(May cause photosensitization in goats and sheep.)

in English: blue panic grass, coloured Guinea grass, Coolah grass, Keria grass, Klein grass, Kleingrass, small buffalo grass, small panicum, white buffalo grass

in Arabic: qosseiba

Panicum decompositum R. Br. (*Panicum decompositum* Rendle, nom. illeg., non *Panicum decompositum* R. Br.; *Panicum proliferum* var. *decompositum* (R. Br.) Thell.) (Latin *decompositus, a, um* ‘much divided, more than once divided, divided twice’, *compono, posui, positum* ‘set together, to bring into union, to unite’)

Pacific Islands, Australia, South Australia, Western Australia, Queensland, New South Wales, Victoria, Northern Territory. Perennial or annual decreaser species, herbaceous culms, densely tufted and leafy, erect, more or less branched, large and stout tussocks, base hairy and thickened, hollow stem, sheaths usually glabrous or smooth, ligule membranous, flat leaves green to bluish-green, panicles many-branched with spreading and wavy branchlets, spikelets glabrous pale green to purplish and pedicellate, first glume hyaline and subtruncate, lower lemma sterile, fertile lemma smooth and shining, rather small grains cooked or ground into a powder and used as a flour, good palatable fodder for stock, shiny and dark seeds a food source for seed-eating birds and small rodents,

occurs on the banks and floodouts of streams and in valley floors with alluvial soils, good soils, damp sandy soils, grassland and woodland, dry and moist conditions, floodplains, the seeds flow about on water, intolerant of and susceptible to heavy grazing, ornamental grass, useful for erosion control

See *Prodromus Florae Novae Hollandiae* 191. 1810, *Flora Indica; or descriptions ...* 1: 310. 1820, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 105. 1885 and *Journal of the Linnean Society, Botany* 36(253): 330. 1904, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 52: 435. 1908, *Journal of the Linnean Society, Botany* 41: 269. 1912, *Queensland Agricultural Journal* 30: 314. 1913

(May cause photosensitization, the leaves might cause photosensitization.)

in English: Australian millet, native millet, papa grass, tindil, umbrella grass, windmill grass

Panicum deustum Thunb. (*Panicum arundinifolium* Schweinf.; *Panicum corymbiferum* Nees ex Steud.; *Panicum deustum* Brickell & Enslin ex Muhlenb., nom. illeg., non *Panicum deustum* Thunb.; *Panicum deustum* var. *eburneum* Chiov.; *Panicum deustum* var. *hirsutum* Peter; *Panicum leptocaulon* Trin.; *Panicum menyharthii* Hack.; *Panicum pubivaginatum* K. Schum.; *Panicum unguiculatum* Trin.) (Latin *deustus, a, um* ‘burned, scorched’, part. *deuro, urere, ussi, ustum* ‘to burn down, to destroy’) (named for the botanical collector Ladislav Menyharth, 1849–1897, see Hans Schinz, 1858–1941, *Plantae menyharthianae ein Beitrag zur Kenntniss der Flora des Unteren Sambesi ...* Wien 1905)

Tropical Africa, Ethiopia, Kenya, Uganda, Tanzania, Sudan, South Africa, Zambia, Mozambique. Perennial bunchgrass or annual, variable, reddish to purplish, stout, slender or robust, branched or unbranched, pubescent, tufted, shortly rhizomatous, sometimes rooting at lower nodes, leaf sheath round and hairy, ligule membrane-like, leaves with scabrid margin, open ovate panicle with solitary branching, spikelets oblong obtuse, lower floret male, glumes separated by a short internode, lower glume ovate, palatable and nutritious pasture grass, high grazing value, grains edible, grains eaten by baboons, useful for erosion control, found in disturbed sites, open areas, under trees, bushland, moist soils, sandy and alluvial soils, coastal forests, shady places, in rock quarry, rocky hillsides, loam or sandy soils, on waste grounds, riverbanks, rocky soil in woods, black basaltic soil

Panicum obtusum Kunth (*Brachiaria obtusa* (Kunth) Nash; *Oplismenus obtusum* (Kunth) Smyth; *Panicum polygonoides* Müll. Hal., nom. illeg., non *Panicum polygonoides* Lam.; *Panicum repente* Buckley)

Mexico, USA, Texas, New Mexico, Arizona. Perennial sodgrass, light bluish-green, nodes of runners swollen and densely hairy, stems and leaves coarse, leaves flat to somewhat inrolled at the edges, inflorescence with branches closely appressed to the main stem, large and blunt seeds, useful grass, medicinal, livestock graze the foliage and inflorescence, provides fair forage for all grazing animals while green, stems and leaves lose much of their palatability on drying, coarse and unpalatable after maturity, excellent as an erosion control plant, usually grows in swales and mud flats, along banks of streams or ditches, bottomland and highly productive soils, lowlands with fine-textured soils and along drainages that are irrigated at times by flood waters

See *Nova Genera et Species Plantarum* 1: 98–99. 1815 [1816], *Botanische Zeitung. Berlin* 19(44): 323. 1861, *A Preliminary Report on the Geological and Agricultural Survey of Texas* App. 3. 1866, *Transactions of the Kansas Academy of Science* 16: 164. 1899 and *Manual of the Flora of the northern States and Canada* 77. 1901

(For dermatological problems.)

in English: blunt panic grass, grapevine-mesquite, obtuse panic grass, panic grass, vine-mesquite, vine mesquite grass, wiregrass

in Mexico: panizo mezquite, purga de paridas, zacate correa, zacate de agua, zacate gramilla, zacate guía

Panicum oligosanthes Schultes var. *scribnerianum* (Nash) Fernald (*Dichantherium oligosanthes* (Schult.) Gould var. *helleri* (Nash) Mohlenbr.; *Dichantherium oligosanthes* (Schult.) Gould var. *scribnerianum* (Nash) Gould; *Panicum helleri* Nash; *Panicum macrocarpon* Leconte ex Torr.; *Panicum macrocarpon* Torr., nom. illeg., non *Panicum macrocarpon* J. Le Conte ex Torr.; *Panicum oligosanthes* var. *scribnerianum* (Nash) Beetle, nom. illeg., non *Panicum oligosanthes* var. *scribnerianum* (Nash) Fernald; *Panicum oligosanthes* Schult. var. *helleri* (Nash) Fernald; *Panicum scoparium* S. Watson ex Nash, non Lam.; *Panicum scribnerianum* Nash) (named for Frank L. Scribner (1851–1938), grass specialist in the U.S. Department of Agriculture)

USA, California, Wisconsin. Annual or perennial, small bunchgrass, smooth or slightly hairy, erect or ascending, simple and branched, hairs at node, sheath covered with fine stiff hairs growing from small bulbs, ligule a very short fringe of hairs, leaves ascending, no auricles, short pyramidal panicle, hairy spikelets, seedhead open, reddish-purple stigmas, grain lined, fair grazing for wildlife and livestock, food for song birds, palatable and nutritious to livestock, occurring on dry open soil, in open prairies and disturbed ground, meadows and seeps, sandy flats, savanna, meadow habitats

See *A Flora of the Northern and Middle Sections of the United States* 143. 1823, *Mantissa* 2: 256. 1824, *Bulletin of the Torrey Botanical Club* 22(10): 421. 1895, *Bulletin of the Torrey Botanical Club* 26(11): 572. 1899 and *Rhodora* 36(423): 80. 1934, *Brittonia* 26(1): 60. 1974, *Phytologia* 48(2): 192. 1981

(Ceremonial, disinfectant, medicine.)

in English: few-flowered panic grass, few-flowered witchgrass, panic grass, rosette panic grass, Scribner dichantherium, Scribner panicum, Scribner's panic grass, Scribner's rosette grass, small panic grass

in Mexico: zacate de hoja ancha

Panicum queenslandicum Domin

Indonesia, Australia. Perennial, erect, densely caespitose, forming dense tussocks, culms fibrous and smooth, green to purplish spikelets paired and lanceolate, seeds dark and shiny, fruits and seeds blow in the wind, seeds a food source for seed-eating birds and small rodents, foliage eaten by stock and native animals

See *Repertorium Specierum Novarum Regni Vegetabilis* 10: 58. 1911

(May cause photosensitization in sheep.)

in Australia: Coolabah grass, Coolibah grass, Yabila grass, Yadbila grass

Panicum repens L. (*Panicum aquaticum* Hochst. ex A. Rich., nom. illeg., non *Panicum aquaticum* Poir.; *Panicum arenarium* Brot.; *Panicum arenarium* M. (Used in Ayurveda, Sidha and Unani. Fresh plant paste tonic, stimulant, for nervous breakdown and gonorrhoea. Veterinary medicine, a mixture of *Elytraria acaulis* powder, seed powder of *Panicum sumatrense* applied as plaster to the broken horns of cow

in English: blue panic, Indian millet, little millet, sama, small millet

in Spanish: mijo pequeño, mijo sumatrense

in India: bajra, bhadli, bilee saame hullu, bili saame, bili saame hullu, camai, chak-tipli, chamai, chamala hullu, gadro, ganga samulu, gondula, gundli, halvi-vari, kaadu kari saame hullu, kodaikanai, kungu, kuren pullu, kuri, kutki, nalla shaama, nalla shaamalu, nallachamalu, pattupullu, peru saamai, piva pullu, saamai, saamaaka, saavaa, sadan samai, saka, sama, samai, samalu, samo, sava, save, shaama pullu, shaamai, shaame, shama, shamai, shame, shavan, shyamaaka, suniva, vari, vari-gudhi, vari-mahan

in Sri Lanka: hin meneri, shamai

in Vietnam: k[ee] sumatra

Panicum trichanthum Nees (*Milium microspermum* Lag.; *Panicum guayaquilense* Steud.; *Panicum microspermum* (Lag.) E. Fourn.; *Panicum microspermum* E. Fourn. ex Hemsl.; *Panicum trichanthum* A. Rich., nom. illeg., non *Panicum trichanthum* Nees; *Panicum trichanthum* var. *modestum* Döll)

South America. Annual, branching, scrambling, long-stemmed, climbing, trailing, green fruits, weed, found in open and disturbed site at river's edges, damp places, roadsides

See *Genera et species plantarum* 2. 1816, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 210. 1829, *Tentamen Florae Abyssinicae ...* 2: 375. 1850, *Synopsis Plantarum Glumacearum* 1: 85. 1854, *Flora Brasiliensis* 2(2): 248. 1877, *Biologia Centrali-Americana; ... Botany ...* 3: 492. 1885, *Mexicanas Plantas* 2: 492. 1886 and *Contr. U.S. Natl. Herb.*

15: 131. 1910, *Brittonia* 23(3): 293–324. 1971, *Darwiniana* 30(1–4): 87–94. 1990, *Annals of the Missouri Botanical Garden* 81(4): 768–774. 1994

(Rhizomes aromatic, emollient and diuretic, sometimes used as excitant.)

in English: thicket panic grass

in Brazil: andacaá, capim andacaá, capim mimoso, capim vindecaá

Panicum tricholaenoides Steud. var. ***flavomarginatum*** (Mez) Zuloaga (*Panicum flavomarginatum* Mez)

Paraguay. In forest

See *Synopsis Plantarum Glumacearum* 1: 68. 1854 [1853] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 2. 1921, *Candollea* 46(2): 540. 1991

(Used in Sidha.)

in India: acanankai, atalai, cimaiccopiceti, cimaiccopitam, cironikaceti, cironikam, elippakam, elippalai, eliyal, eliyamanakku, kantukaci, kantukaciyamanakku, kattamanakku, nikumpam, pancamukaceti, pancamukaruttiran, pauttiravaceti, pauttiravam, puliyamanakku, viccittiram, utalai, utulai

Panicum trypheron Schult. (*Panicum curviflorum* Hornem.; *Panicum phragmitoides* Stapf; *Panicum roxburghii* Spreng.; *Panicum tenellum* Roxb., nom. illeg., non *Panicum tenellum* Lam.) (from the Greek *trypheros*, on 'delicate, tender, soft-fleshed, dainty')

Southeast Asia, Sri Lanka, India. Annual or short-lived perennial, erect or geniculate, leaves hirsute to pilose, eaten by cattle, grains used for making bread in times of scarcity, growing in damp places, depressions, ditches, plantations, along roadsides

See *Hortus Regius Botanicus Hafniensis* Suppl. Suppl.: 116. 1819, *Flora Indica; or descriptions ...* 1: 309. 1820, *Mantissa* 2: 244. 1824, *Systema Vegetabilium, editio decima sexta* 1: 320. 1825, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 2(1): 181. 1899 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 7: 62–63, f. 33. 1918, *Flora of Tropical Africa* 9: 677. 1920, *Journal of Japanese Botany* 38(3): 84. 1963, *Journal of Cytology and Genetics* 21: 152–154. 1986, *Blumea* 34: 79. 1989, *Journal of Cytology and Genetics* 25: 322–323. 1990

(Root paste given in cough and cold; root juice given to eradicate worms from the stomach.)

in India: adavi sathagaddi, bhatur, kaadu kari saame, kaadu kari saame hullu, kadukarai samai hullu, kempu sanna hanchi, lota, mihri, samai karunai, shamai karunai

in Sri Lanka: shamai karunai, wal meneri

Panicum turgidum Forssk. (*Panicum turgidum* Hochst. ex Steud., nom. illeg., non *Panicum turgidum* Forssk.)

Northern and NE Africa, Sahara, Chad, Pakistan. Perennial desert grass, erect or ascending, hard, coarse, woody, shrubby, suffrutescent, solid, many-noded, rooting and branching at the nodes, rootstock stout, stems bamboo-like and smooth, stiff pungent leaf blades linear-lanceolate, seed with convex and flat sides, the grain looks like millet, roots with a felty appearance, root fibres strong and woody, tanning agent, fodder plant, young leaves and shoots very palatable, eaten by camels and donkeys, grain eaten by the Tuareg people, ground into a flour and made into porridge, can withstand long periods of drought, resistant to saline soils, useful for erosion control and for binding sand, a valuable species for rehabilitation of desert ranges and for sand dune stabilization

See *Flora Aegyptiaco-Arabica* 18. 1775, *Synopsis Plantarum Glumacearum* 1: 88. 1854 and J. Audru, G. Cesar, G. Forgiarini and J. Lebrun, *La Végétation et les Potentialités Pastorales de la République de Djibouti*. Institut d'Élevage et de Médecine Vétérinaire des Pays Tropicaux, Maisons-Alforts, France 1987, J. Harlan, "Wild grass seeds as food in the Sahara and sub-Saharan." *Sahara* 2: 69–74. 1989, S. Tilahun, S. Edwards and T.B.G. Egziabher, editors, *Important Bird Areas of Ethiopia*. Ethiopian Wildlife and Natural History Society. Semayata Press. Addis Ababa, Ethiopia 1996

(Plants used as a vulnerary agent, powder from ground stems used for healing wounds.)

in English: afezu grass, basket grass, desert grass, desert panic grass, Sahara millet, wild grain grass

in Arabic: abukar, afazu, afezou (grains), afezu, az, aze, bochar, bokkar, bou rekba, bu rekuba, dorran, goumshi, goushi, hade, markuba, markouba, morkba, mrekbba, mrokba, murkba, nnshe, sabat, safar, shush, taman, tammam, thaman, timam, tishilat, tuman, umm rekba, umn rekba

in Chad: wasarka

in Mali: afazo, afezu, afoajo, afodio, afodjo, burekuba, foyo, mrokba, ullul

in Mauritania: abukar, az, aze, markouba, morkba, morkeba, mrekbba, mrokba, murkba, nnshe, oumn-rokba, tishilat, umn rekba

in Morocco: ûmm-rekba, bû-rekba, mrokba, mmu rokba, tammâm, tmâm, tumâm, âfzû, âbûkar, âz, tisilat, tigusin, gusî, emselih

in Niger: afeza, afezu, afodio, afodjo, fadhik, foyo, gajalol, gumchi, markuba

in Sahara: afazu, morkebé

in Somalia: darif, dungara, dhu-ghasi

in Sudan: tumaan, tuman, taman

in Yemen: bukar

in India: munt, murut, murutagas, murutaghas

in Pakistan: dooth

1911, *Beihefte zum Botanischen Centralblatt* 32: 342. 1914, *American Midland Naturalist* 4: 212. 1915, *Rhodora* 24: 14–15. 1922, Nobumasa Ichizen et al., “Impacts of switchgrass (*Panicum virgatum* L.) planting on soil erosion in the hills of the Loess Plateau in China.” *Weed Biology and Management* 5(1): 31–34. 2005

(Leaves might cause photosensitization.)

in English: switch grass

Panicum whitei J.M. Black

Australia. Annual or perennial, leafy, growing rapidly, geniculate, erect, shiny, branched, usually slender, hay and silage, palatability variable, more palatable when dry, tolerates shallow seasonal flooding, grows in moist areas, lightly flooded plains, on red earth, on black or grey clays seasonally inundated

See *Transactions and Proceedings of the Royal Society of South Australia* 41: 632, t. 39. 1917

(Leaves might cause photosensitization in sheep.)

in English: pepper grass, pigeon grass, sugar grass

Papaver L. Papaveraceae

The old Latin name *papaver*, *papaveris*, Akkadian *papallu*, Sumerian *pa-pal* ‘bud, sprout’, Akkadian (*bir*)*birru* ‘to flame, to blaze’, Hebrew *bera* ‘fire, burning’, *ba’ar* ‘to burn’, Latin *buro*, *uro*, *-is*, *ussi*, *ustum*, *urere* ‘to burn’; see Carl Linnaeus, *Species Plantarum*. 1: 506–508. 1753, *Genera Plantarum*. Ed. 5. 224. 1754, *Genera Plantarum* 235–236. 1789, *Florae Graecae Prodromus* 1: 360. 1809, Felix de Avellar Brotero (1744–1828), *Noções geraes das dormideiras, da sua cultura, e da extracção do verdadeiro opio*, que ellas conte’m. [Small 8vo, first edn.] Lisbon 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 79. 1825, *Linnaea* 8: 843. 1833, *Histoire Naturelle des Végétaux. Phanérogames* 7: 16, 19, 21. 1839, *Flora Orientalis* 1: 115. 1867, *Die Natürlichen Pflanzenfamilien* 3(2): 142. 1889 and *Das Pflanzenreich* IV. 40(Heft 104): 290, 334. 1909, *Fieldiana, Bot.* 24(4): 347–354. 1946, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1037, 1125. New York 1967, *Taxon* 22: 580–581. 1973, Novák, J. and V. Preininger. “Chemotaxonomic review of the genus *Papaver*.” *Preslia* 59: 1–13. 1987, *Rhodora* 90: 11. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 78(5): 121–122. 1993, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 503. Leo S. Olschki Editore, Firenze 1994. The genus is quite complex cytologically. *Papaver* is rich in alkaloids, notably opiates.

Papaver aculeatum Thunb. (*Papaver gariepinum* Burch.; *Papaver gariepinum* Burch. ex DC.; *Papaver horridum* DC.) (Gariep River or Eijn River, South Africa; see Gilbert Westacott Reynolds, *The Aloes of South Africa*. 7, 18, 41, 402. Balkema, Rotterdam 1982)

South Africa. Herb, yellowish prickly hairs, orange flowers, tubular-shaped ovary, small black seeds, young plants cooked as vegetable

See *Prodromus Plantarum Capensium*, ... 92. 1794, *Syst. Nat.* [Candolle] 2: 79. 1821 and *Bot. Jahrb. Syst.* 109: 335–341. 1988

(When fully grown this plant is toxic.)

in English: bristle poppy, Californian poppy, poppy, red poppy, thorny poppy, wild poppy

in Lesotho: sehlohlo

in Southern Africa: doringpapawer, koringpapawer, korin-groos, rooipapawer, rooipoppie, sehloahloa, wilde papawer, wildepoppie

Bot.* 14: 162. 1994, *Linzer Biologische Beiträge* 26(1): 407–435. 1994, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Opera Botanica* 137: 1–42. 1999

(The plant may be potentially poisonous if animals ingest it. Ornamental and medicinal; rhoeadine, an alkaloid, and other alkaloids are found in corn poppy. The petals of “Shirley poppies” are said to be utilized in colouring drugs. The milk from the capsules is narcotic with a slightly sedative property and contains morphine in exceedingly minute proportion. This plant has poisoned cattle according to early European literature.)

in English: common poppy, corn poppy, field poppy, Flanders poppy

in China: yu mei ren

in Nepal: seti birauli

in Pakistan: Gul-e-lala

in North America: coquelicot, amapola

Papaver rubro-aurantiacum (Fisch. ex DC.) Lundstr. (*Papaver ledebourianum* Lundstr.; *Papaver nudicaule* fo. *nudicaule*; *Papaver nudicaule* L. subsp. *rubro-aurantiacum* (Fisch. ex DC.) Fedde; *Papaver rubro-aurantiacum* Fisch. ex DC.)

Europe.

See *Species Plantarum* 1: 506–508. 1753 and *Die Natürlichen Pflanzenfamilien* 4: 381. 1909

(This species has no narcotic value.)

in English: Iceland poppy

Papaver somniferum L. (*Papaver amoenum* Lindl.; *Papaver hortense* Hussenot; *Papaver somniferum* L. var. *album* DC.; *Papaver somniferum* var. *atroviolaceum* Maire; *Papaver somniferum* var. *coccineum* Maire; *Papaver somniferum* var. *hortense* (Hussenot) Rouy & Foucaud; *Papaver somniferum* var. *nigrum* DC.; *Papaver somniferum* L. var. *setigerum* auct. non (DC.) Corb.; *Papaver somniferum* var. *valdesetosum* Mair)

India. Herb, annual, robust erect, glaucous

See *Species Plantarum* 1: 506–508. 1753 and Danert, S. “Zur Systematik von *Papaver somniferum* L.” *Kulturpflanze* 6: 61–88. 1958, Stermitz, F.R. “Alkaloid chemistry and the systematics of *Papaver* and *Argemone*.” *Recent Advances Phytochem.* 1: 161–183. 1968, *Fl. (Used in Ayurveda, Unani and Sidha. The source of opium, and its modern derivatives. Opium used in diarrhea, diabetes and rheumatism, and it locally relieves pain. It is also an antidote to snake poison and scorpion sting. Seeds demulcent, nutritive (specially the dark grey and black ones) and mildly astringent, sedative and narcotic; fruits of *Solanum erianthum* ground with the rhizome of *Canna indica*, the flowers of *Rosa indica*, seeds of *Papaver somniferum* and sugar, given to cure syphilis.)

in English: opium poppy

in Arabic: khoch khache, bou en-noum, khashkhash aswad, boundi

in China: ying su, ying su ke, ying tzu shu

in India: aaphuka, abhini, abini, abu-an-naum, abunom, acarankam, afeem, afeemu gida, afim, afin, affirm, afium,

afiun, afu, afyun, ahifen, ahiphena, ahiphenam, amal, apenam, aphim, aphin, aphu, aphukam, apin, apini, apinicetti, atilam, avin, bazrul-khash-khash, biligasagase, biligasgase, bizrul khashkhash, bizrul-khashkhash, cacavinmayirttali, casa casa, cettanti, chosa, cukkumatantulam, doda, gasagasala, gasagasala-chettu, gasagasalu, gasagase, gasagase sippe, gasalu, gasha-gasha, gasha-gasha-chedi, gasha-gasha-tol, gashagasha, gasugasalu, iracanatikam, kakakaca, kakacacaceti, kacavanipam, kahs-khasa, kakasha, kaknar nim kofta, kani, kannatayacceti, karappu, kas-kas kasa-kasa, kasabijam, kasakasa, kasakase, kasakathi gida, kasha-kashach-chedi, kashakasha, kashkash, khakasa, khas-khas, khasa, khasa-khasi-gida, khasakhasi, khash-khash, khash-khash-ka-per, khash-khash-ke-bonde, khash-khash-ke-khash, khashkhash, khashkhash safaid, khashkhash safaid, khashkhashsafaid, khashkhashul baiza, khaskhas, khaskhasa, khaskhashinche baend, khuskhus, kokinar, koknar, koso-kosa, nabatul-khash-khash, koknar nim kofta, nagaphena, nallamandu, nallamanthu, opium, parunkam, pasto, pest, phaniphena, poast-i-khashkhash, poast khahkhash, poast khashkash, poast khashkhash, post, post-e-khashkhash, post-e-koknar, post-koknar, posta, posta-katol, postaka, postaka-chedi, postakai, postakaya-chettu, postakkaycceti, poste-khashkhash, poste koknar, postekoknar, posthakkai, posto, posts, posttakkai, postubejam, postukkaycceti, postuvrikshaha, qishrul-khash-khash, qishrul-khashkhash, qishrul khashkhash, qishrul-khashkhash, sufeed srah, tukhm-i-khashkhash, tukhm-i-khashkhash safaid, tukhm khashkash, tukhm khashkhash, tukhm khashkhas safaid, tukhm khashkhash safaid, tukhme-koknar, tukme koknar, ude saleeb, ullasata, vellai postakay

in Japan: chishi, keshi

in Nepal: aphim

in Pakistan: afim, post or dodda and khaskhash (names applied to the alkaloid, capsule and seeds)

in Vietnam: a phien, a phu dung, anh tuc, chu gia dinh, lao fen

in North America: common poppy, opium poppy, pavot commun

in Mexico: adormidera, amapola de opio, guia-guiña, nocuana-bizuono-huceochoga-becale, nocuana bizuono huecochaga becala, quie-guiña, quije guiña

Papilionanthe Schltr. Orchidaceae

Latin *papilio*, *papilionis* ‘a butterfly, moth, tent’ and Greek *anthos* ‘flower’, an allusion to the beautiful flowers; Greek *papyllion* ‘tent’; see *Orchis* 9: 80. 1915.

Papilionanthe hookeriana (Rchb.f.) Schltr. (*Vanda hookeri* auct.; *Vanda hookeriana* Rchb.f.)

Malesia, Vietnam.

See *Bonplandia* 4: 324. 1856 and *Orchis* 9: 80. 1915

(Hot leaves poultice applied for rheumatism and pains in the joints.)

Malay name: tulang

Papilionanthe subulata (Willd.) Garay (*Aerides cylindrica* Lindl., nom. illeg.; *Cymbidium cylindricum* B. Heyne ex Wall., nom. inval.; *Epidendrum subulatum* J. König, nom. illeg.; *Limodorum subulatum* Willd.; *Papilionanthe cylindrica* (Lindl.) Seidenf.; *Papilionanthe subulata* (J. Koenig) Garay)

India.

See *Observ. Bot.* 6: 51. 1791, *Species Plantarum*. Editio quarta 4: 126. 1805, *Numer. List.* 7317. 1832, *Gen. Sp. Orchid. Pl.*: 240. 1833 and *Botanical Museum Leaflets* 23(10): 372. 1974

(To treat eczema.)

Papilionanthe teres (Roxb.) Schltr. (*Dendrobium teres* Roxb.; *Dendrobium teres* Lindl.; *Papilionanthe teres* Schltr.; *Papilionanthe teres* f. *candida* (Rchb.f.) Christenson; *Papilionanthe teres* f. *candida* Christenson; *Vanda teres* Lindl.; *Vanda teres* (Roxb.) Lindl.; *Vanda teres* var. *candida* Rchb.f.)

Nepal, China, Vietnam. Epiphyte, herb, thread-like coriaceous leaves, pinkish yellow flowers with green streaks, conical spur and lobed tip

See *Hortus Bengalensis*, or a catalogue ... 63. 1814, *Numer. List* [Wallich] n. 7324. 1832, *Fl. Ind.* ed. 1832, 3: 485. 1832, *Gen. Sp. Orchid. Plants*: 217. 1833, *Edwards's Botanical Register* 26: Misc. 51. 1840, *Gard. Chron.* 1875(2): 225. 1875, *FBI* 6: 49. 1890, *Revisio Generum Plantarum* 2: 655. 1891 and *Orchis. Bull.* 63(12): 1375. 1994

(Root juice given as a contraceptive. A decoction of flowers and stems of *Vanda teres* with flowers of *Heteropanax fragrans* given in general debility, also applied on forehead as a cooling agent. Contact therapy, a piece of stem tied on loin to protect an infant from cold and cough.)

in China: feng die lan

in India: mir-dan

Pappea Ecklon & Zeyher Sapindaceae

To honor the German (b. Hamburg) physician and botanist Karl (Carl) Wilhelm Ludwig Pappe, 1803–1862 (d. Cape Town), M.D. Leipzig 1827, professor of botany, published *A list of South African indigenous plants used as remedies by the colonists of the Cape of Good Hope*. Cape Town 1847 and *Florae capensis medicae prodromus*. Cape Town 1850; see *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 53. [Dec 1834-Mar 1835], P. MacOwan, "Personalalia of botanical

collectors at the Cape." *Trans. S. Afr. Philos. Soc.* 4(1): xxx-liiii. 1884–1886 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 47. 1965, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 270–272. 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 533–534. 1994.

Pappea capensis Ecklon & Zeyher (*Baccaurea capensis* Spreng.; *Blighia unijugata* Baker; *Choritaenia capensis* (Sond. & Harv.) Burt Davy; *Pappea capensis* Sond. & Harv., nom. illeg., non *Pappea capensis* Eckl. & Zeyh.; *Pappea capensis* Eckl. & Zeyh. var. *radlkoferi* (Schweinf.) Schinz; *Pappea capensis* var. *radlkoferi* (Schweinf. ex Radlk.) Schinz; *Pappea fulva* Conrath; *Pappea radlkoferi* Schweinf.; *Pappea radlkoferi* Schweinf. ex Radlk.; *Pappea radlkoferi* Schweinf. ex Penz.; *Pappea radlkoferi* var. *angolensis* Schltr.; *Pappea ugandensis* Baker f.; *Phialodiscus unijugatus* (Baker) Radlk.; *Sapindus pappea* Sond., nom. illegit.)

South Africa, SE Africa. Tree, leafy, spreading, prostrate scrambler, slow-growing, short trunk, small flowers green-yellow, furry green capsules, shiny dark red-brown to black oval seeds, juicy orange-to-pink flesh edible, bee forage, leaves browsed by animals, fodder for cattle and goats during dry periods, ripe and unripe fruits eaten raw, ripe fruits liked by birds, found in bushland and wooded or bushed grassland

See *Species Plantarum* 1: 367. 1753, *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 1: 53. 1835, *Flora Capensis* 2: 562. 1862, *Genera Plantarum* 1: 907. 1867, *Flora of Tropical Africa* 1: 427. 1868, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. aba (Zulu); iliTye, umGqalutye, ilitye (Xhosa); kambeje
(Ndebele); liLatsa (Swazi); gulaswimbi (Thonga); xikwak-
waxu (Tsonga); sikwakwashe (Shangaan); mothata (Tswana);
Western Transvaal, northern Cape, Botswana); mopennweng
(Kgatla and Kwena dialects, Botswana); morobaliepe (North
Sotho); mongatane, moroba-diepe (= axe-breaker) (North
Sotho); chitununu (Shona)

in Tanzania: getakhubay, iyarampimbi, kiboboyo, mbamba
ngoma, mboboyo, mhungulu, mjaghamba, mnenge,
momange, mtori, mtula-ikufa, muanga, muliwa-mpango,
mwikalatulo, mwunza, oldimigomi, orimigomi

Papuechites Markgr. Apocynaceae

From Papua New Guinea plus *Echites*, see *Nova Guinea* 14:
287–288. 1925.

Papuechites aambe (Warb.) Markgr. (*Anodendron aambe*
Warb.; *Ichnocarpus bertieroides* Wernham ex S. Moore;
Papuechites aambe Markgr.; *Strophanthus aambe* Warb.)

New Guinea, Bismarck Arch.

See *Bull. Sci. Soc. Philom. Paris* 3: 122. 1802, *Botanische
Jahrbücher für Systematik, Pflanzengeschichte und
Pflanzengeographie* 13: 407, 454. 1891 and *Nova Guinea* 14:
287–288. 1925

(Sap squeezed from the stem and placed onto a sore.)

in Papua New Guinea: kap

Parabaena Miers Menispermaceae

From the Greek *para* ‘near, similar to, beside’ and *baō, bainō*
‘to go, walk’, alluding to the climbing or spreading nature,
see *Annals and Magazine of Natural History* 7: 35, 39. 1851.

Parabaena sagittata Miers

Nicobar Isl. Slender climber, milky juice, membranous
leaves, white flowers in axillary dichotomous inflorescences,
leaves and shoots used as vegetable

See *Annals and Magazine of Natural History*, ser. 2, 7(37):
39. 1851, *FBI* 1: 96. 1872 and *Economic Botany* 43(2): 215–
224. 1989

(Leaves for treatment of fracture; for snakebite leaf paste
boiled in coconut oil and applied on incision; for skin dis-
eases extract of roots applied externally.)

in India: chiongbombuelu, han-richang, ruirangte

Paracalyx Ali Fabaceae (Phaseoleae)

From the Greek *para* ‘beside, near’ and *kalyx* ‘a calyx’, see
Univ. Stud. Karachi 5: 95. 1968.

Paracalyx scariosus (Roxb.) Ali (*Cylista scariosa* Roxb.)

India, Pakistan. Perennial climbing shrub, woody twiners,
yellow flowers in axillary peduncled inflorescence, tubers
eaten as a vegetable

See *University Studies [Karachi, Pakistan]* 5: 95. 1968, *J.
Bombay Nat. Hist. Soc.* 82: 489–500. 1984, *J. Econ. Taxon.
Bot.* 7(2): 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–
334. 1992

(Used in Ayurveda. Roots used to cure fracture by bandag-
ing with crushed roots, and also taken orally with water;
roots decoction, cumin seeds and candy given for stomach-
ache; root decoction given in leucorrhoea, dysentery, also used
externally for skin diseases. Leaf juice vermifugal, an anti-
dote to snakebite.)

in India: adavi kandi, ran-ghevada, ranghevada, sogurmottu,
toranvel

Paracostus C.D. Specht Costaceae (Zingiberaceae)

Greek *para* ‘near, similar to’ plus *Costus* L., see *Taxon* 55(1):
162 (157, fig. 1). 2006.

Paracostus englerianus (K. Schum.) C. Specht (*Costus eng-
lerianus* K. Schum.; *Costus unifolius* N.E. Br.)

West Africa, Cameroon. Fleshy herb, creeping, branched,
white flowers with yellow throat

See *Gardener’s chronicle*, ser. 3 12: 696. 1892, *Botanische
Jahrbücher für Systematik, Pflanzengeschichte und
Pflanzengeographie* 15: 419, t. 13. 1893 and *Taxon* 55(1): 162.
2006

(Leaf and stem sap to treat edema and fever, to treat urethral
discharges, venereal diseases, jaundice and to prevent mis-
carriage. Leaves rubbed on children’s feet to help them walk.)

Paracroton Miq. Euphorbiaceae

Greek *para* ‘near, similar to’ with *Croton* L., see *Species
Plantarum* 2: 1004–1005. 1753, *Bijdragen tot de flora van
Nederlandsch Indië* 619–620. 1826, *Flora van Nederlandsch
Indië* 1(2): 382. 1859, *Prodromus Systematis Naturalis Regni
Vegetabilis* 15(2): 1256. 1866.

Paracroton pendulus (Hassk.) Miq. (*Croton pendulus*
Hassk.; *Fahrenheitia pendula* (Hassk.) Airy Shaw; *Ostodes
pendula* (Hassk.) A. Meeuse) (*Fahrenheitia* Reichb.f. &
Zoll., for the scientist Daniel Gabriel Fahrenheit, 1686–1736
(d. The Hague); see J.B. Gough, in *D.S.B.* 4: 516–518. 1981.)

India.

See *Pl. Jav. Rar.*: 266. 1848, *Fl. Ned. Ind.* 1(2): 382. 1859 and
Fl. Java 4c(112): 10. 1943, *Kew Bulletin* 20: 410. 1966

(The sap is irritating and painful.)

Parahemionitis Panigr. Pteridaceae (Adiantaceae, Hemionitidaceae)

Greek *para* 'near, beside, near by' and the genus *Hemionitis* L. *Hemionitis*, used by Strabo for the mule-fern, a species of *Scolopendrium*; from the Greek *hemionos* 'a mule', supposed to be barren, worn by women as a charm against pregnancy; Latin and Greek *hemionion* for a plant, called also *asplenium*. See Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 430. Ansbach 1852 and *American Fern Journal* 83(3): 90–92, f. 1. 1993.

Parahemionitis cordata (Hook. & Grev.) Fraser-Jenk. (*Hemionitis cordata* Hook. & Grev.)

India. Lithophytic herb

See *Icones Filicum* 1(4): t. 64. 1828 and *New Sp. Syndrome Indian Pterid. & Ferns Nepal* 187. 1997

(Fronde to treat earache.)

in India: elicheviyan

Parameria Benth. Apocynaceae

From the Greek *para* 'near, beside' and *meris* 'part', an allusion to the same floral parts, see *Genera Plantarum* 2(2): 715. 1876.

Parameria laevigata (Jussieu) Moldenke (*Aegiphila laevigata* Jussieu; *Chonemorpha densiflora* (Blume) G. Don; *Ecdysanthera barbata* (Blume) Miq.; *Ecdysanthera barbata* var. *angustior* Miq.; *Ecdysanthera densiflora* (Blume) Miq.; *Ecdysanthera glandulifera* (Wall. ex G. Don) A. DC.; *Ecdysanthera griffithii* Wight; *Echites barbatus* (Blume) D. Dietr.; *Echites densiflorus* Blume; *Echites torosus* Llanos, nom. illeg.; *Parameria angustior* (Miq.) Boerl.; *Parameria barbata* (Blume) K. Schumann; *Parameria barbata* var. *pierrei* (Pit.) Kerr; *Parameria glandulifera* S. Vidal; *Parameria glandulifera* Benth.; *Parameria glandulifera* (Wall. ex G. Don) Benth. ex Kurz; *Parameria glandulifera* var. *philippinensis* (Radlk.) Stapf; *Parameria glandulifera* var. *pierrei* Pit.; *Parameria glandulifera* var. *poilanei* Pit.; *Parameria philippinensis* Radlk.; *Parameria pierrei* Baill., nom. inval.; *Parameria pierrei* Seeligm.; *Parameria vulneraria* Radlk.; *Parsonsia barbata* Blume)

India. Straggling shrub, yellowish white flowers

See *Observationum Botanicarum* 2: 3. 1767, *Annales du muséum national d'histoire naturelle* 7: 76. 1806, *Memoirs of the Wernerian Natural History Society* 1: 64. 1811, *Bijdragen tot de flora van Nederlandsch Indië* 16: 1042. 1826, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 715. 1876, *Sitzb. Math.-Phys. Akad. Muench.* 14: 519. 1884, *Die Natürlichen Pflanzenfamilien* 4 2: 162. 1895 and *Revista Sudamericana de Botánica* 6: 76. 1940, *Chem. Pharm. Bull.* (Tokyo). 49(5): 551–557. 2001 [Studies on the constituents of bark of *Parameria laevigata* Moldenke.]

(Bark decoction given after childbirth for shrinking the uterus. All parts of plant are used to treat rheumatism, nephritis and injury; leaves and flowers emmenagogue. The odorous yellow-white balsam obtained by the bark and leaves is applied to wounds and cutaneous affections.)

in English: Cebu balsam, cebur balsam

in China: chang jie zhu

in Philippines: dugtung-ahas

Parameria polyneura Hook. f. (*Parameriopsis polyneura* (Hook. f.) Pichon)

India.

See *The Flora of British India* [J.D. Hooker] 3(9): 660. 1882 and *Bulletin du Muséum National d'Histoire Naturelle* II, 20: 300. 1948

(Bark used for wash after confinement, a postpartum remedy.)

Malay name: kayu serapat

Paramicrorhynchus Kirp. Asteraceae (Compositae)

Greek *para* 'near, beside' and the genus *Microrhynchus*, From the Greek *mikros* 'small' and *rhynchos* 'horn, beak', referring to the beak of the achenes, see *Syn. Comp.* 139. 1832.

Paramicrorhynchus procumbens (Roxb.) Kirp. (*Launaea fallax* (Jaub. & Spach) Kuntze; *Launaea fallax* Muschl.; *Launaea procumbens* (Roxb.) Ramayya & Rajagopal; *Launaea procumbens* (Roxb.) Amin; *Microrhynchus fallax* Jaub. & Spach; *Prenanthes procumbens* Roxb.; *Sonchus lakouensis* S.Y. Hu; *Sonchus mairei* H. Lév.; *Zollikoferia fallax* (Jaub. & Spach) Boiss.; *Zollikoferia fallax* Boiss.; *Zollikoferia leucodon* Fisch. & C.A. Mey.; *Zollikoferia leucodon* Fisch. & Mey. ex Boiss.)

India.

See *Compend. Fl. German.* 2: 305. 1825, *Flora Indica*; or descriptions of Indian Plants 3: 404. 1832, *Bulletin de la Société Impériale des Naturalistes de Moscou* 12: 161. 1839, *Illustrationes Plantarum Orientalium* 3: 106. 1848, *Flora Orientalis* [Boissier] 3: 824. 1875, *Revisio Generum Plantarum* 1: 350. 1891 and *Man. Fl. Egypt* ii. 1060. 1912, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 16. 1915, *Stud. Fl. (Leaf paste applied to treat skin diseases, eczema, ringworm; leaf decoction given in abdominal pain, colic, stomachache; leaf juice taken to kill tapeworms; green leaves eaten to reduce piles. For toothache, crushed roots kept on tooth.)

in India: motibhopatri, pathari, patri, pilibhopatri

Paraphlomis Prain Lamiaceae (Labiatae)

Greek *para* 'near, beside, near to' plus genus *Phlomis* L., see *Ann. Roy. Bot. Gard. (Calcutta)* 9: 60. 1901.

Paraphlomis javanica (Blume) Prain var. *coronata* (Vaniot) C.Y. Wu & H.W. Li (*Lamium coronatum* Vaniot; *Lamium gesneroides* Hayata; *Loxocalyx vaniotiana* H. Léveillé; *Paraphlomis rugosa* (Benth) Prain var. *coronata* (Vaniot) C.Y. Wu)

China.

See *Bull. Acad. Int. Géogr. Bot.* 14: 174. 1904, *Repert. Spec. Nov. Regni Veg.* 9: 224. 1911, *Icon. Pl. Formosan.* 8: 92. 1919, *Acta Phytotax. Sin.* 8: 38. 1959, *Acta Phytotax. Sin.* 13: 72. 1975

(A medicinal herb used for lung troubles, cough, and for irregular menstruation.)

in China: xiao ye bian zhong

Parartocarpus Baillon Moraceae

Greek *para* 'near, beside, near to' plus *Artocarpus* Forster & Forster f., see *Adansonia* 11: 294. 1875.

Parartocarpus venenosus (Zoll. & Moritzi) Becc. (*Parartocarpus triandra* (J.J. Smith) J.J. Smith; *Parartocarpus triandrus* J.J. Sm.; *Parartocarpus venenosa* Becc.; *Parartocarpus woodii* (Merr.) Merr.; *Parartocarpus woodii* Merr.)

Thailand. Dioecious tree, leaves obovate-oblong, inflorescences axillary solitary, fruit (syncarp) subglobose covered by spine-like protuberances, in mixed and evergreen forests, in peat-swamp forests

See *Enum. Philipp. Fl. Pl.* ii. 39. 1923, *Bull. Jard. Bot. Buitenzorg* ser. III, vi. 80. 1924, Jarrett, F.M. "Studies in *Artocarpus* and allied genera 1–4." *Journal of the Arnold Arboretum of Harvard University* 40: 1–38, 113–156, 298–369; 41: 73–141, 320–341. 1959–1960

(Unripe seeds are poisonous, ripe fruit is edible. The latex is used as arrow poison and as insecticide. Poisonous latex.)

in Indonesia: bulu ongko, purut

in Malaysia: tenggajun

in Philippines: buratu, malanangka, pangi

in Thailand: lee khaem, phayaa raak lueang

Parashorea Kurz Dipterocarpaceae

Greek *para* 'near, alongside, near to' and *Shorea* Roxb. ex Gaertn., see *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 39(2): 65. 1870.

Parashorea lucida Kurz (*Shorea lucida* Miq.)

Sumatra, Borneo. Tree, lowland forests

See *Fl. Ned. Ind., Eerste Bijv.* 3: 487. 1861 [Dec 1861], *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 39(2): 65–66. 1870

(Solidified resin from the trunk ground with gambir, see *Uncaria gambir* (Hunter) Roxb., mixed with honey and eaten as a remedy for urinary tract infections.)

in Indonesia: damar pepening, kayu intap

Parietaria L. Urticaceae

Latin *parietaria*, *ae* 'the herb pellitory, parietary', *parietarius*, *a*, *um* 'belonging to walls', *paries*, *etis* 'a wall'; see Carl Linnaeus, *Species Plantarum*. 2: 1052. 1753, *Genera Plantarum*. Ed. 5. 471. 1754, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 502. 1830.

Parietaria micrantha Ledebour (*Freirea micrantha* (Ledeb.) Jarmol.; *Parietaria alsinefolia* auct.; *Parietaria coreana* Nakai; *Parietaria debilis* G. Forst.; *Parietaria debilis* G. Forst. var. *micrantha* (Ledeb.) Wedd.; *Parietaria lusitanica* subsp. *chersonensis* (Lange & Szov.) Chrtek; *Parietaria lusitanica* Linnaeus subsp. *chersonensis* (Lange) Chrtek var. *micrantha* (Ledeb.) Chrtek; *Parietaria lusitanica* var. *micrantha* (Ledeb.) Chrtek; *Parietaria micrantha* auct., sensu Hilliard & B.L. Burtt)

Europe, India.

See *Species Plantarum* 2: 1052. 1753, *Florulae Insularum Australium Prodrum* 73. 1786, *Icones Plantarum* 1: 7. 1829, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. (Rhizome tonic. The methanolic extract from the rhizomes was found to potently inhibit ethanol-induced gastric lesions in rats.)

Parkia R. Br. Fabaceae (Leguminosae, Mimosaceae, Parkieae)

After the Scottish (b. near Selkirk) explorer Mungo Park, 1771–1806 (d. Niger, he was drowned), surgeon and traveller in Africa, he was the first modern European to reach the Niger, friend and *protégé* of Sir Joseph Banks, brother-in-law of James Dickson, to India and Sumatra (he sailed in February 1792), leader of the African Association's Exploring Expedition, 1795–1797 from the Gambia River to Sansanding on the Upper Niger, 1805 sail for Africa and Northern Nigeria (Park and his companions perished in a fight with the natives). See *Narrative of Travels and Discoveries in Northern and Central Africa* 234. 1826, William Henry Giles Kingston, *Travels of Mungo Park, Denham, and Clapperton*. London [1886] and F.N. Williams, "Collectors of Gambian plants" in *Bull. Herb. Boiss.* sér. 2, 7: 82–85. Geneva 1907, R.W.J. Keay, "Botanical Collectors in West Africa prior to 1860." in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, *Acta Botanica Neerlandica* 11: 231–265. 1962, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 63. 1971, *Union Burma J. Life Sci.* 4: 1–37. 1971, *Botanical Journal of the Linnean Society* 87: 135–167. 1983, *Bulletin du Jardin Botanique National de Belgique* 54: 235–266. 1984, *Flora Neotropica Monograph* 43: 1–124. 1986, *Kew Bulletin* 49 (2): 181–234. 1994, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 535. (Fruit laxative, diuretic, antigonorrheal, hypoglycemic, used in the treatment of diabetes, for the treatment of sexually transmitted diseases, a good remedy for colds; roots used as a diuretic.)

in English: candle tree, cow-okra, cucumber tree

in Mexico: chayote, chucho, coxilotl, cuachilote, cuajilote, cuajote, cuaxihlt, cuaxiloc, cuaxilotl, flor de cuajilote, guachilote, guahalote, guajalote, guajilote, huajilote, ixochigo, jilote de árbol, kat kut, kat kuuk, katku'uk, palo cuajilote, palo de jilote, pepino cat, pepino de monte, pepino kat, platanillo

***Parnassia* L. Parnassiaceae (Celastraceae, Saxifragaceae)**

Mount Parnassus, Greece, see *Species Plantarum* 1: 273. 1753 and *Bull. Bot. Res., Harbin* 7(1): 22, 28–29, 31–32, 43–44, 46, 51–52, 55. 1987, *Acta Phytotax. Sin.* 31(3): 276. 1993.

Parnassia foliosa J.D. Hooker & Thomson (*Parnassia nummularia* Maximowicz ex Drude)

China.

See *J. Proc. Linn. Soc., Bot.* 2: 79. 1857 [1858 publ. 1857], *Linnaea* 39: 313. 1875

(For kidney ailments.)

in China: bai er cai

Parnassia nubicola Wall. ex Royle (*Parnassia nubicola* Wall.)

China, Nepal, Himalaya.

See *Numer. List* [Wallich] n. 1246. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 227, t. 50, f. 3. 1835

(Plant decoction used as a sedative and anticonvulsions. Roots/tubers emetic, to stimulate vomiting to treat poisonous food/food poisoning, also applied externally as an antidote for snakebite; root decoction used to wash the wounds and roots juice applied to heal wounds.)

in China: yun mei hua cao

in India: nirbis

in Nepal: nirmashi

in Tibet: dngul tig

Parnassia ovata Ledeb. (*Parnassia ovata* Muhl.)

Himalaya.

See *Mém. Acad. Pétersb.* v. (1815) 528. 1815, *Cat. Pl. Amer. Sept.*, ed. 2. 32, nomen. 1818

(Aerial parts nervine, tonic, for hysteria and liver disorders.)

in Bhutan: dngul tig

in Tibet: dngul tig

Parnassia palustris L.

China. *Parnassia palustris* is highly variable in many morphological characters

See *Sp. Pl.* 1: 273. 1753, *Fl. Ross.* 1: 262. 1842 and *Notes Roy. Bot. Gard. Edinburgh* 13: 173. 1921, *Fl. URSS* 9: 216–217. 1939, *Pl. W. Pak. and Afghan.* 3: 79. 1964, Rechinger, Karl Heinz (1906–1998), *Flora Iranica*. (Astringent, for skin diseases, antibacterial.)

in English: grass of Parnassus

in China: mei hua cao shu, mei hua cao

Parnassia wightiana Wallich ex Wight & Arnott (*Parnassia ornata* Wallich ex Arnott; *Parnassia wightiana* Wall.; *Parnassia wightiana* var. *ornata* (Wallich ex Arnott) Drude)

China. *Parnassia wightiana* is a very variable species

See *Numer. List* [Wallich] n. 3755. 1831, *Prodr. Fl. Ind. Orient.* 35. 1834 and *Acta Bot. Yunnan.* 26: 628–630. 2004

(Emollient, demulcent.)

in China: ji zhun cao

Parochetus Buch.-Ham. ex D. Don Fabaceae (Trifolieae)

From the Greek *para* ‘near’ and *ochetos* ‘water-pipe, streams, channel’, referring to the habitat, along streams and brooks, see *Prodromus Florae Nepalensis* 240. 1825 and *A Revised Handbook to the Flora of Ceylon*. 1: 428–458. 1980.

Parochetus communis D. Don (*Cosmiosa repens* Alef.; *Parochetus communis* Buch.-Ham. ex D. Don; *Parochetus maculata* Bennett; *Parochetus major* Buch.-Ham. ex D. Don; *Parochetus major* D. Don; *Parochetus oxalidifolius* Royle)

China, India. Perennial non-climbing herb, forming dense ground cover, flowers with purple centre and blue petals

See *Prodromus Florae Nepalensis* 240–241. 1825, *Illustrations of the Botany ... of the Himalayan Mountains ...* 201, pl. 35, f. 1. 1835, *Plantae Javanicae Rariores* 1: 162. 1840, *Botanische Zeitung, Berlin* 24: 146. 1866 and *Science & Culture* 42: 322–324. 1976, *Adansonia* 3: 111–119. 1981, *Cell Chromosome Res.* 12: 22–29. 1989

(The juice of half boiled plant given to babies for stomachache.)

in English: shamrock pea

in China: zi que hua

in India: khia-knoi

Paronychia Miller Caryophyllaceae (Illecebraceae)

Greek *paronychia* ‘a whitlow’, *para* ‘beside, near’ and *onyx*, *onychos* ‘nail, claw’, the plant was supposed to cure a kind of whitlow under the nails; see Philip Miller, *The Gardeners Dictionary*. Abr. ed. 4. London (28 Jan.) 1754, *Mémoires du Muséum d’Histoire Naturelle* 2: 386. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 370. 1828, *Loudon’s Hortus Britannicus*. A new edition ... 263. 1839, *Der Deutsche Botaniker Herbarienbuch* 162. 1841, *Genera Plantarum* 958. 1839, *Flora Rossica* 2: 162. 1843 and Chaudhri, Mohammad Nazeer (1932–), “A Revision of the Paronychiinae.” in *Mededeelingen van het Botanisch Museum en Herbarium van de Rijks Universiteit te Utrecht* no. 285, 440 p. 1968.

Paronychia argentea Lam. (*Illecebrum paronychia* L.; *Paronychia argentea* var. *angustifolia* Chaudhri; *Paronychia argentea* var. *argentea*; *Paronychia argentea* var. *mauritanica* (Willd.) DC.; *Paronychia argentea* var. *rotundata* (DC.) Chaudhri; *Paronychia argentea* var. *scabra* Sauvage; *Paronychia argentea* var. *scariosissima* Post; *Paronychia argentea* var. *subvelata* Litard. & Maire; *Paronychia argentea* var. *suffruticosa* Maire & Wilczek; *Paronychia argentea* var. *velutina* Ball)

Europe.

See *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 3. 1754, *Flore Française* 3: 230. 1779 and *Anales del Jardín Botánico de Madrid* 39: 525–531. 1983, *Travaux de l’Institut Scientifique, Université Mohammed V. (Antiseptic.)

in English: nailwort

Paronychia jamesii Torr. & A. Gray (*Paronychia jamesii* var. *hirsuta* Chaudhri; *Paronychia jamesii* var. *parviflora* Chaudhri; *Paronychia jamesii* var. *praelongifolia* Correll; *Paronychia wardii* Rydb.)

North America. Perennial subshrub, herb

See *A Flora of North America*: containing ... 1(1): 170–171. 1838 and *Fl. S.E. U.S.* [Small]. 400, 1330. 1903, *Rhodora* 68(776): 423. 1966, *A Revision of the Paronychiinae* 136. 1968

(Stimulant, antiseptic.)

in English: James' nailwort

Parquetina Baill. Asclepiadaceae (Apocynaceae)

See *Bull. Mens. Soc. Linn. Paris* 2: 806. 1889, *Naturl. Pflanzenfam.* [Engl. & Prantl] iv. 2 (1895) 218. 1895.

Parquetina nigrescens (Afzel.) Bullock (*Omphalogonus calophyllus* Baill.; *Omphalogonus nigritanus* N.E. Br.; *Parquetina gabonica* Baill.; *Periploca calophylla* (Baill.) Roberty; *Periploca calophylla* Falc.; *Periploca nigrescens* Afzel.)

Gabon. Liana, scrambling, vine, twiner, sprawling, climbing, woody, often herbaceous, white latex, petiole purplish, inflorescence in a cluster, corolla whitish outside and dark violet inside, calyx green, along roadside, see also *Omphalogonus calophyllus* Baill.

See *Species Plantarum* 1: 211–212. 1753, *Stirpium in Guinea medicinalium species novae*, ... 1: 2. 1818, *Proc. Linn. Soc. i.* (1841) 115. 1841, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 806, 812. 1889 and *Bull. Inst. Franc. Afr. Noire* xv. 1429. 1953, *Kew Bulletin* 15: 205. 1961, *Journal of Ethnopharmacology* 6: 29–60. 1982

(Leaves and roots antalgic, antiseptic; leaves tonic, stimulant. Magic, ritual; bark juice an element of the arrow poison called “mutali”. Arrow poison, latex of *Parquetina nigrescens*, of *Rauvolfia vomitoria*, and leaves juice of *Palisota alopecurus*.)

in Benin: agbodwadou, amandohonou, assobo, mampon, toboké, tona

in Central African Republic: mombango, moumango

in Congo: (k)oro(k)u(k)o, lolenga, mutali, mutalikuko, mutare, orouo

in Tanzania: sikombe, ubombo

Parrotiopsis (Niedenzu) C. Schneider Hamamelidaceae

Resembling *Parrotia*, for the German botanist Johann Jacob Friedrich Wilhelm Parrot, 1792–1841, physician, professor of medicine, traveller, his works include *Reise zum Ararat*. Berlin 1834 and *Ueber Gasometrie*. Dorpat [1814]; see A.

Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 659. Ansbach 1852, *Die Natürlichen Pflanzenfamilien* 3(2a): 126. 1891 and *Illustriertes Handbuch der Laubholzkunde* 1: 429. 1905, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. (Tonic, stimulant. Poultice.)

in English: nakedstem wallflower

Parthenium L. Asteraceae

Parthenion, used by Plinius and Dioscorides for American feverfew, from the Greek *parthenos* ‘virgin’, referring to the white rays or to the shape of the ovary or in allusion to its supposed medicinal properties, or possibly because the fruits are produced only by female florets; Latin *parthenium*, the name of several plants, i.e. *perdicium*, *leucanthes*, *tamnacus*, *linozostis*, *hermupoa*, *mercurialis*, *chrysocollis*, etc.; Greek *parthenos*, *parthenike* ‘virgin, maiden, girl’, Latin *parthenice* used by Catullus for a plant, also called *parthenium*; see Carl Linnaeus, *Species Plantarum.* 2: 998. 1753 and *Genera Plantarum.* Ed. 5. 426. 1754.

Parthenium argentatum A. Gray

USA, Texas.

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 86. 1859 and *Taxon* 27: 223–231. 1978, *Taxon* 29: 716–718. 1980

(A decoction applied to poison ivy or oak to relieve the itching and swelling.)

Parthenium hysterophorus L. (*Argyrochaeta bipinnatifida* Cav.; *Argyrochaeta parviflora* Cav.; *Echetosis pentasperma* Phil.; *Parthenium glomeratum* Rollins; *Parthenium hysterophorus* Adans., nom. illeg., non *Parthenium hysterophorus* L.; *Parthenium lobatum* Buckley; *Parthenium pinnatifidum* Stokes, nom. illeg. superfl.; *Villanova bipinnatifida* Ortega) (Greek *hysteraios* ‘next, following’, *hysteros* ‘latter, behind’, *hystera*, *hystere* ‘womb, uterus’ and *phoros* ‘bearing, carrying’.)

S. United States, Mexico, West Indies. Herb or undershrub, annual, puberulous to strigose stems, inflorescence a lax panicle of numerous small radiate heads, florest light yellow, spreading vigorous noxious weed

See *Species Plantarum* 2: 988. 1753, *Novarum, aut Rariorum Plantarum Horti Reg. Botan. Matrit.* 4: 48, t. 6. 1797, *Icones et Descriptiones Plantarum, quae aut sponte ...* 4(2): 54–55. 1797, *A Botanical Materia Medica* 4: 278. 1812, *Genera et species plantarum* 31. 1816, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1861: 457. 1862, *Anales de la Universidad de Chile* 43: 504. 1873 and *Contributions from the Gray Herbarium of Harvard University* 172: 59. 1950, *J. (Whole plant highly toxic, a danger to the livestock, insecticidal, antifeedant, plants cause allergic dermatitis. Entire aerial parts of plant used as antidote in snakebite; a decoction given in fever. Flower head squeezed and inhaled to clear the nasal blockage due to cold. Leaves and dried flowers a remedy for malaria, colds, chest pains, heart troubles, neuralgia, and as a vermifuge, analgesic; employed in the form of baths to cure fever and body pain, and to treat sores, muscular aches, strains, epilepsy and fever. Pasted leaves for diabetes, allergy; leaf juice antidiabetic. Root juice taken in empty stomach to cure piles.)

in English: carrot grass, congress grass, false ragweed, quinine weed, ragweed, ragweed parthenium, Santa Maria, white top, whitehead broom

in India: bish-gach, bish-gachh, bish-goch, congress ghas, gajar ghas, gajarghas, gujar ghas

in Latin America: altamisa

Parthenocissus Planchon Vitaceae

Greek *parthenos* 'virgin' and *kissos* 'ivy', possibly referring to its English vernacular name, Virginia creeper, or to the unisexual flowers, see *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5(2): 447–453. 1887 and *Chinese J. Appl. Environ. Biol.* 2(1): 44 (1996).

Parthenocissus inserta (J. Kern.) Fritsch (*Vitis inserta* J. Kern.)

North America.

See *Species Plantarum* 1: 202–203. 1753, *Pflanzenleben* 1: 658, 659, f. 1. 1887, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 447. 1887 and *Excursionsflora für Österreich* 321. 1922, *Botaničeskij Žurnal* (Moscow & Leningrad) 73: 290–293. 1988

(Leaves and twigs a remedy for dropsy, bronchitis and skin diseases.)

in English: American ivy, false grape, red false Virginia creeper, woodbine

Parthenocissus quinquefolia (L.) Planch. (*Ampelopsis hederacea* (Ehrh.) DC. var. *murorum* Focke; *Ampelopsis latifolia* Tausch; *Ampelopsis quinquefolia* (L.) Michx.; *Cissus quinquefolia* (L.) Pantropical. Perennial, aquatic, emergent, robust, coarse, tufted, clumped, prostrate and erect, rooting at the nodes in moist habitats, creeping, rhizomatous or stoloniferous, soft, spongy and inflated, rhizomes spongy and floating, sheaths smooth, ligule a finely ciliate rim, leaf blades acuminate, erect slender inflorescence, spikelets ovate slightly imbricate, axis of the inflorescence narrowly winged, racemes sessile 2-rowed, upper glume almost long as upper lemma, lower glume truncate, upper lemma granulose apiculate, usually not rooting at nodes in dry habitats, good forage, usually forming large stands, growing in water, irrigation canals,

pans, wet soils, sandy soils, marshy soils and marshes, edge of rivers and lakes, streamsides, vleis, active dunes, places of temporary inundation, muddy soils, ditches, often floating in shallow water

See *Flora Aegyptiaco-Arabica* 18. 1775, *Observationes Botanicae* 3: 8. 1783, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 176. 1791, *Syn. Tropics and subtropics. Perennial, glabrous, more or less erect, trailing, spreading, branching, strongly rhizomatous and stoloniferous, with long creeping rhizomes and stolons and ascending stems, rooting at the nodes below the water level, usually found in a sterile condition, weed species rarely found far from the shore, very difficult to eradicate, ornamental, turf, eaten by geese and other wildlife, forming very dense turf in pasture, useful for erosion control, stabilizing saltmarsh, grows in dense colonies on salty shores, closely related to and confused with *Paspalum distichum*

 in Sierra Leone: gbonje, kekirekire, kenkende, pisui
 in South Africa: brakpaspalum
 in Japan: sawa-suzume-no-hie
 in Tonga: mohuku ano
 in Pacific: mosiesie, mosie kalalahi

Passiflora L. Passifloraceae

Latin *passio, inis* (*patior, passus sum, pati* 'to suffer') 'passion' and *flos, floris* 'a flower', the flowers symbolize the passion and crucifixion of Jesus Christ; see Carl Linnaeus, *Species Plantarum* 2: 955–960. 1753, *Genera Plantarum*. Ed. 5. 410. 1754, *Genera Plantarum* 398. 1789 and *Publications of the Field Museum of Natural History, Botanical Series* 19(1): 1–331. 1938, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 19(2): 333–613. 1938, *Flora de Colombia* 10: 1–143. 1988, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, John Vanderplank, *Passion Flowers and Passion Fruit*. London 1991, *International Journal of Plant Science* 160(1): 135–150. 1999, *Biochemical Systematics and Ecology* 29(3): 317–319. 2001, *Darwiniana* 39(1–2): 43–129. 2001, *Phytochemistry* 59(5): 501–11. 2002. Most species of *Passiflora* produce cyanide in all their parts as a protection against insects and animals eating them.

Meth.* 14. 1802, *Primitiae Florae Essequiboensis ...* 225. 1818, *Botanical Register; consisting of coloured ...* 7: t. 597. 1822, *Prodromus Florae Nepalensis* 631. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 323. 1828, *Linnaea* 18: 363. 1844, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 131, 152, 155, 158, 160, 164. 1846 and *Gardener's Chronicle & Agricultural Gazette* 28: 350. 1900, *Publications of the Field Museum of Natural History, Botanical Series* 19(2): 333–613. 1938, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Flora of Ecuador* 31: 1–130. 1988, *AAU Reports* 24: 1–241. 1990

(Emetic, stimulant.)

Pastinaca L. Apiaceae (Umbelliferae)

Latin *pastinaca*, *ae* used by A. Cornelius Celsus and Plinius for a parsnip, also the carrot, Latin *pastino*, *avi*, *atum* 'to prepare the ground', *pastinum*, *i* 'a dribble, the prepared ground', Akkadian *pastum*, *pasum* 'adze, ax cleaver'; see Carl Linnaeus, *Species Plantarum*. 1: 262. 1753 and *Genera Plantarum*. Ed. 5. 126. 1754.

Pastinaca sativa L. (*Anethum pastinaca* Wibel; *Anethum pastinaca* (L.) Wibel; *Elaphoboscum sativum* (L.) Rupr.; *Pastinaca sativa* Thomas ex DC.; *Pastinaca sativa* L. var. *pratensis* Pers.; *Peucedanum pastinaca* (Wibel) Baill.; *Peucedanum pastinaca* (L.) Benth. & Hook. f.; *Peucedanum sativum* (L.) Benth. & Hook. f.; *Selinum pastinaca* (L.) Crantz) (from the Greek *elaphos* 'a stag, deer')

Europe. Biennial or perennial herb, coarse, hollow ribbed stems, clasping leaves, small flowers

See *Species Plantarum* 1: 245–246, 262–263. 1753, *Primitiae Florae Werthemensis* 146, 195. 1799, *Prodr.* (DC.) 4: 189. 1830, *Genera Plantarum* 1: 920. 1862, *Histoire des Plantes* 7: 96. 1879 and *Field Museum of Natural History, Botanical Series* 13(SA/1): 3–97. 1962, *Taxon* 29: 538–542. 1980, Ivie, G.W., Holt, D.L., Ivey, M.C. D.C.) 213: 909–910. 1981, *Fragmenta Floristica et Geobotanica* 27: 581–590. 1981, *Acta Biologica Cracoviensia, Series Botanica* 24: 113–126. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Watsonia* 18: 415–417. 1991, *Regnum Veg.* 127: 73. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 11–14. 1995, *Opera Botanica* 137: 1–42. 1999

(All parts poisonous. The plant juices can cause photodermatitis in some individuals after exposure to sunlight. Exposure to leaves, stems, and peeling roots can cause the problem.)

The edible roots contain enough furocoumarins to be physiologically active in some cases; root medicinally effective in small amounts, and poisonous in large amounts. These toxins are mutagenic (even in the dark) inducing melanization in human skin. Photodermatitis from this plant is often confused with poison-ivy dermatitis.)

in English: bird's-nest, Hart's-eye, madnip, parsnip, wild parsnip

in China: ou fang feng

Patrinia Juss. Valerianaceae

For Eugène Louis Melchior Patrin, 1742–1815, French naturalist and mineralogist, wrote *Histoire Naturelle des Minéraux*. Paris [1801]; see N.A. Desvaux, *Tableau synoptique des minéraux*. Paris 1805, *Annales du muséum national d'histoire naturelle* 10: 311. 1807.

Patrinia scabiosifolia Fisch. ex Trevir. (*Fedia scabiosifolia* Trevir.; *Fedia serratulifolia* Trevir.; *Patrinia hispida* Bunge; *Patrinia parviflora* Siebold & Zucc.; *Patrinia scabiosaefolia* Fisch.; *Patrinia scabiosifolia* Fisch. ex Link; *Patrinia scabiosifolia* fo. *glabra* Kom.; *Patrinia scabiosifolia* fo. *hispida* Kom.; *Patrinia scabiosifolia* var. *hispida* (Bunge) Franch.; *Patrinia scabiosifolia* var. *nantcianensis* Pamp.; *Patrinia serratulifolia* (Trevir.) Fisch. ex DC.)

Japan, Korea, China. Perennial herb, erect, stout horizontal rhizome, basal leaves in rosettes, cymes terminal or axillary corymb-like panicles, small yellow flowers, fruit elliptic

see *De Fructibus et Seminibus Plantarum...* 2: 36. 1790, *Ind. Sem. Hort. Bot. Vratisl. App.* 2: 2. 1820, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 131. 1821, *Nov. Acta Soc. Nat. (Herb and roots used for abscesses and fever.)

in English: Dahurian patrinia

in China: bai jiang cao, bai jiang, pai chiang

Patrinia villosa (Thunb.) Juss. (*Valeriana villosa* Thunb.)

China, Japan. Herb

See *Species Plantarum* 1: 31–34. 1753, *Flora Japonica*, ... 32, t. 6. 1784, *Annales du muséum national d'histoire naturelle* 10: 311. 1807 and *Taxon* 29: 537–538. 1980, *Reports of the Taisetsuzan Institute of Science* 16: 45–53. 1981

(Herb and roots used for abscesses and fever.)

Paullinia L. Sapindaceae

For Simon Paulli, 1603–1680 (d. Copenhagen), professor of botany, physician to the King of Denmark Christian V, his writings include *Quadripartitum botanicum de Simplicium medicamentorum facultatibus*. Rostochii 1639 and *Flora Danica* det er: Dansk Urtebog. Copenhagen [1647–]1648; see *Species Plantarum* 1: 365–366. 1753, *Notions Élémentaires de Botanique* 279. 1782, *A General History of the Dichlamydeous Plants* 1: 660. 1831, *Annales des Sciences Naturelles; Botanique*, série 4 18: 353. 1862, *Monogr. Paullinia* 42, 44–45, 47 (-48). 1895 and *Fieldiana, Bot.* 24(6): 234–273. 1949, *Fieldiana, Botany* 36(12): 138, 145, 152, 160. 1976, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 463. [genus dedicated to the German physician Christian Franz Paullini, 1643–1712] Basel 1996, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 147. Berlin & Hamburg 1989, Karin Figala, in *D.S.B.* 10: 426–427. 1981.

Paullinia cupana Kunth (*Paullinia cupana* var. *sorbilis* (Mart.) Ducke; *Paullinia sorbilis* Martius)

Tropical America. Shrub or woody liana, evergreen, scandent, monoecious, axillary tendrils, white latex, leaves imparipinnate shiny green, flowers unisexual, male and female flowers on the same inflorescence, petals white with scale appendages, fruit a 3-lobed capsule yellow to dark red, seed dark brown, white fleshy aril, humid tropics

See *Species Plantarum* 1: 365. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 5: 117. 1821 and *Rodriguésia* 3: 156. 1937, *Archivos Inst. Biol. Veg. Rio de Janeiro*, 4: 47. 1938

(Seeds stimulant, tonic, nervine, astringent, aphrodisiac, antipyretic, antineuralgic, anti-diarrheal, used in the treatment of headache and neuralgia, menstrual disorders. Ritual and medicinal purposes.)

in Ecuador: chengrapi

in Peru: cupana, guaraná, macota

Paullinia pinnata L. (*Cururu pinnata* House; *Cururu pinnata* (L.) House; *Paullinia angusta* N.E. Br.; *Paullinia hostmannii* Steud.; *Paullinia pendulifolia* Rusby; *Paullinia pinnata* Griseb.; *Paullinia pinnata* Pasq.)

Tropical Africa and America. Shrubby climber, liana, straggling, scandent, woody or subwoody, ridged, white latex, tendrils, leaves imparipinnate, winged leaf rachis, small white flowers in spikes, lobed capsular pink-red fruits, seeds with white edible aril, rope for building houses, in bushland, forest, savanna, evergreen and mixed forests

See Plumier, Charles (1646–1704), *Description des plantes de l'Amérique avec leurs figures*. Paris, 1693, *Species Plantarum* 1: 366. 1753, *Flora* 27(2): 725. 1844, *Cat. Hort. Nap.* (1867) 76. 1867, *Abh. Königl. Ges. Wiss. Göttingen* 24: 80. 1879, *Transactions and Proceedings of the Botanical Society of Edinburgh* 20: 49. 1894 and *Amer. Midl. Naturalist*

in Peru: cruape, cururu ape, matto porco, timbó, timbó cipo, vermelho

Paullinia pterophylla Triana & Planch.

Colombia.

See *Annales des Sciences Naturelles, Botanique* sér. 4, 18: 354. 1862 and *Botanical Museum Leaflets* 10(10): 301–324. 1942

(Narcotic and stimulant, febrifuge, tonic.)

Paullinia yoco R.E. Schult. & Killip (*Paullinia scarlatina* Radlk.; *Paullinia scarlatina* Radlk. ex Donn.Sm.)

Central and Southern America. Extensively climbing woody liana, stout, milky-white astringent sap, infrequency of flowering, many-flowered axillary racemiform inflorescence, red prostrate ovoid fruit

See *Botanical Gazette* 16(6): 193–194. 1891 and *Botanical Museum Leaflets* 10(10): 301–324. 1942

(Caffeine-rich, narcotic and stimulant.)

in Colombia: blanco yoco, canangucho yoco, huarmi yoco, taruco yoco, verde yoco, yagé yoco, yoco colorado

in Ecuador: yoco colorado

in Peru: huarmi yoco, yoco, yoco blanco, yoco colorado

Pausinystalia Pierre ex Beille Rubiaceae

Greek *pausinystalos* 'stopping drowsiness', *pausis* 'to stop' and *nystalus* 'drowsy' (perhaps, implying excitement in the activity); see *Actes de la Société Linnéenne de Bordeaux* 61: 130. 1906, J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique Centrale*. CTA, Ede/Wageningen 1989.

Pausinystalia johimbe (K. Schum.) Pierre ex Beille (*Corynanthe johimbe* K. Schum.; *Pausinystalia trillesii* Pierre ex Dupouy & Beille; *Pausinystalia trillesii* Beille;

Pausinystalia zenkeri W. Brandt; *Pseudocinchona johimbe* (K. Schum.) A. Chev.)

Nigeria to WC Trop. Africa.

See *Trans. Linn. Soc. London* 27: 37. 1869 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3: 94, 95. 1901, *Actes de la Société Linnéenne de Bordeaux* 61: 130. 1906

(Tonic, stimulant, aphrodisiac, analgesic, adrenergic-blocker, used for sterility, asthenia, sexual impotence.)

in Cameroon: adjadjo, adjeck, akalan, djombe, toboli

in Congo: gabo, loubanga, lubanga, nkoumé-tolo, ompopo, ompouopo

in Gabon: belemi, endone

in Nigeria: idagbon (Yoruba), nikiba

in Yoruba: idagbon

Pavetta L. Rubiaceae

A Malayalam (Sinhalese) vernacular plant name for *Pavetta indica*, see van Rheede tot Draakestein (1637–1691), *Hortus Indicus Malabaricus*. 5: t. 10. 1685; see Carl Linnaeus, *Species Plantarum*. 1: 110. 1753 and *Genera Plantarum*. Ed. 5. 49. 1754, *Fam. Pl.* 2: 145, 589. 1763, *Natuurl. Hist.* 2(7): 361. 1777, *Ann. Mus. Hist. Nat.* 9: 219. 1807, *Encycl.* 8: 543. 1808, *Sylva Telluriana* 26. 1838, *Bot. Jahrb. Syst.* 28: 67. 1899 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Pavetta abyssinica Fresen. (*Ixora abyssinica* (Fresen.) Oliv., p.p.; *Ixora abyssinica* (Hochst. ex A. Rich.) Kuntze; *Ixora abyssinica* (Fresen.) Oliv.; *Pavetta abyssinica* A. Rich. var. *glabra*, non Fresen., nom. illegit.; *Pavetta ellenbeckii* K. Schum.; *Pavetta kenyensis* Bremek.; *Pavetta maitlandii* Bremek.; *Pavetta silvicola* Bremek.; *Pavetta trichotropis* Bremek.)

Ethiopia to Tanzania. Shrub or small glabrous tree, broad umbrella-shaped crown, stem white-brown, bacterial nodules, greenish white flowers sweetly scented, fruit dark green to purple-black succulent in terminal corymbs

See *Species Plantarum* 1: 110. 1753, *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Museum Senckenbergianum* 2: 166. 1837, *Transactions of the Linnean Society of London* 29: 87. 1873

(Roots decoction for stomachache. Veterinary medicine, used to treat animal ailments, bloat.)

in Kenya: muhuangware, mwathathia

in Tanzania: engoito

Pavetta breviflora DC. (*Ixora candolleana* Kuntze; *Ixora candolleana* (DC.) Kuntze; *Pavetta breviflora* var. *glaberrima* Bremek., nom. inval.)

India. Shrub, white scented flowers

See *Prodr.* (DC.) 4: 491. 1830, *Revis. Gen. Pl.* 1: 286. 1891 and *Repert. Spec. Nov. Regni Veg.* 37: 98. 1934

(Veterinary medicine, dried leaves ground with those of *Murraya koenigii* given to cattle for estrum.)

in India: nallabalusu

Pavetta crassicaulis Bremek. (*Pavetta stocksii* Bremek.)

India.

See *Repert. Spec. Nov. Regni Veg.* 37: 112–113. 1934 [*Feddes Repertorium*.]

(Paste of plant given orally against snakebite. For roundworms in children, fruits cooked with other vegetables and taken as curry which act as anthelmintic. Roots for urinary diseases. Leaves decoction as a lotion for ulcerated nose.)

in India: paavattai, papat, sindhujal

Pavetta crassipes K. Schum. (*Pavetta barteri* Dawe; *Pavetta crassipes* var. *major* De Wild.; *Pavetta utilis* Hua)

Trop. Africa. Shrub or small glabrous tree, gnarled, branched from the base, sap-wood white, slash white, strongly branched, leaves whorled, greenish white flowers, dense terminal corymbs, globose fruits black when ripe, firewood, in savanna, along streams, woodland, in miombo woodland

See *Species Plantarum* 1: 110. 1753, *Die Pflanzenwelt Ost-Afrikas* C: 389. 1895 and *Pl. Bequaert.* 2: 293. 1923, *Journal of Ethnopharmacology* 25: 115–118. 1989, *Journal of Ethnopharmacology* 33: 143–157. 1991

(Leaves pounded, mixed with water and drunk to treat tuberculosis; leaves decoction febrifuge, astringent, used for diarrhea, dysentery; chewed leaves juice for cough. Antimalarial, aerial parts. Veterinary medicine.)

in Benin: téséwoundé, tiguinisso

in Burkina Faso: mokbissiri

in Guinea: linberele fida

in Ivory Coast: bimbéréribré, bimbérérou

in Kenya: mikumu, mupembe

in Mali: kumbafura, kumu

in Nigeria: gadu

in Senegal: bummi-faro

in Tanzania: chamwile-ndege, isewese, Ikhombelapela, mfu-fumasimba, mpuyu

in Togo: siafa

Pavetta gardeniifolia Hochst. ex A. Rich. var. *gardeniifolia* (*Ixora assimilis* (Sond.) Kuntze; *Ixora gardeniifolia* (A. Rich.) Kuntze; *Ixora gardeniifolia* (Hochst. ex A. Rich.) Trop. & S. Africa. Shrub or small tree, usually deciduous, light brown bark, glossy dark green foliage, leaves with dark dots bacterial nodules, creamy-white nectar-rich sweet scented flowers, pea-sized fruits shiny black

See *Species Plantarum* 1: 110. 1753, *Tentamen Florae Abyssinicae* ... 1: 351. 1847, *Revisio Generum Plantarum* 1: 286. 1891 and *Repert. Spec. Nov. Regni Veg.* 37: 182–183. 1934, *Repert. Spec. Nov. Regni Veg.* 47: 93–95. 1939, *Kew Bulletin* 3: 355, 357. 1948 [1949], *Plant Systematics and Evolution* 149: 89–118. 1985

(Veterinary medicine.)

in English: common bride's bush, kaffir bride

in Ethiopia: buniti

in Southern Africa: gewone bruidsbos; isiNyombolo, isAn-yane, isaNywane (Zulu); mmilorotswans (Hebron dialect, central Transvaal)

Pavetta harborii S. Moore (*Pavetta marlothii* Bremek.)

Botswana, South Africa.

See *J. Bot.* 57: 89. 1919, *Repert. Spec. Nov. Regni Veg.* 37: 174. 1934

(Responsible for congestive cardiomyopathy and death in sheep and goats, called *gousiekte*.)

in English: pavetta

in South Africa: gousiekte pavetta, pavetta-bossie, tonnabossie

Pavetta indica L. (*Ixora indica* (L.) Baill.; *Ixora indica* Baill.; *Ixora indica* (L.) Kuntze; *Ixora indica* Kuntze; *Ixora pavetta* Andrews; *Ixora pavetta* Roxb., nom. illeg.; *Ixora pavetta* Benth.; *Pavetta indica* Burm.f.; *Pavetta indica* var. *glabra* Bremek., nom. inval.; *Pavetta indica* var. *typica* Domin, nom. inval.; *Pavetta tomentosa* Roxb. ex Smith)

India, China, Pen. Malaysia. Small tree or bushy shrub, opposite branches, leaves with nitrogen-fixating bacterial nodes, scented white bisexual flowers, inflorescence a terminal compact erect corymb or corymbose panicle, fruit a globose drupe ripening black, seeds dispersed by fruit-eating birds, along forest stream

See *Species Plantarum* 1: 110. 1753, *Fl. Ind.* (N.L. Burman) 35, t. 13, f. 3. 1768, *Hort. Bengal.* 10. 1814, *Fl. Ind.*, ed. Carey & Wall., i. 395, 1820, *Fl. Ind.*, ed. Carey, i. 385. 1832, *Hist. Pl.* (Baillon) 7: 278. 1880, *Revis. Gen. Pl.* 1: 286. 1891 and *Journal of Cytology and Genetics* 18: 56–58. 1983, *Journal of Cytology and Genetics* 21: 97–114. 1986, *Nucleus*: 30: 114–124. 1987, *Regnum Veg.* 119: 228. 1988, *Cytologia* 53: 87–92. 1988

(Used in Ayurveda and Sidha. Leaves for poulticing boils to remove pus; leaves decoction used externally for piles. Crushed root bark, with rice water and ginger, taken as a diuretic and for dropsy; root, root bark or stem bark used for intestinal obstructions. Root diuretic, purgative, tonic, used in intestinal obstructions, intestinal disorders, dysentery, jaundice, headache, toothache, urinary diseases and dropsy; roots decoction as a postpartum remedy. Veterinary medicine, stem bark paste applied to maggot-infected sores.)

in English: bride's bush, white pavetta

in India: adavarai, adayaara, adayala, angari, araniya, canni, carnicara, chitamitake, chitamitla, chitamutakalu, chitmitki, cukkanaiccattakki, dieng longtham, duyipaapata, duyipapata, gobor-hitha, gobor hitha, haavumekke gida, hundbaha, intirepam, intireyam, kakachedi, kakra, kange, kankra, kapamakarri, karantai, karanaippavattai, karnikara, kathachampa, kattukkarantai, kuttuppucciacceti, kuttuppucciyam, khamkha thek, khamkhantek, kondapaapata, kondapapari, kondapapata, kondapipidi, kukurachura, kukurchalva, kukurchura, lakkapaapidi, lakkapapidi, makatosanikki, malleamothe, malleamothi, mallikamuti, manchipaapata, manchipapidi, mancipapata, manjipapata, mantattaiyarukki, naama paapata, nagarhole, nallapaapidi, nallapapidi, namapapata, nampapoota, nattalaicetti, nattalaivairavan, nattali, nidle, nitile, noonepaapata, noonipapoota, nunepapata, paapata kommi, paapate, padera, panaviruttam, papadi, papari, papata, papatakammi, papatakammi, papatta, paphanah, papidi, papiri, papiti, pappadi, pappana, paputa, paputta, paputta vayru, parpanam, parpiri, parppanam, patta, pavatai, pavatakodi, pavatay, pavate, pavati, pavatta, pavattai, pavattan, pavattankam, pavetta, pavuttay vayr, pavuttayvayr, peramalli, phapti, sam suku, sitmataki, soolebottu gida, sulay-bottu-gida, sulebottu, tapra, tarani, tellapapata, thainurai, tharani gida, thellapaapata, thellapapidi, tiranaicetti, tiriakphala, tiryakphala, tollukam, tovacalukam, tovalika, tovalikacceti, tumakani, vellaippavattai, vellaippavattaicetti, verunai, yedle

India. Shrub, white flowers, inflorescence in compact terminal cymes, membranous bracts, drupe

See *Fl. Ind.* (N.L. Burman) 35, t. 13, f. 3. 1768, *Hort. Bengal.* 10. 1814, *Fl. Ind.*, ed. Carey & Wall., 1: 396. 1820, *Numer. List* [Wallich] n. 6174. 1831–1832, *Fl. Ind.*, ed. Carey, 1: 386. 1832, *Fl. Brit. India* 3: 150. 1880 and *Repert. Spec. Nov. Regni Veg.* 37: 114. 1934, *Fl. Howrah District* 356. 1979

(Used in Ayurveda. Roots purgative, laxative, tonic, diuretic, used in jaundice, headache, urinary diseases, gastrointestinal disorders. Cooked fruits taken to kill intestinal worms, roundworms, for the same purpose prescribed the flowers extract. Stem bark extract of *Pavetta tomentosa* Roxb. ex Sm. given orally for liver ailments, as hepatic stimulant, hepatoprotective.)

in English: white pavetta

in India: dudaligatch, duyipapata, konda paapata, macharanka, naam paapata, namapapata, namapoota, noogu kommi, paapidi kommi, papari, paphanah, papidi, pavetta, tella papidi, thellai papidi

in Nepal: kangiyo phool

Pavetta novoguineensis Bremek. (*Pavetta indica* var. *tomentosa* K. Schum., nom. illeg.; *Pavetta platyclada* K. Schum. & Lauterb. var. *tomentosa* (K. Schum.) Valeton)

Papua New Guinea. Shrub, pubescent leaves, shining berries smoothly wrinkled

See *Bot. Jahrb. Syst.* 61: 63. 1927, *Repert. Spec. Nov. Regni Veg.* 37: 111. 1934

(Leaves decoction as a lotion for ulcerated nose and for piles. Roots purgative, diuretic, tonic, given in visceral obstruction, jaundice, headache, urinary diseases, dropsy.)

in India: aadayara

Pavetta oblongifolia (Hiern) Bremek. (*Pavetta baco-nia* Hiern var. *oblongifolia* Hiern; *Pavetta schweinfurthii* Bremek. var. *oblongifolia* (Hiern) Aubrév.)

Gambia, Mali, Sierra Leone. Shrub, savanna

See *Species Plantarum* 1: 110. 1753, *Flora of Tropical Africa* 3: 176. 1877 and *Repertorium Specierum Novarum*

Regni Vegetabilis 37: 65. 1934, *Flore Forestière Soudano-Guineenne* 471–474, t. 103, 4. 1950

(Antibacterial, analgesic, expectorant and sedative. Leaves for eye troubles, venereal diseases; bark for arthritis, rheumatism. Veterinary medicine.)

in Mali: warasakuman

in Senegal: bummi-faro

Pavetta owariensis P. Beauv. (*Ixora owariensis* (P. Beauv.) Poir.)

Trop. Africa. Shrub or small tree, white flowers

See *Flore d'Oware* 1: 87, t. 52. 1806

(Schistosomicidal, anthelmintic, molluscicidal. Alkaloids. Magic.)

in Nigeria: akpano, ovbié ukpékperru

in Sierra Leone: bole-hala, kunde

Pavetta revoluta Hochst. (*Ixora obovata* (C.A. Mey. ex Harv. & Sond.) Kuntze, nom. illeg.; *Pavetta obovata* C.A. Mey. ex Harv. & Sond.; *Pavetta obovata* E. Meyer ex Sonder; *Pavetta silvae* K. Schum.; *Pavetta undulata* Lehm.)

S. Mozambique to E. Cape Prov. Shrub or small tree, evergreen, bark smooth, leathery leaves simple and opposite with hairy pockets in the axils of the nerves below, white flowers in dense clusters, fruits soft and black, fruits eaten by some birds

See *Flora* 25: 237. 1842

(Used for rheumatism and as emetic insecticide.)

in English: coastal pavetta, dune bride's bush

in South Africa: duinebruidsbos (Afr.), umCilikishe (Xhosa), umHlabambaza (Zulu)

Pavetta schumanniana F. Hoffm. ex K. Schum. (for the German botanist Karl Moritz Schumann, 1851–1904, botanical collector, taxonomist. See Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 687–688. University of Pennsylvania Press, Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 247. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 356. 1972, Stafleu and Cowan, *Taxonomic Literature*. 5: 400–408. 1985.)

Cameroon to Tanzania and KwaZulu-Natal. Shrub or tree, shiny bright green leaves usually opposite sometimes in whorls of 3, bacterial nodules, interpetiolar stipules, sweetly scented white flowers in dense clusters, round fleshy fruits, glossy black berries, in open woodland

See *Die Pflanzenwelt Ost-Afrikas* C: 389. 1895

(The leaves are poisonous to stock, and cause a stock disease called *gousiekte*. Leaves used for coughs, headache, fevers, for infertility and venereal diseases in women.)

in English: poison bride's bush, poison pavetta

in Southern Africa: gifbruidsbos, gousiekte tree, tree gousiekte, gousiekteboom, boom gousiekte; mugaramondoro, chiFikau, chiFukawi, Nyapuntu, chiSwimbovarisi, muTandarombo, chiTunguru (Shona); isiMbuzana, uSawoti (Zulu); uSawoti (Swazi); tshituku, mukhobekwa, mukhobigwa (Venda)

in Zambia: chitapatapa

Pavetta subcana Hiern var. ***longiflora*** (Vatke) Bridson (*Pavetta albertina* S. Moore; *Pavetta gardeniifolia* Hochst. ex A. Rich. var. *longiflora* Vatke; *Pavetta kabarensis* Bremek.; *Pavetta kerenensis* Becc. ex Martelli; *Pavetta kotschyana* Cufod.; *Pavetta murleensis* Cufod.; *Pavetta murleensis* Cufod. var. *glabrescens*; *Pavetta rudolphina* Cufod.; *Pavetta rudolphina* var. *robusta*; *Pavetta unguiculata* Bremek.)

Eritrea to Zaire and Tanzania. Scrambling shrub, woody stems, brittle, leaves with bacterial nodules, corolla white, stamens orange, stigma green, savanna

See *Species Plantarum* 1: 110. 1753, *Tentamen Florae Abyssinicae* ... 1: 351. 1847, *Oesterreichische Botanische Zeitschrift* 25: 231. 1875, *Flora of Tropical Africa* 3: 172. 1877, *Revisio Generum Plantarum* 1: 287. 1891 and *Nuovo Giorn. (Insecticides, arachnicides, used for pulmonary troubles. Veterinary medicine.)

Pavetta subcapitata Hook.f. (*Ixora subcapitata* Wall., nom. nud.)

India, Bhutan. Shrub, leaves elliptic-lanceolate, white flowers in terminal compact cymes, young leaves used as vegetable

See *Numer. List* [Wallich] n. 6160. 1831–1832, *Fl. Brit. India* [J.D. Hooker] 3: 150. 1880

(Analgesic, stomachic, expectorant and sedative.)

in India: mir-araung, mir-chakchu, usupiban

Pavetta ternifolia (Oliv.) Hiern (*Ixora ternifolia* Oliv.; *Ixora ternifolia* Hook.f. ex Oliv., nom. illeg.; *Pavetta niansae* K. Krause; *Pavetta yalaensis* Bremek.)

WC & E. Top. Africa. Shrub, scented flowers, corolla white, fruit pinkish grey to green, in wooded savanna

See *Species Plantarum* 1: 110. 1753, *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Transactions of the Linnean Society of London* 29: 86, t. 51. 1873, *Flora of Tropical Africa* 3: 177. 1877 and *Kew Bulletin* 9: 501. 1954

(Leaves used for malaria, diarrhea; crushed leaves on wounds. Amulet. Veterinary medicine.)

in Burundi: umumenamabuye, umunyamabuye

in Congo: mumenamabuye

in Rwanda: umumenamabuye

Pavonia Cav. Malvaceae

For the Spanish botanist José Antonio Pavón y Jiménez, 1754–1844, traveller, explorer, between 1777–1788 he travelled with Hipolito Ruíz Lopez (1754–1815) and Joseph Dombey in Chile and Peru; see Trew, Christoph Jacob (1695–1769), *Plantae selectae* quarum imagines ad exemplaria naturalia Londini, in hortis curiosorum nutrita/manu artificiosa doctaque pinxit Georgius Dionysius Ehret ... 9: 50. [Norimbergae], 1750–1773 [Issued in ten decuriae.], *Systema Naturae*, Editio Decima 2: 1149. 1759, *Familles des Plantes* 2: 400. 1763, *Introductio ad Historiam Naturalem* 281. 1777, *Monadelphiae Classis Dissertationes Decem* 2: [App. 2]. 1786, *Monadelphiae Classis Dissertationes Decem* 3: 135. 1787, *Elementa botanica* ... 2: 412. 1790, *Plantae Rariores Horti Academici Monacensis* 90, pl. 90. 1819[1822], *Nova Acta Phys.-Med. Payena dasyphylla var. *glabrata* King & Gamble; *Payena glabra* H.J. Lam; *Payena glutinosa* Pierre; *Payena griffithii* Pierre, nom. illeg.; *Payena lowiana* Pierre; *Payena lucida* Pierre, nom. illeg.; *Payena lucida* var. *wightii* (Hassk.) C.B. Clarke; *Payena paralleloneura* Kurz; *Payena polyandra* (Wight) Benth. & Hook.f.; *Payena puberula* (Miq.) Pierre ex Burck; *Payena punctata* Fletcher)

Malaysia, Borneo. Tree, bisexual flowers in clusters of 5–7 in leaf axils, white corolla, round single-seeded berries

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 197. 1844, *Retzia* 1: 100–101. 1855, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 40(2): 70. 1871, *Fl. Brit. India* 3: 548. 1882, *Ann. du Jardin Botanique de Buitenzorg*, 5: 50. 1885, *Bull. Mens. Soc. Linn. Paris* 1: 525–526, 529. 1885 and *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(2): 184. 1905, *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 7: 148. 1925, *Bull. Misc. Inform. Kew* 1937: 379. 1937, *Boissiera* 11: 37. 1965

(Roots decoction a postpartum remedy.)

Malay names: bedara tong, nyatoh

Pectis L. Asteraceae

Latin *pecten*, *pectinis* (*pecto* ‘to comb’) ‘a comb’, Greek *pekteo*, *pektein*, *peko* ‘to comb’, referring to the marginally bristled leaves or to the form of the pappus, see *Systema Naturae*, Editio Decima 2: 1189, 1221, 1376. 1759 and *Taxon* 34: 283. 1985, *Fl. Venez. Guayana* 3: 177–393. 1997.

Pectis apodocephala Baker

South America.

See *Fl. Bras.* (Martius) 6, pt. 3: 288. 1884 and *Anais da Academia Brasileira de Ciências* 79(2): 209–213. 2007

(Nematicidal and larvicidal activities of the essential oils from aerial parts.)

Pectis oligocephala Sch.Bip.

South America.

See *Bot. Voy. Herald* [Seemann] 7–8: 309. 1856, *Fl. Bras.* (Martius) 6, pt. 3: 289. 1884 and *Anais da Academia Brasileira de Ciências* 79(2): 209–213. 2007

(Nematicidal and larvicidal activities of the essential oils from aerial parts.)

Pedaliium Royen ex L. Pedaliaceae

Greek *pedalion* ‘rudder, steering-paddle’, referring to the angles of the fruits, Latin *pedalion*, *ii* for a plant, called also *proserpinaca*, see *Systema Naturae*, Editio Decima 1123, 1375. 1759, *Familles des Plantes* 2: 277, 589. 1763, *Prodromus Florae Novae Hollandiae* 519. 1810, *Linnaea* 43:

507–541. 1882 and *Fl. Trop. E. Africa, Pedaliaceae* 6. 1953, *Fl. Madagasc.* 179: 5–46. 1971.

Pedaliium murex L. (*Pedaliium microcarpum* Decne.; *Pedaliium muricatum* Salisb.; *Rogeria microcarpa* Klotzsch)

Madagascar. Succulent herb, simple or branched, axillary solitary yellow flowers, indehiscent 4-angled spiny capsule, leaves eaten as vegetable, saline soil indicator

See *Syst. Nat.*, ed. 10. 2: 1123. 1759, *Prodr. Stirp. Chap. Allerton* 104. 1796, *Naturwissenschaftliche Reise nach Mossambique ...* [Peters] 6(Bot., 1): 190. 1861, *Annales des Sciences Naturelles* (Paris) sér. 5, 3: 332. 1865 and *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda, Unani and Sidha. Spines of fruit cause infection. Plant/stem and leaves juice/soft jelly-like substance as a sexual tonic, aphrodisiac; viscous plant decoction used to increase sexual capacity. Fresh plant decoction or infusion used in spermatorrhea, dysuria, gonorrhoea, calculi, burning micturition; fresh whole plant crushed and soaked in water or milk given in rheumatism. Stem and leaves infusion used in gonorrhoea and dysuria. The mucilaginous water produced from the fresh leaves taken as a remedy for gonorrhoea and dysuria; leaf paste applied on swellings to reduce itching; leaves infusion for bladder troubles and gonorrhoea. Mixture of flowers together with seeds of sesame given in gonorrhoea. Fruits diuretic, demulcent, antispasmodic, aphrodisiac, in urinary disorders, impotence, rheumatic pains; decoction of fruits of *Pedaliium murex* with the roots of *Abrus precatorius* used as oral medicine to cure syphilis; fresh and dried fruits given for kidney stones. Roots decoction for gonorrhoea. Veterinary medicine, leaves for ephemeral fevers; leaves with *Sida acuta* leaves given orally to induce ovulation; mucilaginous water from soaked leaves given for babesiosis.)

in Tanzania: mbigali, mbigiri

Pedicularis L. Scrophulariaceae (Orobanchaceae)

From the Latin *pediculus* ‘a louse’, *pedicularis* ‘relating to lice’, the plants were supposed to become lice when sheep contacted them, referring to the belief that ingestion by stock promoted lice infestation, to produce lice in sheep; Latin *herba pedicularis*, lousewort, so called because it kills lice, see *Species Plantarum* 2: 607–610. 1753, *Ann. Roy. Bot. Gard.* (Calcutta) 3: 69. 1890 and *Proc. Acad. Nat. Sci. Philadelphia* 82: 18. 1930, *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Botaniska Notiser* 128(4): 518. 1975[1976], *J. Jap. Bot.* 61(3): 78. 1986, Ohba, Hideaki (1943–), *The Himalayan plants*. Tokyo, University Museum, University of Tokyo, 1988 [Bulletin, University of Tokyo, University Museum, no. 31], *Fl. Jap.* (Iwatsuki et al., eds.) 3a: 366. 1993, *Acta Phytotax. Sin.* 33(3): 244–249. 1995, *Bot. Zhurn.* (Moscow & Leningrad) 83(10): 94–98. 1998, *Novon* 7(4): 373–375. 1998 [1997 publ. 1998], *Edinburgh J. Bot.* 58(1): 63–68. 2001, *Edinburgh J. Bot.* 67(2): 185–186. 2010.

Pedicularis bicornuta Klotzsch

India, Himalaya.

See *Bot. Ergebn. Reise Waldemar* 109. 1862

(Juice of leaves to cure spitting of blood. Leaves boiled and liquid drunk by new mothers to help their milk flow, to increase lactation.)

in India: michren, mishrannu

Pedicularis cheilanthifolia Schrenk (*Pedicularis cheilanthifolia* C. Marquand & Airy Shaw)

China, Himalaya.

See *Bull. Phys.-Math. Acad. Petersb.* 1: 79. 1843, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 32: 524. 1888 and *Journal of the Linnean Society, Botany* 48(321): 211. 1929, *J. Jap. Bot.* 53(11): 326. 1978, *Acta Bot. Boreal.-Occid. Sin.* 16(3): 310–318. 1996

(Leaf extract for ulcers, wounds, sores; dried leaves to treat spitting of blood.)

in China: sui mi jue ye ma xian hao, sui mi jue ye xi

in India: chukchuk

Pedicularis flagellaris Benth.

Himalaya, India.

See *Prodr.* (DC.) 10: 581. 1846

(Aerial parts used as anti-diuretic, for rheumatism, wounds and irregular menstruation.)

in Bhutan: glang-sna

Pedicularis hookeriana Wall.

India.

See *A Numerical List of dried specimens of plants in the East India Company's Museum*: collected under the superintendence of Dr. Wallich of the Company's botanic garden at Calcutta. n. 421. London 1828–1849

(Roots used in powder form to cure gastric troubles.)

Pedicularis longiflora Rudolph

China.

See *Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg. Avec l'Histoire de l'Académie* 4: 345, t. 3. 1811, *Annals of the Royal Botanic Garden. Calcutta.* 3: 67. 1890

(Plant decoction for inflammation, a wash to treat skin diseases; good for potency in men. Aerial parts used as coagulant, for blood pressure and menstrual disorders. Flowers eaten before drinking alcohol to avoid hangover.)

in Bhutan: lug-ro-ser-po

in China: chang hua ma xian hao, chang hua xi

Pedicularis longiflora Rudolph var. ***tubiformis*** (Klotzsch) Tsoong (*Pedicularis longiflora* subsp. *tubiformis* (Klotzsch) Pennell; *Pedicularis tubiflora* Fisch.; *Pedicularis tubiformis* Klotzsch)

China. Small perennial herb, golden yellow flowers in clusters

See *Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg. Avec l'Histoire de l'Académie* 4: 345, pl. 3. 1811, *Die Botanischen Ergebnisse der Reise Seiner Königl. Hoheit des Prinzen Waldemar von Preussen* 106. 1862, *Annals of the Royal Botanic Garden. Calcutta.* 3: 67. 1890 and *Academy of Natural Sciences of Philadelphia Monographs* 150. 1943, *Bull. Brit. Mus. (Nat. Hist.) Bot.* 1: 7. 1955, *Acta Phytotaxonomica Sinica* 3(3): 278, 318–319. 1955, *Nat. Hist. Res.* 5(2): 73–78. 1999

(Whole plant juice or paste mixed with curd given for dysentery. Powdered flowers taken to treat disorders and inflammation of liver and gall bladder, seminal discharge and edema. Veterinary medicine, flowers orally fed for expulsion of retained placenta.)

in China: guan zhuang chang hua ma xian hao

in India: aangba mendok, lugru-ser-po, phakchang

Pedicularis megalantha D. Don

Himalaya, India.

See *Prodr. Fl. Nepal.* 94. 1825, *Annals of the Royal Botanic Garden. Calcutta.* 3: 68. 1890 and *Taxon* 28: 627–628. 1979

(Aerial parts as antidote and for gastrointestinal disorders.)

in Bhutan: lug-ru-dmar-po, lugro-marpo

in China: shuo hua ma xian hao

Pedicularis pectinata Wall. (*Pedicularis pectinata* Wall. ex Benth.)

Himalaya. Erect or slightly decumbent herb, spicate pink flowers, oval capsule covered by inflated calyx

See *Numer. List* [Wallich] n. 420. London, 1828–1849, *Annals of the Royal Botanic Garden. Calcutta.* 3: 71. 1890

(Leaves hemostatic, diuretic. Whole plant sedative and useful in bodyache; plant ground with fruits of *Rosa hookeriana* and the paste given for dysentery. Flowers and shoots for alopecia, for cold and cough.)

in China: bi chi xi

in India: lukri marpo, michren, mishran

in Tibet: glang sna, lugro-marpo

Pedicularis porrecta Wall.

India, Himalaya.

See *Numer. List* [Wallich] n. 423. London, 1828–1849

(Plant diuretic. Leaves astringent, given to stop bleeding.)

Pedicularis siphonantha D. Don

Himalaya.

See *Prodromus Florae Nepalensis* 95. 1825

(Aerial parts antidote, febrifuge, astringent.)

in Bhutan: lug-ru-smug-po

in China: guan hua ma xian hao

Peganum L. Zygophyllaceae (Nitrariaceae)

Ancient Greek name *peganon* for rue, *Ruta graveolens* (Theophrastus), Latin *peganon*, *i* for garden-rue or wild-rue (Greek *peganon oreinon*); see Carl Linnaeus, *Species Plantarum.* 1: 444–445. 1753 and *Genera Plantarum.* Ed. 5. 204. 1754 and *N. Amer. Fl.* 25: 116. 1910.

Peganum harmala L. (*Peganum dauricum* Pall.; *Peganum harmala* L. var. *garamantum* Maire; *Peganum harmala* L. var. *rotschildianum* (Buxb.) Maire)

North Africa, Mediterranean, India. Perennial herb, bushy, undershrub, many-branched, foliage succulent, solitary flowers, petals white with green veins, anthers yellow, fruit green, plants bad tasting, a noxious weed that is often found in desert areas around the world

See *Species Plantarum* 1: 444–445. 1753 and *Verh. Zool.-Bot. Ges. Wien* 1926, lxxvi. 54. 1927, *Field Museum Nat. Hist., Bot. Ser.* 9: 69–241. 1937, *Fl. Iran.* [Rechinger] 98: 18, 20, tabs. 14 & 15. 1972, *Taxon* 28: 395. 1979, *Acta Phytotaxonomica Sinica* 22: 243–249. 1984, *Acta Botanica Boreali-Occidentalia Sinica* 10: 203–210. 1990, *Acta Botanica Malacitana* 16: 449–454. 1991, *Lagascalia* 16: 328–333. 1991, *Regnum Veg.* 127: 74. 1993, *Vet. Hum. Toxicol.* 42(3): 137–141. 2000

(Seeds regarded as narcotic, hypotonic, vasorelaxant, antispasmodic, antiperiodic, emetic, alterative, stimulant, abortifacient, lactagogue, antinociceptive, antimicrobial, antileishmanial, to relieve infertility in women and womb pain in pregnant women; seeds decoction in laryngitis; seed powder used in asthma, colic and jaundice and as an anthelmintic against tapeworms and for reducing temperature in chronic malaria. Seeds and root contain alkaloids, swallowing seeds induces hallucination and sexual stimulation; seeds burnt and the smoke inhaled for exaltation. The smoke is considered antiseptic, measles and wounds fumigated by burning seeds and leaves. Bark in malaria and fevers, used also for abortion. Veterinary medicine, root powder applied against external parasites on body.)

in English: African rue, harmal, harmala shrub, harmel peganum, harmela shrub, Syrian rue, wild rue

in Arabic: harmal, harmel, harmel sahari

in China: luo tuo peng

in India: espuva, harmalo, isband, isbaund, sepan, techepak

in Pakistan: gandaku, harmal, isband, ispand, kisankur

Peganum harmala L. var. *stenophyllum* Boiss.

India. Perennial herb

See *Species Plantarum* 1: 444–445. 1753

(Whole plant aphrodisiac, emmenagogue, abortifacient; fresh decoction of plant as a strong. Seeds in asthma, hysteria, gall stones, rheumatism, colic pains, fever, jaundice, painful menstruation. Leaf decoction in rheumatism.)

in India: gandhio, gandhya, harmal

Pegia Colebr. Anacardiaceae

Greek and Latin *pege* ‘a source, spring, origin, fountain, stream’, see *Histoire des plantes de la Guiane Française* 1: 470, t. 188. 1775, *Genera Plantarum*, ed. 8[a]. 1: 309. 1789, *Transactions of the Medical and Physical Society of Calcutta* 7: 230–231. 1835 and *Fieldiana, Bot.* 24(6): 177–195. 1949.

Pegia nitida Colebr. (*Phlebochiton extensum* Wall.; *Robergia hirsuta* Roxb., Connaraceae; *Tapirira extensa* Hook.f. ex Marchand; *Tapirira extensa* (Wall.) Hook. f. ex Marchand; *Tapirira hirsuta* (Roxb.) Hook. f.; *Tapirira hirsuta* (Roxb.) Hu; *Tapirira hirsuta* (Roxb.) Kurz; *Tapirira hirsuta* Hook.f.; *Tapirira hirsuta* Hu)

India, Himalaya. Tree, leaves eaten as vegetable, ripe fruits eaten

See *Hort. Bengal.* 90. 1814, *Transactions of the Linnean Society of London* 15(2): 364–365. 1827, *Flora Indica*; or, descriptions of Indian Plants 2: 455. 1832, *Transactions of the Medical and Physical Society of Calcutta* 7: 231. 1835, *Genera Plantarum* 1: 423. 1862, *Révision du groupe des Anacardiacees* 162. 1869, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 39(2): 75. 1870, *Fl. Brit. India* [J.D. Hooker] 2: 28. 1876 and *Journal of the Arnold Arboretum* 5(1): 229. 1924

(Antiinflammatory, analgesic and hypoglycemic.)

in China: teng qi

in India: han-din, hang-din

Pelargonium L'Hérit. ex Aiton Geraniaceae

Greek *pelargos* ‘a stork’, referring to the mericarp (derivation perhaps from the Greek *pelios* ‘black, dark’ and *argos* ‘white, whitish’, probably from the Akkadian *bel-*, *pel-* plus *arhu*: *belu* (*pe-lu*) ‘lord’ and *arhu* ‘road’, Hebrew *orho* ‘way, wanderer, caravan’); see *Species Plantarum* 2: 676–683. 1753, *Genera Plantarum*. Ed. 5. 306. 1754, L'Héritier de Brutelle, Charles Louis (1746–1800), *Geraniologia*, seu Erodii, pelargonii, geranii, monsoniae et grieli historia iconibus illustrata. Parisiis: typis P.-F. Didot, 1787–1788, *Genera Plantarum* 268. 1789, William Aiton (1731–1793), *Hortus Kewensis*. 2: 417–431. London 1789, Sweet, Robert (1783–1835), *Geraniaceae*: the natural order of gerania ... London, J. Ridgway, 1820–1830, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 386. Ansbach 1852, *Revisio Generum Plantarum* 1: 93. 1891 and *Fieldiana, Bot.* 24(5): 368–374. 1946, *J. S. African Bot.* 45: 380. 1979, Van der Walt, J.J.A., *Pelargoniums of Southern Africa* J.J.A. Van der Walt, P.J. Vorster. Illustrations Ellaphie Ward-Hilhorst. Cape Town: [Juta & Co.,] 1981, *Taxon* 30: 307. 1981, *Bothalia* 15: 345–385. 1985, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Greca*. 2(1): 225. Leo S. Olschki Editore, Firenze 1994, *South African Journal of Botany* 65: 115–143. 1999, Lis-Balchin, Maria (edited by), *Geranium and Pelargonium: The Genera Geranium and Pelargonium*. London: Taylor & Francis, 2002, Clifton, Richard Timothy Fred (1943–), *Geraniales Species Checklist Series*. Vol. 1, Part 4, *Geraniaceae Knuth Tribe 1 Geranieae: Pelargonium Species Checklist*. Dover, 2004. Nearly all cultivars of *Pelargonium* grown for their rose-scented essential oil, called geranium oil; extracts of the leaves of *Pelargonium Rosat* Group have antifeedant properties against slugs and also nematicidal activity.

Pelargonium alchemilloides (L.) Aiton (*Geranospermum alchemilloides* (L.) Kuntze; *Geranium alchemilloides* L.; *Pelargonium alchemillifolium* Salisb.; *Pelargonium alchemilloides* (L.) L'Hér.; *Pelargonium alchemilloides* subsp. *multibracteatum* (Hochst. ex A. Rich.) Kokwaro; *Pelargonium malvaefolium* J. Jacq.; *Pelargonium malvifolium* J. Jacq.; *Pelargonium multibracteatum* Hochst. ex A. Rich.; *Pelargonium multibracteatum* Hochst.)

Tropical Africa. Herb, perennial, scrambler, tuberous reddish rootstock, stems covered with long coarse hairs, lobed fleshy leaves, white-creamy or pink flowers

See *Species Plantarum* 2: 678. 1753, *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 2: 419. 1789, *Prodr. Stirp. Chap. Allerton* 312. 1796, *Flora* 24(1, Intelligenzbl.): 29 (1841, *Tentamen Florae Abyssinicae* ... 1: 119. 1847, *Revisio Generum Plantarum* 1: 94. 1891 and *Kew Bulletin* 23: 530. 1969

(Roots carminative, used as an antacid for pregnant women. Leaves for wounds, abscesses, diarrhea and dysentery.)

in English: dysentery herb

in Lesotho: khoara

Pelargonium betulinum (L.) L'Herit. (*Geranospermum betulinum* (L.) Kuntze; *Geranium betulinum* L.; *Pelargonium betulinum* (L.) L'Hér. ex Aiton; *Pelargonium georgense* Knuth)

South Africa.

See *Species Plantarum* 2: 679. 1753, *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 2: 429. 1789, *Revisio Generum Plantarum* 1: 94. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 28: 92. 1930

(Leaves essential oils for coughs, as an ointment used in wound healing. To relieve flatulence and stomachache.)

in English: birch-leaved pelargonium, camphor-scented pelargonium

in South Africa: kanferblaar (= camphor leaf or camphor-scented pelargonium), maagpynbossie, suurbos (= sour bush)

Pelargonium capitatum (L.) L'Herit. (*Pelargonium capitatum* (L.) Aiton; *Pelargonium capitatum* Aiton; *Pelargonium capitatum* [Soland.]; *Pelargonium capitatum* L'Hér.)

South Africa.

See *Hortus Kew.* (W. Aiton) 2: 425. 1789

(Leaves infusion astringent, stomachic, antispasmodic, to treat kidney and bladder ailments, nausea, vomiting, flatulence, stomach cramps, diarrhea, dysentery.)

in English: rose-scented geranium, wild pelargonium

in South Africa: kusmalva

Pelargonium citronellum J.J.A. Van der Walt

South Africa. Often confused with *Pelargonium scabrum*

See *South African Journal of Botany* 2(1): 79. 1983

(Insecticidal, used to repel pests.)

in English: lemon-scented pelargonium

in South Africa: malva

Pelargonium cucullatum (L.) L'Herit. (*Pelargonium angulosum* Aiton; *Pelargonium cucullatum* [Soland.]; *Pelargonium cucullatum* L'Hérit.)

South Africa.

See *Hortus Kew.* (W. Aiton) 2: 426. 1789

(Leaves as a poultice for bruises, stings, wounds, swellings and abscesses. Astringent, antispasmodic, febrifuge, to cure colic, kidney ailments, diarrhea, coughs and fevers.)

in English: hooded-leaf pelargonium, tree pelargonium

in South Africa: wilde malva

Pelargonium cucullatum (L.) L'Herit. subsp. *tabulare* Volschenk (*Pelargonium cucullatum* L'Hér.; *Pelargonium cucullatum* [Soland.]; *Pelargonium cucullatum* [Soland.] subsp. *tabulare* Volschenk)

South Africa.

See *Hortus Kew.* (W. Aiton) 2: 426. 1789 and *Bothalia* 14(1): 48. 1982

(Leaves as a poultice for bruises, stings, wounds, swellings and abscesses. Astringent, antispasmodic, febrifuge, to cure colic, kidney ailments, diarrhea, coughs and fevers.)

Pelargonium denticulatum Jacq.

South Africa.

See Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Plantarum rariorum horti caesarei Schoenbrunnensis descriptiones et icones* 2: t. 135. Viennae, Londini, Lugduni Batavorum, 1797–1804

(Essential oil antibacterial.)

in English: fern-leaf geranium, fernleaf geranium, pine geranium, pine-scented geranium, toothed-leaved pelargonium

Pelargonium fulgidum (L.) L'Herit. (*Geranium fulgidum* L.; *Pelargonium fulgidum* [Soland.]; *Pelargonium fulgidum* L'Hér.)

South Africa. Leaves edible

See *Hortus Kew.* (W. Aiton) 2: 422. 1789

(Fresh leaves sour and astringent.)

in English: celandine-leaved pelargonium

in South Africa: rooi malva

Pelargonium graveolens L'Hérit. (*Pelargonium intermedium* Kunth)

South Africa.

See L'Héritier de Brutelle, Charles Louis (1746–1800), *Geraniologia*, seu Erodii, pelargonii, geranii, monsoniae et grieli historia iconibus illustrata, Parisiis: typis P.-F. Didot, 1787–1888 and *Handb. Pl. Victoria* 2 (1972) 314. 1972

(Essential oil antibacterial.)

in English: rose geranium, rose-scented pelargonium, sweet-scented geranium

in Arabic: attirchia

in South Africa: wildemalva

in China: xiang ye

Pelargonium grossularioides (L.) L'Herit. (*Geranium grossularioides* L.; *Pelargonium anceps* L'Hér.; *Pelargonium anceps* L'Hér. ex Aiton; *Pelargonium filicaule* Knuth; *Pelargonium grossularioides* [Soland.]; *Pelargonium grossularioides* (L.) L'Hér. ex Aiton)

South Africa.

See *Species Plantarum* 2: 679. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 420. 1789 and *Das Pflanzenreich* Heft 53(IV. 129): 408. 1912

(Plant decoction for pregnant women, as a postpartum remedy or as abortifacient.)

in English: gooseberry-leaved pelargonium

in South Africa: rooirabas, rooirabassam, rooistingelhoutbas

Pelargonium inquinans (L.) L'Herit. (*Pelargonium inquinans* [Soland.]

South Africa.

See *Hortus Kewensis*; or, a catalogue ... 2: 424. 1789

(Leaves and stems crushed and used as a headache and flu remedy.)

in English: scarlet pelargonium

in South Africa: wilde malva

Pelargonium luridum (Andrews) Sweet (*Geranospermum flabellifolium* (Harv.) Kuntze; *Geranospermum rehmannii* (Szyszyl.) Kuntze; *Geranium luridum* Andrews; *Pelargonium aconitophyllum* Steud.; *Pelargonium aconitophyllum* (Eckl. & Zeyh.) Steud.; *Pelargonium flabellifolium* Harv.; *Pelargonium longiscapum* Schltr.; *Pelargonium longiscapum* Schltr. ex R. Knuth; *Pelargonium luridum* Sweet; *Pelargonium rehmannii* Szyszyl.; *Pelargonium schlechteri* R. Knuth; *Pelargonium zeyheri* Harv.; *Polyactium amatymbicum* Eckl. & Zeyh.)

South Africa.

See Andrews, Henry Charles (fl. 1790s–1830), *Geraniums: or A monograph of the genus Geranium ...* London, the author, 1805, *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 1. 68. 1835 [Dec 1834–Mar 1835], *Nomencl. Bot.* [Steudel], ed. 2. 2: 283. 1841, *Fl. Cap.* (Harvey)

i. 276. 1860, *Revisio Generum Plantarum* 1: 94–95. 1891, *Revisio Generum Plantarum* 3(3): 32. 1898 and *Bot. Jahrb. Syst.* xl. 72. 1907, *Pflanzenr.* (Engler) *Geraniac.* 365. 1912

(Veterinary medicine, leaves infusion, for calves.)

Pelargonium odoratissimum (L.) L'Hérit. (*Geranospermum odoratissimum* Kuntze; *Geranospermum odoratissimum* (L.) Kuntze; *Geranium odoratissimum* L.; *Pelargonium odoratissimum* [Soland.]

South Africa.

See *Species Plantarum* 2: 679. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 419. 1789, *Revisio Generum Plantarum* 1: 94. 1891 and *Pl. Syst. Evol.* 183: 83–97. 1992

(Essential oil antibacterial.)

in English: apple geranium

Pelargonium panduriforme Eckl. & Zeyh. (*Pelargonium karrooense* Knuth; *Pelargonium quercifolium* L'Hérit.; *Pelargonium quercifolium* Baum. ex Hoffmanns.; *Pelargonium quercifolium* Hort. ex Hoffmanns.; *Pelargonium quercifolium* Hort. Cels ex Hoffmanns.)

South Africa.

See *Geraniologia* t. 14. 1792 [1792 publication comprises plates, text was effectively published 10 May 1802, see TL-2], Hoffmannsegg, Johann Centurius von (1766–1849), Verzeichniss der Pflanzenkulturen in den Gräfl. Hoffmannseggischen Gärten zu Dresden und Rammenau ... Dresden: In Commission der Arnoldischen Buchhandlung, 1824–1826, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 82. 1835 and *Repertorium Specierum Novarum Regni Vegetabilis* 19: 231. 1923

(Aromatic, stimulant, astringent, drunk for the treatment of rheumatism, hypertension and heart diseases.)

in English: almond geranium, balsam-scented geranium, fiddle leaf geranium, oak-leaved geranium, oak-leaved geranium, village oak geranium

Pelargonium peltatum (L.) L'Herit. (*Geranospermum peltatum* (L.) Kuntze; *Geranium peltatum* L.; *Pelargonium lateripes* L'Hér.)

South Africa.

See *Sp. Pl.* 2: 678. 1753, *Hortus Kew.* (W. Aiton) 2: 427–428, t. 24. 1789, *Geraniologia* t. 24. 1792, *Revisio Generum Plantarum* 1: 94. 1891

(Pounded leaves as an antiseptic for wounds, burns, skin diseases. Sour-tasting sap used to treat sore throats.)

in English: cascading geranium, hanging geranium, ivy geranium, ivy-leaved geranium, ivy-leaved pelargonium

in South Africa: kolsuring

Pelargonium pulverulentum Colv. ex Sweet (*Pelargonium arenicola* Steud.; *Pelargonium hollandii* F.M. Leight.;

Pelargonium pedicellatum Sweet; *Pelargonium testaceum* E. Mey.; *Pelargonium testaceum* Baker; *Polyactium arenarium* Eckl. & Zeyh., non *Pelargonium arenarium* (Burm.f.) DC.; *Polyactium primulaeforme* Eckl. & Zeyh.; *Polyactium primuliforme* Eckl. & Zeyh.)

South Africa, Nigeria.

See *Hortus Kewensis*; or, a catalogue ... 2: 417. 1789, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 65–66. [Dec 1834–Mar 1835], *Nomencl. Bot.* [Steudel], ed. 2. 2: 283. 1841, Drége, J.F. (Johann Franz) (1794–1881), *Zwei pflanzengeographische Documente*, nebst einer Einleitung von E. Meyer. [Regensburg] 1843 and *S. African Gard.* 22: 229, 232. 1932, *Plant Systematics and Evolution* 159: 165–171. 1988, Maggs, G.L., P. Vorster, J.J.A. van der Walt & M. Gibby, “Taxonomy of the genus *Pelargonium* (Geraniaceae): the section *Polyactium*. 3. The subsection *Polyactium*.” *South African Journal of Botany* 65: 115–143. 1999

(Leaves astringent, for diarrhea, cholera, dysentery. Root cathartic, purgative. Veterinary medicine, to treat liver disease in cattle and sheep, diarrhea in goats.)

in South Africa: intololwanan uvendle

Pelargonium ramosissimum Willd.

Tropical Africa.

See *Sp. Pl.*, ed. 4 [Willdenow] 3(1): 688. 1800

(Leaves for neuralgia, colds, stomachache.)

Pelargonium reniforme Curtis (*Pelargonium reniforme* Hort. ex F. Dietr.; *Pelargonium reniforme* Spreng.)

South Africa.

See *Hortus Kewensis*; or, a catalogue ... 2: 417. 1789, *Bot. Mag.* 14: t. 493. 1800 and *Sci. Rep. Res. Inst. Evol. Biol.* 3: 157–170. 1986, *Plant Systematics and Evolution* 159: 165–171. 1988, *Plant Systematics and Evolution* 183: 83–97. 1992

(Leaves astringent, for diarrhea, cholera, dysentery, menstrual irregularities.)

in Southern Africa: iKhubalo, iYeza lezikhali, roois rabas

Pelargonium sidifolium R. Knuth (*Geranium sidifolium* Thunb.; *Pelargonium sidifolium* (Thunb.) R. Knuth; *Pelargonium sidifolium* Willd.)

South Africa.

See *Enum. Pl.* [Willdenow] 2: 706. 1809 and *Pflanzenr.* (Engler) *Geraniac.* 448, in syn. 1912, *Bothalia* 19(2): 225–235. 1989

(Crushed roots a remedy for stomachache in infants, a decoction drunk for diarrhea. Veterinary medicine, vermifuge.)

Pelargonium sidoides DC.

South Africa. Similar to *Pelargonium reniforme*

See *Hortus Kewensis*; or, a catalogue ... 2: 417. 1789, *Prodr.* (DC.) 1: 680. 1824 and *Plant Systematics and Evolution* 159: 165–171. 1988, *Plant Systematics and Evolution* 183: 83–97. 1992

(Veterinary medicine, vermifuge.)

in South Africa: kalwerbossie, rabassam

Pelargonium tomentosum Jacq. (*Pelargonium tomentosum* L'Hér. ex DC.; *Pelargonium tomentosum* Eckl. & Zeyh.)

South Africa.

See *Icon. Pl. Rar.* [Jacquin] 3: 10, t. 537. 1786–1793, *Prodr.* (DC.) 1: 656. 1824, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 79. [Dec 1834–Mar 1835] and *S. African J. Bot.* 60: 1–4. 1994

(Essential oil antibacterial.)

in English: pennyroyal pelargonium, peppermint-scented pelargonium

Pelargonium transvaalense R. Knuth

South Africa.

See *Pflanzenr.* (Engler) *Geraniac.* 434, in syn. 1912

(Chewed roots for diarrhea, dysentery, cholera, stomachache, colds and fever.)

in English: Transvaal pelargonium

Pelargonium triste (L.) L'Hérit. (*Geranium flavum* Burm.f.; *Geranium triste* L.; *Pelargonium flavum* (L.) Ait.; *Pelargonium flavum* (Burm.f.) L'Hér.)

South Africa.

See *Sp. Pl.* 2: 676. 1753, *Flora Indica*: cui accedit series zoophytorum indicorum, nec non Prodromus Florae Capensis. 19. 1768, *Hortus Kew.* (W. Aiton) 2: 418. 1789 and *S. African J. Bot.* 65: 115–143. 1999

(Tubers infusion for treating dysentery and diarrhea.)

in English: night scented pelargonium

in South Africa: aandblom, kaneelblom, kaneeltjie, rasmusbas, rooiwortel, wit n/eitjie

Pelatantheria Ridley Orchidaceae

From the Greek *pelates* ‘neighbouring, a neighbour, approaching’ and *anthera* ‘anther’, referring to the column and the anther cap, see John Lindley, *The Botanical Register*. subt. t. 817. 1824, *Coll. Bot.* (Lindley) 8: t. 39B. 1824, *Folia Orchidaceae. Acampe* 1. 1853, *Journal of the Linnean Society, Botany* 32: 371, 373. 1896 and Herman Montague Rucker Rupp (1872–1956), in *The Victorian Naturalist*. 57: 218. (Apr.) 1941, Alick William Dockrill, *Australasian Sarcanthinae*. 1967 and *Australian Indigenous Orchids*. Sydney 1969.

Pelatantheria insectifera (Rchb. f.) Ridl.) (*Sarcanthus insectifer* Rchb. f.)

India, Himalaya. See also *Sarcanthus*

See *Botanische Zeitung*. Berlin 15(10): 159. 1857, *Journal of the Linnean Society, Botany* 32: 371, 373. 1896

(Veterinary medicine, paste made by crushing the plant banded on fractured bone of cattle.)

in India: banadedi

Peliosanthes Andrews Asparagaceae (Convallariaceae, Liliaceae)

From the Greek *pelios* 'livid, a dark colour, blackish, discoloured, purple' and *anthos* 'flower', see *Botanist's Repository*, for new, and rare plants 10: t. 605, 634. 1808, *Enumeratio Plantarum Javae* 1: 15. 1827 and Jessop, J.P. "A Revision of *Peliosanthes*." *Blumea* 23: 141–159. 1976.

Peliosanthes griffithii Baker (*Peliosanthes bakeri* Hook.f.; *Peliosanthes violacea* var. *minor* Baker)

Nepal.

See *Numer. List* [Wallich] n. 5084. 1831–32, *J. Linn. Soc., Bot.* 17: 506. 1879, *J. Linn. Soc., Bot.* 17: 506. 1879 [1880 publ. 1879], *The Flora of British India* [J.D. Hooker] 6(18): 267. 1892 and *Blumea* 23: 141–159. 1976 [as *Peliosanthes teta* Andrews subsp. *humilis* (Andrews) Jessop ex Gandhi], *Fl. Hassan Distr.:* 799. 1976

(Leaf juice applied for venereal diseases.)

Malayan names: lumbah bukit, pinang lumbah

Pellaea Link Pteridaceae (Adiantaceae)

Greek *pellos*, *pellaios* 'dark, dusky', referring to the leaves or to the stalks, see *Herbarium Rafinesquianum* 50. 1833, *Filicum Species* 59. 1841, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 160. 1842, *Mém. Soc. Mus. Hist. Nat. Strasbourg* 5: 35. 1857, *Cryptogames Vasculaires ... du Brésil* 1. 42. 1869, *Historia Filicum* 164, 281, 289. 1875, *Bot. Jahrb. Syst.* 3: 418–419. 1882, *Bot. Gaz.* 21: 262. 1896 and *Fern Gaz.* 11(2–3): 141–162. 1975, *Rhodora* 83(833): 135. 1981.

Pellaea calomelanos (Sw.) Link (*Pellaea hastata* (Thunb.) Prantl; *Pteris calomelanos* Sw.; *Pteris hastata* Thunb.) (Greek *kalos* 'beautiful, fine' and *melas*, *melanos* 'black'.)

Tropical Africa. Fern, terrestrial, leaves heart-shaped

See *Species Plantarum* 2: 1073–1077. 1753, *Prodromus Plantarum Capensium*, ... 172. 1800, *Journal für die Botanik* 1800(2): 70. 1801, *Filicum Species* 59, 61. 1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 3(5): 418. 1882 and *Flore de Madagascar et des Comores* 5(5): 113–168. 1958

(Whole herb for abdominal pains, convulsions, postpartum remedy. Fronds decoction taken for boils in the mouth and ulcer of nose; fronds smoked for asthma, headache and colds, catarrh. Rhizomes for skin diseases, astringent, anthelmintic. Magico-religious beliefs, spiritual, emotional.)

in Madagascar: mangarato

Pellegriniodendron Léonard Fabaceae (Caesalpinaceae, Caesalpinioideae, Detarieae, Leguminosae)

Named for the French botanist François Pellegrin, 1881–1965, his writings include "Walsura nouveau du Tonkin." *Not. Syst.* 1: 227–229. 1910, "Notes sur les *Aglaia*, *Amoora* et *Lansium*." *Not. Syst.* 1: 284–290. 1910, "Munronia nouveau de l'Annam." *Not. Syst.* 2: 135–136. 1911, *La Flore du Mayombe* d'après les Récoltes de M. Georges Le Testu. [in *Mémoires de la Société Linnéenne de Normandie*. XXVI volume. Two parts; collector Georges M.P.C. Le Testu, 1877–1967] Caen 1924–1928 and "Peranthera Craib et *Oreocharis* Benth., Gesneracées du Yunnan." *Bull. Soc. Bot. France.* 72: 872–873. 1925. See Lecomte, Paul Henri (1856–1934), *Flore générale de l'Indo-Chine*. Paris, Masson, 1907–, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Bulletin du Jardin Botanique de l'État* 25: 203. 1955, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 64. 1965. Close and related to *Gilbertiodendron*.

Pellegriniodendron diphyllum (Harms) J. Léonard (*Macrolobium diphyllum* Harms)

Tropical Africa, Cameroon. Perennial non-climbing tree, low branching, terminal drooping panicle, large petal white with red spur, elliptical to obovoid flattened thinly woody dehiscent pod

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 84–85. 1901, *Bulletin du Jardin Botanique de l'État* 25(2): 203. 1955

(Leaves antimicrobial, astringent, for skin diseases, colds and cough.)

Pellionia Gaudich. Urticaceae

Named for the French Admiral Alphonse Odet Pellion, 1796–1868, a companion of the French navigator Louis de Freycinet on his second voyage around the world in 1817 to 1820; see *Flora Cochinchinensis* 538–539. 1790, Louis de Freycinet, *Voyage autour du Monde entrepris par ordre du Roi ... sur les corvettes de S.M. L'Uranie et La Physicienne, pendant ... 1817–1820*. (Atlas historique par ... A. Pellion, etc.) Paris 1826[–1830].

Pellionia procrifolia Kurz

India, Nicobar. Climber, white flowers, female flowers in axillary clusters

See *J. Bot.* 13: 330. 1875

(For swellings, boils and rheumatism.)

Pellionia radicans (Siebold & Zuccarini) Weddell (*Elatostema radicans* (Siebold & Zuccarini) Weddell; *Elatostema radicans* var. *grande* (Gagnepain) H. Schroeter; *Pellionia arisanensis* Hayata; *Pellionia chikushiensis* Yamamoto; *Pellionia radicans* f. *grandis* Gagnepain; *Pellionia radicans* var. *grandis* (Gagnepain) W.T. Wang; *Procris radicans* Siebold & Zuccarini)

China.

See *Fl. Jap.* 218. 1846 and *Acta Phytotax. Sin.* 42: 571–572. 2004

(Ulcers, cuts, wounds.)

in China: chi che

Pellionia repens (Lour.) Merrill (*Elatostema daveauanum* (N.E. Br.) Haller f.; *Elatostema gibbosum* Kurz; *Elatostema pulchrum* Haller f.; *Elatostema repens* (Lour.) Haller f.; *Elatostema repens* var. *pulchrum* (N.E. Br.) H. Schroet.; *Elatostema repens* var. *viride* (N.E. Br.) H. Schroet.; *Pellionia annamica* Gagnep.; *Pellionia daveauana* N.E. Br.; *Pellionia daveauana* (Carr.) N.E. Br.; *Pellionia daveauana* var. *viridis* N.E. Br.; *Pellionia daveauanana* Hort.; *Pellionia pulchra* N.E. Br.; *Polychroa repens* Lour.; *Procris gibbosa* Wall.)

SE Asia, Malaysia.

See *Flora Cochinchinensis* 2: 538–539, 559–560. 1790, *Gardener's Chronicle*, new series 14: 262. 1880, *Annales du Jardin Botanique de Buitenzorg* 13: 316. 1896 and *Lingnan Science Journal* 6(4): 326. 1928, *Bull. Soc. Bot. France* 75: 918. 1929, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 83(2): 26. 1936

(For boils, swellings, abdominal pains, pound the plant and poultice; plant decoction for rheumatism.)

in English: rainbow vine, satin pellionia, trailing watermelon begonia

in China: tu yan hua

Malayan names: pipi keli, sisek keli, sisek naga, sisek teng-giling, udu adong

Peltandra Raf. Araceae

Greek *pelte* 'a shield, target' and *aner, andros* 'stamen, male', Latin *pelta, ae* for a small, light shield in the shape of a half-moon; see C.S. Rafinesque, *Florula ludoviciana*. 167. New York 1817, *Jour. Phys. Chim. Hist. Nat.* 89: 103. 1819, *New Fl. N. Am.* 1: 6, 86. 1836, *Flora Telluriana*. 3: 65. 1836 [1837] and *The good book*. 45. 1840 and E.D. Merrill,

Index Rafinesquianus. 81. 1949, D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 15–25. 1988.

Peltandra virginica (Linnaeus) Schott (*Arum virginicum* Linnaeus; *Peltandra luteospadix* Fernald; *Peltandra tharpia* F.A. Barkley)

North America. Food plant

See *Sp. Pl.* 2: 966. 1753, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts*. 89:103. 1819 and Blackwell, W.H., Jr. and K.P. Blackwell. "The taxonomy of *Peltandra* (Araceae)." *J. Elisha Mitchell Sci. Soc.* 90: 137–140. 1974

(For skin diseases.)

in English: arrow arum, green arrow arum, tuckahoe

Peltophorum (Vogel) Benth. Fabaceae (Caesalpinieaceae, Caesalpinieae)

Referring to the shape of the stigma, from the Greek *pelte* 'a shield' and *phoros* 'bearing', see *Flora Cochinchinensis* 266. 1790, *Linnaea* 11(3): 406. 1837, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 75. 1840 and *Darwiniana* 5: 279–298, 369–416. 1941, *Darwiniana* 6(2): 127–178. 1943, *Darwiniana* 7(2): 240–321. 1946, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Arq. Jard. Bot. Rio de Janeiro* 18: 109–177. 1965, *Mem. New York Bot. Gard.* 25(2): 1–228. 1975, *Flora of Ceylon* 7: 34–107. 1991, *Flora Malesiana* I, 12, 2: 409–784. 1996, *Ceiba* 44(2): 105–268. 2003 [2005].

Peltophorum africanum Sonder (*Baryxylum africanum* (Sonder) Pierre; *Brasilettia africana* (Sond.) Kuntze)

Tropical Africa. Perennial non-climbing tree, bushy, unarmed, spreading canopy, inflorescence an erect terminal or axillary raceme, petals bright yellow, fruit a flat pendulous elliptical indehiscent pod winged along both margins, flowers visited by bees, young leaves and pods eaten by livestock, most closely related to *Bussea*

See *Linnaea* 23: 35. 1850, *Revisio Generum Plantarum* 1: 164. 1891 and *Fl. Pl. Africa* 36: t. 1434. 1963, *Proc. 3rd All Indian Congr. Cytol. Genet.* 3: 493–499. 1981, *Journal of Ethnopharmacology* 12: 35–74. 1984, *J. Econ. Taxon. Bot.* 10: 173–175. 1987, *Journal of Ethnopharmacology* 74: 257–264. 2001, *Journal of Ethnopharmacology* 79: 109–112. 2002, *South African Journal of Botany* 69(3): 301–363. 2002, *South African Journal of Botany* 69(2): 199–203. 2003, *Journal of Ethnopharmacology* 86: 97–108. 2003, *Journal of Ethnopharmacology* 99: 83–91. 2005

(Leaves febrifuge, tonic, analgesic. Bark hepatoprotective, antibacterial, anti-arrhythmic, anthelmintic, molluscicidal, a decoction for colic, stomach and liver disorders, fever, schistosomiasis; fresh bark chewed to relieve abdominal pain. Roots for gynaecological complaints, an infusion stops heavy bleeding on giving birth, also used for treating cough

with blood and tuberculosis. To cure infertility boil the roots with those of *Bridelia cathartica* and *Ochna* sp. and drink the mixture. Bark and root decoctions anthelmintic, tonic, for the treatment of wounds, venereal diseases, toothache, psychosis, hysteria; stem and root for diarrhea and dysentery; root, leaves and bark used to clear intestinal parasites and relieve stomach problems. Veterinary medicine, crushed bark in water rubbed into the coats of pets to keep away fleas and maggots.)

in English: African blackwood, African-wattle, Natal wattle, Rhodesian black wattle, Rhodesian wattle, weeping wattle

in Namibia: !geyie'djao

in Southern Africa: dopperkiaat, huilboom, huilbos, isiKhaba-mkhombe, isiKhabakhombe, mosathia, mosehla, mosetlha, mosetla, mosiru, movevi, mugija, musese, Ndedeze, ndzedze, Nhlanhlanbu, nhlanhlanhu, nzeze, omuparara, umSehle, umThoboMosehla; iZeze, muNyamashawa, muOra, muPangara, muPangasa, muSabanyoka, muZaze, muZeze, Nyakambariro (Shona); isiKhabamkhombe, umSehle, umThobo (Zulu); isiKhabakhombe (Swazi)

Peltophorum dasyrrhachis (Miq.) Kurz (*Baryxylum dasyrachis* (Miq.) Pierre; *Brasilettia dasyrrhachis* (Kurz ex Baker) Kuntze; *Caesalpinia dasyrachis* Miq.; *Caesalpinia dasyrrhachis* Miq.; *Peltophorum dasyrachis* (Miq.) Kurz; *Peltophorum dasyrachis* Kurz ex Baker; *Peltophorum dasyrrhachis* (Miq.) Baker; *Peltophorum dasyrrhachis* Kurz)

India, Cambodia, SE Asia. Perennial non-climbing tree

See *The Flora of British India* 2(5): 257. 1878, *Revisio Generum Plantarum* 1: 164. 1891

(For coughs, pound the bark in water, strain and drink the liquor.)

in English: yellow batai

in Cambodia: tram kang, tramkan, trâse:k, trasec

in Indonesia: petaian, sog

in Laos: s'a:z kha:m, sa: f'ang, sa: ph'ang

Malayan names: alai, batai, jemerelang, kerayang

in Thailand: arang, nonsi

in Vietnam: hoan linh, hoang-linh, lim vang, lim v[af]ng, lim xet, lim x[ej]t, mun si

Peltophorum dubium (Sprengel) Taubert (*Baryxylum dubium* (Sprengel) Pierre; *Brasilettia dubia* (Spreng.) Kuntze; *Caesalpinia dubia* Sprengel; *Peltophorum vogelianum* Benth., nom. illeg.; *Peltophorum vogelianum* Walp.)

Argentina, Brazil. Perennial non-climbing tree

See *Systema Vegetabilium*, editio decima sexta 2: 343. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 75. 1840, *Repertorium Botanices Systematicae*. 1(5): 811. 1843, *Revisio Generum Plantarum*

1: 164. 1891, *Die Natürlichen Pflanzenfamilien* 3(3): 176. 1892, *Flore Forestière de la Cochinchine* sub pl. 390. 1899 and *Proc. 3rd All Indian Congr. Cytol. Genet.* 3: 493–499. 1981, *Phytomedicine* 11(2–3): 230–234. 2004

(Antimicrobial.)

in English: yellow poinciana

in South America: angico, cana fistula, farinha-seca, ibir puit, ibira pita, ibira puita, ibira puita guassu, imbir puit, ivira pita, ivira pita guazu, virapita, ybira pyita, ybira pyita guazu, yuira pita

Peltophorum pterocarpum (DC.) K. Heyne (*Baryxylum inerme* (Roxb.) Pierre; *Brasilettia ferruginea* (Decne.) Kuntze; *Caesalpinia arborea* Miq.; *Caesalpinia ferruginea* Decne.; *Caesalpinia gleniei* Thwaites; *Caesalpinia inerme* Roxb.; *Caesalpinia inermis* Roxb.; *Inga pterocarpa* DC.; *Inga pterocarpum* DC.; *Peltophorum ferrugineum* (Decne.) Naves; *Peltophorum pterocarpum* (DC.) Backer ex K. Heyne; *Peltophorum roxburghii* (G. Don) Degener; *Poinciana roxburghii* G. Don; *Senna multijuga* (Rich.) H.S. Irwin & Barneby)

Australia, Tropical Asia. Perennial non-climbing tree, small tree, umbrella-shaped crown, bright yellow fragrant flowers, reddish-brown pods, commonly confused with the similar looking *Peltophorum dubium*

See *Hort. Bengal.* 90. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 441. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 367. 1832, *A General History of the Dichlamydeous Plants* 2: 433. 1832, *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 462. 1834, *Enumeratio Plantarum Zeylaniae* [Thwaites] 5: 414. 1864, *Flora Australiensis: a description ...* 2: 279. 1864, *Flora de Filipinas* 4: Nov. App. 69. 1880, *Revisio Generum Plantarum* 1: 164. 1891, *Flora Cochinchinensis* sub pl. 390. 1899 and *De Nuttige Planten van Nederlandsch-Indie* 2: 755. 1927, *Flora Hawaiensis* Fam. 169b. 1938, *Taxon* 29: 352–353. 1980, *Memoirs of the New York Botanical Garden* 35: 492. 1982, *Cell Chromosome Res.* 15(3): 8. 1992

(Used in Sidha. Bark tonic, astringent, for intestinal disorders, sprains, bruises and swellings, a postpartum remedy. Crushed leaves made into a paste applied to cuts and wounds. Leaflets and buds antifungal. Flowers antiinflammatory, antibacterial.)

in English: copperpod, peltophorum, yellow-flamboyant, yellow flame, yellow-flame tree, yellow-poinciana

in Borneo: meriputi

in China: dun zhu mu

in India: bettada huli, bettada hunise, ivalvagai, iyalvakai, kondachinta, perungondrai, puccarrilpasanamayini, tamarshing

in Indonesia: soga, soga jambal

Malayan names: batai, batai laut, jemerelang, jemerelang laut

in Philippines: siár

in Thailand: krathin paa, non see, saan ngoen

in Vietnam: hoang-linh, lim sét, lim vang, lim vangh, lim xet, trac vàng

Pemphis Forster & Forster f. Lythraceae

Greek *pemphis*, *pemphidos* ‘bladder, blister, a bubble, a swelling’, referring to the ovary or to the globular or swollen capsule; see Johann Reinhold Forster (1729–1798) and his son Johann Georg Adam (1754–1794), *Characteres generum plantarum*. 67, t. 34. 1775, *Ann. Sci. Nat., Bot.* ser 4, 6: 75–138. 1856, *Mus. Bot.* 2: 1–256. 1856 and *Fl. Mascareignes* 95: 1–14. 1990.

Pemphis acidula Forster & Forster f. (*Lythrum pemphis* L., nom. illeg.; *Mangium porcellanicum* Rumph.; *Melanium fruticosum* Spreng.; *Millania rupestre* Zipp.; *Millania rupestris* Zipp. ex Blume; *Pemphis angustifolia* Roxb.; *Pemphis setosa* Blanco)

India. Shrub

See *Herbarium Amboinense* 3: 126, t. 84. 1743, *Characteres Generum Plantarum* [second edition] 34. 1775, *Suppl. Pl.* 249. 1782 [1781 publ. Apr 1782], *Syst. Veg.* (ed. 16) [Sprengel] 2: 455. 1825 [Jan–May 1825], *Flora Indica*; or, descriptions of Indian Plants 2: 465. 1832, *Fl. Filip.* [F.M. Blanco] 410. 1837, *Mus. Bot.* 2(1–8): 128. 1856

(Plant paste applied on fractured bone and paralysis. Leaf paste applied on forehead to relieve headache and also on fractured bones.)

in English: digging stick tree

in Rodrigues Isl.: bois matelot

in China: shui yuan hua

in India: puheal-ol, puhealol

in Japan: mizu-ganpi

Malayan names: keremak batu, mentagu, mentigi

Penianthus Miers Menispermaceae

Greek *pene*, *penion* ‘thread, spool’ and *anthos* ‘a flower’, see *Annals and Magazine of Natural History*, ser. 3 13: 124. 1864 and 20: 171. 1867 and *Bulletin du Jardin Botanique National de Belgique* 53(1–2): 17–66. 1983, *African Study Monographs* 24(1–2): 1–168. 2003.

Penianthus longifolius Miers (*Penianthus fruticosus* Hutch. & Dalziel)

Cameroon, West Africa. Small tree or shrub, vine-like, ramiflorous and cauliflorous, branching from near the ground,

leaves coriaceous, male flowers cauliflorous on trunk and branches and among leaves, bright red-orange smooth cauliflorous fruits, in forest

See *Annals and Magazine of Natural History* ser. 3 13: 124. 1864; 20: 172. 1867 and *Flora of West Tropical Africa* ed. 1 [Hutchinson & Dalziel] 1: 74. 1927, *Kew Bull.* 1927, 157. 1927, *Journal of Natural Remedies* 1(1): 45–48. 2001

(Fruits, root and root bark used as an aphrodisiac. Leaf extract purgative; pounded leaves inserted into the ears to cure otitis; leaves eaten to treat hernia. Root taken as an emetic, anthelmintic and against colic; root sap taken to treat coughs. Root bark of *Strychnos samba*, mixed with root bark of *Penianthus longifolius*, used to make arrow poison.)

in Central African Republic: sombolu, sombulu

in Congo: kuluku

Penianthus patulinervis Hutch. & Dalziel (*Penianthus zenkeri* auct. non (Engl.) Diels)

Tropical Africa, Sierra Leone, Ghana. Dioecious, evergreen, small shrub, yellow to orange or red drupe obovoid to ellipsoid, formerly included in *Penianthus zenkeri*

See *Flora of West Tropical Africa* ed. 1 [Hutchinson & Dalziel] 1: 74. 1927, *Kew Bull.* 1927, 156. 1927, *Planta Medica* 42: 275–278. 1981, *Phytochemistry* 22(1): 321–322. 1983, *Phytochemistry* 30(6): 1957–1962. 1991, *Phytochemistry* 46(1): 165–167. 1997

(Root, bark and twigs used as an aphrodisiac, a sexual stimulant; stem and roots antiplasmodial, in the treatment of diabetes; roots, bark and twigs decoction antiseptic, to heal wounds, abscesses and boils, for venereal diseases.)

Penianthus zenkeri (Engl.) Diels (*Heptacyclum zenkeri* Engl.; *Penianthus zenkeri* Diels)

Tropical Africa, Nigeria, Cameroon. Evergreen, cauliflorous liane, undershrub or shrub, woody herb, small tree, inflorescence an umbel, yellow to orange drupe ellipsoid

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 415. 1899 and *Pflanzenr.* (Engler) *Menispermac.* 101. 1910, *Planta Medica* 42: 275–278. 1981 *Phytochemistry* 22(1): 321–322. 1983, *Phytochemistry* 30(6): 1957–1962. 1991, *Phytochemistry* 46(1): 165–167. 1997

(Root, bark and twigs used as an aphrodisiac, a sexual stimulant; stem and roots antiplasmodial, in the treatment of diabetes; roots, bark and twigs decoction antiseptic, to heal wounds, abscesses and boils, for venereal diseases. Roots to treat male sexual impotence, intestinal worms, cough and wounds.)

Peniocereus (A. Berger) Britton & Rose Cactaceae

Greek *pene*, *penion* ‘thread, spool’ plus *Cereus*, referring to the very slender stems, see *Annual Report of the*

Missouri Botanical Garden 16: 77. 1905, *Contributions from the United States National Herbarium* 12(10): 428. 1909, *Cactaceas y Suculentas Mexicanas* 19(2): 38. 1974.

Peniocereus greggii (Engelm.) Britton & Rose (*Cereus greggii* Engelm.; *Cereus greggii* W. Watson; *Peniocereus greggii* Britton & Rose)

North America. Perennial shrub

See Wislizenus, F.A. (Frederick Adolph) (1810–1889), *Memoir of a Tour to Northern Mexico*: connected with Col. Doniphan's Expedition, in 1846 and 1847. 102. Washington, Tiffin & Streeter, printers, 1848 [United States. 30th Cong., 1st sess. Senate. Misc. 26] and *Gardeners' Chronicle*. London, t. 93. 1903, *Contributions from the United States National Herbarium* 12(10): 428, t. 74–75. 1909

(Roots decoction taken for diabetes.)

in English: nightblooming cereus

Peniocereus greggii (Engelm.) Britton & Rose var. ***greggii*** (*Cereus greggii* Engelm. var. *cismontanus* Engelm.; *Cereus pottsii* Salm-Dyck)

North America. Perennial shrub

See *Cactaeae in Horto Dyckensi Cultae* [ed. 1849] 1849: 208. 1850, *Proceedings of the American Academy of Arts and Sciences* 3: 287. 1856 and *Contributions from the United States National Herbarium* 12(10): 428, t. 74–75. 1909

(Roots decoction taken for diabetes.)

in English: nightblooming cereus

Peniocereus striatus (Brandege) Buxb. (*Cereus diguetii* F.A.C. Weber; *Cereus striatus* Brandege; *Neoevansia diguetii* (F.A.C. Weber) W.T. Marshall; *Neoevansia striata* (Brandege) Sánchez-Mej.; *Peniocereus diguetii* (F.A.C. Weber) Backeb.; *Wilcoxia diguetii* (F.A.C. Weber) Diguet & Guillaumin; *Wilcoxia diguetii* (F.A.C. Weber) Peebles; *Wilcoxia striata* (Brandege) Britton & Rose; *Wilcoxia striata* Britton & Rose)

Mexico, USA.

See *Zoë* 2(1): 19–20. 1891, *Bull. Mus. Hist. Nat. (Paris)* 1: 319. 1895 and *Contributions from the United States National Herbarium* 12(10): 428, 434. 1909, *Arch. Hist. Nat.* 4: 222. 1928, *Cactaceae* (Marshall & Bock) (Berlin) 84, cum descr. emend. 1941, *Leaflet. W. Bot.* v. 192. 1949, *Cact. Succ. J.* (Los Angeles) 23: 119. 1951, *Cactaceas y Suculentas Mexicanas* 18(1): 22. 1973, *Kakteen* 62: CIIa. 1975

(Root a remedy for swellings.)

Pennisetum Rich. Poaceae (Gramineae)

From the Latin *penna*, *ae* 'a feather, plume' and *saeta* (*seta*), *ae* 'a bristle, hair', referring to the bristly spikes, some of the species close to *Cenchrus* L. and *Setaria*, type *Pennisetum*

typhoideum Rich., complicated taxonomy, see Christiaan Hendrik Persoon (1761/1762–1836), *Synopsis plantarum*. 1: 72. Paris et Tubingae 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1036–1037. 1809, *Essai d'une Nouvelle Agrostographie* 59. 1812, *Bulletin Mensuel de la Société Linnéenne et des Sociétés Botanique de Lyon, d'Anthropologie et de Biologie de Lyon réunies* 2: 71. 1815, *Anleitung zur Kenntniss der Gewachse* 2(1): 154. 1817, *Flora* 12: 465. 1829, *Genera Plantarum* 3(2): 1106. 1833, *Nomenclator Botanicus. Editio secunda* 2: 299. 1841, *Flora* 25 Beibl. 2: 2. 1842, *Ind. Sem. Hort. Monsp.* 1844, *Flora Rossica* 4(14): 472. 1853, *Agrostographiae Aegyptiacae Fragmenta* 2: 49. 1853 [also *Memorie della Reale Accademia delle Scienze di Torino, ser. 2*: 49, t. 28. 1853], *Systematisches Verzeichniss der im Indischen Archipel* 60. 1854, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 374–375. 1854, *Vet. Acad. Handl. Stockholm* 1853: 136, 156. 1855 [also *Kongl. Vetensk. Acad. Handl.*], *Flora Brasiliensis* 2(2): 305, 308. 1877, *Die Natürlichen Pflanzenfamilien* 2(2): 38. 1887, *Flora Capensis* 7: 431. 1899 and *Annuario del Reale Istituto Botanico di Roma* 8: 41, 314. 1903 et 1908, *Contr. U.S. Natl. Herb.* 22: 210–211. 1921, *Flora of Tropical Africa* 9: 956–957, 962, 966. 1934, *Journ. Wash. Acad. Sci.* 45: 135–143. 1955, *Hook. Ic. Bot.* 31: 163–174. 1977, *Flora Mesoamericana* 6: 371–374. 1994, *Flora of Ethiopia and Eritrea* 7: 259–275. 1995, *Contributions from the United States National Herbarium* 46: 527–536. 2003.

Pennisetum clandestinum Hochst. ex Chiov. (*Pennisetum clandestinum* Hochst. ex Chiov.; *Pennisetum inclusum* Pilg.; *Pennisetum longistylum* Hochst.; *Pennisetum longistylum* var. *clandestinum* (Hochst. ex Chiov.) Leeke; *Pennisetum longistylum* var. *clandestinum* (Hochst. ex Chiov.) Chiov., nom. illeg., non *Pennisetum longistylum* var. *clandestinum* (Hochst. ex Chiov.) Leeke)

East Africa highlands, north Africa, tropical Africa. Perennial, vigorous and aggressive, branching and rooting freely, spreading rapidly, dense mat forming or close-cropped sward, semiscandent, decumbent, prostrate, flattened culms strongly creeping and branching, rhizomatous and stoloniferous, long stolons multi-branched, roots fibrous and tough, drought resistant and palatable, nutritious fodder grass if cut before flowering, a serious noxious weed in turf and waste places, a troublesome weed of highland crops, invasive, excellent colonizer, tolerates flooding well, useful for soil conservation and for erosion control

See *Syn. Pl.* 1: 72. 1805, *Flora* 24(Intell. Bd.1): 19. 1841, *Tent. Fl. Abyss.* 2: 388. 1850 and *Annuario del Reale Istituto Botanico di Roma* 8: 41, tab. 5, fig. 2. 1903, *Zeitschrift für Naturwissenschaften* 79: 23. 1907, *Annuario del Reale Istituto Botanico di Roma* 8(3): 319. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 209. 1910, *Contr. U.S. Natl. Herb.* 22: 210. 1921, *Grasses of Ceylon* 154. 1956, *Grasses of Burma* ... 344. 1960,

Fieldiana, Bot., n.s. 4: 463. 1980, *Cytologia* 54: 641–652. 1989, *Proc. N.Z. Grasslands Assoc.* 51: 47–50. 1990

(Can be a toxic nitrate.)

in English: Kikuyo grass, Kikuyograss, Kikuyu, Kikuyu grass, Kikuyugrass (after the Kikuyu tribe, Kenya; see W. Scoreby Routledge and K. Routledge, *With a prehistoric people. The Akikuyu of British East Africa*. London 1910, Fr. C. Cagnolo, *The Akikuyu*. Catholic Mission of the Consolata Fathers. Nyeri, Kenya 1933)

in East Africa: chikoko, esereti, kigombe, lindadongo, olobobo

in Southern Africa: Kikoejoe, Kikoejoegrass, Kikujugras, Kikuyugras; tajoe (Sotho)

in Thailand: ya-khikhuyu

Pennisetum flaccidum Griseb. (*Gymnotrix flaccida* (Griseb.) Munro ex Aitch.; *Gymnotrix flaccida* (Griseb.) Munro ex Aitch.; *Pennisetum centrasiaticum* Tzvelev; *Pennisetum flaccidum* Griseb. ex Roshev., nom. illeg., non *Pennisetum flaccidum* Griseb.; *Pennisetum incomptum* Nees ex Steud.)

China, Nepal, Pakistan, India, Iran. Perennial bunchgrass, slender, erect, rhizomatous, deep rooted, hairy, purple stems, narrow grey-green arching leaves, purplish plumes, montane grass, useful for erosion control, fodder and forage, grazing and hay, eaten by Tibetan sheep and Tibetan cashmere-producing goats, common along field borders, in temperate mountainous zones, high mountain steppe in temperate or subtropical zone, semi-arid rangelands of the Himalaya

See *Synopsis Plantarum Glumacearum* 1(2): 105. 1854 [1855 publ. 2–3 Mar 1854], *Die geographische Verbreitung der Pflanzen Westindiens* 1865, *Catalogue of the Plants of the Punjab and Sindh* 163. 1869 and *Flora Aziatskoj Rossii* 6: 77. 1914, *The Color Encyclopedia of Ornamental Grasses: Sedges, Rushes, Cat-tails, and Selected Bamboos* 1999

(Plant juice used as tonic.)

in English: flaccid grass, meadow pennisetum

in Nepal: dhimchi

Pennisetum glaucum (L.) R. Br. (*Alopecurus typhoides* Burm.f.; *Cenchrus spicatus* (L.) Cav.; *Cenchrus spicatus* (L.) Kuntze, nom. illeg., non *Cenchrus spicatus* (L.) pubirachis Berhaut; *Pennisetum reversum* Hack. ex Büttner; *Pennisetum secundiflorum* (Fig. & De Not.) T. Durand & Schinz)

Tanzania, Mauritania, India. Annual bunchgrass, rarely perennial, leafy, usually herbaceous, well-branched from the base, cottony whitish inflorescences, inner bristles of the involucre densely villous to fluffy, shade species, a valuable soil stabilizer, invasive, often dominant on disturbed land, can become a noxious weed of cultivation, good forage before flowering, very palatable to cattle and sheep

in French: napier, fausse canne à sucre, herbe à éléphant, sissongo

in Italian: erba di napier, erba elefantina, pennisetto rosso

in Africa: capim de Rhodesia (Portuguese Africa); zinyamunga (former Rhodesia); sissongo (Cameroon), senjere (Malawi), kyambama, daawaar kadaa, yambama (Hausa), moloko (Poular), tienghié (Kissi), mabingobingo (Swahili), hoyen (Guerzé), bô, gbô (Malinké), eesun, eesun funfun, eesun pupa, iken, esisun, eesu (Yoruba)

in Angola: madeanga, marianga

in Benin: djissouvè, essounsoun kpikpa, fan vovo, hênouvè

in Cameroon: bekoko, besong, makoko, sosom, sosom e nyak, sosom e yak

in Congo: iangala a moome, maangala ma meome

in Ghana: adai, akoko ani, anan hwerew, elanke akanla, gla, hwedie

in Ivory Coast: chelié, dia, dian voli, né

in Malawi: nsenjere, senjere

in Nigeria: achalà, acharà, acharà mili, awo, car, daawar kadaa, dawar kadàà, epiri, eromo, fe, gawri ngabba, iiliine, ikpu, izai, izon usi, kyambama, kyambana, mbiit, mboko ekpò, mbokok ekpò, oghodogbo, ono, osi, toloore, toll ore,

tolloore, ukpò ukwu, usi, uwa nor, uwua nor, yambamaa, yiwo

in Sierra Leone: a anwo, anlal, bush shuga ken, chengjo, fa, fawa, ka staf, kulon na, kulu na, mbowi hei, molike, moloko, molokoyo, na, ngala, ngara, ngongoi, tamben

in Southern Africa: olifantsgras, mfufu; mufufu (Shona)

in Yoruba: eèsun, eesun, eesun funfun, eesun pupa, iken, esisun, eesu

in Togo: adà

in India: aane hullu, dappa naeppear hullu

in Indonesia: rumput gajah

in Malaysia: rumput gajah

in the Philippines Isl.: buntot-pusa, darai, gulalay, handalau, handalawi, lagoli

in Thailand: yaa nepia, ya nepia

in Vietnam: co' duôi voi

in Brazil: capim elefante

in Colombia: pasto elefante

in Ecuador: paja elefante

in Mexico: elefante, gigante, merkerón, pasto elefante, zacate elefante, zacate gigante

in Spanish: el napier, el napier morado, gigante, hierba elefante, merker, mott, pasto elefante, pasto napier, supermerker, yerba elefante

in Micronesia: napier grass, pukso

Pennisetum unisetum (Nees) Benth. (*Beckera dioica* Nees; *Beckera glabrescens* Steud.; *Beckera uniseta* (Nees) Nees ex Hochst.; *Beckera uniseta* (Nees) Steud., nom. illeg., non *Beckera uniseta* (Nees) Nees ex Hochst.; *Beckeropsis uniseta* (Nees) K. Schum.; *Beckeropsis uniseta* (Nees) Stapf ex Robyns, nom. illeg., non *Beckeropsis uniseta* (Nees) K. Schum.; *Gymnotrix uniseta* Nees; *Pennisetum kirkii* Stapf)

Tropical and South Africa, Arabia, Yemen. Perennial, robust, erect, tufted, rhizomatous, scrambling, branched, hollow culms, grain eaten as a cereal and used for the production of a beer, fodder for cattle while still young, grains and pith eaten by chimpanzees, similar to *Pennisetum procerum*, sometimes included in *Beckeropsis* Fig. & De Not.

See *Florae Africae Australioris Illustrationes Monographicae* 66. 1841, *Linnaea* 16(2): 219. 1842, *Flora* 27: 512. 1844, *Synopsis Plantarum Glumacearum* 1: 117. 1854, *Journal of the Linnean Society, Botany* 19: 47, 49. 1881, *Die Pflanzenwelt Ost-Afrikas* 5(8): 52. 1895, *Bulletin of Miscellaneous Information Kew* 1897: 286. 1897 and *Bull. Jard. Bot. Bruxelles* 9: 199. 1932

(Stomachic, antibacterial.)

in English: Duncan grass, Natal grass, silky grass

in Malawi: mapyopyombo, chipyombo

in Nigeria: ali liya, aro ami ami, aro ani ani, fafewa, file, furo kogo, garangautsa, kara kauji, karan kauji, karan kausa, korkoro, kwarkwaroo, ufe, ukpafele

in Sierra Leone: fonfo folesekhe na, fonfonfole na, tenfeje, tonfojo

in Southern Africa: sygras; nsipi (Zulu)

in Upper Volta: himikon

Penstemon Schmidel Scrophulariaceae (Plantaginaceae)

Greek *pente* 'five' and *stemon* 'stamen', alluding to the four fertile stamens and one staminode, see *Acta Phys.-Med. Acad. Caes. Leop.-Francisc. Nat. Cur.* 8: App. 214. 1748, *Species Plantarum* 2: 611–612. 1753, *Icones Plantarum*, Edition Keller 2. 1762 [dt. 1762; issued on 18 Oct 1763], *Neogenyton* 2. 1825, *A General History of the Dichlamydeous Plants* 4: 639–640. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 329. 1846, *Synoptical Flora of North America* 2(1): 271. 1878 and *Contr. U.S. Natl. Herb.* 20(9): 325–329, 331, 333–335. 1920, *Sida* 2(4): 339–340. 1966, *American Midland Naturalist* 77: 4. 1967, *Fl. Jap.* (Iwatsuki et al., eds.) 3a: 329. 1993.

Penstemon acuminatus Douglas ex Lindl. (*Penstemon acuminatus* Douglas; *Penstemon acuminatus* Douglas ex Lindl. var. *acuminatus*)

North America. Perennial herb

See *Edwards's Botanical Register* 15: t. 1285. 1829 and *American Midland Naturalist* 83: 362. 1970

(Plant decoction analgesic, emetic, stomachic, for stomach pain, colic. Leaves infusion emetic.)

in English: sharpleaf penstemon

Penstemon ambiguus Torr. (*Leiostemon ambiguus* (Torr.) Greene; *Penstemon ambiguus* Torr. var. *ambiguus*)

North America. Perennial herb

See *Annals of the Lyceum of Natural History of New York* 2: 228. 1827 and *Leaflets of Botanical Observation and Criticism* 1(18): 223. 1906, *Phytologia* 56(1): 55–60. 1984

(Plant decoction analgesic, emetic, stomachic, for stomach pain, colic; poultice of plant applied to eagle bites. Leaves infusion emetic. Veterinary medicine, for livestock, plants disinfectant, as fumigant for snakebites. Ceremonial.)

in English: gilia beardtongue

Penstemon barbatus (Cav.) Roth (*Chelone barbata* Cav.; *Penstemon barbatus* (Cav.) Nutt., nom. illeg.; *Penstemon*

barbatus (Cav.) Roth subsp. *barbatus*; *Penstemon barbatus* (Cav.) Roth var. *puberulus* A. Gray)

North America. Perennial herb, narrow gray-green leaves, slender bright red-scarlet irregular flowers in a long cluster, small tuft of bright yellow hairs protruding from the long stamens

See *Icones et Descriptiones Plantarum* 3: 22, pl. 242. 1795, *Catalecta Botanica* 3: 49. 1806, *The Genera of North American Plants* 2: 53. 1818

(Plant infusion or powder applied to burns; a decoction for cough. Root decoction analgesic, stomachic, taken for menstrual pain and stomachache. Veterinary medicine, plant poultice applied to sheep for fractured legs.)

in English: beardlip penstemon, golden-beard penstemon

Penstemon barbatus (Cav.) Roth subsp. *torreyi* (Benth.) D.D. Keck (*Penstemon barbatus* var. *torreyi* (Benth.) A. Gray; *Penstemon torreyi* Benth.)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 324. 1846, *Proceedings of the American Academy of Arts and Sciences* 6: 59. 1862 and *Journal of the Washington Academy of Sciences* 29(11): 491. 1939, *Phytologia* 56(1): 55–60. 1984

(Plant infusion diuretic. Magico-religious beliefs.)

in English: Torrey's penstemon

Penstemon campanulatus (Cav.) Willd. (*Chelone campanulata* Cav.; *Penstemon campanulatus* Willd.)

Mexico.

See *Icones et Descriptiones Plantarum* [Cavanilles] 1: 18, t. 29. 1791, *Species Plantarum*. Editio quarta [Willdenow] 3: 228. 1800 and *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Pharmaceutical biology* 49(2): 118–124. 2011

(Used for their antiinflammatory effects, radical scavenging activity, and also to reduce rheumatic pains.)

Penstemon centranthifolius (Benth.) Benth. (*Chelone centranthifolia* Benth.)

North America. Perennial herb, subshrub

See *Scrophularineae Indicae* 7. 1835, *Transactions of the Horticultural Society of London*, ser. 2, 1(6): 481. 1835 and *Phytother. Res.* 24(5): 778–781. 2010

(Plant poultice antibacterial, applied to infected sores, ulcers. Ceremonial, ritual.)

in English: scarlet bugler

Penstemon confertus Douglas ex Lindl.

North America. Perennial herb, subshrub

See *Edwards's Botanical Register* 15: pl. 1260. 1829

(Stems and leaves applied on sores, cuts and wounds. Bark decoction taken for stomach troubles. Root decoction taken as a purgative, cathartic.)

in English: yellow penstemon

Penstemon crandallii A. Nelson

North America.

See *Bulletin of the Torrey Botanical Club* 26(7): 354–355. 1899 and *Phytochemistry*. 39(6): 1391–1393. 1995

(Verbascoside derivatives and iridoid glycosides.)

Penstemon deustus Douglas ex Lindl.

North America. Perennial herb, subshrub, woody-based, clustered stems, sharply toothed leaves, white-pink tubular flowers with leafy bracts and symmetrical halves, unpleasant smell

See *Edwards's Botanical Register* 16: t. 1318. 1830 and *Madroño* 39(2): 137–149. 1992

(Plant decoction for swelling, colds, rheumatic aches, stomachache. Leaves poultice applied to infected sores, open sores, skin diseases, chapped and cracked skin, scabies, ulcers, boils, mosquito bites, tick bites.)

in English: hot rock penstemon, scabland penstemon

Penstemon deustus Douglas ex Lindl. var. *deustus*

North America. Perennial herb, subshrub

See *Edwards's Botanical Register* 16: t. 1318. 1830 and *Madroño* 39(2): 137–149. 1992

(Plant decoction for swellings, colds, rheumatic aches, stomachache. Leaves poultice applied to infected sores, open sores, skin diseases, chapped and cracked skin, scabies, ulcers, boils, mosquito bites, tick bites.)

in English: scabland penstemon

Penstemon eatonii A. Gray (*Penstemon eatonii* A. Gray subsp. *eatonii*; *Penstemon eatonii* A. Gray var. *eatonii*)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 395. 1872

(Plant emetic, analgesic, hemostatic, used for spider bites, burns, backache, stomach troubles; a poultice applied to snakebites. Veterinary medicine, plant used for livestock with colic. Ceremonial.)

in English: beardtongue, Eaton's firecracker, Eaton's penstemon, firecracker penstemon

Penstemon fendleri Torr. & A. Gray (*Penstemon acuminatus* var. *fendleri* (Torr. & A. Gray) M.E. Jones)

North America. Perennial herb

See *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the*

Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War 2(1): 168, pl. 5. 1857 [*Pacific Railr. Rep.* 2, Pt. 4, Bot. (Pope) 168. 1857] and *Brittonia* 35(3): 232–238. 1983

(Plant used for sores, cuts, wounds and arrow wounds.)

in English: Fendler's penstemon

Penstemon fruticosus (Pursh) Greene (*Penstemon fruticosus* (Pursh) Greene var. *fruticosus*)

North America. Perennial subshrub

See *Pittonia* 2(11C): 239. 1892

(Emetic, antirheumatic, analgesic, for headache, gastrointestinal disorders, kidney troubles, skin diseases, arthritis, colds and cough, sore eyes, as a poultice for broken bones. Ceremonial, love charm. Veterinary medicine, used for skin diseases.)

in English: bush penstemon

Penstemon fruticosus (Pursh) Greene var. *scouleri* (Douglas ex Lindl.) Cronquist (*Penstemon fruticosus* (Pursh) Greene subsp. *scouleri* (Lindl.) Pennell & D.D. Keck; *Penstemon fruticosus* (Pursh) Greene var. *scouleri* (Lindl.) Cronquist; *Penstemon scouleri* Douglas ex Lindl.; *Penstemon scouleri* Lindl.)

North America. Perennial subshrub

See *Illustrated Flora of the Pacific States* 3: 765. 1951, *Vascular Plants of the Pacific Northwest* 4: 385. 1959

(Decoction of stems, flowers and leaves used as a wash for inflamed eyes, kidney troubles.)

in English: littleleaf bush penstemon

Penstemon gentianoides (Kunth) Poir. (*Chelone gentianoides* Kunth; *Penstemon gentianoides* (Kunth) G. Don; *Penstemon gentianoides* (Kunth) Lindl.; *Penstemon gentianoides* Kunth; *Penstemon gentianoides* Lindl.; *Penstemon gentianoides* Poir.; *Penstemon skutchii* Straw)

Mexico.

See *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 2: 363–364, t. 172. 1818, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 38: 385. 1825, *Edwards's Botanical Register* 24: t. 3. 1838, *A General History of the Dichlamydeous Plants* 4: 639. 1838 and *Boletín de la Sociedad Botánica de México* 27: 13–14, f. 6. 1962, *J. Agric. Food Chem.* 53(15): 5889–5895. 2005, *Phytochemistry*. 68(13): 1762–1766. 2007, *Pharmaceutical biology* 49(2): 118–124. 2011

(Extracts of the aerial parts used for their antiinflammatory effects, antioxidant, radical scavenging activity, and also to reduce rheumatic pains, migraine and headache. Pensteminoside from the aerial parts.)

Penstemon gracilis Nutt. (*Chelone gracilis* (Nutt.) Spreng.; *Chelone gracilis* Spreng.; *Penstemon digitalis* Nutt. ex Sims

var. *gracilis* (Nutt.) Trautv.; *Penstemon glaucus* Graham; *Penstemon gracilis* Nutt. var. *gracilis*; *Penstemon pubescens* Aiton var. *gracilis* (Nutt.) A. Gray)

North America. Perennial herb

See *The Genera of North American Plants* 2: 52. 1818, *Systema Vegetabilium*, editio decima sexta [Sprengel] 2: 813. 1825, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 5: 345. 1839, *Proceedings of the American Academy of Arts and Sciences* 6: 69. 1862 and *Taxon* 31(2): 344–360. 1982

(Roots used against snakebite.)

in English: lilac penstemon

Penstemon grandiflorus Nutt. (*Penstemon bradburii* Pursh; *Penstemon bradburyi* Pursh)

North America. Perennial herb

See *Catalogue of New and Interesting Plants Collected in Upper Louisiana* 64. 1813, *Flora Americae Septentrionalis*; or, ... 2: 738. 1814[1813] and *Brittonia* 35(3): 232–238. 1983

(Analgesic, decoction of roots used for chest pains.)

in English: large beard-tongue, large beardtongue, large-flowered beard-tongue, northeastern beardtongue

Penstemon jamesii Benth. (*Penstemon brevibarbatulus* Crosswh.; *Penstemon jamesii* Benth. subsp. *typicus* D.D. Keck)

North America. Perennial herb, subshrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 325. 1846 and *Brittonia* 35(3): 232–238. 1983

(Emetic, analgesic, for headache, sore throat. Ceremonial.)

in English: James' beardtongue

Penstemon laetus A. Gray (*Penstemon laetus* A. Gray subsp. *laetus*; *Penstemon laetus* A. Gray var. *laetus*)

North America. Perennial herb, subshrub

See *Proceedings of the Boston Society of Natural History* 7: 147. 1859

(Plant infusion for hysteria, madness, sadness, depression.)

in English: beardtongue, mountain blue penstemon

Penstemon laevigatus Aiton (*Penstemon laevigatus* Soland.; *Penstemon penstemon* (L.) Britton)

North America. Perennial herb

See *Hortus Kewensis*; or, a catalogue ... 2: 361. 1789

(Plant infusion stomachic, for colic, cramps, stomachache.)

in English: eastern smooth beardtongue

Penstemon linarioides A. Gray

North America. Perennial herb, subshrub

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 112. 1859 and *Bulletin of the Torrey Botanical Club* 64(6): 375. 1937, *Taxon* 35: 197. 1986

(Plant decoction as a postpartum remedy.)

in English: toadflax penstemon

Penstemon linarioides A. Gray subsp. ***coloradoensis*** (A. Nelson) D.D. Keck (*Penstemon coloradoensis* A. Nelson)

North America. Perennial herb, subshrub

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 112. 1859, *Bulletin of the Torrey Botanical Club* 26(7): 355. 1899 and *Bulletin of the Torrey Botanical Club* 64(6): 375. 1937, *Taxon* 35: 197. 1986

(Plant decoction to facilitate labor and delivery of placenta, postpartum remedy.)

in English: Colorado penstemon, toadflax penstemon

Penstemon mucronatus N.H. Holmgren (*Penstemon pachyphyllus* var. *mucronatus* (N.H. Holmgren) Neese)

North America.

See *Brittonia* 31(2): 234–236, f. 10, 12. 1979, *Great Basin Naturalist* 46(3): 460. 1986, *Phytochemistry*. 49(8): 2413–2415. 1998

(Transfused iridoid glycosides.)

Penstemon nitidus Douglas ex Benth. (*Penstemon nitidus* Douglas)

North America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 323. 1846 and *Flora of the Rocky Mountains* 770, 1066. 1917, *Taxon* 31(2): 344–360. 1982, *Planta Med.* 57(2): 184–186. 1991

(Iridoid Glucosides from the leaves.)

in English: smooth blue beardtongue

Penstemon ovatus Douglas

North America.

See *Botanical Magazine* 56: t. 2903. 1829 and *Planta Med.* 61(1): 82–83. 1995

(Iridoid glucosides from the aerial parts.)

Penstemon pachyphyllus A. Gray ex Rydb. (*Penstemon nitidus* Douglas ex Benth. var. *major* Benth.; *Penstemon pachyphyllus* A. Gray ex Rydb. var. *pachyphyllus*)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 323. 1846 and *Flora of the Rocky Mountains* 770, 1066. 1917, *Taxon* 31(2): 344–360. 1982

(Hunting ritual, ceremonial.)

in English: thickleaf beardtongue

Penstemon palmeri A. Gray (*Penstemon palmeri* A. Gray subsp. *typicus* D.D. Keck; *Penstemon palmeri* A. Gray var. *palmeri*)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 7: 379. 1868 and *American Midland Naturalist* 18: 797. 1937, *Taxon* 33: 351–354. 1984

(Whole plant made into a paste applied to snakebite sores.)

in English: Palmer's penstemon

Penstemon richardsonii Dougl. ex Lindl. (*Penstemon richardsonii* Douglas ex Lindl. var. *richardsonii*)

North America. Perennial herb, subshrub

See *Botanical Register*; consisting of coloured ... 13: pl. 1121. 1828

(Plant infusion taken for typhoid. Crushed leaves made into a paste applied to sores, ulcers, wounds.)

in English: Richardson's penstemon

Penstemon rostriflorus Kellogg (*Penstemon bridgesii* A. Gray; *Penstemon bridgesii* A. Gray var. *amplexicaulis* Monnet)

North America. Perennial herb, subshrub

See *Hutching's California Mag.* 5(3): 102. 1860, *Proc. Calif. Acad. Sci.* 2: 15. 1863, *Proceedings of the American Academy of Arts and Sciences* 7: 379. 1868 and *Contributions from the United States National Herbarium* 20(9): 327, 335. 1920

(Poultice of mashed roots applied to bone fracture.)

in English: Bridge penstemon

Penstemon secundiflorus Benth.

North America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 325. 1846 and *Sida* 13: 241–250. 1988, *Phytochemistry*. 49(6):1605–1608. 1998

(Iridoid glycoside biosynthesis, transiridoid glycoside.)

Penstemon serrulatus Menzies ex Rees (*Penstemon serrulatus* Menzies)

China, North America.

See *The Cyclopaedia*; or, universal dictionary of arts, ... 26: *Penstemon* no. 5. 1813, *Fl. Bor.-Amer.* (Hooker) 2: 95. 1837 and *Taxon* 31: 764–765. 1982, *J. Nat. Prod.* 55(1): 58–63. 1992, *J. Nat. Prod.* 62(1): 127–129. 1999

(Iridoids. Phenylpropanoid glycosides, penstemide and serrulatololide, penstemide aglycone and serrulatololide aglycone.)

Penstemon utahensis Eastw. (*Penstemon eastwoodiae* A. Heller, nom. illeg.; *Penstemon glaber* Pursh var. *utahensis* S. Watson; *Penstemon utahensis* (S. Watson) A. Nelson)

North America. Perennial herb

See *Zoë* 4(2): 124–125. 1893, *Bulletin of the Torrey Botanical Club* 26(5): 242. 1899 and *Muhlenbergia; a journal of botany* 1(1): 4. 1900, *Bulletin of the Torrey Botanical Club* 36(12): 688. 1909

(Ceremonial, ritual.)

in English: Utah penstemon

Penstemon virgatus A. Gray

North America. Perennial herb

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 113. 1859 and *Taxon* 36: 497. 1987

(Whole plant stimulant, tonic, postpartum remedy.)

in English: upright blue beardtongue

Pentacalia Cass. Asteraceae

From the Greek *pente* ‘five’ and *kalia* ‘wooden, dwelling, hut, barn’, see *Dictionnaire des Sciences Naturelles* [Second edition] 48: 461. 1827.

Pentacalia vaccinioides (Kunth) Cuatrec. (*Cacalia glabrata* Kunth; *Cacalia vaccinioides* Kunth; *Microchaete vaccinioides* (Kunth) Benth.; *Monticalia vaccinioides* (Kunth) C. Jeffrey; *Psacalium glabratum* (Kunth) DC.; *Psacalium vaccinioides* (Kunth) DC.; *Senecio vaccinioides* (Kunth) Sch. Bip. ex Wedd.)

South America.

See *Species Plantarum* 2: 866–872. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 126, tab. 358. 1820[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 335. 1837, *Plantas Hartwegianas imprimis Mexicanas* 210. 1845, *Chloris Andina* 1(3): 99, t. 20a. 1855[1856] and *Phytologia* 49(3): 241–260. 1981, *Kew Bulletin* 47(1): 73. 1992, *Novon* 3: 284–301. 1994

(Plant chewed for toothache.)

in Ecuador: cubilan

Pentaclethra Benth. Fabaceae (Leguminosae, Mimosaceae, Parkieae)

Greek *pente* ‘five’ and *kleis* ‘lock, key’ (*kleio* ‘to close, to shut’); Greek *klethra* ‘the alder’; see *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18(2): 487–559. 1937, *Annals of the Missouri Botanical Garden* 37(2): 184–314. 1950, J. Vivien & J.J. Faure, *Arbres des Forêts denses d’Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d’Afrique centrale*. CTA, Ede/Wageningen 1989.

Pentaclethra eetveldeana De Wild. & T. Durand (*Pentaclethra filiciformis* Bureau & A. Chev.; *Pentaclethra lecomteana* Pierre)

Angola, Cameroon, Gabon. Perennial non-climbing tree, irregular bole, inflorescence a terminal or axillary panicle, whitish fragrant flowers, woody reddish brown explosively dehiscent pods, smooth reddish brown seeds, edible oil from the seeds

See *Bulletin de l’Herbier Boissier*, sér. 2, 1: 20. 1900, *Veg. Ut. Afr. Trop. Franc.* 9: 193. 1917, *Plantes Medicinales et Phytotherapie* 19(2): 75–83. 1985, *Phytochemistry* 42(2): 501–504. 1996

(Bark sap as eye drops to treat filariasis. Bark anthelmintic, antifungal, a decoction to treat respiratory troubles, sterility, tuberculosis, genitourinary complaints, applied externally against rheumatism; root bark to treat hemorrhoids, malaria and epilepsy. Leaves decoction taken for stomachache and colds.)

in Cameroon: ebye, ebye bekwe

in Congo: nabo

in Gabon: engona, mpasse

in Zaire: elai

Pentaclethra macroloba (Willd.) Kuntze (*Acacia aspidioides* G. Mey.; *Acacia macroloba* Willd.; *Cailliea macrostachya* Steud.; *Entada werbaena* C. Presl; *Entada wrbaena* C. Presl; *Mimosa macroloba* (Willd.) Poir.; *Pentaclethra brevifila* Benth.; *Pentaclethra brevipila* Benth.; *Pentaclethra filamentosa* Benth.; *Pentaclethra macroloba* Kuntze)

Tropical South America. Perennial non-climbing tree, shrub, white flowers

See *Species Plantarum* 1: 516–523. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1: *Acacia*. 1754, *Familles des Plantes* 2: 318, 554. 1763, *Species Plantarum*. Editio quarta [Willdenow] 4(2): 1054[1060–1061]. 1806, *Encyclopédie Méthodique. Botanique ... Supplément* 2(1): 66. 1811, G.F.W. Meyer, 1782–1856, *Primitiae Florae Essequeboensis ...* 165. Gottingae 1818, *Florae Senegambiae Tentamen* 239. 1832, *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 127–128. 1840, *Flora* 26(45): 759–760. 1843, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften* 6: 566. 1851, *Revisio Generum Plantarum* 1: 201. 1891

(Toxins. Bark antiseptic, emetic, a decoction used to bathe ulcers, also a remedy for snakebites, especially from Labaria and Morabana; juice from fresh inner bark applied on cuts and bruises to stop bleeding.)

in South America: abarkasa-dek, arabakasa-yek, gavián, koro-balli, pao choca, pracaxi, trysil

Pentaclethra macrophylla Benth. (*Harpalyce macrocarpa* Britton & P. Wilson)

West and Central Africa. Perennial non-climbing tree, often crooked, gnarled and twisted, open crown, low branching, inflorescence a terminal or axillary panicle, strongly

honey-like scented flowers reddish-purple yellow-orange, dark brown woody linear-oblong pod explosively dehiscent, roasted fruit eaten, seeds eaten boiled or roasted, edible oil from the seeds

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 523. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 127–128. 1840, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 4(30): 330. 1841 and *Memoirs of the Torrey Botanical Club* 16(2): 67. 1920, *Journal of Ethnopharmacology* 8: 257–263, 265–277. 1983, *Journal of Ethnopharmacology* 18: 257–266. 1986, *Journal of Ethnopharmacology* 42: 17–182. 1994, *International Tree Crops Journal* 8: 69–82. 1995, *Phytotherapy Research* 13(4): 292–295. 1999, *International Journal of Food Microbiology* 59: 235–239. 2000, *Journal of Ethnopharmacology* 76: 263–268. 2001, *Journal of Food, Agriculture and Environment* 2: 14–17. 2004, *Biochemical Systematics and Ecology* 33(12): 1280–1282. 2005, *Journal of Ethnopharmacology* 114: 44–53. 2007, *Journal of Ethnopharmacology* 115: 387–408. 2008

(Leaf, stem bark, seed and fruit pulp analgesic, wound dressing, anti-inflammatory, anthelmintic, to treat gonorrhoea and convulsions. Ripe fruits applied externally to heal wounds. Bark aphrodisiac, stimulant, astringent, hypertensive, abortifacient, for stomachache boil bark then drink or apply as enema, acts as a purge; bark infusion for stomach pains, diabetes, for easing pain of delivery; root bark laxative. Women burn seed husk, pound into powder, powder rubbed to protect pregnancy and from speedy delivery; crushed seeds for mastitis. Bark and leaves of *Pentaclethra macrophylla* used as fish poison mixed with *Piptadenia africana* (*Piptadeniastrum africanum*), *Strychnos icaja* and *Manilkara* sp. Ceremonial, emotional.)

in English: African oil bean, atta bean, Congo acacia, oil-bean tree, owala oil, owala oil tree, wild locust

in Cameroon: ba, balé, bali, bembaba, ebae, ebal, ebae, ebe, kombolo, kommott, mba, mbalaka, mbara, owala

in Central African Republic: apara, balaba, bimpa, bobala, eba, leba, mba, mbalaka, mbalanga, mobalaka, ogba, ukana

in Congo: akourou, baala, beka, boala, bonga, essiri, kbeka, kihanzi, mabula, moubandzi, moukandzi, mouwaï, mpanzou, mubala, mukandzi, muvey, mvanza, ngansi, nganzi, nvandza, nzama, obala, ommbala, ompai, onwoué, panza, tshibamba, tshibambamba, tshibambabamba, vaanza

in Gabon: ébé, ebe, bembada, bombaha, dimbalo, m'vans, mbala, moulla-panza, mpanza, mubala, mupandji, muvandji, muvendji, muwandzi, mvala, obaa, obada, obala, ombala, onpai, ouala, ovala, owala

in Ghana: akuamma, ata, ataa, atawa, ekuama, odenya, tsaklo

in Guinea: kobhëla

in Ivory Coast: aflamantan, alta, atabla, atta, dio, doroufou, mbleg-bahla, niapoué zaoué, ovada, ovala, seredieu, zâ, zaoué, zazé

in Liberia: blayhu, fai

in Nigeria: apagha, apaha, apara, kako, nkpa, okpagha, okpaghan, pala, ugba, ukana, ukpaghan, ukpakara

in Senegal: fara, kaligaan

in Sierra Leone: fava

Pentadiplandra Baillon Capparaceae (Capparidaceae, Pentadiplandraceae)

Greek *pente* 'five', *diploos* 'double' and *aner*, *andros* 'man, stamen, male', referring to the number and nature of stamens, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 611. 1886.

Pentadiplandra brazzeana Baill. (*Cercopetalum dasyanthum* Gilg; *Pentadiplandra gossweileri* Exell)

Tropical Africa. Shrub, lianescent, aromatic, sweet berries

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 611. 1886

(Bark root wash abortifacient.)

in Congo: bephanda, kikamu, kikuolo, ngama, nguza, tshephanda

Pentagonia Benth. Rubiaceae

Greek *pente* 'five' and *gonia* 'an angle, corner', referring to the divisions of the corolla, see *The botany of the voyage of H.M.S. Sulphur* 105–106, pl. 39. 1844, *Revisio Generum Plantarum* 1: 302. 1891 and *Contributions from the United States National Herbarium* 17(5): 438. 1914, *Fieldiana, Bot.* 24(11/1–3): 1–274. 1975, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Pentagonia brachyotis (Standl.) Standl. (*Watsonamra brachyotis* Standl.)

Panama to Colombia.

See *The botany of the voyage of H.M.S. Sulphur* 105, pl. 39. 1844, *Revisio Generum Plantarum* 302. 1891 and *Contributions from the United States National Herbarium* 17(5): 443. 1914, *Journal of the Washington Academy of Sciences* 17(7): 171. 1927

(Leaves and fruits infusion taken to purify the blood; the pulp around the seeds applied to fresh cuts. A magical potion.)

in Panama: cuamtulo

Pentagonia gigantifolia Ducke

Peru.

See *Arch. Jard. Bot. Rio de Janeiro* 5: 181. 1930

(Crushed bark juice drunk as a snakebite remedy.)

in Peru: painak

Pentanema Cass. Asteraceae

From the Greek *pente* 'five' and *nema* 'filament, thread', see *Bull. Sci. Soc. Philom. Paris* 1818: 74. 1818, *Annales des Sciences Naturelles* (Paris) 17: 418. 1829.

Pentanema cernuum (Dalzell) Ling (*Inula cernua* P.J. Bergius; *Inula cernua* (Dalzell) R.R. Stewart; *Inula dalzellii* Hand.-Mazz.; *Vicoa cernua* Dalzell)

India.

See *Descriptiones Plantarum ex Capite Bonae Spei*, ... 288. 1767, *The Bombay Flora* ... 126. 1861 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13(120): 632. 1937, *Acta Phytotaxonomica Sinica* 10(2): 180, adnot. 1965, *Annot. Cat. Vasc. Pl. W. Pakistan & Kashmir* 753. 1972

(Root powder given for abortion. Flower juice taken as tonic, stimulant.)

in India: chhoti surajmukhi

Pentanema indicum (L.) Ling (*Inula indica* L.; *Vicoa indica* (L.) DC.; *Vicoa indica* Borkh.)

India.

See *Species Plantarum* 2: 881–884. 1753, *Species Plantarum*, Editio Secunda 2: 1834. 1763, *Annales des Sciences Naturelles* (Paris) 17: 418. 1829, *A Numerical List of Dried Specimens* n. 2965, 2966. 1831, *Contributions to the Botany of India* 10. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 474. 1836, *Flora* 25(1): 42. 1841, *Tentamen Florae Abyssinicae* ... 1: 399. 1848 and *Flora of West Tropical Africa* 2: 608. 1932, *Acta Phytotaxonomica Sinica* 10(2): 179. 1965

(Whole plant decoction given to female to induce sterility; plant powder given with water after menses for birth control; plant paste used in the treatment of fractured bone.)

in India: bansirsa, berajora, bhat-sar, jangali sargyoiya, jimikipoo, onrka-phula-ba, rasnajadi, sabli, sonkadi, themsibilans

Pentanema indicum (L.) Ling var. ***indicum*** (*Inula appendiculata* Wall., nom. nud.; *Inula auriculata* Wall., nom. nud.; *Inula indica* L.; *Inulaster hotschyi* Sch. Bip. ex Hochst., nom. nud.; *Vicoa appendiculata* DC.; *Vicoa auriculata* Cass.; *Vicoa aurita* DC.; *Vicoa indica* (L.) DC.; *Vicoa indica* Borkh.)

China, India.

See *Species Plantarum* 2: 881–884. 1753, *Species Plantarum*, Editio Secunda 2: 1834. 1763, *Annales des Sciences Naturelles* (Paris) 17: 418. 1829, *A Numerical List of Dried Specimens* n. 2965, 2966. 1831, *Contributions to the Botany of India* 10. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 474. 1836, *Flora* 25(1): 42. 1841, *Tentamen Florae Abyssinicae* ... 1: 399. 1848 and *Flora of West*

Tropical Africa 2: 608. 1932, *Acta Phytotaxonomica Sinica* 10(2): 179. 1965

(Fresh young twigs or roots used locally as abortifacient. Roots and leaves for kidney, urinary and stomach troubles; root decoction given in abortion and to cure fevers among children; powdered root together with *Madhuca longifolia* taken to induce sterility in women; fresh roots chewed to relieve abdominal pain; root paste applied on wounds to expel worms. Leaves decoction for dysentery. Veterinary medicine, crushed root given to cow to treat indigestion.)

in India: bansirsa, berajora, bhat-sar, jangali sargyoiya, jimikipoo, onrka-phula-ba, rasnajadi, sabli, sonkadi, themsibilans

Pentanisia Harvey Rubiaceae

From the Greek *pente* 'five' and *anisos* (*a* and *isos* 'equal') 'unequal', referring to the lobes of the calyx, see *London Journal of Botany* 1: 21. 1842, *Flora* 26: 70. 1843, *Journal of the Linnean Society, Botany* 21: 414. 1885, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1(2): 439. 1898 and *Bulletin du Jardin Botanique de l'État* 22: 163, 259, 262, 265, 274. 1952.

Pentanisia ouranogyne S. Moore (*Pentanisia ouranogyne* var. *glabrifolia* Cufod.; *Pentanisia pentasiana* Mattei)

Ethiopia to Tanzania.

See *London Journal of Botany* 1: 21. 1842, *Journal of Botany, British and Foreign* 18: 4. 1880

(Stomachic, astringent.)

Pentanisia prunelloides (Klotzsch ex Eckl. & Zeyh.) Walp. (*Declieuxia prunelloides* Klotzsch ex Eckl. & Zeyh.; *Declieuxia prunelloides* Klotzsch; *Declieuxia prunelloides* Eckl. & Zeyh.; *Diotocarpus prunelloides* (Klotzsch) Hochst.; *Diotocarpus prunelloides* (Klotzsch ex Eckl. & Zeyh.) Hochst.; *Diotocarpus prunelloides* (Eckl. & Zeyh.) Hochst.; *Pentanisia prunelloides* (Eckl. & Zeyh.) Walp.; *Pentanisia variabilis* Harv. var. *intermedia* Sond.)

Tanzania to S. Africa. Herbaceous perennial shrublet, trailing to erect, stout hairy stems, woody tuberous fleshy carrot-like rootstock, hairy leaves, purplish blue flowers in dense terminal heads, closely related to *Pentas lanceolata*

See *Enumeratio Plantarum Africae Australis Extratropicae* 363–364. 1837, *London Journal of Botany* 1: 21. 1842, *Flora* 26: 70. 1843, *Repertorium Botanices Systematicae* 2: 941. 1843

(Plant antiseptic. Root decoctions taken or applied for burns, swellings, rheumatism, heartburn, vomiting, fever, toothache, tuberculosis, snakebite and piles; crushed roots taken for acute diarrhea and stomach cramps. Fresh root chewed and swallowed to treat heartburn. Magic, ritual, woody tuber of *Helichrysum platypterum* mixed with the roots of *Pentanisia prunelloides* used as protection against evil.)

in English: broad-leaved pentanisia, hairy-leaves pentanisia, heartburn shrublet, wild verbena

in Lesotho: setima-mollo

in Southern Africa: icimamlilo, icishamlilo, isiCimamlilo, iRubuxa, sooibrandbossie (= heartburn shrublet)

Pentania schweinfurthii Hiern (*Pentania crassifolia* K. Krause; *Pentania rhodesiana* S. Moore; *Pentania schweinfurthii* var. *puberula* Verdc.; *Pentania sericocarpa* S. Moore; *Pentania spicata* S. Moore)

Tropical Africa. Small herbaceous plants, woody rootstock, flowers bright sky blue-purple, used as vegetable

See *Flora of Tropical Africa* 3: 131. 1877 and *Journal of Botany, British and Foreign* 40: 251–252. 1902, *Bot. Jahrb. Syst.* 39: 531. 1907, *Journal of Botany, British and Foreign* 46: 38, 76. 1908, *Bull. Jard. Bot. État* 22: 258. 1952

(Stem and leaves for fevers and diarrhea. Succulent gelatinous leaves stimulant, astringent, tonic, stomachic. Tuber used for stomach pains.)

in Rhodesia: chezya

Pentanura Blume Asclepiadaceae (Apocynaceae, Periplocaceae)

From the Greek *pente* ‘five’ and *oura* ‘tail’, see *Museum Botanicum* 1: 125. 1850, *Die Natürlichen Pflanzenfamilien* 4(2): 221. 1895.

Pentanura khasiana Kurz (*Stelmocrypton khasianum* (Kurz) Baill.; *Stelmocrypton khasianum* (Kurz) Baill.; *Periploca khasiana* Benth. & Hook. f., nom. nud.)

India. Sometimes as *Stelmocrypton* or *Stelmocrypton*

See *Genera Plantarum* 2: 746. 1876, *Forest Flora of British Burma* 2: 196. 1877, *Bulletin Mensuel de la Société Linnéenne de Paris* 2(102): 812. 1889, *Histoire des Plantes* 10: 300. 1890

(leaves infusion for malaria.)

in China: xu yao teng

in India: jainiaphum

Pentapanax Seemann Araliaceae

Greek *pente* ‘five’ and the genus *Panax* in the same family, an allusion to the pistil; see Berthold Carl Seemann, in *The Journal of Botany*. 2: 290, 294. (Oct.) 1864.

Pentapanax leschenaultii (DC.) Seem. (*Aralia leschenaultii* (DC.) J. Wen; *Pentapanax fragrans* var. *fragrans*; *Pentapanax leschenaultii* Seem.; *Pentapanax leschenaultii* (DC.) J. Wen)

China, India, Darjeeling. See also *Aralia leschenaultii*

See *Prodr.* 4: 254. 1830, *J. Bot.* 2: 296. 1864 and *Brittonia* 45: 53. 1993

(Bark and shoots tonic, diuretic, for urinary tract infection.)

in China: yu ye shen

in India: chindey

Pentapanax tomentellus (Franchet) C.B. Shang (*Aralia tomentella* Franch.)

China.

See *Journ. de Bot.* 304. (16 Sept. 1896) and *J. Nanjing Inst. Forest.* 1985(2): 24. 1985

(Stimulant.)

in China: ma chang zi shu

Pentapetes L. Sterculiaceae (Malvaceae)

From the Greek *pentapetes* (see *pentaphyllon*, Theophrastus in *HP.* 9.13.5 and Dioscorides) ‘cinque-foil’, Latin *quinque-folium*, ii ‘a plant, cinque-foil’; see Carl Linnaeus, *Species Plantarum*. 698. 1753 and *Genera Plantarum*. Ed. 5. 310. 1754.

Pentapetes phoenicea L. (*Blattaria phoenicea* (L.) Kuntze; *Brotera phoenicea* (L.) Cav.)

India.

See *Species Plantarum* 2: 698. 1753, *Anales Hist. Nat.*, 1(1): 34. 1799, *Revis. Gen. Pl.* 1: 76. 1891

(Roots antibilious, for flatulence, stomachache. Flower paste given to cure abnormally heavy periodic flow. Mucilaginous capsules for diseases of bowels, fruit decoction as an emollient.)

in China: wu shi hua

in India: dopahariya, duplephul, jal-dopaharia

in Japan: goji-ka

in Philippines: a las doce, flores de las doce

Pentaphragma Wallich ex G. Don

Pentaphragmataceae (Campanulaceae)

Greek *pente* ‘five’ and *phragma* ‘a hedge, a fence’, five members of the calyx, gynoecium separated from hypanthium by nectariferous pits, see *A General History of the Dichlamydeous Plants* 3: 731. 1834, *Theoria Systematis Plantarum* 95. 1858.

Pentaphragma begoniifolium (Roxb.) G. Don (*Phyteuma begoniifolium* Roxb.)

India, Malaysia.

See *Hort. Bengal.* 85. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 108. 1824, *Fl. Ind.*, ed. Carey, 1: 505. 1832

(Poultice with the roots for swellings.)

Malay name: salang suwang

Pentaphylax Gardner & Champ. Pentaphylacaceae (Ternstroemiaceae)

Flowers pentamerous, gynoecium five-loculated, Greek *pente* ‘five’ and *phylax*, *phylakos* ‘a guardian, protector’, *pentaphylakos* ‘divided into five watches’, referring to five sepals protecting the flower bud, see *Hooker’s J. Bot. Kew Gard. Misc.* 1: 244–246. 1849 and *Plant Book* 644. 2008.

Pentaphylax euryoides Gardn. & Champ. (*Pentaphylax arborea* Ridl.; *Pentaphylax malayana* Ridl.; *Pentaphylax racemosa* Merr. & Chun; *Pentaphylax spicata* Merr.)

China. Shrub or tree, dense crown, simple leaves spirally arranged, bisexual actinomorphic flowers, axillary spike-like inflorescences, fruits a woody dehiscent capsule, winged seeds laterally flattened

See *Hooker’s J. Bot. Kew Gard. Misc.* 1: 245–246. 1849 and *Journal of the Linnean Society, Botany* 38(266): 305. 1908, *The Flora of the Malay Peninsula* 5: 291. 1925, *Sunyatsenia* 1(1): 66. 1930, *Journal of the Arnold Arboretum* 19(1): 40–41. 1938

(Aluminium accumulator.)

in China: wu lie mu

Pentas Benth. Rubiaceae

From the Greek *pentas* ‘a series of five’, *pente* ‘five’, referring to the pentamerous flowers, see *Bulletin du Jardin Botanique de l’État* 23: 254. 1953, *Taxon* 56(4): 1076. 2007. Sometimes as *Phyllopentas* or *Dolichopentas*.

Pentas longiflora Oliv. (*Dolichopentas longiflora* (Oliv.) Kårehed & Bremer; *Neurocarpaea longiflora* (Oliv.) S. Moore; *Pentas longiflora* forma *glabrescens* Verdc.; *Pentas longiflora* var. *nyassana* Scott-Elliot)

Trop. Africa.

See *Genera Plantarum* 196. 1789, *Botanical Magazine* 70: t. 4086. 1844, *Transactions of the Linnean Society of London, Botany* 2: 335. 1887, *J. Linn. Soc., Bot.* 32: 433. 1896 and *Journal of the Linnean Society, Botany* 37: 157. 1905, *Fl. Parc Nat. Alb.* 2: 328. 1947, *Bull. Jard. Bot. Brux.* 23: 281–282, fig. 32/D & I. 1953, *Fl. Pl. Uganda* ed. 2: 160. 1972, *Upland Kenya Wild Fl.* 404. 1974, *F.T.EA. Rubiaceae* 1: 195. 1976, *Plant Systematics and Evolution* 149: 89–118. 1985, *Fl. Zambes.* 5(1): 70. 1989, *Taxon* 56(4): 1076. 2007

(For malaria, fevers, vomiting.)

Pentas purpurea Oliv. (*Neurocarpaea purpurea* (Oliv.) Hiern)

Tropical Africa.

See *Trans. Linn. Soc. London* 29: 83. 1873, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 438. 1898

(Roots cooked into a gruel for stomachache, dysmenorrhea.)

in Rhodesia: munyashawa

Pentas schimperiana (A. Rich.) Vatke (*Neurocarpaea thomsonii* (Scott-Elliot) S. Moore; *Pentas schimperana* (A. Rich.) Vatke; *Pentas schimper* Engl.; *Pentas schimper* Hochst. ex Engl., nom. illeg.; *Pentas thomsonii* Scott-Elliot; *Phyllopentas schimperiana* (A. Rich.) Kårehed & Bremer; *Vignaldia schimperana* A. Rich.; *Vignaldia schimperiana* A. Rich.)

Trop. Africa.

See *Botanical Magazine* 70: t. 4086. 1844, *Tentamen Florae Abyssinicae ...* 1: 357, 359. 1847, *Linnaea* 40: 192. 1876, *Pflanzenw. Ost-Afr.* A: 92. 1895 and *Fl. Parc Nat. Alb.* 2: 327. 1947, *Bull. Jard. Bot. Brux.* 23: 263, fig. 31/G, H & I. 1953, *Upland Kenya Wild Fl.* 404. 1974, *F.T.EA. Rubiaceae* 1: 187. 1976, *Plant Systematics and Evolution* 149: 89–118. 1985

(For malaria, fevers, dysentery, stomachache, kidney troubles, vomiting.)

Pentas zanzibarica (Klotzsch) Vatke (*Pentania zanzibarica* Klotzsch)

Uganda to Mozambique.

See *London Journal of Botany* 1: 21. 1842, *Botanical Magazine* 70: t. 4086. 1844, *Reise Mossamb., Bot.* 1: 286. 1861, *Oest. Bot. Zeitschr.* 25: 232. 1875, *Pflanzenw. Ost-Afrikas* C (1895) 210. 1895 and *Bull. Jard. Bot. Brux.* 23: 319, fig. 33/A, B. 1953, *Upland Kenya Wild Fl.* 405. 1974, *F.T.EA. Rubiaceae* 1: 187, 195, 203. 1976, *Bothalia* 22(2): 165. 1992

(For cerebral malaria, a cold infusion from a dry powdered mixture of aerial parts of the plant with aerial parts of *Indigofera asparagoides* Taub. (*Microcharis asparagoides* (Taub.) Schrire), *Antherotoma naudinii* Hook. f., *Cassia gracilior* (Ghesq.) Steyaert (*Chamaecrista gracilior* (Ghesq.) Lock), *Dissotis brazzae* Cogn., *Justicia matammensis* (Schweinf.) Oliv. (*Justicia anselliana* (Nees) T. Anderson.)

in Tanzania: kashenda

Pentasachme Wallich ex Wight Asclepiadaceae

Greek *pentas* ‘a series of five’, *pente* ‘five’ and *akme* ‘the top, highest point’, referring to the nature of the flowers, see *Contributions to the Botany of India* 60. 1834, *A General History of the Dichlamydeous Plants* 4: 159. 1837.

Pentasachme caudatum Wallich ex Wight (*Pentasachme championii* Bentham)

China.

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 5: 54–55. 1853

(All parts are used for the treatment of hepatitis, nephritis, conjunctivitis, sore throat and bronchitis.)

in English: Champion pentasacme

in China: shi luo mo

Malayan names: chermin hantu, serai ayer

Pentaspadon Hook.f. Anacardiaceae

From the Greek *pente* 'five' and *spadon* 'eunuch', referring to the five sterile stamens, see *Trans. Linn. Soc. London* 23(1): 168, t. 24. 1860 [after 1 Nov 1860].

Pentaspadon motleyi Hook.f. (*Pentaspadon minutiflora* B.L. Burtt; *Pentaspadon moszkowskii* Lauterb.; *Pentaspadon officinalis* Holmes ex King) (after the British plant collector James Motley, d. 1859, civil engineer and botanist in Malaysia and Borneo, co-author with Lewis Llewellyn Dillwyn (fl. 1855) of *Contributions to the natural history of Labuan, and the adjacent coasts of Borneo*. London 1855. See John H. Barnhart, *Biographical Notes upon Botanists*. 2: 520. 1965; I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976)

Malaysia, Borneo. Trees, white latex, glabrous leaflets, creamy white bisexual flowers, ovoid to oblong fruits

See *Trans. Linn. Soc. London* 23(1): 168. 1860

(Oil for treating skin diseases.)

in English: white pelong tree

in Malaysia: empelanjau, emplangau, kedondong, kedondong kijau, lakacho, pelajau, pelajoh, pelong, pelong licin, pilajau, plajau, umit, uping

Pentaspadon officinalis Holmes (*Pentaspadon officinalis* Holmes ex King)

Malaysia. Trees

See *Trans. Linn. Soc. London* 23: 168. 1860, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 499. 1896

(The oleoresin is black and greatly irritant to the skin. Oil from bark used for skin diseases.)

in English: white pelong tree

in Malaysia: empelajau, pelajau, pelanjau, pelong, plajau, toei-na, toei-nam

in Vietnam: vi h[uf]ng trung

Pentatropis R. Br. ex Wight & Arn. Asclepiadaceae (Apocynaceae)

Greek *pente* 'five' and *tropis*, *tropidos* 'a keel', referring to the corona lobes, the flowers having five keels; see Salt, Henry (1780–1827), *A voyage to Abyssinia: and travels into*

the interior of that country, executed under the orders of the British government, in the years 1809 and 1810; in which are included, an account of the Portuguese settlements on the east coast of Africa, visited in the course of the voyage; a concise narrative of late events in Arabia Felix; and some particulars respecting the aboriginal African tribes, extending from Mosambique to the borders of Egypt; together with vocabularies of their respective languages. London, F.C. and J. Rivington, 1814, Robert Wight, *Contributions to the Botany of India*. London 1834, *Proceedings of the Linnean Society of London* 1: 15. 1839, *Oesterr. Bot. Z.* 26: 145–147. 1876 and *Kew Bull.* 10: 265–292. 1955.

Pentatropis capensis (L.f.) Bullock (*Asclepias microphylla* Roth ex Schult.; *Colostephanus capensis* (L.f.) Harv.; *Cynanchum capense* L.f.; *Cynanchum capense* R. Br.; *Cynanchum capense* Sieber ex Decne.; *Cynoctionum capense* (L.f.) E. Mey.; *Pentatropis microphylla* Wall., nom. nud.; *Pentatropis microphylla* (Roth ex Schult.) Wight & Arn.; *Vincetoxicum capense* (L.f.) Kuntze; *Vincetoxicum capense* (L.f.) Schltr.)

India, Pakistan.

(Bark anthelmintic.)

in French Guiana: abérérou, pérébier

Pergularia L. Asclepiadaceae (Apocynaceae)

Latin *pergula*, *ae* 'a vine-arbor, a stall, a projection', referring to the twining habit of the plants; see C. Linnaeus, *Mantissa Plantarum*. Holmiae [Stockholm] 1767 [–1771]. See also genus *Daemia*.

Pergularia daemia (Forssk.) Chiov. (*Asclepias convolvulacea* Willd.; *Asclepias daemia* Forssk.; *Asclepias muricata* Schumach. & Thonn.; *Asclepias scandens* P. Beauv.; *Cynanchum extensum* Jacq.; *Daemia aethiopica* Decne.; *Daemia extensa* (Jacq.) R. Br.; *Daemia extensa* (Jacq.) R. Br. ex Schult.; *Daemia scandens* G. Don; *Pergularia daemia* (Forssk.) Blatt. & McCann; *Pergularia daemia* var. *macrantha* Chiov.; *Pergularia extensa* (Jacq.) N.E. Br.)

India. Perennial climbing herb, strong, twining, pubescent, milky, foul smell, cordate leaves, creamy-white or purple flowers, beaked lanceolate echinate pubescent fruits, pubescent seeds with soft hairy pappus at one end, leaves as cattle feed

See *Systema Naturae*, ed. 12 2: 191. 1767, *Flora Aegyptiaco-Arabica* 51. 1775, *Nicolai Josephi Jacquin Miscellanea austriaca* ... 2: 353. 1781, *Botanisches Wörterbuch* 1: 31. 1797, *Memoirs of the Wernerian Natural History Society* 1: 50. 1810, *Systema Vegetabilium* 6: 112. 1820, *FBI* 4: 20. 1883 and *Flora Capensis* (Harvey) 4(1,5): 758. 1908, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 115. 1916, *Journal of the Bombay Natural History Society* 36: 528. 1933, *Indian J. (Hypoglycemic. A large number of ruminants often lost in Niger due to poisoning caused by *Pergularia tomentosa*, this plant traditionally used to tan skin. Cardenolide glycosides from *Pergularia tomentosa* caused apoptotic cell death of Kaposi's sarcoma cells.)

in French: pergulaire

in Arabic: ghelga

Pericampylus Miers Menispermaceae

Greek *peri* 'around' and *kampylos* 'curved', referring to the fruits; see John Miers (1789–1879), in *Annals and magazine of natural history*. Ser. II, 7(37): 36, 40. London (Jan.) 1851.

Pericampylus glaucus (Lam.) Merr. (*Cocculus incanus* Colebr.; *Coscinium colaniae* Gagnep.; *Menispermum glaucum* Lam.; *Pericampylus formosanus* Diels; *Pericampylus glaucus* Merr.; *Pericampylus incanus* (Colebr.) Miers; *Pericampylus incanus* Miers; *Pericampylus incanus* (DC.) Miers ex Hook.f. & Thomson; *Pericampylus omeiensis* W.Y. Lien; *Pericampylus trinervatus* Yamam.)

Nepal, China. Trailing, twining herb, pubescent stem, greenish flowers in axils

See *Encyclopédie Méthodique, Botanique* 4: 100. 1797, *Regni Vegetabilis Systema Naturale* 1: 511, 515–531. 1818[1817], *Transactions of the Linnean Society of London* 13(1): 57–58. 1822, *Annals and Magazine of Natural History*, ser. 2 7: 40. 1851, *Flora Indica*: being a systematic account of the plants . . . 1: 194. 1872 and *Pflanzenr.* (Engler) *Menispermac.* 221. 1910, *An Interpretation of Rumphius's Herbarium Amboinense* 219. 1917, *Icones plantarum formosananarum nec non et contributiones ad floram formosanam.* 4: 9–10, f. 4. 1928, *Acta Phytotaxonomica Sinica* 13(1): 39–40, pl. 1, pl. 3, f. 3. 1975

(Leaves in asthma, mucilage for swollen spleen, a poultice used to relieve headache; leaves infusion for high fever. Fruits bitter.)

in India: havunanji gida

in Japan: hôrai-tsuzura-fuji

Malay names: akar kelempenang, minyak pinyang

in Nepal: pipal pati

Pericampylus incanus (DC.) Miers ex Hook.f. & Thomson (*Cocculus incanus* Colebr.; *Pericampylus incanus* (Colebr.) Miers; *Pericampylus incanus* Miers)

India, Malay Peninsula.

See *Transactions of the Linnean Society of London* 13(1): 57–58. 1822, *Annals and Magazine of Natural History*, ser. 2 7: 40. 1851, *Flora Indica*: being a systematic account of the plants . . . 1: 194. 1872

(Leaves in asthma, cough, headache. Roots used in snake poison, plant poisoning.)

Malay names: akar kelempenang, minyak pinyang

Pericopsis Thwaites Fabaceae (Sophoreae)

Greek *perikope* ‘cutting all round, mutilation, a section’, *perikopto* ‘to cut all round’, referring to the calyx, see *Bulletin du Jardin Botanique de l’État* 32(2): 213–219. 1962, *Annals of the Missouri Botanical Garden* 68: 551–557. 1981.

Pericopsis angolensis (Baker) Meeuwen (*Afrormosia angolensis* (Baker) Harms; *Afrormosia angolensis* (Baker) De Wild.; *Afrormosia angolensis* var. *brasseuriana* (De Wild.) Louis; *Afrormosia angolensis* var. *subtomentosa* (De Wild.) Louis; *Afrormosia schliebenii* Harms; *Ormosia angolensis* Baker; *Pericopsis angolensis* var. *subtomentosa* (De Wild.) Meeuwen; *Pericopsis schliebenii* (Harms) Meeuwen)

Tropical Africa. Perennial non-climbing tree, flowers whitish purple

See *Flora of Tropical Africa* 2: 255. 1871 and *Die Natürlichen Pflanzenfamilien* 3: 158. 1906, *Bulletin du Jardin Botanique de l’État* 32(2): 216. 1962

(Leaf sap drunk anthelmintic; leaves applied for headache. Roots decoction astringent, tonic, abortifacient, aphrodisiac, blood purifier, to treat diarrhea, bronchial and chest complaints; root powder applied externally to treat edema.)

in English: East African afrormosia

in Tanzania: mbanga, muvanga

Pericopsis elata (Harms) Meeuwen (*Afrormosia elata* Harms)

Tropical Africa. Perennial non-climbing tree, slash cream-dirty orange, white to creamy or greenish flowers, brown smooth flattened indehiscent pod shortly stiped slightly winged along margins, gorillas eat young leaves and fruit, included in the IUCN Red List of threatened species as endangered

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 430. 1913, *Bulletin du Jardin Botanique de l’État* 32(2): 216. 1962

(Pulped bark rubbed into scarifications. Leaves antiplasmodial. Wood antibiotic, antimalarial and blood-sugar reducing properties.)

in English: African teak, afrormosia

in Central African Republic: mobai

Pericopsis laxiflora (Baker) Meeuwen (*Afrormosia laxiflora* (Benth. ex Baker) Harms; *Afrormosia laxiflora* (Baker) Harms; *Ormosia laxiflora* Benth. ex Baker; *Pericopsis angolensis* (Baker) Meeuwen subsp. *laxiflora* (Benth.) Yakovlev; *Pericopsis laxiflora* (Benth. ex Baker) Meeuwen)

Sudan, Tropical Africa. Perennial non-climbing tree, slash cream-pink

See *Transactions of the Linnean Society of London* 10: 360. 1811, *Enumeratio Plantarum Zeylaniae* 413. 1864, *Flora of Tropical Africa* 2: 255. 1871 and *Die Natürlichen Pflanzenfamilien* 3(2): 158. 1906, *Journal of Ethnopharmacology* 97: 327–336. 2005, *Journal of Ethnopharmacology* 99: 273–279. 2005, *Journal of Ethnopharmacology* 114: 44–53. 2007

(Roots tonic, stimulant, antiseptic, for asthenia; roots decoction astringent, anthelmintic, for diarrhea, snakebite. Leaves for psychosis, decoction for headache and antidote, infusion for lumbago; young leaves chewed for body pain. Magic, ritual, bark for insanity. Veterinary medicine.)

in English: false dalbergia

in Benin: dilané, diolan, faux dalbergia, folékou, goboutchiré, gorodjohi bodehi, itchédou, kokkobi, kpassiwan, makarfo, motouherlé, sadjouma, saijndon, sinafélégourou, sinafélékou, sinaférékou, sorokouyé, takonnabéta, tchantare

in Guinea: kohkobi, kolo kolo, kolo koolo, koulo koulo

in Ivory Coast: digué, domo, kafi, katémi, katiembo, kokoré, kolo-kolo, korokoro, kouendiblé, kpadiblé, kpangui, kroukrou, kroukroudou, kwokwo, kouendiblé, ouloudio, ounigo, tankoniliga, tiendiéré, torasin, wa

in Mali: cincime, kokobi, kolo kolo, kolokolo, mugudru, nyanga tigbwele, nyatini, sincime

in Nigeria: abua ocha, amuyin, awin, ayan, egbi, kariye gatari, kpankangichi, makarfo, odagbila, sedun, tserama

in Senegal: kulkuli

in Togo: dekpili, dikpiloboudé, dikplindi

in W. Africa: cincime, kolo kolo

Perideridia Reichb. Apiaceae (Umbelliferae)

From the Greek *perideris* ‘necklace’, see *Species Plantarum* 1: 263. 1753, *Collection de mémoires* 69, pl. 2. 1829, *Handbuch des Natürlichen Pflanzensystems* 219. 1837, *The Botany of Captain Beechey’s Voyage* 349. 1839 and *Brittonia* 2(3): 239–245. 1936.

Perideridia bolanderi (A. Gray) A. Nelson & J.F. Macbr. (*Conopodium bolanderi* (A. Gray) Koso-Pol.; *Eulophus bolanderi* (A. Gray) J.M. Coult. & Rose; *Podosciadium bolanderi* A. Gray)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 7(2): 346. 1868, *Revision of North American Umbelliferae* 112–113. 1888 and *Botanical Gazette* 61(1): 33. 1916, *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 205. 1916

(Roots stomachic.)

in English: Bolander's yampah

Perideridia gairdneri (Hook. & Arn.) Mathias (*Atenia erythrorhiza* (Piper) H. Wolff; *Atenia gairdneri* Hook. & Arn.; *Carum erythrorhizum* Piper; *Carum gairdneri* (Hook. & Arn.) A. Gray; *Carum garrettii* A. Nelson ex J.M. Coult. & Rose; *Carum montanum* Blank.; *Perideridia erythrorhiza* (Piper) T.I. Chuang & Constance)

North America.

See *The Botany of Captain Beechey's Voyage* 349. 1839, *Proceedings of the American Academy of Arts and Sciences* 7(2): 344. 1868 and *Contributions from the United States National Herbarium* 12(10): 443. 1909, *Bulletin of the Torrey Botanical Club* 40(2): 68. 1913, *Proceedings of the Biological Society of Washington* 29(23): 100. 1916, *Das Pflanzenreich* IV 228(Heft 90): 172. 1927, *Brittonia* 2(3): 244. 1936, *University of California Publications in Botany* 55: 71. 1969

(Roots astringent, stomachic, taken for coughs, to counteract cathartic and emetic effects.)

in English: common yampah, false caraway, Indian caraway, squawroot, yampa, yampah

Perideridia gairdneri (Hook. & Arn.) Mathias subsp. ***borealis*** T.I. Chuang & Constance (*Atenia montana* (Blank.) Rydb.; *Carum montanum* Blank.; *Perideridia montana* (Blank.) Dorn)

North America. Perennial

See *University of California Publications in Botany* 55: 59–61, 63, f. 24–25. 1969

(Roots astringent, stomachic, diuretic, taken for coughs, to counteract cathartic and emetic effects; infusion of roots applied to sores and wounds.)

Perideridia gairdneri (Hook. & Arn.) Mathias subsp. ***gairdneri*** (*Carum gairdneri* (Hook. & Arn.) A. Gray)

North America. Perennial

See *The Botany of Captain Beechey's Voyage* 349. 1839, *Proceedings of the American Academy of Arts and Sciences* 7(2): 344. 1868 and *Contributions from the United States National Herbarium* 12(10): 443. 1909, *Bulletin of the Torrey Botanical Club* 40(2): 68. 1913, *Proceedings of the Biological Society of Washington* 29(23): 100. 1916, *Das Pflanzenreich* IV 228(Heft 90): 172. 1927, *Brittonia* 2(3): 244. 1936, *University of California Publications in Botany* 55: 71. 1969

(Roots astringent, stomachic, taken for coughs, to counteract cathartic and emetic effects.)

in English: Gairdner's yampah

Perideridia kelloggii (A. Gray) Mathias (*Atenia kelloggii* (A. Gray) Greene; *Carum kelloggii* A. Gray)

North America. Perennial

See *Proceedings of the American Academy of Arts and Sciences* 7(2): 344. 1868, *Pittonia* 1: 274. 1889 and *Brittonia* 2(3): 244. 1936

(Decoction of flowers taken for vomiting.)

in English: Kellogg's yampah

Perilla L. Lamiaceae (Labiatae)

Derivation obscure, possibly a diminutive of the Latin *pera*, *ae* 'a bag, wallet, pocket', Greek *pera* 'a pouch', in reference to the form of the fruiting calyx, or from the Hindu name; Latin *Perilla* is a female proper name.

Perilla frutescens (L.) Britton (*Ocimum frutescens* L.; *Ocimum frutescens* Mill., nom. illeg.; *Perilla ocymoides* L., nom. illeg.)

India. Erect, branched, strongly aromatic herb, stem 4-gonous, white flowers, ovoid reddish brown glabrous nutlets

See *Species Plantarum* 2: 576–578, 597–598. 1753, *Genera Plantarum*, ed. 6 578. 1764, *The Gardeners Dictionary*: ... eighth edition 6. 1768, *Memoirs of the Torrey Botanical Club* 5(18): 277. 1894 and *Bot. Žurn.* (Moscow & Leningrad) 79(6): 122–123. 1994

(Seed paste applied on skin diseases; seed decoction used for headache, bodyache and rheumatism.)

in English: mint perilla, perilla, perilla mint, yegoma oil

in China: zi su

in India: arim, ban tulsī, bantulsī, bhangira, bhangiri, bhangeera, bhanjira, fangthrelick, khamella

Perilla frutescens (L.) Britton var. ***crispa*** (Benth.) (Leaves, stems and fruit used medicinally. Seeds are a source of perilla oil, a drying oil resembling linseed oil, which is used in waterproofing paper, manufacturing cheaper lacquer varnishes, printing ink, and painting. Leaves are used for flavoring dishes in India and China.)

in English: acute common perilla, beefsteak plant, common perilla, perilla, purple common perilla

in China: bai su zi, pai su, zi su, zi su zi, tzu su

in India: bhanjira

in Japan: shiso, aka-jiso (the red variety), ao-jiso (the green variety)

in Vietnam: tia to, tu to

Periphragmos Ruiz & Pavón Polemoniaceae

Greek *peri* ‘around, all round’ and *phragma* ‘a hedge, a fence, screen’, *phragmon* ‘a thorn-hedge’, *periphragma* ‘fence round a place, enclosure’, referring to the habitat, see *Genera Plantarum* 136. 1789, *Florae Peruvianae, et Chilensis Prodromus* 26, t. 24. 1794.

Periphragmos foetidus Ruiz & Pav.

South America, Peru.

See *Fl. Peruv.* [Ruiz & Pavon] 2: 17. 1799

(Infusion used as laxative.)

Periploca L. Apocynaceae (Asclepiadaceae, Periplocaceae)

Greek *periploke* ‘twining round, interlacing, entanglement’, *periplokos* ‘entwined, twined about’, see *Species Plantarum* 1: 211–212. 1753 and *Nachträge zur Flora der Deutschen Schutzgebiete in der Südsee* 351. 1905.

Periploca aphylla Decne.

Pakistan.

See *Species Plantarum* 1: 211–212. 1753, *Voyage dans l’Inde* 4: 109–110, t. 116. 1843 and *J. Nat. Prod.* 63(6): 881–883. 2000, *J. Nat. Prod.* 67(9): 1450–1454. 2004

(The milky juice used for swellings; flower buds to dry up pimples. A moderate antibacterial activity.)

in Pakistan: gishtar

Periploca calophylla (Wight) Falconer (*Omphalogonus calophyllus* Baill.; *Periploca calophylla* (Baill.) Roberty, nom. illeg., non *Periploca calophylla* (Wight) Falc.; *Streptocaulon calophyllum* Wight)

Tropical Africa. See also *Omphalogonus calophyllus* Baill.

See *Species Plantarum* 1: 211–212. 1753, *Contributions to the Botany of India* 64–65. 1834, *Proc. Linn. Soc. London* 1: 115. 1841, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 812. 1889, *Histoire des Plantes* 10: 300. 1890 and *Bulletin of Miscellaneous Information Kew* 1912: 279. 1912, *Bulletin de l'Institut Française d'Afrique Noire* 15: 1429. 1953, *Acta Pharmaceutica Sinica* 15(4): 245–247. 1980, *China Journal of Chinese Materia Medica* 30(1): 44–46. 2005

(The stem used as medicine for lumbago, traumatic injury, and against snakebites. Cardiotonic action.)

in English: pretty leaf silk vine

in China: qing she teng

Periploca forrestii Schlechter (*Periploca calophylla* (Wight) Falconer subsp. *forrestii* (Schlechter) Browicz)

China.

See *Species Plantarum* 1: 211–212. 1753, *Proceedings of the Linnean Society of London* 1: 115. 1841 and *Notes from the Royal Botanic Garden, Edinburgh* 8(36): 15. 1913, *Acta Pharmaceutica Sinica* 11: 75–9. 1964, *Arboretum Kórnickie* 11: 78. 1966, *J. Ethnopharmacol.* 54(2–3): 153–164. 1996

(Used for traumatic injury and rheumatic arthralgia. Cardiotonic action.)

in China: hei long gu

Periploca gabonica A. Chev. (*Periploca gabonica* (Baill.) A.Chev.)

Gabon.

See *Rev. Int. Bot. Appl. Agric. Trop.* 31: 251. 1951

(Fish poison.)

Periploca linearifolia Quart.-Dill. & A. Rich. (*Periploca linearis* Hochst., nom. nud.)

Tropical Africa.

See *Species Plantarum* 1: 211–212. 1753, *Annales des Sciences Naturelles (Paris)* Sér. 2 14: 263. 1840, *Flora* 24(Intell. 1): 25. 1841 and *Arch. Int. Pharmacodyn. Ther.* 122: 48–56. 1959

(Galactagogue. Roots and milky latex decoction taken and exudates applied for venereal diseases, warts, pneumonia, cancer, diarrhea, fertility. Ritual, magic.)

in Kenya: sinendet

Periploca nigrescens Afzel. (*Omphalogonus nigricans* N.E. Br.; *Parquetina gabonica* Baill.; *Parquetina nigrescens* (Afzel.) Bullock; *Periploca afzelii* G. Don; *Periploca gabonica* (Baill.) A. Chev.; *Periploca nigricans* Schltr.; *Periploca preussii* K. Schum.; *Periploca wildemanii* A. Chev.)

Tropical Africa. See also *Omphalogonus calophyllus* Baill.

See *Species Plantarum* 1: 211–212. 1753, *Stirpium in Guinea medicinalium species novae, ...* 1: 2. 1818, *A General History of the Dichlamydeous Plants* 4: 163. 1837, *Bull. Mens. Soc. Linn. Paris* 2: 806. 1889, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 117. 1893 and *Revue internationale de botanique appliquée et d'agriculture tropicale* 31: 251. 1951, *Kew Bulletin* 15: 205. 1961, *Planta Med.* 53(4): 391. 1987, *Afr. J. Med. Med. Sci.* 30(1–2): 105–109. 2001

(Flavonoid glycoside from the leaves.)

Peristrophe Nees Acanthaceae

Greek *peristrophe* 'a turning around', *peri* 'around' and *strophe* 'turning, twist', *strophos* 'twisted cord, belt, band', referring to the twisted corolla tube or to the bracts surrounding and enclosing the calyx or to the involucre; see Nathaniel Wallich (1786–1854), *Plantae Asiaticae rariores*. 3: 77, 112. London 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 308–309. 1847.

Peristrophe acuminata Nees

Myanmar, Malaysia.

See *Plantae Asiaticae rariores*. 3: 113. 1832

(For snakebite, wounds, pound the leaves with a little glutinous rice and poultice. Plant decoction antidote for snakebite. Root paste applied to treat eczema.)

Malay names: bunga kuau chermin, paha ayam, setawar ular, tangkai jerami

Peristrophe baphica (Sprengel) Bremekamp (*Justicia baphica* Sprengel; *Justicia bivalvis* L.; *Peristrophe bivalvis* Merr.; *Peristrophe bivalvis* (L.) Merrill; *Peristrophe roxburghiana* (Schultz) Bremekamp; *Peristrophe tinctoria* (Roxburgh) Nees)

China. Herb

See *Jour. Bot.* 17: 19. 1879 and *Interpr. Rumph. Herb. Amboin.* 476. 1917, *Lingnan Sci. Journ.* 5: 170. 1927

(Leaves boiled until the water turns red, the decoction used to wash infected wounds. Meat from pig's leg boiling with water, soup could be used as drugs for heating clearing and fire purging, antitussives and hemostatics.)

in English: pepper leaf herb

in China: guan yin cao

in Indonesia: udu tung lia

Peristrophe japonica (Thunberg) Bremekamp (*Dianthera japonica* Thunberg; *Dicliptera buergeriana* Miquel; *Dicliptera crinita* Nees; *Dicliptera japonica* (Thunberg) Makino; *Dicliptera uraiensis* Hayata; *Justicia crinita* Thunberg; *Peristrophe chinensis* Nees)

China.

See *Trans. Linn. Soc. London* 2: 338. 1794, *Prodr.* 11: 485, 494. 1847 and *Bot. Mag. (Tokyo)* 17: 90. 1903, *Boissiera* 7: 194. 1943

(Febrifuge.)

in China: jiu tou xi zi cao

Peristrophe paniculata (Forssk.) Brummitt (*Dianthera bicalyculata* Retz.; *Dianthera malabarica* L.f., nom. illegit.; *Dianthera malabarica* Gouan ex Nees; *Dianthera paniculata* Lour.; *Dianthera paniculata* Forssk.; *Dicliptera paniculata* (Forssk.) I. Darbysh.; *Justicia bicalyculata* (Retz.) Vahl; *Justicia ligulata* Lam.; *Peristrophe bicalyculata* Nees; *Peristrophe bicalyculata* (Retz.) Nees)

Tanzania, India. Herb, erect, branched, 6-angled stems hairy at nodes, ovate acute hairy leaves, flowers purple or pink, corolla bilipped, pubescent oblong capsule pointed, seeds ovoid

See *Supplementum Plantarum* 85. 1752, *Flora Aegyptiaco-Arabica* 7. 1775, *Kongl. Vetensk. Acad. Handl.* 1775: 279. 1775 [Tvdnne nya species of *Dianthera*.], *Encyclopédie Méthodique, Botanique* 1: 632. 1785, *Flora Cochinchinensis* 26. 1790, *Symbolae Botanicae, ...* 2: 13. 1791, *Plantae Asiaticae Rariores* (Wallich) 3: 113. 1832 and *Cat. Pl. Madag., Acanth.* 2(24): 7–32. 1939, *Cytologia* 41: 283–290. 1976, *Ber. Schweiz. Bot. Ges.* 86: 152–203. 1976, *Kew Bulletin* 38(3): 451. 1983, *J. Indian Bot. Soc.* 65: 310–315. 1986, *Kew Bulletin* 62(1): 122–123. 2007

(Used in Ayurveda. Plant paste mixed with common salt warmed and applied externally in bone fractures; leaves and stem mixed with white of egg and lime, ground into a paste and applied in bone fractures; paste of nodal portion of stem taken orally by women during labor pain; plant decoction antidote for snakebite; treatment of snakebite and fever, whole plant. *Peristrophe bicalyculata* (Retz.) Nees whole plant macerated in a rice infusion and eaten for snakebite. Root paste applied to treat eczema, skin diseases. Leaf juice poured into the eyes for eyes ailments; leaf mixed with raw sugar and given in fever, intermittent fever; leaf paste applied to treat eczema, skin diseases. Fruits burnt and the paste mixed with mustard oil and applied in eye inflammations. Veterinary medicine, an ointment for dressing of wounds of horses and oxen.)

in India: atrilal, chebeera, cheebe gida, cheebe gida, cheebeera soppu, cheebera soppu, chebira, chebira gida, chebura, chirchiri, choti, choti harjodi, chotiharjori, cibi gida, eluvu sandaka, ghati pitta papada, ghatipittapapada, jai, jal, kaage kaalu baeru, kaanga, kakajangha, kakar bhawra,

kakatikta, kakjungha, kaknadi, katou-pulcholli, katti, kuchchi, kuljeera, milagainangai, millagaainangai, nadikanta, nasabhaga, nil jhojhru, pedda uttarenii, pracivala, raan kiraayath, rankirayat, sulomasa

Peristrophe tinctoria Nees

India, Malaysia.

See *Plantae Asiaticae Rariores* 3: 113. 1832

(Skin complaints, pound the leaves and poultice.)

Malay name: mala pudak

Peristylus Blume Orchidaceae

From the Greek *peri* 'around' and *stylos* 'a column', referring to the shape of the column; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 404. Batavia (Sep.-Dec.) 1825.

Peristylus constrictus (Lindl.) Lindl. (*Habenaria constricta* (Lindl.) Hook.f.; *Habenaria cylindrocalyx* Gagnep.; *Herminium constrictum* Lindl.; *Orchis leucantha* Ham. ex Hook.f.; *Platanthera constricta* Lindl. ex Wall., nom. inval.)

India, Vietnam. Ground growing orchid herb, stout stem, hairy tuber

See *Edwards's Botanical Register* 18: sub pl. 1499. 1832, *Gen. Sp. Orchid. Pl.*: 300. 1835, *The Flora of British India* 6(17): 161. 1890 and *NRBGE* 13: 205. 1921 [*Notes from the Royal Botanic Garden, Edinburgh*]

(Pills made from leaves paste of *Plumbago indica* and whole plants of *Habenaria constricta* given after menstrual cycle for 2–3 days as contraceptives. Dried powdered tuberous roots given with milk and sugar in sexual debility.)

in Bangladesh: chamuinda

in India: salam musali

Pernettya Gaudich. Ericaceae

For the French Academician Antoine Joseph Pernetty (Pernety), 1716–1801, with Louis-Antoine de Bougainville (1729–1811) visited the Falkland Islands and South America. See L.A. de Bougainville, *Voyage autour du monde par la frégate du Roi "La Boudeuse" et la flute L'Etoile" en 1766–1769*. Paris 1771, *Saggio sulla Storia Naturale del Chili ...* 126, 351. 1781 (1782), Charles François Brisseau de Mirbel (1776–1854), in *Annales des Sciences Naturelles*. 5: 102. 1825, Robert O. Cunningham, *Notes on the Natural History of the Strait of Magellan and West Coast of Patagonia Made During the Voyage of H.M.S. Nassau in the Years 1866, 67, 68, & 69*. Edinburgh 1871 and Joanny Bricaud, *Les Illuminés d'Avignon. Étude de dom Pernety et son groupe*. Paris 1927, *Fl. Prov. Buenos Aires* 4(5): 6–12; 298–302. 1965, Margaret Patricia Henwood Laver, *An Annotated Bibliography of the*

Falkland Islands and the Falkland Island Dependencies (as delimited on 3rd March, 1962). Cape Town 1977, *Bot. Jahrb. Syst.* 105(4): 449–480. 1985, John Dunmore, *Who's Who in Pacific Navigation*. University of Hawaii Press, Honolulu 1991, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 427. Stuttgart 1993, *Fl. Neotrop.* 66: 351–488. 1995.

South America, Mexico. Small shrubby plants

See *Icones et Descriptiones Plantarum, quae aut sponte ...* 6: 43, t. 562, f. 2. 1801, *Synopsis Plantarum* 1: 483. 1805, *Linnaea* 5: 126. 1830, *Botanical Magazine* t. 3177. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 587, 609. 1839, *A General History of the Dichlamydeous Plants* 3: 837. 1841, *Plantas Hartwegianas imprimis Mexicanas* 219. 1845, *Chloris Andina* 2: 170. 1857, *Botanical Gazette* 25(3): 148. 1898 and *North American Flora* 29(1): 82. 1914, *Kongliga Svenska Vetenskapsakademiens Handlingar* 56: 283. 1916, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12(113): 289–290. 1935, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13(117): 207. 1936

(Leaves, berries, and nectar from flowers poisonous, highly toxic, may be fatal if eaten. Toxic, hallucinogenic, plants should under no circumstances be used as food.)

in Central and South America: arayán, arrayán, arrayan, cacalote, capulincillo, maiz de perro

in Ecuador: taglli

Peronema Jack Lamiaceae (Labiatae, Verbenaceae)

From the Greek *peroo*, *paroo* ‘to mutilate’, *peros* ‘deficient’ and *nema* ‘thread’, referring to the missing stamens, see *Malayan Miscellanies* 2(7): 46. 1822.

Peronema canescens Jack (*Peronema heterophyllum* Miq.)

Thailand.

See *Malayan Misc.* 2(7): 46. 1822, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 3: 570. 1861 [Alternate title: *Flora Indiae Batavae, ... Supplementum Primum. Prodromus Florae Sumatranae*]

(For rheumatism, ringworm, pound the leaves and poultice; leaves decoction for fever.)

in English: false elder

Malayan names: cherek, sukai, sungkai

Perovskia Karelin Lamiaceae (Labiatae)

For the Russian General Leo A. Perovski (Perovskij), 1792–1856, Governor of Orenburg; see *Bull. Soc. Imp. Naturalistes Moscou* 14: 15, t. 1. 1841, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 673. Ansbach 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 149. Berlin & Hamburg 1989.

Perovskia abrotanoides Karelin (*Perovskia artemisioides* Boiss.)

Iran, Tibet, Himalaya. Aromatic whitish greyish hairy shrub or under-shrub, blue violet flowers in whorls, fresh leaves as flavouring agent, red dye

See *Bull. Soc. Imp. Naturalistes Moscou* 14: 15. 1841, *Diagnoses plantarum orientalium novarum*, ser. 2, 4: 15. 1859

(Cooling, antacid, in tenesmus, fever; leaf decoction in cough. Veterinary medicine, plant extract given to cattle when they stop to eat.)

in English: Caspian sage

in China: fen yao hua

in India: iskiling, phayanma, shemerrang, starubu, tarubu

Persea Miller Lauraceae

From the Greek name *persea*, applied by Theophrastus (*HP*. 3.3.5, 4.2.5) and Hippocrates (*De Morbis Mulierum*. 1.90) to an unknown Egyptian tree, possibly *Cordia myxa* L. or a species of *Mimusops*; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London (28 Jan.) 1754, *The Gardeners Dictionary*: ... eighth edition s.n. 1768, *Primae Lineae Systematis Naturae* 61. 1834, *Sylva Telluriana* 136. 1838, *Genera Plantarum* 3: 157. 1880 and *Fieldiana*, *Bot.* 24(4): 302–344. 1946, *Rheedea* 3(2): 132, 135. 1993, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 471. Basel 1996, *Novon* 12(4): 575–586. 2002.

Persea americana Mill. (*Laurus persea* L.; *Persea americana* var. *angustifolia* Miranda; *Persea americana* var. *drymifolia* (Schltdl. & Cham.) S.F. Blake; *Persea americana* var. *leiogyne* (Blake) Kelsey & Dayton; *Persea americana* var. *nubigena* (L.O. Williams) L.E. Kopp; *Persea drymifolia* Schltdl. & Cham.; *Persea edulis* Raf., nom. illeg. superfl.; *Persea floccosa* Mez; *Persea gigantea* L.O. Williams; *Persea gratissima* Gaertn.; *Persea gratissima* var. *drimyfolia* (Schltdl. & Cham.) Mez; *Persea gratissima* var. *macrophylla* Meisn.; *Persea gratissima* var. *oblonga* Meisn.; *Persea gratissima* var. *praecox* Nees; *Persea gratissima* var. *vulgaris* Meisn.; *Persea leiogyne* Blake; *Persea nubigena* L.O. Williams; *Persea paucitripplinervia* Lundell; *Persea persea* (L.) Cockerell, nom. inval., tautonym; *Persea steyermarkii* C.K. Allen)

Tropical Americas. Evergreen tree, leafy, large alternate leaves, small pale yellow flowers, large fruit, central seed

See *Species Plantarum* 1: 369–370. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition s.n. 1754, *The Gardeners Dictionary*: ... eighth edition s.n. 1768, *De Fructibus et Seminibus Plantarum*... 3: 222, t. 221. 1807, *Linnaea* 6: 365. 1831, *Systema Laurinarum* 129. 1836, *Sylva Telluriana* 134. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 53. 1864, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 5: 147–148. 1889, *Bulletin of the Torrey Botanical Club* 19(3): 95. 1892 and *Journal of the Washington Academy of Sciences* 10: 15, 19. 1920, *Standard, Pl. (Green leaves, bark and stones from the fruit toxic to browsing stock. Guatemalan cultivars have caused toxic effects

in cattle, goats, rabbits, canaries, and fish. The seeds have caused toxicity and death in canaries and have experimentally poisoned mice. Leaves should not be allowed to fall accidentally into fish tanks. Used for colds, sprains, malaria, coughs, diarrhea, high blood pressure, headaches, rheumatism. Leaf and bark teas for diarrhea, colds. Poultice of leaves for headache, rheumatism, sprains; leaves decoction for regulating fertility.)

in English: alligator pear, avocado, avocado pear

in South America: abacasi, abacate, abacate-creme vegetal, abacateiro, abocate, acapa, aguacate, ahucate, ahucatl, apacha, aswe, avocado acapa, caí, huira palta, huira palto, ju, louro-abacate, morako, oj, palltay, palta, palta moena, paltai, palte, palto, parata, parité, parta, parte, um, un, tc'om

in Mexico: aguacate, aguacachile, aguacate xinene, ahocacuáhuatl, ahucacáhuatl, ahucatl, ahucate, bashlobó, cucataj, cupandra, cuut'p, cupanda, cuytuim, ohui, on, pagua, palta, shamal, tunuá, uy, ohucatl, lhpuy, lhpua, tatsan, tutiti, tzani, tzison, tziton, yashusa, yaujca, yaxhu, yéuca-te

in Cambodia: 'avôkaa

in Indonesia: adpukat, avokad, pokat

in Japan: abokado, wani-nashi

in Malaysia: apukado, avokado

in Papua New Guinea: bata

in Philippines: abukado, avocado

in Thailand: awokado

in Vietnam: bo', lê dâu

in Congo: saboka

in East Africa: mparachichi, mukorobe, mwembe mafuta

Persea borbonia (Linnaeus) Sprengel (*Borbonia littoralis* (Small) House; *Laurus borbonia* Linnaeus; *Persea littoralis* Small; *Tamala borbonia* (Linnaeus) Rafinesque; *Tamala littoralis* (Small) Small)

North America, Coastal parts of Gulf and Atlantic states. Tree, aromatic leaves glaucous beneath, galls produce misshapen leaves, flowers borne in long-stalked clusters or larger panicles, ripe black drupes

See *Sp. Pl.* 1: 369–370. 1753, *Species Plantarum* 2: 707. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition s.n. 1754, *Systema Vegetabilium*, editio decima sexta 2: 268. 1825, *Sylva Telluriana* 136. 1838 and *Flora of the Southeastern United States* 820. 1903, *Flora of the Southeastern United States* ... (Digestive.)

in English: red bay

Persea indica (L.) Spreng. (*Laurus indica* L.)

Europe.

See *Species Plantarum* 1: 370. 1753, *Systema Vegetabilium*, editio decima sexta 2: 268. 1825

(Astringent, antiinflammatory.)

in English: Madeira mahogany

Persea macrantha (Nees) Kosterm. (*Machilus macrantha* Nees; *Persea gratissima* Gaert.)

Vietnam. Tree, evergreen, a watery sap exudes from tree, flowers yellow cream, a source of gum, incense-sticks, galls present on leaf, birds eat fruits, squirrels eat bark, bees forage on flower, often in *Machilus*

See *The Gardeners Dictionary ... Abridged ... fourth edition* [1030]. 1754, *Plantae Asiaticae Rariores* 2: 70. 1831 and *Reinwardtia* 6(2): 193. 1962, *Indian Journal of Pharmaceutical Sciences* 65(5): 532–534. 2004, *Pharmacognosy Magazine* Vol 4, Issue 13(Suppl), Jan–Mar, 2008

(Bark antiinflammatory, hypotensive, antiasthmatic, anti-rheumatic, purgative, bark ground into fine powder, a decoction made with honey and taken to treat asthma, convulsions and rheumatism; leaves used externally to treat ulcer.)

in English: avocado fruit

in China: run nan shu

in India: gulamavu, gulmavu, kallamavu, kolamavu, kolla manu, kulamavu, kulur, kumati, kurma

in Sri Lanka: ululu

Persea odoratissima (Nees) Kostermans (*Laurus indica* Lour., nom. illeg., non *Laurus indica* L.; *Laurus indica* L.; *Machilus odoratissimus* (Wall. ex Nees) Nees)

SE Asia. Difficult to differentiate from *Persea bombycina*

See *Species Plantarum* 1: 369–370. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* s.n. 1754, *Flora Cochinchinensis* 253. 1790, *Plantae Asiaticae Rariores* 2: 70. 1831 and *J. Sc. Res. Indones.* 1: 116. 1952, *Reinwardtia* 4: 225. 1957, *Bibl. Laur.* 1243. 1964

(Leaves stimulant, tonic.)

in Nepal: seto kaulo

in Pakistan: chan

Persicaria Miller Polygonaceae

Latin *persicus*, *i* (Persia) '*persica arbor*, the peach tree', referring to the shape of the leaves; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London (28 Jan.) 1754, *Familles des Plantes* 2: 276, 612. 1763, *A Natural Arrangement of British Plants* 2: 269. 1821, *Monographiae Generis Polygoni Prodrromus* 43, 66. 1826, *Plantae Asiaticae*

Rariores 3: 58. 1832 and *Abhandlungen herausgegeben vom Naturwissenschaftlichen Vereins zu Bremen* 21: 276. 1912, *Bulletin de l'Académie Internationale de Géographie, Botanique* 4(22): 27. 1913, *Preslia* 57(1): 65–66, f. 1. 1985, *Plant Systematics and Evolution* 186(1–2): 112. 1993. Some confusion with *Polygonum*.

(Plant decoction febrifuge, plant juice given in abdominal pains; shoot decoction a wash for ulcers. Leaf juice applied externally on scabies; leaf extract given in order to prevent ascaris infection; sap of pounded leaves applied on wounds. Seeds purgative, emetic, antispasmodic. Root astringent, cooling. Whole plant as fish poison; leaves piscicide.)

in India: nirthe, tuichikte

in Nepal: bish, bishalarin, nali, pire, pire jhar

Persicaria careyi (Olney) Greene (*Polygonum careyi* Olney)

North America.

See *The Gardeners Dictionary ... Abridged ... fourth edition 1754*, *Proc. Providence Franklin Soc.* 1: 29. 1847 and *Leafl. Bot. Observ. Crit.* 1: 24. 1904

(An infusion made from entire plants used as a cold remedy and febrifuge.)

Persicaria chinensis (L.) H. Gross (*Ampelygonum chinense* (L.) Lindl.; *Polygonum chinense* L.; *Polygonum chinense* Houtt.)

Nepal, China. See also *Polygonum*

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition 1754*, *Edwards's Botanical Register* 24: Misc. 62–63. 1838 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49(2): 269. 1913, *Proceedings of the Indian Science Congress Association* (III, C): 67: 50. 1980

(Leaves ground with lemon juice and the paste applied all over the head against giddiness; leafy twig extract taken for stomachache.)

in English: Chinese knotweed

in India: kakakarumbu, vandigya

in Nepal: kukur thotne

Persicaria decipiens (R. Br.) K.L. Wilson (*Polygonum decipiens* R. Br.; *Polygonum salicifolium* Brouss. ex Willd.; *Polygonum serrulatum* Lag.)

Tropical Africa. Herb, succulent, weak-stemmed, straggling, slender, rooting from the bristly joints, leaves clasping the stem in a sheath with a long bristle-haired fringe, perianth white tinged pink, enclosed by the sepals indehiscent 3-sided nutlet, plant for fodder, young leaves and shoots boiled and eaten as a famine food, in damp places, often growing in water, in swamps, associated with *Cyperus latifolius*

See *Species Plantarum* 1: 359–365. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 428. 1809, *Prodromus Florae Novae Hollandiae* 420. 1810, *Genera et species plantarum* 14. 1816 and *Fl. Madagasc.* 65: 1–19. 1953, *New Zealand Journal of Botany* 21: 13–20. 1983, *Boletim da Sociedade Broteriana* 58: 85–96. 1985, *Telopea* 3: 178. 1988, *Kew Bulletin* 45: 621–636. 1990

(Ash obtained after burning the plant licked in order to treat sore throat and tonsillitis. Leaves crushed and rubbed into the skin for skin diseases and sores, bites of insects and snakes; a decoction from pounded leaves used as a purgative. Veterinary medicine, leaf paste applied to horses.)

in Tanzania: mchendeka, msendeka

in India: ashi bihlongoni, jasatkhasi

Persicaria glabra (Willd.) M. Gómez (*Persicaria densiflora* (Meisn.) Moldenke; *Persicaria portoricensis* (Bertero ex Small) Small; *Polygonum densiflorum* Meisn., nom. illeg., non *Polygonum densiflorum* Blume; *Polygonum glabrum* Willd.; *Polygonum glabrum* Baker & C.H. Wright; *Polygonum glabrum* Cham. & Schltld.; *Polygonum portoricense* Bertero ex Small, nom. illeg. superfl.)

South America. Erect glabrous herb

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition 1754*, *Species Plantarum*. Editio quarta 2(1): 447. 1799, *Linnaea* 3: 46. 1828, *Flora Brasiliensis* 5(1): 13–14. 1855, *Memoirs from the Department of Botany of Columbia College* 1: 46, pl. 10. 1895, *Anales del Instituto de Segunda Ensenanza de la Habana* 2: 278. 1896 and *Flora of the Southeastern United States* 377. 1903, *Flora of Tropical Africa* 6, 1: 113. 1909, *Torreyia* 34(1): 7. 1934

(Leaf juice in colic. An infusion made from pounded whole plants used as a blood medicine; plant juice febrifuge. For snakebite, leaf infusion drunk. Whole plant to stupefy fish.)

in English: smooth smartweed

in India: bihang

Persicaria hydropiper (L.) Spach (*Persicaria hydropiper* (L.) Spach; *Persicaria hydropiper* (L.) Opiz; *Persicaria hydropiper* var. *diffusa* Kitag.; *Persicaria hydropiper* var. *vulgaris* (Meisn.) Ohki; *Persicaria vernalis* Nakai; *Polygonum hydropiper* L.; *Polygonum hydropiper* var. *longistachyum*

Y.L. Chang & S.X. Li; *Polygonum hydropiper* var. *vulgare* Meisn.; *Polygonum schinzii* J. Schust.)

Europe, northern Africa. Herb, ascending, many-branched, rooting at the basal nodes, leaves alternate glandular, petiole sheathing at base, inflorescence spiciform or racemose terminal or axillary, lenticular or rugous achene brown-black, food, all parts have an acrid pepperlike taste

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Histoire Naturelle des Végétaux* 10: 536. 1841, *FBI* 5: 39. 1886 and *Bulletin de l'Herbier Boissier* 2(8): 711. 1908, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 2: 43, 107. 1959, *Proceedings of the Indian Science Congress Association* (III, C): 66: 77. 1979, *Botanical Journal of the Linnean Society* 98(4): 321–371. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 438–439. 1990, *Acta Botanica Boreali-Occidentalia Sinica* 10: 203–210. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(7): 125–126. 1992, *Ludoviciana* 29: 74–79. 2000

(The oily exudate produced in multicellular glands can cause skin irritation and coagulation of blood; gland-dotted leaves used as a fish poison. Seeds toxic, rubefacient, vesicant, to relieve stomachache. Root stimulant, bitter, tonic; root paste in toothache; roots decoction as contraceptive; root juice given to induce pregnancy. Bruised leaves diuretic, used for kidney complaints and toothache. Fresh juice from leaves in jaundice and drowsy. Whole plant acrid, antiseptic, carminative, vermifuge, anthelmintic, diuretic, stimulant, diaphoretic and emmenagogue; plant decoction given with long pepper and salt to women for irregular periods. Crushed whole plant as fish poison.)

in English: biting knotweed, biting pepper, marsh-pepper smartweed, pepper smartweed, red knees, smartweed, water pepper

in China: la liao

in India: bannalia, bihlongoni, jalpippli, kari agrada gida, kari sannii, lilhar, mima-haru, packur mul, packurmul, pani-ki-mirch, panimoricha, patharua bihalagani, pothorua, pothorua bihlongoni, pukur-mul

(Piscicide. Reported to cause dermatitis. Decoctions from leaves, flowers, and roots for use as analgesics as well as gastrointestinal, orthopedic and psychological aids.)

in Mexico: korisowa

Persicaria stagnina (Buch.-Ham. ex Meisn.) Qaiser (*Persicaria barbata* subsp. *stagnina* (Buch.-Ham. ex Meisn.) Soják; *Persicaria barbata* var. *stagnina* (Buch.-Ham. ex Meisn.) Grierson; *Polygonum barbatum* var. *stagninum* (Buch.-Ham. ex Meisn.) Steward; *Polygonum conspersum* Meisn.; *Polygonum stagninum* Buch.-Ham. ex Meisn.)

Pakistan, India. Undershrubs, white flowers in terminal racemes

See *Fl. Asiat. Rar.* 3: 56. 1832 and *Contributions from the Gray Herbarium of Harvard University* 88: 54. 1930, *Preslia* 46(2): 152. 1974, *Notes from the Royal Botanic Garden, Edinburgh* 40: 128. 1982, *Flora of Pakistan* 205: 44. 2001

(Used in Sidha. Roots used for curing boils.)

in India: kunma kudori, neer alari

Persicaria virginiana (Linnaeus) Gaertner (*Antenoron virginianum* (Linnaeus) Roberty & Vautier; *Polygonum virginianum* Linnaeus; *Tovara virginiana* (Linnaeus) Rafinesque)

North America.

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *De Fructibus et Seminibus Plantarum...* 2(1): 180. 1790, *Florula Ludoviciana*, or, a flora of the state of ... 28. 1817 and *Boissiera* 10: 35. 1964

(A hot infusion of leaves with bark of honey-locust, *Gleditsia triacanthos* Linnaeus, used to treat whooping cough.)

Petalidium Nees Acanthaceae

Greek *petalon* 'a petal' and *-idium*, a diminutive suffix, the bracts are petal-like, see *Species Plantarum* 2: 634–635. 1753, *Plantae Asiaticae Rariores* 3: 75, 82. 1832.

Petalidium barlerioides (Roth) Nees (*Ruellia barlerioides* Roth; *Ruellia bracteata* Roxb.)

India.

See *Novae Plantarum Species* 310. 1821, *Flora Indica*; or, descriptions of Indian Plants 3: 47. 1832, *Plantae Asiaticae Rariores* 3: 82. 1832

(Stem and leaf infusion given in acute fevers; plant extract a bitter tonic.)

Petalostigma F. Muell. Euphorbiaceae (Picrodendraceae)

From the Greek *petalon* 'a petal' and *stigma* 'a stigma', the stigmas are petal-like, see *Hooker's J. Bot. Kew Gard. Misc.* 9: 17. 1857.

Petalostigma banksii Britten & S. Moore

Australia, Queensland.

See *J. Bot.* 41: 225. 1903

(Astringent, febrifuge.)

in English: bitter bark

Petalostigma pubescens Domin (*Petalostigma nummularium* Airy Shaw; *Petalostigma quadriloculare* var. *nigrum* Ewart & O.B. Davies; *Petalostigma quadriloculare* var. *pubescens* Müll.Arg.)

Papua New Guinea, Australia.

See *Flora* 47: 481. 1864 and *Fl. N. Territory* 166. 1917, *Bibliotheca Botanica* 89: 317. 1927, *Kew Bulletin* 31: 373. 1976

(For skin diseases, febrifuge.)

in English: bitter bark, native quince, quinine bush, quinine tree

Petalostigma quadriloculare F. Muell. (*Hylococcus sericeus* R.Br. ex Benth.; *Petalostigma haplocladum* Pax & K. Hoffm.; *Petalostigma humile* W. Fitzg.; *Petalostigma micrandrum* Domin; *Petalostigma quadriloculare* var. *genuina* Müll.Arg., nom. inval.; *Petalostigma quadriloculare* var. *sericeum* Müll.Arg.)

Australia.

See *Hooker's J. Bot. Kew Gard. Misc.* 9: 17. 1857, *Flora* 47: 481. 1864, *Fl. Austral.* 6: 92. 1873 and *J. Roy. Soc. Western Australia* 3: 163. 1918, *Bibliotheca Botanica* 89: 317. 1927

(Fruit and bark used to treat toothache and sore eyes; a berry in a mug of water is good for sore eyes and as an antiseptic wash.)

in English: quinine bush, quinine tree

in W. Australia: dilngeri, wildjari

Petalostigma triloculare Müll.Arg. (*Petalostigma australianum* Baill.; *Petalostigma glabrescens* (Benth.) Domin; *Petalostigma quadriloculare* var. *glabrescens* Benth.)

Australia, Queensland.

See *Flora* 47: 471. 1864, *Adansonia* 7: 356. 1867, *Fl. Austral.* 6: 92. 1873 and *Bibliotheca Botanica* 89: 317. 1927

(Astringent, febrifuge.)

in English: long-leaved bitter bark

Petasites Miller Asteraceae

Greek *petasitis*, *petasites* 'butter-bur' (Dioscorides and Galenus for a species of *Petasites*), *petasos* 'a sun-hat, a hat with a broad brim, broad umbellated leaf', Latin *petasus* 'a travelling hat, cap', referring to the large leaves; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London (28 Jan.) 1754 and Toman, J. "A taxonomic survey of the genera *Petasites* and *Endocellion*." *Folia Geobotanica et Phytotaxonomica* 7(4): 381–406. 1972, Cherniawsky, D.M. and R.J. Bayer. "Systematics of North American *Petasites*

(Asteraceae: Senecioneae). I. Morphometric analyses." *Canad. J. Bot.* 76: 23–36. 1998, Cherniawsky, D.M. and R.J. Bayer. "Systematics of North American *Petasites* (Asteraceae: Senecioneae). II. Isozyme analysis and population genetic structure." *Canad. J. Bot.* 76: 1476–1487. 1998, Cherniawsky, D.M. and R.J. Bayer. "Systematics of North American *Petasites* (Asteraceae: Senecioneae). III. A taxonomic revision." *Canad. J. Bot.* 76: 2061–2075. 1998.

Petasites amplius Kitam. (*Petasites japonicus* (Siebold & Zucc.) F.W. Schmidt)

Japan.

See *Flora Japonica* 181. 1843 and *Acta Phytotaxonomica et Geobotanica* 1(2): 115. 1932

(Used against heavy colds and as a sedative for coughs.)

in Japan: kor, makayo

Petasites frigidus (L.) Fr. var. ***palmatus*** (Aiton) Cronquist (*Nardosmia arctica* (A.E. Porsild) Á. Löve & D. Löve; *Nardosmia palmata* (Aiton) Hook.; *Nardosmia speciosa* Nutt.; *Petasites arcticus* A.E. Porsild; *Petasites frigidus* subsp. *arcticus* (A.E. Porsild) Cody; *Petasites palmatus* (Aiton) A. Gray; *Petasites palmatus* subsp. *speciosus* (Nutt.) J. Toman; *Petasites speciosus* (Nutt.) Piper; *Tussilago palmata* Aiton)

North America.

See *Species Plantarum* 2: 865–866. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* s.n. 1754, *Hortus Kewensis*; or, a catalogue ... 3: 188, pl. 2. 1789, *Dict. Sci. Nat.* 34: 186. 1825, *Flora Boreali-Americana* 1(6): 308. 1833, *Transactions of the American Philosophical Society*, new series, 7: 288–289. 1840, *Summa Vegetabilium Scandinaviae* 182. 1845, *Geological Survey of California, Botany* 1: 407. 1876 and *Mazama* 2: 97. 1901, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 4: 74. 1943, *Rhodora* 48(570): 124. 1946, *Botaniska Notiser* 128(4): 519. 1975 [1976], *Botanical Journal of the Linnean Society* 82: 357–368. 1981, *The Canadian Field-Naturalist* 108: 94. 1994

(Antiasthmatic, antispasmodic, and expectorant, in salve or poultice form.)

in North America: Western sweet coltsfoot, pétasite palmé

Petasites frigidus var. ***sagittatus*** (Banks ex Pursh) Cherniawsky & R.J. Bayer (*Nardosmia sagittata* (Banks ex Pursh) Hook.; *Petasites dentatus* Blank.; *Petasites frigidus* (Linnaeus) Fries var. *sagittatus* (Banks ex Pursh) Cherniawsky; *Petasites sagittatus* (Banks ex Pursh) A. Gray; *Tussilago sagittata* Banks ex Pursh)

North America.

See *Species Plantarum* 2: 865–866. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* s.n. 1754, *Flora Americae Septentrionalis*; or, ... 2: 531. 1814 [1813], *Dict. Sci.*

Nat. 34: 186. 1825, *Flora Boreali-Americana* 1(6): 307. 1833, *Summa Vegetabilium Scandinaviae* 182. 1845, *Geological Survey of California, Botany* 1: 407. 1876 and *Montana College of Agriculture and Mechanical Arts. Science Studies, Botany* 1: 102. 1905, *Taxon* 31(2): 344–360. 1982, *Canadian Journal of Botany* 76(12): 2061–2075. 1998 [1999]

(Antiasthmatic, antispasmodic.)

in North America: arrowhead sweet coltsfoot, arrowleaf sweet coltsfoot, pétasite sagitté

Petasites japonicus (Siebold & Zuccarini) Maximowicz (*Nardosmia japonica* Siebold & Zuccarini; *Petasites albus* A. Gray, non Linnaeus; *Petasites japonicus* (Siebold & Zucc.) F.W. Schmidt; *Petasites liukiensis* Kitamura; *Petasites spurius* Miquel; *Petasites spurius* Rchb.; *Tussilago petasites* Thunberg; *Tussilago petasites* L.)

Japan, China.

See *Species Plantarum* 2: 866. 1753, *Flora Japonica*, ... 314. 1784, *Dict. Sci. Nat.* 34: 186. 1825, *Flora Japonica* 181. 1843, Perry Exped. 2: 314. 1857, *Annales Museum Botanicum Lugduno-Batavi* 2: 168. 1866 and *Acta Phytotaxonomica et Geobotanica* 2: 178. 1930, *Kromosomo* 23: 676–681. 1981

(Rhizomes for treating injuries, trauma, swelling and fractures, and detoxification of snakebites.)

in English: bog rhubarb, butter-bur

in China: feng dou cai

in Japan: fuki

Petasites tricholobus Franchet (*Ligularia petelotii* Kitamura; *Ligularia petelotii* Merr.; *Petasites himalaicus* Kitamura; *Petasites mairei* H. Lévl.; *Petasites petelotii* (Merrill) Kitamura; *Petasites vaniotti* H. Lévl.)

Japan.

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 6: 52. 1883 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 15. 1915, *Journal of the Arnold Arboretum* 21(3): 389–390. 1940, *Acta Phytotaxonomica et Geobotanica* 15: 108. 1954, *Acta Phytotaxonomica et Geobotanica* 22: 130. 1966

(Rhizomes for treating injuries, trauma, swelling and fractures, and detoxification of snakebites.)

in China: mao lie feng dou cai

Petersianthus Merrill Lecythidaceae

After the German entomologist Wilhelm Carl Hartwig Peters, 1815–1883, naturalist, zoologist, physician and traveller, professor of medicine (1851) and zoology (1856), 1842–1848 in South and East Africa and India, joint author of *Naturwissenschaftliche Reise nach Mossambique*. Berlin [1861–] 1862–1864, wrote *Ueber Wohnen und Wandern*

der Thiere. Vortrag, etc. Berlin 1867. See A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, *Naturwissenschaftliche Reise nach Mossambique ...* [Peters] 6(Bot., 1): 168, t. 30. 1861, *Genera Plantarum* [Bentham & Hooker f.] 1(2): 721. 1865 [19 Oct 1865], F.A. Maximilian Kuhn (1842–1894), *Filices africanae ... Accedunt filices Deckenianae et Petersianae*. Lipsiae [Leipzig] 1868, Otto Kersten (1839–1900), *Geographische Nachrichten für Welthandel und Volkswirtschaft ...* unter der ... Redaktion von Dr. O.K. [Berlin—Central-Verein für Handelsgeographie, etc. Geographische Nachrichten, etc.] Berlin 1879, Carl Claus von der Decken (1833–1865), *Baron C.C. von der Decken's Reisen in Ost Afrika in 1859–61*. “Betalains and P-type sieve-tube plastids in *Petiveria* and *Agdestis* (Phytolaccaceae).” *Taxon* 23: 541–542. 1974, Ormond, W.T. and M.C.B. Pinheiro. “Contribuição ao estudo biosistemático e ecológico de *Petiveria alliacea* L.” *Revista Brasil. Biol.* 34: 123–142. 1974, Rogers, G.K. “The genera of *Phytolaccaceae* in the southeastern United States.” *J. Arnold Arbor.* 66: 1–37. 1985, *Current Science* 55: 1099–1100. 1986, *Regnum Veg.* 127: 74. 1993

(Abortive, emmenagogue, depurative, diuretic, sudorific, antimicrobial, antiinflammatory, antispasmodic, disinfectant, expectorant, vermifuge, stimulant, in the treatment of cystitis, stomachache, headache, faintness, venereal diseases, strains, asthma, bladder inflammation, nervous disorders, cholera, colds, fever; used externally to treat skin diseases, arthritis and toothache. Useful counterirritant for visceral pain, febrile and inflammatory conditions; internally is gastrointestinal irritant. The plant taints the milk and meat of animals that graze on it and may also induce abortion. In some areas of tropical America it serves as a vampire repellent of unrecorded efficacy. Magic plant, ritual.)

in English: conga root, Congo root, Guinea-hen-weed, gully root

in Central and South America: amansa senhor, anamú, apacín, calauchín, carricillo silvestre, cashni-tlsú, chanviro, embaiendo, emboiando, erva de alho, erva de guiné, erva pipi, guiné, hierba de gallinitas, hierba de las gallinitas, ipacina, jupachumi, micura, mucará, mucura, mucura-caá, mucura hembra, mucura macho, mucuracaá, munuca-caá, mururacorá, niwis, ocoembo, pátham, payche, paychée, pipi, pipí, raiz de alho, raiz-de-guiné, rama de zorrillo, xpayché, zorrillo, zorrillo silvestre, zorro, zotzash

in Yoruba: ojuusaju

Petroselinum Hill Apiaceae (Umbelliferae)

Greek *petroselinon* ‘rock-parsley, parsley’, *petros* ‘a rock’ and *selinon* ‘parsley, celery’; Latin *petroselinum* or *petroselinon* ‘parsley’ (Plinius, Palladius Rutilius Taurus Aemilianus et al.); see John Hill (1716–1775), *The British Herbal*. 1(42): 424–425. London, 1756 and *Hand-List Herb. Pl. Kew*, ed. 3 122. 1925.

Petroselinum crispum (Mill.) Nyman ex A.W. Hill (*Apium crispum* Mill.; *Apium petroselinum* L.; *Carum petroselinum* (L.) Benth. & Hook. f.; *Petroselinum crispum* (Mill.) Mansf., nom. illeg.; *Petroselinum crispum* (Mill.) Nyman; *Petroselinum crispum* (Mill.) Fuss; *Petroselinum hortense* Hoffm.; *Petroselinum hortense* var. *crispum* L.H. Bailey; *Petroselinum petroselinum* (L.) H. Karst.; *Petroselinum sativum* Hoffm.; *Petroselinum vulgare* Lag.; *Selinum petroselinum* (L.) E.H.L. Krause)

Europe.

See *The British Herbal* 1(42): 424–425. 1756, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, *Flora Transsylvanicae*

Excursoria 254. 1866, *Conspectus florum europaeae: seu Enumeratio methodica plantarum phanerogamarum Europae indigenarum, indicatio distributionis geographicae singularum etc.* 2: 309. 1879 and *Repertorium Specierum Novarum Regni Vegetabilis* 46(1168–1170): 307. 1939

(Stem used for regulating fertility.)

in English: common garden parsley, garden parsley, parsley

in French: persil

in South Africa: pieterselie

in Japan: paseri

in Arabic: bagdouness, ma'adnous, maadnous

in Paraguay: perejil

Petunga DC. Rubiaceae

A Bengalese name for *Petunga roxburghii*, see *Bijdragen tot de flora van Nederlandsch Indië* 1007. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 398. 1830.

Petunga venulosa Hook. f. (*Hypobathrum venulosum* (Hook. f.) K.M. Wong)

India, Malay Peninsula.

See *The Flora of British India* 3: 121. 1880 and *Tree Flora of Malaya* 4: 355. 1989

(Roots poulticed for rheumatism.)

Malay name: umpong putih

Peucedanum L. Apiaceae (Umbelliferae)

Latin *peucedanum*, i 'hog's-fennel, sulphur-wort' (Plinius, M. Annaeus Lucanus), Greek *peukedanon*, *peukedanos*, applied by Theophrastus (*HP*. 9.14.1) to a bitter umbelliferous plant, sulphur-wort or hog's-fennel, perhaps from the Greek *peuke* 'a pine' and *danos* 'parched, burnt, dry', *peukedanos* 'bitter'; see Carl Linnaeus, *Species Plantarum*. 1: 245–246. 1753 and *Genera Plantarum*. Ed. 5. 116. 1754, *Handb. d. Gewachsk.* 449. 1827, *Genera Plantarum* 1: 919. 1867 and *Fl. de France* 7: 388. 1901, Gorovoi, Petr Grigor'evich (1936–), [*Umbellifers (family Umbelliferae Moris.) of the Primorye and Amur River Region: Systematic Survey, Geographical Distribution and Qualitative Chemical Composition*], Leningrad, 1966, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 223. Torino 1986, *Bull. Nanjing Bot. Gard. Mem. Sun Yat-Sen* 1988: 115. 1988, *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen* 1988–1989: 115. 1990.

Peucedanum anamallayense C.B. Clarke

India. Herbs with tuberous roots, pale yellow flowers in compound umbels, orbicular mericarps

See *Flora of British India* [J.D. Hooker] 2(6): 710. 1879

(Whole plant juice applied over forehead against fever for kids.)

in India: kaatu seerakam

Peucedanum dhana Wall. (*Peucedanum dhana* Buch.-Ham. ex C.B. Clarke; *Peucedanum dhana* Buch.-Ham.)

India.

See *Fl. Brit. India* [J.D. Hooker] 2(6): 709. 1879

(Root pounded with the root of *Glossogyne bidens* applied to cure rheumatic joint pain.)

Peucedanum dielsianum Fedde ex H. Wolff

China.

See *Species Plantarum* 1: 245–246. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 33(873–882): 246–247. 1933

(Stomachic.)

in China: zhu jie qian hu

Peucedanum formosanum Hayata (*Peucedanum terebinthaceum* subsp. *formosanum* (Hayata) Kitagawa)

China.

See *Species Plantarum* 1: 245–246. 1753, *Bulletin de la Société Impériale des Naturalistes de Moscou* 17(4): 743. 1844 and *Icon. Pl. Formos.* 10: 22–24, f. 13. 1921

(Rubefacient.)

in China: tai wan qian hu

Peucedanum grande C.B. Clarke

India. Young leaves edible

(Roots for stomachache.)

in India: baphli

Peucedanum kingii S. Watson (*Heracleum graveolens* (Benth.) S.M. Almeida; *Lomatium kingii* (S. Watson) Cronquist; *Peucedanum graveolens* Benth.; *Peucedanum graveolens* S. Watson, nom. illeg., non *Peucedanum graveolens* Benth.)

China.

See *Species Plantarum* 1: 245–246, 249–250. 1753, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 101. 1819, *Genera Plantarum* 1: 919. 1867, *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany*. Washington: Government Printing Office, 128–129. 1871, *Proceedings of the American Academy of Arts and Sciences* 22(2): 474. 1887 and *Great Basin Naturalist* 46(2): 254–255. 1986

(Emetic.)

Peucedanum ledebourielloides K.F. Fu

China.

See *Species Plantarum* 1: 245–246. 1753 and *Fl. Tsinling*. 1(3): 427, 463. 1981

(For constipation.)

in China: hua shan qian hu

Peucedanum medicum Dunn var. *medicum* (C.B. Clarke) Ridley

China.

See *Species Plantarum* 1: 245–246. 1753 and *J. Linn. Soc., Bot.* 35(247): 496–497. 1903

(Stomachic.)

in China: hua zhong qian hu

Peucedanum nagpureense Prain

India. Annual or perennial herb, greenish-yellow or white flowers

See *Bengal Pl.* 1: 540. 1903

(Root eaten as a general tonic, aphrodisiac, stomachic; root mixed with root of *Abelmoschus moschatus* given to increase semen.)

in India: bhojraj, tejraj, tejraj

Peucedanum praeruptorum Dunn

China. Herb, brown root

See *Species Plantarum* 1: 245–246. 1753 and *J. Linn. Soc., Bot.* 35(247): 497–498. 1903, *Newslett. Int. Organ. Pl. Biosyst. (Pruhonice)* 31: 13–16. 1999

(Roots aphrodisiac, also for colds, coughs, upper respiratory tract infection and fevers.)

in China: qian hu

Peucedanum terebinthaceum (Fischer ex Treviranus) Ledebour var. *terebinthaceum* (C.B. Clarke) Ridley (*Kitagawia baicalensis* (Redowsky ex Willd.) Pimenov; *Kitagawia terebinthacea* (Fischer ex Treviranus) Pimenov; *Peucedanum paishanense* Nakai; *Peucedanum terebinthaceum* (Fisch. ex Trevir.) Fisch. ex Turcz., nom. illeg., non *Peucedanum terebinthaceum* (Fisch. ex Trevir.) Ledeb.; *Peucedanum terebinthaceum* var. *paishanense* (Nakai) Y. Huei Huang; *Selinum terebinthaceum* Fischer ex Treviranus)

China.

See *Species Plantarum* 1: 245–246. 1753, *Ind. Sem. Hort. Vratisl. Append.* 3: 3. 1821, *Fl. Ross.* 2: 314. 1844, *Bulletin de la Société Impériale des Naturalistes de Moscou* 17(4): 743. 1844 and *Botanical Magazine* 31: 101. 1917, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 6: 277. 1977

(Febrifuge.)

in China: shi fang feng

Peucedanum turgeniifolium H. Wolff (*Peucedanum pulchrum* H. Wolff)

China.

See *Species Plantarum* 1: 245–246. 1753 and *Acta Horti Gothob.* 2(7): 323–325. 1926

(Stomachic, for cough.)

in China: chang qian hu

Peucedanum violaceum R.H. Shan & M.L. Sheh

China.

See *Species Plantarum* 1: 245–246. 1753 and *Acta Phytotax. Sin.* 18(3): 378. 1980

(For cold and flu.)

in China: zi jing qian hu

Peucedanum wawrae (H. Wolff) Su ex M.L. Sheh (*Peucedanum wawrae* (H. Wolff) Su ex M.L. Sheh in R.H. Shan & M.L. Sheh; *Peucedanum wawrae* (H. Wolff) Su; *Seseli wawrae* H. Wolff)

China.

See *Species Plantarum* 1: 245–246. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 315. 1930, *Fl. Reipubl. Popularis Sin.* 55(3): 149. 1992

(For skin diseases.)

in China: tai shan qian hu

Peumus Molina Monimiaceae

A native plant name in Chile.

Peumus boldus Molina (*Boldea boldus* (Molina) Looser; *Boldu boldus* (Molina) Lyons)

Latin America. Aromatic shrub or tree, greenish fruits

See *Saggio sulla Storia Naturale del Chili ...* 185, 350. 1782 and *Revista Universitaria. Santiago* 20: 572. 1935, *Pl. Syst. Evol.* 138: 157–173. 1981, *Gayana, Bot.* 42: 1–157. 1985, *Journal of Ethnopharmacology* 13(1): 89–103. 1985, *Pharmacological Research* 29(1): 1–12. 1994

(Leaves infusion carminative, antioxidant, diuretic, laxative, cholagogue, for kidney and liver problems.)

in Central America: boldo, limoncillo

in Chile: boldo

Pfaffia Mart. Amaranthaceae

Pfaffia tuberosa Hicken (*Gomphrena sericea* Moq.; *Gomphrena tuberosa* Moq.; *Pfaffia sericea* (Moq.) Kunth)

South America.

See *Genera Plantarum* 87. 1789, *Nova Genera et Species Plantarum* ... 2: 20. 1826 and *Apuntes de Historia Natural* 2: 93. 1910, *Fl. Il. Entre Ríos*. 6(3): 160–203, 251–291. 1987

(A fertilizing agent, roots are crushed and a cold maceration prepared for regulating fertility.)

Phacelia Juss. Hydrophyllaceae (Boraginaceae)

Greek *phakelos* ‘a cluster, bundle’, in reference to the flowers or to the inflorescence, see *Genera Plantarum* 129. 1789, *Florae Peruviana*, et *Chilensis Prodrum* 19. 1794, *Medical Repository*, ser. 2, 5: 352. 1808, *American monthly magazine and critical review* 3: 356. 1818, *Narrative of a Journey to the Shores of the Polar Sea* 764–765, pl. 27. 1823, *Prodrum Systematis Naturalis Regni Vegetabilis* 9: 292–293, 296. 1845, *London Journal of Botany* 5: 311–312, pl. 12. 1846, *Proceedings of the American Academy of Arts and Sciences* 10: 320–322, 326–327. 1875 and *Contributions from the Gray Herbarium of Harvard University* 168: 11. 1949.

Phacelia californica Cham. (*Phacelia magellanica* (Lam.) Coville fo. *californica* (Cham.) Brand; *Phacelia magellanica* var. *californica* (Cham.) Jeps. & L.H. Bailey)

North America. Perennial herb

See *Linnaea* 4(4): 494. 1829 and *University of California Publications in Botany* 4(13): 218. 1912, *A Flora of California* 3(2): 247, 249. 1943

(Febrifuge, stimulant, cough sedative, stomachic.)

in English: California phacelia

Phacelia campanularia A. Gray

North America.

See *Genera Plantarum* 129. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata ed. 13 2: 330. 1791, *Synoptical Flora of North America* 2(1): 164. 1878 and *University of California Publications in Botany* 28: 64. 1955, Munz, P.A. “Dermatitis produced by *Phacelia* (Hydrophyllaceae).” *Science* (Wash. D.C.), 76: 194. 1965, *Sida* 15: 649–653. 1993

(This plant causes a dermatitis very similar to poison-ivy dermatitis.)

in English: California bluebell

Phacelia crenulata Torr. ex S. Watson

North America. Annual herb

See *United States Geological Expolration* [sic] of the *Fortieth Parallel*. Vol. 5, *Botany* 251. 1871

(Veterinary medicine.)

in English: cleftleaf wild heliotrope

Phacelia crenulata Torr. ex S. Watson var. *corrugata* (A. Nelson) Brand (*Phacelia corrugata* A. Nelson)

North America. Annual herb

See *United States Geological Expolration* [sic] of the *Fortieth Parallel*. Vol. 5, *Botany* 251. 1871 and *Botanical Gazette* 34(1): 26–27. 1902, *Das Pflanzenreich* 59[IV,251]: 79. 1913

(Antirheumatic. Veterinary medicine.)

in English: cleftleaf wild heliotrope

Phacelia crenulata Torr. ex S. Watson var. *crenulata* (*Phacelia crenulata* Torr. ex S. Watson var. *funerea* J. Voss ex Munz; *Phacelia crenulata* Torr. ex S. Watson var. *vulgaris* Brand; *Phacelia intermedia* Woot. p.p.)

North America. Annual herb

See *United States Geological Expolration* [sic] of the *Fortieth Parallel*. Vol. 5, *Botany* 251. 1871 and *Sida* 15: 649–653. 1993

(Veterinary medicine.)

in English: cleftleaf wild heliotrope

Phacelia hastata Douglas ex Lehm.

North America. Perennial herb

See *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 20–21. 1830 and *Madroño* 36: 232–247. 1989

in English: silverleaf phacelia

Phacelia hastata Douglas ex Lehm. var. *hastata* (*Phacelia alpina* Rydb.; *Phacelia hastata* Douglas ex Lehm. subsp. *hastata*; *Phacelia hastata* Douglas ex Lehm. var. *alpina* (Rydb.) Cronquist; *Phacelia hastata* Douglas ex Lehm. var. *leucophylla* (Torr.) Cronquist; *Phacelia leucophylla* Torr.; *Phacelia leucophylla* Torr. var. *alpina* (Rydb.) Dundas; *Phacelia leucophylla* Torr. var. *suksdorfii* J.F. Macbr.; *Phacelia oreopola* Heckard subsp. *simulans* Heckard)

North America. Perennial herb

See *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 20–21. 1830 and *Mem. New York Bot. Gard.* 1: 324. 1900, *Univ. Calif. Publ. Bot.* 32(1): 48, tab. 7b. 1960, *Madroño* 36: 232–247. 1989

(Plant decoction taken for menstrual disorders.)

in English: silverleaf phacelia

Phacelia heterophylla Pursh (*Phacelia magellanica* (Lam.) Coville fo. *heterophylla* (Pursh) Brand; *Phacelia magellanica* fo. *robusta* Brand; *Phacelia magellanica* var. *heterophylla* (Pursh) Jeps.; *Phacelia magellanica* var. *heterophylla* (Kuntze) Kuntze)

North America. Biennial or perennial herb

See *Flora Americae Septentrionalis*; or, ... 1: 140. 1813 and *University of California Publications in Botany* 4(13): 218. 1912, *A Flora of California* 3(2): 246, 249. 1943

(Powdered dried plant made into a paste applied to fresh wounds, cuts, boils.)

in English: varileaf phacelia

Phacelia heterophylla Pursh subsp. ***heterophylla*** (*Phacelia heterophylla* Pursh var. *typica* Dundas; *Phacelia sericea* (Graham) A. Gray var. *biennis* (A. Nelson) Brand)

North America. Biennial or perennial herb

See *Flora Americae Septentrionalis*; or, ... 1: 140. 1813

(Powdered dried plant made into a paste applied to fresh wounds, cuts, boils.)

in English: varileaf phacelia

Phacelia linearis (Pursh) Holz. (*Hydrophyllum lineare* Pursh)

North America. Annual herb

See *Flora Americae Septentrionalis*; or, ... 1: 134. 1813, *Contributions from the United States National Herbarium* 3(4): 242. 1895 and *Syesis* 10: 125–138. 1977, *Sida* 12: 409–417. 1987

(Plant decoction for skin diseases.)

in English: threadleaf phacelia

Phacelia neomexicana Thurb. ex Torr. (*Phacelia glandulosa* Nutt. var. *neomexicana* (Thurb. ex Torr.) A. Gray; *Phacelia neomexicana* Thurb. ex Torr. var. *pseudoarizonica* (Brand) J. Voss)

North America. Annual herb

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 143. 1859, *Proceedings of the American Academy of Arts and Sciences* 10: 319. 1875

(Powdered root used for rashes.)

in English: New Mexico phacelia, New Mexico scorpionweed

Phacelia purshii Buckley (*Cosmanthus pectinatus* E. Mey.; *Phacelia bicknellii* Small; *Phacelia boykinii* (A. Gray) Small; *Phacelia ciliata* Raf. ex Brand, nom. nud.; *Phacelia fimbriata* var. *boykinii* A. Gray; *Polemonium ciliatum* Willd. ex Brand, nom. nud.)

North America. Annual herb

See *American Journal of Science, and Arts* 45(1): 171. 1843, *Annales des Sciences Naturelles; Botanique*, sér. 3 5: 366. 1846, *Proceedings of the American Academy of Arts and Sciences* 10: 320. 1875, *Bulletin of the Torrey Botanical Club* 25(3): 136, 141. 1898 and *Das Pflanzenreich* IV. 251: 62. 1913, *Contr. Gray Herb.* 168: 1–48. 1949

(Poultice of plant used for swollen joints.)

in English: Miami mist, scorpion weed

Phacelia ramosissima Douglas ex Lehm.

North America. Perennial subshrub, herb

See *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 21. 1830

(Emetic.)

in English: branching phacelia

Phacelia ramosissima Douglas ex Lehm. var. ***ramosissima***

North America. Perennial subshrub, herb, vegetable

See *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 21. 1830

(Stomachic, for colic, abdominal pain, gonorrhoea.)

in English: branching phacelia

Phaius Lour. Orchidaceae

Greek *phaios* ‘dark, grey, swarthy, shining, dusky’, referring to the flowers; see João (Joannes) de Loureiro (1717–1791), *Flora cochinchinensis*: sistens plantas in regno Cochinchina nascentes. 2: 517, 529. Ulyssipone [Lisboa] 1790.

Phaius tankervilleae (Banks ex L'Hér.) Blume (*Bletia tankervilleae* (Banks ex L'Hér.) R.Br.; *Bletia tankervilleae* R.Br.; *Bletia tankervilleae* (Banks) R.Br.; *Calanthe bachmaensis* Gagnep.; *Calanthe speciosa* Vieill., nom. illeg.; *Calanthe speciosa* Lindl.; *Dendrobium veratrifolium* Roxb.; *Dendrobium veratrifolium* Lindl.; *Limodorum incarvillei* Pers.; *Limodorum incarvillei* Blume; *Limodorum incarvilliae* Pers.; *Limodorum spectabile* Salisb.; *Limodorum tancarvilleae* L'Hérit.; *Limodorum tancarvilliae* L'Her.; *Limodorum tankervilleae* Banks ex L'Hér.; *Limodorum tankervilleae* Banks; *Limodorum tankervilliae* Banks; *Pachyne spectabilis* (Salisb.) Salisb.; *Pachyne spectabilis* Salisb.; *Phaius bicolor* Lindley; *Phaius blumei* Lindl.; *Phaius blumei* var. *assamica* Rchb.f.; *Phaius blumei* var. *pulchra* King & Pantl.; *Phaius carronii* F.Muell.; *Phaius giganteus* Hort. ex Hemsl.; *Phaius giganteus* Hemsl.; *Phaius grandifolius* Lindl., nom. inval.; *Phaius grandifolius* Lour.; *Phaius grandifolius* var. *superbus* Van Houtte; *Phaius grandiflorus* Rchb.f.; *Phaius incarvillei* (Pers.) Kuntze; *Phaius incarvillei* Kuntze; *Phaius incarvilliae* (Pers.) Kuntze; *Phaius leucophaeus* F.Muell.; *Phaius oweniae* Sander; *Phaius oweniae* Hort. Sander; *Phaius tankervilleae* (Banks) Blume; *Phaius tankervilleae* (L'Her.) Blume; *Phaius tankervilleae* f. *veronicae* S.Y. Hu & Barretto; *Phaius tankervilleae* var. *pulchra* (King & Pantl.) Karth.; *Phaius tankervilleae* var. *superbus* (Van Houtte) S.Y. Hu; *Phaius tankervilliae* (L'Hérit.) Blume; *Phaius tankervilliae* (Banks ex L'Hér.) Blume; *Phaius veratrifolius* (Roxb.) Lindl.; *Phaius veratrifolius* Lindl.; *Phaius wallichii* Lindl.; *Phaius wallichii* Hook.f.; *Tankervillia cantoniensis* Link) (for the English plant collector Lady Tankerville (Tankerville), d. 1836, wife of Charles, Earl of Tankerville; see Arthur D. Chapman, ed., *Australian Plant Name Index*. 2229. Canberra 1991)

Trop. & Subtrop. Asia to S. Pacific. Pale blue flower

See *Sertum Anglicum* 28. 1789, *Hortus Kew.* 3: 302 (t. 12). 1789, *Fl. Cochinch.* 2: 529. 1790, *Prodr. Stirp. Chap. Allerton* 9. 1796, *Syn. Pl.* (Persoon) 2(2): 520. 1807, *Hortus Kew.* (W.T. Aiton), ed. 2. 5: 205. 1813, *Bijdr. Fl. Ned. Ind.* 8: 374. 1825, *Numer. List* [Wallich] n. 3746, 3747. 1831, *Gen. Sp. Orchid. Pl.* 127, 128. 1831, *Gen. Sp. Orchid. Pl.* 250. 1833, *London J. Bot.* 2: 236. 1843, *Museum Botanicum Lugduno-Batavum* 2(9–12): 177. 1856, *Ann. Sci. Nat., Bot.* sér. 4, 16: 44. 1862, *Fragm.* (Mueller) 4(30): 163. 1864, *Revis. Gen. Pl.* 2: 675. 1891, *Ann. Roy. Bot. Gard. (Calcutta)* 8: 109. 1898 and *Bull. Mus. Natl. Hist. Nat.* sér. 2, 22: 509. 1950, *Quart. J. Taiwan Mus.* 27: 464. 1974, *Chung Chi J.* 13(2): 25. 1976, *Fl. Ind. Enumerat. - Monocot.* 163. 1989

(Flowers heated and eaten by women to increase the fertility.)

in English: Chinese ground orchid, northern swamp orchid, nun's hood, nun's orchid, swamp lily orchid

in Japan: kaku-ran

Malay name: tubuh ulat

in Okinawa: chiru-ran, sarunkwa-bana

in Papua New Guinea: kongimongo

in Thailand: ueang phrao, chat pra inn

Phalaris L. Poaceae (Gramineae)

Greek *phalaris*, *phaleris*, used by Dioscorides for a kind of grass, ribbon grass, canary grass; *phalaros* 'having a patch of white, crested', *phalos* 'shining, bright, white, a part of the helmet'; Latin *phalaris* or *phaleris*, *idis* for the plant canary-grass; see Carl Linnaeus, *Species Plantarum*. 54. 1753 and *Genera Plantarum*. Ed. 5. 29. 1754, *Genera Plantarum* 11. 1776, *Methodus Plantas Horti Botanici ...* 201. 1794, *Flora der Wetterau* 1: 43, 96. 1799, *Fundamenta Agrostographiae* 127. 1820 [Jan], *Bulletin Botanique [Genève]* 1: 220. 1830, *Étude des Fleurs*, éd. 8, 2: 900. 1889 and *Iowa State College Journal of Science* 36(1): 1–96. 1961, *Taxon* 40(3): 475–485. 1991, *Taxon* 41: 567. 1992, *Flora Mesoamericana* 6: 236–237. 1994, *Webbia* 49(2): 265–329. 1995, *Taxon* 44: 611–612. 1995, *Am. Circumboreal, temperate Eurasia, North America. Perennial or annual, tall, tufted, sod forming, herbaceous, semi-aquatic, highly variable species often densely colonial, erect or geniculate, very robust and sturdy, smooth, sometimes rooting at the lower nodes, rhizomatous with long creeping rhizomes, spreads by seeds or by creeping rhizomes, extremely aggressive and very vigorous weed, groundcover, ornamental, invasive tendency, hay, cultivated fodder, a serious weed along irrigation banks and ditches, used for erosion control and to revegetate strip mine spoils, good for streambank stabilization, excellent for rehabilitating waterways

Phaleria Jack Thymelaeaceae

Greek *phalaros* 'having a patch of white', *phalos* 'shining, bright, white', referring to the flowers; see William Jack (1795–1822), in *Malayan miscellanies*. 2(7): 59. Bencoolen 1822, *Sylloge Plantarum Novarum* 2: 15. 1828[1825], *Der Deutsche Botaniker Herbarienbuch* 65. 1841, *Plantarum vascularium genera secundum ordines ...* tab. diagn. 323, comm. 241. 1841, *Annales des Sciences Naturelles; Botanique, sér. 2*, 19: 40–41. 1843, *London Journal of Botany* 2: 231–232. 1843 and *Contributions from the Arnold Arboretum of Harvard University* 4: 74–75. 1933, *Fl. Vit. Nova* 2: 576–592. 1981, *Rev. Handb. Fl. Ceylon* 2: 501–511. 1981, *Fl. Australia* 18: 122–214, 323–325. 1990, *Austrobaileya* 6(1): 95. 2001, *Tree Fl. Sabah & Sarawak* 5: 433–484. 2004.

Phaleria biflora (C.T. White) B.E. Herber (*Oreodendron biflorum* C.T. White)

SE Asia.

See *Malayan Miscellanies* 2(7): 59. 1822 and *Contributions from the Arnold Arboretum of Harvard University* 4: 74–75, pl. 9. 1933, *Austrobaileya* 6(1): 96. 2001

(Bark and roots to stop bleeding, for wounds.)

Phaleria capitata Jack (*Dais dubiosa* Blume; *Dais dubiosa* Decne., nom. illeg.; *Drimyspermum blumei* Decne.; *Drimyspermum cauliflorum* Thwaites; *Drimyspermum phaleria* Meisn.; *Drimyspermum urens* Reinw.; *Phaleria blumei* (Decne.) Benth.; *Phaleria cauliflora* (Thwaites) Bedd.;

Phaleria cumingii (Meisn.) Fern.-Vill.; *Phaleria dubiosa* (Blume) Zoll.; *Phaleria urens* (Reinw.) Koord.)

SE Asia, New Guinea, Palau, Micronesia. Treelet or shrub, cauliflorous, white flowers

See *Malayan Miscellanies* 2(7): 59–60. 1822, *Catalogus ...* 69. 1823, *Sylloge Plantarum Novarum* 2: 15. 1828[1825], *Nouvelles Annales du Museum d'Histoire Naturelle* 3: 369. 1834, *Annales des Sciences Naturelles; Botanique, sér. 2*, 19: 39. 1843, *Natuur- en Geneeskundig Archief voor Nederlandsch-Indie* 1: 616. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(2): 604. 1857, *Enumeratio Plantarum Zeylanicae* 4: 251. 1864[1861], *The Flora Sylvatica for Southern India* 180. 1873, *Flora Australiensis: a description ...* 6: 38. 1873, *Mededeelingen uit 's Lands Plantentuin* 19: 577. 1898 and *J. Arnold Arbor.* 33: 207. 1952, *Rev. Handb. Fl. Ceylon* 2: 501–511. 1981, *Tree Fl. Sabah & Sarawak* 5: 433–484. 2004, *Natural Med.*, 58: 278–283. 2004, *Biological & Pharmaceutical Bulletin* 28(5): 929–933. 2005

(The extract of Ongael [leaves of *Phaleria cumingii* (Meisn.) Fern.-Vill.], enhanced an in vitro phagocytic activity of mouse macrophages RAW 264.7 cells (RAW 264.7).)

Phaleria disperma (G. Forster) Baillon (*Dais disperma* G. Forst.; *Drimyspermum billardieri* Decne.; *Drimyspermum burnnettianum* (Benth.) Seem.; *Drimyspermum forsteri* Meisn.; *Leucosmia burnnettiana* Benth.; *Leucosmia ovata* Decne.; *Phaleria burnnettiana* (Benth.) Knuth)

Australia.

See *Florulae Insularum Australium Prodromus* 33. 1786, *London Journal of Botany* 2: 231–232. 1843, Du Petit-Thouars, Abel Aubert, *Voyage autour du monde sur le frégate la Vénus: pendant les années 1836–1839/publié par ordre du Roi, sous les auspices du Ministre de la marine, par M. Abel du Petit-Thouars, capitaine de vaisseau, ...* [Botanique, par M.J. Decaisne (1807–1882)], Paris: Gide et cie, 1846, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(2): 605. 1857, *Flora Vitiensis* 208. 1867, *Adansonia* 11: 318. 1875 and *Handbuch der Blütenbiologie* 3: 552. 1904

(Sedative.)

Phaleria macrocarpa (Scheff.) Boerl. (*Drimyspermum macrocarpum* Scheff.; *Phaleria calantha* Gilg; *Phaleria papuana* Warb. ex K. Schum. & Lauterb.; *Phaleria papuana* Warb. ex K. Schum. & Lauterb. var. *wichmannii* (Valeton) Backer; *Phaleria wichmannii* Valeton)

Indonesia, Papua. Dense evergreen tree

See *Annales du Jardin Botanique de Buitenzorg* 1: 46–47. 1876 and *Handleiding tot de Kennis der Flora van Nederlandsch Indië* 3: 111. 1900, *Die Flora der Deutschen Schutzgebiete in der Südsee* 460. 1901, *Nova Guinea, Botany* 8(2): 411–412. 1910, *Icones Bogorienses* 4(3): 221–222, pl. 371. 1913, *Beknopte Flora van Java* (Nood Unitgave) 4a(2, fam. 77): 2. 1942, *Fl. Malesiana, Ser. 1, Spermatoph.* 6: 23. 1960, *International Journal of Oncology* 30: 605–613. 2007,

Journal of Experimental Therapeutics & Oncology 8(3): 187–201. 2010

(Eating raw fruit is not recommended because it causes swelling, bruising, and ulcers in the mouth, even unconscious poisoning; seeds are very poisonous. Anticancer, antiproliferative, antioxidant, antiinflammatory, and anti-angiogenic, fruit, seed, and leaf extracts used for malignant diseases, for the prevention and/or treatment of breast cancer. Used in conjunction with other herbs to treat diabetes, hypertension, and liver disorders; its use is still limited as externally, applied to skin diseases, itching, scabies, and eczema.)

in English: crown god, God's crown

in Indonesia: made, mahkota dewa (= The name given to this fruit implies that it descends from heaven, as a benediction from divinity to help mankind.)

Phanerophlebia C. Presl **Dryopteridaceae (Aspleniaceae)**

The generic name is based on Greek *phaneros* 'evident, shining, manifest' and *phleps, phlebos* 'vein', see *Tentamen Pteridographiae* 84–85, 184, 186, pl. 2, f. 19. 1836, *Index Filicum* lxxxii. 1857.

Phanerophlebia caryotideae (Wall. ex Hook. & Grev.) Copel. (*Aspidium caryotideum* Wall. ex Hook. & Grev.; *Aspidium caryotideum* Wall.; *Aspidium falcatum* var. *caryotideum* (Wall. ex Hook. & Grev.) Baker; *Cyrtomium caryotideum* C. (Used in Ayurveda. Toxins. Raw beans poisonous, highly toxic, may be fatal if eaten, mature seeds contain a cyanogenic glycoside; usually cooked and eaten, but in excess may cause headache, vomiting, purging, dysentery. Seeds and leaves astringent, antifungal, antiparasitic, antibacterial, anti-proliferative, hypolipidemic, cough sedative.)

in English: broad bean, Burma bean, butter bean, Carolina bean, civet bean, common bean, common haricot, dwarf bean, French bean, garden bean, green bean, haricot bean, Java bean, kidney bean, Lima bean, Madagascar bean, Rangoon bean, runner bean, sieva bean, string bean, white Burma

in Paraguay: cugué

in India: aksipidaka, bakla, bonchi, bonchi-kai, dabbale, dambala, dara-dambala, kaci-k-kollu, kaisam bali-pati, kalandri, loba, lobia, pothu-dambala, potu-bonchi, rajmah, sem, vilayti sem

in Indonesia: Java bean, kratok

in Japan: aoi-mame

in Malaysia: kacang china, kacang jawa, kacang china, kacang serendeng, kekara kratok

in Philippines: bulai-patani, buni, buringi, butingi, gulipatan, haba, habichuela, kilkilang, kopani, kutakut, palpadi, parda, patani, perkoles, puida, sibatse simaron, zabachein Thailand: thua rachamat

in Vietnam: dâu ngu

in Madagascar: haricot de Madagascar, kabaro, kalamaka, konoka, maimbolany

in Yoruba: eree, awuje, ewuje, ewa, ewe, popondo, kokondo, sese, ewe

in Zambia: chinkamba

***Phaseolus vulgaris* L.** (*Phaseolus aborigineus* Burkart; *Phaseolus aborigineus* var. *hondurensis* Burkart; *Phaseolus communis* Pritz.; *Phaseolus compressus* DC.; *Phaseolus esculentus* Salisb.; *Phaseolus nanus* L. & Jusl.; *Phaseolus vulgaris* Wall.; *Phaseolus vulgaris* subsp. *aborigineus* (Burkart) Burkart & H. Bruecher; *Phaseolus vulgaris* var. *aborigineus* (Burkart) Baudet)

Americas. Herb, twining, erect, procumbent, climbing, non-climbing, a source of proteins

See *Species Plantarum* 2: 723–725. 1753, *Prodr. Stirp. Chap. Allerton* 335. 1796, *A Numerical List of Dried Specimens* n. 5595. 1831–1832, *Iconum Botanicarum Index* 832. 1855 and *Kew Bulletin, Addit. in Indonesia: buncis

in Laos: thwàx fàlangx

in Malaysia: kacang buncis, kacang merah

in Nepal: asare simi

in Pakistan: loba fasoulia

in the Philippines: butingi, mula

in Thailand: thua khaek, thua phum

in Vietnam: dâu ve

Phaulopsis Willd. Acanthaceae

From the Greek *phaulos* 'slight, easy, cheap, simple, ordinary' and *opsis* 'appearance', see Wendland, Johann Christoph (1755–1828), *Botanische Beobachtungen nebst einigen neuen Gattungen und Arten*. Hannover: Bey den Gebrüderm Hahn, 1798, *Species Plantarum*. Editio quarta [Willdenow] 3: 4, 342. 1800, *Prodromus Florae Novae Hollandiae* 478. 1810, *Prodr.* (DC.) 11: 262. 1847, *Bull. Mens. Soc. Linn. Paris* 821. 1890, *Histoire des Plantes* 10: 432. 1891, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 305. 1897 and *Symb. Bot. Upsal.* 31(2): 1–184. 1996.

Phaulopsis falcisepala C.B. Clarke

Tropical Africa. Herb, weak undershrub, weed, erect or decumbent, small white corollas, compact inflorescence

See *Flora of Tropical Africa* [Oliver et al.] 5(1): 84. 1899

(Powdered plant for wounds, small sores, a decoction as children's fever medicine. Fruits and leaves for toothache and wound dressing.)

Phaulothamnus A. Gray
Achatocarpaceae (Phytolaccaceae)

Greek *phaulos* 'slight, easy, simple' and *thamnus* 'shrub', see *Annales des Sciences Naturelles; Botanique*, série 4 9: 45. 1858, *Proceedings of the American Academy of Arts and Sciences* 20: 293–294. 1885 and *Die natürlichen Pflanzenfamilien*, Zweite Auflage 16c: 174. 1934.

Phaulothamnus spinescens A. Gray

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 20: 294. 1885

(Inner bark burned, the blackened area scraped, water added and the liquid used as eye drops to improve eyesight.)

Phebalium Ventenat Rutaceae

Possibly from a Greek poetic name for the myrtle (*Myrtus communis* L.), or from *phibaleos* (Phibalis was a district of Attica or Megaris), used for a kind of early fig, or from *phoibos* 'radiant, Phoebus, bright' and *eileo* 'to sun', *eile* 'warmth, the sun's warmth'; see Ventenat, Étienne Pierre (1757–1808), *Jardin de la Malmaison*. 2: 102, t. 102. Paris, 1803–1804, *The Plants Indigenous to the Colony of Victoria* 1: 125. 1862 and Wilson, Paul Graham (1928–), "A taxonomic revision of the genera *Crowea*, *Eriostemon* and *Phebalium* (Rutaceae)." *Nuytsia*. 1(1): 6–155. 1970, *Nuytsia* 12(2): 270–271. 1998.

Phebalium argenteum Sm.

Australia.

See Rees, Abraham (1743–1825), *The cyclopaedia: or, Universal dictionary of arts, sciences, and literature/by Abraham Rees ... with the assistance of eminent professional gentlemen ...* London: Longman, Hurst, Rees, Orme & Brown [etc.], 1819 etc.

(Blister plant, vesication when and if the leaves are handled.)

Phebalium nudum Hook. (*Leonema nudum* (Hook.) Paul G. Wilson)

New Zealand. Aromatic shrub or small tree, slender, small white starry flowers sweetly scented

See *Icones Plantarum* 6: t. 568. 1843 and *Nuytsia* 12(2): 275. 1998

Phaulothamnus A. Gray Achatocarpaceae (Phytolaccaceae)

(Maori people rubbed their bodies with young branches.)

Maori name: mairehau, maireire

Phedimus Raf. Crassulaceae

From the Greek *phaidos* 'thrifty, sparing'; or from *phaidimos*, a personal epithet used of male warriors; it may also be related to words such as *phaos* and *phaino*, which have associations with light; words believed to share a common etymology with *phaidimos*—for example, *phaidropos*, *phaidronous*, and *phaidruno*—potentially allow one to infer a sense of "notability"; or for Phaidimos, archaic Greek sculptor known from remains of the Phyle. See Carl Linnaeus, *Species Plantarum*. 1: 430–431. 1753, *Genera Plantarum*. Ed. 5. 197. 1754, Constantine Samuel Rafinesque (1783–1840), *Anal. Nat. Tabl. Univ.* 174. 1815, *American monthly magazine and critical review* 1(6): 438–439. 1817, *Florula ludoviciana*. 168. New York 1817, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 806. Ansbach 1852, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 3(2a): 30. 1890 and E.D. Merrill, *Index Rafinesquianus*. 133. Massachusetts, USA 1949, *Komarov Lectures*. 20: 47–61. 1973, *Evolution and Systematics of the Crassulaceae* 159–172. 1995, *Bot. Žurn.* (Moscow & Leningrad). 80(3): 85–88. 1995, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 574. Basel 1996, *Novon* 10(4): 401. 2000.

Phedimus aizoon (Linnaeus) 't Hart (*Aizopsis aizoon* (Linnaeus) Grulich; *Aizopsis ellacombeana* (Praeger) P.V. Heath; *Anacampteros aizoon* (L.) Clausen; *Sedum pseudoaizoon* Debeaux; *Sedum selskianum* Regel & Maack var. *glaberrimum* Kitagawa; *Sedum selskianum* var. *glabrifolium* Kitagawa; *Sedum yantaiense* Debeaux)

China, Russia. Perennial herbs, tuberous roots, inflorescence horizontally branched, yellow petals

See *Sp. Pl.* 1: 430–431. 1753, *Synopsis plantarum succulentarum ...* 112. 1812, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 3(2a): 30. 1890 and *Journal of Botany, British and Foreign* 55(650): 41–42. 1917, *Sedum of North America North of the Mexican Plateau* 553–554, 566. 1975, *Novon* 10(4): 401. 2000, *Calyx* 4(5): 172. 2001

(Stomach upset if large quantities of this plant eaten. Dried whole plant used as hemostat.)

in English: Orpin aizoon

in China: fei cai

Phedimus floriferus (Praeger) 't Hart (*Phedimus florifer* (Praeger) 't Hart; *Sedum floriferum* Praeger)

China. Perennial herbs, ascending, inflorescences terminal and axillary, yellow petals

See *Journal of Botany, British and Foreign* 56: 149. 1918

(For skin diseases, warts.)

in China: duo hua fei cai

Phedimus odontophyllus (Fröderström) 't Hart (*Aizopsis odontophylla* (Fröderström) Grulich; *Sedum odontophyllum* Fröderström)

China. Perennial herbs, ascending flowering stems rooting at base, yellow petals

See *Acta Horti Gothoburgensis* 7: 117. 1932, *Preslia* 56(1): 35–37, f. 2, 3 [map]. 1984

(For boils.)

in China: chi ye fei cai

Phegopteris (C. Presl) Fée Thelypteridaceae

Greek *phegos* 'oak' (Theophrastus, *HP*. 3.3.1) and *pteris* 'fern'; see *Icones Plantarum* 3, 45–48, t. 11, 13. 1763, *Genera Plantarum* 2: 757. 1791, *Tentamen Pteridographiae* 179. 1836, Antoine Laurent Apollinaire Fée (1789–1874), *Mémoires sur la famille des Fougères. Genera Filicum*. 5: 242–243. 1852, *Histoire des Fougères et des Lycopodiaceés des Antilles* 58. 1866, *Cryptogames Vasculaires ... du Brésil* 2: 40. 1873 and *Nova Flora Japonica* 4: 152. 1939, *Journal of Japanese Botany* 24: 8. 1949, *Journal of the Washington Academy of Sciences* 48: 234. 1958, *American Fern Journal* 51: 31. 1961, *American Fern Journal* 53(4): 154. 1963, *Phytologia* 17(4): 254. 1968, *Webbia* 24: 709. 1970.

Phegopteris auriculata J. Sm. (*Cyclogramma auriculata* (J. Sm.) Ching; *Cyclosorus auriculata* (J. Sm.) C.M. Kuo; *Dryopteris auriculata* (J. Sm.) Ching; *Polypodium auriculatum* Wall. ex Hook.; *Polypodium auriculatum* L.; *Thelypteris auriculata* (J. Sm.) K. Iwats.)

India. Dried leaves pounded and used for fermentation of apong, rice beer

See *Species Plantarum* 2: 1071–1072, 1088. 1753, *Icones Plantarum* 3, 45–48, t. 11, 13. 1763, *Species Filicum* 4: 237. 1863, *Historia Filicum* 233. 1875 and *Bulletin of the Fan Memorial Institute of Biology* 2(2): 196. 1931, *Acta Phytotaxonomica et Geobotanica* 7(1): 52–53. 1938, *Acta Phytotaxonomica et Geobotanica* 19(1): 11. 1961, *Acta Phytotaxonomica Sinica* 8(4): 317. 1963, *Fern Gazette* 11(2–3): 141–162. 1975, *Taiwania* 47(2): 171. 2002

(Leaves and fronds heated and applied for relief from body pain and aches and to cure swelling and inflammation. Crushed leaves mixed with sand and used as a fish poison.)

in India: rabdak

Phellodendron Rupr. Rutaceae

Cork trees, from the Greek *phellos* 'cork' and *dendron* 'tree', an allusion to the corky bark, see *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 15(23): 353–354. 1857.

Phellodendron amurense Rupr.

Russia, Japan, Korea, China. Tree, deciduous, corky bark, branchlets brown to brownish-green, opposite leaves papery dark green above, petiole white hairy, inflorescence pubescent, flowers dioecious yellowish-green, oval drupe green to reddish-green, in mountains

See *Plant Systematics and Evolution* 146: 13–30. 1984, *Botaniceskij Žurnal SSSR* 69: 1565–1566. 1984, *Botaniceskij Žurnal SSSR* 71: 1572–1575. 1986, *Acta Botanica Austro Sinica* 5: 161–176. 1989

(Antibacterial, cholagogue, diuretic, expectorant, hypoglycaemic, ophthalmic, stomachic, vasodilator. Fruit used as expectorant. Bark a skin disinfectant and an astringent, also for diarrhea, leucorrhea, skin diseases, eczema, genitourinary tract infection, arthralgia. Fruit toxic to mosquito larvae, house flies and codling moth larvae.)

in English: Amur cork-tree, Siberian cork-tree

in China: huang bai, huang bo, huang po, po mu

in Japan: sikerpe, sikerpe-ni

in Vietnam: hoang ba

Phellodendron chinense C.K. Schneid.

E. Asia, China. Tree, aromatic leaves

See *The Gardeners Dictionary*: ... eighth edition no. 2. 1768 and *Illustriertes Handbuch der Laubholzkunde* 2: 126, f. 79c. 1907, *J. Agric. Sci. (Tokyo)* 8: 49–62. 1962, *Rhodora* 82: 475–481. 1980, *Cytologia* 47: 665–681. 1982, *Plant Systematics and Evolution* 146: 13–30. 1984, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 23–24. 1997

(Bark antibacterial, astringent, cholagogue, febrifuge, aphrodisiac, diuretic, expectorant, antirheumatic, hypoglycemic, ophthalmic, stomachic, vasodilator. A mixture of the leaves of *Indigofera suffruticosa*, *Indigofera tinctoria* L., the bark of *Phellodendron chinense* C.K. Schneider and pig bile used against scrofula.)

in English: Amur cork tree, Chinese cork tree

in China: chuan huang bo

Phenax Wedd. Urticaceae

From the Greek *phenake* 'false hair', *phenax*, *phenakos* 'cheat, impostor'.

Phenax rugosus (Poir.) Wedd. (*Boehmeria ballotaefolia* Kunth; *Phenax ballotaefolius* (Kunth) Wedd.; *Phenax rugosus* var. *minor* Wedd.; *Procris rugosa* Poir.)

South America.

See *Encyclopédie Méthodique, Botanique* 5: 628. 1804, *Annales des Sciences Naturelles; Botanique*, série 4 1: 191–192. 1854, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 235(38). 1869

(A snakebite cure.)

Philenoptera Hochst. ex A. Rich. Fabaceae (Leguminosae, Millettieae)

From Greek *philenos* ‘traceable’ and *pteros* ‘wing’, the wing makes the pod manageable for dispersal.)

Philenoptera cyanescens (Schumach. & Thonn.) Roberty (*Lonchocarpus cyanescens* (Schumach. & Thonn.) Benth.; *Robinia cyanescens* Schumach. & Thonn.)

Tropical Africa, Ghana. Perennial non-climbing shrub, scrambling shrub or small tree, winding branches, liana, woody climber, living part of the wood bleeding red, leaves papery pale green below, flowers sweet scented, petals white at start except for purple apex of the wings, later all petals more or less dark blue, calyx green with blue dots, pods yellow-green and wrinkled, more or less transparent

See *Species Plantarum* 2: 722–723. 1753, *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824, *Beskrivelse af Guineiske planter* 351. 1827, *Tentamen Florae Abyssinicae ...* 1: 232. 1847, *Journal of the Linnean Society, Botany* 4(Suppl.): 96. 1860 and *Bull. Inst. Franc. Afr. Noire*, Sér. A 16: 354. 1954, *A Revised Handbook of the Flora of Ceylon* 7: 108–381. 1991, *Kew Bull.* 55: 81–94. 2000, *Journal of Ethnopharmacology* 115: 387–408. 2008

(Whole plant and roots used externally for inflammation and venereal diseases. Roots for leprosy, skin and venereal diseases, rheumatism; decoction of leafy twigs and roots given to women during or after childbirth and also taken as an aphrodisiac, to treat arthritic conditions, venereal diseases and diarrhea. Embrocation for sprains, leaves used as a poultice for ulcers and for skin diseases; leaf sap drunk against intestinal disorders and dysentery. Leaves and bark laxative, astringent, for leprosy, diarrhea. Insecticide.)

in English: African indigo, big leaf indigo, indigo vine, local indigo, West African indigo, West African wild indigo, Yoruba indigo, Yoruba wild indigo

African names: adzudzu, akase, anunu, avantime, dwira, ebelu, mukabote, muteli, suru, talaki, talakiri, wee-chu

in Burkina-Faso: garga

in Ivory Coast: gara, gra

in Liberia: blu, big leaf indigo, wee-chu

in Nigeria: awa, elu, elu aredudu, elugbawuro, njassi, obele ilu, ochumchu, ojere ilu

in Senegal: gara, karoba, kisos, mogo kolo

in Togo: ahoti, kina

Philodendron Schott Araceae

Greek *philos* ‘loving’ and *dendron* ‘tree’, referring to the climbing habit; see *Wiener Z. Kunst* 1829(3): 780. 1829, *Linnaea* 6(Lit.): 53. 1831, *Meletemata Botanica* 1: 19–20. 1832, *Flora Telluriana* 3: 66. 1836[1837], Schott, H. W. (Heinrich Wilhelm) (1794–1865), *Synopsis aroidearum* complectens enumerationem systematicam generum et specierum hujus ordinis. Vindobonae, 1856, *Bonplandia* (Hanover) 7: 31. 1859, *Prodr. Syst. Aroid.* 255, 269. 1860, *Oesterreichische Botanische Zeitschrift* 15: 34. 1865, *Nomenclature Botanique* 2(1): 674. 1874, *Flora Brasiliensis* (Martius) 3(2): 133–134, 137–139, 141, 143–145. 1878, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 510, 553. 1899, *Bot. Gard.* 84(3): 330–331, 333–335. 1997, Croat, T.B. “A revision of *Philodendron* subgenus *Philodendron* (Araceae) for Mexico and Central America.” *Annals of the Missouri Botanical Garden* 84(3): 311–704. 1997, Govaerts, R. & Frodin, D.G. *World Checklist and Bibliography of Araceae (and Acoraceae)*. Kew. 2002, *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 59–200. 2003, *Kew Bull.* 60(4): 469 (511). 2006 [2005 publ. 2006]. *Philodendrons* can cause poisoning in humans and pets because of the oxalates. Some species are irritant, and some can sensitise, reported to cause dermatitis.

Philodendron anisotomum Schott

Mexico to Central America.

See *Oesterr. Bot. Z.* 8: 179. 1858

(Reported to be irritant.)

Philodendron bipinnatifidum Schott ex Endl. (*Arum pinnatifidum* Jacq.; *Arum pinnatifidum* Vell., nom. illeg.; *Philodendron bipinnatifidum* Schott; *Philodendron bipinnatifidum* var. *lundii* (Warm.) Engl.; *Philodendron lundii* Warm.; *Philodendron mello-barretoanum* Burle-Marx ex G.M. Barroso; *Philodendron pygmaeum* Chodat & Vischer; *Philodendron selloum* K. Koch, nom. nud.; *Philodendron selloum* var. *lundii* (Warm.) Engl.; *Sphinctrostigma*

bipinnatifidum (Schott ex Endl.) Schott, nom. inval.; *Sphincterostigma bipinnatifidum* Schott, nom illeg.)

Brazil to Argentina. Strong aerial roots, berries relished by monkeys and bats

See *Species Plantarum* 2: 964. 1753, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 31. 1797, *Meletemata Botanica* 1: 20. 1832, *Genera Plantarum* 1(3): 237. 1837, *Botanische Zeitung. Ibér.* 30–31: 161–188. 1979, *Flora del Paraguay* [11:] 1–46. 1988, *Kew Bulletin* 46(4): 601–681. 1991, *J. Ethnopharmacol.* 71(1–2): 101–107. 2000

(Irritating crystals of calcium oxalate; reported to have caused dermatitis, crystals are not poisonous. Roots drastic. Leaves and stem have a caustic juice which is a remedy for orchitis, rheumatism and ulcers. Antiprotozoal activity, vermifuge, the seeds are reputed to be anthelmintic.)

in Brazil: fruto de imbe, imbe de comer

in Paraguay: guembepi

Philodendron consanguineum Schott (*Philodendron angustatum* Schott; *Philodendron fuertesii* K. Krause; *Philodendron krebsii* Schott; *Philodendron marginatum* Urb.; *Philodendron urbanianum* K. Krause; *Philodendron wrightii* Griseb.)

Caribbean.

See *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis.* I 88. 1856 and *Symb. Antill.* 7: 172. 1912

(Abortifacient. The very caustic juice of the aerial parts of the plant utilized for contusions and as a cauterizing agent. The decoction of the leaves, stems and roots extensively used for expelling intestinal worms. Contact dermatitis.)

in Cuba: bejuco de lombriz, macusey, macusey macho

Philodendron cordatum Kunth ex Schott (*Arum cordatum* Vell.; *Philodendron apparicioi* G.M. Barroso; *Philodendron cordatum* Kunth)

SE Brazil.

See *Species Plantarum* 2: 964. 1753, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 780. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 52. 1841, *Prodr. Syst. Aroid.* 268. 1860, *Arquivos do Museu Nacional do Rio de Janeiro* 5(1–4): 387. 1881 and *Arch. Jard. Bot. Rio de Janeiro* 15: 92. 1957

(The leaf juice from this species, after mixing with soft soap, used to treat eczema, dry scaly eczema and to treat skin diseases of animals.)

Vernacular name: philodendron, folha de fonte

Philodendron craspedodromum R.E. Schult.

Colombia.

See *Rhodora* 66: 118. 1964

(Leaves utilized as a fish poison.)

Philodendron dyscarpium R.E. Schult.

Colombia, Venezuela.

See *Lloydia* 26: 69. 1963

(Oral contraceptive, the dried pulverized inflorescence added to the food of women.)

Philodendron fragrantissimum (Hook.) G. Don (*Caladium fragrantissimum* Hook.; *Philodendron fragrantissimum* (Hook.) Kunth)

Guyana, Brazil. Epiphytic or climbing, scandent

See *Botanical Magazine* 61: t. 3314. 1834, *Hortus Britannicus* 632. 1839, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 49. 1841

(Some toxic effects. Aerial parts decoction demulcent, diuretic. For rheumatism, leaves warmed and tied over the affected area, reducing inflammation and relieving pain.)

in Guyana: bucuruna

Philodendron hastatum K. Koch & Sello (*Philodendron disparile* Schott; *Philodendron elongatum* Engl.; *Philodendron hastatum* Engl.; *Philodendron hastatum* Schott; *Philodendron hastifolium* Regel; *Philodendron simsii* K. Koch, nom. illeg.)

Brazil.

See *Synopsis Aroidearum.* I 101. 1856 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 133. 1905

(Irritating crystals of calcium oxalate, crystals are not poisonous.)

Philodendron hederaceum (Jacq.) Schott (*Arum hederaceum* Jacq.; *Pothos hederaceus* (Jacq.) Aubl.)

Mexico to Trop. America.

See *Hist. Pl. Guiane* 2: 840. 1775, *Wiener Z. Kunst* 3: 780. 1829

(Plant toxic, the juice was used by black poisoners.)

Philodendron imbe Schott ex Endl.

E. Brazil to Bolivia. Aerial roots long strong slender

See *Gen. Pl.* 1: 237. 1837 and Sakuragui, C.M., Mayo, S.J. & Zappi, D.C. "Taxonomic revision of Brazilian species of *Philodendron*." *Kew Bulletin* 60: 465–513. 2005

(The sap from the leaves as a rubefacient, taken internally has a drastic effect. A poultice of fresh leaves for acute and chronic orchitis; a leaves decoction used as a dressing for edemas, rheumatic joints and ulcers.)

in Brazil: bananeira de macaco, cipó imbê, cipó de imbê, cipóimbe, cucúba, curuba, folha de fonte, imbê, imbê, guiambê, ombê, quimbê, tajaz de cobra, tracos

in Peru: imbê, suambê

Philodendron insigne Schott (*Philodendron calophyllum* Brongn. ex Linden & André; *Philodendron haematinum* R.E. Schult.; *Philodendron niveohermesinum* Linden & André ex André; *Philodendron prioreanum* Brongn. ex Engl.)

Trop. South America.

See *Syn. Aroid.* 73. 1856 and *Rhodora* 66: 120. 1964

(Used by witch-doctors, they attach magical significance to the red coloring matter in the spathe of this species.)

Philodendron lacerum (Jacq.) Schott

Greater Antilles.

See *Wiener Z. Kunst* 3: 780. 1829

(The leaf a remedy for caustic sores of the arm.)

Philodendron latifolium K. Koch (*Philodendron sellowianum* K. Koch)

Venezuela.

See *Index Seminum* (Berlin) 1855(App.): 3. 1855

(Leaf poultice for fever, sprains, rheumatism.)

Philodendron ochrostemon Schott (*Boursea nervosa* Hoffmanns., nom. nud.; *Philodendron nervosum* Schott ex Engl.)

Brazil.

See *Prodr. Syst. Aroid.*: 229. 1860

(The sap from the leaves as a rubefacient, taken internally has a drastic effect. A poultice of fresh leaves for acute and chronic orchitis; a leaves decoction used also as a dressing for edemas, rheumatic joints and ulcers.)

in Brazil: imbe indo

Philodendron pedatum (Hook.) Kunth (*Caladium pedatum* Hook.; *Dracontium laciniatum* Vell.; *Philodendron amazonicum* Engl.; *Philodendron duisbergii* Epple ex G.S. Bunting; *Philodendron laciniatum* (Vell.) Engl.; *Philodendron laciniatum* subsp. *weddellianum* Engl.; *Philodendron laciniatum* var. *palmatisectum* Engl.; *Philodendron pedatum* var. *weddellianum* Engl.; *Philodendron polypodioides* A.M.E. Jonker

& Jonker; *Philodendron quercifolium* Engl.; *Philodendron weddellianum* Engl.)

Trop. South America. Spadices give off a carrion-like odor

See *Enum. Pl.* 3: 49. 1841, *Bot. Jahrb. Syst.* 26: 546. 1899 and *Acta Bot. Neerl.* 15: 143. 1966, *Baileya* 14: 69. 1966

(The fresh leaves spread with oil serve as a dressing for gout pains.)

in Brazil: folha de urubú

Philodendron popenoei Standl. & Steyerem.

Central America.

See *Publ. Field Mus. Nat. Hist., Bot. Ser.* 9(4): 264–265. 1940

(Crushed leaves mixed with butter applied to forehead for headache.)

Philodendron radiatum Schott

Mexico to N. Colombia.

See *Oesterr. Bot. Wochenbl.* 3: 378. 1853

(A decoction of the leaves as a lotion for rheumatic pains and gout.)

Philodendron sagittifolium Liebm. (*Philodendron daemonum* Liebm.; *Philodendron ghiesbreghtii* Linden ex Engl.; *Philodendron lancigerum* Standl. & L.O. Williams; *Philodendron sanguineum* Regel; *Philodendron tanyphyllum* Schott; *Philodendron tuxtlanum* G.S. Bunting)

Mexico to Venezuela. Aerial roots

See *Vidensk. Meddel. Naturhist. Foren. Kjøbenhavn* 1: 17. 1849 and *Ceiba* 1: 232. 1951, *Gentes Herb.* 9: 353. 1965

(Acrid sap to remove warts.)

Philodendron scandens K. Koch & Sello (*Arum hederaceum* Jacq.; *Philodendron acrocardium* Schott; *Philodendron cuspidatum* K. Koch & Bouché; *Philodendron harlowii* I.M. Johnst.; *Philodendron hederaceum* (Jacq.) Schott; *Philodendron hederaceum* var. *hederaceum*; *Philodendron hederaceum* var. *oxycardium* (Schott) Croat; *Philodendron isertianum* Schott; *Philodendron micans* Klotzsch ex K. Koch; *Philodendron micans* var. *brevipes* Engl.; *Philodendron micans* var. *microphyllum* (K. Koch) Engl.; *Philodendron microphyllum* K. Koch; *Philodendron miduhoi* Matuda; *Philodendron oxycardium* Schott; *Philodendron oxyprorum* Schott; *Philodendron pittieri* Engl.; *Philodendron prieurianum* Schott; *Philodendron scaberulum* C. Wright; *Philodendron scandens* fo. *micans* (Klotzsch ex K. Koch) Bunting; *Philodendron scandens* subsp. *cubense* (Engl.) I. Arias; *Philodendron scandens* subsp. *isertianum* (Schott) G.S. Bunting; *Philodendron scandens* subsp. *oxycardium* (Schott) G.S. Bunting; *Philodendron scandens* subsp. *prieurianum* (Schott) G.S. Bunting; *Philodendron scandens* var. *cubense* Engl.; *Philodendron scandens* var.

cuspidatum (K. Koch & C.D. Bouché) Engl.; *Philodendron subsessile* Gleason)

Mexico to Trop. America.

See *Enumeratio Systematica Plantarum* 31. 1760, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 780. 1829, *Synopsis Aroidearum: complectens enumerationem systematicam generum et specierum hujus ordinis. I* 82. 1856, *Prodr. Syst. Aroid.* 242. 1860 and *Gentes Herbarum*; occasional papers on the kind of plants 10(2): 163, f. 4, 16b. 1968, Sellers, S.J. et al. "Toxicologic assessment of *Philodendron oxycardium* Schott (Araceae) in domestic cats". *Vet. Hum. Toxicol.*, 19: 92–96. 1977, *Contact Dermatitis.* 6(2): 95–9. 1980, *Acta Chemica Scandinavica. Series B: Organic Chemistry and Biochemistry.* 36(5): 291–2044. 1982, *Am. J. Contact Dermat.* 7(3): 138–45. 1996, Govaerts, R. & Frodin, D.G. *World Checklist and Bibliography of Araceae (and Acoraceae)*. Kew. 2002 [as *Philodendron hederaceum* var. *hederaceum*.]

(Chewing the leaves of philodendrons results in painful burning and swelling of the mouth parts because of the oxalates. Contact dermatitis also occurs. The insoluble oxalates do not produce systemic poisoning in humans. Cross sensitivity was observed. Allergic contact sensitivity.)

in English: heart leaf, heart-leaved philodendron, parlor ivy, sweetheart plant

Philodendron simsii (Hook.) Sweet ex Kunth (*Arosma acutifolia* Raf., nom. illeg.; *Caladium grandifolium* Sims, nom. illeg.; *Caladium simsii* Hook.; *Philodendron fontanesii* Kunth; *Philodendron fontanesii* Kunth ex Engl.; *Philodendron linguaeforme* K. Koch ex Schott; *Philodendron linguiforme* K. Koch ex Schott; *Philodendron simsii* Hort. ex C. Koch; *Philodendron simsii* (Hook.) G. Don)

Guyana, French Guiana, N. Brazil.

See *Description des Plantes Nouvelles ... Jardin de J. M. Cels* 30. 1801, *Hortus Britannicus* 632. 1839, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 3: 48. 1841, *Prodr. Syst. Aroid.* 269. 1860

(This species is reported to be irritant.)

Philodendron solimoesense A.C. Sm.

Tropical America, Brazil.

See *J. Arnold Arbor.* 20: 289. 1939

(Aerial roots exudate applied to sting, scorpion stings.)

Philodendron speciosum Schott ex Endl. (*Meconostigma speciosum* Schott, nom. inval.; *Philodendron speciosum* Schott, nom. illeg.)

Bolivia to Brazil.

See *Meletemata Botanica* 1: 20. 1832, *Genera Plantarum* 1(3): 237. 1837

(Crushed seeds anthelmintic. Contact dermatitis. Stem and leaves yield a caustic juice used as a resolvent for tumours, furuncles, abscesses and in gout.)

in Brazil: aninga, aninga iba

Philodendron squamiferum Poepp. (*Philodendron aceriferum* Schott; *Philodendron crinipes* K. Koch; *Philodendron crinitum* Engl.; *Philodendron squamiferum* var. *aceriferum* (Schott) Engl.)

Guianas, N. Brazil. Berries have a sharp peppery taste

See *Nov. Gen. Sp. Pl.* 3: 87. 1845, *Monogr. Phan.* 2: 417. 1879

(Crushed leaves serve as a dressing for edemas and dropsy)

in Brazil: guiambé

Philodendron tripartitum (Jacq.) Schott (*Arum tripartitum* Jacq.; *Caladium trifoliatum* Desf.; *Caladium tripartitum* (Jacq.) Willd.; *Philodendron affine* Hemsl.; *Philodendron fenzlii* Engl.; *Philodendron holtonianum* Schott; *Philodendron holtonianum* Mast.; *Philodendron trilobatum* Regel; *Philodendron tripartitum* var. *holtonianum* (Schott) Engl.; *Philodendron tripartitum* var. *tricuspidatum* Engl.)

Mexico to Trop. America.

See *Wiener Z. Kunst* 3: 780. 1829

(Leaf said to cure snakebite.)

Philodendron warszewiczii K. Koch & C.D. Bouché (*Anthurium warszewiczii* K. Koch; *Philodendron serpens* Hook.f.; *Philodendron serpens* Engl., nom. illeg.; *Philodendron serpens* Hort. ex Engl.)

Mexico, C. America. Large fruits sweet juicy edible

See *Index Seminum* [Berlin] App.: 4. 1855 [Appendix Generum et Specierum Novarum et Minus Cognitarum quae in Horto Regio Botanico Berolinensi Coluntur 1855.], *Bot. Mag.* 104: t. 6375. 1878, *Monogr. Phan.* [A. DC. & C. DC.] 2: 421. 1879

(Leaves decoction for rheumatism.)

in Central America: cupapayo, guacamaya, mano de león

Philoxerus R. Br. Amaranthaceae

Greek *philos* 'loving' and *xeros* 'dry', referring to the habitat; see R. Brown, *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 416. London 1810 and *Fieldiana, Bot.* 24(4): 143–174. 1946, *Fieldiana, Bot.*, n.s. 13: 142–180. 1983, *Brenesia* 41–42: 73–80. 1994.

Philoxerus vermiculatus R. Br. (*Achyranthes vermicularis* (L.) Eaton; *Achyranthes vermicularis* Elliott; *Blutaparon breviflorum* Raf.; *Blutaparon brevifolium* (L.) (Leaves for fevers, inflammation.)

Phleum L. Poaceae (Gramineae)

Greek *phleos*, *phlous*, *phloun*, *phleon*, ancient name for a kind of grass growing in the swamps like reeds, *Arundo ampelodesmon*, or wool-tufted reed, applied by Theophrastus (*HP*. 4.8.1, 4.10.1, 4.10.4) to a species of *Erianthus*; *Phleos* was an epithet of Dionysus; Latin *pheos*, *phleos* applied by Plinius to a prickly plant, also called *stoebe* or *stoibe*; see Carl Linnaeus, *Species Plantarum*. 59. 1753 and *Genera Plantarum*. Ed. 5. 29. 1754; Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Greca*. 2(1): 304–305, 307. Leo S. Olschki Editore, Firenze 1994; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 682. Ansbach 1852; H. Genaust, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 478–479. 1996.

Phleum pratense L. (*Phleum intermedium* Jord.; *Phleum nodosum* L. var. *pratense* (L.) St.-Amans; *Phleum parnasicum* Boiss.; *Phleum pratense* fo. *bracteatum* A. Braun; *Phleum pratense* L. subsp. *vulgare* (Celak.) Asch. & Graebn.; *Plantinia pratensis* (L.) Bubani; *Stelephuros pratensis* (L.) Lunell)

Mediterranean region, Eurasia. Perennial bunchgrass, herbaceous, often stout, tall, erect, leafy, loosely or densely clumped or tufted or caespitose, non-rhizomatous, often swollen at base and forming a small bulb or corm-like, small seeds, ornamental, numerous varieties available, noxious weed, a prolific seeder, highly palatable and nutritious

See *Species Plantarum* 1: 59–60. 1753, *Systema Naturae, Editio Decima* 871. 1759, *Beschreibung der Gräser* 103. Leipzig 1769–1810, *Flora Anglica, Editio Altera* 26. 1778, *Icones et Descriptiones Graminum Austriacorum* 2: 27, t.

Motta et al., “*Phleum pratense* pollen starch granules induce humoral and cell-mediated immune responses in a rat model of allergy.” *Clinical & Experimental Allergy* 34(2): 310–314. 2004, *Clinical & Experimental Allergy* 34(2): 310–314. 2004

(A cause of hayfever.)

in English: cat's tail, cultivated Timothy, meadow cat's tail, Timothy, Timothy grass

in China: ti mu cao

Phlogacanthus Nees Acanthaceae

Greek *phlox*, *phlogos* ‘flame’ and *akantha* ‘thorn, prickle’, referring to the colour of the flowers, corolla orange, see *Genera Plantarum* 102–103. 1789, *Plantae Asiaticae Rariores* (Wallich). 3: 76, 99. 1832.

Phlogacanthus curviflorus Nees

Vietnam, Himalaya. Shrub, pink brownish flowers

See *Plantae Asiaticae Rariores* (Wallich) 3: 99. 1832

(Fresh leaves extract for earache, hot poultice to treat swellings and bruises. A paste from the pounded stem bark applied for treating bone fracture.)

in India: ficong, labang

Phlogacanthus pubinervius T. Anderson

Himalaya. Leaves as vegetable

See *J. Linn. Soc., Bot.* 9: 508. 1867

(Leaves decoction used for cough.)

in India: totsiiipa katena

Phlogacanthus thyrsiflorus Nees

India, Himalaya, Burma. Shrub, quadrangular stem, glossy glabrous leaves, reddish flowers in whorls, leaves and flowers used as vegetable, good fodder for lactating cows

See *Plantae Asiaticae Rariores* (Wallich). 3: 99. 1829–1832, *FBI* 4: 512. 1884 and *Taxon* 29: 353–355. 1980, *J. Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996

(Flowers and leaves decoction drunk for stomachache; flowers eaten as stomachic and anthelmintic, to kill intestinal worms; flower decoction used as febrifuge. Leaf decoction taken against cough and fever. Fruits and leaves ash used as febrifuge. Magico-religious beliefs, superstitions.)

in India: jak-han, nongmangkha angangba, rambha-araung, sitaful, taugan, tite, vasak

Phlogacanthus thyrsiformis (Roxb. ex Hardw.) Mabb. (*Justicia thyrsiformis* Hardw.)

India, Himalaya. Shrub, stout terminal spikes, orange corolla, leaves good fodder for cattle, flowers bee forage

See *Asiat. Res.* 6: 349. 1799 and *Taxon* 29(56): 606. 1980

(Leaf juice and root paste taken as remedy for cough and cold. Flower decoction mixed with powdered seeds of black pepper to cure low blood pressure.)

in India: chua, chuua, kaldona, kising, konadani

Phlogacanthus tubiflorus Nees

Himalaya. Shrub, pubescent leaves, red flowers, leaves and flowers used as vegetable

See *Plantae Asiaticae Rariores* (Wallich). 3: 99. 1829–1832, *FBI* 4: 511. 1884

(Extract of fresh young leaves drunk for fever and malaria. Flowers and leaves decoction drunk for stomachache. Ceremonial, flowering twigs used in ceremonies of worship.)

in India: a-ghe kashe, ban-chauk, ban-chha, banchauk, banchha, chak-ban, sam rongtek

Phlomis L. Lamiaceae (Labiatae)

Greek *phlomis*, *phlomos*, ancient names for some plant, phlome, probably a species of *Phlomis*, or mullein, a species of *Verbascum*, mentioned by Theophrastus (*HP*. 9.12.3), Plinius and Dioscorides; Plinius used Latin *phlomis*,

phlomidis and *phlomos*, *i* for mullein, verbascum; see Carl Linnaeus, *Species Plantarum*. 2: 584–585. 1753.

Phlomis betonicoides Diels (*Phlomis betonicoides* Diels f. *alba* C.Y. Wu)

China.

See *Notes Roy. Bot. Gard. Edinburgh* 5: 241. 1912

(Roots used for colds and diarrhea.)

in China: jia qin jiu

Phlomis bracteosa Royle ex Benth. (*Phlomis bracteosa* Royle; *Phlomis bracteosa* var. *longifolia* Hook.; *Phlomis cordata* Royle ex Benth.; *Phlomis lamiifolia* Royle ex Benth.; *Phlomis latifolia* Royle ex Benth.; *Phlomis latifolia* Mill.; *Phlomis simplex* Royle ex Benth.; *Phlomisoides bracteosa* (Royle ex Benth.) Kamelin & Makhm.; *Phlomisoides lamiifolia* (Royle ex Benth.) Kamelin & Makhm.)

Himalaya. Herb, erect, simple or branched, pubescent, purplish blue or white flowers in axillary and terminal dense clusters, hispid calyx, nutlets obovoid, whole herb as fodder

See *The Gardeners Dictionary*: ... eighth edition 3. 1768, *Hooker's J. Bot. Kew Gard. Misc.* 3: 382–383. 1833, *The Flora of British India* 4: 693. 1885 and *Taxon* 30: 707. 1981, *Bot. Zhurn.* (Moscow & Leningrad) 75: 244. 1990

(Flowers and shoots eye tonic. Roots for burns, cuts, boils. Nectar dropped into eyes as eye tonic.)

in India: chukhari

Phlomis maximowiczii Regel

China.

See *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Pétersbourg* 9: 594. 1886

(Roots used as a febrifuge, to reduce swelling, and for furunculosis.)

in English: Maximowicz Jerusalem sage

in China: da ye cao su

Phlomis medicinalis Diels (*Phlomis wangii* Hu & Tsai)

China.

See *Bot. Jahrb. Syst.* 29(3–4): 554. 1900

(Astringent, tonic.)

in China: luo bo qin jiu

Phlomis mongolica Turczaninow

China.

See *Bull. Soc. Imp. Naturalistes Moscou* 24(2): 406. 1851

(Plants poisonous.)

in English: Mongolian Jerusalem sage

in China: chuan ling cao

Phlomis rotata Bentham ex J.D. Hooker (*Lamiophlomis rotata* Kudo; *Lamiophlomis rotata* (Bentham ex J.D. Hooker) Kudo; *Lamiophlomis rotata* var. *subglabra* C.Y. Wu; *Phlomis rotata* subsp. *bhutanica* R.A. Clement)

China, Himalaya. See also *Lamiophlomis rotata*

See *Species Plantarum* 2: 584–587. 1753, *The Flora of British India* [J.D. Hooker] 4(12): 694. 1885 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2(2): 210–211. 1929, *Fl. Xizanica* 4: 159. 1985, *Edinburgh J. Bot.* 50: 38. 1993

(Aerial parts used for traumatic injuries, fractured bones, body pain.)

in English: common lamiophlomis

in Bhutan: rtalpag

in China: du yi wei

Phlomis umbrosa Turczaninow

China.

See *Bull. Soc. Imp. Naturalistes Moscou* (1840) 76. 1840

(Expectorant.)

in English: shady Jerusalem sage

in China: cao su

Phlomis umbrosa Turczaninow var. *australis* Hemsley

China.

See *Bull. Soc. Imp. Naturalistes Moscou* (1840) 76. 1840

(Stomachic, vermifuge.)

in China: nan fang bian zhong

Phlomis younghusbandii Mukerjee (*Phlomis kawaguchii* Murata)

China.

See *Notes Roy. Bot. Gard. Edinburgh* 19: 307. 1938

(Roots for cough and bronchitis)

in China: pang xie jia

Phlox L. Polemoniaceae

Phlox, the Greek name for a flame or plants with flame-coloured flowers; Latin *phlox*, *phlogis* for a flower, otherwise unknown (Plinius), see *Species Plantarum* 1: 151–153. 1753.

Phlox austromontana Coville (*Phlox douglasii* Hook. var. *austromontana* (Coville) Jeps. & H. Mason)

North America. Perennial herb, shrub or subshrub

See *Flora Boreali-Americana* 2(8): 73, pl. 158. 1838, *Contributions from the United States National Herbarium* 4: 151. 1893 and *A Manual of the Flowering Plants of California ...* 786. 1925

(Antirheumatic, analgesic.)

in English: mountain phlox

Phlox austromontana Coville var. *austromontana* (*Phlox austromontana* Coville subsp. *lutescens* (S.L. Welsh) Locklear; *Phlox austromontana* Coville subsp. *vera* Wherry; *Phlox austromontana* Coville var. *lutescens* S.L. Welsh)

North America. Perennial herb, shrub or subshrub

See *Contributions from the United States National Herbarium* 4: 151. 1893 and *J. Wash. Acad. Sci.* 29: 518. 1939, *Great Basin Naturalist* 45(4): 792. 1985

(Roots decoction used for cold, stomachache, body ache.)

in English: mountain phlox

Phlox caespitosa Nutt. (*Phlox caespitosa* Nutt. subsp. *eucaespitosa* Brand; *Phlox caespitosa* Nutt. subsp. *eucaespitosa* Brand; *Phlox douglasii* Hook.; *Phlox douglasii* subsp. *eu-douglasii* Brand; *Phlox douglasii* Hook. subsp. *eudouglasii* Brand; *Phlox douglasii* var. *caespitosa* (Nutt.) H. Mason ex Jeps.; *Phlox douglasii* Hook. var. *caespitosa* (Nutt.) H. Mason)

North America. Perennial herb, shrub or subshrub

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 41, pl. 6, f. 1. 1834, *Flora Boreali-Americana* 2(8): 73, pl. 158. 1838 and *Pflanzenr.* (Engler) 4, Fam. 250: 83, 85. 1907, *A Manual of the Flowering Plants of California ...* [Jepson] 786. 1925

(Cathartic, antiseptic, analgesic, diuretic, for burns, toothache. Ceremonial.)

in English: cushion phlox, tufted phlox

Phlox gracilis (Douglas ex Hook.) Greene (*Collomia chubutensis* Speg.; *Collomia eritrichoides* Griseb.; *Collomia gracilis* Douglas ex Hook.; *Collomia gracilis* (Douglas ex Hook.) Douglas ex Benth.; *Collomia gracilis* var. *andicola* Wedd.; *Collomia gracilis* var. *andicola* Benth.; *Collomia gracilis* var. *congesta* Wedd.; *Collomia gracilis* var. *eritrichoides* (Griseb.) Brand; *Collomia micrantha* Kellogg; *Gilia gracilis* Douglas ex Hook.; *Gilia gracilis* subsp. *eugracilis* Brand; *Gilia gracilis* subsp. *gracilis* Brand; *Gilia gracilis* subsp. *humilis* Brand; *Gilia gracilis* subvar. *angustifolia* Brand; *Gilia gracilis* subvar. *congesta* (Wedd.) Brand; *Gilia gracilis* var. *congesta* (Wedd.) Borsini; *Gilia gracilis* var. *eritrichoides* Brand; *Gilia gracilis* var. *glabella* Brand; *Gilia gracilis* var. *glabella* Suksd.; *Gilia gracilis* var. *micrantha* Brand; *Gilia gracilis* var. *minuartioides* Borsini; *Gilia gracilis* var. *stricta* Brand; *Gilia humilis* (Greene) Piper; *Gilia micrantha* (Kellogg) A. Nelson, nom. illeg.; *Gilia micrantha* Steud.; *Microsteris andicola* (Wedd.) Greene;

Microsteris gracilis (Douglas ex Hook.) Greene; *Microsteris gracilis* subsp. *humilis* (Greene) V.E. Grant; *Microsteris humilis* Greene; *Microsteris micrantha* (Kellogg) Greene; *Navarretia gracilis* (Douglas ex Hook.) Kuntze; *Navarretia gracilis* Kuntze; *Phlox gracilis* subsp. *humilis* (Greene) H. Mason; *Polemonium morenonis* Kuntze)

North and South America. Perennial herb, shrub or subshrub

See *Botanical Magazine* 56: t. 2924. 1829, *Edwards's Botanical Register* 19: sub pl. 1622. 1833, *Nomenclator Botanicus*. Editio secunda 1: 684. 1840–1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 308. 1845, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 6: 129. 1854, *Chloris Andina* 2: 80, t. 58, f. A. 1859, *Proceedings of the California Academy of Sciences* 3(2): 18–19, f. 3. 1863, *Pittonia* 1(8): 141. 1887, *Miss. Sci. Cap Horn, Bot.* 5: 356. 1889, *Revisio Generum Plantarum* 2: 433. 1891, *Revista de la Facultad de Agronomia; Universidad Nacional de La Plata* 3: 619. 1897, *Revisio Generum Plantarum* 3(3): 203. 1898, *Pittonia* 3(18D): 301, 303. 1898 and *Deutsche Botanische Monatsschrift* 18: 132. 1900, *Contributions from the United States National Herbarium* 11: 461. 1906, *Das Pflanzenreich* IV, 250: 88–92. 1907, *Manual of the Botany ... of the Rocky Mountain Region* . . ed. 2: 399. 1909, *Lilloa* 8: 212, 214. 1942, *Illustrated Flora of the Pacific States* 3: 413. 1951, *Aliso* 4(1): 96. 1958

(Whole plant made into a paste applied to wounds and bruises.)

in English: slender phlox

Phlox gracilis (Douglas ex Hook.) Greene subsp. ***gracilis***

North and South America. Perennial herb, shrub or subshrub

See *Pittonia* 1(8): 141. 1887

(Whole plant made into a paste applied to wounds, sores and bruises.)

in English: slender phlox

Phlox hoodii Richardson

North America. Perennial herb

See *Narrative of a Journey to the Shores of the Polar Sea* 733, pl. 28. 1823 and *Taxon* 31(2): 344–360. 1982

(Laxative.)

in English: moss phlox, spiny phlox

Phlox hoodii Richardson var. ***hoodii*** (*Phlox hoodii* Richardson subsp. *genuina* Wherry)

North America. Perennial herb

See *Narrative of a Journey to the Shores of the Polar Sea* 733, pl. 28. 1823 and *Notul. Nat. Acad. Nat. Sci. Philadelphia* 87: 14. 1941

(Laxative.)

in English: spiny phlox

Phlox longifolia Nutt.

North America. Perennial herb, shrub or subshrub

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 41–42. 1834

(Antirheumatic, cathartic, astringent, antiseptic, for boils.)

in English: longleaf phlox

Phlox longifolia Nutt. subsp. ***longifolia*** (*Phlox cortezana* A. Nelson; *Phlox grahamii* Wherry; *Phlox longifolia* Nutt. subsp. *calva* Wherry; *Phlox longifolia* Nutt. subsp. *cortezana* (A. Nelson) Wherry; *Phlox longifolia* Nutt. subsp. *humilis* (Brand) Wherry; *Phlox longifolia* subsp. *humilis* (Douglas) Wherry; *Phlox longifolia* Nutt. subsp. *typica* Wherry; *Phlox longifolia* var. *humilis* Brand; *Phlox longifolia* Nutt. var. *humilis* (Douglas) Brand; *Phlox longifolia* Nutt. var. *humilis* (Douglas ex Hook.) M. Peck; *Phlox longifolia* Nutt. var. *linearifolia* (Hook.) Brand; *Phlox longifolia* Nutt. var. *linearifolia* Brand; *Phlox longifolia* Nutt. var. *puberula* E.E. Nelson)

North America. Perennial herb, shrub or subshrub

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 41–42. 1834, *Revision of the Western North American Phloxes* 26. 1899 and *Helios* 22: 80. 1905, *Pflanzenr.* (Engler) 4, Fam. 250: 66. 1907, *American Journal of Botany* 18(6): 434. 1931, *Proceedings of the Academy of Natural Sciences of Philadelphia* 90(9): 135–136, f. 1. 1938, *Notulae Naturae of the Academy of Natural Sciences of Philadelphia* 87: 5. 1941, *Madroño*, 6: 135. 1941, *Man. Pl. Oregon* 571. 1941

(Antirheumatic, purgative, astringent, stomachic, blood purifier, for gastrointestinal disorders, colds, stomachache, diarrhea, venereal diseases.)

in English: longleaf phlox

Phlox maculata L.

North America. Perennial herb

See *Species Plantarum* 1: 152. 1753

(Tonic and stimulant as a wash.)

in English: meadow phlox, wild sweet William, wild sweetwilliam

Phlox maculata L. var. ***maculata*** (*Phlox maculata* L. var. *odorata* (Sweet) Wherry; *Phlox maculata* var. *odorata* Wherry)

North America. Perennial herb

See *Species Plantarum* 1: 152. 1753 and *Bartonia* 14: 26. 1932

(Tonic and stimulant as a wash.)

in English: meadow phlox, wild sweet William, wild sweetwilliam

Phlox multiflora A. Nelson

North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 25(5): 278. 1898

(Tonic and stimulant.)

in English: flowery phlox

Phlox multiflora A. Nelson subsp. ***multiflora*** (*Phlox depressa* (E.E. Nelson) Rydb.; *Phlox multiflora* subsp. *depressa* (E.E. Nelson) Wherry; *Phlox multiflora* var. *depressa* E.E. Nelson; *Phlox multiflora* A. Nelson subsp. *typica* Wherry)

North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 25(5): 278. 1898, *Revision of the Western North American Phloxes* 20. 1899 and *Bulletin of the Torrey Botanical Club* 33(3): 149. 1906, *Notulae Naturae of the Academy of Natural Sciences of Philadelphia* 87: 12. 1941

(Tonic and stimulant.)

in English: flowery phlox

Phlox pilosa L. (*Phlox pilosa* Walter)

North America. Perennial herb, shrub or subshrub

See *Species Plantarum* 1: 152. 1753, *Fl. Carol.* [Walter] 96. 1788

(Blood purifier, aphrodisiac.)

in English: downy phlox, prairie phlox

Phlox pilosa L. subsp. ***pilosa*** (*Phlox argillacea* Clute & Ferris; *Phlox aristata* Michx. var. *virens* Michx.; *Phlox pilosa* L. var. *virens* Wherry; *Phlox pilosa* L. var. *virens* (Michx.) Wherry; *Phlox villosissima* (A. Gray) Small p.p.; *Phlox villosissima* Small)

North America. Perennial herb, shrub or subshrub

See *Species Plantarum* 1: 152. 1753, *Flora Boreali-Americana* (Michaux) 1: 144. 1803 and *Fl. S.E. U.S.* [Small]. 977, 1337. 1903, *Amer. Bot.* (Binghamton) 17: 75. 1911, *Bartonia* 12: 47. 1931, *Chromosoma* 41: 413–420. 1973

(Blood purifier, aphrodisiac, antiseptic, for wounds, cuts, eczema, skin diseases. Ceremonial.)

in English: downy phlox, prairie phlox

Phlox stansburyi (Torr.) A. Heller (*Phlox longifolia* var. *stansburyi* (Torr.) A. Gray; *Phlox speciosa* Pursh var. *stansburyi* Torr.)

North America. Perennial herb, shrub or subshrub, food

See *Flora Americae Septentrionalis*; or, ... 1: 149. 1813, *Report on the United States and Mexican Boundary ... Botany* 2(1): 145. 1859, *Proceedings of the American Academy of Arts and Sciences* 8: 255. 1870, *Bulletin of the Torrey Botanical Club* 24(10): 478. 1897

(Contraceptive, antiseptic, disinfectant, for sores.)

in English: cold-desert phlox

Phlox stansburyi (Torr.) A. Heller var. ***stansburyi*** (*Phlox longifolia* fo. *brevifolia* A. Gray; *Phlox longifolia* Nutt. var. *brevifolia* A. Gray; *Phlox longifolia* var. *brevifolia* (A. Gray) A. Gray; *Phlox longifolia* Nutt. var. *stansburyi* (Torr.) A. Gray; *Phlox stansburyi* subsp. *eu-stansburyi* Brand; *Phlox stansburyi* (Torr.) A. Heller subsp. *eustansburyi* Brand; *Phlox stansburyi* (Torr.) A. Heller var. *brevifolia* (A. Gray) E.E. Nelson; *Phlox stansburyi* (Torr.) A. Heller var. *brevifolia* (A. Gray) Brand)

North America. Perennial herb, shrub or subshrub

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 145. 1859, *Proceedings of the American Academy of Arts and Sciences* 8: 255. 1870, *Synoptical Flora of North America* 2(1): 133. 1878, *Bulletin of the Torrey Botanical Club* 24(10): 478. 1897, *Revision of the Western North American Phloxes* 27. 1899 and *Pflanzenr.* (Engler) 4, Fam. 250: 66. 1907

(Contraceptive, leaves decoction drunk to facilitate the delivery of placenta. Ceremonial, ritual, protection.)

in English: cold-desert phlox

Phlox subulata L.

North America. Perennial herb, shrub or subshrub

See *Species Plantarum* 1: 152–153. 1753 and *Rhodora* 80: 431–440. 1978

(Plant used for rheumatism.)

in English: ground pink, moss phlox, moss pink, mountain phlox

Phlox subulata L. var. ***subulata*** (*Phlox setacea* L.; *Phlox subulata* var. *setacea* (L.) Brand)

North America. Perennial herb, shrub or subshrub

See *Species Plantarum* 1: 152–153. 1753 and *Pflanzenr.* (Engler) 4, Fam. 250: 78. 1907, *Rhodora* 80: 431–440. 1978

(Plant used for rheumatism.)

in English: ground pink, moss phlox, moss pink, mountain phlox

Phoebe Nees Lauraceae

Phoebe (Phoibe), a female Titan, wife of Coeus, mother of Leto and Asteria, grandmother of Apollo and Artemis, daughter of Uranus and Gaea (Gaia), goddess of Moon in Greek mythology, her epithet was Gold-Crowned, see *Systema Laurinarum* 98, 109. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 33, 35. 1864 and *Fieldiana, Bot.* 24(4): 302–344. 1946.

Phoebe lanceolata Nees (*Laurus lanceolaria* Roxb.; *Laurus lanceolata* Wall. ex Nees; *Laurus ligustrina* Wall. ex Nees; *Ocotea lanceolata* Nees; *Ocotea ligustrina* Nees; *Phoebe lanceolata* (Wall. ex Nees) Nees; *Phoebe ligustrina* (Nees) Nees)

China, India. Tree, leaves lanceolate to linear-lanceolate, greenish-yellow flowers in lax panicles, ellipsoid fruits

See *Species Plantarum* 1: 369. 1753, *Histoire des plantes de la Guiane Française* 2: 781, pl. 310. 1775, *Plantae Asiaticae Rariores* 2: 71. 1831, *Flora Indica*; or, descriptions of Indian Plants 2: 309–310. 1832, *Systema Laurinarum* 98, 109, 113. 1836 and *Journal of Cytology and Genetics* 23: 219–228. 1988

(Leaves pounded and applied to scars. Fruit juice rubbed on the head to remove dandruff; ash of the berries used for sores.)

in China: pi zhen ye nan

in India: surur

Phoenix L. Arecaceae (Palmae)

Phoinix, *phoinikos* ‘date-palm, date, palm-frond, purple, crimson’, ancient Greek name used by Theophrastus and Plinius; the Phoenicians, from *Phoenix*, *nicis*, *Phoenices*, were the inhabitants of *Phoenice*, *Phoenicia*, the coastal territory of Syria; *Phoenix* (*Phoi*), in Greek legend, was son of Amyntor and Cleobule (see Homer, *Iliad* ix. 447–480); the *Phoenix* (*Phoi*) was the fabulous sacred bird of Egypt (see Herodotus and Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 1188. 1753, *Genera Plantarum*. Ed. 5. 496. 1754 and *Fieldiana*, *Bot.* 24(1): 196–299. 1958, Barrow, S.C. “A monograph of *Phoenix* L. (Palmae: Coryphoideae).” *Kew Bulletin* 53(3): 513–575. 1998, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. Kew. 2005, Grau, J. *Palms of Chile*. Ediciones OIKOS Ltda., Santiago de Chile 2006.

Phoenix acaulis Roxb. (*Phoenix acaulis* Buch.-Ham. ex Roxb.; *Phoenix acaulis* var. *melanocarpa* Griff.)

India, Himalaya, China. Flowers unisexual, orange-red fruits

See *Hort. Bengal.* 73. 1814, *Pl. Coromandel* 3: 69, t. 273. 1820, *Calcutta J. Nat. Hist.* 5: 346. 1845

(Used in Ayurveda. Pounded roots in water used in diarrhea. Stem bark of *Crateva roxburghii*, apical bud of *Phoenix acaulis* and seeds of *Dolichos biflorus* boiled together and the decoction given as a postpartum remedy; root of *Woodfordia fruticosa* along with apical bud of *Phoenix acaulis* pounded and given to control leucorrhea; apical bud eaten as postpartum remedy.)

in India: bhuyin kajuri, chamror, indi, intal, ithal, itta, jangli khajur, kaadu kharjoora, kajre, kajuri, khajori kanda, khajur, khajuri, khojori konda, konda ita, sanna ita, sannichai, sannaichal, sannaichala, sannaichi, sannicalu, sannintal, sindhi, sittugichu, thakal

Phoenix canariensis Chabaud (*Phoenix canariensis* hort. ex Chabaud; *Phoenix canariensis* var. *porphyrococca* Vasc. & Franco; *Phoenix cycadifolia* Regel; *Phoenix dactylifera* L. var. *jubae* Webb & Berthel.; *Phoenix erecta* Sauv., nom. inval.; *Phoenix jubae* (Webb & Berthel.) Webb ex H. Christ; *Phoenix macrocarpa* Sauv., nom. inval.; *Phoenix tenuis* Verschaff., nom. nud.; *Phoenix vigieri* Naudin)

Canary Isl. Solitary trunk, arching crown, small green-yellow inedible fruit

See *Species Plantarum* 2: 1188. 1753, *Hist. Nat. Iles Canaries* 3: 289. 1847, *Gartenflora* 28: 131. 1879, *Provence Agric. Hort. Ill.* 19: 293. 1882, *Bot. Jahrb. Syst.* 6: 469. 1885, *Rev. Hort.* 57: 541. 1885, *Rev. Hort.* 66: 495. 1894 and *Med. J. Aust.* 154(9): 627–628. 1991, *Botanica Acta* 106: 170–182. 1993, *Allergy* 50(3): 277–280. 1995

(Sharp thorns on the petioles; palm needle induced pseudotumour, with recurrent swelling and pain. Reported a case of occupational bronchial asthma, contact urticaria and rhinoconjunctivitis caused by *Phoenix canariensis* pollen, a potential allergen.)

in English: Canary date palm, Canary Island date, Canary Island date palm, Canary Island palm, Canary palm

in Japan: Kanari-sote-tsu-shuro

Phoenix dactylifera L. (*Palma dactylifera* (L.) Mill., nom. illegit.; *Palma dactylifera* Mill.; *Palma major* Garsault; *Phoenix atlantica* A. Chev. var. *maroccana* A. Chev.; *Phoenix chevalieri* D. Rivera, S. Rios & Obón; *Phoenix dactylifera* var. *adunca* D.H. Christ ex Becc.; *Phoenix dactylifera* var. *costata* Becc.; *Phoenix dactylifera* var. *cylindrocarpa* Mart.; *Phoenix dactylifera* var. *gonocarpa* Mart.; *Phoenix dactylifera* var. *oocarpa* Mart.; *Phoenix dactylifera* var. *oxysperma* Mart.; *Phoenix dactylifera* var. *sphaerocarpa* Mart.; *Phoenix dactylifera* var. *sylvestris* Mart.; *Phoenix excelsior* Cav., nom. illeg.; *Phoenix iberica* D. Rivera, S. Rios & Obón)

Cosmopolitan, widely cultivated.

See *Species Plantarum* 2: 1188. 1753, Geoffroy, Etienne-Francois (1672–1731), *Description, vertus et usages de sept ceuts dix-neuf plantes ... : et de cent trente-quatre animaux...*, de m. de Gersault [Garsault, Francois Alexandre Pierre de, 1691–1778], par mm. de Fehrt, Prevost, Duflos, Martinet, & c./et rangées suivant l’ordre du livre intitulé *Matiere médicale* de m. (Plant infusion for pre- and post-natal care, postpartum remedy. Love potion, aphrodisiac.)

Phormium Forst. & Forst.f. Xanthorrhoeaceae (Agavaceae, Phormiaceae)

Greek *phormion* ‘mat’, referring to the very strong fibres used for textiles, cordage and nets, Latin *phormio*, *phormionis* and *formio*, *formionis* for the wicker-work of reeds or rushes, a mat, a straw covering; see Johann Reinhold Forster (1729–1798) and Johann Georg Adam (1754–1794), *Characteres Generum Plantarum* quas in itinere ad insulas maris Australis, collegerunt, descripserunt, delineaverunt, annis 1772–1775. Joanne Reinoldus Forster ... et Georgius Forster. Londini, 1776, *Fruct. Sem. Pl.* 1: 71. 1788 and H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987.

Phormium colensoi Hook.f. (*Phormium cookianum* Le Jolis; *Phormium cookianum* Le Jol. subsp. *hookeri* (Gunn ex Hook.f.) P. Wardle; *Phormium cookianum* subsp. *hookeri* (Gunn) Wardle; *Phormium forsterianum* Hook., nom. nud.; *Phormium hookeri* Hook.f.; *Phormium hookeri* Gunn)

New Zealand.

See *London J. Bot.* 3: 8. 1844, Raoul, Etienne Fiacre Louis (1815–1852), *Choix des plantes de la Nouvelle-Zélande* ... Paris, 1846, *Bot. Mag.* (1888) t. 6973. 1888 and *New Zealand J. Bot.* 17(2): 196. 1979

(For skin diseases.)

in English: mountain flax, New Zealand hemp

Maori name: wharariki

Phormium tenax Forst. & Forst.f. (*Chlamydia tenacissima* Gaertn.; *Lachenalia ramosa* Lam.; *Phormium atropurpureum* Hort.; *Phormium ramosum* Billb.; *Phormium ramosum* (Lam.) Billb.; *Phormium tenax* f. *atropurpureum* Voss)

Norfolk I., New Zealand. Bush, dark glossy coarse stiff strong leaves, clusters of yellow and red flowers on short stalks

See *Fruct. Sem. Pl.* 1: 71. 1788, *Encycl.* 3: 373. 1792, *Vilm. Blumengärtn.*, ed. 3. 1: 1072, in syn. 1895

(Roots for headache, worms, wounds, abscess, ringworm. Gum demulcent, astringent, for old sores, burns, wounds, diarrhea; root sap for wounds and constipation.)

in English: bush flax, flax, New Zealand flax, New Zealand hemp

Maori names: harakeke, korari (the stem)

in Spanish: lino de Nueva Zelanda, lirio de espada

Photinia Lindley Rosaceae

Greek *photeinos* ‘shining, bright’, *phos* ‘light’, the leaves are shining, see *Botanical Register*; consisting of coloured ... 6: pl. 491. 1820, *Trans. Linn. Soc. London* 13(1): 103–104, pl. 10. 1821, *Nouvelles archives du muséum d’histoire naturelle* 10: 125, 146. 1874 and *Taxon* 58(1): 310. 2009.

Photinia melanocarpa (Michx.) K.R. Robertson & J.B. Phipps (*Adenorachis melanocarpa* (Michx.) Nieuwl.; *Aronia arbutifolia* (L.) Pers. var. *nigra* (Willd.) Seymour; *Aronia melanocarpa* (Michx.) (Infusion of young shoots given in chronic dysentery.)

in Madagascar: ambanivihy

Phyllanthus nummularifolius Poir. var. ***capillaris*** (Schumach. & Thonn.) Radcl.-Sm. (*Diasperus capillaris* (Schumach. & Thonn.) Kuntze; *Phyllanthus capillaris* Schumach. & Thonn.; *Phyllanthus capillaris* var. *stuhlmanii* (Pax) Hutch.; *Phyllanthus capillaris* var. *stuhlmannii* (Pax) Hutchinson; *Phyllanthus stuhlmanii* Pax; *Phyllanthus stuhlmannii* Pax)

Tropical Africa. Semi-shrubby, woody herb, undershrub, branched, reddish, whitish light green flowers

See *Species Plantarum* 2: 981–982. 1753, *Encyclopédie Méthodique, Botanique* 5: 302. 1804, *Beskrivelse af Guineiske planter* 417. 1827, *Die Pflanzenwelt Ost-Afrikas* C: 236. 1895 and *Flora of Tropical Africa* 6(1): 709. 1912, *Kew Bulletin* 51(2): 316. 1996

(Fresh roots in jaundice. Decoction for fevers, snakebite, food poisoning.)

Phyllanthus oxyphyllus Miq. (*Diasperus frondosus* (Wall. ex Müll.Arg.) Kuntze; *Diasperus kunstleri* (Hook.f.) Kuntze; *Phyllanthus frondosus* Wall. ex Müll.Arg.; *Phyllanthus has-skarlianus* Müll.Arg.; *Phyllanthus kunstleri* Hook.f.)

Myanmar to Sumatra. Shrub or small tree, bole crooked, fruit a red subglobose capsule 3-lobed, in evergreen, primary or secondary rain forest, in lowland and mountains

(Leaves decoction febrifuge, diuretic and diaphoretic in treating gonorrhoea; young leaves taken as a postpartum remedy.)

in English: piggyback tree

in Malaysia: asin-asin, cherek hantu, meroyan puteri, meroyan putri

in Thailand: yaai chung laan, yaai theep laan, yom hin

Phyllanthus parvifolius Buch.-Ham. ex D. Don (*Diasperus parvifolius* (Buch.-Ham. ex D. Don) Kuntze; *Phyllanthus juniperinus* Wall. ex Müll.Arg.; *Phyllanthus parvifolius* Steud.; *Phyllanthus roeperianus* var. *parvifolius* (Buch.-Ham. ex D. Don) Müll.Arg.)

Pakistan, China, Nepal.

See *Prodr. Fl. Nepal.*: 63. 1825, *Nomenclator Botanicus*. Editio secunda 2: 327. 1841, *Linnaea* 32: 28. 1863, *Revis. Gen. Pl.* 2: 600. 1891 and *Symbolae Sinicae* 7(2): 223. 1931

(Paste of leaf applied to treat boils; roasted leaf for wounds.)

in Nepal: sunpate

Phyllanthus pectinatus Hook.f. (*Diasperus pectinatus* (Hook.f.) Kuntze; *Emblica pectinata* (Hook.f.) Ridl.)

Malaysia.

See *Fl. Brit. India* 5: 290. 1887, *Revis. Gen. Pl.* 2: 601. 1891 and *Fl. Malay Penins.* 3: 217. 1924

(Leaves decoction for fever.)

Malay names: dulang, tuwalang

Phyllanthus pentandrus Schumach. & Thonn. (*Diasperus pentandrus* (Schumach. & Thonn.) Kuntze; *Diasperus scoparius* (Welw.) Kuntze; *Menarda linifolia* Baill.; *Phyllanthus deflexus* Klotzsch; *Phyllanthus dilatatus* Klotzsch; *Phyllanthus linifolius* Vahl ex Baill.; *Phyllanthus linoides* Hochst. ex Baill.; *Phyllanthus pentandrus* Roxb. ex Thwaites; *Phyllanthus piluliferus* Fenzl; *Phyllanthus scoparius* Welw.)

Tropical and S. Africa. Herbaceous shrub, erect, many-branched, woody, glabrous, stem reddish, sweetly fragrant, small white-yellowish flowers, young fruits pale green globose

See *Species Plantarum* 2: 981–982. 1753, *Beskrivelse af Guineiske planter* 419. 1827 and *Enumeratio Plantarum Zeylaniae* 282. 1861 and *F.T.A.* 6, 1: 710. 1912, *Wiss. Ergebn. Schwed. "Catalogue des plantes de la Mauritanie et du Sahara Occidental." *Boissiera* 55: 1–322. 1998

(Toxic, postpartum remedy, mild purgative.)

Phyllanthus polyphyllus Willd. (*Diasperus emblicoides* (Müll.Arg.) Kuntze; *Diasperus polyphyllus* (Willd.) Kuntze; *Phyllanthus emblicoides* Müll.Arg.)

India, Sri Lanka.

See *Sp. Pl.* 4: 586. 1805, *Linnaea* 32: 15. 1863, *Revis. Gen. Pl.* 2: 599–600. 1891

(Unripe fruit paste mixed with milk given in paralysis, fruit juice applied for paralysis.)

in India: kaattu seru nelli, kattunelli, kilaranelli, kondapaccari, kondapachaari, krishna neli, manakani, manakanni, manikanni, pureedu usiri

Phyllanthus pulcher Wall. ex Müll.Arg. (*Diasperus pallidifolius* Kuntze; *Diasperus pulcher* (Wall. ex Müll.Arg.) Kuntze; *Epistylum glaucescens* Baill., nom. nud.; *Epistylum phyllanthoides* Baill., nom. nud.; *Epistylum pulchrum* Baill., nom. nud.; *Phyllanthus asteranthos* Croizat; *Phyllanthus lac-erilobus* Croizat; *Phyllanthus pallidus* Müll.Arg., nom. illeg.; *Phyllanthus zollingeri* Müll.Arg.; *Phyllanthus zollingeri* var. *microphyllus* Müll.Arg.; *Reidia glaucescens* Miq.)

China to W. Malesia. Small shrub, monoecious, cataphylls persistent, fruit a smooth subglobose capsule, invasive, weedy, in forest clearings, along rivers, in evergreen forest

See *Linnaea* 32: 47, 49. 1863, *Revisio Generum Plantarum* 2: 600. 1891 and *J. Jap. Bot.* 16: 655. 1940, *Caldasia* 3: 21. 1944

(Decoction drunk for stomachache; poultices applied to the skin to treat boils, ulcerations, fever, swellings and itch. Leaves applied to the gums to treat toothache.)

in Malaysia: kayu puteh, kelurut, kelurut tanjong, naga buana, naga buwana, naga jimat, semelit patong

in Thailand: kaang plaa, trueng baa daan, waan thoraanee saan

in Vietnam: me l[as] l[eej]ch

Phyllanthus reticulatus Poiret (*Anisonema reticulatum* (Poir.) A. Juss.; *Anisonema reticulatum* A. Juss.; *Cicca reticulata* Kurz; *Diasperus reticulatus* (Poir.) Kuntze; *Kirganelia reticulata* (Poir.) Baill.; *Phyllanthus reticulatus* Lodd.)

Trop. Africa, Trop. & Subtrop. Asia, Australia. Shrub, scandent, suberect, rough, many-branched, spines lacking or almost lacking, straggling branchlets, male flowers greenish in axillary fascicles, female flowers reddish-pink, small succulent dark blue fruits, fodder for goats

See *Genera Plantarum* 387. 1789, *Encyclopédie Méthodique, Botanique* (Lamarck) 5: 298. 1804, *Étude générale du groupe des Euphorbiacées* 613. 1858, *Prelim. Rep. For. Veg. Pegu*, App. B. 77. 1875, *Forest Flora of British Burma* 2: 354. 1877 and *Taxon* 29: 353–355. 1980

(Used in Ayurveda and Sidha. Used for criminal poisoning. Stems squeezed onto teeth for infected gums and toothache. For asthma, pound the stem and leaves and rub upon the chest. Leaves diuretic and cooling, a decoction for sore throat; fresh leaf juice applied in bleeding gums; dried leaf powder applied to cure ulcers and skin diseases; leaf paste applied on forehead to relieve headache or fever; leaves decoction given orally as antiseptic, astringent and antibacterial; young leaves decoction given in stomach disorders and dysentery. Root juice given to treat malaria; root decoction given to children for cough and catarrh. Leaves used as a bait for fishing. Veterinary medicine, crushed leaves extract given in diarrhea, dysentery and insect bite; roots of *Helicteres isora* along with leaves of *Phyllanthus reticulatus* pounded and the extract given orally in insect bite; tubers of *Dioscorea bulbifera* along with stem bark of *Erythroxylum monogynum*, leaves of *Phyllanthus reticulatus* pounded and the extract applied over fractured area and bandaged.)

in English: potato bush, roast potato plant

in Eastern Africa: mgogondi

in Southern Africa: aartappelbos; mkasiri (Swahili); inTaba yengwe, iNtabayengwe, umChumelo, munyuswane, umTswathiba, uButswamtimi (Zulu); thethenya (Tsonga); makhulu-wamutangauma (Venda)

in Tanzania: mvinzwandimi, mzizima

in W. Africa: balanbalan

in Bangladesh: ghung nel

(Roots aphrodisiac, stomachic.)

Phyllocephalum Blume Asteraceae

Greek *phyllon* ‘leaf’ and *kephale* ‘head’, referring to the leafy involucre, see *Bijdragen tot de flora van Nederlandsch Indië* 15: 888. 1826, Guillemin, Jean Baptiste Antoine (1796–1842), *Archives de botanique: ou recueil mensuel de mémoires originaux, d’extraits et analyses bibliographiques, d’annonces et d’avis divers concernant cette science/rédigées ... sous la direction de A.-J. Guillemin.* Paris: au Bureau des Archives, 1833, *Tanaceteeen* 44. 1844, *Flora van Nederlandsch Indië* 2: 20. 1856.

Phyllocephalum phyllolaenum (DC.) Narayana (*Decaneurum phyllolaenum* DC.)

India.

See *Prodr.* (DC.) 7(1): 264. 1838 and *Curr. Sci.* 51(8): 438. 1982

(For sore throat, inflammation, contact therapy, stem pieces with *Tricholepis glaberrima* stem pieces tied around neck.)

in India: kali

Phyllochlamys Bureau Moraceae

From the Greek *phyllon* ‘leaf’ and *chlamys* ‘cloak’, see *Prodr.* (DC.) 17: 217. 1873.

Phyllochlamys spinosa Bureau

Malaysia, India.

See *Prodr.* (DC.) 17: 218. 1873

(For ulcers, boil the bark and poultice.)

Malay name: pokok temiyang

Phyllocladus Mirbel Taxaceae (Phyllocladaceae)

Greek *phyllon* ‘leaf’ and *klados* ‘branch’, referring to the flattened branches and leaf-like branchlets; see Charles F.B. de Mirbel (1776–1854), in *Mémoires du Muséum d’Histoire Naturelle.* 13: 48. Paris 1825.

Phyllocladus trichomanoides D. Don (*Podocarpus trichomanoides* (D. Don) Kuntze)

New Zealand.

See *A Description of the Genus Pinus*, ed. 3 2: 159. 1832, *Revisio Generum Plantarum* 2: 802. 1891

(Bark for dysentery, leaves for scrofula.)

in English: celery pine

in New Zealand: tanekaha (Maori name)

Phyllodium Desvaux Fabaceae (Desmodieae)

Greek *phyllon* ‘a leaf’ and *-odes* ‘resembling, of the nature of, like’, referring to the dilated petiole; see Nicaise Auguste Desvaux (1784–1856), in *Journal de Botanique.* 1: 123. Paris 1813 and *Taxon* 28: 274–275. 1979, *Guihaia* 15(2): 166–171. 1995.

Phyllodium elegans (Loureiro) Desvaux (*Desmodium blandum* Meeuwen; *Desmodium elegans* (Loureiro) Bentham; *Dicerma elegans* A. DC.; *Dicerma elegans* (Lour.) DC.; *Hedysarum elegans* Loureiro; *Meibomia elegans* (Lour.) Kuntze; *Phyllodium elegans* var. *typicum* Schindl.; *Zornia elegans* (Lour.) Pers.)

China, Indonesia. Perennial non-climbing shrub

See *Flora Cochinchinensis* 2: 450. 1790, *Synopsis Plantarum* 2(2): 318. 1807, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 339. 1825, *Mémoires de la Société Linnéenne de Paris* 4: 324. 1826, *Flora Hongkongensis* 83. 1861 and *Reinwardtia* 6: 247. 1962

(Roots and leaves used for cooling blood, and as an antiphlogistic and diuretic.)

in China: mao pai qian shu

Phyllodium pulchellum (L.) Desvaux (*Desmodium pulchellum* (L.) Benth.; *Desmodium pulchellum* (L.) Bentham; *Dicerma pulchellum* (L.) A. DC.; *Hedysarum pulchellum* L.; *Meibomia pulchella* (L.) Kuntze; *Zornia pulchella* (L.) Pers.)

India, China, SE Asia, Nepal. Perennial non-climbing shrub

See *Species Plantarum* 2: 747. 1753, *Synopsis Plantarum* 2(2): 318. 1807, *Mémoires de la Société Linnéenne de Paris* 4: 324. 1826, *Plantae Junghuhnianae* 2: 217. 1852, *Revisio Generum Plantarum* 1: 197. 1891

(Used in Ayurveda. Flowers given in biliousness. Bark decoction in diarrhea, hemorrhage and eye diseases. Roots decoction a postpartum medicine; root and black pepper pasted together and given orally in snakebite, the leaf paste applied on the affected portion of the body. Roots and leaves used for reducing fever, cooling blood and dispelling stasis. Leaves juice made into paste and given for menstrual disorders, also as antiseptic and to stop bleeding of wounds. Twigs under the mattresses or anywhere in the house to drive out bedbugs. Magico-religious beliefs.)

in China: pai qian shu

in India: chipoto, dhekna, hampilla, jatasalaparni, jatasalpar, jatsalpan, jenkotte, jenukaddi, kaaduhuralithe, kaadulthi, kaadumuduru, kadumuduru, kaduhuralite, kadulti, kadumuduru, kadunhuralite, karra anthina, karraantinta, karranthintha, karrantinta, kattumutira, katumudura, kodakotirichunddo, konda antinta, kondaantinha, kondanthinta, kondantinta, kondontinta, krishnopornni, lodhrah, lodrom, nadak, nipithu, salaparni, sarivi, seegate gida, survi, thigari, tiga velaga, tigure, ummah, ursi, vellalothi

in Japan: uchiwa-tsunagi

Malay name: serengan kechil

Phylloxylon Baillon Fabaceae (Indigofereae, Leguminosae)

Greek *phylon* 'leaf' and *xylon* 'wood', see *Adansonia* 2: 54. 1861, *J. Linn. Soc., Bot.* 21: 336. 1884 and *Kew Bulletin* 50(3): 477–494. 1995.

Phylloxylon perrieri Drake

Madagascar. Deciduous shrub or small tree

See *Histoire Physique, Naturelle et Politique de Madagascar* 30: 192. 1902[1903], *Bulletins et Mémoires de l'École Nationale de Médecine et de Pharmacie de Dakar* 9: 355–386. 1961

(The bark as a fish poison.)

in Madagascar: arahara

Phymatodes Presl Dipteridaceae

Greek *phyma*, *phymatos* 'a tubercle, swelling', *phymatodes* 'full of tumours'; see Karl (or Carl) B. Presl (1794–1852), *Tentamen Pteridographiae, seu genera Filicacearum*. 195, t. 8. Prague 1836 and Arthur D. Chapman, ed., *Australian Plant Name Index*. 2261–2262. Canberra 1991.

Phymatodes scolopendria (Burm. f.) Ching (*Chrysopteris phymatodes* (L.) Link; *Chrysopteris phymatodes* Link; *Drynaria phymatodes* Fée; *Drynaria vulgaris* J. Physalis alkekengi Linnaeus (*Physalis alkekengi* Lour.)

China.

See *Species Plantarum* 1: 182–184. 1753, *Fl. Cochinch.* 1: 133. 1790 and *Fl. Iran.* 100: 24. 1972, *Taxon* 28: 398–400. 1979, *Acta Biologica Cracoviensia, Series Botanica* 30: 119–136. 1989, *Cytologia* 62: 103–113. 1997

(The enclosed immature fruits contain sufficient quantities of solanine, a bitter glycoalkaloid, to cause gastroenteritis and diarrhea in children. The mature fruits are apparently edible, and are used as a febrifuge. Fruits applied externally to treat gout and rheumatism; fresh fruit juice taken to treat urinary disorders. Ritual, ceremonial, fruits used as religious symbol.)

in English: alkekengi, bladder cherry, Chinese lantern, Chinese lantern plant, Japanese-lantern, Jewish cherry, strawberry ground cherry, strawberry tomato, winter cherry

in Arabic: kakang, kakenedj

in German: Judenkirsche

in China: suan chiang, suan jiang, teng leng tsao (= lantern plant)

in India: shoklo

in Japan: fijichi, hô-zuki, sôtô, tôfunabii

Physalis alkekengi Linnaeus var. ***franchetii*** (Mast.) Makino (*Physalis alkekengi* var. *glabripes* (Pojark.) Grubov; *Physalis franchetii* Mast.; *Physalis glabripes* Pojark.; *Physalis prae-termissa* Pojark.; *Physalis szechuanica* Pojark.)

China.

See *Species Plantarum* 1: 183. 1753, *Gardener's chronicle*, ser. 3 16: 434. 1894, and *Botanical Magazine* 22(253): 34. 1908

(Fresh berries used as a local analgesic.)

in Japan: chiukumaw, mu-kuttar

Physalis angulata L. (*Physalis angulata* fo. *ramosissima* (Mill.) Stehlé; *Physalis angulata* var. *capsicifolia* (Dunal) Griseb.; *Physalis angulata* var. *lanceifolia* (Nees) Waterf.;

(Plant decoction drunk for fevers. Leaves stomachic; juice of the crushed leaves used as eye lotion.)

in China: xiao suan jiang

Physalis minima L. (*Physalis angulata* var. *villosa* Bonati; *Physalis indica* Lam; *Physalis lagascae* Roem. & Schult.; *Physalis minima* C.H. Wright; *Physalis parviflora* R. Br.; *Physalis parviflora* Lag., nom. illeg., non *Physalis parviflora* R. Br.)

Tropical Africa, Asia and Australia. Herb, erect or decumbent, pubescent, pale yellow flowers solitary axillary, fruiting calyx greenish-yellow with purple ribs, yellow berries surrounded by a papery persistent calyx, orange-yellow discoid muricate seeds, ripe fruits and leaves edible, in arable

land, dry rice fields, dry to semi-dry sunny slopes, gardens and waste places

See *Species Plantarum* 1: 182–184. 1753, *Prodromus Florae Novae Hollandiae* 447. 1810, *Genera et species plantarum* 11. 1816, *Systema Vegetabilium* 4: 679. 1819 and *Flora of Tropical Africa* 4(2): 246. 1905, *Journal of Cytology and Genetics* 13: 99–106. 1978, *Current Science* 50: 423–424. 1981, *Glimpses of Cytogenetics in India* 2: 62–67. 1989, *Cytologia* 56: 283–288. 1991

(Fruit poisonous when consumed in large quantities. Plant juice for earache; crushed fresh plant applied to swellings; plant decoction drunk for sore throat, cough, cold, fever. Fruits diuretic, alterative, antipyretic, purgative; dried fruits, mashed, rolled in a leaf into a cigar-like structure and smoked against toothache. Root febrifuge, eaten as a vermifuge and in case of burning of stomach; roots decoction drunk to treat hypertension and diabetes; chewed roots applied to the lower abdomen to reduce pain. Pounded leaves for headache, fevers, red spots on skin, ulcers, measles and itches; leaves mixed with leaves of *Erioglossum rubiginosum* pounded in coconut oil and applied to the body as febrifuge; aqueous extract from the leaves taken against constipation; leaf juice taken orally against fevers; leaf and fruit paste applied externally for ring worm. Flowers applied for toothache. Veterinary medicine, crushed leaves applied over the snakebitten part; fruits given to horses as diuretic and tonic.)

in English: Chinese lantern, gooseberry, groundcherry, lesser ground cherry, little ground cherry, sunberry, wild gooseberry

in South Africa: kalkoengif, wilde-appelliefie

in Borneo: letup letup

in Brunei: letup letup

(Antidote, pectoral, expectorant. Ceremonial, ritual.)

in English: Newberry’s twinpod

Physaria rectipes (Wooton & Standl.) O’Kane & Al-Shehbaz (*Lesquerella rectipes* Wooton & Standl.)

North America.

See *Contributions from the United States National Herbarium* 16(4): 127. 1913, *Novon* 12(3): 327. 2002

(Crushed leaves made into a paste applied for toothache. Ceremonial.)

in English: straight bladderpod

Physocarpus (Cambess.) Raf. Rosaceae

From the Greek *physa* ‘a bladder’ and *karpos* ‘fruit’, an allusion to the inflated follicles or follicular fruits, see *Species Plantarum* 1: 489–490. 1753, *Beytr. Pfl.-Anat.* [Hefts 1–4]: 109. 1799, *Annales des Sciences Naturelles* (Paris) 1: 239, 385–386. 1824, *New Flora and Botany of North America* ... (Rafinesque) 3: 73. 1838 [dt. 1836; issued in Jan–Mar 1838], *Manual* (Gray), ed. 2. 113. 1856, *Trudy Imp. S.-Peterburgsk. Bot. Sada* vi. (1879) 219. 1879, *Revisio Generum Plantarum* 2: 949. 1891 and *N. Amer. Fl.* 22(3): 240. 1908.

Physocarpus capitatus (Pursh) Kuntze (*Opulaster capitatus* Kuntze; *Opulaster capitatus* (Pursh) Kuntze; *Opulaster capitatus* Greene; *Physocarpus capitatus* Kuntze; *Physocarpus opulifolius* (L.) Maxim. var. *tomentellus* (Ser.) B. Boivin; *Physocarpus opulifolius* var. *tomentellus* (Ser. ex DC.) B. Boivin; *Spiraea capitata* Pursh)

North America. Perennial shrub

See *Flora Americae Septentrionalis*; or, ... (Pursh) 1: 342. 1813, *Revisio Generum Plantarum* 1: 219. 1891, *Revisio Generum Plantarum* 2: 949. 1891 and *Naturaliste Canad.* 93: 434. 1966

(Root decoction emetic as antidote.)

in English: Pacific ninebark

Physochlaina G. Don Solanaceae

Greek *physa* ‘a bladder’ and *chlaena*, *chlaenion* ‘a cloak, blanket’, from the inflated calyx, see *A General History of the Dichlamydeous Plants* 4: 470. 1837, *Voy. Bot.* 113–114, t. 120. 1844, *Linnaea* 22: 737. 1849.

Physochlaina infundibularis Kuang

China.

See *Acta Phytotaxonomica Sinica* 12(4): 410–411, pl. 80, f. 8. 1974

(A source of alkaloids.)

in English: funnellform physochlaina

in China: lou dou pao nang cao

Physochlaina physaloides (Linnaeus) G. Don (*Hyoscyamus physaloides* Linnaeus; *Physochlaena dahurica* Miers; *Physochlaena physaloides* (Linnaeus) Miers; *Physochlaina physaloides* G. Don; *Physochlaina pseudo-physaloides* Pascher; *Physochlaina pseudophysaloides* Pascher; *Scopolia physaloides* Dunal; *Scopolia physaloides* (Linnaeus) Dunal)

China.

See *Sp. Pl.* 1: 180. 1753, *Gen. Hist.* 4: 470. 1837, *Annals and Magazine of Natural History*, ser. 2 4: 471. 1850, *Prodr.* (DC.) 13(1): 554. 1852 and *Repert. Spec. Nov. Regni Veg.* 7: 166. 1909

(Used for relieving muscular spasm and pain. Flowers and stems as a haemostatic.)

in English: common physochlaina

in China: pao nang cao

Physochlaina praealta (Decne.) Miers (*Belenia praealta* Decne.; *Hyoscyamus praealtus* (Decne.) Walp.; *Hyoscyamus praealtus* Walp.; *Physochlaina grandiflora* Hook.; *Physochlaina praealta* Miers; *Physochlaina urceolata* Kuang & A.M. Lu; *Scopolia praealta* (Decne.) Dunal; *Scopolia praealta* Dunal)

China, India, Himalaya.

See *Voyage dans l'Inde* 4: 114, t. 120. 1844, *Annals and Magazine of Natural History* ser. 2, 5(30): 473. 1850, *Botanical Magazine* 77: pl. 4600. 1851, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(1): 554. 1852 and *Acta Phytotaxonomica Sinica* 12(4): 409. 1974, *Acta Bot. Yunnan.* 15: 377–384. 1993

(Leaves narcotic, used as vermifuge and applied to boils; fresh leaves extract applied in eye diseases. Seeds vermifuge, emetic, toxic, a small amount mixed with tobacco given in liver diseases; ash from seeds applied on teeth to get relief in toothache; seeds made into a paste and applied to heal wounds.)

in China: xi zang pao nang cao

in India: dhandhura, langtang, langthan, langthang, mudu, ranthang

Physostegia Benth. Lamiaceae (Labiatae)

From the Greek *physa* ‘a bladder’ and *stega*, *stegos* ‘roof, shelter’, alluding to the calyx, see *Edwards’s Botanical Register* 15: sub pl. 1289. 1829, *Labiatarum Genera et Species* 504. 1834 and *Contr. Gray Herb.* 211: 56. 1982.

Physostegia virginiana (L.) Benth. var. *formosior* (Lunell) B. Boivin (*Dracocephalum formosius* (Lunell) Rydb.; *Dracocephalum formosius* Rydb.; *Physostegia formosior* Lunell)

North America.

See *Species Plantarum* 2: 594–596. 1753, *Edwards’s Botanical Register* 15: sub pl. 1289. 1829, *Labiatarum Genera et Species* 504. 1834 and *Bull. Leeds Herbarium* 2: 7. 1908, *Brittonia* 1(2): 95. 1931, *Le Naturaliste Canadien* 93(5): 574. 1966

(Antifertility.)

Physostigma Balf. Fabaceae (Phaseoleae)

From the Greek *physa* ‘a bladder’ and *stigma* ‘a stigma’, an allusion to the large hood covering the stigma, see *Trans. Roy. Soc. Edinburgh* 22: 310, t. 16. 1861 and *Kew Bulletin* 20(1): 103–111. 1966.

Physostigma cylindrospermum (Baker) Holmes (*Mucuna cylindrosperma* Welw. ex Baker; *Physostigma cylindrospermum* Holmes; *Physostigma cylindrospermum* (Welw. ex Baker) Holmes; *Physostigma cylindrospermum* Trimen)

Angola, Cameroon, Gabon, Zaire. Perennial climbing shrub

See *Flora of Tropical Africa* 2: 186. 1871, *Journal of Botany, British and Foreign* 17: 186. 1879, *Pharm. Journ.*, ser. 3 9: 913. 1879, *Revisio Generum Plantarum* 1: 208. 1891 and *Pollen et Spores* 29(1): 21–29. 1987

(Alkaloids.)

Physostigma mesoponticum Taub.

Tanzania. Perennial non-climbing herb, straggling, mostly erect, prostrate, woody rootstock, pseudoracemes terminal and axillary, petals purple to white-pink-purple, seeds brown

See *Berichte der Deutschen Botanischen Gesellschaft* 12: 81. 1894 and *Legum. Trop. Africa*: 386–387. 1929, *Hooker's Icon. Pl.* 33: t. 3214. 1933, *Mem. New York Bot. Gard.* 8: 409. 1954, *Kew Bull.* 20: 105, fig. 1/B, map 1. 1966, *Pollen et Spores* 29(1): 21–29. 1987, *Phytotherapy Research* 6(3): 155–157. 1992

(Toxins, poison, lethal to humans. Seeds poisonous, anthelmintic, parasitoid. Bark used as a fish poison.)

in English: wild sweet pea

in Zambia: mulyamfumu

Physostigma venenosum Balf.

Tropical Africa. Perennial climbing shrub, twining, vine, creeper, papery glaucous green leaves, pendulous racemes, inflorescence axis swollen in fruit, calyx green and purple with darker purple spots, wings lighter purple-pink, round semi-inflated fruit with hairy pulp inside, seeds dark brown, rainforest

See *Transactions of the Royal Society of Edinburgh* 22: 310. 1861

(Toxins, poisonous. Anti-cholinesterase. External analgesic, local treatment of articular rheumatism, eye troubles. A weak decoction of seeds used for edemas, constipation, nervous disorders. A ritual plant, an ordeal poison.)

in English: African ordeal bean, Calabar bean, chop nut, kalaba bean, ordeal bean, ordeal bean of Calabar

African names: akpi, akpo, esere, iso, shagar lubiyah kalabar

in Congo: nouan, nuan

in Sierra Leone: e-lel-e-kalaba, kre

Phytelephas Ruiz & Pavón Arecaceae (Palmae)

Greek *phyton* 'a plant' and *elephas*, *elephantos* 'elephant, ivory', the nut of this palm resembles the true ivory, endosperm

very hard, vegetable ivory, see *Systema Vegetabilium Florae Peruvianaee et Chilensis* 1: 299–302. 1798, *Species Plantarum*. Editio quarta [Willdenow] 4(2): 890, 1156. 1806 and *J. Wash. Acad. Sci.* 17: 223–224, 228. 1927, *Field Guide to the Palms of the Americas* 1–352. 1995.

Phytelephas aequatorialis Spruce (*Palandra aequatorialis* (Spruce) O.F. Cook)

Ecuador. Tree, unripe nuts are edible

See *Systema Vegetabilium Florae Peruvianaee et Chilensis* 299–301. 1798, *J. Linn. Soc., Bot.* 11: 179, 180. 1869, *Journal of the Linnean Society, Botany* 11: 179–180. 1871 and *Journal of the Washington Academy of Sciences* 17: 228–229. 1927, *Flóruilas de las Zonas de Vida del Ecuador* 1– 512. 1985, *Opera Botanica* 105: 1–73. 1991, *Botanica Acta* 110: 79–89. 1997

(Tonic, stimulant, aphrodisiac.)

in English: tagua palm, vegetable ivory

in Latin America: tagua

Phytolacca L. Phytolaccaceae

Greek *phyton* 'a plant' and the Latin *lacca*, *ae* (derived from Hindi *lakh*, and referred to a crimson dye); Pseudo Apuleius Barbarus in his *Herbarium* used the word *lacca* for an unknown plant; see Carl Linnaeus, *Species Plantarum*. 1: 441. 1753, *Genera Plantarum*. Ed. 5. 200. 1754, *Hortus Kewensis* 215. 1768, *Flora Lusitanica* 2: 224. 1804, *Narrative of an Expedition to Explore the River Zaire* 454. 1818, *American Journal of Science, and Arts* 23: 264. 1833, *Flora Telluriana* 3: 55. 1836[1837], *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 29–31. 1849 and *Das Pflanzenreich* IV 83(Heft 39): 36, 38, 42, 45, 50–51, 61. 1909, *Fieldiana, Bot.* 24(4): 192–202. 1946, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1924–1928. 2001.

Phytolacca acinosa Roxburgh (*Phytolacca esculenta* Van Houtte; *Phytolacca latbenia* (Moq.) H. Walter; *Phytolacca peginensis* Hance; *Pircunia latbenia* Moq.)

Japan, China, India. Perennial herbaceous undershrubs, erect, glabrous, branched, succulent, robust fleshy yellowish root, leaves alternate, greenish-white flowers in cylindrical racemes, succulent dark purple fruits, culinary value, leaves cooked and eaten as vegetable

See *Species Plantarum* 1: 441. 1753, *Flora Indica*; or, descriptions of Indian Plants 2: 458. 1832, *Flore des Serres et des Jardins de l'Europe* 4: 398 B. 1848, *Jour. Bot.* 7: 166. 1869 and *Journal of Shandong College of Traditional Chinese Medicine* 12: 55–57. 1988, *CIS Chromosome Information Service* 46: 3–4. 1989, Lu Dequan. *Phytolaccaceae*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 29: 14–20. 1996

(Toxin. Plant narcotic. Fresh leaves boiled and taken to treat body ache. Leaves and leaf juice given orally for indigestion

and gastric ailments. Young shoots eaten to cure body ache and rheumatism. Root decoction for indigestion; oil from the root useful in pain of the joints; root crushed into a paste and taken orally to cure food poison, paste applied in case of scorpion sting or insect bites. Leaves and roots stimulant and contraceptive, used for ascites, edema, erosion of the cervix uteri; external use for boils, wounds, cuts, joint pain and acute body pain. Along with other *Phytolacca*, treats fever and all kinds of poison disease. Veterinary medicine, leaves paste for skin diseases.)

in English: Indian poke, Indian pokeweed, sweet belladonna

in Bhutan: dpa-bo-dkar-po

in China: shang lu

in India: jagra, jalga, jaringo, jharka, kunthakbi, matazor, mutazor

in Nepal: hokling

in Tibetan: bao, dpa-bo ser-bo

***Phytolacca americana* L. (*Phytolacca decandra* L.)**

America. Perennial, herb, bush, suffrutescent, coarse, erect, ascending, branched, hollow succulent reddish-purple stems, root and pedicels slightly reddish, long arching and sprawling branches, simple leaves alternate, inflorescence opposite leaf axils, white pink flowers, juicy fruit purple-black when mature, persistent calyx, fruit and seeds of *Phytolacca americana* eaten and disseminated by birds, an important source of food for mourning doves, young leaves edible after being boiled in two waters (the first being discarded) to deactivate toxins, young shoots eaten as a substitute for asparagus, ripe berries used to color wine and eaten (cooked) in pies, berries have purple juice, garden weed, on dry rocky disturbed soil, in disturbed woodlands

See *Species Plantarum* 1: 441. 1753, *Species Plantarum*, Editio Secunda 1: 631. 1762 and Small, J.K. "Additions to the flora of subtropical Florida." *Bull. New York Bot. Gard.* 3: 419–440. 1905, Sauer, J.D. "Pokeweed, an old American herb." *Missouri Bot. Gard. Bull.* 38: 82–88. 1950, Sauer, J.D. "A geography of pokeweed." *Ann. Missouri Bot. Gard.* 39: 113–125. 1952, Hardin, J.W. "A comparison of *Phytolacca americana* and *P. rigida*." *Castanea* 29: 155–164. 1964, Lewis, W.H., Smith, P.R. "Poke root herbal tea poisoning." *J. Am. Med. Assoc.*, 242: 2759–2760. 1979, Jaekle, K.A., Freemon, F.R. "Pokeweed poisoning." *South. Med. J.*, 74: 639–640. 1981, Armesto, J.J., G.P. Cheplick and M.J. McDonnell. "Observations of the reproductive biology of *Phytolacca americana* (*Phytolaccaceae*)." *Bull. Torrey Bot. Club* 110: 380–383. 1983, Caulkins, D.B. and R. Wyatt. "Variation and taxonomy of *Phytolacca americana* and *P. rigida* in the southeastern United States." *Bull. Torrey Bot. Club* 117: 357–367. 1990, *Regnum Veg.* 127: 76. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 19–20. 1995

(All parts are poisonous, and fresh shoots, leaves and berries when eaten in quantity. Highly toxic, may be fatal if eaten, all animals may potentially be affected. Poke used as an emetic, a purgative, a suppurative, lymphatic stimulant, a spring tonic, and a treatment for various skin maladies, especially hemorrhoids. Pokeweed mitogen is a mixture of glycoprotein lectins that are powerful immune stimulants, promoting T- and B-lymphocyte proliferation and increased immunoglobulin levels. Accidental exposure to juices from *Phytolacca americana* via ingestion, breaks in the skin, and the conjunctiva has brought about hematological changes in numerous people, including researchers studying this species. Poke antiviral proteins are of great interest for their broad, potent antiviral (including *Human Immunodeficiency Virus*) and antifungal properties. Saponins found in *Phytolacca americana* and *Phytolacca dodecandra* are lethal to the molluscan intermediate host of schistosomiasis. When ingested, the roots, leaves, and fruit may poison animals, including *Homo sapiens*. Symptoms of poke poisoning include sweating, burning of the mouth and throat, severe gastritis, vomiting, bloody diarrhea, blurred vision, elevated white-blood-cell counts, unconsciousness, and, rarely, death.)

in English: common pokeweed, garget, inkberry, pigeonberry, poke (is thought to come from "pocan" or "puccoon," probably from the Algonquin term for a plant that contains dye), pokeberry, pokeroor, pokeweed, redweed, scoke, Virginian poke

in China: chui xu shang lu

in Portuguese: vinagreira, tintureira, uva dos passarinhos

Phytolacca americana* L. var. *americana

America. Perennial herb, bush, suffrutescent, coarse, erect, ascending

See *Species Plantarum* 1: 441. 1753, *Species Plantarum*, Editio Secunda 1: 631. 1762 and Small, J.K. "Additions to the flora of subtropical Florida." *Bull. New York Bot. Gard.* 3: 419–440. 1905, Sauer, J.D. "Pokeweed, an old American herb." *Missouri Bot. Gard. Bull.* 38: 82–88. 1950, Sauer, J.D. "A geography of pokeweed." *Ann. Missouri Bot. Gard.* 39: 113–125. 1952, *Castanea* 29: 155–164. 1964, Lewis, W.H., Smith, P.R. "Poke root herbal tea poisoning." *J. Am. Med. Assoc.*, 242: 2759–2760. 1979, Jaekle, K.A., Freemon, F.R. "Pokeweed poisoning." *South. Med. J.*, 74: 639–640. 1981, *Regnum Veg.* 127: 76. 1993, *International Organization of Plant Biosystematists Newsletter* 24: 19–20. 1995

(Plant poisonous, roots and berries.)

in English: garget, inkberry, pigeonberry, poke, pokeberry, pokeweed, redweed, scoke, Virginian poke

Phytolacca americana* L. var. *rigida (Small) Caulkins & R.E. Wyatt (*Phytolacca rigida* Small)

North America.

See Small, J.K. "Additions to the flora of subtropical Florida." *Bull. New York Bot. Gard.* 3: 419–440. 1905, Sauer, J.D. "Pokeweed, an old American herb." *Missouri Bot. Gard. Bull.* 38: 82–88. 1950, Sauer, J.D. "A geography of pokeweed." *Ann. Missouri Bot. Gard.* 39: 113–125. 1952, Hardin, J.W. "A comparison of *Phytolacca americana* and *P. rigida*." *Castanea* 29: 155–164. 1964, *Bull. Torrey Bot. Club* 110: 380–383. 1983, *Bull. Torrey Bot. Club* 117: 357–367. 1990

(All parts are poisonous, and fresh shoots, leaves and berries when eaten in quantity. Highly toxic, may be fatal if eaten, all animals may potentially be affected.)

in English: pokeweed

Phytolacca dioica L. (*Phytolacca arborea* Moq.; *Phytolacca dioica* var. *ovalifolia* Chodat; *Phytolacca populifolia* Salisb.; *Pircunia dioica* (L.) Moq.; *Sarcoca dioica* (L.) Raf.)

Argentina, Brazil.

See *Species Plantarum*, Editio Secunda 1: 632. 1762, *Flora Telluriana* 3: 55. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 30. 1849 and *Bulletin de l'Herbier Boissier*, sér. 2, 1913: 419. 1913, *Pesquisas, Bot.* 44: 5–40. 1993

(Emetic, purgative, leaves vulnerary.)

in English: beautiful shade, pokeberry tree, tree poke, umbra tree

in Southern Africa: belhambra, belambraboom, belombraboom, belhamelboom, ombu, omboe, umbo, koliedruif, Bobbejaandruifboom; uMzimuka (Zulu)

in Portuguese: bela sombra

in Argentina: ombú

Phytolacca dodecandra L'Hér. (*Phytolacca abyssinica* Hoffm.; *Phytolacca abyssinica* var. *apiculata* Engl.; *Phytolacca dodecandra* var. *apiculata* (Engl.) Baker & C.H. Wright; *Phytolacca dodecandra* var. *brevipedicellata* H. Walter; *Pircunia abyssinica* (Hoffm.) Moq.)

East Africa. Lianescent shrub or small tree or woody vine, bushy, shrubby, scandent, straggling, climbing, succulent, rough and extensive roots, milky sap, leaves waxy, many-flowered racemes, very sweet scented flowers white or greenish yellow, ovary green-yellow, fruits green then red, edge of a secondary forest, *Brachystegia* woodland, in open areas, in forest and forest edges, savanna, leaves said to be edible in stews

See *Species Plantarum* 1: 441. 1753, *Stirpes Novae aut Minus Cognitae* 143. 1785, *American Journal of Science, and Arts* 23: 264. 1833, *Flora of Tropical Africa* 2: 256. 1871 and *Das Pflanzenreich* IV. 83(Heft 39): 44. 1909, *Flore de Madagascar et des Comores* 69: 1–8. 1954

(Poisonous, also used criminally and for suicide; poisonous to fish, cattle and sheep. Roots in small quantities used as a purgative, taenifuge and cathartic, used for febrile complaints. Leaves poisonous, used for urinary diseases. Molluscicidal

saponins from the berries, used in schistosomiasis control. Veterinary medicine, used to treat spasms in animals legs; leaves infusion given to cure chickenpox in domestic fowls.)

in English: poke, poke weed

in Cameroon: papane

in Congo: ite, tidi, tili

in East Africa: hoko, ibopola, ihkohko, ihoko, ikikingi, ikoboko, ingoriso, ingoroso, ivesa, kipsugotit, lelekuru, libokho, luwoko, mbesa, mbopola, mhoko, mkonkola, muhoko, muogo, omuhoko, rutiri, umuhoko

China.

See *Fl. Berlin* 1(2): 794. 1824 and *Gardener's chronicle*, ser. 3 33: 133, f. 55, 56. 1903, *Journal of the Linnean Society, Botany* 37(262): 419. 1906, *Journal of Wuhan Botanical Research* 3(3): 203–207. 1985, *Kromosomo* 55–56: 1861–1866. 1989, *Phytologia* 68: 46. 1990, *Acta Botanica Yunnanica* 16(2): 157–164. 1994, *Acta Botanica Sinica* 36(12): 934–939. 1994

(Tannin, resin, and aromatic oils.)

in China: qing qian

Picralima Pierre Apocynaceae

Presumably from the Greek *pikros* 'bitter' and *lyma* 'filth, water used in washing, purgations', the bark used as a febrifuge, seeds as a quinine substitute; related to *Hunteria* and *Pleiocarpa*, see *Bull. Mens. Soc. Linn. Paris* ii. (1896) 1278. 1896 and *Planta Medica* 58(5): 436–441. 1992, *Opera Botanica Belgica* 7: 59–102. 1996, *African Study Monographs* 23(2): 47–64. 2002, *African Study Monographs* 25(1): 1–27. 2004.

Picralima nitida (Stapf) T. Durand & H. Durand (*Picralima klaineana* Pierre; *Picralima macrocarpa* A. Chev., nom. nud.; *Picralima nitida* Th. & H. Dur.; *Tabernaemontana nitida* Stapf)

W. Trop. Africa to Uganda. Small tree or shrub, white latex, leathery leaves, creamy white flowers, inflorescence a terminal or sometimes axillary compound umbel-like cyme, hanging long-stalked fruits in pair, intensely bitter seeds, big fruits eaten by elephants, in deciduous forest

See *Species Plantarum* 1: 210–211. 1753, *Bulletin of Miscellaneous Information Kew* 1894(1): 22. 1894, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1278–1279. 1896 and *Syll. Fl. Cong.* 338. 1909, *Bulletin du Jardin Botanique de l'État* 2: 338. 1910, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 427–428. 1920, *Taxon* 28: 636–637. 1979, *Genetica* 68: 3–35. 1985, *African Journal of Pharmacology* 1: 35–38. 1986, *Journal of Ethnopharmacology* 25(3): 263–268. 1989, *Journal of Ethnopharmacology* 36(2): 133–135. 1992, *Planta Medica* 59(6): 565–566. 1993, *African Journal of Medicine and Medical Sciences* 23(1): 85–90. 1994, *Journal of Ethnopharmacology* 54: 113–117. 1996, *European Journal of Pharmacology* 350(1): 101–108. 1998, *Phytotherapy Research* 14(5): 368–370. 2000, *Journal of Natural Remedies* 1(2): 135–139. 2001, *Journal of Ethnopharmacology* 81: 73–79. 2002, *Current Medicinal Chemistry* 10: 1891–1915. 2003, *Pharmaceutical Biology* 42(4–5): 274–279. 2004

(Bitter bark, seeds and roots febrifuge, antimalarial, hypoglycemic, antidiabetic, antiinflammatory, analgesic, astringent, hypotensive and hypertensive, antimicrobial, stomachic, sympathomimetic, for pain relief and to treat chest and stomach problems, vomiting, diarrhea, pneumonia and intestinal worms. A bark or root decoction drunk against jaundice. Crushed seeds, roots or fruit pulp ingredients for arrow poison. Immature fruits pounded and thrown in the water as a fish poison.)

in English: Akuamma seeds

in Cameroon: eban, mototoko

in Central African Republic: bambo, modanga, mondanga, mundanga

in Congo: limeme, ndudi, opati

in Gabon: eban, obero

in Ivory Coast: denouain

in Nigeria: erin (Yoruba); osu igwe (Igbo)

in Yoruba: agege

Picramnia Sw. Simaroubaceae (Picramniaceae)

Greek *pikros* 'bitter' and *amion* 'the amion, a bowl, the membrane around the fetus', referring to the bark, see *Nova Genera et Species Plantarum seu Prodromus* (Swartz) 2, 27. 1788 and *Journal of the Arnold Arboretum* 43: 173–186. 1962, *Brittonia* 40(1): 89–105. 1988, *Candollea* 48: 119–135. 1993, *Taxon* 44: 177–181. 1995, *Ceiba* 44(2): 105–268. 2003[2005].

Picramnia antidesma Sw. subsp. *fessonina* (DC.) W.W. Thomas (*Picramnia allenii* D.M. Porter; *Picramnia andicola* Tul.; *Picramnia antidesma* Sw.; *Picramnia antidesma* var. *pubescens* Schltld. & Cham.; *Picramnia bonplandiana* Tul.; *Picramnia brachybotryosa* Donn. Sm.; *Picramnia fessonina* DC.; *Picramnia lindeniana* Tul.; *Picramnia locuples* Standl.;

Picramnia pistaciaefolia S.T. Blake & Standl.; *Picramnia quaternaria* Donn. Sm.; *Picramnia seemanniana* Griseb.; *Picramnia tetramera* Turcz.; *Picramnia velutina* Lundell)

Panama, Guatemala, Mexico. Small tree

See *Nova Genera et Species Plantarum seu Prodrumus* 27. 1788, *Prodrumus Systematis Naturalis Regni Vegetabilis* 2: 66. 1825, *Linnaea* 6: 427. 1831, *Annales des Sciences Naturelles; Botanique*, sér. 3 7: 265–266. 1847 and *Botanical Gazette* 46(2): 110. 1908, *Contributions from the United States National Herbarium* 20(6): 218. 1919, *Contributions from the University of Michigan Herbarium* 7: 17–18. 1942, *Journal of the Arnold Arboretum* 54(2): 315–317, f. 1–2. 1973, *Brittonia* 40(1): 91. 1988

(Bark and roots soaked in warm water used to wash cuts; roasted powdered bark put on cuts to promote healing.)

Picramnia pentandra Sw. (*Picramnia antidesmoides* Griseb.; *Picramnia cubensis* Turcz.; *Picramnia micrantha* Tul.; *Picramnia oblongifolia* Turcz.)

Tropical America, West Indies. Small trees, dioecious, pinnately compound leaves, lack of stipules, long pendulous spike-like racemes, small unisexual inconspicuous flowers, male flowers in clusters in the axil of each bract, female flowers usually solitary in the axil of the bract, petals small or absent, round red to black fruits somewhat lobed, curved and rather angular seeds

See *Flora Indiae Occidentalis* 1: 220. 1797, *Annales des Sciences Naturelles; Botanique*, sér. 3 7: 262. 1847, *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 445. 1858, *Flora of the British West Indian Islands* 140. 1861 and *Brittonia* 40(1): 89–105. 1988

(A bitter tea to relieve colds, tuberculosis and menstrual pain.)

in English: bitterbush, snake root

Picrasma Blume Simaroubaceae

Greek *pikrasmos* ‘bitterness’, *pikros* ‘bitter, pungent, sharp’, possibly referring to the bark, source of quassia, see *Bijdr. Fl. Ned. Ind.* 5: 247. 1825.

Picrasma excelsa (Sw.) Planch. (*Aeschrion excelsa* (Sw.) Kuntze; *Picrasma excelsa* Planch.; *Picraena excelsa* (Sw.) Lindl.; *Quassia excelsa* Sw.; *Simarouba excelsa* (Sw.) DC.) (*Aeschrion* Vell., possibly from the Greek *aischron* ‘causing shame, ugly, ill-favored’.)

Jamaica.

See *Species Plantarum*, Editio Secunda 1: 553. 1762, *Histoire des plantes de la Guiane Française* 2: 859–860, pl. 331–332. 1775, *Nova Genera et Species Plantarum seu Prodrumus* 67. 1788, *Annales du muséum national d’histoire naturelle* 17: 424. 1811, *Florae Fluminensis* 58. 1825, *Bijdragen tot de flora van Nederlandsch Indië* 247. 1825, *Flora Medica*

208. 1838, *London Journal of Botany* 5: 574. 1846, *Revisio Generum Plantarum* 1: 103. 1891

(Aphicide.)

in English: Jamaica quassia

***Picrasma javanica* Blume**

SE Asia, Java. Tree, dark brown smooth bark, broad rounded terminal bud, leaves pinnately compound in spiral arrangement, whitish flowers in axillary panicles, black sub-globose fruits, leaves used as vegetable

See *Bijdragen tot de flora van Nederlandsch Indië* 5: 248. 1825, *FBI* 1: 520. 1875

(Bitter bark decoction febrifuge, astringent, given in dysentery and fevers; powder of the dry bark with cold water useful in stomach pain. Young leaves and twigs used as larvicide. Leaves applied on sores. Paste and powder of tender leaves and stem bark applied on wounds to kill maggots. Powder of the dry fruits given with cold water in stomach pain.)

in India: bonpashala, chap-alau, nim-teeta, nimteeta, sheng-lauksau, sheng-lokso

Picrasma quassioides (D. Don) Benn. var. ***quassioides*** (*Picrasma ailanthoides* (Bunge) Planch.; *Picrasma ailanthoides* Planch.; *Picrasma japonica* A. Gray; *Picrasma quassioides* Benn.; *Picrasma quassioides* (Hamilt.) Benn.; *Rhus ailanthoides* Bunge; *Simaba quassioides* D. Don)

China.

See *Species Plantarum* 1: 265–267. 1753, *Histoire des plantes de la Guiane Française* 1: 400, t. 153. 1775, *Prodrumus Florae Nepalensis* 248. 1825, *Plantae Javanicae Rariores* 198. 1844, *London Journal of Botany* 5: 573. 1846, *Memoirs of the American Academy of Arts and Science*, new series 6(2): 383. 1858

(Bark poisonous to deer. An extract of the bark used as a stomachic and a parasiticide for lice and fleas. Stem decoction insecticide.)

in English: quassia wood

in China: ku shu (yuan bian zhong)

in India: arkhar, hala, hulashi, tithai, tithari, tithu, tutai

in Japan: niga-ki, njagi, siw-ni, yukrayke-ni

Picria Lour. Scrophulariaceae (Plantaginaceae)

From the Greek *pikria* ‘bitterness’, see *Flora Cochinchinensis* 359, 392–393. 1790, *Enumeratio Plantarum ...* 1: 100. 1804, *Annales du muséum national d’histoire naturelle* 9: 320. 1807, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 812. 1876.

Picria felterrae Lour. (*Curanga amara* Juss.; *Curanga felterrae* Merr.; *Curanga fel-terrae* (Lour.) Merr.; *Curanga fel-terrae* (Lour.) Merr.; *Picria fel-terrae* Lour.)

Vietnam, Malaysia. Creeping herb

See *Flora Cochinchinensis* 2: 393. 1790, *Annales du muséum national d'histoire naturelle* 9: 320. 1807 and *An Interpretation of Rumphius's Herbarium Amboinense* 467. 1917

(Toxic glucoside. Plant decoction cardiotoxic, bitter, stimulant, vermifuge, for stomachache, colic, headache, nausea, loss of appetite; for wounds and snakebite, pound the plant and poultice. A poultice of the leaves applied for skin diseases, headache, wounds, scabies, snakebite; leaves infusion given in whooping cough; leaves eaten for stomachache.)

in China: ku xuan shen, kun ta tjao

in India: longritong

in Indonesia: daun kukurang, tamah raheut

Malay names: beremi, glumak susu, lempedu tanah

Picris L. Asteraceae

Greek and Latin *pikris* and *picris* for a bitter lettuce, a kind of salad, a plant that blooms all year round, sour soil (Plinius); see Carl Linnaeus (1707–1778), *Species Plantarum*. 2: 792. 1753, *Genera Plantarum*. Ed. 5. 347. 1754 and *Taxon* 26: 257–274, 443–452. 1977, *Watsonia* 11: 211–223. 1977, *Acta Fac. Rerum Nat. Univ. Comeniana, Bot.* 26: 1–42. 1978, *Taxon* 28: 395–397. 1979, *Taxon* 30: 698–699. 1981, *Taxon* 41: 567. 1992, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Taxon* 44: 611–612. 1995, *Verh. Zool.-Bot. Ges. Wien.* 133: 301–318. 1996, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999.

Picris hieracioides L. (*Crepis pratensis* C. Shih; *Picris hieracioides* subsp. *kamtschatica* (Ledeb.) Hultén; *Picris hieracioides* var. *alpina* Koidz.; *Picris hieracioides* var. *kamtschatica* (Ledeb.) B. Boivin)

China, Nepal, North America.

See *Species Plantarum* 2: 792. 1753, *Flora Anglica* 342. 1762, *Species Plantarum*. Editio quarta 3: 1554. 1803, *Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg. Avec l'Histoire de l'Académie* 5: 557. 1815 and *Le Naturaliste Canadien* 94(5): 632. 1967, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* 943. 1968, *Taxon* 24: 115. 1976, *Taxon* 41: 567. 1992

(Whole plant used for lungs and headache.)

in English: bugloss, hawkweed, hawkweed ox-tongue, hawkweed picris, ox-tongue

in Nepal: setik

in Tibet: tza te

Picris humilis DC. (*Crepis juvenalis* auct., sensu F.W.T.A., non F.W. Schultz, misapplied name)

Nigeria.

See *Species Plantarum* 2: 792–793. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 130. 1838 and *Compositae Newsletter* 20/21: 12–15. 1992

(Antiinflammatory.)

Picris japonica Thunberg (*Aster esquirolii* H. Lév.; *Picris davurica* Fisch. ex Hornem.; *Picris hieracioides* L. subsp. *japonica* (Thunb.) Hand.-Mazz.; *Picris hieracioides* subsp. *japonica* Krylov; *Picris mairei* H. Lév.)

China.

See *Flora Japonica*, ... 299. 1784, *Hortus Regius Botanicus Hafniensis* 155. 1819 and *Fl. Altai Government Tomsk* 3: 727. 1904, *Flore du Kouy-Tchéou* 86. 1914, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 14. 1915, *Symbolae Sinicae* 7(4): 1177. 1936, *Bot. Zhurn. SSSR.* 64(4): 582–589. 1979, *Bot. Žurn. (Moscow & Leningrad).* 79(2): 135–139. 1994, *J. Wuhan Bot. Res.* 12(2): 201–206. 1994

(Analgesic, antiinflammatory, for swelling and acute mastitis.)

in China: ri ben mao lian cai

Picrorhiza Royle ex Benth.

Scrophulariaceae (Plantaginaceae)

From the Greek *pikros* 'bitter, pungent, sharp' and *rhiza* 'a root', used as a febrifuge, see *Scrophularineae Indicae* 47. 1835.

Picrorhiza kurrooa Royle ex Benth. (*Picrorhiza kurrooa* Royle)

India, Himalaya. Perennial herb, small, long creeping root-stock, bitter roots, leaves radical rather leathery, winged sheath stalk, dense spike of flowers pale or purplish blue, capsule ovoid swollen, in rock crevices and moist, sandy soil

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 291. 1833–1840, *Scrophularineae Indicae* 47. 1835 and *CIS Chromosome Information Service* 43: 7–9. 1987, *Proceedings of the Indian National Science Academy. Part B, Biological Sciences* 55: 177–184. 1989

(Used in Ayurveda. Tonic, bitter, stomachic, cathartic, anti-allergic, anti-anaphylactic, blood purifier, diuretic, hepatoprotective, used for fevers, cold, cough, liver diseases, diarrhea, dyspepsia, to stimulate the immune system, and also applied in scorpion bites. Used as cooling cardiotoxic, antipyretic, antiperiodic, for jaundice, indigestion and common fever. Dried roots used orally in malarial fever, abdominal pain, liver complaints, anemia and jaundice; root extract given in cough, colds and fever; root decoction in jaundice, stomachache; paste of roots mixed with sugar and flower of saffron to cure dyspepsia and dysentery. Roots and stems chewed to relieve cough. Rhizomes used for children's stomach troubles known as *juka*. Veterinary medicine, much valued for horse diseases.)

in English: gentian

in China: hu huang lian

in India: hanglang, karoo, karru, karu, karwi, katki, katuki, kaur, kauri, kurro, kurru, kutaz, kutki, kutuki, tikta

in Tibet: hong-len

Picrosia D. Don Asteraceae

Greek *pikros* 'bitter, pungent, sharp', see *Transactions of the Linnean Society of London* 16: 183–184. 1830.

Picrosia longifolia D. Don (*Picrosia australis* Orbn.; *Prenanthes subdentata* Hook.; *Sonchus asper* (L.) Hill; *Sonchus asper* (L.) Vill.; *Sonchus asper* (L.) Hill subsp. *asper*; *Sonchus asper* (L.) Hill subsp. *glaucescens* (Jord.) J. Ball; *Sonchus carolinianus* Walter; *Sonchus nymanii* Tineo & Guss.; *Sonchus oleraceus* L. var. *asper* L.; *Sonchus spinosus* Lam.; *Tragopogon fritillarioides* Less.)

Africa, Europe, Asia. Annual herb, weedy, ridged, simple or branched, leaves alternate, stem and leaves with white latex, basal lobes rounded and pressed flat against the stem, inflorescence yellow, strongly flattened, ribbed smooth achene, bitter leaves eaten cooked or raw

See *Species Plantarum* 2: 793–795. 1753, *Herbarium Britannicum* 1: 47. 1769, *Flore Française* 2: 86. 1778, *Flora Delphinalis* 3: 158. 1789, *Transactions of the Linnean Society of London* 16: 184. 1830 and *Biologicheskii Zhurnal Armenii* 28(1): 95–97. 1975, *Taxon* 25: 483–500. 1976, *American Journal of Botany* 63: 1393–1403. 1976, *Botaničeskij Žurnal* (Moscow & Leningrad) 61(6): 873–880. 1976, *Watsonia* 11: 211–223. 1977, *Adansonia* 18: 19–24. 1978, *Taxon* 27: 223–231. 1978, *Taxon* 28: 395–397. 1979, *Recent Res. Kuril Islands Sakhalin* 2: 93–110. 2006

(Antiinflammatory, antimalarial. Plant pounded and applied to wounds or boils; latex used to treat warts, leaf juice applied to cuts and injuries as hemostatic. *Sonchus asper* considered poisonous.)

in English: annual sowthistle, common sowthistle, milk thistle, prickly sowthistle, rough sowthistle, sowthistle, spiny annual sowthistle, spiny sowthistle, thistle, wild thistle

in Tanzania: mchungu, olekule

in India: akatsu, jalynniar

Maori names: taweke, taweke

in Peru: casha ckaña, ccjana, ckaña, citucasha

in South Africa: doringsydissel, gewone sydisel, sydisel

Picrothamnus Nutt. Asteraceae

From the Greek *pikros* 'bitter, pungent, sharp' and *thamnus* 'shrub', see *Transactions of the American Philosophical Society*, new series, 7: 417. 1841.

Picrothamnus desertorum Nuttall (*Artemisia spinescens* D.C. Eaton)

See *Trans. Amer. Philos. Soc.*, n.s. 7: 417. 1841

(Can be poisonous or fatal to calves and lambs, if consumed in great quantity during spring months.)

in English: budsage

Pieris D. Don Ericaceae

Named for the Greek Muses, the Pierides; the cult was introduced into Pieria, a country of Macedonia, from Thrace; Pieris was a daughter of Pierus, a Muse; see *Edinburgh New Philosophical Journal* 17(33): 159. 1834, *Transactions of the American Philosophical Society*, new series, 8: 268. 1842, *A Manual of the Botany of the Northern United States* Ed. 2. 253–254. 1856, *Dendrologie* 2: 116. 1872, *Genera Plantarum* 2: 588. 1876, *Synoptical Flora of North America* 2(1): 31–32. 1878 and *Proceedings of the Washington Academy of Sciences* 3(21): 573. 1901, *Shrubs of Florida* 96, 133. 1913, *Journal of the Arnold Arboretum* 63: 136. 1982.

Pieris floribunda (Sims) Benth. (*Andromeda floribunda* Pursh ex Sims; *Andromeda floribunda* Pursh; *Portuna floribunda* (Pursh) Nutt.)

North America. Evergreen shrub, hairy twigs, flowers in terminal erect clusters, fruit a round capsule

See *Botanical Magazine* 38: pl. 1566. 1813, *Fl. Amer. Sept.* (Pursh) 1: 293–294. 1813, *Transactions of the American Philosophical Society*, new series, 8: 268. 1843[1842], *Genera Plantarum* 2(2): 588. 1876

(Leaves and nectar from flowers are poisonous, may be fatal if eaten.)

in English: evergreen mountain, fetter bush, mountain andromeda, mountain fetter-bush

Pieris formosa (Wall.) D. Don (*Andromeda formosa* Wall.; *Lyonia formosa* (Wall.) Hand.-Mazz.; *Pieris bodinieri* H. Lév.; *Pieris formosa* fo. *longiracemosa* Fang; *Pieris formosa* var. *forrestii* (Harrow) Airy Shaw; *Pieris forrestii* Harrow; *Pieris huana* W.P. Fang; *Pieris japonica* subsp. *formosa* (Wall.) Kitam.)

Nepal.

See *Asiatic Researches* 13: 395. 1820, *A General History of the Dichlamydeous Plants* 3: 832. 1834, *Edinburgh New Philosophical Journal* 17(33): 159. 1834 and *Notes from the Royal Botanic Garden, Edinburgh* 8(38): 196–197. 1914, *Botanical Magazine* 157: pl. 9371. 1934, *Symbolae Sinicae* 7(4): 790. 1936, *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series* 10: 240. 1938, *Acta Phytotaxonomica et Geobotanica* 25(2–3): 37. 1972

(Leafy shoots extract used as an anthelmintic.)

in China: mei li ma zui mu

in Nepal: peyru, probha

Pieris japonica (Thunb.) D. Don ex G. Don (*Andromeda japonica* Thunb.)

Japan. Evergreen shrub, hairless twigs, flowers in terminal drooping clusters, fruit a round capsule

(Leaves and nectar from flowers are poisonous, may be fatal if eaten.)

in English: Japanese andromeda, Japanese pieris, lily of the valley bush

in Japan: asebi

Pilea Lindley Urticaceae

Latin *pileus* or *pilleus*, *i* ‘a cap, felt cap, hat’, Greek *pilos* ‘a cap’, referring to the female flowers or to the calyx covering the achene or to the shape of one perianth segment; see John Lindley (1799–1865), in *Collectanea Botanica*; or, figures and botanical illustrations of ... Exotic Plants. 1. (Apr.) London 1821 and Fernald, M.L. “*Pilea* in eastern North America.” *Contr. Gray Herb.* 113: 169–170. 1936, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 331–367. 1937, *Fieldiana, Bot.* 24(3): 396–430. 1952, *Ann. Missouri Bot. Pilea anisophylla (Hook. f.) Wedd. (*Pilea anisophylla* var. *robusta* Hook. f.; *Pilea secunda* S.S. Chien)

India.

See *Archives du Muséum d’Histoire Naturelle* 193. 1856, *The Flora of British India* 5(15): 552. 1888 and *Bulletin of the Chinese Botanical Society* 1(1): 4. 1935, *Bulletin of Botanical Research* 2(3): 111. 1982

(Root juice to ward off dandruff.)

in China: yi ye leng shui hua

in Nepal: chhal

Pilea bracteosa Wedd. (*Pilea bracteosa* var. *striolata* Hand.-Mazz.; *Pilea obliqua* Hook. f.)

India, Himalaya. Whole plant as vegetable

See *Archives du Muséum d’Histoire Naturelle* 9(1–2): 245. 1856, *The Flora of British India* 5(15): 558. 1888 and *Symbolae Sinicae* 7(1): 137. 1929, *Cytologia* 44: 799–808. 1979

(Analgesic.)

in China: duo bao leng shui hua

in India: ekhruo

Pilea cadierei Gagnepain & Guillaumin

Vietnam. Spreading to erect, perennial herb, whitish minute flowers

See *Bulletin du Muséum d’Histoire Naturelle*, sér. 2 10(6): 629. 1938, *Cytologia* 53: 671–678. 1988, *Systematics Association Special Vol.* 40(2): 131–135. 1989

(All aerial parts poisonous, toxic to some animals.)

in English: aluminium plant, aluminum-plant, watermelon pilea

Pilea involucrata (Sims) Urban (*Pilea chrysosplenoides* Wedd.; *Pilea involucrata* (Sims) Wright & Dewar; *Pilea involucrata* Urb.; *Pilea involucrata* (Sims) Small; *Pilea ovalis* Griseb.; *Pilea pubescens* Liebm. var. *involucrata* (Sims) Wedd.; *Urtica involucrata* Sims; *Urtica involucrata* Roxb., nom. illeg.)

South America.

See *Botanical Magazine* 51: t. 2481. 1824, *Flora Indica*; or, descriptions of Indian Plants 3: 592. 1832, *Annales des Sciences Naturelles; Botanique*, sér. 3 18: 231. 1852, *Archives du Muséum d’Histoire Naturelle* 9(1–2): 258. 1856, *Flora of the British West Indian Islands* 159. 1859, *Prodr.* 16(1): 153. 1869, *Johnson’s Gard. Dict.* 1056. 1894, *Symbolae Antillanae seu Fundamenta Florae Indiae Occidentalis* (Urban). 1(2): 298. 1899 and *Ann. Missouri Bot. Gard.* 47(2): 179–198. 1960, *Fieldiana, Bot.* 40: 218–283. 1977, *Bull. Nat. Hist. Mus. Lond. (Bot.)* 31(1): 9–25. 2001

(To treat tuberculosis and swellings.)

in English: friendship plant

in Central America: panamica

Pilea japonica Handel-Mazzetti (*Achudemia japonica* Maximowicz; *Achudemia insignis* Migo; *Nanocnide closii* Léveillé & Vaniot; *Pilea japonica* (Maximowicz) Handel-Mazzetti)

China.

See *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Pétersbourg* 9: 627. 1876 and *Symb. Sin.* 7: 141. 1929

(Used to relieve internal fever and as a diuretic.)

in China: shan leng shui hua

Pilea lancifolia Hook.f.

India.

See *Fl. Brit. India* [J.D. Hooker] 5: 553. 1888

(Leaves decoction taken orally for fever in children.)

In India: sam rongtek

Pilea longicaulis Handel-Mazzetti

China.

See *Symb. Sin.* 7: 127. 1929, *Bull. Bot. Res., Harbin.* 2(3): 52. 1982

(Used as a diuretic and to treat traumatic injuries.)

in China: chang jing leng shui hua, huang hua leng shui hua, nie shi leng shui hua

Pilea microphylla (L.) Liebm. (*Dubruelia microphylla* Gaudich.; *Parietaria microphylla* L.; *Pilea callitrichoides* Schldtl.; *Pilea callitrichoides* Kunth; *Pilea callitrichoides* (Knuth) Knuth; *Pilea callitrichoides* Blume; *Pilea microphylla* Griseb.; *Pilea microphylla* Liebm.; *Pilea microphylla* var. *longifolia* Wedd.; *Pilea muscosa* Lindl., nom. illeg.; *Pilea muscosa* var. *microphylla* (L.) Bot. Missouri Bot. Gard.* 85(3): 2479–2495. 2001, *Bull. Nat. Hist. Mus. Lond. (Bot.)* 31(1): 9–25. 2001

(Whole plant diuretic, anthelmintic, a paste applied on rheumatic joints and skin diseases, for gastric and intestinal troubles. Leaves paste applied to sores and bruises.)

in English: artillery plant, artillery weed, gunpowder plant, pistol plant, rockweed

in China: xiao ye leng shui hua

in Japan: kogome-mizu

in the Philippines Isl.: alabong, isang dakot na bigas

Pilea oxyodon Wedd. (*Pilea bracteosa* var. *oxyodon* (Wedd.) H. Hara)

Nepal, India. Whole plant used as vegetable

See *Archives du Muséum d'Histoire Naturelle* 9(1–2): 221. 1856 and *Flora of Eastern Himalaya* 3: 24. 1975

(Diuretic, astringent, for skin diseases.)

in China: ya zhi leng shui hua

in India: ekhruo

Pilea peploides W.J. Hooker & Arnott (*Dubruelia peploides* Gaudichaud-Beaupré; *Pilea peploides* (Gaudichaud-Beaupré) W.J. Hooker & Arnott; *Pilea peploides* var. *major* Weddell)

China.

See *Voy. Uranie, Bot.* 495. 1830, *The Botany of Captain Beechey's Voyage* 96. 1832

(Used to relieve pain and to treat snakebites.)

in China: tai shui hua

Pilea pubescens Liebm. (*Pilea guyanensis* Wedd.; *Pilea pubescens* var. *guyanensis* (Wedd.) Wedd.)

Brazil. Herbaceous weed

See *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 302. 1851, *Annales des Sciences Naturelles; Botanique*, sér. 3 18: 221. 1852, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 153. 1869 and *Bull. Nat. Hist. Mus. Lond. (Bot.)* 31(1): 16. 2001

(Whole plant in hot water, allowed to steep, the mixture used as a wash for snakebite.)

Pilea pumila A. Gray (*Pilea mongolica* Weddell; *Pilea pumila* (L.) A. Gray; *Pilea pumila* Liebm.; *Pilea viridissima* Makino; *Urtica pumila* L.)

North America.

See *Sp. Pl.* 2: 984. 1753, *Bot. Mag. (Tokyo)* 10: 364. 1896

(Diuretic, to alleviate itching.)

in English: clearweed

in China: tou jing leng shui hua

Pilea racemosa (Royle) Tuyama (*Pilea subalpina* Hand.-Mazz.; *Pilea wightii* Wedd. var. *roylei* Hook. f.; *Procris racemosa* Royle)

India, China.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* pl. 83, f. 1. 1836, *Annales des Sciences Naturelles; Botanique*, série 4 1: 186. 1854, *The Flora of British India* 5(15): 555. 1888 and *Symbolae Sinicae* 7(1): 142, pl. 3, f. 4. 1929, *Flora of Eastern Himalaya* 1: 61. 1966

(Paste of leaves as an insecticide and a poison.)

in China: ya gao shan leng shui hua

in India: gileng-seley

Pilea serpyllifolia (Poir.) Wedd. (*Parietaria serpyllifolia* Poir.)

South America.

See *Species Plantarum* 2: 1052. 1753, *Encyclopédie Méthodique, Botanique* 5: 16. 1804, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 107. 1869

(Fresh leaves juice used against fevers and for intestinal troubles.)

in Ecuador: preñadilla

Pilea swinglei Merrill (*Pilea crateriforma* Metcalf; *Pilea henryana* C.H. Wright; *Pilea peplodes* (Gaudichaud-Beaupré) J.D. Hooker & Arnott var. *minutissima* Hsu)

China.

See *Philipp. J. Sci., Ser. C.* 13: 136. 1918

(Used to relieve fever.)

in China: bo li cao

Pilea verrucosa Handel-Mazzetti (*Pilea gracillis* Handel-Mazzetti; *Pilea nanchuanensis* C.J. Chen; *Pilea purpurella* C.J. Chen; *Pilea symmeria* Weddell var. *subcoriacea* Handel-Mazzetti; *Pilea verrucosa* Killip; *Pilea verrucosa* Handel-Mazzetti var. *verrucosa*)

China.

See *Collectanea Botanica*, sub pl. 4. 1821, *Archives du Muséum d'Histoire Naturelle* 9(1–2): 246. 1856 and *Symb. Sin.* 7: 134. 1929, *Bull. Bot. Res., Harbin.* 2(3): 52, 56. 1982

Piliostigma Hochst. Fabaceae (Caesalpiaceae, Cercideae)

(Used to stimulate the spleen and relieve edema.)

in China: liu guo leng shui hua

***Piliostigma* Hochst. Fabaceae (Caesalpiaceae, Cercideae)**

Greek *pilos* 'hat, cap, felt cap' (or *pilos* 'hair') and *stigma*; *pilleus*, *pileus* was worn by the Romans at festivals, and was given as sign of freedom to a slave; see Christian Ferdinand Hochstetter (1787–1860), *Flora oder allgemeine Botanische Zeitung*, 29: 598. 1846, *Genera Plantarum* 1: 576. 1865 and *Advan. in Legume Systematics*, Part 1: 107–116. 1981. Often in *Bauhinia*.

Piliostigma reticulatum (DC.) Hochst. (*Bauhinia reticulata* DC.)

Tropical Africa. Perennial non-climbing tree, shrub, trunk twisted, dark bark, coriaceous leaves, short terminal or axillary panicles, white flowers, woody pods shortly pubescent, cattle food, pods edible, seeds eaten by humans

See *Species Plantarum* 1: 374–375. 1753, *Mémoires sur la Famille des Légumineuses* 13: 484. 1825, *Flora* 29: 598–599. 1846 and *Journal of Ethnopharmacology* 92: 233–244. 2004

(Febrifuge, expectorant. Powder of roots on ulcer; juice of fresh roots, local application for wounds. Infusion of leaves after a difficult delivery. Bark astringent, a decoction used for hemorrhoids; gum laxative. Leaves of *Eucalyptus camaldulensis* with ripe fruits of *Piliostigma* boiled and taken orally for menstrual disorders. Magic, contact therapy, stem bark tied round the waist helping to delay childbirth.)

in Burkina Faso: gountour-sâ, li-nabanjali, nabali, nabandi, nyama, vononyobyolo

in Cameroon: kargo

in Guinea: barke, niama, yorokoye

in Ivory Coast: bagande, baghen daaga, banya, barendé, barkéï, barkel, barkelehi, barna, bê, bembamo, bodengé, diamba, gaméla, gnama ba, gnambélé, gountour sa, iéouram, iéoura, insinko, kalongo, li-nabanjali, maerkehi, nabali, nabandi, niama, niamairi, nyama, piti pata, thîama, vaniéno, vononyobyolo

in Mali: barkeewi, gnama, koibo, koiboi

in Mauritania: barkeewi

in Niger: barky, hadugu, kalgo, kalul, kosorey

in Nigeria: mpulatake; kalga, kalgo, kargo (Hausa); kharum (Shuwa Arabic); karkehi (Fula); kalur (Kanuri)

in Senegal: bakehi, barkede, barkeewi, barkehi-faara, barkevi, barkey, barki, bordedji, bu rekatod, dama, gigis, guiguiguis, lag, mbarkey, nama, nama ke, namatene, namele, ngayoh, ngigis, n'guiguiguis, niama, niama tiéné

in Sudan: kharub, tambarib

in Togo: klo, nyama, okokotaka, tamenasi

in W. Africa: barki, kalgo, kortige, kortinge, kosorey, niama-keni (Bambara), nyama ke, nyamace

in Yoruba: abafe

Piliostigma rufescens (Lam.) Benth. (*Adenolobus rufescens* (Lam.) Schmitz; *Bauhinia rufescens* Lam.)

Tropical Africa. Perennial non-climbing tree

See *Encyclopédie Méthodique, Botanique* 1(2): 391. 1785 and *Boletim da Sociedade Broteriana*, ser. 2 29: 37. 1956 [1955], *Bulletin du Jardin Botanique National de Belgique* 43(3–4): 399. 1973, *Kew Bulletin* 31: 399–406. 1976, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006

(Antimicrobial. Roots used as astringent and febrifuge. Leaves for eye treatment; powdered leaves for snakebite; leaves decoction for gingivitis.)

in Burkina Faso: ti pohega

in Mali: cartu-baleejo, séségéré

in Niger: dirga, jiga, jirga, nammare, nammary, shishi, sisi, taedaeyni

in Nigeria: disga

in Senegal: cartu-baleejo, mamadi, namariyel, rand

in Sudan: kulkul

in Togo: nator

Piliostigma thonningii (Schumach.) Milne-Redh. (*Bauhinia thonningii* Schumach. & Thonn.; *Bauhinia thonningii* Schum.; *Piliostigma thonningii* (Schumach. & Thonn.) Milne-Redh.) (the specific name after the Danish botanist and traveller Peter Thonning, 1775–1848, plant collector, between 1799–1803 he was with the Danish Ole Haaslund Smith (d. 1802) on a botanical expedition to Danish Guinea, now in Ghana. See Martin H. Vahl (1749–1804), *M. Vahlilii ... Enumeratio Plantarum*. Hauniae (& Lipsiae) [1804–] 1805–1806, Heinrich Christian Friedrich Schumacher (1757–1830), *Beskrivelse af Guineiske Planter som ere fundne af Danske Botanikere isaer af Etatsraad Thonning*. [Copenhagen 1828–1829] and Carl Frederik Albert Christensen (1872–1942), *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926 and *Den danske botaniske litteratur 1880–1911*. Kopenhagen 1913, C.D. Adams, “Activities of Danish botanists in Guinea, 1783–1850.” in *Transactions of the Historical Society of Ghana*. 3: 30–46. 1957)

Guinea. Perennial non-climbing tree, shrub or small tree, spreading, rounded crown, curving branches, trunk twisted, coriaceous bilobed leaves with reddish pubescence, white-cream-pinkish flowers in small panicles axillary or terminal, reddish sepals, woody pubescent pendulous twisted

Pods, people eat dried pod, fruits for fodder, pods eaten by chimpanzees, sweet pod pulp eaten in small amounts as an emergency food, bee forage, in woodland, seasonally flooded grassland

See *Beskrivelse af Guineiske planter* 203–204. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 223–224. 1828 and *Kew Bulletin* 1, 10–25. 1937, *Hooker's Icones Plantarum* 35: pl. 3460, p. 2. 1947, *Journal of Veterinary Pharmacology and Therapeutics* 3: 261–273. 1980, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Sci. Rep. Res. Inst. Evol. Biol.* 3: 57–71. 1986, *Journal of Ethnopharmacology* 21: 109–125, 253–277. 1987, *Economic Botany* 44(3): 382–390. 1990, *Journal of Ethnopharmacology* 67: 225–228. 1999, *Journal of Ethnopharmacology* 70: 281–300. 2000, *African Journal of Traditional, Complementary and Alternative Medicines* 2: 134–152. 2005, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006

(Shoots of the plant eaten raw for dysentery. For cough and influenza, decoction of roots, leaves and barks. Leaves decoction febrifuge, tonic, astringent, used for gastric pains, dysentery, diarrhea and gingivitis. Leaves cooked in pot with water and smoke/steam inhaled to get rid of coughs or demons; tender leaves chewed and the juice swallowed to treat stomachache, coughs and snakebite. The ash obtained from burnt leaves is rubbed into snakebite wounds after scarification in order to hasten healing. Roots anthelmintic, used to treat prolonged menstruation, hemorrhage and miscarriage in women and also for coughs, colds, body pain and venereal diseases. Bark infusion used to treat coughs, colds, chest pains and snakebite. Leaves of *Eucalyptus camaldulensis* with ripe fruits of *Piliostigma* boiled and taken orally for menstrual disorders. Febrifuge, the decoction of the leaves of *Guiera senegalensis*, *Piliostigma thonningii*, *Piliostigma reticulatum*, *Tapinanthus bangwensis* (Engl. & K. Krause) Danser, *Tapinanthus dodoneifolius* (DC.) Danser, *Tapinanthus ophiodes* (Sprague) Danser.)

(Expectorant. Leaf decoction or infusion for flu, chills, flatulence, cold in chest, fever, pneumonia, stroke, to ease cramps.)

in English: allspice, bay leaf, bay leaf tree, bay rum, bay tree, Jamaica pepper, spice, spice leaf

in Dominica: bois d'Inde, bwa denn

Pimpinella L. Apiaceae (Umbelliferae)

From the MedLatin *pipinella*, perhaps from *pepo*, *peponis* 'a pumpkin', or derived from Latin *pampinus*, *i* 'a tendril or young shoot of a vine, a vine-leaf'; see Carl Linnaeus, *Species Plantarum*. 1: 263–264. 1753 and *Genera Plantarum*. Ed. 5. 128. 1754, *The British Herbal* 424. 1756, *Elenchus Plantarum Novarum* 46. 1838 and *Flora URSS* 16: 599. 1950, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1095–1096. New York 1967, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 929. Bologna 1985, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 486. Torino 1986, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 502, 517. Firenze 1994, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 485–486. Basel 1996. This large, widespread, and taxonomically complex genus is generally characterized by the small, rather featureless fruits. Chinese species *Pimpinella bisinuata*, *Pimpinella candolleana*, *Pimpinella coriacea*, *Pimpinella renifolia*, *Pimpinella rockii*, *Pimpinella tibetica* and *Pimpinella yunnanensis* form part of a species complex with papillose or granular fruit and heteromorphic leaves.

Pimpinella anisum L. (*Anisum vulgare* Gaertner; *Apium anisum* (L.) Crantz; *Carum anisum* (L.) Baillon; *Selinum anisum* (L.) E.H.L. Krause; *Sison anisum* (L.) Sprengel; *Tragium anisum* (L.) Link)

Latin America, China.

See *Species Plantarum* 1: 263–264. 1753, *The British Herbal* 424. 1756, *Classis Umbelliferarum*: emendata cum generali seminum tabula et figuris aeneis in necessarium Instit. rei herbar. supplementum 101. 1767, *De Fructibus et Seminibus Plantarum...* 1: 102, pl. 23, f. 1. 1788 and *Deutschl. Fl., Abt. II, Cryptog.* 12: 56. 1904, *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, *Biologicheskie Nauki (Alma-Ata)* 11: 78–84. 1988

(Seeds infusion carminative, tonic, anthelmintic, antispasmodic and expectorant, digestive, stomachic; roots used as a cathartic, stomachic.)

in English: anise, anise burnet saxifrage, anise plant, aniseed, sweet cumin

in Bolivia: anis, pampa anisa

in China: huai hsiang, huei hsiang, hui qin, pa yueh chu

in India: dodda-jirige, muhuri

Malayan names: anise, jintan manis

in Arabic: habba helwa, habbet hléoua

Pimpinella atropurpurea C.Y. Wu ex R.H. Shan & F.T. Pu (*Pimpinella chateriana* J.F.M. Cannon & Farille)

China.

See *Species Plantarum* 1: 263–264. 1753 and *Acta Phytotaxonomica Sinica* 21(1): 81, pl. 1, f. 1–5. 1983

(Astringent, stomachic, cooling.)

in China: shen zi hui qin

Pimpinella candolleana Wight & Arnott (*Carum candolleianum* (Wight & Arnott) Franchet)

China.

See *Species Plantarum* 1: 263–264. 1753, *Prodr. Fl. Ind. Orient.* 1: 369. 1834, *Bull. Soc. Philom. Paris*, sér. 8, 6: 128. 1894 and *Cytologia* 51: 479–488. 1986, *Journal of Cytology and Genetics* 23: 38–52. 1988

(Carminative, aphrodisiac.)

in China: xing ye hui qin

Pimpinella coriacea (Franchet) H. de Boissieu (*Carum coriaceum* Franchet)

China.

See *Species Plantarum* 1: 263–264. 1753, *Bull. Soc. Philom. Paris*, sér. 8, 6: 127. 1894 and *Bull. Soc. Bot. France* 56: 351. 1909

(Carminative, tonic.)

in China: ge ye hui qin

Pimpinella diversifolia DC.

China, E Asia, Himalayas. Erect branched herb, greenish-white flowers, ovoid fruits, widespread and very variable species

See *Species Plantarum* 1: 263–264. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 122. 1830 and *Kromosomo, II* 6: 178–185. 1977, *Taxon* 29: 543. 1980, *Candollea* 35: 497–510. 1980, *Plant Systematics and Evolution* 154: 11–30. 1986, *Newslett. Int. Organ. Pl. Biosyst. (Pruhonice)* 31: 13–16. 1999

(Roots and seeds stomachic, carminative, aphrodisiac. Extract of leaves and seeds used in skin diseases.)

in China: yi ye hui qin

in India: saonf

Pimpinella heyneana Wall. (*Helosciadium heyneanum* DC.; *Pimpinella heyneana* (DC.) Benth.)

India. Herb, seeds used as condiment

See *Numer. List* [Wallich] n. 566. 1829, *Prodr.* (DC.) 4: 106. 1830, *Gen. Pl.* [Bentham & Hooker f.] 1(3): 894. 1867 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Cytologia* 45: 389–402. 1980

(Plant extract given with honey or *Madhuca indica* liquor in asthma and rheumatism; plant extract drunk for stomachache and indigestion. Seeds aphrodisiac.)

in India: azola, dongar-jeera, kavar, nadgiova, ran-erandos

Pimpinella hirtella A. Rich. (*Pimpinella peregrina* auct., plur. Afr., non L., misapplied name; *Pimpinella volkensis* Engl.)

East Africa.

See *Species Plantarum* 1: 263–264. 1753, *Tentamen Florae Abyssinicae ...* 1: 323. 1848

(Astringent, stomachic.)

Pimpinella monoica Dalzell

India.

See *Hooker's J. Bot. Kew Gard. Misc.* 3: 212. 1851 and *J. Indian Bot. Soc.* 57: 342–345. 1978

(Powdered seeds for jaundice.)

in India: tinpano

Pimpinella pruatjan Molkenb.

Java, Indonesia. Perennial aromatic herb

See Junghuhn, Franz Wilhelm (1809–1864), *Plantae Junghuhnianae*: enumeratio plantarum, quas, in insulis Java et Sumatra detexit Fr. Junghuhn. Lugduni-Batavorum [Leiden, The Netherlands], Parisiis, [1853?]-1857 [Confusion on dating of fascicles exists.]

(Aromatic roots diuretic, aphrodisiac.)

in Indonesia: antanan gunung, purwa tjeng

Pimpinella stewartii (Dunn) E. Nasir (*Eriocyclus stewartii* (Dunn) Wolff; *Pimpinella stewartii* (Dunn) Nasir; *Pituranthos stewartii* Dunn)

Pakistan.

See *Species Plantarum* 1: 263–264. 1753 and *Flora of West Pakistan* 20: 66. 1972, *Plant Systematics and Evolution* 154: 11–30. 1986

(Stomachic.)

Pimpinella thellungiana H. Wolff

China.

See *Species Plantarum* 1: 263–264. 1753 and *Das Pflanzenreich* IV 228(Heft 90): 304. 1927

(Aphrodisiac, astringent, for skin diseases, mental illness.)

in China: yang hong shan

Pimpinella tibetica H. Wolff

China.

See *Species Plantarum* 1: 263–264. 1753 and *Repert. Spec. Nov. Regni Veg.* 27(741–750): 319–320. 1930

(Stomachic, aphrodisiac.)

in China: zang hui qin

Pimpinella wallichiana (Miq.) Gandhi

India.

See *Fl. Hassan Distr. Karnataka, India* 417. 1976, *Indian Forester* 102(4): 232. 1976, *Fl. Maharashtra* 2: 360. 1998

(Resin for ulcers, boils.)

Pimpinella yunnanensis (Franchet) H. Wolff (*Carum yunnanense* Franchet; *Pimpinella pseudocandolleana* H. Wolff)

China.

See *Species Plantarum* 1: 263–264. 1753, *Bull. Soc. Philom. Paris*, sér. 8, 6: 128. 1894 and *Das Pflanzenreich* IV 228(Heft 90): 266. 1927, *Repertorium Specierum Novarum Regni Vegetabilis* 27(734–740): 189. 1929

(Leprosy, cooling, febrifuge.)

in China: yun nan hui qin

Pinanga Blume Arecaceae (Palmae)

From the Malayan name *pinang*, see *Bulletin des Sciences Physiques et Naturelles en Néerlande* 1: 65. 1838, Wendland & O. Drude, “Palmae Australasicae.” in *Linnaea* 39: 155–238. 1875 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 188. 1936, O. Beccari & R.E.G. Pichi Sermolli, “Subfamiliae Arecoidearum Palmae Gerontogaeae.

Tribuum et Generum Conspectus.” 25 Mar. 1955, seors. impr. ex *Webbia*. 11: 1–187. 31 Mar. 1956, Edwino S. Fernando, “A revision of the genus *Nenga*.” *Principes* 27(2): 55–70. 1983.

Pinanga coronata (Blume ex Mart.) Blume (*Areca coronata* Blume; *Areca coronata* Blume ex Mart.; *Areca costata* (Blume) Kurz; *Areca costata* Kurz; *Areca oriziformis* var. *gracilis* Giseke; *Pinanga coronata* var. *teijsmannii* Scheff.; *Pinanga costata* Blume; *Pinanga kuhlii* Blume; *Pinanga kuhlii* var. *alba* Scheff.; *Pinanga kuhlii* var. *sumatrana* Scheff.; *Pinanga noxa* Blume; *Pinanga sumatrana* (Scheff.) (Green bark crushed and steeped and the infusion used to bathe swollen joints and limbs, in beriberi; this treatment can cause miscarriage and is avoided for swelling in pregnant woman. Endosperm of the fruit used as an ingredient of the masticatory called *sirih*; endosperm eaten raw to lower blood pressure, to purge, to kill intestinal worms.)

in Indonesia: gaat

Pinanga disticha (Roxb.) H. Wendl. (*Areca curvata* Griff.; *Areca disticha* Roxb.; *Areca humilis* Roxb. ex H. Wendl.; *Pinanga bifida* Blume; *Ptychosperma disticha* Miq.; *Ptychosperma distichum* (Roxb.) Miq.; *Ptychosperma distichum* Miq.; *Seaforthia disticha* (Roxb.) Mart.; *Seaforthia disticha* Mart.)

Thailand, Sumatra.

See *Hist. Nat. Palm.* 3: 184–185. 1838, *Rumphia* 2: 92. 1839, *Fl. Ned. Ind.* 3: 28. 1855, *Palmiers* 231, 253. 1878

(Stomachic, an antidote to poisons ingested.)

Malay name: pinang penawar

Pinanga gracilis Blume (*Areca gracilis* Buch.-Ham.; *Areca gracilis* Roxb., nom. illeg.; *Nenga gracilis* (Blume) Becc.; *Pinanga patula* Blume var. *gracilis* Scheff.; *Seaforthia gracilis* (Blume) Mart.; *Seaforthia gracilis* Mart.)

Tibet, Nepal. Slender palm, pinnate leaves, 2-fid solitary spadix, scarlet to orange-red fruits

See *Mem. Wern. Nat. Hist. Soc.* 5(2): 310. 1826, *Fl. Ind.* ed. 1832, 3: 619. 1832, *Hist. Nat. Palm.* 3: 184–185. 1838, *Rumphia* 2: 77, 87. 1839, *Natuurk. Tijdschr. Ned.-Indië* 32: 178. 1871, *Malesia* 1: 25. 1877

(Nuts used as masticatory.)

in China: xian xi shan bin lang

in India: turaung-araung

in Brazil: pinanga rabo de peixe

Pinellia Tenore Araceae

Named for the Italian Giovanni Vincenzo Pinelli, 1535–1601, owner of a botanic garden in Naples; see D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988.

Pinellia pedatisecta Schott (*Pinellia tuberifera* Ten. var. *pedatisecta* (Schott) Engler; *Pinellia wawrae* Engler; this species dedicated to the Austrian (b. Brünn) botanist Dr. Heinrich Ritter Wawra von Fernsee (Ritter von Fernsee), 1831–1887 (d. near Vienna), traveller, plant collector (Brazil, Luanda and South Africa), ship’s surgeon, ennobled 1873; see John H. Barnhart, *Biographical Notes upon Botanists*. 3: 466. 1965)

C. & S. China. Perennial herb, strong taste, tubers whitish oval to much depressed, thin blades weakly glossy and dark green above, spadix peduncle greenish, erect-spreading inflorescence among leaves, female and male flowers on the axis, fruits medium dark yellow-green, shady places, on damp slopes, under trees

See *Atti della R. Accademia delle Scienze Fisiche e Matematiche di Napoli* 4: 57, 69. 1839 [also *Atti Reale Accad. Sci. Sez. Reale Borbon.*], *Oesterreichisches Botanisches Wochenblatt* 7: 341. 1857, *Monographiae Phanerogamarum* 2: 557, 567. 1879 and *Acta Phytotaxonomica Sinica* 24: 157–160. 1986, *Acta Phytotaxonomica Sinica* 35(3): 208–214. 1997, *China Journal of Chinese Materia Medica* 23(2): 67–8, 89, 127. 1998, *China Journal of Chinese Materia Medica* 28(11): 1015–8. 2003, *China Journal of Chinese Materia Medica* 29(10): 963–6. 2004, *Planta Med.* 71(6): 580–4. 2005, *J. Biosci.* 32(2): 241–9. 2007

(Toxic traditional Chinese medicinal plants. Stinging crystals. Poisonous tubers used as medicine for treatment of enlargement of lymph node, apoplexy, tetanus, rheumatic disease and urinary tract infection; external use for snakebite.)

in China: huzhang, hu zhang, tian nanxing, ben cao gang mu, xin xiu ben cao, zhang ye ban xia

Pinellia ternata (Thunb.) Makino (*Alocasia ternata* (Thunb.) Raf.; *Arisaema cochinchinense* Blume; *Arisaema loureiri* Blume; *Arisaema macrourum* (Bunge) Kunt; *Arisaema ternatum* (Thunb.) Virol.* 150(1): 125–135. 2005 [Further molecular characterisation of potyviruses infecting aroid plants for medicinal use in China.], *Planta Med.* 72(9): 844–847. 2006 [Authentication of *Pinellia ternata* and its adulterants based on PCR with specific primers.]

(Standard BanXia. Tuber poisonous, used as traditional Chinese medicine for treatment of coughs, for reducing phlegm, stopping vomit; externally for treatment of breast mastitis and otitis media. Tubers of *Pinellia ternata* are one of the well-known traditional Chinese medicines; the

fresh tuber contains a substance that is strongly irritating. According to the *Chinese Pharmacopoeia*, the remedy is commonly used as an antitussive and expectorant. The plant is applied externally to wounds to obtain a hemostatic and analgesic effect.)

in China: ban xia, pan hsia

in Japan: karasu-bishaku (karasu = crow)

Pinguicula L. Lentibulariaceae

Latin *pinguiculus*, *a*, *um* ‘fattish, somewhat fat’, *pinguis*, *e* ‘fat’, referring to the appearance of the viscid leaves, see *Species Plantarum* 1: 17. 1753, *Analyse des Familles de Plantes* 19, 23. 1829.

Pinguicula lutea Walter

North America. Perennial herb

See *Flora Caroliniana*, secundum ... 63. 1788

(Analgesic, stomachic, for abdominal pain, colic.)

in English: yellow butterwort

Pinguicula pumila Michx. (*Pinguicula pumila* Michx. var. *buswellii* Moldenke)

North America. Perennial herb

See *Flora Boreali-Americana* 1: 11. 1803 and *Phytologia* 1(2): 98–99. 1934

(Analgesic, stomachic, for abdominal pain, colic.)

in English: small butterwort

Pinguicula vulgaris L. (*Pinguicula vulgaris* L. var. *americana* A. Gray)

North America. Perennial herb

See *Species Plantarum* 1: 17. 1753 and *Fragm. Florist. Geobot.* 1: 16–31. 1954, *Acta Fac. Rerum Nat. Univ. Comeniana*, *Bot.* 25: 1–18. 1976, *Taxon* 31(2): 344–360. 1982, *Preslia* 63: 323–328. 1991, *Opera Bot.* 137: 1–42. 1999

(Ceremonial, magico-religious beliefs, good luck charm.)

in English: butterwort, common butterwort

Pinus L. Pinaceae

Ancient Latin name *pinus*, *i*, probably from *pix*, *piceis* ‘pitch’ (Akkadian *pehum* ‘to caulk’, *pihu*, *pehum* ‘caulker’); Anglo-Saxon *pin*, *pinhnutu*, Sanskrit *pitu-daruh* ‘a kind of pine’; see Carl Linnaeus, *Species Plantarum*. 2: 1000–1002. 1753, *Genera Plantarum*. Ed. 5. 434. 1754, *Elementa botanica* ... 3: 369. 1790, *Systema orbis vegetabilium* 35. 1830, *Lotos* 4: 94. 1854 and *Flora of the Southeastern United States* 29, 1326. 1903, *Bulletin of the Torrey Botanical Club* 32: 597. 1905, *Fieldiana, Bot.* 24(1): 36–56., Ernest Weekley, An

Pinus aristata Engelm. (*Pinus balfouriana* subsp. *aristata* (Engelm.) Engelm.; *Pinus balfouriana* Balf. var. *aristata* (Engelm.) Engelm.; *Pinus balfouriana* var. *aristata* Engelm.)

North America. Perennial tree

See *American Journal of Science, and Arts*, ser. 2, 34: 331. 1862, *Wheeler* 6: 375. 1878, *Geological Survey of California, Botany* 2: 125. 1880, *Transactions of the Academy of Science of St. Louis* 4: 176. 1880 and *J. Fujian Coll. Forest.* 12: 437–444. 1992

(Poultice of heated pitch applied to sores and boils.)

in English: bristlecone pine, Colorado bristlecone pine, Rocky Mountains bristlecone pine

Pinus banksiana Lamb. (*Pinus divaricata* (Aiton) Sudw.; *Pinus divaricata* Dum. Cours.; *Pinus sylvestris* var. *divaricata* Aiton)

North America. Perennial tree

See *Species Plantarum* 2: 1000–1002. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 366. 1789, *A Description of the Genus Pinus* 1: 7, pl. 3. 1803, *Le Botaniste Cultivateur*, ... edition seconde 6: 457. 1811 and *Journal of Heredity* 72: 193–198. 1981, *Plant Systematics and Evolution* 153: 119–132. 1986, *Memoirs of the Faculty of Education, Ehime University, Series e, Natural Science* 8: 1–108. 1988, *Biologia* 48: 95–100. 1993

(Inner bark decoction applied to cuts, boils, wounds. Anticonvulsive, stimulant, for stomachache, fainting.)

in English: gray pine, jack pine, Labrador pine, scrub pine

in French: pin gris

in China: bei mei duan ye song

Pinus caribaea Morelet (*Pinus caribaea* var. *hondurensis* (Sénécl.) W.H.G. Barrett & Golfari; *Pinus hondurensis* Loock)

West Indies.

See *Bull. Forest. Union S. Africa* no. 35: 210, tab. 25. 1950 [Pines Mexico & Brit. Honduras], *Fieldiana, Bot.* 24(1): 36–56. 1958, *Ceiba* 22(1): 41–64. 1978, *Journal of Ethnobiology* 3(2): 149–156. December 1983, *Brenesia* 21: 269–291. 1983, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 9–10. 2003

(Oil used in inhalers. Love potion, inner bark.)

in English: Caribbean pine, Cuban pine

in China: jia le bi song

Pinus contorta Douglas ex Loudon (*Pinus contorta* Douglas ex Loudon subsp. *contorta*)

North America, Mexico. Perennial tree

See *Arboretum et Fruticetum Britannicum* 4: 2292, f. 2210, 2211. 1838 and *Biologia* (Bratislava) 48: 95–100. 1993

(Resin used for consumption, tuberculosis, stomach pain and stomach troubles, colds, coughs, burns, body sores, boils, sores, skin diseases, broken skin, heart trouble, rheumatism, paralysis, ulcers. Inner bark blood purifier, purgative and diuretic, cathartic, for consumption, tuberculosis and gonorrhoea.)

in English: beach pine, lodgepole pine, shore pine

Pinus contorta Douglas ex Loudon var. *murrayana* (Balf.) Engelm. (*Pinus contorta* Douglas ex Loudon subsp. *murrayana* (Balf.) Critchfield; *Pinus contorta* subsp. *murrayana* (Balf.) Engelm.; *Pinus murrayana* Balf.)

North America. Perennial tree

See *Geological Survey of California, Botany* 2: 126. 1880, *Transactions of the Academy of Science of St. Louis* 4: 177. 1880 and *Publication of the Maria Moors Cabot Foundation for Botanical Research* 3: 106. 1957

(For eye problems, sore eyes.)

in English: Sierra lodgepole pine

Pinus coulteri Lamb. ex D. Don (*Pinus macrocarpa* Lindl.; *Pinus ponderosa* C. Lawson; *Pinus ponderosa* Douglas ex Lawson & C. Lawson; *Pinus ponderosa* subsp. *coulteri* (D. Don) E. Murray; *Pinus ponderosa* subsp. *coulteri* (Lamb. ex D. Don) E. Murray; *Pinus sabiniana* Douglas ex D. Don)

North America. Perennial tree

See *Species Plantarum* 2: 1000–1002. 1753, *Edwards's Botanical Register* 26: 62. 1832, *Descr. Pinus* (ed. 3) 1832, *Transactions of the Linnean Society of London* 17: 440. 1836, *Agricultural Monographs. Rocky Mts.* 2: 319. t. 4. 1845, *Synopsis Coniferarum* 183. 1847, *Report on the Colorado River* 4: 28, pl. 4. 1861, *Prodr.* (DC.) 16(2.2): 385. 1868 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 123. 1904, *Bulletin of the Torrey Botanical Club* 32(11): 597. 1905, *Phytologia* 17(4): 331–335. 1968, *Kalmia* 12: 22. 1982, *Notes from the Royal Botanic Garden, Edinburgh* 44: 278–279. 1987, *Phytologia* 68: 54. 1990

(Carminative, contraceptive, antidiarrheal, anthelmintic, antiemetic, astringent, analgesic, disinfectant, for intestinal parasites, diarrhea, nausea, cuts and sores, rheumatism, cold, cough, to stop menstruation. Veterinary medicine, gum poultice applied to horses for cuts. Magic, witchcraft medicine, ritual, gum applied to forehead as a protection from sorcery.)

in English: nut pine, single-leaf pinyon pine, singleleaf pinyon, stone pine

Pinus monticola Douglas ex D. Don (*Pinus strobus* subsp. *monticola* (Douglas ex D. Don) E. Murray; *Pinus strobus* var. *monticola* (Douglas ex D. Don) Nutt.; *Strobus monticola* (Douglas ex D. Don) Rydberg)

North America. Tree, roasted seeds eaten

See *Species Plantarum* 2: 1000–1002. 1753, *Descr. Pinus* (ed. 3) 1832, *The North American Sylva* 3: 118. 1849 and *Flora of the Rocky Mountains* 1060. 1917, *Kalmia* 12: 23. 1982, *Silvae Genet.* 32: 119–124. 1983, *Memoirs of the Faculty of Education, Ehime University, Series e, Natural Science* 8: 1–108. 1988

(Astringent, for skin diseases.)

in English: white pine

Pinus oocarpa Schiede ex Schltdl. (*Pinus oocarpa* fo. *trifoliata* Martínez, nom. inval.; *Pinus oocarpa* var. *manzanoi* Martínez; *Pinus oocarpa* var. *oocarpoides* (Lindl. ex Loudon) Endl.; *Pinus oocarpoides* Lindl. ex Loudon; *Pinus tecumumani* Schwertfeger, nom. inval.)

Mexico, Guatemala. Tree

See *Linnaea* 12: 491–492. 1838, *Synopsis Coniferarum* 152. 1847, *An Encyclopaedia of Trees and Shrubs* 1118. 1883 and *Anales del Instituto de Biología de la Universidad Nacional de México* 11: 70. 1940, *Anales del Instituto de Biología de la Universidad Nacional de México* 16: 197. 1945

(Sap applied to skin to kill worms.)

Pinus palustris Mill. (*Abies alba* (Aiton) Michx.; *Picea alba* (Aiton) Link; *Pinus alba* Aiton; *Pinus australis* F. Michx.; *Pinus australis* var. *filius* Michx.; *Pinus elliotii* Engelm.; *Pinus longifolia* Salisb.)

North America. Perennial tree

See *The Gardeners Dictionary*: ... eighth edition no. 14. 1768, *Hortus Kewensis*; or, a catalogue ... 3: 371. 1789, *Flora Boreali-Americana* 2: 207. 1803, *Histoire des Arbres Forestiers de l'Amérique Septentrionale* 1: 64, pl. 6. 1810 and *Proc. Fac. Agric. Kyushu Tokai Univ.* 1: 7–16. 1982

(Analgesic, antirheumatic. Pine oil an ingredient of sprays used for killing and repelling flies on cattle.)

in English: Georgia pine, long-leaf pine, longleaf pine, pitch pine, southern pine, southern yellow pine

in China: chang ye song

Pinus ponderosa Douglas ex Lawson & C. Lawson

North America. Tree, seeds eaten

See *Species Plantarum* 2: 1000–1002. 1753, *Agricultural Monographs. U.S. Department of Agriculture* 354. 1836 and MacDonald, M.A. “Pine needle abortion in range beef cattle.” *J. Range Manage.*, 5: 150–155. 1952, James, L.F., Call, J.W. “Pine-needle (*Pinus ponderosa*)—induced abortion in range cattle.” *Cornell Vet.*, 62: 519–524. 1972, *Plant Systematics*

and *Evolution* 153: 119–132. 1986, *Memoirs of the Faculty of Education, Ehime University, Series e, Natural Science* 8: 1–108. 1988, Gartner, F.R., Johnson, F.D., Morgan, P. “Cattle abortion from ponderosa pine needles: ecological and range management considerations.” Pages 71–94 in James, L.F., Ralphs, M.H., Nielsen, D.B., eds. *The Ecology and Economic Impact of Poisonous Plants on Livestock Production*. Westview Press, Boulder, Colo., USA. 1988, Murdoch, W.J. et al. “Evaluation of histopathologic and physiologic changes in cows having premature births after consuming ponderosa pine needles.” *Am. J. Vet. Res.*, 50: 285–289. 1989, *J. Fujian Coll. Forest.* 12: 437–444. 1992

(Pregnant cows that ingest the needles abort within 2 days to 2 weeks. Cows in the third trimester are affected; the problem usually occurs during winter and spring, when forage is scarce. Cows may retain the placenta. Several toxic compounds have been suspected, including diterpene resin acids. Warmed resin placed on boils. Heated needles placed on the abdomen of pregnant women to help deliver the placenta. Pitch made into a paste and applied for rheumatism and backache.)

in English: Ponderosa pine

Pinus pumila (Pallas) Regel (*Pinus cembra* Linnaeus var. *pumila* Pallas; *Pinus cembra* var. *pygmaea* Loudon)

China.

See *Fl. Ross.* 1(1): 5. 1784, *Index Sem. Hort. Petrop.* 1858: 23. 1859

(Aphrodisiac.)

in China: yan song

Pinus roxburghii Sargent (*Pinus longifolia* Roxb.)

India, Himalayas, China, Nepal. Tree, spreading dimorphic more or less whorled branches, leaves in clusters, male cones in clusters, winged seeds, a source of resin, gregarious tree

See *Species Plantarum* 2: 1000–1002. 1753, *The Silva of North America* 11: 9. 1897 and *Plant Systematics and Evolution* 153: 119–132. 1986, *Memoirs of the Faculty of Education, Ehime University, Series e, Natural Science* 8: 1–108. 1988, *J. Fujian Coll. Forest.* 12: 437–444. 1992

(Antimicrobial activity. Hot leaves decoction applied locally to treat sprains, swellings and snakebite. Resin boiled in water with salt and drunk to relieve cough, also for urinary troubles, and as a plaster for burns, skin infections, boils, wounds, heel cracks, swellings and bone fractures. Roasted seeds eaten as a galactagogue. The pollen mixed with red loam used as a plaster for bone fractures. Ceremonial, ritual, immature needles tied to form a broom used in sacred places of deities, temples.)

in English: chir pine, emodi pine, Himalayan long-leaved pine, long-leaved Indian pine, long-leaved pine

in China: xu mi chang ye song

in India: charathoos (dried female cones), chil, chir, dhinies (the resinous pieces of wood), jeegan (the resin), sarala, smuther (the dried leaves), sowl

in Nepal: aule sallo, dhup, khote salla, khote sallo, rani salla, thangsing

Pinus sabiniana Douglas ex D. Don (*Pinus coulteri* Lamb. ex D. Don)

North America.

See *Species Plantarum* 2: 1000–1002. 1753, *Descr. Pinus* (ed. 3) 1832, *Transactions of the Linnean Society of London* 17: 440. 1836 and Griffin, J.R. “Cone morphology in *Pinus sabiniana*.” *J. Arnold Arbor.* 45: 260–273. 1964

(Sedative.)

Pinus strobiformis Engelm. (*Pinus flexilis* (E. James) Rydb.; *Pinus ayacahuite* C. Ehrenb. ex Schldtl. subsp. *strobiformis* (Engelm.) A.E. Murray; *Pinus ayacahuite* var. *brachyptera* Shaw; *Pinus ayacahuite* var. *novogaliciana* Carvajal; *Pinus ayacahuite* var. *reflexa* (Engelm.) Piper obtusilimum C. DC. (*Piper cochleatum* Sodiro; *Piper confusionis* Trel.; *Piper florencianum* Trel. & Yunck.; *Piper griseovenosum* Trel.; *Piper schultesii* Yunck.)

South America, Brazil.

See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 47: 105–106. 1905, *Anales de la Universidad Central del Ecuador* 19(135): 203. 1905, *Publications of the Field Museum of Natural History, Botanical Series* 13(2): 152, 170. 1936, *The Piperaceae of Northern South America* 1: 34–35, 146–147, f. 26, 124. 1950, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 19: 117–158. 1989

(Leaves and stems infusion strongly diuretic, drunk in the treatment of bronchial ailments, tuberculosis.)

Piper pedicellosum Wall.

India. Climber, glabrous, coriaceous leaves

See *Numer. List* [Wallich] n. 6646 A, B. 1832

(Leaves useful in sprains.)

in India: radhk, radkh

Piper peepuloides Roxb. (*Piper peepuloides* Wall.)

India, Himalaya. Leaves edible

See *Hort. Bengal.* 4. 1814, *Fl. Ind.*, ed. Carey & Wall., i. 159. 1820, *Fl. Ind.*, ed. Carey, i. 157. 1832, *Numer. List* [Wallich] n. 6650. 1832

(Roasted fruits chewed to cure cough. Dried leaves ground and mixed with water and consumed for relief from fever.)

in India: amlipan, kopta, lamcho-pipla, lamchopipla, pan shingho

in Nepal: pipla

Piper porphyrophyllum N.E. Br.

SE Asia. Climber

See *Gard. Chron.* (1884) II. 438. 1884

(Roots and leaves as postpartum remedy. For swellings, rheumatism, lung complaints, leprosy, pound the leaves and poultice; chew leaves with lime and betel nut and spread on chest to cure heart pain.)

Malay names: akar buger, karakek antu, sireh harimau, sireh rimau

Piper retrofractum Vahl (*Chavica officinarum* Miquel; *Piper chaba* Hunter; *Piper officinarum* (Miquel) C. DC.; *Piper officinarum* C. DC.)

Tropics. Climber, liana, glabrous, rather fleshy, cylindrical stems, prominent nodes, coriaceous simple alternate leaves, flowers very small in dense spikes, small peltate bract, male and female spikes separated, very small bright red berries broadly round

See *Species Plantarum* 1: 28–30. 1753, *Enumeratio Plantarum ...* 1: 314. 1804, *Asiatic Researches* 9: 391. 1809,

Systema Piperacearum 46, 222, 256. 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 356. 1869

(Used in Ayurveda, Sidha and Unani. Unripe fruits carminative, sudorific, stimulant; seeds laxative. Roots decoction antitoxic, stomachic, mutagenic, oxytocic, spasmolytic, hypertensive, insecticide, antioxidant, carminative, antidiarrhea, expectorant, anti-cough, postpartum remedy. Stem used as a vegetable in the diet of pregnant women. Magic, possession, burn the leaves, the smoke may drive evil spirits from the neighbourhood of a newborn infant.)

in China: jia bi ba

(Used in Ayurveda and Sidha. For skin diseases, vermifuge.)

in China: shi nan teng

in India: kaattu milagu, kattu milagu, renuka, renuka beej, renuka beej, renukabeej, renukah, sambhalukabeej, yetti

in Tibet: nalesam

Piper wichmannii C. DC. (*Piper methysticum* var. *wichmannii* (C. DC.) Lebot)

New Guinea, Bismarck Archipelago. Shrub or tree, dioecious, prop roots

See *Novon* 16(1): 4. 2006

(Young leaves rubbed on scabies during bathing.)

in Papua New Guinea: kapi

Piper wightii Miq.

India.

See *London Journal of Botany* 5: 552. 1846 and *J. Cytol. Genet.* 33(2): 149–153. 1998, *Cytologia* 64: 301–307. 1999

(Crushed stem applied for toothaches. Roasted fruits eaten to relieve cough headache and stomachache; fruits boiled in mustard oil and massaged on chest in cough and cold; dried fruits taken for coughs and colds.)

in India: eya kodi, kattu kurumulaku

Piper yunnanense Y.C. Tseng

China.

See *Species Plantarum* 1: 28–30. 1753 and *Acta Phytotax. Sin.* 17(1): 32–33, pl. 9. 1979

(Anthelmintic, abortifacient.)

in China: ju zi

Piperia Rydb. Orchidaceae

For the American (born in Victoria, British Columbia, Canada) botanist Charles Vancouver Piper, 1867–1926, agronomist, studied at the University of Washington, in 1890 founded the Herbarium at State College (Pullman, Washington), 1893–1903 professor of botany at the State College, 1903–1926 Director of the office of forage crops for US Department of Agriculture, his writings include *The flora of the Palouse region*. Pullman, Washington 1901 and *Flora of the State of Washington*. Washington 1906. See Kraenzlin, Friedrich (Fritz) Wilhelm Ludwig (1847–1934), *Orchidacearum Genera et Species*. Berlin, Mayer & Müller, 1897–1904 and *Bulletin of the Torrey Botanical Club* 28: 269. 1901, E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, Joseph Ewan, *Rocky Mountain Naturalists*. Mexico, Brazil. Perennial non-climbing tree

See *Synopsis Plantarum* 1: 452. 1805, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 3: 67. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 456, 469. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 4(31): 339–340. 1841 and *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 34: 274–275, pl. 20. 1903, *Contributions from the Gray Herbarium of Harvard University* 59: 18. 1919, *North American Flora* 23(3): 190. 1928, *Darwiniana* 9(1): 63–96. 1949, *Kew Bulletin* 10(2): 176. 1955, *Botanical Museum Leaflets—Harvard University* 24(1): 1–28. 1974, *Revista Brasil. Genét.* 12(1): 81–92. 1989, *Kew Bull.* 46(1): 159–168. 1991, *Systematic Botany* 32(3): 573. 2007

(Recorded to possess psychotomimetic constituents.)

Piptadeniastrum Brenan Fabaceae (Mimosaceae, Mimoseae)

A genus allied to *Piptadenia*, *astrum* is a Latin substantial suffix indicating inferiority or incomplete resemblance, may be confused with *Newtonia*, see *Kew Bulletin* 10(2): 179–180. 1955.

Piptadeniastrum africanum (Hook.f.) Brenan (*Piptadenia africana* Hook.f.)

Tropical Africa. Perennial non-climbing tree, bole straight and cylindrical, flowers whitish or yellowish, inflorescence an axillary or terminal spike-like false raceme, fruit a dark brown flattened linear pod, papery wing surrounding the seed, flowers a source of nectar for honey bees, leaves eaten by gorillas

See *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 135. 1840, *Niger Flora* 320. 1849 and *Fitoterapia* 70: 579–585. 1999, *Journal of Ethnopharmacology* 76: 263–268. 2001, *African Study Monographs* 23(2): 47–64. 2002, *Afr. J. Traditional, Complementary and Alternative Medicines* (2007) 4(3): 294–298. 2007

(Toxins, toxic effects of the bark; sawdust urticant. Bark decoction poisonous. Fruits and leaves aphrodisiac, tonic, abortifacient, enema, used in urethritis. Root extracts applied against mental disorders, and as an abortifacient and aphrodisiac. Bark externally used as an antidote, purgative and

abortifacient, applied to treat fever, toothache, pneumonia, skin complaints, wounds, lumbago, rheumatism, to expel worms; bark decoctions taken for cough, bronchitis, meningitis, convulsion, anemia, headache, stomachache, mental disorders, hysteria, hemorrhoids, genitourinary infections, dysmenorrhea, female infertility, male impotence. Absence of alkaloids in *Piptadenia africana* Hook.f. Leaves to poison mice and bark mixed with rice to poison mice. Bark used in arrow poison, as ordeal poison and fish poison; bark rubbed and juice dropped into eye of suspected thief, if guilty he will be blinded; bark and leaves of *Pentaclethra macrophylla* used as fish poison mixed with *Piptadenia africana* (*Piptadeniastrum africanum*), *Strychnos icaia* and *Manilkara* sp. Root bark and stem bark both used as an ingredient of arrow poison. A magic tree.)

in English: African greenheart, African light greenheart, African oak, false sasswood, light African greenheart, redwood

in Cameroon: atui, atuij, ay-chuk, bohambo, bokombolo, dabéma, edoundou, ekombile, jondo, kungu, ndondon, tombo, touambo, toul, wunga

Don; *Thermopsis nepaulensis* DC.)

India, Nepal. Perennial non-climbing shrub, leaves for fodder

See *Exotic flora* 2: 131. 1824, *Annales des Sciences Naturelles* (Paris) 4: 98. 1825, *Prodromus Florae Nepalensis* 239–240. 1825, *Systema Vegetabilium*, editio decima sexta 4(2): 171. 1827, *The British Flower Garden*, ... 3: t. 264. 1828, *Transactions of the Horticultural Society of London* 7: 245. 1830, *A Numerical List of Dried Specimens* n. 5340. 1831, *Nomenclator Botanicus*. Editio secunda 1(1–2): 83. 1840 and *The Gardeners' Chronicle*, ser. 3 60: 228, 289–290. 1916, *Journal of the Linnean Society, Botany* 48(321): 169–170. 1929, *Botanical Magazine* 1931: pl. 9234. 1931, *Flora Xizangica* 2: 719–720, f. 219: 9–13. 1985, *Flora Reipublicae Popularis Sinicae* 42(2): 392, pl. 100, f. 10–11. 1998, *Legumes of China* 595. 2007

(Squeezed bark and leaves as fish poison.)

in China: guang guo huang hua mu, huang hua mu, mao ban huang hua mu, ni bo er huang hua mu

in Nepal: jhyan, suga phul

Pipturus Wedd. Urticaceae

Greek *pipto* 'to fall' and *oura* 'tail', referring to the deciduous stigma or to the long petiolated leaves or to the long inflorescence; see Hugh Algernon Weddell (1819–1877), in *Annales des Sciences Naturelles*. 1: 196–197. (Jan.–Jun.) 1854 and *Acta Horti Gothob.* 8: 117. 1933.

Pipturus albidus A. Gray ex H. Mann (*Boehmeria albida* Hook. & Arnott; *Perlarius albidus* (Hook. & Arnott) Kuntze; *Pipturus taitensis* Wedd.)

Pacific, Hawaii. Shrub or small tree, small clusters of small flowers, small white edible fruit, leaves eaten raw or cooked, highly variable

See *Ann. Sci. Nat., Bot.* sér. 4, 1: 197. 1854, *Proc. Amer. Acad. Arts* vii. (1867) 201. 1867 and *Journal of Tropical Pediatrics* 22(6): 260–262. 1976, *Journal of Ethnopharmacology* 49(1): 23–32. 1995

(Antiviral, antimicrobial, used for infectious diseases. Fruit used as a laxative and in nursing mothers for thrush. Refreshing tonic herbal tea used for lowering high blood pressure, lowering cholesterol, diabetes, stomach and colon problems, liver and bowel troubles, bladder problems, in pregnancy and childbirth.)

in Hawaii: mamake, mamaki, waimea

Pipturus arborescens (Link) C.B. Rob. (*Pipturus asper* Wedd.; *Pipturus fauriei* Yamam.; *Urtica arborescens* Link)

Philippines. Shrub or small tree, male flowers in dense axillary fascicles, female flowers in dense hemispherical heads, white soft fleshy receptacle

See *Species Plantarum* 2: 983–985. 1753, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 386. 1822 and *Philippine Journal of Science* 6(1): 13–14. 1911, *Journal of the Society of Tropical Agriculture* 4: 51. 1932

(Scraped bark applied externally as a cataplasm for boils.)

in Japan: ô-iwa-ga-ne

in Hawaii: mamake, mamaki

in Philippines: agandong, dalunot, himaramai

Pipturus argenteus (G. Forst.) Wedd. (*Pipturus argenteus* Wedd.; *Pipturus propinquus* (Decne.) Wedd.; *Pipturus propinquus* Wedd.; *Urtica argentea* G. Forst.)

Pantropical, Australia, Pacific. Small tree or shrub, leaves alternate, greenish flowers, fruit light green berry-like, spherical fleshy receptacle, cooked leaves eaten as a vegetable, extremely variable species, in secondary forest, in disturbed habitats

See *Species Plantarum* 2: 983–985. 1753, *Florulae Insularum Australium Prodromus* 65. 1786, *Nouvelles Annales du Museum d'Histoire Naturelle*, série 3, 3: 491. 1834, *Annales des Sciences Naturelles; Botanique*, série 4 1: 194, 196. 1854, *Arch. Mus. Hist. Nat.* viii. (1855–1856) 447. t. 15 D. 1855–1856, *Prodr.* (DC.) 16(1): 235(19). 1869 and *Acta Horti Gotoburgensis* 7: 43–63. 1932, *Acta Horti Gotoburgensis* 8: 111–118. 1933, *Annales de l'Institut Botanico-Géologique Colonial de Marseille* série 6, 7/8: 9–91. 1950, *Flore de Madagascar et des Comores* 56: 1–101. 1964, *International Journal of Crude Drug Research* 22: 111–119. 1984, *International Journal of Crude Drug Research* 24: 31–40. 1986, *International Journal of Crude Drug Research* 25: 231–235. 1987, *International Journal of Crude Drug Research* 27: 55–61. 1989

(Abortifacient, antibacterial. Used in the treatment of asthma, cough, stomachache and centipede bites. Leaves used for poulticing boils, burns and herpes. Juice applied locally to fresh wounds, muscular swellings or to an aching tooth; leaf juice mixed with leaf juice of *Bridelia tomentosa* and given to patients suffering with fits; juice from the crushed leaves drunk to relieve fever or headache. Scraped bark applied to spear wounds to help extract the spear head; the sap from scraped inner bark drunk to assist a woman in labor. Roots

squeezed and the juice drunk to treat malaria or severe cough; root juice applied to wounds or aching teeth.)

in English: false stinger, native mulberry, white nettle

in Australia: koomeroo-koomeroo

in India: pankam, pankuh ivei, penkam

in Indonesia: bedreg, ki beunteur, lobiri

in Papua New Guinea: evakau, helo, hulious, kaligalamo, kwelakwela, lhe, lul, lumbai, oningo, ritsiring, tsitsiring, yiwiyi

Pipturus ruber A. Heller (*Pipturus albidus* (Hook. & Arnott) A. Gray var. *kauaiensis* Hochr.)

Pacific. Shrub, perennial

See *Minnesota Bot. Stud.* 760–922. 1897

(Used for infectious diseases.)

in English: red pipturus

in Hawaii: waimea

Pipturus verticillatus H.J.P. Winkl.

New Guinea.

See *Bot. Jahrb. Syst.* lvii. 589. 1922

(Used to treat sores, boils, cuts, etc.)

Piscidia L. Fabaceae (Millettieae)

Latin *piscis*, is ‘fish’ and *caedo* ‘to kill, destroy, cut down, slaughter’, the roots yield a fish poison, see *Systema Naturae*, Editio Decima 2: 1151, 1155, 1376. 1759 and *Bull. Misc. Inform.* 1936(1): 1–16. 1936, *Fieldiana, Bot.* 24(5): 1–425. 1946, *Flora de Cuba* 2: 224–367. 1951, *Ann. Missouri Bot. Gard.* 52(1): 1–54. 1965, Rudd, V.E. “A synopsis of the genus *Piscidia* (Leguminosae).” *Phytologia* 18(8): 473–499. 1969, *Rhodora* 83(834): 161–236. 1981, *Listados Floristicos de Mexico* 1: 47–61. 1983, *Acta Botanica Cubana* 33: 1–5. 1985, *Listados Floristicos de Mexico* 4: 90–112. 1986, *Flora Novo-Galiciana* 5: 1–786. 1987, *Ceiba* 44(2): 105–268. 2003 [2005], *Caribbean Journal of Science* 40(2): 169–181. 2004.

Piscidia grandifolia (Donn. Sm.) I.M. Johnst. (*Derris grandifolia* Donn. Sm.; *Ichthyomethia grandifolia* (Donn. Sm.) S.F. Blake; *Piscidia grandifolia* I.M. Johnst.; *Piscidia grandifolia* var. *glabrescens* Sandwith) (Greek *ichthys* ‘fish’ and *methyo* ‘to get drunk, to be drunken with’, referring to the nature of the leaves.)

South America. Perennial non-climbing tree, resinous hard wood

See *The Civil and Natural History of Jamaica* in Three Parts 296. 1756 and *Botanical Gazette* 56(1): 55–56. 1913, *Journal of the Washington Academy of Sciences* 9(9): 245. 1919, *Contributions from the Gray Herbarium of*

Harvard University 70: 71. 1924, *Bulletin of Miscellaneous Information Kew* 1936(1): 3–4. 1936

(Aerial portions and bark as a fish poison.)

Piscidia piscipula (L.) Sarg. (*Erythrina piscipula* L.; *Ichthyomethia americana* (Sessé & Moc.) S.F. Blake; *Ichthyomethia communis* S.F. Blake; *Ichthyomethia piscipula* (L.) Allerton* 336. 1796, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 1, app. 116. 1889, *Garden & Forest* 4: 436, 472. 1891, *Revisio Generum Plantarum* 1: 191. 1891 and *Journal of the Washington Academy of Sciences* 9(9): 247–248. 1919, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 65: 91. 1923, *Contributions from the Gray Herbarium of Harvard University* 70: 71. 1924, *Flore de Guadeloupe et Dependances ...* 2(2): 123. 1948, James Britten, *The Sloane Herbarium ...* revised and edited by J.E. Dandy. London 1958, *Phytologia* 18: 436. 1969, *J. Arnold Arbor.* 54(4): 435–470. 1973, *Prog. Clin. Biol. Res.* 280: 365–368. 1988

(Toxins, not poisonous to humans, very low toxicity, potentially toxic effects if used in large amounts, taking more than the recommended dose can cause a marked sedative effect, lowered blood pressure. Bark and root bark sedative, anti-inflammatory, febrifuge, analgesic, narcotic, anesthetic, anti-spasmodic, astringent, tonic, acrid, bitter, sweat-promoter, for asthma, cough, insomnia, migraine, anxiety, panic, fear, headache, toothache, neuralgia, dysmenorrhea. For headache, crushed leaves around the head, inhale the essence. Insecticides to control lice, fleas, and larvae. Leaves and twigs as fish poison.)

in English: dogwood, dogwood bark, fish catching coral tree, fish-fuddle tree, fish poison, fish poison tree, fishfuddle, Florida fishpoison tree, Jamaica dogwood, Jamaica dogwood bark, Jamaica fish-fuddle tree, Jamaican dogwood, May bush, Maytree of the Creoles, West Indian dogwood

in Latin America: guana hedionda, mulungú, murungú, palo de zope, zopilocuave

Pisonia L. Nyctaginaceae

For the Dutch (b. Leiden) physician Willem (Wilhelm) Piso (Guillaume Le Pois), circa 1611–1678 (d. Amsterdam), botanist and traveller, pharmacist, pioneer of tropical medicine, received M.D. at Caen (1633), from 1636 to 1644 physician of the Dutch settlement in Brazil (with Johan Maurits van Nassau), with the German naturalist and traveller [Georgius Marcgravius, Markgraf, Marcgraf, Georg Marggraff or Margraff, etc.] Georg Marcgrave (1610–1644) wrote *Historia naturalis Brasiliae: De Medicina Brasiliensi* libri IV (Piso); *Historiae Rerum Naturalium Brasiliae* libri VIII (Margraff). Lugdun. Batavorum (F. Hackius), Amstelodami (L. Elzevir) 1648 and (a second edition, much enlarged, with Margraff and the Dutch physician in the East Jacobus Bontius, 1592 or 1599–1631) *De Indiae utriusque Re Naturali et Medica* libri XIV: libri VI (Piso); libri II (Margraff); libri VI (Bontius), to which is appended *Mantissa Aromatica* (Piso). Amstelaedami (L. & D. Elzevir) 1658. See Carl Linnaeus, *Species Plantarum*. 2: 1026. 1753, *Genera Plantarum*. Ed. 5. 451. 1754, *Theoria Systematis Plantarum* 363. 1858, *Die Natürlichen Pflanzenfamilien* 3(1b): 29. 1889 and *Contr. U.S. Natl. Herb.* 13(11): 385–386. 1911, Garrison and Morton, *Medical Bibliography*. 5303, 1825. New York 1961, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 89. 1965, S. Cap. 4: 65–110. 2005, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 785–796. 2007

(Leaves used for rheumatic pains, to treat skin problems, scabies and ulcers. Bark and leaves used as counterirritant for swellings and rheumatic pains; juice with pepper given in pulmonary complaints of children. Roots used to treat cough.)

in English: devil's claw pisonia, pisonia vine, pull-and-hold-back, thorny pisonia

in China: xian guo teng

in India: antu hannu gida

in Indonesia: alar, cahun-lamarang, rampari

in Japan: toge-kazura (= spiny vine)

in Philippines: digkit, pakat-aso, puriket

in Thailand: huu cha luang, khat khao, ma kang phee

in Vietnam: b[if] s[ow]n nh[o]n, tuy[ees]n qu[ar] d[awf]ng

in Southern Africa: umQopho, uSondesa, Nsuwu (Zulu)

Pisonia grandis R.Br. (*Ceodes grandis* (R.Br.) D.Q. Lu; *Pisonia alba* Span.; *Pisonia grandis* A. Cunn. ex Hook.f.; *Pisonia grandis* Vieill. ex Guillaumin; *Pisonia sylvestris* Teijsm. & Binnend.)

India, SE Asia, China. Tree, leaves opposite, flowers bisexual, perianth funnel-shaped, row of viscid prickles

See *Characteres Generum Plantarum* 71. 1775, *Prodromus Florae Novae Hollandiae* 1: 422. 1810, *Bot. Antarct. Voy.* II. (*Fl. Nov.-Zel.*) 1: 209. 1853 and *Ann. Mus. Col. Marseille*, 1911, Sér. II. ix. 210, in syn. 1911, *Flora Reipublicae Popularis Sinicae* 26: 3–4. 1996–1997

(Leaves crushed or heated and applied to swellings or open ulcers; leaves diuretic, astringent and purgative, also used for dysentery.)

in English: bird catching tree, bird killer tree, cabbage tree, giant pisonia, lettuce tree, Malayan lettuce tree, Moluccan cabbage

in Rodrigues Isl.: bois mapou

in China: kang feng tong

in India: bhaggachura, nachukootai keerai

in Indonesia: dagdag see, kol bandang, sayur putih pulu, wijaya kusuma

in Malaya: kemudu, kemudu selat, kemudu Siam, mengkudu, mengkudu selat, mengkudu Siam

in Philippines: koles-maluko, maluko

in Thailand: saeng chan

in Tonka: pukovai

Pisonia umbellifera (J.R. Forst. & G. Forst.) Seem. (*Calpidia excelsa* (Blume) Heimerl; *Ceodes umbellifera* J.R.

Forst. & G. Forst.; *Pisonia alba* Span.; *Pisonia brunoniana* Endl.; *Pisonia excelsa* Blume; *Pisonia umbellifera* Seem. ex Nadeaud; *Pisonia umbellifera* Seem.)

South Africa, Indian Ocean, Southeast Asia. Shrub or tree, branched inflorescence terminal, flowers funnel-shaped

See *Characteres Generum Plantarum* 142. 1775, *Bijdragen tot de flora van Nederlandsch Indië* 2: 735. 1825, *Linnaea* 15: 342. 1841, *Bonplandia* 10: 154. 1862, *Fl. Vit.* [Seemann] 195. 1866, *Énum. Pl. Tahiti* 46. 1873 and *Oesterreichische Botanische Zeitschrift* 63: 287. 1913

(Leaves used for rheumatic pains; leaves decoction against poisoning by marine fishes.)

in English: bird catcher tree, bird-lime tree, para-para, pisonia tree

in China: jiao guo mu

in Indonesia: angkola, gendala, hares

in Japan: ô-kusa-boku

in Papua New Guinea: fafoni-mo, namba namba, paribui

in Philippines: anilin, anuring, balagasaha

in Vietnam: b[if] s[ow]n t[as]n

Pistacia L. Anacardiaceae

Latin *pistacia* for a pistachio-tree, Latin *pistacium* and *pistaceum* and Greek *pistakion*, *pistake*, for the fruit of the pistachio-tree; see *Species Plantarum* 2: 1025–1026. 1753, *Narrative of an Expedition to Explore the River Zaire* 431. 1818 and *Fieldiana, Bot.* 24(6): 177–195. 1949, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1101. New York 1967.

Pistacia aethiopica Kokwaro (*Pistacia aethiopica* Dale & Greenway; *Pistacia lentiscus* L. var. *emarginata* Engl.)

Tanzania, Kenya. Spreading tree or shrub, evergreen, exuding a resinous gum if cut, leaves aromatic, compact heads of very small flowers greenish purplish or yellow-cream, no petals, tiny petal-like bracteoles, small rounded fruit red on one side only, tree a source of bee forage, nutritious gum chewed, most parts smell of turpentine or mango when crushed, upland dry evergreen forest, wooded grassland, bushland

See *Kew Bulletin* 34(4): 755. 1980

(Leaves used for the diseases of ear, nose and throat; roots boiled with water and used for the common cold.)

in English: mastic tree

in Kenya: mûheheti

in Tanzania: iltorel, lasamarai, ol-daangudwa, oldangudwa, olongoronok

Pistacia atlantica Desf. (*Pistacia atlantica* DC.; *Terebinthus atlanticus* (Desf.) Dum.Cours.)

Mediterranean. Large tree, deciduous or semi-evergreen, massive stout trunk, broad canopy, linear leaves pinnately compound, inconspicuous flowers greenish white, edible oil from the seeds, often the leaves of *Pistacia atlantica* have galls

See *Species Plantarum* 2: 1025–1026. 1753, *Fl. Atlant.* 2: 364. 1799, *Bot. Cult.* 3: 575. 1802, *Prodr.* (DC.) 2: 64. 1825 and *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 11: 117–169. 1999

(Fruits antiseptic, expectorant, sudorific, heart stimulant, for stomach disorders, cough, cold. Resin masticatory, antiseptic for wounds, for sterility, colic, tonic, digestive, depilatory, gums strengthening, resolute for furuncles. Galls expectorant, diuretic, asthma, chest diseases; decoction of leaves and galls for intestinal disorders. For blood clots, tonsillitis.)

in English: mount Atlas mastic, mount Atlas pistache, terebinth tree, turpentine tree

in Arabic: botoum

Pistacia integerrima J.L. Stewart ex Brandis (*Pistacia chinensis* Bunge subsp. *integerrima* (J.L. Stewart ex Brandis) Rech. f.; *Pistacia integerrima* Stewart)

Himalayas. Tree, deciduous, dioecious, small red flowers, shiny round fruits

See *Species Plantarum* 2: 1025–1026. 1753, *Enumeratio Plantarum*, quas in China Boreali 15. 1833, *The forest flora of North-West and Central India* 122. 1874 and *Flora Iranica: Flora des Iranischen Hochlandes und der Umrahmenden Gebirge: Persien, Afghanistan, Teile von West-Pakistan, Nord-Iraq*, (cont) 63: 8. 1969, *Journal of Cytology and Genetics* 23: 219–228. 1988

(Galls expectorant, tonic, astringent, in the treatment of coughs, phthisis, asthma, respiratory troubles, dysentery. Fruit ash antiinflammatory, bitter, astringent, blood purifier, to treat cough, asthma; powdered and fried in *ghee* given in dysentery and as antidote to snakebites and scorpion stings.)

in India: kakadshringi, kakar singhi, kakarsinghi, kakkar singi, kakrae, kakrasing, kokar singi, karkatsinghi

in Pakistan: kakar-singhi

Pistacia khinjuk Stocks

Pakistan, Iran.

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 143. 1852 and *NUCIS Newsletter* 12: 30–31. 2004

(Used in Ayurveda. Insect galls produced on the tree trunk used in cough and asthma. Leaves and bark to relieve backache; ointment from leaves and branches to facilitate healing of burns; resin used to help the healing of wounds and sores. Powder of galls, pipramul (*Piper longum*) and dried ginger

given in fever and joint pain, rheumatic arthritis, inflammation and osteoporosis.)

in English: Bombay mastic, China turpentine, East Indian mastic

in India: kakar singhi, kakarsinghi, kakroi, shringi

in Pakistan: gun goonjak, gwan, gwan gir

***Pistacia lentiscus* L.**

Mediterranean.

See *Species Plantarum* 2: 1025–1026. 1753 and *Taxon* 27: 519–535. 1978

(Astringent, stomachic.)

in English: lentisk, mastic, mastic tree

in Italian: lentisco

in Arabic: dharou, derw, dirw, darw, shagar el-mastika

***Pistacia weinmannifolia* J. Poiss. ex Franch. (*Pistacia coccinea* Collett & Hemsl.; *Pistacia weinmannifolia* J. Poiss. ex Franch.)**

China. Shrub

See *Bull. Soc. Bot. Fr.* 33: 467. 1886 and *J. Biol.* (Vietnam) 3(3): 23 (-24; fig. 1). 1981

(Antioxidant, leaves rich in phenolic compounds, gallotannins. Histamine-release inhibitors.)

in China: qing xiang mu

Pistia L. Araceae

Greek *pistos* ‘drinkable, water’ (*pino* ‘drink’), referring to the aquatic habitat or to the floating habit; see Carl Linnaeus, *Species Plantarum* 2: 963. 1753 and *Genera Plantarum* Ed. 5. 411. 1754, *Aphorismi Botanici* 130. 1822, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 697. Ansbach 1852, and *Fieldiana, Bot.* 304–363. 1958, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana* 10: 15–25. 1988.

***Pistia stratiotes* L. (*Apiospermum obcordatum* Klotzsch; *Apiospermum obcordatum* (Schleid.) Klotzsch; *Limnonesis commutata* Klotzsch; *Limnonesis commutata* (Schleid.) Klotzsch; *Limnonesis friedrichsthaliana* Klotzsch; *Pistia aegyptiaca* Schleid.; *Pistia aethiopica* Fenzl ex Klotzsch; *Pistia africana* C. Presl; *Pistia amazonica* C. Presl; *Pistia brasiliensis* Klotzsch; *Pistia commutata* Schleid.; *Pistia crispata* Blume; *Pistia cumingii* Klotzsch; *Pistia gardneri* Klotzsch; *Pistia horkeliana* Miq.; *Pistia leprieuri* Blume; *Pistia linguaeformis* Blume; *Pistia linguiformis* Blume; *Pistia minor* Blume; *Pistia natalensis* Klotzsch; *Pistia obcordata* Schleid.; *Pistia occidentalis* Blume; *Pistia schleideniana* Klotzsch; *Pistia spathulata* Michx.; *Pistia stratiotes* var. *cuneata* Engl.; *Pistia stratiotes* var. *linguiformis* (Blume)**

Engl.; *Pistia stratiotes* var. *obcordata* (Schleid.) Engl.; *Pistia stratiotes* var. *spathulata* (Michx.) Engl.; *Pistia texensis* Klotzsch; *Pistia turpini* Blume; *Pistia turpini* K. Koch; *Pistia turpinii* K. Koch; *Pistia weigeltiana* C. Presl; *Zala asiatica* Lour.)

Tropics and Subtropics. Perennial free-floating herb, monocious, fleshy, fibrous plumose roots, rosette of leaves, bract yellowish, flowers white to green, fruit a dry ellipsoid berry, seed ovoid wrinkled, an aquatic weed, young leaves cooked and used as vegetable, fodder for rabbits and pigs, a serious pest in some areas of the world, a single highly variable species, ponds, lagoons, dams, rivers and lakes

See *Species Plantarum* 2: 963. 1753, *Gen. Pl.* ed. 5; 411. 1754, *Flora Cochinchinensis* 401, 405. 1790, *Flora Boreali-Americana* 2: 162. 1803, *Rumphia* 1: 78–79. 1836, *Allgemeine Gartenzeitung* 6: 19–20. 1838, *Linnaea* 18: 81. 1844, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 600. 1851, *Botanische Zeitung. Soc.* 8: 115–135. 1966, *Flora de la Provincia de Buenos Aires* 4(1): 304. 1968, *Revista del Museo de La Plata, Nueva Serie, Botanica* 119(64): 219. 1971, *Flore de Madagascar et des Comores* 31: 1–71. 1975, *Proceedings of the Indian Science Congress Association* (III, C) 65: 110. 1978, Perkins, K.D. and W.W. Payne. *Guide to the Poisonous and Irritant Plants of Florida*. Gainesville, Florida. 1978, *Cytologia* 43: 289–303. 1978, *Taxon* 32: 127. 1983, *Flora del Paraguay* [11]: 1–46. 1988, *Cytologia* 53: 59–66. 1988, *Aquatics* 11(3): 21–24. 1989, *AAU Reports* 24: 1–241. 1990, *Proceedings of the Indian Science Congress Association* 78(3,VIII): 136–137. 1991, *Proceedings of the Indian Science Congress Association* 80(3,VIII): 150. 1993, *Blumea* Suppl. 8: 1–161. 1995, *Rapid Biological Inventories* 1: 1–79. 2000, *Flora of Puná Island* 1–289. 2001, *Bangladesh Journal of Plant Taxonomy* 8(2): 19–34. 2001, *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 59–200. 2003, *Biodiversidad del estado de Tabasco* Cap. 5: 111–144. 2005

(Used in Ayurveda, Unani and Sidha. All parts poisonous, calcium oxalate crystals, toxic if large quantities eaten. Leaves demulcent, astringent, stomachic, diuretic, emollient, expectorant, laxative, insecticide, repellent, used for urinary tract infection, swellings, abdominal disorders, asthma, coughs, dysentery; used externally for skin diseases, boils, piles and syphilitic sores; juice from the leaves dropped into the eye. Roots laxative, emollient, also used for treating burns and wounds. Economically and biologically important as a breeding site for insects, especially species of mosquitoes in the genus *Mansonia*. Many species of insects worldwide have been reported to feed on *Pistia stratiotes*; those shown to be effective in biological control include *Neohydronomus affinis* (Coleoptera: Curculionidae: Eriirrhinae) and *Samea multiplicalis* (Lepidoptera: Pyralidae: Pyraustinae). Poisonous to rabbits.)

in English: Nile cabbage, Nile lettuce, shell flower, tropical duckweed, water fern, water lettuce

in China: da piao

Yantai Norm. Coll., Nat. Sci.* 18(4): 280–283. 2002, *Genetika* 41: 1665–1673. 2005

(Used in Ayurveda, Unani and Sidha. Root juice given for fever. Seed contraceptive, fungistatic, spermicide, for diabetes, acne and wrinkled skins, wounds and bruises, skin complaints; flour from the seeds emollient and resolvent, applied as a cataplasm.)

in English: canning pea, common pea, dun pea, field pea, garden pea, green pea, grey pea, maple pea, mutter pea, partridge pea, pea, pea pod, snap pea, snow pea, sugar pea, wild pea

in Burma: sadaw-pè

in Cambodia: sândaèk muul

in China: ching hsiao tou, jung shu, wan dou, wan tou

in India: ammatinkam, arad krasna, arukkanakkatalai, ativartula, bahtahna, baramattar, bataan, bataani, bataani kadale, batagadle, batani, batgadale, batgadale, batra, battani, battanichola, bhattani, buttani, chane, cokkalakkatalai, cokkalayam, desi mattar, golmattar, gundu sanighelu, gundusani-ghelu, harenso, harenu, houwaitharak, hummus, iravikentam, kalaon, kalaya, kalayah, kalayaka, kalayam, kanti, kapparkatalai, karsana (matar), katalaippattani, kaun, kerav, kerava, khindaka, malankatala, matar, matar mah, mathar, mattar, matur, mundachandaka, nilaka, pants, patanlu, pathanikat-ala, pattani, pattanippayar, peddaib, potayakkatalai, potayam, potayattam, puttanie, renuka, saheela, sateena, satila, satilaka, satina, satinaka, shaman, tripata, vartula, vartulakalaya, vatana, vatane, vatano, vatonem, vellaippattani, vellappattani, watana, wattahna

in Indonesia: kacang polong, kapri

in Japan: saya-endô, shru-indô

in the Philippine Isl.: citzaro, sitsaro

Malayan names: kacang ercis, kachang puteh

in Nepal: matar

in Tibet: sran-ma

in Vietnam: dâu hoà lan

in Kenya: minji

in Tanzania: njegere, njengere

Pitcairnia L'Hérit. Bromeliaceae

For the English (b. Fife) physician William Pitcairn, 1711(1712?)-1791 (d. London), 1750 Fellow of the Royal Society, 1755-1785 President of the Royal College of Physicians, Archibald Menzies (1754-1842) and William Brass (d. at sea 1783) collected plants for him; see William Munk, *The roll of the Royal College of physicians of London*. 2: 172-174. London 1878 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 152. Berlin & Hamburg 1989, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 554. 1994. Or named for the Scottish (b. Edinburgh) physician Archibald Pitcairne (Archibaldus Pitcarnius), 1652-1713 (d. Edinburgh), M.D. Rheims, professor of medicine at Edinburgh and Leyden, his works include *Roberto Graio Scoto Londini medicinam profitenti*, Archibaldus Pitcarnius Scotus S. [A poem.] [1690?], *Dissertatio de Legibus Historiae Naturalis*. Edinburgi 1696, *Dissertationes medicae*. Roterodami 1701, *Oratio, qua ostenditur medicinam ab omni philosophorum secta esse liberam*. Lugduni Batavorum 1692 and *Elementa Medicinae physico-mathematica*. Londini 1717; see *Prodr.* (Swartz) 4, 56. 1788, *Sert. Angl.* 7. 1789 and Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 697. 1852 and Theodore M. Brown, in *D.S.B.* 11: 1-3. 1981.

Pittosporum kerrii Craib

China. This species is close to *Pittosporum wightii* A.K. Mukherjee (*Pittosporum floribundum* Wight & Arnott, Oct 1834, not Royle, Jun 1834)

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788 and *Bull. Misc. Inform. Kew* 1925(1): 16–17. 1925

(Roots and bark antiinflammatory, for skin diseases.)

in China: yang cui mu

Pittosporum napaulense (DC.) Rehder & Wilson var. ***napaulense*** (*Celastrus verticillata* Roxb.; *Celastrus verticillatus* Roxb., non Ruiz & Pavon 1802; *Pittosporum floribundum* Wight & Arn.; *Pittosporum napaliense* Sherff; *Pittosporum napaulense* var. *rawalpindiense* Gowda; *Pittosporum verticillatum* Wall.; *Senacia napaulensis* DC.)

India, Nepal. Sweet-scented trees, evergreen, white fragrant flowers, calyx-lobes ovate, fruits green turning orange and dehiscent, red seeds

See *Species Plantarum* 1: 196–197. 1753, *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788, *Tabl. Encycl. (Ill. Gen.)* 2: 95. 1797, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 347. 1824, *Prodromus Florae Peninsulae Indiae Orientalis* 154. 1834 and *Plantae Wilsonianae* 3(2): 326. 1916, *Journal of the Arnold Arboretum* 32(4): 332. 1951

(Bark for chronic bronchitis and leprosy. Oil extracted from the plant used for local application, or for internal use, for skin diseases, sprains, bruises and chest infections. Roots paste for dropsy, swellings, rheumatism.)

in India: kattu sampanki, pacha murakku, vellai

in Nepal: khorsane

Pittosporum neelgherrense Wight & Arn. (*Pittosporum nilghirense* Wight & Arn.)

India. Evergreen tree

See *Prodr. Fl. Ind. Orient.* 1: 154. 1834, *Bulletin de la Société Botanique de France* 33: 414–415. 1886

(Bark for chronic bronchitis, fever and leprosy. Stem bark paste applied for leucoderma.)

in India: analivenga, vanchi maram

Pittosporum ochrosiifolium Bojer (*Pittosporum brachyandrum* Tul.; *Pittosporum capitatum* Baker; *Pittosporum humblotianum* Baill.; *Pittosporum ochrosiaefolium* Bojer; *Pittosporum pachylobum* Tul.)

East Africa.

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788, *Rapport annuel sur les travaux de la société d'histoire naturelle de l'île Maurice* 15. 1842, *Annales des Sciences Naturelles, Botanique*, sér. 2, 20: 53–61, 95–106. 1843, *Annales des Sciences Naturelles, Botanique*, sér. 4, 8: 44–163. 1857, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 330–1199. 1882–1894, *Bulletin Mensuel de la Société Linnéenne de Paris* 471. 1885, *Journal of the Linnean Society, Botany* 25: 294. 1889 and *Flore de Madagascar et des Comores* 92: 1–39. 1955, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 6: 1–272. 1955

(Antiseptic, antibacterial, for wounds, boils.)

Pittosporum pentandrum (Blanco) Merrill (*Aquilaria pentandra* Blanco; *Pittosporum brachysepalum* Turcz.)

Taiwan. Tree, aromatic, leaves arranged spirally, inflorescence terminal or axillary, petals white, fruit a compressed globose capsule, in secondary forest, in rain forest

See *Encyclopédie Méthodique, Botanique* 1(1): 49. 1783, *Flora de Filipinas* 373–374. 1837 and *Publications of the Bureau of Science Government Laboratories* 27: 19. 1905

(Bark used as a febrifuge and in large amounts as a general antidote; it is also effective in bronchitis.)

in Philippines: antoan, basuit, mamalis

Pittosporum perryanum Gowda var. ***perryanum*** (*Pittosporum membranifolium* S.C. Huang ex W.C. Yin)

China.

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788 and *Journal of the Arnold Arboretum* 32(3): 290–291. 1951

(Capsules can be used in the treatment of jaundice.)

in China: feng xian hai tong

Pittosporum podocarpum Gagnepain var. ***podocarpum*** (*Pittosporum glabratum* var. *chinense* Pampanini; *Pittosporum glabratum* var. *ciliicalyx* Franchet; *Pittosporum monanthum* C.Y. Wu)

China.

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788, *Journal of the Horticultural Society of London* 1: 230. 1846, *Bulletin de la Société Botanique de France* 33: 414. 1886 and *Nuovo Giornale Botanico Italiano*, new series 17(2): 285–286. 1910, *Notulae Systematicae. Herbarium du Museum de Paris* 8(4): 211. 1939

(The roots, leaf blades and capsules for skin diseases, headache, swellings.)

in China: bing guo hai tong

Pittosporum resiniferum Hemsl.

Asia.

See *Bulletin of Miscellaneous Information Kew* 1894: 344. 1894

(Fruit used to treat abdominal pain.)

Pittosporum tetraspermum Wight & Arn.

India. Evergreen tree, yellowish-green fragrant flowers, dark red seeds with orange-red aril

See *Prodr. Fl. Ind. Orient.* 1: 154. 1834

(Root bark paste taken internally against snakebite, after mixing with cow's urine. Bark for chronic bronchitis and leprosy.)

in India: analivegum

Pittosporum trigonocarpum H. Léveillé

China.

See *De Fructibus et Seminibus Plantarum...* 1: 286, pl. 59, f. 7. 1788 and *Repertorium Specierum Novarum Regni Vegetabilis* 11(301–303): 492. 1913

(Roots and bark for the treatment of asthma.)

in China: ling guo hai tong

Pittosporum viridiflorum Sims (*Pittosporum abyssinicum* var. *angolense* Oliv.; *Pittosporum antunesii* Engl.; *Pittosporum commutatum* Putt.; *Pittosporum floribundum* Wight & Arn.; *Pittosporum kruegeri* Engl.; *Pittosporum malosanam* Baker; *Pittosporum ochrosifolium* Bojer; *Pittosporum quartinianum* Cufod.; *Pittosporum ripicolum* subsp. *katangense* Leonard; *Pittosporum sinense* Desf.; *Pittosporum viburnifolium* Hayata; *Pittosporum viridiflorum* subsp. *malosanum* (Baker) Cufod.; *Pittosporum viridiflorum* subsp. *quartinianum* (Cufod.) Cufod.; *Pittosporum viridiflorum* var. *angolense* (Oliv.) Cufod.; *Pittosporum viridiflorum* var. *commutatum* (Putt.) Moeser ex Engler; *Pittosporum viridiflorum* var. *kruegeri* (Engl.) Engl.; *Pittosporum vosseleri* Engl.)

South Africa. Tree, slender, branched, spreading rounded crown, brown swollen dots, leaves dark green with red petiole, leaves aromatic when bruised, flowers sweetly scented, corollas yellow-green, fruit orange with red arilate sticky seeds, fruits borne in clusters at the apices of twigs, at the edge of montane forest, at forest edge, at forest edge among rocks, in understory among rocks, in riverine forest, in bushland

See *Botanical Magazine* 41: t. 1684. 1814, *Prodromus Florae Peninsulae Indiae Orientalis* 154. 1834, *Syn. Pittosp.* 10. 1839, *Rapport annuel sur les travaux de la société d'histoire naturelle de l'Île Maurice* 15. 1842, *Kew Bulletin* 1897: 244. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 371. 1909, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 32. 1913, *Die Vegetation der Erde* 3(1): 850. 1915, *Bulletin du Jardin Botanique de l'État* 20: 227. 1950, *Boletim da Sociedade Broteriana*, ser. 2 34: 164. 1960

(Stem bark emetic, febrifuge, used for malaria and febrile complaints, chest complaints.)

in Madagascar: ambovitsika, hazoambo, maimbovitsika, maimbovitsikybe, mawimbovitsika

in South Africa: umFusamvu (Zulu)

in Tanzania: ardarati

in India: kattu sampanki, pacha murakku, vellai

Pityrogramma Link Pteridaceae (Adiantaceae)

Greek *pityron* 'chaff, dandruff, bran' and *gramma* 'line, writing, letter', the undersurface of the fronds is powdery and scaly; see Johann Heinrich Friedrich Link, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse*. 3: 19–20. 1833, *Filicum Species* 141. 1841, *Mémoires sur les Familles des Fougères* 5(Gen. Filicum): 164–165. 1852 and *Fern Gaz.* 11(2–3): 141–162. 1975, *Brenesia* 16: 96. 1979, *Mus. Nac. Hist. Nat.* (Bolivia) Com. 10: 32–52. 1990, *Revista Biol. Trop.* 43(1–3): 75–115. 1995, *Brenesia* 62: 1–14. 2004, *Proc. Calif. Acad. Sci.*, ser. 4, 57(7): 247–355. 2006.

Pityrogramma calomelanos (L.) Link (*Acrostichum calomelanos* L.; *Acrostichum calomelas* Sw.; *Acrostichum caudatum* Hook.; *Acrostichum caudatum* Cav.; *Acrostichum ebeneum* L.; *Ceratopteris calomelanos* (L.) Underw.; *Ceropteris calomelaena* Link; *Ceropteris calomelanos* (L.) Link; *Ceropteris calomelanos* (L.) Fil.* 5. 244. 1864, *Die Natürlichen Pflanzenfamilien* 1(4): 264. 1899 and *Bulletin of the Torrey Botanical Club* 29: 632. 1902, *Bulletin of Miscellaneous Information Kew* 1929(7): 221. 1929, *American Midland Naturalist* 12: 280. 1931, *Fl. Madagasc.* 5(5): 113–168. 1958, *Contr. Gray Herb.* 189: 61–62. 1962, *Brit. Fern Gaz.* 9(6): 219. 1965, *Pteridologia* 2A: 127. 1989

(Whole plant aqueous extract for venereal diseases and kidney troubles. Root decoction for dysentery. Leaves infusion stomachic; leaves decoction drunk for the relief of colds; either macerated leaves or juice placed on cuts and bruises to stop bleeding; frond juice given to relieve acidity.)

in English: silver fern, silverback fern, wild maran

in Guyana: aisegay

Malay name: paku ragi

in Nepal: dankerno

Plagiobothrys Fischer & C. Meyer Boraginaceae

Greek *plagios* and *bothros* ‘a pit’, referring to the scar on the mericarps, to the hollows on the nutlets; see *Species Plantarum* 1: 132–133. 1753, *Commentationes Societatis Regiae Scientiarum Gottingensis Recentiores* 4: 186. 1819, *Flora* 7(1): 234. 1824, *Fl. Helv.* 2: 4, 57. 1828, Friedrich Ernst Ludwig von Fischer (1782–1854) and Carl Anton von Meyer (1795–1855), *Index seminum*, quae Hortus botanicus imperialis petropolitanus pro mutua commutatione offert. 2: 46. [St. Petersburg (Jan.) 1836], *Linnaea* 17: 304. 1842 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 539–609. 1960, *Bot. Jahrb. Syst.* 120(1): 45–85. 1998.

Plagiobothrys arizonicus (A. Gray) Greene ex A. Gray (*Eritrichium canescens* (Benth.) A. Gray var. *arizonicum* A. Gray; *Plagiobothrys arizonicus* Greene ex A. Gray)

North America. Herbaceous, annual, red pigment

See *Plantas Hartwegianas imprimis Mexicanas* 326. 1849, *Proceedings of the American Academy of Arts and Sciences* 10: 57. 1874, *Proceedings of the American Academy of Arts and Sciences* 17: 227. 1882, *Proceedings of the American Academy of Arts and Sciences* 20: 284. 1885 and *Journal of Chemical Ecology* 30(2): 229–254. 2004

(Pyrrolizidine alkaloids. Ceremonial, ritual.)

in English: Arizona popcornflower

Plagiobothrys myosotoides (Lehm.) Brand (*Anchusa tinctoria* (L.) L.; *Anchusa tinctoria* L.; *Anchusa tinctoria* Woodv.; *Anchusa tinctoria* Sieber ex Steud.; *Anchusa tinctoria* Pall.; *Alkanna lehmannii* (Tineo) DC.; *Alkanna lehmanni* A. DC.; *Alkanna tinctoria* (L.) Tausch; *Alkanna tinctoria* Tausch; *Alkanna tinctoria* (L.) DC., nom. illeg.; *Alkanna tinctoria* subsp. *lehmannii* (Tineo) Nyman; *Eritrichium tinctorium* A. DC.; *Lithospermum myosotoides* Lehm.; *Lithospermum tinctorium* Bertol.; *Lithospermum tinctorium* L.; *Lithospermum tinctorium* Ruiz & Pav., nom. illeg.; *Lithospermum tinctorium* Vahl; *Lithospermum tinctorium* Aucher ex DC.; *Plagiobothrys myosotoides* Brand; *Plagiobothrys tinctorius* A. Gray)

Northern Africa, Western Asia. Biennial or perennial, herbaceous, blue to purple trumpet-shaped flowers, edible leaves, see also *Alkanna tinctoria*

See *Species Plantarum* 1: 132–134. 1753, *Sp. Pl.*, ed. 2. 1: 192. 1762, *Symb. Bot.* (Vahl) ii. 33. t. 28. 1791, Woodville, William (1752–1805), *Medical botany*. London, 1790–1793, *Flora Peruviana* [Ruiz & Pavon] 2: 4, t. 114. 1799, Lehmann, Johann Georg Christian (1792–1860), *Plantae e Familiae*

Asperifoliarum Nuciferae 2: 319. Berolini, 1818, *Flora* 7: 234. 1824, *Nomencl. Bot.* [Steudel], ed. 2. 1: 86. 1840, *Prodr.* (DC.) 10: 86, 99, 101, 132, 588. 1846, *Proceedings of the American Academy of Arts and Sciences* 20: 283. 1885 and *Das Pflanzenreich* (Engler) IV. 252(Heft 97): 108. 1931, *J. (Used in Ayurveda. Root antibacterial, antibiotic, wound healing, astringent and vulnerary, used externally in the treatment of varicose veins, indolent ulcers or indolent leg ulcers, bed sores and itching rashes. Radical scavenging activity of *Alkanna tinctoria* root extracts.)

in English: alkanet, dyer’s-alkanet, dyer’s bugloss, forget-me-not popcorn flower, Spanish bugloss

in India: ratanajota

in Arabic: henna el-ghula, kahla

in Italian: arganetta azzurra

Plagiobothrys nothofulvus (A. Gray) A. Gray (*Eritrichium nothofulvum* A. Gray)

North America. Annual herb, leaves eaten

See *Proceedings of the American Academy of Arts and Sciences* 20: 285. 1885

(Ritual for fun, a dye.)

in English: rusty popcornflower

Plagiochasma Lehm. & Lindenb. Aytoniaceae

From the Greek *plagios* ‘oblique’ and *chasma* ‘an opening, a chasm’, *chasma*, *chasmatos* ‘open, any wide opening’, *chasme* ‘gaping, yawning’, *chasmamai* ‘to yawn’, see *Novarum et Minus Cognitarum Stirpium Pugillus* 4: 13. 1832.

Plagiochasma appendiculatum Lehm. & Lindenb.

China, Himalaya.

See *Novarum et Minus Cognitarum Stirpium Pugillus* 4: 14. 1832 and *Hikobia* 9: 65–70. 1984, *Lindbergia* 15: 99–102. 1989, *J. Cytol. Genet.* 25: 1–11. 1990, *La Clinica Terapeutica* 161(4): 359–364. 2010

(Wound healing in diabetes mellitus.)

Plagiocheilus Arn. ex DC. Asteraceae

From the Greek *plagios* ‘oblique’ and *cheilos* ‘lip’, see *Nov. Gen. Sp.* [H.B.K.] (quarto ed.) 4: 301. 1820, *Prodromus*

Systematis Naturalis Regni Vegetabilis (DC.) 6: 142. 1838 [1837 publ. early Jan 1838].

Plagiocheilus bogotensis (Kunth) Wedd. (*Hippia bogotensis* Kunth; *Leptinella bogotensis* DC.; *Plagiocheilus bogotensis* Wedd.; *Plagiocheilus prostratus* Benth.)

Colombia.

See *Mantissa Plantarum* 2: 158, 291. 1771, *Nova Genera et Species Plantarum* (folio ed.) 4: 237. 1820[1818], *Bull. Sci. Soc. Philom. Paris* 1822: 127. 1822, *Plantas Hartwegianas imprimis Mexicanas* 136. 1844, *Chloris Andina* 1(3): 62. 1856 [1855 publ. 30 Jun 1856] and *Fieldiana, Bot.*, n.s. 7: 1–21. 1981

(Whole plant infusion for backache.)

in Ecuador: parlera sacha, perlera sacha

Planchonella Pierre Sapotaceae

For the French botanist Jules Émile Planchon, 1823–1888, professor of botany, co-editor of *Flore des Serres*. 1849–1881, from 1844 to 1848 assistant to William Jackson Hooker at Kew. See Charles Henri Marie Flahault (1852–1935), *L'oeuvre de Jules Émile Planchon*. Montpellier 1889, Pierre, L. (Louis) (1833–1905), *Notes Botaniques. Sapotacées* 1: 34, 36. Paris, P. Klincksieck, 1890–[91] and *Annales des Sciences Naturelles Botanique*, sér. 8, 19: 39. 1904, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, Elmer Drew Merrill, in *Contr. U.S. Natl. Herb.* 30: 242–243. 1947 and in *Bernice P. Bishop Mus. Bull.* 144: 151. 1937, H.H. Allan, *Fl. New Z.* 1: 539. 1961, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 586–587. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 90. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 312. 1972, Stafleu and Cowan, *Taxonomic Literature*. 4: 283–289. 1983, *J. Arnold Arbor.* 67: 109–122. 1986.

Planchonella annamensis Pierre ex Dubard (*Planchonella annamensis* Pierre; *Pouteria annamensis* (Pierre) Baehni; *Pouteria annamensis* (Pierre ex Dubard) Baehni; *Pouteria hainanensis* (Merr.) Baehni; *Sideroxylon annamense* (Pierre) Lecomte; *Sideroxylon annamense* (Pierre ex Dubard) Lecomte; *Sideroxylon annamensis* (Pierre ex Dubard) Lecomte; *Sideroxylon hainanense* Merrill)

China, Vietnam. Good tasting fruit fleshy and juicy

See *Histoire des plantes de la Guiane Française* 1: 85–86, pl. 33. 1775 and *Notul. Syst. (Paris)* 2: 83. 1911, *Lingnan Sci. J.* 9: 41. 1930, *Flore Générale de l'Indo-Chine* 3: 892. 1930, *Candollea* 9: 311–312. 1942

(Bark used medicinally.)

in English: Annam pouteria

in China: tao lan

Planchonella obovata (R. Brown) Pierre (*Achras obovata* F. Muell. ex Benth.; *Chrysophyllum acuminatum* Bojer, nom. nud.; *Chrysophyllum obovatum* Wall. ex A. DC.; *Hormogyne cochinchinensis* Dubard; *Planchonella argentea* Pierre; *Planchonella attenuata* (A. DC.) Seychelles to NW Pacific. Wood reddish brown, hard and thick

See *Prodr.* 530. 1810, *Notes botaniques. Sapotacées*. 1: 36. 1890 and Li Shu-gang (as Lee Shu-kang). *Sapotaceae. Fl. Reipubl. Popularis Sin.* 60(1): 47–83. 1987, *J. Econ. Taxon. Bot.* 13: 47. 1989, *Novon* 6: 223. 1996, Govaerts, R., Frodin, D.G. & Pennington, D. *World Checklist and Bibliography of Sapotaceae*. Kew. 2001 [2002] [as *Pouteria obovata*.], *Cladistics* 23: 201–228. 2007

(Leaves decoction for stomachache, pain in the chest. Paste of leaf warmed and applied to treat headache, jaundice, lumbago, cold and body pains. Ritual, magic, wood burnt in birth houses during new maternity; against the evil spirits, leaves juice mixed with pig blood rubbed on the belly of a pregnant woman to protect the child.)

in English: black ash, northern yellow boxwood, obovate planchonella, yellow teak

in China: shan lan

in India: rok toh

in Malaysia: gombirat, nasi, nasi-nasi, pelangas

Planchonia Blume Lecythidaceae (Barringtoniaceae)

After the French botanist Jules Émile Planchon, 1823–1888, see *Australian Systematic Botany* 19(2): 147–153. 2006.

Planchonia careya (F. Muell.) Knuth (*Barringtonia careya* F. Muell.)

Australia. Small tree or large bush with edible fruits

See *Fragmenta Phytographiae Australiae* (Mueller) 5(39): 183. 1866 and *Pflanzenreich* IV, 219: 56. 1939

(Bark can be used to poison fish, fresh water.)

in English: billygoat plum, cockey apple, cocky apple

in W. Australia: banggiya, mangaloo, yundu

Plantago L. Plantaginaceae

Latin *plantago*, *inis* for a plantain (Plinius), *planta*, *ae* ‘sole of foot’, referring to the leaves; see Carl Linnaeus, *Species Plantarum*. 1: 112–116. 1753, *Genera Plantarum*. Ed. 5. 52. 1754, *The Gardeners Dictionary* ... Abridged ... fourth edition 1754 and Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1106. 1967, *Fieldiana, Bot.* 24(10/4): 462–466. 1974, *Botanisk Tidsskrift* 73(2): 107, 109. 1978, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 920–921. 1985, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 293. 1986, *Botanical Journal of the Linnean Society* 108(1): 51–52. 1992, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 520. 1994, *Botanical Journal of the Linnean Society* 120(2): 196–197. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1984–1985. 2001.

Plantago afra L. (*Plantago cynops* Linn.; *Plantago psyllium* L.)

Europe, Mediterranean.

See *Species Plantarum* 1: 112–116. 1753, *Species Plantarum*, Editio Secunda 1: 167–168. 1762 and *Kew Bulletin* 23: 509. 1969, *Fl. Trop. E. Africa* 6. 1971, *Flora of Ecuador* 4: 25–38. 1975, *Lagascalia* 9: 249–284. 1980, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 1: 303–364. 1991, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 3: 229–250. 1992, *Candollea* 48(1): 221–230. 1993, *Flora Mediterranea* 7: 218–221. 1997

(Official in British pharmacopeia codex under *psyllium*, used in dysentery.)

in English: fleawort, leafy-stemmed plantain, psyllium, Spanish psyllium, whorled plantain

in Arabic: merwash, bezer

Plantago afra L. subsp. *afra* (*Plantago psyllium* L.)

Mediterranean.

See *Species Plantarum* 1: 112–116. 1753, *Species Plantarum*, Editio Secunda 1: 167–168. 1762 and *Kew Bulletin* 23: 509. 1969, *Fl. Trop. E. Africa* 6. 1971, *Flora of Ecuador* 4: 25–38. 1975, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 1: 303–364. 1991, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 3: 229–250. 1992, *Candollea* 48(1): 221–230. 1993, *Flora Mediterranea* 7: 218–221. 1997

(Official in British pharmacopeia codex under *psyllium*, used in dysentery.)

Plantago amplexicaulis Cav.

Pakistan.

See *Lagascalia* 9: 249–284. 1980, *Cytologia* 64: 181–196. 1999

(Seeds to relieve dysentery, with blood and pus in the feces.)

in Pakistan: danichak

Plantago amplexicaulis Cav. subsp. *bauphula* (Edgew.) Rech. f. (*Plantago amplexicaulis* var. *bauphula* (Edgew.) Pilger; *Plantago amplexicaulis* subsp. *bauphula* Edgew.; *Plantago amplexicaulis* var. *bauphuloides* Pomel; *Plantago bauphula* Edgew.)

Algeria.

See *Species Plantarum* 1: 112–116. 1753, *J. Bot.* (Hooker) 2: 285. 1840, *Nouveaux matériaux pour la flore atlantique*. Paris, 1874–1875 and *Lagascalia* 9: 249–284. 1980, *Cytologia* 64: 181–196. 1999

(For diarrhea. The juice is taken in the hot weather as a cooling drink.)

in Pakistan: danich, isafghol, spighwol

Plantago aristata Michx. (*Plantago aristata* Michx. var. *nuttallii* E. Morris; *Plantago aristata* Michx. var. *nuttallii* (Rapin) Morris; *Plantago gnaphalioides* Nutt. var. *aristata* (Michx.) Hook.; *Plantago patagonica* Jacq. var. *aristata* (Michx.) A. Gray)

North America. Annual or perennial herb

See *Icones Plantarum Rariorum* [Jacquin] 2: 9, t. 306. 1786–1793, *Flora Boreali-Americana* (Michaux) 1: 95. 1803, *The Genera of North American Plants* [Nuttall] 1: 100. 1818, *Flora Boreali-Americana* 2: 123. 1838, *A Manual of the Botany of the Northern United States*. (Gray) Second Edition 269. 1856

(Leaves made into a paste applied to forehead for headache, to burns, blisters, ulcers, insect stings. Root infusion taken for poisonous bites and stings, snakebites, bowel complaints, diarrhea and dysentery, as a postpartum remedy.)

in English: bracted plantain, largebracted plantain

Plantago asiatica L. (*Plantago asiatica* Ledeb.; *Plantago asiatica* Turcz.)

China. Perennial herbs, prostrate, stout rootstock, yellow-white flowers, tiny black seeds, a common weed in open wet places

See *Sp. Pl.* 1: 113. 1753, *Fl. Altaic.* [Ledebour]. 1: 143. 1829 and *Kromosomo* 50: 1635–1651. 1988, *Journal of Phytogeography and Taxonomy* 37: 27–35. 1989, *Journal of Hokkaido University of Education: Section IIB* 40: 19–30. 1990, *Botaničeskij Žurnal* (Moscow & Leningrad) 81(5): 98–101. 1996, *Guihaia* 18(2): 115–118. 1998, *Journal of Phytogeography and Taxonomy* 48: 19–24. 2000

(Whole plant and seeds used for urinary stones and infections, diarrhea, bronchitis, cold, cough, acute conjunctivitis; external use, apply crushed fresh herb, for skin inflammation and boils. Seeds in inflammatory diseases of mucous membranes, gastrointestinal and genitourinary tracts, an infusion taken to treat diarrhea.)

in English: Asiatic plantain, Asian plantain, common plantain

in China: che qian, che qian zi

in India: jaldya

Plantago australis Lam. (*Plantago accrescens* Pilg.; *Plantago asplundii* Pilg.; *Plantago australis* subsp. *ecuadorensis* (Pilg.) Rahn; *Plantago australis* subsp. *hirtella* (Kunth) Rahn; *Plantago australis* subsp. *oreades* (Decne.) Rahn; *Plantago australis* subsp. *sodiroana* (Pilg.) Missouri Bot. Gard.* 85(3): 1984–1985. 2001

(Poultice of leaves applied to cuts and boils.)

in English: dwarf plantain, Mexican plantain

in Central America: cola de ardilla, lantén, llanten, ractzi

Plantago brachyphylla Edgew. ex Decne. (*Plantago brachyphylla* Roem. & Schult.)

India, Himalaya.

See *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 3: 136. 1818, *Prodr.* (DC.) 13(1): 696. 1852

(Leaves and roots astringent, vulnerary, used in cough, pulmonary disorders, asthma; crushed leaves applied to wounds.)

in India: isagbul, parharpangi, pushtu

Plantago ciliata Desf. (*Plantago ciliata* Boiss.)

Eurasia.

See *Fl. Atlant.* 1: 137, t. 39. 1798, Boissier, Pierre Edmond (1810–1885), *Voyage botanique dans le midi de l'Espagne* pendant l'année 1837. Paris, 1829–1845 and *Fl. Pl. Baluchistan* 62. 1909, *Fl. Iran.* 15: 18. 1965, *Taxon* 34: 727–730. 1985, *Cytologia* 64: 181–196. 1999

(A remedy for diarrhea, dysentery.)

in Pakistan: baluchi, naren danichk

Plantago ciliata Desf. subsp. *lanata* (Boiss.) Rech. f. (*Plantago ciliata* var. *lanata* Boiss.; *Plantago penicillata* Endl. & Fenzl)

Eurasia.

See *Fl. Pl. Baluchistan* 62. 1909, *Fl. Iran.* 15: 18. 1965, *Taxon* 34: 727–730. 1985, *Cytologia* 64: 181–196. 1999

(Cure for dysentery.)

in Pakistan: baluchi, naren danichk

Plantago cordata Lam.

North America. Perennial herb

See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 339. 1792

(Crushed leaves made into a paste applied to wounds, cuts, sores, burns and boils.)

in English: heartleaf plantain, heartleaved plantain

Plantago depressa Willd. (*Plantago depressa* Schldtl.)

Eurasia.

Perennial herb, glabrous or slightly pubescent, rootstalk short, leaves a basal rosette, leaves with three parallel primary veins, inflorescence scape with white-greyish flowers, calyx in 4 segments, corolla 2-lobed, fruit opening circularly toward the base, angled seeds, leaves eaten as vegetable

See *Species Plantarum* 1: 112–116. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* [Willdenow] Suppl.: 8. 1814 and *Botaničeskij Žurnal* (Moscow & Leningrad) 65(5): 659–668. 1980, *Phyton. Annales Rei Botanicae* 21: 1–24. 1981, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(12): 119. 1995, *Botaničeskij Žurnal* (Moscow & Leningrad) 81(5): 98–101. 1996, *Ethnobotany* 17: 127–136. 2005

(Aerial parts or whole plant to cure dysentery and diarrhea. Paste of leaves and seeds applied on cuts, wounds and piles. Whole plant and seeds used for urinary stones and infections, diarrhea, bronchitis, cold, cough, acute conjunctivitis;

external use, crushed fresh herb applied for skin inflammation and boils. Contact therapy, magic, plant parts tied around the belly of infants for their good health.)

in English: depressed plantain

in Bhutan: tha-ram

in China: cheqiancao

in India: isabgol, tharam

in Tibet: tha-ram

Plantago erosa Wall. ex Roxb. (*Plantago erosa* Wall.)

India. Herb, leaves as vegetable

See *Roxb. Fl. Ind.*, ed. Carey & Wall. 1: 423. 1820 and *Fl. Reipubl. Popularis Sin.* 70: 328. 2002

(Whole plant spasmolytic, for inflammation, on burns, wounds; whole plant crushed into a paste and used as hemostatic. Leaf paste antiseptic, for chest pain and cold, applied around the wounds, cuts, varicose veins; leaves as plaster for bone fracture and dislocation of bones. Leaves and seeds for cuts and diarrhea. Fruit for diarrhea. Seeds crushed into fine powder and decoction taken to cure stomach ailments; seed for abortion. Roots paste applied in case of fracture of bones and to treat boils on the joints; root juice for indigestion and pneumonia.)

in India: achenmug, akaba, akshosang, ichapana, isabgol, isapgol, ishappukol, kanejhar, kran-shit, kupat, lahyrya, luhurya, mapihamang, mepi, namlang, nila chakka, njaramboori, riew-kai, sira potla gida, tsanghu, uluku gida, yempat, zimbrehjar

in Nepal: ghortapre, sano dhable

Plantago exigua Murray

India. Herb

See *Opuscula* 94, t. 5. 1778

(Seeds laxative.)

Plantago himalaica Pilg.

India, Himalaya.

See *Pflanzenr.* (Engler) *Plantaginac.* 62. 1937

(Leaves slightly bruised applied for wounds. Oil from the seeds antimicrobial, for chronic diarrhea and shigellosis, a bacillary dysentery.)

in India: ashwakaran

Plantago insularis Eastw.

North America.

See *Proceedings of the California Academy of Sciences*, Series 3, 1: 112. 1898

(Seeds with sugar and water produce an edible glutinous mass ingested as a remedy for stomachache.)

in English: woolly plantain

Plantago lagocephala Bunge

Iran, Pakistan.

See *Species Plantarum* 1: 112–116. 1753 and *Jour. Ind. Bot. Soc.* 1: 266. 1920, *Fl. Iran.* 15, 18. 1965

(Various preparations of the plant are used against grippe, constipation and boils.)

in Pakistan: baluchi, brohl, naren danichk, piddari

Plantago lanceolata L. (*Plantago altissima* auct. non L.; *Plantago attenuata* Wall.; *Plantago attenuata* James; *Plantago lanceolata* (Bast.) Karnauch; *Plantago lanceolata* Hook.; *Plantago lanceolata* L. subsp. *communis* (Schltr.) Jahand. & Maire; *Plantago lanceolata* L. var. *lanuginosa* Bastard; *Plantago lanceolata* L. var. *sphaerostachya* Mert. & W.D.J. Koch; *Plantago orientalis* Stapf)

Cosmopolitan, Europe. Perennial or annual or biennial herb, erect, long narrow lance-shaped leaves at the base, short greenish cylindrical flower head, erect sulcate scapes, dense spikes, very variable species, fodder for cattle

See *Species Plantarum* 1: 112–116. 1753, *Fl. Ind.*, ed. Carey & Wall. 1: 422. 1820, *Fl. Bor.-Amer.* (Hooker) 2: 123, partim. 1829–1840 and *Fl. Trop. E. Africa, Plantaginaceae* 6. 1971, *Taxon* 28: 395–400, 635–636. 1979, *Taxon* 29: 704. 1980, *Lagascalia* 9: 249–284. 1980, *Giornale Botanico Italiano* 114: 100. 1980, *Taxon* 30: 829–842. 1981, *Biologicheskije Nauki* 11(227): 74–79. 1982, *Anales del Jardín Botánico de Madrid* 38: 507–514. 1982, *Nucleus* 25: 10–13. 1982, *Taxon* 31: 367–368. 1982, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Cytologia* 49: 351–357. 1984, *Informatore Botanico Italiano* 16: 251–260. 1984, *Candollea* 40: 217–230. 1985, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 203–228. 1985, *Cytologia* 52: 725–731. 1987, *Journal of Phytogeography and Taxonomy* 37: 27–35. 1989, *CIS Chromosome Information Service* 49: 13–15. 1990, *Watsonia* 18: 415–417. 1991, *Plant Systematics and Evolution* 181: 1–9. 1992, *Watsonia* 19: 134–137. 1992, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 129: 215–226. 1992, *Nucleus* 37(1, 2): 23–24. 1994, *New Botanist* 21: 29–35. 1994, *Proceedings of the Indian National Science Academy. Part B, Biological Sciences* 61: 339–346, 471–478. 1995, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(12): 119. 1995, *International Organization of Plant Biosystematists Newsletter* 24: 15–20. 1995, *Thaiszia* 7: 75–88. 1997, *Flora Mediterranea* 7: 204–213. 1997, *Lagascalia* 20(2): 302–308. 1998, *Cytologia* 64: 181–196. 1999, *Opera Botanica* 137: 1–42. 1999

(Whole plant and seeds expectorant, antiinflammatory, laxative, antibacterial, for asthma, colds, cough, catarrh; an infusion used for poisonous bites, stings and snakebites. Seeds used as drastic purgative and hemostatic. Leaf paste applied to wounds, blisters, ulcers, insect stings, sores and

inflamed surfaces, skin diseases; leaves decoction taken to purify blood; leaves infusion taken for cough, earache and bronchial infections.)

in English: buckhorn, buckhorn plantain, English plantain, German psyllium, lamb's tongue, lamb's tongues, narrowleaf plantain, narrow-leaved plantain, narrow-leaved ribwort, plantain, rib plantain, ribbed plantain, ribgrass, ribwort, ribwort plantain, ripplegrass, small plantain, wild sago

in Italian: arnoglossa, lanciola, lanciuola, piantaggine lanceolata, piantaggine lunga, piantaggine minore, piantagine minore

in Southern Africa: klein tongblaar, oorpynhoutjie, oorpy-nwortels, ribbetjiesgras, smalblaarplantago, smalweëblaar, smalweëgbree, weëblaar; bolilanyana (Sotho)

in India: kashur-gula

in Japan: hera-ô-ba-ko

in Pakistan: aspangara, brohi barz, danichk, gola, isabgool, purhat

Plantago macrocarpa Cham. & Schldl.

North America. Perennial herb, leaves eaten

See *Linnaea* 1(2): 166–167. 1826

(Decoction of root taken as a tonic.)

in English: seashore plantain

Plantago major L. (*Plantago borysthenica* (Rogow.) Wissjul.; *Plantago dregeana* Decne.; *Plantago latifolia* Salisb.; *Plantago major* fo. *scopulorum* Fries; *Plantago major* var. *borysthenica* Rogow.; *Plantago major* var. *egastachya* (Wimm.) Graebn.; *Plantago major* var. *major*; *Plantago major* var. *paludosa* Bég.; *Plantago major* var. *phyllostachya* Wallr.; *Plantago officinarum* Crantz)

Cosmopolitan. Perennial herb with a small stout rootstock, whole plant used as a vegetable

See *Species Plantarum* 1: 112–116. 1753, *Institutiones Rei Herbariae* 2: 329. 1766, *Prodr. Stirp. Chap. Allerton* 46. 1796 and *Fl. Trop. E. in English: Modoc bog orchid, slender bog orchid, tall Alaskan green orchid

Platanus L. Platanaceae

Latin *platanus* for the platane or Oriental plane-tree (Plinius), Greek *platanos* used by Theophrastus (*HP.* 4.5.6) and Dioscorides, etymology uncertain, presumably from the Greek *platys* ‘broad, ample’, possibly referring to the shape of the leaves and to the nature of the branches; see *Species Plantarum* 2: 999. 1753, *Botanographie Élémentaire* 526. 1826, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 700. 1852, Trelease, William (1857–1945), “Lettres de M.W. Trelease, Directeur du Jardin botanique de Missouri, à M.E. Gadeceau sur les platanes.” *Bull. Soc. Sci. Nat. Ouest. France*, 5, 1895 and Dode, Louis-Albert (1875–1943), “Notes dendrologiques sur les platanes.” *Bull. Soc. (A decoction of dried plants mixed with rice water is used as a cooling drink.)

in China: liang fen cao

Platostoma rotundifolium (Briq.) A.J. Paton (*Geniosporum affine* Gürke; *Geniosporum angolense* Briq.; *Geniosporum paludosum* Baker; *Geniosporum rotundifolium* Briq.; *Geniosporum scabridum* Briq.; *Ocimum konianense* A. Chev.; *Ocimum paludosum* (Baker) Roberty)

West Africa. Herb or sub-shrubby, stout, woody based, erect, scandent, creeping, many-branched, densely pubescent stem, corolla purplish white, conspicuous white or mauve-tinged bracts, crushed leaves aromatic, in damp grassland, at forest edge

See *Flore d'Oware* 2: 61. 18 Apr–Mai 1808, *Exotic flora* 3: t. 202. 1826., *Edwards's Botanical Register* 15: pl. 1300. 1830, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 163. 1894 and *Kew Bulletin* 52: 287. 1997

(Medicinal plant for malaria.)

Platycarya Siebold & Zucc. Juglandaceae

From the Greek *platys* ‘broad’ and *karyon* ‘nut’, referring to the winged nutlets, see *Versuch über die Arzneikräfte der Pflanzen* 143. 1818, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 741. 1843, *J. Hort. Soc. London* 1: 150. 1846 and *Acta Phytotax. Sin.* 32(5): 411–418. 1994, *J. Wuhan Bot. Res.* 13(2): 107–112. 1995.

Platycarya strobilacea Siebold & Zucc. (*Fortunaea chinensis* Lindl.; *Petrophiloides strobilacea* (Siebold & Zucc.) Reid & Chandler; *Petrophiloides strobilacea* var. *kawakamii* (Hayata) Kaneh.; *Platycarya kwangtungensis* Chun ex Kuang & A.M. Lu, nom. nud.; *Platycarya longipes* Y.C. Wu; *Platycarya simplicifolia* G.R. Long; *Platycarya simplicifolia* var. *ternata* G.R. Long; *Platycarya sinensis* Mottet; *Platycarya strobilacea* var. *kawakamii* Hayata)

China. Tree, deciduous, inflorescences yellow-green, scaly cones, famine food, young leaves cooked

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 741–742, pl. 5, f. 1, k1–k8. 1843, *Journal of the Horticultural Society of London* 1: 150. 1846 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 284–285. 1911, *London Clay Flora* 138. 1933, *Formosan trees indigenous to the Island* (revised) 82. 1936, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 71(2): 171–172. 1941, *Flora Reipublicae Popularis Sinicae* 21: 9. 1979, *Acta Phytotaxonomica Sinica* 28(4): 328–329, pl. 1. 1990, *Kor. J. Pharmacog.*, 27: 238–245. 1996, *Kor. J. Pharmacog.*, 29: 353–356. 1998, *J. Nat. Prod.*, 59(10): 997–999. 1996, *J. Appl. Biol. Chem.*, 46: 268–270. 2003, *Archives of Pharmacal Research* 31(6): 727–735. 2008

(Roots aromatic, antifungal, for colon inflammation, intestinal inflammation, ulcerative colitis, inflammatory bowel disease.)

in China: hua hsiang, hua xiang shu, huai hsiang, tou lo po hsiang

Platycelyphium Harms Fabaceae (Sophoreae)

Greek *platys* ‘broad, flat’ and *kelyphos* ‘pod, shell, sheath, case, hollow’, see *Bot. Jahrb. Syst.* xxxviii. (1905) 74. 1905, *Opera Botanica* 68: 1–223. 1983, related to *Dicraeopetalum* and *Bolusanthus*.

Platycelyphium voense (Engl.) Wild (*Commiphora voense* Engl., Burseraceae; *Commiphora voensis* Engl.; *Platycelyphium cyananthum* Harms; *Platycelyphium voensis* (Engl.) Wild)

Tanzania, Tropical East Africa. Perennial non-climbing tree, small deciduous tree, leaves imparipinnate, sweetly scented violet to deep blue flowers, calyx glandular, racemes produced before the leaves, flat papery indehiscent pod

See *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(3): 312. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 38: 74. 1905, *Boletim da Sociedade Broteriana*, ser. 2 33: 76. 1959, *Acta Bot. Neerl.* 19: 227–248. 1970, *Biochemical Systematics and Ecology* 21(6–7): 711–714. 1993

(Alkaloids. Ritual, when burned it produces a smell believed to chase away snakes.)

in Kenya: mkalamu

Platycerium Desv. Polypodiaceae

Greek *platykeros* and Latin *platyceros*, *otis* ‘broad-horn, having spreading horns, broad-horned, flat-horned’, Greek *platys* ‘broad’ and *keras* ‘horn’, referring to the appearance of the fertile fronds; see *Species Plantarum* 2: 1067–1072.

1753, *Deliciae Pragenses* 159. 1822, Nicaise Auguste Desvaux (1784–1856), *Prodrome de la Famille des Fougères*. 213. [*Mém. Soc. Linn. Paris*. 6(2): 213. Mai 1827.] Paris (Jul.-Sept.) 1827, *Memoirs of the Torrey Botanical Club* 6: 275. 1899 and Hoshizaki, Barbara Joe, “Morphology and phylogeny of *Platynerium* species.” *Biotropica* 4: 93–117. 1972, *Fern Gaz.* 11(2–3): 141–162. 1975, Hennipman, E., A monograph of the fern genus *Platynerium* (Polypodiaceae). Amsterdam; New York: North-Holland, 1982 [*Verhandeligen der Koninklijke Nederlandse Akademie van Wetenschappen, Afd. Natuurkunde*. Tweede reeks, deel 80.], Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 647. [from the Greek *platys* and *kerion* ‘honeycomb’] 1986.

Platynerium angolense Welw. ex Hook. (*Alcicornium angolense* Underw.; *Platynerium elephantotis* Schweinf.)

Tropical Africa, Congo, Tanzania.

See *Synopsis Filicum* 245. 1868, *Botanische Zeitung* (Berlin) 29: 361, f. 1871

(Leaf decoction given as last resort.)

in Central African Republic: pepere-gbukù

in Nigeria: ebe-usha ori

Platynerium biforme Blume

SE Asia, Malaysia.

See *Mémoires de la Société Linnéenne de Paris* 6: 213. 1827, *Fl. Javae Fil.*, 14, t. 18. 1828, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 402. 1841, *Gen. Fil.* [Hooker] t. 80 B. 1842

(For enlarged spleen, burn the plant and rub the ashes over the body.)

Malay name: semun bidadari

Platynerium bifurcatum (Cav.) C. Chr. (*Acrostichum bifurcatum* Cav.; *Alcicornium bifurcatum* (Cav.) Underw.; *Platynerium bifurcatum* subsp. *bifurcatum* Hennipman & M.C. Roos)

New Guinea.

See *Ann. Hist. Nat. Madrid* 105. 1799 and *Bulletin of the Torrey Botanical Club* 32: 594. 1905, *Index Filicum* fasc. 8: 496, 498. 1906, *Journal of Zhejiang University. Science*. B 8(3): 189–191. 2007

(Antibacterial.)

in English: elkhorn fern, staghorn fern

Platynerium wallichii Hook. (*Alcicornium wallichii* (Hook.) Underw.)

Thailand.

See *Gardener's Chronicle & Agricultural Gazette* 764. 1858, *Memoirs of the Torrey Botanical Club* 6: 275. 1899 and *Bulletin of the Torrey Botanical Club* 32(2): 596. 1905

(Fern rubbed and liquid used to treat earache.)

in English: staghorn fern

Platyclus Spach Cupressaceae

Greek *platys* ‘broad, flat’ and *klados* ‘branch’, flattened branches or stems, see *Dictionnaire des Sciences Naturelles* 34: 308. 1825, *Hist. Nat. Vég.* (Spach) 11: 333. 1841 [1842 publ. 25 Dec 1841], *Synopsis Coniferarum* 46. 1847.

Platyclus orientalis (L.) Franco (*Biota orientalis* (L.) Endl.; *Platyclus orientalis* (L.) Spach; *Platyclus stricta* Spach; *Thuja chengii* Bordères & Gausson; *Thuja orientalis* L.; *Thuja orientalis* var. *argyi* Lemée & H. Lév.)

China, India, Japan. Evergreen tree or dense shrub, small bushy tree, strong odor, erect or pyramidal, branches compressed, small scaly opposite imbricate leaves, scale-like yellow-green leaves, catkins of monoecious flowers, female flowers terminal, young female cones blue-green glaucous, mature cones brown, two seeds per scale, on dry slopes

See *Species Plantarum* 2: 1002. 1753, *Histoire Naturelle des Végétaux - Phanérogames* (Tome) 11: 333, 335. 1841, *Synopsis Coniferarum* 46–47. 1847 and *Monde des Plantes; revue mensuelle de botanique* 17(95): 15. 1915, *Travaux du Laboratoire Forestier de Toulouse I*. 3(6): 6. 1939, *Bull. Soc. Hist. Nat. Toulouse* 73: 284. 1939, *Portugaliae Acta Biologica, Série B, Sistemática, Ecologia, Biogeografia e Paleontologia*: 33–34. 1949, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Journal of Wuhan Botanical Research* 16(3): 280–282. 1998

(Bark astringent, applied in skin diseases. Leaves used for epistaxis hematuria, arthritis, gastrointestinal bleeding, chronic bronchitis, alopecia, baldness. Seeds used for neurasthenia, insomnia, constipation. Used in religious ceremonies, burned in prayers as incense, wood used to build temples, root used as wick for butter lamps. Worshipped, leaf and stem burned in religious ceremonies; used for firewood and to control the spread of disease.)

in English: Chinese arbor-vitae, oriental arbor-vitae

in French: arbre de vie, thuya d'Orient

in China: cebai, shi bu zai

in Tibet: sho leh, sho li, sho pah, shuo li, xo ba

in Vietnam: co tong pec, trac ba

Platycodon A. DC. Campanulaceae

Greek *platys* ‘broad’ and *kodon* ‘a bell’, referring to the flowers, see *Monographie des Campanulées* 125. 1830.

Platycodon grandiflorus (Jacq.) A. DC. (*Campanula gentianoides* Lam., nom. superfl.; *Campanula glauca* Thunb.; *Campanula grandiflora* Jacq.; *Platycodon autumnalis*

Decne.; *Platycodon chinensis* Lindl. & Paxton; *Platycodon glaucus* (Thunb.) Nakai; *Platycodon glaucus* (Siebold & Zucc.) Nakai; *Platycodon glaucus* f. *albiflorus* Honda; *Platycodon glaucus* f. *albus* Makino; *Platycodon glaucus* f. *bicolor* Makino; *Platycodon glaucus* f. *subasepalus* Honda; *Platycodon glaucus* f. *violaceus* Makino; *Platycodon glaucus* var. *monanthus* Nakai; *Platycodon glaucus* var. *pentapetalus* (Makino) Makino; *Platycodon glaucus* var. *planicorollatus* Makino; *Platycodon glaucus* var. *rugosus* Makino; *Platycodon glaucus* var. *subasepalus* (Honda) Nakai; *Platycodon grandiflorum* A. DC.; *Platycodon grandiflorum* (Jacq.) A. DC.; *Platycodon grandiflorus* A. DC.; *Platycodon grandiflorus* f. *albiflorus* (Honda) H. Hara; *Platycodon grandiflorus* f. *bicolor* (Makino) H. Hara; *Platycodon grandiflorus* f. *leucanthus* H. Hara; *Platycodon grandiflorus* f. *monanthus* (Nakai) Hyun S. Kim; *Platycodon grandiflorus* f. *subasepalus* (Honda) H. Hara; *Platycodon grandiflorus* var. *albus* Stubenrauch; *Platycodon grandiflorus* var. *autumnalis* (Decne.) Voss; *Platycodon grandiflorus* var. *duplex* Makino; *Platycodon grandiflorus* var. *glaucus* Siebold & Zucc.; *Platycodon grandiflorus* var. *glaucus* (Thunb.) Sieb. & Zucc.; *Platycodon grandiflorus* var. *japonicus* Stubenrauch; *Platycodon grandiflorus* var. *mariesii* Lynch; *Platycodon grandiflorus* var. *pentapetalus* Makino; *Platycodon grandiflorus* var. *planicorollatus* (Makino) Nakai; *Platycodon grandiflorus* var. *rugosus* (Makino) Nakai; *Platycodon grandiflorus* var. *sempiternus* Stubenrauch; *Platycodon grandiflorus* var. *striatus* Stubenrauch; *Platycodon mariesii* (Lynch) Wittm.; *Platycodon mariesii* f. *albonanus* H. Hara; *Platycodon mariesii* f. *striatus* (Stubenrauch) H. Hara; *Platycodon mariesii* var. *albus* Wittm.; *Platycodon sinensis* Lem.)

Russia, Japan, China. Perennial herb, erect, glabrous and glaucous, milky latex, cylindrical root branched and twisted, long pedunculate solitary broadly campanulate flowers, fruit an ovoid capsule dehiscent at the top, compressed seeds violet and brown

See *Species Plantarum* 1: 163. 1753, *Hortus Botanicus Vindobonensis* 3: 4, t. 2. 1776, *Syst. Veg.* ed. 14: 211. 1784, *Flora Japonica*, ... 88. 1784, *Monographie des Campanulées* 125. 1830 [5 or 6 May 1830], *Abh. Math.-Phys. Akad. Wiss. Muench.* 4(3): 179. 1846, *Revue horticole*, sér. 3 2: 361. 1848, *Fl. Gard.* 2: 121, t. 61. 1853 and *Botanical Magazine* 38(456): 301. 1924, *J. Jap. Bot.* 11: 43–44. 1926, *J. Jap. Bot.* 15: 186. 1939, *Enum. Sperm. Jap.* 2: 101–102. 1952, *Fl. Coreana* 6: 97. 1976, *Taxon* 29: 544–545. 1980, *Acta Phytotaxonomica Sinica* 22: 243–249. 1984, *Journal of Hokkaido University of Education: Section IIB* 37: 5–17. 1986, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989

(Roots used for colds, cough, syphilis, bronchitis, sore throat, antipyretic, antiviral.)

in English: balloon flower, bellflower, Chinese bellflower, Japanese bellflower

in China: chieh keng, jie geng, ju gen

in Japan: kikyô, chichô

Pleconax Raf. Caryophyllaceae

From the Greek *pleko* ‘to twist, enfold’, see *Autikon Botanikon* 24. 1840, *App. Alt. Ind. Sem. Hort. Berol.* 1867: 1. 1867, *Annales de la Société Linneenne de Lyon*, sér. 2 16: 344. 1868, *Die Natürlichen Pflanzenfamilien* 3(1b): 70. 1889 and *Bull. Torrey Bot. Club*, 1921, 48: 92. 1921, *Novosti Sist. Vyssh. Rast.* 14: 77–78. 1977.

Pleconax conoidea Šourk. (*Conosilene conica* Fourr. subsp. *conoidea* (L.) Á. Löve & E. Kjellqvist; *Conosilene conica* subsp. *conoidea* Á. Löve & Kjellq.; *Pleconax conica* (L.) Šourková subsp. *conoidea* Á. Löve & Kjellq.; *Pleconax conoidea* (L.) Šourková; *Silene conoidea* Linnaeus; *Silene conoidea* Huds.)

Himalaya. Pubescent herb with solitary pink flowers on leaf axil

See *Species Plantarum* 1: 418. 1753, *Fl. Angl.* (Hudson), ed. 2 1: 189. 1778, *Annales de la Société Linneenne de Lyon*, sér. 2 16: 344. 1868 and *Oesterr. Bot. Z.* 119(4–5): 579. 1972, *Lagascalia* 4(1): 14. 1974, *Bol. Soc. Brot.*, sér. 2, 2, 53: 595–643. 1980, *Biol. Ecol. Medit.* 7: 15–26. 1980, *Thaiszia* 5: 13–19. 1995

(Fumigant, emollient, demulcent. Leaf juice to cure eye diseases.)

in China: mai ping cao

in India: jatu, takkla

Plecosperrum Trécul Moraceae

From the Greek *pleko* ‘to twist, enfold’ and *sperma* ‘seed’, see *Systema Naturae*, Editio Decima 1289. 1759, *The Genera of North American Plants* 2: 233–235. 1818, *Genera Plantarum ad Familias Suas Redacta* 13. 1835, *Annales des Sciences Naturelles; Botanique*, sér. 3 8: 124. 1847 and *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 89(3): 245. 1986 [*Maclura* sect. *Plecosperrum* (Trécul) C.C. Berg], *Fl. Zambesiaca* 9(6): 13–76. 1991.

Plecosperrum spinosum Trécul (*Maclura spinosa* (Roxb. ex Willd.) C.C. Berg; *Trophis spinosa* Roxb. ex Willd.)

India. Armed, dioecious, straggling shrub, milky latex, sessile creamy male and female flowers aggregated into capitulate clusters

See *The Civil and Natural History of Jamaica* in Three Parts 357. 1756, *Species Plantarum*. Editio quarta 4(2): 734. 1806, *Annales des Sciences Naturelles; Botanique*, sér. 3 8: 124. 1847 and *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 89(3): 245. 1986

(Latex applied on aching teeth, to get relief from toothache.)

in India: achchangkodi, adavikokinta, adivikorinta, alasale, allusalai, allusalali, bendaka, benduga, gorti, gariga, goriti chettu, goriti donda, gorthi chettu, gortidonka, guti, kokinta, koriti, madogoli, pottimurda chettu, saali chettu, sali

Plectocephalus D. Don Asteraceae

Greek *plektos* ‘twisted, plaited’ and *kephale* ‘head’; see *The British Flower Garden*, ... series 2 [Sweet] 1: pl. 51. 1830 and J.M. Greenman, “Notes on Southwestern and Mexican Plants I. The Indigenous Centaureas of North America.” *Botanical Gazette*. 37: 219–222. 1904, *Kew Bull.* 22: 107–140. 1968, Roalson, E.H. and K.W. Allred, “A clarification of *Centaurea americana* and *Centaurea rothrockii* (Compositae: Cardueae).” *New Mexico Botanist* 7: 3–5. 1998. *Plectocephalus* is not closely related to *Centaurea* in a narrow sense. Morphologically *Plectocephalus* is difficult to separate from the more derived and highly diverse *Centaurea*.

Plectocephalus varians (A. Rich.) C. Jeffrey ex Cufod. (*Centaurea abyssinica* (Boiss.) Sch.Bip.; *Centaurea abyssinica* (Boiss.) Schultz-Bip. ex Oliver & Hiern; *Centaurea varians* A. Rich.; *Centaurea varians* A. Rich. var. *macrocephala* Vatke; *Plectocephalus abyssinicus* Boiss.; *Plectocephalus cyanoides* Boiss.)

Tropical Africa.

See *Species Plantarum* 2: 909–919. 1753, *The British Flower Garden*, ... series 2 1: pl. 51. 1830, *Tentamen Florae Abyssinicae* ... 1: 453. 1848, *Diagnoses plantarum orientaliarum novarum*, ser. 2, 3: 61–62. 1856, *Linnaea* 39: 512. 1875, *Flora of Tropical Africa* 3: 436. 1877 and *Senckenbergiana Biologica* 47: 262. 1966

(Stimulant, astringent, antiseptic.)

Plectranthus L’Hérit. Lamiaceae (Labiatae)

Greek *plektron* ‘a spur, cock’s spur’ and *anthos* ‘flower’, referring to the shape of the flowers, to the base of the corolla tube; see Charles Louis L’Héritier de Brutelle (1746–1800), *Stirpes novae aut minus cognitae*. 84, t. 41. Parisiis 1788, *Encyclopédie Méthodique, Botanique* 2: 690. 1788, *Flora Cochinchinensis* 2: 358, 372. 1790, *Beskrivelse af Guineiske planter* 271. 1827, *Flora* 25. Beibl. 2: 25. 1842, *Nat. Pflanzenfam.* 4(3a): 358. 1897 and *Bulletin du Muséum d’Histoire Naturelle*, sér. 2 2: 692, 694. 1930, *J. Linn. Soc., Bot.* 58: 231–282. 1962, *Bothalia* 11: 371–442. 1975, *Adansonia* sér. 2, 15(4): 515–529. 1976, *Fl. Madagasc.* 175: 1–293. 1998.

Plectranthus aegyptiacus (Forssk.) C. Chr. (*Coleus ghindanus* Schweinf. ex Baker; *Coleus helenae* Buscal. & Muschl.; *Coleus rupestris* Hochst. ex Baker, nom. inval.; *Coleus tenuiflorus* Vatke; *Coleus zatarhendi* Benth.; *Majana zatarhendi* (Forssk.) Kuntze; *Ocimum aegyptiacum* Forssk.; *Ocimum zatarhendi* Forssk., nom. inval.; *Plectranthus crassifolius*

Vahl, nom. illeg.; *Plectranthus rupestris* Vatke ex Baker; *Plectranthus tenuiflorus* (Vatke) Agnew; *Plectranthus zatarhendi* (Forssk.) E.A. Bruce)

Eritrea, Zimbabwe, Arabian Pen.

See *Flora Cochinchinensis* 2: 358, 372. 1790 and *Fl. Trop. Afr.* 5: 409, 435. 1900, *Bot. Jahrb. Syst.* 49: 487. 1913, *Dansk Bot. Ark.* 4(3): 21. 1922, *Bull. Misc. Inform. Kew* 1935: 590. 1935, *Upland Kenya Wild Flowers*: 636. 1974

(Drop of leaf extract used to treat infected ears.)

in Arabic: shar

Plectranthus amboinicus (Lour.) Spreng. (*Coleus amboinicus* Lour.; *Coleus amboinicus* var. *violaceus* Gürke; *Coleus aromaticus* Benth.; *Coleus carnosus* Hassk.; *Coleus crassifolius* Benth.; *Coleus subfrutescens* Summerh.; *Coleus suborbicularis* Zoll. & Moritz; *Coleus suganda* Blanco; *Coleus vaalae* (Forssk.) Deflers; *Majana amboinica* (Lour.) Kuntze; *Majana carnosus* (Hassk.) Kuntze; *Majana suganda* (Blanco) Kuntze; *Ocimum vaalae* Forssk., nom. rej.; *Plectranthus aromaticus* (Benth.) Roxb.; *Plectranthus unguentarius* Codd) (*Coleus* Lour., from the Greek *koleos* ‘a sheath’, referring to the connate staminal filaments, Latin *coleus* or *culleus*, *culeus* ‘the scrotum, a sack for holding liquids’)

Trop. to S. Africa, India. Erect or spreading, hairy, perennial, very strongly aromatic herb, leaves fried and eaten

See *Fl. Aegypt.-Arab.*: 111. 1775, *Stirpes Novae aut Minus Cognitae* 84 verso. 1788, *Flora Cochinchinensis* 2: 358, 372. 1790, *Systema Vegetabilium*, editio decima sexta 2: 690. 1825, *Plantae Asiaticae Rariores* (Wallich). 2: 15–16. 1830, *Flora* 25(2 Beibl.): 25. 1842, *Syst. Verz.*: 4. 1846, *Prodr.* (DC.) 12: 72. 1848, *Revis. Gen. Pl.* 2: 524. 1891, *Bot. Jahrb. Syst.* 19: 210. 1894 and *Bull. Misc. Inform. Kew* 1928: 392. 1928, *South African Pollen Grains and Spores* 11 (4): 387. 1975, *Proceedings of the Indian Academy of Sciences* 94: 619–626. 1985, *Flore de Madagascar et des Comores* 175: 1–293. 1998, *Memoirs of the New York Botanical Garden* 85: i-ix, 1–246. 2000

(Used in Ayurveda. Whole plant for bronchitis, plant paste applied in giddiness. Antiseptic, antimicrobial, antispasmodic, carminative, diaphoretic, stomachic, tonic, insect repellent, antidiarrheal, febrifuge and antimalarial. Root infusion for menorrhagia. Leaf infusion for indigestion, stomachache, cold, mild cough, child fever; leaves decoction used as a postpartum remedy and for heart disease. Veterinary medicine, leaves juice for tympany. Magic, enchantment, juice of the leaves to ensure the protection of a good spirit for a house.)

in English: allspice, country borage, French thyme, Indian borage, Indian mint, Mexican mint, soup mint, Spanish thyme, wild thyme

in India: dodda pathre, dodda pathre soppu, kaattukulinjavaraiatchilai, kannikkurkka, karpooa valli, karpooavalli, karpurahalli, karpuravalli, karuvaeru, omavali, pan ajamo,

panikkurkka, patharcur, pathurchur, patta ajavauin, sugand-havalakam, sugandhavalkam, vamu aaku

in Indonesia: adjeran, daun djinten, daun kutjing

Malay names: bebangun, magun-magun, mangun-mangun, membangun, nilam

in Philippines: limon, oregano, sildu, suganda

in Vietnam: hung chanh, rau tan la day

Plectranthus asirensis J.R.I. Wood (*Coleus arabicus* Benth.; *Majana arabica* (Benth.) Kuntze; *Teucrium mazzarii* Heldr. ex Nyman, nom. inval.)

Arabian Pen. Shrub

See *Revis. Gen. Pl.* 2: 524. 1891 and *Kew Bull.* 37: 601. 1983 (Leaves to treat rash and itching of babies.)

in Arabic: sana'abur

Plectranthus barbatus Andrews (*Coleus barbatus* (Andrews) Benth.; *Coleus barbatus* (Andrews) Benth. ex G. Don; *Coleus barbatus* Benth., nom. inval.)

Tanzania, Arabian Pen., India. Aromatic erect herb, stout, bluish purple flowers, floral bracts closely imbricate, flower spikes and tubers eaten

See *Botanist's Repository*, for new, and rare plants 9: pl. 594. 1810, *Hort. Brit.* [Loudon] 483. 1830, *Pl. Asiat. Rar.* (Wallich). 2: 15. 1830

(Used in Ayurveda. Root extract for lowering blood pressure. Roots and leaves antiseptic, anthelmintic, antimicrobial, antispasmodic, diaphoretic, stomachic, tonic, cooling, insect repellent, antidiarrheal, febrifuge and antimalarial, used for muscular pains. Leaves purgative, stomachic, for stomach-ache, measles, fevers; leaves ground with black peppers and the paste given to children with diarrhea. Veterinary medicine, roots given to buffaloes for lactation.)

in India: bana-juani, dhoom-ka-jaintul, esidia, fiwari, garmalu, gurmam, mainmul, oomavalli, paara adamba, pukhankur, rakuna-hatapochha

Br.; *Plectranthus scutellarioides* Blume, nom. illeg.; *Solenostemon blumei* (Benth.) M. Gómez; *Solenostemon scutellarioides* (L.) Codd

Trop. & Subtrop. Asia, Australia. Herb, erect, branched, fleshy, stems purplish 4-angled, flowers purplish or white, rice fields

See *Species Plantarum*, Editio Secunda 2: 834. 1763, *Flora Cochinchinensis* 2: 358, 372. 1790, *Prodromus Florae Novae Hollandiae* 506. 1810, *Denkschr. Bot. Ges. Regensb.* ii. (1822) 55. 1822, *Bijdr. Fl. Ned. Ind.* 14: 837. 1826, *Pl. Asiat. Rar.* (Wallich). ii. 16. 1830, *Edwards's Botanical Register* 15: sub t. 1300. 1830, *Labiatae. Gen. Spec.* 53, 56. 1832, *Nomencl. Bot.* [Steudel], ed. 2. 2: 203. 1841, *Revis. Gen. Pl.* 2: 524. 1891 and *Philipp. J. Sci.*, C 5: 382. 1910, *Bol. Secr. Agric. Comerc. Trab., Cuba* 22: 127. 1914, *Leaflet Philipp. Bot.* 7: 2696–2697. 1915, *Mitt. Bot. Staatssamml. München* 7: 301. 1968, *Gard. Bull. Singapore* 24: 58. 1969, *Bothalia* 11(4): 439. 1975, Baker, R.E.D. *Labiatae. Flora of Trinidad and Tobago* 2(6): 421–435. Port-of-Spain. 1995 [as *Coleus atropurpureus*.], *Calyx* 5(4): 160. 1997, *Calyx* 6(2): 51. 1999, Isabelle S. Zumstega and Caroline S. Weckerle, "Bakera, a herbal steam bath for postnatal care in Minahasa (Indonesia): Documentation of the plants used and assessment of the method." *Journal of Ethnopharmacology* 111(3): 641–650. 2007

(Hallucinogen, leaves used in divinatory rites. Contact allergenicity. Plant anthelmintic, abortifacient, carminative, emmenagogue, sedative, for headache, bruises, wounds. Juice from the leaves sometimes mixed with gambir, *Uncaria gambir*, drunk for abdominal pain, anorexia, wasting sickness, distension of the stomach, heartburn, indigestion, nausea, dyspepsia, diarrhea and bloody diarrhea, also used as eyedrops for eye inflammation. Leaves and stems heated, crushed and rubbed on insect bites and skin rash to relieve itch, skin diseases, scabies, eczema: crushed leaves and stems applied as a poultice to wounds as antiseptic. Seeds chewed for fever, sinusitis and breathing problems.)

in English: cat herb, coleus, flame nettle, mosquito herb, painted nettle, skullcap-like coleus

in Borneo: ati ati, hati-hati

in China: wu cai su

in India: aipongtsung

in Indonesia: daun iler, reruku, tragon, udu langau, udu ngeau

Malay name: daun hati-hati

in Papua New Guinea: jangata, jeune, ka, kamali, miango, mongko, okavu, osidade

in Philippines: badiara, dafronaya, daponaya, laponaya, laponaya, lapunaya, maiana, maianau, malaina, maliana, saimayu, taponaya, tapunaya

Plectranthus sylvestris Gürke (*Plectranthus bosseri* Hedge)

Tropical Africa. Shrub, woody-based herb, creeping, scrambling, aromatic, straggling, pink-purple blue flowers

See *Bot. Jahrb. Syst.* 19: 205. 1894 and *Flore de Madagascar et des Comores* 175: 214–216, t. 24, carte 11. 1998

(Leaves for chest and abdominal pains, fevers, malaria.)

Plectranthus unguentarius Codd (*Plectranthus amboinicus* (Lour.) Spreng.)

Namibia.

See *Stirpes Novae aut Minus Cognitae* 84 verso. 1788 and *Bothalia* 11(4): 387. 1975

(Carminative.)

Plectranthus urticifolius (Lam.) Salisb. (*Coleus urticifolius* Benth.; *Plectranthus beddomei* (Benth.) Raizada; *Plectranthus urticaefolius* Salisb.; *Plectranthus urticifolius* Hook. f.; *Plectranthus urticifolius* (Benth.) Hook. f., nom. illeg.)

India. Robust herb, short stems, flowers in cymes in very large branched panicles

See *Encyclopédie Méthodique, Botanique* 2: 691. 1788, *Prodr. Stirp. Chap. Allerton* 88. 1796, *Nova Genera et Species Plantarum seu Prodromus* 12: 78. 1848, *Fl. Brit. India* [J.D. Hooker] 4: 622–623. 1885 and *Fl. Madras* 1122. 1924, *Indian Forester* 84: 503. 1958

(Fresh leaves extract drunk for boils and blisters.)

in India: padappan thalai

Plectranthus vettiveroides (Jacob) N.P. Singh & B.D. Sharma (*Coleus vettiveroides* Jacob; *Plectranthus vettiveroides* (K.C. Jacob) H.I. Maass)

South India. Herb, bushy, pubescent, succulent, strongly fragrant fibrous roots, leaves opposite, in sandy loams, along riverbanks

See *Journal of the Bombay Natural History Society* 42: 320. 1941, *J. Bombay Nat. Hist. Soc.* 79(3): 712. 1982 [publ. 1983], *Journal of Ethnopharmacology* 103(1): 1–24. 2006

(Used in Ayurveda. Roots antipyretic, used in treating burning eyes, diarrhea, fever, haemorrhage, strangury, leprosy, leucoderma, ulcer, skin diseases, headache, insanity and quenching thirst.)

in India: hriberam, iruveli, kuriveru, kuruver, lavanchi, muchiva, muchivala, udicya, valak, valakam, vettiver, vettiveru

Plectronia L. Oliniaceae (Penaeeaceae, Rubiaceae)

Greek *plektron* ‘a spur, cock’s spur’, referring to the spiny branches; see *Species Plantarum* 1: 111. 1753, Carl Linnaeus, *Systema Naturae*. Ed. 12. 2: 138, 183. 1767, *Mantissa Plantarum*. 16, 52. 1767, *Dictionnaire classique d’histoire naturelle* 13: 171. 1828, *Flora Capensis* 2: ix. 1862, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853--61* 1(2): 369, 370. 1898.

Plectronia ventosa L. (*Canthium ventosum* (L.) S. Moore; *Olinia cymosa* Thunb.; *Olinia cymosa* (L.f.) Thunb.; *Olinia ventosa* (L.) Cufod.; *Sideroxylon cymosum* L.f.)

South Africa.

See *Species Plantarum* 1: 192–193. 1753, *Systema Naturae*, ed. 12 138, 183. 1767, *Mantissa Plantarum* 1: 16. 1767, *Suppl. Pl.* 152. 1782 [1781 publ. Apr 1782], *Archiv für die Botanik* 2(1): 4. Mai–Jul 1800 [1799] and *Journal of the Linnean Society, Botany* 40: 91. 1911, *Oesterr. Bot. Z.* 107: 106. 1960, *Bothalia* 11: 491. 1975

(Leaves used for stomach and intestinal complaints, dysentery and diarrhea.)

in South Africa: umVuthwamimi (Zulu)

Pleiocarpa Benth. Apocynaceae

From the Greek *pleios* ‘many, full of’ and *karpos* ‘fruit’, related to *Hunteria* and *Picralima*, see *Genera Plantarum* [Bentham & Hooker f.] 2(2): 685, 699. 1876.

Pleiocarpa mutica Benth. (*Hunteria pleiocarpa* Hallier f.; *Pleiocarpa bakueana* A. Chev., nom. nud.; *Pleiocarpa rostrata* Benth.; *Pleiocarpa salicifolia* Stapf; *Pleiocarpa ternata* A. Chev., nom. nud.; *Pleiocarpa tricarpellata* Stapf.)

Tropical Africa. Small tree, lianescent shrub, latex milky white, axillary clusters of fragrant white flowers, globose or ellipsoid yellow to bright orange follicles, seed flesh white, sticky exudate, evergreen and deciduous forests

See *Hooker’s Icon. Pl.* 12: tt. 1181, 1182. 1876, *Genera Plantarum* 2: 685, 699. 1876 and *Fl. Trop. Afr.* 4(1): 99. 1902, *Bull. Misc. Inform. Kew* 1915: 47. 1915, *Explor. Bot. Afrique Occ. Franç.* 1: 413. 1920, *Taxon* 28: 636–637. 1979, *Genetica* 68: 3–35. 1985, *Journal of Ethnopharmacology* 76(1): 99–103. 2001

(Bark febrifuge, laxative, to treat stomach pains; root bark against kidney diseases and malaria. Roots hypotensive, blood purifier, hepatoprotective, febrifuge, antimalarial, nematocidal, stimulant of the central nervous system, to treat jaundice and convulsions.)

in Yoruba: enu marugbo

Pleiocarpa pycnantha (K. Schum.) Stapf (*Hunteria breviloba* Hallier f.; *Hunteria pycnantha* K. Schum.; *Pleiocarpa bagshawei* S. Moore; *Pleiocarpa breviloba*

(Hallier f.) Stapf; *Pleiocarpa breviloba* Stapf; *Pleiocarpa flavescens* Stapf; *Pleiocarpa micrantha* Stapf; *Pleiocarpa microcarpa* Stapf; *Pleiocarpa pycnantha* Stapf; *Pleiocarpa pycnantha* var. *tubicina* (Stapf) Pichon; *Pleiocarpa swynertonii* S. Moore; *Pleiocarpa tubicina* Stapf; *Pleiocarpa welwitschii* Stapf ex Hiern)

Tropical Africa. Tree or shrub, scrambling, sublianescent, white milky latex, axillary clusters of scented greenish white flowers, globose or ellipsoid yellow to bright orange follicles

See *Genera Plantarum* 1: 351. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 222. 1896, *Cat. Afr. Pl.* (Hiern) 1: 665. 1898, *Bull. Misc. Inform. Kew* 1898: 804. 1898, *Jahrb. Hamburg. Wiss. Anst.* 17: 189. 1899 and *Flora of West Tropical Africa* [Oliver et al.] 4(1.1): 99–102. 1902, *J. Bot.* 45: 49. 1907, *J. Linn. Soc., Bot.* 40: 138. 1911, *Bol. Soc. Brot.*, II, 27: 132. 1953, *Helvetica Chimica Acta* 52(1): 33–55. 2004

(Roots laxative. Leaves for jaundice, edema and infection by roundworms.)

in Congo: bapipi

Pleiocarpa rostrata Benth. (*Carpodinopsis rostrata* (Benth.) Pichon; *Carpodinopsis talbotii* (Wernham) Pichon; *Carpodinopsis uniflora* Pichon; *Hunteria rostrata* (Benth.) Hallier f.; *Pleiocarpa mutica* Benth.; *Pleiocarpa talbotii* Wernham)

Nigeria, Cameroon and Gabon. Small tree or shrub, lianescent, white latex, white flowers, beaked warted fruits

See *Hooker’s Icon. Pl.* 12: tt. 1181, 1182. 1876, *Genera Plantarum* 2: 685, 699. 1876, *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten* 17: 194. 1899 and *Cat. Pl. Oban.* 62. 1913, *Boletim da Sociedade Broteriana* II, 27: 144, 147–148. 1953, *Helvetica Chimica Acta* 55(3): 752–771. 1972

(A cold infusion of the bark against stomachache.)

Pleioceras Baillon Apocynaceae

Greek *pleios* ‘many, full of’ and *keras* ‘a horn’, genus closely related to *Wrightia*, see *Naturl. Pflanzenfam.* iv. 2 (1895) 186. 1895 and *International Journal of Crude Drug Research* 24(3): 147–153. 1986, *Bulletin of Environmental Contamination and Toxicology* 55(5): 643–649. 1995.

Pleioceras barteri Baillon

Tropical Africa, Nigeria. Shrub or small tree, liana, white milky latex, inflorescence a lax terminal panicle, calyx reddish-green, pendulous double-horn shaped follicles

See *Bull. Mens. Soc. Linn. Paris* 1: 759. 1888 and *Fitoterapia* 64(1): 81–82. 1993

(Seeds toxic. Roots and stem abortive. Stem, stem bark, root bark, seed and fruit extracts abortifacient. Leaves antibacterial, a paste applied against rheumatism. Bark, fruits and

seeds used as an emmenagogue and against malaria, a strong and large dose is abortifacient. Root extract antimicrobial.)

in Yoruba: afeni, dagba, efo, eru ire, irena kekere, ologbo iyan

Pleiospermium (Engl.) Swingle Rutaceae

From the Greek *pleios* ‘many, more than one, full’ and *sperma* ‘seed’, see *Die Natürlichen Pflanzenfamilien* 3(4): 189. 1896 and *Journal of the Washington Academy of Sciences* 6: 427. 1916.

Pleiospermium alatum (Wight & Arn.) Swingle (*Limonia alata* Wall.; *Limonia alata* Wight & Arn.; *Naringi alata* (Wall. ex Wight & Arn.) J.L. Ellis)

India.

See *Numer. List* [Wallich] n. 6363. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 92. 1834 and *Journal of the Washington Academy of Sciences* 6: 427–428. 1916, *Bull. Bot. Surv. India* 22(1–4): 193. 1980 [publ. 1982], *J. Plant Sci.*, 2: 113–117. 2007

(Stem bark along with that of *Azadirachta indica* boiled in water and the decoction given orally as a postpartum remedy. Leaves and bark for rheumatic pains.)

in India: nalla munukudu

Pleopeltis Humb. & Bonpland ex Willdenow Polypodiaceae

Greek *pleos* ‘full, filled’ and *pelte* ‘a shield’, referring to the paraphyses; see Carl L. von Willdenow, *Species Plantarum*. Ed. 4, 5: 211. 1810 and *Fl. Madagasc.* 5(14): 93–121. 1960.

Pleopeltis macrocarpa (Bory ex Willd.) Kaulf. (*Drynaria lepidotum* Fée; *Drynaria macrocarpa* Fée; *Lepicystis lanceolata* (L.) Diels; *Lepicystis lanceolata* Diels; *Marginaria lanceolata* (L.) Herter; *Marginaria macrocarpa* (Bory ex Willd.) B.K. Nayar & S. Kaur; *Niphobolus lanceolatus* Keyserl.; *Niphobolus lanceolatus* (L.) Keyserl.; *Niphobolus lanceolatus* Trimen; *Phlebodium lanceolatum* (L.) J. Sm.; *Phlebodium lanceolatum* J. Sm.; *Pleopeltis lanceolata* (L.) C. Presl; *Pleopeltis lanceolata* Kaulf.; *Pleopeltis lanceolata* (L.) Kaulf.; *Pleopeltis macrocarpa* Kaulf.; *Polypodium elongatum* Desv.; *Polypodium elongatum* Goldm.; *Polypodium elongatum* Ait.; *Polypodium elongatum* Schrad.; *Polypodium elongatum* Mett.; *Polypodium elongatum* (Sw.) Mett.; *Polypodium elongatum* Wall.; *Polypodium elongatum* Wall. ex Hook.; *Polypodium lanceolatum* L.; *Polypodium lanceolatum* var. *lanceolatum*; *Polypodium lepidotum* Willd. ex Schldl.; *Polypodium macrocarpum* Bory ex Willd.; *Polypodium macrocarpum* C. Presl, nom. illeg.; *Polypodium marginale* L.; *Polypodium marginale* Bory ex Willd.; *Polypodium marginale* Thunb.; *Polypodium marginale* Wall.)

India.

See *Species Plantarum* 2: 1082, 1091. 1753, *Syst. Veg.*, ed. 14 (J. A. Murray). 937. 1784, *Fl. Jap.* (Thunberg) 337. 1784, *Hort. Kew.* 3. 465. 1789, *Species Plantarum*. Editio quarta [Willdenow] 5(1): 147, 149. 1810, *Berlinisches Jahrbuch für die Pharmacie und für die Damit Verbundenen Wissenschaften* 21: 41. 1820, *Enumeratio Filicum* 245. 1824, *Reliq. Haenk.* 1. 23 t. 1 f. 4. 1825, *Mém. Soc. Linn. Paris* 6(3): 228. 1827, *Numer. List* [Wallich] n. 309, 322. 1828, *Tentamen Pteridographiae* 193. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 4: 59. 1841, *Nova Acta* 19. Suppl. I. 454. 1843, *Sp. Fil.* 4: 234. 1862, *Polypodiaceae et Cyatheaceae Herbarii Bungeani* 39. 1873, *J. Linn. Soc., Bot.* 24. 152. 1886, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 1(4): 323. 1899 and *Revista Sudamericana de Botánica* 6: 131. 1940, *Companion Beddome's Handb. Ferns Brit. India* 86. 1974. 1974, *Sci. & Cult.* 41: 181–183. 1975

(Leaves used internally for the treatment of itches and skin diseases; fresh leaves decoction taken to cure cold and cough; paste of leaves applied on forehead for relief from headache, cough and cold, also to protect cuts and wounds from any infection. Fern decoction used for cold and sore throat.)

in India: panja

Pleopeltis viridis Moore & Ridl.

Malaysia.

See *Journ. Mal. Br. Roy. As. Soc.* 4. 93. 1926

(Febrifuge, pound the leaves in water and sprinkle the water over the head of the patient.)

Malay name: keluwah

Plesiatropha Pierre ex Hutch. Euphorbiaceae

From the Greek *plesios* ‘near, close to’, *plesias* ‘approachable’ and *trophe* ‘food’, or referred to the genus *Jatropha*, see *Fl. Trop. Afr.* [Oliver et al.] 6(1.5): 799, in syn. 1912.

Plesiatropha carpinifolia (Pax) Breteler var. ***carpinifolia*** (*Jatropha fallax* Pax; *Mildbraedia fallax* (Pax) Hutch.; *Mildbraedia fallax* Hutch.; *Neojatropha fallax* (Pax) Pax; *Neojatropha fallax* Pax)

Kenya.

See *Die Pflanzenwelt Ost-Afrikas* C: 240. 1895 and *Bot. Jahrb. Syst.* 33: 284. 1903, *Pflanzenr.*, (Engler) Euphorb.-Jatroch. IV, 147, I: 114–115. 1910, *Flora of Tropical Africa* [Oliver et al.] 6(1.5): 800–801. 1912, *Adansonia* III, 27(2): 325–335. 2005

(Whole herb purgative, pectoral, expectorant, for venereal diseases, chest problems.)

Pleuraphis Torrey Poaceae (Gramineae)

Greek *pleura* 'side, lateral' and *raphis* 'a needle', referring to the lateral spikelets and the position of awn on lower glume, sometimes confused with and referred to as *Hilaria* Kunth, type *Pleuraphis jamesii* Torr., may become infested with ergot, see *Nova Genera et Species Plantarum* 1: 116–118, pl. 37. 1815 [1816], *Annals of the Lyceum of Natural History of New York* 1(1): 148–150, t. 10. 1824 and E.R. Sohns, "The genus *Hilaria* (Gramineae)." *Journal of the Washington Academy of Sciences* 46(10): 311–321. 1956, *American Journal of Botany* 45: 757–767. 1958, *Memoir San Diego Society of Natural History* 12: 1–140. 1981, *Taxon* 33: 126–134. 1984, *Global Change Biology* 5(6): 659–668. Aug 1999, *Ecological Entomology* 25(4): 403–412. Nov 2000, *Contributions from the United States National Herbarium* 41: 128–129. 182–183. 2001, *New Phytologist* 150(2): 449–458. May 2001, *Global Change Biology* 8(3): 247–264. Mar 2002, *Flora of North America North of Mexico* 25: 1–783. 2003.

Pleuraphis jamesii Torrey (*Hilaria jamesii* (Torr.) Benth.; *Hilaria sericea* Benth.; *Pleuraphis sericea* Nutt. ex Benth.)

Northern America, USA, Mexico, California. Perennial bunchgrass, erect or decumbent, rhizomatous, nodes hairy, leaves recurved when dry, erect spikes, forage, scrub and woodland areas, on well-drained sandy soils, dry flats and foothills

See *Annals of the Lyceum of Natural History of New York* 1(1): 148–150, t. 10. 1824, *Journal of the Linnean Society, Botany* 19: 62. 1881

(Cold infusion given to babies in loss of appetite. Ceremonial.)

in English: curly grass, galleta grass, James' galleta

in Spanish: galleta

Pleurospermum Hoffm. Apiaceae (Umbelliferae)

From the Greek *pleura*, *pleuron* 'side, rib, lateral' and *sperma* 'seed', referring to the ridges on the fruits, see *Genera Plantarum Umbelliferarum* 8. 1814, *An Introduction to the Natural System of Botany* 21. 1836.

Pleurospermum amabile Craib & W.W. Smith (*Hymenidium amabile* (Craib & W.W. Smith) Pimenov & Kljuykov)

China, Himalaya.

See *Trans. Bot. Soc. Edinburgh* 26(2): 154–155. 1913, *Feddes Repert.* 111(7–8): 545. 2000

(Stomachic, febrifuge, antidote.)

in Bhutan: rtsad

in China: mei li leng zi qin

Pleurospermum angelicoides (Wall. ex DC.) Benth. ex C.B. Clarke (*Angelica forrestii* Diels; *Hymenolaena angelicoides* Wall. ex DC.; *Pterocyclus angelicoides* (Wall. ex DC.) Klotzsch; *Pterocyclus forrestii* (Diels) Pimenov & Kljuykov)

India. Aromatic roots as condiment

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 245. 1830, *The Flora of British India* 2(6): 703–704. 1879 and *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 289. 1929, *Feddes Repertorium* 110(1999) 7–8: 485. 1999

(Root ground into powder for stomachache, typhoid fever, body pain, also given to the children suffering from dysentery due to cold.)

in China: gui ye leng zi qin

in India: chhipi, choru

Pleurospermum aromaticum W.W. Smith (*Oreocomopsis aromatica* (W.W. Smith) Pimenov & Kljuykov)

China.

See *Notes Roy. Bot. Gard. Edinburgh* 8(40): 341–342. 1915

(For skin diseases.)

in China: fang xiang leng zi qin

Pleurospermum benthamii (Wallich ex DC.) C.B. Clarke (*Hymenidium benthamii* (Wallich ex DC.) Pimenov & Kljuykov; *Hymenidium benthamii* (DC.) Pimenov & Kljuykov; *Hymenidium davidii* (Franchet) Pimenov & Kljuykov; *Hymenolaena benthamii* Wallich ex DC.; *Pleurospermum davidii* Franchet)

China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 246. 1830, *Fl. Brit. India* 2(6): 703. 1879, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 247. 1885 and *Feddes Repert.* 111(7–8): 542–543. 2000

(Astringent.)

in China: bao xing leng zi qin

Pleurospermum brunonis Benth. ex C.B. Clarke

India, Himalaya. Small plant, tapering root, radical cauline leaves, white flowers, oblong fruits with narrow wings

See *The Flora of British India* 2(6): 706. 1879

(For curing wounds, cuts. Dried part plant insecticide. Dried leaves and flowers to prepare a kind of *dhoop*. Veterinary medicine, leaves for curing the throat of sheep and goats filled with watery fluid.)

in India: losar, lossar, nesar

Pleurospermum candollei Benth. ex C.B. Clarke

India, Himalaya.

See *Fl. Brit. India* [J.D. Hooker] 2: 703. 1879

(Fresh stem and roots eaten for dysentery.)

in India: tukar

Pleurospermum densiflorum Benth. ex C.B. Clarke

Himalaya.

See *The Flora of British India* [J.D. Hooker] 2(6): 706. 1879

(Massage to relieve joint pain.)

in India: guggal, lossar

Pleurospermum franchetianum Hemsley (*Pleurospermum longipetiolatum* H. Wolff; *Pleurospermum pilgerianum* Fedde ex H. Wolff; *Pleurospermum rockii* Fedde ex H. Wolff)

China.

See *J. Linn. Soc., Bot.* 29(202): 307–308. 1892 and *Repertorium Specierum Novarum Regni Vegetabilis* 27: 120–121. 1929

(For uterine diseases.)

in China: song pan leng zi qin

Pleurospermum giraldii Diels (*Hymenidium giraldii* (Diels) Pimenov & Kljuykov; *Pleurospermum limprichtii* H. Wolff; *Pleurospermum meoides* Diels)

China.

See *Bot. Jahrb. Syst.* 29(3–4): 492–493. 1900, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 12: 477. 1922

(All parts of the plant to cure stomachache.)

in China: tai bai leng zi qin

Pleurospermum hookeri C.B. Clarke (*Aulacospermum hookeri* (C.B. Clarke) Farille & S.B. Malla; *Hymenidium hookeri* (C.B. Clarke) Pimenov & Kljuykov)

Himalaya.

See *The Flora of British India* 2(6): 705. 1879 and *Candollea* 40(2): 525. 1985, *Feddes Repert.* 111(7–8): 547. 2000

(Roots for inflammation, body ache, heart disorders and as an antidote.)

in Bhutan: tang-kun-dkar-po

in China: xi ma la ya leng zi qin

Pleurospermum hookeri C.B. Clarke var. ***thomsonii*** C.B. Clarke (*Hymenidium chloroleucum* (Diels) Pimenov & Kljuylov; *Pleurospermum affine* H. Wolff; *Pleurospermum likiangense* H. Wolff; *Pleurospermum markgrafianum* H. Wolff; *Pleurospermum pseudoinvolucratum* H. Wolff; *Pleurospermum tibeticum* H. Wolff; *Trachydium chloroleucum* Diels)

China.

See *Fl. Brit. (Febrifuge, tonic.)

in China: leng zi qin

Plicosepalus Tieghem Loranthaceae

Latin *plico* ‘to fold, to wind together’, Greek *pleko* ‘to twist, enfold’, *plektos* ‘twisted, plaited’, Hebrew *pelek* ‘spindle’, Akkadian *pelakku*, *pilakku* ‘spindle’, see *Genera Plantarum* 3: 208. 1880, *Bulletin de la Société Botanique de France* 41: 504. 1894 and *Enumération des Plantes à Fleurs d’Afrique Tropicale* 2: 1–257. 1992.

Plicosepalus acaciae (Zucc.) Wiens & Polhill (*Loranthus acaciae* Zucc.; *Loranthus croceus* E. Mey.; *Loranthus croceus* R. Br.; *Loranthus gibbosulus* Balle; *Loranthus gibbosulus* A. Rich.; *Tapinostemma acaciae* Tiegh.; *Tapinostemma acaciae* (Zucc.) Tiegh.)

Tropical Africa.

See *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich*

Bayerischen Akademie der Wissenschaften Plantarum Novarum 249: t. 2/III. 1843, *Zwei Pflanzengeogr. Docum.* (Drège) 200, nomen. 1843–1844 [other title: *Flora*, oder, *Allgemeine botanische Zeitung*; reprint issued in 1844 in Leipzig], *Bulletin de la Société Botanique de France* 41: 504. 1894, *Bulletin de la Société Botanique de France* 42: 257. 1895 and *Bull. Jard. Bot. État Bruxelles* 17: 238. 1944, *Nordic Journal of Botany* 5: 221. 1985, *Fitoterapia* 72(4): 431–434. 2001, *Journal of Ethnopharmacology* 111(3): 657–666. 2007

(Antioxidant, antimicrobial and cytotoxic, leaves and stems, to treat common infections.)

Plocama W. Aiton Rubiaceae

Greek *plokamos* ‘lock of hair’, see *Hortus Kew.* (W. Aiton) 1: 292 and 3: 508. 1789.

Plocama aucheri (Guill.) M. Backlund & Thulin (*Gaillonina aucheri* (Guill.) Jaub. & Spach; *Jaubertia aucheri* Guill.; *Neogaillonina aucheri* (Guill.) Puff) (*Jaubertia* Guill., for the French botanist Hyppolyte François Jaubert, 1798–1874, politician, one of the founders of the Société botanique de France, with Édouard Spach wrote *Illustrationes plantarum orientali-um*. Parisii 1842–1857; see Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 247. 1965, Theodore W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 196. 1972.)

Arabian Pen., Iran to Pakistan.

See *Ann. Sci. Nat., Bot.* sér. 2, 16: 60. 1841, *Ann. Sci. Nat., Bot.*, II, 20: 87. 1843 and *J. Linn. Soc.* 84(4): 375. 1982, *Taxon* 56(2): 323. 2007

(Leaves and flowers sedative, tonic for pregnant women.)

in Pakistan: tussu

Plocoglottis Blume Orchidaceae

Greek *pleko* ‘to twist, enfold’, *plokos* ‘folded, a lock of hair, wreath, a braid’ and *glottis*, *glottidos*, *glotta* ‘tongue, small tongue’, referring to the lip, see *Bijdragen tot de flora van Nederlandsch Indië* 6: t. 2, f. 91. 1825.

Plocoglottis lowii Rehb.f. (*Plocoglottis lowii* var. *papuana* J.J. Sm.; *Plocoglottis porphyrophylla* Ridl.)

Vietnam, New Guinea.

See *Gard. Chron.* 1865: 434. 1865, *Trans. Linn. Soc. London, Bot.* 3: 368. 1893 and *Nova Guinea* 12: 197. 1915

(Magic, bewitchment, plant used for sprinkling water through the house after a death in it to keep the spirit from haunting it.)

Malay name: sepuleh dudok, sepuleh dudor

Pluchea Cass. Asteraceae

After the French abbot Noël-Antoine Pluche, 1688–1761 (d. near Paris, France), seminary teacher, naturalist, rejected most of the Enlightenment thought, among his works are *Le spectacle de la nature*. [8 vols.] Paris 1732–1750, *De Linguarum artificio et doctrina*. Paris 1751 and *Histoire du Ciel*, considéré selon les idées des Poètes, des Philosophes, et de Moïse. Paris 1739–1741 [*The history of the heavens*. London 1743, second English edn., Engl. transl. by J.B. de Freval.]; see *The Gardeners Dictionary*: ... eighth edition no. 6. 1768, *Flora Boreali-Americana* 2: 126. 1803, *Florula Ludoviciana*, or, a flora of the state of ... 63–64. 1817, A.H.G. de Cassini, *Bull. Sci. Soc. Philom. Paris*. Année 1817. 31. 1817, *Dictionnaire des Sciences Naturelles* [Second edition] 49: 337. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 93–94, 375–376, 453, 540. 1836, *Hooker’s Journal of Botany and Kew Garden Miscellany* 3: 331. 1851, *Linnaea* 25(4): 403–404. 1852[1853], *Fragmenta Phytographiae Australiae* 1(2): 33–34. 1858, *Flora Australiensis: a description ...* 3: 527. 1866[1867], *Proceedings of the American Academy of Arts and Sciences* 17: 212. 1882 and Camille Limoges, in *D.S.B.* 11: 42–44. 1981, *Phytologia* 67(2): 162, 164. 1989, *Fl. Venez. Guayana* 3: 177–393. 1997, *Englera* 1–136. 2001, *Sida* 21(4): 2023–2037. 2005.

Pluchea absinthioides (Hook. & Arn.) H. Rob. (*Baccharis absinthioides* Hook. & Arn.; *Gynheteria incana* Spreng.; *Tessaria absinthioides* (Hook. & Arn.) DC.)

South America.

See *Species Plantarum* 2: 860–861. 1753, *Florae Peruviana, et Chilensis Prodromus* 112, tab. 24, center. 1794, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 1(2): 140. 1807, *Neue Entdeckungen im Ganzen Umfang der Pflanzenkunde* 2: 135–136, t. 1, f. 4b–11. 1821[1820], *The Botany of Captain Beechey’s Voyage* 57. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 457. 1836 and *Phytologia* 27: 284. 1973, *Kurtziana* 12–13: 47–62. 1979

(Incense burned in traditional ceremonies.)

in Chile: brea

Pluchea arguta Boiss.

Pakistan.

See *Diagnoses plantarum orientalium novarum*, ser. 2, 3: 5. 1856

(Mixed fruits, leaves and stems infusion to treat urinary tract diseases and stomachache.)

in Pakistan: majusar

Pluchea baccharis (Mill.) Pruski (*Baccharis viscosa* Walter, nom. illeg.; *Baccharis viscosa* Lam.; *Conyza baccharis* Mill.; *Pluchea rosea* R.K. Godfrey)

USA, Mexico.

See *Species Plantarum* 2: 860–861. 1753, *The Gardeners Dictionary*: ... eighth edition no. 16. 1768, *Encyclopédie Méthodique, Botanique* 1(2): 345. 1783[1785], *Flora Caroliniana, secundum* ... 202. 1788, *Synopsis Generum Compositarum* ... 203–204. 1832 and *Journal of the Elisha Mitchell Scientific Society* 68(2): 266–269, pl. 21, f. 5–6. 1952, *Sida* 21(4): 2023–2037. 2005

(An infusion to expel worms.)

Pluchea carolinensis (Jacq.) G. Don (*Conyza carolinensis* Jacq.)

North America.

See *Collectanea* 2: 271–2. 1788, *Icones Plantarum Rariorum Fascicle 1*(Bound as Vol. 3): pl. 585. 1786–1793[1788], *Synopsis Generum Compositarum* ... 203–204. 1832, *Hortus Britannicus* 350. 1839 and *Taxon* 26: 591. 1977

(A tea for cough, or for a mouthwash to relieve toothaches.)

Pluchea foetida (L.) DC. (*Baccharis foetida* L.; *Conyza foetida* (L.) Willd.; *Conyza foetida* Lam.; *Pluchea foetida* Britton, Sterns & Poggenb.; *Pluchea foetida* (L.) Britton, Sterns & Poggenb., nom. illeg.)

North America. Perennial herb

See *Species Plantarum* 2: 861. 1753, *Encyclopédie Méthodique, Botanique* 2(1): 85. 1786, *Species Plantarum*. Editio quarta 3(3): 1932. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 452. 1836, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 28. 1888 and *Taxon* 58(3): 978. 2009

(Leaves decoction taken as a febrifuge.)

in English: stinking camphorweed, stinking fleabane

Pluchea foetida (L.) DC. var. ***foetida*** (*Pluchea tenuifolia* Small)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 452. 1836, *Prelim. Cat.* (1888) 28. 1888 and *Man. S.E. Fl.* [Small] 1399, 1509. 1933

(Leaves decoction taken as a febrifuge.)

in English: stinking camphorweed, stinking fleabane

Pluchea indica (L.) Less. (*Baccharis indica* L.; *Erigeron denticulatum* Burm. f.)

India to southern China. Shrub, evergreen, slender, erect, many-branched, leaves aromatic when crushed, small flowers all tubular, corolla filiform lilac or pale violet, fruit a cylindrical achene, pappus white, along swamps, in moist lowland

See *Species Plantarum* 2: 860–861, 863–865. 1753, *Flora Indica* ... nec non *Prodromus Florae Capensis* 180. 1768,

Bull. Sci. Soc. Philom. Paris 1817: 31. 1817, *Linnaea* 6: 150. 1831 and *Philippine Journal of Science* 19(3): 329–388. 1921, *Taxon* 26: 557–565. 1977, *Botanical Bulletin of Academia Sinica* 19: 53–66. 1978, *Taxon* 31: 576–579. 1982, *Pakistan Journal of Botany* 20: 177–189. 1988, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994

(Febrifuge and diaphoretic, antiinflammatory, stimulant, diuretic and antidiabetic, stomachic, galactagogue, cough medicine, against leucorrhea, to cure hemorrhoids, a remedy for dysentery, against ulcers and sores, for rheumatic pains, for longevity, lumbago, dysuria, fever, headache, sprains, dyspepsia.)

in English: Indian fleabane, Indian (marsh) fleabane, Indian pluchea

in Cambodia: pros anlok

in China: luan xi

in Indonesia: baruntas, beluntas, luntas

in Japan: hiiragi-giku

in Laos: nat luat

in Malaysia: beluntas, beluntas paya

in Papua New Guinea: a'apu

in Philippines: banig-banig, bauing-bauing, kalapini, lagund-ing late, tulo-lalaki

in Thailand: khlu, khlu khlu, naat ngua, naat wua, nuat ngiu, nuat ngua

in Vietnam: cuc tan, c[us]c t[aa]f[n], l[as] l[uws]c, phat pha, tu bi

Pluchea lanceolata (DC.) C.B. Clarke (*Berthelotia lanceolata* DC.; *Berthelotia lanceolata* DC. var. *senegalensis*; *Pluchea lanceolata* (DC.) Oliv. & Hiern)

India. A weed

See *Bull. Sci. Soc. Philom. Paris* 1817: 31. 1817, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 375–376. 1836, *Compositae Indicae* 94. 1876, *Flora of Tropical Africa* 3: 329. 1877 and *Ann. Cat. Vasc. Pl. W. Pakistan & Kashm.* 768. 1972, *Fl. Iran.* 145: 8. 1980, *Pakistan Journal of Botany* 20: 177–189. 1988, *Annals of the Missouri Botanical Garden* 81: 800–808. 1994, *Fl. Ind.* 13: 155. 1995, *Willdenowia* 29: 203–220. 1999, *Fl. Egypt* 3: 189. 2002

(Used in Ayurveda. Plant extract is used as a cooling agent in summer. Leaves decoction in gout, sciatica, arthritis and rheumatism. Root decoction given in rheumatism and paralysis.)

in India: chithramoolaka, elaparni, mukta, phaar, ra-sna, rasana, rashna, rasna, rasya, sreysi, sugandha, surabhi, surasa, suvaha, yukta

in Pakistan: phar buti, reshami, sarme

Pluchea odorata (L.) Cass. (*Conyza cortesii* Kunth; *Conyza odorata* Willd. ex Steud.; *Conyza odorata* L.; *Conyza purpurascens* Sw.; *Pluchea cortesii* (Kunth) DC.; *Pluchea cortesii* DC.; *Pluchea odorata* Cass.; *Pluchea purpurascens* Torr. & A.Gray; *Pluchea purpurascens* (Sw.) DC.; *Pluchea purpurascens* DC.)

Mexico, Jamaica. Herb, erect, smooth, pinkish lavender flower heads smell very strongly of camphor

See *Systema Naturae*, Editio Decima 2: 1213. 1759, *Nova Genera et Species Plantarum seu Prodrum* (Swartz) 112. 1788, *Nova Genera et Species Plantarum* [H.B.K.] 4: 75 [ed. quarto], 59 [ed. folio]. 1820, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 42: 3. 1826, *Synopsis Generum Compositarum* ... 203–204. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 452. 1836, *Nomencl. Bot.* [Steudel], ed. 2. 1: 414. 1840, *Fl. N. Amer.* (Torr. & A. Gray) 2: 261. 1842, *Anales de la Sociedad Española de Historia Natural* 19(2): 273. 1890 and *Fieldiana, Bot.* 24(12): 164–181, 496–502. 1976, *Mem. New York Bot. Gard.* 78: 85–122. 1996

(Leaves for influenza, cough, cold, fever, hypertension, pneumonia, headache; leaves infusion for stomachache.)

in English: salt marsh fleabane, sweet scent

in Mexico: ahuapatli, alaa-patli, alinanché, canela, canelo, chalcay, chalché, cihuapatle, cipatle, clina, comalpatli, flor de ángel, flor de Guadalupe, hierba de Santa María, hoja de playa, Santa María, siguapate, teposa

in Latin America: chalche, santa maria

Pluchea ovalis (Pers.) DC. (*Baccharis ovalis* Pers.; *Baccharis ovata* Hook. & Arn.; *Baccharis ovata* Sieber ex DC.; *Baccharis ovata* Sieber; *Pluchea ovalis* DC.; *Pluchea tomentosa* DC.)

India, Pakistan. Shrub, multi-branched, strongly scented

See *Species Plantarum* 2: 860–861. 1753, *Synopsis Plantarum* (Persoon) 2(2): 424. 1807, *Bull. Sci. Soc. Philom. Paris* 1817: 31. 1817, *Contributions to the Botany of India* [Wight] 16. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 450. 1836, *J. Bot.* (Hooker) 3: 22. 1840 and *Ann. Cat. Vasc. Pl. W. Pakistan & Kashm.* 768. 1972, *Botanica Macaronesica* 7: 67–76. 1980, *Willdenowia* 29: 203–220. 1999, *Englera* 1–136. 2001

(Used in Ayurveda and Sidha. Leaves decoction in gout, sciatica, arthritis and rheumatism.)

in India: kalamba, kalambaka, kolumbu, kolumpuver, sinhalatikta

Pluchea sagittalis (Lam.) Cabrera (*Conyza sagittalis* Lam.; *Gnaphalium suaveolens* Vell.; *Pluchea quitoc* DC.; *Pluchea suaveolens* (Vell.) Kuntze)

Uruguay, Brazil.

See *Species Plantarum* 2: 850–857. 1753, *Encyclopédie Méthodique, Botanique* 2(1): 94. 1786, *Florae Fluminensis Icones* 8: pl. 100. 1827[1831], *Synopsis Generum Compositarum* ... 203–204. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 450. 1836, *Histoire des Plantes* 8: 303. 1886[1882], *Revisio Generum Plantarum* 3(3): 168. 1898 and *Boletín de la Sociedad Argentina de Botánica* 3(1): 36. 1949

(Carminative.)

in Argentina: lucera, quitoc

Pluchea sericea (Nutt.) Coville (*Berthelotia sericea* (Nutt.) Rydb.; *Eremohylema sericea* (Nutt.) A. Nelson; *Polypappus sericeus* Nutt.; *Tessaria sericea* (Nutt.) Shinners)

North America. Perennial shrub

See *Contributions from the United States National Herbarium* 4: 128. 1893 and *Bulletin of the Torrey Botanical Club* 33(3): 154. 1906, *University of Wyoming Publications in Science. Botany* 1: 54. 1924, *Sida* 3(2): 122. 1967

(Herbage infusion to treat sore eyes.)

in English: arrow weed, marsh fleabane

in Spanish: cochinilla

Plukenetia L. Euphorbiaceae

For the British physician Leonard Plukenet, 1642–1706 (London), botanist, author of *Almagesti botanici mantissa*. Londini 1700; see *Species Plantarum* 2: 1192. 1753, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 18–29. London 1790, *Flora Cochinchinensis* 601, 635. 1790, *Bijdragen tot de flora van Nederlandsch Indië* 612–613. 1826, *Florae Fluminensis* 9: t. 127, 128. 1832, *Archiv für Naturgeschichte* 7(1): 190. 1841, *Flora* 25(2, Beibl. 3): 41. 1842, *Genera Plantarum* Suppl. 3: 98. 1843, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 10: 141. 1843, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 708. Hutch. & Dalziel; *Tetracarpidium staudtii* Pax) (*Tetracarpidium* Pax, from the Greek *tetra* ‘four’ and *karpos* ‘a fruit’, Latin *carpidium* ‘carpel’.)

Tropical Africa. Liana, climber, seeds boiled and eaten

See *Flora* 47: 530. 1864, *Bot. Jahrb. Syst.* 23: 525. 1897, *Bot. Jahrb. Syst.* 26: 329. 1899 and *Bull. Misc. Inform. Kew* 1910: 343. 1910, *Das Pflanzenreich* 147,9(Heft 68): 17. 1919, *Fl. W. Trop. Afr.* 1: 307. 1928

(Leaves and fruits aphrodisiac, tonic, stimulant, for headache. Ritual, magic, 5-lobed fruits are good luck charms.)

in English: awusa nut, conophor nut

in Cameroon: casu, kaso, ket

in Yoruba: awusa

in Zaire: tobe

Plukenetia corniculata Sm. (*Hedraiostylus corniculatus* (Sm.) Hassk.; *Hedraiostylus glaberrimus* Hassk.; *Pterococcus corniculatus* (Sm.) Pax & K. Hoffm.; *Pterococcus glaberrimus* Hassk.; *Sajorium corniculatum* (Sm.) D. Dietr.; *Sajorium corniculatum* (Sm.) Baill.)

Tropical Asia.

See *Nova Acta Regiae Societatis Scientiarum Upsal.* 6: 4. 1799, *Flora* 25(2): 41. 1842, *Tijdschr. Natuurl. Gesch. Physiol.* 10: 141. 1843, *Catalogus Plantarum in Horto Botanico Bogoriensi Cultarum Alter* 234. 1844, *Synopsis Plantarum* 5: 331. 1852, *Étude Euphorb.*: 484. 1858 and *Pflanzenr.*, IV, 147, IX: 22. 1919

(Leaf paste eaten as laxative.)

in India: kodi gandlam

Plumbagella Spach Plumbaginaceae

The diminutive of the genus *Plumbago* L., see *Genera Plantarum* 92. 1789, *Histoire Naturelle des Végétaux. Phanérogames* 10: 333. 1841.

Plumbagella micrantha (Ledebour) Spach (*Plumbago micrantha* Ledebour; *Plumbago spinosa* Hao)

Eurasia, China.

See *Fl. Altaic.* 1: 171–172. 1829, *Hist. Nat. Veg.* 10: 333. 1841 and *Repertorium Specierum Novarum Regni Vegetabilis* 36(942–950): 222–223. 1934

(Leaves decoction in arthritis and rheumatism.)

in English: littleflower plumbagella

in China: ji wa cao

Plumbago L. Plumbaginaceae

Latin *plumbago*, *inis* (*plumbum*, *i* ‘lead’ and the termination *-ago*), Plinius used for a plant called *molybdaena*; see Carl Linnaeus, *Species Plantarum.* 1: 151. 1753, *Genera Plantarum.* Ed. 5. 75. 1754, *Flora Cochinchinensis* 94, 119. 1790, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 708. Ansbach 1852 and Salvatore Battaglia, *Grande dizionario della lingua italiana.* XIII: 675. Torino 1986, Peng Ze-xiang (as Peng Tse-hsiang) in Li Shu-gang (as Lee Shu-kang), ed. *Plumbaginaceae. Fl. Reipubl. Popularis Sin.* 60(1): 1–47. 1987, Luteyn, J.L. “The *Plumbaginaceae* in the flora of the southeastern United States.” *Sida* 14: 169–178. 1990, Carlquist, S. and C.J. Biggs. “Wood anatomy of *Plumbaginaceae*.” *Bull. Torrey Bot. Club* 123: 135–147. 1996, Lledó, M. D. et al. “Systematics of *Plumbaginaceae* based upon cladistic analysis of rbcL sequence data.” *Syst. Bot.* 23: 21–29. 1998.

Plumbago auriculata Lam. (*Plumbago alba* Pasq.; *Plumbago alba* Hort. ex Pasq.; *Plumbago auriculata* fo. *alba* (Pasq.) Z.X. Peng; *Plumbago capensis* Thunb.; *Plumbago capensis* Willd.)

South Africa.

See *Species Plantarum* 1: 151. 1753, *Encyclopédie Méthodique, Botanique* 2: 270. 1786, *Prodromus Plantarum Capensium*, ... 33. 1794, *Catalogo del Real Orto Botanico di Napoli* 82. 1867 and *F.T.E.A.*, *Plumbaginaceae*: 5. 1976, *Taxon* 29: 353–355. 1980, *Flora Reipublicae Popularis Sinicae* 60(1): 7. 1987, *Flora of Ecuador* 39: 39–48. 1990, *Flora de Veracruz* 97: 1–11. 1997, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 1985–1986. 2001

(Used in Ayurveda and Sidha. The entire plant, especially the root, contains plumbagin, a toxic naphthoquinone derivative (oil of plumbago), which may cause severe skin irritation or blistering in humans and may also be toxic to other animals. Maceration of root and seed given in pyorrhea and dental caries.)

in English: blueflowered leadwort, Cape leadwort, forget-me-not, leadwort, plumbago

in Italian: plumbago, piombaggine, piombina

in Southern Africa: syselbos; umaBophe, umThi wamadola (Xhosa); utshilitshili (Zulu)

in India: alakalavitaniaram, chitraka, chitramulam, chitrika, karun-kodi-ver, karunkodiveli, karunkotiveli, karuppu-chit-tira-mulam, karuppucittira mulam, kodiveli, krishtnachi-traka, lalchitra, nalla chithra moolamu, nalla chitramulam, nallachitramulam, nallacitramulam, neeli chitra moola, neeli chithramoola, nila-citramula, nilaccittiramulam, nila-chitramula, nilacitraka, nilacitramula, nilagnishikha, nila-godiveli, nilakkotiveli, nilakkotuveli, nilanirakkotiveli, nilashikha, nilaveli, telhidak

in Japan: ruri-matsuri

Plumbago indica Linnaeus (*Plumbago rosea* Linnaeus; *Plumbago rosea* var. *coccinea* (Lour.) Hook.; *Thela coccinea* Loureiro)

India. Herbaceous perennial, shrub, bright red flowers

See *Species Plantarum* 1: 151. 1753, *Herbarium Amboinense* (Linn.) 24. 1754, *Species Plantarum*, Editio Secunda 1: 215–216. 1762, *Flora Cochinchinensis* 1: 94, 119. 1790, *Botanical Magazine* 89: t. 5363. 1863 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/1): 203–205. 1959, *Fl. Nouvelle Caledonie & Depend.* 12: 130–131. 1983, *Economic Botany* (46)3: 330–335. 1992

(Used in Ayurveda and Sidha. Plant used in cases of sprain, paralysis and rheumatic pain, wounds. Bark for stomach troubles, diarrhea, piles, cough, diabetes, skin diseases. Roots and stem bark vesicant abortifacient, a remedy for leprosy. Roots made into a paste with black pepper given orally to prevent conception and for permanent sterility; root powder or decoction taken on empty stomach for abortion; root paste along with the root of *Michelia champaca* given to induce abortion, in higher doses used as poison and vesicant; root paste applied and bandaged for healing cuts, wounds and knife cuts; root juice given for gastric pain; roots insect repellent; root poultice for headache and boils; root ground with a little water and taken orally to cause abortion. Pills made from leaves paste and whole plants of *Habenaria constricta* given after menstrual cycle as contraceptives. Twig introduced in vagina for abortion. Magic, ritual, contact therapy, pieces of fresh roots of *Melothria heterophylla* tied with roots of *Plumbago indica* and rhizome of *Curcuma domestica* worn around the neck to cure jaundice.)

in English: fire plant, Indian leadwort, officinal leadwort, rosy-flowered leadwort

in Bangladesh: kaing-khao

in China: zi hua dan

in India: agechhit, agnichita, agnih, agyachit, akkini, cegappu-godiveli, cengodiveli, cenkodiveli, cenkotiveli, cettikkotuveli, citraka, citrakah, citrakah-rakta, cittira mulam, cittiramulam, cuvannakotuveli, dahanah, dvipih, erra chitamoolamu, erra chitramulam, errachithramoolam, kempu chitra moola, kempu chithra moola, kempucitramula, kotiveli, kotuveli, laalchithra, lal chita, lal chitra,

lal-chitra, lalcitra, mukaklei, nalichitrak, rakta, raktachita, raktacitra, raktacitraka, rakto chitaaparuru, ronga agechita, senkodiveli, senkoduveri, sitaparuru, sivappukkodiveli, sweta chitaaparuru, tambdi-chitrak, telhidak, thambadachitra-moola, yerracitramulam

in Indonesia: tjeraka merah

Malayan names: binasa, cheraka, cheraka merah, setaka

in Philippines: hangad ang babae, laurel, pampasapit, panting-panting

Plumbago zeylanica L. (*Plumbago rosea* L.; *Plumbago scandens* L.; *Plumbago zeylanica* var. *glaucescens* Boiss.)

India. Perennial herb or shrub, creeping, scandent or sub-scandent, succulent roots, leaves oblong, white flowers in sticky glandular terminal panicles, leathery fruits with viscid glandular persistent calyx

See *Species Plantarum* 1: 151. 1753, *Species Plantarum*, Editio Secunda 1: 215–216. 1762, *FBI* 3: 480. 1882 and *Fl. Southern Africa* 26: 17. 1963, *Fieldiana, Bot.* 24(8/2): 207–210. 1966, *Prodr. Fl. SW. Afr.* 105: 4. 1967, *F.T.E.A., Plumbaginaceae*: 5. 1976, *Taxon* 28: 393–395. 1979, *Fontqueria* 14: 37–44. 1987, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1985–1986. 2001

(Used in Ayurveda, Unani and Sidha. Roots contain an irritant poisonous juice; not to be taken by pregnant women, root paste or powder given for abortion, birth control or to prevent conception. Roots washed, pounded and boiled in milk and given to relieve muscular pain; root decoction with bark of *Oroxylum indicum* and roots of *Carissa congesta* given for jaundice; root paste in goat milk given for stomach disorders; root paste to cure skin diseases, measles, ringworm; root extract on leprosy, taken with tea for fever; root decoction given for rheumatism, rheumatoid arthritis; roots insect repellent. Plant stimulant, antifertility, contraceptive, expectorant, antitumour, antimicrobial, insect antifeedant, used for chest pain, jaundice and liver related diseases, tuberculosis, hypertension, leprosy, dyspepsia; plant decoction as a post-partum remedy. Decoction of foliar part of the plant and stem of *Tinospora cordifolia* used for malaria. Latex mixed with mustard oil used in rheumatism. Leaf juice applied to the forehead in headache; warmed leaves applied on boils; for delayed menstruation, eat the leaves with betel; leaves and roots rubefacient, vesicatory, antibiotic, antibacterial, abortifacient. Veterinary medicine, root paste applied on tumors, skin diseases and warts; leaves of *Cassia occidentalis* (*Senna occidentalis*) with root extract of *Plumbago zeylanica* pounded in milk and given orally for rheumatism; leaves ground with those of *Vitex altissima* given in fevers. For snakebites, root decoction drunk. Magico-religious beliefs, contact therapy, for general debility in children a piece of root tied on the neck. Roots as fish poison.)

in English: Ceylon leadwort, doctorbush, white leadwort, white-flowered leadwort, whiteflower leadwort

in China: bai hua dan, bai hua dan shu

(Plant paste applied on boils. Root juice given for stomach disorders, chest pain, tuberculosis, hypertension.)

in China: bai hua dan

in Kenya: mukya

Plumeria L. Apocynaceae

For the French (b. Marseilles) monk Charles Plumier, 1646–1704 (d. near Cádiz, Spain), Franciscan missionary, naturalist, botanical artist, explorer and botanist, traveller

in the West Indies, 1689 and 1690 Martinique, Guadeloupe and Haiti, his works include *Description des plantes de l'Amerique*. Paris 1693, *Nova plantarum americanarum genera*. Paris 1703. See *Species Plantarum* 1: 209–210. 1753, *Primae Lineae Systematis Naturae* 70. 1834 and *Ann. Missouri Bot. Gard.* 25: 189–224. 1938 [1937], H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 225–226. 1964, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 587. 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 93. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 313. 1972, Paul Jovet & J.C. Mallet, in *D.S.B.* 11: 47–48. 1981, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Plumeria alba L. (*Plumeria alba* A. DC.; *Plumeria alba* Aubl.; *Plumeria alba* Kunth)

India. Small tree or shrub, broad fleshy leaves, small fragrant flowers in terminal cymes

See *Species Plantarum* 1: 209–210. 1753, *Histoire des plantes de la Guiane Françoise* 1: 259. 1775, *Nova Genera et Species Plantarum* (quarto ed.) 3: 230. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 392. 1844 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Bot. Commelins* 44. 1983, Kalita D., Saikia C.N. “Chemical constituents and energy content of some latex bearing plants.” *Bioresour. Technol.* 92(3): 219–227. 2004

(Used in Ayurveda and Sidha. Milky latex rubefacient, corrosive, toxic, purgative, used in the treatment of warts, ulcers, herpes, scabies, gout, rheumatism. Latex in large doses used for abortion when introduced into uterus.)

in English: West Indian jasmine, white champa

in Spanish: flor de Mayo

in India: adavi-ganneru, belcampaka, bili daeva kanigalu, champa, champo, daevaganneru, gulachpul, gulchin, haalu sampige, kadasampige, kananakaravira, khad champ, khair-champa, peru, perumalari, perumallari, perumalli, perumaram, perungalli, perunkalli, seemai arali, vellachampaka, velutharali, veyyivaraahalu, veyyivarahalu

in Mexico: cacaloxochitl, flor de Mayo, nikté ch'om, saknikte (= flor blanca), popojoyó, sacnicté, tizalxochitl, tlauhquechlochitl

in Peru: amancayo, azucena, hamancay, lirio

in South America: caracucha, caracucha blanca, frangipani

Plumeria inodora Jacq. (*Plumeria alba* var. *inodora* (Jacq.) G. Don)

India. Small tree, large white flowers

See *Species Plantarum* 1: 209–210. 1753, *Enumeratio Systematica Plantarum* 13. 1760, *A General History of the Dichlamydeous Plants* 4: 94. 1838

(The latex is irritant, acrid, caustic.)

Plumeria rubra L. (*Plumeria acuminata* Aiton; *Plumeria acutifolia* Poir.; *Plumeria acutifolia* var. *gasparrini* A. DC.; *Plumeria angustifolia* A. (Used in Ayurveda. Fruits reported to be used for abortion. Latex toxic, emmenagogue, febrifuge, molluscicidal, cytotoxic and antibacterial, rubefacient, purgative and irritant, large doses may be fatal, poisonous; latex rubbed to relieve

body aches; latex injurious to eyes. Blunt ended portion of twigs abortifacient; young shoot inserted into vagina as abortifacient. Root paste given orally and also placed into uterus for abortion; powdered root used in bone fractures; root bark drastic purgative, antiviral, used in herpes and venereal sores. Bark infusion bath for piles; bark decoction purgative, emmenagogue, febrifuge, anti-herpes, useful in gonorrhea, venereal diseases and headache. Bath of leaves for erysipelas; boiled aqueous extract of the leaves sprinkled on the floor to eradicate flies and mosquitoes. Roasted fresh peduncle made into a paste applied to affected part due to paralysis. Flowers used for the treatment of dysentery. Veterinary medicine, dry fruit crushed with *asafoetida* mixed in milk and given to cattle suffering from spasm. Bark as fish poison.)

in English: common frangipani, dogbane, frangipani, Mexican frangipani, pagoda tree, red frangipani, red plumeria, temple flower, temple tree, West Indian jasmine

in Mexico: acalztatsim, ayotectli (= vaso de calabazo), cacajoyó, cacalosúchil, cacalosúchil rojo, cacaloxóchitl, chaknicte (= flor roja), cundá, flor de mayo, huiloicxitl (= pata de palma), jacalosúchil blanco, jacalosúchil rojo, litie, nikté, nikté ch'om, parandachicua, parandichiena, popojoyó, suchichahue, tlalalticacaloxochitl (= flor del cuervo roja)

in Peru: aleli, amancayo, amapola, atapaimo, azucena, belaco caspi, caracucha, caracucho, hamancay, lirio, lirio de la costa, plumeria, suche, suche amarillo, suche blanco, suche rojo, suche turumbaco, suchi, tamaiba

in South America: acuanjoche, alejandría, campechana, camptonera, caracucha, caracucha blanca, caracucha colorada, flor blanca, flor de cuervo, flor de mayo, frangipani, lengua de toro, palo de la cruz, sacuanjoche, saugran, suchi, tlalpalitos

in China: ji dan hua, ji dan hua shu

(The pollen of this species may cause hay fever.)

in English: common meadow grass, June grass, junegrass, Kentucky bluegrass, meadow grass, meadow poa, smooth meadow grass, smooth-stalked meadow grass, spear grass, winter grass

in French: pâturin des prés

in Spanish: grama de prados, poa común, zacate poa

in Colombia: pasto azul de Kentucky

in Mexico: zacate azul de las praderas, zacate azul del Kentucky

in Portuguese: capim-do-campo

in Japan: nagahagusa

Podandrogynae Ducke Capparaceae (Capparidaceae, Cleomaceae)

Greek *pous, podos* ‘a foot’, *androgynos* ‘man-woman, hermaphrodite’, Latin *androgynus* ‘having male and female flowers separate but on the same inflorescence’, see *Archivos do Jardim Botânico do Rio de Janeiro* 5: 115, f. 9. 1930, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 984–1006. 1938, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 566–584. 2001.

Podandrogynae mathewsii (Briq.) Cochrane (*Cleome brachycarpa* Vahl ex DC., nom. nud.; *Cleome brachycarpa* M. Vahl ex Triana & Planchon; *Cleome densiflora* (Benth.) Triana & Planch.; *Cleome hirsuta* Ruiz & Pav. ex DC., nom. nud.; *Cleome lateralis* Triana & Planch.; *Gynandropsis brachycarpa* DC.; *Gynandropsis briquetiana* Diels; *Gynandropsis densiflora* Benth.; *Gynandropsis hispidula* DC.; *Gynandropsis lateralis* (Triana & Planch.) Pax & Hoffm.; *Gynandropsis mathewsii* Briq.; *Gynandropsis ulei* Gilg ex Briq.; *Pedicellaria lehmannii* Hieron.; *Podandrogynae brachycarpa* (DC.) Woodson; *Podandrogynae brevipedunculata* Cochrane; *Podandrogynae densiflora* (Benth.) H.H. Iltis & Cochrane)

India, Ecuador. Suffrutex, shrub or treelet, glandular, herb, erect, sticky viscid foul-smelling foliage, red-orange flowers, inflorescences erect, black seeds with white arils

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 238, 240. 1824 [mid Jan 1824], *Plantas Hartwegianas imprimis Mexicanas* 160. 1845, *Annales des Sciences Naturelles; Botanique*, (Paris) série 4 17: 72–73. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20 (Beibl. 49): 20. 1895 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 17: 385, 387. 1914, *Die natürlichen Pflanzenfamilien*, Zweite Auflage 17b: 218. 1936, *Biblioth. Bot.* 116: 88. 1937, *Annals of the Missouri Botanical Garden* 35: 143. 1948, *Selbyana* 2(1): 32 (–36), t. 9, 10. 1977, *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 65: 268. 1989, *Novon* 7(4): 353–354. 1997[1998]

(Tonic bath. Veterinary medicine, plants used to cure worms in camel’s nose.)

in India: navli, noddi

in Ecuador: acuradapé, yacu guandu

Podanthus Lagasca Asteraceae

From the Greek *pous, podos* ‘a foot’ and *anthos* ‘flower’, referring to the stalked flower-heads, see *Gen. Sp. Pl.* [Lagasca] 24. 1816.

Podanthus ovatifolius Lag. (*Euxenia ovalifolia* Kuntze)

Chile. Shrub

See *Genera et species plantarum* 24. 1816, *Revis. Gen. Pl.* 1: 338. 1891

(Stem emmenagogue, also for bladder disorders.)

in Chile: mitique, mitrio, mitrique, palo negro

Podocarpium (Benth.) Y.C. Yang & S.H. Huang Fabaceae (Desmodieae, Leguminosae)

From the Greek *pous, podos* ‘a foot’ and *karpos* ‘fruit’, see *Pl. Jungh.* 226. 1852, *Gen. Pl.* [Bentham & Hooker f.] 1(2):

520. 1865 and *Ginkgoana* 1: 120. 1973, *Bull. Bot. Lab. N. E. Forest. Inst., Harbin* 4: 4. 1979, *Edinburgh J. Bot.* 57(2): 173. 2000.

Podocarpium repandum (Vahl) Yen C. Yang & P.H. Huang (*Desmodium repandum* (Vahl) DC.; *Desmodium scalpe* DC.; *Hedysarum repandum* Vahl; *Meibomia repanda* (Vahl) O. Kuntze)

Africa, Asia, Sri Lanka, India. Herb erect, suffrutescent, woody at the base, simple or branched, rootstock woody, leaves 3-foliolate chartaceous, racemose inflorescence terminal and axillary, corolla orange to red, pod densely hairy, along water courses, in grassland, open places and forest margins, see also *Hylodesmum repandum* (Vahl) H. Ohashi & R.R. Mill

See *Species Plantarum* 2: 745–751. 1753, *Enumeratio Methodica Plantarum* 168. 1759, *Symbolae Botanicae ...* 2: 82. 1791, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 334. 1825, *Revisio Generum Plantarum* 1: 197. 1891 and *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 4: 1, 13. 1979, *Edinburgh Journal of Botany* 57(2): 185. 2000

(Diuretic, astringent, used for diarrhea, dysentery. Ritual.)

in Indonesia: leng-elengan, potong kujang, waliketupa sapi

in Laos: kh'üa s'a:thwa'

in Burundi: akagonderamuhoro, akagumiramuhoro

in Congo: anjoba, irhuza likasi, irhuza lilume, ituza, medingofe

in Kenya: ladakat

in Madagascar: vahietatra

in Rwanda: ituza

in Tanzania: kuloko la kuku

Podocarpus L'Hérit. ex Pers. Podocarpaceae

Greek *pous*, *podos* and *karpos* 'fruit', referring to the length of the fleshy stalks; see *De Fructibus et Seminibus Plantarum...* 1: 191. 1788, *Novae Hollandiae Plantarum Specimen* 2: 71, t. 221. 1806, Charles Louis L'Héritier de Brutelle, *Synopsis Plantarum*. (Persoon) 2(2): 580. 1807, *Mémoires du Muséum d'Histoire Naturelle* 13: 48. 1825, *Enum. Pl. Javae* 1: 88. 1827, *Synopsis Coniferarum* 203, 221. 1847, *Bonplandia* (Hanover) 10: 366. 1862, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 513. 1868, *Annales des Sciences Naturelles; Botanique*, sér. 5, 20: 65. 1874 and *Das Pflanzenreich* 45(18): 58. 1903, *Philippine Journal of Science* 2(4): 259. 1907, *Journal of the Arnold Arboretum* 29(1): 57. 1948, *Fieldiana, Bot.* 24(1): 20–23. 1958, *Journal of the Arnold Arboretum* 50: 315. 1969, *Trav. Lab. Forest. Toulouse* tome 2, sect. 1, vol. 1(2), chap. 20: 113, 122. 1974, *Blumea* 30(2): 251–278. 1985, H.E. Connor and

E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany*. 25: 115–170. 1987, *Blumea* 32: 209–211. 1987, *Fl. Colombia* 5: 1–73. 1988, *Notes from the Royal Botanic Garden, Edinburgh* 45(2): 377–395. 1989 [dt. 1988, issued 22 Feb 1989], *Botanical Journal of the Linnean Society* 112(1): 59–74. 1993, *Bothalia* 25(2): 233–236. 1995, *South African Journal of Science* 100: 629–632. 2004. The nomenclature is confusing and in need of clarification; some authors consider *Afrocarpus* as comprising only a single, variable species, recently separated from *Podocarpus*.

Podocarpus dacrydioides A. Rich. (*Dacrycarpus dacrydioides* (A. Rich.) de Laub.; *Nageia dacrydioides* (A. Rich.) F. Muell.)

New Zealand. Tree, straight, slender upright branches, tiny green scale-like leaves, shiny black seeds in a fleshy scarlet cup

See *Voyage de Découverts de l'~Astrolabe~ ... Botanique* 1: 358. 1832, *Select Plants ...* Melbourne 138. 1876 and *Journal of the Arnold Arboretum* 50(3): 337. 1969

(Bark tonic, used for bruises. Leaves, vapor baths, for urinary complaints.)

in English: white pine

Maori name: kahikatea

Podocarpus falcatus (Thunb.) R. Br. ex Mirbel (*Afrocarpus falcatus* (Thunb.) C.N. Page; *Decussocarpus falcatus* (Thunb.) de Laub.; *Decussocarpus fleuryi* (Hickel) de Laub.; *Nageia falcata* (Thunb.) Carrière; *Nageia falcata* (Thunb.) Kuntze; *Podocarpus falcatus* (Thunb.) Endl.; *Podocarpus fleuryi* Hickel; *Podocarpus gracilior* sensu Burt Davy, non Pilg.; *Podocarpus gracillimus* Stapf; *Taxus falcata* Thunb.)

East Africa. Evergreen tree, straight, bark flaking, narrow leaves shiny, 1–3 male axillary catkins, hard fruit rounded, inner flesh eaten by monkeys and birds, in upland rain forest, forest, often associated with *Juniperus*

See *Species Plantarum* 2: 1040. 1753, *De Fructibus et Seminibus Plantarum...* 1: 191. 1788, *Prodromus Plantarum Capensium, ...* 117. 1800, *Syn. Pl.* 2(2): 580. 1807, *Mémoires du Muséum d'Histoire Naturelle* 13: 75. 1825, *Synopsis Coniferarum* 219. 1847, *Revue Horticole* 40: 370. 1869 and *Bulletin de la Société Dendrologique de France* 76: 75. 1930, *Journal of the Arnold Arboretum* 50: 340, 355, 359. 1969

(An infusion from the bark to treat stomachache.)

in English: bastard yellowwood, common yellowwood, East African yellowwood, Outeniqua yellowwood, podo, smooth-barked yellowwood

in East Africa: muthengera, mvavavi, ol-pirripirri

in Southern Africa: geelhout, kolander, nikolander, nietlander, Outeniekwageelhout; umSonti (Swazi); mogobagoba, mogôbagôba (North Sotho); umSonti, uNomphumelo,

umHlenhlane, umGeya, umKhandangoma, umPume (Zulu); umKhoba, umKoleya, umGeya (Xhosa)

Podocarpus ferrugineus G. Benn. ex D. Don (*Nageia ferruginea* (G. Benn. ex D. Don) F. Muell.; *Prumnopitys ferruginea* (G. Benn. ex D. Don) de Laub.; *Stachycarpus ferrugineus* (G. Benn. ex D. Don) Tiegh.)

New Zealand. Forest tree, straight trunk, roundish spreading crown, dark green curved pointed spikes, male trees with small cones, fleshy bright red fruits plum-like, flesh yields an oil with turpentine flavour

See Lambert, Aylmer Bourke (1761–1842), *A Description of the Genus Pinus* ed. 2 2: 189. London, Weddell, 1832, *Bulletin de la Société Botanique de France* 38: 173. 1891 and *Blumea* 24(1): 190. 1978

(Gum insecticide, for wounds and ulcers; oil as a tonic after fever. Bark antiseptic, astringent, an infusion for stomach-ache; leaves and bark for gonorrhoea.)

in English: rusty podocarpus

in New Zealand: miro, toromiro

Podocarpus latifolius (Thunb.) R. Br. ex Mirb. (*Nageia latifolia* (Wall.) Gordon; *Podocarpus latifolius* Blume, nom. illeg., non *Podocarpus latifolius* (Thunb.) R. Br. ex Mirb.; *Podocarpus latifolius* Wall.; *Podocarpus milanjanus* Rendle; *Podocarpus thunbergii* Hook.; *Taxus latifolia* Thunb.; *Taxus latifolius* Thunb.)

East Africa, Sudan, South Africa, China. Evergreen, dioecious tree, straight and cylindrical, female cone terminal, male cone axillary, a fleshy receptacle at the base of the seed, included in the IUCN Red list

See *Species Plantarum* 2: 1040. 1753, *De Fructibus et Seminibus Plantarum...* 1: 191. 1788, Thunberg, Carl Peter (1743–1828), *Prodromus Plantarum Capensium* ... 117. Upsalæ: J. Edman, 1794–1800, *Syn. Pl.* 2(2): 580. 1807, *Mémoires du Muséum d'Histoire Naturelle* 13: 75. 1825, *Enumeratio Plantarum Javæ* 1: 89. 1827, *Plantae Asiaticae Rariores* 1(2): 26, t. 30. 1830, Gordon, George (1806–1879), *The Pinetum* 138. London: Henry G. Bohn, 1858 and Cheng Wan-chün, Fu Li-kuo & Chao Chi-son. *Podocarpaceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 398–422. 1978, *Journal of the Indian Chemical Society* 66(6): 423–424. 1989, *Int. J. Plant Sci.* 153: 572–588. 1992, *Mem. New York Bot. Gard.* 70: 21, 71–73. 1994, *Journal of Ethnopharmacology* 70: 281–300. 2000

(A bark infusion taken to treat stomachache. A leaf decoction drunk as vermifuge.)

in English: broad-leaved yellowwood, East African yellowwood, podo, real yellowwood, red-fruited podo, rough-barked yellowwood, true yellowwood, upright yellowwood, yellowwood

in India: karunthumbi, karuntumpi

in Southern Africa: opregte geelhout, regte geelhout, Kaapse geelhout, wittegeelhout; monyaunyau, mogobagoba, mogôbagôba (North Sotho); umKhoba, umSonti, umGeya (Zulu); umCheya, umGeya (this same word used also for giraffe), umKhoba, umSonti (Xhosa); muhovho-hovho (Venda); ruHombge, muNyenza (Shona)

Podocarpus macrophyllus (Thunb.) D. Don (*Margbensonia macrophylla* (Thunb.) A.E. Bobrov & Melikyan; *Nageia macrophylla* (Thunb.) F. Muell.; *Nageia macrophylla* (Thunb.) Kuntze; *Nageia macrophylla* Kuntze; *Podocarpus macrophyllus* (Thunb.) Sweet; *Podocarpus macrophyllus* D. Don; *Taxus macrophylla* Thunb.; *Taxus macrophylla* Banks ex Endl.)

Asia. Evergreen shrub or tree, elongated pollen cones yellowish

See *Nova Acta Regiae Soc. Sci. Upsal.* iv. 38. 1783, *Fl. Jap.* (Thunberg) 276. 1784, *Syst. Vegetabilium*. Editio decima quarta (J.A. Murray) 895. 1784, *Hortus suburbanus Londinensis* 211. 1818, *A Description of the Genus Pinus* 2: 22. 1824, *Select Plants ... New South Wales* ed. 204. 1881, *Revisio Generum Plantarum* 2: 800. 1891 and *Jap. J. Genet.* 63: 413–423. 1988

(Fleshy seeds toxic if eaten.)

in English: bigleaf podocarp, Japanese yew, shrubby yew podocarpus, southern yew, yew podocarp

in Japan: inu-maki

in Okinawa: chagi, kyangi

in China: lo han mu, lo han sung, luo han song, luo han song shi

Podocarpus nerifolius D. Don (*Podocarpus discolor* Blume; *Podocarpus leptostachyus* Blume; *Podocarpus macrophyllus* var. *acuminatissimus* E. Pritz.; *Podocarpus neglectus* Blume)

China. Evergreen tree or shrub, dioecious, bole straight, dark green drooping foliage, whorled spreading branches, flowers in axillary catkins, clustered pollen cones, seed cones solitary, receptacle bright red and succulent when ripe, seeds edible

See *A Description of the Genus Pinus* London: J. White, 1803–1824 [David Don, 1799–1841, is the author of vol. 2.], *Hort. Brit.* [Sweet] 371. 1826, *Rumphia* 3: 213–214. 1836–1849, *Revisio Generum Plantarum* 2: 800. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 213. 1900, *Blumea* 4: 437. 1941, *Journal Arnold Arboretum* 39: 460, 467. 1958, *Fl. Malesiana* 1, 10: 400, map fig. 45. 1988

(Leaves decoction used as an alterative in rheumatism and for painful joints.)

in China: bai ri qing

in India: halis, sarthing, thiangfar, thlang-phar, thlangfar, tring-thi

Malay name: podo bukit

Podocarpus spicatus R. Br. (*Austrotaxus spicata* (R. Br.) Compton; *Nageia spicata* (R. Br.) F. Muell.; *Podocarpus spicatus* R. Br. ex Mirb.; *Podocarpus spicatus* Poepp. & Endl.; *Podocarpus spicatus* Poepp.; *Prumnopitys spicata* (Poepp.) Molloy & Muñoz-Schick; *Stachycarpus spicatus* (R. Br.) Tiegh.)

New Zealand. Forest tree, black fruits

See *Mém. Mus. Hist. Nat., Paris* xiii. 75. 1825, *Nova Genera ac Species Plantarum* (Poeppig & Endlicher) 3: 18. 1841, *Bulletin de la Société Botanique de France* 38: 173. 1891 and *Journal of the Linnean Society, Botany* 45: 427. 1922, *New Zealand Journal of Botany* 37: 190. 1999

(Juice from the trunk tonic, antiseptic, for consumption.)

in English: black pine

Maori name: matai

Podocarpus totarus G. Benn. ex D. Don (*Nageia totara* (G. Benn. ex D. Don) F. Muell.; *Podocarpus totara* G. Benn. ex D. Don; *Podocarpus totarus* D. Don)

New Zealand. Forest tree, straight, leaves with sharply pointed tips, fruit a small nut with a succulent red base, berries edible

See *A Description of the Genus Pinus*. London, 1803–1824

(Smoke from burning wood for skin and venereal diseases, piles. Inner bark for fever. Held sacred by the Maori people.)

in English: true totara

in New Zealand: totara

Podocarpus usambarensis Pilg. (*Afrocarpus dawei* (Stapf) C.N. Page; *Afrocarpus mannii* (Hook.f.) C.N. Page; *Afrocarpus usambarensis* (Pilg.) C.N. Page; *Decussocarpus mannii* (Hook.f.) de Laub.; *Nageia mannii* (Hook.f.) Kuntze; *Nageia mannii* var. *usambarensis* (Pilg.) Silb.; *Podocarpus dawei* Stapf; *Podocarpus mannii* Hook.f.)

Congo to Kenya and Tanzania. Tree, close to *Afrocarpus falcatus*

See *Das Pflanzenreich* 5: 70. 1903, *Notes from the Royal Botanic Garden, Edinburgh* 45: 384. 1988, *Journal of the International Conifer Preservation Society* 7(1): 28. 2000

(An infusion from the bark to treat stomachache, applied to itching rash. Seed oil in the treatment of gonorrhoea and venereal diseases.)

Podophyllum L. Berberidaceae (Podophyllaceae)

Derived from *Anapodophyllum* Catesby, Latin *anas*, *anatis* 'the duck', Greek *pous*, *podos* 'a foot' and *phyllon* 'a leaf',

referring to the shape of the leaves; see *Species Plantarum* 1: 505. 1753, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 558. Ansbach 1852 and Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 705. Torino 1986, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 495. Basel 1996. Several lignans and their glycosides, present in the resin extracted from rhizomes and roots, exhibit antitumor activity. Etoposide, a semisynthetic derivative of one of the lignans, is currently used in the treatment of small-cell lung cancer and testicular cancer. Rootstock produce podophyllol, a sticky resin, quarcetin and podophyllo-toxin of medicinal importance.

Podophyllum emodi Wall. ex Royle (*Podophyllum emodi* Wall., nom. nud.; *Podophyllum emodi* Wall. ex Hook.f. & Thomson; *Podophyllum emodi* var. *hexandrum* (Royle) Chatt. & Muker.; *Podophyllum hexandrum* Royle; *Podophyllum sikkimensis* Chatterjee & Mukerjee; *Sinopodophyllum emodi* (Wall. ex Royle) T.S. Ying; *Sinopodophyllum emodi* T.S. Ying; *Sinopodophyllum hexandrum* (Royle) T.S. Ying; *Sinopodophyllum hexandrum* (Royle) T.S. Ying var. *emodi* (Wall., Hook.f. & Thomson) J.M.H. Shaw)

China, Pakistan, Himalaya. Perennial herb, erect, somewhat fleshy or succulent, rhizome short, creeping rootstock, palmate leaves reflexed, flowers erect, petals deep pink, berry oblong-ovoid or oblong-ellipsoid, fruits said to be edible, a medicinal resin is obtained from the plant, very variable species in stature or overall size and number of stamens, and any separation of taxa on these characters will be valueless, see also *Sinopodophyllum hexandrum*

See *Species Plantarum* 1: 505. 1753, *Numer. List* [Wallich] n. 814. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 64. 1834, *Fl. Ind.* [Hooker f. & Thomson] 1: 232. 1855 and *Beaut. Fl. Kash.* 1: 27. 1928, *Records of the Botanical Survey of India* 16(2): 45, 48. 1953, *Fl. Afghan.* 133. 1960, *Ann. Catl. Vasc. Pl. W. Pakistan & Kashmir* 282. 1972, *Bot. Zhurn.* 64 (11): 1539–1551. 1979, *Acta Phytotaxonomica Sinica* 17(1): 15–16. 1979, *Taxon* 30: 75. 1981, Wu, Zhengyi, *Flora Xizangica [Tibet]*. [China], 1983, *Genetica* 82: 59–62. 1990, *Glimpses Pl. Res.* 12(1): 165–171, 191–198. 1998, *Ethnobotany* 17: 127–136. 2005, *Hanburyana* 4: 36. 2009

(Leaves and roots of *Podophyllum hexandrum* are poisonous; plant highly poisonous, it should not be prescribed for pregnant women. Soft warmed fresh leaves applied to boils. Fruit used for gynecological problems, blood disorders, for easy delivery; ripe fruits eaten as a mild laxative. Roots and rhizomes purgative, stimulant, vermifuge, cholagogue, cytostatic. Rhizome paste applied to the vagina to treat infections; rhizome paste eaten as a purgative. Rhizomes, roots, fruits and seeds for cuts and wounds, skin diseases, fever, gastric ulcers.)

in Bhutan: hol-mo-se

in India: angwaly, bajkakri, bakrachimaka, bankakdi, bankakri, banwangan, galakada, ghee, giriparpat, kakrya, papari, papra, papri, rikhat, shatjalari, wanwangan

in Nepal: golapani, haamung, laghu patra, shinmendo

in Pakistan: bankakri, banwangan, papra

in Tibet: ol mo se

***Podophyllum peltatum* L.**

North America. Perennial rhizomatous herb, creeping underground stems, palmately dissected peltate leaves, whitish nodding apple-blossom-like flowers, yellow or red egg-shaped berry, fruit for food

See *Species Plantarum* 1: 505. 1753 and Rosenstein, G. et al. "Podophyllum—a dangerous laxative." *Pediatrics* 57: 419–421. 1976, *Bot. Zhurn.* 64(11): 1539–1551. 1979, *Annals of the Carnegie Museum* 49: 265–305. 1980, Cassidy, D.E., Drewry, J., Fanning, J.P. "Podophyllum toxicity: a report of a fatal case and a review of the literature." *J. Toxicol. Clin. Toxicol.*, 19: 35–44. 1982, Dewick, P.M. "Tumour inhibitors from plants." in: G.E. Trease and W.C. Evans. *Pharmacognosy*, ed. 12. London. pp. 629–647. 1983, *Acta Biologica Cracoviensia, Series Botanica* 29: 19–30. 1987, *International Organization of Plant Biosystematists Newsletter* 13: 17–19. 1989, *Regnum Veg.* 127: 77. 1993

(The ripe fruit of *Podophyllum peltatum* is considered edible, but in limited quantity; all other parts of the plant are toxic, root considered poisonous, misuse has caused toxic reactions and even fatalities; if taken in large amounts leaves, roots and seeds can be poisonous, highly toxic, may be fatal if eaten. Insecticide, emetic, tonic, purgative, laxative, cathartic, antirheumatic, anthelmintic, on ulcers and sores, boils, for rheumatism, constipation, deafness. Roots purgative, to treat jaundice and fevers. Podophyllotoxin, an antitumor compound. Veterinary medicine, a laxative for horses. Magico-religious beliefs, ceremonial, a love charm.)

in English: American mandrake, Indian-apple, mandrake, may apple, raccoon-berry, wild jalap, wild lemon, wild-mandrake

in Canada: podophylle pelté, pomme de mai

in Italian: podofillo

Poeciloneuron Beddome Guttiferae (Bonnetiaceae, Calophyllaceae, Clusiaceae)

From the Greek *poikilos* 'spotted, mottled, many-coloured' and *neuron* 'nerve', see *Species Plantarum* 1: 513–514. 1753, *Theoria Systematis Plantarum* 121. 1858, *Journal of the Linnean Society, Botany* 8: 267, t. 17. 1865.

***Poeciloneuron indicum* Bedd.**

India. Trees, white flowers in axillary and terminal panicles, beaked globose capsule

See *J. Linn. Soc., Bot.* 8: 267. 1865 [17 Feb 1865]

(Root made into a paste taken as an oral contraceptive. Magico-religious beliefs and performances.)

in India: pootham kolli, poothamkolli, vayila, vazha

Poga Pierre Anisophylleaceae (Rhizophoraceae)

A vernacular name from Gabon, see *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1254. 1896.

***Poga oleosa* Pierre**

Tropical Africa, Cameroon. Tree, straight and cylindrical stem, gray bark, purplish rough branchlets, leathery smooth glossy leaves, very small flowers stalkless, green rough fruits with brown spots on them, kernels edible, in forest

See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1254. 1896

(Kernel emollient, laxative, for skin diseases. Oil used with *Dorstenia multiradiata* as a treatment for psoriasis.)

in English: African Brazil nut, inoi nut

in Cameroon: angale, fo, mpoi, ngale, pobo

in Gabon: afo, m'poga, ovoga

in Nigeria: imono (Ibo); inoi (Efik); onyo (Boki)

in Yoruba: iku, ikujebu

in Western Tropical Africa: afo, inoi nut, inoy, poga

Pogonarthria Stapf Poaceae (Gramineae)

From the Greek *pogon* 'beard' and *arthron* 'a joint', possibly referring to the rachilla joints, hairy, between *Eragrostis* and *Harpachne*, type *Pogonarthria falcata* (Hack.) Rendle, see *Flora Capensis* 7: 316. 1898, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 2(1): 232. 1899 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 362. 1908, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 57: 532. 1912, *Bulletin of Miscellaneous Information Kew* 1932: 325. 1932, *Senckenbergiana Biologica* 47(4): 303–307. 1966, *Journal of Biogeography* 27(6): 1385–1401. Nov 2000, David C. Hartnett, Andre F. Potgieter and Gail W. T. Wilson, "Fire effects on mycorrhizal symbiosis and root system architecture in southern African savanna grasses." *African Journal of Ecology* Volume 42(4): 328–337. Dec 2004, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, "Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications." *Botanical Journal of the Linnean Society* 148(1): 57–72. May 2005.

***Pogonarthria squarrosa* (Licht. ex Roem. & Schult.) Pilg.** (*Eragrostis marlothii* Hack.; *Leptochloa falcata* Hack. ex Schinz; *Leptochloa falcata* Hack.; *Panicum natalense* Hochst.; *Poa squarrosa* Licht. ex Roem. & Schult.; *Poa squarrosa* Roem. & Schult.; *Pogonarthria falcata* (Hack. ex Schinz) Rendle; *Pogonarthria falcata* (Hack.) Rendle;

Pogonarthria hackelii Chiov.; *Pogonarthria orthoclada* Peter; *Pogonarthria squarrosa* (Roem. & Schult.) Pilg.)

Tropical Africa, eastern and southern Africa. Perennial, very variable, tufted to densely tufted, erect, unbranched, clumped, stiff, sometimes shortly rhizomatous, shallow rooted, leaf blade usually rolled and pointed, leaf sheath glabrous and more or less keeled to rounded, ligule a ring of short white hairs, inflorescence linear-oblong to pyramidal, sickle-shaped racemes ascending or spreading, 4–10 spikelets flowered, racemes grouped simply or arranged spirally, glumes lanceolate, lemmas 3-nerved sharply acuminate, pioneer grass, weed species hard and unpalatable, very low grazing value, possibly a source of vegetable salt, usually in disturbed areas, open waste places, grassland, sandy soil, uncultivated lands, poor soils, along roadsides, woodland and open woodland, old lands

See *Species Plantarum* 1: 55, 67. 1753, *Genera Plantarum* 23. 1776, *Essai d'une Nouvelle Agrostographie* 71. 1812, *Systema Vegetabilium* 2: 553. 1817, *Flora* 29: 113. 1846, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 404. 1889, *Bulletin de l'Herbier Boissier* 3(8): 386. 1895, *Flora Capensis* 7: 316. 1898, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853--61* 2(1): 232. 1899 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 5: 149. 1910, *Annali di Botanica* 10(3): 413. 1912, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1. Anhang): 79. 1930, *Cytologia* 19: 97–103. 1954, *Bothalia* 17: 135–136. 1987

(Roots for bilharzia and skin infections.)

in English: cross grass, herringbone grass, sickle grass

in Angola: kaxixi

in Nigeria: lammu lammugel, lammulammugel

in Southern Africa: pluimsekelgras, sekelgras, meerjarige denneboomgras, ausdauerndes tannengras; lefeloane (Sotho); lefheto (Tswana)

Pogonatherum P. Beauv. Poaceae (Gramineae)

From the Greek *pogon* 'a beard' and *ather* 'awn', referring to the glumes, to the appearance of the inflorescences, resembling *Lophopogon*, type *Pogonatherum saccharoideum* P. Beauv. (nom. illeg. superfl. for *Saccharum paniceum* Lam.), see Ambroise Marie François Joseph Palisot de Beauvois (1752–1820), *Essai d'une nouvelle Agrostographie*. 56, 176, pl. 11, f. 7. Paris (Dec.) 1812, *Fundamenta Agrostographiae* 166. 1820, *Reliquiae Haenkeanae* 1(4–5): 333, t. 46. 1830, *Synopsis Plantarum Glumacearum* 1: 379. 1854 and *J. (A paste of the ashes of the whole plant applied for skin diseases.)

Malay names: rumput sembor batu, rumput sumbu buta

Pogostemon Desf. Lamiaceae (Labiatae)

Greek *pogon* 'beard' and *stemon* 'stamen, thread', alluding to the filaments; see *Mémoires du Muséum d'Histoire Naturelle* 2: 154–155. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 151, 154. 1848, Ferdinand von Mueller, *Fragmenta Phytographiae Australiae*. 1: 55. Melbourne (Jul.) 1858 and Smith, A.C. *Flora Vitiensis Nova*. A new flora for Fiji (Spermatophytes only) 5: 1–626. Pacific Tropical Botanical Garden, Lawai. 1991.

***Pogostemon amaranthoides* Benth.**

Himalaya, India, Nepal.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 153. 1848

(Root juice applied on forehead to treat headache. To treat cough, root chewed and leaf juice applied on the forehead, the chest and the back.)

in Nepal: nampani, rasangan, rudila

***Pogostemon auricularius* (L.) Hassk.** (*Dysophylla auricularia* (L.) Blume; *Dysophylla auricularia* Blume; *Mentha auricularia* L.; *Mentha foetida* Burm.f.)

Trop. Asia, China. Herb, erect or procumbent, strong smelling, weak, leaves glandular, inflorescence a dense terminal spike, calyx gland-dotted corolla lavender, pale pink or white, schizocarpous nutlets enclosed in the persistent calyx

See *Mantissa Plantarum* 1: 81. 1767, *Flora Indica ... nec non Prodromus Florae Capensis* 126. 1768, *Bijdragen tot de flora van Nederlandsch Indië* 14: 826–827. 1826, *Tijdschr. Natuurl. Gesch. Physiol.* 10: 127. 1843

(Whole plant stomachic, used in the treatment of simple stomach problems and urinary trouble in children. A poultice made from the leaves applied as a cure for diarrhea, colic, worms, sores, kidney problems; leaves juice as eye drops in hysteria. Leaves chewed against colic; a decoction drunk to cure malaria, a lotion applied as a rubefacient against rheumatism; leaves decoction as a steam to reduce fever.)

in English: tiger steam

in Bangladesh: krombe

in China: shui zhen zhu cai

in Indonesia: kambing kambing, ke kucing, ketumpang, pan-yap leniau

in Malaysia: ekor kucing, kekucing

in Philippines: buntot pusa

in Thailand: saapraeng saapkaa

in Vietnam: c[or] c[of], t[us] h[huf]ng h[if]nh tai

***Pogostemon benghalensis* (Burm.f.) Kuntze** (*Mentha integra* Buch.-Ham. ex Benth.; *Origanum benghalense* Burm.f.; *Origanum bengalense* B. Heyne ex Wall.; *Origanum indicum* Roth; *Pogostemon benghalense* (Burm.f.) Kuntze; *Pogostemon benghalensis* Kuntze; *Pogostemon frutescens* J. Graham; *Pogostemon parviflorus* Benth.; *Pogostemon plectranthoides* Desf.; *Pogostemon plectranthoides* auct., non Desf.; *Pogostemon purpuricaulis* Dalzell)

Pakistan, Vietnam. Herb, bushy shrubs, strong, solid, many-branched, inflorescence a terminal false spike, white or pink corolla, fruit composed of 4 shining obovoid nutlets, in open riverine forest

See *Flora Indica ... nec non Prodromus Florae Capensis* (N.L. Burman) 128, pl. 38, f. 3. 1768, *Ann. Mus. Natl. Hist. Nat.* ii. (1803) 155. t. 6. 1803, *Annales du muséum national d'histoire naturelle* 2: 155. 1815, *Nov. Pl. Sp.* 265. 1821, *Numer. List* [Wallich] n. 1532. 1829, *Cat. Pl. Bombay* 149. 1839, *Hooker's J. Bot. (Fumes by burning dried leaves and inflorescences used to treat chicken pox.)

in India: iswara daal

***Pogostemon parviflorus* Benth.**

India, Bangladesh. Stout erect branched glabrous pubescent purple-coloured herbs, flowers in dense cone-like spikes, bilabiate corolla violet, ovoid smooth nutlets

See *Pl. Asiat. Rar.* 1: 31. 1830, *Flora Hongkongensis* 275. 1861

(Plant extract to cure ringworm, the water infection in rainy season. For headache extract of fresh leaves consumed orally, also used as eye drop. Leaf paste antiseptic, applied on the wound to stop bleeding; bruised fresh leaves styptic, applied for cleaning wounds. Roots a postpartum remedy; roots for uterine hemorrhage, antidote for snakebite and scorpion sting. Young twigs paste applied on the scrotum in case of inguinal hernia. Leaves insecticide and insect repellent, put or mixed with food grains. Seed and leaves for foodgrain pests, mosquito and insect repellent.)

in India: fangla, pakhankhol, pangli, panglo, phangla, sam sanum, shangbrei, shinedm

***Pogostemon plectrantoides* Desf. (*Mentha fruticosa* Roxb. ex D. Don; *Mentha secunda* Roxb.; *Ocimum bengalense* Poir.; *Wensea pyramidata* J.C. Wendl.)**

India to Bangladesh. Semishrub, solid, angular, inflorescence a terminal false spike, calyx inflated, corolla tubular purple 2-lipped, fruit composed of 4 nutlets obovoid, open bush vegetation

See *Mém. Mus. Hist. Nat.* 2: 155. 1815, *Prodr. Fl. Nepal.* 115. 1825

(A kind of patchouli oil is distilled from the leaves, used for headache, fever, nausea, vomiting.)

in India: dumobadotoko, gaggerakura, goggakoora, kali basuti, kali-basuti, kusurijang, pangli, panglo, pangra, pedda tulasi, phangla, phangli, rudilo, thekkali

in Thailand: niam nguang chaang, om

***Pogostemon purpurascens* Dalzell**

India, Himalaya.

See *Hooker's J. Bot. Kew Gard. Misc.* 2: 337. 1850

(Leaves paste applied locally on burns and wounds.)

in India: sal smalwking, shangbrei

***Pogostemon villosus* (Roxb.) Benth. (*Elsholtzia villosa* Roxb.; *Pogostemon villosus* var. *macrophyllus* Benth.)**

India. Villous herb, ovate acuminate leaves, white flowers in terminal or axillary panicles, flowering shoots used as vegetable

See *Fl. Ind.* ed. 1832, 3: 4. 1832, *Labiata. Gen. Spec.*: 153–154. 1833, *FBI* 4: 632. 1885

Poikilospermum Zipp. ex Miq. *Cecropiaceae* (*Urticaceae*)

(Leaves decoction given in stomach pain, and mixed with mustard oil rubbed in bodyache.)

in India: han-bila, hanbila, nampi-jauk-an

***Poikilospermum* Zipp. ex Miq.
Cecropiaceae (*Urticaceae*)**

Greek *poikilos* ‘spotted, many-coloured, varied, variegated’ and *sperma* ‘seed’, see *Bijdragen tot de flora van Nederlandsch Indië* 483–484. 1825, *Annales Museum Botanicum Lugduno-Batavi* 1: 203. 1864.

***Poikilospermum suaveolens* (Blume) Merr. (*Conocephalus sinensis* C.H. Wright; *Conocephalus suaveolens* Blume; *Poikilospermum sinense* (C.H. Wright) Merr.)**

Malaysia, China. Epiphyte

See *Bijdragen tot de flora van Nederlandsch Indië* 9: 483–484. 1825, *Journal of the Linnean Society, Botany* 26(178): 471. 1899 and *Contributions from the Arnold Arboretum of Harvard University* 8: 47, 51. 1934

(For itch, pound the roots and poultice. Steam from boiling leaves and flowers or fruits warming the affected part in gonorrhoea.)

in Borneo: entaban

in China: zhui tou ma

Malay names: murah, tentawan

Polemonium* L. *Polemoniaceae

Greek *polemonion*, ancient name of a plant, perhaps a species of *Hypericum*, Latin *polemonia*, *ae* for the Greek valerian, otherwise called *philetaeria* and *philetaeris* (Plinius), Greek *philetaerion*; see *Species Plantarum* 1: 162–163. 1753, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 713. 1852, *Nat. Pflanzenfam.* [Engler & Prantl] 4(3a): 52. 1891 and *Fl. Rocky Mts.* 680. 1917, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 730–731. UTET, Torino 1986, G. Semerano, *Le origini della cultura europea. Dizionario della lingua Greca*. 2(1): 237. 1994, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 496. 1996, *Novosti Sist. Vyssh. Rast.* 30: 141. 1996.

***Polemonium caeruleum* L. (*Polemonium coeruleum* L.)**

China, India, Himalaya.

See *Species Plantarum* 1: 162. 1753 and *Bot. Zhurn. SSSR* 68 (6): 827–835. 1983, *Bot. Žurn.* (Moscow & Leningrad) 76: 903. 1991

(Roots sedative, astringent, diaphoretic.)

in English: common polemonium, Greek valerian, Jacob's ladder

in China: hua ren

in Italian: polemonio

***Polemonium elegans* Greene**

North America. Perennial herb, leafy, stout stems, funnel-shaped violet flowers

See *Pittonia* 3(18D): 305. 1898

(A decoction as a wash for the head and hair.)

in English: elegant Jacob's-ladder, elegant polemonium

***Polemonium pulcherrimum* Hook. subsp. *lindleyi* (Wherry) V.E. Grant** (*Polemonium fasciculatum* Eastw.; *Polemonium humile* Willd. ex Roem. & Schult.; *Polemonium humile* Willd.; *Polemonium humile* Turcz. ex Ledeb.; *Polemonium humile* Salisb.; *Polemonium humile* Lindl.; *Polemonium lindleyi* Wherry; *Polemonium pulcherrimum* Hook. var. *lindleyi* (Wherry) J.P. Anderson)

North America. Perennial herb

See *Prodr. Stirp. Chap. Allerton* 125. 1796, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 4: 792. 1819, *Botanical Magazine* 57: t. 2979. 1830, *Fl. Ross.* (Ledeb.) 3(1,8): 84. 1847 and *Botanical Gazette* 37(6): 442. 1904, *American Midland Naturalist* 27(3): 748. 1942, *Iowa State College Journal of Science* 24(2): 225. 1950, *Taxon* 28: 265–268. 1979, *Botanical Gazette* 150(2): 163. 1989

(A decoction as a wash for the head and hair.)

in English: Jacob's-ladder

***Polemonium reptans* L.**

North America. Perennial herb, subshrub

See *Systema Naturae*, Editio Decima 2: 925. 1759

in English: Greek valerian, Jacob's ladder, spreading Jacob's-ladder

Polemonium reptans* L. var. *reptans

North America. Perennial herb, subshrub

See *Systema Naturae*, Editio Decima 2: 925. 1759

(Diuretic, cathartic. A decoction as a wash for the head and hair.)

in English: Greek valerian, Jacob's ladder, spreading Jacob's-ladder

Polianthes L. Asparagaceae (Agavaceae, Amaryllidaceae)

From the Greek *polios* 'white, whitish, grey' and *anthos* 'a flower', see *Species Plantarum* 1: 316. 1753, *Contr. U. S. Natl. Herb.* 5: 155. 1899 and *Nomencl. Fl. Ital.* 1: 134. 1950, *Fieldiana, Bot.* 24(3): 103–145. 1952, *Fl. Mesoamer.* 6: 44–45. 1994.

***Polianthes tuberosa* L.** (*Agave polianthes* (L.) Thiede & Egli; *Agave polianthes* Thiede & Egli; *Agave tuberosa* (L.) Thiede & Egli, nom. illeg.; *Agave tuberosa* Mill.; *Crinum angustifolium* Houtt.; *Polianthes gracilis* Link; *Polianthes tuberosa* f. *plena* Moldenke; *Polianthes tuberosa* var. *gracilis* (Link) Beurl.; *Polianthes tuberosa* var. *gracilis* (Link) Baker; *Polianthes tuberosa* var. *gracilis* Link & Otto ex Baker; *Tuberosa amica* Medik.)

Mexico. Sweetly scented flowers

See *Species Plantarum* 1: 316. 1753, *Gard. Dict.*, ed. 8. n. 4. 1768, *Nat. Hist.* 12: 165. 1780, *Hist. & Commentat. Acad. Elect. Sci. Theod.-Palat.* 6(Phys.): 430. 1790, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... Alt. 1: 330. 1821, *Kongl. Vetenskaps Academiens Handlingar* 40: 110. 1854[1856] and *Phytologia* 3: 41. 1948, Souder P. Poisonous plants on Guam. In: Keegan H.L., Macfarlane W.V. (Eds) *Venomous and Poisonous Animals and Noxious Plants of the Pacific Region*, pp. 15–29. New York. 1963, *Regnum Veg.* 127: 78. 1993, Davidse, G., Souse Sanchez, M. & Charter, A.O. (eds) *Flora Mesoamericana* 6: 1–543. Universidad Nacional Autónoma de México, México, D.F. 1994, *Kakteen And. Sukk.* 50(5): 112. 1999, *Kakteen And. Sukk.* 52: 166. 2001, Stevens, W.D. et al. (eds.) *Flora de Nicaragua* 1: 1–943. Missouri Botanical Garden Press, St. Louis. 2001, Jin, J.M., Zhang, Y.J., Yang, C.R. "Spirostanol and furostanol glycosides from the fresh tubers of *Polianthes tuberosa*." *J. Nat. Prod.* 67(1): 5–9. 2004, Nidiry, E.S., Babu, C.S. "Antifungal activity of tuberos absolute and some of its constituents." *Phytother. Res.* 19(5): 447–449. 2005

(Irritant. Antifungal, bulbs decoction used in gonorrhoea, pimples and skin diseases. Emollient plasters from the roots.)

in English: tuberosa

in Mexico: guia chilla, margaritas blancas, omixochitl (= flor doble o de hueso), quije chilla

in India: andi-mallery, gulcheri, gulsabo, gulshabba, nelasampenga, nilasampangi, rajanigandha, sandhyaraga, sukan-daraji, undi-mandare, virusampenga

in Japan: chuberosa, gekka-kô

Malayan names: sandarmalam, sundal malam

in Philippines: azucena

in Italian: tuberosa

Poliomintha A. Gray Lamiaceae (Labiatae)

Greek *polios* 'white, whitish, grey' and *minthe* 'mint', see *Synopsis Plantarum* 2(1): 131. 1807[1806], *Proceedings of the American Academy of Arts and Sciences* 8: 295. 1870.

***Poliomintha incana* (Torr.) A. Gray** (*Hedeoma incana* Torr.)

North America. Perennial subshrub or shrub

See *Rep. U.S. Mex. Boundary ... Botany* 2(1): 130. 1858, *Proc. Amer. Acad. Arts* 8: 296. 1870

(Leaves chewed by medicine woman.)

in English: frosted mint, hoary rosemarymint

Pollia Thunb. Commelinaceae

The genus was named for Jan van der (de) Poll, Dutch Consul; see Thunberg, Carl Peter (1743–1828), *Nova genera Plantarum*. 1: 11. Upsaliae [Uppsala]: Apud J. Edman [etc.], 1781–1801 [Some parts have title: *Genera nova plantarum*.] and *Bot. J. Linn. Soc.* 81: 301–325. 1980.

Pollia condensata C.B. Clarke (*Aclisia condensata* G. Brückn.; *Aclisia condensata* (C.B. Clarke) G. Brückn.)

Tropical Africa. Small herb, petals cream-yellowish

See *Monogr. Phan.* [A. DC. & C. DC.] 3: 125. 1881 and *Die natürlichen Pflanzenfamilien*, Zweite Auflage [Engler & Prantl] 15a: 176. 1930

(Fruits rubbed for back pain.)

in Congo: ikandila, ikangila, makandila, makangila

Pollia hasskarlii R.S. Rao (*Pollia aclisia* Hassk., nom. illeg.)

Himalaya.

See *Reliq. Haenk.* 1: 137–138, t. 25. 1827, *Commelin. Ind.* 55 (-56). 1870 and *Notes Roy. Bot. Gard. Edinburgh* 25(2): 188. 1964

(Stem water extract used as eye drop to cure sore eyes.)

in India: nipobapak

Pollia japonica Thunberg (*Pollia japonica* Hance)

Japan to Vietnam.

See *Nov. Gen. Pl.* 1: 12. 1781, *Fl. Jap.* 138. 1784, *J. Bot.* 16: 233. 1878 and *J. Jap. Bot.* 46(3): 67. 1971

(Root sedative, stimulant, carminative, used for the treatment of colds and vertigo.)

in China: du ruo, tu heng, tu jo, zhu ye lian

in Japan: yabu-myôga

Pollichia Aiton Caryophyllaceae (Illecebraceae)

No etymology is given, genus possibly named after the German physician Johann Adam Pollich, 1740–1780, botanist, author of *Historia plantarum in Palatinatu electorali sponte nascentium*. Mannhemii [Mannheim] 1776–1777 and *Dissertatio ... de nutrimento incremento statu ac decremento corporis humani*, etc. Argentorati [Strasbourg, 1763]; see *Hortus Kew.* (W. Aiton) 1: 5. 1789, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.*

London 1800 and John H. Barnhart, *Biographical Notes upon Botanists*. 3: 96. 1965, T.H. Arnold & B.C. de Wet, eds., *Plants of Southern Africa: Names and Distribution*. National Botanical Institute. Memoirs of the Botanical Survey of South Africa, no. 62. 305. Pretoria 1993, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993.

Pollichia campestris Aiton (*Bergia abyssinica* A. Rich.; *Pollichia campestris* [Soland.]

South Africa. Shrublet, twiggy, herb, slender, erect, small flowers in dense axillary clusters, petals and sepals white, waxy-white fruits

See *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 1: 5 and 3: 505. 1789

(Roots infusion or decoction emetic, astringent, for malaria, dysentery, diarrhea.)

in South Africa: kafferdruiwe

Polyalthia Blume Annonaceae

Greek *polys* ‘many’ and *althos* ‘a cure, something that heals, a healing’, *althaimo* ‘to heal’, referring to its use in native and popular medicine; see Karl Ludwig von Blume (1796–1862), *Flora Javae nec non insularum adjacentium. Anonaceae*. 68, 71. Bruxelles: Sumtibus Librariae J. Frank, Typis H. Remy, 1828 [i.e., 1828–1851], *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 145. 1855, *The Flora of British India* 1: 74. 1872, *Icones Bogorienses* 1: 196. 1899 and *Journal of the Straits Branch of the Royal Asiatic Society* 75: 8. 1917, *Bot. Zhurn.* (Moscow & Leningrad) 59(4): 551–552. 1974. The *Polyalthia* genus is considered to be of medicinal importance because of the presence of clerodane diterpenoids and alkaloids in various parts of the plant.

Polyalthia barnesii Merr.

Philippines.

See *Publications of the Bureau of Science Government Laboratories* 17: 16–17. 1904, *Phytochemistry* 37(6): 1659–1662. 1994

(Crushed leaves infusion used to soak burned skin. Cytotoxic diterpenes from the stem bark.)

in Indonesia: udu kalong aka

Polyalthia beccarii King (*Polyalthia cauliflora* Hook. f. & Thomson var. *beccarii* (King) James Sincl.)

Sumatra, Borneo. Small tree

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 61(1): 65–66. 1892 and *Garden's Bulletin, Straits Settlements* 14: 294. 1955

(Roots infusion drunk by husband and wife for birth control. Leaves pounded, the poultice applied for skin diseases. Magic, ceremonial, contact therapy, roots for birth control.)

Malaya name: mengala hutan

in Sarawak: balet

Polyalthia cauliflora Hook. f. & Thomson

Borneo.

See *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 138. 1855

(Poultice for skin diseases.)

Polyalthia cerasoides (Roxb.) Benth. & Hook. f. ex Bedd. (*Guatteria cerasoides* (Roxb.) Dunal; *Polyalthia cerasoides* (Roxb.) Bedd.; *Polyalthia cerasoides* (Roxb.) Hook.f. & Thomson; *Polyalthia crassipetala* Merr.; *Uvaria cerasoides* Roxb.)

China, India. Tree, warty brown bark, inner bark yellow, black lenticellate twig, used for rearing insects and producing lacs

See *Plants of the Coast of Coromandel* 1: 30, t. 33. 1795, *Monogr. Anonac.* 127. 1817, *The Flora Sylvatica for Southern India* pl. 1. 1869, *Fl. Brit. India* [J.D. Hooker] 1: 63. 1872 and *Philippine Journal of Science* 23(3): 243–244. 1923, *Taxon* 29: 165–166. 1980

(Bark decoction in diarrhea, diabetes; a paste applied on ulcer. Leaf paste applied on boils.)

in India: chilakadadduga, chilakaduddi, chilukadudduga, chilakadudug, chilakaduduga, chilkadaddu, chilkaduddam, chilkaduddi, chilkaduduga, chittaduduga, chittidudduga, chittiduduga, cilukaduddi, cilukaduddu, cilukadudduga, cittidudduga, doodooga, dudduga, duduga, dudugu, gova, guthi, gutti, habbe, hoom, nobunisoro, panjon, panyon, sanhesare, sannaheccara, sugran, sunnasaree, vabbina

Polyalthia crassa R.N. Parker

India.

See *Indian Forester* 1929, lv. 375. 1929, *J. Nat. Prod.* 69(12): 1728–1733. 2006

(Cytotoxic lactones from the leaves and twigs.)

Polyalthia debilis (Pierre) Finet et Gagnep. (*Polyalthia debilis* Finet & Gagnep.)

SE Asia.

See *Bull. Soc. Bot. France* 53(Mém.) 4(2): 96. 1906 [Dec 1906], *J. Nat. Prod.* 66(5): 616–619. 2003, *European Journal of Scientific Research* 38(4): 596–603. 2009, *Molecules* 14(11): 4414–4424. 2009, *Phytomedicine* 17(7): 513–518. 2010

(Roots antimalarial, antimicrobial, cytotoxic; the seeds anti-proliferative, apoptotic and antimutagenic.)

Polyalthia elongata Merr.

SE Asia.

See *Philipp. Journ. Sci.* iii. 222. 1908

(The plant when chewed produces itching.)

Polyalthia evecta (Pierre) Finet et Gagnep. (*Polyalthia evecta* Finet & Gagnep.)

SE Asia. Small shrub, solitary axillary yellow flowers, reddish fruits

See *Bull. Soc. Bot. France* liii. Mém. IV. 91 1906, *Phytochemistry* 47(1): 131–133. 1998, *J. Nat. Prod.* 69(1): 68–72. 2006

(Antiplasmodial activity. Root decoction relieves abdominal pain caused by muscular cramps, increases milk secretion.)

in Thailand: norn noi

Polyalthia fragrans Bedd. (*Guatteria fragrans* Dalzell; *Polyalthia fragrans* (Dalzell) Hook.f. & Thomson; *Polyalthia fragrans* Benth. & Hook.f. ex Hook.f.)

India. Tree, greenish-yellow flowers, ovoid tomentose fruitlets

See *Hooker's J. Bot. Kew Gard. Misc.* 3: 206. 1851, *The Flora of British India* [J.D. Hooker] 1: 63. 1872

(Used in Sidha.)

in India: cela, chela, chella, chilkaduduga, chilukadudduga, cilukadudduga, gauri, gowri, gowri mara, habbe, kakkanaral, kekenneral, kodanci, kodanji, kodanyi, miroy, nedunar, netunar, pularei, pullarci, pulluri, udambilai, udumballi

Polyalthia hypoleuca Hook.f. & Thomson (*Maasia hypoleuca* (Hook.f. & Thomson) Mols, Kessler & Rogstad)

India. Trees

See *The Flora of British India* [J.D. Hooker] 1: 63. 1872 and *Syst. Bot.* 33(3): 493. 2008

(For childbirth and postpartum remedy, roots decoction.)

Malay name: larak hutan

Polyalthia jenkinsii (Hook. f. & Thomson) Hook. f. & Thomson (*Guatteria jenkinsii* Hook. f. & Thomson; *Polyalthia jenkinsii* (Hook.f. & Thomson) Hook.f. & Thomson; *Polyalthia jenkinsii* Hook.f. & Thomson)

India.

See *Flora Indica*: being a systematic account of the plants. 1: 141. 1855, *The Flora of British India* [J.D. Hooker] 1: 64. 1872 and *Novosti Sist. Vyssh. Rast.* 11: 190. 1974

(Leaves pounded in coconut oil, warmed and applied in bodyache.)

in India: topilek

Polyalthia korinti Hook. f. & Thoms. (*Guatteria korinti* Dunal; *Polyalthia korinti* (Dunal) Hook.f. & Thomson;

Polyalthia korinti (Dunal) Thwaites; *Polyalthia korintii* Hook.f. & Thomson)

India, Sri Lanka. Shrub or small tree, slender, greenish flowers

See *Hort. Malab.* 5: 27, t. 14. 1685, *Monogr. Anonac.* 133 (-134). 1817, *Enum. Pl. Zeyl.* [Thwaites] 398. 1864, *Fl. Brit. India* [J.D. Hooker] 1: 64. 1872 and *Taxon* 29: 165–166. 1980

(Used in Sidha.)

in India: corinti-panel, elli dabba, katsjau-panel, nella gutti, tsjerou-panel, uluvintai

Polyalthia lateriflora (Blume) King (*Guatteria lateriflora* Blume; *Polyalthia lateriflora* Kurz; *Polyalthia lateriflora* King)

SE Asia. Trees, large leaves

See *Bijdr. Fl. Ned. Ind.* 1: 20. 1825, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 43(2): 52. 1874, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 61(1): 58. 1892 and *Plant Systematics and Evolution* 144: 165–177. 1984, Wiart, C. et al. “Antimicrobial screening of plants used for traditional medicine in the state of Perak, Peninsular Malaysia.” *Fitoterapia*. 75(1): 68–73. 2004

(Antibacterial and antifungal activities.)

Polyalthia longifolia (Sonn.) Thwaites (*Guatteria longifolia* (Sonn.) Wall.; *Polyalthia longifolia* Benth. & Hook. f.; *Polyalthia longifolia* (Sonn.) Hook.f. & Thomson; *Unona longifolia* Steud.; *Unona longifolia* Dunal; *Unona longifolia* (Sonn.) Dunal; *Uvaria altissima* Pennant, nom. illeg.; *Uvaria longifolia* Sonn.)

SE Asia.

See *Supplementum Plantarum* 44, 270. 1782, *Voy. Indes*, iii. 260. 1782, *Flora Peruviana, et Chilensis Prodrum* 85. 1794, *Monographie de la famille des Anonacées* 109. 1817, *A Numerical List of Dried Specimens* [Wallich] 6442. 1832, *Nomencl. Bot.* [Steudel], ed. 2. 2: 730, sphalm. 1841, *Enumeratio Plantarum Zeylanicae* [Thwaites] 398. 1864, *Fl. Brit. India* [J.D. Hooker] 1: 62. 1872 and *J. Arnold Arbor.* 29: 186–192, plate 1. 1948, *Plant Systematics and Evolution* 144: 165–177. 1984, *Cytologia* 55: 187–196. 1990, *Planta Med.* 57(4): 380–383. 1991, *Biochemical Systematics and Ecology* 23(3): 331–332. 1995, *J. Nat. Prod.* 63(11): 1475–1478. 2000, *Med. Chem.* 1(4): 327–333. 2005, *Phytother. Res.* 19(10): 881–884. 2005, *Fitoterapia* 76(3–4): 336–339. 2005, *Planta Med.* 72(14): 1344–1347. 2006, *Indian Journal of Pharmacology* 40(3): 126–128. 2008, *British Journal of Pharmacology* 159(5):1143–1150. 2010, *Pharmacognosy Review* 4: 62–68. 2010, *Pharmaceutical Biology* 48(6): 690–696. 2010

(Used in Ayurveda and Sidha. Leaves decoction given in diarrhea. Bark and leaves antimicrobial, antileishmanial, anthelmintic, antiinflammatory, purgative, cytotoxic, anti-ulcer, antidiabetic, hypoglycemic, hypotensive. Bark anti-inflammatory, bitter, acrid, cooling, antipyretic, febrifuge,

anthelmintic, hypotensive, antioxidant, antimicrobial, anti-tumor and cytotoxic, useful in fever, skin diseases, diabetes, hypertension, helminthiasis; dried ground stem bark taken to treat gonorrhoea. Seeds antibacterial and antifungal. Sacred plant, ceremonial, ritual, decoration and *pooja*, leaves auspicious garland hung around gate.)

in English: Indian willow, mast tree

in India: acokam, acoku, acuvattai, arana, aranamaram, aranei, aruna, arunna, asapala, ashok, ashoka, ashokam, ashokamu, ashvattam, asodham, asogam, asogu, asok, asoka, asoka pattai, asokam, asokamu, asokan, asoke, asopalav, asopalava, assotham, assothi, assoti, asvattamu, asvattham, asvatthamu, atimalakamaram, cacupam, celai, cececi, cececi-maram, celokatam, celokatamaram, centu, centukam, centukamaram, choranoi, chorani, choruna, chorunna, cilai, corani, daevadaaru, debdari, debdaru, dedbari, deodar, devadar, devadaru, devdaru, devidari, ghangu, hebbe, hemapushpam, kacang, kacupam, kakaccam, kalgoli, kalkoli, kambada mara, kanthri kadama, kastadaruh, kasthadaru, kasubam, kelikam, kiri, kirimaram, kolerengi, kolikkudi, kolikkuti, kommati, kommatimaram, kumbada mara, naadu ashoka, nakacam, nara mamidi, naramaamidi, nattivetam, nedunar, neettilingam, netlingi, nettilingam, nettilingu, nettilinkam, nettilinki, nettlingum, nettulingam, nettulinkam, nittilinkam, pandil, paymaravirutcam, pundi, pungu, putharajeevi, putrajiva, putrajivi, puttrajivi, ravadam, saribam, selai, sendu, suvattai, tevaru, ubbina mara, ulkatah, unboi, vanamutti, vanamuttimaram, vanculam, vanjolam, vanmutti, vanmuttimaram, yukampatikam, yukampatikamaram, yukmapattirikai

Polyalthia lopadhantha Diels (Greek *lopas*, *lopados* ‘plate, dish’ and *anthos* ‘flower’.)

Borneo. Small tree

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 81. 1931

(Crushed leaves juice squeezed into eyes.)

in Sarawak: semukau

Polyalthia macropoda King (*Polyalthia macropoda* (Miq.) F. Muell.; *Polyalthia sinclairiana* I.M. Turner)

Singapore.

See Mueller, Ferdinand Jacob Heinrich von (1825–1896), *Descriptive Notes on Papuan Plants* 1: 95. Melbourne: G. Skinner, Acting Govt. Printer, 1875–[1890], *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 61(1): 60. 1893 and *Gard. Bull. Singapore* 58(2): 275. 2007

(Leishmanicidal, the stem bark.)

Polyalthia nemoralis Aug. DC. (*Polyalthia oligogyna* Merr. & Chun)

China.

See *Bulletin de l’Herbier Boissier*, sér. 2, 4: 1069. 1904, *Sunyatsenia* 2(1): 27–28. 1934, *China Journal of Chinese*

Materia Medica [Zhongguo Zhong yao za zhi = Zhongguo zhongyao zazhi] 35(1): 53–57. 2010

(Cytotoxic activities, from the branches and leaves.)

Polyalthia rufescens Hook.f. & Thomson

India.

See *Fl. Brit. India* [J.D. Hooker] 1: 66. 1872

(Leaf paste consumed with water for cough.)

in India: kaattuperuvengaipatchilai

Polyalthia sclerophylla Hook. f. & Thomson

Tropical Asia.

See *The Flora of British India* [J.D. Hooker] 1: 65. 1872 and *Planta medica* 76(7): 721–725. 2010

(Anti-HIV-1 diterpenoids from leaves and twigs.)

Polyalthia simiarum (Buch.-Ham. ex Hook.f. & Thomson) Benth. (*Guatteria simiarum* Buch.-Ham. ex Hook.f. & Thomson; *Polyalthia simiarum* Benth. ex Hook.f.; *Polyalthia simiarum* (Buch.-Ham. ex Hook.f. & Thomson) Hook.f. & Thomson; *Polyalthia simiarum* (Hook.f. & Thomson) Hook.f. & Thomson; *Unona simiarum* Baill. ex Pierre)

SE Asia, Himalayas. Tree, smooth fibrous bark, yellowish wood, coriaceous leaves, yellowish green flowers in fascicles, fleshy carpels orange-red to blackish

See *Flora Indica* ... [Hooker f. & Thomson] 1: 142. 1855, *Genera Plantarum* 1(1): 25. 1862, *The Flora of British India* [J.D. Hooker] 1(1): 63. 1872, *Flore Forestière de la Cochinchine* 1: t. 23. 1880 and *Taxon* 24: 501–516. 1975

(Stembark paste applied on scorpion stings.)

in India: boga-khamtou, bogakhamton, bolang banchi bak, borschi, borsthi, dieng jaroi, heirawt, jiri, langaya, manchuri-araung, mongai, phang-put-araung, zathu

Polyalthia suaveolens Engl. & Diels (*Greenwayodendron suaveolens* (Engl. & Diels) Verdc.; *Maba gossweileri* Greves; *Polyalthia acuminata* Oliv.; *Polyalthia aubrevillei* Ghesquiere ex Aubrev.; *Polyalthia mortehani* De Wild.; *Polyalthia oliveri* Engl.; *Xylopiya otunga* Exell) (*Greenwayodendron* Verdc., for the South African (b. Transvaal) botanist Percy (Peter) James Greenway, 1897–1980, from 1927 to 1950 East African Agricultural Research Station (Amani), in 1928 a Fellow of the Linnean Society, 1950–1958 botanist of the East African Herbarium in Nairobi, systematic botanist, plant collector with Colin Graham Trapnell and John P. Micklethwait Brenan (1917–1985) in Northern and Southern Rhodesia and Nyasaland, 1970–1971 President of the Kew Guild, author of *A Swahili-Botanical-English Dictionary of Plant Names*. Dar es Salaam 1940 and “The Pawpaw or Papaya.” *E.A. Agri. Journ.* 13: 228–233. Nairobi 1948, co-author (with Ivan Robert Dale, 1904–1963) of *Kenya Trees & Shrubs*. Nairobi 1961, editor of Jessie Williamson’s *Useful Plants of Nyasaland*. Zomba, Nyasaland 1955 and of the *East*

African Agricultural Journal; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 295. 1994.)

Tropical Africa.

See *Systema Naturae*, Editio Decima 2: 1241, 1250, 1378. 1759, *Characteres Generum Plantarum* [second edition] 121. 1775, *Die Natürlichen Pflanzenfamilien* III. Teil 2. Nachtr. 1: 160. 1897 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 42, t. 16/C. 1901, *Adansonia: recueil périodique d’observations botanique*, n.s. 9: 89–90. 1969, *Acta Leidensia* 59(1–2): 377–82. 1990, *J. Ethnopharmacol.* 102(2): 185–190. 2005, *Nat. Prod. Res.* 20(4): 391–397. 2006, *Bioorg. Med. Chem. Lett.* 20(12): 3495–3498. 2010

(Stem bark antitrypanosomal, anthelmintic, analgesic, antiparkinsonian, antihypertensive, antifilarial, cytotoxic, antileishmanial and antifungal, for stomachache, malaria, blackwater fever.)

in Central Africa: agudugbu, azinda, bolinda, bombaie bo ilo, botunga, dep, dolindu, hoda, imbaie, lole mufike, mam-pimpini, moamba, moamba dombe, modiengue, mokosa, mudinda, ntshindi, ndo, odda, otunga, otungui, tanda, tshinga

in Cameroon: botunga, otungo, otungui

in Congo: dep

in Gabon: otunga

in Nigeria: agudugbu, amuje, amoje (Yoruba); atorewa, osharo (Sobo); ewai (Edo); osharo (Urhobo); eleku, okenren, okeren, eleku-okeren (Itsekiri); nchua (Boki); ewai, otutu (Benin); agudugbu (Ikale)

Polyalthia suberosa (Roxb.) Thwaites (*Guatteria suberosa* (Roxb.) Dunal; *Phaeanthus cumingii* Miq.; *Polyalthia suberosa* (Roxb.) Hook.f. & Thomson; *Uvaria suberosa* Roxb.)

India, Sri Lanka. Twiggy bush or small tree, small solitary pale yellow flowers, sepals and petals slightly hairy, cluster of purplish fleshy fruits more or less edible

See *Plants of the Coast of Coromandel* 1: 31, t. 34. 1795, *Monog. Anonac.* 128. 1817, *Fl. Ind.* [Hooker f. & Thomson] 1: 146. 1855, *Flora van Nederlandsch Indië* 1(2): 51. 1858, *Enumeratio Plantarum Zeylaniae* [Thwaites] 398. 1864, *Fl. Brit. India* [J.D. Hooker] 1: 65. 1872 and *Phytochemistry* 53(8): 1079–1082. 2000, *Planta Med.* 67(6): 572–575. 2001

(Antiviral, anti-HIV, from the stems. Cytotoxic, from an extract of leaves and twigs. Decoction of fresh roots used as abortifacient.)

in India: buddadadduga, buddadudduga, cham-khirni, chilaka duduga, chilakadudug, chilkadoodooga, chilkaduduru, chilkadudu, chilkaduduga, cilukadudduga, etidudduga, kuradia

in Philippines: baling-manok, duhat-duhatan, duhat-matsing, duyat-nasi, lanutan, munat, tagputagpuan

Polyalthia viridis Craib

SE Asia. Tree, cylindrical bole, thin yellow-green bark, stiff leaves with nerves very prominent, green flowers borne in clusters of two or three, each carpel is stalked

See *Bulletin of Miscellaneous Information Kew* 1914(1): 4. 1914, Ichino, C. et al. "Screening of Thai medicinal plant extracts and their active constituents for in vitro antimalarial activity." *Phytother. Res.* 20(4): 307–309. 2006

(Antimalarial activity.)

in Thailand: yang-don

Polycarpaea Lam. Caryophyllaceae (Polycarpaeaceae)

Greek *polys* 'many' and *karpos* 'fruit', *polykarpos* 'fruitful, rich in fruit'; see *Flora Cochinchinensis* 97, 164. 1790, Jean Baptiste Antoine Pierre de Monnet de Lamarck (1744–1829), in *Journal d'Histoire Naturelle*. 2: 3, 5, t. 25. Paris (Jul.) 1792, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 13(1) (1826) 276. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 373. 1828, *Conspectus Regni Vegetabilis Secundum Characteres Morphologicas ...* 49. 1835, Mueller, Ferdinand Jacob Heinrich von (1825–1896), *Report on the plants collected during Mr. Babbage's expedition into the north-western interior of South Australia in 1858*. Melbourne, 1858.

Polycarpaea aurea Wight & Arn.

India.

See *Ann. Nat. Hist.* 3(15): 91. 1839

(To restore speaking power in dumb people, this plant along with *Cassia fistula* flowers and leaves smoked as cigarettes.)

in India: pakhuno khuro

Polycarpaea corymbosa (Linnaeus) Lamarck (*Achyranthes corymbosa* Linnaeus; *Cerastium soratense* Rohrb.; *Polycarpaea atherophora* Steud.; *Polycarpaea corymbosa* Oliv., nom. illeg.; *Polycarpaea nebulosa* Lakela)

Senegal, Nigeria. Low herb with silvery foliage, eaten by stock

See *Species Plantarum* 1: 205. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 2: 129. 1794, *Flora* 26(45): 763. 1843, *Flora of Tropical Africa* 1: 145. 1868, *Linnaea* 37: 291. 1871 and *Rhodora* 65: 35, f. 1–2, pl. 1280–1283. 1963

(Used in Ayurveda and Sidha. Plant decoction an antidote in snakebite. Root and leaf paste administered for cobra bite. Pounded leaves as poultice over boils and inflammatory swellings, antidote for venomous snakebites. Roots for boils, liver complaints.)

in China: bai gu ding

in India: bhisatta, bommasari, bugyale, cataicciver, dholi-phuli, katu-mailosina, koyap, maitosin, malligai mottu

chedi, nilachadachchi, nilaisedachi, okharadi, paade mullu gida, pallippuntu, parpata, poude mullu, poude mullu gida, rajuma, tadagamritikodbhava, zutniokhad

Polycarpaea corymbosa (Linnaeus) Lamarck var. ***corymbosa***

Senegal, Nigeria. Low herb with silvery foliage, eaten by stock

See *Species Plantarum* 1: 205. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 2: 129. 1794, *Flora* 26(45): 763. 1843, *Flora of Tropical Africa* 1: 145. 1868, *Linnaea* 37: 291. 1871 and *Rhodora* 65: 35, f. 1–2, pl. 1280–1283. 1963

(Plant infusion drunk for fatigue.)

Polycarpaea corymbosa (Linnaeus) Lamarck var. ***effusa*** Oliv.

Ghana, Tropical Africa. Many-branched, spreading, silvery sepals, eaten by stock

See *Flora of Tropical Africa* 1: 145. 1868

(Plant infusion drunk for fatigue.)

Polycarpaea linearifolia DC. (*Paronychia linearifolia* DC.; *Polycarpaea linearifolia* (DC.) DC.)

Tropical Africa. Erect herb, weed, flowers in white many-flowered globose heads solitary at the ends of the branches, silvery sepals, relished by sheep and goats

See *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 3. 1754, *Encyclopédie Méthodique, Botanique* 5: 26. 1804, *Prodr.* (DC.) 3: 374. 1828

(Leaves tonic. Poultice applied as a remedy for ringworm. Plant decoction to cure cough; plant infusion drunk for fatigue. Rituals, the leaves.)

Polycarpon Loeffl. ex L. Caryophyllaceae

Greek *polys* and *karpos* 'fruit', Latin *polycarpos* for a plant, also called *polygonous*; see C. Linnaeus, *Systema Naturae*. Editio Decima 2: 859, 881, 1360. 1759.

Polycarpon prostratum (Forssk.) Asch. & Schweinf. ex Asch. (*Alsine prostrata* Forssk.; *Alsine prostrata* A. Heller; *Loeflingia indica* Retz.; *Pharnaceum depressum* L., nom. illegit.; *Polycarpaea prostrata* Decne.; *Polycarpon depressum* Rohrb.; *Polycarpon glaucifolium* A. Chev.; *Polycarpon indicum* (Retz.) Merr.; *Polycarpon loeflingii* Wight & Arn. ex Benth., nom. illegit.; *Polycarpon prostratum* Pax; *Polycarpon prostratum* (Forssk.) Asch. & Schweinf.; *Robbairia prostrata* Boiss.)

China, Pakistan. Prostrate herb, flowers in paniculate bracteate cymes

See *Species Plantarum* 1: 35, 272. 1753, *Mantissa Plantarum* 2: 562. 1771, *Flora Aegyptiaco-Arabica* 207. 1775, *Observationes Botanicae* 4: 8. 1786, *Ann. Sci. Nat., Bot. sér.*

2, 3: 263. 1835, *Genera Plantarum* 1: 153. 1862, *Fl. Orient.* [Boissier] 1: 735. 1867, *Flora Brasiliensis* 14(2): 257, pl. 59. 1872, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 1b (1889) 87. 1889, *Oesterreichische Botanische Zeitschrift* 39: 128. 1889 and *Philippine Journal of Science* 10(5): 302–303. 1915, *Flore Vivante de l'Afrique Occidentale Française* 1: 306. 1938

(An infusion of roasted leaves given for coughs, fever in measles.)

in China: duo jia cao

in India: ghima, gima, sureta

Polyceratocarpus Engl. & Diels Annonaceae

Greek *polys* 'many', *keras* 'a horn' and *karpos* 'a fruit', 'many-horned fruit', see *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 3: 53, 56. 1900.

Polyceratocarpus scheffleri Engl. & Diels

Tanzania. Tree, dioecious, young leaves red, flowers borne on juvenile branches, flower stalks thick and curved, 3 sepals joined to form a circular calyx wrinkled and rusty hairy outside, strongly curved cylindrical almost stalkless carpels twisted together, forest, rainforest

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3: 56. 1900

(Tonic.)

in Tanzania: mkenene, muenene

Polygala L. Polygalaceae

Greek *polygalon*, ancient name used by Dioscorides, *polys* 'much' and *gala* 'milk', Latin *polygala*, *ae* for the herb milkwort (Plinius); see Carl Linnaeus (Carl von Linnaeus, Carl von Linné), *Species Plantarum*. 2: 701–706. 1753 and *Genera Plantarum*. Ed. 5. 315. 1754, *Flore portugaise* ou description de toutes les ... 1: 62. 1809 and *Fieldiana, Bot.* 24(6): 5–22. 1949, *Acta Botanica Yunnanica* 2(1): 78. 1980, Dennis E. Breedlove and Robert M. Laughlin, *The Flowering of Man. A Tzoltzil Botany of Zinacantan*. Smithsonian Contributions to Anthropology. number 35. Washington 1993, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2154–2167. 2001, *Flora of Tropical East Africa. Polygalaceae*. Kew 2007, *Nordic Journal of Botany* 25: 288. 2007.

Polygala alba Nutt. (*Polygala alba* Nutt. var. *suspecta* S. Watson)

North America. Perennial herb

See *The Genera of North American Plants* 2: 87. 1818, *Proceedings of the American Academy of Arts and Sciences* 21: 416. 1886 and *Taxon* 32: 504. 1983

(Root decoction for earache.)

in English: white milkwort

Polygala arenaria Oliv. (*Polygala arenaria* Willd.)

Malawi. Herb, many-branched, aromatic, erect, prostrate, flowers in dense heads-like racemes, bracts pale green, perianth pink

See *Species Plantarum* 3: 880. 1802, *Flora of Tropical Africa* 1: 128. 1868

(Plant decoction for gonorrhoea; a decoction together with palm wine drunk by women to correct barrenness. Leaves for skin disease, influenza, wound dressing, the juice for sores; crushed leaves poultice applied to smallpox. Taken with lime juice or melon as purgative.)

in Ghana: koklokpo, nyankoma ntiri

Polygala arillata Buch.-Ham. ex D. Don (*Polygala arillata* var. *ovata* Gagnep.; *Polygala wistariifolia* Chodat)

Nepal, India. Shrub, yellow flowers

See *Prodromus Florae Nepalensis* 199. 1825 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52(1–2, Beibl. 115): 70–71. 1914, *Flore Générale de l'Indo-Chine* Suppl. 1: 231. 1939

(Root paste taken for dysentery, chronic dysentery; root bark and stem bark paste febrifuge, antiinflammatory.)

in China: he bao shan gui hua

in India: dieng jakba, dieng sohtynka, marcha gachh, nepali-kanti

Polygala arvensis Willd. (*Polygala arvensis* Roxb.; *Polygala arvensis* Wall.; *Polygala chinensis* auct.)

India. Herb, erect or diffuse, glabrous or pubescent, yellowish flowers subsolitary or in short racemes, orbicular-oblong capsules

See *Species Plantarum*. Editio quarta [Willdenow] 3(2): 876. 1802, *Hort. Bengal.* 53. 1814, *Numer. List* [Wallich] n. 4172. 1831, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 31(2): 386. 1893

(Used in Sidha. Whole plant made into a paste and applied on boils. Leaf juice applied on swollen joints, for rheumatism; leaf poultice for inflammation. Root paste antiinflammation, for fever, dizziness.)

in India: cankankolakacceti, cankankolakam, citaninankai, katu-vistna-clandi, kirikanankai, kirikanankaiceti, kodatsjeri, maccarekacceti, maccarekam, makanankai, makanankaiceti, marcha, meradu, milakaynankai, milakunankai, mirdoi, nanavitacceti, nilkanta, orupanankaiceti, piriyanankai, piriyanankaiceti, sanjivani, vacampuvaca, varappikacceti, varappikam, vecinankai, vecinankaiceti, vepillainankai

Polygala butyracea Heckel

Ghana. Stout, weedy, softly pubescent, long branches, pinkish yellowish flowers in dense racemes, glabrous seeds

See *Bull. Geogr.* 13: 222. 1889

(Tonic.)

Polygala capillaris E. Mey. subsp. ***perrottetiana*** (Paiva) Paiva (*Polygala micrantha* Perr. & Guill.; *Polygala perrottetiana* Paiva)

Senegal, Cameroon. Herb, erect, white or mauve flowers in racemes, marshy meadows

See *Florae Senegambiae Tentamen* 1: 39. 1831 and *Willdenowia* 12: 52. 1822, Paiva, Jorge Americo Rodrigues (1933–), *Polygalarum Africanarum et Madagascariensium prodromus atque gerontogaei generis Heterosamara Kuntze, a genere Polygala L. segregati et a nobis denuo recepti, synopsis monographica* Madrid: Camino de los Vinateros, 1998. [*Fontqueria* 50: 161. 1998]

(Used as a purge, good for the liver.)

Polygala chinensis L.

India.

See *Species Plantarum* 2: 701–706. 1753

(Leaf decoction antiinflammatory. Plant paste given in cold and cough of children; root powder given to cure asthma.)

in English: Chinese milkwort, Indian senega, leafy milkwort

in China: da jin niu cao, hua nan yuan zhi

in India: belesoppu, bili cheeni kanigalu, ciriya nankai, ciriya nantai, ciriyanankai, ghuntaani, meradu, negli, nelajanumu, nilkathi, phutni, rali

in Japan: Shinchiku-hime-hagi

Polygala chinensis L. var. ***chinensis*** (*Polygala densiflora* Blume; *Polygala glomerata* Lour.; *Polygala telephioides* Willd.; *Polygala telephioides* Boiss. & Balansa) (Greek *telepheion* ‘health’, *telephion* used by Dioscorides for a species of *Andrachna*, Latin *telephion*, *ii* ‘a kind of herb resembling purslane’, Plinius)

India, China. Perennial herb, purplish stems

See *Flora Cochinchinensis* 2: 426. 1790, *Species Plantarum*. Editio quarta [Willdenow] 3(2): 876. 1802, *Bijdragen tot de flora van Nederlandsch Indië* 59. 1825, *Diagn. Pl. Orient.* ser. 2, 5: 49. 1856

(Leaf paste mixed with hot water taken as antivenom for cobra bite. Leaves infusion in asthma and chronic bronchitis, a remedy against diarrhea.)

in China: hua nan yuan zhi

in India: periya nankai

in Indonesia: lidah ajam

Polygala cornuta Kellogg

North America. Perennial subshrub or shrub

See *Proceedings of the California Academy of Sciences* 1: 62. 1855

(Analgesic.)

in English: Sierra milkwort

Polygala cornuta Kellogg var. ***cornuta***

North America. Perennial subshrub or shrub

See *Proceedings of the California Academy of Sciences* 1: 62. 1855

(Cough sedative, emetic.)

in English: Sierra milkwort, Sierran milkwort

Polygala crotalarioides Buch.-Ham. ex DC.

China. Herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 327. 1824

(Whole plant and root expectorant, for catarrh, snakebite. Root paste given for vomiting out the poison.)

in China: xi nan yuan zhi

in India: lil kathi, neel kantha, nil-kanti

Polygala elongata Klein ex Willd.

India.

See *Sp. Pl.*, ed. 4 [Willdenow] 3(2): 879. 1802

(Plant used in constipation. Root paste rubbed on body against fever and shivering. Veterinary medicine, plant juice applied externally on cows to get rid of lice.)

in India: kukkani, peria-nankai, periya nangai, periya nankai, uttaretal

Polygala erioptera DC.

East Africa.

See *Prodr.* (DC.) 1: 326. 1824 [mid Jan 1824]

(Paste of stem and leaves applied on wounds. Powdered bark for wounds, ulcers, leprosy. Plant juice given in jaundice, constipation and liver disorders.)

in Kenya: lonomokerio

in India: bhonya-san, rati bhonyasan

Polygala fruticosa Berg. (*Polygala latifolia* Ker Gawl.; *Polygala oppositifolia* L.; *Polygala oppositifolia* var. *latifolia* (Ker Gawl.) Harv.)

South Africa. Shrub, white flowers

See *Species Plantarum* 2: 701–706. 1753, *Flora Capensis* 1: 82. 1860

(Roots used for scrofula.)

in South Africa: iThethe (Zulu)

Polygala hongkongensis Hemsl. var. ***hongkongensis*** (*Polygala loureiroi* Gardner & Champ.; *Polygala monopetala* Cambess.; *Polygala sibirica* L.; *Polygala sibirica* var. *monopetala* (Camb.) Chodat; *Polygala sibirica* var. *sibirica*; *Polygala trichorachis* Migo)

China, Hong Kong.

See *Species Plantarum* 2: 701–706. 1753, *Hooker's Journal of Botany and Kew Garden Miscellany* 1: 242. 1849, *Journal of the Linnean Society, Botany* 23(152): 60–61, t. 2, f. 1–6. 1886 and *Acta Phytotaxonomica et Geobotanica* 13: 85–86. 1943, *Botaničeskij Žurnal (Moscow & Leningrad)* 77(2): 113–114. 1992

(Antidiabetic, astringent, demulcent.)

Polygala irregularis Boiss.

India.

See *Diagn. Pl. Orient.* ser. 1, 1: 8. 1843

(For stomachache and gastric troubles.)

in India: bhana-major, boyasan

Polygala kalaxariensis Schinz (*Polygala kubangensis* Gürke; *Polygala reflexa* Schinz)

South Africa.

See *Species Plantarum* 2: 701–706. 1753

(For skin diseases.)

Polygala longifolia Poir. (*Polygala discolor* Buch.-Ham. ex D. Don

Polygala leptalea DC.; *Polygala longifolia* A. Dietr.; *Polygala longifolia* Gilib. ex Steud.; *Polygala longifolia* C. Presl; *Polygala oligophylla* DC.; *Polygala pyramidalis* H. Lév.)

China.

See *Encyclopédie Méthodique, Botanique* (Lamarck) 5: 501. 1804, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 325, 353, 358. 1824, *Prodromus Florae Nepalensis* 199. 1825, *Allg. Gartenzeitung* (Otto & Dietrich) 2: 117. 1834, *Abh. Königl. Böhm. Ges. Wiss.* ser. 5, 3: 445. 1845 and *Flore du Kouy-Tchéou* 317. 1914–1915

(Bitter root bark a wash to stimulate hair.)

in China: chang ye yuan zhi

Polygala lutea L. (*Pilostaxis lutea* (L.) Small; *Pilostaxis lutea* Small)

North America. Biennial herb

See *Species Plantarum* 2: 705. 1753 and *Manual of the Southeastern Flora* [Small] 774. 1933

(Antirheumatic, dried blossom made into a paste applied to swellings.)

in English: candy-weed, candyweed, orange milkwort, yellow bachelor's-button, yellow milkwort

Polygala paniculata L. (*Polygala paniculata* J. Le Conte ex Torr. & A. Gray, nom. illeg.; *Polygala paniculata* var. *leocoptera* S.F. Blake)

Jamaica. Herb

See *Systema Naturae*, Editio Decima 2: 1154. 1759, *A Flora of North America: containing ...* 1(1): 129. 1838 and *Contributions from the Gray Herbarium of Harvard University* 47: 101. 1916, *Fl. Jamaica* 4: 242. 1920

(Whole plant crushed, heated, placed on a boil as a salve.)

in China: yuan zhui hua yuan zhi

Polygala paucifolia Willd. (*Triclisperma paucifolia* (Willd.) Nieuwl.)

North America. Perennial herb

See *Species Plantarum*. Editio quarta 3(2): 880. 1802 and *American Midland Naturalist* 3(7): 181. 1914, *Taxon* 31(2): 344–360. 1982, *Taxon* 32: 320. 1983

(Plant decoction as a wash for boils and syphilitic sores.)

in English: bird-on-the-wing, flowering wintergreen, fringed polygala, gay-wings, gaywings

Polygala polygama Walter (*Anthaloea polygama* (Walter) Nieuwl.; *Polygala aboriginum* Small; *Polygala polygama* Walter var. *obtusata* Chod.; *Polygala polygama* Walter var. *ramulosa* Farw.)

North America. Biennial herb

See *Flora Caroliniana*, secundum ... 179. 1788, *New Flora and Botany of North America ...* 4: 88. 1836[1838]

(Plant decoction as a cough sedative.)

in English: racemed milkwort

Polygala rosmarinifolia Wight & Arn. (*Polygala rosmarinifolia* Eckl. & Zeyh.)

India. Annual herb, small yellow flowers

See *Prodr. Fl. Ind. Orient.* 1: 37. 1834, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 20. [Dec 1834–Mar 1835]

(Astringent, diaphoretic, emollient.)

Polygala rugelii Shuttlew. ex A. Gray (*Pilostaxis rugelii* (Shuttlew. ex A. Gray) Small; *Pilostaxis rugelii* (Shuttlew. ex Chapm) Small)

North America. Annual herb

See *Smithsonian Contributions to Knowledge* 3(5): 41. 1852 and *Manual of the Southeastern Flora* [Small] 774. 1933

(Antirheumatic, blood purifier; plant infusion taken for snakebite.)

in English: yellow milkwort

Polygala ruwenzoriensis Chodat

East Africa.

See *Species Plantarum* 2: 701–706. 1753, *Journal of Botany, British and Foreign* 199. 1896

(For skin diseases.)

Polygala senega L. (*Polygala senega* L. var. *latifolia* Torr. & A. Gray)

South America. Perennial herb

See *Species Plantarum* 2: 701–706. 1753 and *Taxon* 31(2): 344–360. 1982

(Used in Sidha. Purgative, hemostat, stimulant, blood purifier, tonic, anticonvulsive. Ceremonial.)

in English: milkwort, rattlesnake root, seneca snakeroot, senega root, senega snakeroot

in India: cenakanankai

in Brazil: poligala, poligala-da-virgínia, senega, senega colubrina

Polygala sphenoptera Fresen. (*Polygala aethiopica* Chodat; *Polygala ehlersii* auct., sensu De wild., non Gürke, misapplied name; *Polygala ellenbeckii* Gürke ex Chodat; *Polygala filifera* Chodat; *Polygala fischeri* auct., non Gürke, misapplied name; *Polygala gagnebiniana* Chodat; *Polygala persicariaefolia* sensu Eyles non DC.; *Polygala persicariifolia* auct., sensu Eyles; *Polygala quartiniana* Quart.-Dill. ex A. Rich.; *Polygala quartiniana* A. Rich.; *Polygala tristis* Chodat; *Polygala ukambica* Chodat)

East Africa.

See *Species Plantarum* 2: 701–706. 1753, *Museum Senckenbergianum* ii: 274. 1837

(Bark for chronic bronchitis, malaria, fever and leprosy.)

in India: sherita

Polygala stenopetala Klotzsch (*Polygala viminalis* Gürke)

Tropical Africa. Slender, flowers bright blue

See *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 114. 1861, *Die Pflanzenwelt Ost-Afrikas* C. 234. 1895

(Leaves purgative, for sore throat and syphilis.)

Polygala verticillata L.

North America. Annual herb

See *Species Plantarum* 2: 706. 1753 and *Taxon* 31(2): 344–360. 1982

(Plant infusion given to babies.)

in English: whorled milkwort

Polygala verticillata L. var. *verticillata* (*Polygala pretzii* Pennell)

North America. Annual herb

See *Species Plantarum* 2: 706. 1753 and *Bartonia* 13: 8, 12, pl. 3, fig. 1. 1931, *Taxon* 31(2): 344–360. 1982

(Plant infusion given to babies.)

in English: whorled milkwort

Polygala vulgaris L. (*Polygala vulgaris* Desf.; *Polygala vulgaris* Thunb.; *Polygala vulgaris* Asso)

Europe, Chile.

See *Species Plantarum* 2: 702. 1753, *Fl. Jap.* (Thunberg) 277. 1784, *Fl. Atlant.* 2: 127. 1798 and *Acta Biol. Cracov., Ser. Bot.* 22: 129–153. 1980, *Mitt. Bot. Staatssamml. München* 20: 348. 1984

(Warm plant infusion taken as diuretic.)

in English: gang flower, gand flower, milkwort

Polygonatum Miller Asparagaceae (Convallariaceae, Liliaceae)

Greek *polys* and *gony* ‘the knee-joint’, referring to the rhizomes, Latin *polygonatum*, *i* for the plant called Solomon’s seal, *Convallaria polygonatum* L., another name for *leucacantha* (Plinius), see *The Gardeners Dictionary ... Abridged ... fourth edition* (1109). 1754, *Flora Pedemontana* 1: 131. 1785 and Bush, B.F. “The species of *Polygonatum*.” *Amer. Midl. Naturalist* 10: 385–400. 1927, Abramova, L.I. “On the taxonomical structure of the genus *Polygonatum* Mill.” *Bot. Zhurn. (Moscow & Leningrad)* 60: 490–497. 1975, Karthikeyan, S., Jain, S.K., Nayar, M.P. & Sanjappa, M. *Florae Indicae Enumeratio: Monocotyledonae*: 1–435. (Used as a root tea for digestion, coughs and as a laxative; root poultice for skin irritations and rheumatism. A safeguard against witches.)

in English: Solomon's seal

Polygonatum cirrhifolium (Wall.) Royle (*Convallaria cirrhifolia* Wall.; *Convallaria cirrhosa* Griff.; *Polygonatum bulbosum* H. Lév.; *Polygonatum cirrhifoliodes* D.M. Liu & W.Z. Zeng; *Polygonatum fargesii* Hua; *Polygonatum fuscum* Hua; *Polygonatum lebrunii* H. Lév.; *Polygonatum mairei* H. Lév.; *Polygonatum prattii* Baker; *Polygonatum souliei* Hua; *Polygonatum strumulosum* D.M. Liu & W.Z. Zeng; *Polygonatum trinerve* Hua)

Himalaya, China. Herb, erect, climbing in vegetation, creeper, stem pale red, coiled tendril-like tips, large yellowish stout creeping rhizomes, leaves lanceolate green above glaucous below, flowers white to dull purple, fruits with papery outer sheath, green foliage as vegetable, leaves used as animal fodder

See *Species Plantarum* 1: 314–316. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition.* 1754, *Asiatic Researches* 13: 380–382, pl. 5. 1820, *Illustrations of the Botany ... of the Himalayan Mountains ...* 1: 380. 1839, *Hooker's Icones Plantarum* ser. 4 23(1): pl. 2217. 1892, *Journal de Botanique (Morot)* 6(22–23): 427–428, 444–447. 1892 and *Repertorium Specierum Novarum Regni Vegetabilis* 7(152–156): 384. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 302. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 12(341–345): 536. 1913, Hara, H., Stearn, W.T. & Williams, H.J. *An Enumeration of the Flowering Plants of Nepal* 1: 1–154. Trustees of British Museum, London. 1978, *Bulletin of Botanical Research* 6(2): 91–92, photo 1–2. 1986, *Journal of Wuhan Botanical Research* 5: 1–10. 1987, *Cell and Chromosome Research* 11: 93–97. 1988, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 115(1): 1–26. 1993, *Acta Botanica Yunnanica* 15: 377–384. 1993, *Acta Phytotaxonomica Sinica* 31: 549–559. 1993

(Used in Ayurveda. Whole plant antibacterial, used for fevers, cold and cough. Root used for long life, strength, cold and cough, stomach, appetite, inflammation, a tonic for kidney and heart; a paste for wounds and cuts. Stewed, dried roots

used for rheumatism and blood pressure problems. Dried root mixed with other plants and used for wounds.)

in China: juan ye huang jing

in India: meda, salammisri

in Nepal: gomesha

in Tibet: la sha chong wa, ra sha

Polygonatum cyrtanema Hua (*Polygonatum brachynema* Hand.-Mazz.; *Polygonatum henryi* Diels; *Polygonatum martini* H. Lév.; *Polygonatum multiflorum* var. *longifolium* Merr.) (from the Greek *kyrtos* 'curved, arched' and *nema* 'a thread, filament'.)

China.

See *Journal de Botanique (Morot)* 6(21): 393–394. 1892 and *Bot. Jahrb. Syst.* 29: 247. 1900, *Bull. Acad. Int. Géogr. Bot.* 12: 262. 1903, *Lingnan Sci. (For urinary disorders, extract of roots and the leaves of *Hedyotis scandens* consumed orally. Paste from crushed nuts applied on the forehead as a remedy for brief memory loss and senselessness. Seeds analgesic.)

in English: garden knotweed

in China: tou hua liao

in India: chingma, narri

Polygonum chinense L. (*Ampelygonum chinense* (L.) Lindl.; *Ampelygonum chinense* Lindl.; *Persicaria chinensis* (L.) H. Gross; *Persicaria chinensis* var. *siamensis* H. Léveillé; *Polygonum adenopodium* Samuelsson; *Polygonum brachiatum* Poiret; *Polygonum chinense* Houtt.; *Polygonum sinense* J.F. Gmelin)

China. Straggling shrub, climbing herb, oblong-elliptic leaves, white or pink flowers in panicles, leaves and shoots used as vegetable, given to cattle, plant very variable, see also *Persicaria*

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Syst. Nat.*, ed. 13[bis]. 2(1): 639. 1791, *Edwards's Botanical Register* 24: Misc. 62–63. 1838, *FBI* 5: 44. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49(2): 269. 1913, *Proceedings of the Indian Science Congress Association* (III, C): 67: 50. 1980

(Plant tonic, vulnerary, antiscorbutic; leafy twig extract taken for stomachache; anthelmintic, a mixture drunk to kill worms, also applied as a poultice to sores; for stomachache, pound the plant and poultice the abdomen. Roots ground in milk or water used in diarrhea; root and bark eaten for dysentery and stomachache. Leaves ground with lemon juice and the paste applied all over the head against giddiness; leaf juice taken orally against fever.)

in China: huo tan mu

in India: akhi-marauk, akhi-marauk-pau, ameta, angom-yensil, basavana paada, basayana paada, bilee cheenee kanigalu, bilee kanagilu, bilee konde, bili cheenee kanigalu, bilikonde, jangli palak, jaryndem, kaabasale, kakakarumbu, kanne gida, leibung tharam, modhusoleng, mukkala, oduthan, piripu, ran-sisori, taham, thaham, thiruthanni, vandigya

Malay name: semuloh

Polygonum erectum Linnaeus (*Polygonum erectum* Vell.)

North America.

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Fl. Flumin.* 162. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 4: t. 42. 1831 [1827 publ. 29 Oct 1831]

(Astringent.)

Polygonum filicaule Wall. ex Meisn. (*Koenigia filicaulis* (Wall. ex Meisn.) Hedberg; *Koenigia nepalensis* D. Don; *Persicaria minuta* (Hayata) Nakai; *Polygonum filicaule* Wall., nom. inval.; *Polygonum minutum* Hayata; *Polygonum radicans* Hemsl.)

India, Nepal. Often as *Koenigia nepalensis*

See *Prodromus Florae Nepalensis* 74. 1825, *Numer. List* [Wallich] n. 1694. 1829, *Plantae Asiaticae Rariores* (Wallich). 3(12): 59. 1832, *Journal of the Linnean Society, Botany* 26(176): 347. 1891 and *Journal of the College of Science, Imperial University of Tokyo* 25(19): 185, pl. 30. 1908, *Fl. Jap. Suppl.* 173. 1936, *Svensk Botanisk Tidskrift* 40: 391. 1946

(Dried leaves infusion diuretic.)

in China: xi jing liao

in India: bakrolya

Polygonum glabrum Willd. (*Persicaria densiflora* (Meisn.) Moldenke; *Persicaria densiflora* Moldenke; *Persicaria glabra* (Willd.) M. Gómez; *Persicaria glabra* (Willd.) Nemoto; *Persicaria glabra* (Willd.) Grabovsk.; *Persicaria portoricensis* (Bertero ex Small) Small; *Persicaria portoricensis* Small; *Polygonum densiflorum* Meisn., nom. illeg., non *Polygonum densiflorum* Blume; *Polygonum densiflorum* Blume; *Polygonum glabrum* Baker & C.H. Wright; *Polygonum glabrum* Hort. ex Rchb.; *Polygonum glabrum* Roxb.; *Polygonum glabrum* Roxb. ex D. Don; *Polygonum glabrum* Cham. & Schltdl.; *Polygonum portoricense* Bertoloni ex Endlicher; *Polygonum portoricense* Bertero ex Small, nom. illeg.)

India, Pantropical. Herb, glabrous, rooting from the lower nodes, glandular-punctate leaves, pink-red perianth, dark brown nuts

See *Species Plantarum* 1: 359–365. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Species Plantarum*. Editio quarta [Willdenow] 2(1): 447. 1799, *Hort. (Stomachic, astringent, disinfectant. Leaves used for ulcers.)

in English: Balfour aralia, Balfour polyscias

in China: yuan ye nan yang shen

Malay name: daun mangkok

Polysphaeria Hook.f. Rubiaceae

Greek *polys* ‘many’ and *sphaيرا* ‘a globe, ball’, referring to the fruit, see *Genera Plantarum* [Bentham & Hooker f.] 2(1): 108. 1873.

Polysphaeria lanceolata Hiern subsp. *lanceolata* (*Polysphaeria lanceolata* var. *obtusior* Hiern; *Polysphaeria schweinfurthii* Hiern)

Tropical Africa. Climber, tree

See *Fl. Trop. Afr.* [Oliver et al.] 3: 128. 1877 and *Kew Bulletin* 35: 123. 1980

(Roots purgative, astringent, for colds, coughs. Veterinary medicine, roots astringent, boiled with roots of other plants to treat diarrhea.)

in Tanzania: mmweteni

Polysphaeria parvifolia Hiern (*Polysphaeria parvifolia* var. *glabra* Hiern)

Tropical Africa. Small tree or shrub, dense, slender, arching, side branches above the nodes, opposite stipitate leaves, white flowers in small stalkless clusters at the nodes, orange-red berries in dense clusters, crushed leaves and damaged fruit smelling of cooked coffee, ripe fruits eaten fresh, a source of bee forage, in coastal areas, forest margin, dry evergreen forest, woodland, coastal bushland and scrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 445. 1830, *Niger Fl.* 412. 1849, *Genera Plantarum* 2: 108. 1873, *Fl. Trop. Afr.* [Oliver et al.] 3: 128. 1877, *Die Pflanzenwelt Ost-Afrikas* C: 383. 1895 and *Kew Bulletin* 35: 132. 1980

(Roots used for treatment of stomachache.)

in Tanzania: kanala, mchambago, mkame, mkanja, mlapaa, mrigi, nifonzefonze

Polystachya Hooker Orchidaceae

Greek *polys* ‘many’ and *stachys* ‘a spike’, the inflorescence is single and terminal usually with short flowered branches, see *Histoire des plantes de la Guiane Française* 2: 824. 1775, Du Petit-Thouars, Aubert Aubert (1758–1831), *Histoire particulière des plantes orchidées* recueillies sur les trois îles australes d’Afrique, de France, de Bourbon et de Madagascar ... Paris 1822, *Exotic Flora* 2: ad pl. 103. 1824 and *Harvard Pap. Bot.* 5(2): 383–466. 2001, *Botanical Journal of the Linnean Society* 165: 235–250. 2011.

Polystachya cultriformis (Thouars) Lindl. ex Spreng. (*Dendrobium cultriforme* Thouars; *Dendrorchis appendiculata* (Kraenzl.) Kuntze; *Polystachya appendiculata* Kraenzl.; *Polystachya coelogynochila* Kraenzl.; *Polystachya cultrata* Lindl., nom. superfl., nom. illeg.; *Polystachya cultriformis* (Thouars) Spreng.; *Polystachya cultriformis* Lindl. ex Spreng.; *Polystachya cultriformis* var. *africana* Schltr.; *Polystachya cultriformis* var. *autogama* Schltr.; *Polystachya cultriformis* var. *humblotii* Rchb.f.; *Polystachya cultriformis* var. *nana* S. Moore; *Polystachya cultriformis* var. *occidentalis* Kraenzl.; *Polystachya gerrardii* Harv.; *Polystachya kirkii* Rolfe; *Polystachya lujae* De Wild.; *Polystachya monophylla* Schltr.)

Trop. & S. Africa, W. Indian Ocean. Glabrous herb, epiphytic, fairly long and narrowly conical clustered pseudobulbs nearly covered by membranous sheaths, flowers mostly white, inflorescence usually arching or pendulous, in deep shade in sub-montane evergreen forest, riverine forests

See *Nova Acta Regiae Societatis Scientiarum Upsaliensis*, ser. 2, 6: 82. 1799, *Histoire particulière des plantes orchidées* t. 87, 101. 1822, *Botanical Register*; consisting of coloured ... 8: t. 686. 1822, *Exotic flora* 2: pl. 103. 1824, *Appendix to the first ... (Rhizome paste applied to treat cuts and wounds.)

in Nepal: simal

Polytoca R. Br. Poaceae (Gramineae)

Greek *polys* ‘many’ and *tokos* ‘a birth’, *polytokia* ‘fecundity’, referring to the numerous offsprings, type *Polytoca bracteata* R. Br., see John Joseph Bennett (1801–1876) and Robert Brown, *Plantae Javanicae rariores*. 15, 18, 20, f. 5. London (Jul.) 1838, *Synopsis Plantarum Glumacearum* 1: 403. 1854 [1855] and *Kew Bull.* 35(4): 813–818. 1981, *Blumea* 47(3): 545–580. 2002 [Revision of *Chionachninae* (Gramineae: Andropogoneae)].

Polytoca macrophylla Benth. (*Chionachne macrophylla* (Benth.) Clayton)

Malesia, New Guinea. Perennial, robust, monoecious, spikelets unisexual, cattle fodder, see also *Chionachne*

See *Plantae Javanicae rariores* 15, 18, 20, f. 5. London (Jul.) 1838, *Synopsis Plantarum Glumacearum* 1: 403. 1854 [1855], *Journal of the Linnean Society, Botany* 19: 52. 1881 and *Kew Bulletin* 35(4): 814. 1981, *Blumea* 47(3): 545–580. 2002

(Leaf shoots heated and squeezed into a sore ear.)

in Papua New Guinea: bagona

Polytrema C.B. Clarke Acanthaceae

Greek *polys* ‘many’ and *trema* ‘hole, aperture’, see *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(3): 693. 1908 [27 Mar 1908].

Polytrema vulgare C.B. Clarke

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(3): 693. 1908

(Pain at the heart, abdominal complaints, ulcers, boil the plant and poultice.)

Malay names: lepa, lipah, peparu hitam, sekeras akar

Polytrichum Hedw. Polytrichaceae

From the Greek *polys* ‘many’ and *thrix*, *trichos* ‘hair’, referring to the hairy calyptra (or cap) which covers the capsule before it is fully mature, the sporophyte has distinct hairs protruding from the calyptra, see Hedwig, Johann (1730–1799), *Species Muscorum Frondosorum Lipsiae* (Leipzig): sumtu J.A. Barthii; Parisiis, A. Koenig, 1801 [Supplementum primum-quartum scriptum a Friderico Schwaegrichen ... Lipsiae (Schwägrichen, Christian Friedrich, 1775–1853)], Bridel, Samuel Elisee von (1761–1828), *Muscologia recentiorum seu Analysis, historia, et descriptio methodica omnium muscorum frondosorum hucusque cognitorum ad normam Hedwigii l...*, Gothae, apud C.G. Ettingervm; Parisiis, apud Barrois Ivniorem, 1797–1803 and *Bull. Jard. Bot. Belg.* 56: 241–300. 1986, *Trop. Bryol.* 25: 35–70. 2004.

Polytrichum commune Hedw. (*Pogonatum madagassum* (Hampe) A. Jaeger; *Polytrichum assimile* Hampe; *Polytrichum atrichoides* Müll. Hal., invalid; *Polytrichum brachypelma* Müll. Hal.; *Polytrichum buchananii* Broth.; *Polytrichum cataractarum* Müll. Hal.; *Polytrichum commune* Linn. ex Hedw.; *Polytrichum commune* fo. *uliginosum* (Wallr.) America, China. Bluish green, shiny, short to long, slender to stout, upright, unbranched, brown tips on the leaves and the rolled over leaf edges that cover the lamellae, leaves with a well-developed system of tiny tubes for carrying water, grows in mats, an important pioneer on many types of soils and a stabilizer of sand

See *Botanisches Taschenbuch* 1801: 198. 1801, *Deutschlands Flora ... Zweite durchaus umgearbeitete Ausgabe, Kryptogamische Gewächse* 3: 58. 1813, *Species Muscorum Frondosorum*, Supplementum Primum 2: 311. 1816, *Deutschlands Kryptogamen-Flora* 238. 1848, *Journal of the Proceedings of the Linnean Society, Botany*, Supplement 2: 155. 1859, *Linnaea* 30: 635. 1860, *Journal of the Linnean Society, Botany* 12: 620–621. 1869, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 21: 366. 1 f. 2. 1872, *Linnaea* 38: 577–579. 1874, *Linnaea* 40: 316. 1876, *Revue Bryologique* 21: 39. 1894, *Bulletin of the Torrey Botanical Club* 23: 491. 1896, *Nuovo Giornale Botanico Italiano*, new series 4: 17. 1897, *Flora* 83: 328–329. 1897, *Hedwigia* 36: 343–347. 1897, *Index Bryologicus* 987. 1898 and *Revue Bryologique* 27: 42. 1900, *Revue Bryologique* 32: 35. 1905, *Repertorium Specierum Novarum Regni Vegetabilis* 48: 251. 1940, *Acta Botanica Yunnanica* 6: 183. f. 8: 7–14. 1984

(A powerful diuretic, postpartum remedy, the tea used to treat urinary obstructions, dropsy and prostate problems.)

in English: juniper hair cap

Pomaderris Labill. Rhamnaceae

Greek *poma* 'a lid' and *derris* 'a skin', referring to the membranous valve or to the membranous covering of the capsule; see Jacques Julien Houtton de Labillardière (1755–1834), *Novae Hollandiae plantarum specimen*. 1: 61, tt. 86. 87. Parisiis (Jul.) 1805, *Sylva Tellur.* 154. 1838 and *Muelleria* 10: 28–30. 1997.

Pomaderris kumeraho A. Cunn. (*Pomaderris kumeraho* A. Cunn. ex Fenzl)

New Zealand. Shrub, leaves underside covered in soft white tangled hairs, golden yellow flowers

See *Novae Hollandiae Plantarum Specimen* 1: 61. 1805, Endlicher, Istvan Laszlo (1804–1849), *Enumeratio plantarum quas in Novae Hollandiae ora austro-occidentali ad Fluvium Cygnorum et in Sinu Regis Georgii collegit Carolus liber baro de Hügel*. 21. Vindobonae, 1837 [Bentham, George (1800–1884), Fenzl, Eduard (1808–1879), Hügel, Carl Alexander Anselm von (1794–1870), Schott, H. W. (Heinrich

Wilhelm) (1794–1865)], *Ann. Nat. Hist.* Ser. I. iii. (1839) 248. 1839 and *Nat. Pflanzenfam.* ed. 2. 20d: 110. 1953

(Leaves for skin diseases, blood purifier, chest complaints, for colds and asthma, bronchitis, tuberculosis.)

in English: golden tainui, gumdigger's soap, poverty weed

Maori names: kumarahou, papapa

Pometia Forst. & Forst.f. Sapindaceae

After the French botanist Pierre Pomet, 1658–1699, merchant, apothecary to the French Court, druggist, author of *Droguier curieux*, ou catalogue des drogues simples et composées, mis par alphabet. Seconde édition ... corrigée. Paris 1709 and *Histoire générale des drogues*, traitant des plantes, des animaux et des minéraux. [The most comprehensive medical and botanical account of drugs of its time.] Paris 1694; see *Characteres Generum Plantarum* 55. 1775, *Florae Fluminensis* 80. 1825, *Flora Brasiliensis* 7: 105. 1863 and *Lexikon Generum Phanerogamarum* 456. 1904, *Recueil des Travaux Botaniques Néerlandais* 33: 166. 1936.

Pometia pinnata J.R. Forst. & G. Forst. (*Irina tomentosa* Blume; *Pometia pinnata* Forst.; *Pometia pinnata* fo. *tomentosa* (Blume) Jacobs; *Pometia tomentosa* (Blume) Teijsm. & Binn.; *Pometia tomentosa* Kurz)

New Guinea, China, Pacific. Tree, straight, small greenish flowers in terminal panicles, calyx cup-shaped, globose drupe, whitish or white translucent pulp surrounding the seed, ripe fruit has a glutinous honey-like taste

See *Characteres Generum Plantarum* 110, t. 55. 1775, *Bijdragen tot de flora van Nederlandsch Indië* 5: 231. 1825, *Prodr.* (DC.) 15(2.2): 780. 1866 [late Aug 1866], *Catalogus plantarum quae in Horto botanico bogoriensi* ... 214. 1886 and *Reinwardtia* 6: 130. 1962

(Young fruits in rheumatism. Bark decoction in diabetes and mouth ulcers; fresh stem bark chewed and the juice swallowed to relieve asthma and alleviate abdominal pains; boiled bark to bathe the patient in chicken pox; bark infusion taken as a diuretic, to cure diarrhea in children, for treating stomach troubles, coughs accompanied by fever; a juice squeezed from the inner bark used to treat influenza and joint pain; bark is said to have contraceptive properties; sap from bark and young leaves drunk as an oral contraceptive; the bark, when mixed with the barks of *Dendrocnide harveyi* and *Claoxylon fallax* Müll.Arg., is a treatment for arthritis. Leaves can be steeped to produce a cure for dysentery or mixed with the top of the reed *Miscanthus floridulus* and the leaves of *Centella asiatica* to treat diarrhea.)

in English: pinnate pometia

in China: fan long yan

in Fiji: dawa

in Tonga: tava

in Borneo: enselan, kasai

Malayan names: asam kuang, kasai, kasai daun kecil, kelisar, langsir

in Papua New Guinea: ibula, lavakoko, taun, ton

Poncirus Raf. Rutaceae

From *poncire*, the French name for a species of citron; see C.S. Rafinesque, *Sylva Telluriana*. 143. 1838.

Poncirus trifoliata (L.) Raf. (*Aegle sepiaria* DC.; *Bilacus trifoliata* (L.) Kuntze; *Citrus trifolia* Thunb.; *Citrus trifoliata* L.; *Citrus trifoliata* subfo. *monstrosa* (T. Itô) Hiroë; *Citrus trifoliata* var. *monstrosa* T. Itô; *Citrus triptera* Desf.; *Poncirus trifoliata* var. *monstrosa* (T. Itô) Swingle; *Pseudaegle sepiaria* (DC.) Miq.)

China. Deciduous shrub or tree, green angled thorny stems, leaves alternate divided with 3 leaflets, solitary aromatic flowers, fruit dull yellow fragrant when ripe, peel thick and rough

See *Flora Japonica*, ... 294. 1784, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 538. 1824, *Sylva Telluriana* 143. 1838 and *Encycl. Jap.* 2: 1056. 1909, *Forest Pl. History Jap. Is.* 1: 209. 1974, *Pl. Syst. Evol.* 146: 13–30. 1984, *Ci. & Cult.* (Sao Paulo) 36: 868. 1984, *Caryologia* 38: 335–346. 1985, *China Citrus* 17: 3–4. 1988, *Acta Hort. (Used in Ayurveda, Unani and Sidha. Poisonous, antiviral, antibacterial, antimalarial, insecticidal, hypoglycemic, anti-ulcer, antiinflammatory, wound healing, antinematodal, anti-oxidant. Flowers used in diabetes. Crushed leaves made into a paste applied on piles, bleeding piles and eczema; leaves decoction given in malaria. Extracts from the leaves, bark and seed applied as antiseptic against skin diseases and rheumatism; bark and leaves infusion used for bathing to reduce fever; leaves poultice applied to ulcers and wounds infested with worms. Bark for malaria and bleeding piles; stem bark paste given orally for stomachache; powdered stem bark taken in leucorrhea; heated bark for toothache; bark and leaves paste applied on head to cure ulcers; root bark decoction taken as an abortifacient. Seed oil antimicrobial, applied to the body after bathing for treating eczema, scabies, burns and itches, ringworm and different parasitic skin diseases; fruits or roots of *Helicteres isora*, seeds of *Pongamia glabra* and stem bark of *Tinospora cordifolia* mixed and crushed into powder eaten to cure diabetes; powdered seeds of *Givotia rottleriformis* mixed with *Pongamia pinnata* seed oil and made into a paste applied as an ointment to skin diseases, eczema, psoriasis; seeds boiled and crushed and the oil massaged on the body in the rainy season to protect from cold; seeds taken internally for bronchitis and whooping cough. Seeds and leaves botanical pesticides, against insects, fungi and bacteria; leaves put in stored grains to protect from pests.

Root juice in sores, ulcers, gonorrhoea; contact therapy, root tied to the waist of children to cure venereal diseases. Roots as fish poison; pounded and roasted seeds can be used as a fish poison. Veterinary medicine, bark and leaves given to cattle for better digestion; seed oil applied in eczema; seeds of *Cassia auriculata* (*Senna auriculata*) along with stem bark of *Pongamia pinnata*, latex of *Argemone mexicana* pounded and the extract applied for skin diseases; stem bark ground with leaves of *Cleome gynandra*, *Albizia lebbek* and cow urine given in trypanosomiasis; stem bark decoction given in dysentery. Magico-religious beliefs, contact therapy, dried fruits tied around the neck or waist of children to get relief from cough, for healthy growth.)

(Leaf decoction for stomach complaints, nausea during menstruation. A snakebite remedy, antispasmodic, sudorific. Eye wash for children.)

in Curaçao: mampuritu

Portulaca L. Portulacaceae

Latin *portulaca*, *porcilaca*, *porcillaca*, name used by Plinius and Marcus Terentius Varro et al. for *Portulaca oleracea* L., etymology uncertain, possibly from Latin *portula*, *ae*, the diminutive of *porta*, *ae* 'a door, gate', referring to the capsules, or from *porcus*, referring to the female organs; see Carl Linnaeus, *Species Plantarum*. 1: 445–446. 1753, *Genera Plantarum*. Ed. 5. 204. 1754, *Florae Lusitanicae et Brasiliensis Specimen* 35, t. 2 f. 15. 1788, *Genera Plantarum* 312. 1789, *Elementa botanica ...* 2: 382. 1790, *Genera Plantarum* 949. 1840, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 723. 1852 and *Fieldiana, Bot.* 24(4): 207–214. 1946, *Anales Museo Nacional Montevideo*, ser. 2 7(3): 1–147. 1962, C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1174. New York 1967, Matthews, J.F. and P.A. Levins. "The genus *Portulaca* in the southeastern United States." *Castanea* 50: 96–104. 1985, *Flora de Veracruz* 51: 1–38. 1986, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIII: 893, 996. Torino 1986, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2180–2183. 2001, *Flora de la región del Parque Nacional Amboró Bolivia* 2: 1–209. 2004, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005. The ingestion of purslane may have a protective effect against oxidative stress caused by vitamin A deficiency. Many authors have shown *Portulaca oleracea* to have the highest content of omega-3 fatty acids and antioxidants of any green leafy vegetable examined to date.

Portulaca foliosa Ker-Gawl. (*Portulaca fischeri* Pax var. *robusta* Poelln.; *Portulaca foliosa* DC., nom. illeg.)

Ghana. Herb, erect or decumbent, leaves succulent

See *Species Plantarum* 1: 445–446. 1753, *Botanical Register*; consisting of coloured ... 1: t. 793. 1825

(Poultice to treat boils.)

Portulaca oleracea L. (*Portulaca aurea* Hort. ex DC.; *Portulaca consanguinea* Schldt.; *Portulaca intermedia* Link ex Schldt.; *Portulaca laevis* Buch-Ham.; *Portulaca marginata* Kunth; *Portulaca mundula* I.M. Greek *poton* 'drink, drinking water', leaves and green stems used in a very bitter and regurgitive herbal tea, Latin *potare* "to drink", see *Histoire des plantes de la Guiane Française* 1: 394, t. 151. 1775, *Genera Plantarum* 1: 283. 1789, *Journal of Linnean Society of London, Botany* 1: 52–115. 1857 and *Field Museum of Natural History, Botany Series* 18 (part 3): 919–929. 1938, *Caldasia* 15: 71–91. 1986, James A. Duke and Rodolfo Vasquez, *Amazonian Ethnobotanical Dictionary*. CRC Press. 1994, *Cladistics* 10: 175–206. 1995[1995], Schultes, R.E. and R.F. Raffauf. *The Healing Forest: Medicinal and Toxic Plants of the Northwest Amazonia*. Dioscorides Press, Portland, Or. 1995, *Harvard Papers in Botany* 3: 63–71, 181–197. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1235–1239. 2001, Jensen, S.R. and J. Shripsema. Chemotaxonomy and pharmacology of Gentianaceae. Pp. 573–632 in *Gentianaceae—Systematics and Natural History*, eds. L. Struwe and V.A. Albert. Cambridge. 2002, *Syst. Bot.* 29(3): 670–701. 2004.

Potalia amara Aubl. (*Nicandra amara* (Aubl.) Gmel.; *Nicandra amara* J.F. Gmel.; *Potalia amara* Desf.)

Guianas, Brazil. Treelet or shrub, stiff leaves, flowers are borne in clusters at the top of the stem, round fruits, bitter taste

See *Histoire des plantes de la Guiane Française* 1: 394, pl. 151. 1775, *Syst. Nat.*, ed. 13[bis]. 2(1): 677. 1791, *Cat. Pl. Horti Paris*. ed. 3, 127. 1829 and *Planta Medica* 71(10): 977–979. 2005, *Journal of Ethnopharmacology* 133(2): 917–921. 2011

(Antimalarial, sudorific, analgesic, bitter, emmenagogue, to treat abscess, ophthalmia and venereal diseases, jaundice, urethritis, poisoning, venomous ant stings, cassava poison antidote. A snakebite remedy. Doctrine of Signatures usage.)

Common names: anilapouie, bokokini

Potalia chocoensis Struwe & V.A. Albert (Colombia: Chocó)

Colombia. Treelet

See *Systematic Botany* 29(3): 677, 679. 2004

(Analgesic.)

Potalia coronata Struwe & V.A. Albert

Brazil, western Amazonia. Tree and shrub, small trees

See *Systematic Botany* 29(3): 679–681. 2004

(A snakebite remedy.)

Common names: curarina, sacha curarina

Potalia crassa Struwe & V.A. Albert

Colombia: Chocó. Treelet

See *Systematic Botany* 29(3): 681, 684. 2004

(To treat abscess, ophthalmia and venereal diseases.)

Potalia elegans Struwe & V.A. Albert

Colombia. Tree or small tree

See *Harvard Papers in Botany* 3(2): 185, f. 2. 1998

(For venereal diseases.)

Common names: palo de mato, temblador

Potalia maguireorum Struwe & V.A. Albert (after the American botanist Bassett Maguire, 1904–1991, explorer, plant collector, from 1943 New York Botanical Garden, and his wife Celia.)

Brazil, Venezuela, Amazonas. Small tree or shrub

See *Harvard Papers in Botany* 3(2): 189, f. 3. 1998

(Antiinflammatory, febrifuge, a snakebite remedy.)

Potalia resinifera Mart. (*Potalia amara* var. *resinifera* (Mart.) Progel)

Brazil. Shrubs or treelets

See *Nova Genera et Species Plantarum ...* (Martius) 2: 90, t. 170. 1826, *Flora Brasiliensis* [Martius] 6(1): 268. 1868 and *Systematic Botany* 29(3): 687–691. 2004

(Leaves applied as a snakebite remedy.)

Common names: curarina, sacha curarina

Potalia turbinata Struwe & V.A. Albert

Costa Rica. Shrub

See *Systematic Botany* 29(3): 691–693. 2004

(Sedative.)

Potalia yanamonoensis Struwe & V.A. Albert

Peru. Small trees

See *Systematic Botany* 29(3): 693–694. 2004

(To treat abscess and venereal diseases.)

Potamogeton L. Potamogetonaceae

Potamogeton, from the Greek *potamos* and *geiton* ‘a neighbour’, a neighbour of the river, referring to the aquatic natural habitat; Plinius applied Latin *potamogeton* and *potamogiton* to a water-plant, pondweed, water-milfoil; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 126–127. 1753, *Genera Plantarum*. Ed. 5. 61. 1754, *Florula belgica*, opera majoris prodromus, auctore ... 163. 1827, *Icones florum germanicae et helveticae* 7: 10. 1845 and *N. Amer. Fl.* 17(1): 14. 1909, *Fieldiana, Bot.* 24(1): 68–73. 1958, *Fl. Canada* 2: 93–545. 1978[1979], *Fl. Mesoamer.* 6: 13–15. 1994, *Novon* 6(4): 389. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2183–2184. 2001, *Fl. Neotrop.* 85: 1–52. 2003.

Potamogeton crispus L. (*Potamogeton crispus* Laterr.; *Potamogeton crispus* Darl.)

Europe, India. Herb, rootstock used as vegetable

See *Species Plantarum* 1: 126. 1753 and *Bull. Bot. Soc. Bengal* 34: 83–88. 1980, *Acta Biol. Cracov., Ser. Bot.* 25: 57–77. 1983, *Taxon* 35: 563–573. 1986, *Bull. Bot. Gard. Toyama* 37: 1–6. 1998

(Plants as blood purifier.)

in English: crispate-leaf pondweed, crispate-leaved pondweed, curled pondweed, curly-leaf pondweed, curly muckweed, curly pondweed, curly pondweed, pondweed

in South Africa: fonteingraskruid, krulblaarfonteinkruid

in China: zu cao

in Japan: ebi-mo

Potamogeton gramineus L. (*Potamogeton gramineus* f. *gramineus*; *Potamogeton gramineus* fo. *maximus* Morong ex Bennett; *Potamogeton gramineus* subsp. *heterophyllus* (Schreb.) Schinz & R. Keller; *Potamogeton gramineus* var.

graminifolius Fr.; *Potamogeton gramineus* var. *maximus* Morong ex A. Benn.; *Potamogeton gramineus* var. *myriophyllus* J.W. Robbins; *Potamogeton gramineus* var. *typicus* Ogden; *Potamogeton heterophyllus* Schreb.; *Potamogeton heterophyllus* auct. non Schreb.; *Potamogeton heterophyllus* fo. *myriophyllus* (J.W. Robbins) Morong; *Potamogeton wolfgangii* Kihlm.)

British Columbia. Perennial, aquatic or semi-terrestrial herb, strong rhizomes, stems freely branched, submersed leaves narrowly lanceolate not clasping the stem, floating leaves different from the submersed ones, inflorescence spikelike, lakes, lake margins, ponds in peat bogs, ditches and slowly flowing streams and rivers

See *Species Plantarum* 1: 126–127. 1753, *Spicilegium Florae Lipsicae* 21. 1771, *A Manual of Botany of the Northern United States* (ed. 5) 487. 1867, *Journal of Botany, British and Foreign* 19: 241. 1881, *Memoirs of the Torrey Botanical Club* 3(2): 24. 1893 and *N. Amer. Fl.* 17(1): 14. 1909, *Mem. Amer. Acad. Arts*, n.s. 17: 1–183. 1932, *Rhodora* 45: 57–105, 119–163, 171–214. 1943, *Rhodora* 76: 564–649. 1975, *Rhodora* 78: 650–673. 1976, *Sida* 11: 173–188. 1985, *Flora Neotropica* 85: 1–52. 2003

(High phenolic acid content.)

in English: grass-leaved pondweed, grassy pondweed, variable-leaf pondweed, various-leaved pondweed

in China: he ye yan zi cai

Potamogeton lucens L. (*Buccaferrea lucida* Bubani; *Potamogeton acuminatus* Schumach.; *Potamogeton americanus* Roem. & Schult.; *Potamogeton angustifolius* Bercht. & J. Presl ex Opiz; *Potamogeton caudatus* Seidl ex Opiz; *Potamogeton coriaceus* (Nolte ex Mert. & W.D.J. Koch) Fryer; *Potamogeton corniculatus* Schur; *Potamogeton cornutus* J. Presl & C. 1982, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(3): 85–88. 1995

(Whole plant paste with mustard oil rubbed on joints. Leaves and roots astringent, analgesic, tonic; leaf decoction taken against diarrhea, dysentery, arthritis and to remove kidney stones.)

in English: cinquefoil, goose grass, goose tansy, silverweed, silverweed cinquefoil

in China: jue ma

in India: penma, toma, troma

in Nepal: masino jhaar

in Tibetan: gro-lo sa-dzin

Potentilla arguta Pursh (*Drymocallis agrimonioides* (Pursh) Rydb.; *Drymocallis arguta* (Pursh) Rydb.; *Geum agrimonioides* Pursh; *Potentilla arguta* Pursh subsp. *arguta*; *Potentilla agrimonioides* var. *arguta* (Pursh) Farw.; *Potentilla pensylvanica* var. *arguta* (Pursh) Ser.)

North America. Perennial subshrub, herbaceous

See *Species Plantarum* 1: 495–500. 1753, *Mantissa Plantarum* 1: 76. 1767, *Flora Americae Septentrionalis*; or, ... 2: 736. 1814 [1813], *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 581. 1825, *Asa Gray Bulletin* 3(8): 7. 1895, *A Monograph of the North America Potentilleae* 190–205, pl. 102–111; pl. 102, f. 1–5. 1898

(Astringent, demulcent, postpartum remedy, for headache, dysentery, cuts, boils, wounds, sores.)

in English: tall cinquefoil, tall potentilla, white cinquefoil

Potentilla argyrophylla Wall. ex Lehm. (*Potentilla argyrophylla* Wall.)

India, Himalaya. Herb, erect, robuste, long-stalked yellow flowers in terminal panicles, achenes glabrous

See *Numer. List.* [Wallich] n. 1020. 1829, *Novarum et Minus Cognitarum Stirpium Pugillus* [Lehmann] 3: 36. 1831, *Fl. Brit. India* [J.D. Hooker] 2(5): 357. 1878 [Jul 1878]

(Roots infusion for throat rashes, toothache, gingivitis; root juice or a paste applied to treat toothache; powdered root used as a tonic. Leaves decoction to treat diarrhea, arthritis and kidney stones.)

in English: silver weed

in China: yin guang wei ling cai

in India: kamlua, tama, vajradanti

in Nepal: bajradanti

Potentilla argyrophylla Wall. ex Lehm. var. ***atrosanguinea*** (Lodd., G. Lodd. & W. Lodd.) Hook. f. (*Potentilla argyrophylla* Wall. ex Lehm. var. *atrosanguinea* (G. Lodd.) Hook.f.; *Potentilla atrosanguinea* Raf.; *Potentilla atrosan-*

guinea Lodd.; *Potentilla atrosanguinea* Lodd., G. Lodd. & W. Lodd.)

India, Himalaya. Herb, erect, robuste

See *Botanical Cabinet*; consisting of coloured delineations . . . 8(9): t. 786. 1823, *Numer. List.* [Wallich] n. 1020. 1829, *Novarum et Minus Cognitarum Stirpium Pugillus* [Lehmann] 3: 36. 1831, *Autik. Bot.* 165. 1840, *Fl. Brit. India* [J.D. Hooker] 2(5): 357. 1878 [Jul 1878] and *Notes Roy. Bot. Gard. Edinburgh* 37(2): 353. 1979

(Whole plant antibacterial. Leaves analgesic, chewed for strong teeth, also used to treat wounds; ashes of leaves and roots applied to burns with mustard oil. Flowers decoction administered to treat angina pectoris.)

in China: zi hua yin guang wei ling cai

in India: kamlua, role

in Tibet: rgyu-mkhris

Potentilla bifurca Linn. var. ***bifurca*** (*Schistophyllidium bifurcum* (L.) Ikonn.)

China. Forage

See *Species Plantarum* 1: 495–500. 1753 and *Taxon* 30: 853–854. 1981

(Astringent.)

in China: er lie wei ling cai

Potentilla canadensis Pursh (*Callionia canadensis* (L.) Greene; *Callionia pumila* (Poir.) Greene; *Potentilla canadensis* L. var. *canadensis*; *Potentilla canadensis* var. *pumila* (Poir.) Torr. & A. Gray; *Potentilla caroliniana* Poir.; *Potentilla pumila* Poir.; *Potentilla pumila* var. *caroliniana* (Poir.) P.W. Graff)

North America. Perennial herb

See *Species Plantarum* 1: 498. 1753, *Encyclopédie Méthodique. Botanique* ... Supplément 5: 594–595. 1804, *A Flora of North America*: containing ... 1(3): 443. 1840 and *Leaflets of Botanical Observation and Criticism* 1(19): 238. 1906, *Castanea* 10(4): 96. 1945, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989

(Crushed roots infusion taken for diarrhea. Ceremonial, ritual, magico-religious beliefs, witchcraft medicine.)

in English: cinquefoil, dwarf cinquefoil, running five-fingers, running fivefingers

Potentilla chinensis Seringe var. ***chinensis*** (*Potentilla chinensis* subsp. *trigonodonta* Handel-Mazzetti; *Potentilla chinensis* var. *xerogenes* Handel-Mazzetti; *Potentilla exaltata* Bunge)

China.

See *Species Plantarum* 1: 495–500. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 581. 1825,

Mémoires Présentés à l'Académie Impériale des Sciences de St.-Pétersbourg par Divers Savans et lus dans ses Assemblées 2: 98. 1831 and *Symbolae Sinicae* 7(3): 512–513. 1933, *Cytologia* 56: 1–10. 1991, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(3): 85–88. 1995

(Diuretic.)

in China: wei ling cai

Potentilla crinita A. Gray (*Potentilla crinita* A. Gray var. *crinita*; *Potentilla vallicola* Greene)

North America. Perennial herb

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 41–42. 1849 and *Leaflets of Botanical Observation and Criticism* 2(7): 137–138. 1911

(Whole plant infusion as a postpartum remedy, stimulant, tonic.)

in English: bearded cinquefoil

Potentilla discolor Bunge (*Potentilla discolor* var. *formosana* (Hance) Franchet; *Potentilla formosana* Hance)

China.

See *Species Plantarum* 1: 495–500. 1753, *Mémoires de l'Académie Impériale des Sciences de St.-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2: 99. 1833, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 212. 1866, *Plantae Delavayanae* 212. 1890

(Astringent.)

(Roots stimulant, tonic.)

in English: Pennsylvania cinquefoil, prairie cinquefoil

Potentilla recta L. (*Potentilla recta* Jacq.; *Potentilla recta* L. var. *obscura* (Nestler) W.D.J. Koch; *Potentilla recta* L. var. *pilosa* (Willd.) Ledeb.; *Potentilla recta* L. var. *sulphurea* (Lam. & DC.) Peyr.; *Potentilla sulphurea* Lam.)

Greece, North America. Perennial herb, in grass fields

See *Species Plantarum* 1: 495–500. 1753, *Fl. Austriac.* (Jacquin) 4: t. 383. 1776, *Fl. Franç.* (Lamarck) 3: 114. 1779 [1778 publ. after 21 Mar 1779] and *Synopsis der Mitteleuropäischen Flora* 6(1[34,35]): 671, 750–751. 1904, *Flora URSS* 10: 160. 1941, *Taxon* 28: 398–400. 1979, *Taxon* 29: 709–710, 718–720. 1980, *Taxon* 30: 853–854. 1981, *Taxon* 31(2): 344–360. 1982, *Naturaliste Canad.* 111: 447–449. 1984, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19.

1989, *Bot. J. Linn. Soc.* 132: 263–280. 2000, *Iran. J. Bot.* 11(2): 185–192. 2006

(Poisonous. Crushed leaves and stems made into a paste applied to open sores, ulcers, boils and wounds.)

in English: common tormentil, rough-fruited cinquefoil, sulfur cinquefoil, sulphur cinquefoil, upright cinquefoil

in China: zhi li wei ling cai

Potentilla rosulifera H. Léveillé (*Potentilla freyniana* Bornmüller var. *grandiflora* Th. Wolf; *Potentilla querpertensis* Cardot; *Potentilla yokusaiana* Makino)

China, Japan.

See *Species Plantarum* 1: 495–500. 1753 and *Bibliotheca Botanica* 16(Heft 71): 640. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 7(143–145): 198. 1909, *Botanical Magazine* 24: 142. 1910

(Stomachic.)

in China: qu zhi wei ling cai

Potentilla sericea L. (*Potentilla sericea* Grev.; *Potentilla sericea* Dulac)

China.

See *Species Plantarum* 1: 495–496. 1753, *Mem. Wern. Soc.* 3: 430. 1821, *Fl. Hautes-Pyrénées* 308. 1867 and *Taxon* 30: 853–854. 1981, *Folia Geobot. Phytotax.* 27: 167–176. 1992

(Leaf extract astringent, styptic, antiseptic, as a gargle in sores and ulcers in throat and mouth, also applied to cuts, wounds.)

in India: tasma

Potentilla simplex Michx. (*Callionia simplex* (Michx.) Greene; *Potentilla canadensis* var. *simplex* (Michx.) Torr. & A. Gray; *Potentilla simplex* Michx. var. *argyrisma* Fernald; *Potentilla simplex* Michx. var. *calvescens* Fernald; *Potentilla simplex* Michx. var. *typica* Fernald)

North America. Perennial herb, low spreading, compound leaves, solitary yellow flowers

See *Flora Boreali-Americana* (Michaux) 1: 303. 1803, *A Flora of North America: containing ...* 1(3): 443. 1840 and *Leaflets of Botanical Observation and Criticism* 1(19): 238. 1906, *Rhodora* 33: 188–189, 191. 1931

(Roots infusion astringent, febrifuge, antiseptic, for diarrhea, dysentery, skin diseases.)

in English: common cinquefoil, old-field cinquefoil

Potentilla supina L. (*Tridophyllum supinum* (L.) Greene)

India. Diffuse many-branched hairy herb, leaves pinnate, yellow solitary flowers, smooth ovoid achenes

See *Species Plantarum* 1: 497. 1753 and *Leaflets of Botanical Observation and Criticism* 1(14): 189. 1906, *Bot. Zhurn.* 65 (5): 659–668. 1980, *Bot. Zhurn.* 66 (11):

1584–1594. 1981, *Taxon* 30: 853–854. 1981, *Bot. J. Linn. Soc.* 132: 263–280. 2000

(Decoction of flowers and fruits in fever. Roots tonic, febrifuge, astringent, given in fever.)

in China: chao tian wei ling cai

in India: rathanjot

Potentilla tanacetifolia Willdenow ex Schldtl. (*Potentilla acervata* Soják; *Potentilla conferta* Bunge; *Potentilla filipendula* Willdenow ex Schldtl.; *Potentilla nudicaulis* Willdenow ex Schldtl.; *Potentilla strigosa* Pall. ex Pursh; *Potentilla strigosa* var. *conferta* (Bunge) Kitagawa; *Potentilla tanacetifolia* f. *decumbens* Krylov; *Potentilla tanacetifolia* f. *erecta* Krylov; *Potentilla tanacetifolia* var. *decumbens* (Krylov) Th. Wolf; *Potentilla tanacetifolia* var. *erecta* (Krylov) Th. Wolf)

Europe.

See *Species Plantarum* 1: 495–500. 1753, *Flora Americae Septentrionalis*; or, ... 1: 356. 1814 [1813], *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 7: 286, 296. 1816, *Flora Altaica* 2: 240–241. 1830 and *Bibliotheca Botanica* 16(Heft 71): 314–315. 1908, *Report of the Institute of Scientific Research, Manchoukuo* 4: 89. 1940, *Folia Geobotanica et Phytotaxonomica* 5: 99. 1970, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 476–479. 1991, *Folia Geobotanica et Phytotaxonomica* 27: 167–176. 1992

(Astringent.)

in China: ju ye wei ling cai

Potentilla tridentata Sol. (*Sibbaldiopsis tridentata* (Sol.) Rydb.)

North America.

See *Species Plantarum* 1: 495–500. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 216. 1789, *A Monograph of the North America Potentilleae* 187–188, pl. 100, f. 6–10. 1898 and *Willdenowia* 19: 199–213. 1989

(Vermifuge.)

in English: mountain white potentilla, three-tooth cinquefoil

Potentilla venusta Soják

India.

See *Candollea* 43(1): 171. 1988

(Whole plant antibacterial. Leaves analgesic, chewed for strong teeth, also used to treat wounds. Flowers decoction administered to treat angina pectoris.)

Pothomorphe Miq. Piperaceae

From the genus *Pothos* and the Greek *morphe* ‘a form, shape’, superficially resembling that genus; see *Species Plantarum*

1: 28–30. 1753, *Allgemeine Medizinisch-Pharmazeutische Flora* 2: 445. 1833, *Sylva Telluriana* 84–85, 165. 1838, *Linnaea* 13: 564. 1839[1840], F.A.W. Miquel, in *Bulletin des Sciences Physiques et Naturelles en Néerlande*. 2: 447, 450. Rotterdam 1840, *Comm. Phytogr.* 32, 36. 1840, *Linnaea* 23: 680. 1850 and Trelease, W. & T.G. (Antioxidant and free radical scavenging activities. Vulnerary, stimulant, diuretic and detergent, emmenagogue, anti-abortive and antihemorrhagic, used against tapeworm. Leaves eaten raw or along with meals for madness, hysteria, nervous disorders, body pain; vegetable soup of fresh leaves taken for inflammatory conditions and enlargement of liver; applied on abscesses, wounds or contusions; decoction taken for stomach problems, and as a diuretic; leaves boiled with *Piper auritum* in a tea to treat colds and coughs. Scraped, boiled bark of the lower part of the stem and root an ingredient for arrow poison.)

in Central America: kótomo

in India: attanari, gandamarom

Pothos L. Araceae

From the Sinhalese name *potha* for *Pothos scandens* L.; see Carl Linnaeus, *Species Plantarum*. 2: 968. 1753, *Genera Plantarum*. Ed. 5. 415. 1754, *Familles des Plantes* 2: 470. 1763, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 604. 1851, *Revisio Generum Plantarum* 2: 742. 1891 and *Flore de Madagascar et des Comores* 31: 1–71. 1975, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, *Blumea* 45: 147–204. 2000. Latin *pothos*, from Greek *pothos* ‘desire’, used by Plinius for a summer flower, otherwise unknown.

Pothos chinensis (Raf.) Merrill (*Pothos balansae* Engl.; *Pothos cathcartii* Schott; *Pothos chinensis* var. *lotienensis* C.Y. Wu & H. Li; *Pothos seemanni* Schott; *Pothos warburgii* Engl.; *Pothos yunnanensis* Engl.; *Pothos yunnanensis* Engl. var. *bonii* Buchet; *Tapanava chinensis* Raf.)

Himalaya. Many-branched perennial climber, tender leaves cooked and eaten

See *Species Plantarum* 2: 968. 1753, *Familles des Plantes* 2: 470. 1763, *Flora Telluriana* 4: 14. 1838, *Aroideae* 1: 12, t. 44. 1853, *Bonplandia* 5: 45. 1857, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(1–2): 2–3. 1898 and *Das Pflanzenreich* (Engler) Arac.-Poth. IV. 23B (Heft 37): 28. 1905, *Journal of the Arnold Arboretum* 29(2): 210. 1948, *Acta Phytotaxonomica Sinica* 15(2): 101–102. 1977

(All plant used to treat rheumatic arthralgia, traumatic injury, fractures, cough, infantile malnutrition caused by intestinal parasites. Used fresh and applied topically on insect and animal bites; entire plant as a decoction in bath to treat wounds, burns, swellings; plant boiled and the liquid drunk for cough. Leaves fried in *ghee* and consumed to cure body pain.)

in China: shi gan zi

Pothos curtisii Hook.f. (*Pothos kunstleri* Hook.f.; *Pothos latifolius* L.; *Pothos latifolius* Hook.f., nom. illeg.; *Pothos maingayi* Hook.f.; *Pothos peninsularis* Alderw.)

Thailand, Indonesia.

See *Herb. Amboin.* (Linn.) 25. 1754, *Syst. Nat.*, ed. 10. 2: 1252. 1759, *Fl. Brit. India* [J.D. Hooker] 6: 554. 1893 and *Bulletin du Jardin Botanique de Buitenzorg* 1: 381. 1920

(Fresh leaves and stems extract taken for curing toxicity and poisoning.)

In India: garore

Pothos kerrii Buchet ex P.C. Boyce (*Pothos guangxiensis* H. Li; *Pothos kerrii* Buchet ex Gagnepain)

China, Vietnam.

See *Flore Générale de l’Indo-Chine* 6: 1085, f. 102: 5. 1942, *Blumea* 45(1): 168–172. 2000

(Used to treat traumatic injury.)

in China: chang geng shi gan

Pothos ovatifolius Engl. (*Pothos merrillii* K. Krause; *Pothos ovatifolius* var. *simalurensis* Alderw.)

Philippines, Indonesia. Vine, herbaceous climber

See *Pflanzenr. (Engler) Arac.-Poth.*, IV, 23B: 40. 1905, *Bot. Jahrb. Syst.* 45: 657. 1911, *Bull. Jard. Bot. Buitenzorg*, III, 4: 337. 1922

(Leaves heated over fire and applied as a poultice to reduce pain and swelling, stomachache, enlarged spleen.)

in Indonesia: aka malung

Pothos pilulifer Buchet ex P.C. Boyce (*Pothos pilulifer* Buchet ex Gagnep.)

China, Vietnam.

See *Flore Générale de l’Indo-Chine* 6: 1085, f. 102: 4. 1942, *Blumea* 45(1): 175–177. 2000

(Parts of plant used for epilepsy.)

in China: di gan

Pothos scandens L. (*Batis hermaphrodita* Blanco; *Podospadix angustifolia* Raf.; *Pothos angustifolius* C. Bot. Surv. India* 18(1–4): 33. 1976, *Cell and Chromosome Newsletter* 1: 28. 1978, *Taxon* 32: 127. 1983, *Proceedings of the Indian Science Congress Association* 78(3,VIII): 136–137. 1991

(Stem paste used as plaster on bone fracture; stem mixed with camphor and smoked like tobacco for asthma. Dried leaf powder applied on sores of smallpox; stem and leaves an antidote for snakebites. Leaves for smallpox and asthma; leaves poultice with turmeric applied on dog bite; leaf decoction used for traumatic injury, bodyache and rheumatic arthralgia, as a blood coagulant, principally for wounds. Convulsions and epilepsy, pound the leaves in cold water and use the water for bathing. Roots bruised and fried in oil applied to cure abscess. Veterinary medicine, leaves mixed with pig blood given to hounds.)

in Burma: wai mai

in China: tang lang die da

in India: adhika beeluballi, adike beelu balli, adike beelu soppu, adikebiluballi, adke beelu balli, adkebiluballi, agachoppu, agechoppu, ana-parua, anaparua, anapparua, arkeburu, appachhi balli, arkeburu, bendarli, gechoppu, harsoo, kurobitho, lowsik-lomic, mithan-auchu, murugina beelu, tomap

in Laos: cha-kep, ma nok hon

Malay names: juloh juloh, seginting

in Thailand: kaw kin bai noi, kaw kin boi-lek, t'kap, wai so toi, wai-ta-moi

Pothos tener Wall. (*Pothos gracilis* Roxb., nom. illeg.; *Pothos rumphii* Schott; *Pothos rumphii* var. *giganteus* Engl.; *Scindapsus arborum* C. Presl, nom. illeg.; *Scindapsus rumphii* (Schott) C. Presl; *Scindapsus rumphii* C. Presl; *Scindapsus tener* C. Presl; *Scindapsus tener* (Wall.) C. Presl) Sulawesi to Vanuatu.

See *Species Plantarum* 2: 968. 1753, *Meletemata Botanica* 21. 1832, *Epimel. Bot.* 242. 1851, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 602. 1851

(Applied as a treatment of new bone fracture.)

Pottsia Hooker & Arnott Apocynaceae

For John Potts, d. 1822 (Middx), plant collector, traveler (China and Bengal), gardener for Horticultural Society of London; see Emil Bretschneider, *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. London 1994, Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.

Pottsia laxiflora (Blume) Kuntze (*Pottsia cantonensis* Hooker & Arnott; *Pottsia hookeriana* Wight; *Pottsia laxiflora* var. *pubescens* (Tsiang) P.T. Li; *Pottsia ovata* A. DC.; *Pottsia pubescens* Tsiang; *Vallaris laxiflora* Blume)

(The stem and leaves are used to treat fractures and injury and the latex and roots for anemia and rheumatism.)

in English: hairy pottsia

in China: hua guai teng gen, lian zi teng

Poupartia Comm. ex Juss. Anacardiaceae

Poupartia birrea (A. Rich.) Aubrév. (*Poupartia birrea* (Hochst.) Aubrév.; *Sclerocarya birrea* (A. Rich.) Hochst.; *Spondias birrea* A. Rich.)

Tropical Africa.

See *Species Plantarum* 1: 371. 1753, *Genera Plantarum* 372. 1789, *Flora Senegambiae Tentamen* 1: 152, t. 41. 1831, *Flora* 27 Bes. Beil. 1. 1844 and *Flore Forestière Soudano-Guineenne* 405, t. 89, 1–4. 1950

(Irritant.)

Poupartia caffra (Sond.) H. Perrier (*Sclerocarya birrea* subsp. *caffra* (Sond.) Kokwaro; *Sclerocarya caffra* Sond.) (the specific name based on the word *birr*, the common name for the tree in Senegambia)

East Africa, South Africa. Tree, unripe fruit green

See *Genera Plantarum* 372. 1789, *Flora* 27 Bes. Beil. 1. 1844, *Linnaea* 23: 26. 1850 and *Mémoires du Muséum National d'Histoire Naturelle* 18: 245. 1944, *Kew Bulletin*

34: 756. 1980, *Boletim da Sociedade Broteriana*, ser. 2 62: 117–130. 1989

(*Sclerocarya caffra* has an irritant effect. Bark used for gangrenous rectitis.)

in English: cider tree, maroola plum, marula

in Southern Africa: maroela, meroola; mufula (Venda); mfula (Kalanga, northern Botswana); muFuna, muFura, muGanu, iKanyi, muKwakwa, muPfura, muShomo, muSomo, muT-somo (Shona); umGanu (Zulu); umganu (Swazi); nkanyi (Tsonga); morula (Western Transvaal, northern Cape, Botswana); morula (North Sotho: north and north east Transvaal); morwa (Yei, Ngamiland); uge, muge (Deiriku: Okavango Native Territory); omuongo (Herero); omuongo (Northern South West Africa)

in Tanzania: mng'ongo, mumbu

Pourouma Aubl. Urticaceae (Cecropiaceae, Moraceae)

From the native name in Guiana, see *Histoire des plantes de la Guiane Française* 2: 891–892, t. 341. 1775 and *Fieldiana, Bot.* 24(4): 10–58. 1946.

***Pourouma cecropiifolia* Martius**

Amazon region. Tree, edible grape-like fruit

See *Molecules*. 15(12): 8543–8552. 2010, *J. Agric. Food Chem.* 58(4): 2100–2110. 2010

(Anthocyanins, flavonols and chlorogenic acids; anthocyanin-rich extract of the fruit showed moderate cytotoxicity.)

in Brazil: uva caimarona, uvilla

in Peru: chimico blanco, cocura, cucura, guití, imbáuba de cheiro, mapatí, shuvia, suiya, uba-uba, xëxun

***Pourouma cucura* Standl. & Cuatrec. (*Pourouma garciana* Cuatrec.)**

Venezuela.

See *Fieldiana, Botany* 28(1): 211. 1951, *Caldasia* 7: 298. 1956

(Bark infusion rubbed on aching joints, rheumatic pains, swellings.)

in Peru: cocura, cucura

***Pourouma guianensis* Aubl. (*Pourouma scabra* Rusby; *Pourouma subtriloba* Rusby)**

French Guiana.

See *Histoire des plantes de la Guiane Française* 2: 892, t. 341. 1775 and *Bulletin of the New York Botanical Garden* 6(22): 498. 1910, *Memoirs of the New York Botanical Garden* 7: 232. 1927, *Fl. Neotrop.* 51: 123. 1990, *Phytomedicine* 11(2–3):114–120. 2004

(Antileishmanial activity of isolated triterpenoids.)

Pouteria Aublet Sapotaceae

Pourouma pouteri, native Indian name from the Guiana; see Jean Baptiste Christophore Fusée Aublet (1720–1778), *Histoire des Plantes de la Guiane Française*. 1: 85–86. Londres; Paris: P.F. Didot jeune, 1775, *Introductio ad Historiam Naturalem* 197. 1777, Molina, Giovanni Ignazio (1740–1829), *Saggio sulla Storia Naturale del Chili ...* 186–187, 352. 1782, *Nova Genera et Species Plantarum seu Prodromus* (Swartz) 2, 32. 1788, *Elementa botanica ...* 1: 225. 1790, *Fl. Ind. Occ.* i. 263, t. 6. 1797, *Memórias de Mathematica e Phisica da Academia Real das Sciencias de Lisboa* 3: 19–22. 1812, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 174–175. 1844, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 18–19. 1848, *Flora Brasiliensis* 7: 105–106. 1863, *Botaniska Notiser* 1: 24. 1890, *Notes Botaniques. Sapotacées* 11, 13, 19–21, 23–27, 46–47, 49–52. 1890–[1891] [68 p., issued in 2 fascicles. Incomplete. No more published.], *Histoire des Plantes* 11: 282–283, 285, 290–291, 293. 1892[1891], *Bulletin Mensuel de la Société Linnéenne de Paris* 925. 1891, *Nat. Pflanzenfam.* [Engler & Prantl] 4(1), Nachtrag 274–275. 1897 and *Symbolae Antillarum* 5: 97, 112. 1904, *Lexikon Generum Phanerogamarum* 456. 1904, *Annales de l'Institut Botanique-Géologique Colonial de Marseille* 10: 8. 1912, *Annales de l'Institut Botanique-Géologique Colonial de Marseille* 20: 34, 36. 1912, *Journal of the Washington Academy of Sciences* 3(6): 160. 1913, *Archivos do Jardim Botânico do Rio de Janeiro* 4: 158, 161, t. 17, 19. 1925, *Recueil des Travaux Botaniques Néerlandais* 33: 166, 170, 178, 184. 1936, *Candollea* 9: 217–218, 268, 282. 1942, *Archives des Sciences* 17(1): 77. 1964, *Boissiera* 11: 52. 1965, *Candollea* 22: 230. 1967, *Memoirs of the New York Botanical Garden* 23(9): 203, 219. 1972, *Wrightia* 5(7): 254–255. 1976, *Flora Neotropica* 52: 519–520. 1990, Pennington, Terence Dale (1938–), *The Genera of the Sapotaceae*. Kew: Royal Botanic Gardens, Kew, 1991.

***Pouteria adolfi-friedericii* (Engl.) A. Meeuse subsp. *australis* (J.H. Hemsl.) L. Gaut. (*Aningeria adolfi-friedericii* (Engl.) Robyns & G.C.C. Gilbert subsp. *australis* J.H. Hemsl.)**

Tanzania to Zimbabwe. Very tall tree, clear straight bole, a relatively small dense crown, white latex if cut and an unpleasant smell, leaves stiff and large, very small flowers cream-green in clusters beside leaves, hard fruit, oily seeds, sweet ripe fruit pulp eaten raw, in upland rainforest, frequently associated with *Podocarpus*

See *Bothalia* 7: 341. 1960, *Kew Bulletin* 15: 282. 1961

(Anthelmintic and emetic.)

in Tanzania: kuti, mkuti, mwale, mwengele

***Pouteria sapota* (Jacq.) H.E. Moore & Stearn (*Achradelpha mammosa* Cook; *Achras mammosa* Bonpl. ex Miq., nom. illeg.; *Bassia jussaei* Griseb.; *Calocarpum huastecanum* Gilly; *Calocarpum mammosum* var. *bonplandii* (Kunth) Pierre; *Calocarpum mammosum* var. *candollei* (Pierre) Pierre; *Calocarpum mammosum* var. *ovoideum* (Pierre) Pierre;**

Calocarpum sapota (Jacq.) Merr.; *Calospermum mammosum* var. *bonplandii* (Kunth) Pierre; *Calospermum mammosum* var. *candollei* Pierre; *Calospermum mammosum* var. *ovoidea* Pierre; *Calospermum parvum* Pierre; *Lucuma bonplandii* Kunth; *Lucuma mammosa* (L.) Gaertn.f.; *Lucuma mammosa* Gaertn.f.; *Pouteria mammosa* Jacq.; *Pouteria mammosa* (L.) Cronquist; *Sapota mammosa* Mill.; *Sideroxylon sapota* Jacq.)

Mexico to Central America. Erect tree, narrow or spreading crown, white gummy latex, leaves spirally arranged clustered at the end of branches, small white to pale-yellow flowers in clusters in the axils of fallen leaves along the branches, fruit a leathery dark-brown berry, skin hard rough and brittle, sweet soft flesh pinkish red, slow growing tree, bare branches with tufts of leaves at the tip, flowers borne on naked branches, fruit eaten fresh

See *Bull. Torrey Bot. Club* 71: 659. 1944, *Taxon* 16: 383. 1967

(The milky sap from the bark and green fruit irritant to the eyes, caustic and vesicant to the skin, used as an anthelmintic and emetic, to remove warts, and to cure fungal skin infections. Oil from the seeds used as a sedative in ear and eye ailments. Seed infusion used as an eyewash; pulverized seed coat reported to be a remedy for coronary trouble and, taken with wine, is said to be helpful against kidney stones and rheumatism. The seed has stupefying properties; the leaves are reportedly poisonous.)

in English: mamee sapote, marmalade plum, naseberry

in Central America: sapote

in Mexico: cochitzapotl (= zapote del sueño), guela gue, guela xron, iztac tzapotl (= zapote blanco), mamey, quela que, tezontzapotl (= zapote como piedra de lava), ya xron

in Peru: hison suma, sapote, zapote, mamey colorado, mamey zapote, níspero, zapotillo

in Indonesia: ciko mama

in Malaysia: chico-mamey

in Philippines: chico-mamey

in Vietnam: tru'ng g

Pouzolzia Gaudich. Urticaceae

After the French botanist Pierre Marie Casimir de Pouzol (Pouzols), 1785–1858, author of *Flore du département du Gard*, etc. Montpellier, Paris 1862 and *Catalogue des plantes qui croissent naturellement dans le Gard*. Nîmes [Nîmes] 1842. See *Genera Plantarum* 400. 1789, Charles Gaudichaud-Beaupré (1789–1854), *Voyage autour du Monde ... sur ... l'Uranie et la Physicienne, pendant ... 1817–1820*. [Botany of the Voyage.] Paris 1826 [–1830], *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 2: 311. 1851, *Annales des Sciences Naturelles; Botanique*, série 4 1: 203. 1854 and *Mededeelingen van's Rijks-Herbarium* 27: 77. 1915, Ethelyn Maria Tucker, *Catalogue of*

the library of the Arnold Arboretum of Harvard University. Cambridge, Mass. 1917–1933, *Fieldiana, Bot.* 24(3): 396–430. 1952, *Ann. Missouri Bot. Gard.* 47(2): 179–198. 1960, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 105. 1965, I.C. Hedge and J.M. Lamond, *Index of collectors in the Edinburgh herbarium*. Edinburgh 1970, *Opera Bot.* 129: 5–103. 1996.

***Pouzolzia auriculata* Wight**

India.

See Wight, Robert (1796–1872), *Icones plantarum Indiae Orientalis ...* Madras, 1838–1853

(Root paste applied on fresh wounds; root juice administered orally for muscular pain.)

in India: kallari vetti var, mukruti, vippiri

***Pouzolzia bennettiana* Wight**

India. Herb, fodder for goats

See Wight, Robert (1796–1872), *Icones plantarum Indiae Orientalis ...* Madras, 1838–1853

(Plant ground along with crabs and eggs used for cuts and fractures.)

in India: narali kola, sera thandan

***Pouzolzia denudata* De Wild. & Th. Dur.** (*Pouzolzia andongensis* Hiern; *Pouzolzia batesii* Rendle; *Pouzolzia guineensis* auct.)

Uganda.

See *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S.M. l'Uranie et la Physicienne ... Botanique* 503. 1830 and *Bulletin de la Société Botanique de Belgique* 38: 54. 1900

(Antibacterial, antimicrobial.)

***Pouzolzia frondosa* Kuntze**

India.

See *Revis. Gen. Pl.* 630. 1891

(Roots ground and made into a paste plastered on a fracture.)

***Pouzolzia guineensis* Benth.** (*Parietaria guineensis* G. Don)

Guinea. Woody herb, subshrub, erect, spreading, leafy, woody below, viscid, yellow pubescent clustered flowers, sticky coiled fruits, leaves as a vegetable

See *Niger Flora* 518. 1849

(Whole plant decoction as an aphrodisiac. Leafy shoots juice as an enema for dysentery. Leaves vulnerary.)

in Yoruba: aboloko pinran, eemowere

***Pouzolzia mixta* Solms** (*Pouzolzia hypoleuca* Wedd.)

Malawi, Tanzania. Small spreading tree or shrub to shrublet, succulent, branching, scrambling, leaning, leaves white

woolly beneath, very small stalkless flowers in dense axillary clusters beside new leaves or in axils of fallen leaves, green sepals, a source of bee forage, tender leaves as a vegetable, wooded grassland, along edges of riverine forest

See *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1864: 1. 1864

(Antibacterial, antimicrobial. Root, stems and leaves for diarrhea, dysentery. Adventitious roots crushed and the jelly-like liquid obtained used to treat burns. The hairs on the leaves cause itching. Veterinary medicine, anthelmintic, antibacterial and cytotoxic.)

in English: soap nettle

in Malawi: thing, tingo

in Southern Africa: seepnetel, wildebraam, isikukuku; uDekane (Zulu); nthadzwa (Tsonga); muthanzwa, mur-ovhadembe (Venda); muNanzwa (Shona)

in Tanzania: mkaafuu, mtwaki

Pouzolzia parasitica (Forssk.) Schweinf. (*Boehmeria procridioides* (Wedd.) Blume; *Margarocarpus procridioides* Wedd.; *Pouzolzia phenacoides* Killip; *Pouzolzia procridioides* (Wedd.) Wedd.; *Pouzolzia procridioides* var. *hirsuta* Wedd.; *Urtica muralis* Vahl, nom. illeg. superfl.; *Urtica parasitica* Forssk.)

Central Africa, Tanzania. Straggling woody herb, leaning, trailing, petals yellow-green, forest edge, along seasonal river, bushland

See *Species Plantarum* 2: 983–985. 1753, *Enumeratio Systematica Plantarum* 9, 31. 1760, *Flora Aegyptiaco-Arabica* 160. 1775, *Symbolae Botanicae, ...* 1: 77. 1790, *Enumeratio Plantarum ...* 1: 22, 212. 1805, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 503. 1830, *Annales des Sciences Naturelles; Botanique, série* 4 1: 203–204. 1854, *Archives du Muséum d'Histoire Naturelle* 9(1–2): 412–413. 1856, *Museum Botanicum* 2(13): 204. 1857, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 231. 1869, *Bulletin de l'Herbier Boissier* 4(appendix 2): 145. 1896 and *Journal of the Washington Academy of Sciences* 15(13): 299. 1925, *Publications of the Field Museum of Natural History, Botanical Series* 13(2/2): 364. 1937, *Opera Botanica* 129: 5–103. 1996

(Veterinary medicine, anthelmintic, antibacterial, insecticide.)

in Tanzania: lushori wa kiume

Pouzolzia sanguinea (Blume) Merr. var. *sanguinea* (*Boehmeria nepalensis* Wedd.; *Boehmeria viminea* Blume; *Pouzolzia ovalis* Miq.; *Pouzolzia sanguinea* var. *nepalensis* (Wedd.) Hara; *Pouzolzia viminea* (Blume) Wedd.; *Pouzolzia viminea* Wedd., nom. illeg. superfl.; *Urtica sanguinea* Blume)

India, China, Nepal. Subshrub, semi-woody, small pale green white flowers in dense axillary clusters, ovoid achenes, leaves and shoots used as vegetable, along streams and marshes

See *Species Plantarum* 2: 983–985. 1753, *Enumeratio Systematica Plantarum* 9, 31. 1760, *Bijdragen tot de flora van Nederlandsch Indië* 501. 1826, *Museum Botanicum* 2: 202. 1851, *Archives du Muséum d'Histoire Naturelle* 9(1–2): 383. 1856, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 228. 1869, *FBI* 5: 581. 1888 and *Journal of the Straits Branch of the Royal Asiatic Society* 84(Spec. No.): 233. 1921, *Flora of Eastern Himalaya* 3: 28. 1975, *Cytologia* 44: 799–808. 1979

(Young twigs ground to paste and applied to wounds. Leaves stomachic. Roots infusion used in hemorrhage; paste of roots applied to treat boils.)

in China: hong wu shui ge (yuan bian zhong)

in India: mosiilo, supsepwatong, ut-kra

in Nepal: lipe

(Used in Sidha. Stem juice used for *aganyo*, a type of eczema; stem bark extract to cure ringworm and boils, skin diseases, itches, to reduce fever; bark juice applied to boils. Leaves diuretic, aromatic, given internally and applied externally in dropsy; leaves boiled in water and a bath taken in case of body allergy; leaves used to repel lice of hens, bedbugs. Veterinary medicine, bark extract of *Alangium salviifolium* with dried leaves of *Hygrophila auriculata*, leaves of *Premna latifolia*, dry chillies and salt pounded and fermented and given orally in edema.)

in English: broad-leaf premna

in China: da ye dou fu chai

in India: aganyo, aggibatthu, agnimantha, agnium, akond, angkelauk-araung, bakar, bakaru, baker, bhankahar, bharkhar, bukar, celumalaron, chedi munnai, dieng lamarawai, dieng soh phandkhar, dukhemi, dukhemibol, erumaimunnai, erumunnai, erumunnaimaram, gaimali gunarua, gainali, gandhi sinduar, gejeru, gin, gin bhankar, gohara, gonderi, gunaru, gunarua, ilatatavikam, ilatatavikamaram, kalakamitanti, karanattuppuntu, karunaimunnai, karunaimunnaimaram, konda manga, kondamanga, minni, munnai, navuru, nelli, nelli chettu, nelli kooru, pachumallai, pedda nelli kura, peddannallakura, peddannellakura, peddannelli, peddannellikoora, peddanellikura, phla-phla, pinnamelli, takli, tuthekmi, upongtha, vacukintan, valarvatimaran, yuntaranayukantan

in Nepal: setogeeneri

Premna mucronata Roxb. (*Premna latifolia* Roxb. var. *mucronata* Clarke)

India. Tree, ovate cuneate leaves, greenish white flowers in terminal corymbose panicles, globose purple fruits, bark eaten fresh or cooked in time of scarcity, sometimes as a synonym of *Premna mollissima*

See *Mantissa Plantarum* 154, 252. 1771, *Hort. Bengal.* 46, 95. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 76. 1832, *FBI* 4: 578. 1885 and *Proceedings of the Indian Science Congress Association* 72(3-VI): 41. 1985

(Used in Ayurveda. Stem juice used for eczema; stem bark extract to cure ringworm and boils. Leaves boiled in water and bath taken in case of body allergy.)

in English: broad-leaf premna

in India: aganyo, agnimantha, agnium, akond, bakar, baker, bhankahar, bukar, gin, gin bhankar, gohara, gonderi, nakapher-tum, upongtha

Premna nauseosa Blanco (*Gumira nauseosa* (Blanco) Kuntze; *Gumira nauseosa* Kuntze; *Premna leucostoma* Naves ex Fern.-Vill.; *Premna leucostoma* Miq.)

Philippines, Malesia.

See *Fl. Filip.* [F.M. Blanco] 489. 1837, *Fl. Filip.*, ed. 3, 4(13A): 159. 1880, *Revisio Generum Plantarum* 2: 508. 1891

(Leaves for stomach troubles.)

in Philippines: agrau, alagau-gubat, ananghit, malamulauin, mulauin-aso

Premna odorata Blanco (*Gumira odorata* Kuntze; *Gumira odorata* (Blanco) Kuntze; *Gumira vestita* (Schauer) Kuntze; *Gumira vestita* Kuntze; *Premna cumingiana* var. *pierreana* (Dop) P.H. Hô, nom. inval.; *Premna curranii* H.J. Lam; *Premna flavida* Miq.; *Premna goeringii* Turcz.; *Premna odorata* f. *crenulata* Koord. & Valetton ex Moldenke; *Premna odorata* var. *detergibilis* (C.B. Clarke) Moldenke; *Premna odorata* var. *pierreana* (Dop) Moldenke, nom. inval.; *Premna tomentosa* Willd. var. *detergibilis* C.B. Clarke; *Premna tomentosa* var. *pierreana* Dop; *Premna vestita* Schauer)

Philippines, Taiwan.

See *Sp. Pl.* 3: 314. 1800, *Flora de Filipinas* 488. 1837, *Prodr.* 11: 631. 1847, *Fl. Ned. Ind., Eerste Bijv.*: 570. 1860[1861], *Bull. Soc. Imp. Naturalistes Moscou* 34(2): 216. 1863, *Fl. Brit. India* 4: 576. 1885, *Revisio Generum Plantarum* 2: 508. 1891 and *The Verbenaceae of the Malayan Archipelago* 116. 1919, *Fl. Indo-Chine* 4: 808. 1935, *Phytologia* 21: 418–419. 1971

(Sudorific, analgesic, pectoral, carminative, a decoction of roots, leaves, flowers and fruits. Plant a remedy for headache.)

in China: mao yu xiu mu

in Philippines: adgau, adiyoy, alagau, argau, atinge, lagan, lassi, tangle

Premna puberula Pampan. var. ***puberula*** (*Premna martinii* H. Léveillé; *Premna subcordata* Nakai)

China.

See *Mantissa Plantarum* 154, 252. 1771 and *Nuovo Giornale Botanico Italiano*, n.s. 17(4): 701–702. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 10(260–262): 440. 1912, *Botanical Magazine* 40(477): 487. 1926, *Fl. Yunnan* 1: 422. 1977

(Stem bark juice in mouth blisters.)

in English: puberulent premna

in China: hu xiu chai

Premna pyramidata Wallich ex Schauer (*Gumira pyramidata* (Wall. ex Schauer) Kuntze; *Premna pyramidata* Wallich)

India. Tree, leaves opposite with trinerved base

See *A Numerical List of Dried Specimens* n. 1779. 1828, *Prodr.* 11: 633–634. 1847, *Revisio Generum Plantarum* 2: 508. 1891

(For worms in children, chew the tender shoots with leaves of *Caesalpinia bonduc* and *Cyathula prostrata* and spray upon the abdomen.)

in English: pyramidal premna

in China: ta xu dou fu chai

Malay names: bebuas, piat

Premna racemosa Wallich ex Schauer (*Gumira corymbosa* (Wall. ex Schauer) Kuntze; *Premna racemosa* var. *sikkimensis* Moldenke; *Surfacea racemosa* (Wall. ex Schauer) Moldenke; *Surfacea racemosa* var. *sikkimensis* (Moldenke) Moldenke)

China, Himalaya. Tree, white flowers

See *Prodr.* 11: 633. 1847, *Revisio Generum Plantarum* 2: 508. 1891 and *Phytologia* 5: 18. 1954, *Phytologia* 46: 60. 1980

(Dried leaf powder applied to remove lice from cattle and poultry birds.)

in English: racemose premna

in China: zong xu dou fu chai

in India: ginari

Premna serratifolia L. (*Cornutia corymbosa* Burm. f.; *Gumira corymbosa* (Burm. f.) Kuntze; *Premna alstonii* Moldenke; *Premna barbata* Voigt; *Premna corymbosa* (Burm. f.) Rottler & Willd.; *Premna corymbosa* (Burm. f.) Merr., nom. illeg., non *Premna corymbosa* (Burm. f.) Rottler & Willd.; *Premna corymbosa* var. *obtusifolia* (R. Br.) H.R. Fletcher *Premna hircina* Wall.; *Premna integrifolia* Willd.; *Premna integrifolia* L.; *Premna integrifolia* var. *obtusifolia* (R. Br.) C. P'ei; *Premna obtusifolia* R. Br.; *Premna obtusifolia* fo. *serratifolia* (L.) Moldenke; *Premna obtusifolia* var. *serratifolia* (L.) Moldenke; *Premna serratifolia* Blanco)

Tropical Asia and E. Africa. Tree or shrub, inflorescence in terminal corymb, white flowers in terminal cymes, blue-black ripe berries, fruits eaten mixed with rice, *Premna hainanensis* Chun & How allied to *Premna serratifolia*

See *Species Plantarum* 2: 628. 1753, *Flora Indica ... nec non Prodrum Florae Capensis* 132, pl. 41, f. 1. 1768, *Mantissa Plantarum* 154, 252, 253. 1771, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 187–188. 1803, *Prodrum Florae Novae Hollandiae* 512. 1810, *Hortus Suburbanus Calcuttensis* 468. 1845, *Flora de Filipinas*, ed. 2 [F.M. Blanco] 342. 1845, *Revisio Generum Plantarum* 2: 507. 1891 and *Memoirs of the Science Society of China* 1(3): 75. 1932, *Notes from the Royal Botanic Garden, Edinburgh* 19: 178. 1936, *Phytologia* 28(4): 403. 1974, *Phytologia* 29(1): 101. 1974, *Phytologia* 36(5): 438. 1977

(Used in Ayurveda and Sidha. Whole plant for rheumatism and neuralgia, headache. Raw fruits or decoction for treatment of cough. Leaves hypoglycemic; leaf paste used externally for body pain; leaves juice stomachic; leaves rubbed with pepper and given in colds and fevers; leaf decoction given in fever and to treat cough and headache. Root decoction stomachic, tonic, for liver complaints, cardiac troubles, rheumatism, headache, neuralgia; contact therapy, root tied to the waist to cure rheumatism.)

in English: headache tree

in French: arbre de la migraine

in China: san xu xiu huang jing

in India: ageta, agibath, agnimanth, agnimantha, agnimanthan (agni, fire), arni, bhut-bhiravi, chawro, eegi gida, ganiari, ganioli, gejeri, genderi, kulamani, kulmunnai, monkun, muney-kerai, munna, munnai, munnay, naaruva, nagoora, nagum, nagura, nalla pinna, narara, paamanthi, padmaka, pamanti, pasumunnai, pedda naaruva, pedda narava, pedda narva, peddanarava, peddanaruva, peddanarva, poddanaruva, pomanti, seeiththalai, takkila, tamonja, upatecikai, upatecikamaram

in Japan: Taiwan-no-kusagi (= Taiwan *Clerodendrum*)

in Papua New Guinea: alowalo, kalokalo, karuwana, kiyar, niggrp, ninggrp, ningriek, tisibo

in Vietnam: cach nui, vong cach

Premna steppicola Handel-Mazzetti

China.

See *Mantissa Plantarum* 154, 252. 1771 and *Symbolae Sinicae* 7(4): 902. 1936

(For skin diseases.)

in English: steppe-living premna

in China: cao po dou fu chai

Premna sunyiensis C. P'ei

China.

See *Mantissa Plantarum* 154, 252. 1771 and *Memoirs of the Science Society of China* 1(3): 84. 1932

(Astringent, stomachic.)

in China: tang shi jiao

Premna szemaoensis P'ei

China.

See *Mantissa Plantarum* 154, 252. 1771 and *Memoirs of the Science Society of China* 1(3): 76. 1932

(Wound healing, stomachic.)

in China: si mao dou fu chai

Premna tahitensis Schauer (*Gumira taitensis* (Schauer) Kuntze; *Premna taitensis* Schauer)

Pacific. Shrub or small tree, leaves opposite, small flowers in terminal panicles, fruit globose

See *Mantissa Plantarum* 154, 252. 1771, *Revisio Generum Plantarum* 1: 508. 1891

(Bark used in tonics.)

in Tonga: volovalo

Premna tomentosa Willd. (*Premna tomentosa* Miq. ex C.B. Clarke; *Premna tomentosa* Kurz)

Burma, Thailand. Ripe fruits eaten

See *Mantissa Plantarum* 154, 252. 1771, *Systema Plantarum* 3: 314. 1800, *Forest Flora of British Burma* 2: 260. 1877 and *Proceedings of the Indian Academy of Sciences. Plant Sciences* 98: 139–148. 1988

(Used in Sidha. Whole plant pounded and rubbed on caterpillar stings. Leaves diuretic, a decoction as a postpartum remedy; leaf juice taken for biliousness and abdominal pains; crushed leaves applied locally on scabies, skin rashes and itching. Oil from the roots a remedy for stomach disorders. Veterinary medicine, bark decoction given to cattle for indigestion.)

in English: bastard teak

in India: bije, chambara, cummotakam, cummotakamaram, eeje mara, eji mara, eesha, hije, ichu, icu, ije, iji, ilancimotakamaram, ishe, iti, kadara, kampu gummudu, kalarcevakam, kalarcevakamaram, kampugumadu, kampugummudu, kampugumudu, kattutekka, kattuthekku, kirusnappalai, kokkiti, kolakatitek, kolakatiteku, kolakattithekku, kolaketta, kollikattutekka, kolikkattait tekku, kolukkattai-thekku, kolukkattaittekku, kozhukkattathekku, madak, madike, malaihaekku, malaihakku, masathekku, motakam, motakattekku, motakattekkumaram, mowa, munnai, munnu, naarale, naarike, naaruva, nagal, nagu, naguru, naguru chettu, naguruchettu, naithekku, namuru, naooroo, naoru, naragodu, narale, narana, narava, naravalu, narave, narele, naruva, naruvaalu, naruvulu, narva, narvu, natekka, naura, naurasa, naurava, nauru, navaru, navooru, navuru, nayteku, neravu, pidan-gunari, pidangunaari, pinari, pitankunari, pite, podaganari, potakanari, potakanarimaram, putakanari, sona chal, suundi, tavadaka, tavadike, tavadke, thavadike, vakkanai, valuvi, valuvittekku

in Malaya: kapiat, piat, sarang burung

Premna urticifolia Rehder

China.

See *Mantissa Plantarum* 154, 252. 1771 and *Plantae Wilsonianae* 3(3): 458. 1917

(For skin diseases.)

in China: ma ye dou fu chai

Prenanthes L. Asteraceae

Greek *prenes* 'prone, prostrate, with face downwards' and *anthos* 'flower', referring to the flower-heads, see *Species Plantarum* 2: 797–798. 1753.

Prenanthes brunoniana Wall. ex DC. (*Prenanthes brunoniana* Wall.)

Himalaya.

See *A Numerical List* of dried specimens of plants in the East India Company's Museum: collected under the superintendence of Dr. Wallich of the Company's botanic garden at Calcutta. n. 3278. 1828–1849 and *Bull. Misc. Info. Kew* 159, 312–314. 1925, *Bot. & Hist. Hort. Malab.* 90–91, 102–105. 1980

(Flower and leaf paste taken to cure fever.)

in Nepal: chakatik

Prestonia R. Br. Apocynaceae

For Charles Preston, 1660–1711, British physician, M.D. Edinburgh 1694, professor of botany, sent plants to H. Sloane; see Plukenet, Leonard (1642–1706), *Almagesti botanici mantissa*. 12. Londini 1700, *On the Asclepiadeae* 58. 1810, *Transactions of the Horticultural Society of London* 6: 70–71. 1825[1826], *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 486–487. 1844, [John Ray], *The Correspondence of J. Ray*. Edited by E. Lankester. 380–388. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Darwiniana* 47(1): 140–184. 2009.

Prestonia amazonica (Benth. ex Müll.Arg.) J.F. Macbr. (*Haemadictyon amazonicum* Benth. ex Müll.Arg.; *Prestonia amazonica* J.F. Macbr.; *Prestonia amazonica* (Benth.) J.F. Macbr.)

Brazil.

See *Flora Brasiliensis* 6(1): 166. 1860 and *Field Museum of Natural History, Botanical Series* 11(1): 34. 1931, *J. Am. Chem. Soc.* 79: 5735–5736. 1957

(Hallucinogenic.)

in Brazil: yajé

Primula L. Primulaceae

Primula veris, a Medieval name for the daisy; Latin *primus*, *primulus* 'first', Akkadian *pir'u*, *per'u* 'offspring';

see *Species Plantarum* 1: 142–145. 1753, *The British Herbal* 68. 1756, *Botanisches Wörterbuch* 2: 240. 1797, *Prodromus Florae Novae Hollandiae* 532. 1810, *Aug. Pyrami de Candolle Botanicon Gallicum* 1: 384. 1828, *Edwards's Botanical Register* 32: pl. 31. 1846, *Bulletin de la Société Botanique de France* 32: 272. 1855, *Bulletin de la Société Botanique de France* 45: 178–179. 1898 and *Journal of the Royal Horticultural Society* 39: 178. 1913, *Flora URSS* 18: 143. 1952, *Aarboek for Universitetet i Bergen, Matematisk-Naturvitenskapelig Ser.* 11: 34. 1961, B. Migliorini, *Parole d'autore (onomaturgia)*. Firenze 1975, *Novon* 2(3): 236. 1992, *Phytologia* 79(2): 71. 1995 [1996], Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 505–506. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2184–2185. 2001, *Brittonia* 59(1): 81. 2007.

Primula buryana Balf. f.

China, India.

See *Bulletin of Miscellaneous Information Kew* 1922(4): 151–152. 1922

(Veterinary medicine, powdered roots for killing leeches.)

in China: zhu feng chui hua bao chun

in India: nergus phool

Primula denticulata Sm. (*Primula denticulata* Wight)

China. Small to robust, finely hairy herb, short stout rhizome, long thick roots, broadly ovate bud scales, purplish flowers in compact heads at the ends of flowering scapes, oblong capsules included in the calyx, flowers eaten in salad

See *Exotic Botany* 2: 109. 1806, *Icones Plantarum Indiae Orientalis* 6, pl. 2000. 1853

(Poisonous to cattle. Plant used externally as anodyne. Leaves, roots and flowers for cough and cold. Powder of roots used for killing leeches.)

in China: qiu hua bao chun

in India: bishjopra, chailaduer

Primula inayatii Duthie

India. Scapigerous herb, scapes with 3–4 flowers, persistent campanulate sepals, dark brown winged seeds

See *Annals of the Royal Botanic Garden. Calcutta*. 9(1): 49, t. 61. 1901

(Leaf juice against ringworms.)

Primula involucrata Wall. ex Duby (*Primula involucrata* Wall.; *Primula involucrata* Sw. ex Duby)

China, India.

See *Numer. List* [Wallich] n. 7107. 1832, *Bot. Mag.* t. 2842. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 42. 1844

(Poisonous to cattle. May cause dermatitis. Plant used externally as anodyne.)

in China: hua bao bao chun

Primula macrophylla D. Don (*Primula nivalis* Pall. var. *macrophylla* (D. Don) Pax)

India, Nepal.

See *Prodromus Florae Nepalensis* 80. 1825

(Leaves and rootstock extract taken to treat cold and cough.)

in China: da ye bao chun

in India: kangla, kelche-karpa, nakla, sulumentok

Primula minutissima Jacquem. ex Duby (*Primula heydeii* Watt)

China, Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 42. 1844, *Journal of the Linnean Society, Botany* 20(123–124): 5, t. 4C. 1882 [1884 publ. 18 Dec 1882]

(Roots used as emetic.)

in China: gao feng xiao bao chun

Primula obconica Hance

China. Perennial herb, leaves basal with glandular hairs, terminal funnel-shaped flowers, fruit a capsule

See *Species Plantarum* 1: 142–144. 1753, *Journal of Botany, British and Foreign* 18(212): 234. 1880 and *Feddes Repertorium* 99: 113–132. 1988

(Poisonous parts the glandular hairs on leaves and stems. Sensitized humans develop dermatitis from exposure to the allergen contained in hairs on leaves and other plant parts. Pollen also can cause dermatitis and skin irritation. Some other species of the genus *Primula* can cause dermatitis as well. Primin, a quinone, is the allergen in primula.)

in English: German primrose, poison primrose, primrose

in China: e bao chun

Primula ramzanae W.W. Sm. & H.R. Fletcher

India, Nepal. Perennial herb, corolla oblong or cylindrical, campanulate calyx

See *Journ. Roy. Hort. Soc., Lond.* lxxix. 358. 1954

(A repellent of lice and other domestic insects.)

Primula rosea Royle (*Primula rosea* Hort. & Pax)

India, Himalaya.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 311, t. 75, f. 1. 1836 and *Pflanzenr.* (Engler) Primul. 56. 1905

(Stimulant, tonic.)

Prinsepia Royle Rosaceae

For the English archeologist James Prinsep, 1799–1840, traveller, Secretary of the Asiatic Society of Bengal, editor of the *Journal of the Asiatic Society*, his works include *An Epitome of Ancient History*. [Calcutta School Book Society; the English compiled by Prinsep and others.] Calcutta 1830, *Benares Illustrated*, in a series of drawings by J. Prinsep. Baptist Mission Press, Calcutta 1831, *Essays on Indian Antiquities*, etc. Edited by E. Thomas. [With a memoir of J. Prinsep by H.T. Prinsep.] London 1858 and *Modification of the Sanskrit Alphabet from 543 B.C. to 1200 A.D.* London 1850; see *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 206. 1835, *Hooker's Icones Plantarum* 16(2): t. 1526. 1886, *Flore Forestière de la Cochinchine* t. 260. 1892 and *Plantae Wilsonianae* 2(2): 344–345. 1915, *Taxon* 31(3): 561. 1982, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 772. 1993.

Prinsepia utilis Royle (*Prinsepia utilis* Royle ex Hook.)

China, Himalaya. Shrub, deciduous, arching, armed, fleshy fruits with persistent calyx, edible oil and fruits

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 206, pl. 38, f. 1. 1835 and *Silvae Geneticae* 22: 188–190. 1973

(Oil from the plant rubbed on the body to relieve rheumatic pains, joint pain; seed oil applied on forehead to subdue cough and cold; oil taken to avoid giddy feelings, giddiness. Root decoction used to check stomach disorders; root bark to check stomach disorders. Fruit used as insect repellent. Magic, ritual, ceremonial, the branches said to be effective in doing away with evil spirits, to drive away the ghosts; flowers and leaves used in worshipping Lord Shiva.)

in China: bian he mu

in India: arund, bekala, bekhli, bekhra, bekkli, bekkra, bhainkal, bhainkuli, bhek, bhekal, bhekala, bhekar, bhekkli, bhekoi, bheku, bhenkuli, bhigal, breklin, cherara, dhatelu, dhatila, dieng-sia-soh-khar, garandu, gurinda, jhataloo, jhitalu, jhatela, jhatelu, jintoi, jioti, karanga, kharangura, krun-gora, mhat, phulwara, sohmon-rit, tatua, topthejmu, totua

in Nepal: dhatelo, tisyia

Prioria Grisebach Fabaceae (Caesalpiniaaceae, Detarieae)

For the British (b. Wilts) botanist Richard Chandler Alexander Prior (*olim* Alexander, in 1859 took name Prior), 1809–1902 (d. London), physician, traveller (South Africa, Canada, USA, Jamaica, West Indies), plant collector, Fellow of the Linnean Society 1851; see G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 175. London 1904, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18(2): 487–559. 1937, *Ann. Missouri Bot.*

Gard. 38(1): 1–94. 1951, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 228–229. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 112. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 318. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 467. 1973, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 287–288. A.A. Balkema Cape Town 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 565. 1994, *Libro Rojo Pl. Colombia* 4(1): 1–232. 2007.

Prioria copaifera Griseb.

Jamaica, Nicaragua. Perennial non-climbing tree

See *Flora of the British West Indian Islands* 215. 1860

(Resin used to treat venereal ulcers, as well as mange in animals.)

Prismatomeris Thwaites Rubiaceae

Greek *prisma*, *prismatos* ‘a prism’ and *meris* ‘a part, portion’, referring to the sharply cut petals, see *Hooker’s Journal of Botany and Kew Garden Miscellany* 8: 268, t. 7 A. 1856.

Prismatomeris albidiflora Thwaites

Sri Lanka.

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 8: 269. 1856

(Leaves poulticed for skin diseases. Arrow or dart poison.)

Malayan names: kayu sepedili, mundess

Prismatomeris tetrandra (Roxb.) K. Schum. (*Coffea tetrandra* Roxb.)

Sri Lanka, India. Tree or small tree, white flowers

See *Species Plantarum* 1: 172. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 193. 1824, *Nat. Pflanzenfam.* 4(4): 138. 1891

(Bark powder or ashes of leaves mixed with mustard oil applied to cuts and wounds. Leaf juice in stomachache.)

Pristimera Miers Celastraceae

Greek *prizo*, *prio* ‘saw, serrated’ and *meris*, *meros* ‘part, portion’, referring to the parts of the flower, see *Transactions of the Linnean Society of London* 28: 330, 360, 364. 1872, *Die Natürlichen Pflanzenfamilien* 3(5): 228. 1893 and *Brittonia* 3(3): 341–555. 1940, *Ann. Missouri Bot. Gard.* 52(1): 81–98. 1965.

Pristimera indica (Willd.) A.C. Sm. (*Hippocratea indica* Willd.; *Reissantia indica* (Willd.) N. Hallé)

China.

See *Species Plantarum*. Editio Quarta 1(1): 193. 1797 and *American Journal of Botany* 28: 440. 1941, *Bull. Mus. Hist. Nat. Par.*, Ser. 2, 30: 466. 1958, *Mémoires de l’Institut Français d’Afrique Noire* 64: 85. 1962

(Root decoction given to encourage the return of the menses.)

in China: bian shuo teng

Malay names: akar beting, akar bintang, serapat akar

Priva Adans. Verbenaceae

Meaning not clear, perhaps derived from the Latin *privus*, *a, um* ‘without, individual, single, one’s own, deprived of’, or from an Indian vernacular name, see *Familles des Plantes* (Adanson) 2: 505. 1763, *Synopsis Plantarum* 2: 139. 1806 and *Fieldiana, Bot.* 24(9/1–2): 167–236. 1970.

Priva cordifolia (Linn.f.) Druce (*Buchnera cordifolia* Linn. f.; *Priva abyssinica* Jaub. & Spach; *Priva cordifolia* Druce; *Priva cordifolia* (L.) Druce; *Priva leptostachya* Juss.; *Streptium asperum* Roxb.; *Tortula aspera* (Roxb.) Roxb. ex Willd.; *Tortula aspera* Roxb. ex Willd.; *Tortula chisosa* Magill; *Tortula chisosa* Magill, C. Delgadillo & L.R. Stark)

Indian to Myanmar.

See *Familles des Plantes* 2: 505. 1763, *Pl. Coromandel* ii. 25. t. 146. 1798, *Sp. Pl.*, ed. 4 [Willdenow] 3(1): 359. 1800, *Ann. Mus. Par.* vii. (1806) 70. 1806 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916: 641. 1917, *Ann. Cat. Vas. Pl. W. Pakistan & Kash.* 607. 1972, *Ann. Missouri Bot. Gard.* 70(1): 200. 1983

(Seed used for wounds, sores and skin diseases. Leaves for ophthalmia.)

in South Africa: isiNama (Zulu)

Priva curtisiae Kobuski

Tropical Africa.

See *Annals of the Missouri Botanical Garden* 13: 7, t. 2. 1926

(Leaves for conjunctivitis, skin diseases.)

Prochnyanthes S. Watson

Asparagaceae (Agavaceae)

Probably from the Greek *prochoos*, *prochon* ‘a jug, ewer, vase’ and *anthos* ‘flower’, referring to the shape of the flower, see *Proc. Amer. Acad. Arts* 22: 457. 1887.

Prochnyanthes mexicana (Zucc.) Rose (*Agave bulliana* (Baker) Thiede & Eggl; *Bravoa bulliana* Baker; *Polianthes mexicana* Zucc.; *Prochnyanthes bulliana* (Baker) Baker; *Prochnyanthes viridescens* S. Watson)

See *Proc. Amer. Acad. Arts* 22: 457. 1887, *Bot. Mag.* 121: t. 7427. 1895 and *Contr. U. S. Natl. Herb.* 8(1): 14. 1903

(A remedy for snakebites, toothache. Veterinary medicine, a wash from the roots used as an insecticide upon animals.)

in Mexico: amole, apintli

Proiphys Herbert Alliaceae (Amaryllidaceae, Liliaceae)

Greek *pro* 'early' and *phyo* 'to grow, to bring forth', referring to the premature germination of the seed, see *App. [Bot. Reg.]* 42. 1821, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): lvi, 909. 1830 and *Taxon* 29(5–6): 601. 1980.

Proiphys amboinensis (L.) Herb. (*Amaryllis rotundifolia* Lam.; *Cearia amboinensis* (L.) Dumort.; *Crinum nervosum* Willd. ex Roxb., nom. illeg.; *Crinum nervosum* L'Hér.; *Eurycles alata* Sweet; *Eurycles amboinensis* (L.) Loudon; *Eurycles amboinensis* (L.) Lindl. ex Loudon; *Eurycles australasica* (Ker Gawl.) G. Don; *Eurycles australis* (Spreng.) Schult. & Schult.f., nom. illeg.; *Eurycles coronata* Sweet; *Eurycles javanica* M. Roem.; *Eurycles nervosa* G. Don ex Loudon; *Eurycles nuda* Sweet; *Eurycles rotundifolia* M. Roem.; *Eurycles sylvestris* Salisb. ex Schult. & Schult.f.; *Pancreatium amboinense* L.; *Pancreatium australasicum* Ker Gawl.; *Pancreatium australe* Spreng., nom. illeg.; *Pancreatium nervifolium* Salisb.; *Pancreatium ovatifolium* Stokes; *Stemonix nervosus* (L'Hér.) Raf.) (*Eurycles* Salisb. ex Schultes & Schultes f., from the Greek *eury*s 'large, broad' and *kleio* 'to close, to shut, to shut up', referring to the often imperfect cup, the tube of the flower is closed up by the broad corona; see Johann Jakob Roemer and Josef August Schultes, *Systema Vegetabilium*. 7(2): lvi, 909. 1830)

Thailand, Australia.

See *Sp. Pl.*: 291. 1753, *Fl. Ind.* 2: 135. 1824, *Hort. Brit.*: 117. 1830, *Syst. Veg.* 7(2): 909. 1830, *Fam. Nat. Syn. Monogr.* 4: 156–157. 1847

(Leaves chewed to cure swellings and to obtain relief from pains, rheumatism and aches. Bulbs emetic, cathartic. Magic, possession, sprinkle water with leaves about the house to ensure that a spirit will not haunt it.)

Malay name: sapenoh

in Papua New Guinea: puiquimuk

in Philippines: abud, dausum, katangal, katungal, osol, pana-bor, talaunur, tambal, tanual, tonuar

Prosartes D. Don Liliaceae (Asparagaceae, Convallariaceae)

Greek *prosartes* 'attached', see *Genera Plantarum* 48. 1789, *Proceedings of the Linnean Society of London* 1: 48. 1839 and *Contributions from the Gray Herbarium of Harvard University* 173: 11. 1951.

Prosartes hookeri Torr. (*Disporum hookeri* (Torr.) G. Nicholson; *Disporum hookeri* var. *oblongifolium* (S. Watson) Britton; *Disporum hookeri* var. *oreganum* (S. Watson) Q. Jones; *Disporum hookeri* var. *parvifolium* (S. Watson) Britton; *Disporum hookeri* var. *trachyandrum* (Torr.) Q. Jones; *Disporum oreganum* (S. Watson) Benth. & Hook. f. ex Howell; *Disporum oreganum* (S. Watson) W.T. Mill.; *Disporum parvifolium* (S. Watson) Britton; *Disporum trachyandrum* (Torr.) Britton; *Lethea oregana* (S. Watson) Farw.; *Prosartes hookeri* var. *oblongifolia* S. Watson; *Prosartes hookeri* var. *oregana* (S. Wats.) Kartesz; *Prosartes hookeri* var. *parvifolia* (S. Watson) Kartesz; *Prosartes hookeri* var. *trachyandra* (Torr.) Kartesz; *Prosartes oregana* S. Watson; *Prosartes parvifolia* S. Watson; *Prosartes trachyandra* Torr.)

North America.

See *Pacif. Railr. Rep. Parke, Bot.* 4(5): 144. 1857, *Proceedings of the American Academy of Arts and Sciences* 14: 271. 1879, *Geological Survey of California, Botany* 2: 179. 1880, *The Illustrated Dictionary of Gardening, ...* 1: 484. 1885, *Bulletin of the Torrey Botanical Club* 15(7): 188. 1888 and *Cyclopedia of American Horticulture* 1: 496. 1900, *A Flora of Northwest America* 6: 659. 1902, *Papers of the Michigan Academy of Science, Arts and Letters* 2: 20. 1922 (publ. 1923), *Contributions from the Gray Herbarium of Harvard University* 173: 32, 36. 1951

(Poison. Aphrodisiac.)

in English: drops of gold, fairy bells, wavy leaf soap plant

Prosartes lanuginosa (Michx.) D. Don (*Disporum lanuginosum* Britton; *Disporum lanuginosum* G. Nicholson; *Disporum lanuginosum* (Michx.) G. Nicholson; *Streptopus lanuginosus* Michx.; *Uvularia lanuginosa* (Michx.) Pers.)

North America.

See *Flora Boreali-Americana* 1: 201. 1803, *Synopsis Plantarum* 1: 360. 1805, *Proceedings of the Linnean Society of London* 1: 48. 1839, *The Illustrated Dictionary of Gardening, ...* 1: 485. 1885, *Bull. Torrey Bot. Club* xv. (1888) 188. 1888

(Analgesic, for internal pains.)

in English: yellow fairy bells

Prosartes trachycarpa S. Watson (*Disporum canadense* Shafer; *Disporum majus* (Hook.) Britton; *Disporum trachycarpum* (S. Watson) Benth. & Hook.f.; *Disporum trachycarpum* var. *subglabrum* Kelso; *Lethea trachycarpa* (S. Watson) Farw.; *Uvularia lanuginosa* var. *major* Hook.) (*Disporum* Salisb. ex Don, from the Greek *dis* 'twice' and *spora* 'seed', referring to the usually two-seeded fruits, there are two ovules in each chamber or locule of the ovary.)

Canada to New Mexico.

See *Trans. Hort. Soc. London* 1: 331. 1812, *Prodromus Florae Nepalensis* 50. 1825, *Fl. Bor.-Amer.* 2: 174. 1838, *Report of*

the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys. Vol. 5, Botany. Washington: Government Printing Office, 344–345. 1871, Genera Plantarum 3: 832. 1883, Bull. Torrey Bot. Club 15: 188. 1888 and Ann. Carnegie Mus. 1: 109. 1901, Pap. Michigan Acad. Sci. 2: 20. 1922 [1923], Rhodora 39: 150. 1937, Taxon 33: 351–354. 1984

(For kidney ailments. Aphrodisiac.)

in English: rough fruit fairybells, wartberry fairy bell

Prosopis L. Fabaceae (Mimosaceae, Mimoseae)

From the late Latin *prosopis*, *idis* and *prosopites*, *ae*, Greek *prosopis* and *prosopites* (perhaps from *prosopon* 'face'), ancient names for the burdock; see C. Linnaeus, *Mantissa Plantarum*. 10, 68. 1767, *Systema Naturae*. Ed. 12. 2: 282, 293. 1767 and *Darwiniana* 4(1): 57–128. 1940, *Darwiniana* 9(3–4): 315–347. 1951, *Journal of the Arnold Arboretum* 57(4): 450–525. 1976.

Prosopis africana (Guill. & Perr.) Taub. (*Coulteria africana* Guill. & Perr.; *Entada coulteria* Roberty; *Prosopis lanceolata* Benth.; *Prosopis oblonga* Benth.)

Tropical Africa, Cameroon, Sudan. Perennial non-climbing tree, yellow-dull red slash, a typical gland lies between pairs of pinnae and leaflets, fruits sausage-shaped

See *Systema Naturae*, ed. 12 2: 282, 293. 1767, *Nova Genera et Species Plantarum* (quarto ed.) 6: 328. 1824, *Flora Senegambiae Tentamen* 1: 256. 1830, *Journal of Botany*, being a second series of the Botanical Miscellany 4(31): 347–348. 1841, *Die Natürlichen Pflanzenfamilien* 3(3): 119. 1893 and *Economic Botany* 44(3): 382–390. 1990, *Australian Journal of Botany* 45: 879–891. 1997, *Ethnopharmacologia* 27: 12–30. 2001, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Biosystems Engineering* 95(2): 197–205. 2006, *World Journal of Agricultural Sciences* 5(1): 90–93. 2009

(Leaves sedative, antalgic, aphrodisiac, sedative, for anxiety, hysteria. Seeds decoction, cataplasm on throat for cold, cough, influenza. Antimicrobial, diaphoretic, vulnerary, leaves, bark, twigs and roots used to treat and relieve bronchitis, rheumatism, dermatitis, tooth decay, dysentery, asthenia, malaria and stomach troubles; cold decoction of twigs and leaves for piles. Boiled roots serve as poultice for sore throat, root decoction for toothache. Bark a dressing or lotion for wounds or cuts, dried bark pounded and applied to bleeding gums. Fish poison.)

in Benin: akakanyi, bènswurou, gajjndan, guésowourou, guinnou, kakacagni, kaké, kiryia, kohy, koun, shoba, soba

in Burkina: seinga

in Central African Republic: engere, mbandere, mbwangere, sele

in Guinea: gbelen, tchelem-tchelemadjé

in Mali: 'a'nu, gele, guele, gwele, kilè, kin, ngwele, nièbere, niebere, tidene, zamturi

in Niger: kiriya, kirya, kohy, zam-turi, zamtouri

in Nigeria: ayan, kiriya, kohi, kpaye, mbuci oro, okeye, san-chi lati, ubwa

in Senegal: celen-celenayi, koy, telentélélad

in Togo: balo

Prosopis alba Griseb. var. ***panta*** Griseb. (*Prosopis panta* (Griseb.) Hieron.)

South America.

See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 131. 1874, Grisebach, August Heinrich Rudolph (1814–1879), *Symbolae ad Floram Argentinam* 118. Göttingen, 1879, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 4: 284. 1881

(Leaves and fruits astringent, tonic, for eye diseases.)

in Argentina: algarrobo panta, impanta

Prosopis alpataco Phil. (*Prosopis alba* Griseb.; *Prosopis alba* fo. *fruticosa* (Hauman) Monticelli; *Prosopis atacamen-sis* Phil.; *Prosopis juliflora* (Sw.) (Leaves and fruits astringent, tonic, for eye diseases.)

in Argentina: algarrobo blanco

Prosopis cineraria (L.) Druce (*Adenantha aculeata* (Roxb.) W. Hunter; *Adenantha aculeata* Roxb.; *Mimosa cineraria* L.; *Prosopis cineraria* Druce; *Prosopis cineraria* J.F. Macbr.; *Prosopis cineraria* (L.) J.F. Macbr., nom. illeg., non *Prosopis cineraria* (L.) Druce; *Prosopis spicata* Burm. f.; *Prosopis spicigera* L.)

India. Perennial non-climbing tree, deciduous, spinescent, conical spines, yellow flowers in axillary spikes, foliage is much lopped for fodder, pods used for fodder and the sweetish pulp around the seeds is eaten green or dry, raw or cooked

See *Sp. Pl.* 1: 517. 1753, *Syst. Nat.*, ed. 10. 2: 1311. 1759, *Species Plantarum*, Editio Secunda 1: 516–523. 1762,

Systema Naturae, ed. 12 2: 282, 293. 1767, *Mantissa Plantarum* 1: 68. 1767, *Flora Indica ... nec non Prodrum Flora Capensis* (N.L. Burman) 102. 1768, *Asiat. Res.* 4: 405. 1795, *Asiat. Res.* 6: 66. 1799 and *Botanical Exchange Club and Society of the British Isles (Report)* 3: 422. 1914, *Fl. Pres. Madras* 1: 419. 1919, *Contributions from the Gray Herbarium of Harvard University* 59: 16. 1919, *Darwiniana* 4(1): 57–128. 1940, *Journal of the Arnold Arboretum* 57(4): 450–525. 1976, *Journal of Cytology and Genetics* 24: 179–183. 1989, *Regnum Veg.* 127: 79. 1993, *Australian Journal of Botany* 45: 879–891. 1997

(Used in Ayurveda and Sidha. Leaf paste applied on boils and blisters; leaf juice given as vermicide; leaves decoction as a wash for bone fracture. Stem bark a remedy for rheumatism. Powder of root bark in fever, rheumatism. Powder of ripe pods used for indigestion; powdered fruits given for loose motions in children. Pods and roots astringent, used in dysentery. Flowers mixed with sugar taken by pregnant women against miscarriage, to prevent abortion and against habitual abortion. Dried root paste mixed with sugar and then eaten by a pregnant woman for checking miscarriage. Veterinary medicine, roots ground with *Sesamum indicum* and leaves of *Leucas aspera* given in Babesiosis; leaf paste applied on boils, blisters, and also mouth ulcers in livestock. Sacred plant, used in religion and magico-religious beliefs, tree worshipped on the occasion of Dussera; falling or cutting of this tree is a taboo; according to Atri-samhita, no one should stay during the day time under the shade of the tree; ceremonial, ritual, ingredient of Patra *pooja* in different religious *pooja* ceremonies, in Ganesh-*pooja*; stem used in *havan* or *homa*, sacrifice, a religious ceremony performed in temples and in homes that involves worship through the use of a sacred fire; leaves are sacred.)

in India: banni, banni gida, banni mara, bhadra, chani, chaunkra, chonkar, duritadamani, havirgandha, ishana, ishani, ishta, jambi, jambu, jammi, jand, jhand, kabanni, kachariphala, kalisam, kananari, keshahantra, keshamathan, khar, khejari, khejda, khejdi, khejra, khejri, khijado, khijdo, kulisam, lakshmi, mangalya, medhya, oonjal, pap-anashini, papashamani, parambai, pavitra, perumbe, priyadarshini, priyadarsini, saktuphala, sami, samira, samudra, sangri, sankuphala, saundad, saundar, saunder, savandad, seemaimullu, semi, shaktuphali, shambaree, shamee, shami, shankari, shankaphalika, shanta, shastra mara, shemi, shiva, shivaphala, shive, shubhada, shubhadra, shubhakari, siva, sukhada, sumri, supatra, surabhi, tamali, tapanatanaya, tunga, usila maram, vanhigarbha, vanni, vidadhari, viravriksha, vunne mara

in Pakistan: jand, kandi

in Tibet: sa ma

Prosopis farcta (Banks & Sol.) Macbride (*Acacia stephaniana* Willd.; *Lagonychium farctum* (Banks & Solander) Bobrov; *Lagonychium stephanianum* M. Bieb.; *Mimosa farcta* Banks & Sol.; *Mimosa farcta* Sol. ex Russell; *Mimosa stephaniana*

M. Bieb.; *Prosopis aculeata* Koenig; *Prosopis farcta* (Sol. ex Russell) J.F. Macbr.; *Prosopis stephaniana* (Willd.) Spreng.; *Prosopis stephaniana* (M. Bieb.) Kunth ex Sprengel)

Middle East, India. Perennial non-climbing tree, young parts browsed by camels, goats and sheep, gall-affected pods yield a light yellow dye

See *Species Plantarum* 1: 516–523. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1*. 1754, *Systema Naturae*, ed. 12 2: 282, 293. 1767, *The Natural History of Aleppo* 2: 266. 1794, *Species Plantarum*. (Fruits for ophthalmic problems, antivenereal, eupeptic.)

in Argentina: algarrobo blanco

Prosopis pubescens Benth. (*Prosopis emoryi* Torr.; *Prosopis odorata* Torr. & Frem.; *Strombocarpa odorata* (Torr. & Frem.) A. Gray; *Strombocarpa pubescens* (Benth.) A. Gray)

North America, California. Perennial non-climbing tree

See *London Journal of Botany* 5: 82–83. 1846, *Smithsonian Contributions to Knowledge* 3(5): 60. 1852 and *J. Arnold Arbor.* 57(4): 450–525. 1976

(Inner bark to treat wounds.)

in English: Fremont screwbean, screwbean

in Spanish: tornillo

Prosopis ruscifolia Griseb.

Argentina. Perennial non-climbing tree

See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 130–131. 1874, *Pl. Lorentz.* 82–83. 1874 and *Darwiniana* 4(1): 57–128. 1940, *Darwiniana* 7(2): 240–321. 1946, *Mem. Inst. Oswaldo Cruz* 51: 417–461.

1953, *Darwiniana* 18(3–4): 437–452. 1974, *J. Arnold Arbor.* 56(4): 398–412. 1975, *J. Arnold Arbor.* 57(4): 450–525. 1976, *Darwiniana* 23(1): 3–35. 1981

(A decoction of leaves and branches abortive.)

in Paraguay: olkjá

Protea L. Proteaceae

After the marine demi-god Proteus, son of Poseidon or Neptune, capable of appearing in many different forms. See *Species Plantarum* 1: 94. 1753, *Genera Plantarum*. Ed. 5. 41. 1754, *Mantissa Plantarum*. 1: 187. (Oct.) 1767, *Mantissa Plantarum* 187, 194, 328. 1771, *Genera Plantarum* 78. 1789, *Transactions of the Linnean Society of London* 10: 50. 1810.

Protea caffra Meisn. (*Protea bolusii* Phill.; *Protea multibracteata* Phill.; *Protea rhodantha* Hook.f.; *Scolymocephalus caffra* (Meisn.) Kuntze)

South Africa. Shrub or small tree, rounded crown, many tiny single flowers clustered together in the flower head, flower heads borne singly or in clusters, outer bracts reddish to pink or cream, copious nectar

See *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 237. 1856, *Revisio Generum Plantarum* 2: 581. 1891 and *Kew Bulletin* 1910, 230–231. 1910

(Veterinary medicine, root bark decoction for diarrhea.)

in English: common sugarbush, highveld protea, Natal sugarbush

in Southern Africa: gewone suikerbos, suikerbos; isiQalababentaba, uHlinkihlane, isiQalaba (Zulu); isiQwane, isiQalaba, iNdlunge (Xhosa); sekila (South Sotho: Lesotho, Orange Free State, south east Transvaal); sengenge, mohlanko, mogalagala (North Sotho: north and north east Transvaal)

Protea gagedi Gmelin (*Protea abyssinica* Willd., nom. illeg.; *Protea chrysolepis* Engl. & Gilg.; *Protea trigona* Phill.; *Scolymocephalus abyssinicus* (Willd.) Kuntze) (the specific name after one of the common names for the tree in Ethiopia)

East Africa. Small tree or shrub, twisted, well-branched, grey bark, bracts yellow-green with white pubescence, flowers perianth white, fruit golden brown, often found in colonies, on mountain slopes, in *Brachystegia* woodland., on stony sites

See *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 225. 1791, *Species Plantarum*. Editio quarta 1: 522. 1798, *Revisio Generum Plantarum* 2: 581. 1891 and *Kunene-Sambesi-Expedition* 222, t. 95. 1903, *Bulletin of Miscellaneous Information Kew* 1910: 230. 1910

(Leaves burned, powdered, rubbed onto chest for fever. Veterinary medicine, bark and leaves extract applied for lice.)

in English: African white sugarbush, sugarbush

in East Africa: emungomani, etugnisth, mugoiduet

in Southern Africa: Afrikaanse witsuikerbos, groot suikerbos; sitsuru, sundhla, tshundha, muBanda, muBonda, chiBonja, chiDendere, muMonda, mondo, muNdendere, muOnda (Shona); isiqalaba (Ndebele: Central and southern Transvaal); tshizungu (Venda: Southpansberg, northern Transvaal)

in Tanzania: ihalangwa

in Uganda: lolac

Protea madiensis Oliv. (*Protea argyrophaea* Hutch.; *Protea elliottii* C.H. Wright; *Protea elliottii* var. *angustifolia* Keay)

Tropical Africa. Tree or shrub, low-spreading shrub, white flowers

See *Mantissa Plantarum* 187, 194, 328. 1771, *Transactions of the Linnean Society of London, Botany* 29: 143, t. 92. 1875

(Bark emetic, astringent; bark or leaves pounded for cough. Roots laxative, anthelmintic. Powdered stem for hysteria, psychosis, against bad spirits. Ashes of dried leaves for bronchitis. Ritual, magic, ceremonial, to avert bad spell, bad luck, magical charm. Veterinary medicine, roots laxative, anthelmintic, astringent, for dysentery, diarrhea.)

in Burundi: igihunger, igihungere

in Central African Republic: téyéli

in Congo: cishasha, igihungeli, ikibangwa, kishasha, umukubangwa

in Nigeria: halshen-tunkiya, halshensa (Hausa); dehinbolorun (Yoruba); okwo (Igbo)

in Rwanda: igihungeli, ikihungele

in Southern Africa: chiRapadzungu (Shona)

in Tanzania: msese, nteruki, umpapa

in Yoruba: dehinbolorun, dehinbolorun, dehinbolorun

Protea nitida Mill. (*Protea arborea* Houtt.; *Protea grandiflora* Thunb.; *Protea nitida* Kuntze)

South Africa.

See *Gard. Dict.*, ed. 8. n. 3. 1768, *Revis. Gen. Pl.* 2: 580. 1891

(Bark infusion for treating diarrhea.)

in English: wagon tree

in Southern Africa: blousuikerbos, bobbejaansuikerbos, brandhout, waboom, wagonboom; isAdlunge (Xhosa)

Protea repens (L.) L. (*Leucadendron repens* L.; *Protea mellifera* Thunb.; *Protea mellifera* Thunb. var. *albiflora* Andr.)

South Africa. Shrub

(Nectar in a syrup for chest complaints.)

in English: common sugarbush, honey-bearing protea, sugarbush

in South Africa: stroopbos, suikerbos, suikerbossie

Protea simplex Phillips (*Protea doddii* Phillips; *Protea flavanagii* Phillips; *Protea transvaalensis* Phillips)

South Africa.

See *Kew Bulletin* 1910, 232. 1910, *Kew Bulletin* 1911, 81–82. 1911

(Decorticated root and bark infusions used for dysentery, cholera and diarrhea. Veterinary medicine, root and bark infusions for diarrhea and dysentery.)

Protea welwitschii Engl. (*Leucadendron leucoblepharis* Hiern; *Leucadendron welwitschii* (Engl.) Hiern; *Protea abyssinica* Willd. var. *adolphi-fridericii* Engl.; *Protea abyssinica* var. *brevifolia* Engl.; *Protea congensis* Engl.; *Protea eickii* Engl.; *Protea goetzeana* Engl.; *Protea hirta* Klotzsch, nom. illeg., non L.; *Protea hirta* subsp. *glabrescens* Beard; *Protea kirkii* C.H. Wright; *Protea leucoblepharis* (Hiern) Baker; *Protea melliodora* Engl. & Gilg; *Protea myrsinifolia* Engl. & Gilg; *Protea obtusifolia* De Wild.; *Protea swynertonii* S. Beard; *Protea welwitschii* subsp. *glabrescens* (Beard) Beard; *Protea welwitschii* subsp. *goetzeana* (Engl.) Beard; *Protea welwitschii* subsp. *hirta* Beard; *Protea welwitschii* subsp. *melliodora* (Engl. & Gilg) Beard; *Protea welwitschii* subsp. *mocoensis* Beard; *Protea welwitschii* var. *goetzeana* (Engl.) Beard; *Protea welwitschii* var. *melliodora* (Engl. & Gilg) Beard)

Tropical Africa.

See *Mantissa Plantarum* 187, 194, 328. 1771, *Transactions of the Linnean Society of London* 10: 50. 1810, *Flora* 28: 76. 1845, *Über die Hochgebirgsflora des tropischen Afrika* 196. 1892 and *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 918. 1900, *Bothalia* 7: 60. 1958, *Kirkia* 3: 181. 1963

(Veterinary medicine, infusion of the inner part of the roots for diarrhea.)

Protium Burm.f. Burseraceae

From a Javanese name or from Proteus, referring to the rate of growth; see Rumphius, Georgius Everhardus (1627–1702), *Herbarium Amboinense* Amstelædami: apud Mein Gerdum Uytwerf, 1750 [*Het amboinsch kruid-boek*, etc., Amstelædami, 1750. 6 vols.], Linnaeus, Carl von (1707–1778), *Herbarium Amboinense .../sub praesidio Caroli Linnaei; submittit Olavus Stickman. Upsaliae, [1754]*, Nicolaas Laurens Burman, *Flora Indica*. (N.L. Burman) 88. Lugduni Batavorum (Mar.–Apr.) 1768, *Revisio Generum Plantarum* 1: 107. 1891 and *Brittonia* 44(3): 280. 1992, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Brittonia* 59(1): 2. 2007.

Protium aracouchini (Aubl.) Marchand (*Bursera aracouchili* Baill.; *Bursera heterophylla* Engl.; *Elaphrium*

heterophyllum (Engl.) Rose; *Icica aracouchini* Aubl.; *Icica heterophylla* DC.; *Protium aracouchili* L. Marchand; *Protium aracouchini* var. *angustifolium* Swart; *Protium divaricatum* Engl. var. *intermedium* Swart; *Terebinthus heterophylla* Rose; *Terebinthus heterophylla* (Engl.) Rose; *Tingulonga aracouchini* (Aubl.) Kuntze)

Brazil.

See *Histoire des plantes de la Guiane Française* 1: 343–344, t. 133. 1775, *Prodr.* (DC.) 2: 77. 1825, *Adansonia* 8: 51–52. 1867, *Monographiae Phanerogamarum* 4: 46. 1883, *Traité de Botanique Médicale Phanérogamique* 2: 951. 1884, *Revisio Generum Plantarum* 1: 108. 1891 and *Contributions from the United States National Herbarium* 10: 119. 1906, *North American Flora* 25: 247. 1911, *Recueil des Travaux Botaniques Néerlandais* 39: 199. 1942, *Acta Botanica Neerlandica* 15: 45. 1966

(Sap from the bark aromatic, astringent, used for skin diseases.)

Protium divaricatum Engl. (*Tingulonga divaricata* (Engl.) Kuntze; *Tingulonga divaricata* Kuntze)

Brazil. Small tree

See *Flora Brasiliensis* (Martius) 12(2): 279, t. 55. 1874, *Revisio Generum Plantarum* 1: 108. 1891

(Resin used as an incense in diagnosing disease.)

Protium guianense (Aubl.) Marchand (*Icica guianensis* Aubl.; *Icica viridiflora* Lam.; *Protium heptaphyllum* var. *puberulum* Engl.; *Protium hostmannii* (Miq.) Engl.; *Tingulonga guianensis* Kuntze; *Tingulonga guianensis* (Aubl.) Kuntze)

Guyana.

See *Histoire des plantes de la Guiane Française* 1: 340 t. 131. 1775, *Adansonia* 8: 52. 1867, *Revisio Generum Plantarum* 1: 107. 1891

(Purgative, for stomachache.)

Protium heptaphyllum (Aubl.) Marchand (*Icica heptaphylla* Aubl.; *Icica surinamensis* Miq.; *Protium angustifolium* Swart; *Protium heptaphyllum* L. Marchand; *Protium heptaphyllum* var. *floribundum* Swart; *Protium heptaphyllum* var. *multiflorum* (Engl.) Swart; *Protium heptaphyllum* var. *multiflorum* (Engl. ex Mart.) Swart; *Protium heptaphyllum* var. *surinamense* (Miq.) Swart; *Protium heptaphyllum* var. *unifoliolatum* Swart; *Protium hostmannii* (Miq.) Engl. var. *brasiliense* Swart; *Protium multiflorum* Engl.; *Protium octandrum* Swart; *Tingulonga heptaphylla* (Aubl.) Kuntze; *Tingulonga heptaphylla* Kuntze; *Tingulonga multiflora* Kuntze; *Tingulonga multiflora* (Engl.) Kuntze; *Tingulonga multiflora* (Engl. ex Mart.) Kuntze)

South America. Tree, hard translucent whitish resin

See *Herbarium Amboinense* 7: 54. 1755, *Histoire des plantes de la Guiane Française* 1: 337, t. 130. 1775, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn*

5: 54–55. 1873, *Fl. Bras.* (Martius) 12(2): 266 (-267). 1874, *Revisio Generum Plantarum* 1: 107–108. 1891 and *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht*, No. 89, 190. 1942, *Recueil des Travaux Botaniques Néerlandais* 39: 190–191, 198, 297–298. 1942, *Acta Botanica Neerlandica* 15: 52. 1966

(Pungent resin used in preparing the coca-ash mixture.)

in English: Brazilian elemi, incense tree, taca-mahaca gum

in Colombia: brea, hitamaká, pergamím

Protium serratum (Wall. ex Colebr.) Engl. (*Bursera serrata* Wall. ex Colebr.)

India, China. Deciduous canopy tree, broad rounded buttresses, leaf pinnately compound, leaflets strictly opposite with a terminal leaflet, light green flowers with 5 parts, fruit 2-locular, raw fruits eaten, used for rearing insects and producing lacs, one of the best lac-host trees

See *Transactions of the Linnean Society of London* 15: 361, pl. 4. 1827, *Monographiae Phanerogamarum* 4: 88. 1883 and *Blumea* 7(1): 155. 1952

(Stomachic.)

in English: Indian red-pear

in China: ma ti guo

in India: busi, chitreka, chitrika, cittirekka, dieng sohmir, dongsoradi, errabusi, kanrior, karakabusi, konda mavu, munutikaraka, nimburu, thikring, yerrabusi

Protium unifoliolatum Engl. (*Icica pubescens* Benth.; *Protium benthamii* Swart; *Protium pubescens* (Benth.) Engl.; *Protium unifoliolatum* var. *inconforme* Swart; *Protium unifoliolatum* var. *macrophyllum* Huber; *Protium unifoliolatum* var. *puberulum* Hoehne; *Protium unifoliolatum* var. *sub-serratum* Engl.; *Tetragastris unifoliolata* (Engl.) Cuatrec.; *Tingulona simplicifolia* (Mart. ex Engl.) Kuntze)

Brazil.

See *Herbarium Amboinense* 7: 54. 1755, *Histoire des plantes de la Guiane Française* 1: 337, t. 130, 132. 1775, *De Fructibus et Seminibus Plantarum...* 2: 130. 1790, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 16. 1852, *Flora Brasiliensis* 12(2): 262. 1874, *Revisio Generum Plantarum* 1: 107. 1891 and *Comissão de Linhas Telegraficas, Botanica* 5(6): 31. 1915, *Recueil des Travaux Botaniques Néerlandais* 39: 324. 1942, *Acta Botanica Neerlandica* 1: 249. 1952, *Boletim do Museu Paraense Emílio Goeldi, Série Botânica* 11: 10. 1961

(Resin of trunk dissolved in water and drunk for congestion and respiratory infections, also crushed fruits sniffed.)

Protorhus Engl. Anacardiaceae

Greek *protos* ‘first’ and *Rhus*, maybe because *Protorhus* approaches the genus *Rhus*, see *Genera Plantarum* 1425.

1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 365–426. 1881.

Protorhus longifolia (Bernh.) Engl. (*Anaphrenium longifolium* Bernh.; *Rhus longifolia* (Bernh.) Sond.)

South Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 377, 422. 1881

(Leaves in diarrhea and stomatitis.)

in English: red beech

in Southern Africa: rooiboekenhout, rooibeukehout, harpui-boom; umHlangothi, imFuce (Swazi); isiFice, isiFico, isiFico sehlathi, uNhlangothi, umHlangothi, umHluthi, umHluthi wehlathi (Zulu); uZintlwa, umKhumiso, umKomiso, umKupati, iKhubalo, umHluthi (Xhosa)

Prunella L. Lamiaceae (Labiatae)

Corruption of *brunella*, *brunelle*, used in the 15th and 16th centuries by German herbalists, it probably derives from the German *braun* (Latin *prunum*) ‘purple’ or *Bräune* ‘quinsy’; see Carl Linnaeus, *Species Plantarum*. 600. 1753 and *Genera Plantarum*. Ed. 5. 261. 1754 and Webb, C.J., Sykes, W.R & Garnock-Jones, P.J. *Flora of New Zealand* 4: 1–1365. R.E.Owen, Government Printer, Wellington. 1988, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 509. Basel 1996.

Prunella vulgaris Linnaeus (*Brunella vulgaris* L.; *Prunella vulgaris* Greene)

Temp. & Subtrop. Northern Hemisphere, Central America. Perennial herb, spreading, prostrate, sprawling, pubescent, leaves petiolate, flowers blue-violet, terminal spikes, floral leaves bract-like, bell-shaped calyx 2-lipped, smooth ovoid nutlets 2-celled, seeds black, on forest edges, in disturbed secondary grassland, roadsides

See *Species Plantarum* 2: 600–601. 1753, *Tekhno-Bot. Slovar*. 355. 1820, *Man. Bot. San Francisco* 293. 1894 and *Taxon* 28: 395–397. 1979, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 7: 5–16. 1984, *Le Naturaliste Canadien* 111: 447–449. 1984, *Memórias da Sociedade Broteriana* 27: 27–75. 1984, *Proceedings of the Indian Academy of Sciences* 94: 619–626. 1985, *Botaniceskij Žurnal SSSR* 71: 195–200. 1986, *Journal of the Indian Botanical Society* 65: 304–309. 1986, *Botaniceskij Žurnal SSSR* 72: 1069–1074. 1987, *Botaničeskij Žurnal (Moscow & Leningrad)* 75: 118–120. 1990, *Informatore Botanico Italiano* 22: 216–226. 1990, *Fitologija* 41: 70–75. 1991, *Regnum Veg.* 127: 79. 1993, *Linzer Biologische Beiträge* 29(1): 5–43. 1997, *Opera Botanica* 137: 1–42. 1999, Danton, P. & Perrier, C. “Liste de la Flore vasculaire de l’île Robinson Crusoe archipel Juan Fernández, Chili.” *Journal de Botanique Société de Botanique de France* 24: 67–78. 2004

(Plant paste applied on backache. Flowers decoction strong expectorant and antispasmodic, antidiabetes, taken to relieve fever and headache. Inflorescence or whole plant used for headache, tinnitus, dry cough, boils, skin inflammation, conjunctivitis, for mild fevers, gum inflammation, sore throats; leaf and flower poultice astringent and antiinflammatory for insect bites and scratches; leaves pasted in castor oil used externally for treating piles.)

in English: common self-heal, heal-all, self-heal, sicklewort

in China: hsia ku tsao, xia ku cao

in India: dharu, kal-veoth, kalweoth, syangara, tharu

in Nepal: lugro mhumpo

in Vietnam: ha kho thao

Prunella vulgaris L. subsp. *asiatica* (Nakai) H. Hara (*Prunella asiatica* Nakai; *Prunella asiatica* var. *albiflora* (Koidzumi) Nakai; *Prunella japonica* Makino; *Prunella vulgaris* f. *taiwanalpina* T. (Plant paste applied on backache. Flowers decoction strong expectorant and antispasmodic, antidiabetes, taken to relieve fever and headache. Inflorescence or whole plant used for headache, tinnitus, dry cough, boils, skin inflammation, conjunctivitis, for mild fevers, gum inflammation, sore throats; leaf and flower poultice astringent and antiinflammatory for insect bites and scratches; leaves pasted in castor oil used externally for treating piles.)

in English: common self-heal, heal-all, self-heal, sicklewort

Prunus L. Rosaceae

From *prunus*, the ancient Latin name for the plum tree, Greek *proumne* ‘plum-tree’, *proumnon* ‘plum’; see Carl Linnaeus, *Species Plantarum*. 473. 1753, *Genera Plantarum*. Ed. 5. 213. 1754 and Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1113, 1162. New York 1967, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 995, 996. 1985, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XIV: 829–832. Torino 1988, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 533. 1994.

Prunus africana (Hook. f.) Kalkman (*Pygeum africanum* Hook.f.; *Pygeum crassifolium* Hauman)

East Africa. Evergreen tree, bitter-almond smell, rough bark, branchlets dotted with lenticels, glossy leaves, green-white very small scented flowers, rounded fruits red to purple when ripe, in moist evergreen forest, in riverine areas, grasslands

See *Species Plantarum* 1: 473–475. 1753, *De Fructibus et Seminibus Plantarum*... 1: 218. 1788, *Journal of the Proceedings of the Linnean Society* 7: 191–192. 1864 and *Bulletin du Jardin Botanique de l’État* 22: 93. 1952, *Blumea* 13(1): 1–115. 1965, *Trees of S. Afr.* 1: 679, cum 2 fig. 1972, *Medicinal Plant Conservation* 5: 18. 1999

(Stem and roots for inflammation, kidney and prostate diseases. Bark infusion purgative, a remedy for stomachache. Fruits extremely bitter.)

in English: bitter almond, red stinkwood

in Cameroon: alumty, vla

in East Africa: mkonde-konde, muiri, ntasesa

in Kenya: mueri

in Southern Africa: bitteramandel, nuwehout, rooistinkhout; mogotlhoi (North and north east Transvaal); mulala-maanga (Venda); umDomezulu, umDumizula, iNkokhokho, umLalume, nGubozinyeweni, umKhakhazi (Zulu); muChambati, chati (Shona); iNyazangoma, umKakase, umKhakhazi (Xhosa)

Prunus americana Marshall

North America.

See *Species Plantarum* 1: 473–475. 1753, *Arbustum Americanum* 111. 1785 and McVaugh, R. “A revision of the North American black cherries (*Prunus serotina* Ehrh., and relatives).” *Brittonia* 7: 279–315. 1951, *Taxon* 31(2): 344–360. 1982, M.R. Gilmore, *Uses of Plants by the Indians* ... 35. 1991, *Erigenia* 11: 1–8. 1991

(The bark of the roots, scraped and boiled, a remedy for abrasions of the skin and scars. Used for ceremonies and rituals.)

in English: American red plum, August plum, goose plum, hog plum, sloe, wild plum

in North America: kantsh, kantsh-hu (Winnebago), niwaharrit, niwaharrit-nahaapi (Pawnee), plum tree, wild plum

Prunus amplifolia Pilg.

South America.

See *Bot. Jahrb. Syst.* 37: 538. 1906, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 1063–1119. 1938, *Journal of Ethnopharmacology* 69(2): 127–137. 2000

(Antimalarial.)

Prunus amygdalus Batsch (*Amygdalus communis* L.; *Prunus amygdalus* Stokes, nom. illeg., non *Prunus amygdalus* Batsch; *Prunus persica* (L.) Batsch; *Prunus persica* Stokes)

Europe.

See *Species Plantarum* 1: 472–475. 1753, Batsch, August Johann Georg Carl (1761–1802), *Descriptions of Prunus tenella and Prunus pumilio*. 1: 30. 1801 [*Beytr. Entw. Prag. Gesch. Drey. Natur-Reiche*], *A Botanical Materia Medica* 3: 101. 1812 and *Cytologia* 53: 665–670. 1988

(Digestive. Oil emollient. Kernels taken orally for dysuria. Ceremonial, ritual, seeds used in *pujas* and offerings.)

in English: almond

in India: badam

Prunus caroliniana (Mill.) Aiton (*Lauro-cerasus caroliniana* (Mill.) M. Roem.; *Padus caroliniana* Mill.)

North America. Evergreen tree, flowers in an elongated cluster, black fleshy fruits with a large pit/stone

See *The Gardeners Dictionary*: ... eighth edition *Padus* no. 6. 1768, *Hortus Kewensis*; or, a catalogue ... 2: 163. 1789, *Familiarum Naturalium Regni Vegetabilis Monographicae* 90. 1847

(Wilted leaves, twigs, stems and seeds are poisonous, highly toxic, cyanogenic glycoside, amygdalin, may be fatal if ingested.)

in English: Carolina cherry laurel, cherry laurel, laurel cherry, mock orange, wild orange

Prunus cerasoides Buch.-Ham. ex D. Don (*Cerasus cerasoides* (Buch.-Ham. ex D. Don) S.Y. Sokolov; *Cerasus cerasoides* (D. Don) S.Y. Sokolov; *Cerasus cerasoides* (D. Don) Tsitsvidze & Matinyan; *Cerasus phoshia* Buch.-Ham. ex D. Don; *Cerasus puddum* Wall.; *Cerasus puddum* Roxb. ex Wall.; *Cerasus puddum* Roxb. ex Ser.; *Maddenia pedicellata* Hook. f.; *Prunus cerasoides* Maxim.; *Prunus cerasoides* Koidz.; *Prunus cerasoides* D. Don; *Prunus puddum* Roxb. ex Brandis; *Prunus puddum* Roxb. ex Wall.; *Prunus puddum* (Roxb. ex Ser.) Brandis; *Prunus puddum* Hort. ex Hook.)

India, Himalaya. Trees, pink subumbellate flowers, yellow oblong drupes

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Prodr.* (DC.) 2: 537. 1825, *Prodromus Florae Nepalensis* 239. 1825, *Pl. Asiat. Rar.* (Wallich). 2: 37, t. 143. 1831, *Fl. Brit. India* [J.D. Hooker] 2: 318. 1878 and *Bot. Mag.* (Tokyo) 1911, xxv. 259. 1911, *Trees & Shrubs URSS* 3: 736. 1954, *Bull. Princ. Bot. Gard. Acad. Sci. URSS* No. 38. 19. 1960, *Silvae Geneticae* 22: 188–190. 1973

(Ground bark decoction taken for venereal diseases, fever, diarrhea. Bark as a nose decongestant, spasmolytic, a cough suppressant and analgesic for sore muscles and joints; bark paste applied on the forehead for the treatment of headache; stem bark liquid or juice rubbed on the skin to relieve muscular pain; ash of the bark mixed with mustard oil applied to wounds, sprains, cuts and burns. Bark of the plant mixed with bark of *Fraxinus floribunda* and *Ficus semicordata* and made into a paste tied with cloth over fractured or swelling portion of the body. Ceremonial, ritual, the tree is a sacred one, leaves and twigs used in religious ceremonies and marriages.)

in English: wild cherry tree, wild Himalayan cherry

in India: daiyan, faza, paiyan, paiyun, paiyung, panya, payan, piezie, poinyu

in Nepal: painyu

Prunus cerasus L. (*Cerasus cerasus* (L.) Eaton & Wright, nom. illeg.; *Cerasus vulgaris* Mill.)

South America.

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Gardeners Dictionary: ... eighth edition no. 1*. 1768, *A Manual of Botany* 189. 1840 and *Journal of the American Society for Horticultural Science* 107: 779–781. 1982

(For skin diseases.)

in English: pie cherry, sour cherry

in Mexico: belohui naxiña, yaga belohui naxiña, biziaa nayi xtilla, piziaa nayi castilla

Prunus ceylanica Miq.

Sri Lanka. Tree, ripe fruits and roasted seeds eaten

See *Blumea* 13(1): 52–55. 1965, *Revised Handb. Fl. Ceylon* 3: 378. 1981

(Bark juice given for the treatment of jaundice in children.)

in India: bol-shendu

Prunus davidiana (Carrière) Franch. (*Amygdalus davidiana* (Carrière) de Vos ex Henry; *Amygdalus davidiana* (Carrière) Yu; *Amygdalus davidiana* var. *davidiana*; *Armeniaca davidiana* Carrière; *Armeniaca sibirica* var. *davidiana* (Carrière) Y.C. Zhu; *Persica davidiana* Carrière; *Prunus persica* var. *davidiana* (Carrière) Maxim.)

China.

See *Species Plantarum* 1: 472–475. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Meth.* 15. 1754, *Encyclopédie Méthodique, Botanique* 1(1): 3. 1783, Batsch, August Johann Georg Carl (1761–1802), *Descriptions of Prunus tenella and Prunus pumilio*. 1: 30. 1801 [*Beytr. Entw. Prag. Gesch. Drey. Natur-Reiche*], *Revue Horticole* 1872: 74, f. 10. 1872, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 5: 255. 1883, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 29(1): 81–82. 1883 and *Revue Horticole* 1902: 290 f. 120. 1902, *Taxonomy of the Fruit Trees in China* 29: 6. 1979, *Plantae Medicinales Chinae Boreali-Orientalis* 502. 1989

(Seeds used for amenorrhoea, constipation, strains, contusions, dysmenorrhoea.)

in English: Chinese wild peach, David's peach

Prunus dulcis (Mill.) D.A. Webb (*Amygdalus communis* L.; *Amygdalus dulcis* Mill.; *Prunus amygdalus* Stocks)

China.

See *Species Plantarum* 1: 472–475. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754 and *Feddes Repertorium* 74: 24. 1967, *Fl. Libya* 31: 12. 1977

(Emollient.)

in English: almond, almond tree

in Mexico: bizoya xtilla, pizoya castilla

in China: ba dan xing ren

Prunus laurocerasus L. (*Cerasus laurocerasus* (L.) Dum. Cours.)

Cultivated. Shrub or tree, evergreen, glossy dark green coriaceous leaves, flowers white, fleshy fruit black with a large pit/stone

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* (300). 1754, *Le Botaniste Cultivateur, ...* 3: 390. 1802 and *Taxon* 51(2): 543. 2002

(Cyanogenetic glycoside amygdalin. Wilted leaves, twigs, stems and seeds are poisonous, highly toxic, cyanogenic glycoside, amygdalin, may be fatal if ingested.)

in English: bay laurel, cherry bay, cherry laurel, English cherry laurel, English laurel, laurel cherry

Prunus nigra Aiton (*Armeniaca dasycarpa* (Ehrh.) Borkh.; *Prunus dasycarpa* Ehrh.; *Prunus nigra* Desf., non Aiton 1789)

Europe.

See *Species Plantarum* 1: 473–475. 1753, *Meth.* 15. 1754, *Hortus Kewensis*; or, a catalogue ... 2: 165. 1789, *Beiträge zur Naturkunde* 5: 91. 1790, *Archiv für die Botanik* 1(2): 37. 1797, *Tableau de l'École de Botanique* 3: 297. 1829

(Astringent, aphrodisiac, for skin diseases.)

Prunus pensylvanica L.f.

North America. Deciduous tree glandular leaves, red fleshy fruits with a large pit/stone, fruits used for jelly or syrup

See *Species Plantarum* 1: 473–475. 1753, *Supplementum Plantarum* 252. 1781 [1782] and *Taxon* 31(2): 344–360. 1982

(Wilted leaves, twigs, stems and seeds are poisonous, highly toxic, cyanogenic glycoside, amygdalin, may be fatal if ingested. Livestock that ingest pin cherry plant material can be poisoned. The leaves have an average N rate of 91 mg/100 g, these levels are potentially lethal to livestock if ingested.)

in English: bird cherry, fire cherry, pin cherry, red cherry

Prunus persica (L.) Batsch (*Amygdalus communis* L.; *Amygdalus communis* Bunge; *Amygdalus persica* L.; *Amygdalus persico-amygdala* Rchb.; *Amygdalus pumila* L.; *Amygdalus pumila* Lour.; *Cerasus vulgaris* Mill.; *Persica vulgaris* Mill.; *Prunus amygdalo-persica* Rehder; *Prunus amygdalus* Stokes, nom. illeg.; *Prunus amygdalus* Batsch; *Prunus persica* Stokes; *Prunus persica* (L.) Stokes, nom. illeg., non *Prunus persica* (L.) Batsch; *Prunus persica* Siebold & Zucc.; *Prunus vulgaris* (Mill.) Schur; *Prunus vulgaris* Schur)

China, India, Japan. Deciduous tree, glandular leaves, edible fleshy fruits with a large rough pit/stone

See *Species Plantarum* 1: 472–475. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Mant. Pl.*

74. 1767, *Syst. Prunus puddum Miq. (*Cerasus cerasoides* (Buch.-Ham. ex D. Don) S.Y. Sokolov; *Cerasus puddum* Roxb. ex Ser.; *Prunus cerasoides* Buch.-Ham. ex D. Don; *Prunus puddum* (Roxb. ex Ser.) Brandis)

Himalaya. Deciduous tree, quick-growing, many-branched crown, shiny bark peeling, glossy leaves, pink flowers, small yellow berries

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Prodromus Florae Nepalensis* 239. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 537. 1825, *Annales Museum Botanicum Lugduno-Batavi* 2: 90. 1865, *The forest flora of North-West and Central India* 194. 1874 and *Trees & Shrubs*

URSS 3: 736. 1954, *Journal of Cytology and Genetics* 23: 219–228. 1988

(Ground bark decoction taken for venereal diseases, fever, diarrhea; bark made into a paste and applied to heal fracture of bones. Young small branches crushed, soaked in water and taken internally to stop abortion.)

in English: flowering cherry, Himalayan bird cherry

in Lepcha: kaong ki koong

Prunus pumila L. (*Cerasus pumila* (L.) Michx.; *Prunus pumilus* Focke)

North America.

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Flora Boreali-Americana* 1: 286. 1803 and *Taxon* 31(2): 344–360. 1982

(Stomachic.)

in English: sand cherry

Prunus salicina Lindl. var. ***salicina*** (*Prunus botan* André; *Prunus botan* Hort. ex Chow; *Prunus gymnodonta* Koehne; *Prunus ichangana* C.K. Schneid.; *Prunus staminata* Hand.-Mazz.; *Prunus thibetica* Franch.; *Prunus triflora* Roxb.; *Prunus triflora* Raf.; *Prunus triflora* var. *spinifera* Koehne)

China.

See *Hort. Bengal.* 38. 1814, *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 215. 1885, *Revue Horticole* 1895: 160. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis* 1(4): 50–51. 1905, *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 266. 1912, *Plantae Wilsonianae* (Sargent) 1(2): 279–280. 1912, *Symbolae Sinicae* 7(3): 535. 1933, *Familiar Trees Hopei*, Peiping 211. 1934

(Ripe fruits of *Prunus triflora* useful for jaundice. Stembark of *Croton oblongifolius*, *Prunus triflora*, rhizome of *Curcuma domestica*, ripe fruits of *Averrhoa carambola* and root of *Capsicum annuum* crushed together and boiled in water and the extract given in jaundice.)

in English: Japanese plum

in China: chia ching tzu, li

in India: ahombogori, paman-kam

in Japan: su-momo, sumomo, sumumu

Prunus serotina Ehrh. (*Padus serotina* (Ehrh.) Borkh.; *Padus serotina* Borkh.; *Padus serotina* subsp. *capuli* (Cav. ex Spreng.) R. Büttner; *Prunus capuli* Cav.; *Prunus serotina* Roth; *Prunus serotina* Schur; *Prunus serotina* Poir.; *Prunus serotina* Poit. & Turp.; *Prunus serotina* subsp. *capuli* (Cav.) McVaugh; *Prunus serotina* Ehrh. subsp. *capuli* (Cav. ex Spreng.) McVaugh; *Prunus serotina* Poit. & Turp. var. *capuli* (Cav.) Hatus.)

North America. Perennial tree or shrub, white fragrant flowers hang in drooping clusters, dark-red to black cherry fruits

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Gartenkalender* 3: 285. 1784, *Beiträge zur Naturkunde* [Ehrhart] 3: 20. 1788, *Archiv für die Botanik* [Leipzig] 1(2): 38. 1797, *Anales de Historia Natural* 2: 110–111. 1800, *Encycl.* (Lamarck) 5: 665. 1804 and *Brittonia* 7(4): 308. 1951, *Taxon* 29: 713–714. 1980, Mulligan, G.A., Munro, D.B. “The biology of Canadian weeds. 51. *Prunus virginiana* L. and *P. serotina* Ehrh.” *Can. J. Plant Sci.*, 61: 977–992. 1981, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*. AVI Publishing Company, Inc., Westport, Conn., USA. 1985, *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *AAU Reports* 34: 1–443. 1994

(High toxicity. The plant contains chemicals that can release hydrogen cyanide in animals, all parts are potentially toxic. All types of animals can be poisoned by ingesting leaves and twigs, ruminants (cattle, sheep, goats, deer) are more at risk. Cyanide poisoning interferes with respiration and blood circulation; death is often swift. Two cyanogenic glycosides are found in black cherry. Amygdalin and prunasin are found in the leaves, twigs, and seeds. Hydrogen cyanide is formed when the glycosides are hydrolyzed by plant enzymes after damage or by rumen organisms. Symptoms of cyanide poisoning are common to all animals. Leaves and bark used as a piscicide.)

in English: black cherry, rum cherry, wild black cherry

in Mexico: usabi

Prunus serotina* Ehrh. var. *serotina

North America. Perennial tree or shrub

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary* ... Observ. Bot. 12. 1771, *Flora Boreali-Americana* (Michaux) 1: 285. 1803, Pardee, G.K. “Case of poisoning by the wild cherry.” *West. Lancet* 6: 289–291. 1847 and Mulligan, G.A., Munro, D.B. “The biology of Canadian weeds. 51. *Prunus virginiana* L. and *P. serotina* Ehrh.” *Can. J. Plant Sci.*, 61: 977–992. 1981, Majak, W. et al. “The cyanide potential of Saskatoon serviceberry (*Amelanchier alnifolia*) and chokecherry (*Prunus virginiana*).” *Can. J. Anim. Sci.*, 61: 681–686. 1981, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*. AVI Publishing Company, Inc., Westport, Conn., USA. 1985

(Two cyanogenic glycosides, amygdalin and prunasin, are found in red chokecherry plant material. Children have been poisoned and have died after ingesting large quantities of berries, which contain the seeds. All types of livestock can be poisoned by ingesting the plant material. Related species, including peach (*Prunus persica*) and apricot (*Prunus armeniaca*), have pits with enough toxin to cause poisoning and death in humans and animals. The bark or root boiled for stomach inflammations. Cold infusion for dry coughs and arthritis.)

in English: chokecherry, red chokecherry, wild cherry

in Spanish: capulin

Przewalskia Maxim. Solanaceae

For the great Russian naturalist Nikolay Mikhaylovich (Nikolai Michailowicz or Mikhailovich) Przewalsky (Prejevalsky, Przewalski, Przewal'sky, Przewalskij, Prschevalskij), 1839–1888, traveller, geographer, explorer of Central Asia, his writings include *Mongolia, the Tangut Country and the solitudes of northern Tibet*. [Translated from the Russian by E.D. Morgan] London 1876 and *From Kulja, across the Tian Shan to Lob-Nor*. [Translated by E.D. Morgan] London 1879 [1878]; see John H. Barnhart, *Biographical Notes upon Botanists*. 3: 114. 1965; Vasilij A. Esakov, in *D.S.B.* 11: 180–182. 1981; Donald Rayfield, *The Dream of Lhasa. The Life of Nikolay Przewalsky (1839–1888) Explorer of Central Asia*. Paul Elek 1976; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933; T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 319. 1972; Emil Bretschneider (1833–1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981; I.C. Hedge and J.M. Lamond, *Index of collectors in the Edinburgh herbarium*. 1970.

***Przewalskia tangutica* Maximowicz (*Mandragora shebbearei* C. Fischer; *Przewalskia roborowskii* Batalin; *Przewalskia shebbearei* (C. Fischer) Grubov)**

Sikkim Himalaya. Herb, succulent, erect

See *Mélanges Biol. Bull. Phys.-Math. Acad. Imp. Sci. Saint-Petersbourg* 11: 274–275. 1881

(Analgesic, antiinflammatory, antispasmodic. Roots used as a medicine for relieving muscular spasm, pain and swelling.)

in English: Tangut przewalskii

in China: ma niao pao, ma niao pao shu

Psacalium Cass. Asteraceae

Greek *psakalon* 'new-born, new-born animal', referring to the flowers, see Robinson, H. and R.D. Brettell. "Studies in the Senecioneae (Asteraceae). III. The genus *Psacalium*." *Phytologia* 27: 254–264. 1973, *Compositae Newsletter* 37: i-iii, 1–84. 2001.

Psacalium decompositum (A. Gray) H. Rob. & Brettell (*Cacalia decomposita* A. Gray; *Mesadenia decomposita* (A. Gray) Standley; *Odontotrichum decompositum* (A. Gray) Rydberg; *Senecio decompositus* Sch. Bip. ex Hieron.; *Senecio grayanus* Hemsl.)

North America, Mexico. Herb

See *Species Plantarum* 2: 834, 866–872. 1753, *Dictionnaire des Sciences Naturelles* [Second édition] 43: 461–462. 1826, *Gardener's Magazine and Register of Rural and Domestic Improvement* 8: 247. 1832, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 1: 311. 1832, *Smithsonian Contr. Knowledge* 5(6): 99. 1853, *Biologia Centrali-Americana; ... Botany ...* 2(10): 241. 1881 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 634. 1901, *Contributions from the United States National Herbarium* 19: 749. 1915, *Bulletin of the Torrey Botanical Club* 51(10): 414. 1924

(Piscicide. Roots used to treat insulin-resistant diabetes. Root tea or tincture a liniment for sprains and acute arthritis; roots infusion to improve blood circulation, for varicose veins. Moderate toxicity.)

in English: indian-plantain

in Mexico: chicura, mataril, matarique, maturi, maturí, pichichagua

Psacalium peltatum (Kunth) Cass. (*Cacalia peltata* Kunth; *Senecio peltatus* DC.; *Senecio peltifer* Hemsl.)

Mexico. Herb, white flowers

See *Species Plantarum* 2: 834, 866–872. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 133, t. 361. 1820 [1818], *Dictionnaire des Sciences Naturelles* [Second édition] 43: 461–462. 1826, *Biologia Centrali-Americana; ... Botany ...* 2(10): 245. 1881

(For diabetes.)

Psammogeton Edgew. Apiaceae (Umbelliferae)

Greek *psammos* 'sand' and *geiton* 'a neighbour'.

Psammogeton biternatum Edgew.

Iran.

See *Trans. Linn. Soc. London* 20(1): 57. 1846 [1851 publ. 29 Aug 1846]

(Seeds to relieve stomach ache.)

in Pakistan: buzi izbuthak

Psammosilene W.C. Wu & C.Y. Wu Caryophyllaceae

Greek *psammos* 'sand', see Wu, Wen Cheng, *Icones Plantarum Medicarum e Libro Tien-Nan-Pen-Tsao Lanmaoano* 1: Table 1. 1945 [*Description of Psammosilene*].

Psammosilene tunicoides W.C. Wu & C.Y. Wu (*Silene cryptantha* Diels; *Silene cryptantha* Viv.)

China.

See Viviani, Domenico (1772–1840), *Florae Libycae Specimen*. Genuæ (Genova), 1824, *Notes Roy. Bot. Gard. Edinburgh* 5: 180. 1912, *Icones Plantarum Medicarum e Libro Tien-Nan-Pen-Tsao Lanmaoano* 1: Table 1. 1945

(Astringent, for skin diseases, antiseptic.)

in China: jin tie suo

Pseudarthria Wight & Arnott Fabaceae (Desmodieae)

From the Greek *pseudes* 'false' and *arthron* 'a joint', the pod is imperfectly articulated, see *Prodromus Florae Peninsulae Indiae Orientalis* 1: 209. 1834 and *Bothalia* 18: 11–24. 1988.

Pseudarthria hookeri Wight & Arn. (*Anarthrosyne densiflora* Klotzsch; *Anarthrosyne robusta* E. Mey.; *Desmodium kerstenii* O. Hoffm.; *Pseudarthria alba* A. Chev.; *Pseudarthria lactescens* Bojer; *Pseudarthria robusta* (E. Mey.) Schltr.; *Pseudarthria robusta* Schltr. ex Zahlbr.)

Indian Ocean, Tropical Africa. Perennial non-climbing shrub, woody rootstock, subshrub, herbaceous, semi-woody, erect, angular ribbed hairy stems, many-flowered branched inflorescences terminal and in the upper leaf axils, white pink-purple flowers, red-brown fruits

See *Commentariorum de Plantis Africae Australioris* (Meyer) 124. 1835, *Naturw. Reise Mossambique* [Peters] 6(Bot., 1): 41. 1861, *Linnaea* 43: 127. 1881 and *Annalen des Naturhistorischen Hofmuseums* 20: 25. 1905, *Bulletin de la Société Botanique de France* 58: Mém. India, Europe.

See *Species Plantarum* 2: 850–857. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 66. 1820[1818], *Systema Vegetabilium*, editio decima sexta 3: 476. 1827 and *Journal of the Bombay Natural History Society* 57(2): 377. 1960, *Botanical Journal of the Linnean Society* 82(3): 206. 1981

(Whole plant pasted and applied on the breast for lactation. Leaves and flowers for fever, gout. Ceremonial, graveyard ceremonies.)

in India: syntiew kubi

Pseudognaphalium obtusifolium (L.) Hilliard & B.L. Burtt (*Gnaphalium obtusifolium* L.; *Gnaphalium obtusifolium* var. *praecox* Fernald)

North America.

See *Species Plantarum* 2: 851. 1753 and *Rhodora* 38(450): 231–232, pl. 434, f. 1–3. 1936, *Botanical Journal of the Linnean Society* 82(3): 205. 1981

(Anaphrodisiac, antiphlogistic, antispasmodic, astringent, diaphoretic, diuretic, expectorant, sedative, vermifuge, insect repellent. Whole plant infusion expectorant, pectoral, used internally in the treatment of throat ulcers, bronchitis, coughs, chest complaints, lung affectations, intestinal and respiratory catarrh; applied externally as a poultice to bruises. Leaves and flowers infusion a mild sedative, diuretic and antispasmodic. Fresh juice considered to be aphrodisiac or anaphrodisiac.)

in English: cudweed, everlasting

in Mexico: gordolobo

Pseudolachnostylis Pax Phyllanthaceae (Euphorbiaceae)

Greek *pseudes* 'false' and the genus *Lachnostylis* Turcz.

Pseudolachnostylis maprouneifolia Pax

Tanzania to S. Africa. Small tree or shrub, dioecious, many-branched, light grey flaking bark, young stem brown with pale brown lenticels, new foliage bronze, flowers yellow-green with purple in centre, fairly pleasant but somewhat musty odor, fruit yellowish brown with white-yellowish spots, fruits with sticky juice, poles for building, in mixed woodland, in Kalahari woodlands, in dry rocky soil, on deep white Kalahari sands

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 19–20. 1899

(Poisonous. Roots purgative, for stomachache, cough, muscular pains, body ache, amenorrhoea.)

in East Africa: mukalanyanga

in Tanzania: magalyambisi, msolo, msungwi, mtoro, mtungulu, ng'oro

Pseudolysimachion (Koch) Opiz Scrophulariaceae (Plantaginaceae)

Greek *pseudes* 'false' and *lysimachion* for a plant, otherwise unknown, see *Species Plantarum* 1: 9–14. 1753, *Synopsis Florae Germanicae et Helveticae* 527. 1837, *Seznam Rostlin Kveteny Ceske* 80. 1852 and *J. Jap. Bot.* 57(11): 349–350. 1982, *Preslia* 70(3): 195. 1998.

Pseudolysimachion linariifolium (Pallas ex Link) Holub subsp. *dilatatum* (Nakai & Kitagawa) D.Y. Hong

(*Pseudolysimachion galactites* (Hance) Holub; *Veronica angustifolia* Fischer var. *dilatata* Nakai & Kitagawa; *Veronica galactites* Hance; *Veronica jeholensis* Nakai; *Veronica linariifolia* subsp. *dilatata* (Nakai & Kitagawa) D.Y. Hong; *Veronica linariifolia* Pallas ex Link var. *dilatata* (Nakai & Kitagawa) Nakai & Kitagawa; *Veronica linariifolia* var. *jeholensis* (Nakai) Kitagawa)

China. Edible, used as a vegetable

See *Rep. Exped. Manchoukuo* sect. 4(1): 54. 1934, *Folia Geobot. Phytotax.* Praha, 2: 422, 424. 1967, *Novon* 6: 23. 1996

(Antiallergic.)

in China: shui man jing, xi ye sui hua

in India: poshagas, saoni

Pseudopogonatherum A. Camus Poaceae (Gramineae)

Greek *pseudes* 'false' and the genus *Pogonatherum* Beauv., sometimes included in and referred to *Eulalia*, see K.S. Kunth, *Révision des Graminées*. 1: 160. Paris 1829, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 90. 1836, *Die Natürlichen Pflanzenfamilien*. 2(2): 24. 1887, *Monographiae Phanerogamarum* 6: 189, t. 1, f. 13. 1889, *Revisio Generum Plantarum* 2: 788. 1891 and Aimée Antoinette Camus (1879–1965), in *Annales de la Société Linnéenne de Lyon*. 68: 204. 1922, *Fl. Indo-Chine* 7: 254. 1922, *The Botany of Bihar and Orissa* 5: 1018. 1924, *Bulletin of the Tokyo Science Museum* 18: 2. 1947, *Index Grass Sp.* 3: 203. 1962.

Pseudopogonatherum contortum (Brongn.) A. Camus (*Andropogon athenostachys* Steud.; *Andropogon koretrostachys* Trin.; *Erianthus articulatus* (Trin.) F. Muell.; *Eulalia concinna* Nees ex Steud.; *Eulalia contorta* (Brongn.) Kuntze; *Eulalia contorta* (Brongn.) Pilg.; *Eulalia koretrostachys* (Trin.) (Plant decoction taken as carminative, febrifuge, diuretic; a paste of the ash of the whole plant applied for skin diseases.)

in India: pansi-tasad

Pseudorhipsalis Britton & Rose Cactaceae

Greek *pseudes* 'false' plus *Rhipsalis* Gaertner.

Pseudorhipsalis amazonica (K. Schum.) Ralf Bauer (*Discocactus amazonicus* (K. Schum.) D.R. Hunt; *Discocactus amazonicus* (K. Schum.) D.R. Hunt; *Wittia amazonica* K. Schum.; *Wittia panamensis* Britton & Rose; *Wittiocactus amazonicus* (K. Schum.) Rauschert; *Wittiocactus panamensis* (Britton & Rose) Rauschert)

South America.

See *Monatsschrift für Kakteenkunde* 13(8): 117–118, f. A-E. 1903, *The Cactaceae*; descriptions and illustrations of plants of the cactus family 4: 213. 1923, *Taxon* 31(3): 559. 1982, *Cactus and Succulent Journal of Great Britain* 44(1): 2. 1982, *Haseltonia* 9: 101–106, f. 2–6, map 1. 2002 [2003]

(Used for colds.)

Pseudosabicea N. Hallé Rubiaceae

Greek *pseudes* 'false' plus *Sabicea* Aublet.

Pseudosabicea arborea (K. Schum.) N. Hallé subsp. *bequaertii* (De Wild.) Verdc. (*Sabicea bequaertii* De Wild.)

Zaire, Rwanda, Burundi, Uganda, Tanzania.

See *Histoire des plantes de la Guiane Française* 1: 192. 1775, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 57. 1899 and *Plantae Bequaertianae* 2: 229. 1923, *Adansonia: recueil périodique d'observations botanique*, n.s. 3: 170, 172. 1963, *Kew Bulletin* 31: 183. 1976, *Flora of Tropical East Africa* 415–747. 1988

(Lactogenic.)

in Rwanda: umuzigamfizi

Pseudosmodingium Engl. Anacardiaceae

Greek *pseudes* 'false' plus the genus *Smodingium* E. Meyer ex Sonder.

Pseudosmodingium perniciosum (Kunth) Engl. (*Rhus perniciosa* Kunth)

South America. Shrub or tree, reddish papery bark, white flowers, red fruits

See *Species Plantarum* 1: 265–267. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 7: 10. 1824, *Flora Capensis* 1: 523. 11–31. 1860, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 381, 419–420. 1881 and *International Journal of Plant Sciences* 161(3): 509–519. 2000

(Irritant, this species can produce dermatitis, the sap and wood are acrid causing skin eruptions.)

in Mexico: chupire, cuajote campanudo, tetlate

Pseudosopubia Engl. Scrophulariaceae

Greek *pseudes* 'false' plus the genus *Sopubia* Buch.-Ham. ex D. Don.

Pseudosopubia hildebrandtii (Vatke) Engl. (*Pseudosopubia elata* Hemsl; *Pseudosopubia obtusifolia* Engl.; *Pseudosopubia polemonioides* Chiov.; *Sopubia hildebrandtii* Vatke)

East Africa.

See *Prodromus Florae Nepalensis* 88. 1825, *Annuario del Reale Istituto Botanico di Roma* 7: 28. 1897

(Magic, sap for love potion.)

in Kenya: echama

Pseudostellaria Pax Caryophyllaceae

Greek *pseudes* 'false' and the genus *Stellaria* L., referring to the placement of the species, see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 16: 551. 1772, *Genera Plantarum* 13: 968. 1840, *Flora Baicalensi-Dahurica* 1: 238. 1842, *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 609. 1842 and *Die natürlichen Pflanzenfamilien*, Zweite Auflage 16c: 318. 1934.

Pseudostellaria heterophylla (Miquel) Pax (*Krascheninikovia heterophylla* Miquel; *Krascheninikovia raphanorrhiza* (Hemsley) Korshinsky; *Pseudostellaria raphanorrhiza* (Hemsley) Pax; *Stellaria heterophylla* (Miquel) Hemsley; *Stellaria raphanorrhiza* Hemsley)

China.

See *Species Plantarum* 1: 421–423. 1753, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 16: 548, 551, 555. 1772, *Genera Plantarum* 13: 968. 1840, *Annales*

Museum Botanicum Lugduno-Batavi 3: 187. 1867, *Journal of the Linnean Society, Botany* 23(152): 68–69. 1886, *Bulletin de l'Académie Impériale des Sciences de St.-Petersbourg: Nouvelle Série Sér. 5 9*: 391. 1898 and *Die natürlichen Pflanzenfamilien*, Zweite Auflage 16c: 318. 1934

(Stimulant, tonic, stomachic.)

in China: hai er shen

Pseudostellaria jamesiana (Torr.) W.A. Weber & R.L. Hartm. (*Alsine glutinosa* A. Heller; *Alsine jamesiana* (Torr.) A. Heller; *Alsine jamesii* (Torr.) Holz.; *Arenaria jamesiana* (Torr.) Shinnery; *Stellaria jamesiana* Torr.)

North America. Perennial herb

See *Annals of the Lyceum of Natural History of New York* 2: 169. 1827 and *Bulletin of the Southern California Academy of Sciences* 2(6): 67. 1903, *Sida* 1(1): 50. 1962, *Phytologia* 44(4): 314. 1979, *Taxon* 37: 397–398. 1988

(Poultice for injuries and skin diseases. Ceremonial, ritual.)

in English: tuber starwort

Pseudostellaria sylvatica (Maximowicz) Pax (*Krascheninikovia sylvatica* Maximowicz; *Stellaria corei* Shinnery; *Stellaria sylvatica* (Maximowicz) Maximowicz ex Regel)

China.

See *Mém. Acad. Imp. Sci. St.-Petersbourg Divers Savans* 9: 57. 1859, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(1): 302. 1862 and *Die natürlichen Pflanzenfamilien* 16c: 318. 1934, *Sida* 1(2): 103. 1962

(Stimulant, tonic, stomachic.)

in China: xi ye hai er shen

Pseudotaxus W.C. Cheng Taxaceae

Greek *pseudes* 'false' plus the genus *Taxus* L.

Pseudotaxus chienii (W.C. Cheng) W.C. Cheng (*Nothotaxus chienii* (W.C. Cheng) Florin; *Pseudotaxus liana* Silba; *Taxus chienii* W.C. Cheng)

China.

See *Contr. Biol. Lab. Chin. Assoc. Advancem. Sci., Sect. Bot.*, 9(3): 240. 1934, *Res. Notes Forest. Inst. Nat. Centr. Univ. Nanking, Dendrol. Ser. 1*: 1. 1947, *Phytologia* 81: 327. 1996

(A poultice on boils, wounds, cuts.)

in China: bai dou shan

Pseudotsuga Carrière Pinaceae

Greek *pseudes* and the genus *Tsuga* (Antoine) Carrière, see *Traité général des conifères* 1: 256. 1867.

Pseudotsuga menziesii (Mirbel) Franco (*Abies menziesii* Mirb.; *Abies menziesii* Engelm., nom. illeg.; *Abies mucronata* Raf.; *Abies taxifolia* (Lamb.) Poir.; *Pinus douglasii* Sabine ex D. Don; *Pinus taxifolia* Lamb.; *Pseudotsuga douglasii* (Sabine ex D. Don) Carrière; *Pseudotsuga mucronata* (Raf.) Sudw.; *Pseudotsuga taxifolia* (Lamb.) Britton; *Pseudotsuga taxifolia* subsp. *mucronata* (Raf.) Schwer.)

North America. Perennial tree

See *Prodr. Stirp. Chap. Allerton* 399. 1796, *A Description of the Genus Pinus* 1: 27, 51, pl. 33. 1803, *Encyclopédie Méthodique, Botanique* 6: 523. 1805, *Mémoires du Muséum d'Histoire Naturelle* 13: 63, 70. 1825, *Atlantic Journal* 1(3): 120. 1832, *Arboretum et Fruticetum Britannicum* 4: 2319, f. 2231. 1838, *American Journal of Science, and Arts*, ser. 2, 34: 330. 1862, *Transactions of the Academy of Science of St. Louis* 2: 212. 1863, *Transactions of the New York Academy of Sciences* 8(3–4): 74. 1889, *Contributions from the United States National Herbarium* 3(4): 266. 1895 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 1922(32): 59. 1922, *Boletim da Sociedade Broteriana*, ser. 2 24: 74. 1950, *Kromosomo* 1996: 2901–2908. 1996

(Disinfectant, tonic, diuretic, antirheumatic. Green bark infusion for stomach troubles. Needles infusion drunk for colds, venereal diseases. Pitch for colds. Ceremonial.)

in English: Douglas fir, Oregon pine

in French: sapin de Douglas

in China: hua qi song

Pseudotsuga menziesii (Mirb.) Franco var. *glauca* (Mayr) Franco (*Abies lindleyana* A. Murray; *Pseudotsuga caesia* Flous; *Pseudotsuga douglasii* (Sabine ex D. Don) Carrière; *Pseudotsuga douglasii* var. *caesia* Schwerin; *Pseudotsuga douglasii* var. *glauca* (Beissn., in Jager & Beissn.) Britton var. *glauca* (Beissn.) Sudw.; *Tsuga douglasii* Lindl.; *Tsuga douglasii* var. *glauca* Beissn.; *Tsuga lindleyana* Roetzl)

North America. Perennial tree

See *Linnaea* 15: 524. 1841 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 1901: 57. 1901, *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 11: 86. 1902, *Synopsis der Mitteleuropäischen Flora* 1: 187. 1913, *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 33: 91. 1923, *Bulletin de la Société d' Histoire Naturelle de Toulouse* 71: 74. 1937, *Boletim da Sociedade Broteriana* ser. 2 24: 77. 1950, *Kalmia* 12: 24. 1982

(Blood purifier, analgesic, tonic, emetic, febrifuge, disinfectant, antiseptic, for anemia, stomach troubles, colds, sores, mouth sores, sore throats, fevers. Ceremonial emetic, good luck charm.)

in English: Rocky Mountain Douglas-fir

Pseudowintera Dandy Winteraceae

To honor John Winter, travelled with Sir Francis Drake on his first voyage to Virginia in 1577, vice-admiral of Sir Francis Drake's voyage to Tierra del Fuego in 1578, genus *Wintera* Forst.f.; see *Syst. Veg.*, ed. 14 (J.A. Murray). 507. 1784, *Florulae Insularum Australium Prodrum* 42. 1786 and E.F. Benson, *Sir Francis Drake*. London 1927, *Journal of Botany, British and Foreign* 71: 121. 1933, W. Vink, in *Blumea*. 18: 225–354. 1970, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987, H. Suzanne Maxwell and Martin F. Gardner, "The quest for Chilean green treasure: some notable British collectors before 1940." *The New Plantsman*. 4(4): 195–214. December 1997.

Pseudowintera axillaris (J.R. Forst. & Forst.f.) Dandy (*Drimys axillaris* J.R. Forst. & G. Forst.; *Wintera axillaris* (J.R. Forst. & G. Forst.) G. Forst.)

New Zealand. Aromatic shrub

See *Characteres Generum Plantarum* (ed. 3) 84, t. 42. 1776 and *J. Bot.* 71: 121. 1933

(Bark aromatic, astringent, stimulant, a substitute for quinine. Leaves decoction for stomachache; chewed for toothache.)

in English: pepper tree

Maori name: horopito

Pseudowintera colorata (Raoul) Dandy (*Drimys axillaris* var. *colorata* (Raoul) Kirk; *Drimys colorata* Raoul)

New Zealand. Aromatic shrub

See *Annales des Sciences Naturelles; Botanique*, sér. 3 121. 1844, *Forest Fl. New Zealand* 2. 1889 and *Journal of Botany, British and Foreign* 71: 121. 1933

(Bark aromatic, astringent, stimulant, a substitute for quinine. Sap for gonorrhoea and skin eruptions.)

in English: pepper tree

Maori name: horopito

Psiadia Jacq. Asteraceae

Greek *psias*, *psiadōs* 'a drop', referring to the exudation from the leaves, see *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: t. 152. 1797.

Psiadia arabica Jaub. & Spach

Yemen. Shrub

(Heated branches applied to treat rheumatic pain.)

in Arabic: tubbak

Psidium L. Myrtaceae

Latin *psidium*, from the Greek *sidion*, from *side*, *sida*, *sibde* 'pomegranate', Akkadian *sedum* 'red'; see Carl Linnaeus, *Species Plantarum*. 1: 470. 1753 and *Genera Plantarum*. Ed. 5. 211. 1754, *Familles des Plantes* 2: 88, 563. 1763, *Linnaea* 27(2–3): 138, 347. 349–352. 1854[1856], *Enumeratio Myrtacearum Brasiliensium* 33. 1893 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15: 486, 488. 1941, *Taxon* 5: 136. 1956, *Ann. (Stimulant, febrifuge, astringent. A leaf decoction as a treatment for liver problems. Leaf poultice on sores. Seed decoction for flu, fever, jaundice. Root juice or root tea drunk for scorpion sting. Magic, ceremonial, leafy twigs used in the altar during worship.)

in India: akhaji, dewamali, kothnaphul, kotoi sag, lek-luru, mir-herai, mir-thelau, mirherai, paark-anthu

Psilanthus ebracteolatus Hiern (*Cofeanthus ebracteolatus* (Hiern) A. Chev.; *Coffea ebracteolata* (Hiern) Brenan; *Coffea ebractiolata* (Hiern) Brenan; *Coffea lamtoensis* Portères; *Psilanthus ebractiolatus* Hiern)

Tropical Africa, Guinea, Cameroon. Shrub or small tree, slender, fragrant flowers solitary terminal, white tubular corolla, distinctly 2-lobed obovoid to ellipsoid drupe, black leathery pyrenes

See *Flora of Tropical Africa* [Oliver et al.] 3: 186. 1877 and *Encyclopédie Biologique* 28(3): 226. 1947 [*Caféiers du Globe* Fasc. 3, *Syst. (Encycl. Biol.* xxviii.) 226 (1947), in obs.], *Kew Bulletin* 8: 115. 1953, *J. Agric. Trop. Bot. Appl.* 10: 165, in adnot. 1963

(Leaves used against Guinea worm.)

Psilanthus travancorensis (Wight & Arn.) J.-F. Leroy (*Coffea travancorensis* Wight & Arn.; *Psilanthus travancorensis* Leroy)

India.

See *Prodr. Fl. Ind. Orient.* 1: 435. 1834 [10 Oct 1834] and *Ass. Sci. Internat. Café*, 9e Colloque: 482. 1980

(Used in Ayurveda.)

in India: katu-mulla, puskarumulam, tsjeru-mulla

Psilotrichum Blume Amaranthaceae

Greek *psilos* and *thrix*, *trichos* 'hair', referring to the leaflets enclosing the fruits; see Karl Ludwig von Blume (1796–1862),

Bijdragen tot de flora van Nederlandsch Indië. 11: 544–545. (Jan.) 1826, *Cat. Bogor.* 83. 1844 and *Bull. Soc. Bot. France* 99: 183–187. 1952, *Fl. Madagasc.* 67: 1–51. 1954, *Kew Bulletin* 34(2): 210. 1979, *Kew Bull.* 35(1): 134. 1980, *Kew Bull.* 35(2): 377–378. 1980.

Psilotrichum elliotii Baker

Tropical Africa, Nigeria, Ethiopia. Vine-like, prostrate to ascending shrublets

See *Flora of Tropical Africa* [Oliver et al.] 6(1.1): 58. 1909

(Roots analgesic, hemostatic, aphrodisiac, for snakebites. Leaf paste given to improve eyesight.)

in India: manalik keera

Psilotrichum ferrugineum (Roxb.) Moq. (*Achyranthes ferruginea* Roxb.; *Psilotrichum ferrugineum* F.C. How & H.X. Qiu; *Psilotrichum ferrugineum* Moq.; *Psilotrichum ferrugineum* (Roxb.) Voigt)

India.

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey 2: 502–503. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 11: 545. 1825, *Hort. Suburb. Calcutt.* 318. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 279. 1849 and *Lingnan Science Journal* 6: 276. 1928, *Flora Hainanica* 1: 408, f. 219. 1964, *Bull. Bot. Res., Harbin* 8(3): 147. 1988, *Guihaia* 13(2): 107. 1993

(Leaf decoction applied on cuts, wounds and injuries.)

in China: lin di xian

Psilotrichum ferrugineum (Roxb.) Moq. var. *ferrugineum* (*Achyranthes ferruginea* Roxb.; *Psilotrichum trichotomum* Blume; *Psilotrichum trichotomum* Merr.)

India.

See *Flora Indica*; or descriptions of Indian Plants 2: 502–503. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 11: 545. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 279. 1849 and *Lingnan Science Journal* 6: 276. 1928

(Leaf decoction applied on cuts, wounds and injuries.)

in China: lin di xian

in India: chichirimeri

Psilotrichum scleranthum Thwaites (*Psilotrichum africanum* Oliv.)

Tropical Africa. Shrub, straggling, white spike

See *Enumeratio Plantarum Zeylaniae* [Thwaites] 248. 1861, *Hooker's Icon. Pl.* 16: t. 1542. 1886, *Trans. Linn. Soc. Ser. II.* ii. (1887) 345. 1887

(Root bark analgesic, aphrodisiac, for menstrual disorders.)

in Tanzania: mehala chala, msuka tenga bonde

Psilotum Swartz Psilotaceae

From the Greek *psilos* ‘naked’, referring to the aerial shoots or to the leafless stems or branches; see *Botanisches Magazin* (Römer & Usteri) 2(6): 15, 17. 1789, O.P. Swartz, *Journal für die Botanik*. [Edited by H.A. Schrader] Göttingen 1802, *Histoire Naturelle des Végétaux, Classés par Familles* 3: 478 and 4: 315. 1802, *Exposition des Familles Naturelles* 1: 39. 1805 and *Fern Gaz.* 11(2–3): 141–162. 1975, *Fieldiana, Bot.*, n.s. 12: 1–91. 1983, *Fl. Paraguay* 1–9. 1987, *Fl. Veracruz* 55: 1–6. 1987, *Fieldiana, Bot.*, n.s. 12: 1–91. 1993, *Fl. Mesoamer.* 1: 3–4. 1995, *Brenesia* 62: 1–14. 2004.

Psilotum nudum (L.) P. Beauv. (*Bernhardia antillarum* Müll. Hal.; *Bernhardia depeana* Müll. Hal.; *Bernhardia dichotoma* Willd. ex Bernh., nom. illeg.; *Hoffmannia aphylla* Willd.; *Lycopodium nudum* L.; *Psilotum domingense* Gand.; *Psilotum floridanum* Michx.; *Psilotum nudum* (L.) Griseb., isonym; *Psilotum triquetrum* Sw.; *Psilotum triquetrum* var. *gracile* Grev. & Hook.; *Tristeca nuda* (L.) P. Beauv. ex J. St.-Hil.)

India, West Indies. Small herb

See *Species Plantarum* 2: 1100–1101. 1753, *Botanisches Magazin* (Römer & Usteri) 2(6): 15. 1789, *Journal für die Botanik* 1800(2): 109, 132. 1801, *Histoire Naturelle des Végétaux, Classés par Familles* 3: 478; 4:315. 1802, *Flora Boreali-Americana* 2: 281. 1803, *Exposition des Familles Naturelles* 1: 39. 1805, *Prodrome des Cinquième et Sixième Familles de l’Aéthéogamie* 106, 112. 1805, *Botanical Miscellany* 2: 362. 1831, *Botanische Zeitung. Berlin* 14: 234–235. 1856, *Systematische Untersuchungen* 130. 1857 and *Bulletin de la Société Botanique de France* 66: 306. 1919

(Whole plant infusion given to children suffering from thrush, and as purgative and also in diarrhea; the juice antibacterial. Only the spores given to infants to stop diarrhea.)

in English: whisk-fern

in China: shi shua ba

in Japan: matsuba-ran (= pine-leaved orchid)

in Okinawa: awa-ran

Psittacanthus C. Martius Loranthaceae

Greek *psittakos* ‘a parrot’ and *anthos* ‘flower’, see *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Flora* 13(1): 106–108. 1830, *Fl. Bras.* (Martius) 5(2): 24, 26–27, 42. 1868 and *Fieldiana, Bot.* 24(4): 62–86. 1946, *Ann. Missouri Bot. Gard.* 47(4): 263–290. 1960 [1961], *Fieldiana, Bot.*, n.s. 13: 29–79. 1983, *Fl. Ecuador* 24: 113–194. 1986.

Psittacanthus calyculatus (DC.) G. Don (*Loranthus calyculatus* DC.; *Psittacanthus americanus* (L.) Mart.;

Psittacanthus americanus Mart.; *Psittacanthus calyculatus* G. Don; *Psittacanthus chrismarii* Urb.)

South America, Mexico.

See *Species Plantarum* 1: 331. 1753, Candolle, Augustin Pyramus de (1778–1841), *Collection de mémoires pour servir à l’histoire du règne végétal ...* Paris, Treuttel et Würtz, 1828–1838, *Flora* 13(1): 108. 1830, *A General History of the Dichlamydeous Plants* 3: 415. 1834, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(1): 13. 1897 and *Fieldiana, Bot.* 24(4): 62–86. 1946, *Ann. Missouri Bot. Gard.* 74(3): 529. 1987, *J. Nat. Prod.* 62(7): 1036–1038. 1999, *Journal of Ethnopharmacology* 86(2–3): 213–218. 2003, *Pharm. Biol.* 48(7): 732–739. 2010

(Antimicrobial, vasoactive, anticancer and antioxidan, used for the treatment of hypertension, cardiovascular diseases.)

Psophocarpus Necker ex DC.

Fabaceae (Phaseoleae)

Greek *psophos* ‘a noise, sound’ and *karpos* ‘fruit’, referring to the opening of the capsules or to the seeds and the rattling noise in the pods, see *Familles des Plantes* 2: 326. 1763, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 403. 1825 and *Kew Bulletin* 33(2): 191–227. 1978, *Economic Botany* 44(3): 391–409. 1990.

Psophocarpus grandiflorus R. Wilczek (*Psophocarpus palustris* sensu Westphal)

Congo, Uganda. Perennial climbing herb, twining, extensive root system, flowers mauve-purple, shoots can root at nodes, leaves and young pods eaten after boiling in water or milk, roasted seeds eaten

See *Bulletin de l’Académie Royale des Sciences et Belles-lettres de Bruxelles* 24: 414. 1954

(Leaf infusion given to induce labor in humans and cattle.)

in Zaire: indubaruba, mgoraorwe, muhulula

Psophocarpus scandens (Endl.) Verdc. (*Botor palustris* sensu Hiern; *Diesingia scandens* Endl.; *Dolichos suffultus* Graham; *Mucuna comorensis* Vatke; *Psophocarpus comorensis* (Vatke) Baill.; *Psophocarpus golungensis* Romariz; *Psophocarpus golungensis* Welw. ex Romariz; *Psophocarpus longepedunculatus* Hassk.; *Psophocarpus longepedunculatus* Hassk.; *Psophocarpus mabala* Welw.; *Psophocarpus palmittorum* sensu Andrews; *Psophocarpus palustris* sensu auct.; *Psophocarpus palustris* sensu R. Vig.; *Psophocarpus tetragonolobus* sensu auct.)

Papua New Guinea, Gabon, Kenya. Perennial climbing herb, sprawling, twining, liana, scandent, vigorous, extensive root system, light blue mauve-purple flowers visited by bees and ants, winged pods, seeds very hard, famine food, flowers and leaves eaten as a vegetable, closely related to *Psophocarpus palustris* Desv.

See *Annales des Sciences Naturelles* (Paris) 9: 420. 1826, *A Numerical List of Dried Specimens* n. 5564. 1831, *Florae Senegambiae Tentamen* 1: 222. 1832, *Flora* 15: 113, 117. 1832, *Flora* 25(2): Beibl. 75. 1842, *Apontamentos Phytogeographicos* 589. 1858, *Oesterreichische Botanische Zeitschrift* 28: 262. 1878, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(48): 380. 1883, *Revisio Generum Plantarum* 1: 163. 1891 and *Portug. Acta Biol.*, ser. B 3: 283. 1952, *Taxon* 17: 539. 1968, *Bot. J. Linn. Soc.* 80: 279–291. 1980

(Leaves as a galactagogue, made into a poultice applied in the treatment of lumbago, cuts, wounds and hemorrhoids; leaves infusion taken to relieve stomachache.)

in English: African winged bean, tropical African winged bean

in Indonesia: jaat monyet, kecipir monyet

in Zaire: lutete, m'pava-n'gumbi

Psophocarpus tetragonolobus (L.) DC. (*Botor tetragonolobus* (L.) Kuntze; *Botor tetragonoloba* (L.) Kuntze; *Dolichos ovatus* Graham; *Dolichos tetragonolobus* L.)

Peninsular Malaysia, origin not certain. Perennial climbing herb, vine, pale to bright blue flowers, four-angled pods, young green leaves and shoots eaten as a vegetable, roots and green pods eaten

See *Systema Naturae*, Editio Decima 2: 1162. 1759, *Revisio Generum Plantarum* 1: 162. 1891 and *Economic Botany* 31(2): 180–188. 1977, *Pharmaceutical Biology* 17(2): 57–60. 1979, *Bot. J. Linn. Soc.* 80: 279–291. 1980, *J. Econ. Taxon. Bot.* 3: 201–225. 1982, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Economic Botany* 46(2): 187–191. 1992, *J. Wuhan Bot. Res.* 16(1): 23–26. 1998, *Pharmaceutical Biology* 45(1): 31–36. 2007, *Afr. J. Trad. CAM* 4(1): 59–63. 2007, *Pharmaceutical Biology* 46(4): 261–265. 2008

(Seeds contain several toxins. Pods antimicrobial, fungicidal. Leaves decoction bactericidal, used as a lotion upon the skin for smallpox; leaves and seeds eaten to cure skin sores, boils and ulcers. Tuberos roots tonic; roots antimicrobial, fungicidal.)

in English: asparagus bean, asparagus pea, four-angled bean, Goa bean, prince's pea, princess bean, short-day asparagus pea, wing bean, winged bean, winged pea

in India: chaukoni sem, dara-dambala

in Japan: hane-mi-sasage

Malay name: kacang botol, kacang belimbing

in New Guinea: aglmong

in Philippines: amale, batang-baimbing, beyed, buligan, calamismis, cigarillas, kalamismis, kamaluson, palag, palam, pallang, parupagulong, segadilla, serenella, sigadilyas, sigarilyas

Psoralea L. Fabaceae (Psoraleeae)

Greek *psoraleos* 'scabby, warty, warted, scurfy', *psora* 'mange', referring to glandular and resinous dots on plants of the genus; see Carl Linnaeus, *Species Plantarum*. 2: 762–764. 1753, *Genera Plantarum*. Ed. 5. 336. 1754 and *N. Amer. Fl.* 24(1): 17. 1919, *Southw. Naturalist* 10: 88. 1965, *Taxon* 41: 568. 1992, *Taxon* 44: 611–612. 1995.

Psoralea ensifolia (Houtt.) Merr. (*Psoralea capitata* L.f.)

South Africa. Perennial non-climbing herb

See *Supplementum Plantarum* 339. 1782 [1781 publ. Apr 1782], *Revisio Generum Plantarum* 1: 194. 1891 and *Journal of the Arnold Arboretum* 19: 348. 1938

(Leaves to cleanse and to hasten healing of ulcers and wounds.)

in South America: huallicaya, yerba de San Agustín, yerba de la Trinidad, yerba del Carnera

Psoralea pinnata L. (*Lotodes pinnata* Kuntze; *Lotodes pinnatum* (L.) Kuntze; *Psoralea pinnata* Andrews, nom. illeg., non *Psoralea pinnata* L.; *Psoralea pinnata* Sieber ex Walp.)

South Africa. Perennial non-climbing tree

See *Species Plantarum* 2: 762–763. 1753, *Linnaea* 13: 512. 1839, *Revisio Generum Plantarum* 1: 193–194. 1891 and *Taxon* 41: 568. 1992

(Roots for hysteria.)

in English: African scurf-pea, blue-pea, dally pine, fountain bush, fountain tree, North American prairie turnip

in Southern Africa: bloukeur, fonteinhos, fonteinhout, penwortel (= taproot), pinwortel, umHlonishwa (Zulu)

Psoralea tenuiflora Pursh (*Lotodes floribunda* Kuntze; *Lotodes floribundum* (Nutt. ex Torr. & A. North America, Mexico. Perennial non-climbing herb

See *Flora Americae Septentrionalis*; or, ... 2: 475. 1814[1813], *A Flora of North America: containing ...* (Torr. & A. Gray) 1(2): 300. 1838, *Smithsonian Miscellaneous Collections* 258: 255. 1878, *Revisio Generum Plantarum* 1: 194. 1891, *Bulletin of the Torrey Botanical Club* 21: 97. 1894 and *N. Amer. Fl.* 24(1): 15–16. 1919, *Contr. Gray Herb.* 65: 14. 1922, *Contr. U.S. Natl. Herb.* 25: 304, 305. 1925, *Novon* 19(3): 311. 2009

(Poisonous.)

Psorospermum Spach Clusiaceae

From the Greek *psora* and *sperma* ‘a seed’, referring to the nature of the seeds, see *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 157. 1836.

Psorospermum alternifolium Hook. f.

Guinea, Mali and Sierra Leone. Shrub, tree

See *Niger Flora* [W.J. Hooker]. 243. 1849

(Used to treat fevers and skin troubles. Infusion of leaves taken as diuretics and strong febrifuges.)

in Guinea: keti

in Sierra Leone: b'atue, funkui, giji, kisui, runko

Psorospermum androsaemifolium Baker (*Psorospermum fanerana* Baker; *Psorospermum malifolium* Baker)

Madagascar. Small tree, branched, yellow to red latex, resinous leaves, inflorescences terminal, flowers white-cream, calyx green, stamens yellow, young fruit with small red dots

See *Journal of Botany, British and Foreign* 20: 19. 1882, *Journal of the Linnean Society, Botany* 25: 295–296. 1889 and Githens T.S. *Drug Plants of Africa*. Philadelphia, University of Pennsylvania Press 1949

(Antimalarial. A preparation of the root and leaf used topically as a treatment for eczema.)

in Madagascar: aleriky, fanerandahy, harongampanihy, tambitsy, tsiarongarongana

Psorospermum baumannii Engl.

Guinea, Togo.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 55: 382. 1919

(Boiled root reported to be an effective remedy against scabies and lice.)

Psorospermum cerasifolium Baker (*Psorospermum emarginatum* Baker)

Madagascar. Shrub, small tree, yellow-red latex, young leaves brown, white flowers, petals cream with brown stripes, green-red fruit, very attractive to butterflies

See *Journal of the Linnean Society, Botany* 21: 324. 1884, *Journal of the Linnean Society, Botany* 22: 453. 1886[1887] and *Flore de Madagascar et des Comores* 136: 1–92. 1951

(Used for cough.)

in Madagascar: harongampanihy

Psorospermum corymbiferum Hochr. (*Psorospermum guineense* auct., misapplied name)

Ghana, Tanzania. Tree or shrub, papery leaves, stigma orange, fruit red, wooded savannah, firewood

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 157. 1836 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 58. 1919, *Kew Bulletin* 1953: 291. 1953, Ripert, C. et al. “[An epidemiological study of human filariasis: loaiaasis, dipetalonemiasis, tetrapetalonemiasis, in Douala fisherman of the river Wouri estuary (Cameroon).” *Rev. Epidemiol. Santé Publique*. 28(3): 331–9. 1980

(Roots boiled and drunk for fever. The bark, with its red resin, and the pounded dried roots a remedy for skin diseases such as scabies and craw-craw (= a term applied in West Africa to a pruritic papular skin eruption, which may lead to ulceration; also a name for onchocerciasis with chronic skin changes in West Africa.) Pulped roots and bark applied locally for skin diseases.)

in French: millepertuis velu

in Gambia: katijankumo, wollo koyo

in Ghana: kaluwuya

in Guinea-Bissau: catidjancuómo, codidjancuma

in Nigeria: cawaiki, cidakara, kaskawami, kiskawali, kiskawoli, légun oko

in Senegal: diura sungalani, gi komonir, kari diakuma, kati diankuma, kating diankumo, kato diankuma, kiti diankuma, koti diankuma, kurkutumandi

in Tanzania: ngogansonta

in Togo: akpalami, nina deyu

Psorospermum corymbiferum Hochr. var. *kerstingi* (Engl.) Keay & Milne-Redh. (*Psorospermum corymbiferum* Hochr. var. *doeringii* Keay & Milne-Redhead; *Psorospermum kerstingii* Engl.)

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 55: 384. August 1919, *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 58. 1919, *Kew Bulletin* 1953: 291. 1953, Ripert, C. et al. “[An epidemiological study of human filariasis: loaiaasis, dipetalonemiasis, tetrapetalonemiasis, in Douala fisherman of the river Wouri estuary (Cameroon).” *Rev. Epidemiol. Santé Publique*. 28(3): 331–9. 1980

(Leaves and twigs, boiled and the oil skimmed off, used for crawl-crawl.)

in W. Africa: karijakuma

Psorospermum glaberrimum Hochr.

West Africa, from The Gambia to Dahomey. Shrub, many-branched, fallow land, degraded coastal forest

See *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 63. 1919, B. Botta et al. "Psorolactones and other metabolites from *Psorospermum glaberrimum*." *Tetrahedron* 44(23): 7193–7198. 1988

(Psorolactones, anthranoids.)

in Guinea: catidjancuómo, codidjancuma

in Sierra Leone: e-turibwerakantr, funsari banko

Psorospermum guineense (L.) Hochr. (*Hypericum guineense* L.; *Vismia guineensis* (L.) Choisy)

Cameroon, Gabon, Ghana, Mali. Tree or shrub, woody, low branching, bark densely fissured, exudate translucent, red latex, flowers white-green, fruits green with longitudinal lines of reddish dots, aromatic odor

See *Species Plantarum* 2: 783–787. 1753, *Hypericum* 4, t. 8, f. 1. 1776, *Florae Lusitanicae et Brasiliensis Specimen* 51, f. 24. 1788, *Monographie du genre Hydrocotyle...* 36. 1821, *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 157. 1836 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 57. 1919, *J. Ethnopharmacol.* 110(1): 99–104. 2007

(Antileishmanial, antiparasitic.)

***Psorospermum lanatum* Hochr.**

West Africa, Guinea, Madagascar. Shrub, white flowers

See *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 59. 1919

(A decoction of the plant taken for neuralgia. The bark used for all manner of skin troubles.)

in Guinea: keti diankuma, kokunu, loli

***Psorospermum senegalense* Spach**

Senegal to Sierra Leone. Bush, zig-zag branches, wooded savanna

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 5: 157, 164. 1836

(Used for all manner of skin troubles and affections, dermatitis, herpes, eczema, leprosy and syphilitic conditions. Magic treatments against evil, amulet.)

in Guinea: angway biyil, catidjancuómo, codidjancuma

in Senegal: diurasumgalani, eklen, katendakomo, katidia-kuma, katidiemkumo, katodiakuma (= mange of the cat), kunkutu, kurkutumadi, madio, makarakun koyoté, suku, unklen

***Psorospermum tenuifolium* Hook. f.**

Gabon, South Nigeria, Cameroon, Zaire. Shrub or small tree, many-branched, red-orange exudate, leaves young pale red-green, petals pink to yellow-green, stamens numerous, immature fruits green, red berries, forest, swamp forest

See *Niger Flora* 242, t. 21. 1849 and *Phytochemistry* 26(9): 2611–2613. 1987

(Used for treatment of all skin troubles.)

in Zaire: bukú bukú

Psorothamnus Rydb. Fabaceae (Amorpheae)

From the Greek *psoros* ‘mangy, scabby’ and *thamnus* ‘bush’, see *Opera Varia* 244. 1758, *Descripción de las Plantas* 185. 1802 and *North American Flora* 24(1): 41, 45–46. 1919, *Memoirs of the New York Botanical Garden* 27: 284. 1977.

***Psorothamnus emoryi* (A. Gray) Rydb.** (*Dalea emoryi* A. Gray; *Parosela emoryi* (A. Gray) A. Heller)

North America, Mexico. Perennial non-climbing shrub

See *Plantae Novae Thurberianae* 315. 1854 and *Catalogue of North American Plants North of Mexico* (ed. 2) 6. 1900, *Taxon* 35: 405–406. 1986, *Journal of Experimental Therapeutics & Oncology* 2(4): 228–236. 2002

(Two active compounds: dalrubone and 5-methoxydalrubone.)

***Psorothamnus fremontii* (Torr. ex A. Gray) Barneby** (*Dalea fremontii* Torr. ex A. Gray; *Dalea fremontii* var. *johnsonii* (S. Watson) Munz; *Dalea johnsonii* S. Rydb.; *Psorothamnus polydenius* var. *jonesii* Barneby; *Psorothamnus subnudus* (S. Watson) Rydb.)

North America. Perennial non-climbing shrub

See *United States Geological Exploration [sic] of the Fortieth Parallel*. Vol. 5, *Botany* 64, pl. 9. 1871, *Geological Survey*

of California, *Botany* 2: 441. 1880 and *Catalogue of North American Plants North of Mexico* (ed. 2) 6. 1900, *Botanical Gazette* 55(4): 305. 1913, *North American Flora* 24(1): 46. 1919, *Contributions to Western Botany* 18(Extract): 41–42. 1933, *Memoirs of the New York Botanical Garden* 27: 51–52. 1977, *A Utah Flora*: Third Edition, revised 417. 2003

(Plant or bark infusion purgative, cathartic, for colds, cough, influenza, pneumonia, kidney ailments, kidney pain and urine incontinence, muscular pains, venereal diseases; stem decoction used for stomachaches, smallpox, influenza.)

in English: dotted dalea, Nevada dalea

Psorothamnus polydenius (Torr. ex S. Watson) Rydb. var. ***polydenius*** (*Dalea polydenia* Torr. ex S. Watson; *Dalea polydenia* Torr.; *Dalea polydenia* var. *subnuda* S. Watson)

North America. Perennial non-climbing shrub

See *United States Geological Exploration [sic] of the Fortieth Parallel*. Vol. 5, *Botany* 64, pl. 9. 1871, *Geological Survey of California, Botany* 2: 441. 1880

(Plant disinfectant, diuretic, antiseptic, stomachic, for measles, tuberculosis. Bark infusion purgative, astringent, analgesic, cathartic, for colds, sore throat, cough, influenza, pneumonia, diarrhea; stem decoction used for whooping cough, stomachaches, smallpox.)

in English: dotted dalea, Nevada dalea

Psorothamnus scoparius (A. Gray) Rydb. (*Dalea scoparia* A. Gray; *Dalea scoparia* fo. *suberosa* Cockerell; *Parosela scoparia* (A. Gray) A. Heller; *Parosela scoparia* fo. *arsenei* Standl.)

North America. Perennial non-climbing shrub, subshrub

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 32. 1849, *Science* 7: 625. 1898 and *Catalogue of North American Plants North of Mexico* (ed. 2) 7. 1900, *North American Flora* 24(1): 48. 1919, *Publications of the Field Museum of Natural History, Botanical Series* 17(2): 195. 1937

(Plant infusion emetic, stomachic, rubbed on spider bites.)

in English: broom dalea

Psorothamnus spinosus (A. Gray) Barneby (*Asagraea spinosa* (A. Gray) Baill.; *Dalea spinosa* A. Gray; *Parosela spinosa* (A. Gray) A. Heller; *Psorodendron spinosum* (A. Gray) Rydb.)

North America, Mexico. Perennial non-climbing tree

See *Adansonia* 9: 233. 1870 and *Catalogue of North American Plants North of Mexico* (ed. 2) 7. 1900, *North American Flora* 24(1): 45. 1919, *Memoirs of the New York Botanical Garden* 27: 25. 1977, *J. Nat. Prod.* 69(2): 261–264. 2004 [Metabolites of the “smoke tree”, *Dalea spinosa*, potentiate antibiotic activity against multidrug-resistant *Staphylococcus aureus*.]

(Antimicrobial.)

in English: desert smoke tree, smoke tree

Psychilis Raf. Orchidaceae

Greek *psyche* and *cheilos* ‘a lip’, referring to the coloured lip; see Constantine Samuel Rafinesque, in *Flora Telluriana*. 4: 40. 1836 [1838] and E.D. Merrill, *Index Rafinesquianus*. 104. 1949.

Psychilis bifida (Aubl.) Saulea (*Encyclia bifida* (Aubl.) Britton & P. Wilson; *Encyclia bifida* (Aubl.) W.J. Schrenk; *Encyclia ekmanii* (Mansf.) Dod; *Encyclia papilionacea* (Vahl) Schltr.; *Epidendrum auropurpureum* Lindl.; *Epidendrum bifidum* Lindl. ex Rehb.f., nom. illeg.; *Epidendrum bifidum* Aubl.; *Epidendrum brittonianum* A.D. Hawkes; *Epidendrum ekmanii* Mansf.; *Epidendrum papilionaceum* Vahl; *Epidendrum papilionaceum* var. *grandiflorum* Cogn.; *Psychilis amena* Raf., nom. superfl.)

Caribbean.

See *Histoire des plantes de la Guiane Française* 2: 824. 1775 and *Repert. Spec. Nov. Regni Veg. Beih.* 6: 74. 1919, *Ark. Bot.* 20 A(15): 16. 1926, *Scientific Survey of Porto Rico and the Virgin Islands* 6: 532. 1930, *Die Orchidee* 28(3): 99. 1977, *Moscossa* 2: 15. 1983, *Phytologia* 65: 8. 1988

(Vermifuge.)

Psychotria L. Rubiaceae

Probably from the Greek *psychotria* ‘vivifying, exhilarating’ or *psyche* ‘soul, life’ and *iatria* ‘therapy, medicine’, referring to the healing properties of some species; or modified and coined by Linnaeus from the Greek word *psychotrophon*, *psychros* ‘cold’ and *trophe* ‘food’, a name already applied by Patrick Browne (1720–1790) to describe a Jamaican taxon; Latin *psychotrophon*, *i* used by Plinius for a plant, betony. See C. Linnaeus, *Systema Naturae*. Ed. 10. 929, 1122, 1364. (May–Jun.) 1759, *Systema orbis vegetabilium* 49. 1830, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(2–4): 31–32, 37. 1853[1852], *Genera Plantarum* 2: 124. 1873, *Adansonia* 12: 227. 1879 and *Recueil des Travaux Botaniques Néerlandais* 31: 289, 291–292. 1934, *Kew Bulletin* 13: 88. 1958, *Bulletin du Jardin Botanique de l’État* 34: 28. 1964, *Memoirs of the New York Botanical Garden* 23: 484, 516–517, 566. 1972, Schultes, R.E. and R.F. Raffauf. *The Healing Forest: Medicinal and Toxic Plants of the Northwest Amazonia*. Dioscorides Press, Portland, Or. 1995, *Annals of the Missouri Botanical Garden* 88(3): 511. 2001.

Psychotria adenophylla Wall. (*Grumilea adenophylla* (Wall.) Miq.; *Psychotria connata* Kurz, nom. illeg.; *Psychotria siamensis* Ridl.; *Uragoga adenophylla* (Wall.) Kuntze; *Uragoga adenophylla* Kuntze)

Trop. Asia.

See *Fl. Ind.* ed. Carey & Wall. 2: 166. 1824, *Flora van Nederlandsch Indië* 2: 297. 1857, *Forest Fl. Burma* 2: 10. 1877, *Revisio Generum Plantarum* 2: 959. 1891 and *J. Straits Branch Roy. Asiat. Soc.* 59: 120. 1911

(Used for stomachache, intestinal complaints and breast pain.)

Psychotria alba Ruiz & Pav. (*Mapouria alba* (Ruiz & Pav.) Müll.Arg.; *Mapouria rigida* Rusby; *Psychotria carthagenensis* Jacq.; *Uragoga alba* (Ruiz & Pav.) Kuntze; *Uragoga alba* Kuntze; *Uragoga carthagenensis* (Jacq.) Kuntze; *Uragoga carthagenensis* Kuntze)

S. Venezuela to W. South America. Lacking the small appendices along the vein on the underside of the leaf

See *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Enumeratio Systematica Plantarum* 16. 1760, *Histoire des plantes de la Guiane Française* 1: 175. 1775, *Flora Peruviana* 2: 58, t. 205, f. a. 1799, *Flora* 59: 458. 1876, *Adansonia* 12: 323. 1879, *Revisio Generum Plantarum* 1: 299. 1891, *Revisio Generum Plantarum* 2: 959. 1891 and *Memoirs of the New York Botanical Garden* 7: 376. 1927, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, Govaerts, R. *World Checklist of Selected Plant Families*. Kew. 2003 [as *Psychotria carthagenensis*.], Delprete, P.G., Smith, L.B., Klein, R.M. *Flora Illustrada Catarinense* 2: 349–842. Editora UFLA, Lavas, Brasil. 2006 [as *Psychotria carthagenensis*.]

(Sometimes used with Ayahuasca.)

Psychotria andamanica Kurz (*Uragoga andamanica* (Kurz) Kuntze)

India, Andaman. Large shrub, shortly pedicelled flowers in cymes, terminal fruits

See *Journal of Botany, British and Foreign* 13: 328. 1875, *Adansonia* 12: 323. 1879, *Revisio Generum Plantarum* 2: 959. 1891 and *Broteria Genet.* 15(3): 147–154. 1994

(For skin complaints, fever, enlarged spleen, to expedite childbirth.)

Psychotria asiatica L. (*Antherura rubra* Lour.; *Aucubaephyllum lioukiense* Ahlb.; *Polyozus lanceolata* Lour.; *Psychotria antherura* Schult., nom. illeg.; *Psychotria esquirolii* H. Lévl.; *Psychotria reevesii* Wall.; *Psychotria reevesii* var. *pilosa* Pit.; *Psychotria rubra* Poir.; *Psychotria rubra* (Lour.) Poir.; *Psychotria rubra* var. *lanceolata* H.L. Li, nom. illeg.; *Psychotria rubra* var. *pilosa* (Pit.) W.C. Chen; *Psychotrophum asiaticum* (L.) Crantz; *Uragoga rubra* (Lour.) Kuntze)

SE Asia, Vietnam, Japan. Shrub, glabrous coriaceous opposite leaves

See *Syst. Nat.* ed. 10, 2: 929. 1759, *Inst. Rei Herb.* 2: 259. 1766, *Revisio Generum Plantarum* 2: 962. 1891 and *Repert. Spec. Nov. Regni Veg.* 10: 435. 1912, *Fl. Indo-Chine* 3: 362. 1924, *J. Arnold Arbor.* 24(3): 374. 1943, nom. illeg., *Acta Phytotax. Sin.* 30: 272. 1992

(Antiinflammatory. Crushed leaves or leaves decoction used as a remedy for contusions and swellings; leaves and stem decoction resolvent and stimulant, useful for treating toothache and earache. Root infusion for malaria; root decoction used for edema, boils, wounds, backache and snakebite. Not to be used by pregnant women.)

Psychotria brachiata Sw. (*Cephaelis polycephala* Schtdl.; *Myrstiphyllum brachiatum* (Sw.) C.L. Hitchc.; *Palicourea caerulea* (Ruiz & Pav.) Schult.; *Psychotria capitellata* DC.; *Psychotria caerulea* Ruiz & Pav.; *Uragoga brachiata* (Sw.) Kuntze; *Uragoga caerulea* (Ruiz & Pav.) Kuntze)

Trop. America.

See *Linnaea* 28: 532. 1857, *Revisio Generum Plantarum* 2: 960. 1891

(A leaves infusion to treat breathing problems, toxic in excess.)

Psychotria brachypoda (Müll.Arg.) Britton (*Mapouria brachypoda* Müll.Arg.; *Palicourea brachypoda* (Müll.Arg.) L.B. Sm. & Downs; *Palicourea gilgiana* Standl.; *Psychotria arrabidaei* Müll.Arg.; *Psychotria pycnantha* Standl.; *Psychotria umbellata* Vell.; *Rudgea umbellata* (Vell.) Müll. Arg.; *Uragoga brachypoda* (Müll.Arg.) Kuntze; *Uragoga umbellata* (Vell.) Kuntze)

South America, Brazil.

See *Bull. Torrey Bot. Club* 18: 109. 1891, *Revisio Generum Plantarum* 2: 955, 958. 1891 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 8: 379. 1931, *Sellowia* 7: 89. 1956, Govaerts, R. *World Checklist of Selected Plant Families Database*. Kew. 2003 [as *Palicourea brachypoda*.]

(Presence of alkaloids and potential analgesic activity.)

Psychotria cantleyi Ridl.

Malaya.

See *J. Straits Branch Roy. Asiat. Soc.* 61: 24. 1912

(May be used as a medicine after parturition, a postpartum remedy.)

Psychotria capensis (Eckl.) Vatke (*Grumilea capensis* (Eckl.) Sond.; *Logania capensis* Eckl.; *Uragoga capensis* (Eckl.) Kuntze)

Ethiopia to S. Africa. Evergreen shrub or small tree, slender stem, horizontal branches and pale brown bark, smooth and leathery leaves shiny light to dark green above and paler below, golden yellow flowers borne in flattish, terminal branched heads, showy red and yellow berries, in evergreen forests, forest margins, shrub and dune bush, edges of rivers

See *S. African Quart. J.* 1: 371. 1830, *Oesterr. Bot. Z.* 25: 230. 1875, *Revis. Gen. Pl.* 2: 959. 1891

(Used for gastric complaints, and root infusions taken to cause vomiting.)

in English: bastard lemonwood, bird-berry, black bird-berry, izele tree, lemon bush

in Southern Africa: swartvoëlbesie; uDzilidzili omhlophe (Swazi); iZeze, isiThitibala, isThithibala, umGongono, uSinga lwamadoda, uManyanya (Zulu); umGono-gono, umGonogono (Xhosa); tshidiri (Venda)

Psychotria capitata Ruiz & Pav. (*Uragoga capitata* (Ruiz & Pav.) Kuntze)

Trop. America.

See *Fl. Peruv.* 2: 59. 1799, *Revisio Generum Plantarum* 2: 959. 1891

(A decoction of the leaves consumed hot to relieve congestion from severe colds.)

Psychotria carthagenensis Jacq. (*Mapouria alba* (Ruiz & Pav.) Müll.Arg.; *Mapouria alba* f. *intermedia* Chodat & Hassl.; *Mapouria alba* var. *tristis* (Müll.Arg.) (Hallucinogenic, used for religious, medicinal and social purposes. An ingredient in the entheogenic tea Ayahuasca, a South American hallucinogenic beverage from the Amazon Indians, a psychoactive substance used in a religious or shamanic context. Ayahuasca is a hallucinogenic beverage derived by boiling the bark of the Malpighiaceae liana *Banisteriopsis caapi* together with the leaves of various admixture plants, viz. *Psychotria viridis*, *Psychotria carthagenensis*, or *Diplopterys cabrerana*. The experimental psychosis observed after drinking Ayahuasca, reproduces the pathologic transmethylation theory of schizophrenia.)

Vernacular names: amyruca, rami appane, rani appani, sameruca, wy-soo-dö, yagé, yage-chacrana

Psychotria colorata (Willd. ex Schult.) Müll.Arg. (*Cephaelis colorata* Willd. ex Schult.; *Uragoga colorata* (Willd. ex Schult.) Kuntze)

Colombia, N. South America, Brazil.

See *Fl. Bras.* 6(5): 372. 1881

(Strong opioid-like analgesic activity has been detected in alkaloids from *Psychotria colorata*.)

Psychotria connata Wall. (*Mapouria connata* (Wall.) K. Schum.; *Psychotria arnottiana* Steud.; *Psychotria connata* Kurz, nom. illeg.; *Psychotria laevigata* Wight & Arn., nom. illeg.; *Psychotria viticina* Steud.; *Uragoga connata* (Wall.) Kuntze; *Vitex laevigata* Wight & Arn.)

India.

See *Fl. Ind.* 2: 163. 1824, *Prodr. Fl. Ind. Orient.*: 433. 1834, *Nomencl. Bot.*, ed. 2, 2: 408, 410. 1841, *Forest Flora of British Burma* 2: 10. 1877, *Die Natürlichen Pflanzenfamilien* 4(4): 112. 1891, *Revisio Generum Plantarum* 2: 960. 1891

(Leaves juice applied externally to reduce the body heat.)

in India: thaalai

Psychotria crassifolia Miq.

Borneo. Small tree

See *Ann. Mus. Bot. Lugduno-Batavi* 4: 205. 1869

(Roots decoction as a postpartum remedy.)

in Borneo: kelebua danum

Psychotria cuspidata Bredem. ex Roem. & Schult. (*Psychotria acuminata* Benth.; *Psychotria acuminata* subsp. *boraginoides* Dwyer; *Psychotria cuspidata* var. *genuina* Müll.Arg., nom. inval.; *Psychotria urophylla* Schltdl.; *Uragoga acuminata* (Benth.) Kuntze; *Uragoga acuminata*

Kuntze; *Uragoga acuminata* (H. Karst.) Farw., nom. illeg.; *Uragoga acuminata* Farw.; *Uragoga cuspidata* (Bredem. ex Roem. & Schult.) Kuntze; *Uragoga cuspidata* (Bredem. ex Schult.) Kuntze; *Uragoga cuspidata* Kuntze; *Uragoga urophylla* (Schltdl.) Kuntze; *Uragoga urophylla* Kuntze)

SE. Mexico to Trinidad and Peru.

See *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Systema Vegetabilium* 5: 192. 1819, *The botany of the voyage of H.M.S. Sulphur* 107. 1845, *Linnaea* 28: 522. 1857, *Revis. Gen. (A root decoction drunk against malaria.)

Psychotria leptothyrsa Miq. (*Uragoga beccarii* (K. Schum.) Kuntze)

Malesia.

See *Ann. Mus. Bot. Lugduno-Batavi* 4: 208. 1869, *Revis. Gen. Pl.* 2: 959. 1891 and *Journal of Natural Products* 73(7): 1207–1213. 2010

(Insecticidal, cytotoxic, anti-HIV, antimicrobial.)

Psychotria leptothyrsa Miq. var. *longicarpa* Valetton (*Psychotria tubiflora* Hosok.)

Pacific.

See *Ann. Mus. Bot. Lugduno-Batavi* 4: 208. 1869, *Revis. Gen. Pl.* 2: 959. 1891 and *Bot. Jahrb. Syst.* 63: 315. 1930, *Trans. Nat. Hist. Soc. Taiwan* 32: 19. 1942, *Journal of Natural Products* 73(7): 1207–1213. 2010

(Insecticidal, cytotoxic, anti-HIV, antimicrobial.)

Psychotria ligustrifolia (Northr.) Millsp. (*Myrstiphyllum ligustrifolium* Northr.; *Psychotria bahamensis* Millsp. ex Britton; *Psychotria bahamensis* Millsp.)

Florida, N. Caribbean. Little-branched shrubs or small trees, opposite leaves tapering below to a short petiole, inflorescence with a long common stalk

See *The Civil and Natural History of Jamaica* in Three Parts 152. 1756 and *Memoirs of the Torrey Botanical Club* 12: 68. 1902, *Bull. New York Bot. Gard.* 3: 451. 1905, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 2: 172. 1906

(Shrub boiled, a bath for swelling or dropsy.)

in English: wild coffee

Psychotria luzoniensis (Cham. & Schltdl.) Fern.-Vill. (*Coffea luconiensis* Cham. & Schltdl.; *Coffea luzoniensis* Cham. & Schltdl.; *Grumilea luconiensis* Merr.; *Grumilea luzoniensis* (Cham. & Schltdl.) Merr.; *Paederia malayana* Fern.-Vill.; *Paederia tagpo* Blanco; *Psychotria luconiensis* (Cham. & Schltdl.) Fern.-Vill.; *Psychotria malayana* Fern.-Vill.)

Philippines. Shrub, glabrous, smooth, erect, leaves shining, cyme compact, flowers white, berry somewhat fleshy yellow or reddish, in secondary forest

See *Linnaea* 4: 32. 1829, *Fl. Filip.*, ed. 3, 4(13A): 112. 1880 and *Philipp. J. Sci.*, C 10: 131. 1915

(Root decoction for dysentery, bark decoction for intestinal pains; scraped fresh roots used for infected wounds. Fresh leaves used topically for headaches; a decoction of the young leaves used for ulcers.)

in Philippines: alitakbo, altoko, burubugnai, dumamai, kadpaayan, kalabol, kalabubo-labayo, katagpo, katagpongubat, kombateo, kombates, lugani, madantauan, nguspul, tagpo, tagpongubat, takpo, tatanok

Psychotria malayana Jack (*Chassalia expansa* Miq.; *Psychotria aurantiaca* Wall.; *Psychotria odorata* Blume ex Miq.; *Psychotria stipulacea* Wall.; *Psychotria stipulacea*

var. *grandifolia* Craib; *Uragoga malayana* (Jack) Kuntze; *Uragoga malayana* Kuntze)

Thailand to Malesia. Small tree, white flowers, lowland forest

See *Malayan Misc.* 1(1): 3. 1820, *Revis. Gen. Pl.* 2: 961. 1891 and *Fl. Siam.* 2: 201. 1934

(Poisonous alkaloids. A decoction of the leaves, sometimes together with those of *Eurycoma longifolia*, taken as a remedy for fevers. May be used as a medicine after parturition, for infected eyes, skin eruptions and ulcers; boil the roots with the roots of *Uvaria micrantha* and use the decoction as a postpartum remedy.)

in Indonesia: berahin bapak

Malay names: meroyan sakit, salang, sesalang

Psychotria marginata Sw. (*Myrstiphyllum marginatum* (Sw.) Hitchc.; *Psychotria nicaraguensis* Benth. ex Oerst.; *Uragoga marginata* (Sw.) Kuntze; *Uragoga marginata* Kuntze; *Uragoga nicaraguensis* (Benth. ex Oerst.) Kuntze; *Uragoga nicaraguensis* Kuntze; *Uragoga nicaraguensis* (Benth.) Kuntze)

S. Mexico to Trop. America.

See *Revis. Gen. Pl.* 2: 957, 961. 1891

(An Ayahuasca admixture.)

Psychotria mindoroensis Elmer

Philippines.

See *Leaf. Philipp. Bot.* 3: 1031. 1911

(Used for infected eyes, skin eruptions and ulcers.)

in Philippines: tagulinau

Psychotria montana Blume (*Chassalia montana* (Blume) Miq.; *Psychotria expansa* Blume; *Psychotria tabacifolia* Wall., nom. nud.; *Psychotria viridissima* Kurz; *Uragoga montana* (Blume) Kuntze; *Uragoga montana* Kuntze)

SE China to Trop. Asia. Shrub, erect, glabrous, base of stipules clasping the petiole as a conspicuous ring, inflorescence paniculate compact, flowers greenish to whitish, berry red turning blackish, in forest

See *Catalogus* 54. 1823, *Numer. List* 8334. 1847, *Fl. Ned. Ind.* 2: 281. 1857, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 41(2): 315. 1872, *Revis. Gen. Pl.* 2: 961. 1891

(Root for ulcers and swellings. Boiled leaves on swellings, rheumatism and stomachache; decoction taken for bacillary dysentery.)

in Malaysia: kayu semelit, selada

in Vietnam: l[aa]s[u], n[us]i, m[aj]y c[as]n c[aa]n

(Useful in the detection of pregnancy.)

in Sierra Leone: kafei

Psychotria sarmentosa Blume (*Mapouria sarmentosa* (Blume) K. Schum.; *Mapouria sarmentosa* K. Schum.; *Uragoga sarmentosa* (Blume) Kuntze; *Uragoga sarmentosa* Kuntze)

Trop. Asia. Climber, panicle dense, flower greenish, corolla finely hairy, berry obovate, a very variable species, in forest

See *Revis. Gen. Pl.* 2: 957. 1891 and *Medical Science Research* 27(10): 715–718. 1999

(Leaves analgesic and antihyperalgesic, to poultice sores, itches and boils. Plant used to expedite childbirth.)

in India: milahan-ah

in Malaysia: akar daldaru, gilik, pena kara jantan, rambai padang

in Thailand: duuk kai yaan, yaa ruat

in Vietnam: [laas]u leo

Psychotria serpens L. (*Grumilea serpens* (L.) K. Schum.; *Psychotria scandens* Hook. & Arn.; *Psychotria serpens* var. *latifolia* Pit.; *Uragoga serpens* (L.) Kuntze)

SE Asia, Japan. Epiphytic creeper

See *Mant. Pl.* 2: 204. 1771, *Revis. Gen. Pl.* 1: 301. 1891, *Nat. Pflanzenfam.* 4(4): 116. 1891 and *Fl. Indo-Chine* 3: 353. 1924

(Taken to improve the blood circulation, and to cure rheumatism, backache, arthritis and wounds.)

Psychotria stenostachya Standl. (*Rudgea thyrsoflora* Donn. Sm.)

Costa Rica to Bolivia.

See *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Transactions of the Linnean Society of London* 8: 327. 1807 and *Botanical Gazette* 61(5): 375–376. 1916, *Publications of*

the Field Columbian Museum, Botanical Series 8(3): 207. 1930, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999

(Reported as being incorporated in Ayahuasca.)

Vernacular names: rumo sacha, yagé

Psychotria tahanensis Ruhsam. (*Psychotria brachybotrys* Ridl., nom. illeg.)

Pen. Malaysia.

(Leaves crushed in water applied to the eyes as drops to obtain “clear vision”, helps see animals in the hunt and allows one to “see with understanding”.)

Psychotria tenuifolia Sw. (*Psychotria laurifolia* Bertol. ex DC., nom. illeg.; *Psychotria pulverulenta* Urb.; *Psychotria sessilifolia* M. Martens & Galeotti; *Psychotria sulzneri* Small; *Uragoga sessilifolia* (M. Martens & Galeotti) Kuntze; *Uragoga tenuifolia* (Sw.) Kuntze)

Mexico to Colombia, Venezuela.

See *Bull. Acad. Roy. Sci. Bruxelles* 11(1): 228. 1844, *Revis. Gen. Pl.* 2: 962–963. 1891 and *Fl. Miami* 176. 1913, *Symb. Antill.* 7: 456. 1913

(For bathing wounds, rashes, swellings. Leaves and flowers applied as poultice on infected sores.)

Vernacular names: dog’s tongue, lengua de perro, x’anal, male anal

Psychotria viridiflora Reinw. ex Blume (*Grumilea viridiflora* (Reinw. ex Blume) Miq.; *Grumilea viridiflora* Miq.; *Psychotria jackii* Hook.f.; *Psychotria sylvatica* Blume; *Psychotria viridiflora* Reinw. ex Kurz; *Psychotria viridiflora* Zoll. ex Miq.; *Uragoga jackii* (Hook.f.) Kuntze; *Uragoga jackii* Kuntze)

Indochina to Malesia. Shrub or small tree, leathery variable leaves, inflorescence paniculate, flowers greenish-pink or white, variable succulent berry yellowish to red, in secondary forest and hedges

See *Bijdr. Fl. Ned. Ind.* 16: 963. [Oct 1826–Nov 1827], *Fl. Brit. India* [J.D. Hooker] 3: 167. 1880, *Revis. Gen. Pl.* 2: 961. 1891

(Leaves, bark and stem juice used for skin complaints, and bites of poisonous insects and snakes. Leaves as an antiseptic wash for cleaning septic wounds; warm leaves applied on wounds.)

in Borneo: engkarabai

in Indonesia: halan, ki kores, tenam betul

in Malaysia: jarum-jarum, julong-julong bukit, sepanggung, ubat halan

Psychotria viridis Ruiz & Pav. (*Palicourea viridis* (Ruiz & Pav.) Roem. & Schult.; *Palicourea viridis* (Ruiz & Pav.) Schult.; *Psychotria glomerata* Kunth; *Psychotria microdesmia* Oerst.; *Psychotria trispicata* Griseb.; *Uragoga*

glomerata (Kunth) Kuntze; *Uragoga glomerata* Kuntze; *Uragoga microdesmia* (Oerst.) Kuntze; *Uragoga microdesmia* Kuntze; *Uragoga trispicata* (Griseb.) Kuntze; *Uragoga trispicata* Kuntze; *Uragoga viridis* Kuntze; *Uragoga viridis* (Ruiz & Pav.) Kuntze)

Trop. America, SE Mexico. Small tree or shrub, smooth dark green leaves, bilobed stipules, small white flowers tubular, small indehiscent berry, in rainforest, flooded lowland, moist soil

See *Systema Naturae*, Editio Decima 2: 929, 1122, 1364. 1759, *Histoire des plantes de la Guiane Française* 1: 172, pl. 66. 1775, *Flora Peruviana* 2: 61, t. 210, f. b. 1799, *Systema Vegetabilium* 5: 195. 1819, *Nova Genera et Species Plantarum* (quarto ed.) 3: 362. 1818 [1819], *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(2–4): 36–37. 1853, *Adansonia* 12: 323. 1879, *Revisio Generum Plantarum* 2: 960–961, 963. 1891, *Revisio Generum Plantarum* 3: 299. 1891 and *Journal of Ethnopharmacology* 10(2): 195–223. 1984, *Journal of Ethnopharmacology* 12(2): 179–211. 1984, *AAU Reports* 24: 1–241. 1990, *Journal of Ethnopharmacology* 54(1): 37–40. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999, *Rapid Biological Inventories* 1: 1–79. 2000, *J. Pharmacol. Exp. Ther.* 306(1): 73–83. 2003

(Psychedelic drugs, psychoactive. Spiritual. In Perú, Ecuador, Colombia, and parts of Brazil, the leaves of *Psychotria viridis* and *Psychotria carthaginensis* are commonly prepared with Ayahuasca (*Banisteriopsis caapi*) to make the ceremonial visionary healing medicine Ayahuasca.)

Vernacular names: amiruca panga, chacruna, folha, chacrona, reinha, sami ruca

Psychotria zombamontana (Kuntze) E.M.A. Petit (*Grumilea kirkii* Hiern; *Psychotria meridianomontana* E.M.A. Petit; *Psychotria meridianomontana* var. *angustifolia* E.M.A. Petit; *Psychotria meridianomontana* var. *glabra* E.M.A. Petit; *Psychotria meridio-montana* E.M.A. Petit; *Uragoga zombamontana* Kuntze)

Tanzania to Northern Prov.

See *Fl. Trop. Afr.* 3: 216. 1877, *Revisio Generum Plantarum* 2: 958. 1891 and *Bull. Jard. Bot. État* 34: 86, 88–90. 1964

(A bark infusion used for fever.)

Psydrax Gaertner Rubiaceae

Greek *psydrax*, *psydrakos* ‘blister, bump’, in allusion to the warted and wrinkled fruits of some species or to the pimply seeds, see *De Fructibus et Seminibus Plantarum*... 1: 125. 1788.

Psydrax dicoccos Gaertn. (*Canthium dicoccum* (Gaertn.) Merr.; *Canthium dicoccum* Merr.; *Plectronia dicocca* (Gaertn.) F. Muell.; *Polyozus bipinnata* Lour.; *Vangueria dicocca* (Gaertn.) Miq.)

India, Sri Lanka, Vietnam, SE China. Treelet, densely foliaceous, bark cracked in irregular pieces, deep green shining leaves, creamy white fragrant flowers, black fruits, leaves edible, wet deciduous forest, semi-evergreen forest

See *Mantissa Plantarum* 1: 16. 1767, *De Fructibus et Seminibus Plantarum* 1: 125, t. 26, f. 2. 1788, *Fl. Cochinch.*: 74. 1790, *Flora van Nederlandsch Indië* 2: 251. 1857, *Fragmenta Phytographiae Australiae* 9: 185. 1875 and *Philippine Journal of Science* 35(1): 8. 1928, *Fitoterapia* 72(3): 201–205. 2001

(Bark applied on fracture; stem bark decoction given in order to get relief from gas trouble. Leaves extract taken for easy delivery. Used in religious functions, 15th day after death. Stem bark, leaves and fruits used as fish poison.)

in India: abalu, abblu, alumba, arsul, baelaache, balasu nainkinna, bilachi, dahjan, ellele, gandukakkorala, haldu, hanagi gaare, hatharaanike, hattaraanike, hatteranike, heddaraanike, hunnageru, imburuttam, kakkorla, kallurukolu, karai, karu, korla, nakkareni, nakkena, nakkini, nalla, nalla balasu, nalabalusu, naumpapala, nekkeni, nikanimaram, niralli, tupa

in Sri Lanka: poro palu

Psydrax livida (Hiern) Bridson (*Afrocanthium burtii* (Bullock) Lantz; *Afrocanthium parasiebenlistii* (Bridson) Lantz; *Canthium burtii* Bullock; *Canthium clityophyllum* Bullock; *Canthium gymnosporioides* Launert; *Canthium huillense* Hiern; *Canthium junodii* (Burt Davy) Burt Davy; *Canthium lividum* Hiern; *Canthium parasiebenlistii* Bridson; *Canthium syringodorum* (K. Schum.) Bullock; *Canthium wildii* (Suess.) Codd; *Plectronia heliotropiodora* K. Schum. & K. Krause; *Plectronia huillensis* (Hiern) K. Schum.; *Plectronia junodii* Burt Davy; *Plectronia livida* (Hiern) K. Schum.; *Plectronia syringodora* K. Schum.; *Plectronia wildii* Suess.)

Zaire, Kenya to S. Africa. Small tree or shrub, leafy, woody, straggling, subprostrate, pale bark, between young leaves a pair of oval pointed membranous stipules, small white axillary flowers slightly fragrant, each flower tubular, dense clusters of fleshy smooth black fruits, leaves browsed by cattle, ripe fruit pulp eaten, miombo woodland, on banks of stream, in woodland, dry woodland

See *Species Plantarum* 1: 110. 1753, *Mantissa Plantarum* 1: 16. 1767, *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *Museum Botanicum* 1: 178. 1850, *Flora of Tropical Africa* 3: 144. 1877, *Die Pflanzenwelt Ost-Afrikas* C: 386. 1895, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853--61* 1: 476. 1898 and *Botanischer Jahresbericht* 1898 (1): 393. 1900, *Bot. Jahrb. Syst.* 39: 540. 1907, *Bull. Misc. Inform. Kew* 1921: 192. 1921, *Bull. Misc. Inform. Kew* 1932: 373, 382. 1932, *Kew Bulletin* 1933: 146. 1933, *Bull. Misc. Inform. Kew* 1935: 568. 1935, *Transactions of the Rhodesia Scientific Association* 43: 59. 1951, *Mitt. Bot. Staatssamml. München* 2: 314. 1957, *Kirkia* 1: 109. 1961, *Kew Bulletin* 40: 705. 1985, *Flora of Tropical East Africa* 3: 870. 1991, *Botanical Journal of the Linnean Society* 146: 278. 2004

(Roots used for bruise, fever, toothache, wounds; roots boiled and drunk for stomach problems.)

in English: false turkey-berry, mottled-bark canthium

in Tanzania: bulindi, isugula, izogwa, kiviruviru, mbahuza mtwe, mbwanhubwanhu, mdoghwe, mfilu dume, mgango, mgubalu, mkamu, mpakapaka, msongwansimba, mudoghwe, mudogwe, namu, ngubalu, nkamu

Psydrax locuples (K. Schum.) Bridson (*Canthium locuples* (K. Schum.) Codd; *Plectronia locuples* K. Schum.)

Mozambique to South Africa.

See *Mantissa Plantarum* 1: 16. 1767, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 75. 1899 and *Kirkia* 1: 108. 1961, *Portugaliae Acta Biologica, Série B, Sistemática, Ecologia, Biogeografia e Paleontologia* 11: 219–247. 1972, *Kew Bulletin* 40: 708. 1985

(Relieves headaches, fresh leaves crushed, then placed on the forehead.)

in English: whipstick canthium

in Swaziland: isikhondlwane

Psydrax parviflora (Afzel.) Bridson (*Canthium afzelianum* Hiern; *Canthium vulgare* (K. Schum.) Bullock; *Pavetta parviflora* Afzel.; *Plectronia afzeliana* (Hiern) Holland)

Tropical Africa. Tree, erect, straight, slender, bole fluted, small fruits

See *Remedia guineensis*, quorum collectionem... 47. 1815, *Fl. Trop. Afr.* 3: 142. 1877, *Die Pflanzenwelt Ost-Afrikas* C: 386. 1895 and *Kew Bull.*, Addit. Ser. 9: 359. 1915, *Bulletin of Miscellaneous Information Kew* 1932: 374. 1932, *Kew Bulletin* 40(4): 700. 1985

(Insecticide.)

Psydrax parviflora (Afzel.) Bridson subsp. ***rubrocostata*** (Robyns) Bridson (*Canthium rubrocostatum* Robyns)

Sudan to Malawi. Evergreen shrub or tall tree, bark with a distinctive almond smell if cut, triangular stipules, tiny cream-white flowers in dense stalked heads, soft and black fruit, bee forage, ripe fruits eaten fresh, moist lowland forests, montane rainforests

See *Encyclopédie Méthodique, Botanique* 1: 602. 1785 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 616. 1929, *Kew Bulletin* 40(4): 700, 702. 1985

(Roots and fruits vermifuge, general tonic, for cough, influenza. Fruits for coughs and colds. Roots cooked with meat and bones and taken as a treatment for intestinal worms.)

in Tanzania: livilo, mgongo, mkomambuzi, mkome, msada, msechela, mshangati, mshangule, muebe, omemuta

Psydrax subcordata (DC.) Bridson var. ***subcordata*** (*Canthium glabriflorum* Hiern; *Canthium polycarpum* Schweinf. ex Hiern; *Canthium welwitschii* Hiern; *Plectronia*

formicarum K. Krause; *Plectronia glabriflora* (Hiern) K. Schum.; *Plectronia laurentii* var. *katangensis* De Wild.; *Plectronia subcordata* (DC.) K. Schum.; *Plectronia welwitschii* (Hiern) K. Schum.)

Trop. Africa. Tree, compact crown, slash whitish, leaves green, flowers white heavily scented, in swamp forest, open areas

See *Fl. Trop. Afr.* 3: 139–140. 1877 and *Kew Bulletin* 40: 698. 1985

(Leaves for treating prolonged menstruation. Molluscicides. Twig, bark, for pulmonary troubles, mental troubles; bark rubbed on the body as a stimulant. Ceremonial, ritual.)

in Central African Republic: monzononzone

in Congo: mataata

in Guinea: ka, ndaka

in Sierra Leone: an ram, aowolikpoi, diango, ka, mana, mbeli wa-waa, mbeli-wawa, ngega, ngele-gale

Psydrax umbellata (Wight) Bridson (*Canthium dicoccum* (Gaertn.) Merr. var. *umbellata* (Wight) Santapau & Merchant; *Canthium dicoccum* (Gaertn.) Merr. var. *umbellatum* (Wight) Santapau & Merchant; *Canthium umbellatum* Wight; *Canthium umbellulatum* Korth.; *Plectronia didyma* var. *umbellata* (Wight) Gamble; *Plectronia korthalsii* K. Schum.; *Plectronia umbellata* Kuntze; *Plectronia umbellata* (Wight) K. Schum.; *Plectronia umbellata* Schum.; *Plectronia umbellata* Benth. & Hook.f.; *Plectronia umbellata* Baker)

India.

See *Icon. Pl. Ind. Orient.* [Wight] 3: t. 1034. 1845, *Ned. Kruidk. Arch.* ii. II. 235. 1851, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 115. 1873, *Forest Fl. Burma* ii. 35. 1877, *J. Linn. Soc., Bot.* 20: 168. 1883 [1884 publ. 1883], *Revis. Gen. Pl.* 1: 293. 1891, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(4): 92. 1891 and *Leaflet. Philipp. Bot.* i. 28, 360. 1906, *Flora of the Presidency of Madras* 2: 624(440). 1921, *Philippine Journal of Science* 35(1): 8. 1928, *Bulletin of the Botanical Survey of India* 3: 107. 1962, *Kew Bulletin* 48(4): 762. 1993

(Used in Ayurveda and Sidha. Stem bark ground with palm jaggery and given for intestinal disorders, stomachache, gas, diarrhea and dysentery. Veterinary medicine, leaf extract given orally for a normal parturition.)

in India: ababaln, abblu, alambamaram, alampamaram, anakombi, arsul, ellele, gandukakkorla, gandukakorle, irumbarappan, kari, nakkena, nallamandharam, nannul, njanjul, oppele, vappe, vappe maram, varapoola, yellal

Ptaeroxylon Ecklon & Zeyher Ptaeroxylaceae

Greek *ptairo*, *ptairein* ‘to sneeze’ and *xylon* ‘wood’, the red heartwood contains peppery irritating oil.

Ptaeroxylon obliquum (Thunb.) Radlk. (*Kirkia lentiscoides* Engl.; *Ptaeroxylon obliquum* Radlk.; *Ptaeroxylon utile* Eckl. & Zeyh.)

South Africa.

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 54. [Dec 1834–Mar 1835], *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* xx. (1890) 165. 1890

(Decoction of stems, leaves, used for boils, insecticidal.)

in English: sneezewood

in East Africa: mwandara

in Southern Africa: nieshout, muandara mahogany, umtata, umTati; umThathe, uBhaqa (= torch) (Zulu); umThathi (Xhosa); munukha-vhaloi (= tree smelling evilly of witches) (Venda); umThathi (Swazi); tati (Western Transvaal, northern Cape, Botswana); Ambhandadzwidzwi (Thonga)

Pteleopsis Engl. Combretaceae

Greek *ptelea* ‘an elm tree’ and *opsis* ‘aspect, appearance, resemblance’.

Pteleopsis hylodendron Mildbr. (*Pteleopsis albidiflora* De Wild.; *Pteleopsis bequaertii* De Wild.)

Tropical Africa.

See *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 25. 1894 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 61. 1921

(Triterpenoids and saponins in stem bark.)

in Cameroon: mobito, rissiehe, sikon

in Central Africa: miong, nka, sikon

in Congo: miong

in Gabon: nka

in Ivory Coast: koframire

in Zaire: mukala, osanga

Pteleopsis myrtifolia (M.A. Lawson) Engl. & Diels

Tropical Africa. Tree, spreading, ascending, drooping, flowers aromatic, white inflorescence

See *Flora of Tropical Africa* 2: 431. 1871 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 4: 4, t. 1/B. 1900

(Roots antifungal, antiproliferative, used for dysentery, sterility, infertility, venereal diseases, swelling of the stomach, wounds. Leaves used to drive away evil spirits.)

in Tanzania: mgovu, mlakwentz, mlawilila, mneke, mngogi, mwindi, ngora, ngovu

Pteleopsis suberosa Engl. & Diels

See *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 25. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 509. 1907

(Saponins and tannins.)

in Mali: nanyinge, tereni

in Nigeria: wuyan giwa

in W. Africa: nyanyanga

Pteridium Gled. ex Scopoli
Dennstaedtiaceae (Pteridaceae)

Pteridion, diminutive of the Greek *ptēris* 'fern', from *pteron* 'a wing, a feather', from Sanskrit *pat* 'to fly', *patara* 'flying'; see Giovanni Antonio Scopoli (1723–1788), *Flora Carniolica*. 169. Viennae 1760 and Cockayne, Leonard (1855–1934), [*Botanical reports to the New Zealand Department of Lands*]. Wellington, Gov't. Printer, 1907–1929, Tryon, R.M. "A revision of the genus *Pteridium*." *Rhodora* 43: 1–31, 37–67. 1941, *Fl. Madagasc.* 5(4): 65–112. 1958, Page, C.N. "The taxonomy and phytogeography of bracken—A review." *J. Linn. Soc., Botany* 73: 1–34. 1976, Perring, F.H. and B.G. Gardener, eds. "The biology of bracken. [Symposium.]" *J. Linn. Soc., Bot.* 73(1–3): i–vi, 1–302. 1976, *Bulletin of the British Museum (Natural History)*, *Botany* 15(2): 123–161. 1986, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, *Cuscatlania* 1: 1–28. 1989, *Fieldiana: Botany, New Series* 22: 1–128. 1989 [Tryon, R.M. & R.G. Stolze, *Pteridophyta of Peru—Part II*: 13. Pteridaceae—15. Dennstaedtiaceae], Hirono, I. Carcinogenic Bracken Glycosides. Pages 239–251 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. II. *Glycosides*. Boca Raton. 1989, *Rapid Assessment Program Working Papers* 10: 1–372. 1998, *Memoirs of the New York Botanical Garden* 88: 1–1054. 2004.

Pteridium centrali-africanum (Hieron.) Alston (*Allosorus aquilinus* (L.) C. Presl; *Allosorus capensis* (Thunb.) Pappe & Raws.; *Allosorus lanuginosus* (Bory ex Willd.) C. Presl; *Asplenium aquilinum* (L.) Bernh.; *Cincinnati aquilina* (L.) Gled. ex Trevisan; *Eupteris aquilina* (L.) Newm.; *Ornithopteris aquilina* (L.) J. Sm.; *Paesia aquilina* (L.) Hook.; *Pteris capensis* Thunb.; *Pteris coriifolia* Kunze; *Pteris lanuginosa* Bory ex Willd.)

Pteridium Gled. ex Scopoli Dennstaedtiaceae (Pteridaceae)

Cosmopolitan. Terrestrial fern, climbing fronds, sorus brown, tender leaves cooked and eaten, ripe fruits eaten, probably the most widespread species of all vascular plants, aggressive, invading disturbed areas as weeds in pastures

See *Species Plantarum* 2: 1073–1077. 1753, *Flora Carniolica* 169. 1760, *Botanik von Ost-Afrika* 3(3): 11. 1879 and *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition*, 1911–1912, unter Leitung von Eric Graf von Rosen 1: 7. 1914, *Ferns S. Afr.* ed. 2: 264, t. 134. 1915, *Boletim da Sociedade Broteriana*, ser. 2 30: 22. 1956, *Fl. Madagasc.* 5(4): 65–112. 1958, Cody, W.J., Crompton, C.W. "The biology of Canadian weeds. 15. *Pteridium aquilinum* (L.) Kuhn." *Can. J. Plant Sci.*, 55: 1059–1072. 1975, *Nucleus* 20: 105–108. 1977, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 15(2): 123–161. 1986, *Proc. Natl. Acad. Sci. U.S.A.* 83: 4389–4393. 1986, *Canad. J. Bot.* 65: 647–652. 1987, Fenwick, G.R. "Bracken (*Pteridium aquilinum*)—toxic effects and toxic constituents." *J. Sci. Food Agric.*, 46: 147–173. 1988, *Aspects of Plant Sciences* 11: 459–465. 1989, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *British Fern Gazette* 15: 141–149. 1996, *Recherches pour le Développement, Série Sciences Biologiques* 15: 23–42. 1999

(*Pteridium aquilinum* toxicity moderate, all parts of bracken-fern contain toxic chemicals. Ingesting fresh or dry fronds or underground rhizomes caused toxic signs and death in ruminants and non-ruminants; bracken has been shown to contain thiaminase and other compounds with mutagenic and carcinogenic properties. Cattle, sheep and wild animals poisoned after ingesting bracken. Rhizome pounded up and used along with *Selaginella* to treat snakebite; an ointment for curing wounds and burns; rhizome for disorders of spleen. Leaves shoot infusion taken for skin diseases; crushed fronds antiseptic and astringent. Ceremonial, used in worship; magico-religious beliefs, used to manufacture temporary clothing for women working in pond fields and worn or carried as protection against lightning.)

in English: bracken, bracken fern, brackenfern, brake, brake fern, eagle fern, eastern bracken, hog brake, hog-pasture brake, pasture brake

in Ecuador: llashipa

in Congo: esiola, kougou, kungu

in Kenya: tilalwet

in Southern Africa: adelaarsvaring; ukozani (Zulu); hombewe, hombge, mondgio (Shona); muvanguluvha (Venda)

in Tanzania: mshilu, siru

in Zambia: luputu, mukochi, mushilu, ngoni

in China: jue

in India: seneya, theeppana

in Japan: warabi (= bracken)

in Nepal: ainu

in Philippines: 'anam'am

in Thailand: kt-kiah

Pteridium esculentum (Forst.f.) Nakai (*Pteridium esculentum* (G. Forst.) Cockayne; *Pteris esculenta* Forst.f.)

Australia, Pacific. Herbaceous perennial, stout blackish horizontal rhizome, erect coarse leaves

See *Florulae Insularum Australium Prodrumus* 74. 1786, *Botanik von Ost-Afrika* 3(3): 11. 1879 and *Rep. Bot. Surv. Tongariro Natl. Park* 34. 1908 [*Survey of the Tongariro National Park* (Dept. of Lands N.Z., C.-11, 1908), *Botanical Magazine* 39(461): 109. 1925

(Poisonous, prolonged ingestion of large amounts of green or dry bracken fern produces aplastic anemia.)

in English: Austral bracken, bracken, bracken fern, common bracken

Malay name: paku rotan

Maori names: marohi, rahurahu, rarahu, rarauhe, takata

Pteris L. Pteridaceae (Dryopteridaceae)

Greek *pteris* 'fern' (Theophrastus), Latin *pteris*, *pteridis* for a species of fern (Plinius), see *Species Plantarum* 2: 1073–1077. 1753, *The British Herbal* 525, t. 74. 1756, *Flora Carniolica* 170. 1760, *Syst. Pteris aspericaulis Wall. ex J. Agardh (*Pteris aspericaulis* Wall.)

China, Nepal.

See *A Numerical List of Dried Specimens* [Wallich] n. 107. 1828, *Recensio Specierum Generis Pteridis* 22. 1839 and *Indian Fern J.* 8: 87–92. 1991, *Bot. Mag. (Tokyo)* 105: 105–124. 1992

(Antibacterial. Stem mashed and the extract applied on cuts and wounds to stop bleeding and infection. Fern fronds infusions for influenza, cough, fever, kidney disorders; frond juice applied on cuts and boils. Root decoction for dysentery; roasted rhizome eaten to get relief from backache; rhizome paste applied on pimples.)

in Nepal: guhya sattar, mauro pire unyu, tamda

Pteris biaurita L. (*Campteria biaurita* (L.) Hook.; *Campteria galeotti* (Fée) T. Moore; *Litobrochia biaurita* (L.) J. Sm.; *Litobrochia galeottii* Fée; *Pityrogramma calomelanos* (L.) Link; *Pteris acanthoneura* Alston; *Pteris atrovirens* H.B. Willd; *Pteris biaurita* C. Chr., nom. illeg., non *Pteris biaurita* L.; *Pteris biaurita* Tardieu, nom. illeg., non *Pteris biaurita* L.; *Pteris flavicaulis* Hayata; *Pteris galeotti* (Fée) Hook.; *Pteris linearis* Poir.; *Pteris mildbraedii* Hieron.; *Pteris quadriaurita* var. *biaurita* (L.) J. Bommer & H. Christ)

India. Terrestrial fern, erect, perennial, single stout rachis, scaly rhizome densely hairy, fronds unipinnate used for the preservation of eggs for a long period

See *Species Plantarum* 2: 1072, 1076. 1753, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 3: 19–20. 1833, *Genera Filicum*, pl. 65, A. 1842, *Cultivated Ferns* 37. 1857, *Bulletin de la Société Botanique de Belgique* 35(1): 190. 1896 and *Index Filicum* 593. 1906, *Fl. Lesser Antill.* 2: 145. 1977, *Aspects of Plant Sciences* 11: 459–465. 1989, *Proceedings of the Indian Academy of Sciences. Plant Sciences* 99(2): 131–134. 1989, *Indian Fern Journal* 6: 131–132. 1989

(Plant juice given to sterile woman for fertility. Stem mashed and the extract applied as antibacterial on cuts and wounds to stop bleeding and infection. Fern fronds infusions for flu, cough, fever, kidney disorders. Root decoction for dysentery.)

in English: silver fern, silverback fern

in India: nara, thaday uniu

Malay name: paku ragi

in Nepal: hade unyu

Pteris camerooniana Kuhn (*Pteris bonapartei* C. Chr.; *Pteris manniana* Mett. ex Kuhn; *Pteris pellucida* C. Presl)

Tropical Africa, Philippines. Terrestrial herb

See *Reliquiae Haenkeanae* 1(1): 55. 1825, *Systema Vegetabilium*, editio decima sexta 4(1): 73. 1827, *Filices Africanae* 84, 207. 1868 and *Catalogue des Plantes de Madagascar, Pterid.* 52. 1932, *Fl. Madagasc.* 5(4): 65–112. 1958

(Rhizome made into paste and applied over burns.)

in India: kalchuruli

Pteris cretica L. (*Pteris cretica* var. *nervosa* (Thunb.) Ching & S.H. Wu; *Pteris nervosa* Thunb.; *Pteris nervosa* Wall.; *Pteris pentaphylla* Willd.; *Pteris serraria* Sw.; *Pteris treacheriana* Baker; *Pteris trifoliata* Fée; *Pteris trifoliata* H. Christ; *Pteris triphylla* Mett.; *Pteris triphylla* M. Martens & Galeotti; *Pteris triphylla* Bertero; *Pteris triphylla* Bertero ex Colla; *Pteris triphylla* Agardh; *Pteris triphylla* Baker; *Pycnodoria cretica* (L.) Small; *Pycnodoria cretica* Small)

China, India, Himalaya. Fern, fronds as vegetable

See *Mantissa Plantarum* 1: 130. 1767, *Syst. Veg.*, ed. 14 (J.A. Murray). 930. 1784, *Flora Japonica*, ... (Thunberg) 332. 1784, *Journal für die Botanik* 1800(2): 65. 1801, *Species Plantarum*. Popularis Sin.* 3(1): 28. 1990, *New Botanist* 17: 267–272. 1990, *Plant Tissue Culture Letters* 8: 179–184. 1991, *Bot. Mag.* (Tokyo) 105: 105–124. 1992, *J. Jap. Bot.* 71: 214–222. 1996, *Brit. Fern Gaz.* 15: 141–149. 1996, *Newslett. Int. Organ. Pl. Biosyst.* (Pruhonice) 33: 25–26. 2001

(Fronds eaten as laxative; fresh fronds decoction given for dysentery. Rhizome juice applied to glandular swellings.)

in English: Cretan brake

in India: lingra

Pteris ensiformis Burm.f. (*Onychium chinense* (Desv.) Fée; *Phorolobus chinensis* Desv.; *Pteris crenata* Sw.; *Pteris ensiformis* var. *merrillii* (C. Chr. ex Ching) S.H. Wu; *Pteris merrillii* C. Chr. ex Ching; *Pteris stricta* Poir.)

India. Young fronds steamed and eaten

See *Flora Indica* ... nec non Prodrumus Florae Capensis 230. 1768, *Journal für die Botanik* 1800(2): 65. 1801, *Encyclopédie Méthodique, Botanique* 5(1): 713. 1804, *Mémoires de la Société Linnéenne de Paris* 6: 171, t. 7–8. 1827, *Mémoires sur les Familles des Fougères* 5: 132. 1852 and *Acta Phytotaxonomica Sinica* 9(4): 348–349. 1964, *Flora Reipublicae Popularis Sinicae* 3(1): 39. 1990

(Young fronds juice astringent, a decoction given in dysentery; rhizome juice applied to the glandular swelling of the neck.)

in English: sword brake

in Japan: hoko-shida

in the Philippines: pakong parang

Pteris geminata Wall. (*Campteria kleiniana* C. Presl, nom. nud.; *Pteris kleiniana* (C. Presl) H. Christ; *Pteris kleiniana* Christ; *Pteris maxima* Baker)

China, Nepal.

See *A Numerical List of Dried Specimens* [Wallich] n. 2180. 1829, *Tentamen Pteridographiae* 147, pl. 5, f. 19. 1836, *Syn. Fil.* (Hooker & Baker) 165. 1867, *Synopsis Filicum* (Hooker & Baker) ed. 2. 480. 1874, *Bull. Herb. Boissier* 4. 666. 1896

(Fronde juice applied to treat cuts and wounds.)

in Nepal: thadho nyuro

Pteris grandifolia L. (*Heterophlebium grandifolium* (L.) Fée; *Litobrochia altissima* (Poir.) Fée; *Litobrochia grandifolia* (L.) J. Sm.; *Litobrochia grandis* Fée; *Litobrochia kunzeana* (J. Agardh) Fée; *Pteris altissima* Poir.; *Pteris elata* J. Agardh; *Pteris grandifolia* var. *campanae* Rosenst.; *Pteris kunzeana* J. Agardh; *Pteris protea* Liebm.)

Peru, Mexico.

See *Species Plantarum* 2: 1073–1074. 1753, *Encyclopédie Méthodique, Botanique* 5: 722. 1804, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 163. 1841, *Mémoires sur les Familles des Fougères* 5: 140, t. 11A, f. 9–12. 1852 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 291–292. 1909, *Fl. Lesser Antill.* 2: 143. 1977

(To bathe the entire body following a snakebite, especially by a fer-de-lance.)

Pteris longifolia L. (*Pteris aequalis* C. Presl; *Pteris longifolia* Cav.; *Pteris longifolia* Wall., nom. illeg.; *Pteris longifolia* auctt.; *Pteris longifolia* var. *angusta* H. Christ; *Pteris longifolia* var. *angusta* H. Christ ex Donn. Sm.; *Pycnodoria longifolia* (L.) Britton; *Pycnodoria longifolia* Britton)

South America. Fern, fronds used as vegetables

See *Species Plantarum* 2: 1074. 1753, *Encyclopédie Méthodique, Botanique* 5: 711. 1804, *Synopsis Filicum* 96. 1806, *Species Plantarum*. Christ; *Pteris quadriaurita* var. *strigulosa* H. Christ, nom. illeg.; *Pteris repandula* Link)

Sri Lanka. Terrestrial herb, used for catching crabs from their holes

See *Observationes Botanicae* 6: 38–39. 1791, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 1073–1074. 1809, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 324. 1811, *Mémoires de la Société Linnéenne de Paris* 6(3): 297. 1827, *Linnaea* 9: 75. 1834, *Hortus Regius*

Botanicus Berolinensis 56. 1841, *Mémoire sur les Fougères du Mexique* 53. 1842, *Mémoires sur les Familles des Fougères* 8: 75. 1857, *Species Filicum* 2: 204. 1858, *Index Filicum* (T. Moore) 220. 1861, *Bull. Soc. Roy. Bot. Belgique* 35, pt. 1: 189. 1896, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 99. 1897 and *Primitiae Florae Costaricensis* 3(1): 22. 1901, *Bulletin de l'Herbier Boissier, sér. 2, 5*: 160. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 397, 400. 1915, *Mémoires de l'Institut Français d'Afrique Noire* 28: t. 12, f. 3. 1953

(Rhizome made into a paste and applied over boils, to take out the pus; crushed rhizome astringent, emollient. Leaves extract used in households as repellent for insects, red ants and termites.)

in India: njandu thuravan, vayalchuruli

in Nepal: mauro

Pteris setulosocostulata Hayata (*Pteris setuloso-costulata* Hayata)

India. Herbaceous ferns, sori on ventral margins

See *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 4: 241–242, f. 168. 1914

(Leaf paste as a strong antiseptic. Leaf juice applied on wounds to check bleeding and for a quick recovery.)

in India: tharee unyo

Pteris similis Kuhn (*Pteris spinulifera* Schumann)

East Africa.

See *Species Plantarum* 2: 1073–1077. 1753, *Reisen in Ost-Afrika* 3(3): 21. 1879

(Leaves juice for hemorrhoids. Veterinary medicine.)

in Congo: cikanganyambwe, mbalizi

Pteris vittata L. (*Pteris costata* Bory; *Pteris diversifolia* Sw.; *Pteris aequalis* C. Presl; *Pteris ensifolia* Poir.; *Pteris inaequilateralis* Poir.; *Pteris longifolia* Cav.; *Pteris longifolia* Wall., nom. illeg.; *Pteris longifolia* auctt.; *Pteris longifolia* L.; *Pteris microdonata* Gaudin; *Pteris vittata* fo. *cristata* Ching; *Pycnodoria vittata* (L.) Small; *Pycnodoria vittata* Small)

China. Fodder

See *Species Plantarum* 2: 1074. 1753, *Encyclopédie Méthodique, Botanique* 5: 711. 1804, *Synopsis Filicum* 96. 1806, *Species Plantarum*. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 387. 1827, *A Numerical List of Dried Specimens* [Wallich] n. 111. 1828 and *Ferns of Florida* 89. 1932, *Acta Botanica Austro Sinica* 1: 6. 1983

(Whole plant poisonous. Plant demulcent, hypotensive, antiviral, antibacterial, tonic, antiseptic. Magico-religious beliefs, spiritual, emotional, planted to keep the enemy away from the villages.)

in English: Chinese bracken, Chinese brake, Chinese ladder brake, ladder brake, rusty bracken, rusty brake

in China: wu gong cao

in India: tatkhar

in Japan: moe-jima-shida

in Nepal: sechik, unigar

Pteris wallichiana J. Agardh (*Campteria wallichiana* (J. Agardh) T. Moore; *Litobrochia wallichiana* (J. Agardh) Fée; *Pteris morrisonicola* Hayata; *Pteris yunnanensis* H. Christ)

India, China, Japan.

See *Recensio Specierum Generis Pteridis* 69–70. 1839, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 404. 1841, *Mémoires sur les Familles des Fougères* 5: 135. 1852, *Index Filicum* 221. 1861, *Bulletin de l'Herbier Boissier* 6(12): 957. 1898 and *Botanical Magazine* 23(265): 33. 1909, *Flora Reipublicae Popularis Sinicae* 3(1): 83. 1990

(Rhizome antibacterial. Whole plant fish poison. Veterinary medicine, plant fed to animals in case of indigestion.)

in India: rugdik

in Nepal: dalumo

Pternandra Jack Melastomataceae

Greek *pterna*, *pteren* 'heel' and *aner*, *andros* 'male, stamen', the anthers are heeled; see William Jack, in *Malayan miscellanies*. Bencoolen [Benkulen, Indonesia, Sumatran Mission Press] 2(7): 60. 1822.

Pternandra coerulea Jack (*Pternandra caerulea* Jack)

Malay Peninsula.

See *Malayan miscellanies* 2(7): 60–61. 1822

(Fruits for hydrocele.)

in English: cursed shade

Malayan names: benyut paya, bunut paya, delek puteh, kelat biru, kulit nipis, lidah katak, menaun, nipis kulit, sial menaun, sial menaun, sial munahun, ubah merkatak

Pternandra cogniauxii M.P. Nayar

Malay Peninsula. Shrub

See *Bull. Bot. Surv. India* 17(1–4): 52. 1975 [publ. 1978]

(Fruits eaten to prevent boils and abscesses.)

in Borneo: pulu

Pternopetalum Franchet Apiaceae (Umbelliferae)

Greek *pterna* 'heel' and *petalon* 'leaf, petal', see *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 246. 1885 (1886) and *Hooker's Icones Plantarum* 28(2): sub t. 2737. 1902 [1905 publ. May 1902], *Das Pflanzenreich* IV 228(Heft 90): 175, 179. 1927.

Pternopetalum botrychioides (Dunn) Handel-Mazzetti var. *botrychioides* (C.B. Clarke) Ridley (*Cryptotaeniopsis botrychioides* Dunn)

China.

See *Journal of the Linnean Society, Botany* 35(247): 494–495. 1903 [1901–1904 publ. 1903], *Symbolae Sinicae* 7(3): 718. 1933

(Stomachic.)

in China: san xue qin

Pternopetalum delavayi (Franchet) Handel-Mazzetti (*Carum delavayi* Franchet; *Cryptotaeniopsis delavayi* (Franchet) Dunn; *Cryptotaeniopsis delavayi* Dunn)

China.

See *Bull. Soc. Philom. Paris* sér. 8, vi. (1894) 120. 1894 and *Journal of the Linnean Society, Botany* 35(247): 495. 1903 [1901–1904 publ. 1903], *Symb. Sin.* 7(3): 718. 1933

(Astringent, stomachic.)

in China: lan cang nang ban qin

Pternopetalum leptophyllum (Dunn) Handel-Mazzetti (*Cryptotaeniopsis leptophylla* Dunn; *Cryptotaeniopsis viridis* C. Norman; *Pternopetalum confusum* C. Norman; *Pternopetalum viride* (C. Norman) Handel-Mazzetti)

China.

See *J. Linn. Soc., Bot.* 35: 495. 1903 [1901–1904 publ. 1903], *J. Bot.* 67: 146. 1929, *Symb. Sin.* 7(3): 719. 1933, *J. Bot.* 78: 231. 1940

(Astringent, stomachic.)

in China: bao ye nang ban qin

Pternopetalum nudicaule (H. Boissieu) Handel-Mazzetti (*Cryptotaeniopsis nudicaulis* H. Boissieu; *Pternopetalum nudicaule* var. *esetosum* Handel-Mazzetti)

China.

See *Bull. Acad. Geogr. Bot.* xvi. 184. 1906, *Symb. Sin.* 7(3): 718. 1933

(Blood purifier.)

in Madagascar: ahepotsy

Pterocelastrus Meissner Celastraceae

Greek *pteron* 'wing' and *Celastrus* L., *kelastron*, *kelastrós*, an ancient name used by Theophrastus for an evergreen tree whose fruits were on the tree throughout winter; the seeds are winged, see *Pl. Vasc. Gen.* 1: 68. 1837.

Pterocelastrus rostratus Walp. (*Asterocarpus rostratus* (Thunb.) Eckl. & Zeyh.; *Celastrus rostratus* Thunb.; *Pterocelastrus rostratus* (Thunb.) Walp.)

South Africa. Tree or shrub, often confused with *Apodytes dimidiata*

See *Journal of Ethnopharmacology* 119(3): 482–500, 513–537. 2008

(Roots for spinal disease.)

in English: beaked pterocelastrus, red candlewood

in Southern Africa: rooikershout, seHlulamanya, uGobandlovu, uSahlulamanya

Pterocelastrus tricuspidatus Sond. (*Pterocelastrus litoralis* Walp.; *Pterocelastrus stenopterus* Walp.; *Pterocelastrus tetraopterus* Walp.)

South Africa. Tree or shrub, very variable, straight trunk, spreading, small sweet-scented creamy-white flowers, horned orange capsules, reddish black seeds

See *Journal of Ethnopharmacology* 119(3): 482–500. 2008

(Astringent, antimycobacterial, for respiratory ailments.)

in English: candlewood, cherrywood

in Southern Africa: iBholo, iTywina, kershout, kers(ie)hout, kersiehout, rooikersiehout, seHlulamanya, uTwina, witpeer, witpeerhout

Pteroceltis Maxim. Ulmaceae

From the Greek *pteron* ‘wing’ and the genus *Celtis* L., referring to the winged fruits.

Pteroceltis tatarinowii Maximowicz (*Pteroceltis tatarinowii* var. *pubescens* Handel-Mazzetti; *Ulmus cavaleriei* H. Léveillé)

China. Tree

See *Bull. Acad. Imp. Sci. Saint-Petersbourg* 18: 292–293. 1873 and *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 296. 1912, *Sinensia* 2(11): 133. 1932

(Oil extracted from the seeds.)

in China: qing tan

Pterocephalus Adans. Dipsacaceae (Caprifoliaceae)

Greek *pteron* ‘wing’ and *kephale* ‘head’, alluding to the fruiting head, see *Fam. Pl.* (Adanson) 2: 152, 595. 1763.

Pterocephalus hookeri (C.B. Clarke) Diels (*Pterocephalus batangensis* Pax & K. Hoffm.; *Pterocephalus hookeri* (C.B. Clarke) Airy Shaw & M.L. Green; *Scabiosa hookeri* C.B. Clarke)

Nepal. Fragrant deep purple flowers

See *Species Plantarum* 1: 98–101. 1753, *The Flora of British India* [J.D. Hooker] 3(8): 218–219. 1881 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(5): 601. 1901, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 12: 497. 1922, *Hand-List Rock Gard. Pl. Royal Bot. Gard. Kew* ed. 4 109. 1934, *Taxon* 41: 569. 1992

(Whole plant used for diarrhea, dysentery, cough, cold, fevers, stomachache, colic pain, hypertension, edema, gout, as an antidote. Root paste taken to treat high fever.)

in Bhutan: spang-rtsi-do-bo

in Nepal: panze

Pterocymbium R. Br. Sterculiaceae (Malvaceae)

Greek *pteron* ‘wing’ and *kymbe* ‘boat’, *kymbos* ‘cavity’, referring to the ovaries, see *Pterocymbium*, with observations on Sterculiaceae, the tribe to which it belongs 219. 1844, *Pl. Jav. Rar.* [Benn.] 219. t. 45. 1844.

Pterocymbium tinctorium Merr. (*Heritiera tinctoria* Blanco)

Malaya, Philippines.

See *Hortus Kewensis*; or, a catalogue ... 3: 546–547. 1789, *Fl. Filip.* [F.M. Blanco] 653. 1837

(Bark and fruit said to be poisonous.)

in Philippines: taluto

Pterocypsela C. Shih Asteraceae

From the Greek *pteron* ‘wing’ and *kypsele* ‘a hollow vessel, beehive, basket’, see *Species Plantarum* 2: 797–798. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 176–177. 1838 and *Bull. Soc. Linn. Normandie* ser. 7, 6: 169–200. 1923, *Kew Bull.* 18(3): 427–486. 1966, *Taxon* 26: 557–565. 1977, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978, *Acta Phytotaxonomica Sinica* 26(5): 385. 1988, *Grassl. China* 1995(1): 16–20. 1995.

Pterocypsela indica (L.) C. Shih (*Brachyramphus sinicus* Miq.; *Lactuca amurensis* Regel & Maxim.; *Lactuca brevirostris* Champ. ex Benth.; *Lactuca brevirostris* var. *foliis indivisis* Hemsl.; *Lactuca cavaleriei* H. Lévl.; *Lactuca indica* fo. *indivisa* (Maxim.) H. Hara; *Lactuca indica* L.; *Lactuca indica* var. *dentata* (Komar.) Chu; *Lactuca indica* var. *foliis indivisis* (Hemsl.) Ling; *Lactuca kouyangensis* H. Lévl.; *Lactuca mauritiana* Poir.; *Lactuca squarrosa* (Thunb.) Maxim.; *Lactuca squarrosa* fo. *indivisa* Maxim.; *Lactuca squarrosa* var. *dentata* Komar.; *Lactuca squarrosa* var. *integrifolia* Kom.; *Prenanthes squarrosa* Thunb.)

India, China.

See *Mantissa Plantarum* 2: 278. 1771, *Flora Japonica*, ... 303. 1784, *Encyclopédie Méthodique, Botanique* 3: 292. 1813, *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 237. 1852, *Index Seminum* [St. Petersburg] 42. 1857, *Journal de Botanique Néerlandaise* 1: 105. 1861, *Annales Museum Botanicum Lugduno-Batavi* 2: 189. 1865, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 19: 526. 1874, *Journal of the Linnean Society, Botany* 23: 480. 1888 and *Repertorium Specierum Novarum Regni*

Vegetabilis 8(185–187): 450. 1910, *Contributions from the Institute of Botany, National Academy of Peiping* 3: 187. 1935, *Enumeratio Spermatophytarum Japonicarum* 2: 220. 1952, *Fl. Madagasc.* 189: 623–911. 1963, *Acta Phytotaxonomica Sinica* 26(5): 387. 1988

(Latex used as a substitute for opium.)

Pterodiscus Hook. Pedaliaceae

From the Greek *pteron* ‘wing’ and *diskos* ‘a disc’, from the broadly winged disk of the fruit.

Pterodiscus ruspolii Engl. (*Pedalium ruspolii* (Engl.) Engl.; *Pedalium ruspolii* Engl. var. *aureus* Chiov.; *Pterodiscus somaliensis* Baker ex Stapf; *Pterodiscus wellbyi* Stapf)

East Africa.

See *Annuario del Reale Istituto Botanico di Roma* 7: 31. 1897

(Veterinary medicine, infusion given to remove afterbirths in cows.)

in Kenya: lotuk

Pterolepis (DC.) Miq. Melastomataceae

Greek *pteron* ‘wing, feather’ and *lepis* ‘a scale’, see *Sp. Pl.* 1: 346. 1753, Humboldt, Friedrich Wilhelm Heinrich Alexander von (1769–1859), *Monographia Melastomacearum*. Paris, 1816–1823, *Mem. Wern. Nat. Hist. Soc.* 4: 298. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 134–135, 138, 140. 1828, *Gen. Pl.* [Endlicher] 1214. 1840, Miquel, Friedrich Anton Wilhelm (1811–1871), *Commentarii phytographici* 72. Lugduni Batavorum, 1838–1840, *Ann. Sci. Nat., Bot.* sér. 3, 13: 355. 1850, *Trans. Linn. Soc. London* 28(1): 38–39. 1871 [8 Dec 1871–13 Jan 1872] and *Ceiba* 19(1): 1–118. 1975, *Nordic J. Bot.* 14(1): 73–104. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1339–1419. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 394–574. 2007.

Pterolepis trichotoma (Rottb.) Cogn. (*Arthrostemma exiguum* Naudin; *Arthrostemma goudotianum* Naudin; *Arthrostemma ladanoides* (Rich.) DC.; *Arthrostemma pumilum* (Bonpl.) Naudin; *Arthrostemma pusillum* (Miq.) Naudin; *Osbeckia pumila* (Bonpl.) DC.; *Osbeckia pumila* DC.; *Pterolepis eglerti* Brade & Markgr.; *Pterolepis goudotiana* Triana; *Pterolepis goudotiana* (Naudin) Triana; *Pterolepis hispida* (Rich.) Gleason; *Pterolepis ladanoides* (Rich.) Triana; *Pterolepis lanceolata* Cogn.; *Pterolepis pohliana* Cogn.; *Pterolepis pumila* Crueg.; *Pterolepis pumila* Cogn.; *Pterolepis pumila* (Bonpl.) Cogn.; *Pterolepis pumila* var. *procera* Cogn.; *Pterolepis pumila* var. *ramosa* Cogn.; *Pterolepis pumila* var. *robusta* Cogn.; *Pterolepis pusilla* Miq.; *Rhexia hispida* Rich.; *Rhexia ladanoides* Rich.; *Rhexia pumila* Bonpl.; *Rhexia pumila* Humb. & Bonpl.; *Rhexia pumila* Mutis; *Rhexia strigosa* Rich.; *Rhexia trichotoma* Rottb.; *Tibouchina strigosa* (Rich.) Cogn.) (*Rhexia* L., an ancient

Greek name, *rhegnymi* ‘to break, break asunder, rend’, *rhexis* ‘breaking, bursting, cleft’; Plinius applied Latin *rhexia*, *ae* to a plant, also called *onochilis*.)

South America.

See *Descriptiones rariorum plantarum ... e terra surinamensi* 9, t. 5. 1776, Rottboll, Christen Friis (1727–1797), *Descriptiones plantarum quarundam surinamensium; cum Fragmenta materiae medicae ... surinamensis*. Hafniæ et Lipsiæ, 1798, *Actes de la Société d’Histoire Naturelle de Paris* 1: 108. 1792, *Monographia Melastomacearum* 72, t. 27. 1813, *Prodr.* (DC.) 3: 136, 141. 1828, *Linnaea* 18: 619. 1845, *Linnaea* 20: 102. 1847, *Ann. London* 28(1): 39. 1871 [8 Dec 1871–13 Jan 1872], *Flora Brasiliensis* (Martius) 14(3): 261–264, 279. 1885, *Monographiae Phanerogamarum* 7: 266. 1891 and *Publ. Carnegie Inst. Wash.* 522: 333. 1940, *Diario de Observaciones de Jose Celestino Mutis, 1760–1790*. Bogota, 1957–1958, *Willdenowia* 2(5): 772. 1961, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 534–535. 1996

(Analgesic, antiinflammatory.)

Vernacular name: chachiquis

Pterolobium R. Br. ex Wight & Arnott Fabaceae (Caesalpiniaaceae, Caesalpinioideae, Leguminosae)

Greek *pteron* ‘wing’ and *lobos* ‘a pod’, the winged pods; see Robert Wight and G. Arnott Walker Arnott, *Prodromus florum Peninsulae Indiae Orientalis*. 1: 283. London, 1834 and *Webbia* 13: 133–228. 1957.

Pterolobium hexapetalum Santapau & Wagh (*Pterolobium hexapetalum* (Roth) Santapau & Wagh)

India.

See *Bulletin of the Botanical Survey of India* 5: 108. 1964, *BMC Complementary and Alternative Medicine* 6: 35. 2006

(Antimicrobial, tonic. Decoction of leaves prepared in water is drunk by pregnant women during delivery to reduce delivery pain. Sources of Resveratrol and its analogues.)

in India: baadu bakka, baadu bakkana mullu, bada bakka, chirukotigoru, errasikaaya, gurrapugacha, guvva korinda, kabali mullu, karu indu, kodimudusu, korinda, kotigooru, pulithodugu, sanna korinda, valakaduda, vallikatura, waleka-dooda, yerrachikai, yerrachiku, yerraseengai, yerrasiku

Pterolobium macropterum Kurz (*Pterolobium indicum* Hance var. *macropterum* (Kurz) Kurz ex Baker; *Pterolobium sinense* J.E. Vidal)

India. Climber, armed with small sharp prickles, white flowers

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 71. 1873, *The Flora of British India* 2(5):

259. 1878, *Journal of Botany, British and Foreign* 21(10): 297–298. 1883 and *Bulletin du Muséum National d'Histoire Naturelle* 227. 1974, *Adansonia* sér. 2, 15(3): 391. 1976 [1975 publ. 1976]

(Fresh leaves chewed or a decoction drunk to treat tuberculosis and respiratory diseases.)

in China: da chi lao hu ci

in Vietnam: durc thuỳ, (dây) song trang do

Pterolobium stellatum (Forssk.) Brenan (*Acacia stellata* (Forssk.) Willd.; *Acacia stellata* Willd.; *Cantuffa exosa* J.F. Gmelin; *Cantuffa stellata* Chiov.; *Mimosa stellata* Lour.; *Mimosa stellata* Forssk.; *Pterolobium exosum* (J.F. Gmel.) Bak.f.; *Pterolobium exosum* Baker f.; *Pterolobium lacerans* R. Br., nom. inval.; *Pterolobium lacerans* Wall.)

South Africa. Climbing or straggling shrub, armed with small recurved sharp prickles, small sweetly scented yellow or whitish flowers, inflorescence a dense raceme, winged pod, a source of red dye, impenetrable live fence

See *Flora Aegyptiaco-Arabica* 177. 1775, *Syst. Nat.*, ed. 13[bis]. 2(1): 677. 1791, *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 1078. 1806, *Voy. Abyss.* [Salt] 64. 1814 and *Ann. Bot.* (Roma) 13: 409. 1915, *Legum. Trop. Africa* 3: 621. 1930, *Memoirs of the New York Botanical Garden* 8(4): 425. 1954, *Ann. Missouri Bot. Gard.* 68: 551, 557. 1981, *Journal of Ethnobiology and Ethnomedicine* 2: 54. 2006

(Root decoction against stomachache and ear, nose and throat diseases; a root infusion drunk by women against infertility. Juice of the roots is swallowed to treat snakebites.)

in English: kantuffa, redwing

in Kenya: mûtandambogo

in Southern Africa: katdoring, rank-wag'n-bietjie, vlam-wag'n-bietjie; luhakangue (Venda); igado (Shona)

in Tanzania: mutanda

Pterospermum Schreber Sterculiaceae (Malvaceae)

Greek *pteron* and *sperma* 'seed', with reference to the winged seeds; see J.C.D. von Schreber, *Genera Plantarum*. 2: 461. 1791.

Pterospermum acerifolium Willd. (*Pentapetes acerifolia* Linn.; *Pterospermum acerifolium* (L.) Willd.)

India. Tree, orbicular-oblong leaves white-downy below, white flowers in axillary or terminal clusters, woody globose capsules

See *Genera Plantarum* 2: 461. 1791, *Species Plantarum*. Editio quarta 3(1): 729. 1800, *FBI* 1: 368. 1874 and *For. Fl. Punj.* ed. 3. 45. 1956, *Journal of Cytology and Genetics* 7–8: 98–105. 1973, *Tr. Fl. Malaya* 2: 367. 1973, *Journal of Cytology and Genetics* 22: 95–101. 1987

(Bark useful in intestinal complaints, anemia, headache and pains. Bark and leaves used in smallpox. The indumentum from the lower side of leaf is said to be used to prevent bleeding from wounds; leaf paste applied on headache. Flowers and bark charred and mixed with *kamala* (*Mallotus philippensis*) applied on suppurating smallpox. A tonic from the flowers a cure for inflammation, ulcers, tumours, headache, abdominal pain, indigestion, dehydration, blood troubles and leprosy; calyx made into a paste and applied on glandular swellings around neck. The flowers kept among cloths impart a pleasant perfume and keep away insects. Roots juice given as antidote in poisoning; roots applied as a paste on wounds.)

in English: maple-leaf wing-seed-tree, maple-leaved bayur

in China: chi zi shu

in India: dieng-khong-swet, dieng-tharo-masi, hathipaila, hatipahela, hatipeala, kanak-champa, kanako champa, kaniar, karnikara, katha-champa, kaungla-araung, laukaung-kraung-araung, laupauk-lauk-araung, mackchand, mackchun, matsa kanda, mayeng, moragos, morra, muchkund, muchkunda (much, mucus; kund, fragrant flower), muchkundachapa, muchukenda, mukundachapa, muskunda, num-bong, siksil, taguru-changne, taun-poewun, waisip-thing

in Nepal: hattipaila, kathe chaanp

in Pakistan: kanack champa, moo chkund

Pterospermum blumeianum Korth.

Sumatra, Java.

See *Ned. Kruidk. Arch.* i. 311. 1848

(For enlarged spleen, abdominal complaints, fever, pound the bark and apply as a poultice. Roots decoction as a postpartum remedy.)

Malay names: bayor, bayor rimba, bayur

Pterospermum diversifolium Blume

Philippines.

See *Bijdr. Fl. Ned. Ind.* 2: 88. 1825

(Bark and flowers used in smallpox.)

in Philippines: bayok

Pterospermum heterophyllum Hance (*Pterospermum levi-nei* Merr.)

China.

See *Genera Plantarum* 2: 461. 1791, *Journal of Botany, British and Foreign* 6(64): 112. 1868 and *Philippine Journal of Science* 13(3): 146–147. 1918, *Acta Botanica Austro Sinica* 5: 161–176. 1989

(Roots febrifuge, abortifacient.)

in China: fan bai ye shu

Pterospermum reticulatum Wight & Arn.

India. Tree, creamy white petals, sepals densely tomentose, woody capsule densely tomentose

See *Prodr. Fl. Ind. Orient.* 1: 69. 1834 [10 Oct 1834]

(A postpartum remedy, tonic.)

Pterospermum xylocarpum (Gaertn.) Santapau & Wagh (*Pterospermum xylocarpum* (Gaertn.) Oken; *Velaga xylocarpa* Gaertn.)

India.

See *Fruct. Sem. Pl.* 2: 245 (t. 133). 1791, *Allg. Naturgesch.* iii. (2) 1198. 1841 and *Journ. Arn. Arb.* xxxi. 283. 1950, *Bull. Bot. Surv. India* v. 108. 1964

(Used in Sidha. Bark decoction given to cure asthma; bark juice to reduce labor pain. Paste of flowers and root given for menstrual disorders; flowers paste taken to treat barrenness in women; paste of flowers of this plant and cinnamon bark applied on forehead to cure headache.)

in India: chettu, duddika, kanakakombu, loluga, lolugu, macappunti, machkund, muchukundi, mutchukunda, nolika, polavu, pulavu, tada, thada, udupai

Pterospora Nutt. Ericaceae (Monotropaceae)

Greek *pteron* ‘a wing’ and *spora* ‘seed’, with reference to the winged seeds, see *The Genera of North American Plants* 1: 269–270. 1818 and *Fl. Neotrop.* 66: 13–27. 1995.

Pterospora andromedea Nutt.

North America. Perennial, saprophyte, erect saprophytic herb, stems viscid, nodding inflorescence, petals white-red

See *The Genera of North American Plants* 1: 269–270. 1818 and *Wasmann J. Biol.* 33(1–2): 1–88. 1975

(A whitish growth found on the roots used for toothache.)

in English: giant birds’-nest, pinedrops, woodland pinedrops

Pterozonium Fée Pteridaceae (Adiantaceae)

Greek *pteron* ‘wing’ and *zone* ‘a belt, armour, girdle’, *zonion* is the diminutive of *zone*, see *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 304. 1811, *Mém. Foug.*, 5. *Gen. Filic.* 178. [1850–1852], *Festschrift zum 50 Jährigen Jubiläum der Königstädtischen Realschule zu Berlin* 325. 1882, *Mémoires de la Société d’Histoire Naturelle de Strasbourg* 4(1): 202. 1850 and *Mutisia* 7: 7. 1952, *Fern Gaz.* 11(2–3): 141–162. 1975.

Pterozonium reniforme (Mart.) Fée (*Gymnogramma reniformis* Mart.; *Pterozonium reniforme* var. *ulei* Brause; *Trichiogramma reniformis* (Mart.) Kuhn)

Colombia.

See Martius, Carl Friedrich Philipp von (1794–1868), *Icones Plantarum Cryptogamicarum* ... 88, t. 26. Monachii: Impensis Auctoris, 1828–1834, *Mémoires sur les Familles des Fougères* 178, t. 16A. 1850–1852, Kuhn, Maximilian (1842–1894), *Die Gruppe der Chaetopterides unter den Polypodiaceen.* [Berlin, Winckelmann, 1882] [*Festschrift zum 50 Jährigen Jubiläum der Königstädtischen Realschule zu Berlin* 326. 1882] and *Notizbl. Königl. Bot. Gart. Berlin* 6: 110. 1914

(Weakly cyanogenic. Spores as snuff together with a hallucinogen. Ritualistic curing ceremonies, the spores.)

Pterygota Schott & Endlicher Sterculiaceae

Greek *pterygotos* ‘winged’, *pteron* ‘wing’, referred to the winged seeds, see *Meletemata Botanica* 32. 1832, Brown, Robert (1773–1858), *Pterocymbium*, with observations on Sterculiæ, the tribe to which it belongs. London, 1844.

Pterygota alata (Roxb.) R. Br. (*Pterygota alata* R. Br.; *Pterygota alata* Thwaites; *Pterygota roxburghii* Schott & Endl., nom. illeg.; *Sterculia alata* Roxb.; *Sterculia alata* Wall.; *Sterculia alata* Blanco)

SE Asia, India. Tree, white wood, leaves ovate-cordate, brownish-yellow flowers in panicles, woody subglobose follicles, compressed oblong seeds, ripe seeds eaten both by men and monkeys, seeds eaten roasted

See *Hort. Bengal.* 50. 1814, *Plants of the Coast of Coromandel* 3: 84, t. 287. 1820, *Numer. List* [Wallich] n. 1127 D. 1829, *Pl. Javan. Rar.* 234. 1844, *Fl. Filip.*, ed. 2 [F.M. Blanco] 525. 1845, *Enum. Pl. Zeyl.* [Thwaites] 29. 1858–1864, *FBI* 1: 380. 1874

(Stimulant, digestive, aphrodisiac.)

in English: winged pterygota

in China: chi ping po

in India: baung-laung-thing, lator, paung-laung-thing

in Malaya: kasah

Ptychopetalum Benth. Olacaceae

From the Greek *ptyche* ‘a fold’ and *petalon* ‘petal’, see *London Journal of Botany* 2: 376. 1843, *Annals and Magazine of Natural History*, ser. 2 8: 172. 1851.

Ptychopetalum olacoides Benth.

South America.

See *London Journal of Botany* 2: 377. 1843 and *Phytother. Res.* 16: 223. 2002, *Journal of AOAC International* 89(6): 1532–1537. 2006, *Journal of Natural Products* 70(12): 2010–2013. 2007, *Journal of electrocardiology* 40(6): 534. 2007

(Bark antioxidant, aphrodisiac, anxiogenic, stimulant, tonic, antinociceptive, nerve tonic. Catuama, an herbal

drug, a mixture of *Trichilia catigua*, *Paullinia cupana*, *Ptychopetalum olacoides* and *Zingiber officinale*.)

Pueraria DC. Fabaceae (Phaseoleae)

For the Swiss botanist Marc Nicolas Puerari, 1766–1845, teacher. See *Species Plantarum* 2: 725. 1753, *Mantissa Plantarum* 1: 101. 1767, *Annales des Sciences Naturelles*. (Paris) 4: 97. 1825, Candolle, Augustin Pyramus de (1778–1841), *Histoire de botanique genevoise*. 48. Genève, 1830 [= *Mém. Soc. Phys. Genève*. 5: 48. 1830], *Plantae Junghuhnianae* 234–236. 1852 and J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 114. 1965, *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 109–110. 1978, *Annals of the Missouri Botanical Garden* 67(3): 523–818. 1980 [1981] ["Leguminosae, Subfamily Papilionoideae."], Stafleu and Cowan, *Taxonomic Literature*. 4: 423. Utrecht 1983, *Agric. Univ. Wageningen Papers* 85–1: 1–132. 1985, Sørensen, M. "A taxonomic revision of the genus *Pachyrhizus* (Fabaceae—Phaseoleae)." *Nordic Journal of Botany* 8(2): 167–192. 1988, *Vascular Flora of the Southeastern United States* 3(2): xix, 1–258. 1990, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Nordic J. Bot.* 12: 339–346. 1992.

Pueraria candollei Benth. var. *mirifica* (Airy Shaw & Suvat.) Niyomdham (*Pueraria mirifica* Airy Shaw & Suvat.)

Thailand, Burma. Perennial climbing shrub

See *Plantae Junghuhnianae* 2: 235. 1852, *J. Linn. Soc., Bot.* 9: 123. 1865 [1867 publ. 1865] and *Pflanzenr.* (Engler) *Menispermac.* 276. 1910, *Kew Bull.* 1952, 550. 1952

(Tuber of *Galactia tenuiflora* (Willd.) Wight & Arn. mixed with the tubers of *Pueraria mirifica* Airy Shaw et Suvat. and *Stephania pierrei* Diels, and honey, made into pills and taken as rejuvenator.)

Pueraria lobata (Willd.) Ohwi (*Dolichos hirsutus* Thunb.; *Dolichos japonicus* hort.; *Dolichos lobatus* Willd.; *Dolichos trilobus* L.; *Dolichos trilobus* Houtt., nom. illeg., non *Dolichos trilobus* L.; *Neustanthus chinensis* Benth.; *Pachyrhizus thunbergianus* Siebold & Zucc., nom. illeg.; *Phaseolus trilobus* Aiton; *Phaseolus trilobus* (L.) Aiton; *Pueraria argyi* H. Lévl. & Vaniot; *Pueraria bodinieri* H. Lévl. & Vaniot; *Pueraria caerulea* H. Lévl. & Vaniot; *Pueraria chinensis* (Benth.) Ohwi; *Pueraria harmsii* Rech.; *Pueraria hirsuta* Kurz; *Pueraria hirsuta* (Thunb.) C.K. Schneid., nom. illeg., non *Pueraria hirsuta* Kurz; *Pueraria hirsuta* (Thunb.) Pantropical. Perennial climbing shrub, creeper, hairy stems, small pink haory flowers, densely hairy torulose pods

See *Species Plantarum* 2: 725. 1753, *Transactions of the Linnean Society of London* 2: 339–340. 1794, *Annales*

des Sciences Naturelles (Paris) 4: 97. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 402. 1825, *Flora de Filipinas* 580. 1837, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 237–238. 1846, *Journal of the Linnean Society, Botany* 9: 125. 1867 and *Botanical Magazine* 16: 33. 1902, *Illustriertes Handbuch der Laubholzkunde* 2: 114–115. 1907, *Journal of Tropical and Subtropical Botany* 2(3): 12–21. 1994

(Stems and leaves decoction drunk as an aphrodisiac. The roots used for common cold with fever, diarrhea, ulcers, boils in children; paste applied to cure rheumatic pain; root juice given in epilepsy. Crushed plants as fish poison. Veterinary medicine, tuber given to cow for more milk.)

in English: tropical kudzu

in Ghana: oye-asaasi yie

in India: anetli, patal-kumra

Malay names: tampong urat, ulan susu

in Nepal: ban bori

Pueraria tuberosa (Willd.) DC. (*Hedysarum tuberosum* Willd.; *Hedysarum tuberosum* Roxb. ex Willd.; *Pueraria tuberosa* DC.; *Pueraria tuberosa* (Roxb. ex Willd.) DC.)

India, Himalaya. Perennial climbing shrub, woody, large tuberous roots eaten raw or boiled, tender fruits cooked as vegetable, leaves as fodder

See *Species Plantarum* 2: 745–751. 1753, *Species Plantarum*. Editio quarta 3(2): 1197. 1802, *Annales des Sciences Naturelles (Paris)* 4: 97. 1825 and Parker, Richard Neville (1884–1958), *A Forest Flora for the Punjab with Hazara and Delhi*. Dehra Dun: Bishen Singh Mahendra Pal Singh and Periodical Experts, Delhi, 1973

(Used in Ayurveda and Unani. Roots demulcent, astringent, cooling, for common cold with fever, diarrhea; warmed tuber paste applied locally in case of mastitis, rheumatism, rheumatoid arthritis, also applied to the forehead to relieve headache; tuber juice given for fever; tuber powder taken to cure spermatorrhea. Flowers cooling, aphrodisiac. Veterinary medicine, tubers ground with *Cissus quadrangularis*, red onion and ginger and fermented in water for three days, later given with rice soaked water for tuberculosis; boiled tubers fed to cattle after delivery for energy; tubers given to cows to promote secretion of milk.)

in English: Indian kudzu

in Tibet: ksi ra bi da ri

Pulicaria Gaertner Asteraceae

Latin subst. *pulicaria* for a plant called also *psyllion*, Latin adj. *pulicarius* and *pulicaris* 'belonging to fleas', *herba pulicaria*, *ae* (*pulex*, *icis* 'a flea'), reputed to repel fleas, see *De Fructibus et Seminibus Plantarum...* 2(3): 461–462, pl. 173, f. 7. 1791.

Pulicaria dysenterica (Linnaeus) Bernh. (*Aster dysentericus* (L.) Scop.; *Diplopappus dysentericus* (L.) Bluff & Fingerh.; *Inula dysenterica* L.; *Pulicaria gracilis* Heimerl)

Europe.

See *Species Plantarum* 2: 872–877, 882. 1753, *Flora Carniolica*, Editio Secunda 2: 172. 1772, *Bull. Sci. Soc. Philom. Paris* 1817: 137. 1817, *Fl. Germ.* 2: 369. 1825, *Denkschriften der Kaiserlichen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 50(2): 56. 1885 and *Watsonia* 11: 211–223. 1977, *Taxon* 28: 277–278. 1979, *Taxon* 29: 715. 1980, *Taxon* 31: 583–587. 1982, *Acta Biologica Cracoviensia, Series Botanica* 25: 57–77. 1983, *Watsonia* 19: 134–137. 1992, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 129: 215–226. 1992, *Watsonia* 20: 63–66. 1994, *Flora Mediterranea* 5: 331–334. 1995, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 133: 301–318. 1996

(Widely cultivated for its insecticidal properties.)

Pulicaria foliolosa DC.

India. Erect annual herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 480. 1836

(Paste of leaves applied on cuts, boils.)

Pulicaria glaucescens (Boiss.) Jaub. & Spach (*Platychaete glaucescens* (Boiss.) Boiss.; *Platychaete sublanata* Bornm.; *Pterochaete glaucescens* Boiss.)

Iran.

See *Diagnoses plantarum orientalium novarum*, ser. 1, 6: 78. 1846, *Diagnoses plantarum orientalium novarum*, ser. 1, 11: 5. 1849, *Illustrationes Plantarum Orientalium* 4: 79, pl. 349. 1852

(Postparturition care in women, to clean the womb, in cases of infection.)

in Pakistan: kulmeer

Pulicaria persica Jaub. & Spach

India.

(Bruised leaves applied to relieve headache.)

in India: dhola lizru

Pulicaria undulata (L.) C.A. Mey. (*Aster crispus* Forssk.; *Aster pulicarius* (L.) Scop.; *Diplopappus pulicarius* (L.) Bluff & Fingerh.; *Duchesnia crispa* (Forssk.) (Plant considered very poisonous. Abortifacient, analgesic, cold remedy, diaphoretic, antirheumatic, hemostatic. Fresh leaves used to treat rheumatism and neuralgia; crushed leaves for poultices; pulverized leaves smelled to alleviate headaches; burned leaves, fresh or dried, burned as mosquito repellent. Decoctions from roots to treat lung problems, pulmonary ailments. Insecticide, strong decoction of whole plant to kill lice and fleas.)

in English: American pasqueflower, eastern Pasque flower, spreading Pasque flower

Pulsatilla turczaninowii Krylov & Sergievskaja (*Pulsatilla turczaninowii* f. *albiflora* Y.Z. Zhao)

China.

See *Sist. Zametki Mater. Gerb. Krylova Tomsk. Gosud. Univ. Kuybysheva.* 5–6: 1. 1930

(Roots used for dysentery.)

in China: xi ye bai tou weng

Punica L. Lythraceae (Punicaceae)

The Latin name, *malum punicum* ‘Carthaginian apple’, *Punicus*, *a*, *um*, from *Poenus*, *i* ‘a Carthaginian’, *Poenus*, *a*, *um* ‘Punic, Carthaginian’, *Poeni*, *orum* ‘the Phoenicians, the Carthaginians’, Greek *Phoinix* ‘Phoenician’; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 472. 1753, *Genera Plantarum*. Ed. 5. 212. 1754 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2186–2187. 2001.

Punica granatum L.

Western Asia, Mediterranean. Deciduous, slender, shrub or small tree, bark peeling off in small flakes, branches

spinescent, red corolla, fleshy calyx tubular-campanulate, young fruits green

See *Species Plantarum* 1: 472. 1753, *FBI* 2: 580. 1879 and *North American Flora* 23: 28. 1928, *Annals of the New York Academy of Sciences* 35(3): 127. 1936, *Ann. Cat. Vasc. Pl. W. Pakistan & Kash.* 501. 1972, *Journal of Cytology and Genetics* 16: 35–45. 1981, *New Botanist* 8: 35–44. 1981, *Investigatio et Studium Naturae* 12: 48–65. 1992, *Regnum Veg.* 127: 80. 1993, *Ethnobotany* 16: 139–140. 2004, *Journal of Ethnopharmacology* 123(3): 369–377. 2009

(Used in Ayurveda, Unani and Sidha/Siddha. Plant extracts used to treat ciguatera fish poisoning. Tender shoots decoction given in oliguria, urinary troubles; decoction of whole plant of *Oxalis corniculata* with stem bark of *Punica granatum* given in loss of appetite; a decoction of seeds of *Emblica officinalis* with shoots of *Punica granatum* given in typhoid fever; juice from crushed fresh bark taken against diabetes. Bark of the root and wood used as a vermifuge for tapeworms, also for diarrhea and dysentery; powdered root bark taken with water against tape worm. Fruit used to treat stomach diseases and dysentery, cold *pekin* diseases and cold diarrhea; juice as a tonic in fevers; unripe fruits eaten for diarrhea and dysentery. Fruit rind for dysentery, diarrhea, prolapse of the rectum, ascariasis; fruit rind ground in cold water and given orally for white discharge, irregular menstruation and excessive bleeding. Seeds eaten for digestion, stomach troubles and to increase sexual vigour; seeds of *Punica granatum*, rhizome of *Curculigo trichocarpa* and roots of *Hemidesmus indicus* var. *pubescens* powdered and consumed for increasing the fertility. Decoction of leaves and fruits orally as an astringent in dysentery and antiemetic in cholera; powdered tender leaves consumed for emetic and loose motions. Leaves and roots decoction for irregular menses. A decoction of *Laportea crenulata* roots with roots of *Punica granatum* and kernel of *Mucuna nigricans* given in fever with cough. Juice of *Punica granatum* flowers together with *Cynodon dactylon* leaves put into nostrils for bleeding nose. Ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies, in Ganesh-*pooja*.)

in English: pomegranate

Purshia glandulosa Curran (*Kunzia glandulosa* Greene; *Purshia tridentata* var. *glandulosa* (Curran) M.E. Jones)

North America. Perennial shrub

See *Bulletin of the California Academy of Sciences* 1(3): 153. 1885 [1886 publ. 28 Feb 1885], *Pittonia* 2: 299. 1892, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 680. 1895

(Bark and leaves analgesic, emetic, laxative, for gonorrhoea, menstrual disorders.)

in English: desert bitterbrush

Purshia mexicana (D. Don) S.L. Welsh (*Cowania mexicana* D. Don; *Cowania mexicana* D. Don var. *dubia* Brandege; *Purshia mexicana* (D. Don) Henrickson, nom. illeg., isonym)

North America. Perennial shrub or tree

See *Trans. Linn. Soc. London* 14(3): 575, pl. 22, f. 1–6. 1825 and *Phytologia* 60(6): 468. 1986, *Great Basin Naturalist* 46(2): 260. 1986

(Leaves and stems laxative, antiseptic, disinfectant, cathartic, for colds, smallpox or measles, cough, arthritis, venereal diseases.)

in English: Mexican cliffrose

Purshia stansburyana (Torr.) Henrickson (*Cowania alba* Goodding; *Cowania mexicana* subsp. *stansburyana* (Torr.) A.E. Murray; *Cowania mexicana* var. *stansburyana* (Torr.) Jeps.; *Cowania stansburyana* Torr.; *Purshia mexicana* var. *stansburyana* (Torr.) S.L. Welsh; *Purshia stansburiana* (Torr.) Henrickson)

North America. Perennial shrub or tree, forage

See *An Expedition to the Valley of the Great Salt Lake of Utah* 386, t. 3. 1852 and *A Manual of the Flowering Plants of California ...* [Jepson] 498. 1925, *Kalmia* 12: 19. 1982, *Phytologia* 60(6): 468. 1986, *Great Basin Naturalist* 46(2): 260. 1986

(Laxative, emetic, disinfectant, cathartic, for colds, small-pox or measles, wounds, cough, arthritis, venereal diseases. Ceremonial.)

in English: Stansbury cliffrose

Purshia tridentata (Pursh) DC. (*Purshia tridentata* (Pursh) DC. var. *tridentata*; *Tigarea tridentata* Pursh)

North America. Perennial shrub, forage

See *Flora Americae Septentrionalis* ... (Pursh) 1: 333, pl. 15. 1814[1813], *Encyclopédie Méthodique, Botanique* 4: 623. 1816 and *Biol. J. Linn. Soc.*, 2: 61–76. 1970, *Proc. Acad. Nat. Sci. Philadelphia* 149: 42. 1999

(Laxative, anthelmintic, febrifuge, emetic, disinfectant, analgesic, for colds, fever, hemorrhage, coughs, pneumonia, tuberculosis, bronchial and liver troubles, constipation, gonorrhoea, venereal diseases, intestinal worms, skin diseases. Young leaves effective in drying up skin infections. Piscicide. Ceremonial, good luck in hunting.)

in English: antelope bitterbrush, antelope bush

in Mexico: ca'gunari

Putranjiva Wallich Putranjivaceae (Euphorbiaceae)

A Sanskrit name, *putra* 'son' and *juvi* 'prosperity, life', *Ficus benamina* L. in India is also *putra-juvi*; see M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 290. Dehra Dun 1985, Shri S.P. Ambasta, ed., *The Useful Plants of India*. 505. Council of Scientific & Industrial Research, New Delhi 1986.

Putranjiva roxburghii Wallich (*Cyclostemon racemosus* Zipp. ex Span.; *Drypetes roxburghii* (Wallich) Hurusawa; *Drypetes roxburghii* var. *timorensis* (Blume) Airy Shaw; *Drypetes timorensis* (Blume) Pax & Hoffmann; *Nageia putranjiva* Roxburgh, nom. illeg.; *Purtranjiva amblyocarpa* Müll.Arg.; *Purtranjiva shaerocarpa* Müll.Arg.; *Pycnosandra timorensis* Blume)

Tropical Asia. Tree, yellow-grey bark with very large warty lenticels, small narrow thin papery leaves with ragged small teeth, axillary flowers, white tomentose fruits

See *Tent. Fl. Nap.* 61. 1826, *Linnaea* 15: 348. 1841, *Mus. Bot.* 2: 192. 1856, *Prodr.* 15(2): 443–444. 1866 and *Pflanzenr.*, IV, 147, XV: 278. 1922, *J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot.* 6: 335. 1954, *Kew Bulletin*, Addit. Ser. 4: 107. 1975

(Used in Ayurveda and Sidha. Plant useful for women whose children died in uterus. Leaves and fruit for rheumatism, cold and fever. Dry fruits and seeds decoction given for cold, fever and rheumatism. Used in religion and magico-religious beliefs, said to increase fertility in women, for making conception; contact therapy, stones of the fruit strung together to form rosaries and used as a necklace to preserve children from harm; seeds worn as necklace by persons suffering from acute cough and cold; fruits used as necklace by a pregnant

woman to prevent miscarriage; dried fruits in a garland used as necklace to cure skin allergy and itch.)

in China: jia huang yang

in Gabon: dilomba, ekombo, eteng, etan, etang, etengui, eting, geomba, ilomba, nkoma, nkombo, n-komo, nlombo, ikoum, illomba, kombo, lilombo, lomba, lombo, moulomba, mulomba, sombo, lating'e, lengye

in Ivory Coast: adria, anakue, djilo, edua, effoi, epoi, etama, olele, oualélé, walelé, teke

in Ghana: atenli, atta-bini, bini, bove, etsu, oti, otie, tika, walele

in Nigeria: aba-oro, abae, abakan, abakang, abaoror, abo, abora, akomu, akwa-mili, awka-mille, awka-minni, bakondo, bapulo, bocham, bokondo, bucham, ebubi, esamba, etan, etana, eteng, ibicho, ilomba, itang, kpokogi, mile, mili, n'gosam, nasamba, ndababa, ndodabo, ngosa, ngwasama, nkpanti, obabi, obenazi, okujaoti, tamakwa, tamarkwa, teng, tengo, umoghan

in Tanzania: mkungu mwitu, msurula wa porini, munoba, musunula

in Togo: obala

in West Africa: akomu, eteng, ilomba, kombo, oto

Pycnarrhena Miers ex Hook.f. & Thomson Menispermaceae

From the Greek *pyknos* ‘dense, numerous, compact, crowded’ and *arrhen* ‘male’, the male flowers are fascicled together; see J.D. Hooker & Thomas Thomson (1817–1878), *Flora Indica*. 1: 206. London 1855.

Pycnarrhena manillensis S.Vidal

Philippines.

See *Revis. Pl. Vasc. Filip.* 45. 1886

(Powdered root used as tonic, vulnerary, antidote, for snakebites.)

in Philippines: ambal, bago, halikot, halot, namongol

Pycrus P. Beauv. Cyperaceae

An anagram of the generic name *Cyperus*; see A. Palisot de Beauvois, *Flore d'Oware et de Benin en Afrique*. 2: t. 86. Paris (Aug.) 1816, *Spicilegium florum rumelicarum et bithynicarum* ... 2: 419. 1844, *A Manual of the Botany of the Northern United States* 517. 1848, *Fl. Cap.* 7: 155. 1897 and *Bulletin of Miscellaneous Information: Additional Series* 8: 95. 1908,

Annalen des K. K. Naturhistorischen Hofmuseums 23: 204. 1909, *Das Pflanzenreich* IV 20(Heft 101,3): 327. 1936, *Flora Reipublicae Popularis Sinicae* 11: 164, 169–170, 172. 1961, *Adansonia* 16(4): 403. 1977.

Pycreus korshinskyi (Meinsh.) V.I. Krecz. (*Cyperus eragrostis* Vahl; *Cyperus korshinskyi* Meinsh.; *Cyperus latespicatus* var. *setiformis* T. Koyama; *Cyperus louisianensis* Thieret; *Cyperus sanguinolentus* Vahl; *Cyperus sanguinolentus* var. *korshinskyi* Kük.; *Pycreus rehmannii* Palla ex Grossh.; *Pycreus sanguinolentus* (Vahl) Nees; *Pycreus setiformis* Nakai)

Russia, China, India. Perennial herb

See *Descriptiones Plantarum Rariorum* 17. 1772, *Observationes Botanicae* 5: 13. 1789, *Enumeratio Plantarum* ... 2: 322, 351. 1805, *Linnaea* 9: 283. 1835

(Rhizome tonic, demulcent; rhizome paste to relieve neck and shoulder pain.)

Pygeum Gaertner Rosaceae

Greek *pyge* ‘the rump, buttock’, referring to the shape of the fruits, see also *Prunus* L.; see *Species Plantarum* 1: 473–475. 1753, Joseph Gaertner (1732–1791), *De fructibus et seminibus plantarum*. 1: 218, t. 46, fig. 4. Stuttgart, Tübingen 1788.

Pygeum persimile Kurz

Burma.

See *Journ. As. Soc. Beng.* xli. II. 306. 1872

(Leaves decoction to facilitate delivery.)

Malay name: selusoh

Pygmaeothamnus Robyns Rubiaceae

Greek *pygmaios* ‘dwarfish’ and *thamnos* ‘bush’, suffrutices, see *Bull. Jard. Bot. État Bruxelles* 11: 29. 1928.

Pygmaeothamnus zeyheri (Sond.) Robyns var. *zeyheri* (*Canthium abbreviatum* (K. Schum.) S. Moore; *Canthium oatesii* Rolfe; *Canthium transvaalensis* S. Moore; *Fadogia welwitschii* Hiern; *Fadogia zeyheri* (Sond.) Hiern; *Pachystigma zeyheri* Sond.; *Pachystigma zeyheri* (Sond.) Robyns; *Pachystigma zeyheri* var. *oatesii* Robyns; *Plectronia abbreviata* K. Schum.; *Plectronia oatesii* (Rolfe) Eyles; *Plectronia transvaalensis* (S. Moore) Burt Davy; *Pygmaeothamnus zeyheri* Robyns ex R.D. Good; *Pygmaeothamnus zeyheri* var. *oatesii* (Rolfe) Robyns; *Vangueria stenophylla* K. Krause; *Vangueria zeyheri* (Sond.) Sond.)

Zaire to S. Africa. Suffrutex, glabrous leaves, low shrub, creeping underground stolons, woody stems, small scented tubular green-yellow-cream flowers, corolla tubular with 5 reflexed lobes, fleshy yellow drupe, sweet ripe fruits eaten raw, wooded grassland

See *Linnaea* 23: 56. 1850 and *Bot. Jahrb. Syst.* 39: 535. 1907, *Ann. Transvaal Mus.* 3: 122. 1912, *Trans. Roy. Soc. South Africa* 5: 493. 1916, *J. Bot.* 64(Suppl. 2): 23. 1926, *Bulletin du Jardin Botanique de l'État* 11: 29–31. 1928

(Tonic.)

in English: dwarf medlar, sand apple

in Southern Africa: goorappeltjie, gousiektebos, maidrek, sandappel; mosisá, mothlabelo (Tswana); umkukuzela (Ndebele)

in Tanzania: kindokoli, kitokoli, maboya, mandungu, mpenzwa

Pyracantha M. Roemer Rosaceae

From the Greek *pyrakantha*, *pyr* ‘fire’ and *akantha* ‘thorn’, thorny branches and red fruits; see Max Joseph Roemer (or Römer) (1791–1849), *Familiarum naturalium regni vegetabilis synopses monographicae*. 3: 104, 219–220. Vimariae [Weimar] (Apr.) 1847, *Journal of Botany, British and Foreign* 15(175): 207–208. 1877 and *Bibliogr. Cult. Trees Shrubs* 239. 1949.

Pyracantha crenulata (D. Don) M. Roem. (*Cotoneaster crenulatus* (D. Don) K. Koch; *Crataegus crenulata* Roxb. & Lindley; *Crataegus crenulata* (D. Don) Roxb.; *Crataegus pyracantha* var. *crenulata* (D. Don) Loudon; *Mespilus crenulata* D. Don)

China, Himalaya. Shrub, perennial, edible fruits

See *Prodromus Florae Nepalensis* 238. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 509. 1832, *Arboretum et Fruticetum Britannicum* 2: 844. 1838, *Familiarum Naturalium Regni Vegetabilis Monographicae* 3: 220. 1847, *Dendrologie* 1: 175. 1869 and *Silvae Genet.* 22: 188–190. 1973

(Powder of dried fruit given in case of bloody dysentery. Root extract boiled with water and bathed in to cure body pain.)

in English: Nepalese white thorn

in China: xi yuan chi huo ji

in India: ghingarau

in Nepal: ghangharu

Pyranthus Du Puy & Labat Fabaceae (Leguminosae, Millettieae, Papilionoideae)

From the Greek *pyr* ‘fire’ and *anthos* ‘flower’, the flowers are red, see *Kew Bulletin* 50(1): 73–84. 1995.

Pyranthus pauciflorus (Baker) Du Puy & Labat (*Mundulea pauciflora* Baker; *Mundulea splendens* R. Vig.; *Pyranthus pauciflora* (Baker) Du Puy & Labat; *Tephrosia oligantha* Drake, nomen novum)

Madagascar. Perennial non-climbing shrub, red flowers

See *A Numerical List of Dried Specimens* n. 5635. 1831, *Journal of Botany, British and Foreign* 20: 68. 1882 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 128. 1902[1903], *Notulae Systematicae*. Herbarium du Muséum de Paris 14(1): 64. 1950, *Kew Bulletin* 50(1): 83. 1995

(Toxic. Used to stupefy fish.)

in Madagascar: fanamo

Pyrenacantha Wight Icacinaceae

Greek *pyren* 'a kernel, a fruit stone' and *akantha* 'thorn', referring to the inner walls of the fruits, see *Nova Genera Plantarum* [Thunberg] 7: 105. 1792, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 999, 1037. 1791[1792], *Systema Vegetabilium*, editio decima sexta [Sprengel] 1: 373, 489. 1824 [dated 1825; publ. in late 1824], *Botanical Miscellany* 2(4): 107. 1830, *Genera Plantarum* [Endlicher] 1327, n. 6839. 1840, *Adansonia* 10: 271, 276. 1872 and *Philipp. J. Sci. C* 7: 292. 1912, *J. Bot.* 58: 221. 1920.

Pyrenacantha klaineana Pierre ex Exell & Mendonça

Angola. Liana, vine, woody, cauliflorous, leaves coriaceous

See *Conspectus Florae Angolensis* 1: 345. 1951

(A natural source of the terpenoid indole alkaloid camptothecin, two semi-synthetic derivatives, topotecan and irinotecan, are currently prescribed as anticancer drugs.)

Pyrenacantha scandens Planch. ex Harv.

South Africa.

See *Botanical Miscellany* 2(4): 107. 1830, Harvey, William Henry (1811–1866), *Thesaurus Capensis*. Dublin, 1859–1863

(Roots for impotency and barrenness.)

in South Africa: umSekelo (Zulu)

Pyrenacantha staudtii (Engl.) Engl. (*Chlamydocarya staudtii* Engl.; *Pyrenacantha staudtii* Engl.; *Pyrenacantha staudtii* Hutch. & Dalziel)

Tropical Africa. Liana, small tree, flowers lemon yellow

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 486. 1898 and *Die Vegetation der Erde* 3(2): 262, 264. 1921 [Engl. *Pflanzenw. Afr.* iii. II. (Engl. & Drude, *Veg. der Erde*, ix.) 262(1921), in obs.], *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] i. 456. 1928, *Kew Bull.* 1929, 23. 1929

(Fruit and leaves for jaundice and as a postpartum remedy.)

Pyrenaria Blume Theaceae

Greek *pyren* 'a kernel', referring to the fruit, see *Bijdragen tot de flora van Nederlandsch Indië* 1119. 1826–1827.

Pyrenaria camelliiflora Kurz (*Pyrenaria diospyricarpa* Kurz var. *camelliiflora* (Kurz) S.X. Yang)

Myanmar, Thailand.

See *Journal of the Asiatic Society of Bengal* 40(2): 46. 1871, *Journal of the Asiatic Society of Bengal* 42(2): 60. 1873 and *Novon* 15(2): 379. 2005

(Leaves boiled with those of *Peucedanum* and liquid drunk for spleen problems, liquid also used to treat stomachache and dysentery, bleeding dysentery.)

Pyrethrum Zinn Asteraceae

Greek *pyrethron* 'pellitory', *pyretos* 'fever, burning heat', *pyr* 'fire', referring to the roots of *Anacyclus pyrethrum*, Latin *pyrethrum* or *pyrethron* for a plant, Spanish chamomile, pellitory, a species of *Anthemis*; see *Enum. Stirp. Helv.* ii. 720. 1742, Johann Gottfried Zinn (1727–1759), *Catalogus plantarum horti academici et agri gottingensis*. 414, 452. Göttingae [Göttingen] 1757, *Fl. Carniol.*, ed. 2. 2: 148. 1772, *Act. Acad. Theod. Palat.* iii. (1775) 237. t. 18. 1775, *Prodr.* (DC.) 6: 62. 1838, *Actes Soc. Linn. Bordeaux* 20: 561. 1860 and *Fl. URSS* 26: 367. 1961, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1177. New York 1967, *Bull. Bot. Lab. N. E. Forest. Inst., Harbin* 1980(6): 10–11. 1980, *Taxon* 43(1): 104. 1994, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 521. Basel 1996.

Pyrethrum cinerariifolium Trevisan (*Chrysanthemum cinerariifolium* (Trevisan) Visiani; *Tanacetum cinerariifolium* (Trevis.) Sch. Bip.)

Europe.

See *Species Plantarum* 2: 843–845, 887. 1753, *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae* 237. 1775, *Index Seminum (Bratislava)* 2: 2. 1820, *Ueber die Tanaceteeen* 58. 1844, *Flora Dalmatica* 2: 88. 1847 and *Fieldiana: Botany*, New Series 7: 1–21. 1981

(Capitula used as an insecticide.)

in China: chu chong ju

Pyrethrum coccineum (Willdenow) Woroschilov (*Chrysanthemum coccineum* Willdenow; *Chrysanthemum marschallii* Ascherson)

China.

See *Sp. Pl.* 3: 2144. 1803 and *Seed List State Bot. Gard. Acad. Sci. URSS* 9: 21. 1954

(Used as an insecticide.)

in China: hong hua chu hong ju

Pyrethrum parthenium (L.) Smith (*Chrysanthemum parthenium* (L.) Bernh.; *Chrysanthemum parthenium* Bernh.; *Chrysanthemum parthenium* Persoon; *Chrysanthemum*

parthenium (L.) Pers.; *Matricaria latifolia* Gilbert; *Matricaria parthenium* L.; *Pyrethrum parthenium* Sm.; *Tanacetum parthenium* (L.) Schultz-Bipontinus; *Tanacetum parthenium* Sch.Bip.)

South America.

See *Species Plantarum* 2: 890–891. 1753, *Systematisches Verzeichnis* (Bernhardi) 145. 1800, *Flora Britannica* 2: 900. 1800, *Synopsis Plantarum* 2(2): 462. 1807, *Ueber die Tanaceteeen* 55. 1844 and *Biologia* (Bratislava) 48: 441–445. 1993

(A cold and flu medicine, used for diarrhea, rheumatism, backache, for dissipating heat and toxic materials; leaves infusion sedative, analgesic, anthelmintic, a wash for children. A bitter tonic for stomach pains and acidosis. Not for use during pregnancy, or with blood disorders.)

in English: feverfew

in Ecuador: Santa Maria

in Spanish: altamisa mexicana

in China: duan she pi ju

Pyrethrum pyrethroides (Kar. & Kir.) B. Fedtsch. ex Krasch. (*Chrysanthemum pyrethroides* (Kar. & Kir.) B. Fedtsch.; *Chrysanthemum pyrethroides* B. Fedtsch.; *Chrysanthemum richteria* Benth. ex Hook.f.; *Chrysanthemum richteria* Benth.; *Richteria pyrethroides* Kar. & Kir.; *Tanacetum pyrethroides* (Kar. & Kir.) Sch.Bip.; *Tanacetum pyrethroides* Sch.Bip.; *Tanacetum pyrethroides* (Kar. & Kir.) Podlech; *Tanacetum pyrethroides* (Kar. & Kir.) Muradyan)

India. Herb, grey woolly hairy perennial, aromatic, solitary terminal pinkish flowers, many-ribbed achenes, pappus coriaceous

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 127. 1842, *Jahresbericht der Pollichia* 20/21: 441. 1863, *Genera Plantarum* 2: 426. 1873, *Fl. Brit. India* [J.D. Hooker] 3: 315. 1881 and *Trudy Bot. Inst. Akad. Nauk SSR*, I, 1: 176. 1933

(Plant paste used internally and externally for rheumatism; a poultice for boils. Powdered flowers to control fever; paste of flowers applied against fevers, boils, wounds.)

in India: khampa karmo, serpan

Pyrethrum tatsienense (Bureau & Franchet) Y. Ling ex C. Shih var. *tatsienense* (*Chrysanthemum jugorum* W.W. Smith; *Chrysanthemum tatsienense* Bureau & Franchet)

China.

See *J. Bot.* (Morot) v. (1891) 72. 1891 and *Notes Roy. Bot. Gard. Edinburgh* 10: 173. 1918

(Whole plant blood purifier, for promoting blood circulation.)

in China: chuan xi xiao huang ju

Pyrola L. Ericaceae (Pyrolaceae)

The diminutive of the Latin *pirum*, *pyrum*, *pyrus*, *pirus* ‘pear, a pear-tree’, referring to the foliage, see *Species Plantarum* 1: 396–397. 1753, *Linnaea* 28: 8, 33–34, 60–63. 1856, *Genera Plantarum* 2(2): 603. 1876 and *Bericht über die Versammlung des Westpreussischen Botanisch-Zoologischen Vereins Danzig* 1912: 77. 1913, *Fieldiana, Bot.* 24(8/2): 81–88. 1966, *Fl. Neotrop.* 66: 28–53. 1995.

Pyrola americana Sweet (*Pyrola asarifolia* Michx. subsp. *americana* (Sweet) Krísa; *Pyrola obovata* Bertol.; *Pyrola rotundifolia* auct. non L. p.p.; *Pyrola rotundifolia* L. subsp. *americana* (Sweet) R.T. Clausen; *Pyrola rotundifolia* var. *americana* (Sweet) Fernald; *Pyrola rotundifolia* var. *rotundifolia*)

North America. Perennial subshrub

See *Hortus Britannicus* 341. 1830 and *Rhodora* 22(259): 122. 1920, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 85(4): 628. 1966

(On cuts and sores. Magic, ritual, ceremonial, dried leaves infusion drunk as good luck potion before the hunt.)

in English: American wintergreen

Pyrola asarifolia Michx. (*Pyrola asarifolia* subsp. *asarifolia*; *Pyrola asarifolia* var. *incarnata* (DC.) Fernald; *Pyrola asarifolia* var. *ovata* Farw.; *Pyrola asarifolia* var. *purpurea* (Bunge) Fernald; *Pyrola asarifolia* var. *uliginosa* (Torr. & A. Gray) A. Gray; *Pyrola californica* Krísa; *Pyrola elata* Nutt.; *Pyrola rotundifolia* L. subsp. *asarifolia* (Michx.) Á. Löve & D. Löve; *Pyrola rotundifolia* var. *asarifolia* (Michx.) Hook.; *Pyrola rotundifolia* var. *purpurea* Bunge; *Pyrola rotundifolia* var. *uliginosa* (Torr. & A. Gray) A. Gray; *Pyrola uliginosa* Torr. & A. Gray ex Torr.; *Pyrola uliginosa* Torr. & A. Gray; *Pyrola uliginosa* var. *gracilis* Jennings; *Thelaia asarifolia* (Michx.) Alef.)

North America. Perennial subshrub

See *Flora Boreali-Americana* 1: 251. 1803, *Flora Boreali-Americana* 2(7): 46. 1834, *Fl. New York* 1: 453. 1843, *A Manual of the Botany of the Northern United States* 272. 1848, *A Manual of the Botany of the Northern United States* 259. 1856, *Linnaea* 28: 54. 1856 and *Annual report of the Michigan Academy of Science, Arts, and Letters* 19: 259. 1917, *Rhodora* 51(605): 103. 1949, *Novitates Botanicae ex Universitate Carolinae* 1965: 34. 1965, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 85(4): 615–621, f. 2–3 [maps]. 1966, *Botaniska Notiser* 128(4): 517. 1975[1976]

(Plant decoction antihemorrhagic, sedative, for kidney trouble, gonorrhoea. Root decoction taken for liver trouble. Decoction of leaves or leaves and roots used as an eye-wash; leaves infusion for sore eyes. Ceremonial medicine, a steam bath.)

in English: liverleaf wintergreen, pink pyrola

Pyrola chlorantha Sw. (*Pyrola chlorantha* var. *convoluta* (W. Bartram) Fernald; *Pyrola chlorantha* var. *paucifolia* Fernald; *Pyrola chlorantha* var. *revoluta* Jennings; *Pyrola chlorantha* var. *saximontana* Fernald; *Pyrola convoluta* W. Bartram; *Pyrola oxypetala* Austin ex A. Gray; *Pyrola solonica* S.D. Zhao; *Pyrola virens* Schweigg.; *Pyrola virens* Schreb.; *Pyrola virens* var. *convoluta* (W. Bartram) Fernald; *Pyrola virens* var. *saximontana* Fernald; *Pyrola virens* var. *saximontana* (Fernald) Fernald; *Pyrola virescens* auct.; *Thelaia chlorantha* (Sw.) Alef.)

North America. Perennial subshrub

See *Kongl. Vetenskaps Academiens Nya Handlingar* 31: 190, pl. 5. 1810, *Flora Erlangensis* 1: 154. 1811 and *Rhodora* 22(255): 51. 1920, *Rhodora* 43(509): 167. 1941, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 7: 5, pl. 1, f. 1–4. 1981

(Antidiarrheal, hemostatic, astringent. Ceremonial.)

in English: green-flowered wintergreen, greenflowered wintergreen

Pyrola elliptica Nutt. (*Pyrola compacta* Jennings; *Thelaia elliptica* (Nutt.) Alef.)

North America. Perennial subshrub

See *The Genera of North American Plants* 1: 273. 1818, *Linnaea* 28: 47. 1856

(Plant infusion taken for rheumatism; infusion of smashed plants applied as poultice to sore legs; plant decoction as drops for sore eyes; blood purifier, for skin diseases, indigestion. Decoction of roots and leaves anticonvulsive, stimulant; leaves infusion of leaves a wash for mouth sores and sore throat.)

in English: waxflower shinleaf

Pyrola picta Sm. (*Pyrola aphylla* Sm.; *Pyrola aphylla* var. *leptosepala* Nutt.; *Pyrola aphylla* var. *paucifolia* Howell; *Pyrola blanda* Andres; *Pyrola conardiana* Andres; *Pyrola dentata* Sm.; *Pyrola dentata* var. *apophylla* Copeland; *Pyrola dentata* var. *integra* A. Gray; *Pyrola pallida* Greene; *Pyrola paradoxa* Andres; *Pyrola picta* fo. *aphylla* (Sm.) Camp; *Pyrola picta* subsp. *dentata* (Sm.) Piper; *Pyrola picta* subsp. *integra* (A. Gray) Piper; *Pyrola picta* subsp. *pallida* (Greene) Andres; *Pyrola picta* var. *dentata* (Sm.) Dorn; *Pyrola picta* var. *pallida* (Greene) Parish; *Pyrola septentrionalis* Andres; *Pyrola sparsifolia* Suksd.; *Thelaia aphylla* (Sm.) Alef.; *Thelaia spathulata* Alef.)

North America. Perennial subshrub

See Abraham Rees (1743–1825), *The Cyclopaedia*; or, universal dictionary of arts, ... 29(1): *Pyrola* no. 6–8. 1819[1814], *Linnaea* 28: 39, 45. 1856, *Pittonia* 4(20D): 39. 1899 and *Contributions from the United States National Herbarium* 11: 434. 1906, *Allegemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 20: 113. 1914,

Plant World 20(8): 248. 1917, *Vascular Plants of Wyoming* 296. 1988

(Plant infusion, a wash, tonic, stimulant.)

in English: white-veined shin-leaf, white-veined wintergreen, whiteveined wintergreen

Pyrola rotundifolia L. (*Pyrola rotundifolia* Benth.; *Thelaia rotundifolia* (L.) Alef.)

Europe, China.

See *Sp. Pl.* 1: 396. 1753, *Plantas Hartwegianas imprimis Mexicanas* 66. 1840, *Linnaea* 28: 60–63. 1856 and *Bot. Not.* 117: 403. 1964, *Bot. Jahrb. Syst.* 90: 476–508. 1971, *Syst. Bot.* 8: 277–298. 1983, *Brittonia* 45: 178. 1993

(For skin diseases.)

in English: round-leaf pyrola, rounded shin-leaf, shin leaf, wild lily-of-the-valley, wintergreen

in China: lu ti tsao, lu xiao cao, yuan ye lu ti cao

Pyrostegia C. Presl Bignoniaceae

Greek *pyr* ‘fire’ and *stega*, *stegos* ‘roof, shelter’, alluding to upper lip of the flower; see Karl (Carl) B. Presl (1794–1852), in *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*. Ser. 5, 3: 523. (Jul.–Dec.) 1845.

Pyrostegia venusta (Ker Gawler) Miers (*Bignonia ignea* Presl., nom. illeg.; *Bignonia ignea* Vell.; *Bignonia tecomiflora* Rusby; *Bignonia venusta* Ker Gawl.; *Pyrostegia acuminata* Miers, nom. nud.; *Pyrostegia dichotoma* Miers ex K. Schum.; *Pyrostegia ignea* (Vell.) C. Presl; *Pyrostegia intaminata* Miers, nom. nud.; *Pyrostegia pallida* Miers, nom. nud.; *Pyrostegia parvifolia* Miers, nom. nud.; *Pyrostegia reticulata* Miers, nom. nud.; *Pyrostegia tecomiflora* (Rusby) K. Schum. ex Urb.)

South America. Evergreen climbing shrub, red-vermilion flowers

See *Botanical Register*; consisting of coloured ... 3: 249, pl. 249. 1817[1818], *Florae Fluminensis* 244. 1825[1829], *L'Horticulteur Universel* 5: 1–3. 1843, *Botanische Bemerkungen* 93. 1843, *Proceedings of the Royal Horticultural Society of London* 3: 188. 1863, *Die Natürlichen Pflanzenfamilien* 4(3b): 223. 1894, *Memoirs of the Torrey Botanical Club* 6: 101. 1896 and *Berichte der Deutschen Botanischen Gesellschaft* 34: 746. 1916, *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Kurtziana* 26: 179–189. 1998, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000

(Leaves in skin diseases and wounds.)

in English: flame-flower, flame vine, flaming-trumpet, golden shower

in Paraguay: yvyratî

Pyrostria Comm. ex Juss. Rubiaceae

Greek *pyr* 'fire' and *ostreios, ostrios* 'purple', referring to the colour of flowers of some species; see Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 522. [from *Pyrus*] Basel 1996.

Pyrostria bibracteata (Baker) Cavaco (*Canthium bibracteatum* (Baker) Hiern; *Plectronia bibracteata* Baker; *Pyrostria comorensis* Bojer ex Baker)

Tropical Africa, Madagascar. Evergreen shrub or small tree, horizontal branching, leaves stiff and papery turning black on drying, green-white-yellow flowers in dense clusters, petals woolly inside, paired pointed bracts surrounding the flowers, fleshy black berries, sweet ripe fruits eaten raw, bee forage, in bushland, woodland, forest edges, wooded grasslands and *Brachystegia* woodland and thickets, in coastal areas

See *Bull. Mus. Natl. Hist. Nat.*, II, 39: 1015. 1968

(Tonic.)

in Tanzania: mbunisigo, mfupapo, mkonge, mpwizopwizo, mshizo

Pyrrrosia Mirbel Polypodiaceae

Greek *pyrros* 'flame-coloured, reddish yellow, red, tawny'; see *Species Plantarum* 2: 1067. 1753, Jean Baptiste Antoine Pierre de Monnet de Lamarck (1744–1829) and Charles François Brisseau de Mirbel (1776–1854), *Histoire naturelle des Végétaux*. 3: 471. and 5: 89, 91. 1802, *Enumeratio Filicum* 124. 1824, *Mémoires de la Société Linnéenne de Paris* 6: 218, 225. 1827, *Abh. Konigl. Bohm. Ges. Wiss.*, ser 4, 5: 227. 1836, *Tentamen Pteridographiae* 227, pl. 10, f. 5–6. 1836, *New Flora and Botany of North America* ... 4: 104. 1836[1838], *Filicum Species* 117. 1841 [*Filices Horti Botanici Lipsiensis*], *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 6: 492–500. 1851, *Mem. (Hot water extract of fruits and hot water extract of roots administered orally against menstrual complaints.)

in English: black wittly, white willow

Qualea Aubl. Vochysiaceae

See *Histoire des plantes de la Guiane Française* 1: 5, 18, t. 1, 2. 1775, *Mémoires du Muséum d'Histoire Naturelle* 6: 265. 1820, *Genera Plantarum* [Endlicher] 1178. 1840 and *Acta Botanica Neerlandica* 2: 153, 192. 1953, *Pittieria* 2: 6. 1969, *Phytochemistry*. 55(6): 581–587. 2000.

Qualea acuminata Spruce ex Warm. (*Qualea speciosa* Huber)

South America. Small tree, white and pink flowers

See *Flora Brasiliensis* (Martius) 13(2): 40–41. 1875 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 3: 425. 1902

(Bark infusion drunk as taenifuge, vermifuge.)

Qualea grandiflora Mart. (*Qualea ecalcarata* Mart.; *Schuechia brasiliensis* Endl. ex Walp.; *Schuechia ecalcarata* (Mart.) Warm.)

South America, Brazil.

See *Nova Genera et Species Plantarum* ... (Martius) 1: 130, 133, t. 78, 79. 1824, *Repertorium Botanicum Systematicum*. (Walpers) 2: 68. 1843, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 29: 33. 1867 and *Journal of Ethnopharmacology* 104(1–2): 207–214. 2006, *Journal of Ethnopharmacology* 107(1): 19–24. 2006, *Phytotherapy Research: PTR*. 22(5): 705–707. 2008

(Leaves extract antimicrobial, central nervous system depressant, analgesic, anticonvulsant, used to treat gastric ulcers.)

Qualea multiflora Mart. (*Qualea jundiahy* Warm.; *Qualea multiflora* subsp. *pubescens* (Mart.) Stafleu; *Qualea multiflora* var. *glabra* (Mart.) Mart.; *Qualea multiflora* var. *pubescens* Mart.; *Qualea pilosa* Warm.; *Qualea pilosa* var. *heterophylla* Kuntze; *Qualea pilosa* var. *multinervia* Kuntze; *Qualea virgata* Rusby)

South America.

See *Nova Genera et Species Plantarum* ... (Martius) 1: 134–135, t. 80. 1824, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 31. 1867, *Flora Brasiliensis* (Martius) 13(2): 45. 1875, *Revisio Generum Plantarum* 3(3): 11. 1898 and *Bulletin of the New York Botanical Garden* 8(28): 99. 1912, *Acta Botanica Neerlandica* 2(2): 196. 1953, *Anais da Academia Brasileira de Ciências* 56(3): 333–338. 1984

(Molluscicidal.)

Qualea paraensis Ducke

Brazil.

See *Archivos do Jardim Botânico do Rio de Janeiro* 1: 48–49, pl. 16. 1915, *Journal of Ethnopharmacology* 69(2): 127–137. 2000

(Used to treat scabies, also antimalarial.)

Qualea parviflora Mart. (*Qualea parviflora* var. *discolor* Mart.; *Qualea parviflora* var. *glabrata* Mart.; *Qualea parviflora* var. *tomentosa* Mart.)

South America, Brazil.

See *Nova Genera et Species Plantarum ...* (Martius) 1: 135, t. 81. 1824 and *Zeitschrift für Naturforschung. C, Journal of biosciences*. 63(11–12): 794–800. 2008, *Journal of Ethnopharmacology* 127(2): 508–514. 2010

(Antiulcer, gastroprotective, antidiarrheal, antioxidant, anti-hemorrhagic and anti-*Helicobacter pylori* activities.)

Quararibea Aublet Bombacaceae (Malvaceae)

A vernacular name, *guarariba*, for *Quararibea guyanensis* Aubl., see *Histoire des plantes de la Guiane Française* 2: 691–692, pl. 278. 1775 and *Bulletin de la Société Botanique de Genève*, Sér. 2 11: 205, 207, fig. 1–3. 1919[1920], *Fieldiana, Bot.* 24(6): 386–403. 1949, Pérez de Barradas, José. *Plantas mágicas americanas*. Madrid, 1957, *Botanical Museum Leaflets—Harvard University*. 17(9): 247–264. 1957, *Botanical Museum Leaflets—Harvard University*. 25(7): 183–189. 1977, *Revista Biol. Trop.* 43(1–3): 75–115. 1995, *Brenesia* 47–48: 17–36. 1997, *Ceiba* 44(2): 105–268. 2003 [2005].

Quararibea cordata (Bonpl.) Vischer (*Matisia cordata* Bonpl.; *Quararibea cordata* Visch.; *Quararibea cordata* García-Barr. & Hern. Cam., nom. illeg.; *Quararibea cordata* (Humb. & Bonpl.) García-Barr. & J. Hernandez)

Colombia, Peru.

See *Histoire des plantes de la Guiane Française* 2: 691–692, pl. 278. 1775, *Plantae Aequinoctiales* 1: 9–12, t. 2a, 2b. 1808[1805] and *Bulletin de la Société Botanique de Genève* 11: 206, f. 1(7), 2(3), 3(4). 1919[1920], *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 477–478, 593–622. 1956, *Bot. Not.* 127: 309–316. 1974, *Mutisia* 2: 4. 1952, *Rep. Bot. Inst. Univ. Aarhus* 16: 1–74. 1987

(Tonic, astringent, antiseptic, for skin diseases.)

Quararibea funebris (La Llave) Vischer (*Lexarza funebris* La Llave; *Myrodia funebris* (La Llave) Benth.; *Myrodia guatemalteca* Donn. Sm.; *Quararibea fieldii* Millsp.; *Quararibea funebris* Vischer; *Quararibea funebris* (La Llave) Standl.; *Quararibea gentlei* Lundell; *Quararibea guatemalteca* (Donn. Sm.) Standl. & Steyerl.) (The tree was associated with mourning the deceased or with death.)

Mexico. Evergreen tree, conical, dense foliage, highly aromatic spicy white flowers

See *Novorum Vegetabilium Descriptiones* [La Llave & Lexarza] 2: 7. 1825, *Journal of the Linnean Society, Botany* 6: 115. 1862, *Botanical Gazette* 16(1): 2. 1891, *Publications of the Field Columbian Museum, Botanical Series* 1(3): 309–310, t. 19. 1896 and *Bulletin de la Société Botanique*

de Genève, Sér. 2 11: 205, 207, fig. 1–3. 1919 [1920], *Contributions from the United States National Herbarium* 23(3): 787–788. 1923, *Contributions from the University of Michigan Herbarium* 6: 44, f. 2. 1941, *Publications of the Field Museum of Natural History, Botanical Series* 23(2): 62. 1944, *The Bulletin, The Horticultural Society of New York*, vol. III, no. 4, 1–4. 1972

(Fruits used to control fevers. Flowers used for a refreshing invigorating beverage; flowers a cough remedy, also to regulate menstruation and hysteria.)

in Mexico: cacahoaxochitl, cacauaxochitl, flor de cacao, madre de cacao, molinillo, palo copado, pozol, pozonque, pozonqui (the drink), rosita de cacao, tejate (a chocolate-flavored beverage), yieb-díe

Quassia L. Simaroubaceae

Named to honor Graman Quasi (or Quassi or Kwasi, from *kwasida* or *kwasi* = Sunday or the first day of the week), a Negro slave of Carl Gustav Dahlberg when he explored Suriname (Dutch Guiana), *Quashee* is the nickname for negro (from Ashantee or Fantee *kwasi*, name commonly given to child born on Sunday); see C. Linnaeus, *Species Plantarum*. Ed. 2. 1: 553. 1762, *Fam. Pl.* 2: 449, 571. 1763, *De Fructibus et Seminibus Plantarum...* 2: 352. 1791, F. D'Alberti di Villanuova, *Dizionario universale, critico, enciclopedico della lingua italiana*. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1183. New York 1967, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XV: 96–97. Torino 1994, *Pharmaceutical Biology* 41(2): 107–157. 2003.

Quassia africana Baillon (*Quassia africana* (Baill.) Baill.; *Simaba africana* Baill.)

Tropical Africa. Small tree or shrub, woody, scrambling, compound alternate leaves, coriaceous leaflets opposite sessile, perianth dull white with pink-brownish base, flower buds greenish-white, scented creamy-white flowers in raceme-like panicles, lowland forest, open forest, edge of forest near stream

See *Species Plantarum*, Editio Secunda 1: 553. 1762, *Histoire des plantes de la Guiane Française* 1: 400, t. 153. 1775, *Adansonia* 7: 38. 1867, *Adansonia* 8: 89. 1868

(Stem and leaves febrifuge, bitter tonic, insecticidal, vermifuge used for gastrointestinal complaints. Infusion of leaves for dysmenorrhea.)

in Central African Republic: pourou

in Congo: mupessi, otapaa, simbikali

Quassia amara L. (*Quassia alatifolia* Stokes; *Quassia officinalis* Rich.)

Tropical America. Small tree or shrub, erect, multi-stemmed, pink flowers, yellow anthers

See *Species Plantarum*, Editio Secunda 1: 553. 1762, *Actes de la Société d'Histoire Naturelle de Paris* 1: 108. 1792, *A Botanical Materia Medica* 2: 491. 1812 and Kupchan, S.M., Streelman, D.R. "Quassamarin, "A new antileukemic quassinoid from *Quassia amara*." *J. Org. Chem.* 41: 348. 1976, *Journal of Ethnopharmacology* 67(3): 321–325. 1999, *African Journal of Medicine and Medical Sciences* 32(4): 353–356. 2003

(Antimalarial, tonic, analgesic, antiedematogenic, antibacterial, antifungal, antifertility, vermifuge, antiulcerogenic, stomachic, for gastrointestinal complaints. Roots steeped in water overnight and the infusion taken for fevers including malaria fever. Bark decoction used to treat snakebites and liver disorders. Aphicide, the water extract of the wood.)

in English: bitter ash, bitter quassia, bitter wood, quassia bitters, South American bitter wood, stave wood, Surinam quassia wood

in Bolivia: amargo negro, chiriguaná, chuña-chuña, lucumo

in Brazil: maruba, marupá, murubá, murupá, quassia, quina-de-caiena, simaruba

in Central America: cuasia, cuasia de Surinam, guavito, hombre grande, limoncillo, palo de hombre, palo isidoro, quashie bitters

in Indonesia: genteng peudjit, ki tjongtjorang

in the Philippines: corales, kuasia

Quassia borneensis Noot.

Borneo. Tree

(Root infusion drunk to cure impotence, hypertension, and as an aphrodisiac.)

in Borneo: medang pahit

Malay name: kayu pahit

Quassia dioica P.J. Bergius

South America.

See *Materia Medica* 355. 1778

(Antimalarial, tonic, analgesic, antiedematogenic, antibacterial, antifungal, antifertility, vermifuge, antiulcerogenic, stomachic, for gastrointestinal complaints. Roots steeped in water overnight and the infusion taken for fevers including malaria fever. Bark decoction used to treat snakebites and liver disorders.)

Quassia indica (Gaertn.) Noot. (*Niota tetrapetala* Poir.; *Samadera indica* Gaertn.; *Samadera madagascariensis* A.

Juss.; *Samadera tetrapetala* (Poir.) G. Don; *Samadera tetrapetala* G. Don; *Samandura madagascariensis* Gaertner)

Madagascar. Shrub or small tree, wood light and soft, leaves coriaceous dark glossy green above, petiole red, inflorescences pendulous, petals greenish yellow with red-orange tint, stamens yellow, fruit yellow-green reddish on dangling peduncles

See *De Fructibus et Seminibus Plantarum*... 2: 352, t. 156. 1791, *Encyclopédie Méthodique, Botanique* 4: 490. 1797, *Mémoires du Muséum National d'Histoire Naturelle* 12: 516, t. 27, f. 46. 1825, *A General History of the Dichlamydeous Plants* 1: 811. 1831, *Traité Bot. Méd. Phan.* 2: 874. 1884 and *Adansonia*, n.s. 1: 65–92. 1961, *Blumea* 11(2): 517. 1962, *Chemical & Pharmaceutical Bulletin* 44(11): 2009–2014. 1996

(Used in Ayurveda and Sidha. Decoctions of the stem or root bark drunk against dysentery and fever. Crushed bark applied to burns and bleeding wounds. Bark and wood antiinflammatory, febrifuge, tonic, stomachic, emmenagogue, used for contusion and against itchiness. Take decoction of bark and wood as needed, or mixed with coconut oil for fever. Root infusion drunk to cure impotence, hypertension, and as an aphrodisiac. Rheumatism, roast seed, pound, and apply over affected area. Infusion of wood taken as a tonic, infusion of leaves used as insecticide, especially against white ants.)

in Borneo: kelapahit

in India: guchakaranjah, karincottai, karinghola, karinghota, karingota, karingotta, karinjotta, karinjottei, karinnotta, lokanti, lokhandi, lokhanti, nibam, niepa, nipa, nipam, notta, samdera

in Indonesia: gatep pait

in Madagascar: befaitra, bemaifaitra, bemaifaitry, bifaitra, kafaitra

in Philippines: daraput, linatog-anat, linton-gamai, mabingdato, malunggal, manunggal, mongal, palagarium, palagium, palo santo, ponoan

Quassia undulata (Guill. & Perr.) D. Dietr. (*Hannoa chlorantha* Engl. & Gilg; *Hannoa ferruginea* Engl.; *Hannoa kitombetombe* G.C.C. Gilbert; *Hannoa klaineana* Pierre & Engl.; *Hannoa longipes* (Sprague) G.C.C. Gilbert; *Hannoa njariensis* G.C.C. Gilbert; *Hannoa undulata* (Guill. & Perr.) Planchon; *Hannoa undulata* Planch.; *Odyendyea zimmermannii* Engl.; *Quassia sanguinea* Cheek & Jongkind; *Simaba undulata* Guill. & Perr.; *Zwingera undulata* (Guill. & Perr.) Steud.; *Zwingera undulata* Steud.)

Tropical Africa. Shrub or tree, variable, inflorescence an axillary or terminal lax thyrse, honey plant, fodder, shoots browsed by herbivores, fruit edible or not edible, seed cake eaten

See *Synopsis Plantarum* 2: 1416. 1840, *Nomenclature Botanique* [Steudel], ed. 2, 2: 802. 1841, *London J. Bot.* 5: 567. 1846, *Bulletin Mensuel de la Société Linnéenne de Paris* 1237. 1896 and *Bot. Jahrb. Syst.* 32(1): 122. 1902, *Kunene-Sambesi-Exped.* [Warburg] 270. 1903, *J. Linn. Soc., Bot.* 37:

505. 1906 [1904–1906 publ. 1906], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 282. 1911, *Fl. Congo Belge & Ruanda-Urundi* vii. 122. 1958, *Bull. Jard. Bot. État Bruxelles* 28: 382. 1958, *Journal of Ethnopharmacology* 31(1): 59–65. 1991, *International Journal for Parasitology* 28(4): 635–640. 1998, *Journal of Ethnopharmacology* 67(3): 321–325. 1999, *African Journal of Medicine and Medical Sciences* 32(4): 353–356. 2003, *Kew Bull.* 63(2): 249–250. 2008

(Seed considered poisonous to livestock, used as febrifuge, antiviral, insecticidal and arachnidicidal. Stem, stem bark and root bark extracts antimalarial. Leaves and stem antibacterial and antifungal. Stem bark or root bark as antidote, aphrodisiac and purgative, used against fever, hysteria, mental disorders, insanity, dementia, leprosy, cough and stomach complaints; root bark antimalarial, antitumour.)

in Ghana: glantori

in Nigeria: takandar giwa (Hausa); bummere badi (Fula); oriji (Yoruba)

in Tanzania: mjoho

in Togo: digbere, yayabe

Quercus L. Fagaceae

The ancient Latin name for this tree, *quercus*, *us*; Akkadian *daru* ‘everlasting, enduring, durable: said of materials, constructions’, *kassu* ‘strong’; see Carl Linnaeus, *Species Plantarum*. 2: 994–997. 1753, *Genera Plantarum*. Ed. 5. 431. 1754, *Histoire Naturelle des Végétaux. Phanérogames* 11: 60. 1842, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1866: 65. 1866, *Kongelige Danske videnskabernes Selskabs Skrifter, Naturvidenskabeli Mathematisk Afdeling* 9: 370. 1871 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 8. 1936, *Fieldiana, Bot.* 24(3): 369–396. 1952, *Ann. Missouri Bot. Gard.* 47(2): 95–104. 1960, Salvatore Battaglia, *Grande dizionario della lingua italiana*. XV: 113–116. 1994, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 538–539. 1994.

Quercus agrifolia Née (*Quercus acroglandis* Kellogg; *Quercus agrifolia* var. *oxyadenia* (Torrey) J.T. Howell; *Quercus agrifolia* var. *oxyadenia* (Torr. ex Sitgr.) J.T. Howell; *Quercus oxyadenia* Torr. ex Sitgr.; *Quercus pricei* Sudw.)

North America. Perennial tree or shrub

See *Species Plantarum* 2: 994–997. 1753, *Anales de Ciencias Naturales* 3: 271. 1801, *Report of an Expedition down to the Zuni and Colorado Rivers* 172, pl. 17. 1853, *Proceedings of the California Academy of Sciences* 1: 25. 1855 and *Division of Forestry: Bulletin* [U.S. Department of Agriculture] 13: 157, f. A. 1907, *Madroño* 2(4): 38. 1931

(Used to heal the bleeding navel of a newborn.)

in English: California live oak, coast live oak

Quercus agrifolia Née var. **agrifolia** (*Quercus pricei* Sudw.)

North America. Perennial tree or shrub

See *Species Plantarum* 2: 994–997. 1753, *Anales de Ciencias Naturales* 3: 271. 1801, *Report of an Expedition down to the Zuni and Colorado Rivers* 172, pl. 17. 1853, *Proceedings of the California Academy of Sciences* 1: 25. 1855 and *Division of Forestry: Bulletin* [U.S. Department of Agriculture] 13: 157, f. A. 1907, *Madroño* 2(4): 38. 1931

(Used to heal the bleeding navel of a newborn. Ceremonial.)

in English: California live oak, coast live oak

Quercus alba L. (*Quercus alba* Deam, nom. illeg., non *Quercus alba* L.)

North America.

See *Species Plantarum* 2: 994–997. 1753 and *J. Arnold Arbor.* 56: 336–363. 1975, Sandusky, G.E. et al. “Oak poisoning of cattle in Ohio.” *J. Am. Vet. Med. Assoc.*, 171: 627–629. 1977, Basden, K.W., Dalvi, R.R. “Determination of total phenolics in acorns from different species of oak trees in conjunction with acorn poisoning in cattle.” *Vet. Hum. Toxicol.*, 29: 305–306. 1987

(Ingesting the leaves and acorns has caused some toxic problems in cattle. In severe cases, renal failure usually results in death. Medicinally used to treat diarrhea, indigestion, chronic dysentery, mouth sores, chapped skin, asthma, milky urine, rheumatism, coughs, sore throat, bleeding piles and muscle aches, as an antiseptic and emetic, and a wash for chills and fevers, to bring up phlegm, as a witchcraft medicine. The concentration of toxic phenolics is less than in red or black oak (*Quercus rubra* or *Quercus velutina*), symptoms are similar for all three species of oak.)

in North America: eastern white oak, chêne blanc, white oak

Quercus bicolor Willdenow (*Quercus bicolor* var. *angustifolia* Dippel; *Quercus bicolor* var. *cuneiformis* Dippel; *Quercus bicolor* var. *platanoides* (Lam.) A. DC.; *Quercus discolor* var. *bicolor* (Willd.) Hampton; *Quercus platanoides* (Lamarck) Sudworth; *Quercus prinus* var. *bicolor* (Willd.) Spach; *Quercus prinus* var. *platanoides* Lam.)

North America.

See *Species Plantarum* 2: 994–997. 1753, *Encyclopédie Méthodique, Botanique* 1: 720. 1783, *Hortus Kewensis*; or, a catalogue ... 3: 358. 1789, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 396. 1801, *Histoire Naturelle des Végétaux* 11: 158. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 21. 1864, *Handbuch der Laubholzkunde* 2: 87. 1892

(Used in the treatment of cholera, broken bones, consumption, and as a witchcraft medicine.)

in North America: swamp white oak, chêne bicolor

Quercus chrysolepis Liebmann (*Quercus chrysolepis* var. *nana* (Jepson) Jepson; *Quercus chrysophyllus* Kellogg; *Quercus crassipocula* Torr.; *Quercus fulvescens* Kellogg; *Quercus wilcoxii* Rydberg)

North America. Perennial tree or shrub, one of the most variable North American oaks

See *Species Plantarum* 2: 994–997. 1753, *Overs. Kongel. Danske Vidensk. Selsk. Forh. Medlemmers Arbeider*. 1854: 173. 1854, *Proceedings of the California Academy of Sciences* 1: 67, 70. 1855

(The nuts considered poisonous.)

in North America: canyon live oak, maul oak

Quercus chrysolepis Liebmann var. ***chrysolepis*** (*Quercus wilcoxii* Rydberg)

North America. Perennial tree or shrub

See *Species Plantarum* 2: 994–997. 1753, *Overs. Kongel. Danske Vidensk. Selsk. Forh. Medlemmers Arbeider*. 1854: 173. 1854, *Proceedings of the California Academy of Sciences* 1: 67, 70. 1855

(Poisonous. Ceremonial.)

in North America: canyon live oak, maul oak

Quercus dumosa Nuttall (*Quercus dumosa* Greene, nom. illeg., non *Quercus dumosa* Nutt.; *Quercus dumosa* Sarg., nom. illeg., non *Quercus dumosa* Nutt.)

North America. Perennial tree or shrub

See *Species Plantarum* 2: 994–997. 1753, *The North American Sylva* 1: 7. 1842, *Illustrations of West American Oaks* 35, pl. 18. 1889

(Gall nuts used for sores and wounds and as an astringent. Ceremonial.)

in English: California scrub oak, coastal sage scrub oak, Nuttall's scrub oak

Quercus dumosa Nuttall var. ***dumosa***

North America. Perennial tree or shrub

See *Species Plantarum* 2: 994–997. 1753, *The North American Sylva* 1: 7. 1842, *Illustrations of West American Oaks* 35, pl. 18. 1889

(Gall nuts used for sores and wounds and as an astringent. Ceremonial.)

in English: California scrub oak, coastal sage scrub oak, Nuttall's scrub oak

Quercus ellipsoidalis E.J. Hill (*Quercus ellipsoidalis* var. *kaposianensis* J.W. Moore)

North America.

See *Species Plantarum* 2: 994–997. 1753, *Botanical Gazette* 27(3): 204–208, pl. 2–3. 1899 and *Rhodora* 52: 56. 1950

(Used to treat suppressed menses caused by cold.)

in English: Hill's oak, jack oak, Northern pin oak

Quercus elliptica Née (*Quercus atrescentirhachis* Trel.; *Quercus botryocarpa* Trel.; *Quercus chiquihuitillonis* Trel.; *Quercus coccinata* Trel.; *Quercus comayaguana* Trel.; *Quercus elliptica* Liebm. ex A. DC., nom. illeg.; *Quercus elliptica* Liebm., nom. illeg.; *Quercus exaristata* Trel.; *Quercus guayabalana* Trel. ex Standl.; *Quercus guayabalana* Trel.; *Quercus hondurensis* Trel.; *Quercus lanceolata* M. Martens & Galeotti ex A. DC., nom. illeg.; *Quercus langlassei* Trel.; *Quercus linguifolia* Liebm.; *Quercus nectandrifolia* Liebm.; *Quercus oajacana* Liebm.; *Quercus peradifolia* E.F. Warb.; *Quercus porriginosa* Trel.; *Quercus pubinervis* M. Martens & Galeotti; *Quercus salicifolia* var. *oajacana* (Liebm.) Wenz.; *Quercus yoroensis* Trel.; *Quercus yoroensis* var. *aguanana* Trel.)

Central America, Mexico. Tree, pig fodder

See *Anales Ci. Nat.* 3(9): 278. 1801, *Oversigt over det kongelige danske videnskabernes selskabs forhandlinger og dets medlemmers arbeider*. 1854: 175, 178, 180. 1854, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 31, 79. 1864, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 3: 207. 1884 and *Memoirs of the National Academy of Sciences* 20: 138–140, 150, pl. 266. 1924, *Journal of the Arnold Arboretum* 11(1): 25. 1930, *Publications of the Field Columbian Museum, Botanical Series* 8(1): 6. 1930, *Repert.
