifolia (Cav.) G. Don (*Malva angustifolia* Cav.; *Malva longifolia* Sessé & Moc.; *Malva stellata* D. Dietr.; *Malva stellata* (Torr. & A. Gray) D. Research 8: 1–177. 1988, *Journal of Cytology and Genetics* 33(2): 201–205. 1998

(Used in Ayurveda. Plant deodorant, alterative, vermifuge, chewed as a stomachic, also used in urethral discharges and blenorrhagia. Leaves and tops decoction taken as stomachic and for venereal diseases. Pounded leaves, with seeds of black cumin (*Nigella sativa* L.), rubbed upon the gums to relieve toothache.)

in India: atakkamaniyan, coti-munti, hapusa, mahamundi, mahasravani, mundi, mundirika, murmuria, srawani

in Indonesia: kamandhin, sembung gantung

in Malaysia: gelang liat lembu

in Philippines: botobotonis, botobotonisan, malasambong-damo, palpalsuut, sambong-gala, talababako, talatabako

in Thailand: kaarabuun, phak khraat hua waen, ra-ngap

in Vietnam: b[oj] x[is]t, ch[uw]n v[ij]t

Sphaeranthus amaranthoides Burm. f.

Sri Lanka, India.

See *Flora Indica* ... nec non *Prodromus Florae Capensis* 186. 1768

(Used in Ayurveda and Sidha.)

in India: amutakarantai, cekilacitacceti, cekilacitam, cevay-akkarantai, cevayam, ceyavalli, cittakanni, civakamikacceti, civakamikam, civakarantai, civakkarunti, civamakitacceti, civamatikam, civanmutivacikkanni, civappukki, civappukkicceti, civaralanankai, curaikkarantai, curakkarantai, kankalamuli, kankalanmuli, kayvaciyacceti, kayvaciyam, kolumpuccivakarantai, konaicuticceti, konraicuti, kulattatikam, kulatti, kunatti, maiyaltarumakamuli, marukkam, mulaicci, nalnari, narakarantai, narakkaranantai, narukarantai, narunkarantai, pallatarini, parimalamuli, parimalatimuli, parimali, peyotati, peyotaticceti, piracitta, pokkumulaicci, siva karanthai, tevankolacceti, tevankolam, tirunilakantacceti, tirunilakantan, tivanantamanmuli, vattirapancakacceti, vattirapancakam, vencitam, vicuvanatacceti, vicuvanatam, vitaiyurti, vitaiyurticceti, yonippu

Sphaeranthus bullatus Mattf.

Tanzania. Herb, decumbent, creeping, flowers reddish purple

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 290. 1936

(Leaves decoction used to treat stomach problems, asthenia; whole plant decoction for retained placenta. Veterinary medicine.)

in Kenya: masonzoia

in Tanzania: olkipire lekima, orkipinelekimar, orkipire le kima

Sphaeranthus gomphrenoides O. Hoffm.

Tanzania. Herb, weakly-stemmed, flowers reddish purple

(Boiled leaves for diarrhea, dysentery.)

in Kenya: mûconjoiya

Sphaeranthus indicus L. (*Sphaeranthus hirtus* Willd.; *Sphaeranthus indicus* Gaertn.; *Sphaeranthus indicus* Kurz; *Sphaeranthus mollis* Roxb. ex DC.; *Sphaeranthus mollis* Roxb.)

India. Herb, aromatic, sweet scented, sticky, glandular on most parts, stem with toothed wings, inflorescence a globose-ellipsoid head purple, involucre bracts whitish, fruit an achene, seedlings used as vegetable, red essential oil, along ditches, a weed

See *Species Plantarum* 2: 927. 1753, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 2395. 1803, *Hort. Bengal.* 62. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 369. 1836, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 46(2): 183. 1877 and *Nucleus* 18: 6–19. 1975, *Taxon* 30: 78. 1981, *Taxon* 31: 576–579. 1982, *Cell and Chromosome Research* 7: 26–28. 1984, *Glimpses in Plant Research* 8: 1–177. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Journal of the Indian Botanical Society* 68: 395–396. 1990, *Regnum Veg.* 127: 90. 1993, *Journal of Cytology and Genetics* 33(2): 201–205. 1998

(Used in Ayurveda, Unani and Sidha. Whole plant made into a paste along with seed paste of *Psoralea corylifolia* and *Azadirachta indica* applied in leucoderma; dried flowering plants powdered and taken orally to develop sexual vigour; plant juice in gastric troubles and toothache; plant infusion given as blood purifier and anthelmintic; young twigs used as a potherb in stomach disorders. Inflorescence made into a paste with water and applied on forehead to treat migraine. Leaves and flowers decoction used for cooling effect. Roots antibacterial, tonic, astringent, laxative, alterative, depurative, anthelmintic, employed against skin diseases, dysentery, itches and urinary problems; powdered roots for stomachache and piles; powdered roots of *Sphaeranthus indicus* boiled in *Sesamum indicum* oil and massaged on male sex organs for erection. A paste of the stem and leaves given in fever; leaves eaten to cure eye diseases, inflamed eyes. Seeds and roots anthelmintic. Used as pesticide, insecticide and abortifacient. Fruits poisonous to fishes; whole plant as fish poison. Magico-religious beliefs, a traditional remedy through plant wreath, stem hang as an amulet on the left arm of a woman to stop bleeding after childbirth; a garland made of the flowers put round the neck of smallpox patient.)

in English: East Indian globe thistle, Indian globe thistle

Sphaeranthus senegalensis DC. (*Sphaeranthus lecomteanus* O. Hoffm. & Muschl.; *Sphaeranthus senegalensis* Vaill.)

From Africa to Australia, SW China, Nepal, India. Herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 370. 1836 and *Bulletin de la Société Botanique de France* 57(Mém. 8): 114. 1910, *Compositae Newsletter* 20/21: 12–15. 1992, *Journal of Ethnopharmacology* 78(1): 33–37. 2001, *Journal of Ethnopharmacology* 84(2–3): 169–173. 2003, *Journal of Ethnopharmacology* 95(2–3): 173–176. 2004

(Antidiarrheal, sedative, analgesic, antiinflammatory and anti-nociceptive, used as a remedy for rheumatic pains and other ailments.)

in India: gorkmundi

in Nepal: bonsupari, ganhuwa

Sphaeranthus ukambensis Vatke & O. Hoffm.

Kenya. Shrub, suberect, prostrate, corollas pinkish purple, eaten by cattle, sheep, goats, camels and donkeys

See *Species Plantarum* 2: 927. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 228. 1894

(Used for abdominal pains, jaundice, drink infusion with fresh milk.)

in Kenya: lomeskin, musonzoia

Sphaeropteris Bernh. Cyatheaceae

From the Greek *sphaira* 'a globe' and *pteris* 'fern'; see Heinrich Adolph Schrader, *Journal für die Botanik*. 1800(2): 122, t. 1(1). (Oct.-Dec.) 1801.

Sphaeropteris aterrima (Hook.) R.M. Tryon (*Alsophila aterrima* Hook.; *Cyathea aterrima* (Hook.) Domin)

Tropical America. Tree fern

See *Mémoires de l'Académie Royale des Sciences* 5: 416. 1793, *Prodromus Florae Novae Hollandiae* 158. 1810, *Synopsis Filicum* 38. 1866 and *Pteridophyta* 262. 1929, *Contributions from the Gray Herbarium of Harvard University* 200: 20. 1970, *Economic Botany* 40(3): 339–352. 1986, *Fl. Ecuador* 27: 17–59. 1986

(To reduce swelling of bruises woolly material around apical meristem applied on the skin.)

in Central America: sinamolaskuka

Sphaerostephanos J. Sm. Thelypteridaceae

Greek *sphaira* 'a globe' and *stephein* 'to crown', *stephanos* 'a crown', referring to the shape of the indusium; see W.J. Hooker, *Genera Filicum*. t. 24. 1839.

Sphaerostephanos subtruncatus Holttum (*Sphaerostephanos subtruncatus* (Bory) Holttum)

India.

See *Kew Bull.* 26: 80. 1971, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 33: 25–26. 2001

(Rhizome antibacterial.)

Sphaerostephanos unitus (L.) Holttum (*Aspidium cucullatum* Blume; *Aspidium unitum* (L.) (Roots febrifuge.)

in India: mamiri

Sphallerocarpus Besser ex DC. **Apiaceae (Umbelliferae)**

Greek *sphaleros* ‘slippery’ and *karpos* ‘fruit’.

Sphallerocarpus gracilis (Besser ex Treviranus) Koso-Poljansky (*Chaerophyllum gracile* Besser ex Treviranus; *Sphallerocarpus cyminum* Besser ex DC.)

See *Bull. Soc. Imp. Naturalistes Moscou*, n.s. 29: 202. 1916 [1915]

(This species has reputed medicinal value.)

in China: mi guo qin

Sphenocentrum Pierre Menispermaceae

From the Greek *sphen* ‘wedge’ and *kentron* ‘a spur, prickle’, see *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 1: 79. 1898 and *Bulletin du Jardin Botanique National de Belgique* 53(12): 17–66. 1983, *African Journal of Biomedical Research* 5: 77–79. 2002, *Ethnobotany Research & Applications* 3: 73–77. 2005.

***Sphenocentrum jollyanum* Pierre**

Tropical Africa, Nigeria, Ghana. Herb, evergreen, dioecious, shrub, erect from woody base, inner bark bright yellow, pulvini dark green, leaves with yellowish midrib below, small cream flowers axillary, fleshy orange edible ellipsoid drupes, in rainforest

See *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 1: 79. 1898 and *Phytochemistry* 15(12): 2027. 1976, *Nigerian Journal of Natural Products and Medicine* 2: 52–53. 1998, *Pharmaceutical Biology* 40(5): 342–345. 2002, *African Journal of Biomedical Research* 7: 129–132. 2004, *Journal of Ethnopharmacology* 104(1–2): 87–91. 2006, *Fitoterapia* 79(3): 220–222. 2008

(Stem bark aphrodisiac, analgesic, antioxidant, antiangiogenic, antiinflammatory, antipyretic, antinociceptive, stomachic, antitumour, antiviral, emetic and purgative, general tonic, a wound-healing agent. Fruits and seeds anthelmintic. Roots used as an aphrodisiac, to strengthen the penis, to stimulate appetite and relieve chest pains and cough; pounded roots taken to treat high blood pressure, applied to treat breast tumours, tropical ulcers.)

in English: red medicine

in Benin: oban abe

in Ghana: adurukokoo, kraman-kote (= dog’s penis)

in Ivory Coast: ouse-abe

in Nigeria: ajo, ijo, obanabe

in Yoruba: akerejupon pupa, obalabi, obanabe, ogbalagbe

Sphenoclea Gaertner Sphenocleaceae **(Campanulaceae)**

From the Greek *sphen* and *kleio* ‘to shut, enclose’, referring to the dehiscence of the fruit or to the shape of the capsule; see Joseph Gaertner, *De fructibus et seminibus plantarum*. 1: 113. 1788 and *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 2426–2427. 2001

Sphenoclea zeylanica Gaertn. (*Gaertnera pongati* Retz.; *Pongatium indicum* Lam.; *Pongatium spongiosum* Blanco; *Pongatium zeylanicum* (Gaertn.) Kuntze; *Rapinia herbacea* Lour.; *Reichelia palustris* Blanco; *Sphenoclea pongatium* A. DC.)

India, Sri Lanka. Herb, erect, hollow, weedy, terrestrial, sometimes partially submerged, fibrous roots, flowers densely crowded in a terminal spike, corolla whitish, pinkish or purplish, fruit a 2-valves capsule, young plants laticiferous, leaves and the young shoots eaten as vegetables, invasive

See *De Fructibus et Seminibus Plantarum*... 1: 113, pl. 24, f. 5. 1788, *Revisio Generum Plantarum* 2: 381. 1891 and *Field Mus. Nat. Hist., Bot. Ser.* 13(6/2): 383–489. 1937, *Fl. Ecuador* 14: 171–174. 1981, *Journal of Cytology and Genetics* 19: 117. 1984

(Used in Sidha. Leaves in a poultice against the stings of venomous animals and to cure the ulcers; leaves juice abortifacient.)

in English: chickenspike, gooseweed, hollowstem, marshy silk cotton, wedgewort

in India: aedi kannu, cakulati, calapippili, calatippili, calipip-pili, calitippali, calitippili, callippilaiyam, carata, cavap-pippili, chitramoolam koduveri, cirakenta, ciyatanimaci, jalapippili, jhill-mirich, kaccatam, nandu kannu, nirppippili, nirtippali, pongati

in Philippines: mais-mais, silisilihan

Sphenodesme Jack Lamiaceae **(Symphoremataceae, Verbenaceae)**

From the Greek *sphen* ‘wedge’ and *desme* ‘a bundle’, referring to the flowers, see *Malayan Miscellanies* 1(1): 19. 1820.

Sphenodesme involucrata (Presl) Robinson (*Sphenodesme involucrata* B.L. Rob.; *Symphorema unguiculata* Kurz; *Vitex involucratus* C. Presl, also *involucrata*)

China (Guangdong) to W. Malesia. Shrub, climbing, hairs simple and stellate, slender branchlets, leaf blade narrowly elliptic to ovate, involucre bracts oblanceolate, flowers in pubescent panicles, calyx tomentose

See *Species Plantarum* 2: 638 [as "938"]. 1753, *Plants of the Coast of Coromandel* 2: 46. 1805, *Malayan Miscellanies* 1(1): 19. 1820, *Forest Flora of British Burma* 2: 255. 1877, *Botanische Bemerkungen* 148. 1884 and *Proc. Amer. Acad. Arts* 51: 531. 1916

(Roots vermifuge, antibacterial, used in the form of powder or decoction against abdominal disorders, ear diseases, worms and burns.)

in English: involucre sphenodesme

in China: zhua xie chi teng

in India: mazhamulla, varshiki

Sphenodesme racemosa (C. Presl) Moldenke var. *racemosa* (*Congea barbata* Wall., nom. inval.; *Sphenodesme barbata* Schauer; *Sphenodesme borneensis* Merr.; *Sphenodesme ferruginea* (Griff.) Briq.; *Sphenodesme ferruginea* Briq.; *Sphenodesme ferruginea* Wight, nom. inval.; *Sphenodesme winkleri* Hallier f.; *Viticastrum racemosum* C. Presl)

Malesia.

See *Numer. List* [Wallich] 1788. 1829, *Abhandlungen der königlichen Böhmisches Gesellschaft der Wissenschaften* V, 3: 578. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 623. 1847, *Icon. Pl. Ind. Orient.*: t. 1474, err. 1849, *Notulae ad Plantas Asiaticas* 4: 176. 1854, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(3a): 181. 1895 and *J. Straits Branch Roy. Asiat. Soc.* 76: 114. 1917, *Meded. Rijks-Herb.* 37: 86. 1918, *Revista Sudamericana de Botánica* 10: 229. 1956, *Gard. Bull. Singapore* 21(3): 352 (–353; t. 9). 1966

(Leaves for rheumatism.)

Sphenomeris Maxon Lindsaeaceae (Dennstaedtiaceae, Lindsaeoideae)

Greek *sphen* 'wedge' and *meris* 'a part, portion', alluding to the segments of the fronds; see *Mémoires sur les Familles des Fougères* 5: 325, 326. 1852 and William Ralph Maxon (1877–1948), in *Journal of the Washington Academy of Sciences*. 3: 144. 1913.

Sphenomeris chinensis (L.) Maxon (*Adiantum chinense* Burm. f.; *Adiantum chusanum* L.; *Adiantum tenuifolium* Lam.; *Davallia chinensis* (L.) Sm.; *Davallia chinensis* Sm.; *Davallia chusana* Willd.; *Davallia chusana* (L.) Willd.; *Davallia tenuifolia* Sw.; *Davallia tenuifolia* (Lam.) Sw.; *Hymenophyllum ramosissimum* Buch.-Ham. ex D. Don; *Lindsaea chinensis* (L.) Mett. ex Kuhn; *Lindsaea chinensis* Mett. ex Kuhn; *Lindsaea chinensis* Ching; *Microlepia chinensis* (L.) Mett.; *Odontosoria chinensis* (L.) J. Sm.;

Odontosoria chusana (L.) Masam.; *Odontosoria tenuifolia* (Lam.) J. Sm.; *Sphenomeris chinensis* Maxon; *Sphenomeris chusana* (L.) Copel.; *Stenoloma chinense* (L.) Bedd.; *Stenoloma chusana* (L.) Ching; *Stenoloma chusanum* (L.) Ching; *Stenoloma tenuifolium* (Lam.) Fée; *Trichomanes chinense* L.)

China, India. Fern, red dye

See *Species Plantarum* 2: 1095–1096. 1753, *Flora Indica ... nec non Prodromus Florae Capensis* 236. 1768, *Mém. Acad. Roy. Sci.* (Turin) 5: 414. 1793, *Journal für die Botanik* 1800(2): 88. 1801, *Species Plantarum*. Editio quarta [Willdenow] 5(1–2): 475. 1810, *Prodromus Florae Nepalensis* 12. 1825, *Mémoires sur les Familles des Fougères* 5: 330. 1852, *Cultivated Ferns* 67. 1857, *The Botany of the Voyage of H.M.S. ~Herald~* 430. 1857, *Filices Africanae* 67. 1868, *Handbook to the Ferns of British India* 70. 1883 and *Journal of the Washington Academy of Sciences* 3(5): 144. 1913, *Bernice P. Bishop Museum Bulletin* 59: 69–70. 1929, *Sinensia* 3(12): 337. 1933, *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 4: 67. 1934

(Plant paste applied to treat wounds. Leaves in chronic gastro-enteritis, diarrhea, cholera, dysentery.)

in Nepal: sano unyu

Sphenopholis Scribner Poaceae (Gramineae)

Greek *sphen* and *pholis*, *pholidos* 'scale, horny scale', referring to the shape of upper glume, linked to *Trisetum*, see *Syn. Pl.* 1: 97. 1805, *Révision des Graminées* 2: 341, t. 84. 1830, *Ordines Naturales Plantarum* 305. 1830, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 66. 1830, *Reliquiae Haenkeanae* 2(1): 13, t. 49, f. 2. 1831, *Der Deutsche Botaniker Herbarienbuch* 1(2): 149. 1841, *Histoire Naturelle des Végétaux* 13: 163. 1841 and *Rhodora* 8(92): 142, 144. 1906, *Iowa State College Journal of Science* 39(3): 259–336. 1965, *Bulletin of the Torrey Botanical Club* 92(3): 169–182. 1965, *Index Kewensis* 13: 33. 1966, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* 1–1008. 1968, *Anderson's Flora of Alaska and Adjacent Parts of Canada* 1–724. 1974, *Agrociencia* 71: 71–102. 1988, *Flora of the Yukon Territory* 1–669. 1996, *Contributions from the United States National Herbarium* 48: 237, 602, 614–617. 2003.

Sphenopholis intermedia (Rydb.) Rydb. USA. Perennial, tufted, open habitats or shady, shores, meadows, damp slopes

See *Catalogus plantarum horti botanici monspeliensis* 117. 1813, *A Flora of the Northern and Middle Sections of the United States* 1: 117. 1823, *Fl. New York* 2: 469. 1843, *A Manual of the Botany of the Northern United States* 591. 1848, *Synopsis Plantarum Glumacearum* 1: 224. 1854, *A Manual of the Botany of the Northern United States. Second Edition* 558. 1856, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 89. 1862 and *Bulletin of the Torrey Botanical Club* 32(11): 602–603. 1905, *Rhodora* 8(92): 144–145. 1906, *Rhodora* 10(112): 65. 1908, *Bulletin of the Torrey Botanical Club* 36: 533. 1909, *Report of the Michigan Academy of Science, Arts and Letters* 17: 181–182. 1916, *Iowa State Journal of Science* 39(3): 310–314, f. 3A–C, G. 1965, *Le Naturaliste Canadien* 103(6): 564. 1976, *Provancheria* 12: 55. 1981

(Species not known to be poisonous.)

in English: early bunchgrass, prairie wedgegrass, slender wedgegrass, slender wedgescale, wedge grass

Sphenostylis E. Meyer Fabaceae

From the Greek *sphen* and *stylos* ‘a column, style’, referring to the wedge shaped style; see Meyer, Ernst Heinrich Friedrich (1791–1858), *Commentariorum de Plantis Africae Australioris* quas per Octo Anno Collegit Observationibusque Manuscriptis Illustravit Joannes Franciscus Drège. Lipsiae [Leipzig], 1835–1837.

Sphenostylis stenocarpa (A. Rich.) Harms (*Dolichos stenocarpus* Hochst. ex A. Rich.; *Sphenostylis congensis* A. Chev.; *Sphenostylis stenocarpa* Harms)

Tropical Africa. Perennial non-climbing herb, vine climbing, herbaceous twiner, creeper, pale purple corolla

See *Tentamen Florae Abyssinicae ...* 1: 224. 1847, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 309. 1899 and *Bull. Soc. Bot. France* 61(Mém. 8e): 257. 1917 [1914 publ. 1917]

(Seeds and leaves for diarrhea, elephantiasis.)

in English: African yam bean, yam pea

Sphyrantha Hook.f. Euphorbiaceae

Greek *sphyrā* ‘a hammer’ and *anthera* ‘an anther’, referring to the shape of the anthers, see *Hooker’s Icones Plantarum* 18: 1702. 1887.

Sphyrantha lutescens (Kurz) Pax & K. Hoffm. (*Codiaeum lutescens* Kurz)

India. Tree

See *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 42(2): 246. 1873 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* [Engler & Prantl] 19c: 231. 1931

(Leaf decoction taken in muscular pain; leaves pounded in coconut oil applied on body pain.)

in India: nyaiyo, yanyo

Sphyraspermum Poeppig & Endl. Ericaceae

From the Greek *sphyrā* ‘a hammer’ and *sperma* ‘seed’, see *Nova Genera ac Species Plantarum* (Poeppig & Endlicher) 1: 4. 1835, *Linnaea* 24: 15, 29. 1851 and *Brittonia* 1(4): 203–232. 1933.

Sphyraspermum buxifolium Poeppig & Endlicher (*Sophoclesia cordifolia* (Benth.) Klotzsch var. *oophylla* Kuntze; *Sophoclesia cordifolia* var. *oophylla* Kuntze; *Sophoclesia nummulariaefolia* Klotzsch; *Sophoclesia nummulariifolia* Klotzsch; *Sphyraspermum roraimae* Klotzsch; *Vaccinium pachycardium* Standl.)

South America.

See *Nov. Gen. Sp. Pl.* (Poeppig & Endlicher) 1: 4–5. t. 8. 1835, *Linnaea* 24: 29–30, 36. 1851, *Revisio Generum Plantarum* 2: 384. 1891 and *Brittonia* 1(3): 127–184. 1932, *Brittonia* 1(4): 203–232. 1933, *Publications of the Field Museum of Natural History, Botanical Series* 18(3): 883. 1938, *Bot. J. Linn. Soc.* 117: 135–145. 1995, *J. Agric. Food Chem.* 59(7): 3020–3026. 2011

(Antioxidant.)

Sphyraspermum cordifolium Benth. (*Sophoclesia cordifolia* (Benth.) Klotzsch; *Sophoclesia cordifolia* Klotzsch)

South America.

See *Linnaea* 24: 29. 1851 and *J. Agric. Food Chem.* 59(7): 3020–3026. 2011

(Antioxidant.)

Spigelia L. Loganiaceae (Strychnaceae)

In honor of the Dutch (b. Brussels, Belgium) physician Adriaan (Adrian, Adrianus, Adriano) van der Spiegel (Spiegelius, Spigelius, Spieghele, Spigeli, Spigel), 1578–1625 (d. Padova), botanist, professor of anatomy and surgery at Padua, 1623 he was elected knight of St. Mark, among his writings are *Isagoges in rem herbariam libri duo*. Patavii 1606, *De semitertiana libri quatuor*. Francofurti 1624, *De formato foetu liber singularis ... Epistolae duae anatomicae. Tractatus de Arthritide*. Opera posthuma, studio

L. Cremae ... edita. Patavii [1626] and *De lumbrico lato liber*. Patavii 1618; see *Species Plantarum* 1: 149–150. 1753, Browne, Patrick (1720–1790), *The civil and natural history of Jamaica* 156, 367. 1756, *Familles des Plantes* 2: 225, 519. 1763, *Histoire des plantes de la Guiane Française* 2: 637, t. 257. 1775, Pohl, Johann Baptist Emanuel (1782–1834), *Plantarum Brasiliae Icones et Descriptiones hactenus ineditae* 2: 62–63, t. 142. Vindobonae: [typis et charta Antonii Strauss], 1827–1831, *Novarum Stirpium Decades* 5: 33. 1839, *Genera Plantarum* 682. 1839, *Flora Brasiliensis* 6(1): 255–258, 260. 1868, R. Bentley and H. Trimen, “*Spigelia marilandica*.” *Medicinal Plants*. 3: 180. 1880 and *Botanisches Archiv* 3: 134. 1923, *Wrightia* 2(2): 90–102. 1960, *Acta Bot. Neerl.* 10(4): 460–465. 1961, Garrison and Morton, *Medical Bibliography*. 5229. 1961, *Ind. Gen. Vasc. Pl.* 1753–74 (Regnum Veg.li) 27. 1967, *Fieldiana, Bot.* 24(8/4): 276–302. 1969, G.A. Lindeboom, in *D.S.B.* 12: 577–578. 1981, *Fl. Prov. Jujuy* 13(8): 39–54. 1983, *Brittonia* 51(4): 407–414. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1235–1239. 2001, *Fontqueria* 55(5): 19–30. 2001, *Fontqueria* 55(23): 123–129, t. i–iv, f. a. 2004, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 207–217. 2007.

Spigelia anthelmia L. (*Spigelia anthelmia* var. *nervosa* (Steud.) Progel; *Spigelia anthelmia* var. *obliquinervia* A. DC.; *Spigelia anthelmia* var. *peruviana* A. DC.; *Spigelia domingensis* Gand.; *Spigelia fruticulosa* Lam.; *Spigelia killipii* Ewan; *Spigelia multispica* Steud.; *Spigelia multispica* var. *discolor* Progel; *Spigelia nervosa* Steud.; *Spigelia quadrifolia* Stokes; *Spigelia stipularis* Progel)

Tropical America. Small erect herb, annual or perennial weed, stem smooth and rounded, branches green but reddish near the roots, almost transparent leaves in whorls, flowers purplish-pale pink with dark stripes in a terminal spike, funnel-shaped corolla, small round rough warty fruits

See *Species Plantarum* 1: 149–150. 1753, *A Botanical Materia Medica* 1: 307. 1812, *Flora* 26(45): 764. 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 9: 7. 1845, *Tableau Encyclopédique et Méthodique... Botanique* 1: 478. 1845, *Flora Brasiliensis* 6(1): 262–263. 1868 and *Bulletin de la Société Botanique de France* 70: 921. 1923, *Act. Bot. Neerl.* 10: 461, 464–465. 1961, *Fieldiana, Botany* 24(8/4): 276–302. 1969

(Reported as poisonous to stock; fresh leaves said to be poisonous to domestic animals. Root a dangerous purgative, in small doses to expel parasites and intestinal worms, in large doses to execute criminals; in very light doses used for stomach problems. All parts of the plant anthelmintic, vermifuge.)

in English: Indian pink, pinkroot, West Indian pinkroot, worm bush, worm grain, worm grass, worm weed

in French Guiana: Brinvilliere, Brinvilliers, herbe à la Brinvilliers, herbe de Brinvilliers (Marie-Madeleine-Marguerite d'Aubray, Marquise de Brinvilliers (c. 1630–

1676), a French serial killer, was executed after poisoning numerous family members.)

in Yoruba: ewe aran

in Panama: ina nusu

Spigelia humboldtiana Cham. & Schltld. (*Spigelia australis* L.B. Sm.; *Spigelia chamaedryoides* Kraenzl.; *Spigelia humboldtiana* var. *obtusifolia* Progel; *Spigelia humboldtiana* var. *pubescens* Progel; *Spigelia intermedia* Arechav.; *Spigelia palmeri* Rose; *Spigelia rubelliana* Arechav.; *Spigelia scabra* Cham. & Schltld.; *Spigelia scabra* var. *angustata* Progel; *Spigelia uruguayana* Arechav.)

South America, Mexico. Herb

See *Linnaea* 1(2): 200–203. 1826, *Flora Brasiliensis* 6(1): 261. 1868, *Contributions from the United States National Herbarium* 1(9): 342. 1895 and *Caldasia* 4: 295. 1947

(Whole plant combined with *Pteris altissima* and used as a wash for snakebite, especially from the fer-de-lance.)

Spigelia marilandica L. (*Spigelia marilandica* (L.) L.)

North America. Perennial herb, dark green foliage, trumpet-shaped terminal flowers, corolla bright red on the outside and creamy-yellow on the inside, fruit a capsule

See *Species Plantarum* 1: 149–150. 1753, *Syst. Nat.*, ed. 12. 2: 734. 1767

(All parts poisonous. Toxic effects similar to those of strychnine. Used to treat worms, especially in young children, also a remedy for endocardial troubles.)

in English: American wormroot, Carolina pink, Carolina pinkroot, Indian pink, Maryland pink, Maryland pinkroot, pink-root, pinkroot, starbloom, woodland pinkroot, worm tea, wormgrass, wormweed

Spilanthes Jacq. Asteraceae

Greek *spilos* ‘a spot, stain, fleck’ and *anthos* ‘flower’, in some species the flowers are black or brown spotted; see Nicolaus Joseph von Jacquin (1727–1817), *Enumeratio systematica plantarum*, quas in insulis Caribaeis vicinae Americae continente detexit novas, aut jam cognitae emendavit. 8, 28. Lugduni Batavorum 1760, *Selectarum stirpium Americanarum historia: in qua ad Linnæanum systema determinatæ descriptæque sistuntur plantæ illæ, quas in insulis Martinica, Jamaica, Domingo, allisique, et in vicinæ continentis parte.* 214–215, tab. 126, fig. 1. Vindobonæ: Ex Officina Krausiana 1763, *Systema Naturae*, ed. 12 2: 513, 533. 1767, *Synopsis Plantarum* 2: 472–473. 1807, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 620, 624. 1836 and *Proc. Amer. Acad. Arts* 42: 552. 1907, *Syst. Bot.* 6(3): 231–257. 1981, *Syst. Bot. Monogr.* 8: 19. 1985, *Fl. Venez. Guayana* 3: 177–393. 1997. See also genera *Acmella* Rich. and *Blainvillea* Cass.

Spilanthes acmella (L.) Murray (*Acmella caulirhiza* Delile; *Acmella linnaei* Cass.; *Bidens acmella* (L.) Lam.; *Bidens ocymifolia* Lam.; *Blainvillea acmella* (L.) Philipson; *Pyrethrum acmella* (L.) Medik.; *Spilanthes acmella* Hutch. & Dalziel; *Spilanthes acmella* Murr.; *Spilanthes acmella* A. Chev.; *Spilanthes acmella* DC.; *Spilanthes mauritiana* (Rich.) DC.; *Spilanthes mauritiana* DC.; *Spilanthes ocymifolia* A.H. Moore; *Spilanthes ocymifolia* (Lam.) A.H. Moore; *Verbesina acmella* L.)

Brazil. Herb, erect, branched, pungent leaves used as salad, ribbed achene

See *Species Plantarum* 2: 831–832, 901–902. 1753, *A System of Vegetables* [Translated from the thirteenth edition]. 610. 1774, *Obs. Bot.* 243. 1775, *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae* 237. 1775, *Encyclopédie Méthodique, Botanique* 1: 415–416. 1783, *Prodr. (DC.)* 5: 625. 1836, *Revisio Generum Plantarum* 1: 326. 1891 and *Proc. Amer. Acad. Arts* 42: 531. 1907, *Beihefte zum Botanischen Centralblatt* 32: 340. 1914, *Exploration Botanique de l'Afrique Occidentale Française ...* : 372. 1920, *Flora of West Tropical Africa* 2: 147. 1931, *Blumea* 6(2): 350–351. 1950, *Syst. Bot. Monogr.* 8: 1–115. 1985

(Used in Ayurveda. Leaves and flowers antiseptic, febrifuge, antibacterial, antifungal, antimalarial, antimicrobial, post-partum remedy, a remedy for toothache, flu, cough, rabies diseases, tuberculosis, infant fever, earache, sore throat and given to women during childbirth. Tincture from the flowers used to relieve toothache; head stimulant, used in tongue troubles, toothache, gums and headache. Roots for toothache, headache, laxative, diuretic. Young roots crushed and soaked and the decoction given for diarrhea and dysentery. Powerful mosquito larvicide, crushed plant or powdered heads as fish poison.)

in English: para cress, toothache plant

in India: acharbomdi, akalkarra, akarkara, byshit-iong, mar chag, pipulka, pirazha, sam atching, sarahattika, vana-mugali

Malay names: galang, krabo

in Nepal: lato ghans

in Philippines: palumai, pilet-pilet

in Thailand: hueng huai kia, phak khraat, phak phet, phak tumhuu, ueng huai kia

Spilanthes calva DC. (*Acmella calva* (DC.) R.K. Jansen; *Ceratocephalus javanicus* (Schultz-Bipontinus ex Miquel) Kuntze; *Ceratocephalus javanicus* Kuntze; *Colobogyne langbianensis* Gagnepain; *Spilanthes acmella* var. *calva* (DC.) Clarke ex Hooker f.; *Spilanthes callimorpha* A.H. Moore; *Spilanthes javanica* Schultz-Bipontinus ex Miquel; *Spilanthes javanica* Sch.Bip.; *Spilanthes langbianensis* (Gagnepain) Stuessy; *Spilanthes rugosa* Blume ex DC.; *Spilanthes rugosa* var. *truncata* Miq.)

India. Erect or ascending, pubescent herb, small yellow flower-heads

See *Contributions to the Botany of India* (Wight) 19. 1834, *Prodr. (DC.)* 5: 625. 1836, *The Flora of British India* 3: 307. 1881, *Revis. Gen. Pl.* 1: 326. 1891 and *Proc. Amer. Acad. Arts* xlii. 536. 1907, *Notul. Syst. (Paris)* 4: 15. 1920, *Rhodora* 79(817): 128. 1977, *Systematic Botany Monographs* 8: 41. 1985, *Compositae Newslett.* 27: 7–10. 1995

(Leaves chewed to relieve toothache, throat sores; leaf paste as wound healing agent. Flowers crushed used against dog bites and poisoning, flower heads chewed to treat worms in the teeth. Fruits chewed to cure toothache and mouth infection; seed oil massaged on male sex organs for erection. Whole plant as fish poison.)

in India: akarkara, akkilaaruka, akravu, kala avizal, kalodhar, nai koppu, nai manjal, pipalka

in Nepal: marati, marethi, moreti, saru

Spilanthes ocymifolia (Lam.) A.H. Moore (*Acmella alba* (L'Hér.) R.K. Jansen; *Acmella alba* var. *alba*; *Bidens humilis* Sessé & Moc.; *Bidens ocymifolia* Lam.; *Spilanthes acmella* (L.) Ed.* 5: 44–46, 55. 1998.

Spinacia oleracea L. (*Atriplex griffithii* subsp. *stocksii* (Boiss.) Boulos; *Atriplex griffithii* var. *stocksii* (Boiss.) Boiss.;

Atriplex stocksii Boiss.; *Obione stocksii* Wight; *Spinacia glabra* Mill.; *Spinacia spinosa* Moench)

Cosmopolitan.

See *Species Plantarum* 2: 1027. 1753, *Gen. Pl.* ed. 5, 452. 1754, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, *Methodus* (Moench) 318. 1794, *Icones Plantarum Indiae Orientalis* 5, Expl. plates 5 & tab. 1789. 1852, *Diagnoses plantarum orientalium novarum*, ser. 2, 4: 73. 1859, *Flora Orientalis* 5: 916. 1879 and *Nordic Journal of Botany* 11(3): 310. 1991, *J. Shanghai Agric. Coll.* 11(1): 1–6. 1993

(Used in Ayurveda, Unani and Sidha. The plant is prized as a rich source of vitamins, calcium, iron, and antioxidant carotenoids, but, if ingested in excessive amounts, the high concentration of oxalates in the leaves can be toxic by inhibiting the absorption of calcium. Leaves antiinflammatory, for arthritis, jaundice and osteoporosis; leaf extract cooling; crushed leaves for anemia.)

in English: spinach

in China: bo cai, po leng tsai, potsai

in India: aivakaimanilakkoti, aivakaimanilam, aloci, aloki, cali, chhurika, chiritchhada, chitar, cikkiranti, cirri, dump-abachhali, gramini, gramyavallabha, iruppavalotaram, is-finaj, is-panaj, isfanaj, ispank, ispinaph, kanayilai, karuni, karunikoti, kshurapatrika, kshurika, madhura, madhusudani, malaricivancam, maraimuli, matturbachhali, minciyatavankam, mukundana gida, mutturbachhali, nalvacalai, narpacalai, paala koora paalak, paalakya, pacalai, pacali, pacalikkoti, pacici, pacili, paciri, palak, palakya, palangsag, palanki, palankya, palki, pariyan, pasalai, pasalaikerai, pavanati, pavanatikkoti, payalai, payali, payavuri, payili, payiri, pinnis, sag, sagpalak, snigdhapatra, supatra, tamnem, tinti, tintikkoti, vacalaikkirai, vasaiyilaikkirai, vastukakara

in Japan: hôren-sô

in Okinawa: furinno

Spiraea L. Rosaceae

Greek *speira* 'a spiral', *speiraia* 'the herb meadowsweet', Latin *spiraea*, *ae* 'the herb meadowsweet' (Plinius), the plant was once used for garlands and wreaths; see Carl Linnaeus, *Species Plantarum*. 1: 489–490. 1753 and *Genera Plantarum*. Ed. 5. 216. 1754, *Naturgeschichte* 10, *Synop.*: 3. 1801, *Ann. Sci. Nat.* (Paris) 1: 239, 385. 1824, *Prodr.* (DC.) 2: 542, 545. 1825, *New Fl.* (Rafinesque) 3: 68. 1838 [dt. 1836; publ. Jan–Mar 1838], *Fl. N. Amer.* (Torr. & A. Gray) 1(3): 418. 1840, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 832. 1852, *U.S. Explor. Exped. Bot.* 1(15): 666. 1854, *Manual* (Gray), ed. 2. 113–114. 1856, *Dendrologie* 1: 309. 1869, *Bot. California* [W.H. Brewer] 1: 170. 1876 and *N. Amer. Fl.* 22: 245. 1908, *Fieldiana, Bot.* 24(4): 432–484. 1946, *Fl. Canada* 3: 547–1115. 1978, *Bot. Zhurn.* 65 (1): 51–59. 1980, *Aliso* 11(2): 199–211. 1985, *J. Pl. Biol.* 40: 291–297. 1997, *Newslett. Int. Organ.*

Pl. Biosyst. (Oslo) 29: 18–22. 1998, *Fl. Medit.* 8: 251–262. 1998, *Prosyllabus Tracheophytorum, Tentamen Systematis Plantarum Vascularium (Tracheophyta)* xxxi. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 2202–2206 2001.

Spiraea alba Du Roi

North America. Perennial shrub

See DuRoi, Johann Philipp (1741–1785), *Die harbkesche wilde Baumzucht*: theils Nordamerikanischer und anderer fremder, theils einheimischer Bäume, Sträucher und strauchartigen Pflanzen ... 2: 430–432. Braunschweig: im Verlage der Fürstl. Waisenhaus-Buchhandlung, 1771

(Analgesic, antiemetic.)

in English: meadowsweet, white meadowsweet

Spiraea alba Du Roi var. *latifolia* (Aiton) Dippel (*Spiraea alba* var. *latifolia* (Aiton) B. Boivin, isonym; *Spiraea alba* var. *latifolia* (Aiton) H.E. Ahles, isonym; *Spiraea latifolia* (Aiton) Borkh.; *Spiraea salicifolia* var. *latifolia* Aiton)

North America. Perennial shrub

See *Hortus Kewensis*; or, a catalogue ... 2: 198. 1789, *Theoretisches-praktisches Handbuch der Forstbotanik und Forsttechnologie* 2: 1871. 1803, *Handbuch der Laubholzkunde* 3: 484. 1893 and *Journal of the Elisha Mitchell Scientific Society* 80(2): 172. 1964, *Le Naturaliste Canadien* 93(4): 437. 1966

(Analgesic, antiemetic.)

in English: meadowsweet, white meadowsweet

Spiraea bella Sims

China, Himalaya, India.

See *Botanical Magazine* 50: t. 2426. 1823 and *J. Cytol. Genet.* 23: 219–228. 1988, *Proc. Indian Acad. Sci., Pl. Sci.* 100: 17–21. 1990

(Plant juice applied to heal sores and wounds.)

in China: zang nan xiu xian ju

Spiraea betulifolia Pall. var. *corymbosa* (Raf.) S. Watson (*Spiraea betulifolia* subsp. *corymbosa* (Raf.) Roy L. Taylor & MacBryde; *Spiraea betulifolia* var. *corymbosa* Maxim.; *Spiraea betulifolia* var. *corymbosa* (Raf.) Voss; *Spiraea betulifolia* Pall. var. *corymbosa* (Raf.) Maxim.; *Spiraea corymbosa* Raf.)

North America. Perennial shrub

See *Précis des Découvertes et Travaux Somnologiques* 36. 1814, *A Manual of the Botany of the Northern United States* (ed. 6) 153. 1890, *Vilmorin's Blumengärtnerei*. Dritte neu-bearbeitete Aflage 1: 245. 1894 and *Canadian Journal of Botany* 56(2): 190. 1978

(Analgesic, infusion of branches taken for abdominal and menstrual pains, colds. Roots and leaves decoction for

diarrhea, stomachache. Decoction of leaves and branches taken or used as a bath for venereal diseases.)

in English: shinyleaf meadowsweet

Spiraea canescens D. Don

India, China, Himalaya.

See *Prodromus Florae Nepalensis* 227. 1825 and *Silvae Genet.* 22: 188–190. 1973, *J. Cytol. Genet.* 23: 219–228. 1988

(Seeds sedative.)

in China: xie ye xiu xian ju

in India: chaku, taku

Spiraea douglasii Hook. (*Spiraea douglasii* Hook. var. *roseata* (Rydb.) C.L. Hitchc.; *Spiraea roseata* Rydb.)

North America. Perennial shrub

See *Flora Boreali-Americana* 1(4): 172. 1832 and *North American Flora* 22(3): 250. 1908, *Vascular Plants of the Pacific Northwest* 3: 192. 1961

(Seeds infusion astringent, for diarrhea.)

in English: hack-brush, hard-hack, rose spirea

Spiraea salicifolia L.

North America. Perennial shrub

See *Species Plantarum* 1: 489. 1753

(Roots for cold, cough. Seeds infusion astringent, for diarrhea.)

in English: bridewort, willowleaf meadowsweet

in China: liu ye xiu xian ju

in Japan: hozaki-shimotsuke

Spiraea stevenii (C.K. Schneid.) Rydb. (*Spiraea beauverdiana* auct. non C.K. Schneid.; *Spiraea beauverdiana* C.K. Schneid. var. *stevenii* C.K. Schneid.)

North America. Perennial shrub

See *Bulletin de l'Herbier Boissier*, sér. 2, 5(4): 348. 1905, *North American Flora* 22(3): 247. 1908

(Leaves infusion astringent.)

in English: beauverd spirea

Spiraea tomentosa L. (*Spiraea tomentosa* var. *rosea* (Raf.) Fernald; *Spiraea tomentosa* var. *tomentosa*)

North America. Perennial shrub

See *Species Plantarum* 1: 489. 1753, *New Flora and Botany of North America* ... 3: 62–63. 1836[1838] and *Rhodora* 14(165): 190. 1912, *Taxon* 51(2): 544. 2002

(Leaves infusion astringent, taken for dysentery. Leaves and flowers infusion antiemetic, also used to ease childbirth.)

in English: hard-hack, steeplebush

Spiranthes L.C. Rich. Orchidaceae

Coiled flowers, Greek *speira* ‘a spiral, coil’ and *anthos* ‘flower’, referring to the spiral or twisted inflorescence; see Louis Claude Marie Richard (1754–1821), *De Orchideis europaeis annotationes*. 20, 28–29, 36–37. Parisiis 1817 and *Harvard Pap. Bot.* 5(2): 383–466. 2001.

Spiranthes sinensis (Pers.) Ames (*Aristotelea spiralis* Lour.; *Calanthe australis* (R.Br.) Aiton ex Loudon; *Epidendrum aristotelea* Raeusch., nom. superfl.; *Gyrostachys amoena* Blume; *Gyrostachys australis* (R. Br.) Blume; *Gyrostachys australis* var. *flexuosa* (Sm.) Blume; *Spiranthes australis* var. *pudica* (Lindl.) F.Muell.; *Gyrostachys congesta* (Lindl.) Kuntze; *Gyrostachys novifuburgensis* Kuntze; *Gyrostachys stylites* (Lindl.) Kuntze; *Gyrostachys wightiana* Kuntze; *Ibidium spirale* (Lour.) Makino; *Ibidium viridiflorum* (Makino) Makino; *Monustes australis* (R. Br.) Raf.; *Neottia amoena* M. Bieb.; *Neottia australis* R. Br.; *Neottia australis* var. *chinensis* Ker Gawl.; *Neottia crispata* Blume; *Neottia flexuosa* Sm.; *Neottia parviflora* Sm.; *Neottia pudica* (Lindl.) Sweet; *Neottia sinensis* Pers.; *Ophrys spiralis* Georgi, Reise 1: 232 (1775), nom. illeg.; *Spiranthes amoena* (M. Bieb.) Spreng.; *Spiranthes aristotelea* Merr., nom. superfl.; *Spiranthes australis* (R. Br.) Lindley; *Spiranthes australis* var. *suishaensis* Hayata; *Spiranthes australis* var. *viridiflora* Makino; *Spiranthes congesta* Lindl.; *Spiranthes crispata* (Blume) Zoll. & Moritzi; *Spiranthes densa* A. Rich.; *Spiranthes flexuosa* (Sm.) Lindl.; *Spiranthes indica* Lindl. ex Steud., nom. inval.; *Spiranthes longispicata* A. Rich.; *Spiranthes neocaledonica* Schltr.; *Spiranthes novae-zelandiae* Hook.f.; *Spiranthes papuana* Schltr.; *Spiranthes parviflora* (Sm.) Lindl.; *Spiranthes pudica* Lindl.; *Spiranthes sinensis* f. *autumnus* Tsukaya; *Spiranthes sinensis* f. *gracilis* F.Maek. ex Tsukaya; *Spiranthes sinensis* var. *amoena* (M. Bieb.) H. Hara; *Spiranthes sinensis* var. *australis* (R. Br.) H. Hara & S. Kitam.; *Spiranthes spiralis* (Lour.) Makino, nom. illeg.; *Spiranthes stylites* Lindl.; *Spiranthes suishanensis* (Hayata) Schltr.; *Spiranthes viridiflora* (Makino) Makino; *Spiranthes wightiana* Lindl. ex Wall., nom. inval.)

Russia, Pacific. Terrestrial, erect, radical sheathing leaves, white drooping flowers

See *Synopsis Plantarum* 2: 53, 510. 1807, *Prodromus Florae Novae Hollandiae* 319. 1810, *Flora Taurico-Caucasica* 3: 606. 1819, *Botanical Register*; consisting of coloured ... 10: sub pl. 823. 1824, *Systema Vegetabilium*, editio decima sexta 3: 708. 1826, *Flora Telluriana* 2: 87. 1836[1837], *Journal of the Linnean Society, Botany* 1: 178. 1857, *Collection des Orchidées* 128–129. 1858, *Revisio Generum Plantarum* 2: 663–664. 1891 and *Orchidaceae* 2: 53. 1908, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 6: 86–87. 1916, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 4: 161. 1919, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 10: 33. 1921, *J. Jap. Bot.* 3: 5, 25. 1926, *Journal of Japanese Botany* 44(2): 59. 1969, *Bot. Mag.* (Tokyo) 92:

59–67. 1979, *Acta Phytotaxonomica et Geobotanica* 36: 93. 1985, *Bot. Žurn.* (Moscow & Leningrad) 80(2): 87–90. 1995, *J. Pl. Res.* 118: 17–18. 2005

(Plant parts cooked and eaten for kidney disorders. Crushed seeds used to kill intestinal worms, a decoction insecticide.)

in English: Austral ladies tresses, ladies tresses

in China: pan long shen, shou cao

in Japan: neji-bana, shiro-mojizuri

in Okinawa: mudiku-bana

Spirodela Schleiden Lemnaceae

Greek *speira* and *delos* ‘evident, visible, obvious, conspicuous’, referring to the roots; see Matthias Jacob Schleiden (1804–1881), in *Linnaea*. 13: 391. 1839.

Spirodela polyrhiza (L.) Schleid. (*Lemna polyrhiza* L.) (Greek *polys* ‘much’ and *rhiza* ‘root’)

China. Fodder

See *Sp. Pl.* 970. 1753, *Linnaea* 13: 391–392. 1839

(Diuretics, for subsides of swellings and for reducing perspiration.)

in English: duck’s meat, duckweed, giant duckweed, great duckweed, greater duckweed, large duckweed, water flaxseed

in China: fu ping, zi ping

in Japan: uki-kusa

Spirostachys Sonder Euphorbiaceae

From the Greek *speira* ‘spiral’ and *stachys* ‘a spike’, referring to the flower spikes; see Govaerts, R. et al. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)* 1–4: 1–1622. The Board of Trustees of the Royal Botanic Gardens, Kew. 2000.

Spirostachys africana Sond. (*Excoecaria africana* (Sond.) Müll.Arg.; *Excoecaria synandra* Pax; *Sapium africanum* (Sond.) Kuntze; *Spirostachys synandra* (Pax) Pax; *Stillingia africana* (Sond.) Baill.)

Kenya to S. Africa. Shrub or tree, milky juice, rough bark, good timber, stems used as poles for building

See *Linnaea* 23: 106. 1850 and Calane da Silva, M. et al. *A Preliminary Checklist of the Vascular Plants of Mozambique*: 1–184. Pretoria. 2004

(Milky latex poisonous and injurious to the eyes. Leaves and bark said to be poisonous, especially when fresh; only dried out tree, sometimes burned, can be used medicinally for external purposes. Stem and roots purgative, for kidney troubles, leprosy.)

in English: African mahogany tree, African sandalwood, African spirostachys, Cape sandalwood, headache tree, jumping-bean tree

in East Africa: gethugetkiss, mkangaula, msalaka, msaraka, msarakana, msharaka, muharaka

in Southern Africa: tamboti, tambotie, umtombotie, sandaleen wood, helengomaash; muTivoti, muTomboti (Shona); umThombothi, umtomboti, iJuqu, uBanda (Zulu); umtomboti, umThombothi (Xhosa); umThombotsi, umThombothi (Swazi); ndzopfori (Thonga); morukuru (Western Transvaal, northern Cape, Botswana); morekhure (Kgatla dialect, Botswana); morekuri, morekure (North Sotho); muonze (Venda); orupapa (Herero); tshopfori (Shangaan); ubande (Ndebele)

in Tanzania: mchaaka, mchake, msagawi, msalaka, mtanga, ormatanga

Spirostachys venenifera (Pax) Pax (*Excoecaria glomeriflora* Pax; *Excoecaria venenifera* Pax; *Spirostachys glomeriflora* (Pax) Pax)

Kenya, Tanzania. Small tree, many-branched, milky juice, leaves hairless. flowers with sexes separate on different plants

See *Systema Naturae*, Editio Decima 2: 1288. 1759, *Linnaea* 23: 106. 1850, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 113. 1894 and *Das Pflanzenreich* IV 147,5(Heft 52): 154. 1912

(Milky latex poisonous and injurious to the eyes.)

in East Africa: mlakamu, mraka, msarakana, mtanga, mtoloto, muangu mume, saricho

Spondias L. Anacardiaceae

From *spondias* or *spodias* (*spodos*, *spodia* ‘ashes’), the Greek classical name for the wild plum tree (Theophrastus, *HP.* 3.6.4) or a tree of the plum kind, in reference to the fruit; see Carl Linnaeus, *Species Plantarum*. 1: 371. 1753, *Genera Plantarum*. Ed. 5. 174. 1754 and *Fieldiana, Bot.* 24(6): 177–195. 1949. All parts of the plants in this genus have a fetid, turpentine-like odour when broken or bruised; the smell differs in each species and is characteristic.

Spondias dulcis Parkinson (*Evia dulcis* (Parkinson) Kosterm.; *Spondias cytherea* Sonn.; *Spondias dulcis* Forster, nom. illeg., non *Spondias dulcis* Parkinson; *Spondias dulcis* Soland. ex Parkinson; *Spondias dulcis* Soland. ex Forst.f.)

South and Southeast Asia. Tree, rapid-growing, erect, symmetrical, exudes a light-brown gum, nearly smooth light gray-brown bark, rounded branches, pinnate deciduous leaves, elliptic or obovate-oblong leaflets finely toothed toward the apex, small inconspicuous whitish flowers borne in large terminal panicles, assorted male female and perfect in each cluster, long-stalked fruits, ripe fruits yellow to red-purple, flesh crisp juicy and subacid, fruit with leathery stone

ridged, fruit fed to pigs and the leaves eaten by cattle, fruit flesh a good source of vitamin C and iron, young leaves acid and consumed raw

See *Species Plantarum* 1: 371. 1753, *Journal of a voyage to the South Seas* 39. 1773, *Voyage aux Indes Orientales* 3: 242, t. 123. 1782, *Prodromus Systematis Naturalis Regni Vegetabilis* 198. 1786 and *J. Ethnopharmacol.* 38(1): 31–38. 1993 [Plants used in Guatemala for the treatment of gastrointestinal disorders. 3. Confirmation of activity against enterobacteria of 16 plants.], *Carbohydr. Res.* 338(7): 619–624. 2003

(Antibacterial. Fruit, leaves and bark used for the treatment of wounds, sores and burns. The astringent bark used with various species of *Terminalia* as a remedy for diarrhea and dysentery.)

in English: ambarella, great hog plum, otaheite apple, spondias, wi-tree

in Madagascar: farafaka, sakoalahy, sakoambanoitse

in Zaire: likomba, makomba

in South America: caja-manga, hobo de racimos, jobo de la India, jobo de Indio, jocote ñomblón, jocote yuplón, juplón, mango jobo, manzana de oro

in Burma: gway

in Cambodia: mokak

in Indonesia: kedondong manis

in Laos: kook hvaan

in Malaysia: kedondong

in Philippines: hevi

in Thailand: ma kok farang, ma kok waan, makok-farang

in Vietnam: cóc, c[os]c tr[oof]ng

Spondias mombin L. (*Choerospondias axillaris* (Roxb.) B.L. Burtt & A.W. Hill; *Poupartia axillaris* (Roxb.) King & Prain; *Spondias aurantiaca* Schumacher & Thonn.; *Spondias axillaris* Roxb.; *Spondias cythera* Tussac, nom. illeg., non *Spondias cytherea* Sonn.; *Spondias dubia* A. Rich.; *Spondias graveolens* Macfad.; *Spondias lucida* Salisb., nom. illeg.; *Spondias lutea* L.; *Spondias lutea* var. *glabra* Engl.; *Spondias lutea* var. *maxima* Engl.; *Spondias myrobalanus* L., nom. illeg.; *Spondias nigrescens* Pittier; *Spondias oghiee* G. 1990, *J. Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996

(Used in Ayurveda, Unani and Sidha. Tree bark rubefacient, antiemetic, tonic, aromatic, astringent, refrigerant, useful in dysentery, diarrhea, biliousness, menstrual disorders, arthritis, tuberculosis, being used for rubbing on the skin over painful joints; bark paste for stomach and body pain; bark juice taken for diarrhea and dysentery, also applied on ringworm and skin diseases. Leaves juice dropped in the ear in earache. The fruit used as an astringent, blood purifier, antiscorbutic and against dyspepsia; fruit juice applied or dropped against earache, also taken to stop blood dysentery; fruit boiled with the fish *Channa punctatus*, *goroi*, taken as curry against dysentery; seeds of *Garcinia cowa* made into a paste with seeds of *Spondias pinnata* applied on blistering spots, rashes and itches. Veterinary medicine, stem bark for snake-bite. Magico-religious beliefs, superstitions, at night it is not advisable to go near the plant, maybe some devils are near that place; tribe gives fruit stone to children to wear against harmful effects of supernatural power, ghost, witches, and to cure mouth ulcer.)

Spongiocarpella Yakovlev & N. Ulziykh. Fabaceae (Galegeae)

From the Greek *spongias* 'sponge' and *karpos* 'fruit', see *Genera Plantarum* 1275. 1840 and *Botaničeskij Žurnal* (Moscow & Leningrad) 72(2): 250. 1987.

Spongiocarpella nubigena (D. Don) Yakovlev (*Astragalus crassicaulis* Graham, nom. nud.; *Astragalus nubigenus* D. Don; *Astragalus nubigenus* (Meyen) Taub.; *Calophaca crassicaulis* (Benth. ex Baker) Kom.; *Calophaca crassicaulis* (Baker) Kom.; *Caragana crassicaulis* Benth. ex Baker; *Caragana crassicaulis* Baker; *Chesneya nubigena* (D. Don) Ali)

India, Bhutan. Perennial non-climbing shrub, fodder for goats, sheep and camels, see also *Chesneya nubigena*

See *Prodromus Florae Nepalensis* 245. 1825, *A Numerical List of Dried Specimens* n. 5932. 1831, *The Flora of British India* 2(4): 117. 1876, *Die Natürlichen Pflanzenfamilien* 3(3): 303. 1894 and *Botaničeskij Žurnal* (Moscow & Leningrad) 72(2): 252. 1987, *Acta Bot. Yunnan.* 15: 377–384. 1993

(Whole plant antiseptic, laxative, stomachic, antibacterial, analgesic, used in wounds.)

in China: yun wu que er dou

Spongiosperma Zarucchi Apocynaceae

From the Greek *spongias* 'sponge' and *sperma* 'seed', see *Agricultural University Wageningen Papers* 87(1): 48–50. 1987 [1988].

Spongiosperma longilobum (Markgr.) Zarucchi (*Ambelania longiloba* Markgr.)

South America.

See *Histoire des plantes de la Guiane Française* 1: 265. 1775 and *Brittonia* 23(4): 441. 1971, Zarucchi, J.L. "Series of revisions of Apocynaceae, pt. 24. A revision of the tribe Ambelanieae (Apocynaceae—Plumerioideae)." *Agricultural University Wageningen Papers* 87(1): 1–106. 1987 [1988]

(Febrifuge, for skin diseases, astringent.)

in Brazil: jasmin d'agua, molongó

Spongiosperma macrophyllum (Müll.Arg.) Zarucchi (*Ambelania cucumerina* Miers; *Ambelania lopezii* Woodson; *Ambelania macrophylla* Müll.Arg.; *Hancornia macrophylla* Spruce ex Müll.Arg.; *Molongum macrophyllum* (Müll.Arg.) Pichon; *Rhigospira venulosa* Miers)

South America.

See *Histoire des plantes de la Guiane Française* 1: 265. 1775, *Mem. Math. Phis. Acad. Real Sci. Lisboa* 3: 51. 1812, *Flora Brasiliensis* (Martius) 6(1): 18. 1860, *On the Apocynaceae of South America* 13–14, 67–68, t. 1B. 1878 and *Mémoires du Muséum National d'Histoire Naturelle*, n.s., 24: 167–168. 1948, *Botanical Museum Leaflets* 15(2): 76. 1951, *Brittonia* 23(4): 441. 1971, Schultes, R.E. “De plantis toxicariis e mundo novo tropicale commentationes XIX. Biodynamic apocynaceous plants of the northwest Amazon.” *Journal of Ethnopharmacology* 1: 165–192. 1979, *Agricultural University Wageningen Papers* 87(1): 1–106. 1987 [1988], Rodolfo Vasquez and Alwyn H. Gentry “Use and misuse of forest-harvested fruits in the Iquitos Area.” *Conservation Biology* 3(4): 350–361. 1989

(South American Indians of the northwest Amazon have applied the latex of *Ambelania lopezii* to the scalp as a treatment for ringworm.)

Sporobolus R. Br. Poaceae (Gramineae)

Greek *spora*, *sporos* ‘seed, spore’ and *ballo*, *bolis*, *bolos* ‘casting’, *boleo*, *bollein* ‘to throw’, in reference to the dropping and the dispersion of the seeds; continuous morphological variation, taxonomically a difficult genus, species intergrading and often hard to separate, genus sometimes confused with *Eragrostis* Wolf, type *Sporobolus indicus* (L.) R. Br. See *Flora Boreali-Americana* 1: 52. 1803, *Prodromus Florae Novae Hollandiae* 169–170. 1810, *Essai d'une Nouvelle Agrostographie* 16, 148, 182, t. 5, f. 8. 1812, *Agrostografia brasiliensis* 33, t. 1, f. 2. 1823, *Bulletin Botanique* [Genève] 1: 220. 1830, *Révision des Graminées* 2: 421, t. 124. 1831, *Flora* 24: 712. 1841, *Flora* 33: 229. 1850, *Fragmentos de Algunas Plantas Filipinas* 25. 1851, *Synopsis Plantarum Glumacearum* 1: 181. 1854, *Bull. Soc. Bot. de France* 13: 317–326. 1866, *Nomenclator Botanicus* 2: 1274. 1874, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 257–258, t. 2, f. 8. 1874, *Journal of the Linnean Society, Botany* 19: 14–134. 1881, *Mexicanas Plantas* 2: 87. 1886, *Flora Capensis* 7(2–4): 310–791. 1898 and *Flora Capensis* 7: 579–580. 1900, *Contributions from the United States National Herbarium* 12(6): 183–258. 1909, *Bothalia* 2(1): 247–274. 1927, *Hooker's Icones Plantarum* 35(3): 1–11, plate 3457. 1947, *Fl. Nord* 2: 89. 1953, *Fieldiana, Botany* 24(2): i–ix, 1–390. 1955, *Die natürlichen Pflanzenfamilien, Zweite Auflage*, 14: 1–168. 1956, *Grasses of Burma ...* 622–635, *Kew Bulletin* 19: 287–296. 1965, *Bot. Not.* 125: 344–360. 1972, *Bull. Jard. Bot. Belg.* 50: 246. 1980, *Journal of Human Evolution* 10:

565–583. 1981, *Genera Graminum* 224–225. 1986, *Flora of the Guianas, Series A: Phanerogams* 606–615. 1990, *Blumea* 35(2): 393–458. 1991, *American Journal of Botany* 81: 622–629. 1994, *Flora Mesoamericana* 6: 273–276. 1994, *Flora of Ethiopia and Eritrea* 7: 142–156. 1995, *Sida* 16: 529–544. 1995, *Memoirs of the New York Botanical Garden* 78: 509–540. 1996, *Australian Systematic Botany* 12(3): 375–448. 1999, *Contributions from the United States National Herbarium* 41: 11, 18, 19, 57, 66, 200–219, 221. 2001, *Flora of Ecuador* 68: 60–72. 2001, *Flora of Australia* Volume 44B, Poaceae 3: 324–346, 459. 2005.

Sporobolus actinocladus (F. Muell.) F. Muell. (*Sporobolus australasicus* sensu Jessop, non Domin; *Vilfa actinoclada* F. Muell.) (from the Greek *aktis*, *aktin* ‘a ray’ and *klados* ‘a branch’)

South Australia, New South Wales, Queensland, Northern Territory. Perennial, annual or biennial, caespitose, slender, erect, leaves spiny-ciliate with margins hirsute, leaf blades flat and linear-lanceolate, inflorescence spicate with branches finally spreading, spikelets borne in small false spikes, spikelets clustered towards the apices of branches, glumes unequal, lower glume acute and hyaline, upper glume acute and shorter than the spikelet, lemma acuminate, palea shorter than lemma, indicator of poor rangeland condition, grows on floodplains, alkaline soils, sandy soils, inland rivers and creeks, black soils

See *Fragmenta Phytographiae Australiae* 6: 84. 1867, *Fragmenta Phytographiae Australiae* 8: 140. 1873

(Stimulant, palatable, tonic and nutritious.)

in English: Katoora, Katoora grass, ray grass

Sporobolus africanus (Poir.) Robyns & Tournay (*Agrostis africana* Poir.; *Agrostis capensis* Willd., nom. illeg., non *Agrostis capensis* (L.) Lam.; *Agrostis spicata* Thunb., nom. illeg., non *Agrostis spicata* Vahl; *Sporobolus capensis* Kunth; *Sporobolus capensis* (Willd.) Kunth; *Sporobolus indicus* (L.) R. Br.; *Sporobolus indicus* var. *africanus* (Poir.) Jovet & Guédès; *Sporobolus indicus* var. *capensis* Engl.; *Vilfa africana* (Poir.) P. Beauv.; *Vilfa capensis* P. Beauv.)

Tropical east Africa, South Africa. Perennial or biennial, coarse, stiff, tussocky, densely tufted, erect or oblique, wiry, rhizomatous, scented roots, very persistent, noxious vigorous weed, a strong aluminium accumulator, green leaves high in crude protein, young plants sometimes eaten by cattle, young inflorescences eaten by baboons, spikelets eaten by local people, similar to *Sporobolus fertilis* (Steudel) Clayton and *Sporobolus indicus*

See *Prodromus Plantarum Capensium, ...* 19. 1794, *Species Plantarum* 1: 372. 1797, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 254. 1810, *Prodromus Florae Novae Hollandiae* 170. 1810, *Essai d'une Nouvelle Agrostographie* 16, 146–147, 181. 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 212. 1833 and *Bulletin du Jardin Botanique de l'État Bruxelles* 25: 242.

1955, *Grasses of Burma* ... 627. 1960, *Kew Bulletin* 19(2): 291. 1965, *Taxon* 22: 163. 1973, *Bothalia* 17: 135–136. 1987, *Bothalia* 18: 114–119. 1988, *Bothalia* 21(2): 163–170. 1991, *Blumea* 35: 393–458. 1991, *Opera Botanica* 121: 159–172. 1993, *Aust. Syst. Bot.* 12: 375–448. 1999

(Used in traditional medicine for wounds and snakebite. Plant decoction used for regulating fertility.)

in English: African dropseed, African dropseed grass, dropseed, giant Parramatta grass, Indian rat's tail grass, Parramatta grass, rat's tail, rat's tail dropseed, ratstail dropseed, rat's tailgrass, rattail grass, rattail, rush grass, smutgrass, South African rat-tail grass, tough dropseed, tussock grass

in Somalia: jarbo, jarfo, domar, ag agar, aggar

Sporobolus heterolepis (A. Gray) A. Gray (*Agrostis heterolepis* (A. Gray) Alph. Wood; *Vilfa heterolepis* A. Gray)

North America, Canada, USA, Texas. Perennial, bright green to russet orange, slow growing, forming dense clumps, erect wiry culms, densely tufted or densely caespitose, aromatic flowers, seeds a valuable food for ground-feeding birds, highly nutritious seeds, fodder, hay and pasture grass, butterfly garden

See *Annals of the Lyceum of Natural History of New York* 3: 233. 1835, *A Class-book of Botany* 598. 1847, *A Manual of the Botany of the Northern United States* 576. 1848 and B.C. Ebbers, R.C. Anderson and A.E. Liberta, "Aspects of the mycorrhizal ecology of prairie dropseed, *Sporobolus heterolepis* (Poaceae)." *American Journal of Botany* 74: 564–573. 1987, *Restoration Ecology* 10(4): 677–684. 2002

(Stomachic, aphrodisiac, emetic, poultice of crushed root applied to sores.)

in English: northern dropseed, prairie dropseed, prairie dropseed grass

Sporobolus indicus (L.) R. Br. var. *flaccidus* (Roem. & Schult.) Veldkamp (*Agrostis diandra* Retz.; *Agrostis elongata* var. *flaccida* Roth; *Spermachiton involutum* Llanos; *Sporobolus diandrus* (Retz.) P. Pantropical. Perennial, polymorphic, leafy, wiry, erect, ascending, decumbent base, branched, smooth, forming extensive mats, vigorous, halophyte, strongly rhizomatous and stoloniferous, thick and creeping or long slender scaly rhizomes, tiny ligule with a fringe of hairs, basal sheaths

overlapping, leaf blades pungent, rigid leaves more or less spreading and distichous, inflorescence branches not whorled, dense and spike-like cylindrical panicle, spikelets lanceolate and laterally compressed, floret, pedicels scabrous, glumes subequal and glabrous, lower glume acute and lanceolate, upper glume subulate, second glume ovate-lanceolate, lemma acute and glabrous, palea ovate and acute, 3 stamens, fodder, good palatability, low grazing value, provides highly nutritious fodder for stock and buffaloes, grain eaten in time of scarcity, pioneer, salt-tolerant, cover ground, useful for erosion control and sand binding, used to stabilize seashores and wind-eroded shorelines, unstable dunes and beaches, saline plains, for saline sites revegetation, growing along saline coastal or subcoastal areas, dry and arid zones, littoral lowlands, tropical seashores, high tide line, on tidal mud flats, on saline scalds, from clays to sands, sandy or muddy seashores, grey clay soils, pools, brackish waters, sandy and rocky seashores, on salt marsh habitats, saltwater lagoons, behind mangrove swamps, grassy areas near mangrove, coastal sand dunes, on sand hills and dunes, seashore, high salinity areas, often misidentified as *Spinifex littoreus* (Burm.f.) Merr.

in Portugal: orelhas de gato

Stachys chinensis Bunge ex Benth. (*Stachys aspera* subsp. *chinensis* (Bunge ex Benth.) Krestovsk.; *Stachys aspera* Michaux var. *chinensis* (Bunge ex Benth.) Maximowicz; *Stachys baicalensis* Fischer ex Benth. var. *chinensis* (Bunge ex Benth.) V. Komarov; *Stachys chanetii* H. Lévillé; *Stachys chinensis* var. *albiflora* C.Y. Li)

China.

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 54: 45. 1879 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(208–210): 222. 1911, *Fl. Pl. Herb. Chinae Bor.-Or.* 7: 256. 1981, *Turczaninowia* 7(4): 20–21. 2004

(Used for tonsillitis, sore throat and dysentery.)

in English: Chinese betony

in China: hua shui su

Stachys floccosa Benth.

India, Himalaya.

See *Labiatarum Genera et Species* 739. 1835 and *Rev. Cytol. Biol. Vég., Bot.* 7: 5–16. 1984, *Chromosome Inf. Serv.* 39: 33–35. 1985

(Plant tonic, diuretic, emmenagogue.)

Stachys geobombycis C.Y. Wu

China. Rhizomes edible

See *Acta Phytotaxonomica Sinica* 10(3): 222–223. 1965

(Whole plant to treat traumatic injuries and scabies.)

in English: earth-silkworm betony

in China: di can

Stachys hyssopoides Burch. ex Benth. (*Stachys coerulea* Burch. ex Benth.; *Stachys macilenta* E. Mey.)

South Africa. Greyish shrub, rough aromatic leaves

See *Labiatarum Gen. Spec.*: 558. 1834, *Comm. Pl. Afr. Austr.*: (Meyer) 240. 1838

(Leaves infusion taken for fevers and dizziness, also used for people with low blood sugar level.)

in Lesotho: motlapa-tsunyane

in Southern Africa: pienksalie; selaoane (Sotho)

Stachys kouyangensis (Vaniot) Dunn (*Lamium kouyangense* Vaniot; *Lamium kouyangensis* Vaniot; *Scutellaria kouyangensis* (Vaniot) Dunn; *Stachys cardiophylla* Prain ex Dunn; *Stachys franchetiana* H.
