(Plant depurative, a poison antidote, tonic, stimulant, restorative and diuretic, to treat urogenital problems, anemia, malaria, jaundice, menstrual disorders, leucorrhoea. Fruits and leaves poison antidote, emollient, aphrodisiac, for urogenital

disorders. Leaves anthelmintic, used for gonorrhoea, skin and venereal diseases, eczema, anemia, toothache, jaundice; calyx decoction diuretic. Veterinary medicine, against internal parasites.)

in English: false roselle, wild sorrel

in Benin: eroukpan ekoun, ganwama

in Central African Republic: jimatsambere

in Guinea: follere

in Mali: foléré, torida

in Nigeria: yakuwar kare

in Tanzania: lihana

***Hibiscus boryanus* DC.**

Réunion and Mauritius. Shrub or small tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 446. 1824

(Leaves infusion taken against cough, leaves used in a bath against kidney pain.)

in La Réunion Isl.: fousapate marron, mahot bâtar

***Hibiscus calyphyllus* Cav. (*Hibiscus brackenridgei* A. Gray var. *kauaiana* Caum; *Hibiscus calycinus* Willd., nom. illeg.; *Hibiscus calyphyllus* var. *grandiflorus* De Wild.; *Hibiscus grandifolius* Hochst. ex A. Rich.; *Hibiscus lunariifolius* Willd.; *Hibiscus ovalifolius* Vahl; *Hibiscus ovalifolius* (Forssk.) Vahl; *Hibiscus rockii* O. & I. Deg.; *Hibiscus wildii* Suesseng.)**

Tropical Africa, Tanzania. Shrubby herb, hairy, coarse, arching shrubs, scandent, trailing, woody based, multi-trunked, creeping, leaves long stalked, solitary flowers, corolla pale yellow with dark purple center, capsule densely hairy and beaked at the tip, leaf and flowers edible, tender leaves eaten in small amount as a vegetable, in forest, disturbed areas, at forest edge, riverine forests

See *Monadelphiae Classis Dissertationes Decem* 5: 283, t. 140. 1788, *Species Plantarum*. Editio quarta 3: 817. 1800 and *Taxon* 29: 535–536. 1980, *Cytologia* 46: 149–160. 1981, *Cytologia* 47: 109–116. 1982, *Vistas in Cytogenetics* 1: 229–236. 1989, *Sida* 15: 639–647. 1993

(Leaves mixed with honey to treat bleeding stomach; leaves applied on sores, wounds; leaves and fruits pounded and mixed with butter given to treat gonorrhoea. Roots boiled and used in a steam bath, the liquid drunk as a remedy for pneumonia. Veterinary medicine.)

in English: hibiscus, lemon-eyed rose mallow, Pondoland hibiscus

in India: geesu, madkae (*Hibiscus ovalifolius* (Forssk.) Vahl)

in Congo: kanyerekiru

in Kenya: kungala, nauru-kasikou

(Used in Sidha. Whole plant decoction for cough, bronchitis, respiratory diseases. Flowers emollient. Leaves, stems and flowers pounded, soaked in cold water and the infusion

used as a bath to stop the itching of chickenpox. Leaves and stalks for urinary complaints, urogenital infection, venereal sores and urethritis; leaves and stems are burnt and the ash rubbed on affected parts of the abdomen to relieve hernia; stem and leaves for venereal sores and urethritis. Leaves emollient, tonic, stomachic, cooling, antiinflammatory, a poultice on abscesses, boils, wounds and ulcers; leaves infusion for venereal diseases, gonorrhoea; leaves with water to treat bloody diarrhoea; leaf sap taken to prevent miscarriage and to treat vertigo. Root decoction used as a laxative. Veterinary medicine.)

in English: shrub althea, wild sour

in La Réunion: oseille malabare

in Benin: ahon ekun

in Comoros: isanibaha

in Congo: bakoumou, dakumu, iboua-la-ayiri, muhara-vumba, mutuvya, mutuzo, nsiema-nsiema, orwenge, umutuzo, uruberwa

in Mozambique: coaca - coaca, garusa, licumba - cumba, m'tama - m'tama, nhakhurkhue, punho, tunde

in Nigeria: awun-ekun, wongo

in Sierra Leone: koli-ne, meling-di-bil-le, nyarifokai, ra-mer-ra-sip, ra-mer-ra-sop, sando-pompowo, waild-sawa (Creole word for wild sour)

in Southern Africa: uCathucathu (Zulu)

in Tanzania: ishari, kakonda, kakungiri, kokozi, kololwe, lumaka, mwalavi, mwalawi, mwawawu, namwovon, pekepeke

in Togo: kpodé

in Uganda: gwanyara

in Yoruba: ahon ekun, ako iremora, akoiremora, awun-ekun, wojon

in India: habit-han-seraung, kashlikirai, kattuppuliccai, kondagengura, mampazhaya, mullu gogu, mullugogu, puli, ran bhindi, sehnep

in Indonesia: sesusur

in Philippines: ahimit, andalahit, sampinit, barbarinit, inabu, kalitoitoi, labneg, labog, labuag, sabnit, sagmit, sapinit

Hibiscus syriacus L. (*Althaea frutex* Hort.: *Althaea frutex* Hort. ex Mill.; *Hibiscus acerifolius* Salisb., nom. illeg. superfl.; *Hibiscus arborescens* Gaterau; *Hibiscus chinensis* DC.; *Hibiscus floridus* Salisb., nom. illeg. superfl.; *Hibiscus rhombifolius* Cav.; *Ketmia arborea* Moench, nom. illeg. superfl.; *Ketmia syriaca* (L.) Scop.; *Ketmia syrorum* Medik., nom. illeg. superfl.; *Trichopilia multiflora* Kraenzl., Orchidaceae)

China, Taiwan. Shrub, smooth, erect, leaves cuneiform-ovate, nectary absent, calyx deeply lobed, flowers pale bluish-violet with a dark centre sometimes variegated, petals obovate,

hairy reniform seed reniform, young leaves and flowers eaten raw or cooked

See *Species Plantarum* 2: 693, 695. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Gardeners Dictionary: ... eighth edition* Alt. Hib. 1768, *Flora Carniolica*, Editio Secunda 2: 45. 1772, *Monadelphiae Classis Dissertationes Decem* 3: 156, t. 69, f. 3. 1787, *Ueber einige künstliche Geschlechter aus der Malvenfamilie ...* 45. 1787, *Methodus Plantas Horti Botanici ...* 617. 1794, *Prodr. Stirp. Chap. Allerton* 383. 1796, *The Paradise Londinensis* 1: t. 33. 1805, *Edwards's Botanical Register* 22: t. 1863. 1836 and *Fl. W. Pakistan* 130: 13. 1979, *Journal of Cytology and Genetics* 25: 145. 1990

(Leaves diuretic, expectorant, hypolipidemic, tonic, stomachic. Flowers decoction diuretic, stomachic, used in the treatment of itch, skin diseases, dizziness and bloody stools. Mucilaginous bark and root demulcent; root bark decoction antiphlogistic, demulcent, emollient, febrifuge, hemostatic, vermifuge, used in the treatment of diarrhoea, dysentery, abdominal pain, menstrual disorders, female diseases, leucorrhoea, dysmenorrhoea.)

in English: rose of Sharon, shrubby althaea, Syrian hibiscus

in Mexico: tulipan

in Portuguese: cardeal roxo

in China: jih chi, fan li tsao, mu chin, mu jin pi

in India: saron-rosepar, swet jaba

in Japan: hanagachi, mukuge

in the Philippines Islands: gumamelang asul

in Thailand: chabaa cheen

in Vietnam: h[oof]ng c[aa]n bi[ees]c, m[oo]c c[aa]n

Hibiscus talbotii (Rakshit) T.K. Paul & M.P. Nayyar

India.

See *Bull. Bot. Surv. India* 22(1-4): 198. 1980 (publ. 1982), *Cytologia* 46: 149-160. 1981

(Root extract given for treating menorrhagia, menstrual disorders.)

in India: barikali-bhendi

Hibiscus trionium L. (*Hibiscus vesicarius* Cav.; *Ketmia trionium* (L.) Scop.; *Ketmia trionium* Scop.; *Trionium annuum* Medik.; *Trionium cordifolium* Moench; *Trionium diffusum* Moench; *Trionium frutescens* Medik.; *Trionium trionium* (L.) Wootton & Standl., nom. illeg.; *Trionium trionium* Wootton & Standl.)

Old World tropics and subtropics. Herb, annual, fibrous root, stem with stellate hairs or hispid, petals greenish yellow and very dark purple-brown at base, anthers yellow, inflated bladderlike calyx in fruit, young leaves, flowers and young shoots eaten raw or cooked

See *Species Plantarum* 2: 697. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Botanica expeditior* 34, 78. 1760, *Flora Carniolica*, Editio Secunda 2: 44. 1772, *Ueber einige künstliche Geschlechter aus der Malvenfamilie ...* 47. 1787, *Methodus* (Moench) 618. 1794 and *Contributions from the United States National Herbarium* 19: 417. 1915, *Cytologia* 46: 149–160. 1981, *Le Naturaliste Canadien* 108: 143–152. 1981, *Cytologia* 47: 109–116. 1982, *Bot. Zurn.* 71: 1426–1427. 1986, *Journal of Applied Botany* 72(3–4): 92–98. 1998, *Journal of Camel Practice and Research* 5(1): 161–164. 1998

(Flowers infusion diuretic, to treat itch and painful skin problems. Fruit laxative. Ground shoot infusion antalgic, stomachic, analgesic, antiseptic, to clean wounds, used against roundworm. Leaves used as an expectorant and to treat warts, boils; dried leaves stomachic. Veterinary medicine, dry fruits given to camels as a laxative.)

in English: black-eyed Susan, bladder hibiscus, bladder ketmia, bladder weed, bladderweed, devil's head in a bush, flower of-an-hour, trailing hollyhock, Venice mallow

in Arabic: teal shitani

in Southern Africa: terblansbossie, uurbloem; iYeza lentshulube (Xhosa); lefefane, solwane (Sotho)

in India: cemparavalli

in Japan: gin-se-ka, cho-ro-sô

Hibiscus vitifolius L. (*Fioria vitifolia* (L.) Mattei; *Hibiscus heterotrichus* DC.; *Hibiscus strigosus* Schumach. & Thonn.; *Hibiscus suarezensis* Baill.; *Hibiscus vitifolius* var. *heterotrichus* (DC.) Hochr.; *Kosteletzkya stellata* Fernald)

Tanzania, Madagascar. Shrub, perennial mucilaginous herb, papery leaves, petals light yellowish-green except for the dark red-purple base inside, fruit green with irritating hairs

See *Species Plantarum* 2: 696. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 450. 1824, *Beskrivelse af Guineiske planter* 314. 1827, *Bulletin Mensuel de la Société Linnéenne de Paris* 514. 1885 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 4: 170. 1900, *Bol. Ort. Bot. Palermo* n.s. 2: 71. 1917

(Used in Ayurveda and Sidha. Dry leaves decoction taken as a blood tonic, febrifuge. For contraception. Paste of stem bark applied on bone fracture; powder of root bark applied to hair for killing lice.)

in India: adavi patthi, bala, ban kapas, banokhra, bharadvaji, centutti, civananti, civananticeti, dhakto-kalo-bhendo, ilip-ara, isuka ravi, kaadu pindi soppu, kaadu pundi soppu, kaarupatthi, karupatti, kattuvelluram, kattuvelluran, katubeloeren, katubeloeren, khatmi, mani thutthi balli, mani thutthi gida, manittutti, matiana, parattuvaci, pindisoppu, vanakarpasa, vanakarpacam, vanakkarpaci, vanbhindo, vankapas

Hierochloe Gmelin ex R. Br. Poaceae (Gramineae)

Holy grass, from the Greek *hieros* 'sacred' and *chloe*, *chloa* 'grass', sacred grass, referring to its use in religious ceremonies, fragrant and strewn before church doors and floors on holy festivals; close to *Anthoxanthum* and *Phalaris*, see R. Brown, *Prodromus florae Novae Hollandiae*. 208. 1810, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany*. 25: 115–170. ["*Anthoxanthum* is the older name and species of *Hierochloe* are transferred to it; exceptions are the indigenous New Zealand taxa described by Zotov, etc."] 1987, Y. Schouten & J.F. Veldkamp, *Blumea*. 30: 319–351. 1985.

Hierochloe occidentalis Buckley (*Anthoxanthum occidentale* (Buckl.) Veldkamp; *Anthoxanthum occidentale* (Buckley) G.C. Tucker, nom. illeg., non *Anthoxanthum occidentale* (Buckley) Veldkamp; *Hierochloe macrophylla* Thurb. ex Boland.; *Savastana macrophylla* (Thurb. ex Bol.) Beal; *Torresia macrophylla* (Thurb. ex Bol.) Hitchc.)

North America, USA. Perennial bunchgrass with white flowers, scented, bisexual floret equalling or exceeding the glume apices, both staminate lemmas mostly glabrous sometimes scabrous distally, grows in shady conditions with average to low water

See *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 100. 1862, *Calif. Agric. Soc. Trans.* 1864–65: 132. 1866, *Grasses of North America for Farmers and Students* 2: 187. 1896 and *American Journal of Botany* 2: 300. 1915, *Blumea* 30(2): 348. 1985, *Harvard Papers in Botany* 1(9): 66. 1996

(Plant infusion taken as abortifacient or after miscarriage.)

in English: California sweet grass, California vanilla grass, Western sweetgrass

Hierochloe odorata (L.) P. Beauv. (*Anthoxanthum nitens* (Weber) Y. Schouten & Veldkamp; *Avena odorata* (L.) Koeler; *Dimesia fragrans* Raf.; *Hierochloe arctica* J. Presl; *Hierochloe borealis* (Schrad.) Roemer & Schultes; *Hierochloe borealis* Roem. & Schult., nom. illeg.; *Hierochloe bungeana* Trinius; *Hierochloe fragrans* (Willd.) Roemer & J.A. Schultes; *Hierochloe glabra* Trinius subsp. *bungeana* (Trinius) Peschkova; *Hierochloe nashii* (Bickn.) Kaczmarek; *Hierochloe odorata* (L.) Wahlenb.; *Hierochloe odorata* f. *eamesii* Fernald; *Hierochloe odorata* f. *pubescens* Krylov; *Hierochloe odorata* subsp. *dahurica* (Trin.) Printz; *Hierochloe odorata* subsp. *pubescens* (Krylov) H. Hara ex T. Koyama; *Hierochloe odorata* var. *fragrans* (Willd.) K. Richter; *Holcus borealis* Schrad.; *Holcus fragrans* Willd.; *Holcus odoratus* L.; *Poa nitens* Weber; *Savastana nashii* E.P. Bicknell; *Savastana odorata* (L.) Scribn.; *Savastana odorata* var. *fragrans* (Willd.) Farw.; *Torresia nashii* (E.P. Bicknell) House; *Torresia odorata* (L.) A.S. Hitchc.)

Circumboreal, North. temperate, Asia, Europe. Perennial, extremely long lived, erect, glabrous, herbaceous, aromatic with a strong scent of coumarin or vanilla, rhizomatous with an extensive root systems, rhizomes slender and creeping, rhizomes and roots form a dense mat, very hardy, spreads rapidly and vigorously, used to scent clothes, long leaves of sterile shoots used to make baskets which retain the vanilla-like scent for many years, usually occurs in wetlands, forest openings, moist meadows on river shore, sandy soils, bogs, under moist conditions in meadow habitats, seeps, low prairies, riparian habitats, shores, streambanks, marshes and salt marshes, occasionally found in non wetlands

See *Species Plantarum* 2: 1048. 1753, *Descriptio Graminum in Gallia et Germania* 299. 1802, *Flora Germanica* 1: 252. 1806, *Species Plantarum. Editio quarta* 4(2): 936. 1806, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Systema Vegetabilium* 2: 513–514. 1817, *American monthly magazine and critical review* 1: 442. 1817, *Flora Upsaliensis* 8: 32. 1820, *Reliquiae Haenkeanae* 1(4–5): 252. 1830, *Plantae Europaeae* 1: 31. 1890, *Memoirs of the Torrey Botanical Club* 5(3): 34. 1894, *Bulletin of the Torrey Botanical Club* 25(2): 104, pl. 328. 1898 and *American Midland Naturalist* 3: 198. 1914, *American Journal of Botany* 2: 301. 1915, *Rhodora* 19: 152. 1917, *Report of the Michigan Academy of science, arts and letters* 21: 350. 1920, *New York State Museum Bulletin* 243–244: 58. 1923, K.J. Norstog, "Some observations on the spikelet of *Hierochloë odorata*." in *Bull. Torrey Bot. Club.* 87: 95–98. 1960, *Blumea* 30(2): 348. 1985, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(Plant infusion taken for colds, coughs, fevers and sore throats, venereal infections, backache; burning leaves smoke inhaled for colds and dried leaves can be smoked. Leaves are dried and made into braids and burned as incense in New Mexico, the peoples of both Europe and North America considered this plant sacred, used in peace, protection, purification and healing rituals, strewn before church doors on Saints' days in northern Europe; leaves ceremonially smoked with tobacco, and burned in homes to prevent evil. Veterinary medicine, leaves used for saddle sores on horses.)

in English: sweetgrass

in China: mao xiang

Hildebrandtia Vatke ex A. Braun Convolvulaceae

For the German traveller Johann Maria Hildebrandt, 1847–1881, botanist, plant collector in East Africa, see *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1876: 7. 1876.

Hildebrandtia obcordata S. Moore

East Africa. Strong stem

See *Journal of Botany, British and Foreign* 37: 406. 1899

(Laxative, roots infusion drunk with milk.)

in Kenya: egong

Hillieria Vell. Conc. Phytolaccaceae

Dedicated to German botanist Matthaeus Hiller, 1646–1725, professor at the University of Tübingen, among his writings are *De Arcano Kethib, et Keri*. Tubingae 1692, *De origine gentium Celticarum*. Tubingae 1707, *Hierophytonicon*, sive Commentarius in loca Scripturae Sacrae quae plantarum faciunt mentionem. Trajecti ad Rhenum 1725, *Institutionum Linguae Sanctae Compendium*. Tubingae 1712, *Onomasticum Sacrum*. Tubingae 1706 and *Tractatus de gemmis duodecim in pectorali Pontificis Hebraeorum*. Tubingae 1698. See *Fl. Flumin.* 47. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Nov. Gen. Sp. Pl.* (Martius) iii. 170. t. 290. 1829, *Fl. Flumin. Icon.* 1: 122. 1831. [1827 publ. 29 Oct 1831], *Nova Genera et Species Plantarum ...* 3: 170. 1832 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 546–558. 1937, *Journal of Japanese Botany* 18: 99. 1942.

Hillieria latifolia (Lam.) H. Walter (*Hillieria elastica* Vell.; *Hillieria latifolia* H. Walter; *Mohlana latifolia* Moq.; *Mohlana latifolia* (Lam.) Moq.; *Mohlana nemoralis* Mart.; *Rivina latifolia* Lam.)

East Africa. Herb, slender, delicate, woody below, stems and young leaves red-purple, leaves stiffly hairy, on terminal stalks small pinkish or whitish flowers, lower half of inflorescence brown and yellow, smooth reddish fruits, fruiting sepals green reddish, in disturbed area, at forest edge, lowland rainforest

See *Species Plantarum* 1: 121–122. 1753, *Encyclopédie Méthodique, Botanique* 1: 324. 1791, *Florae Fluminensis* 47. 1825, *Nova Genera et Species Plantarum ...* (Martius) 3: 170–171. 1832 [1829], *Prodr.* (DC.) 13(2): 16. 1849 and *Das Pflanzenreich* (Engler) IV. *Phytolacc.* Fam. 83(Heft 39): 81–82. 1909, *Journal of Japanese Botany* 18: 99. 1942

(Considered poisonous to both humans and animals; fruits and seeds reported poisonous to livestock, sheep and goats. Leaves and stem bark analgesic, antiseptic, wound healing. Leaves and twigs decoction used for the treatment of jaundice; leaves decoction, in small doses, given for leprosy and dropsy. A poultice of fresh leaves or roots applied to boils; crushed leaves applied for violent headache.)

in English: pepper herb

in Ghana: anafranaku, avegboma

Hillia Jacq. Rubiaceae

For the British (b. Northants) botanist John Hill, 1716 (1707? 1714?)–1775 (d. London), M.D. 1750, plant collector, botanical writer, apothecary, naturalist, zoologist, Gustavus III of Sweden awarded him the Order of Vasa (afterwards Hill styled himself Sir John!), editor of *The British Magazine*, among his numerous publications (some 80 works) are *The British Herbal*. London 1756[–1757], *The Sleep of Plants* and *Cause of Motion in the Sensitive Plant*. London 1757, *The*

Construction of Timber. London 1770 and *The virtues of wild valerian in nervous disorders*. London 1772. See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 3, 18. 1760, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 293–294. London 1790, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, Sir James Edward Smith, *A selection of the correspondence of Linnaeus, and other naturalists*. 2: 46. London 1821, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1852(2–4): 49–50. 1853[1852] and Francis Wall Oliver, ed., *Makers of British Botany*. 84–107. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, *Annals of the Missouri Botanical Garden* 81(4): 571–609. 1994, Bernard Quaritch, *Catalogue 1253: Science*, item no. 50. London 1998.

Hillia macrophylla Standl. (*Hillia marcano-bertii* Steyerem.)

South America. Shrub, woody vine, liana, trailing, scandens, epiphyte, white fragrant flowers

See *Publications of the Field Museum of Natural History, Botanical Series* 7: 201. 1931, *Pittieria* 9: 5–7. 1981

(Immature fruits applied for bleeding piles.)

in Ecuador: engal guamuca

Hilsenbergia Tausch ex Rchb. Boraginaceae

See *The Civil and Natural History of Jamaica in Three Parts* 168–169, pl. 15, f. 2. 1756, *Conspectus Regni Vegetabilis* 117. 1828, *Plantarum vascularium genera secundum ordines* ... 198. 1840, *Rapport annuel sur les travaux de la société d'histoire naturelle del'Île Maurice* 12: 44. 1841, *Ann. Sci. Nat., Bot.*, ser. 2, 18: 189. 1842, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 504. 1845 and *Fieldiana, Bot.*

24(9/1–2): 111–167. 1970, *Ceiba* 19(1): 1–118. 1975, *Nordic Journal of Botany* 7(4): 413–417. 1987, *Ann. Missouri Bot. Gard.* 75(2): 456–521. 1988, *Adansonia*, sér. 3 25(2): 151–189. 2003, *Blumea* 51(2): 199–220. 2006, *Hilsenbergia* species have formerly been placed in the genera *Ehretia* and *Bourreria*.

Hilsenbergia lyciacea (Thulin) J.S. Mill. (*Bourreria lyciacea* Thulin)

Ethiopia, Somalia, Kenya and Madagascar.

See *Nordic Journal of Botany* 7: 415. 1987, *Adansonia*, sér. 3 25: 180. 2003

(Used to treat diarrhea and bleeding.)

Hilsenbergia nemoralis (Gürke) J.S. Miller (*Bourreria nemoralis* (Gürke) Thulin; *Ehretia litoralis* Gürke; *Ehretia nemoralis* Gürke)

Kenya, Tanzania and Mozambique. Shrub or tree, closely resembles *Hilsenbergia petiolaris*

See *Die Pflanzenwelt Ost-Afrikas* 335–336. 1895 and *Nordic Journal of Botany* 7: 415. 1987, *Adansonia*, sér. 3 25: 184. 2003

(Roots decoction to cure stomachache.)

in Tanzania: mbunduki, mpanda-yongoo, mtundutundu

Hilsenbergia petiolaris (Lam.) J.S. Mill. (*Bourreria petiolaris* (Lam.) Thulin; *Ehretia petiolaris* Lam.; *Hilsenbergia ehretia* Meisn.)

Kenya, Tanzania, Mozambique. Shrub or tree, scandent, fragrant flowers, waxy white campanulate corolla, inflorescence a lax pendulous corymbose cyme, orange-yellow to red

See *Encyclopédie Méthodique, Botanique* 1: 527. 1785, *Conspectus Regni Vegetabilis* 117. 1828 and *Nordic Journal of Botany* 7: 414. 1987, *Adansonia*, sér. 3 25: 184. 2003

(Stems and leaves reported to contain alkaloids, triterpenes, saponins and traces of flavonoids. Leaves to treat skin infections and childhood eczema.)

in Tanzania: mbunduki, mpanda-yongoo, mtundutundu

Himalrandia Yamaz. Rubiaceae

Randia L. from Himalaya, see *Genera Plantarum* 196. 1789 and *Journal of Japanese Botany* 45: 340. 1970.

Himalrandia tetrasperma (Wall. ex Roxb.) T. Yamaz. (*Aidia tetrasperma* (Wall. ex Roxb.) T. Yamaz.; *Gardenia densa* Wall.; *Gardenia rigida* Wall.; *Gardenia tetrasperma* Wall. ex Roxb.; *Himalrandia densa* (Wall.) Tirveng.; *Randia tetrasperma* (Wall. ex Roxb.) Benth. & Hook.f. ex Brandis; *Randia tetrasperma* Benth. & Hook. f.)

India, Afghanistan. Much grazed by cattle

See *Species Plantarum* 2: 1192. 1753, *Fl. Ind.* 1: 709. 1820, *Fl. Ind.* 2: 559, 570. 1824, *Forest Fl. N.W. India*: 272. 1874

and *Fl. E. Himal.*: 307. 1966, *J. Jap. Bot.* 45: 340. 1970, *Nordic J. Bot.* 3: 462. 1983

(Fruits used in the treatment of warts.)

in Nepal: hakugeda

Hintonia Bullock Rubiaceae

Dedicated to the English (b. London) George Boole Hinton, 1882–1943 (d. Mexico), plant collector in Mexico (1931–1941), botanist; see Charles Glass, “The *Geohintonia* circus.” in *Cactus and Succulent Journal*. vol. 69. 1: 3–7. 1997; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 344. 1994; Irving William Knobloch, compil., “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs*. VI. [b. 1883] 1983; J. Hinton and J. Rzedowski, “George B. Hinton, collector of plants in southwestern Mexico.” *J. Arnold Arb.* 53: 141–181. 1972.

Hintonia latiflora (Sessé & Moç. ex DC.) Bullock (*Coutarea latiflora* Sessé & Moç. ex DC.; *Coutarea pterosperma* (S. Watson) Standl.; *Hintonia latiflora* var. *leiantha* Bullock; *Hintonia standleyana* Bullock; *Portlandia pterosperma* S. Watson)

Mexico to El Salvador.

See *The Civil and Natural History of Jamaica in Three Parts* 164, pl. 11. 1756, *Histoire des plantes de la Guiane Française* 1: 314, t. 122. 1775, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 350. 1830, *Proceedings of the American Academy of Arts and Sciences* 24: 52. 1889 and *North American Flora* 32: 127. 1921, *Icones Plantarum* 33: t. 3295. 1935, *Monographs in Systematic Botany from the Missouri Botanical Garden* 73: 1–177. 1999

(Used for nausea and vomiting; sometimes used to treat diabetes.)

in Spanish: copalquin, copalchi

Hippeastrum Herbert Alliaceae (Amaryllidaceae, Liliaceae)

From the Greek *hippos* ‘horse’ and *aster*, *astron* ‘a star, the stars’, referring to the flowers, see *Trans. Hort. Soc. London* 4: 181. 1821, William Herbert (1778–1847), *An Appendix* 31. London 1821, *Fl. Tellur.* 4: 10–11. 1838, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 329. 1890 and *Mem. New York Bot. Gard.* 7: 214. 1927, *Nat. Pflanzenfam.* ed. 2 15a: 416. 1930, *Fieldiana, Bot.* 24(3): 103–145. 1952.

Hippeastrum puniceum (Lam.) Voss (*Ajax gayi* Hénon; *Amaryllis barbata* (Herb.) Traub; *Amaryllis belladonna* L.; *Amaryllis belladonna* E. Mey. ex Steud., nom. inval.; *Amaryllis belladonna* subsp. *barbata* (Herb.) Ravenna; *Amaryllis belladonna* subsp. *haywardii* (Traub & Uphof)

Chicago, Ill., USA. 1985, *Kew Bulletin* 42: 65–102. 1987, *Kew Bulletin* 43: 317–325. 1988,

Flora of Ecuador 41: 1–52. 1990, *Kew Bulletin* 52(4): 973–980. 1997, *Phytochemistry*. 65(14): 2113–8. 2004

(Ingesting the bulbs has poisoned humans. The toxic alkaloid, lycorine, is the principal toxin, although small quantities of related alkaloids are also present. Lycorine, a heat-stable alkaloid, is found in *Amaryllis* spp. as well as *Clivia* spp., *Galanthus nivalis*, and *Narcissus* spp. This chemical occurs in small quantities in *Amaryllis* species, so that large quantities of bulb must be eaten to cause symptoms. Extracts of *Amaryllis belladonna* had to be fractionated in order to produce significant antitumour activity in the P-388 lymphocytic leukaemia test-system.)

in English: amaryllis, Barbados lily, belladonna lily, cacao lily, fire lily

in Rodrigues Isl.: amaryllis, lys

in the Philippines: orange lirio

Hippeastrum vittatum (L'Hér.) Herb. (*Amaryllis lineata* Colla, nom. illeg.; *Amaryllis superba* Bury; *Amaryllis vittata* L'Hér.; *Amaryllis vittata* subsp. *guarapuavae* Ravenna; *Amaryllis vittata* var. *harrisoniae* Lindl.; *Amaryllis vittata* var. *major* Lindl.; *Amaryllis vittata* var. *tweediana* (Herb.) Traub; *Chonais vittata* (L'Hér.) Salisb., nom. inval.; *Hippeastrum ambiguum* var. *tweedianum* Herb.; *Hippeastrum vittatum* var. *harrisonianum* Herb.; *Hippeastrum vittatum* var. *latifolium* Herb.)

Brazil, Argentina.

See *Species Plantarum* 1: 292. 1753, *Sertum Anglicum* 8, t. 15. 1788 [1789], *Amaryllidaceae* 136–137. 1837 and *Amaryllis Manual* 268. 1958, *Darwiniana* 19: 566–582. 1975, *Botaničeskij Žurnal (Moscow & Leningrad)* 73: 1207–1208. 1988, *Journal of Cytology and Genetics* 30(1): 71–77. 1995

(Ingesting the bulbs has poisoned humans, the toxic alkaloid, lycorine, is the principal toxin.)

in English: amaryllis, Barbados lily

in Japan: beni-suji-sanjiko (beni = red)

Hippeophyllum Schltr. Orchidaceae

From the Greek *hippos* 'horse' and *phyllon* 'leaf', see *The Genera and Species of Orchidaceous Plants* 15. 1830 and *Die Flora der Deutschen Schutzgebiete in der Südsee* 107. 1905.

Hippeophyllum scortechinii (Hook.f.) Schltr. (*Iridorchis scortechinii* (Hook. f.) Kuntze; *Iridorkis scortechinii* (Hook.f.) Kuntze; *Oberonia scortechinii* Hook.f.)

Malaysia.

See *Fl. Brit. India* 5: 683. 1888, *Revis. Gen. Pl.* 2: 669. 1891 and *Bot. Jahrb. Syst.* 45(104): 13. 1911

(For earache, heat the leaves and drop the juice into the ear.)

Malay name: pokok setawar bakar perak

Hippobroma G. Don Campanulaceae

From the Greek *hippos* 'horse' and *bromos* 'rage, fury', referring to the poisonous nature of the toxic latex, see *Species Plantarum* 2: 929–933. 1753, *Familles des Plantes* 2: 134, 568. 1763, *A General History of the Dichlamydeous Plants* 3: 698, 717. 1834 and *Taxon* 49(2): 264. 2000.

Hippobroma longiflora (L.) G. Don (*Isotoma longiflora* (L.) C. Presl; *Laurentia longiflora* (L.) E. Wimm.; *Laurentia longiflora* (L.) Endl.; *Laurentia longiflora* (L.) Peterm.; *Lobelia longiflora* L.; *Rapuntium longiflorum* (L.) Mill.) (*Isotoma* (R. Br.) Lindley, from the Greek *isos* 'equal' and *tome* 'division, section, cutting', the segments of the corolla are equally cut; see J. Lindley, in *Edwards's Botanical Register*. 12: t. 964. (Apr.) 1826.)

South America.

See *Species Plantarum* 2: 930. 1753, *The Gardeners Dictionary*: ... eighth edition no. 7. 1768, *A General History of the Dichlamydeous Plants* 3: 698, 717. 1834, *Prodromus Monographiae Lobeliacearum* 42. 1836, *Genera Plantarum* 512. 1838, *Das Pflanzenreich* 444. 1845 and *Field Museum of Natural History, Botanical Series* 13(6/2): 383–489. 1937, *Annalen des Naturhistorischen Museums in Wien* 56: 335. 1948, *Fieldiana, Bot.* 24(11/4): 396–431. 1976

(Leaves strongly purgative. A drop of latex in eyes can cause blindness.)

in English: star of Bethlehem

in Panama: inakale

in Peru: flor de sapo, revienta caballos

in Hawaii: pua hoku

Hippobromus Ecklon & Zeyher Sapindaceae

From the Greek *hippos* 'horse' and *bromos* 'stench', referred to the scent of the leaves, see *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 2: 151. 1836.

Hippobromus pauciflorus Radlk. (*Hippobromus alata* (Thunb.) Eckl. & Zeyh.; *Hippobromus alatus* Eckl. & Zeyh.; *Hippobromus pauciflorus* (L.f.) Radlk.; *Rhus alatum* Thunb.; *Rhus pauciflora* L.f.)

South Africa. Tree, flowers white

See *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 2: 151. 1836, *Nat. Pflanzenfam.* [Engler & Prantl] iii, 5. 1895

(Very poisonous. Roots used for catarrh.)

in English: bastard horsewood, false horsewood, horsewood

in Southern Africa: basterperdepis, perdepisboom; uQhume, uqume, u(lu)Qhume, isiPhahluka (Zulu); uLwathile, ulwAthile, ulwatile, umFazi onengxolo, isiFutha (Xhosa); luTwile (Swazi)

Hippocratea L. Celastraceae (Hippocrateaceae)

After Hippocrates, c. 460–370 BC., Greek physician, the son of Heraclides, taught at Cos, lived in the age of Pericles and was contemporary of Herodotus, Thucydides, Socrates, Plato and Democritus, see *Opera quae extant*. Venetiis 1588, *Omnia opera Hippocratis* (graecae). Venetiis 1526 and also *Oeuvres complètes d'Hippocrate*: ed. E. Littré. Paris 1839–1861 (reprinted 1961); *Medici Graeci*. [Ed. C.G. Kühn.] Leipzig 1821–1829; W.H.S. Jones and E.T. Withington, *Hippocrates*. “Loeb Classical Library” 1923–31, reprinted 1957–59; John Chadwick and W.N. Mann, *The Medical Works of Hippocrates*. 1950; J. Stannard, *Bull. Hist. Med.* 35: 497–518. 1961. See Carl Linnaeus, *Species Plantarum*. 2: 1191. 1753, *The Gardeners Dictionary ... Abridged ...* fourth edition 1754, *Genera Plantarum*. Ed. 5. 498. 1754, *Iter Hispanicum* 314. 1758, *Familles des Plantes* 2: 445. 1763, *Annales du muséum national d'histoire naturelle* 18: 486. 1811, *Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftlichen Classe, Abteilung 1* 70(1): 410–411, 414, 416, 423. 1875, *Die Natürlichen Pflanzenfamilien* 3(5): 227. 1893 and *Brittonia* 3(3): 341–555. 1940, *Fieldiana, Bot.* 24(6): 218–222. 1949, *Ann. Missouri Bot. Gard.* 52(1): 81–98. 1965, Robert Joly, in *D.S.B.* 6: 418–431. 1981.

Hippocratea andamanica King (*Loeseneriella andamanica* (King) H.B. Naithani & S. Biswas)

India. Large climber, small greenish flowers in axillary and terminal cymes, fruits usually dehiscent

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 359. 1896 and *Flow. Pl. India, Nepal & Bhutan*: 95. 1990

(A remedy for ringworm. Root decoction a postpartum remedy, also used in rheumatism.)

Hippocratea welwitschii Oliv. (*Simicratea welwitschii* (Oliv.) N. Hallé; *Simirestis welwitschii* (Oliv.) N. Hallé)

Tropical Africa.

See *Flora of Tropical Africa* [Oliver et al.] 1: 367. 1868 and *Bull. Mus. Natl. Hist. Nat., B, Adansonia* Sér. 4, 5(1): 20. 1983

(Root bark antifungal, antimicrobial, analgesic, for liver troubles.)

Hippocrepis L. Fabaceae (Loteae)

From the Greek *hippos* ‘horse’ and *krepsis*, *krepidos* ‘a boot, shoe’, referring to the shape of the pod, see *Species Plantarum* 2: 744. 1753, *Gard. Dict. Abr.*, ed. 4. 1754 and *Rep. Bot. Exch. Cl. Brit. Isles*, 3: 431. 1913, *Anales Jard. Bot. Madrid* 57(2): 456, 459–460, 462. 2000 [1999 publ. Jan 2000], *Bot. Zhurn.* (Moscow & Leningrad) 88(6): 112. 2003.

Hippocrepis emerus (L.) Lassen subsp. *emerus* (*Coronilla emerus* L.; *Coronilla emerus* L. subsp. *emerus*; *Hippocrepis*

emerus (L.) Lassen) (*Coronilla* L., Latin *corona, ae* ‘a crown’, referring to the flowers; see Carl Linnaeus, *Species Plantarum*. 742. 1753 and *Genera Plantarum*. Ed. 5. 330. 1754.)

China, Europe. Perennial non-climbing shrub

See *Sp. Pl.* 2: 742. 1753 and *Svensk Bot. Tidskr.* 83(2): 86. 1989

(Poison. Cardiotonic, tonic, purgative, diuretic.)

in English: scorpion senna

Hippolytia Poljakov Asteraceae

See *Bot. Mater. Gerb. Bot. Inst. Komarova Akad. Nauk S.S.S.R.* 18: 288. 1957, *Acta Phytotaxonomica Sinica* 17(4): 63, 65. 1979, *Fl. Iranica* [Rechinger] 158: 132. 1986.

Hippolytia kennedyi (Dunn) Y. Ling (*Chrysanthemum kennedyi* (Dunn) Kitamura; *Tanacetum kennedyi* Dunn)

China.

See *Species Plantarum* 2: 843–845. 1753 and *Bulletin of Miscellaneous Information Kew* 1922(3): 117–118. 1922, *Acta Phytotaxonomica et Geobotanica* 15(2): 43. 1953, *Acta Phytotaxonomica Sinica* 17(4): 67. 1979

(Whole plant used for treating laryngitis.)

in China: dian zhuang nu hao

Hippolytia tomentosa (DC.) Tzvelev

India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 130. 1837 and *Flora URSS* 26: 416. 1961

(Paste of tubers for cold and cough. Ceremonial, tubers as incense, *dhoop*, during religious ceremonies.)

in India: dhoop

Hippomane L. Euphorbiaceae

Greek *hippomanes* ‘swarming with horses, horse-heat, horse-rage’, as subst. applied by Theophrastus (*HP.* 9.15.6) to the thorn-apple, *Datura stramonium*, of which horses are madly fond, or which makes them mad; *hippomania* ‘mad love for horses’; Latin *hippomanes* for a plant that was supposed to put mares in heat; see *Species Plantarum* 2: 1191–1192. 1753, *The Gardeners Dictionary ... Abridged ...* fourth edition 1754, *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 9, 21, 31. 1760, *Flore des Antilles* 3: 21. 1824, *Ordines Naturales Plantarum* 372. 1830, *Histoire Naturelle des Végétaux. Phanérogames* 2: 522. 1834, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 444. Ansbach 1852 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Biotropica* 13(3): 224–227. 1981, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 290. 1996,

Anales Inst. Biol. Univ. Nac. Autón. México, Bot. 73(2): 155–281. 2002, *Ceiba* 44(2): 105–268. 2003 [2005].

Hippomane mancinella L. (*Hippomane dioica* Rottb.; *Mancinella venenata* Tussac)

Northern and Southern America. Shrub or low spreading tree, caustic white milky latex, yellow flowers, fruits round yellow-green, fruit has odor and appearance of an apple, on beach, near beach

See Ligon, Richard, *A true and exact history of the island of Barbados*. London, 1657, *Species Plantarum* 2: 1191–1192. 1753, *Acta Lit. Univ. Hafn.* 1: 301. 1778, *Flore des Antilles* 3: 21. 1824, Fernández de Oviedo y Valdés, Gonzalo (1478–1557), *Historia general y natural de las Indias, islas y tierra firme del mar océano* ... Madrid, 1851–1855, Seemann, Berthold (1825–1871), *The botany of the voyage of H.M.S. Herald: under the command of Captain Henry Kellett, R.N., C.B., during the years 1845–51*. London, 1852–1857, Tonduz, Adolfo, *Flora de Costa Rica*. San José de Costa Rica, 1897 and *Bot. Commelins* 103. 1983, *West Indian Med. J.* 58(1): 65–66. 2009

(Fruits very dangerous, poisonous, if eaten. Poisonous, all parts of the plant, handle specimen with extreme care; rash produced on man who cut the specimen, face and arms, small itching to violent burning sensation, contact dermatitis. Milky sap of this tree is poisonous, especially if ingested; very irritating to eyes and skin, fumes hurt lungs. The starch of *Maranta arundinacea* L. has been used internally against vegetable poisons, *Hippomane mancinella*.)

in English: beach apple, manchineel

in Mexico: arbol de la muerte, hincha huevos, manzanillo

in South America: macanila, manzanillo, manzanillo de la costa, manzanillo de playa, manzano de playa marina, penipeniche, pinipeniche, ular

Hippomane spinosa L. (*Sapium ilicifolium* Willd.)

Caribbean. Tree or shrub, green shiny leaves, fruits round yellow-green-reddish

See *Species Plantarum* 2: 1191. 1753, *Species Plantarum*. Editio quarta [Willdenow] 4: 573. 1805

(Blistering, toxic.)

Hippophae L. Elaeagnaceae

From the ancient Greek name for a plant, a kind of prickly spurge, a species of *Euphorbia*, *hippophaes*, see *Species Plantarum* 2: 1023–1024. 1753, *Chloris Hanoverana* 456, 460. 1836, *Fl. Brandenb.* 594. 1864 and *Citol. & Genet.* 13 (1): 45–47. 1979, *Hereditas* 92: 329–330. 1980, *Acta Phytotax. Sin.* 26(3): 236. 1988, *J. Wuhan Bot. Res.* 11: 289–292. 1993, *Watsonia* 20: 63–66. 1994, *Indian Forester* 122(1–6): 486–491. 1996, *J. Econ. Taxon. Bot.* (Additional Series) 12: 43–45. 1996, *Botanica* 52: 71–74. 2002.

Hippophae rhamnoides L. (*Argussiera rhamnoides* Bubani; *Argussiera rhamnoides* (L.) Bubani; *Elaeagnus rhamnoides* Royle; *Elaeagnus rhamnoides* (L.) A. Nelson; *Hippophae rhamnoides* St.-Lag.; *Hippophaes rhamnoides* (L.) St.-Lag.; *Hippophaes rhamnoides* St.-Lag.; *Rhamnoides hippophae* Moench)

China, Himalaya, India. Shrub, deep penetrating strong root system, thorny branches, juicy ripe fruits edible, fodder for goats, camel and sheep

See *Species Plantarum* 2: 1023–1024. 1753, *Methodus Plantas Horti Botanici* ... [Moench] 343. 1794, *Ill. Bot. Himal. Mts.* [Royle] 453 (Index). 1833–1840, *Annales de la Société Linnéenne de Lyon* 7: 127. 1880, *Étude Fl.*, ed. 8 [A. Cariot] 2: 720. 1889, *Flore des Pyrénées* (Bubani) 1: 123. 1897 and *American Journal of Botany* 22(7): 682. 1935

(Fruits acidic, astringent, antihemorrhagic. A syrup from the very sour fruit used in lung complaints, tuberculosis, for cold and cough, a decoction used to cure skin eruptions; fruit paste to stop wound bleeding; concentrate juice decoction applied on the neck to cure influenza and cough. The bark or the fruit paste applied to treat pains of the pelvic girdle or the joints; bark paste used to heal wounds and ulcers; bark taken orally as blood purifier. Veterinary medicine, juice extract given as antidote/antipoison, when poisonous grasses are eaten by the domestic animals.)

in English: sallow thorn, sea buckthorn

in Bhutan: star-bu

in China: cu liu guo, sha ji

in India: ameel, amesh, chharma, chhermery, chhrma, gai-hiu, kalpataru, sarla, sirma, sirna, soori, starboo, surach, surcha, tasru, tirkku, tirkug, tsarana, tsarap

in Nepal: tapu, taru

in Tibetan: starbu

Hippophae rhamnoides L. subsp. *turkestanica* Rousi (*Hippophae turkestanica* (Rousi) Tzvelev)

India, Ladakh. Dwarf deciduous shrub, thorny branches, fruits eaten, leaves fodder for goats and sheep

See *Annales Botanici Fennici* 8(3): 208. 1871 and *Bot. Zhurn.* (Moscow & Leningrad) 87(11): 85. 2002, *Ethnobotany* 15: 1–5. 2003

(Bark used as blood purifier, a paste applied to heal wounds and ulcers. Dried powdered pulp fruits used for cough, cold, headache, fever; fruit juice to prevent wrinkles; fruit paste to stop wound bleeding; berries for treating burns, gastric ulcers, lung problems. Root paste given to pregnant women. Oil for skin diseases, injuries, eczema, burns, wounds.)

in English: sea buckthorn, wonder plant

in China: zhong ya sha ji

in India: tsermang, tsestalulu (the fruit)

Hippophae salicifolia D. Don (*Elaeagnus salicifolia* (D. Don) A. Nelson; *Elaeagnus salicifolia* D. Don ex Loudon; *Hippophae rhamnoides* subsp. *salicifolia* (D. Don) Servettaz)

India, Himalaya. Shrub, deep penetrating strong root system, thorny branches

See *Prodromus Florae Nepalensis* 68. 1825, *An Encyclopaedia of Trees and Shrubs* 3: 1324, f. 1205. 1842 and *Beihefte zum Botanischen Centralblatt* 25(2): 18. 1909, *American Journal of Botany* 22(7): 682. 1935

(Fruits acidic, astringent, antihemorrhagic, an antidote for food poisoning, also for catarrh, aphonia and influenza. Syrup from the very sour fruits given in lung complaints. Oil from seeds, pulp, tender branches and leaves for healing wounds, treating burns, cuts, ulcers, wounds, eczema, vaginal and rectal mucositis. The bark or the fruit paste applied to treat pains of the pelvic girdle or the joints; bark paste used to heal wounds and ulcers; bark taken orally as blood purifier. Veterinary medicine, juice from the berries given to eradicate poison taken by livestock.)

in English: sea buckthorn, willow-leaved sea buckthorn

in China: liu ye sha ji

in India: amali, ameel, amis, badriphal, chharma, chhichha, chhrma, chook, chuhk, chuk, kalpataru, sankhdhara, sarla, sirma, soori, surcha, tarbu, tarwa, tasru

Hippophae tibetana Schldl. (*Hippophae rhamnoides* L. subsp. *tibetana* (Schldl.) Servettaz)

India, Himalaya. Shrub, leaves good fodder for sheep, goats and donkeys

See *Linnaea* 32: 296–297. 1864 and *Bulletin de l'Herbier Boissier*, sér. 2, 8(6): 387. 1908, *J. Arnold Arbor.* 43: 400–409. 1962, *J. Arnold Arbor.* 46: 68–73. 1965

(Fruits a very rich source of vitamin C, used for influenza.)

in English: Tibetan sea buckthorn

in China: xi zang sha ji

in India: sastalulu, tsermang

Hippuris L. Hippuridaceae (Plantaginaceae)

Latin *hippuris* and Greek *hippouris* for a water-plant, Greek *hippos* 'horse' and *oura* 'a tail', referring to the strap-shaped leaves; see *Species Plantarum* 1: 4. 1753, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 445. Ansbach 1852 and *Opera Bot.* 52: 1–38. 1979, *Bot. Zhurn.* 65 (1): 51–59. 1980, *Not. Syst. Geogr. Inst. Bot. Akad. Nauk. Gruzinsk.* (Tbilisi). 36: 75–76. 1980, *Watsonia* 19: 134–137. 1992, *Opera Bot.* 137: 1–42. 1999.

Hippuris vulgaris L. (*Hippuris eschscholtzii* Cham. ex Lam.; *Hippuris fluitans* Lilj. ex Hising.; *Hippuris melanocarpa* N.

Semen.; *Hippuris montana* Ledeb. ex Rchb.; *Hippuris spiralis* Dan Yu; *Hippuris vulgaris* var. *ramificans* Dan Yu)

China, Europe. Simple or branched, herb, creeping rhizomes, naked axillary flowers, globular ovary

See *Iconographia Botanica seu Plantae Criticae* 1: 71, pl. 86, f. 181. 1823, *Flora Rossica* 2(1): 120. 1844, *Fl. Fagervik* 32. 1885 and *Bulletin of Botanical Research* 10(2): 87–89, f. 1, 2. 1990

(Herb extract for tuberculosis, blood diseases and typhoid fevers.)

in English: common mare's tail, mare's tail

in China: shan ye zao

Hiptage Gaertner Malpighiaceae

From the Greek *hiptamai* 'to fly', referring to the winged fruits, samaras, see Sonnerat, Pierre (1748–1814), *Voyage aux Indes Orientales et à la Chine: fait par ordre du roi, depuis 1774 jusqu'en 1781. Dans lequel on traite des moeurs de la religion, des sciences & des arts des Indiens, des Chinois, des Pégouins & des Madéagasses; suivi d'observations sur le Cap de Bonne-Espérance, les Isles de France & de Bourbon, les Maldives, Ceylan, Malacca, les Philippines & les Moluques, & de recherches sur l'histoire naturelle de ces pays* 3: 270. 1782, Gaertner, Joseph (1732–1791), *De Fructibus et Seminibus Plantarum*. Stutgardiae: Sumtibus Auctoris, Typis Academiae Carolinae, 1788–1791 [Volume 2 has imprint: Tubingae: Typis Guilielmi Henrici Schrammii, 1791.], *Actes de la Société d'Histoire Naturelle de Paris* 1: 109. 1792 and *Banisteria* [1]: 4. 1900.

Hiptage benghalensis (L.) Kurz var. *benghalensis* (*Banisteria benghalensis* L.; *Banisteria tetraptera* Sonn.; *Gaertnera obtusifolia* Roxb.; *Hiptage bengalensis* Kuntze; *Hiptage javanica* Blume; *Hiptage madablota* Gaertn., nom. illeg. superfl.; *Hiptage obtusifolia* (Roxb.) DC.; *Hiptage parvifolia* Wight & Arn.)

India. Straggling climbing shrub, massive, liana, densely foliaceous, aromatic, branchlets densely woolly, white showy fragrant flowers in terminal and/or axillary racemes, single seeded winged samara

See *Species Plantarum* 1: 427. 1753, *Voyage aux Indes Orientales* 3: 270. 1782, *De Fructibus et Seminibus Plantarum*... 2: 169, pl. 116. 1791, *Hortus Bengalensis*, or a catalogue ... 32. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 583. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 5: 224. 1825, *Hort. Brit.* [Loudon] 170. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 107. 1834, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 43(2): 136. 1874, *Revis. Gen. Pl.* 1: 88. 1891 and *Index Lectionum in Lyceo Regio Hosiano Brunnsbergensi: Banisteria* 12. 1901 [Universität Braunsberg], *Taxon* 28: 630. 1979, *Taxon* 30: 506. 1981, *Current Science* 50: 904–905.

1981, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Journal of Cytology and Genetics* 25: 308–320. 1990

(Used in Ayurveda and Sidha. Plant sap as a cooling agent. Bark, leaves and flowers useful in wounds, ulcers, inflammation, leprosy, scabies, cough, rheumatism. Leaves juice insecticide, applied for scabies; leaf paste applied on scabies; leaves in asthma, rheumatism, scabies and skin diseases. Veterinary medicine, leaves given to cows for more lactation. Ceremonial, ritual, ingredient of Patra *pooja* in different religious *pooja* ceremonies, in Ganesh-*pooja*.)

in China: feng zheng guo

in India: aadi mooruthe, adar ganchi hambu, adaraganjee hambu, adarkaanchi, adharaganchiambu, adhimoorthi, adhriganti, adigam, adigandi, adimattam, adimurtte, adirgante, adirganti, aita-lagula, atikam, atikamali, atikamalikkoti, atikanti, atikatti, atikattikkoti, atimukta, atimuktaka, atimuttam, ayantanaicinturamakki, bhadrilata, bhramarotsava, bhrihgapriya, bhumimandapa, bhushana, chandravalli, indragoche, jal, jutimukta, kampti, kamuka, kerek-lata, kerekilata, kurakkathi, kurukkaththi kodi, maadhavai lathe, madhabi, madhabilata, madhavi, madhavalata, madhavivasantadhuti, madhmalti, madhoimaloti, madholota, madhumalati, madmalti, malati, mandapa, mathavikodi, meishein, natanagesar, parashraya, pikigisam, pundrakalata, sanna kavatimaal, sida-pou, sitampu, sugandha, suragaatha, suragata, suruttai ilai kodi, suvasanta, vadlayaaraala, vadlayerala, vasandi, vasantaduti, vasantagalamalligai, vasanti, vedala, vennalankodi

Hodgsonia Hook.f. & Thomson Cucurbitaceae

Dedicated to the English orientalist Brian Houghton Hodgson, 1800–1894, public servant in India, linguist, collector of plants and animals, translator, his writings include *Aborigines of Southern India*. Calcutta 1849, *Aborigines of the North East Frontier* [of India]. [Calcutta 1850], *Aborigines of the South*. [Calcutta 1850], *Comparative Vocabulary of the languages of the Broken Tribes of Népal*. [Calcutta 1857, 1858], *On the Aborigines of North-Eastern India*. [Calcutta 1849], *On the Aborigines of the Eastern frontier*. [Calcutta 1850], *On the Indo-Chinese Borderers*. (On the Mongolian Affinities of the Caucasians.) [Calcutta 1853], *Papers relative to the colonization, commerce, physical geography, etc. of the Himalaya Mountains and Nepal*. Calcutta 1857. See *Species Plantarum* 2: 1010–1011. 1753, *Genera Plantarum* 393–394. 1789, [Asvaghosha], *The Brahmanical institution of caste*, etc. [with introduction by L. Wilkinson and by the translator, B.H.H.] 1822, [Asva-Ghosha], *The Wujra Socchi*. [translated by B.H.H.] 1839, *Proceedings of the Linnean Society of London* 2: 257. 1853–54, [Brian Houghton Hodgson], *Notes of the Services of B.H. Hodgson ...* Collected by a Friend. [1879].

Hodgsonia macrocarpa (Blume) Cogn. (*Hodgsonia heteroclita* (Roxb.) Hook. f. & Thomson; *Hodgsonia heteroclita* Hook. f. & Thomson; *Hodgsonia macrocarpa* Cogn.; *Trichosanthes macrocarpa* Blume)

Indonesia, India. Climber, bifid tendrils, flowers unisexual, staminate flowers in racemes, pistillate flowers axillary solitary, large globose depressed fruit brownish tomentose, kernels eaten after roasting and washing, young leaves used as vegetable

See *Species Plantarum* 2: 1008. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 15: 935. 1826, *Proceedings of the Linnean Society of London* 2: 257. 1853, *FBI* 2: 606. 1879, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 349. 1881

(Roots poultice rubbed on muscular pain. Roots and seeds infusion used for typhoid and gastrointestinal problems. Seeds pounded and given in typhoid; boiled seeds taken for placental troubles. Leaves for nose complaints, a decoction febrifuge; fresh leaves juice applied on cuts as hemostatic; leaves powder applied on chronic ulcers.)

in India: asatong, han-ther-angphaur, kha-um, khaum, lengru-pai, mei soh myrthar, pai, tapouguti, thebou lata, thi be

Hodgsonia macrocarpa (Blume) Cogn. var. ***capniocarpa*** (Ridl.) Tsai (*Hodgsonia capniocarpa* Ridl.; *Hodgsonia capniocarpa* Ridl. & Kundu; *Hodgsonia macrocarpa* var. *capniocarpa* (Ridl.) Tsai ex A.M. Lu & Zhi Y. Zhang)

Malaysia, Thailand. Creeper, leaves bright green coriaceous, staminate racemes woody stout, woody fruit velvety-gray, seeds embedded in a firm oily pulp

See *Journal of the Federated Malay States Museums* 10: 135. 1920, *J. Bot.* 76: 366. 1938, *Flora Reipublicae Popularis Sinicae* 73(1): 259. 1986

(Poisonous, the seeds. Leaves for nose complaints, dry the leaves and burn them, inhaling the smoke, or drink the leaves decoction. Febrifuge, drink the leaves decoction.)

Malay names: akar klapayang, areuj kalajar badak, batang, biloengkieng, kepayang, papayang, truah

Hodgsonia macrocarpa (Blume) Cogn. var. ***macrocarpa*** (*Hodgsonia heteroclita* (Roxb.) Hook. f. & Thomson; *Hodgsonia heteroclita* Hook. f. & Thomson; *Trichosanthes heteroclita* Roxb.; *Trichosanthes macrocarpa* Blume)

India, Pakistan, China. Climber, petioles reddish, staminate flowers in racemes, pistillate flowers solitary, petals fringed, fruit subglobose, 2-lobed nuciform seeds

See *Species Plantarum* 2: 1008. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 15: 935. 1826, *Proceedings of the Linnean Society of London* 2: 257. 1853, *Monographiae Phanerogamarum* 3: 349. 1881 and *Reinwardtia* 12(4): 269. 2008

(Leaves for nose complaints and febrifuge. Crushed seeds applied as insecticide for killing bed bugs and lice.)

in India: asatong, han-ther-angphaur, kha-um, khaum, lengru-pai, mei soh myrthar, pai, tapouguti, thebou lata, thi be

Holarrhena R. Br. Apocynaceae

From the Greek *holos* 'entire, whole' and *arrhen* 'male', referring to the anthers, all fertile, included or entire, see Planchon, Louis (1858–1915), *Produits fournis à la matière médicale par la famille des Apocynées*. Montpellier, 1894 and de Kruif, A.P.M. "A revision of *Holarrhena* R. Br. (Apocynaceae)." *Mededelingen Landbouwhogeschool Wageningen* 81–2: 1–36. 1981, Bisset, N.G. "Phytochemistry of *Holarrhena* R. Br." *Mededelingen Landbouwhogeschool Wageningen* 81–2: 37. 1981.

Holarrhena curtisii King & Gamble (*Holarrhena angustata* Pierre, nom. nud.; *Holarrhena crassifolia* Pierre, nom. inval.; *Holarrhena crassifolia* var. *montana* Pierre ex Spire; *Holarrhena densiflora* Ridley; *Holarrhena latifolia* Ridley; *Holarrhena pulcherrima* Ridley; *Holarrhena similis* Craib)

Vietnam, Thailand and northern Peninsular Malaysia. Small shrub, grey branches, fruit carpels erect, in secondary rain forest, savanna and mangrove swamps, bamboo forest, mixed deciduous forest, scrub woodland

See *J. Asiat. Soc. Bengal*, Pt. 2, Nat. Hist. 74(2): 446. 1908, *J. Straits Branch Roy. Asiat. Soc.* 59: 130–131. 1911, *Bull. Misc. Inform. Kew* 1913: 70. 1913, Kam, T.S. et al. "Cytotoxic and leishmanial aminoglycoesteroids and aminosteroids from *Holarrhena curtisii*." *Journal of Natural Products* 61(11): 1332–1336. 1998

(The bark and roots used to treat dysentery.)

in Cambodia: doeum tuk das

in Laos: mak mouk kuay, mouk noy

in Thailand: hatsakhun thet, mok noi, phut nam

in Vietnam: h[oof] li[ee]n l[as] nh[or], m[uws]c hoa tr[aws]ng

Holarrhena floribunda (G. Don) T. Durand & Schinz (*Holarrhena africana* A. DC.; *Holarrhena floribunda* T. Durand & Schinz; *Holarrhena floribunda* var. *tomentella* H. Huber; *Holarrhena ovata* A. DC.; *Holarrhena wulfsbergii* Stapf; *Rondeletia floribunda* G. Don)

W. Trop. Africa to Chad. Tree, fluted, gray smooth bark, sticky white juice, green papery leaves, white scented flowers, corolla white, anthers pale yellow, slender linear cylindrical follicles hanging in pairs, flattened seeds with silky hairs, in savanna, forest

See *Memoirs of the Wernerian Natural History Society* 1: 62, 73. 1810 [1811], *Prodr.* (DC.) 8: 414. 1844, Wulfsberg, Nils Gregers Ingvald (1847–1888), *Holarrhena africana* DC.... Göttingen, 1880, *Études Fl. Congo* 190. 1896 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 164. 1902, *Phytomedicine*. 6(3): 187–195. 1999, *J. Nat. Prod.* 69(1): 62–67. 2006

(Roots and stem bark antimalarial, analgesic, antimicrobial, antiparasitic, antitumor, febrifuge. Extracts of the stem barks of *H. floribunda* showed remarkable inhibitory activ-

ity against drug-resistant strains of *Plasmodium falciparum* when tested in vitro.)

in Nigeria: ako-ire, irena, ireno; bakin mutum (Hausa); niwahi (Fula); irena (Yoruba)

in Yoruba: ako ire, are ibeji, areno, ire, ire ibeji, irebasabasa, irena, ireno, isai

in Mali: nufu, numusoro

Holarrhena pubescens (Buch.-Ham.) Wall. ex G. Don (*Chonemorpha antidysenterica* (Roth) G. Don; *Chonemorpha antidysenterica* G. Don; *Chonemorpha pubescens* (Buch.-Ham.) Holigarna Buch.-Ham. ex Roxb. Anacardiaceae

From a vernacular name, see *Hort. Bengal.* 22. 1814, *Dennst. Schluss. Hort. Malab.* 30. 1818, *Pl. Coromandel* 3: 79. 1820 [18 Feb 1820].

Holigarna arnottiana Hook. f.

India. Tree, densely foliaceous, minute flowers, yields black resinous juice, leaves as green manure

See *Fl. Brit. India* 2: 36. 1876 and *Global Ecology and Biogeography Letters* 4(5): 155–165. 1994, *Functional*

Ecology 12(2): 313–318. 1998, *Fitoterapia* 73(4): 281–287. 2002, P. Ramana et al., “Antifeedant activity of *Holigarna arnottiana* against larvae of teak defoliator, *Hyblaea pueri*.” *Journal of Non-timber Forest Products* 11(2): 158–160. 2004

(Used in Sidha. Antibacterial. Vesicant, skin-irritating, a black very acrid oleoresin; sap causes blistering of skin, eye irritation; the smoke of the burning wood can also be dangerous. *Holigarna arnottiana*, *Ocimum gratissimum* L., *Allophylus cobbe* and *Centratherum anthelminticum* used as antiseptic in treating cuts and wounds.)

in English: black varnish tree of Malabar

in India: bhallataka, bibiya, cattusjeru, cera, chaaru, chaeremara, char, charu, chera, cheru, goota mara, holageru, hole gaara, hole gaeru, holgeri, holgeru, holgery, holigar, hologeru, hoolgeri, howligaeru, hulagaeru, hulgaeru, hulgeri, kaadugere, kadugeru, kankanagara, karimcher, karuncharei, karunkarai, katgeru, katou-tsjeroe, kattoutjerou, kattucceran, kattucer, kattucera, kattucher, kattuchera, kattuchermaram, katugeri, kek, koota gaeru, kooteegheree, kootegeru, kootigheri, kutigaeru, kuttegeru, kutugeri, mudvimbo, naicheru, ran-bibo, ranbibo, sannageru, shera, shoodrabita

Holigarna ferruginea Marchand

India. Tree, rough bark, black latex, inflorescence terminal panicle dark purple-brown tomentose

See *Contact Dermatitis* 17(4): 219–22. 1987, *Journal of Ethnopharmacology* 47(3): 149–158. 1995, *Journal of Tropical Ecology* 12(2): 191–214. 1996, *Fl. Karnataka* 2: 205. 1996, *Fl. Madras* 1: 268. 1997

(Allergic contact dermatitis. Acrid juice used as an antiseptic for cuts and wounds. Catechols.)

in India: cera, chaeremara, char, charei, charu, chera, chere, cheru, holegeru

Holigarna grahamii (Wight) Kurz (*Holigarna grahamii* Kurz; *Holigarna grahamii* Hook.f.)

India.

See *Plants of the Coast of Coromandel* 3: 79. 1820 [1819], *Journ. As. Soc. Beng.* xli. (1872) ii. 305. 1872, *Fl. Brit. India* [J.D. Hooker] 2: 37. 1876 [May 1876] and *Journal of Tropical Ecology* 12(2): 191–214. 1996

(Black very acrid oleoresin.)

in India: biboi, doddaela holognaara, kankana gaala

Holigarna helferi Hook.f.

India.

See *Fl. Brit. India* 2: 36–37. 1876

(Irritant sap, dermatitis.)

Common names: barola, khreik

Holigarna longifolia Buchanan-Hamilton ex Roxb. (*Holigarna longifolia* Wight & Arn.; *Holigarna longifolia* Span.)

India.

See *Plants of the Coast of Coromandel* 3: 79, t. 82. 1820 [1819], *Prodr. Fl. Ind. Orient.* 169. 1834 [10 Oct 1834], *Linnaea* 15: 188. 1841

(Black very acrid oleoresin, caustic and vesicant.)

in India: katebel, kherai, ng-gai

Holigarna nigra Bourd.

India.

See *Journal of Biogeography* 21(6): 581–593. 1994, *Global Ecology and Biogeography Letters* 4(5): 140–154. 1994

(Irritant. Food plants of the lion-tailed macaque.)

in India: ceri, chera

Holmskioldia Retzius Lamiaceae (Labiatae, Verbenaceae)

For the Danish scientist Theodor Holm (Holmskiold), afterwards Holmskjöld, 1732–1794, nobleman, botanist, physician, author of *Beata ruris otia fungis danicis*. Dan. & Latin. Havniae [1790–1799] and *Kort Afhandling von Anagallis eller Rødarve og dens Kraft og Brug mod Vandskraek*. Kiøbenhavn [Copenhagen] 1761, with Christiaan Hendrik Persoon (1761/1762–1836) wrote *Coryphaei Clavarias Ramariasque*. Lipsiae 1797. See *Observ. Bot.* (Retzius) 6: 31–32. 1791, J.C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, A. Lasègue, *Musée botanique de Benjamin Delessert*. 545. Paris 1845 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, C.F.A. Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, Warren R. Dawson, *The Banks Letters*. London 1958, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 196. 1965, R.B. Fernandes, “Notes sur les Verbenaceae V—Identification des Espèces d’*Holmskioldia* Africaines et Malgaches.” *Garcia de Orta, Série de Botânica*. 7(1–2): 33–46. 1985, F. Boerner & G. Kunkel, *Taschenwörterbuch der Botanischen Pflanzennamen*. 4. Aufl. 114. 1989, Helmut Genast, *Etymologisches Wörterbuch der Botanischen Pflanzennamen*. 291. [“Johan Theodor Holmskiöld, 1731–1793”] Basel 1996, Sandy Atkins, “*Holmskioldia sanguinea* (Labiatae, formerly Verbenaceae).” *Curtis’s Botanical Magazine*. 13(2): 79–81. May 1996.

Holmskioldia sanguinea Retz. (*Hastingia coccinea* Sm.; *Hastingia scandens* Roxb.; *Holmskioldia rubra* Pers.; *Holmskioldia sanguinea* f. *aurantiaca* Yin Yin Kyi et DeFilipps; *Holmskioldia sanguinea* f. *citrina* Moldenke;

Holmskioldia scandens Sweet, nom. nud.; *Platanum rubrum* Juss.)

Himalaya. Scandent evergreen shrub, straggling, pubescent, drooping branches, leaves ovate-elliptic, inflorescence in terminal or axillary cymes, petaloid scarlet to orange persistent calyx, corolla bilabiate, tube curved, drupes enclosed in calyx

See *Observationes Botanicae* (Retzius) 6: 31–32. 1791, *Syn. Pl.* (Persoon) 2(1): 144. 1806, *Exot. Bot.* 2: 41, t. 80. 1806, *Hort. Bengal.* 95. 1814, *Hort. Brit.* [Sweet] 323. 1826, *FBI* 4: 596. 1885 and *Phytologia* 8: 58. 1961, *Contr. U.S. Natl. Herb.* 45: 483. 2003

(Crushed fresh leaves and shoots applied in rheumatism, rheumatoid arthritis. Extracts of leaves and stem bark taken in dysentery, headache, high blood pressure; leaves of *Holmskioldia sanguinea*, *Albizia myriophylla* and *Nymphaea nouchali* boiled and taken as blood purifier. Magic, ritual, leaves and garland of flowers used in diseases of children.)

in English: Chinese hat plant, cup-and-saucer plant, mandarin hat

in India: arnam-amir, harelahara, harmuli, kharam leishok, wau-sau-laungi-araung

Holoptelea Planchon Ulmaceae

From Greek *holos* ‘whole, all, entire’ and *ptelea* ‘an elm’, see *Annales des Sciences Naturelles; Botanique*, sér. 3 10: 259. 1848.

Holoptelea integrifolia Planch. (*Holoptelea integrifolia* (Roxb.) Planch.; *Holoptelea integrifolia* Rendle; *Ulmus integrifolia* Roxb.)

Sri Lanka, India, Myanmar/Burma. Deciduous tree, densely foliaceous, thin pale bark, wood very soft with fetid odor, red lenticellate twigs, small stipule scars, soft green fleshy leaves, flowers greenish yellow in short racemes or fascicles, fruits sub-orbicular with membranous wing, bark and leaves and twigs when crushed emit an unpleasant odor

See *Annales des Sciences Naturelles; Botanique*, sér. 3 10: 259. 1848 and *Flora of Tropical Africa* 6(2): 2. 1916, *Botanical Magazine* 103: 113–131. 1990, *Allergy* 46(4): 284–291. 1991, *Journal of Ethnopharmacology* 74: 251–255. 2001, *Int. Arch. Allergy Immunol.* 136: 103–112. 2005

(Used in Ayurveda and Sidha. Pollen allergen, cross-reactivity between *Holoptelea integrifolia* and *Parietaria judaica*. Bark antimicrobial, antioxidant, wound-healing, used to cure rheumatism, rheumatic swellings, whitlow, joint pains, piles, jaundice, fevers, laryngitis, ringworm and scabies; bark of *Radermachera xylocarpa* along with barks of *Holoptelea integrifolia* and *Moringa concanensis* powered and applied in stomach pain; crushed stem bark applied on forehead in meningitis and headache; stem bark extract for ringworm;

oral application of the bark to treat intestinal tumors; dried bark useful as an oxytocic in pregnant women; seed oil and bark for rheumatism. Leaves decoction given to regulate fat metabolism; leaves along with garlic externally used to treat ringworm eczema and cutaneous diseases; leaf juice for scorpion bite. Pounded pulp fruit given for menstrual disorders. Ceremonial, rituals, festivals, the branches used. Magico-religious beliefs, spiritual, emotional, the plant gives strength and immunity; a traditional remedy through plant wreath, a piece of wood hung around the neck of women as a charm against madness; it is believe that leaves help in driving away the snakes. Monkeys eat the fruits after conceiving or delivering babies. Leaves as fish poison; stem bark crushed and dropped in water as fish poison.)

in English: Indian elm, Indian elm tree

in India: aaval, aavali maram, aavitholi, aaya, anjan, arari, ari, arjan, aval, avali, avil, avil thol, avimaram, awie, aya, ayal, ayi, ayil, ayil pattai, ayila-p-pattai, ayila-t-tol, ayili, ayilu-ta-pattai, baaboli, baaval, banchilla, bandarbatu, bastedun, beegada mara, beeyada mara, begama, begana, bisenda, chharra, chibil, chilbil, chilbile, chilla, chillil, chilmil, chirabilva, chirbil, chirhol, chirmil, chirol, choral, chorla-daru, chorra, churil, churla, churul, cibil, cirabilva, cirabilvah, ciravilva, cirbilva, dauranja, dhamna, dhauranjan, kaladri, kalaivallor, kaldri, kalipapri, kalmi, kanci, kandru, kanei, kanjeri, kanjeru, kanjho, kanji, kanjois, kanju, karanja, karanjalum, karanji, karanji-pipal, kasumbro, khanjho, khulen, kumkar, kunj, kusumbro, naali, naavara chettu, naavili, nali, namli, naulee, nauli, naulie, navali, navara, navili, nemali, nemalinara, nemilinara, nettaval, nettavil, nevali, neveli, nilavahi, nowlee, nowli, paapara, papad, papada, papar, papara, papari, papdyo, papra, papri, pardesi, pedanevili, pedda neveli, peddanevili, peddanevili, peddanevili, peddanevili, peddanevili, peddanevili, pipri, prakirya, pulari, putari, puti, putigandha, putika, putikaranjah, rahubeeja, rahubija, rajain, rajain pardesi, raobija, rasabija, rasbija, ravubija, tabasi, tambachi, tampacci, tanbachi, tapaci, tapasee mara, tapasi, tapasigida, tapassi, tappasi, tapsi, taspi, tavisi, tenmaram, tenpuccimaram, thapasi, thapasu, thappachi, thapsi, thavasai, thavasi, thogala, trilavahi, turuda, udakirya, vaavla, vamvlo, vavala, vavla, vavli, vellaya, waola, wavla, wavli, wavuli, wawali, wowli, wowli

in Myanmar: myaukseik, pyaukseik

in Nepal: sano pangro

Holostemma R.Br. Asclepiadaceae (Apocynaceae)

From Greek *holos* 'whole, complete, entire' and *stemma* 'a garland, crown', referring to a staminal crown, see *Memoirs of the Wernerian Natural History Society* 1: 42. 1810, *Hooker's Journal of Botany and Kew Garden Miscellany* 5: 53. 1853, *Genera Plantarum* 2: 760. 1876.

Holostemma ada-kodien Schultes (*Asclepias annularis* Roxburgh; *Holostemma annulare* (Roxburgh) K. Schumann;

Holostemma annularis Schum.; *Holostemma rheedianum* Sprengel)

India, China. Plant yields white latex, flowers and fruits eaten fresh

See *Hortus Bengalensis*, or a catalogue ... 20. 1814, *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 6: 95. 1820, *Systema Vegetabilium*, editio decima sexta [Sprengel] 1: 851. 1824 [dated 1825; publ. in late 1824], *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(2): 250. 1895 and *Philip. J. Sci., C. Bot.* 411–419. 1912, *Ethnobotany* 16: 52–58. 2004

(Used in Ayurveda. Plant considered to have the property to bestow health and liveliness. Latex applied to heal indolent ulcers and wounds. Decoction of all parts is used to induce lactation. Root juice given to treat spleen enlargement and as health tonic. Roots and leaves, powder or juice, to treat spider-poisoning, wounds, fever, eye diseases, burning sensation. Crushed flowers eaten in venereal diseases. Veterinary medicine, fruits fed to sheep and goat to improve lactation.)

in English: annular holostemma

in China: jiao jian teng

in India: adapathiyam kizhangu, arane beelu, arkaparni, atakodiyam, atakotiyam, atapatiyam, atapotiyam, bandi guruvinda-teega, bandiguruvinda theega, buriel, charivel, charkidudhi, chhirvel, chirvel, dudipaalathige, dudipala tige, dudoli, dudurli, gaganthjuti, gorlapalaaku, haranadodi, jeeva haale, jeevanthi, jeevanti, jivanti (jiva, liveliness, life), kanju, khirdodi, maruligana kasa, moron-ara, morongara, paalagurgi, paalagurugu, paalajilledu, pala-gurji, pala-gurugu, palageddalu, palagurugu, palaikkirai, palkhevel, pallagorgi, peyyi baddu, rajain pardesi, ranimaoui, shiradowdi, titpungi

in Pakistan: tultuli

Homalanthus A. Juss. Euphorbiaceae

Greek *homalos* 'even, regular, smooth, flat, level, akin to' and *anthos* 'flower', referring to the older leaves and to the shape and the appearance of the flowers; see Adrien Henri Laurent de Jussieu (1797–1853), *De Euphorbiacearum generibus*. Parisiis 1824, *Synopsis Generum Compositarum* 260. 1832, *Etymologisch-botanisches Handwörterbuch* 449. 1852 and *Journal of the Arnold Arboretum* 13: 94. 1932, *Kew Bulletin* 32(2): 418. 1978.

Homalanthus acuminatus (Müll.Arg.) Pax (*Carumbium acuminatum* Müll.Arg.; *Macaranga reineckeii* Pax)

Society Is. (Tahiti).

See *Bot. Jahrb. Syst.* 25: 646. 1898

(Hemostatic.)

Homalanthus fastuosus (Linden) Fern.-Vill. (*Carumbium fastuosum* (Linden) Müll.Arg.; *Homalanthus alpinus* Elmer;

Homalanthus bicolor Merr.; *Homalanthus milvus* Airy Shaw; *Mappa fastuosa* Linden)

Philippines.

See *La Belgique Horticole* 15: 100. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* 15: 1144. 1866, *Flora de Filipinas* 4(13A): 196. 1880 and *Leaflets of Philippine Botany* 1: 307. 1908, *Philippine Journal of Science* 4: 282. 1909, *Kew Bulletin* 36: 611. 1981

(Leaves for poisoning fish.)

in China: yuan ye ao yang

Homalanthus novoguineensis (Warb.) K. Schum. (*Carumbium novoguineense* Warb.; *Homalanthus beguinii* J.J. Sm.; *Homalanthus brachystachys* Pax & K. Hoffm.; *Homalanthus crinitus* Gage; *Homalanthus elegans* Gage; *Homalanthus novo-guineensis* (Warb.) K. Schum.; *Homalanthus pachystylus* Airy Shaw; *Homalanthus tetrandrus* J.J. Sm.)

Papua New Guinea, Lesser Sunda Is. Shrub or tree, yellow campanulate flowers, capsular fruit

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 18: 199. 1894 and *Die Flora der Deutschen Schutzgebiete in der Südsee* [Schumann & Lauterbach] 407. 1900 [1901 publ. Nov 1900], *Nova Guinea* 8: 791. 1912, *Pflanzenr.*, IV, 147, V: 47. 1912, *Nova Guinea* 12: 483–484. 1917, *Bull. Jard. Bot. Buitenzorg*, III, 6: 98. 1924, *Kew Bull.* 34: 595. 1980

(Plant considered to be poisonous, Leaf juice drunk as a strong contraceptive; heated leaves applied over the stomach for spleen disorders.)

in Papua New Guinea: hikumutu, ngohou

Homalanthus nutans (G. Forst.) Guill. (*Carumbium moerenhoutianum* Müll.Arg.; *Carumbium nutans* (G. Forst.) Müll. Arg.; *Carumbium pedicellatum* (Benth.) Miq.; *Croton nutans* G. Blake; *Homalium trichocladum* S.F. Blake; *Homalium trichostemon* S.F. Blake)

Central America.

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 24. 1760, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 54. 1825, *Journal of the Proceedings of the Linnean Society, Botany*, Supplement 4: 36. 1860, *Botanical Gazette* 20(1): 4. 1895 and *Bulletin of the Torrey Botanical Club* 37: 354. 1910, *Contributions from the Gray Herbarium*

of Harvard University 53: 60–61. 1918, *Contributions from the United States National Herbarium* 20: 225–234. 1919, *Publications of the Carnegie Institution of Washington* 461(4): 74. 1935, *Tropical Woods* 52: 27. 1937, *Fieldiana, Botany* 28(2): 410. 1952, *Tropical Woods* 101: 19. 1955

(Roots astringent, for gonorrhoea.)

Homalium subsuperum Sprague

Tropical Africa, South Africa.

See *Bulletin of Miscellaneous Information Kew* 1923: 184. 1923

(Stem bark for colic.)

Homalomena Schott Araceae

Greek *homalos* ‘smooth, flat’ and *mene* ‘the moon’, Latin *luna plana*, probably a translation of a Malayan vernacular name; see *Meletemata Botanica* 1: 20. 1832, *Flora Telluriana* 4: 8. 1836[1838], *Genera Plantarum* 238. 1837, *Notul. Pl. Asiat.* (Posthum. Pap.) 3: 147. 1851, *Botanische Zeitung. Berlin* 14: 564. 1856, *Prodr. Syst. Aroid.* 316. 1860 and *Nova Guinea* 8: 250. 1910, *Taxon* 16: 517. 1967, D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988. The rhizomes of some species are slightly irritant. *Homalomena* sp. as arrow or dart poison. *Ereriba*, an undetermined species of *Homalomena*, is a stout herb reported to have narcotic, violent intoxication and hallucinogen effects when its leaves are taken with the leaves and bark of *agara*.

Homalomena aromatica (Spreng.) Schott (*Calla aromatica* Roxb.; *Calla aromatica* (Spreng.) Roxb.; *Homalomena aromatica* Schott; *Homalomena aromatica* auct. non (Roxb.) Schott; *Homalomena aromatica* (Roxb.) Schott; *Homalomena aromatica* Engl. ex Alderw.; *Zantedeschia aromatica* Spreng.; *Zantedeschia foetida* K. Koch)

China. Herb, coarse, robust, creeping aromatic rhizome, cordate acuminate leaves, greenish-yellow spathes, shoots used as vegetable

See *Species Plantarum* 2: 968. 1753, *Meletemata Botanica* 1: 20. 1832, *FBI* 6: 532. 1893 and *Bulletin du Jardin Botanique de Buitenzorg* sér. 3 4: 190. 1922, *Nova Guinea* 14: 217. 1924, *Phytochemistry*. 31(10): 3515–3520. 1992 [Sesquiterpenoids from the roots of *Homalomena aromatica*.], Komalamisra, N. et al. “Screening for larvicidal activity in some Thai plants against four mosquito vector species.” *Southeast Asian J. Trop. Med. Public Health*. 36(6): 1412–1422. 2005

(Rhizome with itching effect. Aqueous extract of leaves given in diarrhoea; essential oil in skin infections. Rhizomes decoction applied externally for swelling, skin sores, pimples; used as snuff and tobacco preparations and inhaled as a remedy for jaundice and influenza; fresh rhizome dropped in eyes. Roots tied on the neck in jaundice. Larvicidal.)

in India: auhia-tahang, aukiha-tachang, kakorlong, kamitru, laman, okhiahatachang, roathi

Homalomena cordata Schott (*Dracontium cordatum* Houtt., nom. illeg.; *Homalomena cordata* Zoll.; *Zantedeschia cordata* (Schott) K. Koch)

Java.

(Rhizome and leaves decoction febrifuge. Tuberous roots suspension drunk to treat diarrhea; dried root decoction drunk to treat diarrhea and malaria. Essential oil from the leaves used in skin infections. Ceremonial, rhizome burned in a ritual to cure illness caused by a curse; root and leaves used to make the user invisible to spirits.)

in English: red arrow-leaf

in Indonesia: lung bala, lung bileng

Malay name: kemoyan

Homalomena philippinensis Engl.

Philippines.

See *Das Pflanzenreich* (Engler) *Arac.-Homalomen.-Schismatoglott.* 55. 1912

(Rhizome antirheumatic.)

in Philippines: tahig

Homalomena sagittifolia Jungh. ex Schott (*Homalomena portei* Engl.; *Homalomena propinqua* Ridl.; *Homalomena raapii* Engl.; *Homalomena sagittifolia* var. *sumatrana* Alderw.)

Malaysia. Aroid

See *Prodr. Syst. Aroid.* 311. 1860, *Monogr. Phan.* 2: 335. 1879 and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 4: 192. 1922

(Distension of stomach, pound the shoots and poultice. Crushed tuber paste for cuts and wounds. Magic, ritual, plant hung above the doorway to prevent evil spirits from entering the house.)

Malay name: kelemoyak

in Sarawak: tingom, tingon

Homonoia Lour. Euphorbiaceae

From the Greek *homos* ‘similar, the same’ and *nous* ‘mind’, *homonoia* ‘concord, unanimity’, referring to the stamens, see *Flora Cochinchinensis* 601, 636. 1790.

Homonoia riparia Lour. (*Adelia neriifolia* B. Heyne ex Roth; *Croton salicifolius* Geiseler; *Haematospermum neriifolium* (B. Heyne ex Roth) Wall. ex Voigt; *Haematospermum salicinum* (Hassk.) Baill.; *Lumanaja juviatilis* Blanco; *Ricinus salicinus* Hassk.; *Spathiostemon salicinus* (Hassk.) Hassk.; *Spathiostemon salicinus* var. *angustifolius* Miq.) (Latin *riparius, a, um* ‘of river banks’)

Trop. & Subtrop. Asia. Shrub or small tree, rheophytic, lanceolate leaves, small reddish brown flowers in axillary spikes, male flowers stalked, female flowers sessile, globose capsules

See *Flora Cochinchinensis* 601, 636–637. 1790, *Hort. Suburb. Calcutt.* 157. 1845, *Étude Euphorb.* 293. 1858, *Fl. Ned. Ind.*, *Eerste Bijv.*: 452. 1861 and *Taxon* 29: 353–355. 1980

(Whole plant pesticide, insecticide, against fungal infection. Wood infusion given in malaria. Root laxative, emetic, diuretic, a decoction given in piles, bladder stones, chest pain, syphilis, gonorrhoea, malaria, ulcers, urinary discharges; root paste eaten for urinary infection; roots and leaves of *Homonoia riparia* and *Ficus religiosa* are made into a paste applied on the back to subside back pain. For skin diseases, pound the leaves and poultice; pounded leaves and fruits applied as a poultice for skin diseases.)

in English: willow spurge

in India: holenage, katallari, khola ruis, nirganagile, pashanabheda, sherani, sherni, surra, vanchi

in Malaya: champenai, kayu suarah, kelereh, mempenai

in Philippines: agoioi, agooi, agukuk, apoioi, balanti, dumanai, hangarai, kagoioi, liuhon, lumanai, lumanai, malabugos, managos, mangagos, miagook, miagus

Honckenya Ehrh. Caryophyllaceae

For the German botanist Gerhard August Honckeny, 1724–1805, author of *Synopsis plantarum Germaniae*, continens plantas in Germania sua sponte provenientes adiectis omnibus auctorum synonymis curante Carolo Ludovico Willdenovo ... [Edited by Carl Ludwig Willdenow,

1765–1812) Berolini 1792–1793. See *Species Plantarum* 1: 89–90, 423–425. 1753, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 3: 152. London 1796–1800, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 5: 224. 1816, *Flora Hallandica* 75. 1817, *Journal of Botany, British and Foreign* 37: 322. 1899 and J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 199. 1965, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Honckenya peploides (L.) Ehrh. (*Ammodenia peploides* (L.) Rupr.; *Ammodenia peploides* Rupr.; *Ammonalia peploides* (L.) Desv.; *Arenaria peploides* L.; *Halianthus peploides* (L.) Fr.; *Honckenya peploides* (L.) Ehrh.; *Minuartia peploides* (L.) Hiern)

North America. Perennial herb, food

North America. Perennial herb, food

See *Flora Boreali-Americana* 1(3): 102. 1831, *Bibliographical Index to North American Botany* 97. 1878 and *Rhodora* 11: 113. 1909, *Muhlenbergia*; a journal of botany 6(7): 84. 1910, *Flora of the Aleutian Islands* 171. 1937, *Illustrated Flora of the Pacific States* 2: 154. 1944, *Canadian Journal of Botany* 43(11): 1393. 1965

(Leaves a source of vitamins A and C.)

Hoodia Sweet ex Decne. Apocynaceae (Asclepiadaceae)

For John Wood, flourished 1820s, a cultivator of succulent plants, see *Hort. Brit.* [Sweet], ed. 2. 359. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 664. 1844 and *Bot. Jahrb. Syst.* 115(2): 210. 1993, *Acta Mus. Richnov., Sect. Nat.* 5(1): 30–32. 1998.

Hoodia gordonii Sweet (*Hoodia gordonii* (Masson) Sweet ex Decne.) (after Col. Robert Jacob Gordon, 1743–1795, in the 18th century discovered the plant somewhere near the Orange River.)

Namibia. Cactus-like stem, succulent, erect, fleshy, plant with clear mucilaginous sap, flesh-coloured flowers strongly carrion-scented and attracting flies, wind dispersed seeds with tuft of silky white hairs

See *Loudon's Hortus Britannicus...* [Sweet], Second edition, ... 359. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 664–665. 1844

(Eaten as an appetite and thirst suppressant.)

Hopea Roxb. Dipterocarpaceae

After the Scottish botanist John Hope, 1725–1786 (Edinburgh), M.D. Glasgow 1750, a pupil of Charles Alston (1685–1760) and Bernard de Jussieu, correspondent of Linnaeus and Banks, 1761 professor of medicine and botany and Regius Keeper at Edinburgh, King's Botanist, founder of the Edinburgh Botanic Garden, 1767 elected a Fellow of the Royal Society, taught Smith, Salisbury and Pulteney. See *Lectures on Materia Medica ...* Published by ... John Hope. London 1770, [Anonymous] *Termini botanici: in usum juventutis academicae edinensis*. Edinburgh 1770, [Anonymous] *Genera plantarum, ex editione duodecima Systematis naturae ...* Carol. a Linné. In usum academicos. [Edited by John Hope?] Edinburgh 1771, A. Duncan, *An account of the life, and character, of ... John Hope*. Edinburgh 1789, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 2: 17, 352. London 1790, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Plants of the Coast of Coromandel* 3: 7, t. 210. 1811, *Hort. Bengal.* 42. 1814, A. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 727. Stuttgart 1993.

***Hopea odorata* Roxb.**

India, Sri Lanka. Tree

See *Plants of the Coast of Coromandel* 3: 7, t. 210. 1811, *Hort. Bengal.* 42. 1814

(Used in Sidha.)

in India: bilitirupu, bili thirupu, kallu raala, kallurala, bilitirpa, kalguggila, kalluguggula, thingan, urappimpasa, urappinpasha, urappuppacin, uruppa

***Hopea parviflora* Bedd.**

India.

See *Plants of the Coast of Coromandel* 3: 7, t. 210. 1811

(Used in Sidha. Fresh bark leech repellent.)

in India: bhogi, bhogimara, bogi, bogimara, bovine, bovu, bovu mara, bovu mara, im, irimpakam, irimpu, irimbogam, irubogam, irumbagam, irumbagam, irumbogum, kalbaane, kambagam, kambakam, kampakam, kiralboghi, kiralbogi, kiralia bovine, kirallabovige, kiribogi, kongu, konku, neergaalu, neergal, niragalu, nirgal, nirkkonku, pongu, puttal, tampakam, thambagam, thambakam, tirpu, tirpul, tirupu, urappu, urippoo, urippu, uripu, vellai kongu, vellaikongu, vellaikkonku

***Hopea utilis* (Bedd.) Bole (*Balanocarpus utilis* Bedd.)**

India. Perennial evergreen tree, yellowish white flowers in axillary panicles, see also *Balanocarpus utilis*

See *Forest. Man. Bot.* 237 [bis]. 1873 and *Kew Bulletin* 146. 1951

(Used in Sidha. A solution from bark applied on body to prevent leech attack.)

in English: black kongu

in India: kara kong, karakong, karakongu, karankongu, kong, kongu

***Hopea wightiana* Wall. (*Hopea wightiana* Wall. ex Wight & Arn.; *Hopea wightiana* Miq. ex Dyer)**

India.

See *Fl. Brit. India* [J.D. Hooker] 1: 808. 1872–1897, *Numer. List* [Wallich] n. 6295. 1832, *Prodr. Fl. Ind. Orient.* 1: 85. 1834

(Used in Sidha.)

in India: haiga, hegge, hiralbogi, hiribogi, hiribovige, ilaiponku, ilapongu, ilappongu, kalbon, kalbovu, kalbow, kanku, kar, keeree, kiraboghi, orpalam, orppalam, pav, unni

Hoppea Willdenow Gentianaceae

For the well-known German botanist David Heinrich Hoppe, 1760–1846, physician, pharmacist, naturalist, 1802–1807 and 1818–1842 editor of *Flora*, Director of the Botanic Garden at Regensburg; see Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 434. 1801, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 186. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 202. 1965, T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 182. 1972, Stafleu and Cowan, *Taxonomic Literature*. 2: 304–332. 1979, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

***Hoppea dichotoma* Willd. (*Hoppea dichotoma* Heyne ex Willd.)**

India. Annual small herb, divaricately branched, greenish-yellow to white flowers

See *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 434–435. 1801 and *Acta Botanica Indica* 5: 183. 1977, *Taxon* 36: 766–767. 1987

(Plant juice given in piles, fever and snakebite.)

in India: ramjetta

Hordeum L. Poaceae (Gramineae)

From the classical Latin name *hordeum*, *i* ‘barley’ (Plinius, Marcus Porcius Cato, L. Junius Moderatus Columella and Marcus Terentius Varro); Latin *horreum*, *i* ‘a storehouse’, Akkadian *qaritu*, *qiritu* ‘granary, store room’, Hebrew *qorah* ‘beam, roof’; “hordea qui dixit, superest ut tritica dicat” Virg., *Georg.* 1, 200; see Carl Linnaeus, *Species Plantarum*. 84. 1753 and *Genera Plantarum*. Ed. 5. 37. 1754 and Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Latina e di voci moderne. 2(2): 427–428. Leo S. Olschki, editore, Firenze 1994.

Hordeum jubatum L. (*Critesion geniculatum* Raf.; *Critesion jubatum* (L.) Nevski; *Critesion jubatum* subsp. *jubatum*; *Elymus jubatus* (L.) Link; *Hordeum caespitosum* Scribn.; *Hordeum jubatum* var. *caespitosum* (Scribn.) Hitchc.; *Hordeum jubatum* var. *normale* Kuntze; *Hordeum jubatum* var. *pampeanum* Hauman; *Hordeum jubatum* var. *tomentellum* Nevski; *Hordeum pampeanum* (Hauman) Herter; *Hordeum pubiflorum* var. *pampeanum* (Hauman) Melderis)

North America, USA, Mexico, NE Asia. Short-lived perennial or rarely annual, riparian, erect or spreading, densely tufted, stems numerous or solitary, fibrous roots, extensive root system, leaf blades scabrous, whitish-green to light purplish inflorescences, bristly and soft nodding spikes, long awns straight and silky, prolific seeder, weed species, aggressive, highly ornamental, useful for erosion control, potential for revegetation, pasture grass, grows in meadows and prairies around riverbeds and seasonal lakes, on the edges of sloughs and salt marshes

See *Species Plantarum* 1: 85. 1753, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Hortus Regius Botanicus Berolinensis* 1: 19. 1827, *Reliquiae Haenkeanae* 1(4–5): 327. 1830, *Flora Antarctica* 2: 388. 1847, *Mission Scientifique du Cap Horn, Botanique* 5: 389. 1889, *Revisio Generum Plantarum* 3: 355. 1898, *Proceedings of the Davenport Academy of Natural Sciences* 7: 245. 1899 and *Contr. (Plant considered poisonous and sometimes injurious to stock. Eye medicine.)

in English: fox-tail barley, foxtail barley, foxtail grass, skunk-tail, squirrel-tail grass, squirreltail barley, weed long tail, wild barley

in Colombia: cebada rabo de ardilla

in Mexico: cebada cimarrona, cola de zorrillo

Hordeum jubatum L. subsp. *jubatum* (*Critesion jubatum* (L.) Nevski; *Hordeum jubatum* var. *jubatum*)

Northern America, USA, Russia, Siberia, Arctic. Densely caespitose, grows on grassy slopes, in moist soil along road-

sides and other disturbed areas, in meadows, the edges of sloughs and salt marshes

See *Species Plantarum* 1: 85. 1753 and *Flora URSS* 2: 721. 1934, *Nordic J. Bot.* 14(2): 117–136. 1994

(Sometimes injurious to stock.)

in English: foxtail barley

Hordeum murinum L. subsp. *glaucum* (Steudel) Tzvelev (*Critesion glaucum* (Steud.) Á. Löve; *Critesion murinum* (L.) Á. Löve subsp. *glaucum* (Steud.) W.A. Weber; *Critesion murinum* subsp. *glaucum* (Steud.) B.K. Simon, nom. illeg., non *Critesion murinum* subsp. *glaucum* (Steud.) W.A. Weber; *Hordeum glaucum* Steud.; *Hordeum leporinum* subsp. *glaucum* (Steud.) T.A. Booth & A.J. Richards; *Hordeum murinum* var. *pedicellatum* Pau & Font Quer; *Hordeum stebbinsii* Covas)

Eastern Mediterranean, SW Europe. Annual, spike green to glaucous, central spikelet pedicellate, grows in grassland, waste places, disturbed areas, fields, sandy soils

See *Species Plantarum* 1: 85. 1753, *Essai d'une Nouvelle Agrostographie* 115, 182. 1812, *Linnaea* 9(1): 133. 1834, *Synopsis Plantarum Glumacearum* 1: 352. 1854 and *Iter Maroc.* 96. 1927, *Madroño* 10(1): 17–19, pl. 2. f. 8, 12, 13. 1949, *Can. in Nigeria: sa'ir, sha'ir, sha'iruri

in China: da mai, kung mai (= naked barley), mai ya, mou, ta mai, ta mé, tai mak

in India: akshatha, baajri, baarli, baarliyarisi, barlhari, barlibiyam, barliyarishi, barliyarisi, cevad, chak, cheno, chung, dhaanyaraaja, dhanyabhedam, divya, hayapriya, hayeshta, jab, jan, jao, jaon, jau, jav, java, jave, jave godhi, jave godi, jawa, jhotak, jou, jowakhar, juba, kanchuki, medhya, nai, ne, pachcha yavulu, pachhayava, pavithra dhaanya, praveeta, saathu, satu, shaktu, shruk, shvethashunga, sitashuka, sitrishuka, soa, spiroka, suj, swah, thazatt, theekshnashuka, thuragapriya, tro, yangma, yau, yav, yava, yava arisi, yavaalu, yavaka, ymvah

in Lepcha: kacher

in Malaysia: barli

in Thailand: khao-ba-le, khao bale

in Tibetan: bru-rnying, chag-tshe, so-ba

Hornstedtia Retz. Zingiberaceae

Named to honor the Swedish naturalist Claës (Claudius) Fredric (Frederic) Hornstedt, 1758–1809, physician, botanist, travelled in South Africa, Azores and Java, a student of Carl Peter Thunberg (1743–1828), see *Nova genera plantarum ... praeses Carol P. Thunberg ... et respondens Claudius Fr. Hornstedt*. Uppsala [1781], *Observationes Botanicae* (Retzius) 6: 18. 1791, *Journal of the Straits Branch of the Royal Asiatic Society* 32: 139. 1899 and *Das Pflanzenreich* IV. 46(Heft 20): 259. 1904, *Notes Roy. Bot. Gard. Edinburgh* 31(2): 195. 1972, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 193. 1981.

Hornstedtia arunachalensis S. Tripathi & Ved Prakash

India.

See *Nordic Journal of Botany* 19(3): 329–331, f. 1. 1999

(Ceremonial, flowers used during marriage ceremonies.)

in India: b-lak, blak

Hornstedtia costata (Roxb.) K. Schum. (*Achasma costatum* (Roxb.) Loes.; *Alpinia cardamo-medium* Roxb.; *Alpinia costata* Roxb.; *Alpinia media* (Schult.) Spreng.; *Amomum costatum* (Roxb.) Voigt; *Elettaria media* (Schult.) Link ex Horan.; *Gethyra cardamo-medium* (Roxb.) Sweet)

E. Himalaya. Fruits strongly ribbed

See *Revis. Gen. Pl.* 2: 686. 1891, *Fl. Brit. India* 6: 255. 1892 and *Notizbl. Bot. Gart. Berlin-Dahlem* 10: 62. 1927

(Seeds for asthma, pulmonary affections, stomach troubles and female diseases.)

Hornstedtia fenzlii (Kurz) K. Schum. (*Amomum fenzlii* Kurz; *Cardamomum fenzlii* (Kurz) Kuntze; *Cardamomum fenzlii* Kuntze)

Nicobar Is. Perennial herb, shrub, many flowers in spikes

See *Plants of the Coast of Coromandel* 3: 75. 1820, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 45(2): 154. 1876, *Revis. Gen. Pl.* 2: 686. 1891 and *Pflanzenr.*, IV, 46: 195. 1904

(Antibacterial, for malarial fevers. Rhizome as a bee repellent.)

in India: hami

Hornstedtia havilandii (K. Schum.) K. Schum. (*Amomum havilandii* K. Schum.; *Hornstedtia havilandii* K. Schum.; *Hornstedtia longipes* Ridl.)

Borneo. Perennial herb, shrub-like, creeping aromatic rhizomes, reddish flowers

See *Bot. Jahrb. Syst.* 27(3): 303. 1899 and *Pflanzenr.*, (Engler) Zingib. IV, 46: 193. 1904, *Bot. Jahrb. Syst.* 44: 530. 1910

(Rhizome decoction or sap drunk as an anthelmintic and a postpartum remedy.)

Hornstedtia scyphifera (J. König) Steud. (*Amomum scyphiferum* J. König; *Cardamomum scyphiferum* (J. König) Kuntze; *Cardamomum scyphiferum* Kuntze; *Cardamomum scyphus* Kuntze; *Greenwaya scyphiferus* (J. König) Giseke; *Greenwaya scyphiferus* Giseke; *Hornstedtia scyphifera* Steud.)

W. Malesia.

See *Prael. Ord. Nat. Pl.* 199, 206. 1792, *Nomencl. Bot.*, [Steudel], ed. 2, 1: 776. 1840, *Revis. Gen. Pl.* 2: 687. 1891

(For boils and wounds.)

Horsfieldia Willdenow Myristicaceae

Named for Dr. Thomas Horsfield, 1773–1859 (London), American physician, botanist and zoologist. See *Sp. Pl.*, ed. 4 [Willdenow] 4(2): 872. 1806, John Joseph Bennett (1801–1876) and Robert Brown, *Plantae Javanicae rariores*, descriptae iconibus illustratae, quas in insula Java, annis 1802–1818, legit et investigavit Thomas Horsfield, M.D. London 1838–1852 and D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. 2: 170–171. London 1914, M. Archer, *Natural History Drawings in the India Office Library*. 46–48, 80–82. London 1962, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 205. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. 38. 1969.

Horsfieldia amygdalina (Wallich) Warburg (*Horsfieldia prunoides* C.Y. Wu; *Myristica amygdalina* Wallich; *Myristica amygdalina* Wall. ex Hook. f. & Thomson)

China. Tree, aromatic glabrous shining leaves, ovoid fruits, fleshy yellow aril eaten, this species often misidentified as *Horsfieldia glabra*

See *Pl. Asiat. Rar.* (Wallich). 1: 79, t. 90. 1830, *FBI* [J.D. Hooker] 5: 106. 1886, *Monogr. Myristic.* 310. 1897 [*Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.*] and *Fl. Reipubl. Popularis Sin.* 30(2): 204. 1979

(Bark antiseptic.)

in China: feng chui nan

in India: dettak-araung, pran-dang-araung

Horsfieldia glabra (Reinw. ex Blume) Warb. (*Horsfieldia amygdalina* (Wall.) Warb.; *Horsfieldia glabra* Warb.; *Horsfieldia glabra* (Blume) Warburg; *Horsfieldia prunoides* C.Y. Wu; *Myristica amygdalina* Wall.; *Myristica amygdalina* Wall. ex Hook. f. & Thomson; *Myristica glabra* Reinw. ex Blume)

India, Indonesia. Tree, bark with sparse lenticels, glabrous dark green leaves, twigs red

See *Bijdragen tot de flora van Nederlandsch Indië* 11: 576. 1825, *Plantae Asiaticae Rariores* 1: 79. 1830, *Flora Indica*: being a systematic account of the plants . . . 160. 1855, *FBI* [J.D. Hooker] 5: 106. 1886, *Monogr. Myristic.* 310. 1897 [*Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 313. 1897]

(Bark antiseptic.)

in China: feng chui nan

Horsfieldia grandis Warb.

Indonesia. Small tree

See *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 391. 1897

(Magic, ritual, to protect padi farm from pest infestation.)

in English: kumpang wood

in Borneo: kumpang pentik

Horsfieldia iryagedhi Warb. (*Horsfieldia iryagedhi* (Gaertn.) Warb.)

SE Asia.

See *Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 332. 1897

(Bark as disinfectant, antiseptic.)

in Malaya: penggu, pianggu

Horsfieldia kingii (Hook. f.) Warb. (*Horsfieldia hainanensis* Merr.; *Horsfieldia tetratopala* C.Y. Wu & W.T. Wang; *Myristica kingii* Hook. f.)

India. Tree, oblong fruits, smooth aril, white kernel

See *The Flora of British India* [J.D. Hooker] 5(13): 106. 1886, *Monogr. Myristic.* 308. 1897 [*Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 308. 1897] and *Lingnan Science Journal* 11(1): 43. 1932, *Acta Phytotaxonomica Sinica* 6(2): 218–219, pl. 47, f. 6. 1957

(Fresh kernel as masticatory.)

in China: da ye feng chui nan

in India: mijingi-kum-asing-araung

Horsfordia A. Gray Malvaceae

After F.H. Horsford, Vermont botanical collector, see *Proceedings of the American Academy of Arts and Sciences* 20: 356. 1885, *Proceedings of the American Academy of Arts and Sciences* 22(2): 296–297. 1887, *Proc. Amer. Acad. Arts* 24: 40. 1889 and James C. Hickman, ed., *The Jepson Manual: Higher Plants of California*. 750. University of California Press, Berkeley 1993.

Horsfordia alata (S. Watson) A. Gray (*Horsfordia alata* A. Gray; *Horsfordia palmeri* S. Watson; *Sida alata* S. Watson)

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 20: 356. 1885, *Proceedings of the American Academy of Arts and Sciences* 22(2): 296–297. 1887, *Proc. Amer. Acad. Arts* 24: 40. 1889

(Outer bark of the root and the lower part of the stem, soaked, and the thick liquid used for sores in the mouth and eyes.)

Hoslundia Vahl Lamiaceae (Labiatae)

After the Danish botanist Ole Haaslund Schmidt (Smith), d. 1802 (Akwapim), traveller, plant collector in Ghana, companion to Peter Thonning (1775–1848); see *Enum. Pl.* [Vahl] i. 212 (1805). 1804 and C.F.A. Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924–1926, C.D. Adams, “Activities of Danish Botanists in Guinea, 1783–1850.” in *Transactions of the Historical Society of Ghana*. 3: 30–46. 1957, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 73, 75. 1971.

Hoslundia opposita Vahl (*Clerodendrum micranthum* Gilli; *Hoslundia decumbens* Benth.; *Hoslundia opposita* Vahl var. *decumbens* (Benth.) Baker; *Hoslundia opposita* var. *verticillata* (Vahl) Baker; *Hoslundia oppositifolia* P. Beauv.; *Hoslundia verticillata* Vahl; *Micranthes menthoides* Bertol.; *Orthosiphon physocalycinus* A. Rich.)

Tropical Africa, South Africa, Madagascar. Shrub, woody-based herb, many-branched and sparsely branched, erect to semi-erect, aromatic when crushed, scrambling, arching, scandent, twigs strongly angled, flowers in loose terminal panicles, flowers white-yellow-brown, fleshy calyx inflated in fruit, yellow-orange fruits, very sweet soft ripe fruit eaten raw, bee forage, sweet smelling volatile oil, goat fodder, disturbed area, edge of riverine bush, scrub and bushland, along shore, at forest edge, roadside bushland, in woodland

See *Enumeratio Plantarum* . . . [Vahl] 1: 212–213. 1804, *Fl. Oware* 1: 53. 1806, *Prodr.* (DC.) 12: 54. 1848, *Tentamen Fl. Abyss.* 2: 180. 1850, *Mem. Reale Accad. Sci. Ist. Houttuynia Thunb. Saururaceae

Named for the Dutch botanist Maarten (Martin, Martinus) Houttuyn, 1720–1798, naturalist, physician at Amsterdam. See *Kongl. Vetenskaps Academiens Nya Handlingar* 4: 149, 151. 1783, *Flora Cochinchinensis* 34, 61. 1790 and J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 209. 1965, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. 231. Boston, Mass. 1973, F. Boerner & G. Kunkel, *Taschenwörterbuch der Botanischen Pflanzennamen*. 4. Aufl. 115. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 728. 1993.

Houttuynia cordata Thunberg (*Polypara cochinchinensis* Loureiro; *Polypara cordata* Kuntze; *Polypara cordata* H. Buek, nom. inval.)

India, Himalayas. Perennial prostrate erect aromatic herb, creeping branching rootstock, broad ovate-cordate leaves, white petaloid bracts, yellowish stamens, whole plant used as vegetable, tubers eaten raw or cooked

See *Kongl. Vetensk. Acad. Nya Handl.* 4: 149, 151, 152, t. 5. 1783, *Fl. Jap.* (Thunberg) 234, t. 26. 1784, *Flora Cochinchinensis* 61. 1790, *Gen. Sp. Synon. Cand.* 4: 310. 1874, *FBI* 5: 78. 1886, *Revisio Generum Plantarum* 2: 565. 1891

(Whole plant cooling, resolvent, emmenagogue, applied as a plaster on bone fracture; consumed raw for heart diseases, indigestion; whole plant paste boiled and taken for gastric

ulcer, stomachache, high blood pressure, also applied on boils and carbuncles; boiled with a crab for fever; whole plant pounded into a paste applied for treating snake, dog and cat bite. Leaves eaten raw as a vegetable for blood purification, also given in measles, hemorrhoids, dysentery and gonorrhoea; paste of leaves with leaves of *Momordica charantia* applied on sore of head; leaves cooked as vegetable and eaten to cure stomach disorders; leaf juice taken for stomachache, cholera, diarrhea, dysentery, biliousness, also applied on all types of skin diseases, sores and boils; in swelling of uterus, decoction of leaves given with leaves of *Polygonum chinense*. Roots diuretic, given for stomach troubles; rootstock for menstrual disorders. Veterinary medicine, plant juice put in the wounds of cattle to kill worms. Magic, ritual, superstitions, raw leaf sap given for muscular pain due to evil spirits; plant not to be eaten by any woman after delivery.)

in English: fishwort

in China: chi, chu tsai, ji cai, yu hsing tsao, yu xing cao

in India: alimoli, gandhejarh, hakongpi, han-takrang, heelijhar, jamyrdoh, jamyrdoh, kaiyukhing, mesenderi, mosondari, mosondori, muchandari, musanderi, phak-mark, shatogun, sia-amang, sia-hamang, simdali, simdalu, tokningkhok, toningkhok, vaithinthang

in Japan: doku-dami

in Nepal: kukur paile

in Vietnam: diep ca, la giap

Hovenia Thunb. Rhamnaceae

For the Dutch promoter of science David ten Hove, 1724–1787, one of the sponsors of C.P. Thunberg's journey to South Africa, Java and Japan; see *Nova Genera Plantarum* [Thunberg] 1: 7–8. 1781, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 453. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 115. 1989.

Hovenia acerba Lindley (*Hovenia dulcis* var. *acerba* (Lindl.) Sengupta & Safui)

China.

See *Bot. Reg.* 6: t. 501. 1820 and *Bull. Bot. Surv. India* 26(1–2): 55. 1984 (publ. 1985)

(Hepatoprotective, antioxidative, antimicrobial and anti-diabetic. Often used for producing *guai zao* wine, used medicinally.)

in China: zhi ju, zhi qu

Hovenia dulcis Thunb. (*Hovenia dulcis* var. *glabra* Makino; *Hovenia dulcis* var. *latifolia* Nakai ex Y. Kimura)

East Asia, China, Japan. Tree, deciduous, creamy flowers, globose succulent fruits, fleshy swollen rachis of the infructescence is sweet and edible

See *Nova Genera Plantarum* [Thunberg] 1: 8. 1781 and *Botanical Magazine* 28(329): 155. 1914, *Fl. Jap.* 476. 1939, *Arch. Pharm. Res.* 28(7): 804–809. 2005, *Parasitol. Res.* 97(5): 399–407. 2005, *Am. J. Chin. Med.* 35(4): 693–703. 2007, *Pharmaceutical Biology* 48(8): 953–958. 2010, *Planta Med.* 76(10): 943–949. 2010

(Strongly diuretic, neuroprotective, hepatoprotective, anti-oxidative, antigiardial, antimicrobial and antidiabetic. Seeds used to relieve intoxication due to wine, a clinically useful agent protecting the liver from alcohol-induced injury, can reduce hepatic injuries. Fresh fruit stalks eaten as a postpartum remedy.)

in English: Chinese raisin, coral tree, Japanese raisin tree, raisin tree

in China: bei zhi ju, bei zhi qu, chi chu, guai zao, wan shou guo, wan zi guo, zhi ju guo, zhi ju zi, zhi zao

in India: bangikath, chamhun, chetia-hola, sangree-kung, sicka

in Nepal: bangikath

in Vietnam: chi cu, khung kheng

Hovenia trichocarpa Chun & Tsiang

Japan.

See *Sunyatsenia* 4(1–2): 16–17, pl. 6, f. 3. 1939, *J. Nat. Prod.* 61(6): 786–790. 1998

(Hovetrichosides, glycosides of two auronols, neolignans and phenylpropanoid from the bark.)

in China: mao guo zhi ju

Hoya R. Br. Asclepiadaceae (Apocynaceae)

The generic title honors the English botanist Thomas Hoy, c. 1750–1822, 1788 Fellow of the Linnean Society, head gardener to the then Duke of Northumberland at Syon (Sion) House; see Robert Brown, *Prodromus florae Novae Hollandiae*. 459. 1810, “On the Asclepiadeae.” *Memoirs of the Wernerian Natural History Society*. 1: 26. Edinburgh 1811, John Claudius Loudon (1783–1843), *Arboretum et fruticetum britannicum*. London 1838, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 271–272. 1838, G.J. Aungier, *The history and antiquities of Syon monastery, the parish of Isleworth, and the chapelry of Hounslow*. 1840, *Museum Botanicum* 1: 59. 1849, “Our Neighbourhood.” A monthly review and summary. Isleworth 1870–1871, *The Flora of British India* 4(10): 52–53. 1883 and *Acta Phytotaxonomica Sinica* 12(1): 126–127. 1974, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 115. 1989, *Novon* 2(3): 218. 1992, *Hoya Sections; A Complete Study* ... 13, 18. 1993, *Repertorium Plantarum Succulentarum* 44: 10. 1993[1994], *Fraterna* 2: 12, 13, 15. 1994.

Hoya australis R. Br. ex J. Traill

Pacific. Vine

(Used for treating wounds and rashes.)

in English: Australian hoya, common wax flower

in Tonga: matolu

Hoya bicarinata A. Gray

See *Proceedings of the American Academy of Arts and Sciences* 5: 335. 1861

(A poultice for wounds, cuts, skin diseases.)

Hoya carnosa (Linnaeus f.) R. Brown var. ***carnosa*** (*Asclepias carnosa* Linnaeus f.; *Hoya chinensis* (Loureiro) Traill; *Stapelia chinensis* Loureiro)

China.

(Used for the treatment of encephalitis, pneumonia and orchitis.)

in English: honey plant, wax plant

in China: qiu lan

in Japan: sakura-ran

Hoya coriacea Blume (*Centrostemma coriaceum* (Blume) Meisn.; *Hoya coriacea* Zoll. ex Miq.; *Hoya coriacea* Lindl.)

Malaysia.

See *Bijdragen tot de flora van Nederlandsch Indië* 16: 1061. 1826, *Edwards's Botanical Register* 25: t. 18. 1839, *Plantarum vascularium genera secundum ordines* ... 2: 177. 1840, *Flora van Nederlandsch Indië* 2: 519. 1857

(Leaves decoction taken for cough and asthma.)

Malay name: chuk

Hoya coronaria Blume

Indonesia. Herbaceous climber, copious white milky latex to watery exudate, petals light greenish cream flushed purple

See *Bijdr. Fl. Ned. Ind.* 16: 1063. [Oct 1826–Nov 1827]

(Veterinary medicine, crushed leaves decoction applied as an ointment, or leaves heated and applied as a poultice to treat ringworm, vitiligo and dog mange.)

in Indonesia: aka umeng

Hoya diversifolia Blume

Malaysia. Epiphytic vine, white-yellowish flowers

See *Bijdragen tot de flora van Nederlandsch Indië* 16: 1064. 1826

(Leaves decoction, a bath, against fever and rheumatism.)

Malay name: kekapal

Hoya globulosa Hook. f.

India, Himalaya. Epiphytic herb, white latex, elliptic coriaceous leaves, creamy flowers

See *The Gardeners' Chronicle & Agricultural Gazette* 1: 732. 1882, *FBI* 4: 60. 1883

(Ash of dry leaves applied on dog bite.)

in India: mithan-adai, mithanadai, thaibom

Hoya griffithii J.D. Hooker (*Hoya kwangsiensis* Tsiang & P.T. Li; *Hoya lancilimba* Merrill; *Hoya lancilimba* f. *tsoi* (Merrill) Tsiang; *Hoya tsoi* Merrill)

China.

(Stems and leaves used for the treatment of traumatic injury, fractures, swellings and coughs.)

in China: he qiu teng

Hoya kerrii Craib (*Hoya obovata* Decaisne var. *kerrii* (Craib) Costantin)

China.

See *Bull. Misc. Inform. Kew* 1911: 418. 1911

(Leaves used for the treatment of swellings and pyoderma.)

in China: ao ye qiu lan

Hoya lacunosa Blume (*Otostemma lacunosum* (Blume) Blume)

China.

(Decoctions of all parts used to detoxify, in insect bites, draw out pus, and reduce swellings.)

in English: grooved wax flower

in China: lie ban qiu lan

Hoya lanceolata Wallich ex D. Don (*Hoya lanceolata* Lindl.)

Himalaya.

See *Prodromus Florae Nepalensis* 130. 1825, *Hort. Cantabrig.*, ed. 11. 92. 1826, *Bot. Mag.* 74: t. 4402. 1848 and *Asklepios* 23: 27. 1981

(A drink made from pasted plant given in diarrhea and stomach troubles.)

in India: kurkuriya jhar

Hoya lyi H. Léveillé (*Hoya yuennanensis* Handel-Mazzetti)

China.

(Leaves used for the treatment of rheumatoid arthritis and traumatic injury.)

in China: xiang hua qiu lan

Hoya parasitica (Roxb.) Wall. ex Wight (*Asclepias parasitica* Wall. ex Hornem.; *Asclepias parasitica* Roxb., nom. inval.; *Hoya parasitica* Wall. ex Wight; *Hoya parasitica* Wall. ex J. Traill, nom. inval.)

India. Epiphyte

See *Hort. Bengal.* 20. 1814, *Suppl. Hort. Bot. Hafn.* 126. 1819, *Transactions of the Horticultural Society of London* 7: 23. 1830, *Flora Indica*; or, descriptions of Indian Plants (Roxburgh) 2: 42. 1832, *Contributions to the Botany of India* 37. 1834

(Twig decoction for treating wounds; twig paste warmed and applied on joint pain. Leaves pounded in coconut oil applied for elephantiasis, cuts and wounds.)

in India: lanvoh, lanvuh, ramkuch

Hoya pottsii Traill (*Hoya angustifolia* Traill; *Hoya obscurinervia* Merrill; *Hoya pottsii* var. *angustifolia* (Traill) Tsiang & P.T. Li)

China.

(Leaves used for the treatment of fractures and swellings and for draining off pus and promoting new growth.)

in English: Potts wax flower

in China: san mai qiu lan

Hua Pierre ex De Wild. Huaceae

For the French botanist Henri Hua, 1861–1919 (Paris), plant collector in West Africa, author of “Sur les Apocynacées à graines à arêtes chalaziques plumeuses (*Kickxia* Bl., *Paravallaris* Pierre, *Funtumia* Stapf).” *Bull. Soc. Bot. France.* 51: 270–275. 1904; see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists.* 2: 213. 1965.

Hua gabonii Pierre ex De Wild.

Congo.

See *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 288. 1906

in Congo: mufira

Hudsonia L. Cistaceae

After the British (b. Kendal, Westmorland) botanist William Hudson, 1730 (or 1733/1734)–1793 (d. London), naturalist, botanical collector, apothecary, horticulturist, Praefectus of the Chelsea Physic Garden (the Apothecaries' Garden), became a Fellow of the Royal Society in 1761 and of the Linnean Society in 1791, his writings include Guleilmi Hudsoni ... *Flora anglica*, exhibens plantas per regnum angliae sponte crescentes, distributas secundum systema sexuale. London 1762 and “Catalogue of the Fifty Plants from Chelsea Garden, Presented to the Royal Society by the ... Company of the Apothecaries.” in *Philosophical Transactions of the Royal Society.* 1768–1770, one of the founders of the Linnean Society. See *Systema Naturae*, ed. 12 2: 323, 327. 1767, R. Pulteney, *Historical and biographical*

sketches of the progress of botany in England. 2: 351–352. London 1790, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 3: 131. London 1796–1800 and *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, James Britten and George E. Simonds Boulger, *A Biographical Index of Deceased British and Irish Botanists*. London 1931, J. Britten, *The Sloane Herbarium ...* revised and edited by J.E. Dandy. 141. London 1958, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 215. 1965, Frans A. Stafleu, *Linnaeus and the Linnaeans*. The spreading of their ideas in systematic botany, 1735–1789. Utrecht 1971, Blanche Henrey, *British Botanical and Horticultural Literature before 1800*. Oxford 1975, Roy A. Rauschenberg, in *D.S.B.* 6: 538–539. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Hudsonia tomentosa Nutt. (*Hudsonia ericoides* L. subsp. *tomentosa* (Nutt.) N.H. Nick. & J.E. Skog)

North America. Perennial subshrub, shrub

See *The Genera of North American Plants* 2: 5. 1818 and *Annals of the Missouri Botanical Garden* 59(3): 456. 1972[1973], *Taxon* 34: 547–551. 1985, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 30: 10–15. 1999, *Ludoviciana* 29: 74–79. 2000

(Plant decoction as a blood purifier.)

in English: beach-heath, false heather, hudsonia, poverty grass, woolly beachheather

Hudsonia tomentosa Nutt. var. *tomentosa* (*Hudsonia ericoides* L. subsp. *tomentosa* (Nutt.) N.H. Nick. & J.E. Skog)

North America. Perennial subshrub, shrub

See *The Genera of North American Plants* 2: 5. 1818 and *Annals of the Missouri Botanical Garden* 59(3): 456. 1972[1973], *Taxon* 34: 547–551. 1985, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 30: 10–15. 1999, *Ludoviciana* 29: 74–79. 2000

(Plant decoction as a blood purifier.)

in English: beach-heath, false heather, hudsonia, poverty grass, woolly beachheather

Hugonia L. Linaceae (Hugoniaceae)

After Augustus Johannes Hugo, d. 1753, author of *Dissertatio ... de variis plantarum methodis*. Lugduni Batavorum 1711; see *Species Plantarum* 2: 675. 1753, *Versuch über die Arzneikräfte der Pflanzen* 107. 1818, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 71. 1834, and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 277. 1989.

Hugonia mystax L. (*Hugonia mystax* Cav.) (from the Greek *mystax*, *mystakos* ‘moustache’.)

India. Liana, petals and stamen yellow

See *Species Plantarum* 2: 675. 1753

(Used in Ayurveda and Sidha. Roots antiviral, applied to reduce inflammatory swellings, also a remedy for indigestion. Leaves applied to reduce inflammatory swellings of wounds.)

in India: adavigoranta, agori, agure, akori, balle, gathontha, gatrinta, gatritha, kaarthotti, kaaka beera, kaki burra teega, kakibeera, kakibira, kakibire, kakvire, kamsamarah, karttotti, kodivirai, kotivitai, moderacanni, modera-kanni, moderakkanni, modira-canni, modira kanni gida, modirakanni, modirakannu, modirakkanni, mothira kanni, mothirakanni, mothorudan, motirakanni, motirakodi, motirakkanni, mrema, mullankode, mullankodi, mullankole, mullu ankole, nelupa, padavakani, peesangi, penkebedali, penta peeda, pisang, renangi, thivva potike, tivva putiki, tivvapotike, tivvaputiki, udapachettu, ungarala podimi, ungaralapedmi, ungaralapidemu, vendapa, venoapa, vudupa

Hugonia planchonii Hook. f. (*Hugonia acuminata* Engl.; *Hugonia molundensis* Mildbr.)

Tropical Africa.

Gabon. Woody vine

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 106. 1902

(Leaves for bronchitis, whooping cough, chronic cough. Crushed leaves and root of *Hugonia planchonii* together with the crushed leaves of *Strychnos afzelii* applied to treat abscesses and swellings.)

Hullettia King ex Hook.f. Moraceae

After the British botanist Richmond William Hullett, 1843–1914, schoolmaster, 1888 Fellow of the Linnean Society, plant collector in Singapore, Java, Borneo (with Sir George King, 1840–1909).

Hullettia dumosa King

India.

See *The Flora of British India* [J.D. Hooker] 5: 547. 1888

(Leaves decoction for diseases of abdomen. For toothache, apply the gum from the bark to the tooth.)

Malay names: ampedai tong, menhim

Humboldtia Vahl Fabaceae (Caesalpinaceae, Detarieae, Leguminosae)

For the German (b. Berlin) naturalist Friedrich Wilhelm Heinrich Alexander von Humboldt, 1769–1859 (d. Berlin), traveller, geographer, 1799–1804 exploring South America with Aimé Bonpland (1773–1858), in 1804 travelled to the

United States and was elected a member of the American Philosophical Society; see *Symbolae Botanicae*, ... 3: 106. 1794 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 218. 1965, T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 186. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 233. Boston, Mass. 1973, Stafleu and Cowan, *Taxonomic literature*. 2: 363–371. 1979, Kurt-R. Biermann, in *D.S.B.* 6: 549–555. 1981, *Blumea* 31: 329–339. 1986.

Humboldtia brunonis Wall. (*Batschia brunonis* (Wall.) Kuntze)

India. Perennial non-climbing small tree, flowers in many flowered racemes, pink sepals, white petals, oblong compressed reddish-brown tomentose pod

See *Plantae Asiaticae Rariores* (Wallich). 3: 17, t. 233. 1832, *Fl. British India* 2: 263. 1878

(Bark bitter, antioxidant, astringent, styptic, anthelmintic, stomachic, febrifuge, demulcent, used for dyspepsia, colic, ulcers, pimples; bark decoction in urinary troubles, menstrual disorders.)

Humboldtia unijuga Bedd. (*Batschia unijuga* (Bedd.) Kuntze; *Batschia unijuga* Kuntze; *Humboldtia trijuga* (Bedd.) M. Mohanan; *Humboldtia trijuga* (J. Joseph & V. Chandras.) M. Mohanan; *Humboldtia unijuga* Bedd. var. *trijuga* J. Joseph & V. Chandras.)

India. Tree

See *Revisio Generum Plantarum* 1: 162. 1891 and *J. Bombay Nat. Hist. Soc.* 81(3): 729. 1984 (publ. 1985), Mohanan, M., *Fl. Thiruvananthapuram* 169. Calcutta: Botanical Survey of India, 1994

(Paste of root galls taken for asthma.)

in India: addatiga, madapu, palakan

Humboldtia vahliana Wight

India. Perennial non-climbing tree, stilt roots, white tawny velvety flowers in axillary racemes, in swamps

See *Symbolae Botanicae*, ... 3: 106. 1794, *Flora Peruviana, et Chilensis Prodromus* 121, t. 27. 1794 and *J. Arnold Arbor.* 53: 528. 1972, *Fl. Madras* 1: 411. 1997

(Used in Ayurveda and Sidha. Bark demulcent, used in biliousness, leprosy, ulcers and epilepsy.)

in India: arruvanci, attavanji, attuvanchi, attuvanci, attuvanchi, attuvanni, jelavedesa, karappongu, korathi, korati, koratthi, kurappunna, kurappunnu, kurapunnu, kurati, neervanche, nirvanchi

Humulus L. Cannabaceae

Probably from a Medieval name from a German name for the hop, or from the Latin *humus*, i 'the earth, ground', referring to the prostrate habit of some species; see Carl Linnaeus, *Species Plantarum*. 2: 1027–1028. 1753, *Genera Plantarum*. Ed. 5. 453. 1754, *Enchiridion Botanicum* 171. 1841, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 454. 1852 and *Botaničeskij Žurnal* (Moscow & Leningrad) 73(4): 592. 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 116. 1989, Giovanni Semerano, *Le origini della cultura europea*. (For skin diseases.)

in China: lü cao

Hunteria Roxburgh Apocynaceae

Named for the Scottish botanist William Hunter, 1755–1812 (Batavia, East Indies), physician, M.D. 1808, 1783–1812 physician of the Bengal Medical Establishment (Service), plant collector in Malay Pen.; see D.G. Crawford, *A History of the Indian Medical Service, 1600–1913*. 1: 207. London 1914; William Roxburgh, *Flora Indica*; or descriptions of Indian plants, by the late W. Roxburgh, ... edited by William Carey, D.D. to which are added descriptions of plants more recently discovered by Nathaniel Wallich. 2: 532–533. Serampore 1824. Or named for the Scottish physician Alexander Hunter, 1729–1809 (York), M.D. Edinburgh 1753, 1775 Fellow of the Royal Society, 1770 founded the Agricultural Society of York, his works include *The Buxton Manual*. York 1797, *Culina Famulatrix Medicinae ...* By Ignotus [i.e., A.H.], *Men and Manners*; or, Concentrated Wisdom. 1808 and *Receipts in Modern Cookery*; with a medical commentary, by A.H. [With a dedication, preface, and note, signed: Ignotus, i.e. Alexander Hunter.] London 1820, edited *Georgical Essays*. London 1770–1772. See *Hort. Bengal.* 84. 1814, *Fl. Ind.*, ed. Carey & Wall., ii. 531. 1824, *Flora Indica*; or, descriptions of Indian Plants 1: 695. 1832, *A General History of the Dichlamydeous Plants* 4: 71, 101. 1837, *Gen. Pl.* [Bentham & Hooker f.] 2(2): 699. 1876, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1278. 1896 and *Fl. Trop. Africa* [Oliver et al.] 4(1.1): 26, 103. 1902, *Bol. Soc. Brot. sér. 2*, 27: 112. 1953, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 295. Basel 1996, *Opera Botanica Belgica* 7: 59–102. 1996.

Hunteria ballayi Hua (*Pleiocarpa bicarpellata* Stapf; *Pleiocarpa rostrata* Benth.; *Pleuranthemum ballayi* (Hua) Pichon)

Cameroon, Central African Republic, Gabon and Congo. Small tree, woody vine, latex yellow, warted orange fruits, sweet mesocarp

See *Hooker's Icon. Pl.* 12: t. 1182. 1876 and *Bull. Mus. Hist. Nat.* (Paris) 1902, 281. 1902, *Boletim da Sociedade Broteriana* sér. 2, 27: 113. 1953

(Women swallow the seed along with the sweet mesocarp as a fertility drug, seeds eaten raw by women to induce pregnancy.)

in Central African Republic: mosebe, mosebé

Hunteria ghanensis J.B. Hall & Leeuwenb.

Ghana.

See *Bull. Jard. Bot. Natl. Belg.* 49(3–4): 422–425, f. 1. 1979

(Bark taken as a stomachic and to treat difficulties with urination.)

Hunteria umbellata (K. Schum.) Hallier f. (*Carpodinus umbellata* K. Schum.; *Carpodinus umbellatus* K. Schum.; *Hunteria eburnea* Pichon; *Hunteria elliotii* (Stapf) Pichon; *Hunteria mayumbensis* Pichon; *Hunteria umbellata* Hallier f.; *Picalima elliotii* (Stapf) Stapf; *Picalima elliotii* Stapf; *Picalima umbellata* (K. Schum.) Stapf; *Picalima umbellata* Stapf; *Polyadoa umbellata* Stapf; *Polyadoa umbellata* (K. Schum.) Stapf)

Tropical Africa. Shrub or small tree, milky latex, inflorescence a terminal cyme, fragrant flowers, often confused with *Hunteria congolana* and *Picalima nitida*

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 221. 1896 and *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten*. Beihefte 17(3): 190. 1900, *Flora of Tropical Africa* 4(1.1): 103–104. 1902, *Bulletin of Miscellaneous Information Kew* 1908: 302. 1908, *Bol. Soc. Brot. sér. 2*, 27: 91, 97. 1953, *Phytochemistry* 19: 1959–1961. 1980, *Phytochemistry* 25(6): 1461–1468. 1986, *Journal of Pharmacy and Pharmacology* 46 (supplement): 1046. 1994, *Pakistan Journal of Scientific and Industrial Research* 44(5): 286–290. 2001

(Highly toxic, fruits are toxic and are used for criminal purposes and as an ingredient of arrow poison. Powdered root and root decoctions used to prevent miscarriage. Root and stem bark symphathomimetic, anti-hypertensive and sedative, hypotensive, anthelmintic, cerebrovascular agents, against Guinea worm, filaria worms and schistosomiasis. Bark bitter tonic, aphrodisiac, hypotensive, stomachic, febrifuge; root-bark extract applied to sores caused by leprosy. Seeds extract a cure for piles, yaws, diabetes and stomach ulcers.)

in Nigeria: afintoto, erin (Yoruba); osu (Edo)

in Yoruba: erin

Hunteria zeylanica (Retz.) Gardner ex Thwaites (*Cameraria zeylanica* Retz.; *Gynopogon lanceolatus* Kurz; *Hunteria africana* K. Schum.; *Hunteria corymbosa* Roxb.; *Hunteria corymbosa* var. *genuina* Hallier f.; *Hunteria corymbosa* var. *roxburghiana* (Wight) Trimen ex Gamble; *Hunteria corymbosa* var. *salicifolia* (Wall. ex A. Trop. America. Tree, spreading, spiny trunk, short sharp stout fleshy spines, white acrid caustic milky latex, serrate glandular heart-shaped leaves, purple-reddish inflorescences, female flower solitary, dehiscent ribbed thick hard woody fruits

See *Species Plantarum* 2: 1008. 1753, *Enum. Pl.* [Willdenow] 2: 997. 1809, *Étude générale du groupe des Euphorbiacées* 543. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 1229–1230. 1866 and *Taxon* 30: 707. 1981, *Bot. Commelins* 103. 1983, *Cytologia* 64: 229–234. 1999

(All parts poisonous. Caustic latex, poisonous when ingested, extremely toxic and acrid, may cause blindness, inflammation and blistering of the skin; effective against snakebite when used externally. Seeds highly toxic, used for purging out, severe catharsis; large amounts may lead to death. Dried sap applied against leprosy, psoriasis and lupus. Seeds and latex laxative. Bark antifungal, a strong diuretic. Smoking the leaves relieves asthma; leaves mixed with oil are applied to rheumatism; leaves mixed and pressed with salt applied to boils and swellings. Seeds for poisoning noxious animals. Latex as fish poison and insecticide.)

in English: fish tree, monkey-dinnerbell, monkey-pistol, portia tree, sand-box tree, sandbox, sandbox tree, umbrella tree

in Yoruba: eru buje

Hyacinthoides Heister ex Fabr. Asparagaceae (Hyacinthaceae, Liliaceae)

Resembling *Hyacinthus*, see *Enumeratio Methodica Plantarum* 2. 1759, *Annalen der Botanick*. ed. Usteri 2: 9. 1791.

Hyacinthoides non-scripta (L.) Chouard ex Rothm. (*Agraphis cernua* (L.) Rchb.; *Agraphis nutans* (Sm.) Link; *Endymion cernuus* Dumort.; *Endymion lacaillei* Corb.; *Endymion non-scriptus* (L.) Garcke; *Endymion nutans* (Sm.) Dumort.; *Hyacinthoides non-scripta* (L.) Chouard; *Hyacinthoides non-scripta* var. *cernua* (L.) P. Silva; *Hyacinthoides non-scripta* (L.) Garcke; *Hyacinthus campanulatus* Mill.; *Hyacinthus cernuus* L.; *Hyacinthus non-scriptus* L.; *Hyacinthus nutans* (Sm.) Gray; *Hyacinthus pratensis* Lam.; *Hylomenes non-scripta* (L.) Salisb., nom. inval.; *Lagocodes belgica* Raf.; *Lagocodes cernua* (L.) Raf.; *Lagocodes nutans* (Sm.) Raf.; *Scilla cernua* (L.) Salisb.; *Scilla festalis* Salisb.; *Scilla non-scripta* (L.) Hoffmanns. & Link; *Scilla non-scripta* subsp. *cernua* (L.) K. Richt.; *Scilla nutans* Sm.; *Syncodium nutans* (Sm.) Raf.; *Usteria hyacinthiflora* Medik.; *Usteria non-scripta* (L.) Chouard; *Usteria secunda* Medik.)

W. Europe. Bulb geophyte

See *Species Plantarum* 1: 308–309, 316–317. 1753, *Enumeratio Methodica Plantarum* 2. 1759, *Hist. & Commentat. Acad. Elect. Sci. Theod.-Palat.* 6(Phys.): 480. 1790, *Annalen der Botanick*. ed. Usteri 2: 9. 1791, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 19. 1803, *Florula belgica*, opera majoris prodromus, auctore ... 140. 1827, *Fl. Tellur.* 2: 22, 25. 1837 and *Bulletin de la Société Botanique de France* 81(7–8): 625. 1934, *Feddes Repertorium* 53: 14. 1944, Cooper, M.R., Johnson, A.W. *Poisonous Plants in Britain and Their Effects on Animals and Man*. London. 1984, *Watsonia* 20: 63–66. 1994, *Anales del Jardín Botánico de Madrid* 55(1): 135–136. 1997, *Fl. Veg. Serra da Estrela*, ed. 3: 13. 1999

(The plant contains the glycosides scillarens, which are chemically similar to the cardiac glycoside digitalis. Cattle, a horse, and humans were poisoned after ingesting this plant. Children or family pets should be prevented from chewing the plants. This species was formerly included under the genus *Scilla*.)

in English: English bluebell

Hyacinthus L. Asparagaceae (Hyacinthaceae, Liliaceae)

From *hyakinthos* and *hyacinthus*, the Greek and Latin names for the hyacinth and the blue iris, or the corn-flag, or the rocket larkspur or a precious stone, Med. Latin *gemmas iachinctas*, Akkadian *bakkitu* ‘professional mourner’, *bakku*, *bakum*, *bikitu*; see *Species Plantarum* 1: 316. 1753, F. D’Alberti di Villanuova, *Dizionario universale, critico, enciclopedico della lingua italiana*. Lucca 1797–1805, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 4: 274. 1886, *Die Natürlichen Pflanzenfamilien* 2(5): 158. 1888 and P. Sella, *Glossario latino italiano*. Stato della Chiesa - Veneto - Abruzzi. Città del Vaticano 1944, Giovanni Semerano, *Le origini della*

cultura europea. Dizionario della lingua Greca. 2(1): 298. Firenze 1994, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 295–297. Basel 1996.

Hyacinthus orientalis L. (*Scilla coronaria* Salisb., nom. superfl.)

Turkey. Bulbous perennial herb leaves basal and narrowly strap-shaped, fragrant funnel-shaped flowers on an erect stalk

See *Sp. Pl.*: 317. 1753, *Prodr. Stirp. Chap. Allerton*: 243. 1796

(Bulbs poisonous, toxic if large quantities eaten, skin irritation, dermatitis after contact, asthma in susceptible persons.)

in English: hyacinth

Hyaenanche Lamb. Picrodendraceae (Euphorbiaceae)

Latin *hyaena*, *ae* ‘hyaena’ and Greek *anchein* ‘to strangle’ or *anche* ‘poison’, Greek *hyaina* ‘a sow, the striped hyena, a sea-fish’ (from Greek *hys*, *sys*, *sos* ‘a pig, swine’; Akkadian *sahu* ‘pig, fish’, *hussu* ‘red, pig’; Latin *sus*, *suis*); see Aylmer Bourke Lambert, *A description of the genus Cinchona*. To which is prefixed Professor Vahl’s dissertation on this genus, ... Also a description, ... of a new genus named *Hyaenanche*: or, *Hyaena* poison. [First edn.] London 1797.

Hyaenanche globosa (Gaertn.) Lamb. & Vahl (*Hyaenanche capensis* (Thunb.) Pers.; *Hyaenanche capensis* Pers.; *Hyaenanche globosa* (Gaertn.) Lamb.; *Jatropha globosa* Gaertn.; *Toxicodendrum capense* Thunb.; *Toxicodendrum globosum* (Gaertn.) Pax & K. Hoffm.; *Toxicodendrum globosum* (Gaertn.) Pax & K. Schum.)

South Africa.

See *Fruct. Sem. Pl.* 2: 122. 1790, *Kongl. Vetensk. Acad. Nya Handl.* 17: 188. 1796, *A description of the genus Cinchona*: 52. 1797, *Syn. Pl.* (Persoon) 2(2): 627. 1807 and *Pflanzenr.*, IV, 147, XV: 285. 1922

(Applied for skin infections. Seeds and leaves arrow poison ingredients.)

in English: hyaena poison

in South Africa: boesmansgif, gifboom, wolweboom, wolweboontjie, wolwegifboom

Hyalosepalum Troupin Menispermaceae

From the Greek *hyalos* ‘glass’ and Latin *sepalum* ‘a sepal’, see *Atlantic Journal* 1(6): 177. 1833, *Annals and Magazine of Natural History*, ser. 3 20: 261. 1867 and *Bull. Jard. Bot. État Bruxelles* 19: 430. 1949.

Hyalosepalum uviforme (Baill.) Troupin (*Chasmanthera uviformis* Baill.; *Hyalosepalum uviforme* Troupin)

Madagascar. Closely resembling *Tinospora* spp.

See *Bull. Mens. Soc. Linn. Paris* i. (1885) 459. 1885 and *Bull. Jard. Bot. État Bruxelles* 19: 431. 1949

(Stem bark decoction taken to treat malaria.)

Hybanthus Jacq. Violaceae

Greek *hybos* ‘hump-backed, bent outwards, a hump’ and *anthos* ‘a flower’, referring to the anterior pouched petal; see Nicolaus Joseph von Jacquin, *Enumeratio systematica plantarum*, quas in insulis Caribaeis vicinaque Americae continente detexit novas, aut jam cognitatas emendavit. 2, 17. (Aug.-Sep.) 1760, *Jardin de la Malmaison* sub pl. 27. 1803 and Eleanor M. Bennett, “A revision of the Australian species of *Hybanthus* Jacquin (Violaceae).” in *Nuytsia*. 1(3): 218–241. 1972, *Castanea* 67(4): 369–379. 2002.

Hybanthus enneaspermus (L.) F. Muell. (*Hybanthus enneaspermus* F. Muell.; *Hybanthus suffruticosus* (L.) Baill.; *Hybanthus suffruticosus* Baill.; *Hybanthus suffruticosus* Baill. ex Laness.; *Ionidium enneaspermum* (L.) Vent.; *Ionidium suffruticosum* (L.) Ging.; *Ionidium suffruticosum* Ging.; *Ionidium suffruticosum* DC.; *Viola enneasperma* L.; *Viola suffruticosa* L.)

East Africa. Small herb, erect, woody roots, stem purplish, branches ascending, linear-lanceolate leaves, small axillary solitary flowers pale purple with magenta spot on lower lip, corolla pale blue, tiny globose capsule crowned with persistent style, ribbed seeds, in deciduous forest

See *Species Plantarum* 2: 933–937. 1753, *Enumeratio Systematica Plantarum* 2, 17. 1760, *Jardin de la Malmaison* sub pl. 27–28. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 311. 1824, *Fragmenta Phytographiae Australiae* (Mueller) 10(85): 81. 1876, *Bot. Med.* ii. 841. 1884 and *Botanique Medicale* 2: 841. 1884, *Pl. util. Colon. Franç.* (1886) 606. 1886 and *Taxon* 29: 358–360. 1980, *Botanical Bulletin of Academia Sinica* 26: 213–220. 1985

(Used in Ayurveda and Sidha. Whole herb demulcent, tonic and diuretic, antidote to scorpion sting, for urinary disorders and bowel complaints; plant juice tonic; plant decoction given for fever; plant paste given for dysentery and syphilis; postpartum remedy, a general tonic after delivery, added to the diet. Shoot decoction given to measles patients. Roots diuretic, used for irregular bowel movement, and in bowel complaints of children; root paste taken to cure diabetes. Leaves tonic, laxative; a decoction taken for intermittent fever, gonorrhoea, nervous disorders; leaf powder mixed with milk given to improve sexual vigour in men; leaf paste for diabetes. Veterinary medicine, whole plant dried and powdered given to promote fertility.)

in English: pink ladies slipper, spade-flower, yellow spade

in India: camaracam, charaata, charati, curiyakanti, cutumatavacceti, cutumatavam, etekapuntarikam, ikkanatikacceti,

African names: alwaas (Arabic), usolala-ocha (Igbo)

in Ghana: feviama

in Yoruba: abi-were, abiwere, lokolepon

Hydnocarpus Gaertner Flacourtiaceae (Achariaceae)

Greek *hydnon* 'a tuber, a truffle, tubercle' and *karpos* 'a fruit', referring to the shape of the fruits; see *De Fructibus et Seminibus Plantarum* ... 1: 288, t. 60, f. 3. 1788, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 456. Ansbach 1852, *Natuurk. Tijdschr. Ned.-Indie* 10: 127. 1855 [Retzia.], *Flora* 40: 529. 1857.

***Hydnocarpus alpina* Wight**

India.

See *Icon. Pl. Ind. Orient.* [Wight] t. 942. 1844–1845

(Used in Sidha.)

in India: arruccanlai, attuccankilai, attuchankalai, kaastela, kastel, malaivattai, malamaravetti, maratatti, marathuthi, sannasolti, sannasurante, sanuasolti, surante, torathi

Hydnocarpus annamensis (Gagnepain) Lescot & Sleumer (*Hydnocarpus merrillianus* H.L. Li, nom. illeg., non Sleumer; *Taraktogenos annamense* Gagnep.; *Taraktogenos annamensis* Gagnepain; *Taraktogenos merrilliana* C.Y. Wu; *Taraktogenos merrilliana* (Li) C.Y. Wu)

SE Asia.

See *Flore Générale de l'Indo-Chine* 1: 206, f. 20. 1939, *Journal of the Arnold Arboretum* 24(4): 446–447. 1943, *Acta Phytotaxonomica Sinica* 6(2): 226–227. 1957, *Flore du Cambodge du Laos et du Vietnam* 11: 10. 1970

(Fruits for skin diseases.)

in China: da ye long jiao

Hydnocarpus anthelminthica Pierre ex Laness. (*Hydnocarpus anthelminthica* Pierre & Gagnep.; *Hydnocarpus anthelminthica* Pierre; *Hydnocarpus anthelminthicus* Pierre ex Laness.)

SE Asia, Vietnam.

See *De Fructibus et Seminibus Plantarum*... 1: 288. 1788, *Pl. util. Colon. Franc.* (1886) 303. 1866 and *Bulletin de la Société Botanique de France* 55: 522–523. 1908

(Fruits, leaves and stem vermifuge, antiseptic, antibacterial, for skin eruptions, leprosy, yaws. Fruit of *Tamarindus indica* an antidote to *Hydnocarpus anthelminthica*.)

in China: tai guo da feng zi

Hydnocarpus inebrians Wall. (*Hydnocarpus inebrians* Vahl)

India.

See *Symb. Bot.* (Vahl) iii. 100. 1794, *A Numerical List of Dried Specimens* [Wallich] 6670. 1832

(Used in Ayurveda.)

in India: jangli-badam, neeradi-muthu, niradi-muttu, niradivittulu, tuvarakah

Hydnocarpus kurzii (King) Warb. (*Hydnocarpus kurzii* Warb.; *Taraktogenos kurzii* King)

India. Tree, elliptic coriaceous leaves, yellowish flowers in axillary cymes, globose fruits, copious albumen

See *De Fructibus et Seminibus Plantarum*... 1: 288. 1788, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 59: 123. 1890, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(6a): 21. 1893 and *Rec. Bot. Surv. India* 18(1): 26. 1959 *Taxon* 29: 355–357. 1980, *Proceedings of the Indian Science Congress Association* 71(3-vi): 143–144. 1984

(Used in Ayurveda and Sidha. Bark febrifuge. Crushed leaves rubbed on the body to prevent sting of the bees. Burning bark smoke is stupefying to honey-bees. Seed oil antibacterial, for skin diseases, leprosy; seeds paste applied on leprosy.)

in India: balibu, chalmogra, chalmugra, chaulmogra, chaulmoogra, chaulmugra, khawi-tur, khawitur, lamtem, maravetti, matta, neeradi muththu, niradimuttu, nirati, niratimuttu, niretti muttu, nirvetti muttu, rowai-thing, theubang-thar, tibaung-thar, tuvaraka, uhan, uhon

Hydnocarpus laurifolia (Dennst.) Sleumer (*Hydnocarpus laurifolia* Sleumer; *Hydnocarpus laurifolius* (Dennst.) Sleumer; *Munnicksia laurifolia* Dennst., Bixaceae)

India.

See *Schlüssel Hortus Malab.* 27. 1818 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 69: 33, 86. 1938, *Proceedings of the Indian Science Congress Association* 71(3-vi): 143–144. 1984

(Used in Ayurveda. Seeds oil or powdered seeds as a fish poison, but it is reported that fish is unfit for consumption; fruits used to stupefy fish.)

in India: chalmogra, chalmugra, chaulmogra, chaulmoogra, chaulmugra, choulmogora, maravetti

Hydnocarpus macrocarpa Warb. (*Asteriastigma macrocarpa* Bedd.)

India. Tree, greenish-yellow flowers from the basal leafless part of branches, globose berry

See *Forest. Man. Bot.* 236. 1878, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(6a): 21. 1893

(Oil in the treatment of leprosy and skin lesions.)

in India: malamarotti, malamkummatti, vellananku

Hydnocarpus pentandrus (Buch.-Ham.) Oken (*Chilmoria pentandra* Buch.-Ham.; *Hydnocarpus pentandra* (Buch.-Ham.) Oken)

India. Tree

See *Transactions of the Linnean Society of London* 13: 501. 1822, *Allgemeine Naturgeschichte* 3(2): 1381. 1841 and *Journ. Arn. Arb.* xxxi. 279. 1950

(Fruit paste as fish poison.)

in India: adavibaadaamu, aethina thoradina kaayi, bhoonthaayi mara, bhoonthahi, chaalmogra yenne mara, chalmoo-gra yenne mara, chaul moogra aenna mara, choratti, garuda phala mara, garudaphala, halipe, jangli baadaam, kaddu-ka-weet, kadoo-ka-weet, kantel, karalase, kastel, kauta, kowti, kudure sotte, kuduresotte, kushthharri, marotti, neeraadi, neeradi, neeradi vittulu, neeradimuthu, neeruhinthale, neerutti, surate, thoratthi

Hydnocarpus venenata Gaertn.

India.

See *De Fructibus et Seminibus Plantarum...* 1: 288, t. 60, f. 3. 1788

(Used in Sidha. Said to be toxic.)

in India: kattuvatumai, kauti, lucraban

Hydnocarpus wightiana Blume

India. Tall tree

See *De Fructibus et Seminibus Plantarum...* 1: 288. 1788, *Rumphia* 4: 22. 1849 and *Taxon* 29: 355–357. 1980

(Used in Ayurveda. Oil from the seeds used for the treatment of leprosy, eczema and skin diseases; seed paste applied on skin diseases, rheumatism, sprains, sciatica, lumbago, bruises, swellings. Fruits fish poison.)

in India: adavibadamu, athuchangalai, bhutahi, calmukura, chaulmoogra, garud, garuda, garudaphala, kadu-kawata, kadukavata, kadukavath, kantel, kastel, kodi, koranguthalai, koti, kowtee, kowti, kushtavairi, malmurutti, maravattai, maravetti, maroti, marotti, morotti, muruotti, niradi, niradi-muththu, niradi-vittulu, niradimuttu, niradivittalu, niradivittulu, nirahivitala, nirala, niralam, nirudu, nirvatta, nirvetti, poonthayi, surante, toratti, tuvaraka, tuvarakam, vattai, vetti, yetti

Hydnophytum Jack Rubiaceae

Greek *hydnon* ‘a tuber, a truffle, tubercle’ and *phyton* ‘a plant’, referring to the swollen tubers; see William Jack (1795–1822), *Transactions of the Linnean Society of London*. 14: 124. 1823.

Hydnophytum formicarum Jack (*Hydnophytum blumei* Becc.; *Hydnophytum borneanum* Becc.; *Hydnophytum borneense* Becc.; *Hydnophytum formicarium* Jack; *Hydnophytum formicarum* Kurz, nom. illeg.; *Hydnophytum formicarum* f. *typicum* Becc., nom. inval.; *Hydnophytum formicarum blumei* (Becc.) Vietnam, Australia.

See *Transactions of the Linnean Society of London* 14(1): 124. 1823, *Systema Vegetabilium*, editio decima sexta 1: 423. 1824, *Bijdr. Fl. Ned. Ind.* 16: 956. [Oct 1826–Nov 1827], *Ann. Mus. Bot. Lugduno-Batavi* 4: 257. 1869, *Ann. Jard. Bot. Buitenzorg* i. (1876) 31. 1876, *Forest Flora of British Burma* 2: 8. 1877, *Malesia* 2: 125. 1884, *Malesia* 2: 159–164, 167–168. 1885, *Handl. Fl. Ned. Ind.* 2(1): 143. 1891

(Plant decoction for liver and intestinal complaints.)

in English: smooth ant plant

in Philippines: banghai

Hydnora Thunb. Hydnoraceae

From the Greek *hydnon* ‘a truffle, tubercle’, ancient name used by Dioscorides and applied by Theophrastus in his *HP*. 1.6.5 (Loeb Classical Library 1916), referring to the rhizome-like root-body, see *Kongl. Vetenskaps Akademiens Handlingar* 36: 69. 1775, Agardh, Carl Adolf (1785–1859), *Aphorismi Botanici ...* Lundæ, 1817–1826 and *Novon* 2(3): 239. 1992.

Hydnora abyssinica A. Braun (*Hydnora abyssinica* ex Schweinf.; *Hydnora abyssinica* var. *quinquefida* Engl.; *Hydnora aethiopica* Decne.; *Hydnora africana* sensu Eyles;

Hydnora bogosensis Becc.; *Hydnora cornii* Vacc.; *Hydnora gigantea* Chiov.; *Hydnora hanningtonii* Rendle; *Hydnora johannis* Becc.; *Hydnora johannis* forma *gigantea*; *Hydnora johannis* forma *trimera* Vacc.; *Hydnora johannis* var. *quinquefida* (Engl.) Solms; *Hydnora michaelis* Peter; *Hydnora ruspolii* Chiov.; *Hydnora solmsiana* Dinter)

Sudan, Ethiopia to South Africa. Fleshy, mainly underground, parasitic on the roots of host trees, underground stem or pseudo-rhizome cylindrical or angular brown and warty outside red within, without green chlorophyll or leaves, flowers with a bad smell, wide tubular calyx, thick fleshy sepal lobes, bright pink-red bristles of lower calyx, berry-like fruit underground, very small seeds in sticky glutinous pulp, famine food, underground stem roasted and eaten, fruits eaten raw, fodder for cows, in dry *Acacia* bushland, on hillsides with *Acacia*

See *Kongl. Vetenskaps Academiens Handlingar* 39: 69. 1775, *Beitrag zur Flora Aethiopiens ...* 217. 1867, *Nuovo Giorn. Bot.* 3: 5. 1871 and *Dinteria*: contributions to the flora of South West Africa 19: 77–82. 1987

(Underground stem cut into pieces and boiled in water, the decoction drunk to treat stomachache, dysentery, diarrhea, sore throat and retained placenta.)

in Kenya: aurieng'o, auriong'o, dingah, erkunyi, erukunyi, guli, kaworiongo, kimela, laka, like, liki, mnyambo, muthigira, nyambo, osuyo, oyusu, toga

in Tanzania: amamasóó, erkunyi, mnyambo, ng'holo ya msawo, ng'ombe-ya-hasi, ngombe-ya-hansi

Hydnora solmsiana Dinter

Tropical Africa.

See Dinter, Moritz Kurt (1868–1945), *Deutsch-Südwest-Afrika*: flora, forst- und landwirtschaftliche fragmente. Leipzig, 1909, *Deutsch-Sudw.-Afr.* 57. 1909

(Leaves and stem bark antiseptic, antibacteria, antiinflammatory.)

Hydrangea L. Hydrangeaceae

Greek *hydor* 'water' and *angeion*, *aggeion* 'a vessel', referring to the shape of the fruit (but the fruit is a capsule); see *Analyse des Familles de Plantes* 36, 38. 1829, Carl Linnaeus, *Species Plantarum*. 1: 397. 1753 and *Genera Plantarum*. Ed. 5. 189. 1754, *Encyclopédie Méthodique, Botanique* 3: 136–137. 1789, *Genera Plantarum* 214. 1789, *Florae Peruvianaes, et Chilensis Prodrum* 53, pl. 35. 1794, *Systema Vegetabilium Florae Peruvianaes et Chilensis* 91–92. 1798, *Prodrum Florae Nepalensis* 211. 1825, *Prodrum Systematis Naturalis Regni Vegetabilis* 4: 15–16. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 10(16): 6, 8. 1867, *Plantarum Vascularium Chilensium* 97. 1881, *Die Natürlichen Pflanzenfamilien* 3(2a): 76. 1891 and *Plantae*

Environ. Health* 1: 939–953. 1976, *Taxon* 29: 355–357. 1980, Bruynzeel, D.P. “Allergic contact dermatitis to hydrangea.” *Contact Dermatitis* 14: 128. 1986, *Flora de Veracruz* 1–22. 1999, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005

(This plant has poisoned humans after they ingested the flower buds. Sensitive individuals can develop dermatitis after exposure to *Hydrangea*. Hydragin, a cyanogenetic glycoside, is presumed to be responsible for toxicity because it can release hydrocyanic acid upon hydrolysis.)

in English: French hydrangea, hortensia, sugar-leaf hydrangea

in China: ba xian hua

in Japan: gaku, gaku-ajisai, ajisai

Hydrastis L. Ranunculaceae (Hydrastidaceae)

From the Greek *hydor* ‘water’.

Hydrastis canadensis L.

North America. Perennial herb, solitary flowers, the crimson raspberry-like fruit considered inedible

See *Systema Naturae*, Editio Decima 2: 10. 1069, 1088, 1374. 1759 and *Journal of Japanese Botany* 54: 65–77. 1979, *Botanical Magazine* 98: 291–316. 1985, *Phytologia* 71: 464. 1991

(All parts poisonous, low toxicity if eaten. Used for whooping cough, diarrhea, liver trouble, earaches, sore eyes, fevers, pneumonia, heart trouble, tuberculosis, chapped or cut lips, and dyspepsy; to improve appetite; and as a tonic, and as a wash for inflammation.)

in English: golden seal, turmeric root, yellow root

in North America: goldenseal, orangeroot, sceau d’or, yellow-puccoon

Hydriastele H.A. Wendland & Drude Palmae

From the Greek *hydor* ‘water’, *hydria* ‘water-pot, vessel’ and *stela* ‘a column’, palms growing near water or springs; in *Linnaea*. 39: 180, 208. 1875.

Hydriastele pinangoides (Becc.) W.J. Baker & Loo (*Gronophyllum densiflorum* Ridl.; *Gronophyllum leonardii* Essig & B.E. Young; *Gronophyllum pinangoides* (Becc.) Essig & B.E. Young; *Leptophoenix brassii* Burret; *Leptophoenix densiflora* (Ridl.) Burret; *Leptophoenix incompta* Becc.; *Leptophoenix macrocarpa* Burret; *Leptophoenix microcarpa*

Burret; *Leptophoenix minor* Becc.; *Leptophoenix pinangoides* (Becc.) Becc.; *Leptophoenix pterophylla* Becc.; *Leptophoenix yulensis* Becc.; *Nenga calophylla* K. Schum. & Lauterb.; *Nenga pinangoides* Becc.; *Nengella brassii* (Burret) Burret; *Nengella calophylla* (K. Schum. & Lauterb.) Becc.; *Nengella densiflora* (Ridl.) Burret; *Nengella incompta* (Becc.) Burret; *Nengella macrocarpa* (Burret) Burret; *Nengella microcarpa* (Burret) Burret; *Nengella minor* (Becc.) Burret; *Nengella pinangoides* (Becc.) Burret; *Nengella pterophylla* (Becc.) Burret; *Nengella rhomboidea* Burret; *Nengella yulensis* (Becc.) Burret) (*Gronophyllum* R. Scheffer, Greek *gronos* ‘eaten out, deep’, *grone* ‘a cavern’ and *phyllon* ‘a leaf’, apparently referring to the hollow leaves, the tips of the pinnae are irregularly toothed; see Rudolph Herman Christiaan Carel Scheffer, in *Annales du Jardin Botanique de Buitenzorg*. 1: 135, 153. 1876.)

New Guinea.

See *Ann. Jard. Bot. Buitenzorg* 2: 82. 1885 and *Webbia* 1: 298. 1905, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 339–340, 342. 1935, *Notizbl. Bot. Gart. Berlin-Dahlem* 13: 205, 315–316. 1936, *J. Arnold Arbor.* 20: 207. 1939, *Principes* 29: 134–135. 1985, *Kew Bull.* 59: 66. 2004

(Magic, ritual, used for sickness.)

Hydrilla Rich. Hydrocharitaceae

Possibly a diminutive of *hydra*, a kind of water serpent, Greek *hydor* ‘water’, an allusion to the nature of the habitat, submerged aquatic, sometimes in aquaria; see *Systema Naturae*, ed. 12 2: 608, 620. 1767, Louis Claude Marie Richard (1754–1821), *Mémoires de la classe des sciences mathématiques et physiques de l’Institut Impériale de France*. 12: 61, 69, t. 2. Paris 1811, *The Genera of North American Plants* 2: 242. 1818, *Lehrbuch der Botanik*, ed. 3 188. 1879 and *Acta Biol. Cracov.*, Ser. Bot. 21: 31–63. 1978, *Proc. Roy. Irish Acad.* 78 (17): 267–272. 1978, *Taxon* 29: 351, 358–360. 1980, *Aquatic Bot.* 13: 485–504. 1982, *Proc. Indian Sci. Congr. Assoc.* 80(3:VIII): 150. 1993, *Fl. Mesoamer.* 6: 10–12. 1994, *Proc. Spreng.; *Vallisneria verticillata* (L.f.) Roxb.)

India. Submerged aquatic herb, perennial, sessile whorled leaves, fresh water plant, green manure, biofertiliser

See *Supplementum Plantarum* 416. 1781[1782], *Pl. Coromandel* 2: t. 164. 1802, *Systema Vegetabilium*, editio decima sexta 1: 170. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 751. 1832, *Ill. Bot. Himal. Mts.* [Royle] 1: t.

376. 1839, *Abh. Königl. Böhm. Ges. Wiss.* ser. 5, 3: 542. 1845, *Botanische Bemerkungen* (C. Presl): 112. [Jan–Apr 1846], *Key Syst. Vict. Pl.* 1: 423. 1888 and *Fl. Brit. Isles* 1183. 1952, *Chrońmy Przyn. Ojczyzta* 35 (4): 26–36. 1979, *Aquatic Bot.* 42: 253–263. 1992

(Paste of plant applied in skin diseases, boils, cuts. A hindrance to anti-malarial work.)

in English: hydrilla, water thyme, water weed

in India: hill, jala, kureli, thangi

in Japan: kuro-mo (= black alga)

in the Philippines Isl.: digman, gińga, inata, lomotlomotan, lusai

Hydrocharis L. Hydrocharitaceae

Greek *hydor* ‘water’ and *charis* ‘delicacy, delight, grace, beauty’, floating aquatics; see Carl Linnaeus, *Species Plantarum* 1: 288 and 2: 1036. 1753 and *Genera Plantarum*. Ed. 5. 458. 1754.

Hydrocharis dubia (Blume) Backer (*Hydrocharis asiatica* Miq.; *Hydrocharis morsus-ranae* L.; *Hydrocharis morsus-ranae* var. *asiatica* (Miq.) Makino; *Limnobium dubium* (Blume) Schäffer-Fehre; *Monochoria dubia* (Blume) Miq.; *Narukila cordata* (L.) Nieuwl.; *Narukila cordata* var. *lancifolia* (Muhl.) Morong; *Pontederia dubia* Blume; *Pontederia lanceolata* Nutt.; *Pontederia lancifolia* Muhl.; *Pontederia ovalis* Mart.; *Unisema cordata* (L.) Farw.; *Unisema cordata* fo. *angustifolia* (Pursh) Farw.; *Unisema cordata* fo. *latifolia* (Muhl.) Farw.)

Indonesia, India. Aquatic, monoecious, stoloniferous, floating, perennial herb, stout, spongy leaves with cordate base, flowers unisexual, female spathe solitary, fruits berry-like, plants fed to cattle

See *Species Plantarum* 1: 288. 1753, *Catalogus Plantarum Americae Septentrionalis* 34. 1813, *Flora Americae Septentrionalis*; or, ... 1: 224. 1814[1813], *The Genera of North American Plants* 1: 216–217. 1818, *A Flora of the Northern and Middle Sections of the United States* 1: 343. 1824, *Enumeratio Plantarum Javae* 1: 33. 1827, *Systema Vegetabilium* 7: 1142. 1830, *Flora van Nederlandsch Indië* 3: 239. 1856, *Flora van Nederlandsch Indië* 3: 549. 1859, *Catalogus plantarum cubensium* ... 252. 1866, *Monographiae Phanerogamarum* 4: 532. 1883, *Memoirs of the Torrey Botanical Club* 5(8): 105. 1894 and *American Midland Naturalist* 3: 101. 1913, *Repertorium Specierum Novarum*

Regni Vegetabilis 12: 101. 1913, *Botanical Magazine* 28: 26. 1914, *Papers of the Michigan Academy of Science, Arts and Letters* 3: 91. 1924, *Handboek voor de Flora van Java* 1: 64. 1925, *Archivos do Jardim Botânico do Rio de Janeiro* 15: 62. 1958, *Taxon* 29: 707–709. 1980, *Huntia* 7: 231. 1987, *Botanical Journal of the Linnean Society* 107(2): 186. 1991

(Intoxicating principles, from *Pontederia cordata*, and an infusion of plant used to prevent pregnancy, contraceptive. Leaves mucilaginous and astringent. Veterinary medicinal, leaves increasing lactation of domestic animals.)

in English: frog bit, pickerelweed, water lily

in China: shui bie

in India: botae khor

in Colombia: amarón borrachero

Hydrocotyle L. Apiaceae (Araliaceae, Hydrocotylaceae, Umbelliferae)

Greek *hydor* ‘water’ and *kotyle*, *kotyledon* ‘a cavity, small cup’, referring to the habit or to the shape of the peltate leaves or to the habitat; see Carl Linnaeus, *Species Plantarum*. 1: 234–235. 1753, *Genera Plantarum*. Ed. 5. 109. 1754, *Deliciae gallo-belgicae* 136. 1768, Thunberg, Carl Peter (1743–1828), *Dissertatio botanica de hydrocotyle* ... Upsaliae, 1798, *Systema Vegetabilium* 6: 32. 1820, Richard, Achille (1794–1852), *Monographie du genre Hydrocotyle* ... Bruxelles, 1820, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 457. Ansbach 1852 and *Brittonia* 2(3): 201–237. 1936, Shan, Ren Hwa (1909–) “On the Chinese species of *Hydrocotyle* Linn.” *Acta Phytotax. Sin.* 9: 117–35. 1964.

Hydrocotyle benguetensis Elmer (*Hydrocotyle ranunculifolia* Ohwi)

SE Asia.

See *Leaflet Philipp. Bot.* 2: 628. 1909, *Acta Phytotax. Geobot.* 1933, ii. 151. 1933

(Stomachic.)

in China: lü song tian hu sui

Hydrocotyle bonariensis Lam. (*Hydrocotyle bonariensis* var. *multiflora* (Lam.) Don; *Hydrocotyle bonariensis* var. *multiflora* (Ruiz & Pav.) (Sore throat, boils, tonic.)

in China: pu du tian hu sui

Hydrocotyle javanica Thunb. (*Hydrocotyle javanica* Zoll.)

Java, India. Ground cover herb, trailing, creeping, stems tinged pink rooting at nodes, reniform leaves, flowers yellowish-light green to greenish white

See *Species Plantarum* 1: 234–235. 1753 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Proceedings of the Indian Science Congress Association* 63: 117. 1976, *Taxon* 31: 576–579. 1982, *Cytologia* 51: 479–488. 1986, *Journal of Cytology and Genetics* 23: 38–52. 1988

(Whole plant tonic, blood purifier, stomachic, ground and mixed in water and drunk in case of high fever; whole plant juice given in gastric disorders. The sap from a squeezed leaf drunk with water to treat diarrhea and dysentery; infusion of the leaves of *Hydrocotyle javanica*, mixed with plant of *Desmodium triflorum*, leaves of *Kadsura scandens* and fruits of *Litsea cubeba*, drunk to treat measles, pox in small children; fresh leaves washed, crushed and chewed as a remedy for tonsillitis, asthma and bronchitis. For cough, cold, fever dried leaves mixed with fresh leaves of *Oenanthe stolonifera* pounded and the extract taken orally; leaves infusion taken as a tonic, astringent, in dysentery, and also applied on eye sores. Whole plant paste as a fish poison and insecticide; leaf paste as a fish poison.)

in English: pennywort

in India: awa-peruk, brahmi, darbengbur, dhongriga, dhungri pat, gol, golpat, hlo vai dwr, hlovaidawr, kaatu muthil, longtokorokla-tasola, mana-muni, manamuni, mandukparni bheda, pink-pat, vaite kala, vella vaite

in Indonesia: tuba tuleng, tuba urong, udu daun telinga

in Papua New Guinea: kabokaboma

Hydrocotyle nepalensis Hooker (*Hydrocotyle polycephala* Wight & Arnott)

India, Nepal. Prostrate herb, terrestrial, creeping, rooting at nodes

See *Exot. Bot.* 1, t. 30. 1822, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 366. 1834

(Tonic, blood purifier, whole plant febrifuge; plant juice given in case of typhoid, also applied to relieve pain of the chest. Juice of fresh leaves to cure blood pressure and headache; fresh leaves fried with *ghee* beneficial in dysentery; leaves chewed or pasted and given in malaria.)

in China: hong ma ti cao

in India: aulijhar, muk

in Nepal: dowa cilim, ghortapre

Hydrocotyle pseudoconferta Masamune

China.

See *J. Soc. Trop. Agric.* 4: 301. 1932

(Stomachic, antiinflammatory.)

in China: mi san tian hu sui

Hydrocotyle sibthorpioides Lam. (*Hydrocotyle americana* L.; *Hydrocotyle americana* var. *monticola* (Hook.f.) Hiern; *Hydrocotyle confusa* H. Wolff, nom. inval.; *Hydrocotyle monticola* Hook.f.; *Hydrocotyle nitidula* A. Rich.; *Hydrocotyle rotundifolia* Wall.; *Hydrocotyle sibthorpioides* Colenso, nom. illeg.; *Hydrocotyle sibthorpioides* Masamune) (after the English botanist Humphrey Waldo Sibthorp, c. 1713–1797, M.D. 1745, from 1747 to 1783 professor of botany at Oxford, he was the father of John Sibthorp (1758–1796, d. Bath, Somerset) who from 1783 to 1795 was professor of botany at Oxford; see William Darlington, *Memorials of John Bartram and Humphry Marshall*. 428–430. 1849 and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 36–37. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 275. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 366. 1972.)

China, Japan. Creeping herb, prostrate, tufted, stoloniferous, rooting at the nodes, rounded leaves crenate-serrate

See *Species Plantarum* 1: 234. 1753, *Encycl.* (Lamarck) 3(1): 153. 1789, *Hort. Bengal.* 21. 1814, *Numer. List* [Wallich] n. 562. 1829, *Prodr.* (DC.) 4: 64. 1830, *Flora Indica*; or, descriptions of Indian Plants 2: 88. 1832, *Journal of the Linnean*

Society, Botany 7: 194. 1864, *Flora of Tropical Africa* 3: 4. 1877, *FBI* 2: 668. 1879, *Transactions and Proceedings of the New Zealand Institute* 21: 83. 1888 (publ. 1889) and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 1109. 1927, *Bull. Hydrolea zeylanica (L.) Vahl (*Beloanthera oppositifolia* Hassk.; *Hydrolea arayatensis* Blanco; *Hydrolea inermis* Lour.; *Hydrolea javanica* Blume; *Hydrolea zeylanica* var. *ciliata* Choisy; *Nama zeylanica* L.; *Steris aquatica* Burm. f.; *Steris javana* L.; *Steris javanica* L.)

India. Herb, annual, erect to decumbent, young leafy tops edible

See *Species Plantarum* 1: 226. 1753, *Systema Naturae*, Editio Decima 2: 950. 1759, *Species Plantarum*, Editio Secunda 1: 328. 1762, *Familles des Plantes* 2: 255, 607. 1763, *Systema Naturae*, ed. 12 2: 197. 1767, *Mantissa Pl.* 54. 1767, *Flora Indica* ... nec non *Prodromus Florae Capensis* 73, t. 39, f. 3. 1768, *Flora Cochinchinensis* 1: 172. 1790, *Symbolae Botanicae*, ... 2: 46. 1791, *Bijdragen tot de flora van*

Nederlandsch Indië 13: 725. 1825, *Flora de Filipinas* 211. 1837, *Flora* 25(Beibl. 2): 55–56. 1842 and Fang Rhui-cheng & Huang Shu-hua in Wu Cheng-yih, ed. *Hydrophyllaceae. Fl. Reipubl. Popularis Sin.* 64(1): 160–161. 1979, *Rhodora* 90: 198. 1988, *Fl. Trop. E. Africa, Hydrophyllaceae* 4. 1989

(Leaves antiseptic, applied in poultices on ulcers and skin diseases, for cleaning septic wounds; leaves paste applied on forehead for headache. Plant used for abortion.)

in English: Sri Lanka hydrolea

in China: tian ji ma

in India: isha-langulia, jal-santha, kasshra, langali, lunalei

Hydrophyllum L. Hydrophyllaceae (Boraginaceae)

Greek *hydor* ‘water’ and *phylon* ‘leaf’, the leaves are watery, see *Species Plantarum* 1: 146. 1753.

Hydrophyllum canadense L.

North America. Perennial herb

See *Species Plantarum* 1: 146. 1753, *Sp. Pl.*, ed. 2. 1: 208. 1762 and *Amer. J. Bot.* 66: 1053–1061. 1979, *Taxon* 29: 276. 1980

(Roots infusion drunk as an antidote.)

in English: bluntleaf waterleaf, broad-leaf water-leaf, hairy water-leaf, maple-leaf water-leaf

Hydrophyllum virginianum L.

North America. Perennial herb, vegetable

See *Species Plantarum* 1: 146. 1753 and *Taxon* 24: 671–678. 1975, *Taxon* 29: 276. 1980, *Taxon* 30: 77–78. 1981, *Acta Biol. Cracov., Ser. Bot.* 29: 19–30. 1987, *Sida* 13: 241–250. 1988, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989

(Astringent, analgesic.)

in English: eastern waterleaf, Indian salad, John’s cabbage, Shawnee salad, Virginia water-leaf, Virginia waterleaf

Hygrophila R. Br. Acanthaceae

Greek *hygros* ‘damp’ and *philos* ‘lover, loving’, referring to the habitat, wet places, see Robert Brown, *Prodromus florum Novae Hollandiae*. 479. 1810.

Hygrophila angustifolia R. Br.

Tropics.

See *Prodromus florum Novae Hollandiae*. 479. 1810

(For swellings, pound the leaves with seed of *Nigella sativa* and poultice.)

Malay name: inai paya

Hygrophila auriculata (Schumach.) Heine (*Asteracantha longifolia* (L.) Nees; *Asteracantha longifolia* Nees; *Barleria*

auriculata Schumach.; *Barleria longifolia* L.; *Hygrophila auriculata* Heine; *Hygrophila longifolia* (L.) Kurz; *Hygrophila schulli* M.R. Almeida & S.M. Almeida, nom. illeg.; *Hygrophila spinosa* T. Anderson; *Teliostachya lanceolata* Nees var. *crispa* Nees)

Senegal, Ethiopia, East and South Africa. Shrub, robust, spiny, herb, erect, square stems, simple stout creamy orange spines, flowers blue-mauve pinkish, corolla tubular, small leafy bracts between flowers, long thin 2-celled capsules, young leaves cooked and eaten, bee forage plant, eaten by cattle, a troublesome weed, edges of seasonal pools, stagnant water places, in wetter areas

See *Species Plantarum* 2: 636–637. 1753, *Centuria II. Plantarum ...* 2: 22. 1759, *Amoen. Acad.* 4: 320. 1759, *Prodromus Florae Novae Hollandiae* 479. 1810, *Trans. Linn. Soc. London* 14: 289. 1825, *Beskr. Guin. Pl.* 285. 1827, *Plantae Asiaticae Rariores* (Wallich) 3: 75, 81, 90. 1832, *Flora Brasiliensis* 9: 74. 1847, *Enum. Pl. Zeyl.* 225. 1860, *Journal of the Linnean Society, Botany* 7: 22. 1864, *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 39(2): 78. 1870 and *Kew Bulletin* 16: 172. 1962, *Berichte der Schweizerischen Botanischen Gesellschaft* 86: 152–203. 1976, *Journal of Palynology* 17: 93–102. 1981, *Cytologia* 48: 491–504. 1983, *Journal of the Indian Botanical Society* 65: 310–315. 1986, *J. Bombay Nat. Hist. Soc.* 83(Suppl.): 221. 1987, *Glimpses of Cytogenetics in India* 3: 188–198. 1992, *BioLlania, Edición Especial* 6: 542. 1997, *Monographs in Systematic Botany from the Missouri Botanical Garden* 75: 953. 1999

(Used in Ayurveda and Sidha. Whole plant used in jaundice, dropsy, rheumatism; an infusion used as a febrifuge cold bath and a treatment for headache; plant decoction given during malaria. Leaves for jaundice, diarrhea, dysentery, urinary discharges, edema, ascites, abdominal troubles, anemia, a paste in healing of wounds and cuts; leaves pounded together with black pepper and eaten to treat infantile diarrhea. Leaves and stems burnt and the smoke used to fumigate the eyes to treat corneal ulcers; leaves and stem bark for female hygiene, earache and skin infection. Roots, leaves and seeds diuretic, used for anasarca, rheumatism, dropsy, jaundice, genito-urinary diseases. Seeds tonic, diuretic and aphrodisiac, for the treatment of impotency, diseases of blood, biliousness, gonorrhoea, spermatorrhea; seeds together with the fruits of *Tribulus terrestris* powdered and given to cure impotency. Veterinary medicine, bark extract of *Alangium salviifolium* with dried leaves of *Hygrophila auriculata*, leaves of *Premna latifolia*, dry chilies and salt pounded and fermented and given orally in edema; root and stem tied to the horns of animals for foot and mouth disease.)

in India: akhro, atichhatra, bahel-sohulli, bahelshulli, bhikshu, chhatraka, culli, gobbi, gokhula-kanta, gokhulakanta, gokshura, gorimidi, gormidi, ikshugandha, ikshugandhaha, ikshura, ikshurah, ikshuraka, ikshuvallika, iksura, iksuraka, iksurlaghanti, kailaya, kakekshu, kalaso, kalavankabija, kandekshu, kantakulika, koilikhia,

Hygrophila erecta (Burm. f.) Hoch.

India. Herb with purplish flowers

See *Candollea* 5: 230. 1934

(Leaves diuretic, also for poulticing swellings.)

Hygrophila phlomoides Nees

India, Myanmar.

See *Plantae Asiaticae Rariores* 3: 80. 1832

(Freshly collected root paste given to women to expedite childbirth.)

in India: pani kulekhara

Hygrophila quadrivalvis (Buch.-Ham.) Nees (*Hygrophila obovata* Wight; *Ruellia quadrivalvis* Buch.-Ham.)

Malaysia.

See *Transactions of the Linnean Society of London* 14: 291. 1824, *Plantae Asiaticae Rariores* 3: 89. 1832, *Icones Plantarum Indiae Orientalis*, pl. 1489. 1849

(For wounds, toothache, pound the leaves with a little lime and poultice.)

Malay names: keremak batu, lutut ayam

Hygrophila ringens (L.) Steud. (*Hygrophila ringens* R.Br. ex Steud.; *Hygrophila ringens* R.Br.; *Ruellia ringens* L.)

India. Herb, erect, unarmed, pale blue flowers in dense axillary whorls

See *Prodr. Fl. Nov. Holland.* 479. 1810, *Nomenclator Botanicus*. [Steudel] Editio secunda 1: 783. 1840

(Leaf paste or juice used against boils, tumor.)

Hygrophila salicifolia (Vahl) Nees

India. Erect herb or undershrub, branched, angled, pubescent, flowers in axillary clusters, calyx tubular with hispid ciliate margins, corolla pale purple

See *Plantae Asiaticae Rariores* 3: 75, 81, 90. 1832

(Leaf decoction blood purifier, stomachic.)

in China: shui suo yi

in India: loga

Hygrophila schulli (Buch.-Ham.) M.R. Almeida & S.M. Almeida (*Bahel schulli* Buch.-Ham.; *Barleria auriculata* Schumach.; *Hygrophila auriculata* (Schumach.) Heine; *Hygrophila schulli* M.R. Almeida & S.M. Almeida)

India, Tanzania. Erect, armed herb, stout, unbranched quadrangular stems, axillary thorns, purple blue axillary flowers, pointed capsules, nomenclatural problems

See *Amoen. Acad.* 4: 320. 1759, *Familles des Plantes* 2: 210. 1763, *Transactions of the Linnean Society of London* 14: 289. 1825, *Beskr. Guin. Pl.* 285. 1827 and *Kew Bull.* 16: 172. 1962, *Journal of the Bombay Natural History Society* 83(Suppl.): 221. 1987

(Used in Ayurveda. A postpartum remedy, a general tonic, whole plant decoction given also in anemia; the plant has the property of bestowing a male child. Small root pieces eaten to remove a thorn from the foot and wound healing. Seeds given in calculi, strangury, rheumatism. Leaves decoction for indigestion and to regulate menstruation. Veterinary medicine, wound healing.)

in India: aekhero, akharo, akhityo, ekakheri, bahel-schulli, gobbi, gokantaka, gokhula janum, golimidi, goramidi, gorividi, gubbi chettu, gulimidi, kokilaaksha, kokilaksah, kola-chuli, kolagulike, kolamulli, kolase, kolasundaa, kolavalike,

kolavanke, kolikannina gida, kolikukkana gida, kolshinda, korimidi, kulekhara, mullagobbi, mullina gida, neer gobli gida, neer mulli, neerguviveru, neerugobbi, neeruppi gida, neery golimidi, putrada (putra, son, and da, giver), taalmakhana, tal makhana, talamkhana, talimkhana, talmakhana, telmakhana, thaalimakhaana, utkanta, vayalculli, vikhara

Hygrophila serpyllum T. Anderson

India. Procumbent pubescent herb

See *J. Linn. Soc., Bot.* 9: 456. 1867 and *Proc. Indian Sci. Congr. Assoc.* 80(3:VIII): 147. 1993

(Leaves used as cooling medicine, leaf paste applied on forehead for headache.)

in India: kolavalike, sarpat

Hygroryza Nees Poaceae (Gramineae)

From the Greek *hygros* ‘damp, moist’ and *oryza* ‘rice’, see *Nomenclator Botanicus* (ed. 2) 1: 783. 1841, *Edinburgh New Philosophical Journal* 15: 380. 1833, *Journal of the Asiatic Society of Bengal* 5: 571, t. 24. 1836, *J. Linn. Soc. Bot.* 19: 55. 1881 and *Cytologia* 56: 95–102. 1991, *Am. J. Bot.* 89: 1967–1972. 2002.

Hygroryza aristata (Retzius) Nees ex Wright & Arn. (*Hygroryza aristata* (Retz.) Nees; *Leersia aristata* Roxb.; *Leersia aristata* (Retzius) Roxb.; *Pharus aristatus* Retz.; *Potamochoa aristata* (Retz.) Griff. ex Steud.; *Potamochoa retzii* Griff.; *Zizania aristata* (Retz.) Kunth; *Zizania retzii* Spreng.) (for the Swedish botanist Anders Jahan (Johan) Retzius, 1742–1821, naturalist, entomologist, professor of natural history at the University of Lund; see A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 146. 1965, Theodore W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 329. Boston, Mass. 1972, Vladislav Kruta, in *D.S.B.* 11: 379–381. 1981; Gerhard Rudolph, in *D.S.B.* 11: 381–383. 1981, Stafleu and Cowan, *Taxonomic Literature*. 4: 735–738. Utrecht 1983, Mariella Azzarello Di Misa, ed., *Il Fondo Antico della Biblioteca dell’Orto Botanico di Palermo*. 229. Regione Siciliana, Palermo 1988, R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. Stuttgart 1993.)

Asia, Taiwan, India, China. Perennial, aquatic, floating, glabrous, diffusely branched, creeping, spongy long stems, lower portions usually submerged, rooting at the nodes, shade species forming extensive floating mats, whole plant a good fodder relished by cattle and buffaloes, grains sweet and oleaginous eaten in times of scarcity, weed in rice, growing in ponds and lakes, navigation canals, muddy areas, slow-moving streams, shallow water, marshes, rivers, wet ground, canals, irrigation canals

See *Observationes Botanicae* 5: 23. 1789, *Hortus Bengalensis, or a catalogue ...* 26. 1814, *Systema Vegetabilium, editio decima sexta* 2: 136. 1825, *Révision des Graminées* 1: 8. 1829, *Edinburgh New Philosophical Journal* 15: 380. 1833, *Journal of the Asiatic Society of Bengal* 5: 571, t. 24. 1836, *Synopsis Plantarum Glumacearum* 1: 4. 1855 [1853] and *Handb. Fl. Ceylon* 5: 185. 1900, *Phil. J. Sci.* 7: 413–415. 1912, *Grasses of Ceylon* 39. 1956, *Grasses of Burma ...* 597. 1960

(Used in Ayurveda. Seeds sweet, acrid, cooling, astringent. Roots and seeds cooling, acrid, diuretic, tonic and astringent, used in biliousness, strangury, debility.)

in English: Bengal wild rice

in India: aranyadhaanya, aranyadhanya, aranyajali, deobhaatha, deobhata, dev-bhat, devadhaana, erra changala gaddi, jangalidal, janglidal, janglidhal, juarahumedhe, jungali-dal, jyarahu medhe, iyarahumedhe, kaadu bili sajjabu hullu, kaadu billi sajjabu hullu, munidhaanya, munidhanya, neervallipullu, neevara, nir-valli-pulli, nirvallippulu, nirvallipullu, nirvarah, nivaara, nivara, nivara nivara, nyare hullu, parsal, passahi, passai, passari, pastal, phasai, phutki, prasadhika, prosadhika, putidal, thili, thini, thrinadhaanya, thrinodbhava, tilli, tini, tinni, trinadhanya, trinodbhava, trunanna, uridhan, valli pullu, vallippul, vallipullu, vanavrihi, vanti, varinellin veru, varinellin veru pacha, varinellu

in Sri Lanka: go jabba

in Thailand: pu chao loi tha, pu chao loi thaa, puchaoloitha, ya phong lom, ya-phonglom, yaa phong lom

in Vietnam: thia thia

Hylodendron Taubert Fabaceae (Caesalpiniaaceae, Detarieae, Leguminosae)

From the Greek *hyle* ‘a wood, copse, forest’ and *dendron* ‘a tree’.

Hylodendron gabunense Taub.

Tropical Africa, Cameroon, Gabon. Perennial non-climbing tree, slender, spines on smaller trunks, white petals, pale pink sepals

See *Die Natürlichen Pflanzenfamilien* 3(3): 386. 1894

(Bark abortifacient, astringent, for pulmonary troubles, venereal diseases.)

in Cameroon: alan, alane, bokata, bonbongi, bongongi, lando, mbanda, mvana, mvanda, panpando

in Congo: ngangui, pangu, sesingui

in Gabon: m’pandya, moana, mpango, mvana, mvane, mwana, pango, pindja

in Nigeria: aka-esi, akénsí, akesi, arasa-ganigan, atinusegun, boka, egosa, erikesi, erukesi, ighozo, ighzo

Hylodesmum H. Ohashi & R.R. Mill
Fabaceae (Desmodieae, Leguminosae)

From the Greek *hyle* 'a wood, copse, woodland, forest' and *desmos* 'a bond, band, bundle, a head-band, a hatband', see *Plantae Junghuhnianae* 226. 1852 and *Kirkia* 9: 359–556. 1974, *Opera Botanica* 68: 1–223. 1983, *Edinburgh Journal of Botany* 57(2): 171–188. 2000.

Hylodesmum longipes (Franch.) H. Ohashi & R.R. Mill (*Desmodium duclouxii* Pampanini; *Desmodium duclouxii* var. *henryi* (Schindler) H. Ohashi; *Desmodium henryi* Schindler; *Podocarpium duclouxii* (Pampanini) Y.C. Yang & P.H. Huang, nom. illeg.; *Shuteria longipes* Franch.) (*Podocarpium* (Benth.) Y.C. Yang & S.H. Huang, from the Greek *pous, podos* 'a foot' and *karpos* 'fruit', see *Bull. Bot. Lab. N. E. Forest. Inst., Harbin* 4: 4. 1979)

China.

See *Prodromus Florae Peninsulae Indiae Orientalis* 207. 1834, *Plantae Delavayanae* 179. 1889 [*Plantae Delavayanae* sive *Enumeratio plantarum quas in provincia chinensi Yun-nan, collegit J.-M. Delavay ...*] and *Edinburgh Journal of Botany* 57(2): 179. 2000

(Roots used for moistening the lungs and relieving coughs. Fruits used to stop bleeding and as an antiphlogistic.)

in China: yun nan chang bing shan ma huang

Hylodesmum oldhamii (Oliver) H. Ohashi & R.R. Mill (*Desmodium oldhamii* Oliver; *Meibomia oldhamii* (Oliv.) Kuntze; *Podocarpium oldhamii* (Oliver) Y.C. Yang & P.H. Huang)

China.

See *Enumeratio Methodica Plantarum* 168. 1759, *Journal of the Linnean Society, Botany* 9: 165. 1867, *Revisio Generum Plantarum* 1: 198. 1891 and *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 4: 6. 1979, *Edinburgh J. Bot.* 57(2): 180. 2000

(Whole plant used for diuresis, and as a pesticide.)

in China: yu ye chang bing shan ma huang

Hylodesmum podocarpum (A. DC.) H. Ohashi & R.R. Mill (*Desmodium japonicum* Miq.; *Desmodium podocarpum* DC.; *Desmodium podocarpum* DC. var. *indicum* Maxim.; *Desmodium podocarpum* DC. var. *japonicum* (Miq.) Maxim.; *Hedysarum podocarpum* (DC.) Spreng.; *Meibomia podocarpa* (DC.) Kuntze; *Podocarpium podocarpum* (DC.) Y.C. Yang & P.H. Huang)

China. Perennial non-climbing shrub

See *Annales des Sciences Naturelles* (Paris) 4: 102. 1825, *Revisio Generum Plantarum* 1: 198. 1891 and *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 4: 7–8. 1979, *Edinburgh J. Bot.* 57(2): 181. 2000

(Whole plant including the root bark used for reducing fever and curing malaria. Root juice given in fever.)

in China: chang bing shan ma huang

in Nepal: gahare ghans

Hylodesmum podocarpum (A. DC.) H. Ohashi & R.R. Mill subsp. ***fallax*** (Schindler) H. Ohashi & R.R. Mill (*Desmodium fallax* Schindler; *Desmodium fallax* Schindl. var. *dilatatum* Nakai; *Desmodium podocarpum* subsp. *fallax* (Schindler) H. Ohashi; *Desmodium podocarpum* DC. var. *membranaceum* Matsum.; *Desmodium racemosum* DC. var. *dilatatum* (Nakai) Ohwi; *Podocarpium fallax* (Schindler) C. Chen & X.J. Cui, nom. illeg.; *Podocarpium podocarpum* (DC.) Y.C. Yang & P.H. Huang var. *fallax* (Schindler) Y.C. Yang & P.H. Huang, nom. illeg.)

China. Perennial non-climbing shrub, herb

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54(1): 55–56. 1917, *Bulletin, University Museum, University of Tokyo* 2: 65. 1971, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 4: 8. 1979, *Acta Botanica Yunnanica* 9(3): 306. 1987, *Edinburgh J. Bot.* 57(2): 182. 2000, *Flora Yunnanica* 10: 492. 2006

(Whole plant for dysentery and rheumatism.)

in China: kuan luan ye chang bing shan ma huang

Hylodesmum podocarpum (A. DC.) H. Ohashi & R.R. Mill subsp. ***oxyphyllum*** (DC.) H. Ohashi & R.R. Mill (*Desmodium fallax* Schindl. var. *mandshuricum* (Maxim.) Nakai; *Desmodium japonicum* Miq.; *Desmodium mandshuricum* (Maxim.) (Plant diuretic, astringent, used for diarrhea, dysentery; cooked as vegetable and eaten for indigestion. Ritual.)

in China: qian bo ye chang bing shan ma huang

in Indonesia: leng-elengan, potong kujang, waliketupa sapi

in Laos: kh'üa s'a:thwa'

in Burundi: akagonderamuhoro, akagumiramuhoro

in Congo: anjoba, irhuza likasi, irhuza lilume, ituza, medingofe

in Kenya: ladakat

in Madagascar: falakatra, fangaladamba, farahinipa, menavony, tsenodambo, vahietatra, velatra

in Rwanda: ituza

in Tanzania: kuloko la kuku

Hylotelephium H. Ohba Crassulaceae

Greek *hyle* 'a wood, forest' and *telepheion* 'health', *telephion* used by Dioscorides for a species of *Andrachna*, see *Species Plantarum* 1: 430–432. 1753 and *Botanical Magazine* 90(1017): 46–55, f. 1–3. 1977, *Taxon* 41: 569. 1992, *Taxon* 44: 611–612. 1995.

Hylotelephium erythrostictum (Miquel) H. Ohba (*Sedum alboroseum* Baker; *Sedum erythrostictum* Miquel; *Sedum labordei* H. Léveillé & Vaniot; *Sedum telephium* L. subsp. *alboroseum* (Baker) Fröderström)

China. Perennial herb, simple erect stem, roots tuberous, white or pink petals

See *Ann. Mus. Bot. Lugduno-Batavi* 2: 155. 1865 and *Bot. Mag. (Tokyo)* 90: 50. 1977

(Leaves juice a remedy in eruptions as well as an application to burns, fevers, inflammations and wounds.)

in English garden stonecrop

in China: ba bao, ching tien

Hylotelephium verticillatum (L.) H. Ohba (*Sedum telephium* Linnaeus fo. *verticillatum* (L.) Fröderström; *Sedum telephium* subsp. *verticillatum* (L.) Fröderström; *Sedum verticillatum* L., not (J.D. Hooker & Thomson) Raymond-Hamet)

China.

See *Sp. Pl.* 1: 430. 1753 and *Bot. Mag. (Tokyo)* 90: 54. 1977

(Fresh whole plant antiinflammatory, antidote, analgesic, used to relieve swelling, to stop bleeding, for the treatment of traumatic injury, also used externally for inflammatory process of soft tissues, for snake and scorpion-bite.)

in China: lun ye ba bao, lunyejingtian

Hymenaea L. Fabaceae (Caesalpiniaaceae, Detarieae)

Named after Hymen, the Greek god of marriage, referring to the twin leaflets, Latin Hymenaeus and Greek Hymenaios; see *Species Plantarum* 2: 1192. 1753, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 459. Ansbach 1852 and Lee, Y.T. & J.H. Langenheim, "Additional New Taxa and New Combinations in *Hymenaea* (Leguminosae, Caesalpinioideae)." *Journal of*

the Arnold Arboretum 55(3): 441–452. 1974, *Brittonia* 26(1): 3–21. 1974, Lee, Y.T. & J.H. Langenheim, “Systematics of the genus *Hymenaea* L. (Leguminosae, Caesalpinioideae, Detarieae).” *Univ. Calif. Publ. Bot.* 69: 1–109. 1975, *Flora Novo-Galiciana* 5: 1–786. 1987, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 2: 1–481. 1988, *Flora del Paraguay: Serie Especial* 3: 1–218. 1989, *Cuscatlania* 1(2): 1–16. 1989, *AAU Reports* 24: 1–241. 1990, *Memoirs of the New York Botanical Garden* 85: i-ix, 1–246. 2000, *Ceiba* 44(2): 108–268. 2003 [2005].

Hymenaea courbaril L. (*Hymenaea animifera* Stokes; *Hymenaea candolleana* Kunth; *Hymenaea courbaril* var. *obtusifolia* Ducke; *Hymenaea courbaril* var. *stilbocarpa* (Hayne) Y.T. Lee & Langenh.; *Hymenaea multiflora* Kleinhoonte; *Hymenaea resinifera* Salisb.; *Hymenaea retusa* Willd. ex Hayne; *Hymenaea retusa* Hayne; *Hymenaea stilbocarpa* Hayne; *Inga megacarpa* M.E. Jones)

America. Perennial non-climbing tree, terminal inflorescence, shortly stalked white flowers, petals with pellucid glands, woody fruit, seeds embedded in an unpleasant smelling pulp

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 2. 1754, *Prodr. Stirp. Chap. Allerton* 327. 1796, *A Botanical Materia Medica* 2: 449. 1812, *Nova Genera et Species Plantarum* (quarto ed.) 6: 323, pl. 566. 1823 [1824], *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 11: sub pl. 11–12. 1830 and *Archivos do Jardim Botânico do Rio de Janeiro* 4: 47. 1925, *Recueil des Travaux Botaniques Néerlandais* 22: 405–406. 1926, *Contributions to Western Botany* 15: 140. 1929, *Annals of the Missouri Botanical Garden* 38(1): 1–94. 1951, *Memórias do Instituto Oswaldo Cruz* 51: 417–461. 1953, *Brenesia* 18: 15–90. 1980, *Rapid Assessment Program Working Papers* 1: 1–108. 1991, *Rapid Biological Inventories* 1: 1–79. 2000, *Revista Boliviana de Ecología y Conservación Ambiental* 7: 93–114. 2000, *Harvard Papers in Botany* 7(2): 381–398. 2003, *Journal of Ethnopharmacology* 111(2): 409–412. 2007

(Antifungal, used to treat common mycoses. Bark decoction aphrodisiac.)

in English: anami gum, Brazilian copal, locust, South American locust, stinking toe, stinking tree, West Indian locust, West Indian locust tree

in Guyana: alikuya, k'wanarri, kanawari, simiri

Hymenaea verrucosa Gaertn. (*Hymenaea verrucosa* Hornem. ex Hayne; *Hymenaea verrucosa* Lam.; *Trachylobium gaertnerianum* Hayne; *Trachylobium hornemannianum* Hayne; *Trachylobium lamarckeanum* Hayne; *Trachylobium mossambicense* Klotzsch; *Trachylobium verrucosum* (Gaertn.) Oliv.; *Trachylobium verrucosum* Oliver; *Trachylobium verrucosum* Engl.) (*Trachylobium*, from the Greek *trachys* ‘rough’ and *lobos* ‘pod, capsule, lobe’)

East Africa, Madagascar. Perennial non-climbing tree, small spreading tree or shrub, aromatic, white flowers tinged with pink, thick woody warty pod

See *De Fructibus et Seminibus Plantarum...* 2: 306, pl. 139, f. 7. 1791, *Flora* 10: 743–744. 1827, *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 11: sub pl. 18. 1830, *Naturwissenschaftliche Reise nach Mossambique ...* 21, pl. 11. 1861, *Flora of Tropical Africa* 2: 311. 1871, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 7: 457. 1886 and *Bull. Herb. Boissier*, sér. 2, 1(6): 549–587. 1901

(Bark decoction for the relief of menstrual problems; stem bark with molluscicidal activity.)

in English: East African copal, Madagascar copal, Zanzibar copal

in China: you guo luan ye dou

in Madagascar: analomanta, mandrirofo, mandrofo, mandrofofa, mandrorofo, mandrorofofo, mandrozofa, tandro, tandrofo, tandroho, tandroroho

in Tanzania: mdemo, mkundi, mnangu, msandaraisi, msandarusi, msandaruzi, mtandaruzi, mtandenisi, mtanderusi, mtondo

Hymenocallis Salisbury Amaryllidaceae (Alliaceae, Liliaceae)

Greek *hymen* ‘a membrane’ and *kallos* ‘beauty’, referring to the membrane uniting the stamens; see R.A. Salisbury, *Transactions of the Horticultural Society of London*. 1: 338. 1812, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 460. Ansbach 1852 and *Pl. Life* 36: 48. 1980, *Fl. Veracruz* 128: 1–32. 2002.

Hymenocallis caribaea (L.) Herb. (*Hymenocallis angusta* (Ker Gawl.) Herb.; *Hymenocallis caribaea* f. *angustifolia* Voss; *Hymenocallis caribaea* var. *cinerascens* Herb.; *Hymenocallis caribaea* var. *patens* (Lindl. ex Delile) Herb.; *Hymenocallis cinerascens* M. Roem.; *Hymenocallis declinata* (Jacq.) Sweet; *Hymenocallis obtusata* Griseb. ex Walp.; *Hymenocallis obtusata* (Griseb.) Pulle; *Hymenocallis patens* (Lindl. ex Delile) Herb.; *Hymenocallis sessilis* Salisb.; *Hymenocallis sloanei* M. Roem.; *Nemepiodon caribeum* (L.) Raf.; *Pancratium amoenum* Salisb.; *Pancratium angustum* Ker Gawl.; *Pancratium caribaeum* L.; *Pancratium declinatum* Jacq.; *Pancratium excisum* L.f. ex Kunth; *Pancratium fragrans* Willd., nom. illeg.; *Pancratium obtusatum* Griseb.; *Pancratium patens* Lindl. ex Delile; *Pancratium recurvum* Stokes; *Troxistemon fragrans* Raf.)

Caribbean.

See *Species Plantarum* 1: 290–291. 1753, *Selectarum Stirpium Americanarum Historia ...* 99. 1763, *Transactions of the Horticultural Society of London* 1: 338. 1812, *An*

Appendix 44. 1821, *Hortus Britannicus* 513. 1830 and *Nucleus* (Calcutta) 19: 204–227. 1976, *J. Arnold Arbor.* 60: 295. 1979, *Bot. Commelins* 40. 1983, Robertson, S.A. *Flowering Plants of Seychelles*. Kew. 1989 [as *Hymenocallis littoralis*.]

(Reported as very irritating to the skin.)

in English: fountain lily, spider lily

Common names: lirio

Hymenocallis latifolia (Mill.) M. Roem. (*Chrysiphiala latifolia* (Mill.) Ker Gawl.; *Hymenocallis caymanensis* Herb.; *Hymenocallis collieri* Small; *Hymenocallis deleuilii* auct.; *Hymenocallis expansa* (Herb.) Herb.; *Hymenocallis expansa* (Sims) Herb.; *Hymenocallis keyensis* Small; *Hymenocallis kimbaliiae* Small; *Pancretium caymanense* (Herb.) Alain; *Pancretium expansum* Herb.; *Pancretium expansum* Sims; *Pancretium latifolium* Mill.; *Pancretium patens* Delile, nom. illeg.)

Florida, Caribbean.

See *Species Plantarum* 1: 290. 1753, *Transactions of the Horticultural Society of London* 1: 338. 1812, *Botanical Magazine* t. 1941. 1819, *Trans. Hort. Soc. London* 6: 87. 1820, *An Appendix* 44. 1821, *Amaryllidaceae*: 614. 1837, *Fam. Nat. Syn. Monogr.* 4: 168. 1847, *Rev. Hort.* 1894: 218. 1894 and *Brittonia* 20: 149. 1968, Antoun, M.D. et al. “Cytotoxicity of *Hymenocallis expansa* alkaloids.” *J. Nat. Prod.* 56(8): 1423–1425. 1993

(From the bulbs and leaves of *Hymenocallis expansa*, three alkaloid constituents were identified: tazettine, hippeastrine, and haemanthidine. These alkaloids demonstrated significant cytotoxicity when tested against a panel of human and murine tumor cell lines.)

Hymenocallis littoralis (Jacq.) Salisb. Biotechnol.* 33(3): 279–295. 2005, McLachlan A., Kekre N., McNulty J., Pandey S. “Pancreatistatin: a natural anticancer compound that targets mitochondria specifically in cancer cells to induce apoptosis.” *Apoptosis*. 10(3): 619–630. 2005

(Bulbs vulnerable, with anti-viral and anti-neoplastic activities; bulbs said to be poisonous. Like many other amaryllids, *Hymenocallis* species contain various alkaloids. Littoraline showed inhibitory activity of HIV reverse transcriptase, and lycorine and haemanthamine showed potent in vitro cytotoxicity. It is not recommended that plant parts be eaten or even touched by allergic individuals, see also *Pancretium littorale* Jacq. The bulbs of *Pancretium littorale* collected in Hawaii were found to contain a phenanthridone biosynthetic product designated pancreatistatin that proved to be effective against the murine P-388 lymphocytic leukemia. Leaves and roots for skin infection, rheumatic pains, amenorrhea, fevers.)

in English: Euchar lily, spider lily

in Philippines: ajos-ajos nga maputi, bakong

Hymenodictyon parvifolium Oliv.

Kenya. Small tree or shrub, fruit dark brown, browsed by goat and kudu, liked by giraffe

See *Hooker's Icones Plantarum* 15: 69, t. 1488. 1885 and *The Journal of Animal Ecology* 5(2): 271–293. 1936, *Fitoterapia* 73(6): 523–525. 2002

(Antifungal, antimicrobial. Leaves pounded, added to cuts made at waist, causes a lot of pain and then relief for pain in the area.)

Hymenopappus L'Hérit. Asteraceae

From the Greek *hymen* 'a membrane' and *pappos* 'fluff, pappus', membranous pappus, see L'Héritier de Brutelle, Charles

Louis (1746–1800), *Louichea*, *Buchozia*, *Michauxia*, *Hymenopappus*, *Virgilia*. [s.l., s.a.] 1788.

Hymenopappus filifolius Hook. var. ***lugens*** (Greene) Jeps. (*Hymenopappus lugens* Greene)

North America, California.

See *Flora Boreali-Americana* (Hooker) 1(6): 317. 1833, *Pittonia* 4(20E): 43. 1899 and *A Manual of the Flowering Plants of California* ... [Jepson] 1128. 1925

(Roots for treating toothache and as an emetic.)

Hymenoxys Cass. Asteraceae

Sharp membrane, Greek *hymen* 'a membrane' and *oxys* 'sharp-pointed, sharp', referring to the pappus; see *Annales du Muséum National d'Histoire Naturelle* 2: 425. 1803, *Synopsis Plantarum* 2: 469. 1807, *American monthly magazine and critical review* 2: 268. 1818, *Dictionnaire des Sciences Naturelles* [Second edition] 55: 270, 278–279. 1828, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 462. Ansbach 1852, *Proceedings of the American Academy of Arts and Sciences* 17: 215. 1882 and *Sida* 16(1): 5–6. 1994, *Lundellia* 4: 39. 2001.

Hymenoxys richardsonii (Hook.) Cockerell (*Actinea richardsonii* (Hook.) Kuntze; *Actinea richardsonii* Kuntze; *Actinella richardsonii* (Hook.) Nutt.; *Picradenia richardsonii* Hook.)

North America. Perennial subshrub or herb

See *Annales du muséum national d'histoire naturelle* 2: 425. 1803, *Dictionnaire des Sciences Naturelles* [Second edition] 55: 278–279. 1828, *Flora Boreali-Americana* 1(6): 317, pl. 108. 1833, *Transactions of the American Philosophical Society*, new series, 7: 379–380. 1841, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1863: 343. 1864, *Revisio Generum Plantarum* 1: 303. 1891 and *Bulletin of the Torrey Botanical Club* 31(9): 468. 1904, Parker, K.W. "Prevention of death losses in sheep on areas infested with pingue (*Actinea richardsonii*)." *N. M. Agric. Exp. Stn. Bull.*, 241. 1936, *Taxon* 26: 257–274. 1977, *Taxon* 29: 716–718. 1980, *Taxon* 34: 159–164. 1985, Cheeke, P.R., Shull, L.R. *Natural toxicants in feeds and poisonous plants*. AVI Publishing Company, Inc., USA. 1985, *Sida* 12: 409–417. 1987, *American Journal of Botany* 75: 652–668. 1988

(This plant has caused poisoning and death in sheep, goats, and occasionally cattle. Symptoms of ingestion include violent vomiting, hence the name spewing sickness. Sheep may have a green stain around the mouth. Lesions in the gastrointestinal tract, liver and kidney congestion, and lung damage occur. Cattle are poisoned less frequently because they find the plant unpalatable. Hymenovin (hymenoxon) is a sesquiterpene lactone that contains an alpha-methylene-gamma-lactone moiety. This moiety inhibits the enzymatic capability of adenylate cyclase by alkylation of its thiol group. The

inhibition can disrupt the cellular transmission of external signals to the internal regulatory proteins. Used to relieve sour stomach.)

Common names: Colorado rubberweed, pingue hymenoxys, pinhue, rubber bush

Hymenoxys richardsonii (Hook.) Cockerell var. ***floribunda*** (A. Gray) K.F. Parker (*Actinea richardsonii* (Hook.) Nutt. var. *floribunda* (A. Gray) Cory; *Actinea richardsonii* (Hook.) (Used in Ayurveda, Unani and Sidha. Hallucinogenic, toxic. This plant, in the roots, leaves and seeds, contains several alkaloids, and it has caused rare poisoning in humans, cattle, poultry and swine. Its hallucinogenic effects have led people to eat the seed or chew the flowers, often with detrimental results, the major affect of hyoscyamine is depression of the central nervous system. Ingestion causes anticholinergic

syndrome with stimulatory and hallucinatory effects. Post-mortem examination showed degeneration of heart muscle and cyanosis of mucous membranes. Whole plant vermifuge. Fried leaves applied over the forehead to relieve pain and headache. Leaves and flowering tops used in asthma. Leaves and fruits decoction given in whooping cough and asthma. Powdered seeds and leaves given as sedative and antispasmodic, for asthma, intestinal worms, whooping cough. Seeds astringent, used as an anaesthetic and for relieving muscular spasm and pain, toothache, diarrhea, neuralgia, hysteria, asthma, cough, skin inflammation; powdered seeds given to subside pain, toothache and asthma. Magico-religious plant, ritual, for exorcism, Lamas burn the seeds and blow the smoke into the patient's mouth. Veterinary medicine, leaf extract applied in sprains.)

Ser.* 2: 124. 1969

(Leaves very sharp can cause severe cuts on the skin.)

in English: blue thatchgrass, Drege's deckgrass, giant thatchgrass, hairy blue thatching grass, Tambuki grass

in Lesotho: qokoa

in South Africa: leqokwa, qoqwa, reuse tamboekiegras, rooi-gras, tamboekiegras

Hypecoum L. Papaveraceae (Fumariaceae, Hypecoaceae)

From the Greek *hypekoon*, *hypekoos*, applied by Dioscorides (4.67) and Galenus to a kind of cumin, horned cumin, a species of *Hypecoum*; *hypekoos* 'giving ear, obedient', Latin *hypecoon* for a plant (Plinius); see Carl Linnaeus, *Species Plantarum* 1: 124. 1753, *Genera Plantarum* Ed. 5. 60. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 463. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 117. 1989, *Nordic J. Bot.* 10(2): 135, 137, 140. 1990.

Hypecoum leptocarpum Hook. f. & Thomson (*Hypecoum chinense* Franch.)

India, Himalaya.

See *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 276. 1855, *Plantae Davidianae ex Sinarum Imperio* 1: 27. 1884

(Narcotic, antidote. Whole plant for cough and cold, in dermatitis and skin diseases, blood pressure.)

in Bhutan: parpata

in China: xi guo jiao hui xiang

Hypericum L. Clusiaceae (Guttiferae, Hypericaceae)

Latin *hypericon*, *hypericum* and Greek *hypereikon* for a plant called also *chamaepitys* and *corion*, ground-pine (Plinius); derivation obscure, according to some from the Greek *hyper* 'above, over' and *eikon*, *ikon* 'a picture, an image', the plant was supposed to ward off evil spirits; or from the Greek *hyper* or *hypo* and *ereiko*, *eriko* 'to break'; see Carl Linnaeus, *Species Plantarum*. 2: 783–787. 1753, *Genera Plantarum*. Ed. 5. 341. 1754, Duhamel du Monceau, Henri Louis (1700–1782), *Traité des arbres et arbustes qui se*

Hypecoum L. Papaveraceae (Fumariaceae, Hypecoaceae)

cultivent en France en pleine terre 1: 53. Paris: H.L. Guerin & L.F. Delatour, 1755 and *Bot. Mag.* (Tokyo) 97: 333–343. 1984, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 319. Stuttgart 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 299–300. 1996.

Hypericum aethiopicum Thunb.

East Africa.

See *Prodromus Plantarum Capensium*, quas in Promontorio Bonae Spei Africes, annis 1772–1775, collegit Carol. Peter. Thunberg. Upsaliae (pars prior) 1794, (pars posterior) 1800 and *Bulletin of the Natural History Museum, London (Botany)* 23(2): 69. 1993

(Poisonous. Stem, leaves and fruits for infertility, bronchitis, lung troubles, fevers, measles. Roots used for urinary complaints, backache.)

in South Africa: uSukumbhili

Hypericum ascyron L. (*Hypericum ascyron* Siebold ex Blume; *Hypericum ascyron* Mill.; *Hypericum ascyron* L. subsp. *pyramidatum* (Dryand.) N. Robson; *Hypericum ascyron* subsp. *pyramidatum* (Aiton) N. Robson; *Hypericum pyramidatum* Aiton)

China, North America. Perennial herb

See *Species Plantarum* 2: 783–784. 1753, *Gard. Dict.*, ed. 8. n. 7. 1768, *Hortus Kewensis*; or, a catalogue ... 3: 103. 1789, *Species Plantarum*. (Low to moderate toxicity, poisonous to livestock, cattle, sheep, goats, horses, and swine. The plant contains hypericin, which is a primary photosensitizing chemical. Hypericin, a fluorescent pigment, is regarded as a derivative of naphthodianthrone. The pigment is contained in small black dots that are just visible to the naked eye on leaves and petals. Ingestion has caused skin problems in cattle, horses, rabbits, sheep, and swine. The skin problems occur on white or light-colored skin; dark skin is not affected. Whole plant astringent, antidiarrheal, abortifacient, expectorant, diuretic, febrifuge, cough sedative. Leaves for hypertension; leaf paste applied to treat wounds, septic wounds, cuts, infections. A paste of flower buds applied as poultice on wounds and burns. Veterinary medicine, leaf paste applied to treat wounds, septic wounds.)

in English: common St. Johnswort, gammock, goatsbeard, goatweed, herb-john, Klamath weed, penny-john, perforated St. John’s wort, St. John’s grass, rosin-rose, St. John’s wort, tipton weed, touch-and-heal

in Arabic: bersemoun, dadhi, mesmoum

in India: basant, basanti, bassant, meerang, mongolu

in South Africa: Johanneskruid

Hypobathrum Blume Rubiaceae

From the Greek *hypo* ‘beneath, under’ and *bathron* ‘a pit, abyss’, some rheophytes, see *Verh. Batav. Genootsch. Kunsten* 5(4): 3. 1790, *Syn. Pl.* (Persoon) 1: 133. 1805, *Cat. Gew. Buitenzorg* (Blume) 48. 1823, *Bijdragen tot de flora van Nederlandsch Indie* 988, 1007. 1826 [Oct 1826–Nov 1827], *Prodr.* (DC.) 4: 398. 1830, *Mém. Rubiac.*: 172. 1830, *Prodr.* 4: 619. 1834.

Hypobathrum microcarpum (Blume) Bakh.f. (*Gynopachis deflectens* Miq.; *Higginsia microcarpa* Blume; *Hypobathrum microcarpum* (DC.) Bakh.f.; *Petunga microcarpa* (Blume) DC.; *Petunga microcarpa* DC.)

Malesia. Small tree, white flowers, orange yellow berries

See *Bijdragen tot de flora van Nederlandsch Indie* 988. 1826 [Oct 1826–Nov 1827], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 398–399. 1830 and *Fl. Java*, Afl. xv. Fam. 173, 101. 1956, *Blumea* 12: 64. 1963

(Roots in smallpox, ulcers and stomachache.)

Hypobathrum venulosum (Hook.f.) K.M. Wong (*Petunga venulosa* Hook.f.; *Randia venulosa* Wall., nom. nud.)

India, Malay Peninsula. See also *Petunga* DC.

See *Numer. List* n. 8301. 1847, *The Flora of British India* 3: 121. 1880 and *Tree Flora of Malaya* 4: 355. 1989

(Roots poulticed for rheumatism.)

Malay name: umpong putih

Hypochaeris L. Asteraceae

Greek *hypochoiris*, used by Theophrastus (*HP*. 7.7.1) and Plinius for a plant of the succory kind, swine's succory, cat's ear, *hypo* 'beneath, under' and *choiros* 'a pig', referring to the bristly leaves, or because the pigs are fond of the roots. Plinius applied Latin *hypochoeris*, *idis* to a plant actually unknown; see Carl Linnaeus, *Species Plantarum*. 2: 810–811. 1753, *Genera Plantarum*. Ed. 5. 352. 1754, *Familles des Plantes* 2: 112, 512. 1763, *Species Plantarum*, Editio Secunda 2: 1139. 1763, *Flora Carniolica*, Editio Secunda 2: 113. 1772, *Introductio ad Historiam Naturalem* 154. 1777, *Flore Française*. Troisième Édition 6: 453. 1815, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(1): 97, 307. 1838, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 464. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 117. 1989, *Fl. Fan. Argent.* 63: 3–25. 1999.

Hypochaeris glabra L. (*Hyoseris tenella* Thunb.; *Hypochaeris capensis* Less.; *Hypochaeris glabra* E. Mey. ex DC.; *Hypochaeris glabra* var. *arrhyncha* Maire; *Hypochaeris glabra* var. *dimorpha* (Salzm.) Maire; *Hypochaeris glabra* var. *erostris* Coss. & Germain; *Hypochaeris glabra* var. *hispidula* Peterm.; *Hypochaeris glabra* var. *loiseleuriana* Godr.; *Hypochaeris glabra* var. *salzmanniana* (DC.) Coss.)

Europe, Asia, Africa. Annual, herb, slender taproot, stem glabrous, flowers yellow, heads solitary on branched stems, achenes of 2 types

See *Species Plantarum* 2: 811. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(1): 91. 1838 and *Fl. Libya* 107: 347. 1983

(Aperient, astringent, diuretic, tonic, vulnerary.)

in English: glabrous cat's ear, smooth cat's ear

in South Africa: skaapslaai

Hypochaeris microcephala (Sch. Bip.) Cabrera (*Achyrophorus microcephalus* Sch. Bip.)

South America.

See *Species Plantarum* 2: 810–811. 1753, *Familles des Plantes* 2: 112. 1763, *Jahresbericht der Pollichia* 16–17: 59. 1859, *Flora Brasiliensis* 6(3): 334. 1884 and *Notas del Museo de la Plata, Botánica* 2(16): 200. 1937

(Roots and stem decoction used for regulating fertility.)

in Paraguay: achicoria

Hypodematium Kunze Dryopteridaceae (Aspleniaceae, Woodsiaceae)

Hypodematium, the diminutive of the Greek *hypodema*, *hypodematos* 'a sandal, that which is bound under, a shoe', *hypodeo* 'to bind, to tie or fasten under', referring to the shape of the indusium, see *Flora* 16(2): 690. 1833.

Hypodematium crenatum (Forssk.) Kuhn (*Aspidium chrysolepis* Fée; *Aspidium crenatum* (Forssk.) Kuhn; *Aspidium eriocarpum* Wall., nom. nud.; *Aspidium eriocarpum* Wall. ex Mett.; *Aspidium odoratum* Bory ex Willd.; *Cystopteris odorata* (Bory ex Willd.) Desv.; *Dryopteris crenata* (Forssk.) Kuntze; *Dryopteris fauriei* Kodama; *Hypodematium eriocarpum* (Wall. ex Mett.) Ching; *Hypodematium crenatum* Kuhn & Decken; *Hypodematium crenatum* subsp. *fauriei* (Kodama) K. Iwats.; *Hypodematium fauriei* (Kodama) Tagawa; *Hypodematium hirsutum* (D. Don) Ching; *Hypodematium onustum* Kunze; *Lastrea crenata* (Forssk.) Bedd.; *Lastrea eriocarpa* (Wall. ex Mett.) C. Presl; *Lastrea hirsuta* (D. Don) T. Moore; *Nephrodium crenatum* Baker; *Nephrodium eriocarpum* (Wall. ex Mett.) Decne.; *Nephrodium hirsutum* D. Don; *Nephrodium odoratum* (Bory ex Willd.) Baker; *Polypodium crenatum* Forssk.)

China, Nepal. Fodder

See *Species Plantarum*. Editio quarta 5: 286. 1810, *Prodromus Florae Nepalensis* 6. 1825, *Mémoires de la Société Linnéenne de Paris* 6: 264. 1827, *A Numerical List of Dried Specimens* [Wallich] n. 324. 1828, *Flora* 16(2): 690. 1833, *Mémoires sur les Familles des Fougères* 7: 107. 1855, *Synopsis Filicum* 280. 1867, *Filices Africanae* 129. 1868, *Supplement to the Ferns of Southern India and British India* 18. 1876, *Reisen Ost Afr.* 3 [3]. Bot. 37. 1879, *Revisio Generum Plantarum* 2: 811. 1891 and *Sunyatsenia* 3(1): 9. 1935, *Journal of Japanese Botany* 27(10): 320–321. 1952, *Acta Phytotaxonomica et Geobotanica* 21(1–2): 52. 1964, *Fl. Tsinling*. 2: 130. 1974, *Nucleus* 20: 105–108. 1977, *Aspects Pl. Sci.* 6: 119–181. 1983, *Indian Fern Journal* 1(1–2): 49. 1984 (publ. 1985), *Cytologia* 49: 49–59. 1984, *J. Sci. Engin.* 22: 121–144. 1985, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 14: 1–42. 1985, *J. Cytol. Genet.* 23: 38–52. 1988, *Aspects Pl. Sci.* 11: 459–465. 1989, *Bot. Mag. (Tokyo)* 105: 105–124. 1992, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 29: 22–23. 1998

(Rhizome antibacterial. Poultice for headache and rheumatism.)

in Nepal: sano bisyau

Hypoestes Sol. ex R. Br. Acanthaceae

Presumably from the Greek *hypoistos* 'tolerable', *hypophero*, *hypopherein* 'carry away under', or *hypo* 'beneath' and *esthes*, *esthos* 'garment, dress', referring to the involucre or to the bracts covering the calyx, or from *hypoisteon* 'one must endure', or from *hestia* 'altar, house, hearth of a house, home'; see Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae*. 474. London 1810, Georg Christian Wittstein (1810–1887), *Etymologisch-botanisches Handwörterbuch*. 464. Ansbach 1852, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 833. 1890, *Histoire des Plantes* 10: 464. 1891 and *Journal of Botany, British and Foreign* 44: 223–224. 1906, *S. African J. Bot.* 51: 133–144. 1985, *Austrobaileya* 5(4): 651–659. 2000, *Proc. Calif. Acad. Sci.* 52(12): 143–158. 2000.

Hypoestes aristata (Vahl) Sol. ex Roem. & Schult. (*Hypoestes antennifera* S. Moore; *Hypoestes aristata* (Vahl) Roem. & Schult.; *Hypoestes aristata* R.Br.; *Hypoestes aristata* var. *barteri* (T. Anderson) Benoist; *Hypoestes aristata* var. *insularis* (T. Anderson) Benoist; *Hypoestes aristata* var. *kikuyensis* R. Benoist; *Hypoestes aristata* var. *letestui* R. Mett.; *Phegopteris punctata* Mett.; *Polypodium punctatum* Thunb.)

India, China. Terrestrial fern

See *Flora Japonica*, ... 337–338. 1784, *Annales Museum Botanicum Lugduno-Batavi* 1(7): 222. 1864, *Filices Africanae* 120. 1868, *Syn. Fil.* (Hooker & Baker), ed. 2. 503. 1874, *A Supplement to the Handbook of the Ferns of British India* 19. 1892, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 1(4): 117. 1899 and *Index Filicum* fasc. 5: 287. 1905

(Fronds as poultice for boils. Veterinary medicine.)

in Nepal: lahare unyu

Hypoxis L. Hypoxidaceae (Amaryllidaceae)

From the Greek *hypo* ‘beneath’ and *oxys* ‘sharp-pointed, sharp’, referring to the lance-shaped leaves, or to the capsule, contracted or elongated at the base, or in reference to the bitter taste of corms and roots or simply meaningless; see C. Linnaeus, *Systema Naturae*. Ed. 10. 2: 972, 986, 1366. 1759 and Geerinck, D. *Flore d’Afrique Centrale* (Zaire - Rwanda - Burundi) *Hypoxidaceae*: 1–9. Jardin Botanique National de Belgique, Meise. 1971, Nordal, I., Laane, M.M., Holt, E. & Staubo, I. “Taxonomic studies of the genus *Hypoxis* in East Africa.” *Nordic Journal of Botany* 5: 15–30. 1985, Nordal, I. & Iversen, J.I. *Hypoxidacées. Flore du Cameroun* 30: 33–49. Ministère de l’enseignement supérieur et de la recherche scientifique (Mesres), Yaoundé. 1987, Wiland-Szymanska, J. “The genus *Hypoxis* (Hypoxidaceae) in Central Africa.”

Annals of the Missouri Botanical Garden 88: 302–350. 2001, Wiland-Szymanska, J. & Nordal, I. *Hypoxidaceae. Flora of Tropical East Africa*: 1–25. 2006.

Hypoxis angustifolia Lam.

Trop. & S. Africa, Indian Ocean, Arabian Pen. Small perennial bulbous herb, tuber geophyte, corm white inside, leaves sparsely hispid, perianth yellow on inside, sepals green on back with brown stripe, petals green on back with light yellow margin, red striping on the tepals, capsule turbinate, in wooded grassland, in grassland

See *Encyclopédie Méthodique, Botanique* 3: 182. 1789, *J. Linn. Soc., Bot.* 17: 111. 1878 and *Novon* 12: 148–149. 2002

(Pounded leaves, maceration, bath, for prolapsus of uterus. Antiseptic, disinfectant, rhizomes used for wounds, healing pustules and infected wounds.)

in Congo: muleke

Hypoxis argentea Harv. ex Baker (*Hypoxis argentea* var. *argentea*; *Hypoxis argentea* var. *sericea* (Baker) Baker)

S. Africa. Small white rootstocks, rhizome geophyte, falcate leaves erect, flowers yellow, in times of famine the rootstocks are boiled or roasted as a source of food

See *J. Linn. Soc., Bot.* 17: 110. 1878

(Oil ointment from warm roots; an ointment for cracks in the teats of the cows.)

in English: small yellow star, small yellow star flower, star of Bethlehem

in Southern Africa: iNongwe (Xhosa)

Hypoxis aurea Lour.

Indochina, India.

See *Flora Cochinchinensis* 1: 200. 1790 and *Cytologia* 41: 31–53.

(Mucilaginous rootstock used as tonic and aphrodisiac; latex of rhizome applied on cracked skin on heels and lips. Tuber poultice for swelling.)

in China: xiao jin mei cao

in India: bankand, bhuin, kinda, kingyo-josu, kitablo

Hypoxis colchicifolia Baker (*Hypoxis distachya* Nel; *Hypoxis gilgiana* Nel; *Hypoxis latifolia* Hook., nom. illeg.; *Hypoxis oligotricha* Baker)

E. Cape Prov. to KwaZulu-Natal. Rhizome geophyte, large underground tuber, erect leaves, raceme with star-shaped yellow flowers, slow-growing

See *Bot. Mag.* 80: t. 4817. 1854, *J. Bot.* 27: 3. 1889 and *Bot. Jahrb. Syst.* 51: 322. 1914

(Very poisonous. Tubers are used for impotency and barrenness, heart complaints. Infusions are also taken as love

charm emetics and are administered for hysterical fits, for insanity. The decoction for the treatment of acne. A purgative and ascarifuge.)

in South Africa: iLabatheka (Zulu)

Hypoxis hemerocallidea Fisch., C.A. Mey. & Avé-Lall. (*Hypoxis elata* Hook.f., nom. illeg.; *Hypoxis hemerocallidea* Fisch. & Avé-Lall.; *Hypoxis hemerocallidea* Fisch. & C.A. Mey.; *Hypoxis rooperi* T. Moore; *Hypoxis rooperi* var. *forbesii* Baker) (*Hypoxis rooperi* for the British botanical collector Edward Rooper, 1818–1854, painter of flowers and landscapes; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 300. Cape Town 1981)

Tropical Africa & S. Africa. Tuber geophyte

See *Systema Naturae*, Editio Decima 2: 972, 986, 1366. 1759, *Bot. Mag.* 94: t. 5690. 1868, *J. Linn. Soc., Bot.* 17: 118. 1878

(A tonic to weak children. The juice from the rootstock is used as an application to burns. Preparation of herbal teas and tinctures; the tea from this plant is said to quickly replace lost blood, this tea also used in conjunction with other plants to combat “bad blood” in diabetes patients. Used in the treatment of urinary infections and nervous disorders, common cold, flu, arthritis, tumours, cancer and HIV/AIDS. Magic, ritual, corms used as an emetic against fearful dreams, as a charm against lightning and storms.)

in English: African potato, miracle cure, wonder herb

in South Africa: gifbol, inongwe, keffertulp, tsuku-ya-poo

Hypoxis obtusa Burch. ex Ker Gawl. (*Hypoxis angolensis* Baker; *Hypoxis iridifolia* Baker; *Hypoxis nitida* Verd.; *Hypoxis obtusa* Burch.; *Hypoxis obtusa* Ker Gawl.; *Hypoxis obtusa* var. *chrysotricha* Nel; *Hypoxis villosa* L.f. var. *obtusa* (Burch. ex Ker Gawl.) T. Durand & Schinz; *Hypoxis villosa* var. *obtusa* (Burch.) T. Durand & Schinz)

Uganda.

See *Suppl. Pl.* 198. 1782 [1781 publ. Apr 1782], *Bot. Reg.* 2: t. 159. 1816, *J. Linn. Soc., Bot.* 17: 117. 1878 [1880 publ. 1878], *Trans. Linn. Soc. London, Bot.* 1(5): 266. 1878 [1880 publ. Jan 1878], *Consp. Fl. Afric.* 5: 236. 1894 and *Bot. Jahrb. Syst.* 41: 33. 1914, *Fl. Pl. Africa* 27: t. 1058. 1949

(Tuber aphrodisiac, analgesic, for infertility, body ache, venereal diseases.)

Hypoxis villosa L.f. (*Fabricia villosa* Thunb.; *Hypoxis boranensis* Cufod.; *Hypoxis decumbens* Lam., nom. illeg.; *Hypoxis abyssinica* Hochst.; *Hypoxis engleriana* Nel; *Hypoxis fabricia* Gaertn.; *Hypoxis krebsii* Fisch. & C.A. Mey.; *Hypoxis microsperma* Avé-Lall.; *Hypoxis neghelensis* Cufod.; *Hypoxis obliqua* Jacq.; *Hypoxis petitiana* A. Rich.; *Hypoxis scabra* Lodd.; *Hypoxis schweinfurthiana* Nel; *Hypoxis simensis* Hochst.; *Hypoxis tomentosa* Lam.; *Hypoxis tristycha* Cufod.; *Hypoxis villosa* var. *fimbriata* Nel; *Hypoxis villosa* var. *obliqua* (Jacq.) Baker; *Hypoxis villosa* var. *scabra* (Lodd.) Baker)

S. Africa. Tuber geophyte

See *Fl. Cap.* 6: 184. 1896 and *Bot. Jahrb. Syst.* 41: 310, 329. 1914, *Miss. Biol. Borana, Racc. Bot., Angiosp.-Gymnosp.:* 328, 330, 332. 1939, Wood, J.R.I. *A Handbook of the Yemen Flora*. Kew. 1997

(Magic, ritual, a medicine and charm. Veterinary medicine, the plant for cattle diarrhea.)

in English: golden winter star

in South Africa: sterretjies (= star-like)

Hypselodelphys (K. Schumann) Milne-Redh. Marantaceae

From the Greek *hypselos* ‘high’ and *delphys* ‘a womb’; see *Kew Bulletin* 1950: 158. 1950, *Bull. Soc. Roy. Bot. Belgique* 83: 12. 1950, J.M. Moutsambote, T. Yumoto, M. Mitani, T. Nishihara, S. Suzuki & S. Kuroda, “Vegetation and list of plant species identified in the Nouabale-Ndoki Forest, Congo.” *Tropics*. 3(3/4): 277–293. 1994.

Hypselodelphys violacea (Ridl.) Milne-Redh. (*Donax violacea* (Ridl.) Roberty; *Trachyphrynium muricatum* Pierre; *Trachyphrynium violaceum* Ridl.)

Tropical Africa. Herb, liana, climbing, straggling, white-pink flowers, rough 3-lobed fruits, stem pith of shoots eaten by gorillas

See *Journal of Botany, British and Foreign* xxv: 133. 1887 and *Bull. Soc. Roy. Bot. Belgique* 83: 7. 1950, *Kew Bulletin* 1950: 160. 1950, *Fl. Ouest-Afr.* 360. 1954, *Bull. Inst. Franc. Afr. Noire, Sér. A*, xvii. 29. 1955

(Juice from the stem as an eye lotion. In fetish groves. Magic, stem supposed to scare witches; used as a divining rod.)

in Cameroon: meseresele

in Central African Republic: poposo

in Congo: lekassi la kiera

in Ghana: babadua, mmabadua

in Yoruba: agbeyika egbe

Hypserpa Miers Menispermaceae

Greek *hypsos* ‘height’ and *herpo* ‘to creep’, referring to the climbing habit; see John Miers (1789–1879), in *Annals and magazine of natural history*. Ser. 2, 7: 36. London 1851.

Hypserpa nitida Miers (*Hypserpa cuspidata* (J.D. Hooker & Thomson) Miers; *Hypserpa laevifolia* Diels; *Limacia cuspidata* J.D. Hooker & Thomson)

China.

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 3: 258–259. 1851, *Flora Indica*: being a systematic account

of the plants . . . 1: 189. 1855, *Annals and Magazine of Natural History*, ser. 3 14: 365. 1864 and *Das Pflanzenreich* 94: 210. 1910

(Roots for medicinal usage; leaves applied to the wounds.)

in China: ye hua teng

Hyptianthera Wight & Arn. Rubiaceae

From the Greek *hyptios* ‘bent back, laid back, resupinate’ and *anthera* ‘anther’, referring to the anthers, see *Species Plantarum* 2: 1192. 1753, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 399. 1834.

Hyptianthera stricta (Roxb. ex Schult.) Wight & Arn. (*Hypobathrum strictum* (Roxb. ex Schult.) Kurz; *Hyptianthera bracteata* Craib; *Hyptianthera stricta* Wall.; *Hyptianthera stricta* Wight & Arn.; *Macrocnemum strictum* Roxb. ex Schult.; *Randia stricta* (Roxb. ex Schult.) Roxb.; *Randia stricta* Roxb.; *Rondeletia stricta* (Roxb. ex Schult.) Roth; *Solena stricta* (Roxb. ex Schult.) D. Dietr.)

Nepal, China. Aromatic shrub, quadrangular stem, glabrous narrowly elliptic leaves, white flowers in axillary cymes

See *Hort. Beng.* 15, 1814, *Syst. Veg.* 5: 6. 1819, *Nov. Pl. Sp.* 140. 1821, *Flora Indica*; or descriptions of Indian Plants 2: 145. 1824, *Prodr. Fl. Ind. Orient.*: 1. 399. 1834, *Syn. Pl.* 1: 800. 1839, *Numer. List* [Wallich] n. 8313 L. 1847, *Forest Fl. Burma* 2: 50. 1877 and *Bull. Misc. Inform. Kew* 1911: 393. 1911

(Leaf juice or powder of dry leaves given as a tonic to pregnant woman.)

in India: boldiki, mir-herai, mirherai, thing-sai-rangal

Hyptis Jacquin Lamiaceae (Labiatae)

Greek *hyptios* ‘bent back, laid back, oblique, resupinate’, referring to the limb of the corolla or to the saccate lip, see *Collectanea* 1: 101–103. 1786[1787], *Labiatarum Genera et Species* 78, 122, 133, 136. 1833 and *Fieldiana, Bot.* 24(9/3): 237–317. 1973, *Botanical Journal of the Linnean Society* 98(2): 91. 1988.

Hyptis atrorubens Poit. (*Hyptis tenella* Briq. & Spruce; *Mesosphaerum atrorubens* (Poit.) Kuntze)

Trop. America, Trop. Africa.

See *The Civil and Natural History of Jamaica in Three Parts* 257. 1756, *Collectanea* 1: 101. 1786[1787], *Ann. Mus. Hist. Nat.* 7: 466–467, t. 27, f. 3. 1806, *Revisio Generum Plantarum* 2: 525. 1891, *Annuaire du Conservatoire et Jardin Botaniques de Genève* 2: 223. 1898 and *Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 721–829. 1960

(Antiseptic, febrifuge, nervous system stimulant, useful in bowel disorders. Leaf juice for diarrhea, dysentery, vomiting; leaves tea for colds, flu, intestinal worms, indigestion.)

in English: wild mint

Hyptis brevipes Poit. (*Hyptis acuta* Benth.; *Hyptis brevipes* Baker, nom. illeg., non *Hyptis brevipes* Poit.; *Hyptis brevipes* var. *glabrior* Benth.; *Hyptis brevipes* var. *remotidens* Briq.; *Hyptis brevipes* var. *robusta* Loes.; *Hyptis brevipes* var. *ser-rata* Briq.; *Hyptis brevipes* var. *vulgaris* Briq.; *Hyptis lanceolata* Poir.; *Hyptis melanosticta* Griseb.; *Hyptis radiata* Kunth; *Hyptis tweedii* Benth.; *Lasiocorys poggeana* (Briq.) Baker; *Lasiocorys poggeana* Baker; *Leucas globulifera* Hassk.; *Leucas poggeana* Briq.; *Mesosphaerum brevipes* (Poit.) Kuntze; *Mesosphaerum lanceolatum* (Poir.) Kuntze; *Mesosphaerum melanostictum* Kuntze; *Mesosphaerum melanostictum* (Griseb.) Kuntze; *Mesosphaerum tweedii* (Benth.) Kuntze, nom. nud.; *Mesosphaerum tweedii* Kuntze; *Pycnanthemum subulatum* Blanco; *Thymus biserratus* Blanco)

Trop. America. Shrub

See *Species Plantarum* 2: 590–592. 1753, *The Civil and Natural History of Jamaica in Three Parts* 257. 1756, *Collectanea* 1: 101. 1786 [1787], *Annales du muséum national d’histoire naturelle* 7: 465. 1806, *Encyclopédie Méthodique. Botanique* ... Supplément 3: 114–115. 1813, *Linnaea* 6: 82. 1831, *Flora de Filipinas* 478. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 110. 1848, *Flora of the British West Indian Islands* 488. 1861, *Revisio Generum Plantarum* 2: 525–527. 1891 and *Flora of Tropical Africa* [Oliver et al.] 5(3): 447. 1900, *Opera Botanica* 121: 159–172. 1993

(Whole plant as anthelmintic, antifungal. Leaves decoction as a postpartum remedy.)

Malay name: kanching baju

in Sarawak: sempulut babi

Hyptis capitata Jacq. (*Clinopodium capitatum* Sw.; *Clinopodium capitatum* (Jacq.) Sw.; *Hyptis capitata* Jenn.; *Hyptis capitata* f. *pilosa* Donn. Sm.; *Hyptis capitata* var. *mariannarum* (Briq.) Briq.; *Hyptis capitata* var. *mexicana* Briq.; *Hyptis capitata* var. *pilosa* Briq.; *Hyptis capitata* var. *vulgaris* Briq.; *Hyptis celebica* Zipp. ex Koord., nom. nud.; *Hyptis decurrens* (Blanco) Epling; *Hyptis decurrens* Epling; *Hyptis macrochila* Mart. ex Steud., nom. inval.; *Hyptis mariannarum* Briq.; *Hyptis rhomboidea* M. in Nepal: dubelaharo

in Tibet: thal tras nag po

Ichnocarpus jacquetii (Pierre) D.J. Middleton (*Ichnocarpus oliganthus* Tsiang; *Micrechites jacquetii* Pierre)

Laos, China.

See *Sunyatsenia* 3(203): 156–159, pl. 17, f. 10. 1936, *Novon* 4(2): 152. 1994

(The bark is used to treat rheumatism.)

in English: fewflowered ichnocarpus

in China: shao hua yao gu teng

Ilex L. Aquifoliaceae

From the Latin *ilex* (*elex*), *-icis*, ancient name for the holm oak tree, *Quercus ilex* L., used also by Vergilius; Greek *prinos*; see Carl Linnaeus, *Species Plantarum*. 1: 125. 1753, *Genera Plantarum*. Ed. 5. 60. 1754, Pietro Bubani, *Flora Virgiliana*. 64–65. Bologna 1870 and *Fieldiana, Bot.* 24(6): 196–201. 1949, *Holly Society Journal* 9(4): 9. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 133–136. 2001.

Ilex aquifolium L. Perennial tree or shrub

Europe.

See *Species Plantarum* 1: 125. 1753 and Kingsbury, J.M. "Phytotoxicity 1. Major problems associated with poisonous plants." *Clin. Pharmacol. Ther.* 10: 163–169. 1969, *Fl. Australia* 22: 201. 1984, Willems, M. "A cyanogenic glucoside from *Ilex aquifolium*." *Phytochemistry* (Oxford), 27: 1852–1853. 1988, *Acta Botanica Malacitana* 16: 449–454. 1991

(Ilicin, a glycoside, has been implicated as the toxic substance in holly berries. Symptoms are usually confined to vomiting and diarrhea. A cyanogenic glycoside, (2-beta-D-glucopyranosyloxy-p-hydroxy-6,7-dihydromandelonitrile)

has also been isolated from the berries of English holly. Leaf ash used as insect repellent. Roots used for cough, gravel, tuberculosis.)

in English: Christ's thorn, Christmas holly, common holly, crocodile holly, English holly, European holly, holly, holly green, holy tree, needle-leaved holly, Oregon holly, prick holly, sparked holly

in Spain: acebo

in Italian: agrifoglio, alloro spinoso

in Arabia: aoud ech-chouk

in Algeria: iguersel, irsel

in Tunisia: irsel

***Ilex cassine* L.**

North America. Perennial tree or shrub

See *Species Plantarum* 1: 125. 1753, Catesby, Mark (1683–1749), *The natural history of Carolina, Florida, and the Bahama Islands*, 1: 31, t. 31. London, Printed for C. Marsh [etc.] 1754 and *Fl. Republ. Cuba*, ser. A, 9(1): 10. 2004

(Diaphoretic. Ceremonial.)

in English: cassina, dahoon, dahoon holly, yaupon

Ilex cassine* L. var. *cassine

North America. Perennial tree or shrub

See *Species Plantarum* 1: 125. 1753, Catesby, Mark (1683–1749), *The natural history of Carolina, Florida, and the Bahama Islands*, 1: 31, t. 31. London, Printed for C. Marsh [etc.] 1754 and *Fl. Republ. Cuba*, ser. A, 9(1): 10. 2004

(Emetic, purifier. Ceremonial.)

in English: cassina, dahoon, dahoon holly, yaupon

***Ilex cymosa* Blume**

Malaysia.

See *Bijdr. Fl. Ned. Ind.* 17: 1149. 1826–1827

(Root infusion taken against fever; for boils, pound the root and poultice to ripen the boils.)

Malay names: mengikrai, mesirah

***Ilex dipyrena* Wall.** (*Ilex bioritsensis* Hayata var. *integra* H.F. Comber; *Ilex dentonii* Hort. ex Loudon; *Ilex dipyrena* var. *connexiva* W.W. Sm.; *Ilex dipyrena* var. *paucispinosa* Loes.; *Ilex monoplyrena* G. Watt ex Loes.)

India.

See *Flora Indica*; or descriptions of Indian Plants 1: 473–474. 1820, *An Encyclopedia of Plants* Suppl. 2: 1302. 1855 and *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 78: 275. 1901, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 89: 283. 1908, *Notes from the Royal*

Botanic Garden, Edinburgh 10(46): 41. 1917, *Notes from the Royal Botanic Garden, Edinburgh* 18(86): 43. 1933, *J. Cytol. Genet.* 23: 219–228. 1988

(Leaves diuretic, purgative.)

in China: shuang he gou gu

Ilex godajam (Colebr. ex Wall.) Wall. ex Hook. f. (*Ilex capitellata* Pierre; *Ilex godajam* (Colebr.) Wall. ex Hook.f.; *Ilex godajam* Colebr. ex Wall., nom. inval.; *Ilex godajam* fo. *capitellata* (Pierre) Loes.; *Ilex godajam* var. *capitellata* (Pierre) Loes.; *Ilex godajam* var. *genuina* Kurz; *Ilex rotunda* var. *piliger* Loes.; *Prinos godajam* Colebr.; *Prinos godajam* Colebr. ex Wall.)

India.

See *Species Plantarum* 1: 330. 1753, *Numer. List* [Wallich] no. 4329. 1831, *Plantae Asiaticae Rariores* (Wallich). 3: 38–39, pl. 261. 1832, *Journal of the Asiatic Society of Bengal* 44(2): 158. 1875, *The Flora of British India* [J.D. Hooker] 1(3): 604. 1875, *Flore Forestière de la Cochinchine* 4: pl. 278b. 1893 and *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 78: 102, 108. 1901

(Bark decoction drunk for diarrhea.)

in China: san hua dong qing

in India: godajam

Ilex excelsa (Wall.) Hook. f. var. *excelsa* (*Cassine excelsa* Wall.; *Ilex doniana* DC.; *Ilex elliptica* D. Don, nom. illeg.; *Ilex elliptica* Kunth; *Ilex nepalensis* Spreng.)

India, Himalaya.

See *Flora Indica*; or descriptions of Indian Plants 2: 376–378. 1824, *Nova Genera et Species Plantarum* (quarto ed.) 7: 70. 1824, *Prodr.* (DC.) 2: 644. 1825, *Prodromus Florae Nepalensis* 189. 1825, *Systema Vegetabilium*, editio decima sexta 4(Cur. Post): 48. 1827, *A Numerical List of Dried Specimens* no. 4328. 1830, *Hortus Suburbanus Calcuttensis* 347. 1845, *The Flora of British India* 1(3): 603–604. 1875

(Fruits purgative, emetic, diuretic.)

in English: English holly

in China: gao dong qing

in India: kumkum

***Ilex guayusa* Loes.**

Colombia, Ecuador, Peru. Tree, coriaceous leaves, fruit globose, tropical rain forest

See *Species Plantarum* 1: 125. 1753 and *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 78: 310. 1901, de Smet, P.A. “A multidisciplinary overview of intoxicating snuff rituals in the western hemisphere.” *J. Ethnopharmacol.* 13(1): 3–49. 1985, *Diabetes Res.* 10(2): 69–73. 1989, *AAU Reports* 24: 1–241. 1990, Lewis, W.H. et al. “Ritualistic use of the holly *Ilex*

guayusa by Amazonian Jívaro Indians.” *J. Ethnopharmacol.* 33(1–2): 25–30. 1991, *J. Ethnopharmacol.* 34(2–3): 293. 1991, *Ciba Found. Symp.* 185: 106–112; discussion 112–115. 1994 [Amazonian ethnobotany and the search for new drugs.], *Boissiera* 48: 1–306. 1994

(Stimulant and a morning stimulant, with high caffeine concentrations. Used for the traditional treatment of diabetes mellitus, emetic, kidney disorders, malaria, syphilis, stomach ache, expectorant, hypoglycemic, digestive. Suggested the presence of potentially useful antidiabetic agents in *guayusa*.)

in English: rainforest holly

in Ecuador: aguayusa, guañusa, guayusa, guayyusa, huayusa, wayusa

Ilex opaca Sol. (*Ilex opaca* Ait.)

North America. Evergreen perennial tree or shrub, glossy green alternate simple leaves with spiny margins, small white flowers, fruit a red berry or yellow

See *Species Plantarum* 1: 125. 1753, *Hortus Kewensis*; or, a catalogue ... 1: 169. 1789 and Rodrigues, T.D., Johnson, P.N., Jeffrey, L.P. “Hollyberry ingestion. Case report.” *Vet. Hum. Toxicol.*, 26: 157–158. 1984

(Ingested berries have been implicated in cases of poisoning of children. The symptoms included vomiting, nausea and diarrhea. Ilicin, a glycoside, has been implicated as the toxic substance in holly berries. Bark decoction as a wash for sores eyes; leaves infusion taken for sores and skin diseases, measles.)

in English: American holly, holly

in North America: American holly, white holly

Ilex paraguariensis A. St.-Hil. (*Ilex domestica* Reissek; *Ilex mate* A. St.-Hil.; *Ilex paraguensis* D. Don)

South America. Shrub or tree, evergreen, dioecious, leaves coriaceous, inflorescence an axillary fascicle, flowers small pedicellate, persistent calyx, fruit a reddish to blackish globose drupe, a variable species

See *Species Plantarum* 1: 125. 1753, *Memorias del Museo de Paraná* 9: 351. 1822 and Niklas, C.O. “Estudios embriológicos y citológicos en la Yerba Mate *Ilex paraguariensis* (Aquifoliaceae).” *Bonplandia* (Corrientes) 6: 45–56. 1987, *Clin. Nutr.* 24(3): 360–366. 2005 [Cardioprotective effects of *Ilex paraguariensis* extract: evidence for a nitric oxide-dependent mechanism.], *J. Separation Sci.* 29(18): 2780–2784. 2006 [Chemical composition of mate tea leaves (*Ilex paraguariensis*): a study of extraction methods.], *J. Ethnopharmacol.* 109(1): 60–71. 2007, *BMC Cancer.* 7: 57. 2007, *Food Chem. Toxicol.* 45(4): 649–655. 2007, *Cancer Lett.* 246(1–2): 268–273. 2007

(*Ilex paraguariensis* presents clinical data of efficacy in the treatment of obesity. The leaves contain caffeine which acts as a stimulant. Drinking of maté, coffee and tea may be risk

factors for bladder carcinoma; high risk of bladder cancer associated with maté drinking.)

Common names: maté, matte, yerba mate

in English: Brazilian tea, Paraguayan tea

in South America: arbol del mate, maté, té de los jesuitas, yerba matà, yerba mate

in Brazil: baguasu

Ilex umbellulata (Wall.) Loes. (*Ehretia umbellulata* Wall.; *Ilex godajam* (Colebr. ex Wall.) Wall. ex Hook. f. var. *sulcata* (Wall. ex Hook. f.) Kurz; *Ilex sulcata* Wall. ex Hook. f.; *Ilex sulcata* Wall.; *Ilex sulcata* Edwin; *Ilex umbellulata* Loes.; *Ilex umbellulata* var. *megalophylla* Loes.; *Pseudehretia umbellulata* Turcz.; *Pseudehretia umbellulata* (Wall.) Turcz.)

India. Tree, grey-white bark, elliptic leaves, flowers in umbels, globose fruits, young leaves used as vegetable

See *Flora Indica*; or descriptions of Indian Plants (Carey & Wallich ed.) 2: 344–345. 1824, *Numer. List* [Wallich] no. 4330. 1831, *Bulletin de la Société Impériale des Naturalistes de Moscou* 36: 607. 1863, *The Flora of British India* [J.D. Hooker] 1(3): 604. 1875, *Journal of the Asiatic Society of Bengal* 44(2): 158. 1875, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 218. 1897 and *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 78: 99. 1901, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 89(2): 272. 1908, *Mem. New York Bot. Gard.* 12(3): 141. 1965

(Bark decoction given in dysentery. Fruits juice given in stomach pain. Pounded roots used as fish poison. Veterinary medicine, crushed bark fed to the pigs to cure illness of pig.)

in China: san xu dong qing

in India: chap-alau, chek-nan, theng-pisuni, thing ui ha hni

Ilex verticillata (L.) A. Gray (*Ilex bronxensis* Britton; *Ilex fastigiata* E.P. Bicknell; *Ilex verticillata* (L.) A. Gray var. *cyclophylla* B.L. Rob.; *Ilex verticillata* (L.) A. Gray var. *fastigiata* (E.P. Bicknell) Fernald; *Ilex verticillata* (L.) A. Gray var. *padifolia* (Willd.) Torr. & A. Gray ex S. Watson; *Ilex verticillata* (L.) A. Gray var. *tenuifolia* (Torr.) S. Watson; *Prinos verticillata* L.)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 125, 330. 1753, *A Manual of the Botany of the Northern United States*. Second Edition 264. 1856 and *Taxon* 25: 155–164. 1976, *Regnum Veg.* 127: 79. 1993

(Stimulant, emetic, cathartic, astringent, for gastrointestinal disorders, diarrhea, biliousness; compound decoction of roots taken for hay fever. Ceremonial, hallucinogen.)

in English: black alder, common winterberry, winterberry

Ilex vomitoria Ait. (*Ilex cassine* Walter non L.)

North America. Perennial evergreen shrub or small tree, small axillary white flowers, fruit a red or rarely yellow berry

See *Hortus Kewensis*; or, a catalogue ... 1: 170. 1789

(Ingested berries have been implicated in cases of toxicity; the symptoms included vomiting, nausea and diarrhea. Used as hallucinogen.)

in North America: cassena, cassina, thé des Apalaches, yaupon

Illicium L. Illiciaceae (Schisandraceae)

From the Latin *illicium* (*inl-*), *ii* (*illicio*, *lexi*, *lectum* ‘to allure, seduce’) ‘allurement, inducement’, referring to the aromatic scent of the fruits, of the essential oils, see *Systema Naturae*, Editio Decima 1042, 1050, 1370. 1759, *Histoire Naturelle des Végétaux. Phanérogames* 7: 444. 1839 and *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 7: 15. 1947, *Flora Reipublicae Popularis Sinicae* 30(1): 271. 1966, *Botaničeskij Žurnal* (Moscow & Leningrad) 78(7): 2. 1993, *Tr. Fl. Sabah and Sarawak* 1: 227. 1995. *Illiciaceae* are considered closely allied to *Schisandraceae*. *Illiciaceae* and *Schisandraceae* are allies of *Winteraceae*. Based on analysis of nucleotide sequences from the plastid *rbcL* gene, however, M.W. Chase et al. and Qiu, Y.L. et al. concluded that *Illiciaceae* and *Schisandraceae* are closely allied and closely related to *Austrobaileyaceae* but distant from *Winteraceae*.

***Illicium anisatum* Linnaeus**

China.

in Vietnam: bat giac hoi huong, hoi

Illigera Blume Hernandiaceae

After the German naturalist Johann Carl Wilhelm Illiger, 1775–1813, zoologist, author of J.K.W. Illiger's *Versuch einer systematischen vollständigen Terminologie für das Thierreich und Pflanzenreich*. Helmstädt 1800 and *Prodromus systematis mammalium et avium*. Berolini 1811, see *Bijdragen tot de flora van Nederlandsch Indië* 17: 1153. 1826–1827.

Illigera appendiculata Blume

Indonesia. Scandent shrubs, climber, alternate trifoliate leaves, flowers in panicles, butterfly-shaped fruits broadly winged

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827

(For boils in the groin, pound the leaves and poultice.)

Malay name: akar perah, jelor kait

Illigera aromatica S.Z. Huang & S.L. Mo

Indonesia. Species related to *Illigera henryi* W.W. Smith

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827 and *Guihaia* 5(1): 17–18, f. 1–4. 1985

(Stems used for treating rheumatic arthralgia, cough, indigestion, and injures.)

in China: xiang qing teng

Illigera celebica Miquel (*Illigera platyandra* Dunn; *Illigera yaoshanensis* K.S. Hao)

Indonesia. Related to *Illigera parvifolia* Dunn.

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827, *Ann. Mus. Bot. Lugd.-Bat.* 2: 215. 1866 and *Journal of the Linnean Society, Botany* 38(266): 296–297. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 42(1071–1080): 84. 1937

(Roots and stems antiinflammatory, for relieving pain from rheumatism, headaches and foot pain.)

in China: kuan yao qing teng

Illigera cordata Dunn

SE Asia.

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827 and *J. Linn. Soc., Bot.* 38(266): 296. 1908

(Veterinary medicine, roots are used medicinally as a tonic for cattle.)

in China: xin ye qing teng

Illigera grandiflora W.W. Smith & Jeffrey (*Illigera grandiflora* var. *grandiflora*; *Illigera grandiflora* var. *microcarpa* C.Y. Wu; *Illigera grandiflora* var. *pubescens* Y.R. Li; *Illigera villosa* C.B. Clarke f. *subglabra* Kubitzki)

China.

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827 and *Notes Roy. Bot. Gard. Edinburgh* 8(38): 189–190. 1914, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 89(2): 171. 1969

(Roots and stem for treating traumatic injuries.)

in China: da hua qing teng

Illigera parviflora Dunn

China.

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827 and *J. Linn. Soc., Bot.* 38(266): 296. 1908

(Roots for treating rheumatic arthralgia and the leaves as a decongestant.)

in China: xiao hua qing teng

Illigera rhodantha Hance var. *rhodantha* (*Illigera petelotii* Merrill; *Illigera rhodantha* var. *angustifoliolata* Y.R. Li; *Illigera rhodantha* var. *orbiculata* Y.R. Li)

China.

See *Bijdragen tot de flora van Nederlandsch Indië* 1153. 1826–1827, *Journal of Botany, British and Foreign* 21(11): 321. 1883 and *Journal of the Arnold Arboretum* 23(2): 165. 1943, *Acta Phytotaxonomica Sinica* 17(2): 76, pl. 2, f. 7. 1979

(The stems and leaves are used medicinally for rheumatism, injuries from falls and for paralysis, etc.; the leaves are also used to treat conjunctivitis.)

in China: hong hua qing teng

Impatiens L. Balsaminaceae

Latin *impatiens*, *entis*, referring to the sudden and violent dehiscence of the capsules; see Carl Linnaeus, *Species Plantarum*. 2: 937–938. 1753 and *Genera Plantarum*. Ed. 5. 403. 1754, *The Gardeners Dictionary ... Abridged ...* fourth edition 1754, *Flora Carniolica*, Editio Secunda 2: 183.

1772, *Journal of the Linnean Society, Botany* 22(148): 454–455. 1886 [1887] and *Icones Plantarum* 10: pl. 2955. 1910, *Bulletin Trimestriel de l'Académie Malgache*, n.s., 10: 22–23. 1927, *Fieldiana, Bot.* 24(6): 275–277. 1949, *Ann. Impatiens apalophylla J.D. Hooker (*Impatiens clavigera* var. *auriculata* S.H. Huang)

China.

See *Nouvelles archives du muséum d'histoire naturelle* 10: 243. 1908, *Acta Botanica Yunnanica* 25(3): 277, pl. 9, f. 18. 2003

(Whole plant for treating irregular menstruation, injuries, and trauma.)

in China: da ye feng xian hua

Impatiens arguta J.D. Hooker & Thomson (*Impatiens arguta* var. *bulleyana* J.D. Hooker; *Impatiens gagei* J.D. Hooker; *Impatiens namchabarwensis* R. Morgan, Y.M. Yuan & X J. Ge; *Impatiens taliensis* Lingelsheim & Borza)

China. Perennial herb, purple or violet flowers solitary or in clusters

See *J. Linn. Soc., Bot.* 4: 137. 1860 and *Hooker's Icones Plantarum* 29, pl. 2875. 1908, *Hooker's Icones Plantarum* 32: pl. 2951. 1911, *Repertorium Specierum Novarum Regni Vegetabilis* 13: 388. 1914, *Curtis's Botanical Magazine* (Incorporating *The Kew Magazine*) 22(4): 205–208, pl. 537 & f. 1. 2005

(Seed oil for pains in joints. Flowers diuretic, analgesic, for abdominal pain, postpartum blood stasis, carbuncles and difficulty in urination; flower juice used as eye drop in eye diseases.)

in India: yemchee

Impatiens brachycentra Kar. & Kir. (*Impatiens parviflora* DC. var. *brachycentra* (Kar. & Kir.) B. Fedtsch.)

India, China.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 687. 1824, *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 179. 1842 and *Taxon* 24: 501–516. 1975

(Plant juice emetic, cathartic, diuretic, taken for gonorrhoea. Leaves poultice in burns, scalds, wounds. Flowers applied on burns.)

in China: duan ju feng xian hua

in India: chaula, phlee, pylee

Impatiens chinensis Linnaeus (*Impatiens cosmia* J.D. Hooker; *Impatiens crassicornu* J.D. Hooker)

China. Herb, rose-purple flowers

See *Species Plantarum* 2: 937. 1753 and *Icones Plantarum* 30, pl. 2915. 1910

(Whole plant for relieving fever and pain, promoting blood circulation, treating diarrhea and gonorrhoea, curing urinary infections and healing carbuncles, burns.)

in China: hua feng xian

in India: pylee, vashtla

Impatiens clavigera J.D. Hooker (*Impatiens claviger* Hook. f.)

China.

See *Icones Plantarum* 29: pl. 2863. 1908

(Whole plant for treating carbuncles and injuries of the skin.)

in China: bang feng xian hua

Impatiens cyanantha J.D. Hooker

China.

See *Hooker's Icones Plantarum* 29: pl. 2866. 1908

(Whole plant for treating injuries and snakebites.)

in China: lan hua feng xian hua

Impatiens glandulifera Royle (*Impatiens glandulifera* Arn.; *Impatiens royleana* Payer; *Impatiens roylei* Walp.; *Impatiens roylei* Klotzsch)

India, Himalaya. Herb, edible seeds

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 151, t. 28, f. 2. 1835, *Companion Bot. Mag.* 1: 322. 1836, *Repertorium Botanices Systematicae*. [Walpers] 1: 475. 1842, *Bot. Ergebn. Reise Waldemar* 121. 1862 and *Rerum Nat. Univ. Comenianae, Bot.* 23: 1–23. 1974, *Rerum Nat. Univ. Comenianae, Bot.* 26: 1–42. 1978, *Taxon* 28: 400–401. 1979, *Acta Biol. Cracov., Ser. Bot.* 25: 57–77. 1983, *Bot. Žurn.* (Moscow & Leningrad) 74: 120–123. 1989, *Verh. Zool.-Bot. Ges. Wien* 129: 215–226. 1992, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Root juice used in hematuria; seeds diuretic.)

Impatiens hawkeri Bull

New Guinea. Herb, perennial, decumbent to erect, fleshy stems, leaves in whorls, flowers solitary, capsule fusiform, in moist places, in montane or submontane forests, along stream and river margins, a very variable showy species

See *Gardener's Chronicle & Agricultural Gazette* 1: 761, f. 168. 1886 and *Taxon* 31: 365–366. 1982, *Canadian Journal of Botany* 62: 2630–2635. 1984

(Whole plant cooked and eaten by children with stomach-ache; the cut surface of the stem should be applied to the umbilicus when it is severed. Leaves eaten to promote pregnancy; young leaves chewed to induce labor. Mixed with leaves of *Plectranthus scutellarioides* (L.) R.Br. (*Coleus scutellarioides*), leaves rubbed on the stomach of pregnant women to help relieve labor pains. Magic, ritual.)

in Papua New Guinea: imda, kolumbata, nagatumo

Impatiens hochstetteri Warb. subsp. ***hochstetteri*** (*Balsamina capensis* DC.; *Impatiens biflora* Walter; *Impatiens capensis* Bojer, nom. illeg.; *Impatiens capensis* Thunb., nom. illeg.; *Impatiens capensis* Meerb.; *Impatiens duthieae* Bolus; *Impatiens formula* Baker; *Impatiens fulva* Nutt.; *Impatiens gilgii* T.C.E. Fr.; *Impatiens marlothiana* G.M. Schulze; *Impatiens micrantha* Hochst.; *Impatiens nolitangere* L. subsp. *biflora* (Walter) Hultén; *Impatiens nortonii* Rydb.; *Impatiens tenella* R. Br.)

South Africa, North America. Annual herb

See *Species Plantarum* 2: 937–938. 1753, *Meerb. Afbeel. Gew.* pl. 10. 1775, *Prodromus Plantarum Capensium*, ... 41. 1794, *Journal of the Linnean Society, Botany* 20: 114–115. 1883, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 48. 1895 and *Taxon* 31(2): 344–360, 365–366. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Kochia* 3: 55–60. 2008

(Stem decoction taken to ease childbirth; poultice of stems for skin diseases, sore or raw eyelids, rashes, analgesic. Plant's juice of *Impatiens capensis* relieves the symptoms of poison ivy; a decoction taken for kidney problems and dropsy; plant infusion taken for fevers.)

in English: impatience, jewel weed, jewelweed, lady's earrings, orange balsam, orange jewelweed, orange touch-me-not, spotted snap-weed, spotted touch-me-not

Impatiens loulanensis J.D. Hooker

China.

See *Hooker's Icones Plantarum* 30: pl. 2953. 1911

(Whole plant for treating injuries, trauma and snakebites.)

in China: lu nan feng xian hua

Impatiens pallida Nutt.

North America. Annual herb

See *The Genera of North American Plants* 1: 146. 1818 and *Taxon* 31: 365–366. 1982

(Plant's juice relieves the symptoms of poison ivy, rubbed on sores, rash and eczema; plant infusion for fever, taken to induce childbirth. Leaves antiinflammatory.)

in English: jewelweed, pale-snapdragon, pale touch-me-not, yellow-touch-me-not

Impatiens platypetala Lindley (*Balsamina sumatrana* Miq.)

Southeast Asia. Herb, erect or decumbent, leaves whorled, flowers solitary, capsule fusiform, a variable species, in lowland and montane forest, along streams, in damp localities, forest clearings

See *Journal of the American Society for Horticultural Science* 112: 1026–1031. 1987, *Occasional Papers*,

Kagoshima University Research Center for the South Pacific
16: 11–14. 1989

(Leaves used for poulticing skin problems, and as a diuretic for children.)

in Indonesia: pacar banyu, pacar leuweung, pacar tere

Impatiens pritzelii J.D. Hooker (*Impatiens pritzelii* var. *hupehensis* J.D. Hooker; *Impatiens pritzelii* var. *hupehensis* Hook. f.; *Impatiens tubulosa* Hemsley f. *multiflora* E. Pritzel ex Diels, nom. nud.)

China.

See *Nouvelles archives du muséum d'histoire naturelle* 10: 243. 1908

(Roots and stem to improve circulation, reduce swelling, stop bleeding, alleviate pain, and to treat injuries, trauma, and dysentery.)

in China: hu bei feng xian hua

Impatiens racemosa DC. (*Impatiens microsciadia* Hook. f.; *Impatiens racemosa* var. *racemosa*)

China, India.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 688. 1824 and *Records of the Botanical Survey of India* 4(2): 16, 21. 1905, *Bot. J. Linn. Soc.* 109: 247–257. 1992, *Acta Phytotax. Geobot.* 48: 7–14. 1997

(Leaves and roots paste mixed with mustard oil applied for rheumatic pains.)

Impatiens scabrída DC. (*Impatiens praetermissa* Hook. f.)

India, Himalaya. Herb, edible seeds

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 687. 1824 and *Journal of the Linnean Society, Botany* 39: 29. 1904, *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 3: 39. 1976, *Bot. J. Linn. Soc.* 109: 247–257. 1992

(Mucilaginous extract used as a wash to stimulate growth of hair.)

in China: cao mao feng xian hua

in India: bantil, tillua

Impatiens scapiflora B. Heyne (*Impatiens scapiflora* B. Heyne ex Roxb.; *Impatiens scapiflora* Wight & Arn.; *Impatiens scapiflora* Hook.)

India.

See *Fl. Ind.*, ed. Carey & Wall. ii. 464. 1824, *Prodr. Fl. Ind. Orient.* 1: 137, partim. 1834, *Bot. Mag.* 64: t. 3587. 1837 and *Taxon* 25: 155–164. 1976, *Proc. Indian Sci. Congr. Assoc.* 63: 129–130. 1976, *Cytologia* 45: 233–239. 1980

(Leaves and flowers made into a paste consumed for colds, giddiness and leucoderma.)

in India: aathumanivaattipatchilai

Impatiens sicutifer J.D. Hooker

China.

See *Nouvelles archives du muséum d'histoire naturelle* 10: 246. 1908

(Stem febrifuge, to remove toxic materials from the body, disperse phlegm, alleviate pain and to treat injuries and burns.)

in China: huang jin feng

Impatiens stuhlmannii Warb. (*Impatiens declercqii* De Wild.; *Impatiens intermedia* De Wild.; *Impatiens semlikiensis* De Wild.; *Impatiens seretii* De Wild.)

East Africa. Scrambling bush, flowers bright red

See *Die Pflanzenwelt Ost-Afrikas* C: 254. 1895 and *Mission Emile Laurent* i. 384, 385. 1907, *Plantae Bequaertianae* 1: 359, 364. 1922

(Wound healing.)

Impatiens sulcata Wall. (*Impatiens gigantea* Edgew.)

India, Nepal, Himalaya. Herb, oily seeds eaten raw

See *Flora of India*: Ser. 2 [ed. Carey & Wall.] 2: 458. 1824 and *Bot. J. Linn. Soc.* 109: 247–257. 1992

(Seeds eaten for indigestion and in the treatment of burns.)

in China: cao jing feng xian hua

in India: fyaktuli, gulumendi, kol

Impatiens tripetala Roxb.

India, Himalaya.

See *Taxon* 29: 360–361. 1980

(Root juice in hematuria.)

Impatiens walleriana Hook. f. (*Balsamina balsamina* (L.) (Used in Ayurveda, Unani and Sidha. Whole plant taken as emetic, diuretic, cathartic. Crushed leaves and stem applied as a poultice to clean new wounds. Stem and seeds used for promoting blood circulation, and for relieving pain and sore throats, dystocia, amenorrhea, dysphagia. Powdered seeds of *Impatiens balsamina* and *Cassia tora* mixed and used for normal delivery. Flowers tonic, cooling, emetic, mild laxative, applied to burns and scalds. Roots and leaves for wounds, burns; a decoction of the root and base of stalk drunk to treat cough and asthma. Ceremonial plant.)

in English: balsam weed, busy Lizzie, garden balsam, patience plant, patient Lucy, rose balsam, sultana, touch-me-not, wrapped hand, Zanzibar balsam

in Bali: bungan pacah

in Brunei: banga pacar, bungar pecar

in Burma (Myanmar): dau dalet

in China: feng hsien, feng xian, feng xian hua, jixingzi, su dan feng xian hua

in India: aivartenkittumpai, aivartyenki, basavana paadadagida, basavanapaada, chilaka mukka puvvu, chirido, dopati, dupati, gowri hoo gida, gowri hoovina gida, gowri hoovu, gul-mehndi, gul-mendi, gulemendi, gulmehndi, gulumendi, haragura, kaasithummi, kacit-tumpai, kacittumpai, karna kundala, karnakundala, kasi tummi, khujang, kopurat-tumpai, kulin, manjrya, mehndi, mehndi, mudda gorinta, onon, phyaktuli, rojari, tairini, terada, thotta chinungi, tilo-onapu, timadia, tiwda, tucapattiri, uropantikai, uropantikaiceti, utakatacceti, utakatam

in Indonesia: laka gofu, pacar, pacar air, pacar banyu, semangkak

in Japan: hosenka, tinsagu

in Malaysia: bungatabo, inai ayer, keembong

in Nepal: tiure

(Whole plant for the treatment of injuries.)

in China: liang tou mao

Indigofera L. Fabaceae (Indigofereae)

The generic name from *indigo*, a blue dye, and Latin *fero* 'I bear, to bear'; *indigo* derived from the Latin *indicus*, a, um 'of India, Indian', *indicum*, i 'indigo' (Plinius), a source of indigo, which is used to dye textiles blue; see Carl Linnaeus, *Species Plantarum*. 2: 751. 1753, *Genera Plantarum*. Ed. 5. 333. 1754, A. de Théis, "Spiegazione etimologica de' nomi generici delle piante." tratta dal *Glossario di botanica* di A. de Théis. Vicenza 1815, *Niger Fl.* 293. 1849, *Flora Capensis* 2: 201. 1862, *Genera Plantarum* 1: 494. 1865 and *Kew Bulletin*, Additional Series 1: 18, 33, 39, 50, 52, 56, 69. 1958, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 2: 577, 580. Bologna 1980, *Advances in Legume Systematics* 7: 222, 224, 227, 229–230. 1995, *Kew Bulletin* 53: 651–668. 1998.

Indigofera angustifolia L. (*Anila angustifolia* (L.) Kuntze; *Indigofera angustifolia* Blanco; *Indigofera angustifolia* Curtis; *Indigofera angustifolia* Perrottet ex DC.; *Indigofera angustifolia* Thunb.)

South Africa. Perennial non-climbing shrub

See *Mantissa Plantarum* 2: 272. 1771, *Bot. Mag.* 13: t. 465. 1799, *Fl. Cap.* (Thunberg, ed. 2) 599. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 254. 1825, *Flora de Filipinas* [F.M. Blanco] 596. 1837, *Revisio Generum Plantarum* 159–938. 1891

(Used in Ayurveda.)

in India: nilini

Indigofera argentea Burm. f. (*Indigofera argentea* Wall.; *Indigofera argentea* Buch.-Ham. ex Roxb.; *Indigofera argentea* Blanco; *Indigofera burmannii* Boiss.; *Indigofera semitrijuga* Forssk.; *Indigofera semitrijuga* sensu Baker; *Indigofera semitrijuga* sensu Baker var. *tetrasperma* DC.)

India, Ethiopia. Perennial non-climbing shrub

See *Flora Indica ... nec non Prodromus Florae Capensis* (N.L. Burman) 171. 1768, *Mantissa Plantarum* 2: 273. 1771, *Fl. Aegypt.-Arab.* 137. 1775, *Hortus Bengalensis*, or a catalogue ... 57. 1814, *A Numerical List of Dried Specimens* n. 5455. 1831, *Flora de Filipinas* ed. 2 [F.M. Blanco] 415. 1845, *Fl. Orient.* [Boissier] 2: 187. [Dec 1872 or Jan 1873]

(Used in Ayurveda. Roots and leaves bitter and tonic; seeds anthelmintic.)

in English: surat indigo, wild indigo

in India: aramuri, ellam-habut, hawir, houer, iruppumuri, kalaklitaka, karneeli, karunili, kataveri, kattavuri, kondanili, neel, neelo-bakerio, nil, Nile, Nileh, nili, peddanili, sabagh, surmai-neel, surmainil

Indigofera arrecta A. Rich. (*Indigofera arecta* A. Rich.; *Indigofera arrecta* Hochst. ex A. Rich.; *Indigofera arrecta* Benth. ex Harv.; *Indigofera kisantuensis* De Wild. & T. Isles* 1913, iii. 419. 1914, *Taxon* 28: 276–277. 1979

(Plant astringent, for diarrhea. Roots for toothache, a decoction for cough; root powder for pain in the chest.)

in English: hairy indigo

in Madagascar: angitratainakoho, arivongo, famafasambo, patry, sarivoanjo, takotsifotra, tsiasotry

in Nigeria: kaikayi kwanda mashekiya

in Tanzania: isekeseke

in India: boo-awari, chota sirphonka, dagadia

Indigofera atriceps Hook.f. (*Indigofera alboglandulosa* Engl.; *Indigofera atriceps* Hook.f. subsp. *alboglandulosa* (Engl.) J.B. Gillett; *Indigofera djalonica* A. Chev. ex Baker f.; *Indigofera masukuensis* Baker; *Indigofera setosissima* Harms var. *major* Cronquist)

Tropical Africa. Annual non-climbing herb, woody, shrubby, trailing, straggling, hairy stems, flowers red-pink-purple, pods glandular, savanna woodland, in open areas, grassland

See *Journal of the Linnean Society, Botany* 7: 190. 1864 and *Opera Botanica* 121: 159–172. 1993

(Oxytotic, leaves juice or infusion. Leaves decoction for epilepsy. Veterinary medicine.)

in Burundi: umuturambura, umuturuka, umuturumbura, umwarara

Indigofera atropurpurea Buch.-Ham. ex Hornem. (*Indigofera atropurpurea* Sessé & Moc.; *Indigofera atropurpurea* Roxb.; *Indigofera atropurpurea* Buch.-Ham. ex Roxb., nom. illeg.; *Indigofera cavaleriei* H. Lév.)

India, Nepal, Himalaya. Perennial non-climbing tree, flowers pickled or cooked as vegetable

See *Hort. Bengal.* 57. 1814, *Hortus Regius Botanicus Hafniensis* Suppl.: 152. 1819, *Flora Indica*; or, descriptions of Indian Plants 3: 381. 1832, *Naturaleza* [Sociedad mexicana de historia natural], ser. 2, 1, app. 125. 1889 and *Repertorium Specierum Novarum Regni Vegetabilis* 12(317–321): 190. 1913

(Flowers infusion given to treat diarrhea and dysentery.)

in China: shen zi mu lan

in India: bankati, kala, sakana, sakena

in Nepal: sagino

Indigofera brevidens Benth.

Australia, New South Wales. Ground cover plant, purple flowers

See *Journal of an Expedition into the Interior of Tropical Australia* 385. 1848

(Roots used to poison fish in fresh or salt water.)

in Australia: desert indigo, widji

Indigofera buchananii Burt Davy

South Africa. Perennial non-climbing shrub

See *Bulletin of Miscellaneous Information Kew* 1921(2): 49–52. 1921

(Supposed to be poisonous to livestock.)

Indigofera cassioides DC. (*Anila pulchella* (Roxb.) Kuntze; *Anila pulchella* Kuntze; *Indigofera arborea* Roxb.; *Indigofera arborea* Gagnep.; *Indigofera byansghatensis* S.N. Haines; *Indigofera purpurascens* Roxb.; *Indigofera violacea* Roxb.)

India. Perennial non-climbing shrub, undershrub, flowers and tender fruits eaten as vegetable

See *Hort. Bengal.* 57, 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 225. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 380. 1832, *Revisio Generum Plantarum* 1: 160. 1891 and *Notul. Syst.* (Paris) 3: 117. 1915, *Indian J. Forest.* 6(4): 318. 1984 [1983 publ. 1984]

(Used in Ayurveda. Powdered stem bark in toothache and drunk against night pollution. Root decoction for cough; powdered root applied for chest pain; roots ground in water with dried ginger and black peppers and the solution is taken as a treatment for stomach troubles; roots of this plant and those of *Andrographis paniculata* and *Smilax* sp. in hematuria. Leaves decoction for epilepsy, cough and cold; leaves paste applied for chest pain; inhalation of leaves smoke helps to reduce piles; leaf juice applied to treat cuts and wounds. A traditional remedy through plant wreath, children wearing fruit as a charm against fever.)

in China: tuo yuan ye mu lan

in India: baroli, bholori, billod, boga, chennaata, chili, chimanati, chirmati, dare huter, gerli, gibri, giral, girel, girghol, girili, girli, girliphul, gogge, goggi, hakna, hatar, hikpi, hutar, jerul, jheli, jhurhur, jirahul, jirhul, jirul, junglinil, kali kathi, kanthi, karkandi, kathi, kathi mattu, kathie, kathu, kilberi, lili bichi, manali, narina, narinci, narinji, neel, neem, nerdi, nil, sakena, sakina, saknya, sam nabat, siralli, sirli, togri, utar, uterr, vreda, vuyye

in Nepal: phusre ghans

Indigofera cinerascens Franch. (*Indigofera cinerascens* Eckl. & Zeyh.; *Indigofera cinerascens* DC.)

China. Small shrub

See *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 226. 1825, *Enumeratio Plantarum Africae Australis Extratropicae* 241–242. 1836, *Plantae Delavayanae* 153–154. 1889

(Leaves for bronchitis and fevers. For snakebite and stings, leaves, stems, roots, decoction or infusion. Veterinary medicine.)

Indigofera coerulea Roxb. (*Indigofera articulata* sensu Andrews; *Indigofera caerulea* Roxb.)

India, Sahel, Mali. Perennial non-climbing shrub, herb, silvery hairs, flowers white or golden-brown hairy, inflorescence an axillary sessile many-flowered raceme, in sub-desert and *Acacia-Commiphora* bushland, confused with *Indigofera articulata*

See *Hortus Bengalensis*, or a catalogue ... 57. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 377. 1832

(Used in Ayurveda. Fresh leaves paste a remedy in snakebite, jaundice. Leaves and roots applied as a wound dressing. An extract of the leaves drunk against constipation. Leaf juice for blindness, applied as a wash against infected eyes.)

in English: indigo

in India: neel, neeliavuri, nilika, vannanayuruvi

in Tanzania: mnili

Indigofera colutea (Burm. f.) Merr. (*Galega colutea* Burm. f.; *Galega colutea* Willd.; *Indigofera chuniana* F.P. Metcalf;

(Crushed roots to induce sleep, roots also placed under the pillow.)

in China: shu hua mu lan

in India: murthiveeru

Indigofera cordifolia Roth (*Anila cordifolia* (B. Heyne ex Roth) Kuntze)

Sudan, India. Annual non-climbing herb

See *Novae Plantarum Species* 357. 1821, *Revisio Generum Plantarum* 1: 159–160. 1891 and *Blumea* 30 (1): 89–151. 1984, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994, *J. Econ. Taxon. Bot.* 19: 235–250. 1995

(Leaves for inflammation and swellings in the mouth. Seeds and leaves nutritive, tonic, hepatoprotective.)

in China: xi xin mu lan

in India: bojisari, gokhru, vekriauas

Indigofera cylindracea Baker (*Indigofera cylindracea* Graham ex Baker; *Indigofera cylindracea* Graham, nom. nud.; *Indigofera heterantha* Brandis var. *longipedicellata* Thoth.)

India, Nepal, Himalaya. Perennial non-climbing shrub, flowers are pickled

See *A Numerical List of Dried Specimens* [Wallich] n. 5482. 1831, *The Flora of British India* 2(4): 99. 1876

(Leaf juice applied for boils and pimples.)

in China: tong guo mu lan

in Nepal: sakhino

Indigofera dendroides Jacq. (*Indigofera dalabaca* A. Chev.; *Indigofera kengeleensis* De Wild.; *Indigofera sesbaniifolia* A. Chev.)

Tropical Africa. Annual non-climbing herb, shrub to subshrub, red-pinkish flowers, infructescence pendulous

See Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Icones Plantarum Rariorum Vindobonae*: C.F. Wappler, 1781–1793 and *Bull. Soc. Bot. France* 58(Mém. 8d): 157. 1912 [1911 publ. 1912], *Explor. Bot. Afrique Occ. Franc.* i. 172. 1920, *Bull. Jard. Bot. État Bruxelles* 8: 152. 1923

(Fruits and leaves for skin diseases, eye inflammation, yaws.)

in Tanzania: omusololo

Indigofera dosua D. Don (*Indigofera dosua* Wall.; *Indigofera dosua* Buch.-Ham. ex D. Don; *Indigofera polyphylla* DC.; *Indigofera polyphylla* Heyne ex Wight & Arn.; *Indigofera virgata* Roxb., nom. nud.; *Indigofera virgata* DC.)

Nepal, India, Himalaya. Perennial non-climbing shrub, pinkish flowers in axillary racemes, cylindrical pods pointed downwards, sour flowers pickled or cooked as vegetable, fodder

See *Hortus Bengalensis*, or a catalogue ... 57. 1814, *Prodromus Florae Nepalensis* 244. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 224, 227. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 5481. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 202. 1834, *FBI* 2: 102. 1876

(Bark paste applied on forehead to relieve headache.)

in China: dian xi mu lan

in India: bujir, buthi, duli

in Nepal: phusre ghans

Indigofera frutescens L.f. (*Indigofera cylindrica* DC.)

South Africa. Perennial non-climbing shrub, small tree, flowers pink, at edge of bush

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 226. 1825

(Roots bark decoction anthelmintic.)

Indigofera glabra L. (*Indigofera fragrans* Retz.; *Indigofera glabra* S.S. Chien, nom. illeg.; *Indigofera pentaphylla* Murray)

SE Asia, India. Perennial non-climbing herb

See *Species Plantarum* 2: 751. 1753 and *Contr. Biol. Lab. Chin. Assoc. Advancem. Sci., Sect. Bot.* 8: 130. 1932

(Leaves febrifuge, emollient, bitter, tonic.)

in India: neela balli

Indigofera glandulosa Wendl. var. ***glandulosa*** (*Indigofera glandulosa* Roxb.; *Indigofera glandulosa* Willd.; *Psoralea leichardtii* F. Muell.)

India. Perennial non-climbing shrub, erect woody herb, hairy flat pods

See *Botanische Beobachtungen* 55. 1798, *Species Plantarum*. Editio quarta 3(2): 1227. 1802, *Hortus Bengalensis*, or a catalogue ... 57. 1814

(Plant and seeds nutritive, tonic, for liver affections. Fruit powder taken to relieve stomachache. Seeds used as tonic.)

in Tibetan: ni la, ram-pa

Indigofera trifoliata L. (*Indigofera glandulifera* Hayata, nom. illeg.; *Indigofera glandulifera* Page ex Steudel; *Indigofera multicaulis* DC.; *Indigofera prostrata* Perrottet ex DC.; *Indigofera prostrata* (L.) Domin, nom. illeg.; *Indigofera prostrata* Willd.; *Indigofera prostrata* Roxb.; *Indigofera prostrata* Klein ex Wight & Arn.; *Indigofera trifoliata* L. var. *angustata* Miq.; *Indigofera trifoliata* L. var. *liukiensis* Matsum.)

Philippines, India. Perennial non-climbing shrub

See *Centuria II. Plantarum ...* 29. 1756, *Species Plantarum*. Editio quarta 3(2): 1226. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 223, 228. 1825, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 204. 1834, *Nomenclator Botanicus*. Editio secunda 1(7): 807. 1840 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 74. 1911, *Bibliotheca Botanica* 89: 187. 1926

(Whole plant nutritive, tonic, used in rheumatism, leucorrhoea; seeds restorative.)

in English: deep indigo

in India: barabeda, baragadam, baragadan, janglimethi, kathi, lalmeti, miripindi, ratimethi, vekari, vekaria

in Japan: mitsu-ba-no-koma-tsunagi, naha-eboshi-gusa

Indigofera trita L.f. (*Galega frutescens* Mill.; *Indigofera carinata* De Wild.; *Indigofera heterophylla* C. Presl; *Indigofera jamaicensis* Spreng.; *Indigofera laevis* Rydb.; *Indigofera macilenta* Standl.; *Indigofera mucronata* Spreng. ex DC., nom. illeg.; *Indigofera mucronata* Sessé & Moc., nom. illeg.; *Indigofera mucronata* Lam.; *Indigofera oxycarpa* Desv.; *Indigofera quartiniana* A. Rich.; *Indigofera rosei* Rydb.; *Indigofera scabra* Roth; *Indigofera subulata* Griseb.; *Indigofera tephrosioides* Micheli; *Tephrosia frutescens* (Mill.) DC.)

India. Perennial non-climbing shrub

See *Supplementum Plantarum* 335. 1781[1782], *Encyclopédie Méthodique, Botanique* 3(1): 247–248. 1789, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 3: 79. 1814, *Novae Plantarum Species* 359–360. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 227. 1825, *Systema Vegetabilium*, editio decima sexta 3: 277. 1826, *Flora Mexicana* 173. 1894 and *Kew Bulletin* 5(3): 352. 1950[1951], *Taxon* 28: 276–277. 1979, *Blumea* 30(1): 140. 1984

(Used in Sidha. Crushed leaves infusion given for headache. Seeds tonic nutritive. Root paste to the children suffering from dysentery. Stem twigs chewed for gums and teeth. Veterinary medicine, roots along with stem bark of *Balanites aegyptiacus*, stem of *Cissus quadrangularis* and *Tinospora cordifolia* pounded and the extract given in impaction.)

in Madagascar: lainDRAMOTIO, lainDRAMOTIOLAHY, rainDRAMOTIO

in Tanzania: mchekecheka

in India: adbaugali, caupancam, caupancanam, cavupancam, cavupancanam, ciranattam, cuvetakam, cuvetamarucu, jidi vempali, kandaram, kantaram, kattavuri, kuttukkar-chammatti, kuttukkar chammatti, kattumurunkai, kattuvellakikam, kattuvellakikamaram, kattuyaviuri, malaimurunkai, maticikkuru, nakkanam, nakkanaaru, nakkannaru, palacam, punal murunkai, punalmurangai, punalmurunkai, punalmurunkaimaram, punamurunkai, saubanjam, tavayam, tavayamaram, thoremanthi neeli, ticamurunkai, tittam, toremenhi, torementi, vajradanti, vankamnirri, vankamnittimaram, vekhario, wal-awari

Indigofera wightii Wight & Arn. (*Indigofera cinerascens* Eckl. & Zeyh.; *Indigofera cinerascens* Franch.; *Indigofera cinerascens* DC.; *Indigofera hainanensis* H.T. Tsai & T.T. Yu; *Indigofera inamoena* Thwaites; *Indigofera pallida* Craib; *Indigofera wightii* Graham, nom. nud.; *Indigofera wightii* Graham ex Wight & Arn.)

India, Sri Lanka. Perennial non-climbing shrub, buds cooked and eaten

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 226. 1825, *A Numerical List of Dried Specimens* [Wallich] n. 5458. 1831, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 202. 1834, *Enumeratio Plantarum*

Africae Australis Extratropicae [Ecklon & Zeyher] 2: 241–242. 1836, *Enumeratio Plantarum Zeylaniae* [Thwaites] 2: 83. 1859, *Plantae Delavayanae* 153–154. 1889 and *Bulletin of Miscellaneous Information Kew* 1927(2): 56–57. 1927, *Bulletin of the Fan Memorial Institute of Biology*: 7(1): 30–31. 1936

(Dried powdered leaves consumed for gastrointestinal problems; leaf juice taken for diarrhea and dysentery.)

in China: hai nan mu lan, hui se mu lan

in India: malaikolingi, paarainelli, sukku malali

Indigofera zeyheri Spreng. ex Eckl. & Zeyh. (*Anila zeyheri* (Spreng.) Kuntze var. *normalis* Kuntze; *Indigofera acutise-pala* Conrath ex Baker f.; *Indigofera acutise-pala* Baker f.; *Indigofera cinerascens* Eckl. & Zeyh., protologue; *Indigofera cinerascens* Franch., protologue; *Indigofera nana* Eckl. & Zeyh.; *Indigofera setulosa* Bertol.; *Indigofera stricta* L.f. var. *pedunculata* Eckl. & Zeyh.; *Indigofera viminea* E. Mey.)

South Africa. Non-climbing shrub

See *Enumeratio Plantarum Africae Australis Extratropicae* 241–242. 1836

(For colds, cuts, boils.)

in South Africa: leehout

Indopiptadenia Brenan Fabaceae (Mimosaceae, Mimoseae)

From India and the genus *Piptadenia* Benth., see *Kew Bulletin* 10(2): 178–179. 1955.

Indopiptadenia oudhensis (Brandis) Brenan (*Adenanthera oudhensis* sensu Kanjilal; *Piptadenia oudhensis* Brandis)

India, Nepal, Himalaya. Perennial non-climbing tree

See *Forest Fl. N. W. India* 168. 1874 and *Kew Bulletin* 10(2): 179. 1955

(Plant juice applied to treat cuts and wounds.)

in India: gainti, genti

in Nepal: mauli

Inga Miller Fabaceae (Ingeae, Leguminosae, Mimosaceae)

From the local Tupi-Guarani vernacular name, *ingá*; see Philip Miller (1691–1771), *The gardeners dictionary*. Abr. ed. 4. London (Jan.) 1754, *Introductio ad Historiam Naturalem* 298. 1777, *Species Plantarum*. Editio quarta 4(2): 1010–1011. 1806, *London Journal of Botany* 4: 579, 583–586, 590, 602, 604, 606–607, 609. 1845, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 473. 1852, *Transactions of the Linnean Society of London* 30(3): 625.

1875 and *Contr. U.S. Natl. Herb.* 18(5): 173–223. 1916, *Fl. Suriname* 2(2): 288–311. 1940, C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, *Annals of the Missouri Botanical Garden* 53(3): 289–290, 297–298, 302, 313–314, 319, 322. 1966, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. 277, 278, 285. National Academy Press, Washington, D.C. 1989, *Ann. Missouri Bot. Gard.* 80(1): 223–269. 1993.

Inga edulis Mart. (*Feuilleea edulis* (Mart.) Kuntze; *Inga benthamiana* Meisn.; *Inga edulis* var. *grenadensis* Urb.; *Inga minutula* (Schery) T.S. Elias; *Inga scabriuscula* Benth.; *Inga vera* Kunth; *Inga vera* sensu Brenan; *Inga vera* auct.; *Inga ynga* (Vell.) J.W. Moore; *Mimosa inga* Vell.; *Mimosa ynga* Vell.)

Tropical South America, Brazil. Perennial non-climbing tree, broad crown, curved branches, leaves with cup-shaped glands, white flowers pubescent, elongate legume, black seeds, white edible pulp, on river banks, along roadsides, in secondary forest

See *Species Plantarum* 1: 516. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 2*. 1754, *Flora Fluminensis* 11: t. 3. 1831, *Flora* 20(2): Beibl. 113–114. 1837, *Revisio Generum Plantarum* 1: 187. 1891 and *N. Amer. Fl.* 23(1): 1–76. 1928, *Annals of the Missouri Botanical Garden* 37(2): 184–314. 1950, *Ann. Missouri Bot. Gard.* 53(3): 265–359. 1966, *Phytologia* 14(4): 211. 1967, *Ann. Missouri Bot. Gard.* 80(1): 223–269. 1993

(Infusion of the toasted seeds effective as a vermifuge.)

in English: ice-cream bean, monkey tail

in Latin America: cipó, guaba, guaba(o), guaba de bejuco, guabilla, guama, guamo liso, guamo rabo de mono, guava, guavo, guavo machete, ingá, inga de macaco, inga macarrao, inga vipo, pacai guava, rujino shimbillo, shimbillo, waikey, waupa

Inga lateriflora Miq. (*Feuilleea lateriflora* (Miq.) Kuntze; *Inga parviflora* Benth.; *Inga parviflora* Spruce ex Benth.)

South America. Perennial non-climbing tree, narrowly winged rachis with orbicular sessile glands, axillary panicle, yellow flowers

See *Linnaea* 19: 131. 1847, *Transactions of the Linnean Society of London* 30(3): 602. 1875, *Revisio Generum Plantarum* 1: 188. 1891 and *Fl. Suriname* 2(2): 288–311. 1940, *Mem. New York Bot. Gard.* 15(1): 96–111. 1966, *Acta. Bot. Neerl.* 22(3): 193–205. 1973

(Bark infusion, with a pinch of salt, to bathe sores.)

in Guyana: shirada

Inga micheliana Harms (*Inga cobanensis* Pittier; *Inga davidsoniae* Standl.; *Inga flexuosa* Schldtl.; *Inga hintonii* Sandwith; *Inga nubigena* Ant. Molina; *Inga tuerckheimii* Pittier)

Inga Miller Fabaceae (Ingeae, Leguminosae, Mimosaceae)

Central America, Mexico, Guatemala. Perennial non-climbing tree, spreading crown, flowers said to give a good grade of honey

See *Contributions from the United States National Herbarium* 18(5): 188, 192–193. 1916, *Bulletin of Miscellaneous Information Kew* 1937(5): 304–305. 1937, *Publications of the Field Museum of Natural History, Botanical Series* 22(2): 79. 1940, *Ceiba* 18(1–2): 99–101. 1974, *Harvard Pap. Bot.* 7(2): 381–398. 2003

(Antibacterial.)

in Latin America: chalum, cuajiniquil, cushin, guaba de montaña, guajinicuil, jacanaquil

Inga pilosula (Rich.) J.F. Macbr. (*Feuilleea pilosula* (Rich.) Kuntze; *Feuilleea quassiaefolia* (Willd.) Kuntze; *Feuilleea setifera* (DC.) Kuntze; *Inga affinis* Steud.; *Inga macrophylla* Hook.; *Inga nitida* Willd.; *Inga pilosiuscula* Desv.; *Inga platycarpa* Benth.; *Inga quassiaefolia* Willd.; *Inga setifera* DC.; *Inga versicolor* Benth.; *Mimosa lucida* Vahl; *Mimosa nitida* Poir.; *Mimosa pilosula* Rich.; *Mimosa quassiaefolia* (Willd.) Poir.)

Caribbean, South America. Perennial non-climbing tree, reddish pubescent branches, yellow sessile flowers, flat pod commonly eaten by children

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 113. 1792, *Revisio Generum Plantarum* 1: 186. 1891 and *Field Museum of Natural History, Botanical Series* 13(3/1): 41. 1943

(Scrapings from the inner bark for the relief of toothache and applied as a poultice for abscesses. Bark decoction for dysentery.)

in Guyana: waiki, whitee

Inga punctata Willd. (*Feuilleea leptoloba* (Schldtl.) Kuntze; *Feuilleea punctata* (Willd.) Kuntze; *Inga ierensis* Britton; *Inga leptoloba* Schldtl.; *Inga popayanensis* Pittier; *Inga punctata* subsp. *chagrensis* Pittier; *Inga punctata* var. *elongata* J.F. Macbr.; *Inga punctata* var. *panamensis* Benth.; *Inga salvadorensis* Britton & Rose; *Inga strigillosa* Spruce ex Benth.; *Mimosa sericea* Poir.)

Venezuela. Perennial non-climbing tree

See *Species Plantarum*. Editio quarta 4(2): 1016. 1806, *Linnaea* 12: 560–561. 1838, *Transactions of the Linnean Society of London* 30(3): 612–613. 1875, *Revisio Generum Plantarum* 1: 188–189. 1891 and *Contributions from the United States National Herbarium* 18(5): 185–186, pl. 91. 1916, *Bulletin of the Torrey Botanical Club* 50(1): 52. 1923, *North American Flora* 23(1): 12. 1928, *J. Dept. Agric. Porto Rico* 13: 135. 1929, *Darwiniana* 5: 279–298. 1941, *Field Museum of Natural History, Botanical Series* 13(3/1): 38–39. 1943, *J. Arnold Arbor.* 27(4): 413–422. 1946, *Ceiba* 1(1): 38–49. 1950, *Annals of the Missouri Botanical Garden* 53(3): 289–290. 1966, *Fieldiana, Bot.* 31(11): 273–275. 1968, *Darwiniana* 21(1): 49–60, 172–181. 1977, *Syst. Bot.* 8(4):

354–368. 1983, *Madroño* 33(2): 136–143. 1986, *Kew Bulletin* 50: 801–804. 1995

(Extract cytotoxic in KB cancer cell lines.)

in South America: acotope, guamo caraota, rufindi

Inga stenoptera Benth. (*Feuilleea stenoptera* (Benth.) Kuntze)

South America.

See *Journal of Botany*, being a second series of the Botanical Miscellany 2(11): 143. 1840, *Revisio Generum Plantarum* 1: 189. 1891

(A poultice as antiseptic.)

in Brazil: ingá braba

Inhambanella (Engl.) Dubard Sapotaceae

The name of the genus from its place of origin, Inhambane in Mozambique; see Augusto Cabral, *Raças, usos e costumes dos indigenas do Districto de Inhambane*, acompanhado de um vocabulario em Shitsua, Guitonga e Shishope. Lourenço Marques 1910.

Inhambanella henriquezii (Engl. & Warb.) Dubard (*Inhambanella henriquesii* (Engl. & Warb.) Dubard; *Lecomtedoxa henriquesii* (Engl. & Warb.; *Lecomtedoxa henriquezii* (Engl. & Warb.) A. Meeuse; *Mimusops henriquesii* Engl. & Warb.) A. Meeuse; *Mimusops henriquezii* Engl. & Warb.)

Kenya to KwaZulu-Natal. Evergreen tree, all parts containing milky latex, leaves spirally arranged or crowded at ends of branches, yellow-cream honey-scented flowers, round red berry, soft sweet milky flesh, ripe fruits eaten raw, in lowland rainforest, in coastal areas, along riverbanks

See *Monogr. Afrik. Pflanzen-Fam.* 8: 80. 1904 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 8: 80, 88. 1904, *Notulae Systematicae*. Herbarium du Museum de Paris 3: 46. 1914, *Ann. Inst. Bot.-Géol. Colon. Marseille*, III, 3: 43. 1915, *Bothalia* 7: 344, f. 8. 1960

(Bark infusion used to treat stomachache.)

in English: milk pear

in Southern Africa: melkpeer (= milk pear), inhambanella; umThungulu, umBenkela (Zulu)

in Tanzania: mkungu wazimu, msikundazi

Inocarpus Forst. & Forst.f. Fabaceae (Dalbergieae, Leguminosae)

From the Greek *is*, *inos* 'fiber, strength' and *karpos* 'fruit'.

Inocarpus fagifer (Parkinson) Fosberg (*Aniotum edulis* J.R. Forst.; *Aniotum fagiferum* Parkinson; *Bocoa edulis* Baill.; *Bocoa edulis* (J.R. Forst. & G. Forst.) Baill.; *Cajanus edulis*

(J.R. Forst. & G. Forst.) Kuntze; *Gajanus edulis* (J.R. Forst. & G. Forst.) Kuntze; *Inocarpus edulis* J.R. Forst.; *Inocarpus edulis* J.R. Forst. & G. Forst.; *Inocarpus fagifer* (J.P. du Roi) O. Deg. & I. Deg.; *Inocarpus fagiferus* (Parkinson) Fosberg)

Malesia and Pacific islands. Perennial non-climbing tree, white fragrant flowers borne in axillary spikes, fruit a yellowish kidney-shaped drupe, fruits mainly dispersed by bats, seeds boiled and eaten

See *Familles des Plantes* 2: 326, 529. 1763, *Journal of a voyage to the South Seas* 39. 1773, *Characteres Generum Plantarum* 66, pl. 33. 1775, *Histoire des plantes de la Guiane Française* 2(Suppl.): 38–39, pl. 391. 1775, *Adansonia* 9: 237. 1868–70, *Revisio Generum Plantarum* 1: 189. 1891 and *Publications of the Field Columbian Museum, Botanical Series* 2(1): 53. 1900, *Journal of the Washington Academy of Sciences* 31(3): 95–96. 1941, *Phytologia* 39(3): 146. 1978, *Flora of the Lesser Antilles, Leeward and Windward Islands (Dicotyledoneae--Part 1)* 4: 334–538. 1988

(Fresh leaves juice drunk with water for malaria. Pounded bark applied to bites of poisonous fish; bark in treating diarrhea in children.)

Vernacular names: arau, chataignier tahitien, ifi, ivi, mape, marare, marau, rata

in English: O'taheite chestnut, Polynesian chestnut, Tahiti chestnut, Tahitian chestnut

in Malaya: kerepit, kopit

in Papua New Guinea: aila, ela, gete

in Tonga: ifi

Intsia Thouars Fabaceae (Caesalpinieae, Detarieae)

A Malayalam name for *Acacia intsia* Willd., used by van Rheede in *Hortus Indicus Malabaricus*. 6: t. 4; or from the Malagasy word *intsy* 'there! there it is!'; see *Genera Nova Madagascariensis* 22. 1806 and James A. Baines, *Australian Plant Genera*. An Etymological Dictionary of Australian Plant Genera. 196. Chipping Norton, N.S.W. 1981.

Intsia bijuga (Colebr.) Kuntze (*Afzelia bijuga* (Colebr.) A. Gray; *Afzelia bijuga* A. Gray; *Afzelia bijuga* fo. *sambiranensis* R. Vig.; *Afzelia cambodiensis* Hance; *Afzelia retusa* Kurz; *Eperua decandra* Blanco; *Intsia amboinensis* DC.; *Intsia bijuga* (Colebr.) Kuntze var. *glabra* C.A. Mey.; *Intsia cambodiensis* (Hance) Pierre; *Intsia madagascariensis* DC.; *Intsia moelebei* Vieill.; *Intsia retusa* (Kurz) Kuntze; *Intsia tashiroi* Hayata; *Jonesia monopetala* Hassk.; *Jonesia triandra* Roxb.; *Macrolobium amboinense* Hassk.; *Macrolobium bijuga* Colebr.; *Macrolobium bijugum* Colebr.; *Outea bijuga* (Colebr.) DC.; *Pahudia hasskarliana* Miq.; *Tamarindus intsia* Spreng.)

East Africa, India, Pacific. Perennial non-climbing tree, large pods

See *Histoire des plantes de la Guiane Française* 1: 28, pl. 9. 1775, *Genera Plantarum* 1: 30. 1789, *Transactions of the Linnean Society of London* 4: 221. 1798, *Transactions of the Linnean Society of London* 12: 359, pl. 17. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 509, 511. 1825, *United States Exploring Expedition* 1: 467. 1854, *Hist. Phys. Madagascar* 33: 27. 1886, *Revisio Generum Plantarum* 1: 192. 1891 and *Notulae Systematicae*. *Herbier du Museum de Paris* 13(4): 348. 1948, *Blumea* 51(2): 199–220. 2006

(Seeds with poisonous properties. Bark astringent used to stop diarrhea. Fruit acrid and laxative.)

in English: Borneo teak, Johnstone River teak, Papuan teak, scrub mahogany

in Madagascar: harandranto, hintsi, hintsika, hintsikafitra, hintsina, hintsy, tsararavina

in India: dasagunda, dsagunda, hinga, pirijda, pynkado, shoondal, shoondul

in Japan: finuki-ukaba, shiro-yona, Tashiro-mame

in Malaya: ipil, kalabau, malapari, merbau, merbau ayer, merbau apil, miraboo laut, pokok merbau ayer

in Vietnam: go ca te, go mioc, go nuoc

Intsia palembanica Miq. (*Afzelia bakeri* Prain; *Afzelia palembanica* (Miq.) Baker; *Intsia acuminata* sensu auct.; *Intsia bakeri* (Prain) Prain; *Intsia plurijuga* Harms) (from Palembang, Sumatra)

Indonesia, Papua New Guinea. Perennial non-climbing tree, flowers in terminal panicles, petal with prominent claw, strap-shaped pod splitting open, flat seeds

See *Fl. Ned. Ind., Eerste Bijv.* 2: 289. 1861 [*Flora Indiae Batavae*, ... Supplementum Primum. *Prodromus Florae Sumatranæ*.] and *Bull. Jard. Bot. Buitenzorg*. 16: 92. 1938, *Plant Resources of South-East Asia (PROSEA)*. (Pl Res SEAs) 5(1): 269–270. 1993, *Blumea* 38: 322. 1994, *Journal of Wood Science* 55(3): 230–235. 2009

(Cytotoxic, antibacterial, antitumor, antioxidant.)

in English: Borneo teak, Malacca teak, Marabaw tree of Malacca

in Malaya: merbae, merbau

Inula L. Asteraceae

Latin *inula*, *ae* for elecampane, a plant, *Inula helenium* L. (see Plinius, L. Junius Moderatus Columella, Q. Horatius Flaccus); Greek *helenion*; see Carl Linnaeus, *Species Plantarum*. 2: 881–884. 1753, *Genera Plantarum*. Ed. 5. 375. 1754, *The Genera of North American Plants* [Nuttall]. 2: 150. 1818, *A Sketch of the Botany of South-Carolina and Georgia* 2(4): 333–339. 1824[1823], *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 94. 1836, *Prodr.* (DC.) 7(1): 22.

1838, Pietro Bubani, *Flora Virgiliana*. 65–66. Bologna 1870 and *Wrightia* 4(1): 12. 1968, *Novosti Sist. Vyssh. Rast.* 14: 223. 1977, *Acta Phytotax. Sin.* 16(3): 82–83. 1978.

Inula cappa (Buch.-Ham. ex D. Don) DC. (*Baccharis chinensis* Lour.; *Blumea arnottiana* Steud.; *Blumea chinensis* Hook. & Arn.; *Conyza argentea* Wall.; *Conyza cappa* Buch.-Ham. ex D. Don; *Conyza dentata* Blanco; *Conyza eriophora* Wall.; *Conyza lanuginosa* Wall.; *Duhaldea cappa* (Buch.-Ham. ex D. Don) Pruski & Anderb.; *Duhaldea cappa* (Buch.-Ham. ex D. des Botanischen Gartens und Museums zu Berlin-Dahlem 12: 371. 1935

(Narcotic, divinatory plant.)

in Colombia: borrachera

Iodes Blume Icacinaceae

Greek *ios* 'rust', *iodes* 'rust coloured, poisonous, acrid', *ioeides* 'purple, violet-like', see *Bijdragen tot de flora van Nederlandsch Indië* 29–30 (Toedes.). 1825.

Iodes africana Welw. ex Oliv.

Tropical Africa. Liana, slender climber, tendrils, glabrescent, watery sap completely clear, small yellow flowers, ovoid glabrous fruits

See *Flora of Tropical Africa* [Oliver et al.] 1: 358. 1868

(Whole plant decoction drunk against stomachache, diarrhea; plant juice as eye drops to kill Guinea worms.)

in Yoruba: pakun ase, ase orisa, ase, asewaa

Iphigenia Kunth Colchicaceae (Liliaceae)

In Greek mythology, Iphigeneia is the daughter of Agamemnon and Clytaemnestra (Clytemnestra), see *Flora Telluriana* 2: 31. 1836[1837], *Enum. Pl.* [Kunth] 4: 212. 1843 and *Proc. Indian Sci. Congr. Assoc.* (III, C) 65: 110–111. 1978.

Iphigenia indica (L.) A. Gray ex Kunth (*Anguillaria cochinchinensis* Spreng.; *Anguillaria caricina* Schult. & Schult.f.; *Anguillaria indica* (L.) R. Br.; *Anguillaria racemosa* Schult. & Schult.f.; *Aphoma angustiflora* Raf.; *Aphoma cuneata* Raf.; *Hypoxidopsis pumila* Steud. ex Baker; *Iphigenia caricina* (Schult. & Schult.f.) Kunth; *Iphigenia indica* (L.) Kunth; *Iphigenia indica* (L.) A. Gray; *Iphigenia indica* A. Gray; *Iphigenia racemosa* A. Gray ex Kunth; *Lloydia melanantha* H. Lévl.; *Melanthium caricinum* Roth; *Melanthium indicum* L.; *Melanthium racemosum* Roth, nom. illeg.; *Notocles indica* (L.) Salisb., nom. inval.)

Tropical Asia.

See *Mant. Pl. Altera* 226. 1771, *Nova Genera et Species Plantarum seu Prodromus* 273. 1810, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 4: 212–214. 1843, *Genera Plantarum* 54. 1866, *J. Linn. Soc., Bot.* 17: 450. 1879

(Leaf decoction in fever. Tuber for colic pain, headache and snakebite. Corm powder fried in *ghee* used in impotency.)

in India: dhikoli, neerppanai

Iphigenia magnifica Ansari & R.S. Rao

India. Erect herb, tubers subglobose, small flowers in terminal racemes, reddish or brown-purple perianth

See *Bull. Bot. Surv. India* 20: 162. 1978 (publ. 1979), *Advances Pl. Sci.* 7(2): 251–255. 1994

(Oil from the bulbs used as pain reliever, in headache, migraine; oil snuffed to avoid sleep after snakebite; oil applied externally on snakebite.)

in India: lasni

Iphiona Cass. Asteraceae

Greek *iphios* 'strong, mighty', *iphi* 'strongly, mightly, with force', *iphion* was the ancient Greek name for a kind of pot-herb.

Iphiona grantioides (Boiss.) Anderb. (*Inula catchica* C.B. Clarke; *Inula grantioides* Boiss.)

Iran.

See *Species Plantarum* 2: 881–884. 1753, *Bull. Sci. Soc. Philom. Paris* 1817: 153. 1817, *Diagnoses plantarum orientaliu novarum*, ser. 2, 3: 14. 1856, *Compositae Indicae* 126. 1876 and *Nordic Journal of Botany* 5: 184. 1985

(Fresh leaves crushed and the paste applied to infected wounds; steeped in water to treat asthma.)

in Pakistan: naro

Iphionopsis A. Anderb. Asteraceae

Resembling *Iphiona*, Greek *iphios* 'strong, mighty', *iphi* 'strongly, mightly, with force', *iphion* was the ancient Greek name for a kind of pot-herb.

Iphionopsis rotundifolia (Oliv. & Hiern) Anderb. (*Iphiona rotundifolia* Oliv. & Hiern; *Pluchea serra* Franch.)

East Africa, Somalia.

See *Flora of Tropical Africa* 3: 360. 1877 and *Nordic Journal of Botany* 5: 52–53. 1985

(For skin diseases, wounds.)

Ipomoea L. Convolvulaceae

Greek *ips*, *ipos* 'bindweed, or, a kind of worm or beetle that eats vines' and *homoios*, *homios* 'resembling, similar to', referring to the habit, or to long trailing stems or to the similarities this genus has with *Convolvulus*; see *Hort. Ind. Malabar.* pl. 50, f. 1–2. 1692, Carl Linnaeus, *Species Plantarum*. 1: 155, 159–162. 1753, *Genera Plantarum*. Ed. 5. 76. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 453. 1794, *Icones et Descriptiones Plantarum*, quae aut sponte ... 5: 51, t. 476. 1799, *Novorum Vegetabilium Descriptiones* 1: 3. 1824, *Convolvulaceae orientales* 53, 56, 59. 1833, *Mémoires de la Société de Physique*

et d'Histoire Naturelle de Genève 6: 434, 438, 441, 443. 1833, *A General History of the Dichlamydeous Plants* 4: 264. 1838, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 476. 1852, *Flora of the British West Indian Islands* 466, 468, 472–473. 1864, *Flora Brasiliensis* 7: 221. 1869, *The Flora of British India* 4: 119, 197–198, 201. 1883, *Revisio Generum Plantarum* 2: 442. 1891 and *Bulletin of the Torrey Botanical Club* 31(11): 590–591. 1904, *Bulletin of the Torrey Botanical Club* 36: 596. 1909, *Mededeelingen van's Rijks-Herbarium* 46: 19–20. 1922, *Svensk Botanisk Tidskrift* 23: 181. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 106. 1936, Blas Pablo Reko, *Mitobotánica Zapoteca*. Gordon Wasson, “Notes on the Present Status of Ololiuhqui and the Other Hallucinogens of Mexico.” *Botanical Museum Leaflets, Harvard University*. 20(6): 161–212. 1963, *Nóm. Pl. Recol. Valle Cochabamba* 2: 17–86. 1966, *Fieldiana, Bot.* 24(9): 4–85. 1970, *Brittonia* 24: 151. 1972, *Fl. Il. Entre Ríos* 6(5): 148–189. 1979, *Taxon* 29(4): 501. 1980, *Fl. Ecuador* 15: 1–98. 1982, *Sida* 14(3): 443–457. 1991, *Fl. Veracruz* 77: 1–133. 1994, *Harvard Pap. Bot.* 6: 97–122. 1995, *Taxon* 45(1): 13. 1996, *Fl. Madagasc.* 171: 3–287. 2001, *Biodiver. Tabasco* 65–110. 2005, *Blumea* 51(2): 199–220. 2006, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007, *Ipomoea* sp., consumption of the tubers is said to cause vomiting and headaches.

Ipomoea aculeata Blume (*Convolvulus aculeatus* L.; *Ipomoea aculeata* (L.) Kuntze, nom. illeg., non *Ipomoea aculeata* Blume; *Ipomoea mollissimum* Hallier f. ex Boerl.)

Indonesia, Australia. Pubescent twiner, prostrate, woody, fragrant, flowers solitary or in few-flowered cymes, corolla salver-shaped white greenish fragrant, capsule mucronate, seeds densely grey-woolly, in open forests

See *Species Plantarum* 1: 155. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 13: 715. 1825, *Revisio Generum Plantarum* 2: 442. 1891 and *Austrobaileya* 3: 749–755. 1992

(Leaves or young tops eaten as a purgative, applied externally to sores and ulcers.)

in Indonesia: rabet kalorak, uluk-uluk

Ipomoea alba L. (*Calonyction aculeatum* (L.) House; *Calonyction aculeatum* var. *lobatum* (H. Hallier) C.Y. Wu; *Calonyction album* (Linnaeus) House; *Calonyction bona-nox* (L.) Bojer; *Calonyction bona-nox* var. *lobata* H. Hallier; *Calonyction bona-nox* var. *lobatum* Hallier f.; *Calonyction pulcherrimum* Parodi; *Calonyction speciosum* Choisy; *Convolvulus aculeatus* L.; *Convolvulus aculeatus* var. *bona-nox* (L.) Spreng.; *Convolvulus pulcherrimus* Vell.; *Ipomoea aculeata* Blume; *Ipomoea aculeata* (L.) Kuntze; *Ipomoea aculeata* var. *bona-nox* (L.) Kuntze; *Ipomoea bona-nox* L.; *Ipomoea grandiflora* Roxb.; *Ipomoea noctiflora* Griff.)

Cosmopolitan. Herbaceous, strong twiner, milky sap, white fragrant flowers

See *Sp. Pl.* 1: 161. 1753 and *Bulletin of the Torrey Botanical Club* 31(11): 591. 1904, *Taxon* 28: 359–361. 1979, *Taxon* 29: 501–502. 1980

(Used in Sidha. Whole plant purgative, antibacterial, emetic, used in treating snakebite. Dermatitis. Flowers infusion taken as a blood purifier.)

in English: moonflower

in French: belle de nuit

in Congo: n'ninganina, oninganina

in China: yue guang hua

in India: ampuli, cantirakanti, chandra kaanthi, chandra pushpa, chandrakaanthi, chandrakanti, dudhiakalmi, ellinataka, ellinatakiceti, gula chaandani, kaadu katthi kaayi, kairalam, kairavi, kairaviceti, kankurkirai, kankurkiraiceti, kanti, kuccirakitaceti, kuccirakitam, kulirkanti, kulirkanticeti, manicakaceti, munda-valli, naagaramukkatte, nagamukkori, naganamukkorai, nagaramukkatte, nakamukkorri, navalarkkantam, nicamani, nicamaniceti, nikanayaceti, nikanayam, pandithivankaaya, panditivankaya, phan sohkarikhnai, taricavaceti, taricavam, tuvicapati, tuvicapaticeti, vellatampu

in Japan: yakai-sô, yoru-gao

in Hawaii: koali pehu

Ipomoea albivenia (Lindley) Sweet (*Convolvulus albivenius* Lindl.; *Ipomoea gerrardii* Hook. f.)

South Africa. Spreading, herb, sands

See *Species Plantarum* 1: 153–159. 1753, *Hortus Britannicus* 372. 1830

(Medicinal to purify blood.)

in English: wooden rose creeper

in Swaziland: imibuzana, ubatata wentaba, umgwiligwili, ungbasiswana

Ipomoea aquatica Forssk. (*Convolvulus repens* Vahl, nom. illeg., non *Convolvulus repens* L.; *Convolvulus reptans* L.; *Ipomoea clappertonii* R. Br.; *Ipomoea natans* Dinter & Suess.; *Ipomoea natans* Dinter; *Ipomoea repens* Roth; *Ipomoea reptans* Poir.; *Ipomoea reptans* auct.; *Ipomoea sagittifolia* Hochr.; *Ipomoea subdentata* Miq.)

Tropics, Tropical Asia. Floating herb, fast growing, aquatic, vine, ascending, trailing, creeping, scrambling, prostrate, twining, straggling, stems reddish-purple, white sap, succulent, rooting from the nodes, papery leaves, flowers solitary or in a few-flowered cyme, large pink purple corollas funnel-shaped, capsule ovoid smooth brown, black seeds, leaves and young twigs eaten as vegetable, crushed leaves sweetly fragrant good fodder, ditches, marshy river banks, rice fields,

in grassy marsh area, along roadsides, seasonally flooded depressions, seasonal pond, damp shady places

See *Species Plantarum* 1: 153–162. 1753, *Flora Indica ... nec non Prodrumus Florae Capensis* 50, t. 18, f. 2. 1768, *Flora Aegyptiaco-Arabica* 44. 1775, *Symbolae Botanicae, ...* 1: 17. 1790, *Encyclopédie Méthodique. Botanique ... Supplément* 3(2): 460. 1814, *Novae Plantarum Species* 110. 1821 and *Fieldiana, Botany* 24(9): 4–85. 1970, *Cytologia* 44: 275–286. 1979, *Journal of Palynology* 16: 85–105. 1980, *Proceedings of the Indian Science Congress Association* 71(3-vi): 85. 1984, *Cytologia* 57: 289–293. 1992, *Investigatio et Studium Naturae* 12: 48–65. 1992, *Proceedings of the Indian Science Congress Association* 80(3-viii): 150. 1993, *Ethnobotany* 16: 52–58. 2004, *Blumea* 51(2): 199–220. 2006

(Used in Ayurveda and Sidha. Plant febrifuge, laxative, emetic, tonic and antidote, medicinal salt; plant juice purgative, emetic and antidote to opium and poisoning, also given in bronchitis; plant paste applied for itching; a decoction of the whole plant drunk for insomnia, debility, hysteria, madness, nervous breakdown; shoots eaten for venereal diseases. External application to boils, the crushed leaves put on sores and boils, cuts and wounds; chewed leaves wrapped around wounds; leaf juice with salt used in stomach disorders, also applied on pox; leaves ground and taken as an antidote for dog bite. Flowers crushed and the juice dropped into inflamed eyes, (Doctrine of Signatures). Veterinary medicine, whole plant for snakebite.)

in English: pond morning glory, potato vine, swamp cabbage, swamp morning glory, water convolvulus, water ipomoea, water spinach, winter spinach

in Benin: amanamana, atoyoé, gfbessifla, wabala

in Burkina Faso: alédan bliassou

Madagasc.* 171: 3–287. 2001, *Blumea* 51(2): 199–220. 2006

(Leaves to cure chest complaints of children.)

Ipomoea coscinosperma Hochst. ex Choisy (*Ipomoea coscinosperma* var. *glabra* Rendle; *Ipomoea coscinosperma* var. *hirsuta* A. Rich.; *Ipomoea polygonoides* Schweinf.)

Tropical Africa. Herb, spreading, trailing, inflorescences small axillary sessile hispid, corolla red or white, capsule globose glabrous, fodder, relished by cattle, grassland, weed of cultivation

See *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 354. 1845

(Veterinary medicine, lactogenic.)

in Mali: tirde

in Mauritania: tirde

in Senegal: nineni, tirde

Ipomoea crassipes Hook. (*Ipomoea adumbrata* Rendle & Britten; *Ipomoea bellecomans* Rendle; *Ipomoea calystegioides* Hallier f.; *Ipomoea cordofana* Choisy; *Ipomoea greenstockii* Rendle; *Ipomoea sarmentacea* Rendle)

Africa, Tanzania. Herb, vine, straggling, flowers white, crushed flower smells of sweet potatoes

See *Botanical Magazine* 70, t. 4068. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 350. 1845

(Medicinal for dysentery, sores and hiccups.)

in English: leafy-flowered ipomoea

in Swaziland: vimbukhalo

Ipomoea digitata L. (*Batatas paniculata* (L.) Choisy; *Batatas paniculata* Choisy; *Convolvulus paniculatus* Wall.; *Convolvulus paniculatus* Blanco; *Convolvulus paniculatus* L.; *Convolvulus paniculatus* (Burm. f.) Veg.* (ed. 16) [Sprengel] 1: 603. 1824 [dated 1825; publ. in late 1824], *Bijdragen tot de flora van Nederlandsch Indië* 13: 718. 1825, *Synopsis Plantarum* (D.

Dietrich) 1: 670. 1839 and *Feddes Rept.* 85(9–10): 638. 1974, *Kew Bulletin* 42(3): 658. 1987

(Used in Ayurveda. Plant juice diuretic, hypotensive, deobstruent, an antidote to poisoning. Tubers alterative, aphrodisiac, diuretic, uterine tonic, used in diabetes; roots paste given for diabetes. Seeds mixed with milk taken as a vital tonic. Veterinary medicine, ground leaves applied on infected wounds.)

in China: mao jing shu

in India: bankalmi, bilona, fudardi, lakshmana (= one having lucky signs, marks), laksmana, mushakani, talikkodi, tirutali, tirutali

Ipomoea mauritiana Jacq. (*Batatas paniculata* (L.) Choisy; *Convolvulus paniculatus* L.; *Ipomoea camerunensis* Taub.; *Ipomoea digitata* Baker & Rendle; *Ipomoea digitata* auct., sensu A. Meeuse, non L., sensu Baker & Rendle; *Ipomoea digitata* auct. var. *eriosperma*, sensu (P. Beauv.) Rendle, non L.; *Ipomoea ennealoba* P. Beauv.; *Ipomoea eriosperma* P. Beauv.; *Ipomoea paniculata* (L.) R. Br., non Burm.; *Ipomoea paniculata* var. *indivisa* Hallier f.)

West Africa. Climber, herb, weed, twiner, glabrous, woody, hollow, large tuberous roots, inflorescence few to many-flowered, corolla funnel-shaped reddish-purple or mauve with darker centre, capsule ovoid or globose, seeds black silky hairy

See *Collectanea* 4: 216. 1791, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 38. 1797

(Used in Ayurveda. Leaves and roots used externally to treat tuberculosis, fevers and for the treatment of external and breast infections. Alterative, laxative, aphrodisiac, cholagogue, abortifacient, demulcent, diuretic, emmenagogue, lactogenic, tonic. Roots purgative; a decoction of the tuberous roots used for the preparation of medicinal wine. Tuber cooked and eaten for impotency. Veterinary medicine, whole plant paste lactation stimulant; powdered root given to increase lactation.)

in English: elephant's convolvulus, giant potato, monkey's cassava

in Benin: loviaton, ouroutoko

(Religious and magic rites, divinatory, narcotic, hallucinogen, ceremonial.)

in English: morning glory

in Mexico: badoh negro, tlitliltzen, tlitliltzin

in China: guan hua shu

Ipomopsis Michaux Polemoniaceae

Resembling *Ipomoea* L., referring to the flowers, calyx is generally bell-shaped, corolla bell-shaped or salverform, see *Flora Boreali-Americana* 1: 141–142. 1803, *Proceedings of*

the American Academy of Arts and Sciences 8: 260. 1870 and *University of California Publications in Botany* 2(1): 24. 1904, *Aliso* 3(3): 353. 1956.

Ipomopsis aggregata (Pursh) V.E. Grant (*Batanthes aggregata* (Pursh) Raf.; *Callisteris aggregata* (Pursh) Greene; *Cantua aggregata* Pursh; *Gilia aggregata* (Pursh) Spreng.; *Ipomeria aggregata* (Pursh) Nutt.)

North America. Biennial or perennial herb, see also *Gilia*

See *Systema Vegetabilium*, editio decima sexta 1: 626. 1825 and *Leaflets of Botanical Observation and Criticism* 1(11): 159. 1905, *Aliso* 3(3): 360. 1956, *Taxon* 35: 196. 1986

(Very poisonous. Blood purifier.)

in English: scarlet gilia, skyrocket gilia

Ipomopsis aggregata (Pursh) V.E. Grant subsp. ***aggregata*** (*Cantua aggregata* Pursh; *Gilia aggregata* (Pursh) Spreng.; *Gilia aggregata* (Pursh) Spreng. subsp. *euaggregata* Brand)

North America. Biennial or perennial herb

See *Systema Vegetabilium*, editio decima sexta 1: 626. 1825 and *Leaflets of Botanical Observation and Criticism* 1(11): 159. 1905, *Aliso* 3(3): 360. 1956, *Taxon* 35: 899–900. 1986

(Very poisonous. Cathartic.)

in English: scarlet gilia, skyrocket gilia

Ipomopsis aggregata (Pursh) V.E. Grant subsp. ***attenuata*** (A. Gray) V.E. Grant & A.D. Grant (*Gilia aggregata* (Pursh) Spreng. var. *attenuata* A. Gray; *Gilia attenuata* (A. Gray) A. Nelson; *Ipomopsis aggregata* var. *attenuata* (A. Gray) Dorn)

North America. Biennial or perennial herb

See *Systema Vegetabilium*, editio decima sexta 1: 626. 1825, *Synoptical Flora of North America* 2(1): 145. 1878, *Bulletin of the Torrey Botanical Club* 25(5): 278. 1898 and *Leaflets of Botanical Observation and Criticism* 1(11): 159. 1905, *Aliso* 3(3): 360. 1956, *Taxon* 35: 899–900. 1986, *Vascular Plants of Wyoming* 298. 1988

in English: scarlet gilia, scarlet skyrocket, skyrocket gilia

Ipomopsis congesta (Hook.) V.E. Grant (*Gilia congesta* Hook.; *Navarretia congesta* (Hook.) Kuntze)

North America. Perennial subshrub, herb

See *Flora Boreali-Americana* 2: 75. 1838, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 361. 1956

in English: ballhead ipomopsis

Ipomopsis congesta (Hook.) V.E. Grant subsp. ***congesta*** (*Gilia burleyana* A. Nelson; *Gilia congesta* Hook.; *Gilia congesta* Hook. var. *burleyana* (A. Nelson) Constance & Rollins)

North America. Perennial subshrub, herb

See *Flora Boreali-Americana* 2: 75. 1838, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 361. 1956

(Analgesic, antiseptic, cathartic, emetic, astringent, antidiarrheal, for indigestion and stomach trouble, skin problems, wounds, cuts, sores and bruises, venereal diseases, colds, coughs. Veterinary medicine, applied to back sores on horses)

in English: ballhead gilia, ballhead ipomopsis

Ipomopsis gunnisonii (Torr. & A. Gray) V.E. Grant (*Gilia gunnisonii* Torr. & A. Gray; *Navarretia gunnisonii* (Torr. & A. Gray) Kuntze; *Navarretia gunnisonii* Kuntze)

North America. Annual herb

See *Reports of explorations and surveys : to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 2(1): 128, pl. 9. 1857, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 361. 1956

(Blood purifier, antiseptic, applied to sores, boils.)

in English: sanddune ipomopsis, sanddune skyrocket

Ipomopsis laxiflora (J.M. Coult.) V.E. Grant (*Gilia laxiflora* (J.M. Coult.) Osterh.; *Gilia macombii* Torr. ex A. Gray var. *laxiflora* J.M. Coult.)

North America. Annual or biennial herb

See *Contributions from the United States National Herbarium* 1(2): 44. 1890, *Bulletin of the Torrey Botanical Club* 24(1): 51. 1897 and *Aliso* 3(3): 361. 1956, *Taxon* 35: 899–900. 1986

(Emetic.)

in English: iron ipomopsis, iron skyrocket

Ipomopsis longiflora (Torr.) V.E. Grant (*Cantua longiflora* Torr.; *Collomia longiflora* (Torr.) A. Gray; *Gilia longiflora* (Torr.) G. Don; *Navarretia longiflora* (Torr.) Kuntze; *Navarretia longiflora* Kuntze)

North America. Annual or biennial herb

See *Annals of the Lyceum of Natural History of New York* 2: 221. 1827, *A General History of the Dichlamydeous Plants* 4: 245. 1837, *Proceedings of the American Academy of Arts and Sciences* 8: 261. 1870, *Revisio Generum Plantarum* 2: 432. 1891 and *Phytologia* 54: 302–309. 1983, *Taxon* 32: 510–511. 1983, *Phytologia* 56(1): 55–60. 1984, *Phytologia* 64: 390–398. 1988

(Emetic, disinfectant, for heartburn.)

in English: flaxflowered gilia, flaxflowered ipomopsis

Ipomopsis longiflora (Torr.) V.E. Grant subsp. ***longiflora*** (*Gilia longiflora* (Torr.) G. Don)

North America.

See *Annals of the Lyceum of Natural History of New York* 2: 221. 1827, *A General History of the Dichlamydeous Plants* 4: 245. 1837, *Proceedings of the American Academy of Arts and Sciences* 8: 261. 1870, *Revisio Generum Plantarum* 2: 432.

1891 and *Phytologia* 54: 302–309. 1983, *Taxon* 32: 510–511. 1983, *Phytologia* 56(1): 55–60. 1984, *Taxon* 35: 899–900. 1986, *Phytologia* 64: 390–398. 1988, *Madroño* 48(2): 116–122. 2001

(Analgesic, stomachic, antirheumatic, blood purifier, postpartum remedy. Ceremonial. Veterinary medicine, stomachic.)

in English: flaxflowered gilia, flaxflowered ipomopsis

Ipomopsis multiflora (Nutt.) V.E. Grant (*Gilia multiflora* Nutt.; *Navarretia multiflora* (Nutt.) Kuntze; *Navarretia multiflora* Kuntze)

North America. Perennial herb

See *Journal of the Academy of Natural Sciences of Philadelphia* 1: 154. 1848, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 357. 1956, *Phytologia* 54: 302–309. 1983, *Taxon* 35: 899–900. 1986

(Analgesic, stomachic, antirheumatic, blood purifier, postpartum remedy. Ceremonial. Veterinary medicine, stomachic.)

in English: manyflowered gilia, manyflowered ipomopsis

Ipomopsis polycladon (Torr.) V.E. Grant (*Gilia polycladon* Torr.)

North America. Annual herb

See *Report on the United States and Mexican Boundary ... Botany* 2(1): 146. 1859 and *Aliso* 3(3): 361. 1956, *Taxon* 35: 899–900. 1986

(Tonic, sedative.)

in English: manybranched gilia, manybranched ipomopsis

Ipomopsis pumila (Nutt.) V.E. Grant (*Gilia pumila* Nutt.; *Navarretia pumila* (Nutt.) Kuntze; *Navarretia pumila* Kuntze)

North America. Annual herb

See *Journal of the Academy of Natural Sciences of Philadelphia* 1: 156. 1848, *Revisio Generum Plantarum* 2: 433. 1891 and *Aliso* 3(3): 361. 1956, *Phytologia* 54: 302–309. 1983, *Taxon* 35: 899–900. 1986

(Tonic.)

in English: dwarf gilia, dwarf ipomopsis

Ipomopsis thurberi (Torr. ex A. Gray) V.E. Grant (*Gilia thurberi* Torr. ex A. Gray)

North America.

See *Flora Boreali-Americana* 1: 141–142. 1803, *Proceedings of the American Academy of Arts and Sciences* 8: 261. 1870 and *Aliso* 3(3): 361. 1956

(Leaves and roots piscicide.)

in Mexico: matesuwa

Iresine P. Browne Amaranthaceae

Greek *iris* and *is*, gen. *inos*, nom. pl. *ines* ‘rib in the leaves of plants, sinew’, or from *eiresione* (*eiros*, *eireos* ‘wool’) ‘a harvest-wreath of olive or laurel wound round with wool and adorned with fruits’, referring to the flowers and seeds; see Patrick Browne, *The civil and natural history of Jamaica*. 358–359. London 1756, *Beitrag zur Kenntnis der natürlichen Familie Amarantaceen* 103. 1825, *Genera Plantarum* 4: 301. 1837, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 476. 1852, *Biologia Centrali-Americana; ... Botany* 3(14): 19–20. 1882 and *Publications of the Field Museum of Natural History, Botanical Series* 2(8): 330. 1912, *Fieldiana, Bot.* 24(4): 143–174. 1946, *Taxon* 42: 691–692. 1993.

Iresine diffusa Humb. & Bonpl. ex Willd. (*Achyranthes lanata* L.; *Alternanthera paniculata* Kunth; *Celosia paniculata* L.; *Iresine acuminata* Moq.; *Iresine canescens* Humb. & Bonpl. ex Willd.; *Iresine celosia* L.; *Iresine celosioides* L.; *Iresine celosioides* var. *eriophylla* Benth.; *Iresine celosioides* var. *macrophylla* Griseb.; *Iresine celosioides* var. *nicotianoides* Suess.; *Iresine celosioides* var. *pubescens* Moq.; *Iresine elongata* Humb. & Bonpl. ex Willd.; *Iresine eriophora* Peyr.; *Iresine eriophylla* Moq.; *Iresine floribunda* M. Martens & Galeotti; *Iresine gossypiantha* A. Rich.; *Iresine havanensis* Kunth; *Iresine hookeri* Moq.; *Iresine mutisii* Kunth; *Iresine paniculata* Kuntze; *Iresine paniculata* (L.) Kuntze, nom. illeg., non Poir.; *Iresine paniculata* (Mart.) Spreng.; *Iresine paniculata* var. *floridana* Uline & W.L. Bray; *Iresine parvifolia* Kunth; *Iresine polymorpha* Mart.; *Iresine polymorpha* var. *alopeuroidea* Mart.; *Iresine polymorpha* var. *effusa* Mart.; *Iresine polymorpha* var. *verticillata* Mart.; *Iresine spiculigera* Seub.; *Iresine spiculigera* var. *pauciglandulosa* Herzog; *Iresine verticillata* Spr.; *Xerandra celosioides* Raf.)

South America. Annual or perennial subshrub, herb

See *Species Plantarum* 1: 204. 1753, *Systema Naturae*, Editio Decima 2: 1291. 1759, *Species Plantarum*, Editio Secunda 2: 1456. 1763, *Species Plantarum*. Editio quarta 4(2): 765. 1806, *Nova Genera et Species Plantarum* (quarto ed.) 2: 208. 1817, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10: 347. 1843, *The Botany of the Voyage of H.M.S. Sulphur* 156. 1846, *Linnaea* 30(1): 31–22. 1859, *Revisio Generum Plantarum* 2: 542. 1891 and *Feddes Repertorium* 39: 11. 1935, *Taxon* 42: 691–692. 1993

(Leaves and stems juice given for cough, whooping cough.)

in English: bloodleaf, Juba's bush, Jubas-bush

Iresine herbstii Hook. f. ex Lindl. (*Achyranthes verschaffeltii* Lem.; *Iresine celosia* L., nom. illeg. superfl., nom. nud.; *Iresine reticulata* hort.; *Iresine verschaffeltii* Lem.)

Tropical South America. Erect or ascending perennial herb, small, stem often tinged red, stout, branched, leaves variegated, small flowers rose-white in many-flowered many-branched panicles, bracts and bracteoles small, perianth

segments oblong, flowers unisexual on different plants, ovary globose

See *Species Plantarum* 1: 204–205. 1753, *Systema Naturae*, Editio Decima 2: 1291. 1759, *Gardener's Chronicle & Agricultural Gazette* 1864: 654. 1864, *L'illustration horticole* 11: t. 409. 1864 and *Flora of Ecuador* 28: 1–138. 1987, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 320–321, 336–337. London 1994, *Pharmaceutical Biology* 40(4): 274–293. 2002, *Journal of Ethnopharmacology* 105(3): 352–357. 2006, *Medicinal Chemistry* 3(6): 599–604. 2007

(Antibacterial, antimycobacterial. Whole plant in leprosy; medicine for the nerves, a decoction is drunk; medicine for gangrene, the sap is drunk. Stems and leaves to treat broken bones. Used in the northern Peruvian Andes for magic-therapeutic purposes. The traditional healers use *Iresine herbstii* with the ritual aim to expel bad spirits from the body. Furthermore, *Iresine herbstii* was used in association with other plants, such as *Trichocereus pachanoi* Britt. et Rose, for divination, to diagnose diseases, and to take possession of another identity.)

in English: beef plant, beefsteak plant, bloodleaf, chicken gizzard, Herbst's bloodleaf

in Ecuador: grande escancel, grande tigrecillo, plumilla, tigrecillo

in Honduras: hierba de abanicos

in Panama: abetosa

in Peru: sanguinaria

in Japan: maruba-biyu

Iriarte Ruíz & Pavón Arecaceae (Palmae)

For the Spanish botanist Don Bernardo de Iriarte, for a biography see R.A. DeFilipps, in *Principes. Journal of The International Palm Society*. 29(4): 156–159. 1985; E. Cotarelo y Mori, *Iriarte y su Época*. Madrid 1897; see also Hipólito Ruíz López (1754–1815) and José Antonio Pavón (1754–1844), *Flora peruviana, et chilensis prodromus*. 149. Madrid 1794.

Iriarte deltoidea Ruiz & Pav. (*Ceroxylon deltoideum* Ruiz & Pav.; *Deckeria corneto* (H. Karst.) Kunth; *Deckeria corneto* H. Karst.; *Deckeria phaeocarpa* (Mart.) H. Karst.; *Deckeria ventricosa* (Mart.) H. Karst.; *Iriarte corneto* (H. Karst.) H. Wendl.; *Iriarte gigantea* H. Wendl. ex Burret; *Iriarte gigantea* H. Wendl.; *Iriarte megalocarpa* Burret; *Iriarte phaeocarpa* Mart.; *Iriarte robusta* Verscaff. ex H. Wendl.; *Iriarte ventricosa* Mart.; *Iriarte weberbaueri* Burret)

Central & South Trop. America.

See *Flora Peruviana, et Chilensis Prodromus* 149. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis*

298. 1798, *Bull. Sci. Soc. Philom. Paris* 3: 239. 1804, *Nova Genera et Species Plantarum* (quarto ed.) 1: 308. 1815, *Historia Naturalis Palmarum* 2: 37, pls. 35–36. 1824, *Historia Naturalis Palmarum* 3(7): 190. 1838, *Linnaea* 28: 258–259. 1856 [1857], *Bonplandia* 8(6): 102. 1860, *Palmiers* 247, 262. 1878 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(99): 920–921. 1930, *Taxon* 38: 105. 1989

in English: stilt palms, horn palm

in Brazil: palmeira barriguda, paxiúba barriguda, paxiubão

in Peru: barrigón, camona, conduma, huacra pona, morona, oseno, pachuba, paciuba, tarapoto

in Tropical America: paxiuba

in Venezuela: barrigón, chipiyek, codotodek, palma barrigona, palma de cacho, parapiye, ven-yei

Iris L. Iridaceae

Latin *iris* and Greek *iris*, *ireos*, *iridos* ‘the rainbow, a sweet-smelling plant’, the Greek goddess of the rainbow and messenger of the gods, daughter of Thaumias by the oceanid Electra; see van Rheede in *Hortus Indicus Malabaricus*. 11: t. 37. 1692, Carl Linnaeus, *Species Plantarum*. 1: 38–40. 1753, *Genera Plantarum*. Ed. 5. 24. 1754, *Reise durch verschiedene Provinzen des russischen Reichs* 3: 712. 1776, *Botanische Zeitung. Berlin* 4: 706. 1846, *Bot. Zeitung* 30: 499. 1872, *Journal of Botany, British and Foreign* 13: 105. 1875, *Handbook of the Irideae* 1. 1892 and V. Bertoldi, in *Archivum romanicum*. VI: 282. Genève-Firenze 1922, P. Sella, *Glossario latino emiliano*. [“unguentum yreos”] Città del Vaticano 1937, *Act. Inst. Bot. Acad. Sc. URSS* 4: 331. 1937, R. Strömberg, *Griechische Pflanzennamen*. See *Systema Vegetabilium*, editio decima sexta 5: 436. 1819, *Nov. Stirp. Dec.* 12. 1839, *Journal of Botany*, being a second series of the Botanical Miscellany 2: 45. 1840, *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 200–201. 1854, *Flora Brasiliensis* 6(1): 229. 1866, *Genera Plantarum* 2: 814. 1876, *Revisio Generum Plantarum* 2: 428. 1891, *Die*

Natürlichen Pflanzenfamilien 2: 102. 1895 and *Brittonia* 3: 189. 1939, *Proceedings of the American Philosophical Society* 86: 88. 1942, *Fieldiana, Botany* 28: 496, 498. 1953, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 26: 439, f. 9. 1966, *Memoirs of the New York Botanical Garden* 32: 371, 380–381. 1981

(Root infusion drunk as a strong emetic.)

Irvingia Hook.f. Irvingiaceae (Ixonanthaceae, Simaroubaceae)

After the British (b. Hoddam, Dumfries) surgeon Edward George Irving, 1816–1855 (d. Abeokuta, Nigeria), botanist, M.D. Edinburgh, wrote “Cultivation of cotton in Western Africa.” in *Hooker’s Journal of Botany*. 7: 297–302. 1855; see Ronald William John Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 41. 1971. Helmut Genaust suggests an origin of the name from the Kew gardener Walter Irving (1867–1934, d. Lightwater, Surrey), 1922 Assistant Curator, see R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 730. Stuttgart 1993, *Bulletin du Jardin Botanique National de Belgique* 65: 143–196. 1996, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 310. Basel 1996.

Irvingia gabonensis (Aubry-Lecomte ex O’Rorke) Baill. (*Fegimanra africana* (Oliv.) Pierre; *Irvingia barteri* Hook.f.; *Irvingia caerulea* Tiegh.; *Irvingia duparquetii* Tiegh.; *Irvingia erecta* Tiegh.; *Irvingia griffonii* Tiegh.; *Irvingia hookeriana* Tiegh.; *Irvingia pauciflora* Tiegh.; *Irvingia velutina* Tiegh.; *Mangifera africana* Oliv.; *Mangifera gabonensis* Aubry-Lecomte ex O’Rorke)

Tropical Africa. Tree, straight bole, inflorescence an axillary panicle, petals yellowish white, edible fruit pulp, closely related to *Irvingia wombolu*

See *Species Plantarum* 1: 200. 1753, *Journal de Pharmacie et de Chimie*, sér. 3 31: 275. 1857, *Trans. Linn. Soc. London* 23: 167. 1860, *Traité de Botanique Médicale Phanérogamique* 2: 881. 1884 and *Journal of Ethnopharmacology* 45(2): 125–129. 1995, *Bull. Jard. Bot. Belgique* 65: 173. 1996

(Bark rubbed onto the body to relieve pains, to treat diarrhea, yellow fever, hernia, applied to sores, wounds and against toothache, also as an antidote for poisoning. Leaf extract or decoction febrifuge. Kernels to treat diabetes.)

in English: African mango, bush mango, dika bread tree, dika nut, dika nut tree, rainy season bush mango, sweet bush mango, wild mango

in India: borbor

in Cameroon: andoc, andog, andok, andoo, aubry, banga ouiba, bopala, bwiba, bwiba bambale, ntwá, ndoa, ndoka, pekie, upa, wipa

in Central Africa: ebi

in Congo: bofalanga, ditoke, eniok, meba, mombulu, mueba, mutendu, olili

in Gabon: andogh, andok, dika, iba, magongo, mouiba, n’dock, ndock, odika, pain d’odika

in Ivory Coast: boborou, lubigniati

in Nigeria: abeje, agbono, akwebu, andok, bojep, bwiba-ba-mbale, bwivba, gborin, goro-ruwa, goron-biri, guiba, gwiba, hakokari, igidi, igiri-ohia, magona, mbaba, ndisok, ndogo, ndoka, ngoek, ngolon, nsing, nsinge, oba, obe, obono, ogboin, ogbonami, ogbono, ogui, ogwe, ogweyi, ogwi, ogiri, ogboin, ohere, okerli, omay, omeh, opopa, oro, oro-apon, oropa, osing, oyin, oyni, oyo, pekpeará, udika, ugiri, ujio, ujiri, urher-owi, weke, wipa;

in W. Africa: adeka, biba, peke

Irvingia grandifolia (Engl.) Engl. (*Irvingella grandifolia* (Engl.) Hallier f.; *Klainedoxa grandifolia* Engl.)

Tropical Africa. Tree, inflorescence a terminal branched panicle, edible pulp of the fruit, oil-rich seeds cooked and eaten

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 575. 1907, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 288, f. 4. 1911, *Beihefte zum Botanischen Centralblatt* 39: 68. 1921

(Bark decoction taken to relieve pain, fever. Bark macerated in palm wine taken as an aphrodisiac. Leaves decoction taken together with raw cassava tubers or with a decoction of the leaves of *Staudtia kamerunensis* Warb. taken to treat hypermenorrhoea.)

Vernacular names: andok ngoué, olène

Irvingia smithii Hook.f. (*Irvingella smithii* (Hook.f.) Tiegh.)

Tropical Africa. Tree, sweet fresh fruits sucked, oil-rich seeds eaten raw

See *Trans. Linn. Soc. London* 23: 167. 1860

(Bark decoction taken against dysentery. Magic, ritual, the bark.)

in Cameroon: andok, goron biri

in Nigeria: abeje, akwe-kwe, apipon, bojep, bwivba, goro-ruwa, goron-biri, jebere, man, okerli, oman, oro, oro-apin, owe

Irvingia wombolu Vermoesen

Tropical Africa. Tree, inflorescence an axillary panicle, pulp of the fruit bitter and slimy, edible oil from the seed

See *Manuel des Essences Forestières du Congo Belge* 136. 1923

(Bark rubbed onto the body to relieve pains, to treat diarrhea, yellow fever, hernia, applied to sores, wounds and against

toothache, also as an antidote for poisoning. Leaf extract febrifuge. Kernels to treat diabetes.)

in English: bitter bush mango, dry season bush mango

Iryanthera (A. DC.) Warb. Myristicaceae

See *Prodromus Florae Novae Hollandiae* 399. 1810, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 201. 1856, *Revisio Generum Plantarum* 2: 566. 1891, *Berichte der Deutschen Botanischen Gesellschaft* 13: 84. 1895, *Nova Acta Acad. (Dried roots used for the treatment of encephalitis, influenza, pneumonia, mumps and hepatitis.)

in English: asp-of-Jerusalem, dyer's weed, dyer's woad, woad

in China: ban lan gen, da qing ye, song lan

in Portuguese: pastel

Ischaemum L. Poaceae (Gramineae)

From the Latin *ischaemon* for a kind of styptic herb (Plinius), Greek *ischo*, *ischein* 'to restrain, hold, check' and *haima* 'blood', *ischaimos* 'staunching blood, styptic', the seeds of some species were used to stop bleeding, many species with taxonomic status questionable, genus difficult to distinguish from *Andropogon*, type *Ischaemum muticum* L., see *Species Plantarum* ed. 1, 2: 1049. 1753, *Familles des Plantes* 2: 38, 602. 1763, *Essai d'une Nouvelle Agrostographie* 111, 167. 1812, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 37, t. 460. 1799, *Flora of the British West Indian Islands* 560. 1864, *Monographiae Phanerogamarum* 6: 200–253. 1889 and *N. Amer. Fl.* 17: 94. 1909, *Bulletin du Muséum d'Histoire Naturelle* 27: 372. 1921, *Revue internationale de botanique appliquée et d'agriculture tropicale* 31: 211, 213. 1951, *Grasses of Burma ...* 171–186. 1960, *Annals of the Missouri Botanical Garden* 75: 866–873. 1988, *Bothalia* 21(2): 163–170. 1991, *Flora Mesoamericana* 6: 386–387. 1994, *Am. J. Bot.* 88: 1993–2012. 2001, *Contributions from the United States National Herbarium* 46: 275–276, 287. 2003.

Ischaemum muticum L. (*Anatherum muticum* (L.) P. Beauv.; *Andropogon muticus* (L.) Steud., nom. illeg., non *Andropogon muticus* L.; *Andropogon polymorphus* Steud.; *Andropogon relictus* (J. Presl) Steud.; *Andropogon repens* (Roxb.) Steud.; *Ischaemum glabratum* J. Presl; *Ischaemum repens* Roxb.)

Temperate and tropical Asia, Australia. Perennial, many-branched, creeping, spreading, rooting at the nodes, ascending, leafy, stoloniferous, sometimes scrambling among bushes animal food, fodder, palatable and nutritious, weed, erosion control, useful sand binder, tolerates flooding and short dry periods, sandy places, edges of secondary forest, drainage canals, ditches, seashore, open or disturbed habitats, sandy shores and beaches

See *Species Plantarum* 2: 1049. 1753, *Essai d'une Nouvelle Agrostographie* 128, 150. 1812, *Flora Indica; or descriptions ...* 1: 325. 1820, *Reliquiae Haenkeanae* 1(4–5): 328. 1830, *Synopsis Plantarum Glumacearum* 1: 374–375, 377. 1854, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885 and *Handb. (Leaves applied as poultice in headache.)

in English: drought grass, seashore centipede grass

in Indonesia: rumput kemarau, rumput kerupet, suket resap

in Malaysia: rumput kemarau, rumput tembaga jantan

in Sri Lanka: bada mal tana

in Thailand: ya-waitham, yaa waai, yaa wai thaam, ya wai tham

in Vietnam: môm trui

Ischaemum pilosum (Klein ex Willd.) Wight (*Andropogon pilifer* Steud.; *Andropogon pilosus* Klein ex Willd.; *Andropogon pilosus* Dufour ex Roem. & Schult., nom. illeg., non *Andropogon pilosus* Klein ex Willd.; *Andropogon pilosus* Sieber ex Kunth, nom. illeg., non *Andropogon pilosus* Klein ex Willd.; *Ischaemum pilosum* Hack.; *Ischaemum pilosum* Trimen; *Spodiopogon pilosus* Nees ex Steud.)

India. Fodder, best fed before flowering, suitable for hay and silage

See *Species Plantarum. Editio quarta* 4: 920. 1806, *Systema Vegetabilium* 2: 819. 1817, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 514. 1833, *Madras Journal of Literature and Science* 138. 1835, *Synopsis Plantarum Glumacearum* 1: 373. 1854, *Monogr. Phan.* [A. DC. & C. DC.] vi. (1889) 240. 1889

(Root bedbug repellent.)

in India: dungri kunda, kangyaan hullu, kanigyan hulla, kari, kunda, kundara gaddi, kundara gaddi hullu, kundara nattu, nuth, pharari, urranki

Ischnosiphon Körn. Marantaceae

From the Greek *ischnos* ‘thin, slender’ and *siphon* ‘a tube’, see *Species Plantarum* 1: 2. 1753, *Nouveau Mémoires de la Société Impériale des Naturalistes de Moscou* 11: 316, 346–348, t. 10, 11. 1859, *Revisio Generum Plantarum* 2: 691. 1891 and *Field Mus. Nat. Hist., Bot. Ser.* 13(1/3): 741–767. 1936, *Anales Inst. Biol. Univ. Nac. Mexico* 21(2): 319–343. 1951, *Fieldiana, Bot.* 24(3): 207–221. 1952, *Opera Bot.* 43: 68, 73, 90, 99. 1977, *Fl. Ecuador* 32: 11–192. 1988.

Ischnosiphon arouma (Aubl.) Körn. (*Ischnosiphon arouma* Körn.; *Maranta arouma* Aubl.)

Tropical America, French Guiana.

See *Histoire des plantes de la Guiane Française* 1: 3. 1775, *Nouveau Mémoires de la Société Impériale des Naturalistes de Moscou* 11: 348. 1859, *Revisio Generum Plantarum* 2: 691. 1891

(Leaves and stem juice caustic, vesicant.)

in Guiana: arouman

Isoberlinia Craib & Stapf ex Holland Fabaceae (Caesalpiaceae, Detarieae, Leguminosae)

From the Greek *isos* ‘equal’ and the genus *Berlinia* Sol. ex Hook.f., after the Swedish botanist Andreas (Anders) Henricus (Henricsson) Berlin, 1746–1773, pupil of Linnaeus, 1771–1773 plant collector in Sierra Leone with Henry Smeathman, Adam Afzelius and John Matthews; see Charles Dennis Adams (born 1920), “Activities of Danish botanists in Guinea, 1783–1850.” *Transactions of the Historical Society of Ghana.* 3: 30–46. Accra 1957, R.W.J. Keay, “Botanical Collectors in West Africa prior to 1860.” in *Comptes Rendus A.E.T.F.A.T.* 55–68. Lisbon 1962, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa.* 10. Utrecht 1971.

Isoberlinia angolensis (Benth.) Hoyle & Brenan (*Acacia globulifera* Saff.; *Berlinia angolensis* Welw. ex Benth.; *Isoberlinia angolensis* (Welw. ex Benth.) Hoyle & Brenan; *Isoberlinia densiflora* (Baker) Milne-Redh.; *Isoberlinia niembaensis* (De Wild.) P.A. Duvign.; *Isoberlinia tomentosa* sensu Torre & Hillc.; *Westia angolensis* (Welw. ex Benth.) J.F. Macbr.)

Angola, Tanzania. Perennial non-climbing tree, latex from pods yellow-brown, yellowish sweetly fragrant flowers

See *Bulletin of Miscellaneous Information Kew* 1912(2): 93–94. 1912, *Contributions from the Gray Herbarium of Harvard University* 59: 21. 1919, *Kew Bulletin* 4(1): 78. 1949

(Roots poisonous. Bark and leaves used for wounds and ulcers. For Newcastle disease (a highly contagious zoonotic bird disease), leaves and stalks are pounded and added to drinking water.)

in Angola: alunga, olomwe, omunue

in Tanzania: nito

in Zambia: umutobo

Isoberlinia dalzielii Craib & Stapf (*Berlinia dalzielii* (Craib & Stapf) Baker f.)

Nigeria.

See *Kew Bull. Addit. Ser.* 9: 267. 1911, *Bulletin of Miscellaneous Information Kew* 1912(2): 93–94. 1912, *The Leguminosae of Tropical Africa* 3: 690. 1930

(Stem exudate antiinflammation, poison antidote.)

Isoberlinia doka Craib & Stapf (*Berlinia doka* (Craib & Stapf) Baker f.; *Berlinia grandiflora* (Vahl) Hutch. & Dalziel)

Guinea, Sudan. Perennial non-climbing tree, scaly bark, slash dull orange-pink, glabrous twigs, leaves paripinnate, flowers white, terminal panicles, brownish pods oblong pubescent, young seeds eaten by baboons

See *Bulletin of Miscellaneous Information Kew, Addit. Ser.* 9: 267. 1911, *Bulletin of Miscellaneous Information Kew* 1912(2): 94. 1912, *The Leguminosae of Tropical Africa* 3: 688. 1931

(Leaves and bark decoction for fever; the decoction made from the bark of *Isoberlinia doka* and the roots of *Cochlospermum tinctorium* for jaundice, a washing.)

in Burkina Faso: kalsaka, sio, so

in Ivory Coast: chio, cho, tagba

in Nigeria: baborochi, bakar-doka, doka, mkovol

in W. Africa: ciinge, so, ta cige

Isoberlinia tomentosa (Harms) Craib & Stapf (*Berlinia dalzielii* (Craib & Stapf) Baker f.; *Berlinia tomentosa* Harms; *Isoberlinia angolensis* (Welw. ex Benth.) Hoyle & Brenan; *Isoberlinia dalzielii* Craib & Stapf; *Isoberlinia tomentosa* (Harms) Hutch. ex Greenway; *Westia tomentosa* (Harms) J.F. Macbr.)

Tropical Africa. Perennial non-climbing tree, pods with brown pubescence

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 321. 1901, *Bulletin of Miscellaneous Information Kew* 1912(2): 93. 1912, *Contributions from the Gray Herbarium of Harvard University* 59: 21. 1919, *Bulletin of Miscellaneous Information Kew* 1928(5): 203. 1928

(Decoction from bark of *Isoberlinia dalzielii* together with young leaves and bark of *Isoberlinia doka* used for fever.)

in Tanzania: mlebela, niito

Isocarpha R. Br. Asteraceae

From the Greek *isos* ‘equal’ and *karpheos* ‘chip of straw, chip of wood, mote, splinter, nail’, referring to the receptacles.

Isocarpha oppositifolia R. Br. (*Isocarpha oppositifolia* (L.) Cass.; *Santolina oppositifolia* L.)

Jamaica.

See *Species Plantarum* 2: 842–843. 1753, *Systema Naturae*, Editio Decima 2: 1207. 1759, *Species Plantarum*, Editio Secunda 2: 1179. 1763, *Transactions of the Linnean Society of London* 12: 110. 1817 [Observations on the Natural Family of Plants called Compositae.], *Dictionnaire des Sciences Naturelles* [Second edition] 24: 19. 1822 and *Ann. Miss. Bot. Gard.* 62: 958. 1975

(Roots infusion for chest colds; leaves used to increase appetite.)

Isodon (Schrad. ex Benth.) Spach Lamiaceae (Labiatae)

From the Greek *isos* ‘equal’ and *odous, odontos* ‘tooth’, see *Labiatarum Genera et Species* 40. 1832, *Histoire Naturelle des Végétaux. Phanérogames* 9: 162. 1840, *Flora* 25. Beibl. 2: 25. 1842 and *Taxon* 17: 239. 1968, *Flora of Japan* 3a: 310. 1993.

Isodon adenanthus (Diels) Kudô (*Isodon adenanthus* Kudo; *Plectranthus adenanthus* Diels; *Plectranthus wui* Sun ex C.H. Hu; *Plectranthus wui* Y.Z. Sun; *Rabdosia adenantha* (Diels) H. Hara)

China.

Isoetes L. Isoetaceae (Lycopodiaceae)

Latin *isoetes* for a small house-leek, for an annual plant (Plinius), Greek *isoetes*, from *isos* 'equal' and *etos* 'a year', referring to the evergreen species or to the submerged species; see Carl Linnaeus, *Species Plantarum*. 2: 1100. 1753, *Genera Plantarum*. Ed. 5. 486. 1754, *Definitiones Generum Plantarum* ed. 3. 500. 1760, *Comment. Soc. Crittogam. Ital.* 1: 111, 114. 1862 and *Annals of the Missouri Botanical Garden* 44: 121. 1957, *Fern Gaz.* 11(2–3): 141–162. 1975, *Brenesia* 18: 4. 1981 [1980 publ. 1981], *Proc. Kon. Ned. Akad. Wetensch. C* 84(2): 168. 1981, *Ann. Missouri Bot. Gard.* 77(2): 239. 1990, *Ann. Missouri Bot. Gard.* 79(3): 615. 1992, *Indian Fern J.* 13: 51–61. 1996.

Isoetes coromandeliana L.f. (*Calamaria coromandelina* (L.f.) Kuntze; *Isoetes coromandelina* L.f.; *Isoetes tuberculata* Gena & Bhardwaja)

India.

See *Supplementum Plantarum* 447. 1781, *Revisio Generum Plantarum* 2: 828. 1891 and *New Bot.* 1: 160–169. 1974, *J. Bombay Nat. Hist. Soc.* 81(1): 167. 1984, *Ann. Missouri Bot. Gard.* 79(3): 615. 1992

(Plant tonic.)

Isoetes rajasthanensis Gena & Bhardwaja

India.

See *J. Bombay Nat. Hist. Soc.* 81(1): 165. 1984, *Aspects Pl. Sci.* 14: 495–499. 1992, *Indian Fern J.* 21: 19–22. 2004

(Plant tonic.)

Isoetes reticulata Gena & Bhardwaja

India.

See *J. Bombay Nat. Hist. Soc.* 81(1): 166. 1984, *Aspects Pl. Sci.* 14: 495–499. 1992, *Indian Fern J.* 21: 19–22. 2004

(Plant tonic.)

Isoglossa Oerst. Acanthaceae

From the Greek *isos* 'equal' and *glossa* 'a tongue', referring to the two-lipped corolla; see Anders Sandøe Oersted (A. Sandøe Ørsted, A. Sandö Örsted) (1816–1872), in *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn*. [= *Vidensk. Meddel. Dansk Naturhist. Foren. Kjøbenhavn*.] 155. Copenhagen 1854.

Isoglossa lactea Lindau ex Engl.

Tanzania. A trailing or scrambling hairless herb, ascending, rooting from a woody base, white flowers broadly funnel shaped, hard brown pointed capsules, rough seeds, weedy, leaves cooked and eaten, plant used for fodder, riparian forest, forest floor

See *Genera Plantarum* 102–103. 1789 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 55. 1894 and *Tanzania journal of health research* 11(1): 23–28. 2009

(Antimicrobial, used to treat bacterial infections, diarrhea and heal wounds. Roots boiled and the decoction drunk as a remedy for syphilis and coughs.)

in Tanzania: litimbatimba, mboniyati-ngoshi

Isolona Engl. Annonaceae

Greek *isos* 'equal' and *loma* 'border, margin', referring to the equal petals, some suggested from *isos* and the genus *Annona*, see *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] 1: 161. 1897 and *Phytochemistry* 40(3): 967–973. 1995, *Phytochemistry* 65(2): 227–232. 2004.

Isolona campanulata Engl. & Diels (*Isolona leonensis* Sprague & Hutch.; *Isolona soubreana* A. Chev.; *Isolona soubreana* A. Chev. ex Hutch.)

Tropical Africa. Small tree, green-yellow corolla

See *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 83. 1901, *Bulletin of Miscellaneous Information Kew* 1916: 151. 1916, *Exploration Botanique de l'Afrique Occidentale Française ...* 1: 12. 1920, *Flora of West Tropical Africa* [Hutchinson & Dalziel] 1: 58. 1927

(Roots and stem bark antiseptic, tonic, febrifuge, for skin diseases, fevers, hematuria, bronchial infections.)

Isolona cauliflora Verdc.

Tanzania. Small tree or shrub, pinkish-red flowers and fruits on trunk and branches

See *Kew Bulletin* 25(1): 34. 1971, *Natural Product Research* 18(3): 253–258. 2004

(Antifungal, antimalarial.)

Isolona cooperi Hutch. & Dalziel ex G.P. Cooper & Record (*Isolona campanulata* Engl. & Diels)

Tropical Africa. Treelet, strongly smelling, green-yellow flowers

See *Yale University, School of Forestry, Bulletin* 31: 15. 1931, *Phytochemical Analysis* 16(5): 357–363. 2005

(Tonic.)

Isolona hexaloba (Pierre) Engl. & Diels (*Isolona brunelii* De Wild.; *Isolona hexaloba* Engl. & Diels; *Isolona hexaloba* Engl.; *Isolona leucantha* Diels; *Isolona pleurocarpa* Diels; *Isolona pleurocarpa* subsp. *nigerica* Keay; *Isolona sereti* De Wild.; *Isolona solheidii* De Wild.; *Monodora hexaloba* Pierre)

Tropical Africa. Treelet

See *Monogr. Afrik. Pflanzen.-Fam.* 6: 82. 1901, *Bot. Jahrb. Syst.* xxxix. 484–485. 1907, *Ann. Mus. Congo Belge, Bot. sér.* 5, 3[1]: 82–83. 1909 [1911–1912 publ. Aug 1909], *Kew Bulletin* 1952: 157. 1952

(Antimalarial.)

in Cameroon: nding, nom ntom

in Central African Republic: moningo, monyingo

in Congo: ehula, ehyla, mbelzok

in Nigeria: aghako-eze, akila, akilla

Isomacrolobium Aubrév. & Pellegr. Fabaceae (Caesalpinioideae, Leguminosae)

From the Greek *isos* ‘equal’ and the genus *Macrolobium* Schreb., see *Genera Plantarum* 1: 30. 1789 and *Bulletin de la Société Botanique de France* 104: 497. 1958, *Systematics and Geography of Plants* 78: 137–144. 2008. Close to *Anthonotha*.

Isomacrolobium explicans (Baill.) Breteler (*Anthonotha explicans* (Baill.) J. Léonard; *Macrolobium heudelotii* Planch. ex Benth.; *Triplisomeris explicans* (Baill.) Aubrév. & Pellegr.; *Triplisomeris explicans* Aubrév. & Pellegr.)

West and Central Africa. Tree, axillary or terminal pendulous panicle, yellow fragrant flowers

See *Adansonia* 6: 181. 1866, *Transactions of the Linnean Society of London* 25: 308. 1866 and *Kew Bulletin* 8(4): 490. 1953[1954], *Bulletin du Jardin Botanique de l'État* 25: 202. 1955, *Bulletin de la Société Botanique de France* 104: 497. 1958, *Syst. & Geogr. Pl.* 78(2): 143. 2008

(Fruits, leaves and roots analgesic.)

Isonandra Wight Sapotaceae

From the Greek *isos* ‘equal’ and *aner, andros* ‘man, male, androecium’, alluding to the stamens, see *Mantissa Plantarum* 2: 555, 563. 1771, *Flora de Filipinas* 403. 1837, *Icon. Pl. Ind. Orient.* [Wight] 2(1): 4. tt. 359, 360. 1840.

Isonandra lanceolata Wight (*Bassia lanceolata* Bedd.; *Bassia lanceolata* (Thwaites) Bedd.; *Bassia lanceolata* A. DC.; *Dichopsis lanceolata* Fern.-Vill.; *Dichopsis lanceolata* C.B. Clarke; *Dichopsis lanceolata* (Thwaites) C.B. Clarke; *Isonandra lanceolata* Thwaites, nom. illeg.; *Palaquium lanceolatum* (Thwaites) Engl.)

India. Tree or shrub, white sap, yellowish white flowers

See *Icones Plantarum Indiae Orientalis* [Wight] tt. 359, 360. 1840, *Prodr.* (DC.) 8: 199. 1844, *Enumeratio Plantarum Zeylaniae* [Thwaites] 442. 1864, *The Flora Sylvatica for Southern India* 141. 1871, *Novissima Appendix ad Floram Philippinarum.* 124. Manila, 1880, *The Flora of British*

India 3: 541. 1882, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 12: 511. 1890

(Leaves and flowers made into a paste consumed for giddiness and rheumatism.)

in India: kaattunilapatchilai

Isotoma (R. Br.) Lindley Campanulaceae (Lobeliaceae)

From the Greek *isos* ‘equal’ and *tome* ‘division, section, cutting’, the segments of the corolla are equally cut; see J. Lindley, in *Edwards's Botanical Register.* 12: t. 964. (Apr.) 1826.

Isotoma hypocrateriformis (R. Br.) Druce (*Isotoma hypocrateriformis* Druce; *Laurentia hypocrateriformis* (R. Br.) E. Wimm.; *Lobelia hypocrateriformis* R. Br.)

Australia.

See *Prodr. Fl. Nov. Holland.* 565. 1810 and *Rep. Bot. Exch. Cl. Brit. Isles* 1916, 629. 1917, *Pflanzenr.* (Engler) Campanulac.-Lobel. 13, fig. 10. 1943, *Ann. Naturhist. Mus. Wien*, lvi. 336. 1948, *Das Pflanzenr.* Heft 107 (1953) 403. 1953, *Amer. J. Bot.* 83(10): 1356–1364. 1996

(Said to be poisonous, toxic.)

in Australia: Woodbridge poison

Isotoma petraea F. Muell. (*Laurentia petraea* (F. Muell.) E. Wimmer)

Australia.

See *Linnaea* 25: 420. 1853 and *Ann. Naturhist. Mus. Wien*, lvi. 336. 1948, *Amer. J. Bot.* 83(10): 1356–1364. 1996, *Evolution.* 56(6): 296–1302. 2002

(Said to be poisonous, toxic, dangerous.)

in English: leafy rock isotome, rock isotome

in Australia: cheeky bugger

Itea L. Iteaceae (Grossulariaceae)

Itea, the Greek name for the willow; Akkadian *hisu, histu* ‘necklace, basket, bond’; see Carl Linnaeus, *Species Plantarum.* 1: 199. 1753, *Genera Plantarum.* Ed. 5. 92. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 480. Ansbach 1852, *Theoria Systematis Plantarum* 151. 1858.

Itea chinensis Hook. & Arn.

Vietnam. Tree, white flowers

See *The Botany of Captain Beechey's Voyage* 189, pl. 39. 1833

(Leaves decoction applied for skin diseases.)

in China: shu ci

in India: dieng, myllons

Iva L. Asteraceae

After the mint *Ajuga iva* (L.) Schreber, possibly referring to the similar odour or aroma; see Carl Linnaeus, *Species Plantarum*. 2: 988–989. 1753, *Genera Plantarum*. Ed. 5. 426. 1754, *Familles des Plantes* 2: 118, 549. 1763, *Index Seminum Horti Francofurtensis* 1836: 4. 1836, *Linnaea* 12 (suppl.): 78. 1838, *Transactions of the American Philosophical Society*, new series, 7: 346–347. 1840, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 20. 1848, *Synoptical Flora of North America* 1(2): 245, 247. 1884, *Die Natürlichen Pflanzenfamilien* 4(5): 221. 1890 and *North American Flora* 33(1): 8. 1922, *Plant Systematics and Evolution* 195(1–2): 10. 1995, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 311. Basel 1996, Pruski, J.F. “Nomenclatural notes on *Cyclachaena* (Compositae: Heliantheae), resurrection and lectotypification of *Iva* sect. *Picrotus*, and report of *Iva* (syn. *Cyclachaena*) as new to Armenia.” *Compositae Newsletter* 42: 32–42. 2005. Potentially allergenic sesquiterpene lactones have been isolated from some members of the genus *Iva*.

Iva xanthiifolia Nutt. (*Cyclachaena pedicellata* Rydb.; *Cyclachaena xanthiifolia* Fresen.; *Euphrosyne xanthiifolia* (Fresen.) A. Gray; *Euphrosyne xanthiifolia* (Nutt.) A. Gray; *Iva paniculata* Nutt.; *Iva pedicellata* (Rydb.) Cory; *Iva xanthiifolia* var. *pedicellata* (Rydb.) Kittell)

North America.

See *Species Plantarum* 2: 988–989. 1753, *Enumeratio Methodica Plantarum* 45. 1759, *Familles des Plantes* 2: 118, 549. 1763, *The Genera of North American Plants* 2: 185. 1818, *Index Seminum Horti Francofurtensis* 1836: 4. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 530. 1836, *Transactions of the American Philosophical Society*, new series, 7: 347. 1840, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4(1): 20. 1848, *Smithsonian Contributions to Knowledge* 5(6): 85. 1853, *Synoptical Flora of North America* 1(2): 247. 1884, *Die Natürlichen Pflanzenfamilien* 4(5): 221. 1890 and *Ill. Fl. N. U. S.* ed. 2. 3: 338. 1913, *North American Flora* 33(1): 8, 10. 1922, *Rhodora* 38(455): 407. 1936, *A Flora of Arizona and New Mexico ...* 425. 1941, Mitchell, J.C., Rook, A. *Botanical dermatology*. Greenglass Ltd, Vancouver, B.C. 1979, *Acta Societatis Botanicorum Poloniae* 52: 205–214. 1983, *Plant Systematics and Evolution* 195(1–2): 10. 1995

(The plant can cause dermatitis in sensitive humans after contact with the leaves. Lactating cows that ingest the leaves produce bitter-tasting milk.)

in English: big marsh-elder, false ragweed

Ixeris Cass. Asteraceae

A native Indian name, see *Bull. Sci. Soc. Philom. Paris* 1821: 173. 1821, *Dict. Sci. Nat.*, ed. 2. [F. Cuvier] 25: 62. 1822, *Mem. Amer. Acad. Arts* ser. 2, 6: 397. 1859 and *Bot. Mag.* (Tokyo) 34: 147. 1920, *J. Bot.* 75: 45–46. 1937, *Fl. URSS* 29: 388. 1964, *Korean J. Pl. Taxon* 21: 153–163. 1991, *Mem. Fac. Sci. Kyoto Univ., Biol.*, 15(1–2): 31. 1992, *Komarovia* 2: 91. 2002.

Ixeris polycephala Cassini (*Crepis bonii* Gagnepain; *Ixeris dissecta* (Makino) C. Shih; *Ixeris matsumurae* (Makino) Nakai; *Ixeris matsumurae* var. *dissecta* (Makino) Nakai; *Ixeris polycephala* fo. *dissecta* (Makino) Ohwi; *Ixeris polycephala* var. *dissecta* (Makino) Nakai; *Lactuca biauriculata* Lév. & Vaniot; *Lactuca biauriculata* Vaniot & H. Lév.; *Lactuca matsumurae* Makino; *Lactuca matsumurae* var. *dissecta* Makino; *Lactuca polycephala* (Cassini) Benth)

China, India. Slender, flaccid herb, glabrous, yellow flowers, reddish brown achene narrows into slender brown beak, leaves as vegetable

See *Dictionnaire des Sciences Naturelles* ed. 2. [F. Cuvier] 24: 50. 1822, *Genera Plantarum* 2: 526. 1873, *Botanical Magazine* 6: 56. 1892 and *Bulletin de l'Académie Internationale de Géographie, Botanique* xx. *Mém.* 143. 1909, *Botanical Magazine* 24: 252. 1910, *Botanical Magazine* 34: 153, 265. 1920, *Bulletin de la Société Botanique de France* 68: 47. 1921, *Flora of Japan* 1246. 1953, *Taxon* 29: 351–352. 1980, *Acta Phytotaxonomica Sinica* 31(6): 536–537. 1993

(Roots as a (blood) purifier and febrifuge, given in jaundice, for stopping bleeding, promoting tissue regeneration, removing necrotic tissue, decreasing inflammation of soft tissues, stopping uterine bleeding and for treating furuncle, boils.)

in China: ku mai cai

Ixiolaena Benth. Asteraceae

Greek *ixia*, *ixos* ‘mistletoe, bird-lime’ and *chlaena*, *chlaenion* ‘cloak’, from the sticky bracts; see S.L. Endlicher et al. [Eduard Fenzl, George Benthams and Heinrich Wilhelm Schott], *Enumeratio plantarum quas in Novae Hollandiae ... collegit C. de Hügel*. 66. Wien 1837.

Ixiolaena brevicompta F. Muell.

Australia.

See *Enumeratio Plantarum* 66. 1837 and Bourke C.A. “The clinical differentiation of nervous and muscular locomotor disorders of sheep in Australia.” *Aust. Vet J.* 72(6): 228–234. 1995

(Poisoning has caused the death of many sheep in south-west Queensland and western New South Wales in recent years. Consumption of the mature seed head affects sheep in two ways: sudden death, and tiring syndrome. The disease is believed to be caused by crepenynic acid, an unusual fatty acid present in the seed.)

in English: billy buttons, flat billy-buttons, plains plover daisy, plover daisy

Ixora L. Rubiaceae

From the Sanskrit *Iswari*, name of the goddess Parvati, Mahadevi, the great goddess, wife of God Shiva to whom the flowers of *Ixora coccinea* are offered in Indian temples; Parvati is the Mountain's daughter, daughter of Himavat, the Himalaya Mountains, one of many names for the Universal Mother; Iswara is the Highest Lord, Supreme or Personal God; Paramesvara is the Supreme Lord or Ruler, God Siva in the third perfection as Supreme Mahadeva, Siva-Sakti, mother of the universe; see Carl Linnaeus, *Species Plantarum*. 1: 110. 1753 and *Genera Plantarum*. Ed. 5. 48. 1754, *Philosophical Transactions of the Royal Society of London* 51(2): 935, t. 23. 1761, *Selectarium Stirpium Americanarum Historia* ... 19. 1763, *Familles des Plantes* 2: 146. 1763, *Histoire des plantes de la Guiane Française* 1: 110–111, t. 43. 1775, *Genera Plantarum* 71. 1789, *Sylva Telluriana* 12. 1838, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 11: 24. 1850, *Mémoires de l'Académie Royale des Sciences, Belles-Lettres et Arts de Lyon: Section des Sciences* 10: 223. 1860, *Bull. Soc. Linn. Normandie* 9: 346. 1865, *J. Bot. (Morot)* 13: 2. 1899 and *J. Straits Branch Roy. Asiat. Soc.* 61: 20. 1912, *Notulae Systematicae*. *Herbier du Museum de Paris* 16: 19. 1960, *Blumea* 31(2): 311–312. 1986, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 328. Stuttgart 1993. Bark from *Ixora* sp. used for stomachache and cuts.

Ixora brachypoda DC. (*Ixora radiata* Hiern; *Ixora radiata* var. *latifolia* De Wild.; *Ixora rhodesiaca* Bremek.)

Tropical Africa.

See *Prodr.* 4: 488. 1830, *Fl. Trop. Afr.* 3: 163. 1877 and *Ann. Mus. Congo Belge, Bot.*, V, 1: 83. 1904, *Kew Bull.* 2: 30. 1947

(Fruits and leaves antimicrobial, antiseptic, for skin diseases, colds, measles.)

Ixora brunnescens Kurz

Andaman and Nicobar Is. Small tree, small white terminal flowers, green fruits

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 41(2): 317. 1872

(Leaves mixed with leaves of *Scaevola taccada* applied on forehead for headache; leaf juice mixed in water and taken orally as febrifuge; leaf decoction given in cough, fever, headache.)

in India: hamaok, koraychcho, to pon euin, toponeuin

Ixora casei Hance

Caroline Is., Marshall Is., Gilbert Is.

See *Species Plantarum* 1: 110. 1753, *Annales Botaniques Systematicae* 2: 754. 1852 and Fosberg, F.R. & Sachet,

M.-H. "Flora of the Gilbert Island, Kiribati, Checklist." *Atoll Research Bulletin* 295: 1–33. 1987, *Monographs in Systematic Botany from the Missouri Botanical Garden* 73: 1–177. 1999

(Abortifacient.)

Ixora chinensis Lam. (*Bemsetia paniculata* Raf.; *Gaertnera hongkongensis* Seem.; *Ixora blanda* Ker Gawl.; *Ixora coccinea* Curtis, nom. illeg.; *Ixora colei* Gentil; *Ixora crocata* Lindl.; *Ixora dixiana* hort. ex Gentil; *Ixora dixiana* Gentil; *Ixora dubia* Schult.; *Ixora flammea* Salisb.; *Ixora incarnata* Wallich; *Ixora incarnata* DC.; *Ixora incarnata* Roxb. ex Sm.; *Ixora kroneana* (Miq.) Bremek.; *Ixora pallida* Reinw. ex Miq.; *Ixora rosea* Sims, nom. illeg.; *Ixora rosea* Wallich; *Ixora rosea* K. Schum.; *Ixora speciosa* Willd.; *Ixora stricta* Roxb.; *Ixora stricta* Wight ex Wall.; *Ixora stricta* var. *mekongensis* Pierre ex Pit.; *Pavetta arborea* Blanco; *Pavetta chinensis* (Lam.) Roem. & Schult.; *Pavetta kroneana* Miq.; *Pavetta stricta* (Roxb.) Blume; *Sykesia hongkongensis* (Seem.) Kuntze; *Tsiangia hongkongensis* (Seem.) But)

SE China to Indochina. A shrub, many-stemmed, leaves obovate-oblong coriaceous, stipules long-awned, flowers orange-red or white not fragrant, fruit globose black, on river banks

See *Bot. Mag.* 5: t. 169. 1791, *Revis. Gen. Pl.* 2: 425. 1891 and *Fl. Indo-Chine* 3: 328. 1924, *Repert. Spec. Nov. Regni Veg.* 37: 196. 1934, *Blumea* 31: 311. 1986, Fosberg, F.R. & Sachet, H.H. "Three cultivated *Ixoras* (Rubiaceae)." *Baileya* 23(2): 74–85. 1989

(A decoction of the root after childbirth and against bronchial disorders. An infusion of the fresh flowers a remedy against incipient tuberculosis and haemorrhage, also prescribed in amenorrhoea and hypertension. An infusion of leaves or flowers used against headache.)

in English: red ixora, Chinese ixora

in Peru: bouquet de novia rosado

in China: long chuan hua, mai tzu mu

in Indonesia: kembang soka, siantan

in Japan: san-dan-ka

in Malaysia: jarum-jarum merah, pechah periok, pechah priok, penujuh, siantan hutan

in Philippines: santan, santan-pula, santan-tsina

in Cambodia: kam rontea

in Vietnam: d[ow]n d[or], b[ooj]ng trang d[or]

Ixora coccinea L. (*Ixora coccinea* Curtis; *Ixora coccinea* Comm. ex Lam.; *Ixora coccinea* var. *lutea* Hutch.; *Ixora coccinea* L. forma *lutea* (Hutch.) Fosberg & H.H. Sachet; *Ixora grandiflora* Loddiges; *Ixora lutea* Hutch.; *Ixora montana* Lour.; *Pavetta coccinea* (L.) Blume)

India, Sri Lanka, Vietnam. Shrub, many stemmed, leaves coriaceous, petiole absent or short, stipules long-awned, flowers orange to scarlet or white, yellow, triangular calyx lobes, not fragrant, fruit globose reddish fleshy, in lowland areas

See *Species Plantarum* 1: 110. 1753, *Bijdr.*: 950. 1826

(Bark powder applied to sores, burns and injuries. Flowers in the treatment of dysentery, diarrhea, scabies, leucorrhea and dysmenorrhea; flowers decoction to treat catarrhal bronchitis. Roots analgesic, febrifuge, astringent, antiinflammatory and anti-diarrheal, sedative, stomachic, antiseptic, diuretic and antidiarrhetic. Ceremonial, flowers used for *puja* in temples.)

in English: burning love, flame flower, flame of the woods, Indian ixora, jungle flame, jungle geranium, red ixora, scarlet ixora

in Peru: buquet de novia

in Bali: bungan soka

in Cambodia: kam ron tea

in India: bandhu-jivaka, bandhuka, cetti, cheththi, paranti, rajana, saoltua, schetti, sveta paranti, tecci, tetti, thetti chelthi, velutta cetti

in Indonesia: kembang asoka, kembang santen merah, soka beureum, soka merah

in Philippines: dwarf santan, santan, santan-pula, tangpupo

in Thailand: khem baan, khem nuu, khem farang

in Vietnam: b[oo]ng trang d[or], d[ow]n d[or]

Ixora congesta Roxb. (*Ixora griffithii* Hook.; *Pavetta congesta* (Roxb.) Miq.)

Malesia, Burma.

See *Fl. Ind.* 1: 397. 1820, *Bot. Mag.* 73: t. 4325. 1847, *Fl. Ned. Ind.* 2: 269. 1857

(Leaves and stem for fevers, toothache, measles, bronchial infections and inflammations.)

Ixora cuneifolia Roxb.

Indochina.

See *Species Plantarum* 1: 110. 1753, *Fl. Ind.* 1: 380. 1820 and *Nucleus* 30: 114–124. 1987

(For irregular menstrual cycle, for blood purification, leaves and flowers infusion taken orally.)

Ixora grandifolia Zoll. & Moritzi (*Ixora crassifolia* Ridley; *Ixora ridleyi* Bremek.; *Pavetta macrophylla* Blume)

Indochina to Malesia. A shrub or small tree, leaves coriaceous glabrous, stipules broadly triangular, inflorescence erect spreading, flowers long-pedicellate, corolla white, fragrant, fruit globose or 2-lobed red turning black, in lowland and forest, on swampy areas

See *Bijdr.*: 953. 1826, *Ann. Mus. Bot. Lugduno-Batavi* 4: 197. 1869

(A decoction of the root used to treat colic. Leaves eaten with betel before childbirth, at the commencement of labor to ease delivery; an infusion of leaves drunk against stomachache. Fruit eaten raw for hangover.)

in English: pink river ixora

in India: sinkoh

in Indonesia: ki soka, sikatan

in Malaysia: jarum hutan, kayu tajam, kelat tandok, segading jantan

in Thailand: khem yai

Ixora javanica (Blume) DC. (*Ixora amara* Steud.; *Ixora amoena* Wallich ex G. Don; *Ixora cyathosperma* Wall., nom. nud.; *Ixora javanica* DC.; *Ixora javanica* var. *paucinervia* Corner; *Ixora javanica* var. *retinervia* Corner; *Ixora mutabilis* Reinw. ex Miq.; *Ixora stricta* Roxb. var. *amoena* (Wall. ex G. Don) Ridl.; *Ixora stricta* var. *blumeana* Kurz; *Ixora stricta* var. *javanica* (Blume) Kuntze; *Ixora stricta* var. *pubistyla* S. Moore; *Pavetta javanica* Blume)

Himalaya, Malesia. A shrub, leaves herbaceous, stipules long-awned, inflorescence loose, flowers orange-red sometimes pink or yellow, not fragrant, anthers orange, fruit the size of a pea, in evergreen forest

See *Fl. Malay Penins.* 2: 94. 1923, *Gard. Bull. Straits Settlement.* 11: 206. 1941, Nair, S.C. & Panikkar, K.R. "Antitumour principles from *Ixora javanica*." *Cancer Letters* 49(2): 121–126. 1990, Nair, S.C. et al. "Inhibitory effects of *Ixora javanica* extract on skin chemical carcinogenesis in mice and its antitumour activity." *Cancer Letters* 60(3): 253–258. 1991

(Extracts of the plant showed promising antitumour activity.)

in English: common red ixora, Javanese ixora

Malayan names: siantan hutan, siantan jantan

in Thailand: khem thong

Ixora lanceolata Lam. (*Ixora amboinica* (Blume) DC.; *Ixora fulgens* auct. non Roxb.; *Ixora longifolia* Sm.; *Pavetta amboinica* Blume; *Pavetta amboinica* var. *celebica* Miq.)

Java, New Guinea, Moluccas. Shrub, leaves lanceolate herbaceous or subcoriaceous, inflorescence loose, red flowers, fruit red turning black at maturity

See *Encycl.* 3: 343. 1789, *Cycl.* 19: 3. 1811, *Bijdr.*: 949. 1826, *Prodr.* 4: 487. 1830, *Ann. Mus. Bot. Lugduno-Batavi* 4: 194. 1869

(Roots used against pain, both internally and externally; chewing the roots to ease toothache.)

in Indonesia: jarong-jarong

Ixora lobbii Loudon (*Pavetta lobbii* (Loudon) Teijsm. & Binn.) (for the British explorer Thomas Lobb, 1818/1820–1894 (d. Cornwall), plant collector for Messrs. Veitch in Malaysia, Indonesia, India and Burma (Myanmar); see John Gregory Hawkes, “William Lobb in Ecuador and the enigma of *Solanum lobbianum*.” *Taxon*. 41(3): 471–475. 1992; J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 393. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 202. Oxford 1964; G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. 1: 163–164. London 1904; J. Ewan, ed., *A Short History of Botany in the United States*. 9. New York and London 1969.)

Indochina, Thailand. Shrub, leaves entire subcoriaceous, stipules triangular acuminate, inflorescence a subsessile loose corymb, bright orange-red flowers with red pedicel, calyx campanulate, not fragrant, fruit black, in forest

See *Cat. Hort. Bot. Bogor*. 112. 1866

(A decoction of the root, a tonic, given during and after childbirth, and a poultice is applied against headache.)

in English: glossy ixora

in Brunei: petagar mangas

in Malaysia: bunga selang, jarum, kramat hujan, pechah priok, salang

in Thailand: khem daeng

Ixora nigricans R. Br. ex Wight & Arn. (*Ixora affinis* Wall. ex Craib; *Ixora affinis* var. *arguta* (Hook.f.) Craib; *Ixora affinis* var. *plumea* (Ridl.) Craib; *Ixora arguta* (Hook.f.) King & Gamble; *Ixora densa* R. Br. ex Wall., nom. nud.; *Ixora erubescens* Wall. ex G. Don; *Ixora memecylifolia* Kurz; *Ixora nigricans* Zoll. ex Miq.; *Ixora nigricans* R. Br.; *Ixora nigricans* var. *arguta* Hook.f.; *Ixora nigricans* var. *erubescens* (Wall. ex G. Don) Kurz; *Ixora nigricans* var. *genuina* Kurz, nom. inval.; *Ixora nigricans* var. *ovalis* Pierre ex Pit.; *Ixora nigricans* var. *typica* Hochr., nom. inval.; *Ixora plumea* Ridl.; *Pavetta erubescens* (Wall. ex G. Don) Miq.)

Trop. Asia, India, Burma. Shrub or small tree, leaves herbaceous, inflorescence loose often nodding, white flowers fragrant, fruit globose black, in evergreen forest

See *Species Plantarum* 1: 110. 1753, *Candollea* 5: 258. 1834, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 46(2): 149. 1877 and *Fl. Siam*. 2: 147. 1934, *Taxon* 31: 576–579. 1982

(Leaves astringent and antidiarrhetic; leaves and flowers made into a paste consumed with water for constipation and for killing intestinal worms.)

in English: white needles

in India: aathusiruvengaipatchilai

in Thailand: khem nam, khem phuut maa, khem tuut maa

in Vietnam: b[oo]ng trang tr[aws]ng, d[ow]n tr[aws]ng

Ixora pavetta Andrews (*Ixora arborea* Roxb. ex Sm.; *Ixora arborea* Lodd.; *Ixora decipiens* DC.; *Ixora parviflora* Lam.; *Ixora parviflora* Vahl, nom. illeg.; *Ixora parviflora* var. *zeylanica* Hook.f.; *Ixora pavetta* Benth.; *Ixora pavetta* Roxb.)

Bangladesh, India, Sri Lanka. Tree, evergreen, white smooth bark, coriaceous leaves, small white flowers in terminal cymes, black capsules didymous, in dry deciduous forests

See *Symb. Bot.* (Vahl) iii. 11. t. 52. 1794, *Bot. Repos.* 2: t. 78. 1799, *Hort. Bengal.* 10. 1814, *Fl. Ind.*, ed. Carey & Wall., i. 395, 1820, *Prodr.* (DC.) 4: 488. 1830, *Fl. Ind.*, ed. Carey, i. 385. 1832, *Fl. Brit. India* 3: 143. 1880

(Plant antiviral, spasmolytic, hypotensive; plant gum as an ointment to cure headache. Leaf paste applied on boils. Flowers in whooping cough. Pounded bark in water given in vomiting; stem bark extract taken as hepatic stimulant, hepatoprotective, for liver ailments; stem bark decoction in debility, anemia, to relieve toothache and kill the worms of the teeth and mouth. Fruit and root juice used during time of delivery to stop bleeding and also as a postpartum remedy; roots and fruits decoction given for female diseases. Veterinary medicine, stem bark for bovine ephemeral fever.)

in English: torch tree

in India: bajrahi, boga rongan, exjora, gorivi, kotagandhal, lakondi, lohajangi, lohkhandi, nevali, nevari, perunthutti, petereka, rangan, sulundu, telkurua

Malayan names: kelat tandok, kepayang ayer, medang tekukor, padijang

Ixora thwaitesii Hook.f. (*Ixora acuminata* Thwaites, nom. illeg.; *Ixora acuminata* Roxb.)

Sri Lanka, India. Woody shrub or undershrubs, ribbed branches, elliptic coriaceous glabrous leaves, flowers in cymes

See *Fl. Ind.* (Carey & Wallich ed.) 1: 393. 1820, *Enum. Pl. Zeyl.* [Thwaites] 155. 1858–1864, *Fl. Brit. India* 3: 138. 1880, *Handl. Fl. Ned. Ind.* (Boerlage) ii. 1. (1891) 135. 1891 and Govaerts, R. *World Checklist of Selected Plant Families Database*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003

(Roots pounded and applied on wounds; roots decoction given for lactation, diarrhea and fever. Pounded mixture of leaves of *Ixora acuminata* with leaves of *Millettia caudata* and roots of *Stauranthera grandifolia* applied on snakebite.)

in India: bonglong, laungla-pranpi-theka, longlapranpitheka, tudana

Jacaranda Juss. Bignoniaceae

From the Brazilian vernacular name; see *Genera Plantarum* 138. 1789, *Exposition des Familles Naturelles* 1: 317. 1805, Camara, Manoel Arruda da (1752–1810), *Travels in Brazil* 500. London 1816, Meissner, C. F. (Carl Friedrich) (1800–1874), *Plantarum vascularium genera, secundum ordines naturales digesta eorumque differentiae et affinitates tabulis diagnostacis expositae*. Lipsiae, 1836–43, *Sylva Telluriana* 79. 1838, *Transactions of the American Philosophical Society*, new series, 7: 429. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 9: 239. 1845 and *Field Mus. Bot.* 9(1): 15–30. 1989, *Nordic Journal of Botany* 15: 493–511. 1995, H. Walter Lack, “Jacquin’s *Selectarum Stirpium Americanarum Historia*. The extravagant second edition and its title pages.” *Curtis’s Botanical Magazine* 15(3): 194–214. August 1998, *Fl. Veracruz* 103: 1–16. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2448–2450. 2001, *Novon* 13(3): 289–295. 2003. Various parts of these plants are poisonous.

Jacquinia macrocarpa Cav. subsp. ***pungens*** (A. Gray) B. Ståhl (*Bonellia macrocarpa* (Cav.) B. Ståhl & Källersjö subsp. *pungens* (A. Gray) B. Ståhl & Källersjö; *Jacquinia pungens* A. Gray)

Mexico.

See *Flora Jamaicensis* 27. 1760, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 55–56, pl. 483. 1799, *Plantae Novae Thurberianae* 325–326. 1854 and *Biotropica* 2: 112–119. 1970, *Nordic Journal of Botany* 9(1): 23. 1989, *Novon* 14(1): 117. 2004

(To cure dizziness, an infusion of the flowers used to wash the face; the liquid also used for eardrops to cure an earache. Fish poison.)

Common names: luruche, mata peje, rosadilla, San Juan, San Juanico

Jacquinia ruscifolia Jacq.

Himalaya.

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 15. 1760 and *Bulletin of the Calcutta School of Tropical Medicine* 17(2): 51. 1969, *Fitoterapia* 79(7–8): 589–591. 2008

(Extracts of roots antifungal.)

Jaeschkea Kurz Gentianaceae

After Rev. Heinrich August Jaeschke (Jäschke), plant collector from Kashmir and W. Himalayas, author of *Romanized Tibetan and English Dictionary*. Kyelang in British Lahoul 1866. See Anton Joseph Kerner (1831–1898), *Novae plantarum species Tiroliae, Venetiae, Carnioliae, Carinthiae, Styriae et Austriae*. [Decas 2. 1870: “... species ... continens descriptiones plantarum novarum a cl. Jaeschke in Himalajae collectarum.”] Innsbruck 1870–1871, Wilhelm Sulpiz Kurz (1834–1878), in *J. Asiat. Soc. Bengal. Pt. 2, Nat. Hist.* 39: 230, t. 13. 1 Sep 1870 and Theodor Bechler, *Heinrich*

August Jäschke, der geniale Sprachforscher der Mission der Brüdergemeine unter den Tibetern. Herrnhut 1930, M.N. Chaudhri, I.H. Vegter and C.M. De Wal, *Index Herbariorum*, Part II (3), *Collectors I-L*. Regnum Vegetabile vol. 86. 1972.

Jaeschkea oligosperma Knobl. (*Gentiana oligosperma* Griseb.; *Jaeschkea gentianoides* Kurz)

India. Annual, purplish-blue tubular flowers in panicles

See *Prodr.* (DC.) 9: 94. 1845, *J. Asiat. Soc. Bengal. Pt. 2, Nat. Hist.* 39: 230, t. 13. 1870, *Bot. Centralbl.* ix. 387. 1894

(Aerial parts blood purifier, febrifuge, antiseptic, for wounds, cough, cold and headache.)

Jaltomata Schltld. Solanaceae

Mexican popular name for the species, see *Sertum Anglicum* 1: 19, t. 1. 1788, *Florae Peruviana, et Chilensis Prodromus* 31, t. 34. 1794, *Index Seminum* [Halle] 1838: 8. 1839 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(5B/1): 3–267. 1962, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974.

Jaltomata procumbens (Cavanilles) J. Gentry (*Atropa contorta* (Ruiz & Pav.) Pers.; *Atropa contorta* Pers.; *Atropa contorta* (Ruiz & Pav.) Spreng.; *Atropa contorta* (Ruiz & Pav.) Cav.; *Atropa procumbens* Cav.; *Bellinia contorta* (Ruiz & Pav.) Roem. & Schult.; *Bellinia contorta* Roem. & Schult.; *Bellinia procumbens* Roem. & Schult.; *Bellinia procumbens* (Cav.) (Plant infusion taken as diuretic and febrifuge.)

in Mexico: cachimbo, jaltomate, tomatillo del monte

Janakia J. Joseph and V. Chandrasekaran Apocynaceae (Asclepiadaceae, Periplocaceae)

After the Indian scientist Edavaleth Kakkath Janaki Ammal, 1897–1984, botanist, cytologist, from 1956 to 1960 Director of the Central Botanical Laboratory of Botanical Survey of India, with Cyril Dean Darlington (1903–1981) wrote *Chromosome Atlas of Cultivated Plants*. London 1945; see *Contributions to the Botany of India* 64. 1834 and *Journal of the Indian Botanical Society* 57(4): 308. Dec. 1978.

Janakia arayalpathra J. Joseph & Chandras. (*Decalepis arayalpathra* (J. Joseph & Chandras.) Venter)

India. Shrub

See *Journal of the Indian Botanical Society* 57(4): 309. 1978, *Taxon* 46(4): 712. 1997

(Root juice blood purifier, cooling, a decoction given for peptic ulcer.)

in India: amruthapala

Jasminum L. Oleaceae

Persian words *yasman*, *yasmin* or *yasamin*; Arabic *yas(a)min* or *ysmyn*; ancient Greek *iasmelaion*, *iasimon myron* 'a perfume', Italian *gelsomino*; see Carl Linnaeus, *Species Plantarum*. 1: 7–8. 1753, *Genera Plantarum*. Ed. 5. 7. 1754, *Flore portugaise* ou description de toutes les ... 1: 62. 1809, *Prodr.* (DC.) 8: 301, 309, 312. 1844 and Ernest Weekley, *An Etymological Dictionary of Modern English*. 1: 779. Dover Publications, New York 1967, *J. Cytol. Genet.* 26: 129–131. 1991, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 313–314. Basel 1996, *Kew Bull.* 56(4): 912. 2001, *Novosti Sist. Vyssh. Rast.* 34: 142. 2002.

Jasminum acuminatissimum Blume (*Jasminum multiflorum* fo. *acuminatissimum* (Blume) Bakh. f.)

India. Large climber, simple opposite leaves, white flowers

See *Museum Botanicum* 1: 276. 1851 and *Blumea* 6: 383. 1950

(For ringworm.)

in India: yudhika

Jasminum angustifolium Willd. (*Jasminum angustifolium* Ker Gawl.; *Jasminum angustifolium* Wall.)

India. Shrub

See *Sp. Pl.*, ed. 4 [Willdenow] 1(1): 36. 1797, *Botanical Register*; consisting of coloured ... 7: pl. 521. 1821

(Used in Ayurveda and Sidha. Roots applied for ringworm and leprosy. Veterinary medicine, leaves ground with those of *Leucas aspera* given for tympany.)

in India: adachalam, adavi-malle, adavi malli, adavi mallige, adavimallie, adavimalle, adavimalli, adavimallige, adigal, adivimalle, adivimalli, arpotam, asphota, atacalam, atikal, atikarakkoti, atikaram, ban malati, ban-mallica, ban-mallica, banmallika, caat mallica vayr, canikatam, cankatam, chattu-mallika, chirimalle, chiru malli, chirumalle, cirramalli, cirrumallikai, cirumalle, citakanci, citakanciceti, cittamalli, curanacini, doddakadumallige, edroli, eruvanthige, garuda malle, garudamalle, irattapintakkoti, irattapintam, iru, kaadu iravanthige, kaadu mallige, kaattumalli, kadumallige, kadumallige, kamallikai, kanakam, kanamalli, kanamalliceti, kanamallika, kanamaulval, kanamavval, kanamullai, kanana-mallika, kananamullika, kanmaulval, kanmelavval, kathmali, kattu-malika, kattu-malligai, kattumalligai, kattumallika, kanmukal, karacuram, kattumallikai, kattumulla, kattumullai, kattumullaikkoti, kattupiccakam, kattupiccakamulla, kattupichakam, kattupichakamulla, katu-mallige, katu-pitsjegam-mulla, katupitsjigammulla, kava, kavalai, kavali, kavanai, keccaciracceti, keccaciram, kecham, kenika, kokalivalai, kokuntacceti, kokuntam, kullimallikai, kuruvilaangkodi, kusara, linga malli, lingamalle, makaravalai, maladi, malaimulli, malati, malli, manval, marugu, maruku, mauvari, mauvarikkoti, motanikacceti, motanikam, motayanti, motayanticceti, mucumallikai, mullai, mullapu, munal, muttumullai, muttumullaicceti, mwari, nutavacceti, nutavam, otikam, piccakam, pirakuti, priya, puccikam, punalmallikai, punamalli, purusana, rucci, rucimallikaikkoti, sanna malli, shirumalli, sirimalle, srimalli, supooja, supuja, tacam, tapaciyam, taracukkoti, tautikamullai, tautikamullaicceti, ulampecacceti, ulampecam, vanamalli, vanamallige, vanamallika, vanamallikai, vanamalti, vanamaulval, vauvutam, yumam, yuti, yutika, yutikai, yutikakkoti, yutikam

Jasminum arborescens Roxb. (*Jasminum arborescens* Bojer; *Jasminum arboreum* Schult.)

India. Shrub, climbing, fragrant flowers

See *Hort. Bengal.* 3. 1814, *Fl. Ind.*, ed. Carey & Wall., i. 94. 1820, *Fl. Ind.*, ed. Carey, i. 95. 1832, *Hortus Maurit.* 203. 1837

(Used in Ayurveda and Unani. Leaves juice with black pepper and garlic acts as emetic, also used in viscid phlegm in bronchial tubes, impotence, headache, skin diseases, mouth ulcers. Contact therapy, the scent of flowers inhaled to cure headache.)

in India: adavi jaji, adavi malli, adavi mallige, adavimalle, adavimalli, adivimalle, adivimulli, ambashtha, balapushapi, ban malli, bara-kunda, bela, burakunda, cameli, chemeli, chemeli, dhur-malti, dhur malti, dhurmalti, dodda kaadu mallige, doddakadumallige, doddkaadu mallige, ganika, gulchambeli, hambu mallige, jai, jangli mali, jangli-mongra, jati,

juhi, kattumalligai, kumdi, kundi, kusar, kusara, kusaara, kutmanibel, madhumadavi, madhvi, magadhi, malati, mutabela, naagamalle, nabamallika, naevaali kundi, naga malli, nagamalle, nagamalli, nagamallika, nava maalike, nava mallige, navamaalike, navamalike, navamallige, navamallika, nuvamullika, raayanaevaali, raanjaayi, saptala, suchimallika, sucimallika, sumana, tivva malli, varakunda, visamallige, yuthika

in Tibet: naba malika

Jasminum auriculatum Vahl

Tropical Africa.

See *Species Plantarum* 1: 7. 1753 and *Proceedings of the Indian Science Congress Association* 68 (Sect. VI): 89. 1981, *Journal of Tree Sciences* 6: 89–93. 1987, *Journal of Cytology and Genetics* 24: 71–77. 1989, *Cytologia* 57: 27–32. 1992

(Used in Ayurveda and Sidha. Leaves juice for oral ulcers, piles. Veterinary medicine, leaf paste mixed with turmeric applied in boils, blisters, ulcers and wounds; leaves along with those of *Cassia italica* and roots of *Hemidesmus indicus* pounded and the extract given orally for tympany; fruits of *Gardenia latifolia* along with leaves of *Jasminum auriculatum*, stem bark of *Helicteres isora* pounded and the extract given orally for tympany; roots of *Helicteres isora* along with those of *Coccinia grandis* and leaves of *Jasminum auriculatum* pounded and the extract given orally for tympany; leaves along with those of *Ocimum sanctum*, roots of *Tephrosia purpurea* pounded and the extract given orally for cough.)

in India: adavi malli, adavi teega-malli, adavimalli, adavimallu, adavimolla, adavimolle, adavimulla, adavimolla, adavitheega malle, bolidda, chameli, cucakkiracceti, cucak-kiram, davana mallige, erraadavimolla, erradavimolla, ettadavimolla, ganike mallige, hemapushpika, hurinaballi, ilancitacceti, ilancitam, ilankalatitacceti, irincakam, irincakamallikai, irkkumallikai, jaajimallige, jati, jay, jooyi, juhi, juyi, kadaramallige, kadamu mallige, karpu, karpuri, karpuricceti, karunamalli, kattaku, kattakumullaicceti, kotimullai, kudathargana balli, kullimallikai, kurmalli, maagadhi, madhyaanamallige, madhyanamallige, magadhi, magdhimallige, maghyamu, malati, mallatheega, mallatiga, malle, mallethige, malletige, molla, mollalu, mucumallikai, mullai, mullaikkodi, mulle, nocculam, oosimalli, paandhareejui, sanna jaji, sanna mallige, sannadzaji, sannajaajulu, sannajaji, sannajaajulu, sannamaallige, sannamallige, sevantige, soojimalle, soojimallige, sucimulla, sudimalle, sujimallige, svarnajuthica, tellaadacimolla, telladavimolla, thellaadavimolla, turotaki, turotakicceti, tusimulla, uccimallikai, ucimallikai, udigai, usimalligai, utikai, vanamalligai, vanamallikai, vasanthi, vasanti, yatika, yuthika

in Tibet: sipusa, sipusi

Jasminum azoricum L. (*Jasminum azoricum* mult. auct., non L.; *Jasminum fluminense* Vell.; *Jasminum suaveolens* (L.) Salisb.; *Jasminum suaveolens* Salisb.)

India, South America.

See *Species Plantarum* 1: 7. 1753, *Prodr. Stirp. Chap. Allerton* 12. 1796, *Florae Fluminensis* 10. 1825[1829], *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 312. 1844, *Flora Brasiliensis* 6(1): pl. 84, f. 1. 1868 and *J. Cytol. Genet.* 26: 129–131. 1991

(Leaf juice applied to wounds, burns, boils, abscesses.)

in India: jaaji, jazimalle

Jasminum bifarium Wall. (*Jasminum bifarium* Wall. & G. Don)

India, Malay Peninsula.

See *A Numerical List of Dried Specimens* [Wallich] n. 2866. 1830

(Roots for yaws.)

Malay name: melor hutan

Jasminum bignoniaceum Wall. & G. Don

India, Sri Lanka.

See *A General History of the Dichlamydeous Plants* 4: 63. 1837

(Used in Ayurveda.)

in India: gandadhya, haemapushpika, haima, hasarumallige, hasirumallige, hemapushpi, hemapushpika, jangari, jooyi, kanakaprabha, kattumulla, malto, manohara, nagapushpika, pachayadavimolla, pidayudi, pidigai, pimpalle, pita, pitayuthi, pitika, pitmalti, ponmallika, raktagandha, saayile, semmalligai, seppumalligai, shikhandi, sugandha, suvanayudi, suvarnavha, suvarnayuthika, svarnajui, svarnayuthi, vyaktagandha, yuvatishtha

Jasminum caudatum Wall. ex Lindl. (*Jasminum ovatum* Wall.)

India. Climbing shrub, white fragrant flowers in paniculate cymes, green berries

See *Edwards's Botanical Register* 28: t. 26. 1842

(Balm from root paste and mustard oil applied on ringworm.)

in India: metaishing

Jasminum coarctatum Roxb. var. *coarctatum* (*Jasminum bracteatum* Wall., nom. nud.; *Jasminum exsertum* Buch-Ham. ex Wall., nom. nud.; *Jasminum hirsutum* Wall., nom. nud.; *Jasminum latifolium* Buch-Ham. ex Wall., nom. nud.; *Jasminum reticulatum* Wall. & G. Don; *Jasminum rigidum* Thwaites; *Jasminum rottlerianum* Wall. ex DC.; *Jasminum rottlerianum* var. *glabrior* C.B. Clarke; *Jasminum rottlerianum* var. *thwaitesii* C.B. Clarke)

SE Asia, China, India.

See *Flora Indica*; or descriptions of Indian Plants 1: 91. 1820, *Prodr.* 8: 305. 1844, *Enum. Pl. Zeyl.*: 190. 1860, *Fl. Brit. India* 3: 593. 1882

(Used in Ayurveda and Sidha.)

in India: erumaimullai, kattumalligei, malli, mallikai, uyyakkontan, uyyakkontan, vanamalliga, vaara mallige, vara mallige, varamallige, vismogri

Jasminum curtisii King & Gamble

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(2): 259. 1906

(For ulcers, chew the leaves along with betel and sprinkle the ulcer.)

Malay name: pekan

Jasminum cuspidatum Rottl. & Willd.

India.

See *Neue Schriften Ges. Naturf. Freunde Berlin* 4: 192. 1803

(Used in Sidha. Leaf juice given against fever and to eradicate tapeworm.)

in India: adavi malle, adavia malle, kaadu malle, khoksha, malle, palcorrikirai, parcorrikirai, parcorrikirai, peddamalle, porrikirai

Jasminum dichotomum Vahl (*Jasminum brevipes* Baker; *Jasminum bukobense* Gilg; *Jasminum gardeniodorum* Gilg ex Baker; *Jasminum gossweileri* Gilg & G. Schellenb.; *Jasminum guineense* G. Don; *Jasminum mathildae* Chiov.; *Jasminum nigericum* A. Chev.; *Jasminum noctiflorum* Afzel.; *Jasminum ternifolium* Baker; *Jasminum ternum* Knobl.)

Tropical Africa.

See *Enum. Pl. Obs.* 1: 26. 1804

(Leaves and berries antiinflammatory, wound dressing, febrifuge, antiseptic, for parasitic skin infection.)

Jasminum elongatum (P.J. Bergius) Willd. (*Jasminum acuminatissimum* Blume; *Jasminum aemulum* R.Br.; *Jasminum aemulum* f. *glabrum* (C.B. Clarke) Kobuski; *Jasminum aemulum* f. *interstans* Domin; *Jasminum aemulum* var. *brasii* P.S. Jasminum simplicifolium G. Forst.

Australia, Pacific.

See *Fl. Ins. Austr.* 3. 1786 [Oct-Nov 1786]

(Infusion of the bark a treatment for jaundice and for ulcers. Leaves used to cure headaches.)

in Tonga: tutu`uli

Jasminum trichotomum B. Heyne ex Roth (*Jasminum gardnerianum* Wight; *Jasminum intermedium* Wight ex C.B. Clarke, nom. inval.; *Jasminum trichotomum* Heyne; *Jasminum wightii* C.B. Clarke)

India.

See *Nov. Pl. Sp.*: 6. 1821, *Fl. Brit. India* 3: 598–599. 1882

(Used in Sidha.)

in India: mullai

Jateorhiza Miers Menispermaceae

Greek *iatos* ‘curable’, *iatros* ‘a surgeon’, *iaomai* ‘to heal, cure’ and *rhiza* ‘a root’, referring to the medicinal properties, a source of a tonic, see *Regni Vegetabilis Systema Naturale* [Candolle] 1: 511, 515–531. 1817 [1818 publ. 1–15 Nov 1817], *Niger Flora* [W.J. Hooker]. 212. 1849.

Jateorhiza macrantha (Hook. f.) Exell & Mendonca (*Cocculus macranthus* Hook. f.; *Jateorhiza strigosa* Miers)

Nigeria, Cameroon. Herbaceous dioecious climber, liana, pubescent to strongly hairy vine, scrambler, twiner, tuberous roots, watery reddish-brown juice, axillary inflorescences, succulent roots and fruit eaten

See *Hooker’s Icones Plantarum* t. 759. 1848, *Niger Flora* 213. 1849 and *Journal of Botany, British and Foreign* 73, Suppl. Polypet. 10. 1935, *Journal of Ethnopharmacology* 7: 1–93. 1983, *Journal of Ethnopharmacology* 102: 336–343. 2005

(Leaf sap applied to stop bleeding during pregnancy, also dropped into the ears, nose or eyes against headache. The bark, together with that of *Kigelia africana*, used against snakebites.)

Jateorhiza palmata (Lam.) Miers (*Jateorhiza palmata* Miers; *Menispermum palmatum* Lam.)

Tanzania. Twiner, liana, climber, stems with hooked trichomes, branchlets densely appressed hairy, succulent tuberous roots, axillary inflorescences, fruit yellow, clear viscous sap around seeds, in rich alluvial soils

See *Species Plantarum* 1: 340–341. 1753, *Encyclopédie Méthodique, Botanique* 4: 99. 1797, *Niger Flora* [W.J. Hooker]. 212, 214, t. 18, in nota. 1849 and *Pharmazeutische Zeitung* 113(26): 945–950. 1968, *Planta Medica* 53: 271–273.

1987, *Biological and Pharmaceutical Bulletin* 18(4): 634–636. 1995, *Cancer Letters* 183(2): 131–139. 2002

(Used in Ayurveda and Sidha. Whole plant and leaves stomachic, used for dysentery, male impotence, bronchial infections. Roots and stem aphrodisiac, tonic, febrifuge, astringent, for dysentery, fevers, bronchitis, hypertension. Root bark a general tonic, antipyretic, antimicrobial, hypotensive, sedative, anthelmintic, antifungal; root eaten against snakebite and as a vermifuge; root decoction for fevers, dyspepsia, dysentery, diarrhea, malaria.)

in English: calumba root

in Tanzania: mkaumwa

in Trop. Africa: calumba, colomba, columba

in Yoruba: agbihi, atutu

(Young shoots blood purifier, purgative, tonic, for headache, cough, sores.)

Jeffersonia Barton Berberidaceae (Podophyllaceae)

Dedicated to Thomas Jefferson, 1743–1826 (Monticello), the third President of the United States 1801–1809, 1779–1781 2nd Governor of Virginia, 1785–1789 United States Ambassador to France, 1790–1793 1st United States Secretary of State, see *Species Plantarum* 1: 505. 1753, *Transactions of the American Philosophical Society* 3: 334, 340. 1793.

Jeffersonia diphylla (L.) Pers. (*Jeffersonia diphylla* Pers.; *Podophyllum diphyllum* L.)

North America. Perennial herb, low growing, basal long-stemmed leaves 2-lobed, white bowl-shaped flowers at the top of a bare stalk

See *Species Plantarum* 1: 505. 1753, *Transactions of the American Philosophical Society* 3: 340. 1793, *Synopsis Plantarum* (Persoon) 1: 418. 1805

(Whole plant decoction taken for diarrhea. Roots infusion used for treatment of dropsy, cramps, spasms, gravel and urinary ailments, and for gall and diarrhea, and as a poultices for sores, rheumatism and ulcers.)

in English: rheumatism-root, twinleaf

Joannesia Vell. Euphorbiaceae

Named to honor João (Lat. Ioannes) VI, 1769–1826, Regent of Portugal, in 1807 sailed for Brazil, in 1816 was proclaimed King in Brazil on the death of his mother, the independence

of Brazil was recognized in 1825, see *Dictionnaire des Sciences Naturelles* 2: 113. 1804.

Joannesia princeps Vell. (*Anda brasiliensis* Raddi; *Anda gomesii* A. Juss.; *Andicus pentaphyllus* Vell.; *Joannesia insolita* Pittier)

Brazil.

See Velloso, José Mariano da Conceição (1742–1811), *Alogr. Alkalis*: 199. Lisboa, 1798, *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen, tabulis aeneis* 18 illustratum 39, t. 12/37. 1824, *Fl. Flumin.*: 80. 1829 and *Bol. Soc. Venez. Ci. Nat.* 6(41): 8. 1940, *Taxon* 30: 153. 1981

(Latex poisonous. Seeds purgative, toxic, poisonous; oil applied for burns. Bark infusion astringent, for diarrhea. Latex as fish poison.)

in Brazil: anda-çu

in French Guiana: anda, bois Johana (des créoles)

Johannesteijsmannia H.E. Moore Arecaceae (Palmae)

Named for the Dutch botanist Johannes Elias Teijsmann (Teysmann), 1809–1882, traveller, gardener and botanical explorer, plant collector, 1831–1869 Curator of the Buitenzorg (Bogor) Botanic Gardens; see E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, *Principes* 5: 116. 1961, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 365. 1965, Theodore W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 397. Boston, Mass. 1972, Stafleu and Cowan, *Taxonomic literature*. 6: 201–204. 1986, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993, *Palms* 53(3): 147–152. 2009.

Johannesteijsmannia altifrons (Rchb.f. & Zoll.) H.E. Moore (*Teysmannia altifrons* Rchb.f. & Zoll.)

Pen. Thailand to W. Malesia. A trunkless palm, with large simple undivided leaves coming directly from an underground rootstock, leaves for thatching roofs and walls

See *Principes* 5: 116. 1961, *Plant Systematics and Evolution* 189: 83–122. 1994, *Kew Chromosome Conference* 4: 249–265. 1995

(Petioles burnt and the ashes applied topically to the body of children with respiratory problems.)

in English: diamond joey, joey palm, umbrella leaf palm

Johannesteijsmannia lanceolata J. Dransf.

Pen. Malaysia.

See *Gard. Bull. Singapore* 26: 78. 1972

(Seed decoction drunk to reduce fever among children.)

Johannesteijsmannia magnifica J. Dransf.

Pen. Malaysia.

See *Gard. Bull. Singapore* 26: 75. 1972

(Petioles ashes used for small wounds.)

Johannesteijsmannia perakensis J. Dransf.

Pen. Malaysia.

See *Gard. Bull. Singapore* 26: 72. 1972

(Powdered seeds applied to the face, chest or tongue for curing sore throat, asthma and cough.)

Juanulloa Ruíz & Pavón Solanaceae

Dedicated to Jorge Juan y Santacilla, 1713–1773 (d. Madrid) and Antonio de Ulloa y de la Torre Giral, 1716–1795 (d. Cádiz, Spain), scientists and officers in the Spanish Royal Navy, 1735–1745 members of the Hispano-French Commission for the measurement of one degree of an arc (with the French Charles-Marie de la Condamine (1701–1774), Louis Godin (1704–1760), Pierre Bouguer (1698–1758) and Joseph de Jussieu), authors of *Noticias Americanas*. Madrid 1772. Jorge Juan was squadron commander of the Royal Armada, Director of the Royal Seminary of Nobles, member of the Royal Society and founder of the astronomical observatory of Cádiz, wrote *Disertación histórica y geográfica sobre el meridiano de demarcación entre los dominios de España y Portugal y los parajes por donde pasa en la América meridional*. Madrid 1749. Ulloa wrote *Relación histórica del viaje a la América meridional*, hecho de orden de S. Mg., para medir algunos grados de Meridiano terrestre ... con otras varias *Observaciones astronómicas y físicas*. [The *Observaciones astronómicas*, etc. which form tom. V and have a special titlepage, are by J. Juan y Santacilla.] Madrid 1749. See Johann Joachim Schwabe, *Allgemeine Historie der Reisen zu Wasser und (zu) Lande*. Leipzig 1747–1774, *Florae Peruvianaes, et Chilensis Prodromus* 27, t. 4. 1794, *Flora Peruviana* 2: 47. 1799, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 480. Ansbach 1852, M. Colmeiro y Penido, *La Botánica y los Botánicos de la Península Hispano-Lusitana*. Madrid 1858 and Francisco Cervera y Jiménez Alfaro, *Jorge Juan y la colonización española en América*. Madrid 1927, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(5B/1): 3–267. 1962, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974, J. Vernet, in *D.S.B.* 13: 530–531. New York 1981, *Annals of Botany* 92(5): 725–730. 2003.

Juanulloa ochracea Cuatrec.

Colombia. Shrub, climbing epiphytic, coriaceous leaves

See *Brittonia* 10: 148. 1958

(Ayahuasca admixture plant. Stem bark and leaves used for wounds.)

Juglans L. Juglandaceae

Jovis glans, Latin *Jovis* ‘of Jupiter’ and *glans* ‘an acorn, nut, a fruit with a kernel’, *juglans* ‘a walnut, a walnut tree’, see *Species Plantarum* 2: 997. 1753, *Versuch über die Arzneikräfte der Pflanzen* 143. 1818, *Bonplandia* (Hanover) 9: 335. 1861 and *Bulletin de la Société Botanique de France* 11: 22. 1909, *Ann. Missouri Bot. Gard.* 65(4): 1072. 1978 (publ. 1979), *Monogr. Syst. Bot. Missouri Bot. Gard.* 2: 1160–1163. 2001.

Juglans cinerea L. (*Wallia cinerea* (L.) Alef.)

China.

See *Species Plantarum* 2: 997. 1753, *Systema Naturae*, Editio Decima 1272. 1759, *Bonplandia* 9: 335. 1861 and Kuang Ko-zen & Lu An-ming. *Juglandaceae*. In: Kuang Ko-zen & Li Pei-chun, eds., *Fl. Reipubl. Popularis Sin.* 21: 6–44. 1979

(Antiinflammatory.)

in English: butternut, white walnut

Juglans mandshurica Maxim. (*Juglans cathayensis* Dode; *Juglans cathayensis* var. *formosana* (Hayata) A.M. Lu & R.H. Chang; *Juglans collapsa* Dode; *Juglans draconis* Dode; *Juglans formosana* Hayata; *Juglans stenocarpa* Maxim.)

China, Japan.

See *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Pétersbourg* 15: 127. 1856, *Primitiae Florae Amurensis* 78. 1859 and *Bulletin de la Société Dendrologique de France* 47, 49. 1909, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 283–284. 1911, *Komarov Lectures*. 20: 47–61. 1973, *Flora Republicae Popularis Sinicae* 21: 35. 1979

(Extract of the shell applied to athlete's foot. Cotyledons effective anticancer agents.)

in China: hu tao qiu

in Japan: mesko, neski, ninum-ni

Juglans microcarpa Berland. (*Juglans rupestris* Engelm. ex Torr.)

North America.

See *Report of an Expedition down to the Zuni and Colorado Rivers* 171, pl. 15–16. 1853

(Leaves and bark piscicide.)

Juglans neotropica Diels

Peru. Tree, smooth bark, reddish leaves serrate, indehiscent fruits, hard endocarp

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 398. 1906, Manning, W.E. “The genus *Juglans* in South America and West Indies.” *Brittonia* 12: 1–26. 1960, Latorre, F. “*Juglans neotropica* Diels, Tocte-Nogal.” *Ciencia y Naturaleza* (Quito) 11(1):

66–76. 1980, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, *AAU Reports* 34: 1–443. 1994

(Leaf infusion astringent, antiseptic, used for skin wounds, ulcers, diarrhea; used externally for leucorrhoea.)

Juglans nigra Linnaeus (*Wallia nigra* (Linnaeus) Alefeld)

North America. Perennial tree

See *Species Plantarum* 2: 997. 1753, *Bonplandia* 9: 335. 1861 and *Ill. Fl. N. U. S.* ed. 2. 1: 578. 1913, MacDaniels, L.H. “Perspective on the black walnut toxicity problem—apparent allergies to man and horse.” *Cornell Vet.*, 73: 204–207. 1983, *Acta Biologica Cracoviensia, Series Botanica* 29: 1–17. 1987, *Journal of Wuhan Botanical Research* 8: 301–310. 1990, Galey, F.D. et al. “Black walnut (*Juglans nigra*) toxicosis: a model for equine laminitis.” *J. Comp. Pathol.*, 104: 313–326. 1991, M.R. Gilmore, *Uses of Plants by the Indians* ... 22. 1991, *Vet. Parasitol.* 148(3–4): 325–340. 2007, *Fitoterapia*. 79(3): 217–219. 2008

(Moderately toxic. The shavings of wood from this tree have caused laminitis in horses, breathing problems, gastroenteritis. Pollen of black walnut has been implicated in causing laminitis in horses, inflammation of the laminae in the hoof. Juglone, a naphthoquinone, has been found in the bark, nuts, and roots of black walnut. Antibacterial, used as a miscellaneous disease remedy, a dermatological aid, and a psychological aid. Veterinary medicine, anthelmintics, used to treat endoparasites in pigs and pets.)

in English: black walnut

in North America: cha-sapa, chak, chak-hu, gma, hma, noyer noir, tdage, tdage-hi, sahtaku

Juglans regia L. (*Juglans duclouxiana* Dode; *Juglans fallax* Dode; *Juglans kamaonia* (C. DC.) Dode; *Juglans kamaonia* Dode; *Juglans orientis* Dode; *Juglans regia* var. *kamaonia* C. DC.; *Juglans regia* var. *sinensis* C. DC.; *Juglans sinensis* (C. DC.) Dode; *Juglans sinensis* Dode)

Pakistan, Nepal. Tree, edible nuts

See *Species Plantarum* 2: 997. 1753, *Annales des Sciences Naturelles, Botanique, série 4* 18: 33. 1862 and *Bulletin de la Société Dendrologique de France* 2: 67–98. 1906, *Fl. W. Pakistan* 14: 3. 1972, *Taxon* 29: 725–726. 1980, *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *Acta Agriculturae Universitatis Hebeiensis* 11: 48–55. 1988, *Journal of Cytology and Genetics* 23: 219–228. 1988, *Systematics Association Special Volume* 40(2): 131–135. 1989, *Journal of Wuhan Botanical Research* 8: 301–310. 1990, *Journal of the Japanese Society for Horticultural Science* 1996: 677–683. 1996, *J. Med. Food*. 11(3): 533–538. 2008, *J. Nat. Prod.* 73(3): 338–345. 2010, *Food Chem. Toxicol.* 48(1): 441–447. 2010

(Used in Ayurveda, Unani and Sidha. Plant parts used in a formulation to treat breast cancer, human cancer cell antiproliferative and antioxidant. Oil from the seed kernels digestive,

carminative, stimulant, for body itching, stomachache. Fruits useful in rheumatism. Bark good for the gums; bark juice anthelmintic; stem bark decoction drunk as a vermifuge, to destroy and expel intestinal worms. Exocarp decoction in warm water used for frost bite. Leaves antioxidant and anti-diabetic, extract from leaves decreases the blood sugar level, has a positive impact on lipid metabolism; leaves decoction for sores; leaves and outer rind of fruits used for eczema, syphilis and rheumatism. Leaves and bark insect repellent, botanical insecticide. Worshipped, ceremonial, ritual, kernel for the worship of Lord Shiva. Leaves, bark and immature fruit as fish poison; rind of unripe fruit piscicide.)

in English: Black Sea walnut, Carpathian walnut, English walnut, European walnut, Madeira walnut, Persian walnut, walnut, walnut tree

in Arabic: djouz, jouza, joz, naksh, souak, zouz

in Bhutan: khe shing, ta shing, tago

in China: chiang tao, hei tao, hu tao, hu tao ren, tao zai

in India: aankhor, akaroda, akhoda, akhor, akhota, akhroot, akhror, akhrot, akhrot kattewala, akhrot maghz, akroda, akrodu, akrot, akrottu, akrotu, akrotu beeja, akschoda, akschota, akshota, akshota-akschoda, akshotaka, aksoda, aksodah, aksota, aksotah, chahar-maghz, chaharmaghaz, char-maghz, cimai akrottu, dandansa, dandasha, doon, fouz, garadgaan, girdagan, heijuga, jangli, jaoz, jooz-ul-hanf, ka, kaa, kaboot, kanola, karparala, kaslees, khaw-kherh, khawkherh, khor, okhor, madanabhaphala, maghz akhrot, maghz badam shirin, parvatiya, phalashnehah, rekhaphala, svadu majja, than

Petrop.* v. 30. 1924, *Taiwania* 5: 81, t. 28. 1954

(Aerial parts for kidney problems and edema. Wood emetic. For skin diseases, a bath with water containing plant powder. Leaves used for arthritis. Ceremonial, leaves and wood burnt as incense.)

in Bhutan: shugpa-tsher-can

in China: chang ye gao shan bai, gao shan bai

in India: thanara

in Nepal: pama, sukcher, sukpa, syuksher, trampol

Jurinea Cass. Asteraceae

For the Swiss physician André Jurine, 1780–1804, botanist, author of *Recherches sur l'organisation des feuilles*. Paris 1802; or named after the Swiss naturalist Louis Jurine,

1751–1819. See *Bull. Sci. Soc. Philom. Paris* 1821: 140. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 543. 1837[1838], *Illustrationes Plantarum Orientalium* 1: 131. 1843 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 120. 1989 and *Botaničeskij Žurnal* (Moscow & Leningrad) 79(5): 119, 122. 1994.

***Jurinea dolomiaea* Boiss.**

India, Himalaya. Prostrate perennial procumbent herb, stemless, roots tuberous, woody aromatic roots, dissected pubescent leaves, cluster of large purple flower heads short peduncled, laciniate cup, pappus brown

See *Fl. Orient.* [Boissier] Suppl. 311, in obs. 1888

(Used in Ayurveda. Antiseptic, whole plant fried in mustard oil and the extract applied to boils. Bruised roots applied to skin eruptions, sores; root decoction in colic. Roots given as stimulant in fever after childbirth; fresh tuberous roots decoction given as aphrodisiac. Leaves and rhizomes as insect repellent, botanical insecticide. Ceremonial, aromatic roots used as an incense in worship and prayers.)

in India: dhoop, dhupa, googul, gugal, guggal dhup, jari-dhoop, jatukanda, khuk lang mendok

***Jurinea himalaica* R.R. Stewart (*Jurinea himalaica* (Cass.) R.R. Stewart)**

Himalaya, Pakistan, India.

See *Annot. Cat. Vasc. Pl. W. Pakistan & Kashmir* 757. 1972

(Root extract applied on infections. Ritual, ceremonial, leaves offered to deities during religious ceremonies.)

in India: budhkesh

***Jurinea macrocephala* DC. (*Dolomiaea macrocephala* DC.; *Jurinea macrocephala* Benth. ex Hook.f.; *Jurinea macrocephala* Benth.; *Jurinea macrocephala* Benth.)**

India, Himalaya, Kashmir. Prostrate herb, woody aromatic roots, spreading radical leaves, purple flower-heads sessile or shortly pedunculate

See *Bull. Sci. Soc. Philom. Paris* 1821: 140. 1821, *Archiv. Bot.* ii. (1833) 330. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 6: 674. 1838, *Fl. Brit. India* [J.D. Hooker] 3: 378. 1881 and *Indian J. Forest.* 11(4): 339. 1989 [1988 publ. 1989]

(Root aromatic, stimulant, cordial, extract mixed with water applied to boils, cuts, wounds. Roots in preparation applied to eruptions and fever; a decoction given in colic and puerperal fever. Ritual, ceremonial, spiritual, emotional, religious ceremonies, used as an incense/dhoop and in preparing Havan Samigri.)

in India: bis kandara, bish kandara, biskanar, dhoop, dhup gugal, dhup jar, dhupa, gugaldup, guggul, gugul dhup

Justicia L. Acanthaceae

Named for the Scottish horticulturist James Justice (the Younger), 1698–1763 (Midlothian), in 1721 Advocate, January 1727 Principal Clerk of Session, 1730 elected a Fellow of the Royal Society (ejected June 1757), author of *The Scots gardeners director*. Edinburgh 1754 and *The British gardeners's calendar*. Edinburgh 1759, he was the son of Sir James Justice of Easter Crichton (county of Midlothian). See Carl Linnaeus, *Species Plantarum*. 1: 15–16, 27. 1753, *Genera Plantarum*. Ed. 5. 10. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, John Reid, *The Scots gardiner for the climate of Scotland*. (Used in Ayurveda, Unani and Sidha. Pollen allergy. Antiphlogistic, antiseptic, antibacterial, febrifuge, abortifacient, antiasthmatic, antiallergic, for setting broken bones, relieving pain, resolving phlegm. Stembark decoction used against intestinal worms. Root paste of *Abroma augustum* with bark of *Adhatoda zeylanica*, *Gmelina arborea* and roots of *Amaranthus spinosus* applied on forehead in headache. Root, leaves and flowers decoction to treat fever, hemorrhage, cough, asthma, obesity, edema, skin diseases, difficult labor, vomiting, piles, retention of urine, diseases of mouth. Fresh juice of crushed roots given to pregnant woman in case of breech or shoulder presentation for normal child delivery; roots insect repellent; root paste applied to cure eczema. Flower ash with honey given in whooping cough; flowers given in respiratory diseases; leaves and flowers crushed and boiled in *ghee* and given in cough and cold. Leaves and roots for chronic bronchitis; leaves decoction taken against fever; leaves juice or root decoction given for respiratory diseases; ashed leaves and wood mixed with honey used for coughs and asthma; juice of leaves with ginger juice administered in cough, diabetes and respiratory diseases. Leaf juice of *Garuga pinnata* mixed with that of *Adhatoda vasica*, *Vitex trifolia* and honey and given in asthma. Leaves for bronchitis, leprosy, jaundice; fruit of *Aegle marmelos* ground together with the leaves of *Adhatoda vasica*, roots of *Cyperus rotundus*, boiled and taken in menstrual disorders; smoke of the leaves inhaled as cigar in asthma; leaves of *Clerodendrum viscosum* and *Justicia adhatoda* crushed and the juice taken for dysentery; leaves infusion drunk for dysentery; leaves powder pesticide, insecticide, against fungal infection. A soup made from bark of *Erythrina variegata* and leaves of *Adhatoda vasica* given in cold and cough. Veterinary medicine, crushed leaves to expel intestinal worms and gas; pounded leaves given for epistaxis; for panting, leaves of *Datura innoxia* with those of *Adhatoda vasica* pounded

and given orally. Magico-religious beliefs, superstitions, on Sunday the devils are near the plant.)

(Herb decoction for influenza, fever, cold in chest, pneumonia, cough, whooping cough, vomiting. Leaf poultice on bleeding wounds.)

in English: carpenter bush

in Guyana: toyeau

Justicia pectoralis Jacq. var. *stenophylla* Leonard

Colombia, Amazonian Brazil, Venezuela. Herbaceous, spreading stems, slender leaves narrowly lanceolate

See *Enumeratio Systematica Plantarum* 11. 1760 and *Contr. U.S. Natl. Herb.* 31: 615. 1958, *Lloydia* 29: 293–308. 1966, *Rhodora* 70: 113–160. 1968

(Used for hallucinogenic effects, dry powdered leaves as an admixture to the *Virola*-snuff.)

Justicia prostrata Gamble

India.

See *Taxon* 27: 519–535. 1978, *Taxon* 29: 358–360. 1980

(Crushed leaves applied to fresh wounds.)

in India: chikka nekki soppu, kayapathri

Justicia quinqueangularis Koenig ex Roxb. (*Justicia quinqueangularis* Koen.; *Justicia quinqueangularis* Wall.; *Rostellaria quinqueangularis* (J. Koenig ex Roxb.) Nees; *Rostellularia quinqueangularis* (J. Koenig ex Roxb.) Nees)

India.

See *Hort. Bengal.* 80. 1814, *Fl. Ind.*, ed. Carey & Wall., i. 134. 1820, *Numer. List* [Wallich] n. 2443. 1830, *Fl. Ind.*, ed. Carey, i. 133. 1832, *Prodr.* (DC.) 11: 375. 1847 and *Cytologia* 41: 283–290. 1976, *Ber. Schweiz. Bot. Ges.* 86: 152–203. 1976

(Leaf juice or water extract given in acidity.)

in India: sokambale zara

Justicia repens L.

India.

See *Species Plantarum* 1: 15. 1753

(Veterinary medicine, dried powdered leaves mixed with vegetable oil and cheese applied to cure skin diseases; crushed leaves given to cattle for general weakness.)

in India: kodaga saleh, mattan kurichi

Justicia secunda Vahl (*Justicia caripensis* Kunth; *Rhacodiscus moricandianus* (Nees) Bremek.; *Rhacodiscus secundus* (Vahl) Bremek.; *Rhytiglossa moricandiana* Nees; *Rhytiglossa secunda* (Vahl) Nees; *Sericographis caripensis* (Kunth) Nees)

Trinidad. Shrubby straggling herb, flowers on short stalks subtended by small bracts, deeply 2-lipped corolla dull purplish-red

See *Genera Plantarum* 102–103. 1789, *Symbolae Botanicae*, ... 2: 7. 1791, *Nova Genera et Species Plantarum* (quarto ed.) 2: 233. 1817, *London Journal of Botany* 4: 637. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 340–341. 1847, *Flora of the British West Indian Islands* 455. 1861, *Bulletin de l'Herbier Boissier* 5(8): 667. 1897 and

Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie 45(2): 53. 1948, *Flore de la Guayane Française* 3: 493. 1954

(Herb tea diuretic, for oliguria, heat, amenorrhea, menstrual pain, abortion, curettage after miscarriage.)

in English: Saint John bush

***Justicia tranquebariensis* L. (*Justicia tranquebariensis* L.)**

Sri Lanka. Herb, corolla light violet-blue

See *Supplementum Plantarum* 85. 1781[1782] and *Taxon* 31: 361–362. 1982

(Used in Ayurveda and Sidha. Leaves cooling aperient, in jaundice and liver related diseases, for skin diseases, contusions and smallpox.)

in India: chikerachettu, davasi murungai, kaddiyarakina, kaddiyarakina gida, kakanacam, kondapindi, mutaliyar, narimurunkai, narimurunkaicceti, niyakkiyam, niyakkiyamaram, pilavumurunkai, pindi, pindikonda, pinnakkucceti, punakappuntu, punnakkuppuntu, punnakupudi, putanayaki, putanayakicceti, redamandalam, shiva naaru balli, sivanarvembu, sivanarvembu, tavacumurunkai, tavashoo moorunghie, taciver, tavaci, tavacimurunkaicceti, tavamurunkai, tavattumurunkai, tavicimurunkai, vankanattam

***Justicia uber* C.B. Clarke**

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74: 688. 1907

(For abdominal complaints.)

Malay name: daun puding

***Justicia ventricosa* Wallich (*Adhatoda ventricosa* (Wallich ex Sims) Nees; *Adhatoda ventricosa* Nees; *Gendarussa ventricosa* (Wallich ex Sims) Nees; *Justicia ventricosa* Wallich ex Sims) (*Gendarussa* Nees, from an Indonesian vernacular name, *gandaroesa* (Sumatra), *ghandaroesa* (Madura), *genderisa* (Bima).)**

India, Indonesia.

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Plantae Asiaticae Rariores* 1: 80, pl. 93. 1830, *Plantae Asiaticae Rariores* 3: 76, 103–104. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 407. 1847

(Whole plant antirheumatic, it is good for setting a broken bone (fracture), injuries from falls fractures, contusions and stains, arthritis, chronic lumbago.)

in China: hei ye xiao bo gu

K

Kadsura Juss. Schisandraceae

The Japanese name for these twining shrubs, see *Flora Boreali-Americana* 2: 218–219, pl. 47. 1803, *Annales du muséum national d'histoire naturelle* 16: 340. 1810, *Flora Javæ* 32–33: 3. 1830 and *Contributions from the Arnold Arboretum of Harvard University* 4: 29. 1933, *Novon* 2: 238. 1992, *Journal of Natural Products* 59(11): 1066–1068. 1996, *Fl. Reipubl. Popularis Sin.* 30(1): 272. 1996, *Journal of Allergology and Immunopathology* (Madrid) 25(5): 249–258. 1997.

Kadsura coccinea (Lemaire) A.C. Smith (*Cosbaea coccinea* Lemaire; *Kadsura ananosma* Kerr; *Kadsura cavaleriei* H. Lév.; *Kadsura chinensis* Hance ex Benth., nom. illeg.; *Kadsura coccinea* var. *sichuanensis* Y.W. Law; *Kadsura hainanensis* Merr.; *Schisandra hanceana* Baill.)

China. Evergreen climber, edible fruit

See *Annales du muséum national d'histoire naturelle* 16: 340. 1810, *Bulletin de la Société Impériale des Naturalistes de Moscou* 7: 149. 1837, *L'illustration horticole* 2: 71. 1855, *Flora Hongkongensis* 8–9. 1861 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 459. 1911, *Philippine Journal of Science* 23(3): 240–241. 1923, *Bulletin of Miscellaneous Information Kew* 1936(1): 34. 1936, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 7: 166, f. 33, f-o. 1947, *Flora Reipublicæ Popularis Sinicæ* 30(1): 234, 272. 1996

(Sap drunk for urinary problems, stomachache and diarrhea. Seeds tonic, expectorant, aphrodisiac.)

in China: hei lao hu

Kadsura coccinea (Lemaire) A.C. Smith var. ***coccinea*** (*Cosbaea coccinea* Lemaire; *Kadsura cavaleriei* H. Lév.; *Kadsura chinensis* Hance ex Benth., nom. illeg., non *Kadsura chinensis* Turcz.; *Kadsura hainanensis* Merrill)

SE Asia. Evergreen climber, edible fruit

See *Annales du muséum national d'histoire naturelle* 16: 340. 1810, *L'illustration horticole* 2: 71. 1855, *Flora Hongkongensis* 8–9. 1861 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(222–226): 459. 1911, *Philippine Journal of Science* 23(3): 240–241. 1923, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 7: 166, f. 33, f-o. 1947

(Roasted fruits sedative and hypnotic.)

in China: hei lao hu

Kadsura heteroclita (Roxburgh) Craib (*Kadsura championii* C.B. Clarke; *Kadsura heteroclita* Craib; *Kadsura interior* A.C. Sm.; *Kadsura polysperma* Y.C. Yang; *Kadsura roxburghiana* Arn.; *Kadsura wattii* C.B. Clarke; *Kadsura wightiana* Arn.; *Uvaria heteroclita* Roxburgh)

SE Asia, Sri Lanka. Climber, dioecious, scrambling, lenticellate fissured stems, female flowers a head of aggregated carpels, male flowers a head of aggregated stamens, translucent deep red fruitlets, edible fruits

See *Species Plantarum* 1: 536. 1753, *Annales du muséum national d'histoire naturelle* 16: 340. 1810, *Hortus Bengalensis*, or a catalogue ... 43. 1814, *Fl. Ind.*, ed. 1832, 2: 455, 1832, *Mag. Zool. & Bot.* ii. (1838) 546. 1838, *J. Linn. Soc., Bot.* xxv. (1889) 4. 1889 and *Flora Siamensis Enumeratio* 1: 28. 1925, *Contrib. Biol. Lab. Sc. Soc. China, Bot. Ser.*, 12: 104, f. 5. 1939, *Sargentia* 7: 178, f. 35. 1947, *Fl. Malesiana* 1, 13: 195. 1997

(Stems for the treatment of menstrual irregularities.)

in China: yi xing nan wu wei zi

Kadsura japonica (Linnaeus) Dunal (*Kadsura japonica* Benth., nom. inval.; *Kadsura japonica* Wall.; *Kadsura matsudae* Hayata; *Kadsura matsudai* Hayata; *Uvaria japonica* Linnaeus)

SE Asia. Climber, edible fruits

See *Species Plantarum* 1: 536. 1753, *Annales du muséum national d'histoire naturelle* 16: 340. 1810, *Monogr. Anon.* 57. 1817, *Hooker's J. Bot. Kew Gard. Misc.* 3: 258. 1851, *Fl. Hongk.* 9. 1861 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 9: 4. 1920

(Fruits tonic, stimulant, expectorant, for stomachache, in cough and asthma.)

in English: Chinese tulip tree

in China: ri ben nan wu wei zi, wu wei tzu

in Japan: sane-kazura

in Okinawa: ukuwanshin-kanda

Kadsura lancilimba F.C. How (*Kadsura renchangiana* S.F. Lan)

China.

See *Acta Sci. Nat. Univ. Sunyatseni* 1983(2): 120. 1983, *Journal of Natural Products* 62(11): 94–97. 1999

(The stems and roots to treat stomachache.)

Kadsura longipedunculata Finet & Gagnepain (*Kadsura discigera* Finet & Gagnep.; *Kadsura longepedunculata* Finet & Gagnep.; *Kadsura omeiensis* S.F. Lan; *Kadsura peltigera* Rehder & E.H. Wilson)

SE Asia, China. Climber, edible fruits

See *Annales du muséum national d'histoire naturelle* 16: 340. 1810 and *Bulletin de la Société Botanique de France* 52: Mém. 4(1): 52–53, t. 8, B, 8–15. 1906 [1905 publ. Mar 1906], *Plantae Wilsonianae* (Sargent) 1(3): 410–411. 1913, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 2: 122. 1983, *Guihaia* 15(1): 47–51. 1995, *Journal of Wuhan Botanical Research* 13(2): 107–112. 1995, *J. Ethnopharmacology* 85(1): 61–67. 2003

(Antiinflammatory, pectoral.)

in China: nan wu wei zi

Kadsura philippinensis Elmer

Philippines.

See *Leaflet Philipp. Bot.* i. 277. 1908, *Phytochemistry* 70(1): 114–120. 2009

(Antiinflammatory.)

Kadsura scandens Blume (*Kadsura cauliflora* Blume; *Kadsura scandens* (Blume) Blume)

Java. Woody climbing liana, fissured lenticellate stem, bitter orange root flesh, red sour fruits edible

See *Flora Javae*, Schiz., 9, 11. 1830

(Inner bark decoction. Powdered leaves and bark applied as a poultice to skin ulcers to draw out pus. Roots and stem decoction expectorant, antiinflammatory, for rheumatism; stem bark to treat menstrual disorders and blood deficiency. Infusion of the leaves of *Hydrocotyle javanica*, mixed with plant of *Desmodium triflorum*, leaves of *Kadsura scandens* and fruits of *Litsea cubeba*, drunk to treat measles, pox in small children.)

in English: ulcer sucker

in Indonesia: aka pelian, aka pelian apui, aka tisip lanak, hunyur buut, ki lembur, mendulai

in Malaysia: akar dama-dama, belabar, kepala patong, kerukol akar

Kaempferia L. Zingiberaceae

Named for the German physician Engelbert Kaempfer (Kämpfer), 1651–1716 (Lemgo), traveller, naturalist, from 1685 to 1693 with the Dutch East Indian Company, his works include *The history of Japan*. London 1727 and *Amoenitatum exoticarum politico-physico-mediarum fasciculi V. Lemgoviae* [Lemgo, Lippe] 1712. See Carl Linnaeus, *Species Plantarum*. 1: 2. 1753, *Genera Plantarum*.

Ed. 5. 3. 1754, Joseph Banks, *Icones selectae Plantarum quas in Japonia collegit et delineavit Engelbertus Kaempfer; ex archetypis in Museo Britannico asservatis* [Edited and published by Sir J. Banks.] London 1791, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 483. Ansbach 1852 and *Journ. Arnold Arboretum*. 6: 186–188. 1925, W.T. Stearn, “Kaempfer and the lilies of Japan.” *Royal Hort. Soc. Lily Year Book*. 12: 65–70. 1948, Blanche Henrey, “Kaempfer’s ‘Icones.’” *J. Soc. Bibl. Nat. Hist.* 3. 1955, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 266. 1965.

Kaempferia angustifolia Roscoe (*Kaempferia angustifolia* Roxb., nom. illeg.; *Kaempferia roxburghiana* Schult.; *Kaempferia undulata* Link; *Kaempferia undulata* Teijsm. & Binn.; *Kaempferia undulata* Wenderoth)

India, SE Asia. Root stock tuberous, slender roots, ascending leaves, flowers in a central sessile spike, corolla-tube white, lilac lip deeply cut into two obovate lobes

See *Trans. Linn. Soc. London* 8: 351. 1807, *Fl. Ind.*, ed. Carey & Wall. 1: 16. 1820, *Enum. Hort. Berol. Alt.* 1: 3. 1821, *Mantissa* 1: 33. 1822, *Fl. Ind.*, ed. Carey, i. 17. 1832, *Ned. Kruidk. Arch.* iii. (1855) 391. 1855

(Ceremonial, roots used as a necklace for body ornamentation. Veterinary medicine.)

in India: kanjan-bura, kanjanbura, mudunirbisha, umdrirbisha

Kaempferia galanga L. (*Alpinia sessilis* J. König; *Kaempferia galanga* var. *latifolia* Donn ex Gagnepain; *Kaempferia galanga* var. *latifolia* (Donn ex Hornem.) Donn; *Kaempferia humilis* Salisb.; *Kaempferia latifolia* Donn; *Kaempferia latifolia* Donn ex Hornem.; *Kaempferia plantaginifolia* Salisb.; *Kaempferia procumbens* Noronha; *Kaempferia rotunda* Blanco, nom. illeg.; *Kaempferia rotunda* Don; *Kaempferia rotunda* L.)

India, Philippines. Stemless, perennial, herbaceous, rhizomatous, tuberous rootstock, radical leaves, aromatic, flowers clustered between the leaves, white corolla, white lip with lilac throat, cultivated for medicine and spice

See *Species Plantarum* 1: 2–3. 1753, *Observ. Bot.* 3: 64. 1783, *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 19. 1790, *Prodr. Stirp. Chap. Allerton*: 6. 1796, *Hort. Cantabrig.*, ed. 3. 1. 1804, *Trans. Hort. Soc. London* 1: 286. 1812, *Hort. Bot. Hafn.* 6. 1813, *Fl. Filip.* [F.M. Blanco] 5. 1837, *Hortus Cantabrig.*, ed. 6: 3. 1841 and *Fl. Indo-Chine* 6: 49. 1908, *Transactions of the Papua and New Guinea Scientific Society* 1: 16–18. 1960, *J. Agr. Trop. Bot. Appl.* 9: 245–249. 1962, *Notes Roy. Bot. Gard. Edinburgh* 31: 185. 1972, *Proceedings of the Indian Science Congress Association* 71(4A): 46. 1984, *Cell and Chromosome Research* 14: 1–6. 1991

(Used in Ayurveda and Sidha. Hallucinogen, stimulant, fungicide, postpartum remedy, stomachic, expectorant, diuretic, antibacterial, cytotoxic, antiinflammatory, larvacidal, carminative, sudorific, used for swellings and wounds, dyspepsia,

asthma, cough, headache, toothache, cold, rheumatism; powdered rhizome mixed with honey given in cough and pectoral affection, also to relieve insect stings. Macerated rhizome used externally for leprosy, skin infection; rhizome paste applied on forehead for headache; one of the ingredients of *ewas empas*. Leaves used for sore throat, swelling, rheumatism, fever. For cough, leaves and rhizome eaten with betel.)

in English: east indian galangal, galanga

in Bangladesh: ada kamala

in China: da ye shan nai, san nai, shan lai, shan nai

in India: adakamala, bhui champa, candramula, candrani, chandramoola, chandramula, chandramulika, chanramulika, chundramoolika, corakah, ekangi, kaccolam, kaccoli k-kilanku, kaccoram, kaccuri, kacora, kachhola kilangu, kachhoora, kachchura, kachhuram, kacholam, kacholum, kachoram, kachri, kachulakalanga, Kapoor kachri, kapurkacheri, kapurkachri, karcurah, katcolam, katjulam, katsjula-kekengu, katsjula kelengu, narkachur, pulankilanku, sati, sathi, sati, sidhoul, sime-kich-chilik, sugandhamula, sugandharacha, sugandhavacha

Malayan name: kunchur

in Nepal: bhuichampa

Kageneckia Ruiz & Pavón Rosaceae

For Frederick von Kageneck, a patron of botany, Ambassador of Spain in Peru, see *Fl. Peruv. Prodr.* 145, t. 37. 1794, *Trans. Linn. Soc. London* 13(1): 98, t. 8. 1821 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 1063–1119. 1938, *Revista Boliviana Ecol. Cons. Amb.* 5: 51–59. 1999, *Ecología en Bolivia* 34: 45–70. 2000.

Kageneckia lanceolata Ruiz & Pav. (*Kageneckia amygdalifolia* C. Presl; *Kageneckia glutinosa* Kunth; *Osteomeles pentlandiana* Decne.)

South America.

See *Systema Vegetabilium Florae Peruviana et Chilensis* 290. 1798, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 6: 237. 1824, *Epimel. Bot.* 195. 1851, *Nouvelles archives du muséum d'histoire naturelle* 10: 183. 1874

(Bitter bark and leaves drunk in infusion to treat fevers)

in Peru: loque, lloque, quisi, rahuac, uritumicuna, uritmicuna

Kageneckia oblonga Ruiz & Pav. (*Kageneckia crataegoides* D. Don)

South America.

See *Systema Vegetabilium Florae Peruvianaee et Chilensis* 1: 289. 1798, *Edinburgh New Philosophical Journal* (Oct.-Dec. 1831) 111. 1831

(Seeds used as purgative.)

in Spanish: guayo colorado

Kalanchoe Adans. Crassulaceae

From the Hindi *kalanka* 'rust, spot', some suggested from a Chinese name for one of the species of the genus; see *Familles des Plantes* 2: 248. 1763, *Species Plantarum*. Editio quarta 2: 471. 1799, *Plantarum historia succulentarum* 17: pl. 100. 1802, *The Paradisus Londinensis* pl. 3. 1805, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 137. Ansbach 1852, *J. Linn. Soc., Bot.* 18: 268. 1881 and *Bull. Herb. Boissier* 8: 17–48. 1908, *Annuaire Conserv. Jard. Bot. Genève* 11/12: 35–135. 1908, *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 147: 636–637. 1908, *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 1007–1015. 1938, *Fieldiana, Bot.* 24(4): 404–415. 1946, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 120. 1989, *Fl. Ecuador* 73: 4–16. 2004. Some species of *Kalanchoe* may contain toxic bufadienolide compounds. Some members of the genus *Kalanchoe* have caused poisoning of sheep and cattle.

Kalanchoe bhidei T. Cooke

India. Erect succulent herb, fleshy leaves, white flowers in terminal panicles

See *Fl. Bombay* 1: 467. 1903

(Leaves in a preparation of a fine paste applied on fractured bone.)

in India: kattippotta kutti podum sakkalaththi

Kalanchoe ceratophylla Haworth (*Bryophyllum serrata* Blanco; *Kalanchoe gracilis* Hance; *Kalanchoe laciniata* auct. non (L.) DC.; *Kalanchoe macrosepala* Hance; *Kalanchoe takeoi* Hayata)

Himalayas, India, Thailand. An erect, unbranched or sparingly branched shrub, terete, calyx variable, corolla salver-shaped, carpels lanceolate

(The leaves or the juice pressed from the leaves in the topical treatment of ulcers and to relieve headache.)

in China: jia lan cai

in Malaysia: chakar bebek, sedingin, setawar kampong

in Philippines: siempreviva

in Thailand: hom haem, khong saamyaan

in Vietnam: c[af] kheo, s[uwf]ng h[uw][ow]u, tr[uw][owf]ng sanh r[as]ch l[as]

Kalanchoe crenata (Andr.) Haw. (*Bryophyllum crenatum* Baker; *Cotyledon crenata* (Andrews) Vent.; *Cotyledon vereae* Jacq.; *Kalanchoe afzeliana* Britten; *Kalanchoe brasiliensis* Cambess.; *Kalanchoe brittenii* Raym.-Hamet; *Kalanchoe coccinea* Welw. ex Britten; *Kalanchoe crenata* Britten; *Kalanchoe crenata* (Baker) Raym.-Hamet, nom. illeg., non *Kalanchoe crenata* (Andrews) Haw.; *Kalanchoe crenata* subsp. *bieensis* R. (Whole plant used as contraceptive. Fruits and leaves diuretic, antiseptic, astringent, to treat skin diseases.)

Kallstroemia pubescens (G. Don) Dandy (*Kallstroemia caribaea* Rydb.; *Kallstroemia caribaea* Urb.; *Kallstroemia glabrata* Rydb.; *Kallstroemia longipes* Rydb.; *Kallstroemia minor* Hook. f., nom. illeg.; *Tribulus maximus* var. *minor* (Hook. f.) Oliv.; *Tribulus pubescens* G. Don)

South America, West Indies. Herb, creeping, trailing, striate, deep rooted, white or yellowish white flowers, beaked stri-gose ribbed, tuberculate fruits

See *Species Plantarum* 1: 386–387. 1753, *A General History of the Dichlamydeous Plants* 1: 769. 1831, *Niger Flora* 269. 1849, *Flora of Tropical Africa* 1: 284. 1868 and *North American Flora* 25(2): 111–112, 114. 1910, *Kew Bulletin* 10(1): 138–139. 1955

(A remedy for constipation, to induce conception. Fruits in spermatorrhea, paste of the fruit for gout. Leaves and roots on wounds, paste of leaves for blood dysentery.)

in India: bongokhuru, gara-ba

Kalmia L. Ericaceae

For the Swedish (b. Ångermanland, Sweden) botanist Pehr (Peter) Kalm, 1716–1779 (d. Turku, Finland), traveller, pupil of Linnaeus, 1748–1751 North America, 1749 Canada, professor of economy and natural history at Abo (Turku), his writings include *Beschreibung der Reise die er nach dem*

nördlichen Amerika ... unternommen hat. Eine Übersetzung. [translated from the Swedish by Johann Philipp Murray and Johann Andrews Murray] Göttingen 1754–1764 and *De Erica vulgari et Pteride aquilina*. Aboae [1754]. See *Species Plantarum* 1: 391. 1753, *Notions Élémentaires de Botanique* 270. 1782, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 457. 1794, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 484. Ansbach 1852, *Revisio Generum Plantarum* 2: 388. 1891 and *Flora of the Southeastern United States* 886, 1336. 1903, Carl Skottsberg, “Pehr Kalm.” *Kungliga Svenska vetenskapssakademiens levnadsteckningar*. 139: 221–503. 1951, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 268. 1965, T.W. Bossert, comp., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 203. 1972, Ragnar Granit, in *D.S.B.* 7: 210–211. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 732. 1993, *Fl. Neotrop.* 66: 123–130. 1995. Andromedotoxin and resins derived from diterpenes are the toxic compounds found in all the toxic species of the heath plant family. Bog-laurel is less toxic than sheep-laurel (*Kalmia angustifolia*). Only the western variety of bog-laurel (*Kalmia polifolia* var. *microphylla*) has been tested for toxicity.

Kalmia angustifolia L. (*Chamaedaphne angustifolia* (L.) Kuntze)

North America. Perennial shrub

See *Species Plantarum* 1: 391. 1753, *Meth.* 457. 4 Mai 1794, *Edinburgh New Philos. J.* 17: 158. Jul 1834, *Revisio Generum Plantarum* 2: 388. 1891 and Marsh, C.D. “Mountain-laurel (*Kalmia latifolia*) and sheep laurel (*Kalmia angustifolia*) as stock-poisoning plants.” *U. S. Dept. Agric. Tech. Bull.*, 219. 1930, Pritchard, W.R. “Laurel (*Kalmia angustifolia*) poisoning of sheep.” *N. Am. Vet.*, 37: 461–462. 1956, Verlangieri, A.J., Gawlikowski, J.N., Shapiro, R. “Acute toxicity of *Kalmia angustifolia*, (sheep laurel) extracts in the rat.” *Vet. Toxicol.*, 18: 122–124. 1976, *Taxon* 31: 766–768. 1982

(The entire plant is poisonous, including the nectar and honey made from it, highly toxic, may be fatal. This plant contains a toxin that has poisoned cattle, goats, and sheep as well as humans. Poisoning rarely happens in the wild. Meat of chickens that had ingested sheep-laurel may be toxic to other animals. The nectar contains the toxin that results in toxic honey.)

in English: lambkill, pig laurel, sheep-laurel

Kalmia carolina Small (*Kalmia angustifolia* var. *carolina* (Small) Fernald)

North America.

See *Flora of the Southeastern United States* 886, 1336. 1903, *Rhodora* 39(467): 437. 1937

(The entire plant is poisonous, including the nectar and honey made from it, highly toxic, may be fatal.)

in English: lambkill, pig laurel, sheep-laurel, swamp laurel, wicky

Kalmia latifolia L. (*Chamaedaphne latifolia* (L.) Kuntze; *Kalmia latifolia* L. var. *laevipes* Fernald)

North America. Perennial tree or shrub

See *Species Plantarum* 1: 391. 1753, *Revisio Generum Plantarum* 2: 388. 1891 and *Rhodora* 42: 53. 1940, Verlangieri, A.J., Gawlikowski, J.N., Shapiro, R. “Acute toxicity of *Kalmia angustifolia*, (sheep laurel) extracts in the rat.” *Vet. Toxicol.*, 18: 122–124. 1976, *Regnum Veg.* 127: 58. 1993

(The entire plant is poisonous, including the nectar and honey made from it, highly toxic, may be fatal. Andromedotoxin and resins derived from diterpenes are the toxic compounds found in all the toxic species of the heath plant family.)

in English: calico bush, ivy bush, mountain ivy, mountain laurel

Kalmia microphylla (Hook.) A. Heller (*Kalmia glauca* var. *microphylla* Hook.; *Kalmia polifolia* subsp. *microphylla* (Hook.) Calder & Roy L. Taylor; *Kalmia polifolia* var. *microphylla* (Hook.) Rehder; *Kalmia polifolia* var. *microphylla* (Hook.) H.M. Hall, nom. illeg., non *Kalmia polifolia* var. *microphylla* (Hook.) Rehder)

North America.

See *Species Plantarum* 1: 391. 1753, *Schriften der Gesellschaft Naturforschender Freunde zu Berlin* 8(3): 130. 1788, *Hortus Kewensis*; or, a catalogue ... 2: 64, pl. 8. 1789, *Flora Boreali-Americana* 2(7): 41. 1834, *Bulletin of the Torrey Botanical Club* 25(11): 581. 1898 and *Cyclopedia of American Horticulture* 2: 854. 1900, *University of California Publications in Botany* 4(12): 201. 1912, Clawson, A.B. “Alpine kalmia (*Kalmia microphylla*) as a stock-poisoning plant.” *U. S. Dep. Agric. Tech. Bull.*, 391. 1933, *Canadian Journal of Botany* 43(11): 1398. 1965, *Taxon* 31: 777. 1982

(Andromedotoxins (grayanotoxins) are diterpenoid alkaloids. These toxins are common to all poisonous members of the heath family, including *Kalmia* spp. and *Rhododendron* spp.)

Kalmia polifolia Wengen. (*Chamaedaphne glauca* (Aiton) Kuntze; *Kalmia polifolia* Wengen. subsp. *polifolia*; *Kalmia polifolia* Wengen. var. *rosmarinifolia* (Pursh) Rehder)

North America. Perennial shrub, swamp plant, rose-pink flowers

See *Species Plantarum* 1: 391. 1753, *Schriften der Gesellschaft Naturforschender Freunde zu Berlin* 8(3): 130. 1788 and Clawson, A.B. “Alpine kalmia (*Kalmia microphylla*) as a stock-poisoning plant.” *U. S. Dep. Agric. Tech. Bull.*, 391. 1933, *Taxon* 31(2): 344–360. 1982

(All parts of the plant are poisonous including the nectar, which can result in poisonous honey. Leaves poisonous to animals, suspected poisoning of cattle and sheep have been reported. The plant should be considered potentially toxic.)

in English: alpine-laurel, bog kalmia, bog-laurel, laurel, pale-laurel, swamp-laurel

Kalopanax Miq. Araliaceae

From the Greek *kalos* ‘beautiful’ and *Panax*, *panakes* ‘all healing, a panacea’, *pan* ‘all’ and *akos* ‘a remedy’, see *Annales Museum Botanicum Lugduno-Batavi* 1: 4, 16. 1863.

Kalopanax septemlobus (Thunb.) Koidz. (*Acanthopanax ricinifolius* (Siebold & Zucc.) Seem., also *ricinifolium*; *Acanthopanax ricinifolius* var. *maximowiczii* (Van Houtte) C.K. Schneid.; *Acanthopanax seoulensis* Nakai; *Acanthopanax septemlobus* (Thunb.) Koidz. ex Rehder; *Acanthopanax septemlobus* var. *magnificus* (Zabel) W.C. Cheng; *Acanthopanax septemlobus* var. *maximowiczii* W.C. Cheng; *Acer pictum* Thunb. [Aceraceae.]; *Acer septemlobum* Thunb.; *Aralia maximowiczii* Van Houtte; *Eleutherococcus nakaianus* (W.C. Cheng) H. Ohashi; *Eleutherococcus seoulensis* (Nakai) S.Y. Hu; *Kalopanax autumnalis* Koidz.; *Kalopanax pictus* Nakai; *Kalopanax pictus* fo. *maximowiczii* (Van Houtte) H. Res.* 204(2): 229–34. 1988, *Korean Journal of Plant Taxonomy* 18: 291–296. 1988, *Taxon* 39: 535–536. 1990, *Planta Med.* 58(5): 481–2. 1992 [Studies on the Chemical

Constituents of *Kalopanax septemlobus*.], *Journal of Japanese Botany* 69(1): 29. 1994, *Arch. Pharm. Res.* 28(12): 1337–40. 2005 [Induction of neurite outgrowth by (-)-(7R, 8S)-dihydrodehydrodiconiferyl alcohol from PC12 cells.]

(Bark and leaves of the thorny tree *Acanthopanax ricinifolius* recommended for insecticidal purposes and for the treatment of skin disease, ulcers and infected sores.)

in English: castor Aralia, prickly castor oil tree, tree aralia

in China: ci qiu shu pi, ci qiu

in Japan: hari-giri, sen-no-ki

Kandelia (DC.) Wight & Arn. Rhizophoraceae

From the Malabar plant name, *tsjeru kandel*, for *Kandelia candel* (L.) Druce; see van Rheede in *Hortus Indicus Malabaricus*. 6: t. 35. 1686, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 32. 1828, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 310–311. 1834.

Kandelia candel (L.) Druce (*Kandelia caandel* (L.) Druce; *Kandelia candel* Druce; *Kandel rheedii* Wight & Arn., nom. illeg.; *Rhizophora candel* L.)

India. Leaves for fodder

See *Species Plantarum* 1: 443. 1753, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 310–311. 1834 and *Botanical Exchange Club and Society of the British Isles* (Report) 3: 420. 1914, *Caryologia* 48(3–4): 319–328. 1995

(Bark mixed with dried ginger or long pepper said to be useful in diabetes and to reduce blood pressure. A source of tannin.)

in India: sindhuguan, sinduka, tsjeru kandel (tsjeru = small)

in Japan: matsafushi, me-hirugi, Ryūkyū-kōgai

Malayan names: aleh-aleh, beras-beras, berus-berus, pisang-pisang laut, pulut-pulut

Karwinskia Zucc. Rhamnaceae

Karwinskia humboldtiana (Willd. ex Roem. & Schult.) Zucc. (*Karwinskia humboldtiana* S. Watson; *Karwinskia humboldtiana* Zucc.)

Mexico.

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 1: 349–350, 353. 1832

(Toxic, dangerous, eating the berries causes paralysis.)

Keckiella Straw Scrophulariaceae

Named for the American botanist David Daniels Keck, 1903–1995, experimental taxonomist, 1950–1959 New York

Botanical Garden, his writings include "A revision of the genus *Orthocarpus*." *Proc. Calif. Acad. Sci.*, ser. 4, 16(17): 517–571. 1927, "Studies upon the taxonomy of the Madinae." *Madroño*. 3: 4–18. 1935, "The silverswords of Hawaii." *Carnegie Inst. Wash. News Serv. Bull.* 4: 75–78. 1936 and "The Hawaiian silverswords: systematics, affinities, and phylogeographic problems of the genus *Argyroxiphium*." *Occas. Pap. Bernice P. Bishop Mus.* 11(19): 1–38. 1936. See Jens Christian Clausen (1891–1969), D.D. Keck and William McKinley Hiesey (Heusi), "Experimental studies on the nature of species. I. Effect of varied environments on western American plants." *Publ. Carnegie Inst. Wash.* 520. 1940, Elmer Drew Merrill, in *Contr. U.S. Natl. Herb.* 30(1): 173. 1947, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 276, 1: 354. 1965, *Brittonia* 18(1): 87. 1966, *Brittonia* 19(3): 203. 1967, Joseph Ewan, ed., *A Short History of Botany in the United States*. 112, 114. 1969, Theodore W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 207. 1972, S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Keckiella breviflora (Lindl.) Straw (*Keckia breviflora* (Lindl.) Straw; *Keckiella breviflora* (Lindl.) Straw subsp. *breviflora*; *Keckiella breviflora* (Lindl.) Straw var. *breviflora*; *Penstemon breviflorus* Lindl.)

North America. Perennial shrub or subshrub

See *Edwards's Botanical Register* 23: t. 1946. 1837 and *Brittonia* 19(3): 203. 1967

(Infusion taken for colds and coughs; crushed dry leaves applied to sores and ulcers.)

in English: bush beardtongue

Keckiella cordifolia (Benth.) Straw (*Keckia cordifolia* (Benth.) Straw; *Penstemon cordifolius* Benth.)

North America. Perennial shrub or subshrub

See *Scrophularineae Indicae* 7. 1835, *Edwards's Botanical Register* 23: t. 1946. 1837 and *Brittonia* 18(1): 88. 1966, *Brittonia* 19(3): 203. 1967

(Plant poultice applied to sores, ulcers, wounds, an infusion also used as a wash.)

in English: heartleaf keckiella

Kedrostis Medikus Cucurbitaceae

Kedrostis is a classical Greek name used by Dioscorides for *Bryonia*, Greek *kedrotos* 'made of cedar wood', *kedros* 'cedar, the cedar tree, a kind of juniper tree', Latin *cedrostis* for Plinius one of the names of the white vine, *ampeloleuce*

'white vine, briony', see *Philosophische Botanik* 2: 69. 1791, *Enumeratio Plantarum Africae Australis Extratropicae* 2: 275–276. 1836, *Genera Plantarum* 936. 1839, *Fl. Cap.* (Harvey) 2: 498. 1861–1862, *Icones Plantarum* 15: 16, t. 1421. 1883 and *Das Pflanzenreich* IV. 275(Heft 66): 139, 155. 1916.

Kedrostis foetidissima (Jacq.) Cogn. (*Bryonia foetidissima* (Jacq.) Schumach.; *Bryonia perrottetiana* Ser.; *Cyrtanema convolvulaceum* Fenzl; *Cyrtanema divergens* A. Rich.; *Cyrtanema foetens* Hochst. ex Hook.f.; *Kedrostis foetidissima* subsp. *obtusiloba* (E. Mey. ex Sond.) A. Meeuse; *Kedrostis foetidissima* subsp. *obtusiloba* (Sond.) Meeuse; *Kedrostis foetidissima* subsp. *obtusiloba* Meeuse; *Kedrostis foetidissima* var. *divergens* (A. Rich.) Cogn.; *Kedrostis foetidissima* var. *glandulifera* A. Zimm.; *Kedrostis foetidissima* var. *microcarpa* Cogn.; *Kedrostis foetidissima* var. *perrottetiana* (Ser.) Cogn.; *Kedrostis minutiflora* Cogn.; *Melothria louisii* auct., sensu Robyns p.p.; *Melothria obtusiloba* (Sond.) Cogn.; *Melothria foetidissima* (Jacq.) Roberty; *Rhynchocharpa foetida* Schrad.; *Rhynchocharpa foetidissima* (Jacq.) Walp.; *Trichosanthes foetidissima* Jacq.; *Zehneria obtusiloba* E. Mey. ex Sond.; *Zehneria obtusiloba* Sond.)

Tropical Africa, India. Vine, glabrous climbing herbs with fetid smell, creamy flowers in axillary racemes, bright red-orange ovoid berries

See *Collectanea* 2: 341. 1788, *Beskrivelse af Guineiske planter* 428. 1827, *Repertorium Botanices Systematicae*. 2: 197. 1843, *Monographiae Phanerogamarum* 3: 634. 1881 and *Bulletin de l'Institut Française d'Afrique Noire* 16: 794. 1954 and *J. Cytol. Genet.* 31(1): 65–71. 1996, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007

(Plant paste applied for rheumatic pain.)

in India: peenari kodi

Kedrostis gijef (J.F. Gmel.) C. Jeffrey (*Corallocarpus gijef* (J.F. Gmel.) Hook.f.; *Corallocarpus harmsii* A. Zimm.; *Cyrtanema elegans* Fenzl ex Cogn.; *Turia gijef* J.F. Gmel.)

Kenya. Simple leaves kidney- or heart-shaped, fruits edible, camel and goat fodder

See *Kew Bulletin* 15: 354. 1962

(Plant paste applied for rheumatic pain.)

in Kenya: gaale, witulu

Keetia Phillips Rubiaceae

After the South African botanist Dr. Johan Diederik Möhr Keet, 1882–1967, former Director of Forestry, plant collector, author of "Trees and shrubs for the bushveld portions of the Pretoria, Rustenburg and Waterberg districts of the Transvaal." *J. Dept. Agric. S. Afr.* 10: 306–323. 1925, *Afforestation and Conservation in South West Africa*. Windhoek 1927, "Tree planting in the Orange Free State, Griqualand West, Bechuanaland and the north-eastern

districts of the Cape Province." *Bull. Dep. For. Un. S. Afr.* No. 24. 1929, *Report on Drift Sands in South Africa*. Pretoria 1936, "Forests of the Okavango native territory." *J. S. Afr. For. Ass.* 19: 77–88. 1950 and "Check list of trees of the Okavango native territory." *J. S. Afr. For. Ass.* 20: 106–107. 1951; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 204–205. Cape Town 1981.

Keetia gueinzii (Sond.) Bridson (*Canthium charadrophilum* (K. Krause) Bullock; *Canthium gueinzii* Sond.; *Canthium hispidum* Benth.; *Canthium hispidum* auct., sensu Hiern, pro parte, non Benth.; *Canthium lividum* Hiern; *Canthium scabrosum* Bullock; *Canthium sylvaticum* sensu Bullock, pro parte, sensu Brenan; *Canthium venosum* (Oliv.) Hiern; *Keetia gueinzii* von Breitenbach; *Keetia hispida* (Benth.) Bridson; *Keetia transvaalensis* E. Phillips, p.p.; *Plectronia charadrophila* K. Krause; *Plectronia charadrophila* K. Schum.; *Plectronia subcordatifolia* De Wild.; *Plectronia venosa* Oliv.; *Psydrax livida* (Hiern) Bridson) (for the German apothecary and collector Wilhelm Gueinzus, d. circa 1871; see Gustav Kunze, 1793–1851, "Filicium in Promontorio Bonae Spei et ad Portum Natalensium a Gueinzio nuperius collectarum." *Linnaea* 18: 113–124. 1844; Philipp Bruch, 1781–1847, (with G.W. Bischoff and J.B.W. Lindenberg) "Musci et Hepatici Kraussiani." *Flora* 29: 132–136. 1846; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981.)

Tanzania. Shrub or small tree, bushy liana, woody, clambering, straggling, semi-scandent, scrambling, climber, horizontal branches to somewhat twining branches, arching, dense axillary clusters of yellow-white flowers, flowers very sweetly and strongly to unpleasantly scented, fruit in axillary clusters, crushed leaf and damaged fruit sweet-smelling, fruit eaten by bats, on riverbank, riverine forest, along stream at edge of woodland, swamp forest, swamp edge bushland, edge of forest

See *Mantissa Plantarum* 1: 16. 1767, *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *De Fructibus et Seminibus Plantarum...* 1: 125. 1788, *Annales du muséum national d'histoire naturelle* 9: 219. 1807, *Niger Flora* 409. 1849, *Linnaea* 23: 54. 1850, *Transactions of the Linnean Society of London* 29: 85, t. 49. 1873, *Flora of Tropical Africa* 3: 144. 1877 and *The Forests and Forest Flora of the Colony of the Cape of Good Hope* 241. 1907, *The Genera of South African Flowering Plants* 587. 1926, *Plant Systematics and Evolution* 149: 89–118. 1985, *Kew Bulletin* 40: 705. 1985, *Kew Bulletin* 41(4): 970, 986. 1986

(Roots decoction drunk for intestinal worms. Roots mixed with roots of *Croton* and boiled to treat swelling and bilharzia. Leaves poultice applied to boils and also for earache. Edible black ripe fruits slightly astringent.)

in English: climbing turkey-berry

in Congo: futa

in Kenya: athuno, cheplekwelet, kikumba, lusebi, mokilokwa, mtindapo, mugugu, mugunguma, mukumuti, nabusuma, olwobo

in Southern Africa: ugupe, rankbokdrol; uGupe (Zulu); umNyushulube (Xhosa)

in Tanzania: bwana shokola, kankula masigo, litagamba, malyadi, mchengele, mtabungwa, mweipula

Keetia venosa (Oliv.) Bridson (*Canthium barteri* Hiern; *Canthium dundusanense* (De Wild.) C.M. Evrard; *Canthium sphaerocarpum* Schweinf. ex Bullock; *Canthium sylvaticum* Hiern; *Canthium venosum* (Oliv.) Hiern; *Canthium venosum* var. *pubescens* Hiern; *Plectronia barteri* (Hiern) De Wild. & T. Durand; *Plectronia dundusanensis* De Wild.; *Plectronia myriantha* K. Krause, nom. illeg.; *Plectronia reygartii* De Wild.; *Plectronia stipulata* De Wild.; *Plectronia sylvatica* (Hiern) K. Schum.; *Plectronia vanderystii* De Wild.; *Plectronia venosa* Oliv.)

Tropical Africa. Liana, woody climber, many-branched, trailing to semi-lianescent, small tree, spreading lianescent shrub, white sweetly aromatic flowers, edible fruits

See *Transactions of the Linnean Society of London* 29(2): 85, t. 49. 1873, *Cat. Afr. Pl.* 1: 477. 1898, *Flora of Tropical Africa* 3: 143–144. 1877 and *Wiss. Erg. Deut. Zentr.-Afr. Exped., Bot.* 2: 327. 1911, *Pl. Bequaert.* 3: 183, 195. 1925, *Bull. Misc. Inform. Kew* 1932: 371. 1932, *Bull. Jard. Bot. Natl. Belg.* 37: 459. 1967, *Kew Bull.* 41(4): 974. 1986

(Poultice for chest pain. Fruits astringent.)

in Angola: casapola

in Rhodesia: umhalel'ingonyama

in Tanzania: ishengesho, msitu, shengeshu, talali

Keetia zanzibarica (Klotzsch) Bridson (*Canthium zanzibaricum* Klotzsch; *Plectronia zanzibarica* (Klotzsch) Vatke)

Tropical Africa, Tanzania. Edible fruits

See *Naturwissenschaftliche Reise nach Mossambique ...* 1: 291. 1861, *Oesterreichische Botanische Zeitschrift* 25: 231. 1875 and *Portugaliae Acta Biol.*, Sér. B, Sist. 11: 219–247. 1972, *Kew Bulletin* 41: 979. 1986

(Roots infusion drunk for stomachache.)

in Tanzania: mpendapendapo

Kerria DC. Rosaceae

Named after William Kerr, d. 1814 (Ceylon), Kew gardener, traveller and collector in China, Java and the Philippines, in 1803 appointed botanical collector for Kew at Canton in China, in 1812 Superintendent of the Colonial Botanic Gardens at Colombo, Ceylon. See *Transactions of*

the *Linnean Society of London* 12(1): 156–157. 1818 [dt. 1817, issued on 25 Feb 1818], Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 485. 1852 and E.H.M. Cox, *Plant-hunting in China. A History of Botanical Exploration in China and the Tibetan Marches*. 49. 1945, Kenneth Lemmon, *The Golden Age of Plant Hunters*. 109–119. London 1968, *Biol. J. Linn. Soc.*, 2: 61–76. 1970, Emil Bretschneider, *History of European Botanical Discoveries in China*. 189. 1981. The leaves contain small quantities of hydrogen cyanide (prussic acid).

Kerria japonica (Linnaeus) DC. (*Corchorus japonicus* (L.) Thunb.; *Corchorus japonicus* Thunberg; *Corchorus japonicus* (L.) Houtt.; *Kerria japonica* var. *denticulata* L.C. Wang et X.G. Sun; *Rubus japonicus* Linnaeus; *Spiraea japonica* (L.) Desv.)

China.

See *Mant. Pl. Altera* 245. 1771, *Nat. Hist.* (Houttuyn) 9: 146 (t. 54, fig. 2). 1778, *Flora Japonica ...* (Thunberg) 227. 1784, *Syst. Veg.*, ed. 14 (J.A. Murray). 501. 1784, *Trans. Linn. Soc. London, Bot.* 12(1): 156. 1818, *Mémoires de la Société Linnéenne de Paris* 1: 25. 1822, *Ann. Sci. Nat.* (Paris) 1: 389–390. 1824 and *J. Arnold Arbor.* 19: 344. 1938, *Bull. Bot. (Antiinflammatory, a decoction of the flowering shoots in the treatment of coughs and women's complaints.)

in English: bachelor's button, globeflower, Japanese rose, kerria

in China: di tang hua, ti tang

in Japan: yama-buki, yamabuki

Kerstingiella Harms Fabaceae (Phaseoleae)

Dedicated to the German traveller Otto Kersting, b. 1863 (Riga), explorer, plant collector in West Africa, 1897–1909 Togo Rep. (formerly French Togoland). See *Berichte der Deutschen Botanischen Gesellschaft* 26a: 230. 1908, Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815–1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916, F. Nigel Hepper, “Botanical collectors in West Africa, except French territories, since 1860.” in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69–75. Lisbon 1962, John H. Barnhart, *Biographical Notes upon Botanists*. Boston 1965, Anthonius Josephus Maria Leeuwenberg, “Isotypes of which holotypes were destroyed in Berlin.” *Webbia*. 19: 861–863. 1965, F.N. Hepper and F. Neate, *Plant collectors in West Africa*. 44. 1971, *Adansonia* 2: 381–390. 1976, *Hooker's Icones Plantarum* 38(4): 1–138. 1982.

Kerstingiella geocarpa Harms (*Macrotyloma geocarpum* (Harms) Maréchal & Baudet)

Tropical Africa. Annual non-climbing herb, often as *Macrotyloma geocarpum*

See *Berichte der Deutschen Botanischen Gesellschaft* 26A: 230, pl. 3. 1908, *Kew Bulletin* 16: 395–407. 1963, *Bulletin du Jardin Botanique National de Belgique* 47(1–2): 50–51. 1977, *Economic Botany* 34(4): 358–361. 1980, *Chromosome Inf. Serv.* 30: 1–2. 1981, *Journal d'Agriculture Traditionnelle et de Botanique Appliquée*, nouvelle série, 37(1): 187–199. 1995, *Ghana Journal of Science* 31–36: 67–71. 1997, *Biochemical Systematics and Ecology* 30: 943–952. 2002

(Plant in the treatment of dysentery, venereal diseases, fever, diabetes. Fruits, seeds and leaves for fevers, diarrhea, dysentery, venereal diseases, leaves decoction vermifuge; water in which the seeds have been boiled taken against diarrhea. Seeds antidote, emetic, in case of poisoning. Ceremonial, ritual.)

in English: geocarpa groundnut, ground bean, Kersting's groundnut

in Benin: dohi

Keteleeria Carrière Pinaceae

For Jean-Baptiste Keteleer, 1813–1903, gardener; see *Revue Horticole* 37: 449. 1866 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 121. 1989.

Keteleeria evelyniana Mast. (*Keteleeria delavayi* Tiegh.; *Keteleeria dopiana* Flous; *Keteleeria evelyniana* var. *dopiana* (Flous) Silba; *Keteleeria evelyniana* var. *pendula* J.R. Xue)

China. Tree

See *Bulletin de la Société Botanique de France* 38: 412, in text. 1891 and *The Gardeners' Chronicle*, ser. 3 33: 194, f. 82. 1903, *Bulletin de la Société d' Histoire Naturelle de Toulouse* 69: 404–406, f. 1–11. 1936, *Acta Phytotaxonomica Sinica* 21(3): 253, pl. 1. 1983, *Journal of the International Conifer Preservation Society* 7(1): 26. 2000

(Worshipped.)

in China: ou zai, yun nan you shan

Khaya A. Juss. Meliaceae

A vernacular name from Senegambia for *Khaya senegalensis*, see *Bull. Sci. Nat. Geol.* 23: 238. 1830, *Mémoires du Muséum d'Histoire Naturelle* 19: 249–250, pl. 10. 1830, *Apontamentos Phytogeographicos* 1858: 587. 1859 [Dec 1858 publ. Dec 1859] and *Taxon* 31(1): 66. 1982, *African Study Monographs* 24(1–2): 1–168. 2003, Hawthorne, W. & Jongkind, C. *Woody Plants of Western African Forests: A Guide to the Forest Trees, Shrubs and Lianas from Senegal to Ghana*. Kew Publishing, Royal Botanic Gardens, Kew, United Kingdom. 2006. Closely related to *Carapa* and *Swietenia*.

Khaya anthotheca (Welw.) DC. (*Garretia anthotheca* Welw.; *Khaya agboensis* A. Chev.; *Khaya agboensis* A. Chev. & A.

Chev.; *Khaya anthotheca* C. DC.; *Khaya euryphylla* Harms; *Khaya mildbraedii* Harms; *Khaya nyasica* Stapf ex Baker f.; *Khaya wildemanii* Ghesq. f)

Tropical Africa. Tree, monoecious, straight bole, leaves coriaceous, whitish sweet-scented unisexual flowers, inflorescence an axillary panicle, nearly globose woody erect dehiscent capsule, very close to *Khaya ivorensis*

See *Apontamentos Phytogeographicos* 587. 1859, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 1: 721. 1878 and *Notizbl. Königl. Bot. Gart. Berlin* 3: 169. 1902, *J. Linn. Soc., Bot.* xl. 42. 1911, *Notizbl. Bot. Gart. Berlin-Dahlem* 7: 223. 1917, *Explor. Bot. Afrique Occ. Franc.* i. 116. 1920, *Rev. Zool. Afr.* xiii. Suppl. Bot. 29. 1926, *Rev. Bot. Appliq.* 1928, viii. 209, descr. 1928

(The wood dust may cause irritation to the skin. Bitter bark antianemic, antiseptic, anthelmintic, applied to wounds, boils, sores and ulcers; bark decoction or infusion to treat fever, colds, cough, pneumonia, abdominal pain, vomiting and gonorrhea; powdered bark taken as aphrodisiac and to treat male impotence. Root decoction drunk to treat anemia, dysentery. Leaves used for making an arrow poison. Veterinary medicine, bark as anthelmintic.)

in English: African mahogany, king of the timber, red mahogany, smooth-barked mahogany, Uganda mahogany, white mahogany

in French: acajou blanc, acajou d'Afrique, acajou de Bassam, acajou krala

in Cameroon: krala, mangona, sewa, batwiri, bubai, djambi, mangona mahagoni, sewa, ira

in Central African Republic: nonon

in Congo: dehe, ndola

in Ghana: bubini, kwabako

in Ivory Coast: krala

in Nigeria: krala, mangona, nofuwa, ogwango, ogwango nofua, ono; ogwango nofuwa (= white mahogany), ogwango (Edo)

in Tanzania: linjo, mkangazi, mwovu, nyalulasi

in Tropical Africa: cababa

in Uganda: munyama

in W. Africa: kwabohori, nussangue mahagoni, nussangue

***Khaya grandifoliola* C. DC.**

Tropical Africa. Tree, monoecious, whitish sweet-scented unisexual flowers, inflorescence an axillary panicle, nearly globose woody erect dehiscent capsule, very close to *Khaya anthotheca*

See *Bulletin de la Société Botanique de France* Mém. 8: 10. 1907, *J.A.T.B.A.* 5: 593–595. 1958, *Journal of Ethnopharmacology* 69(1): 27–33. 2000, *Critical Reviews in*

Plant Sciences 22(1): 79–105. 2003, *Pharmaceutical Biology* 44(2): 152–155. 2006

(Bark antimalarial, molluscicidal, insecticidal, insect anti-feedant, nematocidal, antianemic, hypocholesterolemic, hypoglycemic, bitter, hypoproteinemic, antiseptic, febrifuge, anthelmintic; bark decoction or infusion to treat fever, colds, cough, pneumonia, intestinal parasites, abdominal pain, stomach complaints, gastric ulcers, diarrhea, pain after childbirth, skin diseases, vomiting and gonorrhea; powdered bark taken as aphrodisiac and to treat male impotence, skin diseases. Bark used as a fish poison.)

in English: African mahogany, Benin mahagoni, Benin mahogany, Benin wood, big-leaved mahogany, broad-leaved mahogany, dry-zone mahogany, ogwango mahagoni

in French: acajou à grandes feuilles, acajou blanc, acajou du Bénin, acajou pale

in Central African Republic: bågû, de

in Cameroon: dain, loukrou, menigono, oule

in Yoruba: oganwo

in Nigeria: acajou mangona, apapayi, edim, egi, gedu, krala, male, odala, oganwo, ogwango, ono; oganwo (Yoruba); ogwango (Edo); ono (Igbo); male (Hausa)

in Ghana: apenewa, dubini, dukuma, dumanami, krubna, odupong, tiama tiama, tima tima

***Khaya ivorensis* A. Chev. (*Khaya caudata* Stapf ex Hutch. & Dalziel; *Khaya klainei* Pierre ex Pellegr.)**

Tropical Africa. Tree, monoecious, whitish sweet-scented unisexual flowers, inflorescence an axillary panicle, nearly globose woody erect dehiscent capsule

See *Notulae Systematicae. Herbarium du Museum de Paris* 2: 77. 1911, *Flora of West Tropical Africa* 1: 490. 1928, *Phytochemistry* 31(9): 3003–3004. 1992, *Phytomedicine* 11(6): 504–508. 2004, *Journal of Ethnopharmacology* 90(2): 221–227. 2004, *Pest Management Science* 61(2): 186–190. 2005

(Bark and seeds antifungal, antibacterial, antifeedant activity in insects. Bark antiinflammatory, anticonvulsant, antitrypanosomal, antiplasmodial, decoction taken to treat cough, fever and anemia. Root pulp as an enema to treat dysentery. Ground young shoots, bark and leaves applied externally to wounds, sores, ulcers and tumours, and as an anodyne to treat rheumatic pains and lumbago.)

in English: African mahogany, Benin wood, coast mahogany, Gambia mahagoni, Grand Bassam mahogany, Lagos mahogany, Nsamgilla mahagoni, Oganwo mahagoni, red mahogany, W. African mahogany

in French: acajou à peau rugueuse, acajou Bassam, acajou d'Afrique, acajou de Bassam, acajou du Gabon, acajou Grand Bassam, acajou Lahou, acajou n'dola, acajou rouge

in Cameroon: doukouma, houngo, n'gollon, n'golo, ngollo, ngolo, zamenguila, zoele

in Central African Republic: deke

in Congo: ewe, n'dola

in Equat. Africa: abeubeu

in Gabon: bilolo, dilolo, m'bega, mbega, n'dola, ombega, zaminguila, zamniguila

in Ghana: dubini, dupuin, odupon, oganwo, ogwanwo

in Nigeria: agogo, bassam, biruba, digiten, dirinishi, efrimomiba, eyi, gedu, hungo, koghor, krala, male, mangona, ndola, ngolo, nofuwa, odala, odari, odupon, oganwo, ogunawo, ogunrawo, ogwango, ogwanwo, ono, orkogho, orkunghu, timba, udu-ayi, utu-eyin, zoele, zoeli; oganwo (Yoruba); ogwango (Edo); ono (Igbo); ohkughu (Jekri); okogho (Sobo)

in W. Africa: bisselon

Khaya madagascariensis Jum. & H. Perrier

Comoros and Madagascar. Tree

See *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 142: 899–901. 1906, *Ann. Mus. Col. Marseille*, sér. 2, 5: 366, 1907, *JATBA* 5: 593–595. 1958

(Bark to treat fever, and it is applied externally to treat wounds and hemorrhages.)

in English: Madagascar mahogany

in French: acajou de Madagascar

in Madagascar: gavoala

Khaya nyasica Stapf ex Baker f.

Tropical Africa. Often separate from *Khaya anthotheca*, but can better be considered synonymous

See *J. Linn. Soc., Bot.* xl. 42. 1911, *JATBA* 5: 593–595. 1958

(Antimicrobial, vermifuge.)

in English: banket mahogany, mahogany, Nyasaland mahogany, red mahogany, Rhodesian mahogany

in S. Rhodesia: umBaba, umBawa

in Southern Africa: mubaba, mubawa, mururu, muWawa (Shona)

in Zambia: mbawa, mululu

Khaya senegalensis (Desr.) A. Juss. (*Khaya senegalensis* A. Juss.; *Swietenia senegalensis* Desr.; *Swietenia senegalensis* Desv.)

Cameroon, Mauritania and Senegal. Evergreen tree, round crown, scaly bark, slash thick with red/white layers, slightly resinous, dark shining foliage, leaves glossy coriaceous, sweet-scented white flowers borne individually in conspicuous panicles, woody capsules, leaves as animal feed, low

fodder quality, savanna woodland, riverine forest, close to *Khaya anthotheca* and *Khaya grandifoliola*

See *Enumeratio Systematica Plantarum* 4, 20. 1760, *Encyclopédie Méthodique, Botanique* 3: 679. 1791, *Mémoires du Muséum d'Histoire Naturelle* 19: 249–250, t. 10. 1830, *Anais Cons. Ultramar.* ser. 1 1858: 587. 1859 [*Apontamentos Phytogeographicos*] and *Planta Medica* 65(3): 209–212. 1999, *Critical Reviews in Plant Sciences* 22(1): 79–105. 2003, *Anticancer Research* 26(3B): 2397–2405. 2006, *Phytotherapy Research* 21(8): 731–734. 2007

(Flowers against stomach complaints and syphilis. Roots vermifuge, taeniicide, antimicrobial, a bitter tonic, a fever remedy, applied against jaundice, stomachache, edema and amenorrhea. Bark antianemic, antiviral, antibacterial, anti-inflammatory, antiproliferative, anticancer, antioxidant, pro-apoptotic, antifeedant, leishmanicidal, molluscicidal, larvicidal, anticonvulsant, antiplasmodial, antimalarial, purgative, antidote, abortifacient, tonic, emmenagogue, anthelmintic, for gonorrhea and venereal diseases, leprosy, chickenpox, angina, stomach complaints, diarrhea, dysentery, malaria, fevers, rheumatism and headache, impotence, sterility; applied as disinfectant, antiinflammatory, to treat skin diseases, rash, scabies, wounds, ulcers, boils, hemorrhoids, swellings, toothache; a decoction made from stem bark of *Khaya senegalensis*, *Parkia biglobosa* and *Vitex doniana* taken to cure piles. Leaves and stem bark vermifuge, antisickling, purgative, for malaria, skin complaints, wounds, jaundice, edema, headache, depression. Seed oil taken to treat syphilis, and rubbed to treat rheumatism, skin rashes and influenza. Wood ash insecticide. Roots and/or bark an ingredient of complex arrow poisons. Bark as fish poison. Veterinary medicine, bark anthelmintic, to treat trypanosomiasis, diarrhea, ulcers. A magic tree used in rituals.)

in English: African mahogany, dry zone mahogany, Gambia mahogany, savanna mahogany, Senegal mahogany, W. African mahogany

in French: acajou d'Afrique, acajou du Senegal, acajou du Soudan

in Central African Republic: oumvou

in Ghana: kanga, kuntunkuri

in Mali: jala, pelu, penu

in Nigeria: abubu, chea, kagem, madachi, oganwo, ogwango, okpe; madachi, mdachi (Hausa); dalehi, kahi (Fula); ha (Tiv); kagam (Kanuri); okpe (Itsekiri); oganwo (Yoruba); ono (Igbo)

in Senegal: diala

in Togo: frimu

in W. Africa: bisselon, oganwe

in Yoruba: oganwo, ogonwo

in China: fei zhou lian

Kibatalia G. Don Apocynaceae

See *A General History of the Dichlamydeous Plants* 4: 86. 1837 and Rudjiman, S.U. "A revision of *Beaumontia* Wallich, *Kibatalia* G. Don and *Vallariopsis* Woodson (Apocynaceae)." *Agric. Univ. Wageningen Pap.* 86–5: 1–99. 1986, Endress, M.E. & Bruyns, P.V. "A revised classification of the Apocynaceae s.l." *Botanical Review* 66(1): 1–56. 2000

Kibatalia arborea (Blume) G. Don (*Hasseltia arborea* Blume; *Kibatalia arborea* G. Don; *Kixia arborea* (Blume) Blume; *Kixia arborea* (Blume) Steud.; *Tabernaemontana ovalis* Miq.)

Pen. Thailand to W. & C. Malesia. A big tree, with latex, leaves elliptical, inflorescence a cymose cluster, two long follicles reflexed thick hard leathery, in lowland forest, on stream banks and steep slopes

See *A General History of the Dichlamydeous Plants* 4: 70, 86. 1837 [1837–1838], *Nomencl. Bot.*, ed. 2, 1: 846. 1841, *Rumphia* 4: 25. 1849, *Fl. Ned. Ind.*, *Eerste Bijv.* 229. 1861

(Poisonous. Anthelmintic, few drops of the latex in a glass of water. Can cause inflammation.)

in Indonesia: jelutong beruang, kaju santen, ki benteli, lingorumbolia

in Malaysia: jelutong beruang, tamadak

in Thailand: ba du bu wae

Kibatalia blancoi (Rolfe ex Stapf) Merr. (*Kibatalia blancoi* Merr.; *Kibatalia blancoi* (Rolfe) Merr.; *Kibatalia merrittii* (Merr.) Woodson; *Kixia arborea* Fern.-Vill., nom. illeg.; *Kixia blancoi* Rolfe ex Stapf; *Kixia blancoi* Rolfe; *Kixia merrittii* Merr.)

Philippines. Tree, leathery smooth shining leaves opposite, in the axils of the leaves white or light green showy flowers, corolla tube with 5 lobes, fruit a cylindrical follicle, in secondary and primary forest, in mountainous areas

See *Philipp. J. Sci.* 17: 309. 1921 [1920 publ. 1921]

(Roots and bark in decoction abortifacient. Leaves applied on the forehead in case of headache. Bark and leaves a fish poison.)

in Philippines: ayete, baguibbonlas, kagpaayan, laneteng-gubat, laneti, laniting-gubat, pasnit, tibig

Kibatalia gitingensis (Elmer) Woodson (*Kickxia gitingensis* Elmer; *Kixia gitingensis* Elmer; *Vallaris angustifolia* Merr.; *Vallaris gitingensis* (Elmer) Merr.)

Philippines. Tree, evergreen, straight bole, simple opposite smooth leaves, flowers white to pale green, inflorescence a cymose cluster, corolla very variable, fruit a cylindrical follicle dehiscent, seeds pointed or beaked, in secondary and primary forest

See *Leaflet. Philipp. Bot.* 4: 1455. 1912, *Philipp. J. Sci.* C 10: 70. 1915, *Philipp. J. Sci.* 60: 216. 1936, *Acta Med. Philipp.* 1: 1–4. 1964, *Philippine Journal of Science* 217–220. 1965 [1966], *Annales Pharm. Fr.* 25(2): 107–14. 1967

(Roots and bark in decoction abortifacient. Alkaloids from the bark and leaves; antimalarial and antineoplastic. Fish poison.)

in Philippines: laneteng gubat, laniti, laniting gubat

Kibatalia macrophylla (Pierre ex Hua) Woodson (*Kibatalia anceps* (Dunn & R.S. Williams) Woodson; *Paravallaris macrophylla* Pierre ex Hua; *Paravallaris yunnanensis* Tsiang & P.T. Li; *Trachelospermum anceps* Dunn & R.S. Williams; *Vallaris anceps* (Dunn & R.S. Williams) Wall. ex C.E.C. Fisch.; *Vallaris arborea* C.E.C. Fisch.)

China to Indochina. Tree, white latex, corolla white to cream to slight pink, calyx green, sweet strong fragrance

See *Flora Indica ... nec non Prodrumus Florae Capensis* 51. 1768, *Bulletin Mensuel de la Société Linnéenne de Paris sér.* 2 1: 30. 1898 and *Bulletin de la Société Botanique de France* 51: 273–274. 1904, *Bull. Sci.* 60: 214. 1936, *Sunyatsenia* 3(2–3): 101. 1936, *Acta Phytotaxonomica Sinica* 11(4): 373, pl. 47. 1973

(Latex used to arrest bleeding of leech bites.)

Kibatalia maingayi (Hook.f.) Woodson (*Holarrhena daronensis* Elmer; *Kibatalia daronensis* (Elmer) Woodson; *Paravallaris maingayi* (Hook.f.) Kerr; *Vallaris daronensis* (Elmer) Merr.; *Vallaris maingayi* Hook.f.)

Pen. Thailand to Philippines. Trees, inner bark whitish with abundant white sap, opposite leaves, flowers in cymose clusters, fruit follicle

See *Fl. Brit. India* 3: 651. 1882 and *Leaflet. Philipp. Bot.* 4: 1455. 1912, *Philipp. J. Sci.* 60: 213, 218. 1936, *Fl. Siam.* 2: 456. 1939

(Leaves applied externally in the treatment of an enlarged spleen.)

in Malaysia: jelutong pipit

Kickxia Dumort. Scrophulariaceae (Plantaginaceae)

Named for Belgian botanist and mineralogist Jean Kickx, Sr., 1775–1831, apothecary, professor of botany, pharmacy and mineralogy at the Brussels medical school, author of *Flora bruxellensis*. Bruxelles 1812, father of Jean Kickx, Jr. (1803–1864). See *Genera Plantarum* 89–90. 1789, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 7. 1821, Barthélemy Charles Joseph Dumortier (1797–1878), *Florula belgica*. 35. Tournay 1827, Georg Christian

Wittstein, *Etymologisch-botanisches Handwörterbuch*. 485f. Ansbach 1852, E. Morren, *Notice sur la vie et les travaux de Jean Kickx 1775 à 1851*. Gand 1857 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 287. 1965, Theodore W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 210. 1972, Stafleu and Cowan, *Taxonomic Literature*. 2: 534–535. 1979, *Fl. Il. Entre Ríos* 6(5): 453–504. 1979, *Taxon* 29: 728. 1980, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 121. 1989, *Watsonia* 19: 169–171. 1993, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 1984–1985. 2001.

Kickxia blancoi Rolfe (*Kickxia arborea* Fern.-Vill.; *Kickxia blancoi* Rolfe ex Stapf; *Kickxia macgregori* Elm.; *Kickxia merrittii* Merr.)

Philippines.

See *Journal of the Linnean Society, Botany* 21: 313. 1884 and *Philipp. J. Sci.* 17: 309. 1921 [1920 publ. 1921]

(Roots and bark in decoction abortifacient.)

in Philippines: ayete, baguibonlas, kagpaayan, laneti, laniting-gubat, pasnit

Kickxia elatine (L.) Dumort. (*Antirrhinum elatine* L.; *Elatinoides elatine* (L.) Wettst.; *Linaria elatine* (L.) Mill.)

Europe.

See *Species Plantarum* 2: 612–613. 1753, *The Gardeners Dictionary*: ... eighth edition 1768, *Florula belgica*, opera majoris prodromus, auctore ... 35. 1827, *Die Natürlichen Pflanzenfamilien* 4(3b): 57, 58. 1891

(Astringent, tonic, hemostat.)

in English: sharp-point fluvellin

Kickxia ramosissima (Wall.) Janch. (*Kickxia ramosissima* Janch.; *Linaria ramosissima* Boiss.; *Linaria ramosissima* Wall.)

Europe.

See *Florula belgica*, opera majoris prodromus, auctore ... 35. 1827, *Pl. Asiat. Rar.* (Wallich), 2: 43, t. 153. 1831 and *Oesterr. Bot. Z.* 82: 152. 1933, *Courier Forschungsinst. Senckenberg*, 71: 132. 1984

(Astringent, tonic, plant juice given in diabetes.)

Kigelia DC. Bignoniaceae

The generic name is based on an African common name, in Mozambique the tree is *kigeli-keia*, see *Bibliothèque Universelle de Genève* sér. 2. 17: 135–136. 1838, *Sylva Tellur.* 166. 1838, *Ann. Sci. Nat., Ser. 2, Bot.*, xi. 297. 1839, *Prodr.* (DC.) 9: 247. 1845, *Journal of Botany, British and Foreign* 3: 330. 1865 and *Fieldiana, Bot.*, n.s. 41: 77–161. 2000.

(Unripe fruits poisonous; the fruit reported to be purgative and also known to induce abortion; criminal poisoning. Fruits used for treatment of wounds, leprosy; powdered dried fruit used as a dressing for ulcers, sores, rheumatism. Bark decoction a remedy for headaches, stomachache and diarrhea; bark soaked in water and the liquid drunk to increase lactation in women. Bark and roots used for treatment of convulsions; root bark extract in water used to cure gonorrhoea. Leaves and stem bark for rheumatism, malaria, infertility, dysentery, epilepsy and headache; a leaf decoction taken for malaria. Veterinary medicine, the fruit, either sliced or pounded, fed to chickens as a treatment for Newcastle disease. Magic, ritual, fruit buried instead of the body of a lost person believed to be dead.)

in English: Bologna sausage tree, common sausage tree, cucumber tree, fetish bean, fetish tree, German sausage tree, sausage tree

in India: balam-khira, balamkhira, jhar fanoosh, marachchurai, sirakundalam, yaanaipudukkan

in Congo: ombimbina, onkimbina

Kiggelaria L. Flacourtiaceae

After the Dutch botanist François (Franciscus, Francis, Franz) Kiggelaer (Kiggelaar), 1648–1722, traveller, plant collector, author of *Horti Beaumontiani exoticarum plantarum catalogus* ... [Simon van Beaumont, 1640–1726, was the Secretary of the United Provinces of the Netherlands.] Hagae-Comitis 1690, author of the list of Latin synonyms in Abraham Munting (1626–1683), *Phytographia curiosa*. Amsterdam & Leyden 1702–1713, translator and editor (with Frederik Ruysh, 1638–1731) of Jan and Caspar(us) Commelin, *Horti Medici Amstelodamensis Rariorum Plantarum Descriptio et Icones*. Amsterdam 1697, 1701. See

Catalogus insignium & omnis fere generis studii librorum ... Hos omnes ... collegit ... Franciscus Kiggelaer. Publico omnium distractio fiet per Abrah. de Hondt ... die 21. Junii 1723. Hagae-Comitum [1723], *Species Plantarum* 2: 1037. 1753 and J. Britten, "Some early Cape botanists and collectors." *J. Linn. Soc. Bot.* 45: 37–39. 1920, John Hutchinson, *A Botanist in Southern Africa*. 610. London 1946, James Britten, *The Sloane Herbarium* ... revised and edited by J.E. Dandy. London 1958, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 288. 1965.

Kiggelaria africana L. (*Kiggelaria dregeana* Turcz.; *Kiggelaria ferruginea* Eckl. & Zeyh.; *Kiggelaria flavo-velutina* Sleumer; *Kiggelaria glabrata* Gilg; *Kiggelaria glandulosa* Salisb.; *Kiggelaria grandifolia* Warb.; *Kiggelaria hylophila* Gilg; *Kiggelaria serrata* Warb. ex Engl.; *Kiggelaria serrata* Warb.)

South Africa.

See *Species Plantarum* 2: 1037. 1753, *Prodr. Stirp. Chap. Allerton* 321. 1796, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 1: 15. [Dec 1834–Mar 1835], *Bull. Soc. Imp. Naturalistes Moscou* xxvii. (1854) II. 333. 1854, *Pflanzenw. Ost-Afrikas* C (1895) 278. 1895 and *Bot. Jahrb. Syst.* xl. 469. 1908, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 86. 1934

(Stem bark and fruits tonic, for skin diseases. Ritual, protective for the kraal.)

in English: Natal mahogany, porkwood, wild peach

in S. Rhodesia: muBozo

in Southern Africa: wildeperske, speekhout (= spoke wood), spekhout, vaderlandsrooihout; muBozo, muMboza (Shona); uMunwe, umHlabahlungulu, imFeyenkomo (= sugar cane of bovines), isiKlalu, isiKlaku, uSahlulamanye (Zulu); umKokoko, umKhokokho, umNgcondo, umHlandela, umDuma (= the thunderer), umLuvuluvu, umVethi, iDungamuzi, uMhlinzinyathi (Xhosa); lekgatsi (South Sotho); monepenepene, mphatha-silo (North Sotho); mufhata-vhufa (Venda)

Kinabaluchloa K.M. Wong Poaceae (Gramineae)

After Mt. Kinabalu, highest peak in Malaysia, see Datin Margaret Luping, Chin Wen and E. Richard Dingley, eds., *Kinabalu—Summit of Borneo*. The Sabah Society, Kota Kinabalu, Sabah, Malaysia 1978, *Kew Bulletin* 48(3): 517–532. 1993, *PROSEA* 7: 151. 1995, K.M. Wong, *Bamboo—The Amazing Grass. A Guide to the Diversity and Study of Bamboos in Southeast Asia*. International Plant Genetic Resources Institute (IPGRI) and University of Malaya 2004.

Kinabaluchloa wrayi (Stapf) K.M. Wong (*Bambusa wrayi* Stapf) (named for L. Wray, 1853–1942)

Peninsular Malaysia. Densely tufted, erect, drooping or leaning, thin-walled, nodes prominent, inflorescence on leafless branch, clustered pseudospikelets at each node, long slender internodes used to make blowpipes, montane forest

See *Bulletin of Miscellaneous Information Kew* 1893: 14. 1893, *Annals of the Royal Botanic Garden, Calcutta*. 7: 49, pl. 46. 1896 and *Gard. Bull. Sing.* 16: 73. 1958, *Kew Bulletin* 48(3): 524, f. 4. 1993

(For gonorrhoea, pound the young shoots and poultice. Bewitchment, plant the bamboo about the rice crops.)

in English: Malaysian thin-walled bamboo

in Malaysia: buloh bersumpitan, buloh gading, buloh sewor, buluh sumpitan

Kingiodendron Harms Fabaceae (Caesalpiniaaceae, Detarieae)

In honor of the British botanist Sir George King, 1840–1909, plant collector, Brigade surgeon, Superintendent of the Calcutta Botanic Gardens, professor of botany, 1891–1898 Director of the Botanical Survey of India, 1870 Fellow of the Linnean Society, 1887 Fellow of the Royal Society, among his writings are *The species of Myristica of British India*. Calcutta 1891, *The Anonaceae of British India*. Calcutta and London 1893, *A Guide to the Royal Botanic Garden, Calcutta*. Calcutta 1895, with James Sykes Gamble (1847–1925) and Andrew Thomas Gage (1871–1945) wrote *Materials for a flora of the Malay Peninsula*. Calcutta. 1889–1936. See *Nat. Pflanzenfam. Nachtr.* II-IV 1: 194. 1897 and J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 291. 1965, *Blumea* 18(1): 1–52. 1970, R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992.

Kingiodendron pinnatum (DC.) Harms (*Hardwickia pinnata* Roxb., nom. nud.; *Hardwickia pinnata* Roxb. ex DC.; *Hardwickia pinnata* DC.; *Kingiodendron pinnatum* (Roxb. ex DC.) Harms; *Prioria pinnata* (Roxb. ex DC.) Breteler)

India. Perennial non-climbing tree, small bisexual yellowish mildly fragrant flowers densely arranged in axillary cylindrical paniculate racemes, turgid woody compressed pods, famine food

See *Hortus Bengalensis*, or a catalogue ... 33. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 487. 1825, *Die Natürlichen Pflanzenfamilien* 1: 194. 1897 and *Wageningen Agricultural University Papers* 99–3: 52. 1999

(Fresh leaves eaten to cure blood diseases. Oleoresin/balsam used for the treatment of gonorrhoea, rheumatism. Veterinary medicine, oleoresin a dressing for sores of elephants.)

in English: Malabar mahogany

in India: anjan, anjana, choupaini, chuvannapainee, curali, cuvannapayani, enne, enneykolavu, hannuyenne, hennuyenne, jennuyenne, kiyavu, kodapala, kodapalai, kodapalla, kolavu, kolla, kudaippali, kulayu, madanchambrani, madeyansampirani, matayen samprani, shirali, shurali, shurami, surali, suvannapayani, uram, yeme, yenne

Klainedoxa Pierre ex Engl. Irvingiaceae (Simaroubaceae)

After R.P. Klaine, plant collector in Gabon (between 1892 and 1905), see Pierre, Jean Baptiste Louis (1833–1905), *Tabulae Herbarii L. Pierre* 1896, *Bull. Soc. Linn. Par.* ii. (1896) 1235. 1896, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 227. 1896 and *Adansonia* 27(2): 325–335. 2005.

Klainedoxa gabonensis Pierre (*Klainedoxa buesgenii* Engl.; *Klainedoxa cuprea* Tiegh.; *Klainedoxa dybowskii* Tiegh.; *Klainedoxa gabonensis* Pierre ex Engl.; *Klainedoxa gabonensis* var. *microphylla* Pellegr.; *Klainedoxa gabonensis* var. *oblongifolia* Engl.; *Klainedoxa lanceifolia* Vermeesen; *Klainedoxa lecomtei* Tiegh.; *Klainedoxa macrocarpa* Tiegh.; *Klainedoxa microphylla* (Pellegr.) A.H. Gentry - p.p. quoad typum tantum; *Klainedoxa oblongifolia* (Engl.) Vermeesen; *Klainedoxa oblongifolia* Stapf ex Broun & R.E. Massey - non Wight, nec Baill., non (Engl.) Vermeesen; *Klainedoxa ovalifolia* Vermeesen; *Klainedoxa pachyphylla* Mildbr.; *Klainedoxa spinosa* Tiegh.; *Klainedoxa zenkeri* Tiegh.)

See *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(4): 227. 1896, *Bull. Soc. Linn. Par.* ii. (1896) 1235. 1896 and *Ann. Sci. Nat., Bot. sér.* 9, 1: 300, 302–303. 1905, *Bot. Jahrb. Syst.* xlv. 285. 1911, *Wiss. Ergebn. Zweit. Deut. Zentr.-Afr. Exped.* (1910–11), *Bot.* 2: 57, nomen. 1922, *Man. Essences Forest. Congo Belg.* 146, 148, 150. 1923, *Fl. Sudan* 228. 1929, *Ann. Missouri Bot. Gard.* 71(1): 168. 1984, *Bull. Jard. Bot. Nation. Belg.* 65(1–2): 153–154. 1996

in Cameroon: bukoko, djambo, iman matan, n'gom, ngion, ngom, ngon, ngondo, ngondo, njion, oban ngon, obi, odui, zembi

in Central Africa: oboro, oboto

in Congo: angwama, ekele, ikele, kuma kuma, mukonga

in Gabon: awesi, ayesi, bewinda, bwamba, eves, eveuss, kondjo, lindaki, mougoma, mongoumougouma, mugoma, nkoma, nkondjo, ogoma, uvinya, vikeko

in Ivory Coast: botou, kroma

in Liberia: goe

in Nigeria: akpulu, agbara, alukanraba, alukon-rabon, apepere, awtawa, epologun (if the tree is spiny), ifa inaki, karakoro, kelim kelim, kroma, ngon, ngongdek, obi, odudo, odudu, ogbe-ako, oguegodin, okip, oton

Kleinhovia L. Sterculiaceae (Malvaceae)

Named for the physician Christiaan Kleynhoff or Kleinhoff, d. 1777, a Hollander of German birth, plant collector for Johannes Burman, in the Dutch East Company, former Director of the Botanic Garden in Batavia, Java; a Christiaan Frederik Kleynhoff van Enspijk is the author of *Bedenkingen over het Einde, waartoe de Insecten vermoedelyk geschapen zyn*, etc. Amsteldam 1805 and “Redevoering over de waarde

van het hedendaagsch leerstellig onderwijs der landhuishonddkunde, als wetenschap beschouwd.” *Annales Academiae Lugduno-Batavae*. Leyden 1817. See C. Linnaeus, *Species Plantarum*. Ed. 2. 2: 1365–1366. 1763, Nicolaas Laurens Burman (1734–1793), *Flora Indica*. Lugduni Batavorum 1768 and John Landwehr, *VOC: A Bibliography of Publications Relating to the Dutch East India Company, 1602–1800*. Ed. Peter van der Krogt. HES Publisher, Utrecht 1991.

Kleinhovia hospita L. (Latin *hospes*, *hospitis* for a stranger)

Papua New Guinea. Treelet, pink-rose-red flowers

See *Species Plantarum*, Editio Secunda 2: 1365–1366. 1763 and *Journal of Cytology and Genetics* 7–8: 98–105. 1973, *Regnum Veg.* 127: 59. 1993

(Used in Sidha. Bark and leaves poisonous. Antibacterial, spasmolytic, bark scraped, mixed with water and drunk to relieve coughs and tuberculosis. Crushed leaves to treat skin diseases; young leaves juice drunk to treat bee stings; leaf rubbed on the forehead to relieve a headache; leaves decoction for scabies. Bark and leaves used to poison eels.)

in English: guest tree

in Comoros: mdjadjani

in China: zhe gu ma

in India: panaitteku, punaitteku, punteku

in Japan: fūsen-akame-gashiwa

Malayan names: temahai, temahau

in Papua New Guinea: amaeka, mamua, mato kea, mulumu, powi'i

in Philippines: tan-ag

Kleinia Miller Asteraceae

For the German (born Königsberg) botanist Jacob (Jakob) Theodor Klein, 1685–1759 (Danzig, Gdansk), taxonomist, a student of natural history, botanical collector, zoologist, a member of the Royal Society of London and contributor to the *Philosophical Transactions* 1730–1748, among his writings are *Naturalis dispositio Echinodermatum*. Accessit lucubratiuncula de aculeis echinorum marinorum, cum spicilegio de belemnitis. Danzig 1734, *Descriptiones Tubulorum marinorum*, etc. Gedani [Danzig, Gdansk] 1731, *Dubia circa plantarum marinarum fabricam vermiculosam*. Petropoli 1760, *Historiae Piscium naturalis promovendae*, etc. Gedani 1740–1749, *Fasciculus rariorum et exoticarum priori auctior ex horto Kleiniano*. Dantisci 1724 and *Stemmata avium*. Lipsiae 1759, of J.J. Scheuchzer edited *Sciagraphia lithologica curiosa, seu lapidum nomenclator*. 1740. See *The Gardeners Dictionary ... Abridged ... fourth edition* 44. 1754, *Histoire de l'académie royale des sciences. Avec les mémoires de mathématique & de physique* 1750: 377–378. 1754, *Enumeratio Systematica Plantarum, quas in insulis*

Caribaeis 8, 28. 1760, *Sel. Strip. Amer. Hist.* 215. tab. 127. 1763, *Annales du muséum national d'histoire naturelle* 2: 423. 1803, *Archives de Botanique* 2: 518. 1833 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 298. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 213. 1972.

Kleinia grandiflora (Wall. ex DC.) N. Rani (*Cacalia grandiflora* Wall.; *Notonia grandiflora* Wall. ex DC.; *Senecio indicus* Backer ex K. Heyne)

India. Stout, subsucculent undershrub, yellow florets

See *Species Plantarum* 2: 834. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 44. 1754, *Enumeratio Systematica Plantarum* 8, 28. 1760, *Archives de Botanique* 2: 518. 1833 and *Bull. Torrey Bot. Club* 51: 370. 1924, Burkill, I.H. *A Dictionary of the Economic Products of the Malay Peninsula*. 2 Vols. - Ministry Agric. & Cooperatives, Kuala Lumpur. 1966, *Fl. Tamilnadu Carnatic* 3(1): 801. 1983, *Journal of Ethnopharmacology* 102(2): 246–255. 2005

(A few drops of leaf juice poured into the ear to treat ear-ache; leaf juice mixed with *Tridax procumbens* plant juice applied for insect bite, itching; leaf paste applied for eczema, giddiness and joint pains; leaf powder or paste applied for vitiligo and scabies. For hydrophobia. Veterinary medicine, leaf paste for dislocation in the joints in cow and goat; leaves for anthrax.)

in India: elai kalli, kundelucheviaku, maansevikalli, musakadhukalli, muyalkaathilai, muyalkathilai, muyalkathu, muyalkathu chedi, muyalkathu kallei, yaanaivilaripatchilai

Kleinia squarrosa Cufod. (*Kleinia eupapposa* Cufod.; *Kleinia kleinioides* auct.; *Senecio eupapposus* (Cufod.) G.D. Rowley; *Senecio polycotomus* (Chiov.) H. Jacobsen subsp. *squarrosus* (Cufod.) G.D. Rowley)

Tanzania. Scrambling herb, suberect, straggling, ascending, succulent, stem yellow-green, sap with strong acrid or resinous smell

See *Nuovo Giornale Botanico Italiano* n.s. 50: 114. 1943, *Bulletin du Jardin botanique national de Belgique / Bulletin van de National Plantentuin van België* 37(3): 1115–1193. 1967, *Stuttgarter Beiträge zur Naturkunde* 218: 5. 1970

(Stem boiled and soaked in water for asthma, jaundice, malaria, syphilis, amenorrhoea.)

in Kenya: mun'endya nthenge

Knema Lour. Myristicaceae

From the Greek *kneme* 'limb, leg, knee, an internode', referring to the nature of the stem, see *Flora orientalis* 141. 1755, *Flora Cochinchinensis* 2: 604. 1790, *Prodromus Florae Novae Hollandiae* 399. 1810 and *Blumea* 25(2): 365, 382, 387, 397, 414, 416, 422, 424, 429, 445, 463. 1979.

Knema andamanica (Warb.) W.J. de Wilde

India, Andaman.

See *Monog. Myrist.* 590. 1897 and *Blumea* 25(2): 370, 372. 1979

(For diarrhea, dysentery and mouth sores.)

Knema attenuata Warb. (*Myristica attenuata* Wall.)

India. Tree, exuding watery reddish latex when cut, flowers unisexual urn-shaped and pink inside, ovoid drupes densely brown tomentose, ovoid seeds enclosed within a crimson red-coloured fleshy aril

See *Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 590. 1897

(Blood red sap smeared over legs to keep off land leeches. One of the ingredients of *ashwagandhadhi ghritam*, medicated *ghee*, used for spleen and breathing disorders.)

in India: kennelli

Knema cinerea (Poir.) Warb. var. ***glauca*** (Blume) Y.H. Li (*Knema angustifolia* (Roxb.) Warb.; *Knema cinerea* var. *andamanica* (Warb.) J. Sincl.; *Knema glauca* (Blume) Warb. var. *andamanica* Warb.; *Knema glauca* var. *nicobarica* Warb.; *Knema lenta* Pierre ex Warb.; *Myristica angustifolia* Roxb.; *Myristica glauca* Blume)

India, Indonesia.

See *Flora Cochinchinensis* 604. 1790, *Bijdragen tot de flora van Nederlandsch Indië* 11: 576. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 847. 1832, *Monog. Myrist.* 561, 584, 596. 1897 and *Gardens' Bulletin, Straits Settlements* 18: 174, f. 4. 1961, *Flora Reipublicae Popularis Sinicae* 30(2): 187, pl. 85. 1979

(Astringent. *Knema angustifolia* used for dysentery.)

Malay name: kumpang

Knema erratica (J.D. Hooker & Thomson) J. Sinclair (*Knema siamensis* Warburg; *Knema yunnanensis* Hu; *Myristica erratica* J.D. Hooker & Thomson; *Myristica longifolia* Wallich ex Blume var. *erratica* (J.D. Hooker & Thomson) J.D. Hooker & Thomson)

India.

See *Fl. Ind.* 1: 156. 1855 and *Gard. Bull. Singapore* 18: 205. 1961

(For mouth sores.)

in China: jia guang zi

Knema furfuracea (J.D. Hooker & Thomson) Warburg (*Knema pierreii* Warburg; *Myristica furfuracea* J.D. Hooker & Thomson; *Myristica furfuracea* var. *major* King)

China. Trees, inner bark red with watery red sap, hairy twigs, glabrous leaves with cordate base

See *Fl. Ind.* 1: 159. 1855, *Monogr. Myristic.* 581. 1897

(For dysentery.)

in English: furfuraceous knema, scurfy nutmeg

in China: hong guang shu

Knema glauca (Blume) Warb.

SE Asia.

See *Flora Cochinchinensis* 604. 1790

(Astringent.)

Knema globularia (Lamarck) Warburg (*Knema corticosa* Loureiro; *Knema corticosa* var. *tonkinensis* Warburg; *Knema missionis* (Wallich ex King) Warburg; *Knema petelotii* Merrill; *Knema sphaerula* (J.D. Hooker) Airy Shaw; *Knema wangii* Hu; *Myristica corticosa* (Loureiro) J.D. Hooker & Thomson; *Myristica glaucescens* J.D. Hooker, p.p.; *Myristica globularia* Lamarck; *Myristica lanceolata* Wallich; *Myristica missionis* Wallich ex King; *Myristica sphaerula* J.D. Hooker)

China. Tree, red-brown bark with red sap when cut

See *Monogr. Myristic.* 601. 1897

(Astringent.)

in China: xiao ye hong guang shu

Knema linifolia (Roxb.) Warb. (*Knema linifolia* var. *clarkeana* (King) Warb.; *Myristica clarkeana* King; *Myristica linifolia* Roxb.; *Myristica longifolia* Wall. ex Blume; *Myristica longifolia* Wall.; *Myristica longifolia* Hook.f. & Thomson)

China, Himalaya, India. Tree, acute leaves, male flowers pink or reddish, brownish fruits

See *Hort. Bengal.* 105. 1814, *Numer. List* [Wallich] n. 6801. 1832, *Flora Indica*; or, descriptions of Indian Plants (Roxburgh) 3: 847–848. 1832, *Fl. Ind.* [Hooker f. & Thomson] i. 156. 1855, *Annals of the Royal Botanic Garden. Calcutta.* 3: 325, pl. 165. 1891, Warburg, Otto (1859–1938), *Monographie der Myristicaceen.* 558, 561, pl. 24(1–3). Halle, 1897 [*Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 558. 1897]

(Leaves extract of *Knema linifolia* with stem juice of *Spatholobus roxburghii* taken for dysentery.)

in China: da ye hong guang shu

in India: balonch

Knightia Sol. ex R. Br. Proteaceae

For the well-known English (born near Ludlow, Herefordshire, 10th of October, 1758, or 12 Aug. 1759?) horticulturist Thomas Andrew Knight, (d. 1838, London), botanist, plant physiologist, friend and *protégé* of Sir Joseph Banks, 1805 Fellow of the Royal Society and in 1807 of the

Linnean Society, 1811–1838 distinguished President of the Horticultural Society of London. See *Characteres Generum Plantarum* 8. 1775, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.* London 1796–1800, R. Brown, *Transactions of the Linnean Society of London.* 10: 193. 1810 and J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens.* Royal Botanic Gardens, Kew, London 1906, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917–1933, James Britten and George E. Simonds Boulger, *A Biographical Index of Deceased British and Irish Botanists.* London 1931, C.A. Shull and J.F. Stanfield, “Thomas Andrew Knight: in Memoriam.” *Plant Physiology.* 14: 1–8. 1939, Warren R. Dawson, *The Banks letters, a Calendar of the Manuscript Correspondence of Sir Joseph Banks.* 496–509. Kniphofia caulescens Baker (*Tritoma caulescens* (Baker) Carrière; *Tritoma caulescens* Carrière)

South Africa.

See *Bot. Mag.* 98: t. 5946. 1872, *Rev. Hort.* 1884: 556. 1884

(Crushed roots used for menstrual disorders, to cure infertility in women.)

in English: red-hot poker

in Lesotho: khaputlane, leleole

Kniphofia ensifolia Baker

South Africa.

See *J. Bot.* 23: 278. 1885

in English: torch lily

(Snake deterrents. Roots for relieving chest complaints. Magic, good luck charm for the children.)

in South Africa: vuurpyl

Kniphofia foliosa Hochst. (*Kniphofia arussii* Rendle; *Kniphofia densiflora* Engl.; *Kniphofia quartiniana* A. Rich.)

Ethiopia.

See *Flora* 27: 31. 1844, *Tent. Fl. Abyss.* 2: 323. 1850, *Abh. Königl. Akad. Wiss. Berlin* 1891: 163. 1892 and *Gard. Chron.*, III, 86: 11. 1929

(Veterinary medicine, anthelmintic, for swellings, diarrhea, dysentery, gall disorders, poisons, toxic, liver diseases.)

in Ethiopia: lela, ragadu

Kniphofia linearifolia Baker (*Kniphofia alooides* var. *maxima* (Baker) Baker; *Kniphofia linearifolia* var. *kuntzei* A. Berger; *Kniphofia linearifolia* var. *montana* A. Berger; *Kniphofia longiflora* Baker; *Kniphofia longistyla* Baker; *Kniphofia rhodesiana* Rendle; *Kniphofia uvaria* var. *maxima* Baker)

Gabon, South Africa.

See *Bot. Mag.* 107: t. 6553. 1881, *Bot. Jahrb. Syst.* 15(35): 5. 1892, *Bull. Misc. Inform. Kew* 1893: 158. 1893, *Fl. Cap.* 6: 283. 1896 and *Bull. Misc. Inform. Kew* 1901: 134. 1901, *Pflanzenr.*, IV, 38: 58. 1908, *J. Linn. Soc., Bot.* 40: 214. 1911

(Fruit used to cure infertility in women, cough and skin diseases.)

Kniphofia parviflora Kunth (*Kniphofia krookii* Zahlbr.; *Kniphofia modesta* Baker)

South Africa.

See *J. Bot.* 27: 43. 1889, *Bot. Mag.* (1893) t. 7293. 1893 and *Ann. K. K. Naturhist. Hofmus.* 15: 14. 1900

(Used as a traditional snake repellent.)

Knoxia L. Rubiaceae

Named for Captain Robert Knox, 1641–1720, Madras 1657, in captivity between March 1660 and October 1679, with the East India Company, author of *An historical relation of the Island Ceylon, in the East-Indies*: together, with an account of the detaining in captivity the author ... and of the author's miraculous escape. London 1681; see D.W. Ferguson, *Captain Robert Knox; the twenty years' captive in Ceylon*. 1896–1897; *Robert Knox's Sinhalese Vocabulary*. Ed. by D.W. Ferguson, Esq. Extracted from *Journal* no. 47, vol. XIV, 1896, of the Royal Asiatic Society, Ceylon Branch. [1897]; *Robert Knox in the Kandyan Kingdom*. Selected and edited by E.F.C. Ludowyk. London 1948; John Harris, *Navigantium atque Itinerantium Bibliotheca*. London 1705. See Carl Linnaeus, *Species Plantarum*. 1: 101, 104. 1753 and *Genera Plantarum*. Ed. 5. 46. 1754, *Civ. Nat. Hist. Jamaica* 140. 1756.

Knoxia hookeriana (R. Bhattacharjee & Deb) Subba Rao & Kumari (*Knoxia mollis* var. *hookeriana* (R. Bhattacharjee & Deb) V.P. Prasad & Lakshmin.; *Knoxia mollis* var. *hookeriana* V.P. Prasad & Lakshmin., nom. inval.; *Knoxia sumatrensis* (Retz.) DC. var. *hookeriana* R. Bhattacharjee & Deb, nom. inval. nom. nud.)

India.

See *Numer. List* [Wallich] no. 820. 1829 and *Journal of Economic and Taxonomic Botany* 6(1): 92–93. 1985, *Fl. Maharashtra State, Dicot.* 2: 142. 2001, *Fl. Visakhapatnam Distr.* 1: 404. 2003

(Whole plant ground and given against flatulence and intestinal disorders.)

in India: samearasi chedy

Knoxia sumatrensis (Retz.) DC. (*Cuncea trifida* Buch.-Ham. ex D. Don; *Dentillaria corymbosa* (Willd.) Kuntze; *Dentillaria heyneana* (DC.) Kuntze; *Dentillaria mollis* (R.Br. ex Wight & Arn.) Kuntze; *Ernodea nepalensis*

Bengal*, Pt. 2, *Nat. Hist.* 73: 56. 1904, *Bulletin of Miscellaneous Information Kew* 1920: 68. 1920, *Biblioth. Bot.* 89: 621. 1929, *Journal of Economic and Taxonomic Botany* 6(1): 92–93. 1985

(Dried leaf powder taken with cold water for any poisonous bite. Leaves paste with salt applied on skin diseases, ring-worm. Root extract given to stop vomiting in food poisoning.)

in India: khudful, mekekreep, vazhukkanangai

Knoxia wightiana Wall. ex G. Don (*Dentillaria wightiana* (Wall. ex G. Don) Kuntze; *Knoxia wightiana* Wall.; *Knoxia wightiana* Wall. ex Wight & Arn.; *Knoxia wightiana* Schltld. ex Hook. f.)

India.

See *Numer. List* [Wallich] n. 6184. 1831–1832, *A General History of the Dichlamydeous Plants* 3: 629. 1834, *Prodr. Fl. Ind. Orient.* (Wight & Arn.) 440. 1834, *The Flora of British India* [J.D. Hooker] 3: 51. 1880, *Revis. Gen. Pl.* 1: 280. 1891

(Plant paste consumed with water for digestive disorders.)

in India: kalthumbai

Koanophyllon Arruda Asteraceae

Possibly from the Greek *choane* ‘funnel’ and *phyllon* ‘leaf’.

Koanophyllon villosum (Sw.) R.M. King & H. Rob. (*Eupatorium villosum* Sw.)

Jamaica, Dominican Republic.

See *Species Plantarum* 2: 836–839. 1753, *Nova Genera et Species Plantarum seu Prodrromus* 111. 1788, *Travels in Brazil* 495–496. 1816 and *Phytologia* 32(3): 265. 1975

(A tea for fever, stomachache, pain, loss of appetite.)

Kochia Roth Chenopodiaceae (Amaranthaceae)

After the German botanist Wilhelm Daniel Joseph Koch, 1771–1849, physician, M.D. Giessen 1794, professor of botany at Erlangen, his writings include *De Salicibus Europaeis commentatio*. Erlangae 1828, *De Plantis Labiatis. Programma*. Erlangae 1833 and *Synopsis Florae Germanicae et Helveticae*. Francofurti ad Moenum 1836–37, with Johann Baptist Ziz (1779–1829) wrote *Catalogus plantarum, quas in ditioe florum palatinatus legerunt. Moguntiae [Mainz] 1814*. See *Mélanges de Philosophie et de Mathématique de la Société Royale de Turin* 3: 177, pl. 4. 1766, [Heinrich Adolph Schrader, editor], *Journal für die Botanik*. 1: 307, t. 2. Göttingen 1801, Johann Jacob Palm, *Johann Jacob Palm's Universitäts-Buchhändlers in Erlangen Verzeichniss seines dermaligen Vorrathes älterer und neuerer Bücher aus allen Wissenschaften*. [Erlangen] 1809, Johann Christoph Röhling (1757–1813), *Deutschlands Flora*. Frankfurt a/M. 1823–1839, Ernst F. Berger (1814–1853), *Catalogus Herbarii*. Würzburg 1841, W.J. Hooker, in *Hooker's Journal of Botany & Kew Garden Miscellany*. 2: 94, 287. London 1850, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 488. Ansbach 1852, August Neilreich (1803–1871), *Diagnosen der in Ungarn und Slavonien bisher beobachteten Gefäßpflanzen, welche in Koch's Synopsis nicht enthalten sind*. Wien 1867 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 194. (Used for cuts, wounds, boils. Ceremonial, medicine, stimulant.)

in English: crested hair grass, June grass, mountain June grass, prairie June grass, prairie Junegrass, prairie koeler's grass

Koenigia L. Polygonaceae

After the Latvian physician Johann Gerhard (Joannes Gerhardus) König (Koenig), 1728–1785 (d. India), pharmacist, traveller, arrived in Tranquebar in 1768 (he joined the Tranquebar Mission as a surgeon and naturalist), plant collector in India and Ceylon, 1778 Madras, his works include “*Journal of a voyage from India to Siam and Malacca in 1779.*” *Jour. Straits Branch Roy. Asiatic Soc.* 26: 58–201, 27: 57: 133. [Trans. from his msc. in British Museum, see the *Autograph Journal of Koenig's Voyages*, with lists and descriptions of East Indian (including Siam and Malacca) plants, animals and a few minerals. 21 vols. 1769–1785.] 1894, pupil of Linnaeus. See *Mantissa Plantarum* 1: 3, 35. 1767, *Syst. Nat.* ed. 12, 2: 71, 104. 1767, Anders Jahan Retzius (1742–1821), *Observationes botanicae ... Quibus accedunt Joannis Gerardi Koenig ... Koenigia delicatula (Meisn.) H. Hara (*Polygonum delicatulum* Meisn.)

Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 14(1): 127. 1857 and *Flora of Eastern Himalaya* 70. 1966

(Tender leaves juice given for dysentery.)

in China: xiao ye liao

in India: shubel

Koenigia nepalensis D. Don (*Koenigia filicaulis* (Wall. ex Meisn.) Hedberg; *Persicaria minuta* (Hayata) Nakai; *Polygonum filicaule* Wall. ex Meisn.; *Polygonum minutum* Hayata; *Polygonum radicans* Hemsl.)

India, Nepal. Often as *Polygonum filicaule*

See *Prodromus Florae Nepalensis* 74. 1825, *Plantae Asiaticae Rariores* 3: 59. 1832, *Journal of the Linnean Society, Botany* 26(176): 347. 1891 and *Journal of the College of Science, Imperial University of Tokyo* 25(19): 185, pl. 30. 1908, *Svensk Botanisk Tidskrift* 40: 391. 1946

(Dried leaves infusion diuretic.)

in China: xi jing liao

in India: bakrolya

Kohautia Cham. & Schldtl. Rubiaceae

After Francis (Franz) Kohaut, born in Prague, d. 1822 in Senegal, 1822 employed by the Bohemian botanist Franz(e) Wilhelm Sieber (1789–1844) to collect plants (together with Andreas Döllinger and J.A. Schmidt). See F.C. Dietrich in *Jahrb. Konigl. Bot. Gart. Mus. Berlin*. 1: 278–306. 1881,

Joseph Vallot, in *Bull. Soc. Bot. de France*. 29: 168–238. Paris 1882 and Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815–1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 275. 1965, F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 46. 1971, *Fl. Trop. E. Africa* 415–747. 1988.

Kohautia amatymbica Eckl. & Zeyh. (*Hedyotis amatymbica* (Eckl. & Zeyh.) Steud.; *Oldenlandia amatymbica* (Eckl. & Zeyh.) Kuntze)

Tropical & S. Africa. Scented, a nocturnal plant, edible roots

See *Species Plantarum* 1: 101–102, 119. 1753, *Linnaea* 4: 156. 1829, *Enum. Pl. Afric. Austral.*: 360. 1837, *Nomencl. Bot.*, ed. 2, 1: 726. 1840, *Revis. Gen. Pl.* 1: 292. 1891 and *Plant Systematics and Evolution* 149: 89–118. 1985

(Emetic, improve appetite of infants, a snake protection. Magic, ritual, protect babies against evil and love charm.)

in English: tremble tops

in Southern Africa: lehlokoana (South Sotho); mangoakoane (Sotho); iKhubalo elimnyama, labaNtwana (Xhosa)

in Swaziland: umfanozacile

Kohautia caespitosa Schnizl. (*Hedyotis caespitosa* (Schnizl.) Walp.; *Oldenlandia caespitosa* (Schnizl.) Cufod., nom. illeg.)

Tropical Africa.

See *Flora* 25(Beibl.): 145. 1842 and *Phyton* (Horn) 1: 133. 1949

(Used for leprosy.)

in Kenya: ekorimwumwe, enomokere

Kohautia caespitosa Schnizl. var. ***hispidula*** Bremek.

Tropical Africa.

See *Flora* 25(Beibl.): 145. 1842 and *Kew Bulletin* 8: 439. 1953

(Used for leprosy.)

in Kenya: ekorimwumwe, enomokere

Kohautia grandiflora DC. (*Hedyotis grandiflora* (DC.) Steud.; *Oldenlandia grandiflora* (DC.) Hiern)

Tropical Africa. Herb, weed, slender, scabrid, scarlet-pink flowers, congested inflorescence, eaten by all stock

See *Prodr.* 4: 430. 1830, *Nomencl. Bot.*, ed. 2, 1: 727. 1840, *Fl. Trop. Afr.* 3: 57. 1877

(For skin diseases, astringent.)

Kohautia tenuis (Bowdich) Mabb. (*Duvaucellia tenuis* Bowdich; *Hedyotis grandiflora* A. Rich.; *Hedyotis senegalensis* (Cham. & Schldtl.) Steud.; *Knoxia senegalensis* (Cham. & Schldtl.) Rchb. ex Oliv.; *Kohautia noctiflora*

Hochst. ex A. Rich.; *Kohautia senegalensis* Cham. & Schltdl.; *Oldenlandia garuensis* K. Krause; *Oldenlandia noctiflora* (Hochst. ex A. Rich.) Hiern; *Oldenlandia senegalensis* (Cham. & Schltdl.) Hiern

Ghana, Capo Verde. Erect, slender, smooth, flowers dark pink or white, smooth globose fruit

See *Excursions in Madeira and Porto Santo* 259. 1825, *Linnaea* 4: 156. 1829, *Nomenclator Botanicus* ed. 2, 1: 728. 1840, *Tent. Fl. Abyss.* 1: 363. 1848, *Flora of Tropical Africa* 3: 56–57. 1877 and *Bot. Jahrb. Syst.* 48: 404. 1912, *Botánica Macaronésica*. 6: 61. 1980 [1978 publ. 1980]

(Tonic, stimulant, vermifuge, plant chewed. Magico-religious beliefs, spiritual, love charm, emotional.)

Kohautia virgata (Willd.) Bremek. (*Hedyotis caffra* (Eckl. & Zeyh.) Steud.; *Hedyotis gerrardii* Sond.; *Hedyotis gerrardii* Harv. ex Sond.; *Hedyotis parviflora* Walp.; *Hedyotis parviflora* (Benth.) Walp.; *Hedyotis setifera* (DC.) Steud.; *Hedyotis virgata* Willd.; *Kohautia parviflora* Benth.; *Kohautia setifera* DC.; *Kohautia thymifolia* C. Presl ex Bremek.; *Kohautia virgata* var. *oblanceolata* Bremek.; *Oldenlandia caffra* Eckl. & Zeyh.; *Oldenlandia moandeensis* De Wild.; *Oldenlandia parviflora* (Benth.) Oliv.; *Oldenlandia setifera* (DC.) K. Schum.; *Oldenlandia virgata* (Willd.) DC.; *Palicourea crocea* (Sw.) Roem. & Schult.)

Tropical Africa. Perennial weedy herb, corolla white or pink outside and red-purple inside

See *Nova Genera et Species Plantarum seu Prodrum* 44. 1788, *Species Plantarum*. Editio quarta 1: 567. 1797, *Systema Vegetabilium* 5: 193–194. 1819, *Prodrum Systematis Naturalis Regni Vegetabilis* 4: 425–426, 430. 1830, *Enum. Pl. Afric. Austral.*: 360. 1837, *Nomencl. Bot.*, ed. 2, 1: 726, 728. 1840, *Niger Flora* 403. 1849, *Flora Capensis* 3: 9. 1865, *Trans. Linn. Soc. London* 29: 84. 1873, *Revis. Gen. Pl.* 1: 299. 1891, *Pflanzenw. Ost-Afrikas*, C: 376. 1895 and *Ann. Mus. Congo Belge, Bot.*, V, 2: 190. 1907 [Études de systematique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo.], *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 77, 80, 121. 1952

(Febrifuge, for venereal diseases.)

Kohleria Regel Gesneriaceae

For the Swiss teacher J. Michael Kohler, presumably the author of *Landwirthschaftliche Ortsbeschreibungen aus dem Kanton Zürich*, etc. Zürich 1853 and *Der Weinstock und der Wein*. Aarau 1869; see *Index Seminum* [Zürich] [4]. 1847, *Flora* 31(5): 250. 1848, *Rev. Hort.* [Paris]. sér. 3, 2: 465. 1848 and *Gentes Herb.* 8: 382. 1954, *Fieldiana, Bot.* 24(10/3): 240–313. 1974, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 121. 1989, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 320. Basel 1996, *Smithsonian Contr. Bot.* 79: 1–83. 1992 [Lars Peter Kvist and Laurence E. Skog,

Revision of *Kohleria* (Gesneriaceae)], *Selbyana* 25(2): 225–238. 2005.

Colombia. Herbaceous, unbranched, hirsute, flowers axillary, floral leaves usually not reduced, calyx tube hirsute, corolla scarlet

See *Icones et Descriptiones Plantarum*, quae aut sponte ... 6: 61, t. 584. 1801, *Linnaea* 34(4): 442. 1865 and *Annals of the Missouri Botanical Garden* 68: 222–223. 1981

(Used in cases of dysentery, as a decoction.)

Kolobopetalum Engl. Menispermaceae

From the Greek *kolobos* 'stunted, mutilated' and *petalon* 'petal', see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 410. 1899.

Kolobopetalum auriculatum Engl. (*Kolobopetalum exauriculatum* H. Winkler; *Kolobopetalum veitchianum* Diels)

Tropical Africa. Small climber, slender liana, dioecious, aerial roots, inflorescence an axillary panicle, female inflorescence raceme-like, ellipsoid drupes, hard and brittle stone

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26(3–4): 410. 1899 and *Bot. Jahrb. Syst.* xli. 277. 1908, *Das Pflanzenreich* (Engler) Menispermac. IV 94(Heft 46): 164. 1910, *Phytochemistry* 19(7): 1564–1565. 1980, *Journal of Ethnopharmacology* 9: 1–83. 1983

(Stem bark and roots analgesic, antiparasitic, antispasmodic. Leaves and seeds infusion taken against insomnia; leaves and twigs anti-infection, an infusion as a mouthwash against mouth infections.)

Kolobopetalum chevalieri (Hutch. & Dalz.) Troupin (*Rhigiocarya chevalieri* Hutch. & Dalziel)

Ivory Coast. Liane, herbaceous or subherbaceous, many-branched, very flexible, flowers greenish-yellow, fruits red when ripe, in primary rainforest

See *Annals and Magazine of Natural History* ser. 3. 14: 101. 1864, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 410. 1899 and *Flora of West Tropical Africa* ed. 1 1: 70. 1927, *Bulletin du Jardin Botanique de l'État* 19: 423–424. 1949

(Leaf infusion drunk to treat psychosis, hysteria. For eye diseases, conjunctivitis and intercostal pain. Magic, ritual, sap applied to a dying patient. Alkaloids. Veterinary medicine, leaf sap as eye drops to treat eye infections in small animals.)

in Congo: bokaso, bongolo, engwogwo, isinghia, lilulaluta, limpata, musima-nkul

Koompassia Maingay Fabaceae (Caesalpiaceae, Cassiaceae)

Kempas is a Malay name, see *Hooker's Icones Plantarum* 12: t. 1164. 1873.

Koompassia excelsa (Becc.) Taub. (*Koompassia excelsa* Taub.)

Borneo.

See *Naturl. Pflanzenfam.* 3(3): 155. 1891, *Ber. Deutsch. Bot. Ges.* 10: 641. 1892

(Roots boiled together with the roots of *Agelaea macrophylla* and *Eusideroxylon zwageri* and the solution drunk to treat weakness in infants.)

in Sarawak: tapang

Koompassia malaccensis Benth. (*Koompassia beccariana* Taub.; *Koompassia borneensis* Merr.; *Koompassia malaccensis* Maingay; *Koompassia malaccensis* Maingay ex Benth.)

Malay Peninsula and Indonesia. Perennial non-climbing canopy tree, straight boles, heartwood pinkish red, sapwood white or pale yellow, twigs with short spike-like axillary buds, small regular bisexual 5-parted spreading flowers borne in terminal panicles, flat oblong pods with papery wing all around

See *Hooker's Icones Plantarum* 12: t. 1164. 1873, *Berichte der Deutschen Botanischen Gesellschaft* 10: 641. 1892 and *Phytochemistry* 69(5): 1173–1178. 2008

(Febrifuge, boil the bark with the bark of *Pometia pinnata* and *Ochanostachys amentacea*, and bathe the infusion.

Stilbenoids might be explored for their therapeutic potential as hypoglycemic agents.)

Malayan names: impas, kempas, kumpas, mengris, sialang, tapang, tualang

Kopsia Blume Apocynaceae

Named after the Dutch botanist Jan Kops, 1765–1849, agronomist, professor of botany, author of *Index plantarum*, quae in horto rheno-trajectino coluntur. Anno 1822. [Utrecht] 1823 and *Oratio de emolumento quod ex Batavorum et Belgarum conjunctione in unum regnum, agriculturae per totam patriam accesserit*, etc. [in *Academia Rheno-Trajectina. Annales*, etc. 1828–1829.] Utrecht 1817, editor of vols. 1–10 of *Flora batava*. Amsterdam 1800–1849; see Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J. Baert, *Kops, pionier van Hollands landbouw*. 's Gravenhage 1943, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 313. 1965, *J. Ethno-Pharmacol.* 41: 149, 154. 1994.

Kopsia arborea Blume (*Kopsia jasminiflora* Pit.; *Kopsia lancibracteolata* Merrill; *Kopsia laxinervia* Merr.; *Kopsia longiflora* Merr.; *Kopsia officinalis* Tsiang & P.T. Li; *Kopsia pitardii* Merr.; *Kopsia pruniformis* Rchb.f. & Zoll. ex Bakh.f.; *Kopsia scortechinii* King & Gamble)

China, Malesia, N. Queensland. Small tree, leathery leaves, white fragrant flowers, cymes corymbose, corolla white, small ellipsoid black drupes

See *Publ. Bur. Sci. Gov. Lab.* 29: 47. 1905, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 74(2): 431. 1908, *Philipp. J. Sci., C* 13: 55. 1918, *Philippine Journal of Science* 23(3): 262–263. 1923, *Fl. Indo-Chine* 3: 1136. 1933, *Contr. Arnold Arbor.* 8: 141. 1934, *Blumea* 6: 391. 1950, *Acta Phytotaxonomica Sinica* 11(4): 356–358, pl. 40. 1973, *Genetica* 68: 3–35. 1985, *Tetrahedron Letters* 48(7): 1143–1145. 2007, *J. Nat. Prod.* 70(8): 1302–1307. 2007

(Alkaloids. A decoction of bark is used as an enema. The leaves and fruits are used to treat sore throat and tonsillitis.)

in English: medicinal kopsia

in China: rui mu

in Malaya: Penang sloe

Kopsia fruticosa (Roxb.) A. DC. (*Calpicarpum roxburghii* G. Don, nom. superfl.; *Cerbera fruticosa* Ker Gawler; *Cerbera fruticosa* Roxb.; *Kopsia fruticosa* (Ker Gawler) A. DC.; *Kopsia roxburghii* (G. Don) Pharm. ex Wehmer, nom. superfl.; *Kopsia vinciflora* Blume; *Tabernaemontana longiflora* Rusby; *Tabernaemontana rosea* Ten.)

S. Myanmar. Shrub, simple leaves, corolla pink, inflorescences few flowered puberulent, pubescent drupe ellipsoid usually solitary

See *Species Plantarum* 1: 208. 1753, *Botanical Register*; consisting of coloured ... 5: pl. 391. 1819, *Catalogus* ... 12. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 16: 1030. 1826, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 352. 1844, *Cat. Orto Bot. Napoli* 97. 1845 and *Genetica* 68: 3–35. 1985, *Acta Crystallographica Section C* vol. 49, part 1, 171–173. 1993, *Harv. Pap. Bot.* 9(1): 107. 2004, *Phytochemistry* 65(14): 2119–2122. 2004, *Helv. Chim. Acta* 85: 991. 2004, *Nat. Prod. Rep.* 22: 761–793. 2005, Robert P. Glover et al. “NMR spectral assignments of three aspidofractinine alkaloids, kopsine, fruticosine and fruticosamine, isolated from *Kopsia fruticosa*.” *Magnetic Resonance in Chemistry* 43: 483–486. 2005

(Alkaloids.)

in English: pink gardenia, pink kopsia, shrub vinca

in China: hong hua rui mu

in India: dakur

in Myanmar: kopsia merah

Kopsia larutensis King & Gamble

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 74(2): 432. 1908

(For syphilis, pound the root and poultice.)

Malay name: chabai hutan, ubat karang

Kotschy Endlicher Fabaceae (Aeschynomeneae, Leguminosae)

For the Austrian botanist Carl (Karl) Georg Theodor Kotschy, 1813–1866, plant collector, traveller, 1835 to 1843 botanical explorer of the Orient. See Eduard Fenzl (1808–1879), *Abbildungen und Beschreibungen neuer und selthener Thiere und Pflanzen in Syrien und im westlichen Taurus gesammelt von T. Kotschy*. Stuttgart 1843, Joseph Vallot, “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 182–183. Paris 1882 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 195. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 315. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 218. 1972.

Kotschy africana Endl. (*Damapana africana* (Endl.) Kuntze; *Smithia bequaertii* De Wild.; *Smithia chamaecrista* Benth.; *Smithia chamaecrista* Benth. var. *genuina* R. Vig.; *Smithia chamaecrista* Benth. var. *stipulata* R. Vig.; *Smithia kotschyi* Benth.)

Tanzania. Perennial non-climbing shrub, erect, multi-branched, glandular, flowers yellow, standard orange-yellow, calyx pubescent and bristly-hairy, in savanna woodland

See *Hortus Kewensis* 3: 496. 1789, *An Introduction to the Natural System of Botany* 148. 1836, *Novarum Stirpium Decades* 4, 6. 1839, *Plantae Junghuhnianae* 2: 211. 1852, *Revisio Generum Plantarum* 1: 179. 1891, *Die Pflanzenwelt Ost-Afrikas* C 215. 1895 and *Notulae Systematicae*. *Herbier du Museum de Paris* 14(3): 169. 1951

(Young twigs are boiled with twigs of *Crotalaria microcarpa*, *Dissotis debilis*, *Syzygium cordatum* and *Anthospermum herbaceum*, the decoction is drunk to prevent malaria. Twigs decoction drunk to cure headache and stomachache. Roots for skin diseases; leaves for constipation. Veterinary medicine.)

in Congo: iwazi

in Madagascar: hivaniva, nivaniva, ramangorona, soarin-drana, sorindrana

in Tanzania: kyangwe, mtoo, serkyangu

Kotschy africana Endl. var. ***bequaertii*** (De Wild.) Verdc. (*Aeschynomene schimperi* Hochst. ex A. Rich.; *Smithia bequaertii* De Wild.; *Smithia chamaecrista* Benth.; *Smithia riparia* R.E. Fr.)

Madagascar. Perennial non-climbing shrub, sticky, stems and calyx with yellow glandular hairs, flowers yellow, petals reddish outside yellow inside, good food for feeding goats, in swamp, along stream bed

See *Species Plantarum* 2: 713–714. 1753, *Hortus Kewensis* 3: 496. 1789, *Tentamen Florae Abyssinicae* ... 1: 202. 1847, *Plantae Junghuhnianae* 2: 211. 1852 and *Revue de zoologie et de botanique africaines* 13: Suppl. Bot. 23. 1925, *Kew Bulletin* 24(1): 22. 1970, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983

(Leaves febrifuge, for sexual asthenia, piles, lumbago. Veterinary medicine.)

in Burundi: umushiha, umushisha

in Madagascar: hivaniva, nivaniva, ramangorona, soarin-drana, sorindrana

in Tanzania: lwelechi, lweretsi, mtengatenga, muhahi

Kotschy strigosa (Benth.) Dewit & P.A. Duvign. (*Damapana strigosa* (Benth.) Kuntze; *Sarcobotrya strigosa* (Benth.) R. Vig.; *Smithia strigosa* Benth.)

Tropical Africa. Perennial non-climbing shrub

See *Familles des Plantes* 2: 323. 1763, *Hortus Kewensis* 3: 496. 1789, *Plantae Junghuhnianae* 2: 211. 1852, *Revisio Generum Plantarum* 1: 179. 1891 and *Notulae Systematicae*. *Herbier du Museum de Paris* 14(3): 169. 1951, *Bulletin de la Société Botanique de Belgique* 86(2): 212. 1954

(Roots decoction drunk to remedy gonorrhoea.)

in Madagascar: tombokanjeva, tsiboko, tsibokoboko, tsibokona, tsibokony, tsikobona, voananakova

in Tanzania: ilingula

Krameria Loefl. Krameriaceae (Zygophyllales)

For an Austrian army physician, Johann Georg Heinrich Kramer (Krammer), d. 1742; see *Iter Hispanicum* 176, 195–196, 231. 1758, *Species Plantarum*, Editio Secunda 177. 1762, *Systema Vegetabilium*. Editio decima tertia 138. 1774, *Gen. Pl.* [Jussieu] 201, in obs. 1789, Cothenius, Christian Andreas (1708–1789), *Dispositio Vegetabilium Methodica* a staminum numero desumta. 5. Berolini, 1790, *Analyse des Familles de Plantes* 20, 23. 1829, *Atlantic Journal* 1(4): 144. 1832, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 489. Ansbach 1852 and *Fieldiana, Bot.* 24(4): 488–489. 1946, *Fl. Neotrop.* 49: 1–108. 1989, Helmut Genauert, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 320. Basel 1996, *Fl. Chiapas* 6: 20–23. 2005.

Krameria erecta Willd. ex Schult. (*Krameria glandulosa* Rose & Painter; *Krameria imparata* (J.F. Macbr.) Britton; *Krameria interior* Rose & Painter; *Krameria navae* Rzed.; *Krameria palmeri* Rose; *Krameria parviflora* Benth.; *Krameria parvifolia* Benth.; *Krameria parvifolia* var. *glandulosa* (Rose & Painter) J.F. Macbr.; *Krameria parvifolia* var. *imparata* J.F. Macbr.; *Krameria rosmarinifolia* Chodat; *Krameria rosmarinifolia* Pav. ex Chodat)

Mexico.

See *Iter Hispanicum* 195. 1758, *Mantissa* 3: 303. 1827, *The botany of the voyage of H.M.S. Sulphur* 1: 6, pl. 1. 1844 and Campbell W. Pennington, ed., *The Material Culture. The Pima Bajo of Central Sonora*. 1: 188. University of Utah Press, Salt Lake City 1980, *Fl. Neotrop.* 49: 59. 1989

(Twigs infusion in treating sore eyes.)

in English: Pima rhatany, purple heather, range ratany

in Mexico: cosawi (Pima Bajo)

Krameria grayi Rose & Painter (*Krameria bicolor* S. Watson; *Krameria canescens* A. Gray; *Krameria canescens* Willd. ex Schult.; *Krameria sonora* Britton)

Mexico, California.

See *Mantissa Plantarum* 3: 303. 1827, *Smithsonian Contributions to Knowledge* 3(5): 42–43. 1852 and *Contributions from the United States National Herbarium* 10(3): 108. 1906

(Flowers infusion to cure an upset stomach and diarrhea. Stems dried and ground sprinkled on a skin sore slow in healing.)

in English: white ratany

Krameria ixine Loefl. (*Krameria acuminata* Britton; *Krameria arida* O. Berg; *Krameria cuspidata* C. Presl; *Krameria ishamii* Millsp.; *Krameria ixina* L.; *Krameria ixina* Benth.; *Krameria ixina* Kunth; *Krameria ixina* var. *genuina* Chodat; *Krameria lanceolata* O. Berg; *Krameria linifolia* Willd. ex H. Schult. & Schult. f.)

Venezuela.

See *Iter Hispanicum* 195–196. 1758, *Species Plantarum*, Editio Secunda 177. 1762, *Plantas Hartwegianas imprimis Mexicanas*: 13. 1839 and *Fl. Neotrop.* 49: 81. 1989

(Strong decoction very astringent. Decoction or extract of leaves taken for kidney pain or kidney stone. Women take plant decoction to induce menstruation, very strong and very astringent for abortion. *Tournefortia gnaphalodes* or *Argusia gnaphalodes* leaves decoction taken with *Krameria ixine*, is a strong abortifacient.)

in Spanish: cadia del perro

Krameria lappacea (Dombey) Burdet & B.B. Simpson (*Krameria canescens* Willd. ex Schult.; *Krameria canescens* Willd. ex Schult. & Schult.f.; *Krameria canescens* A. Gray; *Krameria canescens* Willd.; *Krameria illuca* Phil.; *Krameria iluca* F. Phil.; *Krameria linearis* Poir., nom. illeg.; *Krameria pentapetala* Ruiz & Pav.; *Krameria triandra* Ruiz & Pav.; *Krameria triandra* var. *humboldtiana* Chodat; *Landia lappacea* Dombey; *Landia lappacea* Domb. ex Vitman)

Chile, Peru.

See *Florae Peruvianaes, et Chilensis Prodromus* [Ruiz & Pavon] 1: 61, 62. 1798, Ruiz Lopez, Hipolito (1754–1815), *Disertaciones sobre la raiz de la ratánhia, de la calaguala y de la china, y acerca de la yerba llamada canchalagua*. 1796, *Encycl.* (Lamarck) Suppl. 3. 226. 1813, *Mantissa Plantarum* (Schultes & Schultes f.) 3: 303. 1827, *Smithsonian Contr. Knowl.* 3(5): 42. 1852, *Florula Atacamensis seu Enumeratio* ... 9. 1860, *Archives des Sciences Physiques et Naturelles*, sér. 3, 24: 498. 1890 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3/1): 506–507. 1943, *Candollea* 38: 694–696. 1983, *Fl. Neotrop.* 49: 44. 1989

(Roots astringent, styptic. Leaves infusion for kidney diseases.)

in Chile: chaka-chaka

in Peru: antacushma, malapato, mapato, paccha lloce, pumachucú, pumacuchu, pumakachu, ractania, ratanhia, rataña, sanyo

**Krascheninnikovia Gueldenst.
Amaranthaceae (Chenopodiaceae)**

For the Russian botanist Stepan (Stephan) Petrovich Krascheninnikov (Krasheninnikov), 1713–1755 (St. Petersburg, Russia), traveller, naturalist, ethnologist and explorer, 1733–1743 in the second Kamchatka Expedition of the Academy of Sciences, studied under J.G. Gmelin and G.F. Muller, 1745 in the Academy Botanical Garden, professor of natural history and botany, major works of K. are *Description of the Land of Kamchatka*. [= *Opisanie zemli Kamchatki*.] St. Petersburg 1756. According to several sources the genus was named (Anton Johann von Gueldenstaedt died in 1781) for the Russian botanist Ippolit Michajlovich Krascheninnikov (1884–1947). See *Acta Helvetica*,

Physico-Mathematico-Anatomico-Botanico-Medica 2: 59. 1755, *Familles des Plantes* 2: 260. 1763, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 16: 548, 551, 555. 1772, *Genera Plantarum* 633. 1791, *Princ. Somiol.* 30. 1814, *Flora Telluriana*. 1: 86, 92. 1836 [1837] and N.G. Fradkin, S.P. Krasheninnikov. Moscow 1954, *Taxon* 21: 209. 1972, A.S. Fedorov, in *D.S.B. (or Dictionary of Scientific Biography)*. Editor in Chief Charles Coulston Gillispie.) 7: 495. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 737. Stuttgart 1993, *Novon* 5(1): 52. 1995, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 320. Basel 1996.

(For diarrhea, eat the leaves with betel. Poulticing rhizomes for sore legs. Rootstock juice taken for jaundice.)

in India: keyabon

Malay names: katob perenggan, katup perenggan, rumput tuki, sekepet burit

Kyllinga bulbosa P. Beauv. (*Kyllinga bulbosa* J. König ex Vahl, nom. illeg.; *Kyllinga bulbosa* Steud., nom. illeg.)

India. Perennial herb, glabrous, tufted, short creeping rhizome, many small ovoid black tubers with fragrant odor

See *Flore d'Oware* 1: 11, t. 8, f. 1. 1804, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 376. 1805, *Synopsis Plantarum Glumacearum* 2: 62. 1854 and *Taxon* 30: 72–73. 1981

(Used in Ayurveda.)

Kyllinga erecta Schumach. (*Cyperus erectus* (Schumach.) Mattf. & Kuek.; *Kyllinga crassipes* Boeck.)

Trop. & S. Africa, W. Indian Ocean. Herb, sedge, tufted, robust, rhizomatous, rhizome aromatic, a variable species, a weed of cultivation, lawns, on river bank, forming dense mats in wet places in savanna grassland, damp grassland

See *Species Plantarum* 1: 44–47. 1753, *Beskrivelse af Guineiske planter* 42. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 62. 1828, *Flora* 42: 444. 1859 and *Das Pflanzenreich* 4(20): 588. 1936

(Rhizomes insecticide, carminative, for colds. For skin diseases; a tisane is prepared by boiling the plant in palm wine which is taken as a depurative for treating certain prurient skin affections. Bundles of the plant placed beneath skins to make them supple.)

in Gambia: n'chongo mesongo

in Guinea: doron, tonku

in Mali: togon

in Nigeria: angi, àyaà-àyaà, dogbodogbo, geémùn kwaàdoó, turare

in Senegal: todiugolo

in Sierra Leone: an-siri, an-siri-an-rini, an-siri-a-ro-kant, an-soi, ka-soi, njawa, njawa-wa, tigerin-wuri, tigerinyi, tugbele

Kyllinga nemoralis (J.R. Forst. & G. Forst.) Dandy ex Hutch. & Dalziel (*Cyperus kyllingia* Endl.; *Cyperus kyllingia* f. *humilis* (Boeck.) Kük.; *Cyperus kyllingia* f. *subtriceps* (Kunth) Kük.; *Cyperus kyllingia* f. *tenuis* (Boeck.) (Diuretic, digestive, antispasmodic, carminative.)

L

Labisia Lindley Myrsinaceae (Primulaceae)

From the Greek *labis* 'handle, hilt, holder, clasp', referring to the lobes of the corolla, see *Edwards's Bot. Reg.* 31: t. 48. 1845.

Labisia pothoina Lindl. (*Labisia pothoina* Linden; *Labisia pothoina* Hort. Linden)

Malay Peninsula.

See *Edwards's Botanical Register* 31: t. 48. 1845, *The Gardeners' Chronicle & Agricultural Gazette* 2: 328. 1888 and *Beitr. Biol. Pflanzen* 68: 51–71. 1994

(Leaves stomachic. Roots for gonorrhoea.)

Malay names: akar fatimah, kachip patimah, kachit fatimah, mata pelandok rimbah, mian batu, pingan, rumput palis, rumput sitti fatimah, selusoh fatimah, tadah mata hari

Labisia pumila Benth. & Hook.f. (*Ardisia pumila* Blume; *Labisia pothoina* Lindl.; *Labisia pothoina* Hort. Linden; *Labisia pumila* (Blume) Fern.-Vill.; *Labisia pumila* (Blume) Mez)

Malaysia. Herb, spathe-like inflorescence, white flowers, red fruits

See *Cat. Gewass. Buitenzorg* (Blume) 44. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 3: 688. 1826, *Edwards's Botanical Register* 31: t. 48. 1845, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 645. 1876, Blanco, Manuel (1778–1845), *Flora de Filipinas* / por el p. fr. Manuel Blanco ... / adicionada con el manuscrito inedito del p. fr. Ignacio Mercado, las obras del p. fr. Antonio Llanos, y de un apendice con todas las nuevas investigaciones botanicas referentes al Archipiélago filipino. Manila, 1877–1883 [Vols. 3–4 edited by Andrés Naves and C. Fernandez-Villar], *Gard. Chron.* (1888) ii. 328. 1888 and *Das Pflanzenreich* (Engler) Myrsin. IV 236(Heft 9): 171. 1902

(Plant decoction drunk as a postpartum remedy. Leaves decoction for dysentery; crushed leaves rubbed on the abdomen for gas in stomach of babies. Roots decoction of *Labisia pumila* drunk as a postpartum remedy, and also eat the roots along with *Vitis cinnamomea* and *Elephantopus scaber*. Ritual, ceremonial, leaf and rhizome burned during storms as protection from spirits.)

in English: big mountain herb

in Borneo: ubat angin

in Indonesia: udu mudung bio

Malay names: kachip patimah, kachit fatimah, mian batu, rumput palis, rumput sitti fatimah, selusoh fatimah, tadah mata hari

Lablab Adans. Fabaceae (Leguminosae, Phaseoleae)

From the Arabian name for the plant, see *Familles des Plantes* 2: 325. 1763 and *Ann. Missouri Bot. Gard.* 67(3): 523–818. 1980 [1981], *Fl. Lesser Antilles* (Dicotyledoneae–Part 1) 4: 334–538. 1988.

Lablab purpureus (L.) Sweet (*Dolichos albus* Lour.; *Dolichos bengalensis* Jacq.; *Dolichos benghalensis* Jacq.; *Dolichos lablab* L.; *Dolichos lablab* subsp. *bengalensis* (Jacq.) Rivals; *Dolichos lablab* var. *albiflorus* (DC.) Millsp.; *Dolichos purpureus* L.; *Lablab lablab* (L.) Lyons; *Lablab niger* Medik.; *Lablab niger* subsp. *bengalensis* (Jacq.) Cufod.; *Lablab purpurea* (L.) Sweet; *Lablab purpureus* Sweet; *Lablab purpureus* subsp. *bengalensis* (Jacq.) Verdc.; *Lablab vulgaris* (L.) Savi; *Lablab vulgaris* Savi; *Lablab vulgaris* var. *albiflorus* DC.; *Vigna aristata* Piper)

Tropical Africa and Asia. Perennial non-climbing shrub, vine, very variable, climbing, twining, nearly glabrous, leaves alternate, small stipules lanceolate, erect racemes axillary, purple or cream-white flowers, purple fruits long-ellipsoidal slightly curved, seeds white, dry or green beans cooked and eaten, fodder

See *Species Plantarum* 2: 725. 1753, *Familles des Plantes* 2: 325. 1763, *Species Plantarum, Editio Secunda* 2: 1021–1022. 1763, *Hortus Botanicus Vindobonensis* 2: 57, pl. 124. 1772, *Vorlesungen der Churpfälzischen physicalisch-ökonomischen Gesellschaft* 2: 354. 1787, *Flora Cochinchinensis* 2: 439. 1790, *Nuovo Giornale Botanico Italiano*, new series 19. 1821, *Nuovo Giornale dei Letterati* 8: 113. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 401. 1825, *Hortus Britannicus* [Sweet] 481. 1826 and *Plant Names Scientific & Popular* 212. 1900, *Publications of the Field Columbian Museum, Botanical Series* 1: 497. 1902, *Contributions from the United States National Herbarium* 22(9): 665. 1926, *Catálogo ilustrado de las plantas de Cundinamarca* 3: 1–136. 1968, *Kew Bulletin* 24(3): 411. 1970, *Fl. Laburnum Fabr. Fabaceae (Genisteae, Leguminosae)

An ancient Latin name, *laburnum*, mentioned by Plinius for the broad-leaved bean-trefoil, a species of *Cytisus*; Indian laburnum is *Cassia fistula* and Scotch laburnum *Laburnum alpinum*; see *Enumeratio Methodica Plantarum* [Fabr.] 228. 1759.

Laburnum alpinum (Mill.) Bercht. & J. Presl (*Cytisus alpinus* Mill.; *Laburnum alpinum* J. Presl)

Europe. Perennial non-climbing tree, scented yellow flowers pea-flowers in pendulous racemes

See *The Gardeners Dictionary*: ... eighth edition no. 2. 1768 and *Fl. Medit.* 7: 236–240. 1997

(Toxins, all parts of the plant, and especially the seed, are very poisonous. Leaves cholagogue and purgative. Used in certain depressive states.)

in English: alpine laburnum, scotch laburnum

in Italian: maggiociondolo alpino, maggiociondolo di montagna

Laburnum anagyroides Medik. (*Cytisus alschingeri* Vis.; *Cytisus laburnum* L.; *Laburnum anagyroides* var. *alschingeri* (Vis.) C.K. Schneid.; *Laburnum laburnum* Dörf.; *Laburnum laburnum* (L.) Dorfler, nom. illeg., tautonym; *Laburnum laburnum* (L.) Voss; *Laburnum vulgare* J. Presl)

C. and S. Europe. Perennial non-climbing tree, small tree, shrub, scented, yellow pea-flowers in pendulous racemes or in long drooping clusters, fruit a long flattened pod

See *Species Plantarum* 2: 739. 1753, *Enumeratio Methodica Plantarum* 228. 1759, *Vorlesungen der Churpfälzischen physikalisch-ökonomischen Gesellschaft* 2: 363. 1787, *Flora Atlantica* 2: 139. 1798, *Vilm. Blumengärtn.*, ed. 3. 1: 198. 1894, *Herb. Norm.* 3815. 1899

(Highly toxic, may be fatal if eaten. This plant contains cytisine, an alkaloid, which has caused poisoning and death in cattle, dogs, horses, swine, and humans after twigs, fruit pods, and seeds were ingested. All parts of the plant contain the alkaloid cytisine, but the bark and seeds have the highest amount of the chemical. The leaves become less toxic as the fruit pods develop, which become more toxic. Used in the treatment of whooping cough and asthma. Insecticidal.)

in English: common laburnum, golden-chain, golden chain tree, golden rain, laburnum, peatree

in China: du dou

in Italian: avorniello, maggiociondolo

Laccosperma Drude Arecaceae (Palmae)

Greek *lakkos* ‘a hollow, hole pit, tank, a pit’ and *sperma* ‘seed’, the seeds are deeply scalloped, with lateral pit; see *Species Plantarum* 1: 325. 1753, *Transactions of the Linnean Society of London.* 24: 430. 1864, *Botanische Zeitung.* Berlin 35: 632, 635. 1877, *Genera Plantarum* 3: 937. 1883 and Natalie W. Uhl & John Dransfield, *Genera Palmarum.* 237–238. Allen Press, Lawrence, Kansas 1987, Govaerts, R. & Dransfield, J. *World Checklist of Palms.* The Board of Trustees of the Royal Botanic Gardens, Kew. 2005.

Laccosperma secundiflorum (P. Beauv.) Kuntze (*Ancistrophyllum laurentii* De Wild.; *Ancistrophyllum majus* Burret; *Ancistrophyllum secundiflorum* (P. Beauv.) Wendland; *Ancistrophyllum secundiflorum* (P. Beauv.) G. Mann & H. Wendl.; *Calamus secundiflorus* P. Beauv.; *Laccosperma laurentii* (De Wild.) J. Dransf.; *Laccosperma majus* (Burret) J. Dransf.; *Neoancistrophyllum laurentii* (De Wild.) Rauschert; *Neoancistrophyllum majus* (Burret) Rauschert; *Neoancistrophyllum secundiflorum* (P. Beauv.) Rauschert) (*Ancistrophyllum* (G. Mann & H.A. Wendland) H.A. Wendland, from the Greek *ankistron* ‘fish-hook, grapehook’ and *phyllon* ‘leaf’, referring to tall-climbing palms with hooked spines, indicating the hooklike terminal pinnae.)

Tropical Africa. Climbing palm, liana, armed, scrambling over trees, flower creamy yellow, inflorescence terminal, potable sap, red-orange fruits generally dispersed by hornbills and primates, stems soft central parts eaten after properly roasted, in wet forest, primary forest

See *Notizbl. Bot. Gart. Berlin-Dahlem* 15: 747. 1942, *Taxon* 31: 557. 1982, *Kew Bull.* 37: 456. 1982, *Nigerian Journal of Health & Biomedical Sciences* 1(2) 2002: 117–120. 2002, *African Study Monographs* 25(1): 1–27. 2004

(Ethanol extract abortifacient and hypercholesterolemic. Young shoots vermifuge; shoots and sap vermifuge, tonic, astringent, febrifuge, for dysentery, fevers; cabbage for heart diseases; sap, stem and roots for jaundice.)

in English: large Benin rattan, large rattan, rattan palm

in Central African Republic: gao

in Congo: ikau, makau, nkau

in Gabon: lankà, okana

in Guinea: tambem-hadje, tamben-hadje, tambendjom, tambindjom-ô

in Senegal: bukétao, hu ba, ka likut

in Yoruba: epenla, ikaniku

Lachnanthes Elliott Haemodoraceae

From the Greek *lachne* ‘wool, down’ and *anthos* ‘a flower’, the flowers are woolly, see *Flora Caroliniana*, secundum ... [Walter] 37, 196. 1788, *Systema Naturae*, ed. 13 2: 113. 1791,

Transactions of the Horticultural Society of London 1: 327. 1812, *A Sketch of the Botany of South-Carolina and Georgia* [Elliott] 1: 47. 1816, *Analyse des Familles de Plantes* 80. 1829 and *Fl. Mesoamer.* 6: 47–48. 1994.

Lachnanthes caroliniana (Lam.) Dandy (*Anonymos tinctoria* Walter, nom. rej.; *Dilatrix caroliniana* Lam.; *Dilatrix heritiera* Pers., nom. illeg.; *Dilatrix tinctoria* (Walter ex J.F. Gmel.) (Used for muscular strains.)

in English: bloodroot, dye-root, paint-root, red-root

Lacmellea H. Karst. Apocynaceae

See *Linnaea* 28: 449. 1857 [dt. 1856; issued in Jun 1857], *Fl. Bras.* 6(1): 20–21. 1860 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15(4): 618–619. 1941, *Lloydia* 7(4): 275–302. 1945, *Mémoires du Muséum National d'Histoire Naturelle* 24: 136. 1948, *Novon* 8(3): 259–262. 1998, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Revista Brasil. Bot.* 30(2): 205–210. 2007, *Darwiniana* 47(1): 140–184. 2009.

Lacmellea aculeata (Ducke) Monach. (*Lacmellea floribunda* (Poepp.) Benth.; *Zschokkea aculeata* Ducke)

South America, Brazil. Tree, trunk covered with blunt prickles or conical-shaped spines, copious sweet sticky milky latex, leaves coriaceous, flowers greenish white, fruit ovoidal yellow when ripe, edible fruits, in riverine forest, white sand savanna, primary lowland wet forest, disturbed primary forest

See *Nova Genera ac Species Plantarum* 3: 70, t. 279. 1845, *Linnaea* 28: 449. 1857 [dt. 1856; issued in Jun 1857], *Flora Brasiliensis* 6(1): 20. 1860, *Genera Plantarum* 2: 674. 1876 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 240–241. 1922, *Lloydia* 7(4): 292. 1945

(The wood of this tree produces symptoms similar to those produced by *Aspidosperma* species.)

Common name: tucujá

Lacmellea lactescens (Kuhl.) Markgr. (*Lacmellea lactescens* (Kuhl.) Monach.; *Zschokkea lactescens* Kuhl.)

Colombia, Brazil, Peru.

See *Arch. Jard. Bot. Rio de Janeiro* 5: 207–208. 1930, *Notizbl. Bot. Gart. Berlin-Dahlem* 15(4): 621. 1941, *Lloydia* 7(4): 288. 1945

(A substitute for real coca.)

Lacmellea peruviana (Van Heurck & Müll.Arg.) Markgr. (*Lacmellea arborescens* (Müll.Arg.) Markgr. var. *peruviana* (Van Heurck & Müll.Arg.) Monach.; *Zschokkea peruviana* Van Heurck & Müll.Arg.)

Peru.

See *Observationes Botanicae* 2: 148. 1871 and *Notizbl. Bot. Gart. Berlin-Dahlem* 15(4): 627. 1941, *Lloydia* 7(4): 298. 1945

(A substitute for real coca.)

Lactuca L. Asteraceae

Latin *lactuca*, Italian lattuga, from *lacteus*, *a*, *um* (*lac*) ‘milky, full of milk’, referring to the milky juice of the plant; see Carl Linnaeus, *Species Plantarum*. 2: 795–796. 1753, *Genera Plantarum*. Ed. 5. 348. 1754, *Dictionnaire des Sciences Naturelles* [Second edition] 33: 296–300. 1824, P. Fanfani, *Vocabolario dell'uso toscano*. Firenze 1863, *Handbuch der Botanik* 3(2): 369. 1886 and *Bulletin de la Société Botanique de Genève Sér. 2* 2: 113. 1910, *Testi fiorentini del Dugento e dei primi del Trecento*, con introduzione, annotazioni linguistiche e glossario a cura di Alfredo Schiaffini. Firenze 1926, *Kew Bulletin* 18(3): 427–486. 1966, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 840. New York 1967, *Acta Phytotax. Sin.* 26: 390. 1988, *Compositae Newslitt.* 20/21: 12–15. 1992, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 322. Basel 1996, *Grassland of China* [Zhongguo caoyuan] 2000(5): 1–5. 2000.

Lactuca dissecta D. Don (*Lactuca auriculata* DC.)

China, Himalaya, India.

See *Prodromus Florae Nepalensis* 164. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7: 140. 1838

(Leaf juice dropped into eyes to relieve redness, itching and burning.)

Lactuca dolichophylla Kitam. (*Chondrilla longifolia* Wall., nom. nud.; *Lactuca handeliana* S.Y. Hu; *Lactuca longifolia* DC.; *Lactuca longifolia* (Wall.) DC.; *Lactuca longifolia* Michx.; *Lactuca wallichiana* Tuisl; *Mulgedium sagittatum* Royle)

India, Himalaya. Perennial herb, hairless, blue to violet flower heads, cooked as vegetable

See *Fl. Bor.-Amer.* (Michaux) 2: 85. 1803, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 252. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 7(1): 135. 1838 and *Flora of Eastern Himalaya* 341. 1966, *Quarterly Journal of the Taiwan Museum* 20(1–2): 21. 1967, *Annalen des Naturhistorischen Museums in Wien* 72: 608. 1968

(Veterinary medicine, to increase lactation.)

in India: khala

Lactuca inermis Forssk. (*Lactuca abyssinica* Fresen.; *Lactuca capensis* Thunb.; *Lactuca capensis* var. *duruensis* De Wild.; *Lactuca hochstetteri* (A. Rich.) Sch. (Leaves used for stomach treatments. Root powder or poultice applied to heal wounds, ulcers, leprosy, scabies.)

in Nigeria: bafilatana

in Tanzania: mchungu

Lactuca orientalis Boiss. (*Lactuca orientalis* (Boiss.) Boiss.)

India, Himalaya.

See *Fl. Orient.* [Boissier] 3: 819. 1875

(Paste of flower heads applied on the forehead for headache.)

in India: aechkma

Lactuca sativa L. (*Lactuca scariola* L. var. *sativa* Moris)

Cosmopolitan. Herb, erect, glabrous, annual, vegetables

See *Species Plantarum* 2: 795. 1753, *Species Plantarum*, Editio Secunda 2: 1119. 1763, *Flora Sardoia* 2: 531. 1840–1843 and *Fl. Libya* 107: 403. 1983, *Cytologia* 50: 725–738. 1985, *Cytologia* 51: 341–348. 1986, *Journal of Cytology and Genetics* 24: 96–105. 1989, *Plant Systematics and Evolution* 185: 249–257. 1993, *Acta Botanica Neerlandica* 45(2): 211–222. 1996

(Used in Unni and Sidha. Milky latex hypnotic, sedative, in bronchitis, asthma. Stem and root poultice given in burns and painful ulcers. Leaves for headache, scabies, liver complaints; poultice applied to burns and to painful and irritable ulcers.)

in English: common lettuce, garden lettuce, lettuce

in French: laitue

in Arabic: khass, harouka

in China: chien chin tsai (= thousand ounces of gold vegetable), wo chu, wo ju, wo tsai

in India: ab kahu sabz, callattu-k-kirai, kaccu, kattuccallattu, lettucu, shallattu virai, tukhm-i-kahu, tukhm kahu, tukhm kahu muqqashar

in Japan: chisa, chisha

in Philippines: letsugas, litsugas

in Mexico: laa castilla, laa xtila

Lactuca serriola L. (*Lactuca scariola* L., nom. illegit.; *Lactuca virosa* auct., non L. Andrews, non L., concept invalid) (Latin *escariolam*, from *escarius* 'pertaining to food, eating', *escaria*, *escariorum* 'fit for eating', *esca* 'food'; see H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 565. 1996; M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 5: 1145. 1988; Salvatore Battaglia, *Grande dizionario della lingua italiana*. XVII: 863. 1995.)

Cosmopolitan.

See *Species Plantarum* 2: 795–796. 1753, *Centuria II. Plantarum ...* 29. 1756, *Species Plantarum*, Editio Secunda 2: 1119. 1763 and Beath, O.A. et al. (Used in Ayurveda and Unani. Latex sedative, hypnotic, used for dropsy, cough and asthma. Cattle developed pulmonary emphysema after ingesting the plant. Symptoms include pulmonary emphysema, characterized by weakness and difficult breathing. Mature plants and dried plant material are reported to be harmless.)

in English: compass plant, horse thistle, milk thistle, oil lettuce, prickly lettuce, wild lettuce, wild opium

in India: bnakahoo, kaahu, kakubha, kavu, mullu lettuse, mullu salaasi, saaleet, tukhm-i-kahu, tukhm kahu, tukhm kehu

in Arabic: khas el-baqar, khass ez-zeit, mesalem

in South Africa: melkdissel, wild lettuce, wildeslaai

Lacunaria Ducke Quiinaceae (Ochnaceae)

From the Latin *lacuna*, *ae* ‘pit, depression, hole’, possibly referring to the pollen sacs, see *Histoire des plantes de la Guiane Française* 1: 492, t. 194. 1775, *Histoire des plantes de la Guiane Française* 2(Suppl.): 19, t. 379. 1775 and *Arch. Jard. Bot. Rio de Janeiro* 4: 139, t. 12. 1925, *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 717–726. 1956, *Ann. Missouri Bot. Gard.* 67(4): 965–968. 1981, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(3): 2187–2188. 2001, *Acta Amazon.* 34(3): 425–433. 2004.

Lacunaria jenmanii (Oliv.) Ducke (*Lacunaria grandiflora* Ducke; *Lacunaria silvatica* (Pulle) A.C. Sm.; *Quiina silvatica* Pulle; *Touroulia jenmanii* Oliv.)

South America. Small tree, edible fruit

See *Hooker's Icones Plantarum* 20 (ser. 3, 10): 1998. 1891 and *Recueil des Travaux Botaniques Néerlandais* 6: 277. 1909, *Archivos do Jardim Botânico do Rio de Janeiro* 4: 140, t. 12. 1925, *Archivos do Jardim Botânico do Rio de Janeiro* 5: 171. 1930, *Tropical Woods* 58: 31. 1939

(Fruit infusion drunk for liver pains.)

in English: head of the fruit

Laennecia Cass. Asteraceae

For the French physician Théophile-René-Hyacinthe Laënnec, 1781–1826 (Brittany, France), professor of clinical medicine, inventor of auscultation; see R. Kervran, *Laënnec: His Life and Times*. New York, Oxford 1960, Frederick Heaf, in *D.S.B.* 7: 556–557. 1981, Richard Eimas, comp. and ed., *Heirs of Hippocrates*. 1256. Iowa City 1990.

Laennecia coulteri (A. Gray) G.L. Nesom (*Conyza coulteri* A. Gray; *Conyzella coulteri* (A. Gray) Greene; *Eschenbachia coulteri* (A. Gray) Rydb.)

North America.

See *Enumeratio Methodica Plantarum* 86. 1759, *Methodus Plantas Horti Botanici ...* 573. 1794, *Dictionnaire des Sciences Naturelles* [Second edition] 25: 91–92. 1822, *Synopsis Generum Compositarum ...* 203–204. 1832, *Proceedings of the American Academy of Arts and Sciences* 7(2): 355. 1868, *Flora Franciscana* 4: 386. 1897 and *Bulletin of the Torrey Botanical Club* 33(3): 154. 1906, *Phytologia* 9: 1. 1963, *Webbia* 24: 206. 1969, *American Journal of Botany* 64: 791–798. 1977, *Taxon* 28: 271–273. 1979, *Phytologia* 68(3): 205–228. 1990

(This species is toxic to livestock.)

Lagenandra Dalzell Araceae

From the Greek *lagenos* ‘a flask, bottle, flagon’ and *aner*, *andros* ‘male, man, male organ’, referring to the anthers, see *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 289. 1852.

Lagenandra ovata (L.) Thwaites (*Arisarum ovatum* (L.) Raf.; *Arum ovatum* L.; *Caladium ovatum* (L.) Vent.; *Cryptocoryne ovata* (L.) Schott; *Lagenandra insignis* Trimen)

India, Sri Lanka. Marsh herbs, creeping rootstock, long petioled leaves, in shallow waters

See *Species Plantarum* 2: 967. 1753, *Magasin Encyclopédique* 4(16): 471. 1801, *Meletemata Botanica* 16. 1832, *Flora Telluriana* 3: 63. 1837, *Enum. Pl. Zeyl.*: 334. 1864, *J. Bot.* 23: 269. 1885 and *Proc. Indian Sci. Congr. Assoc.* 62: 129. 1975, *Cytologia* 43: 289–303. 1978

(Corms insecticide, used also in renal troubles, kidney disorders, cardiac ailments and swellings; acrid juice, used as ointment for skin problems.)

in India: andavazha

Lagenandra toxicaria Dalzell

India.

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 289. 1852

(Insecticide, especially against lice.)

Lagenaria Ser. Cucurbitaceae

Greek *lagenos* 'flask, bottle', an allusion to the shape of the fruits; Latin *lagena*, *ae* (also *lagaena*, *lagoena*, *lagona*) 'a flask'; see Nicolas Charles Seringe (1776–1858), in *Mém. Soc. Phys. Hist. nat. Genève*. 3(1): 16, 25, t. 2. 1825, *Genera Plantarum* 1: 824. 1867 and *Lexikon Generum Phanerogamarum* 528. 1903, *Fieldiana, Bot.* 24(11/4): 306–395. 1976, William W. Megenney, *A Bahian Heritage*. University of North Carolina at Chapel Hill 1978, *Ann. Missouri Bot. Gard.* 65(1): 285–366. 1978, Maria Helena Farelli, *Plantas que curam e cortam feitiços*. Lagenaria sphaerica (Sond.) Naudin (*Lagenaria mascarena* Naudin; *Lagenaria sphaerocarpa* E. Mey. ex Arn., nom. nud.; *Luffa sphaerica* Sond.; *Sphaerosicyos meyeri* Hook.f., nom. illeg. superfl.; *Sphaerosicyos sphaericus* (Sond.) Hook.f.; *Sphaerosicyos sphaericus* (Sond.) Cogn.)

South and East Africa. Herbaceous climber, vine, runner, scandent, climbing, greenish, petals white with green stripes, anthers yellow, fruits dark green streaked with pale green, in swamp, in grassland, on riverside, bushland

See *The Gardeners Dictionary ... Abridged ... fourth edition* no. 1. 1754, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 3(1): 25. 1825, *Journal of Botany, being a second series of the Botanical Miscellany* 3: 277. 1841, *Flora Capensis* 2: 490. 1862, *Annales des Sciences Naturelles; Botanique*, série 4 18: 187. 1862, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 9. 1866, *Genera Plantarum* 1: 824. 1867, *Flora of Tropical Africa* 2: 532. 1871, *Monographiae Phanerogamarum* 3: 466. 1881 and *Flore de Madagascar et des Comores* 185: 1–165. 1966, *Flore des Mascareignes: la Réunion, Maurice, Rodrigues* 101: 1–21. 1990

(Leaves or roots for stomach complaints.)

in South Africa: uSelwa (Zulu)

in Tanzania: sogambwa

Lagerstroemia L. Lythraceae

For the Swedish merchant Magnus von Lagerström, 1691/1696–1759, plant collector, friend of Linnaeus, patron of science, Director of the Swedish East India Company at Göteborg, benefactor of Uppsala University, obtained specimens of plants from India and China. See C. Linnaeus,

Systema Naturae. Ed. 10. 2: 1068, 1076, 1372. 1759, Johan Frederik Kryger, *Åminnelse-tal, öfver ... M. Lagerström*, etc. Stockholm 1760, *Mem. Sec. Helv.* 3(2): 2. 1826, *Bulletin de la Société Impériale des Naturalistes de Moscou* 19(3): 508. 1846, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 495. Ansbach 1852, *Theoria Systematis Plantarum* 338. 1858 and *The Gardens' Bulletin Singapore* 24: 200. 1969.

Lagerstroemia floribunda Jack (*Lagerstroemia floribunda* Wall.)

Malaysia.

See *Malay. Misc.* i. (1820) v. 38. 1820, *Numer. List* [Wallich] n. 2115 A. 1829, Griffith, William (1810–1845), *Posthumous papers* bequeathed to the Honorable the East India Company ... arranged by John M'Clelland. Calcutta, 1848

(Febrifuge, pound the leaves and poultice the body.)

Malay name: bungor

Lagerstroemia hirsuta Willd. (*Lagerstroemia hirsuta* Rottl. ex C.B. Clarke)

India. Small trees, mauve to pink flowers in axillary racemes, globose 4- to 6-valved capsules

See *Sp. Pl.*, ed. 4 [Willdenow] 2(2): 1178. 1799, *The Flora of British India* [J.D. Hooker] 2(6): 576. 1879

(Bark of the plant along with the bark of *Terminalia crenulata* and *Curcuma longa* boiled in water and used to take bath against cold and fever.)

in India: cadali poea, katou-adamboe, manimaruthu

Lagerstroemia indica L. (*Lagerstroemia chinensis* Lam.; *Lagerstroemia indica* var. *alba* Ram. Goyena; *Murtughas indica* (L.) Kuntze)

Asia, China. Large shrub or small tree, deciduous, stiff erect branches, showy flowers in terminal panicles, calyx campanulate to globose

See *Species Plantarum* 1: 425–427. 1753, *Systema Naturae*, Editio Decima 2: 1068, 1076, 1372. 1759, *Genera Plantarum* 252. 1789, *Revisio Generum Plantarum* 1: 249. 1891 and *Flora Nicaragiense* 410. 1909, *Interpr. Herb. Amboin.* 381. 1917

(Used in Ayurveda and Sidha. Leaves diuretic, the bark used to bathe wounds and infections.)

in English: common crepe myrtle, crape myrtle, crepe flower, crepe myrtle, pride of India

in China: zi wei hua

in India: chinaagoranta, chinagoranta, chinnagoranta, china, cinaccamanti, cinagoranta, cinappu, dhatyi, har singar, jarol, joje-mart, katali, pavala-k-kurinci, pavalakkurincina, pavalakkurincaceti, pavalakkurinci, pavalakkurinjji, pharash, phurush, saoni, siddhesvara, sinappu, telingachina, tindiyam, tintiyam, vilayatimendi

in Japan: saru-suberi

in Colombia: júpiter

in Mexico: crespon

Lagerstroemia lanceolata Wall. (*Lagerstroemia lanceolata* Wall. ex Wight & Arn., nom. inval.; *Lagerstroemia lanceolata* Wall. ex C.B. Clarke, nom. illeg.)

India.

See *Numer. List* [Wallich] no. 2120. 1829, *Prodr. Fl. Ind. Orient.* 1: 309. 1834, *Icon. Pl. Ind. Orient.* [Wight] 1(4–5): no. IV. 1838, *J. Bot.* 16: 107. 1878, *Fl. Brit. India* [J.D. Hooker] 2(6): 576. 1879

(Used in Sidha.)

in India: arale, aunname, bandaraha, belaanname, belimathi, bellaunutte, bellaymutty, belmatti, bendeka, bendeku, bentek, benteku, bilandri, bilinandi, bilindu, billi-nandi, bilinandi, bolandur, kava, kule, nandi, nuncey, nunchy, nundi, tarmoti, tavaunname, ulthi, ventaku, ventekku, venteku, venthekku, vivella

Lagerstroemia microcarpa Wight (*Lagerstroemia lanceolata* Wall. ex C.B. Clarke, nom. illeg.; *Lagerstroemia microcarpa* Hance)

India.

See *Icon. Pl. Ind. Orient.* [Wight] 1(4–5): no. IV. 1838, *J. Bot.* 16: 107. 1878, *Fl. Brit. India* [J.D. Hooker] 2(6): 576. 1879

(Leaves fumes for maggots.)

in India: arale, aunname, bandaraha, belaanname, belimathi, bellaunutte, bellaymutty, belmatthi, belmatti, bendeka, bendeku, bentek, benteku, bilandri, bilinandi, bilinandi mara, bilindu, billi-nandi, billinandi, bolandur, chennangi, kava, kule, naanaa, nandi, nandi mara, nuncey, nunchy, nundi, tarmoti, tavaunname, ulthi, ventaku, ventekku, venteku, venthekku, vivella

Lagerstroemia parviflora Roxb.

India, South America. Tree or shrub, grey bark, white flowers in axillary and terminal panicles, seeds winged, in deciduous forests

See *Ceiba* 19(1): 1–118. 1975

(Bark for bronchitis, diabetes, syphilis, pounded bark in water given in snakebite; stem bark paste massaged in rheumatism, rheumatoid arthritis. Young leaves paste with boiled rice given for dysentery; leaves places on eyelids to cure redness of eyes; leaves of *Lagerstroemia parviflora* are mixed with sliced tubers and cooked as vegetable to avoid irritation caused by consumption of *Dioscorea bulbifera*. Veterinary medicine, flowers and leaves paste given to goat for indigestion; stem bark paste mixed with the latex of *Pergularia daemia* and applied in boils, blisters, ulcers and wounds.)

in India: bolnandi, bondaara, bondar, bondara, bondga, bordhiera, bura-dhamro, burra, cannangi, cennangi, channangana

marā, channangi, channangi mara, cheemange, cheemangi, chenengi, cheninge, chennangi, chennagimara, chennangi, chennangi mara, cimangi, dhaathakikusumamu, dieng lang sing, kaccaikkattai, kakadiyo, kakarwa, kakon, kalihara, lendia, nandi, peyakkatukkay, pidindel, senha, sida, sidha, solokha, ventekku, venteku, verrikkatukkay

Lagerstroemia speciosa (L.) Pers. (*Lagerstroemia flos-reginae* Retz.; *Lagerstroemia regina* Roxb.; *Lagerstroemia speciosa* Pers.; *Munchausia speciosa* Linn.; *Munchausia speciosa* Münchhausen)

India, Malaysia.

See *Mant. Pl. Altera* 153. 1771, *Der Hausvater* 5(1): 356–357, pl. 2. 1770, *Observationes Botanicae* (Retzius) 5: 25. 1789, *Synopsis Plantarum* (Persoon) 2: 72. 1806 and *Fl. W. Pakistan* 78: 3. 1975, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Ceiba* 44(2): 105–268. 2003 [2005], *Fl. Mesoamer.* 4(1): 1. 2009

(Used in Ayurveda and Sidha. Leaves purgative, diuretic, deobstruent; decoction of dried fruits and leaves antiseptic, wound dressing, used in diabetes. Seeds believed to have narcotic properties. Malaria, pound the leaves and poultice. Bark decoction for abdominal pains, stomachic and dysentery; bark infusion taken for diarrhea and dysentery. Root decoction taken for jaundice.)

in English: crepe flower, pride of India, queen crape myrtle, queen's crepe myrtle, queen flower, rose of India

in India: ajakari, ajar, ajhar, arjuna, bondara, challa, chawnpui, chella, chella holedaasala, chella maruvaachala, chemmaruta, chennangi, dara, hole daasavaala, hole daasavaala, holeda challa, holedasal, holematthi, jarol, jarul, jarula, jerul, kadali, kadalimugai, kadalippuva, karaca, karacam, kodali, kramuka, mancarokani, maruvaachalla, maruva, mota-bandara, motabon, mota-bondara, motabondara, muruta gass, murute, nandi, neernbendaka, pantuvisakkari, pittacamani, poo-maruthu, punkanai, pyinma, sotulari, taman, tamana, thaman, thamana, thla-do, thlado, vaaragogu, varagogu, waragogu

Malayan names: berangan asu, bongor, bongor raya, bungor, bungor melukut, bungor raya, sebugor

in the Philippines: agaro, banaba, bugarom, duguam, kaulan, makablas, makablos, mitla, nabulong, pamalauagan, pamalauagon, pamarauagon, parasabukong, parasabukung, tabañgau, tauagnau

Lagerstroemia tomentosa C. Presl (*Lagerstroemia tomentosa* var. *caudata* Koehne)

Thailand. Large canopy trees, grey shaggy bark, axillary branch thorns, mature leaves hairy below, white flowers

See *Botanische Bemerkungen* 142. 1844 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 42(2–3, Beibl. 97): 51–52. 1908

(Bark decoction for abdominal pains.)

Laggera Shultz-Bip. ex Benth. Asteraceae

After the Swiss Dr. Franz Josef Lagger, 1802–1870, physician and botanist; see *Flora* 24(1 Intell.): 26. 1841, *Repertorium Botanices Systematicae*. 2: 953. 1843, *Linnaea*. 19: 391. 1847, *Beitrag zur Flora Aethiopiens* ... 1: 151. 1867, *Genera Plantarum* 2(1): 290. 1873.

Laggera alata (D. Don) Sch. Bip. ex Oliv. (*Blumea alata* (D. Don) DC.; *Blumea pterodonta* DC.; *Blumea purpurascens* A. Rich.; *Conyza alata* Roxb.; *Erigeron alatus* D. Don; *Inula exsiccata* H. Lévy; *Laggera alata* (DC.) Oliv.; *Laggera alata* var. *angustifolia* (Hayata) Yamam.; *Laggera alata* var. *dentata* S. Moore; *Laggera angustifolia* Hayata; *Laggera appendiculata* Robyns; *Laggera pterodonta* (DC.) Sch. Bip. ex Oliv.; *Vernonia alata* F. Heyne ex DC.)

India, Nepal.

See *Prodromus Florae Nepalensis* 171. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 448. 1836, *Transactions of the Linnean Society of London* 29(2): 94. 1873 and *Fl. Madagasc.* 189: 339–622. 1962, *Kirkia* 7: 121–136. 1968, *Compositae Newslett.* 20/21: 12–15. 1992, *J. Cytol. Genet.* 33(2): 201–205. 1998

(Whole plant as disinfectant. Leaves antalgic dry leaves decoction drunk for tuberculosis, stomach tumour; ashes from leaves applied to cure backache. Roots for cough, constipation, stomachache, sinusitis. Conjunctivitis and sores eyes, leaves decoction.)

Laggera alata (D. Don) Sch. Bip. ex Oliv. var. *alata*

Madagascar. Perennial herb, erect, stout, branched, aromatic, branches with narrow entire wings, mauve florets

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 448. 1836, *Transactions of the Linnean Society of London* 29(2): 94. 1873 and *Compositae Newslett.* 20/21: 12–15. 1992, *J. Cytol. Genet.* 33(2): 201–205. 1998

(Leaves disinfectant, a decoction as a mouthwash for toothache; dry leaves decoction drunk for tuberculosis, stomach tumour.)

in Madagascar: ariandra vavy

in India: cancer-mozutong

Laggera aurita (L.f.) Benth. ex C.B. Clarke (*Blumea aurita* (L.f.) DC.; *Blumea bojeri* Baker; *Blumea glutinosa* DC.; *Blumea obliqua* (L.) Druce; *Blumea obliqua* var. *aurita* (L.f.) V.N. Naik & P.Y. Bhogaonkar; *Conyza aurita* L.f.; *Conyza viscosa* Mill.; *Erigeron chinensis* Jacq.; *Laggera aurita* (L.f.) Sch. Bip. ex C.B. Clarke; *Laggera aurita* (L.f.) Sch. Bip., nom. inval.; *Pluchea glutinosa* (DC.) Bojer ex Baker, nom. inval.; *Pluchea kotschyi* Sch. Bip.; *Pseudoconyza viscosa* (Mill.) D'Arcy)

Africa. Herb, shrub, erect, aromatic, woody taproot, leaves grey-green softly pubescent

See *Species Plantarum* 2: 863–865. 1753, *The Gardeners Dictionary*: ... eighth edition no. 8. 1768, *Supplementum Plantarum* 367. 1781, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 3: 30, t. 303. 1798, *Bull. Sci. Soc. Philom. Paris* 1817: 31. 1817, *Synopsis Generum Compositarum* ... 203–204. 1832, *Archives de Botanique* 2: 514. 1833, *Contributions to the Botany of India* 16. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 434. 1836, *Flora* 25(1, Beibl. 9): 134. 1842, *Tentamen Florae Abyssinicae* ... 393. 1848, *Genera Plantarum* 2(1): 290. 1873, *Compositae Indicae* 92. 1876, *Journal of the Linnean Society, Botany* 25: 327–328. 1890 and *Report. Botanical Exchange Club. London* 1916: 609. 1917, *Ciencia (Mexico)* 21(1): 30–31, f. 4a-i. 1961, *Phytologia* 25(5): 281. 1973, *Science and Culture* 41: 603–604. 1975, *Taxon* 24: 501–516. 1975, *Feddes Repertorium* 101: 49–62. 1990, *Acta Botanica Indica* 20(1): 49. 1992

(Plant used as disinfectant, insecticide, to expel insects; plant juice applied on cuts. Paste of the leaves and shoot applied on boils on the heads of children.)

in India: bhakumar, kukuround

Laggera crispata (Vahl) Hepper & J.R.I. Wood (*Blumea alata* (D. Don) DC.; *Blumea crispata* (Vahl) Merxm.; *Blumea salvifolia* (Bory) DC.; *Conyza crispata* Vahl; *Conyza salvifolia* Bory; *Laggera alata* (D. Don) Sch. Bip. ex Oliv.; *Laggera alata* var. *dentata* S. Moore; *Laggera alata* var. *salvifolia* (Bory) Humbert)

India.

See *Voyage dans les Quatre Principales Îles des Mers d'Afrique* 31: 176. 1804, *Prodromus Florae Nepalensis* 171. 1825, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 448. 1836, *Transactions of the Linnean Society of London* 29(2): 94. 1873 and *Journal of the Linnean Society, Botany* 38: 260. 1908, *Mémoires de la Société Linnéenne de Normandie* 25: 58. 1923, *Fl. Madagasc.* 189: 339–622. 1962, *Kew Bulletin* 38: 83. 1983, *Mitteilungen der Botanischen Staatssammlung München* 22: 7. 1984, *Compositae Newslett.* 20/21: 12–15. 1992, *J. Cytol. Genet.* 33(2): 201–205. 1998

(Leaves antalgic, for convulsion, bleeding; juice of crushed leaves applied on sores and chronic ulcers; ashes from leaves applied to cure backache; conjunctivitis and sores eyes, leaves decoction. Roots for cough, constipation, stomachache, sinusitis. Veterinary medicine.)

in India: ramvaihlo

Laggera heudelotii C.D. Adams (*Blumea heudelotii* (C.D. Adams) Lisowski)

Ghana, Angola. Erect herb, reddish, winged, pale purple florets in heads

See *Journal of the West African Science Association* 6: 151. 1961

(Crushed leaves juice for sprains, backache, anti-snakebite.)

Laggera pterodonta (DC.) Benth. (*Blumea pterodonta* DC.; *Laggera pterodonta* (DC.) Sch. Bip. ex Oliv.; *Laggera purpurascens* Sch. Bip.)

India.

See *Contributions to the Botany of India* 16. 1834, *Transactions of the Linnean Society of London* 29(2): 94. 1873, *Genera Plantarum* 2: 290. 1873 and *Taxon* 24: 501–516. 1975

(Whole plant decoction drunk to reduce high blood pressure. Leaf paste for stopping bleeding.)

in India: nhana

Lagochilus Bunge ex Bentham **Lamiaceae (Labiatae)**

From the Greek *lagos* ‘a hare’ and *cheilos* ‘lip’, referring to the form of the flower; some suggest a derivation from *lagos* and *chilos* ‘fodder, grass, forage, hay’, see *Labiatae. Gen. Spec.* 640. 1834, *Enumeratio Plantarum Novarum* 28, 30. 1841 and *Flora URSS* 21: 164, 166, 170–171, 179. 1954, *Novosti Sistematiki Vysshchikh Rastenii* (3): 197. 1966, *Bot. Zhurn.* (Moscow & Leningrad) 70(9): 1186–1187, 1190. 1985.

Lagochilus inebrians Bunge

Central Asia, Russia.

See *Mém. Acad. Imp. Sci. St.-Petersbourg Divers Savans* 7: 438. 1847, *Beitr. Fl. Russl.* 262. 1852

(Leaves infusion used as intoxicant, sedative, narcotic.)

Lagopsis (Bunge ex Benth.) Bunge **Lamiaceae (Labiatae)**

From the Greek *lagos* ‘a hare’ and *opsis* ‘resembling’, see *Mém. Acad. Imp. Sci. St.-Petersbourg Divers Savans* 2(6): 565. 1835 and Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Marrubium*.].

Lagopsis supina (Stephan ex Willdenow) Ikonnikov-Galitzky (*Lagopsis supina* (Steph. ex Willd.) Ikonn.-Gal. ex Knorring; *Leonurus supinus* Stephan ex Willdenow; *Marrubium incisum* Bentham; *Marrubium supinum* (Steph. ex Willd.) Hu ex P’ei, nom. illeg.)

China, Siberia.

See *Species Plantarum*. Editio quarta 3(1): 116. 1800, *Labiatae. Gen. et Spec.*: 586. 1834 and *Contr. Biol. Lab. Sci. Soc. China, Bot. Ser.* 10: 53. 1935, *Flora URSS* 20: 250, pl. 16, f. 1. 1954, Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. Kew. 2003 [as *Marrubium incisum*.]

(Stomachic, astringent.)

in English: white-flower lagopsis

in China: xia zhi cao

Lagotis Gaertn. Plantaginaceae

Greek *lagos* ‘a hare’ and *ous, otos* ‘an ear’, see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 533–534, pl. 18, f. 2. 1770, *Reise durch verschiedene Provinzen des russischen Reichs* 3: 710. 1776, *Zwei Pflanzengeografische Dokumente* 197. 1843, *Bull. Acad. Imp. Sci. Saint-Petersbourg* 27(4): 525. 1881 and *Journal of the Washington Academy of Sciences* 35: 374. 1945.

Lagotis brachystachya Maximowicz (*Kokonoria stolonifera* Keng & P.C. Keng)

China.

See *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 533. 1770, *Bull. Acad. Imp. Sci. Saint-Petersbourg* 27(4): 525. 1881 and *Journal of the Washington Academy of Sciences* 35: 374–375, f. 1–18. 1945

(For skin diseases, antiseptic.)

in China: duan sui tu er cao

Lagotis integra W.W. Smith (*Lagotis micrantha* Handel-Mazzetti)

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 11(55): 216–217. 1919, *Anzeiger der Akademie der Wissenschaften in Wien. Mathematische-naturwissenschaftliche Klasse. Wien* 62: 240. 1925

(Roots stomachic, for liver troubles.)

in China: quan yuan tu er cao

Lallemantia Fischer & C.A. Meyer **Lamiaceae (Labiatae)**

Named for the German botanist Julius Leopold Édouard (Leopoldus Eduardus) Avé-Lallemant, 1803–1867, physician, traveller, from 1838 to 1855 Curator of the Botanical Garden of St. Petersburg, plant collector with Christian Friedrich Hornschuch (1793–1850), author of *De plantis quibusdam Italiae Borealis et Germaniae Australis rarioribus*. *Dissertatio inauguralis botanica*, etc. Berolini [1829]. See *Species Plantarum* 2: 570–572. 1753, *Methodus*: 410. 1794, *Index Seminum* [St. Petersburg] 6: 52. 1840, A. Lasègue, *Musée botanique de Benjamin Delessert*. 403. Paris 1845 and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 93. 1965.

Lallemantia royleana Benth. (*Dracocephalum inderiense* Less. ex Kar. & Kir.; *Dracocephalum royleanum* Benth.;

Lallemantia royleana (Benth.) Benth.; *Lallemantia royleana* (Wallich ex Benth.) Benth.; *Nepeta erodiifolia* Boiss.)

Pakistan, Himalaya. Erect, annual herb, pale lilac flowers, black nutlets mucilaginous when wetted

See *Plantae Asiaticae Rariores* 1: 65. 1830, *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 423. 1842, *Diagnoses plantarum orientalium novarum*, ser. 1, 5: 24. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 404. 1848

(Cooling, herb crushed strained drunk to quench thirst. Seeds given for jaundice.)

in English: Royle lallemantia

in China: bian bin cao

in India: tukhm balanga

in Pakistan: purchink

Lamarckia Moench Poaceae (Gramineae)

After the French (b. Picardy) biologist Jean Baptiste Antoine Pierre de Monnet (Monet) de Lamarck, 1744–1829 (d. Paris), a great naturalist, botanist, zoologist, palaeontologist, conchologist, from 1761 to 1768 in the French army, from 1778 to 1793 botanist at the Jardin des Plantes in Paris (Jardin du Roi), naturalist and a forerunner of Darwin's theory of evolution, from 1793 to 1829 professor of zoology at the Museum d'Histoire Naturelle in Paris, his writings include *Flore française* Paris 1778 and *Philosophie Zoologique*. [First edition, two volumes in one, 8vo.] Paris 1822, contributor of the botanical part of the *Encyclopédie méthodique*. Paris, Liège 1783–1817, his works cover a broad spectrum of subjects, from botany to chemistry, meteorology, zoology and geology; type *Lamarckia aurea* (L.) Moench, see *Definitiones generum plantarum...* ed. 3: 420. Lipsiae [Leipzig] 1760, *Methodus Plantas Horti Botanici ...* 201. 1794, *Descriptio graminum in Gallia et Germania...* 376. Francofurti ad Moenum 1802, *Synopsis Plantarum* 1: 80. 1805, *Descr. Gram.* 376. 1812, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 75–76. Paris 1813, *Relazione Accademica dell'Accademia degli Zelanti di Acireale di Scienze, Lettere ed Arti* 3–4: 24. Palermo 1838, *A General History of the Dichlamydeous Plants* 4: 400, 487. 1838, *Revisio Generum Plantarum* 2: 758. 1891 and *New Phytologist* 37: 113–127. 1938, *Flora Mesoamericana* 6: 229. 1994, *Contributions from the United States National Herbarium* 48: 19, 234, 420–421, 590, 654. 2003.

Lamarckia aurea (L.) Moench (*Achyrodes aureum* (L.) Kuntze; *Achyrodes aureum* Kuntze; *Chrysurus aureus* (L.) P. Beauv. ex Spreng.; *Chrysurus aureus* (L.) Besser; *Chrysurus cynosuroides* Pers.; *Cynosurus aureus* L.)

Mediterranean. Annual, slender, erect or decumbent at the base, tufted or loosely tufted, shining golden yellow, small,

glabrous, flat leaf blade, leaf sheaths inflated or keeled, ligule an unfringed membrane, leaves often overtopping the inflorescence, silky and contracted inflorescence, panicle unilateral and ovate-oblong, spikelets of two kinds, spikelets heteromorphic forming clusters, fertile spikelets hidden, each fertile spikelet surrounded by several sterile spikelets, hermaphrodite florets 2 per spikelet, sterile spikelets awnless with 2–8 empty lemmas, fertile spikelet 1-flowered with straight awns, lemma pubescent near the tip, palea narrowly elliptic, anthers yellow, ovary glabrous, fodder plant, cultivated and ornamental, HCN-glucoside, rather weedy species of disturbed areas, often in sandy soils, cliff ledges, in non wetlands, on open ground, rocky hillsides, stony places

See *Species Plantarum* 1: 73. 1753, *Methodus Plantas Horti Botanici ...* 201. 1794, *Syn. Pl.* 1: 80. 1805, *Systema Vegetabilium, editio decima sexta* 1: 296. 1825, *Revisio Generum Plantarum* 2: 758. 1891 and *Taxon* 31(1): 70. 1982, *Taxon* 33: 126–134. 1984, *Fl. Cyprus* 2: 1727. 1985, *Boletim da Sociedade Broteriana, ser. 2* 63: 153–205. 1990, *Taxon* 49(2): 249. 2000

(Decoction taken for headache, analgesic.)

in English: comb grass, feathery barley grass, golden top, goldentop grass

in French: lamarckia doré

in Morocco: sibouss

Lamiophlomis Kudô Lamiaceae (Labiatae)

The genera *Lamium* and *Phlomis*, see *Species Plantarum* 2: 584–587. 1753, *The Flora of British India* [J.D. Hooker] 4(12): 694. 1885 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2(2): 210. 1929.

Lamiophlomis rotata (Benth.) ex J.D. Hooker) Kudo (*Lamiophlomis rotata* Kudo; *Phlomis rotata* Benth.) ex J.D. Hooker)

China.

See *The Flora of British India* [J.D. Hooker] 4(12): 694. 1885 and *Memoirs of the Faculty of Science and Agriculture Taihoku Imperial University* 2(2): 211. 1929

(Used for traumatic injuries, fractured bones, boy pain.)

in English: common lamiophlomis

in Bhutan: rtalpags

in China: du yi wei

Lamium L. Lamiaceae (Labiatae)

From the ancient Latin name *lamium*, *ii* 'a dead-nettle' (Plinius); or, according to some authors, from the Greek *lamia* or Latin *lamia*, *ae* 'a witch, vampire, monster, a sort of

flatfish', an allusion to the resemblance between the flowers and the throat of that fish; Akkadian *lahmu* 'shaggy, hairy'; see Carl Linnaeus, *Species Plantarum*. 2: 579. 1753 and *Genera Plantarum*. Ed. 5. 252. 1754, *Enum.* [Fabr.]. 51. 1759, *Fam. Pl.* (Adanson) 2: 190. 1763, *Florula belgica*, opera majoris prodromus, auctore ... 45. 1827, *Labiatarum Genera et Species* 515. 1834 and *Flora URSS* 21: 137. 1954.

Lamium album L. (*Lamium dumeticola* Klokov; *Lamium petiolatum* Royle ex Benth.)

China, India. Herb, young leaves edible, honey plant

See *Species Plantarum* 2: 579. 1753, *Botanical Miscellany* 3: 381. 1833 and *Fragmenta Floristica et Geobotanica* 25: 477–483. 1979, *New Botanist* 8: 35–44. 1981, *Brenesia* 21: 33–40. 1983, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 7: 5–16. 1984, *Cell and Chromosome Research* 11: 93–97. 1988, *Watsonia* 19: 169–171. 1993, *Linzer Biologische Beiträge* 29(1): 5–43. 1997

(Roots astringent, vulnerary. Flowers astringent, hypnotic, hemostatic, depurative, toxic.)

in English: white dead nettle

in China: duan bing ye zhi ma

Lamium amplexicaule Linnaeus (*Galeobdolon amplexicaule* (Linnaeus) Moench; *Lamiopsis amplexicaulis* (Linnaeus) Opiz; *Pollichia*

amplexicaulis (Linnaeus) Willdenow)

Europe, China. Herb, square-stemmed, pink-lavender whorled flowers, young leaves eaten as salad

(Used medicinally for traumatic injury.)

in English: dead nettle, henbit, henbit dead nettle, henbit nettle

in Arabic: fomm el-samakah

in China: bao gai cao

Lampaya Phil. ex Murillo Verbenaceae

Lampaya medicinalis F. Phil. (*Lampaya castellani* Moldenke; *Lampaya officinalis* Phil. ex Murillo)

Chile. Low, dense shrub, sweet smelling light purple flowers

See *Verh. Deutsch. Wiss. Verein Santiago de Chile* 1: 160. 1886

(Sedative, anesthetic, antiinflammatory, used for rheumatism; infusion of vegetative plant used for hepatic troubles.)

in Chile: lampaya, lampayo

Lamprachaenium Benth. Asteraceae

Greek *lampros* 'shining, brilliant, bright' plus *achenium*, referring to the glossy achenes, see *Genera Plantarum* 2: 225. 1873.

Lamprachaenium microcephalum Benth. (*Baccharoides microcephalum* (Dalzell) Almeida; *Decaneurum microcephalum* Dalzell)

India.

See *Archives de Botanique* 2: 516. 1833, *Hooker's J. Bot. Kew Gard. Misc.* 3: 231. 1851, *Gen. Pl.* [Bentham & Hooker f.] 2(1): 226. 1873 and *Curr. Sci.* 48: 1003–1004. 1979

(Used in Ayurveda. Bitter plant used in skin diseases.)

in India: brahmadandi

Lamprocapnos Endl. Papaveraceae (Fumariaceae)

See Greek *lampros* 'shining, brilliant, bright'; see *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Familles des Plantes* 2: (23). 1763, *Genera Plantarum* 235. 1789, *Arch. Bot.* [Leipzig] 1(2): 46. 1797, *Linnaea* 8: 457, 468. post Jul. 1833, *Linnaea* 12: 668. 1838, *Genera Plantarum* 5: 32. 1850 and Stern, K.R. "Revision of *Dicentra* (Fumariaceae)." *Brittonia* 13(1): 1–57. 1961, *Madroño* 20(7): 258, 356. 1971 [1970 publ. 1971], *Feddes Repert.* 83(7–8): 566. 1972 (publ. 1973), *Opera Bot.* 88: 20. 1986. About 35 isoquinoline alkaloids have been isolated from *Fumariaceae-Papaveraceae*, and such compounds are present in the tissues of all species; aporphine and protopine have been found in *Dicentra* species, some of these alkaloids have been used medicinally, mostly in the past.

Lamprocapnos spectabilis (L.) Fukuhara (*Capnorchis spectabilis* (L.) Borkh.; *Capnorchis spectabilis* (L.) Borkh.; *Dicentra spectabilis* (L.) Lemaire; *Diclytra spectabilis* (L.) DC.; *Diclytra spectabilis* DC.; *Dielytra spectabilis* (L.) DC.; *Eucapnos spectabilis* (L.) Siebold & Zucc.; *Fumaria spectabilis* L.)

Europe, North America. See also *Dicentra*

See *Species Plantarum* 2: 699. 1753, *Archiv für die Botanik* 1(2): 46. 1797, *Regni Vegetabilis Systema Naturale* 2: 110. 1821, *A General History of the Dichlamydeous Plants* 1: 140. 1831, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3: 721. 1840, *Flora des Serres* I 3: pl. 258. 1847 and *Plant Systematics and Evolution* 206: 415. 1997

(Low toxicity, leaves, stems and roots are dangerous, plant unpalatable, cattle are primarily affected.)

in English: bleeding hearts, Chinese bleeding heart, Dutchman's breeches, old-fashioned bleeding heart

in China: he bao mu dan

Lancea Hook.f. & Thomson Scrophulariaceae (Phrymaceae)

For the English orchid lover John Henry Lance, 1793–1878, barrister, botanist, 1828 Fellow of the Linnean Society,

1828–1834 Suriname; see J. Lindley, *Sertum orchidaecum*. London [1837–] 1838 [–1841], *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 520. 1847, *Hooker's Journal of Botany and Kew Garden Miscellany* 9: 244, t. 7. 1857.

Lancea tibetica Hook.f. & Thomson

India, Ladakh, Sikkim.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 9: 244, t. 7. 1857 and *Acta Bot. Boreal.-Occid. Sin.* 25(3): 592. 2005

(Decoction from crushed whole plant used as tonic, to strengthen lungs and pulmonary function, also for wounds and heart disorders. Roasted roots narcotic, stimulant. Leaf paste applied for wound healing. Ritual, ceremonial, powdered leaves mixed with *ghee* to make incense.)

in Bhutan: pa-yag

in China: rou guo cao

in India: chagna, depgul, raikse

Landolphia P. Beauv. Apocynaceae

After Jean François Landolphe, 1765–1825, commander of the 1786–1788 expedition to Gulf of Guinea (mainly Niger Delta) to which Ambroise Palisot (Pallisat) de Beauvois (1752–1820) was botanist; Landolphe published *Mémoires du Capitaine Landolphe*, contenant l'histoire de ses voyages pendant trente-six ans, aux côtes d'Afrique, et aux deux Amériques; rédigées sur son manuscrit, par J.S. Quesné. Paris 1823; see *Histoire des plantes de la Guiane Française* 268–270. 1775, *Flore d'Oware* 1: 54, t. 34. 1806 and E.D. Merrill, in *Proc. Amer. Phil. Soc.* 76: 899–920. 1936, H. Heine, in *Adansonia*. Sér. 2, 7: 115–140. 1967, *Wageningen Agricultural University Papers* 92(2): 7–10. 1992.

Landolphia buchananii Stapf (*Clitandra buchananii* Hallier f.)

Kenya. Liane, strong, narrow, flexible, tendrils, white latex, white tubular flowers borne in axillary or terminal inflorescences, soft ripe fruit eaten, seeds embedded in a white juicy sour sweet pulp, unripe fruit bitter, fodder plant for goats and sheep

See *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten*. Beihefte 17(3): 119. 1900, *Flora of Tropical Africa* [Oliver et al.] 4(1.1): 35. 1902

(Both ripe and unripe fruits used for “coated tongue”; roots used for gonorrhoea and bilharzia. Leaves infusion for wounds, gonorrhoea, molluscicidal.)

in Kenya: entiangenge, kiongoa, lkutetei, maongoa, mpira, mugu, mugu-wa-munyati, ng'eng'ech, ng'eng'echwa, ng'eng'echwo, ng'eng'eech, ngiingichet, ngungyet, nyakinchwet, nyingiget, sebit, tunoiyet, vizizira [zira = rub against, makes people scratch themselves]

Landolphia dulcis (Sabine ex G. Don) Pichon (*Carpodinus dulcis* Sabine ex G. Don; *Carpodinus dulcis* Sabine; *Landolphia dulcis* (Sabine) Pichon; *Pacouria dulcis* (Sabine) Roberty; *Pacouria dulcis* (Sabine ex G. Don) Roberty)

W. Trop. Africa to Angola. Shrub, liana, vine, climbing, tendrils, sweet juicy stems, white latex, green papery coriaceous leaves, very fragrant flowers light lavender, orange-yellow fruit when cut giving white latex later turning red, sweet tasty fruit pulp, in forest edge

See *Flore d'Oware* 1: 54. 1806, *Transactions of the Horticultural Society of London* 5: 455. 1823 and *Bull. Inst. Franc. Afr. Noire* xv. 1427. 1953, *Mémoires de l'Institut Français d'Afrique Noire* 35: 169, t. 6, 6. 1953, *Journal of Ethnopharmacology* 114(1): 44–53. 2007, *Journal of Ethnopharmacology* 114(2): 207–211. 2007

(Root and stem bark tonic, antiparasitic, antitrypanosomal, antibacterial, febrifuge, antiplasmodial, antiamebic. Chewing the bark of the stem gives potency in man.)

in West Africa: an lonk, gondui, kushument

Landolphia kirkii Dyer (*Landolphia parvifolia* K. Schum.; *Vahea kirkii* (Dyer) Sadeb.; *Vahea kirkii* Sadeb.)

Tropical Africa. Woody climber, lianescent shrub, trailing, liana, white milky latex, fruits globular edible

See *Kew Garden Report* 1880: 39. 1881, *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten* 9(1): 226. 1891 and *Hooker's Icon. Pl.* 28: t. 2755. 1903 [1905 publ. Nov 1903]

(Roots and leaves for tuberculosis and female sterility.)

in Tanzania: m'bungo, mahanga, maungo, mpira

in Zambia: umumubungo

Landolphia owariensis P. Beauv. (*Landolphia droogmansiana* De Wild.; *Landolphia droogmansiana* Wildem.; *Landolphia gentilii* De Wild.; *Landolphia glaberrima* A. (Twigs, leaves and stem antimicrobial, purgative, vermifuge, analgesic, antiinflammatory, for colic, venereal diseases. Leaves decoction used as a purgative, and to cure malaria. Root extract to treat gonorrhoea infection. Stem bark vermifuge. Latex drunk or used as enema for intestinal worms.)

in English: rubber vine, vine rubber, white rubber vine

in Cameroon: elembe, matakalaka

in Central African Republic: banga, ndembo, pembé

in Ghana: abwe

in Tanzania: ibungu, kibungu, kibungu, kitoria, libufu, libugu, libungu, liwungwungo, mabungo kati, mahanga, maungu, mlimbo, mlungwana, mmeru sukari, moyo, mpia-mzitu, mpira, mpo, mpyo, totwe, ugoroto, utorojo

in Yoruba: ibo, ibo gidi, ibo tabon, mba

Lankesteria Lindley Acanthaceae

After the English physician Edwin Lankester, 1814–1874 (Kent), botanist, M.D. Heidelberg 1839, professor of natural history, in 1840 Fellow of the Linnean Society, 1844 Secretary of the Ray Society, 1845 Fellow of the Royal Society, 1859 President of the Microscopical Society of London, among his many works are *An account of Askern, and its Mineral Springs*. London 1842, *Report of Lectures on the natural history of Plants yielding food*. London 1845, *Cholera: what is it? and how to prevent it*. London 1866, *Practical Physiology*.

London 1872, *Good Food*. London 1867, *On Food*. London 1861 and 1864, *The Natural History of Creation*. London 1848, edited *Haydn's Dictionary of popular medicine and hygiene*, translated H.F. Link's *Report on the progress of Physiological Botany during the year 1841*. London 1845, he was the father of the zoologist Edwin Ray Lankester (1847–1929). See *Edwards's Botanical Register* 31(Misc): 86 & 32: t. 12. 1845, E. Lankester, *Memorials of John Ray*. [Including Dr. Derham's biography, Sir J.E. Smith's *Life* and the transcriptions of three itineraries, being Journals kept on botanical forays around England, Wales and Scotland.] Ray Society 1846, [John Ray], *The Correspondence of J. Ray*. Edited by E. Lankester. London 1848.

Lankesteria brevior C.B. Clarke

Tropical Africa. Herb, undershrub, pubescent, slightly wood-based, scabrous coriaceous leaves, corollas white-pale mauve with yellow center, pubescent inflorescence bracts dark purple-red

See *Journal of the Linnean Society, Botany* 37: 110. 1905 [1904–1906 publ. 1905]

(Leaves ground boiled and given as a drink to cure gonorrhoea.)

Lankesteria elegans (P. Beauv.) T. Anderson (*Eranthemum elegans* R.Br. ex Roem. & Schult.; *Eranthemum elegans* Roem. & Schult.; *Eranthemum elegans* Mast.; *Justicia elegans* Poir.; *Justicia elegans* Pohl; *Justicia elegans* Pohl ex Nees; *Justicia elegans* P. Beauv.; *Lankesteria elegans* T. Anderson)

Tropical Africa. Herb, erect, shrub, woody-based, corollas bright orange

See *Encycl. (Lamarck) Suppl.* 2. 112. 1811, *Syst. Veg.*, ed. 15 bis [Roemer & Schultes] 1: 174. 1817, *Prodr. (DC.)* 11: 382. 1847, *Journal of the Linnean Society, Botany* 7: 33. 1863 [1864 publ. 1863], *Gard. Chron.* (1868) 1234. 1868

(Leaves for venereal diseases, cough and bronchitis.)

in Zaire: sosa

Lannea A. Rich. Anacardiaceae

From the Latin *lana, ae* 'wool', referring to the woolly hair on young parts or on the roots of some species; or from *lanne*, an African vernacular plant name, in Senegambia, see *Fam. Pl.* (Adanson) 2: 446. 1763, Guillemin, Jean Baptiste Antoine (1796–1842), *Florae Senegambiae tentamen: seu, Historia plantarum in diversis Senegambiae regionibus a peregrinatoribus Perrottet et Leprieur detectarum. T. 1 / auctoribus J.A. Guillemin, S. Perrottet et A. Richard. Parisiis: Treuttel et Wurtz, 1830–1833 and Kew Bulletin* 34: 745–760. 1980, *Bothalia* 13(3–4): 501–518. 1981.

Lannea acida A. Rich. (*Calesiam acidum* (A. Rich.) Kuntze; *Lannea grossularia* A. Chev.; *Odina acida* Walp.; *Odina acida* (A. Chev.) Oliv.)

Ivory Coast. Tree, sticky exudate, used for dyeing

See *Fl. Indica* ed. 2 2: 293. 1832, *Repert. Bot. Syst.* (Walpers), v. 412. 1842–1847, *Flora of Tropical Africa* 1: 446. 1868, *Revisio Generum Plantarum* 1: 151. 1891 and *Bull. Soc. Bot. France* 58(Mém. 8d): 151. 1912 [1911 publ. 1912], *J. Diarrhoeal Dis. Res.* 13(2): 127–129. 1995, Koné W.M. et al. “Traditional medicine in north Côte-d’Ivoire: screening of 50 medicinal plants for antibacterial activity.” *J. Ethnopharmacol.* 93(1): 43–49. 2004

(Antimicrobial, traditional remedies for bacterial diseases, to cure skin affections. Magic, ritual, ceremonial, red dye has protective symbolic power, believed to heal wounds.)

in French: raisinier acide

in Mali: bembè, npegejo, npeku, sina

in Nigeria: faru, oyinyin

in Yoruba: opon

Lannea alata (Engl.) Engl. (*Odina alata* Engl.)

Somalia. Shrub or tree, many-branched, spreading, drooping branches, very small leaves, tiny leaflets, winged rachis, small greenish yellow flowers borne in inflorescences arising together with leaves from the short shoots, yellow to orange or reddish brown fleshy fruits, seeds rough, juicy sweet sour fruits edible, goat and camel fodder, fruits eaten by goats, in *Acacia-Commiphora* bushland

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 105. 1892, *Die Natürlichen Pflanzenfamilien* Nachtr. [Engler & Prantl] 1: 214. 1897

(Used for fever, malaria, snakebite, fractures and injuries.)

in Kenya: bejelo, kikolya, kitungu, kumude, kumudhe, lkinoi, manga, mituungu, mnthungu, mushiga, ndungu, ngariso, ngolya, sufi-bara, waanreh, waareh, wanreh

in Tanzania: mngarito

Lannea barteri (Oliv.) Engl. (*Lannea barteri* Engl.; *Lannea kerstingii* Engl. & K. Krause; *Odina barteri* Oliv.)

Guinea, Ethiopia and Uganda. Tree, dioecious, straight, flowers yellowish, inflorescence a terminal spike-like raceme arranged in apical clusters, fruit purplish-red, bee forage, resinous fruit pulp eaten, important source of red-brown dye used in traditional dyeing in Africa, in wooded savanna and forest edges

See *Fl. Indica* ed. 2 2: 293. 1832, *Flora of Tropical Africa* 1: 446. 1868, *Die Natürlichen Pflanzenfamilien* II-IV Nachtr. 1: 213. 1897

(Bark used externally to treat ulcers, sores and leprosy; decoction stomachic and vermifuge, drunk against gastric pains, diarrhea, edema, hernia, paralysis, epilepsy and madness. Macerated root used in a poultice for the treat-

ment of wounds. Leaf decoction drunk to cure piles. Magic, ritual ceremonial.)

Lannea coromandelica (Houtt.) Merr. (*Calesium grande* Kuntze; *Calesium grande* (Dennst.) Kuntze; *Dialium coromandelicum* Houtt.; *Haberlia grandis* Dennst., nom. nud.; *Lannea grandis* (Dennst.) Engl.; *Lannea wodier* (Roxb.) Adel.; *Odina pinnata* Rotte; *Odina wodier* Roxb.; *Rhus odina* Buch.-Ham. ex Wall.)

Indo-Malesia. Deciduous tree, spreading crown, stout branches, flowers pale yellow, fruits are eaten

See *Species Plantarum* 1: 265–267. 1753, *Systema Naturae*, ed. 12 2: 56. 1767, *Natuurlijke Historie* 2(2): 39, pl. 5, f. 2. 1774, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 209. 1803, *Schlüssel Hortus indicus Malabaricus*, ... 30. 1818, *Flora Indica*; or, descriptions of Indian Plants 2: 293–294. 1832, *Revisio Generum Plantarum* 1: 151. 1891, *Die Natürlichen Pflanzenfamilien* 1: 213. 1897 and *A Numerical List of Dried Specimens* [Wallich] n. 8475. 1928, *Journal of the Arnold Arboretum* 19(4): 353. 1938, *Blumea* 6(1): 326. 1948, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Journal of Cytology and Genetics* 25: 36–42. 1990, *Phytochemistry*. 54(8): 901–907. 2000, *J. Agric. Food. Chem.* 50(23): 6697–6703. 2002

(Used in Ayurveda and Sidha. Strongly irritant. Leaf paste applied to treat sprains and elephantiasis. Juice of bark and leaves applied to ulcers, bodyache and swellings. Stem bark extracts zoosporicidal and to control wound maggots; stem bark in a preparation as an antifertility drug; paste of stem bark applied on cuts and burns; crushed bark soaked in water and taken to cure dysentery; bark paste given in stomach pain, also applied and tied with bandage for cuts by iron tools; stem bark latex applied as an ointment on wounds; a lotion from the bark to wash indolent ulcers, bruises, wounds, eye sores; bark along with barks of *Ziziphus rugosa* and *Radermachera xylocarpa* crushed into a paste and applied and bandaged over the fractured bone. Veterinary medicine, crushed bark used as a bandage on wounds and cuts; bark juice for fracture of limb. Fruits or bark as fish poison; powdered or crushed fruits used as fish poison.)

in English: wodier tree

in Bangladesh: bhadi, jiga

in Nepal: hallonre

in Tibet: dzi ndza ni, dzi ndzi ni

Lannea edulis (Sond.) Engl. (*Odina edulis* Sond.)

East and Central Africa. Short shrub with underground branches, yellow flowers borne in clusters near ground level, bright red fruits, fruits eaten raw, in humid areas, in wooded grassland

See *Fl. Indica* ed. 2 2: 293. 1832, *Die Natürlichen Pflanzenfamilien* 1: 213. 1897 and Sohni Y.R. et al. "Frameshift mutations in Salmonella induced by the extracts of medicinal herbs *Lannea edulis* (Sond.) Engl. and *Monotes glaber* Sprague." *Environ. Mol. Mutagen.* 25(1): 77–82. 1995, *J. Nat. Prod.* 66(4): 578–80. 2003

(Roots for the treatment of wounds.)

in Kenya: burobelo, cheptapesyit, namwirobelo, nelob

in Southern Africa: muKuti, muSambasi, muSambatsi, muTsambatsi, muTsambole, muTsambore, muTsambori, muUte (Shona)

Lannea egregia Engl. & K. Krause

Guinea, Benin, Nigeria. Tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 331. 1911

(Bark used externally to treat ulcers, sores and leprosy; decoction stomachic and vermifuge, drunk against gastric pains, diarrhea, edema, hernia, paralysis, epilepsy and madness. Macerated root used in a poultice for the treatment of wounds. Leaf decoction to cure hemorrhoids.)

Lannea fulva (Engl.) Engl. (*Odina fulva* Engl.)

Tanzania. Tree or shrub, deciduous, short bole, rounded crown, bark rough black-grey, many-branched, branches smooth, small flowers clustered on short cream inflorescences, petals yellow-green, small purple drupes, bark of branches used to tie house poles, sweet fruits edible when ripe, in woodland, in wooded grasslands, on termite mounds, forest edges, slope, on rocky hills, *Brachystegia* woodlands

See *Fl. Indica* ed. 2 2: 293. 1832, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15:

103. 1892, *Die Natürlichen Pflanzenfamilien* II-IV Nachtr. 1: 213. 1897

(Poisonous. Antimicrobial, antibilharzia, traditional remedies for bacterial diseases. Bark crushed and used as a bandage (poultice) for wounds and snakebite and, generally, to stop bleeding. Roots soaked in warm water and drunk to treat stomachache and chest pains.)

in Tanzania: chandu, itiwili, kwilili, mgulumo, msabi, mselya, mtarima, muchunganyama, mulumbi, mumbu, murangalala, murangarara, muwurubu, nselya, tsalmi

Lannea humilis (Oliv.) Engl. (*Odina humilis* Oliv.)

Tanzania. A small deciduous tree or shrub, spongy bark with lenticels, tuft of leaves on a side shoot, male and female flowers on separate trees, small creamy flowers in spikes, clusters of fruit, drupe covered with dense grey furry hairs, sweet ripe fruits eaten raw in moderate amounts, in deciduous bushland and woodland, savanna, in wooded grassland

See *Flora of Tropical Africa* 1: 447. 1868, *Die Natürlichen Pflanzenfamilien* Nachtr. 1: 213. 1897

(Roots pounded, the powder stirred into warm water and drunk for treatment of generalized body pains, stomach problems and cough.)

in Nigeria: kurubulul (Kanuri)

in Tanzania: lilinga, mhondobogo, mlinga, mlingalinga, mnghanangha, mnyamaji, mnyamenzi, mtinje

Lannea microcarpa Engl. & Krause (*Lannea djalonica* A. Chev.; *Lannea oleosa* A. Chev.)

Senegal, Cameroon. Tree, dioecious, bark slightly sweet-scented, inflorescence a terminal raceme bearing glandular dots, young leaves eaten as a vegetable, cattle browse leaves as a forage, fruits purplish-black eaten raw or dried, bark yields an edible gum, in savanna

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 46: 324. 1911, *Phytotherapy Research* 15(5): 401–406. 2001, *J. Pharm. Pharmacol.* 58(7): 981–988. 2006 [An extract of *Lannea microcarpa*: composition, activity and evaluation of cutaneous irritation in cell cultures and reconstituted human epidermis.]

(Antifungal, astringent, larvicidal, molluscicidal, antioxidant. Dried powdered aerial parts drunk against stomachache; wood ash applied to mature abscesses. Leaves used as a dressing for wounds; leaf decoction taken to treat swellings. Leaves, bark, roots and fruits applied to treat rheumatism, sore throat, dysentery, diarrhea. Magic, ritual, ceremonial, red dye has protective symbolic power, believed to heal the wounds.)

in English: African grape

in Mali: npeku

Lannea rivae Sacleux

Northeastern Tanzania, Kenya, Ethiopia. A deciduous shrub or small tree, many-branched, flat spreading crown, underbark red, very small yellow-green flowers along spike-like stalks, sepals and stalks covered with white star-shaped hairs, densely hairy fruit with edible flesh around the seed, open *Terminalia-Combretum* bushland, in wooded grassland, rocky sites, deciduous bushland

See *Bulletin du Muséum d'Histoire Naturelle*, sér. 2 6: 453. 1934

(Inner bark chewed to treat coughs, colds and stomachache.)

in English: wild grape

in Kenya: etopojo, jidwey, kithaala, kithaalua kya kiima, latat, lolowe, lolotwo, muthaalwa

in Tanzania: ingege, intabali, intulakigina, kwilili, mgumbugumbu, mtinje, muwumbu, ntinje

Lannea schimperi (Hochst. ex A. Rich.) Engl. (*Lannea ruspolii* Engl.; *Lannea schimperi* (A. Rich.) Engl.; *Lannea schimperi* Engl.; *Lannea schimperi* var. *glabrescens* (Engl.) J.B. Gillett; *Odina schimperi* Hochst. ex A. Rich. var. *glabrescens* Engl.; *Odina schimperi* Hochst. ex A. Rich.)

Nigeria, Ethiopia, Zimbabwe and Mozambique. Tree, greenish yellow flowers borne on long usually unbranched inflorescences, fruit eaten, bark used in tea

See *Flora Indica*; or, descriptions of Indian Plants 2: 293. 1832, *Tentamen Florae Abyssinicae* ... 1: 140–141. 1847, *Die Natürlichen Pflanzenfamilien* II-IV Nachtr. 1: 213. 1897

(Roots and bark decoction used for chest troubles; bark decoction taken for diarrhea, stomachache, chest problems.)

in English: rusty-leaved lannea

in Kenya: andaraka, cheprukwo, etopojo, kipng'etingwet, kithauna, kithoona, kumuumbu, kuogo, kwetingwet, kwogo, latat, lolotwa, mwanakabaga, nthoona

in Nigeria: farun doya (Hausa)

in Tanzania: ngikinywa

Lannea schweinfurthii Engl. (*Commiphora porensis* Engl.; *Lannea ambigua* Engl.; *Lannea kirkii* Burt Davy; *Lannea schweinfurthii* (Engl.) Engl.; *Lannea schweinfurthii* var. *stuhlmannii* (Engl.) Kokwaro; *Lannea stuhlmannii* (Engl.) Engl.; *Lannea stuhlmannii* Engl.; *Lannea stuhlmannii* (Engl.) Tanzania, Uganda, Kenya. A shrub or small deciduous tree, crown rounded and spreading, branchlets drooping, small flowers strongly scented cream coloured in hanging spikes, male and female trees, fruit and seeds sweet, fleshy fruits red-brown eaten raw, bee forage, deciduous woodland, bushland, wooded grassland, riverbanks and valleys

See *Natuurlijke Historie* 2(2): 39, pl. 5, f. 2. 1774, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 2: 66. 1797, *Flora Indica*; or, descriptions of Indian Plants 2: 293–294. 1832, *Die Pflanzenwelt Ost-Afrikas* C: 244. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 371. 1899 and *Trans. Roy. Soc. South Africa* v. 401. 1916, *Journal of the Arnold Arboretum* 19(4): 353. 1938, *Blumea* 6(1): 326. 1948, *Kew Bulletin* 34: 751. 1980

(Stem with molluscicidal activity. Bark boiled and used as a tonic for anemia; bark decoction for diarrhea, stomachache and headache. Leaves infusion given to pregnant women to relieve abdominal pains, and leaves poultice applied to abdomen to hasten childbirth; leaf applied to sores and abscesses. Leaves and fruits analgesic, tonic, antifungal. Magic, ritual, roots used for a bath believed to bring good luck in business.)

in English: bastard marula, false marula, tree grape

in Kenya: deen, hadaraku, kuogo, kyuasi, lapurori, mnyumbu, moino, monwo, muracu, muthuchi, orpande

in N. Rhodesia: muyombo

in S. Rhodesia: inDuna

in Southern Africa: bastermaroela, boomdruif, baster-marula; mtundu (Swahili); umGanunkomo, uLibasi (Zulu); umGanunkomo (Swazi); ndivata, mumbu (Thonga); umganukomo (Ndebele); muGanenkomo, muGanowo, muSurtoto (Shona)

in Tanzania: eravande, ishishina, mfupapu, mnyamendi, mnyumbo, mnyumbu, mongo, mpupi, mpiwipwi, mpwipwi, mribwampara, msakawa, msayu, msighe, mtundu, muhin-gilo, muhondobogo, mumbu, mumendo, musagha, muumbu,

muwumbu, ndelamwana, nsayu, omosaruwa, orbochandi, tambaragi, thigi, thigii

Lannea triphylla (A. Rich.) Engl.

Uganda, northeastern Tanzania, Ethiopia, Somalia and Arabia. Deciduous spreading shrub or small tree, flexible, fleshy bark, cream flowers in spikes, softly hairy dirty red edible fruits, seed red, sweet inner bark chewed, sweet and succulent roots from young plants peeled and chewed raw, bark boiled for tea, camel and goat fodder, in *Acacia-Commiphora* bushland, often confused with *Lannea rivae*

See *Die Natürlichen Pflanzenfamilien* Nachtr. I: 213. 1897

(Boiled bark used as child's tonic, believed to cleanse the stomach; string chewed for colds.)

in Kenya: andarak, anri, anthri, atopojo, baaror, etopojo, hadaraku, kithaala, kithaalwa, kuogo, lapuroi, man, mnyumbe, moino, monwo, muracu, niondoh, nkampiror, nkampurok, nkampurori, nzaala, orpande, tapuya, waanri, wankhri

Lannea velutina A. Rich. (*Calesiam velutinum* (A. Rich.) Kuntze; *Odina velutina* (A. Rich.) Oliv.)

Tropical Africa, Mali. Tree, flowers greenish yellow, inflorescence a spike-like raceme usually terminal on old branches, bark yields a popular red-brown dye, foliage browsed by cattle, fruit is said to be edible, in wooded savanna

See *Flora Indica*; or, descriptions of Indian Plants 2: 293. 1832, *Flora of Tropical Africa* 1: 447. 1868, *Revisio Generum Plantarum* 1: 151. 1891 and *Phytother. Res.* 15(5): 401–406. 2001 [Screening of Malian medicinal plants for antifungal, larvicidal, molluscicidal, antioxidant and radical scavenging activities.], *J. Ethnopharmacol.* 104(1–2): 132–137. 2006

(Antioxidant, antifungal, tonic, larvicidal, insecticidal, molluscicidal; excellent sources of antioxidants. Macerated bark and roots used to prepare a bath for rachitic children and adults with muscle pains. A decoction of the powdered root used against diarrhea. Bark used to treat diarrhea, edema, paralysis, epilepsy and insanity; applied externally to wounds, ulcers and leprosy, and a decoction taken against gastric pains.)

Lannea welwitschii (Hiern) Engl. (*Calesiam welwitschii* Hiern; *Lannea acidissima* A. Chev.)

Tropical Africa. Tree, deciduous or evergreen, dioecious, bole straight and cylindrical, pale sticky exudate, spreading branches, inflorescence an axillary pyramidal panicle, fruits shiny bright red to blackish purple, resinous fruits eaten fresh

See *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 179. London, 1896–1901 [I, pt. 1–4. *Dicotyledons*. By William P. Hiern. 1896–1900.—II, pt. 1. *Monocotyledons and gymnosperms*. By Alfred B. Rendle. 1899.—pt. 2. *Cryptogamia*. 1901. [British Museum (Natural History). Department of Botany. Hiern, William Philip (1839–1925), Rendle, Alfred Barton (1865–1938), Welwitsch, Friedrich Martin Josef (1806–1872)], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie*

24: 298. 1898 and *Les végétaux Utiles de l'Afrique Tropicale Française* 5: 114. 1909, *Journal of Ethnopharmacology* 39: 69–72. 1993, *Journal of Natural Products* 60(2): 116–121. 1997

(Sawdust may cause allergic reactions to skin and mucous membranes. Seeds used as a purgative. Root decoction expectorant and emetic, taken as antidote in poisoning. Bark decoction taken to treat diarrhea, dysentery, piles, sterility in women and menstrual troubles, pain after childbirth, gonorrhoea, epilepsy, skin infections and ulcers; powdered bark applied to snakebites and wounds.)

in Gabon: mboua fang

Lansium Corrêa Meliaceae

From *langsar* or *langsa*, *lansa*, vernacular names, see *Annales du muséum national d'histoire naturelle* 10: 157. 1807, *Trans. Linn. Soc.* xiv. I. (1823) 115. 1823.

Lansium domesticum Corrêa (*Lansium domesticum* Jack)

Indonesia. Tree, bole deeply fluted, furrowed bark containing milky sticky resinous sap, leaves alternate, flowers uni- or bisexual in spikes or panicles, petals fleshy erect white to pale yellow, globose yellow or brownish berry, fruit edible pubescent, pericarp tough often with white latex, translucent pulp, seeds covered with thick white edible aril

See *Annales du muséum national d'histoire naturelle* 10: 157–158. 1807, *Trans. Linn. Soc. London* 14(1): 115. 1823 [28 May–12 Jun 1823]

(Seeds, bark and fruit skin poisonous, bitter, insecticide, used in making arrow poison. Leaves used for dysentery and eye diseases. Seeds for fever and anthelmintic, vermifuge, to kill intestinal worms; seeds, bark and leaves effective against fevers, including malaria. Bark astringent, a decoction used for dysentery, blood diarrhea, malaria; powdered a remedy for scorpion stings; for poulticing scorpion sting. A fruit skin decoction with the bark of *Garcinia mangostana* drunk as a remedy for bloody diarrhea; fruits promote urinary discharge.)

in Indonesia: bijitan, bohulo, duku, duku langsar, dukuh, kokosan, langeset, langsak, langsar, langsek, lansar, lantar, lasa, lasar, lase, pisitan, ranso

in Malaysia: duku, duku-langsar, langsar, lansar

in Philippines: boboa, buahan, bukan, bulahan, buan, buahan, boboa, kalinbongan, lansones, tubua

in Thailand: du-kuduku, la-sa, lang-sar, langsar, longkong

in Vietnam: bônbon

Lantana L. Verbenaceae

Ancient name for *Viburnum*, *lentana* (13th–14th century, Belcalzer; see G. Ghinassi, “Nuovi studi sul volgare

mantovano di Vivaldo Belcalzer.” in *Studi di filologia italiana*. 23: 19–172. Firenze 1965), *lantana* (before 1590, C. Durante), “*lantana*: leggi viburno” (1560, P. Mattioli), in Sicilian *lantanu*; the spoken Latin *lentaginem*, from *lentus* ‘pliant’ (‘lenta viburna’ Vergilius); see Carl Linnaeus, *Species Plantarum*. 2: 626–628. 1753 and *Genera Plantarum*. Ed. 5. 275. 1754 and V. Bertoldi, “Dal *lenta viburna* di Virgilio al *viburnum lantana* di oggi.” in *Archivum romanicum*. 65–75. 1931, *Field Mus. Nat. Hist., Bot. Ser.* 13(5/2): 609–721. 1960, *Fieldiana, Bot.* 24(9/1–2): 167–236. 1970, *Proc. Indian Sci. Congr. Assoc.* (IV, A) 67: 37–38. 1980, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 650. 1983, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 422. Berlin & Hamburg 1989, *J. Econ. Tax. Bot.* 16(3): 595–597. 1992, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 638. Stuttgart 1993, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 325. 1996, *Sida* 22(1): 381–421. 2006.

(Aromatic leaves used in an infusion. Used to treat malaria when roots boiled with other species roots, also in the preparation of male and female aphrodisiacs.)

in Kenya: geedxamar

in Tanzania: kinyunkanyunki, mahunguadeni, ormagirigorian

Laportea Gaudich. Urticaceae

Possibly after the English-born (London) French naturalist François Louis Nompard de Caumat de Laporte Castelnau, 1810–1880 (d. Melbourne), entomologist, traveller, plant collector in Florida, 1843–1847 to South America (collected plant in Bolivia and Peru), 1856–1857 at Cape (South Africa), 1862–1880 French Consul in Australia (Melbourne), author of *Mémoire sur les Poissons de l'Afrique australe*. Paris 1861 and *Notes of the edible fishes of Victoria*. [International Exhibition Essays, no. 5.] 1872–1873; or dedicated to a M. Laporte, a French naval officer on the *Uranie* during its voyage round the world between 1817–1820, a companion of Gaudichaud. See *Enumeratio Methodica Plantarum* 204. 1759, Charles Gaudichaud-Beaupré, [Botany of the Voyage.] *Voyage autour du Monde ... sur ... l'Uranie et la Physicienne, pendant ... 1817–1820*. Paris 1826 [-1830], *Expédition dans les parties centrales de l'Amérique du Sud, de Rio de Janeiro à Lima, et de Lima au Para; exécutée ... pendant ... 1843 à 1847, sous la direction de F. de Castelnau*. Paris 1850–1859, *Plantae Junghuhnianae* 1: 29. 1851, *Annales des Sciences Naturelles; Botanique*, série 4 1: 181. 1854, Weddell, Hugh Algernon (1819–1877), *Monographie de la famille des Urticées*. Paris, 1856 [Archives du Muséum d'Histoire Naturelle 9: 123, 129, 132–133. 1856], *Bulletin de l'Académie impériale des sciences de St.-Petersbourg* 22(2): 238, 240. 1877 and *Fieldiana, Bot.* 24(3): 396–430. 1952, MacFarlane, W.V. "The stinging properties of *Laportea*." *Econ. Bot.*, 17: 303–311. 1963, *The Gardens' Bulletin Singapore* 21(2): 199–200. 1965, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 321. 1965, Chew Wee-Lek (1932–), "A monograph of *Laportea* (Urticaceae)." *Gardens' Bull., Singapore*, 25: 111–178. 1969, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 208. Chipping Norton, N.S.W. 1981, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 115. Cape Town 1981, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 326. 1996. Members of the genus *Laportea* have caused severe reactions in humans, and a death was reported in New Guinea after severe exposure.

Bot.*, 17: 303–311. 1963, Chew, W.L. “A monograph of *Laportea* (Urticaceae).” *Gard. Bull. Straits Settlem.* 25: 111–178. 1969, *Taxon* 31: 120–126. 1982, *Erigenia* 11: 1–8. 1991

(Low toxicity, avoid this plant if possible. This plant has stinging hairs on the leaves and stem that readily penetrate thin-skinned areas on humans. Canada nettle hairs induce localized pain and discomfort as well as erythema, reddening, and localized sweating, the pain may persist for weeks, crushed dock leaves applied to affected area will ease irritation. A decoction of the plant used in the treatment of fevers and as blood purifier. Roots used as an emetic, antidote, diuretic, to treat tuberculosis, to facilitate childbirth, and as a love medicine.)

in North America: Canada lettuce, Canada nettle, Canadian wood nettle, grande ortie, wood-nettle

Laportea cordata Warb. ex W. Winkl. (*Dendrocnide cordata* (Warb. ex W. Winkl.) Chew; *Dendrocnide cordata* (Warb. ex H.J.P. Winkl.) Chew; *Dendrocnide cordata* Chew; *Laportea cordata* Warb.; *Laportea cordata* Warb. ex H.J.P. Winkl.)

New Guinea.

See *Nachtr. Fl. Schutzgeb. Südsee* [Schumann & Lauterbach] 290. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 503. 1922, *The Gardens' Bulletin Singapore* 21(2): 202. 1965

(Human fatality following the sting.)

Laportea decumana (Roxb.) Wedd. (*Laportea decumana* Wedd.; *Urtica decumana* Roxb.; *Urticastrum decumanum* (Roxb.) Kuntze; *Urticastrum decumanum* Kuntze)

Borneo, New Guinea. Perennial shrub, subshrub or herb, monoecious, woody, branched, stem densely armed, leaves rugose, branched paniculate unisexual inflorescence

See *Hort. Bengal.* 67. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 587. 1832, *Archives du Muséum d'Histoire Naturelle* 9: 127. 1856, *Revisio Generum Plantarum* 2: 635. 1891

(Long irritant hairs. Leaves with stinging hairs rubbed onto the body to alleviate aches and muscular pain, for debility and aching limbs, headache, fatigue, stomachache, bruises, fevers and intestinal pain; leaves rubbed on the chest for the treatment of asthma. Fresh young leaves eaten for intestinal pains.)

in English: stinging tree

in Indonesia: afa, daun gatal besar

in Papua New Guinea: ampiorura, buriyaveya, gofe, irongo, jajap, kalak, kauia, kauwa, lang, nakau, namboitna, nik, niki, nondi, nontz, nunt, pisi, salat, ton, yagwata, youta, zong

Laportea gigas Wedd. (*Urticastrum gigas* (Wedd.) Kuntze; *Urticastrum gigas* Kuntze)

Australia.

See *Archives du Muséum d'Histoire Naturelle* 9: 129, t. 3. 1856, *Revisio Generum Plantarum* 2: 635. 1891

(Injuries to man and animals, severe urtication from contact with the hollow hairs on the leaves and green stems.)

Laportea interrupta (L.) Chew (*Boehmeria interrupta* (L.) Willd.; *Boehmeria interrupta* Willd.; *Boehmeria interrupta* Guill.; *Fleurea interrupta* (L.) Wight, nom. illeg.; *Fleurya interrupta* Gaudich.; *Fleurya interrupta* (Juss.) Gaudich.; *Fleurya interrupta* (L.) Gaudich.; *Schychowskia interrupta* (L.) W. Wight; *Urtica interrupta* L.; *Urtica interrupta* Jacq. ex Blume; *Urtica interrupta* Noronha; *Urtica lomatorcarpa* Steud.; *Urtica lomatorcarpa* Hochst. ex Steud.)

Cosmopolitan, Old World tropics. Annual herb or shrublet, monoecious, erect, woody based, branched, irritant hairs, leaves ovate, inflorescence bisexual paniculate, small greenish white cream flowers, edge of forest and riverine, on wet rocky slopes, along river

See *Species Plantarum* 2: 983–985. 1753, *Enumeratio Systematica Plantarum* 9, 31. 1760, *Verh. Batav. Genootsch. Kunst.* 5(Art. 4): 28. 1790, *Species Plantarum*. in Vietnam: han, m[as]n

in Pacific: palilalia

in Samoa: ogoogo

Laportea kusaiana Kaneh. (*Dendrocnide kusaiana* (Kanch.) Chew)

Pacific, Kusai Island. Hairy leaves

See *Botanical Magazine* (Tokyo) 46: 449. 1932, *The Gardens' Bulletin Singapore* 21(2): 203. 1965

(Poisonous, skin irritation.)

Laportea latifolia Gaudich. (*Dendrocnide latifolia* (Gaudich.) Chew)

Pacific. See also *Dendrocnide latifolia*

See *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... Botanique* t. 81. 1844 and *The Gardens' Bulletin Singapore* 21(2): 203. 1965, *International Journal of Crude Drug Research* 20: 169–181. 1982

(Irritant stinging hairs. Leaves analgesic, rubbed on body bruises and pains. A decoction of the leaves drunk to relieve a headache. Boiled leaves applied to itchy skin.)

in Papua New Guinea: katche

Laportea moroides Wedd. (*Dendrocnide moroides* (Wedd.) Chew)

Australia.

See *Archives du Muséum d'Histoire Naturelle* 9: 142. 1856 and *The Gardens' Bulletin Singapore* 21(2): 204. 1965

(Injuries to man and animals, severe urtication from contact with the hollow hairs on the leaves and green stems.)

Laportea ovalifolia (Schum. & Thonn.) Chew (*Fleurya ovalifolia* (Schum. & Thonn.) Dandy; *Fleurya ovalifolia* (Schumach.) Dandy; *Fleurya podocarpa* Wedd.; *Haynea ovalifolia* Schumach.; *Haynea ovalifolia* Schum. & Thonn.; *Laportea ovalifolia* (Schumach.) Chew)

Tanzania. Perennial herb, stoloniferous, fleshy, spreading, ascending or straggling, creeping, rooting at the nodes, male flower stalks erect, leaves with short stinging hairs on the upper surfaces and nerves below, inflorescence unisexual, male and female flowers separate, male inflorescence paniculate, female inflorescence shortly racemose or paniculate, anthers split open explosively as the filaments uncurl, young leaves boiled and eaten in small amounts, invasive noxious weed, found in swamp forests, in disturbed habitats, along streams, swampy bushland

See *Species Plantarum*. Editio quarta 3(3): 1787. 1803, *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 497. 1826, *Beskrivelse af Guineiske planter* 406. 1827, *Prodr.* (DC.) 16(1): 76. 1869 and *The Flowering Plants of the Anglo-Egyptian Sudan* 2: 277. 1952, *The Gardens' Bulletin Singapore* 21(2): 201. 1965

(Irritating. Leaves pounded, soaked in water and the infusion drunk to help deliver the placenta after childbirth; leaves used as a hemostatic on cuts and wounds, as an anti-irritant, diuretic, to relieve headache; cooked leaves eaten as a remedy for stomachache and cooked with peanuts given to pregnant women. The fruit used as a poison antidote. Roots decoction drunk to prevent excessive menstrual bleeding. Leaves as a fish poison. Ceremonial, used during initiation rituals.)

in Tanzania: lugeni, mpupu, nyaluvafya, pupu

Laportea peduncularis (Wedd.) Chew subsp. ***peduncularis*** Chew (*Fleurya mitis* N.E. Br.; *Fleurya mitis* Wedd.; *Laportea caffra* Chew)

Tropical Africa.

See *Ann. Sci. Nat., Bot.* sér. 4, 1: 183. 1854 and *Gard. Bull. Singapore* 21: 201. 1965, *The Gardens' Bulletin Singapore* 25(1): 155, f. 15. 1969, *Boletim da Sociedade Broteriana* sér. 2, 58: 206. 1985

(Leaves for headache and mouth infections.)

Laportea photiniphylla (Kunth) Wedd. (*Dendrocnide photiniphylla* (Kunth) Chew; *Dendrocnide photiniphylla* (Kunth) Chew; *Fleurya photiniphylla* Kunth; *Urtica photiniphylla* A. Cunn. ex Wedd.; *Urtica photiniphylla* Wedd.; *Urticastrum photiniphylla* (Kunth) Kuntze; *Urticastrum photiniphylla* Kuntze)

Pacific, Samoa, Australia.

in English: European stickseed

in China: he shi

Larix Miller Pinaceae

From the Latin classical name *larix*, *icis* ‘a larch, larch tree’, used by Plinius and Vitruvius; see *The Gardeners Dictionary* ... Abridged ... fourth edition vol. 2. 1754 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 651. 1913, P. Sella, *Glossario latino italiano*. Stato della Chiesa - Veneto - Abruzzi. Città del Vaticano 1944.

Larix americana Michx.

North America. Perennial tree

See *Flora Boreali-Americana* (Michaux) 2: 203. 1803, *Rep. (Annual) Regents Univ. State New York New York State Mus.* 47: 160 (reprint 34). 1894

(Inner bark decoction applied to sores and swellings.)

Larix laricina (Du Roi) K. Koch (*Larix alaskensis* W. Wight; *Larix laricina* (Du Roi) K. Koch var. *alaskensis* (W. Wight) Raup; *Pinus laricina* Du Roi)

North America. Perennial tree

See *Species Plantarum* 2: 1000–1002. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition vol. 2. 1754, *Observationum Botanicarum* 49. 1771, *Dendrologie* 2(2): 263. 1873 and *Smithsonian Miscellaneous Collections* 50: 174. 1908, *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 6: 105. 1947, *Taxon* 29: 535. 1980, *Memoirs of the Faculty of Education, Ehime University, Series e, Natural Science* 8: 1–108. 1988, *Kromosomo* 58: 1979–1987. 1990

(Decoction of boughs taken as a diuretic, laxative. Used for coughs, colds, infections, tuberculosis, kidney troubles, burns, sores and swellings, rheumatism, soreness, anemic conditions. Veterinary medicine.)

in English: American larch, black larch, hackmatack, larch, tamarack

Larix occidentalis Nutt.

North America. Perennial tree

See *The North American Sylva* 3: 143, pl. 120. 1849

(The mucilaginous gum from the tree used for tuberculosis, colds, coughs, cuts and bruises, sores, severe arthritis. A sweet syrup from the sap used as expectorant. Hardened sap chewed like gum for sore throat.)

in English: tamarack, western larch

Larrea Cav. Zygophyllaceae

For Juan Antonio Hernández de Larrea, a patron of science, *Anales de Historia Natural* 2(4): 119–124, pl. 18–19. 1800 and *Darwiniana* 17: 474. 1972.

Larrea divaricata Cav. (*Covillea divaricata* (Cav.) Vail; *Neoschroetera divaricata* (Cav.) Briq.; *Schroeterella divaricata* (Cav.) Briq.)

South America.

See *Icones et Descriptiones Plantarum, quae aut sponte* ... 6: 40. 1801, *Bulletin of the Torrey Botanical Club* 22(5): 229. 1895 and *Candollea* 2: 514. 1926, “Zygophyllaceae, flora of Peru.” *Field Mus. Nat. Hist., Bot. Ser.* 13(3/2): 647–654. 1949

(Used for headache, aching feet, swellings, sore throat, dizziness. Leaves and green stems antioxidant. Lac contraceptive.)

Common names: creosote bush, gobernadora, hediondilla

Larrea tridentata (Sessé & Moc. ex DC.) Coville (*Covillea tridentata* (Sessé & Moc. ex DC.) Vail; *Larrea divaricata* subsp. *tridentata* (Sessé & Moc. ex DC.) Felger & Lowe; *Larrea tridentata* Coville; *Larrea tridentata* (DC.) Coville;

Larrea tridentata J.M. Coult.; *Neoschroetera tridentata* (Sessé & Moc. ex DC.) Briq.; *Schroeterella tridentata* (Sessé & Moc. ex DC.) Briq.; *Zygophyllum tridentatum* Sessé & Moc. ex DC.)

Mexico. Perennial shrub

See *Species Plantarum* 1: 385–386. 1753, *Anales de Historia Natural* 2: 119, 122, pl. 19. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 706. 1824, *Contributions from the United States National Herbarium* 4: 75. 1893, *Bulletin of the Torrey Botanical Club* 22: 229. 1895 and *Bibliotheca Botanica* 87: 157. 1916, *Veröffentlichungen des Geobotanischen Institutes Rübel in Zürich* 3: 664. 1925, *Candollea* 2: 514. 1926, *Plant Systematics and Evolution* 126: 331–346. 1977, *Heredity; An International Journal of Genetics* 63: 321–328. 1989, Verástegui M.A., Sánchez C.A., Heredia N.L., García-Alvarado J.S. “Antimicrobial activity of extracts of three major plants from the Chihuahuan desert.” *J. Ethnopharmacol.* 52(3): 175–177. 1996

(Used for arthritis as a poultice; leaves and stem infusion antimicrobial, antiseptic, vulnerary, used for stomach and intestinal pain.)

Common names: chaparral, creosote bush, gobernadora, hediondilla

Larrea tridentata (Sessé & Moc. ex DC.) Coville var. ***tridentata*** (*Covillea tridentata* (DC.) Vail; *Larrea divaricata* auct. non Cav.; *Larrea divaricata* Cav. subsp. *tridentata* (DC.) Felger & C.H. Lowe; *Larrea glutinosa* Engelm.; *Larrea mexicana* Moric.)

Mexico. Perennial shrub

See *Species Plantarum* 1: 385–386. 1753, *Anales de Historia Natural* 2: 119, 122, pl. 19. 1800, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 706. 1824, *Contributions from the United States National Herbarium* 4: 75. 1893, *Bulletin of the Torrey Botanical Club* 22: 229. 1895 and *Bibliotheca Botanica* 87: 157. 1916, *Veröffentlichungen des Geobotanischen Institutes Rübel in Zürich* 3: 664. 1925, *Candollea* 2: 514. 1926, *Plant Systematics and Evolution* 126: 331–346. 1977, *Heredity; An International Journal of Genetics* 63: 321–328. 1989, *J. Ethnopharmacol.* 52(3): 175–177. 1996

(Used for arthritis, as a poultice also on poisonous bites and sores; leaves and stem infusion antimicrobial, antiseptic, vulnerary, used for stomach and intestinal pain.)

Common names: chaparral, creosote bush, gobernadora, hediondilla

Lasia Lour. Araceae

From the Greek *lasios* ‘shaggy, woolly, rough, hairy’, referring to the leaf stalk, see *Flora Cochinchinensis* 1: 64, 81. 1790.

Lasia spinosa (L.) Thwaites (*Dracontium spinosum* L.; *Lasia aculeata* Lour.; *Lasia crassifolia* Engl.; *Lasia crassifolia*

f. *angustisecta* Engl.; *Lasia crassifolia* f. *latisecta* Engl.; *Lasia desciscens* Schott; *Lasia hermannii* Schott; *Lasia heterophylla* Schott; *Lasia heterophylla* (Roxb.) Schott; *Lasia jenkinsii* Schott; *Lasia loureiroi* Schott, nom. illeg.; *Lasia roxburghii* Griff.; *Lasia spinosa* Thwaites; *Lasia zollingeri* Schott; *Pothos heterophyllus* Roxb., nom. nud.; *Pothos lasia* Roxb.; *Pothos spinosus* (L.) Buch.-Ham. ex Wall.; *Pothos spinosus* Buch.-Ham. ex Wall.)

Trop. & Subtrop. Asia. Undershrub, stout, prickly marsh herb, underground stem, creeping rhizome, hastate leaves, short cylindrical scarlet spadix, rhizome/corm eaten after boiling, young leaves used as vegetables

See *Species Plantarum* 2: 967–968. 1753, *Flora Cochinchinensis* 1: 64, 81. 1790, *Hortus Bengalensis*, or a catalogue ... 83. 1814, *Fl. Ind.*, ed. Carey & Wall, i. 458. 1820, *Numer. List* [Wallich] n. 4447 C. 1831, *Fl. Ind.*, ed. Carey, i. 438. 1832, *Meletemata Botanica* 1: 21. 1832, *Notulae ad Plantas Asiaticas* 3: 155. 1851, *Bonplandia* 5: 125. 1857, *Ann. Mus. Bot. Lugduno-Batavi* 1: 127. 1863, *Enumeratio Plantarum Zeylaniae* [Thwaites] 336. 1864, *FBI* 6: 550. 1893, *Bot. Jahrb. Syst.* 25(1–2): 15. 1898 and *Bull. Bot. Survey India* 18(1–4): 32. 1976, *Cytologia* 43: 289–303. 1978, *Blumea* Suppl. 8: 1–161. 1995

(Rhizomes used for abortion, treatment of lymphadenitis, piles, stomachache, snake and insect bites, injuries and rheumatism; powder of rhizome with lime on swellings; rhizome cooked and eaten as a tonic; rhizomes decoction mixed with sugar taken orally for poisoning; roots a remedy for affection of throat. A decoction of leaves of *Cinnamomum tamala* with roots of *Lasia spinosa* given in rheumatism. Crushed leaves applied to cuts and injuries as hemostatic; leaf juice taken to kill intestinal parasites and to get relief from menstrual pain; a preparation from leaf juice abortifacient; leaves and roots a remedy for piles. Veterinary medicine, juice of leaves and petioles mixed with water fed to cattle against throat infections. Magic, ritual, flowers of *Elaeagnus latifolia* with roots of *Lasia spinosa* and *Machilus bombycina* pounded and made into pills used against sorceries.)

in China: ci yu

in India: chu-chat, kanta kachu, kanta kanda, kanta-saru, kantasaru, timulana, torangtong

in Malaysia: bekil, geli-geli

Lasianthaea DC. Asteraceae

Greek *lasios* ‘shaggy, woolly’ and *anthos* ‘flower’, see *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 607–608. 1836.

Lasianthaea fruticosa (L.) K.M. Becker (*Bidens frutescens* Mill.; *Bidens fruticosa* L.; *Lasianthaea fruticosa* var. *villosa* (Pol.) B.L. Turner; *Lipochaeta monocephala* DC.; *Narvalina fruticosa* (L.) Urb.; *Verbesina fruticosa* (L.) L.; *Zexmenia*

costaricensis Benth.; *Zexmenia costaricensis* var. *villosa* (Pol.) S.F. Blake; *Zexmenia elegans* Sch. Bip. ex W.W. Jones; *Zexmenia elegans* var. *kellermannii* Greenm.; *Zexmenia frutescens* (Mill.) S.F. Blake; *Zexmenia frutescens* var. *genuina* S.F. Blake; *Zexmenia frutescens* var. *villosa* (Pol.) S.F. Blake; *Zexmenia fruticosa* Rose; *Zexmenia macropoda* S.F. Blake; *Zexmenia monocephala* (DC.) Sch. Bip.; *Zexmenia nicaraguensis* Benth. ex N.J.C. Muell.; *Zexmenia purpusii* Brandegee; *Zexmenia villosa* Pol.)

South America. Herbaceous weed

See *Species Plantarum* 2: 833. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 610. 1836, *Nomenclator Botanicus* ed. 3 2: 772. 1846, *The Botany of the Voyage of H.M.S. ~Herald~* 306. 1856, *Linnaea* 41(5–6): 579. 1877, *Contributions from the United States National Herbarium* 1: 103. 1891 and *University of California Publications in Botany* 6(4): 75. 1914, *Journal of Botany, British and Foreign* 53: 14. 1915, *Contributions from the Gray Herbarium of Harvard University* 52: 51. 1917, *Phytologia* 31(3): 297. 1975, *Phytologia* 69(5): 372. 1990

(Stem poultice applied to insect bites.)

Lasianthaea podocephala (A. Gray) K.M. Becker (*Verbesina podocephala* A. Gray; *Zexmenia podocephala* (A. Gray) A. Gray) (*Zexmenia* La Llave & Lex., an anagram of the surname of Francisco Ximenez.)

North America. Perennial herb, large tuberous roots

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 607–608. 1836, *Smithsonian Contributions to Knowledge* 5(6): 92. 1853, *Synoptical Flora of North America* 1(2): 286. 1884 and *Memoirs of the New York Botanical Garden* 31(2): 52. 1979

(Roots decoction for stomach disorders. Roots and leaves piscicide.)

in Mexico: geocuri, keyocuri

Lasianthus Jack Rubiaceae

Greek *lasios* 'shaggy, velvety, hairy' and *anthos* 'a flower', an allusion to the nature of the flowers, see *Familles des Plantes* 2: 398. 1763, *Transactions of the Linnean Society of London* 14(1): 125–126. 1823 and *Ann. Missouri Bot. Gard.* 69(2): 427–429. 1983, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

Lasianthus attenuatus Jack (*Lasianthus bordenii* Elmer ex Merr.; *Lasianthus densifolius* Miq.; *Lasianthus densifolius* var. *calycina* King & Gamble; *Lasianthus densifolius* var. *latifolia* King & Gamble; *Lasianthus plagiophyllus* Hance; *Lasianthus setosus* Craib; *Lasianthus thorelii* Pit.; *Lasianthus tonkinensis* (Drake) Pit.; *Lasianthus wallichii* Wight; *Lasianthus wallichii* (Wight & Arn.) Wight; *Lasianthus wallichii* subsp. *plagiophyllus* (Hance) C.Y.Wu &

H.Zhu; *Lasianthus wallichii* var. *glabriusculus* Deb & M.G. Gangop.; *Lasianthus wallichii* var. *hispidocostatus* H. Zhu; *Lasianthus wallichii* var. *setosus* (Craib) C.Y.Wu & H.Zhu; *Mephitidia attenuata* (Jack) DC.; *Mephitidia inaequalis* Zoll. ex Miq.; *Mephitidia plagiophylla* (Hance) Nakai; *Mephitidia tonkinensis* Drake; *Mephitidia wallichii* Wight & Arn., nom. illeg.; *Nonatelia attenuata* (Jack) Kuntze; *Nonatelia densifolia* (Miq.) Kuntze; *Nonatelia hispida* Wall.)

Tropical Asia. Treelet

See *Trans. Linn. Soc. London* 14: 126. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 452. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 390. 1834, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 6: 503. 1846, *Revisio Generum Plantarum* 1: 291. 1891, *J. Bot.* (Morot) 9: 240. 1895 and *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 73: 122. 1904, *Fl. Indo-Chine* 3: 376, 389. 1924, *Bull. Misc. Inform. Kew* 1933: 26. 1933, *J. Bombay Nat. Hist. Soc.* 84: 462. 1987 (publ. 1988), *Acta Phytotax. Sin.* 32: 5. 1994, *Acta Bot. Yunnan.* 20: 158. 1998

(Smelled inhaled crushed leaves inducing hallucinogenic effects.)

in India: ruihthing

Lasianthus cyanocarpus Jack (*Lasianthus cyanocarpus* var. *asperatus* Pierre ex Pit.; *Lasianthus cyanocarpus* var. *bracteatus* Pit.; *Mephitidia bracteata* (Wight) Walp.; *Mephitidia cyanocarpa* (Jack) DC.; *Mephitidia rhinozerotis* Kurz; *Mephitidia roxburghii* Wight & Arn.; *Nonatelia cyanocarpa* (Jack) Kuntze)

India, Trop. & Subtrop. Asia.

See *Transactions of the Linnean Society of London* 14(1): 125–126. 1823[1825], *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 452. 1830, *Prodr. Fl. Ind. Orient.*: 390. 1834, *Ann. Bot. Syst.* 2: 759. 1852, *Rep. Veg. Andaman Isl.*, App. A: 40. 1870, *Revisio Generum Plantarum* 1: 291. 1891 and *Fl. Indo-Chine* 3: 381–382. 1924

(Leaf paste applied on fractured bone.)

in India: loi

Lasianthus filiformis King & Gamble (*Litosanthes filiformis* (Ridl.) Deb & M.G. Gangop.)

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(3): 131. 1904, *Candollea* 44: 222. 1989

(Roots decoction as a postpartum remedy.)

Malay name: sekentut

Lasianthus hirsutus (Roxb.) Merr. (*Lasianthus bracteatus* Wight; *Lasianthus cyanocarpus* var. *lucidulus* Pierre ex Pit.; *Lasianthus everettii* Merr.; *Lasianthus laevicaulis* Kurz; *Lasianthus oculus-cati* Miq.; *Lasianthus oculus-cati* var.

polyneura Miq.; *Lasianthus oculus-rati* Miq.; *Lasianthus roxburghii* Wight; *Triosteum hirsutum* Roxb.)

India. Shrub or treelet, white flowers

See *Fl. Ind.* 1: 538. 1820, *Flora Indica*; or descriptions of Indian Plants 2: 180. 1824, *J. Nat. Hist.* 6: 501–502. 1846, *Fl. Ned. Ind.* 2: 315. 1857, *J. Bot.* 13: 327. 1875 and *Philipp. J. Sci.*, C 3: 265. 1908, *Fl. Indo-Chine* 3: 382. 1924, *Journal of the Arnold Arboretum* 33(3): 229. 1952

(Crushed leaves juice applied on cuts and wounds.)

in India: thingchangnei

Lasianthus kilimandscharicus K. Schum.

Kenya, Tanzania. Shrub, axillary flowers, white corolla, mauve-blue calyx

See *Die Pflanzenwelt Ost-Afrikas* C: 393, 396. 1895 and *Nordic J. Bot.* 23(6): 675. 2006

(Roots decoction as a postpartum remedy.)

Lasianthus maingayi Hook.f. (*Lasianthus caloneurus* K. Schum.; *Lasianthus flavicans* King & Gamble; *Lasianthus flavicans* var. *subglabra* King; *Lasianthus maingayi* Kuntze; *Lasianthus maingayi* var. *subglaber* (King) Ridl.; *Nonatelia maingayi* Kuntze; *Nonatelia maingayi* (Hook.f.) Kuntze)

Thailand. Small treelet

See *Fl. Brit. India* [J.D. Hooker] 3: 188. 1880, *Revis. Gen. Pl.* 1: 63, 291. 1891 and *Bot. Tidsskr.* 24: 339. 1902, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 73(3): 116. 1904, *Fl. Malay Penins.* 2: 160. 1923

(Roots boiled together with roots of *Cyrtandra oblongifolia* and the liquid drink as abortifacient and for menstrual irregularity.)

Lasianthus oblongus King & Gamble

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(3): 127. 1904

(Roots decoction as a postpartum remedy.)

Malay name: temberak hutan

Lasianthus sikkimensis Hook.f. (*Lasianthus baviensis* Pit.; *Lasianthus baviensis* (Drake) Pit.; *Lasianthus langkokensis* Pit.; *Lasianthus langkokensis* (Drake) Pit.; *Lasianthus sikkimensis* subsp. *langkokensis* (Pit.) H. Zhu; *Lasianthus tsangii* Merr. ex H.L. Li; *Mephitidia baviensis* Drake; *Mephitidia langkokensis* Drake; *Nonatelia sikkimensis* Kuntze; *Nonatelia sikkimensis* (Hook. f.) Kuntze)

Himalayas. Small shrub, coriaceous elliptic-lanceolate leaves, white flowers in axillary clusters

See *Fl. Brit. India* [J.D. Hooker] 3(7): 180. 1880, *Revisio Generum Plantarum* 1: 291. 1891, *J. Bot.* (Morot) 9: 239–240.

1895 and *Fl. Indo-Chine* [P.H. Lecomte et al.] 3: 379–380. 1924, *J. Arnold Arbor.* 24: 457. 1943, *Acta Phytotax. Sin.* 32(1): 61. 1994

(Green stems used for mouth problems, tooth decay, and for blackening the teeth.)

in India: chaeik-batau

Lasianthus stipularis Blume (*Mephitidia stipularis* (Blume) DC.; *Nonatelia stipularis* (Blume) Kuntze)

Indonesia, Myanmar, Malaysia.

See *Bijdr.*: 997. 1826, *Nova Genera et Species Plantarum seu Prodromus* 4: 453. 1830, *Revis. Gen. Pl.* 1: 291. 1891

(Leaves for boils.)

Malay name: ubat barah

Lasianthus villosus Ridl. (*Litosanthes villosa* (Ridl.) Deb & M.G. Gangop.)

Malaysia.

See *Catalogus ...* 21–22. 1823 *J. Straits Branch Roy. Asiat. Soc.* 79: 86. 1918, *Candollea* 44: 233. 1989

(Roots decoction as a postpartum remedy.)

Malay name: medang

Lasimorpha Schott Araceae

From the Greek *lasios* ‘shaggy, woolly, rough, hairy’ and *morphe* ‘a form, shape’, genus *Lasia*; see *Bonplandia* (Hannover) 5(8): 127. 1857 and D.H. Nicolson, “Derivation of Aroid Generic Names.” *Aroideana*. 10: 15–25. 1988, Mayo, S.J., Bogner, J. & Boyce, P.C. *The Genera of Araceae*. Royal Botanic Gardens, Kew, United Kingdom. 1997.

Lasimorpha senegalensis Schott (*Cyrtosperma afzelii* (Schott) Engl.; *Cyrtosperma senegalense* (Schott) Engl.; *Lasimorpha afzelii* Schott)

Tropical Africa. Herb, spiny, short thick rhizome, inflorescence a cylindrical purplish spadix, spathe interior yellow-maroon, warty seeds strongly curved, famine food, young leaves eaten as a vegetable, leaf petioles eaten by gorillas, see also *Cyrtosperma senegalense*

See *Genera Aroidearum* exposita t. 85, f. 11. 1858, *Monographiae Phanerogamarum* 2: 269–270. 1879

(Fruits for gonorrhoea and dysentery. Leaves given to women during childbirth to accelerate delivery. Rhizomes analgesic and sedative, to treat ulcers, cough, nervousness.)

in English: swamp arum

in Central African Republic: kakawa

in Gabon: bin bon bon, ntinouriosa, sel indigène

Lasiocephalus Willd. ex Schltld. Asteraceae

From the Greek *lasios* 'shaggy, woolly, hairy' and *kephale* 'head', see *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 8: 308–309. 1814, *Dict. Sci. Nat.* 48: 447, 453. 1827.

Lasiocephalus ovatus Schltld. (*Culcitium ovatum* (Schltld.) S.F. Blake; *Culcitium reflexum* Kunth; *Culcitium sodiroi* Hieron.; *Culcitium uniflorum* (Lam.) Hieron.; *Gnaphalium uniflorum* Lam.; *Lasiocephalus sodiroi* (Hieron.) Cuatrec.; *Senecio reflexus* (Kunth) Cuatrec., hom. illeg.; *Senecio sodiroi* (Hieron.) Cuatrec.; *Senecio superandinus* Cuatrec.)

South America.

See *Encyclopédie Méthodique, Botanique* 2: 752. 1788, *Nova Genera et Species Plantarum* (folio ed.) 4: 134, 142–143, t. 362. 1820[1818], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 63. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29: 63. 1900, *Journal of the Washington Academy of Sciences* 27: 389. 1937, *Fieldiana, Botany* 27(1): 44–45. 1950, *Fieldiana, Botany* 27(2): 38. 1951, *Phytologia* 69(5): 313. 1990

(Diuretic.)

Lastreopsis Ching Dryopteridaceae (Aspleniaceae, Aspidiaceae)

The genus *Lastrea* and Greek *opsis* 'looking like, resembling'; see R.-C. Ching, *Bulletin of the Fan Memorial Institute of Biology*. 8: 157. 1938.

Lastreopsis efulensis Tardieu (*Ctenitis efulensis* (Baker) Tardieu; *Ctenitis efulensis* Tardieu; *Dryopteris efulensis* H. Christ; *Dryopteris efulensis* (Baker) H. Christ; *Lastreopsis efulensis* (Baker) Tardieu; *Polypodium efulense* Baker)

Gabon.

See *Species Plantarum* 2: 1082–1094. 1753, *Familles des Plantes* 2: 20. 1763 and *Bulletin of the Fan Memorial Institute of Biology*: 8(4): 157–159. 1938, *Manual of Pteridology* 544. 1938, *Journal of Ethnopharmacology* 41: 193–200. 1994

(Leaves as heart sedative, tonic.)

in Gabon: ditsenguigui

Lathyrus L. Fabaceae (Vicieae)

From the ancient Greek name used by Theophrastus (*HP.* 8.3.1) for a pea or pulse, chickling, *Lathyrus sativus* L., *lathyros*, (*la* 'very' and *thoures* 'a stimulant'); Latin *lathyros*, *i* 'a plant, *Leontopodium*' (Pseudo Apuleius Barbarus, *Herbarium* 7); see Carl Linnaeus, *Species Plantarum*. 2: 728–734. 1753, *Genera Plantarum*. Ed. 5. 326. 1754, *Flore de France* 1: 485.

1848, *The Flora of British India* 2: 180. 1879 and *Feddes Repertorium* 82(6): 433. 1971, *Taxon* 41: 565. 1992, *Taxon* 44: 611–612. 1995, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 329. Basel 1996.

Lathyrus aphaca L. (*Lathyrus aphaca* var. *affinis* (Guss.) Arcang.; *Orobus aphaca* (L.) Doll)

India, Mediterranean. Annual non-climbing herb, seed as famine food, fodder, tender leaves and shoots cooked and eaten as vegetable

See *Species Plantarum* 2: 728–734. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Florula belgica*, opera majoris prodromus, auctore ... 103. 1827, *Spicilegium florum rumelicarum et bithynicarum* ... 1: 74. 1843, *Flore de France* 1: 485. 1848, *The Flora of British India* 2: 180. 1879 and *Journal of Cytology and Genetics* 2: 128–140. 1967, *Chromosoma* 54: 141–154. 1976, *Recent Res. Pl. Sci. (New Delhi)* 7: 252–260, 1979, *Informatore Botanico Italiano* 13: 158–167. 1981, *Trop. Plant Sci. Res.* 1: 1–13. 1983, *Japanese Journal of Breeding* 34: 273–284. 1984, *Proceedings of the Indian Science Congress Association* 75(3-vi): 217. 1988, *Journal of Cytology and Genetics* 25: 173–219. 1990, *Watsonia* 20: 63–66. 1994, *Annals of the Missouri Botanical Garden* 81: 792–799. 1994, *Caryologia* 48(1): 47–63. 1995, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 18–20. 1997

(Toxins. Ripe seeds narcotic, poisonous.)

in English: yellow pea, yellow vetch, yellow vetchling

in Arabic: hamam el-burg

in China: ye zhou xiang wan dou

in India: chikka thogari, gagla, jangali matar, jangli-matar, jangli matter, janglimatar, junglee matar, kaibu, kurphali, pili matari, pili matter, rawan, rawari, rewan, rewari

in Nepal: jangali matar, kaibu

Lathyrus emodi (Fritsch) Ali (*Lathyrus emodi* Fritsch; *Lathyrus emodi* Ali; *Lathyrus emodi* (Wall. ex Fritsch) Ali; *Lathyrus laevigatus* Arechav.; *Lathyrus laevigatus* Fritsch; *Lathyrus laevigatus* sensu Sanjappa; *Lathyrus laevigatus* (Waldst. & Kit.) (Used in Ayurveda and Unani. The plant is reported to be poisonous to stock. Seeds cathartic, poisonous. Ingesting the seeds for 3–6 months can cause neurolathyrism, a syndrome characterized by muscular rigidity, weakness, and paralysis of the leg muscles. In severe cases, victims may be reduced to crawling. Young men between 20 and 30 years old are primarily affected. Livestock may also develop paralysis if they ingest grass pea for a long time. BOAA (beta-N-oxalylamino-L-alanine) is generally regarded as the cause of neurolathyrism.)

in English: Black Sea pulse, chickling pea, chickling vetch, chickling vetchling, dogtooth pea, grass pea, grass peavine, Indian pea, khesari, matter pea, Riga pea, white vetch

in Pakistan: shamahur

Launaea nana (Baker) Chiov. (*Lactuca cabrae* De Wild.; *Lactuca nana* Baker; *Launaea elliotiana* (Hiern) Boulos; *Launaea nanella* (R.E. Fr.) Boulos; *Launaea violacea* (O. Hoffm.) Boulos; *Sonchus elliotianus* Hiern; *Sonchus nanel-lus* R.E. Fr.; *Sonchus nanus* O. Hoffm.; *Sonchus violaceus* O. Hoffm.)

Tropical Africa.

See *Bulletin of Miscellaneous Information Kew* 1895: 17. 1895, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 1: 623. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 443. 1901, *Ann. Mus. Congo*, ser. 5 2: 217. 1907, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 108. 1916, *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911–1912, unter Leitung von Eric Graf von Rosen* 1: 351. 1916, *Botaniska Notiser* 115: 58. 1962, *Flora Zambesiaca* 6(1): 217. 1992

(Leaves for yellow fever, venereal diseases, colds, coughs, flu, fevers.)

Launaea nudicaulis (L.) Hook. f. (*Chondrilla nudicaulis* L.; *Launaea nudicaulis* Less.)

Iran, Egypt. Small herb, yellow flower heads

See *Species Plantarum* 2: 796–797. 1753, *Mant. Pl. Altera* 278. 1771, *The Flora of British India* [J.D. Hooker] 3: 416. 1881 and *CIS Chromosome Inform. Serv.* 20: 32–33. 1976, *Recent Res. Pl. Sci.* (New Delhi). 7: 261–271. 1979, *J. Palynol.* 16: 85–105. 1980, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994

(Leaves applied to the heads of children to relieve headache or fever. Fruits as a blood purifier, also for boils. Magico-religious beliefs, roots worn on the neck against ghosts and evil spirits.)

in India: bandobhi, dudhlak, ehzuttanippundu, gangli gobi, nahodibangosi, nakurbangosi, rakkosasa

in Pakistan: alku

Launaea sarmentosa (Willd.) Sch. Bip. ex Kuntze (*Launaea bellidifolia* Cass.; *Launaea pinnatifida* Cass.; *Launaea sarmentosa* (Willd.) Alston; *Launaea sarmentosa* (Willd.) (Used in Sidha. Plant juice lactagogue and useful for rheumatism. Leaves used as soporific for children; leaf paste for wounds. Juice of leaves and flowers taken with boiled water for indigestion. Veterinary medicine, fed to cows, buffaloes as a galactagogue.)

in India: alantari, antecolikam, antecolikappuntu, banapatri, bhonpathri, celvilippuntu, celvilipputu, centakam, centalaiputu, centam, cinnaveluttanicceti, cinnaveluttanippuntu, cirreluttanippuntu, cirukirankippuntu, ciruveluttani, civatakai, civatakaippuntu, civatankai, eluttani, eluttanikkur, eluttanippaccai, eluttanippaccilai, eluttanippuntuceti, emanatimuli, galgibhi, hakkarike, hattharige, kaadu udda navilukolu, kaittalam, kaittalappuntu, kanta gohira, karuvanci, katar-koluppai, katarkoluppuntu, kattamam, kattanavi, kattari, kattarippuntu, katuki, katukippuntu, kokkarikam, kolakayam, kolakayappuntu, korikai, korikaippuntu, korikkalam, korikkam, korikkati, kotari, kotaricceti, kotarippuntu, matankaiputu, murreruntincevi, muttirukkancevi, paathradi, paattha, paathharee, pattiracuram, vettukkayapoonda

Launaea taraxacifolia (Willd.) Amin ex C. Jeffrey (*Lactuca taraxacifolia* (Willd.) Schumach. ex Hornem.; *Lactuca taraxacifolia* Schumach.; *Lactuca taraxacifolia* Khalk.; *Sonchus taraxacifolius* Willd.)

Senegal, Ethiopia and Tanzania. Herb, erect, woody-based, creeping root system, leaves at base of plant in a rosette, golden yellow flowers all ligulate, branched synflorescence, wild yanrin leaves hard and very bitter, tender leaves eaten fresh or cooked, in disturbed localities, in open savanna, grassland

See *Species Plantarum* 2: 795–796. 1753, *Species Plantarum*. Editio quarta 3: 1511. 1804, *Beskr. Guin. Pl.* 380. 1827 and *Kew Bulletin* 18(3): 474. 1966, *Bot. Mater. Gerb. Inst. Bot. Akad. Nauk Uzbeksk. S.S.R.* 19: 59. 1974, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987

(Leaves and whole plant febrifuge, antibacterial, for infertility, arthritis, yaws and skin diseases. A leaf extract mixed with breast milk of a nursing mother administered to cure partial blindness resulting from snake spit. Leaves rubbed on the limbs of late developing children to induce them to walk. Veterinary medicine, plants fed to nursing cattle to increase milk production, and given to livestock to induce multiple births.)

in English: African lettuce, wild lettuce, yanrin

Launaea tomentella Rech. f. (*Launaea acanthodes* subsp. *tomentella* (Rech.f.) N. Kilian)

Iran.

See *K. Danske Vid. Selsk., Biol. Skrift.*, viii. No. 2 (*Symb. Afghan.* II.) 202. 1955, Parsa, Ahmad (1907-), *Flore de l'Iran* 10: 204. Teheran: University of Teheran 1980, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994, *Englera* 17: 163. 1997

(Veterinary medicine, stems to relieve stomach problems and indigestion in goats.)

in Pakistan: chalar

Laurelia Juss. Atherospermataceae (Monimiaceae)

Spanish *laurel*, from Latin *laurus*; see *Novae Holl. Pl. Spec.* 2: 74. 1806, *Annales du muséum national d'histoire naturelle* 14: 134. 1809, *Saggio sulla Storia Naturale del Chili* ed. 2. 163, 297. 1810, *Encyclopédie Méthodique. Botanique ... Supplément* 3: 313. 1813, *A Voyage to Terra Australis* 2: 553. 1814 and *Taxon* 8: 310. 1959, R.N. Patel, in *New Zealand J. Bot.* 11: 587–598. 1973, R.F. Thorne, in *Aliso*. 8: 147–209. 1974, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987, W.R. Philipson, in *Nord. J. Bot.* 7: 25–29. 1987.

Laurelia novae-zelandiae Cunn.

New Zealand. Tree, wide flat buttresses, aromatic glossy dark green leaves, small greenish-yellow flowers in clusters

See *Ann. Nat. Hist.* 1(5): 381. 1838 and *BMC Complement. Altern. Med.* 10: 25. 2010

(Bark analgesic, anti-bacterial, inner bark steeped in hot water and the liquid used for running sores, chronic ulcers, toothache, neuralgia, for the treatment of tubercular lesions.)

Maori name: pukatea

Laurelia sempervirens (Ruiz & Pav.) Tul. (*Atherosperma sempervirens* (Ruiz & Pav.) Baill.; *Atherosperma sempervirens* Baill.; *Laurelia aromatica* Juss. ex Poir., nom. illeg.; *Laurelia sempervirens* (Ruiz & Pav.) Tul.; *Laurelia sempervirens* Tul.; *Laurelia serrata* Bertero; *Laurelia serrata* Phil., nom. illeg.; *Pavonia sempervirens* Ruiz & Pav.; *Pavonia sempervirens* Kuntze; *Theyga chilensis* Molina; *Thiga chilensis* Molina)

South America, Peru.

See *Systema Vegetabilium Florae Peruviana et Chilensis* 1: 253. 1798, *Encyclopédie Méthodique. Botanique ...* (Lamarck) *Supplément* 3: 313. 1813, *Mercurio Chileno* 15: 685. 1829, *Arch. Mus. Pl.* 2: 568. 1891 and *Pest Management Sci.* 66(12): 1324–1331. 2010

(Plant used in treating convulsions, nervous breakdown, hysteria, madness, paralysis, rheumatic pain. Leaves infusion drunk for rheumatic pain. Essential oils from leaf and bark used as insecticidal, aphicides.)

in Chile: laurel de Chile

Laureliopsis Schodde Monimiaceae

Resembling *Laurelia* Juss., close relationship to *Atherosperma* and taxonomic segregation from *Laurelia*; see *Parodiana* 2(2): 298–305. 1983, *Syst. Biol.* 49(3): 579–591. 2000.

Laureliopsis philippiana (Looser) Schodde (*Laurelia philippiana* Looser; *Laurelia serrata* Phil., nom. illeg.)

South America.

See *Mercurio Chileno* 15: 685. 1829, *Botanische Zeitung* (Berlin) 15: 401. 1857 and *Revista Asoc. Chilena Quimica y Farm.* 2(21): 9. 1934, *Parodiana* 2(2): 299. 1983, *Curr. Microbiol.* 40(2): 86–90. 2000, *Fitoterapia.* 80(2): 112–114. 2009

(Bisbenzylisoquinoline alkaloid.)

in English: Chilean tepa

Laurus L. Lauraceae

Laurus, *i*, and *laurus*, *us* the Latin names for the laurel or bay; Akkadian *larûm* ‘branch’, *darûm* ‘everlasting, enduring, perpetual’; Italian l’alloro from the Latin *illam laurum*; see Carl Linnaeus, *Species Plantarum.* 1: 369. 1753, *Genera Plantarum.* Ed. 5. 173. 1754, *Gen. N. Amer. Pl.* [Nuttall]. 1: 258. 1818, *Consp. Regn. Veg.* 87. 1828 and B. Migliorini, *Lingua d’oggi e di ieri.* Caltanissetta-Roma 1973, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana.* 1: 41. Zanichelli, Bologna 1979, Giovanni Semerano, *Le origini della cultura europea.* Dizionario della lingua Latina e di voci moderne. 2(2): 451–452. Firenze 1994.

Laurus fragrans Salisb.

South America.

See *Prodr. Stirp. Chap. Allerton* 344. 1796, *Prodr.* (DC.) 15(1): 244. 1864

(Seeds aromatic and stomachic.)

Laurus nobilis L. (*Laurus nobilis* Cav.; *Laurus nobilis* L. var. *latifolia* Nees; *Laurus nobilis* L. var. *rotundifolia* Emb. & Maire)

Europe.

See *Anal. Cienc. Nat.* iii. (1801) 55. 1801 and *Notul. Syst.* (Paris) 8: 67–128. 1939

(Used in Unani. Antispasmodic, antibacterial, antifungal, tonic, sedative, used for treating various neoplastic diseases, tumours of the liver, spleen, testicles, uterus and stomach.)

in English: bay, bay laurel, bay tree, Grecian laurel, laurel, Roman laurel, sweet bay, sweet bay tree, true laurel

in China: yue gui, yue gui zi

in India: hab-ul-ghar, hub-ul-ghar

in Japan: gekkei-ju

in Arabic: ghar, rand

Lavandula L. Lamiaceae (Labiatae)

Latin *lavo*, *as*, *lavi*, *lavatum*, *are* and *lavo*, *is*, *lavi*, *lautum*, *ere* ‘to wash’; Medieval Latin *lavendula* and *livendula*, possibly connected with *lividus*, *a*, *um* ‘bluish, blue’; see Carl Linnaeus, *Species Plantarum.* 2: 572–573. 1753 and *Genera Plantarum.* Ed. 5. 249. 1754 and *Thaiszia* 7: 75–88. 1997.

Lavandula angustifolia Mill. (*Lavandula angustifolia* Moench, nom. illeg.; *Lavandula officinalis* Chaix; *Lavandula vera* DC.; *Lavandula spica* DC.; *Lavandula spica* Cav., nom. illeg.; *Lavandula spicata* L.; *Lavandula vera* DC.)

India, Pakistan.

See *Species Plantarum* 2: 572. 1753, *The Gardeners Dictionary*: ... eighth edition no. 2. 1768, *Histoire des Plantes de Dauphiné* 1: 355. 1786, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 389. 1794, *Flore Française.* Troisième Édition Suppl. 5: 398. 1815

(Leaves and whole branches infusion carminative, stomachic, stimulant.)

in English: English lavender, common lavender, lavender, narrow-leaf lavender, true lavender

in Arabic: khuzama

in China: xun yi cao

Lavandula bipinnata Kuntze (*Bystropogon bipinnatus* Roth; *Chaetostachys multifida* Benth.; *Lavandula bipinnata* (Roth) Kuntze; *Lavandula bipinnata* var. *burmanniana* Kuntze; *Lavandula bipinnata* var. *intermedia* Kuntze; *Lavandula bipinnata* var. *rothiana* Kuntze; *Lavandula burmanni* Benth., nom. superfl.; *Lavandula multifida* Burm.f., nom. illeg.)

India.

See *Fl. Indica*: 126. 1768, *Nov. Pl. Sp.*: 225. 1821, *Pl. Asiat. Rar.* 2: 19. 1830, *Labiata. Gen. Spec.*: 151. 1833, *Revis. Gen. Pl.* 2: 521. 1891

(Used in Ayurveda. Pounded plant applied to remove skin outgrowths.)

in India: jaltai, sankhapuspi, sarpaari

Lavandula dentata L. (*Lavandula dentata* var. *vulgaris* Ging., nom. inval.; *Stoechas dentata* (L.) Mill.)

Saudi Arabia, NE. Trop. Africa. Shrub

See *Species Plantarum* 572. 1753

(Fresh leaves and flowers on forehead for headache, and on joints for rheumatic pain.)

in English: French lavender

in Arabic: dhurum, helhal, liazir

Lavandula pubescens Decne.

Mediterranean, Arabian Pen. Shrub

See *Ann. Sci. Nat., Bot.*, II, 2: 246. 1834

(Leaves and flowers a cold remedy.)

in Arabic: fux

Lavandula viridis L'Hér.

Europe.

See *Sertum Anglicum* 19. 1789

(Whole plant and inflorescence infusion for vascular disorders, influenza, headache.)

Lavatera L. Malvaceae

Named for members of the Lavater family of physicians and naturalists, or for the Swiss physician and naturalist Johann Heinrich Lavater (1611–1691) or for the Swiss physician Joannes Rodolphus Lavaterus, member of the Municipal Council (Zürich), naturalist, author of *Historiae Helveticae naturalis prolegomena* ... Praes. Johann Jakob Scheuchzer. Tiguri [Zürich] 1700, he was the father of the theologian and physiognomist Johann Caspar Lavater (1741–1801); Johann Jakob Scheuchzer, 1672–1733, was a native of Zürich, studied at Utrecht and Altdorf, before his death was promoted to the chair of medicine with the office of senior town physician, at Zürich; see *Alphabeti ex Diplomatus et Codicibus Thuricensibus Specimen*. Zürich 1730. See Carl Linnaeus, *Species Plantarum*. 2: 690–692. 1753, *Genera Plantarum*. Ed. 5. 308. 1754, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 503. 1852 and James A. Baines, *Australian Plant Genera*. An Etymological Dictionary of Australian Plant Genera. 209. Chipping Norton, N.S.W. 1981, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 331. Basel 1996, F.A. Sharr, *Western Australian Plant Names and Their Meanings*. A glossary. 42. University of Western Australia Press 1996.

Lavatera assurgentiflora Kellogg (*Althaea assurgentiflora* (Kellogg) Kuntze; *Saviniona assurgentiflora* (Kellogg) Greene; *Saviniona clementina* Greene; *Saviniona dendroidea* Greene; *Saviniona reticulata* Greene; *Saviniona suspensa* Greene)

USA (California), Mexico. See also *Malva assurgentiflora* (Kellogg) M.F. Ray

See *Species Plantarum* 2: 686–687. 1753, *Histoire Naturelle des Îles Canaries* 3(21): 30. 1836, *Proceedings of the California Academy of Sciences* 1: 14. 1854, *Revisio Generum Plantarum* 1: 66. 1891 and *Leaflets of Botanical Observation and Criticism* 2(8): 160–163. 1911, *Novon* 8(3): 290. 1998

(Leaves, flowers and root boiled in water and extract used as a purgative.)

in English: island mallow, malva rosa

in Ecuador: malva pectoral

Lavatera cachemiriana Cambess. (*Althaea cachemiriana* (Cambess.) Kuntze; *Althaea kashmiriana* Kuntze; *Lavatera cachemiriana* Cambess. var. *haroonii* Abedin; *Lavatera kashmiriana* Mast.)

India.

See *Voyage dans l'Inde* 4(Bot.): 29. 1841, *Fl. Brit. India* [J.D. Hooker] 1: 319. 1874, *Revis. Gen. Pl.* 1: 66. 1891 and *Pakistan J. Bot.*, 9(2): 157. 1977

(Roots for kidney troubles. Seeds antiseptic.)

in China: xin jiang hua kui

in India: wansochal

Lawsonia L. Lythraceae

After the Scottish army doctor Isaac Lawson, d. circa 1747 (in Holland), botanist, M.D. Leyden 1737. See Carl Linnaeus, *Species Plantarum*. 1: 349. 1753, *Genera Plantarum*. Ed. 5. 166. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 504. Ansbach 1852, *J. Linn. Soc., Bot.* xxv. (1890) 317. 1890 and J. Britten, *The Sloane Herbarium* ... revised and edited by J.E. Dandy. 153–154. London 1958, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 123. Berlin & Hamburg 1989.

Lawsonia inermis L. (*Lawsonia alba* Lam.; *Lawsonia speciosa* L.; *Lawsonia spinosa* Linn.; *Rotanthea combretoides* Bak.)

Tropical Africa. Slender shrub or small tree, multi-branched, old branchlets spiny, creamy white very fragrant flowers in terminal panicles, crisped petals, small globular fruits pale green becoming dry silvery with small black dots and persistent style, leaves used for skin decoration, colouring palms of hands and drawing

See *Species Plantarum* 1: 349. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 3(2): 106–107. 1792, *J. Linn. Soc., Bot.* xxv. (1890) 317 t. 41. 1890 and *Fl. W. Pakistan* 78: 5. 1975, *Journal d'Agriculture Traditionnelle et de Botanique Appliquée* 30: 69–89. 1983, *Dermatology Online Journal* 9(1): 3. 2003, *Harvard Pap. Bot.* 9(2): 302. 2005, *Indian J. Pharmacol.* 41(3): 129–133. 2009, *Bioorganic & Medicinal Chemistry Letters* 20(16): 4782–4784. 2010

(Used in Ayurveda, Unani and Sidha. Plant served as broad-spectrum vibriocidal agents, also used in the treatment of ringworm infections and skin related diseases. Bark for jaundice, skin diseases and enlargement of spleen; bark chewed and kept between the teeth to treat toothache. Roots pounded along with *neem* leaves (*Azadirachta indica*), coconut root and dried ginger, made into paste given to check diarrhea in babies; roots decoction used for inducing abortion; root paste given internally to terminate pregnancy. Root and leaves anthelmintic, also for the treatment of skin infections,

malaria. Leaves used for gonorrhoea, menorrhagia, leucorrhoea, headache, lumbago, bronchitis, boils, ulcers; leaf juice mixed with water and sugar given in spermatorrhoea; leaves crushed and mixed with fresh rhizome of *Curcuma domestica* and crushed bark of *Schleichera oleosa* and applied on sprains; leaves decoction as a postpartum remedy and for stomachache; leaf paste mixed with curd and taken orally as hepatoprotective, hepatic stimulant, for liver ailments; leaves paste applied in piles, and on forehead for headache; for skin complaints, wounds, pound the leaves with turmeric and rice and use as a poultice. Veterinary medicine, crushed leaves eaten for diarrhoea, acidity and stomach disorders; leaves paste applied for shoulder pain and foot and mouth diseases. Sacred plant, ceremonial, ritual, whole plant in marriage ceremony; leaf paste used to dye nails and hand-palms during religious and social ceremonies or festivals.)

in English: alkanna, camphire, cypress shrub, Egyptian privet, henna, henna-tree, samphire

in Arabic: enah, faghia, henna

in Peru: amor fino, amorfina, amorfina colorada

in Borneo: pacar ringgei

in Burma: dan

in Cambodia: krâpéén

in China: chih chia hua, hai na, jan chih chia tsao, zhi jia hua ye

Lecaniodiscus Planchon ex Bentham Sapindaceae

From the Greek *lekane* 'a dish, pot, saucer' and *diskos* 'a disc', see *Niger Fl.* [W.J. Hooker]. 250–251. 1849.

Lecaniodiscus cupanioides Planch. ex Benth.

Tropical Africa. Small tree or shrub, scented flowers, velvety hairy fruits

See *Niger Fl.* [W.J. Hooker]. 251. 1849

(Leaves, roots and stem for fevers, burns, wounds, sores, measles, hepatomegaly.)

in Central African Republic: bimba, bondjamba

in Zaire: amasanga sanga

Lecaniodiscus fraxinifolius Baker

Tropical Africa. Tree or shrub, pinnate leaves, whitish green flowers in compact inflorescences, often infected by yellowish insect galls

See *Fl. Trop. Afr.* [Oliver et al.] 1: 429. 1868

(Stem bark and leaves wound and sore dressing, liver problems, abscess, fevers. Bark froth rubbed on the breasts to increase the flow of milk.)

in Tanzania: mkunguma

Lecaniodiscus fraxinifolius Baker subsp. *vaughanii* (Dunkley) Friis

Tanzania, Zanzibar, Kenya, Uganda, Somalia. Tree, densely leafy, small yellow-green flowers, unbranched spike-like heads, separate male and female trees, no petals, very small yellow female flowers on shorter stalks than male flowers, yellow-orange-pink capsules, one hard seed enclosed in a blue-white fleshy edible covering, ripe fruits eaten raw, riverine, swamp forest, grassland, bushland

See *Niger Fl.* [W.J. Hooker]. 250. 1849 and *Bulletin of Miscellaneous Information Kew* 1937: 469. 1937, *Kew Bulletin* 39: 781. 1984

(Bark soaked in water and the liquid vigorously whisked, the resulting foam rubbed into the breasts of mothers to stimulate lactation and purify milk in the breasts; bark and roots soaked in water and the infusion drunk for constipation.)

in English: river litchi

in Southern Africa: muSando, muTarara (Shona)

in S. Rhodesia: muSando, umTalala

in Tanzania: kafulujege, mbwewe, mnanyakanda, mnyanza, muyananza, mzindanguruwe, riangata

Lechea L. Cistaceae

Lechaeum, a port of Corinth in the bay of Corinth, see *Species Plantarum* 1: 90. 1753.

***Lechea minor* L.**

North America. Perennial herb

See *Species Plantarum* 1: 90. 1753, *Bull. Torrey Bot. Club* 21: 247. 1894 and *Taxon* 42: 694. 1993

(Analgesic, febrifuge, antiemetic, astringent, for diarrhea, gastrointestinal disorders, stomachache, headache, sores, boils, vomiting and appetite loss.)

in English: thymeleaf pinweed

Lecythis Loefl. Lecythidaceae

Greek *lekythos* 'oil-jar, oil-flask', referring to the shape of the fruits, see Löfling, Pehr (1729–1756), *Iter Hispanicum* 176–189. Stockholm, 1758, *Familles des Plantes* 2: 345. 1763, *Prodr.* (DC.) 3: 293. 1828, *Trans. Linn. Soc. London* 30(2): 164, 229–230, 301–302, t. 34b, 36b. 1874, *Index Generum Phanerogamorum* 129. 1888 and *Not. System.*, 3: 177–80. 1915, *Archivos do Jardim Botânico do Rio de Janeiro* 4: 152, t. 15. 1925, *Repertorium Specierum Novarum Regni Vegetabilis* 38(986/992): 113–114. 1935, *Das Pflanzenreich* (Engler) Lecythidac. [Heft 105], 4, Fam. 219a: 56, 74–75, 95. 1939, *Lecointea* 2: 2–4. 1964, *Fl. Neotrop. Monogr.* 21(2): 169, 172, 177, 289, 298. 1990.

***Lecythis minor* Jacq.** (*Chytroma bipartita* (Pittier) R. Knuth; *Chytroma valida* Miers; *Eschweilera bolivarensis* R. Knuth; *Eschweilera valida* Nied.; *Eschweilera valida* (Miers) Nied.; *Lecythis bipartita* Pittier; *Lecythis elliptica* Kunth; *Lecythis magdalenica* Dugand; *Lecythis minor* Vell.; *Lecythis purdiei* R. Knuth)

South America.

See *Selectarum Stirpium Americanarum Historia* ... 168–169, t. 109. 1763, *Synopsis Plantarum* 3: 424. 1824, *Florae Fluminensis*: 222. 1829, *Trans. Linn. Soc. London* 30(2): 241. 1874, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3, Abt. 7: 40. 1892 and *Árboles y arbustos nuevos de Venezuela* 2–3: 39–40. 1923, *Das Pflanzenreich* (Engler) Lecythidac. [Heft 105], 4, Fam. 219a: 56, 75, 95. 1939, *Caldasia* 4(20):

421–425, f. 12–13. 1947, *Econ. Bot.*, 23: 133–134. 1969, *Brittonia* 29: 399–410. 1977, *Fl. Neotrop.* 21(2): 317. 1990, *Analyst.* 132(5): 439–449. 2007

(High selenium concentrations found in the seeds.)

in English: monkeypot nuts

***Lecythis ollaria* Loefl.** (*Eschweilera cordata* (O. Berg) Miers; *Lecythis cordata* O. Berg; *Lecythis ollaria* Saldanha; *Lecythis ollaria* Vell.; *Lecythis ollaria* Spruce)

Venezuela. Tree, very hard and heavy reddish yellow bark, warty branches, spiked terminal inflorescence, woody urn- or pot-shaped pericarp covered by an operculum with seeds

See *Iter Hispanicum* 189. 1758, *Florae Fluminensis*: 222. 1829, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 74. 1850 and *J. Trace Elements Med. Biol.* 10(2): 96–102. 1996, *Hum. Exp. Toxicol.* 29(5): 431–434. 2010

(Toxic, acute selenium poisoning, high selenium concentrations found in the seeds of this selenium-accumulator plant. Latex of the pericarp depilatory, associated with symptomatology of acute intoxication, fever and diarrhea. Oil extracted from the seeds considered a powerful hemostatic agent.)

in English: monkey's coconut, paradise nuts

in Venezuela: coco de mono, olla del mono, olleto

***Lecythis pisonis* Cambess.** (*Couroupita crenulata* Miers; *Couroupita lentula* Miers; *Lecythis amapaensis* Ledoux; *Lecythis amazonum* Mart. ex O. Berg; *Lecythis densa* Miers; *Lecythis hoppiana* R. Knuth; *Lecythis marcgraaviana* Miers; *Lecythis ollaria* Spruce; *Lecythis ollaria* Vell.; *Lecythis paraensis* Huber, nom. nud.; *Lecythis paraensis* Huber ex Ducke; *Lecythis pilaris* Miers; *Lecythis pisonis* subsp. *usitata* S.A. Toxicol.* 29(5): 431–434. 2010

(High selenium concentrations found in the seeds.)

Lecythis tuyrana Pittier (*Chytroma glossiniformis* R. Knuth; *Lecythis calycocarpa* Novikova; *Lecythis elata* Dwyer; *Lecythis melliana* Pittier)

Venezuela, Colombia.

See *Contributions from the United States National Herbarium* 26(1): 8–9, t. 6, 7. 1927, *Das Pflanzenreich* (Engler) Lecythidac. [Heft 105], 4, Fam. 219a: 74. 1939, *Annals of the Missouri Botanical Garden* 52(3): 360–361, f. 6A–B. 1965, *Brittonia* 29: 399–410. 1977

(High selenium concentrations found in the seeds.)

Ledebouria Roth Asparagaceae (Hyacinthaceae, Liliaceae)

After the German botanist Carl (Karl) Friedrich (Carolus Fridericus) von Ledebour, 1785–1851, professor of botany, botanical collector, traveller, author of *Flora altaica*. Berolini [Berlin] 1829–1833 and *Flora rossica*. Stuttgartiae 1842–53. See *Species Plantarum* 1: 308–309. 1753, *Anleitung zum Studien der Wissenschaftlichen Botanik* 267, 284. 1818, *Novae Pl. Sp.* 194. 1821, *Botanical Register*; consisting of coloured ... 12: t. 1029. 1826 and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 198. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 358. 1965, Stafleu and Cowan, *Taxonomic Literature*. 2: 805–808. 1979, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 151. Regione Siciliana, Palermo 1988, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 741. Stuttgart 1993.

Ledebouria cooperi (Hook.f.) Jessop (*Scilla adlamii* Baker; *Scilla aggregata* Baker; *Scilla barberi* Baker; *Scilla cinerascens* van der Merwe; *Scilla concinna* Baker, nom. illeg.; *Scilla conrathii* Baker; *Scilla cooperi* Hook.f.; *Scilla exigua* Baker; *Scilla fehrii* Baker; *Scilla galpinii* Bak.; *Scilla glaucescens* van der Merwe; *Scilla globosa* Baker; *Scilla inandensis* Bak.; *Scilla leichtlinii* Baker; *Scilla londonensis* Baker; *Scilla palustris* J.M. Wood & M.S. Evans; *Scilla petiolata* van der Merwe; *Scilla pusilla* Bak.; *Scilla rehmannii* Baker; *Scilla rogersii* Bak.; *Scilla rupestris* v.d. Merwe; *Scilla saturata* Bak.; *Scilla sphaerocephala* Baker; *Scilla subglauca* Baker; *Scilla tristachya* Baker)

South Africa. Bulbous, small plant, ovoid bulb, long pointed purple spotted leaves, small pink flowers

See *Bot. Mag.* 92: t. 5580. 1866, *Refug. Bot.* 4: t. 235. 1870, *J. Linn. Soc., Bot.* 13: 247. 1873, *J. Bot.* 12: 365. 1874, *Gard. Chron.*, III, 1891(1): 520. 1891, *Fl. Cap.* 6: 483–484, 486. 1897, *J. Bot.* 37: 251. 1899 and *Bull. Herb. Boissier*, II, 1: 788, 853. 1901, *Bull. Herb. Boissier*, II, 4: 1001–1002. 1904, *Fl. Pl. South Africa* 21: t. 827. 1941, *Fl. Pl. South Africa* 23: t. 912. 1943, *J. S. African Bot.* 36: 247. 1970

(Laxative, antacid, stomachic, used for infants.)

in English: Cooper's squill, purple spotted scilla, wild squill
in Lesotho: leptjetlane

in Southern Africa: phetola (Sotho)

Ledebouria kirkii (Baker) Stedje & Thulin (*Drimia angustitepala* Engl.; *Drimia hildebrandtii* Baker; *Ledebouria hildebrandtii* (Baker) U. Müll.-Doblies & D. Müll.-Doblies; *Scilla johnstonii* Baker ex Oliv.; *Scilla kirkii* Baker; *Urginea corradii* Chiov. ex Chiarugi)

Tanzania. Herb, stem white-brown, young leaves green tinged blue-purple, perianth green, stigma pale pink-purple, style pink-purple, ovary pale green, anthers pale yellow-green, filaments blue-purple

See *Species Plantarum* 1: 308–309. 1753, *Novae Pl. Sp.* 194. 1821, *Journal of the Linnean Society, Botany* 13: 254. 1873, *Trans. Linn. Soc. London, Bot.* 2: 351. 1887, *Bot. Jahrb. Syst.* 15(4): 474–475. 1892 and *Webbia* 8: 26. 1951, *Nordic J. Bot.* 15(6): 595. 1995 (publ. 15 April 1996), *Fl. Trop. E. Afr., Hyacinthac.* 12. 1996, Edwards, S., Demissew, S. & Hedberg, I. (eds.) *Flora of Ethiopia and Eritrea*. The National Herbarium, Addis Ababa University, Ethiopia & The Department of Systematic Botany, Upps. 1997, *Feddes Repert.* 108(1–2): 58. 1997

(Powdered roots toxic.)

Ledebouria revoluta (L.f.) Jessop (*Barnardia indica* Wight; *Drimia acuminata* Lodd.; *Drimia bifolia* (Hochst. ex A. Rich.) Schweinf.; *Drimia brevifolia* Baker; *Drimia gawleri* Schrad.; *Drimia lanceifolia* (Jacq.) Ker Gawl.; *Drimia longipedunculata* Sweet; *Drimia revoluta* (L.f.) Sweet; *Drimia undulata* Jacq. ex Willd., nom. illeg.; *Eratobotrys bifolia* Hochst. ex A. Rich.; *Hyacinthus revolutus* L.f.; *Hypoxis violacea* Schult. & Schult.f.; *Lachenalia lanceifolia* Jacq.; *Lachenalia maculata* Tratt.; *Ledebouria hyacinthina* Roth, nom. illeg.; *Ledebouria sickenbergeri* (Deflers) Speta; *Ledebouria yemenensis* (Deflers) Speta; *Melanthium hyacinthium* B. Heyne ex Roth, nom. inval.; *Phalangium revolutum* (L.f.) Pers., nom. illeg.; *Phalangium spicatum* Poir., nom. illeg.; *Scilla albomarginata* van der Merwe; *Scilla asperifolia* van der Merwe; *Scilla carnosula* van der Merwe; *Scilla chiovendae* Cufod.; *Scilla hyacinthina* (Roth) J.F. Macbr.; *Scilla indica* Baker; *Scilla indica* (Wight) Baker, nom. illeg.; *Scilla lanceaefolia* Baker; *Scilla lanceifolia* (Jacq.) Baker; *Scilla maculata* (Tratt.) Schrank; *Scilla maculata* Baker, nom. illeg.; *Scilla neumannii* Engl.; *Scilla revoluta* (L.f.) Baker; *Scilla richardiana* Buchinger ex Baker; *Scilla sickenbergeri* Deflers; *Scilla yemensis* Deflers; *Sugillaria lanceifolia* (Jacq.) Salisb., nom. inval.; *Xeodolon revolutum* Salisb.; *Xeodolon revolutum* (L.f.) Salisb., nom. inval.)

S. Africa, India, Sri Lanka. Low bulbous perennial herb, slender, tunicated bulbs, basal sheathing purple spotted leaves, tiny pinkish green flowers in terminal raceme, ovoid or globose capsule

See *Species Plantarum* 2: 166. 1799, *Synopsis Plantarum* 1: 367. 1805, *Hortus suburbanus Londinensis* 72. 1818, *Syst. Veg.* 7: 779. 1830, *Tent. Fl. Abyss.* 2: 236. 1850, *Icon. Pl. Ind. Orient.* [Wight] 6: t. 2041. 1853, *Genera Plantarum* [Salisbury] 18. 1866, *J. Linn. Soc., Bot.* 13: 250. 1873, *Fl. Cap.* 6: 488. 1896, *Flowering Plants of South Africa* 7: 527. 1898 and *Bot. Jahrb. Syst.* 32: 95. 1902, *Fl. Pl. South Africa* 24: t. 944, 947, 958. 1944, *J. S. African Bot.* 36: 255. 1970, *Nordic J. Bot.* 16(2): 121–126. 1996, *Phyton* (Horn) 38: 106. 1998

(Used in Sidha. Plant diuretic, expectorant, cardiac tonic, pectoral. Bulb has a slight digitalis-like action on the heart. Paste made from the bulb applied for inflammatory swellings, rheumatism, also to cure dysentery and against poisoning; bulb baked and tied over boils and wounds.)

in English: South Indian squill

in India: adavitheela gadda, bhooyikand, chikka kaadu eerulli, chirunari-vengayam, kaadu bellulli, kaattulli, kattu velvenkayam, kattuvengaayam, kattuvengayam, kori kand, lahan-kal-kamdo, narivengaayam, narivengayam, rankand, shivanaaru gedde

Ledum L. Ericaceae

Ledon is the Greek name used by Dioscorides for *Cistus*; Latin *leda*, *ledon*, *lada* and *ledanum* applied by Plinius to a shrub in Cyprus from which a resin was obtained, a species of *Cistus*, Latin *ladanum* or *ledanum* and Greek *ledanon* for the resinous juice obtained from the shrub *lada*; see Serapiom, *El libro agregà de Serapiom*. A cura di G. Ineichen. Venezia-Roma 1962–1966, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 656. Zanichelli, Bologna 1983.

Ledum glandulosum Nutt. (*Ledum californicum* Kellogg; *Ledum glandulosum* var. *californicum* (Kellogg) C.L. Hitchc.; *Ledum groenlandicum* subsp. *glandulosum* (Nutt.) Á. Löve & D. Löve; *Rhododendron neoglandulosum* Harmaja)

North America.

See *Transactions of the American Philosophical Society*, new series, 8: 270. 1843[1842] and *University of Colorado Studies: Series in Biology* 17: 25. 1965

(Leaves and twigs infusion as an eye-wash.)

in English: glandular Labrador tea, Labrador tea, trapper's-tea, western Labrador tea

Ledum groenlandicum Oeder (*Ledum palustre* L. subsp. *groenlandicum* (Oeder) Hultén; *Ledum palustre* L. var. *latifolium* (Jacq.) Michx.; *Rhododendron groenlandicum* (Oeder) Kron & Judd)

North America. Perennial shrub, aromatic leaves

See *Species Plantarum* 1: 391–393. 1753, *Flora Danica* 4(10): 5, pl. 567. 1777 and *Acta Universitatis Lundensis*, n.s. 44(1):

1219. 1948, *Taxon* 31(2): 344–360. 1982, *Systematic Botany* 15(1): 67. 1990

(Leaves and stem infusion taken for colds.)

in English: bog Labrador tea

Ledum palustre L. (*Ledum palustre* Michx.; *Rhododendron palustre* (L.) Kron & Judd)

Europe. Perennial shrub

See *Species Plantarum* 1: 391–393. 1753, *Flora Boreali-Americana* 1: 259. 1803 and *Systematic Botany* 15(1): 67. 1990, *Regnum Veg.* 127: 60. 1993

(Poisonous, can cause cramps, diarrhea and paralysis, must be dried to rid the plant of poisons before use. Used as a cough syrup, for chest colds. Dried leaves a tea for dysmenorrhea.)

in English: Hudson's Bay tea, Labrador tea, marsh Labrador tea

in Japan: haspa, tomamas

Ledum palustre L. var. ***decumbens*** Aiton (*Ledum decumbens* (Aiton) Lodd. ex Steud.; *Ledum decumbens* Small; *Ledum palustre* L.f. *decumbens* Stormer; *Ledum palustre* fo. *decumbens* (Aiton) Y.L. Chou & S.L. Tung; *Ledum palustre* L. subsp. *decumbens* Hultén; *Ledum palustre* L. subsp. *decumbens* (Aiton) Hultén; *Rhododendron subarcticum* Harmaja; *Rhododendron tomentosum* Harmaja subsp. *subarcticum* (Harmaja) G. Wallace)

Europe. Perennial shrub

See *Species Plantarum* 1: 391–393. 1753, *Hortus Kewensis*; or, a catalogue (W. Aiton) ... 2: 65. 1789, *Flora Boreali-Americana* 1: 259. 1803, *Nomenclator Botanicus*. [Steudel] Editio secunda 2: 20. 1840 and Hultén, Eric (1894–1981), *Flora of Kamtchatka and the Adjacent Islands* 1927–1930 [Kongl. Svenska Vetensk. Acad. Handl. 8(2): 8. 1930], *Ligneous flora of Heilongjiang* 463. Heilongjiang Science Press, 1986 [In Chinese.], *Annales Botanici Fennici* 27(2): 203–204. 1990, *Systematic Botany* 15(1): 67. 1990, *Madroño* 39(1): 77. 1992, *Regnum Veg.* 127: 60. 1993, *Journal of the Botanical Research Institute of Texas* 2(1): 441. 2008

(Poisonous, can cause cramps, diarrhea and paralysis, must be dried to rid the plant of poisons before use.)

in English: Hudson's Bay tea, Labrador tea, marsh Labrador tea

in China: xiao ye du xiang

Leea Royen ex L. Leeaceae (Vitaceae)

Named after the Scottish (b. Selkirk) horticulturist James Lee, 1715–1795 (d. Middx), gardener at Syon and Whitton, correspondent of Linnaeus and Smith. See *Systema Naturae*, ed. 12 2: 608, 627. 1767, *Mant. Pl.* 17, 124. 1767, R. Pulteney, *Historical and biographical sketches of the progress of*

botany in England. 2: 349. London 1790, Robert John Thornton (1768?-1837), *Sketch of the life and writings of ... James Lee in An introduction to the science of botany ...* By ... James Lee, etc. London 1810, Aylmer Bourke Lambert, "Notes relating to botany, collected from the manuscripts of the late Peter Collinson." *Trans. Linn. Soc. London*. 10: 271-273. 1811, *Analyse des Familles de Plantes* 21, 27. 1829, W. Darlington, *Memorials of John Bartram and Humphry Marshall*. 395. 1849 and E.J. Willson, *James Lee and the Vineyard Nursery Hammersmith*. London 1961, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 360. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 232. 1972, *Blumea* 22(1): 57-100. 1974, *J. Indian Bot. Soc.* 71: 217-220. 1992, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 421. London 1994.

Leea aculeata Blume ex Spreng. (*Leea aculeata* Blume; *Leea aculeata* (Blanco) Blanco; *Leea aculeata* var. *molocana* Miq.; *Leea sandakanensis* Ridl.; *Leea serrulata* Miq.; *Ticorea aculeata* Blanco)

Philippines.

See *Systema Vegetabilium*, editio decima sexta 1: 670. 1824, *Bijdr. Fl. Ned. Ind.* 4: 197 (-198). 1825, *Flora de Filipinas* 85. 1837, *Flora de Filipinas* 127. 1845, *Annales Museum Botanicum Lugduno-Batavi* 1: 99. 1863 and *Bulletin of Miscellaneous Information Kew* 1931: 499. 1931

(Leaves as blood purifier.)

in Philippines: amamali, balinaunau, hara, kemamale, memamale, mali-mali, mamalig, sipit-kahig

Leea aequata L. (*Leea aequata* Roxb. ex Wight & Arn.; *Leea ancolana* Miq.; *Leea ancolona* Miq.; *Leea hirsuta* Blume ex Spreng.; *Leea hirsuta* Blume; *Leea hirta* Hornem. & Roxb.; *Leea hirta* Roxb. ex Hornem.; *Leea hirta* Hornem.; *Leea hirta* Roxb.; *Leea hispida* Gagnep.; *Leea kurzii* C.B. Clarke)

India.

See *Systema Naturae*, ed. 12 2: 627. 1767, *Mant. Pl.* 124. 1767, *Hortus Regius Botanicus Hafniensis* 1: 231. 1813, *Hort. Carey, i. 656. 1832, *Prodr. Fl. Ind. Orient.* 1: 132. 1834, *Flora van Nederlandsch Indië* 2: 611. 1859, *Journal of Botany, British and Foreign* 19: 165. 1881 and *Notulae Systematicae*. *Herbier du Museum de Paris* 1: 229. 1910, *Blumea* 22: 90. 1974, *J. Indian Bot. Soc.* 71: 217-220. 1992

(Used in Ayurveda and Sidha. Tubers and stems astringent and mucilaginous. A strong antidote for poison, root bark mixed with *Dioscorea pentaphylla*.)

in China: yuan xian huo tong shu

in India: aeluvсандhe gida, bhooyidinda, chivikivelama, dasi, dhvankshajanga, kaaka mruthyu, kaaka samhaari

gida, kaakajanga, kaka, kakajanga, kakakala, kakanacikam, kakanasa, kakanasika, kakanchi, kakanga, kakangah, kakangi, kakavha, kaki, kanga, kauridinga, mekenui, mon-akaalu muruka, neetiveli, sirapadi, surapaadi, surapadi, velanasandi, velumasandi

in Nepal: galeni

Leea alata Edgew.

India. Woody undershrubs, bright red flowers, brownish red fruits

See *Transactions of the Linnean Society of London* 20: 36. 1846

(Roots for cold, cough, jaundice.)

Leea angulata Korth. ex Miq. (*Leea horrida* T. & B., nom. nud.; *Leea sambucina* var. *intermedia* Ridl.)

India. Shrub or small tree

See *Annales Museum Botanicum Lugduno-Batavi* 1: 97. 1863, *Catalogus plantarum quae in Horto botanico bogoriensi ...* 169. 1866 and *Journal of the Straits Branch of the Royal Asiatic Society* 45: 185. 1906

(Astringent, anodyne, antidiarrheal.)

in India: hasti karma

Leea asiatica (L.) Ridsdale (*Leea aspera* Edgew.; *Leea crispa* L.; *Leea edgeworthii* Santapau; *Leea herbacea* Buch-Ham.; *Leea pumila* Kurz; *Phytolacca asiatica* L.)

India. Erect shrub or undershrub, woody, terete, many-branched cymes, calyx gland-tipped, oblong petals greenish white or pale yellow

See *Species Plantarum* 1: 441. 1753, *Mantissa Plantarum* 1: 124. 1767, *Transactions of the Linnean Society of London* 14(1): 228-229. 1823, *A General History of the Dichlamydeous Plants* 1: 713. 1831, *Transactions of the Linnean Society of London* 20(1): 36. 1846, *Journal of the Asiatic Society of Bengal* 41(2): 302. 1872 and *Records of the Botanical Survey of India* 16(1): 54. 1953, Manilal, K.S. (1938-), edited by, *Botany and History of Hortus Malabaricus* 189. New Delhi. 1980

(Paste of root tuber mixed with the seed of black pepper and given in the early stage of epilepsy, also a remedy for worms; root paste given along with *Curcuma longa* paste with sugar in case of acute stomachache. Root with bark of *Boswellia serrata* made into a paste and used in snakebite. Bruised leaves applied to wounds. Veterinary medicine, root added to fodder to destroy worms in the wounds of cattle.)

in China: dan yu huo tong shu

(For cough, chest pain. Acaricidal.)

in Angola: kizonjila

in Rwanda: igisengosengo

Legazpia Blanco Scrophulariaceae (Linderniaceae)

See *Species Plantarum* 2: 619. 1753, *Flora de Filipinas*, ed. 2 [F.M. Blanco] 338. 1845.

Legazpia polygonoides (Benth.) T. Yamaz. (*Torenia polygonoides* Benth.) (For the Swedish clergyman Reverend Olof Torén, 1718–1753, traveller, botanist and plant collector; see Carl Linnaeus, *Species Plantarum.* 619. 1753 and *Genera Plantarum.* Ed. 5. 270. 1754 and J.H. Barnhart, *Biographical Notes upon Botanists.* 3: 391. 1965.)

Japan, Malaysia.

See *Species Plantarum* 2: 619. 1753, Bentham, George (1800–1884), *Scrophularineae Indicae*: a synopsis of the *East Indian Scrophularineae* contained in the collections presented by the East India Company to the Linnaean Society of London, and in those of Mr. Royle and others: with some general observations on the affinities and sub-divisions of the order. 39. London: J. Ridgway, 1835 and *Journal of Japanese Botany* 30(12): 359, pl. 11, f. 1–4, 6. 1955

(For dropsy, pound the plant with rice flour and poultice the abdomen.)

in China: san chi e shu

Malay name: kera nasi, rumput kerak nasi

Leibnitzia Cass. Asteraceae

To honor the German (b. Leipzig) scientist Gottfried Wilhelm Leibniz, 1646–1716 (d. Hannover), philosopher and mathematician, traveller, he was involved in a controversy with Newton in the priority dispute over the invention of the calculus (integral and differential), his writings include *Relatio ad inclytam Societatem Leopoldinam naturae curiosorum, de novo antidysenterico Americano magnis successibus comprobato.* [8vo, first edition, a cure for dysentery, the ipecacuanha root from South America.] Hanover and Wolfenbüttel 1696; see Bernard le Bovier (Bouyer, Bouvier) de Fontenelle (1657–1757), *Memoirs of the academy of Sciences in Paris epitomized.* [8vo, second edition; translated by John Chamberlayne, 1666–1723] London 1721, *Dictionnaire des Sciences Naturelles* [Second edition] [F.

Cuvier] 25: 420–421. 1822, *Botanische Zeitung* (Berlin) 9: 350. 1851 and Alexander B. Adams, *Eternal Quest. The Story of the Great Naturalists.* New York 1969, Frederick Kreiling, Jürgen Mittelstrass, Eric J. Aiton and Joseph E. Hofmann, in *D.S.B.* 8: 149–168. 1981, André Robinet, *G.W. Leibniz Iter italicum* (Mars 1689–Mars 1690). *La dynamique de la République des Lettres.* Firenze, Leo S. Olschki 1988, [Catalogo del Fondo Fiammetta Olschki], *Viaggi in Europa. Secoli XVI-XIX. Gabinetto scientifico e letterario G.P. Viessesux.* Firenze 1990.

Leibnitzia nepalense (Kunze) Kitam. (*Cleistanthium nepalense* Kunze; *Gerbera kunzeana* A. Braun & Asch.; *Leibnitzia nepalensis* (Kunze) Kitam.)

India.

See *Botanische Zeitung* (Berlin) 9: 350. 1851, *Cat. Sem. Hort. Berol.* (1871) App. 3. 1871 and *Journal of Japanese Botany* 14(5): 297. 1938

(Whole plant for stomach disorders, fever and body pains.)

Lemmaphyllum Presl Polypodiaceae

Greek *lemma* ‘skin, bark, scale’ and *phyllon* ‘a leaf’, apparently referring to the papery leaves; see *Deliciae Pragenses* 159. 1822, Presl, Carl (Karl, Carel, Carolus) Borivoj (Boriwog, Boriwag) (1794–1852), *Epimeliae botanicae.* 157–158. Praegae 1849 [= *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften.* 517–518. 1851] and *Dansk Bot. Ark.* 6(3): 45, 50 t. 6. f. 2. 1929, *Bull. Fan Mem. Inst. Biol.* 4: 58, 96. 1933 [Bulletin of the Fan Memorial Institute of Biology. Peiping/Beijing], *Sunyatsenia* 5(4): 258. 1940, Copeland, Edwin Bingham (1873–1964), *Genera Filicum* 189, 191, t. 6. Waltham, Mass.: Chronica Botanica Company, 1947 (*Annales cryptogamici et phytopathologici*, v. 5), *Reinwardtia* 2: 409. 1954, *Fern Gaz.* 11(2–3): 141–162. 1975.

Lemmaphyllum carnosum (J. Sm. ex Hook.) Presl (*Drymoglossum carnosum* J. Sm. ex Hook.; *Drymoglossum carnosum* J. Sm.; *Drymoglossum carnosum* (Presl) Hook.; *Drymoglossum carnosum* Benth.; *Lemmaphyllum carnosum* C. Presl; *Lemmaphyllum carnosum* (Wall. ex Hook.) C. Presl; *Notholaena carnosus* Wall.)

India. Terrestrial herb, epiphyte, rhizome long-creeping

See *Numer. List* [Wallich] n. 138. 1828, *Genera Filicum* pl. 78, A. 1842, *Abhandlungen der Königlichen Böhmischen Gesellschaft der Wissenschaften*, ser. 5 6: 518. 1851, *Flora Hongkongensis* 444. 1863

(Fronds and plant pectoral, diuretic, astringent, in urinary calculus, rheumatism, applied as poultice on swellings of legs, to cure animal bites; a decoction taken to stop hemorrhages.)

in China: ching mien ts’ao, lo yen ts’ao

Lemna L. Lemnaceae (Araceae)

From *lemna* (see *lemma*, *lemmatus* ‘skin, husk, scale’), the ancient Greek name for some water plant or a water weed, *Lemna palustris* or *Callitriche verna* (Theophrastus *HP.* 4.10.1); some suggest an origin from Greek *limne* ‘salt-marsh, pool of standing water, marsh’; see Carl Linnaeus, *Species Plantarum.* 2: 970–971. 1753, *Genera Plantarum.* Ed. 5. 417. 1754, *Genera Plantarum* 23. 1789, *Florula belgica*, opera majoris prodromus, auctore ... 165. 1827, *Flora Germanica Excursoria* 1: 10. 1830, *Linnaea* 13: 391. 1839, *Genera Plantarum* 1369. 1840, *Flora of New York* 2: 245. 1843, *Linnaea* 33: 239. 1864, *Journal of the Asiatic Society of Bengal* 40: 78. 1871, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21: 294, 296. 1895 and *Fieldiana, Bot.* 24(1): 364–369. 1958, *Veröffentlichungen der Geobotanischen Institutes der ETH, Stiftung Rübél, Zürich* 71: 445. 1986, *Taxon* 41: 565. 1992, *Taxon* 44: 611–612. 1995.

Lemna minor L. (*Hydrophace minor* (L.) Bubani; *Lemna rwandensis* De Sloover; *Lenticula minor* (L.) Scop.)

China. Floating, fronds in colonies, good feed for ducks and fowls

See *Species Plantarum* 2: 970. 1753, *Flora Carniolica*, Editio Secunda 2: 213. 1772, *Not. Pl. Asiat.* 3: 216. 1851, *Journal of Botany, British and Foreign* 3: 112. 1865, *Flora Pyrenaea ...* 4: 23. 1897 and *Veroff. Geobot. Inst. E.T.H. Stiftung Rubel Zurich* 71: 442. 1986, *Taxon* 41: 565. 1992, *Watsonia* 19: 169–171. 1993, *Acta Phytotax. Geobot.* 46: 117–129. 1995, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Linzer Biol. Beitr.* 29(1): 5–43. 1997

(Scavenger.)

in English: common duckweed, duckweed, lesser duckweed

in China: fu ping, fou ping, shui ping

in India: neuk mangolae

in Tibetan: nyan-icibs

Lemna trisulca L. (*Hydrophace trisulca* (L.) Bubani; *Lemna trisulca* L. var. *pygmaea* Henn.; *Lenticula trisulca* (L.) Scop.; *Staurogeton trisulcus* (L.) Schur)

Europe. Thallus submerged

See *Species Plantarum* 2: 970. 1753, *Flora Carniolica*, Editio Secunda 2: 213. 1772, *Verhandlungen und Mittheilungen des Siebenbürgischen Vereins für Naturwissenschaften zu Hermannstadt* 4: 70. 1853, *Flora Pyrenaea ...* 4: 34. 1897 and *Taxon* 30: 699–701. 1981, *Veroff. Geobot. Inst. E.T.H. Stiftung Rubel Zurich* 71: 443. 1986

(Nutritious, tonic, stimulant.)

in English: ivy-leaf duckweed, ivy-leaved duckweed, star duckweed

in India: latche mangoolae

Lens Miller Fabaceae (Vicieae)

The classic name for *Lens culinaris*, Latin *lens*, *lentis* ‘a lentil’, Greek *phakos*, *phakon* ‘lentil, *Ervum lens* and its fruit’, Latin *lateo* ‘to be or lie hid or concealed’, Akkadian *latu* and Hebrew *lot* ‘covering’; see Pietro Bubani, *Flora Virgiliana.* 69. Bologna 1870 and Ernest Weekley, *An Etymological Dictionary of Modern English.* 2: 838. New York 1967, *Recent Res. Pl. Sci.* (New Delhi). 7: 252–260. 1979, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana.* 3: 663. Bologna 1983, *Vicieae Database Project*, Southampton Univ. 1–75. 1986, *New Botanist* 19: 9–19. 1992, Giovanni Semerano, *Le origini della cultura europea. Sin.* 15(2): 40–43. 2000.

Lens culinaris Medik. (*Cicer lens* Willd.; *Ervum lens* L.; *Ervum lens* Wall.; *Lens culinaris* Medik.; *Lens culinaris* subsp. *esculenta* Briq.; *Lens culinaris* var. *biebersteinii* (Lamotte) Briq.; *Lens culinaris* var. *faurei* Maire; *Lens esculenta* Moench; *Lens lens* Huth; *Lens lens* (L.) Huth; *Vicia lens* (L.) Coss. & Germ.)

Middle East, Mediterranean, Southern Europe. Perennial non-climbing herb, erect, many-branched, corolla pale blue, white or pink

See *Species Plantarum* 2: 738. 1753, *Vorlesungen der Churpfälzischen physicalisch-öconomischen Gesellschaft* 2: 361. 1787, *Methodus Plantas Horti Botanici ...* 131. 1794, *Species Plantarum.* Editio quarta 3(2): 1114. 1802, *Flore des Environs de Paris* 143. 1812, *A Numerical List of Dried Specimens* n. 5954 C. 1831, *Helios* 11(9): 134. 1893 and *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980, *New Zealand Journal of Botany* 18(4): 463–72. 1980, *Atoll Res. Bull.* 273(5): 109–142. 1983, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Revista Fitotecn. Mex.* 15: 61–69. 1992

(Used in Ayurveda and Unani. Lentils mucilaginous, aphrodisiac and laxative, used in the treatment of constipation and gastrointestinal disorders, a decoction in warm water taken in smallpox; a paste applied to ulcers, slow-healing sores and wounds; covering styptic and astringent.)

in English: common lentil, lentil, split pea

in Tanzania: dengu, deugu, mdengu

in Italian: lenticchia (Latin *lenticulam*, the diminutive of *lentem*)

in Cambodia: lânti

in China: bing dou

in India: adas, adas (masoor), adas muqqashir, adas musallam, adas mussallam muqqashshar, adas mussalam muqqashshar, adasa, buromussur, chanangi, chanching, channangi, chiri-sanagal, gabholika, gurubija, halasaka, kalyanabija, kerze,

mangaliya, manhri, masar, massur, massooru bele, masur, masur muqqashar, masura, masurah, masuraka, masuri, masuri-dal, masuridal, masurika, mauri, miraju-maka, mirjumak, misur-pappu, misur-purpur, misurpappu, misur-purpu, misurpurpur, mohi, mohri, nahasuri, nashik, prithu-bijaka, ragadali, sura, tambularaga, triputa, vrihikanchana

in Lepcha: fyetlaashi

in Thailand: thua daeng

in Tibetan: sranchung

in Mexico: biza huini castilla, biza lace castilla

Leocus Chevalier Lamiaceae (Labiatae)

An anagram of *Coleus*, see *Journ. de Bot.* (Morot) 22: 125–126. 1909.

Leocus africanus (Baker ex Scott-Elliot) J.K. Morton (*Anisochilus africanus* Baker ex Scott-Elliot; *Briquetastrum africanum* (Baker ex Scott-Elliot) A. Robyns & Lebrun; *Coleus africanus* (Baker ex Scott-Elliot) Roberty; *Leocus africanus* (Baker & Scott-Elliot) J.K. Morton)

Tropical Africa. Woody herb, pale blue flowers in dense cylindrical spikes

See *Journal of the Linnean Society, Botany* 30: 94. 1894 and *Annales de la Société Scientifique de Bruxelles* 19: 102. 1929, *Bulletin de l'Institut Française d'Afrique Noire* 16(1): 330. 1954, *Journal of the Linnean Society, Botany* 58: 270. 1962

(Decoction drunk against diarrhea, dysentery.)

Leonotis (Pers.) R. Br. Lamiaceae (Labiatae)

Greek *leon* 'a lion' and *ous*, *otos* 'an ear', in reference to the shape of the upper lip of the corolla; or from *leon* and *notis*, *notidos* 'moisture, damp, wet', referring to the easily rotting corolla; see Robert Brown, *Prodromus florae Novae Hollandiae*. 504. 1810.

Leonotis leonurus (L.) R. Br. (*Hemisodon leonurus* (L.) Raf.; *Leonotis africanus* Mill.; *Leonotis grandiflorus* Moench; *Leonotis leonurus* var. *albiflora* Benth.; *Leonurus africanus* Mill.; *Leonurus grandiflorus* Moench; *Leonurus superbus* Medik.; *Phlomis leonurus* L.; *Phlomis speciosa* Salisb.)

S. Africa. Shrub, herbaceous, erect, woody base, sparsely branched, stem white softly pubescent, leaves lanceolate, flowers orange pubescent, calyx green not prickly, damp grassland

See *Species Plantarum* 2: 584–587. 1753, *Prodr. Stirp. Chap. Allerton* 84. 1796, *Prodromus Florae Novae Hollandiae* 504. 1810, *Hortus Kewensis*; or, a catalogue ... The second edition 3: 410. 1811, *Comm. Pl. Afr. Austr.* 243. 1838, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 22: 144. 1895

(Plant infusion used as digestive aid or nerve tonic, for coughs, colds, influenza, chest infections, for female ills or disorders. Leaves, analgesic, carminative, expectorant, for catarrh, bronchitis. Roots for snakebite. An infusion of the twigs, leaves and flowers for skin eruptions, including leprosy. Twigs added to the bath water for relief of muscular aches and pains, itchy skin and eczema, sores, bites, bee and wasp stings, scorpion and snakebites. A concoction of the plant around houses to keep snakes away.)

in English: Cape hemp, lion's ear, lion's tail, minaret flower, wild hemp

in Southern Africa: bulderdagga, duiwelstabak, duiwelst-wak, klipdagga, koppiesdagga, rooidagga, wildedagga, red dacha, red dagga, wild dagga (*dagga* is the Indian hemp, *Cannabis sativa*); iMunyane (Zulu); lebake (Sotho); umFincanfincane, uTywala bengcungcu, imVovo (Xhosa); umhlahlampetu (Shona)

in Japan: kaen-kise-wata

Leonotis nepetifolia (L.) R. Br. (*Leonotis kwebensis* N.E. Br.; *Leonotis nepetaefolia* (R. Br.) Ait. f.; *Leonotis nepetaefolia* R. Br.; *Leonurus globosus* Moench, nom. illeg.; *Leonurus nepetifolius* (L.) Mill.; *Phlomis nepetifolia* L.)

Africa, Indian Subcontinent. Herb, woody subshrub, stiff, stems deeply ridged, almost unbranched, dense rounded flower clusters at the upper nodes, corolla pale yellow to orange, spiny funnel-shaped calyx light green very prickly when dry, stamens and stigma white, mature flowers picked and sweet nectar sucked or licked, a source of bee forage, fodder for rabbits

See *Species Plantarum* 2: 584–587. 1753, *Prodromus Florae Novae Hollandiae* 504. 1810, *Hortus Kewensis*; or, a catalogue ... The second edition 3: 409–410. 1811 and *Fieldiana, Botany* 24(9/3): 237–317. 1973, *Taxon* 31: 593–595. 1982, *Listados Florísticos de México* 2: 1–100. 1983, *Proceedings of the Indian Science Congress Association* 71(3-vi): 80–81. 1984, *Proceedings of the Indian Science Congress Association* 73(3-vi): 156–157. 1986, *Flore de Madagascar et des Comores* 175: 1–293. 1998, *Ethnobotany* 16: 52–58. 2004

(Psychoactive effects. Used for fevers, boils, baths for prickly heat. Ash of the plant applied locally to cure paralysis. Leaves brewed as a tea for fever, flu, cold, coughs, womb prolapse and malaria; leaves pounded, soaked in cold water and the liquid drunk to relieve stomach pain and fever or to kill intestinal worms; leaf paste for eczema, parasitic skin infections; leaves and stalk decoction baths used to strengthen weak children. Inflorescence burned, mixed with oil of *Sesamum indicum* and applied to eczema of the head of children, mixed with butter used to cure eye diseases, swelling of the eyelids; ash mixed with coconut oil applied in scabies and burns; flowers infusion taken for menstrual disorders. Seeds diuretic. Veterinary medicine, seeds given to cattle in dropsy; seed decoction for dressing wounds in animals; leaves for ephemeral fevers.)

in English: bald head, hollow stalk, lion bush, lion's ear, lion's tail

in Dominica: gwo-tèt, pompon

in Guyana: man-piaba

in Congo: mbuokalan

in Madagascar: halanjanahary, hazonjanahary, kilanjananahary, lanjambola, lanjalanjananahary, léonure

in Tanzania: linyominyomi, lisanzauki, mfyomfyo, pekepeke mwitu

in Yoruba: iku ekun, oka

in India: baeri, bara guma, barcha, barchhibut, beri, bhut bhairab, chakbakhar, dare dhompo, deepa shoole, deepamaal, devvadumbe, dipmal, gadbheli, ganu thumbe, goa gadde, goa gedde, gogadkusir, granthi, granthika, granthiparna, granthiparni, hanumantabira, hanumantha-beera, hanumantha-beera, heanche, hejura, hejurchei, hejurcheri, kaadu hunne gida, kaadu thumbe, kaaduthumbe, karijari, lal guma, magabura, mara thumbe, matije, matijer, matisul, moothe koola, mota shool, mulagolimedi, mullu golimidi, mulugolimidi, orosobasingi, rajgondal, rana chettu, ranabhaeri, ranabheri, ranaperi, robla, theanthumpai

Leonotis ocymifolia (Burm.f.) Iwarsson var. *ocymifolia* (*Leonotis capensis* Raf.; *Leonotis dubia* E. Meyer ex Benth.; *Leonotis hirtiflora* Benth.; *Leonotis leonitis* (Linnaeus) W.T. Aiton, nom. inval.; *Leonotis leonitis* (L.) R. Br.; *Leonotis leonitis* var. *hirtiflora* (Benth.) Skan; *Leonotis leonitis* var. *leonitis* (Burm.f.) J.F. Macbr.)

South America, Peru, Argentina.

See *Index Sem. Hortus Bot. Petrop.* 1860: 38. 1860 and *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 85: 22, 24–25. 1935, *Publ. Field Mus. Nat. Hist., Bot.* Ser. 13(5): 769. 1960, *Brittonia* 20(4): 295–313. 1968, *Journal of Ethnopharmacology* 94(1): 175–184. 2004

(Antioxidant.)

Lepidagathis Willd. Acanthaceae

Greek *lepis* ‘a scale, bract’ and *agathis* ‘a ball of thread’, referring to the inflorescences or to the calyx of the flowers, see *Species Plantarum*. Editio quarta [Willdenow] 3(1): 400. 1800 and *Fieldiana, Bot.* 24(10/4): 328–462. 1974, *Fieldiana, Bot.*, n.s. 18: 1–87. 1986, *Fl. Chiapas* 4: 1–158. 1995, *Contr. Univ. Michigan Herb.* 21: 161–174. 1997.

Lepidagathis alopecuroidea (Vahl) R. Br. ex Griseb. (*Aetheilema alopecuroideum* (Vahl) R. Br. ex Spreng.; *Lepidagathis alopecuroides* R.Br. ex Griseb.; *Lepidagathis laguroidea* (Nees) T. Anderson; *Ruellia alopecuroidea* Vahl; *Teliostachya alopecuroidea* (Vahl) Nees)

South America, Tropical Africa. Herb, woody-based, weed, decumbent, slender, branching, leaves variable, rooting at nodes, terminal inflorescence, pink or purplish corolla

See *Eclogae Americanae* 2: 49. 1798, *Systema Vegetabilium*, editio decima sexta 2: 826. 1825, *Flora Brasiliensis* 9: 72–73. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 262. 1847, *Flora of the British West Indian Islands* [Grisebach] 453. 1862, *Journal of the Linnean Society, Botany* 7: 34. 1863

(Plant decoction expectorant, a cough remedy.)

Lepidagathis anobrya Nees var. *angustissima* Nees (*Lepidagathis collina* (Endl.) Milne-Redh.; *Russegera collina* Endl.)

Ghana, Senegal. Herb, angled, decumbent, glabrous, heath-like shrub, slender, erect, trailing to semi-erect, dense flower-heads, white corolla with purple dots inside, flowering calyx white tinged with purple

See *Genera Plantarum* t. 94. 1839, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 11: 255. 1847 and *Kew Bulletin* 8: 119. 1953

(Plant decoction expectorant, a cough remedy for children.)

Lepidagathis cristata Willd.

India. Pubescent perennial herb, glandular pubescent leaves, white flowers

See *Species Plantarum*. Editio quarta 3(1): 400. 1800

(Used in Sidha. A paste of plant used for healing wounds and for clotting the blood; plant ash applied on boils of the head; plant extract antiallergic. Inflorescence is burnt and ash mixed with coconut oil and applied to treat skin abscesses and tumours. Leaf juice febrifuge, juice applied externally on forehead to relieve headache. Crushed roots kept on tooth for toothache.)

in India: aewal kangio, aewal-kangio, bhagri, bhuyaterada, gantu kaalu gedde, gantu kaalu gida, gantu kaalukadale, jameenghota, kadavi, kadavi-ravadi, karappan puntu, karappanpoonda, karappanputu, katabutta, kilkkuranti, mullu jaagana gadde, nakkapentika gadda, pathor-fori, patta fori, poopeed, phootaliya, ravadi, suryakantha

Lepidagathis cuspidata Nees (*Ruellia cuspidata* Wall., nom. nud.)

India.

See *A Numerical List of Dried Specimens* 2405a-b. 1830, *Plantae Asiaticae Rariores* 3: 97. 1832 and *Cytologia* 41: 283–290. 1976, *Ber. Schweiz. Bot. Ges.* 86: 152–203. 1976

(Crushed roots kept on tooth for toothache.)

Lepidagathis hamiltoniana Wall. (*Lepidagathis collina* (Endl.) Milne-Redh.)

Ghana. Herb, pine-scented, trailing to semi-erect, corolla cream with reddish spots

(Roots and leaves paste given for stomach pain.)

in India: bhui-nim

Lepidagathis heudelotiana Nees

Tropical Africa.

See *Prodr.* (DC.) 11: 254. 1847

(Seeds, stem and roots purgative, febrifuge, wound dressing, eye wash.)

Lepidagathis incurva Buch.-Ham. ex D. Don

China, India.

See *Prodromus Florae Nepalensis* 119. 1825 and *Cytologia* 41: 283–290. 1976, *Taxon* 30: 515. 1981

(Fruit juice as an eardrop for pus in the ear. Crushed leaves applied on leech bite; leaves juice applied to stop bleeding from cuts.)

in India: chare-momorkha, vangvattur

in Nepal: hatkate

Lepidagathis rigida Dalzell

India.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 340. 1850

(Drop leaf juice into the ear to expel tooth worms from the mouth.)

in India: vangvattur

Lepidagathis scariosa Nees (*Lepidagathis terminalis* Nees)

Kenya, Zambia.

(Leaves infusion taken for diarrhea, wounds, edema, pneumonia.)

in Kenya: nyamdutiet

Lepidagathis trinervis Nees (*Barleria trinervis* Wall., nom. nud.; *Barleria trinervis* Nees)

Pakistan, India.

See *A Numerical List of Dried Specimens* n. 2500 a, b. 1830, *Plantae Asiaticae Rariores* 3: 96. 1832

(Plant ash along with oil applied on ringworm, swelling, eczema. Ash of the inflorescence used externally on wounds and swellings. Roots soaked in water and the extract drunk to reduce bleeding in piles; root powder taken in dysentery; dried root powder decoction taken orally in pneumonia; roots and leaves infusion used in problems related to dysuria.)

in India: dholi muli, harancharo, pathar-phor-buti

Lepidium L. Brassicaceae (Cruciferae)

From the Greek classical name *lepidion* 'a little scale, small plate, capsule', *lepis*, *lepidos* 'scale', referring to the roots or to the appearance of the small fruits, Dioscorides applied *lepidion* to a Syrian plant, pepperwort, *Lepidium latifolium*, used in cases of scurvy; Plinius and L. Junius Moderatus Columella used Latin *lepidium*, *i* for garden-cress, pepperwort, *Lepidium sativum* L.; see Carl Linnaeus, *Species Plantarum*. 2: 643–645. 1753, *Genera Plantarum*. Ed. 5. 291. 1754, *Mémoires de la Société d'Histoire Naturelle de Paris* 1: 140. 1799, *Systema Naturae*, editio decima sexta 2: 528, 533–534. 1821 and *Ann. Missouri Bot. Gard.* 35(1): 99–106. 1948, *Brunonia* 4(2): 254, 260, 265. 1981 (publ. 1982), *Bull. Bot. Res.*, Harbin 26(3): 293. 2006, *Bot. Zhurn.* (Moscow & Leningrad) 93(12): 1967–1968 (–1969), 1970. 2008.

Lepidium apetalum Willd. (*Lepidium chitungense* Jacot Guill.)

Europe, Russia, China. Annual or biennial herb, erect, glandular and hairy, terminal raceme, small flowers, petals reduced, short pods compressed, flat and winged, seeds very small, weed, roadsides, among grasses

See *Species Plantarum* 2: 643–645. 1753, *Species Plantarum*. Editio quarta 3(1): 439. 1800 and *Rhodora* 1930, xxxii. 29.

1930, *International Organization of Plant Biosystematists Newsletter* 18/19: 8–9. 1992

(Seeds used for cough, dyspnea, oliguria, edema.)

in English: peppergrass, pepperweed

in China: ting li zi

Lepidium capense Thunb. (*Lepidium africanum* (Burm. f.) DC.; *Lepidium africanum* auct. non (Burm.f.) DC.; *Lepidium africanum* sensu DC.; *Lepidium africanum* subsp. *africanum* DC.; *Lepidium africanum* var. *serratum* Thell.; *Lepidium africanum* var. *typicum* Thell.; *Lepidium ambiguum* F. Muell.; *Lepidium capense* sensu Sond. p.p.; *Lepidium decumbens* Desv.; *Lepidium divaricatum* subsp. *linoides* sensu Exell; *Lepidium divaricatum* subsp. *linoides* Thell. var. *subdentatum* sensu Robyns & Boutique; *Lepidium dubium* Thell.; *Lepidium hyssopifolium* Desv.; *Lepidium linoides* Thunb.; *Lepidium schlechteri* Thell.; *Lepidium tasmanicum* Thell.; *Thlaspi africanum* Burm. f.)

South Africa, Madagascar. Herb, corolla white, calyx green, weedy

See *Species Plantarum* 2: 643–647. 1753, *Prodromus Plantarum Capensium*, ... 17. 1768, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 3: 165, 176. 1815, *Systema Naturae* 2: 552. 1821, *Transactions of the Philosophical Society of Victoria* 1: 34. 1855 and *Mitteilungen aus dem Botanischen Museum der Universität Zürich* 28: 309, 311. 1906, *Bulletin de l'Herbier Boissier* sér. II. viii. 627. 1908, *Fl. Madagasc.* 84: 1–32. 1982

(Tubers used for catarrh, cough, stomachache. Leaves embrocation for sprains.)

in English: Cape peppergrass

in Madagascar: mavoanatiahitra

in Southern Africa: qhela (Sotho), uMathoyisa (Zulu)

Lepidium capitatum Hook. f. & Thomson (*Lepidium kunlunshanicum* G.L. Zhou & Z.X. An)

China.

See *Journal of the Proceedings of the Linnean Society* 5: 175. 1861

(Effective as a postcoital contraceptive.)

Lepidium densiflorum Schrad. (*Lepidium neglectum* Thell.)

China.

See *Species Plantarum* 2: 643–645. 1753, *Index Seminum* [Goettingen] 4. 1832 and *Bulletin de l'Herbier Boissier*, sér. 2, 4(7): 708–713. 1904, *Acta Biologica Cracoviensia, Series Botanica* 21: 31–63. 1978, *Le Naturaliste Canadien* 106: 451–461. 1979, *Taxon* 31(2): 344–360. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Botaničeskij Žurnal* (Moscow & Leningrad) 73: 290–293. 1988, *Botaničeskij Žurnal* (Moscow & Leningrad) 81(5): 98–101. 1996

(Astringent, for diarrhea, skin diseases.)

in China: mi hua du xing cai

Lepidium draba L. (*Cardaria draba* (L.) Desv.; *Cardaria draba* (L.) Desv. subsp. *draba*; *Cardaria draba* var. *draba*; *Cochlearia draba* (L.) L.; *Nasturtium draba* (L.) Crantz)

Europe.

See *Species Plantarum* 2: 643–645, 647–648. 1753, *Systema Naturae*, Editio Decima 2: 1129. 1759, *Hortus Kewensis*; or, a catalogue ... The second edition 4: 109–110. 1812, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 3: 163. 1813–1814 and *Taxon* 27: 519–535. 1978, *Opera Botanica* 137: 1–42. 1999

(Stomachic.)

in English: cardaria, heart-podded hoary cress, hoary cardaria, hoary cress, hoary pepperwort, pepper-cress, white top, white weed

in South Africa: peperbos

Lepidium graminifolium L. (*Iberis graminifolia* (L.) (For liver complaints.)

in English: thatch palm irapay

in Brazil: buritizinho, caraná, caranaí, irapay

Lepidogrammitis Ching Polypodiaceae

From the Greek *lepis*, *lepidos* ‘scale’ and *gramma*, *grammatos* ‘a thread, line, letter’, fronds with scales.

Lepidogrammitis drymoglossoides (Baker) Ching (*Lemmaphyllum drymoglossoides* Ching; *Polypodium drymoglossoides* Baker) (from the Greek *drymos* ‘a wood, forest, thicket’ and *glossa* ‘tongue’, referring to the habit and fronds.)

China.

See *J. Bot.* 170. 1887 and *Sunyatsenia* 5(4): 258. 1940

(Whole plants blood purifier, to treat scrofula.)

in China: bao shu lian

Lepidopetalum Blume Sapindaceae

From the Greek *lepis*, *lepidos* ‘scale’ and *petalon* ‘petal, leaf’, referring to the scales of the petals, see *Genera Plantarum* 246. 1789, *Rumphia* 3: 171. 1849.

Lepidopetalum jackianum Radlk.

India.

See *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* ix. 623. 1879

(For conjunctivitis, leaves squeezed into eyes.)

in India: lamannng

Lepidopetalum perrottetii Blume

Philippines.

See *Rumphia* 3: 172. 1849

(Powdered seeds used to kill wild hogs.)

in Philippines: bigas, dapil, dila dila, malakakao, marinsiano, paga paga, sagadan, salab, tolotigre, ualis, uas

Lepionurus Blume Opiliaceae

From the diminutive of *lepos* ‘rind, scale, husk’, Greek *lepion* ‘scurf, thin rind’ and *oura* ‘a tail’, see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië.* 17: 1148. 1826 [Oct 1826–Nov 1827].

Lepionurus sylvestris Blume

Malaysia, Java.

See *Bijdragen tot de flora van Nederlandsch Indië.* 17: 1148. 1826 [Oct 1826–Nov 1827]

(Leaves juice applied on skin eruptions and inflammation; leaves decoction taken as a soup for functioning of the uterus. For headache, pound the roots and poultice.)

in English: cat berry

in China: lin wei mu

in India: anpangthuam

Malayan names: chemperai gajah, chiprah, kucing kucing

Lepisanthes Blume Sapindaceae

From the Greek *lepis*, *lepidos* ‘scale’ and *anthos* ‘a flower’, scales on the flowers; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië.* 236–238, 460. 1825 and *Comptes Rendus Hebdomadaires des Séances de l’Académie des Sciences* 182: 713. 1926.

Lepisanthes amoena (Hassk.) Leenh. (*Otophora imbricata* Blume; *Otophora spectabilis* Blume)

Indonesia. Monoecious shrub or small tree, fruit a 3-lobed berry orange-brown, in forest

See *Blumea* 17(1): 33–91. 1969

(The fruits astringent.)

in Indonesia: buah sobo, kelampa sowa, langir

in Malaysia: kayu mata hari

Lepisanthes andamanica King

India, Andaman. Tall trees, white flowers, calyx lobes pubescent

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 65(3): 428. 1896

(Leaves for cough, infusion of medicinal bath after fever.)

Lepisanthes cuneata Hiern

Malaysia.

(For cough, pound the leaves, extract the juice and take.)

Malay names: ruku-ruku, teradang, terentang

Lepisanthes fruticosa (Roxb.) Leenh. (*Otophora cambodiana* Pierre; *Otophora fruticosa* Blume; *Otophora resecta* Radlk.)

Thailand, Malesia. Shrub or tree, a liana, leaves usually paripinnate, fruit a subglobose berry dark red to black, seed flattened on one side

(Root used in a compound poultice to relieve itching.)

in English: luna nut

in Cambodia kândák

in Indonesia: mojawontu

in Laos: hwàd khaaz

in Malaysia: setengok

in Philippines: ara, buli-buli, linaunau

in Thailand: chammaliang, mathao, phumriang

Lepisanthes kunstleri King

SE Asia, Perak.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 65(3): 427. 1896

(For broken bones, pound the bark with leaves and poultice. For stomachache boil the root and drink the decoction.)

Malay names: derajang, terentang

Lepisanthes perrieri (Choux) Buerki, Callm. & Lowry (*Aphania rubra* (Roxb.) Radlk.; *Aphania rubra* Radlk.; *Aphania senegalensis* Radlk.; *Aphania senegalensis* (Juss. ex Poir.) Radlk.; *Aphania senegalensis* fo. *perrieri* (Choux) Capuron; *Lepisanthes senegalensis* (Poir.) Leenh.; *Lepisanthes senegalensis* (Juss. ex Poir.) Leenh.; *Manongarivea perrieri* Choux; *Sapindus ruber* (Roxb.) Kurz; *Sapindus ruber* Kurz; *Sapindus senegalensis* Juss. ex Poir.; *Sapindus senegalensis* Poir.; *Scytalia rubra* Roxb.)

Tropical Africa, India. Shrub

See *De Fructibus et Seminibus Plantarum...* 1: 197. 1788, *Encyclopédie Méthodique, Botanique* (Lamarck) 6(2): 666. 1805, *Hort. Bengal.* 29. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 272–273. 1832, *Forest Flora of British Burma*

1: 298. 1877, *Sapind. Holl.-Ind.* 21, 69. 1877, *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* viii. (1878) 238. 1878 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 182: 713. 1926, *Mém. Acad. Malgache*, Fasc. IV. 34, 36. 1927, *Blumea* 17: 85–87. 1969, *Mémoires du Muséum National d'Histoire Naturelle. Nouvelle Série. Série B, Botanique* 19: 82. 1969, *Adansonia*, sér. 3 31(2): 304. 2009

(Contact therapy, a piece of root tied round the neck in enlargement of neck.)

in China: dian chi cai

in India: phan-phe, thakuri

Lepisanthes rubiginosa (Roxb.) Leenh. (*Erioglossum edule* (Blume) Blume; *Erioglossum edule* var. *album* Blume; *Erioglossum edule* var. *corymbosum* Teijsm. & Binn.; *Erioglossum edule* var. *fraxinifolia* (DC.) Blume; *Erioglossum edule* var. *genuina* Blume ex Koord. & Valet.; *Erioglossum edule* var. *subcorymbosum* Blume; *Erioglossum rubiginosum* (Roxb.) Blume; *Lepisanthes hirta* Ridl.; *Moulinsia rubiginosa* (Rox.) G. Don.; *Sapindus edulis* Blume; *Sapindus fraxinifolia* DC.; *Sapindus rubiginosus* Roxb.; *Uitenia edulis* (Blume) Steud.)

Malaysia, Australia. Shrub or small tree, dense canopy, low branches, leaves alternate, inflorescences compound racemose densely flowered, flowers in clusters on erect panicles, male and hermaphrodite flowers in one cluster, small flowers white and fragrant, 3-carpellate ripe fruits purple and black, fleshy mesocarp, ripe fruits sometimes eaten, in disturbed and open habitats, understory

See *Plants of the Coast of Coromandel* 1: 44, pl. 62. 1795, *Bijdragen tot de flora van Nederlandsch Indië* 229, 237. 1825, *Rumphia* 3: 118. 1847 and *J. Fed. Malay States Mus.* 10: 132. 1920, *Blumea* 17(1): 33–91. 1969, *Sida* 17(4): 752. 1997, *Phytochemistry* 51(8): 1039–1041. 1999

(Fruit astringent. Seeds decoction in whooping cough. The roots boiled used to treat coughing; roots and leaves decoction febrifuge. Leaves poultice for itch; leaves of *Erioglossum rubiginosum* mixed with leaves of *Physalis minima* pounded in coconut oil and applied to the body as febrifuge; leaves decoction febrifuge. Leaves abortifacient, pounded and mixed in water to avoid pregnancy; leaf juice given for menstrual irregularities.)

in Borneo: borobogan, damai, kundurui, lipupudsu, suang rason

in China: ci cai

in India: ahe, anga banga, chamraw, chamrev, ritha

in Malaya: kelat layu, mertajam, terajah, terajan

Lepisanthes senegalensis (Juss. ex Poir.) Leenh. (*Aphania senegalensis* (Juss. ex Poir.) Radlk.; *Aphania senegalensis* (Juss.) Radlk.; *Aphania silvatica* Hutch. & Dalziel; *Aphania silvatica* A. Chev. ex Hutch. & Dalz.; *Lepisanthes*

senegalensis (Juss.) Leenh.; *Nephelium rubrum* G. Don; *Ornitrophe thyrsoides* Schumach. & Thonn.; *Sapindus abyssinicus* Fresen.; *Sapindus senegalensis* Juss. ex Poir.; *Schmidelia thyrsoides* (Schumach. & Thonn.) Baker)

Tropical Africa. Tree, dense, spreading crown, drooping foliage, small fragrant flowers greenish-white, female flowers said to be more or less unpleasantly scented, ripe fruits red, black dark seeds, ripe fruits fleshy and eaten raw, in moist places, riparian locations, forest, evergreen forest, savanna

(Bark antidote; bark and leafy twig for pulmonary troubles. Fruit edible but the seed said to be poisonous or repellent. Leaves vermifuge. Leaves and seeds reported to be poisonous to goats and the flowers poisonous to fish.)

in English: Senegal cherry

in Congo: bukuku, gwangwe, mukala

in Nigeria: eyindie (Yoruba)

in Senegal: bueč, bul, bulao, kélibudâgéri, kulugengeno, kumen rofokor, kurdêden, kurudiendieng, sarenja

in Tanzania: kihari, mduru-mweupe, mguena, mgwena, mkungulungu, mlangwe, msaro, nghuya, oleragai

Lepisorus (J. Sm.) Ching Polypodiaceae

From the Greek *lepis*, *lepidos* 'scale' and *soros* 'a vessel for holding anything, a cinerary urn, a coffin, a heap, mound', see *Species Plantarum*. Editio quarta [Willdenow] 5: 211. 1810, *Annales des Sciences Naturelles* (Paris) 5: 463. 1825, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 398. 1841, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 60. 1842 and *Bulletin of the Fan Memorial Institute of Biology* 4(3): 56–58, 83. 1933, *Fern Gaz.* 11(2–3): 141–62. 1975.

Lepisorus bicolor (Takeda) Ching (*Lepisorus bicolor* Ching; *Pleopeltis bicolor* (Takeda) Sledge; *Polypodium bicolor* Mett.; *Polypodium bicolor* (Takeda) Alston ex Schelpe; *Polypodium excavatum* var. *bicolor* Takeda; *Polypodium oligolepidum* C. Chr.; *Polypodium oligolepidum* Baker)

China, Nepal.

See *Gard. Chron.* n.s., 14. 494. 1880, *Notes from the Royal Botanic Garden, Edinburgh* 8(39): 276, 279, 281. 1915, *Bulletin of the Fan Memorial Institute of Biology* 4(3): 66–68. 1933, *American Fern Journal* 44(2): 59. 1954, *Bulletin of the British Museum (Natural History)*, *Botany* 2(5): 138. 1960, *Aspects Pl. Sci.* 11: 459–465. 1989

(Rhizome juice given against the fever.)

in Nepal: harchur

Lepisorus contortus (H. Christ) Ching (*Lepisorus contortus* Ching; *Lepisorus jinshananensis* Ching; *Pleopeltis contorta* (H. Christ) Alston & Bonner; *Polypodium contortum* Christ;

Polypodium contortum (H. Christ) H. Christ; *Polypodium lineare* fo. *contortum* (H. Christ) Takeda; *Polypodium lineare* var. *contortum* H. Christ)

China.

See *Nuovo Giornale Botanico Italiano*, new series 4(1): 98, pl. 1, f. 3. 1897 and *Botanical Gazette* 51(5): 347. 1911, *Notes from the Royal Botanic Garden, Edinburgh* 8(39): 270. 1915, *Bulletin of the Fan Memorial Institute of Biology* 4(3): 90–91. 1933, *Candollea* 15(7): 209. 1956, *Bulletin of Botanical Research*, Harbin 3(4): 4–5. 1983

(Plant infusion in diarrhea, stomach and kidney troubles. Leaves for bone fractures, burns and wounds.)

in Bhutan: brag-spos-pa

in India: thogk

Lepisorus nudus (Hook.) Ching (*Drynaria nuda* (Hook.) Fée; *Drynaria nuda* Fée; *Lepisorus nudus* Ching; *Phymatodes nuda* J. Sm.; *Phymatodes nuda* (Hook.) J. Sm.; *Pleopeltis nuda* Hook.; *Polypodium loriforme* Wall. ex Mett.; *Polypodium loriforme* Hook.; *Polypodium loriforme* Wall. ex Hook.; *Polypodium loriforme* Wall.; *Polypodium nudatum* Roxb.; *Polypodium nudiusculum* Kunze; *Polypodium nudum* Mett.; *Polypodium nudum* (Hook.) Kunze; *Polypodium nudum* Kunze; *Polypodium nudum* G. Forst.)

China, India.

See *Fl. Ins. Austr.* 82. 1786, *Exotic Flora* 1: 63, t. 63. 1823, *A Numerical List of Dried Specimens* [Wallich] n. 271. 1828, *Calcutta J. Nat. Hist.* 4: 491. 1844, *Linnaea* 23: 281. 1850, *Linnaea* 24: 253. 1851, *Mémoires sur les Familles des Fougères* 5: 270. 1852, *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 1: 92, pl. 1, f. 49–50. 1856, *The Botany of the Voyage of H.M.S. ~Herald~* [Seemann] 10: 425. 1857 and *Notes Bot. Gard. Edinb.* 8. 277. 1915, *Bulletin of the Fan Memorial Institute of Biology* 4(3): 83. 1933, *J. Cytol. Genet.* 4: 97–104. 1969, *Nucleus* 20: 105–108. 1977, *Glimpses Pl. Res.* 4: 98–130. 1979

(Antibacterial.)

Lepistemon Blume Convolvulaceae

Greek *lepis*, *lepidos* 'scale' and *stemon* 'stamen, thread, filament', a scale at the base of each stamen; see K.L. von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 722. 1826, *Catalogus Plantarum in Horto Botanico Bogoriensi Culturarum Alter* 140. 1844, *Notul. Pl. Asiat.* (Posthum. Pap.) 4: 286. 1854, *Journal of the Linnean Society, Botany* 5: 131, 156. 1861 and *Candollea* 14: 11–60. 1952.

Lepistemon owariense (P. Beauv.) Hallier f. (*Convolvulus binectarifer* Wall.; *Convolvulus flavescens* (Blume) D. Dietr.; *Convolvulus owariensis* Spreng.; *Convolvulus urceolatus* Spreng.; *Ipomoea owariensis* P. Beauv.; *Ipomoea repandula* Baker; *Ipomoea urceolata* R. Br.; *Lepistemon*

africanum Oliv.; *Lepistemon binectariferum* (Wall.) F. Muell.; *Lepistemon urceolatus* F. Muell.)

Ghana. Climbing vine, robust, creeping, brown-pubescent, herbaceous, twining, white latex, white-cream flowers in short axillary cymes, fruit densely bristly, leaves eaten as spinach, duiker food

See *Prodromus Florae Novae Hollandiae* 485. 1810, *Flore d'Oware* 2: 41, t. 82. 1816, *Flora Indica*; or descriptions of Indian Plants 2: 47–48. 1824, *Bijdragen tot de flora van Nederlandsch Indië* 13: 722. 1826 [24 Jan 1826], *Synopsis Plantarum* 1: 680. 1839, *Syst. Census Austral. Pl.* 94. 1882, *Revisio Generum Plantarum* 1: 446. 1891 and *Etud. Fl. Katanga* 1: 112. 1902, *Annales du Musée du Congo. Série 1, Botanique*, 112. 1903, *Bot. Jahrb. Syst.* xlv. 219. 1910

(Abortifacient.)

in China: lin rui teng

in Tanzania: igubhi, malyimbavalva

Leptactina Hook.f. Rubiaceae

From the Greek *leptos* 'slender, thin, weak' and *aktis* 'a ray', referring to the corolla lobes, see *Hooker's Icon. Pl.* 11: 74, sub t. 1092. 1871.

Leptactina densiflora Hook.f. (*Leptactina densiflora* var. *glabra* Hutch. & Dalziel)

Tropical Africa. Tree or shrub, fruit with persistent calyx

See *Hooker's Icon. Pl.* 11: 74, sub t. 1092. 1871 and *Fl. W. Trop. Afr.* 2: 84. 1931

(Stem bark and leaves antileishmanial, stomachic, febrifuge.)

Leptadenia R. Br. Asclepiadaceae (Apocynaceae)

From the Greek *leptos* 'slender, thin' and *aden* 'a gland', see *On the Asclepiadeae* 23. 1810 and *New Phytologist* 51(2): 198–209. 1952, Bruyns, P.V. & P.I. Forster, "Recircumscription of the Stapelieae (Asclepiadaceae)." *Taxon* 40(3): 381–391. 1991, *Kew Bulletin* 1955: 265–292. 1995.

Leptadenia arborea (Forssk.) Schweinf. (*Cynanchum arbo-reum* Forssk.; *Cynanchum heterophyllum* Delile; *Leptadenia abyssinica* Decne.; *Leptadenia clavipes* S. Moore; *Leptadenia delilei* Decne.; *Leptadenia forskalii* G. Don; *Leptadenia heterophylla* (Delile) Decne.; *Leptadenia pallida* Hochst. ex Decne., nom. inval.; *Leptadenia schimperiana* Hochst.)

Algeria, Egypt, Abyssinia, Sudan, Ethiopia. Weedy lianas, slender climber, tomentose twining shrub, fruit eaten when ripe, forage for camels, sheep and goats, scrub vegetation

See *Species Plantarum* 1: 212–213. 1753, *Flora Aegyptiaco-Arabica* 53. 1775, *Voyage à Méroé* 4: 47, t. 63. 1826–1827, *A General History of the Dichlamydeous Plants* 4: 124. 1837, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 270–271. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 628–629. 1844 and *Arabische Pflanzennamen aus Aegypten, Algerien und Jemen ...* 167. 1912, *Journal of Botany, British and Foreign* 50: 364. 1912, El-Hassan A. et al. "Bioactive constituents of *Leptadenia arborea*." *Fitoterapia*. 74(1–2): 184–187. 2003

(Stem and root in treating gonorrhoea, swellings, and nose disease. Syringaresinol has shown an inhibitory effect against acetylcholinesterase.)

in Mali: al lendé, lahiri

in Sudan: sha'aloab

Leptadenia hastata Vatke (*Cynanchum hastatum* Pers., nom. illeg., non *Cynanchum hastatum* Lam.; *Cynanchum hastatum* Lam.; *Cynanchum lanceolatum* Poir.; *Cynanchum lancifolium* Schumach.; *Cynanchum lancifolium* Schumach. & Thonn.; *Cynanchum scabrum* Schumach.; *Leptadenia cordata* Hochst. ex Decne.; *Leptadenia hastata* Decne.; *Leptadenia lancifolia* (Schumach.) Decne.; *Leptadenia lancifolia* (Schumach. & Thonn.) Decne.; *Leptadenia lancifolia* var. *scabra* Decne.; *Tylophora incana* Brunner)

North Africa, Ghana, Nigeria, Niger, western Sahel. Vine, perennial, many-stemmed climber, prostrate, creeping, trailing, spreading, woody base and stem, foliage and stems glaucous, a clear greenish exudate, light green leaves succulent to leathery, small cream or yellowish green flowers, fragrant, fruit green with abundant yellowish exudate, green seeds with silky white hairs, famine food, leaves used as a vegetable, young shoot and flowers eaten cooked, the leaves camel, goat and cattle fodder, in bushland, riverine bushland

See *Species Plantarum* 1: 212–213. 1753, *Encyclopédie Méthodique, Botanique* 2: 236. 1786, *Syn. Pl.* 1: 273. 1805, *Prodromus Florae Novae Hollandiae* 460. 1810, *Encyclopédie Méthodique. Botanique ... Supplément* 2: 430. 1812, *Beskrivelse af Guineiske planter* 150–152. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 170–172. 1828, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 269. 1838, *Flora* 23(Beibl. 2): 26. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 551, 628. 1844, *Linnaea* 40: 217. 1876 and *J. Nutr.* 53(1): 57–69. 1998, *Phytother. Res.* 15(2): 131–134. 2001, *Economic Botany* 55: 276–289. 2001, Lapo, R.A. et al. "[Study of the abortifacient effects of *Leptadenia hastata* Pers. (Decne).]" *Dakar Med.* 48(3): 222–225. 2003, *Afr. J. Trad. Comp. Alt. Med.* 2(1): 13–24. 2005

(Abortifacient, topical antiinflammatory, anti-diarrheal, for venereal diseases; sap from the stem applied to wounds. The plants contain significant amounts of selenium and

phosphorus; triterpenoids from the latex. Raw leaves rich in vitamin A, calcium, an especially good source of lutein and beta-carotene. Magic properties, love charm, protection. Some abortions on horses and dromedaries chargeable to this species. Veterinary medicine, roots given to horses and cattle for flatulence and colic.)

in Ethiopia: cheila, hayilla, kayilla, metsa, moroh

in Gambia: futakadaf, safato, so-ora

in Ghana: benaduru, yadiya

in Guinea: son-niugu

in Guinea-Bissau: bissacra

in Ivory Coast: iriban, kosafila, yéfuké hinzri

in Kenya: chesakisyon, ekamong'o, moroh

in Mali: anu, gao

in Niger: dula, fattaga

in Nigeria: adizindir, alizindir, ataruhu, dan baraawoo, dan zindiri, danbaakuwa, iran-aji igbo, isanaje-igbó, kalimbo, njera, sobotoro, sobotorooji, ya 'diya, yaadiyaa, yaadiyowol, yadiya

in Senegal: brogbé, darhat, futakadaf, gasu, gasub, ingasub, ndis wadan, ngazu, nkarkat, sahatt, sapato, sapatoy, sarafat, sarafaté, sarafato, savato, sawat, sawato, sora, talal, tarhat

in Upper Volta: benaduru, kosafila, lélongo, yadiha

Leptadenia lancifolia Decne. (*Cynanchum lancifolium* Schumach.; *Leptadenia lancifolia* (Schumach.) Decne.; *Leptadenia lancifolia* (Schumach. & Thonn.) Decne.)

Tropical Africa.

See *Beskrivelse af Guineiske planter* 150–151. 1827, *Ann. Sci. Nat., Bot.* sér. 2, 9: 269. 1838

(Roots for flatulence, stomachache, venereal diseases.)

Leptadenia madagascariensis Decne. (*Leptadenia bojeriana* Decne.)

Madagascar. Vine, slender, twining climber also growing prostrate, shrubby, well branched, glaucous, stems succulent, white-yellowish latex, leaves opposite rather fleshy, flowers greenish-white to orange, petals pubescent, fruit green, sweet smelling in the evening

See *On the Asclepiadeae* 23. 1810, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 629. 1844 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 6: 131–240. 1908, *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 2: 209–464. 1914, *Bulletin du Muséum National d'Histoire Naturelle* 29: 448–451. 1923, *Bulletin du Muséum National d'Histoire Naturelle* 31: 394–401. 1925, *Bulletin du Muséum National d'Histoire Naturelle* 32: 307–314. 1926, *Bulletin du Muséum National d'Histoire Naturelle* 33: 193–200. 1927, *Bulletin du Muséum National d'Histoire*

Naturelle 34: 367–370. 1928, *Archives de Botanique, Bulletin Mensuel* 4: 97–112. 1930, *Catalogue des Plantes de Madagascar, Asclep.* 1(9): 5–24. 1931

(Medicinal, antimalarial, used for stomachache.)

in Madagascar: dokoterakely, kivahivahy, levafotsy, mojoy, mozy, taratarika, taritarika, taritarike, taritariky, taritorika, tsitaritariky, vahimavo, vahironto, vahirontona, vahirot

Leptadenia pyrotechnica (Forssk.) Decne. (*Cynanchum pyrotechnicum* Forssk.; *Gymnema spartium* (Wight) Wall.; *Leptadenia gracilis* Decne.; *Leptadenia jacquemontiana* Decne.; *Leptadenia spartium* Wight & Arn.; *Microloma pyrotechnicum* (Forssk.) Spreng.; *Sarcostemma pyrotechnicum* (Forssk.) Schult.)

India, Ethiopia, Saudi Arabia, Sudan, Egypt, Pakistan. Shrub, erect, leafless, twiggy, bitter watery sap, deeply rooted, petals pale cream, flowers clustered at joints on stems, eaten as a vegetable (simple kheep vegetables, spicy kheep vegetable, kadi, raita, fried kheep, kheep parantha, plain kheep pickle and kheep pickle with green mango), desert plant, sand-dune plant, pionier, grazed by camels and all stock, the slimy fruits, young twigs, seeds and the tuberous root often eaten by nomads

See *Species Plantarum* 1: 212–213. 1753, *Flora Aegyptiaco-Arabica* 53. 1775, *On the Asclepiadeae* 42. 1810, *Prodromus Florae Novae Hollandiae* 461–463. 1810, *Systema Vegetabilium* 6: 116. 1820, *Systema Vegetabilium*, editio decima sexta 1: 855. 1824, *Contributions to the Botany of India* 48. 1834, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 269–270. 1838, *A Numerical List of Dried Specimens* sub n. 8199. 1847 and *Haryana Journal of Horticultural Sciences* 33(3/4): 289–290. 2004, G. Cioffi et al. "Pregnane Glycosides from *Leptadenia pyrotechnica*." *J. Nat. Prod.* 69(4): 625–35. 2006

(Used in Ayurveda. Leaves crushed into a paste and applied on thorn injury; leaves juice for snakebite. Cooked pods eaten for dropsy and rheumatism; for bone fracture, young fruits crushed, ground and made into a paste put over the affected area. Branches diuretic, a macerate of the twigs is taken for urine-retention; tender twigs crushed, boiled and tied on thorn injury. A macerate of the seeds used as an eye lotion. Used as a restorative and antiproliferative.)

in Arabic: assabai, assabay, kalenba, kanouri, kizzen, marakh, merekh, markh, titarek, titorek

in Chad: kalumbo, kalimbo, sabele, sabeil, saabe

in Mali: anah, asabai, assabai, eneg, hana, saabe, saabé, sabaie, sabeil, sabel, titarik

in Mauritania: titarik, titasrik

in Niger: am dokum al kelb, anah, asabai, eneg, hana, kalembo, kalimbo, kalimbó, kalumbo, kezen, kozeum, marhaie, marakh, retem, rtem, saabe, sabeil, sabele

in Nigeria: kalimbó, marakh, namijin yaadiyaa

in Sahara: ana, titarek

in Sudan: kalimbo, kalumbo, saabe, sabeil, sabele

in Senegal: sabaie, suwalehul, tiaptori, titorekt

in Somalia: mirug, moroh

in India: jivanti, kheemp, kheenp, kheep, khimp, khimparlo, khimparlo, khip, kip, mahameda, thaliawar

in Pakistan: kheep, khip, kip

Leptadenia reticulata (Retz.) Wight & Arn. (*Cynanchum reticulatum* Retz.; *Daemia reticulata* (Retz.) Moon; *Leptadenia reticulata* Wight & Arn.)

India, Sri Lanka, Myanmar. Creeping or climbing vine, twining, many-branched, bark corky yellowish brown, greenish milky sap, leaves simple, flowers in many-flowered cymes, corolla pale yellow, straight follicles beaked and woody, seeds silky, famine food, leaves and tender shoots eaten as a vegetable, leaves boiled in water then used in preparing bread by mixing with bajri (millet) or jowari (*Sorghum vulgare* Pers.) flour, grows in arid habitats and poor soils

See *Species Plantarum* 1: 212–213. 1753, *Observationes Botanicae* 2: 15. 1781, *Botanisches Wörterbuch* 1: 31. 1797, *A Catalogue of the Indigenous and Exotic Plants Growing in Ceylon* 20. 1824, *Contributions to the Botany of India* 47. 1834 and *Catalogue des Plantes de Madagascar, Asclep.* 1(9): 5–24. 1931, *Indian Vet. J.* 44(11): 967–74. 1967, *Indian J. Exp. Biol.* 13(5): 448–9. 1975, *Planta Med.* 27(4): 395–400. 1975

(Used in Ayurveda. Bitter tonic given for weak debility, stimulant, anti-bacterial, useful in fever, cough, asthma, constipation. Seeds used as diuretic. Leaves and roots useful in various skin diseases, inflammation of the skin and on wounds; leaves juice in uterine troubles; shoots boiled a wash for scabies, boils, itching; leaves chewed and the sap swallowed for asthma and cough. Leaves and unripe fruits in asthma, bronchitis, lung troubles, erysipelas and for attaining better eye sight. Aphrodisiac, expectorant, carminative, antidote for poisons and snakebites, lactogenic or galactagogue, cooling. Veterinary medicine, plant juice given orally to treat worm infestation and as a galactagogue, a paste applied to treat wounds.)

in India: affo, devdali, dodi, dori, harandodi, jeevanti, jivani, jivanti, kalasa, kharkhodi, khirdodi, madhusrava, mukku tummuudu teega, palatheega, palatiga

in Sri Lanka: palacoody

Leptandra Nutt. Scrophulariaceae

From the Greek *leptos* 'slender, thin' and *aner, andros* 'male', referring to the stamens.

Leptandra virginica Nutt.

North America. Herbaceous perennial, slender simple stem, horizontal woody rootstock, lanceolate finely serrate leaves, white flowers

(Cholagogue, cathartic, emetic, laxative, diaphoretic, anti-spasmodic, tonic, bitter, alterative, antiseptic, useful in diarrhea, enteritis, chronic dysentery, liver congestion. A very strong purgative and emetic.)

in English: beaumont root, black root, Culver's root, tall speedwell, tall veronica

Leptaspis R. Br. Poaceae (Gramineae)

Greek *leptos* 'slender' and *aspis* 'a shield', the fruit is enclosed in the enlarged glume, type *Leptaspis banksii* R. Br.; see Robert Brown, *Prodromus florum Novae Hollandiae*. 211. London 1810, *Synopsis Plantarum Glumacearum* 1: 8, 416. 1854, *Enumeratio Plantarum Zeylanicae* 5: 357. 1864, *Bulletin de la Société Botanique de France* 19: 326. 1872, *Boletim da Sociedade Broteriana* 5: 211, t. G, f. A. 1887, *Fl. Cap.* 7: 319. 1898 and *Bot. Arch.* 1: 212. 1922, *Bulletin du Muséum National d'Histoire Naturelle* 30: 513. 1924, *Bulletin of Miscellaneous Information Kew* 1927: 40, 78. 1927, *Botanical Magazine* (Tokyo) 56: 3. 1942, *Reinwardtia* 2: 305. 1953, *Taiwania* 16(2): 214. 1971, *Phytologia* 56: 299–304. 1984, *Smithsonian Contributions to Botany* 65: 1–27. 1987 [The Phareae and Streptogyneae (Poaceae) of Sri Lanka: a morphological-anatomical study.], *Flora of Australia* 43: 84, 86, 93. 2002, *Am. J. Bot.* 90: 93–106. 2003, *African Journal of Ecology* vol. 42, issue s1: 48–50. 2004.

Leptaspis urceolata (Roxb.) R. Br. (*Leptaspis manillensis* Steud.; *Leptaspis zeylanica* Nees ex Steud.; *Pharus urceolata* Roxb.; *Scrotochloa urceolata* (Roxb.) Judz.)

Malaysia, Philippines, West Africa, Pacific. Perennial, erect, broad elliptic leaves tapering at both ends, pseudopetioles glabrous, slender panicles in whorls, sticky utricles covered with hooked hairs, pistillate florets oblong, growing in rocky dry areas in forest

See *Flora Indica; or, descriptions of Indian Plants* 3: 611–612. 1832, *Plantae Javanicae Rariores* 1: 23, t. 6. 1838, *Synopsis Plantarum Glumacearum* 1: 8. 1855 [1853] and *Phytologia* 56(4): 300. 1984

(Root decoction drunk as a postpartum remedy, and a tonic to induce fertility. Leaves used in a complex preparation to treat leprosy and paralysis. Leaves decoction drunk as a cure for fevers and a poultice of the boiled leaves applied to sprains; leaves juice an ingredient in a remedy for diarrhea and abdominal colic.)

in English: shield grass

in Indonesia: balik putar

in the Philippines Isl.: alaplal, baliotus, budhak-budhak, handalokot, madlong, rokok-dokot, salingdagat, talingagito

Malayan names: getah puyoh, lanchong, pepinang, rumput babi, sayong tikus, sinai anjing, tampok gelang, tampok relang

in New Guinea: shakhuau

in Thailand: nieo maa, niao ma, lek nok khum, nok khum

Leptaspis zeylanica Nees ex Steud. (*Leptaspis cochleata* Thwaites; *Leptaspis comorensis* A. Camus; *Leptaspis conchifera* Hack.)

Tropical Africa, Asia, Sri Lanka. Herbaceous, rhizomatous, erect, ascending, sprawling, spreading, creeping, rooting at the lower nodes, stiff inflorescence paniculate, terrestrial, tillering, leaves lanceolate, inflated fruits, growing in forest, undergrowth, forest shade

See *Synopsis Plantarum Glumacearum* 1: 8. 1853, *Enumeratio Plantarum Zeylanicae* 5: 357. 1864, *Boletim da Sociedade Broteriana* 5: 211, t. G, f. A. 1887 and *Handb. Fl. Ceylon* 5: 191. 1900, *Bulletin du Muséum National d'Histoire Naturelle* 30: 513. 1924, *Grasses of Ceylon* 22. 1956, *Grasses of Burma ...* 617. 1960

(Leaves in Turkish bath to remove Guinea worms; a poultice of the leaves used on wounds, cuts.)

in Ghana: abofo kahyire, etwa

in Liberia: pini gon

in Madagascar: tsingolovolo

in Sierra Leone: esuta, hongu

in Zaire: sasani

Leptochilus Kaulf. Polypodiaceae

Greek *leptos* 'delicate, thin, slender, small' and *chilos* 'a lip'; see Georg Friedrich Kaulfuss, *Enumeratio filicum*. 147, pl. 1, f. 10. Lipsiae [Leipzig] 1824.

Leptochilus decurrens Blume (*Acrostichum variabile* Hook.; *Anapausia decurrens* (Blume) C. Presl; *Anapausia decurrens* C. Presl; *Anapausis decurrens* (Blume) C. Presl; *Colysis decurrens* (Wall. ex Hook. & Grev.) Nakaike, nom. illeg.; *Colysis decurrens* (Blume) Panigrahi; *Colysis decurrens* (Blume) Manickam & Irudayaraj; *Gymnopteris feei* T. Moore; *Gymnopteris variabilis* (Hook.) Bedd.; *Gymnopteris variabilis* Bedd.; *Leptochilus laciniatus* var. *simplex* Ching; *Leptochilus lanceolatus* Fée; *Leptochilus lanceolatus* Zoll.; *Paraleptochilus decurrens* (Blume) Copel.)

Indonesia, India. Fern, lithophyte on open rocks along stream

See *Enumeratio Plantarum Javae* fasc. 2: 206. 1828, *Epimel. Bot.* 186. 1851, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 546. 1851, *Syst. Verz.* 33. 1854, *Ferns British India* t. 272. 1868 and *Genera Filicum* [Copeland] 198, t. 7. 1947, *Sci. & Cult.* 41: 181–183. 1975, *Nucleus* 20: 105–108. 1977, *Aspects Pl. Sci.* 6: 119–181. 1983, *J. Cytol. Genet.* 22: 156–161. 1987, *New Fl. Jap. Pterid.* 840.

1992, *Taxon* 46(2): 265–268. 1997, *Blumea* 42: 279–282. 1997, *Acta Phytotaxonomica Sinicae* 37: 145–152. 1999

(Antibacterial, for skin diseases.)

Leptodactylon Hook. & Arn. Polemoniaceae

Greek *leptos* 'slender' and *daktylos* 'a finger', see *Encyclopédie Méthodique, Botanique* 1: 603. 1785, *The Botany of Captain Beechey's Voyage* 369, pl. 89. 1839.

Leptodactylon pungens (Torr.) Nutt. (*Cantua pungens* Torr.) North America.

See *Journal of the Academy of Natural Sciences of Philadelphia* 1: 157. 1848

(Used for scorpion stings, snakebites, colds, kidney disease, wounds, swollen eyes, sores.)

in English: granite-gilia, granite pricklygilia

Leptodermis Wallich Rubiaceae

From the Greek *leptos* 'slender' and *derma, dermatos* 'skin', *leptodermia* 'thinness of skin', *leptodermos* 'with thin or fine skin', referring to the calyx or to the bark or to the wall of the fruits, see *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 191. 1824.

Leptodermis lanceolata Wall. (*Hamiltonia fruticosa* D. Don; *Hamiltonia suaveolens* D. Don, nom. illeg.; *Hamiltonia suaveolens* (Roxb.) Roxb.; *Hamiltonia suaveolens* Roxb.)

Himalaya, Nepal. Shrubs, scabrid leaves, hairy stipules, creamy-white flowers in pedunculate clusters, dried leaves used in preparation of incense, leaves have fetid smell when crushed

See *Hort. Bengal.* 15. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall. 2: 191, 223. 1824, *Prodr. Fl. Nepal.*: 137. 1825, *Fl. Ind.*, ed. Carey, 1: 554. 1832

(Root paste for curing boils and blisters of the mouth, tongue, throat. Sedative.)

in Nepal: maru

Leptoderris Dunn Fabaceae (Millettieae)

From the Greek *leptos* 'slender' plus *Derris*, see *Bulletin of Miscellaneous Information Kew* 1910(10): 386. 1910.

Leptoderris fasciculata (Benth.) Dunn (*Derris fasciculata* (Benth.) Baker; *Leptoderris fasciculata* Dunn; *Leptoderris ferruginea* De Wild.; *Leptoderris rutshuruensis* Hauman; *Lonchocarpus fasciculatus* Benth.; *Lonchocarpus* sp. A Hepper)

Tropical Africa. Perennial non-climbing tree, woody vine, liana, leaves coriaceous

See *Journal of the Proceedings of the Linnean Society. Botany*. 4(Suppl.): 94, 100. 1860, *Flora of Tropical Africa* 2: 246. 1871 and *Bulletin of Miscellaneous Information Kew* 1910(10): 390. 1910, *Bull. Jard. Bot. État Bruxelles* 7: 231. 1920, *Bull. Jard. Bot. État Bruxelles* 24: 226. 1954, *Willdenowia* 15: 521–527. 1986

(Bark for dysentery, cough.)

Leptonychia Turcz. Sterculiaceae (Malvaceae)

Greek *leptos* ‘delicate, thin, slender, small’ and *onyx*, *onychos* ‘a claw, nail’, referring to the staminodes or to the tubercles in the capsules, see *Bulletin de la Société Impériale des Naturalistes de Moscou* 31(1): 222. 1858.

Leptonychia glabra Turcz.

Burma, Malaya. Small trees, alternate leaves trinerved at base, flowers in axillary cymes, black seeds covered with orange aril

See *Bull. Soc. Imp. Naturalistes Moscou* 31(1): 222. 1858

(Roots decoction as a postpartum remedy; for severe fever, pound the root and swallow.)

Malay names: jarum, penawar demam panas, sekinchah, selusoh semang

Leptopus Decne. Phyllanthaceae (Euphorbiaceae)

From the Greek *leptos* ‘thin, slender, small’ and *pous* ‘foot’, referring to the pedicels.

Leptopus cordifolius Decne. (*Andrachne cordifolia* (Wall. ex Decne.) Müll.Arg.; *Andrachne cordifolia* (Decne.) Mull. Arg.; *Andrachne cordifolia* Müll.Arg.; *Andrachne decaisneana* Baill.; *Arachne cordifolia* (Decne.) Hurus.; *Arachne cordifolia* (Decne.) Pojark.; *Arachne cordifolia* (Wall. ex Decne.) Pojark.; *Phyllanthus cordifolius* Wall. ex Decne.)

India, Himalaya, Kashmir to Nepal.

See *Voyage dans l’Inde* 4: 155. 1844, *Étude Euphorb.*: 577. 1858, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2): 234. 1866, *Journal of the Linnean Society, Botany* 26: 420. 1894 and *Botaničeskij Žurnal* (Moscow & Leningrad) 25: 342. 1940, *Journal of Cytology and Genetics* 16: 35–45. 1981, Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. Kew. 2000 [as *Andrachne cordifolia*.], *Journal of Enzyme Inhibition and Medicinal Chemistry* 22(6): 726–729. 2007

(Antibacterial, antifungal, leaves extract for nephritis, urinary tract infection, bacterial vaginosis, bacillary dysentery, giardiasis, salmonellosis, amoebiasis, eye inflammation, mastitis, laryngitis, tonsillitis, pharyngitis, cold, bronchitis, ear infection and inner ear infection. Leaves as fish poison.)

in India: bharti, bhartoi, bhartoli, bhatia, bhatindu, bhatsor, durlu, gurguli, karkan, mandhiara

Leptopus pachyphyllus X.X. Chen (*Andrachne pachyphylla* (X.X. Chen) Govaerts)

China.

See *Guihaia* 8(3): 233–234. 1988, Govaerts, R., Frodin, D.G. & Radcliffe-Smith, A. *World Checklist and Bibliography of Euphorbiaceae (and Pandaceae)*. Kew. 2000 [as *Andrachne pachyphylla*.]

(Leaves used for skin ulcer.)

in China: hou ye qiao she mu

Leptospermum Forster & Forster f. Myrtaceae

Greek *leptos* ‘slender, thin’ and *sperma* ‘seed’, referring to the narrow and slender seeds. See J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 47, 71–72, t. 36. London, [1775], *Prodr.* (DC.) 3: 226. 1828, *Hort. Brit.* [Sweet], ed. 2. 209. 1830, Endlicher, Istvan Laszlo (1804–1849), *Enumeratio plantarum quas in Novae Hollandiae ora austro-occidentali ad Fluvium Cygnorum et in Sinu Regis Georgii collegit Carolus liber baro de Hügel*. Vindobonae: Apud F. Beck, 1837 [Hügel, Carl Alexander Anselm von, 1794–1870], *Nederlandsch Kruidkundig Archief. Verslangenen Mededelingen der Nederlandsche Botanische Vereeniging* 1: 196. 1847, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 517. 1852 and H.E. Connor and E. Edgar, “Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986.” *New Zealand Journal of Botany*. 25: 115–170. 1987, J. Thompson, “A revision of the genus *Leptospermum* (Myrtaceae).” *Telopea*. 3(3): 301–449. 1989, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1795–1809. Canberra 1991.

Leptospermum amboinense Reinw. ex Blume (*Macklottia amboinensis* (Reinw. ex Blume) Korth.)

Malay Peninsula.

See *Bijdragen tot de flora van Nederlandsch Indie* 17: 1100. 1827, *Nederlandsch Kruidkundig Archief. Verslangenen en Mededelingen der Nederlandsche Botanische Vereeniging* 1: 196. 1847

(Leaves febrifuge.)

Leptospermum scoparium Forst. & Forst.f. (*Leptospermum bullatum* Hort. ex Loud.; *Leptospermum bullatum* Fitzh.; *Leptospermum floribundum* Jungh.; *Leptospermum floribundum* Salisb., nom. illeg.; *Leptospermum humifusum* A. Cunn. ex Schauer; *Leptospermum linifolium* (Sol.) Dum.Cours., nom. illeg.; *Leptospermum linifolium* Dum. Cours.; *Leptospermum multiflorum* Cav.; *Leptospermum nichollsii* Dorr.Sm.; *Leptospermum obliquum* Colla; *Leptospermum oxycedrus* Schauer; *Leptospermum pungens* Otto & A. Dietr., nom. illeg.; *Leptospermum scoparium*

var. *bullatum* Rehder; *Leptospermum scoparium* var. *confertifolium* S. Schauer; *Leptospermum scoparium* var. *eximea* B.L. Burtt; *Leptospermum scoparium* var. *forsteri* S. Schauer; *Leptospermum scoparium* var. *incanum* Cockayne; *Leptospermum scoparium* var. *linearifolium* Otto & A. Aiton; *Leptospermum scoparium* var. *myrtifolium* Hook.f., nom. illeg.; *Leptospermum scoparium* var. *nichollsii* (Dorr. Sm.) Ewart; *Leptospermum scoparium* var. *parvum* Kirk; *Leptospermum scoparium* var. *prostratum* Hook.f.; *Leptospermum scoparium* var. *sericeum* Regel; *Leptospermum scoparium* var. *vulgare* Domin, nom. inval.; *Leptospermum scoparium* var. *vulgare* (Forst. & Forst.) Domin; *Melaleuca scoparia* J.C. Wendl.; *Melaleuca scoparia* (Forst. & Forst.) L.f.; *Melaleuca scoparia* L.f.; *Melaleuca scoparia* G. Forst.; *Melaleuca scoparium* (Forster & G. Forster) L.f.; *Melaleuca tenuifolia* J.C. Wendl.; *Philadelphus scoparius* Ait.; *Philadelphus scoparius* (Forster & G. Forster) Aiton)

New Zealand. Shrub or small tree, small leaves sharp pointed, brown woody capsules

See *Characteres Generum Plantarum* [second edition] t. 36. 1775, *Supplementum Plantarum* 343. 1782, *Fl. Ins. Austr.* 37. 1786, *Hortus Kew.* (W. Aiton) 2: 150. 1789, *Prodr. Stirp. Chap. Allerton* 349. 1796, *Bot. Cult.*, ed. 2. 5: 381. 1811, *Hortus Kew.* 3: 181. 1811, *Linnaea* 15: 425, 432. 1841, *Suppl. Hort. Brit.* [Loudon] 576. 1850 [third additional suppl. to Loudon's *Hortus Britannicus*, cited in IK as "Hort. Brit. Suppl. iii."], Junghuhn, Franz Wilhelm (1809–1864), *Topographische und naturwissenschaftliche reisen durch Java*, Magdeburg, 1845, *Fl. Nov.-Zel.* 1: 69–70. 1852, *Java*, seine Gestalt, Pflanzendecke und Innere Bauart ..., 2. Ausg. Leipzig, 1857, *Stud. Fl. New Zealand*: 158. 1899 and *The Gardener's Chronicle* ser. 3, 5. 1912, *Trans. & Proc. New Zealand Inst.* 49: 58. 1917, *Bibliotheca Botanica* Heft 89: 452. 1928, *Fl. Victoria*: 856. 1931, *Bot. Mag.* 162: t. 9582. 1939, *Telopea* 3 (1989) 442. 1989

(Leaves infusion bitter emetic. Crushed bark steeped in boiling water and the water used for inflammations.)

in English: manuka, New Zealand tea plant, New Zealand tea-tree, red manuka, South Sea myrtle, Tasmanian tea plant, tea-tree

Maori names: kahikatoa, manuka

Lepyrodiclis Fenzl Caryophyllaceae

From the Greek *lepyron* 'a rind, husk, shell' and *diklis* 'double-folding, two-valved', see Wagenitz, Gerhard (1927-), *Zur Gattung Lepyrodiclis Fenzl* (Caryophyllaceae) (Rechingeri iter iranicum secundum nr. 39). [Wien], 1957 [Ann. Naturh. Mus., Wien, lxi.].

Lepyrodiclis holosteoides (C.A. Meyer) Fenzl ex Fisher & C.A. Meyer (*Arenaria holosteoides* (C.A. Meyer) Edgeworth; *Gouffeia holosteoides* C.A. Meyer)

China.

See *Enum. Pl. Nov.* 1: 93, 110. 1841 and *Novosti Sist. Vyssh. Rast.* 22: 97. 1985

(For diarrhea, dysentery, astringent.)

in China: bao shuo cao

Lespedeza Michx. Fabaceae (Desmodieae)

After the patron of botany Vincente Manuel de Céspedes, from 1784 to 1790 Spanish Governor of Eastern Florida, sponsor of the French botanist Michaux in his botanical investigations; the name was misspelled by Louis Claude Marie Richard (1754–1821) in André Michaux's (1746–1803), *Flora Boreali-Americana*. Paris 1803. See [Andres Gonzalez de Barcia], *Ensayo Cronologico, para la historia general de la Florida*. Madrid 1723, André Michaux, *Flora Boreali-Americana*. 2: 70, t. 39. 1803 and Roderick Cameron, *Viceroyalties of the West: The Spanish Empire in Latin America*. Boston 1968, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 125. Berlin & Hamburg 1989, James A. Servies and Lana D. Servies, *A Bibliography of Florida*. Pensacola 1993.

Lespedeza capitata Michx. (*Hedysarum conglomeratum* Poir.; *Hedysarum frutescens* Willd.; *Hedysarum frutescens* Pall.; *Hedysarum umbellatum* Walter; *Hedysarum umbellatum* Roxb.; *Lespedeza bicknellii* House; *Lespedeza capitata* fo. *argentea* Fernald; *Lespedeza capitata* var. *sericea* Hook.; *Lespedeza capitata* var. *stenophylla* Bissell & Fernald; *Lespedeza capitata* var. *typica* Fernald; *Lespedeza capitata* var. *velutina* Fernald; *Lespedeza capitata* Michx. var. *velutina* (E.P. Bicknell) Fernald; *Lespedeza capitata* var. *vulgaris* Torr. & A. Gray; *Lespedeza frutescens* Elliott; *Lespedeza frutescens* DC.; *Lespedeza stuevei* DC., nom. illeg.; *Lespedeza velutina* E.P. Bicknell, nom. illeg.)

North America. Perennial non-climbing herb

See *Reise durch verschiedene Provinzen des russischen Reichs* 3: 321. 1776, *Flora Caroliniana*, secundum ... 184. 1788, *Species Plantarum*. (Can cause allergic reaction, contact dermatitis. Plant febrifuge, stimulant, tonic, antiinflammatory. Flowers and roots infusion as an eyewash, also to treat fever, chapped hands.)

in English: daisy chrysanthemum, dog daisy, field daisy, marguerite, Max's chrysanthemum, moon daisy, ox-eye daisy, oxeeye daisy, poorland-flower, Shasta daisy, white daisy, white weed

Leucas R. Br. Lamiaceae (Labiatae)

Greek *leukos* 'white', in reference to the flowers; see Robert Brown, *Prodromus florae Novae Hollandiae*. 504–505. London, 1810, *Plantae Asiaticae Rariores* 1: 60–61. 1830 and *J. Cytol. Genet.* 26: 133–140. 1991, *Nucleus* (Calcutta) 36: 56–59. 1993.

Leucas aspera (Willd.) Link (*Leucas aspera* Link; *Leucas dimidiata* (Roth) Spreng.; *Leucas dimidiata* Benth.; *Leucas minahassae* Koord., nom. nud.; *Leucas obliqua* Buch.-Ham. ex Dillwyn; *Leucas plukenetii* (Roth) Spreng.; *Leucas plukenetii* Spreng.; *Phlomis aspera* Willd.; *Phlomis dimidiata* Roth; *Phlomis esculenta* Roxb.; *Phlomis obliqua* Buch.-Ham. ex Hook.f.; *Phlomis pluckenetii* Roth; *Phlomis plukenetii* Roth)

Trop. & Subtrop. Asia. Herb, hispid, hairy, erect, 4-angled, many-branched, leaves membranaceous tomentose, flowers a globular head, corolla strongly curved, nutlets narrowly ovoid, a weed in arable crops, open dry sandy soils, waste places, dunes

See *Enum. Pl.* [Willdenow] 2: 621. 1809, *Enum. Hort. Berol. Alt.* 2: 113. 1822, *Systema Vegetabilium*, editio decima sexta [Sprengel] 2: 743. 1825, *Rev. Hortus Malab.* 57. 1839, *Fl. Brit. India* [J.D. Hooker] 4: 690. 1885

(Used in Ayurveda and Sidha. Whole herb antibacterial, antifertility, antifungal, stimulant, vermifuge, anthelmintic; plant decoction given to cure nervous disorders, chronic fever, jaundice and liver-related diseases; *Leucas plukenetii* whole plant made into a paste taken to cure jaundice. Leaves decoction febrifuge, for chronic hepatitis; bruised leaves active against bites of poisonous insects, the smoke of dried leaves insecticide and repellent; leaf paste squeezed and the infusion used as nasal drops for the treatment of malaria, intermittent fevers and epistaxis; young leaves paste applied to cure ringworm; leaves with ferula made into a paste applied for scorpion stings; leaf juice given in diarrhea, jaundice, cough and cold; leaf sap to treat conjunctivitis, sores of the eyes and nose, also applied on wounds infested with maggots; decoction of crushed leaves given through nostrils to cure snakebite. Flowers in colds, flu and coughs; paste of dried flowers applied over burnt skin, scabies and wounds; flowers of *Leucas plukenetii* eaten raw to cure tonsillitis. Veterinary medicine, to treat ringworm in cattle; leaf juice dropped into nostrils to cure hydrogen cyanide poisoning. Contact therapy, root worn on the neck to cure cough, asthma and stomach disorders. Magico-religious beliefs, flowers used during religious festivals, offered to Lord Shiva by a virgin girl, she will get a good life-partner.)

in English: rough leucas

Leucas calostachys Oliv. (*Leucas calostachya* Oliv.; *Leucas orbicularis* Gürke; *Leucas spicigera* Lebrun & L. Touss.)

Ethiopia to Tanzania and Zaire.

See *Prodromus Florae Novae Hollandiae* 504. 1810, *Trans. Linn. Soc. London* 29: 139. 1875

(Leaves for fever and urinary infections, chest pain, pneumonia, colic, stomach spasms.)

Leucas capensis (Benth.) Engl. (*Lasiocorys capensis* Benth.; *Phlomis capensis* Thunb.)

S. Africa.

See *Bot. Jahrb. Syst.* 10: 268. 1889

(For stomach pain.)

Leucas cephalotes (Roth) Spreng. (*Leucas capitata* Desf.; *Leucas cephalotes* Spreng.; *Phlomis cephalotes* Roth; *Phlomis cephalotes* Koen. ex Roxb.)

Afghanistan to Myanmar. Herb, hairy, erect, branched, leaves serrate, white flowers in dense whorls, smooth nutlets, leaves eaten, plant pungent to the taste

See *Hort. Bengal.* 46. 1814, *Novae Plantarum Species* 262. 1821, *Mémoires du Muséum d'Histoire Naturelle* 11: 8, t. 4. 1824, *Systema Vegetabilium*, editio decima sexta [Sprengel] 2: 743. 1825 and *J. Palynol.* 16: 85–105. 1980

(Used in Ayurveda, Unani. Whole plant decoction anthelmintic, diuretic, febrifuge, tonic, stimulant, antiseptic, emmenagogue, diaphoretic, expectorant, aperient, laxative, insecticide, antimalaria; chewed for polio. Juice of leaves and young shoots applied in burns. Leaves ashes mixed with urine of horse applied externally on old boils on head; powdered leaves mixed with tobacco and smoked to cure piles; leaves juice febrifuge; fresh leaf juice with honey given in cold and cough, swellings and jaundice; leaves paste applied over cuts, scabies, wounds, and on forehead to cure headache; leaves decoction in dysentery and diarrhea. Flowers used for coughs and colds; flowers and fruits to cure fever; decoction of leaves and flowers mixed with *Momordica charantia* given for jaundice. Root extract taken on empty stomach as appetizer. Contact therapy, a traditional remedy through plant wreath, piece of stem to children to treat skin diseases.)

in China: tou xu bai rong cao

Leucocrinum Nutt. ex A. Gray Asparagaceae (Agavaceae, Anthericaceae, Hostaceae, Liliaceae)

Greek *leukos* ‘white’ and *krinon* ‘a lily’, referring to the fragrant white flowers, see *Ann. Lyceum Nat. Hist. New York* 4: 110. 1837, *Fl. Tellur.* 4: 27. 1838.

Leucocrinum montanum Nuttall ex A. Gray (*Leucocrinum montanum* var. *fibrosum* E.H. Kelso; *Leucocrinum montanum* var. *majus* Baker)

North America.

See *Annals of the Lyceum of Natural History of New York* 4: 108, 110–111. 1837, *J. Linn. Soc., Bot.* 17: 453. 1879 and *Rhodora* 35: 348. 1933, Ornduff, R. and M.S. Cave. “Geography of pollen and chromosomal heteromorphism in *Leucocrinum montanum* (Liliaceae).” *Madroño* 23: 65–67. 1975

(For skin diseases.)

Leucojum L. Amaryllidaceae (Alliaceae, Liliaceae)

Greek *leukos* ‘white’ and *ion* ‘violet’, referring to the white flowers, similar to the violets; *leukoion*, for *leukon ion* ‘white violet’, name used by Dioscorides, Theophrastus (*HP.* 6.8.1) and others for a white flowered bulbous plant, a species of *Matthiola* and *Galanthus*; Latin *leucoion* for the white violet, *candida leucoia*; see Carl Linnaeus, *Species Plantarum*. 1: 289, 292. 1753, *Genera Plantarum*. Ed. 5. 140. 1754, *Enumeratio Methodica Plantarum*. [Fabr.]. 15. 1759, *Tabulae Botanicae*. 21. 1773, *Exposition des Familles Naturelles* 1: 134. 1805, Herbert, William (1778–1847), *Amaryllidaceae*

63, 80, 330. London, J. Ridgway and sons, 1837, Bubani, Pietro (1806–1888), *Flora Pyrenaea* ... 1897–1901 and Stern, F.C. (1884–1967), “Snowdrops and Snowflakes—A Study of the Genera *Galanthus* and *Leucojum*.” Royal Horticultural Society, London. 1956, Crespo, M.B.M., D. Lledo, M.F. Fay and M.W. Chase. “Molecular phylogeny of *Leucojum* based on ITS sequences.” [Abstract.] *Amer. J. Bot.* 83(6, suppl.): 149. 1996, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 337–338. Basel 1996. *Leucojum* is sometimes confused with *Galanthus*.

***Leucojum aestivum* Linnaeus**

Europe, Iran.

See *Sp. Pl.* 1: 289. 1753, *Gen. Pl.* ed. 5, 140. 1754, *Syst. Nat.* ed. 10. 2: 975. 1759

(Leaves and bulbs of *Leucojum* contain the alkaloids lycorine and galanthamine, and are poisonous.)

in English: Loddon lily, snowflake, summer snowflake

in North America: nivéole

Leuconotis Jack Apocynaceae

Perhaps from the Greek *leukos* ‘white’ and *notis*, *notidos* ‘moisture, damp, wet’ or *leukon* ‘white’ and *ous*, *otos* ‘an ear’.

Leuconotis eugeniifolia (Wall. ex G. Don) A. DC. (*Leuconotis cuspidata* Blume; *Melodinus eugeniifolius* Wall. ex G. Don)

Malaysia.

See *Gen. Hist.* 4: 101. 1837, *Prodr.* 8: 331. 1844, *Mus. Bot.* 1: 112. 1850 and Govaerts, R. *World Checklist of Selected Plant Families Database* in ACCESS. Kew. 2003 [as *Leuconotis anceps*.]

(For yaws, latex smeared onto the skin.)

Malay name: aguh

Leucophyllum Humb. & Bonpl. Scrophulariaceae

From the Greek *leukos* ‘white’ and *phyllon* ‘leaf’, see *Plantae Aequinoctiales* [Humboldt & Bonpland] 2(14): 95, t. 109. 1812 [1809 publ. Apr 1812], Teran, Manuel de Mier y., *Memorias de la Comision de limites a las ordenes del General Manuel de Mier y Teran. Historia natural botanica, por el Gen. Teran y L. Berlandier.* 1832 [Berlandier, Jean Louis, 1805–1851] and *Sida* 11(2): 107–172. 1985.

Leucophyllum frutescens (Berland.) I.M. Johnst. (*Leucophyllum frutescens* I.M. Johnst.; *Leucophyllum frutescens* fo. *albiflorum* Clover; *Leucophyllum frutescens* fo. *albivium* Lundell; *Leucophyllum texanum* Benth.; *Terania frutescens* Berland.)

Mexico, North America.

See *Mem. Comis. Limites* [Teran & Berlandier] 4. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 344. 1846 and *Contributions from the Gray Herbarium of Harvard University* 70: 89. 1924, *Madroño* 4: 97. 1937, *Contributions from the University of Michigan Herbarium* 8: 86. 1942, *Sida* 11(2): 133. 1985, *Bol. Soc. Bot. México* 69: 101–121. 2001

(Leaves and twigs infusion as a wash to treat hepatitis; leaves decoction to treat liver problems.)

in English: ash plant, barometer-bush, Texas silverleaf

Leucopogon R. Br. Epacridaceae

From the Greek *leukos* ‘white’ and *pogon* ‘a beard’, referring to the corolla lobes; see Robert Brown, *Prodromus florae Novae Hollandiae* 541. London 1810 and James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera.* 215–216. N.S.W. 1981, Arthur D. Chapman, ed., *Australian Plant Name Index.* 1814–1826. Canberra 1991.

***Leucopogon malayanus* Jack**

Malaysia.

See *Malay. Misc.* i. (1820) n.v. 20. 1820

(Leaves and root decoction for stomachache.)

in English: Malayan heath

Malayan names: China maki, choreng atap, chuchor atap, chuchur atap, jiring atap, maki china, mentada, tasek timbul

Leucosidea Ecklon & Zeyher Rosaceae

Greek *leukos* ‘white’ and *idea* ‘idea, resemblance’, referring to the white pubescence, see *Enumeratio Plantarum Africae Australis Extratropicae* [Ecklon & Zeyher] 2: 265. 1836.

***Leucosidea sericea* Eckl. & Zeyh.**

Tropical Africa. Evergreen shrub or small tree, straggling, rough reddish bark, woolly deeply toothed yellowish green leaves, greenish-yellow starry flowers in spikes, flowers and young shoots browsed by cattle and goats

See *Enumeratio Plantarum Africae Australis Extratropicae* 2: 265. 1836 and *Journal of Ethnopharmacology* 131(1): 22–27. 2010, *Food and Chemical Toxicology* 49(5): 1122–1128. 2011

(Leaves aromatic, antimicrobial, anthelmintic, antioxidant, acetylcholinesterase and cyclooxygenase-inhibitory activities, used as a vermifuge and in the treatment of ophthalmia, eye infections. Magic, used as a charm for protection.)

in English: cheche-bush, chechebush, oldwood, yellow wood

in Southern Africa: broshout, cheche, dwadwa, geelhout, oubaas, oubos, oudehout, ouhout, varingboom; umChichi,

umTshitshi (Zulu); isiDwadwa, umTyityi, (Xhosa); cheche, mosino, tjhethje (South Sotho: Lesotho, Orange Free State, south east Transvaal); moSino (North Sotho: North and north east Transvaal); munyong-atshifumbu, munyonga-tshifumbu (Venda)

Leucostegia C. Presl Dryopteridaceae (Davalliaceae)

From the Greek *leukos* 'white' and *stegē, stegos* 'roof, cover', an allusion to the indusium, see *Descripción de las Plantas* 272–273. 1802, *Tentamen Pteridographiae* 93–95, t. 3, 4, f. 2, 11. 1836 and *Dansk Bot. Ark.* 9(3): 25. 1937.

Leucostegia immersa Wall. ex C. Presl (*Acrophorus immersus* Moore; *Acrophorus immersus* (Wall. ex C. Presl) T. Moore; *Humata immersa* Mett.; *Humata immersa* (Wall. ex C. Presl) Mett.; *Leucostegia immersa* (Wall. ex Hook.) C. Presl; *Leucostegia immersa* C. Presl; *Leucostegia immersa* (Wall.) Presl)

China, Nepal.

See *Tentamen Pteridographiae* 95, t. 4, f. 11. 1836, *Proceedings of the Linnean Society of London* 2: 286. 1854, *Filices Horti Botanici Lipsiensis* 102. 1856 and *Aspects Pl. Sci.* 6: 119–181. 1983, *J. Cytol. Genet.* 22: 156–161. 1987, *Aspects Pl. Sci.* 11: 459–465. 1989

(Rhizome antibacterial, a paste applied on boils.)

in Japan: arisan-orensida

in Nepal: chansure unyu

Leucostegia nodosa Bedd. (*Acrophorus nodosus* C. Presl; *Acrophorus stipellatus* (Wall.) Moore, nom. nud.; *Acrophorus stipellatus* T. Moore)

India.

See *Tentamen Pteridographiae* 94, t. 3, f. 2. 1836, *Ferns British India* Suppl. 4. 1876 and Subhash Chandra and Surjit Kaur, *A Nomenclatural Guide to R.H. Beddome's Ferns of South India and Ferns of British India*. New Delhi, 1987, *Kew Bulletin* 44(3): 548–550. 1989

(Rhizome and sporophyll antibacterial.)

Leucosyke Zoll. & Moritzi Urticaceae

Probably from the Greek *leukos* 'white' and *syke, sykea* 'the fig-tree, excrescence', *sykon* 'fig', see *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842–1844* 76. 1845–1846.

Leucosyke capitellata (Poiret) Wedd. (*Leucosyke alba* Zoll. & Mor.; *Leucosyke capitellata* Wedd.; *Missiessya fagifolia* Gaudich.; *Urtica capitellata* Poir.)

Philippines. An erect shrub or small tree, leaves oblong or ovate felty and harsh to touch, flowers capitate single or

clustered, male flowers white, fruiting heads dark green nearly spherical, compressed achenes, leaves particularly high in magnesium, in thickets and secondary forests, second-growth forests

See *Encycl. (Lamarck) Suppl.* 4. 227. 1816, *Annales des Sciences Naturelles; Botanique*, série 4 1: 194–195. 1854, *Annales des Sciences Naturelles; Botanique*, série 4 7: 383. 1857, *Prodr. (DC.)* 16(1): 235 (27). 1869 and *Asia Pacific Journal of Clinical Nutrition* 8(1): 24–31. 1999

(Plant, either roots or decoction of leaves, used to cure diabetes, high blood pressure and lumbago. Decoction of roots for phthisis, coughs, headache and gastralgia. Bark and leaves decoction drunk to treat stomachache and diarrhea.)

in Indonesia: kayu te pa ei

in Philippines: /'alalasi/, alagasi, alalasi, alangasi, amagasi, anagau, anugas, aragasi, ararasi, arasi, asis, bahibahi, bauaua, bilan-bilan, bunkilan, damakadios, gasigasi, ginagasi, gugutu, haganasi, halagasi, hilagasi, hinagasi, hinlagasi, isis, isis ngipin, karikasin, lagasi, laglag, lalasi, langasi, lapsik, layasin, liasin, manombila, sagombibilan, salagiso, salasi, tinagasi

in Sabah: kuliatmato

in Sarawak: teh kampung

Leucothoe D. Don Ericaceae

Leucothoe, one of the many loves of Apollo, the daughter of King Orchamus of Babylonia, see *Edinburgh New Philosophical Journal* 17(33): 159. 1834.

Leucothoe axillaris (Lam.) D. Don (*Andromeda axillaris* Lam.)

North America. Evergreen shrub, green slightly arching stems, flowers borne on elongated axillary clusters, globular 5-lobed capsule

See *Encyclopédie Méthodique, Botanique* 1(1): 157. 1783, *Edinburgh New Philosophical Journal* 17(33): 159. 1834 and *Edinburgh J. Bot.* 47: 303–313. 1990

(Leaves and nectar poisonous, highly toxic, may be fatal if eaten.)

in English: coastal leucothoe, swamp dog-laurel

Leucothoe fontanesiana (Steud.) Sleumer

North America. Evergreen shrub, green slightly arching stems, flowers borne on elongated axillary clusters, globular 5-lobed capsule

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 78(4): 438–439. 1959, *Edinburgh J. Bot.* 47: 303–313. 1990

(Leaves and nectar poisonous, highly toxic, may be fatal if eaten.)

in English: dog-hobble, dog's-hobble, drooping laurel, mountain dog-laurel, switch ivy

Levisticum Hill Apiaceae (Umbelliferae)

Latin *levisticum*, i.q. *ligusticum*, shortened from *ligusticum apium* "Ligurian celery", see *Species Plantarum* 1: 250. 1753, *The British Herbal* 410, 423. 1756, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 12(1): 101. 1824 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 339, 340–341. Basel 1996.

Levisticum officinale W.D.J. Koch (*Hipposelinum levisticum* (L.) Britton & Rose; *Hipposelinum levisticum* Britton; *Hipposelinum levisticum* Britton & Rose; *Levisticum paludapifolium* Asch.; *Ligusticum levisticum* L.; *Selinum levisticum* (L.) E.H.L. Krause; *Selinum levisticum* E.H.L. Krause)

Central Asia. Herb, flowers yellowish, young shoots and leaves can be eaten as a vegetable, strongly aromatic

See *Species Plantarum* 1: 250. 1753, *Brit. Herb.* 410, 423. 1756, *Species Plantarum*, Editio Secunda 1: 350. 1762, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 12(1): 101, f. 41. 1824 and *Deutschl. Fl.* (Sturm), ed. 2. 12: 38, 116. 1904, *An Illustrated Flora of the Northern United States* (Britton & Brown), 2: 634–635. 1913, *Acta Biologica Cracoviensia, Series Botanica* 24: 113–126. 1982, *Thaiszia* 7: 75–88. 1997

(Antiseptic. Used as a substitute for the traditional Chinese medicine *dang gui*, see *Angelica sinensis*. Root used as a diuretic drug.)

in English: bladderseed, garden lovage, lovage

in China: dang gui, ou dang gui

in French: livéche

in Italian: levistico, sedano di montagna

Lewisia Pursh Portulacaceae

Named for the American explorer and naturalist Meriwether Lewis, 1774–1809, traveller, 1804–1806 with William Clark to the sources of the Missouri, then across the Rocky Mountains, and down the river Columbia to the Pacific Ocean. See *Flora Americae Septentrionalis* (Pursh) 2: 360, 368. 1813 [dt. 1814; publ. Dec 1813], G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 523. 1852 and Joseph William Blankinship (1862–1938), "A century of botanical exploration in Montana, 1805–1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1–31. 1904, Elijah H. Criswell, *Lewis and Clark: Linguistic Pioneers*. [A study of the vocabularies of the journals kept by M. Lewis, W. Clark and other members of the Lewis and Clark Expedition 1804–1806.] University

of Missouri Studies. vol. 15. no. 2. 1940, Roland H. Alden and John D. Ifft, "Early Naturalists in the Far West." *Calif. Acad. Sci. Occ. Papers*. 20: i-v, 1–59. 1943, Joseph Ewan, *Rocky Mountain Naturalists*. 250–251. 1950, Mathew, Brian Frederick (1936–), *The Genus Lewisia*. Kew, Royal Botanic Gardens, Kew in association with Christopher Helm and Timber Press, 1989, Davidson, B. LeRoy, *Lewisias*. Portland, OR, Timber Press, 2000.

Lewisia columbiana (Howell ex A. Gray) B.L. Rob. (*Calandrinia columbiana* Howell ex A. Gray; *Calandrinia columbiana* Howell; *Lewisia columbiana* (Howell) B.L. Rob.; *Lewisia columbiana* B.L. Rob.; *Oreobroma columbianum* (Howell ex A. Gray) Howell; *Oreobroma columbianum* (Howell) Howell; *Oreobroma columbianum* Howell; *Talinum denticulatum* Poelln.)

North America. Perennial herb, fleshy roots eaten

See *Proceedings of the American Academy of Arts and Sciences* 22(2): 277. 1887, *Erythea* 1(2): 32. 1893, *Synoptical Flora of North America* 1(1): 269. 1897 and *Berichte der Deutschen Botanischen Gesellschaft* 51(2): 113. 1933

(Ceremonial.)

in English: Columbian bitterroot, Columbian lewisia

Lewisia columbiana (Howell ex A. Gray) B.L. Rob. var. *columbiana*

North America. Perennial herb, fleshy roots eaten

See *Proceedings of the American Academy of Arts and Sciences* 22(2): 277. 1887, *Erythea* 1(2): 32. 1893, *Synoptical Flora of North America* 1(1): 269. 1897 and *Berichte der Deutschen Botanischen Gesellschaft* 51(2): 113. 1933

(Ceremonial.)

in English: Columbian bitterroot, Columbian lewisia

Lewisia pygmaea (A. Gray) B.L. Rob. (*Calandrinia grayi* Britton; *Calandrinia pygmaea* (A. Gray) A. Gray; *Calandrinia pygmaea* A. Gray; *Calandrinia pygmaea* F.Muell.; *Lewisia exarticulata* H. St. John; *Lewisia glandulosa* (Rydb.) Dempster; *Lewisia glandulosa* (Rydb.) S. Clay; *Lewisia minima* (A. Nelson) A. Nelson; *Lewisia minima* A. Nelson; *Lewisia pygmaea* B.L. Rob.; *Lewisia pygmaea* subsp. *glandulosa* (Rydb.) R.S. Ferris; *Lewisia pygmaea* var. *aridorum* Bartlett; *Lewisia pygmaea* var. *aridorum* Bartlett; *Lewisia sierrae* R.S. Ferris; *Oreobroma aridorum* (Bartlett) A. Heller; *Oreobroma aridorum* A. Heller; *Oreobroma exarticulatum* (H. St. John) Rydb.; *Oreobroma exarticulatum* Rydb.; *Oreobroma glandulosum* Rydb.; *Oreobroma grayi* Rydb.; *Oreobroma grayi* (Britton) Rydb.; *Oreobroma minimum* A. Nelson; *Oreobroma pygmaeum* (A. Gray) Howell; *Oreobroma pygmaeum* Howell; *Talinum pygmaeum* A. Gray)

North America. Perennial herb, food

See *Fragm.* (Mueller) 1(7): 175. 1859, *American Journal of Science, and Arts*, ser. 2, 33(99): 407. 1862, *Proceedings*

of the American Academy of Arts and Sciences 8: 623. 1873, *Erythea* 1(2): 32–33. 1893, *Synoptical Flora of North America* 1(1): 268. 1897 and *Mem. New York Bot. Gard.* 1: 137. 1900, *Bull. Torrey Bot. Club* 27: 260. 1900, *Bot. Gaz.* 44: 303. 1907, *Muhlenbergia* 6: 83. 1910, *N. Amer. Fl.* 21(4): 324–325. 1932, *Ill. Fl. Pacific States* 2: 134. 1944, *Phytologia* 68(3): 170. 1990

(Reported that eating the roots caused insanity. Good luck charm.)

in English: alpine lewisia, pigmy bitterroot

***Lewisia rediviva* Pursh**

North America. Perennial herb, low-growing, basal rosette of linear and succulent leaves, pink flowers, long lanceolate petals

See *Flora Americae Septentrionalis* [Pursh] 2: 368. 1813, *Proc. Calif. Acad. Sci.* 2: 115. 1863 and *N. Amer. Fl.* 21: 327. 1932, *Man. S. Calif. Bot.* 598. 1935

(Roots infusion drunk for heart trouble, pleurisy, by mothers to increase milk, a poultice for skin diseases; dried or fresh roots eaten for diabetes; pounded dry root chewed for sore throat. Ceremonial.)

in English: (the root) bitter root, bitterroot, Oregon bitterroot

***Lewisia rediviva* Pursh var. *rediviva* (*Lewisia alba* Kellogg)**

North America. Perennial herb

See *Flora Americae Septentrionalis* [Pursh] 2: 368. 1813, *Proc. Calif. Acad. Sci.* 2: 115. 1863 and *N. Amer. Fl.* 21: 327. 1932, *Man. S. Calif. Bot.* 598. 1935

(Roots infusion drunk for heart trouble, pleurisy, by mothers to increase milk, a poultice for skin diseases; pounded dry root chewed for sore throat; dried or fresh roots eaten for diabetes. Ceremonial.)

in English: (the root) bitter root, bitterroot, Oregon bitterroot

Leymus Hochst. Poaceae (Gramineae)

An anagram of *Elymus* L., type *Leymus arenarius* (L.) Hochst., see *Species Plantarum* 1: 85. 1753, *Reliquiae Haenkeanae* 1(4–5): 265. 1830, *Flora* 31: 118. 1848, *Flora Rossica* 4(13): 343. 1852 and *Nom. Prop. Int. Bot. Congr. Cambridge* (England) 1930: 121. 1929, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 20. 1930, *Acta Inst. Bot. Acad. Sci. URSS*, Ser. I, 1: 14, in obs., 27. 1933, *Flora URSS* 2: 229, 708. 1934, *Novosti Sist. Vyss. Rast.* 6: 21. 1970, *Novosti Sist. Vyss. Rast.* 9: 62. 1972, M.E. Barkworth & R.J. Atkins, “*Leymus* Hochst. (Gramineae: Triticeae) in North America: taxonomy and distribution.” *American Journal of Botany* 71: 609–625. 1984, *Systematic Botany* 9: 279–294. 1984, *Grassland of China* 2: 44–47. 1993, *Annals of Botany* 73: 195–203. 1994, *Plant Systematics and Evolution* 197: 225–231. 1995, *Systematic Botany* 21(1):

10–11, f. 4. 1996, *Am. J. Bot.* 86: 703–710. 1999, *Am. J. Bot.* 87: 903–907. 2000, *Am. J. Bot.* 91: 1022–1035. 2004, *Am. J. Bot.* 91: 1789–1801. 2004.

***Leymus cinereus* (Scribn. & Merr.) Á. Löve (*Aneurolepidium piperi* (Bowden) B.R. Baum; *Elymus cinereus* Scribn. & Merr.; *Elymus cinereus* var. *cinereus*; *Elymus cinereus* var. *pubens* (Piper) C.L. Hitchc.; *Elymus condensatus* f. *pubens* (Piper) H. St. John; *Elymus condensatus* var. *pubens* Piper; *Elymus piperi* Bowden)**

Northern America, Canada, USA. Perennial, robust, stout, erect, forming large clumps, leaf blades firm and flat, leaf sheaths smooth to densely hairy, fruiting stems stiff and hollow, inflorescence a wheat-like spike, spikelets in clusters of 3 to 5 per node, 2–6 florets per spikelet, forage, barrier, revegetation, stems used to imbricate split cedar-root baskets, found along roadsides, waste places, dry plains, riverbanks, gulleys, moist or dry slopes, sandy or gravelly soil

See *Reliquiae Haenkeanae* 1(4–5): 265. 1830, *Erythea* 7: 101. 1899 and *Bulletin of the Torrey Botanical Club* 29(7): 467. 1902, *Flora of Southeastern Washington and adjacent Idaho* 42. 1937, *Canadian Journal of Botany* 42: 592. 1964, *Vascular Plants of the Pacific Northwest* 1: 561. 1969, *Canadian Journal of Botany* 57(8): 947. 1979, *Taxon* 29(1): 168. 1980, *Acta Botanica Yunnanica* 12: 57–66. 1990, *Grassland of China* 2: 44–47. 1993, *Annals of Botany* 73: 471–479. 1994

(Decoction of roots taken for internal injuries, hemorrhages; an infusion of crushed roots taken for gonorrhoea. Veterinary medicine. Ceremonial, sweathouse, sweatbath.)

in English: basin wildrye, giant wild rye, Great Basin wildrye, ryegrass

***Leymus condensatus* (J. Presl) Á. Löve (*Aneurolepidium condensatum* (J. Presl) Nevski; *Elymus condensatus* J. Presl)**

North America, USA, Mexico. Perennial, forage

See *Reliquiae Haenkeanae* 1(4–5): 265. 1830 and *Taxon* 29(1): 168. 1980, *Annals of Botany* 73: 471–479. 1994

(For eye ailments. Ceremonial.)

in English: giant ryegrass, giant wildrye

Liatris Gaertner ex Schreber Asteraceae

Unknown derivation, see *The Vegetable System*. Or, the internal structure and the life of plants; their parts, and nourishment, explained; their classes, orders, genera, and species, ascertained, and described; in a method altogether new: comprehending an artificial index and a natural system. 4: 49. 1762, Gaertner, Joseph (1732–1791), *De Fructibus et Seminibus Plantarum...* 2: 402. Stvtgardiae, Svmtibvs

Avctoris, Typis Academiae Carolinae, 1788–1791, *Genera Plantarum* ed. 8[a]. 2: 542. 1791, *Dict Sci. Nat.*, ed. 2, 51: 384. 1827, *Transactions of the American Philosophical Society*, new series, 7: 285. 1840, *Genera Plantarum* 2(1): 244. 1873 and *Man. S.E. Fl.* [Small] 1331–1332. 1933, *Rhodora* 48: 177, 246, 340, 373. 1946, *Manual* (Gray), ed. 8. 1372–1375. 1950, F. Boerner, *Taschenwörterbuch der botanischen Pflanzennamen*. 2. Aufl. 131. Berlin & Hamburg 1966, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 125. Berlin & Hamburg 1989, Helmut Genauß, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 339. Basel 1996, *Sida* 21(3): 1312, 1314–1317. 2005.

Liatris acidota Engelm. & A. Gray (*Lacinaria acidota* (Engelm. & A. Gray) Kuntze; *Lacinaria acidota* Kuntze; *Liatris acidota* var. *vernalis* Engelm. & A. Gray)

North America. Perennial herb

See *Boston Journal of Natural History* 5(2): 218–219. 1845, George Engelmann (1809–1884), Asa Gray and Joseph William Blankinship (1862–1938), *Plantae lindheimerianae*. 11. Boston 1845–1850, *Revisio Generum Plantarum* 1: 349. 1891

(Roots decoction taken for rheumatism.)

in English: sharp blazing star, sharp gayfeather

Liatris laxa (Small) K. Schum. (*Lacinaria laxa* Small)

North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 25(9): 472–473. 1898 and *Just's botanischer Jahresbericht*. 26(1[3]): 378. 1900

(Analgesic, antiemetic, astringent, antirheumatic, used for diarrhea, vomiting and appetite loss. Veterinary medicine, roots decoction to cure diarrhea.)

in English: rattlesnake master

Liatris punctata Hook. (*Lacinaria punctata* (Hook.) Kuntze; *Lacinaria punctata* Kuntze *Liatris mucronata* DC. var. *interrupta* Gaiser; *Liatris punctata* var. *mexicana* Gaiser; *Liatris punctata* var. *nebraskana* Gaiser; *Liatris punctata* Hook. var. *typica* Gaiser)

North America. Perennial herb, tall, long narrow leaves with tiny resinous dots, pinkish purple flower heads in dense narrow elongated spikes, food

See *Flora Boreali-Americana* (Hooker) 1(6): 306, pl. 105. 1833, *Revisio Generum Plantarum* 1: 349. 1891 and *Rhodora* 48(575): 347–355, 365–367. 1946

(A remedy for kidney and bladder problems, also a gargle for sore throats. Poultice of boiled roots applied to swellings; roots infusion taken for stomachache and gonorrhea. Veterinary medicine.)

in English: dotted blazing star, dotted blazingstar, dotted gayfeather

Liatris punctata Hook. var. ***punctata*** (*Lacinaria arenicola* Bush; *Lacinaria densispicata* Bush; *Liatris densispicata* (Bush) Gaiser; *Lacinaria punctata* (Hook.) Kuntze; *Lacinaria punctata* Kuntze; *Liatris punctata* fo. *coloradensis* Gaiser; *Liatris punctata* var. *coloradensis* (Gaiser) Waterf.; *Liatris punctata* Hook. var. *typica* Gaiser, nom. inval.)

North America. Perennial herb

See *Flora Boreali-Americana* (Hooker) 1(6): 306, pl. 105. 1833, *Revisio Generum Plantarum* 1: 349. 1891 and *American Midland Naturalist* 12: 313–314. 1931, *Rhodora* 52(619): 175. 1950, *Rhodora* 48(575): 347–352, 363. 1946

(A remedy for kidney and bladder problems, also a gargle for sore throats. Poultice of boiled roots applied to swellings; roots infusion taken for stomachache and gonorrhea. Veterinary medicine.)

in English: dotted blazing star, dotted blazingstar, dotted gayfeather

Liatris scariosa (L.) Willd. (*Lacinaria scariosa* (L.) Hill; *Lacinaria scariosa* Hill; *Liatris scariosa* (L.) Willd. var. *virginiana* (Lunell) Gaiser; *Serratula scariosa* L.)

North America. Perennial herb

See *Species Plantarum* 2: 818–819. 1753, *Veg. Syst.* 4: 49. 1762, *Hortus Kewensis* 70. 1768, *Species Plantarum*. Editio quarta 3(3): 1635. 1803

(A remedy for kidney and bladder problems, diarrhea, abdominal troubles, external inflammation, skin diseases. Veterinary medicine.)

in English: devil's bite, Virginia blazing star

Liatris scariosa (L.) Willd. var. ***scariosa*** (*Lacinaria scariosa* (L.) Hill; *Lacinaria scariosa* Hill; *Lacinaria scariosa* (L.) Hill f. *borealis* Lunell; *Lacinaria scariosa* var. *borealis* (Nutt. ex J. McNab) Lunell; *Lacinaria scariosa* var. *virginiana* Lunell; *Liatris borealis* Nutt.; *Liatris borealis* Nutt. ex J. McNab; *Liatris scariosa* (L.) Willd. var. *virginiana* (Lunell) Gaiser)

North America. Perennial herb

See *Species Plantarum* 2: 818–819. 1753, *Veg. Syst.* 4: 49. 1762, *Hortus Kewensis* 70. 1768, *Species Plantarum*. Editio quarta 3(3): 1635. 1803, *Edinburgh New Philosophical Journal* 19: 60. 1835, *Paxton's Magazine of Botany* 5: 27. 1838 and *American Midland Naturalist* 2: 171–172, 177, 264. 1912, *Rhodora* 48(574): 296. 1946

(A remedy for kidney and bladder problems, diarrhea, abdominal troubles, external inflammation, skin diseases. Veterinary medicine.)

in English: devil's bite, Virginia blazing star

Liatris spicata (L.) Willd. (*Kuhnia spicata* (L.) Baill.; *Lacinaria spicata* (L.) Kuntze; *Lacinaria spicata* Kuntze; *Serratula spicata* L.; *Suprago spicata* (L.) Gaertn.)

North America. Perennial herb, leafy-stemmed, linear leaves, tall flower spikes, rose-purple sessile flowers, aromatic leaves and roots, in meadows, borders of marshes, savanna, damp slopes, prairies

See *Species Plantarum* 2: 819. 1753, *De Fructibus et Seminibus Plantarum*... 2(3): 402. 1791, *Species Plantarum*. Editio quarta 3(3): 1636. 1803, *Histoire des Plantes* 8: 298. 1882, *Revisio Generum Plantarum* 1: 349. 1891 and *Manual* (Gray), ed. 8. 1372. 1950, *Ann. Missouri Bot. Gard.* 82: 581–592.

(Root poultice for snakebite. Leaves and root anodyne, insect-repellent, antibacterial, astringent, carminative, diaphoretic, diuretic, emmenagogue, expectorant, stimulant and tonic. Used as a local application in the treatment of sore throats and gonorrhoea, also used in treating kidney diseases. Used in homeopathy, a vascular stimulant, increases functional activity of the skin, mucous membranes. Leaves contain coumarin.)

in English: blazing star, button snakeroot, button snakewort, colic-root, dense blazing star, devil's bit, gay feather, gay-feather, marsh blazing star, prairie-pine, purple gayfeather, sessile blazing-star, spike gayfeather, spiked gayfeather

Liatris spicata (L.) Willd. var. ***spicata*** (*Lacinaria spicata* (L.) Kuntze; *Lacinaria spicata* Kuntze)

North America. Perennial herb, aromatic leaves and roots, in meadows, borders of marshes, savanna, damp slopes

See *Revisio Generum Plantarum* 1: 349. 1891 and *Manual* (Gray), ed. 8. 1372. 1950

(Root poultice for snakebite. Leaves and root anodyne, insect-repellent, antibacterial, astringent, carminative, diaphoretic, diuretic, emmenagogue, expectorant, stimulant and tonic. Used as a local application in the treatment of sore throats and gonorrhoea, also used in treating kidney diseases. Used in homeopathy, a vascular stimulant, increases functional activity of the skin, mucous membranes. Leaves contain coumarin.)

in English: blazing star, button snakeroot, button snakewort, colic-root, dense blazing star, devil's bit, gay feather, gay-feather, marsh blazing star, prairie-pine, purple gayfeather, sessile blazing-star, spike gayfeather, spiked gayfeather

Libanotis Haller ex Zinn Apiaceae (Umbelliferae)

Latin *libanotis*, *idis* 'rosemary', Greek *libanos* 'incense, frankincense-tree', *libanotis*, *libanotris* 'a censer', referring to the leaves; see H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 339–340. 1996. The taxonomic position of *Libanotis* and related genera continues to be controversial.

Libanotis buchtormensis (Fischer) DC. (*Bubon buchtormensis* Fischer; *Libanotis cycloloba* Gilli; *Seseli buchtormense* (Fischer) W.D.J. Koch; *Seseli cyclolobum* (Gilli) Pimenov & Sdobnina; *Seseli giraldii* Diels)

China.

See *Cat. Pl. Hort. Gott.* 226. 1757, *Coll. Mém.* 5: t. 3, f. 5. 1829 and *FOC* 14: 129. 2005

(This species has reputed medicinal value.)

in China: yan feng

Libanotis condensata (Linnaeus) Crantz (*Athamanta condensata* Linnaeus; *Libanotis laserpitiifolia* (Palibin) K.T. Fu; *Libanotis vulgaris* var. *condensata* (Linnaeus) DC.; *Pachypleurum condensatum* (Linnaeus) Korovin; *Peucedanum condensatum* (Linnaeus) Koso-Poljansky; *Seseli condensatum* (Linnaeus) H.G. Reichenbach; *Seseli laserpitiifolium* Palibin)

China.

See *Class. Umbell. Emend.* 105. 1767 and *FOC* 14: 130. 2005

(This species has reputed medicinal value.)

in China: mi hua yan feng

Libanotis iliensis (Lipsky) Korovin (*Seseli altissimum* Popov; *Seseli fedtschenkoanum* var. *iliense* Regel & Schmalhausen; *Seseli iliense* Lipsky; *Seseli vaillantii* H. de Boissieu)

China.

See *Fl. Kazakhst.* 6: 345. 1963

(Used as a substitute for the traditional Chinese medicine *fang feng*, *Saposhnikovia divaricata*.)

in China: yi li yan feng

Libanotis lancifolia K.T. Fu (*Seseli lancifolium* (K.T. Fu) Pimenov)

China.

See *Acta Phytotax. Sin.* 13(2): 59. 1975, *FOC* 14: 130. 2005

(This species has reputed medicinal value.)

in China: tiao ye yan feng

Libanotis laticalycina R.H. Shan & M.L. Sheh (*Seseli laticalycinum* (R.H. Shan & M.L. Sheh) Pimenov)

China.

See *Acta Phytotax. Sin.* 21: 82. 1983, *FOC* 14: 130. 2005

(This species is used in Shanxi as a regional substitute, known as *shui fang feng*, for the traditional Chinese medicine *fang feng*, *Saposhnikovia divaricata*.)

Libanotis seseloides (Fischer & C.A. Meyer ex Turczaninow) Turczaninow (*Libanotis amurensis* Schischkin; *Libanotis montana* var. *riviniana* Ledebour; *Ligusticum seseloides* Fischer & C.A. Meyer ex Turczaninow; *Seseli rivinianum* (Ledebour) M. Hiroe; *Seseli seseloides* (Fischer & C.A. Meyer ex Turczaninow) M. Hiroe)

China.

See *Bull. Soc. Imp. Naturalistes Moscou* 17: 725. 1844 and *FOC* 14: 129. 2005

(Leaves used to aid digestion and alleviate dysentery.)

in China: xiang qin

Libanotis sibirica (Linnaeus) C.A. Meyer (*Athamanta sibirica* Linnaeus; *Seseli libanotis* subsp. *sibiricum* (Linnaeus) Thellung; *Seseli libanotis* var. *sibiricum* (Linnaeus) DC.; *Seseli sibiricum* (Linnaeus) Garcke)

China.

See *Verzeichn. Pfl. Cauc.* 124. 1831

(Used as a substitute for the traditional Chinese medicine *fang feng*, *Saposhnikovia divaricata*.)

in China: ya zhou yan feng

Libanotis spodotrichoma K.T. Fu (*Seseli spodotrichoma* (K.T. Fu) Pimenov)

China.

See *Acta Phytotax. Sin.* 13(2): 58. 1975, *FOC* 14: 130. 2005

(This species has reputed medicinal value.)

in China: hui mao yan feng

Licania Aublet Chrysobalanaceae

Presumably an anagram of a Caribbean name or of a local name in French Guiana, *Licania incana* Aubl. is called *caligni* by the Galibis, see *Histoire des plantes de la Guiane Française* 1: 119, 521, pl. 45, 208. 1775, *Journal of Botany*, being a second series of the Botanical Miscellany 2: 212. 1840, *Nederlandsch Kruidkundig Archief. Verslangen en Mededelingen der Nederlandsche Botanische Vereeniging* 3: 384. 1855[1854] and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 5: 368. 1909, *Atas do Simpósio sobre a Biota Amazônica* 4: 224, 226. 1967, *Journal of the Arnold Arboretum* 51(4): 527. 1970, *Philosophical Transactions of the Royal Society of London*, Series B 320: 94. 1988.

Licania alba (Bernoulli) Cuatrec. (*Caraipa longifolia* Aubl.; *Licania longifolia* Benoist; *Licania venosa* Rusby; *Theobroma alba* Bernoulli)

Venezuela, Brazil. Tree, inflorescence paniculate, petals wanting, pear-shaped rusty-powdery fruit

See *Histoire des plantes de la Guiane Française* 1: 561, pl. 223, f. 3. 1775 and *Bulletin du Muséum National d'Histoire Naturelle* 28: 252. 1922, *Contributions from the United States National Herbarium* 35(6): 369–614. 1964

(Powdered outer bark to treat ulcers and sores. Inner bark decoction drunk as a remedy for Morabana snakebites.)

in Guyana: counta, kauta-balli

Licania apetala (E. Mey.) Fritsch var. ***apetala*** (*Hirtella apetala* E. Mey.; *Licania apetala* (E. Mey.) Fritsch; *Licania apetala* Fritsch; *Licania apetala* Kuntze; *Licania apetala* var. *pendula* (Benth.) Fritsch; *Licania apetala* var. *pendula* Fritsch; *Licania apetala* var. *pendula* Griseb.; *Licania dahl-grenii* Standl.; *Licania floribunda* Benth.; *Licania hylaea* Cuatrec.; *Licania pendula* Benth.; *Licania turiuva* Cham. & Schltdl.; *Moquilea floribunda* (Benth.) Hook. f.; *Moquilea floribunda* Benth.; *Moquilea orinocensis* Rusby; *Moquilea pendula* Benth. ex Hook. f.; *Moquilea pendula* (Benth.) Hook. f.; *Moquilea turiuva* (Cham. & Schltdl.) Hook. f.; *Moquilea turiuva* Hook. f.)

South America.

See *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 21: 803. 1825, *Linnaea* 2: 550. 1827, *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 2: 218–219. 1840, *Flora Brasiliensis* (Martius) 14(2): 21–22, 25. 1867, *Annalen des K. K. Naturhistorischen Hofmuseums* 4: 54–55. 1889 and Rusby, Henry Hurd (1855–1940), *Descriptions of Three Hundred New Species of South American Plants* 27. New York, 1920, *Publications of the Field Museum of Natural History, Botanical Series* 17(3): 255. 1937, *Brittonia* 8: 198. 1956, *Fl. Neotrop. Monogr.* 9: 68. 1972

(Bark burned and the ashes inhaled; powdered bark to treat ulcers, wounds and sores.)

in Spanish: cabio

Licania cuprea Sandwith

Guyana. Tree, leaves yellow-cream below, petals wanting, fruit densely rusty-velvety

See *Bulletin of Miscellaneous Information Kew* 1937: 108. 1937

(Bark decoction for tuberculosis.)

in Guyana: araudanni, counta, konoko, muri kauta-balli, unikiakia

Licania heteromorpha Benth. var. ***perplexans*** Sandwith

West Indies. Tree, inflorescence paniculate, receptacle campanulate, pubescent petals

See *Journal of Botany*, being a second series of the Botanical Miscellany 2: 221–222. 1840 and *Bulletin of Miscellaneous Information Kew* 1931: 371. 1931

(Bark infusion to treat diarrhea; powdered outer bark sprinkled on wounds to keep them clean and dry. Sap applied externally to sores and skin complaints.)

in Guyana: counta, kairi-balli

Lichtensteinia Chamisso & Schltdl. Apiaceae (Umbelliferae)

In honor of the German zoologist and botanist Martin Heinrich (Henry) Karl (Carl) von Lichtenstein, 1780–1857, naturalist, traveller, surgeon, Director of the Zoological Garden in Berlin, between 1803–1806 botanical explorer in the Cape, his writings include *Reisen in südlichen Africa*, in den Jahren 1803, 1804, 1805, und 1806. Berlin 1811, 1812 [Engl. transl. *Travels in southern Africa* in the years 1803, 1804, 1805 and 1806. London 1812–1815]; see Eduard Eversmann, *Reise von Orenburg nach Buchara*. Berlin 1823 and Carl Maria Friederich Ernst von Weber, *Briefe ... an H. Lichtenstein*, etc. Braunschweig 1900, Mary Gunn and Leslie E. Codd, *Botanical exploration of southern Africa*. 227–229. Cape Town 1981, Gilbert Westacott Reynolds (1895–1967), *The Aloes of South Africa*. 43, 52, 53. Rotterdam 1982.

Lichtensteinia interrupta (Thunb.) E. Mey. (*Lichtensteinia interrupta* (Thunb.) Sond.; *Lichtensteinia pyrethrifolia* Cham. & Schltdl.)

South Africa.

See *Linnaea* 1: 394, 397. 1826

(Roots used for chest complaints, chronic coughing.)

in Southern Africa: inTlashane (Zulu), kalmos, umBungashe

Licuala Wurmb Arecaceae (Palmae)

From *leko wala*, the Moluccan/Macassar vernacular name (Macassar is the largest city of Celebes, on Macassar Strait, between Borneo and Celebes); *loyak* or *loyar*, Malay names for the palms; see *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 2: 473–474. 1780, Carl Peter Thunberg, in *Kongl. Vetenskaps Akademiens Nya Handlingar*. 3: 286. 1782, *Rumphia* 2: 47. 1838 and *Fl. Schutzgeb. Südsee*: 201. 1900, C.X. Furtado, “Palmae Malesicae VIII. The genus *Licuala* in the Malay Peninsula.” *Gard. Bull. Straits Settlem.* 11: 31–73. 1940.

Licuala peltata Roxb. ex Buch.-Ham. (*Licuala peltata* Roxb.)

India. Evergreen palm, stem rough, leaves fan-shaped

See *Hort. Bengal.* 25. 1814, *Memoirs of the Wernerian Natural History Society* 5: 313. 1826, *Flora Indica*; or, descriptions of Indian Plants 2: 179–181. 1832 and *Sandakania* 10: 10. 1997

(Ceremonial, ornament.)

in Brazil: licuala redonda

in India: motha pathi, salai pathi

Licuala spinosa Wurmb (*Corypha pilearia* Lour.; *Licuala acutifida* var. *peninsularis* Becc.; *Licuala horrida* Blume; *Licuala pilearia* Blume; *Licuala pilearia* (Lour.) Blume; *Licuala ramosa* Blume; *Licuala spinosa* Thunb., nom. illeg.;

Licuala spinosa var. *cochinchinensis* Becc.; *Licuala spinosa* var. *eriantha* Becc.)

SE Asia, Philippines, Indonesia. Fan-shaped palm, spadix with many finely pubescent dense flowered spikes

See *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 2: 474. 1780, *Kongl. Vetenskaps Akademiens Nya Handlingar* 3: 287. 1782, *Flora Cochinchinensis* 1: 213. 1790, *Syst. Veg.* 7: 1303. 1830, *Rumphia* 2: 39, 42. 1838 [Dec 1838–Oct 1839] and *Webbia* 5: 44, 47. 1921

(Apical buds used for nausea.)

Licuala triphylla Griff. (*Licuala filiformis* Hodel; *Licuala pygmaea* Merr.; *Licuala stenophylla* Hodel; *Licuala ternata* Griff. ex Mart.; *Licuala triphylla* var. *integrifolia* Ridl.)

Borneo, Thailand.

See *Calcutta J. Nat. Hist.* 5: 332. 1844 and *Mat. Fl. Malay. Penins.* 2: 164. 1907, *Univ. Calif. Publ. Bot.* 15: 20. 1929

(Against nausea, pound the crown in cold water and drink.)

Malay name: palas

Ligularia Cass. Asteraceae

From the Latin *ligula* (*lingula*), *ae* ‘a shoe strap, a little tongue, a small sword’, referring to the floral ligules, see *Bull. Sci. Soc. Philom. Paris* 1816: 198. 1816.

Ligularia thomsonii (C.B. Clarke) Pojark. (*Senecio bungei* Franch.; *Senecio thomsonii* C.B. Clarke)

India.

See *Compositae Indicae* 205. 1876, *Annales des Sciences Naturelles; Botanique*, sér. 6, 16: 313. 1883

(Fresh leaves paste applied in fresh and deep cuts. Dried stem bark powder made into a paste applied against joint pains and arthritis complaints.)

in India: khojabar

Ligusticum L. Apiaceae (Umbelliferae)

Greek *ligustikos* ‘Ligurian, pertaining to Liguria, Italy’, Dioscorides applied to the bastard lovage, a *Laserpitium*, see *Species Plantarum* 1: 250. 1753 and *Acta Phytotaxonomica Sinica* 29(6): 540. 1991.

Ligusticum acuminatum Franchet (*Ligusticopsis acuminata* (Franchet) Leute)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6: 131. 1894 and *Annalen des Naturhistorischen Museums in Wien* 73: 69, pl. 3, f. 1, Abb. 3, f. 6. 1969

(Stomachic, for skin diseases.)

in China: jian ye gao ben

Ligusticum angelicifolium Franchet (*Angelica angelicifolia* (Franchet) Kljuykov; *Ligusticopsis angelicifolia* (Franchet) Leute)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6: 133. 1894 and *Annalen des Naturhistorischen Museums in Wien* 73: 70. Taf. 3, f. 2. Abb. 3, f. a. 1969, *Newslett. Int. Organ. Pl. Biosyst.* (Oslo) 29: 23–24. 1998, *Feddes Repertorium* 110(1999) 7–8: 482, f. 1, A, B. 1999

(Sedative.)

in China: gui ye gao ben

Ligusticum apiifolium (Nutt. ex Torr. & A. Gray) A. Gray (*Cynapium apiifolium* Nutt. ex Torr. & A. Gray)

North America. Perennial

See *A Flora of North America: containing ...* 1(4): 641. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 347. 1868

(Antihemorrhagic.)

in English: celeryleaf licorice-root

Ligusticum brachylobum Franchet (*Ligusticopsis brachyloba* (Franchet) Leute; *Peucedanum cavaleriei* H. Wolff)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6: 134. 1894 and *Repertorium Specierum Novarum Regni Vegetabilis* 21(588–600): 246–247. 1925, *Annalen des Naturhistorischen Museums in Wien* 73: 21, pl. 3, f. 3. 1960

(Stomachic, for skin diseases.)

in China: duan pian gao ben

Ligusticum canadense (L.) Britton (*Ferula canadensis* L.)

North America. Perennial

See *Species Plantarum* 1: 247. 1753, *Memoirs of the Torrey Botanical Club* 5(16): 240. 1894

(Roots chewed for stomach disorders.)

in English: Canadian licorice-root

Ligusticum canbyi J.M. Coult. & Rose (*Ligusticum caeruleimontanum* H. St. John; *Ligusticum canbyi* (Coult. & Rose) Coult. & Rose; *Ligusticum leibergii* J.M. Coult. & Rose)

North America. Perennial

See *Revision of North American Umbelliferae* 86–87. 1888

(Roots anticonvulsive, dried roots can be chewed for colds, coughs, heart troubles, fevers and sore throats, earache, or

also a roots infusion can be drunk. Ceremonial, roots burned and smoke used for unconsciousness.)

in English: Canby's licorice-root, Canby's licoriceroot, lovage

Ligusticum chuanxiong Hort. ex Qiu et al. (*Ligusticum sinense* cv. 'Chuanxiong' S.H. Qiu et al.)

China. Perennial herb, erect, prominent discs from the nodes, thickened rhizome with many tubercles, leaves alternate, petiole sheathing at the base clasping the stem, terminal compound umbel, small white flowers, fruit dividing into 2 mericarps, ribbed carpels narrowly winged

See *Species Plantarum* 1: 250. 1753, *Hooker's Icones Plantarum* 20(3): pl. 1958. 1891 and *Acta Phytotaxonomica Sinica* 17(2): 102–103, pl. 16. 1979, *Acta Phytotaxonomica Sinica* 22(1): 38–39, pl. 1A, 2A, 3B. 1984, *Acta Phytotaxonomica Sinica* 28(6): 477–479, f. 1. 1990

(The rhizomes used for anemia, scurvy, irregular menstruation.)

in English: Chuanxiong ligusticum, Szechuan lovage

in China: chuanxiong

Ligusticum daucoides (Franchet) Franchet (*Angelica daucoides* (Franchet) M. Hiroe; *Ligusticopsis daucoides* (Franchet) Lavrova & Kljuykov; *Ligusticopsis dielsiana* (H. Wolff) Pimenov & Kljuykov; *Ligusticum dielsianum* H. Wolff; *Trachydium daucoides* Franchet)

China.

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 245. 1886, *Bull. Soc. Philom. Paris*, sér. 8. 6: 135. 1894 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(16–25): 323. 1930, *Feddes Repertorium* 110(1999) 7–8: 484. 1999, *Botaničeskij Žurnal* (Moscow & Leningrad) 89(1): 1654. 2004

(For colds, cough.)

in China: yu bao gao ben

Ligusticum delavayi Franchet (*Hymenidium delavayi* (Franchet) Pimenov & Kljuykov)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6: 131. 1894 and *Feddes Repertorium* 110(1999) 7–8: 484. 1999

(Febrifuge.)

in China: li jiang gao ben

Ligusticum elatum (Edgew.) C.B. Clarke (*Cortia elata* Edgew.; *Levisticum argutum* Lindl.; *Ligusticum elatum* C.B. Clarke)

India, Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 186. 1830, *Illustrations of the Botany ... of the Himalayan*

Mountains ... [Royle] 232. 1835, *Transactions of the Linnean Society of London* 20(1): 55–56. 1846, *The Flora of British India* 2(6): 698–699. 1879 and *Taxon* 29: 543. 1980

(Essential oil from the roots with sedative properties. Fruits stimulant, carminative, anthelmintic. Veterinary medicine, use the fruits.)

in China: gao sheng gao ben

in India: bootkeshi, vanayamani

Ligusticum filicinum S. Watson

North America. Perennial

See *Proceedings of the American Academy of Arts and Sciences* 11: 140. 1876

(Root used as a cough remedy.)

in English: fernleaf licorice-root

Ligusticum grayi J.M. Coult. & Rose

North America. Perennial

See

(Roots anticonvulsive, analgesic, dried roots can be chewed for colds, coughs, children's stomachaches, heart troubles, fevers and sore throats, earache, or also a roots infusion can be drunk. Powdered root used for poisoning fish.)

in English: Gray's licorice-root

Ligusticum jeholense (Nakai & Kitagawa) Nakai & Kitagawa (*Cnidium jeholense* Nakai & Kitagawa; *Conioselinum jeholense* (Nakai & Kitag.) Pimenov; *Tilingia jeholensis* (Nakai & Kitagawa) Leute)

China.

See *Report of the Institute of Scientific Research, Manchoukuo* Sect. IV. 4 [*Index Fl. Jehol.*]: 36, 90. 1936

(The roots and rootstock used as analgesic and antiinflammatory.)

in China: liao gao ben

Ligusticum likiangense (H. Wolff) F.T. Pu & M.F. Watson (*Ligusticopsis hispida* (H. Wolff) Lavrova & Kljuykov; *Ligusticopsis integrifolia* (H. Wolff) Leute; *Ligusticopsis likiangensis* (H. Wolff) Lavrova & Kljuykov; *Ligusticum calophlebicum* H. Wolff; *Ligusticum integrifolium* H. Wolff; *Pleurospermum calophlebicum* (H. Wolff) M. Hiroe; *Pleurospermum likiangense* H. Wolff; *Trachydium chinense* M. Hiroe; *Trachydium hispidum* H. Wolff, non Franchet; *Trachydium lichiangense* C.Y. Wu, nom. illeg. superfl.)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6(4): 113. 1894 and *Repertorium Specierum Novarum Regni Vegetabilis* 27(726–733): 116–117. 1929, *Repertorium Specierum Novarum Regni Vegetabilis* 27(741–750): 307, 310–311, 329.

(Antiinflammatory.)

in China: mei mai gao ben

Ligusticum porteri J.M. Coult. & Rose

USA, Arizona, Colorado, New Mexico. Perennial

See *Revision of North American Umbelliferae* 86. 1888 and *Bot. Mus. Leaflet* 24: 241–247. 1976

(Aromatic roots antirheumatic, used to treat coughs and colds, sore throat, body aches. Roots piscicide. Ceremonial, contact therapy, protection, roots used to ward off rattlesnakes.)

in English: coughroot, lovage, Porter's licorice-root

Ligusticum pteridophyllum Franchet (*Ligusticopsis pteridophylla* (Franch.) Leute)

China.

See *Bull. Soc. Philom. Paris*, sér. 8. 6: 132. 1894 and *Annalen des Naturhistorischen Museums in Wien* 73: 78, pl. 5, f. 4. 1969

(Antiinflammatory.)

in China: jue ye gao ben

Ligusticum scapiforme H. Wolff (*Ligusticopsis scapiformis* (H. Wolff) Leute; *Ligusticum maxonianum* H. Wolff)

China.

See *Repert. Spec. Nov. Regni Veg.* 27(741–750): 308, 316–317. 1930, *Annalen des Naturhistorischen Museums in Wien* 73: 77. Abb. 3, f. 5. 1969

(Stomachic, antiinflammatory.)

in China: chou ting gao ben

Ligusticum scoticum L.

North America. Perennial herb

See *Sp. Pl.* 1: 250. 1753 and *Kromosomo* 11 17: 471–480. 1980

(Disinfectant, antiseptic.)

in English: Scottish licorice-root

Ligusticum scoticum L. subsp. ***hultenii*** (Fernald) Calder & R.L. Taylor (*Haloscias hultenii* (Fernald) Holub; *Ligusticum hultenii* Fernald; *Ligusticum scoticum* subsp. *hultenii* (Fernald) Calder & R.L. Taylor; *Ligusticum scoticum* var. *hultenii* (Fernald) B. Boivin; *Ligusticum scoticum* L. var. *hultenii* (Fernald) B. Boivin)

North America. Perennial herb, food

See *Rhodora* 32(373): 7–9, pl. 1024. 1930, *Canadian Journal of Botany* 43(11): 1396. 1965, *Le Naturaliste Canadien* 93(5): 643. 1966

(Plant said to be mildly poisonous. Leaves a source for vitamins C and A.)

in English: Hulten's licorice-root

Ligusticum sinense Oliver cv. ***chuanxiong*** S.H. Qiu et al.

China.

See *Acta Phytotaxonomica Sinica* 17(2): 102. 1979

(Antiinflammatory.)

in China: chuan xiong

Ligusticum sinense Oliver var. ***hupehense*** H.D. Zhang & S.M. Fang

China.

See *Acta Phytotaxonomica Sinica* 31(3): 281–285, pl. 1. 1993

(Antiinflammatory, Chinese traditional drug “shuigaoben”).

in China: shui gao ben

Ligusticum sinense Oliver var. ***sinense*** Oliver (*Ligusticum harrismithii* M. Hiroe; *Ligusticum markgrafianum* Fedde ex H. Wolff; *Ligusticum pilgerianum* Fedde ex H. Wolff, nom. illeg.; *Ligusticum pilgerianum* H. Wolff; *Ligusticum silvaticum* H. Wolff)

China.

See *Hooker's Icon. Pl.* 20: t. 1958. 1891 and *Acta Horti Gothoburgensis* 2(7): 315–316. 1926, *Repert. Spec. Nov. Regni Veg.* 27(741–750): 307–308, 313, 322–323. 1930, *Umbelliferae of Asia* 1: 109. 1958

(Analgesic and antiinflammatory, in the treatment of heart diseases and asthma.)

in China: gao ben

Ligusticum striatum DC. (*Cortia striata* (DC.) Leute; *Ligusticum wallichii* Franch., nom. illeg.; *Oreocome striata* (DC.) Pimenov & Kljuykov; *Selinum striatum* (DC.) Benth. & Hook. f.; *Selinum striatum* Benth. ex C.B. Clarke)

China, India.

See *Species Plantarum* 1: 244. 1753, *Species Plantarum*, Editio Secunda 1: 350. 1762, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 158. 1830, *Genera Plantarum* 1: 914. 1867 and *Annalen des Naturhistorischen Museums in Wien* 73: 85. 1967

(For glandular inflammations.)

in China: tiao wen gao ben

in India: ja tira phlang

Ligusticum tenuisectum H. Boissieu (*Ligusticopsis tenuisecta* (H. Boissieu) Leute)

China.

See *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 843–844. 1903, *Annalen des Naturhistorischen Museums in Wien* 73: 79. 1969

(Antiinflammatory, febrifuge.)

in China: xi lie gao ben

Ligusticum tenuissimum (Nakai) Kitagawa (*Angelica tenuissima* Nakai; *Conioselinum tenuissimum* (Nakai) Pimenov & Kljuykov)

Japan, China.

See *Botanical Magazine* 33(385): 10. 1919, *Journal of Japanese Botany* 17(10): 562–563. 1941, *Willdenowia* 33: 373. 2003

(Antiinflammatory, stomachic, for colds.)

in China: xi ye gao ben

Ligustrum L. Oleaceae

Latin *ligustrum*, *i* name for a plant, the privet (Vergilius, Ovidius); according to Plinius was the *cypros* or *cyprus* (Greek *kypros*) or an otherwise unknown plant, according to Columella the *Ligustrum nigrum*; see Carl Linnaeus, *Species Plantarum*. 1: 7. 1753, *Genera Plantarum*. Ed. 5. 8. 1754, Pietro Bubani, *Flora Virgiliana*. 69. Bologna 1870 and *Transactions of the Botanical Society of Edinburgh* 27(1): 95–96. 1916, *Bot. Jahrb. Syst.* 59(3, Beibl. 132): 42. 1924, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 672. [Latin *ligustrum* ‘a plant of Liguria’, but the derivation is unknown and uncertain.] Zanichelli, Bologna 1983, *Novosti Sist. Vyssh. Rast.* 34: 145. 2002, *Acta Bot. Yunnan.* 31(2): 101, 103, 107, 109–110, 114. 2009.

Ligustrum confusum Decne.

China, Nepal. Shrub, white flowers

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 2: 24. 1879 and *Acta Bot. Yunnan.* 31(2): 114. 2009

(Stembark kept between the teeth to relieve toothache.)

in China: san sheng nu zhen

in Nepal: kanike

Ligustrum indicum (Lour.) Merrill (*Phillyrea indica* Lour.)

Nepal.

See *Species Plantarum* 1: 7. 1753, *Flora Cochinchinensis* 19. 1790 and *Transactions of the American Philosophical Society* II 24(2): 307. 1935

(Seeds for constipation and rheumatism.)

in English: wax tree

in Nepal: chelusing, keri

Ligustrum japonicum Thunb. (*Ligustrum kellermannii* Van Houtte)

Japan.

See *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 3: 207. 1780, *Histoire Naturelle des Végétaux*, Classés par Familles 8: 272. 1839

(Berries poisonous, highly toxic, may be fatal if eaten.)

in English: Japanese privet, wax-leaf privet

in China: ku cha ye

in Japan: nezumi-mochi, tama-tsuba-ki

Ligustrum lucidum W.T. Aiton (*Esquirolia sinensis* H. Léveillé; *Ligustrum compactum* (Wallich ex G. Don) J.D. Hooker & Thomson ex Brandis var. *latifolium* W.C. Cheng; *Ligustrum esquirolii* H. Léveillé; *Ligustrum lucidum* f. *latifolium* (W.C. Cheng) P.S. Hsu; *Ligustrum lucidum* var. *esquirolii* (H. Léveillé) H. Léveillé)

China. Evergreen shrub or small tree, glabrous, coriaceous leaves opposite, terminal branched inflorescences, fragrant white sessile flowers, small 4-toothed calyx, corolla campanulate, dried fruits black, single striated curved seed, grown for culturing wax insects to obtain white wax

See *Species Plantarum* 1: 7. 1753, *Hortus Kewensis*; or, a catalogue ... The second edition 1: 19. 1810, *Forest Fl. N.W. India* 310. 1874 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(243–247): 147. 1911, *Repertorium Specierum Novarum Regni Vegetabilis* 10(260–262): 441. 1912, *Contributions from the Biological Laboratory of the Science Society of China* 10: 44. 1935, *Nómina de las plantas recolectadas en el valle de Cochabamba* 2: 17–86. 1966, *Acta Phytotaxonomica Sinica* 11(2): 200. 1966, *J. Lilium wallichianum Schult. & Schult. f. var. ***neilgherrense*** (Wight) H. Hara (*Lilium longiflorum* var. *neilgherrense* (Wight) Baker; *Lilium neilgherrense* Wight)

India.

See *Gardener's Chronicle & Agricultural Gazette* 1871: 479. 1871 and *Fl. E. Himal.* 3rd. Rep.: 132. 1975, *Taxon* 30: 75. 1981

(Bulbs for pectoral complaints, catarrh.)

Limacia Lour. Menispermaceae

Latin *limax*, *limacis* 'a slug snail', possibly referring to the seeds; see J. de Loureiro, *Flora cochinchinensis*. 600, 620–621. Lisbon 1790.

Limacia oblonga Miers (*Limacia oblonga* Hook.f. & Thomson)

Malay Peninsula.

See *Ann. Mag. Nat. Hist.* ser. 2, 7(37): 43. 1851, *Fl. Ind.* [Hooker f. & Thomson] i. 189. 1855

(Roots for ophthalmia.)

Malayan name: akar kuning

Limnophila R. Br. Scrophulariaceae (Plantaginaceae)

Swamp-loving, from the Greek *limne* 'salt-marsh, pool of standing water, marsh' and *philos* 'lover, loving', alluding to the habitat; see Robert Brown, *Prodromus florae Novae Hollandiae*. 442. London 1810 and Philcox, D. "A taxonomic revision of the genus *Limnophila* R. Br. (Scrophulariaceae)." *Kew Bulletin* 24: 101–170. 1970.

Limnophila aromatica (Lam.) Merr. (*Ambulia aromatica* Lam.; *Gratiola aromatica* (Lamk) Pers.; *Limnophila aromaticoides* Yang and Yen; *Limnophila chinensis* subsp. *aromatica* (Lam.) T. Yamaz.; *Limnophila gratissima* Blume; *Limnophila punctata* Blume; *Limnophila punctata* var. *subracemosa* Benth.)

India and Sri Lanka to Indochina, southern China. Herb, annual to perennial, variable, fleshy, simple or shortly branched from the base, glabrous to minutely glandular, leaves decussate or in whorls of 3, flowers solitary and axillary or a few- to many-flowered terminal or axillary raceme, calyx hairy, corolla pale pink densely villous inside, capsule broadly ellipsoid compressed, in shallow ponds or marshy localities, closely related to *Limnophila chinensis* (Osbeck) Merr.

See *Encyclopédie Méthodique, Botanique* 1(1): 128. 1783, *Prodromus Florae Novae Hollandiae* 442. 1810 and *An Interpretation of Rumphius's Herbarium Amboinense* 466. 1917, *Taxon* 30: 698. 1981, *Cytologia* 51: 261–270. 1986, *International Journal of Pharmacognosy* 29(2): 145–153. 1991, *Botanical Bulletin of Academia Sinica* 38: 285–295. 1997

(The sap of the leaves used to clean wounds, and a decoction of the leaves given in fevers.)

in Indonesia: kehkehan, daun kardemom, selaseh ayer kecil

in Malaysia: beremi, kerak-kerak

in Philippines: angangi

in Papua New Guinea: poikehkeh, ginibok

in Thailand: phak khayaeng, phak phaa

in Vietnam: rau ng[oom]

Limnophila erecta Benth. (*Ambulia erecta* (Benth.) Baill. ex Wettst.; *Stemodia gratiolooides* Benth.)

Burma (Myanmar), southern China, Vietnam. Annual herb, erect or ascending, stout to slender, many-branched, glabrous

or densely hairy, reddish, leaves decussate glabrous, flowers axillary and solitary or in axillary and terminal racemes, calyx striate at maturity, corolla white, capsule ovoid pale brown, in shallow ponds or marshy localities

See *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 388. 1846

(The sap of the leaves used to clean wounds, and a decoction of the leaves given in fevers.)

in Indonesia: kehkehan lembut

Limnophila fragrans Seem. (*Ambulia serrata* Wett.; *Limnophila fragrans* (Forst.f.) Seem.)

Australia. Herb, annual or perennial, small, fleshy, decumbent or erect, sprawling, stem round tinged red, leaves opposite, flowers solitary axillary tubular white with purple lines, fruit ovoid, terrestrial, coastal marsh, aquatic marginal, rarely emergent aquatic, usually on the margins of top end water courses

See Whistler, A. *Samoan Herbal Medicine*. Isle Botanica, Thomson Shore, Inc., Dexter. 1996

in English: limnophila, marshweed, Vicks plant (refers to the aromatic odour of the crushed leaves)

in Cook Islands: mapua

in Nehan: sirsiro, sirsiro

in Samoa: tamole vai

in Tahiti: mapua, mapua no'ano'a, puaioru

Limnophila indica (L.) Druce (*Hottonia indica* Linnaeus; *Limnophila gratiolooides* R. Brown, nom. illeg.)

Tropical Africa and Asia. Herb, very variable, amphibious/aquatic, perennial, sessile or pedicellate glands, aerial stem simple to branched, submerged stem many-branched glabrous, flowers solitary, corolla lobes entire white to pale yellow, capsule dark brown, often confused with *Limnophila sessiliflora* (Vahl) Blume

See *Syst. Nat.*, ed. 10. 2: 919. 1759, *Sp. Pl.* ed. 2, 1: 208. 1762, *Prodromus Florae Novae Hollandiae* 442. 1810, *Die Natürlichen Pflanzenfamilien* 4(3B): 73. 1891 and *Bot. Soc. Exch. Club Brit. Isles*. 3: 420. 1914, *Taxon* 30: 698. 1981

(The juice of the plant rubbed on the body against strong pestilent fevers; whole plant cooked into vegetable and used as a brain tonic; liniment used in elephantiasis; whole plant in treating pustular skin eruptions. Antiseptic and carminative, an infusion of the leaves used for skin diseases, stomach problems, diarrhea, dysentery and dyspepsia.)

in China: you geng shi long wei

in India: ambuja (ambuja, water born), gulabi, karpur, kuttra, nanha hemcha, tarati

in Laos: kh'ai namz

in Papua New Guinea: narongo

in Philippines: inata, tara-tara

Limnophila pulcherrima Hook.f.

Malaya.

See *Fl. Brit. India* [J.D. Hooker] 4: 267. 1884

(Whole plant used as poultice.)

Malay name: breml

Limnophila rugosa (Roth) Merrill (*Herpestis rugosa* Roth; *Limnophila roxburghii* auct., non G. Don; *Limnophila rugosa* Merr.; *Limnophila rugosa* Schltr.)

India, SE Asia, Pacific. Herb, erect, semi-aquatic, fragrant, annual, simple or branched, glabrous to hirsute, rooting from the lower nodes, leaves decussate, flowers usually solitary axillary, corolla tubular, 5-lobed bilabiate blue with a yellow spot in the throat, capsule pale brown, seed small shiny black, in wet locations, along streams, pools and rice fields, leaves and tender stems smell of anise and are eaten as a condiment raw or cooked

See *Supplementum Carpologiae* 186, pl. 214. 1807, *Novae Plantarum Species* 290. 1821 and *An Interpretation of Rumphius's Herbarium Amboinense* 466. 1917, *Bot. Jahrb. Syst.* lviii. 379, in obs. 1923

(Plant boiled and liquid drunk as laxative, stomachic or for bleeding ulcer. Top of plant rubbed on itching feet. A decoction and a steam-bath of the leaves to cure itching eyes; leaves antipyretic. A decoction of a mixture of *Limnophila rugosa* and *Ocimum basilicum* L. drunk against mild gonorrhoea and impotence.)

in English: marsh rosemary, sea lavender, statice

in China: da ye shi long wei

in India: bhringaraj, kado phool, kado sag

in Indonesia: hades, selaseh ayer, selaseh banyu

in Papua New Guinea: kraino, poikehkeh

in Philippines: kalao, tala, tara-tara

in Thailand: kachom, lah yamala, om kop, phak kachom

in Vietnam: h[oof]i n[uw][ows]c, qu[ees] d[aa]s[t]

Limnophila sessiliflora (Vahl) Blume (*Ambulia sessiliflora* (Vahl) Baill. ex Wettst.; *Ambulia sessiliflora* Baill. ex Wettst.; *Hottonia sessiliflora* Vahl; *Limnophila sessiliflora* Griff.; *Limnophila sessiliflora* Blume; *Limnophila taoyuannensis* Yang & Yen; *Stemodia sessiliflora* F.Muell.; *Stemodia sessiliflora* (Blume) Muell.)

India and Nepal, Vietnam. Amphibious perennial plant, submerged at first but growing out above the water surface, leaves on aerial stem verticillate, flowers solitary axillary sessile or subsessile, calyx tubular 5-lobed, corolla 2-lipped blue violet to purple, fruit a capsule with 4 bifid valves, in

shallow ponds, swamps and lakes usually with a muddy bottom, suitable for improving the water quality of fish ponds by capturing floating mud particles

See *Species Plantarum* 1: 145–146. 1753, *Encyclopédie Méthodique, Botanique* 1: 128. 1783, *Symbolae Botanicae, ...* 2: 35–36. 1791, *Bijdragen tot de flora van Nederlandsch Indië* 14: 749–750. 1826, *Not. Pl. Asiat.* 4: 99. 1854, *Syst. Census Austral. Pl.* 97. 1882, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(3b): 73. 1891 and *Botanical Bulletin of Academia Sinica* 38: 285–295. 1997

(The leaves used as an antipyretic.)

Limnophila villosa Blume

Indonesia, Malay Peninsula.

See *Bijdr. Fl. Ned. Ind.* 14: 750. 1826

(Whole plant aperient; warmed plant applied on inflammation; leaves febrifuge.)

Limonia L. Rutaceae

An Arabic name; Latin *limonia* (Greek *leimonia*) applied to a plant called also *scolymos* or to a kind of anemone (Plinius); see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 2. 1754, C. Linnaeus, *Species Plantarum*. Ed. 2. 1: 554. 1762, *Fam. Nat. Syn. Monogr.* 1: 31, 38. 1846.

Limonia acidissima L. (*Anisifolium limonia* (L.) Kuntze; *Anisifolium limonia* Kuntze; *Feronia elephantum* Corr.; *Feronia limonia* (L.) Swingle; *Feronia limonia* Swingle; *Hesperethusa acidissima* (L.) Roem.; *Limonia acidissima* Groff; *Limonia acidissima* Houtt.; *Schinus limonia* L.)

India. Tree, greenish petals, fruit with sour pulp

See *Sp. Pl.* 1: 389. 1753, *Nat. Hist.* II. ii. 444. 1774, *Trans. Linn. Soc. London* 5: 225. 1800, *Fam. Nat. Syn. Monogr.* 1: 38. 1846, *Revisio Generum Plantarum* 1: 98. 1891 and *J. Wash. Acad. Sci.* 1914, iv, 328. 1914, *Lingnaam Agricultural Review* 2(L): 22. 1924, *Journ. Arn. Arb.* 1938, xix. 351. 1938, *Taxon* 29: 355–357. 1980

(Used in Ayurveda. Bark extract given as a cough sedative; bark paste applied to cure old wounds. Bark, leaves, fruits and gum to treat anorexia, diarrhoea, vomiting, cough, bronchitis. Fruits tonic, antiscorbutic, pulp fruit extract taken with water to cure menorrhagia, cough, vomiting, hiccough. Leaves carminative, astringent, a decoction given in diarrhoea and hiccough. Ceremonial, ritual, ingredient of Patra pooja in different religious pooja ceremonies; magico-religious beliefs, according to Atri-samhita, no one should stay during the daytime under the shade of the tree.)

in English: elephant apple, Indian wood apple, wood apple

See *Enumeratio Plantarum, quas in China Boreali* 55. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 642. 1848, *Journal of Botany, British and Foreign* 20(238): 290–291. 1882, *Revisio Generum Plantarum* 2: 395. 1891 and *Bulletin de la Société Botanique de France* 66: 221. 1919, *Botanical Magazine* 48(566): 107–108. 1934

(Hemostatic.)

in English: two-color sea lavender

in China: er se bu xue cao, yan tai bu xue cao

Limonium brasiliense (Boiss.) Kuntze (*Limonium brasiliense* var. *patagonicum* (Speg.) Burkart; *Statice brasiliense* Boiss.; *Statice brasiliense* var. *antarctica* Boiss.; *Statice*

brasiliense var. *uruguayensis* (Arechav.) Hauman; *Statice patagonica* Speg.; *Statice uruguayensis* Arechav.)

South America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 644. 1848, *Revisio Generum Plantarum* 2: 395. 1891, *Revista de la facultad de agronomia; universidad nacional de La Plata* 30–31: 548. 1897 and *Flora Ilustrada de Entre Ríos (Argentina)* 5: 25. 1979

(Roots infusion cardioprotective, hemostatic, antioxidant, bacteriostatic, antiinflammatory, in the treatment of hemorrhage, menstrual disorders, dysmenorrhea, amenorrhea and metrorrhagia, rheumatism.)

Limonium californicum (Boiss.) A. Heller (*Limonium californicum* (Boiss.) A. Heller var. *mexicanum* (S.F. Blake) Munz; *Limonium commune* Gray var. *californicum* (Boiss.) Greene; *Limonium mexicanum* S.F. Blake; *Statice californica* Boiss.; *Statice limonium* L. var. *californica* (Boiss.) A. Gray)

North America. Perennial subshrub, herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 643–644. 1848, *Report on the Colorado River* 4: 19. 1861, *Manual of the Botany of the Region of San Francisco Bay* 235. 1894, *Catalogue of North American Plants North of Mexico* 6. 1898 and *Rhodora* 18(207): 59–60, pl. 118, f. C. 1916, *A Flora of California* 3: 77. 1939, *Aliso* 4(1): 96. 1958

(Blood purifier.)

in English: California sealavender, marsh rosemary, western marsh-rosemary

Limonium carolinianum (Walter) Britton (*Limonium angustatum* (A. Gray) Small; *Limonium carolinianum* (Walter) Britton var. *angustatum* (A. Gray) S.F. Blake; *Limonium carolinianum* (Walter) Britton var. *angustifolium* S.F. Blake; *Limonium carolinianum* (Walter) Britton var. *compactum* Shinnery; *Limonium carolinianum* (Walter) Britton var. *nashii* (Small) B. Boivin; *Limonium carolinianum* (Walter) Britton var. *obtusilobum* (S.F. Blake) H.E. Ahles; *Limonium carolinianum* (Walter) Britton var. *trichogonum* (S.F. Blake) B. Boivin; *Limonium nashii* Small; *Limonium nashii* Small var. *albiflorum* (Raf.) House; *Limonium nashii* Small var. *angustatum* (A. Gray) H.E. Ahles; *Limonium nashii* Small var. *trichogonum* (S.F. Blake) S.F. Blake; *Limonium obtusilobum* S.F. Blake; *Limonium trichogonum* S.F. Blake; *Statice caroliniana* Walter; *Statice limonium* L. var. *carolinianum* (Walter) A. Gray)

North America. Perennial herb

See *Flora Caroliniana, secundum ...* 118. 1788, *A Manual of the Botany of the Northern United States*. Second Edition 270. 1856, *Memoirs of the Torrey Botanical Club* 5(17): 255–256. 1894

(For venereal diseases, pulmonary troubles, tuberculosis.)

in English: American thrift, canker root, lavender thrift, marsh root, seaside thrift

Limonium gmelinii (Willd.) Kuntze (*Limonium pycnanthum* (K. Koch) Kuntze; *Statice glauca* Willd. ex Schult.; *Statice gmelinii* var. *scoparia* (Pall. ex Willd.) Schmalh.; *Statice gmelinii* Willd.; *Statice pycnantha* K. Koch; *Statice scoparia* Pall. ex Willd.)

China.

See *Species Plantarum*. Editio quarta 1(2): 1524. 1798, *Systema Vegetabilium* 6: 799. 1820, *Linnaea* 21: 716–717. 1848, *Revisio Generum Plantarum* 2: 395. 1891 and *Molecular Biology Reports* 37(5): 2447–2453. 2010

(Antibacterial, antifungal and antileishmanial activities.)

in China: da ye bu xue cao

Limonium macrorhabdon Kuntze

India.

See *Revis. Gen. Pl.* 2: 395. 1891 and *Economic Botany* 44(3): 318–321. 1990

(Narcotic, dangerous if taken in large doses.)

in India: staspak

Limonium meyeri Kuntze

Turkmenistan, Mediterranean.

See *Fl. Medit.* 6: 262–266. 1996

(Flavonoids.)

Limonium sinense (Girard) Kuntze (*Statice fortunei* Lindl.; *Statice sinensis* Girard)

China.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 2: 329. 1844, *Edwards's Botanical Register* 31: pl. 63. 1845, *Revisio Generum Plantarum* 2: 396. 1891 and *Planta Med.* 66(4): 382–383. 2000, *Antimicrobial Agents and Chemotherapy* 46(9): 2854–2864. 2002

(Antiviral, antioxidant, for the treatment of fever, hemorrhage and menstrual disorders.)

in China: bu xue cao

Limonium wrightii (Hance) Kuntze (*Limonium arbusculum* (Maximowicz) Makino; *Limonium wrightii* Kuntze; *Limonium wrightii* var. *roseum* H. Hara; *Statice arbuscula* Maximowicz; *Statice wrightii* Hance)

China, Japan.

See *Ann. Sci. Nat. Bot.*, sér. 5, 5: 236. 1866, *Revis. Gen. Pl.* 2: 396. 1891 and *Ill. Fl. Jap.* 228. 1948, *Phytomedicine* 9(3): 239–244. 2002, *Pharmacology* 67(3):128–135. 2003

(Antioxidant and hepatoprotective, cardioprotective, free radical scavenging action.)

in China: hai fu rong

Linanthus Benth. Polemoniaceae

Greek *linon* ‘flax’ and *anthos* ‘flower’, see *Flora Peruviana*, et *Chilensis Prodrum* 20, 25. 1794, *Edwards’s Botanical Register* 19: sub pl. 1622. 1833, *Proceedings of the American Academy of Arts and Sciences* 8: 266. 1870 and *Fl. W. Calif.* [Jepson] 429. 1901, *Muhlenbergia*; a journal of botany 8(5): 57. 1912, *Journal of the Washington Academy of Sciences* 32: 139. 1942, *Nat. Hist. Phlox Fam.* 1: 126. 1959, *Am. J. Bot.* 87: 1857–1870. 2000.

Linanthus ciliatus (Benth.) E. Greene (*Leptosiphon ciliatus* (Benth.) Jeps.; *Linanthus ciliatus* Greene; *Navarretia ciliata* (Benth.) Kuntze; *Navarretia ciliata* Kuntze)

North America.

See *Plantas Hartwegianas imprimis Mexicanas* 325. 1849, *Revisio Generum Plantarum* 2: 433. 1891, *Pittonia* 2(11D): 260. 1892 and *A School Flora for the Pacific Coast* 77. 1902 (Blood purifier, cold remedy, cough sedative.)

in English: whisker brush, whiskerbrush

Linanthus floribundus (A. Gray) Greene ex Milliken (*Gilia floribunda* A. Gray; *Gilia nuttallii* A. Gray var. *floribunda* (A. Gray) Munz; *Leptodactylon floribundum* (A. Gray) Tidestr.; *Leptodactylon nuttallii* (A. Gray) Rydb. var. *floribundum* (A. Gray) Jeps.; *Leptosiphon floribundus* (A. Gray) J.M. Porter & L.A. Johnson; *Linanthastrum nuttallii* (A. Gray) Ewan subsp. *floribundum* (A. Gray) Ewan; *Linanthus nuttallii* (A. Gray) Greene ex Milliken subsp. *floribundus* (A. Gray) Munz; *Navarretia floribunda* (A. Gray) Kuntze; *Navarretia floribunda* Kuntze; *Siphonella floribunda* (A. Gray) Jeps.)

North America.

See *Proceedings of the American Academy of Arts and Sciences* 8: 267. 1870, *Revisio Generum Plantarum* 2: 433. 1891 and *A Manual of the Flowering Plants of California* ... 808. 1925, *A Manual of Southern California Botany* 599. 1935, *Proceedings of the Biological Society of Washington* 48(9): 42. 1935, *Journal of the Washington Academy of Sciences* 32: 141. 1942, *A Flora of California* 3(2): 218. 1943, *Aliso* 4(1): 96. 1958, *Madroño* 24: 36–48. 1977, *Aliso* 19(1): 80. 2000, *Journal of Experimental Therapeutics & Oncology* 2(4): 228–236. 2002

(Strophanthidin as the active compound.)

Linanthus nuttallii (A. Gray) Greene ex Milliken (*Leptodactylon nuttallii* (A. Gray) Rydb.; *Leptosiphon nuttallii* (A. Gray) J.M. Porter & L.A. Johnson; *Linanthastrum nuttallii* (A. Gray) Ewan; *Navarretia nuttallii* (A. Gray) Kuntze; *Navarretia nuttallii* Kuntze; *Siphonella nuttallii* (A. Gray) A. Heller)

North America.

See *Revisio Generum Plantarum* 2: 432. 1891 and *University of California Publications in Botany* 2(1): 54. 1904, *Bulletin of the Torrey Botanical Club* 33(3): 149. 1906, *Muhlenbergia*;

a journal of botany 8(5): 57. 1912, *Journal of the Washington Academy of Sciences* 32: 139. 1942, *Madroño* 24: 36–48. 1977, *Aliso* 19(1): 81. 2000

(Stimulant, tonic.)

in English: Nuttall’s desert trumpets

Linanthus nuttallii (A. Gray) Greene ex Milliken subsp. *nuttallii*

North America.

See *University of California Publications in Botany* 2(1): 54. 1904

(Stimulant, tonic.)

in English: Nuttall’s desert trumpets

Linaria Miller Scrophulariaceae (Plantaginaceae)

From the Latin *linum*, *i* ‘rope, flax, thread’, referring to the leaves of some species; Greek *linon*, Anglo-Saxon *linen*; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. 1754 and *Watsonia* 21: 365–368. 1997.

Linaria bipartita (Vent.) Willd.

North America.

See *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 640. 1809 and *Curr. Sci.* 49: 448–449. 1980

(Cyanogenetic.)

in English: cloven-lip toadflax

Linaria spuria Mill. (*Antirrhinum spurium* L.; *Kickxia spuria* (L.) Dumort.)

Europe.

See *Species Plantarum* 2: 613. 1753, *Florula belgica*, opera majoris prodromus, auctore ... 35. 1827

(For cancer, wounds, boils.)

in English: female fluvellin

Linaria vulgaris Hill subsp. *sinensis* (Debeaux) D.Y. Hong (*Linaria vulgaris* Miller, nom. illeg., non *Linaria vulgaris* Hill; *Linaria vulgaris* Miller subsp. *chinensis* (Bunge ex Debeaux) D.Y. Hong; *Linaria vulgaris* Hill var. *chinensis* Bunge ex Debeaux; *Linaria vulgaris* Hill var. *sinensis* Debeaux)

China.

See *The Gardeners Dictionary* ... Abridged ... fourth edition no. 2. 1754, *The Gardeners Dictionary*: ... eighth edition no. 1. 1768, *Iconogr. Bot. Pl. Crit.* 5: 14. 1827, *Actes de la Société Linnéenne de Bordeaux* 31: 336. 1876 and Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. Englewood Cliffs, N.J. 1964, Sticher, O. “Isolation of antirrhinoid from *Linaria vulgaris*.” *Phytochemistry* (Oxf.), 10: 1974–1975. 1971, *Flora Reipublicae Popularis Sinicae* 67(2): 206, 400 (addenda),

pl. 56. 1979, Conn, E.E. *Cyanogenic glycosides*. Pages 479–501 in Stumpf, P.K., Conn, E.E., eds. *The Biochemistry of Plants*. Vol. 7. *Secondary Plant Products*. New York. 1981

(The plant is regarded as toxic to livestock in Europe. This plant contains several compounds, including glucosides and the cyanogenic glucoside prunasin. It also contains a glucoside, antirrhin. Used for treating heart disease caused by rheumatism.)

in English: butter-and-eggs, common toadflax, wild snapdragon, yellow toadflax

in China: liu chuan yu, xin jiang liu chuan yu

Linariantha B.L. Burt & R.M. Sm. Acanthaceae

From *Linaria* and *anthos* 'flower', see *Notes from the Royal Botanic Garden, Edinburgh* 26: 328. 1965.

Linariantha bicolor B.L. Burt & R.M. Sm.

Sarawak.

See *Notes from the Royal Botanic Garden, Edinburgh* 26: 328. 1965

(For stomach pain in babies at night, applied over abdomen as poultice, used with *Argostemma hameliifolium*.)

Common name: meya

Lindackeria C. Presl Achariaceae (Flacourtiaceae)

After J. Lindacker, a scientist, see *Reliquiae Haenkeanae* 2(2): 89, t. 65. 1835.

Lindackeria dentata (Oliv.) Gilg (*Lindackeria dentata* Gilg; *Oncoba dentata* Oliv.)

Tropical Africa. Small tree or shrub, white-creamy sweet scented flowers, orange spiny fruits, seeds black with orange aril

See *Flora of Tropical Africa* [Oliver et al.] 1: 119. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 465. 1908

(Fruits and roots for stomachache.)

in Cameroon: ngono

in Central African Republic: bagolo, ndjamba

in Nigeria: ooya-edun, iyagbo (Yoruba)

in Yoruba: ajiwoogun

in Zaire: amakuakua, mukonja

Lindelofia Lehmann Boraginaceae

For the German Friedrich von Lindelof, a patron of botany, author of *Von dem Rechte der Bundes-Austrägalgerichte*,

Wiedereinsetzung in den vorigen Stand gegen Fristversümnisse zu erteilen. Darmstadt 1838; see *Sp. Pl.* 1: 134. 1753, *Neue Allgemeine Deutsche Garten- und Blumenzeitung* 6: 351. 1850 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 126. Berlin & Hamburg 1989.

Lindelofia stylosa (Karelin & Kirilov) Brand (*Cynoglossum stylosum* Kar. & Kir.; *Lindelofia benthamii* Hook.f.)

India. Fodder

See *Bulletin de la Société Impériale des Naturalistes de Moscou* 15: 409. 1842, *Fl. Brit. India* [J.D. Hooker] 4: 159. 1883 and *Das Pflanzenreich* (Engler) Borrag. Cynogloss. 4(Heft 78): 85. 1921, *Chem. Pharm. Bull.* (Tokyo). 53(11): 1469–1471. 2005, *Carbohydr. Res.* 341(14): 2398–2405. 2006, *Chem. Biodivers.* 5(12): 2676–2683. 2008

(Antioxidant.)

in English: long-style lindelofia

in China: chang zhu liu li cao

in India: makpen

Lindenbergia Lehm. Scrophulariaceae (Orobanchaceae)

For the German botanist Johann Bernhard Wilhelm Lindenberg, 1781–1851, bryologist, author of *Monographie der Riccieen*. [Bonn 1837] and *Synopsis hepaticarum europaeorum*. Bonnae 1829. See Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Semina in Horto Botanico Hamburgensi* 1829: 6, 8. 1829, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 527. 1852 and Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815–1913)*. Dresden 1916, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 385. 1965, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 157. Regione Siciliana, Palermo 1988, Doweld, Alexander Borissovitch (1973–), *Prosyllabus Tracheophytorum, Tentamen Systematis Plantarum Vascularium (Tracheophyta)*. Moskva, 2001.

Lindenbergia griffithii Hook.f.

Himalaya.

See *Fl. Brit. India* [J.D. Hooker] 4: 262. 1884

(Plant juice in bronchitis; juice and coriander leaves on skin eruptions.)

Lindenbergia indica (L.) Vatke (*Bovea sinaica* Decne.; *Dodartia indica* L.; *Lindenbergia abyssinica* Hochst. ex Benth.; *Hemiorchis habessinica* Ehrenb. ex Asch.; *Lindenbergia indica* (L.) Kuntze; *Lindenbergia indica* Kuntze; *Lindenbergia indica* Vatke; *Lindenbergia muraria*

(Roxb. ex D. Don) Bruhl; *Lindenbergia nigrescens* Vatke; *Lindenbergia pirottae* Almagia; *Lindenbergia pirottae* var. *incana* Almagia; *Lindenbergia polyantha* Royle ex Benth.; *Lindenbergia ruderalis* (Retz.) Voigt; *Lindenbergia scutellarioides* Asch.; *Lindenbergia scutellarioides* var. *viridescens* Engl.; *Lindenbergia sinaica* (Decne.) Benth.; *Lindenbergia sinaica* var. *abyssinica* (Hochst. ex Benth.) Almagia; *Lindenbergia urticifolia* Lehm.; *Lindenbergia virens* Vatke; *Stemodia muraria* Roxb. ex D. Don; *Stemodia ruderalis* Retz.)

India, Himalayas. Perennial herb, many-branched, hairy, rooting from the lower nodes, yellow flowers solitary or in terminal spikes or racemes

See *Semina in Horto Botanico Hamburgensi* 1829: 6, 8. 1829, *Oesterreichische Botanische Zeitschrift* 25(1): 10. 1875, *Revis. Gen. Pl.* 2: 462. 1891 and *Journ. Dept. Sc., Calcutta Univ. ii. Bot.*, 27. 1920, *Proceedings of the Indian Science Congress Association* 70(3-VI): 91–92. 1983, *Proceedings of the Indian Science Congress Association* 71(3-VI): 72. 1984, *Glimpses of Cytogenetics in India* 3: 188–198. 1992

(Plant juice in chronic bronchitis, mixed with that of coriander applied to skin eruptions; herb extract drink in kidney stone. Leaf juice diluted with water used for gargling sore throat.)

in English: nettle-leaved lindenbergia

in India: bagozdar, basanti, dhol, gazdar, patthar chati, pili buti

in Nepal: bagh mukhe ghans, dhol, gajhdar, phiunl

Lindenbergia muraria (Roxburgh ex D. Don) Brühl (*Stemodia muraria* Roxburgh ex D. Don)

India.

See *Prodromus Florae Nepalensis* 89. 1825 and *Journal of the Department of Science of Calcutta University* 2: 26. 1920

(Leaves in asthma, chronic bronchitis, cough and tuberculosis.)

in China: ye di zhong e cao

in India: pindru

Lindenbergia philippensis (Cham. & Schltdl.) Benth. (*Lindenbergia melvillei* S. Moore; *Lindenbergia philippensis* var. *ramosissima* Bonati; *Stemodia philippensis* Cham. & Schltdl.)

SE Asia, India. Many-branched, villous herb, yellow flowers, ovate capsule, minute brown seeds

See *Linnaea* 3: 5–6. 1828, *Scrophularineae Indicae* 22. 1835, *Prodr.* (A. DC.) 10: 377. 1846 and *Journal of Botany, British and Foreign* 43(5): 144–145. 1905, *Flore Générale de l'Indo-Chine* 4: 363. 1927

(Leaves on cuts and wounds.)

in China: zhong e cao

Lindera Thunb. Lauraceae

Possibly named for the Swedish botanist Johann Linder (afterwards Lindestolpe), 1676–1723, physician, his works include *De venenis in genere ... exercitatio*. Lugduni Batavorum 1708, *Flora Wiksbergensis*. Stockholm 1716 and *Liber de venenis in ordinem redactus ... animadversionibus ... illustratus auctore C.G. Stentzel*, etc. Francofurti et Lipsiae 1739; see *Botanica expeditior* 60. 1760, Carl Peter Thunberg (1743–1828), *Nova genera plantarum*. 64. Uppsala [1783], *Flora Japonica*, ... 145. 1784, *Plantae Asiaticae Rariores* 2: 63. 1831.

Lindera aggregata (Sims) Kosterm. (*Laurus aggregata* Sims)

SE Asia.

See *Species Plantarum* 1: 369. 1753, *Nova Genera Plantarum* 64. 1783, *Botanical Magazine* 51: t. 2497. 1824 and *Reinwardtia* 9(1): 98. 1974

(Roots decoction a postpartum remedy.)

Lindera aggregata (Sims) Kosterm. var. ***aggregata*** (*Benzoin strychnifolium* (Siebold & Zucc.) Kuntze; *Daphnidium strychnifolium* Siebold & Zucc.; *Laurus aggregata* Sims; *Lindera aggregata* (Sims) Kosterm.; *Lindera eberhardtii* Lecomte; *Lindera strychnifolia* (Siebold & Zucc.) Fern.-Vill.)

Philippines, China, Japan. Evergreen shrub or small tree, aromatic, robust roots brown, young branches with brown pubescence, glossy leaves alternate petiolate, flowers dioecious or polygamous, perianth a very short tube, fruit a black drupe

See *Species Plantarum* 1: 369. 1753, *Nova Genera Plantarum* 64. 1783, *Genera Plantarum* 80. 1789, *Botanical Magazine* 51: t. 2497. 1824, *Plantae Asiaticae Rariores* 2: 61, 63. 1831, *Abhandlungen der Bayerischen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Abteilung* 4(3): 207. 1846, *Novissima appendix* 182. 1880, *Journal of the Linnean Society, Botany* 26(176): 392. 1891, *Revisio Generum Plantarum* 2: 569. 1891 and *Nouvelles archives du muséum d'histoire naturelle* 118. 1913, *Reinwardtia* 9(1): 98. 1974

(Root tubers used for gastric pain, dysmenorrhea, rheumatic and chest pains.)

in English: combined spicebush

in China: wu yao, wu yo

Lindera benzoin (L.) Blume (*Benzoin aestivale* (L.) Nees; *Calosmon benzoin* (L.) Presl; *Laurus benzoin* L.; *Lindera benzoin* Blume; *Lindera benzoin* Meisn.; *Lindera benzoin* var. *pubescens* (Palmer & Steyermark) Rehder)

USA. Flowers sweetly fragrant

See *Species Plantarum* 1: 370–371. 1753, *Systema Laurinarum* 495. 1836, *Mus. Bot.* 1: 324. 1851, *Prodr.* (DC.)

15(1): 244. 1864 and *Journal of the Arnold Arboretum* 20(4): 413. 1939

(Seeds stomachic.)

in English: Benjamin bush, fever-bush, spicebush, wild allspice

Lindera neesiana (Wall. ex Nees) Kurz (*Aperula neesiana* (Wall. ex Nees) Blume; *Aperula neesiana* Blume; *Benzoin fruticosum* Rehder; *Benzoin fruticosum* (Hemsl.) Rehder; *Benzoin neesianum* Wall. ex Nees; *Lindera fruticosa* Hemsl.; *Lindera fruticosa* var. *pomiensis* H.B. Cui; *Lindera neesiana* Kurz; *Lindera pomiensis* (H.B. Cui) H.B. Cui; *Litsea fruticosa* (Hemsl.) Gamble, nom. illeg.; *Litsea fruticosa* Gamble; *Litsea fruticosa* Span. ex Blume)

SE Asia, India. Small tree or shrub, yellowish flowers, seed oil edible

See *Plantae Asiaticae Rariores* 2: 63. 1831, *Museum Botanicum* 1: 366, 374. 1851, *Prelim. Rep. For. Veg. Pegu* Append. A: 103. 1875, *Forest Fl. Burma* ii. 309. 1877, *Journal of the Linnean Society, Botany* 26(176): 388. 1891 and *Plantae Wilsonianae* (Sargent) 2(1): 77–78. 1914, *Journal of the Arnold Arboretum* 1(2): 145. 1919, *Acta Phytotaxonomica Sinica* 16(4): 65, pl. 5, f. 3. 1978, *Acta Botanica Yunnanica* 10(1): 124. 1988

(Ripe fruits kept between the teeth to relieve toothache. Seed oil applied on burns, and taken in small quantity for cough, fever, indigestion, throat troubles.)

in China: lu ye gan jiang

in India: jamkan uesting, siltimur

in Nepal: sil timur, siltimur

Lindera pulcherrima (Nees) Hook. f. (*Benzoin pulcherrimum* (Nees) Kuntze; *Benzoin pulcherrimum* Kuntze; *Daphnidium pulcherrimum* Nees; *Lindera pulcherrima* (Nees) Benth. ex Hook.f.)

Nepal, Himalaya. Small tree

See *Botanica expeditior* 60. 1760, *Plantae Asiaticae Rariores* (Wallich) 2: 61, 63. 1831, *The Flora of British India* [J.D. Hooker] 5(13): 185. 1886, *Revisio Generum Plantarum* 2: 569. 1891

(Plant antiviral, diuretic. Bark crushed into a paste and applied to wounds, also rubbed on to relieve rheumatic pains. Seeds oil used in rheumatic pain.)

in India: sia-sia

Lindera selangorensis Ridl.

Malaysia.

See *J. Fed. Malay States Mus.* 5: 44. 1914

(Leaves decoction for dizziness, noises in the head.)

Malay name: kerabu

Lindera umbellata Thunb. (*Benzoin umbellatum* (Thunb.) Rehder; *Benzoin umbellatum* Rehder; *Benzoin umbellatum* Kuntze; *Lindera umbellata* Blume)

China.

See *Nova Genera Plantarum* 64. 1783, *Flora Japonica*, ... 145, pl. 21. 1784, *Museum Botanicum* 1: 324. 1851, *Revisio Generum Plantarum* 2: 569. 1891 and *Journal of the Arnold Arboretum* 1(2): 146. 1919

(Twig infusion for stomachache.)

in China: tiao chang

in Japan: sumnuhas

Lindernia All. Linderniaceae (Scrophulariaceae)

Named for the German botanist Franz Balthazar von Lindern, 1682–1755, physician, among his works are *Disputatio ... exhibens theorematum medica miscellanea*. Argentorati [1708], *Resp. Dissertatio medica de vermibus ...* Praes. E.H. Wedelio. Jenae [1707], *Hortus Alsaticus*, plantas in Alsatia nobili imprimis circa Argentinam sponte provenientes. Argentorati [Strasbourg] 1747 and *Tournefortius Alsaticus* cis et trans Rhenanus, sive opusculum botanicum, etc. Argentorati 1728; see *Species Plantarum* 2: 628. 1753, Carlo Allioni (1728–1804), *Mélanges de Philosophie et de Mathématique de la Société Royale de Turin* pour les années 1762–1765. 3(1): 177, t. IV, fig. 2, 178–181, t. V, fig. 1. Lindernia anagallis (N.L. Burman) Pennell (*Gratiola cordifolia* Colsmann; *Lindernia cordifolia* (Colsmann) Merrill; *Ruellia anagallis* N.L. Burman; *Vandellia anagallis* (N.L. Burman) T. Yamazaki; *Vandellia callitrichifolia* H. Léveillé; *Vandellia cordifolia* (Colsmann) G. Don)

China.

See *Fl. Indica* 135. 1768 and *J. Arnold Arbor.* 24: 252. 1943

(Used for gonorrhoea.)

in China: chang shuo mu cao

in India: gadagvel

Lindernia antipoda (Linnaeus) Alston (*Bonnaya antipoda* (Linnaeus) Druce; *Bonnaya veronicifolia* (Retzius) Sprengel; *Gratiola veronicifolia* Retzius; *Ilysanthes antipoda* (Linnaeus) Merrill; *Lindernia veronicifolia* (Retzius) F. Mueller; *Ruellia antipoda* Linnaeus; *Vandellia veronicifolia* (Retzius) Haines)

SE Asia.

See *Sp. Pl.* 2: 635. 1753 and *Hand. Fl. Ceylon.* 6(suppl.): 24. 1931, *Fl. Thailand* 5(2): 198. 1990

(Against parasites.)

in China: ni hua mu cao

Lindernia ciliata (Colsmann) Pennell (*Bonnaya brachiata* Link & Otto; *Gratiola ciliata* Colsmann; *Gratiola serrata* Roxburgh; *Ilysanthes serrata* (Roxburgh) Urban; *Vandellia ciliata* (Colsmann) T. Yamazaki)

China, Malaysia. Small herb, leaves serrate

See *Prodromus Descriptionis Gratiolae* 14. 1793 and *Brittonia* 2: 182. 1936

(Pound the plant and drink the juice as a postpartum remedy; a paste applied in skin diseases.)

in China: ci chi ni hua cao

Malay name: rumput jari chichak

Lindernia crustacea (L.) F. Muell. (*Capraria crustacea* L.; *Vandellia bodinieri* H. Léveillé; *Vandellia crustacea* (Linnaeus) Benth.; *Vandellia crustacea* Benth.)

SE Asia, India. Small glabrous branched herb, erect or diffuse, purple or white flowers axillary and terminal, pale yellow flowers with minute tail

See *Scroph. Ind.* 35. 1835, *Syst. Census Austral. Pl.* 1: 97. 1882

(Plant bitter, antifungal, antibacterial, used for gonorrhoea, dysentery, bilious affections, in poultices for boils, sores, itches, skin diseases, ringworms, shingles; plant decoction for childbirth, plant juice in ringworm.)

in China: mu cao

in Borneo: ganing

in India: katu-pee-tsjanga-puspam

Malay name: kera nasi, rumput jari chichak

Lindernia diffusa (L.) Wettst. (*Bonnaya organifolia* Spreng.; *Gratiola organifolia* Vahl; *Lindernia diffusa* Wettst.; *Lindernia diffusa* A. Chev.; *Pyxidaria diffusa* (L.)

Kuntze; *Pyxidaria diffusa* Kuntze; *Sibthorpia americana* Sessé & Moc.; *Sibthorpia diffusa* Sessé & Moc. ex C. Nelson; *Vandellia diffusa* L.)

South America. Small pubescent herbaceous plant, many-branched, creeping, reddish, rooting at the nodes, small white purple flowers, small beaked fruit, in wet places

See *Species Plantarum* 1: 17. 1753, *Systema Naturae*, ed. 12 422. 1767, *Mantissa Plantarum* 1: 89. 1767, *Enumeratio Plantarum ...* 1: 99. 1804, *Icones plantarum selectarum* 25. 1820, *Systema Vegetabilium*, editio decima sexta 1: 42. 1825, *Revisio Generum Plantarum* 2: 464. 1891, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] IV. 257(3b): 79. 1891, *Fl. Mexic.*, ed. 2 145. 1894 and *Exploration Botanique de l'Afrique Occidentale Française ...* 473. 1920, *Fl. Turkey* 6: 680. 1978

(Strong purgative, vermifuge, toxic. Used in poulticing yaws. Infusion emetic.)

Lindernia hyssopoides (L.) Haines (*Bonnaya hyssopoides* (L.) Benth.; *Bonnaya hyssopioides* Benth.; *Gratiola hyssopoides* L.; *Ilysanthes hyssopioides* (L.) Benth.; *Ilysanthes hyssopioides* Benth.; *Lindernia hyssopioides* Haines)

India, China.

See *Mantissa Plantarum* 174. 1771, *Annals of Nature* 13. 1820, *A Numerical List of Dried Specimens* [Wallich] n. 3866. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 419. 1846 and *The Botany of Bihar and Orissa* 4: 635, 666. 1922

(Veterinary medicine, leaf paste applied on the body of the animals infected by external parasitic insects.)

in China: jian guo mu cao

in India: neeru goni soppu, paapata janumu

Lindernia micrantha D. Don (*Lindernia angustifolia* (Benth.) Wettst.; *Lindernia micrantha* (Blatt. & Hallb.) V. Singh; *Vandellia angustifolia* Benth.)

India. Diffuse or spreading herb, pinkish flowers, septicidal linear capsule, many small rugose seeds

See *Systema Naturae*, ed. 12 2: 384, 422. 1767, *Prodromus Florae Nepalensis* 85. 1825, *Scrophularineae Indicae* 37–38. 1835, *Die Natürlichen Pflanzenfamilien* 4(3b): 79. 1891 and *Journal of Japanese Botany* 19: 205. 1943

(Whole plant in stomach disorders.)

in China: xia ye mu cao

Lindernia nummularifolia (D. Don) Wettst. (*Bryodes perrieri* Bonati; *Lindernia sessiliflora* (Benth.) Wettst.; *Pyxidaria nummularifolia* (D. Don) Kuntze; *Vandellia chinensis* T. Yamaz.; *Vandellia corymbosa* Baker; *Vandellia nummularifolia* D. Don; *Vandellia sessiliflora* Benth.)

Nepal. Herb, pale purple flowers, weedy

See *Prodromus Florae Nepalensis* 86. 1825, *Scrophularineae Indicae* 37. 1835, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 416. 1846, *Journal of Botany, British and Foreign* 20: 221. 1882, *Revisio Generum Plantarum* 2: 464. 1891, *Die Natürlichen Pflanzenfamilien* 4(3b): 79. 1891 and *Bulletin de la Société Botanique de Genève* 15: 104. 1924, *Journal of Japanese Botany* 30(6): 178–179. 1955, *Kew Bulletin* 22(1): 10. 1968, *Bull. Mus. Natl. Hist. Nat., B, Adansonia* 17: 227–257. 1995

(Whole plant decoction taken to treat headache and also as antiallergic.)

in China: kuan ye mu cao

in Nepal: pittamarijhar

Lindernia oppositifolia (L.) Mukerjee

India. Herb, linear leaves, bracteate axillary solitary flowers, blue petals, capsule with short style

See *Journ. Ind. Bot. Soc.* xxiv. 134. 1945

(Whole herb in fever. Leaf juice given to women after conception to check miscarriage or abortion.)

in India: baka pushpa, kondam-pullu, panchamani, tsjanga-puspam, vaaga-pushpam

Lindernia ruellioides (Colsmann) Mukerjee (*Bonnaya reptans* Spreng.; *Bonnaya reptans* (Roxburgh) Spreng.; *Gratiola reptans* Roxburgh; *Gratiola ruellioides* Colsm.; *Ilysanthes ruelleodes* Kuntze; *Ilysanthes ruellioides* Kuntze; *Ilysanthes ruellioides* (Colsm.) Kuntze; *Ilysanthes ruellioides* (Colsm.) Hochr.; *Ilysanthes ruelloides* Schltr.; *Lindernia ruellioides* (Colsm.) Pennell)

China, India. Trailing, serrate leaves, flowers in racemes, slender capsules

See *Species Plantarum* 1: 17. 1753, *Mélanges de Philosophie et de Mathématique de la Société Royale de Turin* 3(1): 178–181, pl. 5, f. 1. 1766, *Prodromus Descriptionis Gratiolae* 12. 1793, *Annals of Nature* 13. 1820, *Icones plantarum selectarum* 25, pl. 11. 1821 [1820], *Systema Vegetabilium*, editio decima sexta 1: 41. 1825, *Revisio Generum Plantarum* 2: 162, 461. 1891 and *Bot. Jahrb. Syst.* 59(1): 109. 1924, *Candollea* v. 206. 1934, *Brittonia* 2(3): 182. 1936

(Whole plant decoction used as a lotion for cut sinews, sprains and spasms. Herb applied for worms in the skin, ringworm, maggots. Juice of crushed leaves mixed with milk and taken for urinary problems. Leaves and roots decoction taken for snakebite, also rubbed on bitten place.)

in China: han tian cao

in India: kra-thang, kra-thang syndat, neing lik, sam gichok, sam reng chick, sam tham lang, tha-suih, thasuih

Lindernia verbenifolia (Colsm.) Pennell (*Bonnaya verbenifolia* Spreng.; *Gratiola verbenifolia* Colsm.)

India. Erect, decumbent, succulent herb, blue-violet flowers, linear straight capsule, truncate seeds

See Colsmann, Johannes (1771–1830), *Prodromus descriptionis Gratiolae*, sistens species a D. König detectas. Hafniae, 1793, *Syst. Veg.* (ed. 16) [Sprengel] 1: 42. 1824 [dated 1825; publ. in late 1824] and *Scroph. W. Himal. (Acad. Nat. Sci. Philad., Monogr. 5)* 31. 1943

(Whole plant in jaundice and liver complaints along with *Bacopa monnieri*; whole plant anthelmintic.)

Malay name: poku sumpuk chaching

Lindsaea Dryander ex Smith Dennstaedtiaceae (Lindsaeaceae, Lindsaeoideae)

After the Jamaican botanist John Lindsay, 1785–1803, surgeon, a correspondent of Sir Joseph Banks and Hope, author of “An Account of the *Quassia polygama*, or Bitter-wood of Jamaica; and of the *Cinchona Brachycarpa*, a new species of Jesuit Bark found in the same island.” from the *Transactions of the Royal Society of Edinburgh*. [Edinburgh 1791]. See *Mémoires de l'Académie Royale des Sciences* 5: 413, pl. 9, f. 4. 1793, *Transactions of the Linnean Society of London* 3: 40, 43, t. 9. 1797, *Opuscoli scientifici d'una Società di professori della Pontif. Università di Bologna* 3: 294. 1819, *Nova Genera et Species Plantarum* (folio ed.) 4: 34. 1820[1818], *Enumeratio Filicum* 218. 1824, *Annales des Sciences Naturelles, Botanique* 3: 507–508. 1824, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 414–415. 1841, *Linnaea* 18: 548. 1844, *Reisen in Britisch-Guiana* 883, 1048. 1848, *Mémoire de la Société du Muséum d'Histoire Naturelle de Strasbourg* 4(1): 201. 1850, *The Botany of the Voyage of H.M.S. ~Herald~* 239. 1854, *Index Filicum* xxxiv. 1857, *Die Farnkräuter der Jetztwelt* 212, t. 145, f. 12. 1865, *Historia Filicum* 272. 1875, *Supplement to the Ferns of Southern India and British India* 6. 1876, *Festschrift zum 50 Jährigen Jubiläum der Königstädtischen Realschule zu Berlin* 26. 1882 and *Boletim da Sociedade Broteriana*, ser. 2 30: 23–24. 1956, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 7: 34, 38, t. 1. 1956, *Acta Botanica Neerlandica* 6(2): 165, 171, 176, 184, 188, 238, 260, 267. 1957, *Kew Bull.* 1958: 451. 1959, *Fern Gaz.* 11(2–3): 141–162. 1975, *New Syllabus Plant Families* 353. 2006.

Lindsaea cultrata (Willd.) Sw. (*Adiantum cultratum* Willd.; *Adiantum cultratum* J. Sm. ex Hook.; *Adiantum cultratum* J. Sm.; *Adiantum cultratum* C. Sm.; *Synaphlebium recurvatum* (Wall. ex Hook.) J. Sm.)

China, India.

See *Phytographia* 14, t. 10, f. 2. 1794, *Synopsis Filicum* (Swartz) 119. 1806, *Species Plantarum*. Editio quarta [Willdenow] 5(1–2): 425. 1810, *Numer. List* [Wallich] n.

149. 1828, *Hooker's Journal of Botany and Kew Garden Miscellany* (Hooker) 3: 415. 1841, *Species Filicum* 1: 222–223, t. 70 A. 1846 and *Indian Fern J.* 5: 162–169. 1988

(Fronds antiseptic, antibacterial, demulcent.)

Lindsaea repens (Bory) Thwaites (*Acrophorus repens* (Bory) T. Moore; *Davallia repens* (Bory) Desv.; *Dicksonia repens* Bory; *Lindsaea repens* (Bory) Bedd.; *Lindsaea repens* Thwaites; *Lindsaea repens* (Bory) Mett.; *Lindsaea repens* (Bory) Bedd.; *Lindsaea repens* Bedd.; *Odontoloma repens* (Bory) C. Presl)

India, Sri Lanka. Fern

See *Mémoires de l'Académie Royale des Sciences* 5: 413, pl. 9, f. 4. 1793, *Mémoires de la Société Linnéenne de Paris* 6: 314. 1827, *Abhandlungen der Königlichen Böhmisches Gesellschaft der Wissenschaften* 6: 457. 1851, *The Ferns of Southern India* 72, t. 209. 1864, *Enumeratio Plantarum Zeylanicae* 388. 1864

(Leaves chewed to treat dysentery.)

in Papua New Guinea: takwomnga, uyaiwa

Linnaea Gronov. Caprifoliaceae

Named after Carl Linnaeus (Carl von Linné, Carl von Linnaeus), 1707–1778 (d. Uppsala); see *Species Plantarum* 2: 631. 1753, *Oesterreichische Botanische Zeitschrift* 22: 291. 1872 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(1): 126–127, 131–134. 1900, Sten Lindroth, in *D.S.B.* 8: 374–381. 1981, Stafleu and Cowan, *Taxonomic Literature*. 3: 71–111. Utrecht 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 738. Stuttgart 1993, *Taxon* 47: 658. 1998.

Linnaea borealis L.

North America. Perennial herb, subshrub, creeping, erect forked stalk, rounded elliptical toothed opposite bright green leaves, sweet smelling small trumpet-shaped pink flowers

See *Species Plantarum* 2: 631. 1753 and *Bot. Žurn.* (Moscow & Leningrad) 60(6): 864–872. 1975, *Bot. Žurn.* (Moscow & Leningrad) 61(7): 963–969. 1976, *News Sib. Depart. Acad. Sci. USSR, Ser. Biol.* 15(3): 46–52. 1976, *Bot. Zhurn.* 65(1): 51–59. 1980, *Turun Yliopiston Julkaisuja, Sar. A 2, Biol.-Geogr.* 3: 1–12. 1982, *Bot. Zhurn.* 67(6): 778–787. 1982, *Bot. Žurn.* (Moscow & Leningrad) 75: 279–282. 1990, *Bot. Žurn.* (Moscow & Leningrad) 76: 473–476, 769–771. 1991

(Analgesic, for headache.)

in English: twinflower

Linnaea borealis L. subsp. *americana* (J. Forbes) Hultén ex R.T. Clausen (*Linnaea americana* Forbes; *Linnaea borealis* L. var. *americana* (Forbes) Rehder; *Linnaea borealis* L. var. *americana* Rehder)

North America. Perennial herb, subshrub, creeping, erect forked stalk, rounded elliptical toothed opposite bright green leaves, sweet smelling small trumpet-shaped pink flowers

See *Species Plantarum* 2: 631. 1753, *Hort. Woburn.* 135. 1833 and *Rhodora* 6: 56. 1904, *Taxon* 31(2): 344–360. 1982

(Whole plant paste applied to the forehead for headache.)

in English: twinflower

Linnaea borealis L. subsp. *longiflora* (Torr.) Hultén (*Linnaea borealis* L. subsp. *longiflora* (Torr.) Piper & Beattie; *Linnaea borealis* var. *longiflora* Torr.; *Linnaea longiflora* Howell; *Linnaea longiflora* (Torr.) Howell)

North America. Perennial herb, subshrub, creeping, erect forked stalk, rounded elliptical toothed opposite bright green leaves, sweet smelling trumpet-shaped pink flowers

See *Species Plantarum* 2: 631. 1753, *United States Exploring Expedition* 17(2): 327. 1874 [*U.S. Expl. Exped., Phan. Pacific N. Amer.*, Under the Command of Charles Wilkes, U.S.N., Botany.] and *Fl. N.W. Amer.* 1: 280. 1900, *Fl. N.W. Coast* [Piper & Beattie] 338. 1915, *Flora of the Aleutian Islands* 310. 1937

(Twigs decoction given to children with fever, cramps, stomachache, as a sedative.; leaves decoction taken for colds.)

in English: longtube twinflower

Linostoma Wallich ex Endl. Thymelaeaceae

Greek *linon* 'a net' and *stoma* 'mouth', see *Genera Plantarum* 331. 1837, *Denkschriften der Koeniglich-Baierischen Botanischen Gesellschaft in Regensburg* 3: 293. 1841, *Flora Brasiliensis* (Martius) 5(1): 72, pl. 30. 1855, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 600. 1857, *Flora van Nederlandsch Indie, Eerste Bijvoegsel* 3: 355. 1861 and *J. Arnold Arbor.* 42(3): 295–320. 1961, *Fl. Cambodge, Laos & Vietnam* 26: 38–81. 1992, *Fl. Thailand* 6(3): 226–245. 1997.

Linostoma decandrum (Roxb.) Wall. ex Meisn. (*Nectandra decandra* Roxb.)

India.

See *Descriptiones Plantarum ex Capite Bonae Spei*, ... 131. 1767, *Hort. Beng.* 90. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 425–426. 1832, *Denkschriften der Koeniglich-Baierischen Botanischen Gesellschaft in Regensburg* 3: 293. 1841 and *J. Arnold Arbor.* 42(3): 295–320. 1961, *Fl. Thailand.* 6(3): 226–245. 1997

(Aqueous extract of roots sprayed in crop field as insecticide. Powdered dried seeds to kill maggots and also rats and mice. Bark a fish poison.)

in India: deobih

Linum L. Linaceae

Latin *linum*, *i* ‘rope, flax, thread’; Greek *linon*, Akkadian *lipu* ‘fat’, Hebrew *libna* ‘whiteness’; Irish *lin*, Anglo-Saxon *linen*; see Carl Linnaeus, *Species Plantarum*. 1: 277–281. 1753, *Genera Plantarum*. Ed. 5. 135. 1754, *Flora Telluriana* 3: 33. 1836[1837], *Handbuch des Natürlichen Pflanzensystems* 306–307. 1837, *New Flora and Botany of North America* ... 4: 64. 1836[1838], *Spicilegium florum rumelicarum et bithynicarum* ... 1: 118. 1843, *Smithsonian Contributions to Knowledge* 3(5): 25. 1852, *Proceedings of the American Academy of Arts and Sciences* 6: 521. 1865 and *North American Flora* 25:(1) 67, 69, 74, 84. 1907, *Brittonia* 20(2): 107–135. 1968, *Plant Systematics and Evolution* 140(2–3): 232–233. 1982, *Novosti Sist. Zhurn.* (Moscow & Leningrad) 93(2): 335. 2008, *Novosti Sist. Vyssh. Rast.* 41: 128, 131, 137. 2009.

Linum australe A. Heller (*Cathartolinum australe* (A. Heller) Small; *Cathartolinum australe* Small)

North America. Annual herb

See *Bull. Torrey Bot. Club* 25: 627. 1898 and *North American Flora* 25(1): 81. 1907, *Journal of the Washington Academy of Sciences* 29(11): 485. 1939, *Phytologia* 55(1): 3. 1984

(Infusion of plant taken for stomach disorders and kidney diseases; plant decoction as a postpartum remedy.)

in English: southern flax

Linum australe A. Heller var. ***australe*** (*Cathartolinum australe* (A. Heller) Small; *Linum aristatum* Engelm. var. *australe* (A. Heller) Kearney & Peebles; *Mesynium australe* (A. Heller) W.A. Weber)

North America. Annual herb

See *Bull. Torrey Bot. Club* 25: 627. 1898 and *North American Flora* 25(1): 81. 1907, *Journal of the Washington Academy of Sciences* 29(11): 485. 1939, *Phytologia* 55(1): 3. 1984

(Infusion of plant taken for stomach disorders and kidney diseases; plant decoction as a postpartum remedy.)

in English: southern flax

Linum lewisii Pursh (*Adenolinum lewisii* (Pursh) Á. Löve & D. Löve; *Linum lewisii* auct. non Pursh; *Linum perenne* subsp. *lewisii* (Pursh) Hultén; *Linum perenne* var. *lewisii* (Pursh) Eaton & Wright; *Linum sibiricum* DC. var. *lewisii* (Pursh) Lindl.)

North America. Perennial herb, fodder

See *Flora Americae Septentrionalis*; or, ... 1: 210. 1814[1813], *Prodr.* (DC.) 1: 427. 1824, *Botanical Register*; consisting of coloured ... 14: t. 1163. 1828, *A Manual of Botany* 302. 1840 and *Flora of Alaska and Yukon* 7: 1122. 1947, *Taxon* 31(2): 348. 1982

(Poultice or infusion of plant applied or used to bruises, goiter, headache, swelling, eyes problems. Leaves decoction taken for heartburn, stomach gas.)

in English: blue flax, prairie flax

Linum perenne L. (*Linum altaicum* Ledeb. ex Juz.; *Linum sibiricum* DC.)

China, India.

See *Species Plantarum* 1: 277. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 427. 1824 and *Flora URSS* 14: 113. 1949

(Seeds emollient.)

in China: su gen ya ma

Linum puberulum (Engelm.) A. Heller (*Cathartolinum puberulum* (Engelm.) Small; *Cathartolinum puberulum* Small; *Cathartolinum vestitum* Wooton & Standl.; *Linum puberulum* A. Heller; *Linum rigidum* Pursh var. *puberulum* Engelm.; *Mesynium puberulum* (Engelm.) W.A. Weber)

North America. Annual

See *Smithsonian Contributions to Knowledge* 3(5): 25. 1852, *Plant World* 1(2): 22. 1897 and *N. Amer. Fl.* 25(1): 80. 1907, *Contributions from the United States National Herbarium* 16(4): 142–143. 1913, *Brittonia* 20(2): 107–135. 1968, *Phytologia* 55(1): 3. 1984, *Phytologia* 56(1): 55–60. 1984

(Fruit juice used for eye problems, squeezed into eye for inflammation and infection. Leaves decoction taken for heartburn.)

in English: plains flax

Linum rigidum Pursh (*Linum rigidum* Pursh var. *rigidum*; *Nezera rigida* (Pursh) Nieuwl.)

North America. Annual or perennial herb

Lippia micromera Schauer (*Gardoquia origanoides* Rchb. ex Benth.; *Lippia cuneifolia* Sessé & Moç.; *Lippia helleri* Britton; *Lippia micromera* var. *helleri* (Britton) Moldenke; *Lippia micromera* var. *paludicola* Moldenke)

Caribbean, Central America to Guyana. Shrub, aromatic, inflorescence capitate, calyx long villous, corolla white with a yellowish throat

See *Fl. Mexic.*, ed. 2: 139. 1894 and *Torreya* 3: 105. 1903, *Revista Sudamer. Bot.* 5: 2. 1937, *Phytologia* 1: 468. 1940

(Leaves infusion tonic, stimulant, expectorant, demulcent, stomachic, antiemetic, antispasmodic. Bush tea infusion for flu, oliguria; bath for cough and heat.)

in English: fine podina, fineleaf thyme, Spanish thyme, thyme

Lippia multiflora Moldenke

W. Trop. Africa, Uganda and Angola. Shrub, branching from base, roots woody, papery-coriaceous leaves dull green, flowers very fragrant in green heads, corolla white, calyx white-green, anthers yellow, savanna

See *Phytologia* 3: 168. 1949

(Leaves and stem used in the treatment of malaria. Leaves and fruits for pneumonia, fevers and headache.)

in English: bush tea, gambian tea bush, healer herb

in Tanzania: lihongolya

in Yoruba: arunfanfan, efinrin gogara, efinrin odan, opapara igbo

Lippia palmeri S. Watson

USA.

See *Proceedings of the American Academy of Arts and Sciences* 24: 67. 1889

(Used to kill head lice.)

Lippia plicata Baker (*Lippia adoensis* Hochst. var. *multicaulis* Hiern; *Lippia plicata* var. *acuminata* Moldenke; *Lippia plicata* var. *parvifolia* Moldenke; *Lippia strobiliformis* Moldenke; *Lippia strobiliformis* var. *acuminata* Moldenke; *Lippia strobiliformis* var. *parvifolia* Moldenke)

Tanzania to S. Trop. Africa. Shrub, woody-based herb, aromatic, stem dark brown, strongly scented leaves, corolla creamy, used for cleaning pots out before making beer, firewood

See *Flora of Tropical Africa* 5: 281. 1900, *Phytologia* 2: 317–318. 1947, *Phytologia* 12(6): 352–353. 1965, *Fl. Trop. Afr.* 94–95. 1992, *Darwiniana* 40: 121–125. 2002

(Roots or leaves boiled and drunk for stopping coughs.)

in Tanzania: isongole, lisongoli

Lippia sidoides Cham. (*Lippia obscura* Briq.; *Lippia salvifolia* Cham.)

Brazil, Argentina. Shrub, aromatic, erect, white flowers, edge of forest

See *Linnaea* 7: 227. 1832 and *Veterinary Parasitology* 148(3–4): 288–294. 2007

(Veterinary medicine, anthelmintic.)

Liquidambar L. Hamamelidaceae (Altingiaceae)

From the tree exudes a fragrant gum or resin, Latin *liquidus*, *a, um* ‘liquid, flowing’ and Arabic *ambar*, *anbar* ‘ambergris’, see ALMA, *Archivum latinitatis medii aevi*. V: 101. Bruxelles 1929–1930.

Liquidambar acalycina H.T. Chang

China. Tree, once classified under *L. formosana*

See *Species Plantarum* 2: 999. 1753 and *Acta Scientiarum Naturalium Universitatis Sunyatseni* 2: 33. 1959, Chang Hung-ta. *Hamamelidaceae*. In: Chang Hung-ta, ed., *Fl. Reipubl. Popularis Sin.* 35(2): 36–116. 1979, *Acta Botanica Austro Sinica* 5: 161–176. 1989, *Mol. Phylogenet. Evol.* 39(2): 512–28. 2006

(The resin, stems, leaves, and fruits used medicinally for irregular menstruation, lumbago, rheumatic joint pains, urticaria and dysuria.)

in English: Chang’s sweetgum, sweet gum

in China: que e feng xiang shu

Liquidambar formosana Hance (*Liquidambar acerifolia* Maximowicz; *Liquidambar formosana* var. *monticola*)

Rehder & E.H. Wilson; *Liquidambar maximowiczii* Miquel; *Liquidambar tonkinensis* A. Chevalier)

South China, Vietnam, Laos, Japan. Tree, bark blackish-grey cracked in large irregular pieces, leaves alternate, young leaves purple-red, male capitula in terminal panicles, female flowers solitary, hispid fruit spherical, at forest edges, on hillsides

See *Species Plantarum* 2: 999. 1753, *Bulletin de l'Académie Impériale des Sciences de St-Pétersbourg* 10(3): 486. 1866, *Annales des Sciences Naturelles; Botanique*, sér. 5, 5: 215. 1866, *Annales Museum Botanicum Lugduno-Batavi* 3: 200. 1877 and *Plantae Wilsonianae* 1(3): 422. 1913, *Bull. Allergy Asthma Immunol.* 90(6): A6. 2003, Fukuda Y., Sakai K., Matsunaga S., Tokuda H., Tanaka R. "Cancer chemopreventive activity of lupane- and oleanane-type triterpenoids from the cones of *Liquidambar styraciflua*." *Chem. Biodivers.* 2(3): 421–428. 2005

(Gum, bark and root, antidiarrheal, sedative, febrifuge. Gum used for catarrh, coughs, dysentery, sores, and wounds of both humans and domestic animals. Mixture of sap, hot water, garlic and onions taken as a treatment for intestinal worms; sap mixed with honey consumed by women before, during and after childbirth, also drunk for stomach infections, a postpartum remedy. Storax is known to be allergenic.)

in English: American sweet gum, red gum, sweet gum

in Central America: estoraque, liquidámbar, lesquin, ocom, ocop, ocozol, quiramba, trementina de pino, tzoté

in El Salvador: liquidámbar

in Honduras: liquidámbar, um wé

in Mexico: bito, buluchka'an, itsché (= lágrimas de árbol), liquidámbar, ocozocuahuitl (= árbol de resina de pino), pijto, vito, yaga pito, yaga vio, yaga vido, yaga huille

in Nicaragua: caraña, liquidámbar

Liriope Lour. Asparagaceae (Convallariaceae, Liliaceae)

Liriope, in the Greek mythology a woodland nymph, was the mother of Narcissus; some suggest from the Greek *leirion* 'lily'.

***Liriope graminifolia* (L.) Baker** (*Asparagus graminifolius* L.; *Convallaria spicata* Thunb.; *Dracaena graminifolia* (L.) L.; *Globeria autumnalis* Raf.; *Globeria spicata* (Thunb.) (Leaves febrifuge, purgative, for measles.)

in English: bastard alkanet, corn gromwell, gromwell, pigeon-weed, puccoon, red root, stone seed, wheat-thief

in China: tian zi cao

Lithospermum canescens (Michx.) Lehm. (*Batschia canescens* Michx.)

North America. Perennial herb

See *Species Plantarum* 1: 132–133. 1753, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 315. 1791, *Flora Boreali-Americana* 1: 130, pl. 14. 1803, *Plantae e Familiae Asperifoliarum Nuciferae* 2: 305. 1818 and *Taxon* 31(2): 344–360. 1982

(Roots for asthma, lung complaints, sedative. Ceremonial, sacred bead.)

in English: hoary puccoon, paint Indian, puccoon, yellow puccoon

in North America: bazu-hi (Omaha-Ponca)

Lithospermum caroliniense (J.F. Gmel.) MacMill. (*Batschia carolinensis* J.F. Gmel.; *Batschia caroliniensis* Walter ex J.F. Gmel.)

North America. Perennial

See *Systema Naturae* ... editio decima tertia, aucta, reformata 2(1): 315. 1791, *The Metaspermae of the Minnesota Valley* 438. 1892 and *J. Bot. Res. Inst. Texas* 1(2): 1091–1100. 2007

(Root powder taken for chest wounds.)

in English: Carolina puccoon, hairy puccoon, plains puccoon, puccoon

Lithospermum caroliniense (J.F. Gmel.) MacMill. var. ***caroliniense*** (*Batschia carolinensis* J.F. Gmel.; *Batschia caroliniensis* Walter ex J.F. Gmel.; *Lithospermum carolinianum* Lam.; *Lithospermum caroliniense* (Walter ex J.F. Gmel.) MacMill.; *Lithospermum gmelini* (Michx.) Hitchc.; *Onosmodium carolinianum* (Lam.) A. DC.)

North America. Perennial herb

See *Systema Naturae* ... editio decima tertia, aucta, reformata 2(1): 315. 1791, *Tableau Encyclopédique et Methodique* ... *Botanique* 1: 397. 1792, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 70. 1846, *The Metaspermae of the Minnesota Valley* 438. 1892, *A Key to the Spring Flora of Manhattan* 30. 1894 and *J. Bot. Res. Inst. Texas* 1(2): 1091–1100. 2007

(Root powder taken for chest wounds and pains. Ceremonial.)

in English: Carolina puccoon, hairy puccoon, plains puccoon, puccoon

Lithospermum erythrorhizon Siebold & Zuccarini (*Lithospermum officinale* Linnaeus subsp. *erythrorhizon* (Siebold & Zuccarini) Handel-Mazzetti; *Lithospermum officinale* var. *erythrorhizon* (Siebold & Zucc.) Maxim.)

China, Japan.

See *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(3): 149. 1846, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 17: 411. 1872 and *Symbolae Sinicae* 7(4): 817. 1936

(Roots for pulmonary troubles.)

in English: red root gromwell

in China: zi cao

Lithospermum incisum Lehm. (*Batschia linearifolia* (Goldie) Small; *Lithospermum angustifolium* Michx.; *Lithospermum linearifolium* Goldie; *Lithospermum mandanense* Spreng.; *Pentalophus mandanensis* (Spreng.) A. DC.)

North America. Perennial herb, leafy, several thick stems clustered together, yellow trumpet-shaped flowers, rounded lobes irregularly toothed

See *Flora Boreali-Americana* 1: 130–131. 1803, *Plantae e Familiae Asperifoliarum Nuciferae* 303. 1818, *Edinburgh Philosophical Journal* 6(12): 322. 1822, *Systema Vegetabilium*, editio decima sexta 1: 554. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 87. 1846

(Sedative, antihemorrhagic, stimulant, contraceptive, for colds, coughs, mental illness, eyewash, stomachache, kidney and thyroid problems, swelling, skin infections, sore throat. Ceremonial.)

in English: narrow-leaf puccoon, narrowleaf gromwell, narrowleaf stoneseed

Lithospermum macromeria J. Cohen (*Lithospermum viridiflorum* Roxb.; *Macromeria viridiflora* A. DC.)

North America. Perennial herb, see also *Macromeria*

See *Flora Indica* or Descriptions of Indian plants. Vol 2 2: 4. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 68. 1846 and *Bot. Results Sessé & Moc. Exped.* 7: 98. 2000, *Brittonia* 61(2): 108. 2009

(Anticonvulsive. Ceremonial, ritual.)

in English: giant-trumpets

Lithospermum multiflorum Torr. ex A. Gray

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 10: 51. 1874 and *Phytologia* 64: 390–398. 1988

(Roots stimulant, tonic.)

in English: manyflowered stoneseed

Lithospermum officinale L. (*Margarospermum officinale* (L.) Decne.)

Europe, North America. Perennial herb

See *Species Plantarum* 1: 132. 1753 and *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, *Acta Biol. Cracov., Ser. Bot.* 17: 133–164. 1974, *Bot. Žurn.* (Moscow & Leningrad) 62(7): 1034–1042. 1977, *Taxon* 29: 538–542. 1980, *Verh. Zool.-Bot. Ges. Wien* 129: 215–226. 1992, *Watsonia* 19: 169–171. 1993, *Opera Bot.* 137: 1–42. 1999

(Dried powdered seeds infusion given to children as a diuretic.)

in English: common gromwell, European gromwell, European stoneseed, gray-mile, gromwell, little wale, pearl gromwell, pearl-plant

in China: ti hsueh, tzu tan, tzu tsao, ya hsien tsao, xiao hua zi cao

Lithospermum ruderale Douglas ex Lehm. (*Lithospermum pilosum* Nutt.; *Lithospermum pilosum* A. Gray)

North America. Perennial herb

See *Novarum et Minus Cognitarum Stirpium Pugillus* [Lehmann] 2: 28. 1830, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 43–44. 1834, *Amer. J. Sci. Ser. II*, xxxiv. (1862) 256. 1862

(Antirheumatic, disinfectant, antidiarrheal, contraceptive, diuretic. Fresh or dried roots infusion drunk for pleurisy, kidney troubles, diarrhea, sores; a foliage infusion drunk for diarrhea. Witchcraft medicine, good luck charm.)

in English: stoneseed, western gromwell

Lithraea Miers ex Hooker & Arnott Anacardiaceae

From the Chilean vernacular name, see *Travels in Chile and la Plata* 2: 529. 1826, *Botanical Miscellany* 3: 175. 1833. Allergic contact dermatitis caused by species of *Lithraea* genus is frequent in South America.

Lithraea brasiliensis Marchand (*Ehretia venulosa* Spreng. ex Engl.; *Lithraea australiensis* Engl.; *Lithraea verrucosa* Miers ex Engl.)

South America.

See *The Civil and Natural History of Jamaica* in Three Parts 168. 1756, *Genera Plantarum* 1103. 1840, *Révision du groupe des Anacardiacees* 185. 1869, *Flora Brasiliensis* 12: 395. 1876, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1: 422. 1881, *Monographiae Phanerogamarum* 4: 347. 1883 and *Phytologia*

8(7): 329–365. 1962, Ale, S.I., Ferreira, F., Gonzalez, G., Epstein, W. “Allergic contact dermatitis caused by *Lithraea molleoides* and *Lithraea brasiliensis*: identification and characterization of the responsible allergens.” *Am. J. Contact Dermat.* 8(3): 144–9. 1997

(The sap is powerfully irritant and severe dermatitis has resulted from contact with the timber.)

Common names: aroeira, litre

Lithraea caustica (Molina) Hook. & Arn. (*Laurus caustica* Molina)

South America. Tree

See *Species Plantarum* 1: 369. 1753, *Botanical Miscellany* 3: 175. 1833, *Genera Plantarum* 1103. 1840

(Leaf eaten raw to treat allergy; juice of the stem with *Rubus ulmifolius* for cough. Severe dermatitis has resulted from contact with the wood. The sap and, at certain times of the year, the exudate from the leaves is highly irritant.)

Common names: aroeira, litre

Lithraea molleoides (Vell.) Engl. (*Lithraea aroeirinha* March. ex Warm.; *Rhus clauseniana* Turcz.; *Schinus leucocarpus* Mart. ex Engl.; *Schinus molle* L.; *Schinus molleoides* Vell.)

South America. Evergreen tree, weeping foliage, short trunk, spreading crown, sticky resinous latex, leaves compound, very small creamy white flowers, small round berries, drought resistant, sometimes in *Schinus molle* L.

See *Species Plantarum* 1: 265–267, 388–389. 1753, *Florae Fluminensis* 10: t. 134. 1825 [1829], *Genera Plantarum* 1103. 1840, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1: 469. 1858, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 61. 1873, *Flora Brasiliensis* 12(2): 394. 1876 and *Prop. Entomol.* 98(3): 651–5. 2005, *Phytomedicine.* 12(1–2): 108–11. 2005, *World J. Gastroenterol.* 12(37): 5959–63. 2006 [Induction of apoptosis on human hepatocarcinoma cell lines by an alkyl resorcinol isolated from *Lithraea molleoides*.], *Fitoterapia.* 77(5): 406–7. 2006

(Allergic contact dermatitis. Cytotoxic, antimicrobial, anti-ulcerogenic, nematicidal, antiviral, repellent and acaricidal effects, immunomodulating properties.)

in Bolivia: lloke

Litsea Lam. Lauraceae

From the Chinese *litse*, *li* 'small, little' and *tse* 'plum', because of the resemblance to the fruit of the plum; see *Genera Plantarum* 80. 1789, *Encyclopédie Méthodique, Botanique* 3(2): 574–575. 1792, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 350. 1852, *Genera Plantarum* 3: 161. 1883, *The Flora of British India* 5: 155, 164. 1886 and *Philippine Journal of Science* 1(Suppl.): 56. 1906, *Notul. Syst.* (Paris) 8: 67–128. 1939, *Fieldiana, Bot.* 24(4): 302–344. 1946, *Acta Phytotaxonomica Sinica* 16(4): 61. 1978, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1848–1849. Canberra 1991, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 354. 1993, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 346. Basel 1996.

Litsea auriculata Chien & Cheng

China.

See *Contr. Biol. Lab. Sci. Soc. China, Botanical Ser.* 6(7): 59–62. f. 1. 1931

(Fruit and root bark insecticide; leaves for the treatment of hurtful sinew.)

in China: tian mu mu jiang zi

Litsea chinensis Lam. (*Litsea chinensis* Blume, nom. illeg.; *Litsea chinensis* Heyne ex Nees, nom. inval.; *Litsea laurifolia* (Jacq.) Cordemoy; *Tetranthera laurifolia* Jacq.)

India, China.

See *Encyclopédie Méthodique, Botanique* (Lamarck) 3: 574. 1792, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 59. 1797, *Bijdragen tot de flora van Nederlandsch Indië* 11: 565. 1826, *Fl. Ile Reunion* 304. 1895

(Bark taken with water in dyspepsia, gastrointestinal disorders.)

in India: maida

Litsea coreana H. Lév. var. ***sinensis*** (C.K. Allen) Yen C. Yang & P.H. Huang (*Actinodaphne lancifolia* (Siebold & Zuccarini) Meissn. var. *sinensis* C.K. Allen; *Iozoste hirtipes* Migo)

SE Asia, Korea, China.

See *Encyclopédie Méthodique, Botanique* 3(2): 574–575. 1792, *Plantae Asiaticae Rariores* 2: 61. 1831, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 211. 1864 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(257–259): 370. 1912, *Annals of the Missouri Botanical Garden* 25: 406. 1938, *Bulletin of the Shanghai Science Institute* 14: 300. 1944, *Acta Phytotaxonomica Sinica* 16(4): 49–50. 1978

(Root for stomachache.)

in China: bao pi zhang

Litsea cubeba (Lour.) Pers. (*Actinodaphne citrata* (Blume) Hayata; *Benzoin cubeba* (Lour.) Hatus.; *Laurus cubeba*

Lour.; *Litsea citrata* Blume; *Persea cubeba* (Lour.) Spreng.; *Tetranthera polyantha* Wallich ex Nees var. *citrata* Meissner)

China. Shrub or small tree, reddish stem, twigs with odor of lemon when broken, leaves with sweet spicy fragrance when crushed, flowers greenish yellowish white, small rounded fruits, a source of pickle, lemon-scented essential oil, along streambanks, watercourses

See *Species Plantarum* 1: 369. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* s.n. 1754, *Genera Plantarum* 80. 1789, *Flora Cochinchinensis* 1: 252–253. 1790, *Encyclopédie Méthodique, Botanique* 3(2): 574. 1792, *Syn. Pl.* (Persoon) 2(1): 4. 1806, *Systema Vegetabilium*, editio decima sexta 2: 269. 1825, *Plantae Asiaticae Rariores* 2: 61, 68. 1831 and *Icones plantarum formosananum nec non et contributiones ad floram formosanam*. 3: 164. 1913, *Acta Botanica Austro Sinica* 5: 161–176. 1989, *Journal of Cytology and Genetics* 1(1): 77–79. 2000

(Poisonous. Seed oil antiparalytic, anticephalalgic, antihysterical, carminative, spasmolytic and diuretic, used in headache, paralysis, typhoid fever, hysteria, loss of memory, dizziness. Fruits, dried or fresh, against stomach disorders; infusion of the leaves of *Hydrocotyle javanica*, mixed with plant of *Desmodium triflorum*, leaves of *Kadsura scandens* and fruits of *Litsea cubeba*, drunk to treat measles, pox in small children; fruit decoction for the treatment of vertigo, hysteria, headache, paralysis and in postpartum preparations. Leaf paste applied on cuts and wounds, rashes and skin diseases. Ritual, ceremonial, dried fruit one of the ingredients of a mixture burned as incense in curing rituals.)

in English: cubebs, pheasant pepper tree

in China: bi cheng que, may chang, pi cheng ch'ieh, shan ji jiao

in Nepal: siltimur

in Thailand: chakhai-ton, takhrai, takhrai-ton

in Vietnam: c[aa]y m[af]ng tang, mang tang, may chang, ta cham diang

Litsea cubeba (Lour.) Pers. var. ***cubeba*** (*Laurus cubeba* Loureiro; *Litsea kingii* J.D. Hooker)

China.

See *Fl. Cochinch.* 252. 1790

(The root, stem, leaves and fruits used for swelling and pain.)

in China: shan ji jiao

in Indonesia: baleng la, beleng la, ki lemo, kranglean, kranglejan, lado-lado

Litsea doshia Kosterm. (*Litsea doshia* (D. Don) Kosterm.; *Litsea doshia* (Buch.-Ham. ex D. Don) Kosterm.; *Tetranthera doshia* D. Don)

India. Tree

See *Prodr. Fl. Nepal.* 65. 1825 and *Journal of Scientific Research* Indonesia 1: 90, in adnot. 1952

(Leaves, bark and fruit chewed to remove poison and gas from the stomach.)

in India: tsungru

Litsea euosma W.W. Smith

China.

See *Notes Bot. Gard. Edinb.* 13: 166. 1921

(Fruits anodyne, anti emetic.)

in China: qing xiang mu jiang zi

Litsea garciae Vidal (*Cylicodaphne garciae* (Vidal) Nakai; *Lepidadenia kawakamii* (Hayata) Masam.; *Litsea kawakamii* Hayata; *Tetradenia kawakamii* (Hayata) Nemoto)

Borneo, Philippines. Tree

See *Revision de Plantas Vasculares Filipinas* 228. 1886 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam.* 3: 165. 1913, *Flora of Japan* 2: 374. 1931, *Bulletin of the Tokyo Science Museum* 22: 32. 1948, *Taiwania* 1: 69. 1948

(Bark ash applied to caterpillar sting.)

in China: lan yu mu jiang zi

in Sarawak: madang enkala, ta'ang

Litsea glutinosa (Lour.) C.B. Rob. var. ***glutinosa*** (*Litsea sebifera* Pers.; *Sebifera glutinosa* Lour.)

Indonesia. Small tree, spreading branches, greenish-yellow flowers borne singly or in clusters at old leaf scars, inflorescence on leafless branches, wood yellow-brown, seed core contains oil

See *Flora Cochinchinensis* 2: 638. 1790, *Synopsis Plantarum* (Persoon) 2(1): 4. 1806, *Bijdragen tot de flora van Nederlandsch Indië* 560. 1826 [24 Jan 1826] and *Philippine Journal of Science* 6(5): 321. 1911, *Journal of Cytology and Genetics* 25: 60–69, 308–320. 1990

(Used in Ayurveda and Sidha. Bark demulcent, mucilaginous, mildly astringent, analgesic, used in diarrhea and dysentery; stem bark made into a paste applied over the knife injuries and wounds; bark decoction applied in boils, taken for chest pain; bark paste given against blood dysentery and in vomiting; stem bark given for leucorrhea; bark powder given against snakebite and bone fracture; stem bark paste mixed with goat milk and plastered over bone fracture; inner bark

chewed to get relief from stomachache and dysentery. Leaves mucilaginous, emollient, antispasmodic, used in infusion or as a poultice for bruises and wounds; macerated leaves in dysentery. Root astringent, tonic, decoction used as emmenagogue. Root bark and leaves antipyretic, for swellings, boils, diarrhea, tuberculosis. Branches hung over the roof of the cattle-shed to keep away insects. Veterinary medicine, stem bark paste applied and bandaged over bone fractured area; bark decoction fed to cows to cure diarrhea; crushed leaves given to treat indigestion.)

in English: Indian laurel

in South Africa: Indiese lourier

in Nepal: kadmero, kutmero, ratmanti

Litsea moupinensis Lecomte var. *szechuanica* (Allen) Yang & P.H. Huang (*Litsea szechuanica* Allen)

China.

See *Bull. Soc. Bot. France* 60: 84. 1913, *Journ. Arn. Arb.* 22: 18. 1941, *Acta Phytotax. Sin.* 16(4): 47. 1978

(For ulcers, cuts.)

in China: si chuan mu jiang zi

Litsea nitida (Roxb.) Hook. f. (*Litsea nitida* Hook.f.; *Litsea nitida* (Roxb.) Wall. ex Nees; *Tetranthera nitida* Roxb.)

India, Himalaya. Tree, yellowish wood, coriaceous shining oblanceolate leaves, yellow ellipsoid fruits enclosed in cupular perianth

See *Hortus Bengalensis*, or a catalogue ... 73. 1814, *Plantae Asiaticae Rariores* 2: 66. 1831, *The Flora of British India* [J.D. Hooker] 5: 174 [*Litsaea*]. 1886

(Bark astringent, antiseptic.)

in India: supin-um-araung

Litsea noronhae Blume

Indonesia. Tree, fruits eaten, lowland forest

See *Bijdragen tot de flora van Nederlandsch Indië* 11: 561. 1826 [24 Jan 1826]

(Leaves decoction drunk as a general tonic to improve strength. Bark or seed decoction drunk to treat cholera, stomachache, gastroenteritis. A paste made from crushed seeds applied to infected sores.)

in Indonesia: buah mali, gajah tengaal

Litsea novoleontis Bartlett

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 44: 601. 1909

(Leaves infusion antitussive, carminative, sedative, pectoral, used for throat and chest problems.)

Litsea odorifera Valetton

SE Asia, Java, Sumatra. Tree, aromatic

See *Icones Bogorienses* [Boerlage] 3: t. 276. 1909

(Leaves sedative, stomachic, tonic, applied to promote lactation.)

in Indonesia: brawas, trawas

Litsea penangiana Hook. f.

Malay Peninsula.

See *The Flora of British India* [J.D. Hooker] 5: 171. 1886

(Leaves for hysteria, madness, insomnia.)

Malay name: medan asam

Litsea pipericarpa (Miq.) Kosterm. (*Lindera pipericarpa* (Miquel) Boerl.; *Lindera pipericarpa* Boerl.; *Polyadenia pepericarpa* Miquel)

Indonesia, Malaysia. Dioecious tree, small tree, inflorescence a small umbel, flowers enclosed in involucre bracts yellow fragrant, fruit a globose berry black at maturity, in forest clearings

See *Handl. Fl. Ned. Ind.* (Boerlage) 3(1): 147. 1900, *Reinwardtia* 8: 104. 1970

(Fruits tonic, antiseptic and diuretic, against indigestion. Spread leaves on the bed for body ache.)

in Borneo: tenam

in Indonesia: kulit antarsa, kulit pulaga

in Malaysia: medang serai

Litsea pungens Hemsley (*Litsea kangdingensis* H.S. Kung)

China.

See *Journ. Linn. Soc. Bot.* 26: 384. 1891

(For skin diseases.)

in China: mu jiang zi

Litsea robusta Blume

Java, Indonesia. Tree

See *Bijdragen tot de flora van Nederlandsch Indië* 11: 560. 1826 [24 Jan 1826]

(Powdered seeds made into a paste and applied as rubefacient, and also as a plaster to broken bones, to reduce swelling.)

in Indonesia: mali

Litsea rotundifolia Hemsley var. ***oblongifolia*** (Nees) Allen (*Actinodaphne chinensis* Nees; *Actinodaphne chinensis* var. *oblongifolia* Nees; *Actinodaphne hypoleucophylla* Hayata; *Iozoste chinensis* Blume; *Iozoste rotundifolia* Nees var. *oblongifolia* Nees; *Litsea chinensis* Blume)

China.

Ethiopia, Tanzania. Perennial, shrub or tree, erect, green, hollow-stemmed, often lying procumbent sometimes rooting when in contact with ground, milky latex, inflorescence white turning brown when dry, corolla pale green, lobes tinged purple, anthers very dark blue with pale green connective, style and stigma pale green, disc yellow, seeds pink, in forest clearing

See *Species Plantarum* 2: 929–933. 1753, *A General History of the Dichlamydeous Plants* 3: 697, 700. 1834, *Tentamen Florae Abyssinicae ...* 2: 6. 1848, *Nom.* 2: 1509. 1874, *Flora of Tropical Africa* 3: 465. 1877 and *Annalen des Naturhistorischen Museums in Wien* 56: 364. 1948, *Nordic Journal of Botany* 3: 371–382. 1983, *American Journal of Botany* 80: 847–853. 1993

(Root decoction used for chest treatment. Roots boiled and sprayed to prevent destruction by witchcraft.)

in Burundi: igihondogori

in Tanzania: inzyonzyo, libongobongo

Lobelia inflata L.

North America. Annual herb, erect, strigose, corollas pale blue-white, inflated green fruits, open fallow field, forest, margin of oak woods, disturbed areas, open moist woods, open trail in oak woods, at edge of woods

See *Species Plantarum* 2: 929–933. 1753 and Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. Englewood Cliffs. 1964, Lampe, K.F., McCann, M.A. *AMA Handbook of Poisonous and Injurious Plants*. American Medical Assoc. Chicago. 1985

(Potentially toxic, overdoses led to cases of poisoning, which resulted in fatalities. Lobeline is one of several alkaloids found in Indian tobacco and other *Lobelia* species. In the past, aboriginal people smoked its dried leaves. Emetic to strong emetic, insecticide, sedative, cholinergic, expectorant, antiseptic, used for syphilis, colic, typhoid, colds, croup, fevers, headaches and rheumatism, in small doses to abort an asthma attack. Leaves rubbed on aches and stiff neck. Roots and leaves used on boils and sores, bites and stings; poultice of root used for body aches, venereal disease sores. Witchcraft medicine.)

in English: Indian tobacco, lobelia

Lobelia kalmii L. (*Dortmanna kalmii* Kuntze; *Dortmannia kalmii* (L.) Kuntze; *Lobelia kalmii* Bart.; *Lobelia kalmii* L. var. *strictiflora* Rydb.; *Lobelia strictiflora* (Rydb.) Lunell; *Lobelia strictiflora* Lunell; *Rapuntium kalmii* (L.) C. Presl)

North America. Perennial herb

See *Species Plantarum* 2: 930. 1753, *Prodromus Monographiae Lobeliacearum* 23. 1836, *Revisio Generum Plantarum* 2: 380. 1891 and *Memoirs of the New York Botanical Garden* 1: 378. 1900, *Bulletin of the Leeds [North Dakota] Herbarium* 2: 8. 1908, *Taxon* 31: 583–587. 1982

(Plant used as an emetic, for abscesses, earaches.)

in English: brook lobelia, Ontario lobelia

Lobelia mildbraedii Engl. (*Lobelia mildbraedii* Engl. forma *acutifolia* E. Wimm.; *Lobelia mildbraedii* Engl. var. *robynsii* E. Wimm.; *Lobelia suavibracteata* Hauman; *Lobelia utshungwensis* R.E. Fr. & T.C.E. Fr.; *Lobelia utshungwensis* var. *congolensis* Humbert)

Tanzania, Uganda. Herb, shrub, stem hollow, milky latex yellowish, inflorescence bracts green, calyx green, corolla pale green, disk yellow, style green, anthers grey, stigma white, along stream

See *Species Plantarum* 2: 929–933. 1753 and *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 344. 1911, *Nordic Journal of Botany* 3: 371–382. 1983, *American Journal of Botany* 80: 847–853. 1993

in Burundi: igisandasanda

Lobelia nicotianaefolia Heyne (*Lobelia nicotianifolia* Roth; *Lobelia nicotianifolia* Roth ex Schultes; *Lobelia nicotianifolia* B. Heyne)

Vietnam, India, Sri Lanka. Terrestrial herb, shrubs, erect, many-branched, light yellow latex, terminal compound inflorescences, white-greenish petals reflexed, anthers bluish, seeds compressed, in open places

See *Species Plantarum* 2: 929–933. 1753 and *Current Science* 50: 904–905. 1981

(Used in Ayurveda and Sidha. Poison. Plant antiseptic, antifertility. The dry herb, when handled, is extremely acrid, the dust irritating the throat and nostrils like tobacco. Plant juice applied to boils and warts; stem bark piece placed on the cavity for toothache. Latex and leaves leech repellent. Leaves infusion antispasmodic, useful in small doses to abort an asthma attack; leaf paste used against cuts, itching, skin diseases and wounds; leaves pesticide, against insects, bacteria and viruses, tick and flea. Veterinary medicine, leaf paste used against cuts and wounds, when mixed in water used as a tick repellent.)

(Reported to be toxic.)

Lodoicea Comm. ex DC. Arecaceae (Palmae)

After Ludwig XV or Louis XV of France, 1715–1774; in *Bulletin des sciences, par la Société Philomatique*. [*Bull. Sci. Soc. Philom. Paris.*] 2(46): 171. Paris 1800.

Lodoicea maldivica (J.F. Gmel.) Pers. ex H. Wendl. (*Borassus sonneratii* Giseke; *Cocos maldivica* J.F. Gmel.; *Cocos maritima* Comm. ex H. Wendl.; *Lodoicea callypige* Comm. ex J. St. Hil.; *Lodoicea sechellarum* Labill.; *Lodoicea sonneratii* Baill.; *Lodoicea sonneratii* (Giseke) Baill.)

Seychelles.

See *Species Plantarum* 2: 1188. 1753, *Bull. Sci. Soc. Philom. Paris* 2: 171. 1800, *Annales du muséum national d'histoire naturelle* 9: 140. 1807, *Palmiers*: 241, 250. 1878, *Histoire des Plantes* (Baillon) 13: 323. 1895 and *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1–50. 1970, *Journal of Chinese Medicinal Materials* 21(10): 494–496. 1998

(The solid fruits weigh from 30 to 40 pounds, these fruits falling from the tree constitute a serious hazard. Semen *Lodoicea maldivicae* of the Traditional Chinese Medicine. Slices of fruit used in making soup for treating chronic cough and for arresting bleeding. Syrup believed to be an effective for coughs due to cold or flu, chronic bronchitis, asthma or catarrh.)

in English: coco-de-mer, double coconut, palm nut tree, sea coconut

in China: da shi lu, fu ye zi, hai di ye, hai ye zi, hoi dai yeh, ju zi zong

Loeseliastrum (Brand) Timbrook Polemoniaceae

Resembling *Loeselia* L., after the German botanist Johannes (Johann) Loesel (Loeselius), 1607–1655, physician, M.D. Leiden 1639, professor of medicine 1639–1655, botanical writer, his writings include *De podagra tractatus*. Rostochii 1638, *Plantas in Borussia sponte nascentes*. [Publ. by his son, Johannes Loeselius.] 1654, *Scrutinium renum*, in quo ... renum fabrica et actio, etc. Regiomonti 1642 and *Flora Prussica*. Editor Johann Gottsched (1668–1704). Regiomonti 1703. See *Species Plantarum* 2: 628. 1753, *Florae Peruvianaes, et Chilensis Prodrum* 20, 25. 1794, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 1796–1800, *Synoptical Flora of North America* 1(1, Suppl.): 409. 1886, *Das Pflanzenreich* IV(3a): 54. 1891, *Pittonia* 3(13): 30. 1896 and *University of California Publications in Botany* 2(1): 25. 1904, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 397. 1965, *Taxon* 34: 523. 1985, *Madroño* 33(3): 170. 1986.

Loeseliastrum matthewsii (A. Gray) S. Timbrook (*Gilia matthewsii* (A. Gray) A. Gray; *Langloisia matthewsii* (A. Gray) Greene; *Loeselia matthewsii* A. Gray; *Navarretia matthewsii* (A. Gray) Coville)

North America. Annual herb

See *Geological Survey of California, Botany* 2: 466. 1880, *Contributions from the United States National Herbarium* 4: 153. 1893, *Pittonia* 3(13): 30. 1896 and *Madroño* 33(3): 157–174. 1986

(Plant decoction given for colds.)

in English: desert calico

Logfia Cass. Asteraceae

Anagram of the genus *Filago*, see *Species Plantarum* 2: 927, 1199. 1753, *Bull. Sci. Soc. Philom. Paris* 1819: 143. 1819[1819], *Dictionnaire des Sciences Naturelles* 23: 564. 1822.

Logfia arvensis (L.) Holub (*Gnaphalium arvense* (L.) Scop.; *Oglifa arvensis* (L.) Cass.)

India.

See *Flora Carniolica*, Editio Secunda 2: 153. 1772, *Dictionnaire des Sciences Naturelles* [Second edition] 35: 448. 1825 and *Notes from the Royal Botanic Garden, Edinburgh* 33(3): 432. 1975, *Taxon* 29: 722–723. 1980

(Whole plant antioxidant, antipyretic, antitoxic, anti-respiratory troubles.)

Lolium L. Poaceae (Gramineae)

From the Latin name for a weed or a darnel, *lolium*, *ii* (Plinius, Vergilius, T. Maccius Plautus, Ovidius); *lolium* denotes not edible food, from Akkadian *la*, Hebrew *lo* 'of negation, not, no, without' and *lehem* 'food, grain, bread', Akkadian *lewi*, *lemu*, *le'emu* 'to take food'; see *Species Plantarum* 1: 83. 1753, Franz von Paula von Schrank (1747–1835), *Baiersche Flora* 1: 102, 382. 1789, *Essai d'une Nouvelle Agrostographie* 99, 162, 177. 1812, *Observations sur les Graminées de la Flore Belgique* 97, 98, 99. 1823 [1824], *Linnaea* 17(4): 386–387. 1844, *Hooker's Journal of Botany and Kew Garden Miscellany* 8: 301. 1856, *Flore de France ... Prospectus* 3: 612. 1856 and *Grasses of Ceylon* 45. 1956, *Techn. Bull. U.S.D.A. (or U.S. Dept. Agric. Tech. Bull., or Technical Bulletin, United States Department of Agriculture)* 1392: 1–65. 1968, *Dominguezia* 1: 1–23. 1978, *Novon* 3(3): 239–243. 1993, Giovanni Semerano, *Dizionario della lingua Latina e di voci moderne*. 2(2): 459. (The grains and probably the entire plant as well are poisonous. The grains are often infected by a fungus (ergot) which produces the alkaloid temulin, causing poisoning when grazed by cattle or when present as a contaminant of flour. Leaves used for treating eye problems. Veterinary medicine, whole plant used for convulsions.)

in English: bearded darnel, bearded ryegrass, cheat, darnel (ryegrass), darnel ryegrass, dragge, drake, drawke, drunk, poison darnel, poison ray grass, sturdy ryle, Virginian oat

in Arabic: shaylam, zawan, zuwan

in India: machri, mochni

in Peru: ballico, cerisuelo, sirisuela

in Sierra Leone: cuckle lif

in South Africa: drabok raaigras, drongkras

Lomagramma J. Sm. Lomariopsidaceae (Aspleniaceae)

From the Greek *loma* ‘border, edge, hem, fringe’ and *gramma* ‘line, letter’, referring to the position of the sori.

Lomagramma sumatrana Alderw.

Sumatra. Fern, epiphytic, lowland forest

See *Journal of Botany*, being a second series of the Botanical Miscellany 3: 402. 1841 and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 2: 158. 1920

(Leaves included in a complex remedy used both internally and externally against leprosy.)

in Indonesia: keluang lompat, parkis lompat, sorpe lompat

Lomariopsis Fée Lomariopsidaceae (Aspleniaceae)

From *Lomaria* (Greek *loma* ‘a fringe, border, edge’) a subgenus of *Blechnum*, and the Greek *opsis* ‘the aspect of, resemblance, appearance’; see Antoine Laurent Apollinaire Fée, *Mémoires sur la famille des Fougères*. (Hist. Acrostichum). 2: 10–12. 1845.

Lomariopsis japurensis (Mart.) J. Sm. (*Acrostichum japurense* Mart.; *Olfersia japurensis* (Mart.) C. Presl; *Stenochlaena japurensis* (Mart.) Griseb.)

Colombia.

See *Species Plantarum* 2: 1067–1072. 1753, *Icones Plantarum Cryptogamicarum* 86, t. 24. 1834, *Tentamen Pteridographiae* 234. 1836, *Flora of the British West Indian Islands* 676. 1864, *Historia Filicum* 140. 1875

(Added to *ayahuasca* beverage.)

in Peru: dsuii-tetseperi, shoka

Lomatia R. Br. Proteaceae

Greek *loma*, *lomatos* ‘a fringe, border, edge’, referring to the winged edges of the seeds, a papery wing surrounds the seed; see *Characteres Generum Plantarum* 8. 1775, *On Cultivation Proteaeae* 121. 1809, *Transactions of the Linnean Society of London. Botany*. 10: 199, 201. 1810 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(2/2): 367–375. 1937, *Gayana, Bot.* 42: 1–157. 1985, *Fl. Ecuador* 69: 3–48. 2002.

Lomatia dentata R. Br. (*Embothrium dentatum* Ruiz & Pav.; *Embothrium pinol* Dombey ex Meisn.; *Embothrium sylvaticum* Poepp. ex Meisn.)

South America.

See *Flora Peruviana* 1: 62. 1798, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 449. 1856

(Used for treatment of cough, bronchial troubles and asthma.)

Lomatia hirsuta (Lam.) Diels (*Embothrium alnifolium* Poepp. ex Meisn.; *Embothrium hirsutum* Lam.; *Embothrium obliquum* Ruiz & Pav.; *Lomatia hirsuta* subsp. *obliqua* (Ruiz & Pav.) R.T. Penn.; *Lomatia obliqua* (Ruiz & Pav.) R. Br.; *Lomatia obliqua* var. *alnifolia* Meisn.; *Lomatia obliqua* var. *subintegriifolia* Meisn.; *Tricondylus obliqua* (Ruiz & Pav.) Kuntze)

Chile.

See *Encyclopédie Méthodique, Botanique* 2: 355. 1786, *Flora* 1: 63, t. 97. 1798, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 450. 1856, *Revisio Generum Plantarum* 2:

582. 1891 and *Journal of Ethnopharmacology* 57(2): 81–83. 1997, *BMC Complement. Altern. Med.* 6: 29. 2006

(Leaves antifungal, antimicrobial, antiinflammatory, infusion used for treatment of cough, bronchial troubles and asthma.)

in Chile: radal

Lomatium Raf. Apiaceae (Umbelliferae)

From *lomation*, the diminutive of the Greek *loma*, *lomatos* ‘a fringe, border, edge’, referring to the winged fruit; see C.S. Rafinesque, *Jour. Phys. Chim. Hist. Nat.* 89: 101. 1819.

Lomatium ambiguum (Nutt.) J.M. Coult. & Rose (*Cogswellia ambigua* (Nutt.) M.E. Jones; *Eulophus ambiguus* Nutt.; *Peucedanum ambiguum* (Nutt.) Nutt. ex Torr. & A. Gray)

North America. Perennial, roots eaten

See *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 27. 1834, *A Flora of North America: containing ...* 1(4): 626. 1840 and *Contributions from the United States National Herbarium* 7(1): 212. 1900, *Contributions to Western Botany* 12: 33. 1908

(Flowers and leaves infusion taken for colds and sore throats.)

in English: cous root, Wyeth biscuitroot

Lomatium californicum (Nutt.) Mathias & Constance (*Ferula californica* (Nutt.) A. Gray; *Leptotaenia californica* Nutt.)

North America. Perennial, young leaves eaten raw

See *A Flora of North America: containing ...* 1(4): 630. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 348. 1868 and *Bulletin of the Torrey Botanical Club* 69(3): 246. 1942

(Roots emetic, analgesic, stomachic, antirheumatic, dried roots decoction drunk for colds, chewed for sore throat. Ceremonial, sacred plant, good luck charm, protection from sickness and rattlesnakes.)

in English: California lomatium

Lomatium cous (S. Watson) J.M. Coult. & Rose (*Cogswellia cous* (S. Watson) M.E. Jones; *Lomatium circumdatum* (S. Watson) J.M. Coult. & Rose; *Lomatium montanum* J.M. Coult. & Rose; *Peucedanum cous* S. Watson)

North America. Perennial, roots eaten

See *Proceedings of the American Academy of Arts and Sciences* 21: 453. 1886 and *Contributions from the United States National Herbarium* 7(1): 214. 1900, *Contributions to Western Botany* 12: 33. 1908

(Roots stomachic, tonic, astringent.)

in English: biscuit-root, cous biscuit-root

Lomatium dissectum (Nutt.) Mathias & Constance (*Ferula dissecta* (Nutt.) A. Gray; *Leptotaenia dissecta* Nutt.; *Lomatium dissectum* (Nutt.) Mathias & Constance var. *dissectum*)

North America. Perennial herb, roots eaten

See *A Flora of North America: containing ...* 1(4): 630. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 348. 1868 and *Bulletin of the Torrey Botanical Club* 69(3): 246. 1942

(Purple shoots, tops and roots considered poisonous. Decoction of plant rubbed on the joints for rheumatism. Root oil used for open cuts, headaches, colds, sores, boils or bruises, sore eyes and sore backs, an infusion drunk for tuberculosis, arthritis. Blood purifier. Veterinary medicine, plant tops rubbed on cattle to kill lice.)

in English: cough root, fernleaf biscuitroot

Lomatium dissectum (Nutt.) Mathias & Constance var. *dissectum* (*Leptotaenia dissecta* Nutt.)

North America. Perennial herb, roots eaten

See *A Flora of North America: containing ...* 1(4): 630. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 348. 1868 and *Bulletin of the Torrey Botanical Club* 69(3): 246. 1942

(Purple shoots, tops and roots considered poisonous. Veterinary medicine, plant tops rubbed on cattle to kill lice.)

in English: cough root, fernleaf biscuitroot

Lomatium dissectum (Nutt.) Mathias & Constance var. *multifidum* (Nutt.) Mathias & Constance (*Ferula multifida* (Nutt.) A. Gray; *Leptotaenia dissecta* var. *multifida* (Nutt.) Jeps.; *Leptotaenia multifida* Nutt.; *Lomatium dissectum* (Nutt.) Mathias & Constance var. *eatonii* (J.M. Coult. & Rose) Cronquist)

North America. Perennial herb, roots eaten

See *A Flora of North America: containing ...* 1(4): 630. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 348. 1868 and *Madroño* 1(8): 145. 1923, *Bulletin of the Torrey Botanical Club* 69(3): 246. 1942

(Plant considered poisonous. Stimulant, analgesic, tonic, stomachic. Poultice of roots applied to wounds, rashes, sores, smallpox, cuts or bruises, infected compound fractures; roots decoction taken for colds, influenza, asthma, coughs, fever; an infusion for coughs, open wounds, cuts. Ceremonial, ritual.)

in English: carrotleaf biscuitroot

Lomatium foeniculaceum (Nutt.) J.M. Coult. & Rose subsp. *daucifolium* (Torr. & A. Gray) W.L. Theob. (*Cogswellia daucifolia* (Torr. & A. Gray) M.E. Jones; *Lomatium daucifolium* (Torr. & A. Gray) J.M. Coult. & Rose; *Lomatium foeniculaceum* var. *daucifolium* (Torr. & A. Gray) Cronquist; *Peucedanum foeniculaceum* var. *daucifolium* Torr. & A. Gray)

North America. Perennial, roots eaten

See *A Flora of North America: containing ...* 1(4): 627. 1840 and *Contributions from the United States National Herbarium* 7(1): 221. 1900, *Contributions to Western Botany* 12: 34. 1908, *Vascular Plants of the Pacific Northwest* 3: 552. 1961, *Brittonia* 18(1): 13. 1966

(Love charm.)

in English: desert biscuitroot

Lomatium graveolens (S. Watson) Dorn & R.L. Hartm. (*Lomatium graveolens* (S. Watson) Dorn & R.L. Hartm. var. *graveolens*; *Lomatium kingii* (S. Watson) Cronquist; *Peucedanum graveolens* S. Watson; *Peucedanum kingii* S. Watson)

North America. Perennial

See *United States Geological Exploration of the Fortieth Parallel. Botany* 128–129. 1871 and *Madroño* 35(1): 71. 1988

(Plant or roots decoction for colds, biliousness, sore throats.)

in English: king desertparsley

Lomatium hallii (S. Watson) J.M. Coult. & Rose (*Cogswellia hallii* (S. Watson) M.E. Jones; *Cogswellia macrocarpa* (Hook. & Arn.) M.E. Jones; *Ferula macrocarpa* Hook. & Arn.; *Lomatium macrocarpum* (Hook. & Arn.) J.M. Coult. & Rose; *Lomatium macrocarpum* (Nutt. ex Torr. & A. Gray) J.M. Coult. & Rose var. *artemisiarum* Piper; *Lomatium macrocarpum* (Nutt. ex Torr. & A. Gray) J.M. Coult. & Rose var. *ellipticum* (Torr. & A. Gray) Jeps.; *Lomatium nelsonianum* J.F. Macbr.; *Peucedanum hallii* S. Watson; *Peucedanum macrocarpum* Nutt. ex Torr. & A. Gray)

North America. Perennial, roots eaten

See *The Botany of Captain Beechey's Voyage* 348. 1839, *Proceedings of the American Academy of Arts and Sciences* 11: 141–143. 1876 and *Contributions from the United States National Herbarium* 7(1): 217, 224. 1900, *Contributions to Western Botany* 12: 33, 35. 1908, *Contributions from the Gray Herbarium of Harvard University* 53: 15–16. 1918, *Syesis* 10: 125–138. 1977

(Antirheumatic, sedative, infusion of roots taken for weakness. Young fresh roots bitter. Root eaten by childless women for infertility.)

in English: bigseed biscuitroot, desert parsley

Lomatium nudicaule (Pursh) J.M. Coult. & Rose (*Cogswellia nudicaulis* (Pursh) M.E. Jones; *Ferula nudicaulis* (Pursh) Nutt.; *Pastinaca nudicaulis* (Pursh) Spreng.; *Peucedanum nudicaule* (Pursh) Nutt. ex Torr. & A. Gray; *Smyrniium nudicaule* Pursh)

North America. Perennial, roots eaten

See *Flora Americae Septentrionalis*; or, ... 1: 196. 1814[1813], *The Genera of North American Plants* 1: 183. 1818, *Systema Vegetabilium* 6: 587. 1820, *A Flora of North America: containing ...* 1(4): 627. 1840 and *Contributions from the United*

States National Herbarium 7(1): 238. 1900, *Contributions to Western Botany* 12: 31. 1908

(Seeds chewed for colds, coughs, headaches, sore throats, pains or itching, constipation; seeds infusion taken by pregnant women to ensure an easy delivery. Magico-religious beliefs, ritual, ceremonial, seeds used by hunters for protection, also burned against evil spirits, ghosts and illness.)

in English: barestem biscuitroot, pestle parsnip

Lomatium nuttallii (A. Gray) J.F. Macbr. (*Aletes megarrhiza* (A. Nelson) W.A. Weber; *Aletes nuttallii* (A. Gray) W.A. Weber; *Cogswellia nuttallii* (A. Gray) M.E. Jones; *Cynomarathrum nuttallii* (A. Gray) J.M. Coult. & Rose; *Lomatium megarrhizum* (A. Nelson) Mathias; *Neoparrya megarrhiza* (A. Nelson) W.A. Weber; *Peucedanum megarrhizum* A. Nelson; *Seseli nuttallii* A. Gray)

North America. Perennial herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 287–288. 1870 and *Contributions from the United States National Herbarium* 7(1): 245. 1900, *Contributions to Western Botany* 12: 32. 1908, *Contributions from the Gray Herbarium of Harvard University* 56: 35. 1918

(Plant considered poisonous.)

in English: Nuttall's biscuitroot

Lomatium orientale J.M. Coult. & Rose (*Cogswellia orientalis* (J.M. Coult. & Rose) M.E. Jones; *Peucedanum orientale* (J.M. Coult. & Rose) Blank.)

North America. Perennial herb, roots eaten

See *Contributions from the United States National Herbarium* 7(1): 220. 1900, *Science studies, Montana College of Agriculture and Mechanical Arts, Botany* 1(2): 93. 1905, *Contributions to Western Botany* 12: 33. 1908

(Roots and leaves analgesic, astringent, antidiarrheal.)

in English: Northern Idaho biscuitroot

Lomatium triternatum (Pursh) J.M. Coult. & Rose (*Cogswellia triternata* (Pursh) M.E. Jones; *Eulophus triternatus* (Pursh) Nutt.; *Peucedanum triternatum* (Pursh) Nutt. ex Torr. & A. Gray; *Seseli triternatum* Pursh)

North America. Perennial herb, roots eaten

See *Flora Americae Septentrionalis*; or, ... 1: 197. 1814[1813], *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 27–28. 1834, *A Flora of North America*: containing ... 1(4): 626. 1840 and *Contributions from the United States National Herbarium* 7(1): 227. 1900, *Contributions to Western Botany* 12: 32. 1908

(Infusion of roots and leaves taken for chest troubles, colds, sore throats. Magic, ritual, contact therapy.)

in English: buck-parnsnip, nineleaf biscuitroot

Lomatium utriculatum (Nutt. ex Torr. & A. Gray) J.M. Coult. & Rose (*Cogswellia utriculata* (Nutt. ex Torr. & A. Gray) M.E. Jones; *Lomatium vaseyi* (J.M. Coult. & Rose) J.M. Coult. & Rose; *Peucedanum utriculatum* Nutt. ex Torr. & A. Gray)

North America. Perennial herb, roots eaten

See *A Flora of North America*: containing ... 1(4): 628–629. 1840 and *Contributions from the United States National Herbarium* 7(1): 215. 1900, *Contributions to Western Botany* 12: 34. 1908

(Roots chewed for stomach disorders, headaches. Plant decoction as a wash for swollen limbs, broken limbs.)

in English: bladder-parnsnip, common lomatium, spring-gold

Lomatogonium A. Braun Gentianaceae

Greek *loma*, *lomatos* 'fringe, border' and *gonia* 'an angle', see *Flora* 13: 221. 1830.

Lomatogonium carinthiacum (Wulfen) Rchb. (*Lomatogonium carinthiacum* var. *cordifolium* (Franch.) Harry Sm.; *Lomatogonium cordifolium* (Franch.) H.W. Li; *Pleurogyne carinata* Edgew.; *Pleurogyne carinthiaca* (Wulfen) Griseb.; *Pleurogyne carinthiaca* var. *cordifolia* Franch.; *Swertia carinthiaca* Wulfen)

China, India, Caucasus. Annual, flowers rotate bluish

See *Miscellanea Austriaca ad Botanicam, Chem., et Historiam Naturalem Spectantia* 2: 53. 1781, *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 310–311. 1839[1838], *Bulletin de la Société Botanique de France* 46: 309. 1899 and *Symbolae Sinicae* 7(4): 982. 1936, *Acta Biologica Plateau Sinica* 1: 43. 1982, *Bull. Soc. Neuchateloise Sci. Nat.* 115: 47–52. 1992

(Used in cold, fever and as a blood purifier.)

in English: carynthian pleurogyne

in China: lei zhu hua

Lonchitis L. Dennstaedtiaceae

Greek *lonche* 'a lance, spear', *lonchites* 'spearman', referring to the divisions of the fronds; Dioscorides applied *lonchites* to a plant with spear-shaped seeds, a kind of *Serapias*, and to the holly-fern, *Aspidium*.

Lonchitis currorii (Hook.) Mett. ex Kuhn (*Blotiella currorii* (Hook.) A.F. Tryon; *Lonchitis currorii* (Hook.) Kuhn; *Lonchitis mannii* (Bak.) Alston; *Pteris currorii* Hook.; *Pteris mannii* Bak.)

Trop. Africa, Madagascar. Fern, tufted, terrestrial, rhizome vertical

See *Species Plantarum* 2: 1078. 1753, *Species Filicum* 2: 232 t. 140. 1858, *Botanik von Ost-Afrika* 3(3): 10. 1879 and *Contributions from the Gray Herbarium of Harvard University* 191: 99. 1962, *African Study Monographs* 25(1): 1–27. 2004

(Leaves, instillation in eyes.)

in Madagascar: tritriampangamena

Lonchitis occidentalis Baker (*Anisosorus occidentalis* (Baker) C. Chr.; *Anisosorus occidentalis* Kuhn; *Lonchitis currori* var. *barteri* Tardieu; *Lonchitis friesii* Brause)

Tropical Africa.

See *Species Plantarum* 2: 1078. 1753, *Synopsis Filicum* 128. 1867, *Festschrift zum 50 Jährigen Jubiläum der Königstädtischen Realschule zu Berlin* 347. 1882 and *Scientific Survey of Porto Rico and the Virgin Islands* 6(3): 429. 1926, *Dansk Botanisk Arkiv* 7: 138, t. 54, f. 10–11. 1932, *Études Camerounaises* 2: 93. 1949, *Flore de Madagascar et des Comores* 5(4): 65–112. 1958

(For skin diseases.)

Lonchocarpus Kunth Fabaceae (Millettieae)

After the Greek words *lonche* ‘a lance, spear’ and *karpos* ‘fruit’, the pod is linear-oblong and flat, see *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 6: 383–384. 1823, *Nova Genera et Species Plantarum* [H.B.K.] (folio ed.) 6: 300. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 259–260. 1825, *Journal of the Proceedings of the Linnean Society* 4(Suppl.): 85, 96. 1860, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 440. 1884, *Contributions from the United States National Herbarium* 1(4): 97–98. 1891 and *Botanical Gazette* 44(2): 110. 1907, *Anales del Instituto de Biología de la Universidad Nacional Autónoma de México, Botánica* 63(2): 148. 1992, *Revista Mex. Biodiversidad* 76(2): 126. 2005, *Acta Botánica Mexicana* 86: 41–42. 2009.

Lonchocarpus capassa Rolfe (*Capassa violacea* Klotsch; *Derris violacea* (Klotsch) Harms; *Derris violacea* Harms; *Lonchocarpus violaceus* Benth.; *Lonchocarpus violaceus* (Klotsch) Oliv.; *Lonchocarpus violaceus* Oliv.; *Lonchocarpus violaceus* Kunth) (the specific name is based on a vernacular name for the tree in Portuguese East Africa)

Malawi, Tanzania. Perennial non-climbing tree, hard wood and crooked branches, red sticky sap, 3–5-foliolate leaves, bunches of showy blue-pink blue-purple fragrant flowers, flat creamy membranous indehiscent pods, leaf and fruits eaten by cattle, abundant nectar attracts bees

See *J. Proc. Linn. Soc., Bot.* 4(Suppl.): 95. 1860, *Trans. Linn. Soc. London* 29(1): 63. 1872, *Matabele Land* ed. 2, 397. 1889 and *Bot. Jahrb. Syst.* 33(1): 174. 1902

(Toxins, roots and bark are said to be poisonous. Stem bark and leaves laxative, febrifuge, for skin diseases, convulsions

and fevers. Stem and root a treatment of impotency, bilharzia and hookworm. Roots boiled and drunk for stomach disorders, hookworms, coughs and fever. Magic, believed that this tree was used by witches for casting evil spells; leaves put into the luggage of travellers for protection during a journey. Fish poison and insecticide.)

in English: apple-leaf, elephant tree, lance-tree, panda tree, rain tree

in Malawi: chimbakasa, mbakasa, mpakasa, mulilira, nswanswa

in N. Rhodesia: chimpakasa, mutomatoma

in Southern Africa: appelblaar, appelblaarboom, iPanza, isi-Homohomo, isiHomuhomu, Kalahari appelblaar, mbhandu, mbhanndzu, mohata, mopanda, mopororo, mPandapanda, mufhanda, mukololo, muPanda, muWororo, olifantspoor, olifantsoor, raasboom, raasboom stamperhout, umbandu, umBhandu, umgogolo, umPanda, umPhanda, upanda

in Tanzania: ivale, katindili, muputuka

in Zambia: chimpakasa, chiya, muhulu, mukololo, mupanda

Lonchocarpus chrysophyllus Kleinhoonte

Guyana. Perennial climbing shrub, woody, flowers violaceous, calyx silky-hairy

See *Recueil des Travaux Botaniques Néerlandais* 30: 174. 1933, *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht* 52: 1–78. 1939, *Flore de la Guyane française* 2: 36–162. 1952

(Bark used to treat snakebites, scorpion stings and as a fish poison.)

in English: black hiari

in Guyana: wakuru-kuda

Lonchocarpus floribundus Benth. (*Derris floribunda* (Benth.) Ducke; *Derris nitidus* (Vogel) N.F. Mattos; *Lonchocarpus nitidulus* Benth.; *Lonchocarpus nitidus* (Vogel) Benth.; *Sphinctolobium nitidum* Vogel)

South America, Venezuela, Brazil. Perennial non-climbing tree, woody, low shrub, lianescent, flowers purple to reddish violet

See *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824, *Linnaea* 11: 419. 1837, *Annals of Natural History* 3: 432. 1839, *Journal of the Linnean Society, Botany* 4(Suppl.): 92, 98. 1860 and *Boletim Técnico do Instituto Agrônomo de Norte* 18: 197. 1949, *Loefgrenia* 93: 9. 1988

(Roots and leaves as fish poison.)

in South America: acuna, timbó, timbó-rana, timbó venenoso

Lonchocarpus heptaphyllus (Poir.) DC. (*Amerimnon latifolium* Willd.; *Dalbergia heptaphylla* Poir.; *Dalbergia latifolia* Roxb.; *Dalbergia pentaphylla* Poir.; *Derris latifolia* Prain; *Derris latifolia* (Roxb.) Ducke, nom. illeg.; *Lonchocarpus discolor* Huber; *Lonchocarpus*

latifolius (Willd.) Kunth; *Lonchocarpus latifolius* DC.; *Lonchocarpus pentaphyllus* (Poir.) Kunth; *Lonchocarpus pentaphyllus* (Poir.) Kunth ex DC.)

Venezuela, Mexico.

See *Plants of the Coast of Coromandel* 2: 7, pl. 113. 1798, *Species Plantarum*. Editio quarta 3(2): 909. 1802, *Encyclopédie Méthodique. Botanique ... Supplément* 2(2): 445–446. 1812, *Nova Genera et Species Plantarum* (quarto ed.) 6: 383. 1823[1824], *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 259–260. 1825, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 67(2): 288. 1898 and *Boletim do Museu Paraense de Historia Natural e Ethnographia* 3: 421. 1902, *Harvard Pap. Bot.* 7(2): 381–398. 2003

(Roots used as a fish poison.)

in Dominica: savonnèt

Lonchocarpus laxiflorus Guill. & Perr. (*Lonchocarpus philenoptera* Benth.; *Lonchocarpus sophiae* Kotschy & Peyr.; *Philenoptera kotschyana* Fenzl; *Philenoptera laxiflora* (Guill. & Perr.) Roberty; *Philenoptera schimperii* Hochst. ex A. Rich.)

Tropical Africa. Perennial non-climbing tree

See *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824, *Florae Senegambiae Tentamen* 1: 226. 1830–1833, *Tentamen Florae Abyssinicae ...* 1: 232. 1847 and *Bull. Inst. Franc. Afr. Noire*, Sér. A 16: 354. 1954, *Silvae Geneticae* 31: 117–122. 1982, *Journal of Ethnopharmacology* 105: 387–399. 2006, *African Journal of Ecology* 45 (Suppl.1): 76–83. 2007

(Leaves decoction for anemia; fresh leaves on ulcers; leaves insecticides, arachnicides. Roots infusion for backache, stomach troubles; roots maceration anthelmintic. Magic, ritual, superstitions. Veterinary medicine, the bark.)

in English: Senegal lilac

in Benin: babwi sahi, wutariwéssibou

in Burkina Faso: yiiga

in Central African Republic: turufu, wili kor

in Mali: sonioukou

in Nigeria: farin sansame, farin sansami, folahi, halshen-sa, nigbuma, otelle, shunin-biri, ukpakoka

in Senegal: bani golōmbi, banigolōbi, banigolōbi, banigolōmbi, dafinawi, dafinay, é nǐbèy, gi-mwdiegoromb, golombi, kadoda, kadodia, ranéranéhi, ranerane

in Togo: alaba, etoti, toti

in Uganda: olwedo, sigirio

Lonchocarpus martynii A.C. Sm.

South America, Brazil. Perennial climbing shrub, scandent

See *Amer. J. Bot.* 24(9): 577–578, f. 3. 1937, *Kew Bulletin* 8(2): 239–240. 1953

(Toxins. Stem and roots roasted, ground and mixed with oil and applied externally for the relief of pain. Root decoction to treat venereal diseases; bark decoction sedative. Bark as a fish poison.)

in English: white haiari

Lonchocarpus muehlbergianus Hassl. (*Derris muehlbergianus* (Hassl.) N.F. Mattos)

South America. Perennial non-climbing tree

See *Bulletin de l'Herbier Boissier*, sér. 2, 7: 164. 1907, *Darwiniana* 4 (2–3): 323–331. 1942, *Darwiniana* 6 (2): 127–178. 1943, *Loefgrenia* 93: 8. 1988

(Bark used as fish poison.)

Lonchocarpus negrensis Benth. (*Deguelia amazonica* Killip; *Deguelia negrensis* (Benth.) Taub.; *Derris amazonica* Killip; *Derris negrensis* Benth.)

South America. Perennial climbing shrub

See *Journal of the Proceedings of the Linnean Society* 4(Suppl.): 98–99, 107. 1860, *Botanisches Centralblatt* 47(13): 387. 1891 and *Journal of the Washington Academy of Sciences* 24(1): 48. 1934, *Journal of Ethnopharmacology* 69(2): 127–137. 2000

(*Derris amazonica* used as piscicide. Antimalarial.)

Lonchocarpus nelsii (Schinz) Heering & Grimme (*Dalbergia nelsii* Schinz; *Lonchocarpus nelsii* Schinz ex Heering & Grimme; *Lonchocarpus nelsii* Schinz ex Heering) (the specific name commemorates L. Nels, flourished 1885, a young plant collector in South West Africa, assistant to Dr. H. Goering)

Tropical Africa. Perennial non-climbing tree, purple panicles, small velvety pods

See *Untersuch. Weideverhalten. Deutsch-Sudwestafri.* 25. 1911

(For skin inflammations, wounds and diseases.)

in English: Kalahari apple-leaf, nlu tree

in Namibia: mpanda

in South Africa: appelblaar, mupanda

in S. Rhodesia: iBanda

Lonchocarpus sericeus (Poir.) Kunth ex DC. (*Derris sericea* (Poir.) Ducke; *Derris sericea* (Kunth) Ducke; *Lonchocarpus cruentus* Lundell; *Lonchocarpus domingensis* DC.; *Lonchocarpus domingensis* (Turpin ex Pers.) DC.; *Lonchocarpus formosanus* DC.; *Lonchocarpus formosianus* DC.; *Lonchocarpus pyxidarius* DC.; *Lonchocarpus sericeus* (Poir.) Kunth; *Lonchocarpus sericeus* Kunth; *Lonchocarpus sericeus* (Poir.) DC.; *Robinia sericea* Poir.)

Central America, West Africa. Perennial non-climbing tree, small tree or shrub, lianescent, climbing, spreading crown, trunk branched close to ground, papery coriaceous leaves, whitish-purple fragrant flowers, wings and keel magenta, flattened indehiscent pods covered with golden-brown hairs

See *Species Plantarum* 2: 722–723. 1753, *Flora Cochinchinensis* 432. 1790, *Encyclopédie Méthodique, Botanique* 6(1): 226. 1804, *Syn. Pl.* 2(2): 276. 1807, *Nova Genera et Species Plantarum* [H.B.K.] (quarto ed.) 6: 383. 1823 [1824], *Nova Genera et Species Plantarum* (folio ed.) 6: 300. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 259–260. 1825 and *Contr. U.S. Natl. Herb.* 20(2): 37–93. 1917, *Wrightia* 1(1): 55–56. 1945, *Boletim Técnico do Instituto Agrônomo de Norte* 18: 195. 1949, *Fl. Novo-Galiciana* 5: 555–577. 1987, *Fl. Lesser Antilles* (Dicotyledoneae-Part 1) 4: 334538. 1988, *Journal of Cytology and Genetics* 25: 173–219. 1990

(Toxins. Stem bark and leaves laxative, anticonvulsant, stomachic, antiseptic, for gastrointestinal disorders, skin diseases, fevers and convulsions. A resin from the seeds and the fruit considered to be a violent poison. Insecticide, arachnidicides, stomachic and laxative. Bark for arthritis, rheumatism, leprosy, stomach troubles; leaves analgesic. Ritual, superstitions, magic. Fish poison.)

in English: cube root, Senegal lilac

in Gabon: venekouer

in Ghana: dukwa, kwadwo amanin, labladzi, santew, totoro

in Ivory Coast: akuisi-amba, ekopa, samokon

in Madagascar: harigna, harina, haringa

in Nigeria: apapo, babar-talaki, bahar, ekoli, faki, farin-sansami, farubawa, fendega, furen-ya-sariki, ipapo, nigbama, njassi, nko, obong, otelle, shunin-biri, talaki, tuburku, ukpakoka; farin sansami, shunin biri (Hausa); ipapo (Yoruba); njassi (Igbo)

in Senegal: ba pendé pèdé, bu pèndipindé, kanayu, mbembay, mbenbay, ñako, ñako, po de linguana, saon, seize

in Togo: lo

in Central America: guama, guama comun, palo amarillo

Lonchocarpus violaceus (Jacq.) DC. (*Lonchocarpus benthamianus* Pittier; *Lonchocarpus caribaeus* Urb.; *Lonchocarpus punctatus* Kunth; *Lonchocarpus violaceus* Benth.; *Lonchocarpus violaceus* (Jacq.) Kunth ex DC.; *Lonchocarpus violaceus* Kunth; *Lonchocarpus violaceus* Oliv.; *Lonchocarpus violaceus* var. *violaceus*; *Robinia violacea* Jacq.)

Caribbean, Venezuela. Perennial non-climbing small tree, erect dense spikes of pea-like violet fragrant flowers

See *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 28. 1760, *Nova Genera et Species Plantarum* (quarto ed.) 6: 383–384. 1823[1824], *Prodromus Systematis*

Naturalis Regni Vegetabilis 2: 259. 1825, *Zweiter und Dritter Nachtrag zu dem Verzeichniss der Pflanzenkulturen* 1: 131. 1828, *Journal of the Linnean Society, Botany* 4(Suppl.): 95. 1860, *Transactions of the Linnean Society of London* 29: 63. 1872 and *Contributions from the United States National Herbarium* 20(2): 86. 1917, *Repertorium Specierum Novarum Regni Vegetabilis* 17: 156. 1921, *J. Arnold Arbor.* 54(4): 435–470. 1973, *Lloydia* 40(2): 201–208. 1977

(Psychoactive, mystical, ritual, hallucinogenic, the shamanic liqueur *balché* is a blend of *Melipona* honey and water, to which the bark is added during the fermentation process, *balché* used ceremonially. Toxic to fishes, leaves contain poisons that are used to catch fish, they also serve as effective insecticides. Hypoglycemicly active stilbenoids.)

in English: balché tree, greenheart, lancepod, West Indian lilac

Lonicera L. Caprifoliaceae

After the German (b. Marburg) botanist Adam Lonitzer (Lonicerus, Lonicer), 1528–1586 (d. Frankfurt), physician, naturalist, herbalist, 1554 received M.D. from Marburg, professor of medicine and mathematics at Marburg, author of *Naturalis historiae opus novum*. Francofurti 1551 [-1555]. See Carl Linnaeus, *Species Plantarum*. 1: 173–175. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Genera Plantarum*. Ed. 5. 80. 1754, *Le Botaniste Cultivateur, ... édition seconde* 4: 336. 1811, *Anleitung zum Gründlichen Studien der Botanik* 272, 296. 1818 and Garrison and Morton, *Medical Bibliography*. 6143. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 400. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 242. 1972, *Fieldiana, Bot.* 24(11/4): 275–296. 1976, Karin Figala, in *D.S.B.* 8: 483–484. 1981, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 585–586. 2001, *Fl. Veracruz* 126: 1–16. 2002.

Lonicera arizonica Rehder

North America. Perennial vine, shrub

See *Trees and Shrubs* [Sargent] 1(1): 45, pl. 23. 1902, *Amer. Midl. Naturalist* 3: 191. 1914

(Ceremonial, emetic.)

in English: Arizona honeysuckle

Lonicera canadensis Bartr. ex Marsh. (*Lonicera canadensis* Bartram; *Lonicera canadensis* L.; *Xylosteon ciliatum* Pursh)

North America. Perennial shrub

See Marshall, Humphry (1722–1801), *Arbustrum Americanum* 81. Philadelphia: Joseph Crukshank, 1785 and *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 25: 9–10. 1995

(Sedative, diuretic, blood purifier, for gonorrhoea, sores, urinary diseases, hysteria.)

in English: American fly honeysuckle, fly honeysuckle

Lonicera ciliosa (Pursh) Poir. ex DC. (*Lonicera ciliosa* (Pursh) Poiret)

North America. Perennial shrub, vine

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 333. 1830

(Contraceptive, sedative, tonic, stimulant, anticonvulsive, for tuberculosis, colds, sore throats, coughs, womb trouble, epilepsy.)

in English: orange honeysuckle

Lonicera dioica L. (*Lonicera dioica* f. *dasygyna* Deam; *Lonicera dioica* L.f. *dasygyna* (Rehder) Deam; *Lonicera dioica* L. subsp. *glaucescens* (Rydb.) Á. Löve & D. Löve; *Lonicera dioica* L. subvar. *dasygyna* Farw.; *Lonicera dioica* L. subvar. *dasygyna* (Rehder) Farw.; *Lonicera dioica* var. *dasygyna* (Rehder) Gleason; *Lonicera dioica* var. *glaucescens* (Rydb.) Butters; *Lonicera dioica* var. *orientalis* Gleason; *Lonicera glaucescens* (Rydb.) Rydb.; *Lonicera glaucescens* var. *dasygyna* Rehder)

North America. Perennial vine

See *Species Plantarum* 1: 173–175. 1753, *Systema Vegetabilium*, ed. 12 2: 165. 1767 and *Amer. Midl. Naturalist* 11: 267. 1929, *Shrubs Indiana* (Ed. 2) 324. 1932, *Phytologia* 4: 24. 1952, *Taxon* 31(2): 355. 1982

(Plant decoction febrifuge. Anthelmintic, infusion of berry and root bark taken by pregnant women for worms. Infusion of stems taken as a diuretic, febrifuge; a decoction taken as emetic, for venereal disease and for blood clotting after childbirth. Infusion of bark used as a cathartic, diuretic, for kidney stones, for menstrual difficulties. Compound decoction of roots taken for gonorrhoea, tuberculosis. Ceremonial, emetic.)

in English: limber honeysuckle

Lonicera hypoleuca Decne.

India, Nepal. Ascending many-branched, bilabiate creamy white flowers then turning yellow

See *Voyage dans l'Inde* 4: 81, t. 89. 1844

(Plant paste to treat kidney trouble; leaves paste as an ointment for headache.)

in India: badru

in Nepal: phangma

Lonicera interrupta Benth. (*Caprifolium interruptum* (Benth.) Greene; *Lonicera hispidula* var. *interrupta* (Benth.) A. Gray)

North America. Perennial shrub, vine

See Bentham, George (1800–1884), *Plantas Hartwegianas imprimis Mexicanas* 313–314. Londini: Gulielmus Pamplin,

1839–[1857], *Proceedings of the American Academy of Arts and Sciences* 8: 628. 1873, *Flora Franciscana* 3: 347. 1892

(Antirheumatic, for swellings, sores, sore eyes.)

in English: chaparral honeysuckle

Lonicera involucrata (Richardson) Banks ex Spreng. (*Caprifolium involucratum* (Richardson) Kuntze; *Distegia involucrata* (Richardson) Cockerell; *Distegia involucrata* (Richardson) Rydb.; *Lonicera involucrata* Banks ex Spreng.; *Lonicera involucrata* (Richardson) Spreng.; *Lonicera involucrata* (Richardson) Banks ex Spreng. var. *flavescens* (Dippel) Rehder; *Xylosteon involucratum* Richardson)

North America. Perennial shrub

See *Narrative of a Journey to the Shores of the Polar Sea* 733. 1823, *Systema Vegetabilium*, editio decima sexta 1: 759. 1825, *Revisio Generum Plantarum* 1: 274. 1891 and *University of Colorado Studies* 3: 50. 1905, *Bulletin of the Torrey Botanical Club* 33(3): 152. 1906, *Naturaliste Canad.* 108: 143–152. 1981

(Fruit considered poisonous, eaten to expel worms, or to act as a powerful laxative. Expectorant, disinfectant, sedative, analgesic, antirheumatic, emetic, cathartic, stimulant, stomachic, postpartum remedy, antidote, for cough, colds, wounds, itch, burns, boils, rashes, sore eyes, sore mouth, sore throat, open sores, gonorrhoea and gonorrhoeal sores, bladder trouble, stomach troubles, swellings, arthritis and rheumatism, paralysis, nervous breakdowns, weakness. Ceremonial, love charm, emetic, ritual, spiritual.)

in English: bearberry, twinberry, twinberry honeysuckle

Lonicera involucrata (Richardson) Banks ex Spreng. var. *involucrata* (*Distegia involucrata* (Richardson) Cockerell; *Lonicera involucrata* (Richardson) Banks ex Spreng. var. *flavescens* (Dippel) Rehder; *Xylosteum involucratum* Richardson)

North America. Perennial shrub

See *Narrative of a Journey to the Shores of the Polar Sea* 733. 1823, *Systema Vegetabilium*, editio decima sexta 1: 759. 1825, *Revisio Generum Plantarum* 1: 274. 1891 and *University of Colorado Studies* 3: 50. 1905, *Bulletin of the Torrey Botanical Club* 33(3): 152. 1906, *Naturaliste Canad.* 108: 143–152. 1981

(Fruit considered poisonous, eaten to expel worms, or to act as a powerful laxative, cathartic.)

in English: bearberry, twinberry, twinberry honeysuckle

Lonicera japonica Thunb. ex Murray (*Caprifolium japonicum* (Thunb.) Dum. Cours.; *Lonicera japonica* Thunb., nom. illeg., non *Lonicera japonica* Thunb. ex Murray; *Nintooa japonica* (Thunb.) Sweet)

Japan, China, Korea. Shrub, perennial woody vine, twining, creeping, climbing, slender young branches hairy, leaves opposite, 2-flowered cyme in the axils of the terminal leaves, flowers sweetly scented, bracts leaf-like, white

corolla bilabiate fading to yellow, style slender, fruit a shiny black fleshy berry, nectar can be sucked from flowers without harm

See *Species Plantarum* 1: 173–175. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Systema Vegetabilium*. Editio decima quarta 216. 1784, *Le Botaniste Cultivateur*, ... édition seconde 7: 209. 1814, *Hortus Britannicus* 258. 1830 and *Journal of Cytology and Genetics* 3: 60–65. 1968, *Taxon* 28: 277–278. 1979, *Journal of Tree Sciences* 1: 27–34. 1982, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995

(Berries poisonous, toxic only if large quantities eaten. Floral buds antipyretic, antiviral, used for influenza, cervical erosion, conjunctivitis, enteritis, pyodermas, wound infections.)

in English: gold and silver flower, honeysuckle, Japanese honeysuckle, woodbine

in Bolivia: madre selva

in China: chin yin teng, jen tung, jin yin hua, ren dong teng

in Japan: nindô, sui-kazura

in Vietnam: kim ngan, nhan dong

in Hawaii: honekakala

Lonicera macrantha (D. Don) Spreng. (*Caprifolium macranthum* D. Don; *Caprifolium macranthum* Kuntze; *Lonicera macrantha* (D. Don) DC.; *Lonicera macrantha* Spreng.)

India.

See *Prodromus Florae Nepalensis* 140. 1825, *Systema Vegetabilium*, editio decima sexta [Sprengel] 4(2, Cur. Post.): 82. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 333. 1830, *Revis. Gen. Pl.* 1: 274. 1891

(Leaves decoction taken for dysentery, diarrhea and stomachache.)

in India: leihruisen

Lonicera oblongifolia Hook. (*Lonicera altissima* Jenn.; *Lonicera oblongifolia* (Goldie) Hook.; *Lonicera oblongifolia* var. *altissima* Rehder; *Lonicera oblongifolia* var. *altissima* (Jennings) Rehder)

North America. Perennial shrub

See *Flora Boreali-Americana* (Hooker) 1(6): 284, pl. 100. 1833 and *Annals of the Carnegie Museum* 4: 74, pl. 20. 1906, *Illustriertes Handbuch der Laubholzkunde* [C.K. Schneider] 2: 706. 1911

(Analgesic, sedative, for lung trouble, infected sores, diarrhea.)

in English: swamp fly honeysuckle

Lonicera periclymenum L.

Cosmopolitan

See *Species Plantarum* 1: 173–175. 1753 and *Taxon* 28: 277–278. 1979, *Taxon* 29: 713–714, 725–726. 1980, *Acta Biologica Cracoviensia, Series Botanica* 24: 159–189. 1982, *Watsonia* 20: 63–66. 1994, *Watsonia* 21: 365–368. 1997, *Opera Botanica* 137: 1–42. 1999

(This species may be poisonous.)

in English: honeysuckle, woodbine

Lonicera quinquelocularis Hard.

India.

See *Taxon* 29: 353–355. 1980, *J. Tree Sci.* 1: 27–34. 1982, *J. Cytol. Genet.* 23: 219–228. 1988

(Leave laxative. Veterinary medicine, leaves laxative given to animals.)

in India: bokru, pakhur, pakur, tata bateri

Lonicera semenovii Regel (*Caprifolium semenovii* (Regel) Kuntze; *Caprifolium thomsonii* Kuntze; *Lonicera glauca* Hook.f. & Thomson)

India, China, Himalaya.

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Journal of the Linnean Society, Botany* 2: 166. 1858, *Revisio Generum Plantarum* 1: 274. 1891

(Leaves and flowers used for venereal diseases. Veterinary medicine, seeds given to horses with colic.)

in China: zang xi reng dong

in India: shea, sheva

Lonicera spinosa (Decne.) Jacq. ex Walp. (*Caprifolium spinosum* (Decne.) Kuntze; *Caprifolium spinosum* Kuntze; *Lonicera spinosa* (Jacquem. ex Decne.) Walp.; *Lonicera spinosa* Jacquem. ex Decne., nom. inval.; *Xylosteon spinosum* Decne.)

China, Himalaya.

See *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *Voyage dans l'Inde* [Jacquemont] 4: 78, t. 86. 1841 [1835–1844], *Repertorium Botanicae Systematicae* (Walpers) 2(3): 449. 1843, *Revisio Generum Plantarum* 1: 274. 1891

(Flower decoction used in asthma and headache, hysteria.)

in India: lamora

Lonicera subspicata Hook. & Arn. var. *johnstonii* D.D. Keck (*Lonicera denudata* Davidson & Moxley var. *johnstonii* (D.D. Keck) Hoover; *Lonicera johnstonii* (D.D. Keck) McMinn)

North America. Perennial vine, shrub

See *The Botany of Captain Beechey's Voyage* 349. 1839, *Flora Franciscana* 3: 348. 1892 and *Bulletin of the Southern California Academy of Sciences* 25: 67. 1926, *The Vascular Plants of San Luis Obispo County, California* 269. 1970

(Veterinary medicine, plant decoction to wash sores and wounds on horses.)

in English: Johnston's honeysuckle

Lonicera tatarica L. (*Caprifolium tataricum* (L.) Kuntze; *Xylosteon tataricum* (L.) Michx.)

North America.

See *Species Plantarum* 1: 173–175. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Flora Boreali-Americana* 1: 106. 1803, *Revisio Generum Plantarum* 1: 274. 1891 and *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 476–479. 1991, *Botanica Acta* 106: 183–191. 1993

(This plant has been implicated in the poisoning of children, ingesting the berries has caused mild toxicity in children.)

in English: Tartarian honeysuckle

Lonicera utahensis S. Watson

North America. Perennial shrub, berries eaten

See *United States Geological Exploration of the Fortieth Parallel. Botany* 133. 1871

(Blood purifier, antiseptic, disinfectant, mild laxative, to wash sores and infections. Good luck charm.)

in English: Utah honeysuckle

Lonicera villosa (Michx.) Roem. & Schult. (*Lonicera caerulea* L. subsp. *villosa* (Michx.) Á. Löve & D. Löve; *Xylosteon villosum* Michx.)

Eurasia.

See *Species Plantarum* 1: 174. 1753, *Flora Boreali-Americana* 1: 106. 1803, *Systema Vegetabilium* 5: 256. 1819 and *Taxon* 31(2): 355. 1982, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(9): 1–11. 1992

(Said to be toxic.)

Lonicera webbia Wall. ex DC. (*Lonicera alpigena* var. *webbiana* (Wall. ex DC.) G. Nicholson)

China, Himalaya.

See *Numer. List* [Wallich] n. 476. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 336. 1830

(Leaves and flowers to treat venereal diseases.)

in India: phulor

Lonicera xylosteum L. (*Lonicera dumetorum* Lam.; *Lonicera dumetorum* Pers.; *Lonicera ochroleuca* St.-Lager; *Lonicera pubescens* Stokes; *Lonicera pubescens* Sweet; *Lonicera pyrenaica* Kit.; *Lonicera pyrenaica* L.; *Lonicera rubra* Gilib.; *Lonicera vulgaris* Borkh.; *Lonicera xylosteum* Lour.; *Lonicera xylosteum* Georgi; *Lonicera xylosteum* Sibth. & Sm.)

Europe. Shrub

See *Species Plantarum* 1: 173–175. 1753, *Bemerk. Reise Russ. Reich* 1: 201. 1775, Gilibert, Jean Emmanuel (1741–1814), *Caroli Linnæi ... Systema plantarum Europae. Coloniae-Allobrogum: sumptibus Piestre & Delamolliere, 1785–1787* [t. I. Nomenclator linnæanus. Flora lithuanica inchoata; seu, Enumeratio plantarum quas circa Grodnam collegit & determinavit J.-E. Gilibert. Chloris Lugdunensis [M.A.L.C. de Latourrette] Flora delphinalis, sive; Elenchus generum et specierum ... editum opera & studio D. Villar.], *Fl. Cochinch.* 1: 150. 1790, *Syn. Pl.* (Persoon) 1: 213. 1805, *Hort. Brit.* [Sweet] 195. 1826, *Ann. Soc. Bot. Lyon* vii. (1880) 129. 1880 and *Taxon* 28: 277–278. 1979, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Biologie-Ecologie Méditerranéenne* 10: 273–289. 1987, *Botaničeskij Žurnal* (Moscow & Leningrad) 76: 476–479. 1991

(Implicated in cases of poisoning, ingesting a large number of berries (ca. 30) may cause abdominal pain and vomiting in children.)

in English: European fly honeysuckle, fly honeysuckle

Lophatherum Brongn. Poaceae (Gramineae)

From the Greek *lophos* 'a crest' and *ather* 'stalk, barb, spine,' the awns are crested, referring to sterile lemmas, see *Voy. Coquille, Bot. Phanérogamie [Voyage autour du Monde]* 49–50, t. 8. 1831[1829], *Flora* 29: 20. 1846, *Synopsis Plantarum Glumacearum* 1: 117, 300, 428. 1854 and *Bulletin of the Nanjing Botanical Garden, Mem. Sun Yat Sen* 1988–1989: 14–20. 1988–1989, *Investigatio et Studium Naturae* 12: 48–65. 1992, *Clinical & Experimental Allergy* 28(3): 306–314. Mar 1998, Adrian Y.P. Fung et al., "A controlled trial of traditional Chinese herbal medicine in Chinese patients with recalcitrant atopic dermatitis." *International Journal of Dermatology* 38(5): 387–392. May 1999, N.C. Armstrong and E. Ernst, "The treatment of eczema with Chinese herbs: A systematic review of randomized clinical trials." *British Journal of Clinical Pharmacology* 48(2): 262–264. in West Africa: azobé, bongossi, ekki, eba

in Yoruba: eela, eki, eki agbarajo, ipahon

Lophira lanceolata Tiegh. ex Keay (*Lophira spathulata* Tiegh., p.p.)

Tropical Africa. Tree, straight, inflorescence a terminal pyramidal lax panicle, white flowers sweetly fragrant, seeds eaten, foliage grazed by cattle, edible caterpillars are grown on the tree, sometimes confused with *Vitellaria paradoxa*

See *Journal of Botany, British and Foreign* 15: 186–188. 1901, *Kew Bulletin* 1953: 487. 1954, *Journal of Natural Products* 54(1): 142–145. 1994, *Journal of Natural Products* 61(6): 801–803. 1998, *Annals of Tropical Medicine and Parasitology* 100(3): 237–243. 2006, *Journal of Ethnopharmacology* 114: 44–53. 2007, *South African Journal of Botany* 74: 76–84. 2008

(Seed oil for skin diseases, dermatosis. Stems with leaves for syphilis and hypertension, chest pain. Leaves for malaria, fevers, headache, conjunctivitis, internal worms, tape worm, jaundice, skin eruption and diseases. Stem bark antiseptic, febrifuge, antibacterial, antiviral, for jaundice and liver disorders, gastro-intestinal problems, amenorrhea and female diseases, menstrual disorders, skin diseases, wound, eczema, itch. Bark and roots antiinflammatory, antiviral, for pulmonary diseases, venereal infections, fevers. Roots purgative, antiseptic, antibacterial, for ulcers, wounds, constipation. Veterinary medicine, decoction of leaves and barks against diarrhea; ground stem bark made into a paste with flour of *Pennisetum* given for intestinal worms. Ceremonial, ritual, the leaves and wood.)

in English: dwarf red ironwood, false shea, méni oil tree, red oak

in Benin: kinoussa, sem, sinagouradarou wawura

in Central African Republic: kaya, kobia, zàwà

in Guinea: malamga, mana, mene

in Mali: kurusi, lobyaghe, makan, malanga, mana, manaba, mananga, mene, muntun yere, panhan, shuongo, shwongo

in Nigeria: namijin kadai (Hausa); kochi kere (Nupe); karechi gori (Fula); apeh (Jukan); iponhon (Yoruba); uwegbe (Edo); ugbebri (Ishan); urogbe (Etsako); okopi, okopia (Igbo)

in Senegal: malaga, manisey, mano

in Togo: timati, tomate, yovokutsa

Lophopetalum Wight ex Arn. Celastraceae (Celastrineae, Lophopetalaceae)

Crested petals, from the Greek *lophos* ‘a crest, tuft’ and *petalon* ‘a petal’, referring to the appendages on the petals, see *Annals of Natural History* 3(16): 150–151. 1839 and *Nat. Pflanzenfam.* ed. 2. 20b: 160. 1942.

Lophopetalum beccarianum Pierre (*Lophopetalum beccarianum* Pierre & Ridl.)

Borneo. Tree

See *Fl. Forest. Cochinch.* Fasc. 20 (1894) sub t. 307 B. 1894 and *Bull. Misc. Inform. Kew* 1931, 38. 1931

(Cooked leaves eaten for loss of appetite.)

in Sarawak: engkrupok

Lophopetalum pallidum M.A. Lawson

Malacca.

See *Fl. Brit. India* [J.D. Hooker] 1: 615. 1875

(Arrow or dart poison.)

Malayan names: krohi, kro

Lophopetalum toxicum Loher

Malaya.

See *Icon. Bogor.* [Boerlage] 1: t. 16. 1897 [Dec 1897]

(Sap of the bark used to poison arrows tips.)

in Philippines: abuab, alibambangan, bantigi, dayandang, dita, lalake, puti-i-babaye, tando

Lophophora J.M. Coulter Cactaceae

Greek *lophos* ‘a crest, tuft’ and *phoros* ‘bearing, carrying’, referring to the hairy areoles; see *Contributions from the United States National Herbarium* 3(2): 131–132. 1894 and Blas Pablo Reko, *Mitobotánica Zapoteca*. [Appended by an analysis of “Lienzo de Santiago Guevea”] Tacubaya 1945, R. Gordon Wasson, “Notes on the Present Status of Ololuhqui and the Other Hallucinogens of Mexico.” from *Botanical Museum Leaflets*—Harvard University. 20(6): 161–212. Nov. 22, 1963, *Manual of the Vascular Plants of Texas* i-xv, 1–1881. 1970. Nomenclature and taxonomy still confused.

Lophophora williamsii (Lemaire ex Salm-Dyck) J.M. Coulter (*Anhalonium lewinii* Hennings ex Lewin; *Anhalonium williamsii* (Lemaire ex Salm-Dyck) Lemaire; *Anhalonium williamsii* (Salm-Dyck) Rümpler; *Ariocarpus williamsii* (Salm-Dyck) Voss; *Echinocactus lewinii* Henn.; *Echinocactus williamsii* Lemaire ex Salm-Dyck; *Lophophora lewinii* (Hennings ex Lewin) C.H. Thomps.; *Lophophora williamsii* J.M. Coult.; *Lophophora williamsii* (Salm-Dyck) J.M. Coult.; *Mammillaria williamsii* (Lem.) J.M. Coult.; *Mammillaria williamsii* (Salm-Dyck) J.M. Coult.)

North America. Small grey-green, spineless cactus, chlorophyll-bearing crown, experienced peyoteros harvest only the top few millimeters of the stem, leaving the deeply recessed apical meristem, thus allowing regeneration; the plants live for many decades and grow very slowly

See *Verhandlungen des Vereins zur Beförderung des Gartenbaues in den Königlich Preussischen Staaten* 3: 420. 1827, *Cactearum Genera Nova Speciesque Novae* 1. 1839, *Allgemeine Gartenzeitung* (Otto & Dietrich) 13(49): 385–386.

1845, *Handbuch der Cacteenkunde* 233. 1885, *Gartenflora* 37: 410. 1888, *Contr. U.S. Natl. Herb.* 2: 129. 1891, *Contributions from the United States National Herbarium* 3(2): 131–132. 1894, *Monatsschrift für Kakteenkunde* 5: 94. 1895, *Annual Report of the Missouri Botanical Garden* 9: 133. 1898, *Bot. Jahrb. Syst.* 24: 567. 1898 and M.R. Gilmore, *Uses of Plants by the Indians ...* 52–54. 1991

(Ancient sacred hallucinogens, psychotomimetic, ceremonial ingestion, visual hallucinations, complex peyote-intoxication, long used for religious and medicinal purposes by native peoples, *Lophophora williamsii* is famous for its psychoactive alkaloids, primarily mescaline, which are concentrated in the small, photosynthetic, above-ground portion of the stem. Whole plant infusion or tincture analgesic, antirheumatic, tonic.)

in North America: divine cactus, the medicine, mescal buttons, peyote

in Mexico: peyote, peyotl

Lophopyxis Hook.f. Lophopyxidaceae (Celastraceae)

From the Greek *lophos* ‘a crest, tuft’ and *pyxis* ‘a small box’, see *Hooker’s Icon. Pl.* 18: t. 1714. 1887 [1887–1888 publ. Nov 1887], *Fl. Brit. India* [J.D. Hooker] 5: 476. 1888 and *Revista Sudamericana de Botánica* 10: 4. 1951.

Lophopyxis maingayi Hook.f.

New Guinea.

See *Icones Plantarum* 18: t. 1714. 1887

(Stem chewed and the juice swallowed to treat diarrhea and stomachache.)

in Papua New Guinea: n’dralang

Loranthus Jacq. Loranthaceae

From the Greek *loron*, *loros* ‘strap, thong’ and *anthos* ‘flower’, referring to the corolla segments; see *Species Plantarum* 1: 331. 1753, N.J. Jacquin, *Enumeratio stirpium plerarumque, quae sponte crescunt in agro vindobonensi, montibusque confinibus.* 55, 230, pl. 3. Vindobonae [Wien] 1762, *Flora Javae* 13, 15–16, 18. 1830, *Systema Vegetabilium* 7: 1611–1612, 1730–1731. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 287, 307. 1830, *Genera Plantarum* 802. 1839, Reichenbach, (Heinrich Gottlieb) Ludwig (1793–1879), *Der Deutsche Botaniker*: i-ii. Dresden, Leipzig, 1841–1842 [Bd. i: *Repertorium herbarii*, sive nomenclator generum plantarum ... das Herbarienbuch: i-ii—bd. ii: *Flora saxonica*: die Flora von Sachsen, ein botanisches Excursionsbuch ... 1842], *Flora van Nederlandsch Indië* 1(1): 810, 834. 1856, *Flora of the British West Indian Islands* 313. 1860, *Flora Brasiliensis* 5(2): 22, 87. 1868, *Genera Plantarum* 3: 208–209. 1880,

Bulletin de la Société Botanique de France 41: 504. 1894, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 82–83, 85, 92, 97, 100, 111. 1894, *Bulletin de la Société Botanique de France* 42: 164, 244, 253, 257, 260. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 303. 1901, *Flora of Tropical Africa* 6(1): 263, 267, 270. 1910, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51: 461. 1914, *Bulletin du Jardin Botanique de Buitenzorg*, ser. 3, 10: 292, 319. 1929, Polhill, Roger Marcus (1937–), *Mistletoes of Africa*. Kew: Royal Botanic Gardens, Kew, 1998.

Loranthus ferrugineus Roxb.

China, India.

See *Flora Indica*; or *Descriptions of Indian Plants* 2: 207. 1824

(Leaves a postpartum remedy. For snakebite, pound the leaves and the bark and poultice. For wounds, pound the stem and poultice.)

Malay name: dedalu api, mendalu, mendalu api merah, nullu api

Loranthus grandifrons King

Malaysia.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 56(1): 93. 1887

(For ringworm, pound the leaves with broken rice and turmeric and poultice.)

Malay name: dedalu api gajah

Loranthus longiflorus Desr. (*Dendrophthoe longiflorus* (Desr.) Tiegh.; *Loranthus longiflorus* Desv.; *Loranthus longiflorus* Mutis ex DC.)

Malaya, India. Flowers scarlet, slender curved corolla

See *Prodr.* (DC.) 4: 312. 1830, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 82, 92. 1894 and *Journal of Cytology and Genetics* 25: 308–320. 1990

(Bark astringent, narcotic, used for wounds and menstrual troubles, a remedy for consumption, asthma and hysteria, madness; a substitute for betel nut.)

in India: badanike bandhulu

Loranthus loniceroides L. (*Elytranthe loniceroides* (L.) G. Don; *Elytranthe parasitica* (L.) Danser; *Lonicera parasitica* L.; *Loranthus loniceroides* Burm. f., nom. illeg., non *Loranthus loniceroides* L.)

India.

See *Species Plantarum* 1: 175. 1753, *Species Plantarum*, Editio Secunda 1: 473. 1762, *Flora Indica* ... nec non

Prodromus Florae Capensis 84. 1768, *Systema Vegetabilium* 7: 1611, 1730. 1830, *A General History of the Dichlamydeous Plants* 3: 427. 1834 and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 10: 315. 1929, *Indian Journal of Botany* 5: 7–12. 1982, *Cytologia* 52: 761–766. 1987

(Astringent.)

Loranthus odoratus Wall.

Nepal.

See *Fl. Ind.*, ed. Carey & Wall. ii. 215. 1832

(Fruits eaten to treat indigestion.)

in Nepal: donglanai

Loricaria Wedd. Asteraceae

Latin *lorica*, *ae* ‘corslet, a leather cuirasse, a fence’, *loricarius*, *a*, *um* ‘pertaining to cuirasses’, see *Chloris Andina* 1(4): 165. 1855[1856].

Loricaria thuyoides (Lam.) Sch. Bip. var. ***thuyoides*** (*Baccharis thuyoides* Pers.; *Conyza thuyoides* Lam.; *Molina incana* Ruiz & Pav.)

South America.

See *Encyclopédie Méthodique*, *Botanique* 2: 90. 1786, *Systema Vegetabilium Florae Peruviana et Chilensis* 211. 1794, *Bonplandia* (Hanover) 8: 258. 1860 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 56: 169. 1954

(Resinous, balsamic, tonic, aromatic.)

Lotus L. Fabaceae (Loteae)

From the Greek *lotos*, applied to several and different plants, e.g., lotus, clover, fenugreek, Egyptian water-lily, date-plum, Italian persimmon, jujube; Hebrew *la'et* ‘tarrying, slowness’, *laha* ‘to be exhausted’, *la'at* ‘to give to eat, hide, cover’; Latin *lotos* and *lotus*, *i*; see Carl Linnaeus, *Species Plantarum*. 2: 773–776. 1753 and *Genera Plantarum*. Ed. 5. 338. 1754 and *Recent Res. Pl. Sci.* (New Delhi). 7: 252–260. 1979, *Opera Bot.* 52: 1–38. 1979, *Taxon* 28: 391–392, 398–400. 1979, *Taxon* 29: 538–542. 1980, *Taxon* 30: 829–842. 1981, *Mem. New York Bot. Gard.* 25(3): 1–264. 1981, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 685. Zanichelli, Bologna 1983, *Inform. Bot. Ital.* 22: 216–226. 1990, *Watsonia* 19: 134–137. 1992, *Watsonia* 20: 63–66. 1994, Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Greca. 2(1): 170–171. Firenze 1994, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 24: 15–19. 1995, *Watsonia* 21: 365–368. 1997, *Linzer Biol. Beitr.* 29(1): 5–43. 1997.

Lotus arabicus L. (*Lotus arabicus* Bourg. ex Coss.; *Lotus arabicus* Sol.)

Tropical Africa, India.

See *Mantissa Plantarum* 1: 104–105. 1767, Russell, Alexander (1715?–1768), *The Natural History of Aleppo* pl. 14. London, 1794, *Bulletin de la Société Botanique de France* 27: 71. 1880 and *Bull. Bot. Surv. India* 24: 209–211. 1928

(Poisonous in the immature state.)

Lotus corniculatus L. (*Lotus ambiguus* Spreng.; *Lotus arvensis* Pers.; *Lotus balticus* Miniaev; *Lotus carpetanus* Lacaita; *Lotus caucasicus* Kuprian.; *Lotus caucasicus* Kuprian. ex Juz.; *Lotus ciliatus* sensu Schur; *Lotus corniculatus* L. subsp. *major* (Scop.) Gams; *Lotus corniculatus* L. var. *crassifolia* Fr.; *Lotus corniculatus* L. var. *kochii* Chrtkova; *Lotus corniculatus* L. var. *major* (Scop.) Brand; *Lotus corniculatus* L. var. *maritimus* Rupr.; *Lotus komarovii* Miniaev; *Lotus major* Scop.; *Lotus olgae* Klokov; *Lotus ruprechtii* Miniaev; *Lotus tauricus* Juz.; *Lotus zhegulensis* Klokov)

Cosmopolitan. Perennial non-climbing shrub, bee plant

See *Species Plantarum* 2: 775–776. 1753 and *Botanical Gazette* 53(3): 221–222. 1912, *Flora URSS* 11: 291. 1945, *Fl. W. Pakistan* 100: 314. 1977, *Bot. Zhurn.* 65(6): 836–843. 1980, *Syst. & Geogr. Pl.* 68: 265–279. 1999

(Plant vulnerary. Leaf juice applied to treat cuts and wounds. Seeds to cure skin problems)

in English: bird’s foot trefoil, birdfoot trefoil, birdsfoot trefoil, common bird’s-foot-trefoil, trefoil

in China: bai mai gen, pai mai ken, po mo ken

in Nepal: nakharsimbi

in Arabic: rigl el-’asfour

Loudetia Hochst. ex Steud. Poaceae (Gramineae)

Perhaps the genus was named for Loudet, a German dentist, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *An Introduction to the Natural System of Botany* 449. 1836, *Flora* 24(2): 713. 1841, *Index Sem. Hort. Genuens.* 24. 1852, *Synopsis Plantarum Glumacearum* 1: 238. 1854 and *Bulletin of Miscellaneous Information Kew* 1934: 428–429, 431. 1934, *Bulletin of Miscellaneous Information Kew* 1936(5): 320–322, 324. 1936, *N. Amer. Fl.* 17(8): 578. 14 Jul 1939, *Fieldiana, Botany* 24(2): 1–390. 1955, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2–3): 226–354, fig. 18. 1957, *Kirkia* 5: 235–258. 1966, *Kew Bulletin* 21(1): 119–124. 1967, *Kew Bulletin* 26(1): 111–123. 1971, *Taxon* 27(2–3): 301. 1978, *Flora of Ethiopia and Eritrea* 286–289. 1995, *Functional Ecology* 13(6): 762–768. Dec 1999, *African Journal of Ecology* 38(2): 102–107. Jun 2000, *Journal of Ecology* 89(2): 200–208. Apr 2001, *Contributions from the United States National Herbarium* 46: 285, 623. 2003, *African Journal of Ecology* 42(s1): 6–13. Aug 2004.

Loudetia simplex (Nees) Hubb. (*Arundinella simplex* (Nees) Roberty; *Arundinella stipoides* Hack.; *Loudetia camerunensis* (Stapf) C.E. Hubb.; *Loudetia elegans* Hochst.; *Loudetia elegans* Hochst. ex A. Braun; *Loudetia stipoides* (Hack.) Conert; *Trichopteryx camerunensis* Stapf; *Trichopteryx elegans* (Hochst. ex A. Braun) Hack. ex Engl.; *Trichopteryx elegans* Hack.; *Trichopteryx elegans* var. *subulifolia* Franch.; *Trichopteryx elisabethvilleana* De Wild.; *Trichopteryx gracilis* Peter; *Trichopteryx incompta* Franch.; *Trichopteryx kapiensis* De Wild.; *Trichopteryx nigritiana* Stapf; *Trichopteryx simplex* (Nees) Benth.; *Trichopteryx simplex* Rendle; *Trichopteryx simplex* var. *gracilis* Rendle; *Tristachya elegans* (Hochst. ex A. Braun) A. Rich.; *Tristachya monocephala* Hochst.; *Tristachya simplex* Nees)

Tropical Africa. Perennial, very variable, compact, unbranched, tufted to loosely tufted to densely tufted, nodes with ring of hairs, weed species, thatching grass, low palatability or unpalatable when mature and dry, grazed when young, useful for erosion control, not very tolerant of drought

See *Florae Africae Australioris Illustrationes Monographicae* 269. 1841, *Flora* 1841: 713. 1841, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 373. 1895, *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897, *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* 2(1): 214. 1899 and Alfred Barton Rendle (1865–1938) et al., “Catalogue of the Plants collected by Mr. and Mrs. P.A. Talbot in the Oban District of South Nigeria.” *British Museum Trustees, Natural History*. London 1913, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 95. 1930, *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Petite Flore de l'Ouest-Africain* 392. 1954, *Bulletin de l'Institut Française d'Afrique Noire* 17: 56. 1955, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2–3): 260. 1957

(For stomach problems, applied on wounds.)

in English: russet grass

in Southern Africa: besemgrass, stingelgrass, tshula

Lovoa Harms Meliaceae

From the Lovo River in Angola, see *Die Natürlichen Pflanzenfamilien* 3(4): 307. 1896, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 165. 1896. Related to *Entandrophragma*, *Khaya* and *Pseudocedrela*.

Lovoa swynnertonii Bak.f.

Congo, Kenya, Uganda, Tanzania, Zimbabwe, Mozambique. Tree, narrow crown

See *J. Linn. Soc., Bot.* xl. 41, t. 3. 1911

(Bark analgesic; crushed bark rubbed on the chest to treat pulmonary troubles.)

in English: brown mahogany, miniature wooden banana

in Southern Africa: muWawa (Shona)

Lovoa trichilioides Harms (*Lovoa brownii* Sprague; *Lovoa corbisieriana* Staner; *Lovoa klaineana* Pierre ex Sprague)

Sierra Leone, Uganda, Tanzania, Angola. Tree, bole straight and cylindrical, inflorescence an axillary or terminal panicle, fruit a pendulous tetragonal capsule, honeybee plant

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 165. 1896 and *Journal of the Linnean Society, Botany* 37: 508–509. 1906 [1904–1906 publ. 1906], *Revue de zoologie et de botanique africaines* 19: 429–430. 1930, Nkouankou, J.F., *Monographie du dibétou (Lovoa trichilioides Harms)*. Centre Universitaire de Dschang, Cameroon. 1989

(The sawdust may be irritant. Bark analgesic; crushed bark rubbed on the chest to treat pulmonary troubles. Fish poison, bark and leaves mixed with bark and leaves of *Erythrophleum guineense*.)

in English: African golden walnut, African walnut, Benin walnut, black mahogany, brown mahogany, Congo wood, Lagos walnut, Lovoa wood, Nigerian golden walnut, Nigerian walnut, tigerwood, W. African walnut

in French: noyer, noyer Bassam, noyer d’Afrique, noyer du Gabon

in Central African Republic: igbangba

in Congo: bosso

in Gabon: dominguila, eyan, ngobemba, ombega, ombega fiote, ombolowbolo

in Cameroon: alop, bibolo, bikbolo, dibeton, eyan, ngobemba, wo

in Central Africa: n’zima

in Ghana: penkwa

in Ivory Coast: dibetou, houdra, koudra

in Yoruba: akoko eluju, akoko igbo, ewe olalu pepe, sida

in Nigeria: alop, anamomilla, apopo, bibolo, dibetou, epopo, kwo, okum, pereko, pereten, okoumegris, ombega-fiote, ombolombolo, penkwa, sida, urher-ike; akobo igbo, sida (Yoruba); apopo (Edo)

in Tropical Africa: apopo, bibolo, emero, eyan

Loxogramme (Blume) Presl Polypodiaceae (Grammitidaceae, Loxogrammaceae)

From the Greek *loxos* ‘oblique, slanting, crooked’ and *gramma* ‘line, letter’, see *Enumeratio Filicum* 197, 282. 1824, *Enumeratio Plantarum Guatemalensium* ... 1: 73. 1828, *Tentamen Pteridographiae* 214–215, pl. 9, f. 8. 1836.

Loxogramme involuta (D. Don) C. Presl (*Grammitis involuta* D. Don; *Gymnogramma involuta* (D. Don) Hook.; *Gymnogramma involuta* Hook.; *Gymnogramma involuta* Makino; *Loxogramme involuta* C. Presl)

China, Nepal.

See *Prodromus Florae Nepalensis* 14. 1825, *Tentamen Pteridographiae* 215. 1836, *Species Filicum* 5: 155. 1864 and *Glimpses Pl. Res.* 4: 98–130. 1979, *J. Cytol. Genet.* 22: 156–161. 1987, *Fern Gaz.* 14: 161–170. 1993

(Rhizome paste applied to treat cuts and wounds.)

in Nepal: parpare

Loxopterygium Hook.f. Anacardiaceae

Greek *loxos* ‘oblique, slanting, crooked’ and *pterygos* ‘small wing’, see *Gen. Pl.* [Bentham & Hooker f.] 1(1): 419. 1862.

Loxopterygium huasango Spruce ex Engl. (*Loxopterygium huasango* Spruce ex Marchand)

South America.

See *Genera Plantarum* 1: 419. 1862, *Monographiae Phanerogamarum* 4: 461. 1883 and *Flora of Ecuador* 30: 9–50. 1987, *Flora of Puná Island* 1–289. 2001, *Philos. Trans. R. Soc. Lond. B. Biol. Sci.* 359(1443): 515–537. 2004

(Contact with the leaves can cause dermatitis.)

in English: Hualtaco tree

Loxopterygium lorentzii Griseb. (*Quebrachia lorentzii* (Griseb.) Griseb.; *Quebrachia lorentzii* Griseb.; *Schinopsis lorentzii* Engl.; *Schinopsis lorentzii* (Griseb.) Engl.; *Schinopsis quebracho-colorado* (Schltdl.) F.A. Barkley & T. Mey.)

South America.

See *Botanische Zeitung. Berlin* 19: 139. 1861, *Genera Plantarum* 1: 419. 1862, *Pl. Lorentz.* 67. 1874, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 115–116. 1874, *Flora Brasiliensis* 12(2): 403. 1876, *Symbolae ad Floram Argentanam* 95. 1879, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24(1): 1–345. 1879, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(1): 46. 1880 [30 Apr 1880] and *Revista Mus. La Plata, Secc. Trans. R. Soc. Lond. B. Biol. Sci.* 359(1443): 515–37. 2004

(Irritant, contact with branches, leaves or sawdust may provoke dermatitis in sensitive persons.)

Common name: red quebracho

Loxostigma C.B. Clarke Gesneriaceae

From the Greek *loxos* ‘oblique, slanting, crooked’ and *stigma* ‘stigma’, an allusion to the nature of the stigma, see *Edinburgh Philos. J.* 1: 378. 1819, *Pl. Ind. Bat. Orient.* 7, t. 1. 1856, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 60. 1883.

Loxostigma griffithii (Wight) C.B. Clarke (*Dichrotrichum griffithii* C.B. Clarke; *Dichrotrichum griffithii* (Wight) C.B. Clarke; *Didymocarpus griffithii* Wight; *Loxostigma griffithii* C.B. Clarke)

China, Himalaya. Herb, pubescent, branched, corolla yellowish

See *Edinburgh Philosophical Journal* 1: 378. 1819, *Illustrations of Indian Botany* 2: 182, pl. 159. 1850, *Plantae Indiae Batavae Orientalis* 7. 1856, Clarke, Charles Baron (1832–1906), *Commelynaceae et Cyrtandraceae Bengalenses* 78–79, t. 51. Calcutta, 1874, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 5: 60. 1883

(To cure venereal diseases.)

in China: zi hua ju tai

Luculia Sweet Rubiaceae

Luculi swa is a Nepalese vernacular name for *Luculia gratissima* (Wall.) Sweet, see *Brit. Fl. Gard.* [Sweet] 2: t. 145. 1826.

Luculia gratissima (Wall.) Sweet (*Cinchona gratissima* Wall.; *Luculia gratissima* Sweet; *Luculia gratissima* Wall.; *Mussaenda luculia* Buch.-Ham. ex D. Don, nom. illeg.)

Himalaya, Thailand.

See *Species Plantarum* 1: 172, 177. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 154–156. 1824, *Prodromus Florae Nepalensis* 139. 1825, *Brit. Fl. Gard.* [Sweet] 2: t. 145. 1826, *Numer. List* [Wallich] n. 6117. B. 1831–1832

(Fruit juice given in cases of indigestion.)

in Nepal: bhra mhendo

Ludekia Ridsdale Rubiaceae

See *Blumea* 24(2): 334. 1978.

Ludekia bernardoi (Merr.) Ridsdale (*Nauclea bernardoi* Merr.; *Neonauclea bernardoi* (Merr.) Merr.)

Philippines. Small tree

See *J. Wash. Acad. Sci.* 5: 539. 1915, *Philipp. J. Sci.*, C 10: 101. 1915, *Blumea* 24(2): 335. 1978

(Fruits eaten for bleeding stool.)

Malay name: bae tuang, enpitap

Ludwigia L. Onagraceae

After the German botanist Christian Gottlieb Ludwig, 1709–1773, plant collector, physician, professor of medicine at Leipzig, 1731–1733 companion of Johann Ernst Hebenstreit (1703–1757) on an expedition to North Africa. See Carl Linnaeus, *Species Plantarum*. 118. [as *Ludwigia*] 1753, *Genera Plantarum*. Ed. 5. 55. 1754, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 5: 339. London 1796–1800, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 539. 1852 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 409. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 245. 1972, *Fl. Ecuador* 3: 1–46. 1974, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 745. Stuttgart 1993, *Fl. Mesoamer.* 4(1): 1. 2009.

Ludwigia abyssinica A. Rich. (*Jussiaea abyssinica* (A. Rich.) Dandy & Brenan)

Ethiopia. Shrub, stout, subsucculent, well branched, straggling or erect

See *Species Plantarum* 1: 388. 1753, *Tentamen Florae Abyssinicae* ... 1: 274. 1848 and *Flowering Plants of Africa* 1: 145. 1950

(Leaves for general healing, stomach troubles, for dressing wounds and eaten to treat abdominal pains. Leaf sap antiabortifacient, taken orally to prevent abortion. A root decoction used to treat liver diseases and intestinal worm infestations in children.)

in Sierra Leone: gambroi, goene, ka-kara, kogbuse, ndebigbe, ngumu, ra-sinikune, suraxame

Ludwigia adscendens (L.) H. Hara (*Jussiaea adscendens* L.; *Jussiaea patibilcensis* Kunth; *Jussiaea repens* L.; *Jussiaea repens* Berhaut; *Ludwigia clavellina* M. Gómez; *Ludwigia repens* J.R. Forst.)

India. A robust, prostrate or ascending herb, many-branched, floating, white petals, linear cylindrical capsular 10-ribbed thick-walled fruit, corky endocarp, weed, in fresh water pools, swamps

See *Hortus Malab.* 2: pl. 51. 1679, *Species Plantarum* 1: 118–119. 1753, *Mantissa Plantarum* 1: 69. 1767, *Flora Americae Septentrionalis* 6. 1771, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 6: 97. 1823, *Anales de la Sociedad Española de Historia Natural* 23: 66. 1894 and *Field Museum of Natural History, Botanical Series* 13(4/1): 521–566. 1941, *Journal of Japanese Botany* 28(10): 291. 1953, *Bulletin de la Société Botanique de France* 99: 321. 1953, *Bulletin of the Botanical Survey of India* 14: 170. 1972, *Botanical Bulletin of Academia Sinica* 24: 129–134. 1983, *Taxon* 40: 221–230. 1991, *Cathaya* 3: 37–44. 1991, *Regnum Veg.* 127: 58. 1993

(Floating roots boiled with mustard oil and rubbed over the body to cure swelling; roots to cure cataract by making

numerous contact with the eyes. Young twigs smashed and boiled in water and the extract given to cure jaundice. Shoot paste used for its febrifugal and antismelling properties, for poulticing skin complaints, boils, ulcers and impetigo. Juice of young leaves for diarrhea, dysentery, fever, cough. Leaf and stem extract in water drunk as a contraceptive.)

in English: floating Malayan willow-herb, marshy jasmine, water primrose

in Bangladesh: kaserdam

in China: shui long

in India: jaltanpa, kasara-dam, kesara-dam, neeru bachhali, neeru haavu, neerudantu, neeruhaavu gida, neeti theegalu, nir-carambu, panikhutara, panikhutura, talijuria, taljuria, tebo, thoyi pippalu

in Indonesia: buang buang, ganggeng landeuh, krangking

in Malaysia: inai pasir, tinggir bangau, ubat kulit

in Papua New Guinea: agidahano

in Philippines: gabi-gabi, sigang-dagat, tabagan

in Thailand: phak phang phuai, phak phaeng phuai, phak pot nam

in Vietnam: du long th[as]i, rau d[uwf]a n[uw][ows]c, rau d[uwf]a tr[aa]u

Ludwigia alternifolia L. (*Ludwigia alternifolia* L. var. *linearifolia* Britton; *Ludwigia alternifolia* L. var. *pubescens* Palmer & Steyerl.; *Ludwigia alternifolia* L. var. *typica* Munz)

North America. Perennial, yellow flowers, interesting seed pod like a small round box with a square top, a tiny hole in the middle of the square

See *Species Plantarum* 1: 118–119. 1753 and Louis G. Nickell, “Antimicrobial activity of vascular plants.” *Economic Botany*. 13(4): 281–318. New York, 1959, *Regnum Veg.* 127: 62. 1993

(Antimicrobial.)

in English: bushy seedbox, bushy waterprimrose, rattle box, seed box

Ludwigia bonariensis (Micheli) H. Hara (*Jussiaea bonariensis* Micheli; *Jussiaea neglecta* Small)

North America. Perennial herb

See *Flora* 57: 303. 1874 and *Journal of Japanese Botany* 28(10): 291. 1953

(For skin diseases.)

in English: Carolina primrose-willow

Ludwigia decurrens Walter (*Diplandra decurrens* (Walter) Raf.; *Jussiaea alata* G. Don, nom. illeg.; *Jussiaea alata* C. Presl; *Jussiaea bertonii* H. Lévy; *Jussiaea decurrens* (Walter) DC.; *Jussiaea palustris* G. Mey.; *Jussiaea pterophora* Miq.;

Jussiaea tenuifolia Nutt.; *Ludwigia jussiaeoides* Desr.; *Ludwigia jussiaeoides* Michx.; *Ludwigia uniflora* Raf.)

Tropical Africa.

See *Flora Caroliniana*, secundum ... 89. 1788, *Encyclopédie Méthodique, Botanique* 3: 614. 1792, *Medical Repository* 5: 358. 1808, *Primitiae Florae Essequiboensis* ... 173. 1818, *Flora Boreali-Americana* 1: 89. 1820, *American Journal of Science* 5(2): 294–295. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 56. 1828, *Reliquiae Haenkeanae* 2(1): 34. 1831, *A General History of the Dichlamydeous Plants* 2: 693. 1832, *Autikon Botanikon* 1: 35. 1840, *Annals and Magazine of Natural History* 11: 13. 1843 and *Fieldiana, Bot.* 24(7/4): 525–564. 1963, *Ann. Missouri Bot. Gard.* 66: 862–879. 1979, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 828–845. 2007

(Leaves and stems infusion taken as a remedy for heart palpitation, also for headache.)

in Tanzania: mniza

Ludwigia erecta (L.) H. Hara (*Jussiaea erecta* L.)

Central America.

See *Species Plantarum* 1: 388. 1753 and *Journal of Japanese Botany* 28(10): 292. 1953

(For nervous diseases, pound the leaves with seed of *Cuminum cyminum* and poultice.)

Malay name: jenlidah

Ludwigia hyssopifolia (G. Don) Exell (*Jussiaea hyssopifolia* G. Don; *Jussiaea linifolia* Vahl; *Jussiaea micrantha* Kunze; *Jussiaea weddellii* Micheli; *Jussiaea weddellii* Micheli; *Ludwigia micrantha* (Kunze) H. Hara)

Tropics. An annual herb

See *Species Plantarum* 1: 388. 1753, *A General History of the Dichlamydeous Plants* 2: 693. 1832, *Flora* 57: 301. 1874 and *Prop. Brit. Bot.* 153. 1929, *J. Jap. N. India, China. Herb, climbing, cordate scabrid leaves, flowers pale yellow in axillary racemes, elongated fruit, black seeds, tender unripe fruits eaten as a vegetable

See *Species Plantarum* 2: 1011. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition no. 1. 1754, Bijdragen tot de flora van Nederlandsch Indië* 932. 1826, *Flora Indica*; or, descriptions of Indian Plants 3: 713–714. 1832 and *Taxon* 31: 127–128. 1982, *Cytologia* 47: 471–480. 1982, *Cytologia* 55: 609–614. 1990, *Ceylon Journal of Science, Biological Sciences* 24(1): 17–22. 1995

(Seed oil applied on skin infections. Bitter seeds emetic and purgative, children advised not to swallow the seeds. Seeds for hemorrhoids and to cure skin infections; powder of dry bark of *Litsea salicifolia* with seeds of *Luffa acutangula* given in asthma; seeds for malaria and fevers, ground and eaten raw or mixed with the latex of *Alstonia scholaris*. Whole plant for toothache and abnormal menstruations; fine paste of the tendrils used externally and internally in snakebite. Fresh leaves juice dropped into the eyes in conjunctivitis, angular conjunctivitis; pounded leaves applied to hemorrhoids and leprosy. Leaves, fruit rind and flowers for skin diseases, bedsores. Flowers pounded and given with honey in sinusitis and night blindness. Fruits antipyretic, purgative and anthelmintic, to reduce inflammation; dried sponges for stomachache. Plants and seeds pesticide, against spider mites.)

in English: angled loofah, Chinese okra, dish-cloth gourd

in Mozambique: inhanherre

in Yoruba: kankan aya, orira

in Brazil: bucha-de-caçador, buchinha, cabacinha, purga-dos-grades-da-companhia

in Peru: taco

in India: ara tori, dodka, jhinga, jhingani, jika, pita tarada, pitta torai

in Lepcha: taryaa bi

in Japan: to-kado-hechima

in Malaysia: ketola hutan, ketola sanding

in Philippines: kabatiti, patola, sayuka, tabau-tabau, tabobog

Luffa acutangula (L.) Roxb. var. ***amara*** (Roxb.) C.B. Clarke (*Luffa amara* Roxb.)

India.

See *Flora Indica*; or, descriptions of Indian Plants 3: 715. 1832, *The Flora of British India* 2: 615. 1879 and *J. Cytol. Genet.* 31(1): 65–71. 1996

(Water boiled with fruits sprinkled on the floor to kill ants and white ants. Leaves boiled with *Sesamum indicum* oil applied as hair oil to kill lice. Veterinary medicine, raw fruits rubbed over the body of cattle to kill lice.)

in India: bodakaa janhi

Luffa aegyptiaca Mill. (*Cucumis fricatorius* Sessé & Moc.; *Luffa aegyptiaca* L.; *Luffa cylindrica* (L.) T. Durand & H. Durand; *Luffa cylindrica* M. Roem.; *Luffa fricatoria* Sessé & Moc.; *Luffa fricatoria* Donde, nom. illeg.; *Momordica cylindrica* L.; *Momordica luffa* L.; *Momordica luffa* Vell.)

Tropics. Trailer, vine, climber, herbaceous, tough green angular succulent stem, tendril, scabrid deeply lobed leaves, yellow flowers in racemes, smooth cylindrical fruit, blackish winged seeds, tender fruits used as vegetable

See *Species Plantarum* 2: 1009. 1753, *The Gardeners Dictionary: ... eighth edition no. 1. 1768, Fl. Cochinch.*, ed. 2. 2: 725. 1793, *Florae Fluminensis* 10: t. 93. 1827, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 63–64. 1846, *FBI* 2: 614. 1876, *Flora Mexicana*. 2: 227. 1894 and *Sylloge florae congolanae* 229. 1909, *Ann. Missouri Bot. Gard.* 65: 329. 1978, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001

(Fruits antiviral, antifungal, antimalarial, uterine stimulant, abortifacient, antihyperglycemic; tender fruits diuretic and lactagogue; fruits juice purgative; ripe fruits ash as carminative and anthelmintic. Liquid from the stem useful in respiratory troubles. Roots decoction for constipation, diarrhea. A decoction of *Alstonia scholaris* bark with bark of *Flacourtia jangomas*, seeds of *Luffa aegyptiaca* and rootstock of *Momordica cochinchinensis* given in asthma. Seeds bitter, emetic, cathartic; seed oil useful in skin diseases.)

in English: dishcloth gourd, European's sponge, loofah, luffa, smooth loofah, smooth luffa, sponge gourd, vegetable sponge, wash rag

in India: bhaul

in Papua New Guinea: kakapula, vuvup

Luffa cylindrica M. Roem. (*Cucumis fricatorius* Sessé & Moc.; *Luffa acutangula* var. *subangulata* (Miq.) Cogn.; *Luffa aegyptiaca* L.; *Luffa aegyptiaca* Miller; *Luffa cylindrica* (L.) T. Durand & H. Durand; *Luffa cylindrica* (L.) M. Roem.; *Luffa subangulata* Miq.; *Melothria touchanensis* H. Lév.; *Momordica cylindrica* L.; *Momordica luffa* L.; *Momordica luffa* Vell.)

India, Sri Lanka. Trailer, climber, herbaceous, scabrid deeply lobed leaves, yellow flowers

See *The Gardeners Dictionary* ... Abridged ... fourth edition no. 1. 1754, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 63–64. 1846 and *Sylloge florae congolanae* 229. 1909, *Cytologia* 47: 471–480. 1982, *Fl. Seem.; *Momordica operculata* L.; *Momordica operculata* Vell.; *Momordica purgans* Mart.; *Momordica quinquefida* Hook. & Arn.; *Momordica quinquefida* (Hook. & Arn.) Hook. & Arn.; *Poppya operculata* (L.) M. Roem.; *Poppya operculata* M. Roem.)

South America. Climbing vines, small yellowish flowers, tuberculate or spiny beaked fruits

See *Systema Naturae*, Editio Decima 2: 1278. 1759, *Primitiae Florae Essequiboensis* ... 278. 1818, *Florae Fluminensis* 10. 1827, *The Botany of Captain Beechey's Voyage* 292. 1838, *The Botany of Captain Beechey's Voyage* 424. 1840, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 59. 1846, *The Botany of the Voyage of H.M.S. ~Herald~* [Seemann] 7–8: 285. 1856, *Flora Brasiliensis* (Martius) 6(4): 12–13, t. 1. 1878, *Contributions from the United States National Herbarium* 1: 330. 1895 and *American Journal of Botany* 22: 256, t. 6, f. 1. 1935, *Syst. Bot.* 13(1): 138–145. 1988, *Kew Bulletin* 47(4): 741–742. 1992

(Seeds, stems and leaves purgative if eaten. Infusion of seed and fruit fiber drunk for snakebites.)

in English: sponge cucumber

in Venezuela: esponja, esponjilla

Luffa tuberosa Roxb.

India.

See *Hort. Bengal.* 104. 1814

(Crushed tuber juice mixed with leaf pulp of *Agave americana* given to induce abortion.)

in India: kasara

Luisia Gaudichaud Orchidaceae

Named in honor of the Spanish Don Luis de Torres, botanist of the 19th century; see L.C.D. de Freycinet, *Voyage autour du Monde entrepris par ordre du Roi ... sur les corvettes de S.M. "L'Uranie" et "La Physicienne"*. [Charles

Gaudichaud-Beaupré (1789–1854), Botany of the Voyage.] 426, t. 37. Paris 1826[–1830].

Luisia tenuifolia Blume (*Birchea teretifolia* A. Rich.; *Cymbidium tenuifolium* Lindl., nom. illeg.; *Luisia birchea* Blume; *Luisia evangelinae* Blatt. & McCann; *Luisia pseudotenuifolia* Blatt. & McCann; *Luisia tenuifolia* var. *evangelinae* (Blatt. & McCann) Santapau & Kapadia)

India, Sri Lanka. Epiphyte, pale green flowers with purple lip
See *Rumphia* 4: 50. 1849 and *J. Bombay Nat. Hist. Soc.* 35: 492–493. 1932, *J. Bombay Nat. Hist. Soc.* 59: 829. 1962

(Plant powder mixed with vinegar and taken for kidney diseases. Whole crushed plant soothing, emollient, used as a poultice to boils, abscesses and tumours.)

Luisia tristis (G. Forst.) Hook.f. (*Cymbidium triste* (G. Forst.) Roxb., nom. illeg.; *Epidendrum triste* G. Forst.; *Luisia atacta* D.L. Jones; *Luisia beccarii* Rchb.f.; *Luisia burmanica* Lindl.; *Luisia corrugata* D.L. Jones; *Luisia macrocarpa* Schltr.; *Luisia occidentalis* Lindl.; *Luisia platyglossa* Rchb.f.; *Luisia teretifolia* Gaudich.; *Luisia tristis* Hook. f.; *Luisia tristis* Kuntze; *Luisia truncata* Blatt. & McCann; *Luisia valida* Rchb.f.; *Luisia zeylanica* Lindl.; *Trichorhiza teretifolia* (Gaudich.) Lindl. ex Steud.)

Tropical Asia. Epiphyte, greenish dark purple flowers

See *Folia Orchidacea. Luisia* 3. 1853, *Bonplandia* (Hannover) 10: 335. 1862, *The Flora of British India* 6: 25. 1890, *Revisio Generum Plantarum* 2: 672. 1891 and *Repert. Spec. Nov. Regni Veg.* 17: 382. 1921, *J. Bombay Nat. Hist. Soc.* 35: 491. 1932, *Austral. Orchid Res.* 5: 84. 2006

(Used in Ayurveda. Plant used to treat fractures and sprains.)

in China: chai tzu ku

Lumnitzera Willd. Combretaceae

After the Hungarian botanist István (Stephan, Stephanus) Lumnitzer, 1750–1806, physician, author of *Flora Posoniensis exhibens Plantas circa Posonium sponte crescentes*, etc. Lipsiae 1791 and *De rerum naturalium adfinitatibus inauguralis dissertatio*, etc. Posonii [Pressburg, now Bratislava] [1777]. See *De Fructibus et Seminibus Plantarum...* 2: 90. 1790, Carl Ludwig von Willdenow, in *Der Gesellschaft naturforschender Freunde zu Berlin*, neue Schriften 4: 186. Berlin 1803 and Klára Verseghy, *Feddes Repert.* 68(1): 125. 1963, J.H. Barnhart, *Biographical Notes upon Botanists.* 2: 411. 1965, T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 245. 1972.

Lumnitzera racemosa Willd. (*Bruguiera madagascariensis* DC.; *Funckia karakandel* Dennst.; *Jussieua racemosa* Willd.; *Laguncularia rosea* Gaudich.; *Lumnitzera racemosa* var. *pubescens* Koord. & Valetton; *Lumnitzera rosea* (Gaudich.) C. Presl; *Petaloma alba* Blanco; *Petaloma albi-*

flora Zipp. ex Span.; *Petaloma alternifolia* Roxb.; *Pokornya ettingshausenii* Montr.; *Problastes cuneifolia* Reinw.)

East Africa. Shrub to small tree, evergreen, bushy, brittle branches, leaves slightly fleshy to leathery, white flowers, greenish yellow fruits turning black when ripe, in habitats with low salinity, on sandy soils, fruits eaten by birds, inner wood red when cut

See *Nova Genera et Species Plantarum seu Prodromus* 73. 1788, *Encyclopédie Méthodique, Botanique* 2: 457. 1788, *Genera Plantarum* 328. 1789, *Tableau Encyclopédique et Méthodique ... Botanique*, pl. 397. 1793, *Der Gesellschaft naturforschender Freunde zu Berlin.* 4: 186–187. 1803, *Supplementum Carpologiae* 3: 209. 1807, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesamten Naturkunde* 2: 19. 1808, *Sylloge Plantarum Novarum* 2: 10. 1826 [1828], *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 22–23. 1828, *Flora Indica*; or, descriptions of Indian Plants 2: 372, 373. 1832, *Flora de Filipinas* 1: 344. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 7: 602. 1839, *Mémoires de l'Académie Royale des Sciences, Belles-Lettres et Arts de Lyon: Section des Sciences* 10: 201. 1860, *Genera Plantarum* 2: 579, 586. 1876 and *J. Nat. Prod.*, 56(4): 629–632. 1993

(Latex from the stem used for itch, boils, herpes. Fruits in skin disorders. Antihypertensive, the leaves.)

in English: black mangrove, Kosi mangrove, Tonga mangrove, white-flowered black mangrove

in East Africa: kikandaa, mkandaa-mwitu, mkandaa-dume (Swahili)

in Madagascar: lovinjo, lovizo, rongo, rono, tanga, vahona, votishonko

in Southern Africa: Tongawortelboom (Afrikaans); isiKhaha-esibomvu (Zulu)

in Tanzania: mteda

in China: lan li

in Japan: hirugi-modoki, matsafushi

in Malaya: sesup, teruntum, teruntum bunga puteh, white teruntum

in Philippines: kulasi

in Sri Lanka: beriya, tipparuthin

Lunasia Blanco Rutaceae

The name of the plant in the Philippines, see *Flora de Filipinas* [F.M. Blanco] 783. 1837.

Lunasia amara Blanco (*Lunasia costulata* Miq.)

Philippines. A shrub or small tree, bark very pungent

See *Flora de Filipinas* 783. 1837, *Ann. Mus. Bot. Lugduno-Batavi* iii. 89. 1867 and *Die Flora der Deutschen Schutzgebiete in der Südsee* 376. 1900, *Journal of the Arnold Arboretum* 7: 232. 1926, *Plant Resources of South-East Asia (PROSEA)*. (Pl Res SEAs) 12(2): 359–361. 2001, *International Journal of Antimicrobial Agents* 29(6): 744–746. 2007, *Journal of Ethnopharmacology* 109(2): 289–294. 2007

(Leaves and bark antibacterial, to treat tropical ulcers, gastralgia, swollen limbs, tuberculosis, stomachache, skin diseases.)

in Indonesia: kemaitan, maitan

in the Philippines: apdong-kahoi, bunglai, dayandang, labau, lubi-lubi, lunan, lunas, lunas-bondok, marmangga, paitan, papait, saltiki, santiki

Lupinus L. Fabaceae (Genisteae, Leguminosae)

From the classical Latin name *lupinus*, *i* and *lupinum*, *i* ‘a lupin’, from *lupinus*, *a*, *um* (*lupus*) ‘wolf’s, belonging to a wolf’, probably thinking to the superstitious and wrong belief that this plant was able to consume and devour the soil fertility; Akkadian *luppu* ‘bean’, Hebrew *lifnaj* ‘interior’; see Carl Linnaeus, *Species Plantarum*. 2: 721–722. 1753, *Genera Plantarum*. Ed. 5. 322. 1754, *Proc. Amer. Acad. Arts* 8: 522. 1873 and *Repertorium Specierum Novarum Regni Vegetabilis* 16: 159. 1919, *Leaflets of Western Botany* 3(4): 92. 1941, Kingsbury, J.M. *Poisonous Plants of the United States and Canada*. Prentice-Hall Inc., Englewood Cliffs. 1964, L. Serianni, a cura di, *Testi pratesi della fine del Dugento e dei primi del Trecento*. Firenze 1977, *The Flora of Canada* 3: 547–1115. 1978, Cheeke, P.R., Shull, L.R. *Natural Toxicants in Feeds and Poisonous Plants*. AVI Publishing Company, Inc., Westport, Conn., USA. 1985, *Intermountain Flora* 3B: 1–279. 1989, Keeler, R.F. “Quinolizidine alkaloids in range and grain lupins.” Pages 133–167 in Cheeke, P.R., ed. *Toxicants of Plant Origin*. Vol. I. *Alkaloids*. CRC Press, Inc., USA. 1989, *Vascular Flora of the Southeastern United States* 3(2): xix, 1–258. 1990, Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Latina e di voci moderne. 2(2): 462. Leo S. Olschki Editore, Firenze 1994. The seed of many lupin species contain bitter-tasting toxic alkaloids.

Lupinus affinis J. Agardh (*Lupinus affinis* var. *carosulus* (Greene) Jeps.; *Lupinus carosulus* Greene; *Lupinus nanus* Douglas ex Benth. var. *carosulus* (Greene) C.P. Sm.)

North America. Annual non-climbing herb

See *Synopsis Generis Lupini* 20–21. 1835, *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 409–410, pl. 14, f. 2. 1835, *Bulletin of the California Academy of Sciences* 2(6B): 144–145. 1886 and *A Flora of Western Middle California* 317. 1901, *Bulletin of the Torrey Botanical Club* 50(5): 165. 1923

(Ceremonial, wreaths.)

in English: fleshy lupine

Lupinus albifrons Benth.

North America. Perennial non-climbing shrub or subshrub

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 410. 1835

(For stomach troubles. Ceremonial, wreaths.)

in English: silver lupine

Lupinus albifrons Benth. var. **albifrons**

North America. Perennial non-climbing shrub or subshrub

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 410. 1835

(Stomachic. Ceremonial, wreaths.)

in English: silver lupine

Lupinus albus L. (*Lupinus albus* subsp. *termis* (Forssk.) Ponert; *Lupinus termis* Forssk.)

USA, Algeria, China, Europe. Annual non-climbing herb

See *Species Plantarum* 2: 721–722. 1753, *Flora Aegyptiaco-Arabica* 131. 1775 and *Feddes Repertorium* 83(9–10): 619. 1972 [1973], *Agric. Res. Rep. Center Agric. Publishing Doc.* 815: 118. 1974, *Pharmaceutical Biology* 25(1): 39–43. 1987, *Giornale Botanico Italiano* 127(2): 264–273. 1993, *Flora Mediterranea* 7: 221–225. 1997

(Seeds diuretic, emmenagogue, hypoglycemic and vermifuge, taken internally for diabetes; bruised and soaked in water used as a poultice on ulcers.)

in English: Egyptian lupine, field lupine, white lupine, wolf bean

in Arabic: baqilla masri

Lupinus angustifolius L. (*Lupinus angustifolius* DC.; *Lupinus angustifolius* Blanco; *Lupinus canaliculatus* Sweet; *Lupinus linifolius* Roth; *Lupinus reticulatus* Desv.; *Lupinus varius* L.)

USA, Algeria, China, Europe. Annual non-climbing herb

See *Species Plantarum* 2: 721–722. 1753, *Flore Française*. (DC. & Lamarck) Troisième Édition 4: 507. 1805, *Brit. Fl. Gard.* [Sweet] Ser. I, 3: t. 283. 1823–1837, *Flora de Filipinas* [F.M. Blanco] 566. 1837 and *Lagasalia* 9: 115–130. 1979, *Anales del Jardín Botánico de Madrid* 39: 199–206. 1982, Petterson, D.S. et al. “Acute toxicity of the major alkaloids of cultivated *Lupinus angustifolius* seed to rats.” *J. Appl. Toxicol.*, 7: 51–53. 1987, *Lagasalia* 15: 124–129. 1988, *Acta Biologica Cracoviensia, Series Botanica* 31: 1–17. 1989, *Journal of Liquid Chromatography* 18(14): 2843–2853. 1995, *Flora Mediterranea* 7: 221–225. 1997, *Phytochemistry* 60(4): 323–327. 2002

(Saponins. Triterpene glycosides, antifungal.)

in English: blue lupin, blue lupine, European blue lupine, narrow-leaved lupin

Lupinus arboreus Sims (*Lupinus barilochensis* C.P. Sm.)

North and South America. Perennial non-climbing subshrub or shrub

See *Botanical Magazine* 18: t. 682. 1803 and *Species Lupinorum* 22: 349. 1944, *Fremontia* 16(3): 6–7. 1988, *Cytologia* 65: 149–152. 2000

(Ceremonial, flowers used in wreaths.)

in English: bush lupin, bush lupine, tree lupin, tree lupine, yellow bush lupine

Lupinus arcticus S. Watson (*Lupinus polyphyllus* Lindl. subsp. *arcticus* (S. Watson) L. Phillips)

North America. Perennial non-climbing shrub, herb

See *Botanical Register*; consisting of coloured ... 13: pl. 1096. 1827, *Proceedings of the American Academy of Arts and Sciences* 8: 526. 1873 and *Research Studies of the State College of Washington* 23(3): 181. 1955, *Taxon* 28: 265–268. 1979

(Seeds considered poisonous. Ceremonial.)

in English: arctic lupine

Lupinus arcticus S. Watson subsp. *arcticus* (*Lupinus borealis* A. Heller)

Lupinus donnellyensis C.P. Sm.; *Lupinus gakonensis* C.P. Sm.; *Lupinus multicaulis* C.P. Sm.; *Lupinus multifolius* C.P. Sm.; *Lupinus nootkatensis* Donn ex Sims var. *kiellmannii* Ostenf.; *Lupinus nootkatensis* var. *kjellmannii* Ostenfeld; *Lupinus polyphyllus* Lindl. subsp. *arcticus* (S. Watson) L. Phillips; *Lupinus relictus* Hultén; *Lupinus toklatensis* A. Nelson; *Lupinus yukonensis* Greene)

North America. Perennial non-climbing shrub, herb

See *Botanical Magazine* 32: pl. 1311. 1810, *Botanical Register*; consisting of coloured ... 13: pl. 1096. 1827, *Proceedings of the American Academy of Arts and Sciences* 8: 526. 1873 and *Vidensk.-Selsk. Skr. Mathem.-Naturv. Branch, Monograph 55. 1966, *Rhodora* 72(789): 111, 113. 1970, *Trans. Missouri Acad. Sci.* 6: 163. 1973, *Great Basin Naturalist* 38(3): 326–327. 1978, Davis, A.M. “The occurrence of anagryne in a collection of western American lupines.” *J. Range Manage.*, 35: 81–84. 1982, *Taxon* 31(2): 344–360. 1982, *Brittonia* 37(4): 415. 1985, Davis, A.M., Stout, D.M. “Anagryne in western American lupines.” *J. Range Manage.*, 39: 29–30. 1986, *Great Basin Naturalist* 46(2): 257. 1986, *Phytologia* 64: 390–398. 1988, *Vascular Plants of Wyoming* 297. 1988

(A plant that has caused sickness and death in sheep. Ingestion of this plant by pregnant cattle can also cause teratogenic effects in calves. The concentration of anagryne decreases in the leaves once the seeds begin to form, and then is greatest in the seeds. Two alkaloids, lupanine and sparteine, (both quinolizidine alkaloids), are probably involved in causing poisoning in sheep.)

in English: silver lupine, silvery lupine

Lupinus argenteus Pursh subsp. ***ingratus*** (Greene) Harmon (*Lupinus ingratus* Greene)

North America. Perennial non-climbing herb

See *Flora Americae Septentrionalis*; or, ... 2: 468. 1813 and *Pittonia* 4(22C): 133. 1900, *Transactions of the Missouri Academy of Science* 6: 163. 1972[1973], *Taxon* 31(2): 344–360. 1982, *Phytologia* 64: 390–398. 1988

(Crushed leaves made into a paste applied to poison ivy blisters, boils.)

in English: silver lupine, silvery lupine

Lupinus brevicaulis S. Watson (*Lupinus dispersus* A. Heller; *Lupinus scaposus* Rydb.)

North America. Annual non-climbing herb

See *United States Geological Exploration [sic] of the Fortieth Parallel*. Vol. 5, *Botany* 53–54, pl. 7, f. 1–4. 1871, *Abh. Königl. Ges. Wiss. Göttingen* 24: 98. 1879 and *Bull. Torrey Bot. Club* 34: 45. 1907, *Muhlenbergia* 5: 141. 1909

(Plant used for sterility, also rubbed on boils. Ceremonial, ritual.)

in English: sand lupine, shortstem lupine

Lupinus caudatus Kellogg subsp. ***argophyllus*** (A. Gray) L. Phillips (*Lupinus aduncus* Greene; *Lupinus argenteus* Pursh var. *argophyllus* (A. Gray) S. Watson; *Lupinus argophyllus* (A. Gray) Cockerell; *Lupinus caudatus* Kellogg var. *argophyllus* (A. Gray) S.L. Welsh; *Lupinus decumbens* Torr. var. *argophyllus* A. Gray; *Lupinus helleri* Greene; *Lupinus laxiflorus* Douglas ex Lindl. var. *argophyllus* (A. Gray) M.E. Jones)

North America. Perennial non-climbing herb

See *Botanical Register*; consisting of coloured ... 14: pl. 1140. 1828, *Memoirs of the American Academy of Arts and*

Science, new series 4(1): 37–38. 1849, *Reports of explorations and surveys*: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War 4(5): 81. 1857, *Proceedings of the California Academy of Sciences* 2: 197. 1863, *Proceedings of the American Academy of Arts and Sciences* 8: 532, 541. 1873 and *Torrey* 2(3): 42. 1902, *Contributions to Western Botany* 14: 33. 1912, *Research Studies of the State College of Washington* 23(3): 200. 1955, *Great Basin Naturalist* 38(3): 327. 1978

(Crushed leaves made into a paste applied to poison ivy blisters, boils, also a leaves infusion used as a lotion. Ceremonial, emetic.)

in English: Kellogg spurred lupine, Kellogg's spurred lupine

Lupinus cumulicola Small

North America. Perennial or annual, non-climbing, stem solitary from underground rootstalk, leaves simple, erect flowering racemes, turgid linear silky pod, curved beak

See *Manual of the Southeastern Flora* 681. 1933

(Poisonous, toxic to animals.)

in English: sky-blue lupine

Lupinus densiflorus Benth. (*Lupinus microcarpus* var. *densiflorus* (Benth.) Jeps.)

North America, Mexico. Annual non-climbing herb

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 410. 1835 and *A Flora of California* [Jepson] 2(3): 279–280. 1936

(Ceremonial, flowers used in wreaths.)

in English: whitewhorl lupine

Lupinus densiflorus Benth. var. *densiflorus* (*Lupinus densiflorus* Benth. var. *latilabris* C.P. Sm.; *Lupinus densiflorus* Benth. var. *latilabrus* C.P. Sm.; *Lupinus densiflorus* Benth. var. *scopulorum* C.P. Sm.; *Lupinus densiflorus* Benth. var. *stenopetalus* C.P. Sm.; *Lupinus densiflorus* Benth. var. *tracyi* C.P. Sm.; *Lupinus microcarpus* Sims subsp. *scopulorum* (C.P. Sm.) C.P. Sm.; *Lupinus microcarpus* Sims var. *densiflorus* (Benth.) Jeps.; *Lupinus microcarpus* var. *densiflorus* Jeps.; *Lupinus microcarpus* var. *scopulorum* C.P. Sm.)

North America, Mexico. Annual non-climbing herb

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 410. 1835 and *Bull. Torrey Bot. Club* 45: 174, 178–179, 201, fig. 19, 22, 23, 42. 1918, *Bull. Torrey Bot. Club* 51: 100. 1924, *A Flora of California* 2(3): 279–280. 1936

in English: whitewhorl lupine

Lupinus garfieldensis C.P. Sm. (*Lupinus sericeus* Pursh subsp. *asotinensis* L. Phillips; *Lupinus sericeus* Pursh var. *asotinensis* (L. Phillips) C.L. Hitchc.)

North America. Perennial non-climbing herb

See *Species Lupinorum* 38: 665–666. 1949, *Research Studies of the State College of Washington* 23(3): 170. 1955, *Vascular Plants of the Pacific Northwest* 3: 327. 1961

(Used for eyes and ears problems.)

in English: Garfield lupine

Lupinus kingii S. Watson

North America. Annual non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 534. 1873

(Plant used as an eye medicine. Crushed leaves made into a paste applied to poison ivy blisters, boils, skin irritations.)

in English: King's lupine

Lupinus kingii S. Watson var. *kingii* (*Lupinus capitatus* Greene; *Lupinus kingii* var. *argillaceus* (Wooton & Standl.) C.P. Sm.; *Lupinus kingii* var. *argillaceus* C.P. Sm.; *Lupinus sileri* S. Watson)

North America. Annual non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 534. 1873, *Proc. Amer. Acad. Arts* 10: 345. 1875, *Pittonia* 1: 171. 1888 and *Contributions from the United States National Herbarium* 16(4): 137. 1913, *Bulletin of the Torrey Botanical Club* 46(10): 395, fig. 45. 1919

(Plant used as an eye medicine. Crushed leaves made into a paste applied to poison ivy blisters, boils, skin irritations.)

in English: King's lupine

Lupinus latifolius Lindl. ex J. Agardh (*Lupinus confusus* A. Heller, nom. illeg.; *Lupinus confusus* Rose; *Lupinus latifolius* subsp. *leucanthus* (Rydb.) Kenney & D.B. Dunn; *Lupinus leucanthus* Rydb.; *Lupinus longipes* Greene; *Lupinus rivularis* Douglas ex Lindl. var. *latifolius* (Lindley ex J. Agardh) S. Watson; *Lupinus viridifolius* A. Heller)

North America. Perennial non-climbing herb, food

See *Edwards's Botanical Register* 19: pl. 1595. 1833, *Synopsis Generis Lupini* 18. 1835, *Proceedings of the American Academy of Arts and Sciences* 8: 525, 546. 1873, *Flora Franciscana* 1: 41. 1891 and *Bulletin of the Torrey Botanical Club* 30(4): 259. 1903, *Contributions from the United States National Herbarium* 8(4): 307. 1905, *Muhlenbergia*; a journal of botany 2(1B): 64–65. 1905, *Muhlenbergia*; a journal of botany 8(6): 63–64, f. 7. 1912, *Muhlenbergia*; a journal of botany 8(7): 84. 1912, *Bulletin of the Torrey Botanical Club* 51(7): 307. 1924, *A Manual of the Flowering Plants of California* ... 530. 1925, *Contributions from the Dudley Herbarium* 1(1): 50. 1927, *A Flora of California* 2(3): 260. 1936, *Research Studies of the State College of Washington* 23(3): 176. 1955, *Transactions of the Missouri Academy of Science* 10–11: 95, 100. 1977

(Tonic, stimulant.)

in English: broad-leaved lupine, broadleaf lupine

Lupinus latifolius Lindl. ex J. Agardh subsp. **latifolius** (*Lupinus caudiciferus* Eastw.; *Lupinus columbianus* A. Heller; *Lupinus confusus* A. Heller, non Rose; *Lupinus cytisoides* J. (Tonic, stimulant.)

in English: broad-leaved lupine, broadleaf lupine

Lupinus leucophyllus Douglas ex Lindl. (*Lupinus cyaneus* Rydb.; *Lupinus enodatus* C.P. Sm.; *Lupinus forslingii* C.P. Sm.; *Lupinus leucophyllus* var. *plumosus* (Douglas) B.L. Rob. ex Piper; *Lupinus macrostachys* Rydb.; *Lupinus macrostachys* Rusby, nom. illeg.; *Lupinus plumosus* Douglas)

North America.

See *Botanical Register*; consisting of coloured ... 13: pl. 1124. 1827, *Edwards's Botanical Register* 15: pl. 1217. 1829 and *Bulletin of the Torrey Botanical Club* 28(1): 35–36. 1901, *Contributions from the United States National Herbarium* 11: 354. 1906, *Bulletin of the Torrey Botanical Club* 34(1): 44. 1907, *Bulletin of the New York Botanical Garden* 4(14): 342–343. 1907, *Species Lupinorum* 29: 457. 1945, *Species Lupinorum* 40: 689. 1951, *Species Lupinorum* 43: 743–744, f. sn. 1952

(Toxic, should never be grazed since all stages of plant growth are toxic.)

in English: velvet lupine, woolly-leaf lupine

Lupinus littoralis Douglas ex Lindl. (*Lupinus littoralis* Douglas; *Lupinus littoralis* Torr.)

North America. Perennial non-climbing subshrub or herb, food

See *Botanical Register*; consisting of coloured ... 14: pl. 1198. 1828

(Sedative.)

in English: Chinook licorice, seashore lupine

Lupinus luteolus Kellogg (*Lupinus milo-bakeri* C.P. Sm.)

North America. Annual non-climbing herb, food

See *Proc. Calif. Acad. Sci.* 5(1): 38–39. 1873 and *Spec. Lupinorum* 240. 1940

(Ceremonial, flowers used in wreaths.)

in English: butter lupine, pale yellow lupine

Lupinus lyallii A. Gray (*Lupinus alpinus* A. Heller; *Lupinus lepidus* Douglas ex Lindl. subsp. *lyallii* (A. Gray) Detling)

North America. Perennial non-climbing subshrub or herb

See *Botanical Register*; consisting of coloured ... 14: pl. 1149. 1828, *Proceedings of the American Academy of Arts and Sciences* 7(2): 334–335. 1868 and *Muhlenbergia*; a journal of botany 6(2): 22–24, f. 4. 1910, *American Midland Naturalist* 45(2): 490. 1951

(Plant used for boils.)

in English: dwarf mountain lupine

Lupinus lyallii A. Gray subsp. **alcis-temporis** (C.P. Sm.) B. Cox (*Lupinus alcis-temporis* C.P. Sm.)

North America. Perennial non-climbing subshrub or herb

See *Botanical Register*; consisting of coloured ... 14: pl. 1149. 1828, *Proceedings of the American Academy of Arts and Sciences* 7(2): 334–335. 1868 and *Muhlenbergia*; a journal of botany 6(2): 22–24, f. 4. 1910, *Species Lupinorum* 32: 558–559. 1946, *American Midland Naturalist* 45(2): 490. 1951, *Rhodora* 76(807): 436. 1974

(Plant used for boils.)

in English: dwarf mountain lupine

Lupinus lyallii A. Gray subsp. **lyallii** var. **lyallii** (*Lupinus alpinus* A. Heller; *Lupinus lepidus* Douglas ex Lindl. subsp. *lyallii* (A. Gray) Detling; *Lupinus paulinus* Greene; *Lupinus rubro-soli* Eastw.)

North America. Perennial non-climbing subshrub or herb

See *Botanical Register*; consisting of coloured ... 14: pl. 1149. 1828, *Proceedings of the American Academy of Arts and Sciences* 7(2): 334–335. 1868 and *Muhlenbergia*; a journal of botany 6(2): 22–24, f. 4. 1910, *Leaflets of Botanical*

Observation and Criticism 2(11): 234. 1912, *American Midland Naturalist* 45(2): 490. 1951

(Plant used for boils.)

in English: dwarf mountain lupine

Lupinus mutabilis Sweet (*Lupinus cruckshanksii* Hook.; *Lupinus cruckshanksii* A. Gray, nom. illeg.; *Lupinus mutabilis* Lindl.; *Lupinus mutabilis* var. *mutabilis*)

South America, Colombia. Perennial non-climbing shrub

See *The British Flower Garden*, ... 2: pl. 130. 1825, *Botanical Magazine* pl. 3056. 1831, *Edwards's Botanical Register* 18: pl. 1539. 1832, *Brit. Flow. Gard.*, ser. 2, 3: pl. 203. 1833, *United States Exploring Expedition* 1: 393. 1854 and *Spec. Lupinorum* 36: 627–630. 1948, *Sp. Lupinorum* 29: 449–469. 1945, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989

(Seeds poisonous when uncooked, made edible by boiling, the water then being used in cattle-delousing or in fishing. Insecticide, fish poison.)

in English: Andean lupin, pearl lupin, pearl lupine, tarhui, tarwi

in Peru: chochos, talhue, tallhue, tarhui

in South America: tarhui, tarwi

Quechua name: tarwi

Aymara name: tauri

in Spanish: altramuz, chocho, chuchus muti, tarhui

Lupinus nanus Douglas ex Benth.

North America. Annual non-climbing shrub

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 409–410, pl. 14, f. 2. 1835

(Ceremonial, flowers used in wreaths.)

in English: sky lupine

Lupinus nanus Douglas ex Benth. subsp. *latifolius* (Benth. ex Torr.) D. Dunn (*Lupinus nanus* Douglas ex Benth. var. *latifolius* Benth. ex Torr.)

North America. Annual non-climbing shrub

See *Transactions of the Horticultural Society of London*, ser. 2, 1(5): 409–410, pl. 14, f. 2. 1835, *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean*, made under the direction of the Secretary of War 4(5): 81. 1857 and *Aliso* 3(2): 160. 1955

(Ceremonial, flowers used in wreaths.)

in English: sky lupine

Lupinus nootkatensis Donn ex Sims

North America. Perennial non-climbing herb, food

See *Botanical Magazine* 32: pl. 1311. 1810 and *Sida* 12: 409–417. 1987

(Roots considered poisonous.)

in English: Nootka lupine

Lupinus nootkatensis Donn ex Sims var. *fruticosus* Sims (*Lupinus arboreus* Sims var. *fruticosus* (Sims) S. Watson; *Lupinus nootkatensis* Donn ex Sims var. *glaber* Hook.; *Lupinus nootkatensis* Donn ex Sims var. *unalaskensis* S. Watson)

North America. Perennial non-climbing herb, food

See *Botanical Magazine* 32: pl. 1311. 1810, *Botanical Magazine* 47: pl. 2136. 1820, *Flora Boreali-Americana* 1(4): 163. 1832, *Proceedings of the American Academy of Arts and Sciences* 8: 524. 1873 and *Species Lupinorum* 29: 470–471. 1945, *Species Lupinorum* 32: 577–578. 1948, *Species Lupinorum* 37: 653, 655. 1949, *American Midland Naturalist* 46(3): 758. 1951[1952], *Research Studies of the State College of Washington* 23(3): 175. 1955, *Sida* 12: 409–417. 1987

(Roots considered poisonous.)

in English: Nootka lupine

Lupinus nootkatensis Donn ex Sims var. *nootkatensis* (*Lupinus albertensis* C.P. Sm.; *Lupinus kiskensis* C.P. Sm.; *Lupinus nootkatensis* fo. *leucanthus* Lepage; *Lupinus nootkatensis* var. *ethel-looffiae* C.P. Sm.; *Lupinus nootkatensis* Donn ex Sims var. *ethel-looffii* C.P. Sm.; *Lupinus nootkatensis* var. *fruticosus* Sims; *Lupinus nootkatensis* Donn ex Sims var. *henry-looffii* C.P. Sm.; *Lupinus nootkatensis* Donn ex Sims var. *perlanatus* C.P. Sm.; *Lupinus perennis* L. subsp. *nootkatensis* (Donn ex Sims) L. Phillips; *Lupinus trifurcatus* C.P. Sm.)

North America. Perennial non-climbing herb, food

See *Botanical Magazine* 32: pl. 1311. 1810, *Botanical Magazine* 47: pl. 2136. 1820 and *Species Lupinorum* 29: 470–471. 1945, *Species Lupinorum* 32: 577–578. 1948, *Species Lupinorum* 37: 653, 655. 1949, *American Midland Naturalist* 46(3): 758. 1951[1952], *Research Studies of the State College of Washington* 23(3): 175. 1955, *Sida* 12: 409–417. 1987

(Roots considered poisonous.)

in English: Nootka lupine

Lupinus perennis L.

North America. Perennial non-climbing herb

See *Species Plantarum* 2: 721. 1753 and *Taxon* 25: 155–164. 1976, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich) 13: 17–19. 1989

(Toxic, sheep are primarily affected, but all animals are susceptible. Antiemetic, antihemorrhagic, to check hemorrhage and vomiting.)

in English: blue lupine, blue pea, Indian beans, perennial lupine, Quaker's-bonnet, sundial, sundial lupine, wild lupine

in China: su genyu shan dou

in Japan: hauchiwa-mame

Lupinus perennis L. subsp. ***gracilis*** (Nutt.) D. Dunn (*Lupinus gracilis* Nutt., nom. illeg., non J. Agardh; *Lupinus gracilis* Kunth; *Lupinus gracilis* J. Agardh; *Lupinus gracilis* Durand & Hilg.; *Lupinus nuttallii* S. Watson; *Lupinus perennis* L. var. *gracilis* (Nutt.) Chapm.)

North America. Perennial non-climbing herb

See *Species Plantarum* 2: 721. 1753, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 115. 1834, *Synopsis Generis Lupini* 15, pl. 1, f. 2. 1835, *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 5: 7. 1855, *Flora of the southern United States* 89. 1860, *Proceedings of the American Academy of Arts and Sciences* 8: 526. 1873 and *Leaflets of Western Botany* 10(9): 154. 1965

(Veterinary medicine. Magico-religious beliefs, witchcraft, spiritual.)

in English: blue lupine, sundial lupine, wild lupine

Lupinus perennis L. subsp. ***perennis*** var. ***perennis***

North America. Perennial non-climbing herb

See *Species Plantarum* 2: 721. 1753 and *Taxon* 25: 155–164. 1976, *Int. Organ. Pl. Biosyst. Newsl.* (Zurich) 13: 17–19. 1989

(Toxic. Antiemetic, antihemorrhagic, to check hemorrhage and vomiting.)

in English: blue lupine, blue pea, Indian beans, perennial lupine, Quaker's-bonnet, sundial, sundial lupine, wild lupine

Lupinus polyphyllus Lindl. (*Lupinus adscendens* Rydb.; *Lupinus ammophilus* Greene; *Lupinus amplus* Greene; *Lupinus arcticus* S. Watson; *Lupinus arcticus* var. *humicola* (A. Nelson) C.P. "Anagryne in western American lupines." *J. Range Manage.*, 39: 29–30. 1986, *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1671–1673. 1989, *Biologia* 48: 441–445. 1993

(Plant considered poisonous. These species of plants can occasionally contain enough of the chemical anagryne, a quinolizidine alkaloid, to cause teratogenic effects in calves if the plant is ingested maternally between day 40 and day 70 of gestation. Care should be taken to prevent pregnant cattle from feeding on this lupine from day 40 to day 70 of gestation; sheep are primarily affected, but all animals are susceptible. Decoction of plants used as a tonic. Ceremonial, emotional.)

in English: bigleaf lupine, Burke's lupine, large-leaved lupine

Lupinus pusillus Pursh (*Lupinus pusillus* C.E. Anderson; *Lupinus pusillus* Torr.)

North America. Annual non-climbing herb

See *Species Plantarum* 2: 721–722. 1753, *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 468. 1813

(Toxins. This species has been involved in poisoning of sheep. Small lupine contains quinolizidine alkaloids, which have resulted in poisoning. For eyes and ears troubles. Ceremonial, ritual, juice as holy water.)

in English: low lupine, rusty lupine, small lupine

Lupinus pusillus Pursh subsp. *intermontanus* (A. Heller) D. Dunn (*Lupinus intermontanus* A. Heller; *Lupinus pusillus* Pursh var. *intermontanus* (A. Heller) C.P. Sm.)

North America. Annual non-climbing herb

See *Species Plantarum* 2: 721–722. 1753, *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 468. 1813 and *Muhlenbergia*; a journal of botany 8(8): 87–89, pl. 12. 1912, *Bulletin of the Torrey Botanical Club* 46(10): 408. 1919

(Toxins. This species has been involved in poisoning of sheep. Small lupine contains quinolizidine alkaloids, which have resulted in poisoning. For eyes and ears troubles. Ceremonial, ritual, juice as holy water.)

in English: intermountain lupine, low lupine, rusty lupine, small lupine

Lupinus pusillus Pursh subsp. *pusillus* (*Lupinus pusillus* subsp. *intermontanus* (A. Heller) D.B. Dunn)

North America. Annual non-climbing herb

See *Species Plantarum* 2: 721–722. 1753, *Flora Americae Septentrionalis*; or, ... [Pursh] 2: 468. 1813 and *Muhlenbergia*; a journal of botany 8(8): 87–89, pl. 12. 1912, *Bulletin of the Torrey Botanical Club* 46(10): 408. 1919, *Leaflets of Western Botany* 7(10): 255. 1955

(Toxins. This species has been involved in poisoning of sheep. Small lupine contains quinolizidine alkaloids, which have resulted in poisoning. For eyes and ears troubles. Ceremonial, ritual, juice as holy water.)

in English: low lupine, rusty lupine, small lupine

Lupinus rivularis Douglas ex Lindley (*Lupinus lignipes* A. Heller; *Lupinus rivularis* Lindl.; *Lupinus rivularis* Torr.; *Lupinus rivularis* J. Agardh)

North America. Perennial non-climbing subshrub, herb

See *Edwards's Botanical Register* 19: pl. 1595. 1833, *Synopsis Generis Lupini* 24–25. 1835, *Reports of explorations and surveys: to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 4(5): 81. 1857 and *Muhlenbergia*; a journal of botany 8(6): 66–67, f. 8. 1912

(Poultice.)

in English: river bank lupine, riverbank lupine

Lupinus sericeus Pursh (*Lupinus flexuosus* Lindley ex J. Agardh; *Lupinus flexuosus* J. Agardh; *Lupinus sericeus*

Cooper; *Lupinus sericeus* Eschscholtz; *Lupinus sericeus* Hook. & Arn.; *Lupinus sericeus* Nutt.; *Lupinus sericeus* Torr. & A. Gray; *Lupinus sericeus* var. *flexuosus* (Lindley ex J. Agardh) C.P. Sm.; *Lupinus sericeus* var. *subflexuosus* (Lindley ex J. Agardh) St. John & Warren)

North America. Perennial non-climbing herb, subshrub

See *Species Plantarum* 2: 721–722. 1753, *Flora Americae Septentrionalis*; or, ... 2: 468. 1814 [1813], *Journal of the Academy of Natural Sciences of Philadelphia* 7: 19. 1834, *Synopsis generis Lupini* ... 34–35. 1835, *A Flora of North America*: containing ... 1(3): 379. 1840, *Pacif. Railr. Rep.* 12(2): 52. 1860 and *Bulletin of the Torrey Botanical Club* 51(7): 307. 1924, *Prelim. List Pl. Kaniku Nat. For.* 1: 9. 1925, *Phytologia* 15(6): 329–446. 1967, Davis, A.M., Stout, D.M. “Anagyrene in western American lupines.” *J. Range Manage.*, 39: 29–30. 1986, Petterson, D.S., Ellis, Z.L., Harris, D.J., Spadek, Z.E. “Acute toxicity of the major alkaloids of cultivated *Lupinus angustifolius* seed to rats.” *J. Appl. Toxicol.*, 7: 51–53. 1987

(This lupine has caused poisoning and death in cattle, goats, horses, and sheep. Humans are also at risk from lupine toxins. Silky lupine contains two major quinolizidine alkaloids, lupanine and sparteine. These alkaloids and their derivatives cause poisoning and death in livestock. This species also contains a teratogenic chemical, anagyrene, which causes birth deformities in calves after maternal ingestion of the plants between day 40 and day 70.)

in English: silky lupine

Lupinus sericeus Pursh subsp. *sericeus* var. *sericeus* (*Lupinus aliumbellatus* C.P. Sm.; *Lupinus amniculi-salicis* C.P. Sm.; *Lupinus blankinshipii* A. Heller; *Lupinus falsocomatus* C.P. Sm.; *Lupinus flavicaulis* Rydb.; *Lupinus hermanworkii* C.P. Sm.; *Lupinus jonesii* Blank., non Rydb.; *Lupinus leucopsis* J. Agardh)

North America. Perennial non-climbing herb, subshrub

See *Synopsis Generis Lupini* 29. 1835 and *Bulletin of the Torrey Botanical Club* 30(4): 256. 1903, *Science studies, Montana College of Agriculture and Mechanical Arts, Botany* 1(2): 79. 1905, *Bulletin of the Torrey Botanical Club* 34(1): 43–44. 1907, *Muhlenbergia*; a journal of botany 4(3): 40. 1908, *Species Lupinorum* 42: 731–732, 736, f. sn. 1952, *Species Lupinorum* 43: 737, 741, f. sn. 1952

(For eye troubles.)

in English: silky lupine

Lupinus succulentus Douglas ex K. Koch (*Lupinus succulentus* Douglas ex K. Koch var. *layneae* C.P. Sm.)

North America. Annual non-climbing herb

See *Index Seminum* [Berlin] App. i. 11. 1867 and *Bulletin of the Torrey Botanical Club* 49(7): 203. 1922

(Ceremonial, flowers used in wreaths.)

in English: hollowleaf annual lupine

Lupinus sulphureus Douglas ex Hook. (*Lupinus sulphureus* S. Watson; *Lupinus sulphureus* Douglas ex G. Don; *Lupinus sulphureus* Douglas; *Lupinus sulphureus* Douglas ex Hook. var. *applegateanus* C.P. Sm.; *Lupinus sulphureus* var. *applegateianus* C.P. Sm.; *Lupinus sulphureus* Douglas ex Hook. var. *echlerianus* C.P. Sm.; *Lupinus sulphureus* var. *echlerianus* C.P. Sm.)

North America. Perennial non-climbing herb

See *Flora Boreali-Americana* (Hooker) 1(4): 166. 1832, *Gen. Hist.* 2: 367. 1832, *Botany* [Fortieth Parallel] 57. 1871 and *Fl. S.-E. Washington* (St. John) 229. 1937, *Species Lupinorum* 7: 109. 1939

(For eye troubles.)

in English: sulphur lupine

Lupinus versicolor Lindl. (*Lupinus* × *versicolor* Caball.; *Lupinus franciscanus* Greene; *Lupinus littoralis* var. *varicolor* (Steud.) Isely; *Lupinus micheneri* Greene; *Lupinus varicolor* Steud., orth. var.; *Lupinus varicolor* Steud.; *Lupinus versicolor* Sweet; *Lupinus versicolor* Caballero)

North America. Perennial non-climbing herb, subshrub

See *The British flower garden: containing coloured figures & descriptions of the most ornamental & curious hardy herbaceous plants ...* [Sweet] Ser. II. t. 12. London, 1823–1837, *Edwards's Botanical Register* 23: t. 1979. 1837, *Nomencl. Bot.* [Steudel], ed. 2. 2: 78. 1841, *Pittonia* 1: 64. 1887, *Erythea* 2: 119. 1894 and *Anales del Jardín Botánico de Madrid* 5: 507. 1945, *Native Natural. Legum. U.S.* 711. 1998

(Ceremonial, flowers used in wreaths.)

in English: manycolored lupine

Lupinus wyethii S. Watson (*Lupinus arcticus* var. *humicola* (A. Nelson) C.P. Sm.; *Lupinus humicola* A. Nelson)

North America. Perennial non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 525. 1873, *Bulletin of the Torrey Botanical Club* 25(4): 204–205. 1898 and *Illustrated Flora of the Pacific States* 2: 518. 1944, *Great Basin Naturalist* 46(2): 257. 1986

(For eye problems.)

in English: Wyeth's lupine

Sm.; *Lupinus flavescens* Rydb.; *Lupinus humicola* A. Nelson; *Lupinus polyphyllus* Lindl. var. *humicola* (A. Nelson) Barneby; *Lupinus rydbergii* Blank.; *Lupinus wyethii* subsp. *tetonensis* (E.E. Nelson) B. Cox & D. Dunn)

North America. Perennial non-climbing herb

See *Proceedings of the American Academy of Arts and Sciences* 8: 525. 1873, *Bulletin of the Torrey Botanical Club* 25(4): 204–205. 1898 and *Botanical Gazette* 30(2): 120–121. 1900, *Illustrated Flora of the Pacific States* 2: 518. 1944, *Transactions of the Missouri Academy of Science* 3: 82. 1969, *Great Basin Naturalist* 46(2): 257. 1986

(For eye problems.)

in English: Wyeth's lupine

Luvunga Buch.-Ham. ex Wight & Arn. Rutaceae

Luvunga lata is a Sanskrit and Bengali name, *lata* means climbing plant, see *Numer. List* [Wallich] n. 6382. 1831, *Prodr. Fl. Ind. Orient.* 1: 90. 1834.

Luvunga motleyi Oliv.

Borneo.

See *J. Proc. Linn. Soc., Bot.* 5(Suppl. 2): 44. 1861

(Roots decoction drunk to stop bleeding, for bleeding stool, piles, blood dysentery.)

Malay name: limau hutan

Luvunga scandens (Roxb.) Buch.-Ham. ex Wight & Arn. (*Limonia scandens* Roxb.; *Luvunga nitida* Pierre; *Luvunga scandens* (Roxb.) Buch.-Ham.; *Luvunga scandens* (Roxb.) Wight)

India, SE Asia, Thailand.

See *Hort. Bengal.* 32. 1814, *A Numerical List of Dried Specimens* [Wallich] n. 217. 1829, *Numer. List* [Wallich] n. 6382. 1831, *Flora Indica*; or, descriptions of Indian Plants 2: 380. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 90. 1834, *Ill. Ind. Bot.* 1: 108. 1838 [dt. 1840; issued in 1838], *Flore Forestière de la Cochinchine* 4(92): t. 288 B. 1893

(Root infusion as a postpartum remedy.)

in China: san ye teng

Malay name: susok ayam hutan

Luzula DC. Juncaceae

Latin *luteolus* 'yellowish', *herba luteola*; or from the Italian *lucciola*, firefly or glowworm, referring to the shining inflorescence; see *Plantae Veronenses* 3: 88. 1754, *Flore Française. Troisième Édition* 3: 158. 1805, *English Flora* 2: 177. 1824, *Revisio Generum Plantarum* 2: 722. 1891 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 355. Basel 1996, *Genome* 47: 246–256. 2004.

Lychnis L. Caryophyllaceae

Greek *lychnis*, *lychnidos* diminutive of *lychnos* ‘a lamp’, presumably in reference to an ancient use of the leaves of *Lychnis coronaria* (L.) Desr. or referring to the brilliancy of flowers; Latin *lychnis*, *idis* ‘a kind of rose of a fiery red’ (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 436. 1753, *Genera Plantarum*. Ed. 5. 198. 1754, *Flora Cochinchinensis* 259, 286. 1790, *Encyclopédie Méthodique, Botanique* 3(2): 643–644. 1792, *Flore Française. (For diarrhea, dysentery, astringent.)

in China: chien chun lo, jian chun luo

Lycium L. Solanaceae

Lykion was a Greek name used by Dioscorides and Plinius for a thorny shrub, dyer's buckthorn, perhaps a species of *Rhamnus*, probably derived from Lycia, a southwest region of Asia Minor; see Carl Linnaeus, *Species Plantarum*. 1: 191–192. 1753, *Genera Plantarum*. Ed. 5. 88. 1754 and Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 355–356. 1996, *Bot. Zhurn.* (Moscow & Leningrad) 85(6): 149. 2000.

Lycium barbarum Linnaeus (*Lycium halimifolium* Miller; *Lycium lanceolatum* Veillard; *Lycium turbinatum* Veillard; *Lycium vulgare* Dunal)

Japan, China. Shrub, spinous with sharp conical spines, branches whitish, leaves very variable, glabrous corolla pink, glabrous ovary ovoid-oblong, bright red berries, seeds embedded in a soft glutinous viscid pulp

See *Species Plantarum* 1: 191–192. 1753, *The Gardeners Dictionary*: ... eighth edition no. 6. 1768, *Traité des Arbres et Arbustes* [Nouvelle édition] 2: 119, 123, p. 31, 32. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(1): 509. 1852 and *Canadian Journal of Botany* 53(3): 249–255. 1975, *Hickenia* 1: 321–328. 1982, *Economic Botany* 37(3): 299–305. 1983, *Chinese Bulletin of Botany* 2(1): 43–44. 1984, *Acta Botanica Boreali-Occidentalia Sinica* 5: 149–154. 1985, *Acta Agriculturae Universitatis Jilinensis* 10: 1–2. 1988, *Chinese Traditional and Herbal Drugs* 20(6): 34–35. 1989, *Acta Botanica Boreali-Occidentalia Sinica* 10: 203–210. 1990, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 128: 19–39. 1991, *Cytologia* 62: 103–113. 1997, *Journal of Lanzhou University: Natural Sciences* 26(6): 97–100. 2000

(Fruits used for vertigo, seminal emissions, as a tonic; root bark for relieving cough and reducing fever. Magic, ritual, woven flexible stem tied around hips of women is said to facilitate delivery of child.)

in English: barbary box thorn, barbary wolf berry, Chinese box thorn, common matrimony vine, Duke of Argyll's tea tree, matrimony vine

in China: gouqi, ning xia gou qi

in India: chirchitta

Lycium chinense Mill. (*Lycium barbarum* var. *chinense* (Miller) Aiton; *Lycium chinense* var. *ovatum* (Poiret) C.K. Schneider; *Lycium megistocarpum* Dunal var. *ovatum* (Poiret) Dunal; *Lycium ovatum* Poiret; *Lycium rhombifolium* Dippel; *Lycium sinense* Grenier; *Lycium trewianum* Roemer & Schultes)

China. Sprawling nearly prostrate shrub, bark brown-red, fruits bright red, the young leaves eaten as a vegetable, and the seed oil used as a lubricant and for cooking, the species also grown for controlling erosion

See *Species Plantarum* 1: 191–192. 1753, *The Gardeners Dictionary*: ... eighth edition no. 6. 1768, *Hortus Kewensis*; or, a catalogue ... 1: 257. 1789, *Prodromus Florae Novae Hollandiae* 13(1): 510. 1810, *Systema Vegetabilium* 4: 693. 1819, *Annals and Magazine of Natural History*, ser. 2 14: 194. 1854, *Excursionfl. Grossh. Hessen* 218. 1888

(Vitamins, minerals, immune strengthen, whole system strengthened. Fruits used as a tonic, root bark used for relieving cough and reducing fever.)

in English: bow thorn, Chinese matrimony vine, Chinese wolf berry, matrimony vine, wolf berry

in China: di gu pi, ti ku pi, gou qi zi, gou qi, kou chi, go qi zi, tien tsai

in Japan: kuko, kuku

in Tibetan: phang-ma

in Vietnam: cau ky, cu khoi, phac khau khi

***Lycium europaeum* L.**

Tanzania, Kenya, Somalia. Shrub, spreading coarse and stiff branches, spines at the nodes, small solitary or in pairs flowers cream or pale mauve, corolla tubular 5-lobed, orange-red berries, plant for fodder, green leaves cooked and eaten, dry bushland, riverine bushland, disturbed areas

See *Species Plantarum* 1: 192. 1753 and *J. Cytol. Genet.* 13: 99–106. 1978

(Roots boiled to treat coughs and sores in the mouth. Leaves for treatment of constipation and stomachache. This plant forms thick clumps and is reputed to harbour snakes and rats.)

in Kenya: ekabekebeke, ekereru, il-maarach

in Tanzania: engokia, kihomolwa, kokonida

***Lycium pallidum* Miers**

North America. Perennial shrub, food

See *Annals and Magazine of Natural History*, ser. 2 14: 131. 1854 and *Taxon* 32: 510–511. 1983

(Plant used for chickenpox and toothaches. Roots for toothache. Ceremonial, protection, emetic; plant considered to be a sacred plant.)

in English: desert-thorn

Lycium pallidum* Miers var. *pallidum

North America. Perennial shrub, food

See *Annals and Magazine of Natural History*, ser. 2 14: 131. 1854 and *Bol. Soc. Bot. México* 43: 1–3. 1982, *Hickenia* 1: 321–328. 1982, *Taxon* 32: 510–511. 1983

(Plant used for chickenpox and toothaches. Roots for toothache. Ceremonial, protection, emetic; plant considered to be a sacred plant.)

in English: pale desert-thorn

***Lycium shawii* Roem. & Schult. (*Lycium albiflorum* Phil.)**

Tanzania. Shrub, scandent, spines, flowers white

See *Species Plantarum* 1: 191–192. 1753, *Systema Vegetabilium* 4: 693. 1819 and *Edinburgh Journal of Botany* 56: 253–264. 1999

(Roots for wounds.)

***Lycium torreyi* A. Gray (*Lycium torreyi* var. *filiforme* M.E. Jones)**

North America. Perennial shrub, food

See *Proceedings of the American Academy of Arts and Sciences* 6: 47. 1862, *Proceedings of the California Academy of Sciences*, Series 2, 5(18): 714. 1895 and *SouthW. Naturalist* 24: 187–206. 1979, *Bol. Soc. Bot. México* 43: 1–3. 1982

(Plant used for chickenpox and toothaches. Roots for toothache. Ceremonial, protection, emetic.)

in English: squawthorn, Torrey wolfberry

Lycopersicon Miller Solanaceae

Greek *lykopersion* for an Egyptian plant with a strong-smelling yellowish juice, some suggested from the Greek *lykos* 'a wolf' and *persikon* 'a peach', possibly referring to the poisonous or toxic properties; see *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *The Gardeners Dictionary: ... eighth edition* no. 2. 1768, *Die Natürlichen Pflanzenfamilien* 4(3b): 24. 1895 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 500. 1917, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 81: 204. 1962, *Fieldiana, Bot.* 24(10/1–2): 1–151. 1974, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 356. Basel 1996.

***Lycopersicon esculentum* Mill. (*Lycopersicon lycopersicum* (L.) H. Karst., nom. inval., tautonym, nom. rejic.; *Lycopersicum esculentum* Mill.; *Lycopersicum esculentum* var. *esculentum*; *Scubulon humboldtii* (Willd.) Raf.; *Solanum esculentum* Dunal; *Solanum humboldtii* Willd.; *Solanum lycopersicum* L.; *Solanum melongena* L. var. *esculentum* (Dunal) Nees; *Solanum pomiferum* Cav.) (*Scubulon* Raf., see Constantine Samuel Rafinesque (1783–1840), *Autikon botanikon*. Icones plantarum select. nov. vel rariorum, etc. 109. Philadelphia 1840, E.D. Merrill, *Index Rafinesquianus*. 212. 1949.)**

South America. Sprawling herb, creeping, erect to prostrate, taproot strong, lateral and adventitious roots, leaves imparipinnate arranged spirally, inflorescence a cyme, edible fruits red-orange, numerous cultivars

See *Species Plantarum* 1: 185. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *The Vegetable System* 9: 32. 1765, *The Gardeners Dictionary: ... eighth edition* no. 2. 1768, *Hortus Berolinensis* 27, t. 27. 1803, *Histoire Naturelle, Médicale et Économique des Solanum* 113, 208, pl. 3. 1813, *Linnean Society of London* 17: 49. 1837, *Autikon Botanikon* 109–110. 1840, *Deutsche Flora. (Analgesic, stomachic.)

in English: American water horehound

Lycopus asper Greene (*Lycopus lucidus* auct. non Turcz. ex Benth. p.p.; *Lycopus lucidus* Turcz. ex Benth. subsp. *americanus* (A. Gray) Hultén; *Lycopus lucidus* Turcz. ex Benth. var. *americanus* A. Gray; *Lycopus maritimus* Greene; *Lycopus obtusifolius* Benth.; *Phytosalpinx aspera* (Greene) Lunell)

North America. Perennial herb

See *Pittonia* 3: 340. 1898 and *Amer. Midl. Naturalist* 5: 2. 1917, *Cytologia* 46: 27–44. 1981, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 4: 331–339. 1981, *Taxon* 31(2): 344–360. 1982

(Plant considered poisonous. Plant decoction laxative for children.)

in English: rough bugleweed

Lycopus europaeus L. (*Lycopus europaeus* Walter, sensu auct.)

Europe. Polymorphic, flowers in axils, trigolan fruits

See *Species Plantarum* 1: 21. 1753, *Flora Caroliniana, secundum ...* 64. 1788 and *Rhodora* 80: 281–304. 1980

(Cattle avoid eating this herb, it may cause swelling followed by death.)

in English: European bugleweed, European gipsywort, European water horehound, water horehound

in China: ou di sun

in Arabic: ferasioun, zezka

Lycopus lucidus Turczaninow ex Bentham (*Phytosalpinx lucida* (Turcz. ex Benth.) Lunell)

Siberia to Temp. E. Asia. Perennial herb, erect, green or purplish, ridged stem usually simple, fleshy thick rhizomes, leaves opposite with margins coarsely toothed, small white flowers, calyx deeply 5-toothed, corolla bilabiate, 4 nutlets compressed, rhizomes prepared as a boiled vegetable and also salted, in damp places, along streams

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 178–179. 1848 and *Amer. Midl. Naturalist* 5: 2. 1917

(Aerial parts used medicinally for amenorrhea, irregular menstruation, edema, injuries, postpartum hematoma.)

in English: shining water horehound, shiny bugleweed, western water horehound

in China: di sun, ze lan

Lycopus lucidus Turcz. ex Bentham var. *hirtus* Regel (*Lycopus formosanus* (Hayata) Sasaki; *Lycopus lucidus* f. *hirtus* (Regel) Kitag.; *Lycopus lucidus* var. *formosanus* Hayata)

China to Temp. E. Asia. Woody herb, ridged stem

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 178–179. 1848, *Mém. Acad. Imp. Sci. Saint Pétersbourg*, Sér. 7, 4: 115. 1861 and *Icon. Pl. Formosan.* 8: 102. 1919, *Trans. Nat. Hist. Soc. Taiwan* 18: 171. 1928, *Neo-Lineam. Fl. Manshur.*: 546. 1979

(Aerial parts used medicinally for amenorrhea, irregular menstruation, edema, injuries, postpartum hematoma.)

in English: hirsute shiny bugleweed

in China: ying mao bian zhong

Lycopus uniflorus Michx. (*Euhemus uniflorus* (Michx.) Raf.; *Lycopus communis* E.P. Bicknell; *Lycopus coreanus* H. Lév.; *Lycopus membranaceus* E.P. Bicknell; *Lycopus parviflorus* (Benth.) Maxim.; *Lycopus pumilus* Vahl; *Lycopus uniflorus* f. *flagellaris* Fernald; *Lycopus uniflorus* var. *macrophyllus* Farw.; *Lycopus uniflorus* var. *membranacea* Farw.; *Lycopus uniflorus* var. *ovatus* Fernald & H. St. John; *Lycopus*

uniflorus var. *parviflorus* (Benth.) Kitag.; *Lycopus virginicus* var. *parviflorus* Benth.)

China to N. America. Perennial herb, erect, leaves green above, corolla style and filaments white, calyx green, anthers purple, slightly concave fruits green tinged with red covered with white granules, in sandy soils, in wetland

See *Fl. Bor.-Amer.* 1: 14. 1803, *Autik. Bot.*: 116. 1840, *Prim. Fl. Amur.*: 216. 1859 and *Man. Fl. N. States*: 803–804. 1901, *Repert. Spec. Nov. Regni Veg.* 8: 423. 1910, *Rep. (Bulbs poisonous, low toxicity if eaten.)

in English: magic lily, resurrection lily, spider lily

in China: ku ting hua, lu cong

Lygodium Swartz Schizaeaceae

From the Greek *lygodes* 'like a willow, flexible, twining', twining axes used for basketry and fish-traps, referring to the rachis or the shoots or to the pliant stems or to the climbing habit, etc.; see [Edited by Heinrich Adolph Schrader], *Journal für die Botanik*. 1800(2): 7, 106. (Mar.) 1802.

Lygodium circinatum (Burm. f.) Sw. (*Hydroglossum circinatum* (Burm. f.) Willd.; *Hydroglossum circinnatum* Willd.; *Lygodium circinatum* Sw.; *Lygodium circinnatum* (Burm.) Sw.)

China, India.

See *Synopsis Filicum* (Swartz) 153. 1806

(Stipe wound healing, for snake and insect bites.)

Lygodium flexuosum (L.) Sw. (*Hydroglossum flexuosum* (L.) Willd.; *Hydroglossum flexuosum* Willd.; *Lygodium pinnatifidum* Prantl; *Lygodium pinnatifidum* Sw.; *Ophioglossum flexuosum* L.; *Ophioglossum flexuosum* L.f.; *Ramondia flexuosa* (L.) Mirb.; *Ramondia flexuosa* Mirb.)

India. Perennial herb, slender climbing fern, rachis twining, long creeping rhizomes, tender parts eaten as vegetable

See *Species Plantarum* 2: 1063. 1753, *Bull. Sci. Soc. Philom. Paris* 2: 179, t. 12 f. 3. 1801, *Journal für die Botanik* 1800(2): 106. 1801, *Abhandlungen der Kurfürstlich-Mainzischen Akademie nützlicher Wissenschaften zu Erfurt* 2(6): 13, 20, 23, t 1, f. 3. 1802, *Schrad. Journ.* 1801[2]. 303. 1803. 1803

(Plants anti-ovulatory, anti-fertility, expectorant, used in jaundice; whole plant juice applied to insect bites, spider poisoning, septic wounds, itching, ringworm; plant paste applied to herpes; fresh juice of the plant given to check vomiting and fevers. Pasted rhizomes cause sterility in man and abortion in women; rhizome paste applied all over the body for convulsions in children; rhizome powder mixed with cow's urine applied against skin diseases; rhizome extract given for curing spermatorrhea; rhizome paste or powder given with sugar in abdominal pain and spermatorrhea; rhizome juice applied for piles, and given to women for irregular menses. Root of *Tectaria zeylanica* made into a paste with that of *Lygodium flexuosum* and prescribed in jaundice; fresh roots used externally for scabies, eczema, cuts, wounds and ringworms. Fronds antibacterial, febrifuge, boiled, mixed with vegetable oil, and applied over scabies, piles, body pain, fractured bones, ulcers, cuts and eczema; leaves infusion for treating

female infertility; leaves decoction to treat acute diarrhea and dysentery; leaf juice given for stomachache and constipation; leaves paste to treat skin diseases. Veterinary medicine, plant given to domestic animals to treat foot and mouth disease. Magic, ritual, superstitious beliefs, used as a talisman to protect the body from evil spirits. Medico-religious beliefs, roots tied in a thread are hung on the neck of cattle to repel parasites.)

in English: climbing fern

in Bangladesh: miau-makala

in Borneo: daun keritak

in India: aochani, badgochak, balkesh, bhut-raj, bish, chandani char, chandani khar, chepeti dhekia, cochinch, dawnzem, dawnzempui, dawnzunpui, dokeri, gariche kura, indrajal, jerri kura, kalajal, kali sinki, kalijad, karavalli, kari jhank, kari sinki, kottijurga, kukri-bisi, kukri lorong, lei-uri, mahadebjata, mahajaal, mayajal, mesintop, mohadebjata, sita chouri, tsjeru-valli-panna, valli-panna, vallipanna, vallippana

Malay name: ribu-ribu kechil

in Nepal: bak lyuki, baklyuki, bako toiro, janai lahara, kara jari, parewa muri

in the Philippines: katak, nito, nito a dadakkel, nitong puti

Lygodium japonicum (Thunberg) Swartz (*Hydroglossum dissectum* (Desv.) Steud.; *Hydroglossum japonicum* (Thunb.) Willd.; *Lygodium auriculatum* (Willd.) Alston; *Lygodium chaerophylloides* Desv.; *Lygodium chochinense* Desv.; *Lygodium dissectum* Desv.; *Lygodium flexuosum* (L.) Sw.; *Lygodium japonicum* fo. *elongata* Alderw.; *Lygodium japonicum* var. *microstachyum* (Desv.) C. Chr. & Tardieu; *Lygodium mearnsii* Copel.; *Lygodium microphyllum* Link, nom. illeg.; *Lygodium microstachyum* Desv.; *Lygodium microstachyum* var. *glabrescens* Nakai; *Lygodium pubescens* Kaulf.; *Lygodium scandens* (L.) Sw.; *Lygodium tenue* Blume; *Ophioglossum flexuosum* L.; *Ophioglossum japonicum* Thunb.; *Ophioglossum scandens* L.)

Asia to Australia. Perennial vine-like slender fern, herbaceous, usually climbing on trees, hairy rhizome, dark brown fibrous roots, soft twining fronds much divided, sporangia yellowish brown at maturity, sand-like spores, used in combination with rattan and/or bamboo in making hats and baskets, on slopes, forest, on paddy bank, in woods, at waters edge

See *Species Plantarum* 2: 1062–1063. 1753, *Systema Vegetabilium*. Editio decima quarta 926. 1784, *Journal für die Botanik* 1800(2): 7, 106. 1801, *Abhandlungen der Kurfürstlich-Mainzischen Akademie nützlicher Wissenschaften zu Erfurt* 2(4): 13, 20, 26. 1802, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 308. 1811, *Nomenclator Botanicus* 2: 205. 1824, *Enum.* 47, t. 1, f. 4. 1824, *Mémoires de la Société Linnéenne de Paris* 6: 206. 1827, *Enumeratio Plantarum Javae* fasc. 2: 254. 1828, *Hortus Regius Botanicus Berolinensis* 2: 141. 1833 and *Bulletin de l'Herbier Boissier*,

sér. 2, 2(3): 838. 1903, *Philippine Journal of Science* 3: 37. 1908, *Bulletin du Jardin Botanique de Buitenzorg*, sér. 2, 1: 10, t. 3. 1911, *Botanical Magazine* 41(492): 686. 1927, *Flore Générale de l'Indo-Chine* 7(2): 38. 1939, *Indian Fern Journal* 5: 162–169. 1988, *Journal of Japanese Botany* 65(7): 204–209. 1990, *Acta Phyt. Sin.* 38(5): 431. 2000

(Plant expectorant, diuretic, cathartic, anthelmintic. The spores and whole plant used for urinary tract infection and stones, colds, fever, mastitis and nephritic edema; plant paste applied to treat scabies and whitlow; plant juice to treat herpes and wounds; frond juice dropped in the wounds as vermicide, to kill maggots. Root paste applied on boils. Magico-religious beliefs, used in worship, contact therapy, an amulet of this fern tied around the neck of patients suffering from malaria.)

in English: climbing fern, crab herb, Japanese climbing fern, Japanese slender climbing fern

in China: hai jin sha, hai jin sha cao, hai jin sha teng, qiang huo

in India: ceriyavallipanna, curalvallipanna, lei-uri, nybo kin, ratibendanavili, sanjivani, tsjeriavallipanna, tsjuravallipanna

in Japan: kani-kusa (= crab herb), tsuru-shinobu (= vine hare's foot)

in Nepal: janai lahara, lute jhar, luto jhar, ukuse jhar, sinka jhar

in the Philippines: agsam, balanitu, karekai, kulot, nito, nitong Hapon, nitong puti

Lygodium lanceolatum Desv. (*Hydroglossum lanceolatum* Steud.; *Hydroglossum madagascariense* Poir.)

India. Climbing fern

See *Abhandlungen der Kurfürstlich-Mainzischen Akademie nützlicher Wissenschaften zu Erfurt* 2(6): 13, 20. 1802, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 307. 1811, *Encyclopédie Méthodique, Botanique* 3: 78. 1813, *Nomenclator Botanicus* 2: 205. 1824 and *Fl. Madagasc.* 8: 1–12. 1952

(Dried plant infusion taken to treat stomach and liver ailments.)

in Madagascar: pamahitra-ankanga

Lygodium longifolium (Willd.) Sw. (*Hydroglossum longifolium* Willd.)

SE Asia.

See *Abhandlungen der Kurfürstlich-Mainzischen Akademie nützlicher Wissenschaften zu Erfurt* 2(4): 22. 1802, *Journal für die Botanik* 2: 305. 1803

(Fresh leaves chewed to treat stomachache and diarrhea.)

in Papua New Guinea: buriyaveya

Lygodium microphyllum (Cav.) R.Br. (*Hydroglossum scandens* Willd.; *Hydroglossum scandens* (L.) Willd.; *Hydroglossum scandens* C. Presl; *Lygodium microphyllum* Link; *Lygodium microphyllum* R.Br.; *Lygodium scandens* Schkuhr; *Lygodium scandens* (L.) (Plant juice drunk for internal injuries, diarrhea, and as a wash after delivery. Rhizome of *Lygodium microphyllum* mixed with root of *Callicarpa arborea* squeezed and the juice given for stomach troubles. Leaves decoction drunk to treat dysentery; a decoction as a lotion for high fever, swellings; fresh leaves infusion inhaled to treat fever; for scorpion sting, measles and eruptive skin complaints, pound the leaves and poultice.)

in English: climbing maidenhair, snake fern

in Borneo: daun ikat-ikat, remat

in India: ceriyavallipanna, curalvallipanna, lei-uri, nybo kin, ratibendanavili, sanjivani, tsjeriavallipanna, tsjeru-vallipanna, tsjeruvallipanna, tsjura-vallipanna, tsjuravallipanna

in Indonesia: udu selaput

Malay names: daun ribu, ribu-ribu nasi, ribu rimau

in Nepal: kalo jara

in the Philippines: agsam, nito-nitoan, nitong-parang

Lygodium palmatum (Bernh.) Sw. (*Cteisium palmatum* Michx.; *Gisopteris palmata* Bernh.; *Hydroglossum palmatum* Willd.)

India.

See *Journal für die Botanik* 1800(2): 129, pl. 2(1). 1801, *Synopsis Filicum* 154. 1806

(Young fronds aqueous extract astringent, emollient, antiseptic, applied on boils, abscess, swellings.)

in English: American palm fern

Lygodium pinnatifidum Sw. (*Lygodium pinnatifidum* Prantl)

India.

See *Journal für die Botanik* 1803: 303. 1803, *Synopsis Filicum* 153. 1806

(Root paste applied on snakebite and root powder given orally.)

in India: berajal, bhutraj, eraochili, nanjom rehet

Lygodium polystachyum Wall. ex T. Moore (*Lygodium polystachyum* Wall., nom. nud.)

Thailand.

See *A Numerical List of Dried Specimens* [Wallich] n. 177. 1828, *Gardener's Chronicle & Agricultural Gazette* 671. 1857

(Young shoots crushed and smeared on insect bites or sores on the feet.)

Lygodium venustum Sw. (*Lygodium commutatum* C. Presl; *Lygodium mexicanum* C. Presl; *Lygodium polymorphum* (Cav.) Kunth; *Lygodium venustum* Liebm., nom. illeg.)

Brazil.

See *Journal für die Botanik* 1801(2): 303. 1803 and *Fl. Lesser Antill.* 2: 51. 1977

(Added to ayahuasca beverage.)

in Peru: rami, tchai del monte

Lygodium volubile Sw. (*Hydroglossum volubile* (Sw.) Willd.; *Lygodium micans* J.W. Sturm)

Jamaica.

See *Abhandlungen der Kurfürstlich-Mainzischen Akademie nützlicher Wissenschaften zu Erfurt* 2(6): 13, 20. 1802, *Journal für die Botanik* 1801(2): 304. 1803, *Species Plantarum*. Editio quarta 5: 78. 1810, *Flora Brasiliensis* 1(2): 178. 1859 and *Fl. Ecuador*. 66: 83–104. 2001

(Astringent, rhizome decoctions for heat and venereal diseases.)

in English: fiddle bush

Lyonia Nuttall Ericaceae

For the Scottish botanist John Lyon, 1765–1814 (d. North Carolina), 1796–1803 gardener in Philadelphia, 1799 W. Pennsylvania, 1807–1808 Tennessee. See Henry C. Andrews, *The Botanist's Repository*. London 1803, *Medical Repository* 5: 353. 1808, Thomas Nuttall, *The Genera of North American Plants*, and catalogue of the species, to the year 1817. 1: 266–267. London 1838, *Transactions of the American Philosophical Society*, new series, 8: 268. 1843[1842], *A Manual of the Botany of the Northern United States* Ed. 2. 253–254. 1856, *Dendrologie* 2: 115–116. 1872,

Genera Plantarum 2: 588. 1876, *Synoptical Flora of North America* 2(1): 31. 1878, J.W. Harshberger, *The botanists of Philadelphia and their work*. 133. 1899 and *An Illustrated Flora of the Northern United States* 2: 690–691, f. 3243–3244. 1913, *Flora of Lancaster County* 218. 1913, *Shrubs of Florida* 96, 133. 1913, *North American Flora* 29(1): 64. 1914, Joseph Ewan and Nesta Ewan, “John Lyon, Nurseryman, and Plant Hunter, and His Journal, 1799–1814.” in *Transactions of the American Philosophical Society*. 53(2): 1–69. 1963, Alice Margaret Coats, *The Quest for Plants. A History of the Horticultural Explorers*. 289–291. London 1969, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 129. Berlin & Hamburg 1989, *Fl. Neotrop.* 66: 222–350. 1995.

Lyonia ovalifolia (Wall.) Drude (*Andromeda ovalifolia* Wall.; *Lyonia ovalifolia* Hort.; *Pieris ovalifolia* (Wall.) D. Don; *Xolisma ovalifolia* (Wall.) Rehder)

India, China. Small trees, pendulous white cup-shaped flowers, flowers and fruits eaten

See *Asiatic Researches* 12: 391. 1820, *Numer. List* [Wallich] n. 763. 1829, *Edinburgh New Philosophical Journal* 17: 159. 1834, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 4(1): 44. 1889 and *Journal of the Arnold Arboretum* 5(1): 52. 1924

(Young leaves reported to be toxic or poisonous to cattle, to goats, may cause death if eaten in excess. A paste of the young twigs and tender leaves used for scabies, skin diseases, pimples and boils. Dried leaves insecticide; crushed leaves applied to cure eczema; leaf juice applied to treat scabies; young leaves infusion applied to skin diseases; paste of leaves applied to cure the skin disorders, ringworm; young leaves and buds rubbed on floors and beds against fleas and insects. Young leaves for fish poisoning. *Vernonia cinerea* mixed with young leaves of *Lyonia ovalifolia*, pounded and applied as a remedy for wounds. Mystical power, ghost tree.)

in China: ku shu zai, li mu, zhen zhu hua

in India: ailan, airean, aiyaar, angeri, angeril, angyar, anyar, ayanar, ayar, diengla samiang, ehran, ja lyn suiang, jirhap, mapri prito, tlang-ham, tlangham

in Lepcha: kaang chaor koong

in Nepal: angeri, anyero, chele, domsing, pak sin, prayesi

Lyonia villosa (Wall. ex C.B. Clarke) Hand.-Mazz. (*Lyonia villosa* (Hook.f. ex C.B. Clarke) Hand.-Mazz.; *Pieris villosa* Hook.f. ex C.B. Clarke; *Pieris villosa* Wall. ex C.B. Clarke; *Xolisma villosa* Rehder; *Xolisma villosa* (Wall. ex C.B. Clarke) Rehder)

China, India.

See *The Flora of British India* [J.D. Hooker] 3(9): 461. 1882 and *Journal of the Arnold Arboretum* 5(1): 53. 1924, *Symbolae Sinicae* 7(4): 789. 1936

(Leaves for skin diseases, itching.)

in China: mao ye zhen zhu hua

Lysichiton Schott Araceae

Greek *lysis* ‘a loosening, releasing’ and *chiton* ‘a tunic, cloak, covering’, referring to the spathe, cast off; see *Oesterreichisches Botanisches Wochenblatt* 7: 62. 1857 and D.H. Nicolson, “Derivation of aroid generic names.” *Aroideana*. 10: 15–25. 1988.

Lysichiton americanus Hulten & H. St. John (*Lysichiton camtschatcensis* auct. non (L.) Schott)

North America. Perennial herb, oval leaves, tiny flowers clustered in a spike, fetid smell of the sap and flowers, forage

See *Oesterreichisches Botanisches Wochenblatt* 7: 62. 1857 and Hultén, E. and H. St. John. “The American species of *Lysichiton*.” *Svensk Botanisk Tidskrift* 25(4): 453–464. 1931

(Roots considered poisonous or somewhat toxic. Leaves poultice for burns and injuries, tuberculosis. Root decoction taken for stomachache and colic; a poultice applied to sores, burns, blood poisoning and boils, rheumatism, arthritis and lumbago.)

in English: American skunkcabbage, skunk-cabbage, western skunk-cabbage, yellow skunk cabbage

Lysidice Hance Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

Perhaps from the Greek *lysis* ‘a loosening, releasing, parting’ and *dike* ‘usage, custom’, see *Journal of Botany, British and Foreign* 5(58): 298. 1867.

Lysidice rhodostegia Hance

China, Vietnam. Perennial non-climbing tree, small evergreen shrub, treelet, flowers pinkish to brown-violet

See *Journal of Botany, British and Foreign* 5(58): 299. 1867

(The roots, stems, and leaves are somewhat toxic, and used medicinally to ease pain and for detumescence, also to relieve pain of rheumatism and arthritis.)

in China: long yan shen, yi hua

Lysiloma Benth. Fabaceae (Ingeae, Mimosaceae)

From the Greek *lysis* ‘a loosening, releasing, separation’ and *loma* ‘border, margin’, see *Flora of Baja California* 644–711. 1980, *Listados Florísticos de Mexico* 4: 90–112. 1986, *Flora Novo-Galiciana* 5: 1–786. 1987, *Cuscatlania* 1(2): 1–16. 1989, *Mem. New York Bot. Gard.* 74(1): 260. 1996, *Kew Bull.* 59(3): 453–467. 2004, *Ceiba* 44(2): 105–268. 2003 [2005].

Lysiloma divaricatum (Jacq.) J.F. Macbr. (*Acacia divaricata* (Jacq.) Willd.; *Lysiloma affinis* Britton & Rose; *Lysiloma australe* Britton & Rose; *Lysiloma australis* Britton & Rose; *Lysiloma calderonii* Britton & Rose; *Lysiloma chiapense* Britton & Rose; *Lysiloma chiapensis* Britton & Rose; *Lysiloma divaricata* (Jacq.) Phytotax.* 29: 101–106. 1994, *Kew Bull.* 59(3): 453–467. 2004

(Hypoglycemic, antiinflammatory, analgesic. Ash of flowers for acidity. Roots decoction for fever. Seeds vermicide intestinal, in ascariasis, also for diabetic treatment.)

in English: wild tamarind

Lysiloma tergemina Benth. (*Lysiloma tergeminum* Benth.)

Mexico. Perennial non-climbing tree

See *Transactions of the Linnean Society of London* 30(3): 534. 1875 and *Phytotherapy Research* 15(4): 356–359. 2001

(Antimicrobial, bacteriostatic.)

Lysimachia L. Primulaceae

Lysimachion, *lysimateion* and *lysimachia*, named for Lysimachos, King of Thrace, or from Greek *lysimachos* ‘ending strife’ (*lyo*, *lyein* ‘to loosen, loose’, *lysis* ‘a loosening, releasing, parting’ and *mache* ‘strife’); Latin *Lysimachus* for the discoverer of the herb *lysimachia* (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 146–148. 1753, *Genera Plantarum*. Ed. 5. 72. 1754, *Genera Plantarum* 95. 1789, *Annales Générales des Sciences Physiques* 7: 193. 1821, *Flora Bostoniensis*... . second edition 74. 1824, Klatt, Friedrich Wilhelm (1825–1897), *Die Gattung “Lysimachia” L.*, monographisch bearbeitet. Hamburg, 1866 [*Abh. Naturw. Ver. Hamb.*, iv.], *Genera Plantarum* 2: 635. 1876 and *Notes from the Royal Botanic Garden, Edinburgh* 16: 80, 106, 121. 1928, Handel-Mazzetti, Heinrich R. E. (1882–1940), “Die Subgenera, Sektionen und Subsektionen der Gattung *Lysimachia* L.” *Die Pflanzenareale*, 5: 39–41. 1929, *Illinois Biological Monographs* 24(3–4): 98. 1956, Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 357. Basel 1996.

Lysimachia alfredii Hance

China.

See *J. Bot.* 15(180): 356. 1877

(Antiseptic.)

in China: guang xi guo lu huang

Lysimachia christinae Hance (*Lysimachia christinae* Hance var. *pubescens* Franchet; *Lysimachia fargesii* Franchet; *Lysimachia glandulosa* R. Knuth; *Lysimachia latronum* H. Léveillé & Vaniot; *Lysimachia legendrei* Bonati)

China.

See *J. Bot.* 11: 167. 1873

(Used as a diuretic.)

in China: guo lu huang

Lysimachia ciliata L. (*Nummularia ciliata* (L.) Kuntze; *Steironema ciliatum* (L.) Raf.)

North America. Herb, erect, fringed lanceolate-ovate leaves, solitary yellow flowers

See *Species Plantarum* 1: 146–148. 1753, *Annales Générales des Sciences Physiques* 7: 193. 1820, *Revisio Generum Plantarum* 2: 398. 1891 and *Brittonia* 32: 309–322. 1980,

Watsonia 22: 279–281. 1999, *Intermountain Flora* 2B: 1–488. 2005

(For skin diseases.)

in English: fringed loosestrife

Lysimachia congestiflora Hemsley (*Lysimachia congestiflora* Hemsley var. *atronervata* C.C. Wu; *Lysimachia gymnocephala* Handel-Mazzetti; *Lysimachia hui* Diels ex Handel-Mazzetti; *Lysimachia japonica* Thunberg var. *cephalanthia* Franchet; *Lysimachia nigropunctata* Masamune; *Lysimachia rubroglandulosa* C.Y. Wu; *Lysimachia smithiana* Craib; *Lysimachia taiwaniana* Suzuki ex M.T. Kao)

China.

See *J. Linn. Soc., Bot.* 26: 50. 1889

(Used for injuries, fractures, contusions and strains.)

in China: lin shi jiu

Lysimachia debilis Wall.

India, China.

See *Flora Indica*; or descriptions of Indian Plants 2: 25–26. 1824

(For snakebite.)

in China: nan ya guo lu huang

Lysimachia foenum-graecum Hance

China.

See *J. Bot.* 15: 355. 1877

(Tonic, stimulant.)

in China: ling xiang cao

Lysimachia insignis Hemsley (*Lysimachia insignis* Hemsley fo. *flaviflora* Lock.; *Lysimachia insignis* fo. *flaviflora* P.K. Loc)

China.

See *Species Plantarum* 1: 146–148. 1753 and *Hooker’s Icon. Pl.* 27(2): t. 2634. 1900, *Journal of Biology (Vietnam)* 1(2): 8. 1979

(Fleshy roots used for rheumatism and injuries.)

in China: san ye xiang cao

Lysimachia nemorum L. (*Lysimachia azorica* Hook.)

Europe.

See *Species Plantarum* 1: 146–148. 1753 and *Informatore Botanico Italiano* 19: 173–180. 1987, *Folia Geobotanica et Phytotaxonomica* 23: 375–381. 1988, *Mitteilungen der Botanischen Staatssammlung München* 27: 33–49. 1988, *Mitteilungen der Botanischen Staatssammlung München* 28: 297–311. 1989, *Watsonia* 18: 415–417. 1991, *Opera Botanica* 137: 1–42. 1999, *Watsonia* 19: 134–137. 1992

(Astringent.)

in English: yellow pimpernel

Lysimachia quadrifolia L. (*Lysimachia quadrifolia* Mill.)

North America. Perennial herb, erect, whorled leaves, yellow star-like flowers with red dots

See *Species Plantarum* 1: 147. 1753, *Gard. Dict.*, ed. 8. n. 10. 1768

(Root decoction for gastrointestinal problems and kidney troubles; an infusion for menstrual disorders and urinary troubles, also as an emetic. Veterinary medicine, sedative.)

in English: prairie loosestrife, smooth loosestrife, whorled loosestrife, whorled yellow loosestrife

Lysimachia ruhmeriana Vatke (*Lysimachia africana* Engl.; *Lysimachia parviflora* Baker; *Lysimachia woodii* Schltr. ex Pax & R. Knuth)

East Africa.

See *Linnaea* 40: 204. 1876, *Journal of the Linnean Society, Botany* 20: 196. 1883, *Pflanzenr. Ost Afr.* C: 304. 1895 and *Flore de Madagascar et des Comores* 162: 3–14. 1981, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983

(For colds, coughs.)

Lysimachia thyrsoflora L. (*Lysimachia thyrsoflora* Geners.; *Naumburgia guttata* Moench; *Naumburgia thyrsoflora* Rchb.; *Naumburgia thyrsoflora* (L.) Rchb.; *Naumburgia thyrsoflora* (L.) Duby; *Nummularia thyrsoflora* (L.) Kuntze; *Nummularia thyrsoflora* Kuntze)

Japan, North America. Perennial herb, erect, bright yellow flowers in rounded raceme clusters

See *Species Plantarum* 1: 147. 1753, *Methodus Plantas Horti Botanici ... Suppl.* (Moench) 23. 1802, *Flora Germanica Excursoria* 410. 1830, *Revisio Generum Plantarum* 2: 398. 1891 and *Kromosomo* 18–19: 515–525. 1980, *Taxon* 31: 363–364. 1982, *Turun yliopiston julkaisuja—Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1–12. 1982 [also *Ann. Univ. Fenn. Abo.*, A 3: 1–12. 1982], *Botaničeskij Žurnal* (Moscow & Leningrad) 74: 1675–1678. 1989, *Mitteilungen der Botanischen Staatssammlung München* 28: 297–311. 1989, *Journal of Hokkaido University of Education: Section IIB* 40: 37–48. 1989

(For diarrhea and postpartum remedy.)

in English: thyrse loosestrife, tufted loosestrife

in China: qiu wei hua

Lythrum L. Lythraceae

Greek *lythron* ‘blood, blood and dust, impure blood’, referring to the colour of the flowers; Sanskrit *rudhiram*; see Carl Linnaeus, *Species Plantarum*. 1: 446–447. 1753 and *Genera Plantarum*. Ed. 5. 205. 1754, *Exposition des Familles Naturelles* 2: 175. 1805.

Lythrum alatum Pursh

North America. Perennial subshrub, herb

See *Flora Americae Septentrionalis*; or, ... 1: 334. 1813

(Purifier.)

in English: winged-angled loosestrife, winged loosestrife

Lythrum alatum Pursh var. ***lanceolatum*** (Elliot) Torr. & A. Gray ex Rothr. (*Lythrum alatum* var. *lanceolatum* (Elliott) Rothr.; *Lythrum lanceolatum* Elliot)

North America. Perennial subshrub, herb

See *Flora Americae Septentrionalis*; or, ... 1: 334. 1813, *A Sketch of the Botany of South-Carolina and Georgia* 1(6): 544–545. 1821, *Report Upon United States Geographical Surveys West of the One Hundredth Meridian, in Charge of First Lieut. Geo. M. Wheeler ...* vol. 6, *Botany* 120. 1878[1879]

(For kidney troubles.)

in English: lance-leaf loosestrife, winged lythrum

Lythrum californicum Torrey & A. Gray

North America. Perennial subshrub, herb

See *A Flora of North America: containing ...* 1(3): 482. 1840

(Medicinal value.)

in English: California loosestrife

Lythrum salicaria L. (*Lythrum anceps* (Koehne) Makino; *Lythrum argyi* H. Lév.; *Lythrum intermedium* Ledeb. ex Colla; *Lythrum salicaria* var. *anceps* Koehne; *Lythrum salicaria* var. *glabrum* Ledeb.; *Lythrum salicaria* L. var. *gracilior* Turcz.; *Lythrum salicaria* var. *intermedium* (Ledeb. ex Colla) Koehne; *Lythrum salicaria* var. *mairei* H. Lév.; *Lythrum salicaria* L. var. *tomentosum* (Mill.) DC.; *Lythrum salicaria* L. var. *vulgare* DC.)

North America. Perennial subshrub, herb

See *Species Plantarum* 1: 446. 1753, *Herbarium Pedemontanum* 2: 399. 1834, *A Flora of North America: containing ...* 1(3): 482. 1840, *Flora Rossica* 2: 127. 1843, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(4): 327–328. 1881 and *Das Pflanzenreich* 4(IV.216): 76. 1903, *Repertorium Specierum Novarum Regni Vegetabilis* 4(73–74): 330–331. 1907, *Botanical Magazine* 22(263): 169. 1908, *Catalogue des Plantes de Yun-Nan* 172. 1916, *Turun Yliopiston Julkaisuja, Sar. A 2, Biol.-Geogr.* 3: 1–12. 1982, *Bot. Zhurn. SSSR* 70(7): 997–999. 1985, *J. Hokkaido Univ. Educ.*, Sect. 2B 40: 37–48. 1989, *Watsonia* 21: 365–368. 1997, *Opera Bot.* 137: 1–42. 1999, *Korean J. Pl. Taxon.* 35: 47–55. 2005

(Febrifuge. Ceremonial, magico-religious beliefs.)

in English: bouquet-violet, purple loosestrife, purple lythrum, spiked loosestrife

in China: qia qu cai, qian qu cai

M

Maackia Ruprecht Fabaceae (Sophoreae)

Named for the Estonian naturalist Richard Karlovich (Karlovic) Maack (Maak), 1825–1886, explorer, botanist, plant collector in Siberia. See Eduard August von Regel (1815–1892), *Tentamen Florae Ussuriensis*, oder Versuch einer Flora des Ussuri-Gebietes. Nach den von Herrn R. Maack gesammelten Pflanzen bearbeitet von E. Regel. St. Petersburg 1861 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, H.N. Clouke, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 204. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 417. 1965, Emil Bretschneider, *History of European Botanical Discoveries in China*. 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 129. Berlin & Hamburg 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 745. Stuttgart 1993, *Bot. Žurn.* (Moscow & Leningrad). 79(6): 122–123. 1994.

Maackia amurensis Rupr. subsp. *buergeri* (Maxim.) C.K. Schneid. (*Cladrastis amurensis* Benth. var. *buergeri* Maxim.; *Cladrastis amurensis* Benth. var. *floribunda* Franch. & Sav.; *Cladrastis amurensis* Benth. var. *vidalii* Franch. & Sav.; *Maackia amurensis* Rupr. var. *buergeri* (Maxim.) C.K. Schneid.; *Maackia buergeri* (Maxim.) Tatem.)

Japan, Russia. Perennial non-climbing tree

See *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 15: 128, 143. 1856, *Genera Plantarum* 1: 554. 1862 and *Trans. Sapporo Nat. Hist. Soc.* 16: 4. 1939, *Acta Phytotaxonomica et Geobotanica* 25(2–3): 44. 1972, *Wild Flws of Japan*, *Woody Pls.* 1: 229–256. 1989

(Bark used locally for bruises.)

in Japan: chikupeni

Mabea Aubl. Euphorbiaceae

See *Histoire des plantes de la Guiane Française* 2: 867, t. 334. 1775, *Nomencl. Bot.* 2(1): 191. 1874 and *Fieldiana, Bot.* 24(6): 25–170. 1949, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 71(2): 87–95. 2000, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002.

Mabea fistulifera Mart. (*Mabea angustifolia* Spruce ex Benth.; *Mabea fistulifera* Benth., nom. nud.)

Brazil, Bolivia, Paraguay. Shrub or small tree, sticky milky latex, reddish edible fruits, nectar-feeding by primates, a pioneer plant species with seeds dispersed by the ant *Atta sexdens rubropilosa*

See *Reise Bras.* 2: 479. 1828, *Hooker's Journal of Botany and Kew Garden Miscellany* 6: 365. 1854 and *Journal of Tropical Ecology* 8(3): 225–239. 1992, *Planta Med.* 63: 386. 1997, *Economic Botany* 55(4): 555–569. 2001, *Revista Brasileira de Zoologia* 21, 453–458. 2004, *Biochemical Systematics and Ecology* 35(10): 717–719. 2007, *Quim. Nova* 31(3): 475–478. 2008

(Bark febrifuge, astringent, antimicrobial. Flavonoids. Tobacco pipe.)

in South America: canudo de pito, helecho, macorocillo, siringuillo, tacuarí

Mabea nitida Spruce ex Benth. (*Mabea depauperata* Pax & K. Hoffm.; *Mabea muricata* Jabl.; *Mabea nitida* Benth.; *Mabea nitida* var. *albiflora* Müll.Arg.; *Mabea nitida* var. *purpurascens* Müll.Arg.; *Mabea pallida* Baill., nom. nud.; *Mabea pallida* Müll.Arg.)

South America.

See *Hooker's J. Bot. Kew Gard. Misc.* 6: 367. 1854, *Étude Euphorb.* 413. 1858, *Adansonia* 4: 371. 1864, *Prodr.* (DC.) 15(2): 1150, 1152. 1866, *Memoirs of the New York Botanical Garden* 17(1): 169. 1867 and *Pflanzenr.*, (Engler) IV, 147, XIV: 56. 1919, *Mem. New York Bot. Gard.* 17(1): 169. 1967

Macaranga Thouars Euphorbiaceae

It is a Madagascan native name for one species in the genus; see Louis-Marie Aubert du Petit-Thouars (1758–1831), *Genera nova Madagascariensis*. 26. 1806 (in *Mélanges de Botanique et de Voyages ...* Paris 1811).

Macaranga beccariana Merr. (*Macaranga hypoleuca* (Rchb.f. & Zoll.) Müll.Arg. var. *borneensis* Hutch. ex Gibbs)

Borneo.

See *J. Linn. Soc., Bot.* 42: 136. 1914, *Webbia* 7: 315. 1950

(Root decoction for high fever.)

Macaranga denticulata (Blume) Müll.Arg. (*Macaranga denticulata* Müll.Arg.; *Macaranga denticulata* var. *pustulata* (King ex Hook.f.) Chakrab. & M. Gangop.; *Macaranga gmelinaefolia* King ex Hook.f.; *Macaranga gmelinifolia* King ex Hook.f.; *Macaranga gummiflua* Müll.Arg.;

Macaranga gummiflua (Miq.) Müll.Arg.; *Macaranga henricorum* Hemsl.; *Macaranga perakensis* Hook.f.; *Macaranga pustulata* King ex Hook.f.; *Mappa denticulata* Blume; *Mappa gummiflua* Miq.; *Mappa truncata* Müll.Arg.; *Mappa wallichii* Müll.Arg.; *Rottlera glauca* Hassk.; *Tanarius denticulatus* Kuntze; *Tanarius denticulatus* (Blume) Kuntze; *Tanarius gmelinifolius* Kuntze; *Tanarius gmelinifolius* (King ex Hook.f.) Kuntze; *Tanarius paniculatus* Kuntze; *Tanarius perakensis* Kuntze; *Tanarius perakensis* (Hook.f.) Kuntze; *Tanarius pustulatus* Kuntze; *Tanarius pustulatus* (King ex Hook.f.) Kuntze)

Tropical Asia, China. Fast-growing tree, evergreen, peltate denticulate leaves, flowers in panicles, blackish capsules deeply bilobed, black seeds, leaves eaten by cattle

See *Linnaea* 34: 198. 1865, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 1000. 1866, *Fl. Brit. India* [J.D. Hooker] 5: 445–447. 1887, *Revis. Gen. Pl.* 2: 619–620. 1891, *J. Linn. Soc., Bot.* 26: 442. 1894 and *J. Econ. Taxon. Bot.* 13: 597. 1989

(Leaves decoction for washing wounds; leaves infusion as a postpartum remedy. Gum-like exudate from the base of the leaf petiole applied on cuts and wounds. A decoction of roots with roots of *Morus australis* given in goiter. Magic, ritual ceremonial, pieces of branches kept to prevent attack from departed souls.)

in India: bol ajak, burna, burno, chhagru, chir-chim, dieng lakhor, jaglo, jagura, lakoi, laubaung-laung-araung, malata, mallata, moralia, mumro-kung, yah-changne

Malay names: balek angin, mesepat

Macaranga gigantea (Zoll.) Müll.Arg. (*Macaranga gigantea* Müll.Arg.; *Macaranga gigantea* (Rchb.f. & Zoll.) Müll. Arg.; *Macaranga incisa* Gage; *Macaranga megalophylla* Müll.Arg.; *Macaranga megalophylla* (Müll.Arg.) Müll. Arg.; *Macaranga rugosa* (Müll.Arg.) Müll.Arg.; *Macaranga rugosa* Müll.Arg.; *Mappa gigantea* Rchb.f. & Zoll.; *Mappa macrophylla* Kurz ex Teijsm. & Binn., nom. illeg.; *Mappa megalophylla* Müll.Arg.; *Mappa rugosa* Müll.Arg.; *Rottlera gigantea* Rchb.f. & Zoll. ex Kurz; *Rottlera gigantea* (Rchb.f. & Zoll.) Rchb.f. & Zoll. ex Kurz; *Tanarius giganteus* Kuntze; *Tanarius giganteus* (Rchb.f. & Zoll.) Kuntze; *Tanarius megallophyllus* (Müll.Arg.) Kuntze; *Tanarius megallophyllus* Kuntze; *Tanarius rugosus* Kuntze; *Tanarius rugosus* (Müll.Arg.) Kuntze)

Sumatra, Thailand, Malesia. Small tree, leaves densely velvety hairy below, petiole flattened above

See *Linnaea* 29: 465. 1858, *Natuurk. Tijdschr. Ned.-Indië* 27: 44. 1864, *Prodr.* (DC.) 15(2.2): 995. 1866, *Revis. Gen. Pl.* 2: 619–620. 1891 and *Rec. Bot. Surv. India* 9: 245. 1922

(Astringent latex from the rachis and trunk applied as an ointment to the tongue and lips to treat thrush. Root decoction taken for diarrhea, dysentery, and as a postpartum remedy.)

in English: spotted tongue

in Indonesia: jela bung-bung

Malay names: kubin, mahang, menkubong, selaru

Macaranga grandifolia (Blanco) Merr. (*Croton grandifolius* Blanco; *Macaranga grandifolia* Turrill, nom. illeg.; *Macaranga portea* André)

Philippines.

See *Flora de Filipinas* 753. 1873, *Rev. Hort.* 60: 175. 1888 and *Philipp. J. Sci.*, C 7: 394. 1913 [1912 publ. 1913], *Journal of the Linnean Society, Botany* 43: 38. 1915

(Resin astringent, a gargle for ulcers in the mouth.)

in Philippines: biluak, bingabing, binungas

Macaranga griffithiana Müll.Arg. (*Macaranga adenophila* Pax & K. Hoffm.; *Macaranga motleyana* subsp. *griffithiana* (Müll.Arg.) Whitmore; *Mappa triloba* Müll.Arg.; *Tanarius griffithianus* (Müll.Arg.) Kuntze)

Indonesia, Vietnam.

See *Flora* 47: 466. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 998. 1866, *Revis. Gen. Pl.* 2: 619. 1891 and *Pflanzenr.*, IV, 147, VII: 310. 1914, *Kew Bulletin* 29: 448. 1974

(Root decoction febrifuge. Magic, possession, pound the leaves in water and wash the face of those who have suffered possession.)

Malay name: mahang

Macaranga harveyana (Müll.Arg.) Müll.Arg. (*Mappa gigantea* Zoll.; *Mappa harveyana* Müll.Arg.; *Macaranga harveyana* var. *glabrata* Pax & K. Hoffm., nom. illeg.; *Macaranga harveyana* var. *puberula* Pax & K. Hoffm.; *Tanarius harveyanus* (Müll.Arg.) Kuntze)

S. Pacific. Small tree

See *Flora* 47: 467. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 998. 1866, *Revis. Gen. Pl.* 2: 619. 1891 and *Pflanzenr.*, IV, 147, VII: 357. 1914

(A drink made from the root bark utilized in treating hemorrhoids after pregnancy. Leaves used for treating stomach ailments of infants.)

in Tonga: loupata

Macaranga hullettii King ex Hook.f. (*Macaranga bartlettii* Merr.; *Macaranga hullettii* subsp. *borneensis* Whitmore; *Macaranga hullettii* subsp. *hullettii*; *Tanarius hullettii* (King ex Hook.f.) Kuntze)

Malaysia, Thailand.

See *Fl. Brit. India* 5: 452. 1887, *Revis. Gen. Pl.* 2: 619. 1891 and *Pap. Michigan Acad. Sci.* 19: 161. 1933[1934], *Kew Bulletin* 29: 446. 1974

(Leaves decoction for stomachache.)

Malay name: balek angin

Macaranga indica Wight (*Macaranga adenantha* Gagnep.; *Tanarius indicus* (Wight) Kuntze; *Tanarius indicus* Kuntze; *Trewia hernandifolia* Roth)

India, China, Sumatra. Trees, dioecious, evergreen, leaves with resinous yellow glands beneath, greenish-yellow flowers

See *Icon. Pl. Ind. Orient.* 5: t. 1883. 1852, *Revis. Gen. Pl.* 2: 619. 1891

(Used in Sidha. Red-coloured sap from the bark used to heal sores. Antiemetic, leaves squeezed in water which is drunk; leaf juice mixed in water drunk for gastric troubles; leaves decoction for stomachache, gastric disorders, poultice applied on belly; squeezed leaf paste tied on the testicles to cure hydrocele.)

in India: alamantha, bettadaavare, bettadavare, bettadavarai, boddi, boddi chettu, boldotru, bundi maram, chanda kanne, chandakanne, chendakanni, dieng lakhar, jaathi uppalige, jaglo, jajiuppala, jatiyuppalige, jing, kanchu, kanchupranthi, kanhed, kantuparanki, kin-rul, kinrul, kinsul, malata, paranki, pattatamara, pattavanni, peemugam, pimukam, pottu-damarai, pottuttamarai, potuvanni, putta-tamara, puttatamara, puttathaamara, puttathamara, ramalo, sangrow, temburam, tempuram, tenpuram, upalkai, upligi, uppala, uppalige, uppaligi, uppalike, upparanthi, uppila, utthamerei, vatta, vatta-tamarai, vattakanni, vattakkennai, vattattamara, vattattamari, vattuttamarai, vettuttamarai

Macaranga peltata (Roxb.) Müll.Arg. (*Macaranga roxburghii* Wight; *Macaranga tomentosa* Wight; *Macaranga wightiana* Baill., nom. illeg.; *Mappa peltata* (Roxb.) Wight; *Osyris peltata* Roxb.; *Tanarius peltatus* (Roxb.) Kuntze; *Tanarius roxburghii* (Wight) Kuntze; *Tanarius roxburghii* Kuntze; *Tanarius tomentosus* Kuntze; *Tanarius tomentosus* (Wight) Kuntze)

Sikkim, India, Sri Lanka, Myanmar. Trees, suitable as pioneer in afforestation works, a reddish gum exudes from cut branches, base of petioles, young shoots and fruits

See *Revis. Gen. Pl.* 2: 619–620. 1891

(Used in Sidha. Leaves as a postpartum remedy. Leaves and bark decoction as a wash for sores. Bark to remove kidney stones; fresh stem bark extract as a lotion for cuts by iron tools. Young fruits crushed with coconut oil and the paste applied for setting up of the bones. Powdered gum made into a paste and applied for venereal sores and postnatal complaints.)

in India: batla chandrike, boddi, candakanne, chaandavada, chaandoda, chanda kanne, chandakala, chandakanne, chandvar, chenthakanni, chinthakanni, chootha kanne, godugu ganapa, jaatiyuppalige, jagi uppalige, jagiuppalige, jatiuppalige, kanchu praanthi, kanchupranthi, kanchupranti, kancupparanti, kanju pparaanthi, kenda, konda thaamara, kondajaaphara, kondajaphara, naratiya, oopalkai, pattavanni, peemoha, pimugam, pimukam, potuvanni, pulichinjalamu, pulichinsaku, pulicincalamu, tallipilla chettu, upaligi,

upalkai, upligi, uppalige, uppaligi, uppalika, upparanti, uppila, upranti, vatta, vattakanni, vattakkanni, vattakunni, vattathamarei, vattattamarai, vattattutti

Macaranga stipulosa Müll.Arg. (*Tanarius stipulosus* (Müll. Arg.) Kuntze; *Tanarius stipulosus* Kuntze)

Samoa.

See *Prodr.* (DC.) 15(2.2): 1001. 1866, *Revis. Gen. Pl.* 2: 619–620. 1891

(For skin diseases.)

Macaranga tanarius (L.) Müll.Arg. (*Croton laccifer* L.; *Croton lacciferus* Blanco; *Croton lacciferus* Wall.; *Macaranga molliuscula* Kurz; *Macaranga tanarius* Müll. Soc. Exch. Club Brit. Isles* 4: 634. 1916 [1917], *Enum. Philipp. Fl. Pl.* 2: 443. 1923

(Bark decoction taken to treat cough and dysentery. Leaves for swellings, bruises, wounds, boils and headaches; Roots of *Byttneria scabrida* together with the leaves of *Macaranga tanarius* boiled and the liquid drunk for blood dysentery, bleeding stool; a decoction for blood in stool. Root infusion in fever; powdered root emetic, febrifuge.)

in English: blush macaranga, hairy mahang, heart leaf

in Borneo: menanya

in India: alle, ongtej

Malayan names: inchong, jebat musang, kundoh, tampu, tampu hitam, tampu puteh

in Papua New Guinea: hikumutu, hunuan, pipiu, wageva, yalufura

in Philippines: binunga

***Macaranga thompsonii* Merr.**

Pacific, Marianas.

See *Philipp. J. Sci.*, C 9: 102. 1914

(Irritant.)

in Guam: pengua

***Macaranga triloba* Müll.Arg.** (*Macaranga cornuta* Müll. Arg.; *Macaranga quadricornis* Ridl.; *Pachystemon trilobus* (Thunb.) Blume; *Ricinus trilobus* Thunb.; *Ricinus trilobus* Reinw. ex Blume, nom. nud.; *Tanarius cornutus* (Müll.Arg.) Kuntze; *Tanarius trilobus* (Thunb.) Kuntze)

Myanmar, Malaysia. Small tree, peltate leaves, flowers in panicles, male flowers white

See *Catalogus* 108. 1823, *Prodr.* 15(2): 988–989. 1866, *Revis. Gen. Pl.* 2: 619. 1891 and *Bull. Misc. Inform. Kew* 1923: 367. 1923

(Leaves and fruits decoction given in stomachache, and also applied as a poultice for a boil on the head.)

Malayan names: landas bukit, mahang, mahang serindit, mahang tekukor

Macfadyena A. DC. Bignoniaceae

Named for the Scottish botanist Dr. James Macfadyen, 1798 (or 1800)–1850 (in Jamaica), physician, M.D. Glasgow 1821–1822, from 1826 in Jamaica, 1838 Fellow of the Linnean Society, author of the incomplete *Flora of Jamaica*. London, Edinburgh, Glasgow 1837. See A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 361. Ansbach 1852 and Ignatz Urban, ed., *Symbolae Antillanae*. 1904, E.M. Tucker, *Catalogue of the Library of the Arnold Arboretum of Harvard University*. 1917–1933, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 204. Oxford 1964, J.H. (Antiinflammatory, antimalarial and antivenereal; antitumoral and antitrypanosomal activities, anti-lipoxygenase and anti-cyclooxygenase, moderate cytotoxic activity against lung cell line. To treat snakebite, dysentery, inflammation and rheumatism, a quinine substitute for malaria. Roots infusion for oliguria.)

in English: cat's claw, cat's claw climber, cat's claw creeper, cat's claw trumpet, cat's-claw vine, funnel creeper

Machaeranthera Nees Asteraceae

From the Greek *machaira* 'a dagger, a short sword' and *anthera* 'anther', see *A Sketch of the Botany of South-Carolina and Georgia* 2(4): 333–339. 1824[1823], *Genera et Species Asterearum* 13, 224–225. 1832, *Transactions of the American Philosophical Society*, new series, 7: 300–302. 1840, *Genera Plantarum* 2(1): 272. 1873, *Notes on Some Compositae* 99. 1880 and *Wrightia* 4(1): 12. 1968, *Phytologia* 62: 207–266. 1987.

***Machaeranthera tanacetifolia* (Kunth) Nees** (*Aster chrysanthemoides* Willd. ex Spreng.; *Aster pinnatifidus* Sessé & Moc., nom. illegit.; *Aster tanacetifolius* Kunth; *Chrysopsis coronopifolia* Nutt.; *Dieteria coronopifolia* (Nutt.)

Nutt.; *Machaeranthera coronopifolia* (Nutt.) A. Nelson; *Machaeranthera parthenium* Greene)

North America.

See *Species Plantarum* 2: 872–877. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 74–75. 1820[1818], *Systema Vegetabilium*, editio decima sexta 3: 538. 1826, *Journal of the Academy of Natural Sciences of Philadelphia* 7(1): 34–35. 1834, *Transactions of the American Philosophical Society*, new series, 7: 302. 1840, *Flora Mexicana* 187. 1894, *Pittonia* 4(21B): 99. 1899 and *Botanical Gazette* 37(4): 268. 1904

(Decoction of plant strong stimulant, stomachic, taken by parturient women, taken for stomachache.)

in English: Tahoka daisy, tanseyleaf aster, tanseyleaf tansyaster

Machilus Rumph. ex Nees Lauraceae

From a Moluccan name, or from *Machilis*, a name of an insect, see *Plantae Asiaticae Rariores* 2: 61, 70. 1831 and *Acta Phytotaxonomica Sinica* 17(2): 45–50, 53–55. 1979.

Machilus gamblei King ex Hook. f. (*Machilus bombycina* King ex Hook. f.; *Machilus suaveolens* S.K. Lee; *Persea bombycina* (King ex Hook. f.) Kosterm.; *Persea gamblei* (King ex Hook. f.) Kosterm.; *Persea suaveolens* (S.K. Lee) Kosterm.)

India, Himalaya. Tree, warty bark, coriaceous leaves, flowers in panicles, globose fruits

See *The Flora of British India* [J.D. Hooker] 5(13): 138. 1886, *The Flora of British India* 5(16): 861. 1890 and *Reinwardtia* 6(2): 191–192. 1962, *Acta Phytotaxonomica Sinica* 8(3): 187. 1963, *Acta Phytotaxonomica Sinica* 17(2): 50. 1979, *Annals of the Missouri Botanical Garden* 77(3): 547. 1990

(Bark useful in asthma. Leaves of *Achyranthes aspera* crushed with leaves and roots of *Machilus bombycina* and the juice is applied on pimples. Magic, ritual, flowers of *Elaeagnus latifolia* with roots of *Lasia spinosa* and *Machilus bombycina* pounded and made into pills used against sorceries.)

in China: huang xin shu

in India: artu-cheknan

Machilus glaucescens (Nees) Wight (*Laurus villosa* Roxb.; *Machilus glaucescens* (Nees) H.W. Li; *Machilus glaucescens* Wight; *Machilus villosa* Hook.f.; *Machilus villosa* (Roxb.) Hook. f., nom. superfl.; *Ocotea glaucescens* Nees; *Persea glaucescens* (Nees) D.G. Long; *Persea villosa* (Roxb.) Kosterm.; *Phoebe glaucescens* Nees; *Phoebe glaucescens* (Nees) Nees; *Phoebe villosa* (Roxb.) Wight)

India, Himalaya.

See *Hort. Bengal.* 89. 1814, *Plantae Asiaticae Rariores* (Wallich). 2: 71. 1831, *Flora Indica*; or, descriptions of Indian Plants 2: 310–311. 1832, *Systema Laurinarum* 100. 1836,

Icones Plantarum Indiae Orientalis [Wight] 5(2): 11–12. 1852, *The Flora of British India* [J.D. Hooker] 5(13): 140. 1886 and *Reinwardtia* 6(2): 194. 1962, *Notes from the Royal Botanic Garden, Edinburgh* 41(3): 521. 1984, *Acta Botanica Yunnanica* 10(4): 490. 1988

(Leaf juice drunk to kill intestinal worms.)

in China: rou mao run nan

in India: terang

Machilus macrantha Nees (*Persea gratissima* Gaert.; *Persea macrantha* (Nees) Kosterm.)

Vietnam. Tree, a watery sap exudes from tree, flowers yellow-cream, a source of gum, incense-sticks, galls present on leaf, birds eat fruits, squirrels eat bark, bees forage on flower

See *The Gardeners Dictionary ... Abridged ... fourth edition* [1030]. 1754, *Plantae Asiaticae Rariores* 2: 70. 1831 and *Reinwardtia* 6(2): 193. 1962, *Indian Journal of Pharmaceutical Sciences* 65(5): 532–534. 2004

(Bark antiinflammatory, hypotensive, antiasthmatic, anti-rheumatic, purgative, bark ground into fine powder, a decoction made with honey and taken to treat asthma and rheumatism; leaves used externally to treat ulcer.)

in English: avocado fruit

in China: run nan shu

in India: gulamavu, gulmavu, kallamavu, kolamavu, kulamavu, kulur

in Sri Lanka: ululu

Machilus yunnanensis Lecomte var. *yunnanensis* (*Machilus bracteata* Lecomte; *Machilus ichangensis* Rehder & E.H. Wilson var. *synechothrix* Hand.-Mazz.; *Machilus longipedicellata* Lecomte; *Machilus longipedicellata* var. *synechothrix* (Hand.-Mazz.) Hand.-Mazz.; *Machilus yunnanensis* var. *duclouxii* Lecomte; *Persea longipedicellata* (Lecomte) Kosterm.; *Persea yunnanensis* (Lecomte) Kosterm.)

China.

See *Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften, Mathematisch-Naturwissenschaftlichen Classe, Abteilung 1* 62: 218. 1880 and *Nouvelles archives du Muséum d'Histoire Naturelle* 5: 100–101. 1913, *Pl. Wilson*. (Sargent) 2(3): 621. 1916, *Symbolae Sinicae* 7(2): 253. 1931, *Reinwardtia* 6(2): 193–194. 1962

(Mystical power.)

in China: dian run nan

Mackenzia Nees & Bremek. Acanthaceae

Mackenzia integrifolia (Dalz.) Bremek. (*Endopogon integrifolius* Bremek.; *Strobilanthes integrifolia* Kuntze; *Strobilanthes perfoliatus* T. Anderson)

India. Perennial, many-branched shrub, herb, viscid, lance-like leaves, blue funnel shaped flowers in spikes in leaf axils or at the end of branches, the flower spikes have a strong smell

See *American monthly magazine and critical review* 3: 101. 1818, *Plantae Asiaticae Rariores* 3: 76, 98. 1832, *Flora Telluriana* 2: 54. 1836 [1837], *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 308. 1847 and Behl, P.N. and Captain, R.M. *Skin-Irritant and Sensitizing Plants Found in India*. New Delhi. 1979

(This species may cause painful itching, swelling and blistering when handled.)

in English: cone head, strobilanthes

in India: wayti

Macleania Hooker Ericaceae

Dedicated to John Maclean, 1832–1854 Peru, plant collector, merchant and patron of botany, sent specimens to W.J. Hooker and W. Herbert; see *Icones Plantarum* 2: t. 109. 1837, *Linnaea* 24: 14, 21. 1851 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 130. Berlin & Hamburg 1989, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 457. London 1994, *BioLlania* (Edición Especial) 6: 459. 1997.

Macleania coccoloboides A.C. Smith

South America.

See *Memoirs of the New York Botanical Garden* 8(1): 69. 1952, *J. Agric. Food Chem.* 59(7): 3020–3026. 2011

(Antioxidant.)

Macleaya R. Br. Papaveraceae

After the Scottish scientist Alexander Macleay (McLeay), 1767–1848 (d. Sydney, N.S.W.), entomologist, established the McLeay Collection, 1794 Fellow of the Linnean Society and in 1809 of the Royal Society, 1798–1825 Secretary of the Linnean Society, arrived at Sydney in January 1826, Colonial Secretary N.S.W., first Speaker of the first representative Assembly of the Colony, father of seventeen children. See John Blackman, *A Catalogue of an Extensive and Valuable Library ... of Alexander McLeay, Esq., M.C.*, who is removing to the country; Which will be sold by auction ... on Tuesday, 1st, Wednesday, 2nd, Thursday, 3rd, and Friday, 4th Days of Aprile. Sydney [1846], G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 546. 1852 and Hutchinson, J. “*Bocconia* and *Macleaya*.” *Bull. Misc. Inform. Kew* 1920: 275–282. 1920, A.T. Gage, *A History of the Linnean Society of London*. London 1938, Douglas Pike, ed., *Australian Dictionary of Biography*. 2: 177–180. Melbourne 1967, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 130. Berlin & Hamburg 1989, *Fl. China* 7: 1–499. 2008.

Macleaya cordata (Willdenow) R. Brown (*Bocconia cordata* Willdenow; *Macleaya cordata* var. *yedoensis* (André) Fedde; *Macleaya yedoensis* André)

China, Japan.

See *Species Plantarum* 2(2): 841. 1799, *Narr. Travels Africa*. app. 218. 1826, *Revue Horticole* 38: 369. 1866 and *Das Pflanzenreich* 217. 1909

(The sap an antiseptic for wounds, to treat insect bites.)

in English: plume-poppy, tree-celandine

in China: bo luo hui, po lo hui

Maclura Nutt. Moraceae

After the Scottish-born (b. Ayr) North American geologist William Maclure, 1763–1840 (d. Mexico), agriculturist, traveller, merchant, 1782 to USA, 1815 met in Paris the naturalist-engraver Charles Alexandre Lesueur (1778–1846), 1817–1818 expedition to Spanish Florida and the Sea Islands of Georgia with Lesueur, the naturalist and entomologist Thomas Say (1787–1834), the naturalist Titian Ramsay Peale (1799–1885) and George Ord, 1820–1824 in Spain, supported the ideas on evolution offered by Lamarck. See George Ord, “A Memoir of Charles Alexandre Lesueur.” in *American Journal of Science*. 2nd ser. 8: 189–216. 1849; G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 546. 1852; National Library of Wales, *A Bibliography of Robert Owen, The Socialist 1771–1858*. Second edition, revised and enlarged. Aberystwyth 1925; Thomas Nuttall, *The Genera of North American Plants, and Catalogue of the Species, to the Year 1817*. 2: 233. Philadelphia 1818; S.G. Morton, *A Memoir of William Maclure, Esq.* Philadelphia 1841; George W. White, in *D.S.B.* 8: 615–617. 1981; R.W.G. Vail, *The American Sketchbooks of Charles Alexander Lesueur 1816–1837*. Worcester 1938; H.B. Weiss and G.M. Zeigler, *Thomas Say, Early American Naturalist*. Springfield-Baltimore 1931; Clifford Merrill Drury, *Diary of Titian Ramsay Peale*. Los Angeles 1957.

Maclura amboinensis Blume (*Cudrania amboinensis* (Blume) Miq.; *Cudrania grandifolia* Merr.; *Cudrania jingdongensis* S.S. Chang)

Thailand, Indonesia. Spiny shrub or climber, scrambling, axillary thorns, flower heads capitate, in lower montane forest

See *Museum Botanicum* 2: 84. 1856 and *Museum Botanicum Lugduno-Batavum* 2: 290. 1959

(Stem sap drunk to treat acute stomachache and vomiting of blood.)

in Papua New Guinea: pinambu

Maclura cochinchinensis (Lour.) Corner (*Cudrania cochinchinensis* (Lour.) Kudô; *Cudrania cochinchinensis* (Lour.) Kudô & Masam.; *Cudrania cochinchinensis* var. *gerontagea*)

(Cytotoxic.)

Macrolenes Naudin ex Miq. Melastomataceae

From the Greek *makros* ‘long’ and *olene* ‘an arm, the elbow, bundle’.

Macrolenes nemorosa (Jack) Bakh.f.

India.

See *Flora van Nederlandsch Indië* 1: 557. 1856

(Applied to burns.)

**Macrolobium Schreber Fabaceae
(Caesalpinaceae, Detarieae, Leguminosae)**

From the Greek *makros* ‘large, long’ and *lobos* ‘a lobe’, see *Histoire des plantes de la Guiane Française* 1: 25, 28–30, t. 9. 1775, *Genera Plantarum* 1: 30. 1789, *Systema Naturae* ... editio decima tertia, aucta, reformata 2: 93. 1791, *Revisio Generum Plantarum* 1: 212. 1891 and *Mem. New York Bot. Gard.* 8(4): 257–342. 1953, *Candollea* 37(1): 17–62. 1982.

Macrolobium acaciifolium (Benth.) Benth. (*Macrolobium acaciifolium* (Benth.) Benth. var. *vestitum* Sandwith; *Outea acaciifolia* Benth.; *Vouapa acaciaefolia* (Benth.) Kuntze; *Vouapa acaciaefolia* (Benth.) Baill.; *Vouapa acaciifolia* (Benth.) Baill.; *Vuapa acaciifolia* (Benth.) Kuntze)

South America. Perennial non-climbing tree, round fruits

See *Journal of Botany*, being a second series of the Botanical Miscellany 2(10): 94–95. 1840, *Flora Brasiliensis* (Martius) 15(2): 224. 1862 [Jan 1862], *Histoire des Plantes* (Baillon) 2(2): 109. 1870, *Revisio Generum Plantarum* 1: 213. 1891 and *Kew Bulletin* 3(2): 312. 1948

(Powdered leaves sprinkled on ulcerated wounds.)

Vernacular names: arapari, arapary, arepillo, arepito, faveira arapary, parapari, pashaquilla

Macrolobium multijugum (DC.) Benth. (*Macrolobium multijugum* Benth.; *Outea multijuga* DC.; *Vouapa multijuga* (DC.) Kuntze; *Vouapa multijuga* Kuntze; *Vouapa multijuga* Taub.; *Vouapa multijuga* (DC.) Taub.; *Vuapa multijuga* (DC.) Kuntze)

South America. Perennial non-climbing tree, spreading, dark red flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 510. 1825, *Flora Brasiliensis* (Martius) 15(2): 222. 1862, *Botanisches Centralblatt* 47: 393. 1891, *Revisio Generum Plantarum* 1: 213. 1891

(Reported the fruits are poisonous.)

Macromeria D. Don Boraginaceae

From the Greek *makros* ‘large’ and *meris* ‘part’, referring to the size of the flowers, see *Edinburgh New Philosophical Journal* 13: 239. 1832.

Macromeria viridiflora A. DC. var. *viridiflora* (*Lithospermum macromeria* J. Cohen; *Lithospermum viridiflorum* Roxb.)

North America. Perennial herb, see also *Lithospermum*

See *Flora Indica* or Descriptions of Indian plants. Vol 2 2: 4. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 68. 1846 and *Bot. Results Sessé & Moc. Exped.* 7: 98. 2000, *Brittonia* 61(2): 108. 2009

(Anticonvulsive. Ceremonial, ritual.)

in English: giant-trumpets

Macropanax Miq. Araliaceae

From the Greek *makros* ‘large, long’ plus the genus *Panax*, see *Flora van Nederlandsch Indië* 1(1): 763. 1856, *Bonplandia* (Hannover) 4: 139. 1856.

Macropanax rosthornii (Harms) C.Y. Wu ex G. Hoo (*Acanthopanax rosthornii* (Harms) R. Viguier; *Heptapleurum esquirolii* H. Lév.; *Nothopanax emeiensis* Z.Y. Zhu; *Nothopanax rosthornii* Harms)

China.

See *Bot. Jahrb. Syst.* 29: 487. 1900, *Acta Phytotax. Sin., Addit.* 1: 166. 1965

(Febrifuge.)

in China: duan geng da shen

Macropanax undulatus (Wall. ex G. Don) Seem. (*Hedera undulata* Wall. ex G. Don; *Macropanax parviflorus* C. Ho; *Paratropia undulata* (Wall. ex G. Don) K. Koch)

Nepal, China.

See *A General History of the Dichlamydeous Plants* 3: 394. 1834, *Wochenschrift für Gärtnerei und Pflanzenkunde* 2: 365. 1859, *Journal of Botany, British and Foreign* 2(22): 294. 1864 and *Acta Phytotaxonomica Sinica, Additamentum* 1: 165. 1965

(Leaf paste applied in rheumatism and gout.)

in China: bo yuan da shen

in India: toyasen

Macropiper Miq. Piperaceae

From the Greek *makros* ‘large, long’ and the genus *Piper* L.; see F.A.W. Miquel, *Bulletin des Sciences Physiques et Naturelles en Néerlande*. 1839: 447, 449. Rotterdam 1839 and *Bot. J. Linn. Soc.* 71: 3. 1975.

Macropiper excelsum Miq. (*Macropiper excelsum* (G. Forst.) Miq.)

New Zealand. Tree, heart-shaped leaves, succulent orange-yellow fruits edible

See *Syst. Piperac.* (F.A.W. Miquel) 221. 1843–1844

(Leaves decoction drunk for stomachache and boils; a poultice applied for toothache, rheumatism; raw leaves chewed for toothache, abdominal pains, overeating. Juice from boiled leaves and twigs drunk for kidney and bladder complaints.)

in English: pepper tree

Maori name: kawakawa

Macropiper puberulum Benth. (*Chavica puberula* Benth.; *Macropiper puberulum* Seem., nom. illeg., non *Macropiper puberulum* Benth.; *Piper glabrum* Mill.; *Piper macgillivrayi* C. DC. ex Seem.; *Piper macgillivrayi* var. *glabrum* C. DC.; *Piper puberulum* (Benth.) Maxim.; *Piper puberulum* Seem.; *Piper puberulum* var. *glabrum* (C. DC.) A.C. Sm.)

Pacific.

See *Species Plantarum* 1: 28–30. 1753, *Comment. Phytogr.* 32, 35. 16–21 Mar 1840, *Bull. Sci. Phys. Nat. Néerl.* 1839: 447, 449. J. Linn. Soc.* 71: 3. 18 Nov 1975

(Rubefacient.)

Samoan name: 'ava'ava aitu

Macroptilium (Benth.) Urban Fabaceae (Phaseoleae)

From the Greek *makros* 'long' and *ptilon* 'feather, wing'; see Ignatz Urban, ed., *Symbolae Antillanae*. 9: 457. Berlin 1928, *Boissiera*. 28: 1–273. 1978, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 2: 1–481. 1988, *Flora of the Lesser Antilles, Leeward and Windward Islands (Dicotyledoneae--Part 1)* 4: 334–538. 1988.

Macroptilium atropurpureum (DC.) Urb. (*Macroptilium atropurpureum* (Sessé & Moc. ex DC.) Urb.; *Macroptilium ecuadoriense* (Sessé & Moc. ex DC.) L. Torres-Colin & A. Delgado; *Macroptilium lathyroides* (L.) Urb.; *Macroptilium lathyroides* var. *semierectum* (L.) Urb.; *Phaseolus affinis* Piper; *Phaseolus atropurpureus* DC.; *Phaseolus atropurpureus* Sessé & Moc. ex DC.; *Phaseolus atropurpureus* var. *canescens* (M. Martens & Galeotti) Hassl.; *Phaseolus atropurpureus* var. *ecuadoriensis* Hassl.; *Phaseolus atropurpureus* var. *pseuderythroloma* Hassl.; *Phaseolus atropurpureus* var. *vestitus* (Hook.) Hassl.; *Phaseolus canescens* M. Martens & Galeotti; *Phaseolus dysophyllus* Benth.; *Phaseolus lathyroides* L.; *Phaseolus lathyroides* var. *semierectus* (L.) Hassl.; *Phaseolus schiedeanus* Schldtl.; *Phaseolus semierectus* L.; *Phaseolus semierectus* var. *atropurpureus* (Sessé & Moc. ex DC.) Gomez; *Phaseolus vestitus* Hook.)

South America. Perennial non-climbing herb

See *Species Plantarum* 2: 723–725. 1753, *Species Plantarum*, Editio Secunda 2: 1018. 1763, *Systema Naturae*, ed. 12 2: 461. 1767, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 395. 1825, *Botanical Miscellany* 2: 216. 1831, *Commentationes de Leguminosarum Generibus* 76. 1837, *Linnaea* 12: 323. 1838, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 196. 1843, *Plantas Hartwegianas imprimis Mexicanas* 287. 1848, *Anales Hist. Nat.* 23: 295. 1894 and *Candollea* 1: 447, 457–458. 1923, *Contributions from the United States National Herbarium* 22(9): 682. 1926, *Symbolae Antillarum* 9(4): 457. 1928, *Phytologia* 25(5): 265–280. 1973, *Proceedings of the Indian Science Congress Association* 70(3-VI): 84–85. 1983, *Cuscatlania* 1(2): 1–16. 1989, *Novon* 14(4): 425–426. 2004

(Analgesic.)

in English: purple bean

in Latin America: conchito, sirato, siratro

Macroptilium bracteatum (Nees & C. Mart.) Maréchal & Baudet (*Phaseolus bracteatus* Nees & C. Mart.; *Phaseolus bracteatus* fo. *panduriformis* Hassl.; *Phaseolus bracteatus* fo. *rhomboidalis* Hassl.; *Phaseolus decipiens* Salzm. ex Benth.)

South America. Perennial climbing herb

See *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 12: 27. 1824 and *Bulletin du Jardin Botanique National de Belgique* 44(3–4): 443. 1974

(A sterilizer, a decoction of roots for regulating fertility.)

Macrosolen (Blume) Reichb. Lorantheaceae

From the Greek *makros* 'large, long, big' and *solen* 'a channel, furrow', see *Systema Vegetabilium* 7: 1731. 1830, *Flora Javae* 16. 1830, *Deut. Bot. Herb.-Buch* 73. July 1841.

Macrosolen cochinchinensis (Loureiro) Tieghem (*Elytranthe ampullacea* (Roxburgh) G. Don; *Elytranthe ampullacea* var. *tonkinensis* Lecomte; *Elytranthe cochinchinensis* (Loureiro) G. Don; *Elytranthe cochinchinensis* var. *tonkinensis* (Lecomte) H.L. Li; *Elytranthe fordii* (Hance) Merrill; *Loranthus ampullaceus* Roxburgh; *Loranthus brunneus* fo. *thonneri* (Engl.) Balle; *Loranthus brunneus* var. *thonneri* (Engl.) Sprague; *Loranthus cochinchinensis* Loureiro; *Loranthus fordii* Hance; *Loranthus thonneri* Engl.; *Macrosolen fordii* (Hance) Danser; *Tristerix viridiflorus* Mart.)

SE Asia.

See *Fl. Cochinch.* 1: 195. 1790, *Flora Indica*; or descriptions of Indian Plants 2: 209–210. 1824, *Flora* 13: 109. 1830., *A General History of the Dichlamydeous Plants* 3: 426. 1834, *Journal of Botany, British and Foreign* 23(266): 38–39. 1885, *Bull. Soc. Bot. France.* 41: 122. 1894 and *Notulae*

Systematicae. Herbarium du Muséum de Paris 3: 99. 1915, *Philippine Journal of Science* 15(3): 234. 1919 (1920)

(Blood purifier, for headache.)

in China: qiao hua

Macrosphyra Hook.f. Rubiaceae

From the Greek *makros* 'large, long, big' and *sphyra* 'a hammer', alluding to the style.

Macrosphyra longistyla (DC.) Hiern (*Gardenia longistyla* (DC.) Hook.; *Gardenia paleacea* A. Rich.; *Macrosphyra paleacea* (A. Rich.) K. Schum.; *Oxyanthus villosus* G. Don; *Randia longistyla* DC.; *Solena longistyla* (DC.) D. Dietr.)

W. Trop. Africa to Ethiopia.

See *Genera Plantarum* 2: 86. 1873, *Fl. Trop. Afr.* 3: 106. 1877, *Nat. Pflanzenfam.* 4(4): 77. 1891

(For boils, burns.)

in Yoruba: ikuuku ekun, opataba

Macrotomia DC. ex Meissner Boraginaceae

From the Greek *makros* 'large' and *tomos*, *temno* 'division, section, to slice', *makrotomos*, referring to the segments of the calyx, see *Flora Aegyptiaco-Arabica* 62. 1775, *Pl. Vasc. Gen.* [Meisner] 2: 190. 1840.

Macrotomia benthamii (Wall. ex G. Don) A. DC. (*Arnebia benthamii* (Wall. ex G. Don) I.M. Johnston.; *Echium benthamii* Wall.; *Echium benthamii* Wall. ex G. Don; *Lithospermum benthamii* (Wall. ex G. Don) I.M. Johnston.; *Macrotomia benthamii* Boiss.; *Macrotomia benthamii* DC. ex Meisn.)

Himalayas, Pakistan, Nepal. Erect herbaceous perennial, hispid, purplish brown flowers, see also *Arnebia benthamii*

See *Numer. List* [Wallich] n. 931. 1829, *A General History of the Dichlamydeous Plants* 4: 333. 1837, *Pl. Vasc. Gen.* [Meisner] 2: 190. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 27. 1846, *Fl. Orient.* [Boissier] Suppl. 352 [Macrotomia]. 1888 and *Journal of the Arnold Arboretum* 33: 333. 1952, *Journal of the Arnold Arboretum* 35: 56. 1954

(Used in Ayurveda and Unani. Root paste mildly warmed and applied to forehead for relieving headache and fever, also to wounds and burns; roots for asthma, rheumatic pains and snakebite. Cardiac and febrifuge, flowering shoots used in preparation of sherbet (syrup) and jam useful in various diseases of tongue, throat, fever and cardiac disorders. A major ingredient of the commercial drug available under the name *Gaozaban*, which has antibacterial, antifungal, stimulant, tonic, diuretic, expectorant, antiinflammatory and wound-healing properties.)

in India: balchhari, balchhadi, balsamjari, gaozaban, gauzaban, gojihva, kahzaban, khome, laijari, laldori, laljari, ratan jot, ratanjor, ratanjot, rattanjot

Macrotyloma (Wight & Arnott) Verdcourt Fabaceae (Phaseoleae)

Greek *makros* 'large', *tylos* 'knob, swelling' and *loma* 'border, margin'; see *Prodromus Florae Peninsulae Indiae Orientalis* 248. 1834, *The Flora of British India* 2(4): 210. 1876 and B. Verdcourt, in *Kew Bulletin* 24(2): 322. 1970, *Hooker's Icones Plantarum* 38(4): 1–138. 1982.

Macrotyloma geocarpum (Harms) Maréchal & Baudet (*Kerstingiella geocarpa* Harms)

Tropical Africa. Annual non-climbing herb, prostrate rooting stems, edible seeds

See *Berichte der Deutschen Botanischen Gesellschaft* 26A: 230, pl. 3. 1908, *Kew Bulletin* 16: 395–407. 1963, *Bulletin du Jardin Botanique National de Belgique* 47(1–2): 50–51. 1977, *Economic Botany* 34(4): 358–361. 1980, *Chromosome Inf. Serv.* 30: 1–2. 1981, *Journal d'Agriculture Traditionnelle et de Botanique Appliquée*, nouvelle série, 37(1): 187–199. 1995, *Ghana Journal of Science* 31–36: 67–71. 1997, *Biochemical Systematics and Ecology* 30: 943–952. 2002

(Plant in the treatment of dysentery, venereal diseases, fever and diabetes. Fruits, seeds and leaves for fevers, dysentery, diarrhea, dysentery, venereal diseases, leaves decoction vermifuge; water in which the seeds have been boiled taken against diarrhea. Seeds antidote, emetic, in case of poisoning. Ceremonial, ritual.)

in English: geocarpa groundnut, ground bean, Kersting's groundnut

in Benin: dohi

Macrotyloma uniflorum (Lam.) Verdc. (*Dolichos benadirianus* Chiov.; *Dolichos biflorus* sensu auct.; *Dolichos uniflorus* Lam.; *Kerstingiella uniflora* (Lam.) Lackey; *Macrotyloma uniflorum* Verdc.)

SE Asia, India. Perennial non-climbing herb, twiner, hairy, petal standard creamy yellow, wing creamy yellow, keel creamy yellow, stem and leaves fodder for cattle

See *Encyclopédie Méthodique, Botanique* 2(1): 299–300. 1786 and *Berichte der Deutschen Botanischen Gesellschaft* 26a: 230. 1908, *An Enumeration of Philippine Flowering Plants* 2 (3): 241–323. 1923, *Kew Bulletin* 24(2): 379–447. 1970, *Phytologia* 38(4): 229. 1978, *Amer. J. Bot.* 67: 595–602. 1980, *J. Econ. Taxon. Bot.* 7: 249–276. 1985

(Used in Ayurveda and Sidha. Aerial parts diuretic. Threshed material to check stored foodgrain pests. Seeds decoction used in kidney trouble and for the removal of kidney stones; crushed seeds placed on affected tooth for treating toothache. Veterinary medicine, seeds given to increase lactation.)

in English: horse gram, Madras gram

in China: ying pi dou

in India: akkamini, amalaikkanni, ampuppiracikacceti, ampuppiracikam, ankucapicari, ankucapikari, ankucavi, cakkarakam, cakkirikam, cattikkalpam, catturuvacam, cen-kollu, cikkalinnam, ciruvittuceti, ciruvitu, gaheth, gauth, hulga, huruli, kacarakam, kaccakacceti, kaccakam, kaccakar, kalinai, kalinaicceti, kanacceti, kanam, kanappayaru, kau, kol, kollan, kollu, kolluppayarrinkoti, kolluppuntu, kulantam, kulat, kulath, kulatha, kulaththa, kulith, kulutam, kulathah, kulthi, kultthi, kurthi, mutira, napilam, pancittam, paruni, peruvitukolu, peruvitukol, porkacikacceti, porkacikam, porkacu, tamirapalakam, tamirapicam, tamiraviruntam, terru, tirakkitappayaru, uauth, ulavalu, uruvullu, vayuvutal

in Nepal: gahat

Macrozamia Miq. Cycadaceae (Zamiaceae)

Greek *makros* and the genus *Zamia* L.; see Miquel, Friedrich Anton Wilhelm (1811–1871), *Monographia Cycadearum* 35–36, t. 4, 5. Trajecti ad Rhenum: Apud Robertum Natan, 1842 and James A. Baines, *Australian Plant Genera*. 228–229. Chipping Norton, N.S.W. 1981, *Mem. New York Bot. Gard.* 57: 200–206. 1990. Cattle develop a form of paralysis from eating the fronds.

Macrozamia communis L.A.S. Johnson

Australia.

See *Proceedings of the Linnean Society of New South Wales* 84: 98. 1959

(Poisonous.)

in English: common zamia, zamia

in Australia: burrawang, burrawang palm

Macrozamia douglasii W. Hill ex F.M. Bailey (*Macrozamia douglasii* F.M. Bailey; *Macrozamia douglasii* W. Hill ex F. Muell.)

Australia.

See *Syst. Census Austral. Pl.* 110. 1882, *A Synopsis of the Queensland Flora* 500. 1883

(Zamia staggers in stock.)

(Powdered bark sternutatory. Bark and leaves for stomach-ache of children. Latex applied to the abdomen as vermifuge.)

Madhuca hainanensis Chun & F.C. How

China. Tree, corolla white, nodding axillary flowers

See *Acta Phytotax. Sin.* 7(1): 71–72, pl. 22, f. 2. 1958

(For diabetes.)

in English: Hainan madhuca

in China: hai nan zi jing mu

Madhuca indica J.F. Gmel. (*Bassia latifolia* Roxb.; *Madhuca latifolia* (Roxb.) J.F. Macbr.; *Madhuca latifolia* Macbr.)

India. Tree, flowers and ripe fruit pulp eaten, ripe fruits eaten fresh, unripe fruits cooked as vegetable, flowers eaten in a preparation

See *Systema Naturae* ... editio decima tertia, aucta, reformata 799. 1791, *Plants of the Coast of Coromandel* 1: 20. 1795 and *Contributions from the Gray Herbarium of Harvard University* 53: 18. 1918, *Quarterly Journal of the Mythic Society* 54: 73–94. 1963

(Used in Ayurveda and Sidha. Bark juice irritant, rubefacient; wood irritant. For snakebite, seed decoction drunk; oil from the seeds mosquito repellent, locally applied in ringworm, a massage for women after delivery, massage in cold; seed cake burnt in homes to repel snakes and insects. Veterinary medicine, stem bark along with that of *Bridelia montana*, *Dalbergia latifolia* and *Oroxylum indicum* crushed and the extract given for dysentery in cattle. Seeds as fish poison. Sacred plant, magico-religious beliefs, ceremonial.)

in India: arkara, doddippe, garamg, goodupushpa, guda-puspa, haalippe, hunige, hunipe, idukmara, idum, ieluppai, ippa, irucuvam, iruttiyacam, kaadu hippe, kattiluppai, kattiruppai, koindi, kucumam, kurumam, kutaputpam, lodhra-puspa, madhuka, mahua, mahuro, mahuva, mahuwa, mahva, malaiyiluppai, mantalatti, matkom, mauo, mauro, mawda, moda, moha, mohua, mowa, muali, muwa, muwal, palantaciyam, palantaciyamaram, petatikam, petatikamaram, peyiluppai, pirankini, puvana, sonerdarakale, tirkkapattirakam, tirkkapattiram, troa, vippa

in Tibetan: sin tog ma dhu ka, sin tog ma du ka

Madhuca longifolia (J. König ex L.) J.F. Macbr. (*Bassia longifolia* J. König ex L.; *Bassia longifolia* L.; *Madhuca longifolia* Macbr.; *Vidoricum longifolium* (J. König ex L.) Kuntze; *Vidoricum longifolium* Kuntze)

Nepal, India, Sri Lanka. Tree, milky latex, leaves lanceolate, yellowish flowers, globose young fruit densely hirsute

See *Mantissa Plantarum* 2(App.): 563. 1771, *Plants of the Coast of Coromandel* 1: 20. 1795, *Revisio Generum Plantarum* 2: 407. 1891 and *Revue Générale de Botanique* 20: 455. 1907, *Contributions from the Gray Herbarium of Harvard University* 53: 17–18. 1918, *Rep. Bot. Appl.* 23: 149. 1943

(Used in Sidha. *Madhuca longifolia* and *Ficus racemosa*, stem bark and latex, powder of stem bark mixed with the latex of *Ficus racemosa* and the drug given for respiratory diseases. Bark useful in the treatment of rheumatism, ulcers, itches, bleeding and spongy gums, leprosy and diabetes; powdered bark along with the powdered fruits of *Terminalia chebula*, coriander and sugar is given in fevers. Latex astringent, stimulant, emollient, demulcent, nutritive, for ulcers, itch, rheumatism, bleeding and spongy gums, tonsillitis. Flowers cooling, aphrodisiac, galactagogue, expectorant, carminative; flower juice warmed and given to cure scorpion sting. Fruit used for bronchitis and diseases of the blood. Seeds galactagogue; the smoke of the seed cake useful to drive out snakes. Leaves smoke repels mosquito and household pests and stem borer pest in rice. Veterinary medicine, crushed bark mixed with that of *Soymida febrifuga* applied on sprained parts of cattle; latex as a stomachic for horses. Ceremonial, rituals, festivals, religious belief, religion and magico-religious beliefs, whole plant. Stem bark and oil cake for killing fishes.)

in English: mahua butter tree, mowra butter tree, south Indian mahua

in India: alimakam, alimpakam, atinilam, attiram, avituruman, calaputpam, cankulikam, caram, caratipam, celvilivanci, centarukam, ceyilakam, ceyilam, ceyili, cuvatu, elloopie, ellupi, eloopai, elooppei puttay, elupa, hippe, huli, illupeyi, ilupa, iluppai, ippa, ippe, ippi, irippa, irumpai, iruppai, katiccepakam, katiccepakamaram, kulicam, kulikkam, kulircci, kulivam, kutampam, kutampamaram, kutappaimaram, kutappam, kutaputpam, kutavalappam, kutaviluppam, kutaviluppamaram, kutuvitippalam, kuvikam, kuvikamaram, madgi, madhuk, madhuka (madhu, sweet), mahua, mahuda, mahudo, mahul, mahula, mahuwa, mahwa maturakam kulikam, mancilporuttam, matakam, matavam, matkom, matucatturumam, matukam, matukamaram, matukantam, maturakam, matutturu, matutturumam, matutturumaram, maul, mauwa, mavakam, moa, moha, mohua, mohuva, mohwa, mohwra, mowa, nattiluppai, omai, oralayintam, pani, pinna, pinnaippa, pinnayippa, poonam, sannaippa, sannaippi, sannayippa, sannayippe, tenmaram, ticcanakantakam, titcanacaram, titcanacaramaram, titcanakam, titcanakamaram, tittanacaram, tittanacaramaram, tittanam, titti, tittinam, tola, tolamaram, tolar, tuttilam, ukkirakantamaram, uli, vakkattamuli, vanappiratitam, vanappiratitamaram, vanappirattam, voooroippa

in Nepal: mahuwa

Madhuca longifolia (J. König ex L.) J.F. Macbr. var. *latifolia* (Roxb.) A. Chev. (*Bassia latifolia* Roxb.; *Illipe latifolia* (Roxb.) F. Muell.; *Illipe latifolia* F. South Africa.

See *Flora Aegyptiaco-Arabica* 104. 1775, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 243. 1824, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 6 (1891) 234. 1891, *Consp. Fl. Afr.* [T.A. Durand & H. Schinz] 1(2): 168. 1898

(Roots for toothache.)

in English: Christmas flower, common bush-cherry, white-wood

in Southern Africa: gewone witbos, witbas, without, without-boom, wildebashout, lemoentjie, witboshout, witboom, witgatboom; unTswantwsane (Zulu); umPhunzisa (Xhosa)

Maerua crassifolia Forssk. (*Maerua hirtella* Chiov.; *Maerua meyeri-johannis* Gilg; *Maerua rigida* R. Br.; *Maerua trichocarpa* Gilg & Gilg-Ben.; *Maerua uguenensis* Gilg; *Maerua uniflora* Vahl)

Nigeria.

See *Flora Aegyptiaco-Arabica* 104. 1775 and *Taxon* 588. 1992

in Arabic: maeru, meru, sarah, sarh, sarha, sarkh

in Nigeria: gazare, ngizari, jiga, sarah

in Sahara: atil

Maerua cylindrocarpa Hadj-Moust. (*Maerua arenaria* sensu Baillon)

Madagascar.

See *Flora Aegyptiaco-Arabica* 104. 1775 and *Bulletin de la Société Botanique de France* 103: 473. 1956, *Flore de Madagascar et des Comores* 83: 1–68. 1965

(Roots a strong purgative.)

Maerua decumbens (Brongn.) DeWolf

Tanzania. Shrub, many-branched, stiff, ascending, or a woody herb with a perennial woody rootstock, flowers white yellow-green, capsule yellow-orange with a pointed beak, sweet ripe yellow fruits eaten fresh, camel and goat fodder, flocculating, wooded grassland, in dry bushland and open areas in riverine vegetation, in deciduous or semi-evergreen bushland

See *Kew Bull.* xix. 62. 1964

(The plant known to be toxic, roots a strong purgative. Leaves pounded and the juice drunk to treat allergy; leaves and flowers boiled in a little water and the mixture applied in a poultice and bandaged firmly on sore joints. Roots and bark soaked in warm water and the liquid drunk for treatment of venereal diseases; roots boiled and mixed with broth for health and strength. Leaves used as fish poison. Root bark chewed by women when pregnant because of its sweet taste.)

in Kenya: abarmog, abiro, agarnyaab, amoyo, bariyub, chebillio, chebliswo, chepiliowo, chepiliswo, chepuluswo, dawa-aaze, dawa-nyoka, eerut, gindarithi, haluf, kangalige,

kukube-dik dik, kukube-tari, lamalogi, lamaloki, lamayoki, lamayokin, lamuyaki, mkulube, mukindaarithi, munatha, mundarithi, mutunguarithi, ohia-sagara, olkiage

in Tanzania: luwuga, msakasaka, muwumbu, olkiage, segele

Maerua edulis (Gilg & Ben.) DeWolf (*Courbonia edulis* Gilg & Gilg-Ben.; *Courbonia glauca* (Klotzsch) Gilg & Ben.)

Eastern Africa. Shrub, small, many-branched, erect or spreading, sprouting, very large tuberous rootstock, young shoots purple, minutely stalked leaves elliptic or almost round, flowers yellow-green on long peduncle, fruits borne on the branches, fruit stalk bending backward, leaves and fruits grazed by stock, seeds eaten by humans, dry situations, riverine thicket, in *Acacia* bushland, woodland, in *Acacia* desert grassland

See *Flora Aegyptiaco-Arabica* 104. 1775, *Tableau Encyclopédique et Méthodique ... Botanique* t. 395. 1793, *Bulletin de la Société Botanique de France* 7: 901. 1860 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 53: 218. 1915, *Kew Bulletin* 16: 82. 1962

(Seeds poisonous in the raw state; several cases of human deaths resulting from the use of root extract. Root used as an emetic; leaves used as a poultice for rheumatic swellings.)

in East Africa: amoyo, kafuku, kalilalila, kangazige, kidungwa, lubungwa, lusambosambo, luwuga, mnatha, msakasaka, musada, musalale, ngomba gomba, olkiage, saka, saka-saka, sendali

in Tanzania: luwuga, msakasaka, muwumbu, olkiage, segele

Maerua glauca Chiov. (*Maerua gorinii* Chiov.)
