Latin *crotalum* and Greek *krotalon* 'castanet, a rattle, bell', when ripe and shaken the seeds rattle in the inflated pod; see Carl Linnaeus, *Species Plantarum*. 2: 714–716. 1753, *Genera Plantarum*. Ed. 5. 320. 1754, *Introductio ad Historiam Naturalem* 305. 1777, *Vorlesungen der Churpfälzischen physikalisch-ökonomischen Gesellschaft* 2: 344. 1787, *Elementa botanica ...* 3: 31. 1790, *Annales des Sciences Naturelles* (Paris) 9: 407. 1826, *A Numerical List of Dried Specimens* 5432. 1832, *A General History of the Dichlamydeous Plants* 2: 96, 142. 1832, *Florae Senegambiae Tentamen* 157. 1832, *Verm. Bot. Schrift.* 5: 390. 1834, *New Flora and Botany of North America ...* 2: 53. 1836[1837], *Flora Telluriana* 2: 60. 1836[1837], Meissner, C.F. (Carl Friedrich) (1800–1874), *Plantarum vascularium genera, secundum ordines naturales ...* 82, *Commentarium...* 58. Lipsiae, Libraria Weidmannia, 1836–1843 [pt. 1. *Tabulae diagnosticae*.— pt. 2. *Commentarium*, exhibens, praeter adnotationes et explicationes varias, generum synonyma librorumque indicationem ...], *Flora de Filipinas* 398. 1845, *Tentamen Florae Abyssinicae ...* 1: 160. 1847 and *Rhodora* 82: 475–481. 1980, *Boletim da Sociedade Broteriana*, Série 2, 58(2): 149–172. 1985, *Flora de Colombia* 4: 1–118. 1986, *Taxon* 44: 611–612. 1995, *Cytologia* 64: 165–174. 1999, *Botanical Journal of the Linnean Society* 165: 84–106. 2011.

Crotalaria aegyptiaca Benth. (*Crotalaria wissmannii* O. Schwartz)

Egypt, Somalia. Perennial non-climbing shrub

See *Species Plantarum* 2: 714–716. 1753, *London Journal of Botany* 2: 473. 1843 and *Mitteilungen aus dem Institut für allgemeine Botanik in Hamburg* 10: 93. 1939, *Reinwardtia* 5: 341–369. 1960

(Astringent.)

Crotalaria agatiflora Schweinf. (*Crotalaria agatiflora* Schweinf. ex Engl., nom. nud.; *Crotalaria agatiflora* subsp. *erlangeri* Baker f.; *Crotalaria agatiflora* subsp. *imperialis* (Taub.) Polhill; *Crotalaria agatifolia* Schweinf.; *Crotalaria dawei* Baker f.; *Crotalaria engleri* Engl.; *Crotalaria engleri* Harms ex Engl., nom. nud.; *Crotalaria erlangeri* (Baker f.) Harms ex Hutch. & Bruce; *Crotalaria erlangeri* (Baker f.) Hutch. & Bruce; *Crotalaria imperialis* Taub.; *Crotalaria megistantha* Taub.)

East Africa, Tanzania, Uganda. Perennial non-climbing tree, shrub or subshrub, green bark, soft wood, multi-stemmed, yellowish flowers, green inflated pods, in bushed grassland, near seasonal swamp, savanna grassland, uplands, along roadsides, on waste ground

See *Species Plantarum* 2: 714–716. 1753, *Zum Rudolph-See und Stephanie-See* 13. 1892, *Abhandlungen der Königlich Preussischen Akademie der Wissenschaften. Physikalisch-mathematische Classe* 2: 244. 1892, *Die Pflanzenwelt Ost-Afrikas* C: 206. 1895 and *Die Pflanzenwelt Ost-Afrikas* 1(1): 337–338, t. 303. 1910, *Journal of the Linnean Society, Botany* 42(286): 316–317. 1914, *Kew Bulletin* 22(2): 204. 1968

(A root decoction used in the treatment of gonorrhoea.)

in English: bird flower, canary-bird bush, lion's claw

in East Africa: iviinzi, muchingiri, mwethia, olontwalan

in South Africa: canarybird-bush

Crotalaria alata D. Don (*Crotalaria alata* H. Lév.; *Crotalaria alata* Buch.-Ham. ex D. Don; *Crotalaria bialata* Schrank; *Crotalaria bialata* Roxb.; *Crotalaria bidiei* Gamble)

Tropical Asia. Perennial non-climbing shrub

See *Plantae Rariores Horti Academici Monacensis* 10: pl. 13. 1819, *Prodromus Florae Nepalensis* 241–242. 1825 and *Flore du Kouy-Tchéou* 299. 1914, *Bulletin of Miscellaneous Information Kew* 1917(1): 27. 1917

(Poison. To help digestion and relieve stomachache; plant paste given to weak pregnant women as a tonic and also for quick delivery; plant juice given in case of bedwetting. Root juice given to relieve fever and as an antidote in snakebite.)

in India: bandar lathi, budubudike kaayi, jhumka, jhunjhuni

in Malay: kachang hantu darat

in Nepal: boksi baja, thulo chheke

in Thailand: coe loe

Crotalaria albida Roth (*Crotalaria albida* B. Heyne ex Wall.; *Crotalaria albida* B. Heyne ex Roth; *Crotalaria arenaria* Benth.; *Crotalaria arenaria* sensu Zoll. & Moritzi; *Crotalaria deflexa* Benth.; *Crotalaria formosana* T. Ito & Matsum.; *Crotalaria formosana* Matsum. ex T. Ito & Matsum.; *Crotalaria henrici* Hochr.; *Crotalaria henricii* Hochr.; *Crotalaria hossei* Craib; *Crotalaria montana* Roxb.;

Crotalaria montana B. Heyne ex Roth; *Crotalaria montana* A. Rich.; *Crotalaria pseudohenrici* Hochr.; *Crotalaria pseudohenricii* Hochr.)

India. Perennial non-climbing herb

See *Hort. Bengal.* 54. 1814, *Nov. Pl. Sp.* 333, 335. 1821, *Numer. List* [Wallich] sub n. 5414. 1831–1832, *London J. Bot.* 2: 474. 1843, *Natuur- Geneesk. Arch. Ned.-Indië* iii. (1846) 75. 1846 and *Bull. Misc. Inform. Kew* 1911, 34. 1911, *Candollea* ii. 390. 1925, *Reinwardtia* 6 (3): 195–223. 1962, *Thai Forest Bulletin (Bot.)* 11: 105–181. 1978, *Bull. Bot. Surv. India* 20: 1–19. 1979, *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Bangladesh J. Pl. Taxon.* 1: 43–60. 1994

(Root paste applied to treat wart on the sole, its juice purgative and given for indigestion; roots paste taken in chronic pain of backbone. Leaf paste mixed with water consumed as tonic.)

in India: ban-methi, banmethi, chunchuni, giligili gida, jhunjhuni, jhunjhunia, khurmana, kondagiligicca, kondagiligichcha, kondagiligichha, kondagiligittsa, kundagalligeetsa, naagavalli, saun

in Nepal: bhendi phool, bheri phul

Crotalaria arenaria Benth. (*Crotalaria arenaria* Zoll. & Moritzi)

Nigeria. Perennial non-climbing shrub

See *London Journal of Botany* 2: 473–474. 1843, *Natuur- Geneesk. Arch. Ned.-Indie* 3: 75. 1846, *The Flora of British India* 2(4): 65. 1876, *Die Natürlichen Pflanzenfamilien* 3(3): 228. 1893

(Reputed poisonous.)

Crotalaria berteroa DC. (*Crotalaria fulva* Roxb.; *Crotalaria grandis* Baker; *Crotalaria paniculata* sensu Bojer)

Tropical Asia, India & Indian Ocean. Perennial non-climbing shrub, fragrant yellow flowers on long terminal branches, silky pods

See *Hortus Bengalensis*, or a catalogue ... 54. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 127. 1825, *Bull. Misc. Inf., Kew*: 146–151. 1894 and *Rhodora* 41(488): 317–367. 1939, *JATBA* 6: 22–36, 185–188, 267–289, 482–486. 1959, *Proceedings of the Indian Science Congress Association* 68(sect. vi): 101. 1981, *J. Econ. Taxon. Bot.* 7: 249–276. 1985

(Plant used in scabies and skin diseases. Known to cause liver damage in livestock and also in humans.)

in English: consumption bush, whiteback

in Madagascar: ambarivatrindolo, amberivatrindolo, hazongoaka, ramomanga, ranomauga, vavy

Crotalaria brevidens Benth. (*Crotalaria albertiana* Baker f.; *Crotalaria intermedia* Kotschy; *Crotalaria intermedia* var. *abyssinica* Engl.; *Crotalaria intermedia* var. *abyssinica* Taub.; *Crotalaria intermedia* var. *dorumaensis* (Wilczek) Polhill; *Crotalaria intermedia* var. *parviflora* (Baker f.) Polhill; *Crotalaria purpureo-lineata* Baker f.)

Nigeria. Annual non-climbing herb, short-lived perennial, erect, many-branched, decumbent, branches ascending, yellow reddish flowers, long narrow pods, orange to dark red seeds, shoots as livestock fodder, fodder, very bitter leaves and shoots used as a vegetable, in grassland and bushland, often confused with the closely related *Crotalaria ochroleuca*

See *London Journal of Botany* 2: 585. 1843, *Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftlichen Classe, Abteilung 1* 50(1): 362–363, pl. 3. 1865, *Die Natürlichen Pflanzenfamilien* 3(3): 247. 1892 and *Journal of the Linnean Society, Botany* 42(286): 329. 1914, *Revue de zoologie et de botanique africaines* 23: 179. 1933, *Kew Bulletin* 22(2): 266. 1968, *Ecology of Food and Nutrition* 35(2): 111–119. 1996, *Cytologia* 64: 165–174. 1999

(Toxins, alkaloids hepatotoxic. Leaves for stomachache, swellings and malaria. Roots to treat sore throat and mouth thrush.)

in English: Ethiopian rattlebox, rattle pea, rattlepod, slender-leaf, slenderleaf crotalaria

in Kenya: emiro, enoontwan, imito, kamra, kamusuusu, kimiro, kipkururiet, kipkururiet, miroo, mito, mitoo, oleechi, olotwan, vimboka

in Tanzania: marejea, mitoo

in Uganda: alaju

Crotalaria burhia Benth. (*Crotalaria burhia* var. *tomentosa* Boiss.)

India. Perennial non-climbing shrub

See *A Numerical List of Dried Specimens* n. 5386. 1831 and *Cytologia* 44: 365–375. 1979, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994

(Branches and leaves, aerial parts paste a cooling medicine in burns.)

in India: ban sutri, bhata, bui, buta, drunnu, ghagari, ghugaro, kauriala, kharsan, kharshan, khep, khif, khimp, khip, khippi, lathia, lathia-karsan, mein, pola, sanna, shinio, sineo, sinia, sis, sissai, vagdaushan

Crotalaria burkeana Benth. (*Crotalaria burkeana* var. *sparsipila* Harv.)

Kenya. Perennial non-climbing herb

See *Species Plantarum* 2: 714–716. 1753 and *Journal of the Linnean Society, Botany* 42(286): 316–317. 1914

(Purgative, drastic, toxic.)

in English: rattle bush, sickness crotalaria, stiff-sickness crotalaria

in South Africa: dronkgras, klapperbos, klapperbossie, klappers, styfesiektebossie, stywesiektebos, stywesiektecrotalaria

Crotalaria calycina Schrank (*Crotalaria anthylloides* D. Don, nom. illeg.; *Crotalaria anthylloides* Lam.; *Crotalaria calycina* Kurz; *Crotalaria roxburghiana* DC.; *Crotalaria roxburghiana* DC.; *Crotalaria sessiliflora* var. *anthylloides* (Lam.) A.A. Ansari & Thoth.; *Crotalaria stricta* Roxb.)

India, Congo, Tanzania. Annual non-climbing herb, erect, calyx inflated

See *Encyclopédie Méthodique, Botanique* 2(1): 195. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 129–130. 1825, *Prodromus Florae Nepalensis* 241. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 181. 1834, *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 66: 147. 1897 and *Journal of Economic and Taxonomic Botany* 6(3): 745. 1985

(Anodyne, antiinflammatory, astringent, for diarrhea, convulsions, cholera, dysentery.)

in India: bekkina tharadu gida, gorandiya, gulagitcha, hullu saaranga gida, jhumka

Crotalaria cephalotes A. Rich. (*Crotalaria cephalotes* Herb. Madr. ex Wallich; *Crotalaria cephalotes* Steud. ex A. Rich.; *Crotalaria cephalotes* A. Rich. var. *moeroensis* Baker f.; *Crotalaria divaricato-ramosa* De Wild.)

Nigeria, Ghana. Annual non-climbing herb, densely silky, more or less woody, often unbranched, yellow flowers in head-like racemes, villous fruits

See *A Numerical List of Dried Specimens* n. 5373. 1831, *Tentamen Florae Abyssinicae ...* 1: 156. 1847 and *Journal of the Linnean Society, Botany* 42(286): 277. 1914, *Plantae Bequaertianae* 2(4): 489. 1924, *Feddes Repert.* 103: 111–120. 1992

(Crushed leaves poultice applied to wounds.)

Crotalaria cytisoides DC. (*Crotalaria cytisoides* Roxb.; *Crotalaria cytisoides* Roxb. ex DC.; *Crotalaria cytisoides* Wight; *Crotalaria psoralioides* D. Don; *Crotalaria szemaensis* Gagnep.; *Crotalaria szemaoensis* Gagnep.; *Crotalaria zsemaensis* Gagnep.; *Priotropis cytisoides* (Roxb. ex DC.) Wight & Arn.; *Priotropis cytisoides* (DC.) Wight & Arn.)

India, Nepal, Himalaya. Perennial non-climbing shrub, fodder for livestock, leaves browsed by goats and sheep

See *Hortus Bengalensis*, or a catalogue ... 54. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 131. 1825, *Prodromus Florae Nepalensis* 242. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 5424 D. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 180. 1834, *London Journal of Botany* 2: 591. 1843 and *Notulae Systematicae. Herbarium du Museum de Paris* 3: 37–38. 1915

(Leaf juice applied to treat cuts and wounds.)

in India: ole

in Nepal: bakhre ghans, silsile

Crotalaria dura Wood & Evans

South Africa. Perennial non-climbing herb

See *Journal of Botany, British and Foreign* 1897: 487. 1897

(Toxic.)

in English: wild lucerne

in South Africa: jaagsiektebossie, wildelusern

Crotalaria ferruginea Benth. (*Crotalaria bodinieri* H. Lev.; *Crotalaria ferruginea* Graham ex Benth.; *Crotalaria ferruginea* Benth. var. *major* Baker; *Crotalaria ferruginea* Benth. var. *pilosissima* Benth.; *Crotalaria ferruginea* Benth. var. *pilosissima* (Miq.) Baker; *Crotalaria lonchophylla* Hand.-Mazz.; *Crotalaria pilosissima* Miq.; *Crotalaria rufescens* Franch.)

India, Nepal. Perennial non-climbing herb, forage

See *London Journal of Botany* 2: 476. 1843, *Flora van Nederlandsch Indië* 1(1): 327. 1855, *The Flora of British India* 2(4): 68. 1876, *Plantae Davidianae ex Sinarum Imperio* 1: 79. 1884 and *Flore du Kouy-Tchéou* 229. 1914, *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 59: 56. 1922, *Science and Culture* 45: 252–253. 1979

(Root juice given to treat fever. Leaf juice applied to treat cuts and wounds.)

in China: jia di lan

in Nepal: jungra ban

Crotalaria glauca Willd. (*Crotalaria amadiensis* De Wild.; *Crotalaria amadiensis* var. *butayei* Baker f.; *Crotalaria cylindroclados* Baker f. & Martin; *Crotalaria genistifolia* M. Vahl ex Schum. & Thonn.; *Crotalaria glauca* var. *beniensis* De Wild.; *Crotalaria glauca* var. *elliottii* Baker f.; *Crotalaria glauca* var. *genistifolia* (M. Vahl ex Schum. & Thonn.) Baker f.; *Crotalaria glauca* var. *humilis* Baker f.; *Crotalaria glauca* var. *mildbraedii* Baker f.; *Crotalaria glauca* var. *welwitschii* Baker f.)

Tanzania, Ghana, Togo. Annual non-climbing herb, erect, glabrous, yellow flowers in lax axillary and terminal racemes, stipitate fruits

See *Species Plantarum*. Editio quarta 3(2): 974. 1802, *Beskrivelse af Guineiske planter* 335. 1827, *London Journal of Botany* 2: 479. 1843, *Die Natürlichen Pflanzenfamilien* 3(3): 228. 1893 and *Journal of the Linnean Society, Botany* 42(286): 259–260, 262. 1914, *Bulletin du Jardin Botanique de l'État* 7: 131–132. 1923, *Kew Bulletin* 22(2): 230. 1968, *New Phytologist* 72(3): 741. 1973, *Feddes Rept.* 103: 111–120. 1992

(Veterinary medicine, leaf juice applied to the dog's nose during hunting.)

Crotalaria globifera E. Mey. (*Crotalaria cinerea* Verd.; *Crotalaria cinerea* Burt Davy ex Verd.; *Crotalaria globifera* var. *glabra* E. Mey., nom. superfl.; *Crotalaria globifera* var. *glabra* Harv., nom. illeg.; *Crotalaria globifera* var. *pubescens* E. Mey.; *Crotalaria macrostachya* Sond.; *Crotalaria pentheri* Gand.)

South Africa. Perennial non-climbing herb

See *Commentariorum de Plantis Africae Australioris* 24. 1836, *Linnaea* 23: 27. 1850, *Flora Capensis* 2: 44. 1862 and *Bulletin de la Société Botanique de France* 60(5): 459. 1913, *Bothalia* 2: 411. 1928

(Toxic.)

Crotalaria goreensis Guillemin & Perrottet (*Crotalaria cylindrocarpa* sensu auct.; *Crotalaria falcata* Schumacher & Thonn.; *Crotalaria goreensis* Baker; *Crotalaria goreensis* subsp. *macrostipula* (Steud. ex A. Rich.) Baker f.; *Crotalaria goreensis* var. *angustifolia* Baker; *Crotalaria goreensis* var. *macrostipula* (Steud. ex A. Rich.) Baker f.; *Crotalaria guineensis* D. Dietr.; *Crotalaria leopoldvillensis* De Wild.; *Crotalaria macrostipula* Steud. ex A. Rich.)

Tropical Africa. Perennial non-climbing herb, ribbed, pubescent, weed, undershrub, woody below, yellow red flowers, oblong fruits

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 132. 1825, *Beskrivelse af Guineiske planter* 335. 1827, *Synopsis Plantarum* 4: 933. 1847, *Tentamen Florae Abyssinicae ...* 1: 153. 1847, *Flora of Tropical Africa* 2: 29. 1871 and *Journal of the Linnean Society, Botany* 42(286): 413. 1914, *Plantae Bequaertianae* 2(4): 499. 1924, *Feddes Rept.* 103: 111–120. 1992

(Toxins. Dry leaves decoction drunk as a remedy for fevers.)

in English: gamba-pea

in Madagascar: taimborika

in Yoruba: agboorita

Crotalaria hebecarpa (DC.) Rudd (*Crotalaria uniflora* Roxb.; *Crotalaria uniflora* Koenig ex Roxb.; *Goniogyna hebecarpa* DC.; *Goniogyna hirta* (Willd.) Ali; *Goniogyna leiocarpa* DC.; *Hallia hirta* Willd.; *Heylandia hebecarpa* DC.; *Heylandia hebecarpa* (DC.) DC.; *Heylandia latebrosa* auct. non (L.) DC.; *Heylandia leiocarpa* DC.; *Heylandia leiocarpa* (DC.) DC.)

India. Annual non-climbing herb

See *Species Plantarum*. Editio quarta 3(2): 1169. 1802, *Hortus Bengalensis*, or a catalogue ... 98. 1814, *Annales des Sciences Naturelles* (Paris) 4: 92. 1825, *Prodr.* 2: 123. Nov 1825, *Mémoires sur la Famille des Légumineuses* 6: 200. 1825 [-1827], *Fl. Indica* 3: 271. 1832, *Fl. Trop. Afr.* [Oliver

et al.] 2: 13. 1871 and *Taxon* 16: 463. 1967, *Phytologia* 54(1): 28. 1983

(Plant extract to cure smallpox.)

in India: boogota kola, gorakh-bunti, jungle buti

Crotalaria incana L. (*Chrysocalyx schimperi* Hochst. ex A. Rich.; *Chrysocalyx schimperi* A. Rich.; *Crotalaria affinis* DC.; *Crotalaria criocaula* S. Schauer; *Crotalaria cubensis* DC.; *Crotalaria cytisifolia* Hoffmanns. ex Steud.; *Crotalaria cytisifolia* Steud.; *Crotalaria diffusa* Vell.; *Crotalaria eriocaula* S. Schauer; *Crotalaria glabrescens* Andersson; *Crotalaria herbacea* Schweigger ex Schrank; *Crotalaria herbacea* Schrank; *Crotalaria hirta* Lag., nom. illeg.; *Crotalaria incana* fo. *glabrescens* R. Wilczek; *Crotalaria montana* A. Rich.; *Crotalaria picensis* Phil.; *Crotalaria pubescens* Moench, nom. illeg.; *Crotalaria pubescens* Moench; *Crotalaria purpurascens* Lam.; *Crotalaria radiata* Merr.; *Crotalaria schimperi* A. Rich.; *Crotalaria setifera* DC.; *Lupinus rotundifolius* Sessé & Moc.)

Tropical America, Jamaica. Perennial non-climbing shrub

See *Voy. Jamaica* 2: t. 179, f. 1. 1725, *Species Plantarum* 2: 716. 1753, *Encyclopédie Méthodique, Botanique* 2(1): 200. 1786, *Methodus Plantas Horti Botanici* ... 161. 1794, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 24: 217. 1802, *Genera et species plantarum* 22. 1816, *Sylloge Plantarum Novarum* 2: 77. 1828, *Linnaea* 20: 738. 1847, *Anales del Museo Nacional de Chile. Crotalaria lachnophora A. Rich (*Crotalaria elata* Baker; *Crotalaria elata* Welw. ex Baker; *Crotalaria homblei* De Wild.; *Crotalaria lachnocarpa* Hochst. ex Baker; *Crotalaria lachnocarpa* Baker; *Crotalaria lachnocarpa* var. *melanocalyx* Baker f.; *Crotalaria lachnocarpa* var. *strictissima* Hiern; *Crotalaria lachnophora* Hochst. ex A. Rich.; *Crotalaria natalitia* Meisn.) (from the Greek *lachne* 'wool, down')

Tropical Africa. Perennial non-climbing shrub, densely hairy, herbaceous, spreading, many-branched, yellow with bright red flowers, seeds edible

See *London Journal of Botany* 2: 67. 1843, *Flora of Tropical Africa* 2: 29, 33. 1871, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1(1): 202. 1896 and *Journal of the Linnean Society, Botany* 42(286): 405. 1914, *Bulletin du Jardin Botanique de l'État* 5: 23. 1915, *Phytochemistry* 18: 973–985. 1979

(Toxic. Leaf sap dropped into the ear or drunk to treat otitis.)

in Tanzania: mgalula

Crotalaria longirostrata Hook. & Arn.

Central America, Guatemala. Perennial non-climbing shrub

See *The Botany of Captain Beechey's Voyage* 285. 1838

(Poison. Depurative, purgative, emetic. Raticide.)

in English: long beaked rattlespod

in Central America: cascabel de vibora, chapilin, chinchín de zope, chipil, chipilin, chipilín de caballo, chipilín de zope, chipilino, chiplino, chop, garbancillo, parrajachel, tcap-in, tronador

Crotalaria lunata Polhill (*Crotalaria beddomeana* (Bedd.) Thoth. & A.A. Ansari; *Crotalaria lanata* Bedd., nom. illeg.; *Crotalaria lunata* Beddome ex Polhill; *Crotalaria lunata* Bedd., nom. nud.)

India, Kenya. Perennial non-climbing shrub, often misidentified as *Crotalaria semperflorens* Vent.

See *Madras J. Lit. Sci.*, ser. 2, 19: 178. 1858 and *Bulletin of the Botanical Survey of India* 20: 180. 1978 (publ. 1979), *Crotalaria of Africa & Madagascar* 373. 1982

(Leaves mixed with grated coconut and rubbed onto a swollen spleen.)

in Papua New Guinea: beni muramura

Crotalaria mauensis Baker f.

East Africa, Kenya. Perennial non-climbing shrub, woody or herb, leaflets elliptic, yellow flowers, upland areas, bushland, roadsides, in forest margins, grassland

See *Journal of the Linnean Society, Botany* 42(286): 342. 1914

(Roots decoction a remedy for urinary infections. Leaf decoction in the treatment of eye problems.)

in East Africa: mugumba, mwethia

Crotalaria medicaginea Lam. (*Crotalaria foliosa* Willd.; *Crotalaria foliosa* Benth., nom. illeg.; *Crotalaria medicaginea* DC.; *Crotalaria medicaginea* var. *neglecta* (Wight & Arn.) Baker; *Crotalaria neglecta* Wight & Arn.; *Crotalaria zollingeriana* Miq.)

Australia, Papua New Guinea. Perennial non-climbing herb

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 201. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 133. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 192. 1834, *Annals of Natural History* 3(19): 429. 1839, *London Journal of Botany* 2: 577. 1843, *Flora van Nederlandsch Indië* 1(1): 344. 1855, *The Flora of British India* 2: 81. 1876 and *Cytologia* 44: 365–375. 1979

(Suspected of poisoning stock. Plant laxative.)

in English: trefoil rattlepod

in India: adabaumethi, gugario, gulabi, gulali, jenjaru, ranmethi, zenzue

Crotalaria micans Link (*Crotalaria anagyroides* Kunth; *Crotalaria brachystachya* Benth.; *Crotalaria dombeyana* DC.; *Crotalaria stipulata* Vell.; *Crotalaria triphylla* Vell.)

Tropical America. Perennial non-climbing shrub

See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 228–229. 1822, *Linnaea* 22: 512. 1849 and *Pap. Mich. Acad. Sci. Arts & Lett.* 24: 73–74. 1938, *Reinwardtia* 6(3): 195–223. 1962, *Thai Forest Bulletin (Botany)* 11: 105–181. 1978, *Ann. Missouri Bot. (Toxins. Anticancer, mutagenic, hypotensive alkaloids.)

in Japan: Amerika-tanuki-mame

in Madagascar: antsotry, manarak'andzo, odiandro

Crotalaria microcarpa Benth. (*Crotalaria lotoides* A. Rich.; *Crotalaria lotoides* Benth.; *Crotalaria lotoides* Pers.; *Crotalaria mariae-antoniae* Aschers., nom. illeg.; *Crotalaria microcarpa* Hochst. ex Benth.; *Crotalaria microcarpa* fo. *subuniflora* Steud. ex Baker f.; *Crotalaria microcarpa* var. *dawei* Baker f.; *Crotalaria microcarpa* var. *sudanica* Baker f.; *Crotalaria polychotoma* Taubert ex Engl.)

Tropical East Africa, Tanzania, Sudan. Annual non-climbing herb

See *Synopsis Plantarum* 1: 284. 1805, *London Journal of Botany* 2: 573, 575. 1843, *Tentamen Florae Abyssinicae* ... 1: 157. 1847, *Beitrag Fl. Aethiop.* 255. 1867, *Abhandlungen der Königlich Preussischen Akademie der Wissenschaften. Physikalisch-mathematische Classe* 16 & 24. 1894 and *Journal of the Linnean Society, Botany* 42(286): 403. 1914

(Insecticidal properties. Young twigs are boiled with twigs of *Kotschy africana*, *Dissotis debilis*, *Syzygium cordatum* and *Anthospermum herbaceum*, the decoction is drunk to prevent malaria.)

Crotalaria nana Burm. f. (*Crotalaria nana* Burm.f. var. *umbellata* (Wight) A.A. Ansari; *Crotalaria umbellata* Wight & Arn.)

India. Perennial non-climbing herb

See *Flora Indica* ... nec non *Prodromus Florae Capensis* (N.L. Burman) 156, t. 48, f. 2. 1768 and *Taxon* 28: 269. 1979, *J. Econ. Taxon. Bot.* 15(2): 455. 1991

(Root paste given in diarrhea.)

in India: ghunghunia

Crotalaria natalitia Meissner (*Crotalaria gymnocalyx* Baker; *Crotalaria kilimandscharica* Taubert ex Engl.)

East and southern Africa. Annual non-climbing shrub, perennial herb or small shrub, woody-based herb, orange-yellow and brown flowers, inflated fruits, fresh leaves and flowers cooked, leaves used as a vegetable

See *London Journal of Botany* 2: 67. 1843, *Abhandlungen der Königlich Preussischen Akademie der Wissenschaften. Physikalisch-mathematische Classe* 1891. 246. 1892, *Bulletin of Miscellaneous Information Kew* 1897(128–129): 252–253. 1897

(Bark from fresh roots chewed, and the juice swallowed as a treatment for boils.)

in English: rattlepod

in Tanzania: marejea

Crotalaria ochroleuca G. Don (*Crotalaria brevidens* sensu auct.; *Crotalaria cannabina* Baker f.; *Crotalaria cannabina* Schweinf. ex Baker f.; *Crotalaria intermedia* sensu auct.; *Crotalaria intermedia* auct. non Kotschy; *Crotalaria lanceolata* sensu auct.)

Tropical Africa. Perennial non-climbing herb, erect many-branched annual or short-lived perennial herb, petals pale yellow with purple lines, livestock fodder, closely related to *Crotalaria brevidens*

See *A General History of the Dichlamydeous Plants* 2: 138. 1832 and *Journal of the Linnean Society, Botany* 42(286): 329. 1914, *Ecology of Food and Nutrition* 35(2): 111–119. 1996

(Toxic, may cause damage to lungs and liver. Leaves a treatment for yellow fever, applied to sore feet. Oil extracted from the seeds is insect repellent.)

in English: rattlebox, rattlepod

in China: xia ye zhu shi dou

in Tanzania: marejea, mitoo, rejea, rejea pori

in Uganda: alaju

Crotalaria pallida Aiton (*Crotalaria brownei* Bertero ex DC.; *Crotalaria brownei* DC.; *Crotalaria falcata* DC.; *Crotalaria fertilis* Delile; *Crotalaria hookeri* Arn.; *Crotalaria mucronata* Desv.; *Crotalaria pallida* Klotzsch; *Crotalaria pallida* Dryand.; *Crotalaria pallida* Blanco; *Crotalaria pisiformis* Guill. & Perr.; *Crotalaria saltiana* Prain ex King; *Crotalaria siamica* F.N. Williams; *Crotalaria striata* Schrank; *Crotalaria striata* DC.; *Crotalaria striata* Schumach.; *Crotalaria striata* A. Braun; *Crotalaria striata* fo. *latifoliolata* De Wild.; *Crotalaria striata* var. *acutifolia* Trin.; *Crotalaria tinctoria* Boivin ex Baillon; *Crotalaria tinctoria* Baillon; *Crotalaria zuccariniana* D. Dietr.)

Pantropical. Perennial non-climbing shrub, herbaceous, dense, erect, little-branched, 3-foliolate leaves, leaflets pubescent beneath, yellow flowers tinged with purple, terminal raceme, inflated pods, weedy

See *Hortus Kew.* (W. Aiton) 3: 20. 1789, *J. Bot. Agric.* 3: 76. 1814, *Prodr.* (DC.) 2: 131. 1825, *Beskr. Guin. Pl.* 336. 1827, *Annales des Sciences Naturelles; Botanique*, sér. 2, 3: 248. 1835, *Flora de Filipinas* [F.M. Blanco] 1: 570. 1837, *Flora* 24(1): 280. 1841, *Synopsis Plantarum* 4: 935. 1847, *Naturwissenschaftliche Reise nach Mossambique ...* [Peters] 6(Bot., 1): 58. 1861, *FBI* 2: 84. 1875, *A Hand-book to the Flora of Ceylon* 2: 19. 1894, *Journal of the Asiatic Society of Bengal* 66(2): 41. 1897 and *Mission Emile Laurent* 1: 107. 1905, *Reinwardtia* 6 (3): 195–223. 1962, *Thai Forest Bulletin (Botany)* 11: 105–181. 1978, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992

(Toxic, suspected of being poisonous to stock, caused severe losses in poultry, cattle, horses and swine. Whole plant boiled and liquid drunk for urinary problems; plant juice used as an eye medicine; plant infusion to bathe children as a prevention of skin infections and a treatment of thrush; twigs along with leaves crushed and applied over abscesses. Leaf juice vermifuge, to kill intestinal worms; leaf paste mixed in coconut water and taken for fever. Poultice of roots applied to painful swelling of joints; three root pieces tied on the head, neck and lower abdomen to cure swelling of the body; roots paste taken orally against paralysis. Seed powder taken for birth control and abortion. Contact therapy, a small portion of the stem tied to the wrists and neck of a person suffering from dropsy.)

in English: smooth crotalaria, smooth rattlepod, streaked rattlepod, striped crotalaria

in Guyana: baby shak-shak, shak-shak

in China: zhu shi dou

in India: atasi, ghantakaran, ghuntakaran, gulagitcha, gulguli, gulugula, jhunjhunia, jumika, jungli-tag, kulching, munga, san, sen, singhilap, son, son jhunka, than-kur, thang-kur

in Japan: ô-mitsuba-tanuki-mame

Malay names: giring-giring, kacang kayu

in Hawaii: kolomona, pikakani

in Madagascar: aika, aikaberavina, aikavavy, ambariva-trindoly, amberivatrandolo, kirintsa, kitsonakoho, tsiakon-droakondro, zanaharimanatrika

in Nigeria: fara birana

in Yoruba: ajaemile, biirana, omini

Crotalaria perrottetii DC. (*Chrysocalyx gracilis* Guill. & Perr.; *Chrysocalyx perrottetii* (DC.) Guill. & Perr.; *Crotalaria gambica* Taub.; *Crotalaria gracilis* (Guill. & Perr.) Walp.)

Guinea. Annual non-climbing herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 128. 1825, *Florae Senegambiae Tentamen* 159–160. 1831, *Repertorium Botanices Systematicae*. 1(4): 591. 1842, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 179. 1896

(Used in scabies and impetigo.)

Crotalaria phillipsiae Baker

Ethiopia. Annual non-climbing herb

See *Bulletin of Miscellaneous Information Kew* 1895: 213. 1895 and *Journal of Pharmacy and Pharmacology* 61(6): 801–808. 2009

(Antitrypanosomal.)

Crotalaria podocarpa DC. (*Crotalaria arvensis* Klotzsch; *Crotalaria belckii* Schinz; *Crotalaria damarensis* Engl. var. *maraisiana* Torre; *Crotalaria flexuosa* Baker; *Crotalaria fulgida* Baker; *Crotalaria hirsutissima* Schinz; *Crotalaria mutabilis* Schinz; *Crotalaria podocarpa* subsp. *belckii* (Schinz) Baker f.; *Crotalaria podocarpa* subsp. *flexuosa* (Baker) Baker f.; *Crotalaria podocarpa* var. *villosa* Schinz)

Angola, South Africa. Annual non-climbing herb, calyx light green, standard and wings bright yellow, keel light green, inflated pods light green with upper sutures purple-black

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 133. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 193. 1834, *Naturwissenschaftliche Reise nach Mossambique ...* 53. 1861, *Flora of Tropical Africa* 2: 29, 32. 1871, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 30: 159–160. 1888 and *Bulletin de l'Herbier Boissier*, sér. 2, 2(3): 819–820. 1903, *Journal of the Linnean Society, Botany* 42(286): 407.

1914, *Memorias da Junta de Investigações do Ultramar* 19: 48, pl. 27. 1960, *Pure Appl. Chem.* 73(7): 1197–1208. 2001

(Used as an expectorant, antibacterial, antiinflammatory and for treatment of sore eyes and boils. No alkaloids were isolated, but the use of *Crotalaria podocarpa* as medicine requires caution since pyrrolizidine alkaloids have been reported in *Crotalaria* species, which poses a potential health hazard to humans and livestock, and the community should be advised against using these plants.)

Crotalaria prostrata Willd. var. ***prostrata*** (*Crotalaria prostrata* D. Don; *Crotalaria prostrata* Roxb.; *Crotalaria prostrata* Roxb. ex D. Don; *Crotalaria prostrata* Wight ex Baker; *Crotalaria prostrata* Rottler ex Willd.)

India. Perennial non-climbing herb

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 747. 1809, *Prodromus Florae Nepalensis* 241. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 270. 1832, *The Flora of British India* 2(4): 67. 1876 and *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992

(Paste of leaf antifungal, applied for cuts and wounds; fresh leaf juice applied on cuts to check bleeding. Roots for stomach disorders, diarrhea and skin diseases; root juice given to treat fever and the warmed juice applied to treat gout. Postpartum remedy, plant crushed with *bara jhun jhuni* and given to women after delivery.)

in China: fu fu zhu shi dou

in India: balli gejje gida, bandar lathi, choto jhanjhan, choto-jhunghyn, chotojhunjhuni, chunchhuni, cutulutur, katic jhunka, katic-junka, khatic jhunka, kukuranda, nana jhunka, nanha, narisikoe, nhuisan, otesokoe, pirisokoe, samjhumka, serigallagista, serigallygista

in Nepal: sano boksi baja, sano chheke

Crotalaria quinquefolia L. (*Crotalaria heterophylla* L.f.)

Asia, India. Perennial non-climbing shrub

See *Species Plantarum* 2: 716. 1753

(Toxins. Leaves mixed with those of *Crotalaria retusa* L. act internally and externally against fever, scabies, lung diseases and impetigo.)

in English: wild wetland sannhemp

in India: kambe, kambi, neerugili gichha, wellia-tandale-cotti

in the Philippine Isl.: buli-lawa, katanda, palpaltog, putokan, suso-susoyan, susoi

Crotalaria retusa L. (*Crotalaria cuneifolia* (Forssk.) Schrank; *Crotalaria hostmannii* Steud.; *Crotalaria retusa* var. *maritima* Trimen; *Crotalaria retusifolia* Stokes, nom. illeg. superfl.; *Dolichos cuneifolius* Forssk.; *Lupinus cochinchinensis* Lour.)

Tropics. Perennial non-climbing shrub, herb or subshrub, erect, robust, glaucous, leaves simple, inflorescence an erect terminal raceme, corolla yellow-purple, standard tinged yellow outside, pod subcylindrical hanging down, yellow-brown to blackish heart-shaped seed, in coastal grassland, along rivers, waste places and fields

See *Species Plantarum* 2: 714–716, 721–722, 725. 1753, *Flora Aegyptiaco-Arabica* 134. 1775, *Flora Cochinchinensis* 429. 1790, *A Botanical Materia Medica* 3: 516. 1812, *Sylloge Plantarum Novarum* 2: 78. 1828, *Flora* 26(45): 757. 1843, *Botany. Croton androiensis (Leandri) Leandri (*Croton geayi* Leandri var. *androiensis* Leandri)

Madagascar. Shrub, flowers pale yellow

See *Bulletin du Muséum d'Histoire Naturelle*, sér. 2, 3(4): 368–369. 1931, *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7(1): 35. 1939, *Adansonia*, sér. 2, 9(4): 507. 1969

(The aromatic leafy branches of *Croton androiensis* and *Croton elaeagni* Baill. insect repellent, especially lice. A root bark decoction externally applied for its cicatrizing effect and to treat caries.)

Croton anisatus Baill. (*Oxydectes anisata* (Baill.) Kuntze)

Madagascar. Tree, flowers pale green with brown glands on the underside

See *Adansonia* 1: 159. 1861 [*Recueil Observ. Bot.* 1: 159. 1861], *Revis. Gen. Pl.* 2: 611. 1891

(An infusion of the aromatic leafy branches taken to treat dysentery and to calm colic.)

Croton antanosiensis Leandri (*Croton antanosiensis* var. *basaltorum* Leandri)

Madagascar. Shrub, monoecious, inflorescence a terminal raceme, white flowers, essential oil

See *Crotonis Monographiam* 50. 1807, *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 45–46, 48. 1939, *Biochemical systematics and ecology* 34(8): 648–653. 2006

(Insect repellent, antibacterial. Stem bark used to make a bitter alcoholic beverage, which is used in circumcision ceremonies to induce virility; a strong stem bark decoction taken as an ordeal poison in former times. Leafy branches lice repellent, disinfectant.)

in Madagascar: sely fotsy

Croton antisiphiliticus Mart. (*Croton antisiphiliticus* var. *angustifolius* Müll.Arg.; *Croton antisiphiliticus* var. *cordifolius* Müll.Arg.; *Croton antisiphiliticus* var. *echiifolius* Müll.Arg.; *Croton antisiphiliticus* var. *genuinus* Müll.Arg., nom. inval.; *Croton antisiphiliticus* var. *heterotrichus* Müll.Arg.; *Croton antisiphiliticus* var. *hypoleucus* Müll.Arg.; *Croton antisiphiliticus* var. *intermedius* Müll.Arg.; *Croton antisiphiliticus* var. *latifolius* (Baill.) Soc.* 94: 210. 1987, *Guihaia* 14: 131. 1994, *Biochemical Systematics and Ecology* 28(8): 795–797. 2000, *Journal of Ethnopharmacology* 103(1): 99–102. 2006

(Used for muscular strains and bladder troubles.)

Croton aubrevillei J. Léonard

Cameroon, Ivory Coast, Gabon. Small tree, monoecious, inflorescence a terminal raceme, white flowers, globular slightly 3-lobed capsule, slash exuding gum, essential oil from the stem bark, rare and endangered, in evergreen and deciduous forest, wet evergreen forests

See *Bulletin du Jardin Botanique de l'État* 28: 113. 1958, *Journal of Essential Oil Research*, 7, 419–422. 1995

(Leaves and bark infusion taken to treat constipation, stomachache and female infertility; infusion of the roots, leaves or stem bark used for stomachache or high blood pressure. Dried bark eaten for stomachache or high blood pressure, bark chewed and rubbed on babies when they cannot sleep well; also rubbed on the body to treat pain and Guinea worm infection. Magic.)

in Cameroon: ndumme

Croton barorum Leandri (*Croton barorum* var. *mangokyensis* Leandri)

Madagascar. Small tree, monoecious, inflorescence a terminal raceme, white flowers, fruit a 3-lobed capsule, in dry forest

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 66, 68. 1939

(Antibacterial. A decoction of the stem and root bark drunk to treat diarrhea, malarial fever, cough, breast cancer and leukaemia. Aromatic leafy branches insect repellent, especially against lice.)

Croton bathianus Leandri (*Croton bathiana* Leandri)

Madagascar. Tree, soft glandular leaves, inflorescences erect, white yellowish flowers, calyx persistent

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 80. 1939

(The crushed stems added to a fermented beverage and taken as a bitter tonic.)

Croton bemarkanus Leandri (*Croton bemarkana* Leandri; *Croton subaemulans* Baill. var. *minor* Leandri)

Madagascar. Shrub, whitish flowers

See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 850. 1890 and *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 69, 82. 1939

(Leaf infusion taken as a digestive.)

Croton bernierus Baill. (*Argyrodendron ovatum* Boivin ex Baill.; *Argyrodendron ovatum* B. Boivin; *Croton berniera* Baill.; *Croton bernieri* Baill.; *Croton bernierus* var. *namorokensis* Leandri; *Oxydectes berniera* (Baill.) Kuntze)

Madagascar. Small tree or shrub, flowers white

See *Fragmenta Phytographiae Australiae* 1: 2. 1858, *Recueil Observ. Bot.* 1: 152. 1861, *Hist. pl. Madag., Atlas* (1891) t. 63. 1891 and *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 54. 1939, *Not. Syst.* 13: 185. 1948

(Stem bark infusion of *Croton bernierus* and *Croton isomonensis* Leandri taken to treat coughs. Aromatic leafy branches used as insects repellent.)

in Madagascar: karimbola, lazalaza

Croton boinensis Leandri

Madagascar. Small tree or shrub

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 29. 1939

(An infusion or a steam bath of the aerial parts taken to treat rheumatism, including rheumatoid arthritis.)

in Madagascar: somorona

Croton bonplandianus Baill. (*Croton pauperulus* Müll. Arg.; *Croton rivinoides* Chodat; *Croton sparsiflorus* Morong; *Oxydectes bonplandiana* (Baill.) Kuntze; *Oxydectes pauperula* (Müll.Arg.) Kuntze; *Oxydectes sparsiflora* (Morong) Kuntze)

S. Bolivia to Uruguay. Monoecious shrub, flowers yellowish-green, bee forage, weed

See *Adansonia* 4: 339. 1864, *Revis. Gen. Pl.* 2: 610, 612. 1891, *Ann. New York Acad. Sci.* 7: 221. 1893, *Revis. Gen. Pl.* 3(2): 289. 1898 and *Taxon* 28: 274–275. 1979, *Proceedings of the Indian Science Congress Association* 69(3-vi): 242. 1982, *Pharmaceutical Biology* 27(1): 25–28. 1989

(Used in Sidha. Powder from the dried whole plant taken to treat poisonous bites. Stem, leaves and inflorescence crushed and the juice given for cough, congestion of nose and chest, headache. Antiseptic, fungitoxic, antimicrobial, the watery latex used for skin diseases, cuts, wounds, to check bleeding. Leaf paste for ringworm; leaf paste along with turmeric applied for skin eruptions; leaf chewed against aphthae. Seeds purgative.)

in English: dog chilli, wild chilli

in Argentina: nogal del zorro

in India: attupuntu, bhoothalabhairi, bhoothankusamu, bhut-kati, bonomircho, chara, chhoti-rendi, danti bhed, erri mirapa, gabbaku chettu, gali vana, galivana, galivana chettu, galivana mokka, gandhi poodu, kala-bhangra, kalabhangra, konda mirapa tuppa, kukka mirapa, kukurshuka, mannan-naikozhai, milagaaiipoond, nela bedi soppu, panimarich, pichhi mirapa, reilpoond, siru-kattamanakku

in Thailand: plao thung

Croton cajucara Benth. (*Oxydectes cajucara* (Benth.) Kuntze)

Venezuela to Brazil, Amazon region. Shrub or treelet, spreading, inflorescences racemose, creamy white scented flowers, aromatic plant, fruits eaten by birds, at edge of forest

See *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 376. 1854, *Adansonia* 4: 341. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 626. 1866, *Revis. Gen. Pl.* 2: 611. 1891 and *Fitoterapia* 73(2): 116–120. 2002, *Phytomedicine* 9(6): 523–529. 2002, *Planta medica* 69(1): 67–69. 2003, *British Journal of Nutrition* 96: 310–315. 2006, Fábio Vieira dos Santos et al. “Mutagenicity and antimutagenicity of *Croton cajucara*.” *Biologia* 63(3): 327–331. 2008

(Antiulcerogenic, antimicrobial, cytotoxic, antiinflammatory, antitumor, antimutagenic, antinociceptive and hypoglycemic, gastric cytoprotection, protective and healing actions of the essential oil from bark on gastric lesions; a weak infusion drunk in case of heartburn, gastrointestinal problems, gastritis, peptic ulcers, diabetes, liver inflammation and to control high cholesterol. Bark infusion for fever; powder of bark put onto wounds. Leaves or bark boiled with water taken cold for liver. leaves essential oil leishmanicidal. Diterpenes exhibit potent antineoplastic properties against human and murine carcinoma cell lines.)

in Brazil: sacaca, Santa Maria

in Venezuela: carurú, echepeñ

(Young shoots used to cure cholera and ground with leaves of *Caesalpinia sappan* for use in treatment of liver diseases. Roots decoction purgative, febrifuge, for constipation, malaria, fever and colds; dried bark to relieve stomach disorders. For coughs, eat the pit with betel. Fresh leaf paste applied as poultice on sprains, injuries; leaves diuretic, used in liver diseases. Leaves and fruits febrifuge, laxative, antiseptic, for skin infections. Seeds used as poison on tips of arrows for hunting. Crushed powdered fruits used as fish poison.)

in India: bepper, dumi shak, dumi-shak, halonge, khali, kum-kum-araung, lata-mahudi, matau, muhudi lota, saphai blai, sawaka, soh sambrang, supare, superai, wusta

in Malaysia: gurah peria, gurah periat, mendarong akar, sekebah, tukul takal, tukut takai, tukut takal

in Philippines: alimpai

in Thailand: kho khlan, krado hot bai khon, ku raon, kura pieak, kurapia, plao

in Vietnam: ba d[aa]ju leo, c[uf] d[ef]n du[oo]i

Croton ciliatoglandulifer Ortega (*Croton chaetodus* Urb.; *Croton chaetodus* var. *gonavensis* Urb.; *Croton ciliato-glanduliferus* Ortega; *Croton ciliato-glandulosus* Steud.; *Croton ciliatoglanduliferus* Ortega; *Croton ciliatoglandulosus* Steud.; *Croton fuertesii* Urb.; *Croton penicillatus* Vent., nom.

illeg.; *Croton pulcherrimus* Willd. ex Schldl.; *Oxydectes ciliatoglandulosa* (Steud.) Kuntze)

North to Central America. Herbaceous, shrub, flowers white, leaves and stalks covered with whitish hairs

See *Nov. Pl. Descr. Dec.*: 51. 1797 [*Novarum, aut Rariorum Plantarum Horti Reg. Botan. Matrit.*], *Nomencl. Bot.*, ed. 2 (Steudel) 1: 446. 1840, *Linnaea* 34: 121. 1865, *Revis. Gen. Pl.* 2: 611. 1891 and *Repert. Spec. Nov. Regni Veg.* 18: 188. 1922, *Contr. Univ. Mich. Herb.* 23: 373. 2001

(Febrifuge. If the hairs come in contact with the eyes, serious eye inflammations can result, cattle grazing between these shrubs have been reported to have gone blind.)

in El Salvador: chilca para barrer pulgas

in Mexico: canelilla, cuanaxunaxe, xonaxe, xunaxe, xunaxase, xinax (Oaxaca); dominguilla (Jalisco); enchiladora (Oaxaca and Veracruz); picosa (Queretaro); shunashi-lase (Zapoteca I., Oaxaca); palillo, soliman, soliman blanco, trucha (Sinaloa); uruquenia (Sonora); chilipajtle (Huasteca I., south east San Luis Potosí); luc (south east San Luis Potosí)

Croton columnaris Airy Shaw

Thailand. Shrub, multi-stemmed, inflorescences greenish to yellow-green

See *Kew Bulletin* 23: 69. 1969, Chayamarit, K. & Van Welzen, P.C. *Euphorbiaceae* (Genera A-F). *Flora of Thailand* 8(1): 1–303. Bangkok. 2005

(Anti-ulcer.)

in Thailand: plao kham, plao noi, plau noi

Croton cortesianus Kunth (*Croton segoviarum* Standl. & L.O. Williams; *Croton trichocarpus* Torr.; *Oxydectes cortesiana* (Kunth) Kuntze)

North to Central America.

See *Nov. Gen. Sp.* 2: 83. 1817, *Rep. U.S. Mex. Bound.* 2(1): 196. 1858–9, *Revis. Gen. Pl.* 2: 611. 1891 and *Ceiba* 3(3): 211. 1952–3

(Caustic.)

in Mexico: ek-balan (Maya I., Yucatan); hierba del moro (Veracruz); ocoyanmona, ocueyan-mona (Zoque I., Tuxtla Gutierrez); palillo, pinolillo, pozual, puzual (San Luis Potosí); pahual, pohual, pushual (Huasteca I., south east San Luis Potosí)

Croton crassifolius Geiseler (*Croton chinensis* Benth., nom. illeg.; *Croton crozophoroides* Kurz; *Croton kroneanus* Miq.; *Croton tomentosus* (Lour.) Müll.Arg., nom. illeg.; *Oxydectes tomentosa* (Lour.) Kuntze; *Tridesmis hispida* Lour.; *Tridesmis tomentosa* Lour.)

Thailand, China to Indochina. Shrub, yellowish inflorescence terminal

See *Flora Cochinchinensis* 540, 576. 1790, *Croton. Monogr.* 19. 1807, *Enum. Hort. Berol. Alt.* 2: 406. 1822, *Journal de Botanique Néerlandaise* 1: 97. 1861, *Flora Hongkongensis* 309. 1861, *Linnaea* 34: 107. 1865, *Prodr.* 15, 2: 588. 1866, *J. Asiat. Soc. India* 34: 41, fig. 5. 1997 [1992], *Fl. Thailand* 8, 1: 202. 2005

(Roots for cholera, wounds, dysentery, inflamed throat, to dispel the chill and take off the dampness; boiled in combination with *Clausena harmandiana* Pierre ex Guillaumin and taken as antifatulent.)

in English: thick-leaf croton

in China: ji gu xiang

in Thailand: pang khi, phang khi noi

Croton crocodilorum Leandri

Madagascar. Shrub, leaves papery, fragrant yellowish flowers

See *Flora Cochinchinensis* 601, 635. 1790 and *Annales de l'Institut Botanique-Géologique Colonial de Marseille*, sér. 5, 7: 80. 1939

(An infusion of the bitter bark taken as a stimulant and aphrodisiac.)

Croton cuneatus Klotzsch (*Croton cuneatus* Miq., nom. illeg.; *Croton kaieteuri* Jabl.; *Croton monachinoensis* Jabl.; *Croton surinamensis* Müll.Arg.; *Macrocroton cuneatus* (Klotzsch) Klotzsch; *Macrocroton surinamensis* Klotzsch; *Oxydectes cuneata* (Klotzsch) Kuntze; *Oxydectes surinamensis* (Müll.Arg.) Kuntze)

S. Trop. America. Tree or shrub, red sap in the bark, creamy greenish flowers, aromatic, fishes eat the fruit

See *Nova Genera ac Species Plantarum* 3: 23. 1841, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 49. 1843, *Linnaea* 34: 82. 1865, *Revis. Gen. Pl.* 2: 611, 613. 1891 and *Mem. New York Bot. Gard.* 12(3): 155, 157. 1965, *Taxon* 45: 679–680. 1996, *Journal of Ethnopharmacology* 105(1–2): 99–101. 2006, *Pharmaceutical biology* 44(5): 349–362. 2006, *Revista Brasileira de Farmacognosia* 17(2). 2007

(Antinociceptive, antiinflammatory, when mixed with cane liquor and aged, said to be a cure for rheumatism. Bark used for dysentery, latex for sores.)

in Peru: aguafiorida sachá, entsáya kantsá, hipururu rojo, purma caspi

in Venezuela: arapurima

Croton decaryi Leandri

Madagascar. Shrub or small tree, monoecious, leaves very soft, white flowers, inflorescence a terminal raceme, fruit

an ovoid 3-lobed hairy capsule, essential oil of the leaves, in open forest and on stream banks

See *Bulletin de la Société Botanique de France* 59(3): 620. 1912 [1913], *Bulletin du Muséum d'Histoire Naturelle*, sér. 2 3(4): 370. 1931, *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7: 79. 1939

(Aromatic leafy branches insect repellent, especially lice. A decoction of the aerial parts taken to calm patients with psychosis.)

***Croton dichogamus* Pax**

Ethiopia to Mozambique. Shrub, many-branched, aromatic, traditional tea and beer, leaves browsed by elephants, leaves that fall to the ground are eaten by goats, in wooded grassland, on rocky ground

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 78. 1909, *Journal of Ethnopharmacology* 66(1): 1–10. 1999, Calane da Silva, M., Izidine, S. & Amuse, A.B. *A Preliminary Checklist of the Vascular Plants of Mozambique*. Pretoria. 2004, M.O. Omolo et al. "Fumigant toxicity of the essential oils of some African plants against *Anopheles gambiae* sensu stricto." *Phytomedicine* 12(3): 241–246. 2005, *J. Ethnobiol. Ethnomed.* 2: 22. 2006

(Root powder, alone or mixed with that of *Croton polytrichus* Pax, mixed with porridge or tea to treat impotence and colds. Root decoction taken to treat irregular menstruation and diarrhea; root/bark decoction for malaria. Leaves antiviral, antipyretic, mixed with dry cow dung, burned, the ashes mixed with maize grains to protect from pests. Antioxidants and hypocholesterolemic, saponins and/or phenolics.)

in Rwanda: umuhuúhe

in Tanzania: mhande, mkua n'gombe, mtooto, mubalanga

***Croton dioicus* Cav.** (*Astogyne crotonoides* Benth.; *Croton dioicus* Isert ex Geiseler, nom. illeg.; *Croton dioicus* Sessé & Moc., nom. illeg.; *Croton dioicus* Willd., nom. illeg.; *Croton dioicus* Roxb., nom. illeg.; *Croton elaeagnifolius* Vahl; *Croton gracilis* Kunth; *Croton gracilis* var. *genuina* Müll.Arg.; *Croton gracilis* var. *genuinus* (Kunth) Müll.Arg.; *Croton gracilis* var. *genuinus* Müll.Arg., nom. inval.; *Croton gracilis* var. *longiradiatus* Müll.Arg.; *Croton tomentosus* Sessé & Moc., nom. illeg.; *Croton tomentosus* Link, nom. illeg.; *Croton tomentosus* (Michx.) (For wounds, boils, cuts.)

Croton goudotii Baill. (*Croton emirnensis* Baker; *Croton goudotii* Aug. DC.; *Croton mollivelus* Baill.; *Croton platani-folius* Baker; *Croton platanifolius* Bojer ex Baker; *Oxydectes goudotii* (Baill.) Kuntze)

Madagascar. Tree, leaves and inflorescence pubescent, fragrant flowers pale yellow green, pubescent globose fruits, in forest

See *Genera Nova Madagascariensia* 26. 1806, *Recueil Observ. Bot.* 1: 157. 1861 [*Adansonia* 1: 157, t. 5, f. 3. 1861], *J. Bot.* 20: 168. 1882, *J. Linn. Soc., Bot.* 20: 252. 1883, *Bull. Mens. Soc. Linn. Paris* 2: 926. 1891, *Revis. Gen. Pl.* 2: 611. 1891 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 7: 74. 1939

(A leaf decoction inhaled to treat malaria; bark decoction taken to treat chronic gonorrhoea.)

in Madagascar: hafotra

Croton gratissimus Burch. (*Croton zambesicus* Müll.Arg.; *Oxydectes gratissima* (Burch.) Kuntze)

Trop. and S. Africa. Small tree or shrub, slender, bark slash aromatic, leaves upper surface shiny dark green, spikes of small flowers cream to golden yellow, aromatic fruits

See *Travels in the interior of South Africa* 2: 263. 1824, *Revis. Gen. Pl.* 2: 611. 1891 and *African Journal of Biotechnology* 6(25): 2868–2885. 2007

(Bark very poisonous. Plant febrifuge, laxative, tonic, aperient. Bark infusion used in the treatment of malaria, fevers, stomach and intestinal complaints, pleurisy, chest complaints, uterine disorders, dropsy; stem bark inhaled to relieve pain. Leaves for diarrhoea, dysentery, pain-killers, headache, paralysis, epilepsy, convulsions, spasm, vermifuge. Leaves sap used for healing cuts, an infusion of the leaves acts as a purgative. Superstitions, magic, a fetish tree, protective against witches, to ward off evil influences.)

in English: lavender croton, lavender fever-berry

in Dahomey: adiékofolé, djélélé

in Mali: tonedibonhaini

in Niger: koriba, tóndi-bòn hééní

in Nigeria: àj kò bàlè, àj kòfòlè, étó òbùmà, ícén másàr, koriba, mfam, mòròmòrò

in Sierra Leone: aje-ofonla, jefulwal, kuru-tinjengo

in South Africa: bergboegoe, ilabele, inkubathi, isikhumampuphu, korannaboegoe, laventelbos, laventelkoorsbessie, maloga

in Upper Volta: koriba

Croton gratissimus Burch. var. ***gratissimus*** (*Croton amabilis* Müll.Arg.; *Croton antunesii* Pax; *Croton microbotryus* Pax; *Croton welwitschianus* Müll.Arg.; *Croton zambesicus* Müll.Arg.; *Oxydectes amabilis* (Müll.Arg.) Kuntze; *Oxydectes welwitschiana* (Müll.Arg.) Kuntze; *Oxydectes zambesica* (Müll.Arg.) Kuntze)

Tropical and S. Africa. Small tree, no hairs on the upper surface, dried flower buds strongly aromatic

See *Flora* 47: 483, 537. 1864, *Bot. Jahrb. Syst.* 10: 35. 1889, *Revis. Gen. Pl.* 2: 611, 613. 1891, *Bot. Jahrb. Syst.* 23: 523. 1897

(Bark very poisonous. Roots used for vomiting. Leaves for dysentery, fever, measles, convulsions, colds. Sap from the leaves used for healing cuts, an infusion of the leaves acts as a purgative. Bark used in the treatment of malaria, for stomach and intestinal complaints, pleurisy, chest complaints, uterine disorders, dropsy.)

in English: lavender croton, lavender fever-berry

in S. Rhodesia: isiBaxa, muKanukila, muKena

in Southern Africa: bergboegoe, boog, Kalahari-boegoe, laventelbos, laventelkoorsbessie, masquassieboom, mutwari, rekstokbos; umHuluka (Swazi); muBangwe, Gununkira, muFundamengwe, muKanukila, Kanunkira, muKisa, muVena (Shona); umaHlabakufeni, uMahlabekufeni, uHube-shane, iHubeshane-elikhula, iNkubathi, isiKhumampuphu, iLabele (Zulu); moologa (Western Transvaal, northern Cape, Botswana); mologa (Hebron: Central Transvaal)

in Swaziland: mwulukwa, Umbuluku, umHuluka, uMwulukwa

Croton greveanus Baill. (*Croton greveana* Baill.; *Croton greveanus* var. *borealis* Leandri; *Croton tranomarensis* Leandri)

Madagascar. Shrub, flowers cream

See *Bull. Mens. Soc. Linn. Paris* 2: 848–850. 1890, *Hist. pl. Madag., Atlas* (1890) t. 157. 1890 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7: 60. 1939

(Aromatic leafy branches used to repel insects, especially lice. A bark decoction taken to treat cough. A decoction of the aerial parts taken to treat lumbar pain caused by chronic gonorrhoea.)

Croton griffithii Hook.f. (*Croton confusus* Gage; *Croton laevifolius* auct. non Bl.; *Oxydectes griffithii* (Hook.f.) Kuntze)

Thailand, Malaysia, Borneo, Sulawesi. Small tree or shrub, leaves with two conspicuous glands on petiole near leaf base, flowers greenish-white-yellow, sepals apically bearded, fruit a greenish dehiscent depressed 3-lobed capsule, in primary submontane forest, often confused with *Croton laevifolius* Blume

See *Fl. Brit. India* 5: 392. 1887 and *Rec. Bot. Surv. India* 9: 237. 1922, *Fl. Malay Pen.* 3: 261. 1924, *Dict. Econ. Prod. Malay Pen.* 1: 689. 1935, *Gard. Bull. Singapore* 10:

294. 1939, *Kew Bull.* 26: 246. 1972, *Tree Fl. Malaya* 3: 85. 1973, *Wayside Trees Mal.*, ed. 3: 284. 1988, *PROSEA* 12, 2, Medicinal and Poisonous Plants 2: 201. 2001, *Novon* 12: 42. 2002, *Fl. Thailand* 8, 1: 205. 2005

(Leaves decoction a postpartum bath after childbirth. Finely scraped root sprinkled on ulcers.)

in Borneo: entupak, kayu aga

in Indonesia: tumpung

in Malaysia: kemesak, melokan ayer, tapin batu

in Thailand: chik, plao

Croton guatemalensis Lotsy (*Croton eluterioides* Lotsy; *Croton pyriticus* Croizat; *Croton wilburii* McVaugh)

Guatemala, Mexico, Central America.

See *Botanical Gazette* 20(8): 352–353, t. 25. 1895 and *Journal of the Arnold Arboretum* 26(2): 186–187. 1945, *Fieldiana, Bot.* 24(6): 25–170. 1949, *Brittonia* 13: 166. 1961, *Ceiba* 44(2): 105–268. 2003 [2005]

(For malaria, fevers, rheumatism.)

Croton gummiferus A. Cunn. ex Planch.

South America. See also *Bertya gummifera* Planch.

See *London Journal of Botany* 4: 473. 1845

(Gum-resin astringent.)

Croton haumanianus J. Léonard (for the Belgian botanist Lucien Hauman, 1880–1965, 1904–1926 Faculty of Agronomy in Buenos Aires (Argentina), 1928–1950 professor of botany at Bruxelles, author of *La végétation des hautes Cordillères de Mendoza*. Buenos Aires 1919, Buenos Aires 1917–1923 *Catalogue des phanérogames de l'Argentine* jointly written with G. Vanderveken and Luis H. Irigoyen; see J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 139. 1965.)

WC. Trop. Africa, Zaire. Small tree, monoecious, flowers white, inflorescence a terminal raceme, fruit a thick-walled indehiscent drupe, in secondary forest

See *Bull. Agric. du Congo Belge* 48: 79. 1957, *Tetrahedron* 46(15): 5199–5202. 1990, *African Study Monographs*, Suppl. 28: 7–24. 2003

(Poisonous, should be used with caution. Grated fresh bark infusion purgative and diuretic; grated bark and palm oil applied to treat rheumatism, headache, edema of the legs, abscesses; small amounts of bark or leaf decoction drunk to treat gonorrhoea, hypertension and epilepsy, rheumatism, urinary infections, worms, headache, constipation, edema, and painful urination. Seeds crushed in water, the liquid taken to prevent abortion. Stem bark, leaves or fruits preparation eaten as an aphrodisiac. Mashed stem bark and fruits used to kill rats and in the preparation of arrow poison. Magic, ritual, ceremonial, plant used in ceremonies to chase away bad spirits. Veterinary medicine, bark for skin troubles.)

in Congo: acutengitalu, katagu, lusebe, mubama, mubamba, ntoma, oshune, saku, sumbe/biloo, tengwe, unganda

Croton heterocarpus Müll.Arg. (*Croton ardisioides* Hook.f.; *Oxydectes ardisioides* (Hook.f.) Kuntze; *Oxydectes ardisioides* Kuntze; *Oxydectes heterocarpa* (Müll.Arg.) Kuntze; *Oxydectes heterocarpa* Kuntze)

Borneo. Shrub

See *Prodr.* (DC.) 15(2.2): 621. 1866, *Fl. Brit. India* [J.D. Hooker] 5: 393. 1887, *Revis. Gen. Pl.* 2: 612, 614. 1891

(Leaves and bark decoction as a bath for cracked sole of the foot.)

in Sarawak: trima

Croton hirtus L'Hér. (*Astraea klotzschii* Didr.; *Brachystachys hirta* Klotzsch; *Croton affinis* Geiseler; *Croton corchorifolius* Geiseler; *Croton divaricatus* Sw.; *Croton floridanus* Ferguson; *Croton glandulosus* Müll.Arg.; *Croton glandulosus* subsp. *hirtus* (L'Hér.) Kuntze; *Podostachys hirta* (L'Hér.) Klotzsch; *Podostachys hirta* Klotzsch)

French Guiana. Seasonal herbs, hairy branchlets, inflorescence a terminal branched raceme covered with capitate glands, a noxious weed

See *Stirpes Novae aut Minus Cognitae* 17, pl. 9. 1785, *Encycl.* (Lamarck) 2(1): 215. 1786, *Fl. Flumin. Icon.* 10: t. 69. 1831 [1827 publ. 29 Oct 1831], *Archiv für Naturgeschichte* 7: 194. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 684. 1866, *Revisio Generum Plantarum* 2: 614. 1891 and *Bulletin of the Torrey Botanical Club* 75: 401. 1948, *Fieldiana, Bot.* 24(6): 25–170. 1949, *Harvard Pap. Bot.* 9(2): 257–296. 2005

(Trichomes cause skin allergy.)

Croton hovarum Leandri

Madagascar. Shrub

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 40. 1939, *Phytochemistry* 41(2): 561–563. 1996, *Phytochemistry* 45: 379. 1997, *Phytochemistry* 47(7): 1227–1232. 1998

(Bark toxic. Leaves toxic, infusions of this plant known to cause coronary vasoconstriction. Aerial parts, cooked with chicken bones, used to treat colic and acute weakness of the body.)

in Madagascar: lazalaza

Croton humbertii Leandri

Madagascar. Shrub or small tree, stems sweetly fragrant, flowers white yellowish

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 22. 1939

(Leafy branches hung in houses to repel insects; small pouches of dried leaves carried on the body against lice.)

Croton humilis L. (*Croton aridicola* Urb.; *Croton berlandieri* Müll.Arg., nom. illeg.; *Croton berlandieri* Torr.; *Croton salvifolius* Mill.; *Croton subcapitatus* Müll.Arg.; *Croton subtomentosus* L.; *Oxydectes berlandieri* (Torr.) Kuntze; *Oxydectes heptalon* (Müll.Arg.) Kuntze; *Oxydectes humilis* (L.) Kuntze; *Oxydectes salvifolia* (Mill.) Kuntze)

Mexico.

See *Systema Naturae*, Editio Decima 2: 1276. 1759, *The Gardeners Dictionary*: ... eighth edition no. 10. 1768, *Report on the United States and Mexican Boundary ... Botany* 2(1): 193–194. 1859, *Linnaea* 34: 141. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2.2): 688. 1866, *Genera, species et synonyma Candolleana* 4: 5. 1874, *Revisio Generum Plantarum* 2: 610–612. 1891 and *Symbolae Antillarum* 7: 259. 1912

(Diaphoretic, febrifuge.)

Croton incanus Kunth (*Croton incanus* Blume; *Croton incanus* Blume ex Baill.; *Croton incanus* Andersson, non *Croton incanus* Kunth; *Croton suaveolens* var. *oblongifolius* Torr.; *Croton torreyanus* Müll.Arg.; *Oxydectes incana* (Kunth) Kuntze; *Oxydectes torreyana* (Müll.Arg.) Kuntze; *Podostachys incana* (Kunth) Klotzsch)

Mexico.

See *Nov. Gen. Sp.* (quarto ed.) 2: 73. 1817, *Catalogus* ... 104. 1832, *Arch. Naturgesch.* 7: 194. 1841, *Étude générale du groupe des Euphorbiacées* 470, pl. 11, f. 14. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2[2]): 579. 1866, *Revisio Generum Plantarum* 2: 612–613. 1891

(For dysuria, kidney problems.)

Croton isomonensis Leandri

Madagascar. Shrub, terminal racemes

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 48. 1939

(Stem bark infusion of *Croton bernierus* Baill. and *Croton isomonensis* taken to treat coughs. Aromatic leafy branches used as insects repellent.)

Croton jatrophoides Pax

Tanzania, Central African Republic. Tree or shrub, drooping branches, leaves with 2 small basal glands, flowers yellowish green, slender terminal racemes, warted indehiscent bilobed fruit, leaves used as fodder, strongly scented roots, in dry coastal forest, lowland forest edge and clearings, riverine forest

See *Voyage en Abyssinie* 3: 158. 1847 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 79. 1909, *J. Nat. Prod.* 68(2): 244–247, 2005, *Journal of Natural Products* 69(6): 975–977. 2006

(Exudate and leaves antimicrobial, antiviral, antiinflammatory, used for swollen wounds or other swellings. Root extract taken to treat colds and stomachache. Fruit extract taken to treat intestinal worms. Antifeedant activity against larvae of insects, the root bark.)

in Tanzania: mdukuduku, mshinduzi, msinduzi

Croton jennyanus Gris. ex Baill. (*Croton punctatum* Rich.; *Croton punctatus* Rich. ex Baill., nom. illeg.; *Croton squamiger* var. *acutifolius* Müll.Arg.; *Croton squamigerum* Baill.; *Croton squamigerus* Baill.; *Croton squamigerus* var. *acutifolius* Müll.Arg.; *Croton squamigerus* var. *obtusifolius* Müll.Arg.; *Oxydectes jennyana* (Gris ex Baill.) Kuntze; *Oxydectes squamigera* (Baill.) Kuntze)

Madagascar. Shrub or treelet, leaves papery, sweet-scented white flowers

See *Recueil Observ. Bot.* 1: 160, 162, 168–169. 1861, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 523. 1866, *Revis. Gen. Pl.* 2: 612–613. 1891 and *Bulletin de l'Herbier Boissier*, sér. 2, 1(6): 565. 1901

(A decoction of the aerial parts taken to calm patients with delirium, paralysis or Parkinson's disease. Seeds strong purgative, are considered dangerous.)

in Madagascar: lazalaza, lazalaza-madinidravina, tsiavalika

Croton joufra Roxb. (*Croton caryocarpus* Croizat; *Croton persimilis* Mull. Arg.; *Croton persimilis* var. *glabratus* Müll. Arg.; *Oxydectes joufra* (Roxb.) Kuntze; *Oxydectes persimilis* (Müll.Arg.) Kuntze)

Assam, Bhutan to China. Shrub or tree, aromatic coriaceous oblong-lanceolate leaves, petioles apex with 2 cupular glands, yellowish-green terminal inflorescence, ovoid capsule, leaves for making rice-beer cake, traditional beverage from the leaves

See *Fl. Ind.* ed. 1832, 3: 685. 1832, *Linnaea* 34: 116. 1865, *Prodr.* 15, 2: 519. 1866, *Forest Fl. Burma* 2: 373. 1877, *Fl. Brit. India* 5: 387. 1887, *Revis. Gen. Pl.* 2: 612. 1891 and *Fl.*

Indo-Chine 5: 280. 1925, *Journal of the Arnold Arboretum* 23(1): 44–45. 1942, *Kew Bull.* 26: 247. 1972, *Phytochemistry* 56(8): 811–814. 2001, *Fl. Thailand* 8, 1: 224. 2005, *Natural Product Radiancance* 5: 377–381. 2006

(Diterpenes, cytotoxic diterpenoids, from the leaves; leaves extract used for cataract eye. Used for gastritis. Veterinary medicine, the bark. Magic, plant regarded as sacred, protected.)

in English: kowli seeds, kuli seeds

in China: chang guo ba dou

in India: dieng lamosuh, inthap-ching, jofra, kharane, mahudi, mahundi, makunda, marthu-araung, thaunang

in Myanmar: thetyin-gale, thetyin-kado

Croton kimosorum Leandri

Madagascar. Shrub, flowers yellowish green

See *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 29. 1939

(A leaf infusion against coughs and antispasmodic.)

Croton kongensis Gagnep. (*Croton tonkinensis* Gagnep.)

China to Indochina. Shrub or treelet, petioles apex with 2 cupular glands, inflorescence terminal, fruits deeply sulcate, in open forest

See *Bull. Soc. Bot. France* 68: 555, 560. 1921 [1922], *Fl. Indo-Chine* 5: 287. 1925, *J. Arnold Arbor.* 21: 500. 1940, *Kew Bull.* 26: 247. 1972, *Proc. Indian Acad. Sc.* 92: 370, fig. 5. 1983, *Fl. Reipubl. Pop. Sin.* 44(2): 125, pl. 29 fig. 4. 1996, *Bull. Bot. Surv. India* 34: 56. 1997 [1992], *J. Nat. Prod.* 66 (6): 868–870. 2003, *Fl. Thailand* 8, 1: 209. 2005, *Helvetica Chimica Acta* 89(3): 537–541. 2006, *Helvetica Chimica Acta* 90(8): 1554–1558. 2007

(Leaves used for stomach disorders, ulcers; a decoction applied for furuncles and impetigo. Antimalarial, cytotoxic and antimycobacterial. Diterpenoids, flavonoids and alkaloid.)

in China: yue nan ba dou

in Thailand: plao nam ngoen, plao ngeon, plao ngoen, plao noi, se-po-tu

Croton laevigatus Vahl (*Croton boragatch* Roxb. ex Wall., nom. nud.; *Croton elaeocarpifolius* Wall., nom. nud.; *Croton oblongifolius* Roxb., nom. illeg.; *Croton persimilis* Müll. in Thailand: chi-mae-chi-cha, chi-mia-chi-yat-apa, khwa-wu, plao, plao hua kwan, plao luang, plao yai, say-ga-wa

in Tibet: na ga da nti

in Vietnam: ba dau la bong

Croton lechleri Müll. Arg. (*Croton draco* Schltldl. & Cham. var. *cordatus* Müll. Arg.; *Oxydectes lechleri* (Müll. Arg.) Kuntze)

Colombia to Peru. Tree or shrub, red viscous latex, leaves membranaceous glandular, white flowers, fruit capsular

See *Linnaea* 6: 360. 1831, *Linnaea* 34: 90. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 545. 1866

(Latex a wound healing agent, antiinflammatory (previously mixed with water and honey), used for internal ulcers and gastroduodenal ulcers, cancer, inflammation, diarrhea, wounds, pain, tumors, herpes infection, itching, insect bites and viral infections.)

in English: dragon's blood

in Peru: sangre de drago

Croton leptostachyus Kunth

Colombia.

See *Journal of Ethnopharmacology* 107(3): 460–462. 2006

(Antimalarial, aerial part.)

Croton leucophyllus Müll.Arg. (*Croton leucophyllus* var. *trisepalis* A.M. Ferguson; *Oxydectes leucophylla* (Müll. Arg.) Kuntze)

North America, Mexico.

See *Linnaea* 34: 139. 1865, *Revis. Gen. Pl.* 2: 612. 1891 and *Rep. (Annual) Missouri Bot. Gard.* 12: 57. 1901

(A decoction drunk to treat kidney disorders accompanied by pain during urination, dysuria.)

Croton longissimus Airy Shaw

Thailand. Shrub, inflorescences greenish, close to *Croton stellatopilosus*

See *Kew Bulletin* 23: 70. 1969, *Kew Bull.* 26: 248. 1972, *Thai For. Bull. (Bot.)* 29: 56. 2001, *Fl. Thailand* 8, 1: 214. 2005

(Antiinflammatory, leaves used dried and crushed or as a stimulant bath.)

in Thailand: plao noi

Croton macrobuxus Baill. (*Croton nitidulus* Baker; *Croton sambiranensis* Leandri)

Madagascar. Shrub or small tree, branched, inflorescence terminal, flowers white creamy, in forest

See *Journal of the Linnean Society, Botany* 20: 253. 1883, *Bull. Mens. Soc. Linn. Paris* 2: 863. 1890 and *Ann. Inst. Bot.-Géol. Colon. Marseille*, V, 7(1): 41. 1939

(A leafy twig infusion taken to treat asthma attacks.)

Croton macrostachyus Hochst. ex Delile (*Croton acuminatus* R.Br., nom. nud.; *Croton butaguensis* De Wild.; *Croton guerzesiensis* Beille, nom. illeg.; *Croton guerzesiensis* Beille ex A. Chev.; *Croton macrostachyus* var. *mollissimus* Chiov.; *Croton sylvaticus* Hochst.; *Croton zambesicus* sensu De Wild.; *Neoboutonia macrocalyx* Pax; *Oxydectes macrostachya* (Hochst. ex Delile) Kuntze; *Rottlera schimperii* Hochst. & Steud.)

Trop. Africa, Madagascar. Deciduous tree or shrub, crown rounded and open, long taproot and numerous side-roots, large spreading branches, erect slender terminal raceme, heavily sweetly fragrant creamy yellow flowers, drooping spikes of pea-sized capsules, leaves used as green manure and fodder, sheep and goats do not browse young leaves but old leaves are readily eaten, fruits used as poultry feed, edge of evergreen forest, in moist and dry evergreen upland forest, riverine forest, in disturbed forest, woodland and wooded grassland

See *Flora* 28: 82. 1845, *Voyage en Abyssinie* 3: 158. 1847, *J. Bot.* 2: 336. 1864 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 339. 1901, *Revue de zoologie et de botanique africaines* 9 Suppl. Bot.: 16. 1921, *Missione Biologica nel Paese dei Borana*, 4. *Raccolte Botaniche* 4: 98. 1939

(All parts, but especially the seeds, are toxic, and any medicine made from them should be used with caution; seed oil is a very powerful purgative. Trypanocidal, molluscicidal, toxic to insects, taenicidal, antibacterial, abortifacient. A decoction, infusion or maceration of leaves, stem bark or root bark taken as a purgative and vermifuge, leaf sap used similarly. Leaves and bark used to treat stomach problems; burnt leaves used for coughs. Roots a remedy for stomachache, constipation and intestinal worms; root decoction used for malaria, venereal diseases and coughs. A medicine for curing *majipu*, tumor. Magic and ritual, a powder of leaves and twig bark eaten to calm insanity and possession.)

in East Africa: mfulufuru, musogasoga, mutundu

in Ethiopia: tambuk

in Rwanda: umubónobóno, umuraangara

in Tanzania: lihulugu, livuluku, mfulufuru, mfulufuru, mtumbatu, muwulugu, muwurugu, oloiyapiyap, oloiyapoiyap, oloiyappiyap

Croton malabaricus Bedd. (*Oxydectes malabarica* (Bedd.) Kuntze)

India. Small tree, racemes, sepals of female flowers ovate-oblong, stamens villous below with long silky hairs, in moist forests

See *The Flora Sylvatica for Southern India* 204. 1873, *Revis. Gen. Pl.* 2: 614. 1891

(Used in Sidha or Siddha.)

in India: anakuru, anekuru, kolavacchi, koluvasi, pambaram, pamparam, tenatal, thenadal

Croton malambo Karsten (*Oxydectes malambo* (H. Karst.) Kuntze)

Venezuela, Colombia. Shrub, yellowish aromatic bark

See *Linnaea* 28: 418. 1857, *Revis. Gen. Pl.* 2: 612. 1891 and *Journal of Ethnopharmacology* 88(1): 11–14. 2003, *Flavour and Fragrance Journal* 20(6): 611–614. 2005

(Antinociceptive, sedative, analgesic and antiinflammatory, for diarrhea, cholera, rheumatism.)

in English: malambo bark, Winter's bark

in Venezuela: malambo, palomitas, torco

Croton mauritianus Lam. (*Croton canescens* Bojer; *Croton mauritianus* Stadtm. ex Willemet, nom. illeg.; *Croton mauritianus* Thouars ex Baill., nom. illeg.; *Halecus mauritianus*

(Lam.) Raf.; *Klotzschiphytum mauritianum* (Lam.) Baill.; *Oxydectes mauritiana* (Lam.) Kuntze)

Réunion, Mauritius. Monoecious shrub or small tree, inflorescence a terminal raceme, white flowers, 3-lobed capsule with stellate hairs

See *Encyclopédie Méthodique, Botanique* 2: 205. 1786, *Annalen der Botanik. ed. Usteri* 18: 56. 1796, *Hortus Mauriti.*: 281. 1837, *Sylva Telluriana* 62. 1838, *Étude générale du groupe des Euphorbiacées* 382–383. 1858, *Adansonia* 1: 150. 1861 and *Journal of Ethnopharmacology* 95(1): 19–26. 2004, C. Poullain, E. Girard-Valenciennes, J. Smadja, “Medicinal plants endemic and indigenous to Reunion Island III. Pharmacological potential of two endemic medicinal plants: *Hypericum lanceolatum* subsp. *angustifolium* and *Croton mauritianus*.” IVth International Symposium Ethnobotany Disciplines with emphasis on Ethnomedicine, Palenque, Mexique. 18–24 Sept 2005

(Alkaloids, free radical scavenging activity, antioxidant. A decoction of the chopped leaves taken to treat fever and to improve the memory.)

in Réunion: ti bois de senteur

Croton mayumbensis J. Léonard

WC. Trop. Africa.

See *Bull. Jard. Bot. État* 26: 390–392. 1956

(Grated fresh bark infusion purgative and diuretic; grated bark and palm oil applied to treat rheumatism, headache, edema of the legs and abscesses; a bark infusion taken to treat hypertension and epilepsy; small amounts of bark or leaf decoction drunk to treat gonorrhea, urinary infections, painful urination, colic, rheumatism, worms, headache, constipation, edema, sinusitis, colds. Crushed seeds in water, the liquid taken to prevent abortion. A preparation of stem bark, leaves or fruits eaten as an aphrodisiac. Bark powder sniffed to treat nasal tumors, externally applied to treat scabies. Mashed stem bark and fruits used to kill rats and in the preparation of arrow poison. Plant used in ceremonies to chase away bad spirits.)

in Congo: bamba, kanyi pembe, mbamba

Croton megalobotrys Müll.Arg. (*Croton gubouga* S. Moore; *Oxydectes megalobotrys* (Müll.Arg.) Kuntze)

Zambia, Tanzania, South Africa. Small tree or shrub, sometimes sarmentose, branches drooping, silvery leaves, petioles with 2 stipitate discoid glands at the apex, small yellow green flowers, racemes terminal, 3-lobed fruit, golden yellow oil from the seeds, eaten by elephants

See *Flora* 47: 537. 1864, *Revis. Gen. Pl.* 2: 612. 1891 and *Journal of the Linnean Society, Botany* 40: 196. 1911, *Bull. Imp. Inst.* 36: 151–153. 1938, *American Naturalist* 112: 911–924. 1978, Phillimon Ndubani and Bengt Höjer, “Traditional healers and the treatment of sexually transmitted illnesses

in rural Zambia.” *Journal of Ethnopharmacology* 67(1): 15–25. 1999

(Bark poisonous. Stem bark drastic purgative, for malaria. Bark and seeds febrifuge and purgative; poisonous to fish. Used in the diagnosis and treatment of sexually transmitted illnesses (STIs) among male clients. Chacma baboons (*Papio ursinus*) in South Africa are known to consume each day a little quantity of leaves of the plants, which are well known for their stimulant property.)

in English: large fever-berry, lowveld croton

in Congo: mushyi

in Southern Africa: grootkoorsbessie, murongo, phokotsa; xunguxungu (Tsonga); muBvuguta, muBvugutu, Gubouga, Gubvuga (Shona); mutsebi (Western Transvaal, northern Cape, Botswana); mo-tsibi, motsibi (Tswana dialect, Ngamiland; Mangwato dialect, Botswana); muruthu (Venda); mutukatuka (Subya: Botswana, eastern Caprivi); mubwiti (Kololo: Barotseland)

in S. Rhodesia: guBouga, mTonga, iXolo, muGugu

in Zambia: chimonomono, kampokola, mutua, mutuatua, mutwatwa

Croton megalocarpus Hutch. (*Croton elliotianus* Baill.; *Croton elliotianus* Engl. ex Pax; *Croton elliotianus* Pax, nom. illeg.; *Croton eliottianus* Engl. & Pax ex Pax; *Croton eliottianus* Pax and Engl.)

S. Somalia to S. Trop. Africa. Tree or shrub, spreading, rather flattish crown, distinctive layering of branches, hanging spikes of conspicuous pale yellow flowers, woody capsules, flat seeds, flowers bee forage, not browsed by livestock, a feed for poultry, seeds eaten by birds and squirrels, dense woodland, forest edge, semi-arid and subhumid highlands, dry upland evergreen or semi-deciduous forest, moist upland forest, grassland

See *Bull. Mens. Soc. Linn. Paris* ii. (1890) 863. 1890, *Bot. Jahrb. Syst.* 33: 289. 1903, *Flora of Tropical Africa* 6(1): 760. 1912, *Phytochemistry* 28(10): 2759–2761. 1989, *Journal of Ethnopharmacology* 87(1): 35–41. 2003

(Antibacterial and antiinflammatory. The bark used to kill intestinal worms and to relieve whooping coughs. Veterinary medicine, said to treat coryza sinusitis, intestinal worms; medication for poultry, swollen heads, foamy diarrhea, unthriftiness.)

in English: croton

in East Africa: mbali, mbula, mlalai, msenefu, mukinduri, musine, nkulumire

in Kenya: omutsuitsui

in Rwanda: umunége, umuraangara

in Tanzania: omuzizima

Croton membranaceus Müll.Arg. (*Oxydectes membranacea* (Müll.Arg.) Kuntze)

W. Trop. Africa. Monoecious herb or undershrub, inflorescence an axillary or terminal raceme, white flowers

See *Flora* 47: 534. 1864 and *Fitoterapia* 71(4): 461–2. 2000, *Journal of Ethnopharmacology* 105(1–2): 99–101. 2006

(Alkaloids. Antiinflammatory. A root extract taken to treat urinary retention caused by an enlarged prostate, also taken to treat measles.)

Croton menyharthii Pax (*Argyrodendron bicolor* Klotzsch; *Croton kwebensis* N.E. Br.; *Croton menyhartii* Pax; *Croton menyhartii* Pax)

Africa tropical, S. Ethiopia, Tanzania. Monoecious, many-branched shrub, flowers pale yellow-green, inflorescence a slender terminal raceme, fruit a 3-lobed black-spotted capsule covered with yellowish scales, in deciduous bushland, dune bushland

See *Naturw. Reise Mossambique*: 102. 1861, *Bulletin de l'Herbier Boissier* 6: 733. 1898 and *Bull. Misc. Inform. Kew* 1909: 140. 1909

(Fresh or dried crushed leaves in water drunk to treat hepatitis and tapeworm; smoke of burnt leaves inhaled to ease pregnancy and menstruation pains; leaves and twigs antiplasmodial; leaves and fruits analgesic, antipyretic. Root decoction febrifuge, antiplasmodial, antimalarial; a decoction of fresh or dried roots taken to treat dysmenorrhea. Magic, the roots used as a good luck charm.)

in English: rough-leaved croton

in S. Rhodesia: kanunkira

in Swaziland: mhuluka, mwuluka, mwulukwa, umhuluka, umkulaka

Croton meridionalis Leandri (*Croton sublinearis* Leandri)

Madagascar. Shrub or small tree, flowers pale yellow, inflorescences pendant

See *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7: 59–60. 1939

(Insect repellent, strong smelling branches. The powder of the aerial parts added to bait as rat poison.)

Croton mocquerysii A. DC. (*Croton mocquerysi* Aug. DC.)

Madagascar. Shrub, on edge of disturbed forest

See *Bull. Herb. Boissier*, II, 1(6): 565. 1901

(A decoction of the bitter stem bark taken to treat malaria.)

Croton monanthogynus Michx. (*Argythamnia herbacea* Spreng.; *Croton ellipticus* Nutt., nom. illeg.; *Croton maritimus* var. *monanthogynus* (Michx.) Pursh; *Engelmannia nuttalliana* Klotzsch; *Gynamblosis monanthogyna* (Michx.) Torr.; *Heptallon ellipticum* Raf.; *Leptemon ellipticum* Raf.; *Oxydectes monanthogyna* (Michx.) Kuntze)

North America, Mexico.

See *Fl. Bor.-Amer.* 2: 215. 1803, *Fl. Amer. Sept.* 2: 603. 1813, *Exploration of the Red River of Louisiana* 295. 1854

(Leaves infusion diuretic, drastic purgative, used for kidney problems.)

in English: one-seeded croton, prairie-tea, prairie-tea croton
in Mexico: gato, hierba del gato

Croton moonii Thwaites (*Croton punctatus* Moon, nom. nud.; *Oxydectes moonii* (Thwaites) Kuntze)

Sri Lanka. Treelet or shrub, racemes terminal, capsules depressed-globose

See *Cat. Pl. Ceylon* 65. 1824, *Enum. Pl. Zeyl.* 276. 1861, *Revis. Gen. Pl.* 2: 612. 1891

(For skin diseases, wounds, boils.)

in English: Moon's croton

in China: liu guo ba dou

Croton morifolius Wild. (*Croton deppeanus* Steud.; *Croton juigalpensis* Standl. & L.O. Williams; *Croton morifolius* var. *genuinus* Müll.Arg., nom. inval.; *Croton morifolius* var. *lanatus* Müll.Arg.; *Croton morifolius* var. *sphaerocarpus* (Kunth) Müll.Arg.; *Croton rhamnifolius* Kunth var. *caudatus* Pax; *Croton sphaerocarpus* Kunth; *Oxydectes morifolia* (Willd.) Kuntze)

Mexico.

See *Species Plantarum*. Editio quarta 4: 535. 1805, *Nova Genera et Species Plantarum* (quarto ed.) 2: 84, pl. 105. 1817, *Nomenclator Botanicus*. Editio secunda 1: 446. 1840, *Linnaea* 34: 125. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2.2): 641. 1866, *Revisio Generum Plantarum* 2: 612. 1891 and *Primitiae Florae Costaricensis* 2(5): 331. 1900, *Ceiba* 3(3): 209. 1953

(Anodyne, stomachic, analgesic, for earache, gastritis, stomachache.)

in Mexico: palillo; nenda-xunaxi (Oaxaca); palillo (Guanajuato, Queretaro, Oaxaca, Michoacán); vara blanca (Sinaloa)

Croton mubango Müll.Arg. (*Oxydectes mubango* (Müll. Arg.) Kuntze)

Central African Republic, Ivory Coast to Angola. Tree or shrub, spreading, drooping, scented white flowers, inflorescence a slender terminal raceme, rounded capsule covered with scales, in secondary forest, disturbed forest and tree savanna

See *Journal of Botany, British and Foreign* 2: 338. 1864, *Revis. Gen. Pl.* 2: 612. 1891 and Mesia G.K. et al. "Antimalarial activities and toxicities of three plants used as traditional remedies for malaria in the Democratic Republic of Congo: *Croton mubango*, *Nauclea pobeguinii* and *Pyrenacantha staudtii*." *Annals of Tropical Medicine and Parasitology*

99(4): 345–357. 2005, *Journal of Ethnopharmacology* 107(3): 460–462. 2006

(Root astringent, used for diarrhea and dysentery. Leaves febrifuge, young fruits laxative to drastic purgative. Stem bark antibacterial, antiplasmodial, antimalarial and antiamebic. Bark pulp applied to hemorrhoids, hernia, skin eruptions and pain in the joints; bark decoction taken to treat gastritis, enlarged spleen and tuberculosis, abdominal pain and fever; bark, together with the seeds of *Monodora myristica*, eaten to treat abdominal pain and expel intestinal worms.)

in Central African Republic: molinga

Croton myriaster Baker (*Croton calomeris* Baill.; *Croton myriaster* Scott-Elliot; *Croton myriaster* var. *austromadecassus* Leandri)

Madagascar. Monoecious shrub or small tree, flowers pale yellow green, inflorescence a terminal or axillary raceme, fruit a 3-lobed capsule

See *Journal of Botany, British and Foreign* 20: 268. 1882, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 860. 1890, *Bull. Mens. Soc. Linn. Paris* ii. (1891) 967. 1891 and *Annales de l'Institut Botanique-Géologique Colonial de Marseille*, sér. 5, 7: 58. 1939

(Alkaloids, bark. A decoction of the aerial parts administered to children with epileptic attacks, and used as an inhalation to treat headache. Insect repellent.)

in Madagascar: lazalaza, mongina vaventiravina

Croton nigritanus Scott-Elliot (*Croton chevalieri* Beille; *Croton dinklagei* Pax & K. Hoffm.; *Croton nigritanum* Scott-Elliot; *Croton nudifolius* Baker & Hutch.)

W. Trop. Africa, Sierra Leone. Shrub, white flowers, in damp sites

See *J. Linn. Soc., Bot.* 30: 97. 1894 [1893–1895 publ. 1894] and *Bot. Jahrb. Syst.* 45: 237. 1910, *Bull. Soc. Bot. France* 57(8): 123. 1910, *Fl. Trop. Afr.* 6(1): 769 (1912).

(Crushed leaves applied to sores.)

in Sierra Leone: busui, cuaga, jingaomi, ke-toru, ndabia, xubeswie

Croton nitidulus Baker (*Croton fuscirameus* Baill.; *Croton microprunum* Baill.; *Croton microprunus* Baill.; *Croton nitidulus* var. *grandifolius* Leandri, also *grandifolia*; *Croton nitidulus* var. *meridionalis* Leandri; *Croton nitidulus* var. *parvifolius* Leandri, also *parvifolia*; *Croton nitidulus* var. *spatulatus* Leandri, also *spatulata*; *Croton nitidulus* var. *tandrokensis* Leandri; *Croton submetalicum* Baill.)

Madagascar. Monoecious shrub or small tree, white yellow flowers, inflorescence a terminal fascicle, fruit a 3-lobed capsule, leaves and inflorescence red glandular

See *Adansonia* 1: 151. 1861, *Journal of the Linnean Society, Botany* 20: 253. 1883 [1884 publ. 1883], *Bulletin Mensuel*

de la Société Linnéenne de Paris 2: 861–862. 1890, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 966–967. 1891 and *Annales de l'Institut Botanique-Géologique Colonial de Marseille*, sér. 5, 7: 39–40. 1939

(Alkaloids, aerial parts. Bitter stem bark to treat malaria and cough. Aromatic leafy branches insect repellent, especially against lice.)

in Madagascar: fotsiavadika, lazalaza, lazalaza madiniki, lazalaza madiniky, lazalazamadiniky, mantaly madinika, mongina madinindravina

Croton niveus Jacq. (*Berhamia hispida* Klotzsch; *Berhamia macrostachya* Klotzsch; *Berhamia panamensis* Klotzsch; *Croton dentatus* Sm., nom. illeg.; *Croton mollii* Müll.Arg.; *Croton niveus* Griseb., nom. illeg.; *Croton niveus* Billb. ex Beurl., nom. illeg.; *Croton populifolius* Mill.; *Croton populifolius* var. *genuinus* Müll.Arg., nom. inval.; *Croton pseudochina* Schldtl.; *Croton pseudochina* var. *minor* Schldtl. & Cham.; *Croton septemnerius* McVaugh; *Croton syringifolius* Kunth; *Kurkas populifolium* (Mill.) Raf.; *Oxydectes nivea* (Jacq.) Kuntze; *Oxydectes nivea* O. Ktze; *Oxydectes populifolia* (Mill.) Kuntze)

Central America, Mexico, Venezuela.

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 32. 1760, *Sylva Tellur.*: 62. 1838, *Bot. Voy. Herald*: 104. 1853, *Kongl. Vetenskaps Academiens Handlingar* 1854: 146. 1856, *Flora of the British West Indian Islands* 40. 1859, *Prodr.* 15(2): 653. 1866, *Flora* 55: 5. 1872, *Revisio Generum Plantarum* 2: 612. 1891 and *Brittonia* 13: 165. 1961, *Contr. Univ. Mich. Herb.* 23: 359. 2001

(For fevers, malaria, rheumatism, dyspepsia.)

in Colombia: plateado, platiado

in Mexico: vara blanca; cascarillo (Chiapas and Tabasco); copalchi (Veracruz, Oaxaca and Chiapas); chul, chulché (Yucatan); quina blanca (Veracruz); vara blanca (Tamaulipas); algodoncillo, huilote, palo blanco, vidrioso (south east San Luis Potosí); oli, olith (Huasteca I., south east San Luis Potosí); huilotl, juilocuahuitl (Azteca I., south east San Luis Potosí)

Croton noronhae Baill. (*Argyra fasciculata* Noronha ex Baillon; *Aubertia argentea* Chapel. ex Baill.; *Aubertia argentea* Chapel.; *Croton hypochalibaeum* Baill.; *Croton hypochalibaeus* Baill.; *Oxydectes noronhae* (Baill.) Kuntze)

Madagascar. Shrub or treelet, leaves aromatic, flowers pale yellow white

See *Adansonia* 1: 162. 1861, *Bull. Mens. Soc. Linn. Paris* 2: 862. 1890, *Revis. Gen. Pl.* 2: 612. 1891

(Poisonous. Used with other plants to make an infusion against fatigue; a bitter alcoholic beverage is made from the bark of *Croton catati* Baill. or *Croton noronhae*, causing euphoria. The beverage can cause severe poisoning even at relatively low intake.)

in Madagascar: anjety, fotsiavadika, fotsy avadika, savadiby

Croton oligandrus Pierre ex Hutch.

Cameroon, Gabon.

See *Fl. Trop. Afr.* 6(1.4): 760. 1912

(A bark decoction of *Croton mayumbensis* or *Croton oligandrus* drunk to treat colic. Bark powder sniffed to treat nasal tumors, externally applied to treat scabies. Ritual, magic.)

in Central African Republic: numbo

in Gabon: bamba

Croton origanifolius Lam. (*Croton camagueyanus* Urb.; *Croton discolor* C. Wright ex Griseb., nom. illeg.; *Croton ekmanii* Leonard, nom. illeg.; *Croton humilis* var. *origanifolius* (Lam.) Griseb.; *Croton lindenianus* A. Rich.; *Croton nephrophyllus* Urb. & Ekman; *Croton origanifolius* var. *abbreviatus* Urb.; *Croton origanifolius* var. *discolor* Müll.Arg.; *Croton origanifolius* var. *genuinus* Müll.Arg., nom. inval.; *Croton origanifolius* var. *gracilis* Müll.Arg.; *Croton origanifolius* var. *heterophyllus* Müll.Arg.; *Croton rectangularis* Urb.; *Croton siguaneanus* Urb. & Ekman; *Oxydectes lindeniana* (A. Rich.) Kuntze; *Oxydectes origanifolia* (Lam.) Kuntze)

Cuba.

See *Encyclopédie Méthodique, Botanique* 2: 205. 1786, *Hist. Fis. Cuba, Bot.* 2: 212. 1850, *Flora of the British West Indian Islands* 41. 1859, *Nachr. Königl. Ges. Wiss. Georg-Augusts- Univ.* 1: 172. 1865, *Prodr.* 15(2): 617–618. 1866, *Revisio Generum Plantarum* 2: 612. 1891 and *Repert. Spec. Nov. Regni Veg.* 18: 187. 1922, *J. Wash. Acad. Sci.* 17: 69. 1927, *Repert. Spec. Nov. Regni Veg.* 28: 218–220. 1930

(Carminative.)

Croton palanostigma Klotzsch (*Croton benthamianus* Müll. Arg.; *Croton benthamianus* (Müll.Arg.) Lanj.; *Croton benthamianus* Lanj.; *Croton matourensis* (Aubl.) Kuntze var. *benthamianus* Müll.Arg.; *Oxydectes benthamiana* (Müll. Arg.) Kuntze; *Oxydectes palanostigma* Kuntze; *Oxydectes palanostigma* (Klotzsch) Kuntze; *Palanostigma crotonoides* Mart. ex Klotzsch, nom. inval.; *Palanostigma martiana* Baill.)

Tropical America. Small tree

See *Hooker's J. Bot. Kew Gard. Misc.* 2: 48. 1843 [*London Journal of Botany* 2: 48. 1843], *Étude générale du groupe des Euphorbiacées* 358. 1858, *Linnaea* 34: 95. 1865, *Flora Brasiliensis* (Martius) 11(2): 105. 1873, *Revisio Generum Plantarum* 2: 612. 1891 and *The Euphorbiaceae of Surinam* 17. 1931

(Sap applied to skin diseases, ulcers and boils, tumor, wounds.)

Croton penduliflorus Hutch. (*Croton mooriae* Greenway ex Burt Davy & Hoyle; *Croton rubinoensis* Aubrév.)

W. & WC. Trop. Africa. Monoecious tree, elongated pendulous terminal raceme, fruit light green with light brown hairs

See *Bulletin of Miscellaneous Information Kew* 1: 337. 1914, *Check-Lists For. Trees & Shrubs Brit. Emp.* 3: 43. 1937, *Fl. Forest. Soudano-Guin.*: 195, t. 36, 1–3. 1950, *Pharmaceutical Biology* 21(2): 49–58. 1983, *Pharmaceutical Biology* 23(4): 185–189. 1985, *Journal of Ethnopharmacology* 23(2–3): 261–271. 1988, *Journal of Ethnopharmacology* 26(2): 111–119. 1989, U. Asuzu and C.N. Chineme, “Acute toxicity and gastrointestinal irritant effect of *Croton penduliflorus* seed oil in mice.” *Phytotherapy Research* 2(1): 46–50. 2006, *Phytotherapy Research* 2(4): 170–174. 2006

(Abortifacient, CNS stimulant, psychotropic, purgative, cholinomimetic, febrifuge, used for treatment of fibroids and menstrual disorders. Laxative, the seeds of *Croton penduliformis* together with the leaves of *Senna alata*.)

Croton perrieri Leandri

Madagascar. Shrub or tree, inflorescences whitish-green to yellowish

See *Bull. Mus. Natl. Hist. Nat.*, Sér. II. 3(4): 369–370. 1931

(An infusion of the grated bark taken to treat infectious diseases.)

Croton persimilis Müll.Arg. (*Croton boragatch* Roxb. ex Wall., nom. nud.; *Croton elaeocarpifolius* Wall., nom. nud.; *Croton oblongifolium* Delile; *Croton oblongifolius* Roxb., nom. illeg.; *Croton persimilis* var. *genuinus* Müll.Arg., nom. inval.; *Croton roxburghii* N.P. Balakr., nom. illeg.; *Croton virbala* M.R. Almeida; *Oxydectes oblongifolia* Kuntze; *Oxydectes persimilis* (Müll.Arg.) Kuntze)

India, China. Shrub or small tree, deciduous, soft wood, bark pale, long stalked large ragged toothed-serrate coriaceous leaves, small yellow flowers, lobed fruits, flowers eaten as vegetable

See *Description de l'Égypte, ... Histoire Naturelle*, Tom. Second 283. 1812, *Systema Vegetabilium*, editio decima sexta 3: 850. 1826, *Fl. Ind.* 3: 685. 1832, *Linnaea* 34: 116. 1865, *FBI* 5: 386. 1887, *Revisio Generum Plantarum* 2: 612. 1891 and *Bull. Bot. Surv. India* 3: 39. 1962, Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b). 1999 [as *Croton joufra*.], Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. 2000 [as *Croton joufra*.], *J. Bombay Nat. Hist. Soc.* 100: 580. 2003, Balakrishnan, N.P. & Chakrabarty, T. *The Family Euphorbiaceae in India*. Bishen Singh Mahendra Pal Singh. 2007

(Used in Ayurveda. Root, bark and seeds drastic purgative and poisonous in large doses; antidote, laxative, for cholera, dysentery, jaundice, fevers; bark, roots, fruits and seeds purgative, used in snakebite; paste of bark, root and fruits applied in snake and dog bites. Bark used in external applications for sprains, inflammation, rheumatism, fevers; stem bark of *Croton oblongifolius*, *Prunus triflora*, rhizome of *Curcuma*

domestica, ripe fruits of *Averrhoa carambola* and root of *Capsicum annuum* crushed together and boiled in water and the extract given in jaundice; stem bark of *Croton oblongifolius* made into a paste applied in rheumatic pain; stem bark crushed and given for antifertility; a decoction of bark of *Croton roxburghii* N.P. Balakr. with roots of *Caryota urens* given as purgative. Roots used in rheumatism, headache, madness; root decoction prescribed to treat dysentery; root paste taken orally to cause vomiting; *Croton oblongifolius* root paste applied in rheumatism; *Croton oblongifolius* root decoction given in dysentery; root together with *Woodfordia fruticosa* and *Cyperus* spp. boiled and prescribed in malaria; root bark a remedy for chronic enlargement of liver and in remittent fever, powdered and taken orally in chronic hepatitis and applied externally to sprains, bruises and rheumatic swellings. Powdered fruit given as an antidote to poison. Roasted endosperm eaten for digestion. Latex applied on ring-worm. Old leaves paste applied for boils; dried crushed leaves purgative and as poultice for snakebites. Oil from the seeds often used as insecticide. Magic, ritual, a piece of root tied as an amulet on arm to keep off evil spirits; twigs kept inside the room of a woman after postnatal period to protect the mother and the newborn from evil spirits and from sorcery.)

in India: akh, ar-lakh, arjuna, baragach, bhutala-bhairi, Bhutan-kusam, bol-mang-cham, burmaparokupi, chucka, desan, desand, dev sondh, devnasan, dieng-la-masu, ganasura, gas mahudi, geti, ghansuramg, ghute, godh, gunsur, koreya, kote, kremaidam, kuli daroo, lapkan, mahasindhu, maihati, mahunda, marthu-araung, marthuarong, masundi, milagu-nari, millakumari, nagadanti, pandri, peeda chettu, pitlu, putalo, putle, putol, putri, sando, tapiosen, thing-banlin, vatanasan

Croton poilanei Gagnep. (for Eugène Poilane, 1887/1888–1964, a plant collector; see Clyde F. Reed, *Bibliography to Floras of Southeast Asia*. 146. [Dedicated to E. Poilane and M. Poilane.] Baltimore, Maryland 1969, I.H. Vegter, *Index Herbariorum*. Part II (5), *Collectors N-R*. Regnum Vegetabile vol. 109. 1983.)

Thailand, Vietnam. Shrub or tree, inflorescences whitish-green to yellowish, scented flowers

See *Bull. Soc. Bot. France* 68: 559. 1921 [publ. 1922], *Kew Bull.* 26: 249. 1972, *Phytochemistry* 20(8): 1915–1918. 1981, *Novon* 12(1): 42–46. 2002, *Fl. Thailand* 8, 1: 216, plate XI: 1. 2005

(Bark applied against stomach pain; pounded leaves for curing wounds, eye problems.)

in Thailand: plao, plao luang, plao lueat, plao yai

Croton polytrichus Pax

Sudan, Zambia. Lax shrub or small tree, spreading, flowers yellow-cream, roots scented

See *Bot. Jahrb. Syst.* 15: 533. 1893 and *The Journal of Ecology* 30(1): 65–146. 1942

(Stem bark antiviral, antiinflammatory. An extract of its roots taken to treat headache and labor pain. Root powder, alone or mixed with that of *Croton dichogamus* Pax, mixed with porridge or tea to treat impotence and colds. Root decoction taken to treat irregular menstruation, for stomach and waist/back pain; boiled roots used for treatment of malaria, worms.)

in Tanzania: ludwa, mhalange, mlawa, mtughusu, mtumbika, mutughusu, mutugusu

Croton pottsii (Klotzsch) Müll.Arg. (*Croton corymbulosus* Engelm. ex C.F. Wheeler; *Croton lindheimerianus* Scheele; *Lasiogyne pottsii* Klotzsch; *Oxydectes pottsii* (Klotzsch) Kuntze)

Arizona, Texas, Mexico. Herb, perennial, watery latex, inflorescences terminal and axillary

See *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 418. 1843, *Linnaea* 25: 580–581. 1852, *The Botany of the Voyage of H.M.S. Herald* 1: 278. 1853, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 561. 1866, *Report Upon United States Geographical Surveys West of the One Hundredth Meridian, in Charge of First Lieut. Geo. M. Wheeler ... vol. vi—Botany* 5: 242. 1878[1879], *Revis. Gen. Pl.* 2: 612. 1891 and *Journal of the Arnold Arboretum* 21: 80. 1940, *The Southwestern Naturalist* 3(1/4): 175–203. 1958, *The Southwestern Naturalist* 5(3): 171. 1960, *Phytologia* 54: 302–309. 1983, *Kew Bulletin* 52: 186. 1997

(Astringent tea, an infusion of the flowering tops, for stomachache, thrush.)

in English: chaparral tea, leather croton, leatherleaf croton, leatherweed, leatherweed croton

Croton pottsii (Klotzsch) Müll.Arg. var. ***pottsii*** (*Croton corymbulosoides* Radcl.-Sm. & Govaerts; *Croton corymbulosus* Engelm. ex C.F. Wheeler; *Croton corymbulosus* Engelm.; *Croton eremophilus* Wooton & Standl., nom. illeg.)

Arizona, Texas, Mexico. Terrestrial perennial herb, subshrub or shrub

See *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 418. 1843, *The Botany of the Voyage of H.M.S. Herald* 1: 278. 1853, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 561. 1866, *Report Upon United States Geographical Surveys West of the One Hundredth Meridian, in Charge of First Lieut. Geo. M. Wheeler ... vol. vi—Botany* 5: 242. 1878[1879] and *Journal of the Arnold Arboretum* 21: 80. 1940, *Phytologia* 54: 302–309. 1983, *Kew Bulletin* 52: 186. 1997

(Astringent tea, for kidney infections.)

in English: chaparral tea, leather croton, leatherweed, leatherweed croton, Potts' leatherweed

Croton pseudopulchellus Pax (*Croton pulchellus* sensu Müll.Arg., non Baill.)

Trop. and S. Africa. Shrub or tree, aromatic, fragrant flowers yellow-cream

See *Bot. Jahrb. Syst.* 34: 371. 1904, *Journal of Ethnopharmacology* 9: 105–128. 1983, *Journal of Ethnopharmacology* 28: 255–283. 1990, *Journal of Ethnopharmacology* 66(3): 347–354. 1999, *Journal of Ethnopharmacology* 76: 239–245. 2001, *Journal of Ethnopharmacology* 90(2–3): 279–284. 2004, *Journal of Ethnopharmacology* 92: 177–191. 2004, Josiah O. Odalo et al. “Repellency of essential oils of some plants from the Kenyan coast against *Anopheles gambiae*.” *Acta Tropica* 95(3): 210–218. 2005

(Antiplasmodial, essential oils repellent against mosquito. Roots and leaves antiviral, pectoral, for headache, cough, infections; powdered dried roots sniffed against cold, nasopharyngeal affections; roots decoction for asthma; roots for influenza, malaria, pulmonary diseases, stomach and head ailments. Magic, ritual, sorcery, to drive out the devil. Leaves for venereal diseases, syphilitic ulcers; burned leaves insecticide. Veterinary medicine, leaves infusion for boils, abscesses.)

in English: lavender-leaved croton, small lavender croton

in Kenya: mukwamba, mwiani

in Southern Africa: uHubeshane (Zulu)

in Tanzania: mkombati, mkombechi, mkwati, mpachu, mshakhi

Croton reflexifolius Kunth (*Croton nudus* Willd. ex Schldl.; *Croton sylvaticus* Schldl., nom. illeg.; *Oxydectes reflexifolia* O. Kuntze; *Oxydectes reflexifolia* (Kunth) Kuntze)

Guatemala, Mexico.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 68. 1817, *Linnaea* 6: 359. 1831, *Linnaea* 19: 240. 1846, *Revisio Generum Plantarum* 2: 612. 1891

(Febrifuge, tonic, for malaria, rheumatism, cold, inflammation.)

in Central America: caché, chul, copalchi, guanacaste, hoja amarga, perexcutz, quina, sasafrás, zicché

in Mexico: perexcuts, soliman prieto; copalchi (Veracruz and Oaxaca); huesillo prieto (Tuxtepec and Temascaltepec, Oaxaca); p'eles-k'uch (Maya l., Yucatan); peres-cuch, pers-chuch (Yucatan); quina (Oaxaca); quina blanca (Veracruz); tapasikiui (Totonaca l., El Tajin, Veracruz); x-pets'kuts (Izamal, Yucatan)

Croton repens Schldl. (*Ocalia betulina* Klotzsch; *Oxydectes repens* O. Ktze; *Oxydectes repens* (Schldl.) Kuntze)

Mexico, Honduras, Guatemala.

See *Arch. Naturgesch.* 7: 195. 1841, *Linnaea* 19: 237. 1846 and *Contr. Univ. Mich. Herb.* 23: 362. 2001

(Astringent, stomachic, for dysentery, diarrhea, stomachache.)

in Mexico: chacote (Tlatlaya, Mexico)

Croton reticulatus Heyne (*Croton reticulatus* Heyne ex Wall.; *Croton reticulatus* Thunb., nom. illeg.)

India. Shrub or treelet, leaves silver-grey below, flowers white

See *Species Plantarum*. Editio quarta 4: 545. 1805, *Florula Javanica* 23. 1825

(Bark bitter, tonic and stomachic.)

in India: pandhari, panduray

Croton robustus Kurz (*Croton robustus* var. *serratus* Chakrab.; *Croton robustus* var. *serratus* Chakrab. & N.P. Balakr. & D. Gupta; *Croton siamensis* Craib; *Oxydectes robusta* (Kurz) Kuntze)

Indochina, Burma. Shrub or treelet, pubescent, inflorescences in terminal clusters, light yellow to grey-whitish flowers, fruits densely pubescent

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 42(2): 242. 1873, *Forest Fl. Burma* 2: 372. 1877, *Revis. Gen. Pl.* 2: 614. 1891 and *Bull. Misc. Inform. Kew* 1918: 369. 1918, *Fl. Indo-Chine* 5: 288. 1925, *Kew Bull.* 26: 249. 1972, *J. Econ. Taxon. Bot.* 9: 251. 1987, *Bull. Bot. Surv. India* 34: 64, 65, fig. 12. 1997 [1992], *Cytologia* 64: 229–234. 1999, *Arch. Pharm. Res.* 26(11): 898–901. 2003, *Fl. Thailand* 8, 1: 217. 2005

(Warmed leaves applied for curing wounds. Diterpenoids from the stem bark.)

in Burma/Myanmar: thetyin

in Thailand: plao yai

Croton sakamaliensis Leandri (*Croton sakamaliensis* var. *microphyllus* Leandri)

Madagascar. Monoecious small shrub, leaves strongly scented, inflorescence a compact terminal raceme, ovoid 3-lobed capsule, essential oil

See *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7(1): 54–55. 1939, *Fitoterapia* 64: 117–129. 1993, *Biochemical Systematics and Ecology* 34(8): 648–653. 2006

(Antibacterial. Stem bark infusion taken to treat diarrhea, cough and fever, and in larger amounts as a purgative to expel intestinal worms.)

in Madagascar: pisopiso

Croton salutaris Casar. (*Croton angularis* Klotzsch ex Baill.; *Croton urceolatus* Baill.; *Oxydectes salutaris* (Casar.) Kuntze)

Brazil.

See *Novarum Stirpium Brasiliensium Decades* 89. 1845, *Adansonia* 4: 299. 1864, *Revisio Generum Plantarum* 2: 612. 1891

(For tumor, skin diseases, wounds, boils.)

Croton salviformis Baill. (*Croton salviformis* var. *rufopunctatus* Leandri)

Madagascar. Shrub, inflorescence pale green

See *Bull. Mens. Soc. Linn. Paris* 2: 926–927. 1891 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille*, sér. 5, 7(1): 57. 1939

(Insect repellent, strong smelling branches.)

Croton scabiosus Bedd. (*Oxydectes scabiosa* (Bedd.) Kuntze; *Oxydectes scabiosa* Kuntze)

India.

See *The Flora Sylvatica for Southern India* 283. 1872, *Revis. Gen. Pl.* (1891) 614. 1891 and *The Journal of Ecology* 21(2): 191–199. 1933, *Indian Journal of Experimental Biology* 12: 512. 1974

(Toxic.)

in English: silver leaved croton

in India: chilla, cilla, kattu catikkay, verri chilla, verrichilla, verricilla, yerrachilla, yerrichilla

Croton scheffleri Pax

Kenya. Shrub or small tree, flowers white green, racemes terminal

See *Flora Cochinchinensis* 601, 635. 1790 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 78. 1909, *The Journal of Ecology* 57(1):127–149. 1969, *Taxon* 31(3): 488–494. 1982, *Journal of Ethnopharmacology* 108: 124–132. 2006, *African Journal of Traditional, Complementary and Alternative Medicines* 4(2): 219–225. 2007

(Antifungal, used for the treatment of oral candidiasis and skin fungal infections. Roots are soaked in water and the water is taken to treat malaria and fever; roots boiled to treat malaria, and to wash away bad luck for a person.)

in Tanzania: chindambi, mtughutu, muhalange

Croton setigerus Hook. (*Eremocarpus setigerus* (Hook.) Benth.; *Eremocarpus setigerus* Benth.; *Piscaria setigera* Piper; *Piscaria setigera* (Hook.) Piper)

North America, Mexico. Annual herb, seeds forage

See *Flora Boreali-Americana* 2: 141. 1838, *The botany of the voyage of H.M.S. Sulphur* 53. 1844 and *Contributions from the United States National Herbarium* 11: 382. 1906

(Plant considered poisonous. Roots decoction for dysentery. Poultice of bruised leaves applied to chest for internal pains; a decoction for fevers, bleeding diarrhea, ague, typhoid, chills, headache. Plants used as fish poison. Veterinary medicine, mashed stems and leaves placed in wormy open wounds.)

in English: croton, dove-weed, turkey mullein

Croton somalensis Pax (*Croton cliffordii* Hutch. & E.A. Bruce; *Croton somalensis* Vatke & Pax; *Croton somalensis* Vatke & Pax ex Pax)

Ethiopia, Somalia, Kenya.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 535. 1893 and *Bulletin of Miscellaneous Information Kew* 1941: 108. 1941

(A roots decoction drunk to treat fever and malaria.)

in Kenya: lokirdangae

Croton stanneum Baill.

Madagascar.

See *Bull. Mens. Soc. Linn. Paris* ii. (1890) 850–851. 1890

(A bark decoction taken to treat venereal diseases.)

Croton steenkampianus Gerstner

Tanzania, Mozambique and South Africa. Shrub, racemes terminal, flowers pale yellowish-cream, fruits trilobate-subglobose septicidal, seeds for doves

See *South African Journal of Botany* 12: 38. 1946, *South African Journal of Botany* 73(2): 276. 2007, E.O. Iwalewa et al. “Inflammation: The foundation of diseases and disorders. A review of phytomedicines of South African origin used to treat pain and inflammatory conditions.” *African Journal of Biotechnology* 6(25): 2868–2885. 2007

(Extracts antimalarial, antioxidant, antibacterial. Fresh leaves decoction vapor inhaled to treat general body pain, aches, painful joints, back and rheumatism. Bark used as emetic and for chest ailments. Magic, ritual, bark used as a charm to bring luck in business.)

in English: marsh fever-berry, Tonga croton

in South Africa: vleikoorsbessie; uHubeshane omkhulu (Zulu)

in Swaziland: mhuluka, mnyakeni, mwuluka, uMwuluka

Croton stellatopilosus H. Ohba (*Croton sublyratus* auct. non Kurz)

Myanmar, Thailand. Shrub or small tree, branching verticillate, inflorescence densely hairy, flowers solitary, fruit a capsule, in mixed bamboo forest and along roadsides

See *Kew Bull.* 26: 250. 1972, *J. Jap. Bot.* 55(4): 97. 1980, *Bull. Bot. Surv. India* 34: 70. 1997 [1992], *Thai For. Bull. (Bot.)* 29: 57. 2001, *PROSEA* 12, 2, *Medicinal and Poisonous Plants* 2: 202. 2001, *Tetrahedron Letters* 46(50): 8727–8731. 2005, *Fl. Thailand* 8, 1: 220, plate XI: 2. 2005, *Phytochemistry* 67(15): 1613–1620. 2006, *Zeitschrift für Naturforschung. C, Journal of Biosciences* (Z Naturforsch [C]) 62(5–6): 389–96. 2007

(Tonic. Stem bark and leaves antidiarrheal, to normalize menstruation; bark for the treatment of indigestion. Leaves to stop stomach bleeding, to treat peptic ulcer, for curing

digestive tract ailments, and also as an anthelmintic and dermatologic agent, a supplement to medical treatment of chronic ulcer. Flowers applied as an anthelmintic. Plaunotol has been shown to be involved with the regeneration process of soft tissue lining in the gastric system, thus facilitating the recovery of ulcer wounds.)

in Thailand: plao noi, plau noi

Croton suaveolens Torr. (*Oxydectes suaveolens* (Torr.) Kuntze; *Oxydectes suaveolens* Kuntze)

Mexico.

See *Report on the United States and Mexican Boundary ... Botany* [Emory] 2(1): 194. 1859, *Revisio Generum Plantarum* 2: 613. 1891

(Febrifuge.)

Croton sublyratus Kurz (*Oxydectes sublyrata* (Kurz) Kuntze; *Oxydectes sublyrata* Kuntze)

Thailand, Myanmar, Andaman Is. Tree

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 243. 1873, *Revis. Gen. Pl.* 2: 614. 1891 and *Phytochemistry* 22(1): 302–303. 1983, *Plant Cell Reports* 16(3–4): 147–152. 1996, *Planta Medica* 64(3): 279–280. 1998, *Cytologia* 64: 229–234. 1999, *Phytochemistry* 62(3): 389–398. 2003

(Species cultivated for the production of an anti-ulcer medicine, plaunotol, an anti-peptic ulcer diterpenoid.)

Common name: plao-noi

Croton sylvaticus Hochst. (*Claoxylon sphaerocarpum* Kuntze; *Croton asperifolius* Pax; *Croton bukobensis* Pax; *Croton elskensi* De Wild.; *Croton oxypetalus* Müll.Arg.; *Croton stuhlmannii* Pax; *Croton sylvaticus* Hochst. ex Krauss; *Croton sylvaticus* Schldl., nom. illeg., non *Croton sylvaticus* Hochst.; *Croton verdickii* De Wild.; *Oxydectes oxypetala* (Müll.Arg.) Kuntze; *Oxydectes oxypetala* Kuntze; *Oxydectes sylvatica* (Hochst.) Kuntze; *Oxydectes sylvatica* Kuntze)

Trop. & S. Africa. Monoecious tree or shrub, fast growing, strongly aromatic, two prominent glands at base of lamina, greenish cream flowers in upright terminal racemes, hairy fruit, bee forage, in semi-deciduous savanna, forest edges, secondary forest, in moist evergreen forest, mixed evergreen forest

See *Flora* 28: 82. 1845, *Linnaea* 19: 240. 1847, *Revis. Gen. Pl.* 2: 612–613. 1891 and *Bot. Jahrb. Syst.* 43: 77, 79. 1909, *South African Journal of Botany* 69(3): 301–363. 2002, *Skin Pharmacology and Physiology* 19: 329–335. 2006, *African Journal of Biotechnology* 6(25): 2868–2885. 2007

(Bark very poisonous; also used as a fish poison. Stem bark extract anti-inflammatory and antioxidant, extract taken to treat malaria, abdominal and uterine disorders and fever. Sap from the leaves used for healing cuts, an infusion of the

leaves acts as a purgative; leaf poultice for pleurisy. Seed and seed oil taken as a strong purgative. Bark or root decoction used in the treatment of malaria, rheumatism, for stomach and intestinal complaints, tuberculosis, fever, digestive problems and abdominal pain, pleurisy, chest complaints, uterine disorders, dropsy. Alkaloid. Veterinary medicine.)

in English: fever tree, forest croton, forest fever-berry, Mt. Silinda linden, woodland croton

in Central African Republic: makomba

in Congo: bonianga, ditoto, egbu, londjo, muakuru, saku

in East Africa: musogasoga, mutundu

in S. Rhodesia: muSuguta, muSukuta

in Southern Africa: boskoorsbessie; moema, moema-tswetsi (North Sotho); mula-thoho, muima-vanda (Venda); umHloshozane, inDumbahlozi, umHloshazane, uGibeleweni, uGibeleweni, umHlalajuba, umZilanyoni, amaHlabakufeni, aMahlabekufeni (Zulu); umGwaqanisa, umFeze (= spittle bug, frog hopper larvae), uMakhwakane, uMagwaqane (Xhosa); muSugutu, muSukuta (Shona)

in Swaziland: nyakeni

in Tanzania: msinduzi, mtutulana

Croton talaeporos Radcl.-Sm.

Kenya, Somalia. Small tree

See *Kew Bulletin* 27(3): 506. 1972

(A root infusion taken as a remedy for colds and stomach complaints.)

Croton tchibangensis Pellegr.

Gabon.

See *Bull. Mus. Natl. Hist. Nat.* 33: 525. 1927, *Toxicon* 44(4): 417–430. 2004

(Stem bark fish poison.)

in Gabon: bende, bende emaidani, ebende

Croton texensis (Klotzsch) Müll.Arg. (*Croton muricatus* Nutt., nom. illeg.; *Croton tenuicaudatus* Lundell; *Croton texensis* var. *utahensis* Cronquist; *Croton virens* Müll.Arg.; *Croton willdenowii* G.L. Webster; *Hendecandra multiflora* Torr.; *Hendecandra texensis* Klotzsch; *Oxydectes texensis* (Klotzsch) Kuntze; *Oxydectes virens* (Müll.Arg.) Kuntze)

Northern America, U.S.A. to Mexico. Shrub, annual, gray-green, white flowers with stellate hairs, incense and fragrance, food for wild doves, can be weedy or invasive

See *Species Plantarum*. Editio quarta 4(1): 380. 1805, *The Genera of North American Plants* 2: 225. 1818, *Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg. Trop. & Subtrop. China. Evergreen small tree or shrub, serrate oblong leaves, inflorescence an axillary or terminal raceme, small creamy yellow flowers, oblong lobed fruits

See *Species Plantarum* 2: 1004–1005. 1753, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 19(Suppl. 1): 418. 1843, *FBI* 5: 395. 1887, *Revis. Gen. Pl.* 2: 610–612, 614. 1891 and *A Hand-book to the Flora of Ceylon* 6(Suppl): 264. 1931, *Wuyi Science Journal* 2: 23. 1982, *Journal of Tropical and Subtropical Botany* 6(2): 103. 1998, *Cytologia* 64: 229–234. 1999

(Used in Ayurveda, Unani and Sidha. Poisonous, seeds very poisonous, all plant parts are toxic, the seed and seed oil used as a strong drastic purgative, rubefacient, antibacterial,

antimycobacterial, a strong vesicant, irritant, insecticide, cathartic and poison, applied in snakebite. Seeds used for meteorism, ascites, expectoration, sexual debility of men; seed extract tonic; seeds pounded and given as purgative; external use for ileus. Wood diaphoretic in small doses, purgative and emetic in large doses. Powder of dry shoots with roots of *Piper longum* used as snuff in respiratory troubles. Root used as an abortifacient and purgative, a small piece inserted into tooth cavities to treat toothache by killing worms; roots and leaves a remedy for rheumatism; leaves an ingredient of arrow poison and as a poultice to treat snakebites; a poultice of leaves with bark of *Moringa oleifera* and seeds of *Zanthoxylum nitidum* applied on painful swellings of joints. Seeds insecticide, used as a fish poison, or for criminal purposes; seeds ground in water and used to kill insect pests. Aqueous extracts of latex and stem bark molluscicidal.)

in English: croton, croton oil, croton-oil plant, purgative croton, purging croton, rotting poison, tiger-spot poison, true croton

in French: bois de Moluques, bois purgatif, croton révulsif

in Cambodia: bat khlok

in China: ba dou, pa tou

Pichi Sermolli, “Fragmenta Pteridologiae - VI.” in *Webbia*. 31 (1): 237–259. Apr. 1977, *Novosti Sist. Vyssh. Rast.* 18: 26. 1981.

Crypsinus hastatus (Thunb.) Copel. (*Phymatopteris hastata* (Thunb.) Pic. Serm.; *Polypodium hastatum* Thunb.; *Polypodium hastatum* Sw.; *Polypodium hastatum* Vell.)

China, Nepal.

See *Fl. Jap.* (Thunberg) 335. 1784, *Systema Vegetabilium*. Editio decima quarta (J.A. Murray) 935. 1784, *Fl. Ind. Occid.* 3. 1653. 1806, *Fl. Flumin. Icon.* 11: t. 68. 1831 [1827 publ. 29 Oct 1831], *Arch. Mus. Nac. Rio de Janeiro* 5: 447. 1881 and *Genera Filicum: The Genera of Ferns* [Copeland] 206. 1947, *Webbia* 28(2): 462. 1973, *Res. Bull. Fac. Educ. Oita Univ., Nat. Sci.* 6: 5–43. 1983, *Indian Fern J.* 8: 154–158. 1991

(Fresh rhizome decoction given to treat fever.)

in Nepal: harjor

Cryptantha Lehm. ex G. Don f. Boraginaceae

Hidden flowers, from the Greek *krypto* ‘to hide’ and *anthos* ‘flower’, referring to the cleistogamous flowers of some species, see *Commentationes Societatis Regiae Scientiarum Gottingensis Recentiores* 4: 186. 1819, *Index Seminum* [St. Petersburg] 2: 35. 1836, *A General History of the Dichlamydeous Plants* 4: 373. 1837, *Index Seminum* [St. Petersburg] 7: 52. 1841, *Pittonia* 1(4): 57–58. 1887 and *Great Basin Naturalist* 29(1): 30. 1969, *Phytologia* 74: 459–463. 1993.

Cryptantha cinerea (Greene) Cronquist (*Cryptantha jamesii* (Torr.) Payson var. *cinerea* (Greene) Payson; *Hemisphaerocarya cinerea* (Greene) Brand; *Oreocarya cinerea* Greene; *Oreocarya multicaulis* (Torr.) Greene var.

cinerea (Greene) J.F. Macbr.; *Oreocarya suffruticosa* (Torr.) Greene var. *cinerea* (Greene) Payson)

North America. Perennial subshrub or herb

See *Pittonia* 3(15C): 113–114. 1896 and *Proceedings of the American Academy of Arts and Sciences* 51(10): 546. 1916, *University of Wyoming Publications in Science. Botany* 1(6): 171. 1926, *Annals of the Missouri Botanical Garden* 14(3): 246. 1927, *Repertorium Specierum Novarum Regni Vegetabilis* 24: 61. 1927, *Intermountain Flora* [Cronquist et al.] 4: 229. 1984

(Plant poultice applied to snakebite. Veterinary medicine, for snakebite. Ceremonial.)

in English: James’ cryptantha

Cryptantha cinerea (Greene) Cronquist var. *cinerea* (*Cryptantha jamesii* (Torr.) Payson var. *cinerea* (Greene) Payson; *Cryptantha jamesii* var. *cinerea* Payson; *Cryptantha jamesii* var. *multicaulis* (Torr.) Payson; *Cryptantha jamesii* var. *setosa* (M.E. Jones) I.M. Johnst. ex Tidestr.; *Cryptantha jamesii* var. *setosa* (M.E. Jones) Shinners)

North America. Perennial subshrub or herb

See *Pittonia* 3(15C): 113–114. 1896 and *Proceedings of the American Academy of Arts and Sciences* 51(10): 546. 1916, *University of Wyoming Publications in Science. Botany* 1(6): 171. 1926, *Annals of the Missouri Botanical Garden* 14(3): 244, 246. 1927, *Repertorium Specierum Novarum Regni Vegetabilis* 24: 61. 1927, *Proc. Biol. Soc. Washington* 48: 42. 1935, *Sida* 3: 347. 1969, *Intermountain Flora* [Cronquist et al.] 4: 229. 1984

(For snakebite. Roots used in sores, skin diseases. Veterinary medicine, for snakebite.)

in English: James’ cryptantha

Cryptantha cinerea (Greene) Cronquist var. *jamesii* Cronquist (*Cryptantha cinerea* (Greene) Cronquist var. *jamesii* (Torr.) Cronquist; *Cryptantha jamesii* Payson, nom. illeg.; *Cryptantha jamesii* var. *disticha* (Eastw.) Payson; *Cryptantha jamesii* var. *disticha* Payson; *Cryptantha jamesii* var. *typica* Payson; *Cryptantha suffruticosa* Piper; *Krynitzkia jamesii* (Torr.) A. Gray; *Krynitzkia jamesii* A. Gray; *Oreocarya suffruticosa* (Torr.) Greene; *Oreocarya suffruticosa* Greene)

North America. Perennial subshrub or herb, fodder

See *Proc. Amer. Acad. Arts* xx. (1885) 278. 1885, *Pittonia* 1: 57. 1887 and *Proc. Biol. Soc. Washington* 32: 42. 1919, *Ann. Missouri Bot. Gard.* 14: 242, 248. 1927, *Intermountain Flora* [Cronquist et al.] 4: 229. 1984, *Phytologia* 74: 459–463. 1993

(Analgesic.)

in English: James’ catseye

Cryptantha crassisejala (Torr. & A. Gray) Greene

North America. Annual herb, weed

See *Reports of explorations and surveys*: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War 2(4): 171. 1857, *Pittonia* 1(7): 112. 1887

(Poisonous.)

in English: thicksepal cryptantha

Cryptantha crassisepala (Torr. & A. Gray) Greene var. ***crassisepala*** (*Krynitzkia crassisepala* (Torr. & A. Gray) A. Gray)

North America. Annual herb, weed

See *Proceedings of the American Academy of Arts and Sciences* 20: 268. 1885, *Pittonia* 1(7): 112. 1887

(Poisonous. Plant used for boils, itching, swelling.)

in English: thicksepal cryptantha

Cryptantha fendleri (A. Gray) Greene (*Cryptantha fendleri* Greene; *Cryptantha pattersonii* (A. Gray) Greene; *Cryptantha pattersonii* Greene; *Krynitzkia fendleri* A. Gray; *Krynitzkia pattersonii* A. Gray)

North America. Annual herb, fodder

See *Proceedings of the American Academy of Arts and Sciences* 20: 268–269. 1885, *Pittonia* 1(7): 120. 1887

(Plant decoction taken for coughs.)

in English: sanddune cryptantha

Cryptantha flava (A. Nelson) Payson (*Oreocarya flava* A. Nelson)

North America. Perennial herb, subshrub

See *Bulletin of the Torrey Botanical Club* 25(4): 202–203. 1898 and *Annals of the Missouri Botanical Garden* 14(3): 259. 1927, *Phytologia* 74: 459–463. 1993

(Plant used for gastrointestinal disorders, and as a postpartum remedy.)

in English: Brenda's yellow cryptantha

Cryptantha fulvocanescens (S. Watson) Payson (*Cryptantha fulvocanescens* Payson; *Eritrichium glomeratum* (Pursh) A. DC. var. *fulvocanescens* S. Watson)

North America.

See *United States Geological Exploration of the Fortieth Parallel. Botany* 243. 1871 and *Annals of the Missouri Botanical Garden* 14(3): 319. 1927

(For common cold, cough, snakebite, toothache, women's ailments.)

in English: tawny cryptantha

Cryptantha fulvocanescens (S. Watson) Payson var. ***fulvocanescens*** (*Cryptantha echinoides* (M.E. Jones) Payson;

Cryptantha fulvocanescens (S. Watson) Payson var. *echinoides* (M.E. Jones) Higgins; *Krynitzkia fulvocanescens* (A. Gray) A. Gray; *Oreocarya fulvocanescens* (S. Watson) Greene)

North America.

See *United States Geological Exploration of the Fortieth Parallel. Botany* 243. 1871, *Pittonia* 1(4): 58. 1887 and *Annals of the Missouri Botanical Garden* 14(3): 319, 321. 1927, *Great Basin Naturalist* 29(1): 30. 1969

(For common cold, cough, snakebite, toothache, women's ailments, as postpartum remedy.)

in English: tawny cryptantha

Cryptantha jamesii (Torr.) Payson (*Cryptantha jamesii* Payson; *Eritrichium jamesii* Torr.; *Krynitzkia jamesii* (Torr.) A. Gray; *Krynitzkia jamesii* A. Gray)

North America.

See *Exploration of the Red River of Louisiana* 262. 1854, *Proceedings of the American Academy of Arts and Sciences* 20: 278. 1885 and *Annals of the Missouri Botanical Garden* 14(3): 242, 248. 1927

(Analgesic, disinfectant, skin diseases, snakebites.)

Cryptantha sericea (A. Gray) Payson (*Cryptantha sericea* Payson; *Cryptantha sericea* (A. Gray) Payson var. *perennis* (A. Nelson) Payson; *Cryptantha sericea* var. *perennis* Payson; *Krynitzkia sericea* A. Gray; *Oreocarya sericea* (A. Gray) Greene)

North America. Biennial or perennial subshrub, herb

See *Proceedings of the American Academy of Arts and Sciences* 20: 279–280. 1885, *Pittonia* 1(4): 58. 1887 and *Annals of the Missouri Botanical Garden* 14(3): 286–288. 1927

(Roots used for stomachache and stomach troubles.)

in English: silky cryptantha

Crypteronia Blume Crypteroniaceae

Greek *krypto*, *kryptein* 'to hide', *kryptos* 'hidden' and *eros* 'love', or from *krypter*, *krypteros*, *krypterios*, *krypterion* 'dungeon, a lurking place, convenient for concealing', see *Bijdragen tot de flora van Nederlandsch Indië* 17: 1151. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 677. 1868.

Crypteronia paniculata Blume (*Crypteronia glabra* (Wall.) Blume; *Crypteronia glabra* (Wall.) Planch. ex Endl.; *Crypteronia paniculata* var. *glabra* (Wall.) Kurz; *Crypteronia pubescens* (Wall.) Blume; *Henslowia glabra* Wall.; *Henslowia pubescens* Wall.)

India. Tree, yellowish-green flowers in slender racemes, triangular calyx-teeth

See *Bijdragen tot de flora van Nederlandsch Indië* 17: 1151. 1826, *Plantae Asiaticae Rariores* 3: 13–14, pl. 221. 1832, *Genera Plantarum Suppl.* 4(2): 39. 1848, *Plantae Asiaticae Rariores* 123. 1852, *Museum Botanicum* 2: 123. 1852, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 46(2): 86. 1877

(Leaves bitter, astringent, for skin diseases, eruptions.)

Malayan names: bekoi, bekwoi, berkol, buah babi, kuah, mengkuah, rupal

Cryptocarya R. Br. Lauraceae

Greek *kryptos* 'hidden' and *karyon* 'nut', the fruit is enclosed in a more or less hard receptacle; see *Voyage aux Indes Orientales* 2: 226, pl. 127 and 3: 248. 1782, Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae*. 402. 1810 and *Not. Syst.* 8: 112. 1939, *Bulletin du Jardin Botanique de l'État* 27(2): 174. 1957.

Cryptocarya alba Looser (*Cryptocarya mammosa* (Molina) Kosterm.; *Cryptocarya peumo* (Dombey ex Lam.) Kosterm.; *Cryptocarya peumus* Nees; *Cryptocarya peumus* var. *laxiflora* Phil.; *Cryptocarya peumus* var. *stenantha* Mez; *Cryptocarya peumus* var. *stenantha* (Phil.) Mez; *Cryptocarya rubra* Blume; *Cryptocarya rubra* Skeel.; *Cryptocarya stenantha* Phil.; *Icosandra rufescens* Phil.; *Laurus peumo* Dombey ex Lam.; *Laurus peumus* Molina; *Laurus peumus* Miers; *Laurus peumus* Ruiz & Pav.; *Peumus alba* Molina; *Peumus mammosa* Molina; *Peumus rubra* Molina)

Chile.

See *Saggio sulla Storia Naturale del Chili ...* 185, 350. 1782, *Encyclopédie Méthodique, Botanique* (Lamarck) 3(2): 455. 1792, *Cat. Gewass. Buitenz.* 65. 1823, *Linnaea* 29: 40. 1857, *Linnaea* xxxiii. 228. 1864, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 5: 16. 1889, *Arbeiten aus dem Königl. Botanischen Garten zu Breslau* 1: 107. 1892 and *U.S. Bureau of Plant Industry, Bull.* 153: 15. 1909, *Recueil des Travaux Botaniques Néerlandais* 34: 565. 1937, *Boletim Técnico do Instituto Agrônomico de Norte* No. 28, 61. 1954

(Bark astringent. Fruits diuretic, used for dropsy.)

Common name: peumo

Cryptocarya aromatica (Becc.) Kosterm. (*Massoia aromatica* Becc.; *Sassafras goesianum* Teijsm. & Binn.)

Java. Small tree

See Albertis, Luigi Maria d' (1841–1901), *New Guinea* 2: 398. London, Sampson Low, Marston, Searle, & Rivington, 1880 and *Tectona* 39: 169. 1949, *Bull Bot. Gard., Buitenz.*, Ser. 3, 435, 437. 1950

(The bark to treat fevers, diarrhea, spasmodic complaints, parturition, to prevent cramps during pregnancy.)

in Indonesia: masoji

in New Guinea: ai kor

Cryptocarya bowiei Druce

Australia.

See *The Proceeding of the Royal Society of Queensland* 4: 12–13. 1887 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 618. 1917

(Bark bitter, poisonous, curarizing effects.)

Cryptocarya chinensis (Hance) Hemsl. (*Beilschmiedia chinensis* Hance; *Cryptocarya chinensis* Hemsl.)

China.

See *Journal of Botany, British and Foreign* 20(231): 79–80. 1882, *Journal of the Linnean Society, Botany* 26(176): 370. 1891 and *J. Nat. Prod.* 73(9): 1470–1475. 2010

(Cytotoxic flavonoids from the leaves.)

in China: hou ke gui

Cryptocarya concinna Hance (*Cryptocarya konishii* Hayata; *Cryptocarya lenticellata* Lecomte; *Cryptocarya microcarpa* F.N. Wei)

China.

See *Journal of Botany, British and Foreign* 20(231): 79. 1882 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 237–238. 1911, *Notulae Systematicae*. *Herbier du Museum de Paris* 2: 333. 1913, *Guihaia* 15(3): 210, f. 2. 1995, *J. Nat. Med.* 64(2): 121–125. 2010

(From the wood, phenolic compounds, cytotoxic and tyrosine kinase inhibitory properties and activities.)

in China: huang guo hou ke gui

Cryptocarya cordata C.K. Allen

Solomon Islands.

See *Journal of the Arnold Arboretum* 23(2): 138–139. 1942

(For eye complaints.)

Cryptocarya endiandrifolia Kosterm.

New Guinea, Borneo.

See *Reinwardtia* 7: 306. 1968

(Young leaves and shoots cooked with rice wine and drunk for rheumatism.)

in Borneo: medang piawas

Cryptocarya ferrea Blume (*Cryptocarya ferrea* Kurz)

Java, Burma.

See *Bijdragen tot de flora van Nederlandsch Indië* 11: 557. 1825

(For fevers, malaria.)

Cryptocarya griffithiana Wight

India.

See *Icones Plantarum Indiae Orientalis* 5: 12 (text), f. 1830. 1852 and *J. Photochem. Photobiol. B.* 96(3): 216–222. 2009

(Poison. In vitro photo-cytotoxic activity.)

Cryptocarya massoy (Oken) Kosterm. (*Cinnamomum massoy* Oken; *Cryptocarya aromatica* (Becc.) Kosterm.; *Cryptocarya novoguineensis* Teschner; *Massoia aromatica* Becc.; *Sassafras goesianum* Teijsm. & Binn.)

Asia tropical, Papua New Guinea. Tree, aromatic bark, endangered in the wild

See *Botanica expedition* 74. 1760, *Allg. Naturgesch.* 3: 1520. 1841 and *New & Crit. Mal. Pl.* iii. (*For. Serv. Indonesia, Sect. For. Plann.*) 21. 1955, *Aust. J. Chem.* 21, 2819–2823. 1968, Garner, J., Joulain, D. *Massoia Essential Oil. IXth International Congress of Essential Oils, Essential Oil Technical Paper Book 3*, 1983, 184–193. 1983, *Molecules* 12(2): 149–154. 2007

(Tonic, bark used by Javanese and Balinese women to prepare a warming ointment, called *bobory*. Severe skin sensitising, irritative, phototoxic properties, the concentrated oil from the bark is considered a skin irritant, adverse dermal effects. Used to treat fevers, diarrhea, parturition, to prevent cramps during pregnancy, known to resist insect and fungal predation.)

in English: massoi, massoia tree, massoy bark, massoybark

in Indonesia: ai kor, ai kori, masoi, massoi, massoia, mesawir, mesui

Cryptocarya medicinalis C.T. White

Solomon Islands.

See *Journal of the Arnold Arboretum* 31(1): 84–85. 1950

(For cough.)

Cryptocarya obovata R. Br.

Australia. Rainforest tree

See *Prodr. Fl. Nov. Holland.* 402. 1810 and *Bioorg. Med. Chem. Lett.* 20(14): 4057–4059. 2010

(A trypanocidal from the leaves.)

Cryptocarya pleurosperma C.T. White & W.D. Francis

Australia.

See *Proceedings of the Royal Society of Queensland* 35: 77. 1923

(Bark sap irritating and blistering, powerful skin irritant and vesicant; highly toxic to mammals and fish.)

Cryptocarya rugulosa Hook. f.

India, Malaysia, Malacca.

See *The Flora of British India* 5: 118. 1886 and *J. Nat. Prod.* 72(3): 336–339. 2009

(Inhibitors of the NF-kappaB activation pathway.)

Cryptocarya wightiana Thw.

India.

See *Enum. Pl. Zeyl.* 254. 1861

(Used in Sidha.)

in India: gulimavu, gulmur, kadamanpari, katamampari, palai

Cryptocoryne Fischer ex Wydler Araceae

Greek *kryptos* ‘hidden’ and *koryne* ‘a club’, referring to the shape of the flowers or to the spadix, hidden within the tube of the spathe; see *Linnaea* 5: 428. 1830 and *Botaniska Notiser* 130: 71–87. 1977, D.H. Nicolson, “Derivation of aroid generic names.” *Aroideana*. 10: 15–25. 1988, *Aroideana* 18: 40–45. 1995.

Cryptocoryne cordata Griff. (*Cryptocoryne blassii* de Wit; *Cryptocoryne evae* Rataj; *Cryptocoryne evae* var. *recordata* Rataj; *Cryptocoryne kerrii* Gagnep.; *Cryptocoryne siamensis* Gagnep.; *Cryptocoryne siamensis* var. *ewansii* Rataj; *Cryptocoryne siamensis* var. *kerrii* (Gagnep.) Rataj; *Cryptocoryne stonoi* Rataj)

Thailand.

See *Not. Pl. Asiat.* 3: 138. 1851 and *Notulae Systematicae. Herbarium du Museum de Paris* 9: 132. 1941, *Aquarien- und Terrarien-Zeitschrift* 13: No. 4, 115, reimpr. 1960, *Folia Geobotanica et Phytotaxonomica* 9(3): 314. 1974, *Studie Československa Akademie Ved* 3: 89, 93, 95. 1975

(Leaves for vertigo, hysteria, headache.)

in Malay: ati-ati paya

Cryptocoryne crispatula Engl. var. *sinensis* (Merr.) N. Jacobsen (*Cryptocoryne sinensis* Merr.; *Cryptocoryne yunnanensis* H. Li; *Cryptocoryne yunnansis* H. Li, nom. illeg.)

China, Yunnan.

See *Sunyatsenia* 3: 247. 1937, *Fl. Yunnanica* 2: 836. 1979, *Aqua Pl.* 1991(1): 29. 1991

(For treatment of traumatic injury, rheumatic arthralgia and stomachache.)

in China: ba xian guo hai

Cryptocoryne retrospiralis (Roxb.) Kunth (*Ambrosina retrospiralis* Roxb.; *Ambrosinia retrospiralis* Roxb.; *Ambrosina roxburghiana* Voigt; *Ambrosina unilocularis* Roxb.; *Cryptocoryne crispatula* Engl.; *Cryptocoryne dalzellii* Schott; *Cryptocoryne retrospiralis* (Roxb.) Fisch. ex Wydl.; *Cryptocoryne roxburghiana* (Voigt) Schott; *Cryptocoryne roxburghiana* Schott; *Cryptocoryne roxburghii* Schott;

Cryptocoryne unilocularis (Roxb.) Schott; *Cryptocoryne unilocularis* Schott; *Cryptocoryne unilocularis* Kunth; *Lagenandra dalzellii* (Schott) Rataj)

India.

See *Hort. Bengal.* 65. 1814, *Linnaea* 5: 428–430. 1830, *Flora Indica*; or, descriptions of Indian Plants 3: 492–493. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 3: 12. 1841, *Hort. Suburb. Calcutt.* 685. 1845, *Hooker's J. Bot. Kew Gard. Misc.* 4: 289. 1852, *Bonplandia* 5: 223. 1857 and *Das Pflanzenreich* IV. 23F (Heft 73): 247. 1920, *Aquariumpflanzen* 184. 1970, *Taxon* 30: 695. 1981

(Bulbous roots cooked and given in menorrhagia.)

in India: nachigida

Cryptocoryne spiralis (Retz.) Fisch. ex Wydler (*Ambrosina spiralis* (Retz.) Roxb.; *Ambrosina spiralis* Roxb.; *Arum spirale* Salisb.; *Arum spirale* Retz.; *Cryptocoryne spiralis* Fisch. ex Wydler)

India, Sri Lanka.

See *Species Plantarum* 2: 964, 966. 1753, *Genera Plantarum*, ed. 6 579. 1764, *Observationes Botanicae* (Retzius) 1: 30. 1779, *Prodr. Stirp. Chap. Allerton* 259. 1796, *Hortus Bengalensis*, or a catalogue ... 65. 1814, *Linnaea* 5: 428. 1830 and *Studie Československa Akademie Ved* 3: 30. 1975

(Itching nature of the leaves. Rhizome extract for cough, fever, nausea, abdominal pain, vomiting in infants, abdominal complaints.)

in English: Indian ipecacuanha

in India: kaadu athibaje, nattathivasa, natti-ati-vasa, neerina peepi, panchithaalu

Cryptolepis R. Br. Asclepiadaceae (Apocynaceae, Periplocaceae)

Greek *kryptos* 'hidden' and *lepis* 'scale', referring to the nature of the seeds, see *Memoirs of the Wernerian Natural History Society* 1: 69. 1810, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 500. 1844 and *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Journal of Ethnopharmacology* 50: 55–59. 1996, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Biochemical Systematics and Ecology* 31: 155–166. 2003.

Cryptolepis buchananii Schultes (*Cryptolepis buchananii* R. Br.; *Trachelospermum cavalieriei* H. Léveillé; *Trachelospermum gracilipes* Hook. f. var. *cavalieriei* (H. Lévé.) C.K. Schneid.)

India, China. Many-branched shrub, twining, vine, climbing, creeping, liana, woody-based, stem with profuse white milky juice, creamy white flowers in short paniculate cymes, divaricate follicles

See *Memoirs of the Wernerian Natural History Society* 1: 69. 1809, *Systema Vegetabilium* 4: 409. 1819, *The Flora of British India* 3(9): 668. 1882 and *Flore du Kouy-Tchéou* 31. 1914, *Plantae Wilsonianae* 3(2): 332. 1916, *Journal of Ethnopharmacology* 85(2–3): 207–215. 2003

(Used in Ayurveda and Sidha. Plant decoction given in syphilis. Stem for arthritis. Crushed roots taken with milk in venereal diseases; roots against snakebite; roots pounded and the filtered extract given for stomach pain; root paste applied in joint pains, rheumatoid arthritis. Roots and fruits for the treatment of chills and edema, cholera, dropsy, dysentery. Latex applied for healing septic wounds, boils, scabies, snakebites and cuts. Floss of the seeds a medicated cotton to stop bleeding. Leaves for rickets in children. Veterinary medicine, leaf paste given internally to remove the placenta in cows and goats; leaves along with those of *Heliotropium indicum* and the extract used as nasal drops in Babesiosis; root extract boiled in goat milk and applied for yoke gall. Magico-religious beliefs, for unhealthy babies; ceremonial, harvesting, leafy twigs worshipped or the entire plant.)

in English: Buchanan cryptolepis

in China: gu gou teng

in India: adavi palateega, adavipaalathige, adavipala-chedi, advipala teega, adavipalateega, adavipalathega, adavipalatiga, adavipalatige, adavipalatige, baradudhi, darivel, dudella, dudhi, dudhi bel, dudhi lata, dudhli, dudhibel, durikhal, garol, gopa, gopakanya, gopangana, gopasuta, gopavalli, gopi, guddipala, gunji, gurugudalatige, gurugupalatige, guruguppaalathige, jaman khumb, jungali kariyal, kala-bel, kalipalvalli, kallipalvalli, kankrashringi, kaoval, karanta, karanti, kareballi, karebanta, kari banti, karilata, karmalaki-bel, kattupalvalli, katu-pal-valli, katuphalveli, kawavel, khirolaum, khurnmble, koranta, krishnasariva, krsnasariva, kurabanthuma balli, kymbat niangpor, maattaankodi, madanaseku, madhablata, maetguli hambu, maetla hambu, meda, meda singhi, medhkasinghi, medkoshing, metaguli hambu, meturolli hambu, naagbel, naagvel, nedashringi, nelappaale, olasu kodi, paal kodi, palakobera theega, palkodi, palkoti, rokailipala, rokallipaala, rokallipala, rutupala, rythupaala, rytupala, sariba, sariva, sarivadva, singani, svetasariva, syama, teela bakhri bel, visanika

Cryptolepis oblongifolia (Meisn.) Schltr. (*Cryptolepis acutifolia* (Sond.) N.E. Br.; *Cryptolepis angolensis* Welw. ex Hiern; *Cryptolepis arenicola* Dinter; *Cryptolepis baumii* N.E. Br., non Schltr.; *Cryptolepis brazzaei* Baill.; *Cryptolepis buxifolia* Chiov.; *Cryptolepis debeerstii* De Wild.; *Cryptolepis elliotii* Schltr.; *Cryptolepis hensii* N.E. Schltr. var. *luteola* Hiern; *Ectadiopsis acutifolia* (Sond.) K. Schum.; *Ectadiopsis buettneri* K. Schum.; *Ectadiopsis*

lanceolata Baill.; *Ectadiopsis myrtifolia* Baill.; *Ectadiopsis nigrifolia* Benth.; *Ectadiopsis nigrifolia* Benth. var. *congesta* K. Schum.; *Ectadiopsis oblongifolia* Benth.; *Ectadiopsis oblongifolia* (Meisn.) B.D. Jacks.; *Ectadiopsis oblongifolia* (Meisn.) Schltr.; *Ectadiopsis ruspolii* Chiov.; *Ectadiopsis scandens* K. Schum.; *Ectadiopsis suffruticosa* K. Schum.; *Ectadiopsis welwitschii* Baill.; *Ectadium oblongifolium* Meisn.; *Secamone acutifolia* Sond.)

South Africa, Tanzania. Scrambling, woody herb, spreading, prostrate, suffrutex, subshrub, lianescent shrub, slender, wiry, herbaceous, vine, sprawling, trailing, exuding white latex when cut, white cream corollas

See *London Journal of Botany* 2: 542. 1843, *Genera Plantarum* 2: 741. 1876, *Index Kewensis* 1: 822. 1893, *Bot. Jahrb. Syst.* 18, Beibl. 45: 14. 1894, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20(Beibl. 51): 10. 1895, *Journal of Botany, British and Foreign* 1896: 315. 1896

(Antipyretic, antiinflammatory, roots boiled in water and drunk for tuberculosis, to stop coughs.)

in N. Rhodesia: muzovu

in S. Rhodesia: muVamakaka

in Southern Africa: bokhoring, melkbos; mukangaza, ruKangazi, muVamakaka (Shona)

Cryptolepis reticulata Wall. (*Cryptolepis reticulata* Wall. ex Steud.)

India.

See *A Numerical List of Dried Specimens* n. 1640. 1829, *Nomenclature Botanique* ed. 2, 1: 450. 1840

(For tumor, wounds.)

Cryptolepis sanguinolenta (Lindl.) Schltr. (*Cryptolepis barteri* K. Schum.; *Cryptolepis triangularis* N.E. Br.; *Pergularia sanguinolenta* Lindl., non Britten; *Strophanthus radcliffei* S. Moore)

Senegal to Nigeria. Shrub, scrambling, twining, slender, thin-stemmed, blood-red juice from cut stem, tuberous rootstock, leaves opposite, greenish yellow flowers, fruit a pair of spreading follicles, seeds silky hairy, rainforest, leaves used as a vegetable

See *Systema Naturae*, ed. 12 2: 191. 1767, *Memoirs of the Wernerian Natural History Society* 1: 69. 1810, *Botanical Magazine* 52: t. 2532. 1824, *J. Linn. Soc., Bot.* 30: 92. 1894 [1893–1895 publ. 1894], *Nat. Pflanzenfam.* [Engler & Prantl] iii. 2. (1895) 219 nomen. 1895 and Deutsche Kolonialgesellschaft, Berlin. Kolonial-Wirtschaftliches Komitee. *Westafrikanische Kautschuk-Expedition...* 1899/1900, 308. Berlin, 1900 [Schlechter, Rudolf, 1872–1925], *J. Linn. Soc., Bot.* 37: 180. 1905 [1904–1906 publ. 1905], *Phytotherapy Research* 10(4): 317–321. 1996, *Journal*

of Medicinal Chemistry 41(6): 894–901. 1998, *Planta Medica* 66(1): 30–34. 2000

(A medicine for virility. Roots, stems and leaves febrifuge, antipyretic, antibacterial, antiinflammatory, to treat fevers, headache, rheumatism, inflammatory conditions. Roots antibacterial, tonic, hypothermic, hypotensive, renal vasodilator, febrifuge, antipyretic, antiinflammatory, antithrombotic, anti-hyperglycemic, to treat fevers, headache, hepatitis, malaria, urinary and upper respiratory tract infections, urogenital infections, microbial infections, hernia, colic and stomach complaints, wounds, snakebites, rheumatism, inflammatory conditions.)

in English: Ghana quinine, Nimbima, red vine, yellow dye root

African names: delboi, gangamau, kadze, kpokpo-yangolei, nombon, ouidoukoi, shona mukangaza

Cryptolepis sinensis (Loureiro) Merrill (*Aganosma edithae* Hance; *Cryptolepis edithae* (Hance) Benth. & J.D. Hooker ex Maximowicz; *Cryptolepis elegans* Wallich ex G. Don; *Emericia sinensis* (Loureiro) Schultes; *Emericia sinensis* (Lour.) Roem. & Schult.; *Pergularia sinensis* Loureiro; *Periploca chinensis* Sprengel; *Periploca chinensis* (Lour.) Spreng.; *Periploca sinensis* (Loureiro) Steudel; *Streptocaulon chinense* (Sprengel) G. Don; *Streptocaulon chinense* (Lour.) G. Don; *Vallaris sinensis* (Loureiro) G. Don)

Indochina. Large glabrous twining shrub, yellowish axillary flowers, straight paired follicles, black seeds with silky white coma

See *Species Plantarum* 1: 211–212. 1753, *Systema Naturae*, ed. 12 2: 191. 1767, *Flora Indica ... nec non Prodrum Florae Capensis* 51. 1768, *Flora Cochinchinensis* 1: 167, 169. 1790, *Memoirs of the Wernerian Natural History Society* 1: 69. 1810, *Systema Vegetabilium* 4: 33, 401–402. 1819, *Systema Vegetabilium*, editio decima sexta 1: 836. 1825, *Contributions to the Botany of India* 64. 1834, *A General History of the Dichlamydeous Plants* 4: 69, 77, 79, 82, 162. 1837, *Nomenclator Botanicus*. (The stems and leaves are used externally for the treatment of snakebites, traumatic injury and scabies, leaves warmed with oil and used as poultice along with common salt. Latex for skin diseases.)

in English: Chinese cryptolepis

in China: bay ye teng

in India: dudhomundi, gedesugandhapala, malatiyaralu, paala theega

Cryptomeria D. Don Taxodiaceae

From the Greek *krypto* ‘to hide’, *kryptos* ‘hidden’ and *meris* ‘a portion, part’, the seeds and all flower parts are concealed by the bracts, see *Annals of Natural History* 1(3): 233. 1838 and *Fieldiana, Bot.* 24(1): 56–60. 1958, *CIS Chromosome Inform. Serv.* 60/61: 22–24. 1996, *Chromosome Sci.* 2: 99–102. 1998.

Cryptomeria japonica (Thunb. ex L.f.) D. Don (*Cryptomeria fortunei* Hooibr. ex Otto & Dietrich; *Cryptomeria fortunei* Hooibr., nom. nud.; *Cryptomeria japonica* D. Don; *Cryptomeria japonica* (L.f.) D. Don; *Cryptomeria japonica* subsp. *sinensis* (Thunb. ex L.f.) Sell; *Cryptomeria japonica* var. *fortunei* (Hooibr.) Henry; *Cupressus japonica* Thunb. ex L.f.; *Schubertia japonica* (Thunb. ex L.f.) Spach; *Schubertia japonicum* (Thunb. ex L.f.) Brongn.; *Taxodium japonicum* (Thunb. ex L.f.) Brongn.)

Japan, China. Evergreen tree, aromatic leaves

See *Species Plantarum* 2: 1002–1003. 1753, *Supplementum Plantarum* 421. 1781, *Transactions of the Linnean Society of London* 18(2): 167, pl. 13, f. 1. 1839 [1841 publ. 7–30 May 1839], *Histoire Naturelle des Végétaux* 11: 352. 1841, *Annales des Sciences Naturelles* (Paris) 30: 176, 183. 1883, *Allgemeine Gartenzeitung* 21: 234. 1853 and *The Trees of Great Britain & Ireland* 1: 129. 1906, *Bull. Misc. Inform.* 1924: 61. 1924, *Watsonia* 18(1): 92. 1990

(Oil and resin depurative, used in the treatment of venereal diseases.)

in English: cryptomeria, Japanese cedar

in China: liu shan, liu shan shu, ri ben liu shan

in Japan: sugi

in Nepal: dhupi, dhupi salla, tarpin

in Okinawa: shiji

Cryptophragmium Nees Acanthaceae

From the Greek *kryptos* ‘hidden’ and *phragma* ‘a partition, compartment, wall’, see *Plantae Asiaticae Rariores* 3: 76, 100. 1832 and *Nordic Journal of Botany* 5(4): 353–356. 1985.

Cryptophragmium signatum Benoist (*Gymnostachyum signatum* (Benoist) Imlay)

Vietnam.

See *Bulletin de la Société Botanique de France* 81(7–8): 602–603. 1934, *Bulletin of Miscellaneous Information Kew* 1939: 128. 1939

(Leaves infusion for skin diseases, wounds.)

Cryptostegia R. Br. Asclepiadaceae (Periplocaceae)

Greek *kryptos* ‘hidden’ and *stegane* ‘a covering’, *stega* ‘roof’, referring to the corona or to the scales enclosed within the

corolla tube or to the scales covering the anthers; Latin *stega*, *ae* is the deck of a ship; see Robert Brown, in *Edwards’s Botanical Register*. 5: t. 435. 1820 and *Australian Systematic Botany* 4(3): 571–577. 1991, *Adansonia*, Sér. 3 23(2): 205–218. 2001.

Cryptostegia grandiflora R. Br. (*Cryptostegia grandiflora* Roxb. ex R. Br.; *Nerium grandiflorum* Roxb.; *Nerium grandiflorum* Desf.)

India. Woody vine, milky sap, leaves shiny, hard paired follicles, flat hairy seeds

See *Species Plantarum* 1: 209. 1753, *Hort. Beng.* 19. 1814, *Tableau de l’École de Botanique* 92. 1815, *Botanical Register*; consisting of coloured ... 5: pl. 435. 1820, *Flora Indica*; or, descriptions of Indian Plants 2: 10–11. 1832 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Proceedings of the Indian Science Congress Association* 67(iii, c): 57. 1980, *Taxon* 30: 696. 1981, *Proceedings of the Indian Science Congress Association* 75(3–vi): 233–234. 1988

(Used in Sidha. Toxic, poisonous, whole plant. Latex useful in eczema, antifungal. Root extract of *Cryptostegia grandiflora* with barks of *Holarrhena pubescens* and *Blumea eriantha* given as antidote in snakebite; root extract with sugar taken as refresher. An arrow poison or ordeal poison.)

in English: cryptostegia, India rubber vine, purple allamanda, rubber vine

in India: chabuk-chari, dudhi-bel, ganta paala, garudapalai, hambu rubber gida, pala, palai, palay, rabbarutheega, rubber-bel, rubber-ki-bel, rubber vel, vilayati akaro, vilayati bakundi, vilayati vakhandi, vilayati akaro, vilayati-vakundi

Cryptotaenia DC. Apiaceae (Umbelliferae)

Greek *kryptos* ‘hidden’ and *tainia* ‘fillet, a ribbon’, an allusion to the fruit, see *Familles des Plantes* 2: 498. 1763, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 2: 118. 1824, Candolle, Augustin Pyramus de, *Collection de mémoires pour Servir a l’Histoire du Règne Végétal...* [Cinquième mémoire] 5: 42. 1829, *Prod.* iv. 118–119. 1830 and *J. Pl. Biol.* 39: 15–22. 1996.

Cryptotaenia canadensis (L.) DC. (*Conopodium canadense* (L.) W.D.J. Koch; *Cryptotaenia canadensis* subsp. *japonica* (Hasskarl) Handel-Mazzetti; *Cryptotaenia canadensis* var. *japonica* (Hasskarl) Makino; *Cryptotaenia japonica* Hasskarl; *Deringa japonica* (Hassk.) Koso-Pol.; *Sison canadense* L.)

China, Japan. Terrestrial herb, perennial, thick roots, leaves with a clasping base, small white flowers

See *Species Plantarum* 1: 252. 1753, *Nova Acta Physico-medica Academiae Caesariae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive*

Observationes Historias et Experimenta 12(1): 119. 1824, *Retzia* ... *Observationes botanicae, quas de plantis horti botanici Bogoriensis* 1: 113. 1855 and *Botanical Magazine* 22(263): 175. 1908, *Symbolae Sinicae* 7(3): 713. 1933, *Amer. J. Bot.* 63(5): 608–625. 1976, *Taxon* 31: 583–587. 1982

(Severe skin irritation following repeated contact with the leaves. A tonic for strengthening the body.)

in English: honewort, Japanese parsley, white chervil, wild chervil

in China: tang kuei, ya er qin

in Japan: mitsuba, mitsuba-zer

Cucumeropsis Naudin Cucurbitaceae

Resembling a *cucumis*, *cucumeris* ‘cucumber’, see *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 30. 1866.

Cucumeropsis edulis (Hook. f.) Cogn. (*Cladosicyos edulis* Hook. f.; *Cucumeropsis edulis* Cogn.; *Cucumeropsis manni* Naudin)

Tropical Africa. Climber, strong, flowers yellow, cucumber-like plant, smooth edible fruits, vegetable, a good potential source of vegetable oil

See *Flora of Tropical Africa* 2: 534. 1871, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 518. 1881 and *American Anthropologist*, New Series, 64(2): 431–432. 1962, *Plant Foods for Human Nutrition* (formerly *Qualitas Plantarum*) 4(3): 211–224. 1993, *Fitoterapia* 70(2): 134–139. 1999

(Roots abortifacient. Leaves effective in the treatment of yellow fever and beri-beri. Seeds and gourd vermifuge, purgative, to treat hypertension.)

in English: egusi melon, white egusie

in West Africa: kojai, ma teint, wait egusie

Cucumeropsis manni Naudin

Angola, Gabon. Strong climber, edible seeds, yellow flowers, fleshy white fruits, edible seeds

See *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 30. 1866

(For venereal diseases.)

in Ghana: ngatia fufule, ngatia kokole

Cucumis L. Cucurbitaceae

Latin *cucumis*, *meris* ‘cucumber, melon’ (Vergilius, Sextus Propertius and Plinius), Akkadian *kukkubu* ‘a small container of clay, etc.’, Greek *sikya*, *sikye* ‘bottle-gourd, gourd, cupping-instrument’, *sikyos* ‘cucumber’, Hebrew *siquqj* ‘drink, refreshment’, Akkadian *siqu* ‘drink’; see

Carl Linnaeus, *Species Plantarum*. 1011. 1753 and *Genera Plantarum*. Ed. 5. 442. 1754 and *Journal of the Science of Food and Agriculture* 5: 410–416. 1954, *Journal of the South African Chemical Institute*: 131–138. 1954, *Bothalia* 8(1): 1–112. 1962, *Annals of the Missouri Botanical Garden* 65(1): 285–366. 1978, *Botanical Journal of the Linnean Society* 81: 233–247. 1980, *Acta Bot. Brasil.* 5(2): 37–51. 1991, Kirkbride Jr., J.H. *Biosystematic Monograph of the genus Cucumis (Cucurbitaceae): Botanical Identification of Cucumbers and Melons*. Parkway Publishers, Boone, North Carolina, United States. 1993.

Cucumis aculeatus Cogn.

East Africa, Ethiopia, Tanzania. Trailing herb, spreading, crawling, climbing, creeping, prostrate, leaves rough, stout curved prickles, flowers yellow, fruits yellow-green with somewhat prickly grey-white pubescence, tender leaves cooked, young fruit eaten raw, mature fruit boiled and eaten, wooded grassland, bushland

See *Species Plantarum* 2: 1011–1012. 1753, *Histoire Naturelle des Végétaux* 6: 211–212. 1838, *Nomenclator Botanicus*. Editio secunda 1: 451. 1840, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21: 209. 1895 and *Euphytica* 28: 563–567. 1979, *Biosyst. Monogr. Cucumis* (Cucurbitaceae) 60. 1993

(Poisonous.)

in East Africa: emyongoyakoboye, idegederyimbwa, ingangakinyaturu

in Tanzania: kasasalya, kishasae, mtango mwitu, mumbu/he, nyambede

Cucumis africanus L.f. (*Cucumis africanus* var. *echinatus* Herm.;

Cucumis arenarius Schrad., nom. illeg.; *Cucumis arenarius* Schumach. & Thonn.; *Cucumis dipsaceus* Wender. ex Steud., nom. inval.; *Cucumis dipsaceus* Ehrenb.; *Cucumis hookeri* Naudin)

South Africa, Angola, Namibia. Herb, creeping, prostrate, slender, hairy, scabrous everywhere, angular branches, leaves alternate with tendrils in their axils, male flowers very small bright yellow and clustered on a slender peduncle, male and female flowers separate on same plant, variable fruit covered with thick blunt or sharp spines, oblong flattish seeds, leaves cooked as spinach, fruit occur in two not very distinct forms

See *Parad. Bat.* t. 134. 1698, *Supplementum Plantarum* 423. 1781[1782], *Beskrivelse af Guineiske planter* 200. 1827, *Linnaea* 12: 416. 1838, *Histoire Naturelle des Végétaux* 6: 211–212. 1838, *Nomenclator Botanicus*. Editio secunda 1: 451. 1840, *Gardener’s Chronicle & Agricultural Gazette* 30: 1503. 1870 and *Biosyst. Monogr. Cucumis* 31. 1993

(Fruits bitter and poisonous, human and cattle poisoning have been recorded. Fruit, leaf or root used as an emetic, purgative or enema. Veterinary medicine.)

in English: thorn cucumber, wild cucumber

Cucumis anguria L. (*Apodanthera scaberrima* Brandegee; *Cucumis anguria* Vell., nom. illeg.; *Cucumis anguria* subsp. *cubensis* Gand.; *Cucumis anguria* subsp. *jamaicensis* Gand.; *Cucumis anguria* subsp. *longipes* (Hook. f.) Greb.; *Cucumis anguria* var. *longipes* (Hook. f.) A. Meeuse; *Cucumis angurioides* M. Roem.; *Cucumis arada* L. ex Naudin & F. Muell.; *Cucumis cubensis* Gand.; *Cucumis echinatus* Moench, nom. illeg.; *Cucumis erinaceus* Naudin ex J.C. Huber; *Cucumis jamaicensis* Bertero ex Spreng.; *Cucumis jamaicensis* Gand.; *Cucumis longipes* Hook. f.; *Cucumis macrocarpus* Wender.; *Cucumis parviflorus* Salisb.; *Cucumis subhirsutus* subsp. *minor* P. Browne)

East and southern Africa. Herb, annual, creeper, grooved, trailing or scandent, solitary simple tendrils, subglobose berry with soft thin spines, whole fruit is edible either raw or dried and cooked, bitter and non-bitter fruits

See *Species Plantarum* 2: 1011. 1753, *The Civil and Natural History of Jamaica*. Ed. 2 353. 1789, *Methodus Plantas Horti Botanici et Agri Marburgensis* 654. 1794, *Prodr. Stirp. Chap. Allerton* 157. 1796, *Systema Vegetabilium*, editio decima sexta 3: 46. 1826, *Florae Fluminensis Icones* 10: t. 84. 1827[1831], *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 79–80. 1846, *Flora of Tropical Africa* 2: 547. 1871 and *Bulletin de la Société Botanique de France* 65: 28. 1918, *University of California Publications in Botany* 10(2): 188. 1922, *Blumea* Suppl. 4: 196–205. 1958, *Verzeichnis Landwirtschaftlicher und Gärtnerischer Kulturpflanzen* (ohne Zierpflanzen) (Auf. 2) ed. 2, 2: 916. 1986, *Economic Botany* 42: 447–451. 1988, *Fitoterapia* 16(4): 381. 1990, *Biosyst. Monogr. Cucumis* 39. 1993

(Bitter fruit regarded as poisonous. Leaves against ringworm. Fruit eaten to treat jaundice, a decoction for kidney problems. Root decoction stomachic. Bitter forms as a natural pesticide, antifeedant. Veterinary medicine, the juice of the bitter fruit to treat septic wounds in livestock.)

in English: bur cucumber, bur gherkin, goar-berry gourd, goareberry, gooseberry gourd, West Indian gherkin

in Mozambique: caferefere, cassongo

in Mexico: bitoni, pitoni castilla

Cucumis zeyheri Sond. (*Cucumis africanus* L.f. var. *zeyheri* (Sond.) Burt Davy; *Cucumis dинiae* Raamsdonk & Visser; *Cucumis prophetarum* subsp. *zeyheri* (Sond.) C. Jeffrey)

South Africa, Zambia, Zimbabwe. Perennial, monoecious, prostrate or rarely scandent herb, tap roots white, solitary flowers yellow, non-bitter fruits eaten raw or pickled

See *Supplementum Plantarum* 423. 1781 [1782], *Flora Capensis* 2: 496. 1862 and *A Manual of the Flowering Plants and Ferns of the Transvaal* 39. 1926, *Kew Bulletin* 15(3): 35. 1962, *Euphytica* 28: 563–567. 1979, *Cytologia* 49: 183–192. 1984, *Euphytica* 34: 279–290. 1985, *Nordic Journal of Botany* 12: 327–334. 1991–1992, *Biosyst. Monogr. Cucumis* 51. 1993

(Poisonous, highly toxic. Fruits cytotoxic, antitumour, anti-inflammatory, analgesic, bitter fruits a drastic purgative, for diarrhea, enema, chest problems.)

in English: wild cucumber

in South Africa: wilde agurkie, wilde komkommer

Cucurbita L. Cucurbitaceae

The old Latin name for the gourd, *cucurbita*; see Carl Linnaeus, *Species Plantarum*. 2: 1010–1011. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Genera Plantarum*. Ed. 5. 441. 1754, *Genera Plantarum* 393–394. 1789, *American monthly magazine and critical review* 4: 192. 1819, *Atlantic Journal* 145. 1832, *Linnaea* 12: 416. 1838, *Rendiconto delle Adunanze e dei Lavori dell'Accademia delle Scienze, sezione della Società Reale Borbonica di Napoli* 6: 411. 1847, *Linnaea* 21(5): 586–587. 1848, *Bulletin de la Société Botanique de France* 12: 185. 1865 and *Fieldiana, Bot.* 24(11/4): 306–395. 1976, *Ann. Missouri Bot. Gard.* 65(1): 285–366. 1978, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, *Fl. Mascareignes* 101: 1–21. 1990, *Fl. Venezuela* 5(1): 11–202. 1992, *Taxon* 41: 562. 1992, *Taxon* 44: 611–612. 1995, *Fl. Novo-Galiciana* 3: 483–652. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001, *Arnaldoa* 9(2): 43–110. 2002[2003], *Etnofl. Yucatanense*. 22: 1–315. 2004.

Cucurbita ficifolia Bouché (*Cucurbita ficifolia* Wall.; *Cucurbita ficifolia* fo. *leucosperma* Zhiteneva; *Cucurbita ficifolia* fo. *melanosperma* Zhiteneva; *Cucurbita ficifolia* var.

mexicana G. Nicholson; *Cucurbita melanosperma* Gasp.; *Cucurbita melanosperma* A. Braun ex Gasp.; *Pepo ficifolia* Britton; *Pepo ficifolius* (Bouché) Britton; *Pepo malabaricus* Sageret)

Mexico. Herb, short-lived perennial vine, climbing, long branched tendrils, yellow to pale orange solitary flowers, green fruit with white stripes and blotches, leaves and immature fruits eaten

See *Annales des Sciences Naturelles* (Paris) 8: 312. 1826, *Verhandlungen des Vereins zur Beförderung des Gartenbaues in den Königlich Preussischen Staaten* 12: 205–206. 1837, *Rendiconto delle Adunanza e dei Lavori dell'Accademia delle Scienze. Sezione della Società Reale Borbonica di Napoli* 6: 448. 1847 and *The Illustrated Dictionary of Gardening, ...* 1: 272. 1900, *Botany of Porto Rico and the Virgin Islands* 6: 266. 1925, *Ceylon J. Sci., Biol. Sci.* 24(1): 17–22. 1995, *Journal of Ethnopharmacology* 77(1): 99–101. 2001, *Journal of Ethnopharmacology* 82(2–3): 185–189. 2002

(Seeds vermifuge. Hypoglycemic activity of fruit extracts.)

in English: black-seeded gourd, cushaw, fig-leaf gourd, Malabar gourd

in East Africa: kahurura

in Tanzania: boga la kimasai, mboga ya kimasai

in Mexico: cayote, chayote, chayotli, chila cayote, cidra cayote, gueto xiu

Cucurbita foetidissima Kunth (*Cucumis perennis* E. James; *Cucurbita foetidissima* var. *foetidissima*; *Cucurbita perennis* (James) A. Gray; *Ozodycus perennis* (E. James) Raf.; *Pepo foetidissima* (Kunth) Britton)

Mexico, North America.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 123. 1817, *An Account of an Expedition from Pittsburgh to the Rocky Mountains* 2: 346. 1823, *Atlantic Journal* 145. 1832, *Boston J. Nat. Hist.* 6(2): 193. 1850 and *An Illustrated Flora of the Northern United States* 3: 291. 1913

(Plant infusion taken for gonorrhoea and syphilis. Crushed roots applied to boils, sores, ulcers; dried roots decoction emetic, tonic, analgesic, for chest pains, venereal diseases, protracted labor, to kill maggots in wounds; roots infusion laxative. Fruit pulp for open sores. Veterinary medicine, crushed roots, stems and leaves applied to boils, worms, sores on horses' backs.)

in English: buffalo gourd, fetid wild pumpkin, fetid wild pumpkin, Missouri gourd, mock orange, wild gourd, wild pumpkin

in Central America: calabazilla

in Mexico: gueto lana, queto lana

Cucurbita maxima Duch. ex Lam. (*Cucurbita maxima* Wall.; *Cucurbita maxima* Duchesne; *Cucurbita maxima*

Lam.; *Cucurbita maxima* subsp. *andreana* Filov; *Cucurbita maxima* subsp. *maxima*; *Cucurbita maxima* var. *turbani-formis* Alef.; *Cucurbita pepo* L. var. *maxima* (Duchesne ex Lam.) Delile)

South America. Annual vine, hairy, hispid, scandent, climbing, prostrate, trailing, stout branched tendrils, reniform hispid leaves, yellow flowers, calyx lobes linear-subulate, fruit flesh yellow-orange, often eaten as vegetables the ripe fruits, shoots, leaves, flowers and seeds

See Tournefort, Joseph Pitton de (1656–1708), *Institutiones rei herbariae*. Parisiis: E Typographia regia [Curante Joanne Anisson] 1700, *Encyclopédie Méthodique, Botanique* (Lam.) 2(1): 151. 1786, *Fl. Aegypt. Illus.* 2: 76. 1812, *Numer. List* [Wallich] n. 6720. 1832, *FBI* 2: 622. 1879 and *Flora of Cultivated Plants of the USSR* 21: 177. 1982, *J. Hunan Agric. Coll.* 11(2): 166–170. 1991, *Ceylon J. Sci., Biol. Sci.* 24(1): 17–22. 1995, *J. Econ. Taxon. Bot. Additional Series*, 12, pp. 367–372. 1996, *Mutation Research* 360(2): 89–93. 1996, *J. Cytol. Genet.* 31(1): 65–71. 1996, *Taxon* 49: 305–319. 2000

(Used in Ayurveda, Unani and Sidha. Fruit laxative, pulp applied as poultice to boils, burns, inflammation, snakebite, earache and carbuncles. Freshly powdered seeds anthelmintic, diuretic, tonic, antimalarial, given for kidney problems, tapeworm and intestinal infections, for treating various intestinal parasites, to expel tapeworms and roundworms; pumpkin seed oil for skin and nervous problems, sores and ulcers; seeds infusion diuretic. Leaves and young shoots eaten for madness, hysteria; leaves eaten for menstrual disorders. Ceremonial, magico-religious beliefs, superstitions, ritual, fruit for sacrifice; it is not advisable to cut the fruit of this plant by any women in the reproductive stage, if a ripe fruit is eaten as vegetable by pregnant woman it causes abortion.)

in English: autumn squash, marrow, pumpkin, red gourd, squash, turks cap gourd, winter squash

in China: hu lu

in India: akantamarican, animulai, animulaimatu, aracanik-kay, arasanikai, baungham, bhomphala, carkkaraipparanki, carkkaraippucani, carukkaraipparanki, carukkaraippucanai, carukkaraippucini, cempucani, chakkerakumpalan, chini kaayi, chinikavi, cikivarttakam, cimaippucani, cinakkaykoti, curiyaputattan, dadhiphala, dangari, dudhni, erra gummadi, govekaayi, gramya, gudayogaphala, gumbalo, gummadi, gummadi kaaya, gummadi kayi, gummadi-kaya, inippucani, kacinikkuppantam, kaddu, kadu, kadu bhopla, kakarupala, kampalam, kampu, kanipalamulai, kantupariccunai, karkaru, kashiphala, kolu, kucumantakkay, kulika, kulikakkoti, kumbal soppu, kumbala, kumbalahannu, kumbala kaayi, kumbala-kayi, kumbalakai, kumda, kumro, kumutikai, kumutikaikkoti, kuppil, kushmanda, lal, lal kolu, lal kumra, lalkumra, maghaze kadu, maghzi-tukhm-i-kaddu, maghzi tukhm-i-kaddu, maghzi tukhm kaddu, mai, mairel, mairen, mancal pucani, matavappiriyakkoti, matavappiriyam, mattan, mattanga, meetha kaddu, mitha-kumra, mithakaddu, nalla-pusini, nallapucani,

Econ. Taxon. Bot.* Additional Series, 12, pp. 367–372. 1996, *Phytochemistry* 54(1): 71–75. 2000

(Used in Ayurveda, Unani and Sidha. Seeds for the prevention of kidney stones, eaten as an anthelmintic, to destroy intestinal worms; an infusion drunk to treat hypertension and prostate problems, and externally to treat erysipelas. Flower or fruit decoction for measles and smallpox; fresh flowers to relieve diarrhea. Pulp as a poultice to treat burns, boils, inflammatory swellings, headache, neuralgia and inflammations; very old fruit soaked in water and given orally to cause abortion. Leaf poultices on sprains and burns; leaves lotion for discomfort during pregnancy. Seed extracts with insecticidal activities against mosquitoes and flies. Magic-religious beliefs, superstitions, it is not advisable to cut the fruit of this plant by any women in the reproductive stage, if a ripe fruit is eaten as vegetable by pregnant woman it causes abortion.)

in English: autumn pumpkin, autumn squash, courgette, crookneck, field pumpkin, gourd, marrow, pepita, pomion, pumpkin, squash gourd, summer pumpkin, summer squash, vegetable marrow, vegetable spaghetti, zucchini

in Italian: zucchini

in Arabic: qar'a, qre'i'a

in South America: (ah) k'uum, ayotli, calabaza, gueto bichi, gueto hueche, purudie, queto hueche

in China: tao nan gua

in India: bhopli, bileegumbala, boodadegummadi, boodagumbala, boodigummadi, boodugumbala, budadegummadi, bude-kumbala-kayi, budide-gummadi, campal pucani, kadimah, kaliyana-pashnik-kay, kaliyana-pushinik-kay, kalyana poosuni, kalyanappucani, kaliyanappucinik-kay, karkaru, kohala, komora, konda, kondha, kudimah, kul-ppantam, kumara, konda, kumpalam, kumpalanna, kumra, kurkaru, kurlaru, kushmanda, kushmandi, kushpan-daha, kusmanda, lanka, lauka, mairel, majdabah, pendli-gummadi-kaya, perum pucani, petha, pottai-gammadi, pottigummadi, pucani, safed kaddu, safedkaddu, suraikai, tatiyan kay, vellaippucani

in Japan: seiyô-kabocha, uri-kabocha

in Lepcha: tung zaong

Malayan names: labu ayer, labu manis, mendelikai, semangka

in Tibet: bum sa

in Tanzania: malenge, mboga

in Yoruba: apala, elege, esin, isere, itakun elege, segba, takun elege

Culcasia P. Beauv. Araceae

From an Arabic name for *Colocasia antiquorum*, see *Flore d'Oware* 1: 4, t. 3. 1805 and *Adansonia*, n.s., vii. 137. 1967.

Culcasia falcifolia Engl. (*Culcasia scandens* fo. *ovatifolia* Engl.)

Tropical Africa, Gabon, Ethiopia, Zambia. Epiphyte, climber, creeping, green white spathe, spadix white

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 418. 1899

(Leaves ash taken for dry cough, edema, epilepsy. Used by healers who use tunguri, a small fetish gourd.)

in Kenya: chepnamobon, kipnamobon

in Tanzania: kiandama

Culcasia scandens P. Beauv. (*Caladium scandens* (P. Beauv.) Willd.; *Culcasia gracilis* N.E. Br.; *Culcasia kusaiensis* De Wild.; *Culcasia lancifolia* N.E. Br.; *Culcasia saxatilis* A. Chev.; *Culcasia tenuifolia* Engl.; *Culcasia tepoensis* A. Chev., nom. nud.; *Denhamia scandens* (P. Beauv.) Schott)

W. Trop. Africa to Angola. Creeper, flowers enclosed in greenish-white spathe and in short clusters

See *Meletemata Botanica* 19. 1832, *Plantarum vascularium genera secundum ordines* ... 1: 18, 2: 16. 1837,

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 15: 447. 1893 and *Exploration Botanique de l'Afrique Occidentale Française* ... 1: 678. 1920, *J. Altern. Complement. Med.* 6(5): 423–427. 2000, *Pharmacol. Biochem. Behav.* 79(3): 473–481. 2004, *Indian J. Exp. Biol.* 44(5): 422–424. 2006

(The sap of the stems and leaves irritates the skin, said to be poisonous to sheep and goats. Leaves analgesic, tonic, diaphoretic, stomachic, antiinflammatory, antirheumatic, the juice of the warmed leaves as eyedrop and eardrop. Stem and leaves fish poison.)

in Ghana: konkurahaban, nkonkorahan, nkonkoran, otwe, toga

Culcita C. Presl Dicksoniaceae (Thyrsopteridaceae, Dennstaedtiaceae)

Latin *culcita* or *culcitra* 'a bed, mattress, cushion, pillow', referring to the woolly rootstock; see K.B. Presl, *Tentamen Pteridographiae, seu genera Filicacearum*. 135. 1836.

Culcita villosa C. Chr. (*Calochlaena villosa* (C. Chr.) M.D. Turner & R.A. White)

Papua.

See *Tentamen Pteridographiae* 135, t. 5, f. 5. 1836 and *Brittonia* 2: 283. 1937, *American Fern Journal* 78: 93. 1988

(Leaves heated and sniffed to ease a cold or cough.)

in Papua New Guinea: kel, kyonga

Culcitium Bonpland Asteraceae

Latin *culcita* or *culcitra* 'a bed, mattress, cushion, pillow'; see Friedrich Wilhelm Heinrich Alexander von Humboldt (1769–1859) and Aimé Jacques Alexandre Bonpland (1773–1858), *Plantae aequinoctiales* 2(9): 1, 4, t. 66, 67. 1809[1808] and Nancy Tyson Burbidge, in *Dictionary of Australian Plant Genera*. 85. 1963.

Culcitium canescens Bonpl. (*Culcitium ferrugineum* Klatt; *Culcitium rufescens* Bonpl.; *Culcitium rufescens* Bonpl. var. *canescens* (Bonpl.) Benoist; *Senecio canescens* (Bonpl.) Cuatrec.; *Senecio ferrugineus* (Klatt) Cuatrec.; *Senecio rufescens* (Bonpl.) Cuatrec., nom. illeg.)

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 413. 1838, *Annalen des Naturhistorischen Hofmuseums* 9: 363. 1894 and *Bulletin de la Société Botanique de France* 95: 302–306. 1948, *Fieldiana, Botany* 27: 43–44. 1950

(For cough.)

Cullen Medikus Fabaceae (Psoraleeae)

See F. Kasimir (Casimir) Medikus (1736–1808), *Vorlesungen der Churpfälzischen physicalisch-öconomischen Gesellschaft*. 2: 381. Mannheim. 1787, *Revisio Generum Plantarum* 1: 193. 1891.

Cullen corylifolium (L.) Medik. (*Cullen corylifolia* (L.) Medik.; *Cullen corylifolium* Medik.; *Cullen corylifolius* (L.) Medik.; *Lotodes corylifolia* Kuntze; *Lotodes corylifolia* (L.) Kuntze; *Lotodes corylifolium* (L.) Kuntze; *Psoralea corylifolia* L.; *Psoralea patersoniae* Schönl.; *Trifolium unifolium* Forssk.)

Tropics and subtropics. Perennial non-climbing herb, aromatic, erect, stem glandular, leaves gland dotted, flowers in long-peduncled heads, persistent cupuliform calyx, corolla yellowish or blue, dry oval indehiscent mucronate pod, black seeds

See *Species Plantarum* 2: 762, 764. 1753, *Vorlesungen der Churpfälzischen physicalisch-öconomischen Gesellschaft* 2: 381. 1787, *Fl. Brit. Ind.* 2: 103. 1876, *Revisio Generum Plantarum* 1: 193. 1891 and *Bulletin of the Botanical Survey of India* 14: 170. 1972, *J. Indian Bot. Soc.* 61: 263–267. 1982, *Acta Phytotaxonomica Sinica* 22: 243–249. 1984, *Taxon* 33: 756–760. 1984, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Cytologia* 54: 51–64. 1989

(Used in Ayurveda, Unani and Sidha. Toxins. Whole plant and seeds for leprosy; powdered seed, root and leaves to treat skin diseases, vitiligo, minor skin diseases, caries, deafness, filaria, wounds, poisoning, for conception. Seeds laxative, diuretic, antidote, aphrodisiac, for impotence, diarrhea, seminal emission, lumbago, cough, cold, skin diseases, itch, psoriasis, vitiligo, leprosy; seed oil applied externally in psoriasis and seed powder taken internally. Leaves ground with *Brassica* oil and applied externally for itch. Veterinary medicine, seed powder paste applied on cutaneous diseases and injured joints of the cattle.)

in English: bawchan seed, bawchee seed plant, Malay tea scurf

in China: bu gu zhi

in India: aindavi, alubukhara, andraraji, asitatvacha, avalguja, baahujige, baakuchee, baavanchi, baavanchi gida, baavanjee gida, baavuje, babachi, babchi, babci, babechi, babehi, babkuchi, bachi, bakhni, bakuchi, bakuci, bavachi, bavachi beej, bavachya, bavanalu, bavanchalu, bavanchi, bavanchiyan, bavanji, bavchi, bavchiyan, bawachi, bawachi beeja, bawchi, bhaavanji, bhaavanji chettu, bhavaj, bhavanchi-vittu-lu, bhavanchi-vittulu, bhavanj, bhavanji, bodi, bogi-vittulu, bogivittulu, bukchi, caivaputi, candralekha, candrasakala, cantirekam, cantirekarici, cantirinokkam, chvakuchi, chandrakala, chandrakala, chandrakala, chandri, cilesmanacani, comaraci, cottam, cuvalli, cuvalyapi, gawar, gawari bavachi, indralekha, induraji, indurajika, kaalaginja, kaalugachha, kaarkokilari, kaarpooaga arisi, karbogaarisi,

in Pakistan: bauchi

in Tibet: so ma ra dza, so ma ra tsa

Cuminum L. Apiaceae (Umbelliferae)

From the Greek *kyminon* ‘cummin’, Dioscorides and Theophrastus applied to *Cuminum cyminum* L., Dioscorides also to *Nigella arvensis* and *Lagoecia cuminoeides*, see *Species Plantarum* 1: 254. 1753.

Cuminum cyminum L. (*Cuminum cyminum* Wall.)

Asia, India. Herb, erect to suberect, thin taproot, inflorescence a compound umbel, petals whitish at base pinkish to reddish at top

See *Species Plantarum* 1: 254. 1753, *Numer. List* [Wallich] n. 594. 1829 and *Taxon* 29: 543. 1980, *Candollea* 35: 497–510. 1980, *Cytologia* 45: 389–402. 1980, *Taxon* 31: 771–772. 1982, *Cytologia* 48: 79–86. 1983, *Fl. Libya* 117: 74. 1985, *Cytologia* 51: 479–488. 1986, *Plant Systematics and Evolution* 154: 11–30. 1986, *Journal of Cytology and Genetics* 23: 38–52. 1988, *Cytologia* 55: 631–637. 1990, *Cytologia* 56: 627–632. 1991, *Proceedings of the Indian Science Congress Association* 79(3:viii): 137. 1992, *Cytologia* 61: 19–25. 1996

(Used in Ayurveda, Unani and Sidha. Carminative and emmenagogue, warming, used to treat stomach, digestion and digestive disorders, lung; treats fever, lungs and indigestion diseases; decoction of leaves of *Phyllanthus fraternus* with sugar and *Cuminum cyminum* taken orally to treat syphilis and gonorrhoea; aids digestion and increases appetite; leaves extracts of *Ficus glomerata* and *Cuminum cyminum* mixed and given for stomach complaints. Dried powdered

roots of *Hemidesmus indicus* mixed with *Cuminum cyminum* taken orally to treat gonorrhoea. Seeds included in a complex oral remedy for bloody diarrhoea; a paste applied to the forehead for headaches and an oral remedy for rheumatoid arthritis and other joint diseases. Fruits of cumin and carum (*Trachyspermum ammi*) powdered and smoked in a cigarette to treat scorpion bite.)

in English: cumin, Roman caraway

in Arabic: kammoun, kamoun, kemmoun, kimoon, sanoot

in Italian: cimino, cumino

in Burma (Myanmar): ziya

in Cambodia: ma chin

in China: zi ran qin

Cunila Royen ex L. Lamiaceae (Labiatae)

Cunila, *cunela* or *conila*, the ancient Latin names for a plant, a mint or a species of *Origanum*; see *Species Plantarum* 2: 575. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, C. Linnaeus, *Systema Naturae*. Ed. 10. 2: 1359. 1759, *Dissertatio brevis de principiis botanicorum et zoologorum* 33. 1769, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 22, pl. 47. 1797 and *Taxon* 29: 333. 1980.

Cunila lythrifolia Benth. (*Cunila stachyoides* M. Martens & Galeotti; *Hedyosmos lythrifolius* (Benth.) Kuntze; *Hedyosmos lythrifolius* Kuntze; *Hedyosmos stachyodes* Kuntze; *Hedyosmos stachyoides* (M. Martens & Galeotti) Kuntze; *Hedyosmos stachyoides* Kuntze)

Mexico.

See *Edwards's Botanical Register* 15: sub t. 1289. 1829, *Bull. Acad. Roy. Sci. Bruxelles* 11(2): 190. 1844, *Revis. Gen. Pl.* 2: 520. 1891

(Leaves infusion sedative, for fright.)

in English: dittany

in Mexico: poleo

Cunila origanoides (L.) Britton (*Cunila mariana* L.; *Cunila origanoides* Britton; *Hedyosmos origanodes* Kuntze; *Hedyosmos origanoides* Kuntze; *Hedyosmos origanoides* (L.) Kuntze; *Mappia origanoides* House; *Mappia origanoides* (L.) House; *Satureja origanoides* L.; *Ziziphora mariana* Roem. & Schult.; *Ziziphora mariana* (L.) Roem. & Schult.)

Central America.

See *Species Plantarum* 2: 568. 1753, *Syst. Nat.* ed. 10, 2: 1359. 1759, *Syst. Veg.* ed. 15 bis [Roemer & Schultes] 1: 208. 1817, *Revisio Generum Plantarum* 2: 520. 1891, *Memoirs of the Torrey Botanical Club* 5(18): 278. 1894 and *American Midland Naturalist* 8: 62. 1922

(Analgesic, febrifuge, diaphoretic, stimulant, for cold, fever, snakebite.)

Cupania L. Sapindaceae

After the Italian monk Francesco Cupani, 1657–1710/1711, botanist, a pupil of Silvio Boccone, in Misilmeri (near Palermo) founded the Botanic Garden of Giuseppe del Bosco principe della Cattolica, his works include *Hortus Catholicus*, seu Ill. et Excell. Principis Catholicae ducis Misilmeris, comitis Vicaris, baronis Prizi, nec non magni baronis Siculianae. Neapoli 1696, *Supplementum alterum*

ad Hortum Catholicum. Panormi 1697, *Catalogus plantarum sicularum noviter adinventarum*. Panormi [Palermo] 1692, *Syllabus plantarum Siciliae nuper detectarum*. Panormi 1694 and *Pamphyton siculum, sive historia naturalis de animalibus, stirpibus, fossilibus, etc.* Panormi 1713; see Carl Linnaeus, *Species Plantarum*. 1: 200. 1753, *Genera Plantarum*. Ed. 5. 93. 1754, Giuseppe M. Mira, *Bibliografia Siciliana*. 1: 285–286. Palermo 1881 and Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 80–81. Palermo 1988.

Cupania americana L. (*Cupania americana* Gaertn., nom. illeg.)

Tropical America, Venezuela, Haiti.

See *Pl. Amer.* t. 110. 1757, *De Fructibus et Seminibus Plantarum...* 2: 469. 1791 and *Regnum Veg.* 127: 40. 1993

(For catarrh, dysentery.)

Cupania jackiana Hiern

Nicobar Isl.

See *Fl. Brit. India* [J.D. Hooker] i. 678. 1872–1897

(For injured eyes, juice from tender leaves used as eye drop; leaf paste applied on forehead for insomnia; leaves mixed with the leaves of *Breynia retusa* and *Syzygium samarangense* pounded and mixed with pig's blood and applied as analgesic and febrifuge.)

in India: lamang

Cupania pallidula Hiern

South Africa.

See *Fl. Brit. India* [J.D. Hooker] 1: 676. 1872–1897

(For toothache.)

Cupania pleuropteris Blume (*Guioa pleuropteris* (Blume) Radlk.; *Guioa pleuropteris* Radlk.)

Borneo, Australia.

See *Rumphia* 3: 158. 1849 [Jan 1849], *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* ix. (1879) 611. 1879

(Piscicide.)

Cupania racemosa Radlk. (*Cupania racemosa* (Vell.) Radlk.; *Trigonocarpus racemosa* Vell.)

Brazil.

See *Florae Fluminensis* 1: 153. 1825, *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* 9: 521, 568. 1879 [*Sitzungsberichte der Königl. Bayerischen Akademie der Wissenschaften zu München*.]

(For wounds, ulcers, tumor.)

Cuphea P. Browne Lythraceae

From the Greek *kypchos* 'bent, curved, humped', referring to the calyx, to the shape of the hypanthium or to the fruit; see Patrick Browne, *The civil and natural history of Jamaica*. 199–200, 216–217, pl. 21, f. 2. London 1756, *Fasciculus plantarum cum novis generibus et speciebus* 15. 1771, *Hortus Botanicus Vindobonensis* 2: 83. 1772, *Florae Peruvianaee, et Chilensis Prodromus* 66. 1794, *Exposition des Familles Naturelles* 2: 178. 1805, *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. in Hawaii: lena, malena, 'olena

Curcuma mangga Valetton & Zijp

Java.

See *Recueil Trav. Bot. Néerl.* 14: 138. 1917, Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b). Continental Publishing, Deurne. 1999 [as *Curcuma zedoaria*.]

(Stomachic, febrifuge.)

Curcuma montana Roxb.

India, Sri Lanka.

See *Plants of the Coast of Coromandel* 2: 28. 1800

(Rhizome paste applied for treating polio, fever, headache, paralysis; rhizome juice given for a smooth delivery.)

in India: chyrrnit khlow, dikki, jyotsang, jyotsrand, palua, sakuta, syhing-syrrnit

Curcuma neilgherrensis Wight (*Curcuma angustifolia* Roxb., nom. illeg.; *Curcuma angustifolia* Dalzell & A. Gibson, nom. illeg.)

India, Vietnam, Himalaya. Herb, perennial, floral bracts pink, flowers deep yellow, rhizome eaten as vegetable

See *Asiat. Res.* 11: 338. 1810, *Icon. Pl. Ind. Orient.* [Wight] t. 2006. 1853, *Bombay Fl.*: 274. 1861

(Demulcent, astringent, for diarrhea, fever. Juice from crushed rhizome rubbed on swellings of the body; paste bound with cloth on fractures. Ritual, ceremonial, flowers used in worshipping and also worn by women.)

in India: jamsunaro, shindal-van

Curcuma petiolata Roxb. (*Curcuma cordata* Wall.; *Curcuma petiolaris* auct.; *Curcuma petiolaris* Hort.)

Vietnam, Java.

See *Fl. Ind.* 1: 36. 1820, *Pl. Asiat. Rar.* (Wallich) 1: 8. 1829, *Gard. Chron.* 1871: 6. 1871

(For tumor, wounds.)

Curcuma pseudomontana J. Graham (*Curcuma grahiana* (J. Graham) Voigt, nom. illeg.)

India. Small herb, almond-like rhizomes eaten as vegetable

See *A Catalogue of the Plants Growing in Bombay and its Vicinity* 210. 1839, *Hortus Suburbanus Calcuttensis* 567. 1845 and *Ethnobotany* 10: 75–84. 1998

(Antiinflammatory, hepatic stimulant, tuber extract given for jaundice, cough and cold; warm poultice of crushed tuberous roots applied on body swellings; fresh tuber paste applied on forehead and soles in heat stroke. Sacred plant and flowers, the watery paste of the corm used to check if a snake is poisonous or not. Veterinary medicine.)

in English: Bengal root

in India: adavi pasupu, bahuli-thana, bambe, banhardi, mahabara, mahabari, shind-val, shindal-van, sindarbar, van haridra

Curcuma purpurascens Blume

Bali, Java.

See *Enum. Pl. Javae*: 46. 1827

(For boils, skin diseases, wounds, itch, scabies, fevers, cough.)

Curcuma rubescens Roxb. (*Curcuma erubescens* Wall., nom. inval.; *Curcuma longiflora* Salisb.; *Curcuma rubricaulis* Link)

India, Myanmar. Rhizomes white inside, bracts pale red, flowers pale yellow, along roads

See *Asiat. Res.* 11: 336. 1810, *Trans. Hort. Soc. London* 1: 286. 1812, *Enum. Hort. Berol. Alt.* 1: 3. 1821, *Numer. List*: 6608. 1832

(Febrifuge, astringent.)

Curcuma zanthorrhiza Roxb. (*Curcuma xanthorrhiza* Roxb.)

India. Herb, round tuber

See *Fl. Ind.* 1: 25. 1820 and *Thai Forest Bulletin (Botany)* 24: 35–49. 1996, Govaerts, R., *World Checklist of Seed Plants* 3(1, 2a & 2b). Continental Publishing, Deurne. 1999 [as *Curcuma zedoaria*.], *Gardens' Bulletin. Singapore* 57: 199–210. 2005

(Fresh tuber emmenagogue, for constipation, malaria, rheumatism, liver affection, gall stones, jaundice, to promote lactation.)

in China: yin ni e zhu

in Indonesia: temu lawak

Malay name: temu raya

Curcuma zedoaria (Christm.) Roscoe (*Amomum latifolium* Sessé & Moc.; *Amomum latifolium* Lam.; *Amomum latifolium* Afzel.; *Amomum latifolium* Salisb.; *Amomum zedoaria*

Christmann; *Amomum zedoaria* Berg.; *Amomum zerumbet* L.; *Amomum zerumbet* Koen. ex Retz.; *Amomum zerumbet* J. (Seeds used for impotence, vertigo, fetal distress.)

in English: Chinese dodder

in China: tu si, tu si zi, tusizi

Cuscuta americana L. (*Cuscuta americana* var. *congesta* (Benth.) Progel; *Cuscuta americana* var. *spectabilis* (Choisy) Progel; *Cuscuta congesta* Benth.; *Cuscuta graveolens* Kunth; *Cuscuta leirolepis* Miq.; *Cuscuta spectabilis* Choisy; *Cuscuta surinamensis* Schill.)

South America. Noxious weed

See *Species Plantarum* 1: 124. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 3: 122. 1818[1819], *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 9: 283, pl. 5, fl. 1. 1841, *Linnaea* 18: 247. 1844, *The botany of the voyage of H.M.S. Sulphur* 138. 1845, *Flora Brasiliensis* 7: 376–377. 1871 and *Taxon* 42: 876. 1993

(Stem infusion taken to stop vomiting. Mucilage, resin, bitter and astringent. Plant decoction bath for marasmus; infusion drunk for jaundice. This plant, together with the leaves of yellow cedar (*Tecoma stans*), brewed for a fever tea.)

in English: dodder, love vine, vermicelli, yellow love

Cuscuta californica Hook. & Arn. (*Cuscuta californica* Choisy; *Grammica californica* (Choisy) Hadač & Chrtek)

North America, Mexico. Parasitic, perennial vine, herb, leafless orange twining stems, flowers white

See *The Botany of Captain Beechey's Voyage* 364. 1839, *Mém. Soc. Phys. Genève* 9(2): 279. 1842 and *Folia Geobot. Phytotax.* 8: 220. 1973

(Plant infusion to stop bleeding, also taken for black widow spider bites.)

in English: chaparral dodder

Cuscuta californica Hook. & Arn. var. *californica*

North America, Mexico. Parasitic, perennial vine, herb, leafless orange twining stems, flowers white

See *The Botany of Captain Beechey's Voyage* 364. 1839, *Mém. Soc. Phys. Genève* 9(2): 279. 1842 and *Folia Geobot. Phytotax.* 8: 220. 1973

(Plant infusion to stop bleeding, also taken for black widow spider bites.)

in English: chaparral dodder

Cuscuta cesatiana Bertol. (*Cuscuta australis* R. Brown; *Cuscuta australis* subsp. *cesatiana* (Bertol.) Yunck.; *Cuscuta basarabica* Buia; *Cuscuta cordofana* (Engelm.) Yunck.; *Cuscuta hygrophilae* Pearson; *Cuscuta kawakamii* Hayata; *Cuscuta millettii* Hooker & Arnott; *Cuscuta obtusiflora* var. *australis* (R. Br.) Engelm.; *Cuscuta obtusiflora* Kunth var. *australis* Engelm.; *Cuscuta obtusiflora* var. *cordofana* Engelm.; *Grammica basarabica* (Buia) Hadač & Chrtek)

Europe, SE Asia. Parasite, white translucent petals

See *Prodromus Florae Novae Hollandiae* 1: 491. 1810, *The Botany of Captain Beechey's Voyage* 201. 1837, *Transactions of the Academy of Science of St. Louis* 1: 492–494. 1859 and *Icones Plantarum* 28, pl. 2704. 1901, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 5: 125. 1915, *Memoirs of the Torrey Botanical Club* 18(2): 126–127, f. 2. 1932, *Folia Geobotanica et Phytotaxonomica* 5: 445. 1970

(Blood purifier, vermifuge, anti-convulsions, febrifuge, for Guinea worm infestation. Magic, *Cuscuta australis*, a general emblem of love.)

in English: southern dodder

in China: nan fang tu si zi

in Ghana: domeatre

in Yoruba: gannaganna, gedegede pupa, omoni gedegede, omoni ginigini, omoni gelegele

Cuscuta chilensis Ker Gawl. (*Cuscuta chilensis* Bert. ex Choisy; *Cuscuta chilensis* Hort. Frib. ex Engelm.)

Chile. Annual herb

See *Botanical Register*; consisting of coloured ... 7: pl. 603. 1822 [1821 publ. 1822], *Prodr.* (DC.) 9: 456. 1845, *Transactions of the Academy of Science of St. Louis* 1: 508. 1859

(Crushed plant to treat tumors, ulcers.)

in Chile: cabello de ángel, cuscuta

Cuscuta chinensis Lam. (*Cuscuta carinata* R. Br.; *Cuscuta chinensis* C. Wright; *Cuscuta chinensis* Lam. var. *carinata* (R. Br.) Engelm.; *Cuscuta fimbriata* Bunge ex Engelm.; *Grammica chinensis* (Lam.) Hadač & Chrtek)

India.

(Bark showed antinociceptive and antiinflammatory activities.)

in Nigeria: oworoworo (Yoruba)

Cussonia djalonensis A. Chev. (*Brassaia mannii* (Hook. f.) Hutch. var. *camerounensis* Aubrév.; *Cussonia barteri* Seem.; *Cussonia longissima* Hutch. & Dalziel; *Cussonia nigerica* Hutch.)

Tropical Africa.

See *Journal of Botany, British and Foreign* 4: 299. 1866 and *Bulletin de la Société Botanique de France* 55(Mém. 8b): 38. 1908, *Bulletin of Miscellaneous Information Kew* 1910: 136. 1910, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 520. 1928, *Kew Bull.* 1929, 28. 1929, *Journal of Ethnopharmacology* 67: 15–25. 1999, *Journal of Ethnopharmacology* 93: 43–49. 2004

(Gum irritant. Plant used, on the Theory of Signatures, in the treatment of leprosy. Leaves purgative, astringent, emetic, diuretic, poison-antidote, for venereal diseases, convulsion in children, skin diseases. Magic, ritual, ceremonial, against bad spirits.)

Cussonia holstii Harms ex Engl. (*Cussonia bequaertii* De Wild.; *Cussonia boranensis* Cufod.; *Cussonia holstii* f. *integrifoliola* Tennant; *Cussonia holstii* var. *tomentosa* Tennant; *Cussonia microstachys* Harms) (for the German gardener and plant collector C.H.E.W. Holst, 1865–1894, traveller in East Africa.)

Ethiopia to Tanzania, Yemen. Tree, stem white to dark brown, rounded, deeply furrowed rough bark peeling, sparsely branched and brittle, leaves compound dark green above, inflorescence borne on separate branches below the leaves, greenish yellow inconspicuous flowers, small fleshy fruits yellow-green, leaves as forage for goats, donkeys and camels, in forest valley, in highland forest, evergreen bushland, rocky slopes, forest margins

See *Nova Acta Regiae Soc. Sci. Upsal.* 3: 210. 1780, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1894: 63–64. 1894 [Abh. Königl. Ges. Wiss. Göttingen, Math.-Phys. Kl. 39: 64. 1894], *Nat. Pflanzenfam.* 3(8): 54. 1897 and *Pl. Bequaert.* 2: 89. 1923, *Racc. Bot., Angiosp.-Gymnosp.* 149. 1939, *Kew Bulletin* 14: 224. 1960

(A bark decoction used to clean uterus after childbirth, to expel the placenta after childbirth, to stop vomiting; a bark extract showed activity against *Trichomonas vaginalis*. Bark and root decoctions taken to treat blood diseases. Veterinary medicine, against diarrhea in livestock.)

in East Africa: lulukwet, malende, muroha

in Tanzania: indindi, ordimarori

Cussonia nicholsonii Strey (the specific name honors the South African amateur botanist Hugh Nicholson, of St. Michael's-on-Sea, contributor to *The Trees in South Africa*, botanical collector together with the South African (b. Germany) botanist Rudolf Georg Strey (1907–1988) of the Durban Herbarium; see Gordon Douglas Rowley, *A History of Succulent Plants*. Mill Valley, California 1997; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 337. Cape Town 1981)

South Africa. Many stemmed tree

See *Bothalia* 11(1–2): 197–199, f. 6–7. 1973

(Astringent, against diarrhea.)

in English: Natal coast cabbage tree, wedge-fruited cabbage tree

in South Africa: Natalse kuskiepersol

Cussonia paniculata Eckl. & Zeyh. (*Cussonia paniculata* E. Mey.)

South Africa. Tree, swollen stem base, pachycaul succulent, thick corky bark, thick root, large digitately compound cabbage blue leaves, root eaten raw, leaves good fodder for stock

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 3: 355. 1837, *Zwei Pflanzengeogr. Docum.* (Drège) 176. 1843–1844 and *Veld & Flora* 73: 135, 136. 1987, *British Cactus and Succulent Journal* 6: 98–100. 1988, *South African Journal of Botany* 67: 367–370. 2001

(Crushed bark taken as emetic, purifier, to treat infections, inflammation, ulcers, stomachache, acidity in the stomach, fevers and malaria. Leaves applied to boils and abscesses; leaves infusion drunk to clean the urinary tract.)

in English: goats' food, highland cabbage tree, mountain cabbage tree, mountain kiepersol

in Lesotho: motsetse

in Southern Africa: bergkiepersol, kiepersol (from the Portuguese *quita sol* = excluding the sun), sambreelboom; umSenge, umSengembuzi (Zulu); umSenge, umNgqokhwe (Xhosa); umSenge (Swazi); mosetse (Western Transvaal, northern Cape, Botswana)

Cussonia spicata Thunb. (*Cussonia boivinii* Drake; *Cussonia calophylla* Miq.; *Cussonia kraussii* Hochst.; *Cussonia quercifolia* Colla; *Cussonia triptera* Colla)

Sudan to S. Africa, Tanzania. Tree, thick and corky bark, twigs green, leaves compound crowded together in whorls at the top of the trunk or branches, erect thick spikes of small greenish yellow flowers, small fleshy soft purple berries packed closely along the spikes, leaves for fodder, thick succulent root from young trees chewed like cassava, in riverine forest, open areas, upland dry evergreen forest, wooded grassland, on dry upland forest edges, upland rainforest

See *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 212, t. 13. 1780, *Hortus Ripulensis* 43, t. 26. 1824, *Annales des Sciences Naturelles; Botanique*, sér. 3 1: 36. 1844, *Flora* 27: 431. 1844, *Journal de Botanique (Morot)* 11(7): 125, t. 3. 1897 and *Bulletin du Jardin Botanique National de Belgique* 44: 101–139. 1974, *Journal of Ethnopharmacology* 12: 35–74. 1984

(Roots decoction laxative, diuretic, for febrile complaints, enteritis, stomachache, heartburn; mashed roots used in the treatment of malaria. Leaves in the treatment of indigestion, snakebite, malaria. Fish poison. Veterinary medicine, a decoction of the bark used to treat gallsickness in cattle.)

in English: cabbage palm, cabbage tree, common cabbage tree, elephant's toothbrush, umbrella tree

in East Africa: mwenyiere, olurur, sokwet

in S. Rhodesia: umSheme

in Southern Africa: gewone kiepersol, kiepersol, nooiensboom, nooisboom (= young lady's tree), sambreelboom, waaiboom (based on the word waaier or fan); umSenge (Zulu); umSenge (Xhosa); umSenge, umSenga (Swazi); musenje (Tsonga); mosetse (Western Transvaal, northern Cape, Botswana); mosetshe (North Sotho); musenzhe (Venda); mufenje, muShenje, muSheme (Shona)

in Tanzania: limpombo, maneneh, mkonero-wa-nyikani, mntindi, mnyonzi, mpombo, mporori, mtendele, mutundi, oldimaroi, oljumaroi, pohi-aawak

in Zambia: chitebitebi

Cussonia thyrsiflora Thunb. (*Cussonia thyrsoides* Thunb.)

South Africa. Shrub or small tree, evergreen, spreading, fleshy tuberous roots, flowers and buds waxy, yellow-green flowers, erect racemes, spikes of purple to black berries, roots a source of food and water

See *Nova Acta Regiae Soc. Sci. Upsal.* ser. 3, 3: 212. 1780, *Nov. Gen. Pl.* 1: 11. 1781

(Roots decoction laxative, diuretic.)

in English: Cape coast cabbage tree, dune cabbage tree

in Southern Africa: dune kiepersol, Kaapse kuskiepersol, sambreelboom; umSenge (Xhosa)

Cussonia transvaalensis Reyneke

South Africa. Tree, grey-green foliage, corky bark, small green flowers borne in dense finger-like structures, small purple-black berries, succulent edible roots

See *S. African J. Bot.* 3: 368. 1984

(Mashed roots used in the treatment of malaria.)

in English: grey cabbage tree

in South Africa: motshetshe, vaal kiepersol

***Cussonia zimmermannii* Harms**

Tanzania, Kenya. Tree, straight, dense rounded crown, inflorescence a spike-like raceme, greenish white flowers, greenish white drupe-like berry

See *Bot. Jahrb. Syst.* 53: 361. 1915, *Acta Tropica* 56: 65–77. 1994, *Natural Product Research* 17(2): 127–133. 2003, *Journal of Natural Products* 70(10): 1565–1569. 2007

(Leaves and roots for venereal diseases, fevers, bronchitis. Roots decoctions to facilitate childbirth, to stop bleeding after childbirth, to treat fever and malaria, against gonorrhoea and in the treatment of mental illness. Marrow of stem and branches eaten for epilepsy.)

in Tanzania: mbomba maji, mpapayi mwitu

Cuviera DC. Rubiaceae

After the French (born Württemberg, Montbéliard) naturalist Georges Léopold Chrétien Frédéric Dagobert baron Cuvier, 1769–1832 (Paris, France), zoologist, palaeontologist, comparative anatomist, studied under Karl Friedrich Kiemeyer (1765–1844) at the Caroline University, (former/once) friend of Étienne Geoffroy Saint-Hilaire (1772–1844) and Lamarck, from 1795 assistant professor of animal anatomy at the Muséum (Paris), 1796 a member of the Institut de France, from 1800 professor at the Collège de France, 1818 member of the Académie Française, his works include *Notice biographique sur Bruguières, etc.* [Rapport général des travaux de la Société Philomatique de Paris] [1799], *Voyages dans l'Amérique méridionale*, par F. de Azara ... enrichis de notes par G. Cuvier. Paris 1809 and *The Animal Kingdom*. London 1827–1835, with Achille Valenciennes wrote *Histoire naturelle des Poissons*. Paris 1828–1849, with A. Brongniart wrote *Description Géologique des environs de Paris*. Paris 1822, he was the brother of the French zoologist Frédéric Cuvier (1773–1838, d. Strasbourg, France). See *Annales du muséum national d'histoire naturelle* 9: 222, t. 15. 1807, Georges Louis Duvernoy (1777–1855), *Notice historique sur les Ouvrages et la Vie de M. le Baron Cuvier*. Paris 1833, *G. Cuvier's Briefe an C.H. Pfaff aus den Jahren 1788 bis 1792* ... Herausgegeben von ... W.F.G. Behn. Kiel 1845, *Genera Plantarum* 2: 69. 1873 and *Catalogue of the plants collected by Mr. & Mrs. P.A. Talbot in the Oban district, South Nigeria*, by A.B. Rendle, E.G. Baker, and H.F. Wernham, S. Moore, and others. London, 1913, Felix de Azara (1742–1821), *Viaje*

por la America meridional. La descripción geográfica ... del Paraguay ... los pueblos salvajes ... medios de los Jesuitas para someter ... Pub. por C.A. Walckenaer. Madrid 1941, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 408. 1965, Franck Bourdier, in *D.S.B.* 3: 520–528. 1981, *Kew Bull.* 42(1): 189. 1987.

***Cuviera longiflora* Hiern (*Cuviera angolensis* Welw. ex K. Schum.)**

Tropical Africa. Treelet, long paired spines on trunk, inflorescences axillary

See *Fl. Trop. Afr.* [Oliver et al.] 3: 157. 1877, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4 (4): 94, f. 33F. 1891

(Stem bark for broken bones, dislocation, sprains.)

in Nigeria: olibozo

Cyamopsis DC. Fabaceae (Indigofereae)

Latin *cyamos* or *cyamus* and Greek *kyamos* for a bean, for a plant called also *colocasía*, Egyptian bean (Plinius), and *ops*, *opos*, *opsis* 'aspect, appearance, resemblance', see *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 215–216. 1825 and *Ann. Missouri Bot. Gard.* 81: 792–799. 1994, *Guihaia* 15(2): 163–165. 1995.

***Cyamopsis tetragonoloba* (L.) Taub.** (*Cyamopsis psoraloides* (Lam.) DC., nom. illeg.; *Cyamopsis psoraloides* (Lam.) DC.; *Cyamopsis psoraloides* DC., nom. illeg.; *Cyamopsis psoraloides* (Lam.) DC.; *Cyamopsis tetragonoloba* (L.) Taub.; *Dolichos fabaeformis* L'Hér.; *Dolichos fabiformis* L'Hér.; *Dolichos psoraloides* Lam.; *Dolichos psoraloides* Lam.; *Lopinus trifoliolatus* Cav.; *Lupinus trifoliatus* Cav.; *Psoralea tetragonoloba* L.)

Central Asia. Perennial non-climbing herb, tender pods cooked as vegetable

See *Mantissa Plantarum* 1: 104. 1767, *Stirpes Novae aut Minus Cognitae* 163, pl. 84. 1784, *Encyclopédie Méthodique, Botanique* 2(1): 300. 1786, *Icones et Descriptiones Plantarum, quae aut sponte* ... 1: 43, pl. 59. 1791, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 216. 1825, *Die Natürlichen Pflanzenfamilien* 3(3): 259. 1894 and *Ann. Missouri Bot. Gard.* 81: 792–799. 1994, *Guihaia* 15(2): 163–165. 1995

(Used in Ayurveda, Unani and Sidha. Pods cooked as vegetable curry and given in night blindness and stone in kidney. Wet grains used against sprains and swellings. Veterinary medicine, increase milk secretion in buffaloes, cows.)

in English: cluster bean, field vetch, guar bean, guar gum

in China: gua er dou

in India: attittekki, attittekkiceti, bakuchi, bavachi, buru hahar, buru raher, cetiyavarai, chavli-kai, chavlikay, chavuli kaayi, chitki, chivali, cinikkottavarai, ciniyavarai, cirucevikkaceti, cirukottavarai, cukkumi, cukkumiyavarai, dararhi,

dridhabija, ganwar, gaur, gauri, gavaara, gavaara kaayi, gavar, gavari, gawar, gawarkay, godibavachi, goraksaphalini, gorakshaphalini, gorani, gorchikkudu, gori kaayi, gori-kaayi, goru chikkudu, goruchikkudu, govaai, govar, govardhana kaayi, gowar, gowaro, guar, guvaka, guvar, guvarkai, guwar, gwar, gwar phali, gwara, gwarphali, hab qilqil, hab-ul-qilqil, javali kaayi, kachhur, kalacakaceti, kalacakam, kancanamalitaceti, kancanamalitam, kauri, kavalikaceti, kavalikam, khulthi, khulti, khurti, koth-averay, kothavarai, kothaveray, kottamara, kottavara, kottavarai, ksudrasimbi, kuwara, midki, mutki, nalakuka, nalakukavavarai, nishandy-aghni, phaligawar, sushaka, syan sundari, vakrashimbi

Cyananthus Wallich ex Benth. Campanulaceae

From the Greek *kyanos* 'blue' and *anthos* 'flower', see *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 309. 1836 and *Fl. Reipubl. Popularis Sin.* 73(2): 183. 1983, *Acta Phytotax. Sin.* 29(1): 48. 1991, *Acta Phytotax. Sin.* 35(5): 415, 425–426, 430. 1997.

Cyananthus lobatus Wall. ex Benth. (*Cyananthus farreri* Hort. ex Marquand; *Cyananthus lobatus* Wall.; *Cyananthus lobatus* var. *farreri* C. Marquand)

India, Himalaya.

See *Numer. List* [Wallich] n. 1473. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 309, t. 69, f. 1. 1836 and *Bulletin of Miscellaneous Information Kew* 1924(6): 247, f. 3. 1924, *Ethnobotany* 17: 127–136. 2005

(Roots as mild laxative, purgative; leaves and flowers applied on wounds.)

Cyanotis D. Don Commelinaceae

From the Greek *kyanos* 'blue' and *ous, otos* 'an ear', referring to the form of the petals, to the shape and colour of the flowers; see David Don (1799–1841), *Prodromus Florae Nepalensis* 45. London 1825 and *Taxon* 29: 358–360. 1980, *Asian J. Pl. Sci.* 1: 67–76. 1989, *Caryologia* 50: 163–174. 1997.

Cyanotis arachnoidea C.B. Clarke (*Cyanotis bodinieri* H. Léveillé & Vaniot; *Cyanotis labordei* H. Léveillé & Vaniot; *Cyanotis pilosa* Wight, nom. illeg.; *Tonningia arachnodea* (C.B. Clarke) Kuntze; *Tradescantia incana* B. Heyne ex C.B. Clarke; *Tradescantia lanata* B. Heyne ex C.B. Clarke)

China, Trop. Africa, India. Herb, blue-purple flowers

See *Systema Vegetabilium* [Roemer & Schultes] 7: 1155. 1830, *Icon. Pl. Ind. Orient.* 6: 32, t. 2083. 1853, *Monogr. Phan.* 3: 250. 1881, *Revis. Gen. Pl.* 2: 722. 1891 and *Mém. Soc. Sci. Nat. Cherbourg* 35: 385–386. 1906

(Roots used for stimulating blood circulation, as a muscle and joint relaxant, and for relieving rheumatoid arthritis. Leaf paste applied on swelling to reduce itching.)

in China: zhu si mao lan er cao

in India: vallukkai

in Kenya: macho ya bluu

Cyanotis axillaris (L.) D. Don ex Sweet (*Amischophacelus axillaris* (L.) R.S. Rao & Kammathy; *Commelina axillaris* L.; *Cyanotis axillaris* (L.) Schult. & Schult.f.; *Cyanotis axillaris* (L.) Schult. f.; *Cyanotis axillaris* (L.) Sweet; *Cyanotis axillaris* (L.) D. Don, nom. inval.; *Cyanotis axillaris* (Blume) Sweet; *Cyanotis disrumpens* Hassk.; *Tonningia axillaris* (L.) Raf.; *Tonningia axillaris* (L.) Kuntze; *Tonningia axillaris* Kuntze; *Tradescantia axillaris* L.; *Tradescantia axillaris* (L.) L.; *Tradescantia axillaris* Raf.; *Zygomenes axillaris* (L.) K.D. Koenig & Sims; *Zygomenes axillaris* (L.) Salisb.; *Zygomenes axillaris* Salisb.) (*Amischophacelus* from the Greek *mischos* 'stalk', *amischos* 'without stalk' and *phakelos* 'a cluster, bundle', referring to the nature of the inflorescence.)

India, Australia. Succulent, slender, prostrate, blue petals, oblong trigonous capsule

See *Species Plantarum* 1: 42. 1753, *Mant. Pl. Altera* 321. 1771, *Systema Vegetabilium*. Editio decima tertia 260. 1774, *Transactions of the Horticultural Society of London* 1: 271. 1812, *Prodr. Fl. Nepal.* 46. 1825, *Hortus Britannicus* [Sweet] 430. 1826, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 7(2): 1154. 1830, *Flora Telluriana* 2: 16. 1837 [1836 publ. Jan-Mar 1837], *Revisio Generum Plantarum* 2: 722. 1891 and *Journal of the Linnean Society, Botany* 59(379): 305–306. 1966, *Taxon* 27: 519–535. 1978, *Taxon* 32: 320–321. 1983, *Taxon* 33: 126–134. 1984, *Nucleus* 27: 231–241. 1984, *J. Cytol. Genet.* 21: 115–132. 1986, *Asian Journal of Plant Science* 1: 67–76. 1989

(Used for Sidha. A remedy for tympanitis and for external application in cases of ascites. Veterinary medicine, root pieces given to cattle as a remedy to fever.)

in English: blue ears, spreading dayflower, water cyanotis

in China: qiao bao hua

in India: baghanulla, kattu-mullen-keera, mullatota-kura, mullu harive soppu, mulluk-kirai, nir pulli, nirupalli, solt roj, soltraj, tan, valukkaippul

in Philippines: alikbangon, alitbangon, kulasin-marintek, sabilaw

Cyanotis cristata (L.) D. Don (*Commelina cristata* L.; *Cyanotis cavaleriei* H. Léveillé & Vaniot; *Cyanotis huegelii* Hassk.; *Cyanotis imbricata* (Roxb.) Kunth; *Cyanotis racemosa* C.B. Clarke, nom. illeg.; *Cyanotis racemosa* Heyne ex Hassk.; *Ephemerum cristatum* (L.) Moench; *Siphostigma cristata* (L.) Raf.; *Tonningia cristata* (L.) Kuntze; *Tradescantia cristata* (L.) L.; *Tradescantia imbricata* Roxb.; *Tradescantia umbellata* B. Heyne ex C.B. Clarke; *Zygomenes cristata* (L.) W. Wight)

China, Himalaya, Trop. Africa. Herb, bluish purple flowers

See Linnaeus, Carl von (1707–1778), *Flora Zeylanica* sistens plantas Indicas Zeylonae insulae: quae olim 1670–77 / lectae fuere a P. Hermanno ... demum post 70 annos ab A. Günthero ... orbi redditae; hoc vero opere revisae. 13. Stockholm: L. Salvius, 1747 [Hermann, Paul, 1646–1695], *Sp. Pl.* 1: 42. 1753, *Syst. Nat.* ed. 12, 2: 233. 1767, *Methodus Plantas Horti Botanici et Agri Marburgensis* 238. 1794, *Fl. Ind.* 2: 120. 1824, *Prodromus Florae Nepalensis* 46. 1825, *Flora Telluriana* 2: 16. 1837, *Enum. Handb. Fl. Ceylon* 14: 123. 2000

(Root used for the relief of swelling and snakebite.)

in China: si kong cao

in India: bettada kanne soppu, kulari, kulittuppuntu, kutirai kulampati, netha kina, veetla-caitu

Cyanotis foecunda DC. ex Hassk. (*Commelina foecunda* Hochst. ex C.B. Clarke; *Cyanotis foecunda* Hassk.; *Tonningia foecunda* (DC. ex Hassk.) Kuntze)

Tanzania, Botswana.

See Hasskarl, Justus Karl (1811–1894), *Commelinaceae indicae*: 110. Vindobonae, 1870, *Monogr. Phan.* 3: 255. 1881, *Revisio Generum Plantarum* 2: 722. 1891

(Whole plant decoction taken orally to prevent conception.)

in Tanzania: katija

Cyanotis lanata Benth. (*Cyanotis rubescens* A. Chev.; *Cyanotis schweinfurthii* Hassk.; *Tonningia lanata* (Benth.) Kuntze)

Tropical Africa. Herb, erect, creeping, prostrate, leaves slightly succulent, flowers cream-purple, ground cover

See *Niger Fl.*: 542. 1849, *Commelin. Indicae*: 134. 1870, *Monographiae Phanerogamarum* 3: 250. 1881, *Revisio Generum Plantarum* 2: 722. 1891 and *Bull. Soc. Bot. France* 58(8): 216. 1911 (publ. 1912)

(Leaves decoction for epilepsy. Veterinary medicine, antidote.)

in Benin: boyiboman, kouffa, zonmi

in Congo: kadege

Cyanotis papilionacea (Burm. f.) Schult. & Schult. f. (*Commelina papilionacea* Burm. f.; *Cyanotis papilionacea* Roem. & Schult.; *Cyanotis papilionacea* Schult.f.; *Tonningia papilionacea* (Burm. f.) Kuntze; *Tradescantia papilionacea* (Burm. f.) L.)

India.

See *Flora Indica ... nec non Prodromus Florae Capensis* 17. 1768, *Mantissa Plantarum* 2: 513. 1771, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1151. 1830, *Revisio Generum Plantarum* 2: 722. 1891 and *J. Cytol. Genet.* 31(2): 185–193. 1996, *Caryologia* 50: 163–174. 1997

(Powder or paste of the rhizome given for wasp stings.)

in India: eggvullikizhangu

Cyanotis pilosa Schult. f. (*Cyanotis pilosa* Wight, nom. illeg.; *Tonningia pilosa* (Schult. f.) Kuntze)

India.

See *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 7(2): 1154. 1830, Wight, Robert (1796–1872), *Icones Plantarum Indiae Orientalis* 6: 32, t. 2083. Madras: published by J.B. Pharoah for the author, 1838–1853, *Revisio Generum Plantarum* 2: 722. 1891 and *Caryologia* 50: 163–174. 1997

(Veterinary medicine, a laxative in cattle.)

in India: kannali

Cyanotis tuberosa (Roxb.) Schult. & Schult. f. (*Cyanotis cananensis* Hassk.; *Cyanotis sahyadrica* Blatt.; *Cyanotis stock-sii* Hassk.; *Cyanotis thomsonii* Hassk.; *Cyanotis tuberosa* Schult. f.; *Tonningia tuberosa* (Roxb.) Kuntze; *Tradescantia tuberosa* Roxb.; *Tradescantia tuberosa* Greene)

India.

See *Pl. Coromandel* 2: 5. 1799, *Systema Vegetabilium* [Roemer & Schultes] 7(2): 1153. 1830 [Aug-Dec 1830], *Commelin. Indicae*: 114, 118, 133. 1870, *Revisio Generum Plantarum* 2: 722. 1891 and *J. Bombay Nat. Hist. Soc.* 33: 77. 1928, *Caryologia* 50: 163–174. 1997

(Roots for fevers. Veterinary medicine, roots for worms in cattle; tubers dried and made into powder given for fever; tubers ground with betel leaves and rubbed against allergy, rash, itch.)

in India: emme gedde, sadhavari, yeggogulu

Cyathea Sm. Cyatheaaceae

From the Greek *kyathos* ‘a cup, a ladle’, *kyatheion* ‘a little cup’, in reference to the spore cases; see *Elem. Bot.* (Necker) 1: 110. 1790, J.E. Smith, in *Mémoires de l’Académie Royale de Sciences de Turin*. 5: 416–417, t. 2. Turin [Torino] 1793, *Journal für die Botanik* 1800(2): 122. 1801, *Prodromus Florae Novae Hollandiae* 158. 1810, *Deliciae Pragenses* 1: 172. 1822, *Gen. Fil.* tab. 5. 1834. 1822, *Enumeratio Filicum* 250. 1824, *Das Wesen der Farrenkräuter* 119. 1827, *Enumeratio Plantarum Javae* 2: 242. 1828, *Tentamen Pteridographiae* 55. 1836, *London Journal of Botany* 1: 441–442. 1842, *Phytologist*, new series 5: 237–238. 1857, *Synopsis der Pflanzenkunde* (ed. 2) 3: 1453. 1877 and *Contributions from the Gray Herbarium of Harvard University* 200: 20. 1970,

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 98(2): 181. 1977.

Cyathea albosetacea Copel.

India, Philippines. Tree fern

See *Philippine Journal of Science*, C 4(1): 55. 1909

(Pounded leaves applied on wounds and sores.)

Cyathea andersonii Copel. (*Cyathea andersonii* (J. Scott ex Bedd.) Copel.)

India, Philippines. Tree fern, eaten

See *Philipp. J. Sci.*, C 4: 56. 1909

(Starch astringent, tonic.)

Cyathea brunoniana C.B. Clarke (*Alsophila brunoniana* Wall. ex Hook.; *Alsophila brunoniana* Wall.; *Alsophila brunoniana* Bedd.; *Cyathea brunoniana* (Wall.) Clarke & Baker; *Cyathea brunoniana* (Wall. ex Hook.) Clarke & Baker)

China.

See *Numer. List* [Wallich] n. 7073. 1832, *Species Filicum* 1: 52. 1844, *Ferns Br. Ind.* t. 66. 1866, *J. Linn. Soc., Bot.* 24. 409. 1888 and *Contributions from the Gray Herbarium of Harvard University* 200: 21. 1970

Cyathea contaminans (Wall. ex Hook.) Copel. (*Alsophila contaminans* Wall. ex Hook.; *Cyathea contaminans* (Hook.) Copel.; *Cyathea contaminans* Copel.)

SE Asia, Philippines. Tree fern, purplish leaf stalk stout spiny, young fronds boiled and eaten as vegetable

See *Species Filicum* 1: 52, t. 18 B. 1844 and *Philippine Journal of Science* 4(1): 60. 1909

(Rhizome hairs styptic, for coagulating blood, rheumatic problems, rhizomes applied to wounds and ulcers. Magico-religious beliefs, ritual, ceremonial, used in worship.)

in English: tree fern

in India: ngepi

in the Philippines: pakong buaya, pakong buwaya

Cyathea crinita Copel.

India.

See *Philipp. J. Sci.*, C 4: 40. 1909

(Antibacterial. Ceremonial, used for decorating temples during festivals.)

in India: kalyana thevai, neer pana, pana edaval

Cyathea dealbata (Forst.f.) Swartz

New Zealand. Tree, undersurfaces of the fronds silvery white

See *Schrad. Journ.* 1800 [2]. 94. 1802

(Woody fibre reported to be toxic, poisonous; a part of the Maori spearhead. Pith used for ulcers, skin eruptions and boils. Powdered dried bud used in a plaster.)

in English: silver fern, silver tree fern

Maori name: ponga

Cyathea dregei Kunze (*Alsophila dregei* (Kunze) R. Tyron)

South Africa.

See *Contr. Gray Herb.* 200: 30. 1970

(Anthelmintic and to ease childbirth. Magico-religious beliefs, ritual, ceremonial, to counteract effects of witchcraft.)

in English: common tree fern, eastern tree fern, grassland tree fern, tree fern

in Southern Africa: gewone boomvaring; isiKhomakhoma, umPhanga (Zulu); isiHihi (Xhosa); inKomakomo (Swazi); mudima, tshidima (Venda); Dzenga (Shona)

Cyathea gigantea (Wall. ex Hook.) Holttum (*Alsophila gigantea* Wall. ex Hook.; *Alsophila gigantea* Wall.)

China.

See *Numer. List* [Wallich] n. 321. 1829, *Species Filicum* 1: 53. 1844 and *Gardens' Bulletin, Straits Settlements* 8(4): 318. 1935, *Aspects Pl. Sci.* 6: 119–181. 1983

(Fronds antiinflammatory. Rhizome used for snakebite, wounds.)

Cyathea khasyana Domin (*Alsophila khasyana* Moore ex Kuhn; *Cyathea khasyana* (Moore ex Kuhn) Domin)

India. Eaten

See *Linnaea* 36. 154. 1869 and *Pteridophyta* 262. 1929

(Tonic, astringent.)

Cyathea manniana Hook. (*Alsophila manniana* (Hook.) R.M. Tryon;

Cyathea engleri Hieron. ex Brause; *Cyathea laurentiorum* H. Christ; *Cyathea manniana* var. *preussii* (Diels) Tardieu; *Cyathea preussii* Diels; *Cyathea sellae* Pirota; *Cyathea usambarensis* Hieron. ex Brause)

Guinea, Tanzania. Tree fern, woody stem dark brown to purple, trunk very dark brown with short thick prickles, frond bases spiny and persistent, leaves used for thatching houses, in swampy area, on stream and riverbanks

See *Mémoires de l'Académie Royale des Sciences* 5: 416. 1793, *Prodromus Florae Novae Hollandiae* 158. 1810, *Synopsis Filicum* (Hooker & Baker) 21. 1865 and *Annali di Botanica* 7: 173. 1908, *Contributions from the Gray Herbarium of Harvard University* 200: 30. 1970

(Anthelmintic, oxytotic. Excessive dosage toxic.)

in English: tree-fern

in Congo: cikanganyambwe, cishembegere, ekivale, kisémbekéle

in Tanzania: ikaku, isasauu, lisilu

Cyathea medullaris (Forst.f.) Swartz

New Zealand. Tree fern, hexagonal scars on the trunk, black stems of the fronds, trunk and stems edible

See *Journal für die Botanik* 2: 94. 1802

(Reported to be toxic. Gum chewed as a vermifuge and astringent for diarrhea. Fronds slimy tissue to treat wounds, cuts and sores; young fronds for poulticing inflamed breasts. Veterinary medicine, fronds slimy tissue to treat saddle sores on horses.)

in English: black tree fern

Maori name: mamaku

Cyathea nilgirensis Holttum (*Alsophila nilgirensis* (Holttum) R.M. Tryon; *Alsophila nilgirensis* (Holttum) B.K. Nayar & S. Kaur)

India. Tree, crown of fronds at the top of the trunk, trunk densely clothed with scars of fallen leaves, eaten

See *Kew Bull.* 19: 468. 1965. 1965, *Contr. Gray Herb.* 200: 32. 1970, *Companion Beddome's Handb. Ferns Brit. India* 6. 1974. 1974, *Indian Fern J.* 9: 113–118. 1992, V.S. Manickam and V. Irudayaraj, *Pteridophyte Flora of the Western Ghats - South India.* 160. New Delhi, 1992

(For skin diseases. Ceremonial, used for decorating temples during festivals.)

in India: kalyana thevai, neer pana, pana edaval

Cyathea phalerata Mart. (*Trichipteris phalerata* (Mart.) Barrington)

South America.

See *Denkschriften der Bayer. Botanischen Gesellschaft in Regensburg* 2: 146, t. 2–3. 1822 and *Contributions from the Gray Herbarium of Harvard University* 78(813): 5. 1976, *Basic & Clinical Pharmacology & Toxicology* 103(1): 17–24. 2008

(Antioxidant and hepatoprotective.)

Cyathea spinulosa Wall. ex Hook. (*Alsophila decipiens* J. Scott ex Bedd.; *Alsophila decipiens* Fée; *Alsophila fauriei* H. Christ; *Alsophila spinulosa* (Wall. ex Hook.) R.M. Tryon; *Alsophila spinulosa* (Hook.) R.M. Tryon; *Amphicosmia decipiens* (J. Scott ex Bedd.) Bedd.; *Amphicosmia decipiens* Bedd.; *Cyathea spinulosa* Wall.; *Cyathea taiwaniana* Nakai)

India. Fern, eaten, fodder

See *Numer. List* [Wallich] n. 178. 1828, *Species Filicum* 1: 25, t. 12C. 1844, *Ferns of British India* t. 311. 1869, *Crypt. Vasc. Bresil* 2. 81 t. 103 f. 1. 1872–1873, *Supplement to the Ferns of Southern India and British India* 1. 1876 and *Bulletin de l'Herbier Boissier*, sér. 2, 1(10): 1019–1020. 1901, *Botanical*

Magazine (Tokyo) 41(483): 68. 1927, *Contributions from the Gray Herbarium of Harvard University* 200: 32. 1970, *Aspects Pl. Sci.* 6: 119–181. 1983, *J. Jap. Bot.* 64: 142–147. 1989

(Pounded leaves applied on wounds and sores.)

Cyathocline Cass. Asteraceae

From the Greek *kyathos* ‘a cup, a ladle’ and *kline* ‘bed’, referring to the receptacle or to the shape of the leaves, see *Annales des Sciences Naturelles* (Paris) 17: 419. 1829.

Cyathocline purpurea (Buch.-Ham. ex D. Don) Kuntze (*Cyathocline lyrata* Cass.; *Cyathocline purpurea* Kuntze; *Dichrocephala minutiflora* Vaniot; *Tanacetum purpureum* Buch.-Ham. ex D. Don)

Nepal. Herb

See *Species Plantarum* 2: 843–845. 1753, *Prodromus Florae Nepalensis* 181. 1825, *Annales des Sciences Naturelles, Botanique* 17: 419–420. 1829, *Archives de Botanique* 2: 517. 1833, *Revisio Generum Plantarum* 1: 333. 1891 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 12(161–162): 242–243. 1903

(Roots to relieve stomach pains. Essential oil from the plant antimicrobial, anthelmintic, hypotensive. Vapor from the mashed plant inhaled to treat headache. Fresh leaves rubbed on the forehead to relieve acute headache and migraine. Roots as fish poison; plant stuffed into holes of crabs to stupefy them.)

in India: chota-gunj, chota gunja, shigro

in Nepal: nashamran

Cyathostemma Griff. Annonaceae

Greek *kyathos* ‘cup, ladle’ and *stemma* ‘crown, garland, wreath’, alluding to the fruits; see Griffith, William (1810–1845), *Notulae ad plantas asiaticas*. Posthumous papers bequeathed to the Honorable the East India Company, and printed by order of the government of Bengal. Calcutta, 1847–1854.

Cyathostemma viridiflorum Griff.

India.

See *Not. Pl. Asiat.* 4: 707, t. 650. 1854

(Plant juice smeared on the belly as an abortifacient. Pounded leaf paste mixed with water drunk as an emmenagogue, in menstrual troubles.)

Cyathula Blume Amaranthaceae

Greek *kyathos* ‘a cup, a ladle’, *kyatheion* ‘a little cup’, referring to the calyx; see Karl Ludwig von Blume (1796–1862),

Bijdragen tot de flora van Nederlandsch Indië. 548. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 326–327. 1849 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 478–518. 1937, *Fieldiana, Bot.* 24(4): 143–174. 1946, *Fl. Madagasc.* 67: 1–51. 1954, *Ceiba* 19(1): 1–118. 1975, *Fieldiana, Bot.*, n.s. 13: 142–180. 1983.

Cyathula achyranthoides (Kunth) Moq. (*Achyranthes hirtiflora* A. Rich.; *Cyathula achyranthoides* var. *densiflora* Moq.; *Cyathula achyranthoides* var. *glabrescens* Moq.; *Cyathula geminata* Moq.; *Cyathula prostrata* var. *achyranthoides* (Kunth) Kuntze; *Desmochaeta achyranthoides* Kunth; *Desmochaeta densiflora* Kunth; *Desmochaeta uncinata* Roem. & Schult.; *Pupalia densiflora* Mart.)

Peru.

See *Nova Genera et Species Plantarum* (quarto ed.) 2(7): 210–211. 1817[1818], *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 326–327. 1849, *Revisio Generum Plantarum* 2: 542. 1891

(Leaves used to stop bleeding.)

in Panama: cuilimaleguit

Cyathula capitata Moq. (*Cyathula capitata* Thwaites, nom. illeg.)

India. Leaves fodder for goats and sheep

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 329. 1849, *Enumeratio Plantarum Zeylaniae* 249. 1861

(Powder from the roots to cure boils.)

in China: tou hua bei xian

in India: sirla

Cyathula cylindrica Moq. (*Achyranthes cylindrica* Bojer; *Pupalia alopecurus* Fenzl ex Drege)

Tropical Africa.

See *Species Plantarum* 1: 204–205. 1753, *Annales du muséum national d'histoire naturelle* 2: 132. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 328. 1849

(Leaves anthelmintic, astringent, pain reliever, for diarrhea, dysentery. Roots decoction purgative, emetic, taken for malaria.)

in Kenya: ng'atumyat

Cyathula orthacantha Schinz

Tanzania. An annual herb, a troublesome weed, erect and many-branched, stem and branches coarse, hairy swollen nodes, flowers greenish-red at the end of branches or terminal on the main stem each bearing a spike of stalkless flowers in spherical groups, tiny flowers with stiff papery sepals, tiny spiny capsules, plant used for fodder, tender leaves used as vegetable, in grassland with *Acacia* scrub, near rivers and watercourses

See *Nat. Pflanzenfam.* [Engler & Prantl] iii. 1a. (1893) 108. 1893

(Roots pounded, soaked in warm water and drunk to treat stomachache. Leaves dried and pounded, mixed with pounded castor oil seeds and the powder applied on wounds twice a day.)

in Tanzania: ilamata, muhuhuoi, muila-ngoto, namata, somwambisi

Cyathula polycephala Baker

Tropical Africa. Hairy herb, shrubby, creeping, woody-based, twining, erect, scrambling, sticky flowers, silvery white globose inflorescence, eaten by cattle

See *Bulletin of Miscellaneous Information Kew* 1897: 278. 1897 and *Journal of Ethnopharmacology* 108: 332–339. 2007, *Journal of Ethnopharmacology* 112: 55–70. 2007

(An antidote to food poisoning, roots boiled and water drunk; roots decoction to cure malaria. Veterinary medicine.)

in Kenya: gwatang'ondu, marmatha

in Tanzania: enekidong'o, nepagidong'no

Cyathula prostrata (L.) Blume (*Achyranthes prostrata* L.; *Cyathula geminata* Moq.; *Cyathula prostrata* Blume; *Desmochaeta prostrata* (L.) DC.; *Desmochaeta prostrata* DC.; *Digera muricata* auct.; *Digera muricata* Mart.; *Digera muricata* (L.) Mart.; *Pupalia atropurpurea* Moq.; *Pupalia prostrata* (L.) Mart.; *Pupalia prostrata* Mart.; *Pupalia prostrata* R.Br.)

China. Vine, herb, weedy, stem creeping with erect branches, slender spike, fertile flowers in clusters in terminal erect racemes, fodder

See *Species Plantarum*, Editio Secunda 1: 296. 1762, *Prodr. Fl. Nov. Holland.* 417, in obs. 1810, *Catalogus plantarum horti botanici monspeliensis* 102. 1813, *Bijdragen tot de flora van Nederlandsch Indië* 10: 548–549. 1826, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 13(1): 285, 321. 1826, *Prodr.* (DC.) 13(2): 330. 1849 and *Fieldiana, Bot.* 24(4): 143–174. 1946, *Fl. Madagasc.* 67: 1–51. 1954, *Fl. Ecuador.* 28: 1–138. 1987, *J. Econ. Taxon. Bot.* 27(2): 311–316. 2003

(Used in Ayurveda. Plant juice applied externally for curing dermatitis. Vine stalk squeezed and the juice stated to terminate a pregnancy. Used in small quantities to prepare a very nutritious porridge-like preparation. Leaves anti-inflammatory, antimalarial, analgesic, anipyretic, antiviral, astringent, for dysentery, rheumatic problems. For caterpillar itch, pound the leaves and poultice. Fresh shoot ground with *Curcuma longa* powder and made into a paste with white yolk of hen's egg, the paste spread on clean cloth and cloth wrapped around the joints to get rid of sprain or arthritis problems. Root decoction abortifacient, astringent; a decoction drunk to treat chills, cough, hysteria, nervous breakdown. Veterinary medicine, sap from the leaves of *Cyathula*

prostrata, mixed with leaves of *Adenostemma lavenia*, applied as a drop to treat eye infections of chicken. Magic, ritual, taking bath using water to which pieces of roots are added is supposed to ward off evil spirits.)

in English: cyathula, love charm herb

in China: bei xian

in India: apamarga, apamargah, bhuyiaghaada, cerukatalati, cherukadalaadi, cherukadalaadi pacha, cirukatalati, civappu nayuruvi, cuvannakatalati, diashingkong, fatnagmug, hili-jhar, kadalaavanakkin veru, kallu cheera, katalati, kodaladi, kririmulloi kaadantu, lal cicimda, lal circita, luyakara, nela uttharaani, raktapamargah, scheru-cadelari

in Indonesia: udu kedapet

Malay names: jarang-jarang, menjarang, nyarang, penjarang ayam

in Papua New Guinea: kinjin

***Cyathula schimperiana* Moq.**

East Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 328. 1849

(Leaves and roots decoction taken for malaria, diarrhea, fungal infections.)

in Kenya: namgwet

***Cyathula tomentosa* (Roth) Moq.** (*Achyranthes tomentosa* Roth; *Cyathula tomentosa* Moq.)

China.

See *Species Plantarum* 1: 204–205. 1753, *Nov. Sp. Ind.* 167. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 327. 1849

(Root paste applied on the forehead for fever; root juice given for fever, peptic ulcer. Roots as fish poison.)

in China: rong mao bei xian

in India: kabonapi-tusombi

in Nepal: aule kuro, aulo ghans, aulo kuro, bhere kuro

***Cyathula uncinulata* (Schr.) Schinz** (*Achyranthes uncinulata* Schrad.; *Cyathula globulifera* Moq.; *Cyathula polycephala* sensu Hauman, non Baker; *Cyathula sphaerocephala* Baker; *Cyathula uncinulata* (Schr.) Schinz var. *pleiocephala* Suess.; *Desmochaeta uncinulata* (Schr.) Hiern; *Desmochaeta uncinulata* Hiern)

South Africa.

See *Species Plantarum* 1: 204–205. 1753, *Index Seminum [Goettingen]* 1833 and *Plantae Bequaertianae* 5: 386. 1932, *Journal of Ethnopharmacology* 97: 421–427. 2005

(Leaves for skin diseases; squeezed or boiled to stop menstruation. Roots for fertility, to promote conception; roots

decoction emetic. Veterinary medicine, latogenic; pounded leaves for paralyzed legs.)

in English: globe cyathula

in Burundi: ikiramata

in Congo: buweke, igguwato, igifashi, igwarha, igwarha lihume, kihatabuli, kimbenene

in Ethiopia: begid zemedie, matane

in Madagascar: tangogo, tangongo

in Rwanda: igifashi

in Southern Africa: klits, rondeklits, wolbossie; bohome (Sotho); maime (Pedi)

in Tanzania: irimata, mtulula

Cycas L. Cycadaceae

The Greek name for a kind of palm, *kykas*, *koikas*, *koix*; see Carl Linnaeus, *Species Plantarum*. 2: 1188. 1753 and *Bull. Soc. Linn. Normandie* sér. 7, 3: 325–356. 1921, *Fieldiana, Bot.* 24(1): 11–20. 1958, *Fl. Madagasc.* 17: 3–6. 1972, *Mem. New York Bot. Gard.* 57: 200–206. 1990, *Austral. Syst. Bot.* 7(6): 531. 1994, *Acta Phytotax. Sin.* 32(6): 544. 1994, *Telopea* 7(1): 16, 26, 29, 42, 55. 1996, *Cycads in China* (eds. F.X. Wang & H.B. Liang): 26–28. 1996, *Blumea* 43(2): 351–400. 1998, *Palms & Cycads* 63: 10–15. 1999, *Telopea* 12(1): 81, 124. 2008. Apparently, all species are toxic.

***Cycas media* R. Br.**

Papua New Guinea, Australia. Dry savanna forests

See *Prodromus Florae Novae Hollandiae* 348. 1810

(On ingestion, seeds poisonous, emetic, cathartic. Toxic to cattle, horses and sheep.)

***Cycas pectinata* Buch.-Ham.** (*Cycas circinalis* L. var. *pectinata* (Buch.-Ham.) J. Schust.; *Cycas circinalis* var. *pectinata* (Griff.) Schuster; *Cycas dilatata* Griff.; *Cycas jenkinsiana* Griff.; *Cycas pectinata* Griff., nom. inval.; *Cycas wallichii* Miq.)

India, Bangladesh. Palm-like treelet, evergreen, columnar trunk

See *Species Plantarum* 2: 1188. 1753, *Memoirs of the Wernerian Natural History Society* 5: 322–323. 1824, *Notulae ad Plantas Asiaticas* 10, pl. 360, f. 3. 1854 and *Das Pflanzenreich* 99, 4(1): 68. 1932

(Used for the treatment of skin complaints, wounds, ulcers, sores, boils, asthma; female cone juice taken for piles. Pounded stem used as a hair-wash for diseased hair roots.)

in China: bi chi su tie

in India: akphol, akphola (microsporophylls), nagmoni (female cone)

Cycas revoluta Thunb.

China, Japan. Palm-like evergreen shrub

See *Verhandelingen uitgegeeven door de hollandsche maatschappij der wetenschappen, te Haarlem* 20(2): 424, 426–427. 1782

(Used in Sidha. Fleshy seeds, leaves, unprocessed flour from stem pith are dangerous, toxic if large quantities eaten. Seeds poisonous, this plant causes toxicity in sheep and cattle. Bark boiled in water used to wash burns.)

in English: sago cycad, sago palm

in Bangladesh: mraug-bra-saphen

in China: feng wei chiao (= phoenix-tail plantain), feng wei jiao ye, wu lou tzu

in India: bettada goddeechalu, bettada madana masthi, kamecuvaram, madhana kameswara, matanakamam, matanakamecuram, paiingi, sallaipanai

in Japan: sotetsu

Malay name: saikas

in Okinawa: sutichi

in Philippines: oliva

Cycas rumphii Miq.

India, Sri Lanka. Dioecious palm-like tree, leaves in a dense terminal whorl, flowers united in a cone, female cone terminal with numerous carpophylls, seeds orange, boiled or roasted seeds eaten, youngest leaves eaten as vegetable

See *Bulletin des Sciences Physiques et Naturelles en Néerlande* 2: 45. 1839 and Fu Shu-hsia, Cheng Wan-chün, Fu Li-kuo & Chen Chia-jui. *Cycadaceae*. In: Cheng Wan-chün & Fu Li-kuo, eds., *Fl. Reipubl. Popularis Sin.* 7: 4–17. 1978

(The pollen strongly narcotic. Fresh seeds said to be toxic, poisonous. A paste of *Cycas* seeds and coconut oil used for the treatment of skin complaints, wounds, ulcers, sores and boils; a poultice of the seeds and bark used to cure sores, skin complaints and stomachache. Leaves kept near the bed of the patient.)

in Burma: mong-tain

in India: ameene, chatale, godduichalu, godduyicalu, hu-a-voh, kama, paiyindu, ranaguvva, ranaguvvi, rosaimaro, tivan, tutappana, turiella, vidari bheda

in Indonesia: pakis haji, pakis raja

in Malaysia: bogak, paku gajah, paku laut

in Philippines: bait, pitogo, sauang

in Sarawak: paku laut

in Thailand: maphrao-sida, prong, prong-tha-le

in Vietnam: thiên túê

Cycas siamensis Miq.

Thailand. Dioecious palm-like tree, leaves pinnately compound, female cones terminal crowded, seeds yellow to orange

See *Botanische Zeitung. Berlin* 21: 334. 1863

(Used for the treatment of skin complaints, wounds, ulcers, sores, and boils.)

in Cambodia: prâng'

in Laos: ph'aawz kh'ôôk

in Thailand: prong-liam, prong-pa, talapat-ruesi

in Vietnam: thiên tuê xiêm

Cycas thouarsii Gaudich. (*Cycas circinalis* L.; *Cycas circinalis* Roxb.; *Cycas circinalis* fo. *madagascariensis*; *Cycas circinalis* subsp. *madagascariensis* (Miq.) J. Schust.; *Cycas thouarsii* R. Br. ex DC.; *Cycas thouarsii* R. Br.)

Madagascar, India. Monopodial dioecious tree, male flowers united in a cone, globose naked seeds, starch in the seeds and in the pith of the trunk edible after washed with water

See *Hort. Malab.* 3: t. 19. 1682, *Species Plantarum* 2: 1188. 1753, *Prodromus Florae Novae Hollandiae* 347. 1810, *Hort. Bengal.* 71. 1814, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 434. 1826[1829], *Bulletin de la Société Botanique de France* 35: 246. 1888 and *Die Pflanzenwelt Ost-Afrikas* 2: 82. 1908, *Bull. Soc. Linn. Normandie sér. 7, 3*: 325–356. 1921, *Fl. Madagasc.* 17: 3–6. 1972, *Fontqueria* 14: 37–44. 1987, *Regnum Veg.* 127: 40. 1993, *Cytologia* 60: 141–147. 1995, *Bot. J. Linn. Soc.* 120: 51–55. 1996, *Blumea* 43: 351–400. 1998, *Palms & Cycads* 63: 10–15. 1999, *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* no. 34: 141–144. 2001, *Novon* 12(2): 238–240. 2002

(Used in Ayurveda and Sidha. Seeds of *Cycas circinalis* poisonous, cyanogenic, antifungal, antibacterial. Seeds scraped and applied to topical ulcers, sores. Male cones emitting offensive smell used to prevent the entry of mosquitoes and other insects into houses, dwellings, cowsheds. Root paste applied for rheumatoid arthritis and also taken orally. Seeds crushed and used for poisoning fish.)

in English: common pitogo, cycad, fern palm, killer of bugs, Madagascar cycad, queen sago, sago palm

in Pacific: cycad, fadang, federico

in India: amdesa mota, araguna, arguna, cannincai, cavvu, cimaiyiccan, cimaiyincu, civi, dzavvubiyamu, easanga, eenthakay, eenthapana, eenthi, entha, esalu, goddeechalu, goddu eechalu, godduichalu, godduyicalu, hintalah, icala, ichal, indalapanai, inta, intalappana, intapanai, intha,

intimpoti, intinpana, intu, isala, jangli-madan-must-ka-phul, jangil, jungli-madan-mast ka phul, kalanga, kalapadara, kalarei, kalla, kallangam, kallari, kama, kama-maram, kamakshi, kamam, kamamaram, kamappu, kattentha, kattumano rancitam, kattumanorancitam, kayapperincu, kodi icham, kodiicham, kotiyiccan, kotiyicu, madana kamakshi, madana-kamampu, madana-kameshurappu, madana mastu, madanagama, madanakama, madanakamakshi, madanaka-mapu, madanakamappu, madanmastka-phullchal, madhana kama poo, malabari-supari, mandanemastu, mandeechalu, matana kamappu, matana-kamcsvarappu, matanakamam, matanakamappu, matanakameccuram, matanakameccuramaram, matanakameccuram, matanakameccurappu, matanakameccuvaram, matanakamiyappu, matanamastu, matanappu, matanapputu, mundicalu, mundichalu, mundisalu, odis-hamaari, pairiyita, panum, perita, periyita, peruvita, rana guvva, ranaguvva, rinbadam, savala, show arisee, tanaguva kamakshi, tatappanai, todda-panna, toddapana, toddapanna, tutappana, urai, urampu, uranbu, uranpu, varugudu, varaguna, velakkailati, vidari, waragudu, yechala

in Japan: Jawa-sotetu

in Papua New Guinea: hatoro, ketare, lou, mahita, tupeh, vatoro, watolo

Cyclamen L. Primulaceae

The Greek names *kyklaminos*, *kyklaminon* used by Dioscorides and Theophrastus, possibly from *kyklos* 'circle, round, ring, circular, globe', referring to the shape of the leaf or to the rounded tubers; Hebrew *galgal* 'wheel, whirl wind', *gilgal* 'wheel', *galal* 'to roll, to turn, to drive away', Akkadian *qullum* 'a big ring', *kululu*, *kililum* 'circle, crown', *gulgullum* 'skull', Aramaic *gulgulta* 'skull', Latin *cyclaminos*, *cyclaminon* (Plinius) for the plant sowbread; see *Species Plantarum* 1: 145. 1753, *Historia Stirpium Indigenarum Helvetiae Inchoata* 1: 281. 1768.

Cyclamen persicum Mill. (*Cyclamen persicum* Sibth. & Sm.; *Cyclaminus persica* (Mill.) Asch.)

Cosmopolitan. Tuberos, perennial herb

See *The Gardeners Dictionary*: ... eighth edition no. 3, 5. 1768, *Fl. Graec. Prodr.* 1(1): 128. 1806, *Berichte der Deutschen Botanischen Gesellschaft* 10: 235. 1892 and Spoerke, D.G., Spoerke, S.E., Hall, A., Rumack, B.H. "Toxicity of *Cyclamen persicum* (Mill)." *Vet. Hum. Toxicol.*, 29: 250–251. 1987, *Japanese Journal of Breeding* 42: 353–366. 1992, *Candollea* 48(1): 221–230. 1993, *Journal of the Japanese Society for Horticultural Science* 1996: 883–889. 1996, *Bocconea, Monographiae Herbarii Mediterranei Panormitani* 11: 117–169. 1999

(A toxic triterpenoid saponin, cyclamin, in the bitter tuberos rhizomes, toxic if large quantities eaten; suspected of causing skin irritation following handling. Roots as fish poison.)

in English: cyclamen, florist's cyclamen, Persian violet, sowbread

in China: xian ke lai

in Italian: pan porcino, ciclamino

Cyclea Arn. ex Wight Menispermaceae

From the Greek *kyklos* 'circle', referring to the seeds, see *Illustrations of Indian Botany* 1: 22. 1840.

Cyclea barbata Miers (*Cyclea ciliata* Craib; *Cyclea wallichii* Diels)

China, Thailand. Liana

See *Ann. Mag. Nat. Hist.*, ser. 3, 18(103): 19, 1866, *Contributions to botany, iconographic and descriptive* 3: 237. 1871 and *Das Pflanzenreich* 46(IV.94): 314–315. 1910, *Bulletin of Miscellaneous Information Kew* 230(8): 230–231. 1922

(Heart poison alkaloid. To cure any cancerous tissue, wounds, swellings, cuts, bowel complaints. Rootstock febrifuge, stomachic.)

in China: mao ye lun huan teng

in Indonesia: tjintjau

Cyclea bicristata Diels (*Cyclea bicristata* Griff.)

India. Climber, pubescent branchlets, coriaceous leaves, slender fascicled panicles, globose lobed calyx, subglobose drupes

See *Das Pflanzenreich* (Engler) Menispermac. IV, 94: 317. 1910

(Roots ground and the paste taken for stomachache and ulcers; bitter root bark chewed for dysentery and gas troubles. Crushed leaves applied to stop bleeding from cuts.)

in India: kwai ial awlaw, likazung, renriang

Cyclea burmanni Arn. ex Wight (*Cyclea burmanni* Miers)

India.

See *Illustrationes plantarum orientalium* 1: 22. 1842, *Annals and Magazine of Natural History* II, 7: 40. 1851

(Used in Ayurveda and Sidha.)

in India: padavaliballi, pahadvel, pata, patakilannu, patakitanu, patha, tipale

Cyclea laxiflora Miers

SE Asia.

See *Contributions to botany, iconographic and descriptive* 3: 241. 1871

(For worms in children, bruise the leaves in cold water and foment; for piles, boil the root and stem, and drink the decoction; root decoction as a postpartum remedy and for asthma.)

Malay names: akar pahit, daun metimun tikus, daun nerong keman, terong kemang

Cyclea peltata Hook. f. & Thomson (*Cyclea peltata* Diels; *Cyclea peltata* (Lam.) Hook.f. & Thomson)

India. Shrub, twining herbs, pale yellow flowers in axillary panicles, white subglobose drupes

See *Flora Indica* or Descriptions of Indian plants [Hooker f. & Thomson] 1: 201. 1855 and *Pflanzenr.* (Engler) *Menispermac.* 312. 1910

(Used in Ayurveda and Sidha. Leaves crushed made into a paste and taken for whooping cough; leaf juice taken in stomach disorders; leaves and roots for skin diseases. Crushed or sliced tuberous roots taken along with a little salt for stomach pain; tuber paste applied against wound infections; root paste for intestinal disorders, stomachache and dysentery, applied on the back for backache; raw roots chewed and the juice ingested to relieve from severe stomach pain.)

in India: akaisika, amari, ambastha, ambasthaki, ananta, anda, anuvallika, asitalata, avidhkarni, bahucirya, bhargavi, bhutahantri, chane un, chaneun, dhurta, dhurva, durmara, durva, emos, gauri, guna, haade balli, harasalika, harita, haritali, jaya, kachharuha, kalakodi, kariya batale, kuchaila, mahaushadi, mahavari, malaitanki, malathi, mangala, niladurva, paada kizhangu, paadaavala balli, paadvaela, paatathige, pada-kelengu, pada kilangu, padai, padaki-zhangu, padakkilangu, padala, paduvala balli, pahadvel, pankampalai, papchalika, para, patakkilanku, patakkilannu, patatige, patavalli, patchi, path, patha, pathi, phalani, piluphala, ponmucuttai, pracena, pratanika, ruha, saddala, sahsravirya, saumya, sehastravirya, shadvala, shambhavi, shanta, shashpa, shatagranthi, shataparva, shataparvika, shatavalli, shatmula, shita, shitakumbhi, shitala, shiva, shiveshta, shyama, tiktaparva, trisira, trivrtta, vamini, varikam, vartiktha, vattattiruppi, vijaya, vrkki, vrttaparni

Cyclea polypetala Dunn (*Cyclea hainanensis* Merrill)

China.

See *J. Linn. Soc. Bot.* 35: 485. 1903 [1901–1904 publ. 1903], *Philipp. J. Sci.* 23: 240. 1923

(Roots containing disochonchrodendrine and 1-curine, the latter being effective in relaxing muscles.)

in China: tie teng

Cyclobalanopsis Oersted Fagaceae

From the Greek *kyklos* ‘circle’ plus *balanos* ‘acorn’ and *opsis* ‘resembling’, see *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1866: 77. 1867.

Cyclobalanopsis glaucoides Schottky (*Quercus glaucoides* (Schottky) Koidz., nom. illeg.; *Quercus glaucoides* M. Martens & Galeotti; *Quercus schottkyana* Rehder & E.H. Wilson)

China.

See *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 209. 1843 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 47(5): 657, in adnot. 1912, *Plantae Wilsonianae* 3(2): 237. 1916, *Botanical Magazine* 30(353): 200. 1916

(Worshipped, magic.)

in China: dian qing gang, wu bai zai

Cyclocarya Iljinsk. Juglandaceae

From the Greek *kyklos* ‘circle, round, ring’ and *karyon* ‘nut’, see *Annales des Sciences Naturelles* (Paris) 2: 345. 1824.

Cyclocarya paliurus (Batalin) Iljinsk. (*Cyclocarya paliurus* var. *micropaliurus* (Tsoong) P.S. Hsu, X.Z. Feng & L.G. Xu; *Pterocarya micropaliurus* Tsoong; *Pterocarya paliurus* Batalin)

China.

See *Trudy Imp. S.-Peterburgsk. Bot. Sada* 13: 101. 1893 and *Contributions from the Institute of Botany, National Academy of Peiping* 4: 134, pl. 12. 1936, *Trudy Bot. Inst. Acad. Nauk SSSR, Ser. 1, Fl. Sist. Vyssh. Rast.* 10: 115. 1953, Kuang Ko-zen & Lu An-ming. *Juglandaceae*. In: Kuang Ko-zen & Li Pei-chun, eds., *Fl. Reipubl. Popularis Sin.* 21: 6–44. 1979, *Guihaia* 18(4): 322. 1998, *Bioscience, Biotechnology, and Biochemistry* 67(4): 877–880. 2003, *Biological & Pharmaceutical Bulletin* 26(3): 383–385. 2003, *J. Asian Nat. Prod. Res.* 8(1–2): 93–98. 2006, *Planta Med.* 74(3): 287–289. 2008

(Astringent, hypoglycaemic, hypolipemic. Triterpenoid glycosides from the leaves. Alpha-glucosidase and glycogen phosphorylase inhibitory activities, from the leaves.)

in China: qing qian liu, qing qian liu shu

Cyclolepis Gillies ex D. Don Asteraceae

From the Greek *kyklos* ‘circle, round, ring’ and *lepis* ‘scale’.

Cyclolepis genistoides D. Don (*Gochnatia genistoides* (D. Don) Hook. & Arn.)

Chile.

See *Nova Genera et Species Plantarum* (folio ed.) 4: 15–16. 1820[1818], *Philosophical magazine*, or annals of chemistry, ... 11: 392. 1832, *Ann. Sci. Nat., Bot. sér. 2, 1*: 203. 1834, *Companion to the Botanical Magazine* 1: 109. 1835

(Antiseptic.)

in Argentina: matorro negro, palo azul

Cycloloma Moq. Chenopodiaceae (Amaranthaceae)

Greek *kyklos* ‘circle, round, ring’ and *loma* ‘border, margin’, referring to the calyx, winged in fruit; see *Species Plantarum* 1: 222–223. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 2, 1: 203–206, pl. 9, f. A. 1834, Christian Horace Bénédict Alfred Moquin-Tandon (1804–1863), *Chenopodearum monographica enumeratio*. 17. Parisiis 1840.

Cycloloma atriplicifolium (Roth) J. Coulter (*Amorea platyphylla* (Michx.) Delile; *Cyclolepis platyphylla* (Michx.) Moq.; *Cycloloma atriplicifolium* (Spreng.) J.M. Coult.; *Cycloloma platyphylla* (Michx.) Moq.; *Cycloloma platyphyllum* (Michx.) Moq.; *Kochia atriplicifolia* Spreng.; *Kochia platyphylla* (Michx.) Schult.; *Salsola atriplicifolia* Spreng.; *Salsola platyphylla* Michx.)

North America. Annual herb

See *Flora Boreali-Americana* 1: 174–175. 1803, *Systema vegetabilium* 6: 274. 1820, *Annales des Sciences Naturelles; Botanique*, sér. 2, 1: 203. 1834, *Chenopodearum Monographica Enumeratio* 18. 1840 and *Taxon* 31: 120–126. 1982

(Analgesic, febrifuge, antirheumatic.)

in English: tumbleweed, winged pigweed

Cyclopia Vent. Fabaceae (Podalyriaceae)

Perhaps from the Greek *kyklos* ‘circle, round, ring’ and *ops, opos* ‘an eye’, alluding to a blotch on the standard, according to Stearn from *kyklos* and *pous* ‘foot’, referring to the circular base of the calyx; Latin Cyclops and Greek Kyklops for the Cyclopes of mythology, a race of giants, said to have each but one eye.

Cyclopia genistoides (L.) Vent. (*Cyclopia genistoides* Vent.; *Cyclopia genistoides* R. Br.; *Cyclopia genistoides* Sieber ex C. Presl)

South Africa. Perennial non-climbing shrub, many-branched, woody, short needle-like leaves, golden yellow stems, sweetly scented yellow pea flowers

See *Decas Generum Novorum* 9. 1808, *Hortus Kewensis*; or, a catalogue ... The second edition 3: 5. 1811 and *Bothalia* 6: 161–176. 1951

(Honeybush tea tonic, lactogenic, stimulant, to promote good health and the milk flow of lactating mothers.)

in English: honeybush tea

in South Africa: heuningbos

Cyclorhiza M.L. Sheh & R.H. Shan Apiaceae (Umbelliferae)

From the Greek *kyklos* ‘circle, ring’ and *rhiza* ‘a root’, see *Acta Phytotaxonomica Sinica* 18: 45. Feb. 1980, *China J. Pl. Resources & Environm.* 4(3): 1–8. 1995.

Cyclorhiza peucedanifolia (Franchet) Constance (*Acronema edosmioides* (H. Boissieu) Pimenov & Kljuykov; *Arracacia peucedanifolia* Franchet; *Cenolophium chinense* M. Hiroe; *Cyclorhiza edosmioides* (H. Boissieu) M.L. Sheh; *Cyclorhiza major* (M.L. Sheh & R.H. Shan) M.L. Sheh; *Cyclorhiza waltonii* var. *major* M.L. Sheh & R.H. Shan; *Pimpinella edosmioides* H. Boissieu)

China.

See *Species Plantarum* 1: 263–264. 1753, *Good Book* 52. 1840 and *Bulletin de la Société Botanique de France* 56: 352. 1909, *Acta Phytotax. Sin.* 18(1): 45–47. 1980, *Flora Reipublicae Popularis Sinicae* 55(3): 236, pl. 105. 1992, *Flora Yunnanica* 7: 451. 1997, *Edinburgh Journal of Botany* 54(1): 101. 1997, *Feddes Repertorium* 110(1999) 7–8: 481–482. 1999

(Emetic.)

in China: nan zhu ye huan gen qin

Cyclorhiza waltonii (H. Wolff) M.L. Sheh & R.H. Shan (*Ligusticum waltonii* H. Wolff)

China.

See *Species Plantarum* 1: 250. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 317–318. 1930, *Acta Phytotax. Sin.* 18(1): 46, pl. 1. 1980

(Stomachic.)

in China: huan gen qin

Cyclosorus Link Thelypteridaceae

From the Greek *kyklos* ‘circle, ring’ and *soros* ‘a heap, mound, a spore case’; see *Genera Plantarum* 2: 757. 1791, *Enumeratio Plantarum Javae* 2: 172–173. 1828, Johann Heinrich Friedrich Link, *Hortus Regius Botanicus Berolinensis*. 2: 128. 1833, *Tentamen Pteridographiae* 181–183, pl. 7, f. 9–11. 1836, *Genera Filicum* t. 24. 1842, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 51–52. 1842, *Botanische Zeitung*. Berlin 6: 114–115. 1848, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 618–619. 1851, *Mémoires sur les Familles des Fougères* 3: 309–310. 1852, *Gardener’s Chronicle & Agricultural Gazette* 1855: 854. 1855, Mettenius, Georg Heinrich (1823–1866), *Filices Lechlerianae*, Chilenses ac Peruanae / auctore G. Mettenius. Lipsiae: L. Voss, 1856–1859 [Lechler, Willibald, 1814–1856], *Index Filicum* lxxxvii. 1857, *Histoire des Fougères et des Lycopodiacees des Antilles* 58. 1866, *Cryptogames Vasculaires ... du Brésil* 2: 40. 1873,

Hist. Fil. 191. 1875, *Die Natürlichen Pflanzenfamilien* 1(4): 177. 1894, *Die Farnkräuter der Erde* 269. 1897 and *Index Filicum* xxi, 250. 1906, *Flore du Kouy-Tchéou* 472, 475. 1915, *Botanical Magazine* 47(555): 179. 1933, *Journal of the Washington Academy of Sciences* 48: 234. 1958, *Flore de Madagascar et des Comores* 5(9): 270–301. 1958, *American Fern Journal* 51: 31. 1961, *Acta Phytotaxonomica et Geobotanica* 19(1): 8. 1961, *Acta Phytotaxonomica Sinica* 8(4): 320, 322–324. 1963, *American Fern Journal* 53(4): 153–154. 1963, *Phytologia* 17(4): 254. 1968, *Adansonia: recueil périodique d'observations botanique*, n.s. 11: 720. 1971, *Taxon* 20: 534. 1971, *Blumea* 19(1): 29, 34, 45–46, f. 19, 19a. 1971, *Fern Gaz.* 11(2–3): 141–162. 1975, *Fieldiana: Botany*, New Series 6: 1–522. 1981, *Flora of Ecuador* 18: 1–148. 1983, *Memoirs of the New York Botanical Garden* 46: 1–568. 1988, *Memoirs of the New York Botanical Garden* 88: 1–1054. 2004 [*The Pteridophytes of Mexico*].

Cyclosorus aridus (D. Don) Ching (*Aspidium aridum* D. Don; *Christella arida* (D. Don) Holttum; *Christella arida* (D. Don) Holttum ex C.M. Kuo; *Cyclosorus aridus* (D. Nepal. Fern, stipes slightly pubescent, sori in rows, young shoots used as vegetable

See *Prodromus Florae Nepalensis* 4. 1825, *J. Bot.* (Hooker) 1: 188. 1841, *Handb. Ferns Brit. India* 272, t. 138. 1883, *Revisio Generum Plantarum* 2: 812. 1891 and *Bulletin of the Fan Memorial Institute of Biology: Botany* 8(4): 194–196. 1938, *Acta Phytotaxonomica et Geobotanica* 7: 78. 1938, *American Fern Journal* 49(3): 113. 1959, *Companion Beddome's Handb. Ferns Brit. India* 206. 1974, *Flora of Taiwan* 1: 404. 1975

(Leaves crushed and used to massage the stomach to treat stomachache and diarrhea. Leaf sap for cuts, sores.)

in India: han-dung-kek

in Papua New Guinea: walilikei, wawa

Cyclosorus callosus (Blume) Ching (*Aspidium callosum* Blume)

India.

See *Enum. Pl. Javae* 2: 152. 1828 and *Bull. Fan Mem. Inst. Biol. Bot.* 10: 243. 1941

(Ground leaves as fish poison. Veterinary medicine, ground leaves used to drive out insects in poultry.)

in India: maachitong

Cyclosorus crinipes (Hook.) Ching (*Christella crinipes* (Hook.) Holttum; *Dryopteris crinipes* (Hook.) Kuntze; *Nephrodium crinipes* Hook.; *Thelypteris crinipes* (Hook.) K. Iwats.)

China.

See *Species Filicum* 4: 71. 1862, *Revisio Generum Plantarum* 2: 812. 1891 and *Bulletin of the Fan Memorial Institute of Biology: Botany* 8(4): 179–180. 1938, *Journal of Japanese Botany* 38(10): 315. 1963, *Companion Beddome's Ferns Brit. India* 208. 1974

(Antibacterial.)

Cyclosorus dentatus (Forssk.) Ching (*Aspidium molle* Sw.; *Aspidium violascens* Link; *Christella dentata* (Forssk.) Brownsey & Jermy; *Christella dentata* (Forssk.) Holttum, nom. illeg., non *Christella dentata* (Forssk.) Brownsey & Jermy; *Cyclosorus dentatus* var. *violascens* (Link) Abbiatti; *Dryopteris dentata* (Forssk.) C. (Used in Ayurveda.)

in English: fir-leaved celery, lawn celery, slender celery, wild celery

in South Africa: wilde seldery

in China: xi ye han qin

in India: ajamoda

Cycniopsis Engl. Scrophulariaceae (Orobanchaceae)

Resembling the Greek *kyknos* 'a swan', resembling *Cycnium*.

Cycniopsis humifusa Engl. (*Cycnium humifusum* (Forssk.) Benth.; *Cycnium humifusum* Benth. & Hook. f., nom. illeg.; *Cycnium humifusum* Engl.; *Rhamphicarpa humilis* Hochst. ex Benth.; *Striga humifusa* (Forssk.) Benth.; *Striga humilis* Hochst., nom. nud.)

East Africa.

See *Companion to the Botanical Magazine* 1: 362. 1835, *Flora* 27: 101. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 504. 1846, *Genera Plantarum* 2: 969. 1876 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 233. 1905

(Veterinary medicine, hepatitis.)

in Ethiopia: qorsa alati

Cycnium E. Meyer ex Bentham Scrophulariaceae (Orobanchaceae)

Greek *kyknos* 'a swan', possibly in reference to the corolla tube; Latin *cycnus* and *cygnus*, *i* was not only a swan, but also the son of Neptune, changed to a swan, father of Tenes.

Cycnium adonense E. Mey. ex Benth. subsp. **camporum** (Engl.) O.J. Hansen (*Cycnium adoense* Benth. & Hook.f.; *Cycnium adonense* var. *adscendens* Oliv.; *Cycnium buchneri* Engl.; *Cycnium camporum* Engl.; *Cycnium decumbens* Gand.; *Cycnium dewevrei* De Wild. & Durand; *Cycnium dewevrei* var. *minor* De Wild. & Durand; *Cycnium longiflorum* Eckl. & Zeyh., nom. nud.; *Cycnium pentheri* Gand.; *Cycnium petunoides* Hutch.; *Cycnium rectum* Gand.; *Cycnium verdickii* De Wild.)

Tanzania. Prostrate herb, straggling, leaning, creeping, spreading to erect, caespitose, woody taproot, leaves with purplish tinge, white flowers slightly fragrant, corolla white tinged and streaked with purple, corolla tube green, at forest edge, grassland, wooded grassland, transition woodland, roadsides, disturbed areas

See *Companion to the Botanical Magazine* 1: 368. 1836, *Transactions of the Linnean Society of London, Botany* 29: 122. 1875, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18: 73. 1893, *Compt. Rend. Soc. Bot. Belg.* 38: 129. 1899 and *Annales du musée du Congo. Série 1, Botanique, sér. 4, [1(3)]*: 125. 1903 [1902–1903 publ. Jan 1903], *Bulletin de la Société Botanique de France* 66: 216–217. 1919, *Bulletin of Miscellaneous Information Kew* 1921: 251. 1921, *Dansk Bot. Ark.* 32(3): 1–72. 1978

(Leaves decoction for eye problems, wounds, burns. Crushed leaves stack on a burned area.)

in English: blotting paper flower, ink plant, mushroom flower, pocket handkerchief

in East Africa: mashilitsa

in South Africa: inkblom

in Tanzania: sembesembe

Cydonia Miller Rosaceae

From the Latin *cydonia* (*cotonia*, *cotonea*), *orum* 'a quince, quince-apple', *cydonius*, *ii* 'a quince-tree'; *Cydonia* (now *Canea* or *Khania*) was a town on the northwest of Crete; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. (426). London (28 Jan.) 1754, *The Gardeners Dictionary*: ... eighth edition *Cydonia* no. 1. 1768, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 638. 1825, *Analysen zu den natürlichen Ordnungen der Gewächse* 14. 1858 and *Rep. Bot. Exch. Cl. Brit. Isles* 3: 431. 1913.

Cydonia oblonga Mill. (*Cydonia cydonia* (L.) Huth, nom. inval.; *Cydonia cydonia* (L.) H. Karst.; *Cydonia cydonia* H. Karst.; *Cydonia cydonia* Pers.; *Cydonia maliformis* Mill.; *Cydonia vulgaris* Pers., nom. nud.; *Pyrus cydonia* L.)

Cosmopolitan.

See *Species Plantarum* 1: 479–480. 1753, *Gard. Dict.*, ed. 8. n. 2. 1768, *Synopsis Plantarum* (Persoon) 2(1): 40. 1806, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* (Karsten) 783. 1882, *Helios* 11(9): 134. 1893 and *Fieldiana, Bot.* 24(4): 432–484. 1946, *Taxon* 51(2): 543. 2002

(Used in Ayurveda, Unani and Sidha. Fruits pounded into a paste and smeared over the forehead for headache; fruits cooked and eaten in heart problems.)

in English: common quince, quince

in Mexico: yaga guia castilla

in Arabic: sfarjel

in China: wen po

in India: aab-e-bihi, amrutaphala, bahi, bedana, bedana mugalai, bedana mugli, bee dana, behdana, behidana behl, bihdana, bihi, bihi taza, bihidana, bihidana mogalibedana, chaqu say qashain kia hua bihi, cimai matulai, cimaimatulai, kuvincu, lukka, petana, petanam, rub bhihi, rub bihi, rub-i-bihi, shimai-madalai-virai, shimedalimbe, simadanamma, simedalimbe

in Lepcha: sahaor paot

Cylicodiscus Harms Fabaceae (Leguminosae, Mimosaceae, Mimoseae)

From the Greek *kylix*, *kylikos* 'a cup', *kylikion*, *kylikis* 'a small cup' and *diskos* 'a disc', see *Nat. Pflanzenfam.* [Engler & Prantl] Nachtr. II-IV 1: 192, 203–204. 1897.

Cylicodiscus gabunensis Harms (*Cyrtoxiphus staudtii* Harms; *Erythrophleum gabunense* Taub.; *Erythrophleum letestui* A. Chev., nom. inval.; *Erythrophleum letestui* A. Chev. ex Baker f., nom. nud.; *Erythrophleum letestui* A. Chev., nom. inval.; *Piptadenia gabunensis* Roberty; *Piptadenia gabunensis* (Harms) Roberty)

Tropical Africa. Perennial non-climbing tree, bark strongly smelling, leaves bipinnate, trunk covered with broad short blunt spines, whitish or yellowish flowers, inflorescence an axillary or terminal spike-like false raceme, long reddish brown flattened linear dehiscent pod, papery wing surrounding the seed, foliage browsed by sheep and goats

See *Narrative of Travels and Discoveries in Northern and Central Africa* 235. 1826, *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 135. 1840, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 3 (1892) 386. 1892, *Die Natürlichen Pflanzenfamilien* 1: 192, 204. 1897 and *Vég. Utiles Afrique Trop. Franç.* ix. 182. 1917, *Bull. Inst. Franc. Afrique Noire*, Sér. A, xvi. 343. 1954, *Phytochemistry* 29(8): 2723–2725. 1990, *Phytochemistry* 29(10): 3255–3258. 1990, *Phytochemistry* 30(8): 2711–2716. 1991, *West African Journal of Pharmacology and Drug Research* 21(1): 6–12. 2005, *African Journal of Biotechnology* 5(11): 1062–1066. 2006, *Journal of Ethnopharmacology* 107(2): 175–178. 2006, *Journal of Ethnopharmacology* 111(3): 598–606. 2007

(Stem bark antimicrobial, febrifuge, astringent, antidiarrheal, antiplasmodial. Bark decoction against vomiting, venereal diseases, malaria, headache, psoriasis and rheumatism, to treat parasitic infection, stomachache, gastro-intestinal disorders. Leaves analgesic, astringent, a macerate against migraine. Bark as a fish poison.)

in English: African greenheart

in Cameroon: adoum, edoum, bokoka, boluma, loum

in Congo: monduma, muduma, n'duma

in Gabon: edoum, edum, odouma, oduma, okan

in Ghana: adada, adadua, benya, denya

in Ivory Coast: bouemon, mbuémon

in Nigeria: aja igi, anyan, arere, ekam, kendum, lisan, ode-owese, okain, okan, olisan, olosan, uzi

in Sierra Leone: deli, mbele-deli, mbele-leli

Cylindropuntia (Engelm.) F. Knuth Cactaceae

From the Greek *kylindros* 'a cylinder' plus *Opuntia*; see Curt Backeberg (1894–1966) and Frederik Marcus Knuth (1904–1970), *Kaktus-ABC*. 117, 410. Copenhagen 1935.

Cylindropuntia bigelovii (Engelm.) F.M. Knuth (*Opuntia bigelovii* Engelm.) (for the American botanist John Milton Bigelow, 1804–1878, botanical collector, U.S. Army surgeon, accompanied Lieut. A.W. Whipple's Exploring Expedition;

see E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, A.E. Waller, "Dr. John Milton Bigelow, 1804–1878, an early Ohio physician-botanist." *Pap. Dept. Bot. Ohio State Univ.* 449: 313–331. 1942, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 185. Boston 1965, Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983, Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement II: Be-Bo*. 163–164. 1993, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997.)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 3: 307. 1856 and *Kaktus-ABC* 125, 410. 1935

(The core of the root boiled in water and the tea used as a diuretic.)

in English: teddy-bear cholla

Cylista Aiton Fabaceae (Leguminosae, Phaseoleae)

From the Greek *kylio*, *kylindeo* 'to roll, roll along', *kylistos* 'rolled, twined in a circle', see *Hortus Kew.* (W. Aiton) 3: 512. 1789 and *Univ. Stud.* (Karachi) 5: 95. 1968.

Cylista scariosa Roxb. (*Paracalyx scariosus* (Roxb.) Ali) (*Paracalyx* Ali, from the Greek *para* 'beside, near' and *kalyx* 'a calyx'.)

India. Perennial climbing shrub, see also *Paracalyx scariosus*

See *Plants of the Coast of Coromandel* 1: 64. 1795 and *Univ. Stud.* (Karachi) 5: 95. 1968

(Used in Ayurveda. Roots astringent, used for dysentery and leucorrhoea.)

in India: dariyawel, kadanare, kadlenare, kamalawel, karu, karuchikkudu, karucikkudu, khotivalor, nadinishpava, ranghevada, ran-ghevdo, ranghevada, ranghevda

Cymbalaria Hill Scrophulariaceae

From the Greek *kymbalon* 'cymbal', *kymbe* 'boat', *kymbos* 'cavity', referring to the shape of the leaves or to the flowers; Latin *cymbalum*, *i* 'cymbal', *cymba* (*cumba*), *ae* 'a boat'; see *The British Herbal* 113–114. 1756, Friedrich Kasimir Medikus, in *Staatswirthschaftliche Vorlesungen der Churpfälzischen physicalisch-öconomischen Gesellschaft zu Heidelberg* etc. 230. 1791 and *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Fl. Il. Entre Ríos* 6(5): 453–504. 1979.

Cymbalaria muralis Gaertner f., Meyer & Scherb. (*Antirrhinum cymbalaria* L.; *Antirrhinum hederaceum* (L.) Lam.; *Antirrhinum hederifolium* (L.) Salisb.; *Elatine cymbalaria* (L.) Moench; *Linaria cymbalaria* (L.) Miller)

Europe. Herb, trailing, pendulous, procumbent, glabrous, light purple solitary axillary flowers with white or yellowish lip

See *Species Plantarum* 1: 367–368. 1753, *Species Plantarum* 2: 612–618. 1753, *The Gardeners Dictionary ...* Abridged ... fourth edition no. 2. 1754, *The Gardeners Dictionary: ...* eighth edition no. 17. 1768, *Flore Française* 2: 338. 1778, *Icones florae germanicae et helveticae* 525. 1794, *Prodr. Stirp. Chap. Allerton* 96. 1796, *Oekonomisch-Technische Flora der Wetterau* 2: 397. 1800, *Die Natürlichen Pflanzenfamilien* IV. 257(3b): 58. 1891 and *Fieldiana, Bot.* 24(9/4): 319–416. 1973, *Fl. Il. Entre Ríos* 6(5): 453–504. 1979, *Taxon* 28: 395–397. 1979, *Lagascalia* 17: 151–160. 1993

(Used in Ayurveda. Plant antiscorbutic, antimicrobial, liver tonic, anti diabetes and vulnerary, used externally as a poultice on fresh wounds to stop the bleeding, might be slightly toxic.)

in English: Coliseum ivy, ivy-leaf toadflax, ivy-leaved toadflax, Kenilworth ivy, mother-of-a-thousand, mother-of-thousands, Oxford ivy, Oxford weed, pennywort, wandering sailor

in India: karambha

in Italian: ciombolino comune, ederina dei muri

Cymbidium Swartz Orchidaceae

From the Greek *kymbe* ‘a boat’, *kymbos* ‘cavity’, Latin *cymba* (*cumba*), *ae* ‘a boat, skiff’, indicating the shape of the lip; see Olof Peter Swartz (1760–1818), in *Nova acta regiae societatis scientiarum upsaliensis*. 6: 70. Uppsala 1799 and David Du Puy and Phillip Cribb, *The genus Cymbidium*. London 1988.

Cymbidium aloifolium (L.) Sw. (*Aerides borassii* Buch.-Ham. ex Sm.; *Cymbidium erectum* Wight, nom. illeg.; *Cymbidium intermedium* H.G. Jones; *Cymbidium pendulum* (Roxb.) Sw.; *Cymbidium simulans* Rolfe; *Epidendrum aloides* Curtis; *Epidendrum aloifolium* L.; *Epidendrum pendulum* Roxb.)

India, Himalaya, Malesia. Epiphyte, flowers purple with yellow tinge

See *Species Plantarum* 2: 953. 1753, *Species Plantarum*, Editio Secunda 1347. 1763, *Bot. Mag.* 11: t. 387. 1797, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 6: 73. 1799 and *Reinwardtia* 9: 71. 1974, *Curr. Sci.* 49: 473–475. 1980, *Taxon* 30: 704–705. 1981, *Cell Chromosome Res.* 17(1): 40–47. 1994

(Used in Ayurveda. Plant decoction used to stop vomiting and diarrhea, to cure vertigo, paralysis. Succulent leaves warmed and the juice dropped into ear for earache. Emetic, purgative, demulcent. Aerial root juice used as ear drop for relieving pain.)

in India: kansjiram-maravara, panai pulluruvi, panaipulluruvu, sonu

Cymbidium finlaysonianum Lindl. (*Cymbidium finlaysonianum* Wall. ex Lindl.; *Cymbidium tricolor* Miq.; *Cymbidium wallichii* Lindl.)

Vietnam, Malaysia.

See *Gen. Sp. Orchid. Pl.* 164–165. 1833, *Choix Pl. Buitenz.* 1: 19. 1863

(Magic, bewitchment, plant used for sprinkling water through the house after a death occurred in it to keep the spirit from haunting it.)

Malay name: sepuleh

Cymbidium hookerianum Rchb.f. (*Cymbidium giganteum* (Thunb.) Sw. var. *hookerianum* (Rchb. f.) Bois; *Cymbidium grandiflorum* Griff., nom. illeg.; *Cymbidium grandiflorum* Sw.; *Cyperorchis grandiflora* Schltr.; *Cyperorchis grandiflora* (Griff.) Schltr.)

Nepal, China, India.

See *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 6: 76. 1799, Griffith, William (1810–1845), *Icones Plantarum Asiaticarum ...* / by the late William Griffith ... Arr. by John M’Clelland ... 3: pl. 321. Calcutta: Bishop’s College Press 1847–1854 [Part 2 published 1849; part 3 published 1851], Griffith, William (1810–1845), *Notulae ad Plantas Asiaticas* 3: 342. Calcutta: Bishop’s College Press [etc.], 1847–1854 [Posthumous papers bequeathed to the Honorable the East India Company: and printed by order of the government of Bengal. *Notulae ad plantas asiaticas* / by the late William Griffith ... Arranged by John M’Clelland.], *Gardener’s Chronicle & Agricultural Gazette* 1866: 7. 1866, *Orchid* 119. 1893 and *Repertorium Specierum Novarum Regni Vegetabilis* 20(561–576): 107. 1924, *Taxon* 30: 512. 1981, *Cell Chromosome Res.* 17(1): 40–47. 1994

(Powdered seeds applied on cuts and injuries to stop bleeding.)

in China: hu tou lan

in India: nokchamoli-akongtong

Cymbopogon Sprengel Poaceae (Gramineae)

From the Greek *kymbe* ‘a boat’ and *pogon* ‘a beard’, referring to the spikelets or to the glumes; under certain conditions several species could develop toxic properties, aromatic oils used in medicine and as flavouring agents, highly flammable, diverse uses in food, in perfumery and pharmaceutical industry and as a natural precursor of semi-synthetic vitamin A, essential oils from different species of the genus *Cymbopogon* are known for their antimicrobial activity, may be harmful if ingested in quantity, populations occurring in the wild harbor considerable genetic variation, a difficult genus, resembles *Andropogon* L.; see *Species Plantarum* 2: 1045. 1753, *Catalogus plantarum horti botanici monspeliensis* 78. 1813, *Plantarum Minus Cognitarum Pugillus* 2: 14–15. 1815, *Allgemeine Gartenzeitung* 3: 267. Berlin 1835,

Spreng.; *Trachypogon schoenanthus* (L.) Nees) (Latin *caesius* ‘bluish gray’)

Eastern Africa, India, Sri Lanka, South Africa, Namibia. Perennial, straggling, tufted, wiry, erect, knotted woody rhizome, linear leaves blue-green and waxy, thick inflorescence, a weed, sour by nature, low palatable and hard, very unpalatable because of its bitter leaves and peppery scent, only eaten when very young, low grazing value and poorly utilized, strong turpentine smell, eaten by goats, closely related to *Cymbopogon martinii* (Roxb.) J.F. Watson and *Cymbopogon pospischilii* (K. Schum.) C.E. Hubbard

See *Species Plantarum* 2: 1046. 1753, *The Botany of Captain Beechey’s Voyage* 244. 1838, *Tentamen Florae Abyssinicae* ... 2: 464. 1850, *Gaz. N.W. Prov. Cymbopogon iwarancusa (Jones) Schult. (*Andropogon himalayensis* Gand., nom. illeg.; *Andropogon himalayensis* Steud.; *Andropogon iwarancusa* Boiss.; *Andropogon iwarancusa* Nees; *Andropogon iwarancusa* Roxb.; *Andropogon iwarancusa* Jones; *Andropogon jwarancusa* Jones; *Cymbopogon jwarancusa* (Jones) Schult.; *Cymbopogon jwarancusa* Schultes) (the word *Cusa* is perhaps derived from the Sanskrit word *Kusha* for grass)

Africa, Asia, Uttar Pradesh, India, Pakistan. Perennial, densely tufted, very aromatic, leaf sheaths more or less

inflated below, occurs on sand dune, arid and semi-arid lands, arid stony plains

See *Phil. Trans.* lxxx. (1790) 284. 1790, Sir William Jones (1746–1794), "Botanical observations on select Indian plants." *Asiatic Researches* 4: 109, 237–312. 1795, *Mantissa* (Schultes) 2: 458. 1824, *Fl. Afr. Austral. Ill.* 117. 1841, *Syn. Pl. Glumac.* 1(4–5): 377. 1854 [1855 publ. 20–21 Jul 1854], *Fl. Orient.* [Boissier] 5(2): 466. 1884 and *Bulletin de la Société Botanique de France* 46: 421. 1900 [1899 publ. 1900]

(Used in Ayurveda, Unani and Sidha. Cooling, bitter, digestive, used to purify blood and in coughs, rheumatism, cholera, dyspepsia, boiled in wine as a diuretic; to relieve nasal and throat congestion. Root decoction applied in toothache and gum infections.)

in English: iwarancusa grass, oilgrass

in India: amrinala, avadahaka, avadataka, bhutrina, bhutruna, bur, buraro, deerghamoola, dirghamula, ghatyari, ghatzari, gurgiyah, ibharankusha, ibharankussa, isthhaka pathika, isthhakapathika, izkhir, izkir, jalashaya, jara khus, karankusa, karankusha, karankussa, karilaavancha hullu, kattrna, katutrna, khavi, khawi, khoi, laghu, lamajjaka, lamjak, lavaja, laya, nalada, panni, pivalavala, pilo valo, purale hullu, purvele hullu, san, sandula, sevyā, shighra, solara, sunala, sunila, tamajja, tintrya, vilaamichchan

in Nepal: chel

in Pakistan: havai, nadag

in Tibet: la ma rja, la mad dza

Cymbopogon khasianus (Munro ex Hackel) Stapf ex Bor (*Andropogon khasianus* Munro ex Duthie, nom. inval.; *Andropogon nardus* L. subsp. *khasianus* Munro ex Hack.; *Andropogon nardus* var. *khasianus* Munro ex Hackel; *Andropogon nardus* var. *khasianus* Hack.; *Cymbopogon khasianus* (Hackel) Stapf ex Bor; *Cymbopogon khasianus* Bor) (Khasi Hills, India, Assam)

India. Aromatic, variable, dense and narrow inflorescence

See *The Fodder Grasses of Northern India* 88. 1888, *Monographiae Phanerogamarum* 6: 603. 1889 and *Indian Forest Records: Botany* 1(3): 92. 1938, *Journal of the Bombay Natural History Society* 52: 169. 1954, *Taxon* 28: 627. 1979

(Ceremonial, symbolic uses.)

in China: ka xi xiang mao

in India: dziithe

Cymbopogon marginatus (Steud.) Stapf ex Burt Davy (*Andropogon marginatus* Steud.)

South Africa, Lesotho. Perennial, densely tufted, racemes hairy, lower glume of sessile spikelets winged, found in rocky places

See *Flora* 12(2): 472. 1829 and *Annals of the Transvaal Museum* 3: 121. 1912

(For gall sickness.)

in English: Cape turpentine grass, dobo grass, khuskus, lemon grass, scented turpentine grass, tambootie grass

in Southern Africa: akkerwani, buffelsrooigras, koperdraadgras, kuskusgras, lemoe gras, motwortel, motwortel terpentyngras, terpentyngras, muskusgras, platgras, rooigras, tamboekiegras, vrouehaargras; lebatha (Sotho); umqungu (Xhosa)

Cymbopogon martinii (Roxb.) J.F. Watson (*Andropogon martini* Roxb.; *Andropogon pachnodes* Trin.; *Andropogon schoenanthus* var. *martinii* (Roxb.) Benth.; *Andropogon schoenanthus* var. *martinii* Hook.f.; *Cymbopogon martinianus* (Roxb.) Schult.; *Cymbopogon martinii* var. *martinii*; *Cymbopogon martinii* var. *sofia* Bruno; *Cymbopogon pachnodes* (Trin.) W. Watson; *Gymnanthelia martinii* (Roxb.) Andersson)

India, Asia tropical. Perennial, leafy, vigorous, terete, densely tufted, tussocky or forming clumps, simple or sparingly branched, smooth, glabrous, long slender stems, lower nodes often swollen, knotty base covered with dry sheaths, sweet-scented aromatic essential oil

See *Hortus Bengalensis, or a catalogue ...* 7. 1814, *Flora Indica; or descriptions ...* 1: 280–281. 1820, *Systema Vegetabilium* 459. 1824, *Gaz. N.W. Prov. Ind.* 392. 1882 and *Boll. Stud. Inform. (Used in Ayurveda, Unani and Sidha. For prickly heat, leaves crushed ground and put over the affected area; juices of *Punica granatum* flowers together with *Cynodon dactylon* leaves put into nostrils for bleeding nose. Shoots apex may produce cyanogenetic glycosides; juice astringent, diuretic, used for dropsy, hysteria, epilepsy, vomiting, dysentery, to check the bleeding, diarrhea and ophthalmia. Plant decoction used to treat diseases of the urogenital system, dysentery and diarrhea; ground grass given to pregnant women suffering from threatened abortion or having bleeding during pregnancy; poultice of rhizome of *Curcuma longa* with *Cynodon dactylon* applied on joint pain; infusion given in bleeding piles, menorrhagia, dysuria, erysipelas; pasted whole plant or root allowed to take with curd as contraceptive; pounded grass taken to increase blood; stalks of the plant used in impotency, to increase vigour. Roots infusion for kidneys, skin diseases, used as a diuretic and emollient, the fresh juice used as a snuff in epistaxis; roots infusion given to stop bleeding from piles; roots for carbuncles; root decoction diuretic, used in dropsy, piles and venereal diseases. Used in religion and magico-religious beliefs, spiritual, emotional, ceremonial, ritual, symbol of peaceful and long life, sacred to Hindus, ingredient of *Patra pooja* in different religious *pooja* ceremonies, in *Ganesh-pooja*; plants used as offerings to Lord Buddha, aerial parts in worship, leaves used in wedding rituals. Veterinary medicine, grass infusion as an antiseptic wash in castrating domestic animals; plant crushed with ginger and mixed with jaggery given to goats for treatment of diarrhea and complaints.)

in English: Bahama grass, Bermuda grass, coarse kweek, common couch, common quickgrass, couch, couch grass, creeping dog's tooth grass, cwice, devil's grass, dhop, dhub, dhub grass, dog's tooth, doob grass, dub grass, finegrass, fingergrass, fingers, Florida grass, green couch, Indian couch,

kweek grass, quickgrass, quitch, running grass, Scotch grass, star grass, twitch grass, white quickgrass, wire grass, ziba grass

in Hawaii: manienie, manienie haole

Cynodon incompletus Nees (*Cynodon bradleyi* Stent; *Cynodon hirsutus* Stent; *Cynodon x bradleyi* Stent)

South Africa. Perennial, erect, stoloniferous, herbaceous, weed species, good feed relished by cattle, quick growing, used for controlling erosion, very close to *Cynodon hirsutus* Stent

See *Linnaea* 7(3): 301. 1832 and *Bothalia* 2: 277, 285–286. 1927, *Revista Argentina de Agronomía* 17(3): 216, f. 14. 1950, *Crop Science* vol. 9: 291. Madison, Wisconsin 1969, *Australian Journal of Botany, Supplementary Series* 5: 1–51. 1972

(Poisonous.)

in English: blue couch, blue couch grass, dog grass, fine couch, fine quick, hairy quickgrass, Karoo quickgrass, Karroo quick grass, red quickgrass

in South Africa: fynkweekgras, harige kweekgras, Karookweekgras, kwaggakweek, regtekweek, rooikweek, soetkweek, Transvaalsekweekgras

Cynodon linearis (Retz.) Willd. (*Agrostis linearis* Retz.; *Digitaria linearis* (Retz.) Spreng.)

India.

See *Observationes Botanicae* 4: 19. 1786, *Enumeratio Plantarum Horti Botanici Berolinensis ...* 90. 1809, *Systema Vegetabilium*, editio decima sexta 1: 271. 1825

(Used in Ayurveda.)

in India: arugam vayr, bhargavi, bharguvee, doorva, doorwa, doorwal, granthi, niladurva, sveta

Cynodon nlemfuensis Vanderyst (*Cynodon dactylon* (L.) Pers. var. *sarmentosus* Parodi; *Cynodon dactylon* var. *sarmentosus* Pers.; *Cynodon parodii* Caro & E.A. Sánchez; *Cynodon sarmentosus* (Pers.) Gray)

Tropical Africa. Perennial, extremely variable, creeping, vigorous, sward-forming, stout, deep rooted, strongly stoloniferous, stout woody stolons flat on the ground, rooted runners, forage, grazed by ruminants, not particularly palatable, extremely palatable when young, troublesome, aggressive, good ground cover, useful for erosion control and for waterways, a pioneer grass on wasteland, weed of arable land and

perennial crops, sometimes confused with *Cynodon plectostachyus* (K. Schum.) Pilg.

See *Synopsis Plantarum* 1: 85. 1805, *A Natural Arrangement of British Plants* 2: 100. 1821 and *Bulletin agricole du Congo Belge* 11: 121. 1921 [1920], *Bulletin agricole du Congo Belge* 13: 342. 1922, *Revista Argentina de Agronomía* 23: 185. 1956, *Kurtziana* 5: 193. 1970, *Kew Bulletin* 24: 185–189. 1970, *Taxon* 19: 565–569. 1970, *Ann. Missouri Bot. Gard.* 77(1): 125–201. 1990, *Fl. Mesoamer.* 6: 291–292. 1994, *Contr. U.S. Natl. Herb.* 41: 59–63. 2001

(Vermifuge, wound healing, antirheumatic, for intestinal parasitism, swellings, wounds, sprains. Veterinary medicine, insecticide, external parasitism.)

in English: African Bermuda grass, African star grass, East African couch, East African star grass, giant quickgrass, giant star grass, robust star grass, star grass

in Burundi: urucaca

in East Africa: chemorut, emurwa, kakodongo, lugowi, ruchwamba, rugoli

in South Africa: gifgras, Oos-Afrikaanse kweek, Oos-Afrikaanse stergras, reusekweekgras, robuustekweekgras, stergras, sterkgras, vreemdevingergras

in the Philippines: galud-galud, kolatay, rukut-dukut

in Thailand: ya sata

Cynodon plectostachyus (K. Schum.) Pilg. (*Cynodon plectostachyus* var. *ruspolianus* (Chiov.) Chiov.; *Cynodon ruspolianus* Chiov.; *Leptochloa plectostachyus* K. Schum., also spelled *plectostachya*) (Greek *plektos* ‘twisted, plaited’ and *stachys* ‘spike’)

Tropical Africa, Tanzania, Kenya, Uganda. Perennial weed species, large, robust, stout and woody, spreading, forming dense turf, stoloniferous, aggressive, pasture grass and hay, not particularly palatable, good grazing for stock, forage, fodder, whole plant eaten by baboons, used mainly for soil conservation works and for erosion control

See *Die Pflanzenwelt Ost-Afrikas* 112. 1895, *Annuario del Reale Istituto Botanico di Roma* 7: 70, t. 7. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 82. 1907, *Webbia* 8: 111. 1951, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 1–551. 1969, *Kew Bulletin* 24(1): 185–189. 1970, *Ceiba* 19(1): 1–118. 1975

(Under certain conditions could develop toxic properties.)

in English: feathery couch, giant quickgrass, giant star grass, Naivasha star grass (= Kenya, Rift Valley, Lake Naivasha), star grass

in Spanish: estrella, estrella Africana, pasto estrella

in South Africa: gifgras, reusekweekgras, stergras, vreemdevingergras

Cynoglossum L. Boraginaceae

Latin *cynoglossos* and Greek *kynoglosson* for the plant hound’s tongue, Greek *kynos* and *glossa* ‘a tongue’, referring to the leaves; see Carl Linnaeus, *Species Plantarum* 1: 134–135. 1753, *Genera Plantarum* Ed. 5. 65. 1754 and *Fl. URSS* 19: 717. 1953, *Fieldiana, Bot.* 24(9/1–2): 111–167. 1970, *Indian Journal of Pharmacy* 37(3): 69–70. 1975, *Willdenowia* 11(1): 33. 1981, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988, *Edinburgh Journal of Botany* 48(1): 56. 1991, *Opera Botanica* 137: 1–42. 1999, *Fitoterapia* 72: 351–368. 2001, *Journal of Ethnopharmacology* 85: 43–52. 2003, *Pharmaceutical Biology* 48(5): 545–553. 2010. Pyrrolizidine alkaloids, several *Cynoglossum* species are highly toxic for horses and cattle.

Cynoglossum amabile Stapf & J.R. Drumm.

China.

See *Bulletin of Miscellaneous Information Kew* 1906(6): 202. 1906, *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975

(Used to treat cough, scrofula and to stop bleeding of wounds.)

in English: Chinese forget-me-not

in China: dao ti hu

in Tibetan: nadma ‘byar-ma

Cynoglossum coeruleum A. DC. (*Cynoglossum coeruleum* Buch.-Ham. ex D. Don, nom. inval.; *Cynoglossum coeruleum* Hochst. ex DC.)

Tropical Africa, Tanzania. Herb, variable, somewhat succulent, corolla bluish purple, fruit very rough, grazed by livestock

See *Prodromus Florae Nepalensis* 100. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 148. 1846 and *Journal of Ethnopharmacology* 110: 516–525. 2007, *Journal of Ethnopharmacology* 112: 55–70. 2007, *Journal of Ethnopharmacology* 124: 69–78. 2009

(Fresh leaf powder applied to burns, wounds. Roots antispasmodic, antibacterial, vermifuge, stomachic; crushed dried roots decoction for impotence. Veterinary medicine, astringent, for diarrhea, dysentery.)

in Tanzania: ingolongonzi, mashonanguo

Cynoglossum furcatum Wall. (*Cynoglossum furcatus* Wall.)

China, India.

See *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 6–7. 1824 and *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, *Taxon* 28: 393–395. 1979, *Journal of Asian natural products research* 10(3–4): 349–354. 2008

(Pyrrolizidine alkaloids isolated from the roots.)

Cynoglossum geometricum Baker & C.H. Wright (*Cynoglossum coeruleum* DC. subsp. *geometricum* (Baker & C.H. Wright) S. Edwards, nom. inval.; *Cynoglossum*

lanceolatum Forssk. subsp. *geometricum* (Baker & C.H. Wright) Brand; *Paracynoglossum geometricum* (Baker & C.H. Wright) R.R. Mill

Tropical Africa. Herb, erect, light blue corolla

See *Flora of Tropical Africa* [Oliver et al.] 4(2.1): 52. 1905, *Das Pflanzenreich* 4, 252: 149. 1921, *Notes Roy. Bot. Gard. Edinburgh* 41(3): 478. 1984, *Flora of Ethiopia and Eritrea* 5: 93. 2006

(Stem bark antipyretic, antimicrobial, for snakebite.)

in Tanzania: entelipenyi

Cynoglossum glochidiatum Wall. ex Benth. (*Cynoglossum denticulatum* A. DC.; *Cynoglossum wallichii* G. Don var. *glochidiatum* (Wall. ex Benth.) Kazmi; *Paracynoglossum denticulatum* Popov)

Nepal, Himalaya.

See *A General History of the Dichlamydeous Plants* 4: 354. 1837, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 306. 1839, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 150. 1846 and *Fl. URSS* 19: 717. 1953, *Journal of the Arnold Arboretum* 52(2): 347. 1971

(Plant juice applied to treat wounds, useful in controlling vomiting in infants. Root eaten to enhance potency; root juice to stop vomiting.)

in China: dao gou xi nan liu li cao

in India: andhahuli, lichkura, lutaki, tejraj

in Nepal: boko tinai

Cynoglossum grande Douglas ex Lehm.

North America. Perennial herb

See *Novarum et Minus Cognitarum Stirpium Pugillus* 2: 25–26. 1830

(Roots for stomachache, gastrointestinal disorders, venereal diseases, burns and scalds.)

in English: Pacific hound's tongue

Cynoglossum javanicum Thunb. ex Lehm.

SE Asia.

See Lehmann, Johann Georg Christian (1792–1860), *Plantae e Familiae Asperifoliarum Nuciferae* 1: 118. Berolini, 1818

(Fresh leaves tied onto topical ulcers until they heal.)

in Papua New Guinea: dekemp, semongokina

Cynoglossum lanceolatum Forssk. (*Cynoglossum canescens* Willd.; *Cynoglossum hirsutum* Thunb.; *Cynoglossum lanceolatum* Hochst. ex DC.; *Cynoglossum lanceolatum* B. Heyne ex Wall.; *Cynoglossum micranthum* Desf.; *Cynoglossum micranthum* Poir.; *Cynoglossum racemosum* Roxb.; *Paracynoglossum lanceolatum* (Forssk.) R.R. Mill)

India. Herb, leaves added to soup

See *Species Plantarum* 1: 134–135. 1753, *Flora Aegyptiaco-Arabica* 41. 1775, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 172. 1821, *Flora Indica*; or descriptions of Indian Plants 2: 6. 1824, *Numer. List* [Wallich] n. 921. 1829, *Prodr.* (DC.) 10: 149. 1846 and *Fl. URSS* 19: 717. 1953, *Berichte der Schweizerischen Botanischen Gesellschaft* 85: 210–252. 1975, *Taxon* 30: 854. 1981

(Used in Ayurveda. Pyrrolizidine alkaloids. Crushed roots tonic, stimulant, for rheumatism and pain. Leaves emetic, diuretic, febrifuge, sedative, for swellings; crushed leaves poulticed on sores and wounds, rubbed on the irritated skin to get relief from itching. Magic, ritual, for mental problems, against bad spirits.)

in English: Chinese forget-me-not, hound's tongue, small-flower hound's tongue

in Burundi: urwiba

in Congo: diadilonda, kolokoso

in Rwanda: igishokoro

in Southern Africa: baleriaan, knoppiesklits; bohomo (South Sotho)

in China: xiao hua liu li cao, ya yong cao

in India: bhavarband, kamraaj, laksmana, lichkura

in Japan: shima-ruri-sô, shima-suna-biki-sô

Cynoglossum meeboldii Brand

India.

See *Repertorium Specierum Novarum Regni Vegetabilis* 14: 323. 1916

(Roots juice applied on ripe boils.)

in India: khuriattai

Cynoglossum monophlebium Baker

Madagascar.

See *J. Linn. Soc., Bot.* 20: 211. 1883 [1884 publ. 1883]

(Antirheumatic.)

in Madagascar: darakinambo, lelosy, maindraitsiresina

Cynoglossum officinale L. (*Cynoglossum officinale* Hook. & Arn.; *Cynoglossum officinale* Desf.; *Cynoglossum officinale* Brot.; *Cynoglossum officinale* Willk.)

China, Europe. Biennial herb, a noxious weed

See *Species Plantarum* 1: 134–135. 1753, *Fl. Atlant.* 1: 158. 1798, *Fl. Lusit.* 1: 295. 1804, *Flora* 35: 217. 1852 and *Bot. Zurn.* 65(5): 659–668. 1980, *Fragmenta Floristica et Geobotanica* 27: 19–30. 1981, Knight, A.P., Kimberling, C.V., Stermitz, F.R., Roby, M.R. “*Cynoglossum officinale* (hound's-tongue)—a cause of pyrrolizidine alkaloid

poisoning in horses." *J. Am. Vet. Med. Assoc.*, 185: 647–650. 1984, *Fitologija* 36: 67–68. 1989, *Regnum Veg.* 127: 40. 1993, *Phytochemistry* 37(4): 1013–1016. 1994, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(6): 114–116. 1995, *Journal of Veterinary Diagnostic Investigation* 8(1): 81–90. 1996

(The plant contains pyrrolizidine alkaloids, which have caused poisoning and death in horses and cattle. The plant causes disorders of the central nervous system and can cause hepatic failure in horses, toxicity in calves. Plant infusion used as antihemorrhagic, antiseptic, diuretic, applied as poultice to running sores, dropsy, venereal diseases.)

in English: gipsy flower, hound's tongue

in French: langue de chien

in Arabic: lisan el-kalb, ouden esh-shah, saboun el-'arais

in China: yao yong dao ti hu

in Tibetan: nad-makyi-ma

***Cynoglossum virginianum* L.**

(Plant juice applied to treat wounds, useful in controlling vomiting in infants. Root juice to stop vomiting; powdered roots antiallergic, applied on swellings.)

in India: dhalabravisabta

***Cynoglossum zeylanicum* (Vahl ex Hornem.) Thunb. ex Lehm. (*Anchusa zeylanica* Vahl ex Hornem.; *Cynoglossum zeylanicum* Wight ex Wall.; *Cynoglossum zeylanicum* (Lehm.) Brand; *Cynoglossum zeylanicum* Thunb. ex Lehm.)**

Nepal. Herb, corolla blue

See *Hortus Regius Botanicus Hafniensis* 1: 176. 1813, *Neue Schriften der Naturforschenden Gesellschaft zu Halle* 3(2): 20. 1817, *Plantae e Familiae Asperifoliarum Nuciferae* 1: 116. 1818, *Numer. List* [Wallich] n. 7018. 1832 and *Das Pflanzenreich* IV, 252: 134. 1921

(Used in Sidha. Plant powder, mixed with water, made into a paste and applied to treat ringworm and scabies. Leaves juice a cure for eye infections; leaf paste applied on the stomach against stomachache.)

in India: amudra soppu, kada anhrinta, picinottarai, pisinottarai, vattachedy

in Nepal: tapa

Cynometra L. Fabaceae (Caesalpiaceae, Detarieae)

From the Greek *kynos*, *kyon* 'a dog' and *metra* 'womb, uterus', referring to the shape of pod; see Carl Linnaeus, *Species Plantarum*. 1: 382. 1753 and *Genera Plantarum*. Ed. 5. 179. 1754, *Genera Nova Madagascariensis* 22. 1806, *Annales du Jardin Botanique de Buitenzorg* 1: 20. 1876, *Die Natürlichen Pflanzenfamilien* 3(3): 129. 1892 and *Journal of the Royal African Society* 6(21): 100–105. 1906 [African Affairs (London)], *Rev. Bot. Appliq.* 26: 585–621. 1946, *Bull. Jard. Bot. Nat. Belg.* 21: 373–450. 1951, *Blumea* 15: 413–425. 1968, *Blumea* 18(1): 1–52. 1970, *Flora of Ceylon* 7: 34–107. 1991, *Flora Malesiana* I, 12, 2: 409–784. 1996, *Curtis's Botanical Magazine* 14(4): 231–240. 1997, *Mangroves and Salt Marshes* 2(3): 133–148. 1998, *Blumea* 51(2): 199–220. 2006.

***Cynometra alexandri* C.H. Wright (*Cynometra sankuruensis* Vermoesen)**

Tropical Africa. Perennial non-climbing tree, white flowers

See *Man. Essences Forest. Congo Belg.* 82, in clavi, 92. 1923, *Biotropica* 36(4): 505–521. 2004, *Primates of Western Uganda*. Springer New York 2006

(Self-medication among chimpanzees.)

in English: ironwood, Uganda ironwood

in Central Africa: muhimbi, mupompe, timbur

in Congo: baira, baja, bapa, beira, tembu, tembwe

in Uganda: muhindi

Cynometra ananta Hutch. & Dalziel

Ghana, Ivory Coast, Liberia. Perennial non-climbing tree

See *Flora of West Tropical Africa* 1(2): 331. 1928, *Bulletin of Miscellaneous Information Kew* 1928(9): 381. 1928, *Tetrahedron Letters* 20: 1757–1760. 1973

(Imidazole alkaloids. Magic, ritual.)

in Ghana: ananta

in Ivory Coast: apome, apomé, baka-kunin, tidio, tonio

in Liberia: dah, sao-tu, sla, sungoh, tutwo

Cynometra cauliflora L. (*Cynometra acutifolia* S. Vidal; *Cynometra cauliflora* Wall., nom. illeg.; *Cynometra cauliflora* L. var. *elongatis* Hassk.; *Cynometra cauliflora* L. var. *subsessilis* Hassk.)

Peninsular Malaysia, India, Sri Lanka. Perennial non-climbing tree, shrub or small tree, distinctly zig-zag twigs, white flowers, buds reddish, fleshy rugose pod kidney-shaped, flattened seeds kidney-shaped, flowers and fruits borne on trunk, young fruit very sour, mature fruit can be eaten fresh or cooked

See *Species Plantarum* 1: 382. 1753, *A Numerical List of Dried Specimens* n. 5816. 1831 and *Journal of Food Composition and Analysis* 22(5): 388–393. 2009

(Antioxidant, antiseptic, oil from the seeds applied in leprosy and skin diseases.)

in India: iripa, nam nam, niam niam, puki anjing

Malayan names: katak puru, nam nam (for the pods), puki anjing, salah nama

Cynometra commersoniana (DC.) Baill. (*Cynometra cloiselii* Drake; *Cynometra commersoniana* Baill.; *Cynometra glabra* sensu R. Vig.; *Cynometra glabra* De Wild.; *Metrocynia commersoniana* DC.)

Madagascar. Perennial non-climbing tree, yellowish white flowers, fruits eaten by lemurs

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 507. 1825, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(47): 376. 1883 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 75. 1902[1903], *Plantae Bequaertianae* 3(1): 98. 1925, *Notulae Systematicae*. Herbarium du Muséum de Paris 13(4): 348. 1948, *Pharmaceutical Biology* 38(1): 36–39. 2000

(Antiviral.)

in Madagascar: hetatra, mampay, mampay madinindravina, manpaillo, rahiny, variotra, variotry

Cynometra hankei Harms (*Cynometra henkei* Harms)

Tropical Africa. Perennial non-climbing tree, white flowers

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* App. 21: 39. 1911, *Phytochemistry* 2765–2767. 1981, *Primates* 23(3): 453–457. 1982, *African Study Monographs* 4: 1–54. 1983, *International Journal of Primatology* 4(1): 1–31. 1983, Takayoshi Kanō, *The Last Ape: Pygmy Chimpanzee Behavior and Ecology*. Stanford University Press, 1992, *Tetrahedron Letters* 37(22): 3915–3918. 1996

(Imidazole alkaloids.)

in Cameroon: abaye, bokombolo, ekop nganga, nganga, nkokom, okomlo, sonan

in Zaire: baraka, botuna, bubalaka, mulanga

Cynometra iripa Kostel. (*Cynometra bijuga* sensu auct.; *Cynometra bijuga* Miq. var. *mimosoides* (Baker) Merr.; *Cynometra mimosoides* (Baker) Prain; *Cynometra ramiflora* sensu Britton; *Cynometra ramiflora* L. subsp. *bijuga* Prain; *Cynometra ramiflora* var. *bijuga* (Miq.) Benth.; *Cynometra ramiflora* var. *heterophylla* Thwaites; *Cynometra ramiflora* var. *mimosoides* Baker)

Myanmar, India, Peninsular Malaysia. Perennial non-climbing tree, glossy dark green leaves, small white flowers, hard wrinkled pods

See *Allgemeine Medizinisch-Pharmazeutische Flora* 4: 1341. 1835 and *Asian Fisheries Science* 18(2005): 285–294. 2005

(Used in Ayurveda. Seeds boiled and eaten during drought and stress conditions. Crushed leaves mixed with sugar taken as antibacterial, against amebic dysentery.)

in English: wrinkle pod mangrove

in India: attukaddupulli, iripa, irippa, kadumpuli, madhuka, opalu, opulu, singada

in Sri Lanka: opalu

Cynometra madagascariensis Baill. (*Cynometra lyallii* Baker)

Madagascar. Perennial non-climbing tree, yellowish white flowers

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1(47): 375–376. 1883, *Bulletin of Miscellaneous Information Kew* 1894(93): 344. 1894 and *Pharmaceutical Biology* 38(1): 36–39. 2000

(Antiviral.)

in Madagascar: mampay

Cynometra megalophylla Harms

Benin, Ghana. Perennial non-climbing tree, white cream flowers, reddish buds

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 262. 1899

(Aerial parts for measles, chicken-pox.)

in Ivory Coast: patapara

in Nigeria: egi (Yoruba)

Cynometra ramiflora L. (*Cynometra bijuga* Span.; *Cynometra bijuga* Miq.; *Cynometra carolinensis* Kaneh.; *Cynometra hosinoi* Kaneh.; *Cynometra ramiflora* Miq.; *Cynometra ramiflora* L. subsp. *bijuga* (Miq.) Prain; *Cynometra ramiflora* subsp. *bijuga* (Spanoghe ex Miq.) Prain; *Cynometra ramiflora* subsp. *genuina* Prai; *Cynometra ramiflora* var. *mimosoides* Wall.; *Maniltoa carolinensis* (Kaneh.) Hosok.)

SE Asia, Papua New Guinea. Perennial non-climbing tree, mangrove, small tree, erect, leaves compound, yellowish white flowers subtended by large bracts, turgid rugose pods

See *Species Plantarum* 1: 382–383. 1753, *Flora van Nederlandsch Indië* 1(1): 78. 1855, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66(2): 199. 1898

(Used in Sidha. Cytotoxic. Bark laxative, narcotic, analgesic, antimicrobial, used in wound healing. Roots purgative. Leaves antiviral, antiseptic, for skin diseases, scabies, leprosy. Oil from the seeds and seed paste applied against leprosy, skin infections, scabies and other cutaneous diseases.)

in English: wrinkle pod mangrove

in Bangladesh: shingra

in India: galmendora, irappa, irappu, irapu, irippa, irripa, irupa, irutpu, kanaga, kanaka, kanakamara, madhuka, mink, naipudukan, nay putukkan, nayppudukan, naypputukkan, shingar, shingra, shingr

in Malaysia: belangan, kangkatong bukit, katong, katong laut

in Philippines: balitbitan, komon, odling, oringen, ula, ulad, ulud

in Vietnam: rang

Cynometra vogelii Hook.f.

Ivory Coast, Mali, Nigeria. Perennial non-climbing tree, shrub or small tree, spreading, white or rose flowers, hard falcate-curved golden-brown velvety-pubescent rugose-corrugate fruits

See *Niger Flora* 328. 1849 and *Bulletin of Entomological Research* 23: 501–531. 1932, *Bulletin of Entomological Research* 37 : 201–250. 1946, *Lloydia* 34: 172–174. 1971, *Nigerian Field* 43(2): 50–58. 1978, *Nigerian Field* 43(3): 111–121. 1978, *Nigerian Field* 43(4): 161–170. 1978, *Economic Botany* 33(3): 320–328. 1979, *Nigerian Field* 44: 21–28. 1979, *Antimicrobiological Agents and Chemotherapy* 32(4): 598–600. 1988, *World Journal of Microbiology and Biotechnology* 14: 235–238. 1998, *Nig. Journal of Internal medicine* 3(1): s7–11. 2000, *Nigerian Journal of Botany* 15: 26–30. 2002, *Ethnobotanical Leaflets* 12: 7–18. 2008, *African Scientist* 9(1): March 31, 2008

(Antibacterial, antifungal, chewing sticks.)

in Ghana: krosima

in Ivory Coast: tiupe

in Nigeria: arumu, arumutaba, isaweweze, ubeze, ukpankeka

in Senegal: ba tutu gôo, ba voro, gôn, kochi, kundé, tōndo, tondo

in Sierra Leone: ndondo-kpini, ndondo-kpweni, nuwabui, tindabure

Cynomorium L. Cynomoriaceae (Balanophoraceae)

Latin *cynomorion* and Greek *kynomorion* (from *kynos*, *kyon* ‘a dog’ and *morion* ‘member, penis’) for a plant, broom-rape, also called *orobanche*, an allusion to a plant parasitizing salt-marsh plants; see Carl Linnaeus, *Species Plantarum* 2: 970. 1753 and *Genera Plantarum* Ed. 5. 417. 1754.

Cynomorium songaricum Ruprecht (*Cynomorium coccineum* Linnaeus subsp. *songaricum* (Ruprecht) J. Léonard)

China.

See *Mém. Acad. Imp. Sci. Saint Pétersbourg*, Sér. 7, 14(4): 73. 1869 and *Bulletin du Jardin Botanique National de Belgique* 56: 304. 1986, *Bot. J. Linn. Soc.* 120: 279–281. 1996

(Fleshy stems tonic, to treat nocturnal ejaculation and impotence.)

in China: suo yang

Cynophalla (DC.) J. Presl Capparaceae

Greek *kynos*, *kyon* ‘a dog’ and *phallos* ‘penis, wooden club’, see *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 249. 1824 and *Harvard Papers in Botany* 11(1): 17–18. 2006, *Harvard Pap. Bot.* 13(1): 117–120. 2008.

Cynophalla retusa (Griseb.) X. Cornejo & H.H. Iltis (*Capparis cynophallophora* var. *retusa* (Griseb.) Kuntze; *Capparis retusa* Griseb.)

South America. Unripe fruit boiled in water for several hours used as food

See *Species Plantarum*, Editio Secunda 1: 722. 1762, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 249. 1824, *Flora Brasiliensis* 13(1): 269, 281–282. 1865, *Abh. Königlichen Ges. Wiss. Göttingen* 24: 18. 1879, *Revisio Generum Plantarum* 2: 7. 1898 and *Harvard Pap. Bot.* 13(1): 119. 2008

(Dried root used for chicken pox; maceration of peeled root drunk against blisters.)

Cyperus L. Cyperaceae

From the ancient Greek *kypeiron*, *kyperos*, *kypeiros* ‘gal-ingale, sedge’; Latin *cyperos*, *i* (Plinius), *cyperon*, *i* (Titus Petronius Arbitrator), *cyperum*, *i* (Marcus Terentius Varro), *ciperum* (Caelius Apicius, *De re coquinaria*), the name *cyperis*, *idis* was applied by Plinius to the root of the *Cyperus*; see Carl Linnaeus, *Species Plantarum* 1: 44–47. 1753, *Genera Plantarum*. Ed. 5. 26. 1754, Rottboll, Christen Friis (1727–1797), *Descriptiones plantarum rariorum* iconibus illustrandas ... programmata quo lectiones in Horto Botanico ... 1772 ... [Cyperaceae]. Havniae, N. Möller, 1772, *Descriptionum et iconum rariorum* et pro maxima parte novas plantas illustrantium liber primus / conscriptus a Christiano Friis Rottböll, Hafniae: sumptibus Societatis Typographicae, 1773 and *Fl. Madagasc.* 29: 1–299. 1937, *Fiediana, Bot.* 24(1): 90–196. 1958, Luigi Malerba, *Storia del papiro in Sicilia e la produzione della carta in Siracusa*. Bologna 1968, *Taxon* 30: 854. 1981, *Willdenowia* 22: 133–142. 1992, *Proc. Indian Sci. Congr. Assoc.* 81(4A): 90. 1994, *Systematic Botany Monographs* 43: 1–213. 1994, *Proc. Indian Sci. Congr. Assoc.* 82(3:VIII): 82–83. 1995, Schippers, P., S.J. TerBorg, and J.J. Bos. “A revision of the infraspecific taxonomy of *Cyperus esculentus* (yellow nutsedge) with an experimentally evaluated character set.” *Syst. Bot.* 20: 461–481. 1995, *Hoehnea* 29(2): 93–107. 2002, Cabezas, F., Aedo, C. & Velayos, M. “Checklist of the Cyperaceae of Equatorial Guinea (Annobón, Bioko, Río Muni).” *Belgian Journal of Botany* 137: 3–26. 2004.

Cyperus alternifolius L. (*Cyperus alternifolius* Baker; *Cyperus alternifolius* Steud.; *Cyperus alternifolius* Poir., nom. illeg.; *Cyperus alternifolius* J.R. Forst., nom. illeg.; *Cyperus onustus* Steud.; *Cyperus racemosus* Poir.; *Eucyperus alternifolius* (L.) Rikli)

Ethiopia to Mozambique, W. Indian Ocean. Herb, clumped, stems used to make sleeping mats, riverside and stream-banks, moist soils

See *Species Plantarum* 1: 44–47. 1753, *Mantissa Plantarum* 1: 28–29. 1767, *Flora Americae Septentrionalis* 3. 1771, *Encyclopédie Méthodique, Botanique* 7: 268, 273. 1806, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 2: 31. 1837, *Synopsis Plantarum Glumacearum* 2: 20, 54. 1854, *Journal of the Linnean Society, Botany* 21: 450. 1885, *Jahrb. Wiss. Bot.* 27: 568. 1895 and *Kew Bull.* 30: 522. 1975, *Cytologia* 44: 103–109. 1979, *Taxon* 34: 727–730. 1985, *Cytologia* 53: 67–72. 1988

(Leaves antiinflammatory, for edema and skin diseases. Roots, a bath, for rash and pimples. Veterinary medicine for camels.)

in English: umbrella palm, umbrella plant, umbrella sedge

in Hawaii: ‘ahu’awa haole, pu’uka’a haole

in Malawi: muluru

in Tanzania: injila, zira

Cyperus amabilis Vahl (*Cyperus amabilis* var. *macra* C.B. Clarke; *Cyperus amabilis* var. *macrostachyus* (Boeck.) Kük.; *Cyperus amabilis* var. *oligostachyus* (Kunth) Kük.; *Cyperus amabilis* var. *subacaulis* Kük.; *Cyperus anisostachyos* Willd. ex Kunth; *Cyperus aurantiacus* Kunth; *Cyperus aureus* Kunth, nom. illeg.; *Cyperus aureus* var. *aurantiacus* (Kunth) Boeck.; *Cyperus aureus* var. *macrostachyus* Boeck.; *Cyperus aureus* var. *oligostachyus* (Kunth) Boeck.; *Cyperus brachyphyllus* Willd. ex Link; *Cyperus glareosus* Liebm.; *Cyperus guadalajaranus* M.E. Jones; *Cyperus lepidus* Hochst.; *Cyperus microstachyus* Vahl; *Cyperus muelleri* Boeck.; *Cyperus oligostachyus* Kunth; *Cyperus quitensis* Spreng.)

Trop. & Subtrop. Herb, erect, green, bracts golden to brown, inflorescence orange-yellow, fruits brown, roots with characteristic smell

See *Enumeratio Plantarum* ... 2: 318. 1805, *Nova Genera et Species Plantarum* (quarto ed.) 1: 205. 1815 [1816], *Linnaea* 35: 495. 1868 and *Fl. Trop. Afr.* 8: 328. 1901, *Contr. W. (Used in Ayurveda and Sidha. Roots along with leaves of *Hibiscus rosa-sinensis* ground into paste and applied to scalp for dandruff.)

in China: cu gen jing suo cao

in India: bhadrāmusta, doongla, konda jatamaansi, mancil, mattaikkorai, musta, naati jatamaansi, nirkkorai, palasugandhi, payoda, pullankorai, purkorai

Cyperus substramineus (Nees) Kük. (*Cyperus stramineus* Nees; *Pycneus stramineus* (Nees) C.B. Clarke; *Pycneus substramineus* (Kük.) N.K. Khoi)

India. Erect sedge, aromatic root, compound head, bract and spikelet suberect, brow nut laterally compressed

See *Contributions to the Botany of India* 74. 1834, *The Flora of British India* 6: 589. 1893 and *Das Pflanzenreich* IV, 20(101): 10. 1935

(Veterinary medicine, whole plant made into a paste and given to cattle during diarrhea.)

Cyphia P.J. Bergius Campanulaceae (Cyphiaceae, Lobeliaceae)

Greek *kyphos* 'bent, curved, humped', Latin *cyphi* and Greek *kyphi* for an Egyptian perfuming powder, see *Descriptiones Plantarum ex Capite Bonae Spei* ... 172. 1767, *Syst. Nat.*: 379. 1791, *Hist. Nat. Vég.* 9: 584. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 497. 1839, *Revis. Gen. Pl.* 3(2): 186. 1898.

Cyphia glandulifera Hochst. ex A. Rich. (*Cyphia glandulifera* Hochst.; *Cyphia glandulifera* fo. *obovatifolia* E. Wimm.; *Cyphia glandulifera* fo. *subcuspidata* E. Wimm.)

Kenya, Tanzania, Malawi. Herb, erect, often single-stemmed, stem arising from a globose yellowish white scaly tuber,

leaves nearly fleshy, flowers pinkish, erect spike, leaves used as a vegetable, sweet juicy tubers peeled and eaten, fodder plant for livestock, found in open grassland, disturbed grassland, open wet depressions

See *Tentamen Florae Abyssinicae* ... 2: 8, t. 64. 1850 and *Bulletin du Jardin botanique de l'État a Bruxelles* 35(Fasc. 2): 1011–1058. 1965, *Pflanzenr.*, IV, 276c: 956, 958. 1968

(Nutritious, tonic.)

in Kenya: ekurgigi, kurte, lokorijet, mukandakiria, ng'athu, ngomo

in Tanzania: nandulubiani, nangulubiani, nansulubiani

Cyphomandra C. Martius ex Sendtner Solanaceae

From the Greek *kyphos* 'bent, curved, humped' and *aner, andros* 'male, anther, stamen', referring to the connective of the anthers; see *Anales de Historia Natural* 1: 44–45. 1799, *Histoire Naturelle, Médicale et Économique des Solanum* 122, 168. 1813, *Plantarum vascularium genera secundum ordines* ... 184. 1840, Otto Sendtner (1813–1859), *De Cyphomandra, novo Solanacearum genere tropicae Americae*. *Dissertatio inauguralis botanica*. [1845] [= *Flora* 28(11): 161–176. 1845], *London Journal of Botany* 4: 353–354, 360, 363. 1845, *Flora* 30: 567–568. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 387, 401. 1852, *Biologia Centrali-Americana*; ... *Botany* ... 2(11): 417. 1882 and *Publ. Königstein 1992, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 34. [“born 1820”] 1994.)

South Africa.

See *Botanical Magazine* 20: t. 5472. 1864 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 512. 1912, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 120. 1960, *Naturalia monspeliensia. Série Botanique*. 18: 218. 1967

(Antiinflammatory, antimicrobial. Leaves crushed in water used as an insecticide against chicken lice.)

in English: Baines' gouty vine

in South Africa: botterboom

Cyphostemma bakerianum (Planch.) Desc. (*Cissus bakeriana* Planch.)

East Africa.

See *Species Plantarum* 1: 117. 1753, *Monographiae Phanerogamarum* 5: 599. 1887 and *A Hand-book to the Flora of Ceylon* 6: 53. 1931, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 120. 1960, *Naturalia monspeliensia. Série Botanique*. 18: 218. 1967

(Said to be poisonous.)

Cyphostemma buchananii (Planch.) Desc. ex Wild & R.B. Drumm. (*Cissus buchananii* Planch.; *Cyphostemma buchananii* (Planch.) Desc.)

Tropical Africa.

See *Monographiae Phanerogamarum* 5: 601. 1887 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 120. 1960, *Flora Zambesiaca* 2: 480, t. 97D. 1966, *Naturalia monspeliensia. Série Botanique*. 18: 219. 1967

(Fruits and leaves analgesic, antipyretic.)

Cyphostemma cirrhosum (Thunb.) Desc. ex Wild & R.B. Drumm. subsp. ***cirrhosum*** (*Cissus cirrhosa* (Thunb.) Willd.; *Cyphostemma cirrhosum* (Thunb.) Desc.; *Vitis cirrhosa* Thunb.)

South Africa. Twining, stout, herbaceous, prostrate, creeping succulent climber, scrambling, supporting by tendrils, creamy yellow flowers

See *Prodromus Plantarum Capensium*, ... 1: 44. 1794, *Species Plantarum*. Editio quarta 1: 657. 1798 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 120. 1960, *Kirkia* 2: 139. 1961, *Naturalia monspeliensia. Série Botanique*. 18: 219. 1967

(Veterinary medicine, magic, ritual, for safety and good health of cattle.)

in South Africa: impinda

Cyphostemma currorii (Hook.f.) Descoings (*Cissus cramerianus* Schinz; *Cissus currorii* Hook.f.; *Cyphostemma cramerianus* (Schinz) Descoings; *Vitis currori* (Hook. f.) Baker) (the specific name after A.B. Curror of HMS *Water-Witch* who first collected the tree in Angola, Elephant's Bay, in the 1840s)

South Africa, Namibia. Tree, yellow flowers

See *Niger Flora* 265. 1849, *Flora of Tropical Africa* 1: 401. 1868, *Verhandlungen des Botanischen Vereins von Berlin und Brandenburg* 30: 244. 1888 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 120–121. 1960, *Naturalia monspeliensia. Série Botanique*. 18: 220. 1967

(Antiinflammatory, antimicrobial and antitumour. Veterinary medicine.)

in South Africa: kobas, botterboom

Cyphostemma cyphopetalum (Fresen.) Descoings ex Wild & R.B. Drumm. (*Cissus cyphopetala* Fresen.; *Cissus tenuipes* Gilg & Fr.; *Cyphostemma cyphopetalum* (Fresen.) Desc.; *Vitis cyphopetala* (Fresen.) Bak.)

Tropical Africa. Climber, scandent, herbaceous, scrambling, succulent leaves, creamy yellow flowers

See *Museum Senckenbergianum* 2: 282. 1837, *Flora of Tropical Africa* 1: 407. 1868 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 121. 1960, *Flora Zambesiaca* 2(2): 491. 1966, *Naturalia monspeliensia. Série Botanique*. 18: 220. 1967, *Journal of Ethnopharmacology* 14: 283–314. 1985, *Journal of Ethnopharmacology* 111: 271–283. 2007

(Leaves antiseptic. Roots boiled and drunk for stomach pain, diarrhea. Veterinary medicine, for rabies.)

in Kenya: kiptora

in Rwanda: ikibomwe, umubombwe

in Tanzania: n'tuguni, olerondo, olorondo, olororido

Cyphostemma hildebrandtii (Gilg) Desc. ex Wild & R.B. Drumm. (*Cissus hildebrandtii* Gilg; *Cyphostemma hildebrandtii* (Gilg) Desc.)

Tropical Africa.

See *Die Pflanzenwelt Ost-Afrikas* C: 260, t. 17a-g. 1895 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 122. 1960, *Flora Zambesiaca* 2(2): 476. 1966, *Naturalia monspeliensis*. *Série Botanique*. 18: 222. 1967

(Roots for snakebite and skin infections.)

Cyphostemma junceum (Webb) Desc. ex Wild & R.B. Drumm. (*Cissus juncea* Webb; *Cyphostemma junceum* (Webb) Desc.; *Vitis juncea* (Webb) Baker)

Tropical Africa. Herb, fleshy, erect, thick woody rhizome, succulent leaves, flowers deep yellow

See *Fragmenta florulae aethiopico-aegyptiacae* 57. 1854, *Flora of Tropical Africa* 1: 401. 1868 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 122. 1960, *Flora Zambesiaca* 2(2): 465. 1966, *Naturalia monspeliensis*. *Série Botanique*. 18: 222. 1967

(For piles, diarrhea, venereal diseases. Roots chewed for snakebites.)

in Angola: kikama

Cyphostemma juttae (Dinter & Gilg) Desc. (*Cissus juttae* Dinter & Gilg) (after Jutta Dinter, the wife of the botanist and succulent collector Moritz Kurt Dinter, 1868–1945, see Gordon Douglas Rowley, *A History of Succulent Plants*. 1997.)

Namibia, South Africa. Herb, succulent leaves

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 510. 1912, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 122. 1960, *Naturalia monspeliensis*. *Série Botanique*. 18: 222. 1967

(For skin diseases.)

in English: elephant's foot

in South Africa: Jutta's botterboom

Cyphostemma maranguense (Gilg) Desc. (*Cissus maranguensis* Gilg)

Tropical Africa. Climbing vine, herbaceous, leaning, red-purple pubescence, corollas greenish-white

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19(Beibl. 47): 38. 1894 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 123. 1960, *Naturalia monspeliensis*. *Série Botanique*. 18: 224. 1967, *Journal of Ethnopharmacology* 108: 332–339. 2006

(For malaria, fevers. Veterinary medicine.)

in Kenya: mutambi, mûthonjora, nyanyange

in Tanzania: n'tuguni, olerondo, olorondi, olorondo, olororido

Cyphostemma natalitium J.J.M. Van der Merwe (*Cissus connivens* Lam.; *Cissus natalitia* (Szyszyl.) Codd; *Cissus orientalis* Lam.; *Cissus orientalis* Gray; *Vitis arborea* L.; *Vitis natalitia* Szyszyl.)

South Africa. Creeping, trailing

See *Species Plantarum* 1: 203. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 332, t. 84. f. 2. 1791, *Proc. Amer. Acad. Arts* xxiii. (1888) 227. 1888, *Polypetalae disciflorae Rehmannianae* 45–46. 1888 and *Bothalia* 6: 545. 1956, *Naturalia monspeliensis*. *Série Botanique*. 18: 219. 1967

(Veterinary medicine, colic in cattle.)

Cyphostemma nieriense (T.C.E. Fr.) Desc. (*Cissus nieriensis* T.C.E. Fr.)

East Africa. Climber, trailing, strong tendrils, leaves boiled and eaten as a vegetable

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 562, f. 3. 1923, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 123. 1960, *Naturalia monspeliensis*. *Série Botanique*. 18: 225. 1967

(Root decoction taken for swelling.)

in Kenya: erodo

Cyphostemma orondo (Gilg & M. Brandt) Desc. (*Cissus orondo* Gilg & M. Brandt)

Tropical Africa. Herb, semi-succulent, creeping, liana, scented roots, yellow flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 502, f. 9. 1912, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 122. 1960, *Naturalia monspeliensis*. *Série Botanique*. 18: 225. 1967

(Leaves and roots tonic, antiinflammatory, antiseptic, for boils, burns, venereal diseases, abdominal pain during pregnancy.)

Cyphostemma setosum (Roxb.) Alston (*Cissus setosa* Roxb.)

Malawi, India, Sri Lanka. Prostrate herb

See *Flora Indica*; or descriptions of Indian Plants 1: 428. 1820 and *A Hand-book to the Flora of Ceylon* 6, Suppl.: 53. 1931

(Poultice for wounds, boils. Veterinary medicine, leaf paste applied locally for rheumatism.)

in India: berre bachhali

Cyphostemma ukerewense (Gilg) Desc. (*Cissus ukerewensis* Gilg)

East Africa. Herbaceous liana, aromatic leaves, flowers creamy greenish

See *Die Pflanzenwelt Ost-Afrikas* C: 260, T. 27/H-M. 1895 and *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 125. 1960, *Naturalia monspeliensis*. *Série Botanique*. 18: 229. 1967, *Journal of Ethnopharmacology* 122: 273–293. 2009

(Veterinary medicine, fly repellent, vermifuge, for intestinal parasites, maggots, ticks.)

in Uganda: amana-akuri

Cypripedium L. Orchidaceae

From the Greek *Kypris*, a name of Aphrodite and *pedilon* 'a slipper', referring to the shape of the flowers, of the lips, see *Species Plantarum* 2: 951. 1753, *Parad. Lond.* 2: t. 89. 1807, *La Belgique Horticole* 1: 177. 1851, *Bot. Jahrb. Syst.* 19(1): 39. 1894, *Orchidacearum Genera et Species* 1: 13, 15, 37. 1897 and *Orchid. Gen. Sp.* 1: 24. 1901, *Pflanzenr.* (Engler) IV.50 (Heft 12): 29. 1903, *Lexikon Generum Phanerogamarum* 159. 1903, *Orch. Dig.* 43: 137, 141. 1979, *Acta Phytotax. Sin.* 24(4): 317. 1986, *Proc. 12th World Orchid Conf.*, 1987 (eds. K. Saito & R. Tanaka) 145. 1987, *Lindleyana* 9(2): 137. 1994, *Botanical Magazine Monograph: The genus Cypripedium* 120, 135, 190, 225. 1997 [P.J. Cribb], *Polish Botanical Journal* 46(1): 11–12. 2001, *Orchidee* (Hamburg) 59(1): 45. 2008, *Orchideengattung Cypripedium* 172, 294, 318. 2009. The dermatogenic quinone, cypripedin, has been identified in these orchids.

Cypripedium acaule Aiton (*Calceolus hirsutus* (Mill.) Nieuwl.; *Cypripedium acaule* f. *albiflora* E.L. Rand & Redfield; *Cypripedium acaule* f. *biflorum* P.M. Br.; *Cypripedium acaule* f. *lancifolia* House; *Cypripedium hirsutum* Mill., nom. rej.; *Cypripedium humile* Salisb.; *Fissipes acaulis* (Aiton) Small; *Fissipes acaulis* f. *lancifolia* House; *Fissipes hirsuta* (Mill.) Farw.; *Fissipes hirsuta* f. *albiflora* (E.L. Rand & Redfield) Farw.)

North America. Perennial herb, clumped, rhizome geophyte

See *Species Plantarum* 2: 951. 1753, *Hortus Kewensis*; or, a catalogue ... (W. Aiton) 3: 303. 1789, *Flora of Mount Desert Island, Maine* 154. 1894 and *Flora of the Southeastern United States* 311. 1903, *Bull. New York State Mus. Nat. Hist.* 254: 236. 1924, *Pap. Michigan Acad. Sci.* 23: 128. 1938, Mitchell, J.C., Rook, A. *Botanical Dermatology*. Greenglass Ltd, Vancouver, B.C., Canada. 1979, *Taxon* 30: 845–851. 1981, *Taxon* 31: 596–597. 1982, Reddoch, A.H., Reddoch, J.M. "Warning: Lady's-slippers can be hazardous to your health." *Plant Press* 2(1): 10. 1984, Macaulay, J.C. "Orchid allergy." *Contact Dermatitis* 17: 112–113. 1987, *N. Amer. Native Orchid J.* 1(3): 197. 1995

(The plant can cause severe dermatitis in some individuals, as do the other *Cypripedium* spp., upon contact with the glandular hairs on the leaves and stem. Roots analgesic, anticonvulsive, anthelmintic, sedative, used for menstrual disorders, neuralgia, urinary tract problems, stomachache, worms, kidney troubles, venereal diseases, spasms, nervousness, colds, influenza, diabetes; an infusion taken for diabetes and influenza. Magic, love medicine.)

in English: moccasin flower, nerve-root, pink lady's slipper, two-leaf lady's slipper

Cypripedium arietinum R. Br. (*Arietinum americanum* L.C. Beck; *Criosanthes arietina* (R. Br.) House; *Criosanthes arietina* (W.T. Aiton) House; *Criosanthes borealis* Raf.; *Cypripedium arietinum* W.T. Aiton; *Cypripedium arietinum* f. *albiflorum* House; *Cypripedium arietinum* f. *biflorum* P.M. Br.)

North America, China. Perennial

See *Hortus Kewensis*; or, a catalogue ... (W.T. Aiton), The second edition 5: 222. 1813, *Amer. Monthly Mag. & Crit. Rev.* 2: 268. 1818, *Bot. North. Middle States*: 352. 1833, *La Belgique Horticole* 1: 177. 1851 and *Bull. Torrey Bot. Club* 32: 374. 1905, *Bull. New York State Mus. Nat. Hist.* 243–244: 48. 1923, *Taxon* 30: 845–851. 1981, *N. Amer. Native Orchid J.* 1: 198. 1995

(Whole plant decoction analgesic.)

in English: ram's head lady's slipper

Cypripedium calceolus L. (*Calceolus alternifolius* St.-Lag.; *Cypripedilon marianus* Rouy; *Cypripedilon marianus* (Crantz) Rouy; *Cypripedium alternifolium* St.-Lag., nom. illeg.; *Cypripedium atsmori* C. Morren; *Cypripedium boreale* Salisb., nom. illeg.; *Cypripedium cruciatum* Dulac, nom. illeg.; *Cypripedium ferrugineum* Gray, nom. illeg.; *Cypripedium microsaccos* Kraenzl.)

Europe to Japan. Terrestrial, rhizome geophyte, yellow inflated lip

See *Species Plantarum* 2: 951. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Journal de Botanique (Morot)* 8(3): 58. 1894 and *Informatore Botanico Italiano* 10: 379–389. 1978, *Opera Botanica* 52: 1–38. 1979, *Bot. Zurn.* 64 (6): 863–877. 1979, *Informatore Botanico Italiano* 12: 117–120. 1980, Reddoch, A.H., Reddoch, J.M. "Warning: Lady's-slippers can be hazardous to your health." *Plant Press* 2(1): 10. 1984, *Botaničeskij Žurnal (Moscow & Leningrad)* 74: 1671–1673. 1989, *Mitt. Arbeitskreis Heimische Orchid. Baden-Württemberg* 21: 452. 1989, *Bjulleten' Glavnogo Botaniceskogo Sada* 155: 60–66. 1990, *Botaničeskij Žurnal (Moscow & Leningrad)* 76: 473–476. 1991, *Botaničeskij Žurnal (Moscow & Leningrad)* 79(7): 134–135. 1994

(The plant causes a type of dermatitis that resembles the dermatitis caused by poison ivy (*Rhus* spp.))

in English: lady's slipper orchid, yellow lady's-slipper

Cypripedium montanum Douglas ex Lindl. (*Cypripedium montanum* f. *praetertinctum* Sheviak; *Cypripedium montanum* f. *welchii* P.M. Br.; *Cypripedium occidentale* S. Watson)

North America. Perennial

See *Gen. Sp. Orchid. Pl.*: 528. 1840, *Proceedings of the American Academy of Arts and Sciences* 11: 147. 1876 and *Rhodora* 92(870): 48. 1990, *North American Native Orchid Journal* 1(3): 198. 1995

in English: mountain lady's-slipper

Cypripedium parviflorum Salisb. (*Calceolus parviflorus* (Salisb.) Nieuwl.; *Criosanthes parviflora* (Salisb.) Raf.; *Cypripedium bulbosum* var. *parviflorum* (Salisb.) Farw.; *Cypripedium calceolus* subsp. *parviflorum* (Salisb.) Hultén; *Cypripedium calceolus* L. var. *parviflorum* (Salisb.)

Fernald; *Cypripedium hirsutum* var. *parviflorum* (Salisb.) Rolfe; *Cypripedium luteum* var. *parviflorum* (Salisb.) Raf.; *Cypripedium parviflorum* Salisb.)

Subarctic Americ, North America. Perennial herb, rhizome geophyte

See *Species Plantarum* 2: 951. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Transactions of the Linnean Society of London* 1: 77, pl. 2, f. 2. 1791, *Fl. Tellur.* 4: 46. 1838 and *Orchid Rev.* 15: 184. 1907, *American Midland Naturalist* 3: 118. 1913, *Rep. (Annual) Michigan Acad. Morris; *Cypripedium pubescens* Willd.; *Cypripedium undatum* Raf.; *Cypripedium veganum* Cockerell & Barker; *Cypripedium veganum* Cockerell, P. Barker & M. Barker)

Subarctic America, North America. Perennial herb, rhizome geophyte

See *Species Plantarum* 2: 951. 1753, *Transactions of the Linnean Society of London* 1: 77, pl. 2, f. 2. 1791, *Hortus Berolinensis* 1: pl. 13. 1804, *Medical Flora* 1: 142. 1828 and *Proceedings of the Biological Society of Washington* 14(35): 178. 1901 [1900], *Rhodora* 8(89): 93. 1906, *Rep. (Annual) Michigan Acad. Sci.* 15: 170. 1913, *Rhodora* 28(333): 168–169. 1926, *Amer. Midl. Naturalist* 10: 207. 1927, *Our Wild Orchids*: 8, 11. 1929, *Botanical Museum Leaflets Harvard University* 7: 14. 1938, *Contr. Inst. Bot. Univ. Montréal* 36: 67–68. 1940, *Taxon* 30: 845–851. 1981, *Amer. Orchid Soc. Bull.* 62: 403. 1993, *Kromosomo* 77: 2636–2645. 1995, *American Journal of Botany* 85(5): 681–687. 1998

(Sedative, nervine and antispasmodic, analgesic, anthelmintic, no narcotic effects, used in nervous headache, female troubles, epilepsy, tremors, nervous breakdown, fevers,

inflammations, indigestion, toothache. Magico-religious beliefs, ritual, hallucinogen.)

Cypripedium reginae Walter (*Calceolus reginae* (Walter) Nieuwl.; *Cypripedium album* Aiton; *Cypripedium canadense* Michx.; *Cypripedium hirsutum* Mill.; *Cypripedium hirsutum* f. *album* R. Hoffm.; *Cypripedium reginae* f. *albola-bium* Fernald & B.G. Schub.; *Cypripedium reginae* f. *album* (Aiton) House; *Cypripedium reginae* var. *album* (Aiton) Rolfe; *Cypripedium spectabile* Salisb.; *Fissipes hirsutum* (Mill.) Farw.)

North America. Rhizome geophyte

See *Species Plantarum* 2: 951. 1753, *The Gardeners Dictionary: ... eighth edition no. 3*. 1768, *Flora Caroliniana, secundum ...* 222. 1788 and *Flora of the Southeastern United States* 311. 1903, *Druggist's Circular and Chemical Gazette* 61: 230. 1917, *Taxon* 30: 845–851. 1981, Reddoch, A.H., Reddoch, J.M. “Warning: Lady’s-slippers can be hazardous to your health.” *Plant Press* 2(1): 10. 1984

(The plant can cause dermatitis in sensitive individuals. The symptoms are similar to those of poison-ivy, *Rhus* spp.)

in English: showy lady's-slipper

Cyrtrandra Forst. & Forst.f. Gesneriaceae

From the Greek *kyrtos* ‘curved, arched’ and *aner, andros* ‘male, stamen’, referring to the humped stamens; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 5, t. 3. (Nov.) 1775 and *Phytologia* 63(6): 476. 1987, *Gard. Bull. Singapore* 55(1): 38. 2003.

Cyrtrandra cupulata Ridl.

Malaysia. Herb

See *Journal of the Linnean Society, Botany* 32: 527. 1896

(Plant decoction as a postpartum remedy. Leaves and roots decoction against fever.)

Malay names: bebangun, kabut

Cyrtrandra mamillata Hallier f.

Indonesia. Herb, glossy green leaves, red flowers

See *Bulletin de l'Herbier Boissier* 6: 287. 1898

(Crushed young leaves infusion used as a wash to reduce fever, in pox and measles.)

in English: fairy bluebird nest herb

in Indonesia: udu salapunei

Cyrtrandra oblongifolia C.B. Clarke

Borneo. Epiphyte

See *Monographiae Phanerogamarum* 5: 206. 1883

(Roots boiled together with roots of *Lasianthus main-gayi* and the liquid drink as abortifacient and for menstrual irregularity.)

in Sarawak: kudakalang

Cyrtandra pendula Blume (*Cyrtandra pendula* Nadeaud, nom. illeg.)

Indonesia, Java. Herb, creeping, ascending, yellowish white 5-lobed corolla densely villous, inflorescence an axillary umbel

See *Bijdragen tot de flora van Nederlandsch Indie* 14: 768. 1826 [Jul-Dec 1826], *Énumération des Plantes Indigènes de l'Île de Tahiti* 60. 1873 [Jan-Jul 1873], *Monographiae Phanerogamarum* 5: 278. 1883 and *Edinburgh Journal of Botany* 60: 331–360. 2003

(Whole plant decoction taken as a postpartum remedy.)

in Malaysia: asam batu, meroyan panas

Cyrtandra phoenicolasia Lauterb.

Borneo. Herb

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 541. 1910

(Crushed leaves poulticed on the forehead for fever.)

Cyrtandra pilosa Blume

Malaysia. Herb

See *Bijdragen tot de flora van Nederlandsch Indie* 14: 770. 1826

(Plant decoction as a postpartum remedy.)

Malay name: lemak batu

Cyrtandra wariana Schltr.

Papua New Guinea.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 58: 360. 1923

(Used to treat sores, boils, cuts.)

Cyrtandromoea Zoll. Scrophulariaceae

Greek *homoios*, *homios* 'resembling, similar to', see *Systematisches Verzeichniss der im Indischen Archipel* 3: 55, 58. 1855.

Cyrtandromoea grandis Ridl.

Malaysia.

See *J. Straits Branch Roy. Asiat. Soc.* 44: 87. 1905, *Beitr. Biol. Pflanzen.* 68: 51–71. 1994

(For fever, pound the leaves and poultice with them.)

Malay name: bayam beraleh

Cyrtandromoea nicobarica (Kurz) N.P. Balakr. (*Cyrtandra acuminata* Kurz; *Cyrtandromoea nicobarica* N.P. Balakr.)

India, Nicobar. Herb or shrub, simple oblong leaves, white flowers in clusters, fruits enclosed by calyx

See *Journal of Botany, British and Foreign* 13: 329. 1875 and *Notes from the Royal Botanic Garden, Edinburgh* 35(1): 118. 1976

(Leaves febrifuge, a decoction for jungle fever.)

Malay name: sugumber putih

Cyrtanthus Aiton Amaryllidaceae (Alliaceae, Liliaceae)

From the Greek *kyrtos* 'curved, arched' and *anthos* 'flower', in allusion to the curved tube of perianth, see *Hortus Kewensis*; or, a catalogue ... 1: 414. 1789, *Genera Plantarum* 122. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 524, 538. 1791 and *Gen. S. Afr. Fl. Pl.* ed. 2. 204. 1951, Reid, C. & Dyer, R.A. *A Review of the Southern African Species of Cyrtanthus*. The American Plant Life Society, La Jolla, California. 1984, Duncan, G.D. *Cyrtanthus*. In N.M. Du Plessis & G.D. Duncan, *Bulbous Plants of Southern Africa*. Tafelberg, Cape Town. 1989, Hutchings, A., Scott, A.H., Lewis, G. & Cunningham, A. *Zulu Medicinal Plants*. University of Natal Press, Scottsville, Pietermaritzburg. 1993.

Cyrtanthus obliquus (L.f.) Aiton (*Amaryllis pendula* Salisb.; *Amaryllis umbella* L'Hér.; *Crinum obliquum* L.f.; *Cyrtanthus obliquus* Aiton; *Cyrtanthus varius* M. Roem.; *Loxanthes pendula* Salisb.; *Loxanthes pendula* (Salisb.) Salisb., nom. inval.; *Timmia obliqua* (L.f.) J.F. Gmel.; *Timmia obliqua* J.F. Gmel.)

South Africa. Evergreen, large fleshy bulb, tubular pendulous red to orange flowers

See *Supplementum Plantarum* 195. 1782, *Sertum Anglicum* 15. 1789, *Systema Naturae* ed. 13[bis]. 2(1): 524, 538. 1791, *Prodr. Stirp. Chap. Allerton* 231. 1796, *Familiarum Naturalium Regni Vegetabilis Monographicae* 4: 48. 1847, *Genera Plantarum* [Salisbury] 117. 1866

(A decoction of the bulb used to treat chronic coughs, chest complaints; dry bulb to relieve headache; the root for catarrh, cough, broken limbs and sprains, cuts.)

in English: giant cyrtanthus, sore eye flower

in South Africa: Justifina, Knysna lily, Knysnalelie, Umathaga, uMathunga (Zulu)

Cyrtocarpa Kunth Anacardiaceae

Greek *kyrtos* 'curved, arched' and *karpos* 'a fruit', see *Nova Genera et Species Plantarum* [H.B.K.] 7: 15 (ed. fol.); 19 (ed. qu.). 1824 [dt. 1825; publ. on 2 Nov 1824].

***Cyrtocarpa procera* Kunth (*Schinus procerus* Marchand)**

South America, Mexico.

See *Nova Genera et Species Plantarum* [H.B.K.] vii. 20. t. 609. 1824 [dt. 1825; publ. on 2 Nov 1824], *Révision du groupe des Anacardiacees* 164. 1869

(Resin applied to the forehead to alleviate headache.)

in English: family cashew

in Central America: chupadilla

in Chile: molle de Chile

in Mexico: chupandía, coco de cerro, copalcojote, maxocote

Cyrtomium C. Presl Dryopteridaceae (Aspleniaceae)

Greek *kyrtos* ‘curved, arched, arch’, *kyrtoma* ‘rotundity’, referring to the veins of the leaves or to the habit of the plants; see K. B. Presl, *Tentamen Pteridographiae, seu genera Filicacearum*. 86, t. 2, fig. 26. Prague 1836.

Cyrtomium falcatum (L.f.) C. Presl (*Aspidium falcatum* Sw.; *Aspidium falcatum* (L.f.) Sw.; *Cyrtomium falcatum* (L.f.) Presl & C. Chr.; *Cyrtomium falcatum* C. Presl; *Cyrtomium yiangshanense* Ching & Y.Z. Lan; *Dryopteris falcata* (L.f.) Kuntze; *Dryopteris falcata* Kuntze; *Dryopteris falcata* (Liebm.) C. Chr.; *Dryopteris falcata* C. Chr.; *Phanerophlebia falcata* (L.f.) Copel.; *Polypodium falcatum* Kellogg; *Polypodium falcatum* L.f.; *Polystichum falcatum* (L.f.) Diels; *Polystichum falcatum* Fée)

China, Japan, India.

See *Supplementum Plantarum* 446. 1781[1782], *Schrad. Journ.* 1800 [2]. 31. 1801, *Icones Filicum* 1(4): t. 69. 1828, *Numer. List* [Wallich] n. 376. 1828, *Tentamen Pteridographiae* 86. 1836, *Proc. Calif. Acad. Sci.* 1: 20. 1854, *Synopsis Filicum* 257. 1868, *Handbook to the Ferns of British India* 211. 1883, *Revisio Generum Plantarum* 2: 812. 1891, *Minnesota Botanical Studies* 1: 779. 1897, *Die Natürlichen Pflanzenfamilien* 1(4): 194. 1899 and *Index plantarum japonicarum sive enumeratio plantarum ...* 1: 342. 1904, *Kongel. Danske Vidensk. Selsk. Skr., Naturvidensk. Math. Afd. ser. 7, 10, pt. 2:* 270. 1913, *Amer. Fern J.* 20: 47. 1930, *Genera Filicum* [Copeland] 111. 1947, *Nat. Hist. Tokai Distr.* 2: 35. 1976, *Nucleus* 20: 105–108. 1977, *Record of the Flora of Jiangsu (Kiangsu) Province* 1: 466. Peking, 1977 [Jiangsu (Kiangsu) Province Botanical Research Institute.], *J. Geobot.* 25: 247–259. 1978, *J. Sci. Engin.* 22: 121–144. 1985, *Ann. Tsukuba Bot. Gard.* 3: 1–7. 1985, *Invest. Stud. Nat.* 8: 43–52. 1988, *Aspects Pl. Sci.* 11: 459–465. 1989, *Cryptog. Himalayas* 2: 163–178. 1990, *Fern Gaz.* 14: 301–312. 1994, *Korean J. Pl. Taxon.* 32: 143–158. 2002, *Ann. Tsukuba Bot. Gard.* 22: 1–141. 2003, *Acta Bot. Yunnan.* 25(6): 663–670. 2003, *Bot. J. Linn. Soc.* 150: 221–228. 2006

(Anthelmintic, against tapeworms.)

in English: Asiatic holly fern, holly fern, house holly fern

in Japan: oni-yabu-sotetsu (= devil *Cyrtomium*, large *Cyrtomium*)

Cyrtophyllum Reinw. Loganiaceae

From the Greek *kyrtos* ‘curved, arched’ and *phyllon* ‘leaf’, see *Kongl. Vetenskaps Academiens Nya Handlingar* 3: 132. 1782, *Prodromus Florae Novae Hollandiae* 454. 1810, *Sylloge Plantarum Novarum* 2: 8–9. 1828[1825], *Bijdr. Fl. Ned. Ind.* 1022. 1826–1827, *Nova Genera et Species Plantarum ...* 2: 133. 1827.

Cyrtophyllum peregrinum Reinw. (*Fagraea peregrina* (Reinw.) Blume)

Malaysia.

See *Sylloge Plantarum Novarum* 2: 9. 1828[1825], *Rumphia* 2: 34. 1838

(Roots decoction for blood in stools.)

Malay name: tembusu

Cyrtosperma Griffith Araceae

From the Greek *kyrtos* ‘curved, arched, swelling’ and *sperma* ‘a seed’; see *Notul. Pl. Asiat.* 3: 149. 1851, *Bonplandia* 5: 129. 1857 and Hay, Alistair (1955–), *Cyrtosperma Griffith and the Origin of the Aroids: a thesis ...* Doctor of Philosophy in the University of Oxford. [Oxford]: University of Oxford, 1986, D.H. Nicolson, “Derivation of aroid generic names.” *Aroideana*. 10: 15–25. 1988, *Blumea* 33: 427–469. 1988, *Blumea* Suppl. 8: 1–161. 1995.

Cyrtosperma merkusii (Hassk.) Schott (*Arisacontis chamissonis* Schott; *Cyrtosperma bantamense* Koord.; *Cyrtosperma chamissonis* Merr.; *Cyrtosperma chamissonis* (Schott) Merr.; *Cyrtosperma cuspidilobum* Schott; *Cyrtosperma dubium* Schott; *Cyrtosperma edule* Schott; *Cyrtosperma ferox* N.E. Br. & L. Linden; *Cyrtosperma intermedium* Schott; *Cyrtosperma lasioides* Griff.; *Cyrtosperma merkusii* var. *giganteum* Nadeaud; *Cyrtosperma merkusii* var. *intermedium* (Schott) Engl.; *Cyrtosperma nadeaudianum* J.W. Moore; *Lasia merkusii* Hassk.)

Malesia, Indonesia, Pacific. Deeply rooted, rhizome geophyte, significant provitamin A carotenoid content

See Hasskarl, Justus Karl (1811–1894), *Catalogus Plantarum in Horto Botanico Bogoriensi Cultarum Alter* 59. Bataviae, 1844, *Notul. Pl. Asiat.* (Posthum. Pap.) 3: 149. 1851, *Icones Plantarum Asiaticarum* 3: t. 169. 1851, *Oesterreichisches Botanisches Wochenblatt* 7: 61, 269. 1857, *Bonplandia* 5: 129. 1857, *Bonplandia* 9: 367. 1861, *Annales Museum Botanicum Lugduno-Batavi* 1: 284. 1864, *Monographiae*

Phanerogamarum 2: 271. 1879, *L'illustration horticole* 39: 39, t. 153. 1892 and *Philippine Journal of Science Section C, Botany*. Manila 9: 65. 1914, *Bernice P. Bishop Mus. Bull.* 102: 22. 1933, *J. Agric. Trad. Bot. Appl.* 29(2): 185–203 1982, *Nordic Journal of Botany* 9: 119–166. 1989, *Biochem. Mol. Biol. Int.* 31(1): 73–81. 1993, *Aroideana* 24: 102–104. 2000, Govaerts & Frodin, *World Checklist and Bibliography of Araceae*. 2002, *Ann. Bot.* (London). 91(7): 755–769. 2003, *Public Health Nutr.* 9(5): 631–643. 2006

(Spiny. Spadix decoction as emmenagogue and ecboic. The raw tuber is irritant to the skin and to the mucous membrane of the mouth.)

in English: baba, giant swamp taro, giant taro, taro

in Philippines: palauan

Cyrtosperma senegalense (Schott) Engl. (*Lasimorpha afzelii* Schott; *Lasimorpha senegalensis* Schott)

Congo, Senegal. Herb, spiny, coriaceous leaves, spathe interior yellow-maroon purplish, spadix purplish, red fruits, seeds covered with dentate crests, young leaves edible, salt from the burnt plant, semiaquatic, growing in swamp in shallow water, leaf petioles eaten by gorillas

See *Bonplandia* (Hanover) 5(8): 127. 1857, *Genera Aroidearum exposita* t. 8f, f. 11. 1858, *Monographiae Phanerogamarum* 2: 270. 1879

(Berries to treat gonorrhoea and dysentery.)

in Central African Republic: kakawa

in Gabon: bin bon bon, ntinouriosa, sel indigène

Cystopteris Bernhardi Woodsiaceae (Aspleniaceae, Dryopteridaceae)

Bladder fern, from the Greek *kystis* ‘a bladder’ and *pteris* ‘fern’, referring to the inflated indusium, to the bladder-shaped sori; see Johann Jakob Bernhardt (1774–1850), in *Neues Journal für die Botanik*. [Edited by Heinrich Adolph Schrader, 1767–1836] 1(2): 26. Erfurt 1805.

Cystopteris fragilis (L.) Bernh. (*Aspidium dentatum* Sw.; *Aspidium fragile* (L.) Sw.; *Aspidium fragile* var. *fumarioides* M. Martens & Galeotti; *Aspidium viridulum* Desv.; *Athyrium dentatum* (Sw.) Gray; *Athyrium fragile* (L.) Spreng.; *Athyrium fumarioides* C. Presl; *Cyathea anthriscifolia* (Hoffm.) (Rhizome anthelmintic.)

in English: bladder fern, brittle bladder fern, brittle fern, fragile fern

Cytisus Desf. Fabaceae (Genisteae)

Latin *cytismus* or *cytisum* and Greek *kytisos* for woody legumes, for a shrubby kind of clover much valued by the ancients, perhaps the shrubby snail-clover; Plinius, Hippocrates in *De Natura Muliebri* 93 and Theophrastus in *HP.* 4.16.5. (Loeb Classical Library 1916) presumably applied to *Medicago arborea* L.

Cytisus scoparius (L.) Link (*Genista andreana* Puiss.; *Genista scoparia* Lam.; *Sarothamnus bourgaei* Boiss.; *Sarothamnus oxyphyllus* Boiss.; *Sarothamnus scoparius* (L.) W.D.J. Koch; *Sarothamnus vulgaris* Wimm., nom. illeg. superfl.; *Spartium scoparium* L.)

Europe. Perennial non-climbing shrub, deciduous, woody, ridged, erect, glabrous, forms dense stands, flowers bright yellow with red spotted keel, not to be confused with Spanish broom (*Spartium junceum*) which has been associated with severe toxicity

See *Species Plantarum* 2: 708–709. 1753, *Flore Française* 2: 619. 1778, *Flora Atlantica* 2: 139. 1798, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 241. 1822, *Flora von Schlesien* 278. Feb–Jul 1832, *Synopsis Florae*

Biol.* 3: 57–71. 1986, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 9: 251–262. 1986, *Lagasalia* 15: 112–119. 1988, *Opera Botanica* 137: 1–42. 1999, *BMC Complementary and Alternative Medicine* 6: 8. 2006, *Journal of Ethnopharmacology* 109(1): 41–47. 2007

(Toxic, potential toxicity; sparteine may affect the electrical conductivity of heart muscle, sparteine is known to cause uterine contractions and should be avoided during pregnancy. Diuretic, oxytocic, cathartic, bitter narcotic, emetic, cardiotoxic, emetic, hypotensive, vasoconstrictor, antioxidant, hepatoprotective, used to stimulate uterine contractions at birth and to reduce postpartum hemorrhage, bleeding after birth; a decoction of the tops in dropsy, chest complaints, jaundice, toothache; blossoms used for making an unguent to cure the gout.)

in English: broom, broom tops, common broom, English broom, European broom, green broom, Irish broom, Scotch broom

in China: chin ch'iao

D

Dacrydium Lambert Podocarpaceae

Greek *dakry*, *dakryon* ‘tear’, *dakrydion* ‘a small tear’, the tree exudes drops of resin; see *Florulae Insularum Australium Prodrromus* 80. 1786, Aylmer Bourke Lambert (1761–1842), *A description of the genus Pinus* 1: 93 (–94), t. 41. London 1807, *Anleitung zur Kenntniss der Gewächse* 2: 218. 1817 and *Pl. Syst. Evol.* 208: 169–185. 1997, *Botaničeskij Žurnal* (Moscow & Leningrad) 85(7): 58. 2000.

Dacrydium cupressinum Solander ex Forst. f. (*Corneria pierrei* (Hickel) A.V. Bobrov & Melikyan; *Dacrydium cupressinum* Lamb.; *Dacrydium cupressinum* Soland. ex A.B. Lambert; *Dacrydium junghuhnii* Miq.; *Dacrydium pierrei* Hickel; *Thalamia cupressina* Spreng.)

New Zealand. Timber tree, leafy, round-headed top, short stiff scale-like leaves, shiny blue-black nuts in a scarlet cup

See *Florulae Insularum Australium Prodrromus* 80. 1786, *Systema Vegetabilium*, editio decima sexta 3: 890. 1826, *Plantae Junghuhnianae* 1: 4. 1851 and *Bulletin de la Société Dendrologique de France* 76: 74. 1930

(Gum to stop hemorrhage. Bark and leaves astringent, anti-septic, hemostatic. Inner bark for burns and wounds, leaves for sores.)

in English: red pine

in New Zealand: rimu (Maori name)

Dacryodes Vahl Burseraceae

From the Greek *dakryodes* ‘exuding a watery fluid, tear-like’, in reference to the resinous drops exuding from the bark; see *Species Plantarum*, Editio Secunda 1: 471. 1762, *Skrifter af Naturhistorie-Selskabet* 6: 115–116. 1810, *Annales des Sciences Naturelles* (Paris) 2: 346. 1824 and Herman Johannes Lam (1892–1977), “The Burseraceae of the Malay Archipelago and Peninsula, with annotations concerning extra-Malayan species especially of *Dacryodes*, *Santiria* and *Canarium*.” *Bull. Jard. Bot. Buitenzorg*, sér. III. 12(3–4): 281–561, pl. 1–14. 1932, Cuatrecasas, José (1903–1996), “The American species of *Dacryodes*.” *Tropical Woods* 106: 46–65. 1957, *Ann. Missouri Bot. Gard.*, 52: 434–437. 1965.

Dacryodes belemensis Cuatrec. (*Dacryodes kukachkana* L.O. Williams; *Dacryodes trinitensis* Sandwith)

Colombia. Tree, alternate imparipinnate compound leaves, axillary inflorescences, bitter edible fruits, green resinous pulp, hard endocarp, forest understory

See *Tropical Woods* 106: 58. 1957, *Annals of the Missouri Botanical Garden* 52: 436. 1965, *Fieldiana, Botany* 31(10): 251–252. 1967

(Fruit employed to make a resinous bright green stomachic beverage.)

in Colombia: ibapichuna (black fruit, iba, fruit, and pichû, black)

Dacryodes edulis (G. Don) H.J. Lam (*Canarium edule* (G. Don) Hook. f.; *Canarium edule* Engl.; *Canarium edule* Hook. f.; *Canarium saphu* Engl.; *Pachylobus edulis* G. Don; *Pachylobus saphu* Engl.; *Pachylobus saphu* (Engl.) Engl.)

West Africa. Tree, liana, aromatic, whitish somewhat smooth bark, sticky resinous fragrant whitish gum, foliage dark green, petiolate leaves, clustered flowers yellow with rusty brown tomentum, fruits dark pink-reddish, seeds borne in clusters, fruits eaten, kernels as livestock feed, in forest, forest edge

See *Amoenitates Academicae* ... 4: 121. 1759, *Skrifter af Naturhistorie-Selskabet* 6: 116. 1810, *A General History of the Dichlamydeous Plants* 2: 87, 89. 1832, *Niger Flora* [W.J. Hooker]. 285. 1849, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 99. 1893, *Pflanzenw. Ost-Afrikas* B (1895) 200. 1895, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 243. 1896 and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 12(3/4): 336. 1932

(Leaves infusion for yellow fever, wound dressing, parasitic skin diseases, fevers. Stembark infusion stomachic, vermifuge, for malaria, skin diseases, swollen foot. Leaves and bark infusion drunk against rheumatism.)

in English: African pear, native pear

in French: safoutier

in Cameroon: asa minegou, esasia

in Central African Republic: sapu, sene, tonga

in Congo: mussafu, nsafu, ossa

in Gabon: diganga, igaganga, ollem

in Nigeria: ajo, ajoh, asa, bekwa, sha, bosao, boso, elemi, ibagho, oju, orumu, orumu-kyo-kyo, ovhum, ozigo, rumor, ube, ube-oyo, ufe; elemi (Yoruba); orumu (Edo); eben (Efik); boshu (Boki); ube, ube mbu (Igbo)

in West Africa: an pier, piyei

in Yoruba: elemi

Dacryodes klaineana (Pierre) H.J. Lam (*Haematostaphis deliciosa* (A. Chev. ex Hutch. & Dalziel) Pellegr.; *Pachylobus barteri* Engl.; *Pachylobus deliciosus* (A. Chev.) Pellegr.; *Pachylobus deliciosus* (A. Chev. ex Hutch. & Dalziel) Pellegr.; *Pachylobus klaineana* Engl.; *Pachylobus klaineanus* Engl.; *Pachylobus klaineanus* Guillaumin; *Pachylobus paniculatus* Hoyle; *Pachylobus zenkeri* Engl.; *Santiriopsis klaineana* Pierre; *Sorindeia deliciosa* A. Chev. ex Hutch. & Dalziel)

Tropical Africa.

See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1282. 1897, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 366. 1899 and *Bull. Soc. Bot. France* 55: 265. 1908, *Bot. Jahrb. Syst.* xlv. 138. 1910, *Ann. Jard. Bot. Buitenzorg* xlii. 202. 1932, *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 12: 336. 1932, *Bulletin of Miscellaneous Information Kew* 1934: 187. 1934, *Bulletin de la Société Botanique de France* 80: 714. 1934 [1933 publ. 1934], *Taxon* 34(4): 573–606. 1985

(Leaves and exudate astringent, sedative, expectorant, for diarrhea, coughs.)

Dactyladenia Welw. Chrysobalanaceae

From the Greek *daktylos* ‘a finger’ and *aden* ‘a gland’, referring to the stalked glands, see *Species Plantarum* 1: 513. 1753, *Histoire des plantes de la Guiane Française* 2: 698, pl. 280. 1775, *Narrative of an Expedition to Explore the River Zaire* 433. 1818, *Museum Botanicum* 2: 92. 1852 [1856], *Apontamentos Phytogeographicos* 1: 572. 1859, *Genera Plantarum* 1: 602, 608. 1865 and *Fl. Cameroun* 20: 7. 1978, *Fl. Gabon* 24: 7. 1978.

Dactyladenia barteri (Hook.f. ex Oliver) G.T. Prance & F. White (*Acioa barteri* (Hook.f. ex Oliv.) Engl.; *Acioa barteri* Engl.; *Acioa lanceolata* Engl.; *Acioa tenuiflora* Dinkl. & Engl. ex Engl.; *Acioa tenuiflora* Dinkl. & Engl.; *Acioa trillesiana* Pierre ex De Wild.; *Griffonia barteri* Hook.f. ex Oliv.)

Tropical Africa. Climbing shrub or small tree, fluted crooked bole, dense spreading canopy, root system deep, slender branches, more or less climbing, papery-coriaceous dark glossy green leaves, inflorescence a terminal or axillary raceme, sweet scented greenish white flowers, fruit a single-seeded drupe, leaves for fodder, riverside, along river banks, in lowland forest

See *Adansonia* 6: 188. 1865, *Flora of Tropical Africa* [Oliver et al.] 2: 373. 1871, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 382. 1899 and *Brittonia* 31(4): 484. 1979

(Root decoction in cardiac pain and heart troubles. Bark and roots used as a purgative; a liquor made from the bark used as a purgative.)

in English: monkey fruit

in Nigeria: àhàbà, àhàwà, àràbà, íchéku

in Sierra Leone: nye-galei

Dactyladenia lehmbachii (Engl.) Prance & F. White (*Acioa gillettii* De Wild.; *Acioa lehmbachii* Engl.; *Acioa rudatisii* De Wild.; *Acioa rudatisii* De Wild.; *Acioa rudatisii* Engl. ex De Wild.; *Acioa scabrifolia* Hua)

Nigeria. Tree, white petals

See *Bulletin du Muséum d'Histoire Naturelle* 3: 328. 1897, *Die Natürlichen Pflanzenfamilien* 1: 192. 1897, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 379. 1899 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 47. 1903 [*Annales du Musée du Congo (Belge). Botanique.* sér. 5, 1[1]: 47. 1903 [1903–1906 publ. Jun 1903].], *Bull. Jard. Bot. État* 7: 215. 1920, *Brittonia* 31(4): 485–486. 1979

(Laxative.)

in Nigeria: ukan (Efik)

Dactyladenia scabrifolia (Hua) Prance & F. White (*Acioa scabrifolia* Hua)

Tropical Africa, Guinea. Tree, straight, greenish white to pinkish flowers, inflorescence a terminal or axillary raceme, fruit an ovoid smooth drupe, edible seeds, closely related to *Dactyladenia barteri*

See *Bull. Mus. Hist. Nat. (Paris)* 3: 328. 1897 and *Brittonia* 31(4): 486. 1979

(Leaf decoction taken to treat dysentery.)

Dactylicapnos Wallich

Papaveraceae (Fumariaceae)

From the Greek *daktylos* ‘a finger’ and *kapnos* ‘smoke, fumitory, *Fumaria officinalis*’, see *Tentamen Florae Nepalensis Illustratae* 51. 1826, *Linnaea* 8: 457, 468. 1833 and *Feddes Repert.* 83(7–8): 566. 1972 [publ. 1973], *Opera Bot.* 88: 20. 1986.

Dactylicapnos macrocapnos (Prain) Hutch. (*Dicentra macrocapnos* Prain; *Dicentra scandens* sensu Hook.f. & Thoms.)

India.

See *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 65: 12. 1896 and *Bull. Misc. Inform. Kew* 1921, 105. 1921

(Whole plant decoction taken orally against acute fever in infant.)

in China: bao ke zi jin long

in India: kundley

Dactylicapnos scandens (D. Don) Hutch. (*Corydalis scandens* Franch.; *Dactylicapnos multiflora* Hu; *Dactylicapnos*

thalictrifolia Wall.; *Dicentra scandens* (D. Don) Walp.; *Dicentra schneideri* Fedde; *Dicentra thalictrifolia* (Wall.) Hook. f. & Thomson; *Dielytra scandens* D. Don; *Dielytra scandens* (D. Don) G. Don)

Nepal. Small slender plant

See *Prodromus Florae Nepalensis* 198. 1825, *Tentamen Florae Nepalensis Illustratae* 51, pl. 39. 1826, *A General History of the Dichlamydeous Plants* 1: 140. 1831, *Repertorium Botanicum Systematicum*. (Walpers) 1: 118. 1842, *Flora Indica*: being a systematic account of the plants . . . 1: 273. 1855, *Bulletin de la Société Botanique de France* 33: 391. 1886 and *Bulletin of Miscellaneous Information Kew* 1921(3): 105. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 17: 198. 1921, *Bulletin of the Fan Memorial Institute of Biology* 1: 214. 1930

(Plant juice given to relieve indigestion. Roots juice used to stop bleeding and overflow of menstruation.)

in Lepcha: thol

in Nepal: jhilinge

Dactyloctenium Willd. Poaceae (Gramineae)

Greek *daktylos* 'a finger' and *ktenion* 'a little comb', *kteis*, *ktenos* 'a comb', referring to the arrangement of the spikes in the inflorescence, a taxonomically difficult genus, reputed to contain cyanogenetic glucosides; see Carl Ludwig Willdenow (1765–1812), *Enumeratio plantarum horti regii botanici berlinensis*. 1029. 1809 and Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 293–294. Regione Siciliana, Palermo 1988.

Dactyloctenium aegyptium (L.) Willd. (*Aegilops saccharinum* Walter; *Chloris mucronata* Michx.; *Cynosurus aegyptius* L.; *Cynosurus carolinianus* Willd. ex Steud.; *Cynosurus cavara* Ham. ex Dillwyn; *Cynosurus distachyos* Rottler ex Steud.; *Cynosurus aegyptius* L.; *Dactyloctenium aegyptiacum* Willd.; *Dactyloctenium aegyptium* (L.) P. Beauv., nom. illeg., non *Dactyloctenium aegyptium* (L.) Willd.; *Dactyloctenium aegyptium* (L.) Richt., nom. illeg., non *Dactyloctenium aegyptium* (L.) Dactyloctenium radulans (R. Br.) P. Beauv. (*Dactyloctenium aegyptium* sensu J. Black, non (L.) P. Beauv.; *Eleusine aegyptiaca* sensu Benth., non Pers.; *Eleusine radulans* R. Br.) (Latin *radula*, *ae* 'scraper')

Australia. Annual or short-lived perennial, ephemeral, slender, tufted, semi-erect or rarely erect, sometimes prostrate or decumbent and ascending, rapid-growing, pasture grass, fodder, highly palatable especially to sheep, nutritious, sometimes a weed of cultivation and gardens, found in sandy soils, on coarse sands, dry areas, saline soil or calcareous, alluvial places, cracking clays, near the coast

See *Prodromus Florae Novae Hollandiae* 186. 1810, *Essai d'une Nouvelle Agrostographie* 72, 160. 1812

(Can be toxic to cattle, sometimes can cause nitrate-nitrite poisoning.)

in English: button grass, coast button grass, finger grass

Dactylorhiza Necker ex Nevski Orchidaceae

From the Greek *daktylos* 'a finger' and *rhiza* 'a root', referring to the finger-like or digitate tubers or tuberoids. Subarctic and Temperate Northern Hemisphere, see *Sp. Pl.*: 944. 1753, *Elem. Bot.* 3: 402. 1790, *Nouv. Bull. Sci. Soc. Philom. Paris* 19: 316. 1809, *Nat. Arr. Brit. Pl.* 2: 198. 1821, *Deut. Bot. Herb.-Buch*: 50. 1841 and *Fl. URSS* 4: 697, 713, 1935, *Trudy Bot. Inst. Akad. Nauk S.S.S.R., Ser. 1, Fl. Sist. Vyssh. Rast. Moscow & Leningrad* 4: 332. 1937, Vermeulen, Pieter (1899–1981), *Studies on Dactylorchids*. 64. Utrecht, 1947, *Watsonia* 6: 132. 1965, *Taxon* 50: 581–582. 2001.

Dactylorhiza hatagirea (D. Don) Soó (*Orchis hatagirea* D. Don; *Orchis hatagirea* var. *doniana* Soó; *Orchis hatagirea* var. *schlaginweitii* Soó; *Orchis latifolia* var. *indica* Lindl.)

Nepal, Tibet, Pakistan. Erect herb, glabrous, terrestrial, robust, dull purple flowers in dense flowered spikes

See *Prodromus Florae Nepalensis* 23. 1825 and *Annales Universitatis Scientiarum Budapestinensis de Rolando Eötvös Nominatae: Sectio Biologica* 3: 341. 1960, *Nom. Nova Gen. Dactylorhiza*: 4–5. 1962

(Used in Ayurveda and Unani. Roots aphrodisiac, antibacterial, a general tonic, used for boils, burns, cuts and wounds, scabies, ringworms, roundworms; ground roots applied on cuts, to stop bleeding; powdered roots used to hasten the healing of wounds and against urinary and kidney problems. Paste from tuber applied to cuts, warts, boils, bone fractures, burns and wounds, with honey or milk taken as an aphrodisiac and a tonic; tubers made into a paste and mixed with boiled milk and given in kidney pain; raw or boiled rhizome eaten for abdominal pains, fever, diarrhea and stomachache; tuber decoction mixed with milk, sugar and spice given to the patient for a quick recovery. Fresh or dried roots eaten raw to check the bleeding from nose and to increase sexual power. Ceremonial, ritual, flowers offered in Buddhist temples.)

in English: heart orchid

in Bhutan: dbang-lag

in India: ambolakpa, garurpanja, hatajari, hathajari, hathapanja, hathazari, hathpanja, langna, saalab panja, salaab panja gulabi, salaab panja safed, saalampanja, salab-panja, salam panja, salam panjo, salampanja, salampanja nepali, salampunja, sanchu

in Nepal: panchaule, panchaunle

Dactylorhiza incarnata (L.) Soó (*Dactylorhiza incarnata* (L.) Verm.; *Dactylorhiza strictifolia* (Opiz) Rauschert; *Orchis incarnata* L.; *Orchis latifolia* var. *incarnata* (L.) Crép.; *Orchis strictifolia* Opiz)

Europe to Mongolia. Herb, tuber geophyte, roots tuberous slightly flattened and divided into 3–5 finger-like lobes, leaves base sheathing, flowers purple, green bracts narrowly lanceolate, roots edible, in subalpine meadow

See *Flora suecica* 312. 1755, *Naturalientausch* 10: 217. 1825 and *Stud. Dactylorch.* 64–65. 101. 1947, *Nom. Nov. Gen. Dactylorhiza*: 3. 1962, *Wiss. Zeitschr. Mart.-Luth. Univ. Halle, Math.-Nat.* xiv. 492. 1965, *Opera Botanica* 52: 1–38. 1979, *Botaniceskij Žurnal SSSR* 64(6): 863–877. 1979, *Botaniceskij Žurnal SSSR* 65(7): 983–989. 1980, *Botaniceskij Žurnal SSSR* 67(7): 945–951. 1982, *Botaniceskij Žurnal SSSR* 68(12): 1682. 1983, *Botaniceskij Žurnal SSSR* 69(2): 245–247. 1984, *Botaniceskij Žurnal SSSR* 74: 1671–1673. 1989, *Mémoires de la Société Royale de Botanique de Belgique* 11: 30–42. 1989, *Fragmenta Floristica et Geobotanica* 34: 315–326. 1989, *International Organization of Plant Biosystematists Newsletter* 15: 14. 1990

(Root-tuber expectorant, astringent, demulcent, nutritious.)

in Hindi: salap

in Nepal: ongu takpa, panchaunle

in Sanskrit: bhunjata

(Tubers expectorant, astringent, aphrodisiac, nervine tonic, strong stimulant. Roots tonic, aphrodisiac; jelly from roots given in diarrhea, dysentery and chronic fevers; a paste made from the tubers applied over cuts to stop bleeding, wounds and bruises.)

in India: angu lako, banglakh, hathajorhi, paanch anguli, panch aunlay, salammishri, salampanja, salapmisri

Daemia Poiret Asclepiadaceae (Apocynaceae)

Orthographic variant of *Doemia* R. Br.; *Doemia*, presumably from an Arabic name. See Robert Brown, “On the Asclepiadeae.” *Memoirs of the Wernerian Natural History Society*. 1: 39, 50. Edinburgh 1811, Jean Louis Marie Poiret (1755–1834), in *Dictionnaire des Sciences Naturelles*. 12: 448. 1819.

Daemia angolensis Decne.

Angola.

See *Botanisches Wörterbuch* 1: 31. 1797, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 337. 1838

(Astringent, in diarrhea.)

Daemia extensa (Jacq.) R. Br. (*Daemia extensa* (Jacq.) R. Br. ex Schult.; *Doemia extensa* R. Br.; *Doemia extensa* (Jacquin) R. Br.; *Pergularia daemia* (Forssk.) Chiov.; *Pergularia extensa* (Jacq.) N.E. Br.)

India. See also *Pergularia daemia*

See *Flora Aegyptiaco-Arabica* 51. 1775, *Miscellanea Austriaca ad Botanicam, Chemiam, et Historiam Naturalem Spectantia* 2: 353. 1781, *Memoirs of the Wernerian Natural History Society* 1: 50. 1810, *Systema Vegetabilium* 6: 112. 1820 and *Flora Capensis* 4(1): 758. 1908, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 115. 1916, *Journal of the Bombay Natural History Society* 36: 528. 1933, *Proc. Indian Sci. Congr. Assoc.* (III, C) 67: 57. 1980

(Used in Ayurveda and Sidha. Emetic, expectorant, astringent, in rheumatism, uterine bleeding, diarrhea; powdered bark of *Soymida febrifuga* and leaves of *Pergularia daemia* mixed with sheep milk and applied for bone fracture. Veterinary medicine, paste of leaves of *Pergularia extensa* and *Calotropis procera* applied for muscular pains.)

in Tibet: ka ka dza gi

Daemonorops Blume Arecaceae (Palmae)

Greek *daimon* ‘evil spirit, demon’ and *rhops* ‘a shrub’, referring to the spiny rattans. Dragon’s Blood, a red resinous

secretion from the fruits of *Daemonorops* species, see *Species Plantarum* 2: 1189. 1753, *Systema Vegetabilium* 7(2): 1333. 1830. *Daemonorops* sp., *rotan butong*, *rotan riong*, as arrow poison.

Daemonorops brachystachys Furtado

Pen. Malaysia.

See *Gard. Bull. Straits Settlem.* 8: 344. 1935, *Thromb. Res.* 32(2): 97–108. 1983

(Anticoagulant.)

Daemonorops didymophylla Becc. (*Calamus cochleatus* Miq., nom. nud.; *Calamus didymophyllus* (Becc.) Ridl.; *Daemonorops cochleata* Teijsm. & Binn. ex Miq., nom. nud.; *Daemonorops mattanensis* Becc.; *Daemonorops motleyi* Becc.; *Palmijuncus cochleatus* (Miq.) Kuntze, nom. inval.)

Pen. Thailand, Malesia.

See *Fl. Brit. India* 6: 468. 1893, *J. Straits Branch Roy. Asiat. Soc.* 30: 221. 1897 and *Rec. Bot. Surv. India* 2: 224. 1902

(Astringent, resin for diarrhea.)

Malay name: buah jerenang

Daemonorops draco (Willd.) Blume (*Calamus draco* Willd.; *Calamus draconis* Oken; *Daemonorops propinqua* Becc.; *Palmijuncus draco* (Willd.) Kuntze)

Sumatra, Borneo, Thailand.

See *Species Plantarum* 1: 325. 1753, *Systema Vegetabilium* 7(2): 1333. 1830, *Rumphia* 2: viii. 1838, *Revis. Gen. Pl.* 2: 732. 1891, *Fl. Brit. India* 6: 467. 1893

(Used in Ayurveda, Unani and Sidha. Fruits exude a reddish-brown resin used for heart and blood disorders, diarrhea. Astringent and stomachic, the powder used to treat diarrhea.)

in English: deer's blood, dragon's blood

in India: catikkilanku, curalkilanku, damlul akhwain, hiradukhi, kadgamrigarakra, kandamoorgarittum, khadgamrigamnetturu, khadgamriganettaru, khadgamrygamunetturu, khadgamryganettaru, prappankilanku, raktaniryasa, tevattirattal

Daemonorops hallieriana Becc.

India, Indonesia. Climbing palm, rattan

See *Annals of the Royal Botanic Garden. Calcutta.* 12(1): 218. 1911

(Fresh or dried stalk juice drunk or used as an external rub to treat food poisoning.)

in English: rattan seringan

in Indonesia: uwai seringan

Daemonorops jenkinsiana (Griff.) Mart. (*Calamus jenkinsianus* Griff.; *Calamus margaritae* Hance; *Calamus*

(Astringent.)

in China: huang teng

Daemonorops micracantha (Griff.) Becc. (*Calamus micracanthus* Griff.; *Daemonorops draconella* Becc.; *Palmijuncus micracanthus* (Griff.) Kuntze; *Rotang micracanthus* (Griff.) Baill.)

Pen. Malaysia, Borneo.

See *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 5: 62. 1845, *Revisio Generum Plantarum* 2: 733. 1891, *Fl. Brit. India* 6: 467. 1893, *Histoire des Plantes* 13: 299. 1895

(Astringent.)

Daemonorops periacantha Miq. (*Calamus periacanthus* (Miq.) Miq.; *Daemonorops dissitophylla* Becc.; *Daemonorops florida* Becc.; *Palmijuncus periacanthus* (Miq.) Kuntze; *Rotang periacanthus* (Miq.) Baill.)

Indonesia, W. Malesia. Climbing palm, ripe fruits edible

See *Flora van Nederlandsch Indie*, Eerste Bijvoegsel 593. 1861, *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde* 11(5): 28. 1868, *Revisio Generum Plantarum* 2: 732. 1891, *Histoire des Plantes* 13: 300. 1895 and *Nelle Forest. Borneo*: 608. 1902, *Ann. Roy. Bot. Gard.* (Calcutta) 12(1): 230. 1911

(Endosperm of the fruit used as an ingredient of the masticatory called *sirih*.)

in Indonesia: uwai semule

Dalbergia L.f. Fabaceae (Dalbergieae, Leguminosae)

For the Swedish planter Carl Gustav Dahlberg, flourished 1753–1775, botanical collector for Linnaeus, former mercenary soldier in Suriname; the genus also dedicated to his brother, the Swedish botanist and physician Nils E. Dalberg (or Dahlberg, 1736–1819, or 1735–1820). Nils D., court physician, visited France and Germany, he was twice President of the Academy of Sciences of Stockholm, wrote *Tal, om luftens beskaffenhet i stora och folkrika städer, hallet för Kongl. Vetensk. Akademien, den 28 julii 1784, vid praesidii nedläggande*. Stockholm, 1784. See Carl Linnaeus (filius), *Supplementum Plantarum*. 52, 316. 1782 [1781 publ. Apr 1782], *Pl. Jungh.* 256. 1852, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 261. Ansbach 1852, *Fl. Bras.* (Martius) 15(1): 220. 1862 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 90. 1989, Helmut Genoust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 198. 1996, *Brittonia* 49: 88. 1997.

Dalbergia boehmii Taub. (*Dalbergia harmsiana* De Wild.)

Tropical Africa. Perennial non-climbing tree, small white-pinkish cream fragrant flowers

See *Die Pflanzenwelt Ost-Afrikas* C: 218. 1895 and *Ann. Mus. Congo Belge, Bot.* sér. 4, [1(3)]: 194. 1903 [1902–1903 publ. Jan 1903]

(Veterinary medicine, antidote, for snakebite.)

in Tanzania: fifi

Dalbergia candenatensis (Dennst.) Prain (*Amerimnon tortum* (Graham) Kuntze; *Cassia candenatensis* Dennst.; *Dalbergia candenatensis* Prain; *Dalbergia monosperma* Dalzell; *Dalbergia torta* Graham; *Dalbergia torta* A. Gray; *Drepanocarpus monospermus* Kurz; *Drepanocarpus monospermus* (Dalzell) Kurz)

India, Pacific. Perennial climbing shrub, sprawling, scandent, thick woody stems, white flowers in clusters from leaf axils, short brown pods, often in *Cassia tora* L., coastal

See *Species Plantarum* 1: 376–380. 1753, *The Civil and Natural History of Jamaica in Three Parts* 288. 1756, *Schlüssel Hortus indicus malabaricus*, ... 32. 1818, *A Numerical List of Dried Specimens* n. 5873. 1831–1832, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 36. 1850, *Revisio Generum Plantarum* 1: 159. 1891 and *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 70(2): 49. 1901, *Proceedings of the American Philosophical Society*, Vol. 65, No. 5, Supplement (1926), pp. 58–100. 1926, *Reinwardtia* 6(3): 195–223. 1962, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *J. Nat. Prod.* 50(4): 696–699. 1987, *J. Jap. Bot.* 72: 198–220. 1997, *Phytochemistry* 65(7): 925–928. 2004

(Isoflavonoids. Antineoplastic agents.)

in Bangladesh: panchioli

in India: karin-tagera

in Fiji Islands: denimana

Dalbergia chapelieri Baill. (*Dalbergia maritima* R. Vig.; *Dalbergia pterocarpiflora* Baill.)

Madagascar. Perennial non-climbing tree or shrub, inflorescence a terminal or axillary panicle, white corolla, calyx lobes pale green, base of calyx tube red, fruit a flat elliptical to oblong indehiscent pod

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1(55): 436. 1884, *Journal of the Linnean Society, Botany* 25: 312. 1889

(To facilitate childbirth, to treat intestinal parasitism, bilharzia, intestinal troubles, diarrhea and dysentery.)

in Madagascar: hazovola à grandes feuilles, hazovola fotsy, hazovola mainty, hitsika, magnaritolofo, manary be, manary toloho, sovodrano, sovoka, vihimboa, vimboa, voamboana, voambona, voambona beravina

Dalbergia congestiflora Pittier (*Amerimnon congestiflorum* (Pittier) Standl.)

Mexico. Perennial shrub or tree, leaves compound

See *The Civil and Natural History of Jamaica in Three Parts* 288. 1756 and *Journal of the Washington Academy of Sciences* 12(3): 57–58. 1922, *Contributions from the United States National Herbarium* 23(5): 1666. 1926, *Listados Floristicos de Mexico* 4: 90–112. 1986, *Phytochemistry* 65(7): 925–928. 2004

(Heartwood pigment, neocandenatone, an isoflavan-cinnamylphenol quinone methide pigment. Dalbergione, a severe skin irritant.)

in English: Mexican kingwood

Dalbergia cultrata R. Graham (*Amerimnon cultratum* (Graham) Kuntze)

India, Myanmar. Perennial non-climbing tree

See *The Civil and Natural History of Jamaica in Three Parts* 288. 1756, *Supplementum Plantarum* 52, 316. 1781 [1782], *A Numerical List of Dried Specimens* n. 5861. 1831–1832, *Revisio Generum Plantarum* 1: 159. 1891 and *Biological and Pharmaceutical Bulletin* 27(6): 921–925. 2004

(Antifungal, antibacterial, leishmanicidal, febrifuge, stem bark decoction.)

in English: Burma blackwood, Burmese rosewood, yindaik

Dalbergia frutescens (Vell.) Britton (*Amerimnon frutescens* (Vell.) Kuntze; *Dalbergia variabilis* Vogel; *Pterocarpus frutescens* Vell.)

South America. Perennial non-climbing shrub, liana

See *Selectarum Stirpium Americanarum Historia* ... 283. 1763, *Florae Fluminensis* 283. 1825[1829], *Linnaea* 11: 196.

1837, *Bull. Torrey Bot. Club* xvi(12): 324. 1889, *Revisio Generum Plantarum* 1: 159. 1891 and *Contr. Gray Herb.* 184: 91–102. 1958, *Rodriguesia* 28 (41): 137–193. 1976, *Brittonia* 49 (1): 87–109. 1997, *J. Nat. Prod.* 63(10): 1414–1416. 2000

(Antigiardal, antiprotozoal, the bark.)

Dalbergia greveana Baill. (*Dalbergia ambongensis* Baill.; *Dalbergia ambongoensis* Baill.; *Dalbergia eurybothrya* Drake; *Dalbergia ikopensis* Jum.; *Dalbergia isaloensis* R. Vig.; *Dalbergia myriabotrys* Baker; *Dalbergia perrieri* Jum.)

Madagascar. Perennial non-climbing tree, inflorescence a terminal or axillary panicle, calyx campanulate, corolla creamy whitish, fruit a flat indehiscent pod with short stipe, seed kidney-shaped, included in the IUCN Red list of threatened species

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1(55): 436–438. 1884, *Journal of the Linnean Society, Botany* 25: 311–312. 1889 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 180. 1902[1903], *Compt. Rend. Hebd. Séances Acad. Sci.* 140: 453. 1905, *Annales de l'Institut Botanique-Géologique Colonial de Marseille* 5: 320. 1907, *Notulae Systematicae*. *Herbier du Museum de Paris* 14(3): 183. 1951

(Pieces of branches rubbed on stones with water to produce a paste applied to the face as a medicine against various ailments. *Dalbergia greveana* is a sacred tree.)

in English: French rosewood, Madagascar rosewood

in Madagascar: maevalafika, mahitsoririna, manantombobitse, manarimboraka, manary, manary baomby, manary bomby, manary boraka, manary boty, manary havo, manary havoha, manary mavo, manary mendoravina, manary tolo, manary toloho, manary vantany, manary vazanomby, manary voraka, manera, mangary, manipika, mendoravina, mendoravy, tainakanga

Dalbergia horrida (Dennst.) Mabb.

India. Perennial non-climbing shrub

See *A Numerical List of Dried Specimens* n. 5877. 1831–1832 and *Taxon* 26(5/6): 523–540. 1977, *Applied Entomology and Zoology* 43(1): 57–63. 2008

(Leaves insecticide, antimalarial.)

in India: ana mullu, maradeeballi, muldi

Dalbergia horrida (Dennst.) Mabb. var. ***horrida*** (*Amerimnon horridum* Dennst.; *Amerimnon sympatheticum* (Nimmo) Kuntze; *Dalbergia multiflora* B. Heyne; *Dalbergia multiflora* Prain; *Dalbergia sympathetica* Nimmo ex Grah.; *Dalbergia sympathetica* Nimmo)

India. Perennial non-climbing shrub, climber, forage

See *Schlüssel Hortus indicus malabaricus* ... 34. 1818, *Cat. Pl. Bombay* 55. 1839, *Revisio Generum Plantarum* 1: 159. 1891

(Bark used to remove pimples. Leaves alterative.)

in English: simsapa tree

in India: kati-ka-mto, muldi, pentagul, pentgul, petaguli, petguli, pondguliwel, titabli, titavali, yakayela

Dalbergia hostilis Benth. (*Amerimnon hostile* (Benth.) Kuntze; *Dalbergia gillettii* De Wild.; *Dalbergia saxatilis* sensu Cavaco)

Tropical Africa. Perennial non-climbing to erect shrub or small tree, spiny, scrambling, straggling, liana, flowers white, fruit green

See *Journal of the Linnean Society, Botany* 4(Suppl.): 33. 1860, *Revisio Generum Plantarum* 1: 159. 1891 and *African Study Monographs* 25(1): 1–27. 2004

(Leaves and stem analgesic and febrifuge. Leaves febrifuge and for eye problems. Stem pieces to treat toothache. Root decoction to treat venereal diseases, urinary troubles; macerated spines to treat tuberculosis. Magic.)

in Ghana: akroma-mowere, wota

in Nigeria: jerri, karya

in Sierra Leone: febumbwi, lawunuge, sunguru-nabala, sungutundabala

Dalbergia lactea Vatke (*Dalbergia macrothyrsa* sensu Cufod.; *Dalbergia macrothyrsus* auct., Cufod., non Harms; *Dalbergia ruwenzoriensis* De Wild.; *Dalbergia sciadendron* Chiov.; *Dalbergia toroënsis* Baker f.; *Dalbergia ugandensis* Baker f.)

Tropical Africa. Perennial non-climbing tree, straggling, small tree or shrub, multi-branched, scandent, spreading, liane to lianescent shrub, climbing, purplish blue-white flower, leaves with bad smell

See *Oesterreichische Botanische Zeitschrift* 29: 251. 1879

(Stomachic, leaves juice for snakebite and constipation, sap collected and used to treat hepatitis, diarrhea. Veterinary medicine, roots for constipation.)

in Benin: ojiji, ojiji orota

in Burundi: igihuba, umuhasha, umushasha

in Congo: bosongo, mumbuli, mungobole, mwigobole, umuhashya

in Kenya: mwaritha

in Rwanda: umuhashya

in Tanzania: iduri, ilashi, induri, kowa, ligocha, mgungu, tambalangwenzi

Dalbergia lanceolaria L.f. (*Dalbergia lanceolaria* Moon)

Sri Lanka. Perennial non-climbing tree, used for rearing insects and producing lacs

See *The Civil and Natural History of Jamaica* in Three Parts 288. 1756, *Supplementum Plantarum* 316. 1782 [1781 publ. Apr 1782], *Cat. Pl. Ceylon* 51. 1824, *Revisio Generum Plantarum* 1: 159. 1891 and *Journal of Cytology and Genetics* 13: 82–86. 1978, *Cytologia* 54: 51–64. 1989, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Journal of Ethnopharmacology* 102(2): 213–216. 2005, *Pharmaceutical biology* 43(8): 723–725. 2005, *Journal of Ethnopharmacology* 112(2): 300–304. 2007

(Used in Ayurveda and Sidha. Bark antiinflammatory, anti-diarrheal, analgesic, central and peripheral analgesic activity; *Mitragyna parvifolia* bark extract with extract of barks of *Dalbergia lanceolaria*, *Ougeinia oojinensis* and *Pterocarpus marsupium* given for menorrhagia; bark extract of *Woodfordia fruticosa* along with extract of barks of *Oroxylum indicum*, *Mangifera indica*, *Bauhinia racemosa* and *Dalbergia lanceolaria* given for jaundice; bark of *Oroxylum indicum* along with barks of *Pterocarpus marsupium*, *Bridelia retusa*, *Dalbergia lanceolaria* and *Albizia lebeck* crushed with water and the extract given for jaundice; bark of *Dalbergia lanceolaria* along with prop roots of *Ficus benghalensis* and bark of *Oroxylum indicum* crushed with water and the extract given for jaundice; bark of *Dalbergia lanceolaria* along with barks of *Oroxylum indicum*, *Albizia lebeck* and *Pterocarpus marsupium* crushed with water and the extract given for jaundice. Ritual, ceremonial, fruits kept in front of the labor room for easy delivery.)

India. Perennial non-climbing shrub, many-branched shrub or small tree, twining, inflorescence racemose, white flowers, kidney shaped pods

See *Hortus Bengalensis*, or a catalogue ... 98. 1814, *Revisio Generum Plantarum* 1: 159. 1891 and *Taxon* 30(1): 43–47. 1981, *Proceedings of the Indian Science Congress Association* 70(3–vi): 88. 1983, *Phytochemistry* 27(7): 2364–2365. 1988, *Journal of Chemical Crystallography* 29(1): 99–102. 1999

(Isoflavones from the roots. Powdered roots absorb alcohol.)

in India: amanta, ana-mullu, balibagan, chillangi, chillanki, chillanky, cillanki, maradeeballi, muldi

Dalbergia stipulacea Roxb. (*Amerimnon ferrugineum* Kuntze; *Dalbergia ferruginea* Roxb.; *Dalbergia ferruginea* Roxb. var. *daronensis* Elmer; *Dalbergia limonensis* Benth.; *Dalbergia luzonensis* Vogel; *Dalbergia rivularis* Merr. & L.M. Perry; *Dalbergia stipulaceae* Fern.-Vill.)

India, China. Perennial non-climbing tree or shrub, climbing, sprawling, scandent, spreading, pale blue petals strongly recurved

See *Hort. Bengal.* 53, 98. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 233. 1832, *Revisio Generum Plantarum* 1: 159. 1891

(Toxins. Bark juice given for diarrhea, colic and dysentery. Decoction of the wood of the stem or root emmenagogue and abortifacient. Bark and roots used as fish poison; squeezed root as fish poison; stem and rootbark cut into pieces and thrown into ponds for fish poisoning.)

in China: tuo ye huang tan

in India: bijuli, ching ching dit, dat bijla, dieng sohjeruaw, khot bades, khot budu, neushing, phalvang

in Nepal: tatibari, tatiberi

Dalbergia trichocarpa Baker (*Dalbergia boinensis* Jum.; *Dalbergia perrieri* Drake)

Madagascar. Perennial non-climbing tree, inflorescence a terminal panicle, corolla whitish to creamy-yellow, calyx campanulate purple at base with yellowish lobes, densely reddish to yellowish brown hairy indehiscent pods, brown kidney-shaped seeds, included in the IUCN Red list of threatened species

See *Journal of the Linnean Society, Botany* 25: 311. 1889 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 186. 1902[1903], *Compt. Rend. Hebd. Séances Acad. Sci.* 140: 453. 1905

(Bark infusion against diarrhea, leaf decoction for rheumatic pains and the gum to treat laryngitis.)

in Madagascar: manary, manary boty, manary joby, manary kiboty, manary mena, manary toloho, manary zoby, manipika

Dalbergia velutina Benth.

India, Himalaya, Indonesia. Perennial climbing shrub

See *Plantae Junghuhnianae* 2: 255. 1852

(Crushed young leaves applied as a poultice to fresh wounds.)

in Indonesia: aka bo ului

Dalbergia volubilis Roxb. (*Amerimnon volubile* Kuntze; *Amerimnon volubile* (Roxb.) Kuntze; *Dalbergia volubilis* (L.) Urb.; *Dalbergia volubilis* Urb.)

India. Perennial climbing shrub, woody, subcoriaceous leaflets, flowers in compact crowded panicles, forage

See *Revisio Generum Plantarum* 1: 159. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 16: 136. 1919, *Bull. Bot. Surv. India* 17: 64–70. 1978

(Used in Ayurveda and Sidha. Leaves juice as a gargle in sore throat. Leaflets paste given to children with diarrhea. Bark eaten to cure swelling in mouth and tongue. Roots juice in gonorrhoea.)

in Burma: dauktalaung

in India: alai, alei, aloy, baddugaruttuginga, baddugaruttuginja, badribela, bamba, bandeegurjan, bandigarjana, bandigirgin, bandigurugindza, bankhara, bhatia, bir munga, budu galwang, gamlap-tiga, gavideputige, gavilaputheega, gavileputige, gumidi-tiga, gumlap-tiga, kalibeti, kotipachara, latmurga, manganver, mryti, nari siris, narimurga, narisiris, narisisa, nuanba, nubari, punali, punalikkoti, punalippu, rongdi, sirisika, sorumadhugoli

Dalbergiella Baker f. Fabaceae (Leguminosae, Millettieae)

The diminutive of the genus *Dalbergia* L.f., see *J. Bot.* 66(Suppl. 1): 127. 1928.

Dalbergiella nyassae Baker f. (*Dalbergia nitidula* Welw. ex Baker; *Dalbergiella nyassae* Baker f.)

Tropical Africa. Perennial non-climbing tree, leaves imparipinnate, creamy white to pinkish purple flowers in dense terminal sprays

See *The Leguminosae of Tropical Africa* 2: 535. 1929

(Toxins. Fish poison.)

in Tanzania: mmangamtwe

in Zambia: kafundakweo, lupweshya, mukanganzovu, mupetanzovu

Dalbergiella welwitschii (Baker) Baker f.

Tropical Africa. Perennial climbing shrub, liana

See *Flora of Tropical Africa* 2: 240. 1871 and *Journal of Botany, British and Foreign* 66(Suppl. 1): 128. 1928

(Leaves anthelmintic, wound dressing.)

Dalea L. Fabaceae (Amorpheae)

Dedicated to the English apothecary Samuel Dale, 1659–1739 (Bocking, Essex), physician, botanist, plant collector. See C. Linnaeus, *Opera varia*. 244. 1758, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 122–128. London 1790, *Descripción de las Plantas* 185. 1802, *Flora Boreali-Americana* [Michaux] 2: 48–50, pl. 37. 1803, William Munk, *The roll of the Royal College of physicians of London*. 2: 50. London 1878 and *Journal of the New York Botanical Garden* 20(231): 66. 1919, *Contributions from the Gray Herbarium of Harvard University* 65: 22. 1922, J. Britten, *The Sloane Herbarium ... revised and edited by J.E. Dandy*. 122. 1958, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 153. Oxford 1964, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 232. University of Pennsylvania Press, Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 412. 1965, Barneby, Rupert Charles (1911–2000), *Daleae imagines ...*, including all species of Leguminosae tribe Amorpheae Borissova ever referred to Dalea. 1977 [*Memoirs of the New York Botanical Garden* 27. viii, 891 p. 1977], *Flora of Baja California* 644–711. 1980, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 92. 1972, *Brittonia* 40(1): 1–6. 1988.

Dalea aurea Nutt. ex Pursh (*Cylipogon capitatum* Raf.; *Dalea aurea* Nutt. ex Fraser, nom. nud.; *Parosela aurea* (Nutt. ex Pursh) Britton; *Petalostemon capitatus* (Raf.) DC.; *Psoralea aurea* (Nutt. ex Pursh) Poir.)

North America. Perennial subshrub, non-climbing herb

See *Flora Americae Septentrionalis*; or, ... 2: 740–741. 1813, *Catalogue of New and Interesting Plants Collected in Upper Louisiana* no. 29. 1813, *Encyclopédie Méthodique. Botanique ... Supplément* 4(2): 590. 1816, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 244. 1825, *Memoirs of the Torrey Botanical Club* 5(13): 196. 1894 and *Planta Med.* 72(4): 383–386. 2006 [Activity of isoflavans of *Dalea aurea* (Fabaceae) against the opportunistic ameba *Naegleria fowleri*.]

(Leaves infusion drunk against diarrhea, dysentery, colic, stomachache, gastrointestinal disorders.)

in English: golden prairie clover

Dalea boliviana Britton (*Dalea boliviana* var. *herrerai* (J.F. Macbr.) J.F. Macbr.; *Dalea calliantha* Ulbr.; *Dalea hofstenii* R.E. Gard.* 75(3): 1087–1144. 1988, *Syst. Bot.* 13(3): 310. 1988, *Annals of the Missouri*

Botanical Garden 78(1): 257. 1991, *Botanical Journal of the Linnean Society* 105(2): 162, 164, 167–168. 1991, *Systematic Botany* 21(2): 232–234, f. 14. 1996, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002, *New Phytol.* 188(2): 370–384. 2010. Most of the *Dalechampia* species are also noteworthy for the presence of stinging trichomes in the flowers and other plant organs; the trichomes of these species can be irritating to the skin. The male inflorescence includes a laminar gland which exudes a highly sticky compound, a deep-blue resin from a gland subtended by two conspicuous petaloid bracts.

India, Himalaya. Perennial climbing shrub, subscented, shining glabrous leaves, white flowers in lax subsessile axillary inflorescence, large persistent bracts

See *Hortus Bengalensis*, or a catalogue ... 31. 1814, *Cat. Pl. Amer. Sept.*, ed. 2. 42. 1818, *Pl. Coromandel* 3: 55. 1820, *A Numerical List of Dried Specimens* n. 5339. 1831–1832, *Commentationes de Leguminosarum Generibus* 5. 1837, *Ann. Wien. Mus.* 2: 69. 1839, *Flora of British India* 2: 56–306. 1876–1879

(Leaves paste applied on fresh cuts. Ritual, ceremonial, piece of bark used for divination, to determine the cause of diseases.)

in India: anghu-rikang, lai-mithai, laungyaurg-thu, longyorthu, luyang-thu

Daniellia Benn. Fabaceae (Caesalpinaceae, Detarieae)

Named for the British (b. Lincs) botanist William Freeman Daniell, 1818–1865 (d. Southampton, Hants), plant collector in Sierra Leone and Senegal 1841–1853, surgeon in West Africa 1841–1853, later in West Indies and China, Fellow of

the Linnean Society 1855, author of *Sketches of the medical topography and native diseases of the Gulf of Guinea, Western Africa*. London 1849, *Notes on some Chinese Condiments obtained from the Xanthoxylaceae*. [1862] and *On the Cascarilla plants of the West India and Bahama Islands*. [1863]; see *Pharm. Journ.* xiv. (1855) 251. 1855 and G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. London 1904, J. Lanjouw and F.A. Stafleu, *Index Herbariorum. Collectors A-D*. Utrecht 1954, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 23. Utrecht 1971, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 192. [b. 1817] London 1994.

Daniellia oliveri (Rolfe) Hutch. & Dalz. (*Daniellia thurifera* Benn. var. *chevalieri* J. Léonard; *Paradaniellia oliveri* Rolfe)

Tropical Africa, Nigeria. Perennial non-climbing tree, triangular crown, scaly bark, leaves pinnately compound, creamy white scented flowers in flat panicles, flat horny pod, seed purplish, twisted funicle, savanna forest

See *Pharm. J. Trans.* 14: 252. 1855 and *Kew Bull. Add. Ser.* 9: 270. 1911, *Bulletin of Miscellaneous Information Kew* 1912(2): 96–97. 1912, *Bulletin of Miscellaneous Information Kew* 1928(9): 382. 1928, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1(2): 341. 1928, *Journal of Ethnopharmacology* 4: 75–98. 1981, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 114: 44–53. 2007

(An infusion of powdered bark and buds taken for headaches. Leaves and bark decoction tonic, febrifuge, stomachic, for colic and toothache. Gum for treating gonorrhea, chewing and swallowing purgative. Veterinary medicine, for thrush in horses.)

in English: African copaiba balsam tree, copaiba balsam, West African gum copal

in Cameroon: karalahi, kela, toutou

in Central African Republic: birlo

in Congo: giwi, kela

in Ghana: maje, sanya

in Ivory Coast: sandan

in Nigeria: aba, chihar, danchi, maje, igi-iya, irawe odan, iya, kadaura, kaharlahi, kari-dukan, maje, olingui, owagi, ozabwa, oziya ato, samein, telam-ngelaro

in W. Africa: sanan, sandan, surgo

Danthonia DC. Poaceae (Gramineae)

For the French botanist D. (Étienne) Danthoine, fl. 1788, agrostologist; see *Species Plantarum* 1: 79–81. 1753, *Systematisches Verzeichnis* 20, 44. Erfurt 1800, *Flore*

Française. Troisième Édition 3: 32. 1805, *Prodromus Florae Novae Hollandiae* 182. 1810, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Essai d'une Nouvelle Agrostographie* 72, 146. 1812, *Bulletin Botanique Genève* 1: 221. 1830, *Pflanzen und Gebirgsarten von Marienbad* 38. Prag 1837, *Histoire naturelle des Végétaux* 13: 164. Paris 1841, C.G.D. Nees von Esenbeck (1776–1858), *Florae Africae Australioris Illustrationes Monographicae ... I. Gramineae. Glogaviae* 1841, *Synopsis Plantarum Glumacearum* 1: 425. 1854, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 369. Ansbach 1852, *Genera Plantarum* 3(2): 1158, 1163. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887 and J.M. de Wet, "The genus *Danthonia* in grass phylogeny." *American Journal of Botany* 41: 204–211. 1954, *Flora of Australia* vol. 43, Poaceae 1: 141, 149–150, 164, 171–173, 175–176, 198, 229, 246, 269, 308. 2002, *Contributions from the United States National Herbarium* 46: 116, 141, 143, 170–177, 288, 298, 548–550, 594, 635. 2003, *Flora of Australia* Volume 44B, Poaceae 3: 29, 45–63. 2005. Intergeneric hybrids with *Sieglingia* Bernh., the genus *Danthonia* DC. described as among the most variable, native species formerly in *Danthonia* are now mostly included in *Austrodanthonia*, *Notodanthonia* and *Rytidosperma*.

Danthonia intermedia Vasey (*Avena riabuschinskii* Kom.; *Danthonia canadensis* Baum & Findlay; *Danthonia cusickii* (T.A. Williams) Hitchc.; *Danthonia intermedia* subsp. *riabuschinskii* (Kom.) Tzvelev; *Danthonia intermedia* var. *cusickii* Williams; *Merathrepta intermedia* (Vasey) Piper; *Merathrepta intermedia* subsp. *cusickii* (T.A. Williams) Piper; *Pentameris intermedia* (Vasey) A. Nelson & J.F. Macbr.; *Trisetum williamsii* Louis-Marie) (for William Conklin Cusick, 1842–1922)

Northern America. Perennial bunchgrass, densely caespitose, erect, palatable, forage for livestock and wildlife, species ecologically very versatile, grazing tolerant

See *Bulletin of the Torrey Botanical Club* 10: 52. 1883 and *Circ. Div. Agrostol. U.S.D.A.* 30: 6–7. 1901 [also *Bulletin, Division of Agrostology United States Department of Agriculture*], *Contributions from the United States National Herbarium* 11: 122. 1906, *Botanical Gazette* 56(6): 470. 1913, *Repertorium Specierum Novarum Regni Vegetabilis* 13: 86. 1914, *American Journal of Botany* 2: 305. 1915, *Rhodora* 30: 221. 1928, *Canadian Journal of Botany* 52(7): 1577. 1974, *Zlaki SSSR* 610. 1976, *Sendtnera* 3: 42. 1996

(Veterinary medicine.)

in English: intermediate oat grass, timber danthonia, timber oat grass, wild oat grass

Danthonia spicata (L.) P. Beauv. ex Roem. & Schult. (*Avena glumosa* Michx.; *Avena spicata* L.; *Avena spicata* (L.) Fedtsch., nom. illeg., non *Avena spicata* L.; *Avena spiciformis* P. Inst. Biol. Aplicada* 42: 112. 1967

(Boiled roots taken internally as purgative; bark and leaves applied externally for skin diseases.)

in India: dona, gandhlenu

Daphne papyracea Wall. ex Steud. (*Daphne cannabina* Wall., nom. illeg.; *Daphne cannabina* Lour.; *Daphne cavaleriei* H. Lév.; *Daphne mairei* H. Lév.; *Daphne papyracea* Wall. ex W.W. Sm. & Cave; *Daphne papyracea* Wall. ex G. Don; *Daphne papyrifera* Buch.-Ham. ex D. Don)

India, Nepal. Shrub, branchlets hooked below, flowers in yellow heads

See *Flora Cochinchinensis* 1: 236–237. 1790, *Asiatic Researches* 13: 385–388, pl. 8. 1820, *Hort. Brit.* [Loudon] 156. 1830, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 483. 1840 and *Records of the Botanical Survey of India* 6: 54. 1912

(Poisonous to animals. Plant bitter, purgative and febrifuge, used for cuts. Leaves and seeds used for fever and urinary

disorders. Roots an antidote in poisoning, drinking the juice of the roots causes diarrhea and vomiting. Roots and fruits for food poison, gastric troubles, body ache, muscular pain, headache, fever, cold and cough, blood purification.)

in China: bai rui xiang

in India: bhanchoi, dieng thlu thyrmia, gandiri, ghinok, ka dieng baiong, kagtey, kaula, niggi, satpura, satupra, setburwa, setburwa

in Lepcha: dyeynaok koong

Daphniphyllum Blume Daphniphyllaceae (Buxales, Dilleniidae)

Leaves resemble those of *Daphne*, Thymelaeaceae, Greek *daphne* ‘the laurel’ and *phyllon* ‘a leaf’, see *Bijdragen tot de flora van Nederlandsch Indië* 1152. 1826 [Oct 1826–Nov 1827], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 1. 1869 and *Taiwania* 12: 137–138. 1966, *Plant Book* 255. 2008.

Daphniphyllum gracile Gage (*Daphniphyllum gracile* Rosenth.)

Papuasia, New Britain. Shrub or tree, glabrous, many-branched, red petioles, leathery leaves, inflorescences in unisexual racemes, fleshy fruit

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. [Oct 1826–Nov 1827] and *Nova Guinea* 12: 480. 1917, *Pflanzenr.* (Engler) *Daphniphyllac.* 14. 1919

(Leaves chewed and swallowed with salt to treat hookworm.)

in Papua New Guinea: demaiyo

Daphniphyllum himalayense (Benth.) Müll.Arg. (*Daphniphyllum himalayense* Müll.Arg.; *Goughia himalayensis* Benth.) (*Goughia* Wight, for George Stevens, 2nd Viscount Gough, 1815–1895, 1840 Fellow of the Linnean Society, plant collector in Ireland and India, collected ferns.)

Himalaya. Small tree, robust, coriaceous leaves, flowers in racemes, pedicels recurved, drupes

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 6: 9. 1854, *Prodr.* (DC.) 16(1): 4. 1869

(For skin diseases, wounds.)

in India: lal chandan, rataniali, ratendu, ratniyalu

Daphniphyllum laurinum (Benth.) Baill. (*Daphniphyllum bancanum* Kurz; *Daphniphyllum laurinum* Baill.; *Goughia laurina* (Wight) Benth.; *Goughia laurina* Benth.)

Thailand, Sumatra. Shrub or small tree, dioecious, twigs with conspicuous leaf scars, leaves spirally arranged, male flowers white or cream, female flowers white, stalked fruits, recurved persistent calyx, tuberculate drupes purple or black, notched persistent very short stigma

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 6: 9. 1854, *Étude générale du groupe des Euphorbiacées* 565. 1858, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 188. 1864

(Bark and seeds poisonous.)

Malay name: jenjarong

Daphniphyllum macropodum Miq. (*Daphniphyllum himalayense* subsp. *macropodum* (Miq.) T.C. Huang; *Daphniphyllum himalense* subsp. *macropodum* (Miq.) T.C. (Purgative, emetic, stimulant.)

in Dominica: mahaut piment, maho piman

Daphnopsis macrophylla (Kunth) Gilg (*Daphne macrophylla* Kunth; *Daphnopsis humboldtii* Meisn.; *Daphnopsis humboldtii* var. *boissieriana* Meisn.; *Daphnopsis loranthifolia* Standl.)

Ecuador.

See *Nova Genera et Species Plantarum* (quarto ed.) 2: 151. 1817, *Die Natürlichen Pflanzenfamilien* 3(6a): 236. 1894

(Ripe fruit a potent purgative.)

in Ecuador: zapan

Darlingia F. Muell. Proteaceae

After Sir Charles Henry Darling, 1809–1870, Governor of Victoria, author of *To the Honorable the Commons of the United Kingdom ... The humble petition of Sir Charles Henry Darling*, etc. [With reference to a pecuniary grant voted by the Legislative Assembly of the Colony of Victoria on the occasion of Sir C.H. Darling's recall from the government of the Colony.] Cheltenham [1870?] and *The Crisis. Despatches of Mr. Cardwell and Sir Charles Darling*. Melbourne 1866; Sir Charles was a nephew of the Governor of New South Wales Sir Ralph Darling (1775–1858). See [Sir Ralph Darling], *Report from Select Committee on the Conduct of General Darling*, etc. [England. Parliament. House of Commons. Proceedings. II] London 1835 and *Debates in the House of*

Commons, during the session of 1835, upon Mr. Maurice O'Connell's motion for a Select Committee to inquire into the conduct of General Darling, whilst Governor of New South Wales, etc. 1835, Sir Ferdinand Jacob Heinrich von Mueller, *Fragmenta Phytographiae Australiae*. 5: 152. 1866 and H.G. Turner, *A History of the Colony of Victoria*. Melbourne 1904, Alan George Lewers Shaw, *Heroes and Villains in History. Governors Darling and Bourke in New South Wales*. [The fifth George Arnold Wood Memorial Lecture, etc.] Sydney 1966, *Am. J. Bot.* 95: 521–530 2008.

Darlingia darlingiana L.A.S. Johnson (*Darlingia darlingiana* (F. Muell.) L. Johnson; *Darlingia spectatissima* F. Muell.)

Australia.

See *Contributions from the New South Wales National Herbarium* 3: 93. 1962, *Planta Med.* 41(4): 379–385. 1981

(Alkaloids.)

in English: brown silky oak, Darling tree

Darlingia ferruginea J. Bailey (*Darlingia spectatissima* F. Muell. var. *ferruginea* (J.F. Bailey) C.T. White)

Australia.

See *Queensland Agricultural Journal* 5: 402. 1899 and *Journal of the Arnold Arboretum* 11: 231. 1930, *Planta Med.* 41(4): 379–385. 1981

(Alkaloids.)

in English: rose silky oak

Darlingtonia Torrey Sarraceniaceae

For the American (Philadelphia) botanist William Darlington, 1782–1863 (d. West Chester, Philadelphia), physician, among his works are *Memorials of John Bartram and Humphry Marshall*. Philadelphia 1849, *American Weeds and Useful Plants*: being a second and illustrated edition of *Agricultural Botany ... Revised, with additions*, by George Thurber. New York and San Francisco 1860, *Memorial of William Darlington*. 1863 and *Reliquiae Baldwinianae*. Philadelphia 1843. See *Smithsonian Contributions to Knowledge* 6(4): 4–7, pl. 12. 1853, *Pittonia* 2(10B): 191. 1891, J.W. Harshberger, *The botanists of Philadelphia and their work*. Philadelphia 1899 and E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, Howard Atwood Kelly and Walter Lincoln Burrage, *Dictionary of American medical biography*. Lives of eminent physicians of the United States and Canada, from the earliest times. New York 1928, Ernest Earnest, *John and William Bartram, botanists and explorers 1699–1777, 1739–1823*. Philadelphia 1940, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 419. 1965, Jeannette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808–1841*. 464. Short History of Botany in the United States. 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 93. 1972, Joseph Ewan, in *D.S.B.* 3: 562–563. 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 90. 1989.

Darlingtonia californica Torrey (*Chrysamphora californica* (Torr.) Greene)

North America. Perennial insectivorous plant, subshrub or herb

See *Smithsonian Contributions to Knowledge* 6(4): 5–7, pl. 12. 1853 and *Am. J. Bot.* 92: 1085–1093. 2005

(Poultice. Insecticide.)

in English: California pitcher-plant, cobra lily

Darwinia Rudge Myrtaceae

Dedicated to the English (b. Elston Hall, Notts) physician Erasmus Darwin, 1731–1802 (Breadsall Priory, near Derby, England), grandfather of the naturalist Charles Robert Darwin (1809–1882) and Sir Francis Galton (1822–1911), in 1755 he took the degree of Bachelor of Medicine at Cambridge, scientist, poet and physiologist, Fellow of the Royal Society 1761, a founder of the Lunar Society in Birmingham (1766) and the Lichfield Botanical Society and the Derby Philosophical Society (1783), Fellow of the Linnean Society 1792. See Anna Seward, *Memoirs of the life of Dr. Darwin*. London 1804, Edward Rudge (1763–1846), in *Transactions of the Linnean Society of London. Botany*. 11: 299, t. 22. 1815, *Nederlandsch Kruidkundig Archief. Verslangen en Mededelingen der Nederlandsche Botanische Vereeniging* 4: 115. 1856, Christiana C. Hankin, ed., *Life of Mary Anne Schimmelpenninck*. London 1859, E. Krause, *The life of Erasmus Darwin*. London 1887 and Francis Donald Klingender, *Art and the Industrial Revolution*. Colorado* 18, 37. 1906, *A Flora of California* 1: 141. 1912, *American Journal of Botany* 48(7): 572. 1961, *Memoir San Diego Society of Natural History* 12: 1–140. 1981, *Flora Novo-Galiciana* 14: 1–436. 1983, *Smithsonian Contr. Bot.* 87: 27. 1997, *Sida* 17(4): 645–666. 1997

(Decoction taken as a laxative.)

in English: low woollygrass

in Mexico: zacate borreguero

Dasysphaera Volkens ex Gilg Amaranthaceae

From the Greek *dasys* ‘shaggy, thick, hairy, rough’ and *sphaera* ‘sphere’, see *Die Natürlichen Pflanzenfamilien* Nachtr. II-IV, 1: 153. 1897.

Dasysphaera prostrata (Volkens) Cavaco (*Kentrosphaera prostrata* Volkens)

Tropical Africa. Ascending

See *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] II-IV, 1: 153. 1897 and *Mém. Mus. Hist. Nat., Paris, Sér. Bot.*, xiii. 96. 1962

(For stomachache, stem infusion emetic.)

in Kenya: natilio

Datura L. Solanaceae

From the Sanskrit *dhatūra* or *dhattura*, Arabic *tatorah*; see Carl Linnaeus, *Species Plantarum*. 1: 179. 1753, *Genera Plantarum*. Ed. 5. 83. 1754 and Roddick, J.G. “The importance of the Solanaceae in medicine and drug therapy.” In: Hawkes, J.G., Lester, R.N., Nee, M. & Estrada, R.N. (Editors). *Solanaceae 3. Taxonomy, Chemistry, Evolution*. Royal Botanic Gardens, Kew, Richmond, United Kingdom. pp. 7–23. 1991, *Journal of Ethnopharmacology* 39(3): 177–185. 1993, *Botanical Journal of the Linnean Society* 125: 295–308. 1997, *Fitoterapia* 70: 58–63. 1999, *Journal of the Pharmaceutical Society of Japan* 120(10): 1017–1023. 2000, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Journal of Ethnopharmacology* 87: 155–161. 2003, *Pure and Applied Chemistry* 77(1): 25–40. 2005, *Food Chemistry* 103(3): 885–890. 2007.

Datura candida (Pers.) Saff. (*Brugmansia candida* Pers.; *Brugmansia x candida* Pers.; *Datura arborea* Ruiz & Pav., nom. illeg.; *Datura candida* (Pers.) Pasq., nom. inval.)

South America. Shrub, white to yellowish-white flowers

See *Species Plantarum* 1: 179. 1753, *Flora Peruviana* 2: 15, t. 127. 1799, *Catalogo del Real Orto Botanico di Napoli* 36. 1867 and *Fl. Bermuda* 339. 1918, *Journal of the Washington Academy of Sciences* 11(8): 173–189. 1921, *Ann. Missouri Bot. Gard.* 60: 583. 1973

(Leaves mixed with butter applied to the forehead for headache.)

in English: angel’s tears, angel’s trumpet, datura, moonflower,

in Latin America: almizclillo, campachu, campana, campanchu, campanilla, datura, florifundio, floripondio, floripundio, lipa-ca-tu-ue, misha rastrera, palpanichim

in Hawaii: nanahonua

in South Africa: maanblom

in Bali: bungan kecubung

in Indonesia: kecubung, kecubung hutan

Datura discolor Bernh. (*Datura thomasii* Torr.)

West Indies, USA, California. Annual

See *Linnaea* 8: Litt. Ber. 138. 1833, *Pacif. Railr. Rep.* 5(2): 362–363. 1857

(Plant juice as a wash for sore eyes. Crushed flowers applied to ears for earaches. Tea made from the dry seeds taken for swollen throat. A poultice of the leaves placed on boils, hemorrhoids; leaves infusion taken during painful childbirth.)

in English: desert thorn-apple, desert thornapple

Datura ferox L.

Tropical America. Annual, shrub, herb, suffrutescent, spreading branches, white flowers, capsule covered with long stout spines

See *Amoenitates academicae* ... 3: 403. 1756 and *Acta Horticulturae* 331: 39–48. 1993, *Saudi Medical Journal* 26(1): 118–121. 2005

(Main alkaloid in its leaves is scopolamine. Hallucinogenic.)

in English: fierce thorn apple, fierce thornapple, large thorn apple, long-spined thorn apple, longspine thorn apple, long-spine thornapple, thorn apple, white stinkweed

in India: dhaturu, mungil oomatay

in South Africa: grootstinkblaar, olieboom, stinkolie, stinkolieblom, witstinkblaar, witstinkolie

Datura innoxia Mill. (*Datura guayaquilensis* Kunth; *Datura innoxia* auct.; *Datura metel* auct., non L.; *Datura meteloides* DC.; *Datura meteloides* Dunal; *Solanum rugosum* Dunal)

South America. Shrub, low erect herb, small herbaceous undershrub, erect, stems purple-brown, sticky, malodorous, leaves grey-green, cream-white strongly scented axillary solitary flowers, tubular corolla, calyx pale green, pale green pendulous fruits with stout prickles, glabrous nearly black seeds, common weed in pastures, riverine forest, street weed

See *Species Plantarum* 1: 179, 184–188. 1753, *The Gardeners Dictionary*: ... eighth edition no. 5. 1768, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 3: 8. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(1): 108, 544. 1852 and *Brittonia* 19: 370. 1967, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*. (Used in Ayurveda, Unani and Sidha. Whole plant, especially seeds and dried leaves, poisonous, toxic, hallucinogenic, overdose may lead to madness or insanity. The spiny capsules cause puncture wounds. Crushed leaves applied on rheumatic joints and rheumatic disorders, scabies, mastitis, swellings, asthma; drops of leaf extract taken with milk against intestinal worms; for septic finger leaf tied over the affected area; leaves of *Gymnosporia montana* crushed with

leaves of *Datura metel* and applied on swollen breasts; leaf paste given orally to treat fever; warm leaves with oil applied to mature boils and blisters; extract of seeds and leaves for skin diseases. Roots to treat bites from mad dogs and for insanity. Flowers in bronchial asthma, fevers, epigastric pain, toothache, chronic bronchitis, kidney stones, urinary disorders, as an anesthetic in rheumatic pain and pain from injury. Surgical anesthesia, sedative. Fruits and seeds pesticide, insecticide, antiseptic, against fungal infections; seed paste along with mustard oil applied on sciatica and sprain; seeds, leaves and roots used in insanity, diarrhea, catarrh, fevers; apply burnt seeds of *Datura fastuosa* to relieve toothache. Veterinary medicine, when dogs show symptoms of madness, seeds mixed with food and fed as a cure; leaf juice applied for hump sore; leaves paste applied on swellings and sprains. Ceremonial, flowers used in the worship of Lord Vishnu; ingredient of *Patra pooja* in different religious *pooja* ceremonies, in *Ganesh-pooja*. Contact therapy, root tied to the waist of pregnant woman to prevent miscarriage or abortion; pieces of root tied with a sacred thread as a necklace to cure typhoid; root tied around the upper arm with a belief that its presence during intercourse prevents conception. Crushed leaves as fish poison.)

Beitr.* 29(1): 5–43. 1997, *Molecular Breeding* 5(6): 553–560. 2000.

Daucus carota L. (*Carota sativa* Rupr.; *Caucalis carota* Crantz; *Caucalis carota* Huds.; *Caucalis daucus* Crantz; *Daucus carota* L. subsp. *carota*; *Daucus carota* L. subsp. *sativus* (Hoffm.) Arcang.)

Cosmopolitan. Annual or biennial erect herb, inflorescence a terminal compound umbel, vegetable, fodder, a complex very variable species, this plant may easily be confused with the extremely poisonous Poison Hemlock (*Conium maculatum*)

See *Sp. Pl.* 1: 242. 1753, *Class. Umbell. Emend.* 113. 1767, *Fl. Angl.* (Hudson) (ed. 2) 1: 114. 1778 and *Anales Jard. Bot. Madrid* 37: 487. 1981

(Used in Ayurveda, Unani and Sidha. Roots tonic, diuretic, stimulant, deobstruent, used against tapeworm, to treat dropsy, chronic kidney diseases, dysentery, flatulence; root juice given for night blindness. Leaves chewed for relieving toothache. Seed decoction given for menstrual disorders. Blossoms infusion taken for diabetes.)

in English: bird's nest, carrot, devil's plague, Queen Anne's lace, queen's lace, wild carrot

in South Africa: geelwortel, wilde geelwortel, wortel

in Tanzania: karat, karoti

in Arabic: sfinnaria, sinnaria

in Japan: no-ninjin

in Mexico: coo naxiñaa castilla, guu xñaa xtilia

Davallia Smith Davalliaceae

Named for the Swiss botanist (of English origin, b. near London) Edmund Davall, 1763–1798 (d. Switzerland), 1788 Fellow of the Linnean Society, a friend and correspondent of Sir James Edward Smith (1759–1828), plant collector, sent seeds to W. Curtis. See J.E. Smith, in *Mémoires de l'Académie Royale de Sciences de Turin*. 5: 414, t. 9, fig. 6. 1793, *Journal für die Botanik* 1800(2): 122. 1801, *Oekon.-Tech. Fl. Wetterau* 3(1): 97, 144. 1801, Karl Koenig (Charles Konig) (1774–1851) and John Sims (1749–1831), in *Annals of Botany*. I: 576–577. London 1805, *Memoir and Correspondence of ... Sir J.E. Smith ...* Edited by Lady Pleasance Smith. London 1832, *Tentamen Pteridographiae* 129–130, pl. 4, f. 30. 1836, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 6: 459. 1851, *Historia Filicum* 261–262. 1875, *Ann. Bot.* (Oxford) 5(18): 201. 1891, *Farnkr. Erde* 305. 1897 and *Philippine Journal of Science* 34(3): 251, pl. 4. 1927, J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D. Regnum Vegetabile* vol. 2. 1954, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 421. 1965, *J. Fac. Sci. Univ. Tokyo, Bot.* 13(5): 566. 1985, *Blumea* 39(1–2): 208. 1994, *Acta Phytotax. Geobot.* 59(1): 5. 2008.

Davallia trichomanoides Blume (*Davallia trichomanoides* Hook.; *Davallia trichomanoides* Bedd.)

North America.

See *Enum. Pl. Javae* 2: 238. 1828 and *Austral. Syst. Bot.* 15: 839–937. 2002

(Rhizome anthelmintic; sporophyll antibacterial, antifungal.)

in English: ball fern, squirrel-foot fern

Debregeasia Gaudich. Urticaceae

Named after the French naval officer Prosper Justin de Brégeas, b. 1807, from 1836 to 1837 he accompanied Auguste-Nicolas Vaillant (b. 1793) on his voyage of exploration to the Far East; see *Species Plantarum* 2: 983–985. 1753, *Genera Plantarum* 400. 1789, A.N. Vaillant, *Voyage autour du Monde exécuté pendant les Années 1836 et 1837 sur la corvette "La Bonite"*. Paris, 1844–1846, 1851, 1866, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 218. 1846, *Plantae Junghuhnianae* 36. 1851, *Annales des Sciences Naturelles; Botanique*, série 4 7: 383. 1857 and *Fieldiana, Bot.* 24(3): 396–430. 1952, *Kew Bull.* 44: 702. 1989, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 90. Berlin & Hamburg 1989.

Debregeasia edulis (Siebold & Zucc.) Wedd. (*Morocarpus edulis* Siebold & Zucc.)

Japan, E. Asia. Shrub, edible fruit

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 218. 1846, *Archives du Muséum d'Histoire Naturelle* 9: 462. 1856

(Diaphoretic, a decoction of the leaves and/or the fruits sudorific. Leaves decocted with *Pterocarya* species and used in the treatment of itch.)

Debregeasia longifolia (Burm. f.) Wedd. (*Conocephalus niveus* Wight; *Debregeasia dichotoma* (Blume) Wedd.; *Debregeasia libera* Chien & C.J. Chen; *Debregeasia longifolia* Wedd.; *Debregeasia velutina* Gaudich.; *Missiessya velutina* Wedd.; *Morocarpus dichotomus* (Blume) Blume; *Morocarpus longifolius* (Burm. f.) Blume; *Morocarpus velutinus* Blume; *Urtica angustata* Blume; *Urtica dichotoma* Blume; *Urtica longifolia* Burm. f.)

E. Asia, China, Japan. Shrub or small arching treelet, spreading crown, alternate leaves roughly toothed and bright white below, greenish flowers, orange fruit edible, cattle feed

See *Flora Indica ... nec non Prodromus Florae Capensis* 197–(as 297). 1768, *Bijdragen tot de flora van Nederlandsch Indië* 499. 1825, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... Botanique* pl. 90. 1844, *Icones Plantarum Indiae Orientalis* 6: pl. 1959. 1853, *Annales des Sciences Naturelles; Botanique*, série 4 1: 195. 1854, *Museum Botanicum* 2: 156–157. 1856, *Archives du Muséum d'Histoire Naturelle* 462. 1857, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 235(24). 1869 [mid Nov 1869] and *Acta Phytotaxonomica Sinica* 21(4): 476–477. 1983

(Used in Sidha. Parasiticide, the juice of the leaves applied to areas of the skin affected by scabies; dried leaf powder mixed with coconut oil and the mixture applied on skin infections, skin scales, roughness, scabies, boils.)

in China: chang ye shui ma, dong li ma

in India: cakavatitam, cakavatitamaram, choonda nar, crimbibumuth, dieng sohsyntein, elilainocci, janatsi, kaapli, kapsi, kattumayilai, kattumayilam, kattunochi, keppasi, kerangi, khargul, kurigele, manali, mayilai, mayilati, mayilatinocci, narambili, neer vanji, neeranji, sausaru, soh sinting, soh tyr-simstein ladoh, tusara, vanji

in Japan: janatsi, yanagi, yanagi-ichigo

Debregeasia saeneb (Forssk.) Hepper & Wood (*Boehmeria salicifolia* D. Don; *Debregeasia bicolor* (Roxb.) Wedd.; *Debregeasia bicolor* Wedd.; *Debregeasia hypoleuca* Wedd.; *Debregeasia hypoleuca* (Steud.) Wedd.; *Debregeasia hypoleuca* (Hochst. ex A. Rich.) Wedd.; *Debregeasia salicifolia* (D. Don) Rendle; *Debregeasia salicifolia* Rendle; *Morocarpus salicifolius* Blume; *Morocarpus salicifolius* (D. Don) Blume; *Procris hypoleuca* Steud.; *Procris hypoleuca* Hochst. ex Steud.; *Rhus saeneb* Forssk.; *Urtica bicolor* Roxb.)

China, Himalaya. Fruits edible

See *Flora Aegyptiaco-Arabica* 206. 1775, *Hort. Bengal.* 67. 1814, *Prodromus Florae Nepalensis* 60. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 589. 1832, *Flora* 33: 261. 1850, *Museum Botanicum* 2(9–12): 157. 1856, *Archives du Muséum d'Histoire Naturelle* 463–464, pl. 15A, f. 10, 11. 1857, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 235. 1869 and *Flora of Tropical Africa* [Oliver et al.] 6(2.2): 295. 1917, *Kew Bulletin* 38(1): 86. 1983, *Journal of Ethnopharmacology* 99(2): 309–312. 2005

(Antibacterial. Veterinary medicine, paste made by mixing the leaves with *Withania somnifera* given to cure fever in cattle; roots to kill maggots in wounds of cattle and goats.)

in China: liu ye shui ma

in India: sansaru, pincho

in Pakistan: puruni, siharu, siaru

Decalepis Wight & Arn. Asclepiadaceae (Apocynaceae, Periplocaceae)

From the Greek *deka* 'ten' and *lepis*, *lepidos* 'scale', referring to the corona scales and staminal filaments, see *Contributions to the Botany of India* 64. 1834, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 5: 509. 1884.

Decalepis hamiltonii Wight & Arn.

India. Climbing shrub, milky sticky latex, jointed branches, small yellow flowers, woody follicles, ovate seeds with long white silky hairs

See *Contributions to the Botany of India* 64. 1834, *Fl. Brit. India* 4: 11. 1883

(Used in Ayurveda and Sidha. Roots cooling, blood purifier, in the form of powder and infusion to treat wound, skin

diseases, uterine hemorrhage, indigestion, dysentery, cough, bronchial asthma, fever, anemia, dysuria, poisoning, vomiting, and during pregnancy; eaten to increase fertility.)

in India: barre sugandhi, maagali baeru, maakali baeru, maakali beru, maahaali kizhangu, maakli baeru, madina kommulu, magali, magali beru, mahali-kizhangu, mahani-kizhangu, makali beru, makalikkilanku, maredu kommulu, maredugeddal, mavali-k-kilanku, mavillinga kizhanku, nannari, naruninti, perum-nannari, perunannari, sariba, shweta sariva, svetasariva

Decaspermum Forster & Forst.f. Myrtaceae

Greek *deka* 'ten' and *sperma* 'a seed', how many seeds in each fruit? usually ten! See J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 73, t. 37. (Nov.) 1775, *Syst. Veg.* (ed. 16) [Sprengel] 2: 488. 1825.

Decaspermum fruticosum Forst. & Forst.f. (*Decaspermum fruticosum* J.R. Forst.; *Decaspermum paniculatum* Kurz; *Decaspermum paniculatum* (Lindl.) Kurz; *Nelitris forsteri* (J.R. Forst. & G. Forst.) Seem.; *Nelitris fruticosa* (J.R. Forst. & G. Forst.) A. Gray; *Nelitris paniculata* Lindl.; *Psidium decaspermum* (J.R. Forst. & G. Forst.) L.f.)

SE Asia. Small trees, twigs and leaves densely hairy, flowers in axillary panicles with leafy bracts, depressed globose purple fruit with 4 persistent sepals at top

See *Characteres Generum Plantarum* [second edition] 74, t. 37. 1775, *Supplementum Plantarum* 252. 1782, *Collectanea Botanica* (Lindley) 4: 16. 1821, *United States Exploring Expedition*, Phan. 15: 547, t. 60. 1854, *Flora Vitiensis* 81. 1866, *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 46(2): 61. 1877 and *Kew Bulletin* 34: 66. 1979

(Fruit for stomach pain. Leaves heated and applied to spear, axe or knife wounds; leaves for dysentery.)

in English: shrubby decaspermum, tailor tree

in Malaya: kelintek nyamok, na s'tuka, s'tukai benai, tuka benang, tukai benai

in Papua New Guinea: ibuma

in Philippines: agem, agim a babae, alungkagai, dugayon, guyong-guyong, kamigrin, kansilai, kulasi, kulis, lardu, malagiting-giting, patalsik, salilihan, salingsingan, tarongatingan, tayom-tayom

Deccania Tirvengadam Rubiaceae

Deccan, India, Deccan Plateau and Deccan States, see *Fl. Cochinch.* 1: 143. 1790, *Novae Plantarum Species* 151. 1821, *Cat. Gew. Buitenzorg* (Blume) 48. 1823 and *Nordic Journal of Botany* 3(4): 455–456, f. 1. 1983, *Malayan Nat. J.* 38(1): 17. 1984, *Blumea* 41(1): 154, 159. 1996.

Deccania pubescens (Roth) Tirveng. (*Gardenia pubescens* Roth)

India.

See *Nov. Pl. Sp.* 151 (non *Gardenia*). 1821, *Prodr. Fl. Ind. Orient.* 1: 399. 1834 and *Biological Memoirs* 2(1–2): 67. 1977, *Nordic Journal of Botany* 3(4): 456. 1983

(Veterinary medicine, stem bark of *Deccania pubescens* ground with those of *Carissa spinarum*, *Chloroxylon swietenia* and tubers of *Withania somnifera* given in anthrax.)

in India: bajjumanga

Deccania pubescens (Roth) Tirveng. var. ***candolleana*** (Wight & Arn.) Tirveng. (*Aidia candolleana* (Wight & Arn.) Swamin.; *Randia candolleana* Wight & Arn.)

India.

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 399. 1834 and *Biological Memoirs* 2(1–2): 67. 1977, *Nordic Journal of Botany* 3(4): 456, f. 1. 1983

(Dried powdered fruits mixed in goat's milk given to women for total sterility.)

in India: goddtu kaarai

Deeringia R. Br. Amaranthaceae

For the English (b. in Saxony, Dresden) physician and botanist George Charles Deering, c. 1695–1749 (d. Nottingham), pupil of Boerhaave and B. de Jussieu, practised medicine in London (from 1719) and Nottingham (from 1735), 1721 member of the Botanical Society of London, assisted Dillenius in his *Historia muscorum*. 1741, published *Catalogus Stirpium*, etc. Nottingham 1738 and *An Account of an Improved Method of treating the Small-Pocks*, in a short letter to Sir Thomas Parkyns Bart. Nottingham [1736]. See R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 257–264. London 1790, *Prodromus Florae Novae Hollandiae* 413. 1810, *Prodromus Florae Nepalensis* 76. 1825, G.C. Gorham, *Memoirs of John Martyn ... and Thomas Martyn*. London 1830, Agardh, Jakob Georg (1813–1901), *Theoria Systematis Plantarum* 369. Lundæ, Apud C.W.K. Gleerup; [etc., etc.] 1858 and A.C. Woods, “Doctor Charles Deering.” *Trans. Thoroton Soc.* 45. Nottingham 1941, Blanche Henrey, *British Botanical and Horticultural Literature before 1800*. Oxford 1975, *Adansonia*, sér. 3 19(1): 49. 1997.

Deeringia amaranthoides (Lam.) Merr. (*Achyranthes amaranthoides* Lamarck; *Celosia amaranthoides* (Lam.) Medik.; *Celosia amaranthoides* Medik.; *Cladostachys amaranthoides* (Lamarck) K.C. Kuan; *Cladostachys frutescens* D. Don; *Deeringia amaranthoides* Merr.)

India. Shrub, scandent or subscaudent, long arching branches, very small greenish-white flowers in long pendant spikes, globose scarlet berries

See *Species Plantarum* 1: 204–205. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 1(2): 548. 1785, Medikus, Friedrich Kasimir (1736–1808), *Ueber einige künstliche Geschlechter aus der Malvenfamilie ...* 92. Mannheim, 1787, *Prodromus Florae Novae Hollandiae* 413. 1810, *Prodr. Fl. Nepal.* 76. 1825, *FBI* 4: 714. 1885 and Merrill, Elmer Drew (1876–1956), *An Interpretation of Rumphius's Herbarium Amboinense* 211. Manila, 1917, *Fl. Xizang*. 1: 645. 1983, Sati O.P. et al. “A new saponin from *Deeringia amaranthoides*.” *J. Nat. Prod.* 53(2): 466–469. 1990

(Powdered root may cause violent sneezing. Paste of young fresh leaves applied on forehead for fever, headache, nose bleeding, dysentery. Fruits made into a paste with roots of *Mimosa pudica* and applied on eczema. Roots and fruits pounded with roots of *Piper nigrum* and given in stomach pain.)

in China: jiang guo xian

in India: golamohani, han-ding, kalalori, latman, rangoli-lota, sam sanum, wali

in Japan: himo-kazura

Deguelia Aublet Fabaceae (Millettieae)

From the French Guiana vernacular name for *Derris*, see *Histoire des plantes de la Guiane Française* 2: 750–753, pl. 300. 1775 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3/1): 1–506. 1943, *Bol. Tecn. Inst. Agron. N.* 18: 1–248. 1949.

Deguelia rariflora (Benth.) A.M.G. Azevedo (*Derris rariflora* (Benth.) J.F. Macbr.; *Lonchocarpus rariflorus* Benth.)

South America. Perennial tree

(Used to exterminate Sauba ants. Bark used as a fish poison.)

Deguelia rufescens (Benth.) A.M.G. Azevedo var. ***urucu*** (Killip & A.C. Sm.) A.M.G. Azevedo (*Derris urucu* (Killip & A.C. Sm.) J.F. Macbr.; *Lonchocarpus nicou* var. *urucu* (Killip & A.C. Sm.) F.J. Herm.; *Lonchocarpus urucu* Killip & A.C. Sm.)

South America, Brazil, Colombia, Venezuela. Perennial climbing shrub, robust, many-branched

See *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824 and *Journal of the Washington Academy of Sciences* 20: 81, f. 4. 1930, *Field Museum of Natural History, Botanical Series* 13(3/1): 266. 1943, *Journal of the Washington Academy of Sciences* 37(4): 112. 1947

(Stem and leaves as a fish poison.)

in Brazil: doouí, timbó urucú, timbó vermelho

Deinbollia Schum. & Thonn. Sapindaceae

The generic name honors the Danish botanist and collector Peter Vogelius (Wegelius) Deinboll, 1783–1874, clergyman.

See *Beskrivelse af Guineiske planter* 242. 1827, *Danske, Selsk. Afh.* iv. (1827) 16. 1827, *Rumphia* 3: 165. 1849 and *Den danske botaniske litteratur 1880–1911*. Copenhagen 1913, Carl Frederik Albert Christensen (1872–1942), *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 435. 1965.

Deinbollia borbonica Scheff. (*Omalocarpus macrophyllus* Choux)

Tanzania. A small shrub or tree, unbranched trunk, leaves in terminal bunches on long stalks, tiny white flowers, male and female flowers on different branchlets, calyx and flower stalks densely brown hairy, yellow-red edible fruit, seeds in white mucilaginous flesh, pulp of ripe fruit sweet and eaten raw, *Commiphora-Acacia* woodland, evergreen forest, in *Acacia* thorn bush

See *Flora* 52: 306. 1869, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 31: 17. 1869 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 182: 713. 1926, *Mém. Acad. Malgache* 4: 56–58, t. 6(11). 1927, *Ann. Mus. Hist. Nat. Marseille* 22: 40. 1929

(Roots used to treat stomachache and boils.)

in English: soap berry

in Tanzania: kajambalame, mkilimu, mkunguma, mlyangola, mmoyomoyo, mpuga mahoka, mpungamaoka, mungamaoka, mwakamwaka, tlambi

Deinbollia grandifolia Hook. f.

Tropical Africa, Cameroon. Small tree, creamy white corolla, unpleasant odor of the fruit

See *Niger Flora* [W.J. Hooker]. 249. 1849

(Roots and leaves anthelmintic, stomachic, febrifuge, postpartum remedy, for jaundice, hemorrhage and viral hemorrhagic fevers, constipation, mental illness, hysteria, nervous disorders, headache, tachycardia.)

Deinbollia kilimandscharica Taub. var. *kilimandscharica* (*Deinbollia kilimandscharica* var. *adusta* (Radlk.) Verdc.)

Tanzania, Kenya, Ethiopia. A shrub or tree, single trunk, rough bark, small cream-white flowers along terminal heads, male and female branchlets, yellow-red fruits with edible flesh inside, a source of bee forage, ripe fruit eaten raw, in evergreen forest, riverine forest, upland rainforest

See *Pflanzenw. Ost-Afrikas* C (1895) 250. 1895 and *Flora of Tropical East Africa (Sapindaceae)*: 71. 1998

(Roots for stomachache, intestinal worms and as a purgative.)

in English: soap berry

in Tanzania: mtambakuzimu, mlyangola, tlambi, mmoyomoyo, mbwakabwaka, mkunguma

Deinbollia oblongifolia (E. Mey.) Radlk. (*Hippobromus oblongifolius* (E. Mey. ex Arn.) Drège; *Rhus oblongifolia* E. Mey.; *Sapindus oblongifolius* Sond.; *Sapindus oblongifolius* (E. Mey. ex Arn.) Sond.)

South Africa.

See *Species Plantarum* 1: 265–267, 367. 1753, *Beskrivelse af Guineiske planter* 242. 1827, *Zwei Pflanzengeografische Dokumente* 156, 159. 1843, *Sitzungsberichte der Königl. Bayerischen Akademie der Wissenschaften zu München* 8: 299. 1878 and *Fontqueria* 14: 37–44. 1987

(Roots used for dysentery and diarrhea.)

in English: dune soap-berry, soap-berry

in Southern Africa: duineseebessie; iGololenkawu, iQin-isamasimu, inTisamasimu, iGolo-lenkama (Zulu); uMasibele (Xhosa)

Delonix Raf. Fabaceae (Caesalpinieae, Caesalpinieae, Leguminosae)

Greek *delos* 'evident, visible, conspicuous' and *onyx*, *onychos* 'a claw, nail', referring to the conspicuously long-clawed petals; see Constantine Samuel Rafinesque (1783–1840), *Flora Telluriana* 2: 92. 1836 [1837] and *Webbia* 13: 133–228. 1957, *Webbia* 26: 267–364. 1972, *Recent Res. Pl. Sci.* (New Delhi). 7: 252–260. 1979, *Flora of Ceylon* 7: 34–107. 1991, *Folia Geobotanica et Phytotaxonomica* 29: 101–106. 1994, *Kew Bulletin* 50(3): 445–475. 1995.

Delonix elata (L.) Gamble (*Delonix elata* Gamble; *Poinciana elata* L.)

East Africa India. Perennial non-climbing tree, deciduous, spreading crown, drooping branches, shiny bark, leaves bipinnate, white variegated flowers, orange-brown protruding stamens, red-brown flat woody thin pods persisting on the tree, tender leaves edible, seeds boiled and eaten during famine, a source of bee forage, leaves for fodder, found in bushland, in hot dry thorn-bush, on rocky slopes or by streams or dry river beds, in hot dry *Acacia-Commiphora* bush

See *Centuria II. Plantarum* ... 16. 1756 and *Flora of the Presidency of Madras* 32, 396. 1919

(Used in Ayurveda and Sidha. Leaf paste mixed with lime juice applied for paralysis and joint pain; leaves in rheumatism and stomachache. Twigs believed to cure bleeding gums; leaves and twigs chewed and swallowed to treat mouth ulcers. Bark antiperiodic, an infusion used in the treatment of bilharzia, fevers and diarrhea. Roots ground on a stone with a little water and the paste put on an abscess to hasten ripening; a decoction from boiled roots used as an antidote for ingested poisons.)

in English: creamy peacock flower, tiger bean, white gul mohur, yellow gul-mohur

in India: carutakikam, carutakikamaram, chilikeswarapu, chinnaseribiseri, chitti-kesar, chittikeshvaramu, chittikeshwaramu, chittikeswaramu, cirumayirkonrai, cunakappuritam, kanuppavakam, kanuppavakamaram, kempukenchaga, kempukenchiga, kempukenjiga, kesaraka, mayirkkonrai, mayirkonrai, mayuram, nirangi, niranji, padenarayan, pancalai, pancati, patanarayanan, perungondai, perungondrai, perunkonrai, samrsro, sanchaila, sanchal, sandeshra, sanesra, sanesro, sankasura, sankesura, siddhesvara, sinkiresi, sunk-anthemara, sunkatti, sunkesari, sunkesula, sunkevaramu, sunkeswaramu, vaaracchi, vaathanaarayana, vadamudukki, vadanarayanan, varatti, vathamadakki, vatanarayana, vatanarayanam, vatanarayanan, vatanarayanamaram, vataracu, vatarakkacci, vatarakkaycci, vatarayanam, vatharayanan, vatham-nairaini, vatham-ras, vathanarayanan, vatrakkacci, vavukkarasu, vayni, waykaran

in East Africa: ekurinchanaite, muangi, ol-derkesi

in Tanzania: aare-desu, aarmo-desu, arange, ichoro, mfausiku, mlangawa, mlele, monterere, mseele, msele, msiviri, mtangaro, mterera, orndang'oring'oro

Delonix regia (Bojer ex Hook.) Raf. (*Delonix regia* (Bojer) Raf.; *Delonix regia* Hook.; *Delonix regia* (Hook.) Raf.; *Delonix regia* var. *flavida* Stehle; *Delonix regia* var. *genuina* Stehle, nom. inval.; *Poinciana regia* Hook.; *Poinciana regia* Bojer ex Hook.; *Poinciana regia* Bojer, nom. nud.)

Madagascar. Perennial non-climbing tree, umbrella-like crown, brilliant clusters of scarlet to orange flowers, wavy petals, long woody pods

See *Botanical Magazine* 56: t. 2884. 1829, *Flora Telluriana* 2: 92. 1837 [1836 publ. Jan-Mar 1837], *Hortus Mauritianus* 119. 1837 and *Bulletin du Muséum d'Histoire Naturelle*, (Paris) sér. 2 18: 186. 1946

(Used in Sidha. Gum mixed with boiling water given for indigestion. Leaves used in rheumatism and flatulence; for scorpion bite, leaves crushed, ground and the juice put over the affected area; for scorpion bite, roasted, crushed leaves inhaled just after the bite. Fruits and leaves febrifuge, astringent, for diarrhea, dysentery. Flowers anthelmintic.)

in English: flamboyant, flamboyant tree, flame of the forest, flame tree, gold mohur, peacock flower, poinciana, royal poinciana

in Dominica: chak-chak, flamboyan

in East Africa: mjohoro, mkakaya, voulatzana

in Madagascar: alamboronala, hintsakinsa, hitsakitsana, kitsakitsabe, sarongadra, tanahou, tsiombivositra

in Nigeria: sekeseke (Yoruba)

in Yoruba: ogun bereke, panseke

in Bali: bungan merak (merak = peacock), kemerakan, suwar

in China: feng huang mu

in India: agnipoolu, errathuraayi, gul mohur, gulmohar, gulmohor, gulmohr, gulmohur, gulmor, krishnachura, krishnochuda, mal-mara, mayaram, mayil konrai, peddaseribiseri, peddathuraayi, poo-vahai, seemesunkesvaramu, shimakesula, thuraayi, ukaramaram, vata madakki, vatanarayanan, vhadle-kombe

in Indonesia: flamboyan

in Japan: howo-boku

in Malaya: semarkat api

in Nepal: gulmohar, gulmor

in Philippines: arbol del fuego, caballero

in Hawaii: 'ohai 'ula

Delphinium L. Ranunculaceae

Delphinion, the Greek name for larkspur and dolphin-flower, from *delphis* 'a dolphin', referring to the form of the flower or to the bud shape; see Carl Linnaeus, *Species Plantarum*. 1: 530. 1753 and *Genera Plantarum*. Ed. 5. 236. 1754, Constantine Samuel Rafinesque, *Med. Fl.* 2: 216. 1830 and Ewan, J. "A synopsis of the North American species of *Delphinium*." *Univ. Colorado Stud., Ser. D, Phys. Sci.* 2: 55–244. 1945, E.D. Merrill, *Index Rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 125. 1949, Lewis, H. and C. Epling. "A taxonomic study of Californian delphiniums." *Brittonia* 8: 1–22. 1954, *Univ. Wyoming Publ.* 24: 9–21. 1960, *Acta Bot. Sin.* 10(2): 141. 1962, *Cytologia* 46: 623–633. 1981, *Madroño* 31(4): 243–244, 246. 1984, *Bot. Zhurn.* (Moscow & Leningrad) 72(5): 687–691. 1987, *Acta Phytotax. Geobot.* 41(1–3): 100–101. 1990, *Collect. Bot.* (Barcelona) 18: 70. 1990, *Phytologia* 78(2): 84. 1994, Warnock, M.J. "A taxonomic conspectus of North American *Delphinium*." *Phytologia* 78(2): 73–101. 1995, *Phytologia* 78(2): 81, 85, 92, 102–118. 1995, *Lagascalia* 19(1–2): 76. 1997, *Bot. Zhurn.* (Moscow & Leningrad) 86(8): 127–129. 2001, *Turczaninowia* 7(1): 35–37. 2004. All parts of larkspur plants contain alkaloids. The diterpene alkaloid methyllycaconitine causes curare-like effects on the skeletal muscles and can cause motor paralysis, followed by death from asphyxia. Many other alkaloids occur in larkspurs, but they are much less toxic than methyllycaconitine.

Delphinium bicolor Nuttall (*Delphinium nuttallianum* Pritz. ex Walp. var. *pilosa* C.L. Hitchc.; *Plectrornis bicolor* (Nutt.) Lunell)

North America. Perennial

See *Species Plantarum* 1: 530–531. 1753, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 10–11. 1834, *Pittonia* 3: 257. 1898 and *American Midland Naturalist* 4: 361. 1916, Ewan, J. "A synopsis of the North American species of *Delphinium*." *Univ. Colorado Stud., Ser. D, Phys. Sci.* 2: 55–244. 1945, Olsen, J.D., Manners, G.D. "Toxicology

of diterpenoid alkaloids in rangeland larkspur (*Delphinium* spp.).” Pages 291–326 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, Inc., 1989, *Phytologia* 78(2): 90. 1995, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 29: 18–22. 1998

(Considered to be poisonous, this plant has poisoned cattle, symptoms are similar to those caused by tall larkspur, *Delphinium glaucum*. Plant infusion stimulant, astringent, given to children with diarrhea.)

in English: flathead larkspur, little larkspur, low larkspur

Delphinium bicolor Nuttall subsp. ***bicolor*** (*Delphinium bicolor* var. *montanense* Rydb.; *Delphinium nuttallianum* Pritzell var. *pilosum* C.L. Hitchcock; *Plectrornis bicolor* (Nutt.) Lunell; *Plectrornis bicolor* var. *montanense* (Rydb.) Lunell)

North America.

See *Species Plantarum* 1: 530–531. 1753, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 10–11. 1834, *Repertorium Botanices Systematicae*. 1(4): 744. 1842 and *Memoirs of the New York Botanical Garden* 1: 157. 1900, *American Midland Naturalist* 4: 361. 1916, *Vascular Plants of the Pacific Northwest* 2: 359. 1964

(Often referred to as one of the low larkspurs in poisonous plant literature, the plant is abundant on some ranges and is the cause of some livestock poisonings. Plant infusion stimulant, astringent, given to children with diarrhea.)

in English: low larkspur

Delphinium brunonianum Royle

Himalaya, Pakistan. Herb, inflorescence racemose, dark blue flowers, follicles

See Royle, John Forbes (1798–1858), *Illustrations of the Botany ... of the Himalayan Mountains ...* 1: 56. 1834, *Illustrations of the botany and other branches of the natural history of the Himalayan Mountains: and of the Flora of Cashmere*. London: W.H. Allen and Co. 1839 and *Cytologia* 46: 623–633. 1981

(Used in Ayurveda. Poisonous plant juice kills horses. Whole plant antibacterial, antidote, used for fever and jaundice. Aerial parts used in cough and cold, skin diseases, liver troubles. Infusion of leaves, stem, flower and fruits used for intestinal pain and as insecticide. Leaves juice used against ticks in animals, in sheep; leaves and flowers crushed and boiled in water and given to cure dysentery and fever. Roots as incense. Ceremonial, ritual, offered to the Devtas as a sacred groove plant, flowers used for worship and religious ceremonies, festivals.)

in China: nang ju cui que hua

in India: bhotia-ladara, dodda nirvisha, kasthoori, kasturi, ladar mentock, ladara, laddar temosa, laskar, latha kasthoori, loskar, lunde-kaown, nepari, samp-phali, tagara

in Nepal: ponmar

in Tibet: bya-rgod-spos, byargod spos

Delphinium carolinianum Walter subsp. ***virescens*** (Nutt.) R.E. Brooks (*Delphinastrum virescens* (Nutt.) Nieuwl.; *Delphinastrum virescens* Nieuwl.; *Delphinium albescens* Rydb.; *Delphinium azureum* Michx. var. *laxiflorum* Huth; *Delphinium azureum* var. *virescens* (Nutt.) (Poisonous to cattle. Ceremonial.)

in English: Carolina larkspur

Delphinium cashmerianum Royle

India. Annual branched herb, bluish purple flowers in terminal racemes

See Royle, John Forbes (1798–1858), *Illustrations of the botany and other branches of the natural history of the Himalayan Mountains: and of the Flora of Cashmere*. London: W.H. Allen and Co. 1839 and *Taxon* 30: 75. 1981

(Used in Ayurveda. Stem paste of *Cremanthodium arnicoides* mixed with shoot juice of *Delphinium cashmerianum* given for jaundice. Leaves decoction taken for colds and cough; leaves juice used in bleeding piles. Flowers juice and a whole plant infusion used for colic. Veterinary medicine, plant paste applied in glandular inflammation of cattle and yak. Ritual, ceremonial, flowers used during religious ceremonies.)

in English: Himalayan larkspur

in India: kheerga davai, lande-kaown, lunde-kaown, tagara

Delphinium denudatum Wall. ex Hook. f. & Thomson (*Delphinium denudatum* Wall. ex Royle; *Delphinium denudatum* Wall.)

Kashmir, Himalaya. Many-branched, erect, hardy herb, blue-violet fragrant flowers in few-flowered racemes or open panicles, beaked follicles, dark seeds covered with irregularly arranged rows of scales

See *Numer. List* [Wallich] n. 4719. 1831, *Flora Indica*: being a systematic account of the plants . . . 49. 1855 and *Cytologia* 46: 623–633. 1981, *Pakistan Syst.* 3(1): 11. 1987

(Used in Ayurveda and Unani. Whole plant juice applied on cuts for immediate relief and healing. Roots bitter, febrifuge, anthelmintic, diuretic, antiinflammatory, carminative, vulnerary, stimulant, alterative, aphrodisiac, cardiotoxic, tonic, cooling, digestive, used in fever, insanity, jaundice, strangury, obesity, skin diseases, ulcers, respiratory complaints, catarrh, cold, cough, asthma, toothache; dried roots chewed as stimulant; a water-paste of the roots applied on ulcers; roots powder for killing lice; roots pressed between teeth to get relief from toothache. Seeds used for the treatment of skin eruptions. Veterinary medicine, roots for killing ticks and lice in domestic animals; antidote in case of poisoning caused by *Aconitum ferox*.)

in India: apavisha, avisa, avisha, fadwar, jadavar kathvayi, jadvar, jadwar, judwar, loskar, mahferfin, manila, nirbasi, nirbirhi, nirbishi, nirbisi, nirbisiw, nirvasi, nirvisa, nirvisha, nirvishi, nirvisi, pisughass, rugen, visaha, visavairini, vishabhava, vishaha, vishahantri, vishalakarani, vishavairini, vivisha, zadwar

Delphinium geraniifolium Rydb. (*Delphinium amplibracteatum* Woot.; *Delphinium geyeri* Greene var. *geraniifolium* (Rydb.) K.C. Davis; *Delphinium tenuisectum* Greene subsp. *amplibracteatum* (Woot.) Ewan)

North America. Perennial

See *Bulletin of the Torrey Botanical Club* 26(11): 583. 1899 and *Minnesota Botanical Studies* 2: 446. 1900, *Bulletin of the Torrey Botanical Club* 37(1): 35–36. 1910, *University of Colorado Studies: Series D. Physical and Biological Sciences* 2(2): 149. 1945

(Ceremonial medicine, emetic.)

in English: Clark Valley larkspur

Delphinium glaciale Hook. f. & Thomson

India, Himalaya.

See Royle, John Forbes (1798–1858), *Illustrations of the botany and other branches of the natural history of the Himalayan Mountains: and of the Flora of Cashmere*. London: W.H. Allen and Co. 1839, *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 53. 1855

(Used in Ayurveda.)

in China: bing chuan cui que hua

in India: tagara

Vol. I. *Alkaloids*. CRC Press, Inc., Boca Raton, USA. 1989

(The plant is poisonous to cattle and can be poisonous to horses and sheep when ingested in higher amounts.)

in English: tall larkspur

Delphinium hesperium A. Gray

North America. Perennial herb, often confused with *Delphinium hansenii* (Greene) Greene

See *Species Plantarum* 1: 530–531. 1753, *Botanical Gazette* 12(3): 53. 1887, *Flora Franciscana* 3: 304. 1892, *Pittonia* 3: 94. 1896

(*Delphinium hesperium* is thought to be poisonous to cattle.)

in English: foothill larkspur

Delphinium hesperium A. Gray subsp. *hesperium*

North America. Perennial herb, often confused with *Delphinium hansenii* (Greene) Greene

See *Species Plantarum* 1: 530–531. 1753, *Botanical Gazette* 12(3): 53. 1887, *Flora Franciscana* 3: 304. 1892, *Pittonia* 3: 94. 1896

(Reported to be poisonous to cattle.)

in English: foothill larkspur, western-larkspur

Delphinium incanum Royle (*Delphinium incanum* E.D. Clarke)

Himalaya.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 55. 1835

(Veterinary medicine, leaves juice used to destroy ticks in animals.)

Delphinium kamaonense Huth (*Delphinium grandiflorum* L. var. *kamaonense* (Huth) Brühl)

China, Nepal.

See *Bulletin de l'Herbier Boissier* 1: 333. 1893, *Annals of the Royal Botanic Garden. Calcutta.* 5(2): 98, t. 118, f. 4, 6e. 1896

(Plant decoction applied to treat scabies.)

in China: guang xu cui que hua

in Nepal: chharkang

(Ceremonial.)

in English: twolobe larkspur

Delphinium parryi A. Gray (*Delphinium hesperium* A. Gray var. *sediciosum* Jeps.; *Delphinium parryi* A. Gray subsp. *sediciosum* (Jeps.) Ewan)

North America. Perennial

See *Botanical Gazette* 12(3): 53. 1887, *Erythraea* 1: 247. 1893 and *Muhlenbergia* 4: 35. 1908, *Brittonia* 8: 15, 19. 1954, *Phytologia* 67: 481. 1989, *Phytologia* 68(1): 2. 1990

(The ground root as a salve for swollen limbs. Sources of livestock poisoning.)

in English: Parry's larkspur, San Bernardino larkspur

Delphinium saniculifolium Boiss.

Afghanistan, Iran.

See *Diagnoses plantarum orientalium novarum* ser. 1, 6: 6. 1846 [1845 publ. Jul 1846]

(Used in Ayurveda.)

in India: trayamana

Delphinium scaposum Greene (*Delphinium andersonii* A. Gray var. *scaposum* (Greene) S.L. Welsh; *Delphinium decorum* Fisch. & C.A. Mey. var. *scaposum* (Greene) Huth; *Delphinium scaposum* W.T. Wang, nom. illeg., non *Delphinium scaposum* Greene; *Delphinium sinoscaposum* W.T. Wang)

North America. Perennial

See *Species Plantarum* 1: 530–531. 1753, *Index Seminum* [St. Petersburg] 3: 33. 1837, *Botanical Gazette* 6(1): 156–157. 1881, *Botanical Gazette* 12(3): 53. 1887, *Helios* 10: 33. 1892 and *Acta Phytotaxonomica Sinica* 6(5): 364, pl. 58, f. 2. 1957, *Acta Botanica Sinica* 10(2): 165. 1962, *The Southwestern Naturalist* 24: 187–206. 1979, *Great Basin Naturalist* 46(2): 260. 1986

(Postpartum remedy, a wash following childbirth. Ceremonial, emetic, used in religious ceremonies.)

Delphinium scopulorum Gray (*Delphinium exaltatum* Aiton subsp. *scopulorum* (A. Gray) Huth; *Delphinium exaltatum* var. *scopulorum* (A. Gray) Huth)

North America. Perennial

See *Smithsonian Contributions to Knowledge* 5(6): 9. 1853, *Helios* 10: 31, 36. 1892

(Ceremonial, for luck in hunting.)

in English: Rocky Mountain larkspur

Delphinium stapeliosmum Brühl

India, Nepal.

See *Annals of the Royal Botanic Garden. Calcutta*. 5: 102. 1895

(Whole plant antibacterial, used for fevers, malaria, typhoid, jaundice.)

in Nepal: ponmar

Delphinium tricornis Michaux (*Delphidium flexuosum* Raf.; *Delphinastrum tricornis* (Michx.) Nieuwl.; *Delphinium flexuosum* B.D. Jacks.; *Delphinium tricornis* var. *multiflorum* DC.)

North America. Perennial or annual, alternate deeply lobed leaves, white-blue or purple spurred flowers

See *Flora Boreali-Americana* 1: 314–315. 1803, *Regni Vegetabilis Systema Naturale* 1: 356. 1818[1817] and *American Midland Naturalist* 3: 172. 1914

(Toxic, cattle are the primary animals affected, toxin can also affect other ruminants as well as horses. Dangerous all parts, especially seeds and young leaves; roots believed to kill cows. Infusions taken for heart troubles.)

in English: dwarf larkspur, poison weed, spring larkspur, staggerweed

Delphinium trolliifolium A. Gray (*Delphinastrum trolliifolium* (A. Gray) Nieuwl.; *Delphinium exaltatum* subsp. *trolliifolium* (A. Gray) Huth; *Delphinium exaltatum* var. *trolliifolium* (A. Gray) Huth)

North America.

See *Proc. Amer. Acad. Arts.* 8: 375. 1872, *Helios* 10: 31, 35. 1892 and *American Midland Naturalist* 3: 172. 1914, *Univ. Colorado Stud., Ser. D, Phys. Sci.* 2: 142. 1945

(For skin diseases.)

in English: cow-poison, poison larkspur, tall larkspur, wood larkspur

Delphinium umbrosum Hand.-Mazz. var. ***drepanocentrum*** (Brühl ex Huth) W.T. Wang & M.J. Warnock (*Delphinium altissimum* subsp. *drepanocentrum* (Brühl ex Huth) Brühl; *Delphinium altissimum* var. *drepanocentrum* Brühl ex Huth; *Delphinium drepanocentrum* (Brühl ex Huth) Munz; *Delphinium drepanocentrum* (Brühl) Munz; *Delphinium umbrosum* subsp. *drepanocentrum* (Brühl ex Huth) Chowdhury ex Mukerjee)

India, Himalaya.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20(4): 419. 1895, *Annals of the Royal Botanic Garden. Calcutta.* 5(2): 101, pl. 120B. 1896 and *Journal of the Arnold Arboretum* 49(1): 94, f. 13L. 1968, *Phytologia* 79(5): 384–385. 1995

(Aerial parts in skin diseases, wounds, cuts, ulcers, abscesses, dysentery.)

in Bhutan: byarkang

in China: kuan bao yin di cui que hua

Delphinium vestitum Wall. ex Royle (*Delphinium vestitum* Boiss.; *Delphinium vestitum* Royle; *Delphinium vestitum* Wall.)

Himalaya. Erect or decumbent herbs, slender, branched, stems densely hairy, leaves mostly basal, hairy flowers purplish blue to dull violet in peduncled elongated racemes, seeds narrowly winged

See *Numer. List* [Wallich] n. 4715. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 55. 1834, *Diagnoses plantarum orientalium novarum*, ser. 2, 2(1): 13. 1854

(Poisonous, causes death of cattle. Roots cooling, stimulant, tonic, useful for cough, blood diseases, diarrhea, piles and toothache. Root paste or juice antiseptic, for cuts, wounds,

rheumatism. Leaves and roots insecticide, for rheumatism. Seeds cathartic, vermifuge, insecticide. Veterinary medicine, root powder in healing ulcers and wounds in cattle.)

in China: qian lie cui que hua

in India: joohi, juha, juhi, kalulu, nirbishi, salyan, swali

in Nepal: maure mulo

Delphinium zalil Aitch. & Hemsl.

Iran, India.

See *Trans. Linn. Soc. London, Bot.* 3(1): 30, t. 3. 1888 [1888–1894 publ. Apr 1888]

(Used in Ayurveda and Unani.)

in India: asbarg, asfrak, asperag, gul ghofis, sprkka, traya-man, trayamana, tukhm ghafis, usara-i-ghafts, zari

in Tibet: ni-rma-lya, spri-kka

Dendranthema (DC.) Des Moulins Asteraceae

From the Greek *dendron* 'a tree' and *antheon* 'flower', the genus contains herbaceous perennials plants, see *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 62. 1837[1838], *Actes de la Société Linnéenne de Bordeaux* 20: 561. 1860 and *Novosti Sist. Vyssh. Rast.* 9: 186. 1972, *Acta Phytotax. Geobot.* 29(6): 165–170. 1978, *Acta Bot. Yunnan.* 13(4): 411–416. 1991, *Acta Hort. Sin.* 23(1): 67–72. 1996, *Chromosome Sci.* 1: 25–30, 77–82. 1997.

Dendranthema grandiflorum (Ramatuelle) Kitamura (*Anthemis grandiflora* Ramatuelle; *Chrysanthemum morifolium* Ramatuelle; *Chrysanthemum morifolium* var. *sinense* (Sabine) Makino; *Chrysanthemum sinense* Sabine; *Chrysanthemum sinense* var. *hortense* Makino ex Matsum.; *Dendranthema morifolium* (Ramatuelle) Tzvelev; *Dendranthema sinense* (Sabine) Des Moul.; *Pyrethrum sinense* (Sabine) DC.; *Tanacetum morifolium* (Ramat.) Kitam.; *Tanacetum sinense* (Sabine) Sch. Bip.)

China.

See *Journal d'Histoire Naturelle* 2: 233, 240. 1792, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 62. 1837, *Ueber die Tanacetee* 50. 1844, *Actes de la Société Linnéenne de Bordeaux* 20: 562. 1855 and *Botanical Magazine* 26(307): 215. 1912, *Mem. in Myanmar: myin-wa, myinwa

in Nepal: bans

in Thailand: nuan, nuang, phaet, phai sang, phai taa dam, phai ta dam, phai taadam, saang, sang, wa me pre, wa mee loe, wa mi loe

in Vietnam: t[aaf]m v[oo]ng

Dendrocnide Miq. Urticaceae

Stinging trees, Greek *dendron* 'tree' and *knide* 'nettle', alluding to the stinging and irritant properties; see Friedrich Anton Wilhelm Miquel (1811–1871), *Plantae junghuhnianae*. Enumeratio plantarum, quas in insulis Java et Sumatra, detexit Fr. Junghuhn. 25. Lugduni-Batavorum [Leiden], Parisiis [1851]– 1853–1855[–1857].

Dendrocnide amplissima (Blume) Chew (*Laportea amplissima* (Blume) Miq.; *Urera amplissima* Blume; *Urticastrum amplissimum* (Blume) Kuntze)

Sulawesi. Tree, dioecious, irritant hairs, raceme branched usually solitary, achene flat

See *Genera Plantarum* 400. 1789, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 496–497. 1826 [1830], *Museum Botanicum* 2: t. 22. 1857, *Flora van Nederlandsch Indië* 1(2): 232. 1859, *Revisio Generum Plantarum* 635. 1891 and *The Gardens' Bulletin Singapore* 21(2): 202. 1965

(Irritant. Sap from the pounded bark used as a remedy for sprue.)

in Indonesia: mesi tapalole, soro bilalago, sosoro boboedo

Dendrocnide excelsa Chew. (*Urera excelsa* Wedd.)

Australia. Tree, leaves with stinging hairs, male and female blossoms are on different specimens

See *Annales des Sciences Naturelles; Botanique, série 4* 1: 178. 1854 and *The Gardens' Bulletin Singapore* 21(2): 203. 1965

(Stinging, burning sensation, itching, reddening and blistering, burning.)

in English: giant stinger, giant stinging tree

Dendrocnide harveyi (Seem.) Chew (*Laportea harveyi* Seem.; *Urticastrum harveyi* (Seem.) Kuntze)

SE Asia, Pacific.

See *Flora Vitiensis* 238, t. 59. 1868, *Revisio Generum Plantarum* 635. 1891 and *The Gardens' Bulletin Singapore* 21(2): 203. 1965

(Injurious to the skin, known to sting violently producing urticaria and shock. The bark, when mixed with the barks of *Pometia pinnata* J.R. Forst. & G. Forst. and *Claoxylon fallax* Müll.Arg., is a treatment for arthritis.)

Dendrocnide kotoensis (Hayata ex Yamamoto) B.L. Shih & Yuen P. Yang (*Dendrocnide meyeniana* fo. *subglabra* (Hayata) Chew; *Laportea kotoensis* Hayata ex Yamamoto; *Laportea kotoensis* Hayata; *Laportea subglabra* Hayata)

Taiwan. Tree, subglabrous, male inflorescences cymose paniculate, coastal forests, along streams

See *Journal of the College of Science, Imperial University of Tokyo* 30(1): 278–279. 1911, *Suppl. Icon. Pl. Formosan.* 1: 2. 1925, *The Gardens' Bulletin Singapore* 25(1): 22. 1969, *Botanical Bulletin of Academia Sinica* 36(3): 162, 164. 1995

(The stinging hairs may be very irritating.)

in China: hong tou yao ren gou

Dendrocnide latifolia (Gaudich.) Chew (*Laportea latifolia* Gaudich.)

Pacific. Tree, dioecious, irritant hairs, raceme branched solitary, achene flattened

See *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique* t. 81. 1844 and *The Gardens' Bulletin Singapore* 21(2): 203. 1965, *International Journal of Crude Drug Research* 20: 169–181. 1982

(Leaves analgesic, rubbed on body bruises and pains. A decoction of the leaves drunk to relieve a headache. Boiled leaves applied to itchy skin.)

in Papua New Guinea: katche

Dendrocnide meyeniana (Walpers) Chew (*Dendrocnide batanensis* (C.B. Rob.) Chew; *Dendrocnide meyeniana* f. *subglabra* (Hayata) Chew; *Dendrocnide nitida* (W. Winkl.) Chew; *Dendrocnide subglabra* (Hayata) Chew; *Laportea batanensis* C.B. Robinson; *Laportea crenulata* Gaudich. var. *nitida* W. Winkl.; *Laportea gaudichaudiana* Weddell; *Laportea meyeniana* (Walpers) Warburg; *Laportea mindanensis* Warburg; *Laportea pterostigma* Weddell; *Laportea pterostigma* fo. *subglabra* (Hayata) H.L. Li; *Laportea pterostigma* var. *subglabra* (Hayata) T.S. Liu & W.D. Huang; *Laportea subglabra* Hayata; *Urtica meyeniana*

Walpers; *Urticastrum gaudichaudianum* (Wedd.) Kuntze; *Urticastrum pterostigma* Kuntze; *Urticastrum pterostigma* (Wedd.) Kuntze)

Philippines. Small tree, dioecious, leaves stinging, raceme branched usually solitary

See *Genera Plantarum* 400. 1789, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique* 498. Paris, 1844–1846, 1851, 1866, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 19, Suppl. 1: 422. 1843, *Archives du Muséum d'Histoire Naturelle* 9: 137. 1856, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 87. 1869, *Revisio Generum Plantarum* 635. 1891 and *Fragmenta Florae Philippinae* 168. 1904, *Philippine Journal of Science* 5(6): 481. 1910, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 278–279. 1911, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 506. 1922, *Woody Fl. Taiwan* 135. 1963, *The Gardens' Bulletin Singapore* 21(2): 202, 204, 206. 1965, *The Gardens' Bulletin Singapore* 25(1): 21–22, f. 6. 1969, *Flora of Taiwan* (Second edition) 2: 194. 1976

(Poison, stinging hairs. An infusion of the roots and leaves taken as a diuretic; crushed leaves locally placed for toothache. Pounded roots or leaves applied to treat scrofula.)

in English: man-biting dog

in China: yao ren gou

in Philippines: apariagua, aparigua, lingatong, lipa, lipai, lipang-dutong, lipang-kalabau, lipang kalabaw

Dendrocnide moroides (Wedd.) Chew (*Laportea moroides* Wedd.; *Urticastrum moroides* Kuntze)

Australia. Tree, immature stinging tree leaves densely covered with painful stinging hairs, leaves of all ages highly nutritious, edible fruits

See *Archives du Muséum d'Histoire Naturelle* 9: 142. 1856 and *The Gardens' Bulletin Singapore* 21(2): 204. 1965

(Stinging, this is reported to be the most painful of all stinging trees; burning, itching, reddening and blistering, burning. For rheumatism, boiled leaves and bark rubbed in.)

in English: gympie, gympie stinger, mulberry-leaved stinger, stinging tree

Dendrocnide sinuata (Blume) Chew (*Laportea crenulata* Gaudich.; *Laportea crenulata* Wight; *Laportea integrifolia* C.Y. Wu; *Laportea postulosa* Ridl.; *Laportea pustulata* Wedd.; *Laportea pustulosa* Ridley; *Laportea sinuata* (Blume) Miq.; *Laportea sinuata* Blume ex Wedd.; *Urtica ardens* Blume, nom. illeg.; *Urtica ardens* Link; *Urtica crenulata* Roxb., nom. illeg.; *Urtica crenulata* Sw.; *Urtica sinuata* Blume; *Urticastrum sinuatum* (Blume) Kuntze; *Urticastrum sinuatum* Kuntze)

India, Sri Lanka, Subtropical Himalaya. Small tree or shrub, monoecious, spreading, irritant stinging long hairs, ovate

or elliptic simple leaves clothed with stinging hairs, raceme branched unisexual, achene asymmetrically pyramidal verrucose, young shoots as vegetables, weedy species, along roads, on sandy soils

See *Species Plantarum* 2: 983–985. 1753, *Genera Plantarum* 400. 1789, *Hort. Bengal.* 67. 1814, *Enum. Hort. Berol. Alt.* 2: 385. 1822, *Bijdragen tot de flora van Nederlandsch Indië* 10: 504–505. 1825 [7 Dec 1825–24 Jan 1826], *Bijdr. Fl. Ned. Ind.* 12: 605. 1826, *Flora Indica*; or, descriptions of Indian Plants 3: 591. 1832, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique* 498. Paris, 1844–1846, 1851, 1866, *Icon. Pl. Ind. Orient.* [Wight] vi. 9. 1853, *Prodr.* (DC.) 16(1): 86. 1869, *Annales Museum Botanicum Lugduno-Batavi* 4: 301. 1869, *Revisio Generum Plantarum* 2: 635. 1891 and *Bijdr. Booms. Java* 12: 684. 1910, *J. Straits Branch Roy. Asiat. Soc.* 82: 194. 1920, *Acta Phytotaxonomica Sinica* 6(3): 277–278. 1957, *The Gardens' Bulletin Singapore* 21(2): 206. 1965

(Used in Sidha. Powerful stinging hairs producing itching, dermatitis, burning, pain, violent sneezing, fever, sleeplessness. Young shoots eaten as vegetables and said to be good for stomach. A decoction of the roots together with the leaves of a *Schizostachyum* sp. drunk as a remedy for swollen limbs; a decoction of *Laportea crenulata* roots with roots of *Punica granatum* and kernel of *Mucuna nigricans* given in fever with cough; root juice or a decoction taken for prolonged fever. Leaves applied against scabies and retained placenta; macerated leaves given in indigestion; crushed leaves locally placed for toothache. Used as an oral contraceptive. Arrow or dart poison. Magico-religious beliefs, contact therapy, a piece of root tied around the loin a remedy for rheumatic pain.)

in English: devil nettle, fever nettle, tree nettle

in China: quan yuan huo ma shu

in India: anaccooriyanam, anachorian, anachoriya, anachoriyanam, anaichorian, anaichoriya, anaschorigenam, anayeviratti, bap-kang-san, chorat, dieng synrem, elampilavu, gilmata-jakma, moricha, otta-pilava, ottapila, pagsa, perunkanchori, perunkancori, prandam, raantae, raet, tamot, tarmepi-araung, thakpui, thlak-pui, torash

in Indonesia: kemadhu kodok, kemadu kebo, kemaduh

in Malaysia: jelatang, pelutus, rumpe (sakai)

in Nepal: morange

in Papua New Guinea: batal, lapot

in Thailand: han-chang-hai, han-chang-hong, han-dua, han-sa, ka-lang-tang-chang, kalangtang chaang, lang-tang-chang, tam-yae-chang

in Vietnam: n[af]ng hai, han tr[aws]ng

Dendrocnide stimulans (L.f.) Chew (*Laportea annamica* Gagnep.; *Laportea hainanensis* Merr. & F.P. Metcalf; *Laportea stenophylla* Quisumb.; *Laportea stimulans* (L.f.)

Miq.; *Laportea thorelii* Gagnep.; *Urtica stimulans* L.f.; *Urticastrum stimulans* (L.f.) Kuntze; *Urticastrum stimulans* Kuntze)

Vietnam, China. Shrub or small tree, dioecious, straight, spreading, leaves with irritant stinging hairs, raceme branched, achene flattened, in primary and secondary forest

See *Species Plantarum* 2: 983–985. 1753, *Supplementum Plantarum* 418. 1782, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 498. 1826, *Plantae Junghuhnianae* 1: 29. 1851, *Systematisches Verzeichniss der im Indischen Archipel* 103. 1854, *Revisio Generum Plantarum* 2: 635. 1891 and *Bulletin de la Société Botanique de France* 75: 2–3. 1928, *Lingnan Science Journal* 16(2): 189, f. 4. 1937, *The Gardens' Bulletin Singapore* 21(2): 206. 1965, *Journal of Ethnopharmacology* 45(2): 97–111. 1995

(Producing itching, burning, pain, violent sneezing, fever, sleeplessness. Antimicrobial, antifungal. A decoction of leaves and roots drunk as an anthelmintic; leaves or roots used for poulticing; sap drunk as a bechic; for swellings, pound the roots with a little sulphur and coconut milk and poultice. Arrow poison. Magico-religious beliefs, leaves tied to the portal of a house to scare evil spirits away; leaves of *Justicia gendarussa* soaked with water and leaves of *Dendrocnide stimulans*, the water used in a ceremony for good hunting and harvest.)

in English: elephant nettle tree, Malay nettle tree

in China: hai nan huo shu ma

in Indonesia: jalatong pulus, jelatang kayu, kemaduh sapi, pei

in Malaysia: daun gatal, iilatang, jelatang api, jelatang gajah, rumpai

in Thailand: haan duea, saam kao, tamyae chaang

in Vietnam: han lá dai, lhan t[is]m, m[as]n nam

Dendrocnide subclausa (C.B. Rob.) Chew (*Laportea subclausa* C. Robinson)

Australia.

See *Philippine Journal of Science* 5: 486. 1911, *The Gardens' Bulletin Singapore* 21(2): 206. 1965

(Irritant.)

Dendrolobium (R. Wight & Arnott) Bentham Fabaceae (Desmodieae)

From the Greek *dendron* 'a tree' and *lobos* 'a pod', referring to the woody pods; see *Plantae Junghuhnianae* 215, 216. (Aug.) 1852.

Dendrolobium triangulare (Retzius) Schindler (*Desmodium cephalotes* (Roxburgh) Wight & Arnott; *Desmodium cephalotes* (Roxb.) Wallich ex Wight & Arn.; *Desmodium*

cephalotes Wall. ex Wight & Arn.; *Desmodium cephalotes* var. *congestum* Prain; *Desmodium congestum* Wall. ex Wight & Arnott; *Desmodium paleaceum* sensu auct.; *Desmodium triangulare* (Retz.) Merr.; *Desmodium triangulare* (Retz.) Santapau, nom. illeg., non *Desmodium triangulare* (Retz.) Merr.; *Hedysarum cephalotes* Roxb., nom. nud.; *Hedysarum triangulare* Retzius; *Meibomia cephalotes* (Roxb.) Kuntze)

SE Asia, India. Perennial non-climbing shrub

See *Observationes Botanicae* 3: 40. 1783, *Hortus Bengalensis*, or a catalogue ... 57. 1814 and *Repertorium Specierum Novarum Regni Vegetabilis* 20(561–576): 279. 1924, *Journal of the Arnold Arboretum* 23(2): 170. 1942, *Kew Bulletin* 3(2): 276. 1948, *Bull. Bot. Surv. India* 10: 270–272. 1968, *Cytologia* 54: 51–64. 1989, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Guihaia* 15(2): 166–171. 1995

(Pods toxic to livestock, poisonous. Roots extract used as emetic and antidote for snakebite, also for strengthening bones and building muscles.)

in China: jia mu dou

in India: naaga thagare

in Japan: shirage-mame-hagi

in Vietnam: ba che, nieng duc

Dendrolobium umbellatum (L.) Benth. (*Aeschynomene umbellata* Desv.; *Dendrolobium australe* (Willd.) Benth.; *Dendrolobium umbellatum* (L.) Benth.; *Dendrolobium umbellatum* var. *majus* Miq.; *Dendrolobium umbellatum* var. *obtusissimum* Blume ex Miq.; *Desmodium australe* (Willd.) DC.; *Desmodium cumingianum* (Benth.) Benth.; *Desmodium umbellatum* (L.) DC.; *Desmodium umbellatum* (L.) DC. var. *costatum* Craib; *Hedysarum arboreum* Roxb.; *Hedysarum australe* Willd.; *Hedysarum ellipticum* Miq.; *Hedysarum umbellatum* L.; *Meibomia umbellata* (L.) Kuntze; *Ormocarpum umbellatum* (L.) Desv.)

Africa, Oceania. Perennial non-climbing tree, shrub or small tree, branched, smooth bark, twigs very hirsute, leaves compound dark green and velvety, velvety orange and cream yellow flowers, fruits pods velvety, roasted fruits eaten

See *Species Plantarum* 2: 747. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 325–326. 1825, *Plantae Junghuhnianae* 2: 218. 1852, *Revisio Generum Plantarum* 1: 197. 1891 and *Ann. Roy. Bot. Gard. (Peradeniya)* 1: 45–164. 1901, *Flora und Fauna der Comoren*. 428–480. Berlin. 1917, *An Enumeration of Philippine Flowering Plants* 2(3): 241–323. 1923, *Atoll Res. Bull.* 58: 1–37. 1957, *Journal of Pharmaceutical Sciences* 62(7): 1077–1082. 1973, *Wild Flws of Japan, Woody Pls.* 1: 229–256. 1989, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992, *Austrobaileya* 5(2): 209–261. 1999, *Journal of Ethnopharmacology* 110(2): 200–234. 2007

(Antimycobacterial, antibacterial. Leaves astringent, tonic, crushed leaves and shoots used to massage an enlarged spleen, in malaria; leaves chewed raw to treat fever; leaf paste

applied on forehead for headache. Plant astringent, used by women after childbirth.)

in English: horse bush, sea vetch-tree

in Comoros: m'soho

in India: chittentakura, cittentakura, damlé, jaenu kaddi chooru, jaenu kaddi gida, jainkaddichooru, jenukaddicuru, kome, komma, murivaal, naimarallu, namarallu, rana, sittenthakura

in Madagascar: fanavintrana, hazomafaika, kinandrandraika, kinandro, sausautave, sovondrano, tokaibebe, voandavenina

in Japan: Naha-hagi

in Malaya: hati hati, petai laut

in Papua New Guinea: kawai, tututu, urara

Dendromecon Benth. Papaveraceae

Greek *dendron* 'a tree' and *mekon* 'poppy', see *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 407. 1835.

Dendromecon rigida Benth.

North America. Perennial shrub, food

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 407. 1835

(Smoked.)

in English: bush poppy, tree poppy

Dendromecon rigida Benth. subsp. *rigida*

North America. Perennial shrub

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 407. 1835

(Smoked.)

in English: bush poppy, tree poppy

Dendropanax Decne. & Planchon Araliaceae

From the Greek *dendron* 'a tree' and the genus *Panax*, see *Revue Horticole* 16: 107. 1854 and *Sci. Surv. Porto Rico* 6: 47. 1925, *Fieldiana, Bot.* 24(8/1): 1–21. 1966, *Fl. Veracruz* 8: 1–38. 1979.

Dendropanax arboreus (L.) Decne. & Planch. (*Aralia arborea* L.; *Aralia fruticosa* Sessé & Moc.; *Aralia tuxtensis* Sessé & Moc.; *Dendropanax alaris* (Schltdl.) Decne. & Planch.; *Dendropanax arboreum* (L.) Decne. & Planch.; *Dendropanax brachypodus* (Urb.) R.C. Schneid.; *Dendropanax concinnum* (Standl.) Lundell; *Dendropanax insularis* (Rose) R.C. Schneid.; *Dendropanax juergensenii* Seem.; *Dendropanax langeanus* Marchal ex Standl.; *Dendropanax matudae* (Lundell) A.C. Sm.; *Dendropanax monticolus* Standl.;

Dendropanax samydifolius (C. Wright ex Griseb.) Seem.; *Dendropanax schippii* (A.C. Sm.) A.C. Sm.; *Dendropanax stenodontus* (Standl.) A.C. Sm.; *Erithalis pentagonia* DC.; *Gilibertia alaris* (Schltdl.) I.M. Johnst.; *Gilibertia arborea* (L.) Marchal; *Gilibertia arborea* (L.) Marchal ex T. (Leaves infusion for stomach and intestinal disorders.)

Dendropanax caloneurus (Harms) Merrill (*Dendropanax ficifolius* C.J. Tseng & G. Hoo; *Gilibertia caloneura* Harms)

China, Vietnam. Shrubs or small trees

See *Bulletins de l'Académie Royale des Sciences, des Lettres et des Beaux Arts de Belgique* 47(1): 79. 1879 and *Notizbl. Bot. Gart. Berlin-Dahlem* 13: 452. 1937, *Brittonia* 4: 132. 1941, *Acta Phytotax. Sin.*, Addit. 1: 145. 1965

(Tonic infusion.)

in China: rong ye shu shen, shu shen shu

Dendropemon (Blume) Reichb. Loranthaceae

From the Greek *dendropemon* 'blasting trees', see *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Annales du muséum national d'histoire naturelle* 12: 292. 1808, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1729. 1830 [Oct–Dec 1830], *Flora Javae* 34–35 (Loranth.): 13. 1830 [16 Aug 1830], *Der Deutsche Botaniker Herbarienbuch* 73. 1841 [*Repert. Herb. sive Nomencl. Gen. Pl.* 73. 1841] and *Taxon* xvii. 158. 1968.

Dendropemon emarginatus Blume (*Dendropemon emarginatus* (Sw.) Tiegh.)

North America, Caribbean. Parasitic

See *Prodr.* (Swartz) 58. 1788, *Systema Vegetabilium* 7(2): 1729. 1830, *Fl. Bras.* (Martius) 5(2): 55. 1868, *Bull. Soc. Bot. France* 41: 69. 1894, *Bull. Soc. Bot. France* 42: 170. 1895

(Infusion for colds, worms, pain.)

Dendropemon purpureus Krug & Urb. (*Dendropemon purpureus* (L.) Krug & Urb.)

North America, Caribbean. Parasitic, flowers reddish-brown, fruits flushed dull purple

See *Der Deutsche Botaniker Herbarienbuch* 73. 1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(1): 26. 1897

(Infusion for colds, worms, pain.)

Dendrophthoe Martius Loranthaceae

Greek *dendron* 'a tree' and *phthio* 'to decline, decay, consume', *phthisis* 'consumption, decline, corruption', referring to the parasitic habit and to its effect on the host; see Carl Friedrich Philipp von Martius (1794–1868), in *Flora oder allgemeine Botanische Zeitung*. 13: 109. (Feb.) 1830, *Botanischer Jahresbericht* 24(2): 291. 1898.

Dendrophthoe constricta Danser

Indonesia. Woody parasite, host *Parkia speciosa*, also found on *Citrus* spp.

See *Bulletin du Jardin Botanique de Buitenzorg* III, 10: 307. 1929

(A decoction of dried leaves and stem, mixed with *Scurrula fusca*, drunk to treat stomachache, dysentery, cholera and diarrhea.)

in English: flower-pecker fruit

in Indonesia: buah acheng

Dendrophthoe elastica Danser (*Loranthus elasticus* Desr.)

India.

See *Bulletin du Jardin Botanique de Buitenzorg* III, 10: 308. 1929

(Used in Ayurveda.)

in India: bandaka

Dendrophthoe falcata (L.f.) Ettingsh. (*Dendrophthoe discolor* Barlow; *Dendrophthoe falcata* Ettingsh.; *Dendrophthoe falcata* L.f.; *Dendrophthoe falcata* Blume; *Dendrophthoe falcata* Danser; *Loranthus falcatus* L.f.)

Tropical and subtropical Himalayan regions. Bushy parasitic, epiphytic shrub, smooth grey bark, linear leaves opposite, white flowers

See *Bull. Jard. Bot. Buitenzorg* ser. III, x, 308. 1929, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1730. 1830,

Denkschriften der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftliche Klasse 32: 52. 1872 and *Fl. Tamil Nadu, India*, Ser. 1, 2: 215. 1987, *J. Econ. Taxon. Bot.* 31(1): 182. 2007

(Used in Ayurveda. Plant insect repellent, a paste given for abortion and to turn a man mad, a decoction used to control menstrual cycle and for infertility. Paste of young fruits applied in skin ailments. Leaf decoction as aphrodisiac. Bark and dried leaves powdered and given for treating spermatorrhea. Bark astringent, narcotic, used for wounds, asthma, menstrual disorders. Leaves and flowers chewed and gargled in toothache. Magico-religious beliefs, if the twigs are tied in any place of the house, it is believed that the plant will protect the house from evil eyes and evil spirits; touch therapy, a piece of this plant worn on the arm to cure fever and to prevent bad dreams; tied to the waist of a patient to relieve hysteria and madness. When growing on *Calotropis gigantea* considered useful in increasing brain power, intelligence; when growing on *Tamarindus indica* considered valuable for treating in impotency; stem of *Dendrophthoe falcata* grown on *Acacia leucophloea* made into a talisman tied around upper arm of a woman to prevent conception; when growing on *Semecarpus anacardium* is associated with some Mantras. Veterinary medicine, leaves given in anthrax, and also in urinary troubles of buffalo.)

in English: sickle mistletoe

in India: adharvela, apadarohini, baandagul, badanika, badanike, bahda, bajinika, ban, banda, bandaka, bandarike, bandgul, betungli, chigara bajana, dhara gaach, irkum, ittikanni, jiddu, kainguli, kang, kawarak, kesarakabandanike, lasan, madaang, madana ummatthi, madang, mahuwa-kavanda, malang, mandang, mandergam vanda, mara haalugida, marabhaksha, misdarya kundu, modong, muddapa, muddupa, parand, plavithil, pulluri, pulluruvi, siddeshwara, sigare, sigare badanike, sum, tuthekmi, uchi, vajinika, valliitti-canni, vanda, vandaka, velagabandanika, velluta-itti-canni, vriksharohini, vrksadani, vrksaruha, wedinikai, yelinga

in Nepal: aijeru, ajeru

Dendrophthoe pentandra (L.) Miq. (*Loranthus pentandrus* L.)

China. Shrubs, branches grayish, leaf blade thickly leathery, racemes solitary or 2 or 3 together, corolla orange, berry red

See *Enumeratio Stirpium Plerarumque, quae sponte cresunt in agro Vindobonensi* 55-, 230, pl. 3. 1762, *Mantissa Plantarum* 1: 63. 1767, *Syst. Nat.*, ed. 12, 2: 252, 1767, *Flora van Nederlandsch Indië* 1: 818. 1856

(Used in Ayurveda. Antioxidant, leaves poulticed as postpartum remedy. Cardiovascular effects.)

in China: wu rui ji sheng

in India: bandaka, maravotti, ottu, pulluruvi

Malay name: mendalu api puteh, sanalu api

Dendrotrophe Miquel Santalaceae

Greek *dendron* 'a tree' and *trophe* 'food', referring to the parasitic habit; see *Plantae Asiaticae Rariores* 3: 13. 1831, *Museum Botanicum* 1(16): 242–243, t. 43. 1851 [Jul 1850 publ. early 1851], F.A.W. Miquel, *Flora Indiae Batavae*. 1(1): 776, 779. Amsterdam 1856, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 51: 657. 1860 and *Nat. Pflanzenfam.* (ed. 2) 16b: 71. 1935.

Dendrotrophe buxifolia (Blume) Miquel (*Dendrotrophe buxifolia* Miquel; *Henslowia buxifolia* Blume; *Osyris rotundata* Griff.) (*Henslowia* Blume, after the British clergyman Rev. John Stevens Henslow, 1796–1861 (Hitcham, Suffolk), botanist, mineralogist, plant geographer, 1818 Fellow of the Linnean Society, 1819 member of the Geological Society of London, founder of the Cambridge Philosophical Society, 1822 professor of mineralogy at Cambridge, 1824 ordained, 1825–1861 professor of botany at Cambridge, among his publications are *The principles of descriptive and physiological botany*. London 1835, *A Dictionary of English and Latin Terms*, used in botanical descriptions. [Issued, in parts, with Maund's *Botanic Garden*, vol. 10–13.], *A dictionary of botanical terms*. London s.d. and *A catalogue of British plants*. Cambridge 1829, he was co-author with Edmund Skepper (1825–1867) of *Flora of Suffolk*. London and Bury St. Edmund's [1860], 1837–1846 co-editor with Benjamin Maund (1790–1863) of *The Botanist*. London. See Francis Wall Oliver, ed., *Makers of British Botany*. 151–163. Cambridge 1913, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 181. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 161. 1965, N. Barlow, ed., *Darwin and Henslow, the Growth of an Idea. Letters 1831–1860*. London 1967, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 172. 1972, M.V. Mathew, in *D.S.B.* 6: 288–289. 1981.)

China, Malaysia.

See Karl Ludwig von Blume, *Museum Botanicum Lugduno-Batavum*. 1(16): 244. 1851 [Jul 1850 publ. early 1851], *Flora Indiae Batavae*. 1(1): 781. 1855–1856

(For headache and giddiness, pound the leaves and poultice.)

Malay name: setong jundor

Dendrotrophe lobbiana Miq. (*Henslowia lobbiana* A. DC.)

Malay Peninsula.

See *Prodr.* (DC.) 14(2): 631. 1857, *Flora van Nederlandsch Indië* 1(1): 1096. 1858

(For headache, crushed leaves poulticed.)

Malayan name: akar api-api

Dendrotrophe varians (Blume) Miquel (*Dendrotrophe frutescens* (Champion ex Benth.) Danser; *Dendrotrophe frutescens* var. *subquinquenervia* P.C. Tam; *Dendrotrophe*

punctata C.Y. Wu & D.D. Tao; *Dendrotrophe varians* Miquel; *Henslowia frutescens* Champion ex Benth.; *Henslowia frutescens* Benth.; *Henslowia frutescens* var. *subquinquenervia* P.C. Tam; *Henslowia sessiliflora* Hemsley; *Henslowia varians* Blume)

Thailand.

See *Museum Botanicum* 1(16): 244, t. 43. 1851 [Jul 1850 publ. early 1851], *Hooker's J. Bot. Kew Gard. Misc.* 5: 194. 1853, *Fl. Ned. Ind.* 1(1): 780. 1856, *J. Linn. Soc., Bot.* xxvi. (1891) 409. 1891 and *Bull. Bot. Res., Harbin* 1(3): 70. 1981, *Journal of Ethnopharmacology* 86(2–3): 253–256. 2003

(Cancer chemopreventive potential.)

in China: ji sheng teng

Dennettia Baker f. Annonaceae

Named after Richard E. Dennett of the Nigerian Forest Service, see *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 298. 1899 and Alfred Barton Rendle (1865–1938) et al., "Catalogue of the plants collected by Mr. and Mrs. P.A. Talbot in the Oban District of South Nigeria." *British Museum Trustees, Natural History*. London 1913.

Dennettia tripetala Baker f. (*Uvariopsis tripetala* (Baker f.) G.E. Schatz)

Tropical Africa. Small tree

See *Novon* 13(4): 447. 2003

(Fruits and leaves for cough.)

in Nigeria: igberi (Yoruba); ako (Edo); nmimi (Igbo); nkarika (Ibibio)

Dennstaedtia Bernhardt Dennstaedtiaceae

Named for the German botanist August Wilhelm Dennstedt, 1776–1826, physician, among his works *Nomenclator botanicus*. Eisenberg 1810, *Schlüssel zum Hortus indicus malabaricus*. Weimar 1818 and *Hortus belvedereanus*. Weimar 1820–1821; see [Edited by Heinrich Adolph Schrader, 1767–1836], *Journal für die Botanik*. 2: 124, t. 1(3). Göttingen 1801, *Tentamen Pteridographiae* 137–138, pl. 5, f. 12–14. 1836, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 270. Ansbach 1852 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 443. 1965, *J. Sci. Engin.* (Nation. Chung-Hsing Univ.) 10: 195. 1973, *Indian Fern J.* 3(1–2): 2. 1986, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 701. Stuttgart 1993.

Dennstaedtia appendiculata (Wall. ex Hook.) J. Sm. (*Dennstaedtia appendiculata* (Wall.) J. Sm.; *Dicksonia appendiculata* Wall. ex Hook.; *Dicksonia appendiculata*

Wall.; *Emodiopteris appendiculata* (Wall. ex Hook.) Ching & S.K. Wu; *Patania appendiculata* (Wall. ex Hook.) Bedd.; *Patania appendiculata* Bedd.)

India, Nepal.

See *Numer. List* [Wallich] n. 65. 1828, *Historia Filicum* 265. 1875, *Supplement to the Ferns of Southern India and British India* 2. 1876 and *Acta Phytotaxonomica Sinica* 16(4): 21. 1978, *Indian Fern J.* 5: 162–169. 1988

(Veterinary medicine.)

in Nepal: daluko, lute sottar, raunne

Dentella Forster & Forster f. Rubiaceae

Diminutive of the Latin *dens, dentis* ‘a tooth’, referring to the corolla lobes; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 25, t. 13. (Nov.) 1775.

Dentella repens (L.) J.R. Forst. & G. Forst. (*Dentella repens* Forst.; *Hedyotis repens* (L.) Lam.; *Hedyotis repens* Lam.; *Hedyotis repens* G. Don; *Hedyotis repens* Clos; *Hedyotis repens* Bojer; *Oldenlandia repens* L.)

India to New Caledonia. Many-branched prostrate herb, rooting at the nodes, leaves eaten as vegetable

See *Char. Gen. Pl.*: pl. 13. 1775, *Gen. Hist.* 3: 526. 1834, *Hortus Maurit.* 167. 1837, *Fl. Chil.* [Gay] 3(2): 208. 1848

(Whole plant antidote for scorpion bites, poulticing sores. Fresh plant juice given in calculi, strangury.)

in India: bhuiapat, dantiphaliu, helencha shak, jata, kantha sag, sheem, tsjeru-manneli

Malay name: bunga karang

Deparia Hooker & Greville Dryopteridaceae (Dicksoniaceae, Woodsiaceae)

Greek *depas* ‘a goblet, beaker’, referring to the shape of the indusium of some species; see W.J. Hooker and Robert Kaye Greville (1794–1866), *Icones Filicum*. 2: t. 154. 1829–1830.

Deparia boryana (Willd.) M. Kato (*Aspidium boryanum* Willd.; *Aspidium divisum* (Wall. ex Hook.) Wall. ex Thwaites; *Aspidium divisum* Wall.; *Aspidium edentulum* Kunze; *Athyrium boryanum* (Willd.) Ching; *Athyrium boryanum* (Willd.) Tagawa; *Athyrium edentulum* (Kunze) Ching; *Cornopteris boryana* (Willd.) Tardieu; *Ctenitis boryana* (Willd.) Copel.; *Dryoathyrium boryanum* (Willd.) Ching; *Dryoathyrium edentulum* (Kunze) Ching; *Dryopteris boryana* (Willd.) C. Chr.; *Dryopteris divisa* (Wall. ex Hook.) Kuntze; *Dryopteris divisa* Kuntze; *Dryopteris edentula* (Kunze) Kuntze; *Dryopteris kingii* (Bedd.) C. Chr.; *Lastrea boryana* (Willd.) T. Moore; *Lastrea divisa* (Wall. ex Hook.) Bedd.; *Lastrea divisa* (Wall.) T. Moore; *Lastrea edentula* (Kunze) T. Moore; *Lunathyrium boryanum* (Willd.) H.

Ohba; *Nephrodium boryanum* (Willd.) Hook.; *Nephrodium boryanum* (Willd.) Hook.; *Nephrodium boryanum* var. *microstegioides* C.B. Clarke; *Nephrodium divisum* Wall. ex Hook.; *Nephrodium edentulum* (Kunze) Baker; *Parathyrium boryanum* (Willd.) Holttum; *Phegopteris kingii* Bedd.; *Polypodium subtripinnatum* C.B. Clarke)

China. Tender fronds eaten as vegetable

See *Species Plantarum*. Editio quarta 5(1–2): 285. 1810, *Botanische Zeitung* (Berlin) 4: 474–475. 1846, *Index Filicum* 86, 90. 1858, *Species Filicum* 4: 126, 133–134. 1862, *The Ferns of Southern India* 35, t. 97. 1863, *Enumeratio Plantarum Zeylaniae* 392. 1864, *Synopsis Filicum* 279. 1867, *Transactions of the Linnean Society of London, Botany* 1(8): 545, pl. 80, f. 1. 1880, *Revisio Generum Plantarum* 2: 811–812. 1891, *A Supplement to the Handbook of the Ferns of British India* 84. 1892 and *Index Filicum* fasc. 4: 255. 1905, *Index Filicum* fasc. 5: 273. 1905, *Acta Phytotaxonomica et Geobotanica* 4(3): 144. 1935, *Lingnan Science Journal* 15(3): 396–397. 1936, *Bulletin of the Fan Memorial Institute of Biology*: 11(2): 81. 1941, *Genera Filicum* 123. 1947, *Kew Bulletin* 13(3): 449. 1958, *American Fern Journal* 48(1): 32. 1958, *Science Report of the Yokosuka City Museum* 11: 53. 1965, *Botanical Magazine* (Tokyo) 90(1017): 36. 1977

(Poultice for headache.)

in Nepal: ghyu nyuro, kalo nyuro

Derris Lour. Fabaceae (Leguminosae, Millettieae)

Greek *derris* ‘a skin, a leather covering, leather coat’, referring to the seed pods; see J. de Loureiro, *Flora Cochinchinensis*. 423, 432. 1790, *Nov. Gen. Sp.* [H.B.K.] vi(ed. quarto). 383. 1824, *Fl. Ned. Ind.* 1: 145. 1855 and *J. Bombay Nat. Hist. Soc.* 68(1): 303. 1971, *Loefgrenia* 93: 6. 1988.

Derris andamanica Prain (*Derris sinuata* Prain)

India, Andaman. Strong perennial climbing shrub, straggling, subcoriaceous leaflets, flowers in axillary or terminal racemes, linear lanceolate pods

See *Enumeratio Plantarum Zeylaniae* 2: 93. 1859, *Botanisches Centralblatt* 47(13): 388. 1891, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 104. 1897 [1898 publ. 1897] and *Bull. Bot. Surv. India* 3: 175–200. 1961

(Leaves antibacterial. Fish poison.)

in India: gony, noalata

Derris benthamii (Thwaites) Thwaites (*Brachypterum benthamii* Thwaites; *Derris benthamii* Thwaites)

India, Sri Lanka. Perennial climbing shrub

See *Enumeratio Plantarum Zeylaniae* [Thwaites] 93. 1859, *Enumeratio Plantarum Zeylaniae* [Thwaites] 5: 413. 1864

(Leaves and fruits made into a paste consumed with honey for giddiness.)

in India: han-kala-wel, kaattusirukodipatchilai, karapu-tekell

Derris brevipes Baker (*Deguelia brevipes* (Baker) Taub.; *Pterocarpus brevipes* (Baker) Kuntze)

India. Perennial climbing shrub

See *Selectarum Stirpium Americanarum Historia* ... 283. 1763, *Flora Cochinchinensis* 432. 1790, *An Introduction to the Natural System of Botany* 148. 1836, *The Flora of British India* 2(5): 244. 1878, *Revisio Generum Plantarum* 1: 203. 1891, *Botanisches Centralblatt* 47(13): 386. 1891 and Badami, S., Aneesh, R., Sankar, S., Sathishkumar, M.N., Suresh, B., Rajan, S. "Antifertility activity of *Derris brevipes* var. *coriacea*." *J. Ethnopharmacol.* 84(1): 99–104. 2003

(Roots abortifacient, antifertility, antiviral.)

in India: karinkodi

Derris elegans Benth. (*Deguelia elegans* Taubert; *Deguelia elegans* (Graham ex Benth.) Taub.; *Derris elegans* Graham ex Benth.)

India, Burma. Perennial climbing shrub, liana or scandent shrub, inflorescence axillary, pink or red calyx, white corolla, fruit with a narrow wing along one side

See *Plantae Junghuhnianae* 2: 252. 1852, *Botanisches Centralblatt* 47(13): 387. 1891

(Roots, stems and seeds fish poison. A solution of crushed leaves in green coconut water used to wash snakebites.)

in Malaysia: akar tuba

in Papua New Guinea: imora

Derris elliptica (Wall.) Benth. (*Cylista piscatoria* Blanco; *Deguelia elliptica* (Roxb.) Taubert; *Deguelia elliptica* Taubert; *Derris elliptica* (Roxb.) Benth.; *Derris elliptica* Benth.; *Galactia terminaliflora* Blanco; *Galedupa elliptica* Roxb.; *Millettia pachycarpa* Benth.; *Millettia piscatoria* (Blanco) Merr.; *Millettia piscatoria* Merr.; *Millettia splendidissima* Blume ex Miq.; *Millettia splendidissima* S. Vidal; *Pongamia elliptica* Wall.; *Pongamia elliptica* Sweet; *Pongamia volubilis* Zoll. & Moritzi) (*Cylista* Aiton, from the Greek *kylio*, *kylindeo* 'to roll, roll along', *kylistos* 'rolled, twined in a circle'.)

India, Myanmar. Perennial non-climbing shrub to large woody climber, liana, scrambling, root reddish-brown, warty-fibrous bark, inflorescence axillary, pinkish corolla, oblong compressed pod with a narrow wing along both sides

See *Hort. Bengal.* 53. 1814, *Hort. Brit.* [Sweet] 131. 1826, *Flora Indica*; or, descriptions of Indian Plants 3: 242–243. 1832, *Fl. Filip.* [F.M. Blanco] 589. 1837, *Fl. Filip.*, ed. 2 [F.M. Blanco] 411. 1845, *Journal of the Proceedings of the Linnean Society* 4(Suppl.): 111–112. 1860, *FBI* 2: 114. 1878, *Botanisches Centralblatt* 47(13): 386–387. 1891 and *Philipp. Bur. Gov. Lab.* [Publ.] 27: 37. 1905, *Blumea* 33(1): 255. 1988, *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* no. 34: 141–144. 2001

(Toxins, poisonous, cattle have died after eating this plant. Fresh bark masticatory, as a substitute for betel nut. For itch, boil the plant, mix with coconut oil and apply as a poultice; for boils, pound young leaves with leaves of *Capsicum frutescens* and apply as a poultice. Roots emmenagogue; powdered root an insecticide. An extract of the root an ingredient of dart poison; bark used as ingredient of arrow-poison; leaves, bark and twigs of *Tabernaemontana divaricata*, together with *Derris elliptica*, components of an arrow poison. Roots, stems and seeds fish poison; white milky sap from the pounded roots used as fish-poison; fresh bark sap used as a fish poison; fish poisoning, pound leaves of *Scyphostegia borneensis* together with roots of *Derris elliptica*. Veterinary medicine, against parasites on the skin of cattle. Ceremonial, a small piece of bark burned in a ritual to remove a curse.)

in English: derris, derris root, poison vine, tuba root, tuba root of Malaya

in Borneo: tuba

in Brunei: tuba

in Burma (Myanmar): hon

in Cambodia: ca bia, k'biehs

in India: bakal bih, etam chali, hiru-alau, hiru-rikang, meenu maari, mokoi sopa, ripiktom

in Indonesia: akar tuba, oyod tungkul, tuba, tuba aka, tuwa leteng

in Japan: derisu, haitoba, shirotoha, toba

in Malaysia: akar tuba, tuba, tubah

in Philippines: tubli, tugling-pula, upei

in Thailand: hang lai daeng, ka-lam-pho, kalamphoh, khrua-lai-nam, lai nam, pho-ta-ko-sa, uat-nam

in Vietnam: d[aa]y m[aa]jt, d[aa]y thu[oos]c c[as]

Derris ferruginea Benth. (*Deguelia ferruginea* Taub.; *Deguelia ferruginea* (Benth.) Taub.; *Derris elliptica* sensu Brenan; *Derris ferruginea* De Wild.; *Derris ferruginea* De Wild.; *Robinia ferruginea* Roxb., nom. illeg.; *Robinia ferruginea* Kunth)

India. Perennial non-climbing shrub, woody climbers

See *Species Plantarum* 2: 722–723. 1753, *Hort. Bengal.* 98. 1814, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 6: 395. 1823[1824], *Flora Indica*; or, descriptions of Indian Plants 3: 329. 1832, *Plantae Junghuhnianae* 2: 252. 1852, *Botanisches Centralblatt* 47(13): 386–387. 1891 and *Bull. Jard. Bot. État Bruxelles* 7: 231, in syn. 1920

(Toxins. Roots as fish poison.)

in English: Indian tuba root, Indian tuber root

in India: kho, ruphang-doukha

Derris malaccensis (Benth.) Prain (*Deguelia malaccensis* (Benth.) Blake; *Deguelia malaccensis* S.F. Blake; *Derris cuneifolia* Benth. var. *malaccensis* Benth.; *Derris malaccensis* Prain)

Malay Peninsula. Perennial non-climbing shrub, liana, inflorescence axillary, pink calyx, whitish or pinkish corolla, fruit with a narrow wing along both sides

See *Plantae Junghuhnianae* 2: 253. 1852, *Journal of the Proceedings of the Linnean Society, Botany, Supplement* 4: 112. 1860, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 107. 1897 [1898 publ. 1897] and *J. Wash. Acad. Sci.* 1929, xix. 475. 1929, *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* no. 34: 141–144. 2001

(Toxins, very poisonous, insecticide. Pounded roots as fish poison.)

in English: New Guinea creeper

in Malaysia: tuba merah

in Vietnam: c[os]c k[ef]n

(Seeds expectorant, pectoral, tonic, for fever, bronchitis, dysentery, worms, chickenpox. Plant diuretic, preparations from the plant are taken internally to eradicate worms, and externally to treat indolent ulcers.)

in English: flixweed, herb Sophia, tansy mustard

in China: bo niang hao, ting li zi

in India: charilasji, khubkalan, khubkallana, tseri latchij

Desfontainia Ruiz & Pavón Loganiaceae (Columelliaceae, Desfontainiaceae)

Named for the French botanist René Louiche Desfontaines, 1750–1833, professor at the Jardin des Plantes in Paris, President of the Institut National, traveller, among his most valuable writings are *Tableau de l'École de botanique du Jardin du Roi* ... Seconde édition. Paris 1815, *Flora atlantica*, sive *Historia plantarum, quae in Atlante, agro Tunetano et Algeriensi crescunt*. Paris [1798–1799], *Catalogus plantarum Horti Regii Parisiensis*. Editio tertia. Paris 1829, *Choix de Plantes du Corollaire des Instituts de Tournefort*, publiées d'après son herbier, et gravées sur les dessins originaux d'Aubriet. Paris 1808, *Fragmens d'un voyage dans les Régences de Tunis et d'Alger fait de 1783 à 1786*. Paris 1838 and *Histoire des arbres et arbrisseaux qui peuvent être cultivés en pleine terre sur le sol de la France*. Paris 1809. See *Florae Peruvianaes, et Chilensis Prodromus* 29, t. 5. 1794, *Flora Peruviana* 2: 47, pl. 186. 1799, Adrien de Jussieu, *Funérailles de M. Desfontaines. Discours ... prononcé aux funérailles*. [1833], Candolle, *Notice historique sur la vie et les travaux de M. Desfontaines*. Genève 1834, Endlicher, Istvan Laszlo (1804–1849), *Enchiridion botanicum*, exhibens classes et ordines plantarum accedit nomenclator generum et officinalium vel usualium indicatio. 336. Lipsiae, Sumptibus Guil. Engelmann, 1841, A. Lasègue, *Musée botanique de Benjamin Delessert*. Colomb. Ci. Exact.* 17(65): 318. 1989

(Leaves used as narcotic.)

Desmanthus Willd. Fabaceae (Mimosaceae, Mimoseae)

From the Greek *desmos*, *desme* (*deo* ‘to tie, to bind’ from ancient Indian *ditá*, *dáman*) ‘a bundle, chain, bond, band’ and *anthos* ‘a flower’; see Carl L. von Willdenow (1765–1812), *Species Plantarum*. Ed. 4, 4(2): 1044. 1806 and *Syst. Bot. Monogr.* 38: 1–166. 1993.

Desmanthus fruticosus Rose (*Acuan fruticosum* (Rose) Standl.)

Mexico. Perennial non-climbing tree, small tree or shrub, straight trunk, slender, white flowers

See *Theodora Speciosa* 62. 1786, *Contributions from the United States National Herbarium* 1: 131, pl. 13. 1892 and *Contributions from the United States National Herbarium* 23(2): 366. 1922

(Roots infusion held in mouth to cure sores.)

Desmodium Desv. Fabaceae (Desmodieae)

From the Greek *desmos* ‘a bond, head-band’, referring to the stamens (joined together) or to the pods or to the long racemes of flowers or to the flexible branches; see Nicaise Auguste Desvaux (1784–1856), in *Journal de Botanique, appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts*. 1: 122, t. 5. Paris 1813 and *Reinwardtia* 6: 239–276 1962.

Desmodium adscendens (Sw.) DC. (*Desmodium adscendens* var. *caeruleum* (Lindl.) DC.; *Desmodium caespitosum* (Poir.) DC.; *Desmodium coeruleum* (Lindl.) G. Don; *Desmodium glaucescens* Miq.; *Desmodium griffithianum* Benth.; *Desmodium heterophyllum* sensu auct.; *Desmodium obovatum* Vogel; *Desmodium ovalifolium* Guill. & Perr.; *Desmodium oxalidifolium* G. (Plant decoction antibacterial, vermifuge, drunk for coughs and colds, to reduce blood-sugar levels. Stem bark and leaves antiparasitic, analgesic, antiinflammatory, for vaginal problems.)

in English: ironweed, sweetheart, tick clover, watchman

in Brazil: zarzabacoa peluda

in Madagascar: amberivatrindolo, famafantsambo, tsilavon-drivotra, tsindinditra, vahipasika, vahipasikalaha

in South Africa: chinzungunzungu, hazviere, zanzi

Desmodium concinnum DC. (*Desmodium barbigerum* H. Lev.; *Meibomia concinna* (DC.) Kuntze)

India, Nepal. Perennial non-climbing shrub

See *Annales des Sciences Naturelles (Paris)* 4: 101. 1825, *Revisio Generum Plantarum* 1: 197. 1891 and *Catalogue des Plantes de Yun-Nan* 153. 1916

(Root juice given for indigestion.)

in China: ao ye shan ma huang

in Nepal: gahate jhar, nigmi miyo

Desmodium confertum DC. (*Meibomia conferta* (DC.) Kuntze)

India, Nepal, Himalaya. Perennial non-climbing shrub

See *Annales des Sciences Naturelles (Paris)* 4: 101. 1825, *Revisio Generum Plantarum* 1: 197. 1891

(Root bark juice given in amebic dysentery, gastric troubles, stomachache.)

in India: bhatamase ghans, naitak

in Nepal: ban bhata

Desmodium dichotomum (Willd.) DC. (*Desmodium dichotomum* DC.; *Desmodium diffusum* (Willd.) DC., nom. illeg.; *Desmodium quinquangulatum* (Roxb.) (Heavily armed with black needle-like spines.)

in English: basket tie-tie, basket whist

in Costa Rica: matamba

in Honduras: balaire

in Mexico: balli, matambilla

in South and Central America: atitara, coco de cigano, espinho do diablo, jacitara, kanha, matamba, piemoc, quidija, rabo de iguana, titara, urum, voladora

in Venezuela: albarico, rabo de iguana, yacitara

Desmos Lour. Annonaceae

Greek *desmos* 'a bond, halter, band, bond of connexion'; see *Supplementum Plantarum* 44, 270. 1782, J. de Loureiro, *Flora cochinchinensis*. 329, 352, 745. 1790 and *Bull. Torrey Bot. Club* 39: 505, 507. 1912, *Fl. Madagasc.* 78: 1–103. 1958.

Desmos chinensis Loureiro (*Artabotrys esquirolii* H. Lévl.; *Unona chinensis* DC.; *Unona discolor* Vahl)

SE Asia. Liana, climbing shrub

See *Symbolae Botanicae, ...* 2: 63, t. 36. 1791, *Regni Vegetabilis Systema Naturale* 1: 495. 1817 and *Flore du Kouy-Tchéou* 29. 1919, *Gardens' Bulletin, Straits Settlements* 10:

12. 1939, *The Gardens' Bulletin Singapore* 14(2): 149–516. 1955, *Thai Journal of Phytopharmacy* 12(1): 9–11. 2005

(Whole plant mixed with *Anaxagorea javanica* Blume var. *tripetala* Corner whole plant, bath for rehabilitation of drug addicts. Childbirth, postpartum remedy, boil the root and take the decoction.)

in China: jia ying zhua

in India: zun-in-domdowi

Malaya names: pagar anak, tepang

Desmos dumosus (Roxb.) Saff. (*Desmos dumosus* Safford; *Unona dumosa* Roxb.)

India.

See *Hort. Bengal.* 43. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 670. 1832 and *Bulletin of the Torrey Botanical Club* 39: 506. 1912

(Roots decoction for strangury, genitourinary disorders.)

in India: sa-ma, sama, zum-in-dam-dawi

Desmos longiflorus Safford (*Desmos longiflorus* (Roxb.) Safford; *Unona longiflora* Roxb.; *Unona longiflora* Steud.)

India. Scandent shrub, pendulous red verrucose horn-shaped flowers, ripe carpels eaten fresh

See *Hort. Bengal.* 43. 1814, *Pl. Coromandel* 3: 87. 1820, *Fl. Ind.* 2: 668. 1832, *Nomencl. Bot.* [Steudel], ed. 2. 2: 730. 1841, *FBI* 1: 61. 1872 and *Bulletin of the Torrey Botanical Club* 39: 507. 1912

(Leaves infusion drunk for asthma; poultice of leaves used for sores. Roots for the treatment of chronic ulcers.)

in India: chi-ri-pi, chiripi, theseming

Desmostachya (Stapf) Stapf Poaceae (Gramineae)

Greek *desmos* 'a bond, band' and *stachys* 'a spike, a narrow inflorescence', closely related to *Eragrostis* Wolf, see *The Flora of British India* 7: 324. 1897, *Flora Capensis* 7: 316. 1898 and *Lexicon Generum Phanerogamarum* 532. 1903.

Desmostachya bipinnata (L.) Stapf (*Briza bipinnata* L.; *Coelachyrum longiglume* Napper; *Cynosurus durus* Forssk., nom. illeg., non *Cynosurus durus* L.; *Desmostachya cynosuroides* (Retz.) Haines; *Desmostachya cynosuroides* Stapf ex Massey; *Eragrostis bipinnata* (L.) Muschl., nom. illeg., non *Eragrostis bipinnata* (L.) Schum.; *Eragrostis bipinnata* (L.) Schum.; *Eragrostis cynosuroides* (Retz.) P. Beauv., also spelled *cynosuriodes*; *Leptochloa bipinnata* (L.) Hochst.; *Leptochloa bipinnata* Herb. Berol ex Baill.; *Poa cynosuroides* Retz., also spelled *cynosuriodes*; *Pogonarthria bipinnata* (L.) Chiov.; *Stapfiola bipinnata* (L.) Kuntze; *Stapfiola bipinnata* Kuntze; *Uniola bipinnata* L.; *Uniola bipinnata* (L.) L.)

Cosmopolitan. Perennial, harsh, vigorous, erect, stout, coarse, robust, tufted, tussocky, rhizomatous, stout creeping rootstock, leaves in compact basal rosette, coarse inflorescence, used as a fodder in mixture with grain and wheat, weed species, a good sand binder, useful for erosion control, common in arid regions, saline *usar* soils

See *Flora Palaestina* 12. 1756, *Species Plantarum, Editio Secunda* 1: 204. 1762, *Flora* 38: 422. 1855, *Die Pflanzenwelt Ost-Afrikas* 50: 113. 1895 and *Flora Capensis* 7: 632. 1900, *Lexicon Generum Phanerogamarum* 532. 1903, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 49: 74. 1907, *Annuario del Reale Istituto Botanico di Roma* 8(3): 362. 1908, *Journal of Applied Ecology* 36(3): 374–387. 1999, *Taxon* 49(2): 248. 2000

(Used in Ayurveda, Sidha and Unani. Leaves and stem used for a normal and easy delivery. Roots cooling, sweet, useful in thirst, asthma, jaundice, biliousness, diseases of blood, vaginal discharge, skin eruption, vomiting, sedative to pregnant uterus; root decoction applied to treat toothache and swelling of gum. Culms and rhizomes considered diuretic, used against dysentery and menorrhagia, also a remedy for cough, asthma, vomiting, obstructed urination, hepatitis and leucorrhoea. Stolons made into a paste and given as anthelmintic. Sacred plant, used in religion and magico-religious beliefs, held in high religious esteem by Hindus, used in Sacred thread ceremony and in offering rites, leaves held in food grains during eclipse, rosaries made of twigs and wood, leaves are sacred.)

in the Philippine Isl.: dita

Deutzia Thunberg Hydrangeaceae

After the Dutch Johan van der Deutz, 1743–1788, friend and patron of the Swedish botanist Carl Peter Thunberg (1743–1828); see *Nova Genera Plantarum* 1: 19. 1781, *Flora Japonica*, ... 185, pl. 24. 1784 and *North American Flora* 22(2): 161–162. 1905, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 92. Berlin & Hamburg 1989.

Deutzia corymbosa R. Br. (*Deutzia corymbosa* R. Br. ex G. Don; *Deutzia corymbosa* R. Br. & G. Don; *Deutzia corymbosa* Lindl.)

India.

See *A General History of the Dichlamydeous Plants* 2: 808. 1832, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 216, t. 46, f. 2. 1839, *Edwards's Bot. Reg.* 26: t. 5. 1840

(Leaves paste applied in skin diseases, ringworm.)

in English: Himalaya deutzia

in India: gugtoi

Deutzia staminea R. Br. ex Wall. (*Deutzia brunoniana* Wall. ex G. Don; *Deutzia brunoniana* Wall.; *Deutzia staminea* R. Br.; *Deutzia staminea* var. *brunoniana* (Wall. ex G. Don) Hook. & Thomson; *Deutzia staminea* var. *sikkimensis* C.K. Schneid.; *Deutzia staminea* var. *typica* C.K. Schneid.)

India, Himalaya.

See *Numer. List* [Wallich] n. 365. 1829, *Numer. List* [Wallich] n. 3650. 1831, *Plantae Asiaticae Rariores* 2: 82, t. 191. 1831, *Journal of the Proceedings of the Linnean Society* 2: 84. 1858 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 13: 181. 1904, *J. Cytol. Genet.* 24: 179–183. 1989

(Wood used as insect repellent.)

in China: chang shu sou shu

Dialium L. Fabaceae (Caesalpinaceae, Cassieae, Leguminosae)

Possibly from the Greek *dialyo*, *dialyein* (*dia* ‘through’ and *lyo*, *lyein* ‘to loose, unbind’) ‘to break up, dissolve’, referring to the petals; or from Latin *dialis*, *e* ‘ethereal, aerial’;

ancient Latin and Greek *dialion* and Greek *dielion* for the plant *heliotropium*; see *Mantissa Plantarum* 3, 24. 1767.

Dialium aubrevillei Pellegr.

Tropical Africa. Tree, blood red slash

See *Bulletin de la Société Botanique de France* 80: 463. 1933 [1933 publ. 1934]

(Leaves laxative, analgesic, antispasmodic.)

Dialium dinklagei Harms (*Dialium klainei* Pierre ex Harms; *Dialium klainei* Pierre ex De Wild.; *Dialium staudtii* Harms)

Tropical Africa. Tree, buttressed, red exudate, velvety fruit

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 275. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 472. 1915, *Bulletin du Jardin Botanique de l'État* 7: 263. 1920 [Bull. Jard. Bot. État Bruxelles]

(Fruits and leaves antibacterial, antispasmodic, for cough.)

in Cameroon: kombe, landa, okouan okpan, okpan

in Gabon: eyoum, poulou

in Ivory Coast: afambeou

in Nigeria: apawa okun (Yoruba)

Dialium guineense Willd. (*Arouna guianensis* Aubl.; *Dialium englerianum* Henriques; *Dialium guianense* (Aubl.) Sandwith; *Dialium zenkeri* Harms)

Guinea, Nigeria. Perennial non-climbing tree, small tree, low branching, leaning, red exudate, leaves coriaceous, flowers green yellow, mature fruit brown black and velvety pubescent, sweet pink pulp around a single seed, nectar disc, fruits edible

See *Systema Naturae*, ed. 12 2: 56. 1767, *Histoire des plantes de la Guiane Française* 1: 16–18, pl. 4–5. 1775, *Archiv für die Botanik* 1(1): 30–31, t. 6. 1796, *Boletim da Sociedade Broteriana*, ser. 2 16: 48. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 86. 1901, *Lloydia* 2(3): 184. 1939, *Silvae Geneticae* 31: 117–122. 1982, *Mutation research* 302(2): 109–117. 1993

(Leaves infusion for fever and cough, diarrhea, bronchial complaints. Fruits and leaves molluscicide, antimutagenic.)

in English: Sierra Leone tamarind, velvet tamarind, West African velvet tamarind

in Cameroon: bombala, mfan, onvong

in Central African Republic: luba

in Congo: mondinga

in Gabon: bombala, ikoumbi, onvong, onwong, ovong, popa

in Ghana: adwuba, akali, asanama, asanamba, asena, ase-nama, atitoe, atitoe, avuli, okromfe, osena fufuo, zigbli

in Ivory Coast: banaye, bombala, fe, uarie

(Whole plant used for oliguria, haematuria, eczema, genito-urinary tract infection.)

in English: fringed pink, lilac pink, superb pink carnation

in China: qu mai, ch'u mai

in Japan: kawara-nadeshiko, nadeshiko

Diatenopteryx Radlk. Sapindaceae

Perhaps from the Greek *diatemno*, *diatemnein* 'cut through, dissever' and *pteryx* 'wing', see *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 284–285. 1878.

Diatenopteryx sorbifolia Radlk. (*Thouinia ornifolia* Griseb.)

South America.

See *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 285. 1878, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 82. 1879 and *Bol. Soc. Argent. Bot.* 33(1–2): 77–83. 1997, *Revista Soc. Boliv. Bot.* 2(1): 46–59. 1998

(Stems used as a fish poison.)

Dicentra Bernhardi Papaveraceae (Fumariaceae)

Greek *dis* 'twice' and *kentron* 'a spur', an allusion to the spurred flowers, to the two spurs of the flowers; see *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Familles des Plantes* 2: (23). 1763, *Genera Plantarum* 235. 1789, *Arch. Bot.* [Leipzig] 1(2): 46. 1797, *Linnaea* 8: 457, 468. post Jul. 1833, *Linnaea* 12: 668. 1838 and Stern, K.R. "Revision of *Dicentra* (Fumariaceae)." *Brittonia* 13(1): 1–57. 1961, Berg, R.Y. "Adaptation and evolution in *Dicentra* (Fumariaceae), with special reference to seed, fruit, and dispersal mechanism." *Nytt Mag. Bot.* 16(1): 49–75. 1969, *Madroño* 20(7): 258, 356. 1971 [1970 publ. 1971], Stern, K.R. and M. Ownbey. "Hybridization and cytotoxicity of *Dicentra*." *Amer. J. Bot.* 58(9): 861–866. 1971, *Feddes Repert.* 83(7–8): 566. 1972 [publ. 1973], *Opera Bot.* 88: 20. 1986. About 35 isoquinoline alkaloids have been isolated from *Fumariaceae-Papaveraceae*, and such compounds are present in the tissues of all species; aporphine and protopine have been found in *Dicentra* species, some of these alkaloids have been used medicinally, mostly in the past.

Dicentra canadensis (Goldie) Walpers (*Bicuculla canadensis* (Goldie) Millspaugh; *Bicuculla canadensis* Millsp.; *Capnorhich canadensis* (Goldie) Kuntze; *Corydalis canadensis* Goldie; *Dicentra canadensis* Walp.; *Diclytra canadensis* (Goldie) G. Don; *Dielytra eximia* (Ker) G. Don; *Dielytra eximia* var. *a* Hook.)

North America. Herb, yellow tubers, compound gray-green long-stalked leaves, deeply cleft leaflets, fragrant white heart-shaped flowers

See *Archiv für die Botanik* 1(2): 46. 1797, *Flore Française*. Troisième Édition 4: 637. 1805, *Edinburgh Philosophical Journal* 6: 329–330. 1822, *Linnaea* 1: 556. 1826, *Repertorium Botanices Systematicae* (Walpers) 1: 118. 1842, *Fl. W. Virginia* 327. 1892 and Black, O.F., Eggleston, W.W., Kelly, J.W., Turner, H.C. "Poisonous properties of *Bikukulla cucullaria* (Dutchman's-breeches) and *B. canadensis* (squirrel-corn)." *J.*

Agric. Res., 23: 69–78. 1923, Fahselt, D. “The anthocyanins of *Dicentra* (Fumariaceae).” *Canad. J. Bot.* 48(1): 49–53. 1970, *Castanea* 57: 273–281. 1992

(Low toxicity, leaves, stems and roots are dangerous, plant unpalatable, cattle are primarily affected. The plant contains alkaloids that are known to be toxic. Alkaloids used as a healing agent in chronic skin diseases, as a tonic and diuretic, and in the treatment of syphilis. Used in the treatment of Ménière’s disease and muscular tremors, and as a pre-anaesthetic.)

in North America: dicentre du Canada, squirrel-corn, staggerweed

Dicentra chrysantha (Hooker & Arnott) Walpers (*Bikukulla chrysantha* (Hooker & Arnott) Coville; *Capnorchis chrysantha* (Hooker & Arnott) Planch.; *Diclytra chrysantha* (Hooker & Arnott) Greene; *Dielytra chrysantha* Hooker & Arnott)

North America. The seeds of *Dicentra chrysantha* and *Dicentra ochroleuca* usually do not germinate unless desiccated or seared by fire

See *Linnaea* 1: 556. 1826, *The Botany of Captain Beechey’s Voyage* 320, plate 73. 1838, *Repertorium Botanices Systematicae* 1: 118. 1842 and *Taxon* 35: 405–406. 1986

(Dried mashed roots applied to the chest for heart pains.)

in English: golden eardrops

Dicentra cucullaria (L.) Bernhardt (*Bicuculla cucullaria* (L.) Millspaugh; *Bicuculla cucullaria* Millsp.; *Bicuculla occidentalis* Rydberg; *Dicentra cucullaria* (L.) Bernhardt var. *occidentalis* (Rydberg) M. Peck; *Fumaria cucullaria* L.)

North America. Perennial herb, gray-green feathery basal leaves, deeply-cleft leaflets, elongated raceme cluster, confused with and closely related to *Dicentra canadensis*

See *Sp. Pl.* 2: 699. 1753, *Fl. W. Virginia* 327. 1892 and *Bull. Torrey Bot. Club* 29: 160. 1902, Black, O.F., Eggleston, W.W., Kelly, J.W., Turner, H.C. “Poisonous properties of *Bikukulla cucullaria* (Dutchman’s-breeches) and *B. canadensis* (squirrel-corn).” *J. Agric. Res.*, 23: 69–78. 1923

(Low toxicity, leaves, stems and roots are dangerous, plant unpalatable, cattle are primarily affected. The plant has been shown to cause poisoning when fed to cattle under experimental conditions, the underground tubers caused more severe symptoms. Alkaloids used as a healing agent in chronic skin diseases, as a tonic and diuretic, and in the treatment of syphilis. Infusions from the roots or the leaves for a medicinal liniment. Love charm.)

in North America: dutchman’s-breeches, dicentre à capuchon, staggerweed

Dicentra formosa (Haworth) Walpers (*Bicuculla formosa* (Haw.) Howell; *Bicuculla formosa* Howell; *Bikukulla formosa* (Haw.) Coville; *Capnorchis formosa* (Haworth) Planch.; *Corydalis formosa* (Haworth) Pursh; *Dicentra formosa* var.

breviflora L.F. Hend.; *Dicentra saccata* (Nuttall ex Torrey & Gray) Walp.; *Diclytra formosa* (Haworth) DC.; *Dielytra formosa* (Haworth) Spreng; *Dielytra saccata* Nutt. ex Torr. & A. Gray; *Eucapnos formosus* (Haw.) Bernh.; *Fumaria formosa* Haw.)

North America. Perennial herb

See *Archiv für die Botanik* 1(2): 46. 1797, *Botanist’s Repository*, for new, and rare plants 6: pl. 393. 1800, *Flore Française*. Troisième Édition 4: 637. 1805, *Linnaea* 1: 556. 1826, *Repertorium Botanices Systematicae* [Walpers] 1: 118. 1842, *Mazama* 1(2): 188. 1897, *A Flora of Northwest America* 1: 33. 1897 and Black, O.F., Eggleston, W.W., Kelly, J.W. “Toxicity of *Bikukulla formosa* (western bleedingheart).” *Vet. (Digestive, diuretic, anthelmintic, a decoction from the rhizome used for kidney ailments, scrofula, skin diseases, to expel intestinal worms; roots decoction used to expel worms; raw roots chewed for toothaches.)

in English: bleeding-heart, Pacific bleeding-heart

Dicentra nevadensis Eastwood (*Dicentra formosa* (Haworth) Walpers subsp. *nevadensis* (Eastwood) Munz)

North America.

(Pressed flowers of *Dicentra nevadensis* often turn black, suggesting possible chemical differences, other than in alkaloids, from *Dicentra formosa*.)

See *Proc. Calif. Acad. Sci.* ser. 4, 20: 143. 1931

in English: Tulare County bleeding heart

Dicentra spectabilis (L.) Lemaire (*Capnorchis spectabilis* (L.) Borkh.; *Capnorchis spectabilis* (L.) Borkh.; *Diclytra spectabilis* (L.) DC.; *Diclytra spectabilis* DC.; *Dielytra spectabilis* (L.) DC.; *Eucapnos spectabilis* (L.) Siebold & Zucc.; *Fumaria spectabilis* L.; *Lamprocapnos spectabilis* (L.) Fukuhara)

Europe, North America. See also *Lamprocapnos*

See *Species Plantarum* 2: 699. 1753, *Archiv für die Botanik* 1(2): 46. 1797, *Regni Vegetabilis Systema Naturale* 2: 110. 1821, *A General History of the Dichlamydeous Plants* 1: 140. 1831, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3: 721. 1840, *Flora des Serres* I 3: pl. 258. 1847 and *Plant Systematics and Evolution* 206: 415. 1997

(Low toxicity, leaves, stems and roots are dangerous, plant unpalatable, cattle are primarily affected.)

in English: bleeding hearts, Chinese bleeding heart, Dutchman's breeches, old-fashioned bleeding heart

in China: he bao mu dan

Dicerocaryum Bojer Pedaliaceae

Greek *dikeros*, *dikerotos* 'two-horned' and *karyon* 'walnut, nut', see *Systema Naturae*, Editio Decima 1123, 1375. 1759, *Prodromus Florae Novae Hollandiae* 519. 1810, *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 268, t. 10. 1835 and *Fl. Madagasc.* 179: 5–46. 1971.

Dicerocaryum eriocarpum Abels (*Dicerocaryum eriocarpum* (Decne.) J. Abels; *Dicerocaryum zanguebarium* subsp. *eriocarpum* Ihlenf.)

Tropical Africa, Zambia.

See *Morphol., Geogr., Taxon., Dicerocaryum & Ceratotheca* (Hamburg) 175. 1973, *Mem. Soc. Brot.*, 25: 219. 1975, *South African Journal of Botany* 73: 378–383. 2007

(Veterinary medicine, for dystocia, antibacterial, antiinflammatory, for the treatment of wounds and retained placenta in livestock.)

in South Africa: dinda, dindza

Dicerocaryum senecioides Abels (*Dicerocaryum senecioides* (Klotzsch) J. Abels)

South Africa.

See *Morphol., Geogr., Taxon., Dicerocaryum & Ceratotheca* (Hamburg) 175. 1973, *Mem. Soc. Brot.*, 25: 218. 1975

(Veterinary medicine, for the treatment of wounds and retained placenta in livestock.)

in South Africa: makanangwane, makangwane

Dicerocaryum zanguebarium (Lour.) Merr. (*Dicerocaryum sinuatum* Bojer; *Martynia zanguebaria* Lour.; *Pretrea zanguebaria* (Lour.) J. Gay ex DC.; *Pretrea zanguebarica* J. Gay)

Tropical Africa. Creeping herb

See *Flora Cochinchinensis* 2: 386. 1790, *Annales des Sciences Naturelles; Botanique*, sér. 2, 4: 268, 269, t. 10. 1835, *Prodr.* 9: 246. 1845 and *Transactions of the American Philosophical Society*, n.s., 24(2): 355. 1935, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 14: 159–172. 1985

(Dried powdered whole plant stomachic. Leaves and roots antiviral, antiinflammatory. Root decoction given to treat skin diseases. Veterinary medicine, for the treatment of wounds and retained placenta in livestock.)

in English: boot-protector plant, devil's thorn, wild foxglove

in Southern Africa: beesdubbeltjie, beesduwveltjie, dubbeltjie doring, duiwelsdis, duiweltjies, elandsdoring, museto, seepbossie, skaapdoring; lepate (Sotho); lipate (Pedi); lolodza (Ndebele); mufeso (Shona); museto (Venda)

in Tanzania: mbigili

Dichaea Lindley Orchidaceae

Greek *dicha* 'in two, divided, two-ranked', referring to the distichous leaves, see *Gen. Sp. Orchid. Pl.* 208. 1833, *Entwurf. Anordn. Orchid.*: 107. 1887, *Nat. Pflanzenfam.* [Engler & Prantl] 2(6): 206. 1889 and *Orchideen* (Schlechter) ed. 3, I/B(30): 1856. 1994, *Harvard Pap. Bot.* 12(1): 15–153. 2007.

Dichaea muricata (Sw.) Lindl. (*Cymbidium muricatum* Sw.; *Dichaea bradeorum* Schltr.; *Dichaea latifolia* Lindl.; *Dichaea liebmannii* Rchb. f., nom. nud.; *Dichaea moritzii* Rchb.f.; *Dichaea muricata* Lindl.; *Dichaea muricata* var. *moritzii* (Rchb.f.) Cogn.; *Dichaea ovatipetala* Schltr.; *Dichaea similis* Schltr.; *Dichaea splitgerberi* Rchb. f.; *Dichaea tuerckheimii* Kraenzl., nom. illeg.; *Dichaea verrucosa* Ames & C. Schweinf.; *Epidendrum muricatum* (Sw.) Poir.)

South America.

See *Nova Acta Regiae Soc. Sci. Upsal.* 6: 71. 1799, *Encycl., Suppl.* 1: 368. 1810, *The Genera and Species of Orchidaceous Plants* 208–209. 1833, *Ned. Kruidk. Arch.* 4: 327–328. 1859, *The Gardeners' Chronicle*, new series 11(1): 268. 1879 and *Fl. Bras.* 3(6): 488. 1906, *Orchis*. *Monatsschrift der Deutschen Gesellschaft für Orchideenkunde* 10(8): 188–190, t. 44, 17–24. 1916, *Das Pflanzenreich* IV. 50(Heft 83): 39. 1923, *Repert. Spec. Nov. Regni Veg. Beih.* 19: 154, 266, 307. 1923, *Schedul. Orchid.* 8: 83–84. 1925, *Fieldiana, Bot.* 26(2): 399–727. 1953, *Las Orquídeas de El Salvador* 1: 148–149, f. 1974, *Fieldiana, Bot.*, n.s., 17: 5. 1986

(A wash for treating eye infections, conjunctivitis.)

Dichantherium (Hitchc. & Chase) Gould Poaceae (Gramineae)

Greek *dicha* 'in two' and *anthele* 'a type of inflorescence, a little flower', *antherion*, *anthyllion* is a diminutive of *anthos*

'flower, blossom', often in *Panicum*, type *Dichantherium dichotomum* (L.) Gould, see *Species Plantarum* 1: 55, 58. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 123, 125–126, 129. 1816, *Mantissa* 2: 256. 1824, *De Graminibus Paniceis* 223. 1826, *Department of Agriculture. Botanical Division. Bulletin* 8: 28, 31. 1889 and *Gray's Manual of Botany* (ed. 7) 106, 109, 113–114. 1908, *Contributions from the United States National Herbarium* 15: 13–15, 20, 142–143, 151, 158, 165, 171, 176, 179, 200, 208, 240, 250, 258, 278, 292, 294, 300, 312. 1910, *North American Flora* 3(2): 198–200, 205–207, 209. 1915, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 243. 1931, *Journal of the Faculty of Science: University of Tokyo, Botany* 9: 119. 1965, *Brittonia* 26(1): 59. 1974, B.A. Gould & C.A. (Plant poisonous to horses.)

in English: Heller's rosette grass

in Mexico: panizo de hoja ancha

Dichantherium strigosum (Muhl. ex Elliott) Freckmann var. ***glabrescens*** (Griseb.) Freckmann (*Dichantherium leucoblepharis* (Trin.) Gould & C.A. Clark var. *glabrescens* (Griseb.) Gould & C.A. Clark; *Dichantherium strigosum* subsp. *glabrescens* (Griseb.) Freckmann & Lelong; *Panicum dichotomum* var. *glabrescens* Griseb.; *Panicum polycaulon* Nash; *Panicum strigosum* var. *glabrescens* (Griseb.) Lelong)

North America. Perennial

See *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 126. 1816 and *Flora of the British West Indian Islands* 553. 1864 and *Brittonia* 33(3): 457. 1981, *Sida* 20(1): 171. 2002

(Analgesic, antirheumatic, cough sedative.)

in English: roughhair rosette grass

Dichanthium Willemet Poaceae

From the Greek *dicha* 'in two' and *anthos* 'a flower', referring to the lower sessile spikelets or to the kinds of spikelets, intergeneric hybridisation with *Bothriochloa* Kuntze and *Capillipedium* Stapf, type *Dichanthium nodosum* Willemet (*Dichanthium annulatum* (Forssk.) Stapf), see *Species Plantarum* 2: 1045. 1753, Paul Usteri (1768–1831), in

Annalen der Botanik. [*Annalen der Botanik*] 18: 11. 1796, *Fundamenta Agrostographiae* 203, t. 18. 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 170, t. 8, f. 1. 1831, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887, *Revisio Generum Plantarum* 2: 762. 1891 and *Flora of Tropical Africa* 9: 182–183. 1917, *Boissiera* 9: 159, 163, 170. 1960, *Amer. J. Bot.* 53: 97. 1966, *Bol. Soc. Arg. Bot.* 12: 206–227. 1968, *Taxon* 19: 339–340. 1970, *Kew Bulletin* 32: 579. 1978, *Syst. Bot.* 8(2): 168–184. 1983, *Journal of Cytology and Genetics* 18: 60–61. 1983, *Fascicles of Flora of India* 15: 1–30. 1984, *Bulletin of Botanical Research* 6(1): 97–98, f. 1. 1986, *Journal of Cytology and Genetics* 23: 38–52. 1988, *Austrobaileya* 3(1): 79–99. 1989, *Acta Botanica Indica* 18: 240–246. 1990, *Journal of Cytology and Genetics* 25: 140–143, 147–148, 322–323. 1990, *Annals of the Missouri Botanical Garden* 81(4): 775–783. 1994, *Flora Mesoamericana* 6: 383–386. 1994, *Darwiniana* 38(1–2): 127–186. 2000, *Am. J. Bot.* 88: 1993–2012. 2001, *Contributions from the United States National Herbarium* 46: 135–141, 192–193. 2003.

Dichanthium caricosum (L.) A. Camus (*Andropogon caricosus* L.; *Andropogon caricosus* subsp. *genuinus* Hack.; *Andropogon filiformis* Pers.; *Andropogon filiformis* Roxb., nom. illeg., non *Andropogon filiformis* Pers.; *Andropogon serratum* Retz., nom. illeg., non *Andropogon serratus* Thunb.; *Dichanthium annulatum* (Forssk.) Stapf; *Dichanthium aristatum* (Poir.) C.E. Hubb.; *Dimeria filiformis* (Roxb.) Hochst. ex Miq.; *Heteropogon concinnus* Thwaites; *Lepeocercis serrata* (Retz.) Trin.)

Asia temperate and tropical, southern China, Indonesia, India, Sri Lanka. Annual or perennial, forming small clumps, prostrate, rooting at the lower nodes, densely tufted, rhizomatous, often stoloniferous, vigorous stolons, withstands rather long dry periods, quite tolerant of waterlogging, excellent or not very palatable, used as pasture and hay grass, very resistant to heavy grazing, potential seed contaminant, colonized and spread by both seed and runners, grows poorly in dry weather, similar to *Dichanthium annulatum* (Forssk.) Stapf, found in dry sandy habitats, open sunny places, savanna, swampy places, open humid woodland, along roadsides

See *Species Plantarum, Editio Secunda* 1480. 1763, *Observationes Botanicae* 5: 21. 1789, C.H. Persoon, *Synopsis Plantarum* 1: 103. Paris 1805, *Hortus Bengalensis, or a catalogue ...* 6. 1814, *Fundamenta Agrostographiae* 203, t. 18. 1820, *Acta Societatis Regiae Scientiarum Indo-Neerlandicae* III. 4: 35. 1851, *Enumeratio Plantarum Zeylanicae* 368. 1864, *Monographiae Phanerogamarum* 6: 569. 1889 and *Flora of Tropical Africa* 9: 178. 1917, *Bulletin du Muséum National d'Histoire Naturelle* 27: 549. 1921, *Kew Bulletin* 1939: 654. 1939, *Grasses of Ceylon* 191. 1956, *Grasses of Burma ...* 134. 1960

(Plant paste applied on wounds.)

in English: Antigua hay grass, hay grass, Indian bluestem, nadi blue grass, Nadi bluegrass, Nandi bluegrass, nawai grass

in India: bari kail, bilaria kandi, detara, detta, dubi ghas, kanda bathhada hullu, kartah, khel, kheral, killa machhar, marvel, motha marwel, palmanega gadi, pari hullu, urukun hullu

in Sri Lanka: geta mana

in Thailand: ya nuat chao chu, ya waen, yaa nuat chaochuu, yaa waen

Dichanthium fecundum S.T. Blake

Western Australia, Queensland, Northern Territory. Perennial, slender, branched, erect or geniculate, forming erect tussocks, glaucous leaves, green or purplish racemes solitary or in group, a decreaser species, useful for erosion control, fodder, forage, very nutritious, attractive, produces good hay, in damp open places, grassland, woodland

See *University of Queensland Papers: Department of Biology* 2(3): 51. 1944

(Tonic and stimulant.)

in English: curly blue grass

Dichapetalum Thouars Dichapetalaceae

Greek *dicha* 'in two' and *petalon* or *petalum* 'leaf, petal'; sometimes the petals are bifid or bilobed; see Louis-Marie Aubert Aubert du Petit-Thouars (1758–1831), *Genera nova madagascariensia*. 23. [Paris 1806], *Skrifter af Naturhistorie-Selskabet* 6: 86–89. 1810, *Annales du muséum national d'histoire naturelle* 17: 153, 154–159, f. 1. 1811, *Encyclopédie Méthodique. Botanique ... Supplément* 2: 470. 1812, *Prodr.* 2: 58. 1825 and *Ann. Missouri Bot. Gard.* 54(1): 9–12. 1967, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 799–802. 2001. Some confusion with the genus *Chailletia*.

Dichapetalum braunii Engl. & K. Krause

East Africa, Tanzania. Shrub, often a woody climber, leathery leaves, petals greenish-white, sepals green, large hairless beaked fruits ripening orange

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 451. 1914

(Very poisonous to stock.)

in East Africa: nchenchere

Dichapetalum cymosum (Hook.) Engl. (*Chailletia cymosa* Hook.; *Dychapetalum bullockii* Hauman; *Dychapetalum venenatum* Engl. & Gilg)

South Africa. Dwarf shrub

See *Genera Nova Madagascariensia* 23. 1806 and A.O.D. Mogg, "An autecological note on the poisonous Gifblaar (*Dichapetalum cymosum* (Hook.) Engl.)." *S. Afr. J. Sci.* 27: 368–375. 1930

(Extremely poisonous.)

in English: poison leaf

in Southern Africa: blaargif, blinkblaargif, gif, gifblaar, gifblaarblad, maakgou, magou, vaalgif; makhouw, mogou (Tswana); umkauzaan, mkanzane (Ndebele); makou (Ndonga in Ovamboland); moyao (Sotho)

in S. Rhodesia: ncusane, umkauzaan

Dichapetalum deflexum (Klotzsch) Engl. (*Chailletia deflexa* Klotzsch)

East Africa, Mozambique. Shrub, leaves rather shiny, edible fruits

See *Annales du muséum national d'histoire naturelle* 17: 153. 1811, *Naturwissenschaftliche Reise nach Mossambique ...* 1: 109, t. 20. 1861, *Die Pflanzenwelt Ost-Afrikas* C: 235. 1895

(Non-poisonous foliage.)

Dichapetalum macrocarpum Engl.

East Africa, Tanzania. Small woody shrub, fragrant flowers creamy white, delicate leaves pale green glabrous above, fruit large with bristly orange hairs, young fruits with golden indumentum

See *Tropenpflanzer* 13(3): 134. 1909

(Very poisonous to stock. Fruits covered with hard bristles which detach easily into skin but not irritant.)

in East Africa: chibwaya, njinjila

Dichapetalum mossambicense (Klotzsch) Engl. (*Chailletia mossambicensis* Klotzsch)

East Africa, Mozambique. Woody shrub, lianescent, scandent, scrambling, climbing, twining, brown hairs on young stems, stipules filiform, leaves and shoots densely and softly hairy, alternate leaves, white flowers and orange hairs, black anthers, petals white turning black after the flower fades

See *Naturwissenschaftliche Reise nach Mossambique ...* 1: 108, t. 19. 1861, *Die Pflanzenwelt Ost-Afrikas* C: 235. 1895

(Edible fruits said to have pleasant banana-like taste, non-poisonous foliage.)

in Tanzania: kikwaya

Dichapetalum ruhlandii Engl.

East Africa. Shrub or shrubby tree, climbing, many horizontal branches, large hairless leaves, perianth pale green, fragrant flowers brown in bud white when open, fruit green to dark brown and velvety

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 152. 1904

(Foliage very poisonous to stock. Leaves and stem bark antiviral, analgesic.)

in East Africa: kela, ludi

Dichapetalum stuhlmannii Engl.

East Africa. Small tree, many-branched shrub, hairy when young, bark grey in large flakes with vertical fissures, leaves velvety when young, velvety ovoid fruits brown yellow when ripe

See *Die Pflanzenwelt Ost-Afrikas* C: 235. 1895

(Very poisonous to stock, to man, cattle and goats. Roots used for stomach ailments.)

in English: goat-killer

in East Africa: koma mwhene, mhunihuni, mkomamkene, mkomampeni

in Tanzania: mkeche, mngichi

Dichapetalum toxicarium (G. Don) Baill. (*Chailletia toxicaria* G. Don; *Dichapetalum toxicarium* Baill.)

Tropical Africa. Liana, shrub or treelet, pubescent, climbing, rough, reddish-brown, coriaceous papery leaves, white petals, green calyx

See *Annales du muséum national d'histoire naturelle* 17: 153–159. 1811, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 57. 1825, *Hist. Pl.* (Baillon) 5: 139. 1874, *A General History of the Dichlamydeous Plants* 5: 139. 1874

(Roots, fruit and stem for cough and rheumatism.)

Dichondra Forst. & Forst.f. Convolvulaceae

Greek *dis*, *di* 'twice, two' and *chondros* 'a grain, lump, grain of corn', referring to the two membranous capsules or to the two-seeded capsules (but not invariably); see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 39, t. 20. (Nov.) 1775, *Genera Plantarum* 132. 1789, *Analyse des Familles de Plantes* 20, 24. 1829 and *University of California Publications in Botany* 3(8): 388. 1909, *Candollea* 14: 11–60. 1952, *Annual Taiwan Mus.* 38: 58–61. 1995, *Economic Botany* 52(1): 88–106. 1998.

Dichondra micrantha Urban (*Dichondra repens* J.R. & G. Forster var. *micrantha* (Urban) Lu)

Caribbean, Southern America.

See *Symb. Antill.* (Urban). 9(2): 243. 1924, *Brittonia* 13: 346–360. 1961

(Whole plant used for treating diarrhea.)

in English: Carolina dichondra, Carolina ponyfoot, dichondra, Japanese grass, kidney weed, lawn leaf, Mercury Bay weed, ponyfoot, sheep-grass

in Spanish: alfombra, violeta japonesa

in China: he bo cao, huang dan cao, jin ma ti jin cao, jin qian cao, jin shi, jin wa er, le qjin qian, ma ti jin, rou hun-tun cao, tong qian cao, xiao bian qian, xiao deng zhan, xiao jin qian, xiao ma ti jin, xiao tong qian cao, xiao yuan bao cao, yu hun-tun

in Japan: aoi-goke

Dichorisandra J.C. Mikan Commelinaceae

Greek *dis* ‘twice’, *choris* ‘separate, asunder, apart’ and *aner*, *andros* ‘male, anther’, referring to the two lateral stamens or to the two-valved anthers; see Johann Christian Mikan (1769–1844), *Delectus florum et faunae brasiliensis jussu et auspiciis Francisci I Austriae imperatoris investigatae*. Vindobonae [Wien] 1820[–1825] and *Field Mus. Nat. Hist., Bot. Ser.* 13(1/3): 592–608. 1936, *Fieldiana, Bot.* 24(3): 1–42. 1952, *Darwiniana* 13: 87–103. 1964, *Fl. Mesoamer.* 6: 157–173. 1994, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 386–409. 2003, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Dichorisandra hexandra (Aubl.) Standl. (*Aneilema ecuadoriense* Steyerem.; *Commelina hexandra* Aubl.; *Commelina hexandra* var. *caracasana* Ernst; *Dichorisandra affinis* Mart.; *Dichorisandra aubletiana* Schult. & Schult. f.; *Dichorisandra aubletiana* var. *affinis* (Mart.) C.B. Clarke; *Dichorisandra aubletiana* var. *intermedia* (Mart.) C.B. Clarke; *Dichorisandra aubletiana* var. *ovata* (Mart.) C.B. Clarke; *Dichorisandra aubletiana* var. *persicariifolia* C.B. Clarke; *Dichorisandra hexandra* var. *persicariifolia* (C.B. Clarke) J.F. Macbr.; *Dichorisandra inaequalis* C. Presl; *Dichorisandra intermedia* Mart.; *Dichorisandra mexicana* C. Presl; *Dichorisandra ovalifolia* C. Presl; *Dichorisandra ovata* Mart.; *Dichorisandra scandens* Gardner ex C.B. Clarke; *Dichorisandra schomburgkiana* Klotzsch; *Dichorisandra siebertii* L.H. Bailey; *Stickmannia hexandra* (Aubl.) Kuntze; *Stickmannia inaequalis* (C. Presl) Kuntze; *Stickmannia mexicana* (C. Presl) Kuntze; *Stickmannia ovalifolia* (C. Presl) Kuntze; *Tradescantia aubletii* J.F. Gmel.; *Tradescantia divaricata* Vahl)

Mexico, Trop. America. Herb, stems and leaves succulent

See *Histoire des plantes de la Guiane Française* 1: 35, t. 12. 1775, *Systema Vegetabilium* 7: 1181. 1830, *Revisio Generum Plantarum* 2: 721. 1891 and *Lista Preliminar de las plantas de El Salvador* 48. 1925, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 11: 8. 1931, *Phytologia* 9: 339. 1963

(Stems and leaves applied to treat burns and snakebites.)

in Central America: kabekapé

Dichostemma Pierre Euphorbiaceae

From the Greek *dicha* ‘in two’ and *stemma* ‘a garland, crown’, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 1259–1260. 1896.

Dichostemma glaucescens Pierre (*Dichostemma amplum* Pax)

Tropical Africa. Tree or shrub, milky white latex, leaves and fruits eaten by gorillas

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 1259–1260. 1896 and *Bot. Jahrb. Syst.* 43: 325. 1909

(Seeds and bark antiviral, antiinflammatory, for insect bites.)

in Central African Republic: mangamba, mongamba

in Gabon: fang, ka

Dichroa Lour. Hydrangeaceae

Greek *dis* ‘twice’, *chroa* ‘colour, to colour’, *dichroia* ‘double colour’, *dichroos* ‘two-coloured’, see *Analyse des Familles de Plantes* 36, 38. 1829 and Hwang, S.-M. “A preliminary study on *Dichroa* Lour.” *Acta Phytotaxonomica Sinica* 25(5): 384–389. 1987.

Dichroa febrifuga Lour. (*Adamia chinensis* Gardner & Champ.; *Cyanitis sylvatica* Reinw.; *Cyanitis sylvatica* Reinw.; *Cyanitis sylvatica* Reinwardt ex Blume; *Dichroa cyanea* (Wallich) Schltr.; *Dichroa sylvatica* (Reinw.) Merr.; *Dichroa sylvatica* (Reinwardt ex Blume) Merrill; *Dichroa versicolor* (Fortune) D.R. Hunt)

China, Laos, Vietnam, India. Shrub or shrublet, widely branched, erect, pubescent, cylindrical, purplish, leaves opposite, inflorescence a compact axillary or terminal panicle of blue flowers, calyx and styles persistent, blue berries, numerous small pyriform seeds, on slopes, in forests, forest borders, montane forest, moist localities, along rivers and streams, banks of streams, in open wet place

See *Flora Cochinchinensis* 1: 301. 1790, *Bl. Cat. Buitenz.* 68: 921. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 15. 1826, *Sylloge Plantarum Novarum* 2: 10. 1828[1825] and *Contributions from the Arnold Arboretum of Harvard University* 8: 66. 1934

(Antimalarial. Roots and leaves antipyretic, febrifuge, antiarrhythmic, expectorant, cathartic, emetic and diuretic. Leaves decoction given in chronic bronchitis, asthma, malaria, also used for scabies and skin diseases; leaves eaten as a febrifuge in malaria; leaf juice taken in diarrhea and dysentery. Shoots and bark of the roots decoction used as a febrifuge; roots and tender leaves febrifuge and emetic; stem and root decoction febrifuge. Roots emetic and febrifuge, a decoction used for ague, malaria, paroxysms of chills, fever and sweating at recurring regular intervals, a fit of shivering and productive cough; root extract taken orally against dysentery.)

in English: antifebrile dichroa, Chinese quinine, fever flower

in Cambodia: phuck mon

in China: chang-chan, chang shan

in India: aseru, ban suk, barak, basak, basaka, kaliangeri, khawsik-damdawi

in Indonesia: gigil, ramram, tataruman

in Lepcha: gey boo khanaok

in Nepal: basak, dharmen

in Thailand: hom dong, hom kham, yaai khlang yai

in Vietnam: ap nieu thao, th[uw][owf]ng s[ow]n

Dichrocephala L'Hérit. ex DC. Asteraceae

From the Greek *dichroos* 'two-coloured' and *kephale* 'head', indicating the flower heads; see Jean Baptiste Antoine Guillemin (1796–1842), in *Archives de Botanique*. 2: 517. 1833 and *Taxon* 26: 257–274, 557–565. 1977, *Bot. Bull. Acad. Sin.* 19: 53–66. 1978, *Glimpses in Plant Research* 8: 1–177. 1988.

Dichrocephala auriculata (Thunb.) Druce (*Cotula bicolor* Roth; *Cotula latifolia* Pers.; *Dichrocephala bicolor* (Roth) Schltld.; *Dichrocephala latifolia* (Lam. ex Poir.) DC.; *Ethulia auriculata* Thunb.; *Grangea latifolia* Lam. ex Poir.)

Papua New Guinea.

See *Prodromus Plantarum Capensium*, ... 141. 1794 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 619. 1917

(Heated leaves applied to boils. Seeds rubbed onto pimples on face.)

in Papua New Guinea: dalngan bang, dekemp, taka

Dichrocephala chrysanthemifolia (Blume) DC. (*Cotula chrysanthemifolia* Blume; *Dicrocephala chrysanthemifolia* (Blume) DC.)

Tropical Africa and Asia. Perennial herb, straggling, shortly hairy, outer corollas greenish white, stamens yellow, stigma yellow, style pale green, ovary green-white, at forest edge

See *Species Plantarum* 2: 891–892. 1753, *Tekhno-Bot. Slovar*. 55. 1820, *Bijdragen tot de flora van Nederlandsch Indië* 918. 1826, *Archives de Botanique* 2: 517–518. 1833 and *Taxon* 27: 223–231. 1978, *Opera Botanica* 121: 159–172. 1993

(The whole plant is poisonous.)

in East Africa: kamugwata ng'ondo

Dichrocephala integrifolia (L.f.) Kuntze (*Cotula bicolor* Roth; *Dichrocephala bicolor* (Roth) Schltld.; *Hippia integrifolia* L.f.)

Tropical Africa. Herb, erect, aromatic

See *Supplementum Plantarum* 389. 1781, *Catalecta Botanica* 1: 116. 1800, *Linnaea* 25: 209–211. 1852, *Revisio Generum Plantarum* 1: 333. 1891 and *Journal of Ethnopharmacology* 6: 29–60. 1982, *Journal of Ethnopharmacology* 25: 339–359. 1989, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 113: 521–540. 2007

(For malaria, eye diseases, cataract, dermatosis, skin eruption, headache, sore throat, filariasis, ringworm, psychosis, snakebite, sprain, sinusitis, prolapse of the rectum. Veterinary medicine, for East Coast fever, itch, dermatosis. Magic, ritual, ceremonial, against the spirits.)

in Burundi: agatambambuga, umutambambuga

in Cameroon: tchetchera

in Congo: chitundambuga, citundambuga, ekihumbuhumbu, itundambuka, kabotakabota, kihumbuhumbu, kinzidi, kishindabuga, kitindabuga, kitindambwa, kituto, ngakele, tundoola, umubuza

in Kenya: nasogoyo

in Rwanda: umubuza

in Tanzania: kilukumbi, shinda kaya

in Uganda: buzza, kampuluguma

in India: liang poh tiew, pachishing, vawkekatumtual

Dichrocephala integrifolia (L.f.) Kuntze subsp. *integrifolia* (*Centipeda capensis* Less.; *Cotula bicolor* Roth; *Cotula sonchifolia* M. Bieb.; *Dichrocephala auriculata* (Thunb.) Druce; *Dichrocephala bicolor* (Roth) Schltld.; *Dichrocephala capensis* (Less.) DC.; *Dichrocephala integrifolia* (L.f.) Kuntze var. *sonchifolia* (M. Bieb.) Kuntze; *Dichrocephala latifolia* (Lam.) DC.; *Dichrocephala latifolia* (Lam. ex Poir.) DC.; *Dichrocephala latifolia* var. *sonchifolia* (M. Bieb.) Asch.; *Dicrocephala bicolor* (Roth) Schltld.; *Dicrocephala integrifolia* (L.f.) Kuntze; *Ethulia auriculata* Thunb.; *Grangea latifolia* Lam.; *Grangea latifolia* Lam. ex Poir.; *Hippia bicolor* (Roth) Smith; *Hippia integrifolia* L.f.)

East Africa, Tanzania, Madagascar. Herb, erect, aromatic, succulent, heads bristly, flowers greenish yellow, outer florets greyish-white to purple, inner florets yellow, stamens yellow, weed of cultivation

See *Species Plantarum* 2: 891–892. 1753, *Mantissa Plantarum* 2: 158, 291. 1771, *Supplementum Plantarum* 389. 1781, *Prodromus Plantarum Capensium*, ... 141. 1794, *Catalecta Botanica* 1: 116. 1800, *Encyclopédie Méthodique. Botanique* ... Supplément 2(2): 826. 1812, *Tekhno-Bot. Slovar*. 55. 1820, *Archives de Botanique* 2: 517. 1833, *Contributions to the Botany of India* 2. 1834, *Linnaea* 25: 209–211. 1852, *Revisio Generum Plantarum* 1: 333. 1891 and (*Report*) *Botanical Society and Exchange Club of the British Isles* 4: 619. 1917

(Tender shoot paste applied as a poultice over insect stings, the paste also taken orally in menorrhagia. Heated leaves applied to boils. Seeds rubbed onto pimples on face.)

in Tanzania: kalukumbi

in Papua New Guinea: dalngan bang, dekemp, taka

in India: liang poh tiew, lolukok, pachishing, vaw-ek-a-tum-tual

Dichrostachys (DC.) Wight & Arn. Fabaceae (Mimosaceae, Mimoseae)

Greek *dichroos* 'two-coloured' and *stachys* 'a spike', referring to the two coloured inflorescence, there are bisexual and asexual flowers, the basal flowers in spike sterile with ten staminodes, the terminal ones are bisexual, closely related to *Alantsilodendron* and *Gagnebina*; see *Mem. Leg.* 12:

428. 1825, Robert Wight (1796–1872) and G. Arnott Walker Arnott (1799–1868), *Prodromus florae Peninsulae Indiae Orientalis*. 271. London 1834.

Dichrostachys cinerea (L.) Wight & Arn. (*Alantsilodendron pilosum* Villiers; *Cailliea cinerea* (L.) J.F. Macbr.; *Cailliea cinerea* (L.) Roberty; *Cailliea glomerata* (Forssk.) J.F. Macbr.; *Desmanthus nutans* (Pers.) DC.; *Dichrostachys cinerea* (L.) Miq.; *Dichrostachys cinerea* R. Vig.; *Dichrostachys glomerata* (Forssk.) Chiov.; *Dichrostachys nutans* (Pers.) Benth.; *Dichrostachys platycarpa* Welw.; *Mimosa asperata* var. *cinerea* (Vell.) Hassl.; *Mimosa cinerea* Linn.; *Mimosa cinerea* Vell., nom. illeg., non *Mimosa cinerea* L.; *Mimosa glomerata* Forssk.; *Mimosa nutans* Pers.; *Mimosa vellosiana* Herter, nom. illeg., non *Mimosa vellosiana* Mart.; *Mimosa vellosiella* Herter

East Africa, Tropical Africa. Perennial non-climbing tree, spiny shrub or small tree, widely spreading branches and open crown, timber very hard, leaves feathery, two-coloured pendulous flowers, spike light purple below yellow above, pistillate flowers pink, staminate flowers yellow, flat pods twisted or spiral, useful for soil conservation, a weed, savanna, wooded grassland, rocky hillsides, bushed grassland, coastal plains, in overgrazed and disturbed areas, sandy soil

See *Species Plantarum* 1: 516–523. 1753, *Systema Naturae*, Editio Decima 2: 1312. 1758 [1759], *Syn. Pl.* 2(1): 266. 1806, *Flora Aegyptiaco-Arabica* 177. 1775, *Species Plantarum*. Editio quarta 4(2): 1044. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 446. 1825, *Florae Senegambiae Tentamen* 239. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 271. 1834, *Florae Fluminensis* 11: pl. 35. 1835, *Journal of Botany, being a second series of the Botanical Miscellany* 4(31): 353. 1841, *Flora van Nederlandsch Indië* 1(1): 48. 1855 and *Annali di Botanica* 13: 409. 1915, *Contributions from the Gray Herbarium of Harvard University* 59: 16. 1919, *Revista Sudamericana de Botánica* 3: 157. 1936, *Revista Sudamericana de Botánica* 6: 151. 1940, *Notulae Systematicae. Dichrostachys cinerea (L.) Wight & Arn. subsp. ***cinerea*** (*Acacia cinerea* (L.) Spreng.; *Cailliea cinerea* (L.) Roberty; *Cailliea cinerea* (L.) J.F. Macbr.; *Desmanthus cinereus* (L.) Willd.; *Dichrostachys glomerata* (Forssk.) Chiov.; *Mimosa cinerea* L.; *Mimosa glomerata* Forssk.)

East Africa. Perennial non-climbing tree, shrub with spines, on forest margin, flowers pink and yellow, fruit dry red brown

See *Kew Bulletin* 12(3): 358. 1957[1958]

(Used in Ayurveda. Leaves pounded and boiled, drunk for fever.)

in Tanzania: lipangala

in India: kaira, vedittalung kolindoo, viravriksha

Dichrostachys cinerea (L.) Wight & Arn. subsp. ***nyassana*** (Taub.) Brenan (*Dichrostachys cinerea* subsp. *nyassana* (Taub.) Brenan & Brummitt; *Dichrostachys glomerata* (Forssk.) Chiov. subsp. *nyassana* (Taub.) Brenan; *Dichrostachys major* Sim; *Dichrostachys nyassana* Taub.)

Tanzania. Perennial non-climbing tree or shrub, small tree, spiny, spreading, sprouting, bark rough, twigs grey flaking brown, upper part of inflorescence pink lower part yellow, perianth yellow, sterile stamens white tipped in pink-purple, young pods green becoming brown

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 271. 1834, *Flora van Nederlandsch Indië* 1(1): 48. 1855, *Die Pflanzenwelt Ost-Afrikas* C 195. 1895 and *Annali di Botanica* 13: 409. 1915, *Kew Bulletin* 11(2): 188. 1956, *Kew Bulletin* 12(3): 358. 1957[1958], *Boletim da Sociedade Broteriana* II, 39: 96. 1965

(Leaves chewed then stuck on where a person has been bitten by a snake.)

in English: Kalahari Christmas tree, large-leaved sickle bush

in Southern Africa: grootblaarsekelbos; footja, Fotja (Shona); muunga (Venda)

in Tanzania: kafona-mpasa, kasunzulu, mpangala, mupangala, pangal

Dichrostachys cinerea (L.) Wight & Arn. subsp. ***platycarpa*** Brenan & Brummitt (*Dichrostachys cinerea* (L.) Wight & Arn. subsp. *platycarpa* (Welw. ex W. Bull) Brenan & Brummitt; *Dichrostachys platycarpa* Welw. ex W. Bull; *Dichrostachys platycarpa* W. Bull; *Pithecellobium baroni* R. Vig.; *Pithecellobium baronii* R. Vig.)

Madagascar. Perennial non-climbing tree

See *Flora* 20(2): Beibl. 114. 1837, *Catalogue de l'Établissement Horticole de Louis van Houtte à Gand* 14: 4. 1866 and *Notulae Systematicae*. Herbarium du Muséum de Paris 13(4): 335. 1948, *Boletim da Sociedade Broteriana*, ser. 2 39: 61–115. 1965, *The Leguminosae of Madagascar* 2002 [by Du Puy, D. J., J.-N. Labat, R. Rabevohitra, J.-F. Villiers, J. Bosser & J. Moat]

(Veterinary medicine, lactagogue.)

Dickinsia Franch. Apiaceae

Dickinsia hydrocotyloides Franchet (*Cotylonia bracteata* C. Norman)

China.

See *Nouv. Arch. Mus. Hist. Nat.*, sér. 2. 8: 244, pl. 8, f. A. 1886 and *Journ. Bot.* 1922, 60(6): 166–167. 1922

(Irritant.)

in China: ma ti qin

Dicliptera A.L. Juss. Acanthaceae

From the Greek *diklis* ‘double-folding’ and *pteron* ‘wing’, referring to the 2-winged capsule, see *Annals of Botany* [König & Sims]. 2(1): 189. 1805, *Annales du muséum national d'histoire naturelle* 9: 267. 1807, *Steud. Nom. ed. II. i.* 501, 504. 1840, *Eclogae Plantarum Rariorum ... 2:* 1. 1844, *Flora Brasiliensis* 9: 162. 1847, *Revisio Generum Plantarum* 2: 485. 1891.

Dicliptera bupleuroides Nees (*Dicliptera roxburghiana* var. *bupleuroides* (Nees) C.B. Clarke; *Justicia canescens* Wall., nom. nud.)

India.

See *A Numerical List of Dried Specimens* 72: n. 2423. 1830, *Plantae Asiaticae Rariores* 3: 111. 1832, *The Flora of British India* 4: 554. 1885

(Leaf paste applied on wounds and to check bleeding. Young leaves juice given in dysentery, cough, gastroenteritis.)

in India: anrakhak, kulartore

Dicliptera chinensis (Linnaeus) Jussieu (*Diapedium chinense* (L.) K.D. Koenig; *Dicliptera burmanni* Nees; *Dicliptera roxburghiana* Nees; *Justicia chinensis* Linn.)

China.

See *Species Plantarum* 1: 15–16. 1753, *Genera Plantarum* 102–103. 1789, *Annales du muséum national d'histoire naturelle* 9: 267. 1807 and *J. Jap. Bot.* 55: 324. 1980

(Roots decoction tonic, used for heat-clearing and detoxicating drugs.)

in China: gou gan cai

in Japan: yanbaru-haguro-sô

Dicliptera cuneata Nees (*Diapedium cuneatum* (Nees) Kuntze)

India. Erect many-branched undershrub, leaves broadly ovate, pinkish white very fragrant flowers

See *Pl. Asiat. Rar.* (Wallich). 3: 111. 1832 [15 Aug 1832], *Revisio Generum Plantarum* 2: 485. 1891

(Leaves ground in water and taken to remove or kill the worms in stomach and intestine.)

Dicliptera laxata C.B. Clarke

Tropical Africa, Tanzania. A straggling perennial herb or undershrub, stalked opposite leaves, tubular flowers white or pink in stalked clusters at a few nodes surrounded by green floral bracts, fruit an ovoid capsule, round black seeds, tender leaves used as vegetable, plant for fodder, riparian forest, in swamp forest, on steep slopes, often in deep shade

See *Fl. Trop. Afr.* [Oliver et al.] 5(2): 258. 1900

(Roots used to treat stomachache and coughs.)

in Tanzania: nyamtitu

Dicliptera papuana Warb.

New Guinea.

See *Bot. Jahrb. Syst.* xviii. (1894) 207. 1894

(Steam from heated wet leaves inhaled for fever.)

in Papua New Guinea: teruna

Dicliptera roxburghiana Nees

China, India.

See *Species Plantarum* 1: 15–16. 1753, *Genera Plantarum* 102–103. 1789, *Annales du muséum national d'histoire naturelle* 9: 267. 1807 and *J. Jap. Bot.* 55: 324. 1980

(Plant used as a tonic.)

in India: kirch

Dicliptera verticillata (Forssk.) C. Chr. (*Dianthera verticillata* Forssk.; *Dicliptera maculata* Nees; *Dicliptera maculata* var. *senegambica* Nees; *Dicliptera micranthes* Nees; *Dicliptera ocymoides* Juss.; *Dicliptera ocymoides* (Lam.) Juss.; *Dicliptera senegambica* (Nees) Benoist; *Dicliptera umbellata* Juss.; *Dicliptera umbellata* (Vahl) Juss.; *Dicliptera usambarica* Lindau; *Dicliptera verticillata* C. Chr.; *Justicia cuspidata* Vahl; *Justicia ocymoides* Lam.; *Justicia umbellata* Vahl; *Justicia umbellata* Wall.; *Justicia umbellata* Hort. Madr. ex Nees; *Justicia umbellata* Wight ex Nees)

East Africa. Herb, weak, stems several-angled, woody based, decumbent, red flowers in whorls arranged into terminal spikes

See *Flora Aegyptiaco-Arabica* 9. 1775, *Encyclopédie Méthodique, Botanique* 1: 630. 1783, *Enum. Pl.* [Vahl] i. 111. 1804, *Annales du muséum national d'histoire naturelle* 9: 268. 1807, *Numer. List* [Wallich] n. 2467. 1830, *Prodr.* (DC.) 11: 488, 500. 1847 and *Dansk Botanisk Arkiv* 4(3): 11. 1922

(Sap from the leaves after heating over a fire taken to relieve whooping-cough and naso-pharyngeal affections; fresh leaves sap applied to insect stings. Dried powdered leaves mixed with castor oil and applied to scabies and skin problems.)

in Congo: indoh, lindoko

Dicoma Cass. Asteraceae

From the Greek *dis* 'twice' and *kome* 'hair of the head, tuft of hairs', in reference to the nature of the pappus, see *Bull. Sci. Soc. Philom. Paris* 1817: 12. 1817, *J. Linn. Soc., Bot.* 25: 330. 1890 and *Kew Bull.* 21(2): 177–223. 1967, *Taxon* 26: 107–109. 1977, *Kew Bull.* 46(4): 699–709. 1991.

Dicoma anomala Sond. (*Dicoma anomala* forma *karaguensis* (Oliv.) Oliv. & Hiern; *Dicoma anomala* subsp. *cirsioides* (Harv.) Wild; *Dicoma anomala* subsp. *gerrardii* (Harv. ex F.C. Wilson) S. Ortiz & Rodr. Oubiña; *Dicoma anomala* var. *cirsioides* Harv.; *Dicoma anomala* var. *karaguensis* (Oliv.) O. Hoffm.; *Dicoma anomala* var. *latifolia* O. Hoffm.; *Dicoma anomala* var. *leptothrix* S. Moore; *Dicoma anomala*

var. *megacephala* (Bak.) Mendonça; *Dicoma anomala* var. *microphylla* O. Hoffm.; *Dicoma anomala* var. *sonderi* Harv.; *Dicoma gerrardii* Harv. ex Wilson; *Dicoma gerrardii* Harv. *Dicoma karaguensis* Oliv.; *Dicoma megacephala* Bak.; *Dicoma nyikensis* Bak.; *Dicoma ringoetii* De Wild.)

South Africa, sub-Saharan Africa. Small perennial herb, highly variable, prostrate, decumbent or erect, strong woody rootstock, green-greyish sharp-pointed leaves, flowers mauve, stiff narrow sharply-pointed bracts

See *Linnaea* 23: 71. 1850, *Flora Capensis* (Harvey) 3: 517. 1865, *Transactions of the Linnean Society of London* 29(2): 103, t. 70. 1873, *Flora of Tropical Africa* 3: 445. 1877, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 545. 1893, *Bulletin of Miscellaneous Information Kew* 1897: 271. 1897 and *Kunene-Sambesi-Expedition* 426. 1903, *Feddes Repertorium* 13: 210. 1914 [*Repert. Spec. Nov. Regni Veg.*], *Bulletin of Miscellaneous Information Kew* 1923: 384. 1923, *Journal of Botany, British and Foreign* 65, Suppl. 2, Gamopet.: 65. 1927, *Contr. Conhecimento Fl. Angol.* 1: *Compositae.*: 143. 1943, *Kirkia* 8(2): 191. 1972, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Nordic J. Bot.* 16(6): 584. 1996 (publ. 1997), *Journal of Ethnopharmacology* 67: 347–354. 1999, *Journal of Ethnopharmacology* 79: 109–112. 2002

(Aerial parts used for coughs and respiratory complaints. Bitter tasting roots for blood disorders, fevers, colic, cramps, diarrhea, dysentery, piles, toothache, dermatosis, skin eruption, kidney problems, to expel intestinal worms; sometimes chewed as an antidote against food poisoning. Leaves for dermatosis, skin eruption, sore throat, toothache. Veterinary medicine, powdered plants used for gall sickness, wounds and sores in stock animals; roots for wounds on horses. Magic, ritual, against the bad spirits.)

in English: fever bush, stomach bush

in Botswana: thlonya, tihonya

in Burundi: umwanzuranya

in Congo: umwanzuranya

in Rwanda: umwanzuranya

in Southern Africa: aambeibos, gryshout, kalwerbossie, koorsbossie, maagbitterwortel, maagbossie, maagwortel, ndwedweni, regop aambeibos, swartstorm, vyfaartjies, wormbos, wurmbossie; chifumuro (Shona); inyongana, inyongwane (Swazi, Xhosa); thlonya (Tswana); hloenya, kloenya, mohasetse (South Sotho); hloenya, thoenya (Sotho); isihlabamakhondlwane, umuna (Zulu)

in Tanzania: weya

Dicoma tomentosa Cass.

India, Namibia. Small plant, annual herb, branched from a woody base, pinkish florets, achenes long-villous, weed

See *Bull. Sci. Soc. Philom. Paris* 1818: 47. 1818, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 12(Beibl. 27): 28. 1890

(Leaves chewed for treatment of cough, fevers after childbirth.)

in Nigeria: suradu

in Tanzania: chemisokola

in India: choloharna-charo, navananji, navananjichapala, ubio til kant, ubio-til-kanti, vajardanti, vajradanti

Dicorynia Benth. Fabaceae (Caesalpinaceae, Cassieae)

From the Greek *dis*, *di* 'twice, two' and *koryne* 'a club', see *Flore de la Guyane française* 2: 36–162. 1952, *Brittonia* 19(1): 42–61. 1967, *Ann. Missouri Bot. Gard.* 76(2): 381–385. 1989.

Dicorynia guianensis Amshoff (*Dicorynia paraensis* Benth.; *Dicorynia spruceana* Benth., nom. nud.)

South America, French Guiana. Perennial non-climbing tree, low spreading buttresses, heartwood reddish, white sapwood, petals and filaments white, flattened fruit light green with marginal wing

See *Journal of Botany*, being a second series of the Botanical Miscellany 2: 82–83. 1840, *Flora Brasiliensis* 15(2): 81. 1870 and *Mededeelingen van het Botanisch Museum en Herbarium van de Rijks Universiteit te Utrecht* 52: 28–31, f. 2a-b, d-e. 1939, *Pharmaceutical Biology* 37(3): 208–215. 1999

(Antimicrobial.)

in Surinam: basralocus, basraloksi, basralokus, barakaroeballi, barakaruballi

Dicraeopetalum Harms Fabaceae (Sophoreae)

From the Greek *dikraios* 'forked, cleft' and *petalon* 'petal', see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 161. 1902, *Notes Roy. Bot. Gard. Edinburgh* 29(3): 347–355. 1969, *Acta Bot. Neerl.* 19: 227–248. 1970, *Opera Botanica* 68: 1–223. 1983, *Biochemical Systematics and Ecology* 21(6–7): 711–714. 1993.

Dicraeopetalum capuronianum (M. Peltier) Yakovlev (*Lovanafia capuroniana* M. Peltier)

Madagascar. Perennial non-climbing tree, yellow panicles of flowers

See *Adansonia*: recueil périodique d'observations botanique, n.s. 12(1): 142–145, 148, pl. 1, f. 1–6, 7–11. 1972, *Novosti Sistematiki Vysshchikh Rastenii* 14: 139. 1977, *Novosti Sistematiki Vysshchikh Rastenii* 17: 160. 1980

(Alkaloids. Bark to treat eyes problems.)

in Madagascar: arandranto, harandrato, lovainafy, lovanafy, lovanjafy

Dicraeopetalum mahafaliense (M. Pelt.) Yakovlev (*Lovanafia mahafaliensis* M. Pelt.)

Madagascar. Perennial non-climbing shrub, small tree, white cream flowers

See *Adansonia*, n.s. 12(1): 142–145, pl. 1, f. 1–6. 1972, *Novosti Sistematiki Vysshchikh Rastenii* 14: 139. 1977

(Alkaloids.)

in Madagascar: hazadrano, katsakatsy, lovanafia, lovanjafia

Dicraeopetalum stipulare Harms (*Acosmium stipulare* (Harms) Yakovlev)

Tropical Africa, Ethiopia, Kenya, Somalia. Perennial non-climbing tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 161. 1902, *Notes from the Royal Botanic Garden, Edinburgh* 29(3): 354. 1969

(Alkaloids.)

Dicranopteris Bernhadi Gleicheniaceae

Greek *dikranos* 'twice-forked, two-branched' and *pteris* 'fern', referring to the foliage; see *Mém. Acad. Roy. Sci. (Turin)* 5. 419. 1793, *Catalecta Botanica* 1: 34. 1797, Rebentisch, Johann Friedrich (1772–1810), *Prodromus florum neomarchicae secundum systema proprium conscriptus atque figuris XX coloratis adornatus. Cum praefatione C.L. Willdenow, in qua de vegetabilium cryptogamicorum dispositione tractatur. Berolini, 1804, Kongl. Vetensk. Acad. Nya Handl.* 25: 165. 1804, Johann Jakob Bernhadi, in *Neues Journal für die Botanik*. [Edited by H.A. Schrader] 1(2): 38–39. 1805 [dt. 1806, issued in Nov 1805], *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften*, ser. 5 6: 386–387. 1851, *Acta Societatis Regiae Scientiarum Indo-Neerlandicae* 1(7): 2. 1856 and *Die Natürlichen Pflanzenfamilien* 1(4): 353, 355. 1900, *Bulletin of the Torrey Botanical Club* 34: 251. 1907, *Sunyatsenia* 5(4): 276. 1940, *Bulletin of the National Science Museum* 29: 5–6. 1950, *Reinwardtia* 4: 261. 1957, *Webbia* 26: 518. 1972, *Fern Gaz.* 11(2–3): 141–162. 1975, *Fl. Mart.; *Mertensia rigida* Kuntze; *Mertensia scalpturata* Fée; *Polypodium lineare* Burm. f.)

South America.

See *Flora Indica* ... nec non Prodrumus Florae Capensis 235, pl. 67, f. 2. 1768, *Linnaea* 9: 16. 1834[1835], *Annales Museum Botanicum Lugduno-Batavi* 1: 50. 1863, *Transactions of the Linnean Society of London, Botany* 1(7): 428. 1880, *Bulletin de la Société Botanique de Belgique* 35(1): 174. 1896 and *Bulletin de l'Herbier Boissier*, sér. 2, 1(11): 1092. 1901, *Bulletin of the Torrey Botanical Club* 34(5): 250, 254. 1907, *Bulletin of the National Science Museum* 29: 69. 1950

(Whole plant extract given to children suffering from convulsions. Warm leaf paste used on painful testicles. Fronds boiled and the liquid drunk or used to bathe children with skin diseases, fever, asthma and insomnia. Rhizome anthelmintic.)

in English: Savannah fern

Dicranopteris linearis (Burm.f.) Underw. (*Dicranopteris dichotoma* (L.) Farw.; *Dicranopteris dichotoma* Farw.; *Dicranopteris dichotoma* (Thunb.) Bernh.; *Gleichenia dichotoma* (Thunb.) Hook.; *Gleichenia ferruginea* Blume; *Gleichenia hermannii* Hook. & Grev.; *Gleichenia hermannii* R. Br.; *Gleichenia lanigera* D. Don; *Gleichenia linearis* (Burm.f.) Clarke; *Gleichenia rigida* J. Sm.; *Mertensia lessonii* A. Rich.; *Mertensia linearis* (Burm. f.) Fritsch; *Mertensia rufinervis* Mart.; *Polypodium lineare* Burm. f.; *Polypodium pedatum* Houtt.)

India. Woody terrestrial fern

See *Species Plantarum* 2: 1082–1094. 1753, *Flora Indica* ... nec non Prodrumus Florae Capensis 235, pl. 67, f. 2. 1768, *Natuurlijke Historie* 14: 174. 1783, *Mémoires de l'Académie Royale des Sciences* 5: 419, t. 9. 1793, *Catalecta Botanica* 1: 34. 1797, *Kongl. Vetenskaps Akademiens Nya Handlingar* 25: 165. 1804, *Prodrumus Florae Neomarchicae* 161. 1810, *Icon. Filic.* t. 14. 1827, *Enum. Pl. Javae* 2: 249. 1828, *Journal of Botany*, being a second series of the Botanical Miscellany 420. 1841, *Transactions of the Linnean Society of London, Botany* 1(7): 428. 1880 and *Bulletin de l'Herbier Boissier*, sér. 2, 1(11): 1092. 1901, *Bulletin of the Torrey Botanical Club* 34(5): 250. 1907, *Amer. Midl. Naturalist* 12: 304. 1931, *Enumeratio Pteridophytarum Japonicarum, Filicales* 114. 1975

(Plants improve fertility in sterile women; warm leaf paste used on painful testicles. Febrifuge, pound the leaves with the leaves of *Croton caudatus* and poultice. Fronds boiled and liquid drunk or used to bathe children with skin diseases, asthma and insomnia, also used to bathe broken leg; sap from the fresh stalk of young fiddleheads squeezed into the eye to soothe pain after injury; fronds with leaves of *Shorea* to treat itching caused by Urticaceae. Rhizome anthelmintic.)

in English: true branching fern

in Indonesia: namam lan

in Japan: ko-shida (= small fern)

Malay name: resam

in Okinawa: warabi-nufuni (warabi = bracken)

in the Philippines: kilob

Dicranopteris linearis (Burm.f.) Underw. var. ***altissima*** Holttum

India, Malay Peninsula.

See *Bulletin of the Torrey Botanical Club* 34(5): 250. 1907, *Reinwardtia* 4(2): 261, 278. 1957

(Magic, ritual, ceremonial, used in worship.)

in India: olo pomic

Dicranopteris linearis (Burm.f.) Underw. var. ***montana*** Holttum (*Dicranopteris montana* (Holttum) S.R. Ghosh)

India.

See *Reinwardtia* 4(2): 276. 1957, *Pterid. Fl. E. India* 210. 2004

(Magic, ritual, ceremonial, used in worship.)

in India: olo loko loro, tarong

Dicranostigma Hook.f. & Thomson Papaveraceae

From the Greek *dikranos* 'two-branched' and *stigma* 'a stigma', see *Flora Indica*: being a systematic account of the plants . . [Hooker f. & Thomson] 1: 255. 1855.

Dicranostigma lactuoides Hook. f. & Thomson (*Chelidonium dicranostigma* Prain; *Chelidonium lactuoides* (Hook.f. & Thomson) Prain; *Chelidonium lactuoides* (Benth. & Hook. f.) Prain; *Glaucium lactuoides* (Hook. f. & Thomson) Benth. & Hook. f.; *Stylophorum lactuoides* Baill.; *Stylophorum lactuoides* (Benth. & Hook. f.) Baill.)

Nepal.

See *Species Plantarum* 1: 505–506. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition 547. 1754, *The Genera of North American Plants* 2: 7. 1818, *Fl. Ind.* [Hooker f. & Thomson] i. 255. 1855, *Genera Plantarum* 1: 53. 1862, *Histoire des Plantes* (Baillon) 3: 114. 1866–1895, *Bulletin de l'Herbier Boissier* 3: 585. 1895, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 64: 327. 1896 and *Annals of the Royal Botanic Garden, Calcutta.* 9(2): 7, pl. 9. 1901

(Root powder decoction given to women who have difficulty in expulsion of the placenta after childbirth.)

in China: ju ye tu chuang hua

in Nepal: male ponga

Dictamnus L. Rutaceae

Diktamnon or *diktamon*, the Greek name for a Cretan origanum, dittany of Crete, *Origanum dictamnus*, or bastard

dittany, *Ballota acetabulosa*; Latin *dictamnus* or *dictamnium* for the plant dittany, growing in great abundance on Mount Dicte (Dikte) (in the eastern part of Crete) and Mount Ida; see *Species Plantarum* 1: 383. 1753.

***Dictamnus albus* L.**

North America, China.

See *Species Plantarum* 1: 383. 1753 and *Plant Systematics and Evolution* 146: 13–30. 1984, Henderson, J.A., DesGroseilliers, J.-P. “Gas plant (*Dictamnus albus*) phytophotodermatitis simulating poison ivy.” *Can. Med. Assoc. J.*, 130: 889–891. 1984, *Bulletin of the Cranbrook Institute of Science* 1985 [*Michigan Flora. Part II Dicots (Saururaceae-Cornaceae)*], *Caryologia* 38: 335–346. 1985, *Regnum Veg.* 127: 42. 1993

(This plant has caused phytophotodermatitis in humans; the plant juices absorbed by the skin and, in the presence of long-wave ultraviolet light, cell damage occurs. Furocoumarins, derived from psoralen, found in several of the plants that cause phytophotodermatitis. Root decoction given for skin diseases.)

in English: burning bush, dittany, gas plant

in China: pai hsien

Dictyospermum Wight Commelinaceae

From the Greek *diktyon* ‘net’ and *sperma* ‘seed’, see *Species Plantarum* 1: 40–42. 1753, *Prodromus Florae Novae Hollandiae* 270. 1810, *Icones Plantarum Indiae Orientalis* 6: 29–30. 1853, *Flora* 49: 212. 1866 and *Revis. Handb. Fl. Ceylon* 14: 176. 2000.

Dictyospermum conspicuum (Blume) Hassk. (*Aneilema conspicuum* (Blume) Kunth; *Commelina conspicua* Blume; *Commelina conspicua* Zoll., nom. illeg.; *Dictyospermum conspicuum* (Blume) J.K. Morton)

Malay Peninsula.

See *Enumeratio Plantarum Javae* 1: 4. 1827, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 69. 1843, *Systematisches Verzeichniss der im Indischen Archipel* 64. 1854, *Commelinaceae Indicae* 22. 1870 and *Journal of the Linnean Society, Botany* 59: 436. 1966

(Roots febrifuge.)

in China: wang zi cao

Malayan names: poko tampoh kalin, rumput, rumput aur

Didissandra C.B. Clarke Gesneriaceae

From the Greek *dis* ‘twice, double’ and *aner, andros* ‘stamen, anther’, see *Monographiae Phanerogamarum* 5: 65. 1883.

Didissandra frutescens C.B. Clarke

Malaysia.

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 67. 1883

(Roots decoction a postpartum remedy.)

Malay name: tarum hutan

Didymocarpus Wallich Gesneriaceae

From the Greek *didymos* ‘double’ and *karpos* ‘fruit’, the capsule is divided into two parts, through the centre; see Nathaniel Wallich (1786–1854), in *Edinburgh Philosophical Journal* 1: 378. 1819.

Didymocarpus aromaticus Wall. ex D. Don (*Didymocarpus aromatica* Griff.; *Didymocarpus aromatica* D. Don; *Didymocarpus aromatica* Wall.; *Didymocarpus subalternans* Wall. ex R. Br.; *Henckelia aromatica* (Wall. ex D. Don) Spreng.; *Henckelia aromatica* Spreng.)

North India, Nepal. Herb, densely woolly leaves, deep purple flowers, finely toothed bracts

See *Anleitung zur Kenntniss der Gewachse* 2(1): 402. 1817, *Prodromus Florae Nepalensis* 123. 1825, *Syst. Veg.* (ed. 16) [Sprengel] 4(2, Cur. Post.): 13. 1827 [Jan–Jun 1827], *Cat.* (Wallich) n. 782, 785. 1829, *Plantae Javanicae Rariores* 118. 1840

(Aromatic properties. Veterinary medicine, plant juice fed to animals to treat bovine hematuria.)

in Nepal: pakhanbhetta

Didymocarpus crinitus Jack (*Didymocarpus crinita* Jack)

Malaysia.

See *Malayan Miscellanies* 1(5): 1. 1820

(Roots decoction a postpartum remedy.)

Malay names: ekor kucing, lemak batu, meroyan kerbau

Didymocarpus gambleanus C.E.C. Fisch. (*Henckelia gambleana* (C.E.C. Fisch.) A. Weber & B.L. Burt)

India.

See *Bull. Misc. Inform. Kew* 1938, 36. 1938, *Beitr. Biol. Pflanzen* 70(2–3): 345. 1997–1998 [publ. 1998]

(Dried powdered whole plant consumed for gastric complaints.)

in India: nilampadarthi

Didymocarpus ovalifolius Wight

India.

See *Icon. Pl. Ind. Orient.* [Wight] 4(2): t. 1351. 1848

(Leaf paste antiseptic, applied on cuts, skin itching, blood oozing, muscle contusion and wounds.)

in India: punnakku kulai

Didymocarpus pedicellatus R. Br. (*Didymocarpus pedicellata* R. Br.; *Didymocarpus platypus* C.B. Clarke)

Himalaya. Herb, stemless, radical crenate glandular leaves, purple flowers, funnel-shaped calyx, dried leaves with a spicy odour

See *On Cyrtandrea* 118. 1839, *Pl. Jav. Rar.* (Bennett) 2: 118. May 1840

(Used in Ayurveda. Leaf paste antiseptic, applied on cuts and wounds. Leaves effective against stones of bladder and kidney, urinary complaints.)

in India: pasanabehda, pashanabhedhi, pathar long, pathar phori, patharphori shilphori, shila pushpa, shila pushpi

Didymocarpus platypus C.B. Clarke

Malay Peninsula.

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 94. 1883

(Roots for coughs.)

Didymocarpus reptans Jack

Malay Peninsula.

See *Malayan Miscellanies* 1: v. 3. 1820

(Roots for coughs.)

Malay name: akar sumpuh darah

Didymochlaena Desv. Dryopteridaceae (Aspleniaceae, Pteridaceae)

From the Greek *didymos* 'double' and *chlaena* 'cloak', in reference to the indusia, see *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 303. 1811.

Didymochlaena truncatula (Sw.) J. Sm. (*Adiantum lunulatum* Houtt., nom. illeg., non *Adiantum lunulatum* Burm. f.; *Adiantum lunulatum* Ogata; *Adiantum lunulatum* Burm. f.; *Adiantum philippense* L.; *Aspidium truncatulum* Sw.; *Didymochlaena lunulata* Desv.; *Didymochlaena lunulata* var. *minor* H. Christ; *Didymochlaena microphylla* (Bonap.) C. Chr.; *Didymochlaena sinuosa* Desv.; *Didymochlaena squamata* (Willd.) Desv.)

America, Africa, India. Terrestrial fern, robust, creeping, rhizome short stout erect

See *Flora Indica* ... nec non Prodrumus Florae Capensis: 235. 1768, *Nat. Hist.* 14. 209. 1783, *Journal für die Botanik* 1800(2): 36. 1801, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 196. 1841–1842[1841] and *Ic. Fil. Jap.* 2: 53. 1929, *Fl. Madagasc.* 5(10): 302–361. 1958, *Nova Hedwigia* 3: 463–468. 1961, *Contr. U.S. Natl. Herb.* 38:

370. 1974, *Bulletin of the British Museum (Natural History), Botany* 13(5): 149–249. 1985

(*Adiantum lunulatum* used in Ayurveda. Swellings in the neck, pound the leaves and poultice. Root paste given to women during menstrual period for permanent sterility.)

in India: baariki, banda nevali, brahmadani, chitrapada, dharttarashtrapadi, dung tuli, godhangri, godhapadika, ghodkhuri, ghritamandalika, godepavlam, hamsahvaya, hamsapaadi, hamsapadi, hamsatamrapadi, hansaghri, hansapadi, hansapagi, hansavati, hansraj, kali-jhant, kali-jhamp, kalijhant, kaliijhant, kamsaraj, karnati, kiramata, kirapadika, kitamari, kitamata, madhusrava, mayurachulia, navalad, padangi, paresiyavasan, raja, raja-hamsa, rajhans, raktapadi, sancharini, sanya, seniya, shitangi, sitangi, supli, sutapadika, suvaka, tridala, tripadi, tripadika, triphala, vikranta, vishvagranti

Malay names: paku mega, paku sisek

in Tanzania: lisilu

Didymosperma H.A. Wendland & Drude ex Hook.f. Areaceae (Palmae)

Two seeds in the fruit, Greek *didymos* 'double, twin' and *sperma* 'seed', double seeded palms, see *Genera Plantarum* 3: 917. 1883.

Didymosperma hastatum Becc. (*Arenga hastata* (Becc.) Whitmore; *Blancoa hastata* (Becc.) Kuntze)

Malaysia.

See *Malesia Raccolta* ... 3: 199. 1889, *Revisio Generum Plantarum* 2: 727. 1891 and *Principes* 14: 124. 1970, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. Kew. 2005 [as *Arenga hastata*.]

(Root decoction drunk as a febrifuge; root decoction in the bath for fever in children.)

Malay names: meriding, tukas, tukus

Dieffenbachia Schott Araceae

In honor of Josef F. Dieffenbach, 1790–1863, around 1830 gardener and Curator of the Royal Palace Gardens of Schönbrunn at Vienna; see H.W. Schott, in *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode*. 3(97): 803. Vienna 1829 and Walter, W.G., Khanna, P.N. "Chemistry of the aroids 1. *Dieffenbachia seguine*, *amoena* and *picta*." *Econ. Bot.*, 26: 364–372. 1972, Arditti, J., Rodriguez, E. "Dieffenbachia: uses, abuses and toxic constituents: a review." *J. Ethnopharmacol.*, 5: 293–302. 1982, D.H. Nicolson, "Derivation of aroid generic names." *Aroideana*. 10: 15–25. 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 92. [born 1796] 1989, H. Genaust, *Etymologisches Wörterbuch der botanischen*

Pflanzennamen. 208. Basel 1996, Kenny M.G. “A darker shade of green: medical botany, homeopathy, and cultural politics in interwar Germany.” *Soc. Hist. Med.* 15(3): 481–504. 2002, *Arnaldoa* 9(2): 43–110. 2002[2003], Croat, T. “Revision of *Dieffenbachia* (Araceae) of Mexico, Central America, and the West Indies.” *Annals of the Missouri Botanical Garden* 91: 668–772. 2004. Among the most poisonous of Aroids, *Dieffenbachia* spp. contain calcium oxalate crystals, which are found in special cells called idioblasts. Experimental work with leaf and stem material caused death in mice and rats.

Dieffenbachia amoena Bull. (*Dieffenbachia amoena* Hort. ex Gentil)

South America.

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 803. 1829 and *Liste des Plantes Cult. dans les Serres Chaudes et Coloniales du Jardin Botanique de l'Etat à Bruxelles* 75. 1907, Der Marderosian, A.H., Giller, F.B., Roia, F.C. “Phytochemical and toxicological screening of household ornamental plants potentially toxic to humans. 1.” *J. Toxicol. Environ. Health* 1: 939–953. 1976, *J. Ethnopharmacol.* 12(3): 293–303. 1984 [Investigations on *Dieffenbachia amoena* Gentil. I: Endocrine effects and contraceptive activity.], *Flóruilas de las Zonas de Vida del Ecuador* 1–512. Quito, Ecuador, 1985 [*La flora de Jauneche: los Rios, Ecuador* / C.H. Dodson, A.H. Gentry y F.M. Valverde.], *Journal of Cytology and Genetics* 29(2): 177–186. 1994, *Contact Dermatitis*. 53(3): 172–173. 2005

(Irritant. Calcium oxalate raphides present in the plant, contact with the bruised or broken plant material may cause severe blistering and inflammation of the skin. Experimental work on rodents proved the toxicity of leaf and stem tissue from giant dumbcane.)

in English: dumb cane, dumb plant, giant dumbcane, mother-in-law's tongue plant, tuft root

in Spanish: cimarrón, otó de lagarto, rábano

Dieffenbachia aurantiaca Engl.

Costa Rica to W. Panama.

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 803. 1829, *Anales del Instituto Físico-Geográfico Nacional* (de Costa Rica) 9: 209. 1898, *Bot. Jahrb. Syst.* 26(5): 566. 1899 and Govaerts, R. & Frodin, D.G. *World Checklist and Bibliography of Araceae (and Acoraceae)*. Kew. 2002 [as *Dieffenbachia oerstedii*.]

(This species is said to be irritant.)

Dieffenbachia bausei Regel (*Dieffenbachia picta* Schott fo. *bausei* (Regel) Engl.; *Dieffenbachia* × *bausei* Regel)

South America.

See *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 1829(3): 803. 1829, *Oesterreichisches Botanisches*

Wochenblatt 2(9): 68. 1852, *Flora Brasiliensis* 3(2): 176. 1878 and Der Marderosian, A.H., Giller, F.B., Roia, F.C. “Phytochemical and toxicological screening of household ornamental plants potentially toxic to humans. 1.” *J. Toxicol. Environ. Health* 1: 939–953. 1976

(Experimental work caused death in mice.)

in English: dumbcane

Dieffenbachia costata Klotzsch ex Schott

W. South America.

See *Syn. Aroid.*: 128. 1856

(A remedy for rheumatism. Sap used as skin astringent.)

in Peruvian Amazon: patquina

Dieffenbachia longispatha Engl. & K. Krause

Panama, Colombia.

See *Das Pflanzenreich* IV. 23DC(Heft 64): 44. 1915

(This species is said to be irritant.)

Dieffenbachia obliqua Poepp. (*Dieffenbachia macrophylla* var. *obliqua* (Poepp.) Engl.)

Peru.

See *Nov. Gen. Sp. Pl.* 3: 90. 1845, *Fl. Bras.* 3(2): 173. 1878 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(1/3): 428–486. 1936

(Poisonous, irritant to touch, itch.)

Dieffenbachia oerstedii Schott

Mexico, Central America.

See *Oesterreichische Botanische Zeitschrift* 8: 179. 1858 and Croat, T.B. “Revision of *Dieffenbachia* (Araceae) of Mexico, Central America, and the West Indies.” *Ann. Missouri Bot. Gard.* 91(4): 668–772. 2004

(This species is said to be irritant.)

Dieffenbachia paludicola N.E. Br. ex Gleason (*Dieffenbachia longipistila* Croat; *Maguirea spathicarpoides* A.D. Hawkes) (*Maguirea* A.D. Hawkes, after the American botanist Bassett Maguire, 1904–1991, explorer, plant collector, from 1943 New York Botanical Garden, among his writings are “Guttiferae,” in R.E. Schultes, “Plantae Austro-Americanae VII.” *Bot. Mus. Leaflet*. 15(2): 55–69. 1951, “Guttiferae,” in B. Maguire, J.J. Wurdack and collaborators, “The Botany of the Guayana Highland-part IV(2).” *Mem. New York Bot. Gard.* 10(4): 21–32. 1961, “Rapateaceae,” in B. Maguire, J.J. Wurdack and collaborators, “The Botany of the Guayana Highland-part VI.” *Mem. New York Bot. Gard.* 12(3): 69–102. 1965 and “Notes on the Clusiaceae—chiefly of Panama. III.” *Phytologia*. 39(2): 65–77. 1978, with Y.-C. Hung wrote “Styracaceae.” in B. Maguire, J.J. Wurdack and collaborators, “The Botany of the Guayana Highland-part X.” *Mem. New York Bot. Gard.* 29: 204–223. 1978, with R.E. Weaver, Jr., wrote “The neotropical genus *Tachia*

(Gentianaceae)." *J. Arnold Arbor.* 56(1): 103–125. 1975, with J.A. Steyermark and D.G. Frodin wrote "Araliaceae," in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part XII." *Mem. New York Bot. Gard.* 38: 46–84. 1984; see Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists.* 2: 436. 1965, J. Ewan, ed., *A Short History of Botany in the United States.* 22. 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection.* 249. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey.* Library of the New York Botanical Garden. 279. 1973, Laurence J. Dorr, "In Memoriam. John J. Wurdack, 1921–1998." in *Plant Science Bulletin.* 44(2): 41. Summer 1998.)

South America, Brazil.

See *Bulletin of the Torrey Botanical Club* 56: 10. 1929, *Bulletin of the Torrey Botanical Club* 75: 635. 1948, *Aroideana* 9(1–4): 65–67. 1986

(This species is said to be irritant. Irritation of the hands is produced by raphides of calcium oxalate when split portions of this plant are handled.)

Dieffenbachia pittieri Engl. & K. Krause

Panama.

See *Das Pflanzenreich* IV. 23Dc(Heft 64): 42. 1915

(This species is said to be irritant.)

(Bullous stomatitis, edema of the skin around the mouth, severe stomatitis, plant dermatitis, eye injury. Toxic symptoms have also occurred in humans and house pets; the juice of *Dieffenbachia seguine* irritates the skin. Chewing produces painful irritation of the mouth and throat; swallowing chewed material may paralyse throat and cause temporary loss of speech. Symptoms may take several days to disappear. Cystals are not poisonous, the insoluble oxalates do not cause systemic poisoning in humans. Proteolytic enzymes have been found in dumbcane, and their toxic manifestations have been partly attributed to the proteolytic activity. Leaves used for rheumatism and swellings.)

in English: dumb cane, dumb plant, dumbcane, mother-in-law-plant, spotted dumbcane

in French Guiana: canne feu

in Spanish: brazo ponderoso, matapuerco

in Japan: shiro-gasuri-sô

Diervilla Miller Caprifoliaceae (Diervillaceae)

After a plant collector in N. America, M. Dièreville, not much is known about him, he was a French surgeon who, coming to Port Royal in 1699, stayed for a year, Dièreville departed Port Royal on October 6th, 1700 and a month later, on November 9th, 1700, Dièreville arrived back home, France, he was the author of *Relation du voyage du Port Royal de l'Acadie, ou de la Nouvelle France*. Rouen 1708 [*Port Royal*, edited by J.C. Webster with an English translation by Mrs. Webster, reprinted by The Champlain Society, Publication Nov. 20, 1933]; see G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 282. Ansbach 1852, Peter Landry, <http://www.blupete.com/Hist/NovaScotiaBk1/Part2/Ch06.htm> [email: petebtu@blupete.com] [“... once back home, in a curious mixture of prose and verse, Dièreville wrote of his experiences: recounting his journeys and experiences; describing the local flora and fauna, the state of the beaver trade, and of the native habitants and their customs...”].

Diervilla lonicera Mill. (*Diervilla canadensis* Willd.; *Diervilla diervilla* (L.) MacMill.; *Diervilla humilis* Pers.; *Diervilla lonicera* Mill. var. *hypomalaca* Fernald)

North America. Perennial shrub, suckering, stoloniferous, spreading, bark grey-brown, rough, twigs smooth, branchlets green or reddish, leaves simple opposite short-stalked, flowers hermaphrodite, yellow (orange or brownish red with age) flowers 1–6 in short-stalked clusters in leaf axils and at branch tips, slender long-beaked brown capsules splitting open longitudinally, fruit with bristle-like calyx lobes at end, in woodland

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Gardeners Dictionary: ... eighth edition*. 1768 and *Le Naturaliste Canadien* 114: 105–116. 1987

(Leaves diuretic, analgesic, stomachic, used in urinary troubles and applied to relieve itching; leaves contain a narcotic principle, inducing nausea. Roots diuretic, galactagogue, laxative and ophthalmic. Root, leaves and twigs diuretic, astringent and alterative. Bark laxative and ophthalmic; a decoction as a blood medicine; an infusion diuretic, taken for constipation, gonorrhoea, used as an eyewash.)

in English: bush honeysuckle, low bush honeysuckle, northern bush honeysuckle

in North America: osawoskwoni'is (= yellow liquid)

Dietes Salisb. ex Klatt Iridaceae

Greek *dietes* ‘for two years, lasting through the year, two years old’ (*dis* ‘twice, double’ and *etos* ‘a year’), see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 282. Ansbach 1852, *Linnaea* 34: 583. 1866 and *Ann. Missouri Bot. Gard.* 68: 132–153. 1981, *Cuscatlania* 1(6): 1–29. 1991. Some suggested from *dis* and *etes* ‘a fellow, neighbour, mate, associate’, possibly referring to the petals or because this genus resembles both *Iris* and *Moraea*.

Dietes bicolor (Steudel) Sweet ex Klatt (*Dietes bicolor* Sweet ex Klatt; *Iris bicolor* Lindl., nom. illeg.; *Moraea bicolor* Steud.)

South Africa.

See *Edwards's Bot. Reg.* 17: t. 1404. 1831, *Nomencl. Bot.*, ed. 2, 2: 159. 1841, *Linnaea* 34: 584. 1866

(Magic, ritual, protection, a charm.)

in English: peacock flower, yellow wild iris

in South Africa: poublom, uiltjie, uintjie

Dietes iridioides (L.) Sweet (*Dietes catenulata* (Lindl.) Sweet ex Klatt; *Dietes compressa* (L.f.) Klatt; *Dietes crassifolia* G. Don nom. inval.; *Dietes iridifolia* (L.) Soc., Bot.* 48: 36–37. 1928, Maire, R. *Flore de l'Afrique du Nord* 6: 1–397. Paul Lechevalier, Paris. 1959 [as *Moraea vegeta*.]

(Rhizome infusion for dysentery, hypertension. Veterinary medicine, rhizome tonic for goats. Magic, ritual, good luck charm.)

in English: wood iris

in South Africa: indawo-yehlathi, isiqiki-sikatokoloshe, isishuphe somfula

Difflugossa Bremek. Acanthaceae

Probably an anagram of the generic name *Goldfussia* Nees, see *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Tweede Sect. 41(1): 62, 235. 1944.

Difflugossa divaricata (Nees) Bremek. (*Goldfussia divaricata* Nees; *Strobilanthes divaricata* T. Anderson)

India, Himalaya.

See *J. Linn. Soc., Bot.* 9: 478. 1867 [23 Aug 1867] and *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2. 41(1): 246. 1944

(Dried leaves decoction to control urinary disorders.)

in India: dhobipat

Difflugossa muliensis H.B. Cui (= H.P. Tsui)

China.

See *Acta Botanica Yunnanica* 12(3): 275–276, pl. 2. 1990

(Leaves decoction for urinary problems.)

Digera Forssk. Amaranthaceae

The Arabic vernacular names for a species of *Digera* collected in Yemen, Wadi Mawr and Wadi Surdud, Feb. 1763; see Pehr (Peter) Forsskål (1732–1763), *Flora aegyptiaco-arabica*. 65. Copenhagen 1775 and *Fl. Madagasc.* 67: 1–51. 1954, *Taxon* 27: 375–392. 1978, Townsend, C.C. *Amaranthaceae*. In: Polhill, R.M. (Editor). *Flora of Tropical East Africa*. A.A. Balkema, Rotterdam, Netherlands. 1985. Some confusion.

Digera alternifolia (L.) Asch. (*Achyranthes alternifolia* L.; *Amaranthus arvensis* (Forssk.) K. Krause; *Digera alternifolia* Asch.; *Digera arvensis* Forssk.)

China. Herb, eaten by cattle

See *Species Plantarum* 1: 204–205. 1753, *Mantissa Plantarum* 1: 50. 1767, *Beitrag zur Flora Aethiopiens ...* 180. 1867 and *Deutschland Flora* ed. 2, 5: 137. 1901

(Used in Ayurveda. Flowers and seeds for urinary discharges.)

in India: aranya, aranyavastuka, chanchali, chenchalikura, getna, gitana, gungatiay, kunanjara, kura, kuranjara, kutinjar, latmahuria, lisava, luta mahauria, manjarika

Digera muricata (L.) Martius (*Achyranthes muricata* L.; *Digera alternifolia* (L.) Asch.; *Digera alternifolia* Asch.; *Digera angustifolia* Suess.; *Digera arvensis* Forssk.; *Digera muricata* Mart.)

Uganda, Tanzania, Sudan. Herb, erect, small pink to white flowers borne on a long slender inflorescence, famine food, a common weed, leaves and young shoots used as vegetable, fodder for goats and sheep, in dry bushland, grassland, forest edges and hillsides

See *Species Plantarum*, Editio Secunda 295. 1762, *Novorum Actorum Academia Caesareae Leopoldinae-Carolinae Germanicae Naturae Curiosorum* 13(1): 285. 1826 and *Mitt. Bot. Staatssamml. München*, Heft 2, 61. 1950

(Used in Sidha. Leaf paste applied on boils for pus. Flower and seeds diuretic, a decoction given in urinary discharge; ground flowers and seeds given in spermatorrhea. Plant laxative in high doses.)

in Arabic: buddjer, budjer, didjar, dyddjer

in India: chanchalikoora, chenchali soppu, chenchalikoora, chencheli-kura, gangatiya, gitana, gorajapalya, goraji palya, kajaro, kankali soppu, kecani, kecanikkirai, khanjru, kiraittoyili, kurdu, kutiraiccali, kutiraiccalikkirai, latmahuria, lehsua, leshua, lesua, lolar, lolaru, thoyyakeerai, toiyakkirai, toyil, toyilikkirai, toyya, toyyakkirai, toyyl, toyyili, tuyilaikkirai, tuyili, tuyilikkirai, ventoyili, ventoyilikkirai

in Kenya: bal-burach, chekirio, chererayan, cheriyan, ekoromomwae, ekoromwae, enoonkori, enoonkoroi, eosin-aikenyi, galgethoom, gelgedaana, getgedaan, gey-gidhan, gidan, gidan-ki-dahan, idooge, kai-a-tuti, kaprimet, kigulukimwenga, lorumcheria, mbalu, mhale, ndukee, than-thane, walange

Digitalis L. Plantaginaceae (Scrophulariaceae)

From the Latin *digitus* ‘a finger’, referring to the shape of the flowers. See Carl Linnaeus, *Species Plantarum* 2: 621–622. 1753 and *Genera Plantarum* Ed. 5. 272. 1754, William Withering (1741–1799), *An account of the foxglove*, and some of its medical uses: with practical remarks on dropsy, and other diseases. Birmingham 1785, *Digitalium Monographia* ... 2. 1821 and *Proc. Acad. Nat. Sci. Philadelphia* 82: 22. 1930. Several important pharmaceutical drugs such as digitalis and digoxin are derived from these plants. The chemicals increase the force of contraction of the heart muscle and are therefore used in cases of heart congestion. Digitoxin is one of several cardiac glycosides found in foxglove and is considered the most toxic of these chemicals.

Digitalis grandiflora Mill. (*Digitalis ambigua* J. Murr.; *Digitalis orientalis* Mill.)

Cosmopolitan, Europe.

See *Taxon* 29: 538–542. 1980, *Taxon* 30: 829–842. 1981, *Zapovedniki Belorussii Issledovaniia* 11: 62–69. 1987, *Botaničeskij Žurnal* (Moscow & Leningrad) 75: 279–282. 1990, *International Organization of Plant Biosystematists Newsletter* 24: 15–19. 1995, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 15–18. 1997

(Toxic.)

in English: crabgrass, large yellow foxglove, yellow foxglove

Digitalis lanata Ehrh.

Europe, India.

See *Beiträge zur Naturkunde* [Ehrhart] 7: 152–153. 1792 and *Taxon* 28: 631. 1979, *Taxon* 31: 589–592. 1982, *Thaiszia* 7: 75–88. 1997

(Leaves used as cardiac stimulant and tonic.)

in English: Austrian digitalis, digitalis, Grecian foxglove

Digitalis purpurea Linnaeus

See *Ann. Missouri Bot. Gard.* 66: 207. 1978, *Candollea* 42: 168. 1987, *Cytologia* 52: 81–84, 529–541. 1987, *Sida* 13: 241–250. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 120–123. 1989, Joubert, J.P. “Cardiac glycosides.” Pages 61–97. In Cheeke, P. R., ed. *Toxicants of Plant Origin*. Vol. II. *Glycosides*. Boca Raton, Fla., USA. 1989, *Cell and Chromosome Research* 12: 22–29. 1989, *Watsonia* 18: 415–417. 1991, *Watsonia* 19: 134–137. 1992, *Thaiszia* 7: 75–88. 1997, *Boletín de la Sociedad Botánica de México* 69: 101–121. 2001

Cosmopolitan.

(Used in Ayurveda. Upon ingestion, this plant can cause toxic reactions that lead to severe sickness and death in animals and in humans. Leaves used as cardiac stimulant and tonic.)

in English: common foxglove, fairy fingers, foxglove

in China: mao di huang

in India: hrtapatri, nilappukaiyilai, tilapuspi

in Japan: jigitarisu

Digitaria Haller Poaceae (Gramineae)

Latin *digitus*, *i* (possibly from *dic-idus* see *dic-is* and *dicere*) ‘a finger’, referring to the spikes; see Albrecht von Haller (1708–1777), *Historia stirpium indigenarum Helvetiae inchoata*. 244. Bernae 1768 and Giovanni Semerano, *Le origini della cultura europea*. *Dizionario della Lingua Latina e di Voci Moderne*. 2(2): 385. Leo S. Olschki Editore, Firenze 1994, *Contributions from the United States National Herbarium* 46: 13, 193–213, 230, 242–243, 284, 558, 611–612, 622–623, 634. 2003.

Plantarum Vascularium* 28. 2001.

Dillenia aurea Sm. (*Dillenia indica* L. var. *aurea* (Sm.) Kuntze)

India. Small tree, smooth bark, golden yellow flowers

See *Exotic Botany* 2: 65. 1806, *Revisio Generum Plantarum* 1: 44. 1891

(Paste of powdered bark in hot rye oil used for healing wounds. Fruit for loss of appetite.)

in India: kalle, ravuli

Dillenia bracteata Wight

India.

See *Icones Plantarum Indiae Orientalis* 2: t. 358. 1840

(Used in Sidha.)

in India: bettadakanigala, bettadakanagalu, chiritela, chiruthaeku, ciruteka, ciruteku, colikkay, ganigalu, kallateku, kallathaekku, kaltek, sirategu, sirathaeku

Dillenia castanifolia (Miq.) Hoog. (*Dillenia castaneifolia* Martelli)

Malaysia. Tree, soft scaly red bark, flowers in racemes, petals lemon yellow, fruits dehiscent, enlarged red sepals, on riversides, in primary and secondary forests

See *Malesia* iii. (1886) 163. 1886

(Chewed bark to treat a cold, chest pain, febrifuge.)

in Papua New Guinea: wekuwa

Dillenia excelsa (Jack) Martelli (*Dillenia excelsa* Martelli ex Gilg; *Dillenia excelsa* Martelli; *Wormia excelsa* Jack)

Borneo. Small tree

See *Malayan Miscellanies* 2(7): 69–70. 1822, *Malesia Raccolta* ... 3(3): 163. 1886, *Die Natürlichen Pflanzenfamilien* [Engl. et Prantl] 3(6): 123. 1893

(Roots decoction drunk for diarrhea.)

in Sarawak: jeregeyang kala

Dillenia indica L. (*Dillenia indica* Blanco; *Dillenia speciosa* Thunberg; *Dillenia speciosa* Gilg; *Dillenia speciosa* Griff.; *Dillenia speciosa* Blanco; *Dillenia speciosa* Curtis)

India. Tree, twisted irregular bole, bright red papery bark, very large white fragrant solitary flowers, imbricating sepals with glutinous pulp, petals and sepals eaten cooked or fresh

See *Hort. Malab.* 3: t. 38–39. 1682, *Species Plantarum* 1: 535. 1753, *Transactions of the Linnean Society of London* 1: 200. 1791, *Bot. Mag.* 13: t. 449. 1799, *Fl. Filip.* [F.M. (1893) 124. 1893 and *Blumea* 7: 113. 1952, *Taxon* 28: 403. 1979

(Used in Ayurveda and Sidha. Bark, leaves and fruits crushed and the juice drunk for cough, cold, fever, diarrhea. Dry bark with seeds of *Sesamum orientale* made into a paste applied on blistering boils; bark and leaves used to stop bleeding. Dry powdered roots of *Abroma augustum* with bark of *Dillenia indica* and *Terminalia chebula* given in urinary diseases. Root febrifuge; a decoction of roots with roots of *Ficus auriculata* and *Urena lobata* given in discharge of blood in urine; a decoction of roots with roots of *Glycosmis pentaphylla* and *Litsea monopetala* given in biliousness; root paste given to cause abortion. Mucilaginous exudate from fruits applied on infected parts to kill skin lice; fruit paste applied with ginger on hydrocele, salted juice of boiled fruits given as an expectorant. Half ripened fleshy calyx pickled and eaten for stomach disorders. Pounded mixture of kernels of *Castanopsis indica* with flower of *Dillenia indica* and flowers of *Musa balbisiana* given in blood dysentery. Veterinary medicine, leaves of *Cymbopogon flexuosus* pounded together with those of *Dillenia indica* given to check diarrhea of domestic animals.)

in English: elephant-apple

Dillenia pentagyna Roxb. (*Dillenia hainanensis* Merrill)

China, India. Trees, deciduous, straggling branches, oblong-lanceolate leaves, oblong-lanceolate petals, fleshy sepals, yellow flowers fascicled on leafless branches, fleshy pendulous orange-yellow fruits, spinulous seeds, ripe fruits eaten raw or cooked, raw fruits sour

See *Plants of the Coast of Coromandel* 1: 21, t. 20. 1795, *FBI* 1: 38. 1872 and *Lingnan Science Journal* 13(1): 64. 1934, *Quarterly Journal of Mythic Society* 54: 73–94. 1963, *Taxon* 29: 165–166. 1980

(Used in Ayurveda and Sidha. Bark to cure piles; freshly prepared bark powder applied on cuts, sores and insect bites; bark and leaves decoction drunk against diarrhea; root and stem bark made into a paste applied in rheumatism. Leaf juice given in diarrhea; fresh leaves kept on the head of the pregnant woman at the labor time. Fruit juice mixed with sugar a cooling beverage in fevers, pimples and cough. Veterinary medicine, bark pounded with tubers of *Pueraria tuberosa*, later fermented with rice soaked in water and administered as a tonic and anti-helminthic; leaves used as preventive of pig's sickness. Magico-religious beliefs, use of the wood is avoided due to the belief that it could be involved with sterility in family.)

in China: xiao hua wu ya guo

in India: aggai, aksikiphala, ban chalta, chinna kalinga, chinnakainga, chirim-araung, chirimpi-araung, chupri alu, dieng soh bar, hnah-khauh, hnah-khawng, kaadu kanigala, kaadu kanigalu, kaadukanagilu, kadkanagalu, kadkanigila, kadkanyila, kaduganigila, kadukanigala, kai-zawl, kai-hzawl, kalisag, kalla, kallai, kaliccilaikkay, kaliccilaikkay, kallililinkay, kallinga, kalluccilaikkay, kanagala, kanagale, kanagalu, kanagulu, kangal, kanigala, karambala, karambel, karkat, karmal, karmatta, karvad, karwal, kawm-kaw, kawrthing-dengte, kodapanna, kodapunna, kodappunna, kodeipunnai, kodepunna, kolategu, koltega, koltegu, kolthaega, koltheega, koolateegu, korkot, korkotta, kotapunna, kultega, kurweil, machil, mada thega, madathaega, malam-punna, malegeru, malethaega, mici, modutega, muccalu, muccil, muccuhiri, muchahir, muchhaheeri, muchhilu, muchihir, muchiru, nagakesaram, naitekkku, naiteku, nayitaku, nayttekkku, okshi, panna, parataku, parudu, pattipanna, pattippunnai, pattipunna, pattipunnai, pennay, pinnai, punna,

Dillenia philippinensis Rolfe

Philippines. Trees, white flowers, edible fruits

See *J. Linn. Soc., Bot.* 21: 307. 1884 [1886 publ. 1884]

(Fruit juice used to treat cough and pain in the chest.)

in Philippines: katmon

Dillenia scabrella (D. Don) Roxb. ex Wall. (*Colbertia scabrella* D. Don; *Dillenia scabrella* Roxb.)

SE Asia, India. Deciduous tree, reddish brown wood, petiole winged, bright yellow flowers in fascicles, globose greenish fruits, ripe fruits eaten fresh

See *Hort. Bengal.* 43. 1814, *Prodromus Florae Nepalensis* 226. 1825, *Plantae Asiaticae Rariores* 1: 20. 1830, *Fl. Ind.* 2: 653. 1832, *FBI* 1: 38. 1872

(Flowers juice used by the women for massage of the breasts.)

in India: chirim-sau-araung

Dillenia suffruticosa (Griffith) Martelli (*Dillenia burbridgei* (Hook.f.) Gilg; *Dillenia burbridgei* Martelli; *Dillenia suffruticosa* Martelli; *Wormia suffruticosa* Griff.; *Wormia suffruticosa* Griff. ex Hook.f.)

Borneo. Small tree

See *Notulae ad Plantas Asiaticas* 4: 706, t. 349, f. 1. 1854, *Fl. Brit. India* [J.D. Hooker] 1: 35. 1872, *Malesia Raccolta* ... 3(3): 163. 1886, *Naturl. Pflanzenfam.* iii. 6a. (1893) 123. 1893

(Young leaves made into a paste applied to wounds; eat the young leaves with the young leaves of *Melastoma borneense* for stomachache.)

in English: shrubby simpoh

in Malaya: simpoh ayer

in Sarawak: abuan, buau, simpoh

Dimocarpus Lour. Sapindaceae

Greek *deima* 'fear' and *karpos* 'fruit', referring to the fruits and their vernacular names, some suggested also from Greek *demos* 'fat, tallow' or *didymos* 'double' and *karpos*, see *Gen. Pl.* [Jussieu] 248. 1789, J. de Loureiro, *Flora cochinchinensis*. 233. 1790.

Dimocarpus longan Loureiro (*Euphoria litchi* Desf.; *Euphoria litchi* Juss.; *Euphoria litchi* Wall.; *Euphoria litchi* Blanco; *Euphoria longan* (Loureiro) Steudel; *Euphoria longana* Lamarck; *Euphoria longana* Blume; *Euphoria malaiensis* Radlk.; *Euphoria sinensis* J.F. Gmel.; *Euphoria verruculosa*

Salisbury; *Nephelium longan* (Lour.) Hook.; *Nephelium longana* Cambess.; *Nephelium malaiense* Griff.; *Nephelium mutabile* Blume) (*Euphoria* Comm. ex Juss., Greek *eu* 'well, good' and *phoros* 'bearing, carrying', referring to the qualities of the fruits.) (Chinese *lung-an* or *ngaan* 'dragon's eye')

China, Vietnam. Tree, very dense crown, cylindrical bole, grey black bark, flowers greenish-white

See *Systema Naturae*, ed. 12 2: 623. 1767, *Genera Plantarum* [Jussieu] 247–248. 1789, *Flora Cochinchinensis* 1: 233–234. 1790, *Syst. Nat.*, ed. 13[bis]. 2(1): 611. 1791, *Encyclopédie Méthodique, Botanique* (Lamarck) 3(2): 574. 1792, *Prodr. Stirp. Chap. Allerton* 280. 1796, *Nomenclator Botanicus* 1: 328. 1821, *Bijdr. Fl. Ned. Ind.* 5: 233. 1825, *Mémoires du Muséum d'Histoire Naturelle* 18: 30. 1829, *Fl. Filip.* [F.M. Blanco] 285. 1837, *Numer. List* [Wallich] n. 8048 G, H. 1847, *Rumphia* 3: 104–105. 1849, *Not. Pl. Asiat.* 4: 549. 1854, *Actes Congr. Int. Bot., Amsterdam* 1877 95. 1879

(Used in Sidha. Leaves infusion for rheumatic pains; for reducing swelling and pain in testicles, extract of the leaves of *Breynia retusa* and *Euphoria longan* taken orally.)

in English: dragon's eye, dragon eye, longan, longan fruit, lungan

in French: longanier

in China: li chih nu (= slave of the lichee), long yan, long yan rou, lung yen

in India: cempuvam, cempuvan, cham rev, dieng loba, kattuppuvam, longyen, mata kucing, mata kucing, samphal bol, theifeihmung, vomb, wumb

in Japan: ryu-gan, ringan, dingan

in Vietnam: lay nghin diang, mac nhan, nhan

Dimorphandra Schott Fabaceae (Caesalpinieae, Caesalpinieae)

Greek *dimorphos* 'two-formed' and *aner, andros* 'man, stamen', see *Systema Vegetabilium*, editio decima sexta 4(2): 404. 1827.

Dimorphandra conjugata (Splitg.) Sandwith (*Dimorphandra latifolia* Tul.; *Mora conjugata* Splitg.)

Guyana. Perennial non-climbing tree, small tree, compact flowers, cylindrical calyx, white petals, flat pod

See *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 9: 109. 1842, *Archives du Muséum d'Histoire Naturelle* 4: 189. 1844 and *Bulletin of Miscellaneous Information Kew* 1932(8): 395–406. 1932

(Bark decoction, taken for asthma; an aqueous extract of bark to wash cuts, ulcers, itch; powdered bark sprinkled on sores and wounds to enable healing.)

in Guyana: dacama, dakama, dakamma, dakouma

Dimorphocalyx Thwaites Euphorbiaceae

Greek *dis* 'twice' (*di* 'two'), *morphe* 'a form, shape' and *kalyx* 'a calyx', referring to the form of the calyx; see *Bijdr. Fl. Ned. Ind.* 12: 600. 1826, George Henry Kendrick Thwaites (1812–1882) and Joseph Dalton Hooker (1817–1911), *Enumeratio plantarum zeylanicae: an enumeration of Ceylon plants.* 278. London [1858–] 1864.

Dimorphocalyx glabellus Thwaites var. *lawianus* (Hook.f.) Chakrab. & N.P. Balakr. (*Dimorphocalyx glabellus* Thwaites var. *lawianus* (Müll.Arg.) Chakrab. & N.P. Balakr.; *Dimorphocalyx lawianus* (Müll.Arg.) Hook. f.; *Dimorphocalyx lawianus* Hook.f.; *Trigonostemon lawianus* Müll.Arg.)

India.

See *Enum. Pl. Zeyl.* [Thwaites] 278. 1861, *Linnaea* 34: 212. 1865, *The Flora of British India* [J.D. Hooker] 5: 404. 1887 and *Proc. Indian Acad. Sci. Pl. Sci.* 100(5): 296. 1990

(Leaves paste applied to treat wound on nail, along with the leaves of *Lawsonia inermis*, *Aloe vera*, bulb of *Scilla indica*, fruit juice of *Citrus limon* and rhizome of *Curcuma longa*.)

in India: siru kottai maram

Dimorphotheca Moench Asteraceae

Greek *dis* 'twice', *morphe* 'a form, shape' and *theke* 'a case', in allusion to the two distinct forms of achenes occurring in some species; see Conrad Moench, *Methodus plantarum horti botanici et agri Marburgensis a staminum situ describendi.* Marburgi Cattorum [Marburg] 585. 1794 and *Nucleus* 19: 8–12. 1976.

Dimorphotheca cuneata (Thunb.) Less. (*Calendula cuneata* Thunb.; *Dimorphotheca cuneata* DC.; *Dimorphotheca cuneata* Less.)

South Africa. Bushy perennial shrublet, erect, semifibrous root system, aromatic leaves, disc florets yellow, ray florets white

See *Species Plantarum* 2: 921–922. 1753, *Prodr.* (DC.) 6: 72. 1838 [1837 publ. early Jan 1838]

(Toxic to livestock, sheep, because of the prussic acid.)

in English: bride's bouquet, bush dimorphotheca, Cape marigold, Karoo bietou, large bietou, rain flower, weather-prophet, white bietou, white gousblom

in South Africa: gousblom, grootbietou, makbietou, reënbloom, struikdimorphotheca, witbietou, witgousblom

Dimorphotheca pluvialis (L.) Moench (*Calendula pluvialis* L.; *Dimorphotheca annua* Less.; *Dimorphotheca calendulacea* Harv. var. *dubia* Phillips; *Dimorphotheca leptocarpa* DC.; *Dimorphotheca pluvialis* Moench)

South Africa.

See *Species Plantarum* 2: 921. 1753, *Methodus* (Moench) 585. 1794, *Synopsis Generum Compositarum* 257. 1832, *Prodr.* (DC.) 6: 72. 1838 [1837 publ. early Jan 1838]

(Said to be toxic.)

in English: Cape daisy, Cape marigold, ox-eye daisy, rain daisy

in South Africa: witbotterblom

Dimorphotheca sinuata DC. (*Acanthotheca integrifolia* DC.; *Dimorphotheca aurantiaca* DC.; *Dimorphotheca aurantiaca* Hort.; *Dimorphotheca calendulacea* Harv.; *Dimorphotheca dentata* (DC.) Harv.; *Dimorphotheca dentata* Harv.; *Dimorphotheca integrifolia* Harv.; *Dimorphotheca integrifolia* (DC.) Harv.; *Dimorphotheca pseud-aurantiaca* Schinz & Thell.; *Dimorphotheca pseudaurantiaca* Schinz & Thell.; *Dimorphotheca pseudo-aurantiaca* Schinz & Thell.)

South Africa.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 72, 74. 1837[1838], *Flora Capensis* 3: 423–424. 1865 and *Vierteljahrsschr. Nat. Ges. Zurich*, lxxviii. 450. 1923, *Taxon* 28: 271–273. 1979

(Said to be toxic.)

in English: African daisy, blue-eyed Cape-marigold, Cape marigold, Namaqualand daisy, sun marigold

in South Africa: bietou, jakkalsbloubossie, Namakwalandse madeliefie

Dinetus Buch.-Ham. ex Sweet Convolvulaceae

Greek *dinetos* ‘whirled round’, see *Flora Indica* ... nec non *Prodromus Florae Capensis* 51, pl. 21, f. 1. 1768, *The British Flower Garden* ... 2: pl. 127. 1825 and *Candollea* 14: 27. 1952.

Dinetus racemosus (Roxb.) Buch.-Ham. ex Sweet (*Dinetus racemosa* Sweet; *Dinetus racemosus* (Wallich) Sweet; *Porana gagnepainiana* H. Léveillé; *Porana racemosa* Wallich; *Porana racemosa* Roxb.; *Porana racemosa* var. *tomentella* C.Y. Wu; *Porana racemosa* var. *violacea* C.Y. Wu)

China, SE Asia.

See *Hort. Bengal.* 13. 1814, *Fl. Ind.* 2: 41. 1824, *Brit. Fl. Gard.* 2: pl. 127. 1825 and *Catalogue des Plantes de Yun-Nan* 58. 1915, *Rep. Yunnan Trop. Subtrop. Fl. Res. Inst.* 103, pl. 33, f. 4, pl. 34, f. 1. 1965, *Novon* 3: 199. 1993, *Acta Botanica Sinica* 46(3): 375–378. 2004

(Whole plant used for treatment of swelling, pain and severe fevers.)

in English: snowcreeper, snowcreeper porana

in China: fei e teng

Dinochloa Büse Poaceae (Gramineae)

Greek *deinos* ‘terrible, powerful, mighty’ and *chloe*, *chloa* ‘grass’, referring to the tall, climbing and scrambling bamboos, see *Plantae Junghuhnianae* 3: 387–388. 1854, *Journal of the Asiatic Society of Bengal* new series, vol. 42, 2(4): 227–254. 1873, *Preliminary Report on the Forest and other Vegetation of Pegu* Calcutta 1875, *Forest Flora of British Burma*, vol. 2. Calcutta 1877, *Annals of the Royal Botanic Garden Calcutta* vol. 7. 1896 and *Indian Trees* London 1906, *The Grasses of Burma*, Calcutta (Baptist Mission Press) 1945, *Bambusées*, 1913, *An Enumeration of Philippine Flowering Plants* (Bureau of Printing, Dept. of Agriculture and Natural Resources, Bureau of Science, Manila, Publications n. 18) Manila 1925[1923], *Bamboo Research in Asia: Proceedings of a Workshop Held in Singapore*, 28–30 May 1980 (editors G. Lessard and A. Chouinard) Ottawa 1980, *Kew Bulletin* 36(3): 613–633. 1981, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae, Botanical Survey of India*, Flora of India, Series 4, Calcutta 1989.

Dinochloa andamanica Kurz (*Dinochloa scandens* R.B. Majumdar, not (Blume) Kuntze; *Dinochloa tjankorreh* var. *andamanica* (Kurz) Gamble)

India, Andaman and Nicobar Islands. Creeping, solitary or single, evergreen, stout, rooting at the nodes or often climbing over trees, forming impenetrable tangled thickets, very long culms used as ropes

See *Journal of the Asiatic Society of Bengal* n.s. 42, 2(4): 253. 1873, *Preliminary Report on the Forest and other Vegetation of Pegu* App. B, 95. 1875, *Forest Flora of British Burma* 2: 570. 1877, *Annals of the Royal Botanic Garden Calcutta* 7: 415. 1896 and *Bambusées* 169. 1913, *The Grasses of Burma* 23. Calcutta 1945, *Bamboo Research in Asia* 22. 1980, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* 277. Calcutta 1989

(Young shoots used as vermifuge.)

in Andamans: baradahabarat, baradahbarat, bulu akar

Dinochloa scandens (Blume) Kuntze (*Bambusa scandens* Blume; *Chusquea amplopaniculata* Steud.; *Dinochloa scandens* var. *normalis* Kuntze; *Dinochloa tjankorreh* (J.H. Schultes) Büse; *Nastus tjankorreh* J.H. Schultes; *Schizostachyum parviflorum* Munro)

Indonesia, West Java. Sympodial, open, scrambling, numerous slender branches somewhat drooping, inflorescence on leafless branchlets, fruits hard, culms used for making baskets, young shoots edible, growing in primary forests

See *Flora* 7: 291. 1824, *Syst. Veg.* 7, 2: 1358. 1830, *Plantae Junghuhnianae* 3: 388. 1854, *Syn. Pl. Glumac.* 1: 337. 1854, *Trans. Linn. Soc. London* 26: 153. 1868, *Revis. Gen. Pl.* 1: 773. 1891 and *Kew Bulletin* 36(3): 630. 1981, *Kew Bulletin* 51(1): 104. 1996

(Young shoots used as vermifuge.)

in English: Java bamboo, west-Java climbing bamboo, zig-zag bamboo

in India: baurat

in Indonesia: cangkore, cangkoreh

in Philippine Isl.: baka, bakau, balikao, balilit, bayokau, bia, bika, bukau, bukai, bulukau, burukau, imak, timak, usiu

in Thailand: phai khlan, phai lueai

Dioclea Kunth Fabaceae (Phaseoleae)

Named in honor of Diocles, b. Carystus, Euboea, Greece; he must have been a contemporary of Aristoteles (384–322 BC.), his most probable dates are 375–300 BC.; flourished 4th century BC., philosopher and pioneer in medicine, a resident of Athens, Diocles was the first to write medical treatises in Attic Greek rather than in the Ionic Greek. See *Dioclis Epistola ad Antigonum regem de sanitate tuenda*. In: *Meletii philosophi De natura structuraque hominis opus*, etc. 184–187. 1552, Friedrich Wilhelm Heinrich Alexander von Humboldt, Aimé Jacques Alexandre Bonpland and Carl Sigismund Kunth, *Nova genera et species plantarum*. 6: 437. (Jul.) 1824 and Werner Wilhelm Jaeger, *Diokles von Karystos*. Die griechische Medizin und die Schule des Aristoteles. Berlin 1938 and *Vergessene Fragmente des Peripatetikers Diokles von Karystos*. Berlin 1938.

Dioclea reflexa Hook.f. (*Dioclea hexandra* (Roxb.) Mabb.; *Dioclea labatheii* H. St. John; *Dolichos hexandra* Roxb.; *Mucuna hexandra* (Roxb.) Ralph)

Africa, Asia, Madagascar. Perennial climbing shrub, liana

See *Hortus Bengalensis*, or a catalogue ... 55: 1814, *Icones Carpologicae* 30. 1849 and *Taxon* 29(5–6): 605–606. 1980

(Whole plant tonic, stimulant, antiparasitic. For heart trouble drink the root decoction. Magic, ritual, for infants.)

in English: sea-purse

Malay name: pinang kera

in Congo: iphaa, maphaa

in Yoruba: agbaarin, ege, idasenu, ise, okun irora, oloju edun

Diodella Small Rubiaceae

Greek *diodos* ‘through’, *diodeia* ‘passage through’, referring to the habitats, or from the Greek *dis* ‘twice’ and *eidōs*, *oidēs* ‘form, shape, kind’, referring to the calyx; see Carl Linnaeus, *Species Plantarum*. 104. 1753 and *Genera Plantarum*. Ed. 5. 45. 1754, *Fl. North Amer.* 2: 41. 1841 and *Fl. Miami*: 177, 200. 1913, Govaerts, R. *World Checklist of Selected Plant Families Database*... The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Diodia*.], *Rhodora* 107: 408–413. 2005.

Diodella scandens (Sw.) Bacigalupo & E.L.Cabral (*Diodia ekmanii* Alain; *Diodia pilosa* Schumach. & Thonn.; *Diodia scandens* Sw.; *Diodia scandens* Hutch. & Dalziel, non Sw.; *Spermacoce pilosa* (Schumach. & Thonn.) DC.)

West Indies. Scabrous, herb, straggling, slender, scabrid-pubescent leaves, small white flowers in compact axillary clusters

See *Species Plantarum* 1: 104. 1753, *Nova Genera et Species Plantarum seu Prodrōmus* 30. 1788, *Beskrivelse af Guineiske planter* 76–77. 1827, *Prodrōmus Systematis Naturalis Regni Vegetabilis* 4: 553. 1830 and *Flora of West Tropical Africa* ed. 1 2: 133. 1931, *Brittonia* 20: 160. 1968, *Darwiniana* 44: 104. 2006

(Leaves, roots and stem for stomachache, earache, cough, venereal diseases, snakebites. Roots decoction for toothache. A decoction for children’s cough, for pregnant woman with threatening abortion. The juice from squeezing the plant as a counter-irritant, for convulsion and epilepsy. Veterinary medicine, leaves juice for hematuria.)

in Benin: djihouhwe, djiwewe, ewe idatcha, nyonuwehome

in Burundi: umunyovu

in Congo: botena, kekele, lepele, lisasa, loukaya loualota, lukaya kua lota, lukaya lualota, malumangwali, mudanda, munpoko, mutena, nvonvuani, okwange, tãdza, tadza

in Ghana: nsirisiri

in Ivory Coast: fofouairé, kwassa iré, naosifa, naouassinfa

in Nigeria: onaedi

in Tanzania: munyamunyamu

Diodia L. Rubiaceae

Greek *diodos* ‘through’, *diodeia* ‘passage through’, referring to the habitats, or from the Greek *dis* ‘twice’ and *eidōs*, *oidēs* ‘form, shape, kind’, referring to the calyx; see Carl Linnaeus, *Species Plantarum*. 1: 104. 1753 and *Genera Plantarum*. Ed. 5. 45. 1754, *Fl. North Amer.* 2: 41. 1841, *Flora Brasiliensis* 6(6): 29. 1888 and *Flora of Miami* 177, 200. 1913, *Rhodora* 107: 408–413. 2005.

Diodia vaginalis Benth.

Tropical Africa. Herb, prostrate, fleshy, white or pink solitary flowers

See *Niger Flora* [W.J. Hooker]. 424. 1849

(Astringent, for dysentery, diarrhea.)

Dionaea Sol. ex Ellis Droseraceae

One of the names of Venus, see *The St James’s Chronicle; or the British Evening Post* No. 1172: [p. 4]. 1768, *The*

Paradisus Londinensis, ad t. 95. 1808 and *Bot. J. Linn. Soc.* 99: 249–254. 1989.

***Dionaea muscipula* Ellis**

North America. Perennial herb

See *The St James's Chronicle; or the British Evening Post* No. 1172: [p. 4]. 1768 and *Cytologia* 63: 329–339. 1998

(For fishing.)

in English: Venus flytrap, Venus' flytrap

Dioon Lindley Cycadaceae (Zamiaceae)

From the Greek *dis* 'twice' and *oon* 'egg', referring to the paired seeds.

***Dioon edule* Lindl.** (*Dioon aculeatum* Lem.; *Dioon strobilaceum* Lem.; *Macrozamia littoralis* Liebm. ex Hemsl.; *Macrozamia pectinata* Liebm. ex Hemsl.; *Platyzamia rigida* Zucc.)

Mexico.

See *Edwards's Botanical Register* 29: misc. 59–60. 1843 and *Fl. Veracruz.* 26: 1–31. 1983

(Buds and cones poisonous. Liquid seed decoction used for neuralgia.)

Dioscorea L. Dioscoreaceae

After the Greek (native of Anazarba in Cilicia) doctor Pedanos Dioscorides (1st century A.D.), herbalist, naturalist, author of *Materia medica*; see Carl Linnaeus, *Species Plantarum* 2: 1032–1034. 1753, *Genera Plantarum* Ed. 5. 456. 1754, *De Fructibus et Seminibus Plantarum*... 1: 44, t. 14. 1788, *Flora Cochinchinensis* 190, 194. 1790, *Prodromus Florae Novae Hollandiae* 294. 1810, *Analyse des Familles de Plantes* 57–58. 1829, *Conspectus Regni Vegetabilis Secundum Characteres Morphologicas* ... 9. 1835 and Isaac Henry Burkill, 1870–1965, "A list of Oriental vernacular names of the genus *Dioscorea*." *Gard. Bull. Straits Settlem.* 3(4–6): 121–244. 1924, *The Families of Flowering Plants*. II. *Monocotyledons* 2: 143. 1934, *Flore de Madagascar et des Comores* 44: 1–78. 1950, *Fl. Trop. East Afr., Dioscoreaceae* 1–26. 1975, *Cellule* 73: 117–134. 1980, Ting Chih-tsun, Chang Mei-chen & Ling Ping-ping. *Dioscoreaceae*. In: Pei Chien & Ting Chih-tsun, eds., *Fl. Reipubl. Popularis Sin.* 16(1): 54–120. 1985, *Taxon* 41: 562. 1992, *Fl. Mesoamer.* 6: 53–65. 1994, *Taxon* 44: 611–612. 1995, Gordon Douglas Rowley, *A History of Succulent Plants*. California 1997, *Novon* 9(4): 550. 1999, Tanaka, N., Koyama, T. & Murata, J. "The flowering plants of Mt. Popa, central Myanmar—Results of Myanmar-Japanese joint expeditions, 2000–2004." *Makinoa* 5: 1–102. 2005. The taxonomy of *Dioscorea* is notoriously problematic. The rhizomes/tubers of many nonedible species accumulate varying concentrations of steroidal saponins, and

Dioscorea species of Mexican, South African and Asian origin have been utilized extensively in the industrial synthesis of cortisone and human sex hormones. *Dioscorea* sp., *tuba upi*, as arrow poison.

***Dioscorea alata* L.** (*Dioscorea alata* var. *globosa* (Roxb.) Prain; *Dioscorea alata* var. *purpurea* (Roxburgh) A. Pouchet; *Dioscorea alata* var. *tarri* Prain & Burkill; *Dioscorea alata* var. *vera* Prain & Burkill; *Dioscorea atropurpurea* Roxb.; *Dioscorea colocasiifolia* Pax; *Dioscorea eburina* Lour.; *Dioscorea eburnea* Lour.; *Dioscorea globosa* Roxb.; *Dioscorea globosa* Roxb. & Prain; *Dioscorea javanica* Queva; *Dioscorea purpurea* Roxburgh; *Dioscorea rubella* Roxb.; *Dioscorea sapinii* De Wild.; *Dioscorea sativa* Munro, nom. illeg., non *Dioscorea sativa* L.; *Dioscorea vulgaris* Miq.; *Elephantodon eburnea* (Lour.) Salisb.; *Polynome alata* (L.) Salisb.)

Trop. and Subtrop. Asia. Vine, climbing, crawling, trailing, twining, hanging, sprawling, large, vigorous, stem ridged or winged, unarmed or prickly, polymorphic tubers, elongated warty aerial tubers in leaf axils, glossy dark green leaves, cream flowers scented, fruits greenish-yellow, tubers elongated branching, tubers eaten boiled or roasted, forest edge

See *Fl. Cochinch.* 625, 767. 1790, *Flora Indica*; or descriptions of Indian Plants 3: 797–800. 1832, Munro, William (1818–1880), *Hortus Agrensensis*, or catalogue of all plants found wild or cultivated in the neighbourhood of Agra and the surrounding country. 30. in Japan: diajo

Malayan names: ubi jawa, ubi junjong, ubi kelibang, ubi kendumok, ubi kipas, ubi nasi, ubi paha kerbau, ubi pandang, ubi sekok, ubi sukun, ubi teropong

in Nepal: ghar tarul

in Okinawa: yamanmu, kayamu

in Philippines: ipoi, kinampai, luktu, ubi

in Hawaii: uhi

in Central African Republic: motombo

in East Africa: bila, bira, madala, madevu, uzi, viazi vikuu

in Ghana: adatsigo, adigo, adzugo, afaseo, afasew, alamua, avadze, fasew

in Yoruba: arun fonfon, egbodo, ewura

Dioscorea arachidna Prain & Burkill

India. Long stalked oblong tubers, white flesh, stem ridged, leaves 3-foliolate, capsules ascending, tubers eaten boiled or roasted

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 10: 21. 1914, *Bull. Bot. Surv. India* 15: 193. 1973

(Tubers anthelmintic.)

in India: rui-sang

Dioscorea asteriscus Burkill

Kenya to Namibia. Twining, climber, hairless, herbaceous, tubers and bulbils, stem shiny white-green, separate male and female plants, male flowers star-shaped in long slender spikes, oblong fruit green-white, succulent, when damaged fruit releases colorless sticky latex which changes to brown-yellow

See *Bull. Jard. Bot. État* 15: 356. 1939

(Tubers suspected to be poisonous.)

in East Africa: dilandogoro, lugutumbili, mtambu mwitu, ndiga, ndu, tuguntumbii

in Tanzania: dendega, matendega

Dioscorea belophylla (Prain) Voigt ex Haines (*Dioscorea belophylla* Voigt, nom. inval.; *Dioscorea belophylla* Voigt ex Haines; *Dioscorea nummularia* Lam. var. *belophylla* Prain; *Dioscorea sagittata* Poir.; *Dioscorea sagittata* Royle, nom. inval.; *Dioscorea sagittifolia* Pax) (from the Greek *belos* 'an arrow, dart' and *phyllon* 'a leaf')

India, Himalaya. Rhizome edible

See *Encycl.* (Lamarck) 3(1): 231. 1789, *Encycl.* (Lamarck) Suppl. 3. 139. 1813, *Ill. Bot. Himal. Mts.* [Royle] 378. 1839, *Hort. Suburb. Calcutt.* 653. 1845, *Bot. Jahrb. (Used in Ayurveda, Unani and Sidha. Slightly poisonous; curry prepared from tubers sometimes causes throat irritation after its consumption, to avoid irritation leaves of *Lagerstroemia parviflora* are mixed with sliced tubers and cooked as vegetable. Aerial bulbils toxic, a weak poison. Leaf juice against skin diseases, pains. Tubers used for syphilis, orchitis, dysentery, piles, ulcers, jaundice, boils, goiter, epistaxis, pyogenic infections, pharyngitis, sprains, injuries, scrofula; boiled tubers peeled and given to children as a cure for measles; tuber boiled and eaten to get rid of threadworms; powdered tubers applied to sores and boils, and taken internally for dysentery and boils. Commonly used in a decoction together with kelp, the brown seaweed known as *Laminaria japonica*. Tubers poisonous to fish. Veterinary medicine, aphrodisiac; tuber paste given for dysentery; tubers along with stem bark of *Erythroxylum monogynum*, leaves of *Phyllanthus reticulatus* pounded and the extract applied over fractured area and bandaged. Fetish, magic, ritual.)

in English: aerial yam, air potato, air potato yam, bitter yam, bulb-bearing yam, otaheite yam, otaheite potato, potato yam, wild yam

in Latin America: acam, drung-gogo, pap, papa aérea, papa cariba, papa de aire, wild yam

in China: huang du, huang yao zi

(Poisonous, if the edible tuber is not properly prepared. Tubers and leaves diuretic, wound healing.)

in English: red yam, yellow yam

Dioscorea cayennensis Lam. subsp. ***rotundata*** (Poir.) J. Miège (*Dioscorea rotundata* Poir.)

Tropical Africa.

See *Encyclopédie Méthodique, Botanique* 3: 233. 1789, *Encycl.*, (Lamarck) Suppl. 3: 139. 1813 and *Fl. W. Trop. Afr.*, ed. 2, 3(1): 153. 1968, *Genetica* 54: 1–9. 1980

(Poison bait. Tubers and leaves astringent, anti-diarrhea, a poultice.)

in English: eight months yam, Guinea yam, white Guinea yam, white yam

Dioscorea cirrhosa Loureiro (*Dioscorea rhipogonoides* Oliv.; *Dioscorea matsudai* Hayata; *Strophis cirrhosa* (Lour.) Salisb.)

China, Thailand. In thickets and secondary forests, in the lowland

See *Fl. Cochinch.* 2: 625. 1790

(The tubers have a very high tannin content.)

in English: dye-root, dye-yam, dyeing yam

in China: shu liang

in Laos: houa, kabau, thoom lüad

in Vietnam: cu'nâu, khoai leng

Dioscorea cochleariopiculata De Wild. (*Dioscorea stolzii* R. Knuth)

Ethiopia to S. Trop. Africa. Climbing shrub, herb, robust, woody rootstock, leaflets fringed in brown tomentum, pale yellow leaves, internodal spines dark brown, fruits yellowish green with dusty white tomentum, young fruit green with white pubescence, in *Acacia* woodland

See *Die Natürlichen Pflanzenfamilien* II 5: 134. 1888 and *Bulletin du Jardin Botanique de l'État* 4: 350. 1914

(Tuber poisonous.)

in Tanzania: buliga, itugu, kiaziki, kilumbu, lindiga, mpeta, ndiga, ntembe, numbu, tugu

Dioscorea deltoidea Wall. ex Griseb. (*Dioscorea deltoidea* Wall. ex Kunth; *Dioscorea deltoidea* var. *orbiculata* Prain & Burkill; *Dioscorea nepalensis* Sweet ex Bernardi; *Dioscorea nepalensis* Sweet; *Tamus nepalensis* Jacquem. ex Prain & Burkill)

Himalaya, China, Nepal. Climber, perennial twining vine, bulbils present, tuber horizontal branched flesh white, long pointed leaves alternate widely cordate, spikes pendulous, small white flowers, fruits 3-winged, capsule reflexed, root tubers edible also used for washing shawls and woollen cloth

See *Flora Brasiliensis* 3(1): 43, in nota. 1842 and *J. Proc. Asiat. Soc. Bengal* 10: 16. 1914, *Annals of the Royal Botanic Garden. Calcutta.* 14(1): 25, 27, t. 4. 1936, *Candollea* 18: 258. 1963, *Acta Phytotaxonomica Sinica* 14: 65–72. 1976, *Cellule* 73: 117–134. 1980

(Tuber decoction as a contraceptive. Tubers used to kill lice and as a fish poison, also as a vermifuge and an anthelmintic for purging out intestinal worms; bulb boiled and eaten for gastric troubles and dysentery; tuber paste for headache and muscular pain. Diosgenin is said to be a basic material for hormone preparation. Leaves as fish poison.)

in English: potato yam

G. Mey.)

China to Temp. E. Asia. Twining vine, tuberous perennial, flowers small in axillary clusters, fruits black, cooked tubers eaten

See *Species Plantarum* 1: 153, 159–162. 1753, *Species Plantarum* 2: 1032–1034. 1753, *Primitiae Florae Essequeboensis* ... 100. 1818, *Bull. Soc. Imp. Naturalistes Moscou* 10(7): 158. 1837, *Revue Horticole* 3: 243. 1854, *Revue Horticole* 11. 1865, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 244. 1866, *Journal of Botany, British and Foreign* 20(240): 359. 1882, *Ill. Fl. Jap.* 1(7): 2, pl. 45. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(2): 261. 1900, *Somoku-Dzusetsu*, ed. 3, 4: 1326. 1912, *Anales Mus. Nac. Hist. Nat. Buenos Aires* 27: 488. 1915, *Bulletin of Miscellaneous Information Kew* 1933(5): 243. 1933, *Fl. Illustr. Urug.* 1: 235. 1943

(Raw tubers toxic if eaten, irritation and burning of the mouth, lips, tongue and throat; skin irritation from handling the uncooked tubers. The roots used for diarrhea, enteritis, dyspnea, cough, leucorrhea.)

in English: Chinese yam, cinnamon vine

Dioscorea prazeri Prain & Burkill (*Dioscorea clarkei* Prain & Burkill; *Dioscorea deltoidea* var. *sikkimensis* Prain; *Dioscorea sikkimensis* Prain & Burkill)

Himalaya, Pen. Malaysia. A twining vine, smooth, rhizome short, leaves alternate, capsules winged, seeds reddish, without bulbils

See *Bengal Pl.* 2: 1066. 1903, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 73(Suppl.): 2–3. 1904, *J. Proc. Asiat. Soc. Bengal* 10: 15. 1914, *Cellule* 73: 117–134. 1980, *Cell and Chromosome Research* 11: 93–97. 1988, Rahman, M.O. “Second list of angiospermic taxa of Bangladesh not included in Hooker’s ‘Flora of British India’ and Prain’s ‘Bengal Plants’: series I.” *Bangladesh Journal of Plant Taxonomy* 11: 77–82. 2004, *Kew Bulletin* 62: 251–258. 2007

(Used in Ayurveda. The flesh of the rhizome very poisonous, also used for stupefying fish.)

in India: kencheong, kukur tarul, nilau

in Thailand: man khao, man mia

Dioscorea preussii Pax (*Dioscorea andongensis* Rendle; *Dioscorea chevalieri* De Wildemann; *Dioscorea longespicata* De Wildemann; *Dioscorea malchairii* De Wildemann; *Dioscorea pterocaulon* De Wildemann & T. Duran; *Dioscorea thonneri* De Wildemann & T. Duran)

Tropical Africa. Climbing vine with winged stem, stem green with short brown trichomes, liana, bulbils purple, leaves thick waxy with small white dots on lower side, fruits greenish-yellow winged

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 147. 1892 and *Genetica* 54: 1–9. 1980, *Scripta Botanica Belgica* 35: 1–438. 2006

(Tubers and bulbils are poisonous.)

Dioscorea pubera Blume (*Dioscorea anguina* Roxb.; *Dioscorea combilium* Buch.-Ham.; *Dioscorea combilium* Buch.-Ham. ex Wall., nom. inval.; *Dioscorea cornifolia* Kunth)

Himalaya. Hairy climber, clavate tubers long stalked, yellow flesh, capsules puberulous, tubers eaten boiled or roasted

See *Hort. Bengal.* 72. 1814, *Enum. Pl. Javae* 1: 21. 1827, *Numer. List* [Wallich] n. 5103 A. 1830, *Fl. Ind.* 3: 803. 1832, *FBI* 6: 293. 1892 and *Bull. Bot. Surv. India* 15: 199. 1973

(Used in Ayurveda. Tubers eaten for treating various stomach disorders.)

in India: kasalu, kasi theega, kosakanda, rui-han, savide dumpa

Dioscorea quartiniana A. Rich. (*Botryosicyos pentaphyllus* Hochst.; *Dioscorea anchiatasi* Harms, nom. inval.; *Dioscorea anchietae* Harms ex R. Knuth; *Dioscorea angolensis* R. Knuth; *Dioscorea apiculata* De Wild.; *Dioscorea beccariana* Martelli; *Dioscorea crinita* Hook.f.; *Dioscorea*

(eds.) *Flore Analytique du Bénin*. Backhuys Publishers. 2006, *Scripta Botanica Belgica* 34: 1–199. 2006

(Roots and tubers reported to be toxic. Astringent, anti-emetic, for diarrhea, kidney infection. Arrow poison, often in combination with the latex of *Acokanthera schimperi* (A. DC.) Schweinf. and *Excoecaria madagascariensis* (Baill.) Müll.Arg.)

in East Africa: bissagambo, chepkeswut, gishu, ikalampua, kibuzi, omuhurugwa

in Tanzania: itugu, ituguligwa, kiazzi kikuu, kilumbu, ndiga, tugu

in India: togeya

***Dioscorea rupicola* Kunth**

S. Africa. Tuber geophyte

See *Enum. Pl.* 5: 378. 1850

(Very poisonous.)

in South Africa: inKwa (Zulu)

***Dioscorea sansibarensis* Pax** (*Dioscorea macabiha* Jumelle & H. Perrier; *Dioscorea maciba* Jum. & H. Perrier; *Dioscorea macroua* Harms; *Dioscorea toxicaria* Bojer, nom. nud.; *Dioscorea welwitschii* Rendle)

Tropical Africa, Madagascar. Herb, twining, liana, climber, trailing, creeping, large tubers, conspicuous bulbils, aerial tuber purple externally, leaves roundish, flowers white, green fruits, in forest, secondary bush

See *Species Plantarum* 2: 1032–1034. 1753, *Hortus Mauriti.* 352. 1837, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 146. 1892, *Notizbl. Königl. Bot. Gart. Berlin* 2: 266. 1896 [also *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 266. 1897], *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 2: 39. 1899 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 149: 485–486. 1909, *Ann. Inst. Bot.-Géol. Colon. Marseilles*, sér. 2, 8: 35. 1910

(Both the tubers and axillary bulbils of this species are toxic to poisonous.)

in English: wild yam, Zanzibar yam

in Comoros: bahi bahi

in East Africa: dendego, midukanu, muluguru, tugutumbili, tungutumbii

in Tanzania: kichocho, mchochoni, tungunyuu

***Dioscorea schimperiana* Hochst. ex Kunth** (*Dioscorea fulvida* Stapf; *Dioscorea hockii* De Wild.; *Dioscorea schimperiana* Hochst.; *Dioscorea schimperiana* Hochst.; *Dioscorea schimperiana* var. *adamaouense* Jacq.-Fél.; *Dioscorea schimperiana* var. *adamaouense* Jacq.-Fél.; *Dioscorea schimperiana* var. *vestita* Pax; *Dioscorea stellato-pilosa* De Wild.; *Dioscorea stellatopilosa* De Wild.; *Dioscorea stellatopilosa* var. *cordata* De Wild.)

Tropical Africa. Herbaceous scrambler, climber, liana, tubers aerial borne at the nodes, pale green cordate leaves, petals and sepals light yellow, fruits winged, trilocular pendulous fruits green with dark brown tomentum, in dense woodland, at forest edge, along river banks

See *Enum. Pl.* 5: 339. 1850, *Bot. Jahrb. Syst.* 15: 148. 1892 and *J. Linn. Soc., Bot.* 37: 530. 1906, *Bull. Jard. Bot. État* 3: 277. 1911, *Ann. Mus. Congo Belge, Bot.*, V, 3: 370. 1912, *Rev. Wood; *Dioscorea villosa* var. *vera* Prain & Burkill; *Dioscorea waltheri* Desfontaines; *Merione villosa* (L.) Salisb.; *Merione villosa* Salisb.)

North America. Herbaceous vine, clambering, scrambling, climbing, twining, cream greenish-yellow flowers, margin of woods, river banks, in forest

See *Species Plantarum* 2: 1032–1034. 1753, *Fl. Carol.* 246. 1788, *Encycl.* 3: 232. 1789, *Systema naturae*.... 581. 1796, *Flora Boreali-Americana* 2: 239. 1803, *Bot. North. Middle States* 355. 1833, *Enum. Pl.* 5: 338. 1850, *Gen. Pl.* [Salisbury] 12. 1866 and Bartlett, H.H. “The source of the drug *Dioscorea*, with a consideration of the Dioscoreae found in the United States.” *U. S. Department of Agriculture. Bureau of Plant Industry. Bulletin* 189: 1–29. 1910, *The Plants of Southern New Jersey* 358. 1912, *Beih. Bot. Centralbl.* 32(2): 331. 1914, *Rhodora* 20: 49. 1918, *Pflanzenr.*, IV, 43: 173. 1924, *Rhodora* 39: 399, 401. 1937, *Journal of the Elisha Mitchell Scientific Society* 80(2): 172. 1964

(Tubers for child delivery, to ease the pain of childbirth. An alcohol extract of the “root” widely administered as a remedy for colic. Used for bad cramps, gastritis, morning sickness, gallbladder spasms and sometimes asthma spasms; antiinflammatory.)

in English: wild yam, wild yam root

Dioscorea wallichii Hook. f.

India. Fasciculated tubers, yellowish flesh, stout stem prickly-based, leaves subcoriaceous, female axes decurved, brownish capsule, tubers cooked and eaten

See *Fl. Brit. India* [J.D. Hooker] 6(18): 295. 1892 and *Bull. Bot. Survey India* 15: 200. 1973

(Rhizome astringent, antiseptic, cooling, also used for nail-infected finger.)

in China: ying jiang shu yu

in India: kulu, pitalu, rui-nihang, tungam-sanga

Dioscorea wightii Hook. f.

India. Glabrous climbing shrub, male spikes solitary or clustered, female spike usually solitary axillary, winged seeds

See *The Flora of British India* [J.D. Hooker] 6(18): 291. 1892 (Leaves as a poultice on skin diseases.)

Dioscorea zingiberensis C.H. Wright (*Dioscorea henryi* Uline ex Diels, nom. inval.)

China to Vietnam. A twining vine, rigid, glabrous, tuber cylindrical branched, elongated pendulous spikes, along rivers banks, in open forest

See *Bot. Jahrb. Syst.* 29: 261. 1900, *Journal of the Linnean Society, Botany* 36(250): 93–94. 1903, *Acta Phytotaxonomica Sinica* 14: 65–72. 1976

(Tubers cooling.)

in China: dun ye shu yu

in Vietnam: c[ur] m[af]i g[uwf]ng, t[uwf] g[uwf]ng

Dioscoreophyllum Engl. Menispermaceae

From the genus *Dioscorea* and *phyllon* ‘leaf’, see *Die Pflanzenwelt Ost-Afrikas* C: 181–182. 1895, *Bulletin of Miscellaneous Information Kew* 1898: 71. 1898.

Dioscoreophyllum tenerum Engl. (*Dioscoreophyllum cumminsii* (Stapf) Diels; *Dioscoreophyllum cumminsii* var. *lobatum* (C.H. Wright) Troupin; *Dioscoreophyllum klaineianum* Pierre ex Diel; *Dioscoreophyllum lobatum* (C.H. Wright) Diels; *Dioscoreophyllum lobatum* Diels; *Dioscoreophyllum strigosum* Engl.; *Rhopalandria lobatum* C.H. Wright)

Tropical Africa. Twiner, herbaceous, liana, climber, tuber-like roots, yellow flowers with a green dot in the center, chimpanzees eat fruit mesocarp, gorillas eat the leaves and fruits, tuberous root boiled and roasted

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 407, t. XI a, f. 1899 and *Bulletin of Miscellaneous Information Kew* 1901: 119. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie Menisp.*: 179, 181. 1910, *Flora of West Tropical Africa* 1: 71. 1954

(Fruits and leaves tonic, febrifuge.)

in Central African Republic: mola, molla

Diosma L. Rutaceae

Greek *dios* ‘divine’ and *osme* ‘scent’, referring to the fragrant leaves; see Carl Linnaeus, *Species Plantarum* 1: 198. 1753

and *Genera Plantarum* Ed. 5. 92. 1754, *Ordines Naturales Plantarum* 229, 386. 1830.

Diosma oppositifolia L. (*Diosma acicularis* (L.) Salisb.; *Diosma decussata* Lam.; *Diosma oppositifolia* Drege ex C. Presl; *Diosma oppositifolia* Roem. & Schult.; *Diosma succulenta* P.J. Bergius var. *bergiana* Sond.)

South Africa. Aromatic shrub or shrublet, erect, multi-stemmed, densely leafy, small white star-shaped flowers

See *Horti Med. Amstelod.* 1: t. 1. 1697, *Sp. Pl.* 1: 198. 1753, *Descr. Pl. Cap.* 63. 1767, *Prodr. Stirp. Chap. Allerton* 142. 1796, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 5: 457. 1819, *Abh. Königl. Böhm. Ges. Wiss.* ser. 5, 3: 461. 1845, *Botanische Bemerkungen* (C. Presl): 31. Jan–Apr 1846 and *J. S. Afr. Bot.* 40: 276. 1974

(Infusion acrid, bitter.)

in English: bitter buchu

in South Africa: bitterboegoe

Diospyros L. Ebenaceae

Greek *Zeus*, *dios* ‘Zeus, Jupiter, divine’ and *pyros* ‘grain, wheat’; *diospyron* was the ancient name used by Theophrastus (*HP.* 3.13.3) for the fruit of nettle-tree, *Celtis australis*; *diospyros* or *lithospermon* used by Dioscorides and Plinius; see Carl Linnaeus, *Species Plantarum.* 2: 1057–1058. 1753, *Genera Plantarum.* Ed. 5. 478. 1754, *Characteres Generum Plantarum* [second edition] 121. 1775, *Pl. Coromandel* 1: 35. 1795, *Transactions of the Cambridge Philosophical Society* 12: 271. 1873 [A *Monograph of the Ebenaceae* 271, t. Sci.* 7: 413–415. 1912, *Journal of the Arnold Arboretum, Harvard University* 42: 430–435. 1961, *Ann. Missouri Bot. Gard.* 65: 148. 1978, *Fl. Maharashtra* 3A: 175. 2001

(Bark and leaves used against diarrhea, fever and skin diseases, astringent. Unripe fruits inedible, hard, astringent, caustic and bitter, have been used as fish poison.)

in English: black persimmon, black sapote

in Mexico: tliltzapotl (= zapote negro = black zapote), totocuitlatzapotl (= zapote como excremento de pájaro), tzapotl, zapote, zapote negro

Diospyros ebenaster Retz.

Philippines.

See *Observationes Botanicae* 5: 31. 1791 and *Journal of the Arnold Arboretum, Harvard University* 42: 430–435. 1961

(Laxative, vesicant. Bark and leaves made into a blistering plaster. Fishing poison.)

in Mexico: zapote, zapote negro

Diospyros ebenum Koenig (*Diospyros ebenaster* Roxb.; *Diospyros ebenum* Poir.; *Diospyros ebenum* Hiern; *Diospyros ebenum* Koenig; *Diospyros ebenum* Koenig ex Retz.; *Diospyros ebenum* var. *glaberrima* (L.f.) Bakh.; *Diospyros glaberrima* Rottb.; *Diospyros melanoxylon* Willd.; *Diospyros reticulata* Wall.)

India. Tree

See *Physiographiska Sällskapetets Handlingar* 1: 176. 1776, *Physiogr. Salsk. Handl.* i. 176. 1781, *Encycl.* (Lamarck) 5: 429. 1804, *Trans. Camb. Phil. Soc.* xii. (1875) 208. 1875 and *Journ. Arn. Arb.* xliii. 100. 1962

(Used in Sidha and Unani. Root powder with pepper and turmeric given for malaria. Astringent, for itch.)

in English: Ceylon ebony, ebony, macassar ebony

in China: wu mu xie

in India: abanasi, abnus, acca, accacini, accamaram, acha tumbi, akaimam, akaimamaram, avu, ay, bale, bale mara, balemara, bhaale mara, burada abnus, caciya, caciyam, calaki, calam, cali, cenkarunkali, culli, dhumbi dumbi, ebans, eboni mara, ebonis, kaccini, kakatali, kara, kare, kare kunchara, kari, kari mara, karimara, karimaram, karmar, karri, karu, karumkali, karunkali, karuntali, karuttali, karuttalimaram, katuppatati, katuppatatimaram, kolumpu-kakatali, korri, maiyali, maiyalimaram, mallaali, mallali, malluti, mara, may, maykai, mishatumpi, mushtimbi, nalla-valudu, nallati, nallavaludu, nallootee, nallutti, nullavaludu, pallapaimaram, pannamacalam, parampai, parampaimaram, reedi chettu, tai, tailapanitam, tanavana, tendu, thai, thendu, thumiki, tirkkacalam, tuki, tukki, tumaram, tumbi, tumiki, tumki, tumpi, vayasi

in Sri Lanka: kaluwara, karunkalikalumederiya

Diospyros elliptica P.S. Green (*Diospyros elliptica* (J.R. Forst. & G. Forst.) P.S. Green; *Diospyros elliptica* Hort. ex André)

Tonga, Pacific.

See *Rev. Hort.* [Paris]. lix. (1887) 349. 1887 and *Kew Bulletin* 23: 340. 1969

(For abdominal ailments, stomachache.)

Diospyros exculpta Buch.-Ham. (*Diospyros exculpta* Buch.-Ham.; *Diospyros exculpta* Dalzell & Gibson; *Diospyros exculpta* Bedd.)

India.

See *Transactions of the Linnean Society of London* 15(1): 110. 1827, *The Bombay Flora* ... 142. 1861, *The Flora Sylvatica for Southern India* t. 66. 1870 and *Biol. J. Linn. Soc.*, 2: 61–76. 1970

(Used in Ayurveda. Gum powder to stop menstrual cycle. Stem bark paste and juice applied on injuries to stop bleeding, and also for muscular pain. Unripe fruits eaten to relieve cough.)

in India: banda-damara, chitta thumiki, kendu, kondu, tendu, thumbai, tinduka, tinduki, tuki, tumiki

Diospyros fischeri Gürke

Tanzania. Tree or shrub, rough dark brown stem, bark strongly squarely corrugate with some blunt spikes, branches ascending then drooping at ends, corolla white, accrescent calyx and fruit green, calyx pale yellow with white pubescence outside, used to make toothpicks

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 14: 311. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 2, 53: 275–297. 1980

(Leaf for diarrhea. Ulceration and stomatitis after use for teeth cleaning.)

in Tanzania: mdaa, mfuata, mulyulyu

Diospyros gabunensis Gürke (*Diospyros castaneifolia* A. Chev.; *Diospyros castaneifolia* A. Chev.; *Diospyros gilgiana* Gürke; *Diospyros lujae* De Wild.; *Diospyros lujai* De Wild.; *Diospyros mamiacensis* Gürke; *Diospyros megaphylla* Gürke)

Gabon. Small tree, inner bark yellow

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(1): 72. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 205–207, t. 3, K-L. 1909, *Pl. Bequaert.* iii. 547. 1926

(Leaves and inner bark, a lotion for sores, wounds, body ache, pains.)

in Central African Republic: motiwgo

in Madagascar: maintimpo totra beravina

in Tanzania: kabamba, msitu

Diospyros glutinosa J. König ex Roxb.

India.

See *Hort. Bengal.* 40. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 533. 1832

(Used in Ayurveda.)

in India: panichekai, sindica, toombikai

Diospyros graciliflora Hiern

Malaysia.

See *Transactions of the Cambridge Philosophical Society* 12: 191. 1873 and *Bull. Jard. Bot. Buitenzorg* ser. III, xv. 119. 1937

(Roots decoction a postpartum remedy.)

Malay name: ganding hutan

in Malaysia: buah kaki, buah samak

in Thailand: phlap chin

in Vietnam: hông, thi

Diospyros kirkii Hiern (*Diospyros batocana* Hiern; *Diospyros mespiliformis* Hochst. ex A. DC.)

Zimbabwe. Tree or shrub, creamy flowers

See *Prodr.* (DC.) 8: 672. 1844, *Transactions of the Cambridge Philosophical Society* 12: 174, 199. 1873

(Aphrodisiac, analgesic, for abdominal pain; roots mixed with sugar to treat stomach problems in children.)

in Tanzania: mdaa, mtanga, mwakala

Diospyros lancifolia Roxb.

India, Burma. Small tree, grey bark, unisexual flowers, white urn-shaped corolla, orange subglobose fruits, ripe fruits eaten

See *Hort. Bengal.* 93. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 537. 1832, *FBI* 3: 562. 1882

(Leaf infusion a bath for anemic children. Crushed seeds for skin diseases. Seeds and ground fruits as fish poison; bark and seeds as fish poison.)

in India: dieng-soh-leu, dieng sohlen, kodamakha, puja, ruja, rujatong, tezu

in Singapore: kayu arang

Diospyros lotus Linn. (*Diospyros kuroiwai* Nakai; *Diospyros lotus* Blanco; *Diospyros lotus* Lour., nom. illeg.)

China.

See *Species Plantarum* 2: 1057. 1753, *Flora Cochinchinensis* 226. 1790, *Flora de Filipinas* 210. 1837 and *Regnum Veg.* 127: 43. 1993, *Plant Foods Hum. Nutr.* 64(4): 264–270. 2009

(Fruit tonic, antioxidant and antiproliferative, stomachic, stimulant.)

in English: date plum, date plum persimmon

in China: chun ch'ien tzu, hei tsao, juan tsao, jun qian zi, suan tsao, yang shih tsao

in India: amlok, chaut-rau-araung, chhaut-rau-araung

in Japan: shibu, shinano-gaki

Diospyros loureiriana G. Don (*Diospyros loureiriana* G. Don subsp. *loureiriana*; *Diospyros macrocalyx* Klotzsch; *Diospyros usambarensis* F. White; *Royena macrocalyx* (Klotzsch) Gürke)

Mozambique. Dioecious, semi-deciduous shrub or small tree, yellow-white or green-white flowers, inflorescence an axillary cyme, fruits edible

See *A General History of the Dichlamydeous Plants* 4: 39. 1837 and *Kew Bulletin* 1935: 286–292. 1935, *Planta Medica* 38(4): 380–381. 1980, *Planta Medica* 50(3): 279–280. 1984, *Planta Medica* 55(6): 581. 1989

(Dried powdered root bark has fungicidal and molluscicidal properties. Chewed fresh roots and a root extract are applied to snakebites, or the extract is drunk.)

in English: dye diospyros

in Tanzania: mdaa, mdala mweupe

Diospyros lucida Loudon (*Diospyros lucida* Wall.; *Diospyros lucida* Hort. ex Loud.)

SE Asia, Sumatra.

See *Gardeners' magazine*. London n.s., 7: 394. 1841

(Fish poison.)

Diospyros lycioides Desf. subsp. *lycioides* (*Diospyros lycioides* Desf.; *Royena cuneifolia* E. Mey. ex A. DC.; *Royena decidua* Burch.; *Royena lycioides* (Desf.) A. DC.)

South Africa. Shrub or small tree, pale green flowers, brown fleshy fruit, woodland

See *Species Plantarum* 1: 397. 1753, *Annales du muséum national d'histoire naturelle* 6: 448, t. 62, f. 1. 1805 and *Boletim da Sociedade Broteriana*, ser. 2 2, 53: 275–297. 1980

(Leaves produce a severe diarrhea when eaten by sheep. Used for pneumonia, sore throat, painful menstruation, infertility in women, heart pain, as an antidote to snakebite. Magic, a charm to protect from enemies.)

in English: bluebush, monkey-plum, star apple

in South Africa: bloubos, Mtloumana, muthala, swartbas, Umcafudane; umNqandane, umBulwa, wezinja (Zulu); umBongisa, umBhongisa (Xhosa); lehlajwa, lehlajwe, monkga-nku (= smells of sheep) (South Sotho); motlhaje, Lethanyu, lethayu (Western Transvaal, northern Cape, Botswana); mohladyane (North Sotho)

in Zambia: kapatamangulwe, mupichu, mwilima

Diospyros major Bakh. (*Diospyros major* (G. Forst.) Bakh.; *Maba major* G. Forst.)

Indonesia, Pacific.

See *Bulletin du Jardin Botanique de Buitenzorg* III, 15: 429. 1941, *J. Arnold Arbor.* 52 (1971) 394. 1971

(Stomachic.)

Diospyros malabarica (Desr.) Kostel. (*Diospyros embryopteris* Pers.; *Diospyros glutinosa* Koenig ex Roxb.; *Diospyros malabarica* Kostel.; *Diospyros peregrina* Gürke; *Embryopteris glutinifera* Roxb.; *Embryopteris glutinifera* G. Don; *Garcinia malabarica* Desr., Clusiaceae)

SE Asia, India.

See *Species Plantarum* 1: 443. 1753, *Encyclopédie Méthodique, Botanique* 3: 701. 1792, *Allgemeine Medicinisch-Pharmazeutische Flora* 3: 1099. 1834, *Die Natürlichen Pflanzenfamilien* 4(1): 164, f. 87. 1891

(Used in Ayurveda. Fruits and bark used in diarrhea, ulcers, wounds; seed oil in dysentery. Root paste applied on scorpion sting. Veterinary medicine, stem bark decoction mixed with buttermilk given to check diarrhea of goat.)

in English: gaub persimmon, gaub tree, green persimmon, Malabar ebony

in Sri Lanka: kalumederiya, panichchai, timbiri

in Malaya: komoi, kumun

in China: ch'i shih, pei shih

Diospyros maritima Blume (*Diospyros kusanoi* Hayata; *Diospyros liukuensis* Makino)

China, Japan.

See *Bijdragen tot de flora van Nederlandsch Indië* 13: 669. 1826 and *Botanical Magazine* 22(262): 159–160. 1908, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 186. 1911

(The fruit and bark contain an anesthetic substance. Fishing poison.)

in English: sea ebony

in China: hai bian shi

Diospyros melanoxylon Roxb. (*Diospyros dubia* Wall. ex A. DC.; *Diospyros exsculpta* Beddome; *Diospyros melanoxylon* Hassk.; *Diospyros melanoxylon* Hiern; *Diospyros melanoxylon* Willd., nom. illeg.; *Diospyros melanoxylon* Blume, nom. illeg.; *Diospyros melanoxylon* Ces., Pass. & Gibelli; *Diospyros truncata* (Blume) Zoll. & Moritz; *Diospyros wightiana* A. DC.)

India. Deciduous trees, straight, rough black bark, grey or rusty tomentose shoots, unisexual creamy white male flowers in axillary cymes, female flowers solitary and short-peduncled, yellow globose berries, compressed delicious seeds, bark eaten in time of scarcity, ripe fruits edible

See *Species Plantarum* ed. 4 [Willdenow] 4(2): 1109. 1806, *Bijdragen tot de flora van Nederlandsch Indie* 669. 1826, *Systematisches Verzeichnis der zum Herbar Koorders ...* 1: 43. 1854, *Trans. Camb. Phil. Soc.* xii. (1873) 159, partim. 1873, *Comp. Fl. Ital.* [Cesati] 2(18): 403. 1881 and *Taxon* 28: 402–403. 1979, *Journal of Cytology and Genetics* 25: 308–320. 1990

(Used in Ayurveda, Unani and Sidha. Ripe fruits eaten, but it is reported that it causes constipation. Pulp of unripe fruits toxic, astringent, given in dysentery and diarrhea; powdered unripe fruits in the treatment of urinary disorders; fruit pulp along with twigs of *Sarcostemma acidum* pounded and the paste plastered over for bone fracture. Leaves diuretic, stypitic, carminative, laxative; fresh leaves extract given in acute diarrhea; ash from burnt leaves mixed with jaggery given

in cold and cough. Bark astringent, in diarrhea, dyspepsia; pounded bark antiseptic, to cure wounds, cuts. Dried flowers in urinary, skin and blood diseases; flower decoction in scabies. Veterinary medicine, stem bark decoction given to cattle for diarrhea. Magico-religious beliefs, tree considered sacred.)

in English: Coromandel ebony, ebony, persimmon

in India: abanaashi, abanasi, abansi, abnus, aenne, aenne-mara, annathammana mara, balai, bale, bansampa, beedi aaku, beedi aku, beedi elai, beediyela mara, bilara, billaaramara, biri-patta, catukama, catukamaceti, challaane, chirathinjali, damadi, dhuma, dirghapatra ka, dirghapatraka, duparasu, gandu anne mara, gike, googe, googe mara, gora tiril, guggala, jalaja, kaakathemburni, kakabijaka, kakada, kakapiluka, kakasphurja, kakatemburni, kakatindu, kakatinduka, kakavha, kakendu, kakenduka, kallapaini, karai, kari, karumdumbi, karun thumbi, karundumbi, karungali, karunkali, karunthumbi, karuntumpai, karuntumpi, karupputumbi, kend, kendu, kenduka, keuond, khendu, kiu, kulaka, kupilu, makartendua, mallali, manchi tumiki, manchigata, manchighata, mancigata, manjigata, maradenne, nallathumiki, nallatumiki, sakamura, tamrug, tellagada, temru, tend, tenda, tendu, tendu-patta, terel, thaamruja, thellagada, themru, thendu, thimburni, thoobara, thoopra, thumbarashi, thumbi, thumbri, thumida, thumiki, thumki, thummika, thumri, thuniki, tembiri, timbarana, timbarna, timburni, timmurri, timru, tinduka, tinduki, toomida, tuki, tumari, tumbi, tumbili, tumburasu, tumi, tumida, tumiki, tumikka, tumir, tumirmara, tumki, tummada, tummi, tummada, tummika, tummiki, tummikia, tumpili, tumri, tumvuru, tuniki, tunki, tupra

in Sri Lanka: kadumberiya, kalumederiya

Diospyros melanoxylon Roxb. var. ***tupru*** (Buch.-Ham.) V. Singh (*Diospyros tupru* Buch.-Ham.)

India.

See *Transactions of the Linnean Society of London* 15(1): 111. 1827 and *Biol. J. Linn. Soc.*, 2: 61–76. 1970, *Monogr. Ind. Diospyros* 159. 2005

(Bark of this plant with that of *Phyllanthus emblica* made into a paste and given in bloody dysentery. Powdered leaves along with powdered roots of *Gardenia turgida* and *Tephrosia purpurea* for the treatment of gonorrhoea.)

in India: kend, kendu, kendu govh, kendu mara, kenduka, khendu, kiu, tend

Diospyros mespiliformis Hochst. ex DC. (*Diospyros bicolor* H. Winkl., nom. illeg.; *Diospyros bicolor* Klotzsch, non Winkl.; *Diospyros holtzii* Gürke; *Diospyros ibo* Gürke ex De Wild.; *Diospyros kilimandscharica* Gürke; *Diospyros sabiensis* Hiern; *Diospyros senegalensis* Perr. ex A. DC.)

Tropical Africa. Evergreen tree, upright, dense rounded crown, very rough bark dark grey to black with long vertical fissures, shiny dark green leaves alternate oblong-elliptic,

fragrant flowers axillary solitary cream to pale yellow with greyish hairs on the calyx and pedicel, purple fleshy fruit, sweet soft pulp, persistent calyx lobes, hairy seeds, nutritious sweet fruit eaten fresh, a source of bee forage

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 234, 672. 1844, *Naturwissenschaftliche Reise nach Mossambique ...* 184. 1864 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 41: 283. 1908, *Journal of the Linnean Society, Botany* 40: 135. 1911, *Journal of Ethnopharmacology* 4: 75–98. 1981, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 103: 350–356. 2006, *Journal of Ethnopharmacology* 104: 68–78. 2006, *Journal of Ethnopharmacology* 114: 44–53. 2007

(Leaves, roots and bark for fevers, dysentery, skin eruptions. Bark for stomachache. Roots as abortifacient, decoction against internal parasites, worms, leprosy. Root bark decoction for malaria. Roots after being mixed with those of *Asparagus* and honey used to ward off evil spells; roots used in a decoction to drive away spirits. Veterinary medicine.)

in Sri Lanka: kalu kadumberiya, kalumederiya, vellai karunkhali

Diospyros paniculata Dalzell

India.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 109. 1852

(Used in Ayurveda and Sidha. Blood purifier.)

in India: ilakatta, ilakkata, illakatta, kari, karikoomar, karinthuvari, karivella, karunduvarai, karunthovarai, karunthuvrei, karuntuvarai, kuri, tinduka

Diospyros peregrina Gürke (*Diospyros embryopteris* Pers., nom. illeg.)

India. Tree, coriaceous glabrous leaves, unisexual creamy flowers, drooping solitary female flowers, globose yellow edible fruits

See *Encyclopédie Méthodique, Botanique* 3(2): 663–664. 1792, *Synopsis Plantarum* (Persoon) 2(2): 624. 1807, *Fl. Filip.*, ed. 2 [F.M. Blanco] 209. 1845, *FBI* 3: 556. 1882, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(1): 164, f. 87. 1891 and *Food Chem. Toxicol.* 47(10): 2679–2685. 2009

(Used in Sidha. Fruits hypoglycemic and hypolipidemic; fruit made into a paste in goat's milk and given for leucorrhea; fruits infusion as a gargle in sore throat; fruit juice applied on wounds and ulcers; bark and fruits astringent. Bark used in dysentery and fevers. Unripe fruits pounded and their extract astringent, febrifuge, bactericide, employed in treating diarrhea, cholera, dysentery, fevers. Chewing the unripe fruit to cure the blisters in the mouth. Seeds pounded and given in dysentery; seed oil given in diarrhea and dysentery. Juice from young leaves applied on fresh wounds. Leaves as fish poison.)

in India: antina, banda, elosu, etitummika, gab, gabu, gandphanas, gaub, gavandu, hagna, haine, higebanda, holetupare, hulitumri, kakutupare, kala-tendu, kalatendu, karuntali, kattatti, kavikattai, kendu, kendu-araung, kusharta, kusure, maakada kaendi, makad kendu, makad tendu, makadtendu, makar kendu, makda kendu, make-tendu, makurkendi, nilitumiki, nitta tumiki, panachi, panaicai, panaiccai, paniccrai, paniccaikkay, paniccaimaram, paniccakay, paniccankay,

paniccikkay, panichai, panichi, panickeki, pattuppalam, pattuppallam, racha-tumiki, tendu, timbursi, tinduki, tirkakaya, tubiki, tumbi, tumbika, tumiki, tummika, tumpi, tumpika, tumpikarumpu, tumpikkay, tumpilikkay, tumpimaram, tuvarai, vananji

Diospyros philippensis (Desr.) Gürke (*Cavanillea philippensis* Desr., nom. rej. prop. against *Diospyros discolor* Willd.; *Diospyros blancoi* A. DC.; *Diospyros discolor* Willd.; *Diospyros embryopteris* Pers., nom. illeg. superfl.; *Diospyros utilis* Hemsl.)

SE Asia, Malaysia. Tree, drooping branchlets, dense foliage, creamy white fragrant flowers, fruit flesh reddish with a rather sickly odour, fruits edible after removing stiff hairs and skin but do not taste good, often as *Diospyros inconstans* Jacq. or *Diospyros blancoi* A. DC.

See *Species Plantarum* 2: 1057–1058. 1753, *Ueber einige künstliche Geschlechter aus der Malvenfamilie, denn der Klasse der Monadelphien*. 19. 1787, *Encyclopédie Méthodique, Botanique* 3(2): 663–664. 1792, *Species Plantarum*. Editio quarta 4(2): 1108–1109. 1806, *Syn. Pl.* 2: 624. 1807, *Die Natürlichen Pflanzenfamilien* 4(1): 164. 1891, *Annals of Botany. Oxford* 9(33): 154. 1895 and *Journal of the Japanese Society for Horticultural Science* 59: 289–297. 1990, *Journal of the Japanese Society for Horticultural Science* 67: 306–312. 1998, *Taxon* 51: 579–580. 2002

(Used in Ayurveda, Unani and Sidha. Leaves heated and squeezed with those of *Plectranthus amboinicus* good for chest colds; young leaves decoction for hypertension, heart ailments and diabetes. Fruits or juice of stem and bark given for squeezing the uterus and causing abortion.)

in English: butter fruit, velvet apple

in China: yi se shi

in India: abnuse-hindi, antina, banda, bandada, bandadamarara, bantha, buntha, elosu, erutumiki, etitummika, gab, gabu, haine, hige, higebanda, higebantha, higeibuntha, holletupare, holletupra, holletupara, holletupra, kakadhupada, kakutupare, kala tendu, kalaskanda, kusharada, kusharta, kusure, makarkanda, muttiatumiki, nirutumiki, nititumiki, nititunika, nittatummi, nitutumilka, olletupra, panacci, paniccakkay, paniccha, panicci, panich-chi, panicha, panichi, panitsjika, sindika, spurjaka, taindu, tapasi, tappasi, tembiri, temburani, tendu, thumblik kay, thuniki, thunki, timar, tinduka, tindukah, tindukaha, tinduki, tubare, tubiki, tubuki, tumaki, tumbilik-kay, tumburu, tumika, tumiki, tumikichettu, tumil, tummi, tummika, tumpi, tumpi maram, tumpilikkay, tumika, tupare, tuvare, vananchi, vananchikka-maram, vananci, virala

in Japan: ke-gaki

Malayan names: buah coklat, buah mentega, buah sakhlat, buah saklat

in Sri Lanka: kalumederiya

Diospyros physocalycina Gürke (*Diospyros xanthochlamys* Gürke; *Heisteria winkleri* Engl., Olacaceae)

Cameroon. Shrub or small tree, very similar to *Diospyros canaliculata*

See *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 4: 20. 1760, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 68. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 169, 210. 1909

(Very poisonous. Hunting and fishing poison.)

in Cameroon: mboboa, mboloa

in Nigeria: olubaza, oribaza, orobeje

Diospyros rufa King & Gamble (*Diospyros labillardierei* F. White; *Diospyros rufa* (Labill.) Fosberg; *Maba rufa* Labill.)

SE Asia. Tree, pinkish red inner bark, calyx saucer-shaped, rounded finely hairy fruit

See *Sertum Austro-Caledonicum* 1: 33, t. 36. 1824 and *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 74(1): 228. 1906 [1905 publ. 4 Jan 1906], *Bulletin of the Torrey Botanical Club* 1938, lxxv. 613. 1939, *Bulletin du Muséum National d'Histoire Naturelle*, séries 4, Section B, *Adansonia. Botanique Phytochimie* 14(2): 185. 1992[1993].

(Fishing poison.)

Diospyros samoensis A. Gray

Pacific.

See *Proceedings of the American Academy of Arts and Sciences* 5: 326. 1861

(Vesicant, astringent, for hypertension.)

Samoan name: 'au'auli

Diospyros scabra (Chiov.) Cufod. (*Maba scabra* Chiov.)

Africa. Kenya. Edible fruit but rarely eaten

See *Webbia* 8: 237. 1951, *Bulletin du Jardin Botanique de l'État* 30(suppl.): 668. 1960

(Boiled bark infusion against women's stomach complaints, diuretic. Veterinary medicine, antibacterial, vermifuge, ground bark applied to wounds to stop maggot infestation. Sacred tree. Magic, ritual, boiled bark infusion to wash people made ill by witching; leaves used in exorcism.)

in Kenya: eelim, tuwot

Diospyros subrhoidea King & Gamble

SE Asia.

See *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 74(1): 209. 1906 [1905 publ. 4 Jan 1906]

(Fishing poison.)

Diospyros tomentosa Roxb. (*Diospyros tomentosa* Poir.)

India. Tree, ripe fruits eaten

See *Encyclopédie Méthodique, Botanique* (Lamarck) 5: 436. 1804 [9 Jan 1804], *Flora Indica*; or, descriptions of Indian Plants 2: 532. 1832

(Used in Ayurveda and Sidha. Stomachic, astringent, febrifuge, for bronchitis, pneumonia, cholera, colic, cough, diarrhea, dysentery.)

in India: bandadamra, chilta-tumiki, chittatumiki, cittatumiki, gaab, hulda, kakatinduka, kakatintu, kakinduka, kend, keond, khendu, kimburini, kinu, kulakam, manchithumiki, mancitumiki, pasaraghata, pasarugata, pesaraghata, tendu, teral, terel, thoosra, thumari, thumbai, thumri, timburani, tindura, tintikam, tintukam, tintukanka, tintukim, tuki, tumal, tumari, tumiki, tumma, tumpai, tumpi, tunki, virala

in Tibet: tim tu ka

Diospyros toposia Buch.-Ham.

India.

See *Transactions of the Linnean Society of London* 15(1): 115. 1827 and *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 74(1): 223. 1906 [1905 publ. 4 Jan 1906], *Biol. J. Linn. Soc.*, 2: 61–76. 1970, *Thai Forest Bull., Bot.*, 11: 36. 1978, *Fl. Thailand* 2(4): 317. 1981

(Fruits said to be fish poison.)

in India: bolgisim, dieng sohseit lankait, karunthovarai, thing-bong, thing bong, toposia

Diospyros toposioides King & Gamble (*Diospyros toposia* Buch.-Ham. var. *toposioides* (King & Gamble) Phengklai)

SE Asia.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 74(1): 223. 1906 [1905 publ. 4 Jan 1906], *Thai Forest Bulletin. Botany* 11: 36. 1978, *Fl. Thailand* 2(4): 317. 1981

(Fishing poison, fruits said to be very poisonous to fish.)

Malayan name: tuba buah

Diospyros undulata Wall. ex G. Don (*Diospyros undulata* Wall. & G. Don; *Diospyros undulata* Wall.; *Diospyros undulata* Hiern)

India, Burma. Small tree, globose fruit with woody calyx

See *A General History of the Dichlamydeous Plants* 4: 40. 1837, *Trans. Camb. Phil. Soc.* xii. (1873) 215. 1873

(Diuretic, laxative, leaf decoction given in fever. Paste of leaves warmed and applied in back pain.)

in India: lintoh

Diospyros villosa (L.) De Winter (*Royena villosa* L.)

South Africa.

See *Species Plantarum* 1: 397. 1753, *Systema Naturae*, ed. 12 2: 302. 1767 and *Bothalia* 7: 458. 1961

(Root for dropsy, stomach and intestinal complaints. Root-bark for broken limbs and sprains.)

in English: hairy star-apple, shaggy diospyros

in Southern Africa: harige sterappel; inDodemnyama (= black man), inDodennyama, uMbishimbishi, umBongisa, umNqandane wesempisi, umNqandane wezimpisi (Zulu)

Diospyros virginiana L. (*Diospyros mosieri* Small; *Diospyros virginiana* L. var. *mosieri* (Small) Sarg.; *Diospyros virginiana* L. var. *platycarpa* Sarg.; *Diospyros virginiana* L. var. *pubescens* (Pursh) Dippel; *Diospyros virginiana* var. *pubescens* Nutt.; *Diospyros virginiana* L. var. *virginiana*)

North America. Tree, deciduous, dioecious, somewhat variable species, simple alternate leaves, flowers restricted to the axils of basal foliage leaves on the new growth, female flowers large and solitary, several-seeded berry with a somewhat leathery skin

See *Species Plantarum* 2: 1057–1058. 1753, *Synopsis Plantarum* 2: 625. 1807, *Flora Americae Septentrionalis*; or, ... 1: 265. 1814[1813], *The North American Sylva* 2: 46. 1849, *Handbuch der Laubholzkunde* 1: 306. 1889 and *Journal of the Arnold Arboretum* 2(3): 168–170. 1921, *Journal of the New York Botanical Garden* 22(254): 33. 1921

(Astringent, for stones, piles, venereal diseases, sore throat and mouth, toothache; bark chewed for heartburn.)

in English: American persimmon, common persimmon, date plum, persimmon, plaqueminer, possum-apple, possum-wood, seeded plum, winter plum

Diospyros wallichii King & Gamble (*Diospyros wallichii* King & Gamble ex Williams)

Malaysia. Trees, smooth bole, velvety hairy globose fruit

See *Bulletin de l'Herbier Boissier* II, 5: 429. 1905

(For yaws, dermatosis, applied as a poultice. Fishing poison.)

Malay name: daun tuba

Diospyros whyteana (Hiern) F. White (*Diospyros fischeri* Gürke; *Royena goetzei* Guerke; *Royena lucida* L.; *Royena lucida* var. *whyteana* (Hiern) de Winter & Brenan; *Royena nyassae* Guerke; *Royena whyteana* Hiern; *Royena wilmsii* Guerke) (after the British plant explorer Alexander Whyte, 1834–1908 (d. High Barnet, Herts), plant collector in Liberia, in 1891 to British Central Africa, author of *The Plants of Milanji, Nyasa-Land* ... London 1894 [in *Linnean Society. Transactions*. 2nd ser. *Botany*. vol. IV, pt. 1], in 1894 Fellow of the Linnean Society, 1898 Curator of the Botanic Garden of Uganda. See also O. Stapf, *J. Linn. Soc.* 37: 79–115. 1905, I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815–1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916, F.N. Hepper, “Botanical collectors in West Africa, except French territories, since 1860.” in *Comptes Rendus de l'Association pour l'étude taxonomique*

de la flore d'Afrique, (A.E.T.F.A.T.). 69–75. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 85. 1971.)

South Africa, Tanzania. Tree, evergreen shrub or small multi-stemmed tree, straggling, straight, dark green leathery glossy leaves, male and female flowers occur on different trees, creamy fragrant bell-shaped flowers, fleshy scarlet berries enclosed in inflated bladder-like capsules, gelatinous seeds, leaves browsed by stock and game

See *Transactions of the Linnean Society of London, Botany* 4: 25. 1894 and *Memoirs of the New York Botanical Garden* 8: 499. 1954, *Bothalia* 7: 458. 1961, *Veld & Flora* 70(1): 28. 1984

(A leaf and root infusion to treat rashes. Bark extracts given for treating menstrual pain, impotency and infertility.)

in English: African bladder-nut, blackbark, bladder-nut, bladder-nut, Cape blackwood, Hottentots' cherry, wild coffee

in Southern Africa: bostolbos, kraaibessie, Mohlatsane, Munyavhili, swartbas, mwanda (Venda); muKaza, Nyatswipa, muShanguru (Shona); uManzimane, umTimatane, umNqandane, umKhaze (Zulu); umKhaza, umTenatane, inTsanzi-mane (Xhosa)

in Tanzania: kitonga, litonga, mdaha, mnyakifu, msisina, muhekere

Diospyros zombensis (B.L. Burtt) F. White (*Dovyalis xanthocarpa* Bullock, Salicaceae; *Euclea divinorum* Hiern; *Royena zombensis* B.L. Burtt)

Malawi. Small tree or shrub, yellow latex, creamy flowers

See *Transactions of the Cambridge Philosophical Society* 12: 99. 1873 and *Bulletin of Miscellaneous Information Kew* 1935: 289. 1935, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 469. 1936, *Bulletin du Jardin Botanique de l'État* 33: 366. 1963

(For schistosomiasis.)

in Tanzania: mdawa, nyakatitu-mdaa

Diotacanthus Benth. Acanthaceae

Greek *di* 'two', *ous*, *otos* 'an ear' and *Acanthus*, referring to the lipped corolla limb, see *Genera Plantarum* 2(2): 1100. 1876.

Diotacanthus albiflorus Benth.

India.

See *Gen. Pl.* [Bentham & Hooker f.] 2(2): 1101. 1876

(Paste of leaves applied to treat wounds and heel cracks.)

in India: kodi-urinchi

Dipcadi Medikus Asparagaceae (Hyacinthaceae, Liliaceae)

Oriental name, probably Turkish, for a species of *Muscari*, see *Notul. Syst.* (Paris) 5: 17–72. 1935, *Fl. Madagasc.* 40: 1–139. 1937, *Cat. Pl. Madag., Liliac.* 2(26): 7–29. 1939.

Dipcadi cowanii (Ridl.) H. Perrier (*Drimia cowanii* Ridl.; *Idothea cowanii* (Ridl.) Kuntze; *Ornithogalum cowanii* (Ridl.) J.C. Manning & Goldblatt)

Madagascar.

See *Journal of the Linnean Society, Botany* 20: 334. 1883, *Revisio Generum Plantarum* 2: 712. 1891 and *Notul. Syst.* (Paris) 5(1): 63. 1935, *Edinburgh Journal of Botany* 60: 551. 2003 (publ. 2004)

(Raticide.)

Dipcadi erythraeum Webb & Berthel. (*Dipcadi unicolor* (Stocks) Baker; *Dipcadi unicolor* Baker; *Ornithogalum erythraeum* (Webb & Berthel.) J.C. Manning & Goldblatt; *Uropetalon erythraeum* (Webb & Berthel.) Boiss.; *Uropetalon unicolor* Stocks; *Uropetalum unicolor* Stocks)

India, Pakistan.

See *Hist. Nat. Îles Canaries* (Phytogr.). 2(3): 341. 1848, *Hooker's J. Bot. Kew Gard. Misc.* 4: 180. 1852, *Journal of the Linnean Society, Botany* 11: 397. 1870 [1871 publ. 1870], *Flora Orientalis* 5: 286. 1882 and *J. Cytol. Genet.* 29(1): 89–93. 1994, *Edinburgh Journal of Botany* 60(3): 551. 2003 (publ. 2004)

(Expectorant, for coughs.)

Dipcadi glaucum (Burch. ex Ker Gawl.) Baker (*Dipcadi glaucum* (Ker Gawl.) Bak.; *Dipcadi longibracteatum* Schinz; *Dipcadi gracilipes* K. Krause; *Dipcadi longibracteatum* Schinz; *Dipcadi magnum* Baker; *Lachenalia speciosa* F. Dietr.; *Uropetalon glaucum* Burch. ex Ker Gawl.)

S. Africa. Bulbous, perennial herb, linear leaves, head of white flowers, on the Kalahari sands

See *Historia et Commentationes Academiae Electoralis Scientiarum et Elegantiorum Literarum Theodoro-Palatinae* 6: 431. 1790, *J. Linn. Soc., Bot.* 11: 401. 1870, *Verh. Bot. Vereins Prov. Brandenburg* 31: 218. 1890, *Fl. Trop. Afr.* 7: 522. 1898 and *Bot. Jahrb. Syst.* 48: 357. 1912

(Bulb poisonous to animals.)

in English: poison onion, wild onion

in South Africa: dronk-ui, dronkui, gif dronkui, gif-ui, groenlelie, grootmalkopui, malkop-ui, malkopui, slangkop, wilde-ui

Dipcadi marlothii Engl. (*Dipcadi bakerianum* Schinz, nom. illeg.; *Dipcadi durandianum* Schinz; *Dipcadi ernesti-ruschii* Dinter; *Dipcadi oligotrichum* Baker; *Dipcadi polyphyllum*

Baker; *Ornithogalum durandianum* (Schinz) J.C. Manning & Goldblatt)

South Africa.

See *Bot. Jahrb. Syst.* 10: 3. 1889, *Verh. Bot. Vereins Prov. Brandenburg* 31: 217. 1890, *Consp. Fl. Afric.* 5: 374. 1894, *Fl. Cap.* 6: 446. 1897 and *Bull. Herb. Boissier*, II, 4: 1000. 1904, *Repert. Spec. Nov. Regni Veg.* 19: 185. 1923, *Edinburgh Journal of Botany* 60(3): 551. 2003 (publ. 2004)

(For gonorrhoea. Magic, a charm.)

in Southern Africa: dronkui, klein malkopui; morotoana-phookoana (Sotho)

Dipcadi montanum (Dalzell) Baker var. ***madrasicum*** (E. Barnes & C.E.C. Fisch.) Deb & S. Dasgupta (*Dipcadi madrasicum* E. Barnes & C.E.C. Fisch.; *Ornithogalum turbinatum* (Dalzell) J.C. Manning & Goldblatt var. *madrasicum* (E. Barnes & C.E.C. Fisch.) J.C. Manning & Goldblatt)

India.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 142. 1850, *Journal of the Linnean Society, Botany* 11: 398. 1898 and *Bulletin of Miscellaneous Information Kew* 1940: 301. 1940, *J. Bombay Nat. Hist. Soc.* 75: 59. 1978, *Edinburgh Journal of Botany* 60: 552. 2003 (publ. 2004)

(Bulbs for cooling.)

Diphylleia Michaux Berberidaceae

From the Greek *dis*, *di* 'double, two' and *phyllon* 'leaf', referring to the leaves on the stems or to the deeply bilobed leaves, see *Flora Boreali-Americana* 1: 203, pl. 19–20. 1803, *Natürliches System des Pflanzenreichs* 328. 1832.

Diphylleia cymosa Michx.

North America. Perennial herb

See *Flora Boreali-Americana* 1: 203, pl. 19–20. 1803

(Diuretic, disinfectant, antiseptic, antibacterial, diaphoretic, febrifuge, for smallpox.)

in English: American umbrella leaf

Diphysa Jacq. Fabaceae (Leguminosae, Robinieae)

From the Greek *dis*, *di* 'double, two' and *physa* 'bladder', referring to the fruits, see *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 7, 28. 1760 and *N. Amer. Fl.* 24(4): 201–250. 1924, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18 (2): 487–559. 1937, *Fieldiana, Bot.* 24(5): 1–425. 1946, *Cuscatlania* 1 (2): 1–16. 1979, *Brenesia* 18: 15–90. 1980, *Ann. Missouri Bot. Gard.* 67(3): 523–818. 1980, *Listados Florísticos de Mexico* 1: 47–61. 1983, *Listados Florísticos de Mexico* 4: 90–112. 1986, *Flora Novo-Galiciana* 5: 1–786. 1987, *Ann. Missouri Bot. Gard.* 77(3): 573–577. 1990,

Harvard Pap. Bot. 7(2): 381–398. 2003, *Ceiba* 44(2): 105–268. 2003 [2005].

Diphysa americana (Mill.) M. Sousa (*Colutea americana* Mill.; *Diphysa carthagenensis* Benth. & Oerst.; *Diphysa carthagenensis* Benth. ex Benth. & Oerst., in part, not *Diphysa carthagenensis* Jacq.; *Diphysa humilis* Oerst. ex Benth. & Oerst.; *Diphysa humilis* Oerst.; *Diphysa robinoides* Benth.; *Diphysa robinoides* Benth. & Oerst.)

South America, Mexico. Perennial non-climbing tree

See *The Gardeners Dictionary: ... eighth edition no. 5.* 1768, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853: 13. 1853, *Publications of the Field Columbian Museum, Botanical Series* 1: 367. 1898 and *Annals of the Missouri Botanical Garden* 77(3): 576. 1990

(For ulcers, skin diseases, wounds.)

Vernacular names: canquixté, guachipil, guachipilin, macano, much, palo amarillo, susuc, zuzoc

Diphysa suberosa S. Watson

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 22: 405. 1887

(Expectorant, for catarrh.)

Diplazium Swartz Woodsiaceae (Aspleniaceae, Dryopteridaceae)

Greek *diplosios* 'double', indusia linear and few to many of them are in pairs; see [Edited by Heinrich Adolph Schrader], *Journal für die Botanik.* 2: 4, 61. (Oct.-Dec.) 1801, *Voyage dans les Quatre Principales Îles des Mers d'Afrique* 1: 282–283. 1804, *Prodromus Florae Novae Hollandiae* 149. 1810, *Plantae Asiaticae Rariores* 1: 44–45. 1830, *Tentamen Pteridographiae* 115–117, pl. 4, f. 6, 13, 18. 1836, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 177. 1841, *Linnaea* 20: 358. 1847, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 6: 450–451, 453–454. 1851 and *Botanical Magazine* 42(499): 343–345. 1928, *Acta Phytotaxonomica Sinica* 9(1): 57–59, 73–74. 1964, *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Botanica Yunnanica* 16(2): 127. 1994.

Diplazium asperum Blume (*Allantodia aspera* (Blume) Ching; *Athyrium asperum* (Blume) Milde; *Microstegia aspera* (Blume) C. Presl)

India, Indonesia.

See *Enumeratio Plantarum Javae* fasc. 2: 195. 1828, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 6: 452. 1851, *Botanische Zeitung* (Berlin) 28: 353. 1870 and *Acta Phytotaxonomica Sinica* 9(1): 54. 1964

(Ceremonial, used in worship.)

in Indonesia: paku danum

Diplazium esculentum (Retzius) Swartz (*Anisogonium esculentum* (Retz.) C. Presl; *Anisogonium esculentum* C. Presl; *Anisogonium serampurens* C. Presl; *Anisogonium serampurens* C. Ferns Brit. India* 192, t. 94. 1883 and *Philippine Journal of Science* C 3(5): 295. 1908

(Fronds infusion antimalarial, used in earache, toothache, jaundice and constipation, used by pregnant women as a protection during delivery; fronds juice given in malaria; young fronds paste applied to treat scabies, boils, and on skin infection of infants. Leaves decoction rubbed into sores and used to treat yaws, to cool fever, and also in childbirth. Leaves decoction as a postpartum remedy. Rhizome anthelmintic, insect and pest repellent, a paste taken in fever, asthma, cough, stomachache, dysentery, diarrhea, nose bleeding. Magic, ceremonial, ritual, leaf juice used for criminal sorcery.)

in English: vegetable fern

in India: dung-kek, kari-welli-panna-maravara, kasrot, kukari sag, mairungshai, para-panna-maravara

in Japan: kuware-shida (= edible fern)

Malay names: paku, paku tanjong

in Nepal: pani nyuro, piraunli

in Papua New Guinea: sigogo

in Philippines: pako

in Thailand: kut-kin

Diplazium polypodioides Bedd.

India.

See *The Ferns of Southern India* 54, pl. 163. 1863

(Cooked leaves eaten as a remedy for piles.)

in India: tsiekhruqa

Diplazium stoliczkae Bedd. (*Allantodia stoliczkae* (Bedd.) Ching; *Asplenium stoliczkae* (Bedd.) C.B. Clarke; *Asplenium stoliczkae* C.B. Clarke)

China. Young fronds eaten as vegetable

See *A Supplement to the Handbook of the Ferns of British India* 13, t. 361. 1876, *Transactions of the Linnean Society of London, Botany* 1(8): 500. 1880 and *Acta Phytotaxonomica Sinica* 9(1): 52. 1964

(Rhizome antibacterial, a paste applied on boils.)

in Nepal: kalo nyuro

Diploclisia Miers Menispermaceae

From the Greek *diploos* 'double' and *kleis* 'lock, key, bar', referring to the double calyx, see *Flora Aegyptiaco-Arabica* 171. 1775, *Regni Vegetabilis Systema Naturale* 1: 511, 515–531. 1818[1817], *Annals and Magazine of Natural History* ser. 2, 7(37): 37, 42. 1851 [Jan 1851].

Diploclisia glaucescens (Blume) Diels (*Cebatha macrocarpa* (Wight & Arn.) Kuntze; *Cocculus glaucescens* Blume; *Cocculus kunstleri* King; *Cocculus macrocarpus* Wright; *Cocculus macrocarpus* Wight & Arn.; *Diploclisia glaucescens* Diels; *Diploclisia glaucescens* var. *kunstleri* (King) A. Pramanik & Thoth.; *Diploclisia kunstleri* Diels; *Diploclisia kunstleri* (King) Diels; *Diploclisia macrocarpa* Miers; *Diploclisia macrocarpa* (Wright) Miers; *Diploclisia macrocarpa* (Wight & Arn.) Miers)

India.

See *Bijdragen tot de flora van Nederlandsch Indië* 25. 1825, *Prodr. Fl. Ind. Orient.* 1: 13. 1834, *Annals and Magazine of Natural History*, ser. 2 7(37): 42. 1851, *Journal of the Asiatic Society of Bengal* 58(2): 384. 1889, *Revisio Generum Plantarum* 1: 9. 1891 and *Das Pflanzenreich* (Engler) Menispermac. 46(IV.94): 225, 227. 1910, *Kew Bulletin* 42(3): 705. 1987

(Used in Sidha. Liver ailments.)

in China: cang bai cheng gou feng

in India: batta-valli, kottaiyacaci, kottaiyachachi, kottaiyakaci, natsjatam, ravnito, vatoli

Diplocyclos (Endl.) T. Post & Kuntze Cucurbitaceae

From the Greek *diploos* 'double' and *kyklos* 'a circle, ring', possibly alluding to the tendrils; see *Prodromus Florae Norfolkicae* 1: 68. 1833 and Tomas Erik von Post and C.E.O. Kuntze, *Lexicon generum Phanerogamarum*. 178. (Dec.) 1903, *Journal of Cytology and Genetics* 31(1): 65–71. 1996.

Diplocyclos palmatus (L.) C. Jeffrey (*Bryonia affinis* Endl.; *Bryonia laciniosa* hort.; *Bryonia laciniosa* L.; *Bryonia palmata* L.; *Bryonopsis affinis* (Endl.) Cogn.; *Bryonopsis affinis* Cogn.; *Bryonopsis laciniosa* (L.) Naud.; *Bryonopsis laciniosa* Naudin; *Bryonopsis laciniosa* var. *erythrocarpa* Naudin; *Bryonopsis laciniosa* var. *erythrocarpa* (F. Muell.) Naudin; *Bryonopsis laciniosa* var. *walkeri* Chakrav.; *Diplocyclos palmatus* subsp. *affinis* (Endl.) P.S. Green; *Ilocania pedata* Merr.)

China. Climber, herbs, glabrous, greenish yellow flowers in axillary fascicles, globose fruits red striped with white, tender leaves used as vegetable

See *Species Plantarum* 2: 1012. 1753, *Prodromus Florae Norfolkicae* 68. 1833, *L'illustration horticole* 12: t. 431. 1865, *Ann. Sci. Nat., Bot. sér.* 5, 6: 30. 1866, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 479. 1881 and *Philippine Journal of Science* 13(1): 65–66. 1918, *Records of the Botanical Survey of India* 17(1): 138–139. 1959, *Kew Bulletin* 15(3): 352. 1962, *Kew Bulletin* 45: 238. 1990

(Used in Ayurveda. Plant decoction applied to cure burns, also given for gastric disorders; tender twigs fried with onion and eaten by women with waist pain. Leaf paste for rheumatism, liver ailments, constipation; leaves juice taken for stomachache; leaves decoction taken for rheumatism; leaves fried in coconut oil and eaten for respiratory troubles; leaves tied on wounds to reduce inflammation. Seeds to prevent miscarriage and ensure conception; crushed seeds of *Diplocyclos palmatus* and ash of *Striga orobanchoides* mixed in jaggery and given during pregnancy for birth of a male child. Seeds and roots decoction to induce menses in girls and for fertility in women; root paste given to get rid of neck pain and spondylitis. Fruits and seeds for gonorrhoea, cold, fever; fried fruits mixed with milk eaten to reduce fever and as blood purifier. Contact therapy, root tied to the waist of a woman for smooth delivery. Beliefs, magic, ceremonial, ritual, leafy twigs used in worshipping.)

in English: striped cucumber

in India: aiviralikkova, aiviralkkovai, akilaykum (ahilekhana, marked like a snake), angathonde balli, apastambhini, bahu-patra, bakapushpa, beej shivalingi, bonkakra, chandra, chitraphala, choorale cheppu, devi, ishwari, isvaralingi, iyveli,

iyvirali, kahubotke, kaudia, kavdoli, kattu kovai, linga donda, linga konde balli, linga thonde balli, linga tonde balli, lingadonda, lingadonde, lingadunde soppu, lingaja, lingasambhuta, lingi, lingini, maaningana balli, mahaalingana balli, mala, nehoemeka, neyyunni, neyyuruni, panchaguriya, pandoli, put loguli, putakkaya, shaivamallika, shiva lingi, shivaja, shivalingi, shivavalli, shivilabeej, shivling, shivling beej, shivlinga, shivlinge, shivlingi, shivlingi beej, siblingi, sivalingakkay, sivalingakkaya, sivalingi, sivavalli, svayambhu, tutthini, vanna choora kodi, vanna chooram kodi, vannachore kodi, varu kurali

in Japan: Okinawa-suzume-uri

in Nepal: ghurmi lahara, ghuru

Diploknema Pierre Sapotaceae

From the Greek *diploos* 'double' and *kneme* 'limb, leg, knee, an internode', see *Archives Néerlandaises des Sciences Exactes et Naturelles* 19: 103–104. 1884, *Notes Botaniques Sapotacees* 2. 1890.

Diploknema butyracea (Roxb.) H.J. Lam (*Aesandra butyracea* (Roxb.) Baehni; *Aisandra butyracea* (Roxb.) Baehni; *Bassia butyracea* Roxb.; *Illipe butyracea* (Roxb.) Engl.; *Madhuca butyracea* (Roxb.) J.F. Macbr.; *Mixandra butyracea* (Roxb.) Pierre; *Mixandra butyracea* (Roxb.) Pierre ex Dubard; *Mixandra butyracea* (Roxb.) Pierre ex L. Planch.; *Vidoricum butyraceum* (Roxb.) Kuntze) (*Aisandra*, from the Greek *aisos*, *anisos* 'unlike, uncertain, uneven' and the termination *-andra* (perhaps from the name *Isonandra* Wight, Sapotaceae), referring to the fruit.)

India, Himalaya, Tibet, Nepal. Leaves obovate or obovate-oblong, ripe fruit edible, leaves as fodder, flowers yield honey, scarcity food

See *Genera Plantarum* 151. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 773, 799. 1791, *Asiatic Researches* 8: 477. 1808, *Archives Néerlandaises des Sciences Exactes et Naturelles* 19: 104. 1884, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 12(3–4): 509. 1890, *Revisio Generum Plantarum* 2: 407. 1891 and *Revue Générale de Botanique* 20: 196. 1908, *Contributions from the Gray Herbarium of Harvard University* 53: 18. 1918, *Bulletin du Jardin Botanique de Buitenzorg*, ser. 3, 7: 186. 1925, *Kew Bulletin* 16: 460. 1963, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 11: 29. 1965, *Fl. Pl. India, Nepal & Bhutan* 277. 1990, *Ethnobotanical Leaflets* 10: 330–337. 2006

(Astringent, stimulant, emollient, demulcent, nutritive, cooling, aphrodisiac, galactagogue, expectorant, carminative. Bark useful in the treatment of rheumatism, ulcers, itches, bleeding and spongy gums, leprosy and diabetes; bark powder taken to improve digestion and to cure constipation; bark juice for indigestion; bark decoction anthelmintic. Fruit used

for bronchitis and diseases of the blood. Seeds galactagogue; seeds oil applied to treat boils, burn, rheumatism and pimples; ointment from the fat applied in rheumatic pains; butter from the seeds used in rheumatism, cracked heels and hands, as a wound healer. Bark piscicidal; seed cake as a fish poison, rodenticide, insecticide and rodent repellent.)

in English: Indian butter tree, phulwara butter, Tibet diploknema

in China: zang lan

in India: bhalel, bhulel, cheuli, cheura, chiura, churii, chyuri, frelwa, gophal, kuthar (the wood), madhuka, madhupushpa, pahari mahua, phalwara, phulwara, phulwa, phulwara, yel, yel-kung, yelpote

in Lepcha: yel paot

in Nepal: chiuree, chiuri, chyuri, signmar

Diplophium Turcz. Apiaceae (Umbelliferae)

From the Greek *diploos* 'double' and *lophos* 'a crest, plume'.

Diplophium diplophioides (H. Wolff) Jacq.-Fél. (*Cachrys abyssinica* Hochst. ex A. Rich., nom. illeg.; *Diplophium abyssinicum* (Hochst. ex A. Rich.) Benth.; *Diplophium abyssinicum* Benth. & Hook.; *Diplophium africanum* auct.; *Diplophium africanum* Turcz.; *Diplophium africanum* Turcz. forma *kankanense* P. Jaeger & Schnell; *Diplophium tisserantii* Norman; *Physotrichia diplophioides* H. Wolff)

East Africa, Ethiopia. Aromatic herb, long tapering tap root, large leaves finely divided, flowers white or greenish-yellow

See *Species Plantarum* 1: 246. 1753, *Bulletin de la Société Impériale des Naturalistes de Moscou* 20(1): 173. 1847, *Tentamen Florae Abyssinicae ...* 1: 333. 1848, *Genera Plantarum* 1: 900. 1867 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 230. 1922, *Journal of Ethnopharmacology* 111: 271–283. 2007

(Suspected of poisoning stock, the plant can cause death of cattle and sheep. Leaves infusion for stomachache. Magic, ritual, hallucination.)

in East Africa: kirondet, muperri, muraria

in Kenya: omunya

Diplopanax Hand.-Mazz. Cornaceae

From the Greek *diploos* 'double' and *Panax*, see *Species Plantarum* 1: 117–118. 1753 and *Sinensia* 3(8): 197–198. 1933.

Diplopanax stachyanthus Handel-Mazzetti

China, Vietnam. Tree, yellow fragrant flowers

See Hoo Gin & Tseng Chang-jiang. *Diplopanax*. In: Hoo Gin & Tseng Chang-jiang, eds., *Fl. Reipubl. Popularis Sin.* 54:

135–136. 1978, Soong Tzepu. *Mastixia*. In: Fang Wenpei & Hu Wenkuang, eds., *Fl. Reipubl. Popularis Sin.* 56: 2–5. 1990 (Stimulant.)

in China: ma ti shen

Diplopterys A. Juss. Malpighiaceae

From the Greek *diploos* 'double' and *pteryx*, *pterygos* 'a wing, feathery foliage', see *Icones Selectae Plantarum* 3: 20, pl. 33. 1837, *Linnaea* 22: 7. 1849 and *Arbeiten aus dem Botanischen Institut des Königl. Lyceums Hosianum in Braunsberg* 4: 17. 1912, *Das Pflanzenreich* IV. 141: 230. 1928, *Fl. Neotrop.* 30: 1–238. 1982, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Nuev. Cat. Fl. Vas. Venezuela* 1–860. 2008.

Diplopterys cabrerana (Cuatrec.) B. Gates (*Banisteriopsis cabrerana* Cuatrec.; *Banisteriopsis rusbyana* (Nied.) Morton; *Blepharandra ptariana* Steyerl.)

Colombia, Amazonian Brazil.

See *North American Flora* 25(2): 131. 1910, *Journal of the Washington Academy of Sciences* 21: 486. 1937, *Fieldiana, Botany* 28(2): 282. 1952, *Webbia* 13: 493. 1958, *Brittonia* 31: 109. 1979

(Hallucinogenic, used for religious, medicinal and social purposes. An ingredient in the entheogenic tea Ayahuasca, a South American hallucinogenic beverage from the Amazon Indians, a psychoactive substance used in a religious or shamanic context. Ayahuasca is a hallucinogenic beverage derived by boiling the bark of the Malpighiaceae liana *Banisteriopsis caapi* together with the leaves of various admixture plants, viz. *Psychotria viridis*, *Psychotria carthagenensis*, or *Diplopterys cabrerana*.)

Diplorhynchus Welw. ex Ficalho & Hiern Apocynaceae

From the Greek *diploos* 'double' and *rhynchos* 'horn, beak, snout', in reference to the fruits, see *Trans. Linn. Soc. London, Bot.* 2(1): 22. 1881 [1881–1887 publ. Dec 1881] and *Journal of Ethnopharmacology* 6(1): 29–60. 1982, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Journal of Ethnopharmacology* 21: 253–277. 1987, Curtis, B. & Mannheimer, C. *Tree Atlas of Namibia*: 1–688. The National Botanical Research Institute, Windhoek. 2005.

Diplorhynchus condylocarpon (Müll.Arg.) Pichon (*Aspidosperma condylocarpon* Müll.Arg.; *Diplorhynchus angolensis* Büttner; *Diplorhynchus angustifolia* Stapf; *Diplorhynchus condylocarpon* forma *angustifolius* (Stapf) P.A. Duvign.; *Diplorhynchus condylocarpon* forma *microphylla* P.A. Duvign.; *Diplorhynchus condylocarpon* subsp. *angolensis* (Büttner) P.A. Duvign.; *Diplorhynchus condylocarpon* subsp. *mossambicensis* (Benth. ex Oliv.) P.A. Duvign.; *Diplorhynchus condylocarpon* var. *psilopus* (Welw.

ex Ficalho & Hiern) P.A. DuVign.; *Diplorhynchus mossambicensis* Benth. ex Oliv.; *Diplorhynchus mossambicensis* Oliv.; *Diplorhynchus mossambicensis* Benth.; *Diplorhynchus poggei* K. Schum.; *Diplorhynchus psilopus* Welw. ex Ficalho & Hiern; *Diplorhynchus welwitschii* Rolfe; *Neurolobium cymosum* Baill.) (Greek *kondylos* ‘prominence, knuckle’ and *karpos* ‘fruit’, referring to the shape of the fruit)

East Africa, Tanzania to N. Namibia. Shrub or small shrubby tree, perennial, slender, branching from base, leaning, spindly, whippy, scrambling, spreading, somewhat twining branches, bark very rough, copious milky sap, very sticky white latex, new leaves tinged red, flowers pleasantly fragrant, corolla white, fruit brown with rough brown dots, fruits in opposite pairs, fruit eaten by chimpanzees and baboons, used for making charcoal, in woodland, sandy loam, along ridges, in Kalahari sands woodland, in miombo woodland, in open woodland

See *Flora* 7(1) (Beil. 4): 135. 1824, *Flora Brasiliensis* 6(1): 55. 1860, *Hooker's Icon. Pl.* 14: t. 1355. 1881, *Trans. Linn. Soc. London, Bot. ser. 2.* 2: 22. 1881 and *Bull. Mus. Natl. Hist. Nat. sér. 2.* 19: 368. 1948, *Journal of Ethnopharmacology* 6: 29–60. 1982, *Genetica* 68: 3–35. 1985, *Journal of Ethnopharmacology* 14: 159–172. 1985, *Journal of Ethnopharmacology* 21: 253–277. 1987, *Journal of Ethnopharmacology* 48: 131–144. 1995, *Journal of Ethnopharmacology* 67: 15–25. 1999

(Latex used to treat fresh wounds; latex and roots used to treat malaria. Root boiled and drunk to increase sperm, for diarrhea and dysentery, for fever and to treat malaria symptoms; root powder taken with food to treat anorexia. Boiled roots for stomach ailments in women. Stem bark and roots for syphilis, arrow poison.)

in English: horn-pod tree, Rhodesian rubber tree, Transvaal rubber tree, wild rubber

in East Africa: mblembele, mfo, mgoto, mitomoni, motomoni, msanga, msongati, msongea, mtogo, mtoo, mubebele

in Mozambique: muntca, murton

in Southern Africa: horingpeulbos, horingpeultjieboom, horingspeulboom, melkbos (= rubber tree); mulya, ntsowa (Western Transvaal, northern Cape, Botswana); muthowa (Venda); muKanasanu, muRia, muSikanyimo, muTewa, muToa, iTsowa, muTowa (Shona); tsowa (Tsonga); mongoma (Mbukushu)

in Tanzania: isonga, itelembe, mda mba, msonga, msongati, msongatti, mto, mtomoni, mtogo, mtongo, mulando

in Zambia: mutowha, mwenge

Diplotaxis DC. Brassicaceae (Cruciferae)

From the Greek *diploos* ‘double’ and *taxis* ‘a series, order, arrangement’, referring to the two rows of seeds; see

Augustin Pyramus de Candolle, *Regni vegetabilis systema naturale: sive ordines, genera et species plantarum secundum methodi naturalis normas digestarum et descriptarum.* 2: 628. Parisiis; Argentorati; London: sumptibus sociorum Treuttel et Würtz, 1818–1821.

Diplotaxis acris Boiss. (*Diplotaxis acris* (Forssk.) Boiss.)

North Africa, Israel.

See *Bocconea* 3: 229–250. 1992, *J. Ethnopharmacol.* 95: 235–238. 2004, *African Journal of Traditional, Complementary and Alternative Medicines* 3(3): 1–9. 2006

(Hepatoprotective.)

Diplotaxis harra (Forssk.) Boiss. (*Diplotaxis harra* var. *fontanesii* (Willk.) Maire & Weiller; *Diplotaxis harra* var. *hispida* (DC.) Nègre; *Diplotaxis harra* var. *intricata* (Willk.) O.E. Schulz; *Diplotaxis harra* var. *lagascana* (DC.) O.E. Schulz; *Diplotaxis harra* var. *maroccana* Nègre; *Diplotaxis harra* var. *subglabra* (DC.) O.E. Schulz; *Diplotaxis pendula* (Desf.) DC.; *Pendulina fontanesii* Willk.; *Pendulina harra* (Forsk.) Willk.; *Pendulina hispica* Willk.; *Sinapis harra* Forssk.; *Sisymbrium pendulum* Desf.)

North Africa.

See *Regni Vegetabilis Systema Naturale*, ed. 2 2: 628. 1821 and *Taxon* 31: 587–589. 1982, *Taxon* 34: 727–730. 1985, *Phytother Res.* 13(4): 329–332. 1999, *Journal für Verbraucherschutz und Lebensmittelsicherheit* 4(3–4): 235–437. 2009

(Bactericidal, antimicrobial, hypocholesterolemic, antioxidant, fungicidal and nematocidal; an irritating reddening action has been noticed on the mucous membrane. Decoction of aerial parts for constipation. Seeds applied externally as rubefacient.)

in English: wall rocket

in Arabic: harra

Diplotaxis pitardiana Maire (*Diplotaxis crassifolia* var. *pitardiana* (Maire) O.E. Schulz)

North Africa.

See *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 9: 175. 1918, *Das Pflanzenreich* IV, 105(70): 157. 1919

(Bactericidal, fungicidal and nematocidal. Seeds rubefacient. Veterinary medicine, used as a rub for scabies.)

Diplotropis Benth. Fabaceae (Leguminosae, Sophoreae)

From the Greek *diploos* ‘double’ and *tropis* ‘keel, the keel of a vessel’, referring to the calyx, see Bentham, George (1800–1884), *Commentationes de Leguminosarum Generibus* 24. Vindobonae (Vienna), 1837 [also published in *Ann. Wien Mus. Naturgeschichte*, 2, 1840. pp. 61–142.], *Ann. Wiener*

Mus. Naturgesch. ii. (1838) 88. 1838, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 139. 1843, *Journal of the Proceedings of the Linnean Society* 4(Suppl.): 84. 1860 and *Acta Amazonica* 15(1/2): 61–75, figs. 1–2. 1985.

Diploptropis ferruginea Benth. (*Bowdichia ferruginea* (Benth.) Ducke; *Bowdichia ferruginea* Walp.; *Bowdichia ferruginea* Ducke; *Bowdichia taubertiana* (Harms) Ducke; *Bowdichia taubertiana* Ducke; *Diploptropis taubertiana* Harms; *Hymenolobium ormosioides* Benth.)

Brazil.

See *Repertorium Botanices Systematicae*. (Walpers) 1(5): 808. 1843, *Flora Brasiliensis* 15(1B): 321. 1862 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33, Beibl. 72: 26. 1903, *Archivos do Jardim Botânico do Rio de Janeiro* 1(1): 32. 1915, *Phytochemistry* 21: 2269. 1982, *Fitoterapia* 71: 211. 2000, *International Immunopharmacology* 8(9): 1216–1221. 2008

(Used for the treatment of rheumatism, asthma, arthritis and diabetes.)

in Brazil: sucupira

Diploptropis martiusii Benth. (*Bowdichia martiusii* (Benth.) Ducke; *Bowdichia martiusii* Ducke; *Dibrachion riparium* Benth.)

South America. Perennial non-climbing tree

See *Commentationes de Leguminosarum Generibus* 24. 1837, *J. Bot.* (Hooker) 2: 72. 1840, *Flora Brasiliensis* 15(1B): 321. 1862 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 131. 1922

(Leaves ashes mixed with po)

Vernacular names: chontaquiro, faveira, sapupira, sucupira, sucupira-do-baixo

Dipsacus L. Dipsacaceae

Greek *dipsakos* (*dipsa* ‘thirst’), the leaves are able to hold rain water; Latin *dipsacos*, *i* for the plant teasel, *Dipsacus fullonum* L. (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 97–98. 1753, *Genera Plantarum*. Ed. 5. 43. 1754, *Veg. Syst.* 5: 12. 1763, *Genera Plantarum* 194. 1789 and *Fl. Prov. Buenos Aires* 4(5): 331–342, 380–385, 385–389, 413–419. 1965, *Taxon* 29: 362–365. 1980, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 94. Berlin & Hamburg 1989, *AAU Rep.* 34: 1–443. 1994, *Watsonia* 20: 63–66. 1994, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Cytologia* 65: 123–128. 2000.

Dipsacus asper Wall. (*Dipsacus asper* Wall. ex DC.)

China.

See *A Numerical List of Dried Specimens* [Wallich] n. 428. 1829

(Root mixed in a tea with other plants used for rheumatism. Leaves in skin and kidney diseases.)

in English: Himalayan teasel, Szechuan teasel, teasel

in China: xu duan, hsu tuan

in India: tiew stem

in Tibet: xe de

Dipsacus fullonum L. (*Dipsacus fullonum* Huds.; *Dipsacus fullonum* S.G. Gmel.; *Dipsacus fullonum* Thore; *Dipsacus fullonum* L. subsp. *fullonum*; *Dipsacus fullonum* L. subsp. *sylvestris* (Huds.) Clapham; *Dipsacus fullonum* var. *sylvestris* (Huds.) Schmalh.; *Dipsacus sylvestris* Huds.; *Dipsacus sylvestris* Mill.)

Europe. Biennial herb

See *Flora Anglica* 49. 1762, *Flora Anglica*, Editio Altera 61. 1778 and *Giorn. Bot. Ital.* 114: 267–270. 1980

(Roots, also powdered, said to be poisonous. Sudorific, diaphoretic, antibacterial, leaves infusion as a wash for acne.)

in English: common teasel, Fuller’s teasel, teasel, wild teasel

in South Africa: kaarddissel, pluisdissel

Dipsacus inermis Wall. (*Virga inermis* (Wall.) Holub)

India.

See *Fl. Ind.*, ed. Carey & Wall. 1: 367–368. 1820 and *Folia Geobotanica et Phytotaxonomica* 8(2): 175. 1973

(Postpartum remedy, leaves decoction as a bath to relieve bodyache and joint pains.)

in India: wopal-hakh, wopalhakh

Dipsacus japonicus Miq.

SE Asia, China.

See *Verlagen en Mededeelingen van de Afdeeling Natuurkunde; Koninklijke Akademie van Wetenschappen*, ser. 2 2: 83. 1868 and *Taxon* 29: 362–365. 1980

(For piles, breasts problems, dysmenorrhea.)

Dipsacus pilosus L. (*Virga pilosa* Hill)

Europe.

See *The Vegetable System* 5: 18. 1763

(Wounds, warts, boils.)

Dipteracanthus Nees Acanthaceae

Greek *di* ‘two’, *pteron* ‘wing’ and *akantha* or *Acanthus*, referring to the two-leaved peduncle or to the calyx or to the two-winged fruit; see Nathaniel Wallich, *Plantae Asiaticae Rariores*. 3: 75, 81–82. (Aug.) 1832, *Boston J. Nat. Hist.* 5(2): 229, 257. 1845, *Fl. Bras.* (Martius) 9: 43. 1847 and *Verh. Ned.*

Akad. Wetensch., Afd. Natuurk., Tweede Sect. 45: 15. 1948, *Proc. Calif. Acad. Sci.* 49: 309–403. 1997. There is considerable taxonomic confusion concerning this genus, see also genera *Ruellia*, *Aphelandra*, *Odontophyllum*.

Dipteracanthus patulus (Jacq.) Nees (*Dipteracanthus patulus* Nees; *Petalidium damarense* S. Moore; *Petalidium patulum* (Jacq.) Dalzell & A. Gibson; *Ruellia cyanea* (Nees) T. Anderson; *Ruellia pallida* Vahl; *Ruellia patula* Jacq.; *Ruellia patula* Burkill & C.B. Clarke; *Ruellia praetermissa* Schweinf. ex Lindau)

India.

See *Miscellanea Austriaca ad Botanicam, Chemiam, et Historiam Naturalem Spectantia* 2: 358–359. 1781, *Symbolae Botanicae, ...* 2: 72. 1791, *Plantae Asiaticae Rariores* 3: 82. 1832, *The Bombay Flora ...* 185. 1861, *Flora of Tropical Africa* 5: 45. 1899 and *Journal of Botany, British and Foreign* 45: 227. 1907, *Taxon* 30: 79–80. 1981

(Used in Sidha.)

in India: cilantanceti, cilantinayakam, cukkulam, cuntuiliceti, cuntumam, cuntuyili, icaimuti, kakapicam, kakapikanayacceti, kattunayakacceti, kattunayakam, kiranti, kiranti nayakam, kirantinayakan, kirantinayan, kirantipuntu, nittinaviral, nittinaviralkurittan, punkiranti, punkiranticeti, putakilam, putakilanceti, turuputpam, nayakam, upu-dali, vaikkirantitacceti, vaikkirantitam

Dipteracanthus prostratus (Poir.) Nees (*Aphelandra castanifolia* Britton ex Rusby; *Dipteracanthus dejectus* Nees; *Dipteracanthus prostratus* (Poir.) Nees; *Ruellia otaviensis* P.G. Mey.; *Ruellia prostrata* Poir.; *Ruellia prostrata* var. *dejecta* (Nees) C.B. Clarke; *Ruellia rivularis* (Benoist) Boivin ex Benoist, nom. illeg.)

Pakistan, India.

See *Species Plantarum* 2: 634–635. 1753, *Encyclopédie Méthodique, Botanique* 6: 349. 1804, *Linnaea* 7: 396–397. 1832, *Plantae Asiaticae Rariores* 3: 75, 81–82. 1832, *An enumeration of the species of Acanthaceae from the continent of Africa and the adjoining islands...* 7: 13–54. 1864 [*Journal of the Linnean Society, Botany.*], *The Flora of British India* 4: 412. 1884 and *Bulletin of the Torrey Botanical Club* 27: 76. 1900, *Notulae Systematicae. Herbarium du Muséum de Paris* 12: 5. 1945, *Flore de Madagascar et des Comores* 182: 71. 1967, *Phytologia* 37(4): 413. 1977

(Plant decoction in case of physical weakness; leaves for ear complaints. Seed powder given to person with sperm deficiency.)

in India: bheemana soppu, kali dhavani, kalighavani, kalighawani, maanu pathri, nela neelaambaramu, pottakanachi, upudali

Dipteracanthus suffruticosus Torr. (*Dipteracanthus suffruticosus* (Roxb.) Voigt; *Dipteracanthus suffruticosus* Voigt)

North America, India.

See *Hort. Suburb. Calcutt.* 483. 1845, *Report on the United States and Mexican Boundary ... Botany* 2(1): 122. 1859 and *Proc. Calif. Acad. Sci.* 55(35): 787. 2004

(For bronchitis, cough.)

Dipterocarpus Gaertner f. Dipterocarpaceae

From the Greek *dipteros* ‘two-winged’ and *karpos* ‘fruit’, see *De Fructibus et Seminibus Plantarum...* 3: 49–50 (t. 187, f. 2). 1805 [*Suppl. Carp.*], *Gen. Hist.* 1: 813–814. 1831.

Dipterocarpus alatus Roxb. (*Dipterocarpus alatus* Roxb. ex G. Don; *Dipterocarpus alatus* A. DC., nom. illeg.)

SE Asia, Cambodia. Tree, columnar bole with very short rounded buttresses, leaves glabrous

See *A General History of the Dichlamydeous Plants* 1: 813. 1831, *Prodr.* (DC.) 16(2.2): 611. 1868

(Used in Ayurveda. Antiinflammatory, for rheumatism, measles, conjunctivitis, venereal diseases.)

in India: asvakarna, duhun-el-garjan, enne mara, garjan enne mara, garjana, jaranadruma

in Tibet: asvakarna, aswakarna

Dipterocarpus costatus C.F. Gaertn. (*Dipterocarpus costatus* Roxb.)

SE Asia.

See *Supplementum Carpologiae* 3: 50 (t. 187). 1805, *Hort. Bengal.* 42. 1814

(For skin ailments, eruptions.)

Dipterocarpus lamellatus Hook.f.

SE Asia.

See *Transactions of the Linnean Society of London* 23(1): 159. 1860

(For leprosy.)

Dipterocarpus turbinatus Gaertn.

India.

See *De Fructibus et Seminibus Plantarum Suppl. Carp.* 3: 51, t. 188, f. 1. 1805

(Used in Ayurveda and Sidha. Bark resin applied on ulcers, skin diseases, leprosy.)

in India: ajakarna, asvakarna, challaane, challane, challani, challanne, challenne, duhun-el-garjan, enney, enneyamar, garjan, googe, guge, gurjun kuroilsal, kalpains, karalam, karccamaram, lawng-thing, lawngthing, maradenne, teli-garjan, teli-gurjun, tihya-garjan, valivara, vellenney, yennar, yingou

in Tibet: a dza ka rna, ajakarna

Dipteryx Schreber Fabaceae (Dipterygeae)

From the Greek *dipteros* ‘two-winged’, *pteryx* ‘wing’, referring to the upper lobes of the calyx; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 292. Ansbach 1852.

Dipteryx odorata (Aubl.) Willd. (*Coumarouna micrantha* (Harms) Ducke; *Coumarouna odorata* Aubl.; *Coumarouna tetraphylla* (Benth.) Aubl.; *Coumarouna tetraphylla* (Spruce ex Benth.) Taub.; *Cumarouna tetraphylla* (Spruce ex Benth.) Kuntze; *Dipteryx micrantha* Harms; *Dipteryx tetraphylla* Benth.; *Dipteryx tetraphylla* Spruce ex Benth.)

Guianas, Brazil. Perennial non-climbing tree

See *Histoire des plantes de la Guiane Française* 2: 740–742, pl. 296. 1775, *Genera Plantarum* 2: 485. 1791, *Species Plantarum. Editio quarta* 3(2): 910. 1802, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 1084, *An Introduction to the Natural System of Botany* 148. 1836, *Journal of the Linnean Society, Botany* 4(Suppl.): 125. 1860, *Botanisches Centralblatt* 47: 389. 1891, *Revisio Generum Plantarum* 1: 177. 1891 and *Archivos do Jardim Botânico do Rio de Janeiro* 4: 322. 1925, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 976. 1926, *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht* 52: 1–78. 1939, *Tropical Woods* 61: 9. 1940, *Candollea* 37(1): 17–62. 1982, *Legum. Agric. Boliv.* 409–423. 1996

(Carminative, anticoagulant, aromatherapy, narcotic, cardiotonic, insecticide. Decoction of aromatic seeds for indigestion, dyspepsia and stomachache.)

in English: Dutch tonka bean, tonka bean, tonquin bean

Dirca L. Thymeleaeceae

From the Greek *Dirke* ‘a fountain N.W. of Thebes, in Boeotia’, referring to the habitat of the plants; see *Species Plantarum* 1: 358. 1753, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 292. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 94. 1989, *Sida* 16(3): 459–467. 1995.

***Dirca palustris* L.**

North America. Perennial shrub, fibrous bark, yellow flowers in axillary clusters, fruit a green to red drupe

See Fyles, F. “Principal poisonous plants of Canada.” *Can. Dep. Agric. Exp. Farms. Bull.* 39. 1920, *J. Arnold Arbor.* 45: 158. 1964

(This shrub contains poisonous chemicals that are most potent in the bark. Chewing the bark can cause severe burning in the mouth and can produce a nauseating taste; dermatitis can occur, especially during flowering and fruiting time. Analgesic, aphrodisiac, diuretic, cathartic, purgative, tonic, blood purifier, for tuberculosis, pneumonia, internal inflammation, eye ailments, pulmonary and kidney ailments,

venereal diseases, gonorrhoea and syphilis, women’s ailments. Inner bark infusion taken as a laxative; roots infusion for pulmonary troubles, infusion of bark and roots taken for kidney troubles. Stems decoction used as an aphrodisiac.)

in English: Eastern leatherwood, leatherwood, moosewood, rope-bark, wicopy

Discaria Hook. Rhamnaceae

Greek *diskos* ‘a disc’, referring to the large annular disc; see *Hooker’s Botanical Miscellany*. 1: 156, t. 44 D, 45. 1829.

Discaria americana Gillies & Hook. (*Colletia longispina* Hook. & Arn.; *Colletia longispina* var. *foliosa* Hook. & Arn.; *Condalia spinosa* Spreng.; *Discaria exilis* (Miers) Herter; *Discaria febrifuga* Mart.; *Discaria gracilentia* Herter; *Discaria longispina* (Hook. & Arn.) Miers; *Discaria longispina* var. *foliosa* Griseb.; *Discaria lycioides* Miers; *Discaria lycioides* var. *exilis* Miers; *Discaria spiculata* Miers)

Argentina.

See *Genera Plantarum* 180. 1789, *Systema Vegetabilium*, editio decima sexta 4: 108. 1828, *Botanical Miscellany* 1: 156. 1829, *Botanical Miscellany* 3: 173. 1832, *Syst. Mat. Med. Veg. Bras.* 37. 1843, *Annales du muséum national d’histoire naturelle* 5: 372–374. 1860, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 64. 1879 and *Flora del Uruguay* 1(13): t. 2088, 2091. 1957

(Febrifuge, tonic, skin diseases.)

in Argentina: coronilla, quina del campo

Dischidanthus Tsiang Asclepiadaceae (Apocynaceae)

Greek *dischides* ‘cloven, parted, twice cleft’ and *anthos* ‘flower’, see *Sunyatsenia* 3: 184. 1936.

Dischidanthus urceolatus (Decaisne) Tsiang (*Marsdenia urceolata* Decaisne)

China, Vietnam.

See *Prodromus Florae Novae Hollandiae* 460. 1810, *Memoirs of the Wernerian Natural History Society* 1: 28–30. 1810, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 617. 1844 and *Sunyatsenia* 3(2–3): 185–187, pl. 20. 1936

(Whole plant used for rheumatism.)

in English: urnshaped dischidanthus

in China: ma lan teng

Dischidia R. Br. Asclepiadaceae (Apocynaceae)

Greek *dischides* ‘cloven, parted, twice cleft, cloven hoofed’, *schizo*, *schizein* ‘to split, to divide’, possibly referring to the

bifid segments of the corona; some suggest from *dis* ‘two’ and *kithon*, *kiton*, *chiton* ‘a tunic, covering, coat’. See Robert Brown, *Prodromus florae Novae Hollandiae*. 461. 1810, “On the Asclepiadeae.” *Memoirs of the Wernerian Natural History Society*. 1: 32. Edinburgh 1811.

Dischidia bengalensis Colebr. (*Dischidia benghalensis* Colebr.)

India. Epiphytic and lithophytic vine, climber, white flowers

See *Transactions of the Linnean Society of London* 12: 357, t. 15. 1818

(Leaves decoction squeezed in ear to ease pain; leaf paste applied on mumps, cuts and wounds to reduce pain.)

in India: shompens, talima

Dischidia collyris Wall.

Malaya.

See *Prodromus Florae Novae Hollandiae* 461. 1810, *A Numerical List of Dried Specimens* n. 4207. 1831 and Schmidt R.J. “The super-nettles: a dermatologist’s guide to ants in the plants.” *International Journal of Dermatology* 24(4): 204–210. 1985

(Myrmecophyte, ant plant; the plants benefit from the ants’ carbon dioxide and waste products; a pseudophytophagous plant caused by the bites and/or stings of the ants.)

Dischidia gaudichaudii Decne.

Indonesia.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 632. 1844

(For wounds.)

Dischidia platyphylla Schltr.

Philippines.

See *Philippine Journal of Science* 1(Suppl.): 300. 1906

(For boils.)

Dischidia puberula Decne.

Guam.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 631. 1844

(Analgesic.)

Dischidia rafflesiana Wall.

Malaya. Climbing shrubs or pendulous herbs, leaves modified into pitchers, myrmecophyte, myrmecophilous or ant-loving plants, ants inhabit the inflated often hollow leaves

See *Prodromus Florae Novae Hollandiae* 461. 1810, *Plantae Asiaticae Rariores* 2: 35, t. 142. 1831, *Revis. Gen. Pl.* 2: 419. 1891 and Daniel H. Janzen “Epiphytic Myrmecophytes in

Sarawak: Mutualism through the feeding of plants by ants.” *Biotropica* 6(4): 237–259. 1974

(Roots boiled in betel leaves and taken orally to cure cough. Stem used for coughs.)

in English: flower pot plant, Malayan urn vine, Queensland pitcher plant, rattle skulls

in India: bandi-kuri, bandikuri, hankha ojharmona

Malay names: akar bani, akar kul

Disciphania Eichler Menispermaceae

From the Greek *diskos* ‘a disc’ and *phane*, *phanos* ‘a torch, light, bright’, *phaneros* ‘evident, conspicuous, visible, manifest’, see *Genera Plantarum* 284–285. 1789, *Flora* 47: 387. 1864, *Flora Brasiliensis* 13(1): 168–169, t. 36, f. 1. 1864, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 2: 329, t. 12. 1883, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15(Beibl. 38): 3. 1893 and *Reperitorium Specierum Novarum Regni Vegetabilis* 16: 133. 1919, *Bulletin of Miscellaneous Information Kew* 1936: 388. 1936, *Publications of the Field Museum of Natural History, Botanical Series* 22(1): 20. 1940, *Fieldiana, Bot.* 24(4): 258–266. 1946, *Kew Bulletin* 1954: 614. 1955, *Memoirs of the New York Botanical Garden* 20(2): 130, 142, 145–147, 150, 153. 1970, *Fl. Veracruz* 87: 1–43. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 1432–1442. 2001.

Disciphania calocarpa Standl. (*Disciphania coriacea* Standl.)

South America, Guatemala, Honduras.

See *Publications of the Field Columbian Museum, Botanical Series* 4(8): 305. 1929, *Publications of the Carnegie Institution of Washington* 461(4): 55. 1935

(Depurative, for kidney and liver ailments.)

Discoglyprena Prain Euphorbiaceae

From the Greek *diskos*, *glypho* ‘to carve, engrave’ and *premon* ‘the stump of a tree, trunk, stem, basis, root’, see *Nova Genera et Species Plantarum seu Prodromus* (Swartz) 6 (98). 1788 and *Bulletin of Miscellaneous Information Kew* 1911: 317. 1911.

Discoglyprena caloneura (Pax) Prain (*Alchornea caloneura* Pax; *Discoglyprena caloneura* Prain)

Tropical Africa. Tree, straight bole, waxy leaves, orange-red aril

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 81. 1909, *Kew Bulletin* 1911: 317. 1911, *Willdenowia* 21: 233–238. 1991

(Seeds abortifacient, purgative, poisoning.)

in Cameroon: avep, dambala, ndambabi, nila

in Central African Republic: ita ti ndengo, ita ti ngundu, mokasu kasu, mokasukasu, ngundu

in Congo: teka

in Gabon: atieghe, dimimbidiambamba, otua-nzam, toute

in Ivory Coast: akoret

in Liberia: leh-bohn

in Nigeria: akikagba, uguomafia; akika-agba (Yoruba); uguomafia, okpaghegui (Edo); obinwanyi (Igbo)

in Yoruba: ajagunmarase, igbedere, opa

in Zaire: mbako, mbaku

Discopodium Hochst. Solanaceae

From the Greek *diskos* ‘a disc’ and *podion* ‘a small foot’, see *Flora* 27: 22. 1844.

Discopodium eremanthum Chiov.

Kenya.

See *Racc. Bot. Miss. Consol. Kenya* 89. 1935, *Journal of Ethnopharmacology* 112: 55–70. 2007

(Veterinary medicine, for skin diseases, scabies.)

Discopodium penninervium Hochst.

East Africa. Small tree or shrub, sweet smelling green-yellow flowers

See *Flora* 27: 22. 1844

(Veterinary medicine, inability to walk.)

in Tanzania: mnyasayo

Disporopsis Hance Asparagaceae (Convallariaceae, Liliaceae)

Resembling *Disporum* Salisb. ex D. Don, see *Journal of Botany, British and Foreign* 21: 278. 1883 and *Flora of China* 24: 232–234. Missouri Botanical Garden Press, St. Louis. 2000.

Disporopsis pernyi (Hua) Diels (*Aulisconema pernyi* Hua; *Disporopsis arisanensis* Hayata; *Disporopsis fuscopicta* var. *arisanensis* (Hayata) S.S.Ying; *Disporopsis leptophylla* Hayata; *Disporopsis taiwanensis* S.S. Ying; *Polygonatum bodinieri* H. Lév.; *Polygonatum ensifolium* H. Lév.; *Polygonatum ensifolium* var. *didymocarpum* H. Lév.)

China, Taiwan. Perennial herbs, spreading, creeping, cylindrical rhizomes, arching stem, shiny foliage, small white lemon-scented flowers in an axillary fascicle, perianth campanulate, dark purple berries, ground cover

See *J. Bot.* (Morot) 6(24): 472, pl. 14, f. 2. 1892 and *Bot. Jahrb. Syst.* 29(2): 239, 249. 1900 [1901], *Bull. Acad. Int. Géogr. Bot.* 12(163): 261–262. 1903, *Icon. Pl. Formosanarum* 5: 230–233, f. 81. 1915, *J. Jap. Bot.* 64(5): 153–154, f. 4. 1989, *Fl. Taiwan*, ed. 2, 5: 43. 2000, *Helvetica Chimica Acta* 87(5): 1248–1253. 2004

(Rhizome cooked with chicken, a special postpartum food given to mothers; a remedy to rheumatism, coughing, tonsillitis and conjunctivitis.)

in English: bamboo-root false disporum, evergreen Solomon’s seal, Perny’s evergreen Solomon’s seal, yellow-feet chicken

in China: chu ken ch’i, chu ken chia wan shou chu, huang chiao chi, huang jiao ji, shen lie zhu gen qi, zhu gen jia wan shou zhu, zhu gen qi

Disporum Salisb. ex D. Don Asparagaceae (Colchicaceae, Convallariaceae, Liliaceae)

Greek *dis* ‘twice’ and *spora* ‘seed’, referring to the usually two-seeded fruits, there are two ovules in each chamber or locule of the ovary, see *Species Plantarum* 1: 304–305. 1753, *Transactions of the Horticultural Society of London* 1: 331. 1812, *Prodromus Florae Nepalensis* 50. 1825, *Enumeratio Plantarum Javae* 8. 1827, *Proceedings of the Linnean Society of London* 1: 48. 1839 and *Contributions from the Gray Herbarium of Harvard University* 173: 11. 1951.

Disporum calcaratum D. Don (*Disporum calcaratum* var. *hamiltonianum* (D. Don) Baker; *Disporum hamiltonianum* D. Don; *Disporum jiangchengense* Y.Y. Qian; *Disporum latipetalum* Collett & Hemsl.; *Disporum pedunculatum* H. Li & J.L. Huang; *Disporum wallichii* D. Don; *Uvularia betua* Buch.-Ham. ex D. Don, nom. inval.; *Uvularia calcarata* Wall., nom. inval.; *Uvularia hamiltoniana* Wall., nom. inval.)

Nepal, India, China.

See *Proc. Linn. Soc. London* 1: 45. 1839, *J. Linn. Soc., Bot.* 28(181–191): 139. 1890 and *Guihaia* 9(4): 294. 1989, *Guihaia* 10(3): 184–185, f. 1–5. 1990, Singh, N.P. & Sanjappa, M. (eds.) “Alliaceae, Liliaceae, Trilliaceae & Uvulariaceae.” *Fascicles of Flora of India* 23: 1–134. Botanical Survey of India, New Delhi. 2006 [as *Disporum cantoniense*.]

(Aqueous extract of tubers used as eye drop for eye problems, for venereal diseases and urinary problems is taken orally.)

in China: ju hua wan shou zhu

in India: tike jakriting

Dissochaeta Blume Melastomataceae

Greek *dissos* ‘of two kinds, double’ and *chaite* ‘bristle, loose flowing hair, long hair’, the flowers and the leaves are

woolly, see *Flora* 14: 492, 501. 1831, *Der Deutsche Botaniker Herbarienbuch* 174. 1841.

Dissochaeta annulata Hook.f. ex Triana

Malaysia.

See *Trans. Linn. Soc. London* 28(1): 83. 1871–1872 [8 Dec 1871–13 Jan 1872]

(Leaves decoction a postpartum remedy.)

Malay name: kayu mata hari

Dissochaeta bracteata (Jack) Blume (*Dissochaeta bracteata* Blume; *Dissochaeta bracteata* Korth.; *Melastoma bracteatum* Jack; *Melastoma bracteatum* Mart. & Schrank ex DC.; *Melastoma bracteatum* Wall.)

Malaya, Borneo. Shrub

See *Transactions of the Linnean Society of London* 14(1): 9. 1823, *Prodr.* (DC.) 3: 176. 1828, *Numer. List* [Wallich] n. 4044. 1831, *Flora* 14: 495. 1831

(Leaves paste applied on forehead for relief of headache.)

in Borneo: pasak matahari

Dissochaeta celebica Blume (*Neodissochaeta celebica* (Blume) Bakh.f.)

SE Asia, Malay Pen. Straggling shrub, pink flowers in panicles, ribbed fruits minutely pubescent

See *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht* No. 91, 141. 1943, *Beitr. Biol. Pflanzen.* 68: 51–71. 1994

(Leaves antidote for Ipoh poison, *Antiaris toxicaria*. Root decoction given on the first 3 days after childbirth confinement.)

Dissochaeta gracilis Blume

Malaysia.

See *Flora* 14: 498. 1831

(Leaves decoction an antidote to *Antiaris* poison.)

Malay name: chong keradak

Dissochaeta punctulata Hook.f. ex Triana

Malay Peninsula.

See *Trans. Linn. Soc. London* 28(1): 83. [8 Dec 1871–13 Jan 1872]

(Roots a postpartum remedy, a wash after childbirth confinement, parturient.)

Malay name: akar meroyan busuk

Dissotis Benth. Melastomataceae

From the Greek *dissos* ‘of two kinds’ and *ous, otos* ‘an ear’, referring to the anthers.

Dissotis alpestris Taub. (*Antherotoma senegambiensis* (Guill. & Perr.) Jacq.-Fél. var. *alpestris* (Taub.; *Dissotis cinnata* Gilg; *Dissotis irvingiana* Hook. forma *alpestris*; *Dissotis irvingiana* Hook. forma *osbeckioides* A. Fern. & R. Fern.; *Dissotis senegambiensis* (Guill. & Perr.) Triana var. *alpestris* (Taub.) A. Fern. & R. Fern.)

Tanzania. Herb, shrubs, woody-based, soft-wooded, petals bright red-purple, moist places, forest edges, grassland, banks of rivers

See *Transactions of the Linnean Society of London* 28(1): 58. 1871 [1872], *Die Pflanzenwelt Ost-Afrikas* C: 295. 1895 and *Boletim da Sociedade Broteriana*, ser. 2 46: 69. 1972

(Antibacterial, for skin diseases.)

Dissotis brazzae Cogn. (*Dissotis multiflora* (Sm.) Triana; *Dissotis multiflora* Gilg; *Dissotis tanganyikae* Kraenzl.; *Osbeckia liberica* Stapf; *Osbeckia multiflora* Sm.; *Osbeckia multiflora* sensu Hiern, non Sm.) (for the Italian-born (Castel Gandolfo, Rome) French explorer Count Pierre (Pietro) Paul François Camille Savorgnan de Brazza, 1852–1905 (Dakar, Senegal, French West Africa), colonial administrator who founded the French (Middle) Congo, explored Equatorial Africa, between 1875 and 1878; this first mission covered 900 miles of inland territory, 1879–82 the French government authorized a second mission, 1880 he reached the Congo River, founded Brazzaville, in 1886 he was named governor general of the French Congo, wrote *Conférences et lettres de P. Savorgnan de Brazza sur ses trois explorations dans l'Ouest africain, de 1875 à 1886*. Paris 1887; see C. de Chavannes, *Avec Brazza*. Souvenir de la mission de l'Ouest-Africain. 1935; Francesco Savorgnan di Brazzà, *L'Uomo che donò un Impero*. Vita e opera di Pietro Savorgnan di Brazzà. Firenze 1945; Robert de Saint Jean, “Deux témoignages sur les colonies: Las Casas et André Gide.” *La Revue hebdomadaire*. 36e année, n° 47: 358–364. 19 Nov 1927; Peter Forbath, *The River Congo: The Discovery, Exploration, and Exploitation of the World's Most Dramatic River*. NY, Harper 1977.)

West Africa. Shrubby herb, perennial, multi-stemmed, stout, flowers sessile in dense cymes, petals pink-mauve, receptacle oblong-urceolate glabrescent, capsule ovoid densely setose at the apex with long and rigid bristles, forest margins and savanna, open grassy woodland

See *Species Plantarum* 1: 345–346. 1753, *The Cyclopaedia; or, universal dictionary of arts, ...* 25, n. 7. 1813, *Niger Flora* 346. 1849, *Transactions of the Linnean Society of London* 28(1): 58. 1871 [1872], *Monographiae Phanerogamarum* 7: 372. 1891, *Monographien afrikanischer Pflanzen-Familien und -Gattungen Melastom.* 18. 1898 and *Journal of the Linnean Society, Botany* 37: 98. 1905, *Journal of Ethnopharmacology* 70: 281–300. 2000, *Tanzania Journal of Health Research* 11(1): 23–28. 2009

(Antimicrobial, used to treat bacterial infections, diarrhea and heal wounds. For cerebral malaria, a cold infusion from

a dry powdered mixture of aerial parts of the plant with aerial parts of *Indigofera asparagoides* Taub. (*Microcharis asparagoides* (Taub.) Schrire), *Antherotoma naudinii* Hook. f., *Cassia gracilior* (Ghesq.) Steyaert (*Chamaecrista gracilior* (Ghesq.) Lock), *Rhynchosia minima* (L.) DC., *Justicia matammensis* (Schweinf.) Oliv. (*Justicia anselliana* (Nees) T. Anderson) and *Pentas zanzibarica* (Klotzsch) Vatke. Leaves as lactation stimulants, also for pulmonary troubles; leaf infusion for children's cough; leaves decoction drunk to induce sleep and as anthelmintic. Root antidote. Veterinary medicine.)

in Burundi: ishonge, itara-ry'imbwa, umuhetera

in Congo: mungobele lilume, mungobole

in Rwanda: ubwunyubwintama, umunyu w' intama

in Tanzania: kanyantoke, kinulilizi, tulo

Dissotis canescens (E. Mey. ex R.A. Graham) Hook.f. (*Argyrella canescens* (E. Mey. ex Graham) Harv.; *Argyrella incana* Naud.; *Dissotis angolensis* Cogn.; *Dissotis canescens* var. *transvaalensis* A. & R. Fernandes; *Dissotis incana* (Naud.) Triana; *Dissotis incana* Triana; *Heterotis canescens* (E. Mey. ex Graham) Jacq.-Fél.; *Osbeckia canescens* E. Mey. ex Graham; *Osbeckia incana* E. Mey. ex Walp., nom. illegit.; *Osbeckia umlaasiana* Hochst.; *Tristemma verdickii* De Wild.)

Tropical Africa. Shrub, magenta flowers

See *Species Plantarum* 1: 345. 1753, *Edinburgh New Philosophical Journal* 28: 899. 1840, *Niger Flora* 347–348. 1849, *Flora of Tropical Africa* 2: 453. 1871 and *Adansonia*: recueil périodique d'observations botanique, n.s. 20(4): 420. 1981, *BioLlania, Edición Especial* 6: 167–190. 1997

(Leaves infusion for cough, fever, influenza, bronchitis, to treat dysentery and hangovers. Veterinary medicine, refusal of nursing.)

in English: pink marsh dissotis, wild lasiandra

in Burundi: umusoma-w'abungere

in Kenya: nalunyuluny

in South Africa: imfeyesele, kalverbossie

Dissotis congolensis Jacq.-Fél. (*Dissotis congolensis* (Cogn. ex Buett.) Jacq.-Fél.; *Osbeckia congolensis* Cogn. ex Büttner; *Osbeckia congolensis* var. *robustior* Büttner)

Tropical Africa. Shrub, woody herb

See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 31: 95. 1889 and *Adansonia* sér. 2, 20(4): 424. 1981

(Whole plant analgesic, for joint pain, body ache, a cough sedative.)

Dissotis debilis Triana

Tanzania. Calyx green with red longitudinal stripes on lobes, petals pink-purple, edible fruits

See *Transactions of the Linnean Society of London* 28: 58, t. 4/44a, sb. 1872

(Twigs decoction to prevent or cure malaria.)

in Tanzania: kituntunu

Dissotis erecta Dandy

Nigeria, Ghana, Angola. Woody erect herb, shrubby, hirsute or strigose, calyx green, bright magenta petals, mashed leaves eaten

See *The Flowering Plants of the Anglo-Egyptian Sudan* 1: 192. 1950

(Leaf juice for cough and for gastrointestinal pains.)

Dissotis incana Triana (*Dissotis incana* (Naud.) Triana; *Dissotis incana* A. Chev.)

South Africa.

See *Transactions of the Linnean Society of London* 28: 58. 1871 and *Exploration Botanique de l'Afrique Occidentale Française* ... 273. 1920

(Leaves for dysentery and diarrhea.)

in South Africa: imFeyenkala, imFeyesele

Dissotis irvingiana Hook. (*Antherotoma irvingiana* (Hook.) Jacq.-Fél.; *Antherotoma irvingiana* (Hook.) Jacq.-Fél. var. *alpestris* (Taub.) A. Fern. & R. Fern.; *Dissotis irvingiana* forma *irvingiana*; *Dissotis senegambiensis* (Guill. & Perr.) Triana; *Dissotis senegambiensis* fo. *irvingiana* (Hook.) A. & R. Fernandes; *Dissotis senegambiensis* var. *senegambiensis*)

Ghana. Herb, erect, shrubby, stems reddish with stiff beige hairs, calyx green to red, corolla magenta, throat and filaments yellow, anthers magenta, in moist streamside

See *Niger Flora* 346. 1849, *Botanical Magazine* 85: t. 5149. 1859, *Genera Plantarum* 1: 729, 745. 1867, *Transactions of the Linnean Society of London* 28(1): 58. 1871 [1872] and *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie Sér. 4, 16(4): 270. 1994, Journal of Ethnopharmacology* 70: 281–300. 2000

(Leaves pain killer, applied for snakebite, wounds, sores.)

Dissotis princeps (Kunth) Triana (*Rhexia princeps* Kunth; *Rhexia princeps* Humb. & Bonpl.)

South Africa. Shrub, erect, weak, purple flowers, famine food, see also *Rhexia*

See *Species Plantarum* 1: 346. 1753, *Monographia Melastomacearum* 2: 122, t. 46. 1821, *Transactions of the Linnean Society of London* 28(1): 57. 1871[1872] and Dyer, R.A. "*Dissotis princeps*." *The Flowering Plants of Africa* 32: t. 1250. 1952

(Leaves are used to treat dysentery and diarrhea. Roots eaten as an aphrodisiac.)

in English: purple dissotis, purple wild tibouchina, royal dissotis, wild tibouchina

in South Africa: kalwerbossie, sichobochoho, umpongamponga

Dissotis pterocaulos Wickens

Tropical Africa.

See *Kew Bulletin* 29(1): 146, f. 3. 1974

(Leaves decoction for cough, bronchitis. Veterinary medicine.)

in Burundi: ishonge

Dissotis rotundifolia (Sm.) Triana (*Dissotis buettneriana* (Cogn. ex Büttner) Jacq.-Fél.; *Dissotis plumosa* (D. Don) Hook. f.; *Dissotis rotundifolia* A. Fern. & R. Fern.; *Heterotis buettneriana* (Cogn. ex Büttner) Jacq.-Fél.; *Heterotis plumosa* (D. Don) Benth.; *Heterotis rotundifolia* (Sm.) Jacq.-Fél.; *Heterotis rotundifolia* var. *buettneriana*; *Melastoma plumosum* D. Don; *Osbeckia buettneriana* Cogn. ex Büttner; *Osbeckia rotundifolia* Sm.; *Osbeckia rubropilosa* De Wild.)

Tropical Africa, Nigeria. Shrub, erect, decumbent or prostrate, spreading, young stems, petioles and nerves pink, petals pale pink, wet places, see also *Heterotis*

See *The Cyclopaedia*; or, universal dictionary of arts, ... 25: *Osbeckia* no. 4. 1813, *Memoirs of the Wernerian Natural History Society* 4(2): 291. 1823, *Niger Flora* 348. 1849, *Flora of Tropical Africa* 2: 452. 1871, *Transactions of the Linnean Society of London* 28(1): 58. 1871[1872], *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 31: 95. 1890 and *Plantae Bequaertianae* 1: 378. 1922, *Boletim da Sociedade Broteriana*, ser. 2 28: 67. 1954, *Adansonia* 11(3): 547. 1971, *Adansonia* n.s. 20(4): 417. 1981

(Leaves and fruits analgesic, antiseptic. Leaves for stomach troubles, toothache, cold, cough, tuberculosis, fevers, yellow fever, gonorrhoea, diarrhoea, dysentery, jaundice, rheumatism, eye problems. Magic, ritual.)

in English: rockrose

in Congo: olondo

in Guinea: mandafnade

in Senegal: ba poti

in Sierra Leone: ebowa, febungu, felebunbe, legbe, ngaku wui

Dissotis senegambiensis (Guill. & Perr.) Triana (*Dissotis hildebrandtii* Kraenzl.; *Dissotis irvingiana* Hook.; *Dissotis irvingiana* forma *abyssinica* (Gilg) A. & R. Fernandes; *Osbeckia abyssinica* Gilg; *Osbeckia senegambiensis* Guill. & Perr.; *Rhodosepala erecta* Cogn.; *Rhodosepala pauciflora* Baker; *Rhodosepala procumbens* Cogn.)

Tropical Africa. Bush, variable

See *Florae Senegambiae Tentamen* 310. 1833, *Botanical Magazine* t. 5149. 1859, *Journal of the Linnean*

Society, Botany 22: 475. 1886(1887), *Monographiae Phanerogamarum* 7: 339. 1891 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 76: 15. 1931, *Journal of Ethnopharmacology* 70: 281–300. 2000

(Leaves and stems for diarrhoea and stomachache. Leaves pain killers, for wounds. Roots laxative, for stomach troubles.)

in Ghana: ayuma

in Nigeria: akpe-ji, azaga, irun-awere

in Rwanda: munyuwihene, munyuwintama, ubwunyubwintama, umunyu w' intama

in Senegal: dibo ñamo, dunzi, fondo faru

Dissotis senegambiensis (Guill. & Perr.) Triana var. ***alpestris*** (Taub.) A. & R. Fernandes (*Dissotis alpestris* Taub.; *Dissotis cincinnata* Gilg; *Dissotis irvingiana* forma *alpestris*; *Dissotis irvingiana* forma *osbeckioides* A. & R. Fernandes; *Dissotis irvingiana* var. *alpestris* (Taub.) A. & R. Fernandes)

Tropical Africa.

See *Transactions of the Linnean Society of London* 28(1): 58. 1871 [1872], *Die Pflanzenwelt Ost-Afrikas* C: 295. 1895 and *Boletim da Sociedade Broteriana*, ser. 2 46: 69. 1972

(Laxative, astringent.)

Dissotis trothae Gilg (*Dissotis grandiceps* Kraenzl.; *Dissotis mildbraedii* Gilg)

Zambia. Herb or shrub, perennial, flowers 5-merous in terminal very compact panicles, receptacle oblong-cylindrical densely setose, petals obovate mauve to bright purple ciliate at margin, in marshy places, on the banks of lakes and rivers

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 2: 19, t. 2/B. 1898

(Leaves antiinflammatory, used for pain and rheumatism.)

in Burundi: ishonge, umushonge

in Congo: cirerabana, ubwunyubwintama

in Madagascar: niaouli

Dissotis tubulosa Triana

Liberia. Erect, herbaceous, creeping, white pink flowers

See *Trans. Linn. Soc. London* 28(1): 58. [8 Dec 1871–13 Jan 1872]

(A cough medicine for infants.)

Distemon Wedd. Urticaceae

From the Greek *di* 'two' and *stemon* 'stamen', alluding to the number of stamens, see *Linnaea* 18: 494. 1845, *Archives du Muséum d'Histoire Naturelle* (Monog. Urt.). 9: 532, 550, t. 20. 1856, *Monatsberichte der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1866: 881. 1866.

Distemon indicum Wedd. (*Neodistemon indicum* (Wedd.) Babu & Henry)

India.

See *Archives du Muséum d'Histoire Naturelle* 9: 532, 550–551, t. 20. 1856 and *Taxon* 19: 651. 1970

(Root bark pounded and plastered on dog bite or snakebite. Young leaves and roots as a vegetable giving energy and good health.)

in India: aoksaklo, zaklo tasola

Distemonanthus Benth. Fabaceae (Caesalpiniaceae, Cassieae)

Greek *di* 'two', *stemon* 'stamen' and *anthos* 'flower', referring to the two fertile stamens, see *Genera Plantarum* 1: 573. 1865.

Distemonanthus benthamianus Baillon (*Distemonanthus laxus* Oliv.)

Tropical Africa. Perennial non-climbing tree

See *Histoire des Plantes* 2: 135. 1870, *Flora of Tropical Africa* 2: 282. 1871

(Stem bark extract antimicrobial, used to treat infertility. Stem bark and leaves for colds, fever, skin diseases.)

in English: African satinwood, Nigerian satinwood, quinine tree, yellow satinwood

in French: acacia du Gabon

in Cameroon: eyen, ejen, eyene, m'fan, movingui, mowingui, nadinga, tabaco, tabako, sebako, sele, sella, sielo

in Congo: levida, mouvengue, muvengue

in Gabon: eli-bengan, even, eyen, eyene, moulenda, movengui, movingui, mowingui, muvenghi, ogaminia, ogueminia, ovengue, owingue

in Ghana: bomsamdua, bonsamdua, ehurufren

in Ivory Coast: barre

in Nigeria: ayan (Yoruba); anyaran (Edo); anyaran (Itsekiri); edo (Ijaw); ochasi (Igbo); bokwa (Boki)

in Togo: okpe

in W. Africa: bosong, ogamignia, ogeminia, ougeminia

in Yoruba: ayan, igi aje

Distichlis Raf. Poaceae (Gramineae)

From the Greek *distichos* 'in two rows, in two ranks', *dis* 'twice' and *stichos* 'rank', referring to the leaves, to the conspicuous phyllotaxy; type *Distichlis maritima* Raf., see *Fl. Ludov.* 144. 1817, *Journal de Physique, de Chimie,*

d'Histoire Naturelle et des Arts 89: 104. 1819, *Neogenyton* 4. 1825 and *Rhodora* 27: 67–72. 1925, *Fl. Victoria* 145. 1931, *Bulletin of the Torrey Botanical Club* 70(6): 638–650. 1943 [The North American variations of *Distichlis spicata*.], *Gram. Bonar.* ed. 4: 28. 1946, *Fieldiana, Botany* 24(2): 38–331. 1955, *Rev. Arg. Agron.* 22: 86–94. 1955 [The grass genus *Distichlis*.], *Madroño* 18: 33–39. 1965, *Willdenowia* 5: 472. 1969, *Grasses Tasmania* 132. 1991, *Flora Mesoamericana* 6: 258. 1994, *Fontqueria* 46: [i-ii], 1–259. 1997, S.A. (Plant infusion or decoction laxative, disinfectant, for skin ailments, pimples, cold, gonorrhoea, venereal diseases.)

in English: alkali grass, coastal saltgrass, desert saltgrass, inland saltgrass, marsh spikegrass, salt grass, seashore saltgrass, spicate saltgrass, spike grass

in Mexico: huizapol, huizapole, pasto espigado del pantano, pasto salado playero, pelo de chanco, tequizquizacatl, zacahuistle, zacate salado

Dittrichia Greuter Asteraceae

After the German botanist Manfred Dittrich, 1934–, specialist on Asteraceae of the Herbarium, Conservatoire et Jardin botaniques de la Ville de Genève, Switzerland; see Werner Rodolfo Greuter, born 1938, Director of the Herbarium of the Botanischer Garten und Botanisches Museum Berlin-Dahlem, in *Exsiccatorum genavensium* a conservatorio botanico distributorum fasc. 4: 71. 1973.

Dittrichia graveolens (Linnaeus) Greuter (*Erigeron graveolens* Linnaeus; *Inula brahuica* Boiss.; *Inula graveolens* (Linnaeus) Desfontaines)

Europe, North Africa.

See *Species Plantarum* 2: 881–884. 1753, *Centuria I. Plantarum ...* 1: 28–30. 1755, *Flora Atlantica* 2: 275. 1799, *Flora Orientalis* 3: 199. 1875 and *Exsicc. Genav. Conserv. Bot. Distrib. Fasc.* 4: 71. 1973, *Taxon* 30: 695–696. 1981, *Acta Botanica Malacitana* 19: 97–101. 1994

(*Dittrichia graveolens* has been shown to cause allergic contact dermatitis. The plants produce sesquiterpene lactones, which have been shown for many composites to be linked to allergic contact dermatitis in humans. Little evidence exists that the plants are toxic, although oxalate poisoning has been reported to be associated with grazing of *Dittrichia graveolens*, and fishermen in southern Italy reportedly use the macerated leaves to stun fish. Livestock deaths due to ingestion of *Dittrichia graveolens* have been linked to enteritis caused by the barbed pappus bristles puncturing the small intestine.)

in English: stinkweed, stinkwort

Dobera Juss. Salvadoraceae

An Arabic name for the plant, see *Genera Plantarum* 425. 1789, *An Introduction to the Natural System of Botany* 269. 1836.

Dobera glabra (Forssk.) Poir. (*Dobera glabra* (Forssk.) Poir. var. *macalusoii* (Mattei) Fiori; *Dobera glabra* (Forssk.) Poir. var. *subcoriacea* Engl. & Gilg; *Tomex glabra* Forssk.)

East and northeast Africa. Evergreen tree, rounded or spreading low crown, flowers greenish white fragrant, fruit wrinkled yellow-orange, gum edible, cotyledons eaten when cooked, fruit pulp eaten raw, camel and goat fodder, fruit edible after frequent boilings

See *Species Plantarum* 1: 118. 1753, *Flora Aegyptiaco-Arabica* 32. 1775, *Encyclopédie Méthodique. Botanique ... Supplément* 2: 493. 1812

(Boiled root infusion given to a mother after birth to prevent fainting. Leaves pounded, soaked in cold water and solution used as drops for eye disease. A ceremonial tree and meeting place. Leaves burnt in ceremonies, for sick cattle, for protection during battles and against wild animals, and by young girls before circumcision.)

in Kenya: edapal, garas, garse, garso, gashir, kada, kadite, keration, kikaitha, kisiu, koros, korosion, mkuha, mokopa, msega, mswaki, mukuha, mungaritha, ndaaruma, ng'adapala, serri

in Sudan: meikah

Dobera loranthifolia (Warb.) Harms (*Dobera allenii* N.E. Br.; *Dobera loranthifolia* (Warb.) Warb. ex Harms; *Platymitium loranthifolium* Warb.)

Kenya, Tanzania. Tree, spreading crown, corky bark, white flowers, yellow-green wrinkled fruits, fruit pulp eaten raw

See *Die Natürlichen Pflanzenfamilien* Nachtr. zu II–IV: 282. 1897 and *Kew Bulletin* 1914 80. 1914

(Boiled root infusion given to a mother after birth to prevent fainting. Leaves pounded, soaked in cold water and solution used as drops for eye disease. A ceremonial tree. Veterinary medicine.)

in Kenya: dende, edapal, kisiu, mkuha, msega, mswaki

Dobinea F. Hamilton ex D. Don Anacardiaceae

Dobinea delavayi (Baill.) Baill. (*Podoon delavayi* Baill.)

Nepal, China.

See *Prodr. Fl. Nepal.* 249. 1825, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(86): 681–682. 1887, *Bulletin Mensuel de la Société Linnéenne de Paris* 2(105): 835. 1890

(The rhizome is used in traditional Chinese medicine.)

in China: yang jiao tian ma

Dodecatheon L. Primulaceae

Latin *dodecatheon* and Greek *dodekatheon* for an herb, so called after the twelve greater gods (Plinius), Greek *dodeka* and *theos* 'a god', the plant was supposed to be under the care of the principal primary gods, or referring to the number of flowers; see *Species Plantarum* 1: 142–145. 1753, *Autikon Botanikon* 185. 1840, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 297. Ansbach 1852 and *Brittonia* 59(1): 81. 2007.

Dodecatheon hendersonii A. Gray (*Dodecatheon hendersonii* var. *typicum* (A. Gray) R. Knuth, nom. inval.; *Dodecatheon hendersonii* A. Gray var. *typicum* R. Knuth; *Dodecatheon meadia* L. var. *hendersonii* (A. Gray) K. Brandegee; *Dodecatheon meadia* L. var. *hendersonii* K. Brandegee; *Meadia hendersonii* (A. Gray) Kuntze; *Meadia hendersonii* Kuntze; *Primula hendersonii* (A. Gray) Mast & Reveal) (named for professor Louis Forniquet Henderson, 1853–1942, botanist, University of Idaho, plant collector)

North America. Perennial herb, food

See *Botanical Gazette* 11(9): 233. 1886, *Zoë* 1: 20. 1890, *Revis. Gen. Pl.* 2: 398. 1891 and *Das Pflanzenreich* IV, 237: 244. 1905, *Brittonia* 59(1): 81. 2007

(Sedative. Ritual, ceremonial.)

in English: mosquito bills, sailor caps, shooting star

Dodecatheon hendersonii A. Gray subsp. *hendersonii*

North America. Perennial herb, food

See *Botanical Gazette* 11(9): 233. 1886, *Zoë* 1: 20. 1890, *Revis. Gen. Pl.* 2: 398. 1891 and *Das Pflanzenreich* IV, 237: 244. 1905, *Brittonia* 59(1): 81. 2007

(Sedative. Ritual, ceremonial.)

in English: mosquito bills, sailor caps, shooting star

in New Caledonia: nduleen

Dolichos L. Fabaceae (Phaseoleae)

Latin and Greek *dolichos* for a plant, the kidney bean (Theophrastus, *HP.* 8.3.2 and 8.11.1, and Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 725. 1753, *Genera Plantarum*. Ed. 5. 324. 1754, *Mantissa Plantarum* 1: 101. 1767, *Species Plantarum*. Editio quarta 3(2): 1053–1068. 1802, *Nuovo Giornale dei Letterati* 8: 113. 1824, *Nuovo Giornale de' Letterati. Scienze* 10: 29. Pisa 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 398. 1825, *Annales des Sciences Naturelles* (Paris) 4(1): 97. 1825,

Prodromus Florae Peninsulae Indiae Orientalis 248. 1834, *Commentariorum de Plantis Africae Australioris* 145, 149. 1836, *The Flora of British India* 2(4): 210. 1876 and *Notulae Systematicae*. *Herbier du Museum de Paris* 14(3): 180. 1951, *Kew Bulletin* 24(3): 438–440. 1970, *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 109–110. 1978.

Dolichos capensis L. (*Vigna capensis* (L.) Walp.; *Vigna capensis* Walp.; *Vigna capensis* (E. Mey.) Walp.)

South Africa, Mauritius. Perennial climber, fusiform roots

See *Commentariorum de Plantis Africae Australioris* 147. 1836, *Linnaea* 13: 533. 1839 and *Kew Bull.* 24: 507–569. 1970

(For skin diseases.)

in India: hadundo

in Mauritius: pois du Cap

Dolichos kilimandscharicus Taub.

Tropical Africa. Perennial non-climbing herb

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19, Beibl. 47: 32. 1894 and *Kew Bull.* 24: 379–447. 1970

(Toxic. Leaves and green fruits antiviral, laxative. Roots decoction for diarrhea, dysentery. Poisonous to fish. Veterinary medicine, roots infusion stomachic, vermifuge.)

in Tanzania: ngupa, nyongwe, nyoongme

Dolichos kilimandscharicus Taub. subsp. *kilimandscharicus* (*Dolichos bellus* Harms; *Dolichos bequaertii* De Wild.; *Dolichos buchananii* Harms; *Dolichos dubius* De Wild.; *Dolichos goetzei* Harms; *Dolichos lupiniflorus* N.E. Br.; *Dolichos lupinoides* Baker; *Dolichos malosanus* Baker; *Dolichos splendens* sensu auct.; *Dolichos stolzii* Harms; *Dolichos swynnertonii* Baker f.; *Dolichos verdickii* De Wild.; *Tephrosia sericea* Baker)

Tropical Africa. Perennial non-climbing herb, small multi-stemmed shrub, purple pea flowers, flat cylindrical pods

See *Syn. Pl.* 2(2): 328. 1807, *Transactions of the Linnean Society of London* 13: 545. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 249. 1825, *Natuur-Geneesk. Arch. Ned.-Indie* 3: 76. 1846, *Flora of Tropical Africa* 2: 107. 1871

(Roots decoction for diarrhea, dysentery; roots for skin diseases, itch, scabies, ringworm. Poisonous to fish. Veterinary medicine, roots infusion stomachic, vermifuge.)

in Tanzania: nabitiro

in Zambia: chibombolwa, chileleke, chilure

Dolichos oliveri Schweinf. (*Dolichos maitlandii* Baker f.; *Dolichos oliveri* Schweinf. var. *kilimandscharicus* Taub. ex Baker f.; *Dolichos volkensii* Taub.)

Tropical Africa. Perennial non-climbing shrub

See *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 18: 656. 1868 and *The Leguminosae of Tropical Africa* 2: 446. 1929

(Root considered to be poisonous. Veterinary medicine, roots decoction for East Coast fever, for Theileriosis or Mediterranean Coast Fever.)

in Kenya: idakat, kitenyien

Dolichos trilobus L. (*Dolichos andongensis* Baker; *Dolichos cristatus* Miq.; *Dolichos debilis* A. Rich.; *Dolichos falcatus* Willd.; *Dolichos falcatus* Klein ex Willd.; *Dolichos kosyunensis* Hosok.; *Dolichos trilobus* Blanco; *Dolichos trilobus* Houtt., nom. illeg.; *Dolichos trilobus* Lour., nom. illeg.; *Dolichos trilobus* Thunb.; *Dolichos tuberosus* Roxb.; *Phaseolus trilobatus* (L.) Baill.; *Phaseolus trilobus* Aiton; *Phaseolus trilobus* Michx., nom. illeg., non *Phaseolus trilobus* Aiton; *Phaseolus trilobus* Wall.; *Pueraria lobata* (Willd.) Ohwi; *Vigna trilobata* (L.) Verdc.)

Tanzania, India. Perennial non-climbing herb, twiner, herbaceous hairy stems from a woody rootstock, standard petal red-mauve-pink with darker markings or veining, oblong curved pods, seeds edible, plant for fodder, in grassland, bushland and forest

See *Species Plantarum* 2: 723–726. 1753, *Hortus Kewensis*; or, a catalogue ... 3: 30. 1789, *Flora Cochinchinensis* 2: 439. 1790, *Species Plantarum*. Editio quarta 3(2): 1047. 1802, *Flora Boreali-Americana* 2: 60. 1803, *A Numerical List of Dried Specimens* n. 5541. 1831, *Flora de Filipinas* 403. 1845, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(48): 379. 1883 and *Journal of the Society of Tropical Agriculture* 4: 312. 1932, *Taxon* 17: 170. 1968, *Cytologia* 54: 51–64. 1989

(Used in Sidha. Tubers pounded and used as medicine to treat chickenpox.)

in Tanzania: kunde mbala, lungatungu, nandalamwani, nyanandala

in India: itamungatige, itoomungeetiga, kaduhurali, katamara, pampumoccai, sheem, verriulavu, verrivulava, wal-dambala

Dolichos trilobus L. subsp. *trilobus* (*Dolichos falcata* Klein; *Dolichos falcatus* Willd.; *Dolichos schliebenii* Harms; *Vigna tenuis* Franch.)

SE Asia, Tropical Africa. Perennial climbing herb

See *Species Plantarum* 2: 723–726. 1753 and *Kew Bulletin* 24(3): 423–424. 1970, *A Revised Handbook of the Flora of Ceylon* 7: 108–381. 1991

(Used in Sidha. Roots in piles, constipation, ophthalmia and skin diseases. Seeds decoction in rheumatism.)

in India: itamungatige, itoomungeetiga, kaduhurali, katamara, pampumoccai, sheem, verriulavu, verrivulava, wal-dambala

Dolichos trinervatus Baker (*Dolichos tricostatus* Baker f.)

Tropical Africa, Zimbabwe, Malawi. Perennial non-climbing herb, purple flowers, standard and wings red-purple

See *Bulletin of Miscellaneous Information Kew* 1897(128–129): 262. 1897

(Roots pounded, mixed with hot water and drunk to get rid of worms. Veterinary medicine, roots for diarrhea.)

in Tanzania: idua, nyachinyongwa

Doliocarpus Rolander Dilleniaceae

Latin *dolium* ‘with a wide mouth’ and Greek *karpos* ‘fruit’, some suggested from Greek *dolios* ‘crafty’, see *Kongliga Svenska Vetenskaps Akademiens Handlingar* 17: 249, 260–261. 1756, *Histoire des plantes de la Guiane Française* 1: 552, 556, t. 219, 221 and 2: 917–918, t. 350. 1775, *Systema Naturae* ... editio decima tertia, aucta, reformata 1: 805. 1791, *Systema Vegetabilium*, editio decima sexta 4(2): app. 407. 1827, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 1: 371. 1832, *Annales des Sciences Naturelles; Botanique*, série 4 9: 47. 1858, *Annales des Sciences Naturelles; Botanique*, série 4 17: 16. 1862, *Flora Brasiliensis* 13(1): 73, 76. 1863 and *Ann. Missouri Bot. Gard.* 52(4): 579–598. 1966, *Mitt. Bot. Staatssamml. München* 9: 1–105. 1971.

Doliocarpus dentatus (Aubl.) Standl. (*Tigarea dentata* Aubl.; *Curatella glazioviana* Gilg; *Curatella glaziovii* Gilg; *Delima dasyphylla* Miq., nom. illeg.; *Delima dasyphylla* fo. *angustifolia* Miq.; *Delima tomentosa* (Willd.) E. Mey.; *Doliocarpus brevipedicellatus* Garcke; *Doliocarpus congestiflorus* (Triana) Gilg & Werderm.; *Doliocarpus dentatus* Standl.; *Doliocarpus dentatus* subsp. *rufescens* (Sleumer) Kubitzki; *Doliocarpus oaxacanus* Szyszyl.; *Doliocarpus platystigma* Pilg.; *Doliocarpus pubens* Mart.; *Doliocarpus rufescens* Sleumer; *Doliocarpus semidentatus* Garcke; *Ricaurtea congestiflora* Triana; *Tetracera cuspidata* G. Mey.; *Tetracera tomentosa* Willd., nom. illeg.; *Tigarea dentata* Aubl.)

Guyana. Woody climber, petals creamy white, red ripe globose fruit

See *Histoire des plantes de la Guiane Française* 2: 920–921, t. 351. 1775, *Systema Naturae* ... editio decima tertia, aucta, reformata 1: 805. 1791, *Species Plantarum*. Editio quarta 2: 1241. 1799, *Primitiae Florae Essequeboensis* ... 205. 1818, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 12(2): 816. 1825, *Flora* 21(2, Beibl. 4): 49. 1838, *Linnaea* 22: 47–48. 1849, *Stirpes Surinamensis Selectae* 108. 1850, *Annales des Sciences Naturelles; Botanique*, série 4 9: 48. 1858, *Diss. Math. Nat. Ac. Cracow* 27: 139. 1894, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(Beibl. 60): 25. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 173. 1901, *Die natürlichen Pflanzenfamilien*, Zweite Auflage

21: 21. 1925, *Journal of the Washington Academy of Sciences* 15(13): 286. 1925, *Repertorium Specierum Novarum Regni Vegetabilis* 39: 46. 1935, *Mitteilungen der Botanischen Staatssammlung München* 9: 59. 1971

(Stem and bark infusion with aphrodisiac qualities. Watery sap from a freshly cut stem drunk for the relief of urethral stricture.)

in Guyana: kapadula

Dolomiaea DC. Asteraceae

For the French geologist Dieudonné (called Déodat) de Gratet de Dolomieu, 1750–1801; this genus could be related to *Carduus*, *Jurinea* or *Saussurea* s.l., see *Archives de Botanique* 2: 330. 1833 and *Sovetsk. Bot.* 1939, No. 8, 55. 1939, Kenneth L. Taylor, in *D.S.B.* 4: 149–153. 1981, *Acta Phytotax. Sin.* 24(4): 293. 1986, *Annals of Botany* 1–12. 2007.

Dolomiaea macrocephala DC. (*Jurinea macrocephala* Benth. ex Hook.f.; *Jurinea macrocephala* DC.; *Jurinella macrocephala* (Royle) Aswal & Goel)

India, Himalaya.

See *Archiv. Bot.* ii. (1833) 330. 1833, *Prodr.* (DC.) 6: 674. 1838, *Fl. Brit. India* [J.D. Hooker] 3: 378. 1881 and *Indian J. Forest.* 11(4): 339. 1989 [1988 publ. 1989]

(Ritual, ceremonial, root extract as incense.)

in India: guggal

Dolomiaea souliei (Franchet) Shih (*Jurinea souliei* Franch.; *Vladimiria souliei* (Franch.) Ling)

China. Herbs, scabrid pappus bristles

See *Bull. Sci. Soc. Philom. Paris* 1821: 140. 1821, *Journal de Botanique* (Morot) 8(20): 337. 1894 and *Sovetskaja botanika* 8: 55. 1939, *Acta Phytotaxonomica Sinica* 10(1): 75–91. 1965, *Acta Phytotaxonomica Sinica* 24(4): 292–296. 1986, *Acta Phytotaxonomica Sinica* 32: 190–192. 1994, *Economic Botany* 60(3): 227–253. 2006, *Environmental Toxicology and Pharmacology* 27(2): 225–230. 2009, *Environmental Toxicology and Pharmacology* 28(2): 206–212. 2009

(Roots for the treatment of renal disorders.)

in English: thick-leaved dolomiaea

in China: chuan mu xiang

Dombeya Cav. Sterculiaceae (Malvaceae)

After the French botanist Joseph Dombey, 1742–1796 (he died in prison, Montserrat, West Indies) (there is still no certainty with respect to the death year of D., Pritzel accepts 1793, Brummitt and Powell 1796, *D.S.B.* 1794, etc.), plant collector, physician, naturalist, explorer and traveller, between 1777–1788 in Chile and Peru with H. Ruíz López and José Antonio Pavón (1754–1844). See *Diss.* 2, *Secunda Diss. Bot. App.*:

[4]. 1786, *Monadelphiae Classis Dissertationes Decem* 3: 121, tt. 38, 41. 1787, *Collect. Bot.* 14. 1821, *Tableau de l'École de Botanique* 252. 1829, *Flore des Serres et des Jardins de l'Europe* 6: 85, 225. 1850, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 481, 483. 1885 and *Mon. Afrik. Pfl.-Fam. und Gatt.* 21. 1900, *Candollea* 3: 29, 36, 55, 93. 1926, E. Alvarez López, "Dombey y la expedición al Perú y Chile." *Anales Inst. Bot. Cavanilles.* 14: 31–129. 1956, *Candollea* 16: 247–449. 1958, J.H. Barnhart, *Biographical Notes upon Botanists.* 1: 463. 1965, Francisco Guerra, in *D.S.B.* 4: 156–157. [d. 1794] 1981, Verdoorn, I.C. & Herman, P.P.J. "Revision of the genus *Dombeya* (Sterculiaceae) in southern Africa." *Bothalia* 16(1): 1–9. 1986, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 94. 1989, Seyani, J.H. *The genus Dombeya (Sterculiaceae) in continental Africa.* Opera Botanica Belgica 2. National Botanic Garden of Belgium, Meise, Belgium. 1991, *Journal of Ethnopharmacology* 71(1–2): 315–219. 2003.

Dombeya bagshawei Baker f.

Tropical Africa. Shrub, erect, white flowers

See *J. Linn. Soc., Bot.* 37: 127. 1905 [1904–1906 publ. 1905]

(Roots for diarrhea, dysentery; an infusion drunk as a laxative and a decoction to prevent miscarriage. Leaves emetic, an infusion taken for diarrhea, dysentery, cholera, gastrointestinal problems; leaves juice stomachic. Veterinary medicine, leaves juice for diarrhea, East Coast fever. Magic, leaves against bad spirits.)

in Burundi: umukongwa

Dombeya buettneri K. Schum. (*Dombeya bagshawei* Baker f.; *Dombeya claessensii* De Wild.; *Dombeya elskensii* De Wild.; *Dombeya emarginata* E.A. Bruce; *Dombeya kandoensis* De Wild. & Staner; *Dombeya mildbraedii* Engl.; *Dombeya pedunculata* K. Schum.; *Dombeya quarrei* De Wild.; *Dombeya robynsii* De Wild.; *Dombeya seretii* De Wild.; *Dombeya squarrosa* Engl.)

Tropical Africa. Shrub or small tree, white flowers in dense axillary corymbose cymes

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15(1): 133. 1892, *Die Pflanzenwelt Ost-Afrikas* C: 269. 1895 and *Annales du musée du Congo. Serie 1, Botanique* V, 2: 50. 1907, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 317–318. 1910, *Contribution à l'étude de la flore du Katanga* Suppl. 1: 49, 51. 1927, *Plantae Bequaertianae* 4: 414–415. 1928, *Bulletin of Miscellaneous Information Kew* 1932: 94. 1932, *Contribution à l'étude de la flore du Katanga* Suppl. 4: 59. 1932, *Opera Bot. Belg.* 2: 75. 1991, *Journal of Ethnopharmacology* 71(1–2): 315–319. 2000

(Leaves extract in the prevention and treatment of peptic ulcer disease. Leaves emetic, an infusion taken for diarrhea, gastrointestinal problems, dysentery, cholera; leaf sap applied on wounds; leaves juice stomachic. Veterinary

medicine, leaves juice for diarrhea, East Coast fever. Magic, leaves against bad spirits.)

in Nigeria: ewe-ofo, ewu omo, ofo

Dombeya burgessiae Gerrard ex Harv. (*Assonia burgessiae* (Gerr. ex Harv.) Kuntze; *Dombeya burgessiae* Gerr. ex Harv. & Sond.; *Dombeya elegans* K. Schum.; *Dombeya rosea* Bak.f.), (named by Gerrard in honor of Miss Burgess of Birkenhead)

South Africa. Tree or shrub, mature twigs maroon-red with brown pubescence, pale pink white scented flowers, drooping inflorescence, bark and leaves eaten by black rhinos

See *Flora Capensis* (Harvey) 2: 590. 1862 and *Journal of Ethnopharmacology* 97(2): 285–291. 2005

(Antibacterial, antiinflammatory.)

in English: pink dombeya, pink wild pear, Zulu cherry

in Southern Africa: persdrolpeer; iBunda (Zulu); mupfulwi, mupfulwi (Venda); surumene (Shona)

in S. Rhodesia: surumene

in Tanzania: idwedwe, ituwa-ramtati, lukuku, mki'ika, mkole ngala, msitu, mutete, nakore

Dombeya cymosa Harv.

South Africa, southern Mozambique. Shrub or small tree

See *Flora Capensis* 2: 589. 1862 and *Journal of Ethnopharmacology* 97(2): 285–291. 2005

(Antibacterial, antiinflammatory.)

in English: Natal dombeya, Natal wild pear, small-flowered dombeya

in South Africa: Nataldrolpeer; iBunda, iGcibo, umXaba (Zulu); uZingathi (Xhosa)

Dombeya dichotomopsis Hochr.

Tropical Africa. Shrub or small tree

See *Candollea* 3: 46. 1926

(Leaves decoction used against cough.)

in Madagascar: hafotra

Dombeya goetzenii K. Schum.

Tropical Africa, Uganda. Tree or shrub, white flowers

See Engler, Heinrich Gustav Adolf (1844–1930), *Verzeichniss der auf der Graf v. Goetzen'schen Expedition bei der Besteigung der Kirunga gesammelten Pflanzen.* [Berlin, 1896] [*Durch Afrika von Ost nach West.*] and *Journal of Ethnopharmacology* 44: 199–209. 1994

(Bark antifertility, used for abortion or prevention of pregnancy. After a large meal of meat, a decoction of the bark is taken for indigestion. Veterinary medicine, for brucellosis.)

in Congo: lusolo, nanga, umukore, umunkamba, umuramba
in Rwanda: umukore

Dombeya kirkii Mast. (*Dombeya gilgiana* K. Schum.; *Dombeya mukole* Sprague) (the species was named after Sir John Kirk, 1832–1922, traveller, companion of David Livingstone)

Ethiopia, Congo, East Africa, South Africa. A shrub or tree, leaves rough above, white flowers sweetly scented, related to *Dombeya cymosa*

See *Flora of Tropical Africa* 1: 227. 1868

(A decoction of the root drunk against yaws and abdominal pain.)

in English: Kirk's dombeya, river dombeya, river wild pear

in Southern Africa: muTowe (Shona)

in Tanzania: gare, msosowara

Dombeya mandenensis Arènes

Madagascar. Shrub or small shrubby tree, white-cream fragrant flowers

See *Candollea* 16: 398–399. 1958

(Branches mucilaginous used against inflammation of the gums.)

in Madagascar: berehoka

Dombeya mollis Hook. (*Dombeya loucoubensis* Baill.; *Dombeya mollis* var. *loucoubensis* (Baill.) Hochr.; *Dombeya parviflora* Boivin ex Baill.; *Dombeya parviflora* Arènes)

Madagascar. Shrub or small tree, hairy, inflorescence an axillary umbel

See *Monadelphiae Classis Dissertationes Decem* 2: [App. 1]. 1786, *Hort. Maurit.* 41. 1837, *Botanical Magazine* t. 4578. 1851, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 492–493. 1885 and *Candollea* 3: 89. 1926, *Candollea* 16: 336. 1958, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 9: 193. 1959

(Antibacterial, antiinflammatory. Veterinary medicine, plague.)

in Madagascar: ramitapona

Dombeya mupangae K. Schum.

Tropical Africa, Tanzania. Tree or shrub

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 5: 39. 1900

(Roots and stem for venereal diseases, insanity and infertility. Roots used to treat infertility in women.)

in Tanzania: mjata, mluwati, msoso-wa-wana, msoso wa wana, msosoawana, msosowa wana, msosowawana, nashiu

Dombeya pilosa Cordem. (*Dombeya pilosa* var. *globigera* (Cordem.) Cordem.)

Tropical Africa. Dioecious tree

See *Flore de l'Île de la Réunion* 312. 1895 and *Journal of Ethnopharmacology* 95: 19–26. 2004

(Leaf and stem antioxidant.)

Vernacular names: bois de senteur, grand mahot blanc, mahot, mahot blanc

Dombeya quinqueseta (Delile) Exell (*Dombeya multiflora* (Endl.) Planch.; *Dombeya multiflora* Planch.; *Xeropetalum quinquesetum* Delile)

Tropical Africa, Senegal and Gambia. Shrub or small tree

See Delile, Alire Raffeneau, *Centurie de plantes d'Afrique du voyage à Méroé* recueillies par M. Caillaud. Paris, 1826 and *Journal of Botany, British and Foreign* 73: 263. 1935

(Stem bark for the treatment of malaria, an antidote for snakebites and insecticidal. Roots used for fever, stomach-ache, schistosomiasis.)

Dombeya rotundifolia (Hochst.) Planch. var. *rotundifolia* (*Dombeya damarana* K. Schum.; *Dombeya densiflora* Planch. ex Harv.; *Dombeya dinteri* Schinz; *Dombeya rotundifolia* Planch.; *Dombeya rotundifolia* Bojer; *Xeropetalum rotundifolium* Hochst.)

East Africa. Small tree, rough corky bark, rough leaves, showy white or pink sweet scented flowers in axillary clusters, hairy capsules, flowers attract bees, leaves as fodder

See *Flora* 27: 295. 1844, *Flore des Serres et des Jardins de l'Europe* 6: 225. 1850, *Flora Capensis* 2: 589. 1862 and *African Study Monographs*, Supplementary Issue 1: 105–139. March 1982, *Bothalia* 16(1): 1–9. 1986, *South African Journal of Botany* 67(2): 349–353. 2000, *South African Journal of Botany* 67(2): 349–353. 2001, *Journal of Ethnopharmacology* 86: 97–108. 2003

(Antiinflammatory, antibacterial, extracts of the leaves and young shoots. Boiled roots in the treatment of rheumatism, infertility, syphilis; a juice of pounded roots, soaked in water, used for the diarrhea in children; root decoctions drunk against stomach pain. Bark decoction drunk against meningitis, chest and for gynaecological complaints, palpitations, cardiac problems, fever, irregular periods, and against nausea in pregnant women. Veterinary medicine, leaves and flowers for Newcastle disease in chickens. Magic, ritual, for psychosis.)

in English: blossom tree, common wild pear, dombeya, plum blossom tree, round leaf dombeya, white dombeya, wild pear, wild plum

in East Africa: mringaringa porini (Chagga), mtorobwe (Swahili), olawuo (Maasai)

in Southern Africa: blombos, blomhout, dikbas, dowi, drolpeer, gewone drolpeer, iNhliziyonkhulu, iNhliziyonkulu,

isiAdlulambazo, mohlaba-phala, mokgoba, molobare, motubane, muFununu, muNongatowa, muOndokatiwa, muPundururu, muSiyasetu, muSiyasitu, muTingatowe, muTokwe, muTondokatura, muTongatowa, muTorandu, muToranundu, nsihaphukuma, ntogwinzane, tshiluvhari, umBikanyaka (= the tree that heralds the new season), umWane, uNhliziyonkulu, Wandagatowa, xilubarhi

in Tanzania: katiyatiya, mkebu, mtorobwe

Dombeya torrida (J.F. Gmel.) Bamps subsp. ***torrida*** (*Dombeya albiflora* K. Schum.; *Dombeya bequaertii* De Wild.; *Dombeya bogoriensis* De Wild.; *Dombeya bruceana* A. Rich.; *Dombeya elliotii* K. Schum. & Engl.; *Dombeya faucicola* K. Schum.; *Dombeya gallana* K. Schum. & Engl.; *Dombeya goetzenii* K. Schum.; *Dombeya heterotricha* Mildbr.; *Dombeya hirsuta* Bojer; *Dombeya hirsuta* K. Schum., nom. inval.; *Dombeya hirsuta* (Hochst. ex Schweinf. & Asch.) K. Schum., non Bojer, nom. nud.; *Dombeya leucoderma* K. Schum.; *Dombeya niangaraensis* De Wild.; *Dombeya runsoroensis* K. Schum.; *Dombeya ruwenzoriensis* De Wild.; *Dombeya schimperiana* A. Rich.; *Dombeya schimperiana* A. Rich. var. *glabrata* K. Schum.; *Dombeya stipulosa* Chiov.; *Walcuffa torrida* J.F. Gmel.; *Xeropetalum brucei* Hochst.)

East Africa. Tree or shrub, smooth bark, pink-red-purple fragrant flowers, small capsules densely hairy, good nectar for bees, wet highland forest

See *Systema Naturae*, editio decima tertia, aucta, reformata. 2(2): 998, 1029. 1792 [1791 publ. late Apr-Oct 1792], *Centurie de plantes d'Afrique du voyage à Méroé* recueillies par M. Caillaud. 84. Paris 1826, *Flora* 24(1, Intelligenzbl.): 29, nomen. 1841, *Rapport annuel sur les travaux de la société d'histoire naturelle de l'Île Maurice* 12: 46. 1841, *Ann. Sci. Nat., Bot.*, sér. 2, 18: 190. 1842, *Tentamen Florae Abyssinicae* ... 1: 77–78. 1847, *Die Natürlichen Pflanzenfamilien* 3(6): 78. 1890, *Die Pflanzenwelt Ost-Afrikas* C: 270. 1895 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 5: 23. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 308. 1903, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 323. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 582–583. 1907, *Annales du musée du Congo. Série 1, Botanique* V, 2: 49. 1907, *Plantae Bequaertianae* 1: 510–511, 513. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 195. 1934, *Atti della reale accademia d'Italia. Memorie delle classe di scienze fisiche, matematiche e naturali* 11: 21. 1940, *Bull. Jard. Bot. État Bruxelles* 32: 170. 1962, *Bot. Not.* 132(3): 397. 1979, *Economic Botany* 34(4): 320–333. 1980, *Opera Botanica Belgica* 2: 85. 1991, *Journal of Ethnopharmacology* 70: 281–300. 2000

(Eyes irritation, the fine hairs on the fruit may cause. A decoction of the flowers and bark taken against indigestion.)

in English: forest dombeya

in East Africa: gbaluwa (Lugishu), mueku, mukeu (Kikuyu), ol-subukiai (Maasai)

in Tanzania: mkwele ngala, osupukia, osupukiai, osupuliou

Dombeya wallichii (Lindl.) K. Schum. (*Astrapaea wallichii* Lindl.; *Dombeya wallichii* (Lindl.) B.D. Jacks.; *Dombeya wallichii* (Lindl.) Benth. & Hook. f., isonym)

Asia, India. Tree, drooping clusters of fragrant pink flowers

See *Collectanea Botanica* 3: t. 14. 1821, *Genera Plantarum* [Bentham & Hooker f.] 1(1): 221. 1862, *Die Natürlichen Pflanzenfamilien* 3(6): 78. 1890, *Index Kewensis* 1: 788. 1895 and *Fieldiana, Bot.* 24(6): 403–428. 1949, *Candollea* 16: 247–449. 1958, *Economic Botany* 40(1): 38–53. 1986

(Antibacterial, antiinflammatory, stomach medicine.)

in English: hydrangea tree, Mexican rose, pink ball dombeya, tassel tree of Madagascar, tropical hydrangea, tropical snowball

in India: domrupani

Donax Lour. Marantaceae

Latin *donax* and Greek *donax*, *donakos* for a kind of reed or cane, referring to the split stems, see *Flora Cochinchinensis* 1: 1, 11–12. 1790.

Donax canniformis (G. Forst.) K. Schum. (*Actoplanes canniformis* (G. Forst.) K. Schum.; *Actoplanes grandis* (Miq.) K. Schum.; *Actoplanes ridleyi* K. Schum.; *Arundastrum benthamianum* Kuntze; *Arundastrum canniforme* (G. Forst.) Kuntze; *Arundastrum grande* (Miq.) Kuntze; *Clinogyne canniformis* (G. Forst.) K. Schum.; *Clinogyne grandis* (Miq.) Benth. ex Baker; *Donax arundastrum* Lour.; *Donax arundinastrum* Lour.; *Donax cannaeformis* (G. Forst.) Schum.; *Donax canniformis* Schum.; *Donax canniformis* Rolfe; *Donax gracilis* K. Schum.; *Donax grandis* (Miq.) Ridl.; *Donax parviflora* Ridl.; *Ilythuria canniformis* (G. Forst.) Raf.; *Maranta arundinacea* Blanco, nom. illeg.; *Maranta grandis* Miq.; *Maranta tonchat* Blume; *Phrynium canniforme* (G. Forst.) Körn.; *Phrynium canniforme* (G. Forst.) Schrank; *Thalia canniformis* G. Forst.)

Papua New Guinea, Vietnam. Climber, understory scrambler, dry-stemmed herbs, fruits white, swamp forest

See *Florulae Insularum Australium Prodromus* 1. 1780, *Flora Cochinchinensis* 1: 11–12. 1790, *Sylloge Plantarum Novarum* 1: 178. 1824, *Flora Telluriana* 4: 51. 1836[1838], *Gartenflora* 7: 85. 1858, *Revis. Gen. Pl.* 2: 683–684. 1891, *Bot. Jahrb. Syst.* 15(4): 436, 440. 1893, *Die Natürlichen Pflanzenfamilien Nachtr.* 1: 96. 1897 and *Das Pflanzenreich*, IV. 48(Heft 11): 33–35. 1902, *J. Bot.* 45: 243. 1907, *J. Straits Branch Roy. Asiat. Soc.* 54: 59. 1910, Wu Te-lin & Chen Sen-jen. 1981. *Marantaceae*. In: Wu Te-lin, ed., *Fl. Reipubl. Popularis Sin.* 16(2): 158–169. 1981

(Leaves decoction for abdominal pain, malarial fever, gynaecological disorders, also given as a pre- and postpartum remedy; paste of the young leaves with ginger and cinnamon bark swallowed in biliousness. Stem juice in snakebites. Root decoction blood purifier, an antidote for snakebite.)

in China: zhu ye jiao

in India: amok, kaglé, leethir, tambowka

Malayan name: bemban

in the Philippines: alaro, araton, bamban, bana, banban, bankolid, baras-barasan, bonbon, buaban, daromaka, darumaka, garomaka, lankuas, mamban, manban, matalbak, matapat, mini, ninik

in Sarawak: bumban aii

Dorema D. Don Apiaceae (Umbelliferae)

Perhaps from the Greek *dorema*, *dorematos* 'a gift, present', referring to the gum ammoniacum produced by the plant; see *Edinb. Philos. Mag., or Ann. Chem.* 9: 47. 1831, *Transactions of the Linnean Society of London* xvi. (1833) 601. 1833 and R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 239. Stuttgart 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 214. Basel 1996.

Dorema ammoniacum D. Don (*Ferula ammonifera* (D. Don) Oken; *Ferula ammonifera* Oken)

India.

See *Species Plantarum* 1: 246. 1753, *Transactions of the Linnean Society of London* 16(3): 601. 1833, *Allgemeine Naturgeschichte* 3(3): 1822. 1841 and *Journ. Arn. Arb.* xxxi. 275. 1950

(Used in Ayurveda and Unani.)

in India: usaka, ushaq, ushaq gond, ushunq, ushuq

Dorema aureum Stocks

Pakistan. Fodder for domestic animals

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 149. 1852

(Tonic.)

in Pakistan: ooshi

Doronicum L. Asteraceae

Perhaps from an Arabic name; see *Species Plantarum* 2: 885–886. 1753, *Flora* 11: 182. 1828 and *Annuaire Conserv. Jard. Bot. Genève* 13–14: 337–338. 1911, *Fl. URSS* 26: 768, 771, 773–776, 779. 1961, *Notes Roy. Bot. Gard. Edinburgh* 37(1): 72. 1978, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 214–215. Basel 1996.

Doronicum falconeri C.B. Clarke ex Hook. f.

India, NW Himalaya.

See *Fl. Brit. India* [J.D. Hooker] 3: 333. 1881

(Aerial parts used to treat wounds, pain, muscular problems, impure blood, respiratory disorders, inflammation. Roots aromatic, stimulant, tonic, in nervous depression. Ritual, ceremonial, pertaining to the three eyes of Lord Shiva.)

in Tibet: ming can ser po

Doronicum hookeri C.B. Clarke ex Hook. f.

India, Sikkim Himalaya.

See *Fl. Brit. India* [J.D. Hooker] 3: 332. 1881

(Roots aromatic tonic)

Doronicum pardalianches L. (*Doronicum pardalianches* Bourg. ex Reut. & Lange; *Doronicum pardalianches* Lag. ex Willk. & Lange)

Europe.

See *Species Plantarum* 2: 885. 1753, *Bull. Soc. Bot. France* 11: 46. 1864, *Prodr. Fl. Hispan.* 2(1): 109. 1865 and *Repert. Spec. Nov. Regni Veg.* 27: 352. 1930

(Cardiac and nervine tonic.)

Doronicum roylei DC.

India, NW Himalaya.

See *Prodr.* (DC.) 6: 321. 1838 [1837 publ. early Jan 1838] and *Nucleus* 18: 6–19. 1975

(Roots aromatic tonic, used to prevent giddiness during high altitude ascent.)

in India: dainaj akarbi, darunaj akrubi

Dorstenia L. Moraceae

Dedicated to the German botanist Theodor Dorsten (Theodericus Dorstenius, in Pritzel, no. 2378), 1492–1552, physician, professor in Marburg, author of *Botanicon continens herbarum aliorumque simplicium*. Francofurti 1540; see Carl Linnaeus, *Species Plantarum*. 1: 121. 1753, *Genera Plantarum*. Ed. 5. 56. 1754, *Flora Aegyptiaco-Arabica* 164. 1775, *Encyclopédie Méthodique, Botanique* 2: 317. 1786, *Mémoires de la Société Linnéenne de Paris* 4: 216. 1826, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 777. 1826, *Flore Générale des Environs de Paris* 2: 376. 1827, *Genera Plantarum* 279. 1837, *Index Seminum* [St. Petersburg] 11: 57, 62–63, 67. 1846, *Genera Plantarum* [Endlicher] Suppl. 4(2): 35. 1848, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 300. Ansbach 1852, *L'illustration horticole* 10: t. 362, 363. 1863 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 246. 1921, *Recueil des Travaux Botaniques Néerlandais* 32: 272–273, f. 6. 1935, *Kew Bulletin* 18: 272. 1965, *Bradea, Boletim do Herbarium Bradeanum*

2(21): 151. 1976, *Bull. Jard. Bot. Belg.* 47: 267–407. 1977, *Fl. Zambesiaca* 9(6): 13–76. 1991, *Pure and Applied Chemistry* 73: 1197–1208. 2001.

Dorstenia barnimiana Schweinf.

East Africa, Ethiopia, Burundi. Caudiciform, white latex, green and brown flowers

See *Plantae Quaedam Niloticæ* quas in itinere cum Adalberto libero barone de Barnim facto collegit Robertus Hartmann; recensuit et observationes criticas in plantas prius jam notas et novarum descriptiones addidit. 36, t. 12. Berlin. 1862 and *Journal of Ethnopharmacology* 111: 271–283. 2007, *J. Ethnobiol. Ethnomedicine* 3: 12. 2007

(Used for gout, dysentery and coughs, infections and wounds.)

in Ethiopia: worq bameda

Dorstenia brasiliensis Lam. (*Dorstenia amazonica* Carauta, C. Valente & Barth; *Dorstenia brasiliensis* fo. *balansae* Chodat; *Dorstenia brasiliensis* var. *garanitica* Chodat & Vischer; *Dorstenia brasiliensis* var. *major* Chodat & Hassl.; *Dorstenia brasiliensis* var. *palustris* Hassl.; *Dorstenia brasiliensis* var. *tomentosa* (Fisch. & C.A. Mey.) Hassl.; *Dorstenia brasiliensis* var. *tubicina* (Ruiz & Pav.) Chodat & Vischer; *Dorstenia brasiliensis* var. *typica* Hassl.; *Dorstenia heringeri* Carauta & C. Valente; *Dorstenia infundibuliformis* Lodd.; *Dorstenia montana* Herzog; *Dorstenia montevidensis* Miq.; *Dorstenia pernambucana* Arruda, nom. nud.; *Dorstenia sabanensis* Cuatrec.; *Dorstenia schulzii* Carauta, C. Valente & Dunn de Araujo; *Dorstenia tomentosa* Fisch. & C.A. Mey.; *Dorstenia tubicina* Ruiz & Pav.; *Dorstenia tubicina* fo. *major* (Chodat & Hassl.) Hassl.; *Dorstenia tubicina* fo. *subexcentrica* Hassl.)

Uruguay, Paraguay, Bolivia.

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 317. 1786, *Flora* 1: 65, t. 102. 1798, *Travels in Brazil* 498. 1816, *Botanical Cabinet*; consisting of coloured delineations . . . 20: general index. 1833, *Sertum Plantarum* 1: t. 13. 1843, *Index Seminum* [St. Petersburg] 11: 61. 1846 and *Bulletin de l'Herbier Boissier*, sér. 2, 3: 350. 1903, *Mededeelingen van's Rijks-Herbarium* 27: 73. 1915, *Annuaire du Conservatoire et Jardin Botaniques de Genève* 21: 118, 120. 1919, *Bulletin de la Société Botanique de Genève* 11: 257–258. 1920, *Bradea, Boletim do Herbarium Bradeanum* 2(5): 17. 1975, *Bulletin of the Torrey Botanical Club* 103: 173, t. 3. 1976, *Rodriguésia* 29(44): 119. 1978, *Archivos do Jardim Botânico do Rio de Janeiro* 23: 105, t. 1–2. 1979

(Leaves and roots diuretic, diaphoretic, emmenagogue, tonic, emetic, febrifuge, snakebite remedy. Roots decoction used for regulating fertility.)

in Argentina: contrajerva, higuerrilla, taropé

in Paraguay: taropé

Dorstenia contrajerva L. (*Dorstenia alexiteria* L.; *Dorstenia contrajerva* subsp. *tenuiloba* S.F. Blake; *Dorstenia*

contrajerva var. *houstonii* (L.) Bureau; *Dorstenia contrajerva* var. *maculata* (Lem.) Bureau; *Dorstenia contrajerva* var. *tenuiloba* (S.F. Blake) Standl. & Steyererm.; *Dorstenia houstonii* L.; *Dorstenia maculata* Lem.; *Dorstenia palmata* Willd. ex Schult.; *Dorstenia quadrangularis* Stokes; *Dorstenia quadrangularis* var. *integrifolia* Stokes; *Dorstenia quadrangularis* var. *pinnatifida* Stokes; *Dorstenia quadrangularis* var. *sinuata* Stokes)

South America. Small herb

See *Philos. Trans.* 37: f. 1. 1731, *Species Plantarum* 1: 121. 1753 and *Regnum Veg.* 127: 43. 1993

(Mucilaginous, antipyretic, astringent, hypotensive. Boiled inflorescence placed on navel of newborn children to prevent infection. Rhizome infusion for dysentery, indigestion, fever, heat, snakebites, cold. Leaves infusion drunk to treat diarrhea; leaves chewed for toothache.)

in Panama: móklík, upsensapi

Dorstenia elliptica Bureau (*Dorstenia frutescens* Engl.)

Cameroon. Herb, shrub, erect, more or less unbranched, white latex, flower stem creeping, flowers yellow to greenish-brown

See *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 271. 1873

(Used for the treatment of eye infections.)

Dorstenia gourmaensis A. Chev. var. ***floribunda*** A. Chev.

Tanzania, Ghana, Sudan. Fleshy herb, epiphyte, erect, hard round tuber

See *Bulletin de la Société Botanique de France* 58(Mém. 8d): 207. 1912 [1911 publ. 1912]

(White latex acrid, irritant.)

Dorstenia holstii Engl.

Tropical Africa. Herb, succulent stem, milky latex, yellow green inflorescence

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 145. 1894

(Leaves antifungal, antiviral.)

Dorstenia indica Wight

India.

See *Icones Plantarum Indiae Orientalis* 6: 8. 1853

(Whole plant decoction taken with the leaves of *Vitex altissima* and *Naravelia zeylanica* to treat rheumatism.)

in India: kutthu urinchi

Dorstenia multiradiata Engl.

West Tropical Africa. Erect perennial herb

See *Species Plantarum* 1: 121. 1753, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 1: 15. 1898

(Used with oil of *Poga oleosa* as a treatment for psoriasis. Leaves antileishmania, antiseptic, for venereal diseases.)

Dorstenia psilurus Welw. (*Dorstenia bicornis* Schweinfurth; *Dorstenia gilletii* De Wild.; *Dorstenia klainei* Heckel; *Dorstenia lukafuensis* De Wild.; *Dorstenia massenii* Bureau; *Dorstenia psiluroides* Engl.; *Dorstenia psilurus* var. *brevicaudata* Rendle; *Dorstenia psilurus* var. *compacta* De Wild.; *Dorstenia psilurus* var. *scabra* Bureau; *Dorstenia psilurus* var. *subintegrifolia* De Wild.; *Dorstenia scabra* (Bureau) Engl.; *Dorstenia scabra* Engl.; *Dorstenia scabra* var. *denticulata* Engl.; *Dorstenia scabra* var. *longicaudata* Engl.; *Dorstenia scabra* var. *subintegrifolia* De Wild.; *Dorstenia stolzii* Engl.; *Dorstenia tenuifolia* Engl.)

Tanzania, Cameroon. Subshrub, herb, erect, unbranched or sparingly branched, milky white latex, elongated inflorescence green with green tinged brown-purple spur-like structures

See *Transactions of the Linnean Society of London* 27: 71. 1869, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 142. 1894

(A snakebite remedy.)

Dovyalis E. Meyer ex Arn. Salicaceae (Flacourtiaceae)

Origins obscure, sometimes misspelled *doryalis*, referring to the straight spines some suggested an origin from the Greek *dory* 'a spear, shaft'; see *Species Plantarum* 2: 1015–1022. 1753, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 4, 21. 1760, *Stirpes Novae aut Minus Cognitae* 3: 59. 1786, *Mémoires de la Classe des Sciences Mathématiques et Physiques de L'Institut National de France* 1807(2): 149. 1808, *Elém. Physiol. Vég. Bot.* 2: 905. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 255. 1824, *Hooker's Journal of Botany*. 3: 251–252. 1841, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 301. Ansbach 1852 and F. Boerner, *Taschenwörterbuch der botanischen Pflanzennamen*. 2. Aufl. 102. Berlin & Hamburg 1966, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 95. Berlin & Hamburg 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 240. Stuttgart 1993.

Dovyalis abyssinica (A. Rich.) Warb. (*Aberia abyssinica* (A. Rich.) Clos; *Aberia abyssinica* Clos; *Dovyalis abyssinica* Warb.; *Dovyalis engleri* Gilg; *Flacourtia obtusata* Hochst. ex A. Rich.; *Hydnocarpus obtusa* C. Presl; *Roumea abyssinica* A. Rich.)

East Africa. Small tree or shrub, spiny, evergreen, rounded crown, grey bark, branches armed with stout spines, shiny leaves, green or pale yellow faintly sweetly flowers, female flowers solitary, male flowers in clusters, round orange-yellow berry sour to sweet, ripe fruit eaten raw, fodder for goats and sheep, along river banks, dry evergreen forests, on dry forest edges, scrubland, in highland forest areas

See *Tentamen Florae Abyssinicae* ... 1: 34, t. 8. 1847, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] iii. 6a: 44. 1893

(Leaves pounded and soaked in water to produce an infusion taken for indigestion. Roots boiled in soup used for indigestion; root decoction taken with fat for gonorrhoea, roots used for bilharzia, stomachache and fever.)

in East Africa: muirungi, ol-morogi, sangana, songla

in Kenya: akutho, bapchebilil, dungatundu, ilmorok, karaturwa, kurawa, Imoroo, mbuche, mdungatundu, mendililwo, mintirilwo, mkidonyathi, mukambua, mukambura, mundililwet, muraga, muro, mwokiot, ngambua, ngambura, nokok, nukiat, olmarogi, olmorogi, omokorogoinwa, omokorogunywa, songola

in Tanzania: emadui, emorogi, hungululu, ilmorok, mahhahamo, mahhahhari, mditsi, mgola, mkoroto, mmango, mnzuyuyu, mtiwapaa, mummui, olepulunga, olmarogi, olmorogi

Dovyalis macrocalyx (Oliv.) Warb. (*Aberia macrocalyx* Oliv.; *Dovyalis adolfi-frederici* Mildbr. ex Gilg; *Dovyalis antunesii* Gilg; *Dovyalis chirindensis* Engl.; *Dovyalis glandulosissima* Gilg; *Dovyalis luckii* R.E. Fr.; *Dovyalis mildbraedii* Gilg; *Dovyalis retusa* Robyns & Lawalrée; *Dovyalis salicifolia* Gilg)

East Africa. Shrub or small tree, drooping foliage, multi-stemmed, branches with straight axillary slender spines, small yellow green flowers, calyx sticky glandular, male hairy flowers in clusters, solitary female flowers shortly stalked, sweet edible bright orange-red plum-shaped fruit, persistent green sepals finally reflexed and fringed with glandular hairs, in riverine forest, thickets, wooded grasslands, in dry forest

(Antiinflammatory.)

in East Africa: cheptabirbiriet, mutunku, olmorogo

in Kenya: busongolomunwa, chuchwenion, chuchween, enkoshopini, kaptowinet, kumusongolomunwa, munyee, munyhee, olaimurunyai

in Tanzania: enkoshopini, mgola, mkoroto, mnzuyuyu, mzuyuyu, olaimurunyai, omukangali

Dovyalis rhamnoides (Burch. ex DC.) Harv. (*Dovyalis rhamnoides* Engl.; *Dovyalis rhamnoides* Burch. ex Harv. & Sond.; *Flacourtia rhamnoides* Burch. ex DC.)

South Africa.

See *Prodr.* (DC.) 1: 256. 1824, *Journal of Botany, being a second series of the Botanical Miscellany* 3: 251–252. 1841, *Fl. Cap.* (Harvey) 1: 69. 1860, *Pflanzenw. Ost-Afrikas A* (1895) 217. 1895

(Roots, fruits and bark for rheumatism.)

in English: Cape cranberry, common sourberry, crownberry, wild apricot, wine berry

in Southern Africa: appelkoos, gewone suurbessie; uKhamwingi, umKhangwinqi, uKhanginqi (Zulu), umNyezane; umQaqoba (Xhosa)

Doyerea Grosourdy Cucurbitaceae

See *El Médico Botánico Criollo* 1(2): 338–339. 1864, *Genera Plantarum* 1: 831. 1867, *Transactions of the Linnean Society of London, Botany* 27: 32, t. 12. 1869 and *Proceedings of the American Academy of Arts and Sciences* 40(21): 697–698. 1905, *Fieldiana, Botany* 24(11/4): 306–395. 1976, *Flora de Venezuela* 5(1): 11–202. 1992, *Etnoflora Yucatanense* 22: 1–315. 2004, *Fl. (Roots antirheumatic, for venereal diseases.)

in English: Caribbean coralfruit

in Central America: batata de burro, batata zambomba, batata zandumbia, k'uum ak, kis kann, xk'abax k'aax, xmakal kaan, xput kaan, xtuch'tunich

Draba L. Brassicaceae (Cruciferae)

Old Greek name *drabe*, used by Dioscorides for a cruciferous plant, perhaps *Cardaria draba* or *Lepidium draba*, Arabian mustard; see Carl Linnaeus, *Species Plantarum*. 2: 642–643. 1753 and *Genera Plantarum*. Ed. 5. 291. 1754, *Systema*

Naturae ... editio decima tertia, aucta, reformata 2: 337, 342, 348, 351. 1821, *Linnaea* 13: 318. 1839, *Flora Rossica* 1: 156. 1841, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 301. Ansbach 1852, *Annales de la Société Linnéenne de Lyon*, sér. 2, 16: 335. 1868, *Pittonia* 3(17C): 252–254. 1897 and *Acta Botanica Bohemica* 3: 34. 1924, *Bull. Misc. Inform.* 1925: 51. 1925, *Das Pflanzenreich* 89(4. 105): 173. 1927, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 66(1): 94. 1933, *Fieldiana, Bot.* 24(4): 354–380. 1946, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 249. 1989, *Taxon* 44: 611–612. 1995, *Madroño* 47(1): 21–28. 2000.

Draba helleriana Greene (*Draba helleriana* Greene var. *helleriana*)

North America.

See *Pittonia* 4(20C): 17–18. 1899

(Leaves decoction for cough, venereal diseases. Ceremonial, emetic, to protect against bad spirits and witches.)

in English: Heller's draba, Heller's whitlow-grass

Draba incerta Payson

North America. Perennial

See *American Journal of Botany* 4(5): 261. 1917

(Abortifacient.)

in English: Yellowstone draba

Draba linearis Boiss. (*Draba linearis* Hook. f. & T. Anders.; *Draba nipponica* var. *linearis* (Satake) Kitam.)

Europe, India, Japan. Erect, weak, glabrous herb, white minute flowers, erect fruits, minute brown seeds, whole plant used as vegetable

See *Annales des Sciences Naturelles, Botanique* II, 17: 167. 1842, *The Flora of British India* 1(1): 144. 1872 and *Journal of Japanese Botany* 16: 422. 1940, *Acta Phytotaxonomica et Geobotanica* 20: 202. 1962

(Leaves and whole plant in skin diseases.)

Draba muralis L. (*Draba muralis* Thunb., nom. illeg.; *Drabella muralis* (L.) Fourr.)

Spain.

See *Flora Japonica* 259. 1784, *Annales de la Société Linnéenne de Lyon* n.s., 16: 335. 1868 and *Fl. Medit.* 9: 331–339. 1999

(For scurvy.)

Draba rectifruca C.L. Hitchc. (*Draba montana* S. Watson, nom. illeg.; *Draba montana* Bergeret; *Draba nemorosa* Rothr.; *Draba nemorosa* All., nom. illeg.)

North America.

See *Flora Pedemontana* 1: 244. 1785, *Phyton. Univ.* 3: 105. 1786, *Catalogue of Plants* 34. 1874, *Smithsonian Miscellaneous Collections* 258: 60. 1878 and *A Revision of the Drabas of Western North America* 110. 1941

(Plant infusion diuretic.)

in English: mountain draba, mountain whitlowgrass

Draba reptans (Lam.) Fernald (*Arabis reptans* Lam.; *Draba caroliniana* Walter; *Draba caroliniana* Walter fo. *stellifera* O.E. Schulz; *Draba caroliniana* subsp. *stellifera* (O.E. Schulz) Payson & H. St. John; *Draba caroliniana* var. *hunteri* Payson & H. St. John; *Draba caroliniana* var. *micrantha* (Nutt.) A. Gray; *Draba coloradensis* Rydb.; *Draba micrantha* Nutt.; *Draba reptans* fo. *hunteri* (Payson & H. St. John) C.L. Hitchc.; *Draba reptans* fo. *micrantha* (Nutt.) C.L. Hitchc.; *Draba reptans* subsp. *stellifera* (O.E. Schulz) Abrams; *Draba reptans* var. *micrantha* (Nutt.) Fernald; *Draba reptans* var. *stellifera* (O.E. Schulz) C.L. Hitchc.; *Draba reptans* var. *stellifera* (O.E. Schulz) M. Peck; *Draba reptans* (Lam.) Fernald var. *typica* C.L. Hitchc.; *Tomostima micrantha* (Nutt.) Lunell)

North America. Annual

See *Encyclopédie Méthodique, Botanique* 1(1): 222. 1783, *A Flora of North America: containing ...* 1(1): 109. 1838, *A Manual of Botany of the Northern United States* (ed. 5) 72. 1867 and *Bulletin of the Torrey Botanical Club* 31(10): 555. 1904, *American Midland Naturalist* 4(8): 364. 1916, *Das Pflanzenreich* 89[IV,105]: 333. 1927, *Proceedings of the Biological Society of Washington* 43(15): 103. 1930, *Rhodora* 36(430): 368. 1934, *Madroño* 6(4): 133. 1941, *A Revision of the Drabas of Western North America* 112–113. 1941, *Illustrated Flora of the Pacific States* 2: 294. 1944

(For skin diseases, sores, boils.)

in English: Carolina whitlow-grass, Carolina whitlowgrass

Draba setosa Royle (*Draba pyriformis* Pohle; *Draba setosa* subvar. *glabrata* O.E. Schulz; *Draba setosa* var. *pyriformis* (Pohle) O.E. Schulz)

China, Himalaya, India.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 71. 1834 and *Repert. Spec. Nov. Regni Veg. Beih.* 32: 154. 1925, *Das Pflanzenreich* 89(4. 105): 105. 1927

(Ritual, ceremonial, powdered leaves mixed with ghee to make incense.)

in China: gang mao ting li

in India: zingla

Dracaena Vand. ex L. Asparagaceae (Agavaceae, Dracaenaceae)

Greek *drakaina* ‘a female dragon’, female of *drakon*, Latin *dracaena*, *ae* ‘a she-dragon’ referring to the dried juice; see C.

Linnaeus, *Mantissa Plantarum*. 9, 63. Holmiae [Stockholm] 1767 [-1771] and *Systema Naturae*. 2: 246. Vindobonae [Wien] 1767–1770, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 301. 1852 and Edwards, S., Demissew, S. & Hedberg, I. (eds.) *Flora of Ethiopia and Eritrea* 6: 1–586. The National Herbarium, Addis Ababa University, Ethiopia & The Department of Systematic Botany, Upps. 1997. Some suggested that the genus was named by Carolus Clusius (1526–1609) to honor Sir Francis Drake (c. 1540–1596).

Dracaena afromontana Mildbr. (*Dracaena reflexa* Lam. var. *nitens* auct., non (Welw.) Baker)

Sudan to Malawi.

See *Systema Naturae*, ed. 12 2: 229, 246. 1767, *Encyclopédie Méthodique, Botanique* 2: 324. 1786, *Flora of Tropical Africa* 7: 441. 1898 and *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907--1908, Botanik* 2: 62 t.V f. A-E. 1910

(Antiinflammatory, astringent, for rheumatism, chest pains, diarrhea. Veterinary medicine, for diarrhea. Used in peace-making ceremonies.)

in Burundi: igitongati

in Rwanda: igihondohondo, umuhati

in Tanzania: sala

in Uganda: gome

Dracaena aletiformis (Haw.) Bos (*Dracaena hookeriana* K. Koch, nom. illeg.; *Dracaena latifolia* Regel; *Draco hookeriana* Kuntze; *Pleomele hookeriana* (Kuntze) N.E. Br.; *Yucca aletiformis* Haw.)

South Africa, Kenya.

See *Philosophical Magazine and Journal* 1831: 415. 1831, *Wochenschr. Vereines Beförd. Gartenbaues Königl. Preuss. Staaten* 4: 394. 1861, *Gartenflora* 20: 141. 1871, *Revis. Gen. Pl.* 2: 710. 1891 and *Bull. Misc. Inform. Kew* 1914: 278. 1914, *Flora of Southern Africa* 5(3): 3. 1992

(Red resinous blood-like sap used as a wash to promote wound healing and stop bleeding, internally to treat chest pains, postpartum bleeding and menstrual irregularities. Magic, ritual, ceremonial, root crushed and used as a wash to drive away evil spirits.)

in English: dragon tree, large-leaved dragon tree

in Southern Africa: grootblaardrakeboom; iGonsi-lehlathi, iThokothoko (Zulu); umKhoma-khoma, iKholokotho (Xhosa)

Dracaena angustifolia (Medik.) Roxb. (*Cordyline fruticosa* Göpp., nom. nud.; *Cordyline fruticosa* (L.) A. Chev.; *Cordyline reflexa* (Lam.) Endl.; *Cordyline reflexa* Planch.; *Cordyline rumphii* F.Muell.; *Cordyline rumphii* Hook.; *Dracaena angustifolia* Roxb.; *Dracaena angustifolia* var. *honorariae* F.M. Bailey; *Dracaena ensifolia* Regel; *Dracaena ensifolia* L.; *Dracaena ensifolia* Hort. ex Baker; *Dracaena ensifolia*

Wall.; *Dracaena ensifolia* Haw.; *Dracaena ensiformis* Wall. ex Voigt; *Dracaena fruticosa* K. Koch; *Dracaena fruticosa* Regel, nom. illeg.; *Dracaena linearifolia* Kurz; *Dracaena menglaensis* G.Z. Ye; *Dracaena quitensis* Baker; *Dracaena rumphii* (Hook.) Regel; *Dracaena rumphii* Regel; *Draco angustifolia* Kuntze; *Draco angustifolia* (Roxb.) Kuntze; *Draco fruticosa* Kuntze; *Draco fruticosa* (K. Koch) Kuntze; *Pandanus inermis* Blanco, nom. illeg.; *Pleomele angustifolia* (Roxb.) N.E. Br.; *Pleomele angustifolia* (Medik.) N.E. Br.; *Pleomele australasica* Ridl.; *Pleomele flexuosa* (Blume) N.E. Br.; *Pleomele fruticosa* (K. Koch) N.E. Br.; *Sansevieria flexuosa* Blume; *Sansevieria fruticosa* Blume; *Terminalis angustifolia* F.M. Bailey; *Terminalis angustifolia* Medik.)

Trop. & Subtrop. Asia. Large shrub or small tree, many branched climbing shrub, weak pendulous twigs, yellow flowers in terminal racemes to spreading panicles, globose compressed 3-lobed berry

See *Mant. Pl.* 63. 1767, *Systema Naturae*, ed. 12 2: 229, 246. 1767, Medikus, Friedrich Kasimir (1736–1808), *Theodora Speciosa* 83. Mannheim 1786, *Prodromus Plantarum Capensium*, ... 1: [xii]-, 65. 1794, *Numer. List* [Wallich] n. 5143. 1831–1832, *Fl. Ind.* ed. 1832, 2: 155–156. 1832, *Cat. Horti Vindob.* 1: 148. 1842, *Hort. Suburb. Calcutt.* 675. 1845, *Bot. Mag.* 73: t. 4297. 1847, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 25: 53. 1855, *Gartenfl.* (1864) 321. t. 451. 1864, *Fragm.* (Mueller) 5(40): 194. 1866, *J. Linn. Soc., Bot.* 18: 222. 1880 [1881 publ. 1880], *Revis. Gen. Pl.* 2: 710. 1891, *FBI* 6: 327. 1892 and *Queensland Agric. J.* 27: 68. 1911, *Bulletin of Miscellaneous Information Kew* 1914(8): 277–278. 1914, *Cat. Pl. Jard. Bot. Saigon* 66. 1919, *J. Bot.* 68: 178. 1930, *Taxon* 33(3): 435. 1984, *Acta Botanica Yunnanica* 14(1): 30–31, f. 2. 1992

(Antispasmodic, anti-proliferation activity, leaves boiled and the juice drunk for asthma; leaves poultice applied on swelling of joint; leaves decoction given to patients with poor appetite. Roots juice given in jaundice; a decoction of roots of *Dracaena angustifolia* with bark of *Mangifera indica* and *Syzygium cumini* given as a postpartum remedy. Ceremonial, ritual, used in ceremonies of worship, plants placed in the altar.)

in China: meng la long xue shu

in India: charlang, milam

in Papua New Guinea: saiheva, si-ei

Dracaena arborea (Willd.) Link (*Aletris arborea* Willd.; *Cordylina arborea* (Willd.) Göpp.; *Dracaena acutissima* Hua; *Dracaena arborea* var. *baumannii* Engl.; *Dracaena excelsa* Ten.; *Dracaena knerkiana* K. Koch; *Draco arborea* (Willd.) Kuntze; *Pleomele acutissima* (Hua) N.E.Br.; *Pleomele arborea* (Willd.) N.E. Br.)

W. Trop. Africa to Angola.

See *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 25: 55. 1855, *Wochenschr. Vereines Beförd. Gartenbaues Königl.*

Preuss. Staaten 4: 394. 1861, *Revis. Gen. Pl.* 2: 710. 1891 and *Bull. Misc. Inform. Kew* 1914: 277. 1914, *Bot. Jahrb. Syst.* 59(131): 20. 1924, *Journal of Ethnopharmacology* 115: 387–408. 2008

(Leaves antalgic, for headache, tonsillitis, earache. Veterinary medicine, for sterility. Magic, ritual.)

in English: tree dracaena

in French: dragonnier

in Benin: anyan

in Cameroon: leloup

in Central Africa: alen ocpo, alen okpoué, élouévo, labinkong, mbiato, nassoukod, ope kanakana, paravela

in Congo: mukonzi

in Ivory Coast: anemedalébé, tiègbé

in Nigeria: odo, okono, ope kanakana, ope-kannakanna

in Sierra Leone: ningei

in Togo: anyati

in Yoruba: ope kannakanna, osun buke, peregun ifa

Dracaena aurea H. Mann (*Draco aurea* (H. Mann) Kuntze; *Pleomele aurea* (H. Mann) N.E. Br.)

Hawaii.

See *Proceedings of the American Academy of Arts and Sciences* 7: 207. 1867, *Revisio Generum Plantarum* 2: 710. 1891 and *Bull. Misc. Inform. Kew* 1914: 277. 1914

(For fevers, asthma, chills.)

Dracaena cambodiana Pierre ex Gagnepain (*Pleomele cambodiana* (Pierre ex Gagnepain) Merrill & Chun)

China, Vietnam.

See *Bull. Soc. Bot. France* 81: 286. 1934, *Sunyatsenia* 5: 31. 1940

(Dried resin to increase blood circulation and remove blood clots.)

in China: jian pu zhai long xue shu

Dracaena chiniana I.M. Turner (*Dracaena congesta* Ridl., nom. illeg.; *Pleomele congesta* N.E. Br.)

Borneo, Malaysia.

See *Trans. Linn. Soc. London, Bot.* 3: 388. 1893 and *Bull. Misc. Inform. Kew* 1914: 277. 1914, *Gard. Bull. Singapore* 47: 533. 1995 (publ. 1997)

(Leaves decoction as a postpartum remedy, for rheumatism, ulcers; crushed leaves applied for fungal diseases of the skin.)

Malay names: daun tapak leman, jenuang, rajah kayu, tapak suleiman, tapuh

Dracaena cinnabari Balf.f. (*Draco cinnabari* (Balf.f.) Kuntze)

Socotra, Egypt.

See *Trans. & Proc. Bot. Soc. Edinburgh* 30: 623. 1882, *Revis. Gen. Pl.* 2: 710. 1891

(Astringent, for dysentery, diarrhea, wound healing. A sources of dragon's blood.)

Dracaena cochinchinensis (Loureiro) S.C. Chen (*Aletris cochinchinensis* Loureiro; *Dracaena compacta* Baker; *Dracaena loureiroi* Gagnepain, nom. illeg. (included *Aletris cochinchinensis*); *Dracaena saposchnikowii* Regel; *Draco saposchnikowii* (Regel) Kuntze; *Pleomele cochinchinensis* (Loureiro) Merrill; *Pleomele cochinchinensis* Merr. ex Gagnep.)

China to Indochina. Tree, branched, reddish apically, smooth bark grayish white becoming grayish brown with age, leathery leaves sword-shaped crowded at apex of branches, inflorescence terminal branched, flowers clustered, perianth milky white, subglobose berry orange, a vulnerable species

See *Flora Cochinchinensis* 1: 204. 1790, *Gartenflora* 20: 323. 1871, *J. Linn. Soc., Bot.* 14: 540. 1875, *Revis. Gen. Pl.* 2: 710. 1891 and *Bulletin de la Société Botanique de France* 81(3–4): 287. 1934, *Flora Reipublicae Popularis Sinicae* 14: 276, pl. 52, f. 1–3. 1980, *Fam. Gen. Vasc. Pl.* 3: 240. 1998, *Acta Botanica Yunnanica*, 2003 (Vol. 25) (No. Suppl. 14) 102–107. 2003, *Journal of Asian Natural Products Research* 5(4): 291–296. 2003, *Steroids* 69(2): 111–9. 2004, *Journal of Asian Natural Products Research* 8(6): 571–577. 2006

(The dried resin for stomach ulcers, blood clots, regulating blood condition.)

in English: Chinese dragon's blood

in China: jian ye long xue shu

Dracaena conferta Ridl.

Thailand to Pen. Malaysia.

See *J. Straits Branch Roy. Asiat. Soc.* 41: 35. 1900

(A postpartum remedy.)

Malay name: pandan hutan

Dracaena ellenbeckiana Engl.

East Africa, Ethiopia to Uganda. Shrub or small tree, perennial, palm-like, hollowed-out stems, thin branches, very narrow lance-shaped blue-green leaves, terminal spikes of yellow-green flowers, bright orange small berries, on dry steep rocky hill slopes, riverine forest

See *Bot. Jahrb. Syst.* 32: 95. 1902

(Magic, ritual ceremonies.)

in English: Kedong dracaena

in East Africa: emisth, motiet, ol-ekidong

in Kenya: lokidongi

Dracaena elliptica Thunb. (*Calodracon sieboldii* Planch.; *Cordyline atropurpurea* (Roxb.) Planch.; *Cordyline maculata* (Roxb.) in Yoruba: ope kannakanna, osun buke

Dracaena petiolata Hook.f. (*Pleomele petiolata* (Hook.f.) N.E. Br.; *Pleomele petiolata* N.E. Br.)

India, Assam. Shrub, elliptic leaves, slender petiole, yellow fruits

See *Fl. Brit. India* [J.D. Hooker] 6: 331. 1892 and *Bull. Misc. Inform. Kew* 1914: 278. 1914

(Roots juice given in stomachache and vomiting. Leaves poultice applied on painful swelling of joints. Ceremonial,

ritual, taboo, used in ceremonies of worship, plants placed in the altar.)

in India: laungla, longla

Dracaena porteri Baker (*Draco porteri* (Baker) Kuntze; *Pleomele porteri* (Baker) N.E. Br.)

SE Asia, Thailand.

See *Journal of Botany, British and Foreign* 11: 262. 1873, *Revisio Generum Plantarum* 2: 710. 1891 and *Bull. Misc. Inform. Kew* 1914: 279. 1914

(Anodyne, vermifuge, wound healing, antiinflammatory.)

Dracaena spicata Roxb. (*Draco spicata* (Roxb.) Kuntze; *Draco spicata* Roxb.; *Pleomele spicata* (Roxb.) N.E. Br.; *Pleomele spicata* N.E. Br.)

India. Fleshy white root

See *Hort. Bengal.* 24. 1814, *Revisio Generum Plantarum* 2: 710. 1891 and *Bulletin of Miscellaneous Information Kew* 1914: 279. 1914

(Sweetish root chewed and the juice swallowed for stomachache.)

in India: phunhrin

Dracaena steudneri Engl. (*Dracaena papahu* Engl.; *Dracaena papau* Engl.; *Pleomele papahu* (Engl.) N.E. Br.; *Pleomele steudneri* (Engl.) N.E. Br.)

S. Trop. Africa. Tree, swollen at the base, grey bark large terminal rosettes of dark shiny leaves, sweetly scented flowers in tight terminal clusters, 6 narrow petals joined in a tube, moist forest soils, in forest areas with high rainfall

See *Pflanzenw. Ost-Afrikas*, C: 143. 1895 and *Bull. Misc. Inform. Kew* 1914: 278–279. 1914, *Journal of Ethnopharmacology* 88: 19–44. 2003

(Roots powder applied to wounds, piles. A decoction of stem bark used in the treatment of liver diseases. Veterinary medicine, for brucellosis, redwater.)

in English: Steudner's dracaena

in Burundi: igitongati

in Congo: ananda, igihondohondo, kihari, mukonze

in East Africa: kajolyanjovu, msanaka, muthari

in Rwanda: igihondohondo

in Tanzania: Isaale, omugorogoro

in Uganda: luhano olunene, musimange

Dracaena umbratica Ridl.

SE Asia.

See *The Flora of the Malay Peninsula* 4: 334. 1924

(For rheumatism.)

Dracocephalum L. Lamiaceae (Labiatae)

Greek *drakon* (*derkomai* 'to flare up', see Gothic *ga-tarhjan*, Anglo-Saxon *torht*) 'a serpent, dragon' and *kephale* 'head', referring to the corolla and to the 2-lipped calyx or to the appearance of the heads of the flowers; see Carl Linnaeus, *Species Plantarum*. 2: 594–596. 1753 and Wu Cheng-yih & Li Hsi-wen, eds. *Labiatae. Fl. Reipubl. Popularis Sin.* 65(2): 1–649 and 66: 1–647. 1977.

Dracocephalum heterophyllum Benth. (*Dracocephalum acanthoides* Edgew. ex Benth.; *Dracocephalum kaschygaricum* Rupr.; *Dracocephalum pamiricum* Briq.; *Ruyschiana heterophylla* (Benth.) House)

China, Himalaya. Perennial herb, semi-prostrate, highly aromatic, white creamy flowers in large densely leafy spikes

See *Labiatarum Genera et Species* fasc. 7: 738. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 12: 401. 1848, *Sertum Tianschanicum* 4: 65. 1869 and *Botanisk Tidsskrift* 28(2): 239–241, f. 5. 1907, *New York State Museum Bulletin* 243–244: 67. 1923, *Acta Bot. Yunnan.* 15: 377–384. 1993

(Flowers and leaves decoction given to cure headache, against cold, cough. Veterinary medicine, leaves paste applied on worm infested wounds in cattle.)

in China: bai hua zhi zi hua

in India: zimthigale, zinkzer

Dracocephalum integrifolium Bunge (*Dracontoccephalum integrifolium* (Bunge) St.-Lag.; *Dracontoccephalum integrifolium* St.-Lag.; *Ruyschiana integrifolia* (Bunge) House)

China.

See *Flora Altaica* 2: 387–388. 1830, *Étude des fleurs* ed. 8, [A. Cariot] 2: 671. 1889 and *New York State Museum Bulletin* 243–244: 67. 1923

(Used for bronchitis.)

in China: quan yuan ye qing lan

Dracocephalum moldavica L. (*Moldavica moldavica* (L.) Britton; *Moldavica moldavica* Britton; *Nepeta moldavica* (L.) Baill.; *Nepeta moldavica* Baill.; *Ruyschiana moldavica* (L.) House)

Europe, India.

See *Species Plantarum* 2: 595. 1753, *Labiatarum Genera et Species* 496. 1834, *Histoire des Plantes* (Baillon) 11: 30. 1891 and *An Illustrated Flora of the Northern United States* (Britton & Brown), ed. 2, 3: 115. 1913, *New York State Museum Bulletin* 243–244: 67. 1923, *J. Wuhan Bot. Res.* 12(2): 201–206. 1994, *Grassl. China* 2000(5): 1–5. 2000

(Astringent, febrifuge, demulcent, for skin diseases.)

in English: dragon-head

in China: xiang qing lan

in India: tukhme-ferunj-mishk

Dracocephalum parviflorum Nutt. (*Moldavica parviflora* (Nutt.) Britton; *Ruyschiana parviflora* (Nutt.) House)

North America.

See *The Genera of North American Plants* 2: 35. 1818 and *An Illustrated Flora of the Northern United States* 3: 114. 1913, *New York State Museum Bulletin* 243–244: 66. 1923

(Analgesic, astringent, febrifuge, for diarrhea.)

in English: American dragonhead, dragonhead

Dracocephalum rupestre Hance

China. Purple-blue flowers

See *Journal of Botany, British and Foreign* 7(79): 166. 1869

(Astringent.)

in English: rupestrine dragon-head

in China: mao jian cao

Dracocephalum ruyschiana Linnaeus (*Dracocephalum spicatum* (Mill.) Dulac; *Ruyschiana ruyschiana* (L.) House; *Ruyschiana spicata* Miller; *Zornia linearifolia* Moench)

China.

See *Species Plantarum* 2: 595. 1753, *The Gardeners Dictionary*: ... eighth edition no. 1. 1768, *Supplementum ad Methodum Plantas: a staminum situ describendi* 139. 1802, *Labiatarum Genera et Species* 499. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 402. 1848, *Flore de Département des Hautes-Pyrénées* 399. 1867, *Die Natürlichen Pflanzenfamilien* IV. 3a: 240. 1897 and *New York State Museum Bulletin* 243–244: 67. 1923

(Astringent.)

in China: qing lan

Dracocephalum tanguticum Maximowicz

China.

See *Bulletin de l'Académie Impériale des Sciences de St. Pétersbourg* 27: 530. 1881

(Aerial parts used in wounds and fever, a postpartum remedy, also used in lung and liver disorders.)

in English: Tangut dragon-head

in Bhutan: priyangku

in China: gan qing qing lan

Dracontium L. Araceae

Latin *dracontium* for dragon-wort, a species of *Arum* (Plinius), called also *dracontia radix*, Latin *dracontion* for a

kind of wheat (Plinius), Greek *drakontion* 'a pigment, dragon's blood', the diminutive of the Greek *drakon* 'a serpent, dragon'; Theophrastus (*HP*. 7.12.2) and Dioscorides used the old Greek name *drakontion* for the edder-wort, a species of *Dracunculus*; see Carl Linnaeus, *Species Plantarum* 967. 1753, *Genera Plantarum* Ed. 5. 414. 1754 and Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 216. Basel 1996, *Arnaldoa* 9(2): 43–110. 2002 [2003], *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 59–200. 2003, *Ann. Missouri Bot. Gard.* 91(4): 593–667. 2004, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Dracontium asperum K. Koch (*Chersydrium jararaca* Schott; *Dracontium elatum* Mart.; *Dracontium foecundum* Hook.f.; *Sauromatum asperum* (K. Koch) K. Koch; *Sauromatum asperum* K. Koch)

Caribbean, Guyana, Brazil. Tuberous root edible when roasted

See *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 259. 1859, *La Belgique Horticole* 15: 101. 1865, *Gardener's Chronicle & Agricultural Gazette* 1: 344, f. 58. 1870, *Bot. Mag.* 111: t. 6808. 1885 and *Taxon* 44: 522. 1995, *Ann. Missouri Bot. Gard.* 94: 615. 2004

(Larvicide, antidote for snakebites and spiders. Dried and powdered root for asthma, amenorrhea and whooping cough. Veterinary medicine, the juice from the rhizome used to kill maggots in the wounds of animals.)

in Brazil: herva da Santa María, jararaca, tajá de cobra

in Surinam: sneki tajer

Dracontium dubium Kunth (*Dracontium changuango* G.S. Bunting; *Echidnium dubium* (Kunth) Engl.; *Echidnium dubium* Engl.; *Echidnium schomburgkii* Schott, nom. illeg.)

Venezuela to Guyana.

See *Index Seminum* [Berlin] 1844: 283. 1844 and *Das Pflanzenreich* (Engler) Arac.-Lasioid. 4, Fam. 23C: 38. 1911, *Phytologia* 60(5): 302–303. 1986, *Novon* 8: 101–103. 1998

(Antidote for snake and spider bites, sting ray wounds and poisonous arrows.)

Dracontium gigas (Seem.) Engl. (*Godwinia gigas* Seem.)

Nicaragua to Costa Rica.

See *Journal of Botany, British and Foreign* 7: 313, t. 96–97, f. 1. 1869, *Monographiae Phanerogamarum* 2: 284. 1879 and *Novon* 4: 404–407. 1994

(Disgusting carrion-like odor.)

Dracontium longipes Engl.

Ecuador, Brazil.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 122. 1905

(Antidote for snakebites, leaves rubbed into snakebites wounds.)

in Peru: jergon sacha

Dracontium pittieri Engl.

Costa Rica. Large edible (after once boiling) tuber with acrid taste

See *Anales Inst. Fis.-Geogr. Nac. Costa Rica* 9: 209. 1898 and *Primitiae Florae Costaricensis* 2(6): 364. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37(1): 122–123. 1905, *Ann. Missouri Bot. Gard.* 94: 643. 2004

(Internal and external antidote for the poison of the *bocaracá* snake. Veterinary medicine, leaves infusion applied to wounds of animals to kill maggots.)

in Costa Rica: hombrón

Dracontium polyphyllum L. (*Amorphophallus wallisii* Regel, nom. inval.; *Dracontium asperum* var. *wallisii* Engl.; *Dracontium asperum* var. *wallisii* (Regel) Engl.; *Dracontium polyphyllum* Houtt.; *Dracontium polyphyllum* Dennst., nom. illeg.; *Dracontium polyphyllum* Forster f.; *Dracontium regelianum* (Engl.) Bogner; *Dracontium surinamense* Engl., nom. inval.; *Dracontium wallisii* (Regel) K. Koch; *Dracontium wallisii* K. Koch, nom. inval.; *Echidnium regelianum* Engl.; *Echidnium spruceanum* Schott; *Echidnium spruceanum* Regel, nom. illeg.; *Eutereia nigricans* Raf.)

South America. Large rootstalk

See *Parad. Bat.* t. 93. 1698, *Species Plantarum* 2: 967. 1753, Houttuyn, Maarten (Martin) (1720–1798), *Handleiding tot de Plant- en Kruidkunde ...* 11: 199. Amsterdam 1773, Forster, Georg (1754–1794), *De plantis esculentis insularum Oceani Australis* commentatio botanica. Berolini, Havde et Spener, 1786, *Schlüssel Hortus indicus malabaricus*, ... 38. 1818, *Oesterreichische Botanische Zeitschrift* 8(11): 350. 1858, *Gartenflora* 1861: 322. 1861, *Index Aroidearum* 45. 1864, *Gartenflora* 15: 98, t. 503. 1866, *Prodr.* (DC.) 16(2.2): 534. 1868, *Flora Brasiliensis* 3(2): 126. 1878, *Monographiae Phanerogamarum* 2: 286. 1879 and *Pacif. Sci.*, 8: 35–40. 1954, *Aroideana* 8(3): 78. 1985, *Ann. Missouri Bot. Gard.* 79: 189. 1992, *Taxon* 44: 521. 1995

(Used in Ayurveda. Very fetid smell when in flower, causing vomiting and vertigo. Used as antidote for snakebites, and a remedy against hemorrhoids, asthma. A powerful stimulant.)

in Brazil: jararaca merím, jiraraca

in India: caat karnay kalung, kananacanda, kattu karunai, kattu-k-karunai-k-kilanku

Dracontium spruceanum (Schott) G.H. Zhu (*Cyrtosperma spruceanum* (Schott) Engl.; *Dracontium carderi* Hook. f.; *Dracontium costaricense* Engl.; *Dracontium lorentense* K. Krause; *Dracontium ornatum* K. Krause; *Dracontium trianae* Engl.; *Echidnium spruceanum* Schott)

Trop. America. Herb, fleshy stalk, underground tuber, deeply-divided leaf, bright red-orange berry-like seeds

See *Oesterreichische Botanische Zeitschrift* 8(11): 350. 1858, *Flora Brasiliensis* 3(2): 118. 1878, *Botanical Magazine* 106: t. 6523. 1880 and *Das Pflanzenreich* IV. 23C(Heft 48): 44. 1911, *Notizbl. Bot. Gart. Berlin-Dahlem* 11: 617. 1932, *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 40. 1940, *Novon* 6(3): 308–309. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 59–200. 2003, *Ann. Missouri Bot. Gard.* 91(4): 593–667. 2004

(A “signature plant”. Antiviral, antidote, immune stimulant, astringent, antiinflammatory, cough suppressant, larvicidal, diuretic, protease inhibitor, used for viral infections, diarrhea, snakebite and poison arrow wounds, urinary insufficiency, asthma, a topical wound healer. Tuber decoction drunk to treat diarrhea; a paste applied to snakebite as a plaster.)

Common names: erva-jararaca, fer-de-lance, hierba del jergon, jararaca, jararaca-taia, jergón sacha, milho-de-cobra, sacha jergón, taja-de-cobra

Dracontomelon Blume Anacardiaceae

From the Greek *drakon* ‘a serpent, dragon’ and *melon* ‘an apple’, see *Museum Botanicum* 1: 231. 1850.

Dracontomelon dao Merr. & Rolfe (*Dracontomelon dao* (Blanco) Merrill & Rolfe; *Dracontomelon edule* Merr.; *Dracontomelon edule* (Blanco) Skeels; *Dracontomelon mangiferum* Blume; *Dracontomelon mangiferum* (Blume) Blume; *Dracontomelon sylvestre* Blume; *Paliurus dao* Blanco)

India, Thailand. Deciduous tree, with buttresses, dense rounded crown, whitish fragrant bisexual flowers in long hanging axillary panicles, fruit a globose drupe, flowers and leaves can be eaten as a vegetable, in evergreen forests

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Flora van Nederlandsch Indië* Suppl. 524. 1861 [1860] and *Philippine Journal of Science* 3: 108. 1908, *Philippine Journal of Science* 10: 33. 1915, *Acta Phytotax. Geobot.* 50: 43–50. 1999, Khan M.R., Omoloso A.D. “Antibacterial and antifungal activities of *Dracontomelon dao*.” *Fitoterapia*. 73(4): 327–330. 2002, Tayanin G.L., Bratthall D. “Black teeth: beauty or caries prevention? Practice and beliefs of the Kammu people.” *Community Dentistry and Oral Epidemiology* 34(2): 81–86. 2006

(Antibacterial, astringent and antifungal activities of the crude methanolic extracts of the leaves, stem and root barks. The fruit given as a depurative to cure dermatitis. Bark used for abortion.)

in English: Argus pheasant tree, New Guinea walnut

in China: ren mian zi

in Indonesia: dar, dau, singkuang

in Malaysia: asam kuang, kueh, sekuan, sengkuang

in Papua New Guinea: loc

in Philippines: batuan, dao, habas, hamarak, kamarak, kia-kia, lupigi, makadaeg, makau, maliyau, mamakau, peldao

in Thailand: ka-kho, sang-kuan

***Dracontomelon mangiferum* Blume**

Java.

See *Mus. Bot.* 1(15): 231. 1850 [publ. late 1850 or early 1851]

(Astringent, for diarrhea. To relieve toothache boil the roots of *Leea indica* with the bark of *Dracontomelon mangiferum* and gargle.)

Dracunculus Miller Araceae

Dragon arum, from the Latin *dracunculus*, a diminutive of *draco*, ‘small serpent, dragonet, a thread twisted like a serpent’, Plinius applied the name to the plant tarragon, *Artemisia dracunculus* L., see *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Bonplandia* (Hanover) 9: 368. 1861 and *Taxon* 27: 375–392. 1978, *Taxon* 30: 829–842. 1981, *Novoe Fl. Sibiri* 241. 1986, *Thaiszia* 4: 175–182. 1994.

***Dracunculus vulgaris* Schott** (*Aron dracunculum* (L.) St. Lag., nom. illegit.; *Arum dracunculus* Thunb.; *Arum dracunculus* L.; *Arum guttatum* Salisb.; *Dracunculus creticus* Schott; *Dracunculus dracunculus* (L.) Voss, nom. inval.; *Dracunculus major* Garsault; *Dracunculus polyphyllus* Blume, nom. illeg.; *Dracunculus spadiceus* Raf., nom. illeg.; *Dracunculus vulgaris* subsp. *creticus* (Schott) K. Richt.; *Dracunculus vulgaris* var. *creticus* (Schott) Nyman; *Dracunculus vulgaris* var. *elongatus* Engl.; *Dracunculus vulgaris* var. *laevigatus* Engl.)

Europe.

See *Species Plantarum* 2: 964. 1753, *Gard. Dict. Abridg.* ed. 4. 1754, *Flora Japonica* (Thunberg) 233. 1784, *Meletemata Botanica* 1: 17. 1832, *Rumphia* 1: 124. 1836 [1835], *Prodr. Syst. Aroid.* 120. 1860, *Bonplandia* 9: 368. 1861, *Monogr. Phan.* 2: 603. 1879, *Ann. Soc. Bot. Lyon* 7: 119. 1880, *Consp. Fl. Eur.* 754. 1882, *Plantae Europaeae* 1: 173. 1890, *Vilmorin's Blumengärtnerei. Dritte neubearbeitete Aflage* 1: 1166. 1895 and *Taxon* 31: 343–344, 763–764. 1982, *Willdenowia* 21: 35–50. 1991, Saglik S. et al. “Fatty acid composition of *Dracunculus vulgaris* Schott (Araceae) seed oil from Turkey.” *J. Pharm. Pharm. Sci.* 5(3): 231–233. 2002, *Biol. Lett.* 1(4): 427–430. 2005

(The root is irritant. Thermogenic plants. The tubers and the fruits with the seeds of *Dracunculus vulgaris* have long been in use for the treatment of rheumatism and hemorrhoids, respectively. Veterinary medicine, for skin diseases.)

Dregea E. Meyer Asclepiadaceae (Apocynaceae)

For the German plant collector Jean François (Johann Franz) Drège, 1794–1881 (Altona), botanical explorer, traveller,

author of *Catalogus plantarum exsiccatarum Africae australioris, quas emturis offert*. 1837–1840 and also: *Linnaea*. 19: 583–680. 1847 and 20: 183–258. 1847, with the Prussian botanist Ernst Heinrich Friedrich Meyer (1791–1858) wrote *Commentariorum de plantis Africae australioris*. Leipzig and Königsberg 1835 [1836, 1838], he was the brother of Carl Friedrich Drège (1791–1867). See *Commentariorum de Plantis Africae Australioris* 199. 1835 [1836, 1838], *Enumeratio Plantarum Africae Australis Extratropicae* 350. 1837, George Arnott Walker Arnott (1799–1868), “Notes on some South African plants.” *Hook., J.Bot.* 3: 147–156. 1841, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 704. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 107. 1972, Gilbert Westacott Reynolds, *The Aloes of South Africa*. 58, 60. Rotterdam 1982, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 704. Stuttgart 1993.

***Dregea abyssinica* K. Schum.** (*Dregea abyssinica* (Hochst.) K. Schum.; *Marsdenia abyssinica* (Hochst.) Schltr.; *Pterygocarpus abyssinicus* Hochst.)

Tropical Africa, from Senegal to Nigeria. Shrub or woody climber, liana, twining, heavy white latex, scented white flowers, leaves eaten as a vegetable, the plant yields a fibre, riverine

See *Prodromus Florae Novae Hollandiae* 460. 1810, *Flora* 26: 78. 1843, *Die Natürlichen Pflanzenfamilien* 4(2): 293. 1895, *Die Pflanzenwelt Ost-Afrikas* C: 326. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 143. 1913, *Helv. Chim. Acta.* 51(1): 117–147. 1968

(Fruits and sap may be poisonous. Latex instillation for ear troubles. Roots considered aphrodisiac. The pregnane derivatives of the seeds.)

in Ivory Coast: bergu

in Upper Volta: bergu

***Dregea crinita* (Oliv.) Bullock** (*Marsdenia crinita* Oliv.)

West Africa, Gabon, Angola. Woody climber, liana, stout, no latex, sap clear yellowish, fruit dull dirty yellow with milky latex

See *Prodromus Florae Novae Hollandiae* 460. 1810 and *Hooker's Icones Plantarum* 20: t. 1993. 1891 and *Kew Bulletin* 10: 519. 1957

(The sap used to stop bleeding.)

in Sierra Leone: tenawulo

Dregea rubicunda K. Schum.

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 147. 1893, *Pflanzenw. Ost-Afr. C* p. 326, pl. 34, f. A-H. 1895

(Roots decoction, prevention of abortion. Veterinary medicine, for sore mouth, stomatitis.)

in Uganda: lokakwanetulelo

Dregea schimperi (Decne.) Bullock

East Africa, Sudan, Somalia, Cameroon, Tanzania. Climber, scrambling vine, scandent, liana, herbaceous, stem white-green to brown, milky juice when cut or damaged, white cream corollas, fruit with milky sap, seeds white, savanna, forest

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 616. 1844 and *Kew Bulletin* 11: 518. 1957

(Poisonous to stock, death follows in most cases.)

in Tanzania: mbombise, nakapia

Dregea sinensis Hemsley var. ***corrugata*** (C.K. Schneider) Tsiang & P.T. Li (*Dregea corrugata* C.K. Schneider; *Wattakaka corrugata* (C.K. Schneider) Stapf; *Wattakaka sinensis* (Hemsl.) Stapf var. *corrugata* (C.K. Schneider) Tsiang)

China. Arid regions.

See *Journal of the Linnean Society, Botany* 26(173): 115. 1889 and *Plantae Wilsonianae* 3(2): 353–354. 1916, *Botanical Magazine* 148: pl. 8976. 1923, *Sunyatsenia* 6(2): 152–153, f. 20. 1941, *Acta Phytotaxonomica Sinica* 12(1): 129. 1974, *Steroids* 72(6–7): 514–23. 2007

(The stems and leaves are used for the treatment of jaundice, gonorrhoea, edema, and pyodermas. Steroidal glycosides.)

in English: corrugate Chinese dregea

in China: guan jin teng

Dregea sinensis Hemsley var. ***sinensis*** (*Wattakaka sinensis* (Hemsley) Stapf)

China. Arid regions.

See *Flora* 40: 99. 1857, *Journal of the Linnean Society, Botany* 26(173): 115. 1889 and *Botanical Magazine* 148: pl. 8976. 1923

(All parts are used to induce lactation and to treat rheumatism and fractures.)

in English: Chinese dregea

in China: ku sheng

Dregea volubilis (L.f.) Bentham ex J.D. Hooker (*Asclepias volubilis* L.f.; *Asclepias volubilis* Herb. Madr. ex Hook.f.; *Asclepias volubilis* Domb. ex Decne.; *Dregea formosana* T.

Yamazaki; *Dregea volubilis* Benth. ex Hook.f.; *Hoya formosana* T. Yamazaki; *Hoya viridiflora* R. Br.; *Hoya viridiflora* Griff., nom. illeg.; *Marsdenia volubilis* Cooke; *Marsdenia volubilis* (L.f.) Cooke; *Schollia volubilis* (L.f.) Jacq. ex Steud.; *Schollia volubilis* Jacq. ex Steud.; *Tylophora macrantha* (Maxim.) Makino; *Tylophora macrantha* Hance; *Tylophora macrantha* (Wight) Hook.f.; *Wattakaka volubilis* (Linnaeus f.) Stapf; *Wattakaka volubilis* Stapf)

India, China, Taiwan, Hong Kong. A tall stout shrub, liana, climbing, smooth, woody, watery sap, greenish flowers in lateral drooping umbellate cymes, velvety fruit rugosely striated, ribbed turgid woody follicles, seeds smooth with a tufted coma of long silky hairs, edible leaves used as a green vegetable, root and fruit eaten, in India flowers eaten uncooked or prepared into a *bhaji*, forests, mountains

See *Species Plantarum* 1: 214–217. 1753, *Supplementum Plantarum* 170. 1782 [1781 publ. Apr 1782], *Memoirs of the Wernerian Natural History Society* 1: 27. 1810, *Prodromus Florae Novae Hollandiae* 459–460. 1810, *Eclogae Plantarum Rariorum ...* 1: 5. 1811, *Nomenclator Botanicus* [Steudel] 414, 746. 1821, *Commentariorum de Plantis Africae Australioris* 199. 1838, *Prodr.* (DC.) 8: 539. 1844, *Notulae ad Plantas Asiaticas* 4: 37. 1854, *Icones Plantarum Asiaticarum* t. 388. 1854, *Journal of Botany, British and Foreign* 20(231): 79. 1882, *The Flora of British India* [J.D. South Africa.

See *Flora Capensis* 6: 441–442. 1897

(Wound healing.)

Drimycarpus Hook.f. Anacardiaceae

From the Greek *drimys* ‘acid, pungent’ and *karpos* ‘fruit’, see *Genera Plantarum* [Bentham & Hooker f.] 1(1): 424. 1862.

Drimycarpus anacardiifolius C.Y. Wu & T.L. Ming (*Drimycarpus anacardiifolius* C.Y. Wu & T.L. Ming; *Holigarna anacardiifolius* C.Y. Wu & T.L. Ming)

India, China. Tree, inflorescence racemose axillary or terminal, drupe subglobose yellowish green

See *Pl. Coromandel* 3: 79. 1820 [1819] and *Flora Yunnanica* 2: 413, pl. 124, f. 7. 1979

(Acrid.)

in China: da guo xin guo qi

Drimycarpus racemosus (Roxb.) Hook.f. (*Drimycarpus racemosus* Hook. f. ex Marchand.; *Drimycarpus racemosus* (Roxb.) Hook.f. ex Marchand; *Holigarna racemosa* Roxb.)

India.

See *Hort. Bengal.* 22. 1814, *Plants of the Coast of Coromandel* 3: 79. 1820[1819], *Flora Indica*; or, descriptions of Indian Plants 2: 82. 1832, *Genera Plantarum* 1: 424. 1862, *Rév. Anacardiaceae*. 172. 1869

(Acrid.)

Drimys Forst. & Forst.f. Winteraceae

Greek *drimys* ‘acid, pungent’, alluding to the taste of leaves and of the bark; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 83–84, t. 42. 1775, *Syst. Vegetabilium*. Editio decima quarta 507. 1784, *Regni Vegetabilis Systema Naturale* 1: 443. 1817, *An Introduction to the Natural System of Botany* 26. 1830 and *Journal de Botanique (Morot)* 14: 288–289. 1900, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 699–700. 1938, *J. Arnold Arbor.* 24(1): 1–33. 1943, *Fl. Veracruz* 88: 1–8. 1995, *Ceiba* 44(2): 105–268. 2003 [2005].

Drimys piperita Hook. f. (*Tasmannia piperita* (Hook. f.) Miers; *Tasmannia piperita* Miers)

Indonesia. Tree, branched, white flowers

See *Regni Vegetabilis Systema Naturale* 1: 440, 445. 1817, *Hooker's Icones Plantarum* 9: t. 896. 1852, *Annals and Magazine of Natural History*, ser. 3 2: 110. 1858

(Fresh leaves as fish poison. Magic, ritual, used for sickness.)

in Indonesia: bichit, kayu bichit, kayu bisit

Drimys winteri Forster & Forster f. (*Cortex winteranus* Garsault; *Drimys aromatica* Descourt. ex Baill., nom. illeg.; *Drimys andina* (Reiche) R.A. Rodr. & Quez.; *Drimys aromatica* F. (Roots for pregnant women, also to treat urinary problems, toothache. Veterinary medicine, bark for Newcastle disease.)

in Tanzania: mtendele kaya, mtendelenkanya, sangalala

Droogmansia pteropus (Baker) De Wild. var. *whytei* (Schindl.) Verdc. (*Droogmansia whytei* Schindl.)

Tropical Africa. Perennial non-climbing shrub, suffrutex

See *Repertorium Specierum Novarum Regni Vegetabilis* 22(618–626): 271–272. 1926, *Kew Bulletin* 24(1): 62. 1970

(Root decoction mixed with fresh milk drunk to remedy vomiting.)

in Tanzania: mupululanda

Drosera L. Droseraceae

Greek *droseros* 'dewy', *drosos* 'dew', referring to the dewy stalked leaf glands or to the glistening of the leaf laminae; see Carl Linnaeus (1707–1778), *Species Plantarum*. 1: 281–282. 1753 and *Genera Plantarum*. Ed. 5. 136. 1754, *The Paradisus*

Londinensis, ad t. 95. 1808, A. Bonavilla, *Dizionario etimologico di tutti i vocaboli usati nelle scienze, arti e mestieri, che traggono origine dal greco*. Milano 1819–1821, M.A. Marchi, *Dizionario tecnico-etimologico-filologico*. Milano 1828–1829 and *Economic Botany* 27: 257–310. 1973, *Inform. Bot. Ital.* 12: 113–116. 1980, *Fl. Veracruz* 65: 1–6. 1991, *Watsonia* 20: 63–66. 1994, *Kromosomo* 75–76: 2619–2623. 1994, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 18–22. 1998, *Cytologia* 63: 199–211, 329–339. 1998, *Fl. Neotrop.* 96: 1–67. 2005, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Drosera burmanni Vahl (*Drosera burmanni* DC.)

India, Sri Lanka. Herb, aquatic, leaves with glandular hairs, white flowers, many-seeded capsules, plant not eaten by cattle
See *Symb. Bot.* (Vahl) 3: 50. 1794, *Prodr.* (DC.) 1: 318. 1824
(Plant rubefacient, a decoction taken with ginger for blood dysentery; powdered whole plant given to a patient suffering from spermatorrhea and painful urination. Insectivorous.)

in English: sundew, tropical sundew

in China: jin di luo

in India: burada buchi, mukha-jali

Drosera capillaris Poir. (*Drosera brevifolia* var. *major* Hook.;

Drosera capillaris var. *brasiliensis* Diels; *Drosera communis* var. *breviscapa* C. Wright ex Griseb.; *Drosera rotundifolia* var. *capillaris* Eaton & Wright; *Drosera tenella* Kunth, nom. illeg.; *Drosera tenella* Willd. ex Roem. & Schult.)

North America, Venezuela, Brazil. Perennial, sticky glands

See *Encyclopédie Méthodique, Botanique* (Lamarck) 6(1): 299. 1804, *Systema Vegetabilium* 6: 783. 1820, *Nova Genera et Species Plantarum* 5: 391, t. 490, f. 2. 1821[1823], *Journal of Botany*, being a second series of the Botanical Miscellany 1: 194. 1834, *Catalogus plantarum cubensium* ... 12. 1866 and *Das Pflanzenreich* IV. in Hawaii: pilipili, pipili

in China: he lian dou cao

in India: abhijaal, abijalo, achhamena, avijal, bat-nongrim, batnon-grim, fufu, han-sang-ti, jang-mi, kajahabo, kajikaro, kekso, kichar, laijabori, laizabori, makaibi, mecanachil, parak tapen, paripachhi, pepelak, pipitabatong, pithpapra, sara-kiklo, slis stia, tandal pambi, tandamathi, thei phelwang, thei-thei, tumzimyok, zami

in Indonesia: udu beluk

in Japan: nebari-hakobe, yanbaru-hakobe

in Lepcha: pundim ayaok mook

in Nepal: abijal, abijalo

in Papua New Guinea: lukumuiaia, romp-romp

in Philippines: bakalanga

Drymaria glandulosa Bartl. ex Presl. (*Drymaria fendleri* S. Watson; *Drymaria glandulosa* Bartl.; *Drymaria glandulosa* C. Presl; *Drymaria glandulosa* var. *glandulosa*; *Drymaria leptoclados* Hemsl. var. *peruviana* Ball)

North America, Mexico. Annual herb

See *Reliquiae Haenkeanae* 2(1): 9. 1831, *Diagnoses Plantarum Novarum ... Mexicanarum* 1: 2. 1878, *Journal of the Proceedings of the Linnean Society* 22: 32. 1885

(Chewed plant, poultice applied to mouse bite, skin ailments.)

in English: Fendler's drymary

Drymaria pachyphylla Wooton & Standley

North America.

See *Systema Vegetabilium* 5: xxxi, 406. 1819 and *Contributions from the United States National Herbarium* 16(3): 121–122. 1913

(Poison, highly toxic to livestock.)

in North America: inkweed, thickleaf drymaria, thickleaf drymary

Drymaria villosa Schltldl. & Cham. (*Drymaria hirsuta* Bartl.; *Drymaria idiopoda* S.F. Blake; *Drymaria palustris* Schltldl. & Cham.; *Drymaria pauciflora* Bartl.; *Drymaria villosa* subsp. *villosa*)

Mexico, Peru. Annual villose herb, suberect

See *Linnaea* 5: 232–233. 1830, *Reliquiae Haenkeanae* 2(1): 8. 1831 and *Contributions from the United States National Herbarium* 24(1): 4. 1922, *Annals of the Missouri Botanical Garden* 48(3): 227. 1961

(Whole plant in fever, cough, asthma, hay fever, sinusitis, pneumonia, cold and throat troubles, kidney and liver complaints. Leaves of *Drymaria villosa* mixed with *Fragaria indica* taken against jaundice.)

in China: mao he lian dou cao

in India: abijalo

in Ecuador: drimaria llamba

Drymoglossum C. Presl Polypodiaceae

From the Greek *drymos* ‘a wood, forest, thicket’ and *glossa* ‘tongue’, referring to the habit and fronds, see *Species Plantarum* 2: 1067, 1082–1094. 1753, *Histoire Naturelle des Végétaux, Classés par Familles* 3: 471. 1803[1802], *Deliciae Pragenses* 159. 1822, *Mémoires de la Société Linnéenne de Paris* 6: 218, 225. 1827, *Tentamen Pteridographiae* 5: 227, pl. 10, f. 5–6. 1836 [ante 2 Dec 1836], *Abh. Konigl. Bohm. Ges. Wiss.*, ser 4, 5: 227. 1837, *Mem. Torrey Bot. Club* 6: 277. 1899 and *Webbia* 9: 403. 1953, *Fern Gaz.* 11(2–3): 141–162. 1975.

Drymoglossum heterophyllum (L.) C. Chr. (*Acrostichum heterophyllum* L., Pteridaceae; *Drymoglossum heterophyllum* (L.) Trimen; *Pyrrosia heterophylla* (L.) M.G. Price)

China, Philippines.

See *Species Plantarum* 2: 1067. 1753, *J. Linn. Soc., Bot.* 24. 152. 1887. 1887 and *Index Filic.* 246. 1905, *Botanisk Tidsskrift* 32(2): 348. 1915, *Kalikasan, Philippine Journal of Biology* 3: 177. 1973

(For cough, asthma, constipation, venereal diseases, headache.)

Drymonia Martius Gesneriaceae

Greek *drymos* ‘a wood, forest, thicket’, the plants are growing on trees; see *Nova Genera et Species Plantarum* ... 3: 57, 58, t. 224. 1829, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch* 303. Ansbach 1852, *Linnaea* 34(3): 352, 354, 358, 360. 1865.

Drymonia coccinea (Aubl.) Wiehler (*Alloplectus circinatus* Mart.; *Alloplectus coccineus* (Aubl.) Mart.; *Alloplectus coccineus* var. *fusco-maculatus* Leeuwenb.; *Alloplectus patrisii* DC.; *Besleria coccinea* Aubl.; *Columnnea circinata* (Mart.) Kuntze; *Columnnea coccinea* (Aubl.) Kuntze; *Columnnea patrisii* (DC.) Kuntze; *Crantzia circinata* (Mart.) Fritsch; *Crantzia coccinea* (Aubl.) Fritsch; *Crantzia patrisii* (DC.) Fritsch; *Lophalix coccinea* (Aubl.) Raf.; *Macrochlamys miquelii* Decne., nom. nud.; *Macrochlamys patrisii* (DC.) Decne.)

South America. Vine, large red bracts, yellow flowers

See *Species Plantarum* 2: 638. 1753, *Histoire des plantes de la Guiane Française* 2: 632, t. 255. 1775, *Nova Genera et Species Plantarum* ... 3: 53, 56–57, t. 223, f. 1. 1829, *Sylva Telluriana* 70. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 545. 1839, *Revue Horticole* 3: 243. 1849, *Revisio Generum Plantarum* 2: 472. 1891, *Die Natürlichen Pflanzenfamilien* 4(3b): 168. 1894 and *Acta Botanica Neerlandica* 7: 300, 361, f. 8. 1958, *Phytologia* 27: 324. 1973, *Economic Botany* 51(3): 264–278. 1997, *Selbyana* 25(2): 182–209. 2005

(Anodyne, analgesic, febrifuge, pain reliever, dental analgesic, for pain, toothache and tooth decay.)

in Brazil (Amazonas): hurasi hanaki, hurasiki

Drymonia serrulata (Jacq.) Mart. (*Alloplectus glaber* DC.; *Besleria calcarata* Kunth; *Besleria drymonia* Steud.; *Besleria serrulata* Jacq.; *Besleria spectabilis* Kunth; *Columnnea mocinoana* Kuntze; *Drymonia bicolor* Lindl., nom. illeg. superfl.; *Drymonia buscalionii* Fritsch ex Buscal.; *Drymonia calcarata* Mart.; *Drymonia campbellii* Rusby; *Drymonia chiapensis* Brandegees; *Drymonia cristata* Miq.; *Drymonia glabra* (DC.) C.V. Morton; *Drymonia jacquinii* G. Don, nom. illeg. superfl.; *Drymonia maculata* S. Moore; *Drymonia mollis* Oerst.; *Drymonia parvifolia* Griseb.; *Drymonia poeppigiana* Fritsch; *Drymonia sarmentosula* Lem., nom. illeg. superfl.; *Drymonia spectabilis* Mart.; *Drymonia spectabilis* (Kunth) G. Don; *Drymonia spectabilis* (Kunth) Mart. ex DC., nom. illeg., non *Drymonia spectabilis* (Kunth) G. Don; *Drymonia ulei* Wiehler)

Panama, Nicaragua, Ecuador. Clambering, yellow flowers, variable species

See *Species Plantarum* 2: 619, 638. 1753, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 21–22, t. 290. 1798, *Nova Genera et Species Plantarum* (quarto ed.) 2: 399–400. 1818, *Nova Genera et Species Plantarum* ... (Martius) 3: 53, 57–59, t. 224. 1829, *Nova Genera et Species Plantarum* ... 3: 192. 1832, *Appendix to the first ... A Sketch of the Vegetation of the Swan River Colony* ... 24: t. 4. 1838, *A General History of the Dichlamydeous Plants* 4: 653. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 43, 546. 1839, *Nomenclator Botanicus*. Editio secunda 1: 200. 1840, *Linnaea* 18: 26. 1844, *Flore des Serres et des Jardins de l'Europe* 4: t. 388. 1848, *Centralamericas Gesneraceer* 38–39, t. 9, f. 41–43 and 62–63, t. 11, f. 18–23. 1858, *Flora of the British West Indian Islands* 463. 1862, *Revisio Generum Plantarum* 2: 471. 1891, *Transactions of the Linnean Society of London, Botany* 4: 410. 1895 and *Annali di Botanica* 9: 113, t. 3. 1911, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 485. 1913, *University of California Publications in Botany* 6(4): 64. 1914, *Memoirs of the New York Botanical Garden* 7: 359. 1927, *Baileya* 15(3): 121–123. 1967 [1968], *Selbyana* 7: 328, t. 1b. 1984, *Rev. Med. Panama*. 18(3): 211–6. 1993, *The Gloxinian*

44(2): 23–27. 1994, *Journal of Ethnopharmacology* 96(3): 389–401. 2005

(Analgesic and antiinflammatory, leaves placed on the body as a local anodyne, curing skin eczema, a snakebite antidote.)

Drynaria (Bory) J. Sm. Polypodiaceae

Greek *dryinos* ‘oaken’, *drys* ‘oak, tree’, referring to the foliage, *meli d.* ‘honey from the hollow of an oak’, ant-attracting nectaries; see *Ann. Sci. Nat.* (Paris) 5: 463–465. 1825, *Hooker’s Journal of Botany* 3: 397. 1841 and 4: 60. 1841 [Jul 1841], *Botanical Magazine* 72(Comp.): 13. 1846, *Hist. Fil.* 108. 1875 and Alderwerelt van Rosenburgh, Cornelis Rugier Willem Karel (1863–1936), *Malayan Ferns and Fern Allies* 415. Batavia 1916, *Bulletin of the Fan Memorial Institute of Biology* 4(3): 56–58. 1933, *Acta Phytotaxonomica Sinica* 16(4): 19–21. 1978, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 96. Berlin & Hamburg 1989.

Drynaria bonii H. Christ (*Drynaria meeboldii* Rosenst.)

Vietnam.

See *Notulae Systematicae*. Herbarium du Museum de Paris 1(6): 186. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 12: 248–249. 1913

(Antiinflammatory, used for treating backpain, arthrosis and other joint disorders.)

in China: tuan ye hu jue

in Vietnam: cot toai bo

Drynaria fortunei (Kunze ex Mett.) J. Sm. (*Drynaria roosii* Nakaïke; *Polypodium fortunei* Kunze ex Mett.)

Japan, China.

See *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 1: 121, pl. 3, f. 42–45. 1856, *The Botany of the Voyage of H.M.S. ~Herald~* 425–426. 1857 and *New Fl. Jap. Pterid.* revised & enlarged 841, f. 882. 1992

(Antiinflammatory, for rheumatism.)

Drynaria mollis Bedd. (*Drynaria costulisora* Ching & S.K. Wu; *Drynaria rivalis* (Mett. ex Baker) H. Christ; *Drynaria rivalis* Christ; *Drynaria tibetica* Ching & S.K. Wu; *Polypodium rivale* Mett. ex Baker)

China, Himalaya, Nepal.

See *Ferns of British India* t. 216. 1866, *Synopsis Filicum* (Hooker & Baker) 367. 1867, *Bulletin de l’Herbier Boissier* 7(1): 6. 1899 and *Glimpses Pl. Res.* 4: 98–130. 1979, *Flora Xizangica* 1: 342–346, pl. 91, 92. 1983, *J. Cytol. Genet.* 19: 111–112. 1984, *J. Cytol. Genet.* 23: 38–52. 1988

(Rhizome paste applied in backache. Veterinary medicine, rhizome decoction as a wash for dislocated parts of animals.)

in Nepal: chyamno

Drynaria propinqua (Wall. ex Mett.) Bedd. (*Drynaria propinqua* J. Sm., nom. nud.; *Drynaria propinqua* (Wall.) J. Sm.; *Drynaria propinqua* (Wall. ex Mett.) J. Sm. ex Bedd.; *Drynaria propinqua* (Wall. ex Mett.) J. Sm.; *Polypodium propinquum* Wall. ex Mett.; *Polypodium propinquum* Wall.)

China, Nepal.

See *Numer. List* [Wallich] n. 293. 1828, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 4: 61. 1841, *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 1: 120, pl. 3, f. 50. 1856, *Ferns of British India* 1: 160, pl. 160. 1866

(Rhizome paste applied on forehead for headache.)

in Nepal: harpasaro, kammari

Drynaria quercifolia (L.) J. Smith (*Polypodium quercifolium* L.)

Philippines. Epiphytic or lithophytic fern, herbs, stoloniferous, creeping stout fleshy rhizome

See *Sp. Pl.* 2: 1082–1094. 1753, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 398. 1841

(Used in Ayurveda. Plant pectoral, expectorant, astringent, anthelmintic, astringent, stomachic, tonic; whole plant juice mixed with coconut oil poured into ear for hearing improvement; plant paste applied as a postpartum remedy. Febrifuge, pound the leaves in water and sprinkle the water over the head of the patient; for swellings, pound the fronds and poultice. Stolons given for chronic jaundice. Rhizomes antibacterial, bitter, antiinflammatory, astringent, antihelmintic, tonic; oil from the rhizome applied over the scalp for insanity and to get cooling effect; peeled rhizome with sugar taken for urination problems and in spermatorrhea; decoction of fresh or dried rhizome for cough, fever, ulcers, arthralgia, migraine, headache, diarrhea, dyspepsia and fever.)

in English: oak-leaf fern

in Bangladesh: folorere

in China: le ye hu jue

in India: aanappacha, ashvakatri, asvakatri, asvakatri, basingh, garur, hanumana hastha, hanumana paada, kade kau, katikapan, marappanna, marayolai, matilpanna, panna, panna-kelengo-maravara, pannakilhannumaravala, pannakkilanku, pannakkilannu, panniola, parashrayee dhekia, utangbi, wandurbasingh, welli-panna-kelengu-maravara

Malay name: kepala tupai

in the Philippines: бага-бага, гона-тибатиб, кабкб, кабкбан, кабкбин, kappa-pappa, paipaiamo, paipaimo, pako, pakpak-lauin, pakpak lawin, saga

Drynaria rigidula (Sw.) Bedd. (*Drynaria baudouini* E. Fourn.; *Drynaria diversifolia* (R. Br.) J. Sm.; *Drynaria gaudichaudii* (Bory) Gaudich.; *Drynaria pinnata* Fée;

Drynaria rigidula var. *koordersii* Alderw.; *Egenolfia gaudichaudiana* (Bory) Fée; *Goniophlebium rigidulum* (Sw.) T. Moore; *Phymatodes gaudichaudii* (Bory) C. Presl; *Polypodium baudouini* (E. Fourn.) Baker; *Polypodium diversifolium* R. Br.; *Polypodium gaudichaudii* Bory; *Polypodium glaucistipes* Wall., nom. nud.; *Polypodium rigidulum* Sw.; *Polypodium rigidulum* var. *vidgeni* F.M. Bailey; *Polypodium speciosum* Blume; *Polypodium speciosum* (Blume) H. Christ

India.

(For rheumatism.)

in China: hu jue

Drynaria sparsisora (Desv.) T. Moore (*Drynaria linnaei* (Bory) Bedd.; *Drynaria linnaei* Bedd.; *Drynaria linnei* Bory ex Bedd.; *Polypodium linnei* Bory; *Polypodium sparsisorum* Desv.)

Papua New Guinea. Epiphytic fern

See *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 315. 1811, *Ann. Sci. Nat.* (Paris) 5: 464, t. 12

(Linnaei auctt.). 1825, *Index Filicum* (T. Moore) 348. 1862, *The Ferns of British India* t. 315. 1869

(For swellings, headache, dropsy, edema, acne, conjunctivitis, pound the leaves and poultice. Powdered roots baked in coals and applied as a poultice to relieve swelling. Sliced thick roots decoction drunk as an anthelmintic. Magic, to hide oneself from evil spirits.)

in Indonesia: tuban

Malay names: kakayar, kepala tupai

Dryobalanops Gaertner f. Dipterocarpaceae

From the Greek *dryobalanos* 'acorn' and *ops* 'like', see *Supplementum Carpologiae* 49. 1805.

Dryobalanops aromatica Gaertner f.

Sumatra to Borneo. Tree, resinous wood, camphor in the cavities of the trunk, lowland rain forest

See *Supplementum Carpologiae* 49, pl. 186. 1805 and *Botanical Journal of the Linnean Society* 92: 75–88. 1986

(Used in Ayurveda. Balsam oil rubefacient, for swellings, rheumatism, ringworm, headache, gastralgia, dropsy, edema, acne, sore, conjunctivitis. Camphor pounded with the leaves of *Heterostemma* and rubbed on the chest to relieve the symptoms of colds and flu. Powdered kernel against colic and stomachache.)

in English: Borneo camphor, Borneo camphor tree, Brunei teak, camphor tree, Sumatra camphor

in SE Asia: baros, barus, kapur

in China: long nao xiang, lung nao hsiang, mi nao, su nao, chin chiao nao, bing pian, ping p'ien, ch'ing ping p'ien, ni ping p'ien, mei hua p'ien, p'o lu hsiang, chieh p'o lo hsiang

in India: baraas bhimseni kapoor, bhimasenakarpoora, bhimseni kapoor, himamaluka, paccai-k-karpuram

in Indonesia: kaju kapur, kapur baros

in Malaysia: kapur, kapur barus, kapur bukit, kapur peringgi

in Tibetan: stag-zil ga-bur

Dryopetalon A. Gray Brassicaceae (Cruciferae)

Greek *drys* 'tree, oak' and *petalon* 'petal', petals lobed, see *Smithsonian Contributions to Knowledge* 5(6): 11–12, pl. 11. 1853 and *Taxon* 31(3): 422. 1982, *Novon* 17(4): 397–402. 2007.

Dryopetalon runcinatum A. Gray (*Coelophragmus umbrosus* (B.L. Rob.) O.E. Schulz; *Dryopetalon runcinatum* var. *laxiflorum* Rollins; *Sisymbrium umbrosum* B.L. Rob.)

Mexico. Herb, leafy, white pinkish flowers in terminal clusters, fringed lobed petals, slender elongated upright seedpods

See *Pl. Wright.* 2: 11, t. 12. Feb 1853 and *Botanical Gazette* 30(1): 60. 1900, *Das Pflanzenreich* 86[IV,105]: 158. 1924, *Contributions from the Dudley Herbarium* 3(6): 201–202, tab. 48, fig. 2, pl. 49 [map]. 1941

(For backache.)

in English: rock-mustard

Dryopsis Holttum & P.J. Edwards Dryopteridaceae

Greek *drys* ‘oak, tree’ and *opsis* ‘like, resembling’, see *Kew Bulletin* 41(1): 179, 189. 1986.

Dryopsis apiciflora (Wall. ex Mett.) Holttum & P.J. Edwards (*Aspidium apiciflorum* Wall. ex Mett.; *Aspidium apiciflorum* Wall.; *Ctenitis apiciflora* (Wall. ex Mett.) Ching; *Dryopteris apiciflora* (Wall. ex Mett.) Kuntze; *Dryopteris apiciflora* (Wall.) Kuntze; *Lastrea apiciflora* C. Presl; *Lastrea apiciflora* (Wall. ex Mett.) (Plant antiinflammatory.)

Dryopteris paleacea (Moore) Fomin (*Dryopteris mediterranea* Fomin; *Dryopteris paleacea* (Lag. ex Sw.) C. Chr., nom. illeg.)

Europe, Caucasus.

See *Verh. Zool.-Bot. Ges. Wien* 58. (100). 1908, *Fl. Caucas. Crit.* 1(1): 52. 1911, *Amer. Fern J.* 1(5): 94–95. 1911, *Bull. Torrey Bot. Club* 39(12): 591. 1912, *Flora URSS* 1: 35–36. 1934

(Sporophyll antibacterial.)

Dryopteris pentheri (Krasser) C. Chr. (*Nephrodium pentheri* Krasser)

Gabon, South Africa. Herb, terrestrial fern, tufted

See *Annalen des K. K. Naturhistorischen Hofmuseums* 15: 5. 1900, Zahlbruckner, Alexander (1860–1938), *Plantae Pentherianae*. Aufzählung der von Dr. A. Penther ... in Südafrika gesammelten Pflanzen. Wien, 1900–1903. [Ann. Hofmus. Wien, xv., xviii., xx.], Penther, Arnold, *Eine Reise in das Gebiet des Erdschias-Dagh (Kleinasien) 1902* / von A. Penther mit Beiträgen von E. Zederbauer & I. Tschamler. Wien, 1905, *Index Filicum* 284. 1905

(Anthelmintic, strong purgative, roots decoction for intestinal parasitism. Veterinary medicine, purgative, vermifuge.)

in Burundi: iraba

Dryopteris ramosa (C. Hope) C. Chr. (*Dryopteris ramosum* (C. Hope) C. Chr.; *Nephrodium ramosum* C. Hope; *Nephrodium ramosum* (P. Beauv.) Baker)

India.

See *Journal of Botany, British and Foreign* 34: 126. 1896 and *Index Filicum* fasc. 5: 287. 1905, *J. Cytol. Genet.* 23: 38–52. 1988, *Aspects Pl. Sci.* 11: 459–465. 1989

(Rhizome antibacterial.)

Dryopteris sparsa (D. Don) Kuntze (*Aspidium catophoron* Kunze; *Aspidium viridescens* (Baker) Miq.; *Aspidium viridescens* Miq.; *Dryopteris sinosparsa* Ching & K.H. Shing; *Dryopteris sparsa* (Ham.) Kuntze; *Dryopteris sparsa* (D. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002, *Global Journal of Pure and Applied Sciences* 9(2): 193–198. 2003, *American Journal of Botany* 91(11): 1882–1900. 2004.

Drypetes assamica (Hook.f.) Pax & K. Hoffm. (*Cyclostemon assamicus* Hook.f.)

India, Vietnam, Himalaya.

See *Fl. Brit. India* 5: 342. 1887 and *Pflanzenr.*, IV, 147, XV (Heft 81): 241. 1922

(Fruit pulp bitter, poisonous. Fish poison.)

Drypetes capillipes (Pax) Pax & K. Hoffm. (*Lingelsheimia capillipes* Pax) (*Lingelsheimia* Pax, for the German botanist Alexander von Lingelsheim, 1874–1937, professor of pharmacognosy, pharmacist, 1904–1929 at the Botanical Museum and Garden at Breslau; see Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 388. 1965, T.W. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 239. 1972, R. Zander, F.

Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.)

Central Africa, Nigeria. Shrub or small tree, whitish green scented flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 317–318. 1909, *Das Pflanzenreich* 147,15(Heft 81): 260. 1922, *Taxon* 24: 536. 1975

(Pulverized root bark applied to furuncles and boils. Bark decoction as a mouthwash to treat toothache. Neck massaged with the leaves to treat a stiff neck.)

in Zaire: roko basoli, roko paypay, rokobasoli

Drypetes chevalieri Beille ex Hutch. & Dalziel (*Drypetes chevalieri* Beille)

Tropical Africa. Shrub or small tree, monoecious or dioecious, flowers cream-white, fleshy yellow to orange fruits

See *Bulletin de la Société Botanique de France* 61, Mém. 8: 293. 1917, *Fl. W. Trop. Afr.* 1: 287. 1928, *Natural Product Research* 20(6): 586–592. 2006

(Sap from the leaves and twigs taken to treat diarrhea, dysentery, colic, stomachache. Powdered leaves sniffed to treat colds, asthma, sinusitis, bronchitis.)

in Nigeria: osunsun-iro, aya (Yoruba); owe, aghedan (Edo)

Drypetes dinklagei (Pax) Hutch. (*Cyclostemon dinklagei* Pax; *Cyclostemon dinklagei* Pax; *Drypetes dinklagei* Hutch.)

Tropical Africa. Small tree, greenish flowers

See *Bot. Jahrb. Syst.* 23: 520. 1897 and *Fl. Trop. Afr.* [Oliver et al.] 6(1.4): 683. 1912

(Bark and leaves as fish poison.)

Drypetes gossweileri S. Moore (*Drypetes armoracia* Pax & K. Hoffm.)

Tropical Africa. Tree, bole straight, yellowish green flowers, fruit an apple-shaped drupe, strongly bad smelling tree, cooked seeds eaten, gorillas eat the leaves

See *Eclogae Americanae* 3: 49. 1807 and *Journal of Botany, British and Foreign* 58: 271. 1920, *Revue de Médecines et Pharmacopées Africaines* 8(1): 17–21. 1994, *Planta Medica* 63(2): 282–284. 1997, *Journal of Essential Oil Research* 9(3): 367–370. 1997, *Bulletin of the Chemical Society of Ethiopia* 17(2): 181–184. 2003, *Flavour and Fragrance Journal* 18(3): 207–210. 2003

(Fruit pulp bitter, poisonous. Sawdust can cause dermatitis, ocular and respiratory problems. Leaf decoction drunk for asthma in children. Stem bark powder eaten to treat sexual asthenia, a paste applied to injuries, wounds, sores, ulcers and swellings. Bark purgative, abortifacient, postpartum remedy, aphrodisiac, febrifuge, analgesic, antiinflammatory, vermifuge, astringent, phytotoxic, antifungal, to treat

diarrhea, fevers, scabies, venereal diseases, intestinal worms, headache, toothache, intercostal pain, rheumatism, cough and bronchitis. Root decoction sprinkled around the house to repel snakes. Fish poison, stem bark, leaves and fruits. Magic, ceremonial, ritual.)

in English: horseradish tree

in Cameroon: bologa, kode, olelang

in Central African Republic: gama, n'zongo, ngama

in Congo: bonsole, boshimi, muyuyungu, pilipili, vungu, yungu

in Gabon: akot, ossôgho

in Nigeria: agawo, okhuaba

Drypetes inaequalis Hutch. (*Cyclostemon leonensis* Pax; *Drypetes leonensis* (Pax) Pax & K. Hoffm., nom. illeg.)

Tropical Africa. Small tree, slash with smell of horseradish

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 380. 1903, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 219. 1909, *Flora of Tropical Africa* 6(1): 684. 1912, *Das Pflanzenreich* 147,15(Heft 81): 104, 254, 262. 1922

(A palm wine maceration of the stem bark drunk to treat colic in children. Bark decoction a mouth wash to treat scurvy.)

Drypetes ivorensis Hutch. & Dalziel (*Drypetes pierreana* A. Chev., nom. illeg.)

Liberia, Cameroon. Small tree, inflorescences cauliflorous, fruits eaten

See *Flora of Tropical Africa* 6(1): 686. 1912, *Exploration Botanique de l'Afrique Occidentale Française ...* 561. 1920, *Flora of West Tropical Africa* 1: 287. 1928

(Bark toxic, used to prepare bait to poison rats and mice. Bark and fruits crushed to make a dressing to mature abscesses.)

Drypetes klainei Pierre ex Pax

Gabon. Small tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 218–219. 1909

(A maceration or decoction of fresh stem bark rubbed to treat rheumatism. An extract of the stem bark together with dried unripe fruits of hot pepper is drunk to expel worms.)

in Ivory Coast: zogre

in Zaire: rokobasoki, rokobasoli

Drypetes leonensis Pax (*Aporosa inaequalis* Pax & K. Hoffm.; *Drypetes hutchinsonii* Pax & K. Hoffm., nom. illeg.; *Drypetes kamerunica* Pax & K. Hoffm.; *Drypetes leonensis* Pax & K. Hoffm.; *Drypetes leonensis* (Pax) Pax & K.

Hoffm., nom. illeg.; *Drypetes rowlandii* Pax; *Drypetes urophylla* Pax & K. Hoffm.)

Guinea, Central African Republic, Gabon and Congo. Shrub or small tree, yellow-green scented flowers, dark reddish tomentose fruits, smelling of horseradish

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 380. 1903, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 219. 1909, *Pflanzenw. Afr.* iii. II. (Engl. & Drude, *Veg. der Erde*, ix.) 34. 1921, *Das Pflanzenreich* (Engler) Euphorb.-Phyllanthoid.-Phyllanth. 147,15(Heft 81): 104, 254, 262. 1922

(A palm wine maceration of the stem bark drunk to treat colic in children. Bark decoction a mouth wash to treat scurvy. Bark and leaves used as fish poison.)

in Nigeria: tafia, ajoko (Yoruba)

in Zaire: amakuwakuwakuwa

Drypetes madagascariensis (Lam.) Humbert & Leandri (*Cyclostemon aquifolium* Scott-Elliot; *Cyclostemon madagascariensis* Pierre ex Humbert & Leandri; *Drypetes aquifolium* (Scott-Elliot) Pax & K. Hoffm.; *Drypetes madagascariensis* subvar. *inermis* Humbert & Leandri; *Drypetes madagascariensis* var. *perrieri* Humbert & Leandri; *Ilex madagascariensis* Lam.)

Madagascar. Small tree, fruits eaten

See *Species Plantarum* 1: 125. 1753, *Encyclopédie Méthodique, Botanique* 3: 148. 1789, *J. Linn. Soc., Bot.* 29: 49. 1891 and *Das Pflanzenreich* 147,15(Heft 81): 277. 1922, *Nat. Pflanzenfam.* ed. 2, 19c: 73. 1931, *Bulletin du Muséum d'Histoire Naturelle*, II, 4: 118–121. 1932

(The pulp made from the leafy branches rubbed into scarifications to increase milk production.)

Drypetes molunduana Pax & K. Hoffm.

Tropical Africa, Nigeria. Shrub or small tree, flowers cauliflorous, strongly smelling

See *Das Pflanzenreich* 147,15(Heft 81): 258. 1922, *Phytochemistry* 54(8): 811–815. 2000, *Pharmaceutical and Pharmacological Letters* 11(2): 61–63. 2001, *Pharmaceutical Biology* 41(1): 26–30. 2003

(Leafy stem decoction antiinflammatory, analgesic, taken to treat inflammations, boils, swellings and ulcers.)

Drypetes natalensis (Harv.) Hutch. (*Cyclostemon natalensis* Harv.)

Eastern and southern Africa. Tree or shrub, leaf margins serrated, cauliflorous cream flowers

See *Thesaurus Capensis* 2: 64, t. 200. 1863 and *Flora Capensis* 5(2): 404. 1920

(A decoction of the stem bark and leaves taken to reduce fever in patients with malaria.)

in English: Natal drypetes, Natal ironplum

in Southern Africa: Natalsysterpruim, stinkbos; iKhushwane elikhulu, umBejiza, umGunguluza, umGunguluzane, umKhushwane (Zulu); umKhiwane (Xhosa)

Drypetes staudtii (Pax) Hutch. (*Cyclostemon staudtii* Pax)

Nigeria and Cameroon. Tree or shrub, male cauliflorous sweet scented flowers on the trunk

See *Bot. Jahrb. Syst.* 26: 326. 1899 and *Fl. Trop. Afr.* 6(1): 685. 1912

(The seeds found to contain triterpenoids and flavonoids.)

Drypetes vitiensis Croizat

Pacific.

See *Sargentia* 1: 49. 1942

(For headache.)

Duabanga Buch.-Ham. Sonneratiaceae (Lythraceae)

Duyabanga is a Bengali name for *Duabanga grandiflora*, see *Supplementum Plantarum* 38, 252. 1782, *Exposition des Familles Naturelles* 2: 175. 1805, *Transactions of the Linnean Society of London* 17(2): 177–178. 1835 [1837 publ. 25 May 1835], *Die Natürlichen Pflanzenfamilien Nachtr.* 1: 261. 1897 and *Floristic Regions of the World* 332. 1986, *Taxon* 42: 35–41. 1993, *Journal of Tropical and Subtropical Botany* 6(1): 40–46. 1998.

Duabanga grandiflora (Roxb. ex DC.) Walp. (*Duabanga sonneralioides* Buch.-Ham.; *Duabanga sonneratioides* Buch.-Ham.; *Lagerstroemia grandiflora* Roxb. ex DC.; *Lagerstroemia grandiflora* Roxb.; *Leptospartion grandiflora* Griff.; *Leptospartion grandiflorum* Griff.; *Leptospartion grandiflorum* (Roxb. ex DC.) Griff.)

SE Asia, Nepal. Trees, fast growing, irregular cylindrical bole, spreading horizontal branches, large opposite distichous oblong leaves, white flowers in terminal panicles, globose capsules adnate to the spreading calyx, ripe fruits eaten

See *Systema Naturae, Editio Decima* 2: 1068, 1076, 1372. 1759, *Hort. Bengal.* 38. 1814, *Mémoires de la Société Botanique de Genève* 3(2): 84. 1826, *Transactions of the Linnean Society of London* 17(2): 177–178. 1835 [1837 publ. 25 May 1835], *Repertorium Botanices Systematicae* (Walpers) 2: 114. 1843, Griffith, William (1810–1845), *Posthumous papers bequeathed to the Honorable the East India Company and printed by order of the government of Bengal, Itinerary notes of plants collected in Khasyah and Bootan mountains, 1837–1838, in Affghanistan and neighbouring countries, 1839–1841* / by the late William Griffith, arranged by John

M'Clelland. Calcutta, 1848, *Icones Plantarum Asiaticarum* 4: 591. 1854, *FBI* 2: 579. 1879

(Leaves pounded to make a poultice placed around waist for stomachache, often with *Musa*, *Colocasia*, *Litsea* and *Entada*. Bark as fish poison.)

in China: ba bao shu

in India: munjin-araung, pi-araung

in Malaysia: beremban bukit, berembang bukit, berembong bukit, beremban darat, kedada bukit, pedada bukit, pedada darat, bermah

in Nepal: lampate, madane

Duboisia R. Br. Solanaceae

After the London merchant Charles Du Bois (du Bois, Dubois), c. 1656–1740 (d. Mitcham, Surrey), patron of botany and plant collector, 1700 a Fellow of the Royal Society, from 1702 to 1737 treasurer to the Honorable East India Company, owner of a botanical garden at Mitcham, sent plants to James Petiver (1658–1718), I. Rand, J. Sherard and Leonard Plukenet (1642–1706). See Plukenet, Leonard (1642–1706), *Almagestum botanicum*. 4. Londini 1696, Ray, John (1627–1705), Joannis Raii *Synopsis methodica stirpium Britannicarum*: tum indigenis, tum in agris cultis locis suis dispositis; additis generum characteristicis, specierum descriptionibus & virium epitome. Londini: Impensis Gulielmi & Joannis Innys ... 1724, Robert Brown, *Prodromus florae Novae Hollandiae*. 448. 1810, John Claudius Loudon, *Arboretum et fruticetum britannicum*. 1: 62–63. Aufl. 244. 1993.

Duboisia hopwoodii (F. Muell.) F. Muell. (*Anthocercis hopwoodii* F. Muell.; *Duboisia hopwoodii* F. Muell.) (after Henry Hopwood, founder of Echuca, 1853, a subscriber to the ill-fated Burke and Wills expedition, the Victoria Exploring Expedition, 1860; see Tom Bergin, *In the Steps of Burke & Wills*. Sydney 1981, Jonathan Wantrup, *Australian Rare Books, 1788–1900*. Hordern House, Sydney 1987)

Australia.

See *Prodromus Florae Novae Hollandiae* 448. 1810, *Fragm.* (Mueller) 2(15): 138. 1861, *Fragmenta Phytographiae Australiae* (Mueller) 8(69): 232. 1874, Walter E. Roth, *Ethnological studies among the north-west-central Queensland Aborigines*. [Octavo, first edition.] Brisbane and London 1897

(Masticatory and fumatory, stimulant and narcotic. Aphicide, insecticidal, fish and camel poison, used for stupefying emus.)

in Australia: pitcheri, pitchuri, pitchuri thorn apple, pituri (name given by the Aborigines of Mulligan River, Western Queensland), pityuri

Duboisia leichhardtii F. Muell. (*Duboisia leichhardtii* (F. Muell.) F. Muell.)

Australia. Large shrub

See *Southern Science Record* 2: 222. 1882

(Poison. A source of atropine and hyoscine.)

Duboisia myoporoides R. Br.

Australia. Tree, white flowers

See *Prodromus Florae Novae Hollandiae* 448. 1810

(Poison, intoxicant, mydriatic. Sedative, anti-cholinergic, hypnotic, stimulant and narcotic, masticatory, fumatory. Watery extract of the leaves, mydriatic properties. Piscicide. Accidental poisoning recorded.)

in English: Australian cork tree, cork wood

Duboscia Bocquillon Tiliaceae

Named after a M. Dubosc or du Bosc; see *Genera Plantarum* 289. 1789, *Adansonia* 7: 50. 1866 and J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique centrale*. CTA, Ede/Wageningen 1989, *African Study Monographs* 23(2): 65–89. 2002, *American Journal of Primatology* 58(3): 91–116. 2002, *African Study Monographs* 25(1): 1–27. 2004.

Duboscia macrocarpa Bocq. (*Diplantheum brieyi* De Wild.; *Diplantheum viridiflorum* K. Schum.; *Duboscia macrocarpa* A. Chev.; *Duboscia viridiflora* (K. Schum.) Mildbr.; *Duboscia viridiflora* Mildbr.)

Tropical Africa. Tree, fruits very strongly scented

See *Adansonia* 7: 56. 1866, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. (1897) 234. 1897 and *Bull. Jard. Bot. État Bruxelles* 5: 65. 1915, *Exploration Botanique de l'Afrique Occidentale Française ...* 89. 1920, *Wiss. Ergebn. Zweit. Deut. Zentr.-Afr. Exped. (1910–11)*, *Bot.* 2: 59. 1922

(Seed and a decoction of the stem bark to treat toothache; stem bark taken against cough. Bark infusion taken against tuberculosis. Fruit used to treat tuberculosis; fruit decoction a vermifuge for children, also taken by adults to treat abdominal problems. Magic, ritual, the scented fruit.)

in Cameroon: akak, akark, bikabo, kak, nguruma, yebele

in Central African Republic: kakama, ngourma, ngourouma

in Congo: ekak

in Gabon: aka, akak

in Ivory Coast: pianro, otoumon

in Nigeria: okpe ghede; okpeghede (Edo); okashie (Boki)

Duboscia polyantha Pierre ex A. Chev.

Central Africa, Gabon.

See Chevalier, Auguste Jean Baptiste (1873–1956), *Les Végétaux Utiles de l'Afrique Tropicale Française* 9: 81. 1917

(Stem bark against cough, bark infusion for tuberculosis. Fruit used to treat tuberculosis; fruit decoction a vermifuge for children, also taken by adults to treat abdominal problems. Magic, ritual, the scented fruit.)

Duchesnea J.E. Smith Rosaceae

After the French horticulturist Antoine Nicolas Duchesne, 1747–1827, botanist, author of *Histoire naturelle des fraisières*. Paris 1766; see J.E. Smith, in *Transactions of the Linnean Society of London. Botany*. 10(2): 372–374. 1811, *Prodromus Florae Nepalensis* 233. 1825, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 304. Ansbach 1852, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 3. (1888) 33. 1888 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 1063–1119. 1938, *Fieldiana, Bot.* 24(4): 432–484. 1946, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 484. 1965, Frans A. Stafleu, *Linnaeus and the Linnaeans*. Utrecht 1971, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 108. 1972, *Bulletin of the Botanical Survey of India* 27(1–4): 181. 1985[1987], *Invest. Stud. Nat.* 12: 48–65. 1992, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 704. 1993, *Edinburgh Journal of Botany* 50(2): 176. 1993.

Duchesnea chrysantha (Zollinger & Moritzi) Miquel (*Duchesnea formosana* Odashima; *Duchesnea wallichiana* (Seringe) Nakai ex H. Hara; *Fragaria chrysantha* Zollinger & Moritzi; *Fragaria indica* Andrews var. *wallichii* Franchet & Savatier; *Fragaria nilgerrensis* Schldl. ex J. Gay; *Potentilla indica* (Andrews) Th. Wolf var. *wallichii* (Franchet & Savatier) Th. Wolf; *Potentilla wallichiana* Seringe)

SE Asia, China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 574. 1825, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842–1844* 7. 1846, *Fl. Ned. Ind.* 1: 372. 1855, *Annales des Sciences Naturelles; Botanique*, série 4 8: 206. 1857, *Enumeratio Plantarum in Japonia Sponte Crescentium* ... 1(1): 129. 1873 and *Bibliotheca Botanica* 71: 666. 1908, *Journal of Japanese Botany* 10(1): 22–23. 1934, *Journal of the Society of Tropical Agriculture* 7: 79. 1935, *Telopea* 9(4): 798. 2002, *Schlechtendalia* 10: 36. 2003

(Emetic.)

in China: zhou guo she mei

in Tibet: sa zi mei bu

Duchesnea indica (Andrews) Focke (*Duchesnea formosana* Odashima; *Duchesnea indica* var. *indica*; *Duchesnea indica* var. *major* Makino; *Duchesnea wallichiana* (Ser.) Nakai; *Duchesnea wallichiana* (Ser.) Nakai ex Hara; *Fragaria indica* Andrews; *Potentilla indica* (Andrews) Th. Wolf; *Potentilla indica* var. *major* Makino)

India. Perennial herb, rooting stolons, flowers solitary or in terminal cymes, bright red ripe fruits eaten, root and lower part of stem eaten as betel nut

See *Bot. Repos.* 7: t. 479. 1807, *Trans. Linn. Soc. London, Bot.* 10: 372. 1811, *Nat. Pflanzenfam.* 3(3): 33. 1888 and *Synopsis der Mitteleuropäischen Flora* 6(1): 661. 1904, *Botanical Magazine* 28: 184. 1914, *J. Jap. Bot.* ii. 19. 1921, *J. Jap. (Aphrodisiac, astringent, sedative, antispasmodic, for rheumatism, dysentery, paralysis, menstrual cramps.)

in South America: muira puama

Dumasia DC. Fabaceae (Phaseoleae)

After the French (b. Alès/Alais, Gard) scientist Jean-Baptiste-André Dumas, 1800–1884 (d. Cannes), husband of Hermine Brongniart (daughter of Alexandre Brongniart); see *Annales des Sciences Naturelles (Paris)* 4: 96–97. 1825 and Satish C. Kapoor, in *D.S.B.* 4: 242–248. 1981, *J. Jap. Bot.* 66: 275–279. 1993.

Dumasia villosa DC. (*Apios martini* H. Lév.; *Dumasia bicolor* Hayata; *Dumasia glaucescens* Miq.; *Dumasia leiocarpa* Benth.; *Dumasia pubescens* DC.; *Dumasia villosa* subsp. *bicolor* (Hayata) H. Ohashi & Tateishi; *Dumasia villosa* var. *arunachalensis* S.V. Predeep & M.P. Nayar; *Dumasia villosa* var. *leiocarpa* (Benth.) Baker; *Erythrina mairei* H. Lév.; *Rhynchosia henryi* Hemsl.)

India, Madagascar. Perennial climbing shrub

See *Annales des Sciences Naturelles (Paris)* 4: 97. 1825, *Mémoires sur la Famille des Légumineuses* 257, pl. 45. 1826, *Plantae Junghuhnianae* 2: 231. 1852, *Flora van Nederlandsch Indië* 1(1): 227. 1855, *The Flora of British India* 2(4): 183. 1876, *Journal of the Linnean Society, Botany* 23(154): 196. 1887 and *Journal of the College of Science, Imperial University of Tokyo* 25(19): 75–76. 1908, *Flore du Kouy-Tchéou* 225. 1914, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 50. 1915, *Sci. Rep. Tohoku Univ.*, ser. 4, *Biology*, 38: 310. 1984, *Journal of Japanese Botany* 66(5): 276. 1991

(Tuber of *dhibbakand*, root of *Bauhinia purpurea* and *Datura metel* are boiled in oil of *Pongamia pinnata* and the oil is rubbed over the body in body weakness and as stimulant.)

in Madagascar: vahisovy

in China: rou mao shan hei dou, tai wan shan hei bian dou

in India: dhibba kand, dhibbakand

Dumasia villosa DC. var. *leiocarpa* (Benth.) Baker (*Dumasia leiocarpa* Benth.)

India, Sri Lanka. Perennial climbing shrub

See *Plantae Junghuhnianae* 2: 231. 1852, *The Flora of British India* 2(4): 183. 1876

(Leaves decoction to treat broken bones.)

Dunbaria Wight & Arn. Fabaceae (Phaseoleae)

Named for George Dunbar, 1774–1851 (d. Rose Park, Edinburgh), from 1807 to 1851 professor of Greek in the University of Edinburgh, horticulturist and gardener, a specialist of ericas, among his writings are *Elements of the Greek Language*. Edinburgh 1834, *Greek prosody*. Edinburgh 1843 and *A Greek-English Lexicon*. Edinburgh, London 1856; see Robert Wight and G. Arnott Walker Arnott, *Prodromus florae Peninsulae Indiae Orientalis*. 258. 1834 and Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 220. London 1994, *Wageningen Agric. Univ. Papers* 98–1: 1–109. 1998.

Dunbaria nivea Miq. (*Dunbaria harmandii* Gagnep.; *Dunbaria incana* (Zoll. & Moritzi) Maesen; *Dunbaria scortechinii* King; *Dunbaria scortechinii* Prain ex King; *Dunbaria scortechinii* Prain; *Phaseolus incanus* Zoll. & Moritzi)

China, Malaysia. Perennial climbing herb

See *Flora van Nederlandsch Indie* 1(1): 177. 1855, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 44. 1897 and *Notulae Systematicae*. Herbarium du Museum de Paris 3: 192–193. 1915, *Pap. Mich. Acad. Sci. Arts & Lett.* 24: 73–74. 1938

(Toxins. Pounded leaves, a poultice, for fever, itch, ulcers, wounds, cuts.)

in China: bai bei ye bian dou

Malay names: patong urat, tampong urat

Duosperma Dayton Acanthaceae

Latin *duo* 'two' and *sperma*, *spermatis* 'seed', see *Rhodora* 47: 262. 1945, *Kew Bulletin* 29: 411–414. 1974.

Duosperma crenatum P.G. Mey. (*Disperma crenatum* (Lindau) Milne-Redh.; *Disperma parviflorum* (Lindau) C.B. Clarke; *Hygrophila crenata* Lindau)

Tanzania, Kenya. A perennial woody shrubby herb or weak shrub, erect, tangled, woody rootstock, leaf tips pointed, cream to light yellow labellum, small tubular sweetly fragrant flowers clustered in leaf axils, pale green bracts, flattened-ellipsoid 2-sided capsule, fodder, young green leaves as a vegetable, in forest, in riverine woodland, in open bushed grassland, dry rocky areas, semi-desert

See *Prodromus Florae Novae Hollandiae* 479. 1810 and *Rhodora* 47: 262. 1945

(It is toxic to humans when the leaves are mature and turn yellow. Leaf infusion drunk by women for an easy delivery,

green leaves picked, soaked in water and the liquid drunk by pregnant women; this is believed to result in an easy and safe delivery.)

in Tanzania: njelula, nyangelula

Dupuya J.H. Kirkbr. Fabaceae (Leguminosae, Papilionaceae, Swartzieae)

See Du Puy, D.J. et al. *The Leguminosae of Madagascar*. RBG Kew. 2002, *Novon* 15(2): 305–314. 2005 [13 Jul 2005], *Phytochemistry* 69(12): 2329–2335. 2008

Dupuya haraka (Capuron) J.H. Kirkbr. (*Cordyla haraka* Capuron; *Lasiodiscus pervillei* Baill., Rhamnaceae)

Madagascar. Perennial non-climbing tree or shrub, red slash smelling like fresh beans, no petals, a whorl of staminodes inside the stamens, calyx bright green, stamens cream-white

See *Adansonia*: recueil périodique d'observations botanique, n.s. 8(2): 220–222, f. 4–5. 1968, *Novon* 15(2): 309–310. 2005

(For constipation.)

in Madagascar: araka, haraka, haraka fotsy, vahonda

Dupuya madagascariensis (R. Vig.) J.H. Kirkbr. (*Cordyla madagascariensis* R. Vig.; *Cordyla madagascariensis* var. *tamarindoides* Capuron; *Dupuya madagascariensis* subsp. *madagascariensis*)

Madagascar. Perennial non-climbing tree, deciduous, spreading, no petals, a whorl of staminodes inside the stamens, calyx splitting into 2 hooded lobes, small cream anthers, stamen filaments white to pale yellow

See *Notulae Systematicae*. Herbarium du Museum de Paris 13(4): 355. 1948, *Novon* 15(2): 310–312. 2005

(For constipation.)

in Madagascar: anakaraka, hazomena, karabo, landrazo, lazaza, madiroala, madivoala, maimbohazo, marody, sikilihazo, vaivay

Duranta L. Verbenaceae

After the Italian Castore Durante, c. 1529–1590, botanist, physician to the Pope Sixtus V (1520–1590), author of *Herbario nuovo*. Roma 1585 and *Il tesoro della sanità*. Venetia 1586; see Carl Linnaeus, *Species Plantarum*. 2: 637. 1753 and *Genera Plantarum*. Ed. 5. 284. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 307. Ansbach 1852, Ernst H.F. Meyer (1791–1858), *Geschichte der Botanik*. IV: 383–384. Königsberg 1854–1857, *Theoria Systematis Plantarum* 295. 1858 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 609–721. 1960, *Fieldiana, Bot.* 24(9/1–2): 167–236. 1970, *Ceiba* 19(1): 1–118. 1975, P'ei Chien & Chen Shou-liang, eds. *Verbenaceae. Fl. Reipubl. Popularis Sin.* 65(1): 1–229. 1982, F. Boerner & G. Kunkel, *Taschenwörterbuch der*

botanischen Pflanzennamen. 4. Aufl. 96. Berlin & Hamburg 1989, *Fl. Lesser Antilles* 6: 212–244. 1989, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2497–2525. 2001, *Ceiba* 44(2): 105–268. 2003[2005].

Duranta erecta Linnaeus (*Duranta angustifolia* Salisb.; *Duranta dentata* Pers.; *Duranta ellisia* Jacq.; *Duranta erecta* var. *alba* (Mast.) Caro; *Duranta erecta* var. *grandiflora* (Moldenke) Caro; *Duranta inermis* L.; *Duranta integrifolia* Tod.; *Duranta latifolia* Salisb.; *Duranta macrodonta* Moldenke; *Duranta peruviana* var. *longipedicellata* Moldenke; *Duranta microphylla* Desf.; *Duranta microphylla* Willd.; *Duranta plumieri* Jacq.; *Duranta plumieri* f. *variegata* F.M. Bailey; *Duranta plumieri* var. *alba* Mast.; *Duranta plumieri* var. *ellisia* F.M. Bailey; *Duranta plumieri* var. *normalis* F.M. Bailey, nom. inval.; *Duranta plumieri* var. *strigillosa* Schauer; *Duranta racemosa* Mill.; *Duranta repens* L.; *Duranta repens* f. *alba* (Mast.) Bailey) Moldenke; *Duranta repens* f. *variegata* (F.M. Bailey) Domin; *Duranta repens* var. *acuminata* Kuntze; *Duranta repens* var. *alba* (Mast.) L.H. Bailey; *Duranta repens* var. *alba* (Mast.) Domin; *Duranta repens* var. *canescens* Moldenke; *Duranta repens* var. *ellisia* (F.M. Bailey) Domin; *Duranta repens* var. *ellisiae* (Jacq.) R.R. Fernandez; *Duranta repens* var. *grandiflora* Moldenke; *Duranta repens* var. *lopez-palacii* Moldenke; *Duranta repens* var. *microphylla* (Desf.) Moldenke; *Duranta repens* var. *microphylla* (Willd.) Moldenke; *Duranta repens* var. *mutisii* Kuntze; *Duranta repens* var. *normalis* (F.M. Bailey) Domin, nom. inval.; *Duranta repens* var. *obtusifolia* Kuntze; *Duranta repens* var. *paucidentata* Kuntze; *Duranta repens* var. *serrata* Moldenke; *Duranta repens* var. *variegata* L.H. Bailey; *Duranta repens* var. *vestita* Kuntze; *Duranta spinosa* Mill.; *Duranta turbinata* Tod.; *Duranta xalapensis* Kunth; *Ellisia acuta* L.)

Northern to Trop. America. Shrub or bushy tree, flowers purple-blue, fruit orange, fragrant

See *Species Plantarum* 2: 637. 1753, *Revis. Gen. Pl.* 2: 507. 1891 and *Weeds Susp. Poison. Pl. Queensland* 142. 1906, *Biblioth. Bot.* 89: 553. 1928, *Phytologia* 1: 436. 1940, *Phytologia* 1: 483. 1941, *Phytologia* 2: 16–17. 1941, *Revista Argent. Agron.* 23: 10–11. 1956, *Phytologia* 7: 81. 1959, *Phytologia* 26: 177. 1973, *Phytologia* 41: 449. 1979, *Phytologia* 44: 328. 1979, *Regnum Veg.* 127: 44. 1993, *Trees Mumbai* 209. 1999

(Fruit when eaten induces mental derangement in man. Fruit juice antifungal, insecticide, for skin diseases. Leaves, mixed with *Styrax benzoin*, infused in coconut milk taken orally and applied externally to children with fevers, malaria, measles or coughs with vomiting. Leaves decoction an ingredient in an oral remedy for menstrual disorders in young women. Fresh leaves paste of *Duranta repens* applied on wounds;

dried fruit powder of *Duranta repens* mixed with *Ferula asafoetida* powder given orally against sore or acute ulcer. Leaf and fruits larvicidal, poisonous to mosquitoes; fruit juice lethal to mosquito larvae.)

in English: Brazilian sky-flower, creeping skyflower, dewdrop, duranta, forget-me-not bush, forget-me-not tree, garden dew-drop, golden dewdrop, golden tears, pigeon berry, skyflower

in China: jia lian qiao

in India: duranta, gadyakonta, huchhu aelasi, husiaelasi, kujuri, narinam-poulli, samban lei, sambanlei

in Indonesia: kacar

in Japan: Taiwan-rengyô

in Nepal: nil kanda

in Philippines: duranta

in Madagascar: diveanta

in South Africa: geelbessie, kraaldoring, vergeet-my-nieboom, wolwedoring

Durio Adans. Bombacaceae

From the Malayan name *durian*; see *Familles des Plantes* (Adanson) 2: 399. 1763, *Systema Vegetabilium*. Editio decima tertia 581. 1774, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 307. 1852 and Kostermans, A.J.G.H. "The genus *Durio* Adans. (Bombacaceae)." *Reinwardtia* 4: 357–460. 1958, *Ceiba* 19(1): 1–118. 1975, *Kew Bulletin* 61: 443. 2006.

Durio graveolens Becc.

Borneo. Small tree

See *Malesia Raccolta ...* 3: 242. 1889

(Bark bath to treat prematurely born babies.)

in Sarawak: isu rian

Durio oxleyanus Griff.

SE Asia, Peninsular Malaysia. Upper canopy tree, tall buttresses, inner bark dark reddish-brown, stipules soon falling, leaves alternate elliptic to oblong, flowers white-yellow with 4 sepals and 4 petals, green 4-valved capsules with long pyramidal spines, seeds completely enclosed by pale yellow sweet edible aril, in mixed dipterocarp forests, on hillsides and ridges, in secondary forests, sandy soils

See *Calcutta J. Nat. Hist.* v. (1845) 115, in nota. 1845

(For kidney troubles.)

in Borneo: dian, durian, durian beledu, lai, lai bengang, kartungan, kerantongan, kerantungan, ketungan, kutongan, sukang

Durio zibethinus Murr. (*Cullenia ceylanica* (Gardn.) K. Schum.; *Cullenia zeylanica* (Gardn.) Wight ex K. Schum.; *Durio acuminatissima* Kosterm. & Soengeng; *Durio*

acuminatissimus Merr.; *Durio zibethinus* Moon; *Durio zibethinus* Rumph. ex Murray; *Durio zibethinus* L.)

India, Malaya. Tree, buttressed, bark dark red-brown, heartwood dark red, sepals, petals and stamens whitish or greenish-white, inflorescences on older branches forming fascicles of corymbs, pungent edible fruit light green to brownish, valves usually 5 thick fibrous, seeds completely covered by a white or yellowish soft very sweet aril

See *Familles des Plantes* 2: 399. 1763, *Systema Vegetabilium*. Editio decima tertia 581. 1774, *Nat. Pflanzenfam.* [Engler & Prantl] iii. vi. 68. 1890 and *Philipp. J. Sci.* 29: 393. 1926, *Economic Botany* 16: 270–282. 1962

(Fruits used as tonic; a decoction taken to treat fevers. Skin of the fruit used in a complex decoction taken for disorders of the urinary tract. Leaves for jaundice; leaves and roots used in a compound for fever. Roots febrifuge.)

in Borneo: catu, dian, duhuian, durian, durian puteh, jatu, kalang, lampun, lujian

in Burma: du-yin

in Cambodia: thu-réén

in India: durian, nirpanas

in Indonesia: ambetan, duren, kadu

in Laos: thourièn

in Malaysia: doeren, doerian, durian, durioan, durion

in Philippines: dulian, durian, duryan

in Tanzania: mdoriani

in Thailand: durian, due-yae, ma-thu-rian, rian, thu-rian, thurian

in Vietnam: sâu- riêng

Duroia L.f. Rubiaceae

For the German botanist Johann Philipp Du Roi (Duroi), 1741–1785, physician, dendrologist, author of *Dissertatio inauguralis Observationes Botanicas sistens*. Helmstadii 1771 and *Die Harbkesche wilde Baumzucht*, etc. Braunschweig 1771–1772; see *Supplementum Plantarum* 30, 209–210. 1782 [1781 publ. Apr 1782], Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800 and E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 486. 1965, *Fieldiana, Bot.* 24(11/1–3): 1–274. 1975, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999, *Revista de Biologia Neotropical* 3: 13–96. 2006[2007].

Duroia eriopila L.f. (*Amaioua eriopila* (L.f.) Baill.; *Amaioua eriopila* Baill.; *Duroia eriophila* L.f.; *Genipa eriopila* (L.f.) Oken)

Tropical America, Venezuela. Tree, white corolla

See *Genera Plantarum*, ed. 5 87. 1754, *Histoire des plantes de la Guiane Française* 2(Suppl.): 13, t. 375. 1775, *Suppl. Pl.* 30, 209. 1782 [1781 publ. Apr 1782], *Allgemeine Naturgeschichte* 3(2): 886. 1841 *Histoire des Plantes* (Baillon) 7: 387. 1880 and *Journ. Arn. Arb.* xxxi.276. 1950

(Stem infusion drunk as a cough remedy, tonic, astringent.)

Duroia genipoides Spruce ex K. Schum. (*Amaioua genipoides* Spruce; *Amaioua genipoides* Spruce ex Benth. & Hook. f., nom. nud.; *Duroia genipoides* Hook. f. ex K. Schum.; *Duroia genipoides* Hook. f.; *Duroia genipoides* Spruce ex Hook. f., nom. nud.)

Colombia, Bolivia, Brazil. Small tree, white flowers

See *Histoire des plantes de la Guiane Française* Suppl.: 13, t. 375. 1775, *Genera Plantarum* 2: 82. 1873, *Flora Brasiliensis* (Martius) 6(6): 364. 1889

(Toxic, tonic, astringent.)

Duroia hirsuta (Poepp.) K. Schum. (*Amaioua hirsuta* Poepp.; *Duroia hirsuta* (Poeppig and Endl.) K. Schum.; *Duroia hirsuta* K. Schum.; *Duroia spraguei* Wernham; *Schachtia dioica* H. Karst.)

Tropical America. Small tree or shrub, myrmecophyte, ant-plant mutualism, *Myrmelachista schumanni* Emery ants nest in *Duroia hirsuta* trees and kill other plants using formic acid as an herbicide

See *Nov. Gen. Sp. Pl.* 3: 25, t. 230. 1841, *Linnaea* 30: 157. 1859, *Jahrb. Wiss. Bot.* 19: 361. 1888, *Fl. Bras.* (Martius) 6, pt. 6: 367. 1889 and *Bull. Misc. Inform. Kew* 1914: 66. 1914, *J. Nat. Prod.* 62(4): 560–562. 1999, *J. Nat. Prod.* 62(8): 1214. 1999, *Nature* 437(7058): 495–496. 2005, *Proceedings. Biological Sciences / The Royal Society* 274(1613): 1117–1123. 2007

(Antiseptic, toxic, astringent. ‘Devil’s gardens’, large stands of trees in the Amazonian rainforest that consist almost entirely of a single species, *Duroia hirsuta*, and, according to local legend, are cultivated by an evil forest spirit.)

Duroia kotchubaeoides Steyererm. (*Duroia kotchubaeoides* Steyererm.; *Duroia kotchubioides* Steyererm.)

Brazil, Venezuela. Small tree, white flowers

See *Mem. New York Bot. Gard.* 12(3): 201, f. 30, E-G. 1965

(Toxic, tonic, astringent.)

Duroia petiolaris Spruce ex K. Schum. (*Amaioua petiolaris* Spruce; *Duroia petiolaris* Hook.f.; *Duroia petiolaris* (Sprengel) K. Schumann; *Duroia petiolaris* (Spruce) Hooker f. ex K. Schumann; *Duroia saccifera* Benth. & Hook.f.)

Tropical America. Small tree or shrub

See *Fl. Bras.* (Martius) 6, pt. 6: 364. 1889

(Toxic.)

Duroia saccifera (Mart. ex Schult. & Schult.f.) K. Schum. (*Amaioua saccifera* Mart. ex Schult. & Schult.f.; *Duroia saccifera* (C. Martius) Hooker f. ex K. Schumann)

Tropical America. Small tree or shrub

See *Syst. Veg.* 7: 91. 1829, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 82. 1873, *Fl. Bras.* (Martius) 6, pt. 6: 362. 1889

(Toxic.)

Dyera Hook.f. Apocynaceae

Named for the British (b. Westminster, London) botanist Sir William Turner Thiselton-Dyer, 1843–1928 (d. Witcombe, Gloucestershire), naturalist, 1872 Fellow of the Linnean Society, 1880 Fellow of the Royal Society, succeeded his father-in-law (Sir J.D. Hooker) as Director of the Royal Botanic Gardens at Kew 1885–1905, 1899 knighted. See *Journal of the Linnean Society, Botany* 19: 293. 1882 and H.N. Cloukie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 160. Oxford 1964, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 734. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 489. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 398. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 409. 1973, Gerald L. Geison, in *D.S.B.* 13: 341–344. 1981, Gilbert Westacott Reynolds (1895–1967), *The Aloes of South Africa*. 95, 249, 499. Rotterdam 1982, Stafleu and Cowan, *Taxonomic Literature*. 6: 264–267. 1986, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 677–678. 1994.

Dyera costulata Hook. f. (*Alstonia costulata* Miq.; *Alstonia eximia* Miq.; *Alstonia grandifolia* Miq.; *Dyera costulata* (Miq.) Hook. f.; *Dyera laxiflora* Hook.f.)

Thailand, Malesia. Cylindrical trees, unbuttressed, crowns with whorled branches, inner bark whitish with abundant white sap, leaves in whorls, white fragrant flowers, woody follicle, seeds surrounded by thin papery wing

See *J. Linn. Soc., Bot.* 19: 293. 1882 and *Contact Dermatitis*. 34(5): 349–53. 1996

(Contact allergy.)

in Malaysia: jelutong

Dyera polyphylla (Miq.) Steenis (*Alstonia polyphylla* Miq.; *Dyera borneensis* Baillon; *Dyera lowii* Hook.f.)

Indonesia, Borneo.

See *Fl. Ned. Ind., Eerste Bijv.*: 556. 1861, *J. Linn. Soc., Bot.* 19: 293. 1882, *Bull. Mens. Soc. Linn. Paris* 1: 751. 1888 and *Blumea* 14: 316. 1967, Boer, E. & A. B. Ella, eds. *Plants Producing Exudates. Plant Resources of South-East Asia (PROSEA)*. (Pl. Res. SEAs.) 18: 65. 2000

(Contact allergy.)

in English: peat swamp jelutung, swamp jelutung

Vernacular names: gapuk, jelutung, jelutung, jelutung paya, jelutung rawa, yeluu-tong, luu-tong, pantung, teen-pet daeng

Dyschoriste Nees Acanthaceae

From the Greek *dys* ‘with difficulty, poorly’ and *choristos* ‘separated’, *choris* ‘separate, asunder, apart’, referring to the valves of the capsules or to almost the entire stigma, see *Plantae Asiaticae Rariores* (Wallich). 3: 75, 81. 1833, *The British Flower Garden*, ... series 2 2: pl. 181. 1833, *Linnaea* 23: 94. 1850, *Synoptical Flora of North America* 2(1): 325. 1878, *Revisio Generum Plantarum* 2: 486. 1891 and *Fieldiana, Bot.* 24(10/4): 328–462. 1974, *Ceiba* 19(1): 1–118. 1975, *Proc. Calif. Acad. Sci.* 49: 309–403. 1997, *Lundellia* 2: 84. 1999, *Atlas of the Vascular Plants of Texas* 5. 2003.

Dyschoriste multicaulis (A. Rich.) Kuntze (*Ruellia multicaulis* A. Rich.)

East Africa.

See *Revisio Generum Plantarum* 2: 486. 1891 and *Tentamen Florae Abyssinicae* ... 2: 142. 1951

(Fresh roots chewed for snakebites.)

Dyschoriste perrottetii (Nees) Kuntze (*Calophanes perrottetii* Nees)

Tropical Africa. Herb, procumbent, woody-based, papery leaves, blue flowers

See *The British Flower Garden*, ... series 2 2: pl. 181. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 112. 1847, *Revisio Generum Plantarum* 2: 486. 1891

(Seed coat for eyes inflammation, a wash.)

Dyschoriste radicans Nees (*Calophanes burkei* T. Anderson; *Calophanes radicans* (Nees) T. Anderson; *Chaetacanthus burchellii* Lindau; *Dyschoriste radicans* Hutch. & Dalziel; *Dyschoriste radicans* Kuntze; *Ruellia radicans* Hochst.)

Tropical Africa. Small shrub, prostrate or ascending herb, white yellow to purplish flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 106. 1847, *Revis. Gen. Pl.* 2: 486. 1891 and *Flora of West Tropical Africa* 2: 252. 1931, *Journal of Ethnopharmacology* 88: 19–44. 2003, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Leaves infusion, internal and/or external, for skin diseases, wounds, eye infections, toothache, diarrhea. Fresh roots chewed for snakebites. Magic, ritual, against bad spirits.)

in Kenya: chemurguiwetab suswek

in Uganda: busonga songa

Dysolobium (Benth.) Prain Fabaceae (Phaseoleae)

From the Greek *dys* ‘bad’, *dysodes* ‘stinking, ill-smelling’ and *lobion*, *lobos* ‘lobe, little lobe, small pod’, see *Species Plantarum* 2: 725. 1753, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 66(2): 425. 1897 and *Icones Pl. Formosan* 9: 35. 1920, *An Enumeration of Philippine Flowering Plants* 2(3): 241–323. 1923, *Kew Bulletin* 24(3): 561. 1970, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Nordic J. Bot.* 12: 339–346. 1992, *J. Econ. Taxon. Bot.* 16(2): 305–334. 1992.

Dysolobium pilosum (Willd.) Maréchal (*Dolichos pilosus* Roxb.; *Dolichos pilosus* Willd.; *Dolichos pilosus* Klein ex Willd.; *Dolichovigna formosana* Hayata; *Dolichovigna pilosa* (Willd.) Niyomdham; *Dolichovigna pilosa* (Klein ex Willd.) Niyomdham; *Dysolobium pilosum* (Klein ex Willd.) Maréchal; *Phaseolus difformis* Wall.; *Vigna pilosa* Backer ex K. Heyne; *Vigna pilosa* Baker; *Vigna pilosa* (Willd.) Baker; *Vigna pilosa* (Klein ex Willd.) Baker)

India. Perennial climbing herb, twiner, slender, spreading, strong wiry branches, well-developed root system, large root nodules, flowers reddish or bluish on axillary racemose peduncles, velvety pendulous linear pods very long pointed

See *Species Plantarum*. Editio quarta 3(2): 1043. 1802, *Fl. Brit. India* 2(4): 207. 1876 and *Nutt. Pl. Ned.-Ind.* ed. 2 ii. 842. 1927, *Boissiera* 28: 239. 1978, *Blumea* 30: 381. 1985, *Taiwania* 32: 11–117. 1987, *Nordic J. Bot.* 12(3): 341. 1992

(Used in Ayurveda. Roots bitter, sweet, aphrodisiac, germicidal and cooling, used for cough, fever, diarrhea, hemorrhoids, ophthalmopathy, burning sensation, dyspepsia.)

in China: mao jiang dou

in India: adavipesalu, banmung, kaduhesaru, kattuceru-payar, kattupayar, kattuppayar, mudgaparni, mumgvn, pili-pesaru, pillipesaru

Dysosma Woodson Berberidaceae

From the Greek *dys* ‘bad, ill’ and *osme* ‘smell, odour, perfume, scent’, see *Genera Plantarum* 286. 1789 and *Annals of the Missouri Botanical Garden* 15: 335, 338, pl. 46. 1928, *Guihaia* 11(1): 58–62. 1991.

Dysosma pleiantha (Hance) Woodson (*Podophyllum chen-gii* S.S. Chien;

Podophyllum hispidum K.S. Hao; *Podophyllum onzoi* Hayata; *Podophyllum pleianthum* Hance)

China.

See *Journal of Botany, British and Foreign* 21(6): 175. 1883 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 5: 2–4, f. 1. 1915, *Annals of the Missouri Botanical Garden* 15: 335, pl. 46. 1928, *Repertorium Specierum Novarum Regni Vegetabilis* 36(12–15): 223. 1934, *Contributions from the Biological Laboratory of the Science Society of China* 10: 108. 1936

(Highly toxic, almost certainly poisonous.)

Dyosma versipellis (Hance) M. Cheng ex T.S. Ying (*Leavenworthia exigua* Rollins var. *exigua*; *Podophyllum versipelle* Hance; *Podophyllum versipellis* Hance)

East Asia, Tibet, China. Rare

See *Journal of Botany, British and Foreign* 21(12): 362–363. 1883 and *Rhodora* 58(687): 75–76, pl. 1223, f. 2. 1956, *Contributions from the Gray Herbarium of Harvard University* 192: 75, map 1. 1963, *Acta Phytotax. Sin.* 17(1): 18–19, pl. 2, f. 5. 1979, *J. Nat. Prod.* 70(2): 283–286. 2007 [Lignans from *Dyosma versipellis* with inhibitory effects on prostate cancer cell lines.], *Chromatographia* 68(9–10): 781–789. 2008

(Plant is highly poisonous, should not be prescribed for pregnant women. Whole plant cholagogue, cytostatic, antimetabolic, purgative, antirheumatic. The rhizomes or roots of *Dyosma versipellis*, *Dyosma pleiantha* and *Sinopodophyllum emodi* under the same name “Gui-jiu”, widely used for medicinal purposes, and they are highly toxic, almost certainly poisonous.)

in China: bao jiao lian, kuei chiu, pa chio lien

Dysoxylum Blume Meliaceae

Greek *dys* ‘bad, with difficulty, ill, hard’ and *xylon* ‘wood’, referring to the unpleasant smell of the very fragrant wood, bitter and astringent; see *Genera Plantarum* 263. 1789, Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 4: 172. 1825, Friedrich Gottlieb Bartling, *Ordines naturales plantarum*. 356. Gottingae 1830.

Dysoxylum beddomei Hiern

India. Tree, aromatic, creamy-white petals, flowers in short axillary racemes or panicles, ovoid apiculate capsule, seeds covered with orange-yellow aril

See *The Flora of British India* 1: 548. 1875

(Tonic, stimulant, antiseptic, for skin diseases.)

in India: akil

Dysoxylum binectariferum (Roxb.) Hook.f. ex Bedd. (*Dysoxylum binectariferum* Hiern; *Dysoxylum binectariferum* Hook.f. ex Bedd.; *Dysoxylum binectarifolium* C. DC.; *Dysoxylum grandifolium* (Roxb.) H.L. Li; *Dysoxylum grandifolium* Merr.; *Dysoxylum grandifolium* H.L. Li; *Dysoxylum spicatum* H.L. Li; *Guarea binectarifera* Roxb.)

India, China. Tree, reddish wood, pinnate leaves, coriaceous leaflets alternate, flowers in axillary panicles, calyx cup-shaped, spreading petals, woody reddish capsule with purple seeds

See *Mantissa Plantarum* 2: 150. 1771, *Hort. Bengal.* 28. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 240. 1832, *Transactions of the Linnean Society of London* 25(2):

212. 1865, *Fl. Brit. India* [J.D. Hooker] 1: 546, ex parte. 1875 and *Journal of the Arnold Arboretum* 25(3): 302–303. 1944

(Used in Sidha. In leprosy, seeds pounded and given with hot water; powder of the dry seeds applied externally on leprosy and ulcers.)

in India: agil, agilu, akuni, akunivakil, akuniyakil, bandardima, banderdima, bol-narang, erand, kaadugandha, kadgandha, kadugadda, kadugandha, khrang, khrang-kelauk-araung, masispel, naupak-ban, yerandi

Dysoxylum decandrum (Blanco) Merr. (*Dysoxylum decandrum* Merr.)

Philippines.

See *Bureau of Government Laboratories (Philippines)* No. 27. 1905, *Species Blancoanae* 209. 1918

(Juice of fresh bark used for coughs; powdered bark emetic.)

in Philippines: agaru, bagulibas, bohaue, buntugan, igiu, kugyug, malaaduas, paluahan, pamatagin, tadiang-kalabau, taming-taming

Dysoxylum excelsum Blume (*Dysoxylum gobara* (Buch.-Ham.) Merr.; *Dysoxylum gobara* (Buch.-Ham.) Merr.; *Dysoxylum procerum* Hiern; *Epicharis procera* (Hiern) Pierre; *Epicharis procera* Pierre; *Guarea gobara* Buch.-Ham.; *Guarea procera* Wall.; *Guarea procerum* Wall., nom. nud.)

India. Tree, bright red wood, pinnate leaves, flowers in spreading axillary panicles, capsules with arillate seeds

See *Mantissa Plantarum* 2: 150, 228. 1771, *Bijdragen tot de flora van Nederlandsch Indië* 4: 166, 176. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 1261. 1829, *Memoirs of the Wernerian Natural History Society* 6: 306–307. 1832, *The Flora of British India* [J.D. Hooker] 1(3): 547. 1875, *Flore Forestière de la Cochinchine* sub. t. 748. 1896 and *Journal of the Arnold Arboretum* 23(2): 173. 1942

(Tender twigs and leaves decoction taken for diarrhea and dysentery; young leaves decoction taken for dysentery.)

in China: jian mu

in India: bol-chhacchat, chachat, khrang, lali, makhaibo, ratasahatta, thing-thu-pui, thing-tupui, thingthupui

Dysoxylum forsteri C. DC.

Australia.

See *Monographiae Phanerogamarum* 1. 1878

(Steam from the leaves inhaled to cure headache and reduce fever.)

in Tonga: mo’ota

Dysoxylum hamiltonii (Buch.-Ham.) Hiern (*Dysoxylum alliarum* (Buch.-Ham.) N.P. Balakr.; *Dysoxylum hamiltonii* Hiern; *Guarea alliarum* Buch.-Ham.)

India.

See *Memoirs of the Wernerian Natural History Society* 6: 305. 1832, *The Flora of British India* [J.D. Hooker] 1: 548. 1875 and *Journal of the Bombay Natural History Society* 67: 57. 1970

(Bark decoction for stomachache.)

in India: bol-asin, gendeli-poma, gendhdi poma, keotai

Dysoxylum hongkongense (Tutcher) Merr. (*Chisocheton erythrocarpa* Hayata & Kaneh.; *Chisocheton hongkongensis* Tutcher; *Chisocheton kanehirae* Sasaki; *Chisocheton kanehirai* Sasaki; *Chisocheton kusukusense* Hayata; *Chisocheton kusukusensis* Hayata; *Dysoxylum kanehirae* (Sasaki) Kaneh. & Hatus.; *Dysoxylum kanehirai* (Sasaki) Kanehira & Hatusima; *Dysoxylum kusukusuense* (Hayata) Kanehira & Hatusima)

China.

See *Journal of the Linnean Society, Botany* 37(258): 64. 1905, *Icon. Pl. Formosan.* 3: 52, pl. 7. 1913, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam.* 10: 2–3. 1921, *Transactions of the Natural History Society of Taiwan* 18: 173. 1928, *Lingnan Science Journal* 13(1): 33. 1934, *Trans. Nat. Hist. Soc. Taiwan* 29: 24–25. 1939

(Rheumatism.)

in China: tai wan jian mu, xiang gang jian mu

Dysoxylum malabaricum Bedd. ex C. DC.

Sri Lanka, India. Tree, bisexual fragrant white to greenish yellow flowers in axillary panicles, pear-shaped bright yellow capsules with 4 vertical furrows

See *Fl. British India* 1: 544. 1875, *Monographiae Phanerogamarum* 1: 491. 1878

(Used in Ayurveda and Sidha/Siddha. Wood used in rheumatism, and wood oil in ear and eyes diseases.)

in India: agaru, agil, akil, bilee agilu, bilee budige, bilee devadaaru, bili agilu, bili budlige, bili daevadaari, bili gandha, bilibudlige, bilibudligi, bilidevadari, cavunkatikam, cavunkatikamaram, kana-mulla, malaittevataram, porapa, purippa, tiruvam, tiruvamaram, vallaagil, vella akil, vella-agil, vellaakil, vellagil, vellaiyagil, vellaiyakilmaram, vellakil, vellakil mutti, vellakilmaram, velleiagil, velleyagil, vennakaru, vennakil

Dysoxylum spectabile Hook. f.

New Zealand. Forest tree, white flowers hanging singly in chains from a drooping stem, orange-reddish flesh round the seeds contained in a capsule

See *Handbook of the New Zealand Flora* 41. 1864

(Bitter bark tonic. Leaves and bark decoction drunk for cough and to stop the flow of milk when applied to the breasts; hot boiled leaves applied as poultice.)

in English: native cedar, New Zealand cedar, New Zealand mahogany, redheart

in New Zealand: kohekohe (Maori name)

Dysoxylum thyrsoides Hiern

India. Tree, tomentose fruit

See *The Flora of British India* 1: 547. 1875

(Wood decoction in rheumatism; wood oil in ear and eye diseases.)

Dysphania R. Br. Chenopodiaceae (Dysphaniaceae)

Greek *dys* 'bad, with difficulty' and *phanos* 'a torch', *phaneros* 'evident, conspicuous, visible', scarcely visible, referring to the tiny flowers; see Robert Brown, *Prodromus florae Novae Hollandiae*. 407, 411. 1810, *Flora Altaica* 1: 410. 1829, *Annales des Sciences Naturelles; Botanique, sér. 2*, 1: 289–291, 292–294, pl. 10, f. A, B. 1834, *Chenopodearum Monographica Enumeratio* 39. 1840 and *North American Flora* 21(1): 25. 1916, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 61: 230. 1927, *Flora URSS* 6: 46. 1936, *American Midland Naturalist* 35: 330. 1946, Paul G. Wilson, "A taxonomic revision of the tribe Chenopodieae (Chenopodiaceae) in Australia." *Nuytsia* 4(2): 135–262. 1983, *Ukrajins'kyj Botaničnyj Žurnal* 59(4): 382–383. 2002.

Kostel.; *Teloxys ambrosioides* (L.) W.A. Weber; *Teloxys vagans* (Standl.) W.A. Weber

Cosmopolitan. Annual herb, terrestrial, erect, tough, sprawling, spreading, bushy, tap-rooted, leaf margins serrate, strongly pungent aromatic, stem yellowish green with yellow and green stripes, small or tiny sessile flowers in clusters, perianth yellow-green, anthers yellow, fruit green, seed dark blue, pungent to unpleasant odour to leaves, plant smells of Irish potatoes or spinach, *Dysphania ambrosioides* s.l. is a taxonomically complicated aggregate of several closely related segregate microspecies and/or infraspecific taxa

See *Species Plantarum* 1: 4–5, 218–222. 1753, *Species Plantarum* 2: 1052–1054. 1753, *Institutiones Historico-Physicae Regni Vegetabilis* 1: 207. 1766, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 290. 1809, *Prodromus Florae Novae Hollandiae* 411. 1810, *Annales des Sciences Naturelles; Botanique*, sér. 2, 1: 289–291, pl. 10, f. A. 1834, *Allgemeine Medizinisch-Pharmazeutische Flora* 1433. 1835, *Histoire Naturelle des Végétaux* 5: 295, 297. 1836 and *Icones florae germanicae et helveticae* 24: 118. 1908, *Synopsis der Mitteleuropäischen Flora* 5: 20. 1913, *American Midland Naturalist* 3: 275. 1914, *Phytologia* 58(7): 477. 1985

(Bitter leaf juice and oil from seeds, poisonous, moderate to high toxicity, may be fatal if eaten; photosensitization, associated with many poisonings, not for use during pregnancy. Plant crushed and decoction drunk in morning to treat worm infestations; plant juice for nervous breakdown; all parts of the plant used against roundworms and hookworms. Antifungal, antispasmodic, tonic, antiascariasis, astringent, a menstrual stimulant, a remedy for diarrhea, chills. Leaf juice vermifuge especially for round worms; leaves and seeds to treat intestinal parasites; leaves crushed and used as germicide for ergot; warmed leaves rubbed on mouth disease and body swellings; leaves and roots decoction taken during menstruation as a contraceptive; leaf extract of *Chenopodium ambrosioides* taken orally and also leaf paste applied over the body against the fever. Leaves crushed in water and drunk for stomachache; leaves and stems crushed in cold or warm water and drunk for vomiting. Leaves repellent for bees. Seed paste to treat peptic ulcer. Magic, ritual, plant used to ward off evil spirits.)

in English: American goosefoot, American wormseed, Indian wormseed, Jerusalem, Jerusalem oak, Jerusalem tea,

Jesuit tea, Mexican goosefoot, Mexican tea, Mexican weed, Spanish tea, stinking weed, worm bush, worm grass, wormseed, wormseed goosefoot

in Arabic: lajouma, natna, sianama

Strother; *Thymophylla pringlei* Rydb.; *Thymophylla puberula* Rydb.; *Thymophylla thurberi* (A. Gray) Wooton & Standl.; *Thymophylla villosula* Rydb.)

North America.

See *Flora of the Southeastern United States* 1295, 1341. 1903, *Proceedings of the American Academy of Arts and Sciences* 49(8): 507. 1913

(A decoction of flowers, leaves and stems drunk for stomachache.)

E

Ebenopsis Britton & Rose Fabaceae (Ingeae, Mimosaceae)

Resembling *ebenos*, *ebenus*, Latin *hebenus* or *ebenus* and Greek *ebenos*, ancient classical names for a plant, the ebony-tree, ebony, see *North American Flora* 23(1): 33. 1928, *Ceiba* 19(1): 1–118. 1975, *Brittonia* 53(1): 1–40, 41–57. 2001.

Ebenopsis confinis (Standl.) Britton & Rose (*Havardia confinis* (Standl.) Britton & Rose; *Pithecellobium confine* Standl.; *Pithecolobium confine* Standl.)

North America, Mexico. Perennial non-climbing tree

See *Flora* 20(2): Beibl. 114. 1837 and *Contributions from the United States National Herbarium* 20(6): 191. 1919, *North American Flora* 23(1): 33. 1928, *Memoirs of the New York Botanical Garden* 74(1): 177. 1996, *Harvard Pap. Bot.* 7(2): 381–398. 2003

(Tea made from the whole dry pod taken to cure a cold, cough or sore throat.)

in Mexico: ejotón, ojasén, oyasón, palo fierro

Ebenopsis ebano (Berland.) Barneby & J.W. Grimes (*Acacia flexicaulis* Benth.; *Calliandra geniculata* Benth.; *Chloroleucon ebano* (Berland.) L. Rico; *Ebenopsis flexicaulis* (Benth.) Britton & Rose; *Hoopesia arborea* Buckley; *Mimosa ebano* Berland.; *Pithecellobium ebano* (Berland.) C.H. Mull.; *Pithecellobium flexicaule* (Benth.) J.M. Coult.; *Pithecellobium texense* J.M. Coult.; *Pithecolobium flexicaule* (Benth.) J.M. Coult.; *Pithecolobium texense* J.M. Coult.; *Samanea flexicaulis* (Benth.) J.F. Macbr.; *Siderocarpus flexicaulis* (Benth.) Small; *Zygia flexicaulis* (Benth.) Sudw.)

Mexico. Perennial non-climbing tree, slow growing, large shrub to small tree, often multi-trunked, dense rounded spreading crown, spiny branches, small fragrant blooms, yellowish white fluffy heads in dense slender terminal spikes, very thick woody heavy dark brown pod often curved or contorted tardily dehiscent, round black edible seeds traditionally used as a coffee substitute, very drought tolerant once established

See *Mosaico Mexicano* 4: 418. 1840, *London Journal of Botany* 1: 505. 1842, *Botanical Gazette* 15(10): 270. 1890, *U.S.D.A. Div. Forest. Bull.* 14: 248. 1897 and *Bulletin of the New York Botanical Garden* 2(6): 91. 1901, *Contributions from the Gray Herbarium of Harvard University* 59: 2. 1919, *North American Flora* 23(1): 33. 1928, *Phytologia* 41(6): 384–386. 1979, *Kew Bull.* 46(3): 493–521. 1991, *Memoirs of the New York Botanical Garden* 74(1): 175. 1996, *Medicinal*

Plants—International Journal of Phytomedicines and Related Industries 1(1). 2009

(Antimicrobial activity of tender and mature seed extracts.)

in English: ape's earring, ebony blackhead, Texas ebony

in Mexico: acte, ebano

Ebermaiera Nees Acanthaceae

Named after the German apothecary Johann Erdwin Christoph(er) Ebermaier, 1769–1825, doctor, his works include *De nimia pelvis muliebris amplitudine ejusque in graviditatem et partum influxu dissertatio*. Gottingae [1797], *Pharmakognostische Tabellen*. [Fünfte ... vermehrte Auflage von G.W. Schwarze.] Leipzig 1827, *Taschenbuch der Chirurgie für angehende practische Ärzte und Wundärzte*. Leipzig 1811, and *Ueber die nothwendige Verbindung der systematischen Pflanzenkunde mit der Pharmacie, und über die Bekanntmachung der giftartigwirkenden Pflanzen*. Hannover 1796; or dedicated to Dr. Carl (Karl) Heinrich Ebermaier, 1802–1870, co-author with the German botanist T.F.L. Nees von Esenbeck (1787–1837) of *Handbuch der medicinisch-pharmaceutischen Botanik*. Düsseldorf 1830–1832. See Nathaniel Wallich, *Plantae Asiaticae Rariores*. 3: 75, 80. London 1832 and James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 137. Chipping Norton, N.S.W. 1981, Francis Aubie Sharr, *Western Australian Plant Names and Their Meanings*. 24. University of Western Australia Press 1996.

Ebermaiera setigera Nees (*Ebermaiera setigera* T. Anderson ex C.B. Clarke)

Malaya.

See *Prodr.* (DC.) 11: 76. 1847, *Fl. Brit. India* [J.D. Hooker] 4: 398. 1884

(Leaves for sore mouth.)

Malay name: kerunak

Ecballium A. Rich. Cucurbitaceae

Greek *ekballein* 'to cast out', *ek* 'out' and *ballo*, *ballein*, *bolis*, *bolos* 'casting', in reference to the violent ejection and the dispersion of the seeds through basal hole; see *Dictionnaire classique d'histoire naturelle*. 6: 19. Paris 1824, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 310. Ansbach 1852.

Ecballium elaterium (L.) A. Rich. (*Momordica elaterium* L.)

China, Europe.

See *Species Plantarum* 2: 1010. 1753, *Dictionnaire classique d'histoire naturelle* 6: 19. 1824 and *Fl. Iranica* 123: 2. 1977

(Fruits laxative.)

in English: squirting cucumber

in Arabic: faggous el-hemar, oumana, safirous

in Tunisia: faqous elbhayem, faqous h'mir

Ecbolium Kurz Acanthaceae

Greek *ekballein* 'to cast out', in reference to the violent discharge of the seeds from the ripe fruits, see *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 40(1): 75. 1871, *Revis. Gen. Pl.* 2: 486. 1891 and *Kew Bulletin* 44(4): 601–680. 1989.

Ecbolium ligustrinum (Vahl) Vollesen (*Ecbolium linneanum* Kurz; *Justicia ecbolium* L.; *Justicia ligustrina* Vahl)

Sri Lanka.

See *Species Plantarum* 1: 15–16. 1753, *Enumeratio Plantarum ...* 1: 118. 1804, *Journal of the Asiatic Society of Bengal* 40(1): 75. 1871 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Journal of Cytology and Genetics* 15: 90–92. 1980, *Taxon* 31: 773. 1982, *Cytologia* 48: 491–504. 1983, *Kew Bulletin* 44: 651. 1989

(Used in Ayurveda. Bark decoction against the gout; root to treat jaundice and rheumatism; leaves decoction against dysuria and fever.)

in India: carimcurini, cheekatikoorthappa, chikatipuratappa, cikaturatappa, dhaktaadulsa, kappabobbuli, kappakurni, kappubobbuli, kappukuruni, karikurini, karinkurinni, koranda, kuranta, nakkatoka, nila-sahacarah, nilambarai, nilambari, paccavadambaramu, pachavadambaramu, pachchavadambaram, piccokatho, ranaboli, saharacarah, sairyakah, udajati

Ecbolium viride (Forssk.) Alston

Saudi Arabia.

See *Fl. Aegypt.-Arab.* 5. 1775 [1 Oct 1775] and *Hand-Book Fl. Ceylon* vi. *Suppl.*, 229. 1931

(Used in Ayurveda and Sidha. Powder of dried leaves to treat pimples; root extract a remedy for jaundice.)

in Arabic: sayah

in India: carim-cunni, chikatipuratappa, kappu bobbali, kappu karni, kappubobbili, kappubobbli, kappubobbuli, kappukarni, karimkurunni, nakka toka, nakkathoka, neel kantha, neela abbalige, nilambari, nilambari, nilampari, pacha vaadambaramu, pachavaadaamramu, pachha vaadambaram, pokso, ran-aboli, ranaboli, saharacarah, udajat, udajati

Echinacea Moench Asteraceae

From the Greek *echinos* 'a hedgehog', referring to the prickly receptacle, see *Methodus Plantas Horti Botanici ...* (Moench) 591. 1794 and M.R. Gilmore, *Uses of Plants by the Indians ...* 79. 1991, *Thaiszia* 7: 75–88. 1997, *Syst. Bot.* 27(3): 621. 2002.

Echinacea angustifolia DC. (*Brauneria angustifolia* (DC.) A. Heller; *Echinacea angustifolia* var. *angustifolia*; *Echinacea angustifolia* var. *strigosa* McGregor; *Echinacea pallida* var. *angustifolia* (DC.) Cronquist; *Echinacea pallida* var. *I* (DC.) Cronquist)

North America. Herb, perennial

See *Methodus Plantas Horti Botanici ...* (Moench) 591. 1794, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 554–555. 1836, *Transactions of the American Philosophical Society*, new series, 7: 354. 1840, *Memoirs of the Torrey Botanical Club* 5(22): 333. 1894 and *Muhlenbergia*; a journal of botany 1(1): 5. 1900, *Vascular Plants of the Pacific Northwest* [C.L. Hitchcock et al.] 5: 160. 1955, *Transactions of the Kansas Academy of Science* 70(3): 368–369. 1968, *Taxon* 31: 766–768. 1982

(Analgesic, used for toothache, tonsillitis, pains, wounds and sores, headache, burns, swellings, stomachaches, as an antidote for snakebite, rattlesnakebites, stings and poisonous conditions; smoke treatment for headache. Crushed roots made into a paste applied to septic diseases.)

in English: black samson echinacea, blacksamson, blacksamson echinacea, comb plant, coneflower, mushroom medicine, narrow-leaved purple cone flower, purple coneflower, whip plant

in North America: mika-hi, ikigahai (Omaha-Ponca), ksapitahako, saporidu kahts (Pawnee)

Echinacea angustifolia DC. var. *angustifolia* (*Echinacea pallida* var. *angustifolia* (DC.) Cronquist)

North America. Herb, perennial

See *Methodus Plantas Horti Botanici ...* 591. 1794, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 554–555. 1836, *Transactions of the American Philosophical Society*, new series, 7: 354. 1840, *Memoirs of the Torrey Botanical Club* 5(22): 333. 1894 and *Muhlenbergia*; a journal of botany 1(1): 5. 1900, *Vascular Plants of the Pacific Northwest* [C.L. Hitchcock et al.] 5: 160. 1955, *Transactions of the Kansas Academy of Science* 70(3): 368–369. 1968

(Analgesic, used for toothache, tonsillitis, pains, wounds and sores, headache, burns, swellings, stomachaches, as an antidote for snakebite, rattlesnakebites, stings and poisonous conditions; smoke treatment for headache.)

in English: black samson echinacea, blacksamson, blacksamson echinacea, comb plant, coneflower, mushroom

medicine, narrow-leaved purple cone flower, purple cone-flower, whip plant

in North America: mika-hi, ikigahai (Omaha-Ponca), ksapitahako, saparidu kahts (Pawnee)

Echinacea pallida (Nutt.) Nutt. (*Brauneria pallida* (Nutt.) Britton; *Echinacea pallida* Britton; *Rudbeckia pallida* Nutt.)

North America. Herb, perennial

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 77. 1834, *Transactions of the American Philosophical Society*, new series, 7: 354. 1840, *Memoirs of the Torrey Botanical Club* 5(22): 333. 1894 and *Ill. Fl. N. U.S.* (Britton & Brown), ed. 2. 3: 476. 1913

(Antirheumatic, analgesic, antiinflammatory, burn dressing, vermifuge, febrifuge, antidote for snakebites, for boils, colds, headache, burns, mumps and measles, smallpox, colic, sore throat, sore eyes, toothache.)

in English: pale echinacea, pale purple coneflower, prairie coneflower

Echinacea purpurea (Linnaeus) Moench (*Brauneria purpurea* (L.) Britton; *Echinacea purpurea* Moench; *Echinacea purpurea* var. *arkansana* Steyerem.; *Rudbeckia purpurea* Linnaeus)

North America. Herb, clumped, perennial, whitish tan stems, green leaves, ray flowers purple reddish violet, disc brownish-purple yellow-orange, on edge of mesic woodland, open herbaceous secondary growth, open oak woods, in edges of woods, open fallow field

See *Species Plantarum* 2: 906–907. 1753, *Methodus Plantas Horti Botanici ...* (Moench) 591. 1794, *Memoirs of the Torrey Botanical Club* 5(22): 333–334. 1894 and *Rhodora* 40: 71. 1938, *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *Thaiszia* 7: 75–88. 1997, *Taxon* 50(4): 1199–1200. 2001

(Antibiotic, antibacterial, antiviral, immunostimulant; for colds, cough, flu, dyspepsia, venereal disease, gonorrhea, wound healing and to stimulate the immune system.)

in English: coneflower, Eastern purple coneflower, purple coneflower

Echinocereus Engelm. Cactaceae

From the Greek *echinos* ‘a hedgehog’ plus *Cereus*, referring to the spiny fruits, see *Memoir of a Tour to Northern Mexico* 91. 1848 and *Cactáceas y Suculentas Mexicanas* 18: 109. 1973, *Ashingtonia* 1: 44. 1974, *Piante Grasse* 13(4 Suppl.): 94. 1993[1994], *Caryologia* 48(2): 105–122. 1995, *Echinocereus* 46, 353. 1998, *Haseltonia* 6: 32–41. 1998.

Echinocereus enneacanthus Engelm. (*Cereus enneacanthus* (Engelm.) Engelm.)

Mexico.

See *Memoir of a Tour to Northern Mexico* 111. 1848, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 50. 1849

(Piscicide.)

in English: hedgehog cactus

Echinocereus poselgeri Lem. (*Echinocereus tuberosus* (Poselger) Rumpler; *Wilcoxia poselgeri* (Lem.) Britton & Rose)

Mexico.

See *Allgemeine Gartenzeitung* 21(17): 135. 1853, *Les Cactées* 57. 1868, *Handbuch der Cacteenkunde* 783. 1885 and *Contributions from the United States National Herbarium* 12(10): 434. 1909, *Kakteen* 134. 1929

(Crushed tuber sliced and applied to rheumatic joints; tuber peeled and boiled for several hours, the liquid drunk for rheumatic pains.)

Echinocereus triglochidiatus Engelm. (*Cereus triglochidiatus* (Engelm.) Engelm.; *Echinocereus coccineus* var. *inermis* (K. Schum.) J.A. Purpus; *Echinocereus kunzei* Guerke; *Echinocereus triglochidiatus* fo. *inermis* (K. Schum.) W. Blum & Mich. Lange; *Echinocereus triglochidiatus* var. *gonacanthus* Boissev.; *Echinocereus triglochidiatus* Engelm. var. *gonacanthus* (Engelm. & Bigelow) Boissev.; *Echinocereus triglochidiatus* var. *inermis* (K. Schum.) Arp; *Echinocereus triglochidiatus* var. *mojavensis* L.D. Benson; *Echinocereus triglochidiatus* Engelm. var. *toroweapensis* P.C. Fisch.; *Echinocereus triglochidiatus* Engelm. var. *triglochidiatus*)

North America. Perennial

See *Memoir of a Tour to Northern Mexico* 93. 1848, *Memoirs of the American Academy of Arts and Science*, new series 4(1): 50. 1849 and *Mitteilungen der Deutschen Dendrologischen Gesellschaft* 1925: 49. 1925, *Proceedings of the California Academy of Sciences*, Series 4, 25: 255. 1944, *Cactus and Succulent Journal* 45: 132. 1972, *Echinocereus* 360. 1998

(Poultice of roasted leaves used for swellings.)

in English: kingcup cactus

Echinocereus triglochidiatus Engelm. subsp. *coccineus* (Engelm.) U. Guzmán (*Cereus coccineus* Salm-Dyck ex DC.; *Cereus coccineus* var. *melanacanthus* Engelm.; *Cereus hexaedrus* Engelm.; *Cereus paucispinus* Engelm.; *Cereus phoeniceus* Engelm.; *Cereus roemerii* Muehlenpf.; *Coryphantha vivipara* (Nutt.) (Poisonous. Heart stimulant.)

in English: scarlet hedgehog cactus

Echinochloa P. Beauv. Poaceae (Gramineae)

From the Greek *echinos* ‘a hedgehog, sea-urchin’ and *chloe*, *chloa* ‘grass’ (Latin *herba, ae*, Akkadian *harbu, harpu* ‘early

harvest’, *qallum, qa-a-lu* ‘lowly, small’, *aru, eru, harum* ‘blossom, sprout, germ’), referring to the bristly spikelets, to the inflorescence branches; a difficult genus, many of the species are difficult to distinguish because there is so much variation within species, similar to *Brachiaria*, see *Species Plantarum* 1: 55. 1753, *Familles des Plantes* 2: 496. 1763, *Fl. Bourg.* 1: 495. 1782, *Essai d'une Nouvelle Agrostographie* 53, 161, 169, t. 11, f. 2. 1812, *Observations sur les Graminées de la Flore Belgique* 137–138. 1823 [1824], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 255. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Tropics and subtropics. Always annual or rarely perennial, leafy, robust, weak, creeping and ascending, emergent, trailing or floating, tufted, often rooting at the nodes, grains whitish eaten in times of scarcity, economic plant, young plants and shoots eaten raw with rice, seed used as a millet, also cultivated, forage, heavily grazed in wet areas, food for waterfowl and baboons, can be a serious weed species especially of rice and in irrigated areas

India. Annual, more or less erect, semi-prostrate habit, tufted, robust, stout, vigorous early grower, leafy, herbaceous, fodder and widely used forage, economic plant extremely palatable, largely cultivated as a cereal for its edible seeds, seed cooked and used as a millet, seed can be cooked whole or can be ground into a flour, probably derived from *Echinochloa colona* (L.) Link, often confused with *Echinochloa esculenta* (A. Braun) H. Scholz

See *Species Plantarum* 1: 56. 1753, *Hortus Bengalensis, or a catalogue ...* 7. 1814, *Flora Indica; or descriptions ...* 1: 307. 1820, *Hortus Regius Botanicus Berolinensis* 1: 204. 1827, *Révision des Graminées* 1: 45. 1829, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 104. 1885 and *Bulletin agricole du Congo Belge* 10: 244. 1919, *The Flora of the Malay Peninsula* 5: 223. 1925, *Trop. Tropical Africa, SE Asia. Short-lived perennial and annual, aquatic, robust, glabrous, smooth, sprawling, decumbent and rooting at the lower nodes, trailing leafy stems, herbaceous, thick and spongy, rhizomatous and stoloniferous, troublesome weed of paddy fields, a vegetable salt from the ashes, rich fodder, coarse but palatable hay, readily grazed by stock, grain eaten in time of scarcity, sweet culms, often floating on the water surface

See *Species Plantarum* 1: 56. 1753, *Observationes Botanicae* 5: 17. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 171. 1791, *Essai d'une Nouvelle Agrostographie* 53, 161, 171. 1812, *Systema Vegetabilium* 2: 479. 1817, *Systema Vegetabilium, editio decima sexta* 1: 307. 1825, *Révision des Graminées* 1: 44. 1829, *Journal de Botanique (Morot)* 4: 141. 1890, *Conspectus Florae Africae* 5: 745. 1894, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 347–348. 1895, *Fl. in the Philippine Isl.: balili, banago, bayakibok, bungalon, kompay, lagtom-na-pula, lagtomna pula, timsim, timsin, uraroi

in Sri Lanka: wel maratu

in Thailand: yaa plong, yaa plong yai, ya plong, ya plong yai

Echinophora L. Apiaceae (Umbelliferae)

From the Greek *echinos* 'a hedgehog' and *phoros* 'bearing, carrying', referring to the spiny pedicels, see *Species Plantarum* 1: 339. 1753, *Coll. Mém.* v. 63. t. 15. 1829, *Prod.* iv. 234. 1830, *Linnaea* 8: 513–514. 1834.

Echinophora tenuifolia L.

Europe.

See *Inform. Bot. Ital.* 23: 39–46. 1991

(For sclerosis.)

Echinopogon P. Beauv. Poaceae (Gramineae)

From the Greek *echinos* 'a hedgehog' and *pogon* 'a beard', alluding to the stiff awns or to the inflorescence, related to *Calamagrostis*, see *Essai d'une nouvelle Agrostographie*. 42, 148, 161. 1812, *Synopsis Plantarum Glumacearum* 1: 35, 37. 1855 [1853] and *Hooker's Icones Plantarum* 33: tab 3261. 1935, *Blumea, Supplement* 3: 56, f. 1. 1946, *Flora of Australia* 43: 12, 221, 272. 2002.

Echinopogon caespitosus C.E. Hubbard

New South Wales, Queensland, New Guinea. Perennial, erect or rarely geniculate, loosely or densely tufted, leaves mostly basal, leaves more or less scabrous to pilose, green panicle erect and contracted, the flower spike is a short and dense head of bristly flowers, fruit ventrally compressed and longitudinally grooved, often in disturbed areas, common in woodland, on sandstone and clay soils, forest or grassland

See *Hooker's Icones Plantarum* 33: tab 3261. 1935

(Can cause "staggers" if grazed when young.)

in English: tufted hedgehog-grass

Echinopogon ovatus (Forster f.) P. Beauv. (*Agrostis ovata* Forster f.; *Cinna ovata* (G. Forst.) Kunth; *Echinopogon aspera* Trinius; *Echinopogon novae-zelandiae* Gand.; *Echinopogon ovatus* Sieber; *Echinopogon ovatus* var. *pubiglumis* C.E. Hubb.; *Echinopogon purpurascens* Gand.; *Echinopogon sieberi* Steud.; *Echinopogon virens* Gand.; *Hystericina alopecuroides* Steud.)

Australia. Perennial or annual, solitary culms or tufted, decumbent and sometimes geniculate at base, geniculate-erect or ascending from rhizome system, slender, loose green tufted grass with erect scabrid culms, slender creeping rhizome, flower head like a ball, scabrous awns tipped red, hispid fruit longitudinally grooved, this grass similar to *Echinopogon caespitosus* C.E. Hubb.

See *Florulae Insularum Australium Prodrum* 40. 1786, *Essai d'une Nouvelle Agrostographie* 42, 148, 161, t. 9, f. 5. 1812, *Révision des Graminées* 1: 67. 1829, *Synopsis Plantarum Glumacearum* 1: 37. 1855 [1853], *Indig. Grasses N.Z.* t. 13B 1878 and *Manual of the New Zealand Flora* 150. 1925, *Hooker's Icones Plantarum* 33: (t. 3261) 7–8. 1935

(Young plants poisonous to stock, can cause "staggers" if grazed when young. In New Zealand recorded pathogenic association with *Claviceps purpurea* (Fr.) Tulasne.)

in English: forest hedgehog-grass, hedgehog-grass, rough-bearded grass

Echinops L. Asteraceae

Greek *echinos* 'a hedgehog, a sea-urchin' and *ops* 'appearance, resemblance', referring to the flowers, to the spherical heads; see Carl Linnaeus (1707–1778), *Species Plantarum*. 2: 814–815. 1753, *Genera Plantarum*. Ed. 5. 356. 1754 and *Kew Bull.* 22: 107–140. 1968, *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Bot. Zhurn. SSSR* 64 (4): 582–589. 1979, *Bot. Žurn.* (Moscow & Leningrad) 77(5): 71–72. 1992, *Bot. J. Linn. Soc.* 134: 453–463. 2000.

Echinops cornigerus DC. (*Echinops polygraphus* Tscherneva)

India. Erect branched spiny herb, pink flower-heads

See *Nucleus* 19: 8–12. 1976

(Whole plant extract in fresh water used to wash yellowness of eyes due to jaundice. Leaves paste applied to septic wounds. Veterinary medicine, leaves paste applied on worm-infested wounds in cattle.)

in English: globe thistle

in India: akjema, ekzema

Echinops echinatus Roxb.

India. Spiny herbaceous plant, oblong leaves, lobes ending in long rigid narrow spines, globose capitula, spiny bracts, pale blue flowers, silky obconic achenes

See *Hortus Bengalensis* 62. 1814 and *Taxon* 26: 107–109. 1977, *Bot. J. Linn. Soc.* 134: 453–463. 2000, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda, Unani and Sidha. Whole plant decoction alterative, diuretic, spasmolytic, hypoglycemic, aphrodisiac, nervous system tonic, in cough, dyspepsia, malaria, hysteria. Roots tonic, diuretic, astringent, pounded roots given for diarrhea and dysentery; roots decoction given for easy childbirth; root boiled with milk and taken for sexual vigor; a root infusion for impotency, hysteria and dyspepsia; root paste in water applied on scorpion sting; root extract febrifuge, given as antidote to snakebite; powdered root with cow milk useful in diabetes; dry root powder mixed with *Sterculia urens* gum applied to the head to kill lice. Veterinary medicine, powdered root applied to wounds in cattle to destroy maggots; dry root powder mixed with *Sterculia urens* or *Acacia nilotica* subsp. *indica* gum applied to hair to destroy lice; plant believed to have the efficacy to make barren cows fertile. Magic, contact therapy, root pieces tied round the neck of the children suffering from cough, fever and cold; root tied to the hair of a pregnant mother at the time of delivery to induce labor pain; uprooted plant root contacted over the hands of a victim of scorpion sting.)

in India: aagru, ajadandi, atanktara, batresh, bharoos, bikh untkatara, brahma dande, brahma dandi, brahmadande, brahmadandi, bramhadandee, gokhru, gokru, icalika, icalikamaram, kadechubak, kantaala mullu gida, kantaalu, kantakam, kantalu, kantaphala, kantela, kanya, karabhadana, karamadana, kattam, kirumirustanki, kokkilam, konta, kopankontar, kutiraippijan, kutiraippisanmaram, mukhadantarujapaha, mulla banti, mutini, naayi mullu, nari mullu, oantkateli, ontkataro, ontkato, oont-kanti, oont-katalo, oontkateli, otkanta, ottaimaram, patarikantam, patariritcam, pitchi ksumama, raktapushpa, shrigala, shunakashana, thella, thella baaburu, tikshnagra, tiksnagra, uintkato, undh-katalo, unt kantalo, unt katalo, untakataiya, untakatara, unthkantata (oonth, camel; kanta, thistle), untkatara, ushtrakanta, ustrakanta, utakanja, utakanta, utakantaka, utakatira, utanti, utati, uthanti, uthati, uthkatara, utkanta, utkantaka, utkantaro, utkante, utkanto, utkatara, utkatari, utkatotkata, uttundaka, vaemadonda, vrittaguchha

Echinops kebericho Mesfin

Ethiopia.

See *Mitt. Inst. Allg. Bot. Hamburg*, 23b: 616. 1990, *Journal of Ethnopharmacology* 111: 271–283. 2007, *Journal of Ethnopharmacology* 112: 152–161. 2007

(Astringent, for diarrhea, headache, cough. Magic, ritual.)

Echinops latifolius Tausch (*Echinops dahuricus* Fisch. ex DC.; *Echinops dahuricus* Fisch.; *Echinops dahuricus* var. *angustilobus* DC.; *Echinops dahuricus* var. *latilobus* DC.; *Sphaerocephalus dahuricus* (Fisch. ex DC.) Kuntze ex Kom.)

China, Mongolia. Perennial herb, erect, simple, foliage densely white tomentose, spinous leaves alternate, blue solitary heads in globose involucrate balls, flowers hermaphrodite, involucre oblong, bracts rigid pungent, pappus coroniform, villous achenes elongate

See *Species Plantarum* 2: 814–815. 1753, Fischer, Friedrich Ernst Ludwig von (1782–1854), *Catalogue du jardin des plantes de son excellence monsieur le comte Alexis de Razoumoffsky, à Gorenki*. (ed. 2) 2: 37. Moscou, 1812, *Ann. Mus. Hist. Nat. [Paris]* 19: 67. 1812, *Flora* 11(2): 486. 1828, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 523. 1837 and *Trudy Imperatorskago S.-Peterburgskago Botaničeskago Sada* 25: 713. 1907

(The roots used for acute mastitis, skin inflammation, hemorrhoids.)

in English: broad-leaved globe thistle

in China: lou lu

Echinops longifolius A. Rich. (*Echinops bathrophyllus* Mattf.; *Echinops luckii* R.E. Fr.; *Echinops luckii* var. *pinatiloba* Mattf.; *Echinops otarus* Mattf.; *Echinops schweinfurthii* Mattf.)

Guinea, Ghana. Perennial, glabrous herb, terminal flowerheads, pale blue florets, achenes setose

See *Tentamen Florae Abyssinicae ...* 1: 452, t. 61. 1848 and *Acta Horti Bergiani* 8: 43. 1923, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 59, Beibl. 133: 54–55, 58. 1924

(Poultice applied for burns and carbuncles.)

Echinops longisetus A. Rich.

East Africa.

See *Tentamen Florae Abyssinicae ...* 1: 450. 1848

(Veterinary medicine, blackleg.)

Echinops niveus Wall. (*Echinops niveus* Henderson)

India, Himalaya.

See *Trudy Imp. S.-Peterburgsk. Bot. Sada* xii. (1892) 261. 1892

(Plant extract diuretic, nervine and used in cough, eye diseases and indigestion. Veterinary medicine, powdered root applied to wounds in the cattle to destroy maggots.)

in India: kandaru

Echinops ritro L. (*Echinops ritro* Kozuharov; *Echinops ritro* var. *tenuifolius* DC.; *Echinops tauricus* Willd. ex Ledeb.; *Echinops tenuifolius* Fisch. ex Schkuhr, nom. nud.)

Europe.

See *Species Plantarum* 2: 815. 1753, *Handb.* 3: 181. 1808, *Flora Altaica* 4: 44. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 524. 1837

(Diaphoretic.)

Echinops spinosus L. (*Echinops spinosus* Bové ex DC.; *Echinops spinosus* Herb. Madr. ex Wall.; *Echinops spinosus* d'Urv.)

Europe, Morocco.

See *Species Plantarum* 2: 814–815. 1753, *Mantissa* 1: 119. 1767, *Mém. Soc. Linn. Paris* 1: 374. 1822, *Prodr.* (DC.) 6: 525. 1838 and *Informatore Botanico Italiano* 23: 39–46. 1991, *Lagascalia* 18(2): 306. 1996

(Alterative, diuretic, depurative, oxytocic, postpartum remedy, for retained placenta, blood circulation, liver diseases, jaundice.)

Echinops viscosus DC. (*Echinops viscosus* Rchb.)

Europe, Greece.

See *Flora Germanica Excursoria* 856. 1830–1833

(Masticatory.)

Echinopsis Zuccarini Cactaceae

Sea-urchin cactus, from the Greek *echinos* (possibly from *echis* ‘a male viper’) ‘a hedgehog, a sea-urchin’ and *opsis* ‘resemblance’, Latin *echinus* ‘hedgehog, urchin, sea-urchin, land-urchin, the prickly husk of a chestnut’; see *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 2: 675. 1837 and A.E. Hoffmann J., *Cactaceas en la flora silvestre de Chile*. Ediciones Fundacion Claudio Gay. Santiago de Chile 1989, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997, *Annual Report of the Missouri Botanical Garden* 16: 73, t. 8, f. 1–3. 1905, *Bollettino delle r. Orto Botanico e Giardino Coloniale di Palermo* 8: 236. 1909.

Echinopsis pachanoi (Britton & Rose) Friedrich & G.D. Rowley (*Cereus pachanoi* (Britton & Rose) Werderm.; *Cereus rosei* Werderm.; *Echinopsis peruviana* (Britton & Rose) Friedrich & G.D. Rowley; *Trichocereus pachanoi* Britton & Rose; *Trichocereus pachanoi* fo. *peruvianus* (Britton & Rose) F. Ritter; *Trichocereus peruvianus* Britton & Rose) (for A. Pachano)

Ecuador, Peru, dry Andes. Tree or shrub, erect, columnar, high narrow crown, stems dark green, joints dark green, many-branched from base, large white flowers, fruit oblong mostly crowned by the floral remnants, white flesh of fruit, on sandy slopes

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Gardeners Dictionary: ... eighth edition*. 1768 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family (Britton & Rose) 2: 134–136, 182, f. 196, 197. 1920, *Neue Kakteen* 73, 101. 1931, *International Organization for Succulent Plant Study Bulletin* 3(3): 96–97. 1974, *Kakteen in Südamerika* 4: 1239–1692. 1981, *Cact. Succ. J.* (Los Angeles) 56(3): 102–104. 1984, *Flora of Ecuador* 35: 1–79. 1989, *Estudio de la Vegetación de las Partes Altas de las Provincias Campero y Mizque (Cochabamba)* i-v, 1–92. 1996, *Journal of Ethnopharmacology* 105(3): 352–357. 2006

(Mescaline, used in magic medicine. *Trichocereus pachanoi* was used in association with other plants, such as *Iresine herbstii*, for divination, to diagnose diseases, and to take possession of another identity; together with *Neoraimondia macrostibas* Britton & Rose, *Isotoma longiflora* (L.) C. Presl (*Hippobroma longiflora* (L.) G. Don), *Pedilanthus tithymaloides* (L.) Poit. (*Euphorbia tithymaloides* L.) and a *Datura* sp., it is the base of *cimora*, a hallucinogenic drink. Medicine for the nerves, the flowers are cut fine and drunk, is used together with other plant species. Veterinary medicine, for sick cattle, a decoction is drunk.)

in South America: aguacolla, San Pedrillo, San Pedrito, San Pedro

Echinosperrum Swartz ex Lehmann Boraginaceae

From the Greek *echinos* ‘a hedgehog, a sea-urchin’ and *sperma* ‘seed’, referring to the nutlets; see Conrad Moench, *Methodus plantas horti botanici et agri Marburgensis a staminum situ describendi*. 416. 1794, Johann Georg Christian Lehmann (1792–1860), *Plantae e Familiae Asperifoliarum Nuciferae*. 113. Berolini 1818 and *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 651–652. 1983.

Echinosperrum redowskii (Hornem.) Lehm. var. ***cupulatum*** A. Gray (*Echinosperrum cupulatum* (A. Gray) K. Schum.; *Lappula cupulata* (A. Gray) Rydb.; *Lappula echinata* fo. *cupulata* (A. Gray) B. Boivin; *Lappula occidentalis* var. *cupulata* (Gray) Higgins; *Lappula redowskii* fo. *cupulata* (A. Gray) Scoggan; *Lappula redowskii* var. *cupulata* (A. Gray) M.E. Jones; *Lappula redowskii* (Hornem.) Greene var. *texana* (Scheele) Brand; *Lappula texana* (Scheele) Britton; *Lappula texana* (Scheele) Britton var. *coronata* (Greene) A. Nelson & J.F. Macbr.; *Lappula texana* (Scheele) Britton var. *heterosperma* (Greene) A. Nelson & J.F. Macbr.; *Lappula texana* (Scheele) Britton var. *homosperma* (A. Nelson) A. Nelson & J.F. Macbr.)

North America. Annual or biennial herb

See *Hortus Regius Botanicus Hafniensis* 1: 174. 1813, *Plantae e Familiae Asperifoliarum Nuciferae* 113. 1818, *Flora Altaica* 1: 199. 1829, *United States Geological Expolration [sic] of the Fortieth Parallel*. (An infusion used as lotion for sores, itching or swellings. To stop nose bleeding. Postpartum remedy.)

in English: flatspine stickseed

Echiochilon Desf. Boraginaceae

From the Greek *echis* ‘a viper’ and *cheilos* ‘a lip’, see *Flora Atlantica* 1: 166. 1798.

Echiochilon fruticosum Desf.

Tunisia.

See *Flora Atlantica* 1: 166, t. 47. 1798 and *Natural Product Research* 23(16): 1466–1471. 2009

(Antifungal.)

Echiochilon lithospermoides (S. Moore) I.M. Johnst. (*Echiochilon lithospermoides* I.M. Johnst.; *Leurocline lithospermoides* S. Moore; *Lobostemon lithospermoides* (S. Moore) Baker)

East Africa.

See *J. Bot.* 39: 257. 1901, *Contributions from the Gray Herbarium of Harvard University* 73: 50. 1924

(Whole plant for skin diseases. Veterinary medicine.)

in Kenya: lalasho

Echium L. Boraginaceae

From the ancient Greek name *echion* (Dioscorides, Galenus) (*echis* ‘a male viper’; or from Sanskrit root *aç* ‘to penetrate’, Greek *ake*, *akis* ‘tip, thorn, a sharp point’), because the plant was supposed to cure a viper’s bite and to discourage serpents, or perhaps referring to the seeds or to the nutlet shape; see

Carl Linnaeus, *Species Plantarum*. 1: 139. 1753 and *Genera Plantarum*. Ed. 5. 68. 1754 and *Acta Phytotax. Barcinon.* 14: 1–20. 1973, *Taxon* 26: 257–274, 443–452. 1977, *Iran. J. Bot.* 7(1): 81–93. 1996.

Echium biebersteinii Lacaita (*Echium italicum* Salzm. ex Ball; *Echium italicum* L.)

Iran, Europe.

See *Species Plantarum* 1: 139. 1753, Friedrich August Marschall von Bieberstein, 1768–1826, *Centuria plantarum rariorum Rossiae meridionalis praesertim Tauriae et Caucasi iconibus descriptionibusque illustrata*. Charkoviae 1810, *Flora taurico-caucasica*. Charkouiae [Charkow] 1808–1819, *Journal of the Linnean Society, Botany* 16: 577. 1878 and *Lagascalia* 1: 48. 1971, *Taxon* 27: 375–392. 1978, *Taxon* 28: 398–400. 1979, *Taxon* 30: 829–842. 1981

(Snakebite antidote.)

Echium nervosum Dryand. (*Echium nervosum* W.T. Aiton)

Europe.

See *Hortus Kew.* (W.T. Aiton), ed. 2. 1: 300. 1810

(Leaves as sedative.)

in English: pride of Madeira

Echium plantagineum L. (*Echium lycopsis* L.; *Echium plantagineum* Kunze; *Echium plantagineum* Jacq.)

North America, Mediterranean.

See *Fl. Angl.* (Linnaeus) 12. 1754, *Mant. Pl. Altera* 202. 1771, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 4: 19. 1819, *Flora* 29: 761. 1846, *Atti Riunione Sci. Ital.* 8: 564. 1847

(Poison.)

in English: Patterson's curse, purple echium, salvation Jane

in Arabic: bou shenaf, kahila

in South Africa: bloublommetjie, bloudissel doring, natterkop, pers-echium

Echium vulgare L.

Cosmopolitan. Annual, biennial or perennial herb

See *Species Plantarum* 1: 139–140. 1753 and *Lagascalia* 1: 54. 1971, *Acta Biologica Cracoviensia, Series Botanica* 17: 133–164. 1974, *Taxon* 27: 519–535. 1978, *Taxon* 28: 395–397, 400–401. 1979, *Taxon* 29: 538–542, 709–710. 1980, *Anales del Jardín Botánico de Madrid* 37: 199–201. 1980, *Taxon* 31: 583–587, 589–592. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, Cheeke, P.R. Edgeworthia Meissner Thymelaeaceae

After the Irish botanist Michael Pakenham Edgeworth, 1812–1881 (Eigg, Inverness), 1831–1881 civil servant in Bengal (Bengal Civil Service, Ambala and subsequently at Saharanpur), in 1842 a Fellow of the Linnean Society, plant collector, among his writings are *Catalogue of plants found in the Banda district 1847–1849*. [Mooltan 1851], *Pollen*. London 1877, *Grammar and Vocabulary of the Cashmiri language*. [Calcutta 1841] and “Plants from North-Western India.” in *Trans. Linn. Soc.* 20: 23–91. 1851, in 1874–1875 contributed to J.D. Hooker’s *Flora of British India* (Frankeniaceae, Caryophyllaceae, Zygophyllaceae, Geraniaceae). See *Species Plantarum* 1: 356. 1753, A. Lasègue, *Musée botanique de Benjamin Delessert*. 433, 503. 1845 and J.H. Barnhart, *Biographical Notes upon Botanists* 1: 495. 1965, Isaac Henry Burkill, *Chapters on the History of Botany in India* 74–75. 1965, *Flora of Japan* 643–646. 1965, *Fl. Wilson.* 1: 400, 408. 1913, *Botanical Magazine* 33: 206. 1919, *Journal of Wuhan Botanical Research* 19: 198. 2001

(Juice of root and stem used for eye disorders. Bark and leaves as fish poison.)

in English: paperbush

in Bhutan: dekar

in China: dian jie xiang, jie xiang, meng hua

in India: agreli, algeri, argayle, dhenok, kagate

in Japan: mitsumata (= the three forks)

in Nepal: agreli, araili, arghelo, aryili, pachyar

Egletes Cass. Asteraceae

See *Dictionnaire des Sciences Naturelles* [Second edition] 59: 127–128. 1829, *London Journal of Botany* 7: 80. 1848 and *Fieldiana, Bot.* 24(12): 128–164, 483–495. 1976, *Amer. J. Bot.* 64: 791–798. 1977, *Fl. Venez. Guayana* 3: 177–393. 1997, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Egletes humifusa Less. (*Cotula humifusa* (Less.) Willd. ex Steud.)

Ecuador.

See *Species Plantarum* 2: 891–892. 1753, *Bull. Sci. Soc. Philom. Paris* (1817) 153. 1817, *Syn. Gen. Compos.* 252. 1832, *Nomenclator Botanicus*. Editio secunda 1: 427. 1840

(Tonic, stomachic.)

Egletes viscosa (L.) Less. (*Cotula viscosa* L.; *Egletes viscosa* Less.; *Egletes viscosa* fo. *bipinnatifida* Shinnery; *Egletes viscosa* var. *dissecta* Shinnery)

South America.

See *Sp. Pl.* 2: 892. 1753, *Syn. Gen. Compos.* 252. 1832 and *Lloydia* 12(4): 244–245. 1949[1950], *Taxon* 47: 359. 1998

(Wound healing.)

Ehrendorferia Fukuhara & Lidén Papaveraceae

See *Plant Systematics and Evolution* 206(1–4): 415. 1997.

Ehrendorferia chrysantha Rylander (*Dicentra chrysantha* (Hook. & Arn.) Walp.)

North America. Perennial herb

See *Linnaea* 1: 556. 1826, *The Botany of Captain Beechey's Voyage* 320, plate 73. 1838, *Repertorium Botanicum Systematicae* 1: 118. 1842 and *Taxon* 35: 405–406. 1986, *Plant Systematics and Evolution* 206: 415. 1997

(Dried mashed roots applied to the chest for heart pains.)

in English: golden ear drops, golden eardrops

Ehretia P. Browne Boraginaceae

Dedicated to the German botanical artist Georg Dionysius Ehret, 1708–1770 (Chelsea, London), gardener, illustrator, 1757 Fellow of the Royal Society. See P. Browne, *The civil and natural history of Jamaica*. 168, pl. 16, f. 1. London 1756, *Systema Naturae*, Editio Decima 2: 936. 1759, *Encyclopédie Méthodique, Botanique* 1: 527. 1783, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 284–293. 1790, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 22. 1799, *Nova Genera et Species Plantarum ...* 2: 136, 138. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 502, 504, 509. 1845 and J.H. Asia tropical, Australia. Tree, leaves sharply serrate, compound panicles, white flowers, drupe orange

See *Prodr. Fl. Nov. Holland.* 1: 497. 1810, Appendix to the first ... *A Sketch of the Vegetation of the Swan River Colony* 13: sub pl. 1097. 1827 and *Nuovo Giornale Botanico Italiano*, new series 17(4): 699. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 11(274–278): 67. 1912, *Journal of the Arnold Arboretum* 5(1): 38–39. 1924, *Transactions of the Natural History Society of Taiwan* 30: 60. 1940, *Journal of the Arnold Arboretum* 32(1): 21. 1951

(Leaves and branchlets astringent, styptic. Stembark chewed to heal tongue and mouth sores.)

in English: churnwood, koda, kodo wood

in China: hou ke shu

in India: bakli, bojo, bokkudu, bol artok, bowal gach, bukkedi, dieng basier, donkaburra, gila-phal, gual, koda, kodlimurka, lahichan, nara, pojhar, puna, punia, punna, punyan, uozal

in Japan: chisha-no-ki

in Nepal: seto lodo

Ehretia amoena Klotzsch

Kenya, South Africa. A shrub or small tree

See *Naturwissenschaftliche Reise nach Mossambique ...* 248, t. 41. 1861

(Leaf pulp disinfectant, applied to wounds. Bark powder for skin diseases. Root decoctions analgesic, vermifuge, febrifuge, astringent, to treat pain, bleedings, swellings, pneumonia, tuberculosis, gonorrhea, epilepsy, vomiting, diarrhea, hookworm infections and menstruation problems. Bark, leaves and fruits pounded and the juice drunk for the treatment of painful menstruation.)

in English: sandpaper bush, stamperwood

in Southern Africa: stamperhout, skurwebelaarbos; umKlele omkhulu (Zulu); liBhungela (Swazi); shombe, mutepe (Venda)

Ehretia bakeri Britten

Kenya and Tanzania.

See *Journal of Botany, British and Foreign* 33: 88. 1895

(Root decoction a cure for gonorrhoea.)

Ehretia coerulea Gürke

Tropical Africa.

See *Bot. Jahrb. Syst.* 28(3): 312. 1900

(Leaves and stem bark for back pain, wound healing.)

Ehretia cymosa Thonning (*Ehretia cymosa* Thonn. ex Schumacher; *Ehretia cymosa* Choisy; *Ehretia thonningiana* Exell)

East and West Africa. Shrub or many-branched tree, young branchlets densely hairy, small white flowers, orange or red shining edible berries, leaves as fodder, a variable species

See *The Civil and Natural History of Jamaica in Three Parts* 168. 1756, *Beskrivelse af Guineiske planter* 129–130. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 149–150. 1828 and *Journal of Ethnopharmacology* 112: 152–161. 2007, *Journal of Ethnopharmacology* 116: 370–376. 2008

(Toxic. Bark decoction for amenorrhea. Roots and leaves used as an aphrodisiac and for dysentery; root juice applied to wounds; crushed roots in water taken against stomach complaints and to treat brucellosis. Leaf juice mild laxative, styptic, used in the treatment of wounds. Leaves for treating fevers and headaches, mild laxatives, used as a wash for fever and convulsions; to heal fractured bones, wounded area covered with leaf poultice.)

in English: forest stamperwood

in Benin: myoma, myonma, zoma, zomali, zomena, zozoma

in East Africa: endalati-ekolok (Maasai), musuga (Luganda), shekutu

in Ghana: abovro, dutso, labaasaatso, o-koni, okosua, tatu hungwa chu

in Ivory Coast: alébé, bélékou, béléku, blikou, bliku, gotué, grakou, graku, lauso, lusso

in Kenya: mororwet, murembu, shekutu

in Nigeria: adawinwin, besoke, ijaoke, jaa, jaoke, jàokè, jasoke, pawin

in Sierra Leone: arunku

in Southern Africa: muTshaware (Shona)

in S. Rhodesia: muTsakwari

in Tanzania: mnemvu, mpelu, yambu

in Togo: labassa

Ehretia laevis Roxb. (*Bourreria laevis* (Roxb.) G. Don; *Ehretia laevis* var. *platyphylla* Merr.)

India. Small tree, fast growing, rusty-tomentose branches, twigs and leaves with a herbaceous appearance, leaves spirally arranged, white flowers in cymes, orange-red fruits

See *Plants of the Coast of Coromandel* 1: 42, pl. 56. 1796 and *Lingnan Science Journal* 14(1): 55. 1935, *A General History of the Dichlamydeous Plants* 4: 390. 1938

(Used in Ayurveda and Sidha. Leaves decoction applied on the body to ease muscular pains, given in cough and asthma; tender leaves paste applied to treat eczema. Bark chewed and rubbed on the teeth and lips as an antiseptic; bark decoction given for diphtheria. Root decoction given in rheumatism. Dried powder of flowers given as an aphrodisiac.)

in China: mao e hou ke shu

in India: aadabukkudi, adabukkudu, adak, adaka bagari, adake, adike bogari, adiki, alabukkudu, avak, bodidhi, bokkadi, bondula, bukkedi, buri, carmakaravata, carmakasa, carmavrksa, carmiloha, carmivrksa, cavanti, chafok, chamar, chamorar, chamror, charandi, chavandi, chilla poku, chillapoku, daatharanga, dandos, darar, datrang, datranga, ennebudige, gidiguri, giduguri, goali, haalippe, haatippe, halippe, hallippe, jhadocodkar, kalivirusu, kalo-gomdo, kalvirasu, kalvirusus, kappura, kappure, kapura, karadaka, karadake, karatuke, khoda, koda, kolma, kuruviccai, kuruvicci, kuruviracu, luni, mahudiyo munjar, mosonea, narivalli, paaladanthamu, pagakina, pala dantam, paladantam, paladantamu, paldatam, papri, pattaiviccu, pattaiviracu, pedda pikka, pedda pulimaera, peddaburimaeli, peddafurimela, peddapiccika, peddapichaka, peddapulimera, peddapulmera, peddaturimeli, pigakina, pogada, pogadi, pogadi chettu, pogadichettu, poka, pokachettu, polimiri, potubokada, potubokkada, potubukkedi, pushipan, reddapulmera, seregad, seregada, shiragadam, shiragadamu, siragadam, siragadamu, sondari, tamboli, tamboliya, tandalya (= as white as rice grains), tavittan, tella pisini, telladzuvi, tellajoovi, tellajuvvi, tellapisuni, thellajihvi, thellapisuni, vadhvardi

Ehretia obtusifolia Hochst. ex DC. (*Ehretia aspera* var. *obtusifolia* (Hochst. ex A. DC.) Parmar; *Ehretia fischeri* Gürke)

East Africa. Deciduous shrub or small tree, leaves as a fodder

See *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 507. 1845, *Die Pflanzenwelt Ost-Afrikas* 336. 1895 and *Flora of Rajasthan* 2: 253. 1991

(Leaves infusion to treat sore throat, aphrodisiac. Root to treat painful menstruation and infertility in women; root infusion taken against retained placenta.)

in English: big-leaved puzzle bush, sandpaper bush

in Southern Africa: skurweblaarbos; umHlele-umkhulu, umLovu, umKlele-omkhulu (Zulu)

in Tanzania: mkilika

Ehretia philippinensis A. DC.

Philippines.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 504. 1845

(Slightly toxic. Astringent, for diarrhea, dysentery.)

Ehretia resinosa Hance (*Ehretia formosana* Hemsl.; *Ehretia navesii* Vidal)

China, Philippines.

See *Journal of Botany, British and Foreign* 18(214): 299. 1880, *Revision de Plantas Vasculares Filipinas* 194. 1886, *Journal of the Linnean Society, Botany* 26(174): 144–145. 1890

(Anodyne, expectorant, febrifuge, vermifuge, for cough, fever, ringworm. Fish poison.)

in China: tai wan hou ke shu

in Philippines: alimbangung, kalambonog, malatadiang, maragaued, talibunog

Ehretia rigida (Thunb.) Druce (*Capraria rigida* Thunb.; *Ehretia hottentotica* Burch.; *Ehretia zeyeriana* H. Buek ex Harv.; *Freylinia rigida* (Thunb.) G. Don; *Pittosporum commutatum* Krauss)

South Africa. Deciduous multistemmed small tree or shrub, edible fruits, browsed by livestock, closely resembles *Ehretia amoena* and *Ehretia obtusifolia*

See *Prodromus Plantarum Capensium*, ... 103. 1800

(Root powder analgesic, disinfectant, applied to wounds, cuts and burns. Root decoctions taken to treat menstruation problems and infertility. Veterinary medicine, to treat gall sickness in cattle; roots for fracture. Magic, good luck charm.)

in English: Cape lilac, Hottentot's lilac, lilac, puzzle bush, stamperwood

in Southern Africa: bergwitboom, deurmekaarbos (= tangled bush), draaibos, kraalbos, kraaldog, mutepe, stamperhout; omusepa (Herero); mokgalo, morobo, sekgalo (South Sotho); mokalo (Sotho); morobe (North Sotho); morobe (= the breaker) (Tswana: Western Transvaal, northern Cape, Botswana); iLalanyathi, iSalanyathi, uMankhele, umCele, umGxele, umHlele, umkele, umKlele (Zulu); iBotshane, umBotshane, umBotshani, umhleli (Xhosa); umthele, umThlele (Ndebele); um-xele (Swati)

(Tonic.)

Ehretia silvatica Gürke (*Ehretia abyssinica* var. *silvatica* (Gürke) Riedl)

East Africa, Tanzania.

See *Linzer Biologische Beiträge* 17: 313. 1985

(Veterinary medicine, for mastitis.)

in Tanzania: mnemvu

Ehretia tinifolia L. (*Ehretia longifolia* Miers; *Ehretia sulcata* Miers; *Ehretia tinifolia* M. Martens & Galeotti, nom. illeg.)

West Indies.

See *Systema Naturae*, Editio Decima 2: 936. 1759, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 11: 332. 1844, *Annals and Magazine of Natural History*, ser. 4 3: 109–110. 1869 and *Ann. Missouri Bot. Gard.* 76(4): 1069. 1989

(For kidney ailments.)

Ehretia trachyphylla C.H. Wright

West Africa, Ghana, Ivory Coast. Tree

See *Bulletin of Miscellaneous Information Kew* 1907: 53. 1907

(A bark decoction taken for amenorrhea and skin affections.)

in Ghana: asadwe, okyine, okyini

in Ivory Coast: assajué, kombui

in Nigeria: jasoke

Eichhornia Kunth Pontederiaceae

Named after Johann Albrecht Friedrich Eichhorn, 1779–1856, a Prussian minister of education and public welfare, court advisor and politician. See Heinrich Friedrich Karl vom und zum Stein (1757–1831), *Die Central-Verwaltung der Verbündeten unter dem Freiherrn v. Stein*. [By Albrecht Friedrich Eichhorn.] Deutschland [Berlin] 1814, *Nova Genera et Species Plantarum* (quarto ed.) 1: 265. 1815[1816], *Flora Telluriana* 2: 81. 1836[1837], Carl Sigismund Kunth (1788–1850), *Eichhornia*, genus novum e familia Pontederiacearum. 3. Berolini 1842 and *Enumeratio plantarum*. 4: 129–132. 1843, *Bot. Zeit.* 14: 175. 1846 and *Field Mus. Nat. Hist., Bot. Ser.* 13(1/3): 608–609. 1936, *Fl. (Used in Ayurveda and Sidha. Leaves in ear diseases; tubers of *Cyperus rotundus* pounded and mixed with leaf juice of *Eichhornia crassipes* and given in urinary diseases. Flower juice with flower juice of *Mesua ferrea* applied on sore eyes. Veterinary medicine, flowers for skin troubles and diseases in horses.)

in English: common water hyacinth, million-dollars-weed, Nile lily, water-hyacinth, water hyacinth, water lily

in South America: balsa, guama, huama, jacinto, jacinto acuático, jacinto de agua, lechuga, lechuga de concha, lechuguilla, lirio acuático, lirio de agua, ninfa, putus putus

in China: feng yan lan

in India: antara taavare, antaragange, anthara thaavare, antharagange, budaga tamara, kachuri pana, garapat, gurra pudekka moka, gurrapu dekka, jal kumbhi, jalakumbhi, kappa kaluva, kochuripana, mir-lang-dung, pishachi thaavare, variparni, venkayattamarai

in Japan: Hotei-aoi (Hotei is the god of prosperity)

Malayan names: bunga jamban, keladi bunting

in Okinawa: torin, uchikusa

in South Africa: Nyllelie, snotterbel, waterhiasint

Ekebergia Sparrm. Meliaceae

The genus was named by the Swedish traveller and botanist Anders Sparrman (1748–1820) to honor Carl Gustav Ekeberg (1716–1784) who, in 1765–1767, was the Captain (of the ship) on a trip to East Indies and China. See Pehr Osbeck, *Dagbok öfwer en Ostindisk Resa åren 1750–52 ...* Stockholm 1757, *Kongl. Vetenskaps Academiens Handlingar* 40: 282. 1779, *Genera Plantarum* 263. 1789, C.P. Thunberg, *Museum naturalium Academiae Upsaliensis. Dissertationibus academicis*. Upsaliae 1787–1797 and J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 149. Cape Town 1981, *Journal of Ethnopharmacology* 56: 81–87. 1997, *Journal of Ethnopharmacology* 66: 247–354. 1999, *Journal of Pharmaceutical and Biomedical Analysis* 24(1): 133–145. 2000, *South African Journal of Botany* 69(3): 301–363. 2002, *Phytotherapy Research* 18(5): 379–384. 2004, *Pharmacologyonline* 3: 153–165. 2006. Sparrman, the first collector of *Ekebergia capensis*, was a pupil of Linnaeus and doctor on Cook's second voyage; he published *A voyage to the Cape of Good Hope... 1772–1776*. London 1785–1786 (first English translation).

Ekebergia benguelensis Welw. ex C. DC. (*Ekebergia* cf. *velutina* Dunkley; *Ekebergia arborea* Baker f.; *Ekebergia discolor* O. Hoffm.; *Ekebergia fruticosa* C. DC.; *Ekebergia nana* Harms; *Ekebergia pumila* I.M. Johnst.; *Ekebergia sclerophylla* Harms; *Ekebergia velutina* Dunkley; *Ekebergia welwitschii* Hiern ex C. DC.)

Tanzania. Small tree, sweet spicy fragrant flowers, edible fruits

See *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 642–644. 1878, *Linnaea* 43: 123. 1881, *Journal of Botany, British and Foreign* 37: 427–428. 1899 and *Bot. Jahrb. Syst.* 28(4): 415. 1900, *Contr. Gray Herb.* 75: 24. 1925, *Notizbl. Bot. Gart. Berlin-Dahlem* 11: 401. 1932, *Bull. Misc. Inform. Kew* 1935, 261. 1935

(Boiled leaves applied to the chest to treat pneumonia. Bark chewed for indigestion; powdered bark taken against impotence. Fruits and roots tonic, analgesic, aphrodisiac. Roots infusion laxative, aphrodisiac, astringent, for diarrhea, painful menstruation, stomachache. Veterinary medicine, antidote, snakebite.)

in English: woodland dogplum

in S. Rhodesia: mPuri

in Southern Africa: muHlawarungu, Nyimonyimo, muPuri, muRuranyimo, muTomo (Shona)

Ekebergia capensis Sparrm. (*Cabralea humilis* C. DC.; *Cedrela kotschyi* Schweinf.; *Charia chevalieri* C. DC.; *Charia indeniensis* A. Chev.; *Ekebergia buchananii* Harms; *Ekebergia complanata* Baker f.; *Ekebergia holtzii* Harms; *Ekebergia meyeri* C. Presl ex C. DC.; *Ekebergia mildbraedii* Harms; *Ekebergia petitiana* A. Rich.; *Ekebergia petitiana* var. *australis* Baker f.; *Ekebergia rueppelliana* (Fresen.) A. Rich.; *Ekebergia senegalensis* A. Juss.; *Pseudocedrela kotschyi* (Schweinf.) Harms; *Sorindeia doeringii* Engl. & K. Krause; *Trichilia ekebergia* E. Mey. ex Sond.; *Trichilia rueppelliana* Fresen.)

South Africa. Tree or shrub, spreading crowned, flaking bark, branchlets with numerous white lenticels, leaves pinately compound, leaves at ends of branches and dark or glossy above, not very conspicuous fragrant white-cream flowers, rain forest, in dry deciduous woodland, in forest

See *The Civil and Natural History of Jamaica in Three Parts* 278. 1756, *Kongliga Svenska Vetenskapsakademiens Handlingar* 40: 282, t. 9. 1779, *Mémoires du Muséum d'Histoire Naturelle* 19: 229–230, t. 5, f. 13. 1830, *Museum Senckenbergianum* 2: 280. 1837, *Reliquiae Kotschyanae* 9: 34, f. 2. 1868, *Monographiae Phanerogamarum* 1: 642. 1878, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 153–154. 1895 and *Bulletin de l'Herbier Boissier*, sér. 2, 1: 364. 1901, *Journal of Ethnopharmacology* 12: 35–74. 1984, *Journal of Ethnopharmacology* 52: 95–100. 1996, *Journal of Ethnopharmacology* 67: 327–332. 1999, *Journal of Ethnopharmacology* 108: 332–339. 2006

(Roots for chest complaints, coughing, headache, indigestion, heartburn. Leaves antioxidant, vermifuge, for intestinal parasites. Bark antibacterial, emetic, antiplasmodial, vermifuge, astringent, uterotonic, for dysentery, gastritis. Seeds anthelmintic. Veterinary medicine, anthelmintic, vermifuge, abortifacient. Magic, ritual, to protect from witchcraft.)

in English: Cape ash, dog plum, essenwood

in Eastern Africa: mongk'ho

in Kenya: mukuriahungu, mûnjuga iria, ormukuna

(Crushed stem bark and fruit decoction taken to cure jaundice and liver troubles. Roots decoction taken against retained placenta; roots of *Sida rhombifolia*, *Urena lobata*, *Elaeagnus caudata* and stem bark and roots of *Bixa orellana* and *Randia dumetorum* pounded together and boiled in water, the extract taken to cure jaundice.)

in India: mirikatenga, sar-zuk-pui, sarzuk, sarzuk-pui

Elaeagnus commutata Bernh. ex Rydb. (*Elaeagnus argentea* Pursh, non Moench)

North America, Alaska. Perennial shrub, berries eaten

See *Flora of the Rocky Mountains* 582. 1917

(Febrifuge, for syphilis.)

in English: silverberry

Elaeagnus conferta Roxburgh (*Elaeagnus javanica* Blume)

India, China. Woody climber, scandent, thorny, straggling shrub, papery leaves, dull white flowers, red fruits edible

See *Fl. Ind.* 1: 460–461. 1820

(Fresh flowers decoction drunk for pain in the chest, astringent.)

in China: mi hua hu tui zi

in India: ambgool, bon jara, dieng snlangi, gewari, gowain, guara, gunnamada patte balli, hejjaala, hittele, hulige, hullgi, hunise balli, kayalampuvalli, kerahuli, khlor, kolungai, kulangi, kulari, mayle kollija, melekollija, mirica tenga, mirika, nurgi, soh shang

in Indonesia: areuj dudurenan, areuj susumunding, kakaduan

in Laos: hlood

in Thailand: malot, salot thao, somlot

in Vietnam: nhót

Elaeagnus heterophylla D. Fang & D. R. Liang

China.

See *Acta Phytotax. Sin.* 38(3): 292–293, pl. 1, f. 5–6. 2000

(Astringent, disinfectant, expectorant.)

in China: yi ye hu tui zi

Elaeagnus indica Serv.

India.

See *Bull. Herb. Boissier Sér.* II. viii. 393. 1908

(Root extract taken orally to cure diarrhea.)

in India: kologa

Elaeagnus infundibularis Momiyama

Nepal, India, Bhutan, Sikkim.

See *J. Jap. Bot.* 48(9): 262. 1973

(Flowers and fruits astringent and cardiac tonic, to stop bleeding; unripe fruits eaten for stomachache.)

in English: oleaster

in Nepal: gunyelo, madillo, madilo, mallido

Elaeagnus kologa Schldl.

India. Shrub, sweet ripe fruits edible

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 611. 1857

(Used in Sidha. Roots febrifuge, an extract drunk, and the paste applied all over the body.)

in India: ambagola, ambgul, gunna mada balli, gunnaamada balli, halage balli, hejjaale balli, hittele, hittele hulige, hittirlu balli, hulige hundase beelu, jeebha kaathri, kaaduhuli balli, kerehuli, kologa, kolungai, kulangi, kulanki, mele kollija, nildook, nurgi, perunkuliri, poolan palam

Elaeagnus latifolia L. (*Elaeagnus latifolia* Lour.)

Sri Lanka. Scandent shrub, straggling, climber, silvery to rusty leaves, white flowers, elliptic-oblong pinkish fruits, ripe fruits eaten

See *Species Plantarum* 2: 121. 1753, *Fl. Cochinch.* 1: 89. 1790, *FBI* [J.D. Hooker] 5: 202. 1886, *The Flora of British India* [J.D. Hooker] 5: 861. 1890

(Astringent, for cardiac pain, leaf decoction given in urinary troubles; pounded leaves squeezed and the juice in water drunk for urinary troubles. Flowers cardiac, astringent. Fruits astringent. Magic, ritual, flowers of *Elaeagnus latifolia* with roots of *Lasia spinosa* and *Machilus bombycina* pounded and made into pills used against sorceries.)

in English: oleaster, wild olive

in India: ambgul, bon-jara, chhokhua, dibaguda, hejjala, hittele, hulige, hunaseballi, hundasebilu, kairpuli, kayalampuvalli, kerahuli, kylambuvalli, leuchadia, melekollija, melikolaja, melikollaga, nildook, nurgi, safed buti, safedbuti, saulengi-a-rikang, tapot, the-tumda-araung

Elaeagnus pyriformis Hook.f.

Himalaya.

See *The Flora of British India* [J.D. Hooker] 5: 202. 1886

(Fruits eaten for constipation. Root paste taken for appendix ailments. Magic, contact therapy, leaf banded on the waist for appendix ailments.)

in India: dieng sashang, dieng sohblor, ram-sar-zuk, ropoating, soh shang khlor, zut

Elaeagnus triflora Roxb. (*Elaeagnus latifolia* L. var. *triflora* (Roxb.) Schldl.; *Elaeagnus philippensis* Perr.; *Elaeagnus philippinensis* Perr.)

Indonesia. Vine, edible fruits

See *Hort. Bengal.* 11. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 1: 459–460. 1820, *Mémoires de la Société Linnéenne de Paris* 3: 114. 1825, *Fl. Ind.*, ed. Carey, i. 439. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 14(2): 610. 1857

(Fruits astringent, for dysentery.)

in China: fei lü bin hu tui zi

in Indonesia: areuj dudureman, hail-hail, kelintju

in Philippines: alingaro, lingaro, banaken, suytuk

Elaeis Jacq. Arecaceae (Palmae)

From the Greek *elaia* 'olive, olive tree', referring to the oil from pericarp, see *Selectarum Stirpium Americanarum Historia* ... 280–282, pl. 172. 1763, *Praelectiones in ordines naturales plantarum* 42, 92. 1792, *Nova Genera et Species Plantarum* (quarto ed.) 1: 306–307. 1815[1816] and *Gentes Herbarum*; occasional papers on the kind of plants 3(2): 59, f. 32. 1933, *Ceiba* 19(1): 1–118. 1975, *Field Guide Palms Americas* 1–352. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 201–293. 2003, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. Kew. 2005.

Elaeocarpus aristatus Roxb.

India.

See *Flora Indica*; or, descriptions of Indian Plants 2: 599. 1832

(Stem bark juice mixed with coconut oil and made into a paste applied to cure pimples and skin diseases.)

in India: gangma-jachhang

Elaeocarpus buderi M.J.E. Coode

New Britain.

See *Brunonia* 1(2): 184. 1978

(The chewed bark used as a poison antidote.)

Elaeocarpus calomala Merr. (*Elaeocarpus calomala* (Blanco) Merr.)

Philippines. Tree, leaves alternate, flowers white fragrant in axillary racemes, fruit purplish to red-black smooth, rough hard stone, in primary forests

See *Philippine Journal of Science* 10: 43. 1915

(Fruit astringent.)

in Philippines: bongani, kalomala, kunakun

Elaeocarpus dentatus (J.R. Forst. & G. Forst.) Vahl (*Cassine dentata* (J.R. Forst. & G. Forst.) Kuntze; *Dicera dentata* J.R. Forst. & G. Forst.; *Elaeocarpus dentatus* Reinw. ex Pierre, nom. illeg.; *Elaeocarpus hinau* (J.R. Forst. & G. Forst.) A. Cunn.)

New Zealand. Forest tree, white flowers, petals notched, purple fruits with fleshy pulp enclosing a hard kernel, food

See *Characteres Generum Plantarum* [second edition] 80. 1776, *Symbolae Botanicae, ...* 3: 66. 1794, *Annals of Natural History* 4: 23. 1840, *Flore Forestière de la Cochinchine* t. 141. 1888, *Revisio Generum Plantarum* 1: 114. 1891

(Bark decoction in a bath for skin diseases.)

in English: Kirton wood, olive fruit

Maori names: hinau, kisi-hinau

Elaeocarpus floribundus Blume (*Elaeocarpus tahanensis* M.R. Henderson)

Java, India and Burma. Evergreen tree, bole with short buttresses, stipules early caducous, raceme below the leaves, petals white, in lowland rain forest

See *Bijdragen tot de flora van Nederlandsch Indië* 120. 1825 and *Gardens' Bulletin, Straits Settlements* 5: 74. 1930

(An infusion of the bark and leaves a mouthwash for inflamed gums; bark and leaves in a poultice for ulcers.)

in English: rugged oil-fruit

in India: chorphon, jalpai, jalpai

in Indonesia: hahauwan, kemesu

in Laos: ma moun, moun

in Malaysia: medang biawak, medang teja, medang telur

in Philippines: malangau

in Thailand: kalon, man som, muat doi

in Vietnam: c[oo]m tr[aa]u

Elaeocarpus glandulosus Wall. ex Merr. (*Elaeocarpus glandulosus* Wall.; *Elaeocarpus oblongus* auct., non Gaertn.; *Elaeocarpus tectorius* auct., non (Lour.) Poiret)

Peninsular India.

See *J. Arnold Arbor.* 32(2): 194. 1951 [14 Apr 1951]

(Antibacterial.)

Elaeocarpus graeffei Seem.

Fiji.

See *Journal of Botany, British and Foreign* 2: 76. 1864

(Stomachic.)

Elaeocarpus grandiflorus J. E. Smith (*Elaeocarpus bojeri* (Bojer ex Baker) R.E. Vaughan; *Elaeocarpus grandiflorus* Bojer; *Elaeocarpus grandiflorus* Bojer ex Baker, nom. illeg.; *Elaeocarpus lanceolatus* Blume)

Burma (Myanmar), Indochina to Thailand. An evergreen tree, leaves lanceolate, lax raceme between the leaves, sepals lanceolate bright red, petals pure white, drupe acuminate, stone covered with recurved slender spines, in evergreen forest, along streams on riverbanks

See *The Cyclopaedia*; or, Universal dictionary of arts, sciences, and literature 12: 5. 1809, *Hortus Maurit.* 45. 1837, *Flora of Mauritius and the Seychelles ...* 33. 1877 and *Mauritius Institute Bulletin* 1(1): 17. 1937

(Poisonous. Fruit decoction a mild diuretic. Crushed bark for poulticing persistent ulcers; a decoction of the leaves drunk as a general tonic; seeds mild diuretic, to relieve bladder stones and painful urination in general.)

in Burma (Myanmar): ye-saga

in Indonesia: anjang-anjang, anyang-anyang, ki ambit, maitan

in Malaysia: ando, andor

in Philippines: mala

in Thailand: khrai yoi, mun nam, phi nai

in Vietnam: c[oo]m hoa l[ows]n, c[oo]m n[uw][ows]c

Elaeocarpus grandis F. Muell.

Australia. Rainforest tree, buttressed, hard white timber, open crown, glossy red-green leaves with greenish white flowers, edible fruits

See *Fragmenta Phytographiae Australiae* 2: 81. 1860 and *J. Nat. Prod.* 69(9): 1295–1299. 2006

(Indolizidine alkaloids, grandisines, showed receptor binding affinity for the human delta-opioid receptor.)

in English: blue marble tree, blue quandong

in Samoa: siapo atua

Elaeocarpus griffithii A. Gray

Borneo. Tree

See *United States Exploring Expedition* Phan. Vol. 15, Part 1: 203. 1854 [*United States Exploring Expedition*. During the years 1838, 1839, 1840, 1841, 1842. Under the Command of

Charles Wilkes, U.S.N. vol. XV. *Botany. Phanerogamia* by Asa Gray with a Folio Atlas of 100 Plates. Part 1. Philadelphia]

(Bark decoction drunk to treat malaria and fevers.)

Elaeocarpus lanceolatus Blume (*Elaeocarpus lanceolatus* Wall.)

India.

See *Bijdragen tot de flora van Nederlandsch Indie* 3: 119. 1825, *Numer. List* [Wallich] 2667. 1831

(Used in Sidha.)

in India: rudraksham, uruttiratcam, uttiratcam

Elaeocarpus mastersii King

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 60(1): 139. 1891

(The pulped leaves applied to treat headache; an infusion of bark scrapings drunk for fever, and crushed young leaves are applied to the forehead as a headache treatment.)

Elaeocarpus oblongus Gaertn. (*Elaeocarpus malabaricus* (Gaertn.) Oken; *Elaeocarpus oblongus* Gaertn. ex Sm.; *Elaeocarpus oblongus* Wall.)

India. Fruits eaten

See *The Cyclopaedia; or, universal dictionary of arts, ...* 12: 2. 1820, *Numer. List* [Wallich] n. 2677. 1831, *Allgemeine Naturgeschichte* 3(2): 1194. 1841

(Fruit used as an emetic to induce vomiting and for rheumatism, pneumonia, ulcers, leprosy, dropsy and piles. Ceremonial.)

in India: bike, bikki, hanaltadi, hanillatade, hennalalade, kasa, kattakara, malamkara, malankara, malankarai

Elaeocarpus obtusus Blume

SE Asia, Malaya.

See *Catalogus Gew. Buitenzorg ...* (Blume) 78. 1823, *Bijdr. Fl. Ned. Ind.* 3: 123. 1825

(For stings, pound the leaves with salt and poultice.)

Malay name: chempa

Elaeocarpus petiolatus (Jack) Wallich ex Steud. (*Elaeocarpus petiolatus* (Jack) A. Gray; *Elaeocarpus petiolatus* Wall.; *Elaeocarpus petiolatus* (Jack) Wall.; *Monocera petiolata* Jack)

Malaysia. Tree, bole with short steep buttresses, granular yellow inner bark, apical buds coated with resin

See *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 176. 1816, *Malayan Miscellanies* 1(5): 43. 1820, *Numer. List* [Wallich] no. 2673. 1831, *Nomenclator Botanicus*. Editio secunda 1: 545. 1840–1841, *U.S. Expl. Exped., Phan.* 1: 203. 1854 and *Kew Bulletin* 53(1): 110. 1998

(Juice from the leaves drunk and used as an application for sunstroke; juice of leaves used in treatment of malaria as an application for fever; a preparation from the roots may be administered to treat fever.)

in China: chang bing du ying

Elaeocarpus serratus L. (*Elaeocarpus oblongus* Gaertn.; *Elaeocarpus oblongus* Gaertn. ex Sm.; *Elaeocarpus oblongus* Wall.; *Elaeocarpus perim-kara* DC.; *Elaeocarpus perincara* Buch.-Ham.; *Elaeocarpus perincara* F. Hamilton; *Elaeocarpus serratus* Roxb. ex Wall.; *Elaeocarpus serratus* Retz.; *Elaeocarpus serratus* L.f.; *Elaeocarpus serratus* Benth.)

India, Sri Lanka. Evergreen tree, white showy fragrant flowers, edible fruits

See *Species Plantarum* 1: 515. 1753, *Suppl. Pl.* 266. 1782 [1781 publ. Apr 1782], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 519. 1824, *Numer. List* [Wallich] n. 2666 A, B, 2677. 1831, *Trans. Linn. Soc. London* 17(2): 181. 1835 [1837 publ. 25 May 1835], *Hooker's J. Bot. Kew Gard. Misc.* 3: 264. 1851 and *Taxon* 26(5–6): 530. 1977, *Kew Bulletin* 56(2): 434. 2001

(Used in Ayurveda and Sidha. Fruits antibacterial, antidote, astringent, given for diarrhea, dysentery. Leaves to cure rheumatism and antidote to poisoning. Veterinary medicine, bark of *Elaeocarpus serratus* pounded with fruits of *Capsicum frutescens* given orally as a tonic.)

in English: Ceylon olive

in India: aravata, athakunge, avil, beejada mara, bigada, changa balli, chiribilva, chorphon, ciribilvah, guddada rambe, guddada renji, guddarenje, haanillatada, hanalthadil, henalthade, hennalathade, jalpai, jolopai, kaarmavu, kanamaram, kara, karai, karamaram, karamavu, kattukkarai, kyasatthe, nallakara, olang-karai, olankarai, perin-kara, perinkara, perunkara, pikki, rahubija, rudraksham, saelamarai, selamaram, ulan karei, ulangarai, ulangkarei, ulankarai, uruttiracham, uruttiratcam, uttraccham, valiakarai, valiayakara, valyakara

in Japan: Seiron-oribu (= Ceylon olive)

in Sri Lanka: weralu

Elaeocarpus sphaericus (Gaertn.) K. Schum. (*Elaeocarpus ganitrus* Roxb.; *Elaeocarpus ganitrus* Roxb. & G. Don; *Elaeocarpus sphaericus* Schum.; *Ganitrus sphaerica* Gaertn.)

India. Tree, straight, entire glabrous leaves, white flowers in dense racemes, globose-ovoid bright blue or purple drupes, grooved tuberculated stone, fleshy mesocarp eaten

See *De Fructibus et Seminibus Plantarum...* 2: 271 t. 139. 1791, *Hortus Bengal.* 42. 1814, *Gen. Hist.* 1: 559, descr. 1831, *Fl. Ind.* 2: 592. 1832, *FBI* 1: 400. 1874, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 6. (1890) 5. 1890, *Das Pflanzenreich* 3(6): 5. 1895 and *Adansonia* II, 20(2): 169–177. 1980

(Used in Ayurveda. Antimicrobial sap diluted with water drunk to cure stomachache or pains in the chest. Fruit used for mental diseases, epilepsy, asthma, hypertension, arthritis and liver diseases; for smallpox, powder of the dry fruits of *Capsicum annuum* with seeds of *Elaeocarpus sphaericus*. Religion, superstitions, magico-religious beliefs, very sacred to grow this tree near the house; it fulfills all the desires of the wearer, it gives wealth, health and long life to its wearer; fruits used as necklace and worn to remain mentally stable. Ritual, nuts used during mental chartings, *mantras*; stony seeds to control evil spirits and to purify soul. Magic, contact therapy, blood pressure is controlled by keeping seeds in contact with the body; stones tied round the loins of babies and children to protect from evil spirits.)

in English: bead tree of India, India oil-fruit, olive nut, ultrasum bead tree, utrasum bead tree

in India: bada rudraksha, bhutanasaana, lekam-araung, ludrot, rudraaksham, rudrachallu, rudrai, rudrak, rudraka, rudrakh, rudraki, rudraks, rudraksa, rudraksah, rudraksam, rudraksh, rudraksha, rudraksham, rudrakshe mara, ruttiratcam, udraaka, udrok

Malayan names: changkan, genitri

in Nepal: rudraccha, rudrakshya

in Papua New Guinea: qozari, yumbi

in Tibetan: ru-dra-ksa, rudraksa

Elaeocarpus stipularis Blume

Burma. Tree, bole with stilt roots, 3–5 lobed stipules, leaves velvety hairy below

See *Bijdragen tot de flora van Nederlandsch Indië* 3: 121. 1825

(The pulped leaves to poultice sores.)

Elaeocarpus tuberculatus Roxb. (*Monocera tuberculata* (Roxb.) Wight & Arn.)

India.

See *Hort. Bengal.* 93. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 594. 1832, *Cat. Ind. Pl.* 18. 1833, *Prodr. Fl. Ind. Orient.* 1: 83. 1834

(Used in Ayurveda and Sidha. Decoction of the bark used as a remedy for rheumatism, indigestion and biliousness; stem bark paste given for inducing abortion until the third month of pregnancy; stem bark ground with that of *Ziziphus xylopyrus* given after delivery as an antiseptic, postpartum remedy. Fruits and seeds a treatment for rheumatism, typhoid fever and epilepsy.)

in India: ammakaram, badraksham, bhoothaali mara, bhootharudraakshi, carpparatciyam, cataivanni, cataivanimaram, daandla mara, danala, dandala, dandele, dandele bhutali, dandele mara, dandla, dandla mara, kaadambola, kadambola, kara, kende mara, kodavasi, kotuvasi, kume,

kunge mara, malampinnai, mukkanni, muttummi, nagara, nakara, navadi, navati, nengina knothu, nenjina kontu, pagumbal, pahumban, pakumpul, pathrachi, pilahi, pillahi, pulandi, pulanthi, roodrack, rudracham, rudrak, rudraksha, rudraksham, rudrakshi, rutthracham, rutthraksham, ruttracham, staguda mara, uruttiratcam, uruttracham, vellathaanni

Elaeodendron Jacq.f. Celastraceae

Greek *elaia* 'olive' and *dendron* 'a tree', the fruits are like the olives, seeds exarillate; see *Icones Plantarum Rariorum* [Jacquin] 1: 3, pl. 48. 1782, *A Voyage to Terra Australis* 2: 554. 1814, Nicolaus (Nicolaas) Joseph von Jacquin (1727–1817), in *Nova acta helvetica, physico-mathematico-botanico-medica*. 1: 36. Basel 1884 and *Fieldiana, Bot.* 24(6): 201–218. 1949, *South African Journal of Botany* 64: 93–109. 1998. See also genus *Cassine* L.

Elaeodendron buchananii (Loes.) Loes. (*Cassine buchananii* Loes.; *Elaeodendron afzelii* Loes.; *Elaeodendron friesianum* Loes.; *Elaeodendron keniense* Loes.; *Elaeodendron stolzii* Loes.; *Elaeodendron warneckei* Loes.)

Central Africa. Small to large tree, round crown, orange under bark, leaves dark green, in small stalked clusters in the axils of the leaves small fragrant yellowish-green flowers, ripe fruits greenish-orange and very hard, immature fruit light green

See *Species Plantarum* 1: 268. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 551. 1893, *Die Natürlichen Pflanzenfamilien Nachtr.* [Engler & Prantl] 1: 223. 1897 and *Journal of Ethnopharmacology* 25(3): 339–359. 1989, *Journal of Ethnopharmacology* 122: 273–293. 2009

(Very toxic plant, leaves poisonous. Bark on wounds. Powdered roots applied on wounds, used also for venereal diseases. Leaf chewed, juice for diarrhea and dysentery; leaves decoction for cough. Roots and leaves astringent, antibacterial, for diarrhea, skin diseases. For onychomycosis crushed fruit applied on the affected site. Veterinary medicine, leaves stimulant.)

in East Africa: enkanda, murundu, mutanga, mutanya, mutimweru, sawanet, sunwa

in Kenya: saonet, saunet

in Rwanda: umusabanyana

in Tanzania: mhakumo, mkangazi, mnenekanda

in Uganda: miira

Elaeodendron croceum (Thunberg) DC. (*Cassine crocea* (Thunb.) Kuntze; *Cassine papillosa* (Hochst.) Kuntze; *Elaeodendron capense* Ecklon & Zeyher; *Elaeodendron papillosum* Hochst.; *Ilex crocea* Thunb.) (the specific epithet from the Latin *croceus, a, um* 'saffron-colored, yellow')

South Africa. Tree, sepals and petals green and white, tiny inflorescences

See *Flora Capensis* 1: 577. 1813, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 11. 1825, *Revisio Generum Plantarum* 1: 114. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 39: 41. 1965, *Flowering Plants of Africa* 54: 58–62. 1995

(Preparations of the root and bark have proved to be fatal to humans.)

in English: saffron, common saffron, saffron wood, yellow wood

in Southern Africa: geelhout, umbovani, umkulu

in S. Rhodesia: muKute, umKukutu, umGugutu

Elaeodendron glaucum (Rottb.) Pers. (*Celastrus glaucus* (Rottb.) Vahl; *Elaeodendron glaucum* (Vahl) Pers.; *Elaeodendron glaucum* Pers.; *Elaeodendron glaucum* Szyszyl., nom. illeg.; *Elaeodendron roxburghii* Wight & Arn.; *Euonymus grossa* Wall.; *Mangifera glauca* Rottb.)

India, Tropical Himalaya. Tree, red bark exuding a watery sap, green-whitish flowers

See *Polypetalae disciflorae Rehmannaianae* 2: 36. 1888, *Revisio Generum Plantarum* 1: 114. 1891

(Used in Ayurveda and Sidha. Emetic, a decoction of leaves, bark and seeds is poisonous. Roots antidote for snakebite.)

in English: Ceylon tea

in India: ade, aranbilur, bakra jamrasi, bhutapala, bhuthankusam, bhutankusamu, bira, bira bhutankusamu, booligi, bootigi, botigi, burkas, butapala, celuppai maram, cheluppai-marm, chilru, dhebri, irgoli, irkuli, jamrassi, janga, kanemis, kanire, kanneri, kannilu, kanniramaram, kannire, kanniru, kannurmara, karrukuva, karukuvu, karuniraka, karunirraga, karuvali, keeri, kiri, knannirai, mirgu, mookurichi, morindu, mukariki, mukarive, mukarti, mukkarite, mukkarive, naraddi, neerija, neraddi, neradi, nerasi, nerdi, neridi, neridza, nerija, nerinja, nevadi, nigru, niradi, niradzi, nirasi, niridi, niridza, nirija, niriji, pieri, pisitondoro, selupa, seuppai, tamruj, veeri, yerrajirri

Elaeodendron stuhlmannii Loes. (*Cassine stuhlmannii* (Loes.) Blakelock)

East Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 156. 1900, *Kew Bulletin* 11: 555. 1957

(Very poisonous, used for *Ancylostoma* infestation.)

in East Africa: mtuwilang'holo

Elaeodendron transvaalense R.H. Archer

South Africa. Tree, small greenish white flowers borne in clusters, yellow edible fruits

See *South African Journal of Botany* 64: 105. 1998

(Bark infusion for stomach problems and fever.)

in English: bushveld saffron

in South Africa: bosveldsaffraan, iNgwavuma, lepelhout, Monamane, Shimapana, uMgugudo

Elaeodendron zeyheri (Sond.) Turcz. (*Celastrus zeyheri* Sond.; *Elaeodendron zeyheri* Turcz.; *Gymnosporia zeyheri* (Sond.) Szyszyl.; *Maytenus zeyheri* (Sond.) Loes.)

South Africa. Evergreen tree, small greenish flowers in axillary clusters, fleshy fruits

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 452. 1858, *Flora Capensis* 1: 457. 1860, *Polypetalae disciflorae Rehmannaianae* 33. 1888

(Root believed to be poisonous.)

in English: small-leaves saffron

in South Africa: fynblaarsaffraan

Elaeophorbia Stapf Euphorbiaceae

From the Greek *elaia*, *elaion* 'olive, olive-oil' and *phorbe* 'food', or *elaia* and the genus *Euphorbia*, referring to the fleshy fruits, see *The Known Plants of Liberia* 2: 646. 1906, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Elaeophorbia drupifera (Thonn.) Stapf (*Elaeophorbia drupifera* Stapf; *Euphorbia drupifera* Thonn.; *Euphorbia drupifera* (Thonn.) Stapf)

Ghana, Nigeria, Ivory Coast. Tree, white latex, yellowish flowers

See *Beskrivelse af Guineeske planter* 250. 1827 and *Hooker's Icones Plantarum* 29: t. 2823. 1906 [1909 publ. Dec 1906]

(Poisonous. Latex and leaves antidote, analgesic for local pain relief, purgative, for cough, Guinea worms, ringworm, snake and scorpion bites, sore, warts.)

in Nigeria: oro adete (Yoruba)

Elaphoglossum Schott ex J. Sm.

Lomariopsidaceae (Dryopteridaceae)

From the Greek *elaphos* 'a stag, deer' and *glossa* 'tongue', referring to the shape of the simple, tongue-like fronds; see *Gen. Fil.* [Schott] ad t. 14. 1834, *Abh. Königl. Bohm. Ges. Wiss.*, ser. 4, 5: 236. 1836, *Tentamen Pteridographiae* 236, t. 10, f. 17. 1836, *Filicum Species* 147. 1841, J. Smith, in *Hooker's Journal of Botany*. 4: 148. 1841, *Mémoires sur les Familles des Fougères* 2(*Hist. Acrostich.*): 14, 20, 90. 1845, *Bot. Mag.* 72(Companion): 18. 1846, *Epimeliae Botanicae* 161. 1849, *Abhandlungen der Königlichen Böhmischen*

Gesellschaft der Wissenschaften, ser. 5 6: 520–521, 536. 1851, *Neue Denkschriften der Allgemeinen Schweizerischen Gesellschaft für die Gesammten Naturwissenschaften* 23. 1899 and *American Fern Journal* 45: 13. 1955, *Fern Gaz.* 11(2–3): 141–162. 1975, *American Fern Journal* 70(2): 57, 59–60, 62, 64–66. 1980, *Fieldiana, Bot.*, n.s. 27: 110–166. 1991, *Brenesia* 62: 1–14. 2004, *Botanical Journal of the Linnean Society* 165: 20–63. 2011.

Elaphoglossum minutum (Pohl ex Fée) T. Moore (*Acrostichum conforme* var. *alpinum* J. Bommer ex H. Christ; *Acrostichum gayanum* Fée; *Acrostichum leptophyllum* Fée; *Acrostichum minutum* Pohl ex Fée; *Acrostichum unitum* Bory ex Fée; *Elaphoglossum gayanum* (Fée) T. Moore; *Elaphoglossum leptophyllum* (Fée) T. Moore; *Elaphoglossum minutum* (Pohl ex Fée) H. Christ; *Elaphoglossum minutum* (Pohl) T. Moore)

South America. Creeping fern, climbing

See *Species Plantarum* 2: 1067–1072. 1753, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 4: 148. 1841, *Mémoires sur les Familles des Fougères* 2: 39, 44–45, t. 10, 17. 1845, *Index Filicum* (T. Moore) 11–12. 1857, *Bulletin de la Société Botanique de Belgique* 35(1): 242. 1896 and *Bulletin de l'Herbier Boissier*, sér. 2, 5(1): 10. 1905, *Syst. Geogr. Pl.* 76: 180. 2006

(Rhizome cooked with milk and taken for rheumatism.)

in Ecuador: calaguala

Elateriospermum Blume Euphorbiaceae

From the Greek *elaterios* ‘driving, driving away’, *elauno* ‘to drive away, to cut off, set in motion’ and *sperma* ‘seed’, referring to the laxative seeds, see *Bijdragen tot de flora van Nederlandsch Indië* 12: 620. 1826.

Elateriospermum tapos Blume (*Elateriospermum rhizophorum* Boerl. & Koord.)

Thailand, Malesia. Tree, bluish-white latex

See *Bijdr. Fl. Ned. Ind.* 12: 621. 1826 and *Syst. Verz.* (Koord.-Schum.) 2: 28. 1910

(Hydrocyanic acid poisoning. Latex applied on cracked sole of the foot.)

in Malaya: buah perah, perah, prah

in Sarawak: kelampai, rapi

Elatostema Forster & Forst.f. Urticaceae

From the Greek *elatos* ‘driving, striking’, *elauno* ‘to drive away’ and *stema* ‘stamen, penis’, referring to the inflexed and reflexing or springing up stamens or to the fruits ejected by the staminodes; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. [second edition] 105, t. 53. 1775 and

Bull. Bot. Lab. N. E. Forest. Inst., Harbin 1980(7): 22–23, 27–29, 34, 40, 44–47, 56–59, 66, 72–75, 81–82, 86–89. 1980.

Elatostema banahaense C.B. Rob.

Philippines.

See *The Philippine Journal of Science*. Section C, *Botany*. Manila 5: 526. 1910 (publ. 1911)

(Against itch, scabies.)

Elatostema cyrtandrifolium (Zollinger & Moritzi) Miquel (*Procris cyrtandrifolia* Zoll. & Moritzi)

China.

See *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842–1844* 74. 1846, *Plantae Junghuhnianae* 1: 21. 1851, *Prodromus Monographiae Scitaminearum* 16(1): 173. 1869 and *Fl. Reipubl. Popularis Sin.* 23(2): 267. 1995

(Sedative.)

in China: rui chi lou ti cao

Elatostema integrifolium (D. Don) Wedd. var. ***integrifolium*** (*Elatostema sesquifolium* (Reinw. ex Blume) Hassk.; *Elatostema sesquifolium* var. *integrifolium* (D. Don) Wedd.; *Elatostema viridicaule* W.T. Wang; *Procris integrifolia* D. Don; *Procris sesquifolia* Reinw. ex Blume)

SE Asia. Shrubs, white flowers in axillary clusters

See *Bijdragen tot de flora van Nederlandsch Indië* 10: 511. 1825, *Prodromus Florae Nepalensis* 61. 1825, *Catalogus Plantarum in Horto Botanico Bogoriensi Culturarum Alter* 79. 1844, *Archives du Muséum d'Histoire Naturelle* 308. 1856, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(1): 179. 1869 and *Bulletin of Botanical Research* 3(3): 62–63, f. 7. 1983

(Leaves poultice applied for abdominal disorders.)

in China: quan yuan lou ti cao

Elephantopus spicatus Juss. ex Aublet (*Distreptus spicatus* (B. Juss. ex Aubl.) Cass.; *Matamoria spicata* La Llave; *Pseudelephantopus spicatus* R. Br.; *Pseudelephantopus spicatus* Rohr; *Pseudelephantopus spicatus* Rohr ex B.D. Jacks.; *Pseudelephantopus spicatus* (Juss. ex Aublet) Rohr, nom. nud.; *Pseudelephantopus spicatus* (B. Juss. ex Aubl.) C.F. Baker; *Pseudelephantopus spicatus* (B. Juss.) Gleason; *Pseudelephantopus spicatus* (Juss. ex Aubl.) Rohr ex Gleason)

Tropical America. Herb, erect, strong taproot, leaves in a radical rosette, long lax terminal spike, corolla white, in waste places

See *Histoire des plantes de la Guiane Française* 2: 808. 1775, *Skrifter af Naturhistorie-Selskabet* 2(1): 214–216. 1792, *Dictionnaire des Sciences Naturelles* [Second edition] 13: 367. 1819, *Novorum Vegetabilium Descriptiones* 1: 8. 1824, *Nomencl. Bot.* [Steudel], ed. 2. 2: 405. 1841, *Index Kewensis* 1: 638. 1893 and *Transactions of the Academy of Science of St. Louis* 12(5): 45, 55, 56. 1902, *Taxon* 30: 492. 1981

(Hepatoprotective. Used for fever, liver complaints, colds, heat, heart troubles, stomachache, diarrhea, dysentery and venereal disorders; roots ground up and mixed with warm water, women take prior to childbirth for pain. Leaves vulnerary, used topically to treat eczema, sprains.)

in English: bulltongue bush, devil broom, false elephant's foot

in Panama: canasacanga, candeabsurguit

in Philippines: ardatag, dila-dila, dilang-aso, dilang-usa, kal-kalapikap, maratabako, supsuput

in Vietnam: ch[aa]n voi gi[es]

Elephantorrhiza Benth. Fabaceae (Mimosaceae, Mimoseae)

Greek *elephas*, *elephantos* ‘elephant’ and *rhiza* ‘root’, some members of the genus have a large underground stem, see *Journal of Botany*, being a second series of the *Botanical Miscellany* (Hooker) 4(31): 344–345. 1841 and *Bothalia* 1: 187–193. 1923, *Bothalia* 11(3): 247–257. 1974.

Elephantorrhiza burkei Benth. (*Elephantorrhiza burkii* Benth.; *Elephantorrhiza elephantina* (Burch.) Skeels var. *burkei* (Benth.) Merr.; *Elephantorrhiza elephantina* var. *burkei* (Benth.) J.F. Macbr.)

Botswana, Mozambique, South Africa, Zimbabwe. Perennial non-climbing tree, shrub or small tree, cream or yellow flowers

See *London Journal of Botany* 5: 81. 1846 and *Contributions from the Gray Herbarium of Harvard University* 59: 18. 1919, *Fl. Plants of Africa* 47: pl. 1860. 1981

(Bark astringent, antimicrobial.)

Elephantorrhiza elephantina (Burch.) Skeels (*Acacia elephantina* Burch.; *Acacia elephantorrhiza* DC.; *Acacia elephantorrhiza* Burchell ex DC.; *Elephantorrhiza burchellii* Benth.; *Elephantorrhiza dinteri* E. Phillips; *Prosopis elephantina* (Burch.) E. Mey.; *Prosopis elephantina* E. Mey.; *Prosopis elephantorrhiza* Spreng.; *Prosopis elephantorrhiza* (DC.) Spreng.)

South Africa, Mozambique. Perennial non-climbing shrub or subshrub, low growing suffrutex, quite variable, massive underground rhizomatous system with red tubers, branched root system, yellow flowers in axillary spike and catkin-like racemes, long narrow woody straight or slightly curved pods eaten by people and animals

See *The Gardeners Dictionary ... Abridged ... fourth edition* 1: *Acacia*. 1754, *Travels in the interior of South Africa* 2: 236. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 457. 1825, *Systema Vegetabilium*, editio decima sexta 4: Cur. Post. 165. 1827, *Commentariorum de Plantis Africae Australioris* 165. 1836 and *U.S. Department of Agriculture. Bureau of Plant Industry. Bulletin*. 176: 29. 1910, *Journal of Ethnopharmacology* 33: 237–242. 1991, *Journal of the South Africa Veterinary Association* 72: 189–196. 2001, *South African Journal of Science* 97: 375–379. 2001, *Journal of Ethnopharmacology* 105: 286–293. 2006

(Seed toxic to sheep, rabbits and guinea-pigs. Antibacterial, rhizome a general remedy for skin diseases, acne, diarrhea, dysentery, stomachache, painful menstruation, hemorrhoids; roots for dysentery, diarrhea, febrile complaints; roots infusion taken by women against infertility and as an aphrodisiac. Veterinary medicine, rhizome a remedy for intestinal and abdominal complaints, diarrhea, pneumonia, heartwater disease, given to cows for mange, ringworm; roots for diarrhea and dysentery in cattle and horses.)

in English: eland’s bean, eland’s wattle, elephant’s root

in Southern Africa: baswortel, chizezepasi, elandsboontjie, elandswortel, intololwana, intolwane, inTolwane, intolwane encinyane, leerbossie, leshitsana, looiersboontjie, looiersbos, looierswortel, mosesethlane, mositsane, mupangara, muPan-gara, olifantswortel

Elephantorrhiza goetzei (Harms) Harms (*Piptadenia goetzei* Harms)

Angola, South Africa. Perennial non-climbing tree, small tree

See *Engl. Pflanzenw. Afr.* iii. I. (Engl. & Drude, *Veg. der Erde*, ix.) 400 (1915), in obs. 1915, *Fitoterapia* 70(4): 412–416. 1999, *Fitoterapia* 72(6): 649–655. 2001, *Pure Appl. Chem.* 73(7): 1197–1208. 2001, *Journal of Ethnopharmacology* 74: 257–264. 2001

(Antimicrobial, anthelmintic, used as a remedy for sores of the penis and vulva, irregular menstruation, and for cleansing the womb after abortion. Tannin-rich roots as a fish poison.)

Elephantorrhiza suffruticosa Schinz

Namibia, Mozambique. Perennial non-climbing tree, small tree or shrub, tuberous caudex, pinnate foliage, creamy to golden yellow flowers in axillary spikes, linear-oblong to linear pod, eaten by baboons

See *Mémoires de l’Herbier Boissier* 1: 117. 1900, *Journal of the Namibia Scientific Society* 25: 5–44. 1971

(Rhizome applied against constipation and diarrhea.)

in English: skew-leaved elephant-root

in Namibia: mparara, omundjoze, otjite

in South Africa: looierswortel, looiwortel, looiwortelbos

Elettaria Maton Zingiberaceae

From a Malayalam vernacular name in Kerala for the cardamom, used by van Rheede in *Hortus Indicus Malabaricus*. 11: t. 5. 1692; see William George Maton (1774–1835), in *Transactions of the Linnean Society of London. Botany*. 10: 250. 1811.

Elettaria cardamomum (L.) Maton (*Alpinia cardamomum* (L.) Roxb.; *Alpinia cardamomum* Roxb.; *Amomum cardamomum* Willd.; *Amomum cardamomum* L.; *Amomum cardamomum* J. Koenig; *Amomum ensal* Raeusch.; *Amomum racemosum* Lam.; *Amomum racemosum* Ruiz & Pav.; *Amomum repens* Sonn.; *Amomum uncinatum* Stokes; *Cardamomum elletari* Garsault; *Cardamomum malabaricum* Pritz.; *Cardamomum minus* (Gaertn.) in Tibetan: sug-smel, sug smel, su-ksme

Elettariopsis Baker Zingiberaceae

Resembling the genus *Elettaria*, see *The Flora of British India* [J.D. Hooker] 6(18): 251. 1892.

Elettariopsis curtisii Baker (*Cyphostigma curtisii* (Baker) K. Schum.; *Cyphostigma diphyllum* K. Schum.; *Cyphostigma latiflorum* (Ridl.) K. Schum.; *Cyphostigma serpentinum* (Baker) K. Schum.; *Elettariopsis diphylla* (K. Schum.) Loes.; *Elettariopsis serpentina* Baker)

Thailand to Malaya, Borneo.

See *Fl. Brit. India* [J.D. Hooker] 6: 252. 1892 and *Pflanzenr.*, IV, 46: 272, 274. 1904, *Nat. Pflanzenfam.* ed. 2, 15a: 603. 1930

(Plant decoction a postpartum remedy.)

Malay name: tepus wangi

Elettariopsis triloba (Gagnep.) Loes. (*Amomum trilobum* Gagnep.; *Elettariopsis trilobum* (Gagnep.) P.H. Hô)

Vietnam.

See *Bulletin de la Société Botanique de France* 51: 453. 1904, *Die natürlichen Pflanzenfamilien, Zweite Auflage* [Engler & Prantl] 15a: 603. 1930

(Plant decoction a postpartum remedy.)

Malay name: tepus wangi

Eleusine Gaertner Poaceae (Gramineae)

From Eleusis, a very ancient city and deme (a township or division, a commune) of Attica, famous for the mysteries of Ceres, about 14 miles northwest of Athens; to the west of the town lay the Rharian, where Demeter, the Greek goddess of earth's fruits, was said to have sown the first seeds of corn; Demeter (Ceres for the Romans) was the daughter of Cronus and Rhea, and sister of Zeus, by whom she became the mother of Persephone; see *De Fructibus et Seminibus Plantarum ...* 1: 7. 1788, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 75. 1813, *Rel. Haenk.* 1: 273. 1830 and *Contributions from the United States National Herbarium* 12(6): 183–258,

(Used in Ayurveda and Sidha. Cyanogenic or hydrogen cyanide toxic, can be poisonous to stock, has been recorded as causing the deaths of calves and sheep. Plant used by women in childbirth, pound the leaves and give the juice to drink to promote the discharge of the afterbirth. Whole plant uprooted, washed and chewed for the treatment of diarrhea and dysentery; entire plant boiled and used to treat sprains, fevers. Roots with pepper and ginger given to cure snake-bite; roots infusion for diarrhea; leaf paste of *Uncaria macrophylla* mixed with the rhizome of *Eleusine indica* applied externally in bone fracture. Infusion of macerated leaves drunk as a remedy for urine retention, infusion eases vaginal bleeding; leaf infusion for dysentery.)

(Astringent, tonic, stimulant.)

in China: lun san wu jia

Elionurus Humb. & Bonpl. ex Willd. Poaceae (Gramineae)

From the Greek *heleios* ‘dor-mouse’ (Aristoteles, *Historia animalium*. 600b 12 etc.) and *oura* ‘a tail’, the old racemes are like the tail of a dor-mouse; or from *elyo* ‘to cover, to wind’ and *oura*, referring to the nature of the glume; or from *elyein* ‘to roll’ and *oura*, alluding to the racemes, curling when old, close to *Loxodera* Launert; see Carl L. von Willdenow, *Species Plantarum. Editio quarta* 4(2): 941–942. 1805 [1806], *Nov. Gen. Sp.* 1: 192. 1815, *Mémoires du Muséum d'Histoire Naturelle* 2: 69. 1815 [1816], *Nomenclator Botanicus. Editio secunda* 1: 257. 1840, *Flora* 39: 90. 1856 and *Kew Bulletin* 32: 665–675. 1978, *Flora Mesoamericana* 6: 395–396. 1994, *Flora of Ethiopia and Eritrea* 7: 356–359. 1995, *Taxon* 47: 737–738. 1998 [P.M. Peterson et al., “Proposal to conserve the name *Elionurus* (Poaceae, Andropogoneae) with that spelling.”], *Gramineas de Bolivia* 611–614. 1998, *Taxon* 49: 273. 2000 [R.K. Brummitt, “Report of the Committee for Spermatophyta: 49.”], *Contributions from the United States National Herbarium* 46: 144, 225–230, 246. 2003.

Northern America. Perennial bunchgrass, loosely tufted, tall, greenish, coarse, robust, erect, shortly rhizomatous, clump-forming, roots fibrous, culms hollow, stems tough and woody at maturity, auricles present, ligules finely hairy, smooth sheaths open to the base, leaves scabrous bluish-green to green, leaf blade flat and pointed, terminal spikes arching and bristly, two spikelets to a node, greenish flowers, narrow glumes slightly roughened and stiff, lemmas lanceolate and rough, awns curved and sharp, ornamental, good ground cover for dry sunny slopes, can be used for binding sand dunes, useful for erosion control, self-seeding tendencies, foliage and spikes turn tan in fall, when young is palatable to all classes of livestock, drought tolerant, naturalized in prairie, usually found dry habitats, in a disturbed part of a sand prairie, in open woods, gravelly banks of rivers, fields, stream banks and waste areas, disturbed roadsides, in moist to sandy meadows, chaparral, desert grasslands, in wetlands or non-wetlands, alluvial woods, sandy beaches, dry sandy gravelly or rocky soil, hybridizes with slender wheatgrass (*Elymus trachycaulus* (Link) Gould ex Shinners), Texas wildrye (*Elymus interruptus* Buckl.) and Virginia wildrye (*Elymus virginicus* L.)

Northern America, USA, Canada. Perennial, lemmas unawned or with short awns, useful for erosion control, fodder, forage, occurs under dry and moist conditions, in wetlands or non-wetlands, open soils, subalpine forest, chaparral

See *Species Plantarum* 1: 86. 1753, *Essai d'une Nouvelle Agrostographie* 102, 146, 180, t. 20, f. 2. 1812

(Veterinary medicine, leaves used as emetic for dogs.)

in English: slender wheatgrass

Elytranthe (Blume) Blume Loranthaceae

From the Greek *elytron* 'a sheath, a cover' and *anthos* 'flower', apparently referring to the shape of the corolla; see Johann Jakob Roemer and Josef August Schultes, *Systema Vegetabilium*. 7: 1611, 1730. 1830, *Flora Javae* 16. 1830.

Elytranthe globosa (Roxb.) G. Don (*Elytranthe globosa* Blume; *Elytranthe globosa* Engl.; *Loranthus globosus* Roxb.)

Malaysia.

See *Hort. Bengal.* 25. 1814, *Fl. Ind.*, ed. Carey & Wall., ii. 206. 1824, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 7(2): 1730. 1830, *Fl. Ind.*, ed. Carey, i. 550. 1832, *Gen. Hist.* iii. 426. 1834, *Nat. Pflanzenfam.* [Engler & Prantl] iii. I. (1889) 189. 1889

(Leaves poultice for headache; take the juice to drink to promote the discharge of the afterbirth.)

Malay name: mendalu

Elytranthe parasitica (L.) Danser (*Blumella loniceroides* (L.) Tiegh.; *Elytranthe loniceroides* (L.) G. Don; *Lonicera parasitica* L.; *Loranthus loniceroides* L.; *Macrosolen parasiticus* (L.) Danser)

China.

See *Species Plantarum* 1: 175. 1753, *Species Plantarum*, Editio Secunda 1: 473. 1762, *A General History of the Dichlamydeous Plants* 3: 427. 1834, *Bulletin de la Société Botanique de France* 42: 441. 1895 and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 10: 315. 1929, *Blumea* 2(2): 36. 1936, *Cytologia* 52: 761–766. 1987

(Veterinary medicine, leaf paste applied to remove ticks.)

in China: mo tuo da bao qiao hua

in India: morachi

Elytraria Michaux Acanthaceae

From the Greek *elytron* 'a sheath, a cover' probably referring to the scaly stem, see *Systema Naturae* ... editio decima tertia, aucta, reformata 27. 1791, *Fl. Bor.-Amer.* (Michaux) 1: 8–9, pl. 1. 1803 [19 Mar 1803], *Enum.* i. 106. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 286. 1847, *Die*

Natürlichen Pflanzenfamilien 3B: 319. 1895 and *Bull. Mus. Natl. Hist. Nat.* 32: 150–152, 396–397. 1926, *Bulletin du Muséum d'Histoire Naturelle*, sér. 2 4: 716–717. 1932, *Cat. Pl. Madag.*, *Acanth.* 2(24): 7–32. 1939, *Notes Roy. Bot. Gard. Edinburgh* 31(3): 378. 1972, *Fieldiana, Bot.* 24(10/4): 328–462. 1974, *Proc. Calif. Acad. Sci.* 49: 309–403. 1997, *Contr. Univ. Elytraria acaulis Lindau (*Elytraria acaulis* Hutch. & Dalziel; *Elytraria acaulis* Druce; *Justicia acaulis* L.f.; *Tubiflora acaulis* Kuntze)

Tropical Africa. Herb, radical oblanceolate leaves, hairy petioles, white corolla, ovoid pointed capsule

See *Flora Boreali-Americana* 1: 8–9, pl. 1. 1803, *Revis. Gen. Pl.* 2: 500. 1891, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] 1: 304. 1897 and *Rep. Bot. Exch. Cl. Brit. Isles*, 1916, 621. 1917, *Flora of West Tropical Africa* 3: 261. 1931

(Used in Sidha. Whole plant decoction along with black pepper taken in fever, venereal diseases and cough. Leaves decoction in fever; dried leaves inhaled in bronchitis; fresh leaves paste applied on wounds and nail diseases. Roots paste applied to mammary abscesses, snakebites, and also for tonsillitis, throat complaints and colic pains; tuberous roots decoction given to subside boils and body swellings. Veterinary medicine, dried powdered roots mixed with powdered tobacco leaves and water forming a paste for treating sores of cattle; a mixture of plant powder and seed powder of *Panicum sumatrense* applied as plaster to the broken horns of cows; whole plant given in dysentery; leaves juice given to cattle as antidote; contact therapy, fresh roots tied near the affected part to kill worms in wounds and hasten healing of wounds and ulcers.)

in India: anjilai parichchan, dashmulu, ho-muli, kala gathia, patarsaga, patharchatta, patharsaga, pumikatampam, sahas-tra muli, sahastra musari, yeddadugu, yeddunulakaku

Elytraria imbricata (Vahl) Pers. (*Elytraria apargiifolia* Nees; *Elytraria fasciculata* Kunth; *Elytraria frondosa* Kunth; *Elytraria microstachya* Oerst.; *Elytraria pachystachya* Oerst.; *Elytraria ramosa* Kunth; *Elytraria scorpioides* Roem. & Schult.; *Elytraria squamosa* (Jacq.) Lindau; *Elytraria squamosa* A. Chev.; *Elytraria tridentata* Vahl, nom. illeg.; *Justicia imbricata* Vahl; *Stachytarpheta squamosa* (Jacq.) Vahl; *Tubiflora pachystachya* (Oerst.) Kuntze; *Tubiflora squamosa* (Jacq.) Kuntze; *Verbena squamosa* Jacq.)

North and South America.

See *Eclogae Americanae* 1: 1. 1796[1797], *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 3, t. 5. 1797, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 209. 1804, *Enumeratio Plantarum* ... 1: 107. 1805, *Nova Genera et Species Plantarum* (quarto ed.) 2: 234–235. 1818, *Systema Vegetabilium* 1: 128. 1822, *Prodromus Systematis Naturalis*

(For stomachache.)

Elytraria lyrata Vahl (*Elytraria acaulis* var. *lyrata* (Vahl) Bremek.; *Elytraria crenata* var. *lyrata* (Vahl) Nees)

Guinea, Ghana. Acaulous, spreading rosette of radical lyrate leaves

See *Enumeratio Plantarum* ... [Vahl] i. 106. 1804 and *Reinwardtia* 3: 251. 1955

(Plant decoction drunk for gonorrhoea. Magic, ritual, roasted powdered plant for skin diseases.)

Elytraria marginata Vahl (*Elytraria crenata* Vahl; *Elytraria crenata* Leonard, nom. illeg.; *Elytraria crenata* Burkill & C.B. Clarke)

Ghana, Cameroon. Erect herb, subshrub, stems purplish-green, rosettes of leaves, white flowers, keeled bracts, very small seeds

See *Enumeratio Plantarum* ... [Vahl] 1: 106, 108. 1804, *Flora of Tropical Africa* 5: 27. 1899 and *Journal of the Washington Academy of Sciences* 28: 311. 1938

(Inflorescences decoction tonic, stimulant, taken for sexual weakness in men. Roasted powdered leaves taken in water for tuberculosis. Leaves for gonorrhoea, sores, ulcers. Magic, ritual, a bath against the evil influences of witches.)

Elytraria nodosa E. Hossain (*Elytraria acaulis* Hutch. & Dalziel; *Elytraria acaulis* Lindau; *Elytraria acaulis* Druce; *Elytraria crenata* Vahl; *Elytraria crenata* Leonard, nom. illeg.; *Elytraria crenata* Burkill & C.B. Clarke; *Justicia acaulis* L.f.; *Tubiflora acaulis* Kuntze)

Madagascar, India.

See *Supplementum Plantarum* 84. 1781, *Flora Boreali-Americana* 1: 8–9, pl. 1. 1803, *Enumeratio Plantarum* ... [Vahl] 1: 106, 108. 1804, *Revis. Gen. Pl.* 2: 500. 1891, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] 1: 304. 1897 and *Rep. Bot. Exch. Cl. Brit. Isles*, 1916, 621. 1917, *Flora of West Tropical Africa* 3: 261. 1931, *Journal of the Washington Academy of Sciences* 28: 311. 1938, *Notes from the Royal Botanic Garden, Edinburgh* 31(3): 379. 1972

(Used in Sidha. Roots paste applied to mammary abscesses, snakebites, and also for tonsillitis, throat complaints and colic pains; tuberous roots decoction given to subside boils and body swellings.)

in India: anjilai parichchan, cimainilakkatampu, cinnakatampu, cirukatampuceti, empukam, ho-muli, ilampukam, ilempukam, kala gathia, kankai, katampakam, kocanakam, kokanam, kucciram, kuccitam, kulakalam, kulakamaceti,

kulakamam, kulakayam, kuyakkalam, lempukam, mayurakopikam, mayurkkopikam, muttirukkan, muttirukkanceti, muttirukkancevi, nariyankatampu, nila-kadambu, pakavirukkam, palan, patarsaga, patharchatta, patharsaga, polam, pompari, ponam, pukatampam, pumikatampam, sahastra muli, sahastra musari, virananikki, viruttam, viruttamacceci, viruttan, visani, viskari, yeddadugu, yeddunulakaku

Embelia Burm.f. Myrsinaceae

Embel or *aembelia* is a local name in Sri Lanka; see *Flora Zeylanica* 190. 1747, Nicolaas Laurens Burman (1734–1793), *Flora Indica* ... nec non Prodromus Florae Capensis. 62: t. 23. Lugduni Batavorum 1768, *Transactions of the Linnean Society of London* 17(1): 131. 1834, *Annales des Sciences Naturelles; Botanique*, sér. 2, 16: 81. 1841, *Theoria Systematis Plantarum* 140. 1858, *Revisio Generum Plantarum* 2: 403–404. 1891 and *Das Pflanzenreich* 236(Heft 9): 314, 321, 327. 1902.

Embelia acutipetala (Lam. ex Hassk.) S.M. Almeida & M.R. Almeida

India.

See *Journal of the Bombay Natural History Society* 81(3): 741. 1984[1985]

(Used in Ayurveda.)

in India: vidangah, vilal

Embelia effusa Mez

Indonesia. Climber

See *Das Pflanzenreich* (Engler) Myrsin. 236(Heft 9): 311. 1902

(Boiled soft leaves applied for the treatment of chicken pox, rashes.)

Embelia impressa Fletcher

India.

See *Bulletin of Miscellaneous Information Kew* 46. 1936

(Roots boiled and liquid drunk by mothers for lactation.)

Embelia kraussii Harv.

South Africa.

See *Thesaurus Capensis* 2: 17, t. 127. 1859–1863

(Leaves, stem and black berries carminative, for tapeworm.)

in South Africa: iBhinini

Embelia laeta (L.) Mez (*Choripetalum benthamii* Hance; *Embelia laeta* Mez; *Embelia obovata* Hemsl.; *Embelia obovata* Mez; *Myrsine laeta* (L.) A. DC.; *Samara laeta* L.; *Samara laeta* Sw.; *Samara obovata* Benth.)

Vietnam, southern China and Taiwan. Small shrub, leaves chartaceous, inflorescence a lateral or axillary raceme, flowers yellowish-green

See *Mantissa Plantarum* 2(Alter): 199. 1771, *Prodr.* (Swartz) 151. 1788, *Transactions of the Linnean Society of London* 17(1): 112. 1834 [1837 publ. 26 Apr–8 May 1834], *Hooker's J. Bot. Kew Gard. Misc.* 4: 301. 1852, *J. Linn. Soc., Bot.* xxvi. (1889) 62. 1889 and *Das Pflanzenreich* (Engler) Myrsin. 236(Heft 9): 308, 326. 1902

(Roots and leaves to treat dysentery, indigestion and eczema. Fruits vermifuge; sap of the leaves taken orally against snakebites, and leaves applied as a poultice on the bite.)

in Vietnam: c[aa]y m[ux]n, chua m[es]o, chua ng[us]t, d[aa]y ng[os], th[uf]n m[ux]n

Embelia nutans Wall. (*Ribesiodes nutans* (Wall.) Kuntze; *Ribesiodes nutans* Kuntze)

India. Woody climber, young shoots rusty pilose, oblong gland-dotted leaves, flowers in axillary racemes, globose fruits

See *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall., 2: 290. 1824, *FBI* 3: 517. 1882, *Revisio Generum Plantarum* 2: 403. 1891

(Roots infusion to treat coughs, cold, indigestion, stomach-ache, flatulence, colic and diarrhea.)

in India: thibihi

Embelia palauensis Mez

New Guinea. Vine

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56: 537. 1921

(Young leaves juice drunk to treat an enlarged spleen; freshly squeezed stem sap drunk to treat malaria and fever.)

in Papua New Guinea: galohoc

Embelia ribes Burm.f. (*Antidesma ribes* Raeusch.; *Antidesma ribes* (Burm. f.) Raeusch.; *Embelia garciniifolia* Miq.; *Embelia garciniifolia* Wallich ex Miq.; *Ribesiodes ribes* Kuntze; *Ribesiodes ribes* (Burm. f.) Kuntze; *Samara ribes* Benth. & Hook.f. ex Kurz; *Samara ribes* (N.L. Burman) Kurz; *Samara ribes* (Burm. f.) Benth. & Hook.f. ex Kurz)

Sri Lanka and India, SE Asia. Scandent shrub or liana, climbing, vines, creeping, elliptic-lanceolate chartaceous leaves rounded at base, inflorescence a terminal panicle, greenish white minute flowers mildly fragrant, dark blue globose fruits, young leaves and ripe fruits eaten, fodder

See *Flora Indica* ... nec non Prodromus Florae Capensis (N.L. Burman) 62, t. 23. 1768, *Mantissa Plantarum* 2: 144. 1771, *Nomenclator Botanicus* [Raeusch.] ed. 3, 287. 1797, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 46(2): 222. 1877, *FBI* 3: 513. 1882, *Revisio Generum Plantarum* 2: 403. 1891

(Used in Ayurveda, Unani and Sidha. Fruits stomachic, nervine tonic, tonic, antifertility, acrid, astringent, alterative, anthelmintic, molluscicidal, for piles, leprosy, skin diseases, constipation, indigestion, colic, flatulence; a paste is locally

applied against tapeworm, ringworm; dry fruits decoction used in fevers, chest pain and skin diseases, and as mouth wash in decay of teeth; dried powdered fruits anthelmintic, astringent, tonic, taken to kill worms in stomach, used in scorpion sting and snakebite. Seed powder in headache. A roots infusion to treat coughs, indigestion, flatulence, colic, stomachache and diarrhea. Powder made from dried bark of the root a remedy for toothache. The crushed fresh bark used to repel leeches, and as a fish poison; leaves and bark juice as fish poison.)

in English: whiteflower embelia

in Cambodia: chou pruc

in China: bai hua suan teng guo, xian suan qiang

Embelia robusta Roxb. (*Ribesiodes robusta* Kuntze; *Ribesiodes robustum* (Roxb.) Kuntze; *Samara robusta* (Roxb.) Kurz; *Samara robusta* Benth. & Hook.f. ex Kurz)

India, Indochina. Scandent shrub or liana, leaves membranous, inflorescence axillary

See *Hort. Bengal.* 16. 1814, *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall., 2: 287. 1824, *Fl. Ind.*, ed. Carey, i. 587. 1832, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 46(2): 222. 1877, *Revisio Generum Plantarum* 2: 403. 1891

(Used in Unani. Fruits used as an anthelmintic.)

in India: babarang, baobarang, baobring, biding, ceriyannatam, tsjeriamcottam

in Vietnam: r[ef] d[oos]m

Embelia rowlandii Gilg

Nigeria. Climbing shrub, racemose hermaphrodite creamy-yellow flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 95. 1901

(Fruits and leaves used as anthelmintic.)

Embelia schimperi Vatke (*Embelia abyssinica* Baker; *Embelia batesii* S. Moore; *Embelia dasyantha* Gilg & G. Schellenb.; *Embelia erythrocarpa* Gilg; *Embelia guineensis* Baker; *Embelia kilimandscharica* Gilg; *Embelia mujenja* Gilg; *Embelia nyassana* Gilg; *Embelia pellucida* K. Schum.; *Embelia pellucida* (Hiern) K. Schum.; *Embelia tessmannii* Gilg & G. Schellenb.; *Embelia tibatiensis* Gilg & G. Schellenb.; *Pattara kilimandscharica* (Gilg) Hiern; *Pattara kilimandscharica* Hiern)

Tanzania. Climber, lianescent shrub, woody, straggling, scandent, hanging branches, stem brown with swollen dots, tiny green-cream flowers, fruits red-pink-yellow, persistent style, leaves and fruit edible with sour taste, young salty leaves eaten raw, in savanna woodland

See *Fam. Pl.* (Adanson) 2: 447. 1763, *Flora Indica* ... nec non Prodromus Florae Capensis 62, pl. 23. 1768, *Linnaea* 40: 206. 1876, *Fl. Trop. Afr.* [Oliver et al.] 3: 486–497. 1877 and *Bot. Jahrb. Syst.* 28(4): 446. 1900, *Bot. Jahrb. Syst.* 30(1): 96. 1901, *Bot. Jahrb. Syst.* xlviii. 521–522. 1912, *J. (Toxic. Leaves and stem bark antispasmodic, anthelmintic, stomachic. Leaves chewed fresh as tonic medicine and to treat cough. Leaves pounded and the powder rubbed into swollen breasts of lactating mothers to treat mastitis; also powder soaked in water and the infusion drunk to treat difficult labor in women or for tapeworm. Antihelmintic, fruit and roots boiled and the decoction drunk to treat intestinal worms. Veterinary medicine, for internal parasitism.)

in Burundi: umukarakara

in Congo: amasakale, bukaragata, hishalula, ishalula bahivi, kabatwa, kakolo, kashalulabahivi, shalulabahivi, umukagasha, umukaragata, umukarakara

in East Africa: ngese

in Kenya: oljaninyuki

in Rwanda: umukaragata, umukarakara

in Tanzania: gezi, igalilonji, ikararato, ikararia, ikarikari, muhanyi, mukutani, ngenzi, ngera, ngetsi, ngezi, oluchanyunyike, sachona

Embelia tsjeriam-cottam (Roemer & Schultes) A. DC. (*Embelia robusta* C.B. Clarke; *Embelia robusta* Roxb.; *Embelia tsjeriam-cottam* A. DC.; *Embelia tsjeriamcottam* A. DC.)

India and Sri Lanka. Shrub, entire or serrate membranous leaves, flowers white or greenish white, inflorescence an axillary cylindrical raceme, globose fruits, persistent style

See *Hort. Bengal.* 16. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 287. 1824, *Fl. Ind.*, ed. Carey, i. 587. 1832, *Transactions of the Linnean Society of London* 17(1): 131. 1834 [1837 publ. 26 Apr-8 May 1834]

(Used in Ayurveda. Seed paste applied on the spot of the snakebite, and swellings; dried seeds given as an anthelmintic and stomachic. Dried fruits vermifuge, tonic, blood purifier, antispasmodic and carminative; fruit powder for gastric pain, also a tapeworm expellent; fruits used to enhance breast milk secretion. Root bark chewed to treat toothache and poisonous animal bite; root bark paste given in pneumonia. Stembark and leaves infusion as a gargle for tonsillitis; bark paste taken to treat burns.)

in India: ambaidange, ambati, ambti, ambuti, amti, babrang, baibirang, baibrang, basaal, baya birang, bayabirang, bhangi, bidanga, cheryannattam, choladanya, choladhanna, duli, elang, ingali, joladhanna, kanta parasi, kanthree vilanga, kokla, krimighnam, maraharive, orogujeya, tsjeriam-cottam, vai-vidang, vai-vidang kala, vai-vidanga (kala), vai-vidanga kala, vai-vidanga lal, vaivaling, vaivilangam, vavding, velah, vidanga, vilangah, vilangam, vovding, waiwarung

(Leaves decoction for bathing to treat smallpox.)

in China: ping ye suan teng zi

in India: tling

Embothrium Forster & Forst.f. Proteaceae

From the Greek *embothros* 'like a pit, sunken', *bothros* 'a pit, hole', *bothrion* 'a little pit', referring to the anthers; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum.* 15, t. 8. (Nov.) 1775, *On Cultivation Proteaceae* 121. 1809, *Transactions of the Linnean Society of London. Botany.* 10(1): 199, 201. 1810 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 367-375. 1937, *Gayana, Bot.* 42: 1-157. 1985, *Fl. Ecuador* 69: 3-48. 2002.

Embothrium grandiflorum Lam. (*Catas grandiflora* Juss. ex Lam., nom. inval.; *Embothrium emarginatum* Ruiz & Pav.; *Embothrium grandiflorum* Bonpl. ex Meisn.; *Embothrium mucronatum* Willd. ex Roem. & Schult.; *Embothrium ruizii* (Klotzsch) Pittier; *Embothrium ruizii* Pittier; *Embothrium ruizii* Perkins; *Embothrium weberbaueri* Perkins; *Oreocallis grandiflora* R.Br.; *Oreocallis grandiflora* (Lam.) R.Br.; *Oreocallis mucronata* (Willd. ex Roem. & Schult.) Sleumer; *Oreocallis ruizii* Klotzsch)

Peru.

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 354. 1786, *Flora Peruviana* [Ruiz & Pavon] 1: 62, t. 95. 1798, *Transactions of the Linnean Society of London. Botany.* 10(1): 196. 1810, *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 3: 533. 1818, *Linnaea* 20: 474. 1847, *Prodr.* (DC.) 14(1): 446. 1856 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 434. 1911, *Contributions from the United States National Herbarium* 18(6): 230. 1917, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76(2): 202. 1954

(Crushed leaves applied to contusions; crushed powdered leaves to dry up ulcers.)

Emex Campderá Polygonaceae

Possibly a derivation from the related genus *Rumex*; see *Elem. Bot.* ii. 214. 1790, Francisco (François) Campderá, 1793–1862, *Monographie des Rumex*. 56–60, pl. 1, f. 1. Paris 1819.

Emex australis Steinh. (*Vibo australis* Greene)

South Africa.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 9(4): 195–196, pl. 7. 1838, *Man. Bot. San Francisco* 44. 1894 and *Australian Journal of Botany* 28: 323–328. 1980

(Veterinary medicine, threadworm in horses.)

in English: Cape spinach, cat's head, devil face, devil's thorn, double gee, goat-heads, Jackie, prickly Jack, spiny emex, three-cornered jack

in South Africa: breëblaardubbeltjie, dubbeltjie, dubbeltjiedoring, duiweldoring, duiwelsdis, emexdubbeltjie, Kaapse dubbeltjie, regopdubbeltjie, tongblaardubbeltjie

Emex spinosa (L.) Campd. (*Centopodium spinosum* (L.) Burch.; *Emex spinosa* Campd.; *Rumex glaber* Forssk.; *Rumex spinosus* L.; *Vibo spinosa* (L.) Medik.)

Mediterranean. Herb, dry sandy places, weed

See *Species Plantarum* 1: 333–338. 1753, *Flora Aegyptiaco-Arabica* 75. 1775, *Philosophische Botanik* 1: 178. 1789, *Monographie des Rumex* 56–60, pl. 1, f. 1. 1819, *Travels in the interior of South Africa* 1: 340. 1822 and *Australian Journal of Botany* 28: 323–328. 1980, *Boletim da Sociedade Broteriana* 56: 79–98. 1983, *Boletim da Sociedade Broteriana*, ser. 2 64: 135–142. 1991, *Flora Mediterranea* 6: 223–243, 278–288. 1996, *Egyptian Journal of Botany* 37(2): 129–156. 1997, *Bocconeia, Monographiae Herbarii Mediterranei Panormitani* 11: 117–169. 1999

(For stomach and intestinal complaints, dyspepsia.)

in English: devil's thorn, lesser jack, prickly dock

in Arabic: dirs el-'agouz

in South Africa: inKunzama

Emilia Cass. Asteraceae

Possibly referred to the Italian province of Emilia and its capital, Bologna, where Gian Domenico Cassini (1625–1712) held the chair of astronomy at the University (1650–1669); or named after some unknown individual, who knows? maybe the name of a friend or a member of the family; see Alexandre Henri Gabriel Comte de Cassini, in *Bull. Sci. Soc. Philom. Paris*. Année 1817. 68. (Apr.) 1817, *Ann. Sci. Nat. Bot.*, sér. 5 18: 361–377. 1873, *Ann. K.K. Naturhist. Hofmus.*

7(4): 295–300. 1892 and *Bull. Soc. Linn. Normandie* sér. 7, 6: 169–200. 1923, *Bull. Misc. Inform. Kew* 1924: 137–144. 1924, *Fl. Madagasc.* 189: 623–911. 1963, *Syst. Bot.* 5(4): 391–407. 1980, *Fl. Venez. Guayana* 3: 177–393. 1997.

Emilia abyssinica (Sch. Bip. ex A. Rich.) C. Jeffrey (*Packera bellidifolia* (Kunth) W.A. Weber & Á. Löve; *Senecio abyssinicus* Sch. Bip. ex A. Rich.; *Senecio bellidifolius* A. Rich.; *Senecio bellidifolius* Kunth; *Senecio quartinianus* Asch.)

East Africa, Tanzania. Annual herb, erect, weedy, leaves glaucous, corollas yellow, involucre bracts green to yellow, pappus white-green, style white-red, stigma yellow, common on disturbed sites

See *Species Plantarum* 2: 866–872. 1753, *Bull. Sci. Soc. Philom. Paris* 1817: 68. 1817, *Nova Genera et Species Plantarum* (folio ed.) 4: 137. 1820 [1818], *Tentamen Florae Abyssinicae* ... 1: 438–439. 1848, *Beitrag zur Flora Aethiopiens* ... 157. 1867 and *Botaniska Notiser* 128(4): 520–521. 1975 [1976], *Science and Culture* 44: 273–274. 1978, *Adansonia* 18: 19–24. 1978, *Phytologia* 49(1): 45. 1981, *Kew Bulletin* 41(4): 873–943. 1986, *Compositae Newsletter* 20/21: 12–15. 1992

(Poisonous for rabbits and sheep.)

in East Africa: linyunyu, lusunga, mukasa

in Tanzania: ghasera, khasera

Emilia citrina DC.

Madagascar.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 302. 1837

(For condyloma.)

Emilia coccinea (Sims) G. Don (*Cacalia coccinea* Sims; *Cacalia sagittata* Vahl; *Cacalia sagittata* Willd.; *Emilia coccinea* Sweet; *Emilia flammea* auct., non Cass.; *Emilia flammea* Cass.; *Emilia javanica* auct., non (Burm.f.) C.B. Rob.; *Emilia sagittata* (Vahl) DC.; *Emilia sagittata* DC.; *Emilia sagittata* auct., non DC.; *Emilia sonchifolia* var. *sagittata* C.B. Clarke ex Kuntze; *Senecio sagittatus* Hieron.)

East and Central Africa. Herb, erect, hairless, leaves clasping the stem, flowers in showy loose terminal heads, conspicuous bright yellow to orange tubular florets, seeds angular hairy bristly, leaves eaten, plant used for fodder, absence of milky sap, weed of roadsides, waste places, in dry country

See *Botanical Magazine* 16: pl. 564. 1802, *Hortus Britannicus* 382. 1839 and *Fieldiana, Bot.* 24(12): 392–423, 585–589. 1976, *Syst. Bot.* 5(4): 391–407. 1980

(Green leaves crushed and used to treat sores, sinusitis and as a poultice for wounds. Leaves mixed with those of *Ipomoea eriocarpa* and soaked in cold water, the resulting infusion used as eye drops. Roots or leaves decoction used for venereal diseases; roots to treat colic in babies.)

in English: Cupid's paintbrush, flora's paintbrush, red thistle, tassel flower

in Congo: mbelosso, mbono

in Tanzania: chungu kubwa, chungu kuu, igongwe, kilemba cha bwana, kilemba cha mbwana, limi ja ng'ombe, lisuka, sungu, ulimi wa ngombe

in Yoruba: odundun etidoife, odundun odo, odundun olokun

Emilia discifolia (Oliv.) C. Jeffrey (*Senecio discifolius* Oliv.; *Senecio hoffmanianus* Muschl.)

East tropical Africa.

See *Species Plantarum* 2: 866–872. 1753, *Transactions of the Linnean Society of London* 29: 100. 1873 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 62. 1909, *Kew Bulletin* 41(4): 873–943. 1986

(Infusion applied for eye diseases.)

in Kenya: eididi

Emilia lisowskiana C. Jeffrey (*Emilia coccinea* auct. non (Sims) G. Don; *Emilia sagittata* DC.)

Nigeria, Sierra Leone. Erect annual herb, branched, weak, stem leaves lanceolate to oblong, inflorescence a terminal discoid head, capitula long-stalked, involucre bracts, corolla tubular, disc florets yellow to bright orange, fruit an achene shortly hairy, leaves eaten as a vegetable, noxious weed, fodder for rabbits and guinea pigs, secondary forest

See *Kew Bulletin* 52(1): 208. 1997

(Leaves to treat eye disorders, filariasis, cutaneous, subcutaneous parasitic infection, heart problems; a leaf decoction febrifuge, laxative and anti-abortion; leaf sap used to treat skin troubles, breast abscesses, ulcers caused by yaws, leprosy affections, mange, lice and ringworm. Used for backache, syphilis, gonorrhoea, sore throat, convulsions, enlarged spleen, vertigo, epilepsy, menstrual problems. Roots for heart and pulmonary troubles, root preparation given to babies for colic. Magic.)

in Ivory Coast: kluapo

in Liberia: dein blih su

in Mali: kononi-abien

in Nigeria: kalamatoru edede, kolomatoru edede, ŋti-ènè, odundun-odo

in Sierra Leone: koya-gipoi, kumbe, kumenyi

Emilia prenanthoidea DC. (*Emilia angustifolia* DC.)

China. Herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 302. 1838

(Leaves squeezed onto a tooth cavity to relieve toothache; heated leaves rubbed onto sores, used to treat sores, boils, cuts, tropical ulcers, etc. Fresh leaf juice, methanolic and aqueous extracts of *Emilia sonchifolia* and *Emilia prenanthoidea* have shown antimicrobial, antioxidant and anti-inflammatory activities.)

in Papua New Guinea: kalanevuda, tiligibe, wanggilolo

Emilia scabra DC. (*Emilia scabra* DC. ex Wight)

India.

See *Prodr.* (DC.) 6: 303. 1838

(Plant paste against sprains and muscle pains; leaf paste mixed with castor oil applied on body ache, legs.)

in India: kaanakkaduku, poosha thala

Emilia sonchifolia (L.) DC. (*Cacalia sonchifolia* L.; *Cacalia sonchifolia* Forssk.; *Cacalia sonchifolia* Wall.; *Cacalia sonchifolia* Hort. ex Steud.; *Crassocephalum sonchifolium* (Linnaeus) Lessing; *Crassocephalum sonchifolium* Lessing; *Crassocephalum sonchifolium* (Baker) Humbert; *Emilia rigidula* DC.; *Emilia sinica* Miquel; *Emilia sonchifolia* DC.; *Emilia sonchifolia* Benth.; *Senecio sonchifolius* Moench; *Senecio sonchifolius* (Linnaeus) Moench)

Cosmopolitan. Erect herb, straggling, weak, decumbent-ascending, inflorescence purple-lavender to pinkish purple, ribbed achenes, leaves eaten as vegetable, forest, waste places, open places

See *Species Plantarum* 2: 834–835, 866–872. 1753, *Fl. Aegypt.-Arab.* p. cxix. 1775, *Methodus Plantas Horti Botanici ...* 516–517. 1794, *Suppl. Meth.* (Moench) 231. 1802, *Bull. Sci. Soc. Philom. Paris* 1817: 68. 1817, *Linnaea* 6(2): 252. 1831, *Numer. List* [Wallich] n. 3144 D. 1831, *Syn. Gen. Compos.* 395. 1832, *Contributions to the Botany of India* 24. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 302. 1838, *Nomencl. Bot.* [Steudel], ed. 2. 1: 244. 1840, *Niger Fl.* [W.J. Hooker]. 439. 1849, *Journal de Botanique Néerlandaise* 1: 105. 1861 and *Fl. Madag.* Fam. 189, 834. 1963, *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Journal of the West African Science Association* 18: 191–197. 1973, *Nucleus* 18: 6–19. 1975, *Cytologia* 43: 497–504. 1978, *Taxon* 27: 223–231. 1978, *Adansonia* 18: 19–24. 1978, *Systematic Botany* 5(4): 391–407. 1980 [5 May 1981], *Taxon* 30: 78. 1981, *Cell and Chromosome Research* 7: 26–28. 1984, *Revista Brasileira de Genética* 7(1): 83–94. 1984, *Cell and Chromosome Research* 9: 26–27. 1986, *Revista Brasileira de Genética* 9: 21–40. 1986, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987, *Glimpses in Plant Research* 8: 1–177. 1988, *Journal of Cytology and Genetics* 23: 38–52. 1988, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Aspects of Plant Sciences* 11: 427–437. 1989, *Feddes Repertorium* 101: 49–62. 1990, *Plant Systematics and Evolution* 170: 229–236. 1990

(Used in Ayurveda, Unani and Sidha. Fresh leaf juice, methanolic and aqueous extracts of *Emilia sonchifolia* and *Emilia prenanthoidea* have shown antimicrobial, antioxidant and antiinflammatory activities. Leaves believed to be poisonous. Whole plant ground and applied over wounds for quick healing; fever in children, contact therapy, whole plant hung around the neck. Sun dried plant to cure asthma. Leaves antiphlogistic, antioxidant, febrifuge, astringent, wound dressing, for dysentery and diarrhea, convulsions; leaf decoction febrifuge; juice of the leaves used in toothache, eye inflammation, night blindness and sore ears; leaf rubbed on the forehead to relieve headache; leaves and roots in malaria; boiled leaves eaten as a vegetable for urinary troubles. Flowers chewed to protect teeth from decaying, chewed and kept for a while inside the mouth. Roots infusion drunk for tuberculosis, diarrhea; root juice applied to treat toothache; root decoction in diarrhea.)

in English: consumption weed, Cupid's paint, Cupid's shaving brush, flora's paintbrush, lilac tassel flower, purple sow thistle, red tassel flower, shaving brush, sow thistle, tassel flower

in China: yang ti cao, yi dian hong

in India: ban rai, bana mula, binj-kudo, bonkapahua, dhama-pan, elikivi gida, elikivisoppu, hirankhuri, hirankuri, ili kivi gida, jumki hoo, khapraban, kirankuri, mayarcevi, muel-schevi, mulshevi, muyalcevi, muyalchevi, muyalcheviyan, muyalcheviyan pacha, panom, sachimodi, sadamandee, sadi-modi, soh byshet, undrachi, yakeshing

in Indonesia: udu lurun

in Japan: usu-beni-niga-na, haru-handama

Malay names: ketambi jantan, tetumbak merah

in Nepal: dhude, dudhe

in Papua New Guinea: hanga-an

in Philippines: kipot-kipot, lamlampaka, libua, marsilanana, setim, tagulinaw, tagulinaw, yayod-no-kangkong

in Sanskrit: sasasruti, sasasrutih

in Tamil: mayarcevi, muyalcevi

in Thailand: pipi

in Nigeria: obhiojefe

Empetrum L. Empetraceae (Ericaceae)

Greek *empetros*, *empetron* 'growing on rocks', Dioscorides applied to the sea-heath, *Franklinia pulverulenta*, see *Species Plantarum* 2: 1022. 1753.

Empetrum hermaphroditum Hagerup (*Empetrum eamesii* Fernald & Wiegand subsp. *hermaphroditum* (Hagerup) D. Löve; *Empetrum eamesii* subsp. *hermaphroditum* (Lange ex Hagerup) D. Löve; *Empetrum hermaphroditum* Lange ex Hagerup; *Empetrum nigrum* subsp. *hermaphroditum*

(Hagerup) Böcher; *Empetrum nigrum* subsp. *hermaphroditum* (Lange ex Hagerup) Böcher; *Empetrum nigrum* var. *hermaphroditum* (Hagerup) T.J. Sørensen)

Alaska, Caucasus, North America. Shrub, erect, woody roots, blue-black fruits

See *Rhodora* 15(180): 215–217. 1913, *Dansk Botanisk Arkiv* 5(2): 14–17, f. 4c, e, 5. 1927, *Meddelelser om Grønland* 101(3): 95. 1933, *Meddelelser om Grønland* 147(9): 81. 1952, *Rhodora* 62(742): 289. 1960

(Leaves poultice to soothe pain; leaves infusion taken for chest congestion and sour stomach.)

in English: black crowberry

***Empetrum nigrum* L.**

North America.

See *Species Plantarum* 2: 1022. 1753 and *J. Linn. Soc., Bot.* 47: 512. 1927, *Opera Botanica* 52: 1–38. 1979, *Taxon* 29: 725–726. 1980, *Botaničeskij Žurnal (Moscow & Leningrad)* 75: 279–282. 1990

(Berries cooked and eaten for diarrhea. Leaves poultice to soothe pain; leaves infusion taken for chest congestion and sour stomach; leaves decoction purgative. Leafy branches diuretic; stems decoction or infusion taken for diarrhea.)

in English: black crowberry, crowberry, curlew berry

Empogona Hook.f. Rubiaceae

From the Greek *em* 'within, in' and *pogon* 'a beard', see *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 445. 1830, *Hooker's Icones Plantarum* 11: 1091. 1871 and *Bulletin du Jardin Botanique National de Belgique* 49: 239–360. 1979, *Distrib. Pl. African.* 16: 531–562. 1979, *Fl. Trop. E. Africa* 415–747. 1988, *Annals of the Missouri Botanical Garden* 96(1): 206. 2009.

Empogona ovalifolia (Hiern) Tosh & Robbr. (*Empogona ovalifolia* var. *ovalifolia* (Hiern) Tosh & Robbr.; *Eriostoma albicaulis* Boivin, nom. nud.; *Hypobathrum albicaule* Baill.; *Hypobathrum comorense* Baill.; *Kraussia coriacea* Sond.; *Tricalysia cuneifolia* Baker; *Tricalysia ovalifolia* Hiern; *Tricalysia sonderiana* Hiern)

Tropical Africa, Madagascar, Tanzania. Shrub or small tree

See *Linnaea* 23: 54. 1850, *Fl. Trop. Afr.* 3: 119. 1877, *Adansonia* 12: 208–210. 1878, *Bulletin of Miscellaneous Information Kew* 1894: 148. 1894 and *J. Bot.* 63: 145. 1925, *Kew Bulletin* 2: 59. 1947, *Ann. Missouri Bot. Gard.* 96(1): 207–209. 2009

(Roots for inflammation and snakebite.)

in Madagascar: miredeny, nofotrakoho

in Tanzania: muhuti, muhuty, sambula sukuma, sambula tsukuma

Empogona ovalifolia (Hiern) Tosh & Robbr. var. *taylorii* (S. Moore) Tosh & Robbr. (*Empogona taylorii* S. Moore; *Tricalysia ovalifolia* Hiern var. *taylorii* (S. Moore) Brenan)

Tropical Africa, Kenya, Tanzania.

See *J. Bot.* 63: 145. 1925, *Kew Bulletin* 2: 59. 1947, *Ann. Missouri Bot. Gard.* 96(1): 208–209. 2009

(Veterinary medicine, an infusion to increase the supply of milk.)

Enantia Oliver Annonaceae

From the Greek *enantion* ‘opposite, against’, referring to the one-seeded carpels, see *Journal of Botany*, being a second series of the Botanical Miscellany 4: 75. 1841, *Journal of the Linnean Society, Botany* 9: 174–175. 1865.

Enantia chlorantha Oliv. (*Annickia affinis* (Exell) Versteegh & Sosef; *Annickia chlorantha* (Oliv.) Setten & Maas; *Enantia affinis* Exell; *Enantia chlorantha* Cooper & Record; *Enantia chlorantha* var. *soyauxii* Engler & Diels)

Tropical Africa. Tree or shrub, shrubby tree, yellow wood, flowers yellow-green, purple fruit

See *Journal of the Linnean Society, Botany* 9: 174–175. 1865 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 70. 1901, *Yale University, School of Forestry, Bulletin* 31: 14. 1931, *Taxon* 39: 676, 678. 1990, *Ann. Trop. Med. Parasitol.* 85(6): 585–590. 1991, *Afr. J. Medicine and Medical Sci.* 21(2): 39–46. 1992, *Cent. Afr. J. Med.* 40(3): 71–73. 1994, *East Afr. Med. J.* 73(10): 636–637. 1996, *Phytomedicine.* 7(4): 291–296. 2000, *Pharmazie.* 57(6): 358–361, 409–412. 2002, *Systematics and Geography of Plants* 77: 95. 2007

(Stem bark and roots astringent, febrifuge, antibacterial astringent, for fevers, sleeping sickness, malaria, dysentery. Decoctions used in the traditional treatment of some forms of ulcers. Antimalarial activity of boiled water extracts.)

in English: African yellow wood

in French: moambe jaune

in Central Africa: numba bengi, muamba-mbuaki, muamba, mfôl, bolobo, bolouké, evué, mpolai, njé, osopupa

in Cameroon: bonoku bololo, bonuku bololo, m’fo, mfo, mfol, m’polai, mpouley, nje, njie, evue

in Congo: muamba

in Gabon: mfol

in Ivory Coast: bopalo, esuro, mbawe

in Liberia: belvi, kpaini

in Nigeria: osopupa, erenbavbogo; osopupa, yaru (Yoruba); osomolu (Ikale); erenbavbogo (Edo); kakerim (Boki)

in Yoruba: yaru

Enantia kummerae Engl. & Diels (*Annickia kummerae* (Engl. & Diels) Setten & Maas)

Tanzania.

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 3(23): 57. 1900, *Taxon* 39: 676. 1990

(Wound healing.)

Enantia polycarpa (DC.) Engler & Diels (*Annickia polycarpa* (DC.) Setten & Maas; *Unona polycarpa* DC.; *Xylopia polycarpa* (DC.) Oliv.)

Tropical Africa.

See *Systema Naturae*, Editio Decima 2: 1241, 1250, 1378. 1759, *Supplementum Plantarum* 44, 270. 1782, *Regni Vegetabilis Systema Naturale* 1: 499. 1817, *Journal of the Linnean Society, Botany* 9: 174. 1865, *Flora of Tropical Africa* 1: 32. 1868 and *Monogr. Afrik. Pflanzen-Fam.* 6: 69. 1901, Irvine F.R. *Woody Plants of Ghana*. With special reference to their uses. London. 1961, *Planta Med.* 32(3): 249–257. 1977, *Taxon* 39: 676, 678. 1990, *Fitoterapia.* 71(3): 315–316. 2000, Kamanzi Atindehou, K. et al. “Antitrypanosomal and antiplasmodial activity of medicinal plants from Côte d’Ivoire.” *J. Ethnopharmacol.* 90(2–3): 221–227. 2004

(Antitrypanosomal and antiplasmodial activity. Antibacterial activity of the bark, the bark extract applied locally to ulcers and leprous spots, a decoction used for washing wounds, also believed to be antiseptic.)

in English: African yellow wood

in Ivory Coast: baoué

in Nigeria: osopupa (Yoruba)

in Sierra Leone: gbelo wuli

Encelia Adans. Asteraceae

Derivation obscure, possibly after Christopher Encel (Christophorus Encelius or Christoph Entzelt), d. 1583, author of *De Re Metallica*, hoc est, de origine, varietate et natura Corporum Metallicorum, Lapidum, Gemmarum, atq. Francofurti 1551 and of *Chronicon* oder kurtze einfeltige vorzeichnus, darinne begriffen, wer die Alte Marck, etc. Magdeburg 1579; see *Familles des Plantes* 2: 128. 1763, *Encyclopédie Méthodique, Botanique* 2: 356. 1786 and *Amer. J. Bot.* 63: 1393–1403. 1976, *Sida* 15: 649–653. 1993.

Encelia farinosa A. Gray ex Torr. (*Encelia farinosa* var. *phenicodonta* (S.F. Blake) I.M. Johnst.)

North America, USA.

See *Familles des Plantes* 2: 128. 1763, Emory, William Hemsley (1811–1887), *Notes of a military reconnaissance from Fort Leavenworth in Missouri to San Diego in California*: including part of the Arkansas, Del Norte, and Gila Rivers. Washington, 1848 and *Nederlandsch Kruidkundig Archief.*

Verlangen en Mededelingen der Nederlandsche Botanische Vereeniging 49: 362. 1913, *Proceedings of the California Academy of Sciences*, Series 4, 12: 1198. 1924

(The resin ground and sprinkled on sores. Poultice of plant applied for pain.)

in English: brittlebush, goldenhills

in Mexico: hierba de las ánimas, hierba del bazo, palo blanco, hierba ceniza, cotk (Sonora); incienso (Baja California)

Encelia resinifera C. Clark (*Encelia frutescens* (A. Gray) A. Gray var. *resinosa* M.E. Jones ex S.F. Blake; *Encelia resinifera* subsp. *tenuifolia* C. Clark; *Encelia resinosa* Brandegee)

North America.

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 89. 1859, *Proceedings of the American Academy of Arts and Sciences* 8: 657. 1873 and *Zoë* 5(11): 240. 1906, *Proceedings of the American Academy of Arts and Sciences* 49(6): 364. 1913, *Taxon* 28: 271–273. 1979, *Aliso* 17(2): 201–202. 1998

(Used for shingles.)

in English: button brittlebush

Encelia virginensis A. Nelson (*Encelia frutescens* fo. *virginensis* (A. Nelson) H.M. Hall; *Encelia frutescens* var. *virginensis* (A. Nelson) S.F. Blake)

North America.

See *Botanical Gazette* 37(4): 272–273. 1904, *University of California Publications in Botany* 3(1): 135. 1907, *Proceedings of the American Academy of Arts and Sciences* 49(6): 364. 1913

(Analgesic, antiinflammatory, for rheumatism.)

Encelia virginensis A. Nelson var. ***actoni*** B.L. Turner (*Encelia actoni* Elmer; *Encelia frutescens* fo. *actoni* (Elmer) H.M. Hall; *Encelia frutescens* var. *actoni* (Elmer) S.F. Blake; *Encelia virginensis* subsp. *actoni* (Elmer) D.D. Keck)

North America.

See *Botanical Gazette* 39(1): 47–48. 1905, *University of California Publications in Botany* 3(1): 135. 1907, *Proceedings of the American Academy of Arts and Sciences* 49(6): 365. 1913, *Aliso* 4(1): 101. 1958

(Analgesic, antiinflammatory, for rheumatism. Veterinary medicine, a wash for horses with cuts.)

Enceliopsis (A. Gray) A. Nelson Asteraceae

Resembling the genus *Encelia*, see *Botanical Gazette* 47(6): 432–434. 1909.

Enceliopsis nudicaulis (A. Gray) Nelson (*Encelia nudicaulis* A. Gray; *Enceliopsis nudicaulis* var. *bairdii* S.L.

Welsh; *Enceliopsis nudicaulis* var. *corrugata* Cronquist; *Helianthella nudicaulis* (A. Gray) A. Gray)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 8: 656–657. 1873, *Proceedings of the American Academy of Arts and Sciences* 19: 9. 1883 and *Botanical Gazette* 47(6): 433. 1909, *Bulletin of the Torrey Botanical Club* 99(5): 246–247, f. 1. 1972[1973], *A Utah Flora*: Third Edition, revised 176–177. 2003

(Leaves decoction for cough; root decoction for venereal diseases and diarrhea.)

in English: naked-stem sunray, naked-stemmed daisy

Encephalartos Lehm. Zamiaceae (Cycadaceae)

Greek *en* ‘within, in’, *kephale* ‘a head’ and *artos* ‘bread’, some parts of the top of the trunks of these plants are farinaceous and edible, the stems are a source of sago; see Johann Georg Christian Lehmann, 1792–1860, in *Novarum et minus cognitarum stirpium pugillus* etc. 6: 3, 14, t. 1. Hamburgi 1834 and *Nat. Pflanzenfam.* ed. 2, 13: 79 1926, *Mem. New York Bot. Gard.* 57: 200–206. 1990, *Journal of Ethnopharmacology* 119(3): 549–558. 2008. Potential danger to man and animals of ingestion of the extremely toxic seeds, not the fleshy pulp, but the hardcoated kernel.

Encephalartos altensteinii Lehm. (the specific name presumably honors the German Baron von Stein zum Altenstein (1770–1840), a statesman at the court of King Frederick William III of Prussia)

South Africa.

See *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 11, t. 4–5. 1834

(Poisonous seeds.)

in English: breadtree, Eastern Cape cycad, Eastern Cape giant cycad, Hottentot’s bread

in Southern Africa: oos-Kaapse broodboom, broodboom (= bread tree); umPhanga, umGuza (Xhosa); uJobane (Zulu)

Encephalartos aplanatus Vorster

South Africa. Twisted and undulate leaflets

See *South African Journal of Botany* 62: 57. 1996

(Poisonous seeds.)

in English: Swazi north east forest cycad

in South Africa: umphanga wehlathi

Encephalartos arenarius R.A. Dyer

South Africa. Multistemmed

See *South African Journal of Botany* 22: 1. 1955

(Poisonous seeds, toxic to humans.)

in English: Alexandria cycad (Alexandria district, northeast of Port Elizabeth, South Africa), Kwa Qaba cycad

in South Africa: uMphanga wakwa Qaba

Encephalartos barteri Carruth. ex Miquel

Tropical Africa. A shrub-like palm, seeds reddish-orange

See *Archives Néerlandaises des Sciences Exactes et Naturelles* 3: 243. 1868 and *Flora of Tropical Africa* 6(2): 348. 1917

(Fruits antiviral. Ceremonial, ritual, burial rites.)

Encephalartos cycadifolius (Jacq.) Lehm. (*Zamia cycadifolia* Jacq.)

South Africa.

See *Fragmenta Botanica* 1: 27, no. 91. 1809, *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 13. 1834

(Toxic.)

in English: Bedford cycad

in South Africa: Winterberg cycad (the territory of this *Encephalartos* is restricted to the Winterberg range in the Cradock and Bedford districts, eastern Cape Province, South Africa)

Encephalartos eugene-maraisii Verdoorn (the specific name honors the Afrikaans naturalist who first discovered this cycad, Eugène Marais, poet and writer, uncle of the South African botanist Inez Verdoorn)

South Africa.

See *Mem. New York Bot. Gard.* 57: 200–206. 1990

(Seeds have caused poisoning in humans.)

in South Africa: bergpalm, Waterberg cycad

Encephalartos friderici-guilielmi Lehm. (the specific name after King Frederick William [Friedrich Wilhelm] III of Prussia, 1770–1840, whose palmhouse at Potsdam near Berlin was rightly famous)

South Africa. Confused with *Encephalartos cycadifolius*

See *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 8, t. 1–3. 1834 and *Carbohydrate Research* 241: 217–226. 1993

(Seeds poisonous.)

in English: cycad, white-haired cycad

in Southern Africa: withaarbroodboom, kafferbroodboom; umPhanga, umGuza (Xhosa)

Encephalartos hildebrandtii A. Braun & C.D. Bouché

Kenya, Uganda, Tanzania. Stout palm-like tree or a shrub, evergreen, unbranched, trunk covered with leaf scars, rosette

of pinnate arching leaves, sharp tip spiny, male and female plants bear different cones at the stem apex within the circle of leaves, male cones dull red, female cones dull green-yellow, seeds in pairs orange-red with a fleshy outer layer, lower part of the trunk used for flour, seeds eaten during famine, chimpanzees and baboons eat the seeds, red loams, coastal evergreen bushland, dry montane rainforest, lowland forest, sandy soil

See *Index Seminum Hort. Bot. Berol.* 1874 18. 1874 and *East African medical journal* 45(12): 732–741. 1968

(Seeds reputed to cause liver cancer.)

in Tanzania: mgwede, mkwanga, msapo

Encephalartos horridus (Jacq.) Lehm. (*Zamia horrida* Jacquin), (the specific name from the Latin *horridus*, a, um (*horreo*) ‘bristly, horrible’, the plant has a spiny appearance)

South Africa.

See *Species Plantarum*, Editio Secunda 2: 1659. 1763, *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 14. 1834

(Seeds poisonous.)

in South Africa: Eastern Cape blue cycad

Encephalartos lanatus Stapf & Burt Davy

South Africa.

See *Journal of the South African Veterinary Association* 54(1): 33–42. 1983

(Kernel toxic and carcinogenic, macrozamia is a potent hepatotoxin and carcinogen.)

in South Africa: woolly cycad

Encephalartos lehmanniana Lehm. (*Encephalartos lehmannii* Lehm.; *Zamia lehmanniana* Ecklon & Zeyher ex Ecklon) (the specific name commemorates the German botanist Johann Georg Christian Lehmann, 1792–1860, who established the genus *Encephalartos*; he wrote *De plantis Cycadeis praesertim Africae australis*. Hamburgi 1834)

South Africa.

See *Allgemeine Gartenzeitung* 1: 158. 1833, *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 14. 1834 and *Cytologia* 44: 951–954. 1979, *Journal of South African Botany* 47: 2–6. 1981

(Seeds poisonous.)

in South Africa: Karoo cycad

Encephalartos longifolius (Jacq.) Lehm. (*Zamia longifolia* Jacq.)

South Africa.

See *Novarum et Minus Cognitarum Stirpium Pugillus* 6: 14. 1834

(The seeds are especially toxic. Seeds have caused poisoning in humans. Liver poison.)

in English: breadpalm, Suurberg cycad, Thunberg's breadtree, Thunberg's cycad

in South Africa: broodboom, Suurbergbroodboom

Encephalartos septentrionalis Schweinfurth (*Encephalartos septentrionalis* Schweinf. ex Eichler)

South Africa, Uganda.

See *Botanische Zeitung*, Berlin 29: 334. 1871, *Die Natürlichen Pflanzenfamilien* 2(1): 22. 1887

(Toxic, intoxicant.)

in South Africa: Nile cycad

Encephalartos transvenosus Stapf & Burtt Davy (Latin *trans* 'across, transverse' and *venosus* 'full of veins')

South Africa.

See *Lloydia* 37(4): 636–637. 1974

(Toxic, intoxicant.)

in English: Modjadji cycad, Modjadji's palm

in Southern Africa: Modjadji broodboom (the common name from the tribal lands of the Balobedu Baga Modjadji people in the state of Lebowa, northeast of Tzaneen in the northeastern Transvaal, South Africa); tshifhanga, mutondolo, tshitondolo (Venda)

Encephalartos villosus Lem.

South Africa.

See *L'illustration horticole*, Misc. 69, t. 577. 1868

(Seeds have caused poisoning in humans. Liver poison.)

in English: kaffirbread tree, poor man's cycad (because it is still relatively abundant and one of the most common cycads in cultivation, and you don't need to pay extraordinary prices to get it!), wild date

in Southern Africa: kafferbrood boom, wilde datel, umPhanga (Xhosa)

Endosamara Geesink Fabaceae (Millettieae)

Greek *endon* and Latin *samara* or *samera*, *ae* 'the seed of the elm', see *J. Linn. Soc. (Bot.)* 41: 123–243. 1912, *An Enumeration of Philippine Flowering Plants* 2(3): 241–323. 1923, Geesink, Robert (1945–), "Scala Millettiearum: a survey of the genera of the Millettieae (Legum.-Pap.) with methodological considerations." Leiden, E.J. Brill, Leiden University Press, 1984 [*Leiden Botanical Series*], *J. Econ. Taxon. Bot.* 7(2): 249–276. 1985.

Endosamara racemosa (Roxb.) R. Geesink (*Millettia leiogyne* Kurz; *Millettia pallida* Dalzell; *Millettia pallida* (Dalzell

& A. Gibson) Dalzell; *Millettia racemosa* (Roxb.) Benth.; *Millettia racemosa* Benth.; *Pongamia racemosa* Graham; *Robinia racemosa* Roxb.; *Tephrosia racemosa* Sweet; *Tephrosia racemosa* Wight & Arn.; *Wisteria pallida* Dalzell & A. Gibson; *Wisteria racemosa* Dalzell & A. Gibson)

India. Perennial climbing shrub

See *Hortus Bengalensis*, or a catalogue ... 56. 1814, *Hort. Brit.* [Sweet], ed. 2. 142. 1830, *Numer. List* [Wallich] n. 5914. 1831–1832, Miquel, Friedrich Anton Wilhelm, *Plantae Junghuhnianae*. 1851–1857, *Bombay Fl.* 61. 1861 and *Leiden Botanical Series* 8: 93. 1984

(Toxic. Veterinary medicine, roots paste for curing stomach pain of cow and buffalo.)

in India: ardhga, gaj, galega, galuga, jungi, junginar, kesi-mala, majhidi, nagaru thige, nagarutige, pullagaya

Endospermum Benth. Euphorbiaceae

Greek *endon* 'inside' and *sperma* 'seed'; see George Bentham, *Flora hongkongensis*. 304. London 1861 and *Acta Phytotax. Geobot.* 50: 43–50. 1999.

Endospermum medullosum L.S. Sm.

Papuasias to Vanuatu. Large tree, crown monopodial, branches in whorls, bole usually twisted, bark with scattered lenticels, leaves simple entire, small greenish white flowers arranged in axillary spikes, petals absent, young leaves used as a vegetable

See *Proc. Roy. Soc. Queensland* 58: 53. 1947

(Bark and leaves in the treatment of rheumatism.)

in English: basswood whitewood

Endospermum moluccanum (Teijsm. & Binn.) Kurz (*Capellenia moluccana* Teijsm. & Binn.; *Endospermum formicarum* Becc.; *Endospermum labios* Schodde)

Sulawesi, New Guinea, Bismarck Arch., Solomon Is. Treelet, dioecious, leaves peltate crowded towards the end of the branches, young leaves boiled and eaten, branches inhabited by ants, in primary riverine forest

See *Genera Plantarum* 1304. 1841, *Cat. Pl. Bogor.* 178. 1844, *Natuurk. Tijdschr. Ned.-Indië* 29: 239. 1866, *Journal of Botany, British and Foreign* 5: 23. 1867, *Malesia* 2: 44. 1884 and *Kew Bull. Add. ser.* 8: 80. 1980

(Can cause an acute dermatitis on contact with the sap or latex. A wood decoction to treat ulcers. Bark crushed and heated to treat a dislocated knee or arm. Roots an antidote against arrow poison. Leaves purgative, included in a preparation to cure a swollen spleen.)

in English: basswood, moon tree

in Indonesia: kayu raja, pohon semut, wakopak

in Papua New Guinea: kalisic

Endostemon N.E. Br. Lamiaceae (Labiatae)

From the Greek *endon* 'inside' and *stemon* 'a stamen', referring to the nature of the stamens, included within the corolla tube, see *Flora Capensis* 5(1): 295. 1910.

Endostemon viscosus (Roth) M.R. Ashby (*Ocimum diffusum* Benth.; *Ocimum viscosum* Roth; *Orthosiphon diffusus* (Benth.) Benth.; *Orthosiphon glabratus* Benth.; *Orthosiphon viscosus* Benth.; *Plectranthus viscosus* (Roth) Spreng.)

India. Erect diffuse woody herbs, pink racemose inflorescence

See *Novae Plantarum Species* 274. 1821, *Systema Vegetabilium*, editio decima sexta 2: 691. 1825, *Plantae Asiaticae Rariores* 2: 14. 1830, *The Flora of British India* 4: 614. 1885 and *Journal of Botany, British and Foreign* 74: 126. 1936, *Reinwardtia* 5: 43. 1959, *Taxon* 30: 707-708. 1981, *Kew Bulletin* 49(4): 703. 1994

(To increase fertility in women fresh leaves ground with *Oryza sativa* and the extract drunk after menses.)

in India: vettu kaaya pachhilai

Engelhardia Leschen. ex Blume Juglandaceae

Named after Nicolaus Engelhard (Engelhardt), 1761–1831, from 1801 to 1808 Governor in Java, patron of botany, author of *Overzicht van den staat der Nederlandsche Oost-Indische bezittingen*, onder het bestuur van ... H.W. Daendels. 's Gravenhage en Amsterdam 1816; see *Bijdragen tot de flora van Nederlandsch Indië* 10: 528. 1826 [7 Dec 1825–24 Jan 1826], *Sylloge Plantarum Novarum* 2: 13. 1828[1825], *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1856(3–7): 33–34. 1856, *Annales des Sciences Naturelles; Botanique*, série 4 18: 35–36. 1862 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50: 475. 1914, *Fl. Males.* Ser. 1. 6: 148. 1960, M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 131. Dehra Dun 1985, *Taxon* 58(3): 1012–1013. 2009.

Engelhardia spicata Leschen. ex Blume (*Engelhardia aceriflora* Blume; *Engelhardia philippinensis* C. DC.; *Engelhardtia aceriflora* Blume; *Engelhardtia philippinensis* C. DC.; *Engelhardtia spicata* Blume)

Indonesia, Himalaya. Treelet, deciduous, reddish-grey wood, fibrous grey bark, compound leaves, glabrous shorty stalked leaflet with entire margin, flowers in catkins, inflorescences axillary, leaves as fodder

See *Bijdragen tot de flora van Nederlandsch Indië* 10: 528. 1825–1826 [7 Dec 1825–24 Jan 1826], *Fl. Javae Jugl.*, t. 2, 5. 1829, *Annales des Sciences Naturelles; Botanique*, série 4 18: 35. 1862, *FBI* 5: 595. 1888 and *Fl. Males.*, Ser. 1, *Spermat.* 6(6): 953. 1972, *Notes Roy. Bot. Gard. Edinburgh* 40(1): 133. 1982

(Bark paste applied for internal injuries; whole plant of *Begonia inflata* boiled with the bark of *Engelhardia spicata*

and the liquid drunk for dysentery and piles. Pounded roots applied for scabies. Roots and bark as fish poison, also bark and crushed young leaves. Sacred tree near temple.)

in English: great Malay beam

in Bhutan: tshos shing

in Burma: mova

in China: yun nan huang qi

in India: bol-sne, bol sne, bolas, dieng duba, dieng lamba, dieng lyba, gadh mauha, hejuga-manbi, hejugamanbi, hnum, lal amiri, lewa, mahua, mahwa, marle-araung, maua, mawa, ripekam, rubok, rudek, rumgach, samma, silapoma, wakru

in Nepal: mauwa, mawa

in Philippines: leten

Engelmannia Torrey & A. Gray ex Nutt. Asteraceae

For the American (b. Frankfurt, Germany) botanist George Engelmann, 1809–1884, physician, explorer, author of *Cactaceae of the Boundary*. [United States and Mexican Boundary Survey under the order of Lieut. Col. W.H. Emory.] Washington 1859, with the American botanist John Milton Bigelow (1804–1878) wrote *Description of the Cactaceae*. Washington, D.C. 1856, with Asa Gray and Joseph William Blankinship (1862–1938) wrote *Plantae lindheimerianae*. Boston 1845–1850, he was the brother of Henry Engelmann (1831–1899). See *Transactions of the American Philosophical Society*, new series, 7: 343–344. 1840, *A Flora of North America* 2: 283. 1842 and John H. Barnhart, *Biographical Notes upon Botanists*. 1: 510. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 117. 1972, Stafleu and Cowan, *Taxonomic Literature*. 1: 754–756. Utrecht 1976, *Amer. J. Bot.* 64: 791–798. 1977, *Bot. J. Linn. Soc.* 82: 357–368. 1981.

Engelmannia peristenia (Raf.) Goodman & C.A. Lawson (*Engelmannia pinnatifida* Nutt.; *Silphium peristenium* Raf.)

USA.

See *Species Plantarum* 2: 919–920. 1753, *Atlantic Journal* 1(4): 146. 1832, *Transactions of the American Philosophical Society*, new series, 7: 343–344. 1840, *Repertorium Botanices Systematicae* 2: 976. 1843 and *Rhodora* 94(880): 381. 1992

(Leaves boiled and the liquid used for washing sores.)

Englerina Tieghem Loranthaceae

After the German botanist Heinrich Gustav Adolf Engler, 1844–1930, among his very numerous publications are *Die natürlichen Pflanzenfamilien*. [co-editor and co-author Karl Anton Eugen Prantl, 1849–1893] Leipzig 1887–1915, *Syllabus*

der Vorlesungen über specielle und medicinisch-pharmaceutische Botanik. Berlin 1892 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen*. Leipzig 1898–1904; see *Bulletin de la Société Botanique de France* 42: 257. 1895 and Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 510. Boston 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 117. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 154–155. 1973, Stafleu and Cowan, *Taxonomic Literature*. 1: 757–797. Utrecht 1976; Simon Mayo, Josef Bogner and Peter Boyce, “The Acolytes of the Araceae.” *Curtis’s Botanical Magazine*. Volume 12. 3: 153–168. August 1995.

Chev.; *Chrysophyllum gossweileri* De Wild.; *Chrysophyllum lujae* De Wild.; *Chrysophyllum lujai* De Wild.; *Chrysophyllum magalimontanum* Sond.; *Chrysophyllum mohorensense* Engl.; *Chrysophyllum tessmannii* Engl. & K. Krause; *Chrysophyllum wilmsii* Engl.; *Neoboivinella argyrophylla* (Hiern) Aubrév. & Pellegr.; *Neoboivinella gossweileri* (De Wild.) Liben; *Neoboivinella wilmsii* (Engl.) Aubrév. & Pellegr.; *Pachystela antunesii* (Engl.) Lecomte; *Pachystela argyrophylla* (Hiern) Lecomte; *Pachystela magalimontana* (Sond.) Lecomte; *Pouteria antunesii* (Engl.) Baehni; *Pouteria magalimontana* (Sond.) A. Meeuse; *Sideroxylon randii* S. Moore; *Zeyherella farannensis* (A. Chev.) Aubrév. & Pellegr.; *Zeyherella gossweileri* (De Wild.) Aubrév. & Pellegr.; *Zeyherella magalimontana* (Sond.) Aubrév. & Pellegr.)

Tanzania to S. Africa. Evergreen shrub or small tree, fast growing, dark green spreading crown, short crooked fluted trunk, young parts covered with rusty brown hairs, along branches small clusters of tiny cream-pink flowers strongly scented, crowded on old wood orange-red fruit sharply tipped by the old style, all parts contain milky sap, sweet ripe fruit eaten raw, found in coastal deciduous woodland, in riverine vegetation, in sandy soils

See *Linnaea* 23: 72. 1850 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(Suppl.): 343. 1914, *Bulletin du Muséum d’Histoire Naturelle* 25: 189, 192, 194. 1919, *Pl. Bequaert.* 4: 130, 133. 1926, *Candollea* 9: 321. 1942, *Bulletin de la Société Botanique de France* 105: 37. 1958, *Bull. Soc. Bot. France* 106: 23. 1959, *Kew Bulletin* 14: 307. 1960, *Bothalia* 7: 335. 1960, *Notul. Syst. (Paris)* 16: 257. 1961, *Bull. Jard. Bot. Natl. Belg.* 60: 288. 1990, *The Genera of Sapotaceae* 252. 1991, *Journal of the South Africa Veterinary Association* 72: 189–196. 2001

(Roots pounded, the powder rubbed on the forehead after scarification to treat headache. Fruit and roots pounded, the powder soaked in cold water, the infusion used to treat epilepsy. Veterinary medicine, roots to increase fertility.)

in English: stem fruit

in South Africa: motlastswa

in Tanzania: mduyuyu, mlangale, mlembelembe, mtwentwe, mtondole

Englerophytum natalense (Sond.) T.D. Penn. (*Amorphospermum natalense* (Sond.) Baehni; *Bequaertiodendron natalense* (Sond.) Heine & J.H. Hemsl.; *Boivinella kilimandscharica* (G.M. Schulze) Aubrév. & Pellegr.; *Boivinella natalensis* (Sond.) Pierre ex Aubrév.

& Pellegr.; *Boivinella natalensis* (Sond.) Aubrév. & Pellegr.; *Chrysophyllum kilimandscharicum* G.M. Schulze; *Chrysophyllum natalense* Sond.; *Neoboivinella kilimandscharica* (G.M. Schulze) Aubrév. & Pellegr.; *Neoboivinella natalensis* (Sond.) Aubrév. & Pellegr.; *Pouteria natalensis* (Sond.) A. Meeuse)

Tanzania, Kenya to S. Africa. Evergreen tree, spreading branches, young parts covered with dense brown hairs, lower leaf surface with long hairs, cream corolla, hairy brown sepals in one whorl, oval berry red and smooth, sweet fleshy ripe fruit pulp eaten raw, lowland and upland rainforest, forest margins, riverine, clearings, coastal forests

See *Linnaea* 23: 72. 1850 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(Suppl.): 343. 1914, *Bulletin du Muséum d'Histoire Naturelle* 25: 189, 194. 1919, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 196. 1934, *Bulletin de la Société Botanique de France* 105: 37. 1958, *Bulletin de la Société Botanique de France* 106: 23. 1959, *Kew Bulletin* 14: 308. 1960, *Bothalia* 7: 339. 1960, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 11: 103. 1965, *The Genera of Sapotaceae* 252. 1991

(Roots used to treat stomachache, abdominal pain.)

in English: Natal milk plum

in Tanzania: mdulu, mdulu-ndugu, mduyuyu, mnumbulu, msolosolo, ndabelobe, ngapillo, ngapilo

Enicostema Blume Gentianaceae

Singular stamen, from the Greek *henikos* 'single, the singular number' and *stema* 'stamen', referring to the nature of the stamens, an allusion to the scale at the base of the filaments, see *Archiv für die Botanik* 1(1): 9, 10, 11. 1796, *Bijdragen tot de flora van Nederlandsch Indië* 14: 848. 1825, *Conspectus Regni Vegetabilis* 133. 1828, *Flora Telluriana* 3: 26–27. 1836[1837], *A General History of the Dichlamydeous Plants* 4: 174, 201. 1837, *Genera Plantarum* 605. 1838, *Nomencl. Bot.* [Steudel], ed. 2. 1: 555. 1840, *Revisio Generum Plantarum* 2: 428. 1891 and *Blumea* 16(1): 133–136. 1968, *Adansonia*, n.s. 9(1): 59–85. 1969, *Gentianaceae N.W. Himalayas* 63. 1987.

Enicostema axillare (Lam.) A. Raynal (*Adenema hyssopifolium* (Willd.) G. Don; *Cicendia hyssopifolia* (Willd.) Wight & Arn.; *Enicostema axillare* subsp. *latilobum* (N.E. Br.) A. Raynal; *Enicostema axillare* subsp. *littorale* (Blume) A. Raynal; *Enicostema hyssopifolium* (Willd.) I. Verd.; *Enicostema latilobum* N.E. Br.; *Enicostema littorale* Blume; *Enicostema verticillare* (Retz.) A. 1969, *Taxon* 28: 393–395. 1979, *Taxon* 36: 766–767. 1987

(Used in Ayurveda and Sidha. Plant extract hepatoprotective, carminative, pungent, antipsychotic, antiinflammatory, very bitter, tonic, stomachic, restorative, laxative, anthelmintic, stimulating the heart; whole plant decoction for snakebite, fever, jaundice, diabetes. Whole plant, dried, powdered and mixed with honey, used as a blood purifier and to relieve dropsy, rheumatism, abdominal ulcers, hernia, swellings, itches, insect poisoning and to expel worms. Leaves decoction febrifuge, bitter, astringent, for malaria, dysentery, diabetes, fever, venereal diseases; leaves extract febrifuge; leaves juice dropped in ear in case of toothache; leaf paste as anti-fertility in men. Roots for fever and abdominal pain. Veterinary medicine, leaves paste applied on yoke gall and horn cancer; root powder made into a paste applied on weevils in wounds of cattle; whole plant ground with *Oldenlandia umbellata* and pepper given in impaction; whole plant pounded with garlic and ginger and applied over boils, ulcers and wounds.)

in English: quinine bush

in India: arukumuli, bili ranjaka, cakkiraviraiyanantan, cakulatcam, cantam, cataviriyam, chhota-chirayata, chhota-kirayata, chhotakirayata, chikka chiraayatha, chikka chirayuta, chikka chirayutha, chota-chiretta, chota cirayita, chota-karait, chota-kirayat, chotachirayata, cilettumat-taippakkuvampanni, citalatam, cuvetakantam, cuvetakan-tavaruku, cuvetaki, cuvetakiyarukuceti, cuvetaturu, cuyakaritakanaci, cuyavani, gorimadaku, gorimidi, gulvidi, iyavarikaceti, iyavarikam, kadavinayi, kadvinai, katvinayi, kirmihrita, krimihrita, ksharakarma, kshitaukshupa, kulomi, mabhijaka, magajihva, mamajaka, mamajjaka, mamajjakah,

(Used in Sidha. Antipyretic, blood purifier, antidiabetic.)

in India: vellarugu

Enkleia Griffith Thymelaeaceae

From the Greek *enkleio* ‘close, shut in’, or perhaps from *en* and *kleos* ‘glory’, referring to the bracts and flowers, see *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 234–235. 1844 and *Philippine Journal of Science* 7(5): 312–313. 1912, *J. Arnold Arbor.* 42(4): 373–396. 1961, *Fl. Cambodge, Laos & Vietnam* 26: 38–81. 1992, *Fl. Thailand* 6(3): 226–245. 1997.

Enkleia siamensis (Kurz) Nevling subsp. **andamanica** (Hutch. ex C.E. Parkinson) Nevling (*Enkleia andamanica* (Hutch. ex C.E. Parkinson) N.P. Balakr.; *Linostoma andamanica* Hutch. ex C.E. Parkinson)

India. Woody climber, hooked stem, opposite leaves, small greenish-white flowers

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 39(2): 82. 1870 and *Forest Fl. Andaman Isl.* 229. 1923, *Journal of the Arnold Arboretum* 42(4): 395. 1961, *Bulletin of the Botanical Survey of India* 22(1–4): 176. 1980[1982]

(Roots for fevers, smallpox, snakebite.)

Ensete Bruce ex Horan. Musaceae

The generic name is based on the Ethiopian name of the plant, see *Prodromus Monographiae Scitaminearum* 8, 40. 1862 and *Kew Bulletin* 8: 405–416. 1953, *Kew Bulletin* 8: 574. 1954, *Baileya* 175: 189–193. 1957, *Economic Botany* 20(1): 65–70. 1966, *Acta Phytotax. Sin.* 16(3): 57. 1978.

Ensete glaucum (Roxburgh) Cheesman (*Ensete agharkarii* (Chakravorti) Hore; *Ensete calospermum* (F. Muell.) Cheesman; *Ensete giganteum* (Kuntze) Nakai; *Musa agharkarii* Chakravorti; *Musa calosperma* F. Muell.; *Musa gigantea* Kuntze; *Musa glauca* Roxburgh; *Musa nepalensis* Wall.; *Musa troglodytarum* var. *dolioformis* Blanco) (Latin *dolium* ‘with a wide mouth’)

Nepal, China. Pseudostem (trunk) and leaves covered with a glaucous grey-green wax, huge nodding banana-producing inflorescence, used to feed pigs

See *Hortus Bengalensis*, or a catalogue ... 19. 1814, *Pl. Coromandel* 3: 96. 1820, *Fl. Ind.* 2: 492. 1824, *Proc. Linn. Soc. New South Wales* 10: 356. 1885, *Revis. Gen. Pl.* 2: 691. 1891 and *Kew Bull.* 2(2): 101. 1947 [1948], *Bull. Tokyo Sci. Mus.* 22: 12. 1948, *J. Indian Bot. Soc.* 27: 93. 1948, Li Hsi-wen. *Musaceae subfam. Musoideae*. In: Wu Te-lin, ed., *Fl. Reipubl. Popularis Sin.* 16(2): 1–14. 1981, *J. Econ. Taxon. Bot.* 16: 450. 1992

(Cut pseudostem for sap collection, sap astringent, cooling, antiseptic, for skin diseases, dysentery, insect bites.)

in English: elephant hip, giant Nepal banana, snow banana

in China: xiang tui jiao

in India: kusuma arati, saisu

in Myanmar: nat-nget-pyaw, nat nghak-pyau, shew-kyin-hnget-pyaw, shwe-nget-pyaw

Ensete livingstonianum (J. Kirk) Cheesman (*Ensete elephantorum* (K. Schum. & Warb.) Cheesman; *Ensete gillettii* (De Wild.) Cheesman; *Ensete religiosum* Cheesman, nom. inval.; *Musa chevalieri* Gagnep.; *Musa elephantorum* K. Schum. & Warb.; *Musa gillettii* De Wild.; *Musa livingstoniana* J. Kirk; *Musa religiosa* Dyb.)

Tropical Africa. Stout single-stemmed herbaceous, leaves spreading along the stem

See *Journal of the Linnean Society, Botany* 9: 128. 1867 and *Rev. Hort.* 72: 262. 1900, *Pflanzenr.*, IV, 45: 14. 1900, *Bull. Soc. Bot. France* 55(8): 87. 1908, *Kew Bulletin* 2: 101–103. 1947 (publ. 1948)

(Alkaloids. For toothache.)

Ensete superbum (Roxb.) Cheesman (*Musa superba* Roxb.)

India. Herbs, stout spikes, flowers in two rows

See *Pl. Coromandel*, 3: 17. 1811, *Hort. Bengal.* 19. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey &

Wall., 2: 489–490. 1824, *Fl. Ind.*, ed. Carey, i. 667. 1832 and *Kew Bulletin* 1947(2): 100. 1947[1948]

(Seed powder to treat kidney stones and painful urination; pounded seeds infusion taken against dog bite.)

in India: kalluvazha, karali, paravazha, rankeli
