Dedicated to Raffaella, Daria, and Salvatore

“He was an old man who fished alone in a skiff in the Gulf Stream and he had gone eighty-four days now without taking a fish.”

The Old Man and the Sea

“As soon as I got to Borstal they made me a long-distance cross-country runner.”

The Loneliness of the Long Distance Runner

“This is a tale of a meeting of two lonesome, skinny, fairy old white men on a planet which was dying fast.”

Breakfast of Champions

Foreword

Following on the successes of two previous dictionary projects, the *CRC World Dictionary of Plant Names* and the *CRC World Dictionary of the Grasses*, Umberto Quattrocchi has undertaken this dictionary of economically important plants. Quattrocchi has again shown a broad grasp of the literature, of botanical nomenclature and of many languages to produce this guide to plants that are used by people around the world in medicine, food, and cultural practices. Gathered from many sources we have here a guide to plants that will bring us the pleasure of quickly finding an answer with well-documented sources. Because use in medicine is one of several ways in which this book can inform the reader, Quattrocchi is clear that this work is not to be done on the authority of these listings alone. Sources in some entries are contradictory or missing. In this, one is reminded in the words of Samuel Johnson: “Dictionaries are like watches; the worst is better than none, and the best cannot be expected to go quite true.” He has done for these plants what was so admirably done in his other works — brought the vast and scattered literature on plant names, and in this case their uses, too, into coherent order so that the inquisitive scholar can get a foothold.

Who better to undertake this particular challenge? A physician by training Quattrocchi provides concise summaries

of plant properties from the literature and offers the appropriate caveats about medical uses. His linguistic skills are evident in his handling of the literature and in the multilingual listings of common names. The derivation of generic names from the standard Greek and Latin are provided, but so, too, are those from many other languages.

Having seen the author at work gives me a certain perspective on how this massive compilation could come about. During his several extended visits to the Harvard University Botany Libraries for work on this and his previous projects, I observed the intensity with which he worked. For months at a time he could be found in the reading room among books and journals of many ilk. Despite the focus on this work, he had time for discussion with those who passed through and those who might have a quick question on the state of the world — he is as well a professor of political science. His diligence in compiling his dictionaries is matched by his enthusiasm for the plants themselves, for the authors of the important and sometimes trivial items that he examined, and for the challenge of ferreting out some of the improbable information he presents in these volumes.

Donald H. Pfister
Cambridge, Massachusetts

Preface

THE STRUCTURE

- Genus, species, scientific names, synonyms and related keywords, botany, description, ecology, distribution and habitat, cultivation, history, literature, and author's names.
 - Enclosed in round brackets, italicized in alphabetical order, you will find not only accepted and tentatively accepted names, but also names of no botanical standing, names of unknown or of uncertain application, names not accepted by the authors as a formal taxonomic category, names published without a description or inadequately described, names invalid and/or not validly published, misapplied names, rejected names and/or names rejected in favor of a conserved (but later) name, incorrect entries, superfluous names, varieties, variety, illegitimate names and/or not validly published, dubious, approved, nomenclatural, lectotype, infraspecific names, homonymic names, homonyms and infraspecific taxa, nothomorphs, isonyms, duplicate records, synonyms (old or dead, in recent or current use), basionyms, orthographic variants, citation errors, next higher taxon and synonyms, probable synonyms and possible synonyms for genus and genera and species, incertae sedis, nomen nudum, nomen illegittimum, nomen confusum, nomen invalidum, nomen conservandum, nomen usitatum, etc.
 - Reasonably clear scientific plant names, each arranged alphabetically. The genera and species that are dealt with in this work are arranged in alphabetical order. This is very important for the accuracy of plant identification and bibliographical references! At the same time I also recognize that it is impossible that everyone will agree with the generic and specific treatment I decided to follow. Some decisions may prove to be incorrect, but this work is so full of important and useful information that perhaps it may be considered worthy to serve as a starting point for something better.
 - Common names and vernacular names.
 - Parts used.
 - Pharmacology, pharmacy, chemical constituents, active ingredients, compound structure, molecular properties, solvent, and physiological action.
 - Therapeutic values, medicine, indications and clinical uses (primary and secondary uses), and pharmacological effects.
 - Poisonous principles, toxin, toxicology, toxicity, action of poisons, symptoms and lesions, conditions of poisoning, clinical signs (ante mortem, post mortem) (men, sheep, horses, livestock, etc.), and prevention and treatment.
- Ethnobotany, economic botany, medical ethnobotany, ethnopharmacological investigations, a medicinal flora, an account of the flora of a region, data on medicinal uses as recorded from literature, information from notes and observations recorded locally and/or personally in the region
 - Traditional uses, charms, sorcery, magic, black magic, rites and ceremonies, folk medicine, drugs taken to cure disease, poison to kill the enemy, witchcraft, and food.

This information has been gathered from a wide variety of electronic, print, and other sources, such as fields, herbaria, monographs, libraries, pamphlets, botanical literature and literature tout court, available literatures in the natural history libraries, floras, local floras and local histories, nomenclatural histories, ICBN, ICNCP (International Code of Nomenclature for Cultivated Plants), International Union for Conservation of Nature and Natural Resources, IPNI, reference collections, botanical gardens, nurseries, horti, pictures, dictionaries, drawings, poetry, journal articles, personal communications, biographies and scientific biographies, British Museum General Catalogue of Printed Books, Missouri Botanical Garden — w3 TROPICOS, Missouri Botanical Garden's VAST (VAScular Tropicos) nomenclatural database, The Royal Botanic Gardens Kew Library Catalogue on the World Wide Web and databases, many floras, *Methods and Approaches in Ethnobotany* (S.K. Jain, Ed.), *A Handbook of Ethnobotany* (S.K. Jain and V. Mudgal), and *Harrison's Principles of Internal Medicine* (16th Edition, McGraw-Hill), *Goodman and Gilman's The Pharmacological Basis of Therapeutics* (11th Edition, McGraw-Hill), *The Merck Veterinary Manual* (Tenth Edition), *The Merck Manual of Diagnosis and Therapy* (Eighteenth Edition), etc.

Descriptions compiled following the patterns and the paths and the outlines and the schemes of the great authors and their works: Linnaeus, Engler and Sir J.D. Hooker, Asa Gray, Torrey, Lamarck, De Candolle, Michel Adanson, Humboldt, Charles Russell Metcalfe, Frans A. Stafleu and friends, McClure, M.E. Barkworth, Agnes Chase, H.J. Conert, Kuntze, Boufford, Grisebach, Henrard, C.E. Hubbard, Hitchcock, R. Pilger, O. Stapf, Steudel, Trinius, Wallich, L. Watson and M.J. Dallwitz, Constantine S. Rafinesque, William T. Stearn, R.K. Brummitt, H. Walter Lack, W.D. Clayton, D.J. Mabberley, Dan H. Nicolson, etc. Their work is my cornerstone.

We have obviously included reference information to denote the original sources of such information and all available descriptions. Every effort has been made to trace the original source of copyright material contained in this dictionary and to ensure the accuracy of the references and other data, but this has not been possible in every case. Bibliographic references are listed by year, with the exact

titles or in general using the abbreviation recommended by *Botanico-Periodicum-Huntianum*. Each entry must be considered nothing else than a monograph, more or less complete, more or less exhaustive.

To err is human! ...and any errors are mine alone....

The responsibility of all judgments and errors is my own. And if anything is omitted, misstated, misjudged or misquoted in the text, I hope the reader will excuse my human limitations. This work is always in progress and neverending. It is impossible to list, illustrate, and describe all the plants.

This dictionary, just as my previous two, is not meant to be only and strictly a nomenclatural work. There are many different subjects involved: the history of botany and botanists, ethnobotany, ethnomedicine, systematic botany, taxonomy, active principles, therapy, diagnosis, travels and botanical discoveries, magico-religious beliefs, explorations, history of genera and species and their names, history of medicine, biography, bibliography, linguistics, history of mankind, history of ideas, history of science, superstitions, geography, plant collectors, etc.

DISCLAIMER/WARNING/CAVEAT

Repetita iuvant...

These pages are only meant to be informative. Do not consult these pages unless you agree not to hold the author or

publisher liable for any errors or omissions. Neither the author nor the publisher of this dictionary endorses or recommends the use of these plants. This material is for informational purposes only, not as a guide to home treatment. The information **is not recommended for use**. These statements have not been evaluated by the FDA and are not intended to diagnose, cure, treat or prevent disease. Consult a medical toxicologist and/or regional poison center for further assistance.

There is incomplete toxicity information and incomplete efficacy information on most of these plants. The information concerning edibility is taken from the literature on botanical, economic, and medicinal plants, and the degree of reliability is unknown. We discourage the use of any of these plants for self-medication.

Many people believe that plants are less toxic, more natural, and safer than manufactured drugs. The practice of folk medicine is a serious and very personal matter among native peoples, often very sacred. Toxicity studies should be done to determine their safety. None of these plants will ever be completely known phytochemically.

Information is continually increasing and being modified; it is neither error free nor comprehensive. This dictionary reproduces information that sources believe to be correct on how people used plants. It is not the intention to prescribe or make specific health claims for any of the described species.

The author does not recommend self-diagnosis or self-medication. Please review the information retrieved with your professional healthcare provider.

Acknowledgments

Many thanks to the HUH (Harvard University Herbaria) and to the Harvard University Botany Libraries, to all the staff for their warm welcome, their friendship, and invaluable assistance.

Above all I am immensely indebted to Patrizia Curcio, who gave me the motivation to complete this work despite many trying circumstances. For her care and support, for keeping my spirits up, thanks!

And thanks to

Renata e Franco, Juventus Football Club, Jerry Garcia and the Grateful Dead, Thelonious Monk, Groucho LaCursc, Patrizia Curcio, Donald H. Pfister, Charles Davis, Dave Boufford, Kanchi Gandhi, Judith A. Warnement, Lisa DeCesare, Gretchen Wade, Maureen O'Kelly, Emily Wood, Brian Franzone, Julie McIntosh Shapiro, Anthony R. Brach, E. von Raab-Straube, Debabrata Swain, B K Leena, B K Nirupama, Miles Davis, J.S. Bach, John Cage, Glenn Gould, Marx Brothers, Jacques Tati, Cate Blanchett, John Garfield, Jerry Seinfeld and Larry David & Co., Rahsaan Roland Kirk, John Coltrane, Charles Mingus, W.A. Mozart, Gabriel Faurè, Giacinto Scelsi, Frances-Marie Uitti, Francis Poulenc, Kathleen Ferrier, Elmore James, Muddy Waters, Linton Kwesi Johnson, Robert Wyatt, Bryan Ferry, Little Jimmy Dickens, Roy Acuff, Donna the Buffalo, Dan Tyminski, Alison

Krauss, The Nitty Gritty Dirt Band, Joe Strummer, Raymond Queneau, Georges Perec, Edmond Jabès, Elias Canetti, Kurt Vonnegut, Harold Bloom, David Foster Wallace, John Berger, Robert Walser, Max Frisch, Karl Kraus, W.H. Auden, Marcel Proust, Wallace Stevens, Frank O'Hara, Anne Sexton, Jorie Graham, Philip Larkin, Alan Sillitoe, John Betjeman, Douglas Adams, Dick Brummitt, Rodolfo E.G. Pichi Sermolli, Gerrit Davidse, Truong-Dau (Jardin botanique et zoologique de la ville Ho Chi Minh, Vietnam), Robert Laughlin, Siegmund Seybold, Dan H. Nicolson, Michael Charters, Bernard M. Rosenthal, Ippolito Pizzetti, Angelo Tombini, Silvio Poletto, Ferdinando Albeggiani, Cäsar Scaffidi, Pietro Puccio, Annarosa Macrì, Michele Ciacciofera, Francesco Avola, Francesco M. Raimondo, Joseph Beuys, Peter Pan, Cesare Pavese and Beppe Fenoglio, Via Don Giovanni Minzoni, Piazza Generale Cascino, Via Broseta, Via Milazzo, Via Ghislandi, Via Marturano, Kolej Komenského, Via Tavola Tonda, Via Ignazio Gioè, Via Giovanni Meli, Irving House, Divinity Avenue, Government of Orissa Forest Department, and many friendly/unfriendly reviewers for the useful suggestions that contributed to this manuscript. Om Shanti.

Last, but not least, I would like to thank Jill Jurgensen, Mimi Williams, Pam Morrell, and John Sulzycki of CRC Press who embraced this project with their personal love and professional care. Grazie!

About the Author

- I like to walk barefoot.
- I like the dark and the sunset.
- I like to be an inhabitant of the Reign of Serendipity.
- I like to play golf.
- I like walking and trekking.
- I like the rain (in Sicily is so rare and precious...).
- I like the silence.
- I like the sounds of the world.
- I like to drive my (motor)scooter Leonardo - Aprilia.
- I like to receive catalogues from L.L. Bean and Lands' End.
- I like the perfumes and tastes of my garden.
- I like to listen to the radio during the night.
- I like listening music when driving my car.
- I like to carry books with me.
- I like to “navigate” through H.G. Liddell & R. Scott, *Greek–English Lexicon*, Clarendon Press/Oxford.
- I like to read German and Akkadian texts even if I really don't know the languages.
- I like to play football (or soccer..., as you like it...).
- I like to be a supporter of Juventus (the most fantastic football team in the world! or not?).
- I like the perfumes of Balmain, Guerlain and Serge Lutens (Shiseido).
- I like to study.
- I like to drink tea (Lapsang, Souchong, and Darjeeling my preferred, not too hot, without sugar).
- I like to listen (at home, I don't like to go to the concerts, and because of this I buy CDs anywhere and everywhere, at this moment over 7000) and study music: from pre-Bach Ricercari to today's music, from the Beach Boys to John Cage, from Del Shannon (Runaway!) to Muddy Waters, from Erik Satie to Jonathan Harvey to Conlon Nancarrow to Morton Feldman, from Fleetwood Mac to Eno, from the Everything but the Girl to Gabriel Fauré, from John Coltrane to Thelonius Monk, from The Audience to Gaetano Scelsi and J.S. Bach and Francis Poulenc and Guillaume Dufay and Mozart and Arnold Schoenberg and Anton Webern and Frances-Marie Uitti and Leos Janacek and Alban Berg and Scriabin and John Gay (“The Beggar's Opera”) and Darius Milhaud, from Bud Powell to Dodo Marmarosa to Charlie Parker to Rahsaan Roland Kirk to Sonny Rollins to Bill Perkins to Charles Mingus to Miles Davis to Art Pepper to Bill Evans, from Phil Collins to Sam Cooke to Buddy Holly to Chuck Berry to Sonny Boy Williamson to John Lee Hooker to Willie Dixon to The Who to the Grateful Dead to Celia Cruz to Tom Waits to John Lennon and The Beatles to The Velvet Underground to Eric Clapton to John Cale to David Byrne, from Georges Moustaki to Simon & Garfunkel to Henry Purcell (Dido and Aeneas) to Beethoven.
- I like the oboe and piano and violoncello (sorry, I don't play music! damn!!! but I am able to whistle).
- I like Glenn Gould, Alfred Brendel, Sviatoslav Richter, Rosalyn Tureck, Arturo Benedetti Michelangeli, Mitsuko Uchida, Grete Sultan, Kim Kashkashian, Anner Bylisma, Janos Starker, Frances-Marie Uitti
- I like to receive catalogues from antiquarian booksellers.
- I like to collect books, over 40,000: voyages and travel, Asia and the Pacific, natural history, medicine and science, history of science and medicine, early science, history of ideas, botany and botanists, early printing, illustrated books, Africa, first editions from the 15th to the 20th century, unusual books, Americana of all periods, Marxism, philosophy, social history, English and American and French and German and all-over-the-world literature, reference works and books about books, subject and general bibliographies, standard sets, ethnology and anthropology, religion, dictionaries, linguistics, language, garden history, etc. etc.
- I like to collect rare books from the 16th century: Aldus Manutius, Giolito de' Ferrari, de Marnef, and Jodocus Badius.
- I like to collect John Gould prints.
- I like the works of Cuno Amiet (Swiss painter, 1868–1961), Sonia Delaunay (painter and textile designer, 1885–1979), and Pierre Alechinsky (Belgian painter).
- I like to collect glass paperweights and elephants and unusual items.
- I like to take pictures with my Leicas (M3 and M6)
- I like to collect autographs of Gabriel Fauré (French musician, 1845–1924) and books by and about him.
- I like to collect autographs of Alexandra David-Neel (French explorer, 1868–1969; she spent many years in the East and especially in Tibet) and books by and about her.
- I like to collect autographs of poets and authors and writers and musicians, etc. etc.
- I like to win prizes/awards with my books.
- I like to have two degrees, in medicine (specialist in gynecology and Chinese Materia Medica) and political sciences.
- I like to teach at the University of Palermo, Faculty of Natural Sciences.
- I like to travel (for pleasure and study and pleasure and study and pleasure and study): Indonesia and

- Bali, United States, Brazil, Venezuela, Amazon, Hong Kong, Singapore, Vietnam, Philippines, India, Ladakh and Bhutan, Mexico, Maldives, Mauritius, Sri Lanka, Thailand, Syria, Kew Herbarium, etc., etc.
- I like to be a member of the USGA, of the Botanical Society of America, of the International Palm Society, of the Royal Horticultural Society, of the International Dendrology Society, of the Society for the Economic Botany, of the Australian Geographic Society, etc.
 - I like/liked to be a subscriber of *The New York Review of Books*, *Science*, *New York Times*, *The Garden*, *Down Beat*, *Gramophone*, *National Geographic*, *Hortus*, *International Opera Collector*, *International Piano Quarterly*, *Kew Magazine*, *Curtis's Botanical Magazine*, *New Plantsman*, *Richard Strauss Blätter*, *Cadence*, *Musica*, *Musica Jazz*, *Australian Geographic*, *International Journal of Plant Sciences*, *La Bibliofilia*, *Pacific Horticulture*, *Desert Plants* (University of Arizona), *The Orchid Review*, *Veld & Flora*, etc.

Abarema Pittier Fabaceae (Ingeae, Leguminosae, Mimosaceae)

Perhaps from a vernacular name, see *Arboles y arbustos del orden de las leguminosas ...* Caracas 56. 1927, *Ann. New York Acad. Sci.* 35(3): 101–208. 1936.

Abarema jupunba (Willd.) Britton & Killip (*Abarema jupunba* Britton & Killip; *Abarema trapezifolia* Pittier; *Abarema trapezifolia* (Vahl) Pittier; *Acacia jupunba* Willd.; *Feuillea jupunba* Kuntze; *Feuillea jupunba* (Willd.) Kuntze; *Inga trapezifolia* DC.; *Inga trapezifolia* (Vahl) DC.; *Jupunba jupunba* Britton & Rose; *Jupunba jupunba* (Willd.) Britton & Rose; *Jupunba trapezifolia* (Vahl) Moldenke; *Mimosa jupunba* Poir.; *Mimosa trapezifolia* Vahl; *Mimosa trapezifolia* Roxb.; *Pithecellobium jupunba* (Willd.) Urb.; *Pithecellobium jupunba* Urb.; *Pithecellobium trapezifolium* Benth.; *Pithecellobium trapezifolium* (Vahl) Benth.)

Brazil. Perennial non-climbing tree, young parts rusty-pubescent, whitish corolla

See *Species Plantarum*. Editio quarta 4(2): 1067. 1806, Vahl, Martin (1749–1804), *Eclogae Americanae* 3: 36, t. 28. Hauniae, 1796–1807, *Species Plantarum*, ed. 4 [Willdenow] 4(2): 1067. 1806, *Encycl.* (Lamarck) Suppl. 1. 70. 1810, *Hort. Bengal.* 93. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 441. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 142. 1840, *London J. Bot.* 2: 142. 1843, *Revisio Generum Plantarum* 1: 185. 1891 and *Symbolae Antillarum* 2(2): 257–258. 1900, *Trabajos del Museo Comercial de Venezuela* (Bol. Minist. Relac. Exter. Nos. 10, 11, & 12) 2: 86. 1927, *North American Flora* 23(1): 27. 1928, *Bulletin of the Torrey Botanical Club* 59: 155. 1932, *Annals of the New York Academy of Sciences* 35(3): 126. 1936, *Memoirs of the New York Botanical Garden* (Mimos. & Caesalpin. Colomb.) 74(1): 69. 1996

(Scraped roots infusion to treat dandruff. Seeds swallowed by young women just before intercourse as a fertility drug.)

in English: bread-and-cheese, soapwood

in Guyana: huriasa, huruasa, pakuri

Abelmoschus Medik. Malvaceae

Probably from the Arabian *abul-l-mosk* ‘father of musk, source of musk’, referring to the seeds, see Medikus, Friedrich Kasimir (1736–1808), *Ueber einige künstliche Geschlechter aus der Malvenfamilie, denn der Klasse der Monadelphien.* 45–46. Mannheim, 1787, *Botanical Magazine* 41: sub t. 1702.

1815 and *Blumea* 14: 1–251. 1966, *Abelmoschus: a taxonomical and cytogenetical overview*. In: IBPGR. Report of an international workshop on okra genetic resources, held at the National Bureau for Plant Genetic Resources (NBPGR), New Delhi, India, 8–12 October 1990. International Crop Network Series 5. International Board for Plant Genetic Resources (IBPGR), Rome, Italy. pp. 52–68. 1991, Verdcourt, B. & Mwachala, G.M., 2009. *Malvaceae*. In: Beentje, H.J. & Ghazanfar, S.A. (Editors). *Flora of Tropical East Africa*. Royal Botanic Gardens, Kew, Richmond, United Kingdom. 2009. Taxonomical confusion, this genus was previously included within *Hibiscus*, thus literature has to be interpreted with care.

Abelmoschus caillei (A. Chev.) J.M.C. Stevels (*Abelmoschus caillei* Stevels; *Abelmoschus esculentus* auct. non (L.) Moench; *Abelmoschus manihot* auct. non (L.) Medik.; *Hibiscus esculentus* auct. non L.; *Hibiscus manihot* auct. non L.; *Hibiscus manihot* L. var. *caillei* A. Chev.)

West and Central Africa. Erect herb, stout, often woody at base, flowers axillary, petals yellow often turning pink, young leaves consumed as spinach, young immature fruits consumed cooked or fried, leaves good cattle feed, often confused with *Abelmoschus esculentus* and/or *Abelmoschus manihot*

See *Euphytica* 31: 241–252. 1982, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* Sér. 4, 10(2): 138. 1988, *African Journal of Biotechnology* 7(10): 1426–1431. 2008

(Mucilage used as a blood plasma replacement or blood volume expander; leaves poultices emollient, sudorific, antiscorbutic, to treat dysuria.)

in English: West African okra, West African okro

in India: usipak

Abelmoschus crinitus Wall. (*Abelmoschus cancellatus* Voigt; *Abelmoschus hainanensis* S.Y. Hu; *Bamia cancellata* Wall.; *Bamia crinita* Wall.; *Hibiscus bodinieri* H. Lévl.; *Hibiscus cancellatus* Roxb. ex G. Don, not L.; *Hibiscus cavaleriei* H. Lévl.; *Hibiscus crinitus* (Wall.) G. Don)

South Asia, China. Herb, long yellow hairs, erect, axillary flowers usually solitary, corolla yellow with a purple spot in the centre, fresh roots edible

See *Species Plantarum* 2: 693. 1753, *Plantae Asiaticae Rariores* 1: 39, pl. 44. 1830, *A General History of the Dichlamydeous Plants* 1: 480. 1831 and *Repertorium Specierum Novarum Regni Vegetabilis* 12(317–321): 184. 1913, *Flora of China* 153: 37, pl. 8, f. 1. 1955

(Fresh leaves cataplasm for infected wounds. Tuberous roots eaten fresh to cure impotence; root decoction to cure diarrhea and dysentery. Veterinary medicine, tubers crushed with seeds of *Sorghum vulgare* to promote fertility of sheep.)

in China: chang mao huang kui

in India: bana bhindi, bherwakand, bondki phul, kachalu, kamlya, kapsatta, kondabenda

Abelmoschus esculentus (L.) Moench (*Hibiscus esculentus* L.; *Hibiscus longifolius* Willd.; *Hibiscus longifolius* Sessé & Moc.; *Hibiscus longifolius* Roxb., nom. illeg.)

Tropical, subtropical and warm temperate regions, uncertain origin. Herb, erect, stout, flowers axillary, petals yellow often turning pink, erect capsule, young immature fruits eaten cooked or fried

See *Species Plantarum* 2: 693, 696. 1753, *Ueber einige künstliche Geschlechter aus der Malvenfamilie* 45–46. 1787, *Methodus Plantas Horti Botanici ...* 1: 617. 1794, *Sp. Caracas 1995, Pierre Fatumbi Verger, *Ewé: the use of plants in Yoruba society*. São Paulo 1995

(Used in Ayurveda and Unani. Dried stalks used for the Guinea worm. Root extract aphrodisiac and sex tonic, sedative, given for stomatitis, spermatorrhea, sterility, impotence, dystocia; root powder taken orally to check discharge of sperm with urine and to increase sexual potentiality; roots, infusion or decoction, for cough and syphilis. Fresh washed leaves in cataplasm for infected wounds; leaves emollient, sudorific or antiscorbutic and to treat dysuria. Leaves and ripe fruits for cough; leaves, flowers and unripe fruits for insect sting. Fruit laxative; cooked fruit given for abortion; unripe fruits decoction taken orally to cure syphilis. Veterinary medicine.)

in English: common okra, edible hibiscus, gobbo, gombo, gumbo, lady's finger, okra, okro

in South and Central America: ochro, okra, quiabo, quilombo, quimbombó

in China: huang shu kuei

in India: babniya, bamiya, bamiyah, bawrhaisaiabe, benda, benda-kaya, bendai, bendakaya, bende kaayi, bende kaayi gida, bende-kayi, bende naaru, bendi, bhajichi-bhendi, bhanda, bhelendri, bhenda, bhendan, bhende, bhendekayi, bhendi, bhendo, bhinda, bhindajad, bhindi, bhindi tori, bhindijad, bhindu, binda, darvika, dheras, gandhamula, penda, pitali, ram-turai, ram-turi, ramturai, tindisha, venai-kkay, venda, venda bendi, vendai, vendaik-kay, vendaikkai, vendaikkay, vendakaya, vendi, venta, ventai, ventak-kaya

in Japan: okura

Malay name: kacang bendi

in the Philippine Isl.: okra

in Cameroon: ankoul

in Congo: ngaingai, umvumba

in Ivory Coast, Burkina Faso: gombo

in Madagascar: mana

in Malawi: cilunguthando, nathando, thelele la amwenye, thelele lobzala (Nyanja)

in Nigeria: erula, ila, ilasa, ilasado, illa, iroko, irula

in Rhodesia: mandande

in Senegal: da guo, kanda, kanda a kob, kanda ala, kandalan, kunégo, sumaré

in Sierra Leone: a lontho, bonde, bondei, okro

in Tanzania: mbamia, mbinda

in Togo: gombo

Abelmoschus ficulneus (L.) Wight & Arn. (*Hibiscus ficulneus* L.; *Hibiscus sinuatus* Cav.)

Tropical Africa, India. Herb, annual, green stem mucilaginous, corolla white with deep purple centre, leaves and fruits edible, sometimes confused with *Abelmoschus esculentus*

See *Species Plantarum* 2: 693, 695. 1753, *Monadelphiae Classis Dissertationes Decem* 3: 147, t. 52, f. 2. 1787, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 53. 1834 and *Taxon* 31: 582–583. 1982, *Glimpses of Cytogenetics in India* 2: 287–292. 1989, *Journal of Ethnopharmacology* 45(2): 75–95, 97–111. 1995, *Journal of Ethnopharmacology* 107(3): 463–469. 2006

(Used in Ayurveda and Sidha. Root paste applied on body to cure jaundice, used against fever, diarrhea and other gastrointestinal problems; for scorpion bite root paste applied on the area of the sting and crushed roots drunk with water. Seeds in asthma. Leaves crushed with salted water used against diarrhea.)

in English: native roselle

in India: jangli-bhendi, jangli bhendi, janil-bhendi, karu-mancarikam, kattu-vendai, kattuventai, kattuventicceti, mal bhindi, nelabenda, parupubenda, ranbhendi, tindisa

Abelmoschus manihot (L.) Medik. (*Hibiscus manihot* L.; *Hibiscus papyrifera* Salisb.)

SE Asia, Indonesia, New Guinea. Perennial herb or under-shrub, leaves lobed

See *Species Plantarum* 2: 696. 1753, *Ueber einige künstliche Geschlechter aus der Malvenfamilie* 46. 1787

(Root paste applied for treating cuts and for healing wounds. Flowers used for dysentery, asthma; the sap for cough, cold; leaves boiled and eaten to treat dysentery, the solution used to bathe a skin rash.)

in India: aibika, bambuda, jangali bhendi, jangli bhindi, ran bhendi, uichhume, usipak

in Papua New Guinea: dahang, maniota

Abelmoschus manihot (L.) Medik. subsp. ***tetraphyllus*** (Hornem.) Borss.

India. Undershrub, flowers pedicellate, corolla yellow with purple centre, acuminate 5-angled capsules

See *Blumea* 14: 97. 1966

(Fresh latex applied externally on cuts and wounds. Roots crushed and the juice given to children for pneumonia.)

in India: ladipma, popongti

Abelmoschus moschatus (L.) Medik. (*Abelmoschus abelmoschus* (L.) Karsten, nom. inval.; *Abelmoschus moschatus* var. *betulifolius* (Mast.) Hochr.; *Abelmoschus officinalis* Endl., nom. illeg.; *Hibiscus abelmoschus* (L.) Karsten, nom. illeg.; *Hibiscus abelmoschus* L.; *Hibiscus abelmoschus* var. *betulifolius* Mast.; *Hibiscus abelmoschus* var. *genuinus* (L.) Hochr.; *Hibiscus cardiophyllus* Baill.; *Hibiscus chinensis* Roxb., nom. nud.; *Hibiscus collinsianus* Nutt. ex Torr. & A. Gray; *Hibiscus moschatus* (Medik.) Salisb.; *Hibiscus moschatus* Roxb. ex Wight & Arn.; *Hibiscus moschatus* Salisb.)

Tropics of the Old World. Herb, annual, tall, branches hispid-hairy, flowers in terminal or axillary clusters, corolla bright yellow with reddish purple base, prickly capsule, seed musky

See *Species Plantarum* 1: 696. 1753, *Ueber einige künstliche Geschlechter aus der Malven-Familie* 46. 1787, *Prodr. Stirp. Chap. Allerton* 387. 1796, *Hortus Bengalensis*, or a catalogue ... 51. 1814, *A Flora of North America*: containing ... 1(2): 237. 1838, *Catalogus horti academici vindobonensis* 2: 253. 1842, *Smithsonian Contributions to Knowledge* 3(5): 22. 1852, *The Flora of British India* 1: 342. 1875, *Bulletin Mensuel de la Société Linnéenne de Paris* 509. 1885, *Fl. Deutschl.* ed. 2 2: 157. 1894 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 4: 151. 1900, *Nova Guinea* 14: 165. 1924, *Syst. Bot. Monogr.* 25: 23. 1988, Rubem

Franca, *Arabismos*. Recife 1994, *Quart. J. Forest Res.* 21(3): 61–72. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 313–373. 2007

(Used in Ayurveda and Unani. Diuretic, antifertility, anti-inflammatory, stomachic, febrifuge, antirheumatic, aphrodisiac, digestive, emollient, antispasmodic, insecticide, fungicide. Fruits for gonorrhoea. For headache, rheumatic pains, fever in children, pound the root and poultice. Leaves decoction used for coughs, not recommended for pregnant women. Roots solution in water used for kidney stone, not recommended for pregnant women; root of *Peucedanum nagpurensis* mixed with root of *Abelmoschus moschatus* given to increase semen. Ceremonial, ritual, ingredient of Patra pooja in different religious pooja ceremonies.)

in English: ambrette, musk mallow

in Brazil: abelmosco, algália, ambarino

in French Guiana: ambrette, calalou musqué

in China: huang kui

Rácz; *Picea concolor* Gordon & Glendinning; *Picea lowiana* Gordon; *Pinus concolor* Engelm. ex Parl.; *Pinus lowiana* (Gordon) Mc Nab)

North America. Perennial tree

See *Journal of the Horticultural Society of London* 5: 210. 1850, Gordon, George (1806–1879), *The Pinetum*: being a synopsis of all the coniferous plants at present known, with descriptions, history, and synonymes and comprising nearly one hundred new kinds / by George Gordon ... assisted by Robert Glendinning (1805–1962)... 155. London: Henry G. Bohn, 1858, *Verhandlungen des Naturhistorischen Vereines der Preussischen Rheinlande und Westphalens* 18: 261. 1861, *A Supplement to Gordon's Pinetum* 53. 1862, *Proceedings of the Royal Horticultural Society of London* 3: 317. 1863, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 426. 1868, *Proceedings of the Royal Irish Academy* 2: 680. 1876, *Cone-bearing Trees of the Pacific Slope*, ed. 3 64. 1895 and *Kalmia* 13: 3. 1983, *Phytologia* 68: 11–12. 1990, *Journal of the International Conifer Preservation Society* 15: 38. 2008

(Antirheumatic, for rheumatism, venereal disease, cuts, sores or boils, tuberculosis, pulmonary troubles.)

in English: California white fir, Rocky Mountain white fir, Sierra white fir, white fir

in Mexico: pino real blanco

Abies densa Griff. (*Abies spectabilis* (D. Don) Spach var. *densa* (Griff.) Silba)

Bhutan. Tree, spreading branches, forms natural monospecific stands

See *Histoire Naturelle des Végétaux - Phanérogames* (Tome) 11: 422. 1842, *Notulae ad Plantas Asiaticas* 4: 19. 1854 and *Phytologia Memoirs* 7: 10. 1984

(Leaves for asthma, bronchitis and stomach troubles.)

in English: East Himalayan red fir, silver fir

in Bhutan: dungshing

in Nepal: gobre salla

in Sikkim: gobre salla

Abies fraseri (Pursh) Poir. (*Abies balsamea* (L.) Mill. subsp. *fraseri* (Pursh) A.E. Murray; *Abies balsamea* var. *fraseri* (Pursh) Spach; *Picea balsamea* (L.) Loudon var. *fraseri* (Pursh) Nelson; *Picea fraseri* (Pursh) Loudon; *Pinus balsamea* L. var. *fraseri* (Pursh) Nutt.; *Pinus fraseri* Pursh)

North America. Perennial tree

See *Flora Americae Septentrionalis*; or, ... 2: 639–640. 1814[1813], *Encyclopédie Méthodique. Botanique ... Supplément* 5(1): 35. 1817, *The Genera of North American Plants* 2: 223. 1818, *Arboretum et Fruticetum Britannicum* 4: 2340. 1838, *Histoire Naturelle des Végétaux - Phanérogames* 11: 422. 1841, *Pinaceae: Being a Handbook of the Firs and Pines* 179. 1866 and *Kalmia* 12: 18. 1982

(Used for wounds, venereal diseases, kidney trouble, cough and ulcers, urinary diseases.)

in English: Fraser's balsam fir, Fraser fir, she-balsam, southern balsam fir

Abies grandis (Douglas ex D. Don) Lindl. (*Abies grandis* Franco, nom. illeg.; *Abies grandis* A. Murray, nom. illeg.; *Abies grandis* Hook., nom. illeg.; *Abies grandis* Engelm., nom. illeg.; *Abies grandis* Lindl.; *Abies grandis* (Dougl.) Forbes; *Pinus grandis* Douglas ex D. Don; *Pinus grandis* Douglas)

North America.

See *Companion Bot. Mag.* 2: 147. 1836, *Flora Boreali-Americana* 2(10): 163. 1838, *Cat. Grain. Conif. Mexic.* 11. 1857, *American Journal of Science, and Arts*, ser. 2, 34: 330. 1862, *Proceedings of the Royal Horticultural Society of London* 1863(3): 308. 1863 and *Fl. Canada* 2: 93–545. 1978[1979], *Acta Bot. Boreal.-Occid. Sin.* 18(3): 440–444. 1998

(Used for infected eyes, sore eyes, boils or ulcers, sore throat, colds, lung hemorrhage, tuberculosis, stomach ailments, rheumatism. Resin infusion taken for whooping cough; resin rubbed on the throat and chest for colds. Bark infusion drunk for stomach ailments, tuberculosis. Bruised needles decoction as an eyewash. Ceremonial, used in purification rites.)

in English: balsam fir, grand fir, lowland white fir

Abies lasiocarpa (Hook.) Nutt. (*Abies balsamea* subsp. *lasiocarpa* (Hook.) B. Boivin; *Abies balsamea* (L.) Mill. var. *fallax* (Engelm.) B. Boivin; *Abies bifolia* A. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 32–281. 1978

(Used in Ayurveda and Unani. Resin said to intoxicate when taken internally. Gum mixed with oil of roses rubbed on forehead for headache. Leaves antiperiodic, astringent, contraceptive, antispasmodic, carminative, expectorant, stomachic, tonic, aphrodisiac, CNS depressant, used in the treatment of asthma, bronchitis, colds, intermittent fevers, rheumatism and nasal congestion, for malaria in infants; leaves decoction for digestion, cough, asthma and bronchitis; infusion of leaves of *Abies spectabilis*, *Pinus wallichiana* and *Thymus linearis* drunk to relieve bronchitis and whooping cough.)

in English: East Himalayan fir, East Himalayan silver fir, high level Himalayan fir, Himalayan fir, Himalayan silver fir

in China: zang leng shan

in India: badar, bang, barami, chirao, dhatripatra, gobre salla, kanda morinda, kolroi, manduparani, morinda, panchali tung, raga, rai, raisalla, sala, span, sukodara, taleesapatram, talis patra, talisa, talisam, talispatar, talisapathre, talispatra, talisapatradya, talisapatram, talispatra, talispatri, tapis patra, thaalespathri, tosh, zarnab

in Lepcha: daong shyong koong, saong koong

in Nepal: gobra salla, gobre salla, talis patra, thingre salla

in Tibet: ba-lu

Abroma Jacq. Sterculiaceae (Malvaceae)

Greek *a* ‘not’ and *broma* ‘food’, referring to the poisonous nature, see *Hortus Botanicus Vindobonensis* 3: 3. 1776.

Abroma augustum (L.) L.f. (*Ambroma augusta* L.f.; *Ambroma augusta* (L.) L.f., also *augustum*; *Theobroma augustum* L.)

Tropical Asia. Shrubby tree, spreading branches, large shrubs or small trees, evergreen, lianescent, flowers with purple red petals, calyx light green, fruits winged, bark provides a strong white fiber which makes a good substitute for hemp, lowland forest

See *Species Plantarum* 2: 782. 1753, *Systema Naturae*, ed. 12 3: 233. 1768, *Hortus Botanicus Vindobonensis* 3: 3. 1776, *Supplementum Plantarum* 54, 341. 1782 and *Bulletin of the Botanical Survey of India* 11: 454. 1969, *Bulletin of the Botanical Survey of India* 14: 170. 1972

(Used in Ayurveda. Stem bark infusion drunk in menstrual disorders. Roots for dysmenorrhea, dropsy and skin diseases. Glutinous sap or fresh root used in dysmenorrhea, venereal diseases; for headache, pound the root and poultice; root paste with bark of *Adhatoda zeylanica*, *Gmelina arborea* and roots of *Amaranthus spinosus* applied on forehead in headache; root bark paste and some peppers given to a woman who fails to conceive; dry powdered roots with bark of *Dillenia indica* and *Terminalia chebula* given in urinary diseases. Stem sap with the macerated rhizomes of *Zingiber purpureum* applied to sprains to relieve pain; oil from the endosperm consumed in fever and cold, applied externally for ringworm and scabies. Leaves as diuretic and antidiabetic; an infusion given for gonorrhoea; for headache, pound the leaves and poultice; leaf petioles to cure dysentery. Magic, contact therapy, a piece of root tied round the loin as a relief from dysentery and cholera.)

in English: devil's cotton

in Bangladesh: ulatkambal

in China: ang tian lian

in India: ban kapah (the roots), bon kapahi, bon khopai, chuli, habit phalau, kapsi, kumal, melpundi gida, melpundigida, olaktambol, olat kamal, olat kambal, olatkambal, olutkombul, pisaca karpas, pisaca karpasa, pivari, sanukapashi, sivapputtutti, uchchata, ulat kamal ki jad, ulat kambal, ulat-kambal, ulatkambal lakadi, ulatkambal mool, ulutkambal

in Indonesia: lenga

in Malaysia: kayu singa, kuku singa, rami sengat

Abroma fastuosum R. Br. (*Abroma fastuosa* R. Br.; *Abroma fastuosum* Gaertn.; *Abroma fastuosum* Vent.; *Abroma fastuosum* Jacq.)

Philippines.

See *Species Plantarum* 2: 782. 1753, *Systema Naturae*, ed. 12 3: 233. 1768, *Hort. Bot. Vind.* 3 (1776) 3, t. 1. 1776, *Fruct.*

et Sem. Pl. 1 (Dec. 1788) 307, t. 64, fig. 1. 1788, *Hortus Kewensis*; or, a catalogue ... (W.T. Aiton), ed. 2. 4: 409. 1812

(Root emmenagogue, for dysmenorrhoea.)

in Philippines: anabo

Abronía Juss. Nyctaginaceae

Greek *habros* ‘delicate, soft’, referring to the involucre, see *Genera Plantarum* [Jussieu] 448–449. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 469, pl. 105. 1791, *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 92, 96. 1843, *Hooker’s Journal of Botany and Kew Garden Miscellany* 5: 261. 1853, *Beitr. Syst. Nyctag.* 31. 1897.

Abronía elliptica A. Nelson (*Abronía fragrans* fo. *elliptica* (A. Nelson) Heimerl ex Rydb.; *Abronía fragrans* Nutt. ex Hook. f. *elliptica* (A. Nelson) Heimerl; *Abronía fragrans* Nutt. ex Hook. var. *elliptica* (A. Nelson) M.E. Jones; *Abronía nana* S. Watson var. *harrisii* S.L. Welsh; *Abronía pumila* Rydb.; *Abronía ramosa* Standl.; *Abronía salsa* Rydb.)

North America. Perennial herb

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 5: 261. 1853, *Proceedings of the American Academy of Arts and Sciences* 14: 294. 1879, *Bulletin of the Torrey Botanical Club* 26(1): 7. 1899 and *Bulletin of the Torrey Botanical Club* 29(12): 683–684. 1902, *Contributions to Western Botany* 11: 3. 1903, *Contr. U.S. Natl. Herb.* 12: 321, pl. 39. 1909, *Great Basin Naturalist* 46(2): 258. 1986

(Contact therapy, sedative, to induce sleep.)

in English: fragrant white sand verbena, sand verbena

Abronía fragrans Nutt. ex Hook. (*Abronía fragrans* Nutt. ex Hook. var. *glaucescens* A. Nelson)

North America. Perennial herb, erect, sweet smelling white flowers

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 5: 261. 1853 and *Bot. Gaz.* 34(4): 364. 1902

(Plant used for boils, insect bites, gastrointestinal disorders, for stomach cramps and stomachaches, bowel troubles, as a cathartic, an emetic, a sudorific; infusion used as lotion for sores or sore mouth. Ceremonial, ritual.)

in English: prairie snowball, snowball sand verbena

Abronía latifolia Eschsch.

North America. Perennial herb

See *Mémoires de l’Académie Impériale des Sciences de St. Pétersbourg. Avec l’Histoire de l’Académie* 10: 281 [271]. 1826

(Tonic, stomachic.)

in English: coastal sand verbena, yellow sand-verbena

Abronía maritima Nutt. ex S. Watson

USA, California.

See *Genera Plantarum* 448–449. 1789, *Geological Survey of California, Botany* [W.H. Brewer] 2: 4. 1880

(Infusion of the outer portion of the root taken to aid in the expulsion of a torn placenta.)

in English: sand verbena

Abronía turbinata Torr. ex S. Watson (*Abronía exalata* Standl.; *Abronía orbiculata* Standl.)

North America. Perennial herb

See *Botany* [Fortieth Parallel] 285 (t. 31). 1871 and *Contr. U.S. Natl. Herb.* 12: 318, 322, pl. 36, 40. 1909

(Crushed leaves made into a paste applied to swellings.)

in English: transmontane sand verbena

Abronía villosa S. Watson (*Abronía umbellata* Lam. fo. *villosa* (S. Watson) Voss)

North America. Annual herb, low growing, fleshy, creeping, sticky, trailing reddish stems, ovate dark green leaves, spherical clusters of pinkish flowers

See *American Naturalist* 7(5): 302. 1873, *Vilmorin’s Blumengärtnerei. Dritte neubearbeitete Auflage* 1: 862. 1895

(Plant diuretic. Crushed roots made into a paste applied to burns.)

in English: desert sand verbena

Abronía villosa S. Watson var. *villosa*

North America. Annual herb

See *American Naturalist* 7(5): 302. 1873, *Vilmorin’s Blumengärtnerei. Dritte neubearbeitete Auflage* 1: 862. 1895

(Plant diuretic. Crushed roots made into a paste applied to burns.)

in English: desert sand verbena

Abrus Adans. Fabaceae (Abreae, Leguminosae)

Probably from the Greek *habros* ‘delicate, graceful, beautiful, pretty, soft’, the leaves are soft; Akkadian *eburu*, *ibru*, Hebrew *haber*, Aramaic *habra* ‘favourite slave, friend’; Akkadian *habaru*, *kabaru* ‘to become fat, thick’, *kabru* ‘fat’; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 2. Ansbach 1852 and *Blumea* 10: 607–624. 1960, Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. in Oman: munaqaa

in Senegal: ba koiri, danaréi, danéranigal, gabun, kalila, krakila, kralilé, puri, vé, xalila

Abutilon permolle (Willd.) Sweet (*Abutilon peraffine* Shuttlew. ex A. Gray; *Sida permollis* Willd.)

USA, Florida, Mexico.

See *Species Plantarum* 2: 683–686. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 723. 1809, *Hortus Britannicus* 1: 53. 1826, *Smithsonian Contributions to Knowledge* 3(5): 20. 1852 and *Fieldiana, Bot.* 24(6): 324–386. 1949, *Fl. Chiapas* 3: 1–90. 1990

(To draw boils.)

in English: velvet leaf

Abutilon persicum (Burm. f.) Merr. (*Sida persica* Burm. f.)

India.

See *Flora Indica ... nec non Prodrromus Florae Capensis* 148, pl. 47, f. 1. 1768 and *Philippine Journal of Science* 19: 364. 1921, *Taxon* 29: 535–536. 1980, *Proceedings of the Indian Science Congress Association* 70(3-vi): 89–90. 1983, *Journal of Cytology and Genetics* 28: 71–76. 1993, *Zoo's Print Journal* 21(8): 2372–2374. 2006

(Roots of *Lawsonia inermis*, leaf juice of *Abutilon persicum* along with three seeds of pepper and rice given orally to treat jaundice.)

in India: bettabendu gida

Abutilon theophrasti Medik. (*Abutilon abutilon* (L.) Huth; *Abutilon avicennae* Gaertn.; *Abutilon avicennae* fo. *nigrum* Skvortsov; *Abutilon californicum* Benth.; *Abutilon pubescens* Moench; *Abutilon theophrasti* var. *chinense* (Skvortsov) S.Y. Hu; *Abutilon theophrasti* var. *nigrum* (Skvortsov) S.Y. Hu; *Abutilon tiliifolium* (Fisch.) Sweet; *Malva abutilon* E.H.L. Krause; *Sida abutilon* L.; *Sida tiliifolia* Fisch.)

Asia tropical. Small plant, fleshy herb subshrub-like, stems and twigs hairy, nodding flowers yellow-orange solitary in leaf axils, edible seeds raw or cooked, invasive, a noxious weed

See *Species Plantarum* 2: 685. 1753, *Ueber einige künstliche Geschlechter aus der Malvenfamilie* 28. 1787 and *Blumea* 14: 167. 1966, *Taxon* 29: 725–726. 1980, *Taxon* 31: 761. 1982,

Bot. Zhurn. 71: 1426–1427. 1986, *Chinese Traditional and Herbal Drugs* 23(2): 88–89. 1992, *Fitologija* 46: 12–32. 1993

(Used in Ayurveda. Astringent, demulcent, diuretic, emollient, laxative, ophthalmic, stomachic; bark astringent and diuretic; leaves used in the treatment of dysentery, ulcers and fevers. Seeds extract to treat fistula.)

in English: American jute, butter-print, butter-weed, China jute, Chinese hemp, Chinese jute, cotton-weed, Indian hemp, Indian mallow, Manchurian jute, Tientsin jute, velvet leaf, velvet weed

in China: qing ma

in India: jaya

Acacia Miller Fabaceae (Acacieae, Mimosaceae)

From the Greek *akakia* (*ake*, *akis* ‘tip, thorn, a sharp point’) used by Dioscorides; Akkadian *kakkum* ‘weapon, shaft, thorn’, *qamu* ‘to rise up, stand up, exist’; Hebrew *hoah* ‘thorn’ and *haqaq* ‘to cut, engrave’. The Greek philosopher Theophrastus (–os) (circa 371–287 a.C.) in *De Historia Plantarum* refers about the *Akakia arabicai*. See *The Gardeners Dictionary* ... Abridged ... fourth edition vol. 1. 1754, *Species Plantarum*. Editio quarta 4: 1049. 1806, *London Journal of Botany* 1: 323. 1842, *Transactions of the Linnean Society of London* 30(3): 532. 1875 and *Kew Bulletin* 32(3): 524. 1978, *Austrobaileya* 1(2): 82. 1978, *Botanical Journal of the Linnean Society* 92(3): 238, 240, 247. 1986.

Acacia abyssinica Hochst. ex Benth. (*Acacia abyssinica* Benth.)

East Africa. Perennial non-climbing tree, large tree, flat crown, rough bark, thorns in pairs at nodes, white flowers in round heads, pods straight or slightly curved, edible gum

See *London Journal of Botany* 5: 97. 1846 and *Mem. Bot. Surv. S. Afr.* 44: 1–150. 1979

(Boiled bark for cold and influenza. Veterinary medicine.)

in East Africa: mugaa, munyinya, njora rahisi

in Kenya: mugaa

in Rwanda: umunyinya

Acacia adsurgens Maiden & Blakely (*Acacia adsurgens* Maiden; *Racosperma adsurgens* (Maiden & Blakely) Pedley)

Australia. Perennial non-climbing tree

See *Journal and proceedings of the Royal Society of Western Australia* 13: 28. 1927, *Austrobaileya* 2(4): 344. 1987, *Journal of Ethnopharmacology* 85(1): 25–32. 2003

(Leaves extract antiinflammatory.)

Acacia amythethophylla A. Rich. (*Acacia amythethophylla* Steud. ex A. Rich.; *Acacia karroo* Hayne; *Acacia macrothyrsa* Harms; *Albizia sericocephala* Benth.)

Ethiopia, Tanzania. Perennial non-climbing tree, shrubby, young stem dark brown to yellow-grey, flower heads bright yellow, fragrant, used for firewood

See *Magazzino toscano* 3(4): 13–14. 1772, *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 10: pl. 33. 1827, *London Journal of Botany* 3: 91. 1844, *Tentamen Florae Abyssinicae* ... 1: 245. 1847 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 396. 1900, *Botaniska Notiser* 132: 393. 1979

(Root boiled and drunk for stopping fever, roots used for pneumonia and to keep snakes out of houses; powder roots or roots infusion repels the snakes. Veterinary medicine.)

in Tanzania: itomonji, itomorji, mgushaamphungu, mtutumasiimba, ndomondi

Acacia ancistrocarpa Maiden & Blakeley (*Acacia ancistrocarpa* Maiden; *Acacia pachycarpa* Benth.; *Acacia pachycarpa* F. Muell. ex Benth.; *Racosperma ancistrocarpum* (Maiden & Blakeley) Pedley)

Australia. Perennial non-climbing tree

See *J. Proc. Linn. Soc., Bot.*, 3: 139. 1859, *Fl. Austral.* 2: 408. 1864 and *Journal and proceedings of the Royal Society of Western Australia* 13: 31. 1927, *Austrobaileya* 2(4): 344. 1987, *Austrobaileya* 6(3): 479. 2003, *Journal of Ethnopharmacology* 85(1): 25–32. 2003

(Leaves extract antiinflammatory.)

Acacia aroma Hook. & Arn. (*Acacia aroma* Gillies ex Hook. & Arn.; *Acacia aroma* var. *cochlearis* Griseb.; *Acacia aroma* var. *huarango* (Ruiz ex J.F. Macbr.) Ebinger & Seigler; *Acacia aroma* var. *moniliformis* (Griseb.) Hieron.; *Acacia huarango* Ruiz ex J.F. Macbr.; *Acacia lutea* var. *aroma* (Gillies ex Hook. & Arn.) Kuntze; *Acacia lutea* var. *moniliformis* (Griseb.) Kuntze; *Acacia michelii* Rusby; *Acacia moniliformis* Griseb.; *Vachellia aroma* (Gillies ex Hook. & Arn.) Seigler & Ebinger; *Vachellia aroma* var. *huarango* (Ruiz ex J.F. Macbr.) Seigler & Ebinger; *Vachellia lutea* fo. *aroma* (Gillies ex Hook. & Arn.) Speg.; *Vachellia lutea* fo. *moniliformis* (Griseb.) Speg.; *Vachellia lutea* fo. *oocephala* Speg.)

Argentina. Perennial non-climbing tree

See *Botanical Miscellany* 3(8): 206. 1833, *Revisio Generum Plantarum* 3(3): 47. 1898 and *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 26: 312. 1923, *Darwiniana* 7(2): 240–321. 1946, *Darwiniana* 16(1–2): 144–174. 1970, *Darwiniana* 20(1–2): 233–241. 1976, *Darwiniana* 21(1): 49–60. 1977, *Darwiniana* 25(1–4): 59–111. 1984, *Phytologia* 87(3): 139–178. 2005 [2006]

(Antiseptic, antivenereal.)

in Argentina: aromita, aramo negro, espinillo, tusca

Acacia ataxacantha DC. (*Acacia eriadenia* Benth.; *Acacia lugardiae* N.E. Br.)

Tropical Africa, from Senegal to Nigeria. Perennial non-climbing tree, straggling shrub, very thorny, spreading, shrubby scrambler, sometimes scandent, stems dark brown with short hooked thorns, armed branches grey, alternate leaves pinnate light green, rachis spiny with an erect gland at the base, spikes with flowers cream, green-yellow bracts, light green flattened pods with a brown coloration, flattened smooth seeds, in dry savanna, dry areas

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 459. 1825 and *Flowering Plants of Africa* 42: t. 1652. 1972

(Bark and leaves, pain-killers. Leaves for naso-pharyngeal affections, pulmonary troubles, venereal diseases; leafy twigs febrifuge. Root vermifuge.)

in English: Benin rope acacia

in Burkina Faso: bou toukongou, goubidaney, kaongo pèlga, koroto, morare, toufi

in Ivory Coast: kora

in Mauritania: acharam

in Nigeria: gumi, sark'ak'ya

in Senegal: acharam, asaram, bu tulao, bu tulav, dedd, gogorlaki, gotote, gubi, gubidanedie (= white gubi), kourkour

in Yoruba: ewon, ewon alélé

Acacia aulacocarpa Benth. (*Acacia aulacocarpa* A. Cunn. ex Benth.; *Acacia aulacocarpa* var. *fruticosa* C.T. White; *Acacia aulacocarpa* var. *macrocarpa* Benth.; *Acacia lamprocarpa* O. Schwarz; *Acacia leucodendron* Benth.; *Racosperma aulacocarpum* (Benth.) Pedley; *Racosperma aulacocarpum* (A. Cunn. ex Benth.) Pedley; *Racosperma aulacocarpum* var. *fruticosum* (C.T. White) Pedley) (from the Greek *aulax*, *aulakos* 'a furrow' and *karpos* 'fruit')

Australia. Perennial non-climbing tree, green falcate phyllodes, flowers bright golden, woody striated pods

See *London Journal of Botany* 1: 378. 1842 and *Austrobaileya* 1(2): 148–149. 1978, *Austrobaileya* 2(4): 345. 1987, *Austral. Syst. Bot.* 13: 29–34. 2000

(Antibacterial.)

in English: brown salwood, brush ironbark wattle, golden-flowered salwood, hickory wattle, New Guinea brown wattle, New Guinea wattle, Papua New Guinea brown wattle

Acacia auriculiformis A. Cunn. ex Benth. (*Acacia auriculiformis* Benth.; *Acacia moniliformis* Griseb.; *Racosperma auriculiforme* (Benth.) Pedley; *Racosperma auriculiforme* (A. Cunn. ex Benth.) Pedley)

India, New Guinea & Australia. Perennial non-climbing tree, unarmed, drooping branches, used for rearing insects and producing lacs

See *London Journal of Botany* 1: 377. 1842 and *Contributions from the Queensland Herbarium* 18: 17. 1975, *Bot. J. Linn.*

Soc. 92(3): 247. 1986, *Silvae Genet.* 42(2–3): 65–68. 1994, *Iran. J. Bot.* 7(2): 165–177. 1998

(Aerial parts CNS depressant, hypotensive. Fish poison, crushed fresh pods or powder of dried pods.)

in English: acacia tree, Australian acacia, Australian babul, ear-pod wattle, earpod wattle, northern black wattle

in China: da ye xiang si

in India: akashmoni, akashya, Bangali bawar, chopada khair

Acacia brevispica Harms

East Africa. Perennial non-climbing tree, small or low shrub or scandent shrub, bark with minute reddish glands, recurved or spreading scattered prickles, flowers creamy white, straight pods, found in bushland, dry scrub, river valleys, thickets, upland forest edges

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 370. 1923, *Bol. Soc. Brot.*, 2, 42: 275–304. 1968, *Bothalia* 10: 419–429. 1971, *Bull. Int. Group for study of Mimosoideae*, 5: 31–45. 1977, *Journal of Ethnopharmacology* 29: 295–323. 1990, *Journal of Ethnopharmacology* 83: 39–54. 2002

(An infusion of roots a remedy for intestinal worms; boiled roots used in the treatment of rashes and snakebite; boiled root infusion used as emetic against fevers. Cooked leaves on wounds; leaves rubbed on itches. Stems to brush teeth. Reported to be poisonous. Ethnoveterinary medicine.)

in English: wait-a-bit acacia

in Angola: (omu) nkhenka, (omu) nkhenya, (olu) nkhuenya

in East Africa: ekurau (Turkana), mwarare (Swahili), ol-girigiri (Maasai)

in Kenya: igirgirir, iti, kiptara, kiptare, Igirigiri, ol-girigiri, olgirigiri, osiri, ptara

in Rwanda: umugeyo

in Tanzania: engirigiri, kerefu, mosoma, msewa, mughobari, ol-girigiri

Acacia caesia (L.) Willd. (*Acacia caesia* var. *oxyphylla* (Graham ex Baker in Hook. f.) J.F. Macbr.; *Acacia caesia* var. *subnuda* (Craib) I.C. Nielsen; *Acacia columnaris* Craib; *Acacia intsia* sensu auct.; *Acacia intsia* Willd. var. *caesia* (L.) Baker; *Acacia intsia* var. *caesia* (L.) Wight & Arn. ex Baker; *Acacia intsia* var. *oxyphylla* Graham ex Baker in Hook. f.; *Acacia oxyphylla* var. *subnuda* Craib; *Mimosa caesia* Burm. f.; *Mimosa caesia* L.; *Mimosa caesia* Russ. ex Wallich; *Mimosa caesia* (L.) Willd.; *Mimosa intsia* auct. non L.)

India. Perennial climbing tree or shrub, straggling, prickly, recurved spines, creamy flowers in small elongate spikes

See *Species Plantarum* 1: 522. 1753, *Flora Indica ... nec non Prodromus Florae Capensis* 224. 1768, *Species Plantarum. Editio quarta* 4(2): 1090. 1806, *A Numerical List of Dried*

Specimens n. 5264 C. 1831, *The Flora of British India* 2(5): 297. 1878 and *Contributions from the Gray Herbarium of Harvard University* 59: 7. 1919, *Adansonia* 19(3): 348. 1980

(Used in Ayurveda. Leaves to kill worms. Fibrous bark rubbed for skin diseases; stem bark decoction used for taking bath to get relief from body pain. Flowers used for menstrual disorders. Leaves to stupefy fish.)

in China: jian ye xiang si, teng xiang si shu

Australia. Perennial non-climbing tree

See *Hortus Cantabrigiensis* 114. 1796, *Species Plantarum*. Editio quarta 4(2): 1072. 1806, *Bot. Beobacht.* 57. 1798 and *Austrobaileya* 2(4): 358. 1987, *Iran. J. Bot.* 7(2): 165–177. 1998

(Used in Sidha.)

in English: black wattle, common wattle, green wattle, early black wattle

in Brazil: acácia preta

in Southern Africa: groenwattel

in China: xian ye jin he huan

in India: cimaivelampattai, seemai velam pattai

Acacia drepanolobium Harms ex Sjostedt (*Acacia formicarum* Harms; *Acacia lathouwersii* Staner; *Vachellia drepanolobium* (Harms ex Sjostedt) P.J.H. Hurter)

East Africa. Perennial non-climbing tree, shrub or small tree, flat or spreading crown, rough bark, spines in pairs, the bases of spines swollen into large hollow galls inhabited by specialised species of plant-ants, white or cream flowers, falcate reddish dark fruits, fresh soft fleshy galls edible, sweetish bitter inner bark fibre may be chewed, leaves and pods eaten by game, in wooded and bushed grassland, on stony ground, clay soils

See *Schwed. Zool. Exped. Kilimandjaro* 8: 116. 1908, *Australian Journal of Botany* 45: 879–891. 1997, *Nature* 401: 578–581. 1999, *Plant-Book* 1021. 2008

(The bark chewed and the juice swallowed as a remedy for sore throats. Roots boiled, the liquid mixed with milk or tea and given to women after childbirth as a diuretic.)

in English: ant-galled acacia, black-galled acacia, whistling thorn

in East Africa: eiyellel, eluui, kiunga, muuga

in Kenya: adugo, dugna, dunga, eluui, eluuaai, eyelel, flai, fulaay, iluaa, iunga, kiunga, luai, luoi, mbalibali, mugambu, mugunga, muguruit, mukuruit, muruai, oduga, sitowonyon, stoghon, stoghoonei

Acacia eburnea (L.f.) Willd. (*Acacia campbellii* Arn.; *Acacia minutifolia* Ragup.; *Acacia pseudowightii* Thoth.; *Acacia roxburghii* Wight & Arn.; *Mimosa eburnea* L.f.; *Mimosa eburnea* Roxb.; *Mimosa eburnea* Hort. Par. ex Benth.; *Vachellia eburnea* (L.f.) P.J.H. Hurter & Mabb.)

India. Perennial non-climbing tree

See *Supplementum Plantarum* 437. 1781, *Species Plantarum*. Editio quarta 4(2): 1081. 1806, *Transactions of the Linnean Society of London* 30(3): 507. 1875 and *Mabberley's Plant-Book* 1021. 2008

(Used in Sidha.)

in English: cockspur thorn

in India: bambolero, deo-babool, gabbuthumma, gabbutumma, jaali, jali, joli, kikar, kudai vel, kutai velam, marmat, mormati, pahari kikar, peekethumma, pikajali, pikjati, piketumma, pitumma, piyyathumma, piyyatumma, tambattijala

Acacia elatior Brenan

Northern and eastern Uganda and Kenya. Perennial non-climbing tree, tall, riverine, large trunk, rounded crown, fissured bark, short brown spines alternating with long straight white spines, flowers in round heads white to yellow, brown to purplish straight pods, arid and semi-arid areas, common along rivers and lakes, in dry riverbeds

See *The Gardeners Dictionary* ... Abridged ... fourth edition no. 1. 1754 and *Kew Bulletin* 12(1): 94–96. 1957, *Australian Journal of Botany* 45: 879–891. 1997

(A decoction from the bark used to treat diarrhea and coughs.)

in English: river acacia

in East Africa: esanyanait, muswiswa, ol-lerai

Acacia farnesiana (L.) Willd. (*Acacia acicularis* Humb. & Bonpl. ex Willd.; *Acacia acicularis* Willd.; *Acacia caven* (Molina) Molina; *Acacia curassavica* (Britton & Killip ex Killip) Stehle; *Acacia densiflora* (Alexander ex Small) Cory; *Acacia edulis* Humb. & Bonpl. ex Willd.; *Acacia farnesiana* Willd.; *Acacia farnesiana* (L.) in Nepal: khour

Acacia gageana Craib

India. Perennial non-climbing shrub

See *Bulletin of Miscellaneous Information Kew* 1915(9): 409–410. 1915

(Toxins. Young shoots and leaves eaten for stomachache and dysentery. Ground bark as fish poison.)

in India: changru tong, changrutong

Acacia gerrardii Benth. (*Acacia hebecladoides* Harms; *Vachellia gerrardii* (Benth.) P.J.H. Hurter) (after the English William Tyrer Gerrard, d. 1866, botanical collector in Natal)

East Africa, eastern Kenya. Perennial non-climbing tree, flat-topped or spindly, rough and fissured bark, spines in pairs straight or hooked, strongly scented flowers cream, sickle-shaped dehiscent fruit, bark stinking when cut, in wooded grassland, in riverine arid and semi-arid areas

See *Transactions of the Linnean Society of London* 30(3): 508. 1875 and I. Schapera, *A Handbook of Tswana Law and Custom*. London 1955, *The Tswana*. London 1953, J. Lanjouw, F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957, *Mabberley's Plant-Book* 1021. 2008

(The bark, chewed, to treat coughs and sore throats.)

in English: Gerrard's acacia, red thorn

in East Africa: munyinya, ol-debbei, saie

in Nigeria: bakar kaya (Hausa)

in Southern Africa: aapkop, rooibas, rooidoring, rooihaak (Afrikaans); umkhamanzi (Zulu); umNgampunzi, umPhuze, umSama, siNga, singa (Swazi); mokgi (Tswana); ikope (Ndebele); moki (Mangwato dialect, Botswana); mooka (North and north east Transvaal); muunga (Venda)

Acacia hockii De Wild. (*Acacia chariensis* A. Chev.; *Acacia oerfota* (Forssk.) Schweinf.; *Acacia orfota* sensu Brenan; *Acacia seyal* Delile var. *multijuga* Baker f.; *Acacia stenocarpa* sensu auct.)

East Africa. Perennial non-climbing tree, shrub or small tree, flattened crown, spines in pairs straight and slender, flowers yellow to orange, narrow reddish brown pods, edible gum,

inner bark fibre chewed for its sweet juice, lowlands, wooded grassland, in overgrazed grassland, bushed grassland

See *Flora Aegyptiaco-Arabica* 177. 1775, *Bulletin de l'Herbier Boissier* 4(app. 2): 213. 1896 and *Repertorium Specierum Novarum Regni Vegetabilis* 11: 502. 1913, *Kew Bull.* 37: 451–453. 1983

(A decoction of boiled roots a remedy for abdominal pain. The white inner bark chewed to slake thirst. Pounded leaves and buds mixed with *ghee* (clarified butter) and applied to abscesses.)

in English: white thorn acacia

in East Africa: iuaa, kasana, mgunga, ol-jarbolani

in Kenya: arumbe, chuwan, ekisim, enchapalani, kinyua, mugaa, munyua, orcharpalani, oriang', tilatil

in Nigeria: bakar kaya (Hausa)

Acacia horrida (L.) Willd. (*Acacia horrida* Span.; *Acacia horrida* Willd.; *Acacia latronum* Willd.; *Mimosa horrida* Russ. ex Wall.; *Mimosa horrida* L.; *Mimosa horrida* Sm.; *Mimosa latronum* L.f.)

India, South Africa. Shrub or small tree

See *Species Plantarum* 1: 521. 1753, *Suppl. Pl.* 438. 1782 [1781 publ. Apr 1782], *Species Plantarum*. Editio quarta [Willdenow] 4(2): 1077, 1082. 1806, *Linnaea* 15: 199. 1841

(Veterinary medicine.)

Acacia intsia (L.) Willd. (*Mimosa caesia* L.; *Mimosa intsia* L.; *Mimosa intsia* Wight ex Wallich; *Mimosa intsia* Walter)

Nepal, India. Perennial climbing shrub, cattle fodder

See *Species Plantarum* 1: 522. 1753, *Flora Caroliniana*, secundum ... 252. 1788, *Species Plantarum*. Editio quarta 4(2): 1091. 1806, *A Numerical List of Dried Specimens* n. 5250 A. 1831

(Used in Sidha. Crushed leaves pasted on injuries, wounds. Seeds for gonorrhoea and indigestion. Stem bark juice and crushed root as fish poison.)

in India: adavippe-chettu, adaviyippa, alippe, antarike, ara, arasthige, atavi-madhukavriksha, atavimadhuka, atavi-madhukavrikshaha, ban-ritha, boda chandra, candemullu, chendemullu, darakhte-gulchakane-sahrai, darakihte-gulchakane-sahrai, dolaphala, garudapu, gudapushpa, guda-puspah, gul-mohwa, halippa, haltumbri, hunage, ippa, ippachettu, ippaya, ippe, ippe-mara, ippi, jangli-moha, jangli-mohva, janglimoha, janglimohva, kadippe, kadu-ippe-gida, kodimundusu, korinda, lodhrapushpa, madhava, madhhuka, madhookamu, madhu, madhudrumah, madhuka, madhukah, madhukamu, madhukavrikshaha, madhushtila, madhusphuttila, madhusrava, madhusravah, madhustilah, madhuvara, madhuvriksha, madhvaga, madhvalam, mahadruma, mahua, mahula, mahwa, maul, mowa, patanga, peddayippa, priyala, putakorinda, ranachaipechajhada,

Willd.; *Mimosa capensis* Burm.f.; *Mimosa leucacantha* Jacq.; *Mimosa nilotica* Thunb.)

South Africa. Perennial non-climbing tree or shrub, yellow flowers

See *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 10: pl. 33. 1827, *Linnaea* 15: 199. 1841 and *Revue internationale de botanique appliquée et d'agriculture tropicale* 27: 509. 1947, *Journal of South African Botany* 14: 24. 1948, *Kew Bull.* 49: 107–113. 1994

(Veterinary medicine.)

in English: Cape gum, Cape thorn tree, gum Arabic tree, mimosa, mimosa thorn, mimosa thorn tree, sour thorn, sweet thorn, umbrella thorn, white thorn

in Arabic: talha, ghilene

in Southern Africa: doringboom, fyndoring, karoo-thorn, karoodoring, khoeboom, mimosadoringboom, Nataldoring, pendoring, rivierdoring, sambreeldoring, soetdoring, suurdoring, widdoring, widdoringdoringboom (Afrikaans); umuNga, umNga (Xhosa); isiSani, muNenje, muUnga, muWunga (Shona); isiKhombe (Zulu); umNga, umuNga, isiNga (Swazi); umDongolo, leoka (Lesotho, Orange Free State, south east Transvaal); mooka, mookana, moshaka (Western Transvaal, northern Cape, Botswana); mooka, mookana (North and north east Transvaal); muumga, muungaludz (Venda); gaba (Kalanga, northern Botswana); orusu

(Herero, Central south west Africa); // khub, // khus (Nama, Southern south west Africa)

***Acacia kirkii* Oliv.** (*Acacia harmsiana* Dinter; *Acacia kirkii* Oliv.; *Acacia kirkii* Oliv. subsp. *kirkii* var. *intermedia* Brenan; *Acacia nilotica* (L.) Del. subsp. *adstringens* (Schumach. & Thonn.) Roberty var. *kirkii* (Oliv.) Roberty; *Acacia verucifera* Harms) (to honor Sir John Kirk, 1832–1922, the Scottish explorer and botanist, naturalist and plant collector principally in East Africa, Consul in Zanzibar, 1858 doctor on Livingstone expedition.)

East Africa. Perennial non-climbing tree, flat-topped, single or many-stemmed, peeling or flaking bark greenish yellow, spines in pairs at the nodes, pods brown to reddish oblong straight, in riverine woodland, lower highlands, grasslands, in areas of seasonal drainage

See *Flora of Tropical Africa* 2: 350. 1871 and *Kew Bull.* 1922: 49–63. 1922

(A decoction of the roots used as a remedy for stomach ailments. A tea from the bark.)

in English: Kirk's acacia

in East Africa: kimwea (Kamba), ol-lerai (Maasai)

in Southern Africa: moralo (Tawana dialect, Ngamiland); ijwairi (Subya)

***Acacia laeta* R. Br.** (*Acacia laeta* R. Br. ex Benth.; *Acacia modesta* Wall. var. *laeta* (R. Br. ex Benth.) Roberty)

East Africa. Perennial non-climbing tree, flat crown, rough and fissured bark, straight spines in pairs, flowers in spikes, flower branchlets with red glands, straight or curved pods splitting on the tree, in highland mountain forest, highland grassland, moist woodland

See *London Journal of Botany* 1: 508. 1842

(The bark used in treatment of skin eruptions in children.)

in English: red thorn acacia

***Acacia leptocarpa* Benth.** (*Acacia leptocarpa* A. Cunn. ex Benth.; *Acacia polystachya* Benth.; *Racosperma leptocarpum* (Benth.) Pedley; *Racosperma leptocarpum* (A. Cunn. ex Benth.) Pedley)

Australia, Papua New Guinea. Perennial non-climbing tree, small tree or shrub, yellow flowers

See *London Journal of Botany* 1: 376. 1842 and *Austrobaileya* 2(4): 351. 1987

(For sore eyes, pounded green leaves soaked in water, applied with the water externally.)

in Australia: mangarr mangal

***Acacia leucophloea* (Roxb.) Willd.** (*Acacia arcuata* Decne.; *Acacia leucophloea* var. *melanochaetes* Miq.; *Acacia melanochaetes* Zoll.; *Delaportea ferox* Gagnep.; *Delaportea microphylla* Gagnep.; *Mimosa leucophloea* Roxb.)

India. Perennial non-climbing tree, white bark, spiny stipules, yellow heads, flat pods, roots emit very offensive smell

See *Species Plantarum*. Editio quarta 4(2): 1083. 1806 and *Taxon* 30: 508–509. 1981, *J. Econ. Taxon. Bot.* 20: 599–633. 1996

(Used in Ayurveda and Sidha. Pods toxic to livestock. Bark astringent, abortifacient; stem bark powder given as tooth powder to relieve severe toothache; bark decoction for cold and cough. Root crushed and mixed with sugar and given with water to women for abortion; root powder taken for jaundice. Seeds used as bed-bug killer. Contact therapy, root tied on arm to cure fever; ceremonial, ritual, magic, stem bark smoke inhaled by patients to ward off evil spirits. Veterinary medicine, stem bark mixed with turmeric applied to boils, blisters, ulcers and wounds; leaves of *Cassia auriculata* crushed with bark of *Acacia leucophloea*, the paste applied on bone fracture and tied; stem bark along with that of *Anogeissus latifolia* pounded and the extract given for ephemeral fever.)

in English: distiller's acacia, panicked acacia, white babool, white babul

in Burma: tanaung

in India: ahimara, akal, akamamaram, akamaram, akimar, akimaral, amutacaram, amutacaramaram, amutacarani, amutacura, arimaita, arimata, arimeda, arimedah, arutturumam, beala, bela, bellada, bilijali, caivakatpala, caraparikantacupattiram, cupattiram, gohira, goira, gondhogoharia, gondo-goira, gwaria, harmo baval, harwar, havibaval, hemagaura, hewar, hivar, hiwar, irimeda, irimedah, kalakantam, kasayatittam, kath safaid, katu andara, kinkirata, kinkiratha, maha andara, mukarokapucitam, nayibela, nimbar, panharya, patutturumam, patuturumam, payirilam, pitabhadra, pitaka, pitamlana, raundra, raunj, rayunch, renuja, reonja, reru, reunj, revu, rheunja, rinjra, runjh, runjra, safed babul, safed kihar, safedbabul, sharabkikikar, shatpadananda, shveta-barbura, shvetabarburavrikshaha, somavalka, sveta-arabura, sveta-varvara, tella tuma, tella tumma, tellathumma, tellatumma, topal, toppalu, tumbe, tumma, tunua, uttulati, uttulatimaram, vellaivelan, vellaivelanmaram, velvalayam, vel-vel, vel-velam, velvaylam, velvel, velvelam, vipralambi, vipralobhi, vitkhadira

in Malaysia: pilang

Acacia macrostachya Rchb. ex DC. (*Acacia ataxacantha* sensu P. Sousa)

Tropical Africa. Perennial non-climbing tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 459. 1825

(Vermifuge. Magic, ceremonial.)

in Nigeria: gardaye (Hausa); chidi (Fula)

in Mali: safaranwoni

Acacia mearnsii De Wild. (*Acacia decurrens* auct. non Willd.; *Acacia decurrens* Willd. var. *mollis* auct. non Lindl.; *Acacia decurrens* Willd. var. *mollis* Lindley; *Acacia mollissima* sensu J. Black; *Racosperma mearnsii* (De Wild.) Pedley) (after the American naturalist Edgar Alexander Mearns, 1895–1916, author of many books about African birds.)

Australia. Perennial non-climbing tree, bark smooth, resinous gum, feathery leaves, yellow fragrant flowers, fruit straight or twisted joints between the seeds, confusion about this species, closely allied to *Acacia decurrens* Willd. (green wattle) and *Acacia dealbata* Link

See *Plantae Bequaertianae* 3(1): 61. 1925, *Botanical Journal of the Linnean Society* 92(3): 249. 1986, *Austrobaileya* 2(4): 358. 1987, *Austral. J. Bot.* 45: 879–891. 1997, *American Species of Acacia* 124. 2007

(Stomachic, astringent, a decoction of the bark used as a styptic and to treat diarrhea.)

in English: black wattle, green wattle, silver wattle, tan wattle, wattle

in China: hei jing

in India: karuva

in Japan: watoru-ju

in East Africa: man'goi, muthanduku, muwati

in South Africa: swartwattel

in Tanzania: muwati

Acacia megaladena Desv. (*Acacia arrophula* D. Don; *Acacia arrophula* D. Don ex Wall.; *Acacia pennata* (L.) Willd. var. *arrophula* (D. Don ex Wall.) Baker)

India. Shrub

See *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1090. 1806, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 3: 69. 1814, *Prodr. Fl. Nepal.* 247. 1825, *A Numerical List of Dried Specimens* n. 5257. 1831, *The Flora of British India* 2(5): 298. 1878

(Fish poison, pods and stem bark.)

in China: dun ye jin he huan

Acacia mellifera (Vahl) Benth. (*Inga mellifera* (Vahl) Willd.; *Mimosa mellifera* Vahl)

East Africa. Perennial non-climbing tree, low shrubby tree, smooth bark, small hooked prickles in pairs, white or cream flowers, straight fruit short and wide, in dry bushland, in wooded grassland

See *Species Plantarum* 1: 516–523. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1: *Acacia* and 2: *Inga*. 1754, *Symbolae Botanicae, ...* 2: 103. 1791, *Species Plantarum*. Editio quarta 4(2): 1006. 1806, *London Journal of Botany* 1: 507. 1842 and *Australian Journal of Botany* 45: 879–891. 1997

(The liquid from the boiled bark a remedy for stomach troubles, malaria, fevers, pneumonia and venereal diseases. Rootbark decoction for malaria.)

in English: blackthorn, hookthorn

in East Africa: kikwata, kilawata, magokwe, oiti, panyirit

in Kenya: ebonyo

Acacia mellifera (Vahl) Benth. subsp. *mellifera* (*Acacia mellifera* subsp. *detinens* (Burch.) Brenan; *Acacia senegal* (L.) Willd. subsp. *mellifera* (Vahl) Roberty; *Inga mellifera* (Vahl) Willd.; *Mimosa mellifera* Vahl)

Kenya, Namibia. Perennial non-climbing tree

See Hildegard Hinde [Mrs. Sydney L. Hinde], *Vocabulaires of the Kamba and Kikuyu languages of East Africa*. Cambridge 1904, C.W. Hobley, *Ethnology of A-Kamba and Other East African Tribes*. Cambridge 1910, Gerhard Lindblom, *The Akamba in British East Africa*. An Ethnological Monograph. Uppsala 1920, John Middleton, *The Kikuyu and Kamba of Kenya*. [The Kikuyu, including Embu, Meru, Mbere, Chuka, Mwimbi, Tharaka, and the Kamba of Kenya.] London 1953, *Kew Bulletin* 11(2): 191. 1956

(The liquid from the boiled bark a remedy for stomach trouble, malaria, pneumonia and for clearing syphilis infections. Rootbark decoction for malaria.)

in English: blackthorn, hookthorn

in Eastern Africa: kilawata, muthiia, talamong

in Ethiopia: adal, blal (Somalinya); atnkuy, qontr, qwentr, sbansa (Amharinya); harangama, sabansa (Orominya); shoba'ta, qedad, qeres, qono (Tigre); qentb, qentbi, qentiba (Tigrinya)

in Southern Africa: haakdoring, hakiesdoring, blouhaak, swarthaak, wynruit; monka (Kgatla dialect, Botswana); mongana (Western Transvaal, northern Cape, Botswana); Katogwa, muGuhungu, muKotokwa (Shona); monyaka (Kwena dialect, Botswana); mongana-moswana (North Sotho), monganga-tau; moga (Kalanga, northern Botswana); omusaona (Herero)

in Sudan: kittir

Acacia modesta Wall. (*Mimosa dumosa* Roxb.; *Mimosa obovata* Roxb.; *Senegalia modesta* (Wall.) P.J.H. Hurter)

India. Perennial non-climbing small tree, thorny, rough bark, translucent pale yellowish gum

See *Pl. Asiat. Rar.* (Wallich) 2: 27, t. 130. 1831, *Sylva Telluriana* 119. 1838 and *J. Econ. Taxon. Bot.* 20: 599–633. 1996, *Pakistan Journal of Biological Sciences* 6(24): 2024–2025. 2003, *Mabberley's Plant-Book* 1021. 2008

(Antibacterial, gums washing and stop bleeding, very effective against dental diseases, gastric trouble and stomach disorders.)

in English: amritsar gum

in India: kantosariyo, phalai, phulahi, phulai, phule

Acacia nilotica (L.) Delile (*Acacia arabica* (Lam.) Willd.; *Acacia arabica* Willd.; *Acacia arabica* (Lam.) Muhl. ex Willd.; *Acacia nilotica* H. Karst.; *Acacia nilotica* Delile; *Acacia nilotica* (L.) Willd. ex Del.; *Acacia scorpioides* (L.) W. Wight; *Acacia scorpioides* W. Wight; *Acacia scorpioides* A. Chev.; *Mimosa arabica* Lam.; *Mimosa nilotica* L.; *Mimosa nilotica* Thunb.; *Mimosa scorpioides* L.; *Mimosa scorpioides* Forssk.)

East Africa, Paleotropics. Perennial non-climbing tree, small tree, often branched from the base, crown flat or umbrella-shaped, sharp whitish spines in pairs at the nodes, bright yellow to orange fragrant flowers, pods break up on the ground, pods a famine food, bark and the gummy fruit pulp boiled in water sugar added and drunk as tea, exceedingly variable species, used for rearing insects and producing lacs, in arid and semi-arid regions, sandy coastal soils, black-cotton soil

See *Sp. Pl.* 1: 521. 1753, *Fl. Aegypt.-Arab.* p. lxxvii. 1775, *Encycl.* (Lamarck) 1(1): 19. 1783, *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1085. 1806, Rev. Amos Sutton, *An introduction to the study of Oriya*. Cuttack 1872, Rev. William Miller, *An English and Oriya dictionary*. Cuttack [the site of a mission for the Baptist Missionary Society, India], Orissa Mission Press 1873, *Deut. Fl.* (Karsten) 722. 1882 and *Contr. U.S. Natl. Herb.* ix. 173. 1905, Rev. A.H. Young, *First lessons in Oriya*. Cuttack 1912, *Bull. Soc. Bot. France* 74: 954. 1928 [1927 publ. 1928], *Journal of Ethnopharmacology* 4: 75–98. 1981, *Journal of Ethnopharmacology* 14: 283–314. 1985, *Journal of Ethnopharmacology* 29: 295–323. 1990, *Journal of Ethnopharmacology* 97: 327–336, 421–427. 2005, *Journal of Ethnopharmacology* 106: 158–165. 2006

(Used in Ayurveda, Unani and Sidha. Whole plant for sore throat and rheumatism. Different extracts of the plant have been reported to have antifungal activity against yeasts and other fungi. Gum applied in the female genital organ as a contraceptive; gum powder mixed with the white of an egg applied on scalds and burns; gum from bark used for diarrhea, dysentery and diabetes. Bark juice used in the treatment of coughs, whooping cough and sore throats; dried fruits of *Solanum virgatum* mixed with bark of *Acacia nilotica* boiled in water and the decoction as a gargle to cure pyorrhea; inner bark chewed or boiled as cure for stomachache, diarrhea; chewed for sore throat and cough; bark boiled and mixed with soup or honey for gonorrhoea, chest pain and cough. Boiled roots for indigestion and other stomach trouble, roots decoction a cure for impotence; bark and roots used as an aphrodisiac. Boiled leaves used for chest pains or pneumonia; leaves given to pregnant women as a tonic and to have an easy delivery; powdered leaves taken for vigour and vitality; pulp of tender leaves for dysentery and diarrhea; burnt leaves mixed with vegetal oil applied for skin diseases, scabies, eczema, ringworm. Tea made from fruit drunk for stomach problems; seeds pounded and mixed with dates made into

an intoxicating drink. Veterinary medicine, bark infusion for stomach problems in goats; seeds decoction as a prophylaxis against colic pain, indigestion, pox. Ceremonial, ground bark used for rituals.)

in English: babul, black babool, Egyptian acacia, Egyptian mimosa, Egyptian thorn, Gambia pods, gum Arabic tree, Indian gum arabic tree, scented-pod acacia, suntwood

Acacia pruinescens Kurz (*Acacia pruinescens* var. *luchunensis* C. Chen & H. Sun)

India, Myanmar.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 45(2): 296, 298. 1877 [1876 publ. 19 Apr 1877] and *Acta Botanica Yunnanica* 12(3): 260. 1990

(Bark ground and used for stupefying fish.)

in China: fen bei jin he huan, kuo ye fen bei jin he huan

in India: motu

Acacia reficiens Wawra (*Acacia uncinata* Engl.) (the specific and subspecific names from the Latin *reficio*, *ficere*, *feci*, *fectum* (*facio*) 'to make again, to restore, to repair')

East Africa. Perennial non-climbing tree, shrub or tree, flattened or rounded crown, rough bark, edible gum, hooks in axillary pairs, white or cream flowers in small axillary groups, papery reddish dehiscent pods, foliage eaten by game and livestock, in dry lowland semi-desert scrub

See *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 38: 555. 1860 and *Bothalia* 11: 231–234. 1974, *Bothalia* 13: 389–413. 1981

(An infusion of the roots used to treat swelling of the scrotum and as a sexual stimulant.)

in English: false umbrella thorn, red thorn

in East Africa: anywa, eregae, khansa, panyarit

in Namibia: mumangandjamba, muzwa (Kwagali); omutsiyamatsi (Ndonga); gos, !gus (Nama/Damara); omungondo (Herero); muginda, mutwa (Shambyu); omutyuula (Kwanyama); glu (Bushman)

in Southern Africa: deurmekaardoring, haak-en-steek, rooihaak, vals-haak-en-steek; omungondo (Herero); gos, !gus (Nama/Damara)

Acacia rugata (Lam.) Fawc. & Rendle (*Acacia rugata* (Lam.) Buch.-Ham. ex Benth.; *Acacia rugata* (Lam.) Voigt; *Acacia rugata* (Lam.) Buch.-Ham. ex Voigt, nom. illeg.; *Acacia*

rugata Buch.-Ham. ex Fawcett & Rendle, nom. illeg.; *Acacia rugata* Ham. ex Gamble; *Mimosa rugata* Lam.; *Senegalia rugata* (Lam.) Britton & Rose

Caribbean. Climbing shrub, straggling, prickly, fruit juice used for washing clothes

See *Encyclopédie Méthodique, Botanique* 1(1): 20. 1783, *London Journal of Botany* 1: 514. 1842, *Hortus Suburbanus Calcuttensis* 263. 1845, *The Flora of British India* 2: 297. 1878 and *Flora of Jamaica*, Containing Descriptions of the Flowering Plants Known from the Island 4: 141. 1920, *North American Flora* 23(2): 120. 1928

(Plant juice applied for boils. Paste from powdered stem as a fish poison.)

in India: amsikra, pasoitenga

in Nepal: sikakay, tokne

Acacia scorpioides W. Wight var. *adstringens* (Schumach. & Thonn.) A. Chev. (*Acacia adstringens* (Schumach. & Thonn.) Berhaut; *Acacia arabica* var. *adstringens* (Schumach. & Thonn.) Baker f.; *Acacia nilotica* subsp. *adstringens* (Schumach. & Thonn.) Roberty; *Acacia nilotica* var. *adstringens* (Schumach. & Thonn.) Chiov.; *Mimosa adstringens* Schumach. & Thonn.)

India.

See *Beskrivelse af Guineiske planter* 327. 1827 and *Contr. U.S. Natl. Herb.* ix. 173. 1905, *Bulletin de la Société Botanique de France* 74: 954. 1927, *The Leguminosae of Tropical Africa* 3: 849. 1930, *Candollea* 11: 150. 1948, *Bulletin de la Société Botanique de France* 102: 214. 1955

(Stem bark boiled with red potash and taken for toothache and stomach pain.)

in Nigeria: kejelivwe

Acacia scorpioides W. Wight var. *nilotica* (L.) A. Chev. (*Acacia arabica* var. *nilotica* (L.) Benth.; *Acacia nilotica* (L.) Willd. ex Delile; *Mimosa nilotica* L.; *Vachellia nilotica* (L.) P.J.H. Hurter & Mabb.)

India.

See *Species Plantarum* 1: 521–522. 1753, *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 2(1): 79. 1813, *Beskrivelse af Guineiske planter* 327. 1827, *Hooker's Journal of Botany and Kew Garden Miscellany* 1: 500. 1842 and *Contr. U.S. Natl. Herb.* ix. 173. 1905, *Bulletin de la Société Botanique de France* 74: 954. 1927, *The Leguminosae of Tropical Africa* 3: 849. 1930, *Candollea* 11: 150. 1948, *Bulletin de la Société Botanique de France* 102: 214. 1955, *Mabberley's Plant-Book* 1021. 2008

(Stem bark boiled with red potash and taken for toothache and stomach pain.)

in Nigeria: izegwu

Acacia senegal (L.) Willd. (*Acacia circummarginata* Chiov.; *Acacia cufodontii* Chiov.; *Acacia glaucophylla* sensu Brenan; *Acacia kinionge* sensu Brenan; *Acacia oxyosprion* Chiov.; *Acacia rupestris* Boiss.; *Acacia senegal* subsp. *modesta* (Wall.) Roberty; *Acacia senegal* subsp. *senegalensis* Roberty; *Acacia senegalensis* (Houtt.) Roberty; *Acacia somalensis* sensu Brenan; *Acacia* sp.1 F. White; *Acacia spinosa* Marloth & Engl.; *Acacia thomasi* sensu Brenan; *Acacia verec* Guill. & Perr.; *Acacia volkii* Suess.; *Mimosa senegal* L.; *Mimosa senegalensis* Lam.; *Senegalia senegal* (L.) Britton)

East Africa. Perennial non-climbing tree, shrub or small tree, extremely variable, slow growing, low branching, peeling bark, rounded and flattened, clear edible gum, three brown-black hooks below each node, white creamy spikes, pointed variable pods thin and flat, leaves and pods protein-rich, useful for erosion control, leaves and pods eaten by camels, sheep, goats and rhinos, commonly found in dry grassland, woodland, dryland

See *Species Plantarum* 1: 516–523. 1753, *Species Plantarum*. Editio quarta 4(2): 1077. 1806, *Florae Senegambiae Tentamen* 1: 245, 271, pl. 56. 1832 and *Scientific Survey of Porto Rico and the Virgin Islands* 6: 538. 1930, John G. Peristiany, *The Social Institutions of the Kipsigis*. London 1939, A.H.J. Prins, *East African Age-Class Systems: an inquiry into the social order of Galla, Kipsigis and Kikuyu*. Groningen 1953, *Vegetatio* 27: 131–162. 1973, *Bothalia* 11: 453–462. 1975, *Bothalia* 44: 55–56. 1979, *Taxon* 30: 508–509. 1981, *Austral. J. Bot.* 45: 879–891. 1997

(Used in Ayurveda. Fruits, bark and gum for dysentery, diarrhea, gonorrhoea, inflammatory diseases. Gum good for cough, stomatitis and sprue; fried gum given along with ghee and jaggery after delivery to women as a postpartum remedy, and to make them free from sciatica and backache. Root decoction a mild purgative, used in the treatment of stomachache and gonorrhoea. A decoction of the bark for diarrhea and stomach disorders. The stem or root bark boiled and the liquid used for treatment of diarrhea, venereal diseases and stomach disorders. Juice from fruits used as eye medicine.)

in English: gum arabic, gum arabic tree, Senegal gum, Sudan gum arabic, three-thorned acacia

in China: a la bo jiao shu

in India: babula, gorad, gorad baval, goradio baval, khair, kumat, kumatio, kumatiyo, kumbat, svetakhadira

in Japan: Arabiya-gomu-no-ki

in East Africa: ekonoit, kikwata, kikwata mgunga, mzasa

in Ethiopia: adad, adad-meru, akkrsa, betuba, idado, mahara, qentb, qentbi, qentiba, qwentr, sabansa-dima, sapessa, sbansa-grar, sfri-dmmu qontr

in Kenya: adad, baabido, bura-diima, burra diima, chemanga, chemankayan, chepkomon, dang'ite, edaad, edad, edad-geri, ekodokodoi, ekunoit, enderkesi, hadhaadh, iddaad'o, iddado, interkes, kikole, kikwata, kiluor, king'ole, king'olola,

lderkesi, manok, mgunga, mirgi-abah, mung'othi, ol-muni-shui, olbida, olderkesi, otiep, sadeema, sapsans diima

in Nigeria: bonni, dakwara, dakwora, elong, esenik, esina, hashab, kolkol, nganda-yonge, ngaraba; talha, kolkol (Kanuri); dakwara (Hausa); dibehi (Fula)

in Sahara: eirwar

in Senegal: ndongargavod, patugu, vérèk

in Tanzania: bwara, enderkesi, igwata, interkes, katahila, katatula, katita, ki'tononganga, kikwata, kiluma, kiruma, mgunga, mgwatu, mkot, mkwata, muhama, muhunga, mukhubo, mzasa, olbida, olderkesi, olmunishui, yudek

in Uganda: achika

Acacia seyal Delile (*Acacia fistula* Schweinf.; *Acacia flava* (Forssk.) Schweinf. var. *seyal* (Delile) Roberty; *Acacia seyal* Chev.; *Acacia stenocarpa* A. Rich.)

East Africa. Perennial non-climbing tree, small tree, sometimes shrubby, clear gum, irregularly flattened spreading crown, bark powdery white to orange-red, white spines in diverging pairs, bright yellow fragrant flowers, narrow curved fruit split on the tree, sweet inner bark fibre chewed, on stony ground, on flats of black-cotton soil

See *Webbia* 26: 267–364. 1972, *Mem. New York Bot. Gard.* 25(1): 1–152. 1973, *Bull. Int. Group for study of Mimosoideae*, 5: 31–45. 1977, *Nature* 401: 578–581. 1999

(The bark widely used to treat colds. Edible gum used to treat dysentery and stomachache.)

in English: gum arabic tree, shittah tree, shittim wood, thirty thorn, whistling thorn, whistling tree, white thorn

in Arabic: 'alk (the resin), seyal, talh

in Berber: talakh, tamat, thala, tefi

in East Africa: epujaiit, mgunga, mwera

in Ethiopia: adiqento, makani (Afarinya); aflo (Sahonya); cea (Bileninya, Tigre, Tigrinya); cea-serakwe (Bileninya); cginda (Gamonya); fulaay, jiiq (Somalinya); qeyyh-cea, sa'da-cea (Tigrinya); wacu, wajji, wajjo, wakko-dimo, wasiya (Orominya)

in Kenya: ali, ale, arombe, chowogh, chuwugh, echekereng, ekoramai, ekoromait, elereta, elereta-nanyokie, fulai, fullai, iddaado, iddad'o, kisewa, lera, lerai, mugaa, mugurit, mureera, musewa, mweya, olerai, olerai-oibor, oljerai, rena, renon, waachu, waachu-adi, waaqu-hallu

in Malawi: mtengo wa minga (Chichewa, Nyanja); chisawani (Mulanje)

in Mali: nyenige, sanunge, zajé; sajè (Bambara); saninge (Malinké); nyentige (Minyanka); hibwi-fonu (Bwa)

in Nigeria: dushe, dushe kerafi, dussa, erafi, gishishiya, jimshi (Hausa); karamga (Kanuri); talha (Arabian); bulki (Fula)

in Sahara: tamat, tamatt

in Senegal: bu dènkank (Diola); ndomb (Sérère); fonah, surur (Volof)

in Sudan: talah, talh, talh hamera

in Uganda: omugando

Acacia shirleyi Maiden (*Acacia doratoxylon* A. Cunn. var. *laxiflora* Domin; *Acacia spirorbis* Benth. subsp. *solandri* auct. non (Benth.) Pedley; *Racosperma shirleyi* (Maiden) Pedley)

Australia. Perennial non-climbing tree

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 1. 1754 and *Journal and Proceedings of the Royal Society of New South Wales* 53: 218. 1919, *Austrobaileya* 2(4): 355. 1987

(Toxic woods.)

in English: lancewood

Acacia sieberiana DC. (*Acacia abyssinica* sensu auct.; *Acacia amboensis* Schinz; *Acacia davyi* sensu auct.; *Acacia purpurascens* Vatke; *Acacia sieberana* DC.; *Acacia sieberiana* Scheele; *Acacia sieberiana* Tausch; *Acacia sieberiana* DC. subsp. *vermoesenii* (De Wild.) Troupin; *Acacia sieberiana* var. *vermoesenii* (De Wild.) Keay & Brenan; *Acacia vermoesenii* De Wild.) (the specific name after Franz Wilhelm Sieber, 1789–1844, botanist, traveller and plant collector, author of *Herbarium florum aegyptiacae, sive collectio stirpium rariorum Aegypti indigenorum*. Vindobonae [Wien] 1820 and *Reise nach der Insel Kreta*. Leipzig und Sorau 1823)

East Africa. Perennial non-climbing tree, tall, umbrella-shaped or rounded crown, short thick bole, bark rough and flaky, straight whitish spines in pairs, white flowers in round heads, curved fruit thick and hard

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 463. 1825, *Flora* 19: 420. 1836, *Linnaea* 27: 337. 1843 and *Plantae Bequaertianae* 3(1): 68. 1925, *Kew Bulletin* 5(3): 364. 1950[1951], *Austral. J. Bot.* 45: 879–891. 1997

(The bark used to treat children's fever; a decoction of the root prepared as a remedy for stomachache; an extract of the roots and bark used as a vermifuge.)

in East Africa: munga kuu, muwawa, mwera

in Ethiopia: burquqqe, fullsa, lafto, lafto-adi, lalato (Orominya); cerin, jerin (Somalinya); cea, grmo, sa'da-cea (Tigrinya); deweni-bunna (Guragenya); gara, odorwa, pul-liesa (Welaytinya)

in Ivory Coast: fara kaya

in Malawi: mungondo, usongue (Umbundu); musonge (Kimbundu), mutontola (Lunyaneka)

in Mali: bagije, baki, bakije, tinyanga

in Nigeria: aluki, bauji, fara kaya (= white thorn), farar kaya, gie daneji, katalabu, kuk, sie

in Uganda: muwawa

Acacia sinuata (Lour.) Merr. (*Acacia concinna* (Willd.) DC.; *Acacia habbasoides* Bojer; *Acacia rugata* Benth.; *Acacia rugata* (Lam.) Voigt; *Acacia rugata* (Lam.) Buch.-Ham. ex Benth.; *Mimosa concinna* Willd.; *Mimosa concinna* Benth.; *Mimosa rugata* Lam.; *Mimosa sinuata* Lour.; *Senegalia rugata* (Lam.) Britton & Rose)

Bhutan, India. Perennial climbing shrub, armed, scandent, prickly, yellow flowers, oblong pods

See *Encyclopédie Méthodique, Botanique* 1(1): 20. 1783, *Flora Cochinchinensis* 2: 653. 1790, *Species Plantarum*. Editio quarta 4(2): 1039. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 464. 1825, *London Journal of Botany* 1: 514. 1842, *Hortus Suburbanus Calcuttensis* 263. 1845, *Transactions of the Linnean Society of London* 30(3): 404–405. 1875, *Fl. Bras.* 15(3): 337. 1876, *The Flora of British India* 2: 297. 1878 and *North American Flora* 23(2): 120. 1928, *Transactions of the American Philosophical Society*, new series, 24(2): 186–187. 1935

(Used in Ayurveda. Pods expectorant, emetic; fruit powder applied on legs as leech repellents. Leaves cathartic, laxative, used in biliousness, to prevent flatulence. Fish poison.)

in English: soap pod

in China: teng jin he huan

in India: bahuphenarasa, bhuriphena, carmasahva, charmakansa, charmakasa, cheevakay, chika-kai, chikaikkai, chika-kai, chilli, chinik-kaya, manda seege, pasoi tenga, phenila, saptala, satala, seege, sheekakai, sheekay, shika, shikai, shikakai, shikayi, sigaikai, sige, sige balli, sikakai, sikekaayi, suse lewa

Acacia stuhlmannii Taub.

East Africa. Perennial non-climbing tree, thorny with straight spines in pairs at nodes, low spreading shrub or small tree, bark very fetid to garlic smell, spines and petioles with yellow pubescence, flowers green white in spherical heads, kidney shaped bristly dark pods

See *Die Pflanzenwelt Ost-Afrikas* C 194. 1895 and *Mem. Bot. Surv. S. Afr.* 44: 1–150. 1979

(Root used to treat stomach problems in women and convulsions.)

in Tanzania: mlengeja

Acacia torta (Roxb.) Craib (*Acacia pennata* sensu Baker; *Acacia torta* Craib; *Mimosa torta* Roxb.)

India. Perennial climbing shrub, prickly and pubescent, small hooked prickles

See *Flora Indica*; or, descriptions of Indian Plants 2: 566. 1832 and *Bulletin of Miscellaneous Information Kew* 1915(9): 410. 1915

(Leaf paste applied to forehead to relieve headache, applied also to insect bite. Crushed stem bark and leaves as fish poison.)

in English: twisted acacia

in India: aila, alay, alia, antitike, bona chilli, chande mullu, chilar, chillari, drugaidar, ingi, kad siege, kanti, katnar, kempu seege, konda korinda, konda-korinta, korinda, korinta, puli indu, seekam, sikari kanta

Acacia tortilis (Forssk.) Hayne (*Mimosa tortilis* Forssk.; *Vachellia tortilis* (Forssk.) Galasso & Banfi; *Vachellia tortilis* (Forssk.) P.J.H. Hurter & Mabb.) (the specific name from the Latin *tortilis, e (torqueo)* ‘twisted’)

East Africa. Perennial non-climbing tree, spreading, flat or umbrella-shaped crown, fissured and rough bark, two kinds of spines in pairs at the nodes, white fragrant flowers in round heads, fruit spirally twisted or curled, edible sticky gum, sweet ripe fresh pods eaten but seeds are discarded, dry pods excellent fodder for goats and camels, often in black-cotton soil, savanna, on river terraces, dry courses, hill slopes

See *Flora Aegyptiaco-Arabica* 176. 1775, *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 10: pl. 31. 1825 and *Bull. Misc. Inf., Kew* 1930: 402–404. 1930, *Anales Jard. Bot. Madrid* 8: 357–431. 1948, *J. Econ. Taxon. Bot.* 20: 599–633. 1996, *Austral. J. Bot.* 45: 879–891. 1997, *Atti Soc. Ital. Sci. Nat. Mus. Civico Storia Nat. Milano* 149(1): 150. 2008, *Mabberley's Plant-Book* 1021. 2008

(Boiled infusion of bark used for diarrhea and stomachache; roots smoked as a remedy for colds. Magical, witchcraft, the thorns stuck in a goat's pancreas to blind a man who has the ‘evil eye’; tree believed to attract lightning.)

in English: curly-pod acacia, umbrella thorn

in Kenya: chebitet, d'addaca, dadach, dadacha, dadech, dadwota, dahar, etir, ewoi, gahar khabdo, gudis, lkunyi, ltepes, mgunga, muua, mugaa, mulaa, ol-gorete, ol-tepesi, oltepesi, qubdo, qurah, sagaram, sagararam, seech-geebe, ses, sesai, sesoy, sesya, sesyai, sies-geebe, siesiet, ulaa, urbu-ree

in Oman: simr

in Sahara: abser, talha

in Southern Africa: basterkameeldoring, fynhaakdoring, haak-en-steek (= hook and prick), haakdoring, krulpeulakasia, noobos, sambreeldoring, tafelboom, withaak, withaak kameeldoring; isiShoba (Zulu), isiThwethwe, umSasane; mgunga (Swahili); singa (Ndebele); isiThwethwe (Swaziland and Eastern Transvaal); nsasane (Tsonga: Eastern Transvaal); moku, musu (Western Transvaal, northern Cape, Botswana); mosunyane (Kgatla dialect, Botswana); mosu (Kwena dialect, Botswana; Tawana dialect, Ngamiland); moshu (Mangwato dialect, Botswana); moswana, mosu (North Sotho: North and north east Transvaal); muswu (Venda); orupunguija, orusu

(Herero: Central South West Africa); / naras, / narab (Nama: Southern South West Africa)

Acacia xanthophloea Benth. (*Vachellia xanthophloea* (Benth.) Banfi & Galasso) (the specific name from the Greek *xanthos* ‘yellow’ and *phloios* ‘bark of trees’)

East Africa, Kenya. Perennial non-climbing tree, tall, yellow-green bark fissured when old, straight or diverging spines in pairs at the nodes, sweet scented flowers in round heads, yellow-brown fruit straight or slightly curved, in black-cotton soils, on the banks of lakes and rivers

See *Trans. Linn. Soc. London* 30(3): 511. 1875 [10 Apr 1875] and *Flowering Plants of Africa* 41: pl. 1637. 1971, *Nordic J. Bot.* 8: 457–488. 1989, *Atti Soc. Ital. Sci. Nat. Mus. Civico Storia Nat. Milano* 149(1): 150. 2008 [Jan 2008], *Mabberley's Pl.-Book* 1021. 2008

(The bark, rolled into a small ball and chewed, used in the treatment of coughs and sore throats; bark widely used to treat colds, fevers and eye complaints. Edible gum used to treat dysentery and stomachache.)

in English: fever tree, Naivasha thorn, sulphur bark

in East Africa: mgunga, murera, olerai

in Kenya: ali, ale, arombe, chowogh, chuwugh, echekereng, ekoramai, ekoromait, elereta, elereta-nanyokie, fulai, ful-lai, iddaado, iddad'o, kiswa, lera, lerai, mugaa, mugurit, mureera, musewa, mweya, olerai, olerai-oibor, oljerai, rena, renon, waachu, waachu-adi, waaqu-hallu

in Southern Africa: koorsboom, more o moseltha, mun-zhelenga, nkelenga, umDlovune, umHlafunga, umHlofunga, umHlosinga, umKhanya-gude, umKhanyakude

Acaena Mutis ex L. Rosaceae

From the Greek *akaina* ‘a thorn’, referring to the spines on the calyx or to the prickles on the fruit; see *Mantissa Plantarum* 2: 145, 200. 1771, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 592. 1825, *Linnaea* 28: 463. 1856, *Revue des Sciences Naturelles de l'Ouest* 7(2): 39. 1897 and *Bibliotheca Botanica* 17(74): 26, 38, 49, 63–65, 213. 1910–1911, *Fedde Rep.*, 10: 489–501. 1912, *Fieldiana, Bot.* 24(4): 432–484. 1946, Walton, D.W.H., “Studies on *Acaena* (Rosaceae).” *Brit. Antarct. Surv. Bull.* 45: 29–40, 93–100. 1977, H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany.* 25: 115–170. 1987, *Novon* 9(2): 227. 1999.

Acaena anserinifolia (J.R. Forst. & G. Forst.) Druce (*Acaena anserinifolia* Domin; *Acaena anserinifolia* Druce; *Ancistrum anserinaefolium* J.R. Forst. & G. Forst.)

New Zealand.

See *Characteres Generum Plantarum* 4. 1775, *Transactions and Proceedings of the New Zealand Institute* 3: 177. 1871

and (*Report*) *Botanical Society and Exchange Club of the British Isles* Suppl. 2: 484, 602. 1916[1917], *Biblioth. Bot.* lxxxix. 164. 1925, *New Zealand J. Bot.* 21: 13–20. 1983

(Leaves infusion taken for kidney and bladder complaints, and for venereal diseases; infusion or decoction drunk to treat gonorrhoea.)

Acaena novae-zelandiae Kirk (*Acaena anserinifolia* (Forst. & Forst.f.) Druce; *Acaena sanguisorbae* sensu J. Black; *Ancistrum anserinaefolium* J.R. Forst. & G. Forst.)

New Zealand.

See *Characteres Generum Plantarum* 4. 1775, *Transactions and Proceedings of the New Zealand Institute* 3: 177. 1871 and (*Report*) *Botanical Society and Exchange Club of the British Isles* Suppl. 2: 484, 602. 1916[1917]

(Leaves infusion taken for kidney and bladder complaints, and for venereal diseases; infusion or decoction drunk to treat gonorrhoea.)

in English: New Zealand burr

in Australia: biddy biddy, bidgee-widgee, bidi-bidi, buzzy

Maori names: bidibid, hutiwai, pipiripi

Acaena pinnatifida Ruiz & Pav. (*Acaena multifida* Hook. f.; *Acaena multifida* A. Dietr.; *Acaena oligacantha* Phil.; *Acaena pinnatifida* Lindl.; *Acaena pinnatifida* Bert. ex Steud.; *Acaena pinnatifida* Hort. ex Steud.)

South America.

See *Flora Peruviana* [Ruiz & Pavon] 1: 68, pl. 104, f. b. 1798, *Bot. Antarct. Voy. I. (Fl. Antarct.)* 2: 265. 1846, *Linnaea* 33: 66. 1864 and *Bull. Soc. Neuchateloise Sci. Nat.* 104: 145–151. 1981

(Diuretic, refrigerant.)

Acaena sanguisorbae Vahl (*Acaena sanguisorbae* (L.) Vahl)

Australia. Creeping herb, fruits covered with burrs or spiny barbs

See *Enum. Pl.* [Vahl] i. 294. 1804

(Leaves infusion taken for kidney and bladder complaints, and for venereal diseases.)

Maori names: bidibid, hutiwai, pipiripi

Acalypha L. Euphorbiaceae

From the old Greek name *akalephe* ‘nettle’, the leaves of *Urtica* and *Acalypha* seemed similar to Linnaeus; Latin *acalephe*, es ‘a nettle’ (the French physician Odo de Meung [Odo Magdunensis, pseud. Aemilius Macer], first half of the 11th century, author of *Macer Floridus De Viribus Herbarum Carmen*. Neapoli 1477, *De uirtutibus herbarum*. Venetiis 1506; Odo must be distinguished from Aemilius Macer, d. 16 BC., a Latin poet, a friend of Vergilius). Hippocrates, *De*

Morbis. 3.15 (ed. P. Potter, Loeb Classical Library, 1988); Aristophanes, *Lysistrata*. 549, for the Greek poet *akalephe* was the name for actinia or sea anemone. See Carl Linnaeus (Carl von Linnaeus, Carl von Linné, Karl af Linné) (1707–1778), *Species Plantarum* 2: 1003–1004. 1753, Friedrich Boerner, *De Aemilio Macro, eiusque rariore hodie opuscolo de virtutibus herbarum, diatribe*. ***Acalypha allenii* Hutch.**

Southeastern Africa, S. Trop. Africa to Botswana. Small herb, caespitose, shrub, suffrutex, erect, decumbent or semi-prostrate, rhizomatous woody rootstock, red male inflorescence, female spike terminal, male racemes axillary solitary, yellow stigmas

See *Bull. Misc. Inform. Kew* 1911: 229. 1911, *Trans. Roy. Soc. South Africa* 5: 395. 1916

(An infusion of the pounded roots mixed with bone meal taken to treat edema. Root paste used as an enema to treat diarrhea of children. A root infusion drunk as an aphrodisiac.)

***Acalypha alopecuroides* Jacq.** (*Acalypha alopecuroides* *lusus glanduligera* Klotzsch; *Acalypha alopecuroides* *lusus hispida* Müll.Arg.; *Acalypha alopecuroides* f. *glanduligera* (Klotzsch) Müll.Arg.; *Acalypha alopecuroides* f. *polyccephala* Müll.Arg.; *Ricinocarpus alopecuroides* Kuntze; *Ricinocarpus alopecuroides* (Jacq.) Kuntze)

South America.

See *Icon. Pl. Rar.* 3: 19. 1790, *Bot. Voy. Herald*: 102. 1853, *Linnaea* 34: 50. 1865, *Revis. Gen. Pl.* 2: 617. 1891 and *International Journal of Oncology* 35(4): 881–891. 2009

(Antiinflammatory and anticancer activities, used in the form of decoctions to treat skin conditions; an infusion to treat stomach and urinary complaints.)

***Acalypha ambigua* Pax** (*Acalypha dumetorum* Pax, nom. illeg.; *Acalypha polymorpha* var. *angustifolia* Müll.Arg.; *Acalypha polymorpha* var. *depauperata* Müll.Arg.)

Burundi, Namibia. Herb, shrub, erect, woody base, plant widely browsed by livestock

See *J. Bot.* 1: 335. 1864, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 96. 1894 and *Kunene-Sambesi Exped.* 283. 1903

(Leaves tonic, stimulant, restorative. Root decoction drunk or used as an enema or in a vapor bath to treat insanity and possession. Veterinary medicine.)

in Burundi: umukundanya

***Acalypha amentacea* Roxb.**

Taiwan to W. Pacific. Tree or shrub, reddish leaves, stigmas red

See *Flora Indica*; or, descriptions of Indian Plants 3: 676. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 817. 1866, *Revis. Gen. Pl.* 2: 618. 1891 and *Smithsonian Contributions to Botany* 45: 10. 1980, *Fieldiana: Botany, New Series* 36: 1–169. 1995

(Young leaves decoction drunk to treat diarrhea and dysentery.)

in English: catch-me-if-you-can, match me if you can

***Acalypha andringitrensis* Leandri**

Madagascar.

See *Notul. Syst. (Paris)* 10: 277. 1942

(A decoction of the aerial parts or stem bark of *Acalypha andringitrensis* and *Acalypha radula* Baill. taken or inhaled to treat fever and syphilis. Crushed leaves topically applied to treat scabies.)

***Acalypha australis* L.** (*Acalypha australis* f. *glareosa* (Rupr.) H. Hara; *Acalypha australis* f. *velutina* (Honda) Ohwi; *Acalypha australis* var. *glareosa* (Rupr.) Nakai; *Acalypha australis* var. *lanceolata* Hayata; *Acalypha australis* var. *velutina* Honda; *Acalypha chinensis* Roxb.; *Acalypha gemina* Spreng.; *Acalypha gemina* var. *genuina* Müll.Arg., nom. inval.; *Acalypha gemina* var. *lanceolata* Hayata; *Acalypha indica* var. *minima* (H. Keng) S.F. Huang & T.C. Huang; *Acalypha lanceolata* Wall., nom. inval.; *Acalypha minima* H. Acalypha insulana Müll.Arg. (*Ricinocarpus insulanus* (Müll.Arg.) Kuntze)

SW. Pacific. Shrub or tree, leaves coriaceous, lax flowered female spikes

See *Flora* 47: 439. 1864, *Revisio Generum Plantarum* 2: 618. 1891

(Protective or magical. Leaves for wounds, sores and ulcers, an infusion used to bathe people possessed by spirits.)

in Papua New Guinea: anasuwe, bluwa

in Samoa: pupuono

Acalypha integrifolia Willd. (*Acalypha gracilipes* Baill.; *Acalypha integrifolia* var. *gracilipes* (Baill.) Müll.Arg.;

Caturus sessilis Thouars ex Baill.; *Ricinocarpus integrifo-lius* (Willd.) Kuntze)

Madagascar, Mauritius, Réunion. Shrub, erect, spreading, male flowers green to reddish, female inflorescence an axil-lary cluster, male inflorescence an axillary solitary spike, variable species

See *Sp. Pl.* 4: 530. 1805, *Adansonia* 1: 273. 1861, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 850. 1866

(Leaf decoction taken as an astringent and purgative, used to eliminate intestinal worms. A bath in the leaf decoction taken to treat skin infections.)

Acalypha lanceolata Willd. (*Acalypha boehmeriodes* Miq.; *Acalypha fallax* Müll.Arg.; *Acalypha wightiana* var. *lanceolata* (Willd.) Müll.Arg.; *Ricinocarpus lanceolatus* (Willd.) Kuntze)

Trop. Africa to Polynesia. Herb, erect or straggling, weedy, inflorescences bisexual

See *Sp. Pl.* 4: 524. 1805, *Linnaea* 34: 43. 1865, *Revis. Gen. Pl.* 2: 617. 1891 and *Kew Bulletin* 26: 191–363. 1972, *Kew Bulletin* 36: 239–374. 1981, *Kew Bulletin* 37: 1–40. 1982

(Leaves applied as an antiseptic on boils and swellings; leaf powder mixed with castor oil (*Ricinus communis* L.) applied to scabies. Whole plant to relieve headache, used as a vermi-cide and a carminative, also applied to sores.)

in Indonesia: daun brahman, klatang, pulus hayam

in Thailand: tamyae sifan laem

in Vietnam: tai t[uw][owj] thon

in Samoa: ogo mûmû

Acalypha langiana Müll.Arg. (*Ricinocarpus langianus* (Müll.Arg.) Kuntze)

Central America.

See *Linnaea* 34: 159. 1865, *Revis. Gen. Pl.* 2: 618. 1891 and *Clin. Ter.* 161(4): 359–364. 2010

(Wound healing in diabetes mellitus.)

Acalypha lyallii Baker (*Acalypha fasciculata* Müll.Arg.)

Madagascar and the Comoros. Small tree

See *Linnaea* 34: 31. 1865, *Journal of the Linnean Society, Botany* 20: 255. 1883

(A leaf decoction used to massage parts of the body to treat rheumatism.)

Acalypha neptunica Müll.Arg. var. *neptunica* (*Acalypha mildbraediana* Pax var. *glabrescens* Pax; *Acalypha neptu-nica* var. *genuina* Pax & K. (Used in Ayurveda. Plant extract used to treat rheumatism. Leaf juice taken with honey as laxative. In cases of bone fracture, applied as a paste made from leaves; the leaves may also be tied on the broken part.)

in India: chind, gandhanakuli, maraakad, marabale, rasna, thalia-maravara, vajnik

Acanthambrosia Rydb. Asteraceae

From the Greek *akantha*, *akanthes* ‘thorn, prickle’ plus *Ambrosia* L., see *North American Flora* 33(1): 22. 1922.

Acanthambrosia bryantii (Curran) Rydb. (*Ambrosia bryantii* Payne; *Franseria bryantii* Curran)

North America.

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 2(3): 78. 1793 [1793–1794], *Proceedings of the California Academy of Sciences*, Series 2, 1: 232. 1888 and *North American Flora* 33(1): 22. 1922

(Long thorny spines of the fruiting involucre.)

Acanthodium Delile Acanthaceae

From the Greek *akantha*, *akanthes* ‘thorn’, *akanthos* ‘acanthus, bear’s-breech’.

Acanthodium hirtum Hochst. ex Nees (*Acanthodium hirtum* Nees; *Blepharis linariaefolia* Pers.; *Blepharis linariifolia* Pers.)

Sudan. Herb

See *Prodr.* (DC.) 11: 274. 1847 [25 Nov 1847]

(Seeds used in medicine. Whole plant used as tonic and for abdominal disorders and Bilharzia.)

Acantholimon Boiss. Plumbaginaceae

Greek *akantha*, *akanthes* ‘thorn’ and the genus *Limonium* Miller, sea-lavender, *leimon* ‘a meadow, a moist place, a flowery surface’, see *Species Plantarum* 1: 274–277. 1753, *Diagnoses plantarum orientalium novarum* ser. 1, 7: 69. 1846 and *Fl. Iranica* [Rechinger] 108: 31, 35, 37, 76–77, 151, 153. 1974, *Israel J. Pl. Sci.* 49(4): 300. 2001.

Acantholimon lycopodioides (Girard) Boiss. (*Acantholimon lycopodioides* Boiss.; *Statice lycopodioides* Girard)

India, Himalaya. Fodder for goat and sheep

See *Annales des Sciences Naturelles; Botanique*, sér. 3, 2: 330. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 12: 632. 1848

(Plant ash given with milk in case of cardiac disorders.)

in China: shi song cai hua

in India: longze, snyalo

Acantholippia Griseb. Verbenaceae

From the Greek *akantha*, *akanthes* ‘thorn’ and the genus *Lippia* L., *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 244–245. 1874 and *Dominguezia* 3: 4. 1982.

Acantholippia deserticola (Phil.) Moldenke (*Acantholippia punensis* Botta; *Lippia deserticola* Phil.; *Lippia microphylla* Phil., nom. illeg.; *Lippia microphylla* Cham.)

Chile.

See *Species Plantarum* 2: 633–634. 1753, *Linnaea* 7: 226. 1832, *Anales de la Universidad de Chile* 2: 350. 1865 and *Lilloa* 5: 370. 1940, *Hickenia* 1(35): 195. 1979

(Leaves and stem infusion for stomachache.)

in Chile: rica-rica

Acanthosicyos Welw. ex Hook.f. Cucurbitaceae

Greek *akantha*, *akanthes* ‘thorn’ and *sikyos* ‘wild cucumber, gourd’, *Cucumis sativus*; Akkadian *siqu*, Hebrew *siqquj* ‘drink, refreshment’, see *Genera Plantarum* [Bentham & Hooker f.] 1(3): 824. 1867, *Trans. Linn. Soc. London* 27(1): 30–31. 1869.

Acanthosicyos horridus Welw. ex Hook. f. (*Acanthosicyos horrida* Welw.)

Tropical Africa, Namibia. Perennial leafless shrub, rigid, densely tangled, spreading, sprawling, many-branched, thick woody taproot, heavily armed, straight sharp paired spines, grooved stems, flowers solitary, female flowers have an inferior warty ovary that develops into a waxy melon orange-yellow covered with small spiky protuberances, cream-coloured delicious seeds embedded in an orange-yellow protein-rich pulp, a source of food, ripe edible fruit, seeds highly nutritious, very bitter roots

See *Genera Plantarum* 1: 824. 1867 and *Haseltonia* 7: 53–62. 2000

(Roots decoction used for venereal diseases, stomachache, nausea, kidney problems, chest pains and arteriosclerosis. Sweet fruity flesh of the fresh fruit can be eaten raw, but it can burn the mouth. Fresh fruit said to relieve stomach

pains; oil from the seeds moisturizes the skin and protects it from sunburn.)

in English: bitternut, butterpips, nara, nara melon

in Namibia: botterpitte, !naras, narra, omungaraha

in Tropical Africa: nara, narras

Acanthospermum Schrank Asteraceae

Greek *akantha*, *akanthes* ‘thorn’ and *sperma* ‘a seed’, alluding to the spiny seeds; see Franz von Paula von Schrank (1747–1835), *Plantae rariores Horti academici Monacensis. Monachii* [München, Munich] 1817–1819 [1817–1822], *Nov. Gen. Sp.* [H.B.K.] 4: 270, t. 397. 1820 and *Taxon* 46: 805–806. 1997, *Taxon* 49: 265. 2000.

Acanthospermum australe (Loefl.) Kuntze (*Acanthospermum australe* Kuntze; *Acanthospermum brasilium* Schrank; *Acanthospermum hirsutum* DC.; *Acanthospermum xanthioides* (Kunth) DC.; *Centrospermum xanthioides* Kunth; *Melampodium australe* Loefl.; *Orcya adhaerens* Vell.)

Venezuela, Brazil.

See *Species Plantarum* 2: 921. 1753, *Iter Hispanicum* 268–269. 1758, *Florae Fluminensis* 344–345. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 521–522. 1836, *Revisio Generum Plantarum* 1: 303. 1891 and *Fl. Venez. Guayana*. 3: 177–393. 1997

(Whole plant used for regulating fertility.)

in Paraguay: tapekue

Acanthospermum hispidum DC. (*Acanthospermum hispidum* A. Chev., not DC.; *Acanthospermum humile* (Sw.) DC. var. *hispidum* (DC.) Kuntze)

Kenya, Tanzania. Annual, herb, erect, hairy, bushy, leaves opposite hairy, flowers pale yellow-green, spiny achenes grouped into star-shaped clusters, weed

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 522. 1836, *Revisio Generum Plantarum* 1: 303. 1891 and *Exploration Botanique de l’Afrique Occidentale Française* ... 368. 1920, *Taxon* 30: 78. 1981, *Smithsonian Contributions to Botany* 52: 1–28. 1981, *Cell and Chromosome Research* 7: 26–28. 1984, *Kromosomo* 42: 1311–1315. 1986, *Glimpses in Plant Research* 8: 1–177. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Feddes Repertorium* 101: 49–62. 1990, Pierre Fatumbi Verger, *Ewé: the use of plants in Yoruba society*. in Yoruba: dagunro, dagunro gogoro

in Togo: afegba, afégbin, dugba, gbényé, gongadé, nawdem, poma, sobué, ziaedji

Acanthus L. Acanthaceae

Greek *akanthos* ‘acanthus, bear’s-breech’, *akantha*, *akanthes* ‘thorn’, Latin *acanthus*, *i* ‘the plant bear’s foot or brank-ursine, *Acanthus mollis* L.’; see Hippocrates, *De Morbis Mulierum*. 1.63.; Dioscorides, 3.17 (ed. M. Wellmann, Berlin 1907–14). See Carl Linnaeus, *Species Plantarum*. 2: 639. 1753, *Genera Plantarum*. Ed. 5. 286. 1754 and Pietro Bubani, *Flora Virgiliana*. 11–13. [Ristampa dell’edizione di Bologna 1870] Bologna 1978.

Acanthus arboreus Forssk.

Tropical Africa. Shrub, smooth bark, thorny leaves, flowers pink, riverine bushland

See *Fl. Aegypt.-Arab.* 115. 1775 [1 Oct 1775]

(Sedative. Leaves for itch, eczema, boils, snakebite. Veterinary medicine.)

in Burundi: igitovu, itovu

in Congo: lurhabu

in Rwanda: igitovu, lurhadu

Acanthus ebracteatus Vahl

SE Asia, Thailand. Erect, shrubby herb, many stemmed, spreading or scrambling, spiny, usually green stems, stiff deeply lobed leaves sharply spiny, almost spineless leaves in the shade, flowers in spikes at branch tips, capsules slightly flattened, whitish flat seeds, excreting salt, in tidal rivers, mangrove forest

See *Symbolae Botanicae, ...* (Vahl) 2: 75, t. 40. 1791 and *Journal of Ethnopharmacology* 85(2–3): 207–215. 2003, Hokputsa, S. et al. “Bioactive polysaccharides from the stems of the Thai medicinal plant *Acanthus ebracteatus*: their chemical and physical features.” *Carbohydr. Res.* 339(4): 753–762. 2004

(Relief of allergy, strengthen energy; roots and stem for skin diseases and fevers. Seeds tonic; pounded seeds used to cure boils, boiled seeds for cough. Whole plant decoction used for kidney stones. Leaves juice reputed to prevent hair loss. Leaves of *Acanthus ebracteatus*, stem bark of *Oroxylum indicum* and stems of *Cryptolepis buchananii* and *Derris scandens* used for arthritis. Magic, prickly leaves used to ward off evil spirits.)

in English: holly-leaved mangrove, sea holly

in Indonesia: daruju, jeruju

in Malaysia: beruju, jeruju, jeruju hitam

in Sarawak: gerige

in Singapore: jeruju hitam

in Thailand: ghuark-plar-mor, ngueak plaa mo, ngueak plea mo, ngueg-pla-moh

in Vietnam: [oo] r[oo], uh ruh

Acanthus guineensis Heine & P. Taylor

Tropical Africa. Erect herb, weed, fleshy, leaves spinous-toothed, white yellowish corolla

See *Kew Bulletin* 16: 161, f. 1, 1–3. 1962

(A cough medicine, the juice from crushed leaves used as eye lotion.)

Acanthus ilicifolius L. (*Acanthus ilicifolius* Lour., nom. illeg.; *Acanthus ilicifolius* var. *typica* (L.) Domin; *Dilivaria ilicifolia* (L.) Pers.; *Dilivaria ilicifolia* (L.) Juss.; *Dilivaria ilicifolia* Juss.; *Dilivaria ilicifolia* (Linnaeus) Nees)

Thailand, Malaysia. Shrub, erect, slightly woody at base, leaves spiny, flowers white light violet in spikes, capsules

slightly flattened, whitish flat seeds, along sea coast, marine areas, mangrove forests, near sea level

See *Species Plantarum* 2: 639. 1753 [1 May 1753], *Genera Plantarum* [Jussieu] 103. 1789, *Flora Cochinchinensis* 375. 1790 and *Bibliotheca Botanica* 89: 603. 1929, *Cytologia* 48: 491–504. 1983, *Cytologia* 53: 87–92. 1988

(Used in Ayurveda and Sidha. Whole plant decoction used for kidney stones, dyspepsia, asthma, paralysis; plant paste for asthma. Seeds tonic. Leaves emollient, a treatment for rheumatism, neuralgia and wounds of poison arrows; leaves, crushed in water, drunk to facilitate delivery; leaves decoction applied against acute joint pains. Magic, ritual.)

in English: holly-leaf mangrove, sea holly, spiny mangrove

in China: lao shu le

in India: alasyakampa, alchi, alisi, arrumulli, attumulli, chakkaramulli, etichilla, harakancha, harcuch-kanta, hargoza, harikasa, harikusa, harkancha, harkanchi, harkonch kanta, harkuchkanta, harkusa, hole chulli, holechudi, holechulli, holeculli, holesulli, kaandlachulli, kaludaimulli, kalutaimanpulli, kalutaimulli, katalmulli, katalnirmulli, kazhuthai-mulli, kilichiri, kiliciri, kolimulli, koshimullu, marandi, maruvakankapattiram, mendli, moranna, mormado, mulli chulli, mullu chulli, mulluculli, mullusulli, paina schulli, paina-schulli, painaschulli, payinachhulli, payinaculli, payinnaculli, payinnachulli, phaina-schelli, thude chulli, tudechudi, tudechulli, tudeculli, uppukkarinimulli, uppukkarinirumulli

in Philippines: daguari, diliuariu, diluariu, kasumba

in Thailand: cha kreng, kaem mo, ngueak plaa mo, ngueak plaamo namngoen, ngueak plea mo

in Vietnam: [ax]o th[uwr] c[aa]n, n[uw][ows]c

Acanthus leucostachyus Wall. (*Acanthus leucostachyus* Wall. ex Nees)

India.

See *Plantae Asiaticae Rariores* 3: 98. 1832

(Leaves decoction with the extract of tuber of *Allium* and leaves of *Thunbergia* applied externally for swelling, fever, toothache; leaf paste and juice applied on cuts and injuries to stop bleeding.)

in India: mishisalai, sam sikal, tua-aing

Acanthus mollis L. (*Acanthus mollis* Graf & Noë ex Nees; *Acanthus mollis* Riedel ex Nees)

Italy.

See *Sp. Pl.* 2: 639. 1753, *Prodr.* (DC.) 11: 270–271. 1847

(Dried leaves infusion applied as antiinflammatory for swollen legs, a poultice for intestinal troubles.)

in English: artist's acanthus, bear's breech

in Japan: ha-azami

in Arabic: bakhbakh, sabounia, selikh

Acanthus montanus (Nees) T. Anderson (*Acanthus montanus* T. Anderson; *Cheilopsis montana* Nees)

Nigeria. Herb, shrubby or subshrub, erect, prickly leaves

See *Annales des Sciences Naturelles* (Paris) 27: 230. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 272. 1847, *Journal of the Proceedings of the Linnean Society* 7: 37. 1863 [1864 publ. 1863] and *Contr. Univ. Michigan Herb.* 23: 115–137. 2001, *Contr. Univ. Michigan Herb.* 24: 51–108. 2005

(Leaves and stem bark for cough, stomachache. Leaves decoction given for the treatment of abdominal pain, stomachache.)

in English: bear's breech, mountain acanthus, mountain thistle

in Central African Republic: pàngba-ngòndi

in Congo: bali tsari, bari tsari

in Nigeria: ebe-igba, gbolimosasa, ugbensugben, ugilibhibosa

in Sierra Leone: kpete pela

in Yoruba: ahon ekun dudu, ekun arugbo, opipi, opipi oko

Acanthus pubescens (Thomson ex Oliv.) Engl. (*Acanthus pubescens* Engl.; *Acanthus pubescens* Engl. & Turrill; *Acanthus ueleensis* De Wild.)

Tropical Africa. Shrub, corolla purple, calyx tinged blue-purple at edge

See *Abh. Preuss. Akad. Wiss.* 1891, ii. (1892) 390. 1892 and *Ann. Mus. Congo Belge, Bot. sér. 5, 3[2]: 270.* 1910 [1911–1912 publ. Nov 1910], *Bull. Misc. Inform. Kew* 1913, 337. 1913, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983

(Leaves sedative, laxative, for itch, eczema, boils, snake-bite, gastrointestinal disorders; leaves ash, internal, used for dry cough, pneumonia, chronic asthma, cancer, tonsils, flu (*mireiwek*). Veterinary medicine.)

in English: prickly acanthus

in Burundi: igitovu, itovu

in Congo: lurhabu

in Kenya: ndakariat

in Rwanda: igitovu, lurhadu

Acer L. Sapindaceae (Aceraceae)

Latin *acer*, *aceris* 'the maple tree'; Akkadian *arku* 'long, tall'; see Carl Linnaeus, *Species Plantarum.* 2: 1054–1056.

1753, *Genera Plantarum.* Ed. 5. 474. 1754, *Definitiones Generum Plantarum* 508. 1760, *Genera Plantarum* 250. 1789, *New Flora and Botany of North America ...* 1: 47. 1836, *Bulletin de l'Académie impériale des sciences de St.-Petersbourg* 26: 450. 1880, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 326–328. 1885 and *American Midland Naturalist* 3(7): 182. 1914, *Botanical Magazine* 29: 25. 1915, *Bulletin of the Fan Memorial Institute of Biology*, new series 2(1): 200, 208. 1948, *Fieldiana, Bot.* 24(6): 229–233. 1949, *Acta Phytotaxonomica Sinica* 11: 172. 1966, *Bull. Acer album Hort. (*Acer alba* L.)

North America.

See *Handl. Trees Kew* Pt. i. [Polypet.] (1894) 87. 1894

(Bark used as a cough remedy.)

in English: white maple

Acer caesium Wall. ex Brandis (*Acer caesium* (Reinw. ex Blume) Kosterm.; *Acer caesium* subsp. *giraldii* (Pax) A.E. Murray; *Acer giraldii* Pax)

India, China. Tree

See *The forest flora of North-West and Central India* 3: 111, pl. 21. 1874 and *Das Pflanzenreich* (Engler) Acerac. 8(IV. 163): 79. 1902, *Reinwardtia* 7: 142. 1965, *Kalmia* 1: 1. 1969, *Ethnobotanical Leaflets* 10: 72–81. 2006

(Wood extract applied on wounds and skin diseases. Astringent, bark juice used externally to treat muscular swellings, boils and pimples. Emotional, magico-religious beliefs, spiritual, branches used by women as a love charm.)

in India: chirandru, kamia, kanjula, kinar, mandar, mandarang, mandlu, mari, mapple, trekhan

Acer cappadocicum Gled. (*Acer cultratum* Wall.; *Acer laetum* C.A. Meyer)

Asia minor, N.E. Turkey, Caucasus, Himalayas. Tree, rounded, spreading, flowers yellowish green, samaras compressed

See *Schriften der Gesellschaft Naturforschender Freunde zu Berlin* 6: 116, t. 2. 1785, *Pl. Asiat. Rar.* (Wallich). 2: 4. 1830, *Verz. Pfl. Casp. Meer.* (C.A. von Meyer). 236. 1831

(Tonic.)

in English: Cappadocian maple, Caucasian maple, Coliseum maple

in India: garh papri, kainchali

Acer circinatum Pursh

North America. Perennial, shrub, tree, vine, fruits red

See *Flora Americae Septentrionalis*; or, ... 1: 267. 1814 [1813] and *Anthropological Records* 13(6): 377–392. 1952

(Antidiarrheal. Love medicine, charm.)

in English: vine maple

Acer glabrum Torr. (*Acer glabrum* var. *tripartitum* (Nutt. ex Torr. & A. Gray) Pax; *Acer glabrum* var. *typicum* (Wesmael) Keller; *Acer tripartitum* Nutt. ex Torr. & A. Gray)

North America. Tree, shrub, perennial

(Infusion of bark cathartic. Decoction of wood and bark antiemetic. Decoction of sticks to stimulate lactation. Snakebite remedy.)

in English: Rocky Mountain maple

Acer laevigatum Wall. (*Acer oblongum* var. *laevigatum* (Wall.) Wesm.; *Acer laevigatum* G. Nicholson)

China, India.

See *Plantae Asiaticae Rariores* (Wallich) 2: 3, t. 104. 1830, *The Gardeners' Chronicle*, new series 1: 364, f. 68. 1881, *Bulletin de la Société Botanique de Belgique* 29: 42. 1890

(Bark decoction applied to strains.)

in China: guang ye feng

in India: thing khim

Acer macrophyllum Pursh

North America. Tree, sap eaten dried or fresh, seeds used for food

See *Species Plantarum* 2: 1054–1056. 1753, *Flora Americae Septentrionalis*; or, ... 1: 267. 1814 [1813] and Hebda, R. "Plant profile: *Acer macrophyllum*." *Menziesia* 8(3): 14–15. 2003, *Mycol. Res.* 108(Pt 10): 1195–204. 2004

(Seeds covered with spiny hairs that can penetrate and irritate the skin. Infusion of bark taken for tuberculosis.)

in English: big-leaf maple, Oregon maple

Acer mono Maxim.

Japan.

See *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Pétersbourg* 15: 126. 1857, *Mel. Biol.* 2: 416. 1857, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 26: 443. 1880, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 5: 229. 1883 and *Kalmia* 1: 17. 1969, *Kalmia* 12: 17. 1982, *Journal of Japanese Botany* 68(6): 321. 1993

(Tonic sap.)

in Japan: si-topeni, tope-ni

Acer negundo L. (*Acer negundo* var. *variegatum* Jacques; *Negundo aceroides* Moench; *Negundo negundo* (L.) H. Karst., nom. inval., tautonym)

North America. Tree

See *Species Plantarum* 2: 1054–1056. 1753, *Definitiones Generum Plantarum* 508. 1760, *Methodus Plantas Horti Botanici ...* 334. 1794, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 596. 1882 and Kupchan S.M. et al. "Tumor inhibitors. XXI. Active principles of *Acer negundo* and *Cyclamen persicum*." *J. Pharm. Sci.* 56(5): 603–8. 1967, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 23: 1–23. 1974, *Revista de la Facultad de Ciencias Agrarias [Universidad Nacional de Cuyo]* 22: 23–25. 1982, *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Journal of Wuhan Botanical Research* 32(2): 180–182. 1995, Lin, R.Y., Clauss, A.E., Bennett, E.S. "Hypersensitivity to common tree pollens in New York City patients." *Allergy Asthma Proc.* 23(4): 253–8. 2002

(A cause of airborne contact dermatitis. Inner bark decoction or infusion taken as an emetic. Ceremonial, ritual.)

in English: box elder, box elder maple

in North America: nahosh (Winnebago), osako (Pawnee)

Acer nigrum Michx. f. (*Acer nigrum* var. *palmeri* Sarg.; *Acer saccharum* Marsh. subsp. *nigrum* (Michx. f.) Desmarais; *Acer saccharum* var. *nigrum* (Michx. f.) Britton; *Acer saccharum* var. *viride* (Schmidt) E. Murray; *Saccharodendron nigrum* (Michx. f.) Small)

North America. Tree

See *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 2: 238. 1812 and *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989

(Decoction of inner bark antidiarrheal. Diuretic.)

in English: black maple

Acer pensylvanicum L. (*Acer pennsylvanicum* Du Roi; *Acer pensylvanicum* subsp. *typicum* (L.) Wesm.)

North America. Tree, shrub

See *Species Plantarum* 2: 1055. 1753 and *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 19–20. 1995

(Used for bronchial troubles. Plant infusion taken for kidney trouble, gonorrhoea. Decoction of inner bark taken as an emetic, laxative; decoction of bark applied as poultice for paralysis; bark used for colds, coughs; poultice of steeped bark applied to swollen limbs. Wood antihemorrhagic, used for spitting blood, gonorrhoea, kidney trouble.)

in English: moosewood, Pennsylvania maple, striped maple, whistle-wood

Acer pentapomicum Stewart ex Brandis

India, Himalaya.

See *Rhodora* 90: 127–131. 1988

(Bark used for colds, cough; wood for gonorrhoea.)

Acer pictum Thunb. (*Acer lobelii* Ten. subsp. *pictum* (Thunb.) Wesm.; *Kalopanax pictus* (Thunb.) Nakai)

India.

See *Species Plantarum* 2: 1054–1056. 1753, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 4: 40. 1784, *Flora Japonica*, ... (Thunberg) 162. 1784, *Systema Vegetabilium*. Editio decima quarta (J.A. Murray). 912. 1784, *Annales Museum Botanicum Lugduno-Batavi* 1: 4, 16. 1863, *Bulletin de la Société Botanique de Belgique* 29: 56. 1890 and *Flora Sylvatica Koreana* 16: 34, pl. 8–10. 1927, Nadkarni, K.M. *Indian Materia Medica*. Bombay. 1976, *Taxon* 39: 535–536. 1990

(The leaves of this species are irritant. Bark astringent.)

in China: se mu feng

in India: chikkudu, dargu, kainju, kalbenga, karimutal, mandar, mandlu, modi-mudsu, naiponai, nemih, panan, panjan, rathadrumah, rikhandlu, sandan, syandanadrumah, syandanah, tella-modgu, tian, tinisah, tinsa, tiwas, tunuz, vandanam

Acer platanoides L. (*Euacer platanoides* (L.) Opiz)

North America.

See *Species Plantarum* 2: 1054–1056. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 327. 1885 and Weber L.F. “Dermatitis venenata due to native woods.” *AMA Archives of Dermatology and Syphilology* 67: 388–394. 1953, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 23: 1–23. 1974, *Acta Biologica Cracoviensia, Series Botanica* 19: 107–148. 1976, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Botaničeskij Žurnal (Moscow & Leningrad)* 75: 279–282. 1990, *Tree Physiol.* 15(11): 739–46. 1995, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *J. Exp. Bot.* 58(7): 1753–60. 2007

(The wood is listed as irritant.)

in English: Norway maple

Acer rubrum L. (*Acer rubrum* var. *tomentosum* Tausch; *Acer stenocarpum* Britton; *Rufacer rubrum* (L.) Small)

North America. Tree, sap not milky, leaves with shallow notches between lobes

See *Species Plantarum* 2: 1054–1056. 1753 and Tennant, B. et al. “Acute hemolytic anemia, methemoglobinemia, and Heinz body formation associated with ingestion of red maple leaves by horses.” *J. Am. Vet. Med. Assoc.* 179: 143–150. 1981, Divers, T.J., George, L.W., George, J.W. “Hemolytic anemia in horses after the ingestion of red maple leaves.” *Toxicology* 180: 300–302. 1982, Long, P.H., Payne, J.W. “Red maple-associated pulmonary thrombosis in a horse.” *J. Am. Vet. Med. Assoc.* 184: 977–978. 1984, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*.

AVI Publishing Company, Inc., Westport, Conn., USA. 1985, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, Plumlee, K.H. “Red maple toxicity in a horse.” *Vet. Hum. Toxicol.* 33: 66–67. 1991, Alward A., Corriher C.A., Barton M.H., Sellon D.C., Bliklager A.T., Jones S.L. “Red maple (*Acer rubrum*) leaf toxicosis in horses: a retrospective study of 32 cases.” *J. Vet. Intern. Med.* 20(5): 1197–201. 2006

(High toxicity, death is common. Leaves of this plant have caused poisoning and death in horses. Ingestion of wilted red maple leaves by horses can result in severe hemolytic anemia and methemoglobinemia. An extract of the bark used for its astringent effect in the treatment of sore eyes. Infusion of bark analgesic, antidiarrheal, given for measles; decoction of bark used as a wash for sore eyes; inner bark boiled and used with water as wash for sore eyes.)

in English: red maple, swamp maple

Acer rubrum L. var. **drummondii** (Hook. & Arn. ex Nutt.) Sarg. (*Acer drummondii* Hook. & Arn. ex Nutt.; *Acer rubrum* subsp. *drummondii* (Hook. & Arn. ex Nutt.) E. Murray; *Rufacer drummondii* (Hook. & Arn. ex Nutt.) Small)

North America. Tree

(Infusion of bark analgesic, taken and used as a wash for gun wounds.)

in English: Drummond’s maple

Acer saccharinum L. (*Acer dasycarpum* Ehrh.; *Acer saccharinum* var. *laciniatum* Pax; *Acer saccharinum* var. *wieri* Rehder; *Argentacer saccharinum* (L.) Small)

North America. Tree

(Infusion of bark analgesic, antidiarrheal, for cough; inner bark boiled and used with water as wash for sore eyes; decoction of inner bark diuretic, used for diarrhea; hot infusion of bark given for measles. Infusion of root bark taken for gonorrhoea.)

in English: silver maple

Acer saccharum Marshall

North America. Tree

See *Species Plantarum* 2: 1054–1056. 1753, *Arbustrum Americanum* 4. 1785 and Hausen B.M. “Sensitizing capacity of naturally occurring quinones. V. 2,6-Dimethoxy-p-benzoquinone: occurrence and significance as a contact allergen.” *Contact Dermatitis* 4: 204–213. 1978, *Bulletin de la Société Neuchâteloise de Sciences Naturelles* 116(2): 47–53. 1993, *Tree Physiol.* 15(11): 739–46. 1995, *Plant Physiol.* 133(2): 441–2. 2003, *Am. J. Contact Dermat.* 14(2): 82–9. 2003

(Contact allergen. Sap used for sore eyes. Bark infusion used as drops for blindness; inner bark used as a cough remedy, expectorant.)

in English: hard maple, pale bark, rock maple, sugar maple

Acer saccharum Marshall var. ***saccharum*** (*Acer nigrum* var. *glaucum* (F. Schmidt) Fosberg; *Acer nigrum* var. *saccharophorum* (K. Koch) R.T. Clausen; *Acer saccharum* var. *glaucum* (F. Schmidt) Sarg.; *Acer saccharum* var. *rugellii* (Pax) Rehder; *Saccharodendron saccharum* (Marsh.) Moldenke)

North America. Tree

See *Species Plantarum* 2: 1054–1056. 1753, *Arbustrum Americanum* 4. 1785 and Hausen B.M. “Sensitizing capacity of naturally occurring quinones. V. 2,6-Dimethoxy-p-benzoquinone: occurrence and significance as a contact allergen.” *Contact Dermatitis* 4: 204–213. 1978, *Tree Physiol.* 15(11): 739–46. 1995, *Plant Physiol.* 133(2): 441–2. 2003, *Am. J. Contact Dermat.* 14(2): 82–9. 2003

(Contact allergen. Sap used for sore eyes. Bark infusion used as drops for blindness; inner bark used as a cough remedy, expectorant, pectoral. Leaves decoction for itch, rashes.)

in English: hard maple, pale bark, rock maple, sugar maple

Acer spicatum Lam.

North America. Tree, shrub

See *Species Plantarum* 2: 1054–1056. 1753 and *New Zealand Journal of Botany* 20: 169–186. 1982, *International Organization of Plant Biosystematists Newsletter* 25: 9–10. 1995

(Plant used for intestinal diseases. Infusion or poultice of outside bark used for sore eyes; inner bark used as cough syrup. Poultice of boiled root chips applied to wounds and abscesses. Decoction of roots and bark taken for internal hemorrhage.)

in English: mountain maple

Acer tataricum L. subsp. ***ginnala*** (Maxim.) Wesm. (*Acer ginnala* Maxim.; *Acer tataricum* var. *ginnala* (Maxim.) Maxim.; *Acer tataricum* var. *laciniatum* Regel)

Amur, Russia, China. Small tree, multi-stemmed, winged samaras, habitat for wildlife, food and shelter, young leaves used as a tea substitute, along streamsides and swampy places

See *Species Plantarum* 2: 1054. 1753, *Bull. Phys.-Math. Acad. Sci. St. Pétersbourg.* 15: 126. 1856, *Mélanges Biologiques Tirés du Bulletin Physico-Mathématique de l'Académie Impériale des Sciences de St.-Pétersbourg* 2: 415. 1856, *Bulletin de la Société Botanique de Belgique* 29: 31. 1890 and *Taxon* 30: 77–78. 1981, *Botaničeskij Žurnal (Moscow & Leningrad)* 74: 1674–1675. 1989, *Journal of Plant Biology* 39: 15–22. 1996

(Young leaves contain an antioxidant, antiinflammatory and antitumor compound.)

in English: Amur maple, ginnala maple, Siberian maple

Achillea L. Asteraceae

The genus was named to honor the hero of the *Iliad* Achilles (in Greek Akhilleus), son of Peleus and Thetis, from Chiron the Centaur he learned the healing properties of the plant. See Lewis Richard Farnell, *Greek Hero Cults and Ideas of Immortality*. The Gifford lectures ... 1920, etc. Oxford 1921; see Carl Linnaeus, *Species Plantarum*. 2: 896–900. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754, *Genera Plantarum*. Ed. 5. 382. 1754, *Synopsis Florae Germanicae et Helveticae* 370. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 30. 1838 [dt 1837; publ. Jan 1838], *Denkschr. Kaiserl. Akad. Wiss., Wien. Math.-Naturwiss. Kl.* 48: 115–116. 1884 and *Ann. Hist.-Nat. Mus. Natl. Hung.* 67: 48. 1975, *Willdenowia* 35(1): 50. 2005.

Achillea alpina L. (*Achillea alpina* subsp. *multiflora* (Hook.) D.F. Murray & Elven; *Achillea mongolica* Fisch. ex Spreng.; *Achillea multiflora* Hook.; *Achillea sibirica* Ledeb.; *Achillea sibirica* subsp. *mongolica* Heimerl; *Achillea sibirica* var. *typica* Regel; *Ptarmica mongolica* (Fisch. ex Spreng.) DC.; *Ptarmica multiflora* (Hook.) Tzvelev; *Ptarmica sibirica* Ledeb.)

Alaska, North America. Perennial herb

See *Species Plantarum* 2: 899. 1753, Sprengel, Kurt Polycarp Joachim (1766–1833), *Novi proventus hortorum academiarum halensis et berlinensis*. Halae, 1819, *Flora Boreali-Americana* 1: 318. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 22. 1838 [dt 1837; publ. Jan 1838], *Flora Rossica* 2: 528. 1845, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 7: 87. 1861, *Akademie der Wissenschaften in Wien, Mathematisch-Naturwissenschaftliche Klasse, Denkschriften* 48(2): 188. 1884 and *J. Korean Res. SSSR* 70(1): 126–128. 1985, *Flora Arctica URSS* 10: 107. 1987, *Acta Soc. Bot. Poloniae* 58: 163–177. 1989, *Journal of the Botanical Research Institute of Texas* 2(1): 442. 2008

(To stop nosebleed, flower clusters rubbed in the hands and inserted into nose. Chewed roots made into a paste applied to gum sores.)

in English: Siberian yarrow

Achillea biebersteinii Afan.

Turkey, Saudi Arabia. Perennial herb

See *Botanicheskie Materialy Gerbariia Glavnogo Botanicheskogo Sada S.S.S.R.* 19: 361. 1959

(Leaves decoction to treat itching; fresh leaves chewed to relieve toothache.)

in Arabic: thafra'a

Achillea borealis Bong.

North America. Aromatic white flowers

See *Mémoires de l'Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 149. 1832 and *American Midland Naturalist* 11(6–7): 268. 1929, *American Midland Naturalist* 58(1): 58. 1957

(Flower clusters rubbed in the hands and inserted into nose to stop nosebleed.)

Achillea millefolium L. (*Achillea alpicola* (Rydberg) Rydberg; *Achillea alpicola* Rydb.; *Achillea alpicola* Dalla Torre; *Achillea arenicola* A. (Used in Unani and Sidha. Plants suspected of being a photosensitizer; occupational asthma, dermatitis, skin irritation after contact with plant and exposure to sunlight. Fresh herb chewed for toothache. Whole plant antiseptic, anthelmintic, insecticidal, antibacterial, antimicrobial, antifungal, antiinflammatory, emmenagogue, antispermatogenic, contraceptive, spasmolytic, hepatoprotective, antiperiodic, estrogenic, abortifacient, antiulcer, antioxidant, cytotoxic, used against skin diseases and infections, intestinal worms, hysteria, epilepsy. Leaves used to treat earaches, diarrhea and

hemorrhages; powdered leaves given against stomach complaints; infusion used to bathe swellings; leaves for wounds, cuts, bad bruises, to stop bleeding and act as a disinfectant; leaves and stems for spasmodic pains, an infusion taken for colds; leaves as insect repellent.)

in English: bloodwort, carpenter's weed, common yarrow, fragrant yarrow, milfoil, nosebleed, sanguinary, sneezeweed, thousand-leaf, thousand-seal, western yarrow, yarrow

in Central America: alhucema, cola de ardilla, hierba del soldado, milen rama, milhojas, plumajillo

in North America: achillée, achillée millefeuille, carpenter's weed, common yarrow, herbe-à-dinde, milfoil, nosebleed, plumajillo, sanguinary, thousand-leaf, woodchuck tail, woundwort, yarrow

in Brazil: mil-folhas

in South Africa: duisend-blaar-achillea

in China: yang shi cao, shi

in India: accilliya, akarkhara, baranjasif, bhut kesi, biranjasaf, biranjasif, brinjasaf, brinjasif, brinjasuf, buiranjasif, chopandiga, chuang, gandana, gandrain, momadnu, puthkanda, rojmaari, rojmari, roamari, saigum pharanji, saijum pharangi, tukhm gandana

in Japan: nokogiri-sô-zoku

in Pakistan: brinjask

***Achillea santolina* L.**

Europe, Iran.

See *Species Plantarum* 2: 896–897. 1753 and *Ukrajins'kyj Botaničnyj Žurnal* 38(2): 53–57. 1981, *Iranian Journal of Botany* 4: 189–196. 1989, *Regnum Veg.* 127: 14. 1993

(Antiinflammatory, antidiuretic, antimicrobial, antihemorrhagic, healing and analgesic, cytotoxic, antiproliferative, antioxidative potential, hypoglycemic.)

in India: malai marukoluntu

***Achillea vermicularis* Trin.**

Europe.

See *Species Plantarum* 2: 896–900. 1753 and *Acta Societatis Botanicorum Polonia* 58: 163–177. 1989, *Nucleus* 38(3): 104–111. 1995, *Nat. Prod. Res.* 19(6): 551–559. 2005

(Displayed inhibitory potential against lipoxygenase enzyme.)

***Achillea wilhelmsii* K. Koch**

Iran.

(Aerial parts used for stomachache; flowers and stems for cold.)

See *Linnaea* 24: 328. 1851

in Pakistan: boi madran

***Achillea wilsoniana* Heimerl** (*Achillea sibirica* Ledebour subsp. *wilsoniana* Heimerl ex Handel-Mazzetti; *Achillea wilsoniana* Heimerl ex Handel-Mazzetti; *Achillea wilsoniana* f. *obconica* Heimerl)

China.

See *Species Plantarum* 2: 896–900. 1753 and *Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftlichen Classe, Abteilung 1* 61: 22. 1924, *Symbolae Sinicae* 7(4): 1110–1111. 1936, *Acta Horti Gothoburgensis* 12(9): 254. 1938, *Journal of Chinese Medicinal Materials* [Zhong Yao Cai.] 20(4): 193–194. 1997, *Pharmazie*. 60(7): 554–558. 2005

(Entire plant used medicinally to stop bleeding and to alleviate pain, also for strengthening the stomach. Antibacterial.)

in China: yun nan shi

Achimenes Pers. Gesneriaceae

Uncertain, some suggest from the Greek, the prefix *a* 'negative, lacking, contrary to' and *cheimon* 'winter', referring to the hardness of the plants; Latin *achaemenis*, Greek *achaimenis* for an amber-colored plant in India, used in magical arts (Plinius); see *Syn. Pl.* (Persoon) 2(1): 164. 1806 and Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 35. Basel 1996.

***Achimenes grandiflora* (Schiede) DC.** (*Achimenes grandiflora* var. *incisa* Hanst.; *Achimenes incisa* (Hanst.) Klotzsch ex Oerst.; *Salutiaea grandiflora* (Schltdl.) Colla; *Trevirana grandiflora* Schltdl.)

South America, Mexico. Herb

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 637. 1809, *Linnaea* 8: 247–248. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 536. 1839, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 10: 208. 1849, *Linnaea* 27: 710. 1856

(Leaves rubbed on the gingival swelling caused by a toothache.)

in English: hot water plant

in Japan: sabi-ba-hana-giri-sô

Achlys DC. Berberidaceae (Podophyllaceae)

The goddess of obscurity, the goddess of hidden places, Greek *achlys* 'obscurity, a mist, darkness, trouble', possibly referring to the classification of the genus or to the habitat of these herbs or to the inconspicuous flowers, see *Species Plantarum* 1: 312. 1753, *Regni Vegetabilis Systema Naturale* [Candolle] 2: 35. 1821.

***Achlys triphylla* (Smith) DC.** (*Achlys triphylla* (Sm.) DC. subsp. *triphylla*; *Leontice triphylla* Smith)

North America. Perennial herb, deeply incised orbicular leaves divided into three fan-shaped leaflets, flower head a dense spike of small white flowers, dried leaves aromatic

See *The Cyclopaedia*; or, universal dictionary of arts, ... 20: 5. 1812, *Syst. Nat.* [Candolle] 2: 35. 1821 and *Phytochemistry*. 31(1): 301–303. 1992

(Leaves or plant infusion to treat tuberculosis, for a hair wash, and as an emetic. Roots infusion a wash for eye sores, cataract. Insecticide. Veterinary medicine, roots decoction of as a delousing wash for sheep. Flavonol glycosides isolated from the underground parts of the plant.)

in English: deer-foot, sweet after death, vanilla-leaf

Achnatherum P. Beauv. Poaceae (Gramineae)

Awned scale, Greek *achne* ‘chaff, glume’ and *ather* ‘stalk, barb’, referring to the lemma, see *Species Plantarum* 1: 61, 78–79. 1753, *Flora Peruviana, et Chilensis Prodrum* 2. 1794, *Flora Peruviana* 1: 5, t. 6, f. b. 1798, *Essai d'une Nouvelle Agrostographie* 19–20, 146, t. 6, f. 7. 1812, *The Genera of North American Plants* 1: 40. 1818, *Fundamenta Agrostographiae* 110. 1820, *Hortus Regius Botanicus Berolinensis* 1: 99. 1827, *Révision des Graminées* 1: 58. 1829, Antonio Bertoloni (1775–1869), *Flora Italica ...* 1: 690. Bologna 1833 [1835], *Nomenclator Botanicus. Editio secunda* 2: 702. 1841, *Synopsis Plantarum Glumacearum* 1: 419–420. 1854 and *Bulletin of the Torrey Botanical Club* 39(3): 102. 1912, *Contr. (Whole plant germicide. Root decoction mixed with black pepper given as an antidote to snakebite; root powder taken for bleeding during delivery time. Ash of the plant used for jaundice.)

in India: chirchiri, lacursc, lat jira, latjeera, latjira, latjiri, latzeera

Achyranthes aspera L. var. ***rubrofusca*** (Wight) Hook. (*Achyranthes rubrofusca* Wight)

India.

See *Species Plantarum* 1: 204–205. 1753, *Icones Plantarum Indiae Orientalis* 5(2): 3, pl. 1778. 1852, *The Flora of British India* 4(12): 730. 1885 and Takemoto T. et al., “Rubrosterone, a metabolite of insect metamorphosing substance from *Achyranthes rubrofusca*: structure and absolute configuration.” *Tetrahedron*. 25(6): 1241–8. 1969

(Juice and powder antiinflammatory, for rheumatism, muscular pains, abdominal pain, jaundice, pain in vagina, difficult labor, wounds and dog-bite, eye and ear diseases, headache, insomnia, piles, calculi.)

in India: aghamargava, apa margamu, apamaargamu, apamar, apamara, apamarang, apamarg, apamarg pan-chang, apamarga, apamargah, apamargaha, apamargamu, apamargh, apamarkkam, apamarkki, apamarutamuli, apang, apangakpushpi, apamarkkam, appamarg

Achyranthes bidentata Blume (*Achyranthes mauritiana* Moq.)

East Asia, China. Perennial herb, erect, ascending, pubescent, slender, rambling, straight cylindrical roots, inflorescence a terminal or axillary greenish spike, along streams, bushes, at forest edges

See *Species Plantarum* 1: 204–205. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 11: 545. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 313. 1849 and Cavaco, A. “Les *Achyranthes* (Amaranthaceae) du continent Africain et des îles adjacentes.” *Boletim da Sociedade Broteriana*, ser. 2 32: 301–327. 1958, *Journal of Shandong College of Traditional Chinese Medicine* 12: 55–57. 1988, *Opera Botanica* 121: 159–172. 1993, Lu T., Mao C., Zhang L., Xu W. “[The research on analgesic and antiinflammatory action of different processed products of *Achyranthes bidentata*.]” *Zhong Yao Cai*. 20(10): 507–509. 1997, Li J.X. et al. “Five new oleanolic acid glycosides from *Achyranthes bidentata* with inhibitory activity on osteoclast formation.” *Planta Med.* 71(7): 673–679. 2005, Han S.B. et al. “Prevention of arthritic inflammation using an oriental herbal combination BDX-1 isolated from *Achyranthes bidentata* and *Atractylodes japonica*.” *Arch. Pharm. Res.* 28(8): 902–908. 2005

(Used in Ayurveda. Plant infusion diuretic, astringent. Leaves for cholera and piles; paste of the leaves and turmeric applied locally on swellings to relieve pain. Roots antiinflammatory, hypocholesterolaemic, hypotensive and uterotonic, indicated for rheumatism, traumatic injury, lumbago, hypertension, sore throat, dysmenorrhea; fresh root paste taken internally for sore throat, the paste mixed with mustard oil and applied as a balm in pneumonia. Roots chewed for kidney and liver

disorders; roots juice given for indigestion. Root as such used for abortion by inserting into the vagina.)

in English: amaranth, two-toothed chaff-flower

in China: niu xi

in India: adhahjara, akle, apamarga, apawarga, bhaisikuti, cherukadaladi, kaadu uttharaani, kozhivalan chappu, nayuruvi, oga, puthkanda, putkanda, vang vat tur, vangvattur

in Nepal: ankhle jhar, datiwan, rato apamarga, ulte kuro

in Vietnam: hoai nguru tat, nguru tat

Achyranthes coynei Santapau

India.

See *Kew Bull.* 1948, 488. 1949

(Plant decoction given in easy delivery. Root and stem powder with milk taken in debility. Root powder given to kill intestinal worms.)

in India: lal ephilzara

Achyranthes fauriei H. Lév. & Vaniot

Japan.

See *Species Plantarum* 1: 204–205. 1753 and *Bulletin de la Société Botanique de France* 51: 422. 1904, *Yakushigaku Zasshi.* 27(2): 117–24. 1992, *Yakushigaku Zasshi.* 28(2): 63–72. 1993, *Planta Med.* 60(3): 286–7. 1994, *Biol. Pharm. Bull.* 29(5): 1053–5. 2006

(Antiinflammatory. Cytotoxic saponin. Sharp spines at the bases of the utricles.)

Achyranthes mollis Thonn. (*Achyranthes mollis* Lepr. ex Seub.)

Tropical Africa.

See *Species Plantarum* 1: 204–205. 1753, *Beskrivelse af Guineiske planter* 127–128. 1827, *Flora Brasiliensis* 5(1): 230. 1875

(Antiinflammatory, abortifacient, a decoction for leprosy, also given to women after menstrual period for the control of fertility.)

Achyranthes rigida (B.L. Rob. & Greenm.) Standl. (*Achyranthes rigida* Standl.; *Alternanthera rigida* B.L. Rob. & Greenm.; *Blutaparon rigidum* (B.L. Rob. & Greenm.) Mears; *Lithophila rigida* (B.L. (Antiinflammatory.)

in China: yin mao tu niu xi

Achyrocline (Less.) DC. Asteraceae

From the Greek *achyron* ‘chaff, husk’ and *kline* ‘a bed, couch’; see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Synopsis Generum Compositarum* 332. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 219. 1838 and Carlos Stellfeld (1900–1970), “As drogas vegetais da farmacopéia brasileira em face do sistema taxonômico.” *Tribuna Farmacêutica.* 8(7): 152–166. Curitiba 1940, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Gayana, Botánica* 42: 1–157. 1985, *Flora of the Venezuelan Guayana* 3: 177–393. 1997, Luteyn, J.L. “Páramos, a checklist of plant diversity, geographical distribution, and botanical literature.” *Memoirs of the New York Botanical Garden* 84: viii–xv, 1–278. 1999, *Identificación de Especies Vegetales en Chuquisaca—Teoría, Práctica y Resultados* 1–129. 2000, *Compositae Newsletter* 37: i–iii, 1–84. 2001.

Achyrocline alata (Kunth) DC. (*Achyrocline madioides* Meyen & Walp.; *Achyrocline rufescens* DC., nom. superfl., nom. illeg.; *Gnaphalium alatum* Kunth; *Gnaphalium incanum* Kunth; *Gnaphalium pellitum* Kunth; *Gnaphalium rufescens* Kunth, nom. illeg.; *Gnaphalium rufescens* Poir.; *Gnaphalium supinum* var. *fuscum* Pers.; *Pseudognaphalium pellitum* (Kunth) Anderb.)

South America.

See *Species Plantarum* 2: 850–857. 1753, *Encyclopédie Méthodique, Botanique* 2(2): 747. 1788, *Syn. Pl.* 2: 421. 1807, *Encyclopédie Méthodique, Botanique Suppl.* 2(2): 802. 1812, *Nova Genera et Species Plantarum* (folio ed.) 4: 61–63. 1820 [1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 219–221. 1837 [1838], *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* (Suppl.) 19: 275. 1843 and *American Journal of Botany* 76: 585–594. 1980, *Opera Botanica* 104: 147. 1991, *Planta Med.*

65(2): 184–6. 1999, *American Journal of Botany* 86(7): 1003–1013. 1999

(Essential oils obtained from the inflorescences.)

Achyrocline flaccida (Weinm.) DC. (*Achyrocline citrina* Griseb.)

South America. More or less prostrate, cottony, flaccid herb, yellow head, minute smooth achene

See *Flora* 1820: 610. 1820, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 220. 1837, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 187. 1879

(Whole plant in piles.)

Achyrocline satureioides (Lam.) DC. (*Achyrocline candicans* (Kunth) DC.; *Gnaphalium candicans* Kunth; *Gnaphalium satureioides* Lam.; *Gnaphalium satureioides* var. *candicans* (Kunth) Kuntze)

South America.

See *Species Plantarum* 2: 850–857. 1753, *Encyclopédie Méthodique, Botanique* 2(2): 747. 1788, *Nova Genera et Species Plantarum* (folio ed.) 4: 62. 1820 [1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 219–221. 1837 [1838], *Revisio Generum Plantarum* 3(2): 153. 1898 and *Caldasia* 14(66): 7–20. 1984, *Darwiniana* 30: 115–121. 1990, *Flora of the Venezuelan Guayana* 3: 177–393. 1997, *Planta Med.* 65(2): 184–6. 1999, *Phytother. Res.* 18(10): 819–23. 2004, *Phytother. Res.* 19(6): 486–90. 2005, *Phytomedicine*. 14(2–3): 102–8. 2007

(Potent antioxidant, photoprotection by topical application of *A. satureioides*. Antiinflammatory activity of *A. satureioides* ethanol extracts; antiherpetic activity of standardized extracts of *A. satureioides*.)

in Brazil: macela, macela-do-campo, marcela

Achyrocline tomentosa Rusby

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 219. 1838 and *Bulletin of the New York Botanical Garden* 4(14): 388. 1907, *Planta Med.* 65(2): 184–6. 1999

(Essential oils obtained from the inflorescences.)

Achyropsis (Moq.-Tand.) Hook.f. Amaranthaceae

From the Greek *achyron* ‘chaff, husk’ and *opsis* ‘resemblance, resembling’.

Achyropsis avicularis (E. Mey. ex Moq.) Hook. f. (*Achyranthes avicularis* E. Mey.)

South Africa.

See *Species Plantarum* 1: 204–205. 1753, *Genera Plantarum* 3: 36. 1880

(Used for nausea, stomach and intestinal complaints. Roots for febrile complaints)

in South Africa: isiNama (Zulu)

Achyrospermum Blume Lamiaceae (Labiatae)

Greek *achyron* ‘chaff, husk’ and *sperma* ‘seed’, referring to the scaly nutlets, see *Bijdragen tot de flora van Nederlandsch Indië* 840. 1826.

Achyrospermum aethiopicum Welw.

Tropical Africa, Angola.

See *Trans. Linn. Soc. London* 27(1): 56. 1869

(Whole plant and leaves for diabetes, stomachache, colds, cough.)

Achyrospermum radicans Gürke

Tropical Africa, Tanzania. Shrub or sub-shrub, lianescent, small flowers

See *Die Pflanzenwelt Ost-Afrikas* C: 343. 1895

(Leaves for toothache, diabetes.)

Achyrospermum schimperi (Hochst. ex Briq.) Perkins (*Achyrospermum africanum* Hook. f. ex Baker; *Achyrospermum mearnsii* Standl.; *Achyrospermum schimperi* (Briq.) Perkins; *Achyrospermum schimperi* Perkins; *Achyrospermum schimperi* auct.; *Achyrospermum schimperi* (Hochst. ex Briq.) Perkins ex Mildbr.; *Elsholtzia schimperi* Hochst. ex Briq.; *Elsholtzia schimperi* Briq.; *Elsholtzia schimperi* Hochst. ex Vatke)

Trop. Africa, Zaire. Erect, aromatic

See *Bijdragen tot de flora van Nederlandsch Indië* 840. 1826, *Linnaea* 37: 325, nomen. 1872, *Bulletin de l'Herbier Boissier* 2: 133. 1894, *Nat. Pflanzenfam.*: 325. 1894 and *Fl. Trop. Afr.* [Oliver et al.] 5(3): 465. 1900, *Wiss. Erg. Deut. Zentr.-Afr. Exped., Bot.* 2: 553. 1907–1908 (publ. 1913), *Smithsonian Misc. Collect.* 68(5): 13. 1917, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 79. 1921, *Journal of Ethnopharmacology* 108: 332–339. 2006

(Roots decoction laxative, purgative; leaves for jaundice, liver troubles. Veterinary medicine, leaves decoction for upper respiratory infections. Magic, against bad spirits.)

in Burundi: akanukayi-co-mu-bunyovu

in Kenya: cherugut, gacûgûna

Acisanthera P. Browne Melastomataceae

From the Greek *akis* ‘a point’ and *anthera* ‘anther’, referring to the jointed anthers, see *The Civil and Natural History of Jamaica* in Three Parts 217. 1756.

Acisanthera quadrata Pers. (*Acisanthera acisanthera* (L.); *Acisanthera adscendens* C. Wright; *Acisanthera quadrata* Juss.; *Acisanthera quadrata* Juss. ex Poir.; *Rhexia acisanthera* L.; *Tibouchina adscendens* (C. Wright) M. Gómez; *Uranthera dicranophora* Naudin)

Jamaica, Nicaragua. Small

See *Species Plantarum* 1: 346. 1753, *Systema Naturae*, Editio Decima 2: 998. 1759, *Histoire des plantes de la Guiane Française* 1: 445–446, pl. 177. 1775, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 111. 1810, *Annales des Sciences Naturelles; Botanique*, sér. 3 3: 189. 1845, *Annales des Sciences Naturelles; Botanique*, sér. 3 12(10): 283. 1849, *Anales de la Academia de Ciencias Medicas ...* 6: 74. 1869, *Anales de Historia Natural* 23: 67. 1894 and *Scientific Survey of Porto Rico and the Virgin Islands* 6: 2. 1925, *Fieldiana, Bot.* 24(7/4): 407–525. 1963, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1339–1419. 2001

(For skin diseases, leaves crushed and applied to infected area.)

Acmella L.C. Rich. ex Pers. Asteraceae

From the Greek *akme* ‘a point, the highest point, bloom’, referring to the taste of the foliage, see also genus *Spilanthes*, see *Fl. Venez. Guayana* 3: 177–393. 1997, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Acmella calva (DC.) R.K. Jansen (*Ceratocephalus javanicus* (Schultz-Bipontinus ex Miquel) Kuntze; *Colobogyne langbianensis* Gagnepain; *Spilanthes acmella* var. *calva* (DC.) Clarke ex Hooker f.; *Spilanthes callimorpha* A.H. Moore; *Spilanthes calva* DC.; *Spilanthes javanica* Schultz-Bipontinus ex Miquel; *Spilanthes langbianensis* (Gagnepain) Stuessy; *Spilanthes rugosa* Blume ex DC.; *Spilanthes rugosa* var. *truncata* Miq.)

India. Annual herb, erect, pubescent, florets yellow

See *Contributions to the Botany of India* 19. 1834, *The Flora of British India* 3: 307. 1881 and *Systematic Botany Monographs* 8: 41. 1985, *Compositae Newsletter* 27: 7–10. 1995, *Parasitology Res.* 102(1): 171–174. 2007

(Used in Sidha. Plant juice for peptic ulcer, applied in headache and toothache; whole plant and flower-heads rubbed into scabies. Flower-heads stimulant, used for headache, affections of the throat, tongue and gums, chewed to protect teeth from decaying; powdered flower-head applied in piles; a decoction drunk to get instant relief from stomachache. Leaf paste applied on sprains, also applied as plasters on dislocation of bones. Insecticidal, larvicidal, a system for biocontrol of malaria and filarial mosquito vectors. Leaf powder with DDT for fish poisoning; crushed plant as a fish poison.)

in Bangladesh: hamfoi

in India: aakararakabha, aangaaravalli, abhijal, akkalgara, angaravalli, baachanige balli, dodda vana mugali,

hem mugulu, hommugali, hommugali hoo, hommugali soppu, mareti, nar-mundi, nilamarandaikkodi, perunkurinca, seeranige hambu, sheerange balli, sheeranige hambu, siranige-hambu, siruattaankodi, vanamugali, vanthi balli

in Nepal: ban marethi, marathee, saprumu, syaprumu

Acmella caulirhiza Delile (*Acmella linnaei* Cass.; *Eclipta filicaulis* Schumach. & Thonn.; *Spilanthes abyssinica* Schultz-Bipontinus ex A. (Berries infusion to treat colic. Used as a diuretic, to treat liver infections, as well as an antitumor agent. Extracts of leaves to treat cancerous growths. Anticancer, diuretic, antimalarial, cytotoxic activity against a panel of human cancer cell lines. Leaf poultices for fever, migraine, mumps, neuralgia.)

in English: bastard sirio, hollow heart, wild tobacco

Common names: galán arbóreo, gallinero, marieneira, mata gallina, nigüito, siyou, tabaco de monte, tabak djab

Acokanthera G. Don f. Apocynaceae

Greek *ake*, *akis* ‘a sharp point, a spike, a cutting edge’, *akoke* ‘a point’ and *anthera* ‘anther’, the anthers are pointed, see *Kew Bulletin* 37(1): 41–67. 1982, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2): 1–483, 1–529. MIM, Deurne. 1995, Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. Kew. 2003, Calane da Silva, M., Izidine, S. & Amuse, A.B. *A Preliminary Checklist of the Vascular Plants of Mozambique*: 1–184. SABONET, Pretoria. 2004, Thulin, M. (ed.) *Flora of Somalia* 3: 1–626. Kew. 2006. Ouabain, a white poisonous glycoside extracted from the seeds of the African trees *Strophanthus gratus* and *Acokanthera ouabaio*, that is used as a heart stimulant and by some African peoples as a dart poison. The compound is also present in *A. longiflora*, *A. schimperi* and *A. venenata*. *Acokanthera schimperi*, *Euclea schimperi*, *Inula confertiflora*, *Melilotus elegans* and *Plumbago zeylanica* are some of the medicinal plants used for treatment of various skin disorders.

Acokanthera oblongifolia (Hochst.) Codd (*Acokanthera oblongifolia* Benth. & Hook. f.; *Acokanthera oblongifolia*

(Hochst.) Benth. & Hook. f. ex B.D. Jacks.; *Acokanthera spectabilis* (Sond.) Hook. f.; *Acokanthera venenata* var. *spectabilis* (Sond.) Sim; *Carissa oblongifolia* Hochst.; *Carissa spectabilis* (Sond.) Pichon; *Jasminonerieum oblongifolium* (Hochst.) Kuntze; *Toxicophlaea spectabilis* Sond.)

Tropical Africa, Mozambique to South Africa. Evergreen shrub or small tree, white fragrant flowers

See *Systema Naturae*, ed. 12 2: 135, 189. 1767, *A General History of the Dichlamydeous Plants* 4: 485. 1837, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 135. 1841, *Flora* 27(2): 827. 1844, *Linnaea* 23: 79. 1850, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 696. 1876, *Botanical Magazine* 104: t. 6359. 1878, *Revisio Generum Plantarum* 2: 414. 1891 and *The Forests and Forest Flora of the Colony of the Cape of Good Hope* 270, t. 154, f. 2. 1907, *Mémoires du Muséum National d’Histoire Naturelle*, n.s., 24: 132. 1948, *Bothalia* 7: 449. 1961, *Planta Med.* 24(3): 234–242. 1973, *Planta Med.* 25(1): 17–21. 1974, *Genetica* 68: 3–35. 1985

(Plants known or suspected of causing urticaria or skin irritation; fruit highly toxic, especially when unripe, but the ripe fruits have also caused fatalities in children. An ointment made from the fine scrapings of the root of *Acokanthera spectabilis* used by the Mpondo (also spelled Pondo, group of Nguni-speaking peoples who have for several centuries occupied the area between the Mtata and Mtamvuna rivers in Eastern province of South Africa) for the relief of itchy conditions, the application is said to be violently irritant. Contact with the plant may cause smarting of the eyes and skin, and throat irritation. Used to treat snakebites and as an emetic. Root scrapings rubbed into the skin against itch. Wood or leaf decoction drunk for internal worms, and to combat evil spirits; stem wood and leaves for tapeworm and snakebite. Stem bark and root bark used as arrow poison.)

in English: bushman’s poison bush, dune poison-bush, Hottentot’s poison, Hottentot’s poison bush, kaffir poison, poison bush, winter sweet, wintersweet

in Southern Africa: boesmansgif, duinegifboom, kaffergifboom; inHlungunyembe, uBuhlungu-benyoka, ubuHlungubenyoka, umHlagashiso (Zulu); iNtlungunyembe, inTlungunyembe, ubuHlungu (= poison), ziMlungu, iNxinebe (Xhosa)

Acokanthera oppositifolia (Lam.) Codd (*Acokanthera lamarckii* G. Don, nom. illeg.; *Acokanthera longiflora* Stapf; *Acokanthera rhodesica* Merxm.; *Acokanthera venenata* sensu Stapf non G. Don; *Acokanthera venenata* (Burm. f.) G. Don; *Acokanthera venatorium* E. Mey.; *Carissa acokanthera* Pichon, nom. illeg.; *Carissa longiflora* (Stapf) G.H.M. Lawr.; *Carissa oppositifolia* (Lam.) (Unripe fruits and seeds highly poisonous, and several cases of accidental poisoning of children have been recorded. Poisons, dangerous to stock. Stem bark and roots antiviral, cytotoxic, antimicrobial, used in the treatment of skin diseases of viral origin, an infusion for syphilis; roots infusion in the treatment of syphilis. Leaves and bark applied to treat skin disorders; dried pulverized leaves with honey taken as an antifertility medicine; leaves infusion gargled to treat tonsillitis. Bark, wood and roots are the usual ingredients for arrow poison, often in combination with the latex of *Excoecaria madagascariensis* (Baill.) Müll.Arg. and the tuber of *Dioscorea quartiniana* A. Rich. Veterinary medicine, leaf decoction given to cattle for cold.)

in English: arrow poison plant, arrow poison tree, common poison bush, poison arrow tree

in East Africa: argassi, gelwan, keliot, kelyo, khargesi, kibai, mchungu, msungu, murichu, mururu, ol morijoi, ol-morigye

in Kenya: ilmorijoi, k'arraaru, karraru, kelion, keliot, kelyon, kelyot, kibai, kivai, marid, muricu, mururu, olmorijoi

in Tanzania: mchungu, mshunguti, msongu, msungu, msunguti, olmorijoi

Vernacular names: argassi, ghedulajowaba, maktat, menbtchen, mepti, mptah, murichu, mururu, ouabai, wabai

Acomastylis Greene Rosaceae

Perhaps from the Greek *a* 'not' and *kome* 'hair, hair of the head' and *stylos* 'style', see *Leaflets of Botanical Observation*

and *Criticism* 1(12): 174. 1906, *Illustrierte Flora von Mitteleuropa*, ed. 3 4(2a): 625. 1995.

Acomastylis elata (Wall. ex G. Don) F. Bolle (*Acomastylis elata* var. *leiocarpa* (W.E. Evans) F. Bolle; *Geum elatum* Wall. ex G. Don; *Geum elatum* var. *leiocarpum* W.E. Evans; *Sieversia elata* (Wall. ex G. Don) Royle)

China, India. Suberect, rhizomatous, herbs, flowering stems with few leaves and 1–6 flowers, hairy achenes, see also *Geum elatum*

See *A General History of the Dichlamydeous Plants* 2: 526. 1832, *Fl. Brit. India* 2(5): 343. 1878 and *Notes from the Royal Botanic Garden, Edinburgh* 14(67): 29. 1923, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 72: 83. 1933, *Illustrations of the Botany ... of the Himalayan Mountains* ... 207. 1935

(Roots and shoots tonic, astringent, for dysentery, diarrhea and sore throat. Leaves decoction for dysentery and diarrhea.)

in China: yu ye hua

in India: gwali

Aconitum L. Ranunculaceae

Akoniton, the ancient Greek name used by Theophrastus for a very poisonous plant, Greek *koneion*, *konion* ‘hemlock’, *keno*, *kaino*, *kone* ‘to kill, killing, massacre’, Latin *aconitum* ‘a poisonous plant, wolf’s bane, monk’s-hood, aconite’; see *Species Plantarum* 1: 532. 1753, Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Monographia generis Aconiti iconibus omnium specierum coloratis illustrata Latina et Germanice elaborata*. Lipsiæ: Frid. Christ. Guil. Vogelii, 1820, *Annales de la Société Linnéenne de Lyon*, sér. 2, 16: 326. 1868, Pietro Bubani, *Flora Virgiliana*. 14–15. Bologna 1870 and *Bulletin de la Société Botanique de France* 51: 507–508. 1904, Kadota, Yuichi (1949–), *A revision of Aconitum subgenus Aconitum (Ranunculaceae) of East Asia*. 1987, *Taxon* 41: 555. 1992, *Taxon* 44: 611–612. 1995, *Taxon* 47: 747–748. 1998, *Taxon* 49: 274–275. 2000, Luo, Yan, *Taxonomic revision of Aconitum L. (Ranunculaceae) from Sichuan, with a study on the phylogeny of this genus based on molecular evidence*. Beijing: The Chinese Academy of Sciences, 2003. The genus *Aconitum* is phylogenetically most closely related to *Delphinium* Linnaeus. The aconites have been of interest since ancient times because they contain diterpene alkaloids that range from relatively nontoxic to deadly poisonous. In various parts of the world they have been used medicinally and as a source of poisons throughout history.

Aconitum atrox (Brühl) Mukerjee (*Aconitum atrox* Walp.; *Aconitum atrox* Goris)

India.

See *Repertorium Botanices Systematicae*. 1: 57. 1842 and *Bulletin des Sciences Pharmacologiques* 3: 122. 1901, *Bulletin of the Botanical Survey of India* 3: 101. 1962

(Foliage and flowers cause food poisoning to cattle. Tuberous roots antipyretic, diaphoretic, diuretic; roots fried in *ghee* and rubbed to the skin for the treatment of rheumatism. Magic, whole plants, roots included, used to remove evil influence in cattle.)

in India: bhangwa, bikh, bis, mitha bish, mittha

Aconitum balfourii Stapf (*Aconitum atrox* (Bruhl) Mukerjee; *Aconitum atrox* Goris; *Aconitum atrox* Walp.; *Aconitum ferox* var. *atrox* Bruhl; *Caltha codua* Buch.-Ham.)

India, Himalaya. Tuberous perennial herbs, flowers in racemes, blue sepal, follicles

See *Bull. Bot. Surv. India* iii. 101. 1962

(Used in Ayurveda. A fatal monkshood, intake of roots is fatal. Whole plant highly toxic, tuber very poisonous. Roots analgesic, antiinflammatory, antirheumatic, vermifuge. Paste of tuber to cure snakebite. Veterinary medicine, paste of tuber for curing wounds of domestic animals.)

in India: banwa, bikh, bis, bismora, do, gobari, gobriya, meetha bish, metha, vatsanabha, visha

in Nepal: gobaree

Aconitum bisma Rap. (*Aconitum bisma* (Buch.-Ham.) Rap.)

India, Himalaya. Tuberous perennial herbs

See *Curr. Sci.* 48: 25–27. 1979

(Whole plant decoction in rheumatism and arthritis. Tuber and roots very bitter, extract given in diarrhea and for vomiting and bowel complaints. Paste of roots and tubers used to poison arrows.)

in India: bih, bokmai, seto bikhooma, vichnag

Aconitum brachypodum Diels

China.

See *Notes Roy. Bot. Gard. Edinburgh*. 5: 268. 1912, *China Pl. Red Data Book* 1: 518–519. 1992

(Root caudex poisonous, used as an antipyretic.)

in China: duan bing wu tou

Aconitum chasmanthum Stapf (*Aconitum angusticassidatum* Steinb.; *Aconitum chasmanthum* Stapf ex Holmes)

Pakistan, Western Himalayas. Herb, tuberous roots, flowers in racemes, blue sepals, follicles

See *Annals of the Royal Botanic Garden. Calcutta*. 10: 142, pl. 96. 1905, *Fl. URSS* vii. 231, 734. 1937

(Used in Ayurveda. Whole plant highly toxic, very poisonous; intake of roots is fatal. Dried root analgesic, antidiabetic, anodyne, diaphoretic, diuretic, irritant and sedative, antirheumatic, useful in heart diseases and fever; dried pulverized roots mixed with butter and applied as ointment on abscess and boils. Root paste given with honey in fever.)

in China: zhan hua wu tou

in India: amrta, dudhia mauhra, kauri patish, mauhari, mehri, mohra, mohri, mohru, mori, moura, patis kauri, sthavaravisa, vajranaga, vatsanabh, vatsanabha, vatsanagaka, visa

in Pakistan: beshmolo

Aconitum columbianum Nuttall (*Aconitum geranioides* Greene; *Aconitum leibergii* Greene)

North America. Perennial herb

See *Species Plantarum* 1: 532. 1753, *Flora N. Amer.* 1: 34. 1838 and *Amer. J. Bot.* 67: 263–273. 1980, *Oecologia* 47: 160–163. 1980, *Bull. Torrey Bot. Club* 109: 13–23. 1982, *Sida* 16: 13. 1994

(Highly poisonous, probably not one of the extremely toxic aconites. Used for witchcraft.)

in English: Columbian monkshood

Aconitum columbianum Nuttall subsp. ***columbianum*** (*Aconitum columbianum* subsp. *pallidum* Piper; *Aconitum columbianum* Nutt. var. *bakeri* (Greene) Harrington; *Aconitum columbianum* var. *ochroleucum* A. Nelson; *Aconitum infectum* Greene; *Aconitum mogollonicum* Greene; *Aconitum noveboracense* A. Gray; *Aconitum uncinatum* subsp. *noveboracense* (A. Gray) Hardin)

North America. Perennial herb

See *Species Plantarum* 1: 532. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 2, 5. 1909

(Poisonous. Magic, ritual, used for witchcraft.)

in English: Columbian monkshood

Aconitum deinorrhizum Stapf

Himalayas.

See *Annals of the Royal Botanic Garden. Calcutta.* 10: 158. 1905

(Used in Ayurveda. Poisonous roots. A small piece of tuberous root given with hot water for fever and cold.)

in India: atees, dudhia mauhra, gathia maurha, mauhari, mehri, mohra, mohri, mohru, mori, moura, vatsanabh, vatsanabha, vatsanagaka

in Nepal: atis

in Tibet: bon na, bon na dkar po, bon-na-dkar-po

Aconitum hookeri Stapf

Himalaya.

See *Annals of the Royal Botanic Garden. Calcutta.* 10: 147. 1905

(Fresh root juice taken for fever.)

in India: atis, bhotia-ponkar

Aconitum kashmiricum Stapf

India, Himalaya.

See *Wild Flowers of Kashmir* 3: 25. 1930

(Leaves and root extract used to cure malaria and fevers.)

Aconitum kusnezoffii Reichenbach

Asia, Korea, China. Perennial herb, erect, smooth, purplish blue inflorescence, seeds winged, in grassland, at forest edges, on slopes

See Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Monographia generis Aconiti iconibus omnium specierum coloratis illustrata Latina et Germanice elaborata.* Lipsiæ, 1820

(Root tuber very poisonous. Used for rheumatic arthralgia, contusions.)

in English: Kusnetzoff's monk's hood, Kusnezoff monk's hood

in China: caowu

Aconitum laciniatum Stapf (*Aconitum ferox* Wallich ex Ser. var. *laciniatum* Brühl)

India, Bhutan. Herb, tuberous roots, leaves reniform, dark red to blue flowers in a loose panicle, follicles

See *Numer. List* [Wallich] n. 4721 A. 1831 and *Annals of the Royal Botanic Garden. Calcutta*. 10(2): 168. 1905, *Economic Botany* 8(4): 366–376. 1954, *Nat. Prod. Rep.* 12: 361–379. 1995

(Used in Ayurveda. Roots poisonous, intake of roots is fatal. Root and leaves used as anthelmintic, in gout, wounds, leprosy, mumps, arthritis. Diterpenoid and steroidal alkaloids.)

in English: bikh root, Indian aconite, Indian aconite root, Nepal aconite, Nepal aconite root, Nepalese aconite

in India: bikh, bish, haramala, kalo bikhma, kalo bikhuma, kalobikhmo

in Nepal: kalo bikh

Aconitum laeve Royle

Pakistan.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 56. 1834

(Antiinflammatory, antioxidant.)

in India: anakkuruntotti, bariyara, gulsakari, kadumentya, mairmanikkam, nagabala, teranellabenda

Aconitum lethale Griff.

Nepal.

See *Not. Pl. Asiat.* 4: 732. 1854

(Tubers used as poison on tips of arrows for hunting.)

Aconitum lycoctonum L.

China.

See *Species Plantarum* 1: 532. 1753

(The root inhibits growth of *Ustilago*, *Staphylococcus* and *Streptococcus*.)

in English: badger's bane, wolfsbane

Aconitum maximum Pallas ex DC. subsp. *maximum*

Russia.

See *Syst. Nat.* 1: 380. 1817 and *Brittonia* 16: 80–94. 1964, *Sida* 16: 9–15. 1994

(Extremely poisonous, used as a source of arrow poison.)

in English: Kamchatka aconite

Aconitum moschatum Stapf

India.

See *Annals of the Royal Botanic Garden. Calcutta*. 10: 139. 1905

(Antidiabetic.)

in India: karivi-valli

Aconitum nagarum Stapf

India.

See *Annals of the Royal Botanic Garden. Calcutta*. 10(2): 176–177, pl. 113. 1905

(Paste of rootstock applied to poison arrows.)

in China: bao shan wu tou

in India: mohital

Aconitum napellus L. (*Aconitum napellus* Pall.; *Aconitum napellus* Thunb.; *Aconitum napellus* S.G. Gmel.; *Delphinium napellus* (L.) Baill.)

Europe.

See *Species Plantarum* 1: 532. 1753, *Fl. Jap.* (Thunberg) 231. 1784 and Fiddes, F.S. "Poisoning by aconitine. Report of two cases." *Br. Med. J.* 2: 779–780. 1958

(Used in Ayurveda, Unani and Sidha. Whole plant highly toxic, contains poisonous alkaloids, toxic in humans when accidentally ingested, root contains more poison than the leaves; applied externally to unbroken skin in the treatment of rheumatism, painful bruises, neuralgia. Roots analgesic, anodyne, antirheumatic, diaphoretic, diuretic, febrifuge, irritant, sedative, antidote to poisoning; used in the treatment of fevers, inflammation, bronchitis, neuralgia.)

in English: aconite, bear's-foot, friar's-cap, garden monk's-hood, garden wolf-bane, helmet-flower, Indian aconite, monk's hood, monkshood, soldier's-cap, Turk's-cap, wolf's bane

in Brazil: capacete-de-júpiter, capuchon, capuz-de-frade, carro-de-vênus, madriette, mata-lobos

in India: amrta, athivasa, atis nepali, bachnaag, bachnag, bachnanak, barmalees, bas, beesh, bheesh, cimainapi, circataceti, kat-bish, meetha, mithabish, mithavis, mithazahar, naabhi, nabhi, napi, shingadio-vachnag, telyabish, vachhanag, vachnaag, vachnaag krishna, vachnaag shveth, vachnag, vasanaabhi, vasanabhi, vasanavi, vasanumbhi, vashanavi, vatsanaba, vatsanabha, vatsanabhi, vatsnabhi, visa, visha, vistsanabhah

in Tibet: bi sa, btsan dug, dzim-pa, dzin-pa dkar-po, nag po, ra-dug

Aconitum naviculare (Brühl) Stapf (*Aconitum ferox* Wall. ex Ser. var. *naviculare* Brühl)

India, Nepal.

See *Annals of the Royal Botanic Garden. Calcutta*. 5(2): 111, pl. 3, f. 2. 1896 and *Annals of the Royal Botanic Garden. Calcutta*. 10(2): 154–156, pl. 101. 1905

(Whole plant antibacterial, for fevers and jaundice.)

in China: chuan kui wu tou

in Nepal: ponkar

Aconitum novoluridum Munz (*Aconitum luridum* Hook. f. & Thomson)

India, Himalayas.

See *Species Plantarum* 1: 532. 1753, *Flora Indica*: being a systematic account of the plants . . . 55. 1855 and *Gentes Herbarum*; occasional papers on the kind of plants 6: 472. 1945

(Root poisonous.)

in China: zhan hui wu tou

in India: harenuka, kaunti, renuka

in Tibet: ha re nu ka, kau-nti-dza-la

Aconitum orochryseum Stapf

Bhutan.

See *Bulletin of Miscellaneous Information Kew* 1922: 149. 1922

(Aerial parts antidote, astringent, for snakebite, food poisoning, dysentery, jaundice.)

Aconitum palmatum D. Don

China.

See *Prodromus Florae Nepalensis* 196. 1825

(Used in Ayurveda.)

in India: ativisa, bikh, bikhma, ghanduk, prativisa

Aconitum reclinatum A. Gray

North America. White flowers

See *Amer. J. Sci. Arts.* 42: 34. 1842

(Poisonous.)

in English: monkshood, trailing white monkshood, trailing wolfsbane

Aconitum rotundifolium Kar. & Kir. (*Aconitum napellus* var. *rotundifolium* (Kar. & Kir.) Hook. f. & Thomson)

India. Erect or ascending herbs, hypogeous base, paired tuberous roots

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 138–139. 1842, *The Flora of British India* 1: 29. 1855 and *Flora URSS* 7: 229. 1937

(Whole plant used as antiinflammatory, sedative and anti-rheumatic.)

in China: yuan yie wu tou

in India: mithazahar

Aconitum spicatum Stapf (*Aconitum ferox* var. *spicata* Bruhl)

China, Himalayas. Robust herb, tuberous roots, flowers in racemes or panicles, blue sepals, follicles

See *Annals of the Royal Botanic Garden. Calcutta.* 10(2): 165–168, t. 106, 107. 1905

(Poisonous roots, cytotoxic. Paste useful in neuralgia, muscular, rheumatism, nasal catarrh, tonsillitis and coryza. Tubers used to poison arrows.)

in English: Nepal aconite

in China: ya dong wu tou

in India: bikh, bikhma, bikhuma, bish

Aconitum uncinatum Linnaeus (*Aconitum uncinatum* subsp. *muticum* (DC.) Hardin; *Aconitum uncinatum* var. *acutidens* Fernald; *Aconitum uncinatum* var. *alpinum* Memm.; *Aconitum uncinatum* var. *linnaeanum* DC.; *Aconitum uncinatum* var. *michauxianum* DC.; *Aconitum uncinatum* var. *muticum* DC.)

Japan.

See *Sp. Pl.*, ed. 2. 1: 750. 1762, *Regni Vegetabilis Systema Naturale* 1: 379. 1817[1818] and *Journal of the Elisha Mitchell Scientific Society* 30: 134. 1915, *Rhodora* 44(526): 398–399, pl. 720, f. 2–4. 1942

(*Aconitum uncinatum* is probably not one of the extremely toxic aconites.)

in English: southern monk's-hood, wild monk's-hood, wild monkshood

Aconitum violaceum Jacquem. ex Stapf

Himalayas, India. Herb

See *Annals of the Royal Botanic Garden. Calcutta.* 10(2): 144. 1905

(Whole plant highly toxic, root might not be toxic. Antidote, tonic, antiinflammatory, febrifuge, used in the treatment of snake and scorpion bites, toothache, infections and intestines troubles; root powder given against gout, arthritis, disorder of heart, leprosy, paralysis; dried roots boiled in water and used in small doses to cure cough and stomachache of children. Tubers decoction given in high fever, cold, cough. Roots used as a substitute for *Aconitum heterophyllum*.)

in India: bokar, bona-nagpo, dud atees, dudhia-bis, mita patish, mitha patish, mitha telia, mori, oonyalkas, patis, telia kachnag, tilla

Aconogonon (Meisn.) Rchb. Polygonaceae

See *Species Plantarum* 1: 359–365. 1753, *Monographiae Generis Polygoni Prodromus* 43, 55. 1826, *Handbuch des Natürlichen Pflanzensystems* 236. 1837 and *Preslia* 46 (2): 151. 1974, *Novosti Sist. Vyssh. Rast.* 24: 77. 1987, *Novosti Sist. Vyssh. Rast.* 29: 60–64. 1993.

(Fresh plants and roots tonic, stimulant, febrifuge, astringent, used in fever, diarrhea, dysentery, bleeding piles, fodder for milking animals, fed to pashmina goats.)

in China: cha zhi shen xue ning

in India: itimeng, serpalulu

Acorus L. Acoraceae (Araceae)

Greek *akoron* and *akoros* (possibly from *kore* ‘pupil’ but also ‘*Hypericum*’), an ancient name applied to *Acorus calamus* and to *Iris pseudacorus*; see Alexander Trallianus [Alessandro di Tralle], 12 (2.521.20) (ed. T. Puschmann, Wien 1878–79); Latin *acorus* and *acorum* applied by Plinius to an aromatic plant, perhaps sweet-flag or calamus. Considerable confusion

exists in the taxonomic literature over the status of *Acorus* in North America, see *Species Plantarum* 1: 324. 1753 and Wilson, K.A. “The genera of the Arales in the southeastern United States.” *J. Arnold Arbor.* 41: 47–72. 1960, Govaerts, R. & Frodin, D.G. *World Checklist and Bibliography of Araceae (and Acoraceae)*: 1–560. Kew 2002.

Acorus calamus L. (*Acorus americanus* (Raf.) Raf.; *Acorus americanus* Raf.; *Acorus asiaticus* Nakai; *Acorus calamus* auct. non L.; *Acorus calamus* var. *americanus* (Raf.) H.D. Wulff.; *Acorus calamus* var. *americanus* Raf.; *Calamus aromaticus* Garsault; *Calamus aromaticus* Gueldenst. ex Ledeb.)

India, North America. Herb, erect, long and branched aromatic creeping thick rhizomes, linear leaves radical, small flowers densely arranged, cylindrical spadix, oblong tepals, glaucous yellowish-green ellipsoid berries, seeds obconical, marshland, swamp, ponds

See *Species Plantarum* 1: 324. 1753 *Medical Flora* 1: 25. 1828, *New Flora and Botany of North America* (Rafinesque) 1: 57. 1836, *Fl. Ross.* (Ledeb.) 4(12): 13. 1852, Walter “Walt” Whitman (May 31, 1819 – March 26, 1892), *Leaves of Grass*, 3rd ed., 1860 and *Pap. Michigan Acad. (Used in Ayurveda, Unani and Sidha. Chewed roots used as hallucinogen and stimulant, also eaten as a stimulant on long journey; in excessive doses known to induce strong visual hallucinations. Rhizomes contain an aromatic oil suspected of causing dermatitis in hypersensitive individuals. Stembark chewed to relieve toothache; bark decoction as a gargle for toothache. Powdered roots or the fresh rhizomes vermifuge, anthelmintic; dried root powder given with honey for

epilepsy; rootstock paste antiseptic to wounds; root juice in case of itching; root extract taken for diabetes and stomach-ache. Rhizomes antibacterial, febrifuge, pungent, aromatic bitter, neuroprotective, mild hallucinogen, carminative, anti-malarial, antidiabetic, antifungal, emetic, tonic, stomachic, analgesic, antispasmodic, antiasthma, antidysenteric, insecticide, larvicidal, adulticidal (against adult of *Aedes aegypti*), used for gastrointestinal disorders, colic pain and diarrhea, sore throat, toothache, fever and bronchitis, cough and cold; rhizome chewed for sore throat and cough; paste of fresh rhizome applied to abdomen to treat cholera and smallpox; rhizome eaten for gastrointestinal disorders, diarrhea and dysentery; rhizome infusion drunk for snakebite; powdered mixture of rhizomes of *Helminthostachys zeylanica* and *Acorus calamus* taken to treat impotency. Household insect repellent; planted for keeping away snakes. Ceremonial, ritual, worship, amulet, cultivated near houses to protect from evil spirits, to keep away night spirits, to chase away ghosts; garland made from the rhizomes put around the neck to check cold and cough. Veterinary medicine, leaf paste applied externally on wounds of animals to kill the worms; administered to dogs to make them fierce watchdogs.)

in English: calamus, cinnamon sedge, flag root, gladdon, kalmoes, kalmus, myrtle flag, myrtle grass, myrtle sedge, rat root, sweet calamus, sweet calomel, sweet cane, sweet flag, sweet grass, sweet myrtle, sweet root, sweet rush, sweet sedge

(Rhizomes and roots contain a resinous substance, pipitzahoic acid, a substance which crystallizes in beautiful golden-yellow needles.)

in Mexico: raiz del Pipitzahuac

Acourtia nana (A. Gray) Reveal & R.M. King (*Perezia nana* A. Gray)

Mexico. Herb, slender creeping or ascending rootstock woolly, slender wiry stem, simple or sparsely branched from the base, slightly flexuous, rough, rigid coriaceous leaves, large capitula terminal subsessile 20–30 flowered with a campanulate involucre of mucronate cuspidate ciliated scales, root of a slightly bitter and astringent taste

See *Amenidades Naturales de las Españas* 1(1): 31, 33. 1811, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 111. 1849 and *Phytologia* 27(4): 230. 1973

(A plant decoction used to cure asthma or a persistent cough. Rhizomes and roots contain a resinous substance, pipitzahoic acid.)

in English: desert holly, dwarf desert peony

in Mexico: hierba de la tarántula, raiz del Pipitzahuac

Acourtia wrightii (A. Gray) Reveal & R.M. King (*Perezia wrightii* A. Gray)

USA, Texas.

See *Amenidades Naturales de las Españas* 1(1): 31. 1811, *Smithsonian Contributions to Knowledge* 3(5): 127–128. 1852 and *Phytologia* 27(4): 232. 1973

(Roots boiled and the liquid drunk to cure syphilis. Herb decoction drunk as an emmenagogue. Rhizomes and roots contain a resinous substance, pipitzahoic acid.)

Acridocarpus Guillemin & Perrottet Malpighiaceae

Greek *akris*, *akridos* 'locust, grasshopper' and *karpos* 'fruit', referring to the winged seeds, see *Florae Senegambiae Tentamen* 1: 123, t. 29. 1831.

Acridocarpus alternifolius (Schumach. & Thonn.) Nied. (*Acridocarpus corymbosus* Hook.f.; *Malpighia alternifolia* Schumach. & Thonn.)

West Tropical Africa. Shrub, glabrous, scrambling, woody, liana, reddish exudate, leaves coriaceous, yellow petals, reddish glandular calyx, winged red fruits

See *Beskrivelse af Guineiske planter* 222–223. 1827, *Florae Senegambiae Tentamen* 123, t. 29. 1831 and *Arbeiten aus dem Botanischen Institut des Königl. Lyceums Hosianum in Braunsberg* 6: 53. 1915, *Evolution* 56(12): 2395–2405. 2002

(Roots for stomachache.)

Acridocarpus excelsus A. Juss.

Madagascar. Small tree, shrub, leathery leaves, inflorescence a terminal raceme, flowers bright yellow on red pedicels

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 13: 271. 1840

(Bark astringent, a decoction used against diarrhea and dysentery.)

in Madagascar: fotsy avadika, mavoravina, mavoravo, matalazo

Acridocarpus longifolius (G. Don) Hook. f. (*Acridocarpus brevipedunculatus* Engl.; *Acridocarpus cavanillesii* A. Juss.; *Acridocarpus goossensii* De Wild.; *Acridocarpus ledermannii* Engl.; *Acridocarpus rudis* De Wildeman & T. Durand; *Acridocarpus smeathmannii* (DC.) Guill. & Perr.; *Acridocarpus smeathmannii* var. *b* Oliv.; *Acridocarpus smeathmannii* var. *dusenii* Engl.; *Anomalopteris longifolia* G. Don; *Anomalopteris spicata* G. Don; *Heteropterys smeathmannii* DC.)

Liberia, Nigeria. A small tree or lianescent shrub, woody, scandent, flowers bright yellow, winged reddish fruits

See *Nova Genera et Species Plantarum* (quarto ed.) 5: 163. 1821[1822], *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 592. 1824, *Florae Senegambiae Tentamen* 1: 124. 1831, *A General History of the Dichlamydeous Plants* 1: 647. 1831, *Niger Flora* 244. 1849

(Roots for venereal diseases, laxative, for stomach troubles. Leaf sap for eye treatment, febrifuge; leaf sap and roots for cutaneous and subcutaneous parasitic infection.)

in Cameroon: ndangi

in Ghana: alasaayo

in Nigeria: elerujo, eruju, gborígborí

in Senegal: fu kéréfu, fu kir, fu litèn, fu tabéfu

in Sierra Leone: golonge

Acridocarpus plagiopterus Guill. & Perr.

West Tropical Africa, Senegal. A woody scandent shrub, liana, leaves coriaceous, flowers yellow orange or red, fruit reddish

See *Florae Senegambiae Tentamen* 1: 123, t. 29. 1831

(Roots febrifuge, vermifuge, reptiles repellent, for sleeping sickness. Superstitions, magic.)

in Senegal: bu bögel, daxundol, diakundol, héruy éyol, hu luk, ka ñama, kañama, karab é sotébu, karab esotébu, koro

Acridocarpus spectabilis (Niedenzu) Doorn-Hoekm. (*Rhinopterys angustifolia* Sprague; *Rhinopterys kerstingii* (Engl.) Niedenzu; *Rhinopterys spectabilis* Niedenzu)

West Tropical Africa, Senegal. An undershrub, perennial rootstock, bitter root

See *Acta Bot. Neerl.* 24 (1): 74. 1975

(Roots diuretic, for cutaneous and subcutaneous parasitic infection, kidneys and naso-pharyngeal affections. Ceremonial, religion, superstitions, magic.)

in Gambia: krufano

in Senegal: â-bata, a-mbatia, bu diing, budlêg, kuru, orovasulo

Acriopsis Blume Orchidaceae

Greek *akris* 'locust, grasshopper' and *opsis* 'resembling, like', the auriculate column resembles a locust, see *Bijdragen tot de flora van Nederlandsch Indië* 8: 376. 1825.

Acriopsis liliifolia (J. König) Seidenf. var. *liliifolia* (*Acriopsis annamica* Finet; *Acriopsis floribunda* Ames; *Acriopsis griffithii* Rehb.f.; *Acriopsis harae* Tuyama; *Acriopsis insulari-silvatica* Fukuy.; *Acriopsis javanica* Reinw. ex Blume, nom. nud.; *Acriopsis javanica* var. *floribunda* (Ames) Minderh. & de Vogel; *Acriopsis nelsoniana* F.M. Bailey; *Acriopsis papuana* Kraenzl. ex K. Schum. & Lauterb., nom. nud.; *Acriopsis philippinensis* Ames; *Acriopsis picta* Lindl.; *Acriopsis sumatrana* Schltr.; *Spathoglottis trivalvis* Lindl.)

Papua New Guinea, India. Epiphyte, leaves fleshy, tepals whitish with dull purple stripe

See *Bijdragen tot de flora van Nederlandsch Indië* 8: 376–377. 1825 and *Trans. Nat. Hist. Soc. Taiwan* 28: 3. 1938, *J. Jap. Bot.* 39: 129. 1964, *Orchid Monogr.* 1: 13. 1986, *Opera Bot.* 124: 58. 1995

(Whole plant infusion administered for fever.)

Malayan names: anggrek darat, angrek darat, sakat bawang, sakat rawang, sakat ubat kapialu, sakat ubat kepialu

Acrocephalus Benth. Lamiaceae (Labiatae)

Greek *akros* 'the summit, terminal, highest' and *kephale* 'head', the flowers are at the top of the branches, see *Edwards's Botanical Register* 15: pl. 1282. 1829 and *Biologisch Jaarboek* 27: 222, 224. 1959.

Acrocephalus hispidus (L.) Nicolson & Sivad. (*Acrocephalus capitatus* (Roth) Benth.; *Acrocephalus indicus* (Burm. f.) Kuntze; *Gomphrena hispida* L.; *Ocimum capitatum* Roth; *Platostoma hispidum* (L.) A.J. Paton; *Prunella indica* Burm. f.)

Pakistan, India. See also *Platostoma*

See *Sp. Pl.*, ed. 2. 1: 326. 1762, *Flora Indica ... nec non Prodrum Florae Capensis* 130. 1768, *Edwards's Botanical Register* 15: pl. 1282. 1829, *Revisio Generum Plantarum* 2: 511. 1891 and *Taxon* 29(2–3): 324. 1980, *Kew Bulletin* 52(2): 273. 1997

(Leaves aromatic, stimulant, used for cold and high fever. Decoction of roots of *Acrocephalus indicus* along with *Andrographis nallamalayana* given orally for leucorrhoea.)

in English: Indian acrocephalus

in China: jian tou hua

in India: imramolitong, silhak, usturak, utkund

in Nepal: lerui jhangi

Acrocomia Martius Arecaceae (Palmae)

Greek *akros* 'the summit, terminal, highest' and *kome* 'hair, hair of the head', leaves at the top of the stem; see *Palmarum familia* 22. 1824, *Historia Naturalis Palmarum* 2(3): 66–68. 1824, Rodrigues, Joao Barbosa (1842–1909), *Palmae Hasslerianae novae*, ou relação das palmeiras encontradas no Paraguai pelo Dr. Emilio Hassler de 1898–1899 ...1. Rio de Janeiro, 1900 and Claudio Urbano B. Pinheiro and Michael J. Balick, "Brazilian Palms. Notes on their uses and vernacular names, compiled and translated from Pio Corrêa's "Dicionário das Plantas Úteis do Brasil e das Exóticas Cultivadas," with updated nomenclature and added illustrations." in *Contributions from the New York Botanical Garden*. Volume 17. 1987.

Zamora (eds.) *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 201–293. 2003, Oliveira-Filho, A.T. *Catálogo das Árvores nativas de Minas Gerais*. Editora UFLA, Lavas, Brasil. 2006, *J. Agric. Food Chem.* 55(8): 3186–90. 2007

(Heavily armed with long black spines. Acrid intoxicating drink from the milky sap. Roots decoction and tea used for regulating fertility.)

in English: groo-groo, gru-gru, grugru palm, macaw palm, suppa palm, wine palm

in Bolivia: totaí

in Brazil: bacaiúva, bacaiuveira, chiclete-de-baiano, coco de catarro, coco-baboso, coco baboso, coco de espinhos, cocoyol, cocoyul, coquito baboso, coyol, guacoyul, macacaúba, macahuba, macaiá, macaíba, macaibeira, macaiuveira, macajuba, macaúba, macoiá, mocajuba, mucaíá, mucajá, mucajaseiro, mucajuba, tuk

in British Antilles: gru-gru

in Colombia: corozo grande, tamaco

in Costa Rica: coyol

in Cuba: corajo

in Dominican Republic: catey, corozo criollo

in Panama: coyol, palma de vino

in Paraguay: mbokaja

in Venezuela: corozo, macuja

Acronema Falc. ex Edgew. Apiaceae (Umbelliferae)

From the Greek *akros* ‘the summit’ and *nema* ‘filament, thread’, see *Proceedings of the Linnean Society of London* 1: 252. 1845, *Transactions of the Linnean Society of London* 20(1): 51. 1846. This is a taxonomically complex genus.

Acronema nervosum H. Wolff

Nepal, China. Slender solitary stem, unbranched, root tuberous, petals white yellowish-white or purple, primary umbel solitary and terminal

See *Transactions of the Linnean Society of London* 20: 51. 1846 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 315–316. 1930, *Acta Phytotaxonomica Sinica* 18(2): 194–204. 1980

(For skin diseases, antiseptic.)

in China: yu zhou si ban qin

Acronychia Forst. & Forst.f. Rutaceae

Named from the Greek *akros* ‘the summit, terminal, highest’ and *onyx*, *onychos* ‘a claw, nail’, referring to the points of the petals, to the incurved apex of the petals, see *Characteres Generum Plantarum* 53, pl. 27. 1775.

Acronychia pedunculata (L.) Miq. (*Acronychia apiculata* Miq.; *Acronychia arborea* Blume; *Acronychia barberi* Gamble; *Acronychia elliptica* Merr. & L.M. Perry; *Acronychia laurifolia* Blume; *Clausena simplicifolia* Dalzell; *Cyminosma pedunculata* (L.) DC.; *Gela lanceolata* Lour.; *Jambolifera arborea* Kuntze; *Jambolifera arborea* Zoll. & Moritz; *Jambolifera arborea* (Blume) Zoll. & Moritz; *Jambolifera pedunculata* L.; *Jambolifera resinosa* Lour.; *Jambolifera rezinosa* Lour.; *Laxmannia ankenda* Raeusch.; *Melicope conferta* Blanco; *Selas lanceolatum* (Lour.) Spreng.; *Ximenia lanceolata* DC.; *Ximenia lanceolata* (Lour.) DC.)

India, Sri Lanka. Shrub or subcanopy tree, opposite leaves with few oil dots and a faint odor, flowers yellow to white, in primary and secondary rainforest

See *Species Plantarum* 1: 349. 1753, *Characteres Generum Plantarum* 53, pl. 27. 1775, *Flora Cochinchinensis* 1: 231–232. 1790, *Nomencl. Bot.* [Raeusch.] ed. 3, 99. 1797, *Catalogus Gew. Buitenzorg* (Blume) 27: 63. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 533, 722. 1824, *Bijdr. Fl. Ned. Ind.* 5: 244–245. 1825, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 3: 532. 1861, *Revis. Gen. Pl.* 1: 102. 1891 and *Bull. Misc. Inform. Kew* 1915, 345. 1915, *J. Arnold Arbor.* xxii. 56. 1941, *Silvae Genet.* 22: 182–188. 1973

(Leaves eaten to treat hookworm, after the larvae have been detected in the stools. Roots used for rheumatism, lumbago and snakebites. Fish poison.)

in English: claw-flowered laurel

in China: shan you gan

in India: beenei, bhoothaali, bol-thimatchi, bolgrak, dieng sohphlang, kaloapkara, kumto, loajan, madhugodiyamado, mavurinji, mutta-nari, muttanari, muttanaru, orilatheep-pettimaram, perin-panel, sarmon blai, vella maram, verugu theeni, vidukanalei, vidukanali, vitukanali

in Papua New Guinea: shimalya

in Vietnam: bai bai, co dong danh, co neng, mac thao sang

Acronychia retusa A. Gray (*Melicope retusa* (A. Gray) T.G. Hartley)

Pacific. Threatened or endangered

See *United States Exploring Expedition* 338. 1854 and *Allertonia* 8: 169–170. 2001

Samoan name: togai

Acroptilon Cass. Asteraceae

Feather-tipped, from the Greek *akros* ‘the summit, terminal’ and *ptilon* ‘feather’, referring to the feathery appendages, to the pappus bristles, see *Dictionnaire des Sciences Naturelles* [Second edition] 50: 464–467. 1827.

Acroptilon repens (Linnaeus) DC. (*Acroptilon angustifolium* Cass.; *Acroptilon australe* Iljin; *Acroptilon obtusifolium* Cass.; *Acroptilon picris* (Pallas ex Willdenow) C.A. Meyer; *Acroptilon picris* (Pall.) C.A. Mey.; *Acroptilon serratum* Cass.; *Acroptilon subdentatum* Cass.; *Centaurea picris* Pallas ex Willdenow; *Centaurea picris* Pall.; *Centaurea repens* Linnaeus; *Serratula picris* (Pall.) M. Bieb.)

Iran. A serious weed pest

See *Species Plantarum* 2: 816, 909–919. 1753, *Species Plantarum*, Editio Secunda 2: 1293. 1763, *Tabl. Phys. Topogr. Taur.* 58. 1795, *Flora Taurico-Caucasica* 3: 546. 1819, *Dictionnaire des Sciences Naturelles* [Second edition] 50: 464–467. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 663. 1837 [1838] and Cordy, D.R. “*Centaurea* species and equine nigropallidal encephalomalacia.” Pages 327–336 in Keeler, R.F., Van Kampen, K.R., James, L.F., eds. *Effects of poisonous plants on livestock*. Academic Press, New York, N.Y., USA. 1978, Watson, A.K. “The biology of Canadian weeds. 43. *Acroptilon* (*Centaurea*) *repens* (L.) DC.” *Canad. J. Pl. Sci.* 60: 993–1004. 1980, *Revue de Biologie* 33(5): 552–554. 1980, Panter, K.E. “Toxicity of knapweed in horses.” *Wash. State Univ. Knapweed* 4(3): 2. 1990, *Grassland of China* [Zhongguo caoyuan] 1998(6): 50–52. 1998

(Very poisonous to horses, causing neurological symptoms. Because of its bitter taste, it is usually avoided by grazing animals, and consequently it tends to spread when more palatable plants are consumed. Aerial parts cooling, tonic, to relieve malarial fever and stomachache. Fish poison.)

in English: Russian knapweed

in Pakistan: talkha

Acrostichum L. Pteridaceae

Greek *akrostichon*, *akros* ‘terminal, at the end, tip’ and *stichos* ‘a row, line’, possibly in reference to the upper fertile pinnae or to the arrangement of the sori; see Carl Linnaeus, *Species Plantarum*. 2: 1067–1072, 1073–1077. 1753, *Genera Plantarum*. Ed. 5. 484. 1754, *Narrative of a Journey to the Shores of the Polar Sea* 767. 1823, *Filicum Species* 141. 1841, *Mémoires sur les Familles des Fougères* 2(Hist. Acrostich.): 22–23, 97–98. 1845.

Acrostichum aureum L. (*Acrostichum guineense* Gaudich.; *Acrostichum inaequale* Willd.; *Chrysodium aureum* (L.) Mett.; *Chrysodium inaequale* (Willd.) Fée; *Chrysodium vulgare* Fée; *Tectaria fernandensis* H. Christ)

West Indies. Edible

See *Species Plantarum* 2: 1067–1072. 1753, *Filices Horti Botanici Lipsiensis* 21. 1856 and *Plantae Madagascarienses ab Alberto Mocquerysio lectae*. 1(6): 549–587. 1901, *Fl. Lesser Antilles* 2: 152. 1977, *Proc. Biol. Soc. Wash.* 98(2): 366. 1985, *Ferns of Jamaica* 281. 1985

(Fronds antifungal, used in syphilitic ulcers, diarrhea, boils. Rhizome vulnerary, wound healing, anthelmintic, pounded and grated and applied as a paste to wounds and boils.)

in Brazil: avencão

in India: paku laut

in Japan: mimi-mochi-shida (= auricled fern)

Malayan names: larat, pebisi, piai lasa, piai raya, umbi peye

in Philippines: lagolo, pako-laut, paku laut

in Thailand: prong-thale

Acrostichum cuacsaro Bert.

South America.

See *Opusc. sci. Bol.* 1. 241 t. 8. 1817

(Roots antiseptic.)

Acrotome Bentham ex Endl. Lamiaceae (Labiatae)

Greek *akron*, *akros* ‘summit, extremity, high’ and *tome*, *tomos*, *temno* ‘division, section, to slice’, see *Genera Plantarum* 627. 1838.

Acrotome inflata Benth. (*Acrotome amboensis* Briq.; *Lasiocorys eenii* (Hiern) Baker; *Leucas eenii* Hiern)

Zimbabwe, Angola, Botswana. Erect annual herb, corolla white to very pale mauve, flowers in spherical clusters, calyx, whitish

See *Genera Plantarum* 627. 1838 and *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 96(3): 603–606. 2005

(For headache, swelling, edema, epilepsy.)

in English: tumbleweed

in Southern Africa: isigagisa, perdeskrikbossie, seyalemoya, tolbossie, Vanzylsepluisie

Acrotrema Jack Dilleniaceae

Greek *akron*, *akros* ‘summit, extremity, high’ and *trema* ‘perforation, hole, aperture’, referring to a hole at the tip of the anthers, see *Malayan Miscellanies* 1(5): 36. 1820.

Acrotrema arnottianum Wight

India. Herb

See *Taxon* 29: 165–166. 1980

(Whole plant oil applied over the scalp to prevent hair loss.)

in India: nilampunna

Actaea L. Ranunculaceae

Latin *actaea* for a strong-smelling plant, herb Christopher (Plinius); Greek *aktea*, *akte* ‘the elder-tree, elder’, referring to the leaves or to the fruits; see *Species Plantarum* 1: 504. 1753, *Syst. Nat.* [Candolle] 1: 382. 1817 [1818 publ. 1–15 Nov 1817], *Bot. Jahrb.* 16: 308. 1892, *Journal de Botanique* (Morot) 12: 68–69. 1898 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen* 37. Basel 1996, *Taxon* 47(3): 613, 618–620, 623. 1998.

Actaea pachypoda Elliott (*Actaea alba* auct. non (L.) Mill.)

North America. Herb, white petals, showy stamens, fleshy fruits

See *A Sketch of the Botany of South-Carolina and Georgia* 2: 15. 1821 and Fernald, M.L. “What is *Actaea alba*?” *Rhodora* 42: 260–265. 1940, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *Annals of the Carnegie Museum* 57: 255. 1988

(Stimulant, anticonvulsive, toothache and genito-urinary remedy. Infusions used as a gargle or throat aid. Decoction of root used for colds and coughs, childbirth pain, convulsions; infusion used for itch.)

in English: baneberry, doll’s-eyes, white baneberry

in North America: actée à gros pédicelles, doll’s-eyes

Actaea rubra (Aiton) Willd. (*Actaea americana* (Aiton) Pursh; *Actaea arguta* Nuttall; *Actaea arguta* Greene; *Actaea arguta* Nutt. var. *viridiflora* (Greene) Tidestr.; *Actaea arguta* Nutt. var. *viridiflora* (Greene) Tidestr. & Kittell; *Actaea brachypetala* var. *rubra* (Aiton) DC.; *Actaea eburnea* Rydberg; *Actaea neglecta* Gillman; *Actaea rubra* subsp. *arguta* (Nuttall) Hultén; *Actaea rubra* subsp. *rubra*; *Actaea rubra* var. *arguta* (Nutt.) G. Lawson; *Actaea rubra* var. *dissecta* Britton; *Actaea spicata* subsp. *rubra* (Aiton) Hultén; *Actaea spicata* var. *arguta* (Nutt.) Torr.; *Actaea spicata* var. *rubra* Aiton; *Actaea viridiflora* Greene; *Christophoriana rubra* (Aiton) Nieuwl.)

North America. Perennial herb, red berries

See *Hort. Kew.* 2: 221. 1789, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 561. 1809, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 385. 1818[1817], *A Flora of North America*: containing ... (Torr. & A. Gray) 1(1): 35. 1838 and *American Midland Naturalist* 3: 326. 1914, *Fl. Ariz. New Mex.* 25. 1941, *Acta Universitatis Lundensis*, n.s. 40: 717. 1945, *The Canadian Field-Naturalist* 71(2): 54. 1957, *Kongliga Svenska Vetenskaps Akademiens Handlingar* 13(1): 166. 1971, *Kalmia* 12: 18. 1982, *Taxon* 31: 120–126.

1982, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987

(Berries considered poisonous; decoction of roots considered poisonous if taken in large quantities. Poultice of chewed leaves applied to boils, wounds. Various preparations from the roots used to treat coughs and colds, rheumatism, arthritis, swollen joints, sores, hemorrhages, stomachaches, syphilis; root decoction taken to improve the appetite; root eaten for stomach troubles. Preparations from the entire plant as a purgative; infusions from the stems to increase milk flow. Magic, ritual, ceremonial.)

Common names: actée rouge, baneberry, yerba del peco

in English: baneberry, red baneberry, snakeberry

Actaea rubra (Aiton) Willd. subsp. *rubra* (*Actaea spicata* L. subsp. *rubra* (Aiton) Hultén)

North America. Perennial herb, red berries

See *Hort. Kew.* 2: 221. 1789, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 561. 1809, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 385. 1818[1817], *A Flora of North America: containing ...* (Torr. & A. Gray) 1(1): 35. 1838 and *American Midland Naturalist* 3: 326. 1914, *Fl. Ariz. New Mex.* 25. 1941, *Acta Universitatis Lundensis*, n.s. 40: 717. 1945, *The Canadian Field-Naturalist* 71(2): 54. 1957, *Kongliga Svenska Vetenskaps Akademiens Handlingar* 13(1): 166. 1971, *Kalmia* 12: 18. 1982, *Taxon* 31: 120–126. 1982, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987

(Berries considered poisonous; decoction of roots considered poisonous if taken in large quantities. Poultice of chewed leaves applied to boils, wounds. Roots to treat coughs and colds, rheumatism, arthritis, swollen joints, sores, hemorrhages, stomachaches, syphilis; root decoction taken to improve the appetite; root eaten for stomach troubles. Plant used as a purgative; stem infusions taken to increase milk flow. Magic, ritual, ceremonial.)

Common names: actée rouge, baneberry, yerba del peco

in English: baneberry, red baneberry, snakeberry

Actaea spicata L. (*Actaea spicata* var. *nigra* L.; *Christophoriana spicata* (L.) Moench)

Europe, British Columbia. Black creeping rootstock, flower stem arises from the roots, offensive smell

See *Species Plantarum* 1: 504. 1753, *Methodus Plantas Horti Botanici ...* [Moench] 277. 1894 and *Kongliga Svenska Vetenskaps Akademiens Handlingar* 13(1): 166. 1971, *Taxon* 29: 538–542. 1980, *Taxon* 30: 829–842. 1981, *Kalmia* 12: 18. 1982, *Hessische Floristische Briefe* 33: 46–48. 1984, *Chromosome Information Service* 39: 33–35. 1985, *Botaniceskij Žurnal SSSR* 70(10): 1346–1354. 1985, *Anales del Jardín Botánico de Madrid* 43: 417–424. 1987, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad)

76: 905–907. 1991, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Taxon* 47: 617. 1998, *Opera Botanica* 137: 1–42. 1999

(All parts of plant poisonous. Berries used for curing asthma and applied locally for skin diseases. Root antispasmodic, cytostatic, emetic, nervine and purgative, a rheumatic remedy, used in the treatment of goiter and asthma, nervous disorders and rheumatic fever, snakebite, especially of the rattlesnake. Powdered leaves and flowers are insecticide, repellent.)

in English: baneberry, black cohosh, grape wort, grapewort, herb Christopher

in China: sheng ma

in India: mamira, pholee, vishaphala

Actephila Blume Phyllanthaceae (Euphorbiaceae)

From the Greek *akte* ‘the seashore’ and *philos* ‘loving’, referring to the coastal habitat of the plants, see *Bijdragen tot de flora van Nederlandsch Indië* 112: 581. 1826, *Gen. Pl.*: 1122. 1840, *Hooker’s Journal of Botany and Kew Garden Miscellany* 3: 228. 1851, *Annals and Magazine of Natural History*, ser. 2, vol. 7: 36, 39. 1851.

Actephila excelsa (Dalzell) Müll.Arg. (*Actephila dolichantha* Croizat; *Actephila excelsa* Müll.Arg.; *Actephila excelsa* var. *genuinum* Pax & K. Hoffm., nom. inval.; *Anomospermum excelsum* Dalzell)

India, China. Shrub, young shoots hairy, flowers in axillary clusters, depressed angled capsular fruits, leaves used as vegetable, seeds eaten fried

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 3: 228. 1851, *Linnaea* 32: 78. 1863 and *Pflanzenr.*, IV, 147, XV: 192. 1922, *Journal of the Arnold Arboretum* 23(1): 30. 1942

(Emetic, stomachic.)

in China: mao xi guang hua

in India: mipri

Actinidia Lindley Actinidiaceae

Greek *aktin* ‘ray’, in allusion to the radiating styles. Kiwifruit (*Actinidia deliciosa* and *Actinidia chinensis*) is allergenic to sensitive patients, a major kiwi fruit allergen is actinidin. Because of its content of proteolytic enzyme, the kiwi fruit is a potential cause of contact dermatitis; contact urticaria to the fruit has been reported.

Actinidia arguta (Siebold & Zucc.) Planch. ex Miq. (*Trochostigma arguta* Siebold & Zucc.)

China, Japan.

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(2): 726–727. 1843, *Annales Museum Botanicum Lugduno-Batavi* 3: 15. 1867

(Sap from the stem, a viscous liquid, used as an expectorant.)

in Japan: kutchi-punkar, kutichi

Actinidia chinensis Planch.

China.

See *A Natural System of Botany*, ed. 2, 439. 1836, *London Journal of Botany* 6: 303. 1847 and Stuart, G.A. *Chinese Materia Medica. Vegetable Kingdom*. Shanghai: American Presbyterian Mission Press. 1911, *Bulletin of Botanical Research* 3(3): 1–55. 1983, *New Zealand Journal of Botany* 27: 71–81. 1989, *Guihaia* 13: 139–143. 1993, Lucas, J.S. et al. “Comparison of the allergenicity of *Actinidia deliciosa* (kiwi fruit) and *Actinidia chinensis* (gold kiwi).” *Pediatr. Allergy Immunol.* 16(8): 647–54. 2005, Taguchi, H. et al. “Specific detection of potentially allergenic kiwifruit in foods using polymerase chain reaction.” *J. Agric. Food Chem.* 55(5): 1649–55. 2007

(The fruit of this and other Chinese gooseberries known as *Yang Tao*, *Mi Hou Tao*, or Fructus Actinidiae. A preparation of the root is known as *Teng Li Gen* or Radix Actinidiae Chinensis. Veterinary medicine, a decoction of the branches and leaves used for cure of mange in dogs.)

in English: Chinese gooseberry, gold kiwi, kiwi fruit, monkey fruit, monkey peach

Actinidia deliciosa (A. Chev.) C.F. Liang & A.R. Ferguson (*Actinidia latifolia* (Gardner & Champ.) Merr. var. *deliciosa* A. Chev.)

China.

See *A Natural System of Botany*, ed. 2, 439. 1836 and *Journal of the Straits Branch of the Royal Asiatic Society* 86: 330. 1922, *Revue de Botanique Appliquée et d'Agriculture Tropicale* 20: 12. 1940, *Guihaia* 4: 181. 1984, *New Zealand Journal of Botany* 27: 71–81. 1989, *Journal of the Japanese Society for Horticultural Science* 60: 777–784. 1992, *Journal of Wuhan Botanical Research* 13(2): 97–101. 1995, *New Zealand Journal of Botany* 35: 181–186. 1997, *Journal of Wuhan Botanical Research* 17(1): 5–9. 1999, *Pediatr. Allergy Immunol.* 16(8): 647–654. 2005, *J. Agric. Food Chem.* 55(5): 1649–1655. 2007

(Allergenic to sensitive patients.)

in English: Chinese gooseberry, kiwi fruit

in China: yang-tao

Actiniopteris Link Pteridaceae (Actiniopteridaceae)

From the Greek *aktin* ‘ray’ and *pteris* ‘a fern’, fern fronds resemble a bird’s wing, see *Fl. Madagasc.* 5(3): 38–64. 1958, *Fl. Madagasc.* 5(4): 65–112. 1958, *Fl. Trop. E. Africa* 1–7. 1999.

Actiniopteris australis Link (*Acrostichum australis* Link; *Acrostichum australe* L.f.; *Actiniopteris australis* (L.f.) Link; *Belvisia australis* Mirb.; *Blechnum flabellatum* Presl)

India.

See *Species Plantarum* 2: 1077. 1753, *Histoire naturelle, générale et particulière, des plantes* 5: 473. 1802, *Hort. Berol.* 2. 56. 1833, *Tentamen Pteridographiae* 103. 1836, *Hist. Fil.* 300. 1875

(Whole plant in the treatment of tuberculosis. Fronds anti-malarial, antifertility. Young shoots paste for healing ulcers. Leaves anthelmintic, styptic. Rhizome tonic, antituberculosis.)

Actiniopteris dichotoma Mett. (*Actiniopteris dichotoma* Kuhn; *Actiniopteris dichotoma* Bedd.)

India. Small fern, rhizomatous

See *Filicum Species* 79. 1841, *Bot. Zeitung (Berlin)* 29: 504. 1871

(Used in Ayurveda and Sidha. Fresh plants ground into a paste and applied externally on temple during acute headache. Powdered plant styptic and anthelmintic, useful for the treatment of dysentery, edema, kidney troubles.)

in English: peacock’s tail

in India: barhicuda, bhui tad, chudala, hevucarav, jahareela-podha, mauilatumsikha, mayilatumsikhai, mayircikai, mayoor shikha, mayoora shikhi, mayurasikha, mayurshikha, mayursiha, mayurskha, morpamkhi, morpankhi, morshikha, naanmukhappullu, nanmukappullu, navili juttu, nemali shikha, sanjeevani

Actiniopteris radiata (Sw.) Link (*Acrostichum dichotomum* Forssk.; *Acrostichum radiatum* (Sw.) Poir.; *Actiniopteris radiata* Link; *Asplenium radiatum* Sw.; *Ripidium dichotomum* (Forssk.) Bernh.)

India. Terrestrial herb, fern, erect

See *Species Plantarum* 2: 1067–1072. 1753, *Journal für die Botanik* 1800(2): 50, 127, t. 2, f. 3. 1801, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 128. 1810, *Filicum Species* 80. 1841, *Hist. Fil.* 146. 1875

(Leaf decoction styptic, anthelmintic, taken against internal pains and fever; leaves ash taken for bronchitis; fresh green leaves paste applied on the stomach to reduce colic pain. A paste of the whole plant applied against sprains and injuries.)

in English: peacock’s tail

in India: jahareela podha, kallupannai, kalsiga, mayilkalpul, morpankhi, morpanki, sanjeevani

Actinodaphne Nees Lauraceae

Greek *aktis*, *aktin* ‘a ray, beam’ plus the genus *Daphne*.

Actinodaphne angustifolia (Blume) Nees (*Actinodaphne angustifolia* Benth.; *Actinodaphne angustifolia* Hook.f. & Thomson ex Meisn.; *Litsea angustifolia* (Nees) Hook. f.; *Litsea angustifolia* Blume)

India. Tree, flowers unisexual dioecious, female flowers in umbels on short peduncle, globose berry

See *Bijdr. Fl. Ned. Ind.* 11: 566. 1826 [24 Jan 1826], *Plantae Asiaticae Rariores* 2: 61, 68. 1831, *Plantae Asiaticae Rariores* 3: 31. 1832, *Lindl. Introd. Nat. Syst.* ed. II. 202. 1836, *Flora Hongkongensis* 293. 1861, *Prodr. (DC.)* 15(1): 218. 1864 [May 1864], *The Flora of British India* 5: 169. 1886 and *Journal of the Arnold Arboretum* 8(1): 22. 1927, *Fl. Karnataka* 2: 56. 1996

(Leaves anthelmintic and styptic, cardiovascular system stimulant; a spoonful of powder given with milk to children as nutrient.)

in English: narrow-leaved actinodaphne

in India: galavaara, gulchal, heggoddi mara, hoggodgimara, kaggodagina mara, malavirinji, mechchhim-ching, petarichawa, pichli, pisa, pisha, pishia, pissa, takara, tali, thali, tudgensu

Actinodaphne cupularis (Hemsley) Gamble (*Fiwa cupularis* (Hemsl.) Nakai; *Litsea cupularis* Hemsley)

China. Tree, thick dark green leaves, *Laoying Cha* (eagle tea) made from the dried leaves, seeds contain oils

See *Encyclopédie Méthodique, Botanique* 3(2): 574–575. 1792, *Journal of the Linnean Society, Botany* 26(176): 380–381. 1891 and *Plantae Wilsonianae* 2(1): 75. 1914, *Journal of Japanese Botany* 16(3): 130–131. 1940, *Journal of Wuhan Botanical Research* 16(3): 219–222. 1998

(Roots and leaves used for curing Hong Kong foot, burn and piles. Leaves infusion to promote digestion, lowering blood lipids, help clear the fats from the system, also a remedy for stomachache.)

in China: hong guo huang rou nan

Actinodaphne hookeri Meisn.

India, Sri Lanka. Tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 218. 1864 and *Bangladesh J. Pharmacol.* 3: 102–106. 2008

(Used in Sidha. Antidiabetic, antihyperglycemic, leaves used for diabetes and disorders of the urinary tract. Seed oil used topically in treatment of rheumatic pain, *nirgundi* (*Vitex negundo*) leaves boiled in this oil.)

in India: galavaara, haggodgi mara, hoggodgimara, jar-champa, jhar-jhampa, jharehampa, kaggodi, kamati, malavirimji, malavirimvi, malavirinji, malavirinini, malavirinnya, malavirinyi, neyalum, neyaram, nitthe, petarichawa, pichli, pisa, pisha, pissa, puvaca, puvaccha, puvacha, tali, thali, tud-ambo, tudgensu

Actinodaphne madraspatana Bedd. ex Hook.f.

India.

See *Fl. Brit. India* [J.D. Hooker] 5: 149. 1886 [Aug 1886]

(Used in Ayurveda.)

in India: irolimarom, iyela, iyola, iyoli, munali, mungali, munkali, nettee, nitte, patta-thali

Actinodaphne obovata (Nees) Blume (*Laurus obovata* Hamilton ex Nees; *Litsea hayatae* Kaneh.; *Litsea obovata* (Nees) Nees; *Tetradenia obovata* Nees; *Tetranthera obovata* Hamilton ex Wallich)

Himalaya, Thailand, Malaysia. This species is characterized by large fruit, the oily seeds may be used for extracting oil and for industry

See *Encyclopédie Méthodique, Botanique* 3(2): 574. 1792, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 59, t. 113. 1797, *A Numerical List of Dried Specimens* [Wallich] no. 2562. 1830, *Edwards's Botanical Register* 15: no. 1300. 1830, *Plantae Asiaticae Rariores* 2: 61, 64, 68. 1831, *Systema Laurinarum* 636. 1836, *Mus. Bot. Lugd. Bat.* 1: 342. 1851 and *Formosan Trees* ed. rev., 217, f. 161. 1936

(The bark is a cure for fracture. Alkaloids.)

in China: dao luan ye huang rou nan

Actinodaphne pilosa (Loureiro) Merrill (*Actinodaphne cochinchinensis* Meissner; *Laurus pilosa* Loureiro; *Machilus hainanensis* Merrill; *Machilus pilosa* (Lour.) Nees; *Tetranthera pilosa* (Lour.) Spreng.)

Vietnam. Small tree or shrub, evergreen, brown flowers, fruit globose

See *Fl. Cochinch.* 1: 253–254. 1790, *Systema Vegetabilium, editio decima sexta* 2: 267. 1825, *Systema Laurinarum* 176. 1836 and *Transactions of the American Philosophical Society NS* 24(2): 156. 1935

(The bark and leaves used for rheumatism, relieving swelling, dispelling stasis, relieving cough, treating tuberculosis and strokes.)

in China: mao huang rou nan

Actinodaphne sesquipedalis Hook.f. & Thoms. ex Hook.f. (*Actinodaphne sesquipedalis* Hook.f. & Thomson ex Meisn.)

Malaysia, India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(1): 216. 1864, *Fl. Brit. India* [J.D. Hooker] 5: 151. 1886 [Aug 1886]

(Alkaloids.)

in Malaysia: medang paying, pedalis

Actinorhytis H.A. Wendland & Drude Arecaceae (Palmae)

From the Greek *aktinos* ‘ray, beam’ and *rhytis* ‘a wrinkle, fold’, referring to the ruminations of the endosperm, see *Linnaea* 39: 184. 1875.

Actinorhytis calapparia (Blume) H. Wendl. & Drude ex Scheff. (*Actinorhytis calapparia* H. Wendl. & Drude; *Actinorhytis calapparia* Vidal; *Actinorhytis poamau* Becc.; *Areca calapparia* Blume; *Areca cocoides* Griff.; *Pinanga calapparia* H. Wendl.; *Pinanga calapparia* (Blume) H. Wendl., nom. illeg.; *Ptychosperma calapparia* (Blume) Miq.; *Ptychosperma calapparia* Miq.; *Seaforthia calapparia* Mart.; *Seaforthia calapparia* (Blume) Mart.)

Papuaasia, New Guinea and the Solomon Islands. Slender feather palm, oval red fruits

See *Rumphia* 2: t. 100. 1843, *Calcutta J. Nat. Hist.* 4: 454. 1845, *Linnaea* 39: 184. 1875, *Ann. Jard. Bot. Buitenzorg* 1: 156. 1876, *Palmiers* [Kerchove] 253. 1878, *Syn. Atlas* 42, t. 94, f. B. 1883 and *Webbia* 4: 274. 1914, *Leaflets of Philippine Botany* 8: 3010. 1919

(Used as a betel nut substitute. Magical powers.)

in English: calappa palm

Malayan names: pinang hantu, pinang penawar, pinang sendawar

in Philippines: tangalo

Actinoscirpus (Ohwi) R.W. Haines & Lye Cyperaceae

Greek *aktinos* ‘ray’ plus the genus *Scirpus* L., see *Bot. Not.* 124: 481. 1971.

Actinoscirpus grossus (L.f.) Goetgh. & D.A. Simpson (*Hymenochaeta grossa* (L.f.) Nees; *Hymenochaeta grossa* Nees; *Schoenoplectus grossus* (L.f.) Palla; *Schoenoplectus grossus* Palla; *Scirpus aemulans* Steud.; *Scirpus grossus* L.f.; *Scirpus maximus* Roxb.)

Trop. & Subtrop. Asia to N. Australia. Stoloniferous perennial, erect, tufted, trigonous, roots fibrous, inflorescence a large terminal corymb, spikelets solitary, perianth bristles slightly longer than fruit, apiculate nut widely obovoid, troublesome weed, soil improver, found in swampy or flooded localities, pools, ditches and rice fields

See *Species Plantarum* 1: 47–52. 1753, *Supplementum Plantarum* 104. 1782 [1781 publ. Apr 1782], *Genera Plantarum* 26. 1789, *Hort. Bengal.* 81. 1814, *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall., 1: 237. 1820, *Fl. Ind.*, ed. Carey, i. 231. 1832, *Edinburgh New Philosophical Journal* 17(34): 264. 1834, *Synopsis Plantarum Glumacearum* 2(8–9): 87. 1855, *Verhandlungen der Kaiserlich-Königlichen Zoologisch-Botanischen Gesellschaft in Wien Sitzungsber.*

38: 49. 1888 and *Allegmeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 17: Beibl. 3. 1911, *Botaniska Notiser* 124: 481. 1971, *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 107–108. 1978, *Fl. of Ceylon* 5: fig. 6. 1985, *Kew Bulletin* 46(1): 169–178. 1991, *Edinburgh J. Bot.* 51: 173–174. 1994, *Fl. Iran.* 173: 15. 1998, *Kew Bull.* 56: 258. 2001, *J. Jap. Bot.* 81: 98–102. 2006

(Roots used both internally as well as externally in treatment of ulcers and wounds. Tubers highly nutritious, astringent, diuretic, cooling, laxative, tonic. Veterinary medicine for wounds, sap extracted from leaves and stem mixed with *rasun* (*Allium sativum*) and applied topically to the cattle.)

in English: coarse bullrush, giant bulrush, greater club rush

in India: bara kesuria, chesur, kaseruca, kesur, kesurta

in Sri Lanka: thun iria

Actinostemma Griffith Cucurbitaceae

Greek *aktis*, *aktinos* ‘a ray’ and *stemma* ‘crown, wreath, garland’, referring to the structure of the branches.

Actinostemma tenerum Griffith (*Actinostemma japonicum* Miquel; *Actinostemma lobatum* (Maximowicz) Maximowicz ex Franchet & Savatier; *Actinostemma palmatum* (Makino) Makino; *Actinostemma parvifolium* Cogniaux; *Actinostemma racemosum* Maximowicz ex Cogniaux; *Actinostemma tenerum* Naudin; *Mitrosicyos lobatum* Maximowicz; *Mitrosicyos racemosus* Maximowicz; *Pomasterion japonicum* Miquel)

India, China. Scandent herb, male inflorescence racemose or paniculate, female flowers solitary or fasciculate, fruit ovate or oblong-elliptic

See *J. Asiat. Soc. Bengal* 23(7): 643 (–644). 1854 [post Sep 1854], *Ann. Sci. Nat., Bot. sér.* 5, 5: 39. 1866 and *Economic Botany* 46(4): 349–367. 1992, *Zhongguo Zhong Yao Za Zhi. (China Journal of Chinese Materia Medica.)* 21(6): 332–335, 382. 1996, *Journal of Ethnopharmacology* 116(3): 431–438. 2008

(All parts diuretic; leaves to treat snakebite; seeds-oil for snakebite. Antithrombotic, anticoagulatory, utilized for the prevention or treatment of cardiovascular diseases.)

in China: he zi cao

Adansonia L. Bombacaceae

After the French botanist and philosopher Michel Adanson, 1727–1806, explorer, traveller in West Africa, the first botanist to study the flora of Senegal and Gambia, author of *Histoire naturelle du Sénégal*. Coquillages. Avec la relation abrégée d’un voyage fait en ce pays, pendant les années 1749, 50, 51, 52 & 53. Paris 1757 and *Familles des plantes*. Paris 1763 [–1764]; see Carl Linnaeus, *Species Plantarum* 2: 1190. 1753,

Genera Plantarum Ed. 5. 352. 1754, *Systema Naturae*, Editio Decima 2: 1144. 1759, *Malvaceae, Buttneriaceae, Tiliaceae* 5. 1822, Joseph Vallot (1854–1925), “Études sur la flore du Sénégal.” *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882, *Revisio Generum Plantarum* 1: 66. 1891 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 1907–1908: 136. 1908, *Fl. Madagasc.* 130: 1–21. 1955, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 16. 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 1. 1971, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell’Orto Botanico di Palermo*. 22. 1988, *Ann. Missouri Bot. Gard.* 82: 440–470. 1995, Blaise Du Puy, “The Baobabs of Madagascar.” *Curtis’s Botanical Magazine*. 13(2): 86–95. May 1996.

Adansonia digitata L. (*Adansonia bahobab* L.; *Adansonia baobab* Gaertn.; *Adansonia integrifolia* Raf.; *Adansonia scutula* Steud.; *Adansonia situla* (Lour.) Spreng.; *Adansonia situla* Spreng.; *Adansonia somalensis* Chiov.; *Adansonia sphaerocarpa* A. Chev.; *Adansonia sulcata* A. Chev.; *Baobabus digitata* (L.) Kuntze; *Ophelus sitularius* Lour.)

East Africa, Kenya, Tanzania. Tree, deciduous, thornless, trunk short, smooth bark grey and fibrous, leaves digitate, solitary flowers unpleasantly scented, large oblong or subclavate indehiscent hard-woody-shelled capsule, in coastal and inland bush, in dry savanna, woodland

See *Species Plantarum* 2: 1190. 1753, *Systema Naturae*, Editio Decima 2: 1144. 1759, *Species Plantarum*, Editio Secunda 2: 960. 1763, *Flora Cochinchinensis* 412. 1790, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 124. 1826, *Sylva Telluriana* 149. 1838, *Nomenclator Botanicus*. in Papua New Guinea: divai na kalagar, kerenga

in Philippines: saga, saga hutan

Adenia Forsskål Passifloraceae

Aden is the Arabic vernacular name for *Adenia venenata* Forssk., the type species of *Adenia*, collected in Yemen, Al Hadiyah [Hadîfe], March 1763; see Pehr (Peter) Forsskål (1732–1763), *Flora aegyptiaco-arabica*. 77. Copenhagen 1775 and Carl Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, *Adansonia*, n.s. 10(1): 111–126. 1970, Wilde, W. J. J. O. d. "A monograph of the genus *Adenia* Forsk. (Passifloraceae)." *Meded. Landbouwhogeschool* 71(18): 1–281. 1971, *Phytochemistry* 28(1): 127–132. 1989, Frank Nigel Hepper and Ib Friis, *The plants of Pehr Forsskal's 'Flora Aegyptiaco-Arabica'* collected on the Royal Danish Expedition to Egypt and the Yemen 1761–1763. Royal Botanic Gardens, Kew [in association with the Botanical Museum, Copenhagen] 1994, *Systematic Botany* 31(4): 805–821. 2006, *Brittonia* 59(4): 308–327. 2007.

Adenia aculeata (Oliv. ex Hook. f.) Engl. (*Modecca aculeata* Oliv. ex Hook. f.)

Ethiopia, Somalia and northeastern Kenya. Liana, prickly, flowers yellowish-green

See *Icones Plantarum* 14: 11, t. 1317. 1880, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 375. 1891

(Fresh root boiled in water, the decoction filtered and drunk to treat gastritis.)

Adenia acuminata King (*Adenia acuminata* Koord.)

India.

See *Exkursionsflora von Java* ... 2: 637. 1912

(Said to be irritant. Leaves and roots applied in headache, roots in ringworm.)

in English: scarlet adenia

Adenia bequaertii Robyns & Lawalrée

Gabon. Large liana creeping on ground, flowers pale green, corolla slightly glaucous

See *Bulletin du Jardin Botanique de l'État* 18: 284. 1947

(Leaves antalgic, for headache; leaf sap or a leaf decoction drunk to treat headache; leaf decoction and maceration drunk or used as a bath to treat insanity and possession. Veterinary medicine.)

in Burundi: umuvugo

Adenia cissampeloides (Planch. ex Hook.) Harms (*Adenia adenifera* Engl.; *Adenia cissampeloides* Harms; *Adenia cissampeloides* (Planch. ex Benth.) Harms; *Adenia gracilis* Harms; *Adenia gracilis* subsp. *pinnata* W.J. de Wilde; *Adenia guineensis* W.J. de Wilde; *Adenia gummifera* (Harv.) Harms; *Adenia gummifera* (Harv.) Harms var. *cerifera* W.J. de Wilde; *Adenia gummifera* var. *gummifera*; *Adenia lobulata* Engl.; *Adenia reticulata* (De Wild. & T. Durand) Engl.; *Adenia reticulata* (De Wild. & T. Durand) Engl. var. *cinerea* W.J. de Wilde; *Modecca cissampeloides* Planch.; *Modecca cissampeloides* Planch. ex Hook.; *Modecca gummifera* Harv.; *Ophiocaulon cissampeloides* Mast.; *Ophiocaulon cissampeloides* (Planch. ex Hook.) Mast.; *Ophiocaulon cissampeloides* Hook.f.; *Ophiocaulon gracile* (Harms) Pellegr.; *Ophiocaulon gummifer* Mast.; *Ophiocaulon reticulatum* De Wild. & T. Durand)

Tropical Africa. Vine, woody, herbaceous, climber, prostrate, rambling, scrambling, robust liana, thick at base, tendrils turning yellow with age, leaves papery, flowers pale green, infructescence axillary, moist bushland, in secondary vegetation, in forest clearing, primary forest, secondary jungle formations, seasonally flooded gallery forests, at savanna edge

See *Flora Aegyptiaco-Arabica* 77. 1775, *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Sylva Telluriana* 129. 1838, *Niger Flora* [W.J. Hooker] 365. 1849, *Gen. Pl.* [Bentham & Hooker f.] 1(3): 814. 1867, *Flora of Tropical Africa* [Oliver et al.] 2: 518. 1871, *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1 6A: 255. 1897 and *Journal of Ethnopharmacology* 76(3): 263–268. 2001

(Poisonous to both humans and animals. Anti-hypertensive, febrifuge, laxative, abortifacient, lactation stimulant, larvicidal, emetic, astringent, pain killer, cytotoxic; stem used for diarrhea and dysentery, twigs for rheumatism. A decoction of the leaves or root taken to treat fever and malaria, and as a diuretic. Infusion or decoction of the root, stem or leaves for the treatment of gastro-intestinal complaints, stomachache, diarrhea and dysentery, headache, edema and rheumatism. Crushed plant as fish poison. Cyanogenic glycosides.)

in English: gourd string, monkey rope, snake climber, wild granadilla

in Central African Republic: ikululu

in Congo: njombo

in Gabon: tsotsokodi

in Ghana: ekyem

in Guinea: lá pô, malápè

in Sierra Leone: bobokaya, makoinyi, ndondo-eha, pwala-bindo

in Tanzania: mandali, mkengeti

in Yoruba: aro eke, dodo, edo, ikurere eluku, itakun aro keke

Adenia digitata (Harv.) Engl. (*Adenia digitata* Burt Davy, nom. illeg., non *Adenia digitata* (Harv.) Engl.; *Modecca digitata* Harv.)

South Africa. Herbaceous, climber, trailing, scrambling, creeper, ribbed stem, tendrils, large fleshy underground tuber, grey-green leaves deeply 3–5 lobed, two prominent glands at the leaf base, flowers greenish-cream, inflorescences axillary few-flowered often ending in a curled tendril, hanging fleshy inflated red fruit, may be confused with the ripe fruit of *Trochomeria macrocarpa*

See *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Thesaurus Capensis* 1: 8. 1859, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 375. 1891 and *Annals of the Transvaal Museum* 3: 121. 1912, Watt, J.M. & Breyer-Brandwijk, M.G. *Medicinal and Poisonous Plants of Southern and Eastern Africa*, edn 2. Livingstone, Edinburgh & London. 1962, *Biochem. J.* 174: 491–496. 1974, *J. Biol. Chem.* 260(27): 14589–14595. 1985

(Deadly poisonous, roots and fruits toxic to animals and humans, contain cyanogenic glycosides. Modeccin poisoning is a serious and potentially fatal event, modeccin resembles most closely volkensin, a ricin-like toxin. Root rubbed into swellings or applied warm to treat knee swellings; rubbed on the skin with boiled roots or a root decoction to treat skin ailment, leprosy or ulcers; root decoction applied externally and also taken to treat swollen legs.)

in English: finger-leaved adenia, wild granadilla

in Southern Africa: bobbejaangif; bovokgotlhlolo (Sotho); globobaje (Ndebele); mojaja (Tswana)

Adenia dinklagei Hutch. & Dalziel

Senegal to Ghana.

See *Flora of West Tropical Africa* 1: 174. 1927

(Leaves ground with salt and water and the liquid taken to treat palpitations.)

Adenia ellenbeckii Harms

Ethiopia, Somalia, Kenya, Uganda and Tanzania. Leaves eaten as a vegetable

See *Die Vegetation der Erde* 3(2): 606, f. 270. 1921

(Fruit decoction or fruit powder to treat wounds. The juice of the fruit added to meat used to poison hyenas.)

Adenia firingalavensis (Drake ex Jum.) Harms (*Adenia firingalavensis* Harms; *Ophiocaulon firingalavense* Drake ex Jum.)

Madagascar. Deciduous succulent liana, warty waxy trunk, tendrils simple, inflorescence axillary, fruit an ovoid capsule, slow-growing

See *Sylva Telluriana* 129. 1838, *Genera Plantarum* 1: 813. 1867 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 137: 206. 1903, *Die natürlichen Pflanzenfamilien*, Zweite Auflage [Engler & Prantl] 21: 490. 1925, *Notul. Syst.* (Paris) 9: 42–64. 1940, *Cat. Pl. Madagasc.* 2(28): 7–28. 1940, *Fl. Madagasc.* 143: 1–48. 1945, *Adansonia*, n.s. 10(1): 111–126. 1970

(Plant very toxic.)

in English: bottle liana

Adenia globosa Engl.

East Africa, Kenya. Dioecious shrub or climber, more or less succulent, erect or scandent, swollen warty globular trunk, flowers greenish white, inflorescence an axillary cyme, leathery smooth green fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 382, f. 8. 1891

(Cyanogenic glycosides. Stem water extract drunk to treat abdominal pain, as a bath to treat itches, scabies, skin diseases. Veterinary medicine, tuberous stem.)

in Tanzania: mpaga

Adenia gracilis Harms

Tropical Africa. Slender herbaceous climber, liana, twiner, petals cream-fringed

See *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1 6A: 255. 1897, *Bot. Jahrb.* 26: 236. 1899

(Believed to be poisonous. Stem and leaves used as fish poison.)

Adenia gummifera (Harv.) Harms (*Adenia gummifera* Burt Davy, nom. illeg., non *Adenia gummifera* (Harv.) Harms;

Adenia rhodesica Suess.; *Modecca gummifera* Harv.; *Ophiocaulon cissampeloides* sensu Bak.; *Ophiocaulon gummifer* Mast., also *gummiferum*)

Tanzania. Large woody climber, subsucculent, scrambler, stem green with white stripes, tendrils, flowers greenish axillary on loose drooping heads, perianth green-white, anthers orange pink, fruit yellow hanging down, persistent light green calyx at the base of fruits, white pitted seeds, male and female flowers on separate plants, leaves used as vegetable, at edge of riverine forest, dry and moist forest, common in *Brachystegia* woodland, open forest, woodland

See *Flora Aegyptiaco-Arabica* 77. 1775, *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Fl. Maurit. Seyhell.*: 106. 1877, *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1 6A: 255. 1897 and *Journ. Linn. Soc., Bot.* 40: 74. 1910, *Annals of the Transvaal Museum* 3: 121. 1912, *Transactions of the Rhodesia Scientific Association* 43: 13. 1951, *Journal of Ethnopharmacology* 9: 237–260. 1983, *Journal of Ethnopharmacology* 12: 35–74. 1984

(Poisonous. Outer wood, bark, branches and leaves reported to be a fish poison; fruits poisonous. Roots used to treat hernia, dysentery, diarrhea, snakebites, malaria, leprosy; roots chewed to treat snakebite. Leaves decoction aphrodisiac. Veterinary medicine.)

in English: monkey rope, wild grenadilla

in Southern Africa: bopha, umPhindamshaya

in Tanzania: gale, ghoye, gole, iyore, kungu-mti, lukenda, mandali, mbogaboga, mgore, mkengeti, mugore, munua nyoka, oloru, zokambago

in Zambia: chimboyi

Adenia hondala (Gaertn.) de Wilde (*Adenia palmata* (Lam.) Engl.; *Granadilla hondala* Gaertn.; *Modecca palmata* Lam.)

SE Asia, Vietnam. Herbaceous vine, tuberous climber, scandent glabrous herb, large conspicuous irregularly shaped tubers, tendrils arise in leaf axils and bear flowers, stems swollen at nodes, glands below the leaves, flowers white to light blue, capsules orange-red splitting into 3 valves with leathery rind, seeds with membranous white aril, leaves petioles and tender shoots cooked and eaten

See *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *Flora Aegyptiaco-Arabica* 77. 1775, *De Fructibus et Seminibus Plantarum...* 2: 480, t. 180, f. 10. 1791 and *Blumea* 15: 265. 1968, *Ceylon Med. J.* 16: 182–186. 1971

(Used in Ayurveda. Tubers poisonous, antimicrobial, antibacterial, used for treating hernia and skin diseases. Seeds for curing poisoning. Roots used as Ayurvedic plant drug *Vidaari/Vidari*, plant parts obtained from four different species are sold under the name *Vidaari*, they are *Pueraria tuberosa*, *Cycas circinalis*, *Ipomoea mauritiana* and *Adenia hondala*.)

in India: hiremaddu, hondala, kannada, kempu chendu balli, kempu chendu hannina balli, matakku, modecca, modika, modikha, motta-modecca, muthalakkudam, muthukku, mutukku, orela-modecca, palmodecca, palmothakku, palmutukku, vidaari, vidari

Adenia keramanthus Harms

Kenya and Tanzania. Succulent, flowers green-cream

See *Die Natürlichen Pflanzenfamilien* 6A: 84. 1893

(Stem extract taken to treat syphilis; leaves and roots chewed to treat snakebites.)

Adenia lanceolata Engl.

Southern Sudan to Malawi.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 378. 1891

(Poisonous.)

Adenia lobata (Jacq.) Engl. (*Adenia mannii* (Mast.) Engl.; *Adenia rumicifolia* Engl. & Harms; *Adenia schweinfurthii* Engl.; *Modecca lobata* Jacq.)

Tropical Africa. Vine, liane, creeping, climber, stem soft with tendrils, branches and branchlets warty, leaves slightly succulent, inflorescence an axillary cyme, thick waxy pale green yellowish flowers, winged pendent hard fruit pale green glaucous, seeds in whitish transparent pulp, flowers with slight fetid to repulsive odor, cooked leaves eaten as a vegetable, in roadside vegetation

See *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Fragmenta Botanica* 82, t. 131. 1800, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 375. 1891 and *Journal of Ethnopharmacology* 90(1): 91–97. 2004, *Phytothérapie* 3(6) 252–259. 2005

(Plant antiplasmodial, aphrodisiac, diuretic, purgative, anti-parasitic and antiamebic. Stem and leaves contain cyanogenic glycosides. A twig decoction drunk and used in a bath to treat malaria. A leaf decoction taken to treat cough, bronchitis and fever. Leaves and flowers for venereal diseases, fevers and coughs. Antidote, useful to drive away the snakes; the sap of the stem used as an arrow poison and to kill rats and street dogs. Stem, stem bark, fruit or sap used for fish poisoning.)

in English: snake rope

in Sierra Leone: dandeh, jumeke, ka tol, mawoni

in Tanzania: ngole

in Yoruba: ajadigi, atewogbare, atewogbare yaga, okun ikale, popo, popo elero, yaga

Adenia penangiana (Wall. ex G. Don) W.J. de Wilde (*Adenia nicobarica* King; *Disemma penangiana* (Wall. ex G. Don) Miq.; *Modecca nicobarica* Kurz; *Passiflora penangiana* Wall. ex G. Don)

India. Twiner, yellow flowers

See *Species Plantarum* 2: 955–960. 1753, *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Sertum Austro-Caledonicum* 78, pl. 79. 1824[1825], *A General History of the Dichlamydeous Plants* 3: 55. 1834, *Flora van Nederlandsch Indië* 1: 700. 1856, *Journal of Botany, British and Foreign* 13(155): 326. 1875 and *Journal of the Asiatic Society of Bengal* 71: 52. 1902, *Blumea* 15(2): 266. 1967

(Leaves for chest pain, leaves and roots applied in headache, roots in ringworm. Paste of twigs applied in body ache.)

in China: dian nan shuo lian

in India: tincham

Adenia populifolia Engl.

Malaysia.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 376. 1891

(For convulsions, burn the leaves and smoke the child.)

Malay name: lelayang

Adenia racemosa W.J. de Wilde

Tanzania. Climber, flexible, flowers greenish to yellowish, used for fodder

See *Mededelingen Landbouwhogeschool* 71(18): 64. 1971

(Tubers a remedy for chickenpox. A leaf decoction drunk to treat mental illness.)

in Tanzania: gole, nyang'oleko

Adenia rhodesica Suss. (*Adenia gummifera* (Harv.) Harms)

See *Transactions of the Rhodesia Scientific Association* 43: 13. 1951

(Veterinary medicine, leaves in cataplasm for wounds.)

Adenia schweinfurthii Engl. (*Adenia lobata* subsp. *schweinfurthii* (Engl.) Lye)

Tanzania.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 375, 377. 1891 and *Lidia* 4(3): 92. 1998

(Fish poison.)

Adenia subsessilifolia Perr.

Madagascar. Tubers bitter and inedible

See *Notulae Systematicae. Herbarium du Museum de Paris* 9: 50–51. 1940

(Pounded stems applied to wounds.)

Adenia tricostata W.J. de Wilde

Central Africa and Uganda.

See *Acta Botanica Neerlandica* 17: 133, 127, f. 1/f, 3. 1968

(An infusion of the leaves used to treat fever.)

Adenia trilobata (Roxb.) Engl. (*Modecca trilobata* Roxb.)

India.

See *Plants of the Coast of Coromandel* 3: 93 or 94. 1820, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 375. 1891

(Leaves made into a paste and applied in snakebite.)

in India: chersialap

Adenia venenata Forssk. (*Modecca abyssinica* Hochst. ex A. Rich.)

Tropical Africa. Shrub or climber, arborescent, stipules narrowly triangular, male flowers tubiform-infundibuliform, female flowers infundibuliform, pericarp coriaceous, savanna

See *Flora Aegyptiaco-Arabica* 77. 1775, *Encyclopédie Méthodique, Botanique* 4: 208. 1797, *Tentamen Florae Abyssinicae ...* 1: 297. 1847–48 and *Journal of Ethnopharmacology* 97: 421–427. 2005

(Tonic, stimulant, antimicrobial, to treat intestinal worms. Ceremonial. Veterinary medicine, leaves to treat cattle suffering from mange.)

in English: prince's tree

in Ethiopia: adenden

in Kenya: elemu, kilyambiti, laarakimak, loarakimak

in Nigeria: bambuhi, gantimi

Adenia volkensii Harms

Tropical Africa. Small shrub or herb, woody, pubescent, erect, tuberous rootstock, succulent stem, young foliage often purplish, triangular acute stipules gland-dotted, flowers bell-shaped green or yellow with red-crimson spots, depressed globose leathery fruits, fruit cooked

See *Flora Aegyptiaco-Arabica* 77. 1775, *Die Pflanzenwelt Ost-Afrikas* 281. 1895 and *Pl. E. Afr.:* 37, fig. 3. 1969, *Meded. Landb. Wag.* 71, 18: 182, fig. 28–29. 1971, *Amer. J. Veterin. Res.* 35(6): 829–830. 1974, *Bol. Soc. Brot. Sér. 2*, 50: 168, t. 5. 1976, *J. Biol. Chem.* 260(27): 14589–14595. 1985

(Poisonous, human and mammals poisoning; volkensin, a highly toxic protein from the roots. Fruit and roots to poison hyenas. Powder of the roasted rootstock to treat coughs, colds and pneumonia and with milk to treat stomachache; drink infusion of roots for swelling. Leaf decoction taken orally to treat bronchitis, coughs and fever or used as a purgative enema. Ceremonial plant, tribal use, ritual, fruit and root poisonous and used by a *lasakutoni*, a sorcerer. Veterinary medicine, rootstock to cure trypanosomiasis and venereal diseases in livestock.)

in English: Kilyambiti plant

in East Africa: berendai, kalumbu, kilembide, kilimbiti, kilyambiti, mndiati

in Kenya: kilyambiti, laarakimak, loarakimak, Iturmaei

Adenia wightiana (Wall. ex Wight & Arn.) Engl. (*Modecca wightiana* Wall. ex Wight & Arn.)

India. Climber

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 353. 1834, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 376. 1891

(Dried root powder made into a paste given to treat syphilis.)

in Tanzania: gole

in India: rogam gadda

Adenium Roemer & Schultes Apocynaceae

The Arabic vernacular names *Oddaejin*, *Öddaejn*, *Öddein* or *Aden*, the first species was collected in Yemen, at Jebel Melhan [Milhan], 1763, see *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 4: 35 & 411. 1819 and Rowley, G.D. *The Adenium and Pachypodium handbook*. Smart & Co. Ltd., Brackley, United Kingdom. 1983, *Cactus and Succulent Journal* 63: 223–225. 1991, *Cactus and Succulent Journal* 64(3): 110–111. 1992, *Cactus and Succulent Journal* 70(4): 199–200. 1998, *Molecules* 5: 51–81. 2000, *Asklepios* 83: 3. 2001, van Wyk, B.E., van Heerden, F. & van Oudtshoorn, B. *Poisonous plants of South Africa*. Briza Publications, Pretoria, South Africa. 2002, *Asklepios* 85: 4–6. 2002. *Adenium* comprises five species, which are sometimes merged into a single one, *Adenium obesum* (Forssk.) Roem. & Schult. with 6 subspecies; *Adenium* is closely related to *Pachypodium* and *Nerium*.

Adenium boehmianum Schinz (*Adenium obesum* subsp. *boehmianum* (Schinz) G.D. Rowley)

Angola and Namibia. Succulent shrub, white latex in all parts, inflorescence a dense terminal cyme, linear-oblong follicles coherent at base

See *Verh. Bot. Ver. Brand.* xxx. (1888) 259. 1888 and *Repert. Pl. Succ.* (I.O.S.) 29: 3. 1978 (publ. 1980)

(Poisonous compounds in the root and stem latex, cardiac glycosides. Extremely bitter root sap and latex boiled to prepare arrow poison.)

in English: bushman poison

Adenium honghel A. DC.

Tropical Africa.

See *Prodr.* (DC.) 8: 412. 1844

(Leaves, stem and roots for venereal diseases, tropical ulcers. Latex applied to carious tooth.)

Adenium multiflorum Klotzsch (*Adenium obesum* (Forssk.) Roem. & Schult. subsp. *multiflorum* (Klotzsch) G.D. Rowley; *Adenium obesum* var. *multiflorum* (Klotzsch) Codd)

S. Trop. & S. Africa. Succulent shrub or small tree, watery latex, brittle root, inflorescence a dense terminal cyme, oblong follicles opening by a longitudinal slit, hairy seeds, heavily browsed by livestock

See Peters, Wilhelm Karl Hartwig (1815–1883), *Naturwissenschaftliche Reise nach Mossambique*. Berlin: G. Reimer, 1864 and *Bothalia* 7: 452. 1961, *Cact. Succ. J.* (Los Angeles) 46: 160. 1974

(In some countries the watery latex is considered highly poisonous. Stem latex used to prepare arrow poison and fish poison. Veterinary medicine, an extract of root and stem latex given against diarrhea and eye diseases in domestic birds. Magic.)

in English: impala lily, Sabi star

in South Africa: impalalelie, kudu lily, Sabie star

Adenium obesum (Forssk.) Roem. & Schult. (*Adenium arabicum* Balf.f.; *Adenium arboreum* Ehrenb.; *Adenium coetaneum* Stapf; *Adenium honghel* A. DC.; *Adenium honghel* Lindl.; *Adenium micranthum* Stapf; *Adenium obesum* Roem. & Schult.; *Adenium obesum* subsp. *socotranum* (Vierh.) Lavranos; *Adenium obesum* subsp. *somalense* (Balf.f.) Rowley; *Adenium socotranum* Vierh.; *Adenium somalense* Balf.f.; *Adenium somalense* var. *caudatipetalum* Chiov.; *Adenium somalense* var. *crispum* Chiov.; *Adenium speciosum* Fenzl; *Adenium tricholepis* Chiov.; *Cameraria obesa* (Forssk.) Spreng.; *Nerium obesum* Forssk.)

W. Trop. Africa to Tanzania, Arabian Pen. A succulent shrub or a small tree, grey smooth bark, stout swollen stem, very thick-stemmed, pachycaul, semi-succulent branches, milky or clear sap, thick fleshy leaves simple narrow oblong to broadly lanceolate, inflorescence a more or less dense terminal cyme, pinkish to red funnel-shaped flowers, linear-oblong follicles tapering at both ends, dry scrub, coastal thicket, desert scrub, in dry bushland, in pure sand or well-drained soil, in rocky sites, *Acacia-Commiphora-Combretum* wooded grassland

See *Flora Aegyptiaco-Arabica* 205. 1775, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 4: 411. 1819, *Edwards's Bot. Reg.* 32: t. 54. 1846, Balfour, Isaac Bayley (1853–1922), *Botany of Socotra*. Edinburgh, 1888 [*Trans. & Proc. Roy. Soc. Edinburgh* 31: 162. 1888], *Bull. Misc. Inform. Kew* 1894: 334. 1894 and *Oesterr. Bot. Z.* 54: 286. 1904, *Repertorium Plantarum Succulentarum* 29: 3. 1978 [publ. 1980], *Planta Medica* 44: 123–124. 1982, *Genetica* 68: 3–35. 1985, Lebrun, J.-P. “Catalogue des plantes de la Mauritanie et du Sahara Occidental.” *Boissiera* 55: 1–322. 1988, *Chemical and Pharmaceutical Bulletin* 38: 669–672. 1990, *Nigerian Journal of Experimental and Applied Biology* 2(1): 39–43. 2000

(Plant regarded as poisonous, also to stock; latex dangerous to the eyes; used as ordeal poison and for criminal purposes; cardiotoxic glycosides. Plant molluscicidal, acaricidal, larvicidal, fungicidal and cytotoxic. Bark chewed as an

abortifacient; aqueous stem bark extract acaricide. A decoction from the roots to treat venereal diseases. Juice from stem and crushed leaves cytotoxic, applied to septic wounds and ulcers; stem and roots wound dressing, cardiac tonic, applied to septic wounds and ulcers; latex rubbed on the head against lice. Veterinary medicine, bark infusion used to remove tick and lice on camels and cows; powdered stems applied to kill skin parasites of camels and cattle. Root sap or sometimes the wood or stem latex used to prepare arrow poison. Arrow and fish poison from seeds and roots; chopped-up stems used as a fish poison; a decoction of the bark and leaves used as fish poison. Magic.)

in English: desert rose, elephant's foot, impala lily, poison tree, star of the Sabi, tornado thunder

in French: baobab chacal, faux baobab, lis des impalas, pied d'éléphant, rose du désert

in East Africa: egales, elemu, kilengandumba, kipera, kiper-aper, mhongorong, ojiko, ol eteti, oleteti, utupa

in Ghana: saa tesaga

in Guinea-Bissau: bulu kuruné, djindje pétè, fukala sitandi, kakalsita, kongosita, sita kolokuru, tukala sitandi

in Kenya: egeles

in Mali: bulu kuruné, fukala sitandi, hongel, kakalasita, kidi sarané, kongosita, sita kolokuru, tukala sitandi

in Mauritania: teiduma es seba

in Niger: karya, kuka meru, shagar-el-sim

in Nigeria: gariya, kariya, kawameru, kuka meru, lekki peewuri, shagar-el-sim, sim-es-samak

in Senegal: bulu kuruné, dar bogel, dara bogel, daraboghé, darabuki, darbugé, darbugol, darbuki, fukala sitadi, guy sidéri, hongel, kakalasita, kidi sarané, kongosita, kulukuruné, lisugar, nya-makoelambar, pouri, sita kolokuru, teiduma es seba, tukala sitadi

in Tanzania: madiga, mdagu, mdaguwanda, mdiga, mwadiga, wanja

in Zambia: mbwayuma, nkalambe

Adenium oleifolium Stapf (*Adenium obesum* subsp. *oleifolium* (Stapf) G.D. Rowley)

Namibia, Botswana and South Africa. Succulent small shrub, white latex in all parts, narrow leaves, inflorescence a terminal cyme, cylindrical follicles spreading or recurved when mature

See *Bull. Misc. Inform. Kew* 1907, 53. 1907

(Cardiac glycosides. Root sap to treat fever and colic, in larger doses it is purgative and toxic. From the latex, or from a decoction of the extremely bitter tuber an arrow poison is prepared. A salve from the plant is applied to snakebites and scorpion stings.)

Adenocaulon Hook. Asteraceae

Greek *aden* 'gland' and *kaulos* 'stalk, stem', perennial herb stalked-glandular above, fruits stalked-glandular, see *Botanical Miscellany* 1(1): 19–20, pl. 15. 1829.

Adenocaulon himalaicum Edgew. (*Adenocaulon adhaerescens* Maxim.; *Adenocaulon bicolor* var. *adhaerescens* (Maxim.) Makino)

China, Himalaya.

See *Botanical Miscellany* 1(1): 19–20, pl. 15. 1829, *Transactions of the Linnean Society of London* 20(1): 64. 1846, *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Petersbourg par Divers Savans et lus dans ses Assemblées* 9: 152. 1859 and *Botanical Magazine* 13: 240. 1901

(Dried leaves used locally for treatment of dermatitis caused by poison ivy; plant paste applied on wounds.)

in Japan: ognamat-kina, oynamat

in Nepal: gnalep

Adenophora Fischer Campanulaceae

Greek *aden* 'gland' and *phoros* 'bearing, carrying', *phero*, *phoreo* 'to bear', referring to the sticky nectar, see *Mémoires de la Société Impériale des Naturalistes de Moscou* 6: 165. 1823. Some confusion regarding the nomenclature.

Adenophora remotiflora (Siebold & Zucc.) Miq. (*Adenophora isabellae* Hemsl.; *Adenophora remotiflora* f. *albiflora* Y.N. Lee; *Adenophora remotiflora* f. *angustifolia* Makino; *Adenophora remotiflora* f. *cordata* Kom.; *Adenophora remotiflora* f. *leucantha* Honda; *Adenophora remotiflora* f. *longifolia* Kom.; *Adenophora remotiflora* f. *oreophila* Hiyama; *Adenophora remotifolia* Miq.; *Adenophora trachelioides* f. *puberula* A.I. Baranov; *Adenophora remotiflora* var. *angustifolia* (Makino) Honda; *Adenophora remotiflora* var. *cordatifolia* (Deb.) Zahlbr.; *Adenophora remotiflora* var. *hirsuta* Honda; *Adenophora remotiflora* var. *hirticalyx* S. Lee; *Adenophora remotiflora* var. *hirticalyx* S.T. Lee, Y.J. Chung & J.K. Lee; *Adenophora trachelioides* Maxim.; *Adenophora trachelioides* subsp. *giangsuensis* D.Y. Hong; *Adenophora trachelioides* var. *cordatifolia* Deb; *Campanula remotiflora* Siebold & Zucc.)

Japan, Russia, Korea. Perennial

See *Flora Japonica* 4(3): 180. 1846, *Annales Museum Botanicum Lugduno-Batavi* 2: 193. 1866, *J. Bot.* 14: 207. 1876 and *Fl. Mansh.* 3: 557. 1907, *Bot. Mag.* (Tokyo) 45: 138 (-139). 1931, *Bot. Mag.* (Tokyo) 57: 107. 1943, *J. Jap. Bot.* 22: 56. 1948, *Quart. J. Taiwan Mus.* 16: 155. 1963, *Korean J. Bot.* 24(1): 29. 1981, *Fl. Reipubl. Popul. Sin.* 73(2): 186. 1983, *Korean Journal of Plant Taxonomy* 20(3): 192. 1990

(Root antidote, demulcent, expectorant, used in the treatment of poisonous bites and medicinal poisoning.)

Adenophora stricta Miq. (*Adenophora argyi* H. Lév.; *Adenophora axilliflora* Borbás; *Adenophora confusa* Nannf.; *Adenophora polymorpha* var. *stricta* (Miq.) Makino; *Adenophora rotundifolia* Lév.; *Adenophora sinensis* var. *pilosa* A. DC.; *Adenophora stricta* subsp. *confusa* (Nannf.) D.Y. Hong; *Adenophora stricta* subsp. *sessilifolia* D.Y. Hong; *Adenophora stricta* var. *lancifolia* Hara.)

Asia, China. A perennial herb, simple, erect, branched in upper part, softly hairy, long robust conical roots, terminal raceme

See *Annales Museum Botanicum Lugduno-Batavi* 2: 192. 1866

(Roots used for chronic bronchitis, cough.)

in English: upright ladybell

in China: nan sha shen

Adenophora triphylla (Thunb.) A. DC. (Roots antifungal, cardiotoxic, expectorant, to treat bronchial catarrh and coughs.)

in English: fourleaf bellflower, fourleaf ladybell

in China: nan sha shen, sha shen

Adenophora verticillata Pallas ex Fisch. (*Adenophora tetraphylla* (Thunb.) Fisch.; *Adenophora triphylla* (Thunb.) A. DC.)

Russia. Corollas pale blue

See *Mémoires de la Société Impériale des Naturalistes de Moscou* 6: 167. 1823

(Roots antifungal, cardiotoxic, expectorant.)

Adenopodia C. Presl Fabaceae (Mimosaceae, Mimoseae)

From the Greek words *aden* 'gland' and *pous, podos* 'a foot', *podion* 'a little foot', see *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften* 6: 566–567. 1851 and *Kew Bull.* 41 (1): 73–90. 1986.

Adenopodia spicata (E. Mey.) C. Presl (*Entada natalensis* Benth. var. *aculeata* Harv.; *Entada spicata* (E. Mey.) Druce; *Entada spicata* (E. Mey.) J.F. Macbr., nom. illeg., non *Entada spicata* (E. Mey.) Druce; *Entadopsis spicata* (E. Mey.) Gomes Pedro; *Mimosa spicata* E. Mey.; *Pusaetha spicata* (E. Mey.) Kuntze)

South Africa. Perennial climbing shrub, large woody climber, scrambling shrub, flowers in short creamy-white spikes

See *Species Plantarum* 1: 516–523. 1753, *Familles des Plantes* 2: 318, 554. 1763, *Commentariorum de Plantis Africae Australioris* 164. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 4(30): 333. 1841, *Flora Capensis* 2: 270. 1862, *Revisio Generum Plantarum* 1: 204. 1891 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 1916: 621. 1917, *Contributions from the Gray Herbarium of Harvard University* 59: 19. 1919, *North American Flora* 23(3): 191. 1928, *Bol. Soc. Estud. Mocamb.* 25(92): 10. 1955, Duncan A.C., Jäger A.K., van Staden J. "Screening of Zulu medicinal plants for angiotensin converting enzyme (ACE) inhibitors." *J. Ethnopharmacol.*

68(1–3): 63–70. 1999, *Journal of Ethnopharmacology* 119(3): 559–574. 2008

(Roots to treat chest pain and syphilis. Anti-hypertensive properties, used for the treatment of high blood pressure. Veterinary medicine, roots and bark for colds in horses.)

in English: spiny splinter bean

in Southern Africa: doringsplinterboontjie, umBambangwe (Zulu)

Adenosma R. Br. Scrophulariaceae (Plantaginaceae)

Greek *aden* ‘gland’ and *osme* ‘a scent, perfume, fragrance’; see Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae*. 442. 1810.

Adenosma glutinosum (L.) Druce (*Adenosma caerulea* R.Br.; *Adenosma caeruleum* R. Brown; *Adenosma glutinosa* Druce; *Adenosma glutinosa* Merr.; *Adenosma glutinosum* (L.) Merr.; *Adenosma glutinosum* var. *caeruleum* (R. Brown) P.C. Tsoong; *Digitalis sinensis* Loureiro; *Gerardia glutinosa* L.; *Pterostigma grandiflorum* Benth)

China. Herb, erect, villous, flowers axillary and solitary or in dense racemes apically on stems and branches, corolla purple-red to violet

See *Sp. Pl.* 2: 611. 1753, *Prodr. Fl. Nov. Holland.* 443. 1810 and *Botanical Exchange Club and Society of the British Isles* (Report) 3: 413. 1914, *Philippine Journal of Science* 12(2): 109. 1917, *Biol. Pharm. Bull.* 25: 753–760. 2002

(Antiproliferative. Roots for colic.)

in China: mao she xiang

Malay name: timah tasek

Adenosma indianum (Loureiro) Merrill (*Adenosma capitata* Benth. ex Hance; *Adenosma capitatum* Benth. ex Hance; *Adenosma capitatum* (Benth) Benth ex Hance; *Adenosma indiana* (Lour.) Merr.; *Manulea indiana* Loureiro; *Pterostigma capitatum* Benth)

Vietnam. Herb, erect

See *Fl. Cochinch.* 2: 386. 1790, *Journal of the Linnean Society, Botany* 13: 114. 1872 [1873 publ. 1872] and *Trans. Amer. Philos. Soc.*, n.s. 24(2): 351. 1935, Tsoong Puchiu, ed. *Scrophulariaceae* (2). *Fl. Reipubl. Popularis Sin.* 68: 1–449. 1963, Tsoong Puchiu & Yang Hanbi, eds. *Scrophulariaceae* (1). *Fl. Reipubl. Popularis Sin.* 67(2): 1–431. 1979

(Used in Ayurveda. Antibacterial, cholagogic, diuretic, stomachic, febrifuge, useful for the treatment of jaundice, oliguria, viral hepatitis. Roots for colic.)

in China: qiu hua mao she xiang

in India: carim-tumba, karimtumpa, sprkka

Malay name: kuching kuching

in Vietnam: bo bo, chè cat, chè dong, chè noi

Adenosma retusilobum P.C. Tsoong & T.L. Chin

China. Herb, slender, racemes terminal, corolla pale purple

See *Fl. Reipubl. Popularis Sin.* 67(2): 396. 1979

(Diuretic.)

in China: ao lie mao she xiang

Adenostemma Forster & Forster f. Asteraceae

Greek *aden* ‘gland’ and *stemma* ‘crown, wreath, garland’, referring to the fruits or to the corolla-tubes or to the pappus bristles, see *Characteres Generum Plantarum* 45, pl. 45. 1775.

Adenostemma lavenia (L.) Kuntze (*Adenostemma brasilianum* Cass.; *Adenostemma brasilianum* (Pers.) Cass.; *Adenostemma flintii* R.M. King & H. Rob.; *Adenostemma glutinosum* (Gaud.) Endl.; *Adenostemma glutinosum* DC.; *Adenostemma lanceolatum* Miq.; *Adenostemma lavenia* var. *lavenia*; *Adenostemma viscosa* J.R. Forst. & G. Forst.; *Adenostemma viscosum* Forst. & Forst.f.; *Adenostemma viscosum* Forst.; *Lavenia glutinosa* Gaud.; *Verbesina brasiliana* Pers.; *Verbesina lavenia* L.; *Verbesina lavenia* Roxb.)

SE Asia, Pakistan and India. Herb, hispid, hairy, sticky, white flowers with pink spots, a weed of cultivation

See *Species Plantarum* 2: 902. 1753, *Characteres Generum Plantarum* 45, t. 45. 1775, *Syn. Pl.* (Persoon) 2(2): 472. 1807, *Hort. Bengal.* 62. 1814, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 25: 363. 1822, *Prodr. Fl. Nepal.* 181. 1825, *Voy. Uranie, Bot.* 471. 1830, *Prodr.* (DC.) 5: 111. 1836, *Revisio Generum Plantarum* 1: 304. 1891 and *Symb. Sin.* 7(4): 1086. 1936, *Economic Botany* 27(2): 255–256. 1973, *Phytologia* 54(1): 29–30. 1983, *Journal of Ethnopharmacology* 90(2–3): 389–395. 2004, *Ethnobotanical Leaflets* 11: 280–290. 2007

(For giddiness, plant paste consumed with milk. Leaves anti-spasmodic; leaves juice stimulant and sternutatory; crushed leaves made into a paste applied to cuts and wounds, skin diseases, headache, toothache, chest pain, to bites of poisonous insects and caterpillar; decoction of fruit pericarp of *Cocos nucifera* and leaves of *Adenostemma lavenia* gargled to treat toothache. Veterinary medicine, sap from the leaves of *Cyathula prostrata*, mixed with leaves of *Adenostemma lavenia*, applied as a drop to treat eye infections of chicken; crushed leaves applied on skin diseases.)

in English: dung weed, sticky daisy

in China: feng qi cao

in India: butame, kattusiruvanthanpatchilai, mesapu, mi-top, soh-byrthit

in Indonesia: udu tai

in Japan: numa-daikon

Malayan names: rumput babi, rumput pasir, sembong gajah

in Sarawak: bulu babi putih

in Hawaii: kamanamana

Adenostemma lavenia (L.) Kuntze var. *latifolium* (D. Don) Handel-Mazzetti (*Adenostemma latifolium* D. Don; *Adenostemma lavenia* var. *latifolia* (D. Don) C.B. Clarke ex Kuntze)

China.

See *Prodr. Fl. Nepal.* 181. 1825, *Revisio Generum Plantarum* 1: 304. 1891 and *Symb. Sin.* 7(4): 1086. 1936

(Used for skin diseases of the foot.)

in China: kuan ye bian zhong

Adenostemma lavenia (L.) Kuntze var. *lavenia* (*Adenostemma tinctorium* (Lour.) Cass.; *Adenostemma viscosum* J.R. Forst. & G. Forst.; *Anisopappus candelabrum* H. Lév.; *Myriactis candelabrum* (H. Lév.) H. Lév.; *Spilanthes tinctorius* Lour.)

India.

See *Species Plantarum* 2: 902. 1753, *Characteres Generum Plantarum* 45, t. 45. 1775, *Flora Cochinchinensis* 2: 484. 1790, *Dictionnaire des Sciences Naturelles* 25: 364. 1822, *Prodr. Fl. Nepal.* 181. 1825, *Revisio Generum Plantarum* 1: 304. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(185–187): 451. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 303. 1912, *Symb. Sin.* 7(4): 1086. 1936, *Economic Botany* 27(2): 255–256. 1973, *Phytologia* 54(1): 29–30. 1983, *Ann. Missouri Bot. Gard.* 82: 581–592. 1995, *Journal of Ethnopharmacology* 90(2–3): 389–395. 2004, *Ethnobotanical Leaflets* 11: 280–290. 2007

(For giddiness, plants paste consumed with milk. Leaves antispasmodic; leaves juice stimulant and sternutatory; crushed leaves applied to cuts and wounds, skin diseases, toothache, chest pain, to bites of poisonous insects and caterpillar. Veterinary medicine, crushed leaves applied on skin diseases.)

in India: kattusiruvanthanpatchilai

Adenostemma viscosum Forst. & Forst.f. (*Adenostemma dregei* DC.; *Adenostemma lavenia* auct.; *Adenostemma perrottetii* DC.)

Tropical Africa and Asia. Erect to semi-procumbent herb, fleshy, sometimes rooting from lower nodes, sometimes confused with *Adenostemma lavenia*

(Crushed stems and leaves applied as a poultice for headache, skin diseases, diarrhea, and as antiscorbutic; fresh juice of the plant to treat ear infections, lung congestion, pneumonia, edema and inflammation; leaves for dysuria, toothache, boils and ulcers, aphthae, sore throats, sun-burned skin, dysentery.)

in English: dung weed

in India: mayusundui

in Indonesia: legetan warak, rumput babi, udu tai

Malayan names: pulot-pulot, rumput babi, rumput pasir, rumput tahi babi, sembong gajah

in Papua New Guinea: pisirokot, tigtoni

in Philippines: boton

in Thailand: yieo muu

in Vietnam: c[us]c tr[aws]ng, c[or] m[ij]eh, c[us]c d[is]nk

Adenostoma Hook. & Arn. Rosaceae

From the Greek *aden* 'gland' and *stoma* 'mouth', referring to the glandular calyx, see *The Botany of Captain Beechey's Voyage* 139, pl. 30. 1832.

Adenostoma fasciculatum Hook. & Arn.

North America. Perennial shrub

See *The Botany of Captain Beechey's Voyage* 139, pl. 30. 1832

(Antirheumatic.)

in English: chamise, common chamise, greasewood

Adenostoma fasciculatum Hook. & Arn. var. *fasciculatum*

North America. Perennial shrub

See *The Botany of Captain Beechey's Voyage* 139, pl. 30. 1832

(Disinfectant. Veterinary medicine.)

in English: chamise, common chamise, greasewood

Adenostoma sparsifolium Torrey

North America. Perennial tree or shrub

See Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance* from Fort Leavenworth in Missouri to San Diego in California: including part of the Arkansas, Del Norte, and Gila Rivers. Washington, 1848

(Plant used for arthritis, colds, ulcers, stomach and chest ailments, stomach and intestinal pain, toothaches, colic, as emetic, laxative, analgesic, cathartic. Veterinary medicine, plant poultice applied to saddle sores on horses.)

in English: red shank

Adhatoda Miller Acanthaceae

The name of the genus from the Tamil *ada* or *adu* 'goat' and *thodai* or *toda* 'not touching, not touch', in allusion to the qualities of the bitter leaves, see *Species Plantarum* 1: 15–16. 1753, *The Gardeners Dictionary ... Abridged ...* fourth edition 1754, *Plantae Asiaticae Rariores* 3: 103.

1829–1830 and Heine, Hermann Heino (1923–1996), *Fl. Gabon, Acanthacées*. 13: 173. 1966, *Taxon* 41: 564. 1992, *Taxon* 44: 611–612. 1995.

Adhatoda beddomei C.B. Clarke (*Justicia beddomei* (Cl.) Bennet)

India.

See *Indian J. Forest.* 5(4): 326. 1982

(Used in Ayurveda. Root, leaves and flowers decoction used to treat fever, hemorrhage, sciatica, cough, asthma, skin diseases, obesity, wasting, jaundice, edema, leucorrhoea, difficult labor, vomiting, piles, retention of urine, diseases of mouth.)

in India: aadalodaka veru, aadalodakathila, aadalodakathila pacha, aadusoge, addalasa, addasara, byaalada mara, vaasa, vasa, vrsah

Adhatoda buchholzii S. Moore (*Adhatoda latibracteata* Benoist; *Adhatoda maculata* C.B. Clarke; *Duvernoia buchholzii* Lindau; *Justicia buchholzii* (Lindau) I. Darbysh.; *Justicia latibracteata* De Wild.)

Nigeria.

See *Bot. Jahrb. Syst.* xx. (1894) 42. 1894 and *Fl. Trop. Afr.* [Oliver et al.] 5(2): 223. 1900, *Bulletin du Jardin Botanique de l'État* 5: 13. 1915, *Mém. Soc. Linn. Normandie* n.s. i. A Conservation Checklist, compiled and edited by Martin Cheek, Benedict John Pollard, Iain Darbyshire, Jean-Michel Onana and Chris Wild. 226. Kew: Royal Botanic Gardens, Kew, 2004

(Fruits and whole plant antiinflammatory and fish poison.)

Adhatoda engleriana (Lindau) C.B. Clarke (*Adhatoda engleriana* C.B. Clarke; *Justicia engleriana* Lindau)

Tanzania.

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754 and *Journal of Ethnopharmacology* 97(2): 327–336. 2005

(Anticonvulsant, for the treatment of epilepsy. Leaves treat abnormal pains. Veterinary medicine, leaves infusion for swelling.)

in Tanzania: iringoringo

Adhatoda organoides Nees (*Drejerella organoides* (Nees) Lindau)

Cuba.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 407. 1847 and *Symbolae Antillarum* 2: 222. 1900

(Leaves for boils.)

Adiantum L. Pteridaceae (Adiantaceae)

Latin *adiantum* ‘the plant maiden-hair’ (Plinius), Greek *adiantos* (a ‘lacking, without’ and *diainein* ‘dry, unwetted, not capable of being wetted’, referring to the glabrous leaves, if plunged in water the fronds remain dry, the fronds shed water or raindrops and remain dry); see Carl Linnaeus, *Species Plantarum* 2: 1094–1097. 1753, *Genera Plantarum* Ed. 5. 485. 1754 and *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Phytotaxonomica Sinica* 18(1): 101. 1980.

Adiantum aethiopicum L. (*Adiantum aethiopicum* Thunb.; *Adiantum marginatum* Bory; *Adiantum marginatum* Schrad.; *Adiantum thalictroides* Willd. ex Schldt.; *Adiantum thalictroides* Schlecht.)

India.

See *Syst. Nat.*, ed. 10. 2: 1329. 1759, *Species Plantarum* 2: 1560. 1763, *Flora Japonica*, ... : 339. 1784, Schlechtendal, Diederich Franz Leonhard von (1794–1866), *Adumbratio filicum in Promontorio Bonae Spei provenientium*. Berolini, 1825–[1832] and *American Fern Journal* 60(4): 137–143. 1970

(Plant decoction expectorant, tonic, against bruises, wounds, urinary disorders. Rhizome decoction used as an abortifacient, emetic and astringent, to promote parturition. Infusion of fronds used as emollient, astringent, emetic, in cough and diseases of chest, colds, stomach disorders and asthma. Leaf smoked to cure colds.)

in English: true maidenhair fern

in India: mayur pambi

Adiantum capillus-veneris L. (Mart. & Galeot.) Ching (*Adiantum capillus* Sw.; *Adiantum capillus-veneris* (L.) Hook.; *Adiantum capillus-veneris* fo. *dissectum* (M. (Leaves infusion antispasmodic, to relieve periodic menstrual pains. Rhizome antibacterial.)

in English: delta maidenhair, delta maidenhair fern, fine maidenhair fern

in Ecuador: culantrillo del pozo

in Japan: karakusa-hôrai-shida (karakusa = an Arabian decorative design)

Adiantum reniforme L. var. *sinense* Y.X. Lin

China.

See *Acta Phytotax. Sin.* 18 (1): 102. f. 1: 1–5. 1980, *Cathaya* 1: 143–148. 1989

(Whole plants diuretic.)

in China: he ye jing quan cao

Adiantum trapeziforme L. (*Adiantum pentadactylon* Langsd. & Fisch.; *Adiantum pentadactylon* (Langsd. & Fisch.) T. Moore; *Adiantum trapesiforme* Sessé & Moc.; *Adiantum trapeziforme* G. Forst.; *Adiantum trapeziforme* Huds.; *Adiantum trapeziforme* Schkuhr; *Adiantum trapeziforme* var. *oblongatum* T. Moore; *Adiantum trapeziforme* var. *plumieri* T. Moore; *Adiantum trapiziforme* L.)

Mesoamerica.

See *Species Plantarum* 2: 1097. 1753, *Fl. angl.* 391. 1762, *Fl. Ins. Austr.* 84. 1786, *Plantes recueillies pendant le voyage des Russes autour du monde* 22, t. 25. 1810, *Index Filicum* (T. Moore) 40. 1857, *Fl. Mexic.*, ed. 2, 238. 1894

(Plant antibacterial.)

Adiantum venustum D. Don (*Adiantum venustum* Ching; *Adiantum venustum* H. Christ)

Nepal, Himalayas. Perennial herb, long creeping rhizome, reniform sori

See *Prodromus Florae Nepalensis* 17. 1825 and *Sunyatsenia* 6: 13. 1956, *Acta Phytotaxonomica Sinica* 18(1): 101. 1980, *Journal of Cytology and Genetics* 23: 38–52. 1988, *Aspects of Plant Sciences* 11: 459–465. 1989, *Indian Fern Journal* 11: 68–72. 1994, *Journal of Ethnopharmacology* 115(2): 327–329. 2008

(Whole plant anodyne, febrifuge, expectorant, diuretic, emmenagogue, astringent, aromatic, emetic, used in bronchitis, tuberculosis, ophthalmia. Fronds decoction astringent, antimicrobial, diuretic, febrifuge, emetic, emmenagogue, expectorant, resolvent, tonic, used in the treatment of headaches and scorpion stings, biliousness, inflammation, chest pain, cold. Rhizome and fronds extract drunk against diabetes and liver problems, an infusion taken for circulatory disorders. A paste from the rhizomes to treat cuts and wounds; root paste mixed with sugar effective in stomachache.)

in English: Venus hair fern

in India: chtku, dodda navilu baalada farn, geu theer, hansraj, kalbatra, kalo hansraj, mayir sikki

in Nepal: daluko

Adinandra Jack Pentaphylacaceae (Theaceae)

From the Greek *adinos* 'clustered, plentiful' and *aner, andros* 'male, stamen, man', referring to the crowded or clustered stamens, see *Malayan Misc.* 2(7): 49–50. 1822.

Adinandra borneensis Kobuski

Borneo. Treelet

See *Journal of the Arnold Arboretum* 28(1): 81–82. 1947

(Crushed leaves applied to scalds and burns.)

in Borneo: bak buang

Adonis L. Ranunculaceae

The Greek classical name for the plant; in Greek legend Adonis was a beautiful youth beloved of Persephone and Aphrodite; see Carl Linnaeus, *Species Plantarum*. 1: 547–548. 1753, *Genera Plantarum*. Ed. 5. 242. 1754, *Proc. Linn. Soc. London* 1: 17. 1839, *Histoire Naturelle des Végétaux. Phanérogames* 7: 227. 1839 and Carlos Stellfeld, “As drogas vegetais da farmacopéia brasileira em face do sistema taxonômico.” *Tribuna Farmacêutica* 7(7): 141–145. Curitiba 1939, *Taxon* 41: 555. 1992, *Taxon* 44: 611–612. 1995.

***Adonis aestivalis* L.**

China.

See *Sp. Pl.* 1: 547. 1753, *Gen. Pl.* ed. 5, 242. 1754, *Sp. Pl.* ed. 2. 1: 771. 1762 and *Acta Biologica Cracoviensia, Series Botanica* 22: 37–69. 1980, *Travaux de l'Institut Scientifique, Université Mohammed V. Série Botanique* 35: 1–168. 1988, *Plant Systematics and Evolution* 168: 181–193. 1989, *Vet. Pathol.* 41: 215–220. 2004

(Leaves and roots said to be poisonous to humans and livestock; *Adonis* toxicosis is well documented in horses. Whole plant used as cardiac stimulant and diuretic. Flowers cardiotonic, diuretic, laxative.)

in English: adonis, pheasant's-eye, summer adonis, summer pheasant's-eye

in China: xia ce jin zhan hua

Adonis amurensis Regel & Radde (*Adonis vernalis* L. var. *amurensis* (Regel & Radde) Finet & Gagnepain)

Eurasia.

See *Bull. Soc. Imp. Naturalistes Moscou* 34(2): 35. 1861

(Diuretic.)

in English: adonis, Amur adonis

in China: ce jin zhan hua, fu shou cao

in Japan: fukujuso

Adonis annua L. (*Adonis autumnalis* L.)

Europe.

See *Sp. Pl.* 1: 547. 1753

(Leaves and roots said to be poisonous to humans and livestock.)

in English: autumn adonis, bird's-eye, pheasant's eye

Adonis chrysocyathus J.D. Hooker & Thomson (*Adonis chrysocyathus* Hook.f. & Thomson ex Hook.f.)

Kashmir, Pakistan, Russia. Perennial, petals yellow, aggregate fruit globose

See *Fl. Brit. India* [J.D. Hooker] 1: 15. 1872

(Plant suspected to be poisonous to sheep and goats. Diuretic.)

in China: jin huang ce jin zhan hua

in India: kaadu choorna gadde, kaadu handi gadde

Adonis vernalis L. (*Adonis vernalis* Asso; *Chrysocyathus vernalis* (L.) J. Holub)

Europe.

See *Sp. Pl.* 1: 547. 1753, *Syn. Stirp. Aragon.* 70. 1779 and *Preslia* 70(2): 103. 1998

(Leaves and roots said to be poisonous to humans and livestock.)

in English: ox-eye, spring adonis

in Brazil: adônis, grande-olho-de-boi, olhos-de-diablo

Aechmea Ruiz & Pavón Bromeliaceae

From the Greek *aichme* ‘a point’, referring to the point on the calyx or to the seeds, see *Species Plantarum* 1: 286. 1753, Adanson, Michel (1727–1806), *Familles des plantes* 2: 67, 584. Paris, 1763, *Fl. Peruv. Prodr.* 47, t. 8. 1794, *Jaarb. Kon. Ned. Maatsch. Aanm. Tuinb.* (1853) 14. 1853, *Flora* 37: 348. 1854, *Die Familie der Bromeliaceen* 21–22, 103, 257. 1856 [1857 publ. Sep–Oct 1856], *Fl. Brit. W.I.* [Grisebach] 593. 1864, *Gartenflora* 16: 193, pl. 547. 1867, *Revue Horticole* 42: 12. 1870, *Journal of Botany, British and Foreign* 17: 130–133, 181, 231. 1879, *La Belgique Horticole* 29: 352. 1879, *Genera Plantarum* 3(2): 663–664. 1883, *Handbook of the Bromeliaceae* 33–34, 49, 64. 1889, *Flora Brasiliensis* 3(3): 179, 274–275. 1891, *Fl. Foster) L.B. Sm. & W.J. Kress; *Chevaliera rubiginosa* (Mez) L.B. Sm. & W.J. Kress; *Chevaliera magdalenae* André)

South America, Mexico, Ecuador. Strongly hooked

See *Rev. Hort.* 60: 563. 1888, *Handb. Bromel.* 64–66. 1889, *Monographiae Phanerogamarum* 9: 285. 1896 and *Bulletin*

of *Miscellaneous Information Kew* 1923: 267. 1923, *Lista Pl. Salvador* 45. 1925, *The Bromeliad Society Bulletin* 16: 27. 1966, *Phytologia* 66(1): 70, 78–79. 1989

(Long arching leaves with noxious marginal hooks.)

in English: ping wing, pingwing

in Panama: pita

Aegialitis R. Br. Plumbaginaceae

Greek *aigialos* ‘seashore’ (Akkadian *agu* ‘wave’, *agu*, *agiu*, *aga’u* ‘wave, flow of water, destructive flooding’), *aiges* ‘waves’, *agnymi* ‘to break’, *hals*, *halos* ‘sea’, referring to the habitat; see Robert Brown, *Prodromus florae Novae Hollandiae*. 426. 1810, *Fundamenta Agrostographiae* 127, t. 9. 1820, *Mantissa* 2: 13, 222. 1824, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 46(2): 217. 1877.

Aegialitis rotundifolia Roxb.

India. A source of honey and tannin

See *Prodr. Fl. Nov. Holland.* i. 426. 1810, *Flora Indica* or Descriptions of Indian plants. 2(2): 111. 1824

(Tonic, stimulant, stomachic, astringent, for indigestion, diarrhea, dysentery; latex for toothache.)

in India: banarua, banuarar

Aegiceras Gaertner Myrsinaceae

Greek *aix*, *aigos* ‘a goat’ and *keras* ‘a horn’, referring to the cylindrical and incurved fruits; see Joseph Gaertner (1732–1791), *De fructibus et seminibus plantarum*. 1: 216, t. 46, fig. 1. Stuttgart, Tübingen 1788–1791 [-1792] and *Taxon* 30: 695. 1981, *Caryologia* 48(3–4): 319–328. 1995, *J. Trop. & Subtrop. Bot.* 6(1): 40–46. 1998.

Aegiceras corniculatum (L.) Blanco (*Aegiceras corniculatum* Blanco; *Aegiceras majus* Gaertn.; *Rhizophora corniculata* L.; *Umbraculum corniculatum* (L.) Kuntze; *Umbraculum corniculatum* Kuntze)

Papua New Guinea, India. Small tree or shrub, sap white, inflorescence and fruit green, mangrove

See *Species Plantarum* 1: 443. 1753, *Herb. Amb.* 3: 117, t. 77. 1743, *Herbarium Amboinense* 13. 1754, *Amoen. Acad.* 4: 123. 1759, *De Fructibus et Seminibus Plantarum...* 1(1): 216, pl. 46, f. 1. 1788, *Flora de Filipinas* [F.M. Blanco] 79. 1837, *Revisio Generum Plantarum* 2: 405. 1891 and *Interpr. Rumph. Herb. Amb.* 33, 413. 1917

(Honey from flowers diluted with water and given to cure amebic dysentery. Stem bark poisonous to fish.)

in English: corniculate aegiceras, river mangrove

in China: la zhu guo

in India: dudumara, guggilam, guggilamu, halsi, kalasi, kamdlam, kanjalaa, kanjala, khalshi, khalsi, kharsi, narikandam, pou-kandel, shule, siri-kamdalo, soole, sule, vittu-nakkandai

Malayan names: changgai menora, kachang kachang, kuku lang, teruntum, tungkang mata

in Papua New Guinea: bula

Aeginetia L. Orobanchaceae (Scrophulariaceae)

In honor of Paulus Aegineta (Paulos Aeginetes, Paul of Aegina), flourished as a medical doctor in 7th century Egypt, surgeon, his most important work is his medical encyclopedia. See Paulus Aegineta, *Opera medica*, libri VII, graece. Venetiis 1554, *Pauli Aeginetae praecepta salubria*, Guil. Copo basiliensi interprete. Parisiis 1510, *Species Plantarum* 2: 632. 1753, *Flora Atlantica* 2: 60. 1798, *The Medical Works of Paulus Aegineta ...* Translated into English, with a copious commentary ... by F. Adams. London 1834, *The seven books of Paulus Aegineta*. Translated from the Greek. With a commentary embracing a complete view of the knowledge possessed by the Greeks, Romans, and Arabians on all subjects connected with medicine and surgery. London 1844–1848, Ernst H.F. Meyer, *Geschichte der Botanik*. II: 412–421. Königsberg 1854–1857 and *Annals of the Royal Botanic Gardens. Peradeniya* 10: 153. 1927.

Aeginetia indica Linnaeus (*Aeginetia aeginetia* (L.) Huth; *Aeginetia aeginetia* Huth; *Aeginetia japonica* Siebold & Zuccarini; *Orobanche aeginetia* Linnaeus; *Phelipaea indica* (Linnaeus) Sprengel ex Steudel)

India, China.

See *Species Plantarum* 2: 632. 1753, *Species Plantarum*, Editio Secunda 883. 1763, *Ann. Mus. Natl. Hist. Nat.* x. (1807) 298. t. 21. 1807, *Flora Japonica* 1: 17. 1835, *Abh. Math. Akad. Muench.* iv. III. (1845) 341. 1845, *Helios* 11(9): 132. 1893 and Zhang Zhiyun. *Orobanchaceae*. In: Wang Wentsai, ed., *Fl. Reipubl. Popularis Sin.* 69: 69–124. 1990, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 26/27: 22. 1997

(To cure dysentery fruits boiled taken, and seeds removed. Roots and flowers used for clearing away heat and toxic materials.)

in English: Indian broomrape

in China: ye gu

in India: sanghar vai-bel, sanghar vaibel, tsjem-cumulu

in Japan: Taiwan-giseru

Aegiphila Jacq. Lamiaceae (Labiatae, Verbenaceae)

Greek *aix*, *aigos* ‘a goat’ and *philos* ‘lover, loving’, some suggest from *aiges* ‘waves’, see *Observationum Botanicarum* 2: 3, t. 27. 1767, *Sylva Telluriana* 161. 1838 and *Fieldiana, Bot.* 24(9/1–2): 167–236. 1970.

***Aegiphila peruviana* Turcz.**

Peruvian Amazon. Shrub, white flowers, understory, moist areas, lowland forest

See *Observationum Botanicarum* 2: 3. 1767, *Bulletin de la Société Impériale des Naturalistes de Moscou* 36(2): 219. 1863

(To treat infected ulcers and skin problems, mycosis.)

in Peru: arcosacha, chirapa sachá, huaca

Aegle Corrêa Rutaceae

In Greek mythology Aegle was one of the Naiads (Naiades), the nymphs of the fresh water, rivers, springs and lakes, see *Transactions of the Linnean Society of London* 5: 222–223. 1800.

***Aegle marmelos* (L.) Corrêa ex Roxb.** (*Aegle marmelos* Corrêa; *Aegle marmelos* (L.) Corrêa; *Belou marmelos* (L.) A. Lyons; *Belou marmelos* W.F. Wight; *Bilacus marmelos* Kuntze; *Crateva marmelos* Linnaeus; *Feronia pellucida* Roth)

India. Tree, semi-deciduous, thorny, spines axillary, leaves stalked alternate, fragrant greenish-white flowers in axillary panicles, globose fruits, woody shell, delicious pulp of the ripe fruit eaten or used as a cooling drink, in dry forests

See *Species Plantarum* 1: 444. 1753, *Pl. Coast Corom.* 2: 23. 1798, *Transactions of the Linnean Society of London* 5: 222–223. 1800 and *Taxon* 28: 274–275. 1979, *Taxon* 30: 75. 1981, *J. Econ. Taxon. Bot.* 27(1): 29–35. 2003

(Used in Ayurveda, Unani and Siddha/Sidha. Root as antidote, antivenom; contact therapy, or touch therapy, root tied to the arm to prevent cholera. Fruit, leaves and root used in the form of powder, juice and decoction to treat diarrhea, dysentery, sprue, piles, edema, jaundice, vomiting, obesity, eye diseases, fever. Unripe fruit astringent, digestive, stomachic, used to cure diarrhea and chronic dysentery. Fruit ash mixed with water and applied on forehead for headache; ripe fruits eaten for constipation; fruit of *Aegle marmelos* ground together with the leaves of *Adhatoda vasica*, roots of *Cyperus rotundus*, boiled and taken in menstrual disorders; fruit pulp given for the treatment of spermatorrhea. Mature fruit and seed botanical pesticides, used for fungal infections of fruit crops. Poultice of leaves used in eye and skin diseases; leaves fried in *ghee* and made into a paste applied for healing wounds and cuts; leaves juice antidiabetic; leaves for alcoholic hepatitis; tender leaves macerated taken for dysentery. Bark and leaves against intermittent fever. Veterinary medicine, fruit decoction given orally in tympany; leaf juice against foot-and-mouth disease in cattle; crushed leaves applied and bound in bone fracture; ashes of the leaves used to kill worms of animal wounds; leaf paste mixed with turmeric applied in boils, blisters, ulcers and wounds; leaf paste used as eye drops for opacity of cornea; leaves juice of *Coix lacryma-jobi* with leaf juice of *Aegle marmelos* given

as purgative; leaves of *Aegle marmelos* with leaves of *Vitex negundo* boiled in water and the warm extract given orally in retained placenta. Fruit pulp, stem bark and root to poison fish. Used in religion and magico-religious beliefs, tree worshipped during religious ceremonies, rosaries made of twigs and wood, ingredient of Patra pooja in different religious pooja ceremonies, in Ganesh-pooja; generally cultivated near temples, sacred to Parvati, it is considered sacrilege to cut it down; leaves employed in the ceremonial of the worship of Lord Shiva, leaves offered by Hindus to Lord Shiva.)

in English: bael fruit, bael fruit of India, bael tree, bel fruit, bel tree, Bengal quince, golden apple, Indian bael fruit, Indian quince, stone apple, wood apple

in Burma: okshit, opesheet

in Cambodia: bnau

in China: mu ju

Aeglopsis Swingle Rutaceae

Resembling the genus *Aegle* Corrêa, see *Journal of the Linnean Society, Botany* 37: 505. 1906, *Bull. Soc. Bot. France* 58 (Mém. 8d): 237. 1912 [1911 publ. 1912].

Aeglopsis chevalieri Swingle (*Balsamocitrus chevalieri* (Swingle) A. Chev.)

Tropical Africa, Guinea.

See *Bulletin de la Société Botanique de France* Mém. 58(Mém. 8d): 220, 237. 1912 [1911 publ. 1912], *Bull. Soc. Bot. France*, 1913, 60: 406. 1913, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 102. 1920

(Fruit rind and leaves stomachic, anthelmintic, astringent and antiparasitic.)

in Yoruba: sanga

Aeollanthus Martius ex Sprengel Lamiaceae (Labiatae)

Greek *aiollo*, *aiollein* 'to variegated, to shift colour' and *anthos* 'a flower', see *Systema Vegetabilium*, editio decima sexta

[Sprengel] 2: 678, 750. 1825, *Bull. Mus. Hist. Nat. (Paris)* 3: 329. 1897 and *Fl. Trop. Afr.* 5: 395. 1900, De Wildeman, Emile August(e) Joseph (1866–1947), *Contribution à l'étude de la flore du Katanga*. Bruxelles, 1921, *Nuovo Giorn. Bot. Ital.*, n.s., 29: 114. 1922 (publ. 1923), *Symb. Bot. Upsal.* 26(1): 1–152. 1986.

Aeollanthus pubescens Benth. (*Aeollanthus buettneri* Gürke; *Aeollanthus calvus* Briq.; *Aeollanthus chevalieri* Briq.; *Aeollanthus elongatus* Briq.; *Aeollanthus lujai* De Wild.; *Aeollanthus petasatus* Briq.; *Aeollanthus pubescens* var. *nudus* A. Chev.; *Aeollanthus purpureopilosus* Wernham; *Aeollanthus robynsii* De Wild.; *Aeollanthus stormsii* Gürke; *Aeollanthus stormsioides* Stopp)

Ghana, Tanzania. Herb, glandular-pubescent, erect, much-branched, 4-angled, strongly aromatic leaves, corolla light purple with blue veins on upper lip, leaves eaten

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 12: 80. 1848, *Bot. Jahrb. Syst.* 19: 188, 222. 1894, *Bull. Herb. Boissier* 4: 820. 1896, *Bull. Soc. Roy. Bot. Belgique* 37: 62. 1898 and *J. Bot.* 49: 323. 1911, *Bull. Soc. Bot. France* 58(8): 196–197, 201. 1911 (publ. 1912), *Contr. Fl. Katanga*, Suppl. 1: 80. 1927, *Pl. Bequaert.* 4: 378. 1928, *Bull. Jard. Bot. État* 28: 313. 1958

(Leaves postpartum remedy, febrifuge, carminative.)

Aerangis Reichb.f. Orchidaceae

Greek *aer* 'air' and *angeion*, *aggeion*, *angos* 'a vessel, cup', referring to the slender spur, vessel-like or slightly swollen towards apex, see *Flora* 48: 190. 1865 and *Die Orchideen* 600. 1914, *Fl. Cameroun* 36: 832. 2001.

Aerangis thomsonii (Rolfe) Schltr. (*Aerangis friesiorum* Schltr.; *Angraecum thomsonii* Rolfe)

Tropical Africa. Epiphyte, stem with pendulous roots

See *Fl. Trop. Afr.* [Oliver et al.] 7(1): 143. 1897 and *Beih. Bot. Centralbl.* 36(2): 121. 1918, *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 22. 1924

(Bark antiinflammatory, for abscesses, topic treatment of hernia.)

Aerides Lour. Orchidaceae

Greek *aer* 'air', referring to the epiphytic habit of the plants, see *Flora Cochinchinensis* 2: 525. 1790.

Aerides maculosa Lindl. (*Aerides illustris* Rchb.f.; *Aerides maculosa* var. *schroederi* (Rchb.f.) A.H. Kent; *Aerides schroederi* Rchb.f.; *Gastrochilus speciosus* (Wight) Kuntze; *Saccolabium speciosum* Wight)

India.

See *Edwards's Bot. Reg.* 31: 58. 1845, *Revis. Gen. Pl.* 2: 661. 1891

(Juice of fresh fruits applied on wounds.)

in India: lasun

Aerides multiflora Roxb. (*Aerides affine* Lindl.; *Aerides affinis* Wall. ex J. Lindl.; *Aerides godefroyana* Rchb.f.; *Aerides lobbii* Lem., nom. illeg.; *Aerides multiflora* var. *dactyloides* M. Ahmed & al.; *Aerides multiflora* var. *godefroyana* (Rchb.f.) H.J. Veitch; *Aerides multiflora* var. *lobbii* H.J. Veitch; *Aerides multiflora* var. *veitchii* (E. Morren) H.J. Veitch; *Aerides multiflorum* Roxb.; *Aerides veitchii* E. Morren; *Cleisostoma vacherotiana* Guillaumin; *Epidendrum geniculatum* Hook.f.)

Himalaya, India. Very fragrant rose-purple flowers in long pendulous sprays

See *Pl. Coromandel* 3: 68. 1820, *Flora Indica*; or descriptions of Indian Plants 3: 345. 1823 and *Taxon* 28: 406–408. 1979, *Taxon* 30: 512. 1981, *Bangladesh J. Bot.* 18: 152. 1989, *Opera Bot.* 114: 428–429. 1992

(Antibacterial.)

in India: lawhngpar, lawhngpar, maana

in Thailand: ueang kulab malai dang

Aerva Forsskål Amaranthaceae

From *râ*, *aerua*, *ärua*, *erona* or *eroua*, the Arabic names for a species [without epithet] of the genus, locality of collection Cairo ["In desertis Káhirinis rarior"], 1762; see *Familles des Plantes* 2: 268. 1763, P. Forsskål, *Flora aegyptiaco-arabica*. 122, 170. Copenhagen 1775, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 4: 272. 1886, *Nat. Pflanzenfam.* 3(1a): 105, 109. 1893.

Aerva javanica (Burm.f.) Juss. (*Achyranthes javanica* (Burm.f.) Pers.; *Aerva javanica* (Burm.f.) Juss. ex Schult.; *Aerva javanica* (Burm.f.) Schult., nom. illeg., non *Aerva javanica* (Burm. f.) Juss.; *Aerva javanica* var. *javanica*; *Aerva persica* (Burm.f.) Merr.; *Aerva persica* Merr.; *Aerva persica* var. *bovei* Webb; *Aerva persica* var. *latifolia* Vahl; *Aerva ruspolii* Lopr.; *Aerva tomentosa* Forssk.; *Celosia lanata* L.; *Celosia lanata* L. var. *latifolia* Vahl; *Illecebrum javanicum* (Burm.f.) Merr.; *Iresine javanica* Burm.f.; *Iresine persica* Burm.f.)

India. Undershrub, white flowers

See *The Civil and Natural History of Jamaica in Three Parts* 358. 1756, *Flora Indica*; or descriptions of Indian Plants 212, t. 65, f. 2. 1768, *Flora Aegyptiaco-Arabica* 122, 170. 1775, *Annales du muséum national d'histoire naturelle* 2: 131. 1803, *Systema Vegetabilium* 5: 565. 1819 and *Philippine Journal of Science* 19: 348. 1921, *Flore de Madagascar et des Comores* 67: 1–51. 1954

(Used in Ayurveda and Sidha. Powder of dried leaves taken to treat jaundice; leaf and root juice given for urinary disorders.

Seeds in rheumatism, for swollen liver, malaria; stems infusion emetic, used to stop bleeding. Veterinary medicine, roots juice to treat eye diseases in cattle.)

in Arabic: alra, alreen, erwa, sadjaret ennaghi, sadjaret ennadje, aerua, râ

in India: avalavi, avalavicceti, boi kalan, bui, buida, bur, cimili, cimilikacceti, cimilikam, dholimundi, dholphuli, doddahindi gidda, kamheda, kannuppilai, kannuppilaicceti, krishnavalli, kulirkonikacceti, kulirkonikam, lal bishalyakarani, maga beera, magavira, nilkanthi, pasanabheda, pasanapeti, pedda pindi, periyapulai, perum pilai, perumbulai, perumpilai, perumpilaicceti, perumpoolai, perumpuli, pincatacceti, pindi konda, pratanika, pulaippancu, pulaippu, safed-bui, tautikapilai, tautikapilaicceti, tripatra, tucikai, valliyaka

in Kenya: ekwanga

Aerva lanata (L.) Juss. ex Schult. (*Achyranthes lanata* L.; *Achyranthes villosa* Forssk.; *Aerva arachnoidea* Gand.; *Aerva incana* Suess.; *Aerva lanata* (L.) Aeschynanthus Jack Gesneriaceae

Greek *aischyno*, *aischyne* ‘shame’ and *anthos* ‘flower’, referring to the flowers, the species are mostly epiphytic, a few are lithophytic, see *Edinburgh Philosophical Journal* 7(13): 84–85. 1822, *Transactions of the Linnean Society of London* 14: 42, t. 2. 1823.

***Aeschynanthus elongatus* C.B. Clarke**

Indonesia. Herbaceous climber, red flower

See *Monographiae Phanerogamarum* 5: 45. 1883

(Crushed leaves applied as a poultice to sprained joints.)

in English: sprain vine

in Indonesia: aka pebejek

***Aeschynanthus hookeri* C.B. Clarke**

Bhutan, China, India, Myanmar. Calyx red or purple, corolla scarlet to orange-scarlet, cymes pseudoterminal

See *Monographiae Phanerogamarum* 5: 21. 1883 and *Selbyana* 6: 1–219. 1983

(Aphrodisiac.)

in China: shu hua mang mao ju tai

in India: bawltehlantai, utangbi

***Aeschynanthus longicaulis* Wall. ex R. Br. (*Aeschynanthus marmoratus* T. Moore)**

China.

See *Plantae Javanicae Rariores* 116. 1839

(For boils, pound the leaves with rice and poultice.)

in China: chang jing mang mao ju tai

Malay name: maman kurai

***Aeschynanthus novogracilis* W.T. Wang (*Aeschynanthus gracilis* Parish ex C.B. Clarke, nom. illeg.; *Aeschynanthus gracilis* hort. ex Hanst.)**

India, China.

See *Flora Brasiliensis* 8: 418. 1864, *Commelynaceae et Cyrtandraceae Bengalenses* 75. 1874 and *Acta Phytotaxonomica Sinica* 13(2): 65. 1975

(Pounded leaves applied on the body part affected with skin disorder and for relief from itching.)

in China: xi mang mao ju tai

in India: rasson

***Aeschynanthus obconicus* C.B. Clarke**

Indonesia. Herbaceous climber, red flowers

See *Monographiae Phanerogamarum* 5: 50. 1883

(Crushed leaves applied as a poultice to sprained, swollen joints.)

in English: twisting vine

in Indonesia: aka lepet

***Aeschynanthus parviflorus* Ridl. (*Aeschynanthus parviflorus* C.B. Clarke; *Aeschynanthus parviflorus* Spreng.; *Aeschynanthus ramosissimus* Wall.)**

Nepal. Epiphytic herb, red flowers

See *Syst. Veg.* (ed. 16) [Sprengel] 4(2, Cur. Post.): 238. 1827 [Jan–Jun 1827] and *J. Fed. Malay States Mus.* 4: 48. 1909

(Fertility promotion, juice of plant given to sterile women. Powdered leaf baked and taken for headache.)

in Nepal: syabal, thirjo

***Aeschynanthus sikkimensis* (C.B. Clarke) Stapf (*Aeschynanthus maculatus* Lindl. var. *sikkimensis* C.B. Clarke; *Aeschynanthus sikkimensis* Stapf)**

India.

See *Edwards's Bot. Reg.* 27: t. 28. 1841, *Monographiae Phanerogamarum* 5: 24. 1883 and *Botanical Magazine* 148: t. 8938. 1922

(Flowers infusion taken for tonsillitis, sore throat. Root decoction drunk as febrifuge. Crushed leaves juice applied on inflammation.)

in India: bawl-te-hlan-tai, bawltehlantai

Aeschynomene L. Fabaceae (Aeschynomeneae)

Greek *aischynomene*, ancient name for a sensitive plant (Plinius, 24.167), from *aischyno*, *aischyne* ‘shame’, referring to the leaves, Latin *aeschynomene* for a plant which shrinks when touched, a sensitive plant, *Mimosa pudica* L. (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 713–714. 1753, *Genera Plantarum*. Ed. 5. 319. 1754, C.S. Rafinesque, *Florula ludoviciana*. 137. New York 1817 and E.D. Merrill, *Index Rafinesquianus*. 147. 1949, *Bulletin de la Société Botanique de Belgique* 86(2): 176. 1954, *Bulletin du Jardin Botanique de l'État* 24: 70. 1954, *Contr. U.S. Natl. Herb.* 32(1): 1–172. 1955, *Reinwardtia* 5(1): 23–36. 1959, *Kew Bulletin* 24(1): 14. 1970, *Brenesia* 18: 15–90. 1980, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Listados Florist. México* 22: 1–55. 2001.

***Aeschynomene afraspera* J. Léonard (*Aeschynomene aspera* auct., non L.; *Aeschynomene lagenaria* Lour.; *Aeschynomene surattensis* Wight & Arn.; *Aeschynomene trachyloba* Miq.; *Hedysarum lagenarium* (Lour.) Roxb.; *Sesbania leptocarpa* auct., non DC.)**

Tropical Africa. Annual non-climbing shrub, erect to suberect, glandular-pubescent, high nitrogen content, grazed by ruminants, palatable forage legume

See *Bulletin du Jardin Botanique de l'État* 24: 64. 1954, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983

(Applied externally to stop bleeding.)

in English: pith plant, shola pith, sola pith plant

in India: attuneddi, laugauni, maha diya siyambala, sola

in Thailand: sano

in Hausa: bambamko

Aeschynomene americana L. (*Aeschynomene americana* var. *depila* Millsp.; *Aeschynomene americana* var. *glandulosa* (Poir. ex Lam.) Rudd; *Aeschynomene americana* var. *longifolia* Micheli ex Donn. Sm.; *Aeschynomene americana* var. *villosa* (Poir.) Urb.; *Aeschynomene floribunda* M. Martens & Galeotti; *Aeschynomene glandulosa* Poir. ex Lam.; *Aeschynomene guayaquilensis* G. Don; *Aeschynomene javanica* var. *luxurians* Miq.; *Aeschynomene mexicana* Biroli ex Colla; *Aeschynomene mexicana* Colla; *Aeschynomene mimulosa* Blume ex Miq.; *Aeschynomene mimulosa* Miq.; *Aeschynomene tricholoma* Standl. & Steyerl.; *Aeschynomene villosa* Poir. var. *longifolia* (Micheli ex Donn. Sm.) Rudd; *Hippocrepis mimulosa* Noronha)

Kenya, Sulawesi, South America. Perennial non-climbing shrub, erect or decumbent, glandular hispid, purplish flowers, verrucose pods, dark brown seeds

See *Species Plantarum* 2: 713, 744. 1753, *Verh. Batav. Gen.* 5(4): 18. 1790, *Encyclopédie Méthodique. Botanique ... Supplément* 4(1): 76. 1816, *A General History of the Dichlamydeous Plants* 2: 284. 1832, *Herbarium Pedemontanum* 2: 195. 1834, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 186. 1843, *Flora van Nederlandsch Indië* 1: 276. 1855, *Botanical Gazette* 20(7): 284. 1895, *Publications of the Field Columbian Museum, Botanical Series* 1(4): 363. 1898 and *Symbolae Antillarum* 4(2): 288. 1905, *Publications of the Field Museum of Natural History, Botanical Series* 23(1): 10. 1943, *Contributions from the United States National Herbarium* 32(1): 26, 35. 1955, *Bol. Soc. Argent. Bot.* 34(1–2): 119–122. 1999

(Parts of the plant applied to skin complaints, rherumatism.)

in English: American joint vetch, American sensitive vetch, bastard sensitive plant, joint vetch

in China: mei zhou jue ming, min gan he meng

in Japan: Amerika-kusa-nemu

in the Philippines Isl.: makahiyang lalake, mala makahiya

Aeschynomene aspera L. (*Aeschynomene afraspera* J. Léonard; *Aeschynomene aquatica* Roxb. ex Steud.; *Aeschynomene aspera* Muhl. ex Willd.; *Aeschynomene aspera* Wall.; *Aeschynomene aspera* (Poir.) J. St.-Hil.; *Aeschynomene aspera* Noronha; *Aeschynomene indica* var. *aspera* Hassk. ex Miq.; *Aeschynomene lagenaria* Lour.; *Aeschynomene surattensis* Wight & Arn.; *Aeschynomene*

trachyloba Miq.; *Hedysarum asperum* Poir.; *Hedysarum lagenarium* Roxb.; *Hedysarum lagenarium* (Lour.) Roxb.; *Sesbania grandiflora* (L.) Pers.; *Sesbania leptocarpa* auct., non DC.)

India. Perennial non-climbing shrub, leaves edible, green manure

See *Sp. Pl.* 2: 713. 1753 [1 May 1753], *Verh. Bat. Gen.* 5(4): 5. 1790, *Sp. Pl.*, ed. 4 [Willdenow] 3(2): 1163. 1802 [1–10 Nov 1802], *Encyclopédie Méthodique, Botanique* 6(2): 408. 1805, *Journal de Botanique*, rédigé par une société de botanistes 1: 60. 1813, *A Numerical List of Dried Specimens* n. 5666. 1831–1832 and *Reinwardtia* 5(1): 23–36. 1959, *Fl. W. Pakistan* 100: 339. 1977, *Economic Botany* 32(3): 297–310. 1978, *Taxon* 28: 393–395. 1979, *Taxon* 31: 576–579. 1982, *Cytologia* 54: 51–64. 1989

(Used in Ayurveda and Sidha. Powdered root given for gastric pain. Applied externally to stop bleeding; leaf fomentation used for joints swelling.)

in English: pith plant, shola pith, sola pith plant

in India: aatru netti, alagina, alagina gida, aligina, amunkakoti, arru netti, arrukatesam, athunetti, atru netti, attekudasa, attukatesham, attuneddi, ayariyam, ayiri, ayiriyam, bendu, bendu gida, catai, cataicci, cataikkoti, cayulatikam, damana, jeenangi, jiluga, jiluga bendu, jilugu, jinangi, kadessum, kare bendu, kataicci, kere bondu, kitai, kitaiccai, kitaicci, kitaiccu, kiteccai, kokkeri, kokketu, kotal, koti neti, kottirakakoti, kottirakam, kottiram, laugauni, mamuti, narana, narukkunetti, narukkuvetti, neerunjiluga, nellitali, nellittali, nertattai, nertattaikkoti, netti, netticceti, nir jiluga, nirccunti takkai, niru-jilugu, punetti, sadai, shola, shulo, sitavirya, sola, solo, takkai, takkaipputu, tanakali, tankali gida, thige jluga, totalavakakoti, totalavam, tuyilkana, tuyilkanacceti, venkitaicci, vintukavuli

in Nepal: dhondiya, shakla

Aeschynomene crassicaulis Harms (*Smithia trochainii* Berhaut)

Senegal, Congo. Perennial non-climbing herb, often partially submerged, with procumbent stems on mud or floating on water, fodder

See *Botanische Jahrbücher für Systematik, Pflanzen-geschichte und Pflanzengeographie* 40: 38. 1907

(Leaves added to a mixture of other plants to treat rheumatism, arthritis.)

in English: water Mimosa

in Nigeria: inuwar tufi, kaddaji, kaddajin rúwá, yaron kogi

Aeschynomene cristata Vatke (*Aeschynomene dewevrei* De Wild. & T. Durand; *Aeschynomene mazangayana* Baill.; *Hedysarum aquaticum* Bojer)

Tropical Africa, Madagascar. Perennial non-climbing shrub, herb, robust, erect, stems soft and hollow, flowers light

orange, long swollen floating stems, emerging from open water, floaters on fishing nets

See *Oesterreichische Botanische Zeitschrift* 28(7): 215–216. 1878

(Parts of the plant applied to skin complaints, parasitic infections.)

in Madagascar: fanisejetra, fotsy, hamotsy, poakaty

Aeschynomene elaphroxylon (Guill. & Perr.) Taub. (*Aedemone excelsa* Kotschy; *Aedemone humilis* Kotschy; *Aedemone mirabilis* Kotschy; *Aeschynomene tchadica* A. Chev.; *Herminiera elaphroxylon* Guill. & Perr.; *Smithia elaphroxylon* Baill.; *Smithia elaphroxylon* (Guill. & Perr.) Baill.; *Smithia grandidieri* Baill.)

Tropical Africa. Perennial non-climbing tree, large shrub or small tree, weedy, stems prickly, spongy wood very light, orange-yellow flowers, freshwater swamp, adapted to fluctuating, on the stem bark nitrogen-fixing bacteria

See *Florae Senegambiae Tentamen* 201, pl. 51. 1832, *Oesterreichische Botanische Zeitschrift* 8: 116. 1858, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(51): 404. 1883, *Die Natürlichen Pflanzenfamilien* 3(3): 319. 1894 and *Reinwardtia* 5(1): 23–36. 1959, *Journal of Ethnopharmacology* 85(1): 43–52. 2003

(For skin diseases.)

in English: ambach, ambatch, balsawood tree, Nile pith tree, pith tree

in Burundi: umusaabiro

in Madagascar: bemaivara, dofonga, fagnivambe, odifonga, roiantanety, vodifomba, vodifonga

in Nigeria: ambach, ambaj, fogo, fowo, fowu, marrea, mbilor, tororo

Aeschynomene indica Linnaeus (*Aeschynomene aspera* auct.; *Aeschynomene cachemiriana* Cambess.; *Aeschynomene diffusa* Klein ex Willd.; *Aeschynomene diffusa* Willd.; *Aeschynomene evenia* sensu Rudd; *Aeschynomene glaberima* Poir.; *Aeschynomene hispida* Willd.; *Aeschynomene indica* Wall.; *Aeschynomene indica* Burm. f.; *Aeschynomene indica* var. *punctata* Pers.; *Aeschynomene indica* var. *viscosa* Miq.; *Aeschynomene kashmiriana* Cambess.; *Aeschynomene macropoda* DC.; *Aeschynomene montana* Span.; *Aeschynomene oligantha* Welw. ex Baker; *Aeschynomene oligantha* Baker; *Aeschynomene pumila* L.; *Aeschynomene punctata* Steud.; *Aeschynomene quadrata* Schumach. & Thonn.; *Aeschynomene richardiana* Baill.; *Aeschynomene roxburghii* Spreng.; *Aeschynomene subviscosa* DC.; *Aeschynomene virginica* sensu auct.; *Aeschynomene viscidula* Willd.; *Hedysarum alpinum* Lour.; *Hedysarum neli-tali* Roxb.; *Hedysarum virginicum* Lour.; *Smithia aspera* Roxb.)

Old World tropics, India. Perennial non-climbing shrub to shrublet, prostrate, erect, suffrutescent, fleshy, leaves

sensitive, flowers pinkish-yellow, petals pale yellow with pink reddish lines, aerial nodules on the stem, forage, green manure

See *Species Plantarum* 2: 713–714. 1753, *Flora Indica ... nec non Prodrumus Florae Capensis* : 169. 1768, Schön, James Frederick (eigentl. Jakob Friedrich), *Grammar of the Hausa Language*. 1. Ausgabe. London, Church Missionary House, 1862 and *Reinwardtia* 5(1): 23–36. 1959, *Trop. Plant Sci. Res.* 1: 1–13. 1983, *Cytologia* 54: 51–64. 1989, *Journal of Cytology and Genetics* 25: 145–147, 173–219. 1990, *Veterinary Pathology* 40(3): 311–316. 2003, *Pesquisa Veterinária Brasileira*, I SILAPT, 24: 46. 2004, *Vet. Human Toxicol.* 46(6): 309–312, 2004, *Pesquisa Veterinária Brasileira* 25(3): 135–142. 2005

(Used in Sidha. Should be treated with caution due to reports of toxicity; there is evidence of toxicity to ruminants. Reported neurological disease in swine caused by the ingestion of the toxic seeds, causing functional derangement of the vestibulo-cerebellar system, followed by alterations in the microvasculature in the cerebellar and vestibular nuclei. Spermicide.)

in English: Buddha pea, curly indigo, hard sola, Indian joint vetch, kat sola, knuckle bean bush, northern jointvetch, sensitive joint vetch, shola pith, sola wood, trailing sesbania

in Hausa: bambamko

in Madagascar: hamoka

in Senegal: bu sèngèt bu it, falfolodii, folo dié, gaandul, mbolo mbolo, ndorbadié gori, tiilambé, tiilambu

in South Africa: kneukelboontjebos

in Cambodia: sano ach mon, sano bay, snaô ach mon, snaô bay

in China: he meng

in India: athunetti, bath-sola, bedukasa, bendu, bendu kasa, bendukasa, catai, catinam, chhuimui, chinggonglei, didhen, dyia-siyambala, heen-diya-siyambala, jeeluga, jiluga kaada, kath shola, kidaichi, kitai, kitaicci, kottiram, kuhila, lajuari, laugauni, nalabi, neli-tali, nelitali, nellithalli, nellitali, netti, nettithakkai, phulan, sadai poondu, sola, surlo, takkai, takkaippuntu, tella jeeluga, thakkapundu, thigejiluga, tigejiluga

in Indonesia: dinding, katisan, peupeuteuyan

in Japan: kusa-nemu

in Laos: sanô

in Thailand: sano-hin, sano-kangkhek

in Vietnam: d[aa]u ma, di[ef]n di[ef]n b[us]ng

Aeschynomene mimosifolia Vatke (*Aeschynomene nyikensis* Baker var. *gracilis* Suess.; *Aeschynomene walteri* Harms)

Tropical Africa. Perennial non-climbing shrub, erect, woody herb, sticky glandular, yellow petals with brownish stripes

See *Oesterreichische Botanische Zeitschrift* 29(7): 224. 1879, *Bull. Misc. Inform. Kew* 1897, 259. 1897 and *Bot. Jahrb. Syst.* liv. 385. 1917

(Leaves and twigs antiviral, analgesic.)

Aeschynomene nilotica Taub.

Cameroon, Namibia, Sudan. Annual non-climbing shrub, erect, yellow flowers, ripe pods dark brown, forage, fresh-water swamp

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 189. 1896

(Stomachic.)

in Congo: meboba, moboba

Aeschynomene rubrofarinacea (Taub.) F. White (*Geissaspis clevei* De Wild.; *Geissaspis rubrofarinacea* (Taub.) Baker f.; *Humularia maclouniei* (De Wild.) P.A. Duvign.; *Humularia rubrofarinacea* (Taub.) P.A. Duvign.; *Smithia rubrofarinacea* Taub.)

Tanzania. Perennial non-climbing shrub, leaves as fodder

See *Die Pflanzenwelt Ost-Afrikas* C: 216. 1895 and *Journal of Botany, British and Foreign* 46: 114. 1908, *Bulletin de la Société Botanique de Belgique* 86(2): 176–177. 1954, *Forest Fl. N. Rhodesia* 142, 455. 1962, *Kew Bulletin* 24(1): 14. 1970

(Root decoction drunk to remedy children's convulsions.)

in Tanzania: msirahengi

Aeschynomene uniflora E. Mey. (*Aeschynomene bracteosa* B. Boivin; *Aeschynomene papulosa* Baker; *Aeschynomene papulosa* Welw. ex Baker; *Aeschynomene trachyloba* Miq.; *Smithia bernieri* Baill.)

South Africa. Perennial non-climbing shrub, erect herb, shrubby, prostrate, straggling, weak-stemmed, multi-branched, flowers yellow, ripe fruit dark brown pods, leaves sensitive, fodder

See *Commentariorum de Plantis Africae Australioris* 123. 1836

(Roots for stomach troubles.)

in Madagascar: rangotsy

Aesculus L. Hippocastanaceae (Sapindaceae)

Aesculus, *i*, the Latin name for a tree, probably for a kind of oak, the Italian oak; Greek *askra*, Akkadian *isu*, *esu* and Sumerian *gis* 'tree', Akkadian *hursanu* and Sumerian *kur* 'mountain', Akkadian *esu* 'tree, wood' and *kallu* 'crown of the human skull, shell of the turtle, bowl', Latin *collis* and *collum*, see *Species Plantarum* 1: 344. 1753 and Hardin, J.W., Arena, J.M. *Human Poisoning from Native and Cultivated Plants*. Duke University Press, Durham, N.C., USA. 1969, Cooper, M.R., Johnson, A.W. *Poisonous Plants in Britain*

and *Their Effects on Animals and Man*. Her Majesty's Stationery Office, London, England. 1984, Lampe, K.F., McCann, M.A. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc. Chicago, Ill., USA. 1985.

Aesculus assamica Griff. (*Aesculus chinensis* Bunge; *Aesculus chuniana* Hu & W.P. Fang; *Aesculus khassyana* C.R. Das & Majumdar; *Aesculus khassyana* (Voigt) Das & Majumdar; *Aesculus lantsangensis* Hu & W.P. Fang; *Aesculus megaphylla* Hu & W.P. Fang; *Aesculus polyneura* Hu & W.P. Fang; *Aesculus polyneura* var. *dongchuanensis* X.W. Li & W.Y. Yin; *Aesculus punduana* Wallich ex Hiern, nom. illeg.; *Aesculus punduana* Wall.; *Aesculus rupicola* Hu & W.P. Fang; *Aesculus wangii* Hu var. *rupicola* (Hu & W.P. Fang) W.P. Fang)

Vietnam, China, Himalaya. Tree, spreading branches, digitate leaves, yellow to red-brown flowers in terminal panicles, leathery capsules

See *A Numerical List of Dried Specimens* [Wallich] n. 1189. 1829, *Enum. Pl. Chin. Bor.* 10. 1833, *Notulae ad Plantas Asiaticas* 4: 540. 1854, *Fl. Brit. India* [J.D. Hooker] 1: 675. 1875 and *Brittonia* 12: 46. 1960, *Bull. Bot. Surv. India* 3: 95. 1961 (1962), *Journal of Sichuan University: Natural Science Edition* 1960(3): 87–89, 91–93, 99–106, pl. 3, 5, 9, 10, 11, 12. 1962 [Act. Sci. Nat. Univ. Szech.], *Journ. Nat. Sci. Secondary Schools, Biol. Exper.* Issue No. 3: 220–221, 223, 229–230. 1965, *Flora Reipublicae Popularis Sinicae* 46: 284. 1981, *Bull. Bot. Res., Harbin* 10(1): 53. 1990, *Chem. Pharm. Bull.* 53: 1310–1313. 2005

(Antifungal, cytotoxic, abortifacient, diuretic. Leaf decoction for ear problems; leaves pressed and the juice dropped into ear. Toxic to fish, leaf and bark juice. Magic, contact therapy, leaves infusion as a wash in skin eruptions believed to be due to evil spirit.)

in English: East Himalayan horse chestnut

in China: chang bing qi ye shu

in India: bol rimmu, bol rimot, dieng dula, dieng sangkenrop, phak-lang-jam-araung, raman bih

Aesculus californica (Spach) Nutt. (*Calothyrsus californica* Spach; *Hippocastanum californicum* (Spach) Greene)

North America. Perennial tree, shrub, opposite palmately divided leaves, corolla pinkish white, flowers in a long terminal cluster, fruit a smooth leathery capsule, shiny seeds each with a pale scar

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 2: 62. 1834, *A Flora of North America: containing ...* 1(2): 251. 1838, *Manual of the Botany of the Region of San Francisco Bay ...* 73. 1894

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts. Smashed fruit applied for hemorrhoids; bark decoction for toothaches. Veterinary medicine. Fruit used as a fish poison.)

in English: California buckeye, California horse-chestnut, Californian buckeye

Aesculus flava Aiton (*Aesculus flava* Sol.; *Aesculus lutea* Wangenh.; *Aesculus octandra* Marsh.; *Aesculus octandra* var. *vestita* Sarg.; *Aesculus octandra* var. *virginica* Sarg.; *Aesculus pavia* var. *flava* (Sol.) Kuntze)

North America. Tree, thick canopy, small yellow green flowers in terminal panicles, smooth pear-shaped capsules, bitter seeds

See *Cat. Arbor. Fruticum Horto Edinensi Crescentium* 1778: 3. 1778, *Hortus Kewensis*; or, a catalogue ... 1: 494. 1789

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts.)

in English: sweet buckeye, yellow buckeye

Aesculus glabra Willd.

Southeastern and Central N. America. Tree, rough bark which has disagreeable order, a globular spine-roughened capsule

See *Species Plantarum* 1: 344. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 405. 1809 and Kornheiser, K.M. "Buckeye poisoning in cattle." *Vet. Med. Small Anim. Clin.* 78: 769–770. 1983, Lampe, K.F., McCann, M.A. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc. Chicago, Ill., USA. 1985

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts; dangerous parts are buds, nuts, leaves, bark, seedlings and honey. The fruits of this plant may be attractive to children and could cause poisoning if ingested. Cattle, grazing animals have been poisoned, and also those consuming the honey. Antispasmodic, antirheumatic, seeds used internally in the treatment of spasmodic coughs, earache, asthma, externally as a tea or an ointment in the treatment of rheumatism and piles. Fruit used as a fish poison.)

in English: buckeye, fetid buckeye, Ohio buckeye

Aesculus glabra Willd. var. *arguta* (Buckley) B.L. Rob. (*Aesculus arguta* Buckley; *Aesculus glabra* Willd. var. *buckleyi* Sarg.)

N. America. Tree

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 405. 1809, *Proceedings of the Academy of Natural Sciences of Philadelphia* 12: 443–444. 1860[1861], *Synoptical Flora of North America* 2: 447. 1897 and *Kalmia* 12: 18. 1982

(Fruit infusion emetic.)

in English: Ohio buckeye, Texas buckeye

Aesculus glabra Willd. var. *glabra* (*Aesculus glabra* Willd. var. *leucodermis* Sarg.; *Aesculus glabra* Willd. var. *micrantha* Sarg.; *Aesculus glabra* Willd. var. *monticola* Sarg.;

Aesculus glabra Willd. var. *pallida* (Willd.) G. Kirchn.; *Aesculus glabra* Willd. var. *sargentii* Rehder)

Southeastern and Central N. America. Perennial tree, rough bark which has disagreeable order, a globular spine-roughened capsule

See *Species Plantarum* 1: 344. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 405. 1809 and Kornheiser, K.M. "Buckeye poisoning in cattle." *Vet. Med. Small Anim. Clin.* 78: 769–770. 1983, Lampe, K.F., McCann, M.A. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc. Chicago, Ill., USA. 1985

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts; dangerous parts are buds, nuts, leaves, bark, seedlings and honey. The fruits of this plant may be attractive to children and could cause poisoning if ingested. Cattle, grazing animals have been poisoned, and also those consuming the honey. Antispasmodic, antirheumatic, seeds used internally in the treatment of spasmodic coughs, earache, asthma, externally as a tea or an ointment in the treatment of rheumatism and piles. Powdered nuts used as a fish poison.)

in English: buckeye, fetid buckeye, Ohio buckeye

Aesculus hippocastanum L. (*Hippocastanum vulgare* Gaertn.)

Cosmopolitan. Tree, flowers white with red and yellow, echinate fruits

See *Species Plantarum* 1: 344. 1753 and *Acta Biologica Cracoviensia, Series Botanica* 22: 37–69. 1980, *Regnum Veg.* 127: 15. 1993, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts; dangerous parts are buds, nuts, leaves, bark, seedlings and honey. The fruits of this plant may be attractive to children and could cause poisoning if ingested. It has poisoned cattle, grazing animals, horses, pigs and also those consuming the honey, causing sickness and death. Human poisoning has also occurred. Horse-chestnut fruits, leaves, and flowers contain the chemical aesculin, a saponin. Young leaves and flowers especially toxic to cattle. Analgesic, antirheumatic, powdered roots used for chest pains.)

in English: buckeye, common horse-chestnut, horse-chestnut, horse-chestnut tree

in China: ou zhou qi ye shu

in India: baloot

Aesculus indica (Wall. ex Cambess.) Hook. (*Aesculus indica* Coleb. ex Wall.; *Aesculus indica* (Coleb. ex Cambess.) Hooker; *Aesculus indica* Coleb.; *Pavia indica* Wall. ex Cambess.; *Pavia indica* Wall.)

NW Himalaya. Deciduous tree, large, compound opposite long-stalked leaves, white pinkish flowers in terminal pyramidal panicles, clawed petals, rounded depressed shining seeds, twigs and leaves fodder, seeds ground and mixed with flour, fragrant flowers in blooming stage

See *Species Plantarum* 1: 344. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Voyage dans l'Inde* 4(Bot.): 31, pl. 35. 1835–1844 [1841], *Botanical Magazine* 85: pl. 5117. 1859 and *Fl. Iranica* 92: 2. 1972

(Bark astringent, tonic, febrifuge. Seeds astringent, acrid, narcotic; seed oil used externally in rheumatism, cutaneous infections, scabies, ringworm; oil cake made into a paste and applied to the forehead to relieve severe headache. Powdered kernel warmed in water and used for healing skin fissures and cracks; ripe nut anti-colic. Roots for leucorrhoea. Veterinary medicine, crushed seeds given to cattle to increase the quality and quantity of milk.)

in English: forest walnut, horse-chestnut, Indian horse-chestnut, the Himalayan horse-chestnut

in India: akhnor, ban-khor, bankhar, bankhor, goon, gugu, gun, han doon, handoon, hane, hanudun, haunudun, kanor, kanur, khanir, khandoor, khanor, pangar, pangara, pangla, pankar, seutoalla, torjaga

in Nepal: naru, pangra, pangro

in Sanskrit: saptaparna

Aesculus parviflora Walter

North America.

See *Flora Caroliniana*, secundum ... 128. 1788

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts.)

in English: bottlebrush buckeye, dwarf horse-chestnut

Aesculus pavia L. (*Pavia pavia* (L.) Huth) (for the Dutch physician Pieter Pavius (Paaw, Paauw, Pauw), 1564–1617, botanist; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 662. Ansbach 1852; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 327. Berlin & Hamburg 1989)

North America. Tree, shrub

See *Species Plantarum* 1: 344. 1753, *Helios* 11(9): 135. 1893

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts. Antirheumatic, stimulant. Poultice of pounded nuts used for wounds, sprains, sores and infections. Roots infusion taken for dyspepsia, colic; bark compound infusion given to stop bleeding after delivery. Good luck charm.)

in English: firecracker plant, red buckeye

Aesculus pavia L. var. ***pavia*** (*Aesculus austrina* Small; *Aesculus discolor* Pursh; *Aesculus discolor* Pursh var. *mollis* (Raf.) Sarg.; *Aesculus pavia* var. *discolor* (Pursh) A. Gray; *Aesculus splendens* Sarg.) (for the Dutch physician Pieter Pavius (Paaw, Paauw, Pauw), 1564–1617, botanist; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 662. Ansbach 1852; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 327. Berlin & Hamburg 1989)

North America. Tree, shrub

See *Species Plantarum* 1: 344. 1753, *Helios* 11(9): 135. 1893

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts. Antirheumatic, stimulant. Poultice of pounded nuts used for wounds, sprains, sores and infections. Roots infusion taken for dyspepsia, colic; bark compound infusion given to stop bleeding after delivery. Good luck charm.)

in English: firecracker plant, red buckeye

Aesculus sylvatica W. Bartram

North America. Tree, shrub

See *Travels Through North and South Carolina* 476. 1791

(Highly toxic, raw seeds and fresh fruit said to be poisonous, may be fatal if eaten; poisonous parts, seeds and tea made from leaves and sprouts.)

in English: dwarf buckeye, Georgia buckeye, painted buckeye

Aesculus turbinata Blume (*Aesculus turbinata* fo. *pubescens* (Rehder) Ohwi ex Yas. Endo; *Aesculus turbinata* var. *pubescens* Rehder)

China.

See *Rumphia* 3: 195. 1847 and *Journal of the Arnold Arboretum* 3: 219. 1922

(Capsular fruit used as an astringent, in the form of infusion.)

in English: Japanese horse-chestnut

in China: ri ben qi ye shu

in Japan: jochi, tochi-ni

Aethusa L. Apiaceae (Umbelliferae)

Greek *aitho*, *aithen* 'to light up, to burn, blaze, to scorch', referring to the dangerous and poisonous nature of this weed; see Carl Linnaeus, *Species Plantarum*. 256. 1753; H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 43. Basel 1996.

Aethusa cynapium L.

Europe. Herb, evil smell, weed

See *Species Plantarum* 1: 256. 1753 and *Taxon* 30: 856–857. 1981, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Hessische Floristische Briefe* 33: 46–48. 1984, *Acta Botanica Fennica* 130. 1985, *Fl. Iran.* 162: 345. 1987, *Linzer Biologische Beiträge* 23: 457–481. 1991

(Entire plant poisonous. Sedative, stomachic, used in the treatment of gastro-intestinal problems, convulsions, vomiting in children and diarrhea.)

in English: fool's parsley

in Italian: cicuta aglina, cicuta minore, falso prezzemolo

Afraegle (Swingle) Engl. Rutaceae

From Africa and the genus *Aegle*, Greek *aegle* 'splendor, glory, lustre', see *Bulletin de la Société Botanique de France*: 58(Mém. 8d): 231, 233. 1912 [1911 publ. 1912], *Pflanzenw. Afr.* 3(1): 761 f. 355. 1915 (Engl. & Drude, *Veg. der Erde*, ix).

Afraegle paniculata (Schum. & Thonn.) Engl. (*Balsamocitrus paniculata* (Schum. & Thonn.) Swingle; *Balsamocitrus paniculata* Swingle; *Citrus paniculata* Schum. & Thonn.)

Tropical Africa. Tree, thorny, globose smooth fruits, white mucilaginous flesh with white seeds

See *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.*, 4: 152. 1828, Schön, James Frederick (eigentl. Jakob Friedrich), *Grammar of the Hausa Language*. 1. Ausgabe. London, Church Missionary House, 1862 and *Bulletin de la Société Botanique de France*: 58(Mém. 8d): 231. 1912 [1911 publ. 1912], *Pflanzenw. Afr.* 3(1): 761 f. 355. 1915, *West African Journal of Pharmacology and Drug Research* 2(2): 3–86. 1975, *Nat. Prod. Commun.* 5(4): 559–561. 2010

(Stem bark antimicrobial, antiinflammatory, fungicidal and algicidal. Fruit rind and leaves carminative, emetic, febrifuge.)

in Nigeria: Nigerian powder flask

in Nigeria: kokuwa (Hausa); sanga (Yoruba)

Aframomum K. Schumann Zingiberaceae

From Africa and the genus *Amomum* Roxb.; see Casimiro Gómez de Ortega (1740–1818), *Historia natural de la Malagueta, o pimienta de tavasco*. Madrid 1780 and Francisco de Mello, *Memoria sobre a malagueta ... 2a edição prefaciada e revista por R.T. Palhinha*. Lisboa 1945.

Aframomum albiflorum Lock

Tanzania. Herb, flowers white

See *Kew Bulletin* 39: 839. 1984

(Aromatic, carminative, relieving flatulence, and stimulating the stomach while aiding digestion. Crushed seeds boiled with roots of *Piper capensis* and drunk as an aphrodisiac. Roots pain-killers, sedative, antivenomous, antidote. Magic, ritual.)

English: wild cardamom

in Tanzania: msamaka, mtuguu, mtunguru, tunguru

Aframomum alboviolaceum (Ridl.) K. Schum. (*Aframomum bauriculatum* K. Schum.; *Aframomum candidum* Gagnep.; *Aframomum latifolium* K. Schum.; *Aframomum macrospermum* (Sm.) Burkill; *Aframomum stipulatum* (Gagnep.) K. Schum.; *Amomum alboviolaceum* Ridl.; *Amomum bitacoum* Gagnep.; *Amomum latifolium* (Afzel.) K. Schum.; *Amomum latifolium* Afzel., nom. illeg.; *Amomum macrospermum* Sm.; *Amomum stipulatum* Gagnep.; *Cardamomum latifolium* Kuntze; *Ceratanthera beaumezii* Heckel)

Tropical Africa. Perennial herb, leafy, lower lip orange, root aromatic, seed arils sweet-sour

See *Journal of Botany, British and Foreign* 25: 130. 1887, *Revis. Gen. Pl.* 2: 686. 1891 and *Bull. Soc. Bot. France* 50: 260. 1903, *Pflanzenr.*, IV, 46: 207, 209, 220. 1904, *Bull. Soc. Bot. France* 51: 164. 1904, *Bull. Soc. Bot. France* 53: 351. 1906, *Bull. Misc. Inform. Kew* 1930: 37. 1930, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2). MIM, Deurne. 1995 [as *Aframomum macrospermum*.], Figueiredo, E. & Smith, G.F. *Plants of Angola. Strelitzia* 22: 1–279. National Botanical Institute, Pretoria. 2008

(Rhizome anthelmintic.)

Aframomum angustifolium (Sonn.) K. Schum. (*Aframomum baumanii* K. Schum.; *Aframomum baumannii* K. Schum.; *Aframomum hanburyi* K. Schum.; *Aframomum sanguineum* (K. Schum.) K. Tropical Africa, Angola. Herb, flowers clustered at the base or on short peduncles, waxy red perianth, yellowish labelum, red edible fruits in erect bunches, flowers fodder for gorilla, in moist shady places

See *Voyage aux Indes Orientales* 3: 276. 1782, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 129, t 5. 1854 and *Journal of Natural Products* 50: 230–231. 1987, *Journal of Food Technology in Africa* 6(4): 135–137. 2001, *Tetrahedron* 58(14): 2725–2728. 2002, *Journal of Food, Agriculture & Environment* 2(1): 128–131. 2004, *Phytochemistry* 67(5): 433–438. 2006

(Leaves antioxidant, antiplasmodial, antileishmanial, antifungal, astringent, for dysentery. Leaves and roots vermifuge, used for piles. Roots/rhizomes and seeds vermifuge, antifungal, analgesic, antiseptic, febrifuge. Veterinary medicine.)

in English: bastard cardamom, bastard melegueta, corn-leaved melegueta

in Central African Republic: doko

in Fernando Po: barsalo

in Ghana: sensam

in Ivory Coast: alosso, tohohuin, tsugbun

in Nigeria: aburo-wawa, uruanruon

in Togo: kébeleka

in Yoruba: oburo wawa

Aframomum elliotii (Baker) K. Schum. (*Amomum elliotii* Baker)

W. Trop. Africa, Guinea. Herb, a cluster of vanilla-scented flowers, inflorescences from the base of the stem, petaloid staminode white, red shining fruits, in swamp forest, wet grassland, in shady woods

See *Fl. Trop. Afr.* 7: 309. 1898 and *Pflanzenr.*, IV, 46: 209, 217. 1904

(Leaves and stem pounded, poultice effective for measles.)

Aframomum exscapum (Sims) Hepper (*Aframomum cuspidatum* (Gagnep.) K. Schum.; *Aframomum leonense* K. Schum.; *Amomum cuspidatum* Gagnep.; *Amomum exscapum* Sims; *Amomum granum-paradisi* L.)

W. Trop. Africa. Herb, leafy stems, leaves borne on the upper part, flowers white flushed with pink, deeply corrugated fruits red pubescent, seeds shiny black pungent, fruit eaten by monkeys, in forest

See *Bull. Soc. Bot. France* 49: 253. 1903, *Kew Bulletin* 21: 133. 1967, *Flavour Fragrance J.* 21(6): 902–905. 2006

(Fruit for pulmonary troubles; roots laxative, purgative and anthelmintic, vermifuge.)

in Burkina Faso: blaéblou, dadigogo, dia lélé, do, gogoué, yaya
in Guinea: dadi-gogo, gogo, gogué

in Ivory Coast: blaéblou, dadigogo, dia lélé, do, gogoué, yaya
in Sierra Leone: e-pompolo, e-pompolo-ma-seba, kponi, kpowa woni, ngolo woni, ngunde woni, ponugye

in West Africa: dadigogo, diabili, gogo, niamakou

Aframomum giganteum (Oliver & Hanbury) K. Schum. (*Amomum giganteum* Oliver & Hanbury; *Cardamomum giganteum* Oliver & Hanbury) Kuntze)

Tropical Africa. Herb, rhizomatous, flowers pink purple, grooved edible fruits

See *Journal of the Linnean Society, Botany* 7: 109. 1864, *Revisio Generum Plantarum* 2: 686. 1891

(Fruits for cough, juice fruit applied directly to open wounds and sores.)

in Congo: mesombo, mosombo, n'tongo ya mesombo, otongo a mosombo

Aframomum leptolepis (K. Schum.) K. Schum. (*Aframomum dalzielii* Hutch.; *Aframomum leptolepis* K. Schum.; *Amomum leptolepis* K. Schum.)

Cameroon. Herb, rhizomatous, edible sour-sweet fruit

See *Bot. Jahrb. Syst.* 15: 414. 1892 and *Pflanzenr.*, IV, 46: 216. 1904, *Fl. W. Trop. Afr.* 2: 330. 1936

(For stomachache.)

Aframomum mala (K. Schum.) K. Schum. (*Amomum mala* K. Schum.)

Tanzania. Herb

See *Die Pflanzenwelt Ost-Afrikas* C: 149. 1895 and *Das Pflanzenreich* 46: 218. 1904

(Roots pain-killers, sedative, antidote, aromatic, carminative, relieving flatulence, and stimulating the stomach while aiding digestion. Crushed seeds boiled with roots of *Piper capensis* and drunk as an aphrodisiac. Magic, ritual.)

English: wild cardamom

in Tanzania: msamaka, mtuguu, mtunguru, tunguru

Aframomum melegueta K. Schum. (*Aframomum grana-paradisi* (L.) K. Schum.; *Aframomum melegueta* (Roscoe) K. Schum.; *Aframomum meleguetella* K. Schum.; *Alexis grandiflora* (Sm.) Kuntze; *Cardamomum grandiflorum* (Sm.) Kuntze; *Cardamomum grandiflorum* Kuntze; *Torymenes officinalis* Salisb., nom. superfl.)

W. Trop. Africa to Uganda. Herb, aromatic plant, short, rhizome geophyte scented flowers pinkish-orange, edible spicy fleshy indehiscent fruits, seed aromatic and pungent

See *Revis. Gen. Pl.* 2: 686–687. 1891 and *Pflanzenr.*, IV, 46: 205, 213. 1904, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2). MIM, Deurne. 1995 [as *Aframomum grana-paradisi*.], *Scripta Botanica Belgica* 35: 1–438. 2006

(Masticatory, sedative, antiinflammatory, antibacterial, purgative, galactagogue, anthelmintic, hemostatic, carminative, antispasmodic, cough sedative, pectoral. Fresh fruit as an aphrodisiac. Leaf used for measles and externally for leprosy. Seeds chewed or in infusion for indigestion, stomachache, colic, fever, cold; seed made into a paste applied into the vagina as a bactericide. Veterinary medicine.)

in English: alligator pepper, grains of paradise, Guinea grain, Guinea pepper, melegueta pepper

in China: hsi sha tou

Common African names: apokuo, awusa, chilla, dzekuli, ehie ado, gyan'damar yaji, ikehegh, mpoma, ntuen, ose oji, ose okwa

in Angola: dongos do Congo, iasasama, iaxixima mukanu, ndongo ia kongo, ndongua ia kongo, ndungu ia kongo

in Benin: ata, ataare, ataare merin, atakoun, atanre, atayéé, bohangossa, takun, yiro, yiro guirou

in Congo: andou mokouli, graines de paradis, maniguette, mebongabonga, mobongabonga, ndoango ya banganga, ndongo, ndunga za nzo, nzan za nougou, nzo za nougou, poivre de Maniguette, tosekele

in Ghana: apokuo, efom wisa, megbe-dogboe (= never lacking for the sick), wisa

in Ivory Coast: niamakou, niangboulo, saâ

in Mali: maniguette, niamako bara

in Nigeria: ata, ata ire, atare, chitta, ehie ado, ehin-edo, erhie, obro, oburo, oburu, oburu-duru, oji, ose oji

in Sierra Leone: kije, kponi

in Togo: abalatchang'ái, ayre, bidjakogoro, dikambidjumdi, djomédiag, owlavu

in Yoruba: abeokuta, aburo, ata, ata ire, ataare, ataye, ataye ijobi, ataye isa, ataye liya, ataye rere, etaluya, obro, oburo

Aframomum sulcatum (Oliv. & D. Hanb. ex Baker) K. Schum. (*Amomum sulcatum* Oliv. & Hanb. ex Baker)

Trop. Africa.

See *Tetrahedron* 58(14): 2725–2728. 2002

(Roots/rhizomes depurative, diuretic, anthelmintic, abortifacient, febrifuge. Veterinary medicine, anthelmintic.)

in Guinea: gogo, gogué, tohin, yaya

Aframomum zambesiaceum (Baker) K. Schum. (*Aframomum chlamydanthum* Loes. & Mildbr.; *Aframomum keniense* R.E. Fr.; *Amomum zambesiaceum* Baker)

Trop. Africa.

See *Fl. Trop. Afr.* 7: 309. 1898 and *Notizbl. Bot. Gart. Berlin-Dahlem* 8: 665. 1924, *Notizbl. Bot. Gart. Berlin-Dahlem* 10: 706. 1929, *Phytochemistry* 67(5): 433–438. 2006

(Antioxidant, antiplasmodial.)

Afrocanthium (Bridson) Lantz & B. Bremer Rubiaceae

See *Fl. Trop. E. Africa, Rub.* (Part 3) 864. 1991, *Botanical Journal of the Linnean Society* 146(3): 278. 2004.

Afrocanthium keniense (Bullock) Lantz (*Canthium keniense* Bullock)

Kenya. Shrub or tree

See *Bull. Misc. Inform. Kew* 1932: 377. 1932, *Bot. J. Linn. Soc.* 146: 278. 2004

(Leaves and roots antiinflammatory, stomachic, for gastrointestinal disorders.)

Afrocanthium lactescens (Hiern) Lantz (*Canthium lactescens* Hiern; *Canthium lactescens* var. *grandifolium* S. Moore; *Canthium randii* S. Moore; *Canthium umbrosum* Hiern; *Plectronia lactescens* (Hiern) K. Schum.; *Plectronia psychotrioides* K. Schum. ex De Wild.; *Plectronia randii* (S. Moore) Eyles; *Plectronia umbrosa* (Hiern) K. Schum.)

West Africa, Ethiopia to Zimbabwe. Shrub or tree, short leafy shoots with only one pair of leaves, yellow gum from damaged branches, sweet smelling cream-yellow flowers, asymmetric oval fruit strongly 2-lobed, small fleshy sweet edible fruits, in dry savanna grassland, in riverine bushland, on rocky hillsides, often associated with *Acacia tortilis*, in well-drained sandy loams

See *Mantissa Plantarum* 1: 16. 1767, *Just's Bot. Jahresber.* 26(1): 393. 1898 and *Botanischer Jahresbericht* 1898 (1): 393. 1900, *J. Linn. Soc., Bot.* 37: 161. 1905, *Trans. Roy. Soc. South Africa* 5: 493. 1916, *Botanical Journal of the Linnean Society* 146(3): 278. 2004

(Roots pounded and soaked in warm water, decoction drunk as a purgative.)

in Kenya: ptere, putere, putoro

in Tanzania: fraaki, kiviruviru, mapendo, msangati, olkumi, tlerghw

Afrocanthium pseudorandii (Bridson) Lantz (*Canthium pseudorandii* Bridson; *Canthium pseudosetiflorum* Bridson)

S. Trop. Africa to Botswana. Edible fruits

See *Kew Bull.* 47: 385. 1992, *Bot. J. Linn. Soc.* 146(3): 278. 2004

(A boiled root extract added to children's milk as a tonic.)

in Kenya: emidakan, etoukoroe, ladana, molkotwo, natana

Afrocarpus (Buchholz & N. Gray) C.N. Page Podocarpaceae

From Africa and *Podocarpus* L'Hérit. ex Pers. The nomenclature is confusing and in need of clarification, some authors consider *Afrocarpus* as comprising only a single, variable species, recently separated from *Podocarpus*, see *Journal of the Arnold Arboretum* 29(1): 57. 1948, *Trav. Lab. Forest. Toulouse* tome 2, sect. 1, vol. 1(2), chap. 20: 113, 122. 1974, *Blumea* 32: 209–211. 1987, *Notes from the Royal Botanic Garden, Edinburgh* 45(2): 377–395. 1989 [dt. 1988, issued 22 Feb 1989], *Botanical Journal of the Linnean Society* 112(1): 59–74. 1993, *Bothalia* 25(2): 233–236. 1995, *South African Journal of Science* 100: 629–632. 2004.

Afrocarpus falcatus (Thunb.) C.N. Page (*Afrocarpus falcata* (Thunb.) Gaussen; *Decussocarpus falcatus* (Thunb.) de Laub.; *Decussocarpus fleuryi* (Hickel) de Laub.;

Nageia falcata (Thunb.) Carrière; *Nageia falcata* (Thunb.) Kuntze; *Podocarpus falcatus* (Thunb.) R. Br. ex Mirbel; *Podocarpus falcatus* (Thunb.) Endl.; *Podocarpus fleuryi* Hickel; *Podocarpus gracilior* sensu Burtt Davy, non Pilg.; *Podocarpus gracillimus* Stapf; *Taxus falcata* Thunb.)

East Africa. Evergreen tree, straight, bark flaking, narrow leaves shiny, 1–3 male axillary catkins, hard fruit rounded, edible oil from the seeds, inner flesh eaten by monkeys and birds, resinous ripe seeds edible, in upland rain forest, forest, often associated with *Juniperus*, *Afrocarpus falcatus* is included in the IUCN Red List as vulnerable

See *Species Plantarum* 2: 1040. 1753, *De Fructibus et Seminibus Plantarum*... 1: 191. 1788, *Prodromus Plantarum Capensium*, ... 117. 1800, *Syn. Pl.* 2(2): 580. 1807, *Mémoires du Muséum d'Histoire Naturelle* 13: 75. 1825, *Synopsis Coniferarum* 219. 1847, *Revue Horticole* 40: 370. 1869 and *Bulletin de la Société Dendrologique de France* 76: 75. 1930, *Journal of the Arnold Arboretum* 50: 340, 355, 359. 1969, *Cellular and Molecular Life Sciences* 31(2): 137–138. 1975, *Biochemical Systematics and Ecology* 27(6): 613–622. 1999

(An infusion from the bark to treat stomachache, applied to itching rash. Seed oil in the treatment of gonorrhoea. Leaves antileukemic.)

in English: African fern pine, bastard yellowwood, common yellowwood, East African yellowwood, Outeniqua yellowwood, podo, smooth-barked yellowwood, weeping yew, yellowwood

in East Africa: muthengera, mvavavi, ol-pirripirri

in Southern Africa: Outeniekwageelhout, geelhout, nikolander, kolander, nietlander; umSonti (Swazi); mogobagoba (North Sotho); umSonti, uNomphumelo, umHlenhlane, umGeya, umKhandangoma, umPume (Zulu); umKhoba, umKoleya, umGeya (Xhosa)

in Nigeria: adja, adya, aja, akpalata, akpasi, aligna, alinyan, angwa, apa, aparata, arinyan, ariyan, auwe, avum, ayinbukbo, bachi, fasa-daga, gaiyi, gayio, gayo, gayohi, gayoje, iyiasé, kawo, kawoje, kemkwa-epe, kwao, lingue, lingui, mbarakun, mbokora, mboroka, odja, odo-niyan, oja, talia, upa, utsabo, yasa

in Senegal: bu lèv, daga, lengé, lenngeyi, lingue, linke, fok, folk, ngolôgdôg, ngot-ongdong

in Sierra Leone: gbende, ka-kontha, konta, kpende, kpende-deh, kpende-deli, lenke, senge-na, sengege, tena

in Togo: apaka, digbande, haku, ikpami, kebarre, kpa-kpa, ligbal, palga, wedde, welu

in Uganda: azza, beyo, meli

in W. Africa: cejige, cenge, danga, kacinge, kibi, lenge, linge, linke, pettohi, ticige, tiinge

in Yoruba: ako apa, apa, bilinga

in Zaire: bamvutule, beyo, kpawe, pai, supa

Afzelia quanzensis Welw. (*Afrazelia quanzensis* (Welw.) Pierre; *Afzelia attenuata* Klotzsch; *Afzelia cuanzensis* sensu auct.; *Afzelia petersiana* Klotzsch; *Intsia quanzensis* Kuntze ex. Engl.; *Intsia quanzensis* (Welw.) Kuntze; *Pahudia attenuata* (Klotzsch) Prain; *Pahudia quanzensis* (Welw.) Prain) (the specific name comes from the African river Quanza. In Nigeria the seeds are called *enyin mbukpo*, 'falcon eyes'. The Zulu name, for both the tree and the seeds, is *inKehli*, which means 'the betrothed': the hard, shiny black seed with its red aril resembles the head of a girl wearing the scarlet head-dress which is traditionally carried during the engagement period.)

South Africa, Angola. Perennial non-climbing tree, deep-rooted, flowers sweet-scented borne in erect clusters, black

seeds with scarlet arils, leaves eaten as a vegetable, bark and leaves eaten by elephants, seeds eaten by baboons, monkeys

See *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 21: 253–277. 1987, *Journal of Ethnopharmacology* 99: 327–336. 2005, *Journal of Ethnopharmacology* 103: 350–356. 2006

(Root infusion antiinflammatory, a remedy for bilharzia, chest pains, kidney problems, rheumatism, arthritis, gonorrhoea and eye complaints; fresh roots chewed for snakebite and as an aphrodisiac. Fruit infusion for mastitis. Bark or roots decoction for snakebite; stem bark decoction antitrypanosomal, antifungal; a mixture of pounded bark and python fat applied on eczematous spots of the skin. Magic, ritual, good luck charm.)

in English: lucky bean, lucky bean tree, mahogany bean, mahogany bean tree, pod mahogany, Rhodesian mahogany

in Angola: mbanje, muala-to, mubala, mukungu, mupazo, muvala, muvanje, omubantya, omulatobo, omunaki, ovala, pupopo, uvala

in Kenya: mkongo, mkumbakusi, mwamba, yam-ed, yamicha

in Malawi: ipapa, mkongomwa, mngongomwa, mpapa, mpa-padende mkongwe, msambamfumu, mtontho

in Mali: dankan, lingué

in N. Rhodesia: mupapa, muvulatowo, mwala

in Somalia: atio collo, dabal, dhambal, ged bured

in Southern Africa: peulmahonie, chemnen; inKehli, inKehli, umDlavusa, umHlakuva, umHlavusi, umShamfuthi, inKele (Zulu); umKholikholi (Swazi); nxenhe (Eastern Transvaal); mutokota (Venda); muwande (Subya: Botswana, eastern Caprivi); mukamba (Sarwa - Bushman: Kalahari bush)

in Tanzania: maharongome, mambakofi, mbamba-kofi, mbambakofi, mbarika, mbembakofi, mkomge, mkongo, mkongodeka, mkumbakusi

in Zaire: kibalebale, kipapa, mupapa

in Zambia: mupapa

in Zimbabwe: umKamba, umGampa, muKogoma, muGori-hondo, muNgoriondo, muSikosa, muWande, iHlene, muBapi, muGogoma, muKamba, muSikoza (Shona)

Afzelia xylocarpa (Kurz) Craib (*Afzelia cochinchinensis* (Pierre) Léon.; *Afzelia siamica* Craib; *Pahudia cochinchinensis* Pierre; *Pahudia cochinchinensis* Pierre ex Laness.; *Pahudia xylocarpa* Kurz)

Laos, Cambodia. Perennial non-climbing tree, broad spreading crown, leathery leaves, tough persistent pods

See *Flora van Nederlandsch Indië* 1: 85. 1855, *Forest Flora of British Burma* 1: 413. 1877, *Flore Forestière de la Cochinchine* 5: pl. 386A. 1899 and *Bulletin of Miscellaneous Information Kew* 1912(6): 267. 1912, *Reinwardtia* 1: 64. 1950

(Seeds ground up and used for relieving stomachache, toothaches and eye diseases.)

in Cambodia: beng

in China: mian qie

in Laos: mai kha, mai te kha

in Thailand: mai makha, tehnama

Agalinis Raf. Orobanchaceae (Scrophulariaceae)

See C.S. Rafinesque, in *New Fl. N. Am.* 2: 61. 1836 [1837] and E.D. Merrill (1876–1956), *Index Rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 213. Jamaica Plain, Massachusetts, USA 1949.

Agalinis tenuifolia (Vahl) Raf. (*Gerardia tenuifolia* Vahl; *Gerardia tenuifolia* Vahl subsp. *typica* (Vahl) Pennell, nom. inval.; *Gerardia tenuifolia* Vahl var. *humilis* Benth.; *Gerardia tenuifolia* Vahl var. *typica* Pennell)

North America.

See *Symbolae Botanicae*, ... 3: 79. 1794, *Compan. Bot. Mag.* 1: 174. 1836, *New Flora and Botany of North America* ... 2: 64. 1836[1837] and *Academy of natural sciences of Philadelphia monographs* 1: 460. 1935, *Bol. Soc. Brot.*, sér. 2, 53: 793–807. 1981, *Canad. J. Bot.* 62: 454–456. 1984

(Infusion used for diarrhea.)

in English: slenderleaf false foxglove

Aganope Miq. Fabaceae (Millettieae)

From the Greek *aganos* ‘gentle, loving, mild’, see *Flora van Nederlandsch Indië* 1(1): 151. 1855 and *Bull. Bot. Surv. India* 3: 175–200. 1961, *Kew Bull.* 25(2): 259–273. 1971, *A Revised Handbook of the Flora of Ceylon* 7: 108–381. 1991, *Rheede* 2: 62–63. 1992.

Aganope heptaphylla (L.) Polhill (*Deguelia sinuata* Taub.; *Deguelia sinuata* (Thwaites) Taub.; *Derris diadelpha* Merr.; *Derris diadelpha* (Blanco) Merr.; *Derris exserta* Craib; *Derris heptaphylla* Merr.; *Derris heptaphylla* (L.) Merr.; *Derris macroloba* Miq.; *Derris sinuata* Thwaites; *Derris sinuata* Benth. ex Thwaites; *Derris sinuata* Prain; *Pterocarpus diadelphous* Blanco; *Pterocarpus diadelphus* Blanco; *Sophora heptaphylla* L.; *Sophora heptaphylla* Wight; *Sophora heptaphylla* Arn.)

SE Asia. Perennial non-climbing shrub, straggling

See *Species Plantarum* 1: 373. 1753, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 18(1): 328. 1836, *Fl. Filip.* [F.M. (Fruit decoction taken for dysentery and stomachache.)

in China: mi zhui hua yu teng

in India: hulhu

Aganosma (Blume) G. Don Apocynaceae

From the Greek *aganos* ‘gentle, loving, mild’ and *osme* ‘a scent, perfume, fragrance’, referring to the flowers, see *The Civil and Natural History of Jamaica in Three Parts* 182. 1756, *Bijdragen tot de flora van Nederlandsch Indië* 1040. 1826, *A General History of the Dichlamydeous Plants* 4: 69, 77. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 433. 1844 and *Bulletin de la Société Botanique de France* 96(5–6): 215–216. 1948.

Aganosma calycina A. DC.

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 432. 1844

(Used in Ayurveda.)

in India: malati, palamalle

Aganosma caryophyllata G. Don (*Aganosma blumei* Wight; *Aganosma dichotoma* K. Schum.; *Aganosma dichotoma* (Roth) K. Schum.; *Echites blumei* Voigt; *Echites dichotomus* Roth, nom. illeg.; *Echites caryophyllatus* Blume, nom. illeg.)

India.

See *A General History of the Dichlamydeous Plants* 4: 77. 1837

(Used in Ayurveda. Leaves and flowers for pain in menstruation, toothache, earache.)

in India: asanamallika, asphota, bhadramunja, bhadravalli, cerupaval, cherupaval, chitraleena balli, eri yadalalli, gudapalathige, gudapalatige, jati, kavettavalli, kayerravalli, kemettivalli, kemmatti balli, maalathi, maalathi latha, maalathi lathe, malajiti, malathi lathe, malati, malatilata, maloti, mogari, paalamalle, pala malle, palamalle, sumana, vasanti, visalyakrit, yuvati

in Tibet: sna ma i me tog, srid sin, sri sin gi me tog

Aganosma cymosa (Roxburgh) G. Don (*Aganosma cymosa* var. *fulva* Craib; *Aganosma cymosa* var. *glabra* A. DC.; *Aganosma cymosa* var. *lanceolata* Hook. f.; *Aganosma harmandiana* Pierre ex Spire & A. Spire; *Aganosma harmandiana* Pierre; *Aganosma harmandiana* Pierre & Tsiang; *Echites cymosus* Roxb.)

India.

See *Flora Indica*; or, descriptions of Indian Plants 2: 16–17. 1832, *A General History of the Dichlamydeous Plants* 4: 77. 1837 and *Pharmaceutical Biology* 29(4): 273–280. 1991, *Journal of Herbs, Spices & Medicinal Plants* 2(4): 45–100. 1995

(Antisnake venom.)

in English: Harmand aganosma

in China: yun nan xiang hua teng

in India: anaikaita, anakkayerram, chidaralanabilu, chithra leena balli, citrelinaballi, manimalaankodi, sellakkodi, tsjeria-pu-pal-valli

Aganosma dichotoma (Roth) K. Schum. (*Echites dichotomus* Roth)

India. Evergreen woody climbers

See *Die Natürlichen Pflanzenfamilien* 4(2): 173. 1895

(Used in Ayurveda. Plant emetic, anthelmintic, useful in leprosy, skin diseases, ulcers, inflammations, bronchitis. Leaves cure biliousness and blood disorders. Flowers in the treatment of diseases of the eyes.)

in India: cherupaval, chitraleena balli, gudapalathige, gudapalatige, jati, kavettavalli, kemmatti balli, maalathi, maalathi latha, maalathi lathe, malajiti, malathi lathe, malati, malatilata, maloti, paalamalle, palamalle, sumana, vasanti, yuvati

Agapanthus L'Hérit. Alliaceae (Amaryllidaceae, Liliaceae)

in Tibet: sridsin, snama i me tog, srisin gi me tog

Aganosma marginata (Roxb.) G. Don (*Aganosma acuminata* (Roxb.) G. Don; *Amphineurion acuminatum* (Roxb.) Pichon; *Echites acuminatus* Roxb.; *Echites marginatus* Roxb.)

India. Climber, milky yellowish juice, oblong-acute leaves, small white flowers, cylindrical follicles

See *Flora Indica*; or, descriptions of Indian Plants 2: 15–16. 1832, *A General History of the Dichlamydeous Plants* 4: 77. 1837, *Flora de Filipinas* 2(13A): 131. 1880 and *Bulletin de la Société Botanique de France* 95(5–6): 215. 1948

(Roots diuretic, tonic, a decoction for urinary troubles, fever and as emmenagogue.)

in China: xiang hua teng

in India: ka-aungnwe

Aganosma wallichii G. Don (*Aganosma blumei* A. DC.; *Aganosma calycina* A. DC.; *Echites calycinus* Wall., nom. inval.)

Myanmar to W. Malesia. White fragrant flowers

See *Gen. Hist.* 4: 77. 1837

(Used in Ayurveda.)

in India: malati, palamalle

***Agapanthus* L'Hérit. Alliaceae (Amaryllidaceae, Liliaceae)**

Greek *agape* 'love' (*agapeo* 'to be well-contented with', *agapetos* 'beloved, desirable') and *anthos* 'a flower'; in Sanskrit *bhag* 'to love', *bhaga* 'love', in Greek the root is inverted: *gap* instead of *bhag*, *bhakh*.

Agapanthus africanus (L.) Hoffmanns. (*Abumon africanum* (L.) Britton; *Agapanthus minor* Lodd.; *Agapanthus tuberosus* L. ex DC.; *Agapanthus umbellatus* L'Hér., nom. illeg. superfl.; *Crinum africanum* L.; *Crinum floridum* Salisb.; *Mauhlia africana* (L.) Dahl; *Mauhlia linearis* Thunb.; *Mauhlia umbellata* (L'Hér.) Thunb. ex Schult. & Schult.f.; *Tulbaghia africana* (L.) Kuntze; *Tulbaghia africana* var. *heisteri* (Fabr.) Kuntze; *Tulbaghia heisteri* Fabr.; *Tulbaghia minor* (Lodd.) Kuntze)

South Africa. Evergreen, thick fleshy roots, leaves strap-like, deep blue flowers, perianth segments thick

See *Species Plantarum* 1: 291–292. 1753, *Sertum Anglicum* 10. 1788 [1789], *Verzeichniss der Pflanzenkulturen* 35. 1824, *Revis. Gen. Pl.* 2: 718. 1891, *Revis. Gen. Pl.* 3(3): 317. 1898 and *Fl. Bermuda* 72. 1918, *Journal of Ethnopharmacology* 55(3): 185–191. 1997, *Journal of Ethnopharmacology* 66(3): 257–262. 1999, *Life Sciences* 67(11): 1381–1388. 2000

(Suspected of causing haemolytic poisoning in humans, and the sap causes severe ulceration of the mouth. Oxytotic,

uterotonic, stomachic, used during pregnancy and childbirth, to treat pregnancy-related ailments and to augment labor. Juice from the rhizome antifungal.)

in English: Africa lily, African lily, blue African lily, lily of the Nile

in Japan: murasaki-kunshi-ran

in Okinawa: hyaku-shirin

in South Africa: bloulelie; uBani (Zulu)

Agapanthus campanulatus F.M. Leight.

South Africa. Deciduous, clump-forming, light green strap-like leaves, pale to deep blue flowers

See *S. African Gard.* 24: 71, 82. 1934, *J. S. African Bot. Suppl.* 4: 29, descr. emend. 1965

(Leaves used to wash young babies. Crushed roots used to bathe newborn babies to make them strong and to heal body rash, also administered to infants as a general tonic and to women with menstrual pains. Magic, a protective charm against lightning.)

in English: agapanthus, bell agapanthus

in South Africa: bloulelie, leta la phofu, leta-laphofu, ubani, ugebeleweni

Agapanthus praecox Willd. (*Tulbaghia praecox* (Willd.) Kuntze; *Tulbaghia praecox* Kuntze)

South Africa. Evergreen, rhizomatous roots, 6–20 leaves per individual plant, leaves strap-like, umbellate inflorescence, an extremely variable species

See *Sertum Anglicum* 10. 1788 [1789], *Enumeratio Plantarum Horti Botanici Berolinensis, ...* [Willdenow] 1: 353. 1809, *Revis. Gen. Pl.* 2: 718. 1891 and *Plant Systematics and Evolution* 241: 115–123. 2003

(Antiinflammatory, anti-edema, antitussive, immunoregulatory, uterotonic. Suspected of causing haemolytic poisoning in humans, and the sap causes severe ulceration of the mouth. Boiled roots to sheep and goats to treat diarrhea.)

in English: African lily, blue lily, common agapanthus, lily of the Nile

in South Africa: bloulelie, agapant (Afr.), isicakathi (Xhosa), uBani (Zulu), umkhondo

Agapanthus praecox Willd. subsp. ***orientalis*** (F.M. Leight.) F.M. Leight. (*Agapanthus orientalis* F.M. Leight.; *Agapanthus umbellatus* var. *maximus* Lindl.)

South Africa. Evergreen, stem thick and short, fleshy roots, up to 20 arching leaves per plant, dense umbellate inflorescence, open-faced flowers pale to medium blue or pure white, short perianth segments, forming thick clumps

See *Sertum Anglicum* 10. 1788 [1789], *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 353. 1809 and *Journal of*

South African Botany 5(2): 57–58. 1939, *Journal of South African Botany*: Supplementary Volume 4: 21–22, t. 4, f. 8. 1965, Francis, D.F. and Southcott, R.V. *Plants Harmful to Man in Australia* (Miscellaneous Bulletin No. 1, Botanic Garden Adelaide). Adelaide. 1967, *Flora Mesoamericana* 6: 31. 1994, *Plant Mol. Biol.* 58(3): 435–45. 2005

(The sticky acrid sap in the leaves can cause severe ulceration and pain of the mouth if eaten; irritation of skin and eyes from cell sap. Antiinflammatory, anti-edema, antitussive, immunoregulatory, uterotonic. Suspected of causing haemolytic poisoning in humans.)

in English: African blue lily, Agapanthus

Agarista D. Don ex G. Don Ericaceae

Cleisthenes (Kleisthenes), Athenian statesman, son of Megacles and Agariste; see *A General History of the Dichlamydeous Plants* 3: 788, 837–838. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(2): 578, 602–603. 1839, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 586. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 186. 1889, *Die Natürlichen Pflanzenfamilien* 37[IV,1]: 42. 1889 and *J. Arnold Arbor.* 65(3): 274. 1984, Roger Lavergne, *Tisaneurs et Plantes Medicinales Indigènes de l'île de La Réunion.* 263–266. Editions Orphie, Livry Gargan 1990, *Fl. Neotrop.* 66: 222–350. 1995.

Agarista populifolia (Lam.) Judd (*Andromeda populifolia* Lam.; *Leucothoe populifolia* (Lam.) Dippel; *Lyonia populifolia* (Lam.) K. Koch)

North America. Evergreen shrub, leaves alternate simple leathery toothed margined, small urn-shaped white flowers in axillary clusters, fruit a capsule.

See *Encyclopédie Méthodique, Botanique* 1(1): 159. 1783, *Dendrologie* 2(1): 123. 1872, *Handbuch der Laubholzkunde* 1: 356. 1889

(Highly toxic, leaves poisonous, may be fatal if eaten.)

in English: Florida leucothoe

Agastache Clayton ex Gronovius Lamiaceae (Labiatae)

Greek *agan* ‘very much’ and *stachys* ‘spike of wheat’, referring to the numerous spikes of flowers, see *Flora Virginica* 88. 1762, *Fl. Peruv. Prodr.* 86, t. 17. 1794, *Revisio Generum Plantarum* 2: 511. 1891 and *Syst. Bot. Monogr.* 15: 30, 41, 47, 68, 78. 1987, *Bot. Zhurn.* (Moscow & Leningrad) 78(2): 113. 1993.

Agastache foeniculum Kuntze (*Agastache anethiodora* (Nutt.) Britton; *Agastache anethiodora* Britton & A. Brown; *Agastache anethiodora* Britton; *Agastache foeniculum* (Pursh) Kuntze)

North America. Perennial herb, subshrub, erect, aromatic, leaves and flowers raw or cooked

See *Revisio Generum Plantarum* 2: 511. 1891, *Ill. Fl. N. U.S.* (Britton & Brown) 3: 85. 1898

(Antifungal, analgesic, antiviral, diaphoretic, antihemorrhagic, pectoral, febrifuge, leaves and roots infusion used to treat fevers, colds and coughs, sores of the *Herpes simplex* virus, stomach disorders, headache and angina; a poultice of leaves and stems used to treat burns. Ceremonial, and a charm for protection.)

in English: anise hyssop, blue giant hyssop, fennel giant hyssop, fragrant giant hyssop, giant hyssop, golden anise hyssop, lavender giant hyssop, lavender hyssop, licorice mint, wonder honey plant

Agastache mexicana (Kunth) Lint & Epling (*Agastache mexicana* Lint & Epling; *Agastache mexicana* (Kunth) H.P. Kelsey & Dayton; *Brittonastrum mexicanum* (Kunth) Briq.; *Cedronella mexicana* (Kunth) Benth.; *Dracocephalum mexicanum* Kunth)

Mexico. Herb, erect, purple red flowers

See *Nov. Gen. Sp.* [H.B.K.] 2: 322 (-323) [quarto], 259 (-260) [folio], t. 160. 1818 and *Amer. Midl. Naturalist* 33: 227. 1945

(Flowers and leaves infusion sedative, nervine, relaxant, to treat epilepsy, earache, high blood pressure.)

in English: giant hyssop, Mexican giant hyssop

in Mexico: toronjil

Agastache mexicana (Kunth) Lint & Epling subsp. *mexicana* (*Brittonastrum betonicoides* (Lindl.) Briq.; *Gardoquia betonicoides* Lindl.)

Mexico. Herb, erect, purple red flowers

See *Edwards's Bot. Reg.* 24(Misc.): 86. 1838 and *Annuaire Conserv. Jard. Bot. Genève* 5: 160. 1902, *Amer. Midl. Naturalist* 33: 227. 1945

(Flowers and leaves infusion sedative, nervine, relaxant, to treat epilepsy, headache, high blood pressure.)

in English: giant hyssop, Mexican giant hyssop

in Mexico: toroji, toronjil

Agastache nepetoides Kuntze (*Agastache nepetodes* Kuntze; *Agastache nepetoides* Shafer; *Agastache nepetoides* (L.) Kuntze)

North America. Perennial herb, subshrub

See *Revisio Generum Plantarum* 2: 511. 1891

(Plant infusion used as wash for poison ivy and itch.)

in English: catnip, catnip giant hyssop, giant hyssop, yellow giant hyssop

Agastache pallidiflora (A. Heller) Rydb. var. *neomexicana* (Briq.) R.W. Sanders (*Agastache neomexicana* (Briq.) Standl.; *Agastache pallidiflora* subsp. *neomexicana* (Briq.) Lint & Epling; *Agastache pallidiflora* (A. Heller) Rydb. var. *neomexicana* (Briq.) R.W. Sanders; *Brittonastrum neomexicanum* Briq.)

North America. Herb

See *Die Natürlichen Pflanzenfamilien* IV. 3a: 234. 1896 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 6: 158. 1902, *Bulletin of the Torrey Botanical Club* 33(3): 150. 1906, *American Midland Naturalist* 33(1): 220. 1945, *Brittonia* 33(2): 195. 1981, *Systematic Botany Monographs* 15: 1–92. 1987

(Febrifuge, used for cough. Ceremonial, used to protect from witches.)

in English: Bill Williams Mountain giant hyssop, New Mexico giant hyssop

Agastache rugosa (Fischer et C.A. Meyer) O. Kuntze (*Agastache rugosa* Kuntze; *Elsholtzia monostachya* H. Léveillé & Vaniot; *Lophanthus argyi* H. Léveillé; *Lophanthus formosanus* Hayata; *Lophanthus rugosus* Fischer & C.A. Meyer)

E. Asia, North America. Herb, coarse, robust, fragrant, angular, leaves with many oil-glands on upper surface, flowers purple, inflorescence a dense spike, bee forage, a source of an essential oil

See *Index Seminum* [St. Petersburg] 1: 31. 1835, *Revisio Generum Plantarum* 2: 511. 1891 and *Journal of Hokkaido University of Education: Section IIB* 31: 19–23. 1980, *Systematic Botany* 10: 445–452. 1985, *Botaniceskij Žurnal SSSR* 71: 195–200, 1572–1575. 1986, *Arch. Pharm. Res.* 27(3): 295–9. 2004

(Leaves and stems antibacterial, antiinflammatory, antifungal, anticancer, antipyretic, carminative, diaphoretic, febrifuge, stomachic, emetic, used for abdominal pain, gastrointestinal diseases, acute gastritis, headache, indigestion, nausea, diarrhea, to improve the appetite and strengthen the digestive system. For external use, tinea on hands and feet.)

in English: Chinese giant hyssop, hyssop, Korean mint, wrinkle giant hyssop, wrinkled giant hyssop

in China: huo xiang

in Korea: bae-cho-hyang

in Guatemala: menta coreana

Agastache scrophulariifolia (Willd.) Kuntze (*Agastache scrophulariifolia* Kuntze; *Agastache scrophulariifolia* Shafer; *Agastache scrophulariifolia* var. *mollis* (Fernald) A. Heller; *Agastache scrophulariifolia* (Willd.) Kuntze var. *mollis* A. Heller)

North America. Perennial herb, subshrub

See *Revisio Generum Plantarum* 2: 511. 1891 and *Muhlenbergia* 1: 4. 1900

(Infusion of root used as a diuretic.)

in English: purple giant hyssop

Agastache urticifolia (Benth.) Kuntze (*Agastache glaucifolia* A. Heller; *Agastache urticifolia* Kuntze; *Agastache urticifolia* Rydb.; *Lophanthus urticifolius* Benth.)

North America. Perennial herb, subshrub

See *Edwards's Botanical Register* 15: pl. 1282. 1829, *Revisio Generum Plantarum* 2: 511. 1891 and *Muhlenbergia*; a journal of botany 1(3): 32–33. 1904, *Vascular Plants of the Pacific Northwest* 4: 250. 1959

(Decoction or infusion of leaves taken for rheumatism, indigestion, measles, stomachache, colds.)

in English: nettleleaf giant hyssop

Agastache urticifolia (Benth.) Kuntze var. *urticifolia*

North America. Perennial herb, subshrub

See *Edwards's Botanical Register* 15: pl. 1282. 1829, *Revisio Generum Plantarum* 2: 511. 1891 and *Muhlenbergia*; a journal of botany 1(3): 32–33. 1904, *Vascular Plants of the Pacific Northwest* 4: 250. 1959

(Decoction or infusion of leaves taken for rheumatism, indigestion, measles, stomachache, colds.)

in English: nettleleaf giant hyssop

Agastachys R. Br. Proteaceae

Greek *agan* ‘much, very much, very’ or *agastos* ‘admirable’ and *stachys* ‘a spike, an ear of corn’; see *Transactions of the Linnean Society of London. Botany*. 10: 158. 1810 and *Telopea* 7: 181–185. 1997.

Agastachys odorata R. Br.

Australia.

See *Transactions of the Linnean Society of London* 10: 158. 1810 and *Planta Med.* 41(4): 379–385. 1981

(Alkaloids.)

in English: fragrant waratah, white waratah

Agathis Salisb. Araucariaceae

Greek *agathis* ‘a ball of thread’, referring to the catkin on the female trees; see *Transactions of the Linnean Society of London. Botany*. 8: 311, t. 15. 1807. Extreme confusion regarding the nomenclature and origin of the resins called copals and damars. Copals and damars are produced by trees belonging to the Araucariaceae, Caesalpiniaceae, Dipterocarpaceae and Burseraceae families.

Agathis australis (D. Don) Lindl. (*Agathis australis* Steud.; *Agathis brownii* (Lem.) L.H. Bailey; *Dammara australis* D. Don; *Dammara brownii* Lem.; *Salisburyodendron australis* (Lamb.) A.V. Bobrov & Melikyan)

New Zealand.

See *An Encyclopedia of Plants* 802. 1829, *Nomenclator Botanicus*. Editio secunda 1: 34. 1841

(Gum for burns.)

in English: kauri, kauri pine, New Zealand kauri

Maori name: kauri

Agathis borneensis Warb. (*Agathis alba* (Lamb.) Foxw.; *Agathis alba* Foxw.; *Agathis beccarii* Warb.; *Agathis beckingii* Meijer Drees; *Agathis dammara* (Lamb.) Rich.; *Agathis dammara* (Lambert) Richard & A. Richard; *Agathis latifolia* Meijer Drees; *Agathis loranthifolia* Salisb.; *Agathis macrostachys* Warb.; *Agathis rhomboidalis* Warb.)

W. Malesia. Tree, reddish sapwood, opposite leaves, pollen cones axillary, seed cones terminal on side shoots, seeds obovate, confusion over the species name

See *Transactions of the Linnean Society of London* 8: 312, t. 15. 1807, *Comm. Bot. Conif. Cycad.* 83, t. 19. 1826, *Fl. Brit. India* 5: 650. 1890 and *Monsunia*, Beiträge zur Kenntniss der Vegetation des Süd- und Ostasiatischen Monsungebietes 1: 183–184. 1900, *Philipp. Journ. Sci.* 1910, v. A. 173. 1910, *Bull. Jard. Bot. Buitenzorg*, III, 6: 459, 463. 1940, *Taxon* 33: 345. 1984, *Trop. Biomed.* 24(1): 29–35. 2007

(Antiplasmodial.)

Malay name: damar minyak

Agathis dammara (Lambert) Richard & A. Richard (*Abies dammara* (Lamb.) Poir.; *Agathis alba* Jeffrey, nom. inval.; *Agathis alba* (Rumph. ex Hassk.) Foxw., nom. illeg.; *Agathis celebica* (Koord.) Warb.; *Agathis hamii* Meijer Drees; *Agathis loranthifolia* Salisb., nom. illeg.; *Agathis pinus-dammara* Poir., nom. superfl.; *Dammara alba* Rumph. ex Hassk., nom. illeg.; *Dammara alba* Rumphius ex Blume; *Dammara alba* var. *celebica* Hassk.; *Dammara celebica* Koord.; *Dammara loranthifolia* Link; *Dammara orientalis* Lamb.; *Dammara rumphii* C. Presl, nom. illeg.; *Pinus dammara* Lambert; *Pinus wallichiana* A.B. Jacks. var. *dalatensis* (de Ferre) Silba)

C. Malesia. The trunk contains the dammar or damar resin, widely used in industry and medicine, confusion over the species name of *Agathis dammara*

See *Species Plantarum* 2: 1000–1002. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *De Fructibus et Seminibus Plantarum...* 2: 100. 1790, *A Description of the Genus Pinus* 1: 61. 1803, *Transactions of the Linnean Society of London* 8: 311–312, t. 15. 1807, *Encyclopédie Méthodique. Botanique ... Supplément* 5: 35. 1817, *Commentatio botanica de Conifereis et Cycadeis* 83, pl. 19. 1826, *Tijdschrift*

voor *Natuurlijke Geschiedenis en Physiologie* 9: 179. 1842 and *Annals of Botany. Oxford* 20: 387. 1906, *Philippine Journal of Science* C4: 442. 1909, *Bulletin of Miscellaneous Information Kew* 1938(2): 85. 1938, *Bulletin de la Société d'Histoire Naturelle de Toulouse* 95: 178, f. 2–3. 1960, *Taxon* 33: 345. 1984, *Phytologia* 7: 59. 1984, Jost T. et al. "Contact allergy to Manilla resin. Nomenclature and physico-chemistry of Manilla, kauri, damar and copal resins." *Contact Dermatitis*. 21(4): 228–238. 1989

(Damar (or Manilla resin?) caused dermatitis. Resin applied externally on boils.)

in English: Amboina pine, Amboina pitch tree, Manila copal, mountain agathis

in China: bei qiao shan

Malayan names: bedendang, damar minyak, penyum, sanum, tesanum

in Philippines: almaciga

Agathisanthemum Klotzsch Rubiaceae

Greek *agathos* 'good, pleasant' or *agathis* 'a ball of thread' and *antheion* 'flower', see *Naturwiss. Reise Mossambique Bot.* 1: 294. 1861.

Agathisanthemum bojeri Klotzsch (*Agathisanthemum bojeri* Hiern; *Agathisanthemum bojeri* Klotzsch subsp. *australe* Bremek.; *Hedyotis bojeri* (Klotzsch) Vatke; *Oldenlandia bojeri* (Klotzsch) Hiern)

Tanzania, South Africa.

See *Naturwissenschaftliche Reise nach Mossambique ...* [Peters] 6(Bot., 1): 294. 1861, *Oesterreichische Botanische Zeitschrift* 25: 232. 1875, *Flora of Tropical Africa* [Oliver et al.] 3: 53. 1877 and *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 48(2): 156. 1952, *Fl. Trop. E. Africa* 415–747. 1988

(Roots decoction drunk for venereal diseases. Flowers infusion a remedy for diarrhea, sore throat, syphilis, toothache; very bitter flowers chewed as a remedy for sore throat. Leaves chewed for toothache and also as an antidote for snakebite.)

in Tanzania: chivumanyuki, kivumanyuki, mvumanyuki

Agauria (DC.) Benth. & Hook.f. Ericaceae

Possibly from the Greek *agauros* 'stately'; see *A General History of the Dichlamydeous Plants* 3: 788, 837–838. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 602. 1839, *Genera Plantarum* [Benth & Hooker f.] 2(2): 586. 1876, *Die Natürlichen Pflanzenfamilien* 37[IV,1]: 42. 1889 and *J. Arnold Arbor.* 65: 274. 1984, Roger Lavergne,

Tisaneurs et Plantes Medicinales Indigènes de l'île de La Réunion. 263–266. Editions Orphie, Livry Gargan 1990.

Agauria polyphylla Baker

Madagascar. Tree or shrub, leaves very coriaceous, inflorescence ascending, flowers pendent, racts, bracteoles, pedicels and calyx strongly tinged red or red-purple, somewhat fleshy corolla deep red to red-purple

See *Journal of the Linnean Society, Botany* 20: 194–195. 1883 [1884 publ. 1883]

(Leaves for skin problems, itch, snakebites, eczema; flowers antidote.)

in Burundi: bajentaraza, icotabatwa

in Madagascar: angavodiana, angavodiandrano, angavtiana, angavvodina, rezinga, valanirana

Agauria salicifolia (Comm. ex Lam.) Hook.f. ex Oliv. (*Agarista salicifolia* (Comm. ex Lam.) G. Don; *Agauria goetzei* Engl.; *Agauria salicifolia* Hook.f. ex Oliv.; *Agauria salicifolia* forma *adenantha* Sleumer; *Agauria salicifolia* var. *pyrifolia* (Pers.) Oliv.; *Andromeda pyrifolia* Pers.; *Andromeda salicifolia* Comm. ex Lam.; *Leucothoe angustifolia* var. *pyrifolia* DC.; *Leucothoe salicifolia* (Comm. ex Lam.) DC.)

Tropical Africa. Tree or shrub, multi-branched, entire broad-leaved, lax racemes at the base of the leaves, bell-shaped stalked flowers, 5-angled globose fruit, ripe fruits blackish, in grassland, along stream

See *Species Plantarum* 1: 393–394. 1753, *Encyclopédie Méthodique, Botanique* 1: 159. 1783, *A General History of the Dichlamydeous Plants* 3: 788, 837. 1834, *Genera Plantarum* 2: 579, 586. 1876, *Flora of Tropical Africa* [Oliver et al.] 3: 483. 1877

(Leaves and roots poisonous to man and stock; careful use because the plant would be a violent poison. Leaves vermifuge, analgesic, for skin problems, itch, snakebites, eczema. Flowers antidote.)

in Burundi: bajentaraza, icotabatwa

in East Africa: ekisheigura, likalati, mandale, mgagana, mgema, mkolongo, mkorongo, modi, mombolo, muhahana, mungi, murigetu, musagita, muserigeta, musikita, muthigita, mwana, mwandama, mwavi, myunguvo, mzize, ologomati, ordtet, tangotuet, zenya

in Ethiopia: sotira

in La Réunion Island: bois de gale, bois de mapou, bois de rempart, mapou, mapou à petites feuilles, mapou des Hauts

in Madagascar: angavodiana, angavodiandrano, angavtiana, rezinga, valanirana

in Mauritius: bois cabris

in Zambia: mulilangumba, mutantanshibu

Agave L. Asparagaceae (Agavaceae, Amaryllidaceae)

Greek *agauos*, *agavos* ‘admirable, noble, splendid’, in Greek mythology Agave (Agaue) was a daughter of Cadmus and Harmonia. See Carl Linnaeus, *Species Plantarum*. 1: 323–324. 1753, *Genera Plantarum*. Ed. 5. 150. 1754, *Biblioteca italiana* ossia giornale di letteratura scienze ed arti 1: 106–107. 1816, *Analyse des Familles de Plantes* 58. 1829, *Handbook of the Amaryllideae* 164. 1888 and *Fieldiana, Bot.* 24(3): 103–145. 1952, *Botanical Museum Leaflets*—Harvard University 24(5): 85–112. 1975, *Ceiba* 19(1): 1–118. 1975, Howard Scott Gentry (1903–1993), *Agaves of continental North America*. Tucson, Arizona 1982, Carmen Aguilera, *Flora y fauna Mexicana*. Mitología y tradiciones. 141–145. México s.d. [1985], Davidse, G., Souse S., M. & Charter, A.O. (eds.) *Flora Mesoamericana* 6: 1–543. Universidad Nacional Autónoma de México, México, D.F. 1994, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997. Agaves contain saponin and minute stinging crystal of calcium oxalate.

Agave americana L. (*Agave americana* var. *marginata* Trel.; *Agave complicata* Trel. ex Ochot.; *Agave felina* Trel.; *Agave gracilispina* Engelm. ex Trel.; *Agave melliflua* Trel.; *Agave rasconensis* Trel.; *Agave subzonata* Trel.; *Agave zonata* Trel.; *Agave zonata* Trel. ex Bailey; *Aloe americana* Crantz; *Aloe americana* (L.) Crantz)

U.S.A., Mexico. Food

See *Species Plantarum* 1: 323–324. 1753, *Inst. Rei Herb.* 1: 466. 1766 and *Memorias y Revista de la Sociedad Científica “Antonio Alzate”* 33: 100. 1913, *The Standard Cyclopaedia of Horticulture* 1: 234. 1914, *Contributions from the United States National Herbarium* 23(1): 122–123, 128–129. 1920, *Taxon* 31: 769. 1982, *Cytologia* 52: 85–90. 1987, *Cytologia* 53: 415–420. 1983, de la Cueva P. et al. “[Contact dermatitis from *Agave americana*.]” *Actas Dermosifiliogr.* 96(8): 534–536. 2005

(Used in Ayurveda, Unani and Sidha. Plant said to be toxic to livestock. Fresh juice very irritant, capable of producing irritative contact dermatitis, conjunctivitis, burning sensation. Fleshy leaves used as a poultice, gum exuding from the leaves and root used for toothache; *Luffa tuberosa* crushed tuber juice mixed with leaf pulp of *Agave americana* given to induce abortion; fresh juice purgative, diuretic, emmenagogue, used in scurvy. The fresh juice a good external application to bruises and contusions. Root decoction used as diuretic. Veterinary medicine, roots along with those of *Curculigo orchoides*, leaves of *Andrographis paniculata* and *Vitex negundo* pounded and the extract given for ephemeral fever.)

in English: agave, American agave, American aloe, American century-plant, century plant, maguey

in Brazil: caraguatu-açu, caraotá-açu, gravatá-açu, piteira

in Bolivia: chuchawi tika, chunta,pajpa

in Mexico: ki’, maguey, maguey mexicana, metl, teometl (= maguey divino), toba la, tsonki (= pelos de maguey)

in China: jin bian long she lan, long she lan

in India: aane kathaale, airopakkaita, alagai, alakai, allikkoni, anai-k-karralai, anai-kattaleyi, anaik-kartazhai, anaik-katrashai, anaikkarralai, anaikkarralai, anaikkattalai, anakyitha, anekatali, anekatalle, anekattale, anekattali, anemundai, banda-kattala, bans-keora, banskeora, bara-kanwar, bara kanwar, barakanwar, barakhawar, bhoothaale, bhutale, bhuttala, bhuttale, bilatipat, chager-matta, changanara, daddoli, devva baale, devvabale, eroppakaita, gawar-patha, ghayal, guar-pato, guwar-pata, hathi-sengar, hathisengar, ilaitikedara, irakacimatal, irakacimattai, irakkacimattai, jangli-gawar-patha, jangli-kanwar, janglianarash, kalakan-tala, kalambanda, kalnaaru, kalnaru, kaluaru, kantala, karunkali, karunkalikarralai, karunkarralai, kathalai, kathaale naaru, kattukkarralai, kattukkattalai, kewa, kittanara, kuwar palla, marakkarralai, miruttari, miruttarikkarralai, murga, natkaida, nattukaita, naykkarralai, panam-katrashai, panamkatrazha, panankarrala, panankarralai, panankattaa, panankattazha, perunkarralai, peruntalai, peycctetikam, pey-kkarralai, peyuvitakkarralai, peyuvitam, piyyatikalabanda, rakas-pattah, rakashi-mattalu, rakashimattalu, rakaspatta, rakaspattah, rakshasa baale, rakshasabale, rakshasimatta, ram ban, ramban, ramkanta, redi-ananas, saga-nara, sai dai, saidai, sanga, seemakaitha, seubbara, vilayatikorkand

in Japan: ryuzetsu-ran

in Okinawa: rugway

in Southern Africa: Amerikaanse-aalwee, Amerikaanse aalwyn, blou-aalwee, gareboom, garingboom, kaalgaarboom, makaalwyn; lekhala (Sotho)

in Tunisia: sabbara

(Sap said to be particularly irritant, causing a burning rash. Roots infusion and decoction for rheumatic pains, venereal diseases.)

Agave americana L. var. ***expansa*** (Jacobi) Gentry (*Agave abrupta* Trel.; *Agave expansa* Jacobi)

Mexico, North America. Large, produces easily transplanted sucker shoots

See *Abhandlungen der Schlesischen Gesellschaft für Vaterländische Cultur. Abtheilung für Naturwissenschaften und Medicin.* 1868: 151. 1868 and *Contributions from the United States National Herbarium* 23(1): 132. 1920, *The Agave Family in Sonora* 80. 1972

(Stalks, flowers and heart are bitter.)

in English: house maguey

in Mexico: galime, mescal maguey

Agave bovicornuta Gentry

Mexico, Sonora. Flowers eaten

See *Publications of the Carnegie Institution of Washington* 527: 92. 1942

(On sensitive skin, caustic juice of the leaves causes burning irritation, followed by blisters. Piscicide, stupefying fishes.)

in Mexico: barranca, mescal lechuguilla, sa’puli

Agave cantala (Haw.) Roxb. ex Salm-Dyck (*Agave candelabrum* Tod.; *Agave cantala* Roxb.; *Agave rumphii* Jacobi; *Furcraea cantala* Haw.)

Mexico, Honduras. Shrubby rhizomatous, prostrate or ascending, amber flowers, boiled flowers and tubers eaten as vegetable

See *Species Plantarum* 1: 323–324. 1753, *Hortus Bengalensis*, or a catalogue ... 25. 1814, *Index Pl. Succ. Hort. Dyck.*: 1. 1829, *Flora Indica*; or, descriptions of Indian Plants 2: 167. 1832, *Hamburger Garten- und Blumenzeitung* 261. 1865 and *Phytochemistry* 29(3): 937–940. 1990, *Phytochemistry* 30(12): 4187–4189. 1991

(Used in Ayurveda. Plant diaphoretic, diuretic, laxative, emmenagogue, used for dysentery, dropsy, ascites, syphilis, scurvy. Leaf juice poured in ear to cure earache. Chewed roots vermifuge; crushed roots extract used in the treatment of goiter; poulticed as antiinflammatory in case of superficial burning. Poulticed leaves or crushed plant as fish poison.)

in English: Bombay aloe, cantala, cantala fibre, maguey, Manila maguey

in India: aanai katalai, aane kathhaale, aane mundi, bhoothaale, cantala, devva baale, ghaayapaatha, ghayal, ilaitikedara, kalabanda, kalnaaru, kalnaru, kantala, katalai, kathhaale, kathhale, ketuki, kitki, kitthanaara, kongka, mareba, murga, murobba, piyyatikalabanda, raakshasikalabanda, raakshasimadalu, raakshasimatta, rakaspatta, ram ban, ram bans, rambans, rankanda, saidai, vilaaythikorkand

in Nepal: ketuke, nalu

in Spanish: maguey

in the Philippines: magey, maguey, pita

Agave fourcroydes Lem. (*Agave fourcroydes* Jacobi, nom. illeg., non *Agave fourcroydes* Lem.; *Agave fourcroydes* var. *espiculata* Dewey; *Agave fourcroyoides* Hemsl.; *Agave rigida* var. *elongata* Baker; *Agave sullivanii* Trel.)

Mexico to Guatemala.

See *Species Plantarum* 1: 323–324. 1753, *L'illustration horticole* 11: 66. 1864, *Versuch zu einer systematischen Ordnung der Agaveen* 107. 1865, *Biologia Centrali-Americana; ... Botany ...* 3(17): 348. 1884 and *Contributions from the United States National Herbarium* 23(1): 119. 1920, *Cytologia* 52: 85–90. 1987, *Cytologia* 53: 415–420. 1988, *Canadian Journal of Botany* 69: 1257–1264. 1991, Ohtsuki T. et al. “New chlorogenin hexasaccharide isolated from *Agave fourcroydes* with cytotoxic and cell cycle inhibitory activities.” *Bioorg. Med. Chem.* 12(14): 3841–5. 2004

(This plant contains saponin and stinging crystals of calcium oxalate.)

Vernacular name: henequén

Agave lechuguilla Torrey (*Agave heteracantha* Jacobi, nom. illeg.; *Agave lechuguilla* Torr.; *Agave lophantha* Schiede var. *poselgeri* (Salm-Dyck) A. Berger; *Agave lophantha* var. *tamaulipasana* A. Berger; *Agave multilinata* Baker; *Agave poselgeri* Salm-Dyck; *Agave univittata* var. *tamaulipasana* (A. Berger) Jacobson)

Mexico. A source of *istle* or *ixtle*, a hard fiber used for rope and known by the trade name of Tampico fibre

See *Species Plantarum* 1: 323–324. 1753, *Bonplandia* 7: 92. 1859, *Report on the United States and Mexican Boundary ... Botany* 2(1): 213–214. 1859, *Handbook of the Amaryllideae* 1888: 168. 1888 and *Journal of the American Veterinary Medical Association—New Series* 93–46(3): 168–175. 1938, *Archives of Pathology* 25: 661–683. 1938, Gentry, H.S. *The Agave Family in Sonora*. Washington. [Agric. Handb. 399]. 1972, Gentry, H.S. *The agaves of Baja California*. Occas. Pap. Calif. Acad. Sci. 130. 1978, *Steroids* 35(5): 503–10. 1980, *Veterinary and Human Toxicology* 30(6): 533–535. 1988, *J. Ethnopharmacol.* 52(3): 175–7. 1996, *J. Arizona-Nevada Acad. Sci.* 32: 1–21. 1999

(Piscicide. Irritant and poisonous to cattle, goats, and sheep. Ingestion of *Agave lecheguilla* has given rise in goats and sheep to photodermatitis accompanied by hepatic and renal damage, the condition is known as “swell-head”. Antimicrobial, a decoction of roots used to remove blood clots; main stem infusion used a wash to treat bruises and rheumatism.)

in English: American aloe

in Mexico: amole dulce, lecheguilla, lechuguilla

Agave murpheyi F. Gibson

Arizona, Mexico.

See *Contr. Boyce Thompson Inst. Pl. Res.* 7: 83, fig. 1. 1935

(Antimicrobial.)

in North America: Hohokam agave, Murphey agave, Murphey’s century plant, Murphy’s agave

Agave potatorum Zucc. (*Agave amoena* Lem. ex Jacobi; *Agave auricantha* Baker; *Agave latifolia* Karw.; *Agave potatorum* var. *verschaffeltii* (Lem.) A. Berger; *Agave potatorum* var. *verschaffeltii* (Lem. ex Jacobi) A. Berger; *Agave pulchra* Salm-Dyck; *Agave quadrata* Lem.; *Agave saundersii* Hook. f.; *Agave schnittspahnii* Jacobi; *Agave scolymus* Karw. ex Salm-Dyck; *Agave scolymus* var. *polymorpha* A. Terracc.; *Agave verschaffeltii* Lem.; *Agave verschaffeltii* Lem. ex Jacobi)

Mexico.

See *Species Plantarum* 1: 323–324. 1753, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 16(2): 674–675. 1833, *Hortus Dyckensis ou Catalogue des Plantes ...* 307. 1834, *Botanical Magazine* 1865: t. 5493. 1865, *L’illustration horticole* 15: t. 564. 1868 and *Die Agaven, Beiträge zu einer Monographie* 186. 1915

(Used as a vesicant.)

Common names: drunkard agave, pulque agave

Agave schottii Engelm. (*Agave geminiflora* var. *sonorae* Torr.; *Agave mulfordiana* Trel.; *Agave schottii* var. *serrulata* Mulford)

USA, Arizona.

See *Transactions of the Academy of Science of St. Louis* 3: 305–307. 1875

(Piscicide.)

Agave shrevei Gentry

Mexico. Whitish, hearts pit-baked for eating or employed in making mescal bread or a fermented drink, stalks cooked for food

See *Publications of the Carnegie Institution of Washington* 527: 95. 1942

(Ceremonial, ritual curing, small plants used during fertility rites for sheep and goats, and in ceremonies for the dead.)

in Mexico: mescal blanco, o’tosá

Agave sisalana Perrine (*Agave rigida* Mill. var. *sisalana* (Perrine) Engelm.; *Agave rigida* var. *sisalana* Baker; *Agave segurae* D. Guillot & P. Van der Meer; *Agave sisalana* (Engelm.) Perrine; *Agave sisalana* Perrine ex Engelm.; *Agave sisalana* f. *armata* (Trel.) Trel.; *Agave sisalana* var. *armata* Trel.)

Mexico. Perennial, short stem or stemless, thick fleshy thorny leaves in rosette, inflorescence in panicle

See *Species Plantarum* 1: 323–324. 1753, *The Gardeners Dictionary: ... eighth edition no. 8.* 1768, *Tropical Plants - 25th Congress, 2nd session [Rep. no. 564]* Ho. of Reps. Dr. Henry Perrine 8, 9, 16, 47, 60, 86. 1838, *Transactions of the Academy of Science of St. Louis* 3: 316, t. 2–4. 1875, *Bulletin of Miscellaneous Information Kew* 1889: 254. 1889 and *Memoirs of the National Academy of Sciences* 11: 49, t. 111, f. 1. 1913, *Lloydia* 37(1): 10–16. 1974, *J. Ethnopharmacol.* 52(3): 175–177. 1996, *Magn. Reson. Chem.* 44(12): 1090–1095. 2006

(Antimicrobial, antiinflammatory, juice from leaves used as a wash for skin diseases and for treatment of local inflammatory conditions; sap mixed in liquid and drunk as strength medicine. The raw sap of the plant is corrosive and highly irritating to the eyes and skin.)

in North America: banana hemp, green agave, maguey de sisal, pulque agave, sisal, sisal agave, sisal hemp

in China: jian ma

in India: boodu kathaale, kathaale, kohar patha, sisal

in Japan: saisarū-sō

in Hawaii: malina

African names: axomyis, bambara, katani, mkonge, sisal, tangbeka

in South Africa: garingboom

in Tanzania: mkatani

Agave vilmoriniana A. Berger (*Agave eduardii* Trel.; *Agave houghii* hort. ex Trel.; *Agave houghii* Trel.; *Agave mayoensis* Gentry)

Mexico.

See *Repertorium Specierum Novarum Regni Vegetabilis* 12: 503. 1913, *Contributions from the United States National Herbarium* 23(1): 134. 1920, *Publications of the Carnegie Institution of Washington* 527: 94. 1942

(Piscicide, stupefying fishes.)

Agave vivipara L. (*Aloe vivipara* (L.) Crantz)

Mexico to C. America.

See *Species Plantarum* 1: 323–324. 1753 and *Bot. Commelinis* 35. 1983

(Used in Ayurveda. Sap irritant. Plant containing saponin and stinging crystals of calcium oxalate.)

Common names: century plant, lirio de palo

in India: kantala, kantula, kathalai, khetki

Agave vivipara L. var. ***vivipara*** (*Agave aboriginum* Trel.; *Agave angustifolia* Haw., nom. illeg.; *Agave angustifolia* var. *marginata* Trel.; *Agave angustifolia* var. *marginata* Gentry, nom. inval.; *Agave bergeri* Trel. ex A. Berger, nom. nud.; *Agave bromeliifolia* Salm-Dyck; *Agave costaricana* Gentry; *Agave cuspidata* Baker; *Agave donnell-smithii* Trel.; *Agave elongata* Jacobi; *Agave endlichiana* Trel.; *Agave excelsa* Jacobi; *Agave flaccida* Haw.; *Agave flavovirens* Jacobi; *Agave houlettii* Jacobi; *Agave ixtli* Karw. ex Salm-Dyck; *Agave ixtlioides* Hook.f.; *Agave jacquiniana* Schult. & Schult.f.; *Agave kirchneriana* A. Berger; *Agave lespinassei* Trel.; *Agave lurida* Jacq., nom. illeg.; *Agave owenii* I.M. Johnston.; *Agave pacifica* Trel.; *Agave panamana* Trel.; *Agave prainiana* A. Berger; *Agave prolifera* Schott ex Standl.; *Agave punctata* Kunth; *Agave rigida* Mill.; *Agave rigida* var. *longifolia* Engelm.; *Agave serrulata* Karw.; *Agave sicifolia* Trel.; *Agave theoxmuliana* Karw. ex M. Roem.; *Agave vivipara* var. *bromeliifolia* (Salm-Dyck) A. Terracc.; *Agave vivipara* var. *marginata* P.I. Forst., nom. inval.; *Agave wightii* J.R. Drumm. & Prain; *Agave yaquiana* Trel.; *Agave yxtli* Karw. ex G. Don; *Agave zapupe* Trel.; *Furcraea rigida* (Mill.) Haw.)

Mexico to C. America. Perennial herb, succulent, almost trunkless, tough leaves with curved tips and sharp needles at the end and short straight spines at the edges

(Used in Ayurveda and Sidha. Plant containing saponin and stinging crystals of calcium oxalate. Sap causes dermatitis, itching, red rashes, followed by tiny red eruptions; plant juice applied on eczema.)

in English: maguey of the woods, stick maguey

in Mexico: gusime, mescal casero, mescal del monte

in India: balurakkasi, balurakkisa, brahmarakasi, erumaik karralai, erumaikkattalai, kantala, kathalai, katkuva, kitanara, malaikkaralai, malaikkattalai, peddakalabanda, piramarakkaci, piramarakkadi, piramarakkati, piyyatikala-wlebanda, ramban, samata, sisal

Malay name: kelumpang telur

Agave weberi F. Cels ex J. Poisson (*Agave franceschiana* Trel. ex A. Berger, nom. nud.)

Mexico.

See *Bull. Mus. Natl. Hist. Nat.* 7: 231. 1901

(Irritant.)

in North America: maguey liso, Weber agave

Agave wocomahi Gentry

Mexico. Small, baked hearts and flowers eaten

See *Publications of the Carnegie Institution of Washington* 527: 96. 1942

(Piscicide, stupefying fishes.)

in English: pine maguey

in Mexico: mescal verde, ojcome

Agelaea Sol. ex Planchon Connaraceae

From the Greek *agele* 'a herd, crowd', *ago* 'to lead, to bring to', see *Linnaea* 23: 437–438. 1850, *Memorias, Real Academia de Ciencias Exactas, Físicas y Naturales de Madrid* 2: 503. 1859, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 531. 1861 and *Bull. Herb. Boissier*, sér. 2, 1(6): 549–587. 1901, *Bull. Soc. Linn. Normandie* sér. 7, 3: 325–356. 1921, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 58: 205–207, 209, 211, 214, 219. 1923, *Das Pflanzenreich* IV. 127(Heft 103): 67–68, 72, 77, 80, 84, 89. 1938, *Fl. Madagasc.* 97: 1–25. 1958, *Agric. Univ. Wageningen Pap.* 89(6): 136–168. 1989.

Agelaea macrophylla (Zoll.) Leenh. (*Erythrostigma macrophylla* Zoll.)

Malaysia, Borneo. Climber

See *Natuurkundig Tijdschrift voor Nederlandsch-Indië* ser. 3 4: 174. 1857 and *Flora Malesiana: Series I: Spermatophyta* 1(5): 502. 1958

(Juice of plant applied to treat acne. Roots of *Agelaea macrophylla* boiled together with the roots of *Koompassia excelsa* and *Eusideroxylon zwageri* and the solution drunk to treat weakness in infants.)

in Malaysia: akar malam

Agelaea pentagyna (Lam.) Baill. (*Agelaea baronii* G. Schellenb.; *Agelaea cordata* G. Schellenb.; *Agelaea dewevrei* De Wild. & T. Durand; *Agelaea emetica* Baill.; *Agelaea floccosa* G. (Stem and fruits for mouth infections; fruits antiinflammatory. Stem infusion taken for stomachache. Leaves for gonorrhoea, dysentery.)

in Madagascar: vahamainty

Agelanthus Tieghem Loranthaceae

From the Greek *agele* 'a herd, crowd' and *anthos* 'flower', see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 82, 92, 111. 1894, *Bulletin de la Société Botanique de France* 42: 246, 254. 1895 and *Flora of Tropical Africa* 6(1): 270. 1910, *Mistletoes of Africa* 138–140, 142–143. 1998.

Agelanthus dodoneifolius (DC.) Polhill & Wiens (*Dentimetula dodoneifolia* (DC.) Tiegh.; *Loranthus chevalieri* Engl. & Krause; *Loranthus dodoneifolius* DC.; *Loranthus knobleri* Kotschy; *Loranthus uelensis* Balle; *Tapinanthus dodoneifolius* (DC.) Danser)

West Africa. Parasite, stems grey rough, leaves glaucous, fruits dull red at maturity

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Collection de mémoires* 6: 29, t. 9. 1830, *Bulletin de la Société Botanique de France* 42: 265. 1895 and *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 29(2): 111. 1933, *Enumération des Plantes à Fleurs d'Afrique Tropicale* 2: 1–257. 1992

(Febrifuge, the decoction of the leaves of *Guiera senegalensis*, *Piliostigma thonningii*, *Piliostigma reticulatum*, *Tapinanthus bangwensis*, *Tapinanthus dodoneifolius* (DC.)

Danser (*Agelanthus dodoneifolius* (DC.) Polhill & Wiens), *Tapinanthus ophiodes* (Sprague) Danser.)

in Nigeria: kauci

Agelanthus zizyphifolius (Engl.) Polhill & Wiens (*Loranthus zizyphifolius* Engl.; *Tapinanthus zizyphifolius* (Engl.) Danser)

Tropical Africa.

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Der Deutsche Botaniker Herbarienbuch* [1]: 73. 1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 92. 1894, *Bulletin de la Société Botanique de France* 42: 246. 1895 and *Enumération des Plantes à Fleurs d'Afrique Tropicale* 2: 166. 1992

(Febrifuge.)

Ageratina Spach Asteraceae

Resembling *Ageratum*, the diminutive form of the genus *Ageratum* L., see *Species Plantarum* 2: 836–839. 1753, *Histoire Naturelle des Végétaux* (Spach) 10: 286–287. 1841, *Smithsonian Contributions to Knowledge* 3(5): 87. 1852, *Proceedings of the American Academy of Arts and Sciences* 21: 383. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 503. 1900, *Sida* 3: 330. 1969, *Phytologia* 19(4): 218, 221, 225. 1970, *Phytologia* 23(1): 153–154. 1972, *Phytologia* 24(2): 93. 1972, *Phytologia* 38(4): 324–326. 1978, *Fl. Venez. Guayana* 3: 177–393. 1997.

Ageratina adenophora (Spreng.) R.M. King & H. Rob. (*Ageratina trapezoidea* (Kunth) R.M. King & H. Rob.; *Ageratina trapezoides* (Kunth) R.M. King & H. Rob.; *Eupatorium adenophora* Spreng.; *Eupatorium adenophorum* Spreng.; *Eupatorium adenophorum* Hort.Berol. ex Kunth; *Eupatorium adenophorum* var. *peruvianum* Hieron.; *Eupatorium adenophorus* Spreng.; *Eupatorium cognatum* Kunth & Bouché; *Eupatorium glandulosum* Hort. Berol. ex Kunth; *Eupatorium glandulosum* Kunth, nom. illeg.; *Eupatorium glandulosum* Michx.; *Eupatorium glandulosum* Sch. Bip. ex Baker, nom. nud.; *Eupatorium trapezoideum* Kunth)

Mexico, North America. Shrub, herb, branched, erect, trailing, purplish, glandular-hairy, corollas pinkish white, flowers in axillary and terminal heads, green manure, a serious noxious invasive weed apparently unpalatable to cattle

See *Flora Boreali-Americana* (Michaux) 2: 98. 1803, *Nova Genera et Species Plantarum* [H.B.K.] 4: 122–123. 1820, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 420. 1826, *Index Seminum* [Berlin] 1847: 13. 1847 [Ind. Sem. Hort. Berol.], *Flora Brasiliensis* (Martius) 6(2): 314. 1876 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 470. 1905, *Phytologia* 19(4):

211. 1970, *Phytologia* 24(2): 98. 1972, *Phytologia* 69(2): 61–86. 1990

(Leaf juice hemostatic, antiseptic, used for cuts, wounds, pain, swellings and injuries; leaves chewed for toothache; poured in the eye to treat insomnia; fresh leaves on itchy skin; crushed leaves applied on fresh wounds and injuries to stop bleeding. Root juice to treat fever. Stems boiled and liquid applied directly to open wounds and sores; plant decoction febrifuge. Toxic to horses and most livestock, toxic disease caused in horses known as “blowing disease.” Leaves of this plant if used as toilet paper cause pile disease.)

in English: catweed, crofton-weed, hemp agrimony, Mexican devil, sticky agrimony, sticky eupatorium, sticky snakeroot

in India: aza tesenba, azatesen, bakura, ban mara, banamara, banmarmukh, China-po, hingnyak, kali jhar, kalighar, kalojhar, muk, neelagiri, nhasa, penaari, shamathoru, shopang, thravada

in Nepal: banmara, mohini

in Hawaii: Maui pamakani, pamakani haole

Ageratina altissima (L.) R.M. King & H. Rob. var. ***altissima*** (*Ageratina altissima* var. *angustata* (A. Gray) Clewell & Wooten; *Cronquistianthus rugosus* R.M. King & H. Rob.; *Eupatorium ageratoides* var. *angustatum* A. Gray; *Eupatorium angustatum* (A. Gray) Greene; *Eupatorium bulliferum* S.F. Blake; *Eupatorium rugosum* Houtt.; *Eupatorium rugosum* Schrader ex DC.; *Eupatorium rugosum* Spreng.; *Eupatorium rugosum* Kunth, nom. illeg., non *Eupatorium rugosum* Houtt.; *Eupatorium rugosum* var. *angustatum* (A. Res.*, 35: 547–576. 1927, *Rhodora* 43(515): 557–558. 1941, *Rhodora* 44(528): 462–463, pl. 739. 1942, *Phytologia* 19(4): 212. 1970, *Brittonia* 23(2): 138. 1971, *Phytologia* 23(5): 410–411. 1972, *Taxon* 30: 515–516. 1981, *Proc. Iowa Acad. Sci.*, 89: 151–152. 1982, Stotts, R. “White snakeroot toxicity in dairy cattle.” *Vet. Med. Small Anim. Clin.*, 79: 118–120. 1984, Beier, R.C., Norman, J.O. “The toxic factor in white snakeroot:

identity, analysis and prevention.” *Vet. Hum. Toxicol.*, 32: 81–88. 1990

(High toxicity, may be fatal if eaten; white snakeroot (*Eupatorium rugosum*) has caused illness and death of humans and several types of livestock. All grazing animals can be affected by white snakeroot, several types of herbivorous livestock have also been poisoned by ingesting white snakeroot, resulting in a disease called trembles, weakness, nausea, abdominal pain, vomiting, delirium, prostration, coma. Cattle, goats, horses, sheep, and swine have shown toxic reactions.)

in English: fall poison, richweed, white sanicle, white snakeroot

Ageratina aromatica (L.) Spach (*Ageratina aromatica* Spach; *Eupatorium aromaticum* L.; *Eupatorium latidens* Small; *Kyrstenia aromatica* Greene; *Kyrstenia aromatica* (L.) Greene)

North America.

See *Species Plantarum* 2: 839. 1753, *Histoire Naturelle des Végétaux. Phanérogames* (Spach) 10: 286. 1841 and *Leaflets of Botanical Observation and Criticism* 1(1): 8. 1903, *Manual of the Southeastern Flora* 1327. 1933

(Crushed leaves to clean and heal ulcers, also applied as analgesic to sprains and contusions.)

in Peru: chilca

Ageratina herbacea (A. Gray) R.M. King & H. Rob. (*Eupatorium ageratifolium* var. *herbaceum* A. Gray; *Eupatorium herbaceum* (A. Gray) Greene; *Kyrstenia herbacea* (A. Gray) Greene)

North America. Perennial herb, subshrub

See *Smithsonian Contributions to Knowledge* 5(6): 74. 1853 and *Pittonia* 4(24B): 279. 1901, *Leaflets of Botanical Observation and Criticism* 1(1): 9. 1903, *Phytologia* 19(4): 222. 1970, *Taxon* 28: 273–274. 1979, *Taxon* 30: 844–845. 1981, *Taxon* 32: 509. 1983, *Amer. in China: xiong er cao

in India: michangala, thaaraa poondu, vellaikkaaran poondu

in Japan: murasaki-kakkô-azami, ô-kakkô-azami

in Hawaii: maile hohono, maile honohono, maile kula

Aglaia Lour. Meliaceae

Named for one of the three Graces, the others being Euphrosyne and Thalia; Greek *aglaia* 'splendor, brightness', *aglaos* 'bright, beautiful, pleasing'; see João (Joannes) de Loureiro (1717–1791), *Flora cochinchinensis*: sistens plantas in regno Cochinchina nascentes. 98, 173. Ulyssipone [Lisboa] 1790, *Pl. Coromandel* 3: 54. 1819[1820] and Pannell, C. M. "A taxonomic monograph of the genus *Aglaia* (Meliaceae)." *Kew Bulletin* add. ser., 16: 58, 237–242. 1992, *Journal of Biology (Vietnam)* 15(4): 5–8. 1993. Sap of fresh bark of *Aglaia* sp. used as fish poison.

Aglaia argentea Blume

Sumatra, Java. Tree, small tree, lower leaf surface bright silvery with scattered red glands, reddish shining drupes, lowland forest

See *Bijdragen tot de flora van Nederlandsch Indië* 170. 1825

(Leaves in a complex preparation taken to treat leprosy. Leaves and bark decoction drunk to treat fevers and a poultice of the boiled leaves applied to sprains. Cooling and astringent, an infusion of leaves included in oral remedies for abdominal pain, diarrhea and colic.)

in Indonesia: balik angin, balik sempa

Aglaia domestica Pellegr.

Vietnam, Indonesia. Tree

See *Fl. Indo-Chine* [P.H. Lecomte et al.] 1: 766. 1911

(Crushed seeds made into a paste applied for stomachache. Leaves decoction drunk for fevers.)

in Borneo: langsat, riset

Aglaia dookkoo Griff.

Indonesia. Tree, fruits eaten

See *Not. Pl. Asiat.* 4: 505. 1854

(Inner bark or crushed seeds decoction drunk for malaria.)

in Indonesia: lengeset

Aglaia edulis (Roxb.) Wallich (*Aglaia acida* Koord. & Valetton; *Aglaia diffusa* Merr.; *Aglaia latifolia* Miq.; *Aglaia minahassae* Koord.; *Aglaia sulingi* Blume; *Aglaia testicularis* C.Y. Wu; *Milnea edulis* Roxburgh)

SE Asia. Tree, leaflets subopposite to alternate, fruit indehiscent 3-locular, aril of the seed edible, in primary evergreen forest along the seashore on sandstone or sandy loam, in secondary forest

See *Fl. Ind.* 2: 430. 1824

(Antiamebic, pericarp used against diarrhea. Leaves and bark made into a paste applied on swellings, or rubbed for body pain.)

in China: ma shen guo

in India: dieng-soh-longar, khrang, mesuing, momailateku, sinakedang

in Indonesia: langsung

in Philippines: curran kaniue

in Thailand: kholaen

Aglaia elaeagnoidea (A. Juss.) Benth. (*Aglaia abbreviata* C.Y. Wu; *Aglaia elaeagnoidea* var. *formosana* Hayata; *Aglaia elaeagnoidea* var. *pallens* Merr.; *Aglaia formosana* (Hayata) Hayata; *Aglaia roxburghiana* (Wight & Arn.) Miq.; *Milnea roxburghiana* Wight & Arn.; *Nemedra elaeagnoidea* A. Juss.)

Cambodia, India, Indonesia, China. Tree, white latex

See *Bulletin des sciences naturelles et de géologie* 23: 239. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 119. 1834, *Annales Museum Botanicum Lugduno-Batavi* 4: 41. 1868 and *Enum. Pl. Formosana* 78. 1906, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 3: 52. 1913, *Journal of Ethnopharmacology* 36: 163–174. 1992, *Journal of Ethnopharmacology* 67(1): 45–51. 1999

(Used in Ayurveda and Sidha. Aglaroxin A acts as both anti-feedant and chronic toxin. Antiinflammatory, antifungal, used to treat *ciguatera* fish poisoning, *ciguatera* is a specific type of food poisoning associated with the ingestion of tropical fish, which, although normally safe for consumption, may at times contain high amounts of ciguatoxin, as well as other chemically related toxins.)

in China: shan luo

in India: aevaadu, cempuli, cheeralam, chokkala, chokla, cokkalai, erranduga, gadagayya, gandhapriyangu, kalla bendaka, kannikkompu, kempu nola, kondanduga, kunrapalam, nyalei, phalini, priyangu, priyangu beej, priyanguh,

(Fresh bark in a mixture for tuberculosis.)

in India: ragat rohida

Aglaiia minutiflora Bedd.

India.

(Febrifuge.)

in India: nirmulei, nirmuli

Aglaiia odorata Lour. (*Aglaiia odorata* var. *microphyllina* C. DC.)

SE Asia. Tree, small tree, shrub, crooked, grey bark, inflorescence of tiny fragrant yellow flowers, could be confused with some Rutaceae

See *Flora Cochinchinensis* 1: 173. 1790, *Monographiae Phanerogamarum* 1: 602. 1878 and *Journal of Natural Products* 59(7): 650–652. 1996 [Cyclopentabenzofuran lignan protein synthesis inhibitors from *Aglaiia odorata*.], *Antiviral Research* 67(2): 107–119. 2005

(Antipyretic, leaves and roots. Flowers febrifuge. Decoction of roots and flowers febrifuge; decoction of leaves to treat venereal diseases, menstrual troubles. Leaves tonic.)

in English: Chinese perfume plant, Chinese rice-flower, chulan tree, mock lemon, mock lime, orchid tree

in China: mei sui lan, mi sui lan, mi zi lan, san yeh lan

in India: akparni, anghriparni, anghriparnika, anghrivalika, arni, atiguha, atigupta, aughriparnika, brahmaparni, chakrakulya, chakraparni, chitraparni, chitraparnika, daula, davada, davala, debra, dhamani, dhavani, dirgha, dirghaparni, dirghapatra, ghashila, guha, jibilike, kadala, kalashi, kalasi, kankasharu, kola-ponna, kolaponna, kolku-ponna, kroshtukamekhala, kroshtukapuchhika, kroshtupuchhi, kroshtuvinna, langali, langulika, mahaguha, mekhala, muvila, nabiyalbone, nakkatokaponna, orila, pishtaparni, pishthaparni, pishthparni, pisssthparni, pithauni, pithavan, pithavana, pitvan, prasniparni, prishniparni, prishthiparni, prishniparni, prithakparni, prsni, prsniparni, prthakparni, prushparni, purnaparni, salaparni, shirnamala, shrigalvinna, sinhalanguli, sinhapuchhi, sinhapuchhika, sinhapushpi, srigalavanta, srngalavinna, tanvi, vishnuparni

in Indonesia: patjar tjina

in Japan: ju-ran, muran

in Malaysia: belangkas, chulan, telur belangkas, telur belangkas

Aglaiia odoratissima Blume (*Aglaiia affinis* Merrill; *Aglaiia diepenhorstii* Miquel; *Aglaiia heterophylla* Merrill; *Aglaiia odoratissima* Benth.)

India, Thailand. Dioecious trees, inner bark red with pale white latex, leaves imparipinnate, inflorescence paniculate or racemose, unisexual very fragrant yellow flowers, indehiscent fleshy ellipsoid yellow to orange-red berry, pinkish-orange stellate scales, yellow-pink sweet edible aril, in swamp forest, along roadsides

See *Bijdragen tot de flora van Nederlandsch Indië* 4: 171. 1825, *London J. Bot.* ii. 213. 1845 and *Fitoterapia* 53: 107–109. 1982, *Fitoterapia* 58: 189–191. 1987, *Journal of Tropical Plant Pests and Diseases* 2: 35–41. 2002

(Used in Ayurveda. Anthelmintic, antibacterial, antiviral, antifungal, insecticidal, antifertility and abortifacient; the essential oil has been found effective against earthworms. Veterinary medicine, anthelmintic.)

in India: anganapriya, bhangu, bhedini, ettanduga, gandhaphala, gauri, gaurvalli, govandini, govarna, gundra, kanguni, kannikkombu, kanta, karambha, katu, kondanduga, krishnapushpi, lata, mahilavhaya, mangalya, mithavalli, narivallabha, parnabhedini, phalapriya, phalini, pita, preyasi, priyaka, priyangu, punyava, rishangi, sempuli, shubha, shyama, sokkalai, subhanga, tottila, vanita, vishvaksena, vritta

in Indonesia: kayu apiek, kayu luit, pancal kidang, pi-kopijan, tanglu

in Malaysia: kasai, merlimau, telur belangkas hutan

in Sri Lanka: kannikkombu, sokkalai

in Thailand: prayong paa, sangkhriat

***Aglaia salicifolia* Ridl.**

Malaysia.

See *Journal of the Straits Branch of the Royal Asiatic Society* 54: 32. 1910

(Pound the leaves in cold water, and use the water for washing the body after childbirth.)

Malay name: sikjot

***Aglaia saltatorum* A.C. Sm.**

Tonga, Niue.

See *Contr. U.S. Natl. Herb.* xxx. 483. 1952

(Bark tonic.)

in Tonga: langakali

Aglaomorpha Schott Polypodiaceae

From the Greek *aglaos* 'bright, beautiful, pleasing' and *morphe* 'a form, shape', referring to the growth, see *Species Plantarum* 2: 1082–1094. 1753, *Tentamen Pteridographiae* 199–200. 1836, *Gen. Fil.* [Schott] 4: tt. 19, 20. 1836 [ante 27 Oct 1836], *Gen. Fil.* t. 95. 1841, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 3: 399. 1841, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 155. 1842 and *Philipp. J. Sci.*, Section C, botany. 6: 140–141. 1911, *The Philippine Journal of Science*. Section C, botany. Manila 9: 8. 1914, *Univ. Calif. Publ. Bot.* 16: 117. 1929, *Manual of Pteridology* 548. 1938, *Sunyatsenia* 5: 262. 1940, *Fern Gaz.* 11(2–3): 141–162. 1975.

***Aglaomorpha coronans* (Wall. ex Mett.) Copel.** (*Aglaomorpha coronans* (Wall.) Copel.; *Drynaria conjugata* Bedd.; *Drynaria conjugata* (Baker) Bedd.; *Drynaria conjugata* T. Moore; *Drynaria coronans* (Wall. ex Mett.) J. Sm. ex T. Moore; *Drynaria coronans* J. Sm.; *Drynaria esquirolii*

C. Chr.; *Phymatodes coronans* C. Presl; *Pleopeltis coronans* Alderw.; *Pleopeltis coronans* (Wall. ex Mett.) Alderw.; *Polypodium conjugatum* Baker, nom. illeg.; *Polypodium conjugatum* Poir.; *Polypodium coronans* Wall. ex Mett.; *Polypodium coronans* Wall.; *Pseudodrynaria coronans* (Wall. ex Mett.) Ching)

India, Vietnam. Fern

See *Numer. List* [Wallich] n. 288. 1828, *Tentamen Pteridographiae* 198. 1836, *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 1: 121, pl. 3, f. 40–41. 1856, *Index Filicum* 345. 1862, *Synopsis Filicum* (Hooker & Baker) 366. 1868, *Ferns of British India*, corrections, pl. 13. 1870 and *Bulletin du Département de l'Agriculture aux Indes Néerlandaises* 27: 11. 1909, *Bulletin de l'Académie Internationale de Géographie, Botanique* 23(284–286): 139–140. 1913, *University of California Publications in Botany* 16(2): 117. 1929, *Sunyatsenia* 6(1): 10. 1941

(Rhizome juice applied on herpes, scabies; rhizome paste applied to treat backache.)

in India: awm-vel

in Nepal: harchur

Aglaonema Schott Araceae

From the Greek *aglaos* 'bright, beautiful, pleasing, manifest' and *nema* 'thread', possibly referring to the stamens; see *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 892. 1829 and Nicolson, Dan Henry, "A revision of the genus *Aglaonema* (Araceae)." *Smithsonian Contributions to Botany* 1: 1–69. 1969, D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 15–25. 1988, Nicolson, Dan Henry, *A taxonomic revision of the genus Aglaonema (Araceae)*. Ann Arbor, Michigan, 1994.

***Aglaonema commutatum* Schott** (*Aglaonema marantifolium* Blume var. *commutatum* (Schott) Engl.; *Scindapsus cuscuaria* Presl)

SE Asia, Malesia. Perennial herb

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 892. 1829, *Meletemata Botanica* 21. 1832, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 602. 1851, *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis*. I 123. 1856, *Monographiae Phanerogamarum* 2: 441–442. 1879 and *Cytologia* 53: 59–66. 1988, *Ann. Bot.* (London). 93(2): 157–66. 2004

(These plants contain minute needle-like crystals of calcium oxalate which are intensely irritating, cause severe pain in the mouth if eaten, crystals are not poisonous. Leaves used to reduce swellings.)

in English: Chinese evergreen

Malayan name: mata bisul

Aglaonema modestum Schott ex Engler (*Aglaonema acutispathum* N.E. Br.; *Aglaonema laoticum* Gagnep.)

China, Thailand, Bangladesh. Perennial herb, dark green stem, spadix surrounded by a spathe

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 892. 1829, *Gardener's chronicle*, new series 24(602): 39. 1885 and *Not. Syst. Herb. Mus. Paris* ed. Humbert 9: 117. 1941, *Nucleus* 25: 43–59. 1982

(These plants contain minute needle-like crystals of calcium oxalate which are intensely irritating, cause severe pain in the mouth if eaten, crystals are not poisonous. Used externally to treat snake and insect bites, hydrophobia, abscesses and swelling.)

in English: Chinese evergreen

in China: guang dong wan nian qing, yue wan nian qina

Aglaonema nitidum Kunth (*Aglaonema helferi* Hook. f.; *Aglaonema integrifolium* (Link) Schott; *Aglaonema nitidum* (Jack) Kunth; *Aglaonema oblanceolatum* Alderw.; *Aglaonema oblongifolium* var. *curtisii* N.E. Br.; *Arum integrifolium* Link; *Calla nitida* Jack)

Asia tropical.

See *Species Plantarum* 2: 968. 1753, *Malayan Miscellanies* 1(1): 24. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 892. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 56. 1841 and *Smithsonian Contributions to Botany* 1: 1–69. 1969, *Ann. Bot.* (London). 93(2): 157–66. 2004

(Irritating.)

Aglaonema simplex (Blume) Blume (*Aglaonema angustifolium* N.E. Br.; *Aglaonema birmanicum* Hook. f.; *Aglaonema borneese* Engl.; *Aglaonema brevivaginatatum* Alderw.; *Aglaonema elongatum* Alderw.; *Aglaonema emarginatum* Alderw.; *Aglaonema fallax* Schott ex Engl.; *Aglaonema grande* Alderw.; *Aglaonema latius* Alderw.; *Aglaonema longicuspidatum* Schott; *Aglaonema malaccense* Schott; *Aglaonema nicobaricum* Hook. f.; *Aglaonema nieuwenhuisii* Engl. ex Alderw.; *Aglaonema pierreanum* Engl.; *Aglaonema propinquum* Schott; *Aglaonema schottianum* Miq.; *Aglaonema schottianum* fo. *angustifolium* (N.E. Jervis; *Aglaonema subarborescens* Alderw.; *Aglaonema subfalcatum* Engl.; *Aglaonema tenuipes* Engl.; *Caladium simplex* Blume; *Scindapsus tonkinensis* K. Krause)

Java, Borneo.

See *Catalogus ...* 103. 1823, *Rumphia* 1: 152. 1837, *Flora van Nederlandsch Indië* 3: 216. 1856, *Bonplandia* (Hanover) 7: 30.

1859, *Annales Museum Botanicum Lugduno-Batavi* 1: 280. 1864, *The Flora of British India* 6: 529–530. 1893, *Bulletin of Miscellaneous Information Kew* 1895: 18. 1895 and *Botanisk Tidsskrift* 24(3): 275. 1902, *Das Pflanzenreich* 23Dc: 20–24. 1915, *Bulletin du Jardin Botanique de Buitenzorg* 4: 320, 324–326. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 331. 1932

(Roots for fever and dropsy. Leaves pounded in coconut oil and rubbed on the body of pregnant women to hasten delivery and reduce pain; aqueous extract of leaves given for easy delivery.)

in English: Chinese evergreen

in China: yue nan wan nian qing

in India: pumroh

Malayan names: penggele, sagut, sumpuh bulau, sumpuh kring

Aglaonema treubii Engl.

SE Asia.

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 892. 1829 and *J. Nat. Prod.*, 60(2): 98–101. 1997, *J. Nat. Prod.* 61(3): 397–400. 1998, *Bioorg. Med. Chem. Lett.* 9(21): 3171–3174. 1999

(Found to potently inhibit alpha glucosidase. Antihyperglycemic.)

in English: silver spear

Agoseris Raf. Asteraceae

Greek *agon* ‘cluster, a collection’ and *seris*, *seridos* ‘chicory, lettuce’; some suggest from *aigos* ‘a goat’, goat chicory; see *De Fructibus et Seminibus Plantarum...* 2: 360–361. 1791, C.S. Rafinesque, *Florula ludoviciana*. 58. New York, 1817 and E.D. Merrill, *Index Rafinesquianus*. 232, 242. 1949.

Agoseris aurantiaca (Hook.) Greene (*Troximon aurantiacum* Hook.)

North America. Perennial herb, subshrub

See *Flora Boreali-Americana* [Hooker] 1(6): 300, pl. 104. 1833, *Pittonia* 2(10B): 177. 1891 and *Amer. J. Bot.* 75: 652–668. 1988

(Disinfectant, analgesic. Ceremonial, witchcraft, protection, an infusion against evil spirits and ghosts.)

in English: orange agoseris

Agoseris aurantiaca (Hook.) Greene var. *aurantiaca* (*Agoseris angustissima* Greene; *Agoseris arachnoidea* Rydb.; *Agoseris carnea* Rydb.; *Agoseris gaspensis* Fernald; *Agoseris gracilens* (A. Gray) Greene; *Agoseris gracilens* subsp. *greenii* (A. Gray) S.F. Blake; *Agoseris graminifolia* Greene; *Agoseris greenii* (A. Gray) Rydb.; *Agoseris*

howellii Greene; *Agoseris lackschewitzii* Douglass M. Hend. & R.K. Moseley; *Agoseris nana* Rydb.; *Agoseris naskapensis* J. Rousseau & Raymond; *Agoseris prionophylla* Greene; *Agoseris rostrata* Rydb.; *Agoseris subalpina* G.N. Jones; *Agoseris vulcanica* Greene; *Troximon aurantiacum* Hook.)

North America. Perennial herb, subshrub

See *Flora Boreali-Americana* [Hooker] 1(6): 300, pl. 104. 1833, *Pittonia* 2(10B): 177. 1891, *Bulletin of the Torrey Botanical Club* 25(3): 124, pl. 334, f. 1–2. 1898 and *Bulletin of the Torrey Botanical Club* 32(3): 137. 1905, *Amer. J. Bot.* 75: 652–668. 1988

(Disinfectant, analgesic. Ceremonial, witchcraft, protection, an infusion against evil spirits and ghosts.)

in English: orange agoseris

Agoseris monticola Greene (*Agoseris altissima* Rydb.; *Agoseris aspera* (Rydb.) Rydb.; *Agoseris covillei* Greene; *Agoseris decumbens* Greene; *Agoseris eisenhoweri* B. Boivin; *Agoseris glauca* subsp. *aspera* (Rydb.) Piper; *Agoseris glauca* subsp. *scorzonerifolia* (Schrud.) Piper; *Agoseris glauca* (Pursh) Raf. var. *asper* (Rydb.) North America. Perennial herb

See *Herbarium Rafinesquianum* 39. 1833, *A Flora of North America*: containing ... 2(3): 490. 1843, *Pittonia* 4(20D): 37. 1899 and *Leaflets of Botanical Observation and Criticism* 2(7): 130–131. 1911, *A Manual of the Flowering Plants of California* ... 1005. 1925, *Vascular Plants of the Pacific Northwest* 5: 26. 1955, *Amer. J. Bot.* 65: 717–721. 1978

(Whole plant infusion to wash sores, rashes and wounds.)

in English: pale agoseris

Agrimonia L. Rosaceae (Agrimoniaceae)

Possibly from the Greek *argemone*, *argemon*, ancient name used by Dioscorides, Plinius and Galenus for the poppy; or from *argemonion* ancient Greek name applied by Dioscorides to the *Anemone*; or from *agros* ‘field’ and *monos* ‘alone, lonely’; or from *agrios*, *agrimaios* (*agra*) ‘wild’; see Carl Linnaeus, *Species Plantarum* 1: 448. 1753, *Genera Plantarum* Ed. 5. 206. 1754, *A Natural Arrangement*

of British Plants 2: 395, 574. 1822, *Prodr.* (DC.) 2: 588. 1825 and *Fieldiana, Bot.* 24(4): 432–484. 1946, *Novit. Bot.* 1971: 9, 17–20, 22. 1971, *Folia Geobot. Phytotax.* 8(1): 95, 97. 1973, Helmut Genauast, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 46. Basel 1996.

Agrimonia bracteata E. Mey. ex C.A. Mey. (*Agrimonia bracteosa* E. Mey. ex Drège; *Agrimonia bracteosa* E. Mey.; *Agrimonia caffra* E. Mey. ex C.A. Mey.; *Agrimonia eupatoria* L.; *Agrimonia eupatoria* var. *capensis* Harv.; *Agrimonia nepalensis* Don)

South Africa. Rhizomatous perennial herb

See *Bull. Sci. Acad. Imp. Sci. Saint-Petersbourg* 10: 349. 1842 and *Journal of Ethnopharmacology* 119(3): 482–500. 2008

(Antimycobacterial.)

Agrimonia eupatoria L. (*Agrimonia asiatica* Juzepczuk; *Agrimonia bracteosa* E. Mey.; *Agrimonia nepalensis* D. Don)

Europe. Erect perennial herb, leaning, forming clumps, leaves green, all flower parts yellow except anthers turn brown at anthesis

See *Species Plantarum* 1: 448. 1753, *Prodromus Florae Nepalensis* 229. 1825, *Revisio Generum Plantarum* 1: 214. 1891 and *Botanical Magazine* 47(556): 247. 1933, *Weeds URSS* 3: 138. 1934, *Taxon* 31: 583–587. 1982, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Izvestiia Akademii Nauk Belorusskoi SSR: Seriya Biologicheskikh Nauk* 2: 7–12. 1983, *Lagascalia* 12: 286–290. 1984, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 9: 251–262. 1986, *Iranian Journal of Botany* 3: 183–188. 1987, *Cell and Chromosome Research* 12: 22–29. 1989, *Lagascalia* 15: 269–282. 1990, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Watsonia* 19: 134–137. 1992, *Thaiszia* 7: 75–88. 1997, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Opera Botanica* 137: 1–42. 1999

South Africa.

(Antimycobacterial, antiinflammatory and diuretic. Leaves for tapeworm.)

in English: agrimony, cockle bur, common agrimony, liverwort, medicinal agrimony

in Arabic: ghafith, terfaq

in China: da hua long ya cao

Agrimonia gryposepala Wallr. (*Agrimonia eupatoria* var. *parviflora* (Aiton) Hook.; *Eupatorium gryposepalum* (Wallr.) Lunell; *Agrimonia macrocarpa* (Focke) Rydb.; *Agrimonia parviflora* Aiton var. *macrocarpa* Focke)

North America. Perennial herb

See *Flora Boreali-Americana* 1(4): 197. 1832, *Beitrage zur Botanik* 1: 49–50, pl. 1, f. 8. 1842, *Botanical Gazette* 16(1): 3.

1891 and *North American Flora* 22(5): 392. 1913, *American Midland Naturalist* 5(12): 237. 1918, *Taxon* 39(3): 513. 1990, *Brittonia* 16(1): 26. 2008

(Root or burs infusion taken as blood purifier, styp-tic, antiemetic, febrifuge, for gastrointestinal disorders, vomiting, diarrhea.)

in English: tall hairy agrimony

Agrimonia parviflora Aiton (*Agrimonia eupatoria* var. *parviflora* (Aiton) Hook.; *Agrimonia parviflora* DC.; *Eupatorium parviflorum* (Aiton) Nieuwl.)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 2: 130. 1789, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 588. 1825, *Flora Boreali-Americana* 1(4): 197. 1832 and *American Midland Naturalist* 4: 71. 1915, *Brittonia* 16(1): 16. 2008

(Root or burs infusion taken as blood purifier, styp-tic, antiemetic, febrifuge, for gastrointestinal disorders, vomiting, diarrhea.)

in English: harvestlice

Agrimonia pilosa Ledeb. (*Agrimonia pilosa* fo. *davurica* Nakai; *Agrimonia pilosa* fo. *subglabra* Nakai)

Korea, China. Perennial herb, green or reddish, rootstock horizontal, fibrous roots, small yellow flowers, hardened spine calyx, in grassland, hillsides

See *Botanical Magazine* 47(556): 245–246. 1933

(Decoction of whole plant used for gastrorrhagia, melaena, haematuria, metrorrhagia, dysentery; for external use, in vaginal trichomoniasis. Tea from dried leaves and flowering tops used for intestinal catarrh; the fresh leaves used locally for cuts; leaves decoction for cough.)

in English: agrimony, hairy agrimony

in China: long ya cao, xian he cao

in India: kakriya, lesukuria, velu

in Japan: kin-mizuhiki, kiva-rayta, seta-haymosa

in Nepal: kathalange

Agrimonia pilosa Ledeb. var. *nepalensis* (D. Don) Nakai (*Agrimonia eupatoria* L. var. *nepalensis* (D. Don) O. Kuntze; *Agrimonia nepalensis* D. Don)

India. Erect herb, yellow flowers

See *Index Seminum Hort. Dorpat.*, *Suppl.* 1. 1823, *Prodr. Fl. Nepal.* 229. 1825 and *Bot. Mag.* (Tokyo) 47: 247. 1933

(Root paste for dysentery, stomachache; root powder mixed with honey and made into a paste and taken orally to check acute blood dysentery; root juice tonic and diuretic; root decoction in gastric disorders. Ash from burnt plant applied on wounds. Leaves vermifuge.)

in China: huang long wei, long ya cao

in India: knukra palnchi

in Nepal: bokromran, tinai, urman

Agrimonia pilosa Ledeb. var. *pilosa* (*Agrimonia eupatoria* L. var. *japonica* (Miq.) Masam.; *Agrimonia japonica* (Miq.) Koidz.; *Agrimonia obtusifolia* A.I. Baranov & Skvortsov; *Agrimonia pilosa* subsp. *japonica* (Miq.) H. Hara; *Agrimonia pilosa* var. *japonica* (Miq.) Nakai; *Agrimonia pilosa* var. *viscidula* (Bunge) Kom.; *Agrimonia viscidula* Bunge; *Agrimonia viscidula* var. *japonica* Miq.)

China, Japan.

See *Species Plantarum* 1: 448. 1753 and *Botanical Magazine* 44: 104. 1930, *Annual Reports of the Taihoku Botanic Garden* 2: 134. 1932

(Roots antiseptic.)

Agrimonia striata Michx.

Canada. Erect, stout, hairy, yellow flowers densely crowded

See *Flora Boreali-Americana* 1: 287. 1803

(Antiinflammatory and diuretic.)

in English: grooved agrimony, roadside agrimony, woodland agrimony

Agropyron Gaertn. Poaceae (Gramineae)

From the Greek *agros* 'a field, country' and *pyros* 'grain, wheat', see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539–540. 1770, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Essai d'une Nouvelle Agrostographie* 102, 146, 180. 1812, *Observations sur les Graminées de la Flore Belgique* 95. 1823 [1824], *Flora Altaica* 1: 112. 1829, *Flore de Lorraine* 3: 191. 1844, *Linnaea* 21(4): 425. 1848, *Botanische Zeitung. (Stem, leaves and seeds poisonous, low toxicity if eaten. The saponin-containing seeds, occurring as contaminants in grain, are poisonous to livestock, birds, and humans; symptoms are severe stomach pain, vomiting, diarrhea, dizziness, weakness, slow breathing. Human poisoning is rare. Antihypercholesterolemic and antioxidant.)

in English: bastard nigella, cockle, common corn cockle, corn champion, corn cockle, corn pink, corn rose, mullen pink, old maid's pink, purple cockle, rose champion, wild savager

in North America: common corncockle, nielle, purple cockle

in South Africa: koringblommetjie, koringroos, rooikoringblommetjie

in China: mai xian weng

Agrostemma githago L. var. *githago*

Turkey.

See *Kulturpflanze* 30: 45–96. 1982, *Planta Med.* 69(10): 921–925. 2003

(Cytotoxic activity of the seeds.)

Agrostemma gracilis Boiss. (*Agrostemma gracile* Boiss.)

Turkey.

See *Diagn. Pl. Orient.* ser. 2, 1: 80. 1854 and *Notes Roy. Bot. Gard. Edinburgh* 44: 351–356. 1987, *Phytochemistry.* 71(5–6): 663–668. 2010

(Triterpene glycosides from *Agrostemma gracilis*.)

Agrostis L. Poaceae (Gramineae)

Latin *agrostis*, *is* and Greek *agrostis*, *agrostidos* 'grass, weed, couch grass', *agron*, *agros* 'field', probably referring to the habitat; Latin *ager*, the ancient Indian *ajrah*, the Gothic *akrs*; there is considerable taxonomic confusion concerning this genus, this group is (or should be) currently under revision and review, intergeneric hybrids with *Polygogon* Desf., *Calamagrostis* Adans. and *Lachnagrostis* Trin., see *Species Plantarum* 1: 61–63. 1753, *Genera Plantarum*. Ed. 5. 30. 1754, *Familles des Plantes* 2: 495. 1763, *Flora Boreali-Americana* 1: 41–42, t. 8. 1803, *Essai sur la Flore du Département de Maine et Loire* 15, 28–29. 1809, *Essai d'une Nouvelle Agrostographie* 5, 146–148, 182, t. 3, 4, f. 2, 7. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 134. 1816, *Syst. (Species not known to be poisonous.)

in English: fly-away grass, hair bentgrass, hairgrass, rough bent, rough bentgrass, ticklegrass, winter bentgrass

in Japan: ezonukabo

Aidia Lour. Rubiaceae

Possibly from the Greek *aidios* 'everlasting', referring to the wood; or from *aidia* 'deformity', *aides* 'unseen'; see J. de Loureiro, *Flora cochinchinensis*. 143. 1790.

Aidia cochinchinensis Lour. (*Aidia densiflora* (Wall.) Masam.; *Aidia henryi* (E. Pritz.) T. Yamaz.; *Aidia merrillii* (Chun in Merr. & Chun) Tirveng.; *Aidia racemosa* (Cav.) Tirveng.; *Randia acutidens* Hemsl. & E.H. Wilson; *Randia caudatifolia* Merr.; *Randia cochinchinensis* (Lour.) Merr.; *Randia densiflora* (Wall.) Benth.; *Randia oppositifolia* Koord.; *Randia suishaensis* Hayata)

SE Asia. Small tree with many pedicelled bisexual flowers in cymes

See *Flora Cochinchinensis* 143. 1790, *Icones et Descriptiones Plantarum, quae aut sponte ...* 4: 45, pl. 368. 1798, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 394. 1830, *Nomenclator Botanicus* 2: 649. 1841, *Forest flora of British Burma* 2: 47. 1877, *Die Natürlichen Pflanzenfamilien* 4(4): 80. 1891, *Handleiding tot de Kennis der Flora van Nederlandsch Indië* 129. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(5): 581. 1901, *Bulletin of Miscellaneous Information Kew* 1906(5): 160. 1906, *Catalogue des plantes du Jardin botanique de Saigon* 6. 1919, *Flore Générale de l'Indo-Chine* 3: 244. 1923, *Philippine Journal of Science* 23(3): 268. 1923, *Sunyatsenia* 2(1): 46. 1934, *Transactions of the American Philosophical Society, new series*, 24(2): 365–366. 1935, *Science Reports of Kanazawa University* 4: 85. 1955, *Journal of Japanese Botany* 45(11): 338. 1970, *Nordic Journal of Botany* 3(2): 455. 1983, *Adansonia* 8(3): 262, 271. 1986

(Wood and bitter bark used in fever, malaria. Root decoction in bowel complaints.)

in India: kari, madana bheda

Aidia micrantha (K. Schum.) Bullock ex F. White (*Aidia micrantha* (K. Schum.) Bullock ex F. White; *Randia micrantha* K. Schum.)

Tropical Africa.

See *Bot. Jahrb. Syst.* 23: 438. 1896 and *Forest Fl. N. Rhodes.* 398. 1962, *African Study Monographs* 24(1, 2): 1–168. 2003

(Stem bark and roots for fevers, skin diseases and parasitic infections. Roots for backache, aphrodisiac.)

in Congo: etiiba, kalu, karu, tiba

Ailanthus Desf. Simaroubaceae

From the local Moluccan name *ai lanit* or *ailanto* 'reaching for the sky, the tree of heaven, sky tree, heaven tree', see *Mémoires de l'Académie des Sciences* 1786: 265, pl. 8. 1788 [*Histoire de l'Académie Royale des Sciences. Avec les Mémoires de Mathématique & de Physique. Paris*].

Ailanthus altissima (Mill.) Swingle (*Ailanthus altissima* Swingle; *Toxicodendron altissimum* Mill., Anacardiaceae)

Asia, China, Japan. Deciduous tree, small flowers in much-branched panicles, samara twisted

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 1. 1754, *The Gardeners Dictionary: ... eighth edition* no. 10. 1768, *Mémoires de l'Académie des Sciences* 1786: 265, pl. 8. 1788 and *Journal of the Washington Academy of Sciences* 6(14): 495. 1916, Muenscher, W.C. *Poisonous Plants of the United States*. Revised. Collier Books, New York, N.Y., USA. 1975, Mitchell, J.C., Rook, A. *Botanical dermatology*. Greenglass Ltd, Vancouver, B.C., Canada. 1979

(Root bark or bark used for enteritis, chronic dysentery, tapeworms, uterine bleeding, leucorrhoea, diarrhoea. Exposure to the leaves may have caused dermatitis in humans and it is suspected of being a poisonous plant as well. The tree has been suspected of causing gastroenteritis.)

in English: ailanthus, Chinese sumac, copal tree, false varnish tree, stinking cedar, tree of heaven, varnish tree

in China: chou chun, chu bai pi, chun pi, ch'u, ch'ou ch'u, ch'ou ch'un

in Japan: Shin-ju (= tree of God)

in Vietnam: ph[uw][owj]ng nh[ax]n th[ar]o, thanh th[aa]s[t n[us]i] cao

Ailanthus altissima (Mill.) Swingle var. *altissima* (*Ailanthus cacodendron* (Ehrh.) Schinz & Thell.; *Ailanthus glandulosa* Desf.; *Albonia peregrina* Buc'hoz; *Pongelion glandulosum* (Desf.) Pierre; *Rhus cacodendron* Ehrh.; *Toxicodendron altissimum* Mill.)

See *Journal of the Washington Academy of Sciences* 6(14): 495. 1916

(Antispasmodic, cardiac depressant, astringent. Root-bark used in cardiac palpitation, asthma and epilepsy.)

in China: chou chun

in India: perumaram

Ailanthus excelsa Roxb. (*Pongelion excelsum* (Roxb.) Pierre; *Pongelion wightii* van Tiegh.)

India. Many-branched tree, ill smelling leaves, flowers greenish-yellow in lax tomentose panicles, samara many nerved, on roadsides

See *Plants of the Coast of Coromandel* 1: 24, pl. 23. 1795

(Used in Ayurveda and Sidha. Leaves antispasmodic, cardiac depressant, astringent; pounded leaves tied on wounds; leaf infusion a tonic during pregnancy; leaf juice mixed with coconut milk to cure rheumatism. Bark decoction used internally for ringworm and wounds, also applied for wounds; bark paste given in dysentery; bark febrifuge, a bitter tonic; bark paste mixed with water given for abortion; fresh stem bark chewed and the juice swallowed for immediate relief from stomach pain; leaves and bark applied on skin diseases; bark and leaf infusion given as a postpartum remedy. Pasted root used for driving out field rats from the paddy fields and food stores. Veterinary medicine, bark paste given to ailing animals; powdered stem bark fed to livestock for strength

and vigour; bark extract given in loss of appetite; stem bark paste applied for skin diseases; crushed bark given to cattle to dissolve iron pieces eaten by them; for body lice, leaves crushed and applied to the body of animal; leaves warmed and bandaged on swellings of the animals; leaves decoction for fever and tympany.)

in English: tree of heaven

in India: adulsa, adusa, aduso, agal, akal, aldua-bhoot-jhad, aldua bhootjhad, aralu, aralu ki chhaal, araluka, araluvksa, arar, ardusa, arduci, arduci, arlu, arru, arua, arulavam, aruluvam, atarusha, bende, churan, dakhina kabata, dharni, dirghavrnta, dodabevu, dodda, dodda baevu, dodda bevu, dodda hebmani, dodda mara, doddabevu, doddamani, doddamara, gauli vaepa, ghoranim, hebbevu, hebmani, hem, hemmara, hire, hire mara, hiremara, kankam, katvanga, limbado, lohagal, madala, mahaa nimba, mahaanimb, mahaaruksha, mahala, mahanim, mahanimb, mahanimba, maharakha, maharuk, maharuka, maharukh (maha = taller to tallest; rukh = tree), maharukha, mahrukh, makanimpam, makatimpam, makatimpamaram, marook, maruf, marukh, mateslimbiru, matti pongilyam, mattipongilyam, motio aduso, motoarduso, mundayigatch, naru, narumaram, paba aldua, papari, pedda, pedda manu, pedda vaepamnu, pedda vepa, peddamaandu, peddamaanu, peddamandu, peddamanu, peemaram, peenari, peethari, peetherai, periamaram, peru, perumaram, perumaruntu, perumaruttu, perumaruttoo puttay, perumuttai, perupinari, peruppai, peruppi, peyvaepa, peyvavepa, piamaram, pimaram, pinari, pinnari, pisasha, pulattavirutcam, putivrksah, rukhdo, syonaka, varul, vilayti-neem

Ailanthus grandis Prain

India.

See *Ind. Forester*, xxviii. (1902) 131. 1902, *Taxon* 28: 630. 1979

(Used in diarrhoea and dysentery.)

Ailanthus triphysa (Dennst.) Alston (*Adenanthera triphysa* Dennst., Fabaceae; *Ailanthus malabarica* DC.; *Ailanthus triphysa* Alston)

India, Sri Lanka. Deciduous canopy tree, cylindrical bole, compound leaves in clusters, small polygamous flowers, seed centrally placed in a broad wing

See *Schlüssel Hortus indicus malabaricus*, ... 32. 1818, *Prodr.* (DC.) 2: 89. 1825 and *A Handbook to the Flora of Ceylon* 6(suppl.): 41. 1931

(Used in Ayurveda and Sidha. Bark and leaves tonic after childbirth, febrifuge. Gum mosquito repellent.)

in English: white bean, white siris

in Burma (Myanmar): o-dein

in China: ling nan chou chun

in India: aralu, atisarahita, baaga dhoopa, bagadhup, bagadhupa, bagadoop, baggada dhoopa, baggadadhupa,

baggadadupta, bhaaga dhoopa, daeva dhoopa, devadaru, dhoop, dhup, dhupa, dupa, erumai-pinari, goguldhup, googuldhoop, guagguladhoop, guagguladhup, guggaladupa, guggul dhup, guggula dhoopa, guggula-dhup, gugguladhup, gugguladhupa, gugguladhoopa, gugguldhup, gugguldhupa, gugul dhupa, guguldhupa, guguludhupa, gujjaladhupa, haal-maddi, hal-maddi, hem, hemmara, katvanga-phalam, katvanga, maddi, maddi dhoopa, maddi dhoppa, maddidhupa, maddidhupada, maddidupa, maddipaalu, maddipalu, mahanimba, mahanimbu, manda dhoopa, mandadupa, matippalam, matippomaliyam, matipponnalyam, matti, matti-pal, mattipal, mattipalai, mattipalam, mattipaul, mattipongilyam, mattippal, mattippalai, mudde dhoopa, paddathavetti, padathavetti, patattavetti, payan, payana, pedda-manu-patta, peddamanu, perru, peru, peru-marat-toli, peru-marattupattai, perumaram, perumaruntuppall, pisaca, pisasha, pishachavraksa, pongallyam, pongelion, pongilium, pongilium, pongilyam, ponkiliyam, ponnaliyam, ponnalyam, thuma, tumam, uguludupa, velicci-picin

in Indonesia: kayu langit, ki pahit, kirontasi, selangke

in Philippines: kalauag, malakamias

in Thailand: makkom, mayom-hom, mayom-pa

in Vietnam: b[us]t, c[af]ng hom th[ow]m

Ainsliaea DC. Asteraceae

Named after the British (b. Berwickshire) physician Sir Whitelaw Ainslie, 1767–1836 (d. London), medical botanist, M.D. Leyden 1786, from 1788 to 1815 surgeon to East India Company, knighted 1835, his works include *Materia indica*. London 1826, *Materia medica of Hindoostan*. Madras 1813, *Clemenza; or, the Tuscan Orphan: a tragic drama*. Bath 1822, *Observations on the Cholera Morbus of India*. London 1825 and *Letters on the Cholera*. London 1832; see Francis Balfour (?-1812), *A treatise on the influence of the moon in fevers*. Calcutta 1784, Hugh Murray (1779/1780–1846), *Historical and Descriptive Account of British India*. Edinburgh 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 13. 1838 and D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. London 1914, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 24. 1965.

Ainsliaea latifolia (D. Don) Sch. Bip. (*Ainsliaea hypoleuca* Diels ex H. Limpr.; *Ainsliaea hypoleuca* Diels; *Ainsliaea pteropoda* DC.; *Ainsliaea pteropoda* var. *silhetensis* DC.; *Ainsliaea silhetensis* C.B. Clarke; *Ainsliaea triflora* (Buch.-Ham. ex D. Don) Druce; *Ainsliaea triflora* Druce; *Liatris latifolia* D. Don; *Perdicium triflorum* Buch.-Ham. ex D. Don)

India, Himalaya.

See *Prodromus Florae Nepalensis* 169. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 14. 1838, *Jahresbericht der Pollichia* 18–19: 169, 190. 1861, *Journal of the Linnean Society, Botany* 14(78): 411–412. 1875 and

Botanical Society of the British Isles, News 4: 603. 1916 (1917), *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 12: 514. 1922, *Taxon* 26: 443–452, 557–565. 1977, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978

(Powdered roots diuretic and stomachic.)

in India: karuibuti

Ainsliaea aptera DC.

Himalayas, Kashmir to Bhutan. Erect herb, perennial rootstock

See *Prodr.* (DC.) 7(1): 14. 1838 and *Journal of Ethnopharmacology* 92(2–3): 167–176. 2004

(Crushed roots used for stomach problems, acute abdominal pain, painful urination, cuts, wounds; leaf and root juice taken to neutralize the effect of poison.)

in India: durwa, kalighati, kandyari, karu buti, karu booti, khadjari, kruibuti, sath jalari, sathjalani, sathjalari, sathjilari, satjaladi

Aiphanes Willdenow Palmae

From the Greek *aiphanes* ‘ever shining, ever appearing’, *aei* ‘always’ and *phaino* ‘to shine, to bring to light’, referring to the beauty and to the long flowering period of these palms, or to the jagged and erose tips of the leaves (pinnae); see *Introductio ad Historiam Naturalem* 70. 1777, *Florae Peruvianaee, et Chilensis Prodromus* 148. 1794, *Samml. Deutsch. Abh. Königl. Akad. Wiss. Berlin* 1803: 250. 1806, *Mém. Acad. Roy. Sci. Hist.* (Berlin) 1804: 32. 1807, *Linnaea* 28: 389. 1857 and *Bulletin of the Torrey Botanical Club* 28: 561, 565. 1901, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(107): 557–558, 563–564. 1932, *Gentes Herb.* 3: 245–274. 1963, F. Borchsenius & R. Bernal, “*Aiphanes* (Palmae).” *Flora Neotropica*. Volume 70. The New York Botanical Garden. 1996, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2005.

Aiphanes minima (Gaertn.) Burret (*Aiphanes acanthophylla* Burret; *Aiphanes acanthophylla* (Mart.) Burret; *Aiphanes corallina* H. Wendl.; *Aiphanes corallina* (Mart.) H. Wendl.; *Aiphanes erosa* Burret; *Aiphanes erosa* (Linden) Burret; *Aiphanes erosa* (Mart.) Burret; *Aiphanes luciana* L.H. Bailey; *Aiphanes minima* Burret; *Aiphanes vincentiana* L.H. Bailey; *Bactris acanthophylla* Mart.; *Bactris erosa* Mart.; *Bactris martiniezifolia* H. Wendl.; *Bactris martiniezifolia* Hort. ex H. Wendl.; *Bactris minima* Gaertn.; *Curima colophylla* O.F. Cook; *Curima corallina* (Mart.) O.F. Cook; *Martinezia acanthophylla* (Mart.) Becc.; *Martinezia acanthophylla* Becc.; *Martinezia corallina* Mart.; *Martinezia erosa* Linden; *Martinezia erosa* (Mart.) Linden)

Neotropics. Tree, long broad leaves borne near crown modified into hooked spines at the apex

See *De Fructibus et Seminibus Plantarum...* 2: 269–270, t. 139, f. 5. 1791, *Voyage dans l'Amérique Méridionale* 7(3; Palmiers): 66, 70, 76. 1844, *Hist. Nat. Palm.* 3: 281, 284. 1845, *Cat. Pl. Exot.* (Linden) 87: 5. 1871, *Les Palmiers* [Kerchove] 230, 234. 1878 and *Bulletin of the Torrey Botanical Club* 28: 561, 563, t. 46, 48c. 1901, *Symbolae Antillanae seu Fundamenta Florae Indiae Occidentalis* (Urban) 8(1): 79. 1920, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(107): 558–559. 1932, *Gentes Herbarum*; occasional papers on the kind of plants 8: 166, 170, f. 65, 68. 1949, *Gentes Herbarum*; occasional papers on the kind of plants 9(3): 251. 1963, *Fl. Neotrop.* 70: 71. 1996

(Injuries caused by leaf apex terminated by a rigid spine.)

in Brazil: cariota-de-espinho, macaw palm, palmeira rabo de peixe

Ajania Poljakov Asteraceae

From Ajan, East Asia, coast of Siberia, see *Flora URSS* 26: 401, 405, 408. 1961, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 6: 12. 1980.

Ajania tibetica (Hook. f. & Thomson) Tzvelev (*Ajania sikangensis* Ling; *Chrysanthemum tibeticum* (Hook. f. & Thomson) Hoffm.; *Chrysanthemum tibeticum* (Hook. f. & Thomson) S.Y. Hu; *Chrysanthemum tibeticum* C.B. Clarke; *Chrysanthemum tibeticum* B. Fedtsch.; *Tanacetum emodi* R. Khan; *Tanacetum tibeticum* Hook. f. & Thomson)

India, Tibet.

See *Compositae Indicae* 147, 154. 1876 and Paulsen, Ove Vilhelm (1874–1947), *Lieutenant Olufsen's second Pamir Expedition: plants collected in Asia-Media and Persia*. 1903, *Flora URSS* 26: 410. 1961, *Quarterly Journal of the Taiwan Museum* 19: 44. 1966, *Edinburgh J. Bot.* 48(1): 45, nom. nov. 1991

(Sedative.)

Ajania variifolia (C.C. Chang) Tzvelev (*Ajania manchurica* Poljakov; *Chrysanthemum variifolium* C.C. Chang; *Phaeostigma variifolium* (C.C. Chang) Muldashev)

China.

See *Sinensia* 5(1–2): 161–163. 1934, *Flora URSS* 26: 401. 1961, *Botaničeskij Žurnal* (Moscow & Leningrad) 66(4): 587. 1981

(Whole plant used for relieving spasms.)

in China: yi ye ya ju

Ajuga L. Lamiaceae (Labiatae)

Origins obscure; possibly from the Greek *a* 'not, without' and Latin *iugum*, *i* (*iungo*) 'a yoke', the calyx is undivided, Greek *zygon*, *zygos* 'yoke'; it also could be a variant of the

old Latin name *abiga*, *ae* (*abigo* 'to drive away') applied by Plinius to a plant which has the power of producing abortion, to *Chamaepitys* or *chamaipitys*, ground-pine, a species of *Teucrium*; see Carl Linnaeus, *Species Plantarum* 2: 561. 1753, *Gard. Dict. Abr.* ed. 4. 28 Jan 1754, *Genera Plantarum* Ed. 5. 246. 1754, *Brit. Herb.* 371. 1756, *Labiatarum Genera et Species* 692. 1835, *Ann. Soc. Bot. Lyon.* 7: 85. 1880, *Mel. Biol. Acad. Sci. St. Petersb.* 11: 808–809, 819. 1883, *Rev. Gen.* 2: 512. 5 Nov 1891 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2: 287–288. 1929, *Acta Phytotaxonomica Sinica* 12(1): 21–23. 1974, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 47. Basel 1996.

Ajuga bracteosa Wall. ex Benth. (*Ajuga bracteosa* Wall. ex Benth.; *Ajuga bracteosa* Benth. var. *canescens* (Benth.) Engl.; *Ajuga bracteosa* Benth. var. *crenata* (Hochst. ex Vatke) Baker; *Ajuga bracteosa* var. *densiflora* (Wall. ex Benth.) Hook. f.; *Ajuga crenata* (Hochst. ex Vatke) Chiov.; *Ajuga densiflora* Wall. ex Benth.; *Ajuga integrifolia* Buch-Ham. var. *canescens* (Benth.) Cufod.; *Ajuga remota* Wall. ex Benth.; *Ajuga remota* Benth.; *Ajuga remota* var. *canescens*; *Ajuga remota* var. *crenata* Hochst. ex Vatke)

India, Nepal. Perennial aromatic herb, pale blue to whitish flowers

See *Plantae Asiaticae Rariores* 1: 59. 1830

(Plant bitter tonic, antidiabetic, astringent, febrifuge, toxic, diuretic, used to stop bleeding and reduce inflammation. Juice of the leaves as a blood purifier, for fevers, in earache, applied on cuts for quick relief and healing; powdered leaves for burns, cuts and boils; leaves mixed with black pepper used for diabetes and body swellings; leaves infusion given in pneumonia, bronchitis, headache, diabetes, gastric pain and typhoid fever.)

in English: many-bracteole bugle

in China: jiu wei yi zhi hao

in India: faniadaur, janiadam, kadmipatti, neelbadi, neelkant, neelkanthi, neelkhanti, nilkanthi, rat patya, ratpatia, ratpatiya

Ajuga campylantha Diels (from the Greek *kampylos* 'curved' and *anthos* 'flower').

China. Herbs, prostrate, tubular corolla white with purple lines

See *Notes from the Royal Botanic Garden, Edinburgh* 5: 243–244. 1912

(For malaria and cold.)

in China: wan hua jin gu cao

Ajuga ciliata Bunge

China.

See *Mémoires Présentés à l'Académie Impériale des Sciences de St.-Pétersbourg par Divers Savans et lus dans ses Assemblées* 2: 125. 1833

(Used for hemolysis, tonsillitis and sore throat.)

in English: ciliate bugle

in China: jin gu cao

Ajuga decumbens Thunberg

East Asia.

See *Fl. Jap.* 243. 1784, *Systema Vegetabilium*. Editio decima quarta 525. 1784

(Analgesic, anticoagulant, depurative, febrifuge, haemostatic. Leaves decoction, or leaf juice, used internally in the treatment of bladder ailments, diarrhea, eye troubles, externally applied to burns, cuts.)

in China: jin chuang xiao cao

Ajuga forrestii Diels (*Ajuga mairei* H. Léveillé)

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 242–243. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 12(341–345): 533. 1913

(Used for dysentery and ascariasis.)

in China: li zhi hao

Ajuga iva Schreb. (*Ajuga humilis* Porta; *Ajuga iva* (L.) Schreb.; *Ajuga iva* subsp. *humilis* (Porta & Rigo) Sennen & Mauricio; *Ajuga iva* var. *grandiflora* Faure & Maire; *Ajuga iva* var. *pseudoiva* (DC.) Benth.; *Ajuga iva* var. *robertiana* Maire; *Teucrium iva* L.)

Mediterranean.

See *Journal of Ethnopharmacology* 91(1): 43–50. 2004, *Journal of Ethnopharmacology* 93(1): 69–74. 2004

(Vasorelaxant, hypoglycemic, antimalarial. Used for gastrointestinal disorders and diabetes, and as an anthelmintic and diuretic.)

Ajuga lupulina Maxim.

China, Nepal.

See *Bull. Acad. Imp. Sci. Saint-Pétersbourg* 23(2): 390–391. 1877 and *Acta Phytotaxonomica Sinica* 12(1): 22. 1974

(Plant paste on muscular pain.)

in China: bai bao jin gu cao

in Nepal: jhyasuk

Ajuga macrosperma Wallich ex Benth (*Ajuga macrosperma* Kudô)

China.

See *Plantae Asiaticae Rariores* 1: 58. 1830 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2: 290. 1929

(Used for nephritis. Whole plant pounded and applied to a sore gum, tooth or cheek. Magic, contact therapy, amulet, stem tied to treat bodyache.)

in China: da zi jin gu cao

in India: chinggi-sangbrei, phulomari

Ajuga multiflora Bunge var. *multiflora* (*Ajuga amurica* Freyn; *Ajuga lanosa* Sun)

China.

See *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 2: 125. 1833 and *Oesterreichische Botanische Zeitschrift* 52(10): 408. 1902, *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series* 7: 14, f. 1. 1932, *Botaniceskij Žurnal SSSR* 71: 195–200. 1986

(Used as a diuretic.)

in China: duo hua jin gu cao

Ajuga nipponensis Makino (*Ajuga decumbens* Thunberg var. *pallescens* (Maximowicz) Handel-Mazzetti; *Ajuga genevensis* L. var. *pallescens* Maximowicz; *Ajuga labordei* Vaniot; *Ajuga macrosperma* Kudô; *Ajuga matsumurana* Kudô; *Ajuga nipponensis* var. *pallescens* (Maximowicz) C.Y. Wu & C. Chen; *Ajuga pallescens* Price & Metcalf; *Ajuga pallescens* (Maxim.) W.R. Price & F.P. Metcalf)

Japan.

See *Systema Vegetabilium*. Editio decima quarta 525. 1784, *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Pétersbourg* 11: 816. 1883 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 14(183): 185–186. 1904, *Bot. Mag. (Tokyo)*. 23(267): 67–68. 1909, *Lingnan Science Journal* 13(1): 135. 1934, *Acta Horti Gothoburgensis* 9(5): 72. 1934, *Acta Phytotaxonomica Sinica* 12(1): 28. 1974, *Taiwania* 40(2): 157–172. 1995, *Journal of toxicology. Clinical toxicology* 43(6): 583–585. 2005, *Pak. J. Bot.* 40(5): 1983–1992. 2008

(Toxic, acute poisoning, renal failure. A remedy for traumatic injuries, hepatoma and inflammation. Antifeedant, insecticides, pesticides.)

in English: Japanese bugle

in China: zi bei jin pan

Ajuga ophrydis Burch. ex Benth.

South Africa. Small herb, perennial rootstock, round-tipped leaves in a rosette

See *Prodr.* (DC.) 12: 597. 1848

(A natural fertility herb, roots infusion used to enhance fertility, to cure menstrual disorders, and also hyperactivity in children.)

in English: bugle

in Lesotho: senyarela

Ajuga parviflora Benth. (*Bulga parviflora* (Benth.) Kuntze; *Bulga parviflora* Kuntze)

India. Herb, diffusely branched from the base, ovate leaves, blue flowers

See *Plantae Asiaticae Rariores* 1: 59. 1830, *Revisio Generum Plantarum* 2: 512. 1891

(Plant juice in gonorrhoea and intermittent fevers. Root powder decoction taken to get relief from fever and malaria; root extract for typhoid. Paste of leaves for headache; powdered leaves useful for bleeding piles.)

in India: neelkanth, neelkanthi, nilkanthi, titpatti

Ajuga salicifolia Schreber (*Ajuga salicifolia* (L.) Schreb.; *Ajuga salicifolia* Steven, nom. illeg.)

Europe.

See *Mémoires de la Société Impériale des Naturalistes de Moscou* 3: 265. 1812 and *Z. Naturforsch.* 58c, 177–180. 2003, *Journal of Natural Products* 66(4): 461–5. 2003, *Journal of Ethnopharmacology* 91(1): 43–50. 2004

(Antileukemic and cytotoxic sterols from the aerial parts.)

Akebia Decne. Lardizabalaceae

From the Japanese name *akebi* applied to these shrubs, see *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 5: 394. 1837.

Akebia quinata (Houttuyn) Decaisne (*Akebia micrantha* Nakai; *Akebia quinata* fo. *diplochlamys* (Makino) T. Shimizu; *Akebia quinata* fo. *polyphylla* (Nakai) Hiyama; *Akebia quinata* fo. *viridiflora* Makino; *Akebia quinata* var. *diplochlamys* Makino; *Akebia quinata* var. *polyphylla* Nakai; *Akebia quinata* var. *yechi* W.C. Cheng; *Akebia quinata* var. *yehii* W.C. Cheng; *Rajania quinata* Houttuyn)

China, Japan. Deciduous vine, woody

See *Species Plantarum* 1: 1032. 1753, *Natuurlijke Historie* 11: 366, pl. 75, f. 1. 1779, *Archives du Muséum d'Histoire Naturelle* 1: 195, pl. 13a. 1839 and *Botanical Magazine* 16: 182. 1902, *Journal of Japanese Botany* 7: 376. 1931, *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series* 8: 289. 1933, *Flora Sylvatica Koreana* 21: 44. 1936, *Journal of Japanese Botany* 36: 246. 1961, *Quarterly Journal of the Taiwan Museum* 14: 202. 1961, *Journal of Shandong College of Traditional Chinese Medicine* 12: 55–57. 1988, *Chinese Wild Plant Resources* 19(1): 36–38. 2000

(Anodyne, antinociceptive, antiinflammatory, antifungal, antiphlogistic, tonic, contraceptive, antimicrobial, depurative, antirheumatic, diaphoretic, diuretic, emmenagogue, febrifuge, galactagogue, laxative, stimulant, stomachic, vulnerary.)

in English: akebia, akebia fruit, chocolate vine, five-leaf akebia

in Japan: akebi

in China: ba yue sha, ba yue zha, bai mu tong, mu tong, mu t'ung, t'ung ts'ao, wu fu tzu, yen fu tzu

Akebia trifoliata (Thunberg) Koidzumi (*Akebia clematifolia* Siebold & Zuccarini; *Akebia lobata* Decne.; *Akebia lobata* var. *clematifolia* (Siebold & Zuccarini) Ito; *Akebia lobata* var. *quercifoliata* (Siebold & Zucc.) Ito; *Akebia quercifolia* Siebold & Zuccarini; *Akebia sempervirens* Nakai; *Akebia trifoliata* var. *clematifolia* (Siebold & Zuccarini) Nakai; *Akebia trifoliata* var. *honanensis* T. Shimizu; *Clematis trifoliata* Thunberg)

China. Flowers sweetly scented

See *Species Plantarum* 1: 543–545. 1753, *Trans. Linn. Soc. London* 2: 337. 1794, *Flora Japonica* 1: 146. 1835, *Arch. Mus. Paris* 1: 196, pl. 13b, 1839, *Annales des Sciences Naturelles; Botanique*, sér. 2, 12: 107. 1839, *Journal of the Linnean Society, Botany* 22: 425. 1887 and *Bot. Mag. (Tokyo)* 39: 310. 1925, *Chemical and Pharmaceutical Bulletin* 51(8): 960–965. 2003

(Analgesic, antibacterial, antifungal, antiinflammatory, cardiotonic, diuretic, emmenagogue, galactagogue.)

in China: mu tong, san ye mu tong

Alafia Thouars Apocynaceae

See *Genera Nova Madagascariensia* 11. 1806 and *Kew Bulletin* 52(4): 769–839. 1997.

Alafia barteri Oliv. (*Alafia giraudii* Dubard; *Alafia glabri-flora* Pichon; *Alafia klaineana* Pierre ex Pichon)

W. Tropical Africa. Large liana, lianescent shrub, climbing, clear sap or milky juice, swollen nodes, papery leaves, sweetly fragrant flowers, green calyx, corolla white, fruits 2 separate cylindrical linear dehiscent dark brown many-seeded follicles

See *Hooker's Icon. Pl.* 20: t. 1992. 1891 and *Notul. Syst. (Paris)* 2: 201. 1912, *Bull. Jardin Bot. État* 24. 173. 1954

(Stem and leaves for inflammation and fevers. Leaves antifungal, leaf infusion to treat malaria, a decoction to treat rheumatic pains.)

Alafia caudata Stapf (*Alafia butayei* Stapf; *Alafia caudata* subsp. *latiloba* Kupicha; *Alafia conica* Pichon; *Alafia sarmentosa* Stapf)

Gabon, Kenya, Angola.

See *Bull. Misc. Inform. Kew* 1894: 123. 1894 and *Fl. Trop. Afr.* 4(1): 199. 1902, *Bull. Jard. Bot. Natl. Belg.* 51: 161. 1981

(Bark scrapings, along with the fruit of *Capsicum annuum*, rubbed on the skin to treat kidney pain.)

Alafia erythrophthalma (K. Schum.) Leeuwenb. (*Alafia grandis* Stapf; *Tabernaemontana erythrophthalma* K. Schum.)

Senegal, Central African Republic.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 224. 1896 and *Fl. Trop. Afr.* 4(1): 196. 1902, *Novon* 6(3): 271. 1996

(Leaves decoction to treat rheumatic pains. Seeds and roots an ingredient of arrow poison.)

Alafia landolphioides (A. DC.) K. Schum. (*Alafia landolphioides* Benth. & Hook.f.; *Alafia landolphioides* (A. DC.) Benth. & Hook.f. ex K. Schum.; *Alafia scandens* (Thonn.) De Wild.; *Holarrhena landolphioides* A. DC.)

Tropical Africa. Liana, white latex, fragrant flowers, corolla white, fruits 2 separate cylindrical linear dehiscent dark brown many-seeded follicles

See *Prodr.* 8: 414. 1844, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 708, in obs. 1876 and *Not. Apocyn. Latic. Congo* 15. 1903, Govaerts, R. *World Checklist of Seed Plants*. MIM, Deurne. 1995 [as *Alafia scandens*.], Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. Kew. 2003 [as *Alafia scandens*.]

(Leaf decoction taken to treat rheumatism. Latex an ingredient of arrow poison.)

Alafia lucida Stapf (*Alafia cuneata* Stapf; *Alafia major* Stapf; *Alafia reticulata* K. Schum.; *Wrightia stuhlmannii* K. Schum.)

Uganda, Angola. Large liana, woody vine, white juice, green buds, yellow green sweet scented flowers, red at mouth of corolla tube, fruits 2 separate cylindrical linear dehiscent dark brown many-seeded follicles

See *Bull. Misc. Inform. Kew* 1894: 122. 1894, *Bull. Misc. Inform. Kew* 1898: 307. 1898

(Leaf decoction to wash sores, also taken orally to treat stomach complaints. A paste made from bark and plant sap applied as a dressing to promote the healing of wounds. Aerial parts infusion taken to treat jaundice and swollen glands, also dripped into the eye to cure eye problems. Latex, with sap of *Costus* sp., used as arrow poison.)

in Zaire: autu

Alafia multiflora (Stapf) Stapf (*Alafia malouetioides* K. Schum.; *Holalafia multiflora* Stapf)

West Tropical Africa. Tall liane, milky latex, creamy white fleshy flowers in dense terminal heads, mild fragrance, fruits a cylindrical linear dehiscent glabrous many-seeded capsule

See *Bull. Misc. Inform. Kew* 1894: 123. 1894 and *Bull. Misc. Inform. Kew* 1908: 303. 1908

(Stembark or fruit decoction taken to relieve abdominal pain. Fresh latex antibacterial, to treat yaws. Latex antibacterial, mixed with bark scrapings applied to wounds and ulcers, latex diluted with water taken to cure stubborn wounds. Seeds an ingredient of arrow poison. Ritual, magic.)

in Zaire: auta, belombólombo, hautu, tshelombólombo

Alafia perrieri Jum. (*Alafia insularis* Pichon; *Alafia intermedia* Pichon; *Alafia lutea* Boivin ex Pichon; *Alafia parvifolia* Pichon; *Alafia perrieri* var. *parvifolia* (Pichon) Markgr.)

Madagascar. Liana, woody, scrambling, white latex, flowers coral pink heavily sweet scented

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, II, 5: 346–348, t. 6–7. 1907, *Bull. Jardin Bot. État* 24. 129–222. 1954

(Leaf decoction to wash sores, also taken orally to treat stomach complaints. Bark decoction taken to treat jaundice, measles and fevers. A paste made from bark and plant sap applied as a dressing to promote the healing of wounds. Aerial parts infusion taken to treat jaundice and swollen glands, also dripped into the eye to cure eye problems.)

Alafia schumannii Stapf (*Alafia bequaertii* De Wild.; *Holalafia schumannii* (Stapf) Woodson)

Sierra Leone, Uganda.

See *Flora of Tropical Africa* [Oliver et al.] 4(1.2): 197, t. 3, f. 3, 17, 18, 36, 37. 1902, *Plantae Bequaertianae* 1: 407. 1922, *Annals of the Missouri Botanical Garden* 37(3): 406. 1950

(Latex for treating wounds, dropped directly into the wound to improve healing.)

Alangium Lam. Cornaceae (Alangiaceae)

From a Malayalam vernacular name, *alangi* or *angolam*, used in Kerala for *Alangium salviifolium* (L.f.) Wang, see *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 174. 1783, *Adansonia* 5: 193, 195. 1864–1865, *Die Natürlichen Pflanzenfamilien* 8: 261. 1898 and *Das Pflanzenreich* 41: 6–7. 1910.

Alangium chinense (Lour.) Harms (*Alangium begoniifolium* (Roxb.) Baill.; *Alangium begoniifolium* subsp. *eubegoniifolium* Wangerin, nom. inval.; *Alangium chinense* Rehder; *Alangium chinense* (Lour.) Rehder & E.H. Wilson; *Alangium chinense* subsp. *chinense*; *Alangium chinense* subsp. *pauciflorum* W.P. Fang; *Alangium chinense* subsp. *strigosum* W.P. Fang; *Alangium chinense* subsp. *triangulare* (Wangerin) W.P. Fang; *Alangium chinense* var. *pauciflorum* W.P. Fang ex Y.C. Ho; *Alangium chinense* var. *vulgare* Merr., nom. inval.; *Alangium kenyense* Chiov.; *Alangium octopetalum* Hanes ex Blanco; *Alangium octopetalum* Blanco; *Alangium platanifolium* f. *triangulare* Wangerin; *Guettarda jasminiflora* Blanco; *Karangolum chinense* Kuntze; *Karangolum chinense* (Lour.) Druce; *Marlea virgata* Zoll.; *Stelanthus solitarius* Stokes; *Stylidium bauthas* Lour. ex B.A. Gomes; *Stylidium chinense* Lour.; *Stylis chinensis* (Lour.) Poir.)

Trop. Africa, Trop. & Subtrop. Asia. Small fast growing tree, twigs with a little weak white sap, rank odor, leaves arranged

in zigzag arrays on long horizontal branches, flowers in axillary clusters

See *Encyclopédie Méthodique, Botanique* 1: 174. 1783, *Flora Cochinchinensis* 1: 221. 1790, *Species Plantarum*. Editio quarta 4: 7, 146. 1805, *Hortus Bengalensis*, or a catalogue ... 28. 1814, *Encyclopédie Méthodique. Botanique* ... Supplément 5(1): 260. 1817, *Plants of the Coast of Coromandel* 3: 80. 1820 [1819], *Fl. Filip.*, ed. 2 [F.M. Blanco] 310. 1845, *Histoire des Plantes* 6: 270. 1877, *Revisio Generum Plantarum* 1: 272. 1891, *Berichte der Deutschen Botanischen Gesellschaft* 15: 24. 1897 and *Plantae Wilsonianae* (Sargent) 2(3): 552. 1916, *Enum. Philipp. Fl. Pl.* 3: 240. 1923, *Trans. Am. Phil. Soc.* n. s. xxiv. II. 16, 296. 1935, *Racc. Bot. Miss. Consol. Kenya* 47. 1935, *Flora of Tropical East Africa* 1–4. 1958, *J. Sichuan Univ., Nat. Sci. Ed.* 2: 93–95. 1979, *Fl. Tsinlingensis* 1(3): 455. 1981, *J. Nat. Prod.* 63(1): 95–8. 2000, *Chem. Pharm. Bull.* (Tokyo). 49(10): 1343–5. 2001

(Used in Ayurveda. Bark and root highly toxic. Leaved and fruits for mental illness, coughs, cold. Leaves decoction carminative, laxative, emetic, astringent, stomachic, contraceptive, tonic, analgesic, used for rheumatism, traumatic injuries, body pain, skin diseases, fever, pregnancy disorders, wounds and snakebites. Veterinary medicine. Magic, ritual.)

in India: aksikiphala, aksipidaka, bodi dhili, chagali gach, chia amrulia, chika maruli, chorai hara, kodal kania, phagrang

in Burundi: umugofu

in Cameroon: mekehe, mekekeu

in Congo: busele, lubese

in East Africa: mutobolo

in Rwanda: umuvugangoma

in Tanzania: albassa, mringonu

Alangium kurzii Craib (*Alangium begoniifolium* var. *tomentosum* (Blume) Palm, nom. illeg.; *Alangium begoniifolium* var. *typicum* Wangerin; *Alangium chinense* var. *tomentosum* (Blume) Merr.; *Alangium handelii* Schnarf; *Alangium kurzii* var. *handelii* (Schnarf) W.P. Fang; *Alangium kurzii* var. *laxiflorum* (Y.C. Wu) W.P. Fang; *Alangium kurzii* var. *pachyphyllum* W.P. Fang & H.Y. Su; *Alangium kurzii* var. *umbellatum* (Yen C. Yang) W.P. Fang; *Alangium kwangsiense* Melch.; *Alangium rotundifolium* var. *laxiflorum* Y.C. Wu; *Alangium tomentosum* (Blume) Hand.-Mazz., nom. illeg.; *Alangium umbellatum* Yen C. Yang; *Diacarpium tomentosum* Blume; *Marlea tomentosa* (Blume) Endl. ex Hassk.)

China to W. Malesia. Similar to *Alangium chinense*

See *Encyclopédie Méthodique, Botanique* 1: 174. 1783 and *Bulletin of Miscellaneous Information Kew* 1911(1): 60. 1911, *Anz. Akad. Wiss. Wien, Math.-Naturwiss. Kl.* 59: 107. 1922, *Notizbl. Bot. Gart. Berlin-Dahlem* 10: 823. 1929, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 71(2): 199. 1940, *Contributions from the Biological Laboratory of the Science Society of China:*

Botanical Series 12(3): 135. 1941[1942], *Acta Scientiarum Naturalium Universitatis Szechuanensis* 1979(2): 96, pl. 2, f. 1–2, 97, pl. 3, f. 1, 98. 1979, *Chem. Pharm. Bull.* (Tokyo). 48(3): 415–9. 2000

(The juice of the fruit is poisonous to the skin, causing itching.)

Alangium salviifolium (L.f.) Wangerin (*Alangium decapetalum* Lam.; *Alangium lamarckii* Thwaites; *Alangium lamarckii* var. *glandulosum* (Thwaites) C.B. Clarke; *Alangium salviifolium* subsp. *decapetalum* (Lam.) Wangerin; *Alangium salviifolium* subsp. *hexapetalum* (Lamarck) Wangerin; *Alangium tomentosum* Lam.; *Grewia salviifolia* L.f.; *Karangolum salviifolium* (L.f.) Kuntze; *Karangolum salviifolium* Kuntze)

Trop. Africa, China, Trop. Asia. Small tree, thorny or unarmed, pale white flowers, violet to deep purple berries, slightly acrid ripe odorous fruits eaten

See *Species Plantarum* 2: 964. 1753, *Supplementum Plantarum* 409–410. 1781 [1782], *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 174. 1783, *Enumeratio Plantarum Zeylaniae* [Thwaites] 133. 1859, *The Flora of British India* 2: 742. 1879, *Revis. Public Health*. 33 Suppl. 3: 152–4. 2002

(Used in Sidha. Antifungal. Traditionally used for tonic and treatment of hemorrhoids. This plant shows promising antimicrobial activity.)

in India: eralineil

Alangium salviifolium (L.f.) Wangerin subsp. ***salviifolium*** (*Alangium acuminatum* Wight ex Steud., nom. inval.; *Alangium decapetalum* Lam.; *Alangium lamarckii* Thwaites; *Alangium latifolium* Miq. ex C.B. Clarke; *Alangium mohillae* Tul.; *Alangium salviifolium* subsp. *decapetalum* (Lam.) Wangerin; *Alangium sundanum* var. *miqueliana* Kurz; *Alangium tomentosum* Lam.; *Karangolum mohillae* (Tul.) Kuntze)

E. Trop. Africa, Indian Subcontinent, China.

See *Enum. Pl. Zeyl.*: 133. 1859 and *Das Pflanzenreich* 41(IV.220b): 9. 1910

(Used in Ayurveda. Antifungal, antibacterial.)

in India: adigolam, akarkanta, akhaul, akol, akola, akolah, alanci, alangi, alincil, alinjil, alinnil, amgolum, amkolam, amkolam-chettu, amkole, anedhera, angkula, angkura, angolam, angolavayiravan, ankalige, ankili, ankoda, ankoelaemara, ankol, ankola, ankolaka, ankolam, ankolamu, ankolare, ankole, ankoleda, ankoli, ankollah, ankolo, ankololu, ankolum, ankora, ankota, ankotaka, ankotha, ankukalam, ankul, anosroli, ansroli, arinil, arinjil, arulavam, ashunji, asroli, atikoevam, attigolam, ayan-golam, azhinji maram, azhinji-maram, baghankura, bhushita, cem, chem, chemmaram, dhalakura, dhera, dirghakila, dirghakilaka, dridhakan-taka, eginam, eralinjil, erashunji, gandhapyshpa, ghalanta, guddadagoni, gudhapatra, gudhavallika, gunadhyaka, guptasneha, irangashunji, itikolam, kallumavina, kallumavu, kankarola, kanthora, karaangolam, karangolam, karankolam, kimri, kolaka, kothara, kudagu, kweli, lambakarna, lucki, madana, morata, nallankolamu, nalluduga, nedishta, nikochaka, nikothaka, pita, pitasara, ramatha, rechi, rohana, shoedhanam, sodana, sodhanam, tamraphala, thailaankul, uduga, udugachettu, uru, vallithondi, vamaka, vishaghna, vishalatailagarbha, vlittonti, vvallittonti

Albertisia Becc. Menispermaceae

See *Gen. Pl.* [Bentham & Hooker f.] 1(1): 36. 1862, *Malesia Raccolta* ... 1: 161. 1877 and *Kew Bulletin* 30(1): 77–100. 1975, *Journal of Natural Products* 50: 529–599. 1987, *Journal of Natural Products* 54: 645–749. 1991.

Albertisia cordifolia Forman (*Albertisia cordifolia* (Mangenot & J. Miège) Forman; *Epinetrum cordifolium* Mangenot & Miede)

Tropical Africa, Ivory Coast. Shrub or liana, scandent, dioecious, inflorescence an axillary few-flowered cyme, see also *Epinetrum cordifolium*

See *Revue Générale de Botanique* 58: 443, t. 1. 1951, *Kew Bulletin* 39(1): 83. 1975

(Said to be poisonous to sheep. Leaves and stems anti-inflammatory, astringent, for anemia and circulation troubles. Root aphrodisiac and stimulant, to treat anemia and edema of the legs; root pulp sedative, hemostatic, for gonorrhoea and uterus complaints.)

Albertisia delagoensis (N.E. Br.) Forman (*Epinetrum delagoense* (N.E. Br.) Diels; *Epinetrum delagoense* Diels; *Synclisia delagoense* N.E. Br.)

Mozambique, South Africa. Small shrub or liana, dioecious

See *Bull. Misc. Inform. Kew* (1892) 196. 1892 and *Pflanzenr.* (Engler) Menispermaceae. 96. 1910, *Kew Bull.* 30(1): 83. 1975,

Farmaco 41(6): 185–189, 190–196. 1986, *Antimicrobial Agents and Chemotherapy* 38: 96–103. 1994, *Fitoterapia* 78(6): 420–422. 2007

(Plant bitter, antiamebic, antimalarial, antibacterial and antifungal; leaves cytotoxic; leaves and roots antiplasmodial, antiprotozoal, spasmolytic. Root anthelmintic, antimicrobial, antiinflammatory, analgesic, to treat fever, influenza, diarrhea, vomiting, menstrual disorders, chest and body pain. Ash of burnt roots applied to heal sores, ulcers and wounds.)

Albertisia mangelotii (Guillaumet & Debray) Forman (*Albertisia mangelotii* Forman; *Epinetrum mangelotii* Guillaumet & Debray)

Ivory Coast.

See *Adansonia* sér. 2, 4: 315. 1964, *Kew Bull.* 30(4): 688. 1975 (publ. 1976)

(Leaf sap applied to treat toothache.)

Albertisia scandens (Mangenot & J. Miège) Forman (*Epinetrum scandens* Mangenot & Miede)

Ghana, Ivory Coast.

See *Revue Générale de Botanique* 58: 442, t. 1. 1951, *Kew Bull.* 30(1): 83. 1975

(Leaf sap applied to treat toothache and skin affections.)

Albertisia undulata (Hiern) Forman (*Epinetrum undulatum* Hiern)

Tropical Africa.

See *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 21. 1896 and *Kew Bull.* 30(1): 83. 1975

(Used as an abortifacient. Crushed leaves in palm oil are applied to treat wounds.)

Albertisia villosa (Exell) Forman (*Epinetrum villosum* (Exell) Troupin; *Synclisia villosa* Exell)

Gabon, Congo. Dioecious liana, see also *Epinetrum villosum*

See *J. Bot.* 70(Suppl. 1): 214. 1932, *Fl. Congo Belge & Ruanda-Urundi* ii. 222. 1951, *Kew Bull.* 30(1): 84. 1975, *Journal of Ethnopharmacology* 71(3): 411–423. 2000, *Journal of Ethnopharmacology* 93(2–3): 331–335. 2004, *Journal of Ethnopharmacology* 102: 89–94. 2005

(Abortifacient. Root extract astringent, cytotoxic, abortifacient, antifungal, antiamebic, antidiarrheal, antibacterial and antiplasmodial; root bark for the treatment of malaria.)

Albizia Durazzini Fabaceae (Ingeae)

After Filippo degli Albizzi, an Italian nobleman who introduced *Albizia julibrissin* from Constantinopoli into Europe about 1749; see Antonio Durazzini, *Magazzino Toscano*. 3(4): 11, 13–14. 1772.

Albizia adianthifolia (Schumach.) W. Wight (*Albizia adianthifolia* var. *adianthifolia*; *Albizia adianthifolia* var. *intermedia* (De Wild. & T. Durand) Villiers, nom. superf. illeg.; *Albizia ealaensis* De Wild.; *Albizia fastigiata* (E. Mey.) Oliv.; *Albizia ferruginea* (Guill. & Perr.) Benth.; *Albizia gummifera* (J.F. Gmel.) C.A. Sm.; *Albizia gummifera* auct. non (J.F. Gmel.) C.A. Sm.; *Albizia gummifera* sensu R.O. Williams; *Albizia gummifera* sensu Capuron; *Albizia gummifera* var. *gummifera*; *Albizia intermedia* De Wild. & T. Durand; *Albizia sassa* sensu Aubrev.; *Inga fastigiata* (E. Mey.) Oliv.; *Inga ferruginea* Guill. & Perr.; *Mimosa adianthifolia* Schumach.; *Sassa gummifera* J.F. Gmel.; *Zygia fastigiata* E. Meyer) (Latin *adianthifolia* ‘leaves like a maiden-hair fern’)

Tropical Africa. Perennial non-climbing tree, slender, conspicuous flat crown, sweet-smelling gum or resin, leaves papery, petiole a gland at the base, creamy white fragrant flowers, fruit a thin pod, foliage browsed by cattle and wild ruminants, in savanna, frequently confused with *Albizia gummifera*

See *Systema Naturae* ... editio decima tertia, aucta, reformata 1038. 1791, *Beskrivelse af Guineiske planter* 322. 1827, *Florae Senegambiae Tentamen* 1: 236. 1830, *London Journal of Botany* 3: 88. 1844 and *Bulletin de l'Herbier Boissier*, sér. 2, 1: 751. 1901, *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 2: 126. 1907, *U.S. Dept. Agr. Bur. Pl. Industry, Bull.* 137, 12. 1909, *Bulletin of Miscellaneous Information Kew* 1930(5): 218. 1930, *Kew Bulletin* 7(4): 518. 1952 [1953], *Flore du Gabon* 31: 147. 1989, *Journal of Ethnopharmacology* 43: 89–124. 1994, *Journal of Ethnopharmacology* 114: 44–53. 2007

(Bark known to be poisonous. Fruit extract drunk to relieve stomachache. Leaves decoction antiseptic, cytotoxic, astringent, for asthma, diarrhea and gonorrhoea; bark stem, leaves, branches and trunk haemostatic, laxative, febrifuge, emetic, antiseptic, analgesic, for bronchitis, cough, pulmonary diseases, diabetes, malaria. Powdered snuffed seeds for headache. Bark sap applied to the eye to treat conjunctivitis, and internally against respiratory complaints and to treat allergic reactions. Bark decoction or infusion anthelmintic, vermifuge, purgative, for Guinea-worm, to treat fever, scabies, boils and itching skin, to improve memory and to treat Alzheimer's disease. Veterinary medicine. Plant used to ward off evil spirits; love charm emetic. Bark and leaves serve as fish poison; bark used in hunting poison.)

in English: flat crown, flat-crown albizia, rough-bark flat-crown, West African albizia

in Burundi: igihoza, ikivusa

Albizia coriaria Oliv. (*Albizia coriaria* Welw.; *Albizia coriaria* Welw. ex Oliv.; *Albizia katangensis* De Wild.; *Albizia poissonii* A. Chev.; *Feuilleea coriaria* (Welw. ex Oliv.) Kuntze; *Feuilleea coriaria* Kuntze)

Tropical Africa. Perennial non-climbing tree, spreading crown, white flowers, a pioneer species, closely related to *Albizia ferruginea*

See *Flora of Tropical Africa* 2: 360. 1871, *Revisio Generum Plantarum* 1: 187. 1891 and *Economic Botany* 44(3): 369–381. 1990, *Journal of Ethnopharmacology* 46: 17–23. 1995, *Journal of Ethnopharmacology* 88: 19–44, 279–286. 2003, *African Journal of Ecology* 45 (Supplement 3): 126–129. 2007

(Toxins. Bark decoction or infusion astringent, for diarrhea, threatened abortion, postpartum haemorrhage, syphilis, dysentery, stomachache; infusion of leaves and barks for snake-bite; roots infusion antiseptic, wound healing; bark and roots decoction for cough, pulmonary disease, stomachache. Bark molluscicidal, fishing poison; bark and leaves used as fish poison. Veterinary medicine, roots decoction or infusion for East coast fever, a tick-borne protozoal infection of cattle in East and Central Africa.)

in Angola: palangonga, zende, zuemba, zuembe

in Ghana: akowa, awiafu samina, awiemfo samina, kuo

in Ivory Coast: kunderon, samanéré

in Kenya: mugavu, musisiya, mwita, ober, omubele

in Nigeria: akudinrin, dorowar mahalbi

in Tanzania: mkenge, mugavu

in Uganda: musita

in Upper Volta: bonbali

in Yoruba: ayinre, ayinre bonnabonna

Albizia ferruginea (Guill. & Perr.) Benth. (*Albizia angolensis* Welw. ex Oliv.; *Albizia corbisieri* De Wild.; *Albizia malacophylla* (A. Rich.) Walp.; *Feuilleea ferruginea* (Guill. & Perr.) Kuntze; *Inga ferruginea* Guill. & Perr.; *Inga malacophylla* A. Rich.)

Gabon, Senegal. Perennial non-climbing tree, rounded to flattened crown, spreading branches, watery red exudate, twigs densely rusty-pubescent, white or greenish-white flowers in globose heads, reddish-brown glossy pod, foliage eaten by goats and camels, gorillas and small antelopes (duikers) eat fruit, nectar for bees, elephants eat fruit and leaves, monkeys eat seeds, closely related to *Albizia coriaria*

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 2. 1754, *Florae Senegambiae Tentamen* 1: 236. 1830, *London Journal of Botany* 3: 88. 1844, *Tentamen Florae Abyssinicae ...* 1: 235. 1847, *Annales Botanices Systematicae* 2(3): 457. 1852, *Revisio Generum Plantarum* 1: 187. 1891 and *Kew Bull.* 1916: 238. 1926, *Boletim da Sociedade Broteriana*, ser. 2 62: 117–130. 1989, *Forest Ecology and Management* 29(4): 311–314. 1989, *Journal of Plant Nutrition* 17(10): 1769–1780. 1994, *Boletín Latinoamericano y del Caribe de Plantas Medicinales y Aromáticas* 5(2): 31–35. 2006

(Leaf and stem bark extracts with antimicrobial and uterine smooth muscle activity, when used during pregnancy this plant could therefore have a side effect of inducing abortion. Roots used to treat conjunctivitis and backache. Leaf decoctions used externally to treat headache, fever, malaria and toothache. Stem bark decoction for dysentery, wounds, sickle cell anemia and gonorrhoea. Bark vermifuge, for diarrhea, dysentery, pulmonary troubles; bark decoction a wash for wounds, sores and pimples. Root bark laxative, powdered root bark taken with salt to relieve constipation. Bark and leaves fish poison. Root bark and the gum from the stem bark used in the preparation of arrow poison.)

in English: albizia, musase, West African albizia

in Cameroon: do, elonda, esak, evousvous, evuvus

in Central African Republic: gbaya, kakala, londa, londa gbeya

(Leaves for diarrhea.)

Albizia versicolor Oliv. (*Albizia mossambicensis* Sim; *Albizia versicolor* Welw. ex Oliv.; *Feuilleea versicolor* (Welw. ex Oliv.) Kuntze)

Tropical Africa, Angola. Perennial non-climbing tree, large rooting system, creamy yellowish flowers, inflorescence an axillary head, flat brown pod, bee forage, in deciduous woodland and wooded grassland

See *Species Plantarum* 1: 516. 1753, *London Journal of Botany* 3: 87. 1844, *Flora of Tropical Africa* 2: 359. 1871, *Revisio Generum Plantarum* 1: 189. 1891, *Die Pflanzenwelt Ost-Afrikas* C: 294. 1895 and *Journal of the South African Veterinary Association* 67(4): 217–221. 1996, *Journal of Ethnopharmacology* 96(1–2): 31–36. 2005, *Fitoterapia* 78(7–8): 561–564. 2007, *South Afr. J. Epidemiol. Infect.* 23(2): 26–28. 2008

(Pods and seeds toxic, poisonous to livestock, cattle, sheep and goats. Wood dust may cause serious irritation to nose and throat. Root and bark decoctions anthelmintic and purgative, to treat swollen glands and venereal diseases. Dried and powdered roots taken or sniffed to treat headache and sinusitis; root maceration taken against gonorrhea. Bark antimicrobial, antibacterial, antifungal, a decoction to treat anemia and diabetes, applied externally to treat ophthalmia and skin rash; bark maceration taken against cough, bark powder sniffed for the cough.)

in English: large-leaved albizia, large-leaved false-thorn, poison-pod albizia

in N. Rhodesia: mulungwe, mtanga

in Southern Africa: grootblaarvalsdoring, umvanghaas (common name used also for *Pterocarpus angolensis*, the kiaat), umpiso albizia; umVangazi, umPhisu, umBhangazi (Zulu); muKanuvuri, muNyabombwe, muNyamdina (Shona); siVangatsane (= the little kiaat), umVangatana (Swazi); mbheswi (Tsonga: Eastern Transvaal); muvhamba-ngoma, mutambapfunda (Venda); linko (Botswana, eastern Caprivi); kakomo (Ngamiland); mokongotshi (Mbukushu: Okavango Swamps and western Caprivi)

in S. Rhodesia: muBuba, muChecha

in Swaziland: sivangatana, sivangatane, umvangatana

in Tanzania: izambila, mchani ndovu, mchingu, mduruasi, mkenge, mkingu, mnduruasi, mtanga, mtangu

Albizia zygia (DC.) J.F. Macbr. (*Acacia zygia* (DC.) Baill.; *Acacia zygia* (DC.) Baillon ex Drake; *Albizia brownii* (Walp.) Oliv.; *Albizia brownii* Walp. ex Oliv.; *Albizia*

letestui Pellegr.; *Albizia welwitschioides* Schweinf. ex Baker f.; *Feuilleea zygia* (DC.) Kuntze; *Inga zygia* DC.; *Zygia brownii* DC.)

Tropical Africa, Madagascar, Gabon. Perennial non-climbing tree, reddish pink white flowers, inflorescence an axillary head, staminal tube red projecting beyond corolla, flat oblong pod, bee forage, young leaves eaten cooked, low-quality fodder, related to *Albizia gummifera*

See *Mémoires sur la Famille des Légumineuses* 12: 440, pl. 65. 1826, *Repertorium Bot. Systematicae*. 1(5): 928. 1843, *Flora of Tropical Africa* 2: 362. 1871, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(46): 364. 1883, *Revisio Generum Plantarum* 1: 187. 1891 and *Histoire Physique, Naturelle et Politique de Madagascar* 30, tome 1(pt. 1, fasc. 50): 71. 1902[1903], *Contributions from the Gray Herbarium of Harvard University* 59: 3. 1919, *Kew Bulletin* 46(3): 495. 1991, *Journal of Ethnopharmacology* 93: 231–241. 2004, *Journal of Ethnopharmacology* 109: 1–9. 2007, *Journal of Ethnopharmacology* 111(1): 8–12. 2007

(Wood dust may cause irritation to nose and throat. Ground roots expectorant, to treat cough. Decoction of dry stem with leaves for diarrhea, dysentery, fevers; root bark juice on wounds. Pounded bark applied externally to treat sores, wounds and toothache; bark decoction purgative, stomachic, antidote, vermifuge, aphrodisiac, used for internal parasitism, fever, malaria, female sterility, bronchial diseases.)

in English: red nongo, West African albizia

in Benin: djinwa

(Bulb for inflammatory diseases, wound dressing.)

in Tanzania: kitunguu pori, koyosa

Albuca batteniana Hilliard & B.L. Burt (Ornithogalum *battenianum* (Hilliard & B.L. Burt) J.C. Manning & Goldblatt) (named in honor of Auriol Ursula Batten, a botanical artist)

South Africa. Evergreen bulb

See *Notes from the Royal Botanic Garden, Edinburgh* 42(2): 247–249. 1985, *Edinburgh Journal of Botany* 60: 547. 2003 [2004]

(Magic, protective charm plants, good luck charm.)

in English: Wild Coast albuca

Albuca cooperi Baker (*Albuca flaccida* Baker, nom. illeg.; *Albuca karooica* U. Müll.-Doblies)

South Africa. Herb, flowers greenish-yellow, nodding

See *Journal of Botany, British and Foreign* 12: 366. 1874 and *Feddes Repertorium* 105(5–6): 367. 1994

(Used for wounds and cuts. Magic, a protective charm plants and for good luck.)

Albuca fastigiata Dryand. (*Falconera fastigiata* (Dryand.) Salisb., nom. inval.; *Nemaulax fastigiata* (Dryand.) Raf.; *Ornithogalum fastigiatum* (Dryand.) J.C. Manning & Goldblatt)

South Africa.

See *Kongl. Vetensk. Acad. Nya Handl.* 1784: 296 (1784, *Flora Telluriana* 3: 52. 1837, *Genera Plantarum* 36. 1866 and *Edinburgh Journal of Botany* 60: 548. 2003 [2004]

(Protective charm plants.)

in English: spreading white albuca

in Swaziland: umaphipha-intelezi (A number of plant species are referred to as *intelezi* (good luck charms) in different ethnic groups of South Africa.)

Albuca nelsonii N.E. Br. (*Ornithogalum nelsonii* (N.E. Br.) J.C. Manning & Goldblatt) (specific epithet given for a British nurseryman, William Nelson, who first collected the species.)

South Africa. Bulbous, robust, fleshy bulb, leaves strap-shaped, white greenish flowers

See *Gard. Chron.*, n.s., 1880: 198. 1880 and *Edinburgh J. Botany* 60(3): 549. 2003[2004]

(Magic, protection against sorcery, protective charm plants, *Albuca nelsonii* bulbs and tubers of *Kniphofia* sp. infusion, drunk as an emetic.)

in English: Nelson’s slime lily

in South Africa: intelezi, umaphipha

Albuca setosa Jacq. (*Albuca baurii* Baker; *Albuca pachy-chlamys* Baker; *Albuca patersoniae* Schönland)

South Africa. Bulb, erect flowers

See *Edinburgh Journal of Botany* 48: 107–128. 1991

(Protective charm plants, lightning protection.)

in English: small white albuca

in South Africa: gibi’z’phoso, ingcina, mfazothethayo

Alcea L. Malvaceae

Greek *alcea* ‘mallow’, Latin *alcea*, *ae* for *Malva alcea* L. (Plinius), see *Fieldiana*, *Bot.* 24(6): 324–386. 1949, *Biologia* 48: 441–445. 1993, *Fitologija* 46: 12–32. 1993.

Alcea rosea Linnaeus (*Alcea ficifolia* L.; *Alcea glabrata* Alef.; *Alcea rosea* Falk; *Althaea caribaea* Sims; *Althaea chinensis* Wall.; *Althaea coromandeliana* Cav.; *Althaea cretica* Weinm.; *Althaea ficifolia* Cav.; *Althaea ficifolia* Sibth. & Sims; *Althaea flexuosa* Sims; *Althaea meonantha* Link; *Althaea mexicana* Kunze; *Althaea rosea* Hohen. ex Boiss.; *Althaea rosea* Cav.; *Althaea rosea* (L.) Cav.; *Althaea rosea* var. *sinensis* (Cav.) S.Y. Hu; *Althaea sinensis* Blanco; *Althaea sinensis* Cav.; *Althaea* × *cultorum* Bergmans; *Malva florida* Salisb.; *Malva hortensis* Schimp. & Spenn.; *Malva rosea* (L.) E.H.L. Krause)

China. Biennial or perennial herb, erect, densely hirsute, flowers solitary or fascicled, corolla red, purple, white, pink, yellow or black-purple, young leaves eaten raw or cooked, flower petals and flower buds eaten raw

See *Species Plantarum* 2: 687. 1753, *Diss. 2, Secunda Diss. Bot.* 91 (t. 28, f. 1). 1786 [Jan-Apr 1786] (*Monadelphiae Classis Dissertationes Decem* 2: 91. 1786), *Diagn. Pl. Orient. ser. 2, 5: 67.* 1856 [Sep-Oct 1856] and *Fl. W. Pakistan* 130: 50. 1979, *Plantsman n.s.*, 6(4): 231. 2007

(Antiinflammatory, astringent, demulcent, diuretic, emollient, febrifuge; flowers for the treatment of chest complaints, constipation, dysmenorrhea, hemorrhage; roots and flowers antiinflammatory, leaves used to apply infusion of flowers to inflamed areas, boils; dried flowers infusion as a gargle to help soothe sore throat. Roots crushed and applied as a poultice to ulcers, internally used in the treatment of dysentery, enteritis; decoction of roots boiled with water and milk applied for dermatitis, also given to pregnant women to ease delivery. Seeds for jaundice. Petioles decoction laxative.)

in English: Antwerp hollyhock, garden hollyhock, hollyhock

in China: chien, jung k’uei (= mallow of the wild tribes of the west), shu k’uei (= mallow from Szechuan), shu kui, shu kui hua

in India: dodda bindige gida, gulkhair, kempu seeme thutthi, khatmi, saj posh

in Japan: tachi-aoi

in Nepal: gurbo

Alchornea Swartz Euphorbiaceae

Genus named after the English botanist Stanesby Alchorne, 1727–1800, plant collector, from 1771 to 1773 honorary Demonstrator at Chelsea Physic Garden. See Olof Peter Swartz (1760–1818), *Nova genera et species plantarum seu Prodromus descriptionum vegetabilium maximam partem incognitorum.* 6, 98. Stockholm, Uppsala & Åbo, 1788,

Flora Cochinchinensis 2: 540, 574. 1790, *Species Plantarum.* Editio quarta 2: 578. 1799, *Species Plantarum.* Editio quarta 4(2): 809. 1805[1806], *Catalogue of a portion of the valuable Library of the late Stanesby Alchorne*, etc. [R.H. Evans, 22 May, 1813.] London 1813, *Beskrivelse af Guineiske planter* 449. 1827, *Hooker’s Journal of Botany and Kew Garden Miscellany* 6: 2–4. 1854, *Retzia*, sive, *Observationes botanicae, quas de plantis horti botanici Bogoriensis* 1: 38. 1855, *Étude générale du groupe des Euphorbiacées* 448. 1858, *Flora van Nederlandsch Indië* 1(2): 407. 1859 and F.D. Drewitt, *The romance of the Apothecaries’ Garden at Chelsea.* London 1924, *Fieldiana, Bot.* 24(6): 25–170. 1949, *Journal of the Faculty of Science: University of Tokyo, Botany* 6: 302. 1954, *American Journal of Botany* 56: 752. 1969, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Alchornea cordifolia (Schumach. & Thonn.) Müll.Arg. (*Alchornea cordata* Benth.; *Alchornea cordata* (A. Juss.) Müll.Arg., nom. illeg., non *Alchornea cordata* Benth.; *Conceveiba cordata* A. Juss.; *Conceveibum cordatum* A. Juss.; *Schousboea cordifolia* Schumach. & Thonn.)

Tropical Africa. Shrub or small tree, sarmentose, scandent, climbing, spreading, erect, multi-stemmed, many-branched, leaves alternate, small greenish white scented flowers, female inflorescences pendulous racemes, fruits greenish, seeds with red aril, leaves with a pleasant taste when chewed

See *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis* 18 illustratum 43, pl. 13, f. 42a. 1824, *Beskrivelse af Guineiske planter* 449. 1827, *Niger Fl.* 507. 1849, *Linnaea* 34: 170. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 901. 1866 and *Willdenowia* 21: 233–238. 1991

(Roots and leaves purgative, for malaria, skin infections. Leaves in the treatment of coughs; chewed leaves effective for treating diarrhea; leaves mixed with *Aframomum*, *Capsicum* and ginger, ground and inserted in vagina after childbirth as a postpartum remedy and to bring back the muscular integrity of the vaginal walls. Juice of leaves and fruit rubbed on ringworm and other skin infections. Leaves and stem bark used for urinary, respiratory and gastrointestinal disorders. Fruit for cough. A decoction of the leaves used as an eye lotion and against the fever.)

in English: Christmas bush, Christmas stick, Christmas tree

African names: bambami, epai, mbom, oje, ose, tahi, ububo, uwonowen

in Cameroon: bondji, dibo-bunji, dibobongì

in Congo: m’poso, mubundzila, oposo

in Gambia: garagasaki, gulekemo, hira, jambokano, kabanunkano, surugba

in Ghana: ogyama

in Ivory Coast: adiama, adiamba, adièké, bulora, diéca, djéka, holanta, kodjiram, kohira, n'dzè, n'dzin, vidjo

in Nigeria: akogoho, bambami, ipa

in Senegal: lah

in Sierra Leone: njaekoi, njekoi

in Togo: holentschess, tschifu, tschufu

in Upper Volta: kotiâ

in West Africa: an toma, krimes tik, njekoi

in Yoruba: asiyin, epa, esin, esin abata, ewe epa, ipa, isin

Alchornea floribunda Müll.Arg.

Sierra Leone, Uganda. A leaning shrub or small tree, sometimes subscaudent, flowers pale green, in forest undergrowth, leaves eaten as a vegetable

See Harris, D.J. *The Vascular Plants of the Dzanga-Sangha Reserve, Central African Republic*: 1–274. National Botanic Garden (Belgium), Meise. 2002, Sosef, M.S.M. et al. "Check-list des plantes vasculaires du Gabon." *Scripta Botanica Belgica* 35: 1–438. 2006

(Religion, superstitions, magic, used in initiation rites. Stimulant, used to induce a temporary excitement or vigor, physical or verbal, and for an aphrodisiac effect, but is apparently not hallucinogenic. Antidotes, venomous stings, bites; antidote to poison, natural or superstitious. Sap from the leaves and roots applied to skin affections.)

in Zaire: niando

Alchornea rugosa (Lour.) Müll.Arg. (*Adelia glandulosa* Blanco; *Alchornea hainanensis* Pax & K. Hoffm.; *Alchornea hainanensis* var. *glabrescens* Pax & K. Hoffm.; *Alchornea hainanensis* var. *pubescens* Pax & K. Hoffm.; *Alchornea javanensis* (Blume) Müll.Arg.; *Alchornea javanensis* Müll.Arg.; *Alchornea javanensis* (Blume) Backer & Bakh.f., nom. illeg.; *Alchornea javensis* Müll.Arg.; *Alchornea petalostyla* Airy Shaw; *Alchornea pubescens* Merr.; *Alchornea pubescens* (Britton) R. Secco; *Alchornea rugosa* Müll.Arg.; *Alchornea rugosa* var. *macrocarpa* Airy Shaw; *Alchornea rugosa* var. *pubescens* (Pax & K. Hoffm.) H.S. India. Small tree or large shrub, leaves spiral, leaf base with tiny laminar glands, narrow needle-like stipules, flowers in unisexual spikes, fruit trilobed capsule with persistent divided style

See *Flora Cochinchinensis* 2: 574. 1790, *Fl. Filip.* [F.M. Blanco] 814. 1837, *Linnaea* 34: 170. 1865 and *Pflanzenr.*,

(Engler) *Euphorb.-Mercurial.* IV, 147, VII: 242–243. 1914, *Philipp. J. Sci.*, 20(4): 399. 1922, *Fl. Java* 1: 485. 1963, *Kew Bull.* 26(2): 211. 1972, *Kew Bull.* 35(2): 395. 1980, *Fl. Reipubl. Popul. Sin.* 44(2): 69. 1996, *Revista Brasil. Bot.* 22(2): 142. 1999

(Aqueous extract of leaves given in fever; leaves pounded in coconut oil and applied on abdomen for pain near belly; leaves rubbed on chest against pain; leaf juice along with the leaf juice of *Syzygium samarangense* and *Terminalia catappa* taken for abortion.)

in China: yu mai shan ma gan

in India: kalifato, ki-fat, kifetov, miltich, thamfathu

Alchornea sicca (Blanco) Merr. (*Alchornea sicca* Merr.; *Exoecaria sicca* Blanco; *Homalanthus populifolius* Graham; *Homalanthus populneus* var. *sicca* (Blanco) Pax; *Homalanthus populneus* var. *siccus* (Blanco) Pax)

Philippines.

See *Edinb. N. Phil. Journ.* (Apr.-June 1827) 175. 1827, *Flora de Filipinas* [F.M. Blanco] 787. 1837, *Revis. Gen. Pl.* 2: 619. 1891 and *Philippine Journal of Science* C 5: 192. 1910, *Das Pflanzenreich* 147,5(Heft 52): 46. 1912

(Leaves and fruits used for poisoning fish.)

Alchornea villosa (Benth.) Müll.Arg. (*Alchornea villosa* var. *genuina* Müll.Arg., nom. inval.; *Alchornea villosa* var. *lan- ceolata* Müll.Arg.; *Alchornea villosa* var. *latisejala* Hook.f.; *Alchornea zollingeri* Hassk.; *Aparisthium sumatranum* Rchb. & Zoll.; *Bleekeria zollingeri* (Hassk.) Miq.; *Stipellaria villosa* Benth.; *Stipellaria zollingeri* Miq.) (*Bleekeria* Hassk., after the Dutch physician Pieter Bleeker, 1819–1878, naturalist and zoologist, friend of the Dutch botanist Justus Carl Hasskarl (1811–1894), one of the founders of the Society of Natural Curiosities of the Indies at Batavia, collaborator to *Natuur- en geneeskundij archief voor Nederlandsch Indië*. 1844, his works include *Atlas ichthyologique des Indes Orientales Néerlandaises*. Amsterdam 1862–1878, *Catalogus van de bibliotheek van het Bataviaasch Genootschap van Kunsten en Wetenschappen*. (Bibliothecae Societatis Artium Scientiarumque quae Batavia floret, catalogus systematicus, etc.) 1853, *De Cholera*. 's Gravenhage 1866, *De Dysenterie*. Batavia 1849, *Ichthyologiae Archipelagi Indici prodromus*. Batavia 1858.)

Pen. Thailand to W. Malesia.

See Justus Carl Hasskarl, *Retzia* sive *Observationes Botanicae*. 38. 1855 and Pooma, R. (ed.), *A Preliminary Check-list of Threatened Plants in Thailand*. National Park, Wildlife and Plant Conservation Department, Bangkok. 2005

in English: swallow-tail bush

Malayan names: rambahan bukit, rami hutan, rami utan, ramin bukit, sumin jantan

Alectoria Ach. Alectoriaceae (Usneaceae)*Alectoria sarmentosa* (Ach.) Ach.

North America.

(For wounds. Ceremonial.)

in English: black tree moss, maidenhair moss, witch's hair lichen

Alectra Thunb. Scrophulariaceae (Orobanchaceae)

Greek *alektros* 'unwedded', *a* 'without' and *lektron* 'couch, bed, marriage-bed', or from Greek *alektor* 'a cock', referring to the flowers; see Bergius, Peter Jonas (1730–1790), *Descriptiones Plantarum ex Capite Bonae Spei*, ... Stockholmæ: Typis et Impensis direct. L. Salvii, 1767, *Nova Genera Plantarum* 4: 81–82. 1784 and *Kew Bulletin* 14: 402–416. 1960, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* 18: 45–65. 1996, H. Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 49. 1996, *Weed Research* 44(4): 265–270. 2004.

Alectra parasitica Hochst. ex A. Rich.

India. Herb, erect, root parasite, red purplish stem, leaves scale-like, inflorescence terminal, flowers bright yellow, calyx bell-shaped, fruit a capsule, minute seeds, fresh rhizomes fleshy bright yellow

See *Tentamen Florae Abyssinicae* ... 2: 117. 1850 and *Economic Botany* 21(3): 277–283. 1967

(Used in Ayurveda. For leprosy, vitiligo, skin diseases, rheumatism, constipation, intestinal worms, fevers, swellings, paralysis, tuberculosis. Rhizomes destroy gas, increase bile and correct disorders of blood.)

in India: bhramarari, bhrngari, gaiya, midaki, nirgundi, nirgundi bandaka, nirgundi vandaka, nirugundikanda

Alectra parasitica Hochst. ex A. Rich. var. *chittrakutensis* M.A. Rau (*Alectra chittrakutensis* (M.A. Rau) R. Prasad & R.D. Dixit; *Alectra parasitica* Hochst. ex A. Rich. subsp. *chittrakutensis* (M.A. Rau) K.K. Khanna & An. Kumar)

India. Parasitic herbs, perennial, yellow-orange underground stem strongly rhizomatous, small yellow flowers in terminal racemes, parasite on the roots of *Vitex negundo* (*nirgundi*) plants

See *Bulletin of the Botanical Survey of India* 3: 25. 1961, *Journal of Economic and Taxonomic Botany* 31: 537. 2007, *Ethnobotany* 20: 154–156. 2008, *J. Econ. Taxon. Bot.* 33(4): 814–817. 2009

(Rhizome in the treatment of leprosy, leucoderma, virility and general weakness.)

in India: bhramarari, bhrngari, gaiya, midaki, nirgundi, nirgundi bandaka, nirgundi vandaka, nirgundikala, nirugundikanda

Alectra sessiliflora (Vahl) Kuntze (*Alectra asperrima* Benth.; *Alectra barbata* (Hiern) Melch.; *Alectra communis* Hemsl.; *Alectra melampyroides* Kuntze; *Alectra melampyroides* (Rich.) Tropical Africa. Herb, very variable, hemiparasitic weed, erect, stiff white trichomes, corolla pale yellow-orange

See *Symbolae Botanicae* ... (Vahl) 3: 79. 1794, *Prodromus Plantarum Capensium*, ... 98. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 339. 1846, *Revis. Gen. Pl.* 2: 458. 1891, *Revisio Generum Plantarum* 3(3): 237. 1898, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 3: 767. 1898 and *Flora Capensis* (Harvey) 4, 2: 374. 1904, *Flora of Tropical Africa* [Oliver et al.] 4: 372. 1906, *Bulletin de la Société Botanique de France* 74: 96. 1927, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15: 125. 1940, *Bol. Soc. Brot. ser. 2*, 44: 303–305. 1970, *Fitoterapia* 72: 351–368. 2001

(Crushed fresh plants eaten as a galactagogue. Leaf sap taken to hasten childbirth. Root decoction given to small children to treat diarrhea.)

in English: yellow witchweed

Alectryon Gaertn. Sapindaceae

Greek *alektor* 'a cock', *alektryon* 'a cock, a rooster' (Greek *alezo* 'to ward, keep off, keep one off from oneself'; Akkadian *alik idi* 'helper, protector', *alaku idi* 'to assist, to protect', *alaku* 'to move about, to serve, to act, to do service'), referring to the red aril; see Joseph Gaertner (1732–1791), *De fructibus et seminibus plantarum*. 1: 216, t. 46, fig. 2. 1788 and *Austrobaileya* 2(4): 328–338. 1987, *Blumea* 33(2): 315. 1988.

Alectryon diversifolius (F. Muell.) S.T. Reynolds (*Heterodendron diversifolium* F. Muell.; *Heterodendron diversifolium* F. Muell.; *Nephelium diversifolium* (F. Muell.) F. Muell.) (*Heterodendrum* Desf., from the Greek *heteros* 'different, variable, diverse' and *dendron* 'a tree', alluding to the variable flower structure, see *Mém. Mus. Hist. Nat.* 4: 8, t. 3. 1818.)

Australia. Shrub, flowers in small clusters or racemes, petals absent, black seeds, red aril

See *Fragmenta Phytographiae Australiae* (Mueller) 1(3): 46. 1858 and *Biochemical Systematics and Ecology* 4, 263–265. 1976, *Austrobaileya* 2(4): 335. 1987, *Australian Journal of Entomology* 44: 344–353. 2005

(Sapinds are known to vary substantially in the chemistry of their defensive cyanogenic lipids.)

in Australia: holly bush, scrub boonaree

Alectryon excelsus Gaertner

New Zealand. Tree, rusty, leaves compound, narrow leaflets often toothed, brown capsule, single shiny black seed surrounded by bright scarlet pulp

See *De Fructibus et Seminibus Plantarum...* 1: 216. 1788

(Poisonous fruit, should not be eaten. Leaves insecticide, to keep sand flies away; leaves rubbed on the bites to ease the pain and take away swelling. Green oil from the seeds applied to sores, wounds, sore eyes and ears, bruises, sore breasts and rheumatic joints.)

in English: New Zealand ash

in New Zealand: titoki, titongi

Alectryon oleifolius (Desf.) S. Reyn. (*Heterodendrum oleaefolium* Desf.; *Heterodendrum oleifolium* Desf.; *Nephelium oleifolium* (Desf.) F. Muell.)

Australia.

See *Austrobaileya* 2(4): 335. 1987

(Cyanogenetic.)

in Australia: boonaree, bullock bush, cattle bush, minga bush, rosewood, Western rosewood

Alepeida Delarochae Apiaceae (Umbelliferae)

Greek a ‘not, without’ and *lepis*, *lepidos* ‘a scale’, see La Roche (Delarochae, de Laroche), François Etienne de (1743–1813), *Eryngiorum nec non Generis Novi Alepeidae Historia* 19. Parisiis, 1808 and *Bull. Soc. Bot. Genève*. 3: 132–144. 1911, Stafleu and Cowan, *Taxonomic literature*. 1: 613 [“François Delarochae, 1780–1813, Daniel Delarochae, 1743–1812.”] 1976 and 4: 821–822. [“F. de la Roche, 1782–1814.”] 1985.

Alepeida amatymbica Eckl. & Zeyh.

South Africa, KwaZulu-Natal. Erect robust perennial herb, flowering stalk hollow, aromatic rhizomatous strong root-stock, oval leaves with pointed tips, small white yellowish flowers arranged in panicles

See *Eryng. Hist.* 19. 1808, *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 3: 339. 1837 and *South African Journal of Botany* 60(6): 345–350. 1994, *Journal of Ethnopharmacology* 77(2–3): 165–174. 2001, *South African Journal of Botany* 70(2): 319–322. 2004, *J. Ethnopharmacol.* 97(1): 107–15. 2005

(Raw or cooked rhizome and root antibacterial, antifungal, psychoactive, sedative, styptic, cytotoxic, hypotensive, antiviral and diuretic, a remedy for respiratory tract infections, fever, headache, bronchitis, colds, asthma, sore throat, flu,

abdominal pains, diarrhea, stomachache, gastrointestinal and chest complaints, rheumatism, bleeding wounds; an infusion is made, together with *Cannabis sativa*, for treating asthma and chest inflammation. Magic, ritual, lucky charm, *ubulawu* (African dreaming), dry rhizome and roots smoked or powdered and taken as snuff by diviners and healers to assist in divination, communication with the ancestors and as protection against evil spirits.)

in English: giant alepeida, larger tinsel flower

in Southern Africa: ikhathazo, Iqwili, iQwili, kalmoes, kalmos, lesoko

in Swaziland: inkhatsankhatsa, likhatsato

Alepeida longifolia E. Mey. (*Alepeida longifolia* Dümmer; *Alepeida longifolia* E. Mey. ex Steud.; *Eryngium caffrum* (E. Mey.) Koso-Pol.; *Eryngium caffrum* K. Pol.)

Tropical Africa.

See *Nomencl. Bot.* [Steudel], ed. 2. 1: 48. 1840, *Zwei Pflanzengeografische Dokumente* 63. 1843 and *Transactions of the Royal Society of South Africa* 3: 11. 1913, *Bulletin de la Société Impériale des Naturalistes de Moscou* n.s., 29: 158. 1915[1916]

(Leaves and fruits antipyretic, febrifuge.)

Alepeida peduncularis Steud. ex A. Rich. (*Alepeida gracilis* Dümmer; *Alepeida longifolia* Dümmer)

Congo, Sudan and Ethiopia. Perennial herb, fleshy fibrous roots, basal leaves in a rosette, flowers white to slightly pink or greenish, inflorescence a head-like umbel, young leaves used as a cooked vegetable, in montane forest and *Brachystegia* woodland

See *Tentamen Florae Abyssinicae* ... 1: 320. 1848 and *Transactions of the Royal Society of South Africa* 3: 11. 1913

(Root decoction taken to treat cough and fever.)

in Southern Africa: ikhokwana

Aletris L. Nartheciaceae (Liliaceae, Melanthiaceae)

Greek *aletris*, *aletridos* (*aletho*, *aleo* ‘to grind’) used for a female slave who grinds the grain or corn; see Carl Linnaeus, *Species Plantarum*. 1: 319. 1753 and *Genera Plantarum*. Ed. 5. 149. 1754, *Flora Anglica* 127. 1762, *Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 49. 1862.

Aletris farinosa L. (*Aletris alba* Michx.; *Aletris farinosa* (Thunb.) Thunb., nom. illeg.; *Aletris farinosa* Thunb.; *Aletris farinosa* Ker Gawl.; *Aletris lucida* Raf.)

SE. Canada to C. & E. U.S.A. Perennial herb, cooked bulb

See *Species Plantarum* 1: 319. 1753, *Fl. Jap.* (Thunberg) 136. 1784, *Fl. Bor.-Amer.* (Michaux) 1: 189. 1803, *Bot. Mag.* 34:

t. 1418. 1811, *Autik. Bot.* 136. 1840 and *Regnum Veg.* 127: 16. 1993

(Fresh root mildly poisonous. Leaves antidiarrheal, anti-inflammatory, bitter, diuretic, narcotic, tonic, stomachic, infusion taken for dysentery, jaundice, colic and stomach disorders, bloody dysentery, strangury, rheumatism, lung diseases, coughs, to strengthen womb. Root stomachic, emmenagogue, abortifacient, tonic.)

in English: ague root, colic root, crow corn, stargrass, uni-corn root, white colic root

in Brazil: aletris, cadenaco, cometa-orinito, erva-da-febres, erva-estrela, raiz-da-cólicas

Aletris pauciflora (Klotzsch) Hand.-Mazz. (*Aletris nepalensis* Hook.f., nom. illeg.; *Stachyopogon pauciflorus* Klotzsch)

India, Himalaya, China.

See *Bot. Ergebn. Reise Waldemar*: 49. 1862, *Fl. Brit. India* 7: 264. 1892 and *Symbolae Sinicae* 7(5): 1220. 1936, *Fl. Reipubl. Popularis Sin.* 15: 172. 1978

(Aerial parts used in lung and liver disorders, respiratory diseases, pneumonia, bronchitis.)

in China: shao hua fen tiao er cai

Aletris spicata (Thunb.) Franch. (*Aletris dickinsii* Franch.; *Aletris farinosa* (Thunb.) Thunb., nom. illeg.; *Aletris japonica* Thunb.; *Aletris japonica* Houtt.; *Aletris japonica* Lamb., nom. illeg.; *Aletris spicata* Franch.; *Aletris spicata* var. *micrantha* Satake; *Aletris spicata* var. *microantha* Satake; *Hypoxis farinosa* Thunb.; *Hypoxis spicata* Thunb.)

E. Asia, China, Japan. Herb, young leaves cooked, a famine food

See *Systema Naturae*, Editio Decima 2: 972-, 986, 1366. 1759, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 208. 1780, *Systema Vegetabilium*. Editio decima quarta (J. A. Murray). 326. 1784, *Flora Japonica*, ... (Thunberg) 33, 136. 1784, *Transactions of the Linnean Society of London* 10: 407. 1811, *Bull. Soc. Philom. Paris* sér. 7, x. (1886) 102. 1886, *Journal de Botanique (Morot)* 10(12): 199–200. 1896 and *J. Jap. Bot.* 17: 725. 1941

(Root antitussive and vermifuge.)

in China: fen tiao er cai

Aleurites Forst. & Forst.f. Euphorbiaceae

Greek *aleurites* 'floury bread', from *aleuron*, *aleurinos* 'floury', stems and leaves of the plant are covered with a farinaceous coating, see *Characteres Generum Plantarum* 111, pl. 56. 1775, *De Fructibus et Seminibus Plantarum*... 2: 194. 1791, *Transactions of the Linnean Society of London* 10: 197. 1810, *Étude générale du groupe des Euphorbiacées* 345. 1858 and *Blumea* 44: 73–98. 1999, Govaerts, R., Frodin, D.G.

& Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. Kew. 2000, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002, *Ceiba* 44(2): 105–268. 2003 [2005], Chayamarit, K. & Van Welzen, P.C. *Euphorbiaceae* (Genera A-F). *Flora of Thailand* 8(1): 1–303. Bangkok. 2005.

Aleurites moluccana (L.) Willd. (*Adelia monoica* Blanco; *Aleurites ambinux* Pers.; *Aleurites angustifolia* Vieill.; *Aleurites angustifolia* Vieill. ex Guillaumin; *Aleurites commutata* Geiseler; *Aleurites commutatus* Geiseler; *Aleurites cordifolia* (Gaertn.) Steud.; *Aleurites cordifolius* (Gaertn.) Ser.* 17: 558. 1939, *Amer. J. Bot.* 38: 57. 1951, *Kew Bulletin* 20: 26, 393. 1966, *Pacific Sci.* 21: 553. 1967, *Phytologia* 21(5): 315–316. 1971

(Used in Ayurveda and Unani. All parts of the tree are toxic, moderate toxicity of the seed; raw kernel and the fruit are

kshudrengudi, marudbhava, oant-jhari, rodanika, samudranta, sh-oukul-jamal, shouk-ul-jamal, shoukul jamal, shoukuljamal, shutar-khar, shutarkhar, tamiya, tamramuli, tell-giniyachettu, tella giniya chettu, tellaginiya, thella giniya chettu, thurinjibin, thurnjbin, tikshnakantaka, toreyingalu, triparnika, turalapam, turalappai, turancipin, turanjabeen, turanjabin, ushtar-khar, ushtarkhar, vanadarbha, vasanta, vishaghna, vivarnaka, yas, yasa, yavas, yavasa, yavasah, yav-asaka, yawas, zoz, zozani

in Pakistan: janasa, jiwasa, shez, shiz

Alhagi pseudalhagi Desv. (*Alhagi pseudalhagi* Fisch.; *Alhagi pseudalhagi* (M. Bieb.) Desv.)

India, SW Asia, North Africa. Shrub, spiny, intricately branched, perennial, many rigid branches armed with numerous sharp yellow-tipped spines, small pea-like flowers, indehiscent pea-like seed pods reddish brown strongly constricted between seeds, flowers and seed pods borne on thorns, fodder for camels and cattle, rapid and aggressive growth, strongly competitive with other plants, application of the name much confused, often in *Alhagi maurorum*

See *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 120. 1813

(Used in Ayurveda, Unani and Sidha. Leaf decoction in fever; leaf smoke for asthma; juice of fresh leaves dropped in nostrils for curing headache. Sap laxative, expectorant, diuretic, analgesic, blood purifier. Flower paste coagulates the blood.)

in English: camel thorn, Caspian manna, Persian manna

in India: aaqool, ananta, asal-ul-haaj, asal-ul-nadi, balli duruba, dhanva, dhanvayasa, dhanvayavasa, dhirghamula, dirghamula, duhsarsa, duralabha, jawansa, jawasa, kotittuva, ratan jaute, turangabeen, turanjabeen, yasa, yavasa, yavasaka

in Pakistan: janasa

in Tibet: bi dza ra ba, bi tsher ba (p), byi tsher ma (d), dug-nun

Alisma L. Alismataceae

From *alisma*, the ancient Greek name for this plant, from *halismos* 'movements of the sea', from *hals*, *halos* 'sea'; see Carl Linnaeus, *Species Plantarum*. 1: 342–343. 1753, *Genera Plantarum*. Ed. 5. 160. 1754, *Gen. Pl.* [Bentham & Hooker f.] 3(2): 1005. 1883 and Hendricks, A.J. "A revision of the genus *Alisma* (Dill.) L." *Amer. Midl. Naturalist* 58: 470–493. 1957, Voss, E.G. "Confusion in *Alisma*." *Taxon* 7: 130–133. 1958.

Alisma lanceolatum With. (*Alisma plantago-aquatica* var. *lanceolatum* (With.) Lej.)

North America, India, Europe. Scapigerous, bisexual trimerous flowers

See *An Arrangement of British Plants*, Third Edition 2: 362. 1796, *Flore des Environs de Spa* 74. 1824 and *Bot. Not.* 129: 251–256. 1976, *Taxon* 27: 375–392. 1978, *Acta Fac. Rerum*

Nat. Univ. Comeniana, Bot. 26: 1–42. 1978, *Taxon* 30: 829–842. 1981

(Extract from rhizome in water used as insecticide.)

in English: lance-leaf water-plantain

Alisma oligococcum F. Muell. (*Caldesia oligococca* (F. Muell.) Buchenau)

Australia. Perennial herbs, red brown seeds

See *Fragmenta Phytographiae Australiae* 1: 23. 1858, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 2: 479. 1882

(Leaves infusion astringent, diuretic, diaphoretic, vulnerary.)

Alisma orientalis (Sam.) Juz. (*Alisma orientale* (Sam.) Juz.; *Alisma plantago-aquatica* subsp. *orientale* (Sam.) Sam.; *Alisma plantago-aquatica* L. var. *orientale* Sam.)

India, China. Perennial marsh herb, corms whitish, many fibrous roots, leaves all basal, small white flowers, achenes obovate, in damp soil, swamps

See *Species Plantarum* 1: 342–343. 1753 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 24(7): 11, 16 f. 16, 2b, 3 c-d. 1932, *Acta Horti Gothoburgensis* 2(2): 84–85. 1926, *Flora URSS* 1: 281. 1934, *Journal of Wuhan Botanical Research* 4: 421–423. 1986, *Acta Phytotaxonomica Sinica* 25: 254–263. 1987, *Acta Crystallographica Section E* Vol. 59(11): 1858–1859. 2003, Zhi-Yong Jiang et al. "A new triterpene and anti-hepatitis B virus active compounds from *Alisma orientalis*." *Planta Med.* 72(10): 951–954. 2006, Hong X., Tang H., Wu L., Li L. "Protective effects of the *Alisma orientalis* extract on the experimental nonalcoholic fatty liver disease." *J. Pharm. Pharmacol.* 58(10): 1391–1398. 2006, *Chem. Pharm. Bull.* (Tokyo). 55(6): 905–907. 2007

(The dried rhizomes are a crude drug for the treatment of diabetes and diuretics, diarrhea, enteritis.)

in English: oriental water plantain

in China: dong fang ze xie

Alisma plantago R. Br. (*Alisma intermedium* Griff. ex Voigt; *Alisma intermedium* Mart.)

India. Swollen fleshy rhizome, whorled bisexual white or pink flowers, compressed membranaceous achenes, brown curved seeds

See *Species Plantarum* 1: 342–343. 1753, *A Voyage to Terra Australis* 2(3): 592. 1814, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1609. 1830, *Hort Suburb. Calcutta* 680. 1845, *Fl. Brit. India* 6: 559. 1893 and *Beng. Pl.* 2: 119. 1903 *Naucn. Dokl. Vyss. Shkoly, Biol. Nauki* 4: 114–119. 1974

(Raw fresh fruits poisonous, a poultice applied in sores, wounds, bruises, swellings. Plant infusion tonic, stimulant, laxative, diuretic, used for womb troubles, dropsy, stomach ailments, hydrophobia. Seeds against beriberi. Leaves an antidote for opium; powdered leaves infusion astringent,

diuretic, diaphoretic, vulnerary, galactagogue, lithotriptic, used for gravel and kidney and urinary ailments.)

Alisma plantago-aquatica L. (*Alisma plantago-aquatica* L. subsp. *subcordatum* (Raf.) Hultén; *Alisma plantago-aquatica* L. var. *parviflorum* (Pursh) Torr.; *Alisma plantago-aquatica* L. var. *parviflorum* (Pursh) Farw.; *Alisma subcordatum* Raf.; *Alisma triviale* Pursh)

China. Aquatic, robust, spindly, perennial, scapigerous herbs, basal leaves, long stalked ovate leaves, terminal rounded clusters of small white flowers

See *Species Plantarum* 1: 342–343. 1753, *Medical Repository*, ser. 2, 5: 362. 1808, *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 252–253. 1814 [1813] and *Rhodora* 48: 86–88. 1946, *Fl. Trop. E. Africa, Alismataceae* 5. 1960, *Kongl. Svenska Vetensk. Acad. Handl.* 8(5): 160. 1962, *Leafl. W. Bot.* 10: 90–95. 1964, *Soobshcheniya Akademii Nauk Gruzinskoi SSR* 79: 433–435. 1975, *Taxon* 27: 375–392. 1978, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Informatore Botanico Italiano* 12: 161–165. 1980, *Cytologia* 49: 295–304. 1984, *Acta Phytotaxonomica Sinica* 25: 254–263. 1987, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 59: 13–22. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 116–118. 1990, *Watsonia* 21: 365–368. 1997, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Eur. J. Pharmacol.* 419(2–3): 127–138. 2001, Rau, O. et al. “Screening of herbal extracts for activation of the human peroxisome proliferator-activated receptor.” *Pharmazie* 61(11): 952–956. 2006

(Leaves can irritate the skin. Rootstock eaten raw or cooked in leukemia, heart burn, hydrophobia, hypertension, stomachache, cramps; root poultice applied to bruises, wounds, swellings. Rhizome diuretic, used in treating edema, dysuria, nephritis, vomiting and diarrhea. Raw fruits applied to wounds. Alisol B acetate, a triterpene from *Alisma plantago-aquatica*, has a glucocorticoid-like structure.)

in English: American water plantain, common water plantain, European waterplantain, mad-dog weed, mud plantain, water alisma, water plantain

in Arabic: seif el-maa, semouma

in South Africa: padda lepel, wateralisma

in China: ze xie, tse hsieh, shui hsieh, chi hsieh, ku hsieh, mang yu, yu sun

in India: kakthrum

in Nepal: jala pernee

in Vietnam: trach ta

Alkanna Tausch Boraginaceae

From Arabic *al-hinna*, henna, see *Species Plantarum* 1: 132–133. 1753, *Flora* 7(1): 234. 1824, *Linnaea* 17: 304. 1842 and *Bot. Jahrb. Syst.* 120(1): 45–85. 1998.

Alkanna tinctoria Tausch (*Anchusa tinctoria* (L.) L.; *Anchusa tinctoria* L.; *Anchusa tinctoria* Woodv.; *Anchusa tinctoria* Sieber ex Steud.; *Anchusa tinctoria* Pall.; *Alkanna lehmannii* (Tineo) DC.; *Alkanna lehmanni* A. DC.; *Alkanna tinctoria* (L.) Tausch; *Alkanna tinctoria* (L.) DC., nom. illeg.; *Alkanna tinctoria* subsp. *lehmannii* (Tineo) Nyman; *Lithospermum tinctorium* Bertol.; *Lithospermum tinctorium* L.; *Lithospermum tinctorium* Ruiz & Pav., nom. illeg.; *Lithospermum tinctorium* Vahl; *Lithospermum tinctorium* Aucher ex DC.)

Northern Africa, Western Asia. Biennial or perennial, herbaceous, blue to purple trumpet-shaped flowers, edible leaves, see also *Plagiobothrys myosotoides*

See *Species Plantarum* 1: 132–134. 1753, *Sp. Pl.*, ed. 2. 1: 192. 1762, *Symb. Bot.* (Vahl) ii. 33. t. 28. 1791, Woodville, William (1752–1805), *Medical botany*. London, 1790–1793, *Flora Peruviana* [Ruiz & Pavon] 2: 4, t. 114. 1799, *Flora* 7: 234. 1824, *Nomencl. Bot.* [Steudel], ed. 2. 1: 86. 1840, *Prodr.* (DC.) 10: 86, 99, 101, 588. 1846 and *J. Arnold Arbor.* 34: 281. 1953, *Acta Fac. Rerum Nat. Univ. Comenianae, Bot.* 23: 1–23. 1974, *Acta Fac. Rerum Nat. Univ. Comenianae, Bot.* 26: 1–42. 1978, *Cellular and Molecular Life Sciences (CMLS)* 34(11): 1499–1501. 1978, *Fl. Medit.* 5: 289–317. 1995, *Taxon* 45: 567. 1996, *Taxon* 48: 84. 1999, *Taxon* 53(3): 802. 2004, *Phytotherapy research* 19(2): 141–147. 2005

(Used in Ayurveda. Root antibacterial, antibiotic, wound healing, astringent and vulnerary, used externally in the treatment of varicose veins, indolent ulcers or indolent leg ulcers, bed sores and itching rashes. Radical scavenging activity of *Alkanna tinctoria* root extracts.)

in English: alkanet, dyer’s-alkanet, dyer’s bugloss, Spanish bugloss

in India: ratanajota

in Arabic: henna el-ghula, kahla

in Italian: arganetta azzurra

Allamanda L. Apocynaceae

The genus was named to honor the Swiss botanist Jean Frédérique (Frédéric) François Louis Allamand, 1735–1803, physician, correspondent of Linnaeus, traveller, plant collector in Suriname about 1770, author of “*Plantarum genera nova, aut accuratius observata, earumque species.*” *Nova Acta Phys.-Med. Acad. Caes. Leop. Carol. Nat. Cur.* 4: 93–95. 1770; see *Mantissa Plantarum* 2: 146, 214–215. 1771 [*Mant. Pl. Altera* 146 (214). 1771], Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 36. 1965, F.S. Markgraf and R. Steiger, *Taxon*. 18: 421–424. 1969, *Revista Brasil. Bot.* 9(2): 125–149. 1986, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Allamanda blanchetii A. DC. (*Allamanda violacea* Gardner)
Brazil.

See *Mantissa Plantarum* 2: 146, 214–215. 1771, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 319. 1844 and *Taxon* 30: 855–856. 1981, Smith, A.C. *Flora Vitiensis Nova. A new flora for Fiji* (Spermatophytes only) 4: 1–377. Pacific Tropical Botanical Garden, Lawai. 1988 [as *Allamanda violacea*.], *J. Pharmacy Pharmaceutical Sci.* 9(2): 200–8. 2006 (Antiproliferative, cytostatic, cytotoxic.)

in English: purple allamanda

Allamanda cathartica L. (*Allamanda aubletii* Pohl; *Allamanda cathartica* Schrader; *Allamanda cathartica* f. *salicifolia* (Willd. ex Roem. & Schult.) Voss; *Allamanda cathartica* var. *grandiflora* L.H. Bailey & Raffill; *Allamanda cathartica* L. var. *hendersonii* L.H. Bailey & Raffill; *Allamanda cathartica* var. *hendersonii* (W. Nat. Prod.* 60(12): 1294–1297. 1997, *Journal of Ethnopharmacology* 73(1–2): 233–241. 2000, *Phytother. Res.* 16(4): 393–394. 2002, *BMC Complement. Altern. Med.* 6: 12. 2006

(All parts of the plant exude an acrid milky sap. Considered poisonous on ingestion; leaves and stems purgative; all parts of the plant may cause irritant dermatitis in susceptible persons, the sap may irritate the eyes; bark juice emetic,

verrmifuge and cathartic. Toxin in the fruits and in the cell sap of the stem and leaves; ingesting the fruits may cause upset stomach. Used for malaria, jaundice and snakebites, usually used to treat different types of wounds in human beings. Antinematodal, antidermatophytic; the plant was once used as a cathartic, it showed strong fungitoxicity against some dermatophytes causing dermatomycosis to animals and human beings. Magico-religious beliefs, ritual.)

in English: allamanda, buttercup, common allamanda, golden-trumpet, golden trumpet vine, yellow allamanda, yellow bell

in Caribbean: baruda balli, porcupine batty

in Central America: allamanda, bejuco de San Jose, canario, cantiva, jalapa, jasmin amarillo, San Jose, San Jose amarillo

in Bali: alamanda, bungan kemoning

in China: ruan zhi huang chan

(Anti-proliferative, cytostatic, cytotoxic.)

in English: bush allamanda, oleander-leaf allamanda

in China: huang chan

in Thailand: ban phara

in Vietnam: d[aa]y hu[yf]nh l[as] h[ej]p

Allanblackia Oliver Clusiaceae (Guttiferae)

For the British (b. Morayshire) botanist Allan A. Black, 1832–1865 (d. Bay of Bengal), gardener, 1853–1864 first Curator of Kew Herbarium, in 1864 Superintendent of the Botanic Garden of Bangalore, contributed to J. Lindley and T. Moore's *Treasury of Botany*. London 1866, see *Gen. Pl.* [Bentham & Hooker f.] 1(3): 980. 1867.

Allanblackia floribunda Oliver (*Allanblackia klainei* Pierre ex A. Chev.; *Allanblackia parviflora* A. Chev.)

Tropical Africa. Shrub or tree, fleshy leaves coriaceous, red pink fragrant flowers, copious whitish yellow sticky latex, gorillas eat young leaves and fruit, wood resistant to termites

See *Trans. Hort. Soc. London* 5: 457. 1824, *J. Linn. Soc., Bot.* 10: 43. 1867 [1869 publ. 5 Sep 1867], *Genera Plantarum* 1: 980. 1867, *Flora of Tropical Africa* 1: 163. 1868 and *Les végétaux utiles de l'Afrique Tropicale Française* 5: 163. 1909, *Vég. Utiles Afrique Trop. Franç.* Fasc. 9, 62. 1917, *Phytochemistry* 60(4): 381–384. 2002, *J. Pharm. Bioresour.* 2: 116–119. 2005, *Biotechnology* 7(1): 129–133. 2008

(Fruits and leaves analgesic, antiviral. Extracts of the leaves, stem bark and root bark antimicrobial or antibacterial, anti-septic, analgesic, employed to treat skin disease and other microbial diseases. Leaves decoction for cough, asthma, bronchitis, pulmonary troubles. Bark boiled and water drunk for cough, asthma, bronchitis, stomachache, diarrhea, dysentery; bark root astringent; stem bark mixed with *Capsicum frutescens* or *Solanum anguivi* used for the treatment of cough.)

in English: lacewood, tallow tree

in Cameroon: anyoe, bianji, eboungo matalo, eboungo mata-tolo, mbawandje, nsangomo, nyonne

in Central Africa: banoummabi, boko, orogbo erin, ouotera pissalé, pom, soku

in Gabon: agnubé, bouandjo, sangoma, sangoun

in Ghana: anane, banummabi, bohwe, esonye duku, oki-sidwe, okusie-dua, soin, sonkyi, sonye, sooky, suein, suenkyi, sunkyi

in Ivory Coast: akumasé, alabénun, banummabi, bissaboko, essuinduku, ewotébo, otéro laha, otéro lakya, ouotera, pissalé boko, tiabokebihia, utéra, wohotelimon, wotobé

in Liberia: gbar-chu

in Nigeria: ala-enyi, alenyi, balanono, edian, édíáng, egba, izeni, izokhain, mia, obobiobo, ocha, orogbo-erin

in Sierra Leone: mbrembra, njailing, sole

in West Africa: kisidwe, lalnjo

in Zaire: bondjo, bondjondjolo onongo, bonfonfo, bong-bongonu, bongbulu, bonzo, bonzonzo, kilungulungu, koma mutoke, mondgondjo, monze, nionzo, nyonzo, nzibu, tshiakoho

Allanblackia parviflora A. Chev.

Tropical Africa. Shrub or tree, fleshy leaves coriaceous, red pink fragrant flowers, copious whitish yellow sticky latex, sometimes considered a synonym of *Allanblackia floribunda*

See *Les végétaux utiles de l'Afrique Tropicale Française* 5: 163. 1909

(Fruit pulp decoction used to relieve elephantiasis of the scrotum. Leaves decoction for cough, asthma, bronchitis. Pounded bark rubbed on the body to relieve pain.)

in Ghana: anane, banummabi, bohwe, esonye duku, oki-sidwe, okusie-dua, soin, sonkyi, sonye, sooky, suein, suenkyi, sunkyi

Allanblackia stuhlmannii (Engl.) Engl. (*Stearodendron stuhlmannii* Engl.)

Tanzania. Evergreen tree, ridged drooping branches, a yellow resinous sap if cut, fleshy male and female solitary fragrant cream to reddish flowers on different trees, large red-brown berries hanging down, seeds with fleshy aril, cooking oil from seeds, blue monkeys eat the flowers, thick-tailed galago (komba mkubwa) eat seeds, squirrels and a giant pouched rat (kuhe) depend on the *Allanblackia* seeds as a source of food

See *Genera Plantarum* 1: 980. 1867, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 43. 1895, *Die Natürlichen Pflanzenfamilien Nachtr.* ii-iv Teil [1]: 249. 1897 and *Journal of Natural Products* 62(1): 130–132. 1999

(Antiviral, HIV-inhibitory activity. Fresh leaves chewed to treat coughs; dried leaves a medicinal tea against chest pain; leaves and roots to treat impotence. Oil from seeds drunk in small quantities to treat rheumatism; heated oil smeared on aching joints, rashes and wounds, to treat rheumatism.)

in Tanzania: makanye, mkange, mkani, mkanye, mkanyi, mkimbo, msambu, msambu-mzazi, mshambo, msum-bubwiti, mwaka

Allanblackia ulugurensis Engl.

Tanzania. Tree or shrub, rough leaves, pink purple fleshy flowers, yellow latex, edible fruits and fat

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 435. 1900, *Journal of East African Natural History* 95(2): 235–240. 2006

(Fruit and leaves for stomachache. Oil from seeds drunk in small quantities to treat rheumatism; heated oil smeared on aching joints, rashes and wounds, to treat rheumatism.)

in Tanzania: mkange, mkani, mkanye, mkanyi, mkimbo, msambu, mshambo, msumbu bwiti, msumbubwiti, mwaka

Allantodia R. Br. Woodsiaceae (Aspleniaceae, Dryopteridaceae)

Greek *allantoeides* 'sausage-shaped', *allas*, *allantos* 'sausage' and *eidos*, *oides* 'resemblance'; see [Edited by Heinrich Adolph Schrader], *Journal für die Botanik*. 2: 4, 61. (Oct.-Dec.) 1801, *Voyage dans les Quatre Principales Îles des Mers d'Afrique* 1: 282–283. 1804, *Prodromus Florae Novae Hollandiae* 149. 1810, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die Neuesten Entdeckungen in der Gesammten Naturkunde* 5: 304. 1811, *Plantae Asiaticae Rariores* 1: 44–45. 1830, *Tentamen Pteridographiae* 115–117, pl. 4, f. 6, 13, 18. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 177. 1841, *Linnaea* 20: 358. 1847, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 450–451, 453–454. 1851 and *Symbolae Antillanae seu Fundamenta Florae Indiae Occidentalis* 4: 31. 1903, *Botanical Magazine* 42(499): 343–345. 1928, *Acta Phytotaxonomica Sinica* 9(1): 57–59, 73–74. 1964, *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Botanica Yunnanica* 16(2): 127. 1994.

Allantodia gigantea (Baker) Ching (*Diplazium flaccidum* H. Christ; *Diplazium giganteum* (Baker) Ching; *Gymnogramma gigantea* Baker)

China, Nepal. Tender portions cooked as vegetable

See *Journal of Botany, British and Foreign* 27(6): 177–178. 1889 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 16(199–200–201): 125–126. 1906, *Index Filicum*, Supplementum Tertium 73. 1934, *Acta Phytotaxonomica Sinica* 9(1): 55. 1964

(Poultice.)

in Nepal: daude

Allantodia maxima (D. Don) Ching (*Asplenium maximum* D. Don; *Diplazium maximum* (D. Don) C. Chr.)

China.

See *Species Plantarum* 2: 1078–1082. 1753, *Prodromus Florae Nepalensis* 8. 1825 and *Acta Phytotaxonomica Sinica* 9(1): 53. 1964

(Root stock of *Diplazium maximum* crushed with those of *Angiopteris evecta*, *Colysis hemionitidea* and stems of *Raphidophora decursiva* and *Raphidophora hookerii* and applied on fracture.)

in India: chakawkeichi

Allenrolfea Kuntze Chenopodiaceae (Amaranthaceae)

Dedicated to the British (born at Ruddington, near Nottingham) botanist Robert Allen Rolfe, 1855–1921 (Kew, Surrey), authority on orchids, plant collector, 1879 to Kew as a gardener, 1880 appointed the first Curator of the Orchid

Herbarium by Sir Joseph Hooker (then Director of Kew Gardens), 1885 elected an Associate of the Linnean Society, 1893–1920 founder and editor of *The Orchid Review*, wrote "Revision of the Genus *Phalaenopsis*." in the *Gardeners' Chronicle*. 1886, monographed Orchidaceae for volume 7 of the *Flora of Tropical Africa*. 1898, edited the English edition of *Lindenia*, with Charles Chamberlain Hurst (1870–1949) wrote *The Orchid stud-book*. Kew 1909. See *Species Plantarum* 1: 3–4. 1753, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Pétersbourg* 1: 361. 1843, *Versuch einer Systematik der Salicornieen* 100. 1866, *Revisio Generum Plantarum* 2: 545–546. 1891 and Anon., "Robert Allen Rolfe." *Gardeners' Chronicle*. 69: 74, 204. 1921, Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 258. 1947 and "Bibliography of Polynesian botany." *Bernice P. Bishop Mus. Bull.* 144: 160. 1937, Frederico Carlos Hoehne, M. Kuhlmann and Oswaldo Handro, *O jardim botânico de São Paulo*. 175. 1941, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 641. (Plant cooked in water and the tea drunk for diarrhea and fever. Cold infusion of root used as a lotion for swellings and skin ailments.)

in English: pink windmills, trailing four-o'clock, trailing umbrella-wort, trailing windmills, windmills

in Spanish: hierba de la hormiga

Allium L. Amaryllidaceae (Alliaceae, Liliaceae)

Latin *allium*, *alium*, *ii* 'garlic'; see Carl Linnaeus, *Species Plantarum*. 1: 294–302. 1753, *Genera Plantarum*. Ed. 5. 143. 1754, *Archiv für die Botanik* 1(3): 40. 1798, *Icones plantarum rariorum horti regii botanici berlinensis* ... 1: 33. 1828, *Syn. Deut. Schweiz. Fl.* [W.D.J. Koch] 714. 1837, *Flora Boreali-Americana* 2: 184. 1838, *The Botany of Captain Beechey's Voyage* 400. 1840, *Edwards's Botanical Register* 30(Misc.): 66. 1844, *Proceedings of the Academy of Natural*

Sciences of Philadelphia 20(6): 171. 1868, *Botany* [Fortieth Parallel] 350. 1871, *Proceedings of the American Academy of Arts and Sciences* 14: 231. 1879, *Revisio Generum Plantarum* 2: 703. 1891 and *Fieldiana, Bot.* 24(3): 59–100. 1952, *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, International Board for Plant Genetic Resources, *Report of a working group on Allium*. Rome, 1992, *Linz. Biol. Beitr.*, 26(2): 966, 969–970. 1994, *Fl. Mesoamer.* 6: 31–32. 1994, *Aliso* 22: 386. 2006. It has been shown that *Allium* species may help to prevent tumor promotion, cardiovascular diseases and aging; all processes that are associated with free radicals. Onions (*Allium* spp.) contain various toxins that can cause problems.

Allium acuminatum Hook. (*Allium acuminatum* var. *cuspidatum* Fernald; *Allium cuspidatum* (Fernald) Rydb.; *Allium cuspidatum* Rydb.; *Allium elwesii* Regel; *Allium murrayanum* Regel; *Allium wallichianum* Regel, nom. inval.)

North America. Perennial herb, bulbs, seeds and leaves eaten

See *Fl. Bor.-Amer.* (Hooker) 2: 184, pl. 196. 1838, *Zoë* 4(4): 380. 1894 and *Fl. Rocky Mts.*: 160. 1917

(Repellent, insecticide, bulbs rubbed on the skin to repel insects.)

in English: tapertip onion

Allium aflatunense B. Fedtsch.

C. Asia. Herb, bulb geophyte, leaves eaten raw or cooked, flowers eaten raw, bulb eaten raw or cooked

See *Bull. Herb. Boissier*, II, 4: 917. 1904

(Antibiotic, germicidal, repellent.)

Allium akaka S.G. Gmel. ex Schult. & Schult.f. (*Allium akaka* S.G. Gmel.; *Allium latifolium* Jaub. & Spach)

Turkey, Iran.

See *Syst. Veg.* 7: 1132. 1830

(Repellent, plant is said to repel insects and moles.)

Allium altaicum Pall. (*Allium ceratophyllum* Besser ex Schult. & Schult.f.; *Allium microbulbum* Prokh.; *Allium sapidissimum* R. Hedw.)

Siberia to N. China.

See *Reise Russ. Reich.* 2: 737. 1773

(Repellent, plant is said to repel insects and moles.)

Allium ampeloprasum L. (*Allium ampeloprasum* subsp. *euampeloprasum* Hayek, nom. inval.; *Allium porrum* L.; *Allium porrum* subsp. *euampeloprasum* Breistr.; *Allium porrum* var. *ampeloprasum* (L.) Mirb.; *Porrum ampeloprasum* (L.) Mill.)

Mediterranean region, Asia. Herb, bulb eaten raw or cooked

See *Species Plantarum* 1: 294. 1753 and *Bull. Soc. Sci. Isère* 61: 610. 1947, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 43–45. 2003

(Anthelmintic, anticholesterolemic, antiseptic, febrifuge, cholagogue, diaphoretic, diuretic, stimulant, stomachic, tonic, vasodilator, expectorant, antiasthma, antispasmodic, repellent, pain-killer.)

in English: elephant garlic, great-head garlic, great-headed garlic, kurrat, leek, pearl onion, wild leek

in Arabic: kourrath

in India: khorat

in Japan: nira-negi

Malayan name: bawang kuchai

Allium anceps Kellogg (*Allium platycaule* S. Watson)

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Proceedings of the California Academy of Sciences* 2: 109, t. 32. 1863, *Proc. Amer. Acad. Arts* 14: 234. 1879

(Insecticide, repellent.)

in English: broadstemmed onion, twinleaf onion

Allium ascalonicum L. (*Allium ascalonicum* auct.; *Allium carneum* Ten.; *Allium carneum* Willd.; *Allium carneum* Targ.-Tozz.; *Allium carneum* Hort. ex Schult.f.; *Allium fissile* Gray; *Allium fissile* Steud.; *Allium hierochuntinum* Boiss.; *Cepa ascalonica* (L.) Garsault; *Cepa ascalonica* Garsault; *Cepa ascalonica* Noronha; *Porrum ascalonicum* (L.) Rchb.; *Porrum ascalonicum* Rchb.)

Mediterranean.

See *Flora Palaestina* 17. 1756, Geoffroy, Etienne-Francois (1672–1731), *Description, vertus et usages de sept ceuts dix-neuf plantes ... : et de cent trente-quatre animaux...*, de m. de Gersault [Garsault, Francois Alexandre Pierre de, 1691–1778], par mm. de Fehrt, Prevost, Duflos, Martinet, & c. / et rangées suivant l'ordre du livre intitulé *Matiere medicale* de m. Geoffroy ... Paris, 1767 [Vols. 2,5 have title: *Les figures des plantes et animaux d'usage en medecine*, décrits dans *Matiere medicale* de m. Geoffroy ... dessinés d'après nature par m. de Garsault ... Paris, L'auteur.], *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 11. 1790, *Inst. Bot.*, ed. 2 1: t. 6. 1802, *Enum. Pl.* [Willdenow] 1: 359. 1809, *Fl. Napol.* 1: 159. [1811–1815], *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1028. 1830, *Fl. Germ. Excurs.*: 110. 1830, *Nomencl. Bot.* [Steudel], ed. 2. 1: 51. 1840, *Fl. Orient.* [Boissier] 5(1): 244. 1882 and *Nucleus* (Calcutta) 43(1,2): 46–57. 2000

(Used in Ayurveda and Unani. Bulb rubbed on skin for itching and burns. Underground stem crushed and boiled, the mixture used as a remedy for throat pain. Leaves and bulbs for fevers.)

in English: shallot

in China: huo cong

in India: ek-kanda-lasun, ekakandalasum, gandana, grnjana, lehsun, rasona, rumpurun, tukhm gandana

in Nepal: chhyapi

Allium bisceptrum S. Watson (*Allium bisceptrum* var. *palm-eri* (S. Watson) Cronquist; *Allium bisceptrum* var. *utahense* M.E. Jones; *Allium palmeri* S. Watson)

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Botany* [Fortieth Parallel] 5: 351, pl. 37, f. 1–3. 1871 [Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel*: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, *Botany*. Washington: Government Printing Office. 1871] and *Contr. W. Bot.* 10: 33. 1902, *Taxon* 25: 155–164. 1976, *Intermountain Fl.* [Cronquist et al.] 6: 515. 1977

(Repellent, appetizer, insecticide.)

in English: Aspen onion, twincrest onion

Allium bisceptrum S. Watson var. *bisceptrum*

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Botany* [Fortieth Parallel] 5: 351, pl. 37, f. 1–3. 1871 and *Intermountain Fl.* [Cronquist et al.] 6: 515. 1977

(Repellent, appetizer, insecticide.)

in English: Aspen onion, twincrest onion

Allium bolanderi S. Watson

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Proc. Amer. Acad. Arts* 14: 229. 1879 and *Taxon* 25: 155–164. 1976

(Repellent, insecticide.)

in English: Bolander's onion

Allium bolanderi S. Watson var. *bolanderi* (*Allium bolanderi* var. *mirabile* (L.F. Hend.) McNeal)

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Proc. Amer. Acad. Arts* 14: 229. 1879 and *Phytologia* 73(4): 307. 1992

(Repellent, insecticide.)

in English: Bolander's onion

Allium brevistylum S. Watson

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Botany* [Fortieth Parallel]: 350. 1871

(Repellent, insecticide. An infusion or a poultice of ground root and stems used as a wash for carbuncles.)

in English: shortstyle onion

Allium canadense L.

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Flora of the Southeastern United States* [Small] 263, 1328. 1903, *Bulletin of the Torrey Botanical Club* 42(6): 351–352. 1915, Pipal, F.J. “A suspected case of stock poisoning by wild onion (*Allium canadense*).” *Proc. Indiana Acad. Sci.*, 1917: 139. 1918, *Amer. J. Bot.* 74: 1087–1092. 1987, Scoggan, R.D. “Wild onion toxicosis and other hemolytic anemia toxins.” *Equine Professional Topics*. Univ. Ill. Urbana-Champagne Ext., 14(1): 1–2. 1989, Benevenga, N.J., Case, G.L., Steele, R.D. “Occurrence and metabolism of s-methyl-l-cysteine and s-methyl-l-cysteine sulfoxide in plants and their toxicity and metabolism in animals.” Pages 203–228 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. III. *Proteins and Amino Acids*. CRC Press, Inc., Boca Raton, Fla., USA. 1989, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 30: 10–15. 1999, *Pl. Biol.* (Stuttgart) 3: 654–660. 2001

(Antiasthmatic, carminative, cathartic, mild cathartic, diuretic, repellent, expectorant and stimulant, used for dropsy, asthma, scurvy; tincture used to prevent worms and colic in children. Plant rubbed on body for protection from poisonous snakebites, and insect, lizard, scorpion and tarantula bites. Gastroenteritis in young children who ingest parts of this plant.)

in English: meadow garlic, wild onion

Allium canadense L. var. *canadense* (*Allium acetabulum* (Raf.) Shinners; *Allium canadense* var. *ovoideum* Farw.; *Allium canadense* var. *robustum* Farw.; *Allium continuum* Small; *Kalabotis canadensis* (L.) Raf.)

North America. Perennial herb, leaves and bulbs eaten raw or cooked

See *Flora of the Southeastern United States* [Small] 263, 1328. 1903, *Bulletin of the Torrey Botanical Club* 42(6): 351–352. 1915, Pipal, F.J. “A suspected case of stock poisoning by wild onion (*Allium canadense*).” *Proc. (Antiasthmatic, carminative, cathartic, mild cathartic, diuretic, repellent, expectorant and stimulant, used for

dropsy, asthma, scurvy; tincture used to prevent worms and colic in children. Plant rubbed on body for protection from poisonous snakebites, and insect, lizard, scorpion and tarantula bites. Gastroenteritis in young children who ingest parts of this plant.)

in English: meadow garlic, wild onion

Allium carolinianum DC. (*Allium aitchisonii* Baker, not Regel; *Allium aitchisonii* Boiss., nom. illeg.; *Allium blandum* Wall.; *Allium obtusifolium* Klotzsch; *Allium obtusifolium* Klotzsch et Garcke; *Allium platyspathum* Schrenk var. *falcatum* Regel; *Allium platystylum* Regel; *Allium polyphyllum* Kar. & Kir.; *Allium polyphyllum* var. *nudicaule* Regel; *Allium thomsonii* Baker)

C. Asia to Himalaya. Fresh tender leaves edible, dried leaves as a flavouring agent

See *Liliac.* 2: t. 101. 1804

(Repellent. Tonic, stimulant, anthelmintic, leaves and bulbs used in indigestion.)

in English: mountain garlic

in China: lian ye jiu

in India: arum, chamcham, jungli-pyaz, koshuk, lo-adh, sukosh

in Nepal: jangali lasoon

in Tibetan: ri sgog

Allium cepa L. (*Allium angolense* Baker; *Allium ascalonicum* auct.; *Allium nigritanum* A. Chev.)

C. Asia. Perennial herb, hollow scape often inflated, inflorescence with up to 2000 flowers, greenish-white to purplish tepals, stamens slightly exceeding tepals, style shorter than stamens at anthesis

See *Species Plantarum* 1: 294–302. 1753 and Thorp, F., Harshfield, G.S. “Onion poisoning in horses.” *J. Am. Vet. Med. Assoc.*, 94: 52–53. 1939, Hutchinson, T.W. “Onions as a cause of Heinz body anaemia and death in cattle.” *Can. Vet. J.*, 18: 358–360. 1977, *Am. J. Vet. Res.*, 40: 397–399. 1979, *Acta Agron. Acad. Sci. Hung.*, 29: 25–37. 1980, *J. Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996

(Used in Ayurveda, Unani and Sidha. Cultivated onion (*Allium cepa*) has caused hemolytic anemia in livestock including cattle, horses, and experimentally in sheep. Death can occur in severe cases. The formation of Heinz bodies in the red blood cells is a common occurrence. Bulbs cough sedative, expectorant, astringent, anthelmintic, pesticide, insecticide, antifungal, antiseptic, febrifuge, antiinflammatory, insect repellent, antispasmodic, rubefacient, carminative, diuretic, anticholesterolemic, hypoglycemic, hypotensive, stomachic and tonic, used for dysentery, colds, coughs, boils, pimples, lung congestion and gas; young bulbs eaten to start menstruation; bulb paste smeared for foot sores; fresh juice of bulb and oil from *Brassica campestris* given to drink as

an emetic in snakebite; fresh juice of bulb applied over scorpion bite; touch therapy, the smell of the bulb inhaled to stop nasal bleeding in children. A preparation of the bulb mixed with honey applied in burns. Ceremonial, rituals, festivals, superstitions, magico-religious beliefs, not used during fast or pious and religious days. Contact therapy, bulb kept in the pocket to protect from the hot winds during summers. Veterinary medicine, root paste of *Thalictrum foliolosum* along with *Allium cepa* given orally for treating fever and shuffle in cattle.)

in English: bulb onion, common onion, Egyptian onion, garden onion, garden shallot, onion, shallot, tree onion

(Antifungal, neurostimulant, stomachic, diuretic, antibacterial, febrifuge, expectorant, repellent, for the prevention of cardiovascular disorders, to enhance recovery from common colds, headaches, wounds and festering sores. Buboos, axillary and inguinal boils and abscesses poulticed with the bulb.)

in English: bunching onion, Chinese onion, Japanese bunching onion, Japanese leek, spring onion, stone leek, Welsh onion

in Cambodia: khtüm sânlök

in China: tsung pai

in Indonesia: bawang bakung, bawang daun, bawang oncampang

in Malaysia: daun bawang

in Philippines: buyah

in Thailand: hom-cheen, hom-ton

in Vietnam: hanh, hom bua, h[af]nh hoa, h[af]nh h[uw][ow]ng, song, thong bach

Allium hookeri Thwaites

Sri Lanka, China. Herb, fleshy roots, bulb raw or cooked, leaves raw or cooked, flowers raw

See *Enumeratio Plantarum Zeylaniae* 339. 1864

(Bulbs paste applied on cuts and wounds, and for relief from body pain; bulbs eaten raw for relief from cough and congestion. Repellent.)

in China: kuan ye jiu

in India: maroi napakpi, maroinapakpi, nishi lahsun, racka

Allium humile Kunth (*Allium gowanianum* Wall. ex Baker; *Allium nivale* Jacquem. ex Hook. f. & Thomson; *Allium nivale* Jacquem. ex Regel, nom. inval.)

India, Himalaya.

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 442–443. 1843, *Trudy Imp. S.-Peterburgsk. Bot. Sada* 3(2): 178. 1875 and *Nucleus* (Calcutta) 24: 147–151. 1981, *Taxon* 30: 707. 1981

(Leaves for indigestion, stomachache.)

in China: xue jiu

in India: farn

Allium macranthum Baker (*Allium oviflorum* Regel; *Allium simethis* H. Lév.)

India, Himalaya, China.

See *J. Bot.* 12(142): 293. 1874, *Trudy Imp. S.-Peterburgsk. Bot. Sada* 8: 658. 1884 and *Repert. Spec. Nov. Regni Veg.* 12(325–330): 288. 1913

(Whole plant used in gastritis, stomachache, respiratory diseases, tuberculosis, menstrual and gynecological disorders.)

in China: da hua jiu

Allium ochotense Prokh. (*Allium latissimum* Prokh.; *Allium ochotense* f. *variegatum* (Nakai ex T. Mori) Nakai; *Allium victorialis* L.; *Allium victorialis* f. *variegatum* (Nakai ex T. Mori) S.O. (Plant antibacterial, repellent, antiemetic, cardiac, depurative, digestive, stimulant, stomachic, carminative and tonic. Used for intestinal disorders, as a stomachic and as bactericide in pulmonary infections. Leaves and bulbs used as antiseptic and vulnerary; leaves and the bulbs applied to bites, cuts and wounds. Seed used in spermatorrhea, against toothache, as an antiseptic mouthwash.)

in English: Chinese chives, garlic chives

in Cambodia: kachaay

in China: jiu cai

in Indonesia: kucai

in Malaysia: kuchai

in Philippines: amput di imayyaw, ganda, kutsay

in Thailand: hom-paen, kuicha

in Vietnam: h[ej], n[es]n t[af]u

Allium unifolium Kellogg (*Allium grandisceptrum* Davidson; *Allium unifolium* Vieill. ex Greene, nom. illeg.; *Allium unifolium* var. *lacteum* Greene)

North America. Perennial herb

See *Proceedings of the California Academy of Sciences* 2: 112, f. 35. 1863, *Pittonia* 2(8A): 55. 1890, *Manual of the Botany of the Region of San Francisco Bay* 321. 1894 and *Bulletin of the Southern California Academy of Sciences* 23(4): 126. 1924

(Plant considered poisonous.)

in English: oneleaf onion

Allium ursinum L.

Europe to Caucasus.

See *Species Plantarum* 1: 294–302. 1753 and *Linzer Biologische Beiträge* 16: 45–81, 83–104. 1984, *Caryologia* 37: 415–421. 1984, *Plant Systematics and Evolution* 159: 193–215. 1988, *Chromosoma* 97: 449–458. 1989, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *Carinthia II* 182: 497–533. 1992, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(10): 88–90. 1992, *International Organization of Plant Biosystematists Newsletter* 24: 21–23. 1995, *Acta Pol. Pharm.* 57(2): 131–133. 2000, *J. Agric. Food Chem.* 53(18): 7288–7294. 2005, *Phytother. Res.* 20(7): 581–584. 2006

(Plant anthelmintic, repellent, disinfectant, stomachic, antiasthmatic, stimulant, antispasmodic, astringent, cholagogue, diuretic, expectorant, febrifuge, hypotensive, anticholesterol-emic, tonic, antiseptic, diaphoretic, vasodilator, rubefacient. Bruised leaves applied to abscesses and boils.)

in English: broad-leaved garlic, ramson, ramsons, wild garlic, wood garlic

Allium victorialis L. (*Allium convallarifolium* Pall. ex Ledeb.; *Allium latissimum* Prokh.; *Allium longibulbum*

Dulac; *Allium microdictyum* Prokh.; *Allium ochotense* Prokh.; *Allium plantaginense* Willk. & Lange; *Allium plantagineum* Lam.; *Allium reticulatum* St.-Lag., nom. illeg.; *Allium victorialis* subsp. *platyphyllum* Hultén; *Allium wenchuanense* Z.Y. Bot. Fenn.* 40: 1–3. 2003, *Ber. Bayer. Bot. Ges.* 76: 85–110. 2006, *Phytother. Res.* 20(7): 581–584. 2006

(Plant antiasthmatic, cathartic, carminative, diuretic, expectorant, blood purifier, hypotensive, stimulant and vasodilator, repellent, weak lachrymatory activity.)

in English: crow garlic, false garlic, field garlic, stag's garlic, wild garlic, wild onion

in South Africa: kraaiknoffel

Allium vineale L. subsp. *vineale*

Europe, Medit. to N. Iran. Perennial herb

See *Species Plantarum* 1: 294–302. 1753 and *Fitologija* (Sofia). 11: 40–46. 1979, *Phytother. Res.* 20(7): 581–584. 2006

(Plant antiasthmatic, cathartic, carminative, antidote, diuretic, expectorant, blood purifier, hypotensive, stimulant and vasodilator, repellent, weak lachrymatory activity.)

in English: crow garlic, false garlic, field garlic, stag's garlic, wild garlic, wild onion

in South Africa: kraaiknoffel

Allium wallichii Kunth (*Allium bulleyanum* Diels; *Allium bulleyanum* var. *tchongchanense* (H. Lév.) Airy Shaw; *Allium feddei* H. Lév.; *Allium liangshanense* Z.Y. Zhu; *Allium polyastrum* Diels; *Allium praelatitium* H. Lév.; *Allium tchongchanense* H. Lév.; *Allium violaceum* Wall. ex Regel; *Allium wallichii* var. *albidum* F.T. Wang & T. Tang; *Nothoscordum mairei* H. Lév.)

China, Pakistan, Nepal to Bhutan, Himalayas. Young tender leaves cooked as a vegetable, bulb eaten raw or cooked, dried leaves used as condiment

See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 443. 1843

(Used in Ayurveda. Leaves decoction carminative, blood purifier. Bulbs eaten in the treatment of cholera and dysentery; raw bulb chewed to treat coughs and colds; cut bulb to relieve headache. Repellent.)

in English: wild garlic

in China: duo xing jiu

in India: bpyazi, doona, dudu, gobka, gogpa, ksirapalandu, laddu, ladu, skatche

in Nepal: ban lasun, banlasun, dhwapa, jimbu ghans, jimbu jhar

Allmania R. Br. ex Wight Amaranthaceae

After the Irish (b. Kingston, Jamaica) botanist William Allman, 1776–1846 (d. Dublin), professor of botany at Dublin; see J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 43. 1965.

Allmania nodiflora (L.) R. Br. (*Allmania albida* R. Br. ex Hook. f.; *Celosia nodiflora* L.; *Chamissoa albida* (R. Br. ex Hook. f.) Moq.; *Chamissoa nodiflora* (L.) Mart.)

China.

See *Species Plantarum* 1: 205. 1753, *Wallich Numer. List* n. 6890, 1832, *Journal of Botany*, being a second series of the Botanical Miscellany 1: 226. 1834 and *Taxon* 28: 393–395. 1979

(Used in Sidha. Leaves eaten as cooling, stomachic.)

in China: sha xian

in India: gurugu kooru, hasiru budde soppu, kamaticckirai, kandu budde gida, kiraikkummatti, kumatti keera, kumat-

tikkirai, kumittikkirai, kummattikkirai, mannu keera, mut-tikkirai, pee-coipa, pee-tardavel

Allomorpha Blume Melastomataceae

From the Greek *allos* 'different, other, diverse' and *morphe* 'a form, shape', see *Flora* 14: 522. 1831.

Allomorpha alata Scort. ex King

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 69: 12. 1900

(For stomachache, boil the leaves, stem and root, and drink the decoction.)

Malay name: puding hutan

Allomorpha exigua Blume

Malaysia, India.

See *Flora* 14: 522. 1831

(Roots decoction as a postpartum remedy. Leaves for headache; for fevers, heat the leaves and apply them to the abdomen.)

Malay names: gajah, keduduk hutan, kenduduk, poko kedukok

Allomorpha malaccensis Ridl.

Malaysia.

See *Journal of the Straits Branch of the Royal Asiatic Society* 79: 69. 1918

(Roots decoction as a postpartum remedy.)

Malay name: lidah buaya

Allophylus L. Sapindaceae

Greek *allos* 'different, strange, foreign' and *phylon* 'tribe, family', Latin *allophylus*, *a*, *um* 'of another stock or race, foreign', not European, coming from a distant country; according to other authors the generic name could mean 'different leaves', from the Greek *allos* and *phyllon* 'a leaf'; see Carl Linnaeus, *Species Plantarum*. 1: 348. 1753, *Genera Plantarum*. Ed. 5. 164. 1754, Palisot de Beauvois, Ambroise Marie Francois Joseph (1752–1820), *Flore d'Oware et de Benin en Afrique*. Paris, 1805–1821 and *Proceedings of the American Philosophical Society*, LXXVI, 6, 1936, 899–920. 1936 [Merrill, Elmer Drew (1876–1956)].

Allophylus africanus P. Beauv. (*Schmidelia africana* (P. Beauv.) DC.)

Tropical Africa. Shrub or tree

See *Flore d'Oware* 2: 75, t. 107. 1807, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 610. 1824

(Fruits, leaves and roots lactogenic, antirheumatic, febrifuge, vermifuge, anthelmintic, abortifacients, sedatives, for infantile fevers, hemorrhoids, menstrual cramping, arthritis, rheumatism, menstrual cycle, dropsy, swellings, edema, gout, iron loss, diarrhea, dysentery, naso-pharyngeal affections, nasal congestion, headache, venereal diseases. Veterinary medicine, lactogenic.)

in English: African allophylus, black false currant

in Burundi: umuvumereza

in Cameroon: eligamonone, wokeke

in Congo: teba, umutwetwe, wobyebye

in East Africa: kotia, miula-swagallo

in Nigeria: akaito, akanro, akara afin, akara esu, ebe aghadeha, eekan-ehoro, ekan-ehoro, eyin-eiye, lanari

in Senegal: banotoren, basigili, busigili, fu singilit, gi-pendélù, gono gonio, kôkômaulo, tuguyuféré

in Togo: weti

Allophylus chartaceus (Kurz) Radlk. (*Allophylus chartaceus* Radlk.; *Allophylus zeylanicus* L. var. *grandifolius* Hiern; *Schmidelia chartacea* Kurz)

India, Himalaya. Shrub, flowers in axillary racemes, red globose fruits

See *Species Plantarum* 1: 348. 1753, *Definitiones Generum Plantarum* 371. 1760, *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 43(2): 183. 1874, *The Flora of British India* 1(3): 673. 1875, *Das Pflanzenreich* [Engler & Prantl] 3(5): 313. 1895

(Leaves paste applied on boils. Plants repel leeches and hairy caterpillar.)

in China: da ye yi mu huan

in India: bap-kang-tang

Allophylus cobbe (L.) Raeusch. (*Allophylus arboreus* Choux; *Allophylus cobbe* (L.) Blume; *Allophylus cobbe* Raeusch.; *Allophylus cobbe* Blume; *Schmidelia integrifolia* DC.)

Madagascar. Shrub or small tree with several stems, trifoliolate densely hairy coriaceous leaves, green white flowers, yellow reddish fruits

See *Nomenclator Botanicus* [Raeusch.] ed. 3 108. 1797, *Prodr.* (DC.) 1: 610. 1824, *Rumphia* 3: 131. 1849, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 335. 1878 and *Annuaire Conserv. Jard. Bot. Genève* 11/12: 35–135. 1908, *Mémoires de l'Académie Malgache* 4: 20–21, f. 3. 1927

(Leaf extract taken against stomachache; leaf paste applied on scabies. Root powder mixed with honey taken for diarrhea. Used for coughs. *Holigarna arnotiana*, *Ocimum gratissimum*, *Allophylus cobbe* and *Centratherum anthelmintica* used as antiseptic in treating cuts and wounds.

Leaves of *Allophylus cobbe*, *Antidesma roxburghii* and *Artocarpus heterophyllus* used in the preparation of *choarak*, a local wine, health tonic, but intoxicating when consumed in large amount.)

in Madagascar: karambito, lakamisy, tanantanampotsy, taolam-bita, taolambita maitso, tsizanazana, voalanary

in India: aeravaala, aeravaalu, arhik-bouna, cevitibukka, challikukudu, chi-cehirum, chindroma, choarak, eravalu, erra avalu, ervaala, gaju chettu, guaguti, guvva gutti, guv-vagutti, juttika, kasaballi, lichi-manbi, molago-maram, moorele bende, mukannanperu, mukkaabara, mukkan-namperu, mukkannanpezhu, paladondathivva, paladondativva, perrakudikai, rakhalphul, salikukudu, salli kunkudu, sallikukuti, sallikunkudu, savitibukka, sidisaale, sidisale, siduguli, sirugoli, siruguli, sirusale, sirusalle, tangutaru, tualikoe, tauatikee, tavaeikit, tavutiki, thangutam, thantisa, thavathiki, theepani, thivana, thogarathi, tsallunia

Allophylus rheedei Radlk.

India.

See *Die Natürlichen Pflanzenfamilien* 3(5): 313. 1895

(Paste of leaves applied for relieving acute back pain.)

Allophylus serratus (Roxb.) Kurz

India. Small tree or shrub, small white flowers

See *Journal of Ethnopharmacology* 99(3): 361–366. 2005

(Used in Ayurveda and Sidha. Whole plant antiinflammatory, astringent, digestive, bitter, vulnerary, anticatarrhal, carminative, tonic, nourishing, for constipation, bone fractures, dislocations, ulcers, wounds, dyspepsia, anorexia, diarrhea. Potential antiulcerogenic activity.)

in India: amalai, eravalu, guvvaguti, juttika, memdri, mirisat, mukkanamperu, mukkannanpelu, mukkannanperera, mukkannanpezhu, mukkannaperiyalam, mukkannaperuku, mukkannapperuku, nukkannanperera, paladondativva, perakkutikkay, perrakudikai, sallikunkudu, savitibukka, sidisale, sirusalle, sisidale, tangutam, tantisa, tavatiki, tipani, tipin, tippani, togaratti, triputah

Allophylus ternatus Lour. (*Allophylus ternatus* (J.R. Forst. & G. Forst.) Radlk.)

SE Asia.

See *Flora Cochinchinensis* 232. 1790

(For thrush, apply the juice of the leaves.)

Malay names: chichang, chinchang

Allophylus timoriensis (DC.) Blume (*Allophylus timorensis* (DC.) Blume; *Schmidelia timorensis* DC.; *Schmidelia timoriensis* DC.)

New Guinea, Indonesia. Tree or shrub, diffusely branched, leaves glossy dark green above with white-yellow nerves,

white greenish flowers, bird feed, wood used to make traps and fishing pole

See *Species Plantarum* 1: 348. 1753, *Definitiones Generum Plantarum* 371. 1760, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 611. 1824, *Rumphia* 3: 130. 1847

(Leaves tonic, healing, antibacterial, promote circulation, prevent sickness.)

in China: hai bin yi mu huan, hai bing yi mu huan

in Japan: akagi-modoki

in Marshall Islands: k'taak, keda, kftaak

in Palau: chebeludes, ebeludes, ngou

in Pacific: engel, ngou, surichuhcheruh

Allophylus viridis Radlkofer

China, Vietnam. Shrub, red globose fruit

See *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 38: 229. 1909

(*Shuixiazicao Qushi Zhentong*, made up by using the Chinese medicinal materials of *shuixiazicao*, *Allophylus viridis*, *Citrus reticulata*, *xueshanlin* and *jingangsan* and adding white liquor, medicine liquor to treat the diseases of rheumatoid arthritis, rheumatic numbness, arthralgia and myalgia, traumatic injury and soft tissue contusion.)

in English: green allophylus

in China: yi mu huan

Allophylus zeylanicus L.

India, Himalaya.

See *Species Plantarum* 1: 348. 1753

(Leaves applied on boils.)

Alloteropsis J. Presl Poaceae (Gramineae)

From the Greek *allos* 'foreign, strange, stranger, alien', *allotereon* 'foreign' and *opsis* 'resemblance', see *Prodromus Florae Novae Hollandiae* 192. 1810, *Reliquiae Haenkeanae* 1(4–5): 343–344, t. 47. 1830, *Edinburgh New Philosophical Journal* 15: 381. 1833, *Delectus Seminum quae in Horto Hamburgensium Botanico* 1834: 8. 1834, *Fl. Afr. Austr. Ill. I. Gramineae*, 61. 1841, *Synopsis Plantarum Glumacearum* 1: 118. 1854, *Index Kewensis* 1: 618. 1893, *The Flora of British India* 7(21): 63. 1897 [1896] and *Contributions from the United States National Herbarium* 12(6): 210. 1909, F.M. Bailey, in *Queensland Agricultural Journal*. 27: 69, t. XIX. 1911, *Annali di Botanica* 13: 47. 1914, *Willdenowia* 4: 209, 21. 1966, *Flora of Tropical East Africa* 451–898. 1982, *Annals of the Missouri Botanical Garden* 75: 866–873. 1988, *Botanical Journal of the Linnean Society* 97: 255–259.

1988, *ASBS Symposium 1990: Indo-Pacific Biogeography*, 14. 1990, *Contributions from the United States National Herbarium* 46: 16. 2003.

Alloteropsis cimicina (L.) Stapf (*Agrostis cimicina* (L.) Poir.; *Agrostis digitata* Lam.; *Agrostis digitata* (Sw.) Poir., nom. illeg., non *Agrostis digitata* Lam.; *Alloteropsis latifolia* (Peter) Pilg.; *Alloteropsis quintasii* (Mez) Pilg.; *Axonopus cimicinus* (L.) P. Beauv.; *Axonopus latifolius* Peter; *Coridochloa cimicina* (L.) Nees ex Chase; *Coridochloa cimicina* (L.) Nees; *Coridochloa cimicina* (L.) Nees ex B.D. Jacks.; *Eriachne melicacea* f. *fragrans* F.M. Bailey, nom. inval.; *Eriachne melicacea* var. *fragrans* F.M. Bailey; *Milium cimicinum* L.; *Milium digitatum* Sw.; *Panicum cimicinum* (L.) Retz.; *Urochloa cimicina* (L.) Kunth; *Urochloa quintasii* Mez)

Old World tropics, SE Asia, tropical Africa. Short-lived perennial or annual, erect or decumbent or ascending, tufted, inflorescence 1-whorled, spike-like racemes on the top of the peduncle, weed species, hay, forage, moderate fodder value, useful for erosion control

See *Mantissa Plantarum Altera* 184. 1771, *Obs. Bot.* 3: 9. 1783, *Encyclopédie Méthodique, Botanique* 1: 59. 1783, *Nova Genera et Species Plantarum seu Prodromus* 24. 1788, *Encyclopédie Méthodique, Botanique* Suppl. 1: 258. 1810, *Essai d'une Nouvelle Agrostographie* 12, 154. 1812, *Révision des Graminées* 1: 31. 1829, *Edinburgh New Philosophical Journal* 15: 381. 1833, *Enum. Pl. Zeyl.* 5: 358. 1864, *Index Kewensis* 1: 618. 1893 and *Handb. Fl. North America. Tree or shrub, perennial

See *The Gardeners Dictionary* ... Abridged ... fourth edition no. 1. 1754, *Diss. Observ. Bot.* 31. 1771, *Methodus Plantas Horti Botanici* ... 424. 1794, *Systema Vegetabilium*, editio decima sexta 3: 848. 1826 and *Cornell University Agricultural Experiment Station Memoir* 291: 8. 1949

(Roots emetic, diaphoretic, cathartic, laxative, antihemorrhagic, astringent; compound decoction of root used as a wash or compress for sore eyes; infusion of young plant and twigs analgesic, a liniment for pain of sprains, bruises, backache and headache. Infusion of bark abortifacient, astringent, diaphoretic, emetic, laxative, cathartic, for diarrhea; bark chewed for ulcerated mouths; decoction a wash for sores. Veterinary medicine, infusion of root bark used as a wash for horses with saddle gall.)

in North America: aulne blanchâtre, mountain alder, speckled alder, swamp alder, tag alder

Alnus incana (Linnaeus) Moench subsp. *tenuifolia* (Nuttall) Breitung (*Alnus communis* Desf. ex Kuntze; *Alnus densiflora* C.H. Mull.; *Alnus glutinosa* var. *virescens* (S. Watson) Kuntze; *Alnus incana* var. *occidentalis* (Dippel)

C.L. Hitchcock; *Alnus incana* var. *virescens* S. Watson; *Alnus occidentalis* Dippel; *Alnus rugosa* (Du Roi) Sprengel var. *occidentalis* (Dippel) C.L. Hitchcock; *Alnus tenuifolia* Nutt.; *Alnus tenuifolia* var. *occidentalis* (Dippel) Callier; *Alnus tenuifolia* var. *virescens* (S. Watson) Callier; *Alnus × purpusii* Callier)

Alaska, California to New Mexico. Perennial shrub or tree

See *Methodus Plantas Horti Botanici* ... 424. 1794, *The North American Sylva* 1(1): 10, 48. 1842 and *Madroño* 5: 152. 1940, *Amer. Midl. Naturalist* 58(1): 25. 1957, *Vasc. Pl. Pacif. N.W.* 2: 73. 1964

(Infusion of bark taken for pains in the lungs or hips, for scrofula, colds, as a laxative, and as a diuretic for gonorrhoea.)

in English: mountain alder, thinleaf alder

Alnus jorullensis Kunth (*Alnus acuminata* var. *jorullensis* (Kunth) Regel)

Mexico, Guatemala.

See *Nov. Gen. Sp.* 2: 20. 1817, *Nouv. Mém. Soc. Imp. Naturalistes Moscou* 13(2): 149. 1861

(Leaves for rheumatism.)

Alnus nepalensis D. Don (*Alnus boshia* Buch.-Ham. ex D. Don; *Alnus fruticosa* subsp. *kamtschatica* (Regel) Kozhev.; *Alnus kamtschatica* (Regel) Kudô ex Masam.; *Alnus viridis* lusus *kamtschatica* Regel; *Betula boshia* Buch.-Ham. ex D. Don, nom. nud.; *Clethropsis nepalensis* (D. Don) Spach)

Nepal, Himalayas. Tree, straight, fast growing, extensive root system, male and female flowers

See *Species Plantarum* 2: 982–983. 1753, *Flore Française. Troisième Édition* 3(3): 304. 1805, *Prodromus Florae Nepalensis* 58. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 2, 15: 183, 201–202. 1841, *Nouv. Mémoires de la Société Impériale des Naturalistes de Moscou* 13(2): 139. 1861 and *Journal of Cytology and Genetics* 24: 179–183. 1989

(Plant hypoglycemic, spasmolytic. Green bark ground into a paste and eaten for stomachache and dysentery; juice of the bark boiled and the gelatinous liquid applied to burns; powdered bark to treat cuts and burns. Root and bark decoction diuretic, astringent, to treat severe diarrhea, dysentery, stomachache, fever, pain, cold, for reducing swelling of the leg. Veterinary medicine, leaves paste warmed and applied on sprain.)

in English: alder, Indian alder, Nepal alder, Nepalese alder

in China: ni po er qi mu

in India: alnas, entsung taluba, intsung-tong, intsungtong, koi, koi, pao, pareng, piak, rupuo, sarpli, seur, tratpe, udis, ust, utis

in Nepal: ghozel, udis, utils

Alnus nitida (Spach) Endl. (*Alnus nitida* Endl.; *Clethropsis nitida* Spach)

India, Himalayas.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 15: 202. 1841, *Genera Plantarum Suppl.* [Endlicher] Suppl. 4(2): 20. 1848 and *Taxon* 31: 592–593. 1982, *Journal of Cytology and Genetics* 24: 179–183. 1989

(Astringent, bark decoction applied externally to treat swellings, rheumatism and body pains; bark used to treat diphtheria.)

in India: chamb, koi, kosh, kunis, kunish, nyun, piak, sharol, utis kunis

Alnus rhombifolia Nuttall (*Alnus rhombifolia* var. *bernardiana* Munz & I.M. Johnston.; *Alnus rhombifolia* var. *bernardina* Munz & I.M. Johnston)

California. Tree, inner bark for food

See *N. Amer. Sylva* 1(1): 33, 49. 1842 and *Bulletin of the Torrey Botanical Club* 52(5): 222–223. 1925

(Decoction of dried bark taken for diarrhea, stomachaches, consumption, burns, as a blood purifier, an emetic, and a wash for babies with skin diseases, sores, diaper rash, itching skin, and to facilitate childbirth.)

in English: California alder, white alder

Alnus rubra Bongard (*Alnus oregana* Nutt.; *Alnus oregona* Nuttall; *Alnus rubra* Desf. ex Spach; *Alnus rubra* var. *pinatisecta* Starker)

North America. Tree, perennial

See *Nomenclator Botanicus* 1: 29. 1821, *Mém. Acad. Sci. St.-Pétersbourg. Sér. 6, Sci. Math.* 2(2): 162. 1833, *Journal of Forestry* (Washington) 37: 115. 1939, *The North American Sylva* 1(1): 9. 1842 and *Bibliography of Cultivated Trees and Shrubs* 104. 1949

(Infusion of stem bark emetic, purgative, for headache. Decoction of bark purgative, emetic, cathartic, wound dressing, tonic, antihemorrhagic, for aching bones, headaches, coughs, biliousness, stomach troubles, scrofula sores, tuberculosis, asthma, eczema, colds; poultice of bark applied to sores, eczema and aches; infusion of bark taken for tuberculosis and asthma. Staminate aments chewed and used for sores, pistillate aments chewed and used for the stomach, lungs. Catkins chewed for diarrhea. Ceremonial, ritual, bark dyed red and used for ritual applications.)

in English: Oregon alder, red alder

Alnus serrulata (Aiton) Willdenow (*Alnus incana* (L.) Moench var. *serrulata* (Aiton) B. Boivin; *Alnus noveboracensis* Britton; *Alnus rubra* Desfontaines ex Spach; *Alnus rugosa* (Du Roi) Sprengel var. *serrulata* (Aiton) Winkler; *Alnus serrulata* fo. *noveboracensis* (Britton) Fernald; *Alnus*

serrulata (Aiton) Willd. var. *subelliptica* Fernald; *Betula serrulata* Aiton)

North America. Tree or shrub, perennial

See *Hort. Kew.* 1: 338. 1789, *Flora Boreali-Americana* 2: 181. 1803, *Species Plantarum*. Editio quarta 4(1): 336. 1805, *Nomenclator Botanicus* 1: 29. 1821, *Systema Vegetabilium*, editio decima sexta 3: 848. 1826, *Nouv. Lett.* 27(22): 1815–1820. 2005

(Irritant, high content of needle-like calcium oxalate crystals. Not documented as a poisonous plant, however, reported cases of fatal poisoning following ingestion of its fruit; the clinical manifestations have a similarity to cyanogenic glycoside poisoning. Corm eaten to cure rheumatism and gout, bodyache, anti-snake-venom action, mitogen.)

in English: Chinese ape, Chinese taro

in China: bu jie

in India: alu, charakanda, maanaka, manaka, mankanda, marambu, merukankilangu, pallucabi

in Japan: shima-kuwazu-imo

in Okinawa: nbashi

in Sri Lanka: nai habarala

Alocasia fornicata (Roxb.) Schott (*Alocasia fornicata* Schott; *Arum fornicatum* Roxb.; *Arum fornicatum* Roth; *Arum fornicatum* Wight; *Colocasia fornicata* (Roxb.) Kunth)

India, Sri Lanka. Erect herb, inflorescence erect, towards the base of the spadix green female flowers with white stigma

See *Hort. Bengal.* 65. 1814, *Novae Plantarum Species* 362. 1821, *Flora Indica*; or, descriptions of Indian Plants 3: 501. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 41. 1841, *Icon. Pl. Ind. Orient.* [Wight] iii. t. 789. 1844, *Oesterr. Bot. Wochenbl.* 4: 410. 1854 and *Cytologia* 43: 289–303. 1978

(Latex from fresh stem a remedy against scorpion, snake and insect bites, also applied for relief from skin irritation and to reduce inflammation. Rhizome made into a paste applied to cure fractured parts. Veterinary medicine, rhizome paste an insecticide for cattle.)

in India: baibing, nyarak

Alocasia longiloba Miq. (*Alocasia amabilis* W. Bull.; *Alocasia cochinchensis* Pierre ex Engl. & K. Krause; *Alocasia curtisii* N.E. (Used in Ayurveda and Sidha. Cyanogenic, whole plant irritant, corneal injury, crystalline keratopathy; the mature plant can cause severe dermatitis; leaves acrid juice blisters skin, causes swelling of the mouth and throat if leaves chewed. Rootstock styptic, astringent, antifungal, analgesic, diuretic, laxative, appetizer, aphrodisiac. Rhizome paste applied on ulcers and wounds. Leaves and rhizome

for the treatment of impetigo, stomachache, snakebite, scorpion sting; sliced tubers and leaves used as a rubefacient. Leaves styptic, to relieve sunburns, rheumatism and sores. Petiole decoction given to increase lactation. Stem squeezed to extract liquid drunk for sore throat. A bath for skin conditions, itching or new burns. Mitogenic potential towards human peripheral blood lymphocytes. *Alocasia indica* used to treat diarrhea and in gastrointestinal disorders. Veterinary medicine, a horse medicine; leaves given to cattle during pregnancy.)

(Some humans develop allergic contact dermatitis from this plant. Ingesting the plant latex can cause a cathartic action. Excessive doses may cause nephritis. A first-aid treatment for burn wounds and abrasions. Wound healing, stomachic, antibacterial, antihistamine, antiulcer, antiinflammatory, anticarcinogenic, hypoglycemic, purgative. Leaves dried and pounded into a powder, used as a protection against storms.)

in English: candelabra aloe, Kidachi aloe, Krans aloe, Krantz aloe, mountain bush aloe, octopus plant, sword aloe, torch plant

in Portuguese: foguetes de Natal

in Brazil: aloé, azebra, babosa, erva-babosa, zebra

in Southern Africa: Kransaalwyn, Sayaan (Bakone, Secocoeniland); iNhlaba-encane, umHlabana, umhlabana, inkalane, inKalane-encane, inKalene encane, inHlazi (Zulu); iKhala, ikalene, uNomaweni (Xhosa)

Aloe asperifolia A. Berger

Namibia.

See *Bot. Jahrb. Syst.* 36: 63. 1905, *Journal of Ethnopharmacology* 119(3): 604–614. 2008

(Leaves infusion taken to treat arteriosclerosis, kidney problems, asthma, colds and epilepsy. Leaves decoction drunk to cure arteriosclerosis, kidney problems, asthma, epilepsy and colds, also taken by humans and livestock to expel the placenta, to induce discharge of the afterbirth, and given to donkeys when they have eaten poisonous plants. Leaves chewed or a decoction drunk for the relief of stomach and chest pains.)

in Namibia: aukoreb, heksekringe (= witches circles), kraa-laalwyn (= kraal aloe)

Aloe ballyi Reynolds

Kenya and Tanzania. Leaves contain poisonous chemicals that smell of rat

See *J. S. African Bot.* 19: 2. 1953, *J. S. African Bot.* 30: 123. 1964

(Leaf sap taken as a purgative, dangerous, poisonous alkaloids.)

in English: rat aloe

Aloe barberae Dyer (*Aloe bainesii* Dyer; *Aloe bainesii* var. *barberae* (Dyer) Bak.; *Aloe zeyheri* Baker, nom. illeg.) (for Mary Elizabeth Barber, born Bowker, England, 1818–1899, South African natural historian, plant collector and artist)

(*Aloe bainesii* named for the British (b. Norfolk) explorer and artist Thomas Baines, 1822–1875 (d. Natal), traveller and plant collector, who first recorded it from the Greytown area, Natal, South Africa, in June 1873; see Russell Braddon, *Thomas Baines and the North Australian Expedition*. Sydney 1986; F.A. Stafleu and E.A. Mennega, *Taxonomic literature. Supplement I: A-Ba.* 273. Königstein 1992; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 34. [“born 1820”] London 1994; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 85–86. Cape Town 1981)

Mozambique to S. Africa. Tree, solitary, many-branched, massive trunk, high rounded crown, greyish brown bark, terminal rosettes of long and narrow leaves, leaf margin armed with small teeth, erect spikes of orange-pinkish flowers, dry capsules, pollinated by sunbirds

See *Gard. Chron.* 1874(1): 566–567. 1874, *J. Linn. Soc., Bot.* 18: 178. 1880 and Germishuizen, G. & Meyer, N.L. (eds.) *Plants of Southern Africa: An Annotated Checklist. Strelitzia* 14: i-vi, 1–1231. Pretoria. 2003

(Medicinal. Juice purgative.)

in English: tree aloe

in Southern Africa: boomaalwyn, mikaalwyn; umGxwala, inDlabendlazi, imPondondo, imPondonndo, inKalane enkulu (= the big one) (Zulu)

Aloe broomii Schönland (Collected by Dr R. Broom in 1905 at Pampoenpoort)

S. Africa. Short-stemmed, robust, green leaves with reddish brown teeth along the margins, slender snake-like inflorescence densely flowered, flowers completely hidden by longer bracts, winged seeds

See *Rec. Albany Mus.* 2: 137. 1907, *Phytochemistry* 45(1): 97–102. 1997

(Disinfectant, insecticide. Veterinary medicine, used to kill ticks, an ear remedy for sheep.)

in English: mountain aloe, snake aloe

in South Africa: bergaalwee, slangaalwyn

Aloe buettneri A. Berger (*Aloe barberi* Baker p.p.)

West Africa, Gabon. Succulent perennial herb, stemless, related to *Aloe schweinfurthii*

See *Bot. Jahrb. Syst.* 36: 60. 1905, Sosef, M.S.M. et al. *Checklist des plantes vasculaires du Gabon*. Scripta Botanica Belgica. [as *Aloe tenuifolia*.]

(Leaves applied externally for skin troubles, burns, wounds, insect bites, Guinea worm sores, rheumatism and vitiligo; leaf decoction drunk to cure cough; dried powdered leaves taken to treat malaria. Leaf sap taken to treat intestinal and urogenital problems. Bulbs and roots decoctions taken for liver problems, jaundice. Decoctions of leaves, roots and whole

plants taken as a laxative, to treat stomachache, infertility in women, venereal diseases and internal parasites. Veterinary medicine, leaf sap given to cattle as an anthelmintic.)

Aloe camperi Schweinf. (*Aloe albopicta* A. Berger; *Aloe eru* A. Berger; *Aloe eru* var. *cornuta* A. Berger)

Eritrea, Ethiopia. Short-stemmed, many offshoots, light green arching leaves, tubular orange-yellow flowers on long stalks, grows in colonies

See *Das Pflanzenreich*, IV, 38: 249–250. 1908

(Exudate antifungal.)

Aloe capitata Baker (*Aloe cernua* Todaro ap. Berger; *Aloe cernua* Todaro)

Madagascar. Succulent, leaves marginal teeth pungent, racemes densely capitate, flowers orange-yellow narrowly campanulate

See *J. Linn. Soc., Bot.* 20: 272. 1883, *Hort. Bot. Panorm.* 2: 49, t. 36. 1890 and *Pflanzenreich, Aloineae* 274. 1908

(Leaf sap used as a cathartic and purgative; whole plant to cure dropsy.)

Aloe carolineae L.E. Newton (for Caroline Wheeler, 1960–2000, Kenya, who was active in conservation of Kenya's environment and protection of Ngar Ndare Forest)

Kenya.

See *Brit. Cactus Succ. J.* 20: 205. 2002

(Leaf sap to cure eye disorders.)

Aloe chabaudii Schönland

Congo, Tanzania and Southern Africa. Shrub, suckering succulent herb, yellow sap when cut, rosette of big toothed grey-green leaves, tubular flowers reddish pink, many-branched inflorescence

See *Die Pflanzenwelt Ost-Afrikas* C: 140. 1895 and *Gard. Chron.*, III, 1905(2): 102. 1905, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 19: 67–80. 1987

(Leaves infusion abortifacient, insecticide, astringent, for diarrhea, dysentery, toxic to poisonous, fatal casualties have been reported; leaves decoction toxic, taken orally as a purgative, cathartic; leaf sap rubbed into scarifications. Root decoction drunk to treat blood in the urine; roots infusion antinausea, antiemetic. Veterinary medicine, cattle drenched with the leaf infusion to cure diarrhea.)

in English: dwala aloë

in South Africa: tshikhopha

Aloe christianii Reynolds

Congo, Tanzania, Southern Africa. Shrub, succulent, erect, acaulescent, lanceolate blue green leaves with pungent teeth, erect branched inflorescence, flowers orange red

See *J. S. African Bot.* 2: 171. 1936, *Mem. New York Bot. Gard.* 9: 90. 1954, *Kirkia* 9: 151. 1973

(Leaf infusion taken to induce abortion, but is considered too poisonous; leaves juice for gonorrhoea, wounds, coughs, skin infections, snakebites and stomach ailments.)

Aloe citrina S. Carter & Brandham (*Aloe trichosantha* A. Berger)

Somalia, Ethiopia, Kenya. Branched, leaves grey green

See *Bradleya; Yearbook of the British Cactus and Succulent Society* 1: 17–24. 1983

(The exudate used to cure inflammation of the eye.)

Aloe congolensis De Wild. & T. Durand

Congo. Shrub, clumped, fleshy leaves, orange flowers, closely related to *Aloe tenuifolia* and *Aloe buettneri*

See *Ann. Mus. Congo Belge, Bot.*, II, 1: 61. 1899

(Leaf sap to treat sores, wounds, burns, pain in the joints, inflammation of the breasts and as a laxative; dried and powdered leaves used for asthma, diabetes, sore throat, rheumatism, stomachache, and said to prevent cancer of the colon and rectum.)

Aloe cryptopoda Baker (*Aloe pienaarrii* Pole Evans; *Aloe wickensii* Pole-Evans; *Aloe wickensii* var. *lutea* Reynolds; *Aloe wickensii* var. *wickensii*)

Zimbabwe, Botswana, South Africa. Stemless succulent herb, greyish-green smooth leaves, leaf-margins armed with small and sharp teeth, branched inflorescence, tubular dark red to yellow flowers

See *Trans. Roy. Soc. South Africa* 5: 29. 1915, *J. S. African Bot.* 3: 145. 1935, *Aloes Trop. Africa & Madagascar*: 181, pl. 37. 1966, *Kirkia* 9: 151. 1973

(Leaf juice to treat constipation, venereal diseases and as abortifacient. Pounded leaves for gonorrhoea, and a dressing for wounds. Magic, ritual, ceremonial, protective at the time of a funeral.)

in South Africa: geelaalwyn

Aloe dawei A. Berger (*Aloe beniensis* De Wild.; *Aloe pole-evansii* Christian)

Zaire, Uganda, Kenya. Shrub, reddish green leaves, orange red flowers, multiple branching inflorescences, attracts hummingbirds

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 4: 246. 1906, *Fl. Pl. South Africa* 10: 782. 1940, *Chromosoma* 51: 269–275. 1975

(Leaf extract drunk to cure malaria, and used as drops to treat inflammation of the ear; leaves powdered for skin diseases, eczema, vitiligo.)

in English: Dawe's aloë

Aloe dichotoma Masson (*Rhipidodendrum dichotomum* (Masson) Willd.)

Namibia. Shrub, tree-like, copious sap, crown often densely rounded, smooth branches, thin layer of whitish powder, succulent, blue-green leaves, bright yellow flowers, young flower buds can be eaten, sheep eat the dry leaves

See *Philos. Trans.* 66: 310. 1776, *Mag. Neuesten Entdeck. Gesammten Naturk. Ges. Naturf. Freunde Berlin* 5: 166. 1811 and *Journal of South African Botany* 48: 409–418. 1982

(Roots decoction drunk to treat asthma and tuberculosis.)

in English: quiver tree

in Namibia: garab

in Southern Africa: garas, kokerboom

Aloe divaricata A. Berger (*Aloe saundra* Bojer, nom. nud.; *Aloe saundra* Bojer ex Baker, nom. nud.; *Aloe saundra* Bojer, nom. nud.; *Aloe vahontsohy* Decorse, nom. nud.; *Aloe vaotsohy* Decorse & Poisson)

Madagascar. Shrub, erect inflorescence, viscous sap bright yellow

See *Hortus Mauritianus* 345. 1837, *Journal of Botany, British and Foreign* 20: 267. (n.s., vol. 11). 1882 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 64–65. 1905, *Recherches sur la Flore Méridionale de Madagascar* 96. 1912, *Annals of the Missouri Botanical Garden* 74: 123–125. 1987

(Leaves for stomachache, venereal diseases, a decoction as a purgative, reported to induce labor.)

in Madagascar: vahintsofy, vaho, vahotsoy

Aloe duckeri Christian (*Aloe chimanimaniensis* auct.)

Tanzania, Malawi and Zambia. Succulent, solitary or suckering, sometimes decumbent, sap clear, unspotted or lightly spotted leaves in a dense rosette, leaf margins with strong red-brown teeth, erect branched inflorescence, dull orange-red flowers, confused with *Aloe lateritia*

See *Fl. Pl. South Africa* 16: 639. 1936, *J. S. African Bot.* 6: 179. 1940

(Leaf sap used to help childbirth.)

Aloe esculenta L.C. Leach

Southern Africa, Zambia, Namibia.

See *J. S. African Bot.* 37: 249. 1971, Germishuizen, G. & Meyer, N.L. (eds.) *Plants of Southern Africa: an annotated checklist. Strelitzia* 14. National Botanical Institute, Pretoria. 2003 [as *Aloe angolensis*.], *Journal of Ethnopharmacology* 119(3): 438–454, 700–704. 2008

(Antimalarial, antiplasmodial, antimicrobial. Leaf sap applied to burns and cuts. Pulverized dried root made into a paste and applied to painful and swollen body parts.)

Aloe excelsa A. Berger

Southern Africa. Tree-like, single-stemmed, dense rosettes of dull green leaves, many-branched panicles of orange-red to scarlet flowers

See *Notizbl. Königl. Bot. Gart. Berlin* 4: 247. 1906, *Journal of Ethnopharmacology* 16: 117–151. 1986, *Cent. Afr. J. Med.* 51(11–12): 115–120. 2005, *African Journal of Biotechnology* 6 (20): 2406–2410. 2007

(Leaf infusion taken as a malaria prophylactic and to cure stomachache, stomach ailments, diabetes, asthma, jaundice, sexually transmitted diseases, burns, wounds, spasms and ulcers; leaf exudate antimicrobial, antibacterial, antifungal, for the treatment of wounds, burns, sun burn, rashes, itches, cracked lips and cracked skin; diluted tea from leaf exudates laxative, blood purifier. Veterinary medicine, leaf gel effective in controlling coccidiosis in broilers.)

in English: noble aloe, Zimbabwe aloe, Zimbabwe tree aloe

in Southern Africa: ruMangamunu, iMangani, wuNdumba

in S. Rhodesia: muNdumba, ruMangamuru

Aloe ferox Mill. (*Aloe candelabrum* A. Berger, nom. illeg.; *Aloe candelabrum* Tod.; *Aloe ferox* var. *galpinii* (Baker) Reynolds; *Aloe ferox* var. *incurva* Baker; *Aloe ferox* var. *subferox* (Spreng.) Baker; *Aloe galpinii* Baker; *Aloe horrida* Haw.; *Aloe muricata* Haw.; *Aloe pallancae* Guillaumin; *Aloe perfoliata* Meyen; *Aloe perfoliata* Thunb.; *Aloe perfoliata* L. var. *e*; *Aloe perfoliata* var. *g*; *Aloe perfoliata* var. *q* (Mill.) Aiton; *Aloe perfoliata* var. *z* Willd.; *Aloe perfoliata* var. *ferox* (Mill.) Aiton; *Aloe pseudo-ferox* Salm-Dyck; *Aloe pseudoferox* Salm-Dyck; *Aloe subferox* Spreng.; *Aloe supralaevis* Haw.; *Aloe supralaevis* var. *erythrocarpa* A. Berger; *Aloe supralaevis* var. *erythrocarpa* Baker; *Busipho ferox* (Mill.) Salisb., nom. inval.; *Busipho ferox* Salisb.; *Pachidendron ferox* (Mill.) Haw.; *Pachidendron ferox* Haw.; *Pachidendron pseudo-ferox* (Salm-Dyck) Haw.; *Pachidendron pseudoferox* (Salm-Dyck) Haw.; *Pachidendron pseudoferox* Haw.; *Pachidendron supralaeve* (Haw.) Haw.; *Pachidendron supralaeve* Haw.)

South Africa. Succulent, perennial, thick, single-stemmed, dark brown spines along the leaves margins, erect branched inflorescence, mountain slopes, rocky slopes, flat open areas

See *Sp. Pl.* 1: 319 (–320). 1753, *The Gardeners Dictionary*: ... eighth edition no. 22. 1768, *Hort. Kew.* 1: 467. 1789, *Trans. Linn. Soc. London* 7: 22. 1804, *Revis. Pl. Succ.* 38, 40. 1821, *Syst. Veg.* (ed. 16) [Sprengel] 2: 73. 1825, *Reise Erde* 2: 45. 1834, *Gen. Pl.* [Salisbury] 76. 1866, *Hort. Panorm.* (1876) 46. 1876, *J. Linn. Soc., Bot.* 18: 180. 1880, *Fl. Cap.* 6: 327. 1896 and *Bull. Misc. Inform. Kew* 1901: 135. 1901, *Notizbl. Königl. Bot. Gart. Berlin* 4: 246. 1906, *J. S. African Bot.* 3: 127. 1937, *Cytologia* 45: 515–532. 1980, *American Journal of Botany* 87(11): 1578–1583. 2000

(Used in Ayurveda. Leaf juice applied externally to treat skin irritations, burns and bruises. Boiled leaves or roots taken as

a laxative, and for eczema, hypertension, arthritis, conjunctivitis; leaves for venereal diseases, syphilis; burning leaves in houses to expel mosquitoes and insects. Veterinary medicine, leaf juice purgative, laxative.)

in English: bitter aloe, candelabra aloe, Cape aloe, red aloe

African names: sabr, shubiri

in Lesotho: lekhala le lehola

in Southern Africa: aalwyn, bitteraalwyn, kanniedood, tapaalwyn; iNhlaba, umHlaba (Zulu); Hlaba (= to pierce), Lekhala la Quthing (= the aloe of Quthing) (Basutoland); iKhala (= the month of July), umhlaba (Xhosa); hlaba (Sotho)

in India: kumari

Malayan names: lidah buaya

Aloe fibrosa Lavranos & L.E. Newton

Kenya, Tanzania.

See *Cact. Succ. J.* (Los Angeles) 48: 273. 1976, *African Journal of Biotechnology* 7 (7): 912–915. 2008

(Larvicidal, for mosquito control.)

Aloe flexilifolia Christian

Tanzania. Succulent perennial shrub, stout, erect, slender, pendulous, many-branched from the base forming large clumps

See *Journal of South African Botany* 8: 167. 1942

(Exudate known to be caustic, purgative. Sap from crushed roots and leaves applied to reduce swelling of the testicles and scrotum.)

Aloe fosteri Pillans

South Africa.

See *S. African Gard.* 23: 140. 1933

(Leaves, warmed in hot ash, used on wounds.)

Aloe globuligemma Pole-Evans

Botswana, Zimbabwe and South Africa. Perennial herb, stemless or short-stemmed, suckering, leaves in a dense rosette, reddish pink flowers, erect multibranched inflorescence

See *Trans. Roy. Soc. South Africa* 5: 30. 1915

(Sap of this species poisonous, known to have caused fatal poisoning, toxic plants smell of rats which indicate the presence of an alkaloid. Leaf infusion abortifacient, taken to relieve stomachache and for venereal diseases.)

in Southern Africa: knoppiesaalwyn

Aloe greatheadii Schönland var. *davyana* (Schönland) Glen & D.S. Hardy (*Aloe barbertoniae* Pole-Evans; *Aloe comosibracteata* Reynolds; *Aloe davyana* Schönland; *Aloe davyana* var. *davyana* Schönland; *Aloe davyana* var. *subolifera* Groenew.; *Aloe graciliflora* Groenew.; *Aloe greatheadii* var.

davyana Glen & Hardy; *Aloe labiaflava* Groenew.; *Aloe longibracteata* Pole-Evans; *Aloe mutans* Reynolds; *Aloe verdoorniae* Reynolds) (*Aloe greatheadii* was first collected by Dr. S. Schonland and Dr. J.B. Greathead at Mapellapoede (= Mabela-e-Pudi = the goat's nipples), 18 miles North of Serowe on the road to Lake Ngami, Bechuanaland, in August 1903; see A. Sillery, *The Bechuanaland Protectorate*. London 1952; R.A.R. Bent, *Ten Thousand Men of Africa: the story of the Bechuanaland Pioneers and Gunners 1941–1946*. London 1952. The variety, *davyana*, named after Dr. J. Burt Davy, head of the Botany Division (later Botanical Research Institute) of the Department of Agriculture in 1903.)

S. Africa. Perennial herb, acaulescent, succulent leaves arranged in a basal rosette, leaf margins armed with sharp dark brown teeth, branched inflorescence, flowers pale pink to red, bee plant

See *Tijdschr. Natuurk. Wetensch. Kunsten* 14: 57, 137. 1936, *J. S. African Bot.* 2: 27, 173. 1936, *Fl. Pl. South Africa* 19: 732. 1939, *S. African J. Bot.* 53: 490. 1987, *Phytochemistry* 67(14): 1486–1492. 2006, *Molecules* 13(9): 2169–2180. 2008

(Antioxidant, bitter sap used to treat arthritis, skin cancer, sores, burns, eczema, psoriasis, wounds, digestive problems, cardiovascular disease, high blood pressure and diabetes.)

in English: spotted aloe

in Southern Africa: bontblaaraalwyn, grasaalwyn, kgopane, kleinaalwyn, kxophane, Transvaalaalwyn

Aloe greatheadii Schönland var. *greatheadii* (*Aloe pallidiflora* A. Berger; *Aloe termetophyla* De Wild.)

Zimbabwe, S. Africa. Perennial herb, acaulescent, solitary or suckering, spotted, leaf margin with stout pungent red-brown teeth, erect branched inflorescence, perianth dull-red to pinkish-red or coral-coloured

See *Rec. Albany Mus.* 1: 121. 1904, Pope, G.V. (ed.) *Flora Zambesiaca* 12(3): 1–106. Kew. 2001

(Leaf sap used as eye drops to cure chronic conjunctivitis, applied externally to bruises, snakebites, burns and skin irritations. Leaves infusion or decoction drunk to treat gonorrhoea, as a malaria prophylactic and taken as a purgative.)

Aloe hendrickxii Reynolds

Zaire, Congo.

See *Journal of South African Botany* 21: 51. 1955

(Veterinary medicine, antiinflammatory, antiseptic, disinfectant, used externally for healing wounds of cattle and the diluted leaf sap is applied orally to calves to cure ear problems.)

in Congo: enkokorutanga, enkokorutange, igikakarubamba

Aloe hereroensis Engl. var. *hereroensis* (*Aloe hereroensis* var. *orpeniae* (Schönland) A. Berger; *Aloe hereroensis* var. *orpeniae* Schönland; *Aloe orpeniae* Schönland)

Angola, S. Africa, Namibia. Succulent shrub

See *Pflanzenr.*, IV, 38: 204. 1908

(Leaf infusion taken to treat digestive problems, chest and heart pains, urinary incontinence and venereal diseases. Leaf sap and roots used to treat gonorrhoea; leaf sap to cure eye problems.)

Aloe kedongensis Reynolds (*Aloe nyeriensis* Christian subsp. *kedongensis* (Reynolds) S. Carter)

Tropical East Africa, Kenya. Succulent, erect, spreading, rosette-forming, multiple stems, orange flowers in unbranched spikes

See *J. S. African Bot.* 19: 4. 1953, *Bot. J. Linn. Soc.* 80: 313. 1980, Carter, S. *Aloaceae. Flora of Tropical East Africa*: 1–60. 1994, Grace N. Njoroge and Rainer W. Bussmann, “Diversity and utilization of antimalarial ethnophytotherapeutic remedies among the Kikuyus (Central Kenya).” *Journal of Ethnobiology and Ethnomedicine* 2: 8. 2006, *Journal of Ethnopharmacology* 116(1): 33–42. 2008, *Journal of Ethnopharmacology* 116(2): 370–376. 2008, *African Journal of Traditional, Complimentary and Alternative Medicines* 5(1): 103–105. 2008

(Leaves to treat colds, fever, diarrhea, malaria; leaves and roots infusion for typhoid, skin diseases, malaria, colds, ear problems, wounds, coccidiosis. Veterinary medicine, treatment of poultry diseases and East Coast fever in cattle.)

in English: Kenyan aloe

in Kenya: tangaratwet

Aloe kilifiensis Christian

Kenya. Succulent, acaulescent, spotted leaves, deep wine-red flowers, branched inflorescence, growing under trees and bushes, confused with *Aloe lateritia* Engl.

See *Journal of South African Botany* 8: 169. 1942, *Journal of the East African Natural History* 94(1): 5–120. 2005, *Journal of East African Natural History* 95(2): 227–229. 2006

(Sap from roasted leaves applied to the skin to reduce swelling; leaves exudate used externally to treat headache. Leaves decoction taken to cure an enlarged spleen.)

Aloe lateritia Engl.

E. Trop. Africa, Ethiopia, Kenya and Tanzania. Shrub, often stemless, succulent, spotted leaves, corollas red orange, confused with *Aloe kilifiensis* and *Aloe wollastonii*

See *Pflanzenw. Ost-Afrikas*, C: 140. 1895

(Leaf exudate used locally for treating colds, fevers, wounds and malaria; leaves decoction taken to treat hepatitis, stomachache; leaves fragments for piles and retained placenta; maceration of leaves for snakebites. Roots decoction, together with *Solanum incanum* L. roots, taken to treat anemia.)

in Burundi: ingagari, ingarigari

in Congo: cigaka, chizimymuliro, cizimya muliro, cizimy-amuliro, ekikakaluganga, engaka, igikakarubamba, kishinie-shinie

in Kenya: kiiruma

in Rwanda: igikakarubamba

in Tanzania: iwata, mlalangao

Aloe lateritia Engl. var. ***graminicola*** (Reynolds) S. Carter (*Aloe graminicola* Reynolds; *Aloe solaiana* Christian)

Kenya. Shrub, often decumbent, usually suckering to form dense clumps, head-like racemes

See *Fl. Pl. South Africa* 20: 781. 1940, *J. S. African Bot.* 19: 9. 1953, *Flora of Tropical East Africa, Aloac.* 17. 1994, Edwards, S., Demissew, S. & Hedberg, I. (eds.) *Flora of Ethiopia and Eritrea* 6: 1–586. Uppsala 1997 [as *Aloe lateritia*.]

(Leaves used in treatment of wounds; leaves decoction emetic, for fever, malaria, stomachache.)

in Kenya: olkos

in Uganda: olkos

Aloe littoralis Baker (*Aloe angolensis* Baker; *Aloe rubrolutea* Schinz; *Aloe schinzii* Baker)

S. Trop. Africa, Namibia.

See *Trans. Linn. Soc. London, Bot.* 1: 263, 293. 1878, *Fl. Trop. Afr.* 7: 459. 1898

(Used in Ayurveda and Sidha. Leaf sap applied to cure eye problems and to arrest progress of venereal disease. Powdered leaves antiinflammatory. Daily use of leaf extract is said to be effective as a malaria prophylaxis. Chopped leaves, boiled in water purgative both for humans and livestock. Chopped leaves added to drinking water protect cattle against ticks and ear lice and chickens against lice.)

in India: chennanayakam, cheru-katru-vazha, chhota-kanvar, chhota-rakus-pattah, chhotakanvar, chinikalabanda, chinna-kalabanda, chinnarakashi-matta, chirukattalai, cirukkaralai, elva, irattapolam, janninayakam, kalaboel, kariabolam, kariambolam, kariapolam, kariya polam, kariyapolam, kattavala, kumari, kuttalay, lahanikumari, lolisara, mucamparam, musambar, musamparam, mushambaram, raktapolam, ratta polam, shime-kattali, shiru-katrazh-ai, sirrooghoo kuttalay

Aloe lomatophylloides Balf.f. (*Lomatophyllum lomatophylloides* (Balf.f.) Marais)

Rodrigues, Mauritius. Succulent herb, short, decumbent, unbranched

See *J. Linn. Soc., Bot.* 16: 22. 1877 and *Kew Bull.* 29: 722. 1974 (publ. 1975), Bosser, J. et al. (eds.) *Flore des Mascareignes* 177–188: IRD Éditions, MSIRI, RBG-Kew, Paris. 1978 [as *Lomatophyllum lomatophylloides*.], Govaerts, R. *World Checklist of Seed Plants* 1(1, 2). MIM, Deurne. 1995 [as *Lomatophyllum* sp.]

(Crushed leaves applied as a poultice to relieve muscle pain; leaves decoction taken to increase the menstrual flow.)

Aloe macrocarpa Tod. (*Aloe borziana* A. Terracc.; *Aloe edulis* A. Chev. ex Hutch. & Dalziel; *Aloe macrocarpa* var. *major* A. Berger)

West Africa, Benin, Ethiopia. Flowers eaten as a vegetable, leaves juice very bitter

See *Hort. Bot. Panorm.* 1: 36. 1875 and *Journal of Medicinal Plants Research* 2(6): 132–153. 2008

(Traditional healers treat hemorrhoids using *Aloe macrocarpa*, *Ranunculus multifidus* Forssk., *Olea europaea* subsp. *cuspidata* (Wall. ex G. Don) Cif. and *Solanum anguivi* Lam. Leaf exudate used for skin troubles; stem exudate for eye disease.)

in Eritrea: ere

Aloe macroclada Baker

Madagascar. Solitary, without stem

See *J. Linn. Soc., Bot.* 20: 273. 1883

(Leaves used to cure ascites, leaf pulp rubbed on the head to treat dandruff. Anticarcinogenic, antiseptic.)

in Madagascar: vahona

Aloe maculata All. (*Aloe commutata* Tod.; *Aloe commutata* var. *bicolor* A. Berger; *Aloe disticha* Thunb.; *Aloe distans* Haw.; *Aloe disticha* L.; *Aloe disticha* Mill., nom. illeg.; *Aloe gasterioides* Baker; *Aloe grahamii* Schönland; *Aloe latifolia* (Haw.) Haw.; *Aloe latifolia* Haw.; *Aloe leptophylla* N.E. Br.; *Aloe leptophylla* N.E. Br. ex Baker; *Aloe leptophylla* var. *stenophylla* Baker; *Aloe macracantha* Baker; *Aloe maculosa* Lam.; *Aloe obscura* Mill.; *Aloe obscura* Willd.; *Aloe perfoliata* L. var. *l*; *Aloe perfoliata* var. *q*; *Aloe perfoliata* var. *obscura* (Mill.) Aiton; *Aloe perfoliata* var. *saponaria* Aiton; *Aloe picta* Thunb.; *Aloe picta* var. *major* Willd.; *Aloe saponaria* (Aiton) Haw.; *Aloe saponaria* Haw.; *Aloe saponaria* var. *brachyphylla* Baker; *Aloe saponaria* var. *ficksburgensis* Reynolds; *Aloe saponaria* var. *latifolia* Haw.; *Aloe saponaria* var. *obscura* (Mill.) Haw.; *Aloe spuria* A. Berger; *Aloe tricolor* Baker, nom. illeg.; *Aloe tricolor* Haw.; *Aloe trichotoma* Colla; *Aloe umbellata* DC.; *Aloe umfoloziensis* Reynolds)

South Africa. Succulent shrub, usually stemless, triangular fleshy leaves white-spotted on the surface, leaves margin with sharp reddish-brown teeth thorn-like, seeds broadly winged, does not produce suckers, leaves yield a yellow dye, plant readily grazed by goats

See *Sp. Pl.* 1: 321. 1753, *Gard. Dict.*, ed. 8. n. 5, 6. 1768, *Auct. Syn.*: 13. 1773, *Encycl.* (Lamarck) 1(1): 87. 1783, *Hort. Kew.* 1: 467. 1789, *Transactions of the Linnean Society of London* 7: 17, 25. 1804, *Mag. Neuesten Entdeck. Gesammten Naturk. Ges. Naturf. Freunde Berlin* 5: 275. 1811, *Synopsis Plantarum Succulentarum* 82. 1812, *Bot. Mag.* 103: t. 6324. 1877, *J. Linn. Soc., Bot.* 18: 166–167. 1880 [1881 publ.

1880], *J. Bot.* 27: 44. 1889 and *Pflanzenr.*, (Engler) Liliac.-Asphodel.-Alon., IV, 38: 214. 1908, *J. S. African Bot.* 3: 42, 148. 1937, *Candollea* 61: 93–134. 2006

(Plant infusion applied to dermatitis; *Aloe maculata* mixed with *Rhus divaricata* roots used to cure diabetes; mixed with *Aloe striatula* used for treating burns. Leaves infusion for cardiac problems, stomachache, headache, as an anthelmintic, and rubbed on boils, sores, bruises and rheumatic joints, used as eye drops to treat conjunctivitis; pulped leaves to treat human ringworm. Pulverized flower infusion drunk or given as an enema to treat colds with fever in children.)

in English: spotted aloe

in Lesotho: lekhala

Aloe marlothii A. Berger subsp. *marlothii* (*Aloe ferox* Mill. var. *xanthostachys* A. Berger; *Aloe marlothii* var. *bicolor* Reynolds; *Aloe marlothii* var. *marlothii*; *Aloe spectabilis* Reynolds; *Aloe supralaevis* Haw. var. *hanburyi* Baker) (the specific and subspecific names honor the South African botanist Hermann Wilhelm Rudolph Marloth, 1855–1931, see Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997)

Botswana, Mozambique, Swaziland, South Africa. Succulent, robust, large, erect, single-stemmed, sometimes suckering with decumbent stems, light green to greyish green to blue-green leaves covered with brown spines or prickles, flowers orange-red to yellow or bright red on horizontal racemes on a branched candelabra-shaped inflorescence, thin papery seeds, nectar eaten from the flowers, bee forage

See *South African Journal of Science* 83: 498–550. 1987, *Aloe* 26, 3: 55. 1989 and *African Entomology* 7(1): 169–172. 1999, *Journal of the South Africa Veterinary Association* 72: 189–196. 2001, A. Spickett et al. “The effect of orally administered *Aloe marlothii* leaves on *Boophilus decoloratus* tick burdens on cattle.” *Experimental and Applied Acarology* 4(1–2): 139–146. 2007, *South African Journal of Botany* 73: 378–383. 2007, *South African Journal of Botany* 74(4): 598–605. 2008

(Leaf decoction taken with porridge to treat stomachache and intestinal worms, roundworm and tapeworm; leaf and root decoctions used for roundworm infestations and for stomach problems; fresh leaf pulp rubbed on women’s breasts to wean children; leaves crushed and the juice applied on sores. Ash from the leaves, mixed with maize, effectively protects the latter from storage pests, *Sitophilus zeamais* Motschulsky, maize weevil. Veterinary medicine, laxative, oxytotic, anthelmintic, insecticide, leaf and root decoctions used for horse sickness, diarrhea, retained placenta, gall disorders.)

in English: flat-flowered aloe, mountain aloe, spiny aloe

in Southern Africa: bergaalwyn, bergalwyn, boomaalwyn, snuifaalwyn; inHlaba (Swazi); mhanga, mhangani (Tsonga); mogopa, mokgopa (Tswana/ Setswana); binda-mutsho,

khopha, tshikopa (Venda); iNhlaba, inHlaba (the diminutive being inHlabane), umHlaba, ikhala (Zulu)

Aloe mayottensis A. Berger

Mayotte, Comoros.

See *Das Pflanzenreich* 246. 1908, *South African Journal of Botany* 74(4): 606–612. 2008

(Leaf sap applied as eye drops to cure conjunctivitis, and to nipples to wean children; leaves poultice to treat wounds and burns.)

Aloe microdonta Chiov. (*Aloe defalcata* Chiov.)

Kenya, Somalia. Succulent, lanceolate fleshy leaves, reddish flowers

See *Plantae Novae vel Minus Notae ex Aethiopia* 208. 1928, *Bulletin du Jardin botanique national de Belgique / Bulletin van de National Plantentuin van België* 41(3): 1483–1578. 1971, *Kew Bulletin* 37: 389–395. 1982, *Planta Med.* 58(1): 88–93. 1992

(Exudate, leaf juice, dissolved in water and drunk to treat jaundice, applied topically to cure skin diseases.)

Aloe ngongensis Christian (*Aloe rabaiensis* auct.)

Kenya, Tanzania. Considered as conspecific with *Aloe rabaiensis*

See *Journal of South African Botany* 8: 170. 1942, Govaerts, R. *World Checklist of Seed Plants* 1(1, 2). MIM, Deurne. 1995 [as *Aloe rabaiensis*.], *African Journal of Biotechnology* 7 (7): 912–915. 2008

(Larvicidal, for mosquito control. Leaf decoction emetic, taken to cure an enlarged spleen; heated and pounded leaves applied to swellings. Small portions of the root taken as a purgative. Exudate is part of an arrow poison, together with *Acokanthera schimperi*.)

Aloe nuttii Baker (*Aloe brunneopunctata* Engl. & Gilg; *Aloe corbisieri* De Wild.; *Aloe mketiensis* Christian)

Tanzania to E. Angola. Herb, succulent, short thick stem, often shortly branched, leaves whorled, tubular corolla orange-red-pink, large cream-orange-brown bracts wrap around the stem, flowers arise beside each bract on a stalk, ovoid capsule, dark brown seeds, mountain grassland, on rocky slopes

See *Hooker's Icon. Pl.* 26: t. 2513. 1897

(Juice of leaves rubbed on the skin to treat ringworm. Roots a treatment for kidney problems and an aphrodisiac. Leaves decoction drunk to treat diarrhea, leaves also used for heart pains and to treat spleen problems.)

in Tanzania: ikori, ikuri, iratune, itembwe, kidingulio, kisi-mamleo, kongokowe, litembwetembwe, mshubili, msubili

Aloe nyeriensis Christian & I. Verd. (*Aloe nyeriensis* Christian; *Aloe ngobitensis* Reynolds)

Kenya. Succulent, red flowers

See *American Journal of Botany* 87(11): 1578–1583. 2000

Leaf sap locally used by women to clear up pimples and blemishes on the face.)

Aloe ortholopha Christian & Milne-Redh.

Zimbabwe. Succulent, solitary, acaulescent, leaf margin with pungent light brown teeth, perianth coral-red to orange, branched inflorescence, horizontal racemes, related to *Aloe greatheadii*

(Leaves infusion or decoction drunk to treat gonorrhoea, as a malaria prophylactic and taken as a purgative. Leaf sap used as eye drops to cure chronic conjunctivitis, applied externally to bruises, snakebites, burns and skin irritations.)

in English: Dyke aloe

Aloe perryi Baker

Socotra.

See *J. Linn. Soc., Bot.* 18: 161. 1880 and *American Journal of Botany* 87(11): 1578–1583. 2000

(Used in Ayurveda. Laxative.)

in English: Socotrine aloe, Zanzibar aloe

in India: kumari

Aloe polyphylla Pillans (*Aloe polyphylla* Schönl. ex Pillans)

Lesotho.

See *S. African Gard.* 24: 267. 1934

(Poultice.)

in English: spiral aloe

in Lesotho: kharetsa

Aloe purpurea Lam. (*Aloe marginalis* DC., nom. illeg.; *Aloe marginata* (Aiton) Willd.; *Aloe marginata* Willd., nom. illeg.; *Aloe rufocincta* Haw.; *Dracaena dentata* Pers.; *Dracaena foetida* Salisb.; *Dracaena marginata* Aiton; *Drakaina marginata* (Hoffmanns.) (Febrifuge. Leaf sap applied to the nipples to wean children.)

in Réunion: mazambon, mazambon marron, sauvage socotrin

Aloe rabaiensis Rendle

Somalia, Kenya and Tanzania. Succulent perennial shrub, erect or sprawling, branching from base

(Leaf decoction emetic, taken to cure an enlarged spleen, it causes vomiting and diarrhea; heated and pounded leaves applied to swellings. Small portions of the root taken as a purgative. Exudate is part of an arrow poison, together with *Acokanthera schimperi*. Veterinary medicine, used for chicken diseases.)

Aloe ruspoliana Baker (*Aloe jex-blakeae* Christian; *Aloe stefaninii* Chiov.)

Kenya, Somalia, Ethiopia.

See *Fl. Trop. Afr.* 7: 460. 1898 and *J. S. African Bot.* 8: 176. 1942, *Kew Bulletin* 37: 389–395. 1982, *Phytochemistry* 66(12): 1399–1406. 2005

(Poisonous to sheep and camels, used to poison hyenas and wayward dogs.)

Aloe schweinfurthii Baker (*Aloe barteri* Baker p.p.; *Aloe barteri* var. *lutea* A. Chev.; *Aloe edulis* A. Chev.; *Aloe trivialis* A. Chev.)

Sudan, Ghana. Perennial, suckering, fleshy leaves with toothed margins, flowers scarlet-apricot edible

See *J. Linn. Soc., Bot.* 18: 175. 1880

(Leaves applied externally for skin troubles, burns, wounds, insect bites, Guinea worm sores, rheumatism and vitiligo; leaf decoction drunk to cure cough; dried powdered leaves taken to treat malaria. Leaf sap taken to treat intestinal and urogenital problems. Bulbs and roots decoctions taken for liver problems, jaundice. Decoctions of leaves, roots and whole plants taken as a laxative, to treat stomachache, infertility in women, venereal diseases and internal parasites. Veterinary medicine, leaf sap given to cattle as an anthelmintic.)

Aloe secundiflora Engl.

Ethiopia, Kenya, Tanzania. Succulent, perennial herb

See *Pflanzenw. Ost-Afrikas*, C: 140. 1895

(Leaves antiviral, analgesic, antifungal, a decoction and diluted leaf sap for malaria, diarrhea, nosebleed, headache, pneumonia, chest pain, edema, typhoid, wounds; leaf sap drunk as an appetizer and antiemetic. Exudate applied into the eyes, to cure conjunctivitis, and to nipples to wean children.)

in Kenya: kiluma

Aloe sinkatana Reynolds

Sudan. Stemless, forms clumping, fleshy blue green reddish leaves with marginal spines, pale yellow to bright orange flowers in pyramidal clusters

See *Journal of South African Botany* 23: 39. 1957

(Leaves and leaf exudate antibacterial, antiseptic, for skin disorders and diseases of the digestive system, inflammation of colon, constipation, fever, tonsillitis, hemorrhoids, diabetes.)

Aloe spicata L.f. (*Aloe sessiliflora* Pole-Evans)

Zimbabwe, S. Africa. Tree or shrub, woody, simple or branched, erect, branches decumbent, thick fleshy leaves, greenish-yellow to golden-yellow perianth, purplish honey

See *Suppl. Pl.*: 205. 1782 and *Trans. Roy. Soc. South Africa* 5: 708. 1917, *Haseltonia* 3: 92. 1995

(Used in Sidha. Leaves juice emetic, tonic, antiviral, antibacterial, antifungal, purgative, emmenagogue, anthelmintic, for dyspepsia, constipation. Veterinary medicine, coccidiosis in chickens.)

in English: Cape aloe, spiked aloe

in India: carriabolum

Aloe striatula Haw.

Southern Africa, Lesotho. Succulent, robust, shrub, recurved leaves, hard thorny edges of leaves

See *Philos. Mag. J.* 67: 281. 1825

(A drink from crushed leaves in water has a very bitter taste, antacid, purifier, used as laxative and for stomachache. Plant mixed with *Aloe maculata* used for treating burns. Veterinary medicine, *Rhus divaricata* mixed with *Aloe striatula* a remedy for bloating.)

in English: shrub aloe

in Lesotho: seholobe

Aloe succotrina Lam. (*Aloe perfoliata* var. *purpurascens* Aiton; *Aloe perfoliata* var. *succotrina* (Lam.) Aiton; *Aloe purpurascens* (Aiton) Haw.; *Aloe sinuata* Thunb.; *Aloe sinuata* Willd., nom. illeg.; *Aloe soccotrina* Schult. & Schult.f.; *Aloe succotrina* Garsault, orth. var.; *Aloe socotrina* DC.; *Aloe socotrina* Lam.; *Aloe vera* Mill., nom. illeg.; *Aloe succotrina* var. *purpurascens* (Aiton) Ker Gawl.; *Aloe succotrina* var. *saxigena* A. Berger)

SW. Cape Prov. Succulent, cluster-forming, tubular flowers shiny dark orange red, simple flower spikes

See *Encycl.* 1: 85. 1783, *Syst. Veg.* 7: 701. 1829 and *Pflanzenr.*, IV, 38: 283. 1908

(Used in Ayurveda and Sidha. Juice emollient, for skin troubles, burns, wounds. Homeopathy, laxative.)

in English: fynbos aloe

in South Africa: bergaalwyn

in India: bole-siyah, intupolam, irulapolam, iyankolli, kacapolam, kacappuppolam, kariyapolam, katticcennayam, kirusnapolam, kisanapolam, kittinapolam, maippolam, makkikkarrala, makkikkattazha, pauttirapolam, polam, sabir, sibr, sibr-sagotari, turakakalabanda, vainakapolam, vainakappolam, yavanakumari

Aloe swynnertonii Rendle (*Aloe chimanimaniensis* Christian; *Aloe melsetterensis* Christian; *Aloe petrophila* Pillans; *Aloe vogtsii* Reynolds) (for the British (b. India) naturalist Charles Francis Massey Swynnerton, 1877–1938 (d. Tanganyika/Tanzania, in an air crash), farmer, botanical collector in Rhodesia and Mozambique, 1907 Fellow of the Linnean Society; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 339. Cape Town 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 668. London 1994)

Malawi, South Africa, Zimbabwe, Mozambique. Shrubby, solitary or suckering, acaulescent, spotted leaves bright green, erect branched panicle with rounded racemes of pendulous orange-red flowers, taxonomic confusion

See *Journal of the Linnean Society, Botany* 40: 215. 1911, *J. S. African Bot.* 2: 118. 1936, *Fl. Pl. South Africa* 18: 697. 1938, *Kirkia* 1: 51. 1961, *Succ. Fl. South Africa*: 125. 1981, *Fl. South Africa* 5, 1 (1): 44. 2000

(Leaves and roots pounded a remedy for infertility, gonorrhea, stomach ailments, snakebites, wounds. Fish poison; in a mixture with other plants to kill pests in vegetable crops. Magic, ritual, protective at funerals.)

in English: Swynnerton's aloe, vumba aloe

Aloe tenuifolia Lam. (*Aloe agavifolia* Tod.; *Aloe barteri* Baker; *Aloe barteri* var. *dahomaensis* A. Chev., nom. inval.; *Aloe barteri* var. *dahomensis* A. Chev.; *Aloe barteri* var. *sudanica* A. Chev.; *Aloe buettneri* A. Berger; *Aloe congolensis* De Wild. & T. Durand; *Aloe paedogona* A. Berger; *Aloe paedogona* Rendle; *Aloe paludicola* A. Chev., nom. nud.)

W. Trop. Africa, Namibia.

See *Encyclopédie Méthodique, Botanique* 1: 78. 1783, *Hort. Bot. Panorm.* 1: 85. 1875, *Journal of the Linnean Society, Botany* 18: 168. 1881[1880] and *Bot. Jahrb. Syst.* 36: 60. 1905, *J. Bot.* 44: 57. 1906, *Etudes Fl. Afr. Centr. Franç.* 1: 313. 1913, *Rev. Int. Bot. Appl. Agric. Trop.* 31: 592, 594. 1952

(Leaf sap laxative, antiinflammatory, antiviral, wound dressing, to treat sores, wounds, burns, pain in the joints, inflammation of the breasts. Leaves used in several arrow-poison mixtures.)

in English: West African aloe

in Ivory Coast: bamalagba, kpipiko, sinzé toro, wudie

in Nigeria: balli nyibi, gbadu, giiwaa, moodaa, nantsar giiwaa, omvi, zaabuwaa

in Senegal: bangio fauru, sogoba hu

Aloe tenuior Haw. (*Aloe tenuior* var. *decidua* Reynolds; *Aloe tenuior* var. *densiflora* Reynolds; *Aloe tenuior* var. *glaucescens* Zahlbr.; *Aloe tenuior* var. *rubriflora* Reynolds)

Cape Province Shrub, sprawling, rambling, red or yellow flowers in slender nodding racemes

See *Philos. Mag. J.* 67: 281. 1825 and *Ann. K. K. Naturhist. Hofmus.* 15: 16. 1900, *J. S. African Bot.* 2: 108, 111. 1936, *Aloes S. Afr.* 349. 1950, *American Journal of Botany* 87(11): 1578–1583. 2000, *Chromosoma* 109: 201–205. 2000

(Leaves purgative, anthelmintic, vermifuge, a tapeworm remedy; root decoction used as a purgative to treat tapeworm, internal worms. Magic, ritual, ceremonial, powerful charm to ensure good luck, a bath taken in the foam of the leaves. Veterinary medicine, crushed leaves decoction given to cows to treat retained placenta, intestinal parasites, hematuria.)

in Southern Africa: iKhalana, umjingqa

Aloe trichosantha A. Berger (*Aloe percrassa* Schweinf.; *Aloe percrassa* var. *albo-picta* Schweinf.)

Eritrea, Somalia. Suckering, grey green spotted leaves, panicles of reddish flowers covered with light wool

See *Bot. Jahrb. Syst.* 36: 62. 1905, *Bradleya*; Yearbook of the British Cactus and Succulent Society 1: 17–24. 1983, *African Journal of Ecology* 45 (Suppl. 1): 34–40. 2007

(Leaves for painful menstruation.)

in Ethiopia: hargisu

Aloe turkanensis Christian

Kenya, Uganda. Succulent sprawling shrub, ascending, decumbent, branching from the base, roots used to flavor beer

See *Journal of South African Botany* 8: 173. 1942, *African Journal of Biotechnology* 7 (7): 912–915. 2008

(Larvicidal, for mosquito control. Leaf sap applied to wounds and as a cure for eye diseases. The juice from boiled roots added to a drink to induce vomiting, to relieve persistent headaches.)

Aloe vaombe Decorse & Poiss.

Madagascar. Small succulent tree, unbranched, recurved long smooth green leaves, red flowers in erect branched racemes

See *Recherches sur la Flore Méridionale de Madagascar* 96. 1912

(Skin lesions treated with leaf juice; leaves boiled in water and drunk to cure yellow fever, venereal diseases.)

in English: Malagasy tree aloe

in Madagascar: vahombe, vahombre

Aloe variegata L. (*Aloe ausana* Dinter; *Aloe punctata* Haw.; *Aloe variegata* var. *haworthii* A. Berger)

Namibia. Dwarf stemless aloe, dense clumps, dark green leaves with a V-shaped cross section, white spots on the leaf surfaces, alternate white and green bands on the leaves, pink to red tubular pendent flowers with green edges, racemes sometimes branched, underground suckers

See *Sp. Pl.*: 321. 1753 and *Cytologia* 45: 515–532. 1980, *Journal of South African Botany* 47: 7–10. 1981

(Used in Ayurveda. Externally to relieve skin discomforts and internally as purgatives. Magic, ritual.)

in English: kanniedood aloe, partridge-breast, partridge-breast aloe, pheasant's-wings, tiger aloe

in India: kumari

in South Africa: bont alwyn, kannie dood, kanniedood

Aloe vera (L.) Burm.f. (*Aloe barbadensis* Miller; *Aloe barbadensis* var. *chinensis* Haworth; *Aloe chinensis* (Haworth) Baker; *Aloe chinensis* Steud. ex Baker; *Aloe chinensis* Steud.; *Aloe elongata* Murray; *Aloe flava* Pers.; *Aloe indica* Royle; *Aloe lanzae* Tod.; *Aloe littoralis* Baker; *Aloe littoralis* J. Aloe volkensii Engl.

Rwanda, Kenya, E. Trop. Africa. Succulent shrub or small tree, usually unbranched

See *Pflanzenw. Ost-Afrikas*, C: 141. 1895

(Leaf sap applied to burns, wounds and sores, taken to expel a retained placenta. Leaves purgative. Bitter exudate applied to nipples to wean children, and rubbed on the forehead to treat headache, also taken as a purgative. Veterinary medicine, leaves used to deworm livestock.)

Aloe wilsonii Reynolds

Uganda, Kenya.

See *J. S. African Bot.* 22: 137. 1956

(Leaf juice used externally to cure eye infections, headache and body pains, infusion of the whole plant taken as an emetic; pounded roots and leaves applied to aching teeth.)

Aloe wollastonii Rendle (*Aloe angiensis* De Wild.; *Aloe angiensis* var. *kitaliensis* Reynolds; *Aloe bequaertii* De Wild.; *Aloe lanuriensis* De Wild.; *Aloe lateritia* var. *kitaliensis* (Reynolds) Reynolds)

E. Tropical Africa, Kenya, Tanzania. Succulent perennial herb, stemless

See *Journal of the Linnean Society, Botany* 38: 238. 1908, *Pl. Bequaert.* 1: 23, 26, 27. 1921

(Leaves infusion taken for uterine inflammation. Roots and leaves decoction drunk to cure jaundice. Exudate, crushed leaves and dried leaves applied topically to cure hemorrhoids. Veterinary medicine, anthrax, piles, burns, parasites and retention of the afterbirth treated with fresh leaves or dried leaf powder, as is East Coast fever in cattle.)

in Tanzania: mlalangao

Aloe zebrina Baker (*Aloe ammophila* Reynolds; *Aloe angustifolia* Groenew., nom. illeg.; *Aloe bamangwatensis* Schönland; *Aloe baumii* Engl. & Gilg; *Aloe constricta* Baker; *Aloe komatiensis* Reynolds; *Aloe laxissima* Reynolds; *Aloe lettyae* Reynolds; *Aloe lugardiana* Baker; *Aloe platyphylla* Baker; *Aloe transvaalensis* Kuntze; *Aloe vandermerwei* Reynolds)

Southern Africa, Angola, Namibia, Mozambique. Succulent herb, usually stemless, freely suckering, spotted glaucous dark green leaves, many-branched erect terminal panicles, orange-red to deep red flowers, swollen flower bases, yellowish leaf sap

See *Journal of the South Africa Veterinary Association* 72: 189–196. 2001

(Leaves for snakebites, abscess, fever, nausea, hemorrhoids, epilepsy, madness, intestinal worms, jaundice; roots for hematuria, constipation, chest pain. Plant juice purgative, disinfectant and anthelmintic. Decoction of the powdered stem and leaf bases taken by women after delivery to cleanse the system. Veterinary medicine, leaves for burns, whole plant vermifuge.)

in English: maculate aloe, spotted aloe, zebra leaf aloe

in Angola: andala

in South Africa: kgophane

Alonsoa Ruiz & Pav. Scrophulariaceae

For Alonso Zanoni, a Spanish soldier in Bogotá, Colombia, see *Systema Vegetabilium Florae Peruvianaes et Chilensis* 150–151. 1798.

Alonsoa meridionalis (L.f.) Kuntze (*Alonsoa caulialata* Ruiz & Pav.; *Alonsoa incissaeifolia* Ruiz & Pav.; *Alonsoa*

Benson; *Lippia gratissima* var. *schulzii* (Standl.) L.D. Benson; *Lippia ligustrina* (Lag.) Britton; *Lippia ligustrina* var. *paraguariensis* Briq.; *Lippia ligustrina* var. *schulzii* Standl.; *Lippia lycioides* Steud.; *Lippia lycioides* (Cham.) Steud.; *Lippia sellowii* Briq.; *Verbena gratissima* Gillies & Hook.; *Verbena integerrima* Larrañaga)

USA, Mexico, Argentina. Shrub or subshrub, slender, white inflorescence, aromatic

See *Species Plantarum* 1: 18–21. 1753, *Species Plantarum* 2: 633–634. 1753, *Botanical Miscellany* 1: 160. 1830, *Linnaea* 7: 237. 1832, *Nomenclator Botanicus*. Editio secunda 2: 254. 1841 and *Darwiniana* 12(3): 527–528. 1962, *Fl. Prov. Buenos Aires* 4(5): 121–152. 1965, *Phytologia* 29: 75. 1974, *Darwiniana* 22: 85, 87, 89. 1979, *Fl. Il. Entre Ríos* 6(5): 229–294. 1979, *Trees Shrubs Southw. Deserts*, ed. 3: 202–203. 1981

(Antimicrobial, anti-*Candida albicans*, used for diseases of the bladder. Toxic to horses, nervous symptoms.)

in English: Texas white-brush, white brush

Aloysia macrostachya (Torr.) Moldenke (*Lippia macrostachya* (Torr.) S. Watson; *Lippia wrightii* var. *macrostachya* Torr.)

North America, Mexico. Suffrutex

See *Rep. U.S. Mex. Bound.* 2 127. 1859, *Proc. Amer. Acad. Arts* 18: 134. 1882 and *Phytologia* 1: 95. 1934

(Stems and leaves infusion taken for stomachache.)

in English: sweet stem

in Mexico: cedron de castilla

Aloysia oblanceolata Moldenke

Paraguay, Brazil.

See *Phytologia* 3: 108. 1949, *Economic Botany* 31(3): 298–300. 1977

(Leaves and stem for regulating fertility, abortifacient.)

in Paraguay: poleo

Aloysia wrightii (A. Gray) A. Heller (*Aloysia wrightii* A. Heller ex Abrams; *Aloysia wrightii* Abrams; *Aloysia wrightii* A. Heller; *Lippia wrightii* A. Gray)

USA. Small shrub, slender, stem and foliage strongly aromatic, tiny whitish flowers

See *Rep. U.S. Mex. Bound.* 2: 126. 1858 and *Muhlenbergia* 1(9): 147. 1906, *Pharmaceutical Biology* 31(2): 101–115. 1993

(Analgesic, stomachic, antimicrobial, plant decoction taken for headache, rheumatism, gonorrhoea, indigestion; do not use during pregnancy due the plant's potential of stimulating uterine vasculature.)

in English: beebrush, beebush, desert oregano, Wright's beebrush, Wright's beebush, Wright's oregano

in Spanish: altamisa, oreganillo, vara dulce

Alphitonia Reissek ex Endl. Rhamnaceae

Greek *alphiton* 'barley meal, pearl barley', referring to the mesocarp or fruit pulp.

Alphitonia ferruginea Merr. & L.M. Perry

New Guinea. Small tree, in disturbed areas, in secondary growth

See *J. Arnold Arbor.* 1939, xx. 338. 1939

(Used to treat toothache.)

in Papua New Guinea: piheng

Alphitonia incana (Roxb.) Teijsm. & Binn. ex Kurz (*Alphitonia excelsa* (Fenzl) Reissek ex Endl.; *Alphitonia excelsa* (Fenzl) Benth.; *Alphitonia philippinensis* Braid; *Ceanothus excelsus* (Fenzl) Steud.; *Colubrina excelsa* Fenzl; *Rhamnus incana* Roxb.)

India. Saponin-rich leaves

See *Flora Indica*; or descriptions of Indian Plants 2: 350. 1824, *Genera Plantarum* 1098. 1840, *Journal of Botany, British and Foreign* 11: 208. 1873

(Bark used in the treatment of swellings; leaves for pancreatitis. Leaves used for upset stomach, sore eyes, headaches, bites and stings. Along with berries, used to poison or stupefy

fish and extracts of bark and roots could relieve muscular pain or toothache.)

in English: Cooper's wood, leather jacket, red ash, soap tree

in New Guinea: poketa

in Sabah: pekudita

Alphitonia petriei Braid & C.T. White (*Alphitonia petriei* Braid) (after W.R. Petrie and the Scottish (b. Morayshire) botanist Donald Petrie (1846–1925), plant collectors, members of the pioneer Queensland family; Donald went to Australia in 1868, in New Zealand 1874–1925, in 1894 chief inspector of schools, Auckland, New Zealand, wrote "List of the flowering plants indigenous to Otago." *Trans. Proc. New Zealand Inst.* 1896, "The Gramina of the Subantarctic Islands of New Zealand." *Subantarct. Is N.Z.* 2: 472–481. 1909 and "Some additions to the Flora of the Subantarctic Islands of New Zealand." *T.N.Z.I.* 47: 59–60. 1915; see John H. Barnhart, *Biographical Notes upon Botanists.* 3: 76. 1965; I.H. Vegter, *Index Herbariorum.* Part II (5), *Collectors N-R.* Regnum Vegetabile vol. 109. 1983; Thomas Frederick Cheeseman, *Manual of the New Zealand flora.* xxvii. Wellington 1906)

Australia. Tree, aggressive root systems, buds and young shoots reddish brown hairy, branchlets prominently ribbed, fruit depressed-globose blackish

(Used externally to relieve muscular pain.)

in Australia: pink ash, red almond, red ash, white ash, white leaf

Alphitonia zizyphoides A. Gray (*Alphitonia excelsa* (Fenzl) Benth.; *Alphitonia zizyphoides* (Spreng.) A. Gray; *Rhamnus zizyphoides* Solander ex Forst. f.; *Rhamnus zizyphoides* Spreng.)

Pacific. Tree, leaves simple, individual flowers bisexual small whitish light green fragrant arranged in fives, sepals light green, fruit a globose to broadly ovoid drupe, two arillate seeds each enclosed by a hard case

(Antiinflammatory. Bark decoction, often along with the bark of other tree species, taken for stomachache, constipation, eczema, coughs, headache, menstrual pain, prolapsed rectum in postpartum women. Sap used to treat earache, swelling, fever, and cancer.)

in Fiji: doi, doi damu, doi selawa

in Samoa, Tonga, Wallis and Futuna, and Niue: toi

in French Polynesia: manee, toi

in Vanuatu: aurie, dove, nafa, nahmah, nampou, napoth, navasvas, neho, nevilvil, ondova, reha, vihumeri, vilvile

Alphonsea Hook.f. & Thomson Annonaceae

Named after the Swiss (born in Paris, France) botanist Alphonse Louis Pierre Pyramus de Candolle, 1806–1893

(Geneva, Switzerland), professor of botany and Director of the Botanical Garden of Genève, son of Augustin Pyramus de Candolle (1778–1841), among his most valuable writings are *Mémoire sur la famille des Anonacées*. Genève 1832, *La phytographie ou l'art de décrire les végétaux considérés sous différents points de vue*. Paris 1880 and *Origine des plantes cultivées*. Paris 1880; see *Genera Plantarum* 257. 1789, *Flora Indica*: being a systematic account of the plants . . . 152. 1855 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 306. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 64. 1972, P.E. Pilet, in *D.S.B.* 3: 42–43. 1981.

Alphonsea arborea Merr. (*Alphonsea arborea* (Blanco) Merr.; *Macanea arborea* Blanco)

Philippines.

See *Flora de Filipinas* 431. 1837 and *Philipp. J. Sci.*, C 10(4): 233. 1915

(Fruits decoction febrifuge, for menstrual disorders.)

in India: rulangu bu phang

in Philippines: bolon, kalai, lanutan, lanutan-itung, sapiro

Alphonsea ventricosa (Roxb.) Hook. f. & Thomson (*Uvaria ventricosa* Roxb.)

India. Big canopy tree, bole cylindrical above and fluted at the base, grey shaggy bark, hard yellow inner bark with violet markings, smooth glabrous leaves almost sessile

See *Species Plantarum* 536. 1753 and *Tetrahedron* 32(6): 737–740. 1976

(Alkaloids. Roots contain several diacetylenes.)

in India: noga-kola, nogakola

Alpinia Roxb. Zingiberaceae

For the Italian botanist Prospero (Prosper) Alpino (Alpini, Alpinus), 1553–1617, professor of botany at Padova [Padua], 1603–1616 Praefectus of the Botanical Garden of Padua, plant collector in tropical Africa, introduced exotic Egyptian plants in Europe, his writings include *De plantis Aegypti liber. Liber de balsamo*. Venetiis [Venice] 1592, *De balsamo dialogus*. Venetiis 1591 and *De medicina Aegyptorum libri quatuor*. Venetiis 1590. See *Species Plantarum* 1: 2. 1753, *Species Plantarum*. Editio quarta 1(1): 12. 1797, *Sertum Hannoveranum* 4: 3. 1798, W. Roxburgh, *Asiatic Researches* 11: 350–352. 1810, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 2. 1821, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27: 272. 1892 and *Pflanzer*. 20(IV. 46): 325, 332. 1904, *Fieldiana, Bot.* 24(3): 191–203. 1952, Garrison and Morton, *Medical Bibliography*. 2194, 6468. 1961, Jerry Stannard, in *D.S.B.* 1: 124–125. 1981, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 28–29. 1988.

Boos; *Renealmia minor* Roem. & Schult.)

China, Vietnam, Indonesia. Perennial herb with non-tuberosus pungent rootstock, pseudostems, no white markings on the leaves, young shoots cooked as vegetable, essential oils

See *Trans. Linn. Soc. London* 8: 347. 1807 and *Bull. Soc. Bot. France* 48: 85. 1902, *Flora of the Southeastern United States* ... Ed. 2 307. 1913, *Lingnan Sci. J.* 5(1–2): 51. 1927 [1928], *Journal of Ethnopharmacology* 95(2–3): 311–316. 2004

(Used in Ayurveda. Rhizome antiinflammatory, antinociceptive, antirheumatic, to cure cardiac diseases, cold, to treat throat inflammation, rheumatoid arthritis, diabetes, diseases of nervous system, stimulating digestion, purifying blood, and also to adulterate *sugandha*. Dried powdered rhizome stimulant, febrifuge and carminative, for rheumatism, bronchial catarrh.)

in English: Indian ginger, snap ginger

in China: ju hua shan jiang

in India: amkolinji, aratha, aratta, chikkadumparaasme, chirrattai, chittaratha, citrathai, gonth thara, kattuchena, kulainjan, peraratta, rasna, toroni

Alpinia chinensis (Retz.) Roscoe (*Alpinia chinensis* (J. König) Roscoe; *Alpinia oblongifolia* Hayata; *Hellenia abnormis* Lindl.; *Hellenia chinensis* (Retz.) Willd.; *Heritiera chinensis* Retz.; *Heritiera chinensis* (J. König) Retz.; *Languas chinensis* (Retz.) J. König; *Languas chinensis* J. König; *Monocystis abnormis* (Lindl.) Lindl.)

China, Vietnam. Shrub

See *Observationes Botanicae* 3: 65–67. 1783, *Observationes Botanicae* 6: 18. 1791, *Trans. Linn. Soc. London* 8: 346. 1807 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 5: 215–216, f. 79d-e. 1915, *J. Nat. Prod.* 60: 904. 1997, *J. Org. Chem.* 72: 4826. 2007

(Used in Ayurveda. Analgesic, to treat pregnancy gingivitis and asthma.)

in English: lesser galangal

in China: hua shan jiang

in India: arattai, chhota-kalijan, chhota-kulanjan, chitharathai, chitta-rattai, chittalatti, chittarattai, dumpa-rashtrakam, irattai, kulinjan, rasna, rasnah, sanna-dumparashtrakam, sannarasmi, sannarastam, sanrashtam, sanrashtam, shitta-rattai

Alpinia conchigera Griffith (*Alpinia humilis* Teijsm. & Binn., nom. illeg.; *Alpinia laosensis* Gagnep.; *Alpinia sumatrana* (Miq.) K. Schum.; *Languas conchigera* (Griffith) Burkill; *Languas sumatrana* (Miq.) Merr.; *Strobidia conchigera* (Griff.) Kuntze; *Strobidia conchigera* Kuntze; *Strobidia oligosperma* Kuntze; *Strobidia sumatrana* Miq.)

India, China, Indonesia. Herb, slender, leaves oblong, flowers small, calyx short thick, corolla tube short, lobes elliptical-oblong white to greenish-white, labellum obovate strongly concave yellowish or pinkish-white with red stripes on each side, 2 short teeth (staminodes) at base, yellow curved filament, pink red globular capsule, seed strongly aromatic, in swampy open areas

See *Not. Pl. Asiat.* 3: 424. 1851, *Fl. Ned. Ind.*, Eerste Bijv. 3: 614. 1861, *Revis. Gen. Pl.* 2: 698. 1891, *Bot. Jahrb. Syst.* 27: 291. 1899 and *Bull. Soc. Bot. France* 53: 133. 1906, *Univ. Calif. Publ. Bot.* 15: 35. 1929, *Bull. Misc. Inform. Kew* 1930: 37. 1930

(Rhizome stimulant, aphrodisiac, diaphoretic, postpartum tonic, used in female diseases, dysentery, rheumatism, bronchitis, jaundice, headache, vertigo, ringworm, gastritis, indigestion and abscesses. A poultice of the boiled leaves, or leaves and rhizome together, applied topically for rheumatism; leaves poulticed for ringworm.)

in Bangladesh: khet ranga

in China: jie bian shan jiang

in India: khetranga

in Malaysia: chengkenam, jerunang, langkuas kechil, lankwas, lengkuas padang, ranting

in Thailand: khaa ling

in Vietnam: ri[eef]ng r[uwf]ng

Alpinia coriandriodora D. Fang

South China. Short purple rhizome, flowers solitary or in clusters, labellum purple-red striped, red capsule, aromatic, used as a condiment

See *Acta Phytotax. Sin.* 16(4): 79–80, pl. 6, f. 4. 1978, *Guihaia* 4: 13–18. 1984, *Flora of China* 24: 333–346. 2000

(Tonic.)

in China: xiang jiang

Alpinia elegans (C. Presl) K. Schum. (*Alpinia elegans* K. Schum.; *Alpinia gigantea* Fern.-Vill.; *Alpinia gigantea* Blume; *Alpinia gracilis* (Blanco) Rolfe; *Alpinia gracilis* Rich.; *Alpinia gracilis* Rolfe; *Alpinia gracilis* Rich. ex Petersen; *Hellenia gracilis* (Blanco) Hausskn.; *Hellenia gracilis* Hassk.; *Kolowratia elegans* C. Alpinia globosa (Lour.) Horan. (*Amomum globosum* Lour.; *Cardamomum globosum* (Lour.) Kuntze; *Languas globosa* (Lour.) Burkill; *Zingiber globosum* (Lour.) Stokes)

China, Vietnam. Erect, perennial herb, leaves ovate-oblong margin finely dentate-ciliate, inflorescence terminal spike-like, each bract with 4 flowers, flower white-reddish, fruit a globose capsule with brittle whitish pericarp, seeds three-angled compressed

See Nguyen Van Duong. *Medicinal plants of Vietnam, Cambodia and Laos*. Mekong Printing, Santa Ana, California, United States. 1993

(Seeds decoction against disorders of the intestines, colic, stomachache, dysentery.)

in English: ground Chinese cardamom

in Vietnam: s[ej] (northern), m[ef] tr[ef]

Alpinia japonica (Thunberg) Miquel (*Alpinia agiokuensis* Hayata; *Alpinia japonica* var. *kiushiana* Kitam.; *Alpinia kiushiana* Kitam.; *Globba japonica* Thunberg; *Languas agiokuensis* (Hayata) Sasaki; *Languas agiokuensis* Sasaki; *Languas japonica* (Thunberg) Sasaki)

China, Taiwan, Japan. Low growing, foliage fragrant, labelum white marked with red stripes

See *Mantissa Plantarum* 2: 143–, 170, 1287. 1771, *Syst. Veg.*, ed. 14: 73. 1784, *Ann. Mus. Bot. Lugduno-Batavi* 3: 140. 1867 and *Flora of the Southeastern United States* ... Ed. 2 307. 1913, *Icon. Pl. Formosan.* 9: 118–119. 1920, *Trans. Nat. Hist. Soc. Taiwan* 14(74): 22, 84. 1924, *Bot. Mag. (Tokyo)* 59: 37. 1946, *Chemical and Pharmaceutical Bulletin* 44(8): 1603–1606. 1996

(Spasmolytic, expectorant, antibacterial, stomachic, used for irregular menstruation, cough, intestinal troubles, indigestion, stomachache, diarrhea, malaria.)

in English: Japanese alpinia

in China: shan jiang

Alpinia malaccensis (Burm.f.) Roscoe (*Alpinia malaccensis* C. Presl; *Buekia malaccensis* (Burm.f.) Raeusch.; *Buekia malaccensis* Raeusch.; *Catimbium malaccense* (Burm.f.) Holttum; *Languas malaccensis* Merr.; *Languas malaccensis* (Burm.f.) Merr.; *Maranta malaccensis* Burm.f.)

India, China, Pen. Malaysia. Herb, shrub, robust, strongly aromatic, leaves narrowly lanceolate, ligule entire, racemose inflorescence erect or slightly curved, bracts absent,

bracteoles caducous as the flower opens, white calyx shortly 3-lobed, corolla white, labellum broadly ovate, red globose capsule shortly pubescent, seed angular, rhizome occasionally used as a spice and eaten as a vegetable, young shoots roasted and eaten, fruit and stem edible, whole plant as fodder, in primary forest, hill slopes

See *Flora Indica* ... nec non Prodrumus Florae Capensis (N.L. Burman) 2. 1768, *Nomencl. Bot.*, [Raeusch.] ed. 3: 1. 1797, *Trans. Linn. Soc. London, Bot.* 8: 345. 1807, *Reliq. Haenk.* 1: 110. 1827 and *Philipp. J. Sci.* 19: 343. 1921, *Gard. Bull. Singapore* 13: 155. 1950, *Food Chemistry* 109(3): 477–483. 2008

(Antimicrobial, antioxidant, emetic. Pounded rhizome to cure wounds and sores, also an ingredient of poison. An infusion of the ripe and unripe fruits with a little salt taken as an emetic; dried fruit powder mixed with salt and used as emetic. Fruit decoction or crushed seed applied for gastralgia, earache and stomachache; fruits with salt as an emetic. A decoction used for bathing people with fever. Magico-religious beliefs, ritual, ceremonial, leaves burnt to ward away evil spirits that cause epidemics; plant used for decorating the altar, and leaves used for offering divine meals to the gods.)

in Bangladesh: deo tara, deotara

in China: mao ban shan jiang

in India: gara dun did, gond tara, jagai, jangai, puprere, tara

in Indonesia: laja gowah, langkuas malaka, susuk

in Laos: mak kha

in Malaysia: bangle, puar

in Philippines: barapat, birao-birao, tagbak babae

in Thailand: kha paa, mehdu

in Vietnam: ri[eef]ng malacca

Alpinia mutica Roxb. (*Alpinia korthalsii* K. Schum.; *Alpinia laxiflora* Gagnep.; *Catimbium muticum* (Roxb.) Holttum; *Languas korthalsii* (K. Schum.) Merr.; *Languas korthalsii* Merr.; *Languas laxiflora* Merr.; *Languas laxiflora* (Gagnep.) Merr.; *Languas mutica* (Roxb.) O. Deg.; *Languas mutica* Merr.; *Languas mutica* (Roxb.) Merr.; *Renealmia mutica* (Roxb.) Salisb.; *Renealmia mutica* Salisb.)

India, Indochina. Herb, slender, glabrous leaves narrowly lanceolate, bracts absent, very small bracteoles, calyx tubular, labellum broadly ovate, capsule orange-red, in swampy areas

See *Asiatic Researches* 11: 354–355. 1810, *Trans. Hort. Soc. London* 1: 280. 1812 and *Bull. Soc. Bot. France* 48: 88. 1902, *Pflanzenr.*, IV, 46: 327. 1904, *Univ. Calif. Publ. Bot.* 15: 34–35. 1929, *Fl. Hawaiiensis* [Degener] Fam. 76. 1932, *Gard. Bull. Singapore* 13: 150. 1950

(Rhizome infusion taken as a stomachic and for abdominal troubles; tender pith of young stalk boiled and the pith eaten and the decoction drunk to treat dysentery and diarrhea.)

in English: forest kerapat, orchid ginger, small shell ginger, small shellflower

in Indonesia: kerapat bai, seki pui bai

in Malaysia: chengkenam

in Vietnam: ri[eef]ng hoa th[uw]a

Alpinia nigra (Gaertner) B.L. Burt (*Alpinia allughas* (Retzius) Roscoe; *Alpinia allughas* Roscoe; *Alpinia aquatica* Roscoe; *Alpinia aquatica* (J. (Antioxidant.)

in India: doombarashakam, dumbarashtaka

Alpinia oceanica Burkill (*Alpinia engleriana* K. Schum.; *Alpinia nutans* K. Schum, nom. illeg.; *Alpinia nutans* Roscoe; *Alpinia rechingeri* (Gagnep.) Loes., nom. illeg.; *Guillainia rechingeri* Gagnep.)

Papua New Guinea, Pacific. Erect perennial herb, fleshy creeping rhizome, inflorescence terminal, whitish flowers subtended by pinkish red bracts

See *Proc. Cambridge Philos. Soc.* 9(2): 93. 1896, *Notizbl. Königl. Bot. Gart. Berlin* 2: 102. 1898 and *Bull. Soc. Bot. France* 55: 433. 1908, *Nat. Pflanzenfam.* ed. 2, 15a: 622. 1930

(Fresh leaves chewed for sore tongue. Leaves applied on wounds. Magic, ritual ceremonial, leaves and roots in sorcery.)

in Papua New Guinea: audu, goragora, gorgor

Alpinia officinarum Hance (*Languas officinarum* (Hance) Farwell; *Languas officinarum* Farw.; *Languas officinarum* (Hance) P.H. Hô)

China, Indochina. Perennial herb, leafy-stemmed, reddish branched creeping rhizome, glabrous papery leaves, erect racemose inflorescence, caducous bracts, flowers white, labellum white, stamens awl-shaped, 3-valved capsule, in grassland, on slopes, woods

See *J. Linn. Soc., Bot.* 13: 6. 1871 [1873 publ. 17 Aug 1871] and *Druggists' Circular* 63: 49. 1919, *Cayco Vietnam* (Illustr. Fl. Vietnam) 3(1): 543. 1993

(Used in Ayurveda, Unani and Sidha. Rhizome used in epigastric pain, colic, dyspepsia, indigestion, vomiting, chronic gastritis, stomachache, flatulence, diarrhea, fever and malaria, and locally applied to infected gums. Seeds used for heartburn, cholera, toothache, ague and colds.)

in English: galanga, galanga cardamom, galangal, ginger of the Man-tzu, lesser galangal, lesser galangal root, small galangal

in Arabic: hodengal, khulingan

in China: gao liang jiang, man chiang, kao liang chiang, shan chiang, kao liang chiang tzu, hung tou k'ou, liang chiang

in India: chittarathai, cirrarattai, khulanjan, khulinjan, khusro-daru, malayavaca, punnagchampa

in Thailand: khaa lek

in Vietnam: cao luong khuong, cao l[uw][ow]ng kh[uw][ow]ng, rieng, ri[eer]ng, rieng thuoc, ri[eer]ng thu[oo]s[c]

Alpinia oxyphylla Miquel (*Amomum amarum* F.P. Sm.; *Languas oxyphylla* (Miquel) Merrill)

China to Vietnam. Perennial herb, rootstock horizontal, leaves lanceolate, raceme terminal, oval capsule, coriaceous pericarp, angular seeds, in damp places

See *J. Bot. Néerl.* 1: 93. 1861, *Contr. Mat. Med. China:* 13. 1871 and *Sunyatsenia* 1: 11. 1920

(Fruit stomachic, tonic in stomachache.)

in English: black cardamon, sharp-leaved galangal

in China: yi zhi

Alpinia polyantha D. Fang

China. Creeping rhizome, erect panicles, red calyx

See *Acta Phytotax. Sin.* 16(4): 78–79, pl. 6, f. 3. 1978, *Guihaia* 8(2): 143–147. 1988

(Digestive, stomachic.)

in China: duo hua shan jiang

Alpinia psilogyna D. Fang

S. China. Densely pubescent erect spikes, labellum yellowish with red stripes

See *Acta Phytotax. Sin.* 16(4): 80–81, pl. 6, f. 5. 1978

(For sore tongue.)

in China: ai shan jiang

Alpinia purpurata (Vieill.) K. Schum. (*Alpinia grandis* K. Schum.; *Alpinia purpurata* var. *albobracteata* K. Schum.; *Alpinia purpurata* var. *anomala* Gagnep.; *Alpinia purpurata* var. *grandis* (K. Schum.) K. Schum.; *Guillainia novo-ebudica* F. Muell.; *Guillainia purpurata* Vieill.; *Languas purpurata* (Vieill.) Kaneh.)

Indonesia, SW. Pacific. Erect, arching stems, large clumps, glossy green leaves, solid crimson red to pink bracts, erect inflorescences

See *Bulletin de la Société Linnéenne de Normandie* 10: 92–94. 1866, *Contr. Phytogr. New Hebrides* 20. 1873 and *Das Pflanzenreich* IV. 46(Heft 20): 323, f. 40A. 1904, *Bernice P. Bishop Mus. Bull.* 128: 59. 1935

(Leaves infusion antiinflammatory, spasmolytic, for bladder inflammation, stomachache, indigestion.)

in English: ginger lily, jungle king, jungle queen, ostrich plume, pink ginger, red ginger

in Ecuador: caña agria, zaragosa

in Hawaii: ‘awapuhi ‘ula’ula

in Samoa: teuila

Alpinia rafflesiana Wall. ex Baker (*Languas rafflesiana* (Wall. ex Baker) Burkill)

Thailand. Slender herb, pubescent lanceolate leaves, short compact panicle, cup-shaped red calyx, lobes orange red-tipped, orange labellum broadly ovate, short staminodes, green hairy capsule, in secondary forest

See *Bull. Misc. Inform. Kew* 1935: 318. 1935, *Z. Naturforsch.* 59c, 811–815. 2004

(Ripe fruits antioxidant, radical scavenging constituents. Leaves used for poulticing boils.)

in Malaysia: puar mengkang, tepus kijai

Alpinia roxburghii Sweet (*Alpinia blepharocalyx* K. Schumann; *Alpinia blepharocalyx* var. *glabrior* (Hand.-Mazz.) T.L. Wu; *Alpinia bracteata* Roxburgh, nom. illeg.; *Languas blepharocalyx* (K. Schumann) Handel-Mazzetti; *Languas blepharocalyx* var. *glabrior* Hand.-Mazz.)

Nepal, China. Pale yellow inside rhizome aromatic

See *Hort. Brit.* (Sweet) 390. 1826 and *Pflanzenr.* 20 (IV. 46): 334. 1904, *Symb. Sin.* Pt. 7: 1322. 1936, *Acta Phytotax. Sin.* 16(3): 35. 1978

(Rhizome slightly irritating. Crushed rhizomes antiinflammatory, placed in mouth against toothache and decay, given with water to cure dysentery; powdered rhizome used for stomatitis. Roots and fruits taken in case of food poisoning.)

in China: yun nan cao kou

in India: aichal, latara, tara

Alpinia samoensis Reinecke

Samoa.

See *Bot. Jahrb. Syst.* 25: 597. 1898

(Tonic.)

in Samoa: ‘avapui tuasivi

Alpinia scabra (Blume) Náves (*Hellenia scabra* Blume; *Languas scabra* (Blume) Burkill)

Thailand.

See *Enum. Pl. Javae* 60. 1827, *Fl. Filip.*, ed. 3, 4(13A): 226. 1880 and *Gard. Bull. Straits Settlem.* 6: 260. 1930

(Vertigo, heated leaves applied to the abdomen.)

Malay name: lengkuas, lengkuas raya

Alpinia sichuanensis Z.Y. Zhu (*Alpinia jiangnanfeng* T.L. Wu)

China.

See *Novon* 7: 441. 1997 [1998], *Flora of China* 24: 322–377. 2000

(Febrifuge.)

in China: jian gan feng, si chuan shan jiang

Alpinia tonkinensis Gagnepain

China, Vietnam.

See *Bull. Soc. Bot. France* 48: 85. 1902, *Acta Botanica Sinica* 24: 226–230. 1982

(Stomachic.)

in China: hua ye shan jiang

Alpinia vitellina (Lindl.) Ridl. (*Amomum vitellinum* Lindl.; *Cardamomum vitellinum* (Lindl.) Kuntze; *Cenolophon vitellinum* (Lindl.) Horan.; *Languas vitellina* (Lindl.) Alston)

Pen. Malaysia.

See *J. Hort. Soc. London* 2: 245. 1847, *Revis. Gen. Pl.* 2: 687. 1891 and *Handb. Fl. Ceylon* 6(Suppl.): 282. 1931

(Febrifuge.)

Alpinia vitellina (Lindl.) Ridl. var. ***cannifolia*** (Ridl.) I.M. Turner (*Alpinia cannaefolia* Ridley; *Alpinia cannifolia* Ridl.; *Alpinia vitellina* (Lindley) Ridley var. *cannaefolia* (Ridley) I.M. Turner; *Languas cannifolia* (Ridl.) Burkill)

Pen. Malaysia. Herb, stout, erect pubescent panicle, bracteoles small, calyx pubescent, corolla tube slender, linear lobes yellow, labellum orange, staminodes short red, oblong pubescent capsule, black oblong seed, in dense secondary forest

See *Asiatic Researches* 11: 350–352. 1810, *Journal of the Straits Branch of the Royal Asiatic Society* 32: 174. 1899 and *Bull. Misc. Inform. Kew* 1935: 318. 1935, *Novon* 6(2): 223. 1996

(Leaves and rhizomes decoction drunk for fever.)

in Malaysia: pua minyak, puar minyak, temu

Alpinia zerumbet (Persoon) B.L. Burtt & R.M. Smith (*Alpinia cristata* Griff.; *Alpinia fimbriata* Gagnep.; *Alpinia fluviatilis* Hayata; *Alpinia schumanniana* Valetton; *Alpinia speciosa* D. (Used in Ayurveda, Unani and Sidha. Antiseptic, anti-spasmodic, juice of petiole squeezed into ear for earache. Rhizome boiled into a soup and taken for indigestion.)

in English: ginger-lily, pink porcelain lily, shell ginger, shell plant, shellflower

in China: yan shan jiang

in India: chitharaththai, cirraraddai, cirrarattai, dumaraasme, dumbaraashtaka, dumbaraasme, dumbarashtaka, kastazerambet, nag-damani, puna-champa, sittarattai, sthulagranthi

Alseodaphne Nees Lauraceae

Greek *alsos* ‘a grove’ and *daphne* ‘bay laurel’, see *Plantae Asiaticae Rariores* 2: 61, 71. 1831.

Alseodaphne semecarpifolia Nees (*Alseodaphne semecarpifolia* Nees)

India. Tree, leaves glaucous, bee plant

See *Plantae Asiaticae Rariores* 2: 72. 1831 and *Ethnobotanical Leaflets* 12: 195–203. 2008

(Used in Sidha. Leaf and bark paste applied for beetle and scorpion stings.)

in India: dodda karuvaade, dodda mashaayi, karuvaade, karuvadi, maramamidi, mashaavyi, mashe gida, massi, mooche mara, naramamidi, naramamidi, nelthare, ner-alutare, phudgus, phudugus, ranai, vandukadi maram, yavarana

in Sri Lanka: rannai, waeawerani

Alsodeia Thouars Violaceae

Greek *alsodes* ‘woodland, growing in woods’, see *Histoire des plantes de la Guiane Française* 1: 235, pl. 93. 1775, *Histoire des Végétaux Recueillis dans les Isles Australes d’Afrique* 55, 57, t. 17, f. 1. 1805, *Theoria Systematis Plantarum* 197. 1858. *Rinorea* Aubl. nom. cons.

Alsodeia membranacea King

Malay Peninsula.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 58(4): 402. 1889

(Roots as febrifuge.)

Malay name: melora angin

Alsodeiopsis Oliv. Icacinaceae

Greek *alsodes* ‘woodland, growing in woods’, see *Genera Plantarum* [Bentham & Hooker f.] 1(3): 996. 1867.

Alsodeiopsis poggei Engl.

West tropical Africa. Shrub, red fruits

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17(1–2): 71. 1893 and *Phytothérapie clinique* 4(1): 9–14. 2006

(Roots aphrodisiac.)

Alsodeiopsis poggei Engl. var. ***robynsii*** Boutique

West tropical Africa. Shrub

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17(1–2): 71. 1893 and *Phytothérapie clinique* 4(1): 9–14. 2006

(Roots aphrodisiac, genital stimulants.)

Alsodeiopsis rowlandii Engl.

West tropical Africa. Shrub, yellow flowers, ripe fruits red

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 479. 1898

(Roots aphrodisiac.)

Alsodeiopsis schumannii (Engl.) Engl. (*Alsodeiidium schumannii* Engl.)

Tanzania. An evergreen shrub or tree, branched, leaves tip long-pointed, flowers in loose branched heads beside leaves, yellow narrow petals, an oblong drupe orange-red, woody stone ridged, edible fruit, in lowland and upland rainforest

See *Genera Plantarum* 1: 996. 1867, *Die Pflanzenwelt Ost-Afrikas* C: 248. 1895, *Die Natürlichen Pflanzenfamilien Nachtr. zu III.5*: 226. 1897 and *Journal of East African Natural History* 95(2): 235–240. 2006

(Fruit tonic.)

in Tanzania: mbululu, mkalanga mwitu, mkaranga mwitu, mmavimavi, munozambeyu, muozambeyu, muvalambe, muvulambe

Alsodeiopsis staudtii Engl.

West tropical Africa. Shrub or small tree, edible fruit

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 479. 1898

(Roots aphrodisiac.)

in Ghana: bonsa dua

***Alstonia* R. Br. Apocynaceae**

After the Scottish (b. Lanarkshire) botanist Charles Alston, 1685–1760 (Edinburgh), physician, 1716–1760 professor

of botany and *materia medica* at Edinburgh University, 1718–1719 at Leyden with Boerhaave, King’s Botanist, in 1721 (in Stafleu: 1725) a Fellow of the Royal College of the Physicians of Edinburgh, his works include *Index plantarum praecipue officinalium*, quae in *Horto Medico Edinburgensi* demonstrantur. Edinburgi 1740, *Index Medicamentorum simplicium Triplex*. Edinburgi 1752 and *Tirocinium botanicum Edinburgense*. Edinburgi. 1753. See *Histoire des plantes de la Guiane Française* 268. 1775, *Introductio ad Historiam Naturalem* 198. 1777, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 9–16. London 1790, R. Brown, “On the Asclepiadeae.” *Memoirs of the Wernerian Natural History Society*. 1: 75–76. Edinburgh 1811 and *Bull. Mus. Natl. Hist. Nat.* sér. 2, 19: 297. 1947, John H. Barnhart, *Biographical Notes upon Botanists* 1: 45. 1965, Henry Guerlac, in *D.S.B.* 2: 173–183. 1981.

Alstonia angustifolia Wall. ex A. DC. (*Alstonia angustifolia* Wall.; *Alstonia angustifolia* var. *elliptica* King & Gamble; *Alstonia angustifolia* var. *latifolia* King & Gamble; *Alstonia beccarii* (Benth.) Pichon; *Alstonia latifolia* (King & Gamble) Ridl.; *Amblyocalyx beccarii* Benth.)

W. Malesia. Trees, bole fluted, smooth outer bark fissured or scaly, inner bark yellowish without sap, leaves usually in whorls of 3, inflorescence many-flowered, calyx and corolla densely tomentose outside, slender long follicles glabrous splitting along one side, flat seeds with tufts of silky hairs at both ends, in primary forest

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 409. 1844 and *Planta Med.* 55(5): 463–466. 1989, *Phytochemistry* 65(5): 603–608. 2004

(Leaves externally applied to the spleen area to treat remittent fever. Bark used for treating malaria. Alkaloids from the stem bark and from the leaf extract.)

in Indonesia: medan pasir, pulau pipit

in Malaysia: itai setapoh, mergalang, pulau

in Vietnam: l[aas]c, s[uwx]a l[as] h[e]j

Alstonia angustiloba Miq. (*Alstonia angustiloba* var. *glabra* Koord. & Valeton; *Alstonia calophylla* Miq.; *Paladelpa angustiloba* (Miq.) Pichon)

Thailand, Malesia. Tree, bole tall straight fluted, inner bark mottled yellow-brown with copious latex, corolla glabrous outside, slender long follicles brownish tomentose splitting along one side, flat seeds with tufts of silky hairs at both ends, in mixed dipterocarp forest, freshwater swamp forest, secondary forest

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *Bijdr. Boomsoort. Java* 1: 120. 1894 and *Bull. Mus. Natl. Hist. Nat.*, II, 19: 299. 1947

(Leaves externally applied to the spleen area to treat remittent fever. Latex used to heal boils and abscesses, to soothe

toothache. An extract of the pounded bark an ingredient of febrifuges and vermifuges.)

in Brunei: pulai lilin

in Indonesia: pulai hitam

in Malaysia: pulai, pulai bukit

in Thailand: tin pet lek

Alstonia boonei De Wild. (*Alstonia congensis* Engl.; *Alstonia congensis* var. *glabrata* Hutch. & Dalziel)

W. Trop. Africa, Zaire. Tree, straight fluted stem, dark brown bark, copious white latex when cut, small yellowish-white flowers, fruits borne in follicles hanging down in pairs from the branches, silky hairy seeds

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 8: 64. 1887 and *Repertorium Specierum Novarum Regni Vegetabilis* 13: 382. 1914, *Flora of West Tropical Africa* 2(1): 42. 1931, *Planta Med.* 21(4): 343–346. 1972, *Taxon* 28: 636–637. 1979, *Genetica* 68: 3–35. 1985, *J. Ethnopharmacol.* 33(1–2): 129–133. 1991, *J. Ethnopharmacol.* 33(3): 263–267. 1991, *J. Ethnopharmacol.* 46(1): 7–15. 1995, *Afr. J. Med. Med. Sci.* 25(4): 373–375. 1996, *Phytother. Res.* 14(8): 630–634. 2000, *J. Ethnopharmacol.* 71(1–2): 179–186. 2000, *Planta Med.* 66(3): 206–210. 2000, *International Journal of Dermatology* 46(Suppl. 1): 48–55. 2007

(The wood of these species is said to be irritant. Latex applied to snakebites, skin complaints and swellings caused by filaria infections. Roots and stem bark febrifuge, aphrodisiac. Bark decoction used for the treatment of dysentery, dysmenorrhea, jaundice, cough, sore throat, typhoid fever, gonorrhoea, yaws, asthma, and applied to sores, ulcers, skin complaints, snakebites, rheumatic pain toothache. Extract of the stem bark and/or from the leaves antimicrobial, diuretic, hypotensive, anthelmintic, galactagogue, antiarthritic, anti-inflammatory, analgesic and antipyretic; used against gastrointestinal parasites of animals and man. Leaves applied topically to reduce edemas and to treat sores; squeezed leaves in water for stomach pain. Religion, superstitions, magic, ritual.)

in English: alstonia, boone's alstonia, cheesewood, pattern wood, stool wood

in Benin: ukhu

in Cameroon: bokuk, bokuka, bókùkà, ekouk, guga, kanja, kokomatt, kuge, kwfa, wokuka

in Central African Republic: ekouk, gouga, gouka, guga, guka, mogouga, moguga

Alstonia constricta F. Muell. (*Alstonia constricta* var. *mollis* F.M. Bailey; *Alstonia constricta* var. *montmariensis* F.M. Bailey; *Alstonia mollis* Benth.)

Australia. Erect shrub or tree, often suckering and forming thickets, small whitish scented flowers, pair of slender compressed follicles, flat pubescent fringed seeds

See *Fragmenta Phytographiae Australiae* (Mueller) 1(3): 57. 1858

(Used in Sidha. Dried bark antiperiodic, tonic, febrifuge, anthelmintic, antispasmodic, hypotensive, astringent, bitter, for gastro-intestinal disorders, dysentery, rheumatism, backache, chronic diarrhea, malaria, intermittent fever; toxic in large doses.)

in English: Australian quinine, bitter bark, fever bark, quinine bush, quinine tree

in India: kaippup pattai

Alstonia glaucescens (K. Schum.) Monach. (*Alstonia glaucescens* (Wallich ex G. Don) Monachino; *Alstonia pachycarpa* Merrill & Chun; *Alstonia rostrata* C.E.C. Fisch.; *Alstonia undulifolia* Kochummen & K.M. Wong; *Alyxia calophylla* Wall., nom. nud.; *Alyxia glaucescens* G. Don, nom. illeg.; *Alyxia glaucescens* Wallich ex G. Don, non Wallich; *Winchia calophylla* A. DC.; *Winchia glaucescens* (Wallich ex G. Don) K. Schumann; *Winchia glaucescens* K. Schum.)

China, Indonesia. Tree, bole rounded cylindrical, glabrous branchlets, twigs exude white sap, papery leaves in whorls, pubescent white corolla, connate follicles

See *Prodromus Florae Novae Hollandiae* 469. 1810, *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *A General History of the Dichlamydeous Plants* 4: 97. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 326. 1844, *Die Natürlichen Pflanzenfamilien* 4(2): 125. 1895 and *Bull. Misc. Inform. Kew.* 1929(10): 315–316. 1929, *Sunyatsenia* 2(3–4): 310–311, f. 42. 1935, *Pacific Science* 3: 144. 1949, *Blumea* 29: 513. 1984, *Flora of China* 16: 143–188. 1995, *Planta Medica* 63(2): 97–101. 1997, *Journal of*

Integrative Plant Biology Formerly *Acta Botanica Sinica* 47(7): 892–896. 2005, Middleton, D.J. *Apocynaceae* (subfamilies Rauvolfioideae and Apocynoideae). *Flora Malesiana* 18. Noordhoff-Kolff N.V., Jakarta. 2007 [as *Alstonia rostrata*.]

(Root bark cytotoxic, antineoplastic. Leaves and bark to treat acute and chronic bronchitis, respiratory diseases; stem bark anti-cough and anti-asthmatic, for chronic bronchitis, chronic tracheitis.)

in China: pen jia shu

Alstonia iwahigensis Elmer (from the river Iwahig, a river on the island Palawan in the Philippines)

Borneo, Indonesia, Philippines. Tree, straight, fluted, inner bark yellowish with copious latex, leaves in whorls, small creamy white flowers, inflorescence of dense many-flowered clusters, paired follicles glabrous, small hairy seeds, in primary and secondary forest

See *Leaflet. Philipp. Bot.* 4: 1447. 1912, *International Journal of Pharmacognosy* 32(4): 378–383. 1994

(The diluted latex drunk to cure fevers; latex mixed with honey taken as a tonic. A decoction of the roots taken to treat diabetes and lumbago.)

in Indonesia: pelantan, pilai, pulau basung, pulau gunung, pulantan, selutong, tambirag, tomboilik

in Malaysia: tambalait, tombalik

Alstonia macrophylla Wall. ex G. Don (*Alstonia acuminata* Miq.; *Alstonia batino* Blanco; *Alstonia brassii* Monach.; *Alstonia costata* Wall. ex Miq., nom. illeg.; *Alstonia glabriflora* Markgr.; *Alstonia macrophylla* Wall.; *Alstonia macrophylla* var. *acuminata* (Miq.) Monach.; *Alstonia macrophylla* var. *glabra* A. DC.; *Alstonia macrophylla* var. *mollis* Merr.; *Alstonia oblongifolia* Merr.; *Alstonia pangkorensis* King & Gamble; *Alstonia paucinervia* Merr.; *Alstonia subsessilis* Miq.)

China to Trop. Asia. Slender tree, perennial, straight, bark smooth, leathery leaves in whorls, cymes rather lax arranged in a sessile umbel, cymes terminal 3-branched, corolla glabrous without except for the ciliolate lobes, petals broadly rounded, pair of follicles linear, seeds pubescent, invasive

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *A General History of the Dichlamydeous Plants* 4: 87. 1837 and *Journal of Ethnopharmacology* 77(1): 49–55. 2001, *Phytomedicine* 9(7): 632–635. 2002, *J. Ethnopharmacol.* 89(2–3): 185–191. 2003, *Fitoterapia* 75(7–8): 673–682. 2004, *J. Pharm. Pharm. Sci.* 8(3): 558–564. 2005, *Contraception* 71(5): 372–378. 2005, *Indian J. Exp. Biol.* 43(11): 1104–1109. 2005, *Chemotherapy* 52(3): 151–157. 2006

(Plant antipyretic, analgesic, antidepressive, antiprotozoal, antiinfective, antibacterial, antiinflammatory, antioxidant, cytotoxic, a potent inhibitor of sperm motility. Bark febrifuge, bitter tonic, anthelmintic, antimalarial, antiperiodic, antidyenteric, galactagogue, emmenagogue, anticholeric,

vulnerary, tonic, antiamebic. Leaves antiseptic, antimicrobial, stomachic; young leaves decoction drunk to cure lung and ear congestions; leaves mixed with the leaves of *Cordia obliqua* pounded in water and taken for stomachache; leaf paste applied as a postpartum remedy; leaf juice mixed with water given for painful urination. Veterinary medicine, leaves mixed with lime powder made into a paste applied to wounds and sores of pigs.)

in English: broad-leaved pulai, devil tree, devil-tree alstonia, hard alstonia, hard milkwood

in China: da ye tang jiao shu

in India: chatian, chuharoi, janthaala mara, saptacchada bheda, tachoroi, tachuroi

in Indonesia: ai oi, kai riti, pule batu

Malayan names: beburus, broad-leaved pulai, buta buta darat, changgai puteri, itai setapoh, medang tahi kerbau, pulai daun besar, pulai penipu bukit, sayongan, setinggi, tinjau belukar, tujok setapoh

in Papua New Guinea: berekou, fono

in Philippines: basikal-lang, basikalang, basikalon, basikarang, bayikalang, batino, dalakan, itang-itang, kuyau-kuyau, malatapai, pangalamutien, pangalanud-dien, pangalisok, pangolaksien, tangal-tungan, tangitang

Alstonia mairei H. Léveillé (*Alstonia paupera* Handel-Mazzetti; *Blaberopus mairei* (H. Lév.) Lý; *Wikstroemia hemsleyana* H. Léveillé)

China, Vietnam. Shrub, erect, corolla white, linear follicles

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *Kongl. Vetensk Acad. Handl.* 1821: 167. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 410. 1844 and *Catalogue des Plantes de Yun-Nan* 9. 1915, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 41. 1915. *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 62: 241. 1920, *Feddes Repertorium* 97(9–10): 616. 1986

(Roots and leaves astringent, to stop external bleeding.)

in English: Maire alstonia

in China: yang jiao mian

Alstonia neriifolia D. Don (*Alstonia guangxiensis* D. Fang & X.X. Chen; *Alstonia neriifolia* var. *glabra* Monach.; *Alstonia sericea* Blume; *Blaberopus neriifolius* (D. Don) A. DC.; *Blaberopus sericeus* (Blume) A. DC.)

Nepal, Bhutan, Himalaya.

See *Memoirs of the Wernerian Natural History Society* 1: 75. 1811, *Prodromus Florae Nepalensis* 131. 1825 and *Acta Phytotaxonomica Sinica* 18(2): 227–228, pl. 1. 1980

(Leaves and roots antiinflammatory, to cure abscesses.)

in China: zhu ye yang jiao mian

Alstonia scholaris (L.) R. Br. (*Alstonia kurzii* Hook.f.; *Alstonia scholaris* var. *avae* A. DC.; *Alstonia scholaris* var. *blumei* A. DC.; *Alstonia scholaris* var. *velutina* Monach.; *Alstonia spectabilis* R. Br.; *Alstonia spectabilis* Kurz, nom. illeg.; *Beluttakaka malabarica* (Lam.) (Used in Ayurveda, Unani and Sidha. Indole alkaloids from the leaves, stem and bark. Molluscicidal, anthelmintic, cytotoxic, antiseptic, tonic, antibacterial, bronchodilatory, emmenagogue, antidysenteric, astringent, anticholeric and vulnerary. Raw leaf juice applied to kill head lice; roots insect repellent. Bark and leaves used to treat headache, influenza, diarrhea, dysentery, bronchitis, arthritis, fever and pneumonia; leaves and bark decoction given in dysentery. Bark bitter, febrifuge, tonic, antidote, antiperiodic, used in malaria and diarrhea, dysentery, rheumatism, snakebite, cold and bronchitis; dry powdered bark with bark of *Tabernaemontana divaricata* given in consumptive fever; bark paste applied for skin diseases and chest pain; bark extract with *Cuscuta reflexa* and bark of *Rhamnus napalensis* given to kill intestinal worms; bark decoction drunk to treat genital troubles in men; bark decoction with bark of *Flacourtia jangomas*,

seeds of *Luffa aegyptiaca* and rootstock of *Momordica cochinchinensis* given in asthma; powdered stem bark with cow milk given in gonorrhoea; infusion of bark and leaves of *Mallotus roxburghianus* with bark of *Alstonia scholaris* drunk for hypertension. Latex applied to ulcers, ulceration of mouth, open sores, rheumatic pains; gum taken with sugar for dysentery. Bark sap said to induce abortion; sap mixed with hot water and the suspension drunk to treat malaria; leaves chewed as an oral contraceptive. Seeds pounded with ginger and applied on painful swelling of scrotum. Ceremonial, plant very sacred, worship tree, abode of spirits, stone-gods consecrate on the bottom of the trunks; rain-making through sacrifices in the sacred forest; leafy branch held in hand at the time of religious ceremonies; the souls of forefathers supposed to take rest on this tree after the death. Veterinary medicine, crushed leaves juice applied or dropped on wounds and sores, leaves and bark decoction given in dysentery; crushed stem bark given to cure diarrhoea.)

in English: blackboard tree, common alstonia, devil tree, devil's wood tree, dita bark, dita bark tree, dried njau, Indian pulai, milkwood, milky pine, shaitan wood, white cheesewood

in French: arbre à lait

in Burma (Myanmar): lettok, taung meok

in China: tang jiao shu, xiang pi mu

in India: aelele haale, ayugmachchada, ayugmaparna, ayukachhada, azhilaip-palai, bahuparna, bantale, bolchhak chhan, bomudu, bor chhak chhan, brihattvaka, brihattvaka, captapanam, captapanani, chatian, chatiana, chatiani daru, chatin, chatiun, chativan, chatiyan, chatnia, chatraparna, chattin, chattiyan, chatuan, chatwan, chhatiaanaa, chhaiten, chhatan, chhatim, chhatin, chhatium, chhatiwan, chhatni daru, chhatnia, chitawan, chition, chitwan, chochina, daevasurippi, daivapala, daivappala, dalegandhi, devasurippi, devavriksha, dieng ryteng, dieng rythen, doddapala, doddapale, edaakulapaala, edaakulaponna, edakula-ariti, edakula-pala, edakulapala, edakulaphala, edakula-ponna, edakulaponna, edakularati, edakularaticettu, elaaramu, elalaipalai, elaramu, elelebale, elelehale, elelepale, elilai-p-palai, elilai-ppalai, elilampala, elilapala, elilapalei, elilappalai, elilappalai, erilampala, ezhilai palai, ezhilaip-palai, ezhilaippalai, ezhilampaala, ezhilampala, ezhilapala, ezilai palai, ezilampala, gandhiparna, grahanasha, grahanashamaparna, grahashi, guchhapushpa, haale, haale mara, hale, jantala, jantale, janthaale mara, janthalla, janthalle, janthatthi, janthra haale, jantrahale, jivani, kaadu haale, kaadu saale, kadusaale, kadusale, kalyanappala, kashim, khiromula, kodaale, kodale, kodapala, kodu haale, koduhale, koduhale madale, konda ganneru, kotapala, kshatrya, lazarongpang-tong, madagandha, maddaale, maddale, madi haale, mangalapala, mangalappala, maranallari, mokkanpala, mudhol, mudihale, mukam-palei, mukampala, mukkampala, mukkan-pala, mukkanbalai, munichhada, paalagaruda, paale, pala, pala-garuda, palagaruda, palai, pale, palegaruda, palegarudu, palembu, payasya, rukni, saitankajhad, saittan ka jat,

sapta-parna, saptacchada, saptacchada bheda, saptacchadah, saptacchadah, saptachhada, saptahva, saptanga, saptaparna (sapta, seven; parna, leaves), saptaparna chhal, saptaparnachal, saptaparnah, saptaparni, saphthaparna, saphthaparni, saphthpoorna chhal, sarada, satene gaachh, sathuin, sathvin, sathwin, satiana, satiun, satni, satuin, satveen, satvin, satwin, satyana, shaitan, shalmalipatraka, sharada, sharadipushpa, shirarujam, shuktiparna, sokson, sotiana, sringiritika, suparnaka, sutipatra, taala mraanu, taalamraanu, theng-muraung, thengpi-rechau-araung, thuam riat, thuamriat, thum riat, tirunamappalai, vadirasi, vidha, vinada, vinyaka, visalatvak, visaltvak, visamacchada, vishalatvaka, vishamachhada, wodrase, yaksippala, yedakulapala, yelegebaale mara

in Indonesia: njau lutungpulai, pule, rite

in Lepcha: pur vok koong

Malayan names: basong, geceh, kacau gitik, petai agong, pulai, pulai basong, rejang, rutih

in Nepal: chatiwan, chhatiwan, chition, palimara

in Papua New Guinea: budo, herina, hibom, jijima, kambu, kambuu, katung, puto, sipuel, watsil, zopang

in Philippines: alipauen, alipauin, andarayan, dalipaoen, dalipauen, dilupaon, dirita, dita, lipauen, tanitan

in Sarawak: gite, pelai

in Thailand: gah bo, hassaban, sattaban, tin pet

in Tibet: lo ma bdun

in Vietnam: co tin pat, may man, mo cua, m[of] cua, mua cua, sura, s[uwx]a

Alstonia spatulata Bl. (*Alstonia cochinchinensis* Pierre ex Pit.; *Alstonia cuneata* Wallich ex G. Don; *Alstonia cuneata* Wall.)

Indochina, New Guinea. Tree, bole at first cylindrical becoming fluted and shortly buttressed at the base, inner bark pale yellow with copious latex, calyx glabrous, corolla glabrous outside, follicles glabrous, wood of the roots used for rafters for fishery and as a replacement for cork, near streams, in secondary or shrub vegetation

See *Bijdragen tot de flora van Nederlandsch Indië* 16: 1037. [Oct 1826-Nov 1827], *Numer. List* [Wallich] n. 1645. 1829 and *Fl. Indo-Chine* [P.H. Lecomte et al.] 3: 1165. 1933

(Latex applied to sores, toothache and skin diseases. An aqueous extract of the bark used as a natural remedy for diabetes mellitus. An extract of the pounded bark an ingredient of febrifuges and vermifuges. Crushed fresh leaves made into a paste applied for shingles.)

in English: milkwood

in Indonesia: gabusan, lame, pulai gabus

in Malaysia: pulai, pulai basong, pulai paya, pulai puteh

in Sarawak: pelai

in Thailand: sia, thia, tinpet phru

in Vietnam: s[uwx]a l[as] b[af]ng, m[ows]p, m[of]cua n[uw][ows]c

Alstonia spectabilis R.Br. (*Alstonia linearis* Benth.; *Alstonia longissima* F. Muell.; *Alstonia ophioxyloides* F. Muell.; *Alstonia somersetensis* F.M. Bailey; *Alstonia spectabilis* Kurz; *Alstonia spectabilis* subsp. *ophioxyloides* (F. Muell.) P.I. Forst.; *Alstonia villosa* Blume; *Alstonia villosa* f. *calvescens* Markgr.; *Alstonia villosa* var. *glabra* Koord. & Valetton; *Blaberopus villosa* var. *petiolata* Miq.; *Blaberopus villosus* (Blume) Miq.)

Malesia, Australia. Tree, inner bark yellowish, leaves in whorls, many-flowered inflorescence usually grouped, corolla pubescent outside, follicles glabrous, in primary and secondary forest

See *On the Asclepiadeae* 75. 1810, *Memoirs of the Wernerian Natural History Society* 75–76. 1810[1811], *Forest Flora of British Burma* 2: 183. 1877, *Descr. Notes Papuan Pl.* 1: 91. 1877, *Queensland Agric. J.* 1: 229. 1897 and *Bot. Jahrb. Syst.* 61: 178. 1928, *Austral. Syst. Bot.* 5: 758. 1992

(A decoction of the leaves and bark used to treat cough, asthma and sore throat. A decoction of the leaves drunk to treat malarial fever and to relieve asthma. Diluted stem sap applied on tropical ulcers. Plant decoction a basis of a mixture used as an abortifacient or antifertility. Leaves may also be chewed with betel nut (*Areca catechu* L.) and lime to ease the pain of cough. Plant stated to be poisonous, though a leaves decoction used as a poison antidote.)

in English: hard milkwood

in Indonesia: langkerang, legarang, pole

in Papua New Guinea: foro, inhopu, kackacna, mirun, silibu, tutu, tutua, tutuwana

in Philippines: kuyau-kuyau

Alstonia venenata R.Br. (*Alstonia venenata* var. *pubescens* Monach.; *Blaberopus venenatus* (R.Br.) A. DC.; *Echites venenatus* Roxb. ex A. DC.)

India. Shrub or small tree, whorled branches, lanceolate leaves, small white flowers in terminal inflorescences, beaked fusiform follicles, hairy flattened seeds

See *Asclepiadeae*: 64. 1810, *Memoirs of the Wernerian Natural History Society* 1: 77. 1810[1811] and *Pacific Sci.* 3: 156. 1949, *American Orchid Society Bulletin* 51: 937–939. 1982

(Used in Ayurveda. Stem bark, fresh or dry, along with cow's milk given for snake poison. Milky latex antifungal, to cure wounds and cuts. Leaf juice applied to heal injuries; leaves decoction taken as febrifuge. Root powder poisonous, used to kill tigers. Seeds used as an aphrodisiac and stimulant in tantric sex rituals. Fruits for syphilis, epilepsy. Roots bitter, astringent, thermogenic, depurative, antitoxic, febrifuge,

anodyne, used for skin diseases, leprosy, snakebites, venomous bites, fevers, epilepsy; crushed roots juice drunk as anti-venom, especially for bite of viper.)

in English: devil tree

in India: adda sarpa, addasarpa, addasoppu, anadana, analivegam, analivegom, ankola, bagmari, bagmuhi, edaakula paala, edakula pala, gandu ganneru, othalam, paalai, palamunnipalai, raja-adana, sinnappalai, theepaala, theepkala, visaghni, vishagni

Alstonia yunnanensis Diels (*Acronychia esquirolii* H. Lév.; *Alstonia esquirolii* H. Lév.)

China. Shrub, erect, corolla pink to red

See *Characteres Generum Plantarum* 53, pl. 27. 1775, *Memoirs of the Wernerian Natural History Society* 1: 75. 1811 and *Notes Roy. Bot. Gard. Edinburgh.* 5(25): 165. 1912, *Flore du Kouy-Tchéou* 374. 1915, *Cat. Pl. Yun-Nan*: 10. 1915, *Taxon* 28: 636–637. 1979, *Planta Med.* 49(9): 62. 1983, *Journal of Ethnopharmacology* 117(2): 362–377. 2008

(Alkaloids from stems, roots and leaves. Roots to cure hypertension; leaves to treat hemostasis.)

in English: Yunnan alstonia

in China: dian ji gu chang shan, ji gu chang shan

Alstroemeria L. Alstroemeriaceae (Amaryllidaceae, Liliaceae)

After the Swedish naturalist Baron Clas Alströmer, 1736–1794, plant collector for Linnaeus and his friends, merchant. See *Planta Alströmeria* 8. 1762, *Species Plantarum*, Editio Secunda 1: 461. 1762, Pehr Dubb, *Aminnelse-Tal, öfver ... Friherre C. Alströmer*, etc. Stockholm 1796, *Analyse des Familles de Plantes* 57, 58. 1829 and John H. Barnhart, *Biographical Notes upon Botanists.* 1: 45. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 9. 1972, *Gayana Bot.* 57(1): 55–59. 2000, *Gayana Bot.* 60(2): 101–106. 2003. Alstroemerias are one of the most common plants that cause allergic contact dermatitis in floral workers.

Alstroemeria aurea Graham (*Alstroemeria araucana* Phil.; *Alstroemeria aurantiaca* D. Don; *Alstroemeria aurea* Meyen; *Alstroemeria chiloensis* Phil.; *Alstroemeria concolor* Steud.; *Alstroemeria mutabilis* Kunze ex Kunth; *Alstroemeria nivali* Meyen; *Alstroemeria peruviana* Van Houtte; *Alstroemeria pulchella* H. Vilm., nom. illeg.; *Alstroemeria xanthina* Phil.)

Chile, Argentina. Herb, tuberous, narrow stem leaves twisted at the base, bright orange or yellow flowers streaked dark red, stomata only on the adaxial surface

See *Planta Alströmeria* 8. Upsaliae 1762, *Edinb. Phil. Journ.* (1833) 181. 1833, *Reise Erde* 1: 311. 1834 [25–31 May 1834], *The British Flower Garden*, ... series 2, t. 205. 1835,

Linnaea 29: 71. 1857 and *Flora Patagónica* 8(2): 152–164. 1969, *Gayana, Botánica* 42: 1–157. 1985, *Herbertia* 45: 163–170. 1989, *Contact Dermatitis* 34(5): 330–335. 1996, *Annals of Botany* 78: 449–457. 1996, *Plant Systematics and Evolution* 212: 87–106. 1998, McGovern T.W., Barkley T.M. “Botanical briefs: Peruvian lily—*Alstroemeria* (L.) spp.” *Cutis; Cutaneous Medicine for the Practitioner* 63(3): 137–138. 1999, *Journal of Ethnopharmacology* 103(1): 109–119. 2006, *Int. J. Plant Sci.* 168(5): 555–562. 2007

(Dermatitis, skin contact with the sap. Tuliposide A, from which the allergenic lactone tulipalin A is produced by enzymatic hydrolysis following damage to the plant, has been detected in this species, in all parts of the plants. For gynecological–obstetric problems.)

in English: Dover orange Peruvian lily, golden lily-of-the-Incas, Inca lily, lily of the Incas, parrot Lily, Peruvian lily

in Argentina: amancay

Alstroemeria hookeri Sweet (*Alstroemeria citrina* Phil.; *Alstroemeria hookeri* Lodd.; *Alstroemeria hookeriana* Schult.f.; *Alstroemeria hookeriana* Schult.; *Alstroemeria hookeriana* Schult. & Schult.f.; *Alstroemeria hookeriana* C. Gay; *Alstroemeria rosea* Hook., nom. illeg.; *Alstroemeria tenuifolia* Herb.)

Chile.

See *Planta Alströmeria* 8. 1762, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(1): 733. 1829 and *Taxon* 30(1): 15. 1981, *Herbertia* 45: 163–170. 1989

(Tuliposide A has been detected in this species, in all parts of the plants.)

in English: Inca lily

Alstroemeria inodora Herbert

SE. & S. Brazil. Herb, flowers red-orange

See *Planta Alströmeria* 8. 1762, *Amaryllidaceae* 90, t. 2, f. 1. 1837 and *Annals of Botany* 78: 449–457. 1996, Zuloaga, F.O. & Morrone, O. (eds.) *Pteridophyta, Gymnospermae y Angiospermae (Monocotyledoneae)*. *Catálogo de las Plantas Vasculares de la República Argentina* 1: 1–323. Missouri Botanical Garden, St. Louis. 1996 [as *Alstroemeria psittacina*.], Walderley, M.G.L., Shepherd, G.J., Melhem, T.S. & Giulietti, A.M. (eds.) *Flora Fanerogâmica do Estado de São Paulo* 4: 1–392. Instituto de Botânica, São Paulo. 2005

(Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria ligtu L.

Peru to C. Chile.

See *Species Plantarum*, Editio Secunda 462. 1762, *Planta Alströmeria* 8. 1762 and Santucci, B., Picardo, M., Iavaroni, C., Trogolo, C. “Contact dermatitis to *Alstroemeria*.” *Contact*

Dermatitis 12: 215–219. 1985, Marks, J.G. “Allergic contact dermatitis to *Alstroemeria*.” *Arch. Dermatol.*, 124: 914–916. 1988, *Herbertia* 45: 163–170. 1989, *Plant Systematics and Evolution* 212: 87–106. 1998, *Plant Cell Physiol.* 48(2): 310–21. 2007

(This plant causes contact dermatitis to workers who may be sensitized to the chemical tuliposide A, which is also found in tulip plants. This chemical readily penetrates vinyl gloves. Nitrile gloves may prevent the allergic reaction of workers sensitive to this chemical. The lactone 6-tuliposide A occurs in both the Peruvian lily and in tulip plants. A human who becomes sensitized to one of the plants generally becomes cross-reactive to the other plants. A white starch from the roots, a soft food taken for stomach ailments.)

in English: Lily-of-the-Nile, Peruvian lily, St. Martin’s flower

Alstroemeria ligtu L. subsp. *ligtu* (*Alstroemeria chilensis* Lem.; *Alstroemeria curtisiana* E. Mey. ex C. Presl, nom. illeg.; *Alstroemeria feuillaeana* E. Mey. ex C. Presl; *Alstroemeria flava* Phil.; *Alstroemeria haemantha* Ruiz & Pavón; *Alstroemeria haemantha* var. *albida* Herb.; *Alstroemeria inaequalis* Phil.; *Alstroemeria ligra* Crantz; *Alstroemeria ligtu* f. *carnea* Ravenna; *Alstroemeria ligtu* f. *flavens* Garaventa; *Alstroemeria ligtu* f. *haemantha* (Ruiz & Pav.) Ravenna; *Alstroemeria ligtu* f. *nivea* Ravenna; *Alstroemeria ligtu* var. *heterophylla* Kuntze; *Alstroemeria lothiam* Utnet; *Alstroemeria presliana* Kunth, nom. illeg.; *Alstroemeria stenopetala* Phil.; *Priopetalon pallidum* Raf.)

Peru to C. Chile.

See *Planta Alströmeria* 8. 1762, *Revis. Gen. Pl.* 3(2): 310. 1898 and *Anales Mus. Hist. Nat. Valparaiso* 4: 94. 1974, *Taxon* 30: 696–697. 1981, *Gayana, Botánica* 42: 1–157. 1985, *Herbertia* 45: 163–170. 1989, *Onira* 5: 42. 2000

(Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria magnifica Herb. subsp. *gayana* (Phil.) Ehr. Bayer (*Alstroemeria gayana* Phil.)

Chile. Tuber geophyte

See *Planta Alströmeria* 8. 1762, *Linnaea* 29: 71. 1857

(Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria paupercula Phil. (*Alstroemeria violacea* Phil.)

Peru to N. Chile.

See *Planta Alströmeria* 8. 1762, *Florula Atacamensis seu Enumeratio* ... 51. 1860 and *Herbertia* 45: 163–170. 1989

(Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria pelegrina L. (*Alstroemeria amoena* Salisb.; *Alstroemeria pelegrina* Vell., nom. illeg.; *Alstroemeria peregrina* Ruiz & Pav.; *Alstroemeria peregrina* f. *alba* Voss;

Alstroemeria peregrina var. *albescens* Herb.; *Alstroemeria peregrina* var. *squamata* Herb.)

Peru to C. Chile.

See *Species Plantarum*, Editio Secunda 1: 461. 1762, *Planta Alströmeria* 8. 1762 and *Herbertia* 45: 163–170. 1989, *International Journal of Plant Sciences* 154: 565–571. 1993, *Annals of Botany* 78: 449–457. 1996

(Tuliposide A has been detected in this species, in all parts of the plants.)

in English: Peruvian lily

Alstroemeria philippii Baker (*Alstroemeria philippii* var. *albicans* Muñoz-Schick)

N. Chile.

See *Planta Alströmeria* 8. 1762 and *Annals of Botany* 78: 449–457. 1996, *Ann. Allergy Asthma Immunol.* 88(6): 638–9. 2002, *Not. Mens. Mus. Nac. Hist. Nat.* 352: 22. 2003

(Allergic contact dermatitis to *Alstroemeria* has been well documented. Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria pulchella L.f. (*Alstroemeria atrorubra* Ravenna; *Alstroemeria banksiana* M. Roem.; *Alstroemeria hassleriana* Baker; *Alstroemeria psittacina* Lehm.; *Lilavia psittacina* (Lehm.) Raf.)

Brazil to N. Argentina.

See *Planta Alströmeria* 8. 1762 and *Bull. Herb. Boissier*, II, 3: 1101. 1903, Healey, A.J. & Edgar, E. *Flora of New Zealand* 3: 1–220. Wellington 1980, *Herbertia* 45: 163–170. 1989, *Annals of Botany* 78: 449–457. 1996, *Onira* 4: 38. 2000, *Taxon* 53: 183. 2004, Tavares B., Loureiro G., Pereira C., Chieira C. “Home gardening may be a risk factor for contact dermatitis to *Alstroemeria*.” *Allergol. Immunopathol.* (Madr). 34(2): 73–5. 2006

(Tuliposide A has been detected in this species, in all parts of the plants.)

in English: New Zealand Christmas bell, parrot alstroemeria, parrot flower, parrot lily, red parrot beak

Alstroemeria pulchra Sims (*Alstroemeria ligtu* f. *pulchra* (Sims) Voss)

Chile.

See *Planta Alströmeria* 8. 1762, *Supplementum Plantarum* 206. 1781 [1782] and *Proceedings of the Indian Science Congress Association* 62: 116–117. 1975, *CIS Chromosome Information Service* 20: 20–21. 1976, *Taxon* 30: 696–697. 1981, *Herbertia* 45: 163–170. 1989

(We stress the importance of *Alstroemeria* as a cause of allergic contact dermatitis; the allergen involved in sensitization is tulipalin A (alpha-methylene-gamma-butyrolactone).

Alternanthera Forssk. *Amaranthaceae* (*Chenopodiaceae*)

Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria revoluta Ruiz & Pavón (*Alstroemeria herbertiana* M. Roem.; *Alstroemeria inconspicua* Phil.; *Alstroemeria reflexa* M. Roem.)

Chile.

See *Planta Alströmeria* 8. Upsaliae 1762

(Tuliposide A has been detected in this species, in all parts of the plants.)

Alstroemeria versicolor Ruiz & Pavón (*Alstroemeria meyeniana* Schauer; *Alstroemeria sotoana* Phil.; *Alstroemeria tigrina* Phil.)

Chile.

See *Planta Alströmeria* 8. 1762, *Fl. Peruv.* 3: 59. 1802, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 440. 1843, *Linnaea* 29: 68. 1857, *Anales Univ. Chile* 93: 159. 1896 and *Herbertia* 45: 163–170. 1989

(Tuliposide A has been detected in this species, in all parts of the plant.)

Alternanthera Forssk. Amaranthaceae (Chenopodiaceae)

Latin *alternus*, *avi*, *atum*, *are* (*alternus*, *a*, *um*) ‘to alternate’ and *anthera*, *ae* ‘anther’, in most species the alternate anthers are barren, in this genus the stamens are alternatively fertile and sterile; see *Species Plantarum* 1: 206. 1753, P. Forsskål (1732–1763), *Flora aegyptiaco-arabica*. 28, 59. Copenhagen 1775, *Anleitung zur Kenntniss der Gewachse* 2(1): 317. 1817 and *Fieldiana, Bot.* 24(4): 143–174. 1946.

Alternanthera bettzickiana (Regel) G. Nicholson (*Achyranthes bettzickiana* (Regel) Standl.; *Alternanthera amoena* (Lem.) Voss; *Alternanthera bettzickiana* Standl.; *Alternanthera bettzickiana* Regel; *Alternanthera bettzickiana* (Regel) Standl., isonym; *Alternanthera bettzickiana* (Regel) Voss, isonym; *Alternanthera ficoidea* (L.) R. Br. ex Griseb.; *Alternanthera ficoidea* (Linnaeus) R. Brown; *Alternanthera ficoidea* var. *amoena* (Lem.) L. B. Sm. & Downs; *Alternanthera ficoidea* var. *bettzickiana* (Regel) Backer; *Alternanthera ficoidea* var. *bettzickiana* (Regel) Backer; *Alternanthera ficoidea* var. *versicolor* (Lem.) L.B. Sm. & Downs; *Alternanthera spathulata* Lem.; *Alternanthera versicolor* (Lem.) Regel; *Telanthera bettzickiana* Regel; *Telanthera ficoidea* (Linnaeus) Moquin-Tandon var. *versicolor* Lem.; *Telanthera picta* C. Koch)

Tropical America, Brazil. Herb, bedding plant, bushy or prostrate, trailing, erect or creeping, weak stemmed, many-branched, stems red and knobbly swollen at each node, narrow leaves tinged with various colors, round clusters of white flowers with silver-white bracts beside leaves, tender leaves and shoots as vegetable, fodder for goats and rabbits,

probably a cultigen of *Alternanthera ficoidea* (L.) R. Br. ex Griseb.

See *Species Plantarum* 1: 204–205. 1753, Charles O'Brien, *A treatise on calico printing, theoretical and practical*: including the latest philosophical discoveries: accompanied with suggestions relative to various manufactures. [Two volumes in one duodecimo, first edition.] Islington 1792, *Index Seminum* [St. Petersburg] 1862: 28. 1862, *The Illustrated Dictionary of Gardening*, ... 1: 59. 1884, *Vilmorin's Blumengärtnerei. Dritte neubearbeitete Aflage* 869. 1896 and *North American Flora* 21(2): 138. 1917, *Publications of the Field Columbian Museum, Botanical Series* 3: 254. 1930, *Fieldiana, Bot.* 24(4): 143–174. 1946, *Flora Malesiana: Series I: Spermatophyta* 4: 93. 1949, *Proc. Althaea L. Malvaceae

Althaea is the Greek name for marsh mallow or wild mallow used by Theophrastus; from the Greek *althos* 'a cure, something that heals, a healing', *althaimo* 'to heal'; see Carl Linnaeus, *Species Plantarum*. 2: 686–687. 1753 and *Genera Plantarum*. Ed. 5. 307. 1754 and *Fieldiana, Bot.* 24(6): 324–386. 1949.

Althaea cannabina L. (*Althaea cannabina* subsp. *narbonensis* (Cav.) Nyman; *Althaea kotschyi* Boiss.; *Althaea narbonensis* Pourr.; *Althaea narbonensis* Pourr. ex Cav.)

Europe, Western Asia. Perennial, erect, hirsute

See *Species Plantarum* 2: 686. 1753 and *Taxon* 31: 761. 1982, *Fitologija* 46: 12–32. 1992

(Antibacterial.)

in English: hemp-leaved mallow, hemp-leaved marshmallow

Althaea ludwigii L. (*Althaea garipensis* E. Mey.; *Althaea laevis* Moench; *Axolopha ludwigii* Alef.; *Dinacrusa ludwigii* (L.) G. Krebs; *Malva malwensis* Edgew.)

India, Namibia.

See *Feddes Repertorium* 105(5–6): 302. 1994, *Journal of Ethnopharmacology* 110(2): 200–234. 2007

(Antimycobacterial.)

in India: galio

Althaea officinalis L. (*Althaea balearica* Rodriguez; *Althaea kragujevacensis* Pan.; *Althaea kragujevacensis* Pančić ex Diklić & Stevan.; *Althaea micrantha* Borbas; *Althaea micrantha* Wiesb. ex Borbas; *Althaea officinalis* var. *obtusifolia*; *Althaea sublobata* Stokes; *Althaea taurinensis* DC.; *Althaea vulgaris* Bubani; *Malva althaea* E.H.L. Krause; *Malva althaea* F.W. Schultz; *Malva maritima* Salisb.; *Malva officinalis* (L.) Schimp. & Spenn.)

Central and southern Europe.

See *Species Plantarum* 2: 686–687. 1753 and *Fl. Iranica* 120: 39. 1976, *Taxon* 29: 728–730. 1980, *Taxon* 30: 829–842. 1981, *Taxon* 31: 761. 1982, *Informatore Botanico Italiano* 15: 39–43. 1983, *Informatore Botanico Italiano* 23: 123–130. 1991, *Fitologija* 46: 12–32. 1993, *Watsonia* 20: 63–66. 1994, *Botaničeskij Žurnal* (Moscow & Leningrad) 81(5): 98–101. 1996

(Used in Ayurveda, Unani and Sidha. Leaves demulcent, expectorant, diuretic, antibacterial, emollient, for ailments of the lungs and the urinary systems, in urethritis and kidney stones. Root antitussive, demulcent, diuretic, emollient, laxative, vulnerary, for digestive and skin problems, inflammations of the mouth, constipation, irritable bowel syndrome, gastritis, peptic ulcer, enteritis and colitis; externally root used in treating varicose veins, ulcers, abscesses, boils.)

in English: marsh mallow, mortification root, sweetweed, white mallow

in Arabic: khitmi, khobaiza

in India: al-ghasool, bazarul khatme, cimaittutti, cimaittutticeti, gul-i-khere, gul-i-khitmi, gul-khairo, gul kheru, guli kheri, gulkhair, gulkhaira, gulkhairo, jukhame khatme, khaira, khaira-ka-jhor, khairakajhor, khatami, khatimi, khatme, khatmi, khero, khitmi, khitmi-ka-jhar, khitmigajhar, khitmikajhar, resha-e-khitmi, resha-i-khitmi, resha khatami, resha-khatami, resha khatmi, shemaitute, simaitutti, tukhm-e-khitmi, tukhm-i-khatmi, tukm-i-khitmi, tukhm-i-khiyaria, tukhm khaimi, tukhm khat ni, tukhm khatmi, tukhm khitmi, tukhm khubbazi

in Japan: usubeni-tachi-aoi

in China: yao kui

Althaea rosea (L.) Cav. (*Alcea ficifolia* L.; *Alcea glabrata* Alef.; *Alcea rosea* Falk; *Alcea rosea* Linnaeus; *Althaea caribaea* Sims; *Althaea chinensis* Wall.; *Althaea coromandeliana* Cav; *Althaea coromandelina* Cav.; *Althaea cretica* Kuntze; *Althaea cretica* Weinm.; *Althaea ficifolia* Cav.; *Althaea ficifolia* Sibth. & Sims; *Althaea flexuosa* Sims; *Althaea meonantha* Link; *Althaea mexicana* Kunze; *Althaea rosea* Hohen. ex Boiss.; *Althaea rosea* Cav.; *Althaea rosea* var. *sinensis* (Cav.) China. Herb, erect, densely hirsute, flowers solitary or fascicled, corolla red, purple, white, pink, yellow or black-purple, young leaves eaten raw or cooked, flower petals and flower buds eaten raw, also as *Alcea*

See *Species Plantarum* 2: 687. 1753, *Diss. 2, Secunda Diss. Bot.* 91 (t. 28, f. 1). 1786 (*Monadelphiae Classis Dissertationes Decem* 2: 91. 1786), *Bot. Mag.* 44: t. 1916. 1817, *Numer. List* [Wallich] n. 2689. 1831, *Diagn. Pl. Orient.* ser. 2, 5: 67. 1856, *Revis. Gen. Pl.* 1: 66. 1891 and *Fl. W. Pakistan* 130: 50. 1979, *Biologia* (Bratislava) 48: 441–445. 1993, *Fitologija* 46: 12–32. 1993, *Plantsman* n.s., 6(4): 231. 2007

(Antiinflammatory, astringent, demulcent, diuretic, emollient, febrifuge; flowers for the treatment of chest complaints, constipation, dysmenorrhea, haemorrhage; roots and flowers antiinflammatory, leaves used to apply infusion of flowers to inflamed areas, boils; dried flowers infusion as a gargle to help soothe sore throats. Roots crushed and applied as a poultice to ulcers, internally used in the treatment of dysentery, enteritis; decoction of roots boiled with water and milk applied for dermatitis, also given to pregnant women to ease delivery. Seeds for jaundice. Petioles decoction laxative.)

in English: hollyhock

in India: catkharia, dodda bindige gida, gulkhair, kempu seeme thutthi, khatmi, saj posh, sudoposh

Altingia Noronha Hamamelidaceae (Altingiaceae)

After the German orientalist Jacobus Alting, 1618–1679, among his writings are *Synopsis institutionum Chaldaearum et Syrarum*. Groningae 1686, *Fundamenta punctationis linguae sanctae*. Groningae 1675 and *Hebraeorum respublica scholastica*. Amstelodami 1652; see Jacobi Alting ... *Opera omnia theologica, analytica, exegetica, practica, problematica, & philologica*. Amstelaedami 1687, 1685–1687 and *American Journal of Botany* 94: 1094–1115. 2007.

Altingia chinensis Oliv. ex Hance (*Altingia chinensis* (Champion) Oliver ex Hance; *Altingia chinensis* (Champion ex Benth.) Oliver ex Hance; *Liquidambar chinensis* Champion; *Liquidambar chinensis* Champ. ex Benth.)

Tropical to subtropical regions of Asia. Tree, strongly resiniferous, small flowers clustered

See *Species Plantarum* 2: 999. 1753, *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 5(2): 1, 9. 1790, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 164–165. 1852, *Journal of the Linnean Society, Botany* 13: 103. 1873 and *Am. J. Bot.* 88(5): 753–766. 2001

(Leaves chewed used to cure coughs.)

in English: mountain litchi

in China: tan shu

in Vietnam: to hap, t[oo] h[aj]p l[as] h[if]nh tim

Altingia excelsa Noronha (*Liquidambar altingiana* Blume)

Tropical to subtropical regions of Asia.

See *Species Plantarum* 2: 999. 1753, *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 5(2): 1, 9. 1790 and *Journal of the Arnold Arboretum* 58: 67–71. 1977

(Used in Ayurveda, Unani and Sidha. Strongly resiniferous, yields Burmese storax, or styrax, produced by the trees as a pathological product in response to bark damage.)

in SE Asia: rasamal, rasamala

in India: ashmapushpa, asle-labai, chala, chanchalatailaka, dhumra, dhumravarna, duang, erikacu, erikacuceti, java, jutuli, jutuli, kalka, kapichanchala, kapinama, kapisha, kapitail, karevar, kritrima, lepana, meaahe-sayelah, muktimukta, neriyacam, neriyaci, neriyacippal, niriycappal, neriyrishippal, pavana, pindatavara, pindita, pinyaka, pishtaka, pitasara, sainhikarasa, shaja, shalakidrava, shilaaras, shilaarasamu, shilaras, shilaras desi, shilarasamu, siddha, silaras, silarasa, silhaka, silhakah, silhapindaka, silhasara, sillhaka, sugandhika, tailakhya, tailparni, turashka, turuskah, vrikadhupa, yava, yavala

Malayan name: raksamal

Altingia gracilipes Hemsl. (*Altingia gracilipes* fo. *uniflora* Hung T. Chang; *Altingia gracilipes* var. *serrulata* Tutcher)

Tropical to subtropical regions of Asia. Strongly resiniferous trees, flowers clustered

See *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 5(2): 1, 9. 1790 and *Hooker's Icones Plantarum* 29(2): pl. 2837. 1907, *Rep. Bot. & For. Dept. Hongk.* 1914: 31. 1915, *Sunyatsenia* 7(1–2): 74. 1948

(Yields Tonkin storax.)

in English: slender stalk altingia

in China: xi bing tan shu

Alysicarpus Necker ex Desv. Fabaceae (Desmodieae)

From the Greek *halysis* 'a chain' and *karpos* 'fruit', referring to the pods, see *Species Plantarum* 2: 745–751. 1753, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 120–121. 1813.

Alysicarpus bupleurifolius (L.) DC. (*Alysicarpus bupleurifolius* Wall.; *Fabricia bupleurifolia* (L.) Kuntze; *Hedysarum bupleurifolium* L.; *Hedysarum cylindricum* Poir.; *Hedysarum gramineum* Retz.)

Pakistan. India. Perennial non-climbing herb, erect, inflorescence a lax raceme, red corolla, slightly moniliform pod, nitrogen fixing coastal sand dune legume

See *Familles des Plantes* 2: 188. 1763, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 352. 1825, *A Numerical List of Dried Specimens* n. 5761. 1831, *Revisio Generum Plantarum* 1: 181. 1891 and *Reinwardtia* 6(1): 85–108. 1961, *Trop. Plant Sci. Res.* 1: 1–13. 1983, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Current Science* 54: 938–939. 1985, *Proceedings of the Indian Science Congress Association* 78(3, viii): 129–130. 1991, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Austrobaileya* 6(1): 110. 2001

(Used in Ayurveda. Whole plant for fever. Leaves for wounds. Root extract given for asthma.)

in English: alyce clover, sweet alys, thorowax-leaved alysicarpus

in India: akranti, khad-samervo, nir-murri

Alysicarpus glumaceus (Vahl) DC. (*Alysicarpus glumaceus* Schindl.; *Alysicarpus glumaceus* Wall.; *Alysicarpus violaceus* (Forssk.) Schindl.; *Hedysarum glumaceum* Vahl; *Hedysarum violaceum* Forssk.)

East Africa. Annual non-climbing herb, shrubby, erect, creeping and ascending, spreading, lawn weed, loosely branched

See *Species Plantarum* 2: 745–751. 1753, *Flora Aegyptiaco-Arabica* 136. 1775, *Symbolae Botanicae, ...* (Vahl) 2: 106. 1791, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 353. 1825, *A Numerical List of Dried Specimens* n. 5764. 1831 and *Repertorium Specierum Novarum Regni Vegetabilis* 21: 12. 1925, *Bothalia* 18: 11–24. 1988

(Pounded leaves juice on bruises and skin diseases, stomach-ache; roots aphrodisiac, antiedema; root and leaves abortifacient, for pulmonary troubles, diarrhea, dysentery.)

in English: alyce, alyce clover

in Burundi: urukuka, urukukwe

in Congo: ngandu

in Kenya: cheberenet, kaasha - maho, kishampa

in Nigeria: gadagi

in Upper Volta: bundiya, buyaayi, gadaji

Alysicarpus heyneanus Wight & Arn.

India. Annual non-climbing herb, forage, seeds used as famine food

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 234. 1834

(Roots for biliousness and fevers. Fresh leaves juice to protect the liver. Veterinary medicine, leaves for calves with sores.)

in India: adavi kandi, zulu

Alysicarpus heyneanus Wight & Arn. var. *heyneanus* (*Alysicarpus glumaceus* (Vahl) A. DC. var. *heyneanus* (Baker) Raizada; *Alysicarpus obovatus* Edgew.; *Alysicarpus rugosus* (Willd.) DC. var. *heyneanus* Baker; *Alysicarpus rugosus* (Willd.) DC. var. *heyneanus* (Wight & Arn.) Baker)

India. Annual non-climbing herb, forage

See *Prodr.* (DC.) 2: 353. 1825, *J. Asiat. Soc. Bengal* 21(2): 169. 1852 and *Suppl. Duthie's Fl. Upper Gangetic Plain* 5: 47. 1976

(Roots for biliousness and fevers. Fresh leaves juice to protect the liver. Veterinary medicine, leaves for calves with sores.)

in India: zulu

Alysicarpus longifolius (Sprengel) Wight & Arn. (*Alysicarpus longifolius* (Rottler ex Spreng.) Wight & Arn.; *Alysicarpus longifolius* (Spreng.) Wight & Arn.; *Alysicarpus longifolius* Wight & Arn.; *Fabricia longifolia* (Wight & Arn.) Kuntze; *Hedysarum longifolium* Spreng.; *Hedysarum longifolium* Rottler ex Sprengel)

India. Perennial non-climbing herb, sweet root

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 233. 1834, *Revisio Generum Plantarum* 1: 182. 1891 and *Reinwardtia* 11(4): 290, 292. 1999

(Whole plant decoction poured into the nose.)

in India: aswenna, dhampta, dhodasamervo, gubal, jangligailia, jangligalli, motnadampta, motosamervo, samarvo, sohkhha, ubhosamervo

Alysicarpus monilifer (L.) DC. (*Fabricia monilifera* (L.) Kuntze; *Alysicarpus narimanii* S.M. Almeida &

M.R. Almeida; *Hedysarum monilifer* L.; *Hedysarum moniliferum* L.)

India, Ethiopia. Perennial non-climbing herb, creeping, low growing, prostrate, many-branched, turgid moniliform pods, eaten by cattle

See *Species Plantarum* 2: 745–751. 1753, *Mantissa Plantarum* 1: 102–103. 1767, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 353. 1825, *Revisio Generum Plantarum* 1: 182. 1891 and *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *Pharmaceutical Biology* 22(1): 17–39. 1984, *Journal of the Bombay Natural History Society* 85: 394. 1988, *Proc. Indian Sci. Congr. Assoc.* 78(3,VIII): 129–130. 1991, *Pharmaceutical Biology* 31(4): 283–287. 1993, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994

(Used for Sidha. Whole plant decoction used in cough, bronchitis, antidote to snakebite, antsnake venom; whole plant made into a paste with ginger and mustard oil used as an antidote for snakebite. Crushed plant destroys bed bugs and white ants. Leaves juice given after menstruation as an anti-fertility agent; leaves decoction taken as febrifuge.)

in India: amera, chatta-ki-ghas, jhuhi ghas, jhuhighas, kacukkoti, kallu naamada soppu, poovan pullu, poovanpullu, rechichedi, shevara, sohkhha, thalemaddina gida

Alysicarpus pubescens J.S. Law (*Fabricia pubescens* (Law) Kuntze)

India. Annual non-climbing herb, fodder

See *Icones Plantarum Indiae Orientalis* 1: t. 250. 1839, *Revisio Generum Plantarum* 1: 182. 1891

(Whole plant tonic, astringent.)

in India: chotasun

Alysicarpus ovalifolius (Schumach.) J. Léonard (*Alysicarpus nummularifolius* (L.) DC.; *Alysicarpus nummularifolius* (L.) (Used in Ayurveda and Sidha. High toxicity, plant very toxic. This plant can cause a variety of toxic problems, including perirenal edema in pigs; can also accumulate oxalates to as much as 30% of dry weight. Redroot pigweed is capable of accumulating toxic concentrations of nitrates; less suitable for fresh consumption by humans and as fodder for animals, presence of a rather high content of hydrocyanic acid and oxalic acid. Ingestion of this plant is reported to cause photosensitivity in man, weed dermatitis, pollinosis. Plant astringent, in diarrhea, dysentery, gastrointestinal disorders; plant juice taken by women with excessive menstrual discharge. Stem and leaves as a vegetable in atrophy; used externally to treat inflammations, and internally as a diuretic, for throat and mouth infection. Root extract

of *Amaranthus tricolor* given to check vomiting. Magico-religious beliefs, contact therapy, Doctrine of Signatures, antidote, for snake infection.)

in English: amaranth, careless weed, Chinese amaranth, Chinese spinach, Ganges amaranth, Joseph's coat, pigweed, prince's feather, red leaved spinach, redroot, redroot amaranth, redroot pigweed, reflexed amaranth, rough pigweed

Immunopharmacol.* 5(4): 711–722. 2005, *Journal of Ethnopharmacology* 103(2): 236–240. 2006

(Used in Ayurveda and Sidha. The species bears stiff spines, mechanical injury may be inflicted. Cases of poisoning in cattle have been reported. Expectorant, antimalarial, galactagogue, aeroallergen, diuretic, mild purgative, antiinflammatory, sudorific, astringent, febrifuge, antidote to snake poison, for acute bronchitis, diabetes. Shoots decoction antirheumatic. Roots diuretic, astringent, emmenagogue and antipyretic, to treat gonorrhoea, diarrhea; root paste of *Abroma augustum* with bark of *Adhatoda zeylanica*, *Gmelina arborea* and roots of *Amaranthus spinosus* applied on forehead in headache; powder of dry roots smoked for hallucination; eating paste of roots can cause temporary insanity; roots decoction given as vermicide against roundworm, especially for children, also taken in urinary troubles; crushed roots juice taken for dysuria; root extract taken in early morning on empty stomach as wormicide; powdered dried roots made into paste with water used for eczema; root paste applied on snakebite or scorpion sting (Doctrine of Signatures); root paste applied on boils to remove pus; roots introduced into vagina for abortion; root pasted and administered in hot water for birth control by abortion. Leaves for stomach pain, cough, colic, menorrhagia, gonorrhoea; bruised leaves applied externally in cases of eczema, burns, wounds and boil. Leaves and fruits for gastrointestinal disorders, piles,

arthritis. Veterinary medicine, roots given to cows for dysentery; plant decoction given for delivery complaints, as a postpartum remedy; whole plant boiled and given to cow for increasing milk. Magico-religious beliefs, spiritual, seeds considered pious and used.)

Amaranthus tenuifolius Roxb. (*Amaranthus tenuifolius* Willd.; *Amaranthus tenuifolius* Wall.)

India.

See *Sp. Pl.*, ed. 4 [Willdenow] 4(1): 381. 1805

(Used in Ayurveda.)

in India: gholichi-bhaji

Amaranthus thunbergii Moq. (*Amaranthus thunbergii* sensu Suess. & Podl.)

Central, East and Southern Africa, Namibia. Herb, erect, ascending, weed, simple or branched, stout, angular, inflorescence an axillary cluster, capsule with a short beak below the stigmas, leaves and stems contain nitrate and also oxalate, leaf vegetable eaten fresh or dried, young plants and young tender shoots picked as a vegetable, fodder for livestock, occurs in disturbed habitats, resembles *Amaranthus graecizans*

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 262–263. 1849

(A tasty, tonic and nutritious vegetable while young. Less suitable for fresh consumption by humans and as fodder for animals, presence of a rather high content of hydrocyanic acid and oxalic acid. Herb infusion taken as blood purifier and to increase lactation.)

in English: Cape pigweed, pigweed, poor man's spinach, red devil, red pigweed, small pigweed

in Lesotho: thepe

in S. Rhodesia: mohwa

in Southern Africa: hanekam, hondebosch, kalkoenslurp, kraanvoëlbossie, misbredie, rooiduiwel, roomisbredie, sprinkaanbossie; imbuyu (Zulu); imbuyu (Swati); mohwa (Shona); theepe (Pedi); theepe (Sotho); uqupose (Xhosa)

in Tanzania: mchicha

India, Pakistan. Herbaceous, annual, cottony stems, purplish bottle-shaped heads, involucre bracts spiny

See *Dictionnaire des Sciences Naturelles* [Second edition] 44: 39. 1826, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 476. 1873 and *Scientist* iii. 29. 1959, *Taxon* 26: 107–109. 1977, *Taxon* 30: 514. 1981, *J. Cytol. Genet.* 24: 96–105. 1989, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Z. Naturforsch.* 59b, 579–583. 2004, *Chem. Pharm. Bull.* 53(1): 86–89. 2005

(Whole plant tonic, aperient, febrifuge, deobstruent, anti-cancer and antiviral, cytotoxic and antibacterial, slightly mucilaginous, used in coughs and as a febrifuge, also recommended for general debility; plant juice put in the nose for epilepsy. Strong to moderate inhibitory activity against tyrosinase. It is said to drive away noxious reptiles when kept in house.)

in English: sweet sultan

in India: barhawa

Amblyanthus A. DC. Myrsinaceae

From the Greek *amblys* 'blunt, obtuse' and *anthos* 'flower'.

Amblyanthus glandulosus (Roxb.) A. DC. (*Ardisia glandulosa* Roxb.)

India. Cooked as vegetable

See *Nova Genera et Species Plantarum seu Prodrum* 3, 48. 1788, *Flora Indica*; or descriptions of Indian Plants 2: 276. 1824, *Annales des Sciences Naturelles; Botanique*, sér. 2, 16: 79, 83, t. 2. 1841

(Stomachic.)

in India: jia herew, nonishang manbi

Amblygonocarpus Harms Fabaceae (Leguminosae, Mimosaceae, Mimoseae, Mimosoideae)

Greek *amblys* 'blunt, obtuse', *gonia* 'angle' and *karpos* 'fruit', pods with several blunt angles, see *J. Bot.* (Hooker) 4: 345. 1841, *Nat. Pflanzenfam.* Nachtr. II-IV [Engler & Prantl] 1: 191. 1897, *Bot. Jahrb. Syst.* 26(3–4): 255. 1899.

Amblygonocarpus andongensis (Welw. ex Oliv.) Exell & Torre (*Amblygonocarpus obtusangulus* (Welw. ex Oliver) Harms; *Amblygonocarpus obtusangulus* (Oliv.) Harms; *Amblygonocarpus obtusangulus* Harms; *Amblygonocarpus schweinfurthii* Harms; *Amblygonocarpus tetragonolobus* Exell & Torre; *Tetrapleura andongensis* Oliv.; *Tetrapleura andongensis* Welw. ex Oliv.; *Tetrapleura andongensis* var. *schweinfurthii* (Harms) Aubrev.; *Tetrapleura obtusangula* Welw. ex Oliv.) (the species was collected by Welwitsch in Lower Guinea at Pungo Andongo)

Tropical Africa. Perennial non-climbing tree, inflorescence an axillary raceme, white flowers, oblong woody indehiscent pod, roasted seeds eaten

See *Flora of Tropical Africa* [Oliver et al.] 2: 331. 1871, *Bot. Jahrb. Syst.* 26(3–4): 255–256, in obs. 1899 and *Boletim da Sociedade Broteriana*, ser. 2 29: 42. 1955

(The inner bark, roots and seeds recorded to be poisonous. Fruit tonic and stimulant, anticonvulsant, wound dressing, powdered pods to treat skin diseases, inflammation. Leaf extract for stomachache. Bark used as an antidote for snake-bites; bark pounded and mixed with honey or sugar or sugarcane juice then drunk to treat poisoning; bark decoction applied to sores. Decoction of roots emetic, vermifuge, for fevers and malaria, food poisoning, colic, cough. Powdered pods used against termites. Powdered pods or crushed fruit used as a fish poison.)

in English: Scotsman's rattle

(Dermatitis. Analgesic, antidiarrheal, antihemorrhagic, laxative, cytotoxic; leaves infusion for stomachache; leaves and stems infusion taken for bowel pains and bloody stools, for colds, constipation; heated leaves poultice applied to aching joints, sore eyes. Sesquiterpene lactones. Cumanin shows a potent inhibitory effect in NO (nitric oxide) production with low cytotoxicity. Veterinary medicine, plant decoction a wash for sores on horses.)

Common names: cuman ragweed, perennial ragweed, western ragweed

Ambrosia pumila (Nutt.) A. Gray (*Franseria pumila* Nutt.)

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 344–345. 1840, *Proceedings of the American Academy of Arts and Sciences* 17: 217. 1882

(Sesquiterpene lactones.)

in English: San Diego ambrosia

Ambrosia salsola (Torr. & A. Gray) Strother & B.G. Baldwin (*Hymenoclea salsola* Torr. & A. Gray) (*Hymenoclea* Torrey & A. Gray, membrane enclosed, from the Greek *hymen* ‘a membrane’ and *kleis* ‘lock, key’, *kleio* ‘to close, confine’, referring to the bur.)

USA, California.

See Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance* from Fort Leavenworth in Missouri to San Diego in California: including part of the Arkansas, Del Norte, and Gila Rivers. Washington, 1848, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 79. 1849 and *Madroño* 49(3): 143. 2002

(Stem or herbage infusion used to relieve pain in the lungs and trachea, and to reduce swellings.)

in English: cheeseweed, winged ragweed

in California: burrobrush

Ambrosia scabra Hook. & Arn.

Latin America.

See *Parasitol. Res.* 98(4): 370–374. 2006

(Against intermittent fevers and worms. Trypanocidal.)

Vernacular names: ajenjo del campo, altamisa, artemisa

Ambrosia tenuifolia Spreng.

North America. Herb, annual, stalks and roots eaten

See *Systema Vegetabilium*, editio decima sexta 3: 851. 1826 and *American Journal of Botany* 66: 173–178. 1979, *Darwiniana* 27: 169–178. 1986, *Parasitol. Res.* 98(4): 370–374. 2006

(Stimulant, vermifuge, trypanocidal, antineuralgic, for gastrointestinal pains, to facilitate delivery of the placenta after childbirth, against intermittent fevers and worms. Sesquiterpene lactones.)

Vernacular names: ajenjo del campo, altamisa, artemisia, saltamisa

in English: lacy ambrosia, slimleaf bur ragweed, slimleaf burr ragweed

Ambrosia tomentosa Nutt. (*Franseria discolor* Nutt.; *Franseria tomentosa* (Nutt.) A. Nelson, nom. illeg., non *Franseria tomentosa* A. Gray; *Gaertneria discolor* (Nutt.) Kuntze; *Gaertneria tomentosa* (Nutt.) A. Nelson, nom. illeg., non *Gaertneria tomentosa* (A. Gray) Kuntze; *Xanthidium discolor* (Nutt.) Delpino)

North America.

North America. Herb, subshrub, annual

See *Species Plantarum* 2: 987–988. 1753, *Species Plantarum*. Editio quarta 4(1): 375. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 527. 1836, *A Flora of North America*: containing ... 2(2): 290. 1842, *Linnaea* 22(2): 156. 1849 and *Rhodora* 40(477): 347–348. 1938, *Taxon* 30: 515–516. 1981, *Taxon* 31: 575, 583–587. 1982, *Arch. Dermatol. Res.* 277(1): 28–35. 1985 [The sensitizing capacity of Compositae plants. VI.], *Arch. Dermatol.* 123(4): 500–2. 1987, *J. Allergy Clin. Immunol.* 84(3): 353–8. 1989, *Folia Geobotanica et Phytotaxonomica* 26(3): 225–368. 1991, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995, *J. Immunol.* 161(4): 2032–7. 1998, Moerman, Daniel E. *Native American ethnobotany*. 66–67. 1998, *Bulletin of Botanical Research* 19(1): 48–51. 1999

(Dermatitis and hay fever, a contact dermatitis. Leaves astringent, emetic, disinfectant, febrifuge, antidiarrheal; decoction of plants taken for diarrhea with bleeding; crushed leaves rubbed on insect sting, leaves infusion for fever, pneumonia. Ceremonial medicine, root chewed to drive away fear at night.)

in English: bitter-weed, buffalo-weed, crown-weed, giant ragweed, great ragweed, high ragweed, horse-weed, king's-head, tall ambrosia, tall ragweed, wild hemp

Ambrosia trifida L. var. *trifida* (*Ambrosia trifida* L. var. *integrifolia* (Muhl. ex Willd.) Torr. & A. Gray)

North America. Herb, subshrub, annual

See *Species Plantarum* 2: 987–988. 1753, *Species Plantarum*. Editio quarta 4(1): 375. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 527. 1836, *A Flora of North America*: containing ... 2(2): 290. 1842, *Linnaea* 22(2): 156. 1849 and *Rhodora* 40(477): 347–348. 1938, *Taxon* 30: 515–516. 1981, *Taxon* 31: 575, 583–587. 1982, *Arch. (Dermatitis and hay fever, a contact dermatitis. Leaves astringent, emetic, disinfectant, febrifuge, antidiarrheal; decoction of plants taken for diarrhea with bleeding; crushed leaves rubbed on insect sting, leaves infusion for fever, pneumonia. Ceremonial medicine, root chewed to drive away fear at night.)

in English: bitter-weed, buffalo-weed, crown-weed, giant ragweed, great ragweed, high ragweed, horse-weed, king's-head, tall ambrosia, tall ragweed, wild hemp

Amburana Schwacke & Taubert Fabaceae (Sophoreae)

The name of the timber, *amburana*, *imburana* or *umburana*, in Tropical S. America, see *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(3): 387. 1894 and *Tropical Woods* 62: 28–31. 1940, *Contr. Gray Herb.* 184: 91–102. 1958.

Amburana cearensis (Allemão) A.C. Smith (*Amburana acreana* (Ducke) A.C. Sm.; *Amburana cearensis* Fr. All.; *Amburana claudii* Schwacke & Taub.; *Torresea acreana* Ducke; *Torresea cearensis* Allemão; *Torresea cearensis* (Allemão) A.C. Smith)

Peruvian Amazon, Brazil. Perennial non-climbing tree, erect, multiple-trunked, reddish bark papery, bluish green membranaceous leaflets, flowers highly perfumed, corolla pinkish orange, single petal white tinged pink, stamens cream, ovary red, cut wood with a sweet perfumed scent, in primary forest

See *Trab. Comm. Sc. Expl. Ceara Secc. Bot.* 2: 17. 1862 and *Arquivos do Instituto de Biologia Vegetal* 1: 205. 1935, *Trop. Woods* 43:19–20. 1935, *Field Museum of Natural History, Botanical Series* 13(3/1): 243. 1943, *Phytomedicine* 4: 221–227. 1997, *Phytochemistry* 50(1): 71–74. 1999, *Pharmaceutical Biology* 41(4): 308–314. 2003, *Zeitschrift für Naturforschung. C, Journal of Biosciences* 58(9–10): 675–680. 2003, *Phytotherapy Research* 17(4): 335–340.

2003, *Life Sciences* 79(1): 98–104. 2006, *Basic & Clinical Pharmacology & Toxicology* 104(3): 198–205. 2009

(Antinociceptive, antimalarial and antiprotozoal, anti-inflammatory, bronchodilator, antiproliferative, antimutagenic, antioxidant and antitumor, anticarcinogenic, smooth muscle relaxant, cytotoxic, antimicrobial, hepatoprotective, trunk bark and seeds for rheumatism, fevers, asthma and respiratory tract diseases.)

in South America: cerejeira, cumare, cumaru, cumaru de cheiro, imbarana de cheiro, imburana de cheiro, imburana do cheiro, ishpingo, palo trebol, robe del pais, roble, roble americano, tornillo, tsaik, umburana, umburana de cheira, umburana do cheiro, vilcataba

Amelanchier Medikus Rosaceae

The old French common name, see *Philosophische Botanik* 1: 140, 155. 1789.

Amelanchier alnifolia (Nutt.) Nutt. ex M. Roem. (*Amelanchier alnifolia* (Nutt.) Nutt.; *Amelanchier alnifolia* Nutt., nom. inval.; *Amelanchier alnifolia* var. *alnifolia*; *Amelanchier canadensis* var. *alnifolia* (Nutt.) Torr. & A. Gray; *Amelanchier sanguinea* var. *alnifolia* (Nutt.) P. Landry; *Aronia alnifolia* Nutt.)

North America. Tree or shrub, perennial, fruit used for food, berries eaten by bears and grouse

See *The Genera of North American Plants* 1: 306. 1818, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 22. 1834, *Familiarum Naturalium Regni Vegetabilis Monographicae* 3: 147. 1847 and *A Flora of North America: containing ...* 1(3): 473. 1940, *Bulletin de la Société Botanique de France* 122(5–6): 249. 1975, *Phytochemistry (Oxf.)*, 17: 803. 1978, *J. Range Manage.*, 33: 197–199. 1980, *Can. Vet. J.*, 21: 74–76. 1980, Majak, W., McDiarmid, R.E., Hall, J.W. “The cyanide potential of Saskatoon serviceberry (*Amelanchier alnifolia*) and chokecherry (*Prunus virginiana*).” *Can. J. Anim. Sci.*, 61: 681–686. 1981, *Taxon* 31(2): 344–360. 1982, M.R. Gilmore, *Uses of Plants by the Indians ...* 35. 1991

(Cathartic, purgative, mild laxative, febrifuge, contraceptive, tonic. Bark decoction for stomachache. Branches decoction taken for colds. Berry juice decoction used for eardrops, stomachache. Roots decoction for cough, chest pains and lung infections. The shrub has a hydrogen cyanide (prunasin) potential high enough to kill cattle and mule deer. Ceremonial, magic, ritual. Veterinary medicine, wood used for lame horses.)

in North America: gray wood, haz-shutsh, June berry, red fruit, Saskatoon, Saskatoon serviceberry, serviceberry, western serviceberry, wipazuka

Amelanchier alnifolia (Nutt.) Nutt. ex M. Roem. var. *alnifolia*

North America. Tree or shrub, perennial, fruit used for food, berries eaten by bears and grouse

See *The Genera of North American Plants* 1: 306. 1818, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 22. 1834, *Familiarum Naturalium Regni Vegetabilis Monographicae* 3: 147. 1847 and *A Flora of North America: containing ...* 1(3): 473. 1940, *Bulletin de la Société Botanique de France* 122(5–6): 249. 1975, *Phytochemistry (Oxf.)*, 17: 803. 1978, *J. Range Manage.*, 33: 197–199. 1980, *Can. Vet. J.*, 21: 74–76. 1980, Majak, W., McDiarmid, R.E., Hall, J.W. “The cyanide potential of Saskatoon serviceberry (*Amelanchier alnifolia*) and chokecherry (*Prunus virginiana*).” *Can. J. Anim. Sci.*, 61: 681–686. 1981, *Taxon* 31(2): 344–360. 1982, M.R. Gilmore, *Uses of Plants by the Indians ...* 35. 1991

(Cathartic, purgative, mild laxative, febrifuge, contraceptive, tonic. Bark decoction for stomachache. Branches decoction taken for colds. Berry juice decoction used for eardrops, stomachache. Roots decoction for cough, chest pains and lung infections. The shrub has a hydrogen cyanide (prunasin) potential high enough to kill cattle and mule deer. Ceremonial, magic, ritual. Veterinary medicine, wood used for lame horses.)

in North America: gray wood, haz-shutsh, June berry, red fruit, Saskatoon, Saskatoon serviceberry, serviceberry, western serviceberry, wipazuka

Amelanchier alnifolia (Nutt.) Nutt. ex M. Roem. var. *semiintegrifolia* (Hook.) C.L. Hitchc. (*Amelanchier alnifolia* (Nutt.) Nutt. ex M. Roem. subsp. *florida* (Lindl.) Hultén; *Amelanchier florida* Lindl.; *Amelanchier ovalis* var. *semiintegrifolia* Hook.; *Amelanchier oxyodon* Koehne)

North America. Tree or shrub, perennial, berries for food

See *Flora Boreali-Americana* 1(4): 202. 1832 and *Vascular Plants of the Pacific Northwest* 3: 94. 1961

(Decoction taken for gonorrhoea.)

in English: Pacific serviceberry, Saskatoon serviceberry

Amelanchier arborea (F. Michx.) Fernald (*Amelanchier arborea* var. *arborea*; *Amelanchier canadensis* Wiegand. non (L.) Medik.; *Amelanchier oblongifolia* (Torr. & A. Gray) M. Roem.; *Mespilus arborea* F. Michx.)

North America. Tree or shrub, perennial, berries used for food

See *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 3(1): 68–70, pl. 11. 1812 and *Rhodora* 43(515): 563. 1941

(Tonic, antidiarrheal, anthelmintic, astringent, taken for worms, gonorrhoea, diarrhea, postpartum remedy.)

in English: common serviceberry, downy serviceberry

Amelanchier arborea (F. Michx.) Fernald var. *arborea* (*Amelanchier oblongifolia* (Torr. & A. Gray) M. Roem.)

North America. Tree or shrub, perennial, berries used for food

See *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 3(1): 68–70, pl. 11. 1812 and *Rhodora* 43(515): 563. 1941

(Tonic, antidiarrheal, anthelmintic, astringent, taken for worms, gonorrhoea, diarrhoea, postpartum remedy.)

in English: common serviceberry, downy serviceberry

Amelanchier canadensis (L.) Medik. (*Amelanchier canadensis* var. *subintegra* Fernald; *Amelanchier lucida* Fernald; *Amelanchier oblongifolia* Roem.; *Mespilus canadensis* L.)

North America. Tree or shrub, perennial

(Anthelmintic, astringent, disinfectant, roots decoction taken for dysentery, women's complaints, to prevent miscarriage.)

in English: Canadian serviceberry, downy serviceberry, eastern serviceberry, shadbush

Amelanchier humilis Wiegand (*Amelanchier humilis* Wiegand var. *campestris* E.L. Nielsen; *Amelanchier humilis* Wiegand var. *compacta* E.L. Nielsen; *Amelanchier humilis* Wiegand var. *exserrata* E.L. Nielsen; *Amelanchier mucronata* E.L. Nielsen; *Amelanchier stolonifera* auct. non Wiegand. p.p.)

North America. Shrub, perennial, juicy fruit used for food

See *Rhodora* 14(163): 141–143, pl. 95, f. 2A–G. 1912

(Root tonic.)

in English: low serviceberry

Amelanchier laevis Wiegand (*Amelanchier arborea* subsp. *laevis* (Wiegand) S.M. McKay ex P. Landry; *Amelanchier arborea* var. *cordifolia* (Ashe) B. Boivin; *Amelanchier arborea* var. *laevis* (Wiegand) H.E. Ahles; *Amelanchier laevis* var. *nitida* (Wiegand) Fernald; *Amelanchier* × *grandiflora* Rehder)

North America. Tree or shrub, perennial, fruit used for food

See *Rhodora* 14(163): 154–158, pl. 96, f. 7A–G. 1912, *Journal of the Elisha Mitchell Scientific Society* 80(2): 172. 1964, *Bulletin de la Société Botanique de France* 122(5–6): 247. 1975

(Infusion of bark taken by pregnant women.)

in English: Allegheny serviceberry, smooth serviceberry

Amelanchier pallida Greene (*Amelanchier alnifolia* subsp. *pallida* (Greene) A.E. Murray; *Amelanchier alnifolia* subsp. *siskiyouensis* (C.K. Schneid.) A.E. Murray; *Amelanchier alnifolia* subsp. *subintegra* (Greene) A.E. Murray; *Amelanchier alnifolia* (Nutt.) Nutt. ex M. Roem. var. *pallida* (Greene) Jeps.; *Amelanchier florida* Lindl. var. *gracilis* (A. Heller) M. Peck; *Amelanchier gracilis* A. Heller; *Amelanchier oreophila* A. Nelson; *Amelanchier siskiyouensis* C.K.

Schneid.; *Amelanchier subintegra* Greene; *Amelanchier utahensis* Koehne)

North America. Tree or shrub, perennial, fruit used for food

See *Flora Franciscana* 1: 53. 1891 and *Pittonia* 5: 109. 1903, *Illustriertes Handbuch der Laubholzkunde* 1: 735. 1906, *A Manual of the Flowering Plants of California ...* 509–510. 1925, *Kalmia* 12: 18. 1982

(Decoction of boiled roots taken for women's complaints. Ceremonial.)

in English: pale serviceberry, pallid service berry, Utah service-berry, sarvis, Western service berry, Western serviceberry

Amelanchier stolonifera Wiegand (*Amelanchier canadensis* var. *stolonifera* (Wiegand) P. Landry; *Amelanchier spicata* auct. non (Lam.) K. Koch p.p.)

North America. Shrub, perennial, juicy fruit used for food

See *Rhodora* 14(163): 144–147, pl. 95, f. 4A–G. 1912, *Bulletin de la Société Botanique de France* 122(5–6): 248. 1975, *Rhodora* 80: 483–493. 1980, *American Journal of Botany* 74: 321–328. 1987

(Root bark used as a tonic.)

in English: juneberry, Quebec berry, running serviceberry, serviceberry

Amelanchier utahensis Koehne

North America. Tree or shrub, perennial, juicy fruit used for food

See *Die Gattungen der Pomaceen* 25, pl. 2, f. 20c. 1890, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 679. 1895

(Used during labor and delivery. Ceremonial, magic, ritual, leaves emetic.)

in English: Utah serviceberry

Amelanchier utahensis Koehne var. *utahensis* (*Amelanchier alnifolia* var. *oreophila* (A. Nelson) R.J. Davis; *Amelanchier alnifolia* var. *utahensis* (Koehne) M.E. Jones; *Amelanchier australis* Standl.; *Amelanchier bakeri* Greene; *Amelanchier goldmanii* Woot. & Standl.; *Amelanchier mormonica* C.K. Schneid.; *Amelanchier oreophila* A. Nelson; *Amelanchier utahensis* var. *utahensis*)

North America. Tree or shrub, perennial, juicy fruit used for food

See *Die Gattungen der Pomaceen* 25, pl. 2, f. 20c. 1890, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 679. 1895

(Used during labor and delivery. Ceremonial, magic, ritual, leaves emetic.)

in English: Utah serviceberry

Amentotaxus Pilger Taxaceae (Amentotaxaceae, Cephalotaxaceae)

Latin *amentum* 'a strap, thong, catkin' plus *Taxus*, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54(1): 41. 1916

Amentotaxus assamica D.K. Ferguson (*Amentotaxus yunnanensis* H.L. Li var. *assamica* (Ferguson) Silba)

India, Himalaya.

See *Kew Bulletin* 40(1): 115. 1985, *Phytologia* 68(1): 25. 1990 (Tonic.)

Amentotaxus formosana H.L. Li (*Amentotaxus yunnanensis* H.L. Li var. *formosana* (H.L. Li) Silba)

China, Taiwan. Tree, aril reddish yellow, seed reddish purple, listed as the most endangered plants in the world

See *J. Bot.* 21: 357. 1883 and *Bot. Jahrb. Syst.* 54: 41. 1916, *Journal of the Arnold Arboretum* 33(2): 195–197. 1952, *Acta Phytotax. Sin.* 22: 492. 1984, *Fam. Gen. Vasc. Pl.* 1: 299–302. 1990, *Phytologia* 68(1): 25. 1990, *Planta medica* 71(4): 344–348. 2005

(Heartwoods and barks antiinflammatory.)

in China: tai wan sui hua shan

Amentotaxus yunnanensis H.L. Li (*Amentotaxus argotaenia* (Hance) Pilger var. *yunnanensis* (H.L. Li) P.C. Keng)

China. Tree, ovate crown, aril reddish purple

See *J. Arnold Arbor.* 33(2): 197–198. 1952, *Rep. 1957 Anniv. Nanjing Univ.* (2) 7: 451. 1957, *Journal of Natural Products* 66(7): 1002–1005. 2003

(Biflavonoid sotetsuflavone, amentoflavone biflavonoid, sequoiaflavone, sequoyitol.)

in China: yun nan sui hua shan

in Vietnam: sam bông, thông tre vân nam

Amethystea L. Lamiaceae (Labiatae)

Greek *amethystos*, a kind of herb of vine, referring to the color of the flowers, violet-blue; Greek *amethystos* 'not drunken', a 'negative' and *methyo*, *methyein* 'drunken'.

Amethystea caerulea L. (*Amethystea corymbosa* Pers.; *Amethystea trifida* Hill; *Lycopus amethystinus* Steven)

S. Siberia to Japan.

See *Species Plantarum* 1: 21. 1753, *Veg. Syst.* 17: 44. 1770, *Syn. Pl.* 1: 24. 1805, *Mém. Soc. Imp. Naturalistes Moscou* 5: 341. 1814 and *Botaniceskij Žurnal SSSR* 71: 195–200. 1986, *Regnum Veg.* 127: 17. 1993, *Botaničeskij Žurnal (Moscow & Leningrad)* 80(3): 85–88. 1995

(Used medicinally for perspiration.)

in English: skyblue amethystea

in China: shui ji zhen

Amianthium A. Gray Melanthiaceae (Liliaceae)

Latin *amiantus*, Greek *amiantos* (unspotted, pure) 'the amianth', see *Annals of the Lyceum of Natural History of New York* 4: 121. 1837. *Amianthium* is frequently included in a broadly circumscribed *Zigadenus*.

Amianthium muscitoxicum (Walter) A. Gray (*Amianthium macrotax* Raf.; *Amianthium muscaetoxicum* (Walter) A. Gray; *Amianthium muscaetoxicum* A. Gray; *Anthericum subtrigynum* Jacq.; *Chrosperma laetum* (Sol.) Raf.; *Chrosperma muscitoxicum* (Walter) Kuntze; *Chrysosperma muscatoxicum* (Walter) Kuntze; *Crosperma laeta* (Sol.) Raf.; *Crosperma phalangioides* (Desr.) Raf.; *Endocles laetum* (Sol.) Salisb., nom. inval.; *Helonias erythrosperma* Michx.; *Helonias laeta* (Sol.) Ker Gawl.; *Leimanthium laetum* (Sol.) Willd.; *Leimanthium pallidum* Willd.; *Melanthium laetum* Sol.; *Melanthium muscitoxicum* Walter; *Melanthium myoconum* J.F. Gmel.; *Melanthium phalangioides* Desr.; *Zigadenus muscitoxicus* (Walter) Regel; *Zygadenus muscitoxicum* Regel)

North America. Herbaceous, perennial, grass-like basal leaves, leafy bracts on the stem, flowers white turning greenish then dark purple

See *Flora Caroliniana, secundum ...* 125. 1788, *Ann. Lyceum Nat. Hist. New York* 4: 121–122. 1837, *Synopsis Plantarum* 4: 180. 1843, *Revisio Generum Plantarum* 2: 708. 1891 and *Ann. Carnegie Mus.* 55: 481–504. 1986

(Poison, all parts of the plant are considered poisonous with the bulb being especially toxic. Highly toxic alkaloids found in roots and leaves have caused deaths in cattle and sheep. Used for itch. Root extracts, with sugar or honey, used as an insecticide to kill flies.)

in English: crow-poison, fly-poison, St. Elmo's-feather, staggergrass

Amischotolype Hassk. Commelinaceae

Greek *amischos* 'without stalk' and *tolype* 'a ball of wool, lump', referring to the inflorescence, see *Histoire naturelle, générale et particulière, des plantes* 8: 177. 1804, *Flora* 46: 391. 1863.

Amischotolype gracilis (Ridl.) I.M. Turner (*Forrestia gracilis* Ridl.) (*Forrestia* A. Rich., named for the English traveller and midshipman Thomas Forrest, c. 1729–c. 1802, a seaman of the East India Company, plant and nutmegs collector in Malay Archipelago; see M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 145–146. Dehra Dun 1985, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 255. London 1994.)

Malaya.

See *J. Straits Branch Roy. Asiat. Soc.* 41: 37. 1904, *Gard. Bull. Singapore* 45: 53. 1993

(Plant decoction for pains in the body. Roots for rheumatism.)

Malay names: setawa betina, tebu kera

Amischatolype hookeri (Hassk.) H. Hara (*Forrestia hookeri* Hassk.)

India, Himalaya. Shrub, petiolate oblanceolate leaves, minute flowers in heads, beaked capsules

See *Flora* 47: 629. 1864, *FBI* 6: 384. 1892 and *Flora of Eastern Himalaya* [H. Hara] 1: 399. 1966, *Curr. Sci.* 49: 151–152. 1980

(Roots paste applied on cuts.)

in China: jian guo chuan qiao hua

in India: chagakadua-khuan, chaha-lubaur, chaha-lubuar, chahalubor

Amischatolype mollissima (Blume) Hassk. (*Amischatolype glabrata* (Hassk.) Hassk.; *Amischatolype marginata* (Blume) Hassk.; *Amischatolype mollissima* Hassk.; *Amischatolype mollissima* var. *glabrata* (Hassk.) R.S. Rao; *Amischatolype mollissima* var. *marginata* (Blume) R.S. Rao; *Campelia glabrata* Hassk., nom. illeg.; *Campelia marginata* Blume; *Campelia mollissima* Blume; *Forrestia distans* Ridl.; *Forrestia glabrata* (Hassk.) Hassk.; *Forrestia marginata* (Blume) Hassk.; *Forrestia mollis* Hassk.; *Forrestia mollissima* (Blume) Koord.; *Forrestia rostrata* Hassk.; *Pollia purpurea* C.B. Clarke; *Tradescantia marginata* (Blume) Bouché)

Himalaya, Malesia. Herb, thick stem, hairy leaves, flowers in panicles

See *Medical Repository*, ser. 2, 3: 422. 1806, *Verh. Ges. Naturf. Freunde Berlin* 1: 392. 1819, *Enum. Pl. Javae* 1: 7. 1827, *Sert. Astrol.* 1. t. 1. 1834, *Flora* 46: 391–392. 1863, *Flora* 47: 628, 630–631. 1864 and *Maharashtra Vidnyan Mandir Patrika* 6(2): 53. 1971

(Root decoction in rheumatism. Plant juice used as poison on tips of arrows for hunting.)

Ammannia L. Lythraceae

Dedicated to the German physician Paul Ammann, 1634–1691, botanist and professor at Leipzig, his works include *Character Plantarum Naturalis* Lipsiae 1676, *Suppelleix Botanica* Lipsiae 1675 and *Hortus Bosianus* Lipsiae 1686. See Carl Linnaeus, *Species Plantarum* 1: 119–120. 1753 and *Genera Plantarum* Ed. 5. 55. 1754, *Primae Lineae Systematis Naturae* 86. 1834 and John H. Barnhart, *Biographical Notes upon Botanists.* 1: 51. 1965, *J. Arnold Arbor.* 66(4): 395–420. 1985.

Ammannia baccifera L. (*Ammannia aegyptiaca* Willd.; *Ammannia aegyptiaca* Kotschy ex Koehne; *Ammannia*

auriculata var. *subsessilis* (Willd.) Boiss.; *Ammannia baccifera* Roth; *Ammannia baccifera* Pollini; *Ammannia baccifera* subfo. *contracta* Koehne; *Ammannia baccifera* subsp. *baccifera*; *Ammannia baccifera* subsp. *viridis* (Willd. ex Hornem.) Koehne; *Ammannia discolor* Nakai; *Ammannia indica* Druce; *Ammannia indica* Lam.; *Ammannia vesicatoria* Roxburgh; *Ammannia vesicatoria* Roxb.; *Ammannia viridis* Willd. ex Hornem.; *Ammannia wormskioldii* Fisch. & C.A. Mey.; *Ammannia wormskioldii* var. *alata* Koehne)

Paleotropics. Herb, very variable, dwarf weed, emits a strong muriatic odor, weedy, erect, branched, slender, small greenish or purplish flowers borne in dense clusters in leaf axils, globular capsule, reddish black seeds, in rice fields, edges of pool, wet places, marshy sites

See *Species Plantarum* 1: 119–120. 1753, *Fl. Ind.* (Carey & Wallich, eds.) 1: 447 (–448). 1820, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(3): 253, 254. 1880 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 603. 1917, *Bot. Mag.* (Tokyo) 1921, xxxv. 133. 1921, *Taxon* 31: 576–579. 1982, *J. Arnold Arbor.* 66: 405. 1985, *African Journal of Biomedical Research* 10: 175–181. 2007

(Used in Ayurveda and Sidha. Whole plant for skin disorders; plant juice given internally in cases of spleen enlargement. Leaves irritant, caustic, rubefacient, poisonous, vesicant and acrid, expectorant, used for rheumatism, arthritis, fever, to raise blisters, herpetic eruptions, external remedy for ringworm and parasitic skin affection; leaves paste applied for the treatment of edema and skin diseases, abscesses, ulcers, eczema. Antibacterial, fresh leaves applied as a rubefacient in skin diseases. Root decoction antiurolithic, to treat urinary stone and difficulty in urination; root paste for pregnant women to enhance lactation.)

in English: acrid weed, blistering ammannia, monarch red-stem, tooth cup

in Nigeria: tamfa

in Senegal: vakeñ

(Powered seeds used for pulmonary troubles, asthma, bronchitis, stomach problems.)

in China: yin ye sha ren

Amomum squarrosus Ridl.

Pen. Malaysia. Herb, rhizome, stilt roots, leaves narrowly lanceolate, inflorescence oblong, bracteoles funnel-shaped, flowers with corolla tube shorter than calyx, labellum distinctly 3-lobed white, anther with a 3-lobed appendage, fruit smooth or slightly ribbed towards the apex, in the lowland

See *J. Straits Branch Roy. Asiat. Soc.* 57: 104. 1910, *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984

(Flowers made into a poultice applied to the head to treat giddiness.)

in Malaysia: puar tadah embun

Amomum stenocarpum Valetton

Indonesia, Sumatra. Herb, leaves lanceolate, inflorescence elongate, bracts persistent, greenish fruit narrowly fusiform, in secondary forest

See *Bulletin du Jardin Botanique de Buitenzorg, Série III*, 2: 354–356. 1920

(The stem juice used to treat cough.)

in Indonesia: kaol haol

Amomum subulatum Roxb. (*Cardamomum subulatum* (Roxb.) Kuntze; *Cardamomum subulatum* Kuntze)

Nepal, Himalayas, China. Rhizomatous herb, leafy shoots, inflorescence a dense globose spike on a short peduncle, flower with yellow-white emarginate labellum much longer than corolla segments, fruit a globose capsule red-brown densely covered with soft outgrowths, in the lower mountains, along watercourses

See *Fl. Ind.* 1: 43. 1820, *Revis. Gen. Pl.* 2: 687. 1891 and Burt, B.L. & Smith, R.M. “Notes on Malesian Zingiberaceae.” *Notes from the Royal Botanic Garden Edinburgh* 31: 307–316. 1972

(Used in Ayurveda, Unani and Sidha. Seeds astringent, aromatic, hypnotic, cardiogenic, blood purifier, carminative, diuretic, aphrodisiac, stimulant, stomachic, used in neuralgia, gonorrhoea, anorexia, eye inflammation, fever, cold, chill, malaria, neuralgia, diarrhoea, gonorrhoea, headache, impotence, dyspepsia, vomiting, antidote to scorpion sting and snakebite, a gargle in affections of the teeth and gums; fried powdered seeds given with water in cholera; seeds decoction

given in abdominal pain and in heart and liver disorders; powdered seeds used in cough, vomiting, rectum diseases. Crushed fruit applied over the area affected by a scorpion bite, also given to eat.)

in English: alligator pepper, Bengal cardamom, greater cardamom, Nepal cardamom, winged cardamom

in India: achaouba, adavi-ellakkay, aindri, arivalukam, arugasani, arukacani, arukeceni, bada elaichi, badi elaichi, badi elaichi chilka, badi ilayaci, bahula, bala, balavati, bara elachi, bari, bari-elachi, bari elaichi, bari ilachi, bari ilayaci, bhadra, bhadraila, brhadaela, brhadela, brihadaela, brihat-upa-kunchika, brihat-upakun-chika, candrabala, cantrikai, chandra-bala, cukanticaparanam, curppitakam, divyagandha, dodda aelakki, dodda yaalakki, dodda-yalakki, dodda yelakki, doddayalakki, doddayelaki, ela, ela arisi, elachi, elaichi, elaichi achouba, elaichi badi, elaichi badikadana, elaichi kalan, elavalukai, elavalukam, garbhasambhava, ghritachi, ghrtachi, goputa, habb-el-hal, hailkallan, harena, heel kalan, hel kubar, hel zakar, hel-zakar, helzakar, ilacih kalan, ilaichi kalan, ilaichi kalan kofta, ilaichi kalan nim kofta, ilayachikal-lan, indrani, iravati, iravatikaceti, iravatikam, kahlekhabar, kanta, kanyakumari, kattelam, kattu elam, kattu-yelak-kay, kattu yelam, kayastha, ksudraila, kumari, kuntikaceti, kuntikam, maccakuttam, mahila, malaiyelam, maleya, malukam, mayileyam, moto-eldori, moteveldode, nishkuti, pedda-elakkay, peddayelaki, perelam, peri-elav, periya elam, periya-elattari, periyaelakkay, periyaelam, periyayelakay, periyayelam, poast ilaichi sokhta-kalan, prithvi, qaqilah-e-kalan, qaqilah kubar, qakilaha-kalan, qakilaha-zakar, qaqilahekahan, qaqilahezakar, qakilaha-kibar, qaqilhahekibar, sambhava, sandirigai, sthulaela, sthulaila, surabhitvaka, tadaphala, thengu yalakkulu, thorveldoda, tivviyakantam, tridivodbhava, tripura, verppelakaceti, verppelakam

in Lepcha: tung brap

in Nepal: alaichi

in Tibet: pa tra e la

Amomum testaceum Ridl. (*Amomum krervanh* Pierre ex Gagnepain)

Thailand, Cambodia, China, Pen. of Malaysia, Borneo, Sabah. Herb, leafy stem, perennial spreading rootstock, superficial rhizome, leaves distichous, flowers in dense spikes, flowers with corolla tube about as long as calyx, 3-lobed anther appendage, brownish-white round globular smooth ribbed capsule, seeds aromatic, thin white aril, a condiment and spice, in damp places, in mountainous regions

See *J. Straits Branch Roy. Asiat. Soc.* 32: 135. 1899 and *Bull. Soc. Bot. France* 53: 138 1906, *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984, Larsen, K. “A preliminary checklist of the Zingiberaceae of Thailand.” *Thai Forest Bulletin (Botany)* 24: 35–49. 1996, *Taiwania* 53(1): 6–10. 2008

(Leaves stomachic, carminative, febrifuge, expectorant, for headache and fever. Fruit used for abdominal distension,

indigestion, liver and uterus diseases, rheumatism, diarrhea and dysentery, and as febrifuge, antiemetic, anti-flatulence, blood circulation tonic. Seeds for stomachache, diarrhea. Root bark expectorant and stomachic, used for skin diseases.)

in English: Cambodian cardamom, cluster cardamom, round cardamom, round Siam cardamom, Thai cardamom

in Cambodia: karvanh, kreko krervanh, krewanh

in China: bai dou kou, pai tou k'ou

in Malaysia: ka tepus

in Thailand: krawaan, krawaan chan, krawaan dam, krawaan khaao, krawaan pothisat, plah ko

in Vietnam: b[aj]ch d[aa]ju kh[aas]u, sa nh[aa]n nam vang

Amomum tsaoko Crevost & Lem. (*Amomum hongtsaoko* C.F. Liang & D. Fang; *Amomum tsao-ko* Crevost & Lem.)

China, Vietnam. Aromatic, corolla orange-red

See *Cat. Prod. Indo-Chine* 300. 1917, *Acta Phytotax. Sin.* 16(3): 50–51, pl. 4, f. 4. 1978, *Guihaia* 8: 143–147. 1988, *Journal of Chinese Medicinal Materials* 23(3): 145–148. 2000, *Journal of Ethnopharmacology* 90(2–3): 389–395. 2004, *J. Nat. Prod.* 67: 889–891. 2004, *Current Bioactive Compounds* 1(1): 36–48. 2005, *Thrombosis Research* 122(6): 804–809. 2008

(Carminative, astringent, pungent, antifungal, for stomach and spleen problems, anorexia, nausea, vomiting, diarrhea, malaria.)

in China: cao guo

Amomum uliginosum J. König (*Amomum robustum* K. Schum.; *Cardamomum uliginosum* (J. König) Kuntze; *Cardamomum uliginosum* Kuntze; *Wurfbainia uliginosa* Giseke; *Wurfbainia uliginosa* (J. König) Giseke)

Myanmar, Pen. Malaysia. Herb, subterranean many-branched rhizome, leaves narrowly lanceolate, small globose inflorescence, bracteoles tubular at the base, white labellum ovate and strongly concave, anther with a 3-lobed appendage, spreading side lobes, fruit covered by soft red spines, in lowland forest, on river banks

See *Prael. Linn.* 199, 206. 1792 and *Notes from the Royal Botanic Garden, Edinburgh* 41: 541–559. 1984

(Rhizomes stomachic, vermifuge.)

in Malaysia: puar gajah, puar hijau, tepus merah

in Thailand: krawaan paa

Amomum villosum Lour. (*Elettaria villosa* (Lour.) Miq.; *Cardamomum villosum* (Lour.) Kuntze; *Cardamomum villosum* Kuntze; *Zingiber villosum* (Lour.) Stokes)

China, Indochina. Herb, thick rhizome, leaves narrowly ovate-lanceolate, inflorescence ascending, bracts membranous, bracteoles tubular at the base, corolla tube slightly

longer than calyx, labellum spoon-shaped white, anther with a 3-lobed appendage, fruit reddish-brown covered by small flexuous spines, in forest, in mountainous areas, on wet soils

See *Flora Cochinchinensis* 1: 4. 1790, *Revis. Gen. Pl.* 2: 687. 1891 and *Acta Botanica Sinica* 24: 226–230. 1982, Zhou, S. “Cultivation of *Amomum villosum* in tropical forests.” *Forest Ecology and Management* 60(1–2): 157–162. 1993

(Used in Ayurveda. Fruits used to treat indigestion, stomachache, diarrhea, flatulence, toothache, and as febrifuge, blood circulation tonic and antiseptic.)

in English: Malabar cardamom, Tavoy cardamom

in China: yang ch'un sha

in Thailand: reo dong

in Vietnam: co nenh, d[uw][ow]ng xu[aa]n sa, la ve, mac neng, me tre ba, m[ef] tr[es] b[af], pa dooc, sa nhan, sa nh[aa]n

Amomum villosum Lour. var. *xanthioides* (Wall. ex Baker) T.L. Wu & S.J. Chen (*Amomum villosum* var. *nanum* H.T. Tsai & S.W. Zhao; *Amomum xanthioides* Wall. ex Baker)

China, Indochina. Herb, thick rhizome, leaves narrowly ovate-lanceolate, inflorescence ascending, bracts membranous, bracteoles tubular at the base, corolla tube slightly longer than calyx, labellum spoon-shaped white, anther with a 3-lobed appendage, fruit yellowish-green covered by small spines, in forest, in mountainous areas, on wet soils

See Hook.f., *Fl. Brit. India* 6(18): 239. 1892 and *Acta Phytotax. Sin.* 16(3): 38. 1978, *Acta Phytotax. Sin.* 17(4): 92, pl. 4. 1979, *J. Guangdong Bot. Soc.* 1: 27. 1983

(Used in Ayurveda. Fruits used to treat indigestion, diarrhea, flatulence, toothache, blood circulation tonic, and as febrifuge and antiseptic; fruit applied to treat cough, asthma and as an antiemetic. Seeds carminative, lactagogue, for nausea and vomiting. Leaves carminative and for urinary disorders.)

in English: bastard cardamom, Tavoy cardamom

in India: brhadela, elachi, elakulu, elam, ilayechi, kaadu aelakki, malakayelam

in Thailand: ma ee, ma maak ee, maak ee, maak naeng, maak neng, neak naeng, phaa laa, raew

in Vietnam: sa nh[aa]n, s[us]c sa m[aa]jt

Amoora Roxb. Meliaceae

Amur is a Bengali name for *Amoora cucullata* Roxb.; see William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. [The name Coromandel comes from a country and kingdom of the south of India about Tanjore, the country was called *Chola-mandala*, whence the name Coromandel.] 3: 54, t. 258. London 1795–1820 and John Dowson, *A Classical Dictionary of Hindu Mythology and Religion*,

Geography, History, and Literature. 73. London 1968, *Kew Bulletin*, Additional Series 16: 58. 1992.

Amoora wallichii King (*Aphanamixis wallichii* (King) Harid. & R.R. Rao)

India. Tree

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 64(2): 56. 1895 [1896 publ. 1895] and *Bull. Bot. Surv. India* 24(1–4): 212. 1982 (publ. 1983), *Forest Flora of Meghalaya* 206. 1985, *Indian J. Forest.* 9(3): 271. 1987 [1986 publ. 1987]

(Used for treatment of diarrhea and inflammation.)

in India: kinya

Amorpha L. Fabaceae (Amorpheae)

Greek *amorphos* ‘shapeless, deformed, without form’, referring to the flowers, one petal, see *Flora Americae Septentrionalis*; or, ... 2: 467. 1814[1813] and *Phytologia* 15(6): 329–446. 1967, *Rhodora* 77(811): 337–409. 1975.

Amorpha canescens Pursh (*Amorpha brachycarpa* Palmer; *Amorpha canescens* fo. *glabrata* (A. Gray) Fassett; *Amorpha canescens* var. *glabrata* A. Gray; *Amorpha canescens* var. *leptostachya* A. Gray; *Amorpha canescens* var. *leptostachya* Engelm. ex A. Gray, nom. nud.; *Amorpha canescens* var. *typica* C.K. Schneid.)

North America. Perennial non-climbing shrub, subshrub, usually branched, extensive root system, laced-shoestring look of leaves and roots, dark blue floral rays, highly palatable, sandy open woods and dry prairies

See *Catalogue of New and Interesting Plants Collected in Upper Louisiana* 1813, *Memoirs of the American Academy of Arts and Science*, new series 4: 31. 1849, *Smithsonian Contributions to Knowledge* 3(5): 49. 1852 and *Botanical Gazette* 43: 300. 1907, *Handb. Laubh.* 2: 70. 1907, *Rhodora* 38(449): 191. 1936, *Taxon* 31(2): 344–360. 1982

(Infusion of leaves anthelmintic, used to kill pinworms, for eczema, cuts and open wounds. Root decoction for stomachache. Moxa of twigs or stems applied for rheumatism. Insect repellent.)

in English: bird’s tree, bird’s wood, buffalo bellow plant, false indigo, lead plant, leadplant, prairie shoestring, wild tea

Amorpha fruticosa L. (*Amorpha angustifolia* F.E. Boynton; *Amorpha angustifolia* (Pursh) F.E. Boynton; *Amorpha arizonica* Rydb.; *Amorpha bushii* Rydb.; *Amorpha croceolanata* P.W. (Used in Ayurveda. Corm powder with honey taken for duodenal and intestinal ailments and ulcers. Corms made into a paste with *Curcuma longa* and applied on cuts and wounds; corms and petioles made into a paste and applied on burns; *Amorphophallus bulbifer* rhizome paste mixed with leaves of *Litsea monopetala* and *Mikania micrantha* applied externally in stomachache.)

in India: amalavela, atyاملaparni, jangli suran kand, kaadu choorna gedde, kaadu kande gedde, kaadu soorana gedde, oul kachu, ran-suran

Amorphophallus commutatus (Schott) Engl. (*Amorphophallus commutatus* var. *anmodensis* Sivad. & Jaleel; *Amorphophallus commutatus* var. *wayanadensis* Sivad. & Jaleel; *Conophallus commutatus* Schott)

India. Herb, brownish yellow flowers densely crowded in a spadix, flowering shoots collected and used as vegetable, single-seeded fruits eaten and dispersed by both koel and bulbuls

See *Systema Naturae*, Editio Decima 2: 1068, 1076. 1759, *Bonplandia* (Corrientes) 7: 28. 1859, *J. Bot.* 16: 107. 1878, *Monogr. Phan.* [A. DC. & C. DC.] 2: 319. 1879, *Fl. Brit. India* [J.D. Hooker] 2(6): 576. 1879 and *Kew Bulletin* 40: 567–571. 1985, *Rheedea* 12(2): 159–168. 2002, *Journal of Ethnopharmacology* 102(2): 143–157. 2005

(Oxalates. Leaf paste of *Amorphophallus commutatus* and *Arisaema tortuosum* applied in snakebite.)

in English: dragon stalk yam

in India: bhutti, jangli, jimi kand, jimikand, jungli suran, sherla, shevla, shewla, ujomut, vajramuth, van jimikand

Amorphophallus dracontioides (Engl.) N.E. Br. (*Hydrosme dracontioides* Engl.)

Tropical Africa. Herb, fleshy tuber, flower with unpleasant odour, underground stem a famine food

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 461. 1893 and *Fl. Trop. Afr.* 8: 148. 1901

(Tuber irritant, used in preparing arrow poison.)

in Yoruba: akufodewa

Amorphophallus johnsonii N.E.Br. (*Amorphophallus accrensensis* N.E.Br.; *Amorphophallus purpureus* (Engl.) Engl. & Gehrm.; *Hydrosme purpurea* Engl.)

Tropical Africa. Herb, thornless, spathe purple above and creamy below

See *Fl. Trop. Afr.* [Oliver et al.] 8(1): 156. 1901, *Bull. Soc. Bot. France* 54(8): 25. 1907, *Pflanzenr.*, IV, 23C: 83. 1911

(Underground stem for rheumatism and snakebite.)

Amorphophallus konjac K. Koch (*Amorphophallus konjac* K. Koch ex N.E. Br., nom. nud.; *Amorphophallus konjac* K. Koch ex Matsum. & Hayata; *Amorphophallus mairei* H. Lévy; *Amorphophallus palmiformis* Durand ex Carrière; *Amorphophallus rivieri* Durieu; *Amorphophallus rivieri* Durieu ex Riviere; *Amorphophallus rivieri* Durand ex Carrière; *Amorphophallus rivieri* Durieu ex Carrière; *Amorphophallus rivieri* var. *konjac* (K. Koch) Engl.; *Brachyspatha konjac* (K. Koch) K. Koch; *Conophallus konjak* Schott; *Conophallus konniaku* Schott ex Fesca; *Hydrosme rivieri* (Durand ex Carrière) Engl.; *Proteinophallus rivieri* (Durand ex Carrière) Hook.f.; *Tapeinophallus rivieri* (Durand ex Carrière) Baill.)

China, Himalaya, Philippines. Herbaceous, perennial, large leaves, showy dark red spathe surrounding a large spadix, flowers foul-smelling

See *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 366. 1834, *Synopsis Aroidearum...* I 34. 1856, *Wochenschr. Gärtnerei Pflanzenk.* 1(4): 262. 1858, *Berliner Allgemeine Gartenzeitung* 166. 1858, *Genera Aroidearum exposita* 33. 1858, *Actes de la Société Linnéenne de Bordeaux* 28: 15. 1869, *Revue Horticole* 1871: 573. 1871, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 188. 1881, *Beitr. Dermatol.* 23(4): 386–389. 2006, *Comparative Biochemistry and Physiology—Part A: Molecular & Integrative Physiology* Vol. 150, Issue 3, Suppl.

1, July 2008, Page S183—Abstracts of the Annual Main Meeting of the Society of Experimental Biology, 6th–10th July 2008, Marseille, France

(Raw plant very toxic. Antiobesity activity of konjac flour; konjac glucomannan, a water-soluble dietary fiber extracted from the tubers. Roots oxytotic, sialagogue, febrifuge, anti-cancer. The sap of the flower produces marked itching; flowers febrifuge. Rhizome acrid when raw. Insecticidal.)

in English: devil's tongue, elephant foot, elephant-yam, leopard palm, snake palm, snake's tongue, umbrella arum

in China: ju ruo

in Japan: konnyaku

in Okinawa: kunyaku

in Philippines: bulangan, pungapung

in Vietnam: khoai n[uw]a

Amorphophallus margaritifer Kunth (*Arum margaritifera* Roxb.; *Plesmonium dubium* Schott; *Plesmonium margaritifera* Schott; *Plesmonium margaritifera* (Roxb.) Schott; *Plesmonium margaritifera* f. *minor* Engl.) (*Plesmonium* Schott, Greek *plesmone* 'being filled, satiety, repletion, abundance'.)

India. Perennial herbs, tuberous rootstock, spathe erect, spadix stipitate, male flowers at the top, female flowers at the base, subglobose fruits

See *Hort. Bengal.* 65. 1814, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 366–367. 1834, *Enum. Pl.* [Kunth] 2: 34. 1837, *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis.* I 34. 1856, *Prodr. Syst. Aroid.* 125. 1860 and *Taxon* 26(2/3): 337–338. 1977, *Aroideana* 20: 11–12. 1997

(Tuber paste applied on snakebites. Febrifuge, vermifuge, boiled corms eaten for the treatment of piles and its paste applied on bruises, swellings and toothache. Crushed seeds numb the nerves.)

in India: dheu, jamikand, oal

Amorphophallus maximus (Engl.) N.E. Br. (*Amorphophallus fischeri* N.E. Br.; *Amorphophallus fischeri* (Engl.) N.E. Br.; *Amorphophallus schliebenii* Mildbr.; *Corynophallus maximus* (Engl.) Kuntze; *Hydrosme maxima* Engl.; *Hydrosme maxima* Engl.)

Tropical Africa, Somalia. Herb, succulent, inflorescence greenish white, fetid smell, clusters of scarlet berries

See *Monographiae Phanerogamarum* 2: 323. 1879, *Revisio Generum Plantarum* 2: 741. 1891 and *Flora of Tropical Africa* 8: 157. 1901

(Poisonous. Febrifuge. Roots infusion in the treatment of headache, stomachache, menstrual pains.)

in Malawi: chiwamasika

in Tanzania: mtondeve, ulanga

Amorphophallus paeoniifolius (Dennst.) Nicolson (*Amorphophallus bangkokensis* Gagnep.; *Amorphophallus campanulatus* Decne.; *Amorphophallus campanulatus* Blume ex Decne.; *Amorphophallus campanulatus* (Roxb.) (Used in Ayurveda, Unani and Sidha. Corms caustic, stomachic and tonic, antiviral, carminative, hypotensive, antibacterial, antiinflammatory, antimycobacterial, present an acrid, irritant juice with itching properties; consumed in respiratory disorders, cholera, constipation, earache, pimples, piles, enlargement of spleen, asthma, elephantiasis, rheumatism, stomachache. Tubers and leaves contain calcium oxalate raphides, which can cause pruritus, erythema and whealing in those who handle them; chewing the raw tuber may cause a burning sensation in the mouth. Paste made of stem bark of *Grewia tiliaefolia* and *Helicteres isora* together with tuber of *Amorphophallus paeoniifolius* applied for bonesetting. Roots emmenagogue, used for boils and hemorrhoids. Poultices of corm antirheumatic, also used for hemorrhoids and snakebite; decoction of corm used externally for scorpion sting; corm and shoot cooked and eaten as a postpartum remedy, for treatment of post-delivery complications, in general weakness. Boiled rhizome mixed with curd taken internally for piles. Petioles crushed and the juice left to ferment in bamboo rods, then drunk to treat diarrhea and dysentery. Analgesic and antiprotease activities of *Amorphophallus campanulatus* tuber. Veterinary medicine, tuber paste applied to wounds of cattle.)

in English: elephant yam, elephant's foot, elephant's foot yam, Telinga potato, Telingo potato, Telugu potato, whitespot giant arum

in Cambodia: toal

Java, Philippines. Herb, perennial, dark green heart shaped leaves, flowers purplish-green

See *Rumphia* 1: 146, t. 35, 37. 1837, *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis*. I 35. 1856, *Fl. Brit. India* 6: 516.

1893 and *Japanese Journal of Tropical Agriculture* 48(1): 25–34. 2004

(Used to make the starchy gel known as konnyaku.)

in English: elephant yam, voodoo lily

in Indonesia: acung, cumpleng, iles-iles, lorkong, suweg

Ampelaster G.L. Nesom Asteraceae

Greek *ampelos* 'a vine' and *Aster*.

Ampelaster carolinianus (Walter) G.L. Nesom (*Aster carolinianus* Walter; *Aster scandens* J. Jacq. ex Spreng., nom. illeg.; *Lasallea caroliniana* (Walter) Semple & L. Brouillet; *Sitilias caroliniana* (Walter) Raf.; *Symphyotrichum carolinianum* (Walter) Wunderlin & B.F. Hansen; *Virgulus carolinianus* (Walter) Reveal & Keener)

North America. Vine, perennial, shrub, fragrant, pink purple flowers, invasive

See *Flora Caroliniana*, secundum ... 208. 1788, *Systema Vegetabilium*, editio decima sexta 3: 524. 1826, *Flora Telluriana* 2: 46–47. 1836[1837], *New Flora and Botany of North America* ... 4: 85. 1836[1838] and *Leaflets of Botanical Observation and Criticism* 1(1): 5. 1903, *Brittonia* 32: 233. 1980, *American Journal of Botany* 67(7): 1023. 1980, *Taxon* 30(3): 650. 1981, *Phytologia* 77(3): 250, 272. 1994[1995], *Novon* 11(3): 366. 2001

(For snakebites, itchy skin)

in English: climbing aster, climbing carolina aster

Ampelocissus Planchon Vitaceae

Greek *ampelos* 'a vine' and *kissos* 'ivy', referring to the foliage and to the alliance to the genus *Cissus* L.; see *Flora Cochinchinensis* 1: 96, 153–154. 1790, Jules Émile Planchon (1823–1888), *Les vignes américaines, leur culture, leur résistance au phylloxera et leur avenir en Europe*. Montpellier, C. Coulet; [etc., etc.] 1875, *Les vignes des tropiques du genre Ampelocissus*. [Lyon, 1885], *Monog. Phaner.* 5: 368. 1887 and *Fieldiana, Bot.* 24(6): 293–302. 1949, *Fl. Neotrop.* 80: 1–250. 2000.

Ampelocissus abyssinica (Hochst. ex A. Rich.) Planch. (*Ampelocissus abyssinica* Planch.; *Vitis abyssinica* Hochst. ex A. Rich.)

Tropical Africa.

See *Tentamen Florae Abyssinicae* ... 1: 112. 1847, *La Vigne Américaine* (et la Viticulture en Europe); sa culture, son avenir en Europe 9(1): 24. 1885

(Fruits used for colds, coughs.)

Ampelocissus africana (Lour.) Merr. (*Ampelocissus gourmaensis* A. Chev.; *Ampelocissus grantii* (Baker)

Planch.; *Ampelocissus mossambicensis* (Klotzsch) Planch.; *Ampelocissus schliebenii* Werderm.; *Ampelocissus volkensii* Gilg; *Botria africana* Lour.; *Vitis grantii* Baker; *Vitis mossambicensis* Klotzsch)

Tanzania. A shrubby climber or liana, thick root with red outer skin, leafy stipules, small flowers in dense round heads, branched tendrils, petals red brown to green yellow, round berries red purple, shiny brown seeds, in wooded grassland, riverine forests

See *Flora Cochinchinensis* 1: 154. 1790 and *Transactions of the American Philosophical Society*, new series, 24: 253. 1935

(Roots and flowers anthelmintic, for bronchitis. Roots pounded, soaked in water, boiled and drunk to treat intestinal worms and leprosy.)

in Tanzania: ghoe, mzabibu mwitu

in Yoruba: eteku

Ampelocissus araneosa (Dalzell) Gamble (*Ampelocissus araneosa* (Dalz. & Gibson) Planch.; *Cissus araneosa* N.A. Dalzell)

India. Climber

See *Bombay Fl.*: 41. 1861 and *Fl. Madras* 1: 230. 1918, *Archives of Phytopathology and Plant Protection* 38(3): 185–192. 2005

(Used in Ayurveda and Sidha. Antimicrobial.)

in India: asvakathara, kattuttiratcai

Ampelocissus arnottiana Planch. (*Ampelocissus arnottiana* Wight & Arn.)

India. Climbing shrub

See *Monographiae Phanerogamarum* 5: 379. 1887

(Antibacterial. Root gives strength to muscles; in *battisa*, a traditional formulation for women, particularly after childbirth. Tubers acrid.)

in India: asvakathara khata limba, lata limbu, narale, nara-nde, ran-dakho, saavira sambara, sambara balli

Ampelocissus barbata (Wall.) Planch. (*Ampelocissus barbata* Planch.; *Ampelocissus barbatus* (Wall.) Planch.; *Vitis barbata* Wall.)

India. Woody climber, forked tendrils, sessile flowers, globular berries

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 478. 1824, *Vigne Américaine et la Viticulture en Europe* 8(12): 375. 1884, *Monogr. Phan.* [A. DC. & C. DC.] v. (1887) 372. 1887

(Underground and tubers made into a paste rubbed for swellings and pain. Juice of stem for eye diseases; leaf juice dropped in eyes for conjunctivitis. Root paste with mustard oil applied to cure eczema.)

in India: chundura, jarila lahara, pinuh

Ampelocissus bombycina (Baker) Planch. (*Ampelocissus bombycina* Planch.; *Ampelocissus cinnamochroa* Planch.; *Cissus ferruginea* Willd. ex Roem. & Schult.; *Cissus ferruginea* E. Mey., nom. nud.; *Cissus rubrosetosa* Gilg & M. Brandt; *Cyphostemma rubrosetosum* (Gilg & M. Brandt) Desc.; *Vitis bombycina* Baker)

Tropical Africa. Herbaceous vine, twiner, climber, trailing, subwoody stem, leaves herbaceous or subcoriaceous, receptacle purplish-red, petals and filaments purplish-red, orange edible grape-like fruits

See *Zwei Pflanzegeografische Dokumente* (Drège) 173. 1843, *Flora of Tropical Africa* [Oliver et al.] 1: 399. 1868, *Vigne Américaine et la Viticulture en Europe* 9(1): 31. 1885, *Monogr. Phan.* [A. DC. & C. DC.] 5: 469. 1887 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 458, 532. 1912 (1911–1912), *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 124. 1960, *Naturalia monspeliensia*. Série botanique. 18: 227. 1967

(Leaves used for colds.)

in Yoruba: eko pupa

Ampelocissus filipes Planch.

Tropical Asia. Climbing liana

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 407. 1887

(Young leaves crushed and applied as a poultice to fresh wounds and cuts.)

in Indonesia: udu sekiput lulut

Ampelocissus imperialis Planch.

Tropical Asia. Woody climbing liane

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 408. 1887

(Young leaves crushed and applied as a poultice to fresh wounds and cuts.)

in Indonesia: aka barep, udu aka pute ndak

Ampelocissus indica (L.) Planch. (*Ampelocissus indica* Planch.; *Vitis indica* L.)

India.

See *Species Plantarum* 1: 202. 1753, *Vigne Américaine et la Viticulture en Europe* 8: 375. 1884

(Used in Ayurveda. For gonorrhoea, bronchitis, diuretic, blood purifier. Roots for skin diseases.)

in India: chemballikande, kemballi, kolejan, naarande, narale, nardel, narude, ran draaksha, rata bawlat h vael, rata bwlath wal, sambaaravalli, schembra-valli

Ampelocissus latifolia (Roxb.) Planch. (*Vitis latifolia* Roxb.; *Vitis latifolia* Raf.)

India. Vine, herbaceous climber, ripe fruits eaten by the children

See *Species Plantarum* 1: 202–203. 1753, *Hortus Bengalensis*, or a catalogue ... 18. 1814, *Amer. Man. Grape Vines* 10. 1830, *Vigne Américaine et la Viticulture en Europe* 8: 374. 1884 and *Phil. J. Sci.* 7: 411–413. 1912, *Bulletin of the Botanical Survey of India* 14: 170. 1972, *Pharmaceutical Biology* 31(4): 283–287. 1993, *Ethnobotany* 16(1/2): 83–85. 2004

(Used in Ayurveda. Powdered plant paste applied on swollen parts of body. Fresh leaves tied on head to cure headache. Root decoction antibacterial, given for pneumonia, snake-bites, sores, menstrual troubles, diarrhea, dysentery, inflammation, skin diseases, bone fracture; root paste applied on old wounds; crushed roots mixed with jaggery given to cure menstrual bleeding; fresh roots and leaves made into a paste applied over parts affected by Guinea worms. Tuberous roots sliced and dried, astringent and refrigerant. Veterinary medicine, crushed roots given to cattle for the treatment of blood dysentery; roots and bark given orally for early cure of fractured bone. Contact therapy, pieces of stem tied with a sacred thread as a necklace to cure typhoid.)

in English: jungle grape vine

in India: adavi draaksha, adavi draksha, adavi teega draksha, amlavetasah, amlola, athukula boddu, bechuti, bedasa tivva, bedasathivva, bhinura, bhiranya, bilee hambu, bili hambu, burka tonda, chamar musli, darra tige, dbhimna, doba-tiga, dooba tiga, dokarbel, giddar dakh, guddar dakh, gobralata, golinda, govila, icer, jangali draksh, jangli angoor, jangli angur, jangli drash, jungli angur, kaadu draakshi, kaadu drakshi, kali santhi, katti-bel, kattukodimindri, katulam, khata limbu, kiwar pani bel, kumarlata, musal, nadanvela, nadena, nandanvela, nandena, pani bel, pani-bel, pani chela, panibel, panivela, panivelo, pula-tiga, schunambu-valli, shyrmow sohdoh, vanadraksa, vllia-pira-pitica

Ampelocissus leonensis (Hook.f.) Merr. (*Ampelocissus bakeri* Planch.; *Ampelocissus leonensis* Planch.; *Cissus leonensis* Hook. f.; *Vitis leonensis* (Hook. f.) Baker; *Vitis leonensis* Baker)

Tropical Africa. Climber, liana

See *Niger Flora* [W.J. Hooker]. 264. 1849, *Flora of Tropical Africa* [Oliver et al.] 1: 398. 1868, *Vigne Américaine et la Viticulture en Europe* 9(1): 30–31. 1885

(For skin diseases.)

in Yoruba: abisowo funfun, eke, ikumori, kumori

Ampelocissus multistriata (Baker) Planch. (*Ampelocissus multistriata* Planch.; *Ampelocissus pentaphylla* Gilg & Brandt; *Ampelocissus pentaphylla* (Guill. & Perrault) Gilg & Brandt; *Vitis multistriata* Baker; *Vitis pentaphylla* Guill. & Perrault)

Tropical Africa. Climber, liana, herbaceous, thick roots, reddish inflorescence, edible smooth grape-like fruits

See *Florae Senegambiae Tentamen* 1: 135, t. 33. 1831, *Flora of Tropical Africa* [Oliver et al.] 1: 410. 1868, *Monogr. Phan.* [A. DC. & C. DC.] 5: 398. 1887 and *Bot. Jahrb. Syst.* 46: 427. 1911

(Leaves in poultice as a remedy for gout; fresh leaves juice applied as a plaster to poisonous spider bites. Fish poison, grounded leaves to stupefy fish.)

in Yoruba: abeekanna manun

Ampelocissus ochracea Merr. (*Ampelocissus ochracea* (Tsijsmm. & Binnend.) Merr.)

Malaysia, Sabah, Borneo. Woody climber, fruits reddish-brown

See *Philippine Journal of Science* xi 125. 1916

(For swellings, carbuncles, pimples and boils.)

Ampelocissus robinsonii Planch. (*Ampelocissus alexandri* Urb.; *Ampelocissus rugosa* (Wall.) Planch.; *Cissus rugosa* DC.; *Vitis rugosa* Wall.; *Vitis rugosa* Raf.)

Jamaica, India.

See *Flora Indica*; or descriptions of Indian Plants 2: 480. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 629. 1824, *Amer. Man. Grape Vine*. 11. 1830, *Vigne Américaine et la Viticulture en Europe* 8(12): 374. 1884, *Monographiae Phanerogamarum* 5: 415. 1887 and *Symbolae Antillarum* 6: 15. 1909

(Poultice for sprains.)

in English: fox grape

in India: chhipari

Ampelocissus rubiginosa Lauterb. ex Winkl. (*Ampelocissus rubiginosa* Lauterb.)

Malay Peninsula. Climber

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* xlv, 535. 1910

(Crushed leaves applied as poultice to cuts and wounds.)

Ampelocissus rugosa (Wall.) Planch. (*Ampelocissus rugosa* Planch.)

India, Nepal.

See *Flora Indica*; or descriptions of Indian Plants 2: 480. 1824, *Vigne Américaine et la Viticulture en Europe* 8(12): 374. 1884

(Paste of stem applied to relieve sprain and muscular swellings; fresh juice of stem dropped into eyes.)

in Nepal: airi lahara, pureniko lahara

Ampelocissus tomentosa (Roth) Planch. (*Ampelocissus tomentosa* (Heyne ex Roth) Planch.; *Vitis tomentosa* Roth; *Vitis tomentosa* Heyne ex Roth)

India. Climber

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 5: 318 (-319). 1819 [Dec 1819], *Vigne Américaine et la Viticulture en Europe* 8: 375. 1884 and *Ethnobotanical Leaflets* 11: 122–140. 2007

(Used in Sidha. Anticancer, antiviral, antidote, used for neuralgia, dropsy, fever, pleurisy, pneumonia, dysmenorrhea. Rhizome crushed and applied as poultice on sprains, skin diseases. Root paste applied externally in bone fracture and bandaged for healing; bulb of *Urginea indica* and tuberous roots of *Ampelocissus tomentosa* made into a paste and applied over abscess and sore throat; fresh root paste applied in eczema, scabies, and over wounds due to cuts; crushed roots applied in venereal diseases; crushed roots mixed with resin of *Shorea robusta* tree and some *sarson* oil, *Brassica* sp., and applied on boils, swellings and pains. Veterinary medicine, crushed roots applied on pains of cattle; roots along with those of *Abutilon indicum* pounded and boiled and the decoction given for insect bite; leaf paste smeared over the fractured area and bound over it.)

in India: adavi draaksha, atukula baddu, atukulabaddu, bono kumda, cirunaralai, devunimal, gari gummadi, garigum-madi, ghora lat, ghora lata, ghoralidi, hesua-larang, kaadu draakshi balli, katabhonganoi, kumharlat, kumhirlat, lolugatige, lolugu tige, muttu tonda, naralaikkoti, narinaralai, narinaralaikkoti, pedda darra, puvvuyerragummadi, sambara gedde

Ampelopsis Michaux Vitaceae

From the Greek *ampelos* ‘a vine’ and *opsis* ‘resembling, like, likeness’, see *Flora Boreali-Americana* 1: 159–160. 1803.

Ampelopsis aconitifolia Bunge (*Ampelopsis cordata* auct. non Michx.; *Vitis aconitifolia* (Bunge) Hance; *Vitis serianifolia* (Bunge) Maxim. var. *aconitifolia* (Bunge) Franch.)

North America. Perennial vine

See *Enumeratio Plantarum, quas in China Boreali* 12. 1833, *Journal of the Linnean Society, Botany* 13: 77. 1873, *Plantae Davidianae ex Sinarum Imperio* 1: 74. 1884

(Infusion of bark taken for urinary ailments.)

in English: Monk’s-hood-vine, monkshood vine

in China: wu tou ye she pu tao

Ampelopsis arborea (L.) Koehne (*Ampelopsis arborea* Koehne; *Ampelopsis arborea* Rusby; *Ampelopsis bipinnata* Michx.; *Cissus arborea* (L.) Des Moul.; *Hedera arborea* (L.) Walter; *Vitis arborea* L.)

North America. Climbing vine, sprawling, fast growing, bushy, woody below, divided leaves, tendrils opposite the leaves, flat-topped clusters of tiny inconspicuous green flowers, small clusters of pea-sized bluish-purple fleshy shiny

inedible fruits, leaves may be browsed by white-tailed deer, birds and raccoon eat fruit, in swamps and swampy woods, marshes, alluvial woods, disturbed areas, wooded stream banks, aggressive species, noxious pest

See *Species Plantarum* 1: 203. 1753, *Flora Caroliniana*, secundum ... 102. 1788, *Deutsche Dendrologie* 400. 1893

(Fruits with unknown toxicity, avoid eating them.)

in English: buckvine, pepper vine

Ampelopsis cordata Michx. (*Cissus ampelopsis* Pers., nom. illegit.; *Cissus indivisa* Des Moulins; *Vitis cordata* (Michaux) Dumont de Courset; *Vitis heterophylla* Thunberg var. *cordata* (Michaux) Regel; *Vitis indivisa* Willdenow, nom. illegit.)

North America. Climbing, perennial, woody vine, tendrils, small creamy white inconspicuous flowers, bluish fruits eaten by several species of birds, species often mistaken for a true grape

See *Flora Boreali-Americana* 1: 159. 1803 and *Ann. Missouri Bot. Gard.* 58: 203. 1971

(Infusion of bark taken for urinary ailments, infusion made by boiling together the barks of *Ampelopsis cordata*, *Calycanthus fertilis* Walter (or *Calycanthus floridus* var. *glaucus* (Willd.) Torr. & A. Gray), *Vitis aestivalis* Michx., *Vitis labrusca* L., *Rubus allegheniensis* Porter and *Euonymus americanus* L., with the roots of *Lysimachia quadrifolia* L. Fruits with unknown toxicity, avoid eating them.)

in English: false grape, heart-leaf ampelopsis, heartleaf peppervine, possum grape, raccoon-grape

Ampelopsis glandulosa (Wall.) Momiy. var. *brevipedunculata* (Maxim.) Momiy. (*Ampelopsis brevipedunculata* (Maxim.) Trautv.; *Ampelopsis brevipedunculata* Koehne; *Ampelopsis brevipedunculata* var. *maximowiczii* (Regel) Rehd.; *Ampelopsis heterophylla* Siebold & Zucc.; *Ampelopsis heterophylla* (Thunb.) Siebold & Zucc.; *Ampelopsis heterophylla* Blume; *Ampelopsis heterophylla* var. *amurensis* Planch.; *Ampelopsis heterophylla* var. *brevipedunculata* (Maxim.) C.L. Li; *Cissus brevipedunculata* Maxim.; *Cissus humulifolia* var. *brevipedunculata* (Maxim.) Regel; *Vitis brevipedunculata* (Maxim.) Dippel)

Japan, China. Climber, woody, deciduous, perennial, vigorous, tendrils, grows rapidly, lobed leaf with cordate leaf base, serrated leaf margins, small greenish-white flowers, colorful berries attract birds, invasive and aggressive

See *Bijdragen tot de flora van Nederlandsch Indië* 4: 194. 1825, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 197. 1845, *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 9: 68. 1859, *Mémoires de l’Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 4(4): 35. 1861, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 8(1): 176. 1883, *Handbuch der Laubholzkunde* 2:

564. 1892 and *Bulletin, University Museum, University of Tokyo* 2: 78. 1971, *Journal of Japanese Botany* 52(1): 30. 1977, *Chin. J. Appl. Environ. Biol.* 2(1): 47. 1996, *Journal of Ethnopharmacology* 56(1): 31–44, 67–76. 1997, *Am. J. Chin. Med.* 32(5): 681–693. 2004

(Stem and root antiinflammatory, antioxidant, diuretic and antihepatotoxic. Berries for liver disease; fresh fruits, roots and leaves antiphlogistic, antioxidant, depurative and febrifuge, used externally in the treatment of boils, *Herpes zoster*, abscesses, ulcers, traumatic bruises, aches, insect stings.)

in English: Amur peppervine, creeper, porcelain ampelopsis, porcelain berry, snake-grape, turquoise-berry, wild grape

in China: dong bei she pu tao, she pu tao

Ampelopsis glandulosa (Wall.) Momiy. var. ***heterophylla*** (Thunb.) Momiy. (*Allosampela heterophylla* (Thunb.) Raf.; *Ampelopsis brevipedunculata* var. *heterophylla* (Thunb.) H. Hara; *Ampelopsis brevipedunculata* var. *maximowiczii* (Regel) Rehder; *Ampelopsis heterophylla* (Thunb.) Siebold & Zucc.; *Ampelopsis humulifolia* var. *heterophylla* (Thunb.) K. Koch; *Ampelopsis regeliana* Carrière; *Vitis heterophylla* Thunb.; *Vitis heterophylla* var. *maximowiczii* Regel)

Japan.

See *Syst. Vegetabilium*. Editio decima quarta 244. 1784, *Sylva Telluriana* 88. 1838, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 197. 1845, *Hortus Dendrologicus* 48. 1853 and *Enumeratio Spermatophytarum Japonicarum* 3: 133. 1954, *Bulletin, University Museum, University of Tokyo* 2: 78. 1971, *Journal of Japanese Botany* 52: 30. 1977

(Berries for liver disease; fresh fruits, roots and leaves anti-phlogistic, antioxidant, depurative and febrifuge, used externally in the treatment of boils, *Herpes zoster*, abscesses, ulcers, traumatic bruises, aches, insect stings.)

in China: yi ye she pu tao

in Japan: no-budô, teriha-no-budô

Ampelopsis grossedentata (Hand.-Mazz.) W.T. Wang (*Ampelopsis cantoniensis* (Hook. & Arn.) Planch. var. *grossedentata* Hand.-Mazz.)

China.

See *Anz. Akad. Wiss. Wien, Math.-Naturwiss. Kl.* 59: 105. 1877, *Monographiae Phanerogamarum* 5: 460. 1887 and *Acta Phytotaxonomica Sinica* 17(3): 79. 1979, *BioFactors* 21(1–4): 175–178. 2004

(Leaves and stems tea (*tocha*, *tengcha*) antioxidant, diaphoretic, hepatoprotective, antiviral, antibacterial, anti-inflammatory, analgesic, high UV-absorbing ability, may improve sleep quality, used in hypertension, cough, pain-swelling of pharynx and larynx, cold, fever, jaundice hepatitis, prevent and cure arteriosclerosis, platelet aggregation and thrombosis.)

in English: snake wine vine

in China: xian chi she pu tao

Ampelopsis indica Blume (*Vitis indica* L.)

India.

See *Species Plantarum* 1: 202. 1753 and *Bijdr. Fl. Ned. Ind.* 4: 193. 1825 [20 Sep 1825]

(Antitumor.)

Ampelopsis japonica (Thunberg) Makino (*Ampelopsis japonica* C.K. Schneid.; *Ampelopsis japonica* Hort.; *Ampelopsis japonica* Makino; *Ampelopsis mirabilis* Diels & Gilg; *Ampelopsis napiformis* Carrière, also *napaeformis*; *Ampelopsis serjaniifolia* Bunge, also *serianaefolia*; *Ampelopsis tuberosa* Carrière; *Cissus serjaniaeifolia* Walpers; *Paullinia japonica* Thunberg ex Murray; *Paullinia japonica* Thunb.; *Vitis serjaniaeifolia* K. Koch; *Vitis serjaniifolia* (Reg.) Maxim.)

China, Japan. Perennial, climbing, much-branched, woody vine, clustered tuberous robust fleshy sweet roots, glossy leaves, tendrils opposite to the leaves, small yellowish-green flowers, clusters of violet-spotted-purple fruits

See *Species Plantarum* 1: 117, 202–203, 365. 1753, *Syst. Veg.*, ed. 14: 380. 1784, *Flora Japonica*, ... 170. 1784, *Flora Boreali-Americana* 1: 159–160. 1803, *Enumeratio Plantarum, quas in China Boreali* 70. 1833, *Dendrologie* 1: 558. 1869, *Revue Horticole* 1870: 17. 1870 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 465–466. 1900, *Botanical Magazine (Tokyo)* 17: 113. 1903, Kim, J.K. et al. "Induction of apoptosis by momordin I in promyelocytic leukemia (HL-60) cells." *Anticancer Res.* 22(3): 1885–1889. 2002

(Roots antibacterial, bitter and pungent, vulnerary, anticonvulsive, antifungal, depurative, expectorant, febrifuge, for skin inflammation, burns, acne, swellings, hemorrhoids, vaginal and uterine discharges, ulcerous diseases of skin, wounds, boils.)

in English: Japanese ampelopsis, Japanese peppervine

in China: bai lian, mao erh luan, pai ken, pai lien

in Japan: byaku-ren

Ampelopteris Kunze Thelypteridaceae

(Calcium-containing crystals. Oil used for stomach troubles and rheumatism. Seed as tonic after childbirth, as a postpartum remedy, given to nursing mothers to improve lactation.)

in English: oyster nut, Queen’s nut, Zanzibar oil vine

in East Africa: jiconga, kwemme

in Tanzania: mkweme, mkwema

Ampeloziphyphus Ducke Rhamnaceae

Greek *ampelos* ‘a vine’ plus the genus *Zizyphus* or *Ziziphus* Miller.

Ampeloziphyphus amazonicus Ducke

Venezuela, Brazil. Liana, tree or shrub, leaning

See *Arquivos do Instituto de Biologia Vegetal* 2: 157–158. 1935, *Journal of Ethnopharmacology* 36(2): 175–182. 1992, *Boletim do Museu Paraense Emílio Goeldi, série Ciências Humanas* 1(1): 137–147. 2005, *Brazilian Journal of Medical and Biological Research* 40(5): 663–670. 2007, *International Journal for Parasitology* 38(13): 1505–1511. 2008, *International Journal for Parasitology* 38(14): 1738. 2008

(Cold suspension of powdered dried roots antimalarial, febrifuge; roots infusion used as antiinflammatory preparations, as an antidote to snake venoms and for the treatment and prevention of malaria. Extract of stem bark used as an antimalarial and antiinflammatory and as an antidote to snake venom.)

in English: indian beer

in Brazil: cerveja de índio, saracura-mirá

Amphiachyris (DC.) Nutt. Asteraceae

Greek *amphi* ‘both, on both sides’ and *achyron* ‘chaff, husk’, referring to the achenes, see *Transactions of the American Philosophical Society*, new series, 7: 313. 1840.

Amphiachyris amoena (Shinners) Solbrig (*Gutierrezia amoena* (Shinners) Diggs, Lipscomb & O’Kennon; *Xanthocephalum amoenum* Shinners)

North America.

See *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 1(2): 140. 1807, *Genera et species plantarum* 30. 1816 and *Field & Laboratory* 19(2): 77–78. 1951, *Rhodora* 62(734): 52. 1960, *Systematic Botany* 4(2): 178–189. 1979, *Systematic Botany* 7(4): 405–416. 1982, *J. Nat. Prod.* 53(5): 1312–1326. 1990, *J. Nat. Prod.* 59(5): 463–468. 1996

(Used for eczema and skin rashes. Weed dermatitis.)

in English: prairie broomweed

Amphicarpaea Elliott ex Nutt.

Fabaceae (Phaseoleae)

From the Greek *amphi* ‘both, on both sides’ and *karpos* ‘fruit’, referring to the different kinds of pods, see *The Genera of North American Plants* 2: 113–114. 1818.

Amphicarpaea bracteata (L.) Fern. (*Amphicarpa bracteata* (L.) Fernald; *Amphicarpaea bracteata* (L.) Rickett & Stafleu; *Amphicarpaea bracteata* (L.) Fernald var. *comosa* (L.) Fernald; *Amphicarpaea bracteata* (L.) Fernald var. *pitcheri* (Torr. & A. Gray) Fernald; *Amphicarpaea chamae-caulis* B. Boivin & Raymond; *Amphicarpaea ciliata* Raf.; *Amphicarpaea comosa* (L.) Loudon; *Amphicarpaea comosa* (L.) G. Gray) Kuntze; *Glycine bracteata* L.; *Glycine comosa* L.; *Glycine monoica* L.; *Glycine sarmentosa* Roth; *Lobomon acutifolium* Raf.; *Lobomon montanum* Raf.; *Lobomon obtusifolium* Raf.; *Lobomon sarmentosum* (Elliott) Raf.; *Savia volubilis* Raf.; *Tetrodea comosa* (L.) Jacks.; *Tetrodea monoica* (L.) Raf.)

North America. Perennial or annual climbing herb, vine

See *Species Plantarum* 2: 754. 1753, *Loudon’s Hortus Britannicus*. A catalogue ... 314. 1830, *New Flora and Botany of North America* ... 1: 81. 1836, *Revisio Generum Plantarum* 1: 182. 1891 and *American Midland Naturalist* 4: 431. 1916, *Papers of the Michigan Academy of Science, Arts and Letters* 3: 101. 1924, *Rhodora* 35(416): 276. 1933, *Rhodora* 39: 318. 1937, *Le Naturaliste Canadien* 69: 225. 1943, *Taxon* 8: 296. 1959, *Phytologia* 63(5): 410. 1987

(Infusion of root taken for diarrhea.)

in English: American hog peanut, hog peanut

Amphicarpaea bracteata (L.) Fern. var. *bracteata* (*Amphicarpaea bracteata* var. *typica* Boivin & Raymond; *Amphicarpaea monoica* (L.) Elliott)

North America. Perennial or annual climbing herb, vine

See *Rhodora* 35(416): 276. 1933, *Le Naturaliste Canadien* 69: 225. 1943

(Infusion of root taken for diarrhea, and applied on snakebite.)

in English: American hog peanut, hog peanut

Amphimas Pierre ex Harms Fabaceae (Leguminosae, Papilionoideae, Sophoreae)

Greek *amphi* 'both, both sides, surrounding, before and behind' and *mastix*, *mastigos* 'a whip', referring to the strap-like petals, see Dalla Torre, Karl Wilhelm von (1850–1928), *Genera siphonogamarum ad systema Englerianum conscripta* ab autoribus C.G. de Dalla Torre et H. Harms. Lipsiae: G. Engelmann, 1900–1907, *Nat. Pflanzenfam. Nachtr. II-IV* 3: 157. 1906.

Amphimas ferrugineus Pellegr. (*Amphimas ferrugineus* Pierre ex Pellegr.; *Amphimas ferrugineus* Pierre ex Harms, nom. nud.; *Amphimas klaineanus* Pierre ex Harms)

Tropical Africa. Perennial non-climbing tree, straight, cylindrical, bark with red sap, inflorescence a lax terminal or axillary compound raceme, pendulous flat elliptical to oblong papery winged pod

See *Notulae Systematicae*. *Herbier du Museum de Paris* 2: 292–293. 1912

(Bark decoction used to treat dysmenorrhea and as poison antidote; crushed bark applied to mumps.)

in Cameroon: edjin

in Gabon: afié, edji, mbango

in Ivory Coast: lati

in Zaire: bokanga

Amphimas pterocarpoides Harms

Tropical Africa. Perennial non-climbing tree, straight, cylindrical, bark with red sap, inflorescence a lax terminal or axillary compound raceme, pendulous flat elliptical to oblong papery winged pod

See *Repertorium Specierum Novarum Regni Vegetabilis* 12: 12. 1913

(Inner bark to treat cough; a decoction of twig bark applied to prevent threatening abortion and to treat impotence. Resin against dysentery, anemia, hematuria, dysmenorrhea, schistosomiasis and mumps, and as poison antidote. Bark poisonous to mice and fish.)

in Cameroon: alen, edjin, ekela, gbo, kanga, mvanda

in Central Africa: gbo, ogiva

in Congo: muizi

in Ghana: yaya

in Ivory Coast: lati

in Nigeria: ogiya (Yoruba); erurumesi (Edo); awo (Igbo); keche bumpe (Boki)

in Sierra Leone: njumbo wuli

in Yoruba: kogbagbe, kugbagbe, kusigbagbe

in Zaire: bokanga, ekanga, likalanga

Amphineurion (A. DC.) Pichon Apocynaceae

Greek *amphi* 'both, both sides, surrounding' and *Nerium* L., *neros* 'wet', *nero* 'water', see Middleton, D.J., *Apocynaceae* (subfamilies Rauvolfioideae and Apocynoideae). *Flora Malesiana* 18: 1–474. Noordhoff-Kolff N.V., Djakarta. 2007.

Amphineurion marginatum (Roxb.) D.J. Middleton (*Aganosma acuminata* G. Don; *Aganosma acuminata* (Roxb.) G. Don; *Aganosma euloba* Miq.; *Aganosma macrocarpa* A. DC.; *Aganosma marginata* (Roxb.) G. Don; *Aganosma velutina* A. DC.; *Amphineurion acuminatum* (G. Don) Pichon; *Amphineurion velutinum* (A. DC.) Pichon; *Chonemorpha cristata* (Roth) G. Don; *Chonemorpha dichotoma* G. Don; *Echites acuminatus* Roxb., nom. illeg.; *Echites apoxys* Voigt; *Echites cristatus* Roth; *Echites marginatus* Roxb.; *Echites procumbens* Blanco; *Echites repens* Blanco, nom. illeg.; *Holarrhena procumbens* (Blanco) Merr.; *Ichnocarpus acuminatus* (G. Don) Fern.-Vill.; *Ichnocarpus macrocarpus* (A. DC.) Fern.-Vill.; *Ichnocarpus velutinus* (A. DC.) Fern.-Vill.)

Tropical Asia, China. Liana, woody twiner, latex greenish yellow, white flowers, old fruits brownish

See *Flora Indica*; or, descriptions of Indian Plants 2: 15–16. 1832, *A General History of the Dichlamydeous Plants* 4: 77. 1837 and *Bull. Soc. Bot. France* 95: 215. 1948, *Taxon* 55: 502. 2006, *Journal of Ethnopharmacology* 107(1): 12–18. 2006

(Cytotoxic, antioxidant, antiplasmodial. Roots decoction as a postpartum remedy and for urinary disorders. Root and stem eaten for mental illness, schizophrenia.)

in English: common aganosma

in China: xiang hua teng

in Malaysia: ara tanah, kati, sakat lima, sekati lima

in Thailand: khrua sai tan

Amphineuron Holttum Thelypteridaceae

From the Greek *amphi* 'both, both sides, surrounding' and *neuron* 'nerve'; see *Hortus Regius Botanicus Berolinensis* 2: 128. 1833 and *American Fern Journal* 53(4): 153. 1963, *Webbia* 24: 709. 1970, *Blumea* 19(1): 45–46, f. 19, 19a. 1971.

Amphineuron immersum (Blume) Holttum (*Aspidium immersum* Blume; *Dryopteris immersa* (Blume) Kuntze; *Lastrea immersa* (Blume) T. Moore; *Nephrodium immersum* (Blume) Hook.; *Parathelypteris immersa* (Blume) Ching; *Thelypteris immersa* (Blume) Ching)

India, Java. Often as *Thelypteris immersa* (Blume) Ching

See *Species Plantarum* 2: 1071–1072. 1753, *Icones Plantarum* 3, 45–48, t. 11, 13. 1763, *Enumeratio Plantarum Javæ* fasc. 2: 156–157. 1828, *Species Filicum* 4: 112. 1862, *Revisio Generum Plantarum* 2: 813. 1891 and *Bulletin of the Fan Memorial Institute of Biology* 6(5): 306. 1936, *Acta Phytotaxonomica Sinica* 8(4): 303. 1963, *Companion Beddome's Handb. Ferns Brit. India* 203. 1974

(Fronds for diarrhea, boils, malaria, menstrual disorders, pneumonia, tuberculosis. Magic, used to ward off evil spirits. Fish poison.)

Amphiscirpus Oteng-Yeboah Cyperaceae

Greek *amphi* ‘both, around’ and the genus *Scirpus* L., Latin *scirpus*, i ‘a rush, bulrush’, see *Notes from the Royal Botanic Garden, Edinburgh* 33(2): 308. 1974, *Kew Bulletin* 46(1): 169–178. 1991, *Acta Bot. Mex.* 82: 15–41. 2007.

Amphiscirpus nevadensis (S. Watson) Oteng-Yeb. (*Phylloscirpus nevadensis* (S. Watson) Goetgh.; *Schoenoplectus nevadensis* (S. Watson) Soják; *Scirpus nevadensis* S. Watson; *Scirpus nevadensis* S. Watson var. *remireoides* (Griseb.) Beetle; *Scirpus remireoides* Griseb.)

North America. Perennial, graminoid, roots eaten raw

See Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys*. Vol. 5, *Botany*. Washington: Government Printing Office. 1871, *Plantae Lorentzianae* 19: 266. 1874 and *American Journal of Botany* 33: 663. 1946, *Fl. Patagónica* 8(2): 38–92. 1969, *Notes from the Royal Botanic Garden, Edinburgh* 33(2): 308. 1974, *Genera Cyperacearum* 330. 1986

(Ceremonial.)

in English: Nevada bulrush

Amphitecna Miers Bignoniaceae

See *Sylva Telluriana* 80. 1838, *Transactions of the Linnean Society of London* 26: 163, 174. 1868, *Revue Horticole* 1882: 465. 1882, *Bulletin Mensuel de la Société Linnéenne de Paris* 85: 679. 1887, *Die Natürlichen Pflanzenfamilien* 4(3b): 247. 1894 and *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Fl. Neotrop.* 25(1): 1–131. 1980, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000, *Biodiver. Tabasco* 65–110. 2005.

latifolia Raf., nom. illeg.; *Crescentia lethifera* Tussac; *Crescentia obovata* Benth.; *Crescentia palustris* Forsyth ex Seem., nom. inval.; *Crescentia toxicaria* Tussac; *Dendrosicus latifolius* (Mill.) A.H. Gentry; *Dendrosicus latifolius* (Mill.) A.H. Gentry; *Dendrosicus latifolius* (Mill.) A.H. Gentry; *Dendrosicus saxatilis* Raf., nom. illeg.; *Enallagma cucurbitina* Baill., nom. nud.; *Enallagma cucurbitina* (L.) Baill. ex Schum.; *Enallagma latifolia* (Mill.) Small; *Enallagma obovata* K. Schum.; *Enallagma obovata* (Benth.) Baill. ex Schum.)

Caribbean, Venezuela.

See *The Gardeners Dictionary*: ... eighth edition, no. 2. 1768, *Mantissa Plantarum* 2: 250. 1771, *Encyclopédie Méthodique, Botanique* 1: 558. 1783, *Flore des Antilles* 4: 50, t. 17. 1827, *Sylva Telluriana* 81. 1838, *The Botany of the Voyage of H.M.S. Sulphur* 130, t. 46. 1845, *The Botany of the Voyage of H.M.S. ~Herald~* 183. 1854, *Transactions of the Linnean Society of London* 26: 177–178. 1870, *Histoire des Plantes* 10: 24. 1888, *Revisio Generum Plantarum* 2: 479. 1891, *Die Natürlichen Pflanzenfamilien* 4(3b): 247. 1894 and *Flora of Miami* 171. 1913, *Taxon* 22(5–6): 638. 1973, *Fieldiana, Botany* 36(3): 25. 1973, *Taxon* 25(1): 108. 1976, *Fl. Neotrop.* 25(1): 66. 1980

(Anodyne, astringent, diuretic, for dropsy, fever, headache, swelling.)

Amsinckia Lehm. Boraginaceae

After the German botanist Wilhelm Amsinck, 1752–1831, burgomaster of Hamburg, Germany, patron of botany, author of *Eines freyen teutschen Mannes freymüthige Betrachtungen über kriegereische Massregeln zur Hemmung des Handels und deren verderbliche Folgen*. [Hamburg?] 1801, see Lehmann, Johann Georg Christian (1792–1860), *Delectus Seminum quae in Horto Hamburgensium Botanico e collectione, anni 1830, 1831, 1839, 1842, 1849, 1850 mutuae commutationi offerentur*. 3, 7. Hamburgi, 1830–1850 and *Journal of Animal Science*. 68(3): 892–904. 1990, *National Toxicology Program Technical Report Series*. (508): 1–280. May 2003.

Amsinckia douglasiana A. DC.

North America. Annual herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 118. 1846 and *Evolution* 51: 1090–1099. 1997, *The Veterinary Clinics of North America. Food Animal Practice* 27(2): 419–428. 2011

(Possibly toxic.)

in English: Douglas's fiddlehead

Amsinckia intermedia Fisch & Mey. (*Amsinckia media* E.H.L. Krause; *Benthamia intermedia* (Fisch. & C.A. Mey.) Druce)

North America.

See *Mémoires de la Société d'Histoire Naturelle de Paris* 4: 37. 1828, *Index Seminum* [St. Petersburg] 2: 2, 26. 1836 and *Fl. Deutschl.* (ed. 2) 11: 42. 1903, (*Report*) *Botanical Society and Exchange Club of the British Isles* 3: 25. 1912, McCulloch, E.C. "Hepatic cirrhosis of horses, swine and cattle due to the ingestion of seeds of the tarweed, *Amsinckia intermedia*." *J. Am. Vet. Med. Assoc.*, 96: 5–18. 1940, Woolsey, J.H., Jasper, D.E., Cordy, D.R., Christensen, J.F. "Two outbreaks of hepatic cirrhosis in swine in California, with evidence incriminating the tarweed, *Amsinckia intermedia*." *Vet. Med. Small Anim. Clin.*, 47: 55–58. 1952, *Cancer Research* 30: 2127–2131. 1970, *Taxon* 31: 763–764. 1982, Cheeke, P.R., Shull, L.R. *Natural toxicants in feeds and poisonous plants*. AVI Publishing Company, Inc., Westport, CT, USA. 1985, *Evolution* 51: 1090–1099. 1997

(Ingestion can cause severe diseases in horses, swine, and cattle. Liver damage, hepatic cirrhosis results from ingesting the seeds of the plant; the symptoms in horses are termed "walking disease.")

in English: buckthorn-weed, fiddleneck, finger-weed, tarweed

Amsinckia lycopsoides Lehm. (*Amsinckia barbata* Greene; *Benthamia lycopsoides* (Lehm.) Lindl. ex Druce; *Benthamia lycopsioides* (Lehm.) Druce)

North America, British Columbia. Annual herb, taproot, basal crowded leaves persistent, yellow to orange flowers, inflorescence a coiled cluster

See *Delectus Seminum quae in Horto Hamburgensium Botanico* 7. 1831 and *List of British Plants* 103. 1908

(Livestock known to be affected by toxin, ingestion can cause severe diseases in horses, swine, and cattle.)

in English: bugloss fiddleneck, coast fiddle-neck, fiddle-neck, fiddle-necks, fiddleneck, tarweed, tarweed fiddleneck, yellow burn-weed, yellow forget-me-not

Amsinckia menziesii (Lehm.) A. Nels. & J.F. Macbr. (*Benthamia menziesii* (Lehm.) Druce; *Echium menziesii* Lehm.)

North America, British Columbia. Annual herb, taproot, yellow flowers, inflorescence a coiled cluster

See *Species Plantarum* 1: 139–140. 1753, *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 29. 1830 and *Botanical Gazette* 61(1): 36. 1916, (*Report*) *Botanical Society and Exchange Club of the British Isles* 5: 570. 1920

(Livestock known to be affected by toxin, ingestion can cause severe diseases in horses, swine and cattle.)

in English: Menzies' fiddleneck, rancher's fire-weed, small-flowered fiddle-neck, small-flowered fiddleneck

Amsinckia spectabilis Fisch. & C.A. Mey. (*Amsinckia intermedia* var. *saint-nicolai* Jeps.; *Amsinckia lycopsoides* var. *bracteosa* A. Gray; *Amsinckia scouleri* I.M. Johnst.; *Amsinckia spectabilis* Fisch. & C.A. Mey. var. *bracteosa* (A.

Gray) B. Boivin; *Amsinckia spectabilis* Fisch. & C.A. Mey. var. *microcarpa* (Greene) Jeps. & Hoover; *Amsinckia spectabilis* Fisch. & C.A. Mey. var. *nicolai* (Jeps.) I.M. Johnst. ex Munz; *Amsinckia spectabilis* Fisch. & C.A. Mey. var. *spectabilis*; *Benthamia microcarpa* (Greene) Druce; *Benthamia spectabilis* (Fisch. & C.A. Mey.) Druce

North America. Annual herb

See *Index Seminum* [St. Petersburg] 2: 2, 26. 1836, *Synoptical Flora of North America* 2(1): 198. 1878 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 299. 1916, *A Manual of Southern California Botany* 423. 1935, *A Flora of California* 3: 326. 1943, *Le Naturaliste Canadien* 93(6): 1059. 1966[1967], *Evolution* 51: 1090–1099. 1997

(Possibly toxic.)

in English: woolly breeches

Amsinckia tessellata A. Gray (*Benthamia tessellata* (A. Gray) Druce)

North America. Annual herb

See *Proceedings of the American Academy of Arts and Sciences* 10: 54. 1874 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 299. 1916

(Possibly toxic.)

in English: bristly fiddleneck, devil's-lettuce, western fiddle-neck

Amsinckia tessellata A. Gray var. *tessellata* (*Amsinckia densirugosa* Suksd.; *Amsinckia hendersonii* Suksd.; *Amsinckia washingtonensis* Suksd.)

North America. Annual herb, food

See *Proceedings of the American Academy of Arts and Sciences* 10: 54. 1874 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 299. 1916, *Werdenda* 1: 107, 111. 1931

(Possibly toxic.)

in English: bristly fiddleneck, devil's-lettuce, western fiddle-neck

Amsonia Walter Apocynaceae

Named for the American botanist Charles Amson, traveller, physician; see *Flora Caroliniana*, secundum ... 11, 98. 1788, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 41. Ansbach 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 56. 1989.

Amsonia elliptica (Thunb.) Roem. & Schult. (*Amsonia elliptica* (Thunberg ex Murray) Roemer & Schultes; *Amsonia sinensis* Tsiang & P.T. Li; *Ansonia elliptica* (Thunb.)

Raf.; *Chonemorpha elliptica* (Blanco) Merr. & Rolfe; *Tabernaemontana elliptica* Blanco; *Tabernaemontana elliptica* Thunb.; *Tabernaemontana elliptica* Thunberg ex Murray)

China, Korea, Japan. Herb, perennial, corolla bluish

See *Species Plantarum* 1: 210–211. 1753, *Syst. Veg.* ed. 14: 255. 1784, *Systema Vegetabilium* 4: 432. 1819 and *Philippine Journal of Science* 3: 121. 1908, *Acta Phytotax. Sin.* 11(4): 368–369. 1973

(Alkaloids. Whole plant decoction febrifuge, hypotensive, vasodilation, widening of the lumen of blood vessels.)

in English: Chinese alstonia, Chinese amsonia, Chinese blue star, Japanese bluestar

in China: shui gan cao

Amydrium Schott Araceae

Greek *amydros*, *amydron* ‘dim, faint, obscure, weak’; see *Annales Museum Botanicum Lugduno-Batavi* 1: 127. 1863 and D.H. Nicolson, “A revision of *Amydrium* (Araceae).” *Blumea* 16(1): 123–127. 1968, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Amydrium humile Schott (*Epipremnum humile* (Schott) Hook.f.; *Rhaphidophora humilis* (Schott) Ridl.)

Pen. Malaysia, Borneo, Sumatra. Herb, subscaudent

See *Fl. Brit. India* 6: 549. 1893 and *Fl. Malay. Penins.* 3: 41. 1907, *Pflanzenreich* 37 (IV.23B): 118. 1908

(Used for coughs, cuts, swellings.)

in Papua New Guinea: ganona, waliwaboya

Amydrium sinense (Engl.) H. Li (*Epipremnopsis sinensis* (Engl.) H. Li; *Rhaphidophora dunniana* H. Lévl.; *Scindapsus sinensis* Engl.; *Scindapsus sinensis* Engl. & Krause; *Scindapsus sinensis* Engl. ex Diels)

China, Vietnam. Creeping and root-climbing liane, slender, inflorescence solitary, spadix stipitate, yellow to orange-red smelling fruits

See *Meletemata Botanica* 21. 1832 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 234. 1900, *Pflanzenreich* 37 (IV.23B): 80. 1908, (*Feddes Rep. Sp. Nov.*) *Repertorium Specierum Novarum Regni Vegetabilis* 9(214–216): 325. 1911, *J. Arn. Arb.* 17: 57. 1936, *Acta Phytotaxonomica Sinica* 15(2): 102. 1977, *Fl. Yunnan* 2: 745–747, Pl. 203, 18–10. 1979, *Flora Reipublicae Popularis Sinicae* 13(2): 23, pl. 4, f. 8–10. 1979

(Stems and leaves for treating traumatic injury, fractures and angina pectoris.)

Amygdalus L. Rosaceae

Greek *amygdale* ‘almond’, Latin *amygdala*, *ae* ‘an almond’, *amygdalus*, *i* ‘an almond-tree’, *amygdalum*, *i* ‘an almond-kernel, an almond, an almond-tree’; see Carl Linnaeus, *Species Plantarum*. 472. 1753 and *Genera Plantarum*. Ed. 5. 212. 1754.

Amygdalus communis L. (*Amygdalus amara* Duhamel; *Amygdalus communis* var. *amara* (Duhamel) DC.; *Amygdalus communis* var. *dulcis* (Mill.) Borkh. ex DC.; *Amygdalus communis* var. *dulcis* DC.; *Amygdalus communis* var. *fragilis* (Borkh.) Ser.; *Amygdalus fragilis* Borkh.; *Amygdalus sativa* Mill.; *Prunus amygdalus* Batsch; *Prunus amygdalus* Stokes, nom. illeg., non *Prunus amygdalus* Batsch; *Prunus amygdalus* var. *amara* (Duhamel) Focke; *Prunus amygdalus* var. *dulcis* (Mill.) Koehne; *Prunus amygdalus* var. *fragilis* (Borkh.) Focke; *Prunus amygdalus* var. *sativa* (Mill.) Focke; *Prunus communis* (L.) Arcang.; *Prunus communis* (L.) Fritsch, nom. illeg., non *Prunus communis* Huds.; *Prunus communis* var. *dulcis* (Mill.) Borkh.; *Prunus communis* var. *fragilis* (Borkh.) Focke; *Prunus communis* var. *sativa* (Mill.) Asch. & Graebn., isonym; *Prunus communis* var. *sativa* (Mill.) Focke; *Prunus dulcis* (Mill.) D.A. Webb; *Prunus dulcis* var. *amara* (Duhamel) H.L. Moore)

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary*: ... eighth edition, no. 3. 1768, *Versuch einer Forstbotanischen Beschreibung Holzart.* 201. 1790, *Arch. für Bot.* 1, 2: 37, 1797, Batsch, August Johann Georg Carl (1761–1802), *Descriptions of Prunus tenella and Prunus pumilio.* 1: 30. 1801 [*Beytr. Entw. Prag. Gesch. Drey. Natur-Reiche*], *Flore Française*. Troisième Édition 4: 486. 1805, *A Botanical Materia Medica* 3: 101. 1812, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 531. 1825, *Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftlichen Classe, Abteilung 1* 632. 1892, *Synopsis der Deutschen und Schweizer Flora* 1: 728. 1892, *Deutsche Dendrologie* 315. 1893 and *Syn. Mitteleur. Fl.* 6 2: 138. 1906, *Feddes Repertorium* 74: 24. 1967, *Fl. Libya* 31: 12. 1977, *Taxon* 29: 725–726. 1980, *Chromosome Information Service* 36: 7–9. 1984, *Journal of Wuhan Botanical Research* 3(4): 363–366. 1985, Yü Te-tsun, Lu Ling-ti, Ku Tsue-chih, Li Chao-luan, Kuan Ke-chien & Chiang Wan-fu. *Rosaceae*. In: Yü Te-tsun, ed., *Fl. Reipubl. Popularis Sin.* 36: 1–443; 37: 1–516; 38: 1–133. 1974, 1985, 1986

(All members of the genus contain substances forming hydrocyanic acid (cyanide or prussic acid), in small amounts exceedingly poisonous compound.)

Amyris P. Browne Rutaceae

Greek *amyron* ‘watery, not perfumed’, *a* ‘intensive’ and *myron* ‘a perfume, ointment, scent’, alluding to the strong fragrance of balm; see *Species Plantarum* 2: 1193–1194. 1753, Patrick Browne, *The civil and natural history of Jamaica*.

208–209. London 1756, *Systema Naturae*, Editio Decima 2: 1000. 1759.

Amyris elemifera L. (*Amyris elemifera* J. König ex Blume; *Elemifera floridana* (L.) M. Gómez & Roig)

Jamaica. Trees, evergreen, resinous shoots, wood gives a spicy and peppery odor when cut, opposite or subopposite leaves with a fragrant resinous odor when crushed, leaflets stalked but without a pulvinus, white flowers with conspicuous resin glands, glabrous terminal panicles at the end of new growth, clusters of rounded fleshy aromatic 1-seeded black drupes

See *Systema Naturae*, Editio Decima 2: 1000. 1759, *Musée Botanique de M. Benjamin Delessert* 1: 218. 1851 and *Fieldiana, Bot.* 24(5): 398–425. 1946

(Infusion febrifuge, a decoction to bathe cuts and sores.)

in English: torchwood, white torch

Anabasis L. Chenopodiaceae

Latin and Greek *anabasis* for a plant, horse-tail, *equisetum*, see *Species Plantarum* 1: 223. 1753.

Anabasis aphylla Linnaeus (*Anabasis tatarica* Pallas)

Caspian region. For stabilizing dunes

See *Tableau Encyclopédique et Méthodique ... Botanique* 13, pl. 8. 1803 and *Regnum Veg.* 127: 18. 1993

(Annual branches contain the alkaloid anabasine, a botanical insecticide.)

in Arabic: ‘ajram, balbal, shnān, tartīr, ‘ushnān

in China: wu ye jia mu ze

Anabasis syriaca Iljin (*Anabasis aphylla* auct., non L.; *Anabasis aphylla* L. subsp. *africana* (Murb.) Maire)

Syria. Herb, leaves reduced, flowers solitary, grazed by live-stock, mulch capable of removing lead, cadmium and copper from aqueous solutions

See *Bot. Mater. Gerb. Bot. Inst. Komarova Akad. Nauk S.S.S.R.* 20: 138, in obs. 1960, *Process Safety and Environmental Protection* 80(5): 270–276. 2002

(Veterinary medicine, wounds, sores and skin diseases.)

in Arabic: ‘ajram, balbal, shnān, tartīr, ‘ushnān

Anacardium L. Anacardiaceae

Possibly from the Greek *ana* ‘up, back again, upward, like’ and *kardia* ‘heart’, referring to the shape of the fruit, but in ancient Greek *anakardion* (*kardia*?) was the twig of mulberry (see *Les lapidaires grecs.* 29, in F. de Mély, *Les lapidaires.* Paris 1899); or from the Sanskrit *vranakart*, from

vrana ‘wound’ and *kart* (*kar* ‘to do’), to eat the raw fruit was considered dangerous for the mouth.

Anacardium excelsum (Kunth) Skeels (*Anacardium excelsum* Skeels; *Anacardium excelsum* (Bertero & Balb. ex Kunth) Skeels; *Anacardium rhinocarpus* (Kunth) DC.; *Anacardium rhinocarpus* DC.; *Rhinocarpus excelsa* Kunth; *Rhinocarpus excelsa* Bertero & Balb.; *Rhinocarpus excelsus* Bertero & Balb. ex Kunth)

South America. Tree, dark bark, resinous sap, dense rounded crown, small reddish flowers in large terminal panicles, kidney-shape fruit not edible, seeds edible when roasted, fruits dispersed by birds or mammals

See *Species Plantarum* 1: 383. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 7: 5–6, t. 601. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 62. 1825 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 242: 36. 1912, Woods, B. and Calnan, C.D. “Toxic woods.” *British Journal of Dermatology* 95(Suppl. 13): 1–97. 1976, *Biotropica* 11(3): 235–236. 1979, *Mem. New York Bot. Gard.* 42: 33. 1987, *Flora of Ecuador* 30: 9–50. 1987, *Tree Physiol.* 22(4): 277–283. 2002, *Oecologia* 134(1): 37–45. 2003, *Plant Physiol.* 131(2): 745–752. 2003, *Oecologia* 141(4): 661–71. 2004

(Uncooked nuts poisonous, but leaves of this species are not toxic. No dermatitis from this tree, but the resinous sap may cause allergic reactions in some people. The macerated bark sometimes used as bait for catching fish.)

in English: wild cashew

in Southern America: caju, caju assu, caju-da-mata, caju da matta, caracoli, cornezuelo, espabel, espavé, espavé acanju, espavel, espavel amarillo, espavel rosado, ispabel, javillo, maranon, mijao, quina, rabito wild cashew

Anacardium giganteum W. Hancock ex Engl.

South America, Guyana. Small tree, panicle terminal, red petals with black dots within, nut kidney-shaped

See *Flora Brasiliensis* 12(2): 409. 1876

(Bark decoction for common colds, sore throat, vomiting, ulcers, venereal diseases.)

in Brazil (Amazonas): oru xihi, wito hi

in Caribbean: hubudi, merehi, ubudi, wild cashew

Anacardium occidentale L. (*Acajuba occidentalis* (L.) Gaertn.; *Anacardium microcarpum* Ducke; *Cassuvium pomiferum* Lam., nom. illeg.)

Tropical America, Brazil, Caribbean region. Spreading tree, small trees, aromatic, rough bark, symmetrical crown, broad leathery smooth leaves, small yellow or pink flowers in terminal clusters, the true fruit is kidney-shape nut attached to the terminal end of the enlarged woody cashew apple, edible cashew apple nonpoisonous, edible cashew nuts low in calories, bee forage

See *Species Plantarum* 1: 383. 1753, *Selectarum Stirpium Americanarum Historia* ... 1: t. 181, f. 35. 1763, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 22. 1783, *De Fructibus et Seminibus Plantarum*... 1: 192, t. 40. 1788 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 202. 1922, *Fl. Jamaica* 5: 6. 1926, Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. Prentice-Hall Inc., Englewood Cliffs, N.J., USA. 1964, *Ceiba* 22(1): 41–64. 1978, *Taxon* 28: 630. 1979, *Proceedings of the Indian Science Congress Association* (III, C) 66: 84. 1979, *Flora of Ecuador* 30: 9–50. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988, Geller, M. “Poison ivy, mangoes, cashews, and dermatitis.” *Ann. Intern. Med.*, 110: 1036–1037. 1989, *Flora del Paraguay* 1–84. 1990, *AAU Reports* 24: 1–241. 1990 [Flowering plants of Amazonian Ecuador—A checklist.], *Journal of Cytology and Genetics* 25: 308–320. 1990, *Brenesia* 41–42: 73–80. 1994, *Phytother. Res.* 21(6): 574–578. 2007 [Analgesic, antipyretic and ulcerogenic properties of an indigenous formulation—Kalpaamruthaa.], *Ned. Tijdschr. Geneesk.* 151(18): 997–1001. 2007 [Allergy for cashew nuts and peanuts.], Konan N.A., Bacchi E.M. “Antiulcerogenic effect and acute toxicity of a hydroethanolic extract from the cashew (*Anacardium occidentale* L.) leaves.” *J. Ethnopharmacol.* 112(2): 237–242. 2007

(Used in Ayurveda and Sidha. The shells of cashews are cross-reactive with catechols of *Rhus* species. The black corrosive liquid obtained from the pericarp of the nut of *Semecarpus anacardium* L.f. is also known as *bhilawa* nut shell liquid, and is analogous in many respects with cashew nut shell liquid (CNSL) from *Anacardium occidentale*. It has been shown to contain anacardic acid. As well as having vesicant and allergenic properties, the bhilawanols have cytotoxic activity. Resorcinols may be involved as primary and secondary contact allergens, and also as primary irritants. Anaphylactic reaction after eating small amounts of cashew nuts. Resin in leprosy. Bark infusion antidiabetic, bark paste applied on piles; bark decoction taken every month during menstruation as a contraceptive. Root bark tincture in reducing blood pressure. Root, bark, leaves and fruit analgesic, antipyretic, antibacterial, antiinflammatory, antiulcerogenic, to treat snakebite, odontalgia, inflammation of the gums, leprosy, ringworm, corns, skin diseases, dysentery, hemorrhoids, anorexia and to increase hair growth; bark and leaves infusion astringent, used for dysentery. Milky latex from the seeds smeared for foot sores; fruit juice taken for cholera. A wine from the fresh fruits used for chronic dysentery.)

in English: cashew, cashew apple, cashew gum, cashew nut, cashew-nut tree, cashew tree, coffin nail, East Indian almond, korocho nut

in Guatemala: jocote marañon

in South America: acajaiba, acaju, cacahuil, caju, cajú, caju manso, cajueiro, cajuil, casca antiabética, cashu, cayú, marañon, merche, merehi, merey, sacaju, salsaparrilha-dos-pobres

in East Africa: mkanju, mutua, nkorosho

in Madagascar: abiba, abibo, bibo, mabibo

in Mali: jibarani

in Nigeria: acashu, ejoju, ekaju, ikasu, kaju, kanju

in Southern Africa: kasjoe, mbiba

in Tanzania: mkorosho, nkorosho

in West Africa: e-lil-e-potho, kushu, kusui

in Burma: thiho thayet si

in Cambodia: svaay chantii

in China: du xian zi

in India: agnikrita, andima, andimangottai, arushkara, bi, duk, gaeru, gaeru beeja, gaeru kaayi, gaeru pappu, gaerumara, gerapoppu, gerbija, gerligai, geru, geru beeja, geru pappu, gerubija, gerupoppu, godambe, godambee, godambi mara, godambimara, godami, godumbi, gokuda, gonkuda, gori, govamba, govambe, gove, gove gaeru, gove hannu, guchhapushpa, hajli badam, hijli badam, jaedima-midi, jeedimaamidi, jidi, jidi mamidi, jidi-mamidi-vittu, jidi-mamidi, kaajoocha, kajoo, kajooaka, kaju, kaju-ki-gutli, kajucha, kajutah, kajutaka, kajutakah, kallarma, kapamava, kapamava, kappa-mavakuru, kappa-mavu, kappaimavu, kappal-cheru-kuru, kappalcher, kappalmavu, kappalsera, kappamavakum, kappamavu, karmavu, kashumavu, kasumavu, kempu gaeru, kempugeru, kempukerubija, kollaamaram, kollamma, kottai-mundiri, kottai munitirima, kottaimundiri, lanka amba, lonkabhalya, mandiri pappu, mandiri-appazham, mindiriparuppu, mokka mamidi, mukkamaamidi, mukkamamidi, moonthamamidivittu, mundhiri, mundiri, mundiri-kai, mundiri-kottai, mundthri, munta mamidi, muntamamidi, muntamamidivittu, munthamaamidi, munthiri, munthri, munthri-kottei, muntiri, muntiri-p-palam, ote rai, parangimavu, parankimava, parankimavu, parangimavu, parvati, patirimavu, portugimavu, portukimavu, prithagabija, pritikannavu, saram, shoephahara, sigidima, sophahara, sophara, srigdhahapitaphala, tarukageru, thuruka geru, tirigai, turakageru, turukageru, upapushpika, uttamabalam, venamrah, vrittapatra, vrkkabijah, vrkkaphalah, vrttarushkarah

in Indonesia: buwa jaki, buwa yakis, buwah monyet, gaju, jambu dipa, jambu dwipa, jambu erang, jambu gajus, jambu jipang, jambu mede, jambu mete, jambu monye, jambu monyet, jambu parang, jambu sempal, jambu seran, jambu siki, jangus gajus, jhambhu monyet, kanoke, masapana, nyambu monyet, nyambu nyebet

in Japan: kashu-nato

in Malaysia: gajus, jambu bongkok, jambu gajus, jambu golok, jambu monyet, janggar, janggas, kanjus, keterek, terek

in Thailand: ma-muang-himma-phan, mamuang him-maphan, mamuang letlor, muang-let-lo, thai-lo, ya-ngai, ya-ruang, yaruang

in Vietnam: cây diêu, dào lôn hôt

Anacolosa (Blume) Blume Olacaceae

Greek *anakolouthos* (*a* and *akoloutheo* ‘to follow one in a thing, to resemble’) ‘wanting sequence’, *anakoulouthia* ‘want of sequence’, possibly referring to the inflorescence or to the small calyx; see *Museum Botanicum*. 1(16): 250, t. 46. 1851 [Jul 1850 publ. early 1851] and *Index Nominum Genericorum* 1 (1979) 77. 1979.

Anacolosa crassipes Kurz

India. Aromatic leaves

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 44(3): 153. 1876 [1875 publ. 13 Jan 1876]

(Leaves decoction as a bath for measles and skin eruptions in children.)

in India: lushainatur

Anacolosa densiflora Bedd.

India.

See *Madras J. Lit. Sci.* Ser. III, i. (1864) 38. 1864

(Used in Sidha.)

in India: kaiyati, kal manikkam, kalmanicum, kalmanik-kam, kanamadakku, kanamaduku, kanamatakku, kanayam, kattu ockkali, katu vekkali, keiadi, malamkara, malankara, nettamadakku, nettamatakku

Anacyclus L. Asteraceae

Contracted form of *anathocyclus*, from Greek *a* ‘without’, *anthos* ‘flower’ and *kyklos* ‘a circle, ring’, referring to the asymmetric corollas or to the circle of ovaries surrounding the disk; see Carl Linnaeus, *Species Plantarum* 892. 1753 and *Genera Plantarum* Ed. 5. 381. 1754.

Anacyclus clavatus (Desf.) Pers. (*Achillea biaristata* Spreng.; *Anacyclus candollei* Nyman; *Anacyclus capillifolius* Maire; *Anacyclus divaricatus* Cav. ex Balb.; *Anacyclus pedunculatus* (Desf.) Pers.; *Anacyclus pubescens* (Willd.) Rchb. ex Link; *Anacyclus pubescens* Rchb.; *Anacyclus tomentosus* DC.; *Anthemis biaristata* DC.; *Anthemis clavata* Desf.; *Anthemis clavata* L.; *Anthemis incrassata* (Hoffmanns. & Link) Link; *Anthemis pedunculata* Desf.; *Anthemis pubescens* Willd.; *Anthemis tomentosa* Gouan; *Anthemis tubaeformis* Guss.; *Chamaemelum incrassatum* Hoffmanns. & Link)

Europe.

See *Syn. Pl.* 2: 465. 1807 and *Plant Systematics and Evolution* 123: 35–54. 1974, *Plant Systematics and Evolution* 126: 107–148. 1976, *Botaniska Notiser* 131: 391–404. 1978, *Anales del Jardín Botánico de Madrid* 38: 273–280. 1981, *Protoplasma* 111: 83–86. 1982, *Candollea* 45: 65–74. 1990, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 1: 303–364. 1991, *Flora Mediterranea* 3: 187–210. 1993, *Sida* 17(3): 627–629. 1997, *Lagasalia* 20(2): 302–308. 1998, *Lagasalia* 21(1): 149–154. 1999

(Irritant, associated with toxic effects.)

in English: longwort, whitebuttons

Anacyclus officinarum Hayne

Africa.

(Very pungent roots. Irritant. Associated with toxic effects.)

in English: German pellitory, pellitory

Anacyclus pyrethrum (L.) Link (*Anacyclus pyrethrum* (L.) Cass.; *Anacyclus pyrethrum* (L.) Lag.; *Anacyclus pyrethrum* DC.; *Anacyclus pyrethrum* Schrad.)

North Africa, Mediterranean.

See *Species Plantarum* 2: 892. 1753, *Elenchus Plantarum* 2. 1816 and *Plant Systematics and Evolution* 126: 107–148. 1976, *Planta Med.* 60(1): 37–40. 1994, *Mutat. Res.* 343(1): 25–30. 1995, *J. Ethnopharmacol.* 88(2–3): 155–60. 2003

(Used in Ayurveda, Unani and Sidha. Immunostimulating, insecticide, sialogogue, a tonic to the nervous system, a treatment for epilepsy, paralysis, hemiplegia, for sore throat and tonsils. The extracts of *Anacyclus pyrethrum* traditionally used in India during the preparation of chewable tobacco. Containing a volatile oil once used to relieve toothache. It is believed that application of this herb to the skin stimulates the nerve ends that may result in redness and irritation accompanied by a hot, burning sensation. Root, used as a rubefacient, is a powerful irritant to the skin; dermatitis and contact dermatitis can occur. Overdoses may result in irritation.)

in English: Algerian pellitory, longwort, mayweed, pellitory, pellitory-of-Spain, Roman pellitory, Roman pyrethrum, Spanish chamomile, Spanish chamomile, Spanish pellitory

in India: aaqarqarha, aakala kaare, aakala kari, agargarha, agarq arha, agragrahi, agrakaram, akalkara, akallaka, akarakala, akarakalabha, akarakara, akarakarabha, akarakarab-hah, akarakaram, akarakarava, akarkala, akarkara, akarkara asli, akarkara sigapuri, akirakaram, akkala kara, akkala-kara, akkalkaaraa, akkalkara, akkara karam, akkarakaram, akkikkaruka, akkirakaaram, akkirakaram, akkikaruva, akkirakkaram, akkravu, akorkaro, akrakara, akrakaram, aqar karha, aqar qarha, aqarqara, aqarqarha, aquarqarha, audul-qarha, udal-qarha

in Thailand: kot kak kra

Anadenanthera Spegazzini Fabaceae (Leguminosae, Mimosaceae, Mimoseae)

Greek *ana* 'without', *aden* 'a gland' and *anthera* 'anther'; see Carlo Luigi Spegazzini (1858–1926), in *Physis*. Revista de la Sociedad Argentina de Ciencias Naturales (Buenos Aires) 6: 313. 1923, Altschul, S. von R. "A taxonomic study of the genus *Anadenanthera*." *Contributions from the Gray Herbarium of Harvard University* 193: 3–65. 1964, *Current Anthropology* 12(1): 72–74. 1971, *Bot. Mus. Leaflet* 26(9–10): 311–332. 1978, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334–538. 1988, *Current Anthropology* 32: 640–649. 1991, *Chungará* (Arica) 30(1): 49–63. 1998, *Forensic Science International* 108(3): 173–179. 2000, Constantino Manuel Torres and David B. Repke, *Anadenanthera: Visionary Plant of Ancient South America*. The Haworth Press 2006.

Anadenanthera colubrina (Vell.) Brenan (*Acacia cebil* Griseb.; *Acacia colubrina* Mart.; *Acacia grata* Willd.; *Anadenanthera colubrina* var. *cebil* (Griseb.) Psychoactive Drugs* 34(3): 273–279. 2002 (Psychoactive, ceremonial, hallucinogenic snuff, *yopo* or *niopo*, made from the roasted crushed seeds.)

in South America: cohoba, niopo, yopo

Anagallis L. Primulaceae

Anagallis was an ancient Greek name applied by Dioscorides to primula or pimpernel, from *ana* 'up, back again, upward, like' and *agallo* 'to adorn, to bloom'; according to Homer *agallis* was the dwarf iris; see Carl Linnaeus, *Species Plantarum* 1: 148–149. 1753 and *Genera Plantarum* Ed. 5. 73. 1754.

Anagallis arvensis L. (*Anagallis arvensis* subsp. *phoenicea* (Scop.) Schinz & R. Keller; *Anagallis arvensis* subsp. *phoenicea* (Scop.) Vollm.; *Anagallis arvensis* var. *phoenicea* (Scop.) Gren. & Godr.; *Anagallis latifolia* L.; *Anagallis phoenicea* Scop.)

Europe, China, India. Herb, fodder

See *Flora Carniolica*, Editio Secunda 1: 139–140. 1772, *Flore de France* 2: 467. 1852 and *Berichte der Bayerischen*

Botanischen Gesellschaft zur Erforschung der Heimischen Flora 9: 44. 1904, *Flora der Schweiz* 1: 419. 1909, *Fl. Southern Africa* 26: 14. 1963, Chen Feng-hwai, Hu Chi-ming, Fang Yun-yi, Cheng Chao-zong, Yang Yong-chang & Huang Rong-fu In Chen Feng-hwai & Hu Chi-ming, editors. *Primulaceae* (1). *Fl. Reipubl. Popularis Sin.* 59(1): 1–217. 1990, *Fl. Ecuador* 39: 23–35. 1990, Hu Chi-ming. In: Chen Feng-hwai & Hu Chi-ming, editors. *Primulaceae* (2). *Fl. Reipubl. Popularis Sin.* 59(2): 1–321. 1990

(Used in Unani. A potentially toxic plant, seeds slightly poisonous to some mammals, several toxins have poisoned livestock, and an irritant in the plant hairs can cause allergies and dermatitis in humans. Strongly antifungal, nematocida, stimulant and vulnerary, whole herb antitussive, cholagogue, diaphoretic, diuretic, expectorant, purgative, used in the treatment of dropsy, gout, leprosy and hydrophobia. Grounded whole plant or dried seeds given in diphtheria among children and cattle. Veterinary medicine, ground whole plant or dried seeds given in diphtheria among cattle to expel the leeches; whole plant given to expel leech; plant juice poured into nostrils of cattle. Roots and whole plant as fish poison.)

in English: bird's eye, blue pimpernel, common pimpernel, eye-bright, pimpernel, poison-chickweed, poor-man's-weatherglass, red chickweed, scarlet pimpernel, shepherd's calendar, shepherd's-clock, shepherd's weather glass

in Arabic: 'ain el-gamal

in South Africa: blouselblommetjie, pimpernel, rooimuur

in China: liu li fan lu

in India: aniccam, armale, buchbucha, culliver, dharti-dhak, hasheeshat-ul-alaq, jainghami, jankenavi, jonkmari, mewali, nakamalli, neel, sooryakaanthi soppu, suryakanthi soppu

in Japan: akabana-ruri-hakobe, ruri-hakobe

in Nepal: armale, krishnanil

Anagyris L. Fabaceae (Thermopsidae)

Latin *anagyros* and Greek *anagyros* for a strong-scented and pod-bearing shrub, bean-trefoil, flowers and most of the plant gives off a strong fetid smell of spoiled beans; Greek *ana* 'up, back again, backwards' and *gyros* 'a ring', referring to the curvature of the pods, see *Species Plantarum* 1: 374. 1753 and *Arboretum Koruickie* 23: 5–30. 1978.

Anagyris foetida L. (*Anagyris foetida* Lour.; *Anagyris neapolitana* Ten.)

Mediterranean, Southern Europe, North Africa. Perennial non-climbing shrub, intricate branches, trifoliate velvety leaves fetid when crushed, yellow flowers, different types of dark blotches on the standard petal, backward curving seed pods, pollination by birds, forage

See *Flora Cochinchinensis* 260. 1790 and *Fl. Libya* 86: 9. 1980, *Pharmaceutical Biology* 28(2): 139–144. 1990, *Fitoterapia* 77(7–8): 595–597. 2006, *Scientia Pharmaceutica (Sci. Pharm.)* 75: 121–136. 2007

(Toxic parts, all but particularly seeds. Leaves cathartic, laxative, purgative, antibacterial, antiproliferative, cytotoxic, mutagenic, antifungal, emetic, pectoral, vermifuge, used for headache, hair loss, constipation, amenorrhoea, inflammation of kidney, lithiasis. Quinolizidine alkaloids.)

in English: bean-clover, bean trefoil, Mediterranean stink-bush, purging trefoil, stinking bean trefoil, stinking wood

in French: bois puant, fève de loup

in Italian: carrubazzo, legno puzzo

in Spanish: hediondo, oro de risco

in Arabic: habb al-kulâ, kharroub el-khinzir, kharroub el-maiz, kharroub kelb, kharroub maiz

in Malta: fula tal-klieb

Anamirta Colebr. Menispermaceae

Elephant *Tinospora*, probably from *anamrytu* or *anai-amyr-tavalli*, a Tamil name, this genus is bigger and larger than the allied *Tinospora* Miers, see *Genera Plantarum* 284–285. 1789, *Trans. Linn. Soc. London* 13(1): 52, 66. 1821.

Anamirta cocculus (L.) Wight & Arn. (*Anamirta cocculus* Wight & Arn.; *Anamirta paniculata* Colebr.; *Anamirta paniculata* L.; *Cissampelos cocculus* Poir.; *Cocculus populifolius* DC.; *Cocculus suberosus* DC.; *Menispermum cocculus* L.; *Menispermum lacunosum* Lam.)

India, Sri Lanka, Indonesia, Thailand. Climbing shrub, liana, stem twisting to the left, wood exuding white milky sap when cut, inflorescence a cauliflorous panicle spreading or pendulous, shortly pedicellate unisexual flowers strongly fragrant, petals absent, dark purple drupe, seed deeply cup-shaped

See *Hort. Malab.*, 7: 1, t. 1. 1688, *Species Plantarum* 1: 340–341. 1753, *Syst. Nat.* [Candolle] 1: 519. 1817 [1818 publ. 1–15 Nov 1817], *Trans. Linn. Soc. London* 13(1): 66. 1821 [23 May–21 Jun 1821], *Prodr. Fl. Ind. Orient.* 1: 446. 1834 and *Kew Bulletin* 32: 330. 1978, *Taxon* 28: 269. 1979

(Used in Ayurveda, Unani and Sidha. The fruit and especially the seed contain picrotoxin, a very strong poison; picrotoxin has been used intravenously as an antidote against poisoning by barbiturates and morphine. Aerial part hypotensive, anticancer and diuretic; fruits bitter, astringent, thermogenic, expectorant, antifungal, anthelmintic and depurative. Fruits and seeds made into an ointment for external application to treat skin diseases; fruit juice applied externally to ulcers and scabies; seeds applied to kill head lice; its smoke repels the insects, bugs and mosquitoes. Roots infusion to treat fevers, dyspepsia and menstrual problems. Leaves a

poultice for headache, stomachache or delayed menstruation; tender leaves used for the contraction of the uterus immediately after delivery. Fruit and seeds used as a fish poison and insecticide.)

in English: crow killer, fish-berry, Indian berry, Levant berry, Levant nut, poison berry

in Cambodia: seg dom

in India: anakrytu, anamrytu, cantiropan, chiplothi, chip-pula kaayi, chipula kolli, chipulu, ciplotte, cipullukolli, cipulu, dhvankshanakhi, garalaphala, garaphala, garuda phala, garudaphal, haenu beeja, jermae, kaage maari, kaagemaari, kaaka maari, kaakamaari, kaaki chempa, kaaki soppu gadde, kaakkisoppu gade, kaakmaari, kaandakonuveh, kaarvi, kadu-phal, kagemari, kaipathumkai, kaka-mari, kakadani, kakahva, kakakulli, kakamari, kakamari-bija, kakanacam, kakanashika, kakaphala, kaki-champa, kakichempoo, kakinicampacettu, kakisoppugadde, kakka-kolyvirai, kak-kai-k-kolli, kakkai kolli, kakkaikolli, kakkakolivirai, kakka-kolyvirai, kakkay-k-kolli, kakkay-kolli-virai, kakkay kolli, kakkaykolli, kakkaykolli, kakkaykollivirai, kakkisoppugade, kakmari (kak, crow, mari, killer), kakmari-ke-binj, kalabati nai, kallakkaya, kankakonnivehi, kankakunavam, kaphala, karanta-kattin-kaya, karantakam, karwi, kaumari, kayamari, kodi thige, koditige, kollakkaya, mahie zahraj, mahijehreh, meenu, minnannu, miunannu, muratayam, nacattinkayi, naccattinkaya, nancukkottai, naicikam, nanjinkuru, nanjukuru, nanninkuru, pala, pellakkaya, penkottai, pen-kottai, penkottai, pettumarunnu, polla, pollaconuveh, pollak-kaya, pollakkaya, pullukunavam, raktala, rakthala, raktika, thippathige, tippatige, vayacam, zaharimahi (zahari, poisonous; mahi, fish)

(Used in Ayurveda, Sidha and Unani. Mechanical damage from sharp-pointed leaves; injuries caused by spines. Sap from leaves poisonous. Irritant dermatitis, ingestion of large quantities of raw pineapple and/or sap from leaves, mild skin irritation from contact with juice. Leaves and unripe fruits can cause abortion. Fresh juice of basal portion of tender leaves given in urinary troubles; juice of the young leaves given to expel intestinal worms; for venereal diseases, drink leaves decoction mixed with white sugar. Fruit decoction,

together with leaves from *Cassia occidentalis*, taken as a beverage against the fever; fruit juice antiscorbutic; reported that the young fruit is eaten raw as a contraceptive agent; unripe fruits juice given as cooling agent. Roots for improvement of kidney function; roots decoction astringent, antiinflammatory, for diarrhea, stomachache, indigestion.)

(Plant infusion taken for colds. Crushed/bruised leaves applied to cuts and wounds.)

in India: buglu

Anaphalis triplinervis (Sims) C.B. Clarke (*Antennaria triplinervis* Sims; *Gnaphalium cynoglossoides* Trevis.; *Gnaphalium perfoliatum* Wall., nom. nud.)

India, Nepal. Herb, flowers white, papery leaves with white hairs

See *Species Plantarum* 2: 850–857. 1753, *De Fructibus et Seminibus Plantarum...* 2(3): 410, pl. 167, f. 3. 1791, *Botanical Magazine* 51: pl. 2468. 1824, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 13(1): 200. 1826, *A Numerical List of Dried Specimens* [Wallich] n. 2937. 1831, *Compositae Indicae* 105. 1876

(Root infusion for diarrhea; powdered roots given in cold, stomach disorders and also to heal scars. Used for moxibustion.)

in English: pearly everlasting

in India: bacha-chi, bugla, buglya

in Tibet: spra ba

Anaphyllum Schott Araceae

From *ana* ‘like, up’ and *phyllon* ‘leaf’, referring to the leaves; see *Bonplandia* (Hanover) 5: 126. 1857 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Anaphyllum wightii Schott

India. Tuberos herbs, erect rootstock, dark violet spathe linear to oblong

See *Genera Aroidearum exposita* t. 83. 1858 and *Cytologia* 43: 289–303. 1978

(Cooked rhizomes eaten against snakebite; rhizome paste applied on snake-bitten spot as an antidote, to relieve pain and swelling.)

in India: keeri kilangu, keeri kizhangu, keerikizhangu, ottapadam

Anastatica L. Brassicaceae (Cruciferae)

Greek *anastasis* ‘resurrection, awakening’, *anistemi* ‘to raise up, to raise from the dead’, when placed in water the plant recovers.

Anastatica hierochuntica L.

Algeria, Arabian Peninsula. Herb, minute white flowers, curls its branches and seedpods inward in the dry season, desert plant

See *Species Plantarum* 2: 641. 1753 and *Regnum Veg.* 127: 18. 1993, *Egyptian Journal of Microbiology* 35(2): 257–271. 2000, *Egyptian Journal of Biology* 4: 87–94. 2002, *Bioorganic & Medicinal Chemistry Letters* 13(6): 1045–1049. 2003, *Journal of Ethnopharmacology* 105: 358–367. 2006, *Journal of Ethnopharmacology* 116(2): 341–357. 2008

(Plant extract antimicrobial; whole plant decoction laxative, hepatoprotective, cathartic, oxytocic, for diabetes, asthma. Seeds grinded and cooked, the syrup increases fertility. Magic, ritual. Veterinary medicine, seeds in situ, contraceptive for cattle)

in English: resurrection-plant, rose-of-Jericho, St. Mary’s flower, Virgin’s hand

in Algeria: akaraba, komchet en nebbi

in Arabic: haddaq, kaff mariam, shagret mariam

Anaxagorea A. St.-Hil. Annonaceae

After Anaxagoras, b. c. 500 BC., Clazomenae, Anatolia [now in Turkey]—d. c. 428, Lampsacus, the Greek philosopher of the Ionian school, remembered for his cosmology and for his discovery of the true cause of eclipses, a friend and teacher of Euripides and the Athenian statesman Pericles. See *Bull. Sci. Soc. Philom. Paris* 1825: 91. 1825, *Anaxagorae Clazomenii fragmenta quae supersunt omnia (graece), collecta commentarioque ab Eduardo Schaubach: accedunt de vita et philosophia Anaxagorae commentationes duae*. Lipsia 1827, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 5: 211. 1832, *Flora Brasiliensis* 13(1): 40. 1841 and *Fieldiana, Bot.* 24(4): 270–294. 1946, J. Zafropulo, *Anaxagore de Clazomène*. 1948, F.M. Cleve, *Philosophy of Anaxagoras*. 1949, *Proc. Kon. Ned. Akad. Wetensch.*, C 87(3): 297–303. 1984, *Bot. Jahrb. Syst.* 105(2): 145–204. 1985, *Bot. Jahrb. Syst.* 115(1): 77–95. 193, *Estud. Div. Ecol. Pl.* 97–122. 1997.

Anaxagorea dolichocarpa Sprague & Sandwith (*Anaxagorea megalophylla* R.E. Fr.; *Anaxagorea mutica* R.E. Fr.)

Guyana, Peru.

See *Bulletin of Miscellaneous Information Kew* 1930: 475. 1930, *Acta Horti Bergiani* 12(1): 19–20. 1934, *Revista Boliviana Ecol. Cons. Amb.* 7: 93–114. 2000

(Root bark an ingredient of curare, dart poison.)

Anaxagorea javanica Blume

Java. Tree or shrub with grey smooth stem, oblong leaves, fragrant flowers terminal and opposite leaves, six petals or reduced to 3 or 2, club-shaped splitting fruit, shiny black seeds

See *Bull. Sci. Soc. Philom. Paris* 1825: 91. 1825, *Flora Javæ* 66, t. 32, 36A. 1830 and *The Gardens' Bulletin Singapore* 14(2): 149–516. 1955, *Systematic Botany* 30: 712–735. 2005, *American Journal of Botany* 93: 36–54. 2006

(Flowers tonic.)

in English: twin-seed

in India: girmo

in Malaya: bunga pompun, kekapur

in Thailand: champun

Anaxagorea javanica Blume var. *tripetala* Corner

Thailand. Shrub or small tree, fragrant flowers, three petals

See *Gardens' Bulletin, Straits Settlements* 10: 12. 1939, *The Gardens' Bulletin Singapore* 14(2): 149–516. 1955, *Thai Journal of Phytopharmacy* 12(1): 9–11. 2005

(Flowers heart tonic, whole plant mixed with *Desmos chinensis* Lour. whole plant, bath for rehabilitation of drug addicts.)

in Thailand: champun betong

Anaxagorea luzonensis A. Gray

Philippines.

See *United States Exploring Expedition* 1: 27. 1854 and *Chem. Pharm. Bull.* (Tokyo). 48(8): 1219–1222. 2000

(Cyanogenesis. Antioxidant activity.)

Anaxagorea petiolata R.E. Fr.

Guyana.

See *Lloydia* 2: 179. 1939

(Root bark an ingredient of curare, dart poison.)

Anaxagorea rufa Timmerman

Colombia.

See *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 87(3): 301. 1984

(Root bark an ingredient of curare, dart poison.)

Anaxagorea scortechinii King

SE Asia.

See *Journal of the Asiatic Society of Bengal* 61: 68–69. 1893

(Root decoction for childbirth.)

Malay name: sekobang kechil

Anchietea A. St.-Hil. Violaceae

For the Jesuit missionary (“Apostle of the New World”, “Apostle of Brazil”) José (Joseph) de Anchieta (Anchietta), 1533–1597, naturalist, studied at the University of Coimbra, in 1533 arrived at Bahia, among his works are *Arte de grammatica da lingua mais usada na costa do Brasil*. Coimbra 1595, [De beata virgine dei matre Maria.] *O Poema da Virgem*. Rio de Janeiro [1954-], *Poesias*. 1954 São Paulo, *Epistola quamplurimarum rerum naturalium, quae S. Vincentii -nunc S. Pauli- provinciam incolunt, sistens descriptionem*. [see Academia das Ciencias de Lisboa. Collecção de Noticias para a Historia e Geografia das Nações Ultramarinas, etc. tom. 1.] Lisbon 1812 and *Informações e fragmentos historicos*. Rio de Janeiro 1886. See Sebastiano Berettari (P. Sebastiano Beretario, S.J.), *Iosephi Anchietae, Societatis Jesu sacerdotis, in Brasilia defuncti vita*. Lugduni 1617, P. Simão de Vasconcellos, S.J., *Chronica da Companhia de Iesu do Estado do Brasil*. Lisbon, Henrique Valente de Oliveira 1663, P. Simão de Vasconcellos, S.J., *Vida do veneravel Padre Joseph de Anchieta da Companhia de Iesu, Taumaturgo do Nouo Mundo, na Provincia do Brasil*. Lisboa, Joam da Costa 1672, *Annales des Sciences Naturelles* (Paris) 2: 252. 1824, *Mém. Mus. Par.* xi. (1824) 464. 1824, *Repertorium Botanicæ Systematicæ*. 1(2): 223. 1842 and Gustavo Edwall, “Ensayo para uma sinonimia dos nomes populares das plantas indigenas do estado de São Paulo, 2a parte.” *B. da Comissão*

Geographica e Geologica do estado de São Paulo. São Paulo 16: 3–63. 1906, Theodoro Peckolt, “Cipó suma.” *Chacaras e Quintaes*. 55(1): 57. São Paulo (jan.) 1937, Carlos Stellfeld, “As drogas da farmacopéia paulista.” *Tribuna Farmacêutica*. 20(7): 89–97. Curitiba 1952 and “As drogas vegetais da farmacopéia brasileira em face do sistema taxonômico.” *Tribuna Farmacêutica*. 7(11): 221–237. 1939, Hildegardo de Noronha, “Propósito dos cipós medicinais do Brasil.” *R. Brasileira de Farmácia*. 45(3): 151–159. Rio de Janeiro 1964, L. Polgar, *Bibliography of the History of the Society of Jesus*. Rome 1967, Ruben Borba de Moraes, *Bibliographia brasiliana*. I: 99 and II: 888–890. University of California 1983, J. Alden and D.Ch. Landis, *European Americana: A Chronological Guide to Works Printed in Europe Relating to Americas*. 1473–1776. New York 1980–1988. Some suggest an origin from the Greek *anchi*, *agchi* ‘near, like’ and *etes* ‘a fellow, neighbour, mate, associate’, referring to the medicinal properties of this genus, so similar to those of *Hybanthus*, see H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 60. Basel 1996.

Anchietea frangulaefolia Melch. (*Anchietea frangulifolia* Melch.; *Noisettia frangulifolia* Kunth)

South America. Vine

See *Notizblatt des Botanischen Gartens und Museums von Berlin-Dahlem* 9: 169. 1924

(Purgative.)

in English: vine of the rabbit

in Colombia: conejo huasca

Anchietea salutaris A. St.-Hil. (*Anchietea parvifolia* Hallier f.; *Anchietea pyrifolia* A. St.-Hil., nom. inval.; *Anchietea pyrifolia* G. Don; *Anchietea pyrifolia* (Mart.) G. Don; *Anchietea salutaris* var. *hilariana* Eichler; *Anchietea salutaris* var. *hilariana* (A. St.-Hil.) Eichler; *Noisettia pyrifolia* Mart.)

South America.

See *Nov. Gen. Sp. Pl.* (Martius) i. 24. 1823–1832, *Annales des Sciences Naturelles* (Paris) 2: 252. 1824, *Histoire des plantes les plus remarquables du Bresil ...* 290. 1826, *A General History of the Dichlamydeous Plants* 1: 340. 1831, *Flora Brasiliensis* (Martius) 13(1): 354, pl. 70, f. 1A. 1871 and *Mededeelingen van's Rijks-Herbarium* 19: 64. 1913, *Rodriguésia* 27(39): 174. 1974

(Alkaloids.)

Anchomanes Schott Araceae

Greek *ancho* ‘to bind, to strangle’ and *maino*, *mainomai* ‘to be furious, rave, to be mad with wine’; see *Oesterreichisches Botanisches Wochenblatt* 3: 314. 1853 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 60–61. Basel 1996.

Anchomanes difformis (Blume) Engl. (*Amorphophallus difformis* Blume; *Anchomanes dalzielii* N.E. Br.; *Anchomanes difformis* var. *obtusus* (A. Chev.) Knecht; *Anchomanes difformis* var. *welwitschii* (Rendle) Engl.; *Anchomanes dubius* Schott; *Anchomanes hookeri* (Kunth) Schott; *Anchomanes hookeri* var. *pallidus* Hook.; *Anchomanes obtusus* A. Chev.; *Anchomanes petiolatus* (Hook.) Hutch.; *Anchomanes welwitschii* Rendle; *Caladium petiolatum* Hook.; *Pythonium hookeri* Kunth; *Sauromatum ferox* Linden ex Engl.)

Tropical Africa, Nigeria. Herbaceous, stout prickly stem, horizontal tuber, huge much-divided leaf, rhizome everywhere eaten in time of scarcity but only after special preparation, gorillas eat stem and leaves

See *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 366–367. 1834, *Rumphia* 1: 149. 1837, *Bot. Mag.* 66: t. 3728. 1840, *Genera Aroidearum exposita* 33. 1858, *Bot. Mag.* 89: t. 5394. 1863, *Monographiae Phanerogamarum* 2: 304–305. 1879 and *Fl. W. Trop. Afr.* 2: 359. 1936, *Acta Hort.* (ISHS) 96: 55–64. 1980, *J. Ethnopharmacol.* 40(1): 1–19. 1993, *African Journal of Biotechnology* 2(9): 317–321. 2003, *Toxicicon* 44(4): 417–430. 2004, *Phytothérapie* 3(6): 252–259. 2005, *Journal of Pharmacology and Toxicology* 2 (4): 407–410. 2007

(Not toxic for mice, the lyophilized rhizome very toxic for Guinea-pigs; toxicity and the hemorrhagic troubles highly attenuated after boiling for long time. Irritant. Leaf, stem and tuber antimicrobial, trypanocidal, molluscicidal, insecticidal, abortifacient, antidote, laxative, diuretic; extract of tubers soaked in water in the treatment of dysentery, dropsy, edema, tuberculosis, venereal diseases, diabetes, stomachache, lactation, swellings, venomous stings, bites. Root tubers sap for naso-pharyngeal affections, as eye drop; paste rubbed around teeth to cure infected gums. Roots and leaves rubefacient, for cough, constipation, edema. Crushed leaves oxytocic, for infertility. Veterinary medicine, lactogenic. Magic, ritual, superstitious practices, fruiting spadix with red berries a love-charm, corm used in making sacrifice to the dead. Used for poison fishing.)

in English: children’s umbrella, children’s umbrella tree, forest anchomanes, God’s umbrella

hantsar gada, hántsàr gàdaá, hántsàr giawaá, hantsar giwa, igo, lángbòdò, oje, okpokomighede, olikhoror, olumahi

in Senegal: éken

in Sierra Leone: a-thongbothigba, alatala-kunde-na, kalilugbo

in Togo: adanlé, nau

in Upper Volta: dé

Anchomanes giganteus Engl.

W.C. Tropical Africa. Shrub, erect, rhizomatous, leaves covered with thorns on rachis and petiole, red fruit

See *Bot. Jahrb. Syst.* 26: 419. 1899

(Petiole decoction for skin diseases.)

in Burundi: ikinyamateke, ikisuunzu

in Zaire: ikondo á mósombo, makondo má básombo

Anchusa L. Boraginaceae

Latin *anchusa* for a plant used as a cosmetic, ox-tongue (Plinius), Greek *ankousa* ‘alkanet’, cosmetic paint for the skin; see Carl Linnaeus, *Species Plantarum*. 1: 133–134. 1753 and *Genera Plantarum*. Ed. 5. 64. 1754.

Anchusa ovata Lehmann (*Anchusa arvensis* M. Bieb. subsp. *orientalis* (L.) Nordh.; *Anchusa orientalis* L.; *Anchusa orientalis* (L.) Reichenbach, nom. illeg.; *Lycopsis arvensis* L. subsp. *orientalis* (L.) Kuntze; *Lycopsis erecta* d’Urv.; *Lycopsis micrantha* Ledeb.; *Lycopsis orientalis* L.; *Lycopsis taurica* Stev.)

N.E. Africa, S.E. Europe, C. Asia. Herb, erect, corolla blue-purple to reddish purple

See *Species Plantarum* 1: 138–139. 1753, *Flora Taurico-Caucasica* 1: 123. 1808, *Plantae e Familiae Asperifoliarum Nuciferae* 1: 122. 1818, *Icones florae germanicae et helveticae* 18: 73. 1858, *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 10: 216. 1887 and *Norsk Flora* 526. 1940, *Taxon* 53(3): 800. 2004

(Chinese medicinal herb.)

in China: lang zi cao

Anchusa strigosa Banks & Sol. (*Anchusa strigosa* Labill.)

Syria.

See *Bocconeae, Monographiae Herbarii Mediterranei Panormitani* 3: 229–250. 1992, *Phytochemistry* 48(2): 217–221. 1998, *Journal of Ethnopharmacology* 60(3): 189–198. 1998, *Planta Medica* 69: 835–841. 2003, *Phytochemistry* 66(13): 1593–1600. 2005

(Used in Ayurveda. Root extracts anti-ulcer, pepsin inhibition. Flowers, leaves, and roots antifeedant. Skin diseases, respiratory system.)

in India: gojihva, manu

Ancistrocarpus Oliver Tiliaceae (Malvaceae)

From the Greek *ankistron* ‘fish-hook’ and *karpos* ‘fruit’, see *Journal of the Linnean Society, Botany* 9: 173. 1865 [1867 publ. 1865].

Ancistrocarpus densispinosus Oliv.

Tropical Africa. Liana, shrub or treelet, yellow flowers, spiny fruits

See *Journal of the Linnean Society, Botany* 9: 174. 1865 [1867 publ. 1865]

(Juice antiinflammatory, for wounds, headache.)

in Congo: tsumou, tsumu

in Yoruba: iwaja

Ancistrocladus Wall. Ancistrocladaceae

Hooked branch, from the Greek *ankistron* ‘fish-hook’ and *klados* ‘a branch’, referring to the climbing hooks, the supra-axillary branches are hooked, see *Fl. Cochín.* 282. 1790, *Skr. Naturhist.-Selsk.* 6: 105. 1810, *A Numerical List of Dried Specimens* [Wallich] n. 1052. 1829, *Prodr. Fl. Ind. Orient.* 1: 107. 1834, *Genera Plantarum* 1183. 1840, *Annales des Sciences Naturelles; Botanique, sér. 3, 13:* 316. 1849, *Annales Botanices Systematicae* 2: 175. 1851, *Fl. Brit. India* 1: 299. 1874 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 21: 580. 1925, *Novon* 2(3): 238. 1992, Taylor, C. M., R. E. Gereau & G. M. Walters. “Revision of *Ancistrocladus* Wall. (Ancistrocladaceae).” *Annals of the Missouri Botanical Garden* 2005.

Ancistrocladus abbreviatus Airy Shaw

Sierra Leone.

See *Kew Bulletin* 1949: 67. 1949, *Kew Bulletin* 1950: 148. 1950, *Phytochemistry* 31: 4011–4014. 1992, *Journal of Ethnopharmacology* 46(2): 115–120. 1995, *Ann. Missouri Bot. Gard.* 92(3): 373 (–374). 2005

(Aerial parts antiprotozoal, for malaria, measles, fevers.)

Ancistrocladus attenuatus Dyer

India. Climber, leaves oblanceolate, lobes of fringed calyx unequal

See *Fl. Brit. India* [J.D. Hooker] 1: 300. 1874

(Astringent, febrifuge.)

Ancistrocladus barteri Scott-Elliot (*Ancistrocladus barteri* Tiegh.)

Sierra Leone. Vine

See *Journal of the Linnean Society, Botany* 30: 73. 1894 [1893–1895 publ. 1894] and *Journal of Botany, British and Foreign* 17: 154. 1903, *Kew Bulletin* 1950: 148. 1950, *Journal of Ethnopharmacology* 46(2): 115–120. 1995

(Antiprotozoal, malaria.)

Ancistrocladus extensus Wall. ex Planch. (*Ancistrocladus extensus* Wall.)

India, Nicobar, Burma. Climbing shrub, hooked branches, leaves coriaceous, pinkish-white flowers in panicles

See *Num. List* [Wallich] n. 1052. 1828, *Annales des Sciences Naturelles; Botanique*, sér. 3 13: 318. 1849 and *Contrib. Biol. Lab. Sc. Soc. China* v. NO. 5, 44. 1929

(Roots in dysentery and malaria.)

Ancistrocladus extensus Wall. ex Planch. var. *pinangianus* (Wall. ex Planch.) King (*Ancistrocladus pinangianus* Wall. ex Planch.; *Ancistrocladus pinangianus* Wall.)

Malay Peninsula.

See *Num. List* [Wallich] n. 1052, 1054. 1828, *Annales des Sciences Naturelles; Botanique*, sér. 3 13: 318. 1849, *Journal of the Asiatic Society of Bengal* 42: 137. 1893

(Roots in dysentery and malaria.)

Malay name: akar julong hitam

Ancistrocladus heyneanus Wall. ex J. Graham (*Ancistrocladus heyneanus* Wall.)

India. Tropical liana

See *A Catalogue of the Plants Growing in Bombay and its Vicinity* 28. 1839, *Pl. Ind. Or.* vi. tt. 1987–88. 1853 and *Planta Medica* 63(3): 255–257. 1997, *Biospectroscopy* 4(2): 113–120. 1998, *Tetrahedron Letters* 44(31): 5827–5829. 2003

(Antifungal, antimalarial, spasmolytic.)

in India: karatolal, kardali, kardol, kardor, modira-valli

Ancistrocladus korupensis D.W. Thomas & Gereau

Nigeria, Cameroon, Korup National Park. Liana, climbing, woody vine, hooked branchlets, aromatic flowers, fruit dark brown

See *Novon* 3(4): 494, f. 1. 1993, *J. Med. Chem.* 37(12): 1740–1745. 1994

(Antiviral, antimalarial. Anti-HIV michellamines isolated from the leaves, potential anti-AIDS.)

Ancistrocladus tectorius (Lour.) Merr. (*Ancistrocladus benomensis* Rischer & G. Bringmann; *Ancistrocladus carallioides* Craib; *Ancistrocladus cochinchinensis* Gagnep.; *Ancistrocladus extensus* Wall. ex Planch., nom. nud.; *Ancistrocladus extensus* Wall. ex Planch. var. *pinangianus* (Wall. ex Planch.) King; *Ancistrocladus hainanensis* Hayata; *Ancistrocladus harmandii* Gagnep.; *Ancistrocladus pinangianus* Wall. ex Planch.; *Bembix tectoria* Lour.)

Asia tropical, Peninsular Malaysia, Vietnam. Climber, bushy, woody vine, woody hooks, terminal inflorescence, small flowers, fleshy deep purple-pinkish petals, winged achenes

See *Fl. Cochinch.* 1: 282–283. 1790, *Annales des Sciences Naturelles; Botanique*, sér. 3 13: 318. 1849, *Fl. Brit. India* 1: 300. 1874, *Journal of the Asiatic Society of Bengal* 42, 2: 137. 1893 and *Notulae Systematicae*. *Herbier du Museum de Paris* 1: 114–115. 1909, *Icones plantarum formosananarum nec non et contributiones ad floram formosanam* 3: 46–47. 1913, *Bulletin of Miscellaneous Information Kew* 1925: 19. 1925, *Lingnan Sci. J.* 6(4): 329. 1930 [dt. 1928, issued in 1930], *Journal of Ethnopharmacology* 54(2–3): 125–130. 1996, *J. Nat. Prod.* 63(10): 1384–1387. 2000, *Pharmaceutical Biology* 39(5): 357–363. 2001, *Blumea* 50(2): 359, figs. 1–3. 2005

(Antiviral, parasitoid, antibacterial, antitumor, larvicidal, astringent. Roots for the treatment of malaria and dysentery; roots decoction used to improve blood circulation and also against malaria.)

in China: gou zhi teng

in Peninsular Malaysia: akar jejulong, akar julong hitam, akar rasul, lidah sapi

Ancylobothrys Pierre Apocynaceae

From the Greek *ankylos* ‘curved, crooked’ and *bothros* ‘a pit, abyss’, see *Bulletin Mensuel de la Société Linnéenne de Paris* (sér. 2) 1: 91–92. 1898 and *Wag. Agri. Univ. Pap.* 94(3): 4. 1994.

Ancylobothrys petersiana (Klotzsch) Pierre (*Ancylobothrys petersiana* Pierre; *Ancylobothrys rotundifolia* Pierre; *Ancylobothrys rotundifolia* (Dewèvre) Pierre; *Ancylobothrys petersiana* (Klotzsch) Pierre; *Ancylobothrys petersiana* var. *forbesiana* Pierre; *Ancylobothrys rotundifolia* (Dewèvre) Pierre; *Landolphia angustifolia* K. Andrographis Wallich ex Nees Acanthaceae

Greek *aner*, *andros* ‘man’ and *graphis* ‘brush, a style for writing, a needle’; see Nathaniel Wallich (1786–1854), *Plantae Asiaticae Rariores*. 3: 76–77, 106, 116. London 1830–1832 and *J. Econ. Taxon. Bot.* 23(1): 30–32. 1999.

Andrographis affinis Nees

India. Subshrub, thick leaves, racemes axillary and terminal, hispid glandular calyx-lobes, white corolla with purple streaks

See *Plantae Asiaticae Rariores* 3: 116. 1832

(For snakebite and fever, leaf juice drunk and leaf paste applied externally.)

Andrographis alata (Vahl) Nees (*Andrographis alata* Nees)

India. Erect undershrub, woody rootstock, white corolla

See *Prodr.* (DC.) 11: 516. 1847

(Leaf juice antipyretic, antiinflammatory; for snakebite and fever, leaf juice drunk and leaf paste applied externally; leaf paste applied for skin diseases. A constituent among many plants used in the preparation of an antileprosy drug. Veterinary medicine, whole plant.)

in India: periyangai

Andrographis atropurpurea (Dennst.) Alston (*Justicia atropurpurea* Dennst.)

India.

See Dennstedt, August Wilhelm (1776–1826), *Schlüssel zum Hortus Indicus Malabaricus* [von Rheedee] ... 35. Weimar, 1818 and *Taxon* 26(5–6): 539. 1977

(Febrifuge.)

in India: katu-karivi

Andrographis beddomei C.B. Clarke

India.

See *The Flora of British India* 4: 506. 1884

(Used in Ayurveda, Unani and Sidha.)

Andrographis echioides Nees (*Andrographis echioides* (L.) Nees; *Indoneesiella echioides* (L.) Sreem.; *Justicia echioides* L.)

India. Herb, procumbent to erect, flowers in axillary racemes, pink or white corolla densely pubescent

See *Sp. Pl.* 1: 16. 1753, *Plantae Asiaticae Rariores* 3: 117. 1832 and *Phytologia* 16: 466. 1968, *Taxon* 31: 593–595. 1982, *J. Econ. Taxon. Bot.* Addl. ser. 12: 214–217. 1996, *Ethnobotanical Leaflets* 12: 934–937. 2008, *Pharmacognosy Reviews* 2(3). Jan–Jun 2008

(Used in Sidha. Whole plant pounded in mustard oil and paste applied on snakebite, also whole plant dried and

powdered, mixed with water and drunk; whole plant decoction in fever, dysentery, stomachache and liver disorders. Leaves juice used as a febrifuge, cathartic, anthelmintic, laxative, alterative, stomachic, antimalarial; leaf paste applied to cure headache; leaves decoction given in fever and jaundice, against intestinal worms and for constipation. Properties and uses of this plant considered similar to those of *Andrographis paniculata*.)

in English: false waterwillow

in India: bhui nim, birkubat, gopuram langi, gopuram tangi, gopuram thaangi, gusumpuru, kariyatu, koburandhaangi, kopuram tanki, kopurantanki, lavalata, lilukariyatu, najithari, peyttumpai, ranjimani, tellavemu

Andrographis elongata T. Anderson

India. Perennial herbs, erect, pale pink axillary flowers with darker blotches on the lobes, minutely hairy capsules

See *J. Linn. Soc., Bot.* 9: 502. 1867

(Plant paste applied externally against scorpion and insect bites. Leaf juice drunk as antipyretic and antidiabetic.)

in India: periyangai

Andrographis glandulosa Nees

India.

See *Plantae Asiaticae Rariores* 3: 115. 1832

(Febrifuge.)

in India: anci, korankam, tuti

Andrographis lineata Nees (*Andrographis lineata* Wallich ex Nees)

India. Herb, erect, glandular hairy racemes, white corolla with purplish blotches

See *Plantae Asiaticae Rariores* (Wallich). 3: 116. 1832 and *Journal of Ethnopharmacology* 46: 31–47. 1995, *Journal of Ethnopharmacology* 62: 173–182. 1998, *Phytochemistry* 63(4): 457–461. 2003, *Nigerian Journal of Natural Products and Medicine* 11: 61–63. 2007, *Ethnobotanical Leaflets* 12: 276–280. 2008

(Hepatoprotective, antiinflammatory, diuretic, febrifuge, antimicrobial and antiviral; for diabetes, leaf powder mixed with cow's or goat's milk and taken orally; paste of leaves applied externally on scorpion sting and snakebites; leaf decoction for lung diseases; leaf juice taken for dog bite. Veterinary medicine, whole plant.)

in India: naerale, nelabaevu, nilavembu, periyangai, siriyangai, siriyangai

Andrographis macrobotrys Nees (*Andrographis ceylanica* Nees)

India. Pubescent herb, axillary racemes leaf-opposed, white corolla with dark purplish blotches, acute capsules minutely hairy

See *Companion Bot. Mag.* 2: 313. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 516. 1847 and *Revised Handb. Fl. Ceylon* 12: 100. 1998

(Leaves for mor muscular pain, diarrhea, snakebite.)

Andrographis nallamalayana J.L. Ellis

India. Herb, procumbent

See *Revisio Generum Plantarum* 2: 511. 1891 and *Bull. Bot. Surv. India* viii. 362. 1967, *Taxon* 29: 324. 1980, *Nat. Prod. Comm.* 2007, 2, 575–578. 2007

(Antimicrobial, for leucorrhoea, powder mixed with that of *Acrocephalus indicus* (Burm. f.) Kuntze (*Acrocephalus hispidus* (L.) Nicolson & Sivad.) boiled and the decoction given orally; for mouth ulcers, mixed with a pinch of lime and chewed. Fresh root paste mixed with leaves juice of *Becium filamentosum* given as antidote for snakebite.)

in India: katta-k-kampu, konda thasu, otalai maram

Andrographis neesiana Wight (*Andrographis neesiana* Benth. ex C.B. Clarke)

India. Erect herb, glandular-strigose capsules

See *Icones Plantarum Indiae Orientalis* [Wight] 1: 1561. 1840, *The Flora of British India* [J.D. Hooker] 4: 504. 1884

(Aphrodisiac, plant paste mixed with water and taken orally.)

Andrographis ovata (T. Anderson ex Bedd.) Benth. & Hook. f. (*Andrographis ovata* (T. Anderson ex Bedd.) Benth. ex Clarke; *Gymnostachyum ovatum* T. Anderson ex Bedd.)

India. Tall robust herb, leaves broadly ovate, pink flowers in panicles

See *Icones plantarum Indiae orientalis ...* 1: 60. 1874, *Genera plantarum* 2: 1100. 1876, *Fl. Brit. India* 4: 502. 1884 and *Fl. Madras* 1049. 1924

(Leaf paste used as an antidote; crushed leaves applied to treat scabies.)

in India: bhuinimo, periyangai, periyangan

Andrographis paniculata (N.L. Burman) Nees (*Andrographis paniculata* (Burm. f.) Wall. ex Nees; *Andrographis paniculata* Nees; *Andrographis subspathulata* C.B. Clarke; *Justicia paniculata* N.L. Burman; *Justicia paniculata* Sessé & Moc.; *Justicia paniculata* L. ex B.D. Jacks.; *Justicia paniculata* Rose; *Justicia paniculata* Forssk.)

South Asia, India. Herb, erect, quadrangular or winged, many-branched, rootstock and roots more or less woody, lax racemes or axillary or terminal panicles, whitish flowers spotted with rose-purple, corolla 2-lipped, oblong capsule acute at ends, seeds rugosely furrowed, river banks

See *Flora Indica ... nec non Prodromus Florae Capensis* (N.L. Burman) 9. 1768, *Fl. Aegypt.-Arab.* 4. 1775, *Plantae Asiaticae Rariores* (Wallich). 3: 77, 116. 1832, *Contr.*

U.S. Natl. Herb. 1: 348. 1895 and *Index Linn. Herb.* 93. 1912, *Cytologia* 48: 491–504. 1983, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *Cytologia* 53: 369–378. 1988, *J. Econ. Taxon. Bot. Addl. ser.* 12: 214–217. 1996, *Drug Delivery* 7(4): 209–213. 2000, *Natural Product Research* 19(3): 223–230. 2005, *Ethnobotanical Leaflets* 12: 934–937. 2008

(Used in Ayurveda, Unani and Sidha. Antibacterial, antifungal, antiviral, anti-HIV, cytotoxic, immunosuppressive, antimicrobial, febrifuge, antiinflammatory, antifertility, antispermatogenic and/or antiandrogenic, antileprosy, antimalarial, anodyne, insecticide, vermifuge, antileishmanial, bitter tonic, expectorant, diuretic, liver tonic, hypoglycemic, hepatoprotective, astringent, antispasmodic, analgesic, hypotensive, antihypertensive. Aerial parts of *Andrographis paniculata* with *Argemone mexicana*, dried and powdered and taken to cure jaundice; whole plant of *Andrographis paniculata* with *Phyllanthus amarus* dried and powdered and taken to cure jaundice. Whole plant, stems and leaves, very bitter, for detoxification, dysentery, diarrhea, gastroenteritis, allergic manifestations, common cold, fever, flu, cough, sore throat, tonsillitis, bronchitis; whole plant decoction given to cure fevers; whole plant of *Andrographis paniculata* with root of *Pygmaeopremna herbacea* powdered and made into a paste applied on sprain; decoction made of stem bark of *Toona ciliata*, *Azadirachta indica* and whole plant of *Andrographis paniculata* given in fevers to female patients; plant pounded in mustard oil and applied on itches and snakebite wounds; powdered plant applied to itching and warts; infusion of whole plant given in malaria and in liver disorders. An effective remedy against snakebites, whole plant decoction drunk. Herbal preparation antidyslipemic and antioxidant: *Terminalia bellirica*, *Terminalia chebula*, *Andrographis paniculata* and *Gymnema sylvestre*. For diabetes, leaf powder mixed with boiled rice and cow's milk and taken orally. Root decoction to treat rheumatic pains; a decoction from leaves of *Tiliacora acuminata* with roots of *Andrographis paniculata* and water given for chronic stomach ailments, stomachaches. Leaves for treatment of malaria. Leaf juice taken orally during menstruation to prevent excessive bleeding; leaf extract mixed with turmeric juice taken against intestinal worms; leaves and turmeric paste applied to eradicate skin lice and to cure skin ailments; astringent leaves for diarrhea; a cake made of leaves of *Andrographis paniculata* and grains of *Eleusine coracana* taken as a treatment for gastrointestinal disorders, inflammation and microbial infection. Veterinary medicine, whole plant and leaves mixed with pepper and garlic made into juice given to cure epilepsy; roots ponded and the extract given in insect bite; leaves along with those of *Vitex negundo*, *Cardiospermum halicacabum*, tubers of *Curculigo orchioides* and *Urginea indica* pounded and extract given for ephemeral fever; roots of *Agave americana* along with those of *Curculigo orchioides*, leaves of *Andrographis paniculata* and *Vitex negundo* pounded and the extract given for ephemeral fever.)

in English: common andrographis, creat, green chireta, kariyat, king of bitters

in China: chuan xin lian, shuang xin lian

Andrographis serpyllifolia (Rottl. ex Vahl) Wight (*Andrographis serpyllifolia* (Vahl) Wight; *Justicia serpyllifolia* Vahl; *Justicia serpyllifolia* Rottl. ex Vahl; *Justicia serpyllifolia* Gamble)

India. Trailing and rooting procumbent herb from stout rootstock, branchlets densely hispid, pale purplish flowers sessile in short racemes in upper axils

See *Enum. Pl.* [Vahl] 1: 169. 1804, *Icon. Pl. Ind. Orient.* [Wight] 2(3): t. 517. 1842, *Fl. Brit. India* [J.D. Hooker] 4: 506. 1884 and *Fl. Madras* 1051. 1924, *Tetrahedron* 24(24): 7027–7031. 1968

(Leaf paste applied on the incision of snakebite, also for common Green Whip snakebite. Root extract antioxidant, anti-inflammatory, febrifuge, bitter tonic, alterative. Veterinary medicine, antiinflammatory; leaves used in removing the ticks of cattle.)

in India: aaku chandrika, hasiru chedi, hasiru havina gida, kaasina sara, kirata, kurumaku, nela beru

Andrographis stenophylla C.B. Clarke

India. Herb, erect, very narrow leaves, stout rootstock, corolla pale with dark red stripes

See *Fl. Brit. India* [J.D. Hooker] 4: 506. 1884 and *Int. J. Chem. Sci.* 4(3): 431–28. 2006, *Natural product sciences* 13(3): 241–246. 2007, *Asian Journal of Chemistry* 19(2): 1307–1312. 2007

(Antiinflammatory, antimicrobial, anthelmintic and anti-snake venom.)

Andrographis tenuiflora T. Anderson

India.

See *Journal of the Linnean Society, Botany* 9: 502. 1867

(Fresh leaves eaten against tonsillitis.)

in India: hlo-chang-vaum, hlochang-vawm

Andrographis wightiana Arn. ex Nees (*Andrographis wightiana* T. Anderson)

India. Slender herb, glandular-pubescent calyx, corolla pink with reddish purple lower lip

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 517. 1847, *Enumeratio Plantarum Zeylaniae* 232. 1860

(Used in Ayurveda, Unani and Sidha. Febrifuge, leaf paste mixed with water and administered orally.)

Andromeda L. Ericaceae

A daughter of the Ethiopian king Cepheus and Cassiope (Kepheus and Kassiopeia), see *Species Plantarum* 1: 393–394. 1753.

Andromeda polifolia L. (*Andromeda glaucophylla* Link; *Andromeda glaucophylla* var. *iodandra* Fernald; *Andromeda polifolia* subsp. *glaucophylla* (Link) Hultén; *Andromeda polifolia* var. *concolor* B. Boivin; *Andromeda polifolia* var. *glaucophylla* (Link) DC.; *Andromeda polifolia* var. *jamesiana* (Lepage) Boivin; *Andromeda polifolia* var. *polifolia*)

Circumboreal and circumpolar. Shrub, evergreen, perennial, low-growing, spreading, often prostrate and rooting at the nodes, creeping horizontal rhizomes, leaves leathery, inflorescence a nodding terminal umbel, berries pinkish

See *Species Plantarum* 1: 393. 1753, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 394. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 607. 1839 and *Rhodora* 18: 102. 1916, *Acta Universitatis Lundensis*, n.s. 44(1): 1242. 1948, *Flora of Alaska and Yukon* 8: 1242. 1948, *Taxon* 39: 517. 1990, *Journal of Ecology* 86(3): 527–541. 1998

(Toxic only if large quantities eaten. All parts poisonous; plant contains a poisonous glucoside called andromedotoxin, poisonous to humans, causing low blood pressure, breathing problems, dizziness, vomiting, and diarrhea. Pectoral, expectorant.)

in English: bog-rosemary, common bog-rosemary, marsh andromeda, marsh holy rose, marsh holy-rose, marsh holywort, moorwort, wild rosemary

Andropogon L. Poaceae (Gramineae)

Greek *aner, andros* ‘a man, male’ and *pogon* ‘a beard’, the hairy spikelets resemble a man’s beard; currently there is disagreement over the taxonomic treatment of the genus, see *Species Plantarum* 2: 1045–1046. 1753, *Genera Plantarum*. Ed. 5. 468. 1754, *Essai d’une Nouvelle Agrostographie* 128, 132, 150, 160. 1812, *Mémoires du Muséum d’Histoire Naturelle* 2: 69. 1815, *Observ. Gramin. Belg.* 84, 90, 141. 1824, *Neogenyton* 4. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 364, 366. 1829, *Rel. Haenk.* 1(4–5): 331. 1830, *Mémoires de la Société d’Agriculture, Sciences et Arts d’Angers* 1: 170–171, 178, t. 8, 9, f. 2, 3. 1831, *Mémoires de l’Académie Impériale des Sciences de St.-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 268. 1832, *A Natural System of Botany* ed 2 448. 1836, *Fl. Afr. Austral. Ill.* 103, 109. 1841, *Flora* 29: 115. 1846, *Synopsis Plantarum Glumacearum* 1: 412. 1854 [1855], *Fl. France Prosp.* 3: 469. 1855, *Fl. Austral.* 7: 535. 1878, *J. Linn. 866–873. 1988, *Annals of the Missouri Botanical Garden* 77(1): 125–201. 1990, *Taxon* 41: 556. 1992, *Bothalia* 24: 241–246. 1994, *Flora Mesoamericana* 6: 387–390. 1994, *Taxon* 44: 611–612. 1995, Ana Zanin and Hilda Maria Longhi-Wagner, “Taxonomic Novelties in *Andropogon* (Poaceae-Andropogoneae) for Brazil.” *Novon* 13(3): 368–375. 2003, *Contributions from the United States National Herbarium* 46: 20–64. 2003.

Andropogon canaliculatus Schumach. (*Andropogon canaliculatus* var. *fyffei* Stapf; *Andropogon canaliculatus* var. *fastigiatus* Stapf; *Andropogon eucnemis* Trin.; *Andropogon macleodiae* Stapf)

Benin, Ghana, Kenya. Perennial, tufted, erect, paired racemes, loose false panicle, lower glume of sessile spikelet linear and deeply grooved, highly palatable to cattle, unpalatable when old

See *Beskrivelse af Guineiske planter* 52–53. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 72–73. 1828 and *Flora of Tropical Africa* 9: 252. 1919, *African Study Monographs* 19(1): 13–33. May 1998

(Veterinary medicine, rabies, madness, anaplasmosis. Magico-religious beliefs, ritual.)

in Congo: mwehwe

Andropogon floridanus Scribn. (*Anatherum virginicum* (L.) Spreng. subvar. *floridanum* (Scribn.) Roberty; *Andropogon bakeri* Scribn. & C.R. Ball) (for C.H. Baker, botanical collector in Florida)

USA, Florida. Perennial, caespitose, found in sandhill, swamp margin, pine flatwoods and scrub, coastal pinelands, pinelands, occasional in oak scrub and scrubby flatwoods

See *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Bulletin of the Torrey Botanical Club* 23: 145. Apr 1896 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 39, f. 14. 1901, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 212. 1960, *Journal of the Arnold Arboretum* 64: 171–254. 1983

(Plant infusion analgesic, astringent, antidiarrheal, taken for vomiting, cough, dry throat, stomach pain, diarrhea and frequent urination.)

in English: Florida bluestem, Florida broomsedge

Andropogon gayanus Kunth (*Andropogon briei* De Wild. - p.p.; *Andropogon gabonensis* Stapf; *Andropogon gayanus* var. *squamulatus* (Hochst.) Stapf; *Andropogon guineensis* Schumach.; *Andropogon guineensis* Steud., nom. illeg., non *Andropogon guineensis* Schumach.; *Andropogon patris* Robyns; *Andropogon reconditus* Steud.; *Andropogon squamulatus* Hochst.; *Andropogon tomentellus* Steud.; *Chloris gayana* Kunth; *Cymbachne guineensis* (Schumach.) Roberty)

Tropical and south Africa. Perennial bunchgrass or rarely annual, polymorphic, tufted, waxy bloom, erect, dense

stands forming, reed-like flattened stems, sessile spikelets with a geniculate awn, weed, grazed by ruminants, palatable and nutritious when young, grains eaten

See *Beskrivelse af Guineiske planter* 51–52. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 71–72. 1828, *Révision des Graminées* 1: 163. 1829, *Bull. Jard. Bot. Brux.* 8: 227. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 491. 1833, *Flora* 27: 244–245. 1844, *Synopsis Plantarum Glumacearum* 1: 371, 386. 1854, *Monographiae Phanerogamarum* 6: 448–449. 1889 and *Mémoires de la Société Botanique de France* 2(8): 102. 1907, *Bulletin de la Société Botanique de France* 55: 102. 1908, *Flora of Tropical Africa* 9: 263. 1919, *Flore Agrostologique du Congo Belge* 137. 1929, *Bulletin de l'Institut Française d'Afrique Noire* 22: 108. 1960, G.E. Roberty (1907–1971), *Monographie systématique des Andropogoneés du globe* 244. Paris 1960, *Fl. W. Trop. Africa* ed. 2, 3: 488. 1972, *Biotropica* 37(1): 25–31. 2005, *Plant Sciences Research* 1 (2): 30–35. 2008

(Roots or leaves antidote, detoxicant, antispasmodic, biotenicide, chewed to treat toothache; root infusion purgative, leaves decoction laxative.)

in English: gamba grass, onaga grass, Rhodesian andropogon, Rhodesian blue grass, tambuki grass

in Nicaragua: gamba

in Arabic: sméné

in Benin: irouwa, koumbossou

in Gambia: wa

in Ghana: gamba, mofogo, mopaka, mopoko, palawal, purim pieklega, purim pielega, sororo

in Mali: celal, dagué, guelori, kiené, mussa waga, ngon, uaga, waba, waga, wako, zara

in Niger: ahamdoroem, ajeghar, dakhié, djabar, gamba, lali, radyaré, ranièré, soobre, subna, subu nya, teebeened, yayyere, yawiri, yawur

in Nigeria: dadeppure, ekpo, erè, eré, eruwà, gábàà, gámà, gámà, gámà, gámà, girman darr daya, hazwa, igomough, iikube, ikpo, ikpò, ikpo agu, jimfi, kalawal, madlbak, palawal, sefunkwe, sugu, sugu kal, suwu, suwu bul, suwu kal, suwukal, waawan ruwa, welho

in Senegal: badoba, cicca, dagué, ebuk, etiub, gandany, ginyidi, guelori, hat, khat, kiene, kiené, makas, mediidi, mussa waga, o nduy, okas, soya, uaga, vaba, waga, waga gué, yev, yew, zara

in Sierra Leone: kabusa, puile

(Analgesic, a cold infusion taken for internal pain and venereal diseases. Magico-religious beliefs, ritual, witchcraft medicine, to give protection from witches.)

in English: pygmy flower, pygmyflower rockjasmine

in China: bei dian di mei

Androsace sarmentosa Wall.

India, Himalaya.

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 15. 1924, *J. Cytol. Genet.* 25: 97–104. 1990

(Magico-religious beliefs, ritual, spiritual, witchcraft medicine, emotional, plant as a lotion to give protection from witches, used for pain from witches' arrows.)

in China: pu jing dian di mei

Androsace sempervivoides Jacquem. ex Duby (*Androsace sempervivoides* Jacquem.)

India, Himalaya.

See *Prodr.* (DC.) 8: 50. 1844

(Plant decoction taken for venereal diseases.)

Androsace strigillosa Franch. (*Androsace sarmentosa* Wall. var. *grandifolia* Hook. f.; *Androsace strigillosa* var. *cane-scens* C. Marquand; *Androsace strigillosa* Franch.)

Nepal.

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 14–15. 1824, *Bulletin de la Société Botanique de France* 32: 10–11. 1885

(Whole plant used in fevers, edema, wounds and urinary tract problems. Root chewed to treat boils on tongue.)

in China: cao fu mao dian di mei

in Nepal: khalyu

Androsiphonia Stapf Passifloraceae

From the Greek *aner*, *andros* ‘man’ and *siphon* ‘tube’, see *J. Linn. Soc., Bot.* 37: 101. 1905 [1904–1906 publ. 1905], *International Journal of Plant Science* 160(1): 135–150. 1999, *Biochemical Systematics and Ecology* 29(3): 317–319. 2001, *Phytochemistry* 59(5): 501–511. 2002.

Androsiphonia adenostegia Stapf

Tropical Africa. Treelet or shrub, slender, inflorescence a terminal panicle, sweetly fleshy yellow to orange berry

See *Journal of the Linnean Society, Botany* 37: 101. 1905

(Cyanogenic glycosides. Leaves antiparasitic, applied to the head to kill lice.)

Aneilema R. Br. Commelinaceae

From the Greek *a* ‘without, not’ and *eilema* ‘a veil, covering, involucre’, *eilo* ‘to be shut, to assemble’, referring to the absence of spathe; see Robert Brown, *Prodromus florum Novae Hollandiae*. 270. 1810, *Monographiae Phanerogamarum* 3: 196. 1881 and *Bot. Jahrb. Syst.* 61, Beibl. 137: 63. 1927, *Fieldiana, Bot.* 24(3): 1–42. 1952, *Biosyst. Study Gen. Aneilema (Commelinaceae)* 1: 148, 185. 1975, *Biosyst. Study Gen. Aneilema (Commelinaceae)* 2: 376, 382. 1975, *Ceiba* 19(1): 1–118. 1975, *Taxon* 29: 352–353. 1980, *Smithsonian Contrib. Bot.* 76: 62, 77, 143, 146, 148. 1991, *Fl. Mesoamer.* 6: 157–173. 1994.

Aneilema aequinoctiale (P. Beauv.) Loudon (*Aneilema aequinoctiale* G. Don; *Commelina aequinoctialis* P. Beauv.; *Lamprodirhynchus aequinoctialis* (P. Beauv.) Hassk.)

Tanzania.

See *Flore d’Oware* 1: 65. 1806, *Loudon’s Hortus Britannicus. A catalogue ...* 15. 1830, *Beitrag zur Flora Aethiopiens ...* 211. 1867

(Leaves infusion given to children as a remedy for kwashiorkor.)

in Tanzania: kongwe

Aneilema beniniense (P. Beauv.) Kunth (*Aneilema beniniense* subsp. *leonense* J.K. Morton; *Aneilema beniniense* subsp. *sessiliflorum* (Benth.) J.K. Morton; *Aneilema beniniense* var. *sessiliflorum* Benth.; *Aneilema dispernum* Brenan; *Aneilema mortehanii* De Wild.; *Aneilema pedunculatum* C.B. Clarke; *Commelina beniniensis* P. Beauv.; *Lamprodirhynchus beniniensis* (P. Beauv.) Hassk.)

Tropical Africa. Herbaceous, succulent, weed, erect, scandent, semi-decumbent, creeping, straggling, sprawling, rooting at lower nodes, leaves sheathing, terminal greenish white or lilac flowers in dense inflorescence

See *Fl. Oware* 2: 49. 1816, *Enum. Pl.* 4: 73. 1843, *Niger Fl.*: 549. 1849, *Naturw. Reise Mossambique*: 529. 1864 and *Bull. Jard. Bot. État* 5: 84. 1915, *J. Linn. Soc., Bot.* 59: 466. 1966, *J. Linn. Soc., Bot.* 60: 445. 1967

(Sudorific steam bath for feverish diseases. Sap from the plant given to women suffering from amenorrhea. Herb in fetish groves.)

in Tanzania: lumpepete, ntezi

Aneilema hockii De Wild.

Tropical Africa. Herb, trailing, light purple flowers

See *Repert. Spec. Nov. Regni Veg.* 12: 290. 1913

(Roots tonic, aphrodisiac, for female infertility.)

Aneilema setiferum A. Chev. var. *setiferum*

Tropical Africa. Herbaceous, very succulent, erect, ascending, white bluish flowers, in marshy savanna

See *Bull. Soc. Bot. France* 58: 215. 1912

(Antileprosy potions.)

Anemarrhena Bunge Asparagaceae (Anthericaceae, Liliaceae)

Greek *a* ‘without, not’ plus *nema* ‘a filament’ and *arrhen* ‘male’, referring to the anthers, see *Genera Plantarum* 48. 1789.

Anemarrhena asphodeloides Bunge (*Terauchia anemarrhenifolia* Nakai)

East Asia, Mongolia, China, Korea. Perennial herb, simple erect scape, flat thick horizontal rhizomes, linear basal leaves, small fragrant flowers, perianth white or light purple, fruit a hexagonal capsule, black triangular seeds

See *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 2: 140. 1831, *Enumeratio Plantarum, quas in China Boreali* 66. 1833 and *Bot. Mag. (Tokyo)* 27: 441, 443. 1913, *J. Agric. Food Chem.* (2): 584–587. 1999, *Biological & Pharmaceutical Bulletin* 24(9): 1009–1011. 2001, *Acta Pharmacologica Sinica* 27(6): 728–734. 2006 [Protective effect of steroidal saponins from rhizome of *Anemarrhena asphodeloides* on ovariectomy-induced bone loss in rats.], *Basic & Clinical Pharmacology & Toxicology* 100(3): 205–213. 2007, *Biological & Pharmaceutical Bulletin* 30(1): 38–43. 2007

(Rhizome febrifuge, antiinflammatory, antifungal, antibacterial, antiseptic, antidiabetic, antitumour, diuretic, sedative, neuroprotective, expectorant, hypoglycemic, astringent, laxative, bitter, tonic, antiplatelet aggregation, mild estrogenic activity; externally used as a mouthwash in the treatment of ulcers, inhibits stress ulcer; taken internally in the treatment of high fevers, asthma, bronchial inflammation, tuberculosis, chronic bronchitis, coughs.)

in English: common anemarrhena

in China: zhi mu, zhi mu shu, xilingzhimu, chih mu, ch'ih mu, k'u hsin, huo mu, ti shen, shui shen, lien mu

in Korea: ji-mo

Anemone L. Ranunculaceae

Greek *anemone*, *amona* (from the root: *mon* 'to be red'), Sanskrit *hema* 'red', Akkadian *samu*, *samtu*, *samat* 'red' and *damu* 'blood', Greek *haima*, *haimatos* 'blood'; see Carl Linnaeus, *Species Plantarum*. 538. 1753 and *Genera Plantarum*. Ed. 5. 241. 1754, *Genera Plantarum* 231–232. 1789 and Giovanni Semerano, *Le origini della cultura Europea. Dizionario Etimologici. Basi semitiche delle lingue indeuropee. Dizionario della lingua Greca*. 2(1): 14. Leo S. Olschki, Editore, Firenze 1994.

Anemone canadensis L. (*Anemone dichotoma* L. var. *canadensis* (Linnaeus) C. MacMillan; *Anemonidium canadense* (L.) A. Löve & D. Löve)

North America. Perennial herb

See *Species Plantarum* 1: 538–542. 1753, *Syst. Nat.* ed. 12. 3: 231. 1768, M.R. Gilmore, *Uses of plants by the Indians* ... 30. 1991

(Roots decoction or infusion for worms, wounds, sores, analgesic. Leaves in the treatment of wounds, nasal hemorrhages, eye problems, and sore throats. Ceremonial, magic, ritual.)

in English: Canada anemone, Canadian anemone, wind flower

in North America: anemone, anémone du Canada, te zhingha maka (Omaha-Ponca)

Anemone caroliniana Walter (*Hartiana caroliniana* (Walter) Raf.)

Northern America. Perennial herb, hairy stems, short tuber-like rhizomes, tuberous swelling of the rootstock, narrow petal-like sepals light blue, flowering stalks densely covered with silky hairs

See *Flora Caroliniana*, secundum ... 157–158. 1788, *Neogenyton* 2. 1825

(Toxic, poisonous, dermatitis, respiratory and eye irritation.)

in English: Carolina anemone, Carolina thimbleweed, prairie anemone, southern thimbleweed, white wind flower, wind flower

Anemone coronaria L.

North America. Herb, scarlet flowers

See *Species Plantarum* 1: 538. 1753 and *Fl. Libya* 108: 7. 1984, *Taxon* 41: 557. 1992

(Toxic. Vulnerary, for leprosy, malaria, tuberculosis.)

in English: crown anemone, garden anemone, lilies-of-the-field, lily, lily of the field, poppy anemone, wind flower

Anemone cylindrica A. Gray

North America. Perennial herb

See *Species Plantarum* 1: 538–542. 1753, *Ann. Lyceum Nat. Hist. New York* 3: 221. 1835

(Analgesic, burn dressing, stimulant, for headaches, sore eyes, lung congestion, pulmonary ailments, burns and tuberculosis. Good luck charm.)

in English: candle anemone, long-fruited anemone, long-head thimbleweed, long-headed anemone, long-headed thimbleweed, thimbleweed

in North America: anémone cylindrique, wathibaba-maka (Ponca)

Anemone demissa Hook. f. & Thomson var. *demissa* (*Anemonastrum demissum* (Hook. f. & Thomson) Holub; *Anemonastrum polyanthes* (D. Don) Holub; *Anemone bicolor* H. Lévl.; *Anemone demissa* var. *connectens* Brühl; *Anemone demissa* var. *grandiflora* C. Marquand & Airy Shaw; *Anemone demissa* var. *monantha* Brühl; *Anemone demissa* var. *umbellata* Brühl; *Anemone narcissiflora* var. *demissa* (Hook. f. & Thomson) Finet & Gagnep.; *Anemone narcissiflora* var. *demissa* (Hook. f. & Thomson) Jancz.; *Anemone narcissiflora* var. *polyanthes* (D. Don) Jancz.; *Anemone polyanthes* D. Don)

India. Herb, many flowered umbels

See *Prodromus Florae Nepalensis* 194. 1825, *Flora Indica*: being a systematic account of the plants . . . 1: 12, 23. 1855, *Revue Générale de Botanique* 4: 245. 1892 and *Bulletin de la Société Botanique de France* 51: 73. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 81. 1906, *Bulletin de l'Académie*

Internationale de Géographie, Botanique 24: 42. 1915, *Journal of the Linnean Society, Botany* 48(321): 154. 1929

(Whole plant applied to blisters and warts.)

in China: zhan mao yin lian hua

in India: chok-topal-chi

Anemone elongata D. Don (*Anemonastrum elongatum* (D. Don) Holub; *Anemone rivularis* Wall.)

Himalaya. Herb, white flowers

See *Prodromus Florae Nepalensis* 194. 1825 and *Folia Geobotanica et Phytotaxonomica* 8: 158. 1973

(Root paste applied on boils to exude pus. Seeds used to treat wounds. Leaves as emetic, given in spleen disorders, used for ear complaints and for maggots in sores. Veterinary medicine, plant juice insecticide.)

in China: jia chang yin lian hua

in Nepal: dhanero, seyo bikh

Anemone falconeri Thomson (*Hepatica falconeri* (Thomson) Yuz.)

India, Himalaya.

See *Icones Plantarum* 5: t. 899. 1852 and *Flora URSS* 7: 284. 1937, *Kew Bull.* 57(4): 943–953. 2002

(Leaves poultice applied to sores to kill maggots.)

Anemone hupehensis (Lemoine) Lemoine var. ***japonica*** (Thunb.) Bowles & Stearn (*Anemone japonica* (Thunb.) Siebold & Zucc.; *Anemone scabiosa* H. Lév. & Vaniot; *Anemone vitifolia* var. *japonica* (Thunb.) Finet & Gagnep.; *Atragene japonica* Thunb.; *Eriocapitella japonica* (Thunb.) Nakai)

China.

See *Species Plantarum* 542. 1753, *Flora Japonica*, ... 239. 1784, *Regni Vegetabilis Systema Naturale* 1: 210–211. 1817, *Flora Japonica* 1: 15, pl. 5. 1835 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 11(148): 47. 1902, *Bulletin de la Société Botanique de France* 51: 68. 1904, *Journal of Japanese Botany* 17(5): 267–269. 1941, *Journal of the Royal Horticultural Society* 72: 265. 1947

(Used for heart diseases.)

in English: Japanese anemone, Japanese thimbleweed

in China: qiu mu dan

Anemone multifida Poir.

North America.

See *Encyclopédie Méthodique. Botanique* ... Supplément 1(1): 364. 1810, *Ann. New York Acad. Sci.* 6: 224. 1891 and *Bot. Gaz.* 42: 52. 1906, *Canad. Field-Naturalist.* 65: 2. 1951, *Vasc. Pl. Pacif. N.W.* 2: 327. 1964, *Phytologia* 77: 84. 1994

(Antirheumatic, diaphoretic, cold remedy, analgesic, insecticide, to kill lice and fleas.)

in English: red windflower

in North America: anémone multifide, cut-leaved anemone, globe anemone

Anemone multifida Poir. var. ***multifida*** (*Anemone globosa* Nuttall ex A. Nelson; *Anemone hudsoniana* Richardson; *Anemone multifida* var. *globosa* Torr. & A. Gray; *Anemone multifida* var. *hudsoniana* DC.; *Anemone multifida* var. *nowosadii* B. Boivin; *Anemone multifida* var. *richardsiana* Fernald; *Anemone multifida* var. *sansonii* B. Boivin; *Anemone multifida* var. *tetonensis* (Porter ex Britton) C.L. Hitchc.)

North America.

See *Species Plantarum* 1: 538–542. 1753, *Regni Vegetabilis Systema Naturale* 1: 209. 1818[1817], *A Flora of North America*: containing ... 1(1): 13. 1838 and *Rhodora* 19(224): 141. 1917, *The Canadian Field-Naturalist* 65(1): 2. 1951, *Le Naturaliste Canadien* 87(2): 26. 1960, *Vascular Plants of the Pacific Northwest* 2: 327. 1964

(Analgesic, whole plant burned on hot coals to alleviate headaches.)

Anemone narcissiflora L. (*Anemonastrum narcissiflorum* (L.) Holub subsp. *sibiricum* (L.) A. Löve & D. Löve; *Anemone narcissiflora* Hook. & Arn.; *Anemone narcissiflora* subsp. *alaskana* Hultén; *Anemone narcissiflora* subsp. *interior* Hultén; *Anemone narcissiflora* subsp. *sibirica* (L.) Hultén; *Anemone narcissiflora* subsp. *typica* (L.) Ulbr.; *Anemone narcissiflora* var. *alaskana* (Hultén) B. Boivin; *Anemone narcissiflora* var. *interior* (Hultén) B. Boivin; *Anemone narcissiflora* var. *linneana* (L.) Schipcz.; *Anemone narcissiflora* var. *monantha* DC.) The taxonomy of this highly variable widespread species is extremely controversial

North America.

See *Species Plantarum* 1: 542. 1753, *Syst. Nat.* 1: 213. 1817, *Prodr.* (DC.) 1: 22. 1824, *The Botany of Captain Beechey's Voyage* 121. 1832 and *Bot. Gaz.* 42: 51. 1906, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 273. 1906, *Phytologia* 77: 85. 1994, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Antihemorrhagic.)

in English: narcissus anemone, narcissus-flower thimbleweed, narcissus-flowered anemone

in China: shui xian yin lian hua

Anemone narcissiflora L. var. ***monantha*** DC. (*Anemonastrum narcissiflorum* Holub; *Anemonastrum narcissiflorum* (L.) Holub; *Anemonastrum narcissiflorum* subsp. *sibiricum* (L.) Á. Löve & D. Löve; *Anemonastrum sibiricum* (L.) Holub; *Anemone laxa* Juz.; *Anemone narcissiflora* L.; *Anemone narcissiflora* subsp. *alaskana* Hultén; *Anemone narcissiflora* subsp. *interior* Hultén; *Anemone narcissiflora*

subsp. *sibirica* (L.) Hultén; *Anemone narcissiflora* var. *alaskana* (Hultén) B. Boivin; *Anemone narcissiflora* var. *interior* (Hultén) B. Boivin; *Anemone narcissiflora* var. *sibirica* (L.) Tamura; *Anemone narcissiflora* var. *uniflora* Eastw.; *Anemone sibirica* L.)

North America. Perennial herb

See *Species Plantarum* 1: 541. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 22. 1824 and *Flora of Alaska and Yukon* 4: 733–735, f. 581a [map]. 1944, *Acta Phytotaxonomica et Geobotanica* 17(4): 115. 1958, *Le Naturaliste Canadien* 93(5): 641. 1966, *Komarov Lectures*. 20: 47–61. 1973, *Botaniska Notiser* 128(4): 511. 1975[1976], *Bot. Zhurn.* 65(1): 51–59. 1980, *Bot. Zhurn.* 65(5): 651–659. 1980

(Root decoction taken for antihemorrhage.)

in English: narcissus anemone

Anemone obtusiloba D. Don (*Anemone discolor* Royle; *Anemone govaniana* Wall.; *Anemone obtusiloba* Lindl.)

China, Nepal, Himalayas. Herb, perennial, thick woolly white rootstock, flowers from blue to white

See *Prodromus Florae Nepalensis* 194. 1825, *Edwards's Bot. Reg.* 30: t. 65. 1844 and *Acta Botanica Indica* 8: 1–10. 1980, *Taxon* 30: 75. 1981, *Cytologia* 54: 709–713. 1989, *Journal of Ethnopharmacology* 52(3):157–163. 1996, *Cytologia* 68(1): 61–66. 2003

(Used in Unani. Toxic, poisonous, can cause severe topical and gastrointestinal irritation, seeds produce vomiting and purging. Herb antirheumatic, antispasmodic, antibacterial, antifungal, antiviral, antiinflammatory, emetic, blistering, antipyretic, nervine, sedative, styptic, emmenagogue, rube-facient, diuretic. Seeds crushed and boiled used as emetic in case of food poisoning, also used as purgative. Leaves antiseptic, styptic, acrid, antifungal, irritant; a decoction for rheumatism. Juice of the roots ophthalmic; crushed root paste applied for treatment of wounds and sores.)

in English: pasque flower, wind flower, wood anemone

in China: dun lie yin lian hua

in India: ageli, agli, bhuttesh, chotu kakrya, chotukakrya, gul-e-laalaa, gul-laalaa, kakrya, kanchphool, ratan-jog, ratanjot, ratanjota, rattanjog, shaqaaq-un-nomaan, shaqaaq-un-noman, shaqiq

in Nepal: ratan jot, ratanjot

in Pakistan: al-kanet, ratanjot, rattanjog

Anemone occidentalis S. Watson (*Anemone occidentalis* var. *subpilosa* Hardin; *Pulsatilla occidentalis* (S. Watson) Coville; *Pulsatilla occidentalis* (S. Watson) Freyn)

North America. Perennial herb, stem whorled, softly hairy, basal leaves deeply divided, solitary bowl-shaped flower, petal-like sepals hairy on the back, seeds feathery

See *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Proceedings of the American Academy of Arts and Sciences* 11: 121. 1876, *Deutsche Botanische Monatsschrift* 8: 78. 1890, *Contributions from the United States National Herbarium* 4: 56. 1893

(Infusion of plant used as a wash for rheumatism. Decoction of roots or plants taken for stomach and bowel troubles, gastrointestinal disturbances.)

in English: mountain pasque flower, western pasque flower

Anemone parviflora Michx. (*Anemone borealis* Richardson; *Anemone parviflora* var. *grandiflora* Ulbr.)

Canada, Alaska.

See *Flora Boreali-Americana* 1: 319–320. 1803, *Narrative of a Journey to the Shores of the Polar Sea*, App. 22. 1823 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 251. 1905

(Leaves infusion for tuberculosis.)

in English: northern anemone, small-flowered anemone

Anemone patens L. var. ***multifida*** Pritzel (*Anemone ludoviciana* Nutt., nom. illeg.; *Anemone multifida* (Pritz.) Zämelis, non Poir.; *Anemone nuttalliana* DC.; *Anemone nuttallii* Nutt.; *Anemone patens* subsp. *multifida* (G.A. Pritzel) Hultén; *Anemone patens* var. *multifida* Zämelis; *Anemone patens* var. *multifida* Pritz.; *Anemone patens* var. *nuttalliana* (DC.) A. Gray; *Anemone patens* var. *wolfgangiana* (Besser) Koch; *Anemone wolfgangiana* von Besser; *Pulsatilla hirsutissima* Britton; *Pulsatilla hirsutissima* (Pursh) Britton, nom. illeg.; *Pulsatilla ludoviciana* A. Heller, nom. illeg.; *Pulsatilla ludoviciana* (Nuttall) A. Heller, nom. illeg.; *Pulsatilla multifida* (Pritz.) Juz.; *Pulsatilla nuttalliana* (DC.) Spreng.; *Pulsatilla nuttalliana* (DC.) Bercht. & Presl; *Pulsatilla nuttalliana* subsp. *multifida* (Pritz.) Aichele & Schwegler; *Pulsatilla nuttalliana* subsp. *nuttalliana*; *Pulsatilla nuttalliana* (DC.) Spreng.; *Pulsatilla patens* Mill.; *Pulsatilla patens* (L.) S.H. Li & Y. Hui Huang; *Pulsatilla patens* var. *wolfgangiana* (Besser) Regel)

North America. Perennial herb, see also *Pulsatilla*

See *Species Plantarum* 1: 538–542. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Gard. Dict.*, ed. 8. *Pulsatilla* no. 4. 1768, *Syst. Nat.* (Candolle) 1: 193. 1817 [dt. 1818; issued 1–15 Nov 1817], *Syst. Veg.* (ed. 16) [Sprengel] 2: 663. 1825, *Journ. Acad. Soc. Nat. Phil.* 5: 158. 1825, *Deutschl. Fl. (Sturm)*, Abt. I, Phanerog. Heft 46: 1. 1826, *The Gardeners Dictionary: ... eighth edition* no. 4. 1768, *Linnaea* 15: 581. 1841, *A Manual of Botany of the Northern United States* (ed. 5) 36. 1867 and *Bulletin de la Société Botanique de France* 51: 60. 1904, *Acta Horti Botanici Universitatis Latviensis* 1: 98. 1926, *Flora URSS* 7:

296. 1937, *Acta Universitatis Lundensis* 40: 738. 1944, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 3: 163. 1975, *Neolin. Fl. Manshur.* 305. 1979, M.R. Gilmore, *Uses of plants by the Indians ...* 28–30. 1991, *Nordic J. Bot.* 14: 160. 1994

(Plant considered very poisonous. Abortifacient, analgesic, cold remedy, diaphoretic, antirheumatic, hemostatic. Fresh leaves used to treat rheumatism and neuralgia; crushed leaves for poultices; pulverized leaves to smell to alleviate headaches; leaves, fresh or dried, burned as mosquito repellent. Decoctions from roots to treat lung problems, pulmonary ailments. Insecticide, strong decoction of whole plant to kill lice and fleas.)

in English: cutleaf anemone, mayflower, pasque flower, prairie-crocus, prairie-smoke, pulsatilla, pulsatille, twin-flower, wild crocus

Anemone pratensis L. (*Pulsatilla pratensis* (L.) Mill.)

Turkey.

See *Species Plantarum* 1: 539. 1753 and *Nordic J. Bot.* 14: 160. 1994

(Diuretic, emmenagogue, expectorant, nervine.)

Anemone pulsatilla L. (*Pulsatilla pulsatilla* (L.) H. Karst.; *Pulsatilla vulgaris* Mill.)

N. Europe.

See *Species Plantarum* 1: 539. 1753, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 560. 1882

(Homeopathy. Nervine, antispasmodic, antidote, alterative, diaphoretic, for menstrual troubles, warts.)

in English: Easter flower, meadow anemone, pasque flower, wind flower

Anemone quinquefolia L. (*Anemone nemorosa* L. var. *quinquefolia* (L.) Pursh; *Anemonoides nemorosa* (L.) Holub)

North America.

See *Species Plantarum* 1: 538–542. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *Flora Americae Septentrionalis*; or, ... 2: 386. 1814 [1813] and *Folia Geobotanica et Phytotaxonomica* 8(2): 166. 1973, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *International Organization of Plant Biosystematists Newsletter* 24: 19–20. 1995

(Irritating acrid oil, can cause severe topical and gastrointestinal irritation. Rubefacient, vesicant, in the treatment of rheumatism, gout and fevers.)

in English: night-caps, wind flower

Anemone rivularis Buch.-Ham. ex DC. (*Anemone dubia* Wall.; *Anemone dubia* Bellardi; *Anemone geraniifolia* Wall.; *Anemone hispida* Wall.; *Anemone rivularis* Wall.; *Anemone wightiana* Wall.; *Anemone wightiana* Hook.)

India, Bhutan. Herb, erect, stout rootstock silky pubescent, radical leaves orbicular, white or bluish flowers, achenes glabrous

See *App. Fl. Pedem.* 232. 1792, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 211–212. 1817 [1818 publ. 1–15 Nov 1817], *Numer. List* [Wallich] n. 4692, 4693, 4697. 1831, *Icon. Pl.* 2: t. 176. 1837

(Paste of the plant for cough and fever. Crushed rubbed leaves aromatic, a poultice applied to sores and wounds to destroy maggots. Oil used in rheumatism, headache, fever and ear complaints. Fruits in gastritis, appetizer; seed to stop bleeding and in edema. Root decoction antiseptic, emetic, applied to cuts and wounds, to wash wounds. Veterinary medicine, a plaster for broken knee of cattle.)

in English: common wild anemone

in China: cao yu mei

in India: ageli, angeli, carbini, carbini mamiri, maruiri, mirchilee, ratan

in Nepal: bagh paile, bhattemla, kagarete, kangarata, kangarate, moramal, nashar, patidhuk, praba, rhuka, seto bikh

in Tibet: damdrora, rheuka, yak-far

Anemone rupicola Cambess. (*Anemone batangensis* Finet)

China, India, Himalaya.

See *Voyage dans l'Inde* [Jacquemont] 4(Bot.): 5, f. 2. 1844 and *Journal de Botanique* (Morot) 21: 30. 1908

(Blistering roots, given internally mixed with milk for contusions.)

in China: yan sheng yin lian hua

in India: ratanjot

Anemone tetrasepala Royle (*Anemonastrum tetrasepalum* (Royle) Holub)

China, Himalaya, India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 53. 1834 and *Folia Geobot. Phytotax.* 8 (2): 165. 1973, *Chromosome Inf. Serv.* 39: 33–35. 1985, *Proc. Indian Natl. Sci. Acad.*, B 55: 177–184. 1989, *J. Jap. Bot.* 81: 1–19. 2006

(Postpartum remedy, hemostatic, also for backache. Veterinary medicine, in the treatment of hematuria.)

in China: fu san yin lian hua

in India: ratanjot, rattanjot

Anemone trullifolia Hook. f. & Thomson (*Anemone obtusiloba* subsp. *trullifolia* (Hook. f. & Thomson) Brühl; *Anemone trullifolia* var. *luxurians* Tamura; *Pulsatilloides trullifolia* (Hook.f. & Thomson) Starod.)

Himalaya. Herb, white purplish flowers

See *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 22. 1855, *Annals of the Royal Botanic Garden. Calcutta*. 5(2): 77, t. 106A. 1896 and *Fl. China* 6: 324. 2001

(Root infusion mixed with water and taken to relieve body pain.)

in China: chi ye yin lian hua

Anemone virginiana Linnaeus

North America. Herb, perennial

See *Species Plantarum* 1: 538–542. 1753, *Mag. Hort. Bot.* 7: 182. 1841, *Class-book Bot.* ed. 2. (a), 140. 1847 and *Phytologia* 18: 281. 1969, *Chromosoma* 44: 405–416. 1974, *Taxon* 31: 120–126. 1982, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *Bartonia* 59: 37–47. 1996

(Antidiarrheal, aphrodisiac, emetic, an aid for whooping cough, stimulant, a love potion, a remedy for tuberculosis, corns, pulmonary ailments, skin diseases, toothache. Ceremonial, a protection against witchcraft.)

in North America: anémone de Virginie, tall anemone, tall thimbleweed, thimbleweed

Anemone virginiana Linnaeus var. *virginiana*

North America. Herb, perennial

See *Species Plantarum* 1: 538–542. 1753, *Mag. Hort. Bot.* 7: 182. 1841, *Class-book Bot.* ed. 2. (a), 140. 1847 and *Phytologia* 18: 281. 1969, *Chromosoma* 44: 405–416. 1974, *Taxon* 31: 120–126. 1982, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *Bartonia* 59: 37–47. 1996

(Antidiarrheal, aphrodisiac, emetic, an aid for whooping cough, stimulant, a love potion, a remedy for tuberculosis, corns, pulmonary ailments, skin diseases, toothache. Ceremonial, a protection against witchcraft.)

in North America: anémone de Virginie, tall anemone, tall thimbleweed, thimbleweed

Anemone vitifolia Buch.-Ham. ex DC. (*Anemone elegans* Decne.; *Anemone hupehensis* (Lemoine) Lemoine fo. *alba* W.T. Wang; *Anemone matsudai* (Yamam.) Tamura; *Anemone vitifolia* Buch.-Ham.; *Anemone vitifolia* var. *matsudai* Yamam.; *Eriocapitella elegans* (Decne.) Nakai; *Eriocapitella vitifolia* (Buch.-Ham. ex DC.) Nakai; *Eriocapitella vitifolia* var. *matsudai* (Yamam.) Nakai)

China, Himalaya. Herb, flowers white pinkish

See *Regni Vegetabilis Systema Naturale* [Candolle] 1: 210–211. 1817 [1818 publ. 1–15 Nov 1817] and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 3: 27–29. 1927, *Journal of Japanese Botany* 17(5): 267, 269–270. 1941, *Acta Phytotaxonomica et Geobotanica* 16(4): 110. 1956, *Acta Phytotaxonomica Sinica* 12(2): 166–167. 1974

(Root paste applied to treat scabies; root juice for toothache, headache and vermifuge, taken for dysentery with bloody

stools; root decoction used to wash infected eyes and for backache. Powdered leaves applied to kill head lice; leaf juice applied as antifungal; contact therapy, crushed and rolled leaves tightened on the hands of children as a vaccination against chicken pox and smallpox. Whole plant as a fish poison.)

in English: grape-leaved anemone

in China: ye mian hua

in India: agali, kakadia

in Nepal: bhaisya marelo, dhanero, kapase, kaptase, madilo, mankapi, mauro mulo, panta, phok sarpa, phoksarpa, praba, rikabe, yasik

in Tibet: zulo

Anemonoides Mill. Ranunculaceae

Resembling the genus *Anemone* L., see *The Gardeners Dictionary* ... Abridged ... fourth edition 1754.

Anemonoides nemorosa (L.) Holub (*Anemone nemorosa* L.)

Europe.

See *Species Plantarum* 1: 538–542. 1753 and *Folia Geobotanica et Phytotaxonomica* 8(2): 166. 1973

(Antidote, nervine.)

in English: European wood anemone, windflower, wood anemone

Anemopsis Hook. & Arn. Saururaceae

Resembling the genus *Anemone* L., referring to the inflorescence, see *Kongl. Vetensk. Acad. Nya Handl.* 4: 149. 1783, *Fl. Jap.* (Thunberg) 12. 1784, *Ann. Nat. Hist.* 1(2): 136. 1838, *The Botany of Captain Beechey's Voyage* 390, t. 92. 1840.

Anemopsis californica (Nutt.) Hooker & Arnott (*Anemia californica* Nutt.; *Anemopsis californica* Hook. & Arn.; *Anemopsis californica* var. *subglabra* Kelso; *Houttuynia californica* (Hook. & Arn.) Benth. & Hook.; *Houttuynia californica* Benth. & Hook.f. ex S. Watson; *Houttuynia californica* (Nutt.) Brandege)

North America. Perennial herb, flower head cone-shaped, roots fragrant

See *Ann. Nat. Hist.* 1(2): 136 (-137). 1838, *The Botany of Captain Beechey's Voyage* 390, t. 92. 1840, *Genera Plantarum* 3: 128. 1880, *Bot. California* [W.H. Brewer] 2: 483. 1880, *Proc. Calif. Acad. Sci.* ser. 2, 3: 168. 1891 and *Amer. Midl. Naturalist* 13(3): 112–113. 1932

(Analgesic, emetic, tonic, laxative, sedative, anticonvulsive, burn dressing, disinfectant, antiseptic, diaphoretic, for arthritis, rheumatism, tuberculosis, cough, dyspepsia,

stomachache, gonorrhoea, syphilis, diabetes, common and heavy colds, swellings, cuts and wounds, to heal ulcers and sores of the mucous membranes. Fresh leaves applied topically to swollen limbs. Crushed roots decoction taken for diabetes. Veterinary medicine, infusion of plant used for open sores on cattle.)

Common name: yerba mansa

Anethum L. Apiaceae (Umbelliferae)

From the Greek *anethon* 'anise, dill' (Theophrastus *HP*. 1.11.2), Latin *anethum*, *i* (Vergilius: "bene olentis anethi"); see Carl Linnaeus, *Species Plantarum* 1: 263. 1753 and *Genera Plantarum* Ed. 5. 127. 1754.

Anethum graveolens L. (*Anethum graveolens* Ucria; *Anethum graveolens* subsp. *sowa* (Roxburgh) N.F. Koren; *Anethum graveolens* subsp. *sowa* (Roxb. ex Fleming) N.F. Koren; *Anethum graveolens* var. *chevallieri* Maire; *Anethum sowa* Roxburgh; *Anethum sowa* Roxb. ex Fleming; *Ferula marathrophylla* W.G. Walpers; *Peucedanum anethum* Baillon, nom. illeg.; *Peucedanum graveolens* (L.) Hiern; *Peucedanum graveolens* (L.) C.B. Clarke, nom. illeg., non *Peucedanum graveolens* (L.) Hiern; *Peucedanum graveolens* (L.) Benth. & Hook.f.; *Peucedanum sowa* (Roxburgh) Kurz; *Peucedanum sowa* (Roxb. ex Fleming) Kurz)

Europe. Erect aromatic herb

See *Species Plantarum* 1: 245–246, 263. 1753, *Asiatic Researches* 11: 156. 1810, *The Flora of British India* 2(6): 709. 1879, *Traité de Botanique Médicale Phanérogamique* 1045. 1883 and *Flora of Ecuador* 5: 1–71. 1976, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Journal of Cytology and Genetics* 13: 69–74. 1978, *Candollea* 35: 497–510. 1980, *Spices Condiments Pl. Ethiopia* 34. 1981, *Pakistan Journal of Botany* 14: 117–129. 1982, *Taxon* 31: 771–772. 1982, *Acta Biologica Cracoviensia, Series Botanica* 24: 113–126. 1982, *Acta Phytotaxonomica Sinica* 22: 243–249. 1984, *Fl. Libya* 117: 57. 1985, *Cytologia* 51: 479–488. 1986, *Plant Systematics and Evolution* 154: 11–30. 1986

(Used in Ayurveda, Unani and Sidha. To loosen bowels. Fruits aromatic, stimulant and carminative. Seed extract given to dissolve kidney stone. Veterinary medicine, seeds for cattle colic.)

in English: anet, anise, dill, dill-seed, dillseed, east Indian dill, Indian dill

in Arabic: chibt, shebet, shibit

in China: shi luo, shi luo shu

in India: balanta shopa, cadakuppai, cananamali, catakuppai, catakuppi, catakuppikam, catakuya, cataputpam, cataputpi, catappukkirai, campucampal, cannamali, cananmali, catapukkirai, chatukuppa, chhatra, cikkuayatti, cilettumavatatiran, ckkuyatti, cokikirai, cokikkirai, cokivittu, colikkirai,

in Indonesia: adas, adas sowa, ender

in Japan: inondo

in Pakistan: chota gwathak, soe, sowa, soya

in Tibet: sa-ta pu spa

Angelica L. Apiaceae (Umbelliferae)

Latin *herba angelica*, Greek *angelikos*, *aggelikos* 'pertaining to messenger', referring to its medicinal properties; Greek *angelos* 'a messenger', Akkadian *kallu* 'messenger'; see *Species Plantarum* 1: 250–251. 1753 and H.H. Allan, *Fl. New Z.* 1: 443, 487–505. 1961, *Biochemical Systematics and Ecology* 14(1): 81–83. 1986, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany* Vol. 25: 115–170. 1987, *Current Medicinal Chemistry* 11(11): 1479–1500 2004.

Angelica acutiloba (Siebold & Zuccarini) Kitagawa (*Ligusticum acutilobum* Siebold & Zuccarini)

Japan. Perennial herb, solid, ribbed, aromatic roots, white petals, young leaves cooked

See *Abh. Akad. Muench.* iv. II. (1843) 203. 1843, *Pl. Jap. Fam. Nat.* 2: 203. 1845 and *Bot. Mag. (Tokyo)* 51(607): 658. 1937, *Experimental Hematology* 32(10): 918–924. 2004, *Journal of Pharmaceutical and Biomedical Analysis* 48(1): 42–48. 2008

(Skin sensitivity to sunlight, may cause dermatitis. Roots emmenagogue, oxytocic, invigorating, sedative and tonic, used to treat anemia, postpartum pains, menstrual complaints, effective for postmenstrual blood loss and erythropoietin (EPO)-resistant anemia in chronic renal failure.)

in China: dang gui, dong dang gui, dong quai, tang kwei, tang kwei

in Japan: yamato-toki

Angelica anomala Avé-Lallemant (*Angelica jaluana* Nakai)

China, Korea, Yalu River.

See *Index Sem. Hort. Petrop.* 9: 57. 1843 and *Botanical Magazine* 28(335): 314. 1914

(Roots antiinflammatory and antispasmodic.)

in China: xia ye dang gui

in Japan: arenare-nodake, ezo-no-yoroigusa, oba-nodake, uraziro-senkyu

Angelica apaensis R.H. Shan & C.Q. Yuan (*Heracleum apaense* (R.H. Shan & C.Q. Yuan) R.H. Shan & T.S. Wang)

China.

See *Species Plantarum* 1: 249–250. 1753, *Act. Pharmac. Sin.* 13(5): 329–331, 335, f. 21–24. 1966, *Flora Reipublicae Popularis Sinicae* 55(3): 184, pl. 79. 1992

(Roots antiinflammatory and antispasmodic. The fruit shape and structure of *Angelica apaensis* is similar to the Himalayan species *Angelica nubigena* (C.B. Clarke) P.K. Mukherjee and *Angelica cyclocarpa* (C. Norman) M. Hiroe.)

in China: a ba dang gui

Angelica archangelica L. (*Angelica officinalis* Moench; *Archangelica archangelica* (L.) H. Karst.; *Archangelica archangelica* (L.) Huth; *Archangelica norvegica* Rupr.; *Archangelica officinalis* Hoffm.; *Archangelica officinalis* (Moench) Hoffm.)

Eurasia.

See *Species Plantarum* 1: 250–251. 1753, *Genera Plantarum* 32. 1776, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 843. 1883, *Helios* 11(9): 133. 1893 and *Nordic J. Bot.* 22: 83. 2002

(Used in Ayurveda. May cause dermatitis. Roots as a post-partum remedy. Root stalks, leaves and fruit carminative, aphrodisiac, demulcent, stimulant, diaphoretic, antispasmodic, expectorant, antitussive, stomachic, diuretic, tonic, used to treat menstrual complaints, colds, coughs, chronic bronchitis, pleurisy, colic, dysentery, gout, rheumatism, flatulence, indigestion, skin disorders and diseases of the urinary organs, to stimulate gastric secretion. Veterinary medicine, root extract given to livestock to relieve food poisoning.)

in English: angelica, archangel, garden angelica, Norwegian angelica, wild parsnip

in India: canda, chora, coraka, dandu, gandrayan, khoneu

Angelica arguta Nutt. (*Angelica lyallii* S. Watson)

North America. Perennial, erect, robust, strongly aromatic, white flowers

See *A Flora of North America*: containing ... 1(4): 620. 1840

(Stomachic, sedative, teas and extracts from the roots and seeds used to aid digestion and relieve nausea and cramps.)

in English: Lyall's angelica, white angelica

Angelica atropurpurea L. (*Angelica atropurpurea* L. var. *occidentalis* Fassett; *Archangelica atropurpurea* (L.) Hoffm.; *Archangelica atropurpurea* Hoffm.)

Canada. Perennial, stout, scented, greenish white flowers

See *Canadensium Plantarum...Historia... Enchiridion Botanicum Parisiense..* 198, 199. 1635, *Species Plantarum* 1: 251. 1753, *Gen. Pl. Umbell.* 162. 1814 and *Taxon* 55: 209. 2006

(Plant used as poison. Magic, ritual, to punish evil persons. May cause dermatitis; fresh root said to be poisonous. Carminative and stomachic, analgesic, sedative, abortifacient, emetic, febrifuge, tonic, diaphoretic, emmenagogue, used in the treatment of colds, pneumonia, sore throats and mouths, stomach disorders, rheumatism, headache, flu, fever, tuberculosis. Poultice of roots applied to broken bones, swellings.)

in English: Alexander's angelica, alexanders, American angelica, aunt Jericho, bellyache root, common angelica, dead nettle, great angelica, high angelica, masterwort, masterwort aromatic, purplestem angelica, scurvy pea, seacoast angelica, slim-flowered scurvy pea, wild celery

Angelica biserrata (R.H. Shan & C.Q. Yuan) C.Q. Yuan & R.H. Shan (*Angelica pubescens* Maxim. f. *biserrata* R.H. Shan & C.Q. Yuan)

China.

See *Acta Pharmaceutica Sinica* 13(5): 366. 1966, *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen.* 1983: 9, f. 4. 1985 [1983]

(Roots analgesic and antiinflammatory, used in the treatment of rheumatism and rheumatoid arthritis.)

in China: chong chi dang gui

Angelica breweri A. Gray (*Angelica arguta* var. *breweri* (A. Gray) DiTomaso)

North America. Perennial, robust, small flowers, related to *Angelica atropurpurea*

See *Proceedings of the American Academy of Arts and Sciences* 7(2): 348. 1868 and *Madroño* 31(2): 72. 1984

(Roots analgesic, sedative, antirheumatic, tonic, for headache, venereal diseases, influenza, tuberculosis, colds, cough, sore throats, pneumonia, chest ailments, bronchitis, rheumatic pains or swellings, cuts and sores, to ward off snakes. Veterinary medicine.)

in English: Brewer's angelica

Angelica cartilaginomarginata (Makino ex Y. Yabe) Nakai (*Angelica cartilagino-marginata* Nakai; *Angelica cartilaginomarginata* var. *cartilaginomargineata*; *Angelica cartilaginomarginata* var. *makinoi* (Makino ex Y. Yabe) Kitag.; *Angelica cartilaginomarginata* var. *matsumurae* (H. Boissieu) Kitag.; *Angelica cartilaginomarginata* var.

matsumurae (Makino ex Y. Yabe) Kitag.; *Angelica crucifolia* Komarov; *Peucedanum cartilaginomarginatum* Makino ex Y. Yabe; *Pimpinella cartilaginomarginata* (Makino ex Y. Yabe) H. Wolff; *Sium matsumurae* H. Boissieu)

Korea, Japan. Biennial, white petals

See *Species Plantarum* 1: 244–246, 251–252, 263–264. 1753 and *Journal of the College of Science, Imperial University of Tokyo* 16(4): 100. 1902, *Bulletin de l'Herbier Boissier*, sér. 2, 3(11): 954. 1903, *Journal of the College of Science, Imperial University of Tokyo* 26(1): 269. 1909, *Journal of Japanese Botany* 12(4): 243–245. 1936

(May cause dermatitis. Roots antiinflammatory and antispasmodic.)

in China: chang qiao dang gui

in Japan: korai-hime-nodake, tyosen-hime-nodake

Angelica cincta H. Boissieu (*Angelica amurensis* Schischkin)

China.

See *Bulletin de la Société Botanique de France* 53: 436. 1906, *Fl. URSS* 17: 19, 352, pl. 8, f. 7. 1951

(Roots antiinflammatory and antispasmodic.)

in China: hei shui dang gui, hu bei dang gui

Angelica cyclocarpa (C. Norman) M. Hiroe (*Angelica cyclocarpa* Cannon; *Archangelica cyclocarpa* C. Norman)

China, India, Himalaya.

See *Journal of Botany, British and Foreign* 67: 246. 1929, *Umbelliferae of [the] World* 1430. 1979

(Seed infusion drunk for fever; fresh seeds made into a paste applied on the forehead against headache; dry seeds crushed and powdered, mixed with cow's milk and drunk for stomach ailments.)

in India: chimping, clem-mom

Angelica dahurica (Fischer ex Hoffmann) Benth. et Hook. f. ex Franchet & Savatier (*Angelica dahurica* (Fisch.) Benth. & Hook. f.; *Angelica dahurica* (Fisch. ex Hoffmann) Benth. & Hook. f.; *Angelica dahurica* Benth. & Hook. f.; *Angelica dahurica* Maxim.; *Angelica macrocarpa* H. Wolff; *Angelica porphyrocaulis* Nakai & Kitagawa; *Angelica porphyrocaulis* var. *albiflora* (Maximowicz) Makino; *Angelica tschiliensis* H. Wolff; *Callisace dahurica* Fisch.; *Callisace dahurica* Fischer ex Hoffmann)

China, Japan. Large perennial herb, stout, pubescent, stem hollow often purplish, aromatic root, inflorescence a large compound umbel, small white flowers, ovoid fruit compressed with 4 membranous wings, cooked leaves eaten

See *Genera Plantarum Umbelliferarum* 170, f. 18. 1816, *Enumeratio Plantarum in Japonia Sponte Crescentium* ... 1(1): 187. 1873, *Bull. Acad. Petersb.* xxiv. (1878) 35. 1878 and *Journal of Pharmacy and Pharmacology* 54(9): 1271–1278.

2002, *Biological & Pharmaceutical Bulletin* 28: 380–382. 2005, *Phytotherapy Research* 21(3): 288–290. 2007

(May cause dermatitis; contraindicated for use during pregnancy; do not apply to open sores. Roots analgesic, antiinflammatory, antitumoral, antiproliferative, bitter, anodyne, antibacterial, antithrombotic, antidote, carminative, diaphoretic, hepatoprotective, diuretic, stimulant, tonic, protecting against sepsis, used for the treatment of fever, burns, flu, toothache, sinusitis, bloody stools, pain, headache, rheumatism, skin inflammation and leucorrhea.)

in English: Dahurian angelica

in China: bai zhi, dong bei da huo

in Japan: ezo senkyu, o-sisi-udo, udo-modaki, yoroi-gusa

in Korea: goo-rit-dae

in Vietnam: bach chi

Angelica dawsonii S. Watson

North America. Perennial

See *Proceedings of the American Academy of Arts and Sciences* 20: 369. 1885

(Antihemorrhagic, antirheumatic, antifungal, for intestinal ailments, applied to rashes, mumps swellings, eczema and athlete's foot. Ceremonial, magic, good luck charm, initiation. Veterinary medicine.)

in English: Dawson's angelica

Angelica decursiva (Miquel) Franchet & Savatier (*Angelica decursiva* Franch. & Sav.; *Ligusticum melanotilingia* (H. Boissieu) Kitagawa; *Ostericum melanotilingia* (H. Boissieu) Kitagawa; *Peucedanum decursivum* (Miquel) Maximowicz; *Peucedanum grandifolioides* H. Wolff; *Peucedanum melanotilingia* (H. Boissieu) H. Boissieu; *Peucedanum porphyroscias* Makino, nom. illeg. superfl.; *Pimpinella decursiva* H. Wolff; *Porphyroscias decursiva* Miquel; *Selinum melanotilingia* H. Boissieu)

China. Perennial herb, erect, simple, purplish, leaves pinnate, petiole clasping the stem, umbels compound, dark purple flowers, fruit dividing into 2 mericarps, carpels ribbed, leaves and shoots cooked, on riverbanks, on slopes, in shrubland

See *Species Plantarum* 1: 245–246, 250–251, 263–264. 1753, *Genera Plantarum Umbelliferarum* ed. 2 162. 1816, *Annales Museum Botanicum Lugduno-Batavi* 3: 62. 1867, ... 1(1): 187. 1873, *Melanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Petersbourg* 12: 472–473. 1886 and *Bulletin de l'Herbier Boissier*, sér. 2, 3: 956. 1903, *Botanical Magazine (Tokyo)* 18(208): 65. 1904, *Bulletin de l'Herbier Boissier*, sér. 2, 8: 642. 1908, *J. Coll. Sci. Imp. Univ. Tokyo* 16(1): 268. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 16(456–461): 237–238. 1919, *Kromosomo*, II 5: 146–157. 1977, *Plant Systematics and Evolution* 177: 117–138. 1991, *Acta Phytotaxonomica Sinica* 32(5): 419–424. 1994, *Acta*

Phytotaxonomica et Geobotanica 46: 99–102. 1995, *Journal of Plant Biology* 39: 15–22. 1996

(May cause dermatitis. Roots antiseptic, lenitive, carminative, antiarthritic, antispasmodic, antitussive, expectorant, stimulant, stomachic, analgesic, antipyretic, tonic, used in the treatment of common colds, coughs, asthma, upper respiratory tract infection and fevers.)

in English: common hogfennel

in China: qian hu, chien hu, tun huo, zi hua qian hu

Angelica genuflexa Nutt. (*Angelica genuflexa* Nutt. ex Torr. & A. Gray; *Angelica genuflexa* subsp. *refracta* (Schmidt) Hiroë; *Angelica refracta* Schmidt)

E. Asia, China, North America. Perennial herb, young stems peeled and eaten raw, young leaves cooked

See *A Flora of North America: containing ...* 1(4): 620. 1840, *Reisen im Amur-Lande* 138. 1868

(May cause dermatitis. Dried rhizomes and roots purgative, deodorant, cathartic, stimulant, for headache.)

in English: kneeling angelica

in Japan: mo-siwkina

Angelica gigas Nakai (*Angelica cryptotaeniifolia* Kitag.)

E. Asia, Korea. Perennial herb, young leaves cooked

See *Bot. Mag. (Tokyo)* 31(364): 100. 1917

(May cause dermatitis. Roots antiinflammatory, blood tonic and antispasmodic, to treat anemia, hemiplegia and women's diseases.)

in China: chao xian dang gui

in Japan: oni-nodake

in Korea: cham dangwi

Angelica glauca Edgew.

India, Himalaya. Herb, robust, glabrous, aromatic roots, sweetly scented white or purple flowers in long stalked umbels, powdered root and fruits as spice

See *Trans. Linn. Soc. London* 20(1): 53–54. 1846 and *Journal of Asian Natural Products Research* 10(1): 49–58. 2008

(Used in Ayurveda. Irritant, may cause dermatitis. Fruit stimulant, useful in treating dyspepsia. Stomachic, stimulant, carminative, diaphoretic, diuretic, tonic, powdered root given with hot water for stomach troubles, dyspepsia, constipation and vomiting, bronchitis, asthma, anemia, colds, arthritis. The roots said to give strength and vigor to women after delivery; a decoction for dysentery, food poisoning and headache. Roots burnt to repel entry of snakes in human dwellings. Veterinary medicine, root extract given to livestock with excessive secretion of salivary liquid.)

in China: hui ye dang gui

in India: canda, chamchora, chaura, cheeming, chippi, chora, chorak, choraka, chori, choro, choru, chuara, chura, coraka, gandrayan, granthiparna, ksemaka, sapal, taskara

in Tibet: tsa ron, tsi ron

Angelica hendersonii J.M. Coult. & Rose (*Angelica tomentosa* var. *hendersonii* (J.M. Coult. & Rose) DiTomaso)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 11: 141. 1876, *Botanical Gazette* 13(4): 80. 1888 and *Madroño* 31(2): 73, 75. 1984

(Antidote, plant infusion for mussel poisoning. Magico-religious beliefs, protection.)

in English: Henderson's angelica, woolly angelica

Angelica laxifoliata Diels (*Angelica dielsii* H. Boissieu; *Angelica erythrocarpa* H. Wolff; *Angelica fargesii* H. Boissieu)

China. Perennial, thin stems, aromatic roots, white flowers, multiradiate umbels, closest relative is *Angelica maowenensis* C.C. Yuan & R.H. Shan

See *Bot. Jahrb. Syst.* 29(3–4): 499–500. 1901, *Acta Horti Gothoburgensis* 2(7): 316–317. 1926, *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen* 1983: 11, f. 5. 1983 [1985], *Willdenowia* 33: 121–137. 2003

(Roots antiinflammatory and antispasmodic, for the treatment of rheumatism and invigorating the circulation of blood.)

in China: shu ye dang gui, tu huo

Angelica lineariloba A. Gray (*Angelica lineariloba* var. *culbertsonii* Jeps.)

North America. Perennial

See *Proceedings of the American Academy of Arts and Sciences* 7(2): 347–348. 1868 and *A Manual of the Flowering Plants of California ...* 728. 1925

(Antihemorrhagic, analgesic, for pneumonia.)

in English: poison angelica

Angelica lucida L. (*Coelopleurum actaeifolium* (Michx.) J.M. Coult. & Rose; *Coelopleurum gmelinii* (DC.) Ledeb.; *Coelopleurum lucidum* (L.) Fernald; *Coelopleurum lucidum* subsp. *gmelinii* (DC.) A. Löve & D. Löve; *Imperatoria lucida* (L.) Spreng.)

North America. Perennial

See *Species Plantarum* 1: 251, 259. 1753, *Flora Rossica* 2: 361. 1844 and *Rhodora* 21(248): 146. 1919, *Taxon* 55: 209. 2006

(Analgesic, tonic, stimulant, for colds, sore throats, weakness, internal or external pain. Ceremonial, ritual, good luck charm.)

in English: seacoast angelica

Angelica megaphylla Diels (*Peucedanum megaphyllum* (Diels) H. Boissieu; *Porphyroscias megaphylla* (Diels) H. Boissieu)

China. Herb, perennial, flowers dark purple-red, young leaves cooked

See *Species Plantarum* 1: 245–246. 1753 and *Bot. Jahrb. Syst.* 29(3–4): 500. 1901, *J. Coll. Sci. Imp. Univ. Tokyo* 26(1): 271. 1901, *Bulletin de l'Herbier Boissier*, sér. 2, 8: 643. 1908

(May cause dermatitis. Roots antiinflammatory and antispasmodic.)

in China: da ye dang gui

Angelica morii Hayata

China, Taiwan. Perennial, flowers yellowish white

See *Icon. Pl. Formosan.* 10: 24, 26–27, f. 15. 1921

(Roots antiinflammatory and antispasmodic, anti-AIDS.)

in China: fu shen, shan du huo

Angelica morrisonicola Hayata (*Peucedanum morrisonicola* (Hayata) M. Hiroe)

Taiwan, China. Perennial, scented, white flowers, alpine tundra

See *J. Coll. Sci. Imp. Univ. Tokyo* 30: 129. 1911, *Umbell. Asia* 1: 180, f. 214. 1958

(Roots antiinflammatory and antispasmodic.)

in English: Yishan Chinese angelica

in China: yu shan dang gui

Angelica nitida H. Wolff (*Angelica chinghaiensis* R.H. Shan ex K.T. Fu; *Angelica wulsiniana* H. Wolff)

China. Perennial, flowers white or yellowish

See *Acta Horti Gothob.* 2(7): 317–318. 1926, *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 334–335. 1930, *Flora Tsinlingensis* 1: 3, 421. 1981

(Roots antiinflammatory and antispasmodic.)

in China: qing hai dang gui

Angelica omeiensis C.C. Yuan & R.H. Shan

China. Perennial, aromatic, yellowish green flowers, conspecific with *Angelica sinensis* var. *wilsonii* (H. Wolff) Z.H. Pan & M.F. Watson (*Angelica wilsonii* H. Wolff)

See *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 335. 1930, *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen* 1983: 6. 1985 [1983], *Acta Phytotaxonomica Sinica* 42(6): 562. 2004

(Roots antiinflammatory and antispasmodic.)

in China: e mei dang gui

Angelica oncosepala Handel-Mazzetti (*Heracleum oncosepalum* (Handel-Mazzetti) Pimenov & Kljuykov)

China. Perennial, white or purplish red flowers, often placed in *Heracleum*

See *Species Plantarum* 1: 249–250. 1753 and *Symb. Sin.* 7(3): 726. 1933

(Roots antiinflammatory and antispasmodic.)

in China: long e dang gui

Angelica paeoniifolia R.H. Shan & C.C. Yuan

Tibet, China. Perennial, aromatic, yellowish green or purplish flowers

See *Acta Phytotax. Sin.* 18(3): 378. 1980

(Roots antiinflammatory and antispasmodic.)

in China: mu dan ye dang gui

Angelica pinnata S. Watson

North America. Perennial

See Watson, Sereno (1826–1892), *Botany* [of the Fortieth Parallel]. Washington: Government Printing Office, 126–127. 1871

(Analgesic, for headache, back pains, aching joints, stomach-aches, sores.)

in English: small-leaf angelica

Angelica polymorpha Maximowicz (*Angelica sinuata* H. Wolff; *Peucedanum taquetii* H. Wolff; *Rompelia polymorpha* (Maximowicz) Koso-Poljansky; *Selinum coreanum* H. Boissieu)

E. Asia, Korea. Perennial

See *Species Plantarum* 1: 245–246. 1753, *Species Plantarum*, Editio Secunda 1: 350. 1762, *Bull. Acad. Imp. Sci. Saint-Pétersbourg* 19(2): 185. 1874 and *Bulletin de l'Herbier Boissier*, sér. 2, 3: 956. 1903, *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 125. 1916, *Repertorium Specierum Novarum Regni Vegetabilis* 21(588–600): 245–246. 1925, *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 333–334. 1930

(May cause dermatitis. Roots antiinflammatory, diuretic, oxytocic, tonic and antispasmodic, mild laxative, vasoconstrictor, used for the female reproductive system, dysmenorrhea, amenorrhea and symptoms related to menopause, for respiratory ailments, constipation, rheumatism, boils and ulcers, traumatic injuries, anemia; not to be used during pregnancy.)

in China: dong quai, guai qin

Angelica pubescens Maxim.

Japan. Perennial, leaves cooked

See *Kromosomo*, II 5: 146–157. 1977, *Acta Phytotax. Geobot.* 46: 99–102. 1995

(May cause dermatitis; contraindicated for use during pregnancy; do not apply to open sores; in large doses can cause convulsions and paralysis. Roots analgesic, emmenagogue, hypotensive, antiinflammatory, antirheumatic, antitumoral, antiproliferative, nervine, stimulant, tonic, spicy, bitter, anodyne, antibacterial, antithrombotic, vasodilator, antidote, carminative, diaphoretic, aphrodisiac, hepatoprotective, diuretic, protecting against sepsis, used for the treatment of fever, edema, chronic bronchitis with wheezing, burns, flu, toothache, sinusitis, bloody stools, pain, headache, rheumatism, rheumatoid arthritis.)

in China: du hu

Angelica sinensis (Oliver) Diels (*Angelica polymorpha* var. *sinensis* Oliv.)

China. Perennial, strongly aromatic roots, white petals

See *Hooker's Icones Plantarum* 20(4): pl. 1999. 1891 and *Bot. Jahrb. Syst.* 29(3–4): 500. 1900

(May cause dermatitis. Restorative, sedative, tonic, antianemic, analgesic, antibiotic, uterotonic, estrogenic, laxative, emollient, anticholesterolemic, antiinflammatory, used for treating female ailments, anemia, headache, chest pains, colic, impetigo, menstrual disorders, premenstrual syndrome (PMS), cramping and irregular cycles, a sedative in dysmenorrhea.)

in English: Chinese angelica, female ginseng

in China: dang gui, dong dang gui, dong quai, tang kuei, tang kwei

in Vietnam: can qui, tan qui

Angelica sylvestris Linnaeus (*Angelica montana* Brot.; *Angelica pancicii* Vandas)

Europe.

See *Sp. Pl.* 1: 251. 1753 and *Lazaroa* 3: 146. 1981, *Taxon* 41: 557. 1992

(May cause dermatitis. Roots parasiticide, antiinflammatory, carminative, diaphoretic, diuretic, emmenagogue, expectorant, stimulant, stomachic, tonic, antispasmodic, for bronchial catarrh, coughs and dyspepsia.)

in English: wild angelica

in China: lin dang gui

Angelica tarokoensis Hayata

Taiwan. Perennial, white flowers

See *Icon. Pl. Formosan.* 10: 27. 1921

(Roots antiinflammatory and antispasmodic.)

in China: tai lu ge dang gui

Angelica tomentosa S. Watson

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 11: 141. 1876

(Analgesic, astringent, decoction of root used for colds, diarrhea, stomachaches, for bathing sores, to regulate menses. Magic, ritual, ceremonial, protection, root shavings smoked by the shaman.)

in English: woolly angelica

Angelica valida Diels

China. Perennial, white flowers

See *Bot. Jahrb. Syst.* 29: 501. 1901

(Roots antiinflammatory and antispasmodic.)

in China: jin shan dang gui

Angelica venenosa Fernald (*Angelica venenosa* (Greenway) Fernald; *Angelica villosa* (Walter) Britton, Sterns & Poggenb.)

North America. Perennial, serrate leaflets

See *Rhodora* 45: 301. 1943

(Poison, toxic, roots eaten to commit suicide.)

in English: hairy angelica

Angelonia Bonpl. Scrophulariaceae (Plantaginaceae)

From a South American vernacular name, see *Plantae Aequinoctiales* [Humboldt & Bonpland] 2(14): 92, t. 108. 1812 [1809 publ. Apr 1812] and *Fieldiana, Bot.* 24(9/4): 319–416. 1973.

Angelonia goyazensis Benth. (*Angelonia goyayensis* Benth.)

South America. Herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 253. 1846

(Magico-religious beliefs, to ensure a good harvest.)

in Borneo: ipung pu'ut

Angelonia salicariaefolia Humb. & Bonpl. (*Angelonia evitae* Descole & Borsini; *Angelonia hirta* Cham.; *Angelonia salicariifolia* Humb. & Bonpl.)

Tropical America, Brazil, Venezuela. Shrub, glandular, erect, apple-scented foliage, two-lipped purplish flowers

See *Plantae Aequinoctiales* 2: 92, t. 108. 1812 [1809 publ. Apr 1812] and *Lilloa* 23: 511. 1950

(Diaphoretic, pectoral, sudorific.)

in English: grannie's bonnets, willowleaf angelon

in India: tsjetti-pu

in Venezuela: angelón

Angianthus Wendland Asteraceae

From the Greek *angeion*, *aggeion* ‘a vessel, cup’ and *anthos* ‘flower’, referring to the pappus scales, see *Supplementum ad Methodum Plantas: a staminum situ describendi* 254. 1802, *Collectio Plantarum* 2(2): 31, t. 48. 1808[1810].

Angianthus tomentosus J.C. Wendl. (*Angianthus tomentosus* Wendland; *Olearia dentata* Moench, nom. illeg. superfl.; *Olearia tomentosa* (J.C. Wendl.) DC.)

Australia. Erect or ascending annual herb, yellow flowers, compound heads elongate

See *Supplementum ad Methodum Plantas: a staminum situ describendi* 254. 1802, *Collectio Plantarum* 2(2): 31, t. 48. 1808[1810], *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 252. 1836

(Potentially allergenic, sesquiterpene lactone.)

in English: camel grass, hairy angianthus, hairy cup-flower

Angiopteris Hoffm. Marattiaceae (Dryopteridaceae, Woodsiaceae)

Greek *angeion*, *aggeion* ‘a vessel, capsule’ and *pterus* ‘a fern’, see *Species Plantarum* 2: 1062. 1753, *Familles des Plantes* 2: 21. 1763, *Commentationes Societatis Regiae Scientiarum Gottingensis* 12(Cl. Phys.): 29. 1796, *Descripción de las Plantas* 553–554. 1802, *Supplementum Tentaminis Pteridographiae* 27. 1845, *Flora* 86(1): 72–85. 1899 and *Botanical Gazette* 67(1): 88–89. 1919, *Botanical Magazine* 42(498): 305, 308, 346. 1928, *Fern Gaz.* 11(2–3): 141–162. 1975.

Angiopteris evecta (G. Forst.) Hoffm. (*Angiopteris crassipes* Wall. ex Presl; *Angiopteris crassipes* Wall.; *Polypodium evectum* G. Forst.)

Tropical Asia, Vietnam, Tahiti, South Pacific. Large fleshy fragrant terrestrial fern, robust rhizome, threatened endangered species, lithophytic, used for leis, aromatic oil, fleshy rhizome as a famine food, found growing in moist shady places along the water streams

See *Species Plantarum* 2: 1082–1094. 1753, *Florulae Insularum Australium Prodromus* 81. 1786, *Commentationes Societatis Regiae Scientiarum Gottingensis* 12(Cl. Phys.): 29, t. 5. 1796, *Numer. List* [Wallich] n. 187. 1828 and *Newslett. Hawaiian Bot. Soc.* 26(3): 58–59. 1987, *Acta Phytotax. Geobot.* 46: 137–145. 1995, *Indian Fern Journal* 16(1–2): 130–152. 1999, *Advances in Plant Sciences* 15(II): 401–405. 2002, *J. Sci. Res. Chulalongkorn Univ.* 30(2). 2005 [Inhibitory activities of angiopteriside for HIV-1 reverse transcriptase and lung cancer cell-line.], *Pharmaceutical biology* 44(3): 221–228. 2006, *Ethnobotanical Leaflets* 12: 23–28. 2008, *Fitoterapia* 79(5): 366–369. 2008

(Antibacterial, antifungal, antidote, analgesic, antioxidant, radical scavenger, HIV-1 reverse transcriptase inhibitor and

antitumor, diuretic, antipyretic, tonic after a miscarriage, analgesic, astringent, antidiarrheal, for backache, pain, headache, blisters and boils, able to cool down the body temperature; root stock of *Diplazium maximum* crushed with those of *Angiopteris evecta*, *Colysis hemionitidea* and stems of *Raphidophora decursiva* and *Raphidophora hookerii* and applied on fracture; roots extract given for chest pain and heart ailments; rhizomes used for scabies, leprosy; for coughs, pound the plant and drink the juice; fronds bound onto a fractured limb. Treatment of ptomaine poisoning. Magico-religious beliefs, used in worship.)

in English: giant fern, king fern, Madagascar tree fern, mule’s-foot fern, oriental vessel fern

in India: arthladadnpui, arthladawnpui, bakum, chainau-aukimu, ghodatap, kalojkanda, kwak-sa-kê, taba, thengi

Malay name: paku gajah

in Pacific: ammarre (chuuk lagoon), ana’e, m’ong, na’e, nahe, nase, paiued, peiwed, poiawed, rau na’e

Angylocalyx Taubert Fabaceae (Caesalpinaceae, Leguminosae, Sophoreae)

Greek *ancho* ‘to bind, to strangle’ or *agkylos*, *ankylos* ‘crooked, bent’ and *calyx*, bent calyx; see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 172. 1896 and *Adansonia*, sér. 2, 8: 317–335. 1968, J. Vivien & J.J. Faure, *Arbres des Forêts denses d’Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985.

Angylocalyx pynaertii De Wild. (*Angylocalyx gossweileri* Baker f.; *Angylocalyx oligophyllus* (Bak.) Bak. f.; *Angylocalyx oligophyllus* Bak.f., pp.; *Angylocalyx zenkeri* Harms; *Angylocalyx zenkeri* var. *gossweileri* (Baker f.) Pellegr.; *Angylocalyx zeucheri* Harms)

Tropical Africa. Perennial non-climbing tree, small tree or shrub, armed, cauliflorous, slender, petals whitish pale yellow, gorillas eat young leaves and fruits, seeds eaten by monkeys and bush pigs (*Potamochoerus porcus porcus*)

See *Bot. Jahrb. Syst.* xxiii. 172. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 306. 1910, *Ann. Mus. Congo Belge, Bot.* sér. 5, 3[2]: 196. 1910 [1911–1912 publ. Nov 1910], *British Museum, Natural History. Catalogue of the plants collected by Mr. & Mrs. P. A. Talbot in the Oban district South Nigeria* ... 26. London 1913, *Journal of Botany, British and Foreign* 66(Suppl. 1): 133. 1928, *European Journal of Biochemistry* 268(1): 35–41. 2001, *J. Nat. Prod.* 65(2): 198–202. 2002, *Am. J. Primatol.* 58: 91–116. 2002

(Pods and bark for diabetes.)

in Cameroon: bekoabezombo, bitongo

in Central African Republic: manjombé, monjombe, monjombé, monjombi, moujombe

in Nigeria: ekhiawa, ekiáwá, okó ajá

in Zaire: amasolisoli, bolongo, bulunge, ngubi, soli

Aniba Aublet Lauraceae

From the Tupi-Guarani *anhuyba* for a species of sassafras, see *Histoire des plantes de la Guiane Française* 1: 327, t. 126. 1775 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 819–931. 1938.

Aniba coto (Rusby) Kosterm. (*Aniba coto* (Rusby) Kosterm. ex J.F. Macbr.; *Nectandra coto* Rusby)

South America, Peru, Bolivia. Tree, cinnamon-brown bark

See *Bulletin of the Torrey Botanical Club* 49: 260. 1922, *Recueil des Travaux Botaniques Néerlandais* 35: 916. 1938, *Publications of the Field Museum of Natural History, Botanical Series* 13(2): 863. 1938

(Aromatic, antiseptic and very pungent bark.)

in Bolivia: coto fino, coto piquante

Aniba pseudo-coto (Rusby) Kosterm. (*Ocotea pseudo-coto* Rusby)

South America, Bolivia. Forest tree

See *Bulletin of the Torrey Botanical Club* 49(9): 261–262. 1922, *Recueil des Travaux Botaniques Néerlandais* 35: 872–873. 1938

(Aromatic, antiseptic.)

Common names: coto, paracoto

Aniseia Choisy Convolvulaceae

From the Greek *anisos* ‘unequal’, referring to the two outermost sepals or to the calyx, see *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 6: 481, 483. 1834 and *Systematic Botany* 23(4): 411–420. 1998 [1999], *Systematic Botany* 28(4): 791–806. 2003.

Aniseia martinicensis (Jacq.) Choisy (*Aniseia cernua* Choisy; *Aniseia cernua* Moric.; *Aniseia emarginata* (Vahl) Hassk.; *Aniseia ensifolia* Choisy; *Aniseia heteranthera* sensu Pittier; *Aniseia martinicensis* Choisy; *Aniseia nitens* Choisy; *Aniseia salicifolia* (Desr.) Choisy; *Aniseia uniflora* Choisy; *Aniseia uniflora* (Burm.f.) Choisy; *Convolvulus emarginata* Vahl; *Convolvulus martinicensis* Jacq.; *Convolvulus rheedii* Wall.; *Convolvulus salicifolius* Desr.; *Convolvulus uniflorus* Burm.f.; *Ipomoea cernua* Arechav.; *Ipomoea lanceolata* G. Bombay 2: 450. 1908, *Phil. J. Sci.* 7: 413–415. 1912, *Taxon* 29: 711–712. 1980

(Used in Ayurveda and Sidha. Essential oil from aerial parts antibacterial, fungicidal, antispasmodic, stimulant, diaphoretic, expectorant, for cough, headache, cold, to relieve urticaria. Leaves to improve appetite; raw leaves eaten for high blood pressure. Powder of dry fruits mixed in coconut oil used against scabies and skin diseases. Roots chewed for cold.)

in English: common anisochilus

in China: pai cao xiang

in India: adusapundlaaku, ajapada, ankayarkanni, anoraimayakkam, bennia, canamuli, canmuli, cantiraparani, caviracamparam, chomara, choraonva, cutamuli, cutattaikkattuvalamuli, cutavalli, dodda pathri, dodda-patri, doddapatre, doddapatri, goplya, induparni, intuparani, irutinankai, irutinankaiyilai, jirna, jungli aajwan, kaapur vael, kaapurli, kaara vaelu, kanakavalli, kanakavalliceti, kapparalli, kapurli, karapurada gida, karavaeru, karpooora valli, karpooora gida, karpoooravalli, karppura-valli, karppuravalli, karpura-valli, karpuravalli, karuntumpira, karuntumpiraceti, karuppuravalli, kattu-kurkka, kattukurkka, katu-kurka, kurkka, kuruvelu balli, madivaala pathre, manchapatri, manokaramuli, napatong, omamaku, omamu aaku, omamu-aku, omamuaku, pakiratipputu, palukam, palukavalli, palukavalliceti, panjiri-ka-pat, panjiri-kapatta, panjirikapat, panjri, panliri-ka-pat, patu-kurkka, patukurkka, pindi bonda, pokosunga, ritchu-rodha, ritchu rodha, roga-chettu, rogachettu, rosachettu, saamabara balli, saeththuppun poondu, saraguduganapa, sita-ki-panjiri, sitaki, sujro-hortelamy, ubho ratvelio, ulpalabheda, verakakkoti, verakam

***Anisochilus dysophylloides* Benth.**

India. Thick undershrub, decumbent, silvery-tomentose stem, erect branches, white or purple flowers in terminal or axillary cylindrical inflorescence

See *Plantae Asiaticae Rariores* 2: 19. 1830, *Fl. Brit. India* 4(12): 628. 1885 and *Fl. Madras* 1128. 1924

(Fresh root paste applied on chronic blisters.)

in India: chalindi veru chedi

***Anisochilus scaber* Benth.**

India.

See *Prodr.* (DC.) 12: 81. 1848

(Whole plant infusion used to wash out sores; juice drunk as a febrifuge. Stimulant.)

in English: scabrous mosla

in China: shi qi zhu

in Indonesia: embeng kesa

Anisocyclus Baillon Menispermaceae

From the Greek *anisos* ‘unequal’ and *kyklos* ‘circle, round, ring’, see *Histoire Physique, Naturelle et Politique de Madagascar* 28(Atlas 1), t. 49a. 1887, *Bulletin Mensuel de la Société Linnéenne de Paris* 2(135): 1078–1079. 1893 and *Canadian Journal of Botany* 64: 3130–3133. 1986, *Neurochemistry International* 15(3): 321–324. 1989.

***Anisocyclus cymosa* Troupin**

Congo. Liana, circular leaf scars, inflorescence an axillary many-flowered cyme

See *Bulletin du Jardin Botanique de l'État* 19: 416. 1949, *Planta Medica* 55(4): 394. 1989, *Journal of Natural Products* 55(5): 607–612. 1992, *Journal of Natural Products* 56(6): 957–960. 1993, *Journal of Natural Products* 56(4): 618–620. 1993

(Leaves and roots extract a tonic and analgesic, against rheumatic pains and stomachache.)

***Anisocyclus grandidieri* Baill.**

Madagascar.

See *Lloydia* 28(3): 191–198. 1975

(Bitter decoction of yellow roots used to cure diseases of the kidneys and the bladder. Sap from the roots used as a coagulant.)

***Anisocyclus jollyana* (Pierre) Diels**

Tropical Africa. Climbing shrub

See *Journal of Natural Products* 58(10): 1587–1589. 1995, *Journal of Natural Products* 59(5): 498–500. 1996, *Journal of Natural Products* 60(11): 1121–1124. 1997

(Alkaloids.)

Anisodus Link & Otto Solanaceae

Greek *anisos* ‘unequal’ and *odous, odontos* ‘tooth’, see *Systema Vegetabilium*, editio decima sexta 1: 512–, 699. 1825, *Annual Magazine of Natural History* 6: 35–41. 1850 and *Acta Phytotaxonomica Sinica* 15: 57–68. 1977, *Novon* 2(2): 124–128. 1992, *Botanical Journal of the Linnean Society* 147(4): 457–468. 2005.

Anisodus acutangulus* C.Y. Wu & C. Chen var. *acutangulus

China. Roots stout, corolla pale yellow-green, capsule nodding

See *Acta Phytotax. Sin.* 15(2): 62. 1977, *J. Biochem. Mol. Biol.* 40(5): 715–722. 2007, *Wuhan University Journal of Natural Sciences* 12(4): 762–768. 2007

(Roots extremely toxic. Analgesic, anesthetics and antispasmodic, used to ease pain and for stomachache, dosages very small, overdoses known to cause delirium. Wind-evil dispelling medicine.)

in China: san fen san, san fen zi

Anisodus acutangulus C.Y. Wu & C. Chen var. *breviflorus* C.Y. Wu & C. Chen

China.

See *Acta Phytotax. Sin.* 15(2): 63–64, pl. 3. 1977

(Roots toxic, used to ease pain and for stomachache.)

in China: san fen qi

Anisodus carniolicoides (C.Y. Wu & C. Chen) D'Arcy & Zhi Y. Zhang (*Scopolia carniolicoides* C.Y. Wu & C. Chen; *Scopolia carniolicoides* var. *dentata* C.Y. Wu & C. Chen)

China.

See *Acta. Phytotax. Sin.* 15(2): 59–60, pl. 1. 1977, *Novon* 2(2): 126. 1992

(Rhizomes bitter and poisonous, used for treating bleeding wounds, rheumatism and arthritis.)

in China: sai lang dang

Anisodus luridus Link (*Anisodus fischerianus* Pascher; *Anisodus luridus* var. *fischerianus* (Pascher) C.Y. Wu & C. Chen; *Anisodus mairei* (H. Léveillé) C.Y. Wu & C. Chen; *Anisodus stramonifolius* (Wallich) G. Don; *Anisodus stramonifolius* (Sweet) G. Don; *Nicandra anomala* Link & Otto; *Physalis stramonifolia* Wallich; *Scopolia anomala* (Link & Otto) Airy Shaw; *Scopolia lurida* (Link) Dunal; *Scopolia lurida* Dunal; *Scopolia mairei* H. Léveillé; *Scopolia straminifolia* (Wall.) Shrestha; *Scopolia stramonifolia* (Wallich) Shrestha; *Scopolia stramonifolia* (Wall.) N.P. Balakr.; *Scopolia stramonifolia* (Roxb.) N.P. Balakr.; *Scopolina stramonifolia* (Wall.) Kuntze; *Whitleya stramonifolia* (Wallich) Sweet)

China, Himalaya.

See *Familles des Plantes* 2: 219. 1763, *Observationum Botanicarum* 1: 32–33, pl. 20. 1764, *Flora Indica*; or descriptions of Indian Plants 2: 242–243. 1824, *Systema Vegetabilium editio decima sexta* 1: 699. 1825, *Loudon's Hortus Britannicus. A catalogue ...* 61. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(1): 555. 1852, *Icones plantarum selectarum* 77, pl. 35. 1855, *Revisio Generum Plantarum* 2: 452. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 7(143–145): 226–227. 1909, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 37. 1915, *Journal of Botany, British and Foreign* 75: 195. 1937, *Bulletin of the Botanical Survey of India* 22(1–4): 176. 1980 (publ. 1982), *Novon* 2: 125. 1992

(Roots and seeds for pain and spasms, also for plague. Some seeds cast in the fire and the smoke inhaled to treat wounds inside the nose. Seeds used as anthelmintic, in sinusitis and colic pain.)

in English: common anisodus

in Bhutan: thang-phrom-nag-po

in China: ling dang zi, san fen san

in Nepal: langtang kabo

in Tibet: ximalaya-dong-liangdang

Anisodus tanguticus (Maximowicz) Pascher (*Anisodus tanguticus* var. *viridulus* C.Y. Wu & C. Chen; *Scopolia tangutica* Maximowicz)

China, Tibet. Alpine, perennial, roots stout, flowers nodding or erect, corolla purple or dark-purple, calyx campanulate to nearly funnelform

See *Bull. Acad. Imp. Sci. Saint-Petersbourg* 27(4): 508. 1882 and *Repert. Spec. Nov. Regni Veg.* 7(140–142): 167. 1909, *Israel Journal of Plant Sciences* 50: 127–134. 2002, *Planta medica* 71(3): 249–253. 2005, *Genetica* 132(2): 123–129. 2008

(Antispasmodic, antioxidant and antiproliferative, roots used for alleviating pain and spasms, urinary tract infections, peptic ulcers, fever of the throat and lung diseases. The plant produces anticholinergic alkaloids such as hyoscyamine, 6β-hydroxyhyoscyamine and scopolamine.)

in English: Tangut anisodus

in China: shan lang dang, zang qie

Anisomeles R. Br. Lamiaceae (Labiatae)

Greek *anisos* 'unequal' and *melos* 'a limb, part, member', referring to the corolla lobes or to the anthers of the longer stamens; see Robert Brown, *Prodromus florae Novae Hollandiae* 503. 1810.

Anisomeles heyneana Benth.

India.

See *Plantae Asiaticae Rariores* 1: 59. 1830 and Govaerts, R. *World Checklist of Seed Plants*. MIM, Deurne. 1995 [as *Anisomeles indica*.], *Fitoterapia* 71: 574–576. 2000, *Pharmaceutical Biology* 40(6): 433–439. 2002, *Pharmaceutical Biology* (Formerly *International Journal of Pharmacognosy*). 41(1): 37–44. 2003, Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Anisomeles indica*.], *FEMS Immunology & Medical Microbiology* 43 (2): 295–300. 2005, *Crop Protection* 26(7): 948–952. 2007, *Journal of Ethnopharmacology* 118(1): 65–70. 2008

(Stem juice or extract given in urinary complaints.)

in India: phangurta

Anisomeles indica (L.) Kuntze (*Ajuga glabrata* Benth. ex Wall.; *Ajuga mollissima* Wall. ex Steud.; *Anisomeles albiflora* (Hassk.) Miq.; *Anisomeles disticha* (L.) B. Heyne ex Roth; *Anisomeles disticha* B. Heyne ex Roth; *Anisomeles glabrata* Benth. ex Wall., nom. inval.; *Anisomeles glabrata* Wall.;

New York Bot. Gard.* 8(5): 478. 1954, *Flore de Madagascar et des Comores* 189(2): 605–606. 1962, *Kirkia* 4: 45–74. 1964, *Bulletin du Jardin Botanique de l’État* 45: 421–445. 1975, *Compositae Newsletter* 20/21: 12–15. 1992, *Opera Botanica* 121: 159–172. 1993, *Botanical Journal of the Linnean Society* 117(1): 44. 1995, *Anales Jard. Bot. Madrid* 54(1): 383. 1996

(Leaves for naso-pharyngeal affections, dried powdered leaves sternutatory, a snuff for headache and colds.)

Anisopappus davyi S. Moore (*Anisopappus lejolyanus* Lisowski; *Anisopappus petitianus* Lisowski; *Anisopappus robynsonianus* Lisowski; *Anisopappus upembensis* Lisowski)

Zaire, Tanzania. Perennial herb, small woody rootstock

See *The Botany of Captain Beechey’s Voyage* 196. 1837 [1841] and *Journal of the Linnean Society, Botany* 47: 275. 1925, *NATO Science Series IV: Earth and Environmental Sciences* 68: 25–52. 2006

(This species can hyperaccumulate cobalt from soils rich in this element.)

Anisophyllea R. Br. ex Sabine Anisophylleaceae (Rhizophoraceae)

From the Greek *anisos* (*a* and *isos* ‘equal’) ‘unequal’ and *phyllon* ‘a leaf’, see *Trans. Hort. Soc. London* v. (1824) 446.

1824 and *Botanical Journal of the Linnean Society* 98(1): 1–25. 1988, *Annals of the Missouri Botanical Garden* 75(4): 1343–1368. 1988, *Molecular Phylogenetics and Evolution* 44: 1057–1067. 2007.

Anisophyllea apetala Scort. ex King

Perak.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 66: 323. 1897 [1898 publ. 1897] and *Bioorganic & Medicinal Chemistry* 11(7): 1593–1596. 2003

(Antifungal.)

in Indonesia: dalek bukit, dalek limau manis

Anisophyllea boehmii Engl. (*Anisophyllea ferruginea* Rolfe; *Anisophyllea rogersii* S. Moore)

Tanzania. Evergreen or semi-evergreen tree, large shrub, rounded heavy crown, thin leathery leaves, small plum-like fruit shiny red-yellow, edible pale yellow flesh, *Brachystegia* woodland on sandy or rocky soils, wooded grassland

See *Transactions of the Horticultural Society of London* 5: 446. 1824, *Die Pflanzenwelt Ost-Afrikas* C: 287. 1895 and *Bull. Inst. Roy. Col. Belg.* 21: 925. 1950

(Bark infusion given for malaria; against snakebites, bark mouthwash or enema. Ash from the wood used as an insecticide for stalk borers.)

in Tanzania: lusindwi, mnemvi, mnyemvi, mshindwi, umushindwi

in Zambia: mfuno, mufungo, nfuno

Anisophyllea disticha Baill. (*Anisophyllea disticha* (Jack) Baill.)

SE Asia, Philippines. Small tree or shrub, monoecious, *Selaginella*-like foliage, leaf blades of two different sizes and shapes, pinkish-white unisexual flowers, glossy fleshy crimson fruits, spindle-like seed

See *Adansonia* 11: 311. 1875

(Root decoction tonic, prepare fresh root decoction and drink, or eat roots raw, for weakness in men. Leaves astringent, eaten for diarrhea, dysentery, fever, jaundice; pounded young leaves applied to cuts and wounds. Fruits eaten raw for septic stings by bees or hornets.)

in English: leechwood, mousedeer plant

in Borneo: tumi ang

in Brunei: saped

in Malaysia: kayu pacat, kayu ribu-ribu, lambai ayam, lambey ayam, pokok kancil, raja berangkat, rambai ayam, ribu-ribu

Anisophyllea laurina R. Br. ex Sabine

Tropical Africa. Tree

See *Trans. Hort. Soc. London* v. (1824) 446. 1824

(Leaves wound dressing, anthelmintic, febrifuge.)

in English: monkey apple

in Sierra Leone: kandi

Anisophyllea obtusifolia Engl. & Brehmer

Tanzania. Tree, straight, spicate inflorescence, small flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 376. 1917

(The sawdust may cause allergic reactions to mucous membranes and skin. Roots to treat kidney complaints.)

in Tanzania: msaa-mti

Anisophyllea pomifera Engl. & Brehmer

Tanzania. Evergreen shrub or small tree, leathery leaves shiny above, small rounded flowers in several spikes, edible sweet flesh, ripe fruit edible, associate of *Brachystegia-Isobertinia* woodland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 372. 1917

(Bark used for warts. Ash from the wood used as an insecticide for stalk borers.)

in Tanzania: mnemvi, mnyemvi, mshindwi, nsindwi, umushindwi

Anneslea Wallich Theaceae

Named for George Annesley, 2nd Earl of Mountnorris, Viscount Valentia, b. Arley Castle, Staffs. 1769–1844, traveller, plant collector in India, in 1796 elected a Fellow of the Royal Society and of the Linnean Society, correspondent of Sir J.E. Smith, his writings include *Short Instructions for Collecting Shells*. [1815] and *Voyages and Travels to India, Ceylon, the Red Sea, Abyssinia, and Egypt*. 1802, 1803, 1804, 1805 and 1806. London 1809. See Frederick Robinson, R.N., *Refutation of Lieutenant Wellsted's attack upon Lord Valentia's ... work upon the Red Sea*. London 1842; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 17. London 1994; *Plantae Asiaticae Rariores* 1: 5, pl. 5. 1829 [1830].

Anneslea fragrans Wall. (*Anneslea alpina* H.L. Li; *Anneslea fragrans* var. *alpina* (H.L. Li) Kobuski; *Anneslea fragrans* var. *hainanensis* Kobuski; *Anneslea fragrans* var. *lanceolata* Hayata; *Anneslea fragrans* var. *rubriflora* (Hu & Hung T. Chang) L.K. Ling; *Anneslea hainanensis* (Kobuski) Hu; *Anneslea lanceolata* (Hayata) Kaneh.; *Anneslea rubriflora* Hu & Hung T. Chang; *Callosmia fragrans* (Wall.) C. Presl; *Mountnorrisia fragrans* (Wall.) Szyszyl.)

Cambodia, Myanmar. Shrub or treelet, leaves coriaceous, fragrant creamy white to pinkish-purple flowers, somewhat variable species

See *Pl. Asiat. Rar.* (Wallich). 1: 5, t. 5. 1829, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 103. 1844, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* ser. 5, 3: 533. 1845, *Botanische Bemerkungen* (C. Presl): 103. Ethnopharmacol.* 109(3): 417–427. 2007

(Flower cardiotoxic. Leaves and stem antiplasmodial, cerebral tonic, febrifuge, blood purifier, sedative, antimalarial and cytotoxic.)

in Cambodia: sophi

in China: cha li

in Thailand: salapee, sarapidok, sarapipa

Annona L. Annonaceae

According to some authors *annonna* or *anona* refers to a native Brazilian or American Indian (Taino) name; some suggest from the Latin *annonna*, *ae* (*annus*) ‘the year’s produce, yearly produce’; see *Species Plantarum* 1: 536–537. 1753, *Species Plantarum*, Editio Secunda 1: 613. 1762, *Histoire des plantes de la Guiane Française* 1: 611. 1775, *Genera Plantarum* 283. 1789, *Monographie de la Famille des Anonacées* 64. 1817, *Flora Brasiliae Meridionalis* (quarto ed.) 1: 33. 1824 and *Journal of the Washington Academy of Sciences* 1: 118. 1911, *Journal of the Washington Academy of Sciences* 3: 103. 1913, *Contributions from the United States National Herbarium* 16: 264. 1913, *Contributions from the United States National Herbarium* 18(1): 8–9, 11, 13–15. 1914, *Fieldiana, Bot.* 24(4): 270–294. 1946, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, *Ceiba* 44(2): 105–268. 2003 [2005].

Annona cherimola Mill. (*Annona pubescens* Salisb.; *Annona tripetala* Aiton)

Tropical highlands of Peru and Ecuador. Small tree, leaves ovate to ovate-lanceolate, flowers fragrant usually solitary, outer 3 petals oblong-linear pale yellow, inner 3 petals very small reddish to purplish, fruit a pseudocarp, carpels and the receptacle fused into a fleshy mass, black hard seeds, white pulp edible

See *Species Plantarum* 1: 536–537. 1753, *The Gardeners Dictionary*: ... eighth edition no. 5. 1768, *Hortus Kewensis*; or, a catalogue ... 2: 252. 1789, *Prodr. Stirp. Chap. Allerton* 380. 1796 and *Field Museum of Natural History, Botanical Series*

13(2/3): 700–766. 1938, *Am. J. Chin. Med.* 8(3): 268–270. 1980, *J. Nat. Prod.* 67(9): 1577–1579. 2004, *Phytochemistry*. 66(6): 693–696. 2005, *Phytochemistry* 66(19): 2376–2380. 2005, *J. Ethnopharmacol.* 108(3): 367–370. 2006

(Used for the treatment of gastrointestinal disorders. Crushed seeds used in an alcoholic antiparasitic shampoo are said to have caused corneal ulcers. Green fruit and seed antiprotozoal, vermifugal and insecticidal; seeds uterotonic.)

Common names: cherimola, cherimoya, cherimoyer, custard apple

in English: custard apple

in Latin America: cherimalla, cherimoya, chirimoya

in India: naru-kila

in Japan: cherimoya, chermoya

in Thailand: noina ostrelia

Annona cherimolioides Triana & Planch. (*Annona ambotay* Aubl.; *Annona ambotay* subsp. *occidentalis* R.E. Fr.; *Annona cherimolioides* var. *amplifolia* Triana & Planch.; *Annona cherimolioides* Triana & Planch.; *Annona cherimolioides* var. *amplifolia* Triana & Planch.; *Raimondia cherimolioides* (Triana & Planch.) R.E. Fr.; *Raimondia monoica* Saff.)

Colombia.

See *Histoire des plantes de la Guiane Française* 1: 616, t. 249. 1775, *Annales des Sciences Naturelles; Botanique*, série 4 17: 27. 1862 and *Contributions from the United States National Herbarium* 16(5): 218, pl. 52–53. 1913, *Acta Horti Bergiani* 10(1): 82. 1930, *Field Mus. Mus. Wien, Ser. B, Bot. Zool.* 103B: 513–524. 2001

(Bark bitter, aromatic, antiseptic, stimulant, pungent, a decoction to heal ulcers.)

in French Guiana: ambotay, corossol ambotay

Annona glabra L. (*Annona chrysocarpa* Leprieur ex Guillemet; *Annona glabra* Forssk.; *Annona humboldtiana* Kunth; *Annona humboldtii* Dunal; *Annona klainii* Pierre ex Engler & Diels; *Annona klainii* var. *moandensis* De Wild.; *Annona palustris* L.; *Annona palustris* Small; *Guanabanus palustris* M. Gómez)

Coastal regions of tropical and subtropical America and west tropical Africa, Florida. Tree, leaves glossy deciduous, white pinkish flowers, fruit an ovoid pseudocarp yellow to orange, pungent-aromatic fruit pulp edible or palatable, tolerance of salt and immersion in fresh water, both the fruit and the seed float, highly invasive woody weed forming dense monotypic stands

See *Species Plantarum* 1: 537. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754,

Species Plantarum, Editio Secunda 1: 757. 1762, *Flora Aegyptiaco-Arabica* 102. 1775, *Fl. Habanera* 114, f. 35. 1897 and *Fieldiana*, Bot. 24(4): 270–294. 1946, *Plant Resources of South-East Asia* (PROSEA). Ser.* 13(2/3): 700–766. 1938, *Taxon* 29: 358–360. 1980, *Fl. Pakistan* 167: 11. 1985, *Cytologia* 55: 187–196. 1990, *J. Nat. Prod.* 64(7): 925–931. 2001, *Etnoflora Yucatanense* 21: 1–63. 2004, *Nat. Prod. Res.* 20(3): 253–257. 2006, *J. Ethnobiol. Ethnomedicine*. 2: 45. 2006, *Journal of Ethnopharmacology* 111(3): 630–635. 2007

(Used in Sidha. Plants used for hypertension; roots, leaves and fruit to cure dysentery; poultice of fruits for ringworm. Extracts from *Annona muricata* active against *Leishmania* spp. and *Trypanosoma*. Antiparasitic, the seeds contain a yellow oil applied to the hair to kill lice, though it is irritant to the eyes. Acetogenins in *Annona muricata* leaves potent molluscicides. Leaves pounded in water and applied to treat itch, boils; crushed leaves of *Annona muricata* mixed with a red paste from the leaves of *Trigonopleura malayana* applied as a rubefacient to treat stomachache and diarrhea; leaves decoction drunk for easy delivery; leaves anthelmintic, taken with sugar to remove worms from intestine; crushed leaves applied as a poultice to the stomach to treat cholera. Bark infusion for dysentery, against intestinal worms and to stop

cough. Roots as fish poison. Veterinary medicine, seedpowder applied on wounds to remove worms in cattle.)

in English: boat durian, prickly custard apple, soursop, sweetsop

in Pacific: anonas, laguana, laguanaha

in Rodrigues Isl.: annone sapotille, corosol

in Yoruba: eko omode, eko oyinbo

in Central America: guanabana, kaiedi, kòwòsòl, sorasaka

in Cambodia: tiep banla, tiep barang

in India: fofi, jeuto, lakshmana phalamu, mam phal, mamaphal, mamphal, mulcita, mullancakka, mullanchukka, mullu citta, mullu raama phala, mullu raamana phala, mullu ramaphala, mulluccita, mulluccitta, mutcita, mutcitamaram, pulippala, vilattinuna

in Thailand: ma-thu-rian, rian-nam, thu-rian-khaek, thurian-thet, thurian-khaek, thurian-thet

in Vietnam: mang câu xiêm

Annona purpurea Moc. & Sessé ex Dunal (*Annona involucreta* Baill.; *Annona manirote* Kunth; *Annona prestoei* Hemsl.; *Annona purpurea* Sessé & Mocino ex Dunal)

Mexico and Central America. Tree, leaves deciduous, solitary fleshy strongly scented flowers, fruit a globose to ovoid pseudocarp, conical protuberances each tipped with a curved hook, pulp aromatic, numerous dark brown seeds, in coastal lowlands

See *Monographie de la famille des Anonacées* 64, t. 2. 1817, *Nova Genera et Species Plantarum* (quarto ed.) 5: 59. 1821, *Adansonia* 8: 265. 1868, *Hooker's Icones Plantarum* ser 4, 6: t. 2519–2520. 1888 and *Journal of Natural Products* 61(12): 1457–1461. 1998, *Journal of Ethnopharmacology* 88, Issues 2–3, October 2003, 119–124. 2003, *Curr. Med. Chem.* 12(22): 2625–2641. 2005

(Antihemorrhagic, against snake venom, myotoxin. The juice a remedy for fever, chills and jaundice; bark decoction effective against dysentery and edema; seed extracts destroy fleas. Antiplatelet aggregation constituents from *Annona purpurea*.)

Common names: anona sincuya, cabeza de ilama, cabeza de muerto, cabeza de negro, castiguire, chincua, chincuya, gallina gorda, guanabano pun, guanabano toreta, guanabano torete, ilama, ilama de Tehuantepec, manire, manirote, matacuy, matimba, sencuya, soncolla, suncuyo, tiragua, tucuria

Annona reticulata L. (*Annona reticulata* Sieber ex A. DC.; *Annona reticulata* Vell.)

West Indies. Tree or shrub, erect, greenish-white flowers, fruit a globose pseudocarp usually reticulated, flesh cream-white with numerous black seeds, sweet edible fruits

See *Species Plantarum* 1: 537. 1753, *Fl. Flumin.* 239. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 5: t. 130. 1831. [1827 publ. 29 Oct 1831], *Mém. Soc. Phys. Genève* v. (1832) 200. 1832

(Used in Ayurveda and Sidha. Hard seeds very toxic, but can be swallowed whole with no ill effects; all non-fruit parts quite toxic. Seeds, leaves and young fruits insecticidal; seeds powder applied to *os uteri*, irritant and abortifacient; astringent seeds used against dysentery and diarrhea, and also to kill head lice. Leaves used against worms and abscesses, as a poultice on boils for early maturation; leaves infusion drunk for diarrhea. Unripe fruits and the bark used against diarrhea and dysentery. Infusion of peel of the fruit to treat stomach disorders. Bark applied to sprains and strains.)

Health Sci.* 6(1): 31–35. 2006 [The in-vitro antibacterial activity of *Annona senegalensis*, *Securidaca longipedunculata* and *Steganotaenia araliacea*—Ugandan medicinal plants.], *J. Ethnopharmacol.* 112(1): 85–89. 2007 [In vivo trypanocidal activity of *Annona senegalensis* Pers. leaf extract against *Trypanosoma brucei* brucei.], *Phytomedicine.* 14(2–3): 192–195. 2007 [In vitro antidrepanocytary activity (anti-sickle cell anemia) of some congolese plants.]

(Sap of the trunk said to be irritant. Bark and roots crushed together and applied to snakebite wounds; bark chewed and smeared on fresh wounds. Pulverised dried leaves and roots applied to Guinea worm sores, the Guinea worm is a threadworm or filarial worm. Root barks used for the treatment of diarrhea, dysentery and wound infections. Root preparations of *Annona senegalensis* claimed by traditional medicine practitioners to be effective in the treatment of sleeping sickness. Antidrepanocytary, anthelmintic and antibacterial; activity of the roots of *Annona senegalensis* on the chloroquino-resistant strain of *Plasmodium falciparum*.)

(Used in Ayurveda, Unani and Sidha. Used for hypertension, jaundice and diabetes, and for women’s pains associated with menstruation. Powdered seed irritant, applied as a pesticide and anti-head lice, can cause conjunctivitis or even blindness, if applied to uterus it causes abortion; a tincture of the seeds causes dermatitis of the face and eyelids. Seeds antithyroidal, antimicrobial and cytotoxic, used for abortion; powdered seeds and leaves insecticidal; seeds, unripe fruits and leaves against insects, fungi and bacteria. Roots for dysentery and antisnake venom; root or seed paste applied on the forehead for headache; roots and leaves for diarrhea and abscesses. Leaf juice of *Annona squamosa* and leaf paste of *Datura metel* for snakebite; leaves to control wound maggots; warmed or boiled leaves applied on boils and rubbed on the body for body pain. Fruits and leaves antioxidant; fruit epicarp ash mixed with mustard oil made into a paste applied on hair to check excessive hair loss. Leaves as fish poison. Veterinary medicine, antiseptic, leaf juice or paste used in the treatment of animal wounds, ascariasis, mouth ulcers, to kill maggots and for louse infection; for ephemeral fever, leaves of *Anisomeles indica* with those of *Annona squamosa* and *Azadirachta indica* burnt close to the animal. Magico-religious beliefs, people do not allow pregnant woman to take fruit for fear of abortion.)

(Toxic, lethal. Obnoxious odor. Roots a bitter tonic, often a substitute for ipecac; root bark decoction used for placental problems. Watery milky juice antiseptic, used for bone fracture, rheumatism. Leaves eaten by pregnant women for abortion.)

in English: Andamanese bow string plant

in India: anantapur, atukudu theega, kaka-kodi, kavali, kavli, kiti, lamtani, maniballi, manibilu, pharako, sarakkodi, theikelki, theikelkisuak, visakhapatnam, warangal

in Hawaii: kanik paras, kaniki parasi

in Pacific: moh

in Tahiti: liane parachute

Anoectochilus Blume Orchidaceae

Greek *anoiktos* 'open' and *cheilos* 'a lip, margin', referring to the appearance of the labellum; see *Bijdragen tot de flora van Nederlandsch Indië* 8: 411–412. 1825.

Anoectochilus elatus Lindl.

India. Terrestrial, purple to reddish flowers

See *Journal of the Linnean Society, Botany* 1: 178. 1857

(Plant water extract used in case of chest and abdominal pains.)

Anoectochilus formosanus Hayata

Taiwan.

See *Icon. Pl. Formosan.* 4: 101, pl. 53. 1914, *American Journal of Chinese Medicine* 28(1): 87–96. 2000, *PTR. Phytotherapy Research* 17(1): 30–33. 2003, *Phytomedicine* 11(6): 509–15. 2004, *Journal of Biomedical Science* 11: 928–939. 2004, *Clinical and Experimental Pharmacology and Physiology* 31: 620–625. 2004, *International Journal of Applied Science and Engineering* 3(3): 175–178. 2005, *Phytomedicine* 12(6–7): 453–460. 2005, *Phytomedicine* 13(5): 366–370. 2006, *Phytotherapy Research* 21(1): 58–61. 2006

(Whole plant, fresh or dried, boiled in water and taken orally in the treatment of chest and abdominal pains, digestive diseases, tumors, snakebites, diabetes, nephritis, fever, kidney troubles, hypertension, cardiovascular diseases, impotence, liver and spleen disorder and pleurodynia. Antioxidant, cancer-prevention, hepatoprotective, in vivo antitumoral and immunostimulating/immunomodulating activity. A nutraceutical herbal tea.)

in English: golden line lotus, king medicine

Anoectochilus koshunensis Hayata (*Odontochilus koshunensis* (Hayata) S.S. Ying)

Taiwan, Koshun.

See *Icon. Pl. Formosan.* 4: 104, f. 54. 1914, *Col. Ill. Orch. Taiwan* 1: 64. 1996

(Hypertension, diabetes, nephritis, snakebites, antitumor or tumor-prevention activities.)

Anoectochilus setaceus Blume (*Anoectochilus aureus* K. Koch & Lauche; *Anoectochilus frederici-augusti* Rchb.f.; *Anoectochilus latomaculatus* Blume; *Anoectochilus lobbianus* Planch.; *Anoectochilus regalis* Blume; *Anoectochilus regalis* H. Low ex C. Morren; *Anoectochilus roxburghii* (Wall.) Lindl. ex Wall.; *Anoectochilus roxburghii* var. *regalis* (Blume) Pradhan; *Anoectochilus setaceopictus* K. Koch & Lauche; *Anoectochilus setaceus* Lindl., nom. illeg.; *Anoectochilus setaceus* (Blume) Lindl.; *Anoectochilus xanthophyllus* Planch.; *Anoectochilus yungianus* S.Y. Hu; *Chrysobaphus roxburghii* Wall.; *Orchis picta* Reinw. ex Lindl., nom. inval.; *Zeuxine roxburghii* (Wall.) M. Hiroe)

Vietnam. Terrestrial herb, lip white, flowers pinkish-brown, sepals and petals brownish pink, in deep wet places, deep shade

See *Bijdragen tot de flora van Nederlandsch Indië* 411. 1825, *Edwards's Bot. Reg.* 23: t. 2010. 1837, *J. Proc. Linn. Soc.*,

Bot. 1: 179. 1857 and *Quart. J. Taiwan Mus.* 24: 257. 1971, *Journal of Ethnopharmacology* 114(2): 141–145. 2007

(Antihyperglycemic. Used to treat tracheitis, liver diseases, nervous breakdown.)

in Sri Lanka: vanaraja, wana-rajaja, wanarajaja

in Vietnam: lan kim tuyen

Anogeissus (DC.) Wall. ex Guill., Perr. & A. Rich. Combretaceae

Greek *ano* 'upward' and *geisson* 'tile', referring to the fruiting heads, to the compressed two-winged nuts, see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 16. 1828, *Numer. List* [Wallich] n. 4014. 1831, *Florae Senegambiae Tentamen* 1(7): 279–280. 1832 and *Kew Bulletin* 33(4): 555–566. 1979, *Journal of Economic and Taxonomic Botany* 17: 655–656. 1993.

Anogeissus acuminata (Roxb. ex DC.) Guill., Perr. & A. Rich. (*Anogeissus acuminata* Wall., nom. inval.; *Anogeissus acuminata* (Roxb. ex DC.) Wall. ex Guillem. & Perr.; *Anogeissus acuminata* var. *lanceolata* Wall. ex C.B. Clarke; *Anogeissus harmandii* Pierre; *Anogeissus lanceolata* (Wall. ex C.B. Clarke) Wall. ex Prain; *Anogeissus pendula* Edgew.; *Anogeissus pierrei* Gagnep.; *Anogeissus tonkinensis* Gagnep.; *Conocarpus acuminatus* Roxb. ex DC.)

Cambodia, India, Laos. Canopy trees, long straight trunk without buttresses, dark grey bark, subopposite or alternate leaves usually planar, young leaves silvery with long silky hairs

See *Species Plantarum* 1: 176–177. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 17. 1828, *Numer. List* [Wallich] n. 4014. 1831, *Florae Senegambiae Tentamen* 1(7): 280. 1832, *Journ. Anopyxis Pierre ex Engl. Rhizophoraceae

From the Greek *ano* 'upward' and *pyxis* 'a small box', referring to an erect capsule, see *Hist. Veg. Afr.* 49. t. 14. 1807 and *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] II. (1900) 49. 1900, *Ann. Mus. Congo Belge, Bot.* sér. 5, 2[3]: 262. 1908 [1907–1908 publ. Jul 1908].

Anopyxis ealaensis (De Wild.) Sprague (*Pynaertia ealaensis* De Wild.)

Tropical Africa.

See *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 5(2): 262, t. 84. 1908 [1907–1908 publ. Jul 1908] [*Ann. Mus. Congo Belge, Bot. sér. 5*], *Bulletin of Miscellaneous Information Kew* 1909: 311. 1909

(Leaves analgesic, febrifuge, applied to sores and skin infections.)

Anopyxis klaineana (Pierre) Engler (*Macarisia klaineana* Pierre)

Tropical Africa.

See *Bulletin Mensuel de la Société Linnéenne de Paris*. Paris, sér. 2, i. 75. 1898–1899 and *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] II. (1900) 49. 1900

(Antiseptic, analgesic.)

in Cameroon: boma, noudougou

in Congo: pamiel

in Central Africa: moboma, paliel

in Gabon: evam

in Ivory Coast: bodioa

in Nigeria: arugbo, otutu (Yoruba); ekiawa (Edo); ake (Ijaw)

Anplectrum A. Gray Melastomataceae

Greek *a* ‘negative’ and *plektron* ‘a spur, cock’s spur’, see *Flora* xiv. 502. 1831, *U.S. Explor. Exped. Bot. Phan.* (C. Wilkes Expl. Exped.) [15]1: 597. 1854.

Anplectrum divaricatum Triana

S Asia.

See *Trans. Linn. Soc. London* 28(1): 84. 1871–1872

(Leaves decoction as a postpartum remedy.)

Malay names: kenduduk halus, lidah kopok, lidah kushing

Anplectrum glaucum Triana

SE Asia.

See *Trans. Linn. Soc. London* 28(1): 84. 1871–1872

(Leaves febrifuge; for malaria, pound the leaves and poultice.)

Malay names: danai bukit, kayu metah, sendukok akar

Anredera Juss. Basellaceae

Possibly from a personal name or derived from the Spanish word *enredadera* ‘creeping plant, climbing plant’, see *Genera Plantarum* 84. 1789.

Anredera cordifolia (Tenore) Steenis (*Boussingaultia cordata* Sprengel; *Boussingaultia cordifolia* Tenore; *Boussingaultia gracilis* Miers; *Boussingaultia gracilis* f. *pseudobaselloides* Hauman; *Boussingaultia gracilis* fo. *typica* Hauman; *Boussingaultia gracilis* var. *pseudobaselloides* (Hauman) L.H. Bailey)

South America. Climbing, vine, twining, liana, succulent, fleshy rhizomes, thick wart-like aerial tubers, fleshy leaves, white scented flowers, leaves cooked used as a spinach, invasive, fast growing pest

See *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 454. 1791, *Nova Genera et Species Plantarum* (quarto ed.) 7: 194. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 3 19: 355. 1853, *Journal of Botany, British and Foreign* 2: 161, pl. 18. 1864, *Bull. Roy. Soc. Toscanaortic.* 207. 1895 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 33: 355–356. 1925, *Manual of Cultivated Plants* 368. 1949, *Fl. Malesiana, Ser. I, Spermatoph.* 5(3): 303. 1957, Lu Dequan. *Basellaceae*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 26: 43–47. 1996, *Fl. Ecuador* 55: 57–83. 1996, *Journal of Ethnopharmacology* 96(3): 515–519. 2005, *New Zealand Plant Protection* 58: 169–173. 2005

(Bulbils, leaves and roots antiinflammatory, antiviral, antibacterial, anti-ulcer and hepatoprotective.)

in English: bridal wreath, cascade creeper, Gulf Madeira vine, heartleaf Madeira vine, lamb’s tail, Madeira vine, mignonette vine

in Hawaii: ‘uala hupe

in French: patate d’Amérique

in China: luo kui shu

Anredera vesicaria (Lam.) C.F. Gaertn. (*Anredera leptostachys* (Moq.) Steenis; *Anredera scandens* (L.) Moq.; *Anredera scandens* (L.) Sm.; *Anredera spicata* J.F. Gmel.; *Basella vesicaria* Lam.; *Boussingaultia leptostachys* Moq.; *Polygonum scandens* L.)

Central America. A small or large vine, many-branched, climbing over shrubs, flowers whitish somewhat fragrant, racemes very dense

See *Species Plantarum* 1: 272, 359–365. 1753, *Encyclopédie Méthodique, Botanique* 1(2): 382. 1785, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 454. 1791, *Supplementum Carpologiae* 176. 1807, *The Cyclopaedia*; or, universal dictionary of arts, ... 39: *Anredera* n. 1. 1818[1819], *Nova Genera et Species Plantarum* (quarto ed.) 7: 194. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 229–230. 1849 and *Leaflets of botanical observation and criticism* 1(2): 23. 1904, *Bulletin de l’Académie Internationale de Géographie, Botanique* 23: 22. 1913, *Fl. Jamaica* 3: 174 (1914, *Fieldiana, Bot.* 24(4): 214–217. 1946, *Flora Malesiana: Series I: Spermatophyta* 5: 302. 1957, *Sida* 3(2): 118. 1967, *Folia Geobotanica et Phytotaxonomica* 6(2): 176. 1971, *Annals of the Missouri Botanical Garden* 66(2):

109–115. 1979, *Economic Botany* 53(2): 144–160. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 395–396. 2001

(Antiinflammatory, astringent, for the treatment of diarrhea, bone fractures and large wounds; tuberous roots used as a poultice applied to boils; an infusion of the succulent leaves used for shampooing the hair.)

in English: climbing false buckwheat, cuban ivy, hedge smartweed, Texas Madeira vine

in El Salvador: suelda con suelda

in China: duan xu luo kui shu

Ansellia Lindley Orchidaceae

In honor of the British (b. Hertford) botanical collector John Ansell, d. 1847 (d. London), gardener, traveller, from 1841 to 1842 with the German botanist Theodor Vogel (1812–1841) on Capt. Allen's Niger Expedition; see William Allen (1793–1864) and Thomas Richard Heywood Thomson, *A narrative of the expedition ... to the River Niger, in 1841*. London 1848; Joseph Vallot (1854–1925), “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882; Ronald William John Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962; Ludolf Christian Treviranus (1779–1864), in *Linnaea*. 16: 533–560. 1842; J.F. Schön & Samuel Crowther, *Journals of the Expedition up the Niger in 1841*. London 1848; John Lindley, in *Edwards's Botanical Register*. 30: sub t. 12. 1844; Beatrice Khayota, “The genus *Ansellia* Lindley.” *The Kew Magazine* 10(1): 27–35. February 1993; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 5. Utrecht 1971.

Ansellia africana Lindl. (*Ansellia africana* var. *australis* Summerh.; *Ansellia africana* var. *nilotica* Baker; *Ansellia confusa* N.E. Br.; *Ansellia congoensis* Rodigas; *Ansellia gigantea* Rchb.f. var. *gigantea*; *Ansellia gigantea* var. *nilotica* (Baker) Summerh.; *Ansellia humilis* Bull.; *Ansellia nilotica* (Baker) N.E. Br.)

Trop. & S. Africa. Succulent, rarely terrestrial or lithophytic, pseudobulb epiphyte, stem yellowish, very sweetly scented flowers, inflorescence much-branched, perianth green-yellow outside

See *Edwards's Botanical Register* 30: sub t. 12. 1844, *Lindenia* 2: 36. 1886 and *Journal of Ethnopharmacology* 14: 159–172. 1985, *Bulletin of the Hiroshima Botanical Garden* 11: 1–121. 1989

(Pseudobulb aphrodisiac, febrifuges, for diarrhea; stem with leaves for nausea, ear treatment; stem, leaf, root for pulmonary troubles. Magico-religious beliefs, ritual, superstitions, love charm by young males going courting (cane and roots, if you want to attract the one you love, you must chew them at midnight, then spit them out while saying the name of your love), antidote for bad dreams and to ward off lightning.)

in English: Ansell's orchid, leopard orchid, sugar cane of the monkey

in Nigeria: muruchin doka

in South Africa: imfe nkauw, imfeyenkawu, luiperdorgidee

in Tanzania: ibwe le teta, kiandama

Antennaria Gaertn. Asteraceae

Latin *antenna* ‘a feeler, sailyard’, referring to the pappus; see Joseph Gaertner, *De fructibus et seminibus plantarum* 2(3): 410, t. 167, fig. 3. 1791 and *Syst. Bot.* 7: 300–313. 1982, *Syst. Bot.* 9: 74–83. 1984, *Syst. Bot.* 12: 305–319. 1987, *Biol. Zentralbl.* 106: 683–698. 1987, *Canad. J. Bot.* 68: 1389–1397. 1990, *Arctic Alpine Res.* 25: 150–159. 1993, *Canad. J. Bot.* 71: 1589–1604. 1993, *Amer. J. Bot.* 83: 516–527. 1996.

Antennaria anaphaloides Rydb. (*Antennaria anaphaloides* var. *straminea* B. Boivin; *Antennaria pulcherrima* (Hook.) Greene subsp. *anaphaloides* (Rydb.) W.A. Weber; *Antennaria pulcherrima* var. *anaphaloides* (Rydb.) G.W. Douglas)

North America. Herb, perennial

See *Pittonia* 3(16D): 176. 1897 and *Memoirs of the New York Botanical Garden* 1: 409–410. 1900, *Le Naturaliste Canadien* 80(3–4): 120. 1953, *Le Naturaliste Canadien* 94(4): 521. 1967, *The Southwestern Naturalist* 18(3): 317–318. 1973, *Canadian Journal of Botany* 64(11): 2726. 1986

(For dermatological problems.)

in English: pearly pussytoes, tall pussytoes

Antennaria dioica (L.) Gaertn. (*Antennaria dioica* (L.) Gaertn. var. *hyperborea* (D. Don) Greene; *Antennaria hyperborea* D. Don; *Antennaria insularis* Greene; *Antennaria montana* Gray; *Antennaria parviflora* Nutt.; *Gnaphalium dioicum* L.)

North America, Northern and Central Europe. Perennial herb, rosette of basal spoon-shaped leaves, clusters of white pink flower heads

See *Species Plantarum* 2: 850–857. 1753, *De fructibus et seminibus plantarum* 2(3): 410. 1791, *A Natural Arrangement of British Plants* 2: 458. 1821, *English Botany* Suppl.: pl. 2640. 1831, *Transactions of the American Philosophical Society*, new series, 7: 406. 1841, *Pittonia* 3(18B): 176. 1898 and *Botaničeskij Žurnal* (Moscow & Leningrad) 60(6): 864–872. 1975, *Botaničeskij Žurnal* (Moscow & Leningrad) 62(2): 229–234. 1977, *Taxon* 26: 257–274. 1977, *Taxon* 29: 538–542. 1980, *Taxon* 30: 857–860. 1981, *Turun Yliopiston Julkaisuja*: Sarja A II, *Biologia-Geographica* 3: 1–12. 1982, *Botaničeskij Žurnal* (Moscow & Leningrad) 67(2): 206–210. 1982, *Systematic Botany* 9: 74–83. 1984, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 1619–1622. 1990, *Candollea* 45: 439–446. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad)

76: 473–476. 1991, *Berichte des Geobotanischen Institutes der Eidgenössische Technische Hochschule Stiftung Rübel* 58: 192–211. 1992, *International Organization of Plant Biosystematists Newsletter* 18/19: 6–8. 1992, *Botaničeskij Žurnal* (Moscow & Leningrad) 79(2): 135–139. 1994

(Antitussive, astringent, cholagogue, diuretic, eye medicine and emollient, used in the treatment of chest complaints, tonsillitis, bronchitis, hepatitis, dysentery, diarrhea, liver, gall bladder complaints, bilious conditions, stimulates the flow of gastric juices and pancreatic secretions.)

in English: catsfoot, cudweed, littleleaf pussytoes, mountain everlasting, small-leaf pussytoes, stoloniferous pussytoes

Antennaria howellii Greene (*Antennaria neglecta* subsp. *howellii* (Greene) Hultén; *Antennaria neglecta* var. *howellii* (Greene) Cronquist; *Antennaria neodioica* subsp. *howellii* (Greene) R.J. Bayer)

North America. Perennial herb

See *Pittonia* 3(16C): 173–174. 1897 and *Leaflets of Western Botany* 6(2): 43. 1950, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 211. 1965, *Arkiv för Botanik, Andra Serien* 7(1): 136. 1967[1968], *Systematic Botany* 9(1): 81. 1984, *Rhodora* 97: 1–8. 1995

(Analgesic.)

in English: Howell's pussytoes

in English: field pussytoes

Antennaria parvifolia Nutt. (*Antennaria aprica* Greene; *Antennaria aprica* var. *aureola* (Lunell) J.W. Moore; *Antennaria aprica* var. *minuscula* (B. Boivin) B. Boivin; *Antennaria aureola* (Lunell) Chmiel.; *Antennaria aureola* Lunell; *Antennaria dioica* var. *parvifolia* (Nutt.) Torr. & A. Gray; *Antennaria holmii* Greene; *Antennaria latisquamata* Greene, nom. illeg.; *Antennaria minuscula* B. Boivin; *Antennaria neglecta* var. *argillicola* (Stebbins) Cronquist; *Antennaria neodioica* var. *argillicola* (Stebbins) Fernald; *Antennaria recurva* Greene; *Antennaria rhodantha* Suksd.; *Antennaria virginica* Stebbins; *Antennaria virginica* var. *argillicola* Stebbins)

North America.

See *Transactions of the American Philosophical Society*, new series, 7: 406. 1841, *A Flora of North America*: containing ... 2(3): 431. 1843, *Pittonia* 3(18B): 282–283. 1898, *Pittonia* 3(18C): 290. 1898, *Pittonia* 4(21B): 81–82. 1899 and *Bulletin of the Torrey Botanical Club* 28(1): 41–42. 1901, *Leaflets of botanical observation and criticism* 1(11): 145. 1905, *Leaflets of botanical observation and criticism* 1(14): 200. 1906, *Allegmeine Botanische Zeitschrift für Systematik, Floristik, Pflanzegeographie* 12(1): 6–7. 1906, *American Midland Naturalist* 2: 288. 1912, *Rhodora* 37(439): 230–237, f. 1–2. 1935, *Rhodora* 52(615): 59. 1950, *Le Naturaliste Canadien* 80(3–4): 122–123. 1953, *Phytologia* 23: 61. 1972, *Plant Systematics and Evolution* 169(3–4): 127. 1990, *Intermountain Fl.* 5: 374. 1994

(Antirheumatic, antiinflammatory, blood purifier, for swellings. Ceremonial, witchcraft medicine, cold infusion of root taken for protection from witches.)

in English: littleleaf pussytoes, small-leaf pussytoes

Antennaria plantaginifolia (L.) Hook. (*Antennaria caroliniana* Rydb. ex Small; *Antennaria caroliniana* Rydb.; *Antennaria decipiens* Greene; *Antennaria denikeana* B. Boivin; *Antennaria nemoralis* Greene; *Antennaria petiolata* Fernald; *Antennaria pinetorum* Greene; *Antennaria plantaginifolia* Hook.; *Antennaria plantaginifolia* (L.) Richardson; *Antennaria plantaginifolia* var. *petiolata* (Fernald) A. Heller; *Antennaria plantaginifolia* var. *petiolata* A. Heller; *Gnaphalium plantaginifolium* L.)

North America. Perennial, herbaceous, mat-forming, silvery-white flower heads tinged with pink

See *Species Plantarum* 2: 850–857. 1753, *Flora Boreali-Americana* 2: 128. 1803, *Flora Boreali-Americana* 1(Suppl.): 330. 1834, *Pittonia* 3(18B): 278–279. 1898, *Proceedings of the Boston Society of Natural History* 28(8): 242. 1898, *Pittonia* 4(20E): 41. 1899 and *Muhlenbergia*; a journal of botany 1(1): 5. 1900, *Leaflets of botanical observation and criticism* 2(7): 147–148. 1911, *Manual of the Southeastern Flora* 1401. 1933, *Le Naturaliste Canadien* 80(3–4): 121–122. 1953

(Pectoral, expectorant, hemostatic, astringent, for gastrointestinal and gynecological complaints, dysentery, toothache, cough, colds, fevers, inflammations, rattlesnakebites, after childbirth.)

in English: Indian tobacco, lesser cat's foot, love's test, plantain-leaved cut-weed, plantain-leaved everlasting, plantain-leaf pussytoes, pussytoes, white plantain, woman's tobacco

Antennaria rosea Greene (*Antennaria acuminata* Greene; *Antennaria alborosea* A.E. Porsild ex Porsild; *Antennaria bracteosa* Rydb.; *Antennaria chlorantha* Greene; *Antennaria dioica* (L.) Nelson; *Antennaria rosea* var. *nitida* (Greene) Breitung; *Antennaria solstitialis* Lunell; *Antennaria speciosa* Greene)

North America. Perennial herb, polyploid complex

See *Bulletin of the Torrey Botanical Club* 24(6): 303. 1897, *Pittonia* 3(18B): 281–283. 1898 and *Memoirs of the New York Botanical Garden* 1: 413. 1900, *Proceedings of the Biological Society of Washington* 20(7): 39. 1907, *New Manual of Botany of the Central Rocky Mountains* 535. 1909, *American Midland Naturalist* 5(3): 61. 1917, *American Midland Naturalist* 58(1): 59. 1957, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *Canadian Journal of Genetics and Cytology* 26: 133–136. 1984, *Systematic Botany* 9: 74–83. 1984, *Canadian Journal of Genetics and Cytology* 28: 468–475. 1986, *Systematic Botany* 12: 305–319. 1987, *Rhodora* 90: 133–137. 1988, *Brittonia* 41(1): 53–60. 1989, *Rhodora* 92: 264–276. 1990, *Sida* 22(1): 561–563. 2006

(Demulcent. Leaves chewed and swallowed to increase male virility. Ceremonial medicine used to drive away bad spirits.)

in English: littleleaf pussytoes, rosy pussytoes

Antennaria rosea Greene subsp. *rosea* (*Antennaria acuminata* Greene; *Antennaria alborosea* A.E. Porsild ex Porsild; *Antennaria chlorantha* Greene; *Antennaria dioica* (L.) Gaertn. var. *rosea* (Greene) D.C. Eaton; *Antennaria formosa* Greene; *Antennaria hendersonii* Piper; *Antennaria imbricata* E.E. Nelson; *Antennaria lanulosa* Greene; *Antennaria neodioica* Greene var. *chlorantha* (Greene) B. Boivin; *Antennaria oxyphylla* Greene; *Antennaria rosea* subsp. *divaricata* E.E. Nelson; *Antennaria rosea* var. *imbricata* (E.E. Nelson) E.E. Nelson; *Antennaria speciosa* Greene)

North America. Perennial herb, polyploid complex

See *Bulletin of the Torrey Botanical Club* 24(6): 303. 1897, *Pittonia* 3(18B): 281–283. 1898 and *Memoirs of the New York Botanical Garden* 1: 413. 1900, *Proceedings of the Biological Society of Washington* 20(7): 39. 1907, *New Manual of Botany of the Central Rocky Mountains* 535. 1909, *American Midland Naturalist* 5(3): 61. 1917, *American Midland Naturalist* 58(1): 59. 1957, *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *Canadian Journal of Genetics and Cytology* 26: 133–136. 1984, *Systematic Botany* 9: 74–83. 1984, *Canadian Journal of Genetics and Cytology* 28: 468–475. 1986, *Systematic Botany* 12: 305–319. 1987, *Rhodora* 90: 133–137. 1988, *Brittonia* 41(1): 53–60. 1989, *Rhodora* 92: 264–276. 1990, *Sida* 22(1): 561–563. 2006

(Demulcent. Leaves chewed and swallowed to increase male virility. Ceremonial medicine used to drive away bad spirits.)

in English: littleleaf pussytoes, rosy pussytoes

Antennaria rosulata Rydb. (*Antennaria bakeri* Greene; *Antennaria sierrae-blancae* Rydb.)

North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 24(6): 300–301. 1897 and *Bulletin of the Torrey Botanical Club* 32(3): 127. 1905, *Systematic Botany* 12: 305–319. 1987, *Systematic Botany* 13: 525–537. 1988, *Rhodora* 90: 133–137. 1988, Moerman, D.E. *Native American Ethnobotany*. 76. 1998

(For cold, cough. Compound decoction taken for birth injury. Magico-religious beliefs, ritual, ceremonial, good luck in hunting, cold infusion of root taken for protection from witches.)

in English: kaibab pussytoes, littleleaf pussytoes

Anthacanthus Nees Acanthaceae

From the Greek *anthos* ‘a flower’ and *acanthus*, *akantha* ‘a thorn, spine’.

Anthacanthus spinosus (Jacq.) Nees (*Anthacanthus spinosus* Nees; *Justicia spinosa* Jacq.; *Oplonia spinosa* Raf.; *Oplonia spinosa* (Jacq.) Raf.)

North America, West Indies. Perennial shrub

See *Flora Telluriana* 4: 64. 1838 [1836], *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 460. 1847 and Oakes A.J. and Butcher J.O. *Poisonous and Injurious Plants of the U.S. Virgin Islands*. Misc. Publ. 882. Washington, DC: US Department of Agriculture. 1962

(This spiny species can cause mechanical injury.)

in English: catch and keep, pricklybush

Anthemis L. Asteraceae

Greek *antheon* (*anthos*) ‘a flower, chamomile’, *anthesis* is an ancient Greek name for flower (Josephus Flavius), chamomile (different species of) (Nicander, 74.37, ed. A.S.F. Gow-A.F. Scholfield, Cambridge 1953), *Argemone* (Dioscorides), *Anthyllis* (Dioscorides), marjoram (Dioscorides); see Carl Linnaeus, *Species Plantarum*. 2: 893–896. 1753 and *Genera Plantarum*. Ed. 5. 381. 1754, *Florae Siculae Synopsis* 2: 866. 1844[1845]. Compositae-Asteraceae phytodermatitis, potentially allergenic sesquiterpene lactones, photodermatitis, sensitivity, strong irritant.

Anthemis arvensis L. (*Anthemis agrestis* Wallr.; *Anthemis arvensis* var. *agrestis* (Wallr.) DC.; *Chamaemelum arvense* (L.) All.; *Chamaemelum arvense* (L.) Hoffmanns. & Link; *Chamaemelum arvense* Rchb.f. ex Willk.; *Chamaemelum arvense* (L.) Schreb.)

Europe. Herb, very variable, aromatic, much-branched from the base, white rays and a yellow disk

See *Species Plantarum* 2: 893–896. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Spic. Fl. Lips.* 18. 1771, *Fl. Pedem.* 1: 186. 1785, *Schedulae Criticae* 484. 1822, *Fl. Portug.* [Hoffmannsegg] 2: 347. 1828 [1825–28?], *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 6. 1837 [1838], *Bot. Zeitung* (Berlin) 22: 251. 1864 and *Fragmenta Floristica et Geobotanica* 21: 277–288. 1975, *Phytologia* 35: 323. 1977, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 26: 1–42. 1978, *Botaniska Notiser* 131: 391–404. 1978, *Taxon* 29: 722–723. 1980, *Taxon* 30: 695–696. 1981, *Candollea* 36: 19–76. 1981, *Taxon* 31: 764. 1982, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Izvestiia Akademii Nauk Belorusskoi SSR: Seriya Biologicheskikh Nauk* 2: 7–12. 1983, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Sida* 17(3): 627–629. 1997, *J. Ethnopharmacol.* 97(2): 305–311. 2005

(Febrifuge, vermifuge, resolvent, anti-*Candida albicans*, antimicrobial. Vesicular dermatitis.)

in English: corn chamomile, field-chamomile, wild chamomile

in Japan: kizome-kami-tsure

Anthemis cotula L. (*Anthemis cotula* Blanco; *Anthemis foetida* Lam.; *Chamaemelum cotula* All.; *Chamaemelum cotula* (L.) All.; *Maruta cotula* DC.; *Maruta cotula* (L.) DC.; *Maruta foetida* Cass.; *Maruta foetida* Gray)

Europe, North America. Annual herb, noxious weed

See *Species Plantarum* 2: 893–896. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *Flore Française* (Lamarck) 2: 164. 1779 [1778 publ. after 21 Mar 1779], *Fl. Pedem.* 1: 186. 1785, *A Natural Arrangement of British Plants* 2: 456. 1821, *Dictionnaire des Sciences Naturelles* ed. 2. [F. Cuvier] 29: 174. 1823, *Fl. Filip.* [F.M. Blanco] 638. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 13. 1838 [1837 publ. early Jan 1838] and *Israel J. Bot.* 19: 145. 1970, *Watsonia* 11: 211–223. 1977, *Informatore Botanico Italiano* 10: 267–277. 1978, *Taxon* 28: 271–273. 1979, *Taxon* 29: 714–715. 1980, *Candollea* 36: 19–76. 1981, *Madroño* 29: 62. 274. 1982, *Taxon* 31: 764. 1982, *Acta Societatis Botanicorum Poloniae* 52: 205–214. 1983, *Le Naturaliste Canadien* 111: 447–449. 1984, *Hessische Floristische Briefe* 34: 37–42. 1985, *Arch. Dermatol.* 123(4): 500–502. 1987, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Bocconeia, Monographiae Herbarii Mediterranei Panormitani* 9: 1–328. 1998, *Opera Botanica* 137: 1–42. 1999, *Fitoterapia*. 71(6): 710–712. 2000 [Antimicrobial activity of flowers from *Anthemis cotula*.], *Org. Biomol. Chem.* 1(9): 1503–1508. 2003, *Indian J. Biochem. Biophys.* 42(6): 395–397. 2005, *J. Nat. Prod.* 68(3): 432–434. 2005, *J. Nat. Prod.* 69(4): 662–664. 2006, *J. Chromatogr. A*. 1104(1–2): 313–322. 2006

(Plant considered poisonous; some people allergic to the plant, painful blisters. Antibacterial, antimicrobial, emetic

and antiemetic, antidiarrheal, anticonvulsive, sedative, analgesic, antispasmodic, antirheumatic, diaphoretic, febrifuge, sudorific, tonic, used for rheumatism, blisters, epilepsy, asthma, colds and fever. Insecticide, dried powdered flowers and leaves effective against fleas and flies.)

in English: common dogfennel, dog chamomile, dog fennel, fetid chamomile, mayweed, mayweed chamomile, poison daisy, stinking chamomile, stinking mayweed, stinkweed

in South Africa: stinkkamille

Anthemis montana L. (*Anthemis montana* W.D.J. Koch; *Anthemis montana* Ledeb.; *Anthemis montana* Sibth. & Sm.; *Anthemis pyrethrum* Gouan)

Europe.

See *Sp. Pl.*, ed. 2. 2: 1261. 1763, *Syn. Fl. Germ. Helv.*, ed. 2. 415. 1843, *Fl. Ross.* (Ledeb.) 2(2,6): 523. 1845, *Index Seminum* [Florence]. 1877: [2]. [1877] and *Giorn. Bot. Ital.* 113(5–6): 364. 1979 (publ. 1980)

(Used in Sidha.)

in India: akkara, akkarakaram, akkarakarum, akkaram, akkimakaram, akkirakaram, akra, tosattiraviyam, vannikaram, vannikkaracceti

Anthemis pallescens Heldr. ex Nyman (*Anthemis pallescens* (Boiss.) Heldr. ex Nyman)

Europe.

See *Consp. Fl. Eur.* 2: 359. 1879

(Peppery roots chewed to promote salivation.)

Anthemis tinctoria L. (*Cota tinctoria* (L.) J. Gay ex Guss.)

Europe.

See *Species Plantarum* 2: 896. 1753, *Florae Siculae Synopsis* 2: 867. 1844[1845] and *Pl. Syst. Evol.* 123: 35–54. 1974, *Taxon* 29: 709–710. 1980, *Candollea* 36: 19–76. 1981, *Taxon* 30: 829–842. 1981, *Taxon* 31: 763–764. 1982, *Turun Yliopiston Julkaisuja, Sar. A 2, Biol.-Geogr.* 3: 1–12. 1982, *Bot. Zhurn. SSSR* 68(5): 660–664. 1983, *Zapov. Belorussii Issl.* 10: 24–28. 1986, *Prace Bot. Univ. Wroclawsk.* 49: 1–83. 1992, *Bot. Žurn.* (Moscow & Leningrad) 77(10): 88–90. 1992, *Bocconeia* 9: 1–328. 1998, *Opera Bot.* 137: 1–42. 1999

(Anticonvulsive, sedative, analgesic, antispasmodic, antirheumatic, diaphoretic, febrifuge, sudorific.)

in English: dyers' chamomile, golden marguerite, yellow-chamomile

Antherotoma (Naudin) Hook.f. Melastomataceae

From the Greek *anthera* 'anther' and *tome, tomos, temno* 'division, section, to slice', the anthers open by a terminal pore, see *Genera Plantarum* 1: 729, 745. 1867.

Antherotoma naudinii Hook. f. (*Osbeckia antherotoma* Naudin)

Tropical Africa.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 14: 56. 1850, *Genera Plantarum* 1: 745. 1867

(For cerebral malaria, a cold infusion from a dry powdered mixture of aerial parts of the plant with aerial parts of *Indigofera asparagoides* Taub. (*Microcharis asparagoides* (Taub.) Schrire), *Dissotis brazzae* Cogn., *Cassia gracilior* (Ghesq.) Steyaert (*Chamaecrista gracilior* (Ghesq.) Lock), *Rhynchosia minima* (L.) DC., *Justicia matammensis* (Schweinf.) Oliv. (*Justicia anselliana* (Nees) T. Anderson) and *Pentas zanzibarica* (Klotzsch) Vatke)

in Tanzania: igiri

Antherotoma senegambiensis (Guill. & Perr.) Jacq.-Fél. (*Dissotis irvingiana* Hook.; *Dissotis kassneriana* Kraenzl.; *Dissotis senegambiensis* (Guill. & Perr.) Triana, non sensu Jacq.-Fél.; *Dissotis senegambiensis* (Guill. & Perr.) Triana var. *senegambiensis*; *Osbeckia abyssinica* Gilg; *Osbeckia cogniauxiana* De Wild.; *Osbeckia crepiniana* Cogn.; *Osbeckia saxicola* Gilg; *Osbeckia senegambiensis* Guill. & Perr.)

Tropical Africa.

See *Bulletin du Muséum National d'Histoire Naturelle*, séries 4, Section B, *Adansonia*. Botanique Phytochimie Sér. 4, 16(4): 270. 1994 [1995]

(Leaves pain killers, for wounds; roots laxative, for stomach troubles.)

in Ghana: ayuma

in Nigeria: akpe-ji, azaga, irun- awere

in Rwanda: munyuwihene, munyuwintama, ubwunyubwintama, umunyu w' intama

in Senegal: dibo ñamo, dunzi, fondo faru

Anthocercis Labill. Solanaceae

Greek *anthos* 'a flower' and *kerkis, kerkidos* 'a measuring rod, shuttle', referring to the corolla lobes; see J.J. Houtton de Labillardière, *Novae Hollandiae plantarum specimen.* 2: 19, t. 158. 1806, *Nomenclator Botanicus.* 1: 54. 1821.

Anthocercis littorea Labill. (*Anthocercis littorea* Endl.)

Australia.

See *Novae Hollandiae plantarum specimen.* 2: 19, t. 158. 1806, *Iconogr. Gen. Pl.* 6: t. 68. 1839

(Toxic, reported symptoms like those from belladonna after chewing the leaves.)

Anthocleista Afzel. ex R. Br. Loganiaceae (Gentianaceae)

Greek *anthos* 'flower' and *kleistos*, *klistos* 'closed, shut up', referring to the corolla or to the shape of the flowers, see James Hingston Tuckey (1776–1816), *Narrative of an expedition to explore the river Zaire, usually called the Congo, in South Africa in 1816*, under the direction of Captain J.K. Tuckey, R.N. [Captain Tuckey's second Christian name is wrongly printed Kingston throughout the work.] London 1818, *Nova Genera et Species Plantarum* ... 2: 133. 1827.

Anthocleista amplexicaulis Baker (*Anthocleista longifolia* (Lam.) Boiteau; *Anthocleista madagascariensis* Baker)

Madagascar. Tree, flowers purple, calyx dark green, inflorescence terminal, aye-ayes forage

See *Journal of Botany, British and Foreign* 20: 173. 1882, *Journal of the Linnean Society, Botany* 22: 506. 1886 and *Adansonia: recueil périodique d'observations botanique*, n.s. 13: 250. 1973, *Fitoterapia* 65: 38–43. 1994, *Folia Primatology* 62: 125–135. 1994

(A decoction of the aerial parts or stem bark taken to treat malaria, constipation.)

in Madagascar: dendemy, dindremy, lendemo, lendemy, lenedemo

Anthocleista djalonensis A. Chev. (*Anthocleista kerstingii* Gilg ex Volkens)

Ghana. Tree, white or creamy flowers, fleshy green fruits

See *Mémoires de la Société Botanique de France* 2(8): 47. 1908, *Nigerian Journal of Natural Products and Medicine* 7: 58–60. 2003, *Journal of Ethnopharmacology* 92(1): 135–144. 2004, *Journal of Ethnobiology and Ethnomedicine* 1: 7–15. 2005, *Journal of Ethnopharmacology* 104(1–2): 164–167. 2006

(Leaf extract or decoction antispasmodic, smooth muscle relaxant, taken to treat jaundice, diarrhea and dysentery. Whole root preparations used in the treatment of sexually transmitted diseases. Root decoction abortifacient, wound healing, antidote, antibacterial, diuretic, for abdominal pain, hernia of the groin, fungal skin infections, filarial worm infections and to regulate menstruation; root infusion taken to treat intestinal problems; a root maceration taken alone or with honey to treat malaria. Bark antimicrobial, strong purgative, antidiabetic, diuretic, used for the treatment of venereal diseases; stem bark and roots for malaria, jaundice, diabetes.)

in English: cabbage tree

in Guinea: bintié, demba, farkali dafita, forêta débé, foreta lafira, khobodi guensa, kogan, kongan, tagare

in Mali: feretadibi, kogan

in Nigeria: kwari, sapa

Anthocleista grandiflora Gilg (*Anthocleista insignis* Galpin; *Anthocleista keniensis* Summerhayes; *Anthocleista orientalis* Gilg; *Anthocleista pulcherrima* Gilg; *Anthocleista scheffleri* Gilg ex Scheffler; *Anthocleista zambesiaca* Baker)

East Africa. Tall tree, brownish bark, erect terminal bunches of creamy white trumpet-shaped flowers, green fleshy fruit usually beaked or pointed at the apex, along the rivers in forest areas, along swamp edges

See *Bulletin of Miscellaneous Information Kew* 1926: 244. 1926, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 582–583. 1893, *Die Pflanzenwelt Ost-Afrikas* C: 312. 1895, *Kew Bulletin* 1895: 150. 1895, *Bulletin of Miscellaneous Information Kew* 1895: 99. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 375. 1901, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3: 143–144. 1901, *Flore de Madagascar et des Comores* 167: 1–107. 1984, *Journal of East African Natural History* 95(2): 235–240. 2006

(Bark decoctions antidiarrheal, antimicrobial, used to treat malaria, epilepsy, preparations of the bark used as an anthelmintic, for roundworm, and to treat diabetes, high blood pressure and venereal diseases. Veterinary medicine, leaves decoction for wounds.)

in English: big-leaf tree, cabbage tree, fever tree, forest fever tree

in Congo: kafundankuba, kishilabakuyi, muhanura kuba, mukubakuba

in East Africa: mutete (Meru), mutunguru (Kikuyu), sagalitet (Kipsigis)

in Malawi: nguwonguwo

in Mozambique: cucua, muzama, nprua

in South Africa: boskoorsboom (= forest fever tree), grootlaarboom (= big-leaf tree), garuro, muGopogopo, muyama, muZama, muZana

in S. Rhodesia: muZana, muZama, muYama

in Tanzania: mpumwe (Kisambaa language), mngua

Anthocleista liebrechtsiana De Wild. & T. Durand (*Anthocleista baertsiana* De Wild. & T. Durand; *Anthocleista gossweileri* Exell)

Ghana, Central African Republic, Zambia and Namibia. Shrub or small tree, slender, unarmed, open spreading crown, corollas creamy white, inflorescences terminal branched

See *Bulletin de la Société Botanique de Belgique* 38(2): 96. 1899 and *Ethnobotanical Leaflets* 12: 851–65. 2008

(Leaves and bark purgative, hair growth stimulant, antimicrobial, for skin infection. Root decoction taken to treat stomachache in women, ovarian problems, venereal diseases, hepatitis, hernia, bronchitis, fever, to induce labor and as a

purgative. Sap of young leaves, root powder and bark pulp used to treat sores, abscesses, as a hemostatic. Sap applied topically to treat otitis or ophthalmia.)

in English: lesser forest fever tree

in Central African Republic: gugkba

in Nigeria: kwari, shapo

Anthocleista nobilis G. Don (*Anthocleista nobilis* Baker)

West Africa. Tree, young branches armed with short stout spines, calyx green, corolla light green to white, young fruit grey-green

See *Narrative of an Expedition to Explore the River Zaire* App. 5: 449. 1818, *A General History of the Dichlamydeous Plants* 4: 68. 1838, *Hooker's Icones Plantarum* 8: t. 793, 794. 1848 and *Flora of Tropical Africa* 4(1): 538. Mar 1903

(Cases of accidental poisonings have been reported. Stem and leaves for diabetes and inflammation. Bark antimicrobial, purgative, antidiabetic, used for the treatment of venereal diseases.)

in English: cabbage palm, cabbage tree

African names: awudifoakete, bontodi, hororoho

Anthocleista vogelii Planch. (*Anthocleista auriculata* De Wild.; *Anthocleista bequaertii* De Wild.; *Anthocleista buchneri* Gilg; *Anthocleista kalbreyeri* Baker; *Anthocleista lanceolata* Gilg; *Anthocleista macrantha* Gilg; *Anthocleista talbotii* Wernham; *Anthocleista zenkeri* Gilg)

Tropical Africa, Cameroon. Tree, spiny, white sweet-scented flowers, inflorescence terminal

See *Hooker's Icones Plantarum* 8: t. 793, 794. 1848, *Journal of the Linnean Society, Botany* 22: 99. 1895 and *British Museum, Natural History. Catalogue of the plants collected by Mr. & Mrs. P. A. Talbot in the Oban district South Nigeria* ... 68. 1913, *Phytotherapy Research* 4(1): 20–24. 1990

(Stem bark and leaves hypoglycemic, antiinflammatory, antimicrobial, abortifacient, febrifuge, laxative, diuretic, antidote, antidiabetic, wound dressing, for venereal diseases. Bark and seeds antidote for snakebite, purgative.)

in English: cabbage tree

in Cameroon: ayinebe, ayinda, bopolo polo, mbebame

in Congo: bolabola, mundundudi, nvuku

in Gabon: ayinebe, ayinibé

in Nigeria: apa-oro, kwari, ojua, oriweni, sapo

in Sierra Leone: dembayiri, gbegebe, samakombe, tabakombe

in Yoruba: apa oro, ogugu, sapo

Anthodiscus G. Mey. Caryocaraceae

From the Greek *anthos* 'flower' and *diskos* 'a disc', see *Primitiae Florae Essequiboensis* ... 193–194. 1818 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 697–703. 1956, *Fl. Neotrop.* 12: 1–77. 1973, *Opera Bot.* 92: 179–183. 1987.

Anthodiscus amazonicus Gleason & A.C. Sm.

South America.

See *Brittonia* 2: 156. 1936

(A strong decoction of the leaves snuffed into the nostrils to treat lung troubles.)

Anthodiscus peruanus Baill. (*Anthodiscus glaucescens* J.F. Macbr.; *Anthodiscus gutierrezii* L.O. Williams)

South America, Peru. Tree

See *Adansonia* 10: 241. 1872 and *Candollea* v. 385. 1934, *Fieldiana, Botany* 31(2): 22. 1964

(Bark infusion very astringent, used in treating diarrhea. Crushed leaves mixed with mud as a fish poison.)

Anthodiscus pilosus Ducke

South America. Tree

See *Tropical Woods* 90: 23. 1947

(Bark infusion taken to treat blood in the stool.)

Anthonotha P. Beauv. Fabaceae (Caesalpinaceae, Detarieae, Leguminosae)

From the Greek *anthos* 'flower' and *nothos* 'mongrel, spurious, not genuine', Latin *nothus, a, um*; see *Histoire des plantes de la Guiane Française* 1: 25. 1775, *Genera Plantarum* 1: 30. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 93. 1791, *Flore d'Oware* 1: 70. 1806 and *Mém. Acad. Roy. Belg., Sciences*, 30: 1–314. 1957, *Systematics and Geography of Plants* 78: 137–144. 2008. Close to *Isomacrolobium*.

Anthonotha crassifolia (Baill.) J. Léonard (*Anthonotha acuminata* (De Wild.) Léonard; *Anthonotha crassifolia* Baill.; *Macrolobium crassifolium* (Baill.) J. Léonard; *Macrolobium crassifolium* A. Chev.; *Macrolobium heudelotianum* sensu Aubrev.; *Macrolobium heudelotianum* (Baill.) Aubrév.; *Macrolobium heudelotii* Planch. ex Benth.; *Vouapa crassifolia* Baill.)

West Africa, Mali, Nigeria. Perennial non-climbing tree or shrub, trunk cylindrical, compact crown many-branched, leaves compound, yellow whitish flowers, panicles of short many-flowered racemes, thick wrinkled tomentose pods, in forest and savanna

See *An Introduction to the Natural System of Botany* 148. 1836, *Trans. Linn. Soc. London* 25(2): 308. 1865, *Adansonia* 6: 179. 1866 and *Explor. Bot. Afrique Occ. Franc.* i. 228.

1920, *Fl. For. Cote d'Ivoire* i. 230. 1936, *Bull. Jard. Bot. État Bruxelles* 24: 61. 1954, *Plantae Bequaertianae* 3(2): 224. 1925, Aubreville, Andre (1897–1982), *Flore forestière soudano-guinéenne* 241. Paris, 1950, *Bulletin du Jardin Botanique de l'État* 25: 202. 1955

(The decoction of the leaves, together with those of *Bridelia ferruginea* and *Ximenia americana*, used against fever. Fruits, leaves and roots analgesic. Rituals, red dye.)

in Ivory Coast: foromo

Anthonotha macrophylla P. Beauv. (*Macrolobium macrophyllum* (P. Beauv.) J.F. Macbr.; *Macrolobium macrophyllum* var. *heudelotianum* Baker f.; *Macrolobium palisoti* Benth.; *Macrolobium palisoti* var. *heudelotiana* A. Chev.; *Vouapa macrophylla* (P. Beauv.) Baill.; *Vouapa macrophylla* var. *heudelotiana* Baill.)

Tropical Africa.

See *Flore d'Oware* 1: 70, pl. 42. 1806, *Adansonia* 6: 178. 1865, *Transactions of the Linnean Society of London* 25: 308. 1866 and *Contributions from the Gray Herbarium of Harvard University* 59: 21. 1919

(Leaves and fruits for venereal diseases, embrocation for swellings and pains.)

Anthopterus Hook. Ericaceae

From the Greek *anthos* 'flower' and *pteron* 'wing', see *Exposition des Familles Naturelles* 1(2): 362. 1805, *Icones Plantarum* 3: ad t. 243. 1839 and *Opera Bot.* 92: 109–130. 1987, *Brittonia* 48(4): 605–610. 1996 [1997].

Anthopterus wardii Ball (*Anthopterus bracteatus* A.C. Sm.)

Colombia.

See *Hooker's Icones Plantarum* 15(3): 51–52, t. 1465. 1884 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 42(4): 274. 1909, *Contributions from the United States National Herbarium* 28(2): 409, t. 11. 1932, *J. Agric. Food Chem.* 59(7): 3020–3026. 2011

(Antioxidant.)

Anthospermum L. Rubiaceae

From the Greek *anthos* 'flower' and *sperma* 'a seed', the male flowers may produce seeds.

Anthospermum herbaceum L.f. (*Anthospermum ferrugineum* Eckl. & Zeyh.; *Anthospermum hedyotideum* Sond.; *Anthospermum lanceolatum* Thunb.; *Anthospermum lanceolatum* var. *hedyotideum* (Sond.) Kuntze; *Anthospermum lanceolatum* var. *latifolium* Sond.; *Anthospermum latifolium* E. Mey. ex Sond.; *Anthospermum mildbraedii* K. Krause; *Anthospermum muriculatum* Hochst. ex A. Rich.;

Anthospermum nodosum E. Mey. ex Sond.; *Kohautia lasiocarpa* Klotzsch)

East Africa, South Africa. Trailing herb, prostrate, climbing, straggling, woody-based, flowers yellowish green, mixed with salt for cattle

See *Suppl. Pl.*: 440. 1782 [1781 publ. Apr 1782], *Prodromus Plantarum Capensium*, ... 32. 1794, *Enumeratio Plantarum Africae Australis Extratropicae* 366–367. 1837, *Fl. Cap.* 3: 30. 1865 and *Wiss. Erg. Deut. Zentr.-Afr. Exped., Bot.* 2: 341. 1911

(Young twigs are boiled with twigs of *Kotschya africana*, *Dissotis debilis*, *Syzygium cordatum* and *Crotalaria microcarpa*, the decoction is drunk to prevent malaria.)

Anthostema A. Juss. Euphorbiaceae

From the Greek *anthos* 'flower' and *stema* 'stamen, penis', referring to the male flowers reduced to a jointed stamen, or from *stemma* 'crown, garland, wreath', referring to the clustered flowers, see *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis* 18 illustratum 56, 117. 1824 and *Annals of the Missouri Botanical Garden* 83(4): 530–533. 1996, *Phytomedicine* 6(3): 187–195. 1999, *Pharmaceutical Biology* 43(1): 72–78. 2005.

Anthostema aubryanum Baillon

Tropical Africa. Tree

See *Adansonia* 5: 366. 1865

(Stem bark anthelmintic, antibacterial and antifungal; bark maceration drunk to treat intestinal parasites, kidney problems, edema, impotence, hysteria and mental illness. Latex toxic, acrid, vesicant, strong purgative, emetic, an antidote for poison, can cause blindness, used to treat leprosy, menstrual problems. Whole plant as fish poison.)

in Nigeria: uhruareze (Edo); odogbo (Yoruba)

in Gabon: asohin, assongho, assongo, gowe, moudzandji, ochongo, oshongo, ossongho, ossongo

in Cameroon: asona, essane, osongo

in Ivory Coast: meuli, sesse

in Spanish Guinea: asonna, assongha, assonha, assoua, assoun

Anthostema senegalense A. Juss.

Senegal, Benin. Shrub or small tree, sticky latex, straight

See *Euphorb. Gen.*: 117. 1824

(Stem bark anthelmintic, antileishmanial, antibacterial and antifungal. Latex toxic, acrid, vesicant, strong purgative, emetic, an antidote for poison, can cause blindness, used to treat leprosy, menstrual problems. Bark maceration drunk to treat intestinal parasites, kidney problems, edema, impotence, hysteria and mental illness. Whole plant as fish poison.)

Anthoxanthum L. Poaceae (Gramineae)

From the Greek *anthos* ‘flower’ and *xanthos* ‘yellow’, the mature spikelets are yellowish, very unstable classification, the genus is in great need of revision, sometimes including *Hierochloe* R. Br., type *Anthoxanthum odoratum* L., see *Species Plantarum* 1: 28. 1753, *Genera Plantarum*. Ed. 5. 17. 1754, *Enumeratio Methodica Plantarum* 206. 1759, *Baiersche Flora* 1: 100, 337. 1789, *Flora Peruviana, et Chilensis Prodrum* 125. 1794, *Systema Vegetabilium Florae Peruviana, et Chilensis* 1: 251. 1798 [authors: José Antonio Pavón (1754–1840) and Hipolito Ruiz Lopez (1754–1815)], *Novae Hollandiae Plantarum Specimen* 2: 82–83, f. 232. 1807, *Prodrum Florae Novae Hollandiae* 208. 1810, *Essai d’une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *American monthly magazine and critical review* 1: 442. 1817, *Chloris Melvilliana* 35. 1823, *Révision des Graminées* 1: 22. 1829, *Sylva Telluriana* 100. 1838, *Annales de la Société Botanique de Lyon* 7: 119. 1880, *Annales de la Société Botanique de Lyon* 8: 189. 1881, *Botanical Magazine* 11: 443. 1897, *Flora Capensis* 7: 466. 1899 and *Die Naturwissenschaften; Wochenschrift für die Fortschritte der Reinen ...* 10: 220. (Moscow & Leningrad)* 76: 1331–1332. 1991, *Fitologija* 39: 72–77. 1991, *Flora Mediterranea* 1: 157–173, 229–237. 1991, *Candollea* 48(2): 582–591. 1993, *Regnum Veg.* 127: 19. 1993, *Flora Mesoamericana* 6: 236. 1994, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Harvard Papers in Botany* 1(9): 11–90. 1996, *Bot. Zhurn. (Moscow & Leningrad)* 81(4): 119–121. 1996, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Phyton. Annales Rei Botanicae* 38(2): 307–321. 1998, *Opera Botanica* 137: 1–42. 1999, *Contributions from the United States National Herbarium* 48: 111–115. 2003.

Anthoxanthum odoratum L. (*Anthoxanthum odoratum* subsp. *odoratum*; *Anthoxanthum odoratum* var. *altissimum* Eaton; *Anthoxanthum pilosum* Döll; *Anthoxanthum villosum* Dumort.; *Hierochloe odorata* (L.) P. Beauv.; *Xanthonanthes odoratum* (L.) St.-Lag.)

Europe, temperate Asia, Northwest Africa. Perennial bunch-grass, fragrant, bitter tasting, simple, erect or ascending or spreading, glabrous, slender or robust, roots quite shallow, dense panicle spike-like green or purple and erect, sweetly or strongly scented when the green blades are dried, yields essential aromatic oil, fodder grass, forage, weed and aggressive species but is not considered a major weed pest, similar to *Anthoxanthum ecklonii* (Nees) Stapf

See *Species Plantarum* 1: 28. 1753, *Essai d’une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Manual of the Flora of the northern States and Canada* 10. 1817, *Observations sur les Graminées de la Flore Belgique* 129, t. 10, f. 38. 1823, *Rheinische Flora* 122. 1843, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* ed. 3 11: 17. 1873, *Annales de la Société Botanique de Lyon* 7: 119. 1880 and *Handb. Fl. Ceylon* 6: 336. 1931, *Grasses of Ceylon* 54. 1956, *Grasses of Burma ...* 431. 1960, *Turun yliopiston julkaisu - Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1–12. 1982 [also *Ann. Univ. Fenn. Abo., A* 3: 1–12. 1982], *Botanica Helvetica* 96: 145–158. 1986, *Regnum Veg.* 127: 19. 1993, *Clinical & Experimental Allergy* 35(4): 441–447. Apr 2005, *Allergy* 60(5): 619–625, May 2005, *Oikos* 110(2): 360–368. Aug 2005

(Provocative of hay asthma, it produces a lot of pollen and is a major irritant to people who suffer from hay fever; in Europe inhalation of grass pollen is the predominant cause of hay fever and related hypersensitivity reactions. An expectorant when made up into gargles and sprays, used also as hair tonic and scalp cleanser. Ceremonial, ritual.)

in English: large sweet vernal grass, scented vernal grass, spring grass, sweet scented vernal grass, sweet vernal, sweet vernal grass, vanilla grass

in French: flouve odorante

in Spanish: grama de olor

in Colombia: pasto de olor

in Mexico: zacate primavera

(Irritant. Ingestion can cause painful irritation of the mouth and throat, blistering, dysphagia (difficulty in swallowing), hoarseness. Ingestion usually does not occur because chewing quickly causes painful irritation of the mouth and throat. Flamingo lily contains calcium oxalate raphide crystals, which cause painful swelling in the mouth and throat upon ingestion. These crystals readily penetrate mucous membranes, leading to irritation; crystals are not poisonous. Crushed leaves rubbed on caterpillar sores.)

in English: anthurium, flamingo lily, oilcloth flower, painter's palette

in Japan: ô-beni-uchiwa (= large red fan)

Anthurium crassinervium (Jacq.) Schott (*Anthurium crassinervium* Schott; *Anthurium crassinervium* hort. ex Engl.; *Anthurium egregium* Schott; *Anthurium ellipticum* K. Costa Rica, Guatemala. Glossy dark red, yellow flower spike with a red spathe with white spots, curling spadix, extremely variable species

See *Oesterreichisches Botanisches Wochenblatt* 7(7): 53–54. 1857

(For wounds, cuts.)

in English: flame plant, flamingo flower, pigtail plant, Rothschildianum flamingo flower

Anthurium uleanum Engl. var. ***uleanum*** (*Anthurium tenuispadix* Engl.; *Anthurium tessmannii* K. Krause)

Colombia, Bolivia, Brazil.

See *Pflanzenr.*, IV, 23B: 73. 1905, *Notizbl. Bot. Gart. Berlin-Dahlem* 9: 260. 1925

(Used as a contraceptive, the spadix is dried, pulverized and placed in food given to women. Crushed leaves as a gargle for the treatment of sore or swollen throat.)

Antiaris Lesch. Moraceae

From the Javanese names *antschar* or *antjar* or *anjar*, commonly applied to *Antiaris toxicaria* Lesch.; see in *Annales du Muséum National d'Histoire Naturelle*. 16: 478, t. 22. Paris 1811[1810] and J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique centrale*. CTA, Ede/Wageningen 1989.

Antiaris toxicaria Lesch. (*Antiaris africana* Engl.; *Antiaris dubia* Span. ex Hook.; *Antiaris innoxia* Blume; *Antiaris macrophylla* R.Br.; *Antiaris saccidora* Dalz.; *Antiaris toxicaria* (Pers.) Lesch.; *Antiaris welwitschii* Engl.; *Antiaris zeylanica* Seem.)

Old World tropics. Monoecious tree, inner bark exuding a creamy copious latex, hairy branchlets, coriaceous leaves, inflorescence axillary or below the leaves subtended by involucre bracts, male inflorescence a stalked discoid head with many flowers, female inflorescence with 1–2 flowers, sessile or stalked flower pear-shaped, fruit fleshy receptacle velvety, leaves used as fodder, the fruit contains latex but is reported to be edible, many birds attracted by the fruits, in primary forest, in rain forest areas, in grassland savanna, in swamp forest, on coastal areas, semi-arid conditions

See Alire Delile (Raffeneau-Delile) (1778–1850), *Dissertation sur les effets d'un poison de Java, appelé Upas tieuté, et sur la Noix vomique, la Fève de St. Ignace, le Strychnos potatorum, et la Pomme de Vontac*, qui sont du même genre de plantes que l'*Upas tieuté*. Syst.* 33(1): 118–119. 1902, René J. Cornet, *Maniema: le pays des mangeurs d'hommes*. Bruxelles 1952, *Heterocycles* 31(7): 1315–1324. 1990, Chang Siushih, Wu Chengyih & Cao Ziyu. *Moroideae*. In: Chang Siushih & Wu Chengyih, eds., *Fl. Reipubl. Popularis Sin.* 23(1): 1–219. 1998

(Used in Ayurveda and Sidha. The latex contains varying amounts of cardiac glycosides and can be very poisonous, reported to be a mild circulatory and cardiac stimulant when used in very small amounts, but in large amounts it is a myocardial poison. Latex applied to cuts, wounds and skin complaints, eczema and leprosy, and is taken internally as a purgative. Soft wood macerated and the fluid used as a poultice for swellings; bark anodyne and vermifuge, used to treat hepatitis. Seeds, leaves and bark febrifuge, seeds astringent and antidysenteric. A sacred tree among some Southeast Asian peoples. *Upas* or *upus antiar* is a very powerful poison, for dart, blowpipe darts and arrows; latex reported to be used as fish poison and birdlime. Leaves or fruits of *Piper vestitum* rubbed as an antidote for *ipoh* poisoning, or the fruit of *Scorodocarpus borneensis*, or the juice of *Citrus acida*.)

in English: antiaris, bark cloth tree, false iroko, sacking tree, upas tree

Northeast U.S. & Adjacent Canada*, ed. 2: 864. 1991, Flora of North America Editorial Committee. *Flora of North America North of Mexico*. Oxford University Press, New York, Oxford. 2002

(The plant contains several steroidal alkaloids, including zygacine, which can poison livestock and humans. White camas has caused poisoning in sheep and may have been involved in poisoning cattle. Ingesting the bulbs can also

cause poisoning. This plant is considered to be about seven times less toxic than death camas, *Zigadenus venenosus*.)

in English: death camas, mountain deathcamas, white camas

Antidesma L. Phyllanthaceae (Euphorbiaceae, Stilaginaceae)

Greek *anti* ‘for, in place of, against’ and *desma*, *desmos* ‘band, bond, a head-band, a hatband’ but for some authors also ‘poison’; according to Johannes [Jan] Burman (1707–1779) the plant was supposed to protect and to be useful against snakebites. Modern authors say that the name of the genus could mean that the bark of some species can be used for cordage; see Carl Linnaeus, *Species Plantarum*. 2: 1027. 1753, *Genera Plantarum*. Ed. 5. 451. 1754, *Loudon’s Hortus Britannicus*. A catalogue ... 534. 1830, *A Numerical List of Dried Specimens* 7289. 1832 and *Kew Bull.* 54(4): 877–885. 1999.

(Used in Sidha. Poisonous. Leaves and roots used for traumatic injury; leaves for ulcers, indigestion.)

in English: Chinese laurel, salamander-tree

in China: wu yue cha

in India: aamatee, aanepoo, amati, anepu, bhummy-sadpay, bol-aborak, bol aborak, bor-heloch, bor heloch, cerutali, cherutali, cheruthali, dieng soh silli, himalcheri, jaanupolaari, janu polari, janupullari, kareekomme, kari komme, karivetti, mail-kombi, naayi kote, naayikomme, naayikoote, naikuti, nayikute, neralaitali, noelitali, nolaiali, nolaidali, nolaitali, nolaittali, noyilatali, nulitali, nulittali

Malayan names: barune, beras beras hitam, berunai, buni, guna, hadju wune, lundoh, lundu, mata punai, wuler

in Moluccas: kata kuti, kuti kata

in Philippines: bignai, bignay, bogday, bugnai, bugday, bugne, bugne oongal

in Sulawesi: bunch

in Sumatra, Java and Sulawesi: boni, bunch, buni, huni, huni berak, huni gede barunei, woni, wuni

in Panama: bignay

Antidesma ghaesembilla Gaertner

Tropical and subtrop. Asia to N. Australia. Treelet or shrub, stem bark brown, membranous leaves, very small pale yellow flowers turning dull pink, tomentose spikes in panicles of five, globose black sweetish-sour fruit eaten, leaves edible

See *De Fructibus et Seminibus Plantarum...* 1: 89, 189, t. 39. 1788 and *Proceedings of the Indian Science Congress Association* (III, C) 67: 48–49. 1980

(Leaves as poultice used for headache, skin complaints, abdominal swellings; leaf decoction for cough. Stem used to stimulate the menstrual flow. Fruit purgative.)

in English: black currant tree

in China: fang ye wu yue cha

in India: amrul, ata, ceriyakottam, ceriyannatam, cheriyakottam, dzanapalasharu, jaana palasharu, jamrudi, jomdri, kat-tupulinchi, lona, miyoto, muthbar, nallaballi, niyat, noniari, nuniari, plaari, polaree, polari, pollai, pulimpurase, pullampurasi, pullari, pulsar, pulusari, tsjeriamcottam

in Malaya: gucek, gunchak, gunchak puteh, guncek, gunchian, gunchin, kunchor puteh, kunchow

in Thailand: kha-mao-pha, maeng-mao, mak-kao, mak-mao, mao-kai-pla, mao-thung

Antidesma laciniatum Müll.Arg. (*Antidesma laciniatum* var. *genuinum* Pax & K. Hoffm., nom. inval.)

Tropical Africa. Shrub, white flowers, red stamens

See *Flora* 47: 519–520, 529. 1864 and *Pflanzenr.*, IV, 147, XV: 145. 1922

(Roots and leaves as fish poison.)

Antidesma membranaceum Müll.Arg. (*Antidesma meiocarpum* J. Léonard; *Antidesma membranaceum* var. *molle* Müll. Arg.; *Antidesma membranaceum* var. *tenuifolium* Müll.Arg.; *Antidesma venosum* E. Mey. ex Tul. subsp. *membranaceum* (Müll.Arg.) Lye; *Antidesma vogelianum* Müll.Arg.)

Tropical Africa.

See *Ann. Sci. Nat., Bot.*, III, 15: 232. 1851, *Flora* 47: 529. 1864, *Linnaea* 34: 68. 1865, *Prodr.* (DC.) 15(2): 261. 1866 and *Bull. Jard. Bot. État* 17: 260. 1945, *Lidia* 4(3): 91. 1998

(Leaves for fevers, stomachache, for the treatment of threatened abortion.)

Antidesma menasu (Tul.) Müll.Arg. (*Antidesma menasu* Kurz; *Antidesma menasu* Miq. ex Tul.; *Antidesma pubescens* Roxb. var. *menasu* Tul.)

India. Tree or shrub, scandent, straggling, liana, flowers in dense spikes, ripe fruits eaten raw

See *Annales des Sciences Naturelles; Botanique*, sér. 3, 15: 215. 1851, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 257. 1866, *Forest Flora of British Burma* 2: 360. 1877

(Used for Sidha. Leaves for swellings.)

in India: baapu tappu (baapu, swelling, tappu, leaf), baavina soppu, kadivaala soppu, kare soppu, koral soppu, kuraala, kuraala soppu, nakagadam, nakkaagadamu, nakkagadamu, nirilai, noeh-tah, pali eechi, peyicci, putharaval, putraval, valiyathumba

in Yoruba: aponlojusese, aroro

Antirrhinum L. Scrophulariaceae (Plantaginaceae)

Greek *anti* 'like' and *rhinos* 'snout, nose', referring to the appearance of the flower or to the shape of the corolla, Latin *antirrhinon*, *antirrhinum*, *anarrhinon* for a plant, wild lion's-mouth (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 612–618. 1753, *Genera Plantarum*. Ed. 5. 268. 1754, *Supplementum Plantarum* 280. 1781, *Proceedings of the American Academy of Arts and Sciences* 7(2): 375. 1868, *Proceedings of the American Academy of Arts and Sciences* 12: 81. 1870 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 52: 27, 33. 1943, *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *J. Cytol. Genet.* 13: 99–106. 1978, *Glimpses*

Cytogenet. India 3: 188–198. 1992, *Biologia* (Bratislava) 48: 441–445. 1993, *Bol. Soc. Bot. México* 69: 101–121. 2001.

Antirrhinum majus L.

Mediterranean region. Herbaceous, erect, leaves spirally arranged, pink to purple flowers in racemes

See *Species Plantarum* 2: 617. 1753 and *Regnum Veg.* 127: 19. 1993

(Powdered stem to stop nose bleeding. Leaves and flowers antiphlogistic, diuretic, bitter, resolvent and stimulant, detergent and astringent, a treatment for scurvy, liver disorders, employed in poultices on ulcers, hemorrhoids. Stem, leaves and fruits used in typhoid fever.)

in English: common snapdragon, dragon's mouth, garden snapdragon, large snapdragon, lion's mouth, rabbits mouth, snapdragon, toad's mouth

in Italian: bocca di leone, bocca di leone comune, bocca di lupo

Antizoma Miers Menispermaceae

From the Greek *anti* 'resembling, like' and *zoma* 'a belt', alluding to the woolly calyx, closely related to *Cissampelos*, see *Ann. Mag. Nat. Hist.* sér. 2, 7(37): 36, 41. 1851, *Ann. Mag. Nat. Hist.* sér. 3, 19: 266. 1866 and *South African Journal of Botany* 74(1): 2–9. 2008.

Antizoma angustifolia Miers ex Harv. (*Antizoma angustifolia* Miers ex Harv. & Sond.; *Antizoma burchelliana* Miers ex Harv.; *Antizoma harveyana* Miers ex Harv.; *Cissampelos angustifolia* Drege ex Harv. & Sond.; *Cissampelos angustifolia* Burch.; *Cissampelos angustifolius* Burch.)

Zimbabwe, Namibia, South Africa. Evergreen shrub, male flowers pale green or pale brown, fruit an ovoid drupe, seed horseshoe-shaped

See *Fl. Cap.* (Harvey) 1: 11. 1860 and *Biochemical Systematics and Ecology* 32: 1145–1152. 2004

(Large amounts of alkaloids. Root infusion drunk as an emetic, purgative, anthelmintic, blood purifier, for boils, cough, stomachache, colic, acute intestinal pain, glandular swellings, diarrhea, dysentery, kidney stones, liver, gallbladder and bladder complaints. Women drink a root decoction during pregnancy to keep the foetus mobile and to facilitate childbirth as well as the expulsion of the afterbirth. Leaves or roots decoction drunk or leaves and roots chewed to treat digestive problems.)

Antizoma miersiana Harv. (*Cissampelos miersiana* (Harv.) T. Durand & Schinz; *Cissampelos miersiana* T. Durand & Schinz; *Cocculus miersiana* T. Durand & Schinz; *Cocculus miersiana* (Harv.) T. Durand & Schinz)

Southern Namibia and western South Africa.

See *Fl. Cap.* (Harvey) 1: 13. 1860, *Consp. Fl. Afr.* [T.A. Durand & H. Schinz] 1(2): 50. 1898

(A root decoction drunk to treat stomach ulcers.)

Antrocaryon Pierre Anacardiaceae

From the Greek *antron* 'a cave, cavern, hole, inner chamber' and *karyon* 'a nut', referring to the cavities in the stone of the fruits, see *Bull. Mens. Soc. Linn. Paris* sér. 2. 23–24. 1898.

Antrocaryon klaineum Pierre (*Antrocaryon soyauxii* (Engler) Engl.; *Antrocaryon soyauxii* Engl.; *Spondias soyauxii* Engl.)

Tropical Africa.

See *Species Plantarum* 1: 371. 1753, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 24. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 215. 1905, *Die Vegetation der Erde* 3(2): 178, f. 87, N-Q. 1921, *African Study Monographs* 23(2): 47–64. 2002, *African Study Monographs* 25(1): 1–27. 2004

(Stem bark for dysentery, diarrhea, for treating amoebic-dysentery, the barks of *Bridelia micrantha*, *Antrocaryon klaineum* and *Treulia africana* are prepared in water and the decoction is drunk. Fruits for eye infection, juice as eye drop.)

in English: white mahogany

in Cameroon: angongo, bongoni, engongoui, gongu, ndooson, nganga, n'gonga, onzabili, ozakom

in Central Africa: gongu

in Congo: ibulagon, iboulagon

in Gabon: dilolo di mounai, n'dondjokon, oganganhedo, onsongongo, onzabili, onzakon, osongongo, ozakome, ozakoum

Antrocaryon micraster A. Chev. & Guillaumin

Tropical Africa, Guinea.

See *Bull. Soc. Bot. France* 58(Mém. 8d): 152. 1912 [1911 publ. 1912]

(Leaves tonic, laxative.)

in Cameroon: muyali

in Central Africa: akoua, ekhuen, ifa okele, muyali, nagongui

in Gabon: onzabili

in Ivory Coast: akova

in Nigeria: ifa okete (Yoruba); ekhuen (Edo); egin egbo (Itsekiri); ojifo (Boki)

Antrophyum Kaulf. Vittariaceae (Adiantaceae, Polypodiaceae)

From the Greek *antron* 'a cave, cavern, hole' and *phyo* 'to grow', referring to its habitat; see *Species Plantarum* 2: 1101.

1753, Georg Friedrich Kaulfuss (1786–1830), *Enumeratio filicum* quas in itinere circa terram legit Cl. Adalbertus de Chamisso adiectis in omnia harum plantarum genera per-multasque species non satis cognitatas vel novas animadversionibus. [Collector: Ludolf Karl Adelbert von Chamisso, 1781–1838] 197, 282. Lipsiae [Leipzig] 1824, *Mémoires de la Société Linnéenne de Paris* 6: 174, 218. 1827, *Fl. Javae Fil.*, 69–70. 1828, *Enumeratio Plantarum Guatemalensium* ... 1: 73. 1828, *Tentamen Pteridographiae* 214–215, pl. 9, f. 8. 1836, *Bot. Zeitung* (Berlin) 6: 209 (-210). 1848 and *Bull. Torrey Bot. Club* 34: 447, 455–458. 1907, *Bull. Torrey Bot. Club* 38: 153–190. 1911, *Notes Pteridol.* 16. 110. 1925.

Antrophyum plantagineum (Cav.) Kaulf. (*Hemionitis plantaginea* Cav.; *Hemionitis plantaginea* Don; *Hemionitis plantaginea* Sm.)

Pacific. Epiphytic or lithophytic, in damp areas

See *Mém. Acad. Roy. Sci.* (Turin) 5. 421 t. 9 f. 1. 1793, *Enum. Filic.* 197. 1824, *Prodr. Fl. Nepal.* 13. 1825

(For abscesses, swellings. Ceremonial, used in worship.)

Samoan name: lau mafiafia

Anvillea DC. Asteraceae

Anvillea garcinii (Burm.f.) DC. (*Anthemis garcinii* Burm. f.)
Mediterranean.

See *Species Plantarum* 2: 893–896. 1753, *Flora Indica* ... nec non Prodr. Florae Capensis 183, t. 60, f. 1. 1768, *Prodr. Systematis Naturalis Regni Vegetabilis* 5: 487. 1836 and *Philippine Journal of Science* 19(3): 329–388. 1921, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 3: 229–250. 1992, *J. Nat. Prod.* 59(4): 403–405. 1996, *Compositae Newsletter* 33: 1–18. 1999, *J. Nat. Prod.* 63(11): 1587–1589. 2000

(Antitumor, cytotoxic, anti-HIV. Potentially allergenic sesquiterpene lactones.)

Anvillea garcinii (Burm.f.) DC. subsp. *radiata* (Coss. & Durieu) Anderb. (*Anvillea australis* L. Chevall.; *Anvillea faurei* Gand.; *Anvillea radiata* Coss. & Durieu; *Anvillea radiata* var. *australis* (L. Chevall.) Diels; *Anvillea radiata* var. *genuina* Maire; *Sycodium radiatum* (Coss. & Durieu) Pomel)

Morocco.

See *Nouv. Mat. Fl. Atlantique* 39. 1874 and *Nord. J. Bot.* 2: 297–305. 1982, *Candollea* 45: 65–74. 1990, *Fitoterapia* 71(3): 278–307. 2000, *Fitoterapia* 75(6): 573–576. 2004, *Biochemical Systematics and Ecology* 34(9): 718–720. 2006

(Potentially allergenic sesquiterpene lactones. Cytotoxic, antibacterial. A decoction of the flower used externally as a vaginal antiseptic.)

Aoranthe Somers Rubiaceae

Greek *aor* ‘sword’ and *anthos* ‘flower’, see *Bulletin du Jardin Botanique National de Belgique* 58(1–2): 64. 1988.

Aoranthe cladantha (K. Schum.) Somers (*Porterandia cladantha* (K. Schum.) Keay; *Randia cladantha* K. Schum.; *Randia pierrei* Pit.; *Randia pierrei* A. Chev., nom. subnud.)

Tropical Africa. Small tree, fragrant slash, corollas cream-colored, fruits ramiflorous

See *Bot. Jahrb. Syst.* 28(1): 62. 1899 and *Vég. Utiles Afrique Trop. Franç.* ix. 228. 1917, *Fl. Indo-Chine* [P.H. Lecomte et al.] 3: 237. 1923, *Bull. Jard. Bot. État* 28: 24. 1958, *Bull. Jard. Bot. Natl. Belg.* 58(1–2): 71. 1988, *Reinwardtia* 12(4): 299. 2008

(Leaves wound dressing, for skin diseases, eczema, analgesic.)

in Central African Republic: mombendja

in Gabon: tseghe

Apama Lam. Aristolochiaceae

From a Malayalam name used by van Rheedee in *Hortus Indicus Malabaricus*. 6: t. 23. 1686, *alpam* means ‘little quantity’, the plant is supposed to be a remedy against snake-bites, see *Encyclopédie Méthodique, Botanique* (Lamarck) 1(1): 91. 1783.

Apama corymbosa Kuntze

Malaysia.

See *Revisio Generum Plantarum* 63. 1891

(For toothache, pound the leaves and put them into a hollow tooth.)

Malay names: lerhor, maja pahit

Apama indica L.

India.

(Antibacterial.)

Apama macroura K.C. Gomez

India.

(Antibacterial.)

Apama siliquosa Lam. (*Thottea siliquosa* (Lam.) Ding Hou)

Sri Lanka. Shrub, perianth dark maroon purple, anthers pale yellow

See *Encycl.* (Lamarck) 1(1): 91. 1783, *Nye Samling af det Kongelige Norske Videnskabers Selskabs Skrifter* 2: 529. 1783 and *Blumea* 27(2): 327. 1981, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 329–342. 1985

(Antibacterial.)

in India: alpam

Apama tomentosa (Blume) Engl. (*Apama tomentosa* Engl.; *Bragantia tomentosa* (Blume) Blume; *Ceramium tomentosum* Blume; *Cyclodiscus tomentosus* (Blume) Klotzsch)

Malaysia. Trailing herb, woody rootstock, yellow pubescent flowers, sometimes in *Thottea tomentosa*

See *Bijdragen tot de flora van Nederlandsch Indië* 1134. 1826, *Enumeratio Plantarum Javae* 82. 1827, *Monatsberichte der Koniglich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 592. 1859, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(1): 272. 1888

(Roots and leaves diuretic. Crushed leaves applied on chest to control cough and fever; poulticing in skin diseases and boils. Stems and leaves pounded and the juice swallowed in coughs, as a poultice applied against snakebite and stings.)

Malay names: kaneb, kemed, serengkong

Apeiba Aublet Tiliaceae (Malvaceae)

A native name in Guiana, *apé* 'bark', see *Hist. Pl. Guiane* 1: 537, t. 213 ad 216. 1775.

Apeiba glabra Aubl. (*Apeiba aspera* Aublet; *Apeiba aspera* subsp. *aspera*; *Apeiba burchellii* Sprague; *Apeiba echinata* Gaertn.; *Apeiba membranacea* Spruce ex Bentham; *Apeiba membranacea* Bentham)

South America.

See *Hist. Pl. Guiane* 1: 541, 545, t. 216. 1775, *De Fructibus et Seminibus Plantarum...* 2: t. 121. 1802, *Journal of the Proceedings of the Linnean Society* 5(Suppl. 2): 61. 1861 and *Bulletin de l'Herbier Boissier* sér. 2, 5: 703. 1905

(Warmed oil from the seeds applied to painful joints.)

in Peru: llausa quiro, maqui-sapa, maqui-sapa-ñaccha, maqui-sapa, maquisapa-ñaccha, palo corcho, tibourbou, yausaqui

Aphanamixis Blume Meliaceae

From the Greek *aphanes* 'obscure, inconspicuous, invisible' and *mixis* 'a mixing, mingling', the flowers are inconspicuous, see *Bijdragen tot de flora van Nederlandsch Indië* 4: 165. 1825, *Fl. Forest. Cochinch.* (1895) sub t. 334. 1895.

Aphanamixis cucullata (Roxb.) M.R. Almeida (*Aglaia cucullata* Roxb.; *Amoora cucullata* Roxb.) (*Amoora* Roxb., *Amur* is a Bengali name for *Amoora cucullata* Roxb.; see William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. 3: 54, t. 258. London 1795–1820; John Dowson, *A Classical Dictionary of Hindu Mythology and Religion, Geography, History, and Literature*. [The name Coromandel comes from a country and kingdom of the south of India

about Tanjore, the country was called *Chola-mandala*, whence the name Coromandel.] 73. London 1968.)

India. Tree, coastal, mangrove plant

See *Plants of the Coast of Coromandel* 3: 54, t. 258. 1820 and *Fl. Maharashtra* 1: 223. 1996, *Dhaka University Journal of Pharmaceutical Sciences* 4(1): 2005, *Chem. Pharm. Bull.* 54(9): 1344–1346. 2006

(Fruits and leaves used for treatment of diarrhea and inflammation; central nervous system depressant action of the leaves. Cytotoxic.)

in Bangladesh: amur, latmi, natmi

in India: amoor, bor-amari, samphal

Aphanamixis polystachya (Wall.) R. Parker (*Aglaia aphanamixis* Pellegr.; *Aglaia polystachya* Wall.; *Amoora elmeri* Merr.; *Amoora grandifolia* (Blume) Walp.; *Amoora grandifolia* Walp.; *Amoora rohituka* (Roxb.) Wight & Arn.; *Andersonia rohituka* Roxb.; *Aphanamixis elmeri* Merr.; *Aphanamixis elmeri* (Merr.) Merr.; *Aphanamixis grandiflora* Blume; *Aphanamixis grandifolia* Blume; *Aphanamixis rohituka* (Roxb.) Pierre; *Aphanamixis rohituka* Pierre; *Aphanamixis sinensis* F.C. How & T.C. Chen; *Aphanamixis tripetala* (Blanco) Merr.; *Aphanamixis tripetala* Merr.; *Chuni dendron spicatum* Hu; *Chuni dendron yunnanense* Hu; *Trichilia tripetala* Blanco)

Papua New Guinea, Thailand. Canopy tree or shrub, evergreen, cylindrical bole, black and grey bark furrowed and cracked, inner bark red and white, leaves pinnately compound, yellow flowers visited by sweat bees, pink-red fruits in axillary spikes, black seeds with orange aril

See *The Civil and Natural History of Jamaica* in Three Parts 278. 1756, *Flora Cochinchinensis* 98, 173. 1790, *Prodromus Florae Novae Hollandiae* 553. 1810, *Hortus Bengalensis*, or a catalogue ... 87. 1814, *Plants of the Coast of Coromandel* 3: 54. 1820, *Flora Indica*; or descriptions of Indian Plants 2: 429. 1824, *Bijdr. Fl. Ned. Ind.* 4: 165. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 119. 1834, *Flora de Filipinas* [F.M. Blanco] 354. 1837, *Repertorium Botanices Systematicae*. (Walpers) 1: 429. 1842, *Flore Forestière de la Cochinchine* 344. 1895–1896 and *Publications of the Bureau of Science Government Laboratories* 29: 23. 1905, *Flore Générale de l'Indo-Chine* 1: 767. 1911, *Philippine Journal of Science* C 11(1): 15. 1916, *Species Blancoanae* 211. 1918, *Indian Forester* 57: 486. 1931, *Journal of the Royal Horticultural Society* 63: 387. 1938, *Acta Phytotaxonomica Sinica* 4(1): 29–30, pl. 3. 1955, *International Journal of Pharmacognosy* 35(5): 318–322. 1997, *Fitoterapia* 74(1): 155–158. 2003, *Indian Journal of Pharmacology* 35: 304–307. 2003

(Used for Ayurveda and Sidha. Stem bark antimicrobial, hepatoprotective, for spleen and liver diseases, abdominal complaints, rheumatism, cancer, tumours. Powdered bark effective in hepatomegaly, in spleen diseases, tumors and

abdominal complaints; bark decoction as a postpartum remedy. Root paste taken as a treatment for leucorrhoea; root bark extract in leucorrhoea. Seeds laxative, anthelmintic, refrigerant and antiulcer; seed oil for rheumatism; a paste of seeds and ginger taken to prevent hydrophobia. Ground leaves for skin diseases; crushed leaflets taken as a treatment for blood dysentery. Crushed leaves as a fish poison.)

in China: shan lian

in India: abol samphal, akawa, akawatong, ammore rohituka, amooro rohituka, baiddiyrai, boga-amari, bol-samphal, cem, cemmaram, cennaraki, cennarakimaram, chem, chem maram, chemmaram, chevamanu, civappavi, civappavirmaram, curailaccuvaram, curaiyilaiccuvaram, cuvaiyilacuvaram, dieng rata, eng-gokmi, galua, gilakusuma, gokul, hakhoori bakhori, harin-hara, harinhara, harinkhana, heirangkhoi, janavallabha, karagil, kawsha, kokitam, kottaputpakam, ksharayogya, kutacanmali, lakshmi, lakshmivana, lohita, malam puluvam, malampuluvan, mukhyamuttuge, mulen, mullamuttala, mullu muthala, mullumuttaga, nalina- veti, orumaram, panikusuma, panturokapiramecani, pilikacatturu, pilikakkinam, pitrayadare, pittaraj, plihagna (plih, spleen; agni, fire, destroying), rakt rohida, rakta, raktavrksa, raktharohida, rohade chhaal, rohda-chal, rohido, rohitak, rohitaka, rohitakah, rohitakalata, rohithaka, rohituka, ruhituka, saptavha, sarvajana priya, sem, semmaram, sevamanu, shina, shuklarohita, shvetarohitaka, sitanga, sitapushpa, sitavhaya, surailachumaram, tasua, tiktaraj, tikuccam, tittilakayi, tottilakayi, tottile, urokitam, vellai kongu, vellakongu, vengul

Aphananthe Planchon Ulmaceae

Greek *aphanes* 'obscure, inconspicuous, invisible' and *anthos* 'flower', referring to the small flowers; see Jules Émile Planchon (1823–1888), *Annales des Sciences Naturelles. Botanique*. 10: 265, 337. 1848.

Aphananthe aspera (Thunberg) Planchon (*Celtis mukii* Siebold & Zucc.; *Celtis muku* Siebold; *Homoioceltis aspera* (Thunb.) Blume; *Prunus aspera* Thunb.)

E. Asia, China, Japan, Korea. Tree, whitish smooth bark, leaves used as feed for horses, fruits eaten

See *Syst. Veg.*, ed. 14, 463. 1784, *Ann. Sci. Nat., Bot.*, sér. 3. 10: 265, 337. 1848, *Museum Botanicum* 2: 64. 1852, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 208. 1873 and *Acta Phytotax. Sin.* 17(1): 49. 1979, *Flora of China* 5: 1–19. 2003, *Chemistry of Natural Compounds* 43(5): 558–559. 2007

(Stem bark used in the treatment of inflammation and pain.)

in English: muku tree

in China: cao ye shu

in Japan: muku-no-ki

Aphananthe cuspidata (Blume) Planch. (*Aphananthe lissophylla* Gagnep.; *Aphananthe yunnanensis* (Hu) Grudz.; *Cyclostemon cuspidatum* Blume; *Galumpita cuspidata* (Blume) Blume; *Gironniera cuspidata* (Blume) Kurz; *Gironniera lucida* Kurz; *Gironniera nitida* Benth.; *Gironniera reticulata* Thwaites; *Gironniera yunnanensis* Hu)

India.

See *Bijdragen tot de flora van Nederlandsch Indië* 597, 599. 1825, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique*, pl. 85. 1844, *Annales des Sciences Naturelles, Botanique*, sér. 3, 10: 265, 337. 1848, *Museum Botanicum* 2: 73. 1852, *Mus. Bot. Lugd.-Bat.* 2: 73. 1856, *Flora Hongkongensis* 325. 1861, *Enumeratio Plantarum Zeylaniae* 1: 268. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 209. 1873, *Forest Flora of British Burma* 2: 470. 1877 and *Bulletin de la Société Botanique de France* 72: 804–805. 1925, *Bulletin of the Fan Memorial Institute of Biology*: 10: 150. 1940, *Novosti Sist. Vyssh. Rast.* 1964: 66. 1964

(Antifungal, depurative, for skin problems, itching.)

in India: babbuchekke, dieng charkhei, gabbu chakke, gab-bucakke, gabbuchekke, koditani, naraka-bhutali, narakabhutali, narukebhutale, nyal, peenaari

Aphelandra R. Br. Acanthaceae

From the Greek *apheles* 'simple' and *aner, andros* 'male', referring to the anthers, see *Proc. Calif. Acad. Sci.* 47(8): 235–274. 1991, *Contr. Univ. Michigan Herb.* 21: 161–174. 1997.

Aphelandra scabra (Vahl) Sm. (*Aphelandra deppeana* Schltld. & Cham.; *Aphelandra fulgens* Decne.; *Aphelandra haenkeana* Nees; *Aphelandra pectinata* Willd. ex Nees; *Justicia rostrata* Bertol.; *Justicia scabra* Vahl)

Venezuela, Belize, Mexico. Shrub

See *Enumeratio Plantarum ...* 1: 120. 1804, *The Cyclopaedia*; or, universal dictionary of arts, ... 39(Addenda): *Aphelandra* no. 3. 1819

(Mashed roots and leaves soaked in water and the liquid drunk for flatulence.)

Apium L. Apiaceae (Umbelliferae)

Apium, *ii* (*apis*, *is* 'a bee') is the classical Latin name for celery, parsley; see Carl Linnaeus, *Species Plantarum*. 264. 1753 and *Genera Plantarum*. Ed. 5. 128. 1754 and H.H. Allan, *Fl. New Z.* 1: 462–463. 1961, P.S. Short, *J. Adelaide Bot. Gard.* 1: 205–235. 1979, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany*. 25: 115–170. 1987.

Apium graveolens L. (*Apium decumbens* Eckl. & Zeyh.; *Apium integrilobum* Hayata; *Apium vulgare* Bubani; *Carum graveolens* (L.) Koso-Pol.; *Celeri graveolens* (L.) Britton; *Selinum graveolens* (L.) Krause; *Seseli graveolens* Scop.; *Sison ruta* Burm.f.; *Sium apium* Roth; *Sium graveolens* (L.) Vest; *Smyrniium laterale* Thunb.)

Europe. Erect herb

See *Species Plantarum* 1: 251–252, 259, 263–265. 1753, *Species Plantarum*, Editio Secunda 1: 350. 1762, *Familles des Plantes* 2: 498, 535. 1763, *Flora Carniolica* ed. 2 1: 215. 1772 and *Flora Pyrenaea* ... 2: 344. 1900, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 126–127. 1911, *An Illustrated Flora of the Northern United States* 2: 660. 1913, *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 199. 1916, *La Kromosomo* 50: 1635–1651. 1988, *Fl. Cambodge Laos Vietnam* 5: 44. 1967, *Taxon* 41: 55. 1992, *Watsonia* 19: 134–137. 1992

(Used in Ayurveda, Unani and Sidha. Ripe seeds, herb and root aperient, carminative, antispasmodic, sedative, anti-convulsant, diuretic, emmenagogue, galactagogue, nervine, stimulant and tonic. Used in the form of powder to treat diarrhea, rheumatism and kidney complaints, dysentery, hoarseness of voice, gravels, indigestion and loss of appetite. Insect repellent. Green leaves eaten to stop hemorrhage of the mouth and for pulmonary troubles.)

in English: celery, marsh parsley, smallage, wild celery

in China: han qin, han ch'in, ch'in, ch'in ts'ai

in India: aajmoda, agni, agnika, ajamoda, ajmod, ajmoda, ajmud, andhapatrika, bastamoda, bekh karfas, bhotay padina, bikh karafs, bikh karfas, bizrul karafs, brahmakoshi, brahmamusha, callari, chanu, dipya, dipyaka, fitrasalium, gandhadala, guddaga sompu, hastikavari, hayagandndha, karafas, karafs, karasb, karavi, karfs, kharahya, kharashva, kharasva, kharavha, krimijagdha, lochamas-taka, markati, mayura, moda, modadhya, modini, phalamukhya, randhuni, seleri, seliri, shalari, shikkimoda, sonira, tukham karfara, tukhm-e-karafs, tukhm-i-karafs, tukhm karafs, tukhm karafs nim kofta, tukhm karofs, tukhm khurfa siyah, tukhme-karfas, ugragandhika, vanhidipika, vastamoda, vishali

in Philippines: apio, kimchai, kinintsai, kintsai

in Tibet: tam mu sa, tim mu sa

in Brazil: aipo da água e dos pântanos, aipo, aipo odorante, aipo fétida, salsa dos pântanos, salsão

in South Africa: sel(d)ery

Apium prostratum Labill. (*Apium australe* Thouars; *Apium australe* var. *latisectum* H. Wolff; *Apium dunicola* Pontiroli; *Apium maclovianum* Gand.; *Apium prostratum* Labill. ex Vent.; *Apium prostratum* Vent.)

New Zealand. Flat creeping plant

See Cook, James (1728–1779), *A voyage towards the South Pole, and round the world*: performed in His Majesty's ships the Resolution and Adventure, in the years 1772, 1773, 1774, and 1775 ... London, 1777 and *Bulletin de la Société Botanique de France* 59: 709. 1913 [1912 publ. 1913], *Das Pflanzenreich* IV, 228(90): 32. 1927 [*Pflanzenr.* (Engler) [Heft 90] 4, Fam. 228: 32. 1927], *Fl. Prov. Buenos Aires* Pt. 4, Oxalidac.-Umbellif., 397. 1966 [*Colecc. Ci. Inst. Nac. Technol. Agropecu.* 4(4a): 397. 1966]

(Diuretic, anti-scorbutic.)

in English: green celery, Maori celery, prostrate parsley, sea celery

Maori name: tutaekoau

Apluda L. Poaceae (Gramineae)

From the Latin name *apluda* (*appl-*) *ae* for chaff or bran, alluding to the involucre, or to the spikelets, see *Species Plantarum* 1: 82. 1753, *Genera Plantarum* Ed. 5. 35. 1754, *Essai d'une Nouvelle Agrostographie* 128, 157. 1812 and *Flora of Tropical Africa* 9: 5. 1917, *Phytologia* 10(5): 321–406. 1964, *Journal of Cytology and Genetics* 15: 51–57. 1980, M. Lazarides, "The tropical grasses of Southeast Asia (excluding bamboos)." *Phanerogamarum Monographiae* 12: 1–225. Vaduz 1980, *Journal of Cytology and Genetics* 20: 205–206. 1985, *Journal of Cytology and Genetics* 25: 140–143, 322–323. 1990, *Regnum Veg.* 127: 20. 1993, *Annals of the Missouri Botanical Garden* 81(4): 775–783. 1994, *Contributions from the United States National Herbarium* 46: 68–69. 2003.

"Toxicity of *Apocynum* (dogbane) to stock; a correction." *Cornell Vet.* 49: 285–287. 1959

(This plant has been reported to cause serious poisoning potential in cattle, horses, and sheep after ingestion. Spreading dogbane contains apocynamarin, a cardiac glycoside, as well as other glycosides and resins; these chemicals have caused sickness and death when administered to cats and dogs. Root poisonous in large doses. Analgesic, antelmintic, stomachic, anticonvulsive, aphrodisiac, diuretic, hemostat, heart medicine, cathartic, febrifuge, postpartum remedy, liver tonic, for dizziness, headache, dropsy, cold, earache, sore eyes, warts, to increase lactation. Veterinary medicine, used to bathe dogs for mange; decoction of roots given to horses with worms. Magico-religious beliefs, root chewed to keep off evil spirits and ghosts.)

in English: spreading dogbane

Apollonias Nees Lauraceae

After Apollo or Phoebus of Greek mythology, probably referring to the beauty of the plants, see Nees von Esenbeck, Christian Gottfried Daniel (1776–1858), *Annexa*

est Plantarum laurinarum secundum affinitates naturales expositio: ab academiae praeside proposita, qua comprehenditur Hufelandiae laurini generis novi laureato seni consecrati illustratio. Vratislaviae: [typis Grassii, Barthii et sociorum], 1833.

Apollonias arnottii Nees

India.

See Nees von Esenbeck, Christian Gottfried Daniel, *Systema Laurinarum* 670. Berolini, 1836

(Veterinary medicine.)

in India: centanam, chenthanam, chenthanu

Aponogeton L.f. Aponogetonaceae

From the Latin name *Aponi fons* or *fontes*, healing springs near Padua, Italy; Greek *a* ‘without, not, un-’, *ponos* ‘pain’ and *geiton* ‘a neighbour’, see *Species Plantarum* 2: 969. 1753, *The British Herbal* 480. 1756, *Supplementum Plantarum* 32, 214. 1782 [dt. 1781; publ. Apr 1782], *Flora Cochinchinensis* 224, 244. 1790, *Synopsis Plantarum* 1: 400. 1805, *Exposition des Familles Naturelles* 1: 52. 1805, *Genera Nova Madagascariensia* 2, 17. 1806, *Botanical Magazine*, ad pl. 4894. 1856, *Genera Plantarum* 3: 1011. 1883 and Tomas Erik von Post (1858–1912) and C.E.O. Kuntze (1843–1907), *Lexicon generum Phanerogamarum* 39. Stuttgart 1904, *Proc. Indian Sci. Congr. Assoc.* (III, C) 67: 53–54. 1980, *Syst. Bot.* 30(3): 519. 2005.

Aponogeton crispus Thunb. (*Aponogeton echinatus* Roxb.; *Spathium crispum* (Thunb.) Voigt; *Spathium echinatum* (Roxb.) Voigt)

India, Sri Lanka. Aquatic herb, thick tuberous rootstock edible

See *Nov. Gen. Pl.* [Thunberg] 4: 73. 1784, *Fl. Ind.* ed. 1832, 2: 210. 1832, *Hort. Suburb. Calcutt.*: 694. 1845 and *Proc. Indian Sci. Congr. Assoc.* (III, C) 67: 53–54. 1980, *Ann. Missouri Bot. Gard.* 68: 222–223. 1981, *Biblioth. Bot.* 137: 1–76. 1985

(Starchy rootstock eaten in diarrhea.)

Aponogeton natans (L.) Engl. & K. Krause (*Aponogeton flavidum* Ham. ex Hook.f.; *Aponogeton lineare* Vahl; *Aponogeton lucens* Herb. Madr. ex Hook.f.; *Aponogeton lucens* Hook.f.; *Aponogeton monostachyon* L.f., nom. illeg.; *Aponogeton monostachyos* L.f., nom. illeg.; *Aponogeton monostachys* Edgew.; *Aponogeton monostachyus* L.f.; *Aponogeton natans* Engl. & K. Krause; *Potamogeton indicus* Roxb., nom. inval.; *Potamogeton indicus* Roth; *Potamogeton indicus* Roth ex Roem. & Schult.; *Spathium monostachyum* (L.f.) Edgew.)

India, Myanmar, Sri Lanka. Aquatic, floating, slender, aerial leaves erect, tubers boiled or fried before being consumed

See *Supplementum Plantarum* 32, 214. 1782 [1781 publ. Apr 1782], *Symb. Bot.* (Vahl) iii. 51. 1794, *Hort. Bengal.* 12. 1814, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 3: 516. 1818, *Fl. Ind.* (Carey & Wallich ed.) 1: 471. 1820, *J. Asiat. Soc. Bengal* 11: 148. 1842, *London J. Bot.* 3: 402. 1844, *Fl. Brit. India* [J.D. Hooker] 6: 564. 1893 and *Das Pflanzenreich* (Engler) Aponogetonac. IV, 13: 11. 1906, *Ethnobotanical Leaflets* 11: 258–265. 2007

(Used in Sidha. Leaf pasted with hot water to treat cuts and wounds.)

in India: allikkilanku, alliyakkilanku, ammati, citti, cit-tikkilanku, elakkotti, elakkottikkilanku, kanmaykkilanku, kanmaykkotti, kopapattiram, kothe gida, kottaimulam, kotti, kotti-k-kilanku, kotti kizhangu, kottikkilanku, kottikkizhangu, lottirakkilanku, lottiram, metuvacakkilanku, metuvacam, naiciyakkotti, naiciyam, namma dumpa, nanna puvvumokka, nava dumpa, neeru balli, neeru kasa, paraikilangu, parua-kelangu, utumparacitakkilanku, utumparacitam

in Sri Lanka: kekatiya

Aporosa Blume Phyllanthaceae (Euphorbiaceae)

A being *aporos* 'difficult, undecided', from the Greek *aporia* 'difficulty, perplexity, embarrassment, doubt', possibly referring to the perplexity of the author regarding the classification; see *Genera Plantarum* 384–385. 1789, Karl Ludwig von Blume (1796–1862), *Bijdragen tot de flora van Nederlandsch Indië*. 10: 514. Batavia 1825–1826 [7 Dec 1825–24 Jan 1826], *Flora Javae* 1: vi. 1828 and *Blumea Supplement* 17: 1–381. 2004, Balakrishnan, N.P. & Chakrabarty, T. *The family Euphorbiaceae in India*. A synopsis of its profile, taxonomy and bibliography. Bishen Singh Mahendra Pal Singh. 2007.

Aporosa cardiosperma (Gaertn.) Merr. (*Aporosa affinis* Baill., nom. nud.; *Aporosa lindleyana* (Wight) Baill.; *Aporosa lindleyana* Baill.; *Aporosa sphaerocarpa* Müll. Arg.; *Aporosa lindleyana* (Wight) Baill.; *Croton cardiospermus* Gaertn.; *Scepa lindleyana* Wight)

W. India, Sri Lanka. Tree, thin smooth bark, pale yellow flowers, juicy ripe aril eaten raw

See *De Fructibus et Seminibus Plantarum...* 2: 120. 1790, *Icon. Pl. Ind. Orient.* 2: 5, t. 361. 1840, *Étude Euphorb.* 645. 1858, *Flora* 47: 519. 1864 and *J. Arnold Arbor.* 35: 139. 1954

(Used in Sidha. Root decoction given for the treatment of jaundice, fever and headache. Religious and supernatural beliefs, conserved in sacred groves, used in funeral ceremony.)

in India: amvetti, bidchella, challe mara, challu kaayi, echili, kodali, kotili, makavirutcam, ponvetti, sali, salle, sarali, sulla, suroli, surroli, vetti, vitti, vittil

Aporosa octandra (Buch.-Ham. ex D. Don) Vickery (*Myrica octandra* Buch.-Ham. ex D. Don)

Tropical Asia. Small tree, young branches sparsely hairy, papery leaves, axillary inflorescence

See *Species Plantarum* 2: 1024–1025. 1753, *Prodromus Florae Nepalensis* 56. 1825 and *Enum. Fl. Pl. Nepal* 3: 193. 1982

(Fruit pulp for pimples; bark juice for wounds; infusion of surface of inner bark drunk for colic and stomachache.)

in India: chhawntual

in Nepal: kalikath

Aporosa octandra (Buch.-Ham. ex D. Don) Vickery var. *octandra* (*Alnus dioica* Roxb.; *Alnus integrifolia* Roxb. ex Steud.; *Alnus integrifolia* Roxb. ex Pax & K. Hoffm.; *Aporosa aurita* (Tul.) Miq.; *Aporosa chinensis* (Champ. ex Benth.) Merr.; *Aporosa clellandii* Hook.f.; *Aporosa dioica* (Roxb.) Müll.Arg.; *Aporosa frutescens* Benth., nom. illeg.; *Aporosa glabrifolia* Kurz; *Aporosa leptostachya* Benth.; *Aporosa lindleyana* var. *macrostachya* Müll.Arg.; *Aporosa microcalyx* (Hassk.) Hassk.; *Aporosa microcalyx* var. *chinensis* (Champ. ex Benth.) Müll.Arg.; *Aporosa microcalyx* var. *intermedia* Pax & K. Hoffm.; *Aporosa oblonga* Müll.Arg.; *Aporosa obovata* Pax & K. Hoffm.; *Aporosa octandra* var. *chinensis* (Champ. ex Benth.) A. Schott; *Aporosa roxburghii* Baill.; *Aporosa roxburghii* (Wall. ex Lindl.) Baill.; *Aporosa villosula* Kurz; *Aporosa wallichii* var. *ambigua* Airy Shaw; *Aporosa dioica* (Roxb.) Müll.Arg.; *Leiocarpus serratus* Hassk.; *Leiocarpus tinctorius* Blume ex Pax & K. Hoffm.; *Lepidostachys oblonga* Wall., nom. nud.; *Lepidostachys roxburghii* Wall. ex Lindl.; *Lepidostachys roxburghii* Wall.; *Scepa aurita* Tul.; *Scepa chinensis* Champ. ex Benth.; *Scepa stipulacea* Lindl.; *Tetractinostigma microcalyx* Hassk.)

India, Indochina. Small tree, elliptic entire papery leaves, yellow flowers, beaked fruits, reddish aril when ripe

See *Flora Indica*; or, descriptions of Indian Plants 3: 580–81. 1832, *An Introduction to the Natural System of Botany* 441. 1836, *Annales des Sciences Naturelles; Botanique*, sér. 3 15: 254. 1851, *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 72. 1854, *Flora van Nederlandsch Indië* 1(1): 431. 1855, *Flora* 40: 533. 1857, *Étude générale du groupe des Euphorbiacées* 645. 1858, *Bulletin de la Société Botanique de France* 6: 714. 1859, *Flora Hongkongensis* 317. 1861, *Linnaea* 32: 78. 1863, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 472. 1866, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 42(2): 23. 1873, *Fl. Brit. India* 5: 348. 1887 and *Pflanzenr.*, IV, 147, XV: 101–103. 1922, *Lingnan Science Journal* 13(1): 34. 1934, *Kew Bulletin* 35: 384. 1980, *Blumea* 40(2): 452. 1995

(Leaves juice given in dysentery and stomach disorders. Bark juice for wounds, fever, headache, insanity, stomachache; bark infusion taken for stomachache and for low blood pressure. Bark and fruit crushed and mixed with water, the filtrate applied in skin diseases, scabies, dermatitis. Fruit pulp for pimples.)

in China: yin chai

in India: bara heloch, chamchhloja, chham-chholja, chhawn-tual, chhawntual, khokora, kokra, tamsir-araung

in Nepal: kalikath

Aporosa villosa (Lindl.) Baill. (*Aporosa dioica* (Roxb.) Müll. Arg. var. *yunnanensis* (Pax & K. Hoffm.) H.S. Kiu; *Aporosa glabrifolia* Kurz; *Aporosa microcalyx* (Hassk.) Hassk. var. *yunnanensis* Pax & K. Hoffm.; *Aporosa octandra* (Buch.-Ham. ex D. Don) Vickery var. *yunnanensis* (Pax & K. Hoffm.) A. Schott; *Scepa villosa* Lindl.)

India. Small tree

See *A Natural System of Botany* 2: 441. 1836, *Étude générale du groupe des Euphorbiacées* 645. 1858, *Bull. Soc. Bot. France* 6: 714. 1860 [1859 publ. 1860], *Prodr.* (DC.) 15(2.2): 472. 1866, *Journal of Botany, British and Foreign* 13(155): 330. 1875 and *Guihaia* 11(1): 17. 1991, *Blumea* 40(2): 452. 1995

(Leaves rubbed on the body as a sexual stimulant.)

in China: mao yin chai

Apostasia Blume Orchidaceae

From the Greek *apostasia* ‘separation, divorce, defection’, (*aphistemi* ‘to remove, separate, put away’, *apo* ‘far, away’ and *istemi* ‘to stand’), *apostasis* ‘a standing away from’, referring to the classification of this orchid; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 423, t. 5. 1825 and *India Orchid Journal* 1(4): 144–148. 1989.

Apostasia nuda R.Br. (*Adactylus brunonis* (Griff.) Cretz.; *Adactylus lobbii* (Rchb.f.) Rolfe; *Adactylus nudus* (R.Br.) Rolfe; *Apostasia brunonis* Griff.; *Apostasia lobbii* Rchb.f.,)

Malesia.

See *Pl. Asiat. Rar.* 1: 76. 1830, *Not. Pl. Asiat.* 3: 243. 1851, *Flora* 55: 278. 1872, *Orchid Rev.* 4: 329. 1896 and *J. Jap. Bot.* 17: 407. 1941

(For diarrhea, dysentery.)

Malay names: hutan jantan, kanching pelandok, pelampas budak, sen juan

Apostasia wallichii R.Br. (*Apostasia alba* Rolfe; *Apostasia curvata* J.J.Sm.; *Apostasia gracilis* Rolfe; *Apostasia lucida* Blume ex Siebe; *Apostasia nipponica* Masam.; *Apostasia papuana* Schltr.; *Apostasia stylidioides* (F. Muell.) Rchb.f.; *Apostasia wallichii* R. Brown ex Wallich; *Apostasia wallichii* subsp. *nipponica* (Masam.) Masam.; *Apostasia wallichii* var. *nipponica* (Masam.) Masam.; *Apostasia wallichii* var. *seraweiensis* J.J. Sm.; *Mesodactylis deflexa* Wall.; *Mesodactylis wallichii* (R.Br.) Endl.; *Neumayera stylidioides* (F. Muell.) Rchb.f.; *Niemeyera stylidioides* F. Muell.)

Japan, Trop. Asia. Terrestrial herb or shrublet, stem deep green, floral bracts white, young fruits green, in shady place

See *Plantae Asiaticae Rariores* 1: 75, t. 84. 1830, *J. Linn. Soc., Bot.* 25: 242. 1889 and *J. Jap. Bot.* 11: 46. 1935, *Rep. (Annual) Noto Mar. Lab.* 3: 63. 1963, *Bangladesh Journal of Plant Taxonomy* 8(2): 35–49. 2001, *QJM* 98(9): 625–631. 2005

(Convulsions.)

Apuleia Mart. Fabaceae (Caesalpinieae, Cassieae, Leguminosae)

See *Species Plantarum* 1: 374–375. 1753, *Herbarium florae brasiliensis* 20(2): 123. 1837, *Flora* 20(2, Beibl.): 123. 1837, *Linnaea* 11: 198. 1837 and *Phytologia* 1(3): 141–144. 1935, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Arch. Jard. Bot. Rio de Janeiro* 18: 109–177. 1965.

Apuleia leiocarpa (Vogel) J.F. Macbr. (*Apuleya leiocarpa* (Vogel) Gleason; *Apuleya molaris* (Spruce ex Benth.) Gleason; *Apuleia leiocarpa* J.F. Macbr.; *Apuleia leiocarpa* var. *molaris* (Spruce ex Benth.) Koeppen; *Apuleia molaris* Spruce ex Benth.; *Apuleia molaris* Spruce; *Apuleia praecox* C. Mart.; *Dalbergia cucullata* Pittier; *Leptolobium leiocarpum* Vogel; *Platymiscium ellipticum* Rusby)

South America. Perennial non-climbing tree

See *Linnaea* 11: 393. 1837, *Flora Brasiliensis* (Martius) 15(2): 177. 1870 and *Bull. New York Bot. Gard.* 6: 514. 1910, *Contributions from the Gray Herbarium of Harvard University* 59: 23. 1919, *Phytologia* 1(3): 143. 1935, *Bol. Soc. Venez. Ci. Nat.* 8: 261. 1943, *Ann. Missouri Bot. Gard.* 68: 551, 557. 1981, *Journal of Ethnopharmacology* 69(2): 127–137. 2000, *Revista Brasil. Bot.* 28(4): 797–808. 2005

(Antimalarial.)

Aquilaria Lam. Thymelaeaceae (Aquilarieae)

Latin *aquila*, *ae* ‘an eagle’; Akkadian *eklu* ‘dark: said of the day’, *ekelu* ‘to be dark: said of the sun, the day’, see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 3. 1754, *Encyclopédie Méthodique, Botanique* (Lam.) 1(1): 48–49. 1783, *Genera Plantarum* 76. 1789, *Flora Cochinchinensis* 1: 257–258, 267–268, 280–281. 1790, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 59. 1825, *Annales des Sciences Naturelles; Botanique*, sér. 2, 19: 41, pl. 1B, f. 13–21. 1843, *Revisio Generum Plantarum* 2: 584. 1891, *Ann. Sci. Nat. Bot.*, sér. 7. 17: 216. 1893, *Bulletin de la Société Botanique de France* 40: 77. 1893 and *Fl. Malesiana*, Ser. 1, *Spermatoph.* 6: 15. 1960, *Fl. Bhutan* 2(1): 208–213. 1991, *Fl. Thailand* 6(3): 226–245. 1997, *Tree Fl. Sabah & Sarawak* 5: 433–484. 2004.

Aquilaria agallocha (Lour.) Roxb. ex Finl. (*Aloexylum agallochum* Lour.; *Aquilaria agallocha* Roxb., nom. illeg.; *Aquilaria agallochum* (Lour.) Roxb. ex Finl.)

India. Tree, white flowers in terminal umbellate cymes, obovoid fruits, coriaceous pericarp

See *Flora Cochinchinensis* 1: 267–268. 1790, *Hortus Bengalensis*, or a catalogue ... 33. 1814, *Miss. Siam Hué* 94. 1826, *Flora Indica*; or, descriptions of Indian Plants 2: 422–423. 1832 and *J. Nat. Prod.* 44(5): 569–72. 1982, *Planta Med.* 51(5): 368–371. 1985, *Planta Med.* 59(1): 32–6. 1993, *Cell and Chromosome Research* 16: 38. 1993, *Cytologia* 60: 407–409. 1995, *J. Ethnopharmacol.* 58(1): 31–38. 1997, *J. Zhejiang Univ. Sci. B.* 6(8): 849–852. 2005

(Used in Ayurveda. Wood stimulant, tonic, carminative, astringent, aphrodisiac, used in diarrhea, vomiting and snakebite; heartwood stomachic, useful in stomach pain, colic and nervous vomiting. Bark juice useful in gout, rheumatism, diarrhea and for stopping vomiting. Decoction of rooted parts of the stem drunk for influenza. Sedative, central nervous system depressant, cytotoxic, antiallergic. Powder of dried wood or oil in clothes against moths and cockroach. Magico-religious beliefs, contact therapy, plant used as bed and pillow.)

in India: agalicandana, agar, agar hindi, agar hindi saida, agar kala, agar kali, agar nim kofta, agar pisa hua, agara, agare-hindi, agaru, agaru chettu, agaru gandha, aggalichandana, agil, agilu, agilu gandha, agnikashtha, agre-hindi, agru, aguru, aguruh, ajmod, akar, akaru, akil, akil kattai, akilmaram, akircilai, akirkattai, akkakalam, akkil, akku, akkuru, akuru, anaryaka, aracakam, arakkam, arukam, asara, aud, aude-hindi, bhringaja, bol agar, cakatuntam, cakatuyil, cakatuyilmaram, catatuntam, chamang, chap, cikalokam, cipiyan, cilokam, ciryavitamaram, cirivil, citam, cukacaritam, conkam, ilakal, ilaku, ilatavi, ilatavimaram, iracarukam, jishvarupa, jongaka, jongakah, jongakaichhila, jonk, kakatuntam, kalaguru, kalaloha, kalecam, kaleyam, kaleyamaram, kalimankam, kalimayikam, kalimalakam, kalomam, kalomavvi, kamaracamaram, kamararam, kapaterikam, karaincal, karaincan, karakil, karanical, karkantam, karkantamaram, karkaru, kashthaka, kattakam, katteri, kavai, kavaikkal, kavaikkalmaram, kavikkalmaram, kayagahru, kayam, kayaperikam, kayaperikamaram, kayaterikam, kayateriyam, kirumicamtai, kiruttuvam, kirutuvam, krimigandha, krimija, krimijagandha, krishna, krishna agaru, krishnagaru, krsnaguru, krsnaguruh, laghu, loha, lohakhya, mai hom, maliyaka, marali, murukku, murukamaram, nang nam cha, ood, ood hindi, ood hindi agar, ood hindi saida, pacarukam, paruciyam, pataka, pirakaram, pirakaricam, pirakarikam, porika, pravara, pulil, punil, purarika, purika, purinakar, putikam, putikaram, rajarahkalijya, rajarha, roghan ood, sachigoch, sasi gach, sungzatong, tang mam, thing-rai, thingrai, tra kung, tun nam, tun nam cha, tuti, tuticcopitam, tuticcopitamaram, ud, ude-hindi, udghargi, vanacananam, vanacantanam, vancantanam, vanshika, varanppiracatanam, varnappiracatanam, varnapracatanam, varnaprasadana, vilam, yogaja

Aquilaria beccariana Tiegh. (*Aquilaria cumingiana* (Decne.) Ridl. var. *parvifolia* Airy Shaw; *Aquilaria grandifolia* Domke; *Gyrinopsis grandifolia* (Domke) Quisumb.)

Borneo. Tree, resinous

See *Bulletin de la Société Botanique de France* 40: 77. 1893, *Ann. Sci. Nat. Bot.* 7: 217. 1893 and *J. Straits Branch Roy. Asiat. Soc.* 35: 80. 1901, *Meded. Rijks-Herb.* 44: 17. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(105): 348–349. 1932, *Bulletin of Miscellaneous Information Kew* 1940(6): 261–262. 1940, *Journal of the Arnold Arboretum* 27(4): 406. 1946, *Fl. Malesiana, Ser. 1, Spermaph.* 6: 13. 1960, *Tree Fl. Sabah & Sarawak* 5: 433–484. 2004

(Heartwood burned to repel insects, mosquitoes. Magico-religious beliefs, ritual, ceremonial, fragrant heartwood burned to cure a person made ill by a curse.)

Vernacular name: kayu sekau

Aquilaria cumingiana (Decne.) Ridl. (*Aquilaria cumingiana* (Decne.) Hallier f.; *Aquilaria decemcostata* Hallier f.; *Decaisnella cumingiana* (Decne.) Kuntze; *Gyrinopsis cumingiana* Decne.; *Gyrinopsis pubifolia* Quisumb.)

Philippines.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 19: 41, pl. 1B, f. 13–21. 1843, *Revisio Generum Plantarum* 2: 584. 1891 and *Journal of the Straits Branch of the Royal Asiatic Society* no. 35: 80. 1901, *Mededeelingen van's Rijks-Herbarium* 44: 17–18. 1922, *Journal of the Arnold Arboretum* 27(4): 406. 1946

(Bark and roots to stop bleeding, for wounds.)

in Philippines: alahan, bago, binuko, butlo, dalakit, lanutan, magaan, malagapas

Aquilaria filaria (Oken) Merr. (*Aquilaria acuminata* (Merr.) Quisumb.; *Aquilaria tomentosa* Gilg; *Gyrinopsis acuminata* Merr.; *Pittosporum filarium* Oken)

Papua New Guinea. Small tree, inflorescence axillary, flowers arising from a single point, simple dehiscent capsule

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788, *Allgemeine Naturgeschichte* 3: 1299. 1841, *Annales des Sciences Naturelles; Botanique*, sér. 2, 19: 41. 1843, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28(2): 145–146. 1900, *Philipp. J. Sci. C* 17(3): 294. 1920[1921], *J. Arnold Arbor.* 27(4): 403. 1946, *J. Arnold Arbor.* 31: 283. 1950, *Flora Malesiana, Series 1* 11–12. 1960, *Mycorrhiza* 16(7): 459–64. 2006

(Sedative, central nervous system depressant. Pure resin, dark, excellent fragrance.)

Common names: agarwood, aloeswood, eaglewood, gaharu, gaharu wood, Indonesian agarwood, jinko, oud, oudh

Aquilaria malaccensis Lam. (*Agallochum malaccense* (Lam.) Kuntze; *Aloexylum agallochum* Lour.; *Aquilaria agallocha* Roxb., nom. illeg.; *Aquilaria agallochum* (Lour.) Roxb. ex Finl.; *Aquilaria ovata* Cav.; *Aquilaria secundaria* Rumph. ex DC.; *Aquilariella malaccensis* (Lam.) Tiegh.)

India, Myanmar, Borneo, Sumatra, Malaysia, Philippines. Trees, spiral leaves, fragrant flowers in stalked heads, tiny petals, calyx tube ribbed, fruit pear-shaped on persistent calyx, seed covered with red hairs

See *Encyclopédie Méthodique, Botanique* 1(1): 48–49. 1783, *Monadelphiae Classis Dissertationes Decem* 7: 377, pl. 224. 1789, *Flora Cochinchinensis* 1: 257, 267–268. 1790, *Hortus Bengalensis*, or a catalogue ... 33. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 59. 1825, *Mission Siam, Húe* 94. 1826, *Flora Indica*; or, descriptions of Indian Plants 2: 422–423. 1832, *Revisio Generum Plantarum* 2: 583. 1891, *Bulletin de la Société Botanique de France* 40: 77. 1893 and *J. Nat. Prod.* 44(5): 569–72. 1982, *Planta Med.* 51(5): 368–371. 1985, *Planta Med.* 59(1): 32–6. 1993, *Cell and Chromosome Research* 16: 38. 1993, *Cytologia* 60: 407–409. 1995, *J. Ethnopharmacol.* 58(1): 31–38. 1997, *J. Zhejiang Univ. Sci. B.* 6(8): 849–852. 2005

(Used in Ayurveda. Bark juice useful in gout, rheumatism, diarrhea and for stopping vomiting. Powder of dried wood or oil in clothes against moths and cockroach. Decoction of rooted parts of the stem drunk for influenza. Sedative, central nervous system depressant, cytotoxic, antiallergic. The wood stomachic, used in gastralgia, colic and nervous vomiting. Magico-religious beliefs, plant used as bed and pillow believing that all diseases get cured by sleeping on this.)

in English: agarwood, aloeswood, aloewood, eaglewood, Indian aloewood, Malayan aloewood, Malayan eaglewood, wood of the Gods

in French: bois d'aigle

in Burma: agar

in China: chen xiang, chen hsiang, mi hsiang

in Indonesia: gaharu, kikaras, mengkaras

in Japan: Jinkoh

in Malaysia: gaharu, jual bibit gaharu, karas, kayu gaharu, kelambak, kekaras, tabak, tengkaras, tui karas

in Tibetan: a ga ru, a ka ru nag po, agar go-snyod, agaru, arbazhig, arnag, arskya

in Vietnam: tr[aaf]m h[uw] [ow]ng

Aquilaria sinensis (Lour.) Merr. (*Agallochum sinense* (Lour.) Kuntze; *Aquilaria sinensis* (Lour.) Spreng.; *Aquilaria sinensis* (Lour.) Gilg.; *Ophispermum sinense* Lour.)

China. Evergreen large tree, coarse reddish brown scented wood, young shoots pilose, greenish flowers, perianth hairy outside and densely villous inside, ovary tawny-tomentose, slightly compressed capsules obovate-cuneate

See *Encyclopédie Méthodique, Botanique* 1: 48–49. 1783, *Flora Cochinchinensis* 1: 258, 280–281. 1790, *Systema Vegetabilium* 2: 356. 1825, *Revisio Generum Plantarum* 583. 1891 and *Philippine Journal of Science* 15(3): 248. 1919 [1920], *Chem. Pharm. Bull.* (Tokyo). 51(5): 560–564. 2003

(Cytotoxic. The wood stomachic, used in gastralgia, colic and nervous vomiting.)

in English: agarwood, Chinese agaru, Chinese eaglewood

in China: chen xiang

Aquilegia L. Ranunculaceae

From the Latin *aquila*, *ae* ‘an eagle’, referring to the petals or spurs, see *Species Plantarum* 1: 533–534. 1753 and Munz, P.A. “The cultivated and wild columbines.” *Gentes Herb.* 7: 1–150. 1946, *Brittonia* 33(3): 309–324. 1981, *Novosti Sist. Vyssh. Rast.* 30: 15, 17–19, 21, 24, 27. 1996.

Aquilegia canadensis Linnaeus (*Aquilegia australis* Small; *Aquilegia canadensis* var. *australis* (Small) Munz; *Aquilegia canadensis* var. *coccinea* (Small) Munz; *Aquilegia canadensis* var. *eminens* (Greene) B. Boivin; *Aquilegia canadensis* var. *hybrida* Hook.; *Aquilegia canadensis* var. *latiuscula* (Greene) Munz; *Aquilegia coccinea* Small; *Aquilegia latiuscula* Greene; *Aquilegia phoenicantha* Cory)

North America. Perennial herb

See *Sp. Pl.* 1: 533–534. 1753, *Gen. Pl.* ed. 5, 237. 1754, *Bulletin of the Torrey Botanical Club* 25(9): 466. 1898, *Bulletin of the New York Botanical Garden* 1(4): 280–281. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363/367): 321. 1914, Payson, E.B. “The North American species of *Aquilegia*.” *Contr. U.S. Natl. Herb.* 20: 133–157. 1918, *American Midland Naturalist* 50: 510. 1953

(Infusions from various parts of plants to treat heart trouble, kidney problems, headaches, bladder problems and fever, and as a wash for poison ivy. Ceremonial, magico-religious beliefs, ritual, powdered seeds used as love charms; and a compound used to detect bewitchment.)

in North America: ancolie du Canada, Canadian columbine, columbine, honeysuckle, meeting-houses, red columbine, skalikatit, skarikatit, wild columbine

Aquilegia coerulea E. James (*Aquilegia caerulea* E. James)

North America. Perennial herb, bushy, several stems, compound palmate leaves, rounded leaflets, five-pointed petal-like sepals

See *Account Exped. Pittsburgh.* 2: 15. 1823 and *Evolution* 35: 763–774. 1981

(Analgesic, seeds chewed or used an infusion made from the roots to treat abdominal pains.)

in English: Colorado blue columbine

Aquilegia desertorum (M.E. Jones) Cockerell ex A. Heller (*Aquilegia formosa* Fischer ex DC. var. *desertorum* M.E. Jones; *Aquilegia triternata* Payson)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* [DC.] 1: 50. 1824, *Contributions to Western Botany* 8: 2. 1898 and *Muhlenbergia* 1(2): 27. 1901, *Contributions from the United States National Herbarium* 20(4): 147–148. 1918

(*Aquilegia desertorum* very similar to *Aquilegia canadensis*. Ceremonial.)

in English: Chiricahua Mountain columbine

Aquilegia elegantula Greene

North America. Perennial herb

See *Pittonia* 4(20B): 14–15. 1899

(Plant infusion as a blood purifier.)

in English: western red columbine

Aquilegia eximia Van Houtte ex Planch. (*Aquilegia eximia* Borbás; *Aquilegia fontinalis* J.T. Howell)

North America. Perennial herb

See *Journal Général d'Horticulture* 12: 13, pl. 1188. 1857 and *Leaflets of Western Botany* 2(14): 254–255. 1940

(Ceremonial, flowers used in dance wreathes.)

in English: Van Houtte's columbine

Aquilegia formosa Fischer ex DC. (*Aquilegia formosa* fo. *anomala* J.T. Howell; *Aquilegia formosa* var. *communis* B. Boivin; *Aquilegia formosa* var. *fosteri* S.L. Welsh; *Aquilegia formosa* var. *hypolasia* (Greene) Munz; *Aquilegia formosa* var. *megalantha* B. Boivin; *Aquilegia formosa* var. *pauciflora* (Greene) Payson; *Aquilegia formosa* var. *pauciflora* (Greene) Boothman; *Aquilegia formosa* var. *truncata* (Fisch. & C.A. Mey.) M.E. Jones; *Aquilegia formosa* var. *wawawensis* (Payson) H. St. John; *Aquilegia fosteri* (S.L. Welsh) S.L. Welsh; *Aquilegia mohavensis* Munz; *Aquilegia shockleyi* Eastw.)

North America. Perennial herb

See *Prodr.* 1: 50. 1824, *Index Sem. Hort. Petrop.* 9, suppl.: 8. 1844, *Gard. Chron.* ser. 2, 10: 111. 1878, *Zoë* 4(3): 259. 1893 and *Leaflets of botanical observation and criticism* 1(5): 76. 1904, *Leafl. Bot. Observ. Crit.* 2(7): 141–142. 1911, *Contributions from the United States National Herbarium* 20(4): 144. 1918, *Leaflets of Western Botany* 2(14): 255. 1940, *Genes Herb.* 7: 106. 1946

(Seeds chewed to alleviate stomachaches; leaves chewed or used in infusions to treat coughs, colds and sore throats. Magico-religious beliefs, used as a love charm.)

in English: western columbine

Aquilegia fragrans Benth.

Northern India, Western Himalayas. Herbaceous perennial, many-branched, sweet scented short-spurred creamy yellow flowers, near moist places

See *Botanist* 4: pl. 181. 1840, *Journal of the Linnean Society, Botany* 18: 31. 1881, *Journal of the Asiatic Society of Bengal* 60(1/2): 305. 1893 and *Pak. J. Bot.* 40(1): 43–58. 2008

(Whole plant used for pneumonia fever and headache. Powdered seeds for jaundice.)

in English: fragrans columbine, sweet-scented columbine

in India: zadud-dorje

in Pakistan: ghamuk phoonar

Aquilegia micrantha Eastw. (*Aquilegia ecalcarata* Maxim. subsp. *micrantha* (Eastw.) Payson; *Aquilegia ecalcarata* var. *micrantha* (Eastw.) Payson; *Aquilegia ecalcarata* var. *micrantha* (Eastw.) Payson ex Kearney & Peebles; *Aquilegia flavescens* S. Watson var. *rubicunda* (Tidestr.) S.L. Welsh; *Aquilegia micrantha* var. *mancosana* Eastw.)

North America. Perennial herb

See *Report of the geological exploration of the fortieth parallel*: vol. 5, Botany. Washington, 10. 1871, *Flora Tangutica* 20, pl. 8, f. 12. 1889, *Proceedings of the California Academy of Sciences*, Series 2, 4: 559–560, pl. 19. 1895, *Proceedings of the California Academy of Sciences*, Series 3, 1: 77. 1897 and *Torreya* 2(5): 75. 1902, *American Midland Naturalist* 1: 168. 1910, *Contributions from the United States National Herbarium* 20(4): 154. 1918, *Flowering Plants and Ferns of Arizona* 318. 1942, *Great Basin Naturalist* 46(2): 259. 1986

(Hemostatic, used to deliver placenta.)

in English: Mancos columbine

Aquilegia micrantha Eastw. var. *micrantha*

North America. Perennial herb

See *Report of the geological exploration of the fortieth parallel*: vol. 5, Botany. Washington, 10. 1871, *Proceedings of the California Academy of Sciences*, Series 2, 4: 559–560, pl. 19. 1895, *Proceedings of the California Academy of Sciences*, Series 3, 1: 77. 1897 and *Torreya* 2(5): 75. 1902, *American Midland Naturalist* 1: 168. 1910, *Contributions from the United States National Herbarium* 20(4): 154. 1918, *Great Basin Naturalist* 46(2): 259. 1986

(Hemostatic, used to deliver placenta.)

in English: Mancos columbine

Aquilegia vulgaris L. (*Aquilegia longisepala* Zimm.; *Aquilegia longisepala* Zimm. ex Borbás; *Aquilegia vulgaris* Richardson; *Aquilegia vulgaris* Thunb.)

Europe.

See *Sp. Pl.* 1: 533. 1753, *Fl. Jap.* (Thunberg) 232. 1784 and *Regnum Veg.* 127: 20. 1993, *PTR. Phytotherapy research* 17(6): 691–696. 2003

(Plant is poisonous, toxic. Herb antiscorbutic, sedative, anti-emetic, hepatoprotective, astringent, depurative, diaphoretic, diuretic, parasiticide, homeopathic remedy, used in the

treatment of affections of the nervous system. Boiled wooden pieces used to cure vomiting. Seeds to cure jaundice.)

in English: common columbine, European columbine, European crowfoot, garden columbine, garden crowfoot

in North America: ancolie vulgaire, columbine

in India: agar, baker

Arabidopsis Heynh. Brassicaceae (Cruciferae)

Resembling the genus *Arabis* L., see Carl Linnaeus, *Species Plantarum*. 664. 1753 and *Genera Plantarum*. Ed. 5. 298. 1754, *Regni Vegetabilis Systema Naturale* 2: 480. 1821, *Flora von Sachsen* 1(2): 538. 1842, Schur, Philipp Johann Ferdinand (1799–1878), *Enumeratio Plantarum Transsylvanicae Index*. Vindobonae, 1866 and *Flora von Steiermark* 1: 477. 1908, *Svensk Botanisk Tidskrift* 55: 211. 1961, *Turczaninowia* 3(3): 20. 2000.

Arabidopsis thaliana (L.) Heynh. (*Arabis thaliana* L.; *Crucifera thaliana* (L.) E.H.L. Krause; *Crucifera thaliana* E.H.L. Krause; *Hesperis thaliana* (L.) Kuntze; *Hesperis thaliana* Kuntze; *Sisymbrium thalianum* (L.) Gaudin; *Sisymbrium thalianum* J. Gay; *Sisymbrium thalianum* (L.) J. Gay & Monnard; *Sisymbrium thalianum* (L.) J. Gay & Monn.; *Sisymbrium thalianum* (L.) Gaudin; *Stenophragma thalianum* (L.) Čelak.; *Stenophragma thalianum* Čelak.)

Europe. Annual herb, petiolate radical leaves, minute flowers in lax racemes

See *Species Plantarum* 2: 657–660, 665. 1753, *Annales des Sciences Naturelles (Paris)* 7(4): 399. 1826, *Flora Helvetica* 4: 348. 1829, *Flora von Sachsen* 1: 538. 1842, *Archiv für die Naturwissenschaftliche Landesdurchforschung von Böhmen* 3: 445. 1875, *Revisio Generum Plantarum* 2: 935. 1891 and *Deutschlands Flora, Abtheilung II, Cryptogamie* 6: 31, 86. 1902

(Used to cure sores in the mouth.)

in English: mouse-ear cress, thale cress

in China: shu er jie

Arabis L. Brassicaceae (Cruciferae)

From Arabia; see Carl Linnaeus, *Species Plantarum*. 2: 664–666. 1753 and *Genera Plantarum*. Ed. 5. 298. 1754, *Handb. Gewachsk.* (ed. 2) 2(1): 1150. 1828, *Flora Altaica* 3: 19. 1831, *Handbuch des Natürlichen Pflanzensystems* 260. 1837 and *Notes from the Royal Botanic Garden, Edinburgh* 22(3): 207. 1957, *Willdenowia* 13: 283. 1983[1984], *Anales del Jardín Botánico de Madrid* 50(1): 147. 1992, *Harvard Papers in Botany* 13(2): 290. 2008.

Arabis chinensis Rottl. ex Wight

India.

See *Illustrations of Indian Botany*; or Figures Illustrative of Each of the Natural Orders of Indian Plants... [Wight, Robert] 1840–1850

(Used in Ayurveda.)

in English: country cress

in India: aliverie, rohita sarushapa

Arachis L. Fabaceae (Aeschynomeneae)

An old Greek plant name, *arakos*, *arachos*, used by Theophrastus (*HP*. 8.8.3 and 1.6.12) for a kind of vetch, a leguminous weed growing among lentils; see Carl Linnaeus, *Species Plantarum*. 741. 1753 and *Genera Plantarum*. Ed. 5. 329. 1754 and *U.S. Dept. Agric. Mon.* 19: 14. 1954, *Euphytica* 21: 81. 1972, *Euphytica* 29: 815. 1980, *Plant Resources of South-East Asia* No 1. Pulses. Pudoc, Wageningen, Netherlands. pp. 35–39. 1989, *Bonplandia* 8(1–4): 1–186. 1994.

Arachis hypogaea L. (*Arachis hypogaea* subsp. *oleifera* A. Chev.; *Arachis hypogaea* fo. *nambyquarae* (Hoehne) F.J. Herm.; *Arachis hypogaea* subsp. *nambyquarae* (Hoehne) Chevalier; *Arachis hypogaea* var. *nambyquarae* (Hoehne) Burkart; *Arachis nambyquarae* Hoehne) (The Nambiquara tribe, also spelled Nambikwara, reside in the southwestern part of the Brazilian Amazon.)

South America. Annual non-climbing herb, creeping, erect or prostrate, well-developed taproot with many lateral roots, leaves 4-foliolate, flowers yellow orange

See *Species Plantarum* 2: 741. 1753 and *Comissão de Linhas Telegraficas, Botanica* 74(12): 21, t. 190. 1922, *Revue de Botanique Appliquée et d'Agriculture Tropicale* 13: 770, 772. 1933, *Darwiniana* 3(2): 281. 1939, *Ciencia e Cultura (Sao Paulo)* 28: 252. 1976, *Euphytica* 28: 675–684. 1979, *Indian Journal of Genetics and Plant Breeding* 41: 161–163. 1981, *Cytologia* 47: 585–594. 1982, *Cytologia* 48: 139–151, 505–509, 565–568. 1983, *Food and chemical toxicology* 22(6): 431–417. 1984, *Cytologia* 51: 617–629. 1986, *Sci. Rep. Res. Inst. Evol. Biol.* 3: 57–71. 1986, *Genome* 29: 187–194. 1987, *Acta Agronomica Sinica* 14: 284–289. 1988, *Bulletin of the Hiroshima Agricultural College* 8: 691–706. 1989, *Cytologia* 54: 51–64. 1989, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Annals of the Missouri Botanical Garden* 81: 792–799. 1994, *The Journal of Allergy and Clinical Immunology* 98(2): 241–250. 1996, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998, Bronckart Y. et al. “Grading dysplasia in colorectal adenomas by means of the quantitative binding pattern determination of *Arachis hypogaea*, *Dolichos biflorus*, *Amaranthus caudatus*, *Maackia amurensis*, and *Sambucus nigra* agglutinins.” *Hum. Pathol.* 30(10): 1178–91. 1999, *Plant Systematics and Evolution* 214: 251–262. 1999, *International Journal of toxicology* 20 Suppl 2: 65–77. 2001, *Nutrition and Cancer* 48(1): 15–21. 2004, *Journal*

of *Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 93: 231–241. 2004

(Used in Ayurveda and Sidha. Risk of liver cancer associated with aflatoxin ingestion from peanuts; aflatoxins and hepatitis B virus (HBV) infections are important risk factors of hepatocellular carcinoma (HCC). Moldy groundnuts may contain toxic substances, aflatoxin, the most important toxin found in moldy groundnuts, produced by the fungus *Aspergillus flavus*. Peanuts are the food most likely to produce allergic and anaphylactic reactions. Plant emollient and demulcent, used to relieve cough. Leaf macerations drunk as a diuretic; leaf infusions drunk against female infertility and as eye drops to treat cataract. Pod extracts taken as a galactagogue, and as eye drops to treat conjunctivitis. Seedlings and pod extract aphrodisiac, tonic. Seed oil emollient, laxative; seeds soaked overnight and the filtrate taken orally to cure schistosomiasis, also called bilharzia or bilharziosis. Veterinary medicine.)

in English: Cajun peanut, Chinese nut, earth-nut, goober, goober pea, grass-nut, groundnut, mani, Manila nut, monkeynut, peanut, pindar, runner peanut, Spanish peanuts, Valencia peanut, Virginia peanut

Araiostegia Copel. Davalliaceae

From the Greek *araios* 'thin, slender, narrow, scanty' and *stegē*, *stegos* 'roof, cover', see *Philippine Journal of Science* 34(3): 240–242, pl. 1, 2. 1927, *Univ. Calif. Publ. Bot.* 16. 97, 12. 399. 1931.

Araiostegia delavayi (Bedd. ex C.B. Clarke & Baker) Ching (*Araiostegia delavayi* (Bedd.) Ching; *Davallia pulchra* D. Don var. *delavayi* Bedd. ex C.B. Clarke & Baker; *Leucostegia delavayi* (Bedd. ex C.B. Clarke & Baker) Ching; *Leucostegia delavayi* (Bedd.) Ching)

China, Nepal.

See *Journal of the Linnean Society, Botany* 24(164): 410. 1888 and *Index Filicum*, Supplementum Tertium 120. 1934, *Flora Reipublicae Popularis Sinicae* 2: 289. 1959

(Rhizome juice given in case of fever.)

in Nepal: miramire unyu

Aralia L. Araliaceae

From *aralie*, an old French-Canadian or American-Indian (possibly Iroquoian) name; see Carl Linnaeus, *Species Plantarum*. 1: 273–274. 1753 and *Genera Plantarum*. Ed. 5. 134. 1754, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 19. 1896.

Aralia armata (Wall. ex G. Don) Seem. (*Aralia tengyuehensis* C.Y. Wu; *Aralia thomsonii* Seemann ex C.B. Clarke var. *glabrescens* C.Y. Wu; *Panax armatus* Wall. ex G. Don)

Himalaya, Indochina, India. Shrub or small tree

See *J. Bot.* 6: 134. 1868 and *Fl. Yunnanica* 2: 493, 498. 1979, *Tropical Ecology* 46(2): 241–251. 2005

(Saponins from root bark; ground bark applied on skin diseases.)

in China: ye cong tou, guang dong song mu

in India: akawatong kurak, dieng-ta-tymphu, singnung, naosek-manbi

Aralia cachemirica Decne.

India, Himalaya. Shrub, eaten by goats

See *Voyage dans l'Inde* (Jacquem.) 4: 72. 1841

(Roots hypoglycemic, antipyretic.)

in India: banakhor, khoree

Aralia californica S. Watson (*Aralia californica* var. *acuminata* S. Watson; *Aralia racemosa* var. *occidentalis* Torr.)

North America. Perennial herb

See *Proc. Amer. Acad. Arts* 11: 144. 1876

(Decoction of roots, antirheumatic, as a wash for sores and itching sores, taken for cough, lung diseases, colds, fevers, consumption, stomach diseases.)

in English: California spikenard

Aralia cordata Thunberg (*Aralia schmidtii* Pojark.; *Aralia taiwaniana* Y.C. Liu & F.Y. Lu)

Temp. E. Asia, China, Japan.

See *Species Plantarum* 1: 273–274. 1753, *Flora Japonica*, ... 127. 1784 and *Flora URSS* 16: 588. 1950, *Quarterly Journal of Chinese Forestry* 9(2): 136. 1976, *Journal of Hokkaido University of Education: Section IIB* 36: 25–40. 1985, *Botaniceskij Žurnal SSSR* 71: 1572–1575. 1986, *Korean Journal of Plant Taxonomy* 18: 291–296. 1988, *Chem. (Root diaphoretic, cathartic, diuretic, tonic, blood purifier, pectoral and stimulant; externally used as a poultice in treating rheumatism, boils and carbuncles, swellings, sores, burns, itchy skin, pimples, wounds, infections, ulcers and skin problems; used internally in the treatment of pulmonary diseases, cough, asthma, diabetes, rheumatism, cystitis, stomachache, kidney disorders. Infusion of leaves anticonvulsive. Rhizome aromatic.)

in English: bristly sarsaparilla, dwarf-elder, false sarsaparilla, shot bus, wild liquorice, wild sarsaparilla

Aralia racemosa L. (*Aralia racemosa* f. *foliosa* (Vict. & Rousseau) Scoggan; *Aralia racemosa* var. *foliosa* Vict. & Rousseau)

North America. Perennial subshrub or herb, sweet pungent tonic

See *Sp. Pl.* 1: 273. 1753 and *Contr. Inst. Bot. Univ. Montréal* 36: 37. 1940, *Fl. Canada* 1: 52. 1978

(Root diaphoretic, diuretic, pectoral and stimulant, abortifacient; used internally in the treatment of pulmonary diseases, tuberculosis, cough and whooping cough, asthma, rheumatism, diarrhea, diabetes, venereal disease; externally as a poultice in treating rheumatism and eczema, boils, wounds, sores, burns, itchy skin, ulcers, cuts, swellings, sore eyes. Infusion of roots and berries taken as a diaphoretic, antiseptic; berries and root stimulant, expectorant. Chewed plant anthelmintic.)

in English: American spikenard

Aralia racemosa L. subsp. *racemosa*

North America. Perennial subshrub or herb, sweet pungent tonic

See *Sp. Pl.* 1: 273. 1753 and *Contr. Inst. Bot. Univ. Montréal* 36: 37. 1940, *Fl. Canada* 1: 52. 1978

(Root diaphoretic, diuretic, pectoral and stimulant, abortifacient; used internally in the treatment of pulmonary diseases, tuberculosis, cough and whooping cough, asthma, rheumatism, diarrhea, diabetes, venereal disease; externally as a poultice in treating rheumatism and eczema, boils, wounds, sores, burns, itchy skin, ulcers, cuts, swellings, sore eyes. Infusion of roots and berries taken as a diaphoretic, antiseptic; berries and root stimulant, expectorant. Chewed plant anthelmintic.)

in English: American spikenard

Aralia spinosa L. (*Aralia georgica* Miq.; *Aralia leroana* K. Koch; *Aralia spinosa* f. *subinermis* Moldenke; *Aralia spinosa* var. *glabra* Nutt. ex Miq.; *Aralia spinosa* var. *inermis* Pursh; *Chaerophyllum arborescens* L.)

North America. Perennial tree or shrub, prickly, leaves alternate 2-pinnately divided, white flowers in large terminal clusters, black berries

See *Species Plantarum* 1: 259, 273–274. 1753, *Fl. Amer. Sept.* (Pursh) 1: 209. 1813, *Ann. Mus. Bot. Lugduno-Batavi* 1: 7, 8. 1863 and *Castanea* 9: 54. 1944, *Bot. Commelins* 47. 1983, *Am. J. Bot.* 86(12): 1677–1682. 1999

(Low toxicity if eaten. The green bark irritates the hands, and the plant is armed with stout prickles; skin irritation from bark and roots; green roots considered poisonous. Fresh bark causes vomiting and purging, but dried is a stimulating alterative; a tincture made from the bark used for rheumatism, skin diseases and syphilis. Carminative, tonic, used for rheumatism, venereal diseases.)

in English: American angelica tree, Angelica tree, devil's walking stick, Hercules' club, prickly ash, prickly elder, toothache tree

Aralia thomsonii Seem. ex C.B. Clarke (*Aralia thomsonii* Seem.)

China, India, Himalaya. Tender shoots eaten

See *J. Bot.* 6: 134. 1868, *The Flora of British India* 2(6): 723. 1879

(Astringent, diaphoretic, antiseptic.)

in China: yun nan cong mu

in India: mayangtoklo tetzula

(*Araucaria araucana* is armed with rigid sharply pointed leaves. Antifungal, antimicrobial and antibacterial. Resin of *Araucaria araucana* used to treat ulcers and wounds, and has been shown to display a gastroprotective effect in animal models.)

in English: araucaria, Chile pine, house pine, monkey puzzle tree, Norfolk Island pine

Araujia Brotero Asclepiadaceae

After the Portuguese Antonio de Araujo de Azevedo, d. 1817, a patron of botany; see John Dryden, *Ode ... para o dia de Santa Cecilia*. Traduzida em Portugues. [Translation by A. de Araujo] Hamburg 1799; R. da C. Gouvea, *Reposta publica a denuncia secreta que tem por titulo “Representação que a Sua Magestade fez Antonio de Araujo de Azevedo em 1810.”* Londres 1820; José Zephyrino de Menezes Brum, *Do Conde da Barca, de seus escriptos e livraria*. Rio de Janeiro 1877; Felix de Silva Avellar (1744–1828), in *Transactions of the Linnean Society of London*. 12: 62. 1818. According to some authors the genus was derived from a Brazilian or South American vernacular name. See Alberto Lofgren, “Ensayo para una sinonimia dos nomes populares das plantas indigenas do estado de São Paulo.” *B. da Comissão Geographica e Geologica do estado de São Paulo*. São Paulo 10: 3–115. 1894; Paulo de T. Alvim-Carneiro, “Plantas venenosas e sua ocorrência em Minas Gerais.” *Ceres*. 6(34): 221–256. Viçosa 1945.

Araujia sericifera Brot. (*Araujia hortorum* E. Fourn.; *Araujia sericifera* fo. *hortorum* (E. Fourn.) Augusto & Edesio; *Araujia sericifera* fo. *hortorum* (E. Fourn.) Malme; *Araujia sericifera* var. *hortorum* (E. Fourn.) Malme; *Physianthus albens* Mart.)

South America.

See *Transactions of the Linnean Society of London* 12: 62–70, pl. 4–5. 1817, *Nova Genera et Species Plantarum* ... 1: 54. 1824, *Flora* 7(1) Beil. (4): 134. 1824, *Bot. Mag.* 60: t. 3201. 1833, *Flora Brasiliensis* 6(4): 293. 1885 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(7): 74, t. 3, f. 7. 1900, *Fl. (Skin irritant properties of the milky sap. Moth plant allergy.)

in English: bladder flower, cruel plant, donkey's apple, milkweed, moth catcher, moth plant, stranglehold plant, tennis court creeper, white moth plant

in South Africa: melkbol, melktou(bos), motvanger

in Brazil: cipó-de-sapo

Arbutus L. Ericaceae

The old Latin name *arbutus*, *i* for the wild strawberry-tree, *Arbutus unedo* L.; Greek *memekylon*, ancient name for the fruit of *Arbutus unedo*, the strawberry tree, Latin *memecylon*, *i* 'the edible fruit of the strawberry-tree' (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 349, 395. 1753, *Genera Plantarum*. Ed. 5. 166, 187. 1754, *Flore portugaise* ou description de toutes les ... 1: 415–416. 1809 and *N. Amer. Fl.* 29: 82. 1913, *Fl. Neotrop.* 66: 194–221. 1995.

Arbutus andrachne L.

Mediterranean.

See *Syst. Nat.*, ed. 10. 2: 1024. 1759 and *Bocconea* 11: 117–169. 1999

(Fruits and leaves antiseptics, diuretics, antioxidant and laxatives, antibiotic, astringent, diaphoretic.)

Arbutus menziesii Pursh (after Archibald Menzies, naval surgeon and plant collector in Western Australia.)

North America. Perennial tree

See *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 282. 1813 and *Syesis* 10: 125–138. 1977

(Plant eaten as emetic. Bark infusion for diabetes, cuts and wounds; bark decoction as a wash for skin diseases, ulcers and sores, also a gargle for sore throat. Leaves used for stomach ailments, burns, wounds; chewed for stomachache, sore throat and cold; an infusion for cold and cough. Ceremonial, ritual, leaves used in the puberty ceremony; flowers as love charm.)

in English: madrone, Pacific madrone

Arbutus unedo L. (*Unedo edulis* Hoffmanns. & Link)

Europe. Treelet, food

See *Species Plantarum* 1: 395. 1753 and *Taxon* 31: 343–344. 1982, *Regnum Veg.* 127: 29. 1993, *Phytotherapy Research* 20(2): 135–139. 2006, *Journal of Ethnopharmacology* 116(2): 288–295. 2008, *Medicinal Chemistry* 4(3): 219–228.

2008, *Pharmazie.* 64(10): 656–659. 2009, *J. Med. Food.* 13(4): 1013–1018. 2010

(Fruits and leaves antiseptics, antioxidant, diuretics and laxatives, antibiotic, astringent, diaphoretic. Reputed to treat arterial hypertension, used in the preventive or therapeutic treatment of platelet aggregation linked to arterial hypertension.)

in English: arbutus, cane-apples, strawberry-tree

Arcangelisia Beccari Menispermaceae

For the Italian botanist Giovanni Arcangeli, 1840–1921, Director of the Botanical Gardens of Torino (1879–1883) and Pisa (1881–1915); see *Malesia Raccolta* ... 1: 145. 1877, O. Mattiolo, *Cenni cronologici sugli Orti Botanici di Firenze.* in Pubblicazioni R. Ist. Studi Superiori Pratici e di Perfezionamento, Sez. Scienze Fis. Natur. Firenze 1899 and Oreste Mattiolo (1856–1947), *Cronistoria dell'Orto Botanico della Regia Università di Torino.* in *Studi sulla vegetazione nel Piemonte* pubblicati a ricordo del II Centenario della fondazione dell'Orto Botanico della R. Università di Torino. Checchini, Torino 1929, G. Martinoli, "L'Orto Botanico di Pisa." *Agricoltura* 7: 59–66. Roma 1963, John H. Barnhart, *Biographical Notes upon Botanists.* 1: 71. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 13. 1972, Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement I: A-Ba.* 143–145. ["Director botanical garden of Firenze 1877–1878."] Königstein 1992.

Arcangelisia flava (L.) Merr. (*Anamirta lourieri* Pierre; *Arcangelisia lemniscata* (Miers) Becc.; *Arcangelisia lemniscata* Becc.; *Arcangelisia loureiri* (Pierre) Diels; *Arcangelisia loureiroi* Diels)

China, Thailand, Malaysia, Indonesia. Woody, glabrous, robust liana, yellow wood exuding yellow sap when cut, leaves coriaceous, paniculate slender inflorescence axillary or cauliflorous, flowers unisexual, petals absent, fruit a slightly laterally compressed yellow drupe, endocarp woody, fruits eaten and dispersed by primates, common in forest, near riverbanks, on limestone

See *Herbarium Amboinense* 18. 1754, *Malesia* 1: 147. 1877 and *Pflanzenr.* (Engler) *Menispermac.* 104, 106. 1910, *An Interpretation of Rumphius's Herbarium Amboinense* 222. 1917, Yanpaisan, W. "The effect of phytohormones and some additives on tissue culture establishment and in vitro production of alkaloids from *Arcangelisia flava* Merr." *Journal of the National Research Council of Thailand* 21(1): 1–27. 1989

(Antiseptic, stomachic, febrifuge, expectorant, tonic and emmenagogue. A stem decoction taken internally for jaundice, worms, indigestion and other intestinal complaints. A decoction of the wood used to clean wounds, ulcers and other skin irritations. Sap from cut stems drunk against fever and sprue. Flowers used to treat dysentery. The smoke from the

burning wood inhaled for troubles of the mucous membrane of the nose and mouth. Alkaloids.)

in English: yellow-fruited moonseed

in Indonesia: akar kuning, areuy ki koneng, daun bulan, kaju seriawan, sirawan

in Malaysia: mengkunyt

in Philippines: abutra, suma

in Thailand: kamphaeng jedchunum, khamin khrua

in Vietnam: v[ar]y d[aws]ng

Arcangelisia gusanlung Lo (*Arcangelisia loureiri* auct. non (Pierre) Diels)

China. Large woody vines

See *Acta Phytotax. Sin.* 18(1): 100, fig. 1. 1980, *Phytochemistry* 39(2): 439–442. 1995

(Alkaloids, stomachic, febrifuge.)

in China: gu shan long

Arceuthobium M. Bieb. Viscaceae (Loranthaceae)

Greek *arkeuthos* ‘juniper’ and *bios* ‘life’, referring to the habitat (usually on *Juniperus*, *Abies*, *Pinus*), see *Flora Taurico-Caucasica* 3: 629–630. 1819.

Arceuthobium americanum Nutt. ex Engelm. (*Arceuthobium americanum* Nutt.; *Arceuthobium americanum* Nutt. ex A. Gray)

North America. Parasite, yellow-green, fruits blue-gray

See *Boston J. Nat. Hist.* 6: 214. 1850 and *Taxon* 31: 120–126. 1982

(Antihemorrhagic, decoction taken for tuberculosis, lung and mouth hemorrhages.)

in English: American dwarf mistletoe, Christmas mistletoe, lodgepole-pine dwarf mistletoe

Arceuthobium campylopodum Engelm. (*Razoumofskya campylopoda* (Engelm.) Kuntze; *Razoumofskya campylopoda* Kuntze)

USA, Mexico.

See *Boston J. Nat. Hist.* 6(2): 214. 1850, *Revisio Generum Plantarum* 2: 587. 1891

(Ritual, spiritual, cold infusion used internally and externally as ceremonial medicine.)

in English: western dwarf mistletoe

Arceuthobium minutissimum Hook. f.

India, Himalaya.

See *The Flora of British India* [J.D. Hooker] 5(13): 227. 1886

(Plant decoction taken for stomachache.)

Arceuthobium occidentale Engelm. ex S. Watson (*Razoumofskya occidentalis* (Engelm. ex S. Watson) Kuntze; *Razoumofskya occidentalis* Kuntze; *Razoumofskya occidentalis* (Engelm.) Kuntze)

North America.

See *Geological Survey of California, Botany* 2: 107. 1880, *Revisio Generum Plantarum* 2: 587. 1891

(Decoction of plant taken for stomachache.)

in English: digger pine dwarf mistletoe, gray pine dwarf mistletoe

Arceuthobium pusillum Peck (*Razoumofskya pusilla* (Peck) Kuntze; *Razoumofskya pusilla* Kuntze)

Eastern Canada, eastern United States.

See *Annual Report of the New York State Museum* 1875: 112. 1875, *Revisio Generum Plantarum* 2: 587. 1891 and *Taxon* 31: 120–126. 1982, Kiu Hua-shing. *Viscoideae*. In: Kiu Hua-shing & Ling Yeou-ruenn, eds., *Fl. Reipubl. Popularis Sin.* 24: 139–158. 1988

(All-healing, for the treatment of epilepsy. Magico-religious beliefs, ritual.)

in English: dwarf mistletoe, eastern dwarf mistletoe

Arceuthobium vaginatum (Humb. & Bonpl. ex Willd.) J. Presl (*Arceuthobium cryptopodum* Engelm.; *Arceuthobium vaginatum* J. Presl; *Arceuthobium vaginatum* (Kunth) Eichler; *Arceuthobium vaginatum* (Willd.) J. Presl; *Arceuthobium vaginatum* f. *cryptopodum* (Engelm.) L.S. Gill; *Arceuthobium vaginatum* subsp. *cryptopodum* (Engelm.) Hawksw. & Wiens; *Arceuthobium vaginatum* var. *cryptopodum* (Engelm.) B.L. Turner; *Arceuthobium vaginatum* var. *cryptopodum* (Engelm.) Cronquist; *Viscum vaginatum* Humb. & Bonpl. ex Willd.; *Viscum vaginatum* Spreng.; *Viscum vaginatum* Humb. & Bonpl.)

North America.

See *Species Plantarum*. Editio quarta [Willdenow] 4(2): 740. 1806, *Nova Genera et Species Plantarum* (quarto ed.) 3: 445. 1820, *Syst. Veg.* (ed. 16) [Sprengel] 1: 487. 1824 [dated 1825; publ. in late 1824], *Boston J. Nat. Hist.* 6: 214. 1850, *Flora Brasiliensis* 5(2): 105. 1868 and *Brittonia* 17: 230. 1965, *Intermount. Fl.* [Cronquist et al.] 3(A): 253. 1997

(Decoction of plant used as a ceremonial medicine.)

in English: pineland dwarf mistletoe

Archangelica Wolf Apiaceae (Umbelliferae)

Dedicated to the Archangel Raphael, Latin *archangelus* and Greek *archaggelos* for an archangel, *Archangelica* is closely allied to *Angelica* L., see *Genera Plantarum* 32. 1776.

Archangelica brevicaulis (Ruprecht) Reichenbach (*Angelica brevicaulis* (Ruprecht) B. Fedtschenko; *Angelocarpa brevicaulis* Ruprecht; *Coelopleurum brevicaulis* (Ruprecht) Drude)

China.

See *Sertum Tianschanicum* 48. 1869, *Journal of Botany, British and Foreign* 14(158): 45–47. 1876, *Die Natürlichen Pflanzenfamilien* 3(8): 212. 1898 and *Enum. Pl. Turkest.* 3: 99. 1909

(Roots used as a substitute for the traditional Chinese medicine *du huo*, see *Angelica biserrata*.)

in China: duan jing gu dang gui

Archangelica decurrens Ledebour (*Angelica archangelica* var. *decurrens* (Ledebour) Weinert; *Angelica decurrens* B. Fedtsch.; *Angelica officinalis* var. *decurrens* (Ledebour) Avé-Lallemant)

Eurasia.

See *Species Plantarum* 1: 250–251. 1753, *Flora Altaica* 1: 316–317. 1829

(Wounds healing.)

in China: xia yan ye gu dang gui

Archibaccharis Heering Asteraceae

Greek *arche* ‘first, beginning’ plus the genus *Baccharis* L., see *Phytologia* 32(2): 81–194. 1975, *Amer. J. Bot.* 86(7): 1003–1013. 1999.

Archibaccharis schiedeana (Benth. in Oerst.) J.D. Jackson (*Archibaccharis torquis* (S.F. Blake) S.F. Blake; *Baccharis adscendens* Pers.; *Baccharis calliprinos* Griseb.; *Baccharis elegans* Kunth; *Baccharis elegans* var. *seemannii* Sch. Bip.; *Baccharis fevillei* DC.; *Baccharis mirabilis* Heering; *Baccharis petiolata* DC.; *Baccharis petiolata* var. *rotundifolia* Phil.; *Baccharis salicifolia* subsp. *calliprinos* (Griseb.) Joch. Müll.; *Baccharis scandens* (Ruiz & Pav.) Pers.; *Baccharis scandens* Less.; *Baccharis schiedeana* Benth.; *Baccharis thomasi* Klatt; *Hemibaccharis salmeoides* S.F. Blake; *Hemibaccharis torquis* S.F. Blake; *Molina scandens* Ruiz & Pav.; *Pingraea scandens* (Ruiz & Pav.) F.H. Hellw.)

South America.

See *Syst. Veg. Fl. Peruv. Chil.* 1: 205. 1798, *Synopsis Plantarum* 2: 424. 1807, *Nova Genera et Species Plantarum* (folio ed.) 4: 47, t. 324. 1820[1818], *Linnaea* 5: 146. 1830, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852: 83. 1852, *The Botany of the Voyage of H.M.S. ~Herald~* 303. 1856 and *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten* 31(Beih. 3): 91. 1916, *Contributions from the United States National Herbarium* 20(13): 550, t. 51. 1924, *Contributions from the United States National Herbarium* 23: 1508. 1926,

Phytologia 28: 297. 1974, *Fieldiana, Bot.* 24(12): 128–164, 483–495. 1976, *Candollea* 48(1): 212, 218. 1993

(Resinous, aromatic, tonic, balsamic, stimulant.)

Archidendron F. Muell. Fabaceae (Ingeae, Leguminosae, Mimosaceae)

Greek *archon* ‘chief, a chieftain’ and *dendron* ‘tree’, referring to the size of the tree; see Ferdinand von Mueller, *Fragmenta Phytographiae Australiae*. 5: 59. 1865 and *Org. Sci. Res. Indonesia* 20: 1–22. 1954, *Adansonia*, sér. 2, 19(1): 3–37. 1979, *Nordic J. Botany* 2(5): 479–490. 1982 [*Australian Species of Archidendron*], *Opera Botanica* 76: 1–120. 1984, *J. Econ. Taxon. Bot.* 17: 683–691. 1993.

Peninsular Malaysia. Perennial non-climbing tree

See *Transactions of the Linnean Society of London* 30(3): 576. 1875, *Revisio Generum Plantarum* 1: 188. 1891 and *Bull. Org. Sci. Res. Indonesia* No. 20, 67. 1954, *Adansonia* sér. 2, 19(1): 17. 1979

(Leaves for smallpox.)

Malay name: petai belalang

Archytaea Mart. Clusiaceae (Theaceae, Ternstroemiaceae)

See *Botanical Register*; consisting of coloured ... pl. 112. 1816, *Nova Genera et Species Plantarum* ... 1: 117, pl. 73. 1824[1826]

Archytaea vahlii Choisy

Malaya.

See *Mém. Soc. Phys. Genève* xiv. 163. 1855

(For stomachache, boil the leaves or roots and drink the decoction; roots used a postpartum remedy.)

Malay names: kuat, nyolang padang

Archytaea Mart. Clusiaceae (Theaceae, Ternstroemiaceae)

Arctium L. Asteraceae

Latin *arction* and Greek *arktion* for a plant, also called *arcturus*, name used by Dioscorides (4.105) and Plinius, *arktos* 'a bear', referring to the flower heads or to the involucre; see Carl Linnaeus, *Species Plantarum*. 2: 816. 1753, *Genera Plantarum*. Ed. 5. 357. 1754, *Flore Française* 2: 70. 1779.

Arctium lappa L. (*Arctium chaorum* Klokov; *Arctium lappa* subsp. *majus* Arènes; *Arctium leiospermum* Juz. et al.; *Arctium leiospermum* Juz. & Ye. V. Serg.; *Arctium majus* (Gaertn.) Bernh.; *Arctium majus* Bernh.; *Lappa lappa* (L.) H. Karst., nom. inval., tautonym; *Lappa lappa* H. Karst.; *Lappa major* Gaertner; *Lappa vulgaris* Hill)

Asia, China, Himalayas, Europe, North America. A biennial or perennial herb, erect, branching, puberulent, purple flowers, bracts imbricate, corolla tubular, the taste of the achene is pungent

See *Species Plantarum* 2: 816. 1753, *Methodus Plantarum* 19. 1754, *The Vegetable System* 4: 28. 1762, *De Fructibus et Seminibus Plantarum*... 2: 379, t. 162. 1791, *Systematisches Verzeichnis* (Bernhardi) 154. 1800, *Deutsche Flora. Pharmaceutisch-medicinische Botanik*... (Karsten) 1121. 1883 and *Bulletin du Jardin Botanique de l'État* 20: 75. 1950, *Bot. Mater. Gerb. Bot. Inst. Komarova Akad. Nauk S.S.S.R.* 18: 299. 1957, *Watsonia* 11: 211-223. 1977, *Acta Biologica Cracoviensia, Series Botanica* 21: 31-63. 1978, *Taxon* 28: 400-401. 1979, *Botaniceskij Žurnal SSSR* 68(5): 660-664. 1983, *Botanika (Minsk)* 28: 23-33. 1987, *Acta Botanica Boreali-Occidentalia Sinica* 10: 203-210. 1990, *Grassland of China [Zhongguo caoyuan]* 1995(1): 16-20. 1995, *Linzer Biologische Beiträge* 29(1): 5-43. 1997, *Planta Med.* 72(3): 276-278. 2006, *Fitoterapia*. 77(5): 367-373. 2006, *J. Altern. Complement. Med.* 12(10): 971-980. 2006, *Journal Ethnobiol. Ethnomedicine* 3:11. 2007, *Acta Pharmaceutica Sinica* 42(2): 192-196. 2007

(Plant anticholinergic, antioxidant, antibacterial, antimicrobial, antiproliferative and apoptotic; plant juice applied on boils. Rough leaves rubefacient, for boils. Achene used in common cold, cough, headache, sore throat, acne, itch, psoriasis. Roots diuretic, antiphlogistic, diaphoretic, depurative, alterative, used in psoriasis, skin affections, gout. Veterinary medicine, mastitis, for ruminants.)

in English: beggar's buttons, burdock, clotbur, cocklebur, great burdock, greater burdock, thorny burr

in Italian: bardana, lappola

in Bolivia: asllawari, bardana, lampasu, lampazo

in Brazil: bardana, bardana-major, erva-de-tinhosos, orelha-de-gigante, pegamaço

in China: niu bang zi, niu pang tzu, niu pang, niu tsai, pang weng tsai, pien chien niu, pien fu tzu, ta li tzu, wu shih

in India: cheron, janglikuth, kushtha pratinidhi, phaggarmul, pichawag

in Japan: gobô, gumbô, ipakokarip, seta-korkoni

in Nepal: sinkingnhar

in Tibetan: byi-bzung

in Hawaii: gobo

Arctium minus (Hill) Bernh. (*Arctium minus* Schkuhr; *Arctium minus* Bernh.; *Arctium pubens* Bab.; *Lappa minor* Hill)

North America. Biennial weed

See *Methodus Plantarum* 19. 1754, *The Vegetable System* 4: 28. 1762, *Systematisches Verzeichnis* (Bernhardi) 154. 1800, *Botanisches Handbuch* 3: 49. 1803, *Ann. Mag. Nat. Hist.* ser. 2, 17: 376. 1856

(Low toxicity, burs cause local irritation. Analgesic, anti-rheumatic, febrifuge, healing wounds, poultice of leaves applied to the head for headaches, leaves infusion taken for cough, root decoction a remedy for pleurisy, root infusion used for rheumatism.)

in English: burdock, clotbur, cockle-button, common burdock, cuckoo-button, lesser burdock, smaller burdock

Arctomecon Torrey & Fremont Papaveraceae

Greek *arktos* ‘a bear, the north’ and *mekon* ‘poppy’, referring to the long hairs, see *Report of the Exploring Expedition to the Rocky Mountains in the year 1842* 312, pl. 2. 1845.

Arctomecon humilis Coville (*Arctomecon humile* Coville)

North America. Perennial herb, short-lived, endangered and threatened

See *Proc. Biol. Soc. Wash.* 7(2): 67. 1892 and Raynie, D.E., D.R. Nelson, and K.T. Harper, “Alkaloidal relationships in the genus *Arctomecon* (Papaveraceae) and herbivory in *A. humilis*.” *Great Basin Naturalist* 51: 397–403. 1991

(Alkaloids.)

in English: Colville bearclaw poppy, common bearpoppy, desert bearclaw-poppy, dwarf bearclaw-poppy

Arctostaphylos Adans. Ericaceae

Uva-ursi, Greek *arktos* ‘a bear’ and *staphyle* ‘a cluster, a grape’, the bears eat the fruits, see *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Traité des Arbres et Arbustes* 2: 371–372. 1755, *Familles des Plantes* (Adanson) 2: 165, 520. 1763, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 470–471. 1794, *Elementa botanica ...* 1: 219–220. 1790, *Systema Vegetabilium*, editio decima sexta 2: 287. 1825, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 2: 331–335. 1837, *Transactions of the American Philosophical Society*, new

series, 8: 258, 267–268. 1843[1842], *Linnaea* 24(1): 79–81, 87. 1851, *Genera Plantarum* 2(2): 582. 1876, *Geological Survey of California, Botany* 1: 454. 1876, *Synoptical Flora of North America* 2(1): 27–29. 1878, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11(2): 144. 1889, *Die Natürlichen Pflanzenfamilien* 4(1): 49. 1891 and *Leaflets of Western Botany* 1(10): 98–100. 1934, *Fl. Neotrop.* 66: 133–193. 1995, Wells, Philip V. *The Manzanitas of California: Also of Mexico and the World*. 2000.

Arctostaphylos canescens Eastw. (*Arctostaphylos candidissima* Eastw.; *Arctostaphylos canescens* subsp. *canescens*; *Arctostaphylos canescens* var. *candidissima* (Eastw.) Munz)

North America.

See *Proceedings of the California Academy of Sciences*, Series 3, 1(2): 84–85. 1897

(Tonic.)

in English: hoary manzanita

Arctostaphylos columbiana Piper (*Arctostaphylos columbiana* var. *tracyi* Eastw.; *Arctostaphylos columbiana* var. *tracyi* (Eastw.) J.E. Adams ex McMinn; *Arctostaphylos tracyi* (Eastw.) J.E. Adams ex McMinn; *Arctostaphylos tracyi* Eastw.)

North America.

See *Fl. N.W. Coast* [Piper & Beattie] 279. 1915, *Leaflet. W. Bot.* 1: 79. 1933, *Man. Calif. Shrubs* 408. 1939

(Antidiarrheal, decoction of bark taken for diarrhea. Ceremonial.)

in English: hairy manzanita

Arctostaphylos glandulosa Eastw. (*Arctostaphylos glandulosa* subsp. *glandulosa*; *Arctostaphylos glandulosa* var. *cushingiana* (Eastw.) J.E. Adams ex McMinn; *Arctostaphylos intricata* Howell)

North America.

See *Proceedings of the California Academy of Sciences*, Series 3, 1(2): 82–83. 1897

(Antidiarrheal, leaves infusion for diarrhea, for poison oak rash; bark decoction taken for diarrhea and bleeding diarrhea.)

in English: Eastwood manzanita

Arctostaphylos glauca Lindl. (*Arctostaphylos glauca* var. *puberula* J.T. Howell; *Uva-ursi glauca* (Lindley) Abrams; *Xerobotrys glaucus* (Lindl.) Nutt.)

North America. Perennial tree

See *Edwards's Botanical Register* 21: sub pl. 1791. 1836, *Transactions of the American Philosophical Society*, new series, 8: 267–268. 1843[1842] and *Bulletin of the New York Botanical Garden* 6(21): 433. 1910

(Antidiarrheal, leaves infusion for diarrhea, for poison oak rash; bark decoction taken for diarrhea and bleeding diarrhea.)

in English: bigberry manzanita

Arctostaphylos manzanita Parry (*Arctostaphylos bowermaniae* J.B. Roof; *Arctostaphylos manzanita* subsp. *manzanita*; *Arctostaphylos pungens* Kunth subsp. *manzanita* (Parry) J.B. Roof; *Uva-ursi manzanita* (Parry) A. Heller; *Uva-ursi manzanita* (Parry) Abrams, nom. illeg.)

North America. Perennial shrub

See *Traité des Arbres et Arbustes* 2: 371–372. 1755, *Bulletin of the California Academy of Sciences* 2(8C): 491–492. 1887 and *Muhlenbergia*; a journal of botany 9(5): 68. 1913, *North American Flora* 29(1): 96. 1914

(Fruit considered poisonous. Poultice of chewed leaves applied to sores, leaves infusion taken for severe colds, diarrhea; leaves chewed for stomachache; leaves decoction a wash for headaches. Veterinary medicine, for horses sores.)

in English: Ione manzanita, Parry's manzanita, whiteleaf manzanita

Arctostaphylos manzanita Parry subsp. *manzanita* (*Arctostaphylos bowermaniae* J.B. Roof; *Arctostaphylos pungens* Kunth subsp. *manzanita* (Parry) J.B. Roof)

North America. Perennial shrub

See *Traité des Arbres et Arbustes* 2: 371–372. 1755, *Bulletin of the California Academy of Sciences* 2(8C): 491–492. 1887 and *Muhlenbergia*; a journal of botany 9(5): 68. 1913, *North American Flora* 29(1): 96. 1914

(Fruit considered poisonous. Poultice of chewed leaves applied to sores, leaves infusion taken for severe colds, diarrhea; leaves chewed for stomachache; leaves decoction a wash for headaches. Veterinary medicine, for horses' sores.)

in English: Ione manzanita, Parry's manzanita, whiteleaf manzanita

Arctostaphylos nevadensis A. Gray (*Arctostaphylos pungens* subsp. *nevadensis* (A. Gray) Roof; *Uva-ursi nevadensis* (A. Gray) A. Heller; *Uva-ursi nevadensis* (A. Gray) Abrams, nom. illeg.)

North America. Perennial subshrub to shrub

See *Synoptical Flora of North America* 2(1): 27. 1878 and *Muhlenbergia*; a journal of botany 9(5): 68. 1913, *North American Flora* 29(1): 94. 1914

(Antidiarrheal, antidote, leaves infusion taken for diarrhea, plant used for poisoning from *Toxicodendron diversiloba*.)

in English: pine-mat manzanita, pinemat manzanita

Arctostaphylos parryana Lemmon (*Arctostaphylos parryana* subsp. *parryana*; *Arctostaphylos pungens* Kunth subsp. *parryana* (Lemmon) J.B. Roof; *Uva-ursi parryana* (Lemmon) Abrams)

North America. Perennial shrub

See *Pittonia* 2(8A): 68–69. 1890 and *Bulletin of the New York Botanical Garden* 6(21): 432. 1910

(Tonic.)

in English: Parry manzanita

Arctostaphylos patula Greene (*Arctostaphylos acutifolia* Eastw.; *Arctostaphylos parryana* var. *pinetorum* (Rollins) Wiesel. & B. Schreib.; *Arctostaphylos patula* fo. *platyphylla* (A. Gray) P.V. Wells; *Arctostaphylos patula* subsp. *platyphylla* (A. Gray) P.V. Wells; *Arctostaphylos patula* Greene var. *coalescens* W. Knight; *Arctostaphylos pinetorum* Rollins; *Arctostaphylos platyphylla* (A. Gray) Kuntze; *Arctostaphylos pungens* var. *platyphylla* A. Gray; *Uva-ursi patula* (Greene) Abrams)

North America. Perennial shrub, berries eaten by bears and deer

See *Pittonia* 2(10B): 171. 1891 and *Bulletin of the New York Botanical Garden* 6(21): 433. 1910

(Poultice of leaves applied to burns, cuts.)

in English: green-leaf manzanita, green manzanita

Arctostaphylos pungens Kunth (*Arbutus ferruginea* Sessé & Moc.; *Arbutus mucronata* Sessé & Moc.; *Arbutus myrtifolia* Willd. ex Steud.; *Arbutus rigida* Willd. ex Steud.; *Arctostaphylos chaloneorum* J.B. Roof; *Arctostaphylos pseudopungens* J.B. Roof; *Arctostaphylos pungens* Kunth subsp. *chaloneorum* (J.B. Roof) J.B. Roof; *Arctostaphylos pungens* var. *foliis-oblongo-ellipticus* M. Martens & Galeotti; *Arctostaphylos pungens* var. *foliis-ovalibus* M. Martens & Galeotti, nom. inval.; *Arctostaphylos pungens* var. *mexicana* W. Knight; *Daphnidostaphylis pungens* (Kunth) Klotzsch; *Uva-ursi pungens* (Kunth) Abrams)

Mexico. Perennial shrub

See *Nova Genera et Species Plantarum* (quarto ed.) 3: 278, pl. 259. 1818[1819], *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9: 532. 1842, *Linnaea* 24(1): 79–81, 87. 1851 and *Bulletin of the New York Botanical Garden* 6(21): 432. 1910

(Leaves infusion as a remedy for stomach trouble, diarrhea, poison oak rash; fruits and leaves infusion for kidney problems; fruits infusion diuretic, used for kidney and prostate problems. A ceremonial emetic. A good luck charm.)

in English: pointleaf manzanita

Arctostaphylos tomentosa (Pursh) Lindl. (*Arbutus tomentosa* Pursh; *Daphnidostaphylis tomentosa* (Pursh) Klotzsch; *Uva-ursi tomentosa* (Pursh) Abrams; *Xerobotrys tomentosus* (Pursh) Nutt.)

North America. Perennial shrub

See *Flora Americae Septentrionalis*; or, ... 1: 282–283. 1814[1813], *Edwards's Botanical Register* 21: pl. 1791. 1836,

Transactions of the American Philosophical Society, new series, 8: 267. 1843[1842]., *Linnaea* 24: 79. 1851

(Antihemorrhagic, stomachic; bark powder infusion taken for lung hemorrhages, leaves chewed for stomachache.)

in English: downy manzanita, woolly manzanita, woollyleaf manzanita

Arctostaphylos uva-ursi (L.) Spreng. (*Arbutus buxifolia* Stokes; *Arbutus uva-ursi* L.; *Arctostaphylos adenotricha* (Fernald & J.F. Macbr.) Á. Löve, D. Löve & B.M. Knight; *Mairania uva-ursi* (L.) Desv.; *Uva-ursi buxifolia* (Stokes) Gray; *Uva-ursi cratericola* (Donn. Sm.) Abrams; *Uva-ursi procumbens* Moench; *Uva-ursi procumbens* var. *adenotricha* (Fernald & J.F. Macbr.) D. Löve; *Uva-ursi procumbens* var. *coactilis* (Fernald & J.F. Macbr.) Moldenke; *Uva-ursi uva-ursi* (L.) Britton; *Uva-ursi uva-ursi* (L.) Cockerell)

North America. Perennial shrub, fruits eaten

See *Species Plantarum* 1: 395. 1753, *A Botanical Materia Medica* 2: 509. 1812, *Journal de Botanique*, rédigé par une société de botanistes 1: 37-, 292. 1813, *A Natural Arrangement of British Plants* 2: 400. 1821, *Systema Vegetabilium*, editio decima sexta 2: 287. 1825 and *Flora of Boulder, Colorado*, and vicinity 186. 1911, *An Illustrated Flora of the Northern United States* 2: 693. 1913, *Vascular Plants of Wyoming* 296. 1988, *Madroño* 35(4): 340. 1988[1989], M.R. Gilmore, *Uses of Plants by the Indians* ... 56. 1991

(Infusion of plant a mouthwash for sore gums, a wash for rheumatism. Abortifacient, infusion of whole plant and velvet leaf blueberry taken to bring menstruation. Urinary tract medicine, for bladder infections, urinary diseases and urethra inflammations. Poultice of ground leaves and stems applied to sores; infusion of stems, leaves and berries taken

for back pain and sprained backs; leaves pounded into a paste and applied to boils and pimples; pulverized dried leaves smoked for headache, and as a narcotic. As a bath to relieve rheumatism or arthritis; poultice of wetted leaves rubbed on the back for pain. Prolonged use of the tea can irritate the stomach. Leaves burned to drive away bad spirits, also a ceremonial emetic.)

in English: bear's grape, bearberry, common bearberry, creashak, hog cranberry, kinnikinick, mealberry, mountain box, sandberry, uva-ursi

in North America: bearberry, little tree, nakasisi (Pawnee), short tree, uva-ursi

in Spanish: coralillo

Arctostaphylos viscida Parry (*Uva-ursi viscida* (Parry) A. Heller; *Uva-ursi viscida* (Parry) Abrams)

North America. Tree or shrub

See *Bulletin of the California Academy of Sciences* 2(8C): 492–493. 1887 and *Muhlenbergia*; a journal of botany 9(5): 68. 1913, *North American Flora* 29(1): 99. 1914

(Leaves chewed for stomachache.)

in English: white-leaf manzanita

Arctotheca Wendl. Asteraceae

Greek *arktos* 'a bear' and *theke* 'a case, capsule', the fruits are very woolly (or glabrous), see Wendland, Johann Christoph (1755–1828), *Botanische Beobachtungen* 41. 1798, *Hortus Herrenhusanus*. Hannoverae, 1798–1801.

Arctotheca calendula (L.) Levyns (*Arctotheca calendulacea* (R. Br.) Lewin; *Arctotheca calendulacea* K. Lewin; *Arctotheca calendulaceum* (L.) Lewin; *Arctotis calendula* L.; *Arctotis calendulacea* L.; *Cryptostemma calendula* (L.) Druce; *Cryptostemma calendulaceum* (L.) R. Br.)

South Africa.

See *Species Plantarum* 2: 922–923. 1753, *Botanische Beobachtungen* 41. 1798, *Hortus Kewensis*; or, a catalogue ... The second edition 5: 141. 1813 and *Journal of South African Botany* 8(4): 284. 1942, Fairnie I.J. "Nitrite poisoning in sheep due to capeweed (*Arctotheca calendula*)." *Aust. Vet. J.* 45(2): 78–79. 1969, Pethick D.W., Chapman H.M. "The effects of *Arctotheca calendula* (capeweed) on digestive function of sheep." *Aust. Vet. J.* 68(11): 361–363. 1991, *Lagascalia* 12: 117–119. 1983, *Lagascalia* 17: 161–172. 1993, *Willdenowia* 23: 211–238. 1993

(Dermatitis from contact with the plant, Australian bush dermatitis.)

in English: Cape marigold, Cape weed, marigold

in South Africa: botterblom, gousblom, Kaapse madeliefie, soetgousblom, tonteldoek

Arctotis L. Asteraceae

Greek *arktos* ‘a bear’ and *ous, otos* ‘an ear’, possibly an allusion to shape of the scales of the pappus; see Carl Linnaeus, *Species Plantarum*. 2: 922–923. 1753 and *Genera Plantarum*. Ed. 5. 394. 1754.

Arctotis arctotoides (L.f.) O. Hoffm. (*Osteospermum arctotoides* L.f.; *Venidium arctotoides* (L.f.) Less.; *Venidium decurrens* Less.)

South Africa. Perennial herbaceous groundcover, leaves and stems covered with small white hairs

See *Species Plantarum* 2: 923–924. 1753, *Linnaea* 6: 91. 1831 and *Pharmaceutical Biology* (formerly *International Journal of Pharmacognosy*) 45(6): 486–493. 2007, *Bangladesh J. Sci. Ind. Res.* 43(1): 89–96. 2008

(Used for the treatment of epilepsy, indigestion and stomach-ache. Leaf juice antibacterial, applied to treat wounds.; roots fungicidal, antioxidant and antimicrobial; extracts from the shoots showed antimicrobial activity.)

in South Africa: bittergousblom, botterblom, putswa-pududu, ubushwa

Arctous Nied. Ericaceae

Latin *arctous* ‘pertaining to *arctos*, northern’, see also *Arctostaphylos*.

Arctous alpina (L.) Nied. (*Arbutus alpina* L.; *Arctostaphylos alpina* (L.) Spreng.; *Arctous alpina* var. *japonica* (Nakai) Ohwi; *Arctous japonica* Nakai; *Mairania alpina* (L.) Desv.)

North America. Shrub, perennial, berries used for food

See *Species Plantarum* 1: 395. 1753, *Journal de Botanique, Appliquée à l’Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1(1): 37. 1813, *Systema Vegetabilium*, editio decima sexta 2: 287. 1825, *Bot. Jahrb. Syst.* 11: 137, 180, 233. 1889

(Antirheumatic, narcotic, infusion of pounded plants used as wash for rheumatism. Ceremonial.)

in English: alpine bearberry, black bearberry

in China: bei ji guo

Arcytophyllum Willd. ex Schultes & Schultes f. Rubiaceae

From the Greek *arkys* ‘net’ and *phyllon* ‘a leaf’, see *Mantissa* 3: 5, 108. 1827, *Prodr.* (DC.) 4: 433. 1830, *Hist. Nat. Vég.* (Spach) 8: 374. 1838, *Linnaea* 28: 491. 1857, *Fl. Columb.* (H. Karst.) ii. 9–10, t. 105. 1862, *Revisio Generum Plantarum* 1: 281. 1891 and *J. Bot.* 49: 317. 1911, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Arcytophyllum nitidum (Kunth) Schldl. (*Arcytophyllum blaerioides* Willd. ex Roem. & Schult.; *Arcytophyllum*

blaerioides Roem. & Schult.; *Arcytophyllum caracasenum* (Kunth) Standl.; *Arcytophyllum caracasenum* Standl.; *Arcytophyllum caracasenum* Standl.; *Arcytophyllum nitidum* Schldl.; *Arcytophyllum nitidum* f. *hispidulum* Steyerem.; *Arcytophyllum nitidum* subsp. *caracasenum* (Kunth) Steyerem.; *Arcytophyllum nitidum* var. *culmenicola* Steyerem.; *Arcytophyllum nitidum* var. *glabratum* Steyerem.; *Arcytophyllum puberulentum* Standl. & Steyerem.; *Arcytophyllum vareschii* Steyerem.; *Ereicoctis caracasana* (Kunth) Kuntze; *Ereicoctis caracasana* Kuntze; *Ereicoctis nitida* (Kunth) Kuntze; *Ereicoctis nitida* Kuntze; *Hedyotis caracasana* Kunth; *Hedyotis floribunda* H. South America, Venezuela, Colombia. Shrub

See *Nov. Gen. Sp.* 3: 393. 1820, *Mantissa* 3: 5, 108. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 433–434. 1830, *Hist. Nat. Vég.* (Spach) 8: 374. 1838, *Nomenclator Botanicus* ed. 2, 1: 727. 1840, *Linnaea* 28: 492. 1857, *Linnaea* 30: 146. 1859, *Fl. Columb.* 2: 10. 1862, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 60. 1873, *Revisio Generum Plantarum* 1: 281. 1891, *Index Kewensis* 2: 150. 1894 and *Contr. U. S. Natl. Herb.* 18: 126. 1916, *Acta Biol. Venez.* 4: 3. 1964, *Acta Bot. Venez.* 6(1–4): 113–114, 117–119. (1971 publ. 1972)

(Smoke from the burning wood extremely irritating.)

Ardisia Swartz Primulaceae (Myrsinaceae)

Greek *ardis* ‘a point, an arrow point’, referring to the anthers or to the pointed corolla lobes, see *Histoire des plantes de la Guiane Française* 2(Suppl.): 1, t. 368. 1775, *Nova Genera Plantarum* 1: 6–7. 1781, *Nova Genera et Species Plantarum seu Prodromus* 3, 48. 1788, *Flora Cochinchinensis* 1: 94, 120–121. 1790, *Annales du muséum national d’histoire naturelle* 15: 350. 1810, *Schlüssel Hortus indicus malabaricus*, ... 31. 1818, *Mantissa* 3: 3, 55. 1827, *Allgemeine Medicinisch-Pharmazeutische Flora* 3: 975. 1834, *Annales des Sciences Naturelles; Botanique*, sér. 2, 16: 79, 88. 1841, *Plantae Junghuhnianae* 2: 199. 1852, *Flora Brasiliensis* 10: 283. 1856, *Flora of the British West Indian Islands* 395. 1861, *Die Natürlichen Pflanzenfamilien* 4(1): 94. 1889 and *Symbolae Antillarum* 3(2): 391, 392. 1901, *Das Pflanzenreich*

236(Heft 9): 13, 59, 78, 96, 102, 116, 150, 183. 1902, *Taxon* 17: 496–501. 1968, *Phytologia* 48(2): 139–142. 1981, *Phytologia* 49(4): 341, 344, 346. 1981, *Wrightia* 7(2): 38, 40–42. 1982, *Sida* 19(2): 275–283. 2000, *Annals of the Missouri Botanical Garden* 90(2): 179–317. 2003, *Novon* 14(1): 114. 2004.

Ardisia boissieri A. DC.

Philippines.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 129. 1844

(Leaves used to soothe and heal wounds.)

in Philippines: babagion, butau, tagpo

Ardisia colorata Roxb. (*Ardisia colorata* Link; *Ardisia crispa* (Thunb.) A. DC.)

India. Small understory treelet, variable, bisexual flowers with a white open corolla borne in small terminal inflorescences, red berries

See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 194. 1821, *Flora Indica*; or descriptions of Indian Plants 2: 271. 1824 and *Chemical & Pharmaceutical Bulletin* 50(11): 1484–1487. 2002, *Journal of Ethnopharmacology* 96(3): 347–354. 2005

(Fruits cytotoxic, antioxidant, antirheumatic. Roots decoction for coughs and a postpartum remedy.)

in India: bol simbal, kanjalil, rulthli

Malay names: beberas nasi, kayu lupa dahan, merjemah, penjarang

Ardisia complanata Wall. (*Ardisia complanata* Miq.)

India, Malay Peninsula.

See *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall. 2: 280. 1824, *Plantae Junghuhnianae* 1: 194. 1853

(Leaves for colic.)

Malay name: sumpuh lumpuh

Ardisia crenata Sims (*Ardisia bicolor* E. Walker; *Ardisia crenata* fo. *hortensis* (Migo) W.Z. Fang & K. Yao; *Ardisia crenata* fo. *taquetii* (Nakai) Ohwi; *Ardisia crenata* subsp. *crassinervosa* (E. Walker) C.M. Hu & J.E. Vidal; *Ardisia crenata* subsp. *mouretii* (Pit.) C.M. Hu & J.E. Vidal; *Ardisia crenata* var. *bicolor* (E. Walker) C.Y. Wu & C. Chen; *Ardisia crenulata* Lodd; *Ardisia crispa* var. *taquetii* H. Lévy; *Ardisia konishii* Hayata; *Ardisia kusukusensis* Hayata; *Ardisia labordei* H. Lévy; *Ardisia lentiginosa* Ker Gawl.; *Ardisia lentiginosa* var. *rectangularis* Hatus.; *Ardisia linangensis* C.M. Hu; *Ardisia miaoliensis* S.Y. Lu; *Ardisia mouretii* Pit.; *Bladhia crenata* (Sims) H. Hara; *Bladhia crenata* var. *taquetii* H. Hara; *Bladhia crispa* var. *taquetii* (H. Lévy) Nakai; *Bladhia lentiginosa* (Ker Gawl.) Nakai; *Bladhia lentiginosa* fo. *hortensis* Migo; *Bladhia lentiginosa* var. *lan- ceolata* Masam.)

India, Indochina, Japan, Malesia, Philippines. Erect shrub, chartaceous leaves elliptic-lanceolate, bisexual flowers in umbels or corymbs, corolla white or pinkish, fruit a globose red drupe, in secondary forests and open vegetations

See *Nova Genera Plantarum* 1: 6. 1781, *Botanical Magazine* 45: pl. 1950. 1817 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(257–259): 374. 1912, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 5: 89–91. 1915, *Trees Shrubs Japan* 1: 283. 1927, *Journal of Japanese Botany* 13(9): 681. 1937, *Journal of the Shanghai Science Institute* 3(8): 225. 1937, *Transactions of the Natural History Society of Taiwan* 29: 344. 1939, *Botanical Magazine* 55: 524. 1941, Hara, Hiroshi (1911–1986), *Enumeratio Spermatophytarum Japonicarum* 1: 75–76. Tokyo: Iwanami Shoten, 1948, *Quarterly Journal of Chinese Forestry* 10: 119, f. 1 & 2. 1977, *Acta Phytotaxonomica Sinica* 17(4): 99. 1979

(Crushed plants or the juice used against skin diseases, itch and earache. Juice from the root used against fever, cough and diarrhea; roots decoction for cough and as a postpartum remedy; pound the root and swallow it for fever and diarrhea.)

in English: coral ardisia, coralberry, hens eyes, Hilo holly, spiceberry, village ardisia

in Cambodia: ping chap

in China: zhu sha gen

in Indonesia: mata ayam, popinoh

in Japan: manryo (ryo = a golden coin, manryo = ten thousand ryo)

Malayan names: akar bebulu, lenggundi, mata ayam, mata pelandok, sireh puyoh

in Papua New Guinea: bomempa

in Philippines: atarolon, tagpo

in Thailand: chamkhruea, tappla, tinchamkhok

in Vietnam: chu o rien, co'm nguoi nhan

Ardisia elliptica Thunb. (*Ardisia boissieri* A. DC.; *Ardisia drupacea* (Blanco) Merrill; *Ardisia elliptica* Bedd.; *Ardisia humilis* auct., non Vahl; *Ardisia kotoensis* Hayata; *Ardisia littoralis* Andr.; *Ardisia solanacea* Roxb.; *Ardisia squamulosa* C. Presl; *Bladhia elliptica* (Thunb.) Nakai; *Bladhia kotoensis* (Hayata) Nakai; *Tinus squamulosa* (C. Presl) Kuntze)

Borneo, Sri Lanka. Small tree, leaves alternate oblanceolate, inflorescence a few-flowered terminal or lateral umbel-like raceme, flowers 4–5-merous white or pink fragrant, fruit a globose 1-seeded drupe dark blue to purple, in primary forest

See *Nova Genera Plantarum* 1: 6. 1781, *Nova Genera Plantarum* 8: 119. 1798, *Reliquiae Haenkeanae* 2(2): 65. 1835, *The Flora Sylvatica for Southern India* 15–24: lxxxviii. 1872, *Revisio Generum Plantarum* 2: 975. 1891 and *Journal of the College of Science, Imperial University of*

Tokyo 30(1): 180. 1911, *Botanical Magazine* 55: 99. 1921, *Nova Flora Japonica* 9: 120. 1943

(Used for retrosternal pain, for pain at the heart. Leaves used to soothe and heal wounds.)

in English: sea-shore ardisia, shoebutton ardisia

in China: dong fang zi jin niu

Malay names: daun bisa hati, mata itek, mata pelandok, penah, periah

in Nepal: damai phul

in Philippines: babagion, butau, tagpo

Ardisia fuliginosa Blume (*Pimelandra fuliginosa* Benth. & Hook.f.; *Pimelandra fuliginosa* (Blume) Benth. & Hook.f.; *Tinus fuliginosa* (Blume) Kuntze; *Tinus fuliginosa* Kuntze)

Indonesia. Treelet or shrub

See *Genera Plantarum* [Benth. & Hooker f.] 2(2): 647. 1876, *Revisio Generum Plantarum* 2: 974. 1891

(Sap squeezed from the stem applied to itchy skin.)

in Borneo: merjemah

in Indonesia: getah adjag (= juice from the stem)

Ardisia hulletii Mez

Malaysia.

See *Das Pflanzenreich* 236(Heft 9): 131. 1902

(Roots decoction a postpartum remedy.)

Malay name: sireh padang

Ardisia humilis Vahl (*Ardisia hainanensis* Mez; *Ardisia humilis* Blume; *Ardisia pyrgina* Saint Lager; *Ardisia pyrgus* Roemer & Schultes; *Bladhia humilis* (Vahl) Sasaki; *Tinus humilis* (Vahl) Kuntze; *Tinus humilis* Kuntze)

SE Asia.

See *Symbolae Botanicae*, ... 3: 40. 1794, *Systema Vegetabilium* 4: 518. 1819, *Bijdragen tot de flora van Nederlandsch Indië* 13: 687. 1826, *Annales de la Société Botanique de Lyon* 7: 119. 1880, *The Flora of British India* 3(9): 530. 1882, *Revisio Generum Plantarum* 2: 405. 1891 and *Das Pflanzenreich* 236(Heft 9): 138. 1902, *List of Plants of Formosa* 324. 1928

(Roots used in diarrhea, rheumatism, menstrual disorders.)

in China: ai zi jin niu

in India: adivimayuri, bode, bodina, bonktu, chauldhoa, cilu-karekka, condamayoor, kolaka, kolarakku, kondabhogada, kondamamidi, kondamayur, kondamayuri, kuntena, mamidi, mayuramu, poinco, sore

in Malay: merjemeh laut

Ardisia japonica (Thunb.) Blume (*Bladhia japonica* Thunberg; *Tinus japonica* (Thunberg) Kuntze; *Tinus japonica* Kuntze)

E. Asia. Evergreen, shrub or subshrubs, stoloniferous, star-shaped pink and white flowers in small groups

See *Nova Genera Plantarum* 1: 6–7. 1781, *Bijdragen tot de flora van Nederlandsch Indië* 13: 690–691. 1826, *Revisio Generum Plantarum* 2: 405. 1891

(Carminative, antidote and diuretic, depurative, expectorant, stimulates blood circulation, used for bronchitis, coughs and uterine bleeding.)

in English: Japanese ardisia, maleberry, marlberry

in China: zi jin niu, tzu chin niu

in Japan: yama-tachibana

Ardisia lanceolata Roxb. (*Tinus lanceolata* (Roxb.) Kuntze; *Tinus lanceolata* Kuntze)

Malaysia, Singapore.

See *Hort. Bengal.* 85. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 275. 1824, *Revisio Generum Plantarum* 2: 974. 1891

(Used as a postpartum protective remedy.)

Malay name: asam

Ardisia lancifolia Merr. (*Tapeinosperma lanceifolium* (Merr.) Philipson)

Philippines, Borneo. Small tree

See *Philippine Journal of Science* C 13: 113. 1918, *Journal of Botany, British and Foreign* 77: 103. 1939

(Magico-religious beliefs, ritual, hang the plant in the house as a protection from being charmed.)

in Borneo: merjimah

Ardisia odontophylla Wall. ex A. DC. (*Ardisia odontophylla* Lindl.; *Tinus odontophylla* (Wall. ex A. DC.) Kuntze; *Tinus odontophylla* Kuntze)

Malaysia.

See *Numer. List* [Wallich] n. 2279. 1830, *Transactions of the Linnean Society of London, Botany* 17(1): 125, pl. 6. 1834, *Edwards's Bot. Reg.* 22: t. 1892. 1836, *Revisio Generum Plantarum* 2: 974. 1891 and *Taiwania* 34(2): 232. 1989

(Leaves decoction for stomachache. Roots for rheumatism.)

Malay name: pasal

Ardisia oxyphylla Wall. ex A. DC. (*Ardisia oxyphylla* Wall.)

India. Shrub to small tree, few flowers in racemes, fruit dark purplish

See *Numer. List* [Wallich] n. 2291. 1830, *Transactions of the Linnean Society of London* 17(1): 119–120. 1834

(Leaf decoction tonic, to restore fertility; pounded leaf paste boiled in water and drunk by the couples to restore fertility; leaf extract drunk by women for maintaining fertility; pounded leaves and poultice for cracks in the skin of the feet, for swellings of the neck.)

in India: mikuhon

Malay name: daun mata etek

Ardisia paniculata Roxb. (*Tinus paniculata* (Roxb.) Kuntze)

India. Undershrub

See *Hort. Bengal.* 16. 1814, *Flora Indica*; or descriptions of Indian Plants 2: 270. 1824, *Revisio Generum Plantarum* 2: 974. 1891

(A paste of roots of *Claoxylon khasianum* together with *Ardisia paniculata*, *Clerodendrum wallichii*, *Mussaenda macrophylla* and *Trevesia palmata* applied for the treatment of abdominal troubles and tumour. Roots, young twigs, stem and bark used for dysentery; roots together with those of *Smilax ovalifolia* and *Bridelia tomentosa* crushed and boiled and the water drunk for jaundice; root decoction for rheumatism and venereal diseases.)

in Bangladesh: nagalsum bom

in India: naunuar

Ardisia polycephala Wall. ex A. DC. (*Ardisia polycephala* Wight; *Ardisia polycephala* Wall.; *Tinus polycephala* (Wall. ex A. DC.) Kuntze; *Tinus polycephala* Kuntze)

India.

See *Numer. List* [Wallich] n. 2293. 1830, *Transactions of the Linnean Society of London* 17(1): 118–119. 1834 [1837 publ. 26 Apr–8 May 1834], *Illustrations of Indian Botany* 2: t. 145. 1841–1850, *Revisio Generum Plantarum* 2: 405. 1891

(Root paste with water used to stop bleeding after childbirth.)

in India: sailtuai

Ardisia pyramidalis (Cav.) Pers. (*Anguillaria pyramidalis* Cav.; *Ardisia pyramidalis* Roth; *Tinus pyramidalis* (Cav.) Kuntze; *Tinus pyramidalis* Kuntze)

SE Asia.

See *De Fructibus et Seminibus Plantarum...* 1(1): 372. 1788, *Icones et Descriptiones Plantarum*, quae aut sponte ... 6(1): 1, t. 502. 1800, *Novae Plantarum Species* 123. 1821, *Revisio Generum Plantarum* 2: 974. 1891

(Roots decoction taken to treat infection of the genitals and toothache. Leaves used externally for headache.)

in Philippines: gadong-gadon

Ardisia ridley King & Gamble

Thailand, Malaysia.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 74: 148. 1905

(Postpartum protective remedy. Plant decoction for high fever.)

in Malay: lutot hyam, peluroh, pingarut

Ardisia solanacea Roxb. (*Anguillaria solanacea* Poir.; *Anguillaria solanacea* (Roxb.) Poir.; *Bladhia solanacea* (Roxb.) Nakai; *Icacorea solanacea* (Roxb.) Britton; *Icacorea solanacea* Britton)

India. Undershrub or small tree, coriaceous leaves, rose flowers, small fruits, tender leaves as vegetable

See *Plants of the Coast of Coromandel* 1: 27, pl. 27. 1795, *Encyclopédie Méthodique, Botanique* (Lamarck) 7: 688. 1806, *Hort. Bengal.* 16. 1814, *Flora Indica*; or, descriptions of Indian Plants 1: 580. 1832 and *Flora of Bermuda* 284. 1918, *Nova Flora Japonica* [Nakai & Honda] 9: 120. 1943

(Used in Sidha. Peeled fresh tender stems taken for persistent cough. Bark powder for cough, toothache, applied in headache; fruit of *Cassia hirsuta* together with stembarks of *Ardisia solanacea* and *Clerodendrum viscosum* are powdered and the powder given as antidote against snakebite, powder is also applied to the affected bitten part; stem bark made into a paste and applied on the region of a snakebite, or drunk to kill worms in the stomach; stem bark powder used to treat gonorrhoea and piles. Fruit eaten in conjunctivitis; ripe fruit juice used as eye drops in conjunctivitis. Root bark decoction used to wash sores and uterus after childbirth; root bark infusion as a postpartum remedy, tonic after delivery; root bark paste applied to heal sores, wounds. Roots febrifuge, used in diarrhoea and rheumatism; root infusion drunk in chest pain; root extract given for internal hemorrhage; root paste applied to stop bleeding; root paste applied all over the body for swelling and muscular pain, for the same purpose roots boiled in water and the vapor inhaled. Leaves infusion against abortion; leaf juice given in menstrual disorders and swellings; mashed leaves decoction antirheumatic, antiabortion; leaf paste mixed with coconut oil used externally for curing mumps. Religious and supernatural beliefs, conserved in sacred groves, related with funeral ceremonies. Veterinary medicine, leaves and tender shoots applied on bone fracture.)

in Bangladesh: sokrapong

in China: suan tai cai

in India: adavi mayuri, adavimayr, banjam, batguri, bhontu, bisi, bode, bodhina gida, bodian gida, bodina gida, buei, bugadi, chakafum, chakapum, chilukarekka, chitli, chitmitlim-one gida, dikna, dudumara, gadagulanichi, gadhichi, garda, gardagulanj, guggilam, gulanchi, havalada gida, kaashiner-aedu, kadna, kaka-njara, kakkata, katapenga, katuguli gida, kodamati, kolaruma, konda bhogada, konda mamidi, konda mayur, kondamayooru, kondamayr, kondamayur, kozhikkottai, kuntena chettu, kunti, kunti gatcho, kuti, manimunda, manipudbam, manipupam, mayooramu, minkuon, mitlamani, narikandam, neeramuthy, nilbedsi, pagada mulaka, puliki, putupatra, shuli, sore

Ardisia thyrsoflora D. Don (*Ardisia austroasiatica* E. Walker; *Ardisia depressa* C.B. Clarke; *Ardisia floribunda* Wall.; *Ardisia meziana* H. Lévl.; *Ardisia meziana* King & Gamble; *Ardisia neriifolia* A. DC.; *Ardisia neriifolia* Wall. ex A. DC., nom. nud.; *Ardisia neriifolia* Wall., nom. nud.; *Ardisia neriifolia* Kurz; *Ardisia tenera* Mez; *Ardisia yunnanensis* Mez; *Tinus depressa* (C.B. Clarke) Kuntze; *Tinus depressa* Kuntze; *Tinus thyrsoflora* (D. Don) Kuntze; *Tinus thyrsoflora* Kuntze)

Nepal, China. Shrub, entire leaves, reddish flowers, red-dotted depressed berries, ripe fruits eaten, young leaves eaten as vegetable

See *Systema Vegetabilium* 4: 804. 1819, *Flora Indica*; or descriptions of Indian Plants 2: 272. 1824, *Prodromus Florae Nepalensis* 148. 1825, *A Numerical List of Dried Specimens* n. 2278. 1830, *Transactions of the Linnean Society of London* 17(1): 118, t. 8. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 127. 1844, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 46: 225. 1877, *The Flora of British India* 3(9): 522. 1882, *Revisio Generum Plantarum* 2: 974. 1891 and *Das Pflanzenreich* 236(Heft 9): 104, 107. 1902, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74: 147. 1905, *Repertorium Specierum Novarum Regni Vegetabilis* 10(257–259): 374. 1912, *Journal of the Arnold Arboretum* 23(3): 347. 1942

(Postpartum remedy.)

in China: nan fang zi jin niu

in India: laungla-chuat, thengpi-charleng

Areca L. Arecaceae (Palmae)

From the Indian vernacular name, *arec* or *atakka*, in Kerala; among the Nairs *areca* means “cavalier”. See Carl Linnaeus, *Species Plantarum*. 2: 1189. 1753, *Genera Plantarum*. Ed. 5. 496. 1754, *Genera Plantarum* 37. 1789, *Magazine of Natural History* 4: 333. 1840 and Claudio Urbano B. Pinheiro and Michael J. Balick, “Brazilian palms. Notes on their uses and vernacular names, etc.” in *Contributions from the New York Botanical Garden*. Volume 17. 1987.

Areca catechu L. (*Areca catechu* Willdenow; *Areca catechu* Burm.f.; *Areca faufel* Gaertn.; *Areca himalayana* Griff. ex H. Wendl.; *Areca hortensis* Lour.; *Areca nigra* Giseke ex H. Wendl.; *Sublimia areca* Comm. ex Mart., nom. inval.) (the specific epithet probably from *kachu*, an astringent substance.)

Malesia. Solitary trunk, quite straight, slender, unarmed, unbranched, monoecious palm, root system superficial, leaves sheathing arranged spirally, sheath completely encircling the stem like a tube, on the stem below the leaves erect inflorescence paniculate, very small male flowers very numerous, male flowers numerous borne above the female flowers, fruit a monospermous fibrous drupe, pericarp fibrous, seeds or kernels bluntly rounded, in humid tropical lowland

See *Species Plantarum* 2: 1189. 1753, *Fl. Ind.* (N.L. Burman) 241. 1768, *Flora Cochinchinensis* 2: 568. 1790, *Species Plantarum*. Editio quarta 4(1): 594–595. 1805, *Hist. Nat. Palm.* iii. 169. 1836 and *Nucleus* 18: 146–151. 1975, *Taxon* 28: 67. 1979, *Translational Research: the Journal of Laboratory and Clinical Medicine* 150(1): 58–65. 2007

(Used in Ayurveda, Unani and Sidha. Toxic arecoline. Nut as a masticatory agent, chewing it is said to strengthen muscles of vagina. Betel cancer, mouth cancer, the possible carcinogenic action of alkaloids of tobacco and betel nut, upper alimentary tract cancer, carcinoma of the mouth. Fruits and leaves tonic and laxative. Bark powder anthelmintic. Seeds/nuts antibacterial, antifungal, vermifuge, aphrodisiac, astringent, nervine tonic, emmenagogue, used for tapeworm and roundworm infestation, abdominal pain, diarrhea, dyspepsia, edema and tenesmus, urinary disorders and snakebite; glaucoma, eyedrops for external use; slight stimulant, green nuts used for hallucinogenic effects; juice of tender nuts act as a laxative when taken in small doses; burned nuts used as a dentifrice. Roots of *Scleria purpurascens* together with roots of *Areca catechu* and *Rubus glomeratus* boiled together and the extract drunk as an astringent for diarrhea. Ceremonial, used in religion and magico-religious-supernatural beliefs, offerings and *pujas*, fruits and immature nuts given as an offering to Gods along with betel leaves, also offered to the dead before cremation by the members attending the cremation; nuts used in performing sorceries and magical device; hard endosperm used as symbol of Lord Ganesh. Veterinary medicine, bark powder anthelmintic, vermifuge against tapeworm in animals.)

in English: adike tree, areca nut, areca nut palm, areca palm, betel nut, betel nut palm, betel palm, catechu, catechu palm, penang palm

Gray; *Stellaria lanuginosa* Torr. & A. Gray; *Stellaria laxa* Muschl.)

North America, Peru. Perennial herb

See *Flora Boreali-Americana* 1: 275. 1803, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 7: 201. 1816, *A Sketch of the Botany of South-Carolina and Georgia* 1(6): 519. 1821, *A Flora of North America: containing ...* (Torr. & A. Gray) 1(2): 187. 1838, *Smithsonian Contributions to Knowledge* 5(6): 18. 1853, *Flora Brasiliensis* (Martius) 14(2C): 274. 1872 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 578–638. 1937, *Publications of the Field Museum of Natural History, Botanical Series* 23(2): 50–51. 1944, *Fieldiana, Bot.* 24(4): 217–239. 1946, *American Midland Naturalist* 46(2): 498–499. 1951, *Annals of the Missouri Botanical Garden* 48(1): 93. 1961, *Brittonia* 33(3): 326. 1981, *Fieldiana, Bot.*, n.s. 13: 227–247. 1983, *Sida* 21(2): 753. 2004

(A kidney remedy. Cold infusion used as lotion on forehead for headache; plant infusion a lotion for pimples, eye drops.)

in English: spreading sandwort

in Ecuador: chinchi mani

Arenaria melanandra (Maximowicz) Mattfeld ex Handel-Mazzetti (*Cerastium melanandrum* Maximowicz)

China. Herb, white flowers, alpine meadows

See *Species Plantarum* 1: 437–440. 1753, *Bull. Acad. Imp. Sci. Saint-Petersbourg*, sér. 3, 26: 429. 1880 and *Symb. Sin.* 7(1): 202. 1929

(For bladder and kidney ailments.)

in China: hei rui wu xin cai

Arenaria przewalskii Maximowicz

China. Perennial herb

See *Bull. Acad. Imp. Sci. Saint-Petersbourg*, sér. 3, 26: 428. 1880

(Whole plant astringent, antibacterial, for skin diseases.)

in China: fu lu cao

Arenaria serpyllifolia Linnaeus (*Arenaria brevifolia* Gilib.; *Arenaria leptoclados* Gussone; *Arenaria leptoclados* (Rchb.) Guss.; *Arenaria petiolata* Hayata; *Arenaria serpyllifolia* Bourq. ex Willk. & Lange; *Arenaria serpyllifolia* subsp. *leptoclados* Čelak.; *Arenaria serpyllifolia* var. *leptoclados* Rchb.)

China. Prostrate, flower in terminal cyme, capsule globose with persistent calyx

See *Species Plantarum* 1: 423. 1753, *Icones florum germanicae et helveticae* 5: 32. 1841, *Florae Siculae Synopsis* 2: 824. 1844, *Prodromus Florae Hispanicae* 3: 619. 1878 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 38–39. 1913, *Taxon* 30: 829–842. 1981, *Fl. Medit.* 6: 223–243. 1996, *Opera Bot.* 137: 1–42. 1999

(Plant antitussive, depurative, diuretic and febrifuge. Leaves decoction used in the treatment of dysentery, bladder complaints, calculus troubles and acute and chronic cystitis.)

in English: thyme-leaf sandwort

in China: wu xin cai

Arenaria triflora L. (*Alsinanthus triflorus* (L.) Desv.; *Arenaria triflora* Vill.; *Cernohorskyia triflora* (L.) Á. Löve & D. Löve)

Europe, North America.

See *Mantissa Plantarum* 2: 240. 1771, *Prospectus de l'Histoire des Plantes de Dauphiné* 48. 1779, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 5: 223. 1816 and *Preslia* 46: 127. 1974

(Plant used as a purgative.)

Arenga Labill. Arecaceae (Palmae)

From Malayan or Moluccan native name *areng*; see *Bulletin des sciences, par la Société Philomatique*. [*Bull. Sci. Soc. Philom. Paris.*] 2: 162. Paris 1800, *Ann. Mus. Hist. Nat.* 9: 288. 1807, *Rumphia* 2: 128. 1843, *Gen. Pl.* 3: 917. 1883 and *Interpr. Rumph. Herb. Amboin.* 119. 1917, O. Beccari & R.E.G. Pichi Sermolli, "Subfamiliae Arecoidearum Palmae Gerontogaeae. Tribuum et Generum Conspectus." 25 Mar. 1955, seors. impr. ex *Webbia*. 11: 1–187. 31 Mar. 1956, *Principes* 4: 113–114. 1960.

Arenga obtusifolia Mart. (*Gomutus obtusifolius* Blume, nom. inval.; *Saguerus langbak* Blume)

Thailand, Java.

See *Bull. Sci. Soc. Philom. Paris* 2: 162. 1800 and *Proceedings of the Indian Science Congress Association* 74(3,VI): 199–200. 1987

(Irritant.)

in India: betta thengu, daddaala, doodha sela, kaadu thengu, masuuti

Arenga pinnata (Wurmb) Merr. (*Arenga gamuto* Merr.; *Arenga griffithii* Seem. ex H. Wendl.; *Arenga saccharifera* Labill.; *Borassus gomutus* Lour.; *Caryota onusta* Blanco; *Gomutus rumphii* Corrêa; *Gomutus saccharifer* (Labill. ex DC.) Spreng.; *Gomutus saccharifer* Spreng.; *Gomutus vulgaris* Oken; *Saguerus gamuto* Houtt., nom. inval.; *Saguerus*

pinnatus Kuntze; *Saguerus pinnatus* Wurmb; *Saguerus rumphii* (Corrêa) Roxb. ex Ainslie; *Saguerus saccharifer* (Labill. ex DC.) Blume; *Saguerus saccharifer* Blume; *Sagurus gomutus* Perr.; *Sagurus gomutus* (Lour.) Perr.)

China, Malesia. Unbranched, solitary stout palm, roots black very strong, crown dense, erect to spreading leaves, inflorescence usually unisexual pendulous, female inflorescences 3–7 formed at the top, male ones 7–15 lower on the stem, fruit a globose to ellipsoid drupe fleshy 2–3-seeded, seed black, primary and secondary lowland forest

See *Diss. de Sagu* 21. 1757, *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 1: 351. 1781, *Bull. Sci. Soc. Philom. Paris* 2: 162. 1800, *Mémoires de la Société Linnéenne de Paris* 3: 142. 1824, *Syst. Veg.* (ed. 16) [Sprengel] 2: 624. 1825, *Fl. Filip.* [F.M. Blanco] 741. 1837, *Allg. Naturgesch.* 3(1): 675. 1841, *Rumphia* 2: 128, t. 123–124. 1843, *Calcutta J. Nat. Hist.* 5: 474. 1845, *Palmiers* [Kerchove] 232. 1878, *Revis. Gen. Pl.* 2: 736. 1891 and *Philipp. J. Sci.*, C 9: 63. 1914, *An Interpretation of Rumphius's Herbarium Amboinense* 119. 1917, *Proceedings of the Indian Science Congress Association* 74(3,VI): 199–200. 1987

(The juice of the ripe fruit seems to be poisonous. The fruit-wall and the fruit are full of needle-crystals (stinging raphides) exceedingly irritant to the mouth. The green peel of the unripe fruit is poisonous and causes serious skin reactions on contact because of the calcium oxalate crystals. Young roots for kidney stones, old roots for toothache; root decoction of *Arenga saccharifera* stomachic and taken for bronchitis. Fresh unfermented juice taken against chronic constipation. Fruits as fish poison.)

in English: areng palm, red sugar palm, sugar palm

in Burma (Myanmar): taung-ong

in Cambodia: chraè, chuëk'

in India: alam panai, cekovarici, kumutippanai, thang tung, thanglung, thangtung

in Indonesia: aren, enau, gula aren, gula merah, gula panguh, kawung

in Laos: ta:w ta:d

in Malaysia: berkat, enau, kabong

in Philippines: bagobat, hidiok, kaong

in Thailand: chok, tao

in Vietnam: b[us]ng b[as]ng, do[as]c, do[as]t

in Pacific: cabo negro

Arenga westerhoutii Griff. (*Saguerus westerhoutii* (Griff.) H. Wendl. & Drude)

Bhutan to Pen. Malaysia.

See *Bull. Sci. Soc. Philom. Paris* 2: 162. 1800 and *Plant Systematics and Evolution* 189: 83–122. 1994

(Juice from the fruit used to poison enemies. The fruit-wall and the fruit are full of needle-crystals (stinging raphides) exceedingly irritant to the mouth.)

in English: langkap palm, Westerhouts sugar palm

Malayan name: langkap

Arenga wightii Griff. (*Saguerus wightii* (Griff.) H. Wendl. & Drude; *Saguerus wightii* H. Wendl. & Drude)

India. Monoecious palm, male and female spadices separated, extraction of starch and palm vine

See *Calcutta J. Nat. Hist.* 5: 475. 1845, *Palmiers* [Kerchove] 256. 1878

(Pith to cure venereal diseases; stem pith and leaves for jaundice.)

in English: the wild coconut

in India: ala panai, alam panai, alam panel, alampanai, alapanai, alathil thenga, alathilthenga, alattitenna, azhathumpana, dadice, dhadashi, dhiudasal, dhudasal, karampana, karampanai, kattu thengu, kattutenna, kattuthengai, kattu-thengu, katuthenna, malam tenggu, malan tenggu, nettippana, njettippana, panai

Arethusa L. Orchidaceae

Named after Arethusa, a wood nymph, by Artemis (Diana) was changed into a stream; see Carl Linnaeus, *Species Plantarum*. 2: 950–951. 1753, *Genera Plantarum*. Ed. 5. 407. 1754, *Diss. Bot. Zool.*: 40. 1769.

Arethusa bulbosa L. (*Arethusa bulbosa* f. *albiflora* E.L. Rand & Redfield; *Arethusa bulbosa* f. *subcaerulea* E.L. Rand & Redfield)

North America.

See *Sp. Pl.*: 2: 950. 1753, *Fl. Mt. Desert Isl.*: 152. 1894 and *Taxon* 30: 845–851. 1981, *Huntia* 7: 224. 1987

(For toothache.)

Argemone L. Papaveraceae

Greek *argemon* ‘cataract’ (*argos* ‘white’), possibly because this plant was reputed to cure cataract of the eye, or also because in some species the leaves are white-spotted and the flowers are white; Plinius used Latin *argemon*, *i* for *Lappa canaria* L., *argemone*, *es* and *argemonia*, *ae* for an herb or a plant; see Carl Linnaeus, *Species Plantarum*. 508. 1753 and *Genera Plantarum*. Ed. 5. 225. 1754 and *Fieldiana, Bot.* 24(4): 347–354. 1946, *Fl. Veracruz* 22: 1–16. 1982.

Argemone albiflora Hornem. (*Argemone alba* Lestiboudois; *Argemone albiflora* subsp. *texana* G.B. Ownbey; *Argemone albiflora* var. *texana* (G.B. Ownbey) Shinnery)

North America. Herbaceous, stout, prickly, erect, massive woody taproot, yellow latex sap, cymose arrangement of large showy white flowers from the upper leaf axils

See *Botanographie Belgique* ed. 2, part 3, 2: 132. 1799, *Hortus Regius Botanicus Hafniensis* 2: 489. 1815 and *Mem. Torrey Bot. Club* 21(1): 135. 1958

(Leaves infusion demulcent, emetic and purgative. Caution, seed oil can cause glaucoma and edema. Plant infusion in the treatment of jaundice, skin ailments, colds, colic and wounds.)

in English: blue-stem prickly poppy, bluestem pricklypoppy, white prickly poppy, white prickly poppy

in India: kutiyottup-puntu

Argemone aurantiaca G.B. Ownbey

USA. Herb, white flowers

See *Species Plantarum* 1: 508–509. 1753 and *Memoirs of the Torrey Botanical Club* 21(1): 53–56, f. 6. 1958, Stermitz, F.R. “Alkaloid chemistry and the systematics of *Papaver* and *Argemone*.” *Recent Advances Phytochem.* 1: 161–183. 1968, Stermitz, F.R., Nicodem, D.E., Wei, C.C., and McMurtrey, K.D. “Alkaloids of *Argemone polyanthemus*, *A. corymbosa*, *A. chisosensis*, *A. sanguinea*, *A. aurantiaca* and general *Argemone* systematics.” *Phytochemistry* 8: 615–620. 1969

(Alkaloids.)

in English: Texas prickly poppy

Argemone chisosensis G.B. Ownbey

USA. Flower pale pink to lavender

See *Species Plantarum* 1: 508–509. 1753 and *Memoirs of the Torrey Botanical Club* 21(1): 114–115, f. 17: 5–6, f. 18. 1958, Stermitz, F.R., Nicodem, D.E., Wei C.C., and McMurtrey, K.D. “Alkaloids of *Argemone polyanthemus*, *A. corymbosa*, *A. chisosensis*, *A. sanguinea*, *A. aurantiaca* and general *Argemone* systematics.” *Phytochemistry* 8: 615–620. 1969

(Alkaloids.)

in English: Chisos Mountain prickly poppy, pink prickly poppy

Argemone corymbosa Greene (*Argemone intermedia* Sweet var. *corymbosa* (Greene) Eastwood)

North America.

See *Species Plantarum* 1: 508–509. 1753, *Bulletin of the California Academy of Sciences* 2: 59. 1886, *Erythraea* 4(6): 96. 1896 and Stermitz, F.R., Nicodem, D.E., Wei, C.C., and McMurtrey, K.D. “Alkaloids of *Argemone polyanthemus*, *A. corymbosa*, *A. chisosensis*, *A. sanguinea*, *A. aurantiaca* and general *Argemone* systematics.” *Phytochemistry* 8: 615–620. 1969

(Alkaloids.)

Argemone hispida A. Gray (*Argemone bipinnatifida* Greene; *Argemone platyceras* Link & Otto; *Argemone platyceras* var. *hispida* (A. Gray) Prain; *Enomegra bipinnatifida* (Greene) A. Nelson)

USA, New Mexico. Perennial herb

See *Icon. Pl. Rar.* [Link & Otto] 85, t. 43. 1831, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 5. 1849, *Journal of Botany, British and Foreign* 33: 367. 1895, *Pittonia* 3: 346. 1898 and *Botanical Gazette* 34(5): 365–366. 1902, *Mem. Torrey Bot. Club* 21(1): 66–67, 103. 1958

(Leaves infusion to relieve kidney pain; ground seeds cathartic, burn dressing, for sores; seeds infusion cathartic. A tea made from prickly poppy taken to cause expulsion of the remaining portion of a torn placenta.)

in English: crested prickly poppy, rough pricklypoppy

Argemone mexicana L. (*Argemone barclayana* Penny ex Loudon; *Argemone leiocarpa* Greene; *Argemone mexicana* fo. *leiocarpa* (Greene) G.B. Ownbey; *Argemone mexicana* subsp. *ochroleuca* (Sweet) Schwarzbach; *Argemone mexicana* var. *lutea* Kuntze; *Argemone mexicana* var. *mexicana*; *Argemone mexicana* var. *ochroleuca* (Sweet) Lindl.; *Argemone mexicana* var. *parviflora* Kuntze; *Argemone mexicana* var. *typica* Prain, nom. inval.; *Argemone mucronata* Dum. Cours. ex Steud.; *Argemone ochroleuca* Sweet; *Argemone sexualis* Stokes; *Argemone spinosa* Moench; *Argemone spinosa* Gaterau; *Argemone sulphurea* Sweet ex Loudon; *Argemone versicolor* Salisb.; *Argemone vulgaris* Spach; *Echtrus mexicanus* Nieuwl.; *Echtrus mexicanus* (L.) Nieuwl.; *Echtrus trivialis* Lour.)

East Africa, Malawi, Zambia. Annual or short-lived herb, glabrous glaucous, bushy, erect, branched, usually prickly, tap-root, acrid unpleasant-smelling yellow sticky sap, leaves alternate without stalks more or less sheathing the stem, flowers solitary subtended by leafy bracts, prickly sepals, yellow petals, spiny capsule, nearly spherical seeds, a serious weed

See *Species Plantarum* 1: 508–509. 1753, Gaterau, (fl.1789), *Description des Plantes qui Croissent aux Environs de Montauban* 99. Montauban: Chez l'auteur et chez Charles Crosilhes, 1789, *Flora Cochinchinensis* 1: 344. 1790, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 227. 1794, *Prodr. Stirp. Chap. Trop. Plant Sci. Res. 1: 1–13. 1983, *Cytologia* 53: 647–652. 1988, *Bot. Žurn.* (Moscow & Leningrad) 76: 904–905. 1991, *Glimpses Cytogenet. India* 3: 188–198. 1992, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda, Unani and Sidha. All parts, seed oil and seeds poisonous to animals and man; toxic only if large quantities eaten. Seeds narcotic, hallucinogen, sedative, pesticide, insecticide, cathartic, diuretic, alterative, cholagogue, antiinflammatory, sudorific, emmenagogue, vulnerary, depurative, laxative, emetic, expectorant, demulcent, an antidote to snake poison, for the treatment of epilepsy and cancer; seed paste applied in skin diseases. Oil from the seeds for skin diseases, on sores, caries, pyorrhea. Seeds of *Argemone mexicana* crushed with fruits of *Cleistanthus collinus* and applied in skin diseases. Plant infusion for difficult and burning urination. Latex used in eye disease, cough, toothache, applied externally for wounds; yellow sap of stem applied externally to treat syphilis; yellow latex of tender shoots for treating jaundice, conjunctivitis, as eye drops, also applied on ulcer, boils, syphilis, eczema and scorpion sting. Seeds and roots powdered for mild dermatitis. Root paste applied to scorpion sting and ant bite; powdered root to cure menorrhagia, when mixed with oil used for eczema; root juice given for piles, chronic cough; bitter roots infusion taken for regulating fertility; roots decoction taken for cough and malaria. Aerial parts of *Andrographis paniculata* with *Argemone mexicana*, dried and powdered and taken to cure jaundice. Veterinary medicine, root decoction given to cure anthrax; seeds of *Cassia auriculata* (*Senna auriculata*) along with stem bark of *Pongamia pinnata*, latex of *Argemone mexicana* pounded and the extract applied for skin diseases.)

in English: devil's fig, Mexican poppy, Mexican prickly poppy, prickly poppy, Texas poppy, thistle, thistle poppy, thistley bush, yellow-flowered Mexican poppy, yellow poppy, yellow thistle

Argemone munita Durand & Hilgard

North America.

See *J. Acad. Nat. Sci. Philadelphia* ser. 2, 3: 37. May 1855 (*Plantae Heermannianae* 37. 1854) and *Bull. Torrey Bot. Club* 29: 160. 1902, *Mem. Torrey Bot. Club*. 21: 77, 83. 1958

(Mashed seeds to treat burns, applied as a salve.)

in English: flatbud prickly poppy

Argemone munita Durand & Hilgard subsp. *munita*

North America. Annual or perennial herb

See *J. Acad. Nat. Sci. Philadelphia* ser. 2, 3: 37. May 1855 (*Plantae Heermannianae* 37. 1854) and *Bull. Torrey Bot. Club* 29: 160. 1902, *Mem. Torrey Bot. Club*. 21: 77, 83. 1958

(Mashed seeds to treat burns, applied as a salve.)

in English: flatbud prickly poppy, flatbud pricklypoppy

Argemone ochroleuca Sweet subsp. *ochroleuca*

South Africa. Annual or short-lived herb, glabrous glaucous, bushy, erect, branched, usually prickly, tap-root, acrid unpleasant-smelling yellow sticky sap, leaves alternate without stalks more or less sheathing the stem, white flowers solitary subtended by leafy bracts, prickly sepals, spiny capsule, nearly spherical seeds, a serious weed

See *Species Plantarum* 1: 508–509. 1753, *Prodr. Stirp. Chap. Allerton* 376. 1796, *A Botanical Materia Medica* 3: 195. 1812, *The British Flower Garden*, ... 3: pl. 242. 1828, *Hortus Britannicus* 216. 1830, *Edwards's Botanical Register* 16: pl. 1343. 1830, *Gardener's Magazine and Register of Rural and Domestic Improvement* 6: 115. 1830 and *American Midland Naturalist* 3: 350. 1914, *Cytologia* 53: 647–652. 1988, *Bot. Žurn. (Moscow & Leningrad)* 76: 904–905. 1991, *Glimpses Cytogenet. India* 3: 188–198. 1992

(Plant infusion febrifuge, diaphoretic, tonic, for difficult and burning urination. Latex used in eye disease, cough, toothache, applied externally for wounds; yellow latex of tender shoots for treating jaundice, conjunctivitis, as eye drops, also applied on ulcer, boils, syphilis, eczema and scorpion sting. Powdered root to cure menorrhagia.)

in English: blessed thistle, Mexican poppy

in East Africa: ekijembajembe, mkumajalaga

in Ghana: akusuribie, anansemmeyaa

in Lesotho: hlabahlabane (e putsoa)

Argemone pleiacantha Greene (*Argemone platyceras* Link & Otto)

USA, New Mexico.

See *Repertorium Specierum Novarum Regni Vegetabilis* 6: 161. 1908

(Leaves infusion to relieve kidney pain. A tea made from prickly poppy taken to cause expulsion of the remaining portion of a torn placenta.)

Argemone polyanthemus (Fedde) G.B. Ownbey (*Argemone intermedia* auct. non Sweet; *Argemone intermedia* var. *polyanthemus* Fedde; *Argemone platyceras* auct. non Link & Otto)

North America. Annual, biennial or perennial herb

See *Species Plantarum* 1: 508–509. 1753 and *Das Pflanzenreich* IV. 104: 283. 1909, *Memoirs of the Torrey Botanical Club* 21(1): 128. 1958, Stermitz, F.R., D.E. Nicodem, Wei C.C., and K.D. McMurtrey. “Alkaloids of *Argemone polyanthemus*, *A. corymbosa*, *A. chisosensis*, *A. sanguinea*, *A. aurantiaca* and general *Argemone* systematics.” *Phytochemistry* 8: 615–620. 1969

(Sap used for sore eyes; warmed root for toothache; seeds used on burns, sores or cuts, a wash for sore eyes, rubbed into hair to kill head lice, taken as an emetic. Ceremonial.)

in English: crested prickly poppy, crested pricklypoppy

Argemone sanguinea Greene (*Argemone platyceras* Link & Otto var. *rosea* J.M. Coulter)

North America. Herb, perpendicular prickles on the sepals, seeds provide food for mourning doves and bobwhite quail

See *Species Plantarum* 1: 508–509. 1753, *Icones plantarum rariorum horti regii botanici berlinensis* ... 1: 85, pl. 43. 1828, *Contributions from the United States National Herbarium* 1: 30. 1890, *Pittonia* 4(21A): 68. 1899 and Stermitz, F.R., D.E. Nicodem, Wei C.C., and K.D. McMurtrey. “Alkaloids of *Argemone polyanthemus*, *A. corymbosa*, *A. chisosensis*, *A. sanguinea*, *A. aurantiaca* and general *Argemone* systematics.” *Phytochemistry* 8: 615–620. 1969

(Alkaloids.)

in English: red poppy, red prickly poppy, rose prickly poppy, spiny prickly poppy

Argemone subfusiformis G.B. Ownbey subsp. *subfusiformis* (*Argemone mexicana* subvar. *gynophora* Fedde; *Argemone mexicana* var. *beta* Gay; *Argemone mexicana* var. *gamma* Gay; *Argemone mexicana* var. *glauca* Barnéoud ex Reiche; *Argemone mexicana* var. *gynophora* J.F. Macbr.)

Argentina.

See *Flora Chilena* 1: 100. 1845, *Anales de la Universidad de Chile* 88: 98. 1894 and *Das Pflanzenreich* 104: 278. 1909, *Field Museum of Natural History, Botanical Series* 13(2/3): 934. 1937, *Brittonia* 13(1): 91–109. 1961

(Juice narcotic, vulnerary. Leaves ocular antiseptic, febrifuge; whole plant colagogue; flowers against pleurisy;

capsule antispasmodic. Antitussive, purgative, digestive, diaphoretic, emetic.)

in Argentina: cardo amarillo, cardo santo

Argentina Hill Rosaceae

See *The British Herbal* 6. 1756.

Argentina egedii (Wormsk.) Rydb. (*Potentilla anserina* subsp. *egedii* (Wormsk.) Hiitonen; *Potentilla anserina* L. subsp. *pacifica* (Howell) Rousi; *Potentilla anserina* var. *egedii* (Wormsk.) Torr. & A. Gray; *Potentilla egedii* Wormsk.)

North America. Perennial herb

See *Flora Danica* 9(27): 5, pl. 1578. 1818, *A Flora of North America*: containing ... 1(3): 444. 1840, *A Monograph of the North American Potentilleae* 158. 1898 and *Opera Bot.* 52: 1–38. 1979, *Rhodora* 99: 33–55. 1997

(A paste of boiled roots and oil applied to sores and swellings.)

in English: Eged’s Pacific silverweed, Pacific silverweed

Argentina egedii (Wormsk.) Rydb. var. *egedii* (*Potentilla anserina* subsp. *egedii* (Wormsk.) Hiitonen; *Potentilla anserina* L. subsp. *pacifica* (Howell) Rousi; *Potentilla anserina* var. *egedii* (Wormsk.) Torr. & A. Gray; *Potentilla anserina* L. var. *grandis* Torr. & A. Gray; *Potentilla anserina* L. var. *lanata* B. Boivin; *Potentilla anserina* L. var. *rolandii* (B. Boivin) B. Boivin; *Potentilla egedii* Wormsk.; *Potentilla egedii* Wormsk. subsp. *grandis* (Torr. & A. Gray) Hultén; *Potentilla egedii* Wormsk. var. *grandis* (Torr. & A. Gray) J.T. Howell; *Potentilla pacifica* Howell; *Potentilla rolandii* B. Boivin)

North America. Perennial herb

See *Flora Danica* 9(27): 5, pl. 1578. 1818, *A Flora of North America*: containing ... 1(3): 444. 1840, *A Monograph of the North American Potentilleae* 158. 1898 and *Opera Bot.* 52: 1–38. 1979, *Rhodora* 99: 33–55. 1997

(A paste of boiled roots and oil applied to sores and swellings; root juice as a wash for inflamed eyes.)

in English: Eged’s Pacific silverweed, Pacific silverweed

Argostemma Wallich Rubiaceae

From the Greek *argos* ‘white’ and *stemma* ‘crown, garland, wreath’, referring to the inflorescence, see *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 324. 1824.

Argostemma hameliifolium Wernham (*Argostemma hullettii* Ridl.; *Argostemma isophyllum* Merr.)

Borneo. Herb

See *Journal of the Linnean Society, Botany* 42: 89. 1914, *J. Bot.* 65: 35. 1927, *Mitt. Inst. Allg. Bot. Hamburg* 7: 279. 1937

(For stomach pain in babies at night, applied over abdomen as poultice and bandage, used with *Linariantha bicolor*.)

Malay name: uru adong

Argusia Boehmer Boraginaceae

Latin Argus and Greek Argos was the hundred-eyed keeper of Io, see *Species Plantarum* 1: 140–141. 1753, *Definitiones Generum Plantarum* 507. 1760, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 8: 315. 1763 and *Fieldiana, Bot.* 24(9/1–2): 111–167. 1970, *Botanical Journal of the Linnean Society* 65(2): 256. 1972, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988, *Taxon* 41: 571. 1992, *Taxon* 44: 611–612. 1995.

Argusia gnaphalodes (L.) Heine (*Heliotropium gnaphalodes* L.; *Mallotonia gnaphalodes* (L.) Britton; *Messerschmidia gnaphalodes* (L.) I.M. Johnst.; *Tournefortia gnaphalodes* (L.) R. Br. ex Roem. & Schult.)

Caribbean. Shrub, much-branched, often as *Tournefortia gnaphalodes*

See *Systema Naturae*, Editio Decima 2: 913. 1759, *Systema Vegetabilium* 4: 538. 1819 and *Annals of the Missouri Botanical Garden* 2: 47. 1915, *Journal of the Arnold Arboretum* 16(2): 165–166. 1935, *Flore de la Nouvelle Calédonie et Dépendances* 7: 108. 1976

(Leaf decoction taken for venereal disease, as antidote for fish poisoning. Decoction used externally for rheumatism. Leaf decoction, taken with *Krameria ixine*, is a strong abortifacient. Leaves burned in house to drive out fleas.)

Argyreia Loureiro Convolvulaceae

Greek *argyreios* ‘silvery’, *argyros* ‘silver’, referring to the underside of the leaves; see J. de Loureiro, *Flora cochinchinensis: sistens plantas in regno Cochinchina nascentes*. 1: 95, 134. 1790, *Flora Indica*; or descriptions of Indian Plants 2: 75. 1824, *Mémoires de la Société de Physique et d’Histoire Naturelle de Genève* 6: 431. 1833, *A General History of the Dichlamydeous Plants* 4: 254, 256. 1838, *Genera Plantarum* 655. 1839 and *Fl. Madagasc.* 171: 3–287. 2001.

Argyreia acuta Loureiro (*Argyreia festiva* Wallich; *Lettsomia chalmersii* Hance; *Lettsomia festiva* (Wallich) Benth & J.D. Hooker)

China, Laos. Shrub, scandent, corolla white

See *Fl. Cochinch.* 1: 135. 1790, *Florae Peruvianaes, et Chilensis Prodromus* 77. 1794, *Plantae Asiaticae Rariores* 1: 68–69, pl. 76. 1830, *Journal of Botany, British and Foreign* 16(188): 230–231. 1878

(Antioxidant.)

in China: bai he teng

Argyreia bella Raiz. (*Argyreia bella* (C.B. Clarke) Raizada; *Lettsomia bella* C.B. Clarke)

India. Climber, reddish flowers

See *Fl. Brit. India* [J.D. Hooker] 4: 192. 1883 and *Indian Forester* xciii. 754. 1967, *Taxon* 30: 695. 1981

(Tonic, stimulant, stomachic.)

in India: cheet

Argyreia capitiformis (Poiret) van Ooststroom (*Argyreia capitata* (Vahl) Choisy; *Argyreia rufohirsuta* H. Léveillé; *Argyreia verrucosohispida* Y.Y. Qian; *Convolvulus capitatus* Vahl; *Convolvulus capitiformis* Poiret; *Ipomoea capitata* (Vahl) Roemer & Schultes; *Lettsomia capitata* (Vahl) Blume; *Lettsomia capitiformis* (Poiret) Kerr; *Lettsomia peguensis* C.B. Clarke; *Lettsomia strigosa* Roxburgh)

SE Asia. Climbing herb

See *Fl. Malesiana*, ser. 1. 6(6): 941. 1972

(Leaves used externally for treating trauma; leaf ash used in eruption at the junction of ear pinnae.)

in Bangladesh: anuway khujeya

in China: tou hua yin bei teng

in Myanmar: min-go-ga, nwe-ni, nwe-phyu

Argyreia cuneata Ker Gawl. (*Argyreia cuneata* (Willd.) Ker Gawl.; *Convolvulus cuneatus* Willd.; *Rivea cuneata* (Ker Gawl.) Wight)

India. Herb, climbing, shrubby

See *Bot. Reg.* 8: t. 661. 1822, *Icon. Pl. Ind. Orient.* [Wight] 3(2): 8, t. 890. 1845 [1844–1845]

(Plant used for the treatment of arthritis and diabetes; tender twigs of *Argyreia cuneata* ground with *Dodonaea viscosa*, stem bark of *Bridelia retusa*, feces of goat, egg albumen, made into a paste applied for bone fracture. Root extract given to initiate labor pain and easy delivery; ground roots boiled and the extract given after delivery to expel the placenta, postpartum remedy; oot paste applied on scabies. Veterinary medicine, leaves extract given to cattle in anorexia and swelling of throat.)

in English: purple convolvulus

in India: aachaari gida, achhe gida, achhegide bondwail, halle balli, kaalu kukana gida, kallana gida, kallana hambu, kallana mele, kallanegida, mahulungi, nettaru

Argyreia cymosa Sweet

India.

See Sweet, Robert (1783–1835), Sweet’s *Hortus britannicus*: or a catalogue of plants cultivated in the gardens of Great Britain, arranged in natural orders 289. London: James Ridgway, 1826

(Fresh root juice as eye drops; root decoction given with milk to treat burning micturition. Veterinary medicine, crushed leaves applied over cuts and wounds.)

in India: peruna, siradu

Argyreia fulgens Choisy

India.

See *Convolv. Orient.* 33. 1834

(Used in Ayurveda. For the treatment of arthritis, rheumatism.)

in India: vrddhadaruka

Argyreia hirsuta Arn. (*Argyreia hirsuta* Wight & Arn.; *Rivea zeylanica* Thwaites var. *hirsuta* (Wight & Arn.) Thwaites)

India. Climber

See *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 18(1): 356. 1836, *Enum. Pl. Zeyl.* [Thwaites] 209. 1860 and *Cytologia* 44: 275–286. 1979

(Roots used for cuts, wounds.)

in India: periya veru

Argyreia hookeri C.B. Clarke (*Rivea hookeri* (C.B. Clarke) Hallier f.)

Himalaya. Climber

See *Bull. Herb. Boissier* 7: 60. 1899

(Boiled leaves applied to reduce swelling.)

in India: bhiliku, bilikhu

Argyreia imbricata (Roth) Santapau & Patel

India.

See *Trans. Bose Res. Inst. Calc.* xxii. (Convolv. Bomb. Addit. & Corr.) 40. 1958

(For rheumatism.)

in India: errakuta, jaajugarana hambu

Argyreia kleiniana (Roem. & Schult.) Raizada

India. Climber

See *Indian Forester* xcii. 302. 1966

(Used in Sidha. A plant extract taken internally to cure an upset stomach; milky latex from stem and leaves for chronic eczema. Veterinary medicine, tender leafy twigs fed to cattle to increase lactation.)

in India: cevvattai, musute kodi, onankodi

Argyreia malabarica Arn. ex Choisy

India.

See *Convolv. Orient.* 38. 1834

(Used in Ayurveda and Sidha. For rheumatism.)

in India: akayappuritakkoti, akayappuritam, cirumucuttai, katalatakam, katalatakki, katalatakikkoti, katalakalakki, katalakalakkiceti, katarkalakki, kattukalangu, kattukelengu, kattukilannu, kudure balli, maasoota, mosuti, musute, paymoostey, perumucuttai, peyccinki, peyccinkikkoti, peymucuttai, peymusti, vrddhadaruka

(Used in Ayurveda. For diabetes. Aphrodisiac and tonic, to treat jaundice and hepatitis, whole plant crushed and mixed along with water and sugar, taken orally. Veterinary medicine, whole plant given to goats to increase milk and butter production.)

in Pakistan: makhan booti, makkhi booti

Argyrobium strigosum Blatt.

India. Perennial non-climbing herb

See *Journal of the Indian Botanical Society* ix. 205. 1930

(Cooling.)

in India: tervikae

Ariocarpus Scheidweiler Cactaceae

The genus *Aria* (Pers.) Host and Greek *karpos* 'fruit', referring to the *Aria*-like fruit; see Michael Joseph Scheidweiler (1799–1861), "Descriptio diagnostica nonnullarum Cactearum quae a domino Galeotti in provinciis Potosi et Guanaxato regni Mexicani inveniuntur. Genus *Ariocarpus*." in *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 5(8): 491–492, f. 1–5. 1838 and *Cactus and Succulent Journal* 13: 98. 1941, Edward F. Anderson & W.A. Fitz Maurice, "Ariocarpus revisited." in *Haseltonia*. 5: 1–20. 1997, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997.

Ariocarpus fissuratus (Engelm.) K. Schum. (*Anhalonium fissuratum* (Engelm.) Engelm.; *Mammillaria fissurata* Engelm.; *Roseocactus fissuratus* (Engelm.) A. Berger)

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 3: 270. 1856, *Report on the United States and Mexican Boundry Survey, Cactaceae* 75. 1859, *Die Natürlichen Pflanzenfamilien* 106[III, 6a]: 195. 1894 and *Journal of the Washington Academy of Sciences* 15(3): 46. 1925

(Narcotic.)

in Mexico: peyote cimarrón, sunami

Arisaema Martius Araceae

From the Greek *aris*, *aron* 'arum' and *haima*, *haimatos* 'blood', referring to a close alliance to the genus *Arum*, or to the spotted leaves of some species; see Li Hen, "Arisaema." in Wu Cheng Yih and Li Hen, *Flora Republica Popularae Sinicae*. 13(2): 116–194. 1979, H. Ohashi and J. Murata, "Taxonomy of the Japanese *Arisaema* (Araceae)." *Journal of the Faculty of Science of the University of Tokyo*, Sect III. 12: 281–336. 1980, D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 17. 1988, Grayum, M.H. "Evolution and phylogeny of the Araceae." *Ann. Missouri Bot. Gard.* 77: 628–697. 1990, Gusman, G. & Gusman, L. *The Genus Arisaema*. A monograph for botanists and nature lovers, ed. 2. A.R.G. Gantner Verlag K.G., Ruggell. 2006.

Arisaema album N.E. Br. (*Arisaema alba* N.E. Br.)

India.

See *J. Linn. Soc., Bot.* 18: 247. 1882

(Used in Ayurveda.)

in India: nagapuspi, nagini

Arisaema barnesii C.E.C. Fisch. (*Arisaema tylophorum* C.E.C. Fisch.)

Sri Lanka, India.

See *Bull. Misc. Inform. Kew* 1933: 342, 346. 1933, Govaerts, R. *World Checklist of Seed Plants*. (Used in Sidha. All parts of plant are poisonous if ingested, leaves and tubers described as irritant and vesicant; low toxicity, all animals may be affected. The plant contains calcium oxalate raphide crystals, as do many other members of the family *Araceae*. When ingested, these crystals can cause severe pain and burning in the lips, mouth, and throat. Ingesting Jack-in-the-pulpit causes a burning sensation, with associated inflammation, edema and salivation. Roots edible

when dried or cooked, never eat raw, the roots are intensely bitter and can cause blisters. Plant decoction as a blood purifier. Root infusion purgative and also to treat asthma, colds, bronchitis; as a poultice for sore eyes; tuberous rootstock roasted and applied to chronic ulcers; rhizome infusion used by women as a contraceptive.)

in North America: American wake robin, bog onion, brown dragon, cuckoo plant, dragonroot, Indian-turnip, Jack-in-the-pulpit, nikso kororik kahtsua nitawau, pepper turnip, petit-prêcheur mikasi-maka, starchwort, wild turnip

in India: mitthi-vaimim, pampuceti

Arisaema utile Hook. f. ex Schott (*Arisaema utile* Hook. f. ex Engl.; *Arisaema utile* var. *meeboldii* Engl.; *Arisaema verrucosum* Schott var. *utile* (Hook. f. ex Engl.) Pradhan; *Arisaema verrucosum* var. *utile* (Hook.f. ex Schott) Pradhan)

India, Himalaya, China.

in Somalia: baradooli, birreh, marchain

in Senegal: diarhat, negeret, paldinak, paldinaq, sirin

Aristolochia L. Aristolochiaceae

Possibly from the Sanskrit *arшти*, ancient Persian *arsti* ‘spear’ (Sanskrit *arsh*, *arsh* ‘to sting’; Swedish *rista* ‘to lacerate, to tear’) and Sanskrit *ruh*, *rôh-âmi* (*luh*, *lôh-âmi*) ‘to grow’, *rôh-i* (*lôh-i*) ‘plant, tree’; in some species the leaves are lance-shaped; or from the Greek *aristolochia*, *aristolochieia* (*aristolochos*), *aristos* ‘the best, most excellent’ and *locheia* ‘childbirth’, ancient name for a plant supposed to ease parturition; see Carl Linnaeus, *Species Plantarum*. 2: 960–962. 1753, *Genera Plantarum*. Ed. 5. 410. 1754, *Genera Plantarum* 72–73. 1789, *American monthly magazine and critical review* 4: 195. 1819, *Commentationes Botanicae* 30. 1822, *First Catalogues and Circulars of the Botanical Garden of Transylvania University* 13. 1824, *Botanical Register*; consisting of coloured ... 10: t. 862. 1824, *Conspectus Regni Vegetabilis* 85. 1828, *Medical Flora* 1: 62. 1828, *Medical Flora* 2: 232. 1830, *Gardener's Magazine and Register of Rural and Domestic Improvement* 8: 247. 1832, *Flora Telluriana* 4: 97–99. 1836[1838], *Handbuch des Natürlichen Pflanzensystems* 173. 1837, *Förhandlingar; Skandinaviske Naturforskernes Möte* 1844: 203–204. 1847, *Annales des Sciences Naturelles; Botanique, série 4* 1: 65–66, f. 10 and série 4 2: 29–30. 1854, *Monatsberichte der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1859: 584, 607. 1859, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 435. 1864 and *Flora of West Tropical Africa* 1: 75. 1927, *Bull. Aristolochia argentina Griseb. (*Aristolochia glaberrima* Hassl.; *Aristolochia parviflora* Griseb.)

Argentina.

See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 156. 1874, *Symbolae ad Floram Argentinam* 148. 1879 and *Opera Lilloana*. 16: 1–145. 1967

(Diuretic, diaphoretic, emmenagogue, antiseptic.)

Aristolochia bracteata Retz.

Ethiopia, East Africa. Small herb, usually prostrate, flower tube shaped like uterus, weedy

See *Species Plantarum* 2: 960–962. 1753, *Observationes Botanicae* (Retzius) 5: 29. 1791 and *Taxon* 28: 393–395. 1979, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda and Sidha. Plant useful in the treatment of prolapsed uterus and for an easy delivery (Doctrine of Signatures); anthelmintic and a gastric stimulant, used in the treatment of cancer, lung inflammation, dysentery and snake-bites. Antibacterial activity of dried root extracts; ground dried roots taken with hot water to treat stomachache. Leaves juice given for easy delivery; leaves for diabetes and to control excess bleeding during menstruation; paste of leaves applied on boils, wounds, eczema; leaf powder or paste applied on scabies. Veterinary medicine, seeds of *Anogeissus latifolia* along with roots of *Aristolochia bracteata* pounded, boiled in water and the decoction given in insect bite; leaves juice applied to the wounds with weevils; leaves paste applied for foot diseases.)

in Nigeria: zagaduwa
