See *Flora Aegyptiaco-Arabica* 99. 1775, *Tentamen Florae Abyssinicae* ... 1: 32, t. 5–6. 1847 and *Rec. Bot. Surv. India* 21(1: *Fl. Punjab Plains*): 19–20. 1978

(Used in Ayurveda. Roots are sweet and used as a stimulant, the juice given to children for convulsion; leaves paste given in asthma.)

in India: bhoochakra gadda, bhoochakra gedde, bhoochakramu, hemakand, hemkand, kaatigolo, maakametanihige, madhusrava, madhuvalli, maenikathige, merupu theega, morata, morinika, murahari, nela sakre gedde, pattathige, pattuthige, piluparni, piluparnika, pipluparni, putta tige, saludamangida, vikat

Maerua subcordata (Gilg) De Wolf (*Courbonia nummulariifolia* Mattei; *Courbonia subcordata* Gilg; *Courbonia tubulosa* Gilg & Gilg-Ben.)

East Africa. Small shrub, light green leaves, calyx base tubular, fruits orange edible, roots famine food after boiling, in dry *Commiphora-Acacia* thornbush

See *Genera Plantarum* 893. 1839 and *Kew Bulletin* 16: 82. 1962

(Roots strong purgative. Plant used as a rubefacient, a counter-irritant and for inflammation. Decoction of leaves a medicine for eyes, a wash, and also steam from boiled crushed leaves.)

in East Africa: erut, kukube, mdudu, milamila, ndamwai

Maerua triphylla A. Rich. (*Capparis triphylla* Thunb.; *Maerua baillonii* Hadj-Moust.; *Maerua triphylla* Dur. & Schinz)

Tropical Africa. Tree, liana or twining lianescent shrub, straggling, spreading, yellowish-white flowers

See *Tentamen Florae Abyssinicae* ... 1: 32, t. 6. 1847, *Consp. Fl. Afr.* [T.A. Durand & H. Schinz] 1(2): 168. 1898 and *Bulletin de la Société Botanique de France* 103: 474–475. 1956

(Leaves and fruits analgesic, febrifuge, antibacterial.)

in Tanzania: muhenkwa

Maerua triphylla A. Rich. var. *johannis* (Volkens & Gilg) DeWolf

East Africa, Tanzania. Evergreen tree or bushy shrub, erect or scandent, scrambling, many-branched, round crown, stem brown-grey with grey lenticels, leaves elliptic, small whitish flowers faintly sweet-scented, sepals boat-shaped reflexed, greenish white filaments prominent, anthers and ovary dull green, fruit with brown-green trichomes, smooth fruits constricted between the seeds, in rocky area, in evergreen or deciduous bushland, along rivers and lakes, thickets, wooded grassland, margins of dry forests, leaves browsed by domestic stock and wild game, if boiled the fruit is edible

See *Tentamen Florae Abyssinicae* ... 1: 32, t. 7. 1847 and *Kew Bulletin* 16: 82. 1962

(An infusion from the roots a remedy for snakebite and headaches, when mixed with lemon juice an aphrodisiac. Roots stated to be very poisonous.)

in East Africa: kipegero, mutumburu, ol-amalogi

in Tanzania: mtatu jike

Maerua triphylla A. Rich. var. *pubescens* (Klotzsch) DeWolf (*Maerua bequaertii* De Wild.; *Maerua cylindricarpa* Gilg & Gilg-Ben.; *Maerua mildbraedii* Gilg & Gilg-Ben.; *Maerua pubescens* (Klotzsch) Gilg; *Streblocarpus pubescens* Klotzsch)

Kenya, Tanzania. Shrub or lianescent shrub, straggling, stem brown with grey spots, inflorescence white, petals light green, sepals green, filaments white, ovary pale green, fruit green, leaves usually eaten by insects

See *Species Plantarum* 1: 503–504. 1753, *Flora Aegyptiaco-Arabica* 104. 1775, *Tentamen Florae Abyssinicae* ... 1: 32, t. 7. 1847 and *Bahama Fl.* 150. 1920, *Kew Bulletin* 16: 82. 1962

(Purgative.)

Maesa Forssk. Myrsinaceae (Maesaceae, Primulaceae)

From the Arabic *maas*, a common name for the type species of the genus; see Pehr (Peter) Forsskål, *Flora aegyptiaco-arabica*. 66. Copenhagen 1775, *Characteres Generum Plantarum* 21–22, pl. 11. 1775, *Nova Genera Plantarum* 3: 59. 1783 and *Das Pflanzenreich* IV 236(Heft 9): 16, 25. 1902, *Nova Flora Japonica* 9: 6. 1943, *Taxon* 49(2): 185. 2000.

Maesa andamanica Kurz

India, Andaman. Straggling shrub, white flowers

See *Forest Flora of British Burma* 2: 575. 1877

(Leaves in skin diseases.)

Maesa argentea (Wall.) A. DC. (*Baeobotrys argentea* Wall.; *Maesa argentea* Wall.; *Maesa argentea* C.B. Clarke)

India, Himalaya.

See *Flora Indica*; or descriptions of Indian Plants ed. Carey 2: 233. 1824, *Numer. List.* no. 2316. 1830, *Annales des Sciences Naturelles; Botanique*, sér. 2, 16: 96, pl. 5. 1841, *Fl. Brit. India* [J.D. Hooker] 3: 510. 1882

(Leaves as fish poison.)

in China: yin ye du jing shan

in Nepal: bhogate

Maesa chisia Buch.-Ham. ex D. Don (*Maesa chisia* D. Don; *Maesa prodigiosa* C. Chen)

Nepal, India. Shrub or small tree, small white scented flowers, many-seeded berries, young shoots and fruits eaten

See *Prodromus Florae Nepalensis* 148. 1825 and *Acta Phytotaxonomica Sinica* 16(3): 79, pl. 1, f. 1–3. 1978

(Juice from the cut portions of the stem used as eye drops for painful eyes; leaves slightly warmed and kept on eyes in case of eye diseases and painful eyes. Roots, bark, branchlets and leaves with insecticide activity. Root, bark and leaves as fish poison. Magic, ceremonial. Veterinary medicine, leaf and bark paste applied all over the body of domestic animals for relief from insect, worms and leeches.)

in China: mi xian du jing shan

in India: bilaune, bilauni, bilouni, kozalongritong, purmoking, purmokung, susi-porma, susi porma

in Nepal: bilaune

***Maesa cumingii* Mez**

Philippines.

See *Das Pflanzenreich* (Engler) *Myrsin.* 236(Heft 9): 49. 1902

(Bark for poisoning fish.)

***Maesa denticulata* Mez**

Philippines.

See *Das Pflanzenreich* (Engler) *Myrsin.* 236(Heft 9): 48. 1902

(Whole plant used to stupefy fish.)

***Maesa edulis* C.T. White**

Solomon Islands. Lowland rain-forest

See *Journal of the Arnold Arboretum* 31(1): 103–104. 1950

(Antidote for ritual poison and against all poisons.)

in Papua New Guinea: gigaku

***Maesa indica* Wall. (*Maesa indica* (Roxb.) A. DC.; *Maesa indica* (Roxb.) Sweet; *Maesa indica* Hook.f.)**

India. Shrub, crenate leaves, white flowers in axillary racemes, pinkish-white succulent fruits, shoots used as vegetable, ripe fruits eaten

See *Flora Indica*; or descriptions of Indian Plants 2: 230. 1824, *Hort. Brit.* [Sweet] [2]: 268. 1826, *Journal of the Linnean Society, Botany* 6: 16. 1861 [1862 publ. 1 Nov 1861], *FBI* 3: 509. 1882

(Leaves warmed and rubbed on skin diseases; leaf extract administered orally for cold and stomachache. Roots used in syphilis, intestinal worms and skin diseases; roots ground with lemon juice applied on boils; roots extract taken to cure dysentery and intestinal disorders. Fruits eaten as anthelmintic. Mature leaves as fish poison.)

in India: changchang, koza-longritong, naukaling, tanipul, tannipil gida, tannipilgida, tannipoola maram, tannipoolan maram, tannipulla maram, tannipullu maram

***Maesa lanceolata* Forssk. (*Baeobotrys indica* Roxb.; *Baeobotrys lanceolata* (Forssk.) Maesa laxa Mez

Philippines.

See *Das Pflanzenreich* (Engler) *Myrsin.* 236(Heft 9): 32. 1902 [6 May 1902]

(Fruit used to poison fish.)

Maesa macrophylla Wall. (*Maesa macrophylla* C.B. Clarke; *Maesa macrophylla* (Wall.) A. DC.)

India, Nepal, Himalaya.

See *Flora Indica*; or descriptions of Indian Plants ed. Carey 2: 234. 1824, *The Flora of British India* [J.D. Hooker] 3: 510. 1882

(Leaves as fish poison. Veterinary medicine, fruits for diphtheria.)

in India: bhogti

in Nepal: bhogate, paha

Maesa ramentacea Wall. (*Baeobotrys ramentacea* Roxburgh; *Baeobotrys ramentaceus* Roxb.) (Latin *ramentum*, *i* 'what is grated, scrapings, chips')

India. Tall shrub, woody climbing liane, coriaceous leaves, white flowers in panicles, white berry

See *Hort. Berg.* 16. 1814, *Flora Indica*; or descriptions of Indian Plants, ed. Carey & Wall., 2: 230–231. 1824, *Fl. Ind.*, ed. Carey, 1: 558. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 77. 1844

(Leaf juice in cuts and wounds; leaves decoction drunk to treat mild fever and weakness; pounded leaves with rice applied for the pain in chest; leaf paste applied on body by women at the time of delivery. For skin diseases in children, poultice with leaves. Magic, possession, a protective charm, take twigs with leaves and whip the body of children.)

in English: mouse-deer vine, ramentaceous maesa

in Bangladesh: mesadai

in China: cheng gan shu

in India: bol jakhandok, dieng soheit iar, hing-kwai, lajachio, kokkidi, sekertia, thebeloa

in Indonesia: aka pelandu

Malayan names: bekaras, belangkas hutan, gambir badak, gambir gambir, gambir-gambir jantan, gambir jantan, gegambir, jelai, kampur, kayu pinang bujong, kecham utan, membola, membuloh, mengambir, patah tulang, pesat, pudding, setulang, telor belangkas, tulang hutan

Maesopsis Engl. Rhamnaceae

From the genus *Maesa* and the Greek *opsis* 'resembling, aspect', referring to the leaves, see *Die Pflanzenwelt Ost-Afrikas* C: 255. 1895.

Maesopsis eminii Engl.

Tropical Africa. Tree, rough bark, pinkish slash, flowers yellow-green, fruits eaten by monkeys

See *Die Pflanzenwelt Ost-Afrikas* C: 255. 1895, *Naturl. Pflanzenfam.* [Engl. & Prantl] iii. 5(1895) 399. 1895

(Stem bark and leaves for bronchitis, cough, catarrh, mouth sores and venereal diseases.)

in Cameroon: esenge, londo, nkala, nkangela

in Central African Republic: londjo, ngbùkà

in Congo: nabit

in Gabon: ken, nkangulé

in Ivory Coast: anschia-sain, manasati, sagou-doué

in Kenya: musizi

in Nigeria: oubiogiekhue; igilogbon (Yoruba); ovbiogiekhue (Edo); awuru (Igbo)

in Trop. Africa: musizi

in Zaire: bosongu, ishongo, osongo

Magnolia L. Magnoliaceae

After the French (b. Montpellier) botanist Pierre Magnol, 1638–1715 (d. Montpellier), physician, an innovator in botanical classification, professor of botany and medicine and Director of the Botanical Garden at Montpellier, his writings include *Novus character plantarum*, in duos tractatus divisus. Monspelii 1720 and *Prodromus historiae generalis plantarum*. Monspelii [Montpellier] 1689. See *Species Plantarum* 1: 535–536. 1753, *Genera Plantarum* [Jussieu] 281. 1789, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *The Paradisus Londinensis* 87. 1807, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 455, 460. 1817 [1818 publ. 1–15 Nov 1817], *Verhandeligen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 9: 147. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 10. 1825, *A Numerical List of Dried Specimens* 236. 1829, *Archives de Botanique* 2: 514. 1833, *Histoire Naturelle des Végétaux* 7: 462, 481. 1839, *Florae Japonicae Familiae Naturales* 1: 78. 1845 and *Symbolae Antillarum* 7: 222. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 24: 3. 1927, *Fieldiana, Bot.* 24(4): 266–269. 1946, *Quarterly Journal of the Taiwan Museum* 8: 209. 1955, H.N. (Analgesic, antidiarrheal.)

in China: uo tian yu lan

Magnolia rostrata W.W. Sm.

Myanmar, Tibet, China. Tree, bark dark, in open mixed forests

See *Species Plantarum* 1: 535–536. 1753 and *Notes from the Royal Botanic Garden, Edinburgh* 12(59): 213–215. 1920

(For stomach problems.)

in China: chang hui hou pu

Magnolia sieboldii K. Koch (*Magnolia oyama* Kort; *Magnolia parviflora* Siebold & Zucc.; *Magnolia verecunda* Koidz.)

China to Japan.

See *Species Plantarum* 1: 535–536. 1753, *Hortus Dendrologicus* 4: 11. 1853 and *Revue de l'Horticulture Belge et Étrangère* 31: 258. 1905, *Botanical Magazine* 40(474): 339. 1926

(Analgesic, antidiarrheal, antibacterial.)

in English: Oyama magnolia

Magnolia sieboldii K. Koch subsp. *sinensis* (Rehder & E.H. Wilson) Spongberg (*Magnolia globosa* Hook. f. & Thomson; *Magnolia globosa* var. *sinensis* Rehder & E.H. Wilson; *Magnolia sieboldii* K. Koch; *Magnolia sinensis* (Rehder & E.H. Wilson) Stapf)

China.

See *Species Plantarum* 1: 535–536. 1753, *Hortus Dendrologicus* 4: 11. 1853, *Flora Indica*: being a systematic account of the plants . . . 1: 77. 1855 and *Plantae Wilsonianae* 1(3): 393. 1913, *Botanical Magazine* 149: sub.t. 9004. 1924, *Journal of the Arnold Arboretum* 57(3): 279, f. 3, h-i. 1976

(Analgesic, sedative, anthelmintic, antidiarrheal.)

in China: yuan ye yu lan

Magnolia sphenocarpa Hook. f. & Thomson

India.

See *Flora Indica*: being a systematic account of the plants. 1: 78. 1855

(Red seeds used for catching birds.)

in India: tsuang-jang

Magnolia sprengeri Pamp. (*Magnolia conspicua* var. *purpurascens* Maxim.; *Magnolia denudata* Desr.; *Magnolia denudata* var. *dilutipurpurascens* Z.W. Xie & Z.Z. North America. Perennial tree, whitish undersurface of the aromatic leaves, pronounced tubular stipules, sweetly fragrant creamy-white flowers, each flower terminal on a vegetative shoot, green sepals, fruit as a woody cone-like structure, seeds red with the outer seed coat fleshy

See *Species Plantarum* 1: 535. 1753, *Gen. Pl.* ed. 5, 240. 1754, *Syst. Nat.* ed. 10: 1082. 1759, *Hort. Kew.* 2: 251. 1789, *Prodr. Stirp. Chap. Allerton* 379. 1796, *Amer. J. Sci. Arts* 5: 295. 1822, *Nomencl. Bot.*, ed. 2, 2: 89–90. 1841, *Handb. Laubholzk.* 3: 145. 1893 and *Bot. Gaz.* 67: 231. 1919, *Bull. Torrey Bot. Club* 55: 404. 1928, *Torreya* 31: 39. 1931, *Kalmia* 11: 2. 1981, Johnson, D.L. “Nomenclatural changes in *Magnolia*.” *Baileya* 23(1): 55–56. 1989, *Journal of Chemical Ecology* 25: 253–690. 1999

(Decoctions of leaves, twigs, and bark to treat colds and chills, to warm the blood, and as a hallucinogen; leaves or bark inhaled as hallucinogen. Leaves toxic to insect herbivores, except for the caterpillars of the sweet-bay silkmoth.)

in English: laurel, swamp bay, swamp laurel, sweet bay

Maharanga A. DC. Boraginaceae

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 10: 71. 1846.

Maharanga emodi (Wall.) A. DC. (*Maharanga emodi* DC.; *Onosma emodi* Wall.)

Nepal.

See *Species Plantarum*, Editio Secunda 1: 196. 1762, *Flora Indica*; or descriptions of Indian Plants 2: 11–13. 1824, *Prodr.* (DC.) 10: 71. 1846

(Whole plants for syphilitic and leprotic sores. Crushed roots boiled in rape oil, *Brassica napus* L. var. *napus*, and the oil applied on the head as a hair tonic.)

in China: wu hua zhang e zi cao

in India: sankhuli

in Nepal: marangi

Mahonia Nuttall Berberidaceae

Named after the Irish-born American horticulturist Bernard M'Mahon (McMahon), c. 1775–1816 (d. Philadelphia), botanist, in 1796 went to United States, nurseryman. See *Species Plantarum* 1: 330–331. 1753, T. Nuttall, *The Genera of North American Plants*. 1: 211–212. 1818, J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. 117–119. 1899 and Leslie Walter Allen Ahrendt (1903–1969), “*Berberis and Mahonia*.” *Journal of the Linnean Society, Botany*. 57: 1–410. 1961, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 430. 1965, Jeannette Elizabeth Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808–1841*. 471. 1967, J. Ewan, ed., *A Short History of Botany in the United States*. 5, 136 [by George H.M. Lawrence, *Horticulture*]. 1969, Stafleu and Cowan, *Taxonomic Literature*. 3: 229–230. Utrecht 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 131. Berlin & Hamburg 1989.

Mahonia napaulensis DC. (*Berberis acanthifolia* Wall. ex Walp.; *Berberis acanthifolia* (Wall. ex G. Don) Walp.; *Berberis leschenaultiana* Wall., nom. inval.; *Berberis leschenaultii* Wight & Arn.; *Berberis leschenaultii* Wall. ex Wight & Arn.; *Berberis napaulensis* (DC.) (Whole plant, the bark, antibacterial, antitumour, aperient, carminative, febrifuge, ophthalmic, for diarrhea, dysentery and piles, inflammations of the eyes, jaundice. Leaf paste applied on forehead to relieve headache. Bark extract strongly diuretic. Roots and stem bark used for fever and eye ailments. Pasted flowers given in vomiting during pregnancy. Berries eaten to treat urinary disorders and dysentery; green fruit juice given in dysentery.)

in English: mahonia

in India: chutro, dieng-tiang-mat, guram, jaungiu, kesari, manjanathi

in Nepal: chachan, duru haldi, jamane mandro

Mahonia pycnophylla (Fedde) Takeda (*Mahonia nepalensis* var. *pycnophylla* Fedde)

India, Nepal.

See *Bot. Jahrb.* 31: 124, f. 4A. 1901, *Notes from the Royal Botanic Garden, Edinburgh* 6(29–30): 218, pl. 4, pl. 33, f. 6–13. 1917

(Bark paste applied on skin diseases; bark decoction drunk for treatment of fever.)

in India: nthou

Maianthemum Wigg. Asparagaceae (Convallariaceae, Liliaceae)

Latin *Maius* ‘may’, Greek *Maios* and *anthemon* ‘flower’, see *Familles des Plantes* 2: 496. 1763, *Primitiae Florae Holsaticae* 14. 1780, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 637. 1794, *Annales du muséum national d’histoire naturelle* 9: 51–52. 1807, *Journal of the Linnean Society, Botany* 14: 564. 1875, *Hooker’s Icones Plantarum* 16: 1537. 1886, *Die Natürlichen Pflanzenfamilien* 3(2): 207. 1891 and *Fl. (Febrifuge, heart tonic, cooling, used in chest and venereal disorders. Leaves in poultice and bath for sores, wounds; in gargle for sore throat; leaves decoction for colds, intestinal disorders and stomachache. Tea of flowers for heat. Mucilaginous leaves emollient. Root extract given to check hematuria.)

in English: malachra, wild okra

in India: nanobhindo

in Philippines: bakembakes

Malaisia Blanco Moraceae

From the Philippine local plant name, *malais-ís*, see *The Civil and Natural History of Jamaica* in Three Parts 357. 1756, *Systema Naturae*, Editio Decima 1289. 1759, *Flora de Filipinas* 789. 1837 and *Proc. Kon. Ned. Akad. Wetensch., C* 91(4): 345–362. 1988.

Malaisia scandens (Lour.) Planchon (*Alchornea scandens* (Lour.) Müll.Arg.; *Caturus scandens* Lour.; *Malaisia tortuosa* Blanco; *Trophis scandens* (Lour.) Hook. & Arn.)

Philippines.

See *Flora Cochinchinensis* 2: 612. 1790, *Flora de Filipinas* 789. 1837, *The Botany of Captain Beechey's Voyage* 214. 1837, *Annales des Sciences Naturelles, Botanique* 3: 293. 1855, *Linnaea* 34: 170. 1865

(Leaves decoction as a postpartum remedy.)

in English: burny vine, crow ash, fire vine

in China: niu jin teng

in Papua New Guinea: doi a

in the Philippines: hingi, hingiu, hinguin, malais-ís, malaisis, sabá, sádak, salimpágot, sígid

Malaxis Solander ex Swartz Orchidaceae

Greek *malaxis* 'a softening, soothing', *malasso*, *malassein* 'to soften, make soft', *malakos* 'soft', referring to the soft pleated leaves, to the delicacy and to the succulent nature of the plant; see *Nova Genera et Species Plantarum seu Prodromus* 8, 119. 1788 and B.A. Lewis and P.J. Cribb, *Orchids of the Solomon Islands and Bougainville*. Royal Botanic Gardens, Kew 1991.

Malaxis acuminata D. Don

Tropical Asia, Australia. Terrestrial, greenish flowers, tuberous roots eaten, see also *Crepidium acuminatum* (D. Don) Szlach.

See *Prodromus Florae Nepalensis* 29. 1825 and *Orchidaceae* 2: 122. 1908, *Bulletin of Miscellaneous Information Kew* 1925(9): 368–369. 1925, *Orch. Thail.* 149. 1959, *Bulletin of the Botanical Survey of India* 3: 128. 1962, *Fl. E. Himal.* 443. 1966, *Taxon* 29: 348–350. 1980, *Fragmenta Floristica et Geobotanica* Suppl. 3: 123. 1995, Govaerts, R. *World Checklist of Seed Plants* 3(1, 2a & 2b). Deurne. 1999, *Harvard Pap. Bot.* 5(2): 383–466. 2001, Govaerts, R. *World Checklist of Selected Plant Families Database in ACCESS*. Royal Botanic Gardens, Kew. 2003, *Orchids Sikkim N.E. Himalaya* 323. 2007

(Used in Ayurveda. Plant parts tonic, aphrodisiac. Tuberous roots eaten as purgative and tonic.)

in China: qian lie zhao lan

in India: hari musli, jeevakam, jeevakam pacha, jhatbhak, jivak, jivaka, jivakah, jivakam, jivakamu

Malaxis muscifera (Lindl.) Kuntze (*Dienia muscifera* Lindl.; *Malaxis muscifera* (Lindl.) Grubov; *Microstylis muscifera* (Lindl.) Ridl.)

Pakistan. Glabrous, small herb, tuberous roots, yellowish green minute flowers in lax flowered racemes

See *The Genera and Species of Orchidaceous Plants* 22. 1830, *Journal of the Linnean Society, Botany* 24: 333. 1888, *Revis. Gen. Pl.* 2: 673. 1891 and *Taxon* 28: 406–408. 1979

(Used in Ayurveda. Tubers tonic.)

in India: jiwak

Malaxis versicolor (Lindl.) Abeyw. (*Liparis priochilus* Lodd.; *Malaxis versicolor* Abeyw.; *Microstylis versicolor* Lindl.; *Seidenfia versicolor* (Lindl.) Marg. & Szlach.; *Seidenfia versicolor* (Lindl.) M.R. Almeida)

India, Sri Lanka. Slender, stoloniferous herb, greenish-yellow or purple flowers, oblong stipitate capsule

See *The Genera and Species of Orchidaceous Plants* 21. 1830, *Bot. Cab.* 18: t. 1751. 1831 and *Ceylon Journal of Science, Biological Sciences* 2: 147. 1959, *Taxon* 29: 546. 1980, *J. Bombay Nat. Hist. Soc.* 101: 147. 2004

(Roots in skin diseases.)

Mallotus Lour. Euphorbiaceae

Greek *mallotos* ‘woolly, fleecy’, referring to the villose plants or to the woolly fruits; see J. de Loureiro, *Flora Cochinchinensis*. 601, 635. 1790, *Plants of the Coast of Coromandel* 2: 36. 1802, *Hortus Mauritianus* 282. 1837, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2):

956. 1866, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 245. 1873.

Mallotus atrovirens Müll.Arg.

India. Small tree, shrub, flowers in slender racemes

See *Linnaea* 34: 195. 1865

(For skin diseases, disinfectant.)

in India: pullonthi

Mallotus barbatus Müll.Arg. (*Mallotus barbatus* var. *congestus* F.P. Metcalf; *Mallotus barbatus* var. *croizatianus* (F.P. Metcalf) S.M. Hwang; *Mallotus barbatus* var. *hubeiensis* S.M. Hwang; *Mallotus barbatus* var. *pedicellaris* Croizat; *Mallotus barbatus* var. *wui* H.S. Kiu; *Mallotus conspurcatus* Croizat; *Mallotus croizatianus* F.P. Metcalf; *Mallotus esquirolii* H. Lév., nom. illeg.; *Mallotus leveillanus* Fedde; *Mallotus lotingensis* F.P. Metcalf; *Mallotus luchenensis* F.P. Metcalf; *Rottlera barbata* Wall. ex Baill., nom. nud.)

India, China. Small tree, big alternate softly hairy leaves

See *Linnaea* 34: 184. 1865

(For flatulence, pound the leaves with black pepper, ginger and broken rice, and poultice the abdomen.)

Malay name: balek angin

Mallotus floribundus (Blume) Müll.Arg. (*Adisca floribunda* Blume; *Coelodiscus annamiticus* (Kuntze) Gagnep.; *Mallotus amentiformis* Müll.Arg.; *Mallotus annamiticus* Kuntze; *Mallotus floribundus* var. *genuinus* Pax & K. Hoffm.; *Mallotus floribundus* var. *pilosus* Pax & K. Hoffm.; *Mappa floribunda* (Blume) Zoll. & Moritzi; *Ricinus floribundus* Reinw. ex Müll.Arg.; *Rottlera floribunda* (Blume) Hassk.)

Vietnam.

See *Flora* 47: 468–469. 1864, *Prodr.* 15(2): 962. 1866, *Revis. Gen. Pl.* 2: 608. 1891 and *Fl. Indo-Chine* 5: 375. 1926

(Roots decoction a postpartum remedy, and also for high fever. Leaves decoction to clean wounds, for stomachache.)

Malay names: mahang, maya-maya, memaya, mempasuh, tampin

Mallotus leucocarpus (Kurz) Airy Shaw (*Claoxylon leucocarpum* Kurz)

India.

See *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 42(2): 244. 1873 and *Kew Bull.* 16: 352. 1963

(Root decoction taken for stomach problems.)

in India: sikhiah, sikiah

Mallotus leucodermis Hook.f. (*Coccoceras muticum* Müll. Arg. var. *pedicellatum* Hook.f.)

Thailand, Borneo. Tree

See *Flora* 47: 470. 1864, *Fl. Brit. India* [J.D. Hooker] 5: 424, 441. 1887

(Young leaves infusion taken for gastritis.)

in Sarawak: belatek

Mallotus macrostachyus (Miq.) Müll.Arg. (*Mallotus insignis* Müll.Arg.; *Rottlera macrostachya* Miq.)

Thailand, Malaysia.

See *Linnaea* 34: 193. 1865, *Prodr.* (DC.) 15(2): 963. 1866

(For wounds, boils, clean wounds with the leaves decoction.)

in Burma: potwungyi

Malay names: balek angin, mesepat, nangka kerbau

Mallotus miquelianus (Scheff.) Boerl. (*Mallotus anisophyllus* Hook.f.; *Rottlera miqueliana* Scheff.)

Thailand, Philippines.

See *Annales Museum Botanicum Lugduno-Batavi* 4: 124. 1869, *Fl. Brit. India* 5: 436. 1887 and *Handl. Fl. Ned. Ind.* 3(1): 290. 1900

(For earache, pound the leaves and drop the liquid into the ear.)

Malay name: kayu kering

Mallotus montanus (Müll.Arg.) Airy Shaw (*Coelodiscus montanus* Müll.Arg.) (*Coelodiscus* Baillon, from the Greek *koilos* 'hollow' and *diskos* 'a disc', see Henri Ernest Baillon (1827–1895), *Étude générale du groupe des Euphorbiacées*. 293. Paris 1858.)

Thailand, Malaysia.

See *Prodr.* 15(2): 759. 1866 and *Kew Bulletin* 32: 78. 1977

(For eczema, pound the leaves and poultice.)

Malay name: berkuching

Mallotus nudiflorus (L.) Kulju & Welzen (*Mallotus cardiophyllus* Merr.; *Pseudotrewia macrophylla* (Roth) Miq.; *Pseudotrewia macrophylla* Miq.; *Rottlera hoperiana* Blume ex Müll.Arg.; *Rottlera indica* Willd.; *Rottlera operiana* Blume ex Baill.; *Trewia integerrima* Stokes; *Trewia macrophylla* Roth; *Trewia macrophylla* Blume; *Trewia macrostachya* Klotzsch; *Trewia nudiflora* L.; *Trewia nudiflora* Wight; *Trewia nudiflora* var. *dentata* Susila & N.P. Balakr.; *Trewia nudiflora* var. *polycarpa* (Benth. & Hook.f.) Susila & N.P. Balakr.; *Trewia nudiflora* L. var. *polycarpa* (Benth.) Susila & N.P. Balakr.; *Trewia nudiflora* var. *tomentosa* Susila & N.P. Balakr.; *Trewia polycarpa* Benth. & Hook.f.)

India to Philippines. Flowers greenish yellow, leaves as cattle fodder, sweet fruit pulp edible, see also *Trewia*

See *Sp. Pl.*: 2: 1193. 1753, *Hort. Malab.* 1: 76, pl. 42. 1678, *Goett. Journ. Wiss.* i. (1797) 8. 1797, *Bot. Mat. Med.* 4: 570. 1812, *Nov. Pl. Sp.* 373. 1821, *Bijdr. Fl. Ned. Ind.* 12:

612. 1826, *Étude Euphorb.* 423. 1858, *Fl. Ned. Ind.* (1859) i. II. 414. 1859, Klotzsch, Johann Friedrich (1805–1860), *Die botanischen Ergebnisse der reise seiner königl. Hoheit des Prinzen Waldemar von Preussen in den Jahren 1845 und 1846.* / Durch Dr. Werner Hoffmeister ... auf Ceylon, dem Himalaya und an den Grenzen von Tibet gesammelte Pflanzen beschrieben von Dr. Fr. Klotzsch und Dr. Aug. Garcke., 117. Berlin: K. Geheime Oberhofbuchdr. (R. Becker), 1862, *Prodr.* (DC.) 15(2.2): 953. 1866, *Gen. Pl.* [Bentham & Hooker f.] 3(1): 318. 1880 and *Philipp. J. Sci.*, C 7: 398. 1913 [1912 publ. 1913], *J. Econ. Taxon. Bot.* 22(2): 351–352. 1998, *Blumea* 52(1): 124. 2007

(Crushed fruits cooked with mustard oil and filtered, the oil applied to treat ulcer, itching and pimples. Root decoction applied locally in rheumatism. Bark extract given in stomachache. Plants for the removal of swellings and catarrh.)

in India: aule kapase, bhilor, gamari, garum, gutel, kurong, pitali, pithhalu, ramritha

in Nepal: gurel

Mallotus oppositifolius (Geisel.) Müll.Arg. (*Croton oppositifolius* Geiseler; *Echinus oppositifolius* (Geiseler) Baill.; *Mallotus beillei* A. Chev. ex Hutch. & Dalziel, nom. illeg.; *Mallotus oppositifolius* var. *genuinus* Müll.Arg., nom. inval.; *Rottlera dentata* Baill.)

Trop. Africa, Madagascar. Shrub or tree, erect, slender, many branched, often single-trunked tree, stem brown with cream dots, leaves long stalked, tiny fragrant creamy-white flowers in yellow racemes, perianth lemon-green, hairy glandular fruits lemon-green deeply lobed, savanna

See *Flora Cochinchinensis* 601, 633, 635. 1790, *Croton. Monogr.* 23–24. 1807, *Adansonia* 1: 69. 1860, *Linnaea* 34: 194. 1865, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 977–978. 1891 and *Flora of West Tropical Africa* 1: 307. 1928

(Leaves and bark vermifuge, purgative, antispasmodic, hypoglycemic, antibacterial, used for dysentery and the treatment of tapeworm infestation. Leaves and fruits for dysentery.)

in Nigeria: are, atori igbo, eja, iruja, kafamutuwa, kafar, kafar mutuwa, kpokokwa, oju-eja okpokirinya, okpokirinyan

in Tanzania: mnohole, mnokola

Mallotus pallidus (Airy Shaw) Airy Shaw (*Mallotus philippensis* var. *pallidus* Airy Shaw)

Thailand.

See *Kew Bulletin* 26: 300. 1972

(Emetic.)

Mallotus paniculatus (Lam.) Müll.Arg. (*Croton paniculatus* Müll.Arg.; *Croton paniculatus* Lam.; *Mallotus paniculatus* Müll.Arg.; *Oxydectes paniculata* Kuntze; *Rottlera paniculata* A. Juss.; *Rottlera paniculata* (Lam.) A. Juss.; *Rottlera paniculata* Wall.)

Trop. & Subtrop. Asia. Small trees, monoecious, chartaceous alternate leaves, apetalous flowers in paniced spikes, capsules softly echinate, black seeds compressed-globose, a pioneer species

See *Encycl.* (Lamarck) 2(1): 207. 1786, *Euphorb. Gen.* 33. 1824, *Numer. List* [Wallich] n. 7812, 7818. 1847, *Linnaea* 34: 87, 189. 1865, *Revis. Gen. Pl.* 2: 612. 1891

(Roots decoction a postpartum remedy. Magic, leaves used as a love charm.)

in English: turn-in-the-wind

in Borneo: berlekut

in Japan: Annan-akame-gashiwa, urajiro-akame-gashiwa

in Malaya: balek angin

Mallotus paniculatus (Lam.) Müll.Arg. var. ***paniculatus*** (*Croton appendiculatus* Elmer; *Echinus trisulcus* Lour.; *Lasipana tricuspis* Raf., nom. superfl.; *Mallotus albus* (Roxb. ex Jack) Müll.Arg.; *Mallotus chinensis* Lour.; *Mallotus cochinchinensis* Lour.; *Mappa cochinchinensis* Spreng., nom. superfl.; *Ricinus chinensis* Thunb.; *Rottlera alba* Roxb. ex Jack; *Rottlera cochinchinensis* (Lour.) (Used in Ayurveda, Unani and Sidha. Plant powder taken as an oral contraceptive; flowers and bark of *Pterospermum acerifolium* charred and mixed with *kamala* (*Mallotus philippensis*) applied on suppurating smallpox; plant juice given in skin diseases, and a paste used as external application. Flower decoction as an anthelmintic. Bark astringent, anthelmintic, antioxidant, blood purifier; bark paste applied on toothache and muscular pains; stem bark decoction taken for stomachache; stem bark decoction together with *Cuscuta reflexa*, stem bark of *Mangifera indica* and leaves of *Dendrocalamus strictus* used as bath for the treatment of jaundice. Seeds decoction taken to expel intestinal worms; powder of the seeds taken along with the curd as a vermifuge; seed powder mixed with *Argemone mexicana* latex used as an ointment for skin diseases. Red powder from the fruits mixed with coconut oil and applied externally as an antiseptic in skin diseases and blisters in the ears; glands and hairs on the fruit used as anthelmintic and purgative; powder also for dysentery, constipation and to destroy intestinal worms, tapeworms; all parts can be applied externally to treat parasitic infections of the skin; fruit powder with milk and curd to remove worms from the intestine of children. Roots given to pregnant women and as a postpartum remedy; fresh roots juice used as ear drops in earache. Leaves decoction useful for joint pain, rheumatic arthritis, inflammation and osteoporosis, also drunk to treat diarrhea. Veterinary medicine, seed powder given as an anthelmintic and astringent in diarrhea and dysentery; powdered bark of *Mallotus philippensis*, cumin seeds, asafoetida and seeds of *Trachyspermum ammi* pounded and given orally to cure hypocalcemia and Downer Cow Syndrome.)

Malpighia infestissima Rich. ex Nied. (*Malpighia pallens* Small; *Malpighia thompsonii* Britton & Small; *Malpighia urens* var. *infestissima* L. C. Rich. ex Adr. Juss.)

West Indies, Virgin Islands. Leaves and young stems covered with large needle-like hairs

See *Archives du Muséum d'Histoire Naturelle* 3: 260. 1843 and *North American Flora* 25: 157. 1910, *Scientific Survey of Porto Rico and the Virgin Islands* 5(1): 443. 1924, *Phanerog. Monogr.* 23: 254. 2000

(Needle-like hairs penetrate the skin causing painful dermatitis.)

in English: mad dog, touch-me-not

Malpighia polytricha A. Juss.

Bahamas.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 13: 336. 1840 and *Fieldiana, Bot.* 33: 1–85. 1970, *Icon. Pl. Trop.* 5: 401–500. 1982, *Phanerogamarum Monographiae* 23: 393. 2000

(Roots diuretic.)

in English: touch-me-not

Malus Miller Rosaceae

Latin *melum*, *malum* ‘an apple’, *malus* ‘an apple tree’, Greek *melon*, *malon* ‘an apple’, Akkadian *malum* ‘fullness, full, to be full, to be filled’, *mullu* ‘to make full, filling’, Hebrew *male* ‘full, abundant’; see Philip Miller, *The gardeners dictionary*. Abr. ed. 4. London (Jan.) 1754 and *Fieldiana, Bot.* 24(4): 432–484. 1946, A. Stefenelli, *Die Volkssprache im Werk des Petron im Hinblick auf die romanischen Sprachen*. Wien-Stuttgart 1962, *Ceiba* 44(2): 105–268. 2003 [2005].

Malus domestica Borkh. (*Malus communis* Poir.; *Malus dasyphylla* Borkh.; *Malus dasyphylla* var. *domestica* Koidz.; *Malus domestica* subsp. *pumila* (Mill.) Malva assurgentiflora (Kellogg) M.F. Ray (*Althaea assurgentiflora* (Kellogg) Kuntze; *Lavatera assurgentiflora* Kellogg; *Saviniona assurgentiflora* (Kellogg) Greene; *Saviniona clementina* Greene; *Saviniona dendroidea* Greene; *Saviniona reticulata* Greene; *Saviniona suspensa* Greene)

USA (California), Mexico.

See *Species Plantarum* 2: 686–687. 1753, *Histoire Naturelle des Îles Canaries* 3(21): 30. 1836, *Proceedings of the California Academy of Sciences* 1: 14. 1854, *Revisio Generum Plantarum* 1: 66. 1891 and *Leaflets of botanical observation and criticism* 2(8): 160–163. 1911, *Novon* 8(3): 290. 1998

(Leaves, flowers and root boiled in water and extract used as a purgative.)

in English: island mallow, malva rosa

in Ecuador: malva pectoral

Malva erecta J. Presl & C. Presl (*Malva erecta* Gilib.; *Malva grossheimii* Iljin; *Malva sylvestris* L.)

Europe.

See *Species Plantarum* 2: 689. 1753 and *Fieldiana, Bot.* 24(6): 324–386. 1949, *Taxon* 29: 538–542. 1980, *Taxon* 31: 761. 1982, *J. Cytol. Genet.* 25: 145. 1990, *Fitologija* 46: 12–32. 1993, *Watsonia* 19: 169–171. 1993

(Used in Unani. Whole plant antiphlogistic, astringent, demulcent, diuretic, emollient, expectorant, laxative for children. Stem and petiole paste used as laxative. Leaves and flowers demulcent, used as a poultice for bruises, inflammations, insect bites, or they can be taken internally in the treatment of respiratory system diseases and problems with the digestive tract.)

in English: blue mallow, cheeseflower, cheeses, common mallow, high mallow, high malva, marsh mallow, tall mallow

in Arabic: khobbeiza, khobbiza

in French: grande mauve

in Italian: malva

in Bhutan: nyi-dga

in India: al-dhamsa, gul-i-khubazi, gurchanti, khatmi-e-kochak, khawaji, khitmi, khitmikuchak, khubaji, khubaz, khubazi, khubbazi, kubaajee, kubhaji, nanakillagah, nanikulagh, padusa, sanna bindee gida, sanna bindige gida, seeme bende, socholi, towdrrie, tukhm-e-khubbazi, tukhm gul-i-khair, tukhm khubbazi, tukhm khubazi

in Japan: zeni-aoi

in Tibetan: ma-ning nyi-dga'

Malva moschata L. (*Malva moschata* L. var. *rosea* hort.)

North America. Perennial herb

See *Species Plantarum* 2: 690. 1753 and *Taxon* 29: 538–542. 1980, *Acta Soc. Bot. Poloniae* 52: 205–214. 1983, *Acta Biol. Cracov., Ser. Bot.* 31: 1–17. 1989, *Acta Biol. Cracov., Ser. Bot.* 31: 1–17. 1990, *Watsonia* 20: 63–66. 1994, *Verh. Zool.-Bot. Ges. Wien* 133: 301–318. 1996, *Linzer Biol. Beitr.* 29(1): 5–43. 1997, *Opera Bot.* 137: 1–42. 1999

(Plant infusion drunk as febrifuge and stimulant.)

in English: musk, musk mallow, musk plant

Malva neglecta Wallr. (*Malva rotundifolia* auct. non L.; *Malva vulgaris* Fries; *Malva vulgaris* Gray)

Europe, Germany. Hairy-stemmed annual, biennial or perennial, erect, ascending or procumbent, decumbent or prostrate, bearing clusters of small pink-white to bluish flowers, smooth downy carpels, leaves and tender stem as a vegetable, fodder for camels and sheep

See *Sylloge Plantarum Novarum* 1: 140–142. 1824 and *Taxon* 30: 829–842. 1981, *Taxon* 31: 761. 1982, *Le Naturaliste Canadien* 111: 447–449. 1984, *Fitologija* 46: 12–32. 1993, *Watsonia* 21: 365–368. 1997, *Opera Botanica* 137: 1–42. 1999

(Whole plant antiphlogistic, astringent, demulcent, diuretic, emollient, expectorant, laxative for children. Aerial portions to relieve indigestion and diarrhea. Leaves and flowers demulcent, used as a poultice for bruises, sores, inflammations, insect bites, or taken internally in the treatment of respiratory system diseases or inflammation of the digestive or urinary systems. Petioles decoction laxative. Seeds useful in bronchitis, cough and inflammation of bladder.)

in English: cheeses, common mallow

in India: sotchal, uthpar

in Pakistan: pochiko

Malva nicaeensis All. (*Malva arvensis* J. Presl & C. Presl; *Malva arvensis* C. Presl)

North America. Annual or biennial herb

See *Flora Pedemontana* 2: 40. 1785, *Delic. Prag.* 28. 1822

(Plant decoction taken as analgesic, febrifuge, stomachic, emetic, for headache.)

in English: bull mallow

Malva parviflora L. (*Althaea mareotica* Alef.; *Althaea microcarpa* Alef.; *Althaea parviflora* Alef.; *Malva bivoniana* C. Presl; *Malva flexuosa* Hornem.; *Malva juvenalis* Delile; *Malva mareotica* Delile; *Malva microcarpa* Desf.; *Malva microcarpa* Ledeb.; *Malva musiana* Sennen; *Malva obtusa* Torr. & Gray; *Malva polycarpa* Sennen; *Reissantia parviflora* (N.E. Br.) N. Hallé)

Tanzania, Uganda. Annual, biennial or perennial herb, trailing, woody, spreading and upright branches, stems with stiff hairs, dense fasciculate clusters of small pink or whitish flowers in the leaf axils, 3 free narrow outer sepals and 5 rounded inner sepals, few dry carpels in one-seeded sections which separate when mature, carpels deeply sculptured, leaves boiled and eaten in small amounts, plant eaten by rhinos, a serious weed of gardens and farms, forest edges, grassland, woodland, edges of ponds and lakes, red sandy loams, on heavily grazed grassland

See *Demonstrationes Plantarum* pl. 18. 1753, *Amoen. Acad.* ed. 3, 416. 1756

(Whole plant emollient and pectoral, used as a poultice on swellings, piles, wounds, running sores and boils. Seeds demulcent, used in the treatment of coughs and ulcers in the bladder. Eaten in small amounts.)

in English: bread-and-cheese, cheese weed, cheese weed mallow, cheeseweed mallow, Egyptian mallow, little mallow, mallow, marshmallow, ring-leaf mallow, small-flowered mallow, small-flowered marshmallow, small mallow, whorl-flowered mallow, whorl mallow

in Italian: malva minore

in Arabic: khobbeiza, khobbeiza reziza

in India: chirpoti, panirak, pindi motu-arku

in Southern Africa: brood-en-botter, kasies, kasiesblaar, kiesieblaar, kiesieblaar, kissieblaar, wildepampoenkies; mo-ora-tsatsi (Sotho); thibapitsa (Shona); unomolwana (Xhosa)

in Tanzania: mlenda, olemwadeni, thobi

Malva pusilla Sm. (*Althaea borealis* Alef.; *Malva borealis* Wallman; *Malva crenata* Kit.; *Malva lignescens* Iljin; *Malva rotundifolia* L.; *Malva rotundifolia* auct.)

Temperate and Mediterranean Europe. Erect, hairy, stemmed, annual, small pale lilac flowers in the leaf axils, seed with a pleasant nutty taste, fodder for camels and sheep

See *English Botany* 4: pl. 241. 1795 and *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Acta Biologica Cracoviensia, Series Botanica* 27: 57–74. 1985, *Botaniceskij Žurnal SSSR* 71: 1572–1575. 1986, *Opera Botanica* 137: 1–42. 1999

(Leaves demulcent, used internally in the treatment of inflammations of the digestive and urinary systems, externally used as a poultice for bruises, scurvy, inflammations, piles. Seed

demulcent, used in the treatment of coughs, bronchitis, ulceration of the bladder and hemorrhoids, applied externally in the treatment of skin diseases.)

Malva sinensis Cav. (*Malva mauritiana* L.; *Malva mauritiana* var. *sinensis* (Cav.) DC.)

China.

See *Species Plantarum* 2: 687–690. 1753, *Monadelphiae Classis Dissertationes Decem* 2: 77, t. 25, f. 4. 1786, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 432. 1824 and *Chinese Traditional and Herbal Drugs* 23(2): 88–89. 1992, *Investigatio et Studium Naturae* 12: 48–65. 1992

(Plants with white flowers used medicinally.)

in English: Chinese mallow

in China: jin hui

Malva verticillata L. (*Althaea crispa* Alef.; *Althaea verticillata* Alef.; *Malva abyssinica* A. Br.; *Malva alchemillifolia* Wallich; *Malva brevifolia* Gilib.; *Malva crispa* (L.) L.; *Malva crispa* L.; *Malva meluca* Graebn. ex P. Medw.; *Malva meluca* Graebner; *Malva mohileviensis* Downar; *Malva montana* Forsskal; *Malva neilgherriensis* Wight; *Malva oltoria* Nakai; *Malva physaloides* Hochst.; *Malva pulchella* Bernh.; *Malva verticillata* var. *crispa* L.; *Malva verticillata* var. *olitoria*; *Malva verticillata* var. *rafiqii* Abedin)

Europe, India, China. Annual, bush, herb, erect, branched, taproot, alternate palmate leaves and edges slightly undulate, flowers on short stalks clustered in leaf axils, cymes axillary, petals white-reddish or pale pink notched at tip, capsule splitting, flattened seeds, tender leaves and shoots boiled and cooked as vegetable, grazed by pigs

See *Species Plantarum* 2: 687–690. 1753, *Syst. Nat.*, ed. 10. 2: 1147. 1759, *Numer. List* [Wallich] n. 1884 D. 1829 and *Le Naturaliste Canadien* 106: 451–461. 1979

(Stem and leaves for hepatitis. Leaves, flowers and stem antibacterial, used for cough and cold, sore gums, tonsillitis. Leaves and whole plant demulcent, digestive, febrifuge, diuretic, emollient, galactagogue, laxative; plant paste taken to treat urinary troubles; leaves made into poultice for suppurating wounds, used to get rid of worms, good for skin. Powdered fruits given in dropsy, diarrhea, infected sores. Seeds used for infection of urinary system, lithiasis; dried ground seeds used for swelling. Roots used for rectocele, whooping coughs and chronic nephritis.)

in English: cheeseweed, cluster mallow, curled mallow, curly-leaved mallow, farmer's tobacco, mallow

in China: dong kui zi, ye kui

in India: mikanchi, suchili

in Nepal: chyampa, majaino, tangshang

in Tibet: jia ma, lcampa-ma-ning, lcampa, molcam, nyi-dga', pholcam, tshod-ma

in Peru: malva crespa

in Tanzania: ormilenda

Malvastrum A. Gray Malvaceae

False mallow, from the Latin *malva*, *ae* 'mallow' and the suffix *-aster* meaning false or an incomplete resemblance; see A. Gray, in *Memoirs of the American Academy of Arts and Sciences*, ser. 2. 4: 21. 1849 and *Journal of Palynology* 16: 85–105. 1980, *Bonplandia* 5(10): 63–71. 1981, *Trop. Plant Sci. Res.* 1: 1–13. 1983, *Bull. Jard. Bot. Nat. Belg.* 53: 342–371. 1983, *Systematic Botany Monographs* 25: 1–522. 1988, *Flora of Ecuador* 44: 1–141. 1992, *Quart. J. Forest Res.* 21(3): 61–72. 1999.

Syst. Bot. Missouri Bot. Gard.* 111: 313–373. 2007

(Pasted flowers given in diarrhea, or also sucked directly for the same purpose. Ceremonial, religious ceremonies, petals used for adoration of bow and arrow and for sprinkling divine water, red flowers for Pujas.)

in English: fire dart, Turk’s cap, wax mallow

in China: xiao xuan ling hua

in India: cheriyachemparathi, chusniful

Malvella Jaub. & Spach Malvaceae

Diminutive of the Latin *malva*, *ae* ‘mallow’, see Jaubert, Hippolyte Francois (1798–1874), *Illustrationes Plantarum Orientalium*, auctoribus comite Jaubert et Eduardo Spach. 5: 47, pl. 444. Parisiis, apud Roret bibliopolam, 1842–1857 [Spach, Édouard, 1801–1879].

Malvella leprosa (Ortega) Krapov. (*Disella hederacea* (Douglas) Greene; *Malva albifolia* Larrañaga; *Malva californica* C. Presl; *Malva hederacea* Douglas; *Malva hederacea* Douglas ex Hook.; *Malva leprosa* Ort.; *Malva obliqua* Nutt., nom. nud.; *Malva plicata* Nutt. ex Torr. & A. Gray; *Malva sulphurea* Gillies ex Hook. & Arn.; *Malvastrum sulphureum* (Gillies ex Hook. & Arn.) Griseb.; *Sida hederacea* (Douglas) Torr. ex A. Gray; *Sida hederacea* (Douglas ex Hook.) Torrey ex A. Gray; *Sida hederacea* var. *sulphurea* (Gillies ex Hook. & Arn.) Baker f.; *Sida leprosa* (Ort.) Schumann; *Sida leprosa* (Ort.) Schumann var. *hederacea* (Douglas ex Hook.) Schumann; *Sida leprosa* var. *hederacea* (Douglas) K. Schum. ex Clement; *Sida leprosa* var. *sulphurea* (Gillies ex Hook. & Arn.) Hochr.; *Sida obliqua* Nutt. ex Torr. & A. Gray, nom. illeg.; *Sida sulphurea* (Gillies ex Hook. & Arn.) A. Gray)

North America. Perennial herb

See *Novarum, aut Rariorum Plantarum Horti Reg. Botan. Matrit.* 8: 95. 1798, *Flora Boreali-Americana* 1(3): 107. 1831, *Botanical Miscellany* 3: 149–150. 1833, *Reliquiae Haenkeanae* 2(2): 121. 1835, *A Flora of North America*: containing ... 1(2): 227–228, 233. 1838, *Memoirs of the*

(Roots for diarrhea, dysentery.)

in English: alkali mallow, alkali sida, ivy-leaved sida, white mallow, white weed

Mammea L. Calophyllaceae (Clusiaceae, Guttiferae)

Mammea is a West Indian vernacular name; see Carl Linnaeus, *Species Plantarum*. 1: 512–513. 1753, *Genera Plantarum*. Ed. 5. 228. 1754 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences*, Série D, *Sciences Naturelles* 284(16): 1521–1524. 1977.

Mammea africana Sabine (*Garcinia golaensis* Hutch. & Dalziel; *Mammea africana* G. Don, nom. illeg., non *Mammea africana* Sabine; *Mammea eborro* Pierre; *Mammea gillettii* De Wild.; *Mammea giorgiana* De Wild.; *Ochrocarpos africana* (Sabine) Oliv.; *Ochrocarpus africanus* (Sabine) Oliv.; *Pentadesma parviflora* Exell)

Tropical Africa. Tree, yellow sap, edible seeds, fruit eaten by people, elephants, gorillas monkeys and pigs

See *Species Plantarum* 1: 512–513. 1753, *Transactions of the Horticultural Society of London* 5: 457. 1824, *A General History of the Dichlamydeous Plants* 1: 619. 1831, *Flora of Tropical Africa* [Oliver et al.] 1: 169. 1868 and *Bull. Jard. Bot. État Bruxelles* 4: 168–169. 1914, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] i. 237. 1927, *Kew Bull.* 1928, 228. 1928, *Annals of Tropical Medicine and Parasitology* 98(7): 733–739. 2004, *African Journal of Biomedical Research* 9(2): 129–132. 2006, *Journal of Ethnopharmacology* 111(2): 329–334. 2007

(Resin applied to burns and scabies. Fruits, leaves and bark for fevers, skin infections, diarrhea, bronchitis. Bark decoctions anthelmintic, antibacterial, cytotoxic, vasodilator, stomachic, febrifuge, taken to treat gonorrhea, ovarian troubles, coughs, anemia, and to ease childbirth; applied to treat wounds, sores, ulcers, scabies, skin diseases, itch, fever, rheumatism, uterine and vaginal inflammations. Bark used as fish poison.)

in English: African apple, African apricot, African mammee apple, bastard mahogany, mammee apple

in Cameroon: abodzok, aborzrk, abot soc, abozok, boto, eboto, oboto

in Central African Republic: bletune, bolele, bompeggya, boto, djimbo, mohia, ogbonodu

in Congo: bangwon, bokodji, bokoli, boye, boza, ipeki, lindale, m'bossi, mangwondi, mubuku, mukudi, mulira, nkoli, oboli, okodi, oliti, tshilunga tshikunze

in Gabon: banga, ebor, ebornzork, ibeka, ibore, ilolo, mbaga, mbanga, muburo, obenenzork, oboto, ombouna

in Ivory Coast: anibe, animbe, aramo, bomoku, djimbo

in Nigeria: bolo; ologbomodu (Yoruba); otien ogiorio (Edo); urherame (Urhobo); ekpili (Igbo); edeng (Efik); okut (Boki)

in Yoruba: ologbomodu

in Zaire: apambuka

***Mammea americana* L.**

West Indies. Tree, thick smooth shining leaves, orange latex, solitary fragrant flowers, rounded rough fruits, firm aromatic flesh, rough irregular seeds

See *Species Plantarum* 1: 512–513. 1753 and *Fieldiana, Bot.* 24(7/1): 36–61. 1961, *Ann. Missouri Bot. Gard.* 67: 1003. 1980

(Toxic pigment in fruit. Seeds very poisonous, powdered seeds insecticidal; grated seed in coconut oil against lice in hair. Fruit skin tea for indigestion. Tea of leaves for hypertension, bark for cough.)

in English: mamey apple, mamey de Cartagena, mammee, mammee apple, mammee tree, mammee apple, Santo Domingo apricot, South American apricot, wild apricot

in Mexico: chachalhaaz, mamey, zapote de Santo Domingo, zapote Domingo, zapote mamey, zapote niño

in South America: abricó-do-pará, mamey, mamey de Cartagena, mamey de S. Domingo, mamey rojo, otere

***Mammea longifolia* Planch. & Triana**

India. Extensively used in India as a minor spice

See *Ann. Sci. Nat., Bot.* sér. 4, 15: 240. 1861 and *Food Chemistry* 99(3): 436–443. 2006

(Antioxidant, antifungal.)

in India: naga-kesaram-pushpam, nagkesar, punay, punnag, shuram punna, sura ponna, surangi, surapinnai, surapun-naga, surigi, suringi, wundi

***Mammea siamensis* Kosterm.**

Thailand.

See *Phytochemistry* 67(9): 924–928. 2006

(Insecticidal, heart tonic. Pyranocoumarins from the twigs.)

in Malaysia: belimbing Siam

in Thailand: sarapi

Mammea suriga (Buch.-Ham. ex Roxb.) Kosterm.

India. Tree, flowers scented, fruit edible

See *Pengum. Lemb. Pusat Penjel. Kehut.* No. 72, 23. 1961

(Antiseptic, astringent.)

in India: gardaunnatte, gardumbi, ghaata paale, laal naagakeshar, nagkesar, raktanaagkesara, sarapunna, surangee

Mammea usambarensis Verdc. (*Mammea africana* auct.)

Senegal, Cameroon. Tree, straight bole, rounded crown, the bark exudes a yellow dye, leaves with many translucent dots, male and female flowers, male flower with single sepal split into two parts, sweet ripe fruits juicy and eaten raw, seeds roasted and eaten, in evergreen forest

See *Kew Bulletin* 31: 259, f. 1. 1976

(The bark exudes a yellow resinous sap, this, or the bark in decoction, widely and commonly used for dermal infections, crawl-crawl, itch, etc. Bark abortifacient, ecboolics, menstrual cycle, pain-killers, paralysis, epilepsy, convulsions, spasm, venereal diseases. Bark sap root fruit for cutaneous and sub-cutaneous parasitic infection. Magic. Veterinary medicine. Bark as fish poison.)

in English: African apple, African apricot, African mammee-apple, bastard mahogany, Calabar mahogany, mammee apple, mammy supporter

in Tanzania: ikongwe, mbuni, muikongwe

Mammillaria Haw. Cactaceae

From the Latin *mammilla*, *mamilla*, *ae* 'a nipple, breast', referring to the small tubercles, see *Synopsis plantarum succulentarum* ... 177–178. 1812, Pfeiffer, Ludwig Georg Karl (1805–1877), *Enumeratio Diagnostica Cactearum* 25. Berolini, 1837, Lemaire, Charles Antoine (1801–1871), *Cactearum aliquot novarum* 2. Lutetiae Parisiorum, Apud F. G. Levrault, 1838, *Cact. Gen. Sp. Nov.* 92, 101. 1839, *Repert. Bot. Syst.* (Walpers) 2(2): 271–272. 1843, *Cactaeae in Horto Dyckensi Cultae* [ed. 1844] 1844: 13. 1845, *Cactaeae in Horto Dyckensi Cultae* [ed. 1849] 8, 82. 1850, *Proceedings of the American Academy of Arts and Sciences* 3: 264, 266, 270. 1856, *Les Cactées* 32. 1868, *La Belgique Horticole* 24: 33. 1874, *Gesamtbeschreibung der Kakteen* 476, 499, 506. 1898, *Cactus Journal* [London] 2: 50. 1899 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family 4: 19, 61–63. 1923, *Kaktus-ABC* 391. 1935, *Oesterreichische Botanische Zeitschrift* 101: 601. 1954, *Cactáceas y Suculentas Mexicanas* 17(4): 120. 1972, *Cactus and Succulent Journal of Great Britain* 39: 73–74, 98. 1977, *Journal of Ethnopharmacology* 1(1): 23–48. 1979, *Succulentes* (France) 70(6): 125. 1991, *Taxon. Unters. Gatt. Mammillaria Haw. (Cactac.)* 128, 132, 136, 154, 176. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85: 509–519. 2001,

Journal of Agricultural and Food Chemistry. 55(20): 8138–8140. 2007.

Mammillaria grahamii Engelm. (*Cactus grahamii* (Engelm.) Kuntze; *Mammillaria grahamii* var. *oliviae* (Orcutt) L.D. Benson; *Mammillaria microcarpa* Engelm.; *Mammillaria microcarpa* subsp. *grahamii* (Engelm.) Mottram; *Mammillaria microcarpa* var. *auricarpa* W.T. Marshall; *Mammillaria milleri* (Britton & Rose) Boed.; *Mammillaria oliviae* Orcutt; *Neomammillaria microcarpa* (Engelm.) Britton & Rose; *Neomammillaria milleri* Britton & Rose)

North America. Dried fruit cooked and eaten, raw fruit used for food

See *Synopsis plantarum succulentarum* ... 177–178. 1812, *Proceedings of the American Academy of Arts and Sciences* 3: 262. 1856, *Revisio Generum Plantarum* 1: 260. 1891 and *West American Scientist* 12: 163. 1902, *Flora of the Rocky Mountains* 1064. 1917, *The Cactaceae*; descriptions and illustrations of plants of the cactus family 4: 135, 155–156, f. 184a. 1923, *The Cacti of Arizona* 22. 1969, *Succulenta* (Netherlands) 65: 119. 1986

(The juice of the plant used as ear drop, boiled, slightly cooled and then placed in the ear, as a remedy for earache. Ceremonial, flesh consumed by shamans, fruit claimed to have the ability to produce psychoactive effects.)

in English: fishhook cactus, Graham's nipple cactus

Common name: híkuri

Mammillaria heyderi Muehlenpf. (*Cactus heyderi* (Muehlenpf.) Kuntze; *Mammillaria gummifera* Engelm.; *Neomammillaria heyderi* (Muehlenpf.) Britton & Rose)

South America.

See *Allgemeine Gartenzeitung* 16(3): 20. 1848, *Revisio Generum Plantarum* 1: 260. 1891 and *The Cactaceae*; descriptions and illustrations of plants of the cactus family 4: 75, t. 8, f. 2. 1923

(The juice of the plant used as ear drop, as a remedy for earache. Ceremonial, sorcery and black magic.)

in English: coral cactus

Vernacular names: biznaga de chilillos, chilitos (the edible red fruits), híkuli

Mammillaria standleyi (Britton & Rose) Orcutt (*Mammillaria auricantha* R.T. Craig; *Mammillaria canelensis* R.T. Craig; *Mammillaria craigii* G.E. Linds.; *Mammillaria sonorensis* R.T. Craig; *Mammillaria tesopacensis* Craig; *Neomammillaria standleyi* Britton & Rose; *Neomammillaria xanthina* Britton & Rose)

South America.

See *The Cactaceae*; descriptions and illustrations of plants of the cactus family 4: 97, 164–165, f. 93, 184. 1923, *Cactus*

and *Succulent Journal* 12: 155. 1940, *Cactus and Succulent Journal* 14: 107, f. 62–63. 1942, *Mammill. Handbook* 104, 301, 307, fig. 86, 272, 279. 1945

(Used for the relief of earaches, headaches and deafness. Ceremonial, a stimulant and a soporific, magical properties, a stimulant for runners.)

Vernacular names: peyote de San Pedro, wichurí, wichuríki, witculfki

Mandevilla Lindley Apocynaceae

For the British Henry John Mandeville, 1773–1861 (d. Buenos Aires), introduced many plants into Europe; see Patrick Browne, *The civil and natural history of Jamaica*. 182. London 1756, *Systema Naturae*, Editio Decima 945. 1759, *Enumeratio Systematica Plantarum*, quas in insulis Caribaeis 13. 1760, John Lindley, in *Edwards's Botanical Register*. 26: sub t. 7. 1840 and *Ann. Missouri Bot. Gard.* 20(4): 605–790. 1933, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 131. Berlin & Hamburg 1989, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 464. 1994, *Bahama Fl.* 336. 1920, *Ann. Missouri Bot. Gard.* 20(4): 605–790. 1933, *Brittonia* 50(2): 214–232. 1998, *Sida* 21(1): 135–139, t. 1, 8–9. 2004, *Rodriguésia* 59(1): 197–200. 2008, *Fl. Mesoamer.* 4(1): 1–855. 2009, *Darwiniana* 47(1): 140–184. 2009.

Mandevilla anceps Woodson

Venezuela, Amazonas, N. Brazil.

See *Edwards's Botanical Register* 26: pl. 7. 1840 and *Annals of the Missouri Botanical Garden* 19(1): 75–76. 1932, *Annals of the Missouri Botanical Garden* 20(4): 605–790. 1933

(Latex caustic used to remove warts.)

Mandevilla annulariifolia Woodson

Colombia, Venezuela, Amazonas.

See *Botanical Museum Leaflets* 18: 168–169. 1958

(Latex caustic used to remove warts.)

Mandevilla hirsuta (Rich.) K. Schum. (*Amblyanthera campestris* (Vell.) Müll.Arg.; *Amblyanthera ciliata* (Stadelm.) Müll.Arg.; *Amblyanthera clausenii* Miers; *Amblyanthera clausenii* (A. DC.) (Emetic, cathartic.)

Mandragora L. Solanaceae

Greek and Latin *mandragoras* for a plant, mandrake, perhaps from the Persian *mardum-gia* ‘the plant of the man (i.e., the plant is supposed to resemble the human form)’; see *Species Plantarum* 1: 181. 1753 and *Catalogue des Plantes de Yun-Nan* 199. 1916, E. Hoffmann-Krayer, *Handwörterbuch des deutschen Aberglaubens*. I: 312–324. Berlin-Leipzig 1927, C.J.S. Thompson, *The mystic mandrake*. London 1934, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 888. Dover Publications, New York 1967 G. Aquilecchia, “La favola Mandragola si chiama.” in *Schede di italianistica*. 97–126. Torino 1976, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 710. 1983, *Inform. Bot. Ital.* 20: 637–646. 1988.

Mandragora caulescens C.B. Clarke (*Anisodus caulescens* (C.B. Clarke) Diels; *Anisodus mariae* Pascher; *Mairella yunnanensis* H. Léveillé; *Mandragora chinghaiensis* Kuang & A.M. Lu; *Mandragora tibetica* Grubov)

China.

See *Fl. Brit. India* 4: 242. 1883 and *Notes Roy. Bot. Gard. Edinburgh* 36:139–144. 1978

(The roots contain alkaloids, used medicinally.)

in English: caulescent mandrake, Chinghai mandrake

in China: qie shen

Mandragora officinarum L. (*Mandragora officinarum* Bertol.)

Europe.

See *Species Plantarum* 1: 181. 1753

(Hallucinogenic toxicity.)

in English: devil’s apples, mandrake

Manettia Mutis ex L. Rubiaceae

For the Italian botanist Saverio (Xaverio) Manetti, 1723–1785, physician, 1747–1782 prefect of the Giardino dei Semplici at Florence. See *Mantissa Plantarum* 2: 553–554, 558. 1771 and J.H. Barnhart, *Biographical Notes upon Botanists* 2: 442. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection* 257. 1972, Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell’Orto Botanico di Palermo* 181. Palermo 1988, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen* 4. Aufl. 131. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen* 14. Aufl. 746. 1993.

Manettia glandulosa Poepp. (*Lygistum glandulosum* (Poepp.) Kuntze; *Lygistum glandulosum* (Poepp. & Endl.) Kuntze; *Manettia glandulosa* Poepp. & Endl.)

Peru.

See *The Civil and Natural History of Jamaica* in Three Parts 142. 1756, *Systema Naturae*, Editio Decima 894. 1759, *Nov. Gen. Sp. Pl.* 3: 24. 1841, *Revisio Generum Plantarum* 1: 287. 1891

(Leaves chewed to prevent tooth decay.)

in Ecuador: na-shum-pi

Rose; *Manfreda virginica* var. *tigrina* Rose; *Polianthes lata* (Shinners) Shinners; *Polianthes virginica* (L.) Shinners; *Polianthes virginica* f. *tigrina* (Engelm.) Shinners)

North America, Mexico. Perennial, sweet smelling flowers

See *Species Plantarum* 1: 323. 1753, *Gen. Pl.* [Salisbury] 78. 1866, *Contr. U.S. Natl. Herb.* 4: 155. 1899 and *Contr. U. S. Natl. Herb.* 8: 19. 1903, *Ann. Missouri Bot. Gard.* 22: 507. 1935, *Rhodora* 38: 405. 1936, *Field & Lab.* 19: 171. 1951, *Sida* 2(4): 335. 1966, Shinners & Mahler's *Illustr. Fl. N. Central Texas* (*Sida*, Bot. Misc. 16): 1079. 1999, *Kakteen Sukk.* 52: 167. 2001

(Antidote, carminative, anthelmintic, astringent, stomachic, bitter tonic, antidiarrheal, hepatoprotective, antispasmodic, a remedy for colic and dyspepsia, infusion of rhizomes taken and used externally for snakebite, rattlesnakebite. Infusion of pounded roots taken and used externally with a tablespoon of whiskey for dropsy; roots chewed and swallowed or applied for rattlesnakebite; roots infusion of roots taken and used as a wash for snakebites. Roots chewed against intestinal worms, liver troubles.)

in English: American aloe, false aloe, rattlesnake master, Virginian agave

Mangifera L. Anacardiaceae

Manga, *mangai*, *man-kay*, *mankay*, *manghi*, Malayalam and Tamil names, plus Latin *fero*, *fers*, *tuli*, *latum*, *ferre* 'to bear,

carry'; see Carl Linnaeus, *Species Plantarum*. 1: 200. 1753, *Genera Plantarum*. Ed. 5. 93. 1754 and E. Zaccaria, *Raccolta di voci affatto sconosciute o mal note ai lessicografi ed ai filologi*. Marradi 1919, *Fieldiana, Bot.* 24(6): 177–195. 1949, C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Geller, M. "Poison ivy, mangoes, cashews, and dermatitis." *Ann. Intern. Med.*, 110: 1036–1037. 1989, *The Mangoes: Their Botany, Nomenclature, Horticulture and Utilization* 28. 1993. The rind of the unripe fruit as well as some other parts of the trees may contain an irritating sap which may cause inflammation when touched. Mango dermatitis, contact with the wood or its sawdust may cause dermatitis. The skin of the fruit and the petiole contain oleoresins, these chemicals are cross-reactive to the catechols contained in poison-ivy plants and in other members of *Rhus* species that cause dermatitis. Humans who are sensitized and develop dermatitis from these plants should be cautious about touching the skin of mangoes.

Mangifera caesia Jack (*Mangifera caesia* Jack ex Wallich; *Mangifera caesia* var. *verticillata* (C.B. Robinson) Mukherji; *Mangifera caesia* var. *wanji* Kostermans; *Mangifera kemanga* Blume; *Mangifera verticillata* C.B. Robinson)

Sumatra, Malaysia and Indonesia. Tree, thick trunk, dark green crown, leaves spirally arranged, flowers purple or pink, inflorescences paniculate, fruit flavor acid-sweet, flesh yellow-white, fetid odour of the fruit, *M. caesia* closely resembles *Mangifera kemanga* Blume, but differs in the longer petiole and the yellowish or whitish-green and smooth fruit

See *Species Plantarum* 1: 200. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 441. 1824

(Poison: the white juice of the immature fruit extremely irritant, both on the skin and when ingested; it has been used to injure enemies! The sap of the fully grown tree is irritant and has been used for criminal purposes. The resin from this species is injurious. The sap of the bark of *M. caesia* is poisonous and may cause serious skin and eye irritation. Therefore, laborers should be protected with gloves and clothing that covers the whole body. Eating the fruit may cause dermatitis localised to the angles of the mouth, or stomatitis, being caused by contamination of the fruit with plant sap; the fruit pulp is innocuous.)

in Brunei: belunu, binjai

in India: bauno

in Indonesia: binglu, binjai, wani

in Malaysia: beluno, binglu, binjai, bundo

in Philippines: bauno, bayuno, baluno

in Thailand: bin-yaa, lam-yaa

Mangifera foetida Lour. (*Mangifera foetida* Blume; *Mangifera horsfieldii* Miq.)

Peninsular Malaysia, Peninsular Thailand, Sumatra and Borneo. Tree, dense foliage, large and thick leaves, scentless

pinkish red flowers borne on copper red flower stalks, fruit oval in shape, flesh fibrous and orange or yellow, quite inedible when immature, in primary lowland forest, in wet tropics

See *Bijdr. Fl. Ned. Ind.* 17: 1153. Oct 1826–Nov 1827

(Fresh fruits contain an irritant poisonous sap. Leaves antipyretic, seeds used against trichophytosis, scabies and eczema. The sap used to deepen tattoo scars.)

in English: bachang, bachang mango, gray mango, horse mango

in Burma: la-mot

in Cambodia: svaay saa

in Indonesia: asem hambawang, bacang, bachang, limus, mangga pau

in Malaysia: bacang, bachang, batel, kembachang, macang, machai, machang, machang batu, machang ketur, membachang, pahu, sepam

in Thailand: ma chae, ma mut, maa-chang, malamut

in Vietnam: xoài hôi

Mangifera indica L. (*Malosma laurina* Engl.; *Malosma laurina* (Nutt.) Nutt. ex Engl.; *Malosma laurina* (Nutt.) Nutt. ex Abrams; *Mangifera amba* Forssk.; *Mangifera austro-yunnanensis* Hu; *Mangifera domestica* Gaertn.; *Mangifera gladiata* Boj.; *Mangifera racemosa* Boj.; *Mangifera rubra* Boj.; *Rhus laurina* Nutt.)

SE Asia, India. Tree, erect, evergreen, fast growing, branched, symmetrical crown, long taproot, yellowish gummy exudation, inner bark orange-yellow, oblong smooth leathery simple leaves spirally arranged, yellowish or reddish flowers borne in dense panicles widely branched, smooth fleshy fruits yellowish-green to reddish, one large seed, kernels a famine-food, young leaves eaten fresh or cooked as a vegetable

See *Species Plantarum* 1: 200. 1753, *Fl. Aegypt.-Arab.* 205. 1775, *A Flora of North America*: containing ... 1(2): 219. 1838, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 393. 1883 and *Flora of Los Angeles and Vicinity* (ed. 3) 220. 1917, *Bulletin of the Fan Memorial Institute of Biology*: 10: 160. 1940, *Quarterly Journal of the Mythic Society* 54: 73–94. 1963, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Journal of Ethnopharmacology* 18: 257–266. 1986, *Journal of Ethnopharmacology* 21: 109–125, 253–277. 1987, *Fl. Pharmacol.* 29(2): 79–92. 2007, *Mol. Nutr. Food Res.* 51(3): 352–359. 2007 [Hepatoprotective effects of lupeol and mango pulp extract of carcinogen induced alteration in Swiss albino mice.], *Plant Foods Hum. Nutr.* 62(1): 13–17.

2007 [Antioxidant in mango (*Mangifera indica* L.) pulp.], *Pharmacol. Res.* 55(2): 167–173. 2007 [Protective effect of *Mangifera indica* L. polyphenols on human T lymphocytes against activation-induced cell death.]

(Used in Ayurveda, Unani and Sidha. Sap of the mango irritating to skin of susceptible persons, mango dermatitis causes a rash around the mouth and face; the rind and flesh of unripe fruits poisonous or toxic. Pollen will produce active dermatitis in many individuals. Flowers in dysentery; dried flowers for diarrhea; smoke from dried flowers used in the bedrooms as a mosquito repellent. Leaves in scorpion sting; charred and pulverized leaves make a plaster to remove warts and also act as a styptic; leaves, dried flowers or bark and decoctions of the kernels astringent; leaves decoction febrifuge, antimalarial; leaves infusion to treat flu and high blood pressure; fruit of *Eugenia jambolana* and leaves of *Mangifera indica* ground and the extract taken to cure diabetes. Swollen portion of the petiole given in stomach disorders with salt. Unripe fruit for throat troubles, sunstrokes, in ophthalmia and eruptions; ripe fruits in hemorrhages from uterus, lungs or intestines. Seeds anthelmintic, anti jaundice and liver disorders, used to treat stubborn colds and coughs, asthma, indigestion, obstinate diarrhea and bleeding piles; embryo of the seed in infusion to eradicate intestinal worms; black kernel used in diabetes. Bark astringent, contraceptive, homeostatic, antirheumatic, antibacterial, hepatoprotective, anti jaundice, antioxidant, antilithiatic, antidiabetic; bark extract mixed with hot water taken for diarrhea and dysentery; powdered stem bark given with jaggery in abdominal pain and after delivery to expel the placenta, postpartum remedy; a decoction of roots of *Dracaena angustifolia* with bark of *Mangifera indica* and *Syzygium cumini* given as a postpartum remedy; bark of *Bombax insigne* crushed with bark of *Mangifera indica*, boiled, and the decoction taken as a remedy against dysentery; stem barks of *Ficus virens*, *Ficus benghalensis*, *Dalbergia sissoo*, *Mangifera indica* and *Tamarindus indica* boiled and the extract given to cure leucorrhea; bark extract of *Woodfordia fruticosa* along with extract of barks of *Oroxylum indicum*, *Mangifera indica*, *Bauhinia racemosa* and *Dalbergia lanceolaria* given for jaundice; *Mallotus philippensis* stem bark decoction together with *Cuscuta reflexa*, stem bark of *Mangifera indica* and leaves of *Dendrocalamus strictus* used as bath for the treatment of jaundice; unripe fruit, bark, stems and leaves antibiotic. Pounded roots, seeds and leaves of *Mangifera indica* and roots of *Ficus vallis-choudae*, extract taken for diarrhea. Veterinary medicine, finely crushed bark or seeds to treat dysentery and diarrhea; decoction of bark powder given in diarrhea. Used in religion and magico-religious beliefs, ceremonial, leaves in marriage ceremony and festival auspicious, garland hung around gate; bark of *Mangifera indica* and bark of *Moringa oleifera* boiled, bath with this water protects children from diseases; ingredient of Patra *poojalpuja* in different religious *pooja* ceremonies; prohibited to climb the fruit tree in the fruiting season by any women; the raw fruit is not a taboo, the fruit in any form is a taboo until the ceremony

of *Marka Uksana* has been performed before the Goddess Danteshwari.)

Mangifera kemanga Blume (*Mangifera caesia* Jack var. *kemanga* (Blume) Kostermans; *Mangifera polycarpa* Griffith)

SE Asia, Sumatra, Borneo and Peninsular Malaysia. Tree, subsessile leaves with narrowly decurrent margins, fruits dull yellow-brown at maturity, fruit eaten fresh when ripe, young leaves eaten, in wet tropical lowlands, in periodically inundated areas and marshes

See *Mus. Bot.* 1(13): 202. 1850

(The juice of kemang is not injurious to the skin.)

in Indonesia: palong

in Malaysia: kemang

Mangifera lagenifera Griff.

Sumatra, Peninsular Malaysia. Tree, dark brown latex, coriaceous leaves obovate to oblanceolate, flowers deep violet or purple, fruit a pyriform coarse drupe pale green to brownish, flesh white to pinkish, in lowland forests, disturbed forest, in temporarily inundated places, a rare endangered species

See *Notulae ad Plantas Asiaticas* 4: 414, t. 567. 1854 and *Lloydia* 12:73–136. 1949, *Flora Malesiana* 8: 433. 1978

(Dermatitis. Rarely cultivated, fruits very acid.)

in Indonesia: landjut, lanjut

in Malaysia: langoot, lanjut

in Thailand: mamuang-pom

Mangifera minor Blume

Pacific, Indonesia. Tree, buttressed, yellow fragrant flowers in terminal panicles, in lowland primary and secondary forest, lower montane forest

See *Mus. Bot.* 1(13): 198. 1850

(Bark chewed to treat snakebite; inner bark squeezed in water and drunk for asthma and tuberculosis. Bark heated and then placed onto a centipede bite to relieve the pain.)

in English: wild mango

in Papua New Guinea: koai, kongsi'i, saka, uwii, vao, wel mango, worang

Mangifera odorata Griff. (*Mangifera foetida* Lour. var. *bombom* Blume; *Mangifera foetida* var. *kawini* Blume; *Mangifera foetida* var. *mollis* Blume; *Mangifera foetida* var. *odorata* (Griffith) Pierre; *Mangifera oblongifolia* Hook.f.)

Its exact origin remains unknown. Tree, crown globose or broadly ovoid, thick branchlets, leaves coriaceous-papery shortly acuminate, pink flowers strongly fragrant borne on yellowish or reddish brown panicles, edible oblong yellow fruits, flesh juicy sweet, leaves not odorous when bruised, mainly cultivated, in tropical areas, in moist areas, lowland mixed forests, a polymorphic species

See *Species Plantarum* 1: 200. 1753, *Notulae ad Plantas Asiaticas* 4: 417–419. 1854 and *Flora Malesiana* 8: 437. 1978, *Mol. Ecol.* 11(8): 1465–1469. 2002

(Dermatitis. The sap of the bark is irritant, immature fruits contain a poisonous sap, the sap of the unripe fruit may cause skin reactions. The bark or leaf poultice against hysteria, epilepsy.)

Common names: kwini, kwining, kuwini, saipan mango, sapian mango

in Indonesia: ambachang, bembem, erobachang, kaweni, kebembem, kuwini, kwini, kwini

in Malaysia: huani, koenli, kuini, kuwini, kwini, kwini boli, manga wani, wani

in Philippines: huani, juani, kuwini, uani

in Thailand: kinning, mamuang chingreet, mamuang paa

in Vietnam: cay muong, xoai huong

Mangifera sylvatica Roxb.

India, Himalayas. Tree, straight bole, ovate elliptic fruits, thin flesh, unripe fruits eaten in curries, ripe fruits eaten fresh

See *Hort. Bengal.* 18. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 438. 1824, *Fl. Ind.*, ed. Carey, 1: 644. 1832, *FBI* 2: 15. 1876

(Seeds used in asthma. Ripe fruits astringent, diuretic, stomachic, laxative.)

in China: lin sheng mang guo

in India: han-thar

Manicaria Gaertner Arecaceae (Palmae)

Latin *manicae, arum* ‘the long sleeve of a tunic, glove, hand-cuff’, referring to the spathe (the fibrous inflorescence bracts used as hats, as caps); see Joseph Gaertner (1732–1791), *De fructibus et seminibus plantarum.* 2(3): 468. Stuttgart, Tübingen 1791 and *Botanical Museum Leaflets*—Harvard University 24(10): 275–335. 1976.

Manicaria saccifera Gaertner (*Manicaria atricha* Burret; *Manicaria martiana* Burret; *Manicaria plukenetii* Griseb. & H. Wendl.; *Manicaria saccifera* var. *mediterranea* Trail; *Manicaria saccifera* var. *plukenetii* (Griseb. & H. Wendl.) Drude; *Pilophora saccifera* (Gaertn.) H. Wendl.; *Pilophora testicularis* Jacq.)

Tropical America. Solitary trunk, robust, unarmed, stout caudex, very large terminal leaves suberect, flowers monocious borne in the same spadix, pouch-like spathes covering the entire inflorescence, large pendant infructescence

See *Flora of the British West Indian Islands* 518. 1864, *Flora Brasiliensis* 3(2): 520. 1882 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 389, 392. 1928, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 1013. 1930

(The water of the fruit given to alleviate coughing, asthma and to repress fever, against catarrh and other respiratory problems. Seedlings given to children suffering from diarrhea.)

in English: bif leaves, bussu palm, monkey cap palm, plumes of the sun, sleeve palm

in Brazil: buçu, buçú, bussú, coqueiro buçu, geruá, obuçu, tururi, ubuçu, ubuçú, ubussú

in Venezuela: emukohoko, ouasi, temiche, timiche, timití, truli, yahuhi, yawihi, yawihi aukwaha

Manihot Miller Euphorbiaceae

From the Brazilian vernacular name; see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 2. 1754, *Familles des Plantes* 2: 356. 1763, *Nova Genera et Species Plantarum* (quarto ed.) 2: 106, t. 109. 1817, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 2: 436. 1831, *Die Natürlichen Pflanzenfamilien* 3(5): 77. 1890 and *Journal d'Agriculture Tropicale* 8: 111. 1908, *Fieldiana, Bot.* 24(6): 25–170. 1949, C.T. India, China. Tree

See *Fam. Pl.* 2: 166. 1763, *Plants of the Coast of Coromandel* 1: 16. 1795, *Revisio Generum Plantarum* 2: 406. 1891 and *Ann. Inst. Bot.-Geol. Colon. Marseille*, sér. 3. 3: 9. 1915, *Bull. Jard. Bot. Buitenzorg*, III, 7: 241. 1925, Li Shu-gang (as Lee Shu-kang). 1987. *Sapotaceae. Fl. Reipubl. Popularis Sin.* 60(1): 47–83. 1987

(Used in Ayurveda. Stem bark astringent, tonic, demulcent, emollient, alterative, a decoction given in fever and diarrhea. Latex applied on teeth and gums against toothache. Root paste applied on forehead for headache and for improving eyesight. One or two seeds crushed in water and given to children suffering from stomach pain, ulcers; seed oil tonic, applied on skin diseases. Fruits for digestion, leprosy, bronchitis, tonic; for bone fracture, pulp fruit tied over the affected area.)

in English: sixstamens balata

in China: tie xian zi

in India: bakula, hale hannu, kannupalalai, kanupala, karupala, khair, khir, khiranee, khirni, khrini, kiraale, kiraanimara, kirani hannina mara, kirani mara, kirhaale, kirni, ksheera vriksha, ksheerini, manchipala, manilakkara, manjipaala, mukula, nemmi, nunni paala, pala, palamunnippala, palamunpala, palapandu chettu, palacettu, palai, palla, palu, patla, pete, pola, puttapala, raajana, raini, rajadana, rajadanah, ranjana, rayan, ullakai-palai

Manilkara jaimiqui C. Wright ex Griseb.) Dubard subsp. ***emarginata*** (L.) Cronquist (*Achras bahamensis* Baker; *Achras emarginata* (L.) Little; *Achras sapota* L.; *Achras zapotilla* var. *parvifolia* Nutt.; *Manilkara bahamensis* (Baker) Gilly; *Manilkara bahamensis* (Baker) H.J. Lam & B. Meeuse; *Manilkara emarginata* (L.) (Stem bark and latex wound healing, for skin diseases.)

in English: African pear

in Nigeria: kadanyar rafi (Hausa); emido, osere (Yoruba); ukpi, ukpwi (Igbo); nchome (Ekoi); wono (Ijaw)

in Yoruba: emido, ako emido

Manilkara sansibarensis (Engl.) Dubard (*Mimusops sansibarensis* Engl.)

Tanzania, Kenya to Mozambique. Tree, dense bushy crown, bark producing white latex when cut, very small green-white fragrant flowers borne in clusters in leaf axils, shiny flat seeds, ripe fruits milky sweet pulp eaten raw, lowland rainforest, in *Brachystegia* woodland and coastal forests, lowland dry evergreen forest, coastal bushland, evergreen woodland

See *Species Plantarum* 1: 349. 1753, *Pflanzenw. Ost-Afrikas*, C: 307. 1895 [*Die Vegetation der Erde* 9(3): 307. 1895] and *Ann. Inst. Bot.-Géol. Colon. Marseille*, III, 3: 26. 1915

(Bark to treat pneumonia, strips of bark cut, pounded into powder and drunk with warm water. Roots for venereal diseases and constipation.)

in Kenya: dhoka, doka, mcheji, mguvi, mng'ambo, mshonjie, mung'ambo, ng'ambo

in Tanzania: mcheji, mgambo, mguvi, mkunya, mti chuma, mtunda, mung'ambo, shonzi

Manilkara sulcata (Engl.) Dubard (*Manilkara sulcata* var. *sacleuxii* Dubard; *Mimusops sulcata* Engl.)

S. Somalia to northeastern Tanzania, Kenya. An evergreen shrub or small tree, many-branched, creamy yellow-green flowers, yellow fruit tipped by the old style, sweet pulp eaten raw, fruits much liked by elephants, lowland dry evergreen forest, coastal areas, bushland, *Brachystegia* woodland, on sandy soil, in *Cynometra* thickets

See *Species Plantarum* 1: 349. 1753, *Abh. Königl. Ges. Wiss. Göttingen, Math.-Phys. Kl.* 39: 36, 54. 1894 and *Ann. Inst. Bot.-Géol. Colon. Marseille*, III, 3: 26. 1915

(Roots used for treatment of snakebite, measles, skin diseases, venereal infections; leaves crushed and rubbed on the skin to treat rashes in children.)

in Kenya: kuraga, kuragi, mchambigi, mchedi, mcheje mume, mkurati, mteweji, mtsedzi, mtsezi, mzezi, nzezi

in Tanzania: mchambigi, mcheji, mcheji dume, mcheju, mduyuyu, msezi, msezi-mbago, msofu, mteweji, muhamba, mzezi, nzezi

(Used in Sidha. Leaves reputed poisonous; sap of the whole plant is caustic and vesicant. Yellow leaves decoction for colds, flu, fever, cough, diarrhea. Fruit in biliousness, fever, unripe fruit for diarrhea. Seeds diuretic, a decoction for oliguria; if eaten in large quantities the seeds are toxic or poisonous. Bark tonic, febrifuge, a decoction for diarrhea. Root decoction for amenorrhea.)

in English: beef apple, chiku tree, heart balata, mamee apple, naseberry, noseberry, sapodilla plum

in Central America: chicle, chicozapote, guela chiña, mamee sapote, mamee zapote, mamey colorado, mamey de tierra, nispero, quela chiña, quela dau, sapodilla, tzicotzapotl, tzicte (= chicle), tzictli (= chicle), yá, ya guelde, zapote, zapote grande, zapotillo

in Mexico: chacalhaas, cochitzapotl (= zapote del sueño), guela gue, guela xron, iztac tzapotl (= zapote blanco), mamey, mamey colorado, quela que, tezonzapote, tezontzapotl (= zapote como piedra de lava), ya xron, zapote colorado, zapote mamey

in Nicaragua: guaicume, zapote grande

in Peru: hison suma, mamey colorado, mamey zapote, nispero, sapote, zapote, zapotillo

in India: aadaara, chikku, chikku sapota, cimaiyiluppai, mutali, sapeta, sapota, sapotas, sapotasima, sapote, sima, simaippa, sopoto

in Japan: sajojira

in Malaysia: chiku, sau manila, sauh menila, sawa

in Philippines: chico, chiku tree, sapodilla, tsiko

in Thailand: ba mut, cha wa ni-lo, la-mut-fa-rang, ma mut, mut rang

Maniltoa R. Scheffer Fabaceae (Caesalpiniaceae, Detarieae, Leguminosae)

Possibly a Malesian/Papuan native name; see Rudolph Herman Christiaan Carel Scheffer (1844–1880), *Annales du Jardin Botanique de Buitenzorg*. 1: 20. 1876.

Maniltoa polyandra (Roxb.) Harms (*Cynometra polyandra* Roxb.)

India. Perennial non-climbing tree

See *Hortus Bengalensis*, or a catalogue ... 32. 1814, *Pl. Coromandel* 3: 83. 1820, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 1: 194. 1897

(Oil from the seeds used externally for leprosy and skin diseases.)

in India: peng, ping

in Malay: bulangkan, katang, malangkan

Mannia Hook.f. Simaroubaceae

For the German botanist Gustav Mann, 1836–1916, 1859–1862 on William Balfour Baikie's Niger Expedition, 1863 India and Assam, 1863–1891 Indian Forest Service, with the German botanist Hermann Wendland (1825–1903) wrote “On the palms of Western Tropical Africa.” *Trans. Linn. Soc.* 24: 421–439. (Nov.) 1864. See *Genera Plantarum* [Bentham & Hooker f.] 1(1): 309. 1862, Joseph Vallot, “Études sur la flore du Sénégal.” in *Bull. Soc. Bot. de France*. 29: 184. Paris 1882 and *Vég. Utiles Afrique Trop. Franç.* ix. 257. 1917, *Bull. Soc. Bot. France*, 1914, lxi. Mém. 8, 262. 1917, Ernest Nelmes and William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827–1927*. 274–276. [1931], Claude Spencer et al., “Survey of plants for antimalarial activity.” *Lloydia*.

Utrecht*, No. 26, 151, and No. 32, 279. 1936, *J. Arnold Arbor.* 1939, xx. 213. 1939

(Plant ash rubbed for poisonous caterpillar sting.)

in Sarawak: daun sangkor

Mappianthus Hand.-Mazz. Icacinaceae

The genus *Mappia* Jacq. and Greek *anthos* ‘flower’, after the French botanist Marcus Mappus, 1666–1736, M.D. Strasbourg 1694, he was the son of the botanist Marcus Mappus (1632–1701), see Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.* 1796–1800 and E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917–1933, *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 58: 150. 1921, John H. Barnhart, *Biographical Notes upon Botanists.* 2: 445. 1965, Sleumer H. *Icacinaceae.* in C.G.G.J. van Steenis [ed.], *Flora Malesiana*, series I, vol. 7, 1–87. Leyden, the Netherlands 1971, Stafleu and Cowan, *Taxonomic Literature.* 3: 284. Utrecht 1981.

Mappianthus iodoides Handel-Mazzetti

China, Vietnam. Lianas woody, climber, opposite leaves leathery, dioecious, perfumed flowers sulphur yellow in colour, axillary cymes, petals hairy campanulate-funnelform, staminate flowers with 5 stamens, green or yellow-green to orange-yellow or orange-red compressed edible drupes

See *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 58: 150. 1921, *Am. J. Botany* 88: 2259–2274. 2001, *Acta Botanica Yunnanica* 24(6): 710–711. 2002

(Roots and ripe stems astringent, for skin diseases, disinfectant.)

in China: ding xin teng

Maprounea Aublet Euphorbiaceae

A Guiana vernacular name, see Sosef, M.S.M. & al. “Checklist des plantes vasculaires du Gabon.” *Scripta Botanica Belgica* 35: 1–438. 2006.

Maprounea africana Müll.Arg.

Tropical Africa. Small tree or shrub, many-branched, slender, pale brown fissured bark, leaves tinged red-pink, crushed leaves bad smelling, flowers yellow-pink, filaments and anthers yellow, fruit yellowish red, common in savanna and forest edge, grassland, near salt marsh

See *Histoire des plantes de la Guiane Française* 2: 895, t. 342. 1775, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 1191. 1866

(Suspected of poisoning, smoke of plant causing diarrhea and vomiting. Boiled roots to treat high blood pressure. Ritual.)

in Congo: mutsangula

in Eastern Africa: msoro, mtunguru

in N. Rhodesia: kavulamume

in Tanzania: mpalupalu, nakaolo

Maprounea guianensis Aublet (*Aegopricum betulinum* L.; *Excoecaria guianensis* (Aubl.) Baill.; *Maprounea guianensis* var. *genuina* Müll.Arg., nom. inval.; *Maprounea guianensis* var. *nervosa* Müll.Arg.; *Maprounea guianensis* var. *undulata* Müll.Arg.; *Stillingia guianensis* (Aubl.) Baill.; *Stillingia hilariana* Baill.)

South America. Evergreen tree, small flowers without petals

See *Histoire des plantes de la Guiane Française* 2: 895, t. 342. 1775, *Pl. Surin.*: 15. 1775, *Linnaea* 32: 115. 1863, *Adansonia* 5: 332. 1865, *Prodr.* 15(2): 1191. 1866, *Histoire des Plantes* 5: 133. 1874, *Fl. Bras.* 11(2): 544. 1874

(Leaves decoction to bathe a patient with measles, and a post-partum remedy.)

in Suriname: awati, awatie, bonnie-bonnie-hoedoe, dekie-hatti, gingepau, perabisi, pira pisi, pisie pira, tei-hatti

Maprounea membranacea Pax & K. Hoffm. (*Maprounea bridelioides* Pierre ex Prain, nom. illeg.)

Tropical Africa, Cameroon.

See *Pflanzenr.* (Engler) *Euphorb.-Hippom.* 178. 1912, *Fl. Trop. Afr.* 6(1): 1003. 1913

(Root bark toxic.)

Maquira Aubl. Moraceae

See *Hist. Pl. Guiane* 2(Suppl.): 36, t. 389. 1775 and *Fl. Neotrop.* 7: 1–229. 1972, *Flora of Ecuador* 60: 1–128. 1998.

(Psychoactive, hallucinogen; cardiac glycosides, strophanthidin-based. Powdered bark consumed as snuff. Hallucinogenic and intoxicating snuff from the dried fruits. Seeds and bark used as stimulants and euphorants. Dart poisons.)

in Brazil: capinuri, cauchorana, miratinga, muiratinga, muiratinga-da-terra-firme, muiratinga-folha-lisa, pau-de-índio, pau tanino, rapé-de-índio, rapé-dos-índios

in Peru: q'apinuri

Marah Kellogg Cucurbitaceae

Marah, bitter water, see *Exodus*. XV, 23. Hebrew *marah*, fem. of *mar* 'bitter', Akkadian *maru* 'bitter', Latin *amarus*, *a, um* 'bitter', *maereo, -es, maerui, maestus, maerere* 'to be sad', Akkadian *marasu* 'to fall ill, to have a disease', *mararu* 'to be bitter', *marsu* 'sick, bitter, diseased', Hebrew *marah* 'to rub, to rub in'; referring to taste of all parts of the plants; see *Species Plantarum* 2: 1013. 1753, *Medical Repository*, ser. 2, 5: 350. 1808, *A Flora of North America*: containing ... (Torr. & A. Gray) 1(4): 542. 1840, *Proceedings of the California Academy of Sciences* 1: 38. 1854, *Pacific Railr. Rep.* 12, Book 2, Pt. 2 (Stevens) 61. 1861 [late 1860–Jan 1861], *Proc. Calif. Acad. Sci.* 2: 18. 1863.

Marah oregana (Torrey & A. Gray) Howell (*Echinocystis oregana* (Torr. ex S. Watson) Cogn.; *Echinocystis oregana* Cogn.; *Marah oregana* Howell; *Marah oregana* Greene; *Marah oregana* (Torr. & A. Gray) Greene, nom. illeg.; *Marah oreganus* (Torr. & A. Gray) Howell; *Megarrhiza marah* S. Watson; *Megarrhiza oregana* Torr. & A. Gray; *Megarrhiza oregona* (Torr. & A. Gray) S. Watson; *Megarrhiza oregona* Torr.; *Micrampelis oregana* (Torr. & A. Gray) Greene; *Micrampelis marah* Greene; *Micrampelis oregona* Greene; *Sicyos oreganus* Torr. & A. Gray)

North America. Perennial herb, vine

See *A Flora of North America*: containing ... (Torr. & A. Gray) 1(4): 542. 1840, *Pacific Railr. Rep.* 12, Book 2, Pt. 2 (Stevens) 61. 1861 [late 1860–Jan 1861], *Proceedings of the American Academy of Arts and Sciences* 11: 138. 1876, *Pittonia* 2(9): 129. 1890, *Man. Bot. San Franc. Bay* 144. 1894, *A Flora of Northwest America* 1: 239. 1898 and *Leaflet Bot. Observ. Crit.* 2: 36. 1910

(Plant poisonous, roots and seeds. Roots used as fish poison.)

in English: coast man-root, coastal manroot, old-man-in-the-ground, western wild cucumber

Maranta L. Marantaceae

Named for the Venetian botanist Bartolo(m)meo Maranta, circa 1500–1571, physician, among his publications are *De aquae Neapoli in Luculliano scaturientis (quam ferream vocant) metallica materia*. Neapoli [Naples] 1559, *Della Theriaca ed del Mithridato* libri due. Vinegia [Venice] 1572, *Methodi cognoscendorum simplicium* libri tres. Venetijis [Venice] 1559 and *Lucullianarum Quaestionum* libri quinque. Basileae 1564. See Carl Linnaeus, *Species Plantarum*. 1: 2. 1753, *Genera Plantarum*. Ed. 5. 2. 1754, *A Voyage to Terra*

Australis 2: 575. 1814 and Giovanni Battista de Toni, *Nuovi documenti sulla vita e sul carteggio di Bartolomeo Maranta, medico e simplicista del secolo XVI*. [Reale Istituto Veneto di Scienze, Lettere ed Arti. Atti, etc. tom. 71. pt. 2] Venezia 1912, *Anales Inst. Biol. Univ. Nac. Mexico* 21(2): 319–343. 1951, *Fieldiana, Bot.* 24(3): 207–221. 1952, *Fl. Veracruz* 89: 1–39. 1995.

Maranta arundinacea L. (*Maranta arundinacea* Billb. ex Beurl., nom. illeg.; *Maranta arundinacea* Blanco, nom. illeg.; *Maranta arundinacea* fo. *sylvestris* Matuda; *Maranta arundinacea* var. *indica* (Tussac) Petersen; *Maranta arundinacea* var. *variegatum* N.E. Br.; *Maranta indica* Tussac; *Maranta protracta* Miq.; *Maranta ramosissima* Wall.; *Maranta silvatica* Roscoe; *Maranta sylvatica* Roscoe ex Smith; *Maranta tessellata* var. *kegeljanii* E. Morren; *Maranta tonckat* Aubl.; *Phrynium variegatum* N.E. Brown; *Stromanthe tonckat* (Aubl.) Eichler; *Stromanthe tonckat* Eichl.)

Mexico, Brazil, tropical America. Perennial, erect, herbaceous, thin-stemmed, slender brittle stems, highly branched, creeping tuberous fleshy rhizome, broad-leaved, leaves alternate on the stem, inflorescence open and branched, terminal creamy white flowers, fruit ellipsoid, red rough seeds, rhizomes edible, grown as a source of starch, on dry rocky slopes, on shaded slopes and in forest, damp sandy ground, in disturbed situations, lowland areas, in forest understory

See *Species Plantarum* 1: 2. 1753, *Histoire des plantes de la Guiane Française* 1: 3. 1775, *Species Plantarum*. Editio quarta 1: 1, 17. 1797, *Flore des Antilles* 1: 183, t. 26. 1808, *Pl. Asiat. (Used in Ayurveda and Sidha. Used as a poultice to remove arrow poison from wounds. The starch has also been used internally against ingested poison, vegetable poisons, *Hippomane mancinella*, manchineel. The starch is readily digested, widely used for baby foods, good for infants, invalids, and those allergic to wheat. Used as a natural source of calcium and in the treatment of indigestion, asthenia, fever, diarrhea and urinary infections. Antidote to a variety of poisons, demulcent, nutritive, cooling, emollient, gastrointestinal adsorbent, postpartum remedy, rubefacient, acrid; mashed roots as plaster applied to areas of insect stings. Rituals, love potions.)

in English: arrowroot, Bermuda arrowroot, Indian arrowroot, obedience plant, St. Vincent arrowroot, West Indian arrowroot

in French: herbe aux flèches, marante

in Spanish: arruruz, chuchute tamalera

in Brazil: agutiguepe, araruta, araruta-comum, araruta-palmeira, maranta, shimi pampana

in Costa Rica: periquitoya

in Ecuador: platanillo

in Mexico: coyol de monte

in West Indies: arrowroot, dictam, l'envers, lanve

in India: aararoot, ararut, araruttukkilangu, aroruttu, aruruttukkilangu, citalapattiri, citalapattirikam, keturi halodhi, kookai neer, koovai kizhangu, kove hittu, kuamau, kukai niru, kuva, kuvai, kuvehittu, kuvva, laru-rui, palagunda, palagunta, tavaksiri, tavkil, tikhor, tikkor, tugaksiri

in Indonesia: arairut

in China: zhu yu

in Myanmar: pen-bava

in Philippines: araro, araru, aroru, aruru, bai, galamaka, sagu

in Sierra Leone: ararut

Maranta virgata (Roxb.) Wall. (*Arundastrum virgatum* (Roxb.) Kuntze; *Clinogyne virgata* (Roxb.) Benth.; *Donax virgata* (Roxb.) K. Schum.; *Donax virgata* (Roxb.) Schum.; *Maranta virgata* (Roxb.) A. Dietr.; *Maranta virgata* (Roxb.) Wight; *Phrynium virgatum* Roxb.; *Phyllodes virgata* (Roxb.) Kuntze; *Schumannianthus virgatus* (Roxb.) Rolfe)

India. Often as *Schumannianthus virgatus* (Roxb.) Rolfe

See *Asiatic Researches* 11: 324. 1810, *Species Plantarum* 1: 21. 1831, *A Numerical List of Dried Specimens* 6616. 1832, *Icones Plantarum Indiae Orientalis* t. 2015. 1853, *Genera Plantarum* 3: 651. 1883, *Revisio Generum Plantarum* 2: 684, 695. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 15: 440. 1892 and *Das Pflanzenreich* IV 48(Heft 11): 33. 1902, *Journal of Botany, British and Foreign* 14: 244. 1907

(Rhizome paste in water taken to cure stomach pain.)

in India: vellakoova

Maranthes Blume Chrysobalanaceae

From the Greek *maraino* 'to wither away, waste away', *maransis* 'a withering, wasting' and *anthos* 'flower', referring to the flowers; Hebrew *marah* 'to rub, to rub in'; some suggest from the Latin *mare*, *maris* and *anthos*, 'flowers by the sea'; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 89. Batavia 1825.

Maranthes glabra (Oliv.) Prance (*Maranthes glabra* var. *gilletii* (De Wild.) Mendes; *Parinari glabra* Oliv.)

Tropical Africa. Tree, straight, crown dense and spreading, slash red, sap-wood white to reddish yellow-brown, petals pale yellow, umbel-like inflorescences, oily edible seeds

See *Flora of Tropical Africa* 2: 370. 1871 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 245. 1906 [*Ann. Mus. Congo Belge, Bot. sér. 5, i. 245. 1906.*], *Boletim da Sociedade Broteriana*, ser. 2 40: 184. 1966

(Exudate irritant. Bark for diarrhea, dysentery, inner bark soaked to treat dysentery; bark root for skin troubles; bark decoction drunk for anemia, and as a tonic for pregnant women. Fruit used as a bait in traps for river-hog and antelope. Sap ordeal-poison, instilled into the eye.)

in Cameroon: asila oman, bokanga, n'ko

in Central Africa Republic: oku

in Congo: amapipialibo, amapualibo, borosho, essou, kanja, metombi, mokanja, motombi

in Gabon: ekoulebang

in Ghana: kagyibiri, pinini, punini, takrowa

in Ivory Coast: alobo, amalarué, aramon, bukuma, zéri zéri

in Liberia: kpo kala, zwahn

in Nigeria: abo-idofin, dabadogun, oghoye, óghòyè

in Sierra Leone: ndondelole, sakasi, sasi

Marantochloa Brongn. ex Gris Marantaceae

The genus *Maranta* and Greek *chloe*, *chloa* 'a grass', see *Bulletin de la Société Botanique de France* 7: 321. 1860.

Marantochloa comorensis Brongn. ex Gris (*Clinogyne comorensis* (Brongn. ex Gris) H. Perrier; *Clinogyne comorensis* H. Perrier; *Clinogyne similis* Gagn.; *Donax comorensis* (Brongn. ex Gris) Baill.; *Marantochloa similis* (Gagn.) Pellegr.)

Comoros, Madagascar.

See *Bull. Soc. Bot. France* 7: 231. 1860, *Genera Plantarum* 3: 651. 1883, *Bull. Mens. Soc. Linn. Paris* 2: 1200. 1895 and *Bulletin de la Société Botanique de France* 50: 587. 1903, *Mém. Soc. Linn. Normandie, Bot.* 1(4): 46. 1938, *Flore de Madagascar et des Comores* 47: 26. 1946

(Ripe fruits swallowed to prevent the formation of boils.)

in Madagascar: sintonala, tsintombamba

Marantochloa congensis (K. Schum.) J. Léonard & Mullend. (*Clinogyne congensis* (K. Schumann) K. Schum.; *Clinogyne inaequilatera* (Baker) K. Schum.; *Clinogyne ledermannii* Loes.; *Clinogyne pubescens* Loes.; *Clinogyne ubangiensis* Gagnep.; *Donax congensis* K. Schum.; *Marantochloa congensis* var. *nitida* Leonard & Mullend.; *Marantochloa congensis* var. *pubescens* (Loes.) Leonard & Mullend.; *Marantochloa inaequilatera* (Baker) Hutch.; *Marantochloa ubangiensis* (Gagnep.) Pellegr.; *Phrynium inaequilaterum* Baker)

Sierra Leone, Nigeria. Herb, slender, branched, rhizomatous, forming thickets, stems hairy to glabrous, greenish white or yellowish flowers, fruits green to light green to bright red, hairy fruit 3 lobed, swamp, in wet depression on forest floor, in clearing

See *Flora Cochinchinensis* 1: 1, 11. 1790, *Bulletin de la Société Botanique de France* 7: 321. 1860, *Genera Plantarum* 3: 651. 1883, *Bot. Jahrb. Syst.* 15: 439. 1892, *Nat. Pflanzenfam., Nachtr.* 1: 96. 1897, *Fl. Trop. Afr.* 7: 325. 1898 and *Pflanzenr.*, IV, 48: 65. 1902, *Bull. Soc. Bot. France* 55(8): 86. 1908, *Bot. Jahrb. Syst.* 48: 285–286. 1912, *Fl. W. Trop. Marantochloa flexuosa sensu Hutchinson; *Marantochloa leucantha* Milne-Redh.)

Sierra Leone, Cameroon, Sudan, Uganda. Herb, erect or sprawling, tufted, branched, flowers pink to purple, anthers bright yellow, fruit scarlet, leaves used as a kola nut wrapping, stems used to make mats and baskets, swamp forest, in occasionally inundated area, savanna, at edge of seasonally flooded forest, along stream, in seasonally inundated bushland

See *Genera Plantarum* 3: 651. 1883, *J. Bot.* 25: 132. 1887, *Bot. Jahrb. Syst.* 15: 438, 440. 1892, *Nat. Pflanzenfam., Nachtr.* 1: 96. 1897 and *Pflanzenr.*, IV, 48: 63. 1902, *Bulletin de la Société Botanique de Belgique* 83: 19, 21. 1950

(The leaves medicinally used, the root applied to swollen buboes, the seeds taken for pulmonary troubles, for coughs and bronchitis. Sedative, poison antidotes.)

in English: Yoruba soft cane

in Cameroon: berone, mbosé, mosobo

in Ghana: anworom, sibiri-nua, sugugwa

in Ivory Coast: bimbru, blissi yè, gblissi vé, uesenja

in Nigeria: abalaba, abelebei, ere ute, izon abelebei, omwa, onwa, owei ute, pou abelebei, uma

Marantochloa ramosissima (Benth.) Hutch. (*Arundastrum ramosissimum* (Benth.) Kuntze; *Clinogyne arillata* K. Schum.; *Clinogyne ramosissima* (Benth.) K. Schum.; *Phrynium ramosissimum* Benth.)

West Africa, Ivory Coast, Nigeria. Herb, many-branched, flowers white-pinkish, red fruit, forest, the leaves are used to make the filters for palm oil processing, the baskets that are used for fish drying are made from the stems

See *Niger Fl.*: 532. 1849, *Revisio Generum Plantarum* 2: 684. 1891 and *Pflanzenr.*, IV, 48: 64. 1902, *Fl. W. Trop. Afr.* 2: 33. 1936

(Expectorant, emetic, aphrodisiac. Fruit swallowed to prevent boils. Leaves as a sedative, as a poison antidote. Sap from the root stock to promote milk flow. Flowers chewed to relieve intestinal disorders and stomachache.)

Mareya Baillon Euphorbiaceae

After the French physician and naturalist Étienne-Jules Marey, 1830–1904 (d. Paris), physiologist, zoologist, invented the sphygmograph in its modern form and the use of graphical methods in scientific research. See James Bell Pettigrew, *La locomotion chez les animaux*. [Octavo, first edition in French; English 1872.] Paris 1874, Coughtrie, *Aerial Locomotion. Pettigrew versus Marey*. [Reprinted from the *Quarterly Journal of Science*, April, 1875.] London 1875 and Garrison and Morton, *Medical Bibliography*. 776. 1961, Michael Gross, in *D.S.B.* 9: 101–103. 1981.

Mareya micrantha (Benth.) Müll.Arg. (*Acalypha leonensis* Benth.; *Acalypha micrantha* Benth.; *Mareya leonensis* (Benth.) Baill.; *Mareya micrantha* var. *leonensis* (Benth.) Müll.Arg.; *Mareya micrantha* var. *nitida* Beille; *Mareya spicata* Baill.; *Mareya spicata* var. *leonensis* (Benth.) Pax & K. Hoffm.; *Mareya spicata* var. *micrantha* (Benth.) Pax & K. Hoffm.)

W. & W. Central Trop. Africa. Shrub or small tree, spreading, crown dense, bark thin, stiff glossy leaves, inflorescences bisexual, flowers white or greenish, small ripe fruits red, birds avoid eating the fruit, in forest, along stream

See *Species Plantarum* 2: 1003–1004. 1753, *Niger Flora* 504–505. 1849, *Adansonia* 1: 73–74. 1860, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(2): 792, 796. 1866, *Histoire des Plantes* 5: 213. 1874 and *Bull. Soc. Bot. France* 55(8): 82. 1908, *Das Pflanzenreich* IV 147, 14(Heft 68): 12. 1919

(The leaves and fruits bitter and very poisonous causing drastic purging. Leaves violent purgative, vermifuge, abortifacient, febrifuge, stomachic, poisonous when taken in excess. Roots antidotes, analgesic, abortive. The bark with other drug-plants used topically for leprosy, skin diseases. An ordeal poison.)

in English: numer one

in Nigeria: oke-owuma, uhosa

in Sierra Leone: ngalamum, nombaw-wan, nwangwai, nwanwa, nwanwui, walewale

in West Africa: an gbesen, nwanwa

Margaritaria L.f. Phyllanthaceae (Euphorbiaceae)

Latin *margarita*, *ae*, Greek *margarites*, Latin *margaritarius*, *a*, *um*, ‘pearl, of the pearls, pearly’, referring to the flowers or to the white and shining glands or to the seeds of some species of these plants, see *Supplementum Plantarum* 66, 428. 1782 [1781 publ. Apr 1782], *Hooker’s Journal of Botany and Kew Garden Miscellany* 4: 345. 1852, *Étude générale du groupe des Euphorbiacées* 620. 1858, *Adansonia* 1: 186. 1861, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27(ser 6. 2): 48. 1864 and *J. Arnold Arbor.* 60(4): 403–444. 1979, *Ann. Missouri Bot. Gard.* 75(3): 1087–1144. 1988, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 73(2): 155–281. 2002, *Revista de Biología Tropical* 57(4): 1193–1200. 2009. Formerly included in *Phyllanthus*.

Margaritaria anomala (Baill.) Fosberg (*Anisonema eglandulosum* Decne.; *Cicca anomala* Baill.; *Diasperus erythroxyloides* (Müll.Arg.) Kuntze; *Flueggea eglandulosa* Baill.; *Flueggea major* Baill.; *Margaritaria anomala* var. *cheloniphorbe* (Hutch.) Fosberg; *Margaritaria rhomboidalis* (Baill.) G.L. Stuttgart 1993.

Markea coccinea Rich.

Colombia.

See *Actes de la Société d'Histoire Naturelle de Paris* 1: 107. 1792

(Leaves decoction in the treatment of conjunctivitis and eye diseases. Dried powdered leaves mixed with flour of *Manihot esculenta* and eaten to expel intestinal parasites.)

Markhamia Seemann ex Baillon Bignoniaceae

For the British (b. Yorkshire) traveller Sir Clements Robert Markham, 1830–1916 (d. London), botanist, geographer, explorer, plant collector, 1844–1851 in the Royal Navy, 1852–1854 in Peru, President of the Royal Geographical Society and introducer of *Cinchona* into India, 1858–1877 employed by the India Office, 1864 Fellow of the Linnean Society, 1873 Fellow of the Royal Society, he played an active role in preparations for R.F. Scott's *Discovery* voyage (1901–1904) and the expedition of 1910–1912, among his valuable and very numerous works are *The Cinchona species of New Granada* ... London 1867, *Peruvian Bark*. A popular account of the introduction of *Cinchona* cultivation into British India ... London 1880, *Vocabularies of the General Language of the Incas of Peru or Runa Simi, called Quichua by the Spanish grammarians*. London 1908. See *J. Bot.* 1: 226. 1863, *Hist. Pl.* (Baillon) 10: 47. 1888 and G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. 1:

166. London 1904, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 449. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 253. 1972, Thomas F. Glick, in *D.S.B.* 9: 123–124. 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 467. 1994.

Markhamia acuminata (Klotzsch) K. Schum. (*Spathodea acuminata* Klotzsch)

Tanzania.

See *Flore d'Oware* 1: 46–47–48, t. 27, 28. 1805, *Naturwissenschaftliche Reise nach Mossambique* ... 1: 191. 1861, *Die Pflanzenwelt Ost-Afrikas* C: 363. 1895

(Roots infusion poisonous. Roots decoction drunk for constipation. Powdered bark for venereal diseases.)

in Tanzania: mtawalanda

Markhamia lutea (Benth.) K. Schum. (*Dolichandrone hildebrandtii* Baker; *Dolichandrone lutea* Benth. ex Hook. & Jacks.; *Dolichandrone platycalyx* Baker; *Markhamia hildebrandtii* (Baker) Sprague; *Markhamia platycalyx* (Baker) Sprague; *Muenteria lutea* (Benth.) Seem.; *Spathodea lutea* Benth.)

East Africa, Ghana, Congo. Evergreen tree or shrub, upright, narrow irregular crown, reddish bark, leaves compound, terminal clusters of trumpet-shaped yellow flowers, very long twisted capsules in spiral clusters, flat-winged seeds, in tree bushland, grassland, savanna forest, highland areas

See *Flore d'Oware* 1: 46–47. 1805, *Niger Flora* 461. 1844, *Histoire des Plantes* 10: 47. 1888 (1891), *Die Natürlichen Pflanzenfamilien* 4(3b): 242. 1895

(The leaves used in the treatment of snakebite; bark chewed to alleviate toothache. Diuretic, rejuvenant, antirheumatic, effective on skin affections.)

in English: yellow trumpet tree

in Cameroon: angossa, atag, gonja, maganga, osse

in East Africa: msambia (Haya), muho, muu (Kikuyu), nsambya (Luganda)

in Ghana: efuo-bese

in Ivory Coast: blu, niété brissu, poi un dubu, tomboro

Markhamia obtusifolia (Baker) Sprague (*Dolichandrone obtusifolia* Baker; *Markhamia lanata* K. Schum.; *Markhamia paucifoliolata* De Wild.; *Markhamia tomentosa* (Benth.) K. Schum.; *Markhamia verdickii* De Wild.)

Tanzania.

See *Niger Flora* 462. 1849, *Annals and Magazine of Natural History* ser. 3. 10: 31. 1862, *Bulletin of Miscellaneous Information Kew* 1894: 31. 1894, *Die Natürlichen Pflanzenfamilien* 4(3B); 242. 1895 and *Annales du musée du Congo. Série I, Botanique*, sér. 4 1: 131–132. 1903, *Bulletin of Miscellaneous Information Kew* 1919: 312. 1919

(Leaves chewed as an antidote in snakebite, and a cold infusion or latex from the stem bark is applied to the wound after making several incisions.)

in Southern Africa: mubfeya (Shona)

in S. Rhodesia: muPfeya

in Tanzania: ng'ubu

Markhamia platycalyx (Baker) Sprague

Nigeria. Tree, yellow flowers

See *Icones Plantarum* pl. 28: t. 2800. 1905

(Leaves and roots antimicrobial, stomachic, febrifuge, for cough, fevers, flu, conjunctivitis.)

Markhamia tomentosa (Benth.) K. Schumann ex Engler

West Africa, Angola. Shrub or tree, large yellow flowers in long terminal racemes

(The leaves used in the treatment of snakebite; bark chewed to alleviate toothache. Diuretic, rejuvant, antirheumatic, mild laxative, effective on skin affections, localized pain.)

in Cameroon: abbe, bobedu, malanga, mawelu

in Congo: lubota

in Gambia: asungkares, bunamkaresabu

in Ghana: kwaensa, tomboro

in Guinea: kafau andu

in Guinea-Bissau: n'alè, um-halè

in Ivory Coast: bacombi, blu, kokè, kravaka, poi un dubu, tomboro, vorone, vuluné, vuruni

in Nigeria: akoko, echeru, egbo, irù aaya, iru-aya, iwe, og bano, ogie-ikhimi, ogie-ikhimwim, ogikhinruwin, ogirisi, ognie-khimi, onyiri akikara; akoko, iru-aya (Yoruba); ogie ikhimi (Edo); onyiri akikara (Igbo)

in Senegal: bétali, blis, bunamkaresabu, irigana, kafanadu, kasungkares, kisal, sibupal sudicam

in Sierra Leone: kodo, luguna, sundu kumasore

in Togo: tschitschine

in Yoruba: iru aaya

Marrubium L. Lamiaceae (Labiatae)

Latin *marrubium*, *ii* ("marrubium quod Graeci prasion vocant, alii linostrophon, nonnulli philopaeda, aut philochares", Plinius), Hebrew *marrob* 'bitter, bitter juice'; see Carl Linnaeus, *Species Plantarum*. 2: 582–584. 1753, *Genera Plantarum*. Ed. 5. 254. 1754, *Labiatae Gen. Spec.* 586. 1834, *Mém. Acad. Imp. Sci. St.-Pétersbourg Divers Savans* 2(6): 565. 1835 and *Fieldiana, Bot.* 24(9/3): 237–317. 1973, *Stuttgarter Beitr. in Yoruba: aranbole

Marumia Blume Melastomataceae

For the Dutch (b. Delft) scientist Martin (Martinus) van Marum, 1750–1837 (Haarlem, Netherlands), physician, 1773 received his medical degree, owner of a garden (in which

he cultivated especially aloes), plant physiologist, naturalist, discovered carbon monoxide (with van Troostwijk), Director of Teyler's Cabinet of Physical and Natural Curiosities and Library, traveller, his writings include *Verhandelingen uitgegeven door Teyler's tweede Genootschap*. 1785–1787–1795, *Dissertatio ... de motu Fluidorum in plantis, experimentis et observationibus indagato*, etc. Groningae 1773, *Dissertatio ... qua disquiritur, quousque motus fluidorum*, etc. Groningae 1773, *Lettre ... à M. Berthollet*, ... contenant la description d'un Gazomètre. [Haarlem 1791], *Seconde lettre à M. Berthollet*, contenant la description d'un Gazomètre très simple. Harlem 1792 and *Catalogus der Bibliotheek van Teyler's Stichting*. [Compiled by M. van Marum.] Haarlem 1832, worked with Gerhard Kuyper and C.H. Pfaff, in 1785 met Lavoisier in Paris, corresponded with C.P. Thunberg, Banks and A. Volta. See Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Catalogus ...* 79. 1823, *Sylloge Plantarum Novarum* 2: 11. 1828[1825], *Flora* 14: 503. 1831 and Alessandro G.A.A. Volta (1745–1827), *La Correspondance de A. Volta et M. van Marum*, publiée par J. Bosscha. Leiden 1905, Warren R. Dawson, *The Banks letters*, a Calendar of the Manuscript Correspondence of Sir Joseph Banks. London 1958, J.H. Barnhart, *Biographical Notes upon Botanists* 2: 456. 1965, Alida M. Muntendam, in *D.S.B.* 9: 151–153. 1981.

Marumia nemorosa Blume

Malaysia.

See *Flora* 14: 505. 1831

(Rub the leaves upon the scalded place.)

Malay name: senuduk

Mascagnia (Bertero ex DC.) Colla Malpighiaceae

After the Italian (b. near Volterra) physician Paolo Mascagni, 1752–1815 (d. Florence), anatomist, professor of anatomy at Siena, author of the famous *Vasorum lymphaticorum corporis humani historia et ichnographia*. Senis [Siena] 1787; see *Hortus Ripulensis* 85. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 585. 1824 and *Arbeiten Bot. Inst. Königl. Lyceums Hosianum Braunsberg* 3: 3, 11, 25. 1908, Garrison and Morton, *Medical Bibliography*. 1104. 1961, Federico Allodi, in *D.S.B.* 9: 153–154. 1981.

Mascagnia macroptera (Moc. & Sessé ex DC.) Nied. (*Callaeum macropterum* (Moc. & Sessé ex DC.) D.M. Johnson; *Hiraea macroptera* Moc. & Sessé ex DC.)

North America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 586. 1824, *Hortus Ripulensis* 85. 1824 and *Arbeiten aus dem Botanischen Institut des Königl. Lyceums Hosianum in Braunsberg* 3: 27. 1908, *Systematic Botany* 11(2): 340. 1986

(Infusion from the roots taken as a remedy for colds and diarrhea.)

Massularia (K. Schumann) Hoyle Rubiaceae

Latin *massula*, *ae* ‘a little lump, a little mass’, see Burt-Davy, Joseph (1870–1940), *Checklists of the forest trees and shrubs of the British Empire*: no. 3: Draft of first descriptive checklist of the Gold Coast. Oxford: Imperial Forestry Inst., 1937.

Massularia acuminata (G. Don) Bullock ex Hoyle (*Gardenia acuminata* G. Don; *Randia acuminata* (G. Don) Benth.; *Randia cacaocarpa* Wernham)

Tropical Africa. Shrub or small tree, slender, hard and elastic wood, leaves glossy, corolla 5-merous, flowers burgundy-red, young fruits waxy whitish green, beaked fruits shiny, fruits eaten by monkeys, in forest, streamside, in secondary forest

See *Species Plantarum* 2: 1192. 1753, *Philosophical Transactions of the Royal Society of London* 51: 935, pl. 23. 1761, *Gen. Hist.* 3: 499. 1834, *Niger Flora* 385. 1849 and *J. Bot.* 54: 226. 1916, *Checklist of the Gold Coast* 110, 115. 1937, *Plant Systematics and Evolution* 149: 89–118. 1985, *Willdenowia* 21: 233–238. 1991

(Antimicrobial. Leaves and fruits for insect bites and hemorrhage. Fruits green to be taken as stomach medicine. Fruit boiled in water and the water drunk to cause abortion in human. Pulped roots employed as enema for dysentery.)

in English: chewing stick tree

in Cameroon: mindo, molindo, zo’o

in Central African Republic: jedi

in Congo: bilitu

Mastersia Bentham Fabaceae (Phaseoleae)

Named after the English botanist John White Masters (*circa* 1792–1873, d. Kent), gardener, plant collector in British India; the genus was also dedicated to the English botanist Maxwell Tylden Masters, 1833–1907, physician, 1865–1907 editor of *Gardener’s Chronicle*, author of *Vegetable teratology*. [Ray Society.] London 1869; see *Genera Plantarum* 1: 535. 1865 and *Blumea* 30: 77–87. 1984, *Acta Bot. Yunnan.* 20(2): 207–210. 1998.

Mastersia assamica Benth. (*Mastersia cleistocarpa* Baker)

India. Perennial climbing shrub

See *Transactions of the Linnean Society of London* 25: 300, f. 34. 1866

(Exudate from the stem applied for drying and healing of an open wound.)

in India: rabe-rata

Mastixia Blume Cornaceae (Mastixiaceae)

Latin *mastiche*, *mastice*, *mastix*, *masticis* and Greek *mastix* for mastic, an odoriferous gum from the mastic-tree (Plinius);

some suggested from the Greek *mastix*, *mastigos* ‘a whip, scourge’; see *Bijdragen tot de flora van Nederlandsch Indië* 13: 654. 1826 and *Blumea* 23(1): 64, 66, 75. 1976, Helmut Genoust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 370. Basel 1996.

Mastixia arborea (Wight) C.B. Clarke (*Bursinopetalum arboreum* Wight; *Mastixia arborea* C.B. Clarke)

Sri Lanka, India. Tree

See *Icon. Pl. Ind. Orient.* [Wight] 3: t. 956. 1845, *Fl. Brit. India* [J.D. Hooker] 2: 745. 1879

(Resin burnt to repel flies and mosquitoes.)

in India: eramba maram, kunthirikkam

Matayba Aublet Sapindaceae

A vernacular name in French Guiana, see *Histoire des plantes de la Guiane Française* 1: 331–332, t. 128. 1775 and *Fieldiana, Bot.* 24(6): 234–273. 1949.

Matayba guianensis Aubl. (*Matayba steinbachii* Melch.)

French Guiana, Brazil.

See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 349. 1928, *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 291–391. 1956, *Candollea* 45(1): 373–378. 1990, *Journal of Ethnopharmacology* 110(1): 165–170. 2007

(Antiplasmodial, the root bark.)

Matelea Aubl. Asclepiadaceae

Matelea denticulata (Vahl) Fontella & E.A. Schwarz (*Cynanchum denticulatum* Vahl; *Cynanchum guianense* (Decne.) R.W. Holm; *Cynanchum viride* Vell.; *Cynanchum viridiflorum* G. Mey.; *Gonolobus denticulatus* (Vahl) W.D. Stevens; *Gonolobus guianensis* Spreng.; *Gonolobus obtusiflorus* Decne.; *Gonolobus stelliflorus* E. Fourn.; *Gonolobus viridiflorus* Schult.; *Matelea viridiflora* (Standl.) Woodson; *Vincetoxicum viridiflorum* Standl.)

West Indies.

See *Histoire des plantes de la Guiane Française* 277, pl. 109, f. 1. 1775, *Eclogae Americanae* 2: 23. 1798, *Flora Boreali-Americana* 1: 119. 1803 and *Boletim do Museu Botânico Municipal* 46: 1–10. 1981, *Ernstia* 18: 1–12. 1983, *Phytologia* 64: 334. 1988

(Leaf poultices on boils, carbuncles, gum boils.)

Matricaria L. Asteraceae

Latin *matrix*, *tricis* (*mater*, *tris* ‘mother’) ‘the womb’; *matricaria*, in Pseudo Apuleius Barbarus, *Herbarium*. 66, l. 9., in reference to its former medical use against uterus diseases.

See Carl Linnaeus, *Species Plantarum*. 2: 890–891. 1753, *Genera Plantarum*. Ed. 5. 380. 1754, *A Natural Arrangement of British Plants* 2: 454. 1821, *Ueber die Tanaceteen* 31–34. 1844 and Robert William Theodore Gunther, *The Herbal of Apuleius Barbarus*. London 1925, *Taxon* 41: 566. 1992, *Taxon* 44: 611–612. 1995, *Fl. Sibir.* (Asterac.). 13: 84. 1997 (publ. 1998).

Matricaria chamomilla L. (*Chamomilla chamomilla* (L.) Rydb., nom. illeg.; *Chamomilla courrantiana* (DC.) C. Koch; *Chamomilla recutita* (L.) Rauschert; *Chamomilla vulgaris* Gray; *Chrysanthemum chamomilla* (L.) Bernh.; *Matricaria chamomilla* fo. *courrantiana* (DC.) Fiori & Paol.; *Matricaria chamomilla* fo. *kochiana* (Sch. Bip.) (Capitula carminative, analgesic, sedative, used for relieving muscular spasms, convulsion.)

in English: dog's chamomile, German chamomile, sweet false chamomile, wild chamomile,

in Arabic: babnouj, babounag, babounej, babounig, bibounej

in Mexico: guia gueza, quije queza

in China: mu ju

Matteuccia Todaro Onocleaceae (Aspleniaceae, Dryopteridaceae, Woodsiaceae)

After the Italian (b. Forlì) physiologist Carlo Matteucci, 1811–1868, in 1842 discovered the induced twitch. See *Species Plantarum* 2: 1066. 1753, *Methodus Plantarum* 25. 1754, *Plantae Cryptogamicae Florae Gottingensis* 287. 1770, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 1071. 1809, *American monthly magazine and critical review* 2: 268. 1818, *American monthly magazine and critical review* 4: 195. 1819, *Giorn. Sci. Nat. Econ. Palermo* 1(3–4): 235. 1866, *Revisio Generum Plantarum* 2: 819–820. 1891 and *Botanical Magazine* 42(499): 345. 1928, G. Moruzzi, *L'opera elettrofisiologica di Carlo Matteucci*. Ferrara 1973, *Fern Gaz.* 11(2–3): 141–162. 1975, *Acta Phytotax. Geobot.* 31(4–6): 137. 1980, Giuseppe Moruzzi, in *D.S.B.* 9: 176–177. 1981. *Matteuccia* is one of several genera known to store starch grains in long-persistent petiole bases (trophopods). It is also the source of edible fiddleheads, the canning of which is a local industry in New England and adjacent Canada. The fiddlehead of *Matteuccia struthiopteris* is the state vegetable of Vermont.

Matteuccia struthiopteris (L.) Todaro (*Matteuccia pensylvanica* (Willd.) Raymond; *Matteuccia struthiopteris* var. *pubescens* (Terry) Clute; *Onoclea pensylvanica* (Willd.) Sm.; *Onoclea struthiopteris* (L.) Hoffm.; *Osmunda struthiopteris* L.; *Pteretis pensylvanica* (Willd.) Fernald; *Pteretis struthiopteris* (L.) Nieuwl.; *Pterinodes struthiopteris* (L.) Kuntze; *Struthiopteris europaea* Hornem.; *Struthiopteris filicastrum* All.; *Struthiopteris germanica* fo. *pubescens* Terry; *Struthiopteris pensylvanica* Willd.)

North America.

See *Species Plantarum* 2: 1062, 1066. 1753, *Methodus Plantarum* 25. 1754, *Flora Pedemontana* 2: 283. 1785, *Deutschland Flora* 2: 11. 1795, *Species Plantarum*. Editio quarta 5(1): 289. 1810, *Hortus Regius Botanicus Hafniensis* 2: 945–946. 1815, *American monthly magazine and critical review* 2: 268. 1818, *Giornale di Scienze Naturali ed Economiche di Palermo* 1(3–4): 235. 1866, *Revisio Generum Plantarum* 2: 819–820. 1891 and *Fern Bulletin* 16: 5, 47–48. 1908, *American Midland Naturalist* 3: 197. 1914, Fernald, M.L. “Critical plants of the upper Great Lakes region of Ontario and Michigan.” *Rhodora* 37: 197–222. 1935, *Rhodora* 47(556): 123. 1945, *Nature Canada* 77(1–2): 55. 1950, Hill, R.W. and W.H. Wagner Jr. “Seasonality and spore type of pteridophytes in Michigan.” *Michigan Bot.* 13: 40–44. 1974, *Taxon* 32: 268–269. 1983, Von Aderkas, P. “Economic history of ostrich fern, *Matteuccia struthiopteris*, the edible fiddlehead.” *Econ. Bot.* 38: 14–23. 1984, *Nordic J. Bot.* 14: 149. 1994

(A number of outbreaks of foodborne illness from eating raw or undercooked fiddleheads has been reported in Canada and the United States since 1994. Although no proven cause for this health hazard has been identified, the most likely cause seems to be an unidentified natural toxin present in the fiddleheads.)

in English: ostrich fern

Matteuccia struthiopteris var. *pensylvanica* (Willdenow) C.V. Morton (*Matteuccia pensylvanica* (Willdenow) Raymond; *Matteuccia struthiopteris* var. *pubescens* (Terry) Clute; *Matteuccia struthiopteris* var. *struthiopteris*; *Osmunda struthiopteris* L.; *Pteretis nodulosa* var. *pubescens* (Terry) Clute; *Pteretis pensylvanica* (Willdenow) Fernald; *Pteretis struthiopteris* (Linnaeus) Nieuwland; *Pteretis struthiopteris* var. *pensylvanica* (Willd.) Farw.; *Struthiopteris filicastrum* All.; *Struthiopteris germanica* var. *pensylvanica* (Willd.) Lowe; *Struthiopteris nodulosa* var. *pubescens* (Terry) Clute; *Struthiopteris pensylvanica* Willdenow)

North America.

See *Flora Pedemontana* 2: 283. 1785, *Sp. Pl.* 5(1): 289. 1810, *American monthly magazine and critical review* 2: 268. 1818 and *Report of the Michigan Academy of Science, Arts and Letters* 21: 346. 1920, *Amer. Fern J.* 40: 247. 1950

(Toxic. Under no circumstances should fiddleheads be eaten raw. Proper handling and thorough cooking of fiddleheads can reduce the potential for foodborne illness.)

Matthaea Blume Monimiaceae

See *Mus. Bot.* 2(1–8): 89, t. 10. 1852 [1856] and *Contributions from the Queensland Herbarium*. 6: 6. 1969.

Matthaea latifolia Perkins

Malay Peninsula.

See *Bot. Jahrb. Syst.* 25(4): 563. 1898

(Leaves used for headache)

Malay name: churum

Matthiola R. Br. Brassicaceae

For the Italian (b. Siena) botanist Pietro Andrea Gregorio Mattioli (Petrus Andreas Matthiolus), circa 1500/1501–1577 (d. Trento), naturalist, herbalist, 1523 received an M.D. from the University of Padua, (in Prague) physician to Maximilian II and to Ferdinand I of Austria, among his works are *Opusculum de simplicium medicamentorum facultatibus secundum locos, & genera*. [12mo, first edn, an abridgement of Mattioli's *Commentarii* on Dioscorides.] Venetiis 1569, *Epistolarum medicinalium libri quinque*. Pragae 1561. See Girolamo Fracastoro (1478–1553), *Syphilis sive morbus gallicus*. [First edn. of the most famous medical poem in literature, composed for Cardinal Pietro Bembo.] Verona 1530, Niccolò Massa, *Liber de morbo gallico*. [Small 4to, second edition, one tract of the book is devoted to *Guaiacum*, or *lignum indicum*.] Venice 1532, Josephus Tectander, editor, *Morbi Gallici curandi ratio ... a variis ... medicis conscripta: nempe P.A. Matthaeolo, etc.* [Included is the first work describing syphilis of the newborn by P.A. Mattioli; it contains a long section on guaiacum by the physician to Maximilian I, Nicholas Pol (ca. 1470–1532); Niccolò (Nicola) Massa (1489–1569) describes the neurological manifestations of syphilis, he speaks of Jamaican sarsaparilla; essays by Benedetto Vettori (1481–1561), Angelo Bolognini (fl. 1506–1517) and Juan Almenar appear in the present work.] Basel 1536, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, *Hortus Kew.* (W.T. Aiton), ed. 2. 4: 119–121. 1812, *Nouvelle Flore des Environs de Paris* ed. 2 2: 910. 1836, Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. Matthiola flavida Boiss.

India.

See *Diagn. Pl. Orient.* ser. 1, 6: 9. 1846 [1845 publ. Jul 1846]

(Powdered plant used to treat intestinal worms.)

in India: gomchu

Matthiola incana (L.) W.T. Aiton (*Cheiranthus incanus* L.; *Mathiolaria incana* Chevall.; *Matthiola incana* (L.) R.Br.; *Matthiolaria incana* (L.) Chevall.)

South America. Herb, red purple flowers

See *Species Plantarum* 2: 662. 1753, *Hortus Kew.* (W.T. Aiton), ed. 2. 4: 119–121. 1812, *Nouvelle Flore des Environs de Paris* ed. 2 2: 910. 1836 and *Fieldiana, Bot.* 24(4): 354–380. 1946, *Biologia* (Bratislava) 48: 441–445. 1993, *Watsonia* 20: 63–66. 1994, *Phytochemistry*. 38(4): 1027–1032. 1995, *Phytochemistry*. 41(6): 1613–1620. 1996, *Chin. J. Oil Crop Sci.* 21(4): 37–40. 1999, *Journal of Agricultural and Food Chemistry* 47(2): 637–642. 1999

(Seeds contain oil rich in linolenic acid, used for reducing cholesterol levels and increasing fatty acid levels in the plasma.)

in English: Brampton's stock, Brompton stock, common stock, gill flower, gillyflower, imperial stock, stock

in Peru: alelí, alhelí

Matthiola longipetala (Vent.) DC. subsp. *livida* (Delile) Marie (*Cheiranthus lividus* Delile; *Cheiranthus lividus* Sieber ex Steud.; *Matthiola livida* DC.; *Matthiola livida* (Delile) DC.; *Matthiola livida* var. *livida* (Delile) DC.)

Egypt.

See *Description de l'Égypte*, ... Histoire Naturelle, Tom. Second 1: 19, 67. 1813, *Syst. Nat.* [Candolle] 2: 174. 1821, *Nomencl. Bot.* [Steudel], ed. 2. 1: 346. 1840 and *Archiv für experimentelle Veterinärmedizin* 44(3): 389–394. 1990, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* 14: 23. 1977

(Hypoglycemic.)

Mauloutchia Warb. Myristicaceae

See *Ber. Deutsch. Bot. Ges.* 13(G.V.1): (83), (94). 1895 (publ. 1896), *Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 128. 1897 and *Adansonia* sér. 2, 12(3): 375. 1972, *Adansonia*, n.s. 13(2): 203–221. 1973, *Am. J. Bot.* 90(9): 1293–1305. 2003, *Blumea* 51(2): 199–220. 2006.

Mauloutchia humblotii (H. Perrier) Capuron (*Brochoneura acuminata* (Lam.) Warb.; *Brochoneura acuminata* Warb.; *Brochoneura humblotii* H. Perrier; *Brochoneura rarabe* H. Perrier; *Doyleanthus arillata* Capuron ex Sauquet; *Haematodendron glabrum* Capuron; *Mauloutchia capuronii* Sauquet; *Mauloutchia rarabe* (H. Perrier) Capuron) (*Brochoneura* Warb., from the Greek *brochos* ‘noose, snare for birds, mesh of a net’ and *neuron* ‘nerve’.)

Madagascar. Tree, aromatic bark, red latex

See *Mémoires de l'Académie des Sciences* 165. 1791, *Berichte der Deutschen Botanischen Gesellschaft* 13(Suppl.): 83. 1896, *Novorum Actorum Academia Caesarea Leopoldinae-Carolinae Germanicae Naturae Curiosorum* 68: 128, 234, 237. 1897 and *Revue intern. de botanique appliquée et d'agriculture tropicale* 29: 410–411. 1949, *Adansonia*, sér. 2, 12(3): 377, t. 1. 1972, *Adansonia: recueil périodique d'observations botanique*, sér. 2, 13(2): 212–213. 1973, *American Journal of Botany* 90(9): 1304. 2003, *Botanical Journal of the Linnean Society* 146(3): 359, 361, 363, pl. 17. 2004

(Leaves antiviral, antifungal, analeptic. Sap applied on gums to treat sores on gums.)

in Madagascar: hazomalany, mafotra, malamanitra, molo-trandrongo, raharaha, raia, rara, rarà, rara-fotsy, rara madini-dravina fotsy, rara mena, rara molotrindrongo, raraha, rarakonkana, raramainty, raramena, rarandambo, ravelfotsy, sambirano, voarara, voararaha, voararomolotra, voraharaha

Mauria Kunth Anacardiaceae

Dedicated to the Italian botanist Ernesto Mauri, 1791–1836, 1820–1833 Director of the Second Botanical Garden (Palazzo Salviati alla Lungara, Roma). See *Annales des Sciences Naturelles* (Paris) 2: 338–339. 1824, *Nova Genera et Species Plantarum* (quarto ed.) 7: 13. 1824, *Rev. Anacard.* 167. 1869 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 465. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 258. 1972.

Mauria heterophylla Kunth (*Mauria heterophylla* var. *contracta* Loes.; *Mauria heterophylla* var. *humboldtii* Engl.; *Mauria heterophylla* var. *puberula* (Tul.) Engl.; *Mauria ovalifolia* Turcz.; *Mauria puberula* Tul.; *Sorindeia heterophylla* (Kunth) Marchand; *Sorindeia ovalifolia* (Turcz.) Marchand; *Sorindeia puberula* (Tul.) Marchand)

Tropical America.

See *Genera Nova Madagascariensia* 23. 1806, *Nova Genera et Species Plantarum* (quarto ed.) 7: 13–14, t. 606. 1824, *Annales des Sciences Naturelles* (Paris) 2: 338–339. 1824, *Annales des Sciences Naturelles; Botanique*, sér. 3 6: 363–365. 1846, *Bull. Soc. Imp. Naturalistes Moscou* xxxi. (1858) I. 467. 1858, *Révision du groupe des Anacardiacees* 167. 1869, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 327–328. 1883 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 570. 1906, *J. Am. Acad. Dermatol.* 7(3): 341–5. 1982 [Studies on the skin-sensitizing properties of the “pepeo” tree, *Mauria puberula* (Anacardiaceae).], *Flora of Ecuador* 30: 9–50. 1987, Mori, T. et al. “Isolation of the active compound in *Mauria heterophylla*, a Peruvian plant with antibacterial activity.” *Phytother. Res.* 20(2): 160–1. 2006

(Antibacterial. This medicinal plant produces skin eruptions; cross-sensitivity in humans was observed between this plant, *Toxicodendron* species, and *Lithraea caustica*.)

Vernacular name: pepeo

Mauria simplicifolia Kunth (*Duvaua pleuropogon* Turcz.; *Mauria aurantiodora* (Ruiz ex Engl.) Engl.; *Mauria aurantiodora* Ruiz ex Engl.; *Mauria aurantiodora* Engl.; *Mauria biringo* Tul.; *Sorindeia aurantiodora* Ruiz ex Engl.) Engl.; *Sorindeia simplicifolia* (Kunth) Marchand)

Tropical America.

See *Genera Nova Madagascariensia* 23. 1806, *Nova Genera et Species Plantarum* (quarto ed.) [H.B.K.] 7: 11, 13, t. 605. 1824, *Annales des Sciences Naturelles* (Paris) 2: 338–340. 1824, *Annales des Sciences Naturelles; Botanique*, sér. 3 6: 365. 1846, *Révision du groupe des Anacardiacees* 167. 1869, *Flora Brasiliensis* 12(2): 391. 1876, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 4: 326. 1883 and *Flora of Ecuador* 30: 9–50. 1987

(*Mauria biringo* is said by the natives to be poisonous; the plant can cause dermatitis.)

Mauria suaveolens Poepp. & Endl. (*Mauria aurantiodora* (Ruiz ex Engl.) (Stem bark and leaves wound dressing, antibacterial, for mouth infections, gastrointestinal disorders. Powdered bark or leaf decoction a remedy for boils, wounds, ulcers, mouth infections, toothache. Plant used for taboos or beliefs.)

in Tanzania: muvambandutsi

in India: achchumul, keerimaram

Maytenus buxifolia Griseb.

South America.

See *Annales des Sciences Naturelles; Botanique*, sér. 5, 16: 367. 1872

(Leaves chewed to relieve stomachache.)

in English: granny bush, gripe bush, spoonbush, spoonwood

Maytenus confertiflorus J.Y. Luo & X.X. Chen

China.

See *Acta Phytotax. Sin.* 19(2): 233. 1981

(Leaves astringent.)

in China: mi hua mei deng mu

Maytenus emarginata (Willd.) Ding Hou (*Celastrus emarginatus* Willd.; *Gymnosporia trilocularis* Hayata)

India, China.

See *Species Plantarum* 1: 196–197. 1753, *Species Plantarum*. Editio quarta 1(2): 1128. 1798, *Genera Plantarum* 1: 365. 1862 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 59. 1913, *Flora Malesiana: Series I: Spermatophyta* 6(2): 241. 1962

(Leaves used in fomentation of eye pain; fresh leaf juice given in jaundice, anemia, liver disorders; leaves paste applied in wounds; leaves chewed to treat jaundice. Fruit a blood purifier. Ceremonial, ritual, fresh twigs in religious ceremonies. Veterinary medicine, stem bark crushed with ginger, pepper and garlic and the extract is given for tympany; root juice given to weak cattle.)

in India: danti, dantiya cettu, dentena, vico, vicklo, viklo

Maytenus guangxiensis C.Y. Cheng & W.L. Sha

China.

See *Acta Phytotax. Sin.* 19(2): 232. 1981

(Blood purifier.)

in China: guang xi mei deng mu

Maytenus heterophylla (Eckl. & Zeyh.) N. Robson (*Cassine szyszyłowiczii* Kuntze; *Catha buxifolia* (L.) G. Don; *Catha cymosa* (Sol.) C. Presl; *Catha heterophylla* (Eckl. & Zeyh.) (Leaves and roots antiviral, antiinflammatory. Roots for chest complaints, pleurisy, chest pains.)

in English: common spike-thorn, quickthorn, spikethorn

in Somalia: saruur

in Southern Africa: gewone pendoring (= quill thorn), pendoring, lemoendoring, gifdoring; muKwokwoba, muTotova (Shona); isiHlangu (Swazi); shihlangwa (Thonga or Tsonga); inGowangane, uSala, uSolo, iNgqwangane, inGqwangane, inGqwangane yehlanze, isiBhubhu, isiHlangu (Zulu); mopasu (North Sotho); sefea-maeba (Sotho); umQaqoba (Xhosa); sefeamaeba se senyenyane (South Sotho); motlhono, mothono (Tswana: Western Transvaal, northern Cape, Botswana); tshipandwa (Venda); murowanyero (Mbukushu: Okavango Swamps and western Caprivi)

in Tanzania: engaimurunyai, mmisi, muvambalandutsi, nkuhwang'anga, olairmurunyai, oroumorunyai

Maytenus hookeri Loesen. (*Gymnosporia acuminata* J.D. Hooker; *Maytenus hookeri* Loesen. var. S.J. Pei & Y.H. Li)

China.

(For skin diseases.)

in China: mei deng mu

Maytenus ilicifolia Mart. ex Reissek (*Celastrus spinifolium* Larrañaga; *Maytenus aquifolium* Mart.; *Maytenus has-*

leri Briq.; *Maytenus ilicifolia* (Schrad.) Planch.; *Maytenus ilicifolia* fo. *angustior* Briq.; *Maytenus pilcomayensis* Briq.)

South America.

See *Hortus Donatensis* 30. 1858, *Flora Brasiliensis* 11(1): 8, pl. 1. 1861 and *Feddes Repertorium* 101: 274. 1990

(Antiasthma, sialogogue, antiseptic, vulnerary. Roots, leaves and stem decoction and tea used for regulating fertility; a decoction of roots, branches and leaves a long-term contraceptive.)

in Argentina: cancorosa

in Paraguay: cangorosa, yvyra rapo ju

Maytenus laevis Reissek (*Maytenus jauaensis* Steyerem.)

Brazil. Tree, erect, reddish bark, leaves coriaceous, decurrent petiole, inflorescence axillary, tiny greenish flowers, ovoid fruit

See *Flora Brasiliensis* 11(1): 27, pl. 4, f. 6. 1861

(Bark antiinflammatory, aphrodisiac, anti tumour, contraceptive, tonic, analgesic and antirheumatic; effective against skin cancer and cutaneous ulcers when used topically.)

in Peru: chuchuhuasi

Maytenus macrocarpa (Ruiz & Pav.) Briq. (*Celastrus macrocarpus* Ruiz & Pav.; *Haenkea macrocarpa* (Ruiz Lopez & Pavon) Steud.; *Haenkea multiflora* Ruiz & Pav.; *Maytenus macrocarpus* (R. & P.) Reissek; *Maytenus multiflora* (Ruiz & Pav.) Loes., nom. illeg., non *Maytenus multiflora* Reissek; *Maytenus tarapotensis* Briq.)

South America.

See *Species Plantarum* 1: 196–197. 1753, *Systema Vegetabilium Florae Peruvianae et Chilensis* 65. 1798, *Flora Peruviana* 3: 8, t. 230. 1802 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 36: 380. 1905, *Annuaire du Conservatoire et Jardin Botaniques de Genève* 20: 264, 361. 1919

Maytenus phyllanthoides Benth. (*Tricerna phyllanthoides* (Benth.) Lundell)

Mexico. Evergreen, highly salt-tolerant shrub or small tree, oblanceolate fleshy leaves with a blunt or notched apex and minute marginal scales or glands, small greenish-white flowers, spreading petals, dehiscent 3-seeded 3-angled capsule, each seed with a conspicuous red fleshy aril

See *The botany of the voyage of H.M.S. Sulphur* 54. 1844, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853(3–4): 97–98. 1854 and *Wrightia* 4(5): 158. 1971

(Root bark or leaves infusion taken for dysentery, and a gargle for sore throat.)

Maytenus royleana (Wall. ex M.A. Lawson) Cufod. (*Celastrus royleana* Wallich; *Celastrus royleanus* Wall.; *Celastrus spinosus* Royle; *Gymnosporia royleana* Wall. ex

M.A. Lawson; *Gymnosporia royleana* Lawson; *Maytenus royleanus* (Wallich) Cufod.)

India, China.

See *The Flora of British India* 1(3): 620. 1875 and *Senckenbergiana Biologica* 43: 313. 1962

(Antibacterial.)

in China: bei zi mei deng mu

(Paste of leaves and tender shoots, fresh or dry, with honey given in dysentery and diarrhea. Root bark used to treat dysentery, diarrhea, fever and rheumatism. An oil of some medicinal value is extracted from the seeds and known as Oleum Nigrum or Black oil. Roots, leaves and thorns for Kichomi (respiratory problems, bronchopneumonia) treatment, cough and rib pain. Roots used to treat pneumonia; root powder given with honey to cure gastrointestinal ulcers and piles. Roots, leaves and bark a remedy for snakebite. Roots and leaves antimicrobial, astringent, for dysentery, colic. Leaves crushed with leaves of *Datura metel* and applied on breast swelling.)

in English: confetti tree, red spike-thorn

in India: baikal, bharatti, mekar, vkantak, vikaro

in East Africa: akwichanian (Pokot), ekaburu (Turkana), mdunga-ndewe (Swahili)

in Mali: ngege, nyenyele

in Nigeria: isepolohun, kunkushewa, momfofoji, namijin tsada, sepolohun, tultulde

in Southern Africa: bloupendoring, isihlangu, lemoendoring, pendoring, rooipendoring; uBuhlangwe, isiHlangu, isiHlangwane (Zulu); isiHlangu (Swazi); mukutema tembuze (Subya: Botswana, eastern Caprivi); shihlangwa (Thonga); muGaranjewa, muGaranjua, chiVunabadza, chiZeza, muZhuzhu, chiZuzu (Shona); muthone, mothono, motlhonó (Tswana: Western Transvaal, northern Cape, Botswana); tshibavhe, tshipandwa, tshipandwa (Venda); gau (Bushman)

in Tanzania: aramonyai, muwamba ngoma, mwanba ngoma

Maytenus thompsonii (Merr.) Fosberg (*Gymnosporia thompsonii* Merr.)

Pacific.

See *Philipp. J. Sci.*, C 9: 105. 1914, *Phytologia* v. 290. 1955

(Dermatitis.)

Common name: luluhut

Mazus Lour. Scrophulariaceae

Greek *mazos* ‘a teat, papilla’, referring to the tubercles or clavate hairs closing and blocking the corolla throat; see J. de Loureiro, *Flora cochinchinensis*. 2: 385. Lisbon 1790.

Mazus omeiensis H.L. Li (*Mazus crassifolius* P.C. Tsoong; *Mazus neriifolius* H.L. Li)

China.

See *Taiwania* 1: 161. 1950, *Kew Bull.* 1954, 443. 1954

(For fever, joint pain, liver problems.)

in China: yan bai cai

Mearnsia Merr. Myrtaceae

Mearnsia cordata C.T. White & W.D. Francis

Indonesia.

See *Philippine Journal of Science* 2: 283. 1907, *Proceedings of the Royal Society of Queensland* 39: 67, pl. 5, f. 1. 1928

(Used in women’s purification.)

in Papua New Guinea: alomaia, ungili, wonkomp

Meconopsis R. Viguiet Papaveraceae

Greek *mekon* ‘poppy’ and *opsis* ‘like, likeness, appearance’, referring to the plant, see *Histoire Naturelle... des Pavots* 48, f. 3. 1814 and *Acta Bot. Yunnan.* 2(4): 374–376. 1980, *Bull. Bot. Lab. N. E. Forest. Inst., Harbin* 1980(8): 98–99. 1980.

Meconopsis aculeata Royle

India, Himalaya. Erect herbs, stout, densely bristly, radical leaves long petioled, blue to purplish blue flowers racemously arranged at the apex, dehiscent capsule

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 1: 67, pl. 15. 1834 and *Proc. Indian Natl. Sci. Acad.*, B 55: 177–184. 1989

(Whole plant, including roots, used for arthritis, fractured bones, ulcers, disorders of lungs and inflammation of liver. Fruits and seeds narcotic and poisonous. Root considered to be poisonous. Roots narcotic, antiseptic, tonic, paste of the roots for infections, wounds, cuts, backache, colic. Leaves, flowers and fruits tonic, used for fracture. Flowers and roots for the treatment of cardiac ailments. Veterinary medicine, powdered roots on wounds.)

in English: Himalayan blue poppy

in China: pi ci lu rong hao

in India: achatsarnum, akchhtsarnum, gudi, kahiharu, kaliharu, kalyari, kanda, landrementok

in Tibet: achatsarnum, tsher-sngon, ut-pal sngon-po

Meconopsis horridula Hook. f. & Thomson (*Meconopsis horridula* Kingdon-Ward)

Himalaya.

See *Flora Indica*: being a systematic account of the plants . . . [Hooker f. & Thomson] 1: 252. 1855 and Kingdon-Ward, Francis (1885–1958), *Field notes of plants, shrubs and trees other than rhododendrons collected by Kingdon Ward in 1924/5*. [Kingdon Ward Plant Syndicate, 1926], *Caryologia* 59(1): 1–6. 2006

(Aerial parts used for fractures, wounds, joint pain.)

in Bhutan: tsher-ngon

in China: duo ci lu rong hao

Meconopsis paniculata (D. Don) Prain (*Meconopsis napaulensis* DC.; *Meconopsis nepalensis* DC.; *Meconopsis paniculata* Prain; *Meconopsis paniculata* var. *elata* Prain; *Meconopsis wallichii* Hook.; *Papaver paniculatum* D. Himalaya.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 121. 1824, *Prodromus Florae Nepalensis* 197. 1825, *Syst. Veg.*, Ed. 16 [Sprengel] 4(2, Cur. Post.): 203. 1827, *A General History of the Dichlamydeous Plants* 1: 135. 1831, *Botanical Magazine* 78: t. 4668. 1852, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 64: 316. 1896

(Flowers for digestion and as febrifuge.)

in China: zhui hua lu rong hao

Meconopsis primulina Prain

Himalaya.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 64: 319. 1896

(Aerial parts for bleeding, blood purifier, placenta removal.)

in China: bao chun lu rong hao

Meconopsis simplicifolia (D. Don) Walpers (*Meconopsis nyingchiensis* L.H. Zhou; *Meconopsis simplicifolia* Don; *Meconopsis simplicifolia* var. *baileyi* Kingdon-Ward; *Papaver simplicifolium* D. Don; *Stylophorum simplicifolium* (D. Don) Spreng.)

Himalaya, China.

See *Prodromus Florae Nepalensis* 197. 1825, *Syst. Veg.*, Ed. 16 [Sprengel] 4(2, Cur. Post.): 203. 1827, *Gen. Hist.* 1: 135. 1831, *Repertorium Botanices Systematicae*. 1: 110. 1842 and *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 8(8): 98, f. 2. 1980 [*Bull. Bot. Lab. N. E. Forest. Inst., Harbin*]

(Aerial parts used against malaria, for cough and cold, jaundice, lung and blood disorders.)

in English: blue poppy

Medicago L. Fabaceae (Trifolieae)

The Greek *medike* (Media) ‘a grass, herba medica, lucerne, a kind of clover’ (Dioscorides); Latin *medica*, *ae* for a kind of clover introduced from Media, *Medicago sativa* L. (Plinius, Vergilius and Marcus Terentius Varro); see Carl Linnaeus (Carl von Linnaeus, Carl von Linné) (1707–1778), *Species Plantarum*. 2: 778–781. 1753 and *Genera Plantarum*. Ed. 5. 339. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 172, 174, 182. 1825, *Classes Plantarum* 1: 7. 1825, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 1873: 48. 1873 and *Taxon* 29: 538–542. 1980, *Advances in Legume Systematics* 3: 180. 1987, *Grassl. China* 4: 53–60. 1989, *Can. J. Bot.* 67: 3260–3294. 1989, *Ann. Missouri Bot. Gard.* 81: 792–799. 1994, *Opera Bot.* 137: 1–42. 1999. Under some circumstances, alfalfa can cause a variety of different toxic problems. Ingesting rapidly growing alfalfa at the vegetative to mid-bud stage can cause bloat in cattle and sheep. Alfalfa has also caused photosensitization in cattle with white skin.

Medicago arborea L. (*Medicago arborea* Aubl., nom. illeg.; *Medicago arborescens* C. Presl; *Rhodusia arborea* (L.) Vassilcz.; *Trigonella arborea* (L.) Vassilcz.)

Guiana.

See *Species Plantarum* 2: 778. 1753, *Histoire des plantes de la Guiane Française* 779. 1775, *Flora Sicula* (Presl) 1: 20. 1826

(Leaves infusion purgative. Flowers infusion for lung troubles.)

in English: moon trefoil, noon trefoil, tree alfalfa, tree lucerne, tree medic

in China: mu ben mu xu

in French Guiana: amourette

Medicago falcata L. (*Medicago aurantiaca* Godr.; *Medicago borealis* Grossh.; *Medicago falcata* L. subsp. *erecta* Kotov; *Medicago falcata* L. subsp. *falcata*; *Medicago falcata* L. subsp. *glandulosa* Mert. & W.D.J. (Leaves antibacterial, tonic. Veterinary medicine.)

in China: za jiao mu xu

Medinilla Gaudich. Melastomataceae

Named for José de Medinilla y Pineda, Spanish Governor of the Mariana Islands in 1820; also called Northern Marianas, officially Commonwealth of the Northern Marianas Islands, self-governing commonwealth in political union with the United States, in the western Pacific Ocean, composed of 22 islands; Farallon de Medinilla, a southern island, is also dedicated to the former Governor; see Charles Gaudichaud-Beaupré (1789–1854), [Botany of the Voyage.] *Voyage autour du Monde ... sur ... l'Uranie et la Physicienne, pendant ... 1817–1820*. Paris 1826 [-1830], *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 167. 1828. *Medinilla* sp. as arrow or dart poison.

Medinilla assamica (C.B. Clarke) C. Chen (*Allomorphia subsessilis* Craib; *Anplectrum assamicum* C.B. Clarke; *Diplectria assamica* (C.B. Clarke) Kuntze; *Medinilla spirei* Guillaumin; *Pseudodissochaeta assamica* (C.B. Clarke) M.P. Nayar; *Pseudodissochaeta spirei* (Guillaumin) Veldkamp & J.F. Maxwell; *Pseudodissochaeta subsessilis* (Craib) M.P. Nayar)

Himalaya. Shrub, scandent, scrambling, climbing

See *Flora* 14: 522. 1831, *Der Deutsche Botaniker Herbarienbuch* 174. 1841, *The Flora of British India* 2(6): 546. 1879, *Revisio Generum Plantarum* 1: 246. 1891 and *Bulletin of Miscellaneous Information Kew* 1913(2): 69. 1913, *Flore Générale de l'Indo-Chine* 2: 921. 1921, *Journal of the Bombay Natural History Society* 65: 557, 559, 561, f. 1–2. 1969, *Gard. Bull. Singapore* 33 (2): 324. 1980, *Acta Phytotax. Sin.* 21(4): 419. 1983

(Applied to sores, boils, wounds.)

in China: ding hua suan jiao gan

in India: lota phutkola

Medinilla corallina Cogn.

Borneo. Epiphyte

See *Monogr. Phan.* [A. DC. & C. DC.] vii. (1891) 598. 1891

(Fruits and leaves decoction drunk for gonorrhoea.)

Medinilla crassifolia Blume (*Medinilla crassifolia* Moritz; *Medinilla crassifolia* Naudin; *Medinilla crassifolia* Triana; *Medinilla crassifolia* (Blume) Blume)

Indonesia. Climbing liane, orange berry, fruits sometimes eaten by children

See *Flora* 14: 511. 1831, *Ann. Sci. Nat., Bot.* sér. 3, 15: 288. 1851, *Trans. Linn. Soc. London* 28(1): 86. [8 Dec 1871–13 Jan 1872]

(Crushed young leaves applied as a poultice to fresh wounds to stop bleeding; leaves made into a paste applied on forehead for relief of headache. Fruits used as fish bait.)

in Indonesia: kelepulo

Medinilla crassinervia Blume

Borneo, New Guinea, Moluccas. Shrub or climber, fruit yellow-green, in montane forest

See *Flora* 14: 510. 1831

(Leaves chewed to allow conception to take place. Plant used to treat nose cancer; chewed for application to ulcers.)

in Papua New Guinea: guiyaya, mucbalong

Medinilla mirabilis (Gilg) Jacq.-Fél. (*Myrianthemum mirabile* Gilg)

Nigeria, Cameroon and Gabon. Liana or shrub, climbing, slender, cauliflorous, pink to purplish flowers in dense globose clusters at the nodes of woody stem, young leaves eaten as a cooked vegetable

See *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] 1: 266. 1897, *Monogr. Afr. Melastom.* 33, t. 7. 1898 and *Adansonia*, n.s. 17(1): 77–78. 1977

(Leaves for pulmonary troubles; heated leaves applied to wounds; leaves mixed with melegueta pepper (*Aframomum melegueta*) against the cough.)

Medinilla teysmanni Miq.

Philippines, Sulawesi, New Guinea. Shrub, fruit white, in disturbed forest

See *Ann. Mus. Bot. Lugd. Bat.* 1 (1864) 217. 1864

(Leaves juice squeezed onto tropical ulcers.)

Meeboldia H. Wolff Apiaceae

After the German botanist Alfred Karl Meebold, 1863–1952, traveller and botanical collector, 1928 to 1938 travelled widely in Australia, South Africa and SW. USA, his works include *Indien*. München 1908 [1907]; see *Genera Plantarum Umbelliferarum* 8. 1814 and *Repertorium Specierum Novarum Regni Vegetabilis* 19: 313. 1924, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(84): 276–279. 1925, I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 249. Cape Town 1981. The classification of *Meeboldia*, *Tongoloo*, and *Vicatia* is problematic.

Meeboldia yunnanensis (H. Wolff) Constance & F.T. Pu (*Meeboldia yunnanensis* (H. Wolff) Constance & F.T. Pu ex S.L. Liou; *Physospermopsis cruciata* H. Wolff; *Physospermopsis forrestii* Fedde ex H. Wolff; *Physospermopsis forrestii* (Diels) C. Norman, nom. illeg.; *Pleurospermum cruciatum* (H. Wolff) M. Hiroe; *Sinodielsia microloba* Kljuykov; *Sinodielsia yunnanensis* H. Wolff)

China.

See *Notes from the Royal Botanic Garden, Edinburgh* 5(25): 291. 1912, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(84): 278–279. 1925, *Repertorium Specierum Novarum Regni Vegetabilis* 27(726–733): 127. 1929, *Repertorium Specierum Novarum Regni Vegetabilis* 27(734–740): 179. 1929, *Journal of Botany, British and Foreign* 76(908): 231. 1938, *Umbelliferae of [the] World* 747. 1979, *Feddes Repertorium* 97(11–12): 757. 1986, *Fl. Yunnan*. 7: 405. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 29: 23–24. 1998, *Novon* 8(1): 70. 1998

(Plants used as a substitute for the medicine *gao ben* (*Ligusticum sinense* and *Ligusticum jeholense*.)

in China: dian qin

***Meehania* Britton Lamiaceae (Labiatae)**

For the British nurseryman Thomas Meehan, 1826–1901, botanist, Kew gardener, he is known for *The native flowers and ferns of the United States* in their botanical, horticultural, and popular aspects. Boston [Mass.] 1878[–1880]; see *Memoirs of the Torrey Botanical Club* 4: 147. 1893, *Bulletin of the Torrey Botanical Club* 21: 32–33, t. 173. 1894, J.W. Harshberger, *The botanists of Philadelphia and their work*. 249–256. 1899 and Joseph William Blankinship (1862–1938), “A century

of botanical exploration in Montana, 1805–1905: collectors, herbaria and bibliography.” in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1–31. 1904, Edith M. Allison, “Bibliography and History of Colorado Botany.” *Univ. Colorado Studies*. 6: 51–76. 1908, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 470. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. 45, 136. New York and London 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 262. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 284. 1973.

Meehania fargesii (H. Léveillé) C.Y. Wu (*Dracocephalum fargesii* H. Léveillé)

China.

See *Repertorium Specierum Novarum Regni Vegetabilis* 9(211–213): 246. 1911, *Acta Phytotaxonomica Sinica* 8(1): 12–13. 1959

(For skin diseases.)

Schum.; *Sarcophrynium oxycarpum* (K. Schum.) K. Schum.; *Sarcophrynium oxycarpum* K. Schum.; *Sarcophrynium spicatum* K. Schum.)

Tropical Africa. Herb, erect, tufted, bulbous roots, white flowers, bright red fruits, fruits and leaf shoot eaten by gorillas

See *Genera Plantarum* 3: 653. 1883, *Bot. Jahrb. Syst.* 15: 442–445. 1892, *The Flora of British India* 6: 259. 1892, *Flora of Tropical Africa* 7: 323–324. 1898 and *Pflanzenr.*, IV, 48: 37–38, 40, 50. 1902, *Ann. Mus. Congo Belge, Bot.*, V, 1: 107. 1903, *Fl. W. Trop. Afr.* 2: 336. 1936, *Kew Bulletin* 7: 170. 1952, Govaerts, R. *World Checklist of Monocotyledons Database in ACCESS*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2004, *Taxon* 54(4): 1084. 2005

(Leaves for cuts, sores.)

in Central African Republic: gongo, ngoungou, ngungu

in Congo: ikongo-makongo, ikongu-makongu, kaani ka ikongo, motoboa, toani ta makongo

in Yoruba: gbodogi

Meiogyne Miq. Annonaceae

Greek *meion* ‘less, smaller’ and *gyne* ‘a woman, female’, an allusion to the small ovary, see *Annales Museum Botanicum Lugduno-Batavi* 2: 12. 1865.

Meiogyne pannosa (Dalzell) J. Sinclair (*Desmos pannosus* (Dalzell) Saff.; *Polyalthia pannosa* (Dalzell) Finet & Gagnep.; *Unona pannosa* Dalzell)

India.

See *Bulletin de la Société Botanique de France* 53: 97. 1906, *Bulletin of the Torrey Botanical Club* 39: 506. 1912, *Sarawak Museum Journal* 52(3): 604. 1951

(Leaves powder stimulant, tonic.)

in India: milagu naarai

Meizotropis J. O. Voigt Fabaceae (Phaseoleae)

Greek *meizon* ‘greater’ and *tropis*, *tropidos* ‘a keel’, see *Familles des Plantes* (Adanson) 2: 325. 1763, *Species*

Plantarum. Editio quarta 3(2): 917. 1802, *Hortus Suburbanus Calcuttensis* 239. 1845.

Meizotropis buteiformis Voigt (*Butea buteiformis* (Voigt) Grierson; *Butea buteiformis* (Voigt) Grierson & D.G. Long; *Butea buteiformis* (Voigt) Mabb.; *Butea minor* Baker; *Butea minor* Buch.-Ham. ex Wall.; *Meizotropis buteaeformis* Voigt; *Plaso minor* (Baker) Kuntze)

India. Perennial non-climbing shrub, see also *Butea*

See *Numer. List* [Wallich] n. 5439. 1831–1832, *Hort. Suburb. Calcutt.* 239. 1845, *Revis. Gen. Pl.* 1: 202. 1891 and *Notes from the Royal Botanic Garden, Edinburgh* 37(2): 346. 1979, *Bot. Hist. Hortus Malabaricus* 96. 1980, *Taxon* 29(5–6): 605. 1980, *Bull. Bot. Surv. India* 29(1–4): 199–225. 1987, *Fitoterapia* 66(2): 149–155. 1995

(Anthelmintic, seed paste mixed with water is drunk to kill intestinal worms; seed powder given as anthelmintic.)

in India: fu, thual thu, thual tu

in Nepal: bhujetro, dibhar

Melaleuca L. Myrtaceae

From the Greek *melas* ‘black’ and *leukos* ‘white’, referring to the black trunks and the white branches of some species or to the colours of the bark; see *Systema Naturae*, ed. 12 2: 507, 509. 1767, *Anleit. zum Gründlichen Studien der Botanik* 268, 286. 1818 and *Austral. J. Bot.* 27: 547–573. 1979, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1950–1972. Canberra 1991.

Melaleuca cajuputi Powell (*Melaleuca cajeputti* DC.; *Melaleuca cajeputti* Hort. ex DC.; *Melaleuca cajuputi* Roxb.; *Melaleuca cajuputi* (J.F. Gmel.) Powell)

Indochina, Australia, Northern Territory. Tree, erect, evergreen, white soft bark, leaves entire short-petiolated, elongate terminal spikes, small creamy white flowers, many-seeded capsule

See *Systema Naturae*, ed. 12 2: 509. 1767, *Systema Naturae* 793. 1791, *Pharm. Roy. Coll. Physicians of London (Transl.)* 22. 1809, *Hortus Bengalensis*, or a catalogue ... 59. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 215. 1828 and *Phil. J. Sci.* 7: 413–415. 1912, *The Gardens' Bulletin Singapore* 44: 135–139. 1992

(Leaves antibacterial, anti-*Herpes simplex* virus type 1, anti-histamine, antiinflammatory, used for cough, flu, fever, asthma, wounds, toothache, earache, rheumatism. Oil rubbed as a remedy for pain.)

in English: cajeput oil tree, paperbark tree

in Indonesia: ai kelane, baru galang, calam, elan, gelam, gelam kayu gelang, ghelam, ilano, inggolom, irano, iren irano, irono, kayu gelang, kayu putih, kela iren, ngelak, ngglelak, sakelan, waru gelang

in Vietnam: che cay, che dong, tram

Melaleuca leucadendra (L.) L. (*Cajuputi leucadendron* (L.) A. Lyons; *Leptospermum leucodendron* (L.) J.R. Forst. & G. Forst.; *Meladendron leucocladum* St.-Lag.; *Melaleuca amboinensis* Gand.; *Melaleuca conferta* Benth., nom. illeg.; *Melaleuca leucadendra* var. *albida* Cheel; *Melaleuca leucadendra* var. *angusta* C. Rivière; *Melaleuca leucadendra* var. *cunninghamii* F.M. Bailey; *Melaleuca leucadendra* var. *lan-cifolia* F.M. Bailey; *Melaleuca leucadendra* var. *mimosoides* (A. Cunn. ex Schauer) Cheel; *Melaleuca leucadendron* (L.) L.; *Melaleuca mimosoides* A. Cunn. ex Schauer; *Melaleuca rigida* Roxb.; *Melaleuca viridiflora* Gaertner; *Melaleuca viridiflora* Sol. ex Gaertn.; *Metrosideros coriacea* K.D. Koenig & Sims; *Myrtus alba* Noronha; *Myrtus leucadendra* L.; *Myrtus saligna* Burm.f.)

New Guinea, Australia. Tree or shrub, very variable

See *Systema Naturae*, Editio Decima 1056. 1759, *Systema Naturae*, ed. 12 2: 509. 1767, *Mant. Pl.* 105. 1767 and *Flore de la Guayane Française* 3: 138–167. 1953, *Ceiba* 44(2): 105–268. 2003 [2005]

(Essential oil used in rheumatic pains, stomach complaints, headache, wounds, scalds, cuts; internally used in small doses as stomachic and antispasmodic. From leaves and twigs mosquito and insect repellent.)

in English: broad-leaved paperbark, broad-leaved tea tree, cajeput, cajeput oil, cajeput tree, paperbark, paperbark tree, punk tree, river tea tree, weeping tea tree, white wood

in China: bai qian ceng

in Indonesia: cajeput, gelam, minjak kajuputih

Malayan names: gelam, kayu puteh

Melaleuca quinquenervia (Cav.) S.T. Blake (*Melaleuca leucadendra* var. *albida* Cheel; *Melaleuca leucadendra* var. *angustifolia* L.f.; *Melaleuca leucadendra* var. *coriacea* (Poir.) Cheel; *Melaleuca maidenii* R.T. Baker; *Melaleuca smithii* R.T. Baker; *Melaleuca viridiflora* var. *angustifolia* (L.f.) Byrnes, nom. illeg.; *Melaleuca viridiflora* var. *rubriflora* Pancher ex Brongn. & Gris; *Metrosideros albida* Sieber ex DC., nom. inval.; *Metrosideros coriacea* Poir., nom. illeg.; *Metrosideros quinquenervia* Cav.)

New Guinea, New Caledonia, Australia. Tree, white spongy flaking bark, leaves spirally arranged, five glandular sepals and five white petals, each petal with prominent elongated glands, clusters of flowers in 3's, each triad subtended by a bract early falling, each flower has a trilocular ovary enclosed by the calyx tube, persistent woody capsules clustered on the axis

See *Systema Naturae*, ed. 12 2: 509. 1767, *De Fructibus et Seminibus Plantarum*... 1: 170. 1788, *Icones et Descriptiones Plantarum*, quae aut sponte ... 4: 19, pl. 333. 1797 and *Proc. Linn. Soc. New South Wales* 38: 598–599. 1913 [1914], *Fl. N. Territory* 297, 301. 1917, *Proceedings of the Royal Society*

of *Queensland* 69: 76. 1958, *Austrobaileya* 2: 74. 1984, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 3: 1–461. 1994, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85: 1565–1566, 1568–1569, 1574–1575. 2001

(Expectorant, for cough.)

in English: paper-bark tree

Melaleuca viridiflora Sol. ex Gaertn. (*Cajuputi viridiflora* (Sol. ex Gaertn.) A. Lyons; *Melaleuca cunninghamii* Schauer; *Melaleuca cunninghamii* var. *glabra* C.T. White; *Melaleuca leucadendra* var. *latifolia* Raeusch.; *Melaleuca leucadendra* var. *sanguinea* Cheel, nom. illeg.; *Melaleuca leucadendra* var. *viridiflora* (Sol. ex Gaertn.) Cheel; *Melaleuca sanguinea* Cheel, nom. inval.; *Melaleuca viridiflora* Gaertner; *Melaleuca viridiflora* var. *attenuata* Byrnes; *Melaleuca viridiflora* var. *canescens* Byrnes; *Melaleuca viridiflora* var. *glabra* (C.T. White) Byrnes; *Myrtuleucodendron viridiflorum* (Sol. ex Gaertn.) Kuntze)

New Guinea, Australia. Tree

See *Fl. N. Territory* 296, 299. 1917, *J. Arnold Arbor.* 23: 87. 1942, *Fl. Guayane Française* 3: 138–167. 1953, *Austrobaileya* 2: 74. 1984

(Used for cough, flu, fever, asthma.)

in Madagascar: kininina

Melampyrum L. Scrophulariaceae (Orobanchaceae)

Greek *melas* 'black' and *pyros* 'wheat', referring to the grains; Greek *melampyron* and *melampyros* used by Theophrastus (*HP.* 8.4.6, 8.8.3) for ball-mustard, a kind of *Neslia*, probably for *Neslia paniculata*; see *Species Plantarum* 2: 605. 1753 and *Taxon* 44: 611–612. 1995, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen.* 375. 1996.

Melampyrum arvense L. (*Melampyrum arvense* subsp. *aestivum* Govor.; *Melampyrum arvense* subsp. *pseudobarbatum* (Schur) Ronn.; *Melampyrum arvense* subsp. *vernum* Govor.)

Mediterranean.

See *Species Plantarum* 2: 605. 1753 and *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1–12. 1982, *Bulletin de la Société Neuchâteloise de Sciences Naturelles* 120: 19–33. 1997, *Flora Mediterranea* 7: 240–246. 1997

(For eye diseases, cough, cold.)

Melampyrum lineare Desr. (*Melampyrum lineare* Desr. var. *americanum* (Michx.) Beauverd)

North America.

See *Species Plantarum* 2: 605. 1753, *Encyclopédie Méthodique, Botanique* 4: 22. 1796 and *Taxon* 31(2): 344–360. 1982, *Taxon* 41: 573. 1992, *Taxon* 44: 611–612. 1995

(Plant infusion for eye troubles.)

in English: cow-wheat, narrowleaf cow-wheat

Melanochyla Hook.f. Anacardiaceae

From the Greek *melas*, *melanos* 'black' and *chylos* 'juice, sap', see *The Flora of British India* [J.D. Hooker] 2: 38. 1876.

Melanochyla auriculata Hook. f.

Malaysia. Trees, bole with stilt roots, stout twigs, thickly leathery leaves, white unisexual flowers, rusty hairy fruit with rugose surface

See *Fl. Brit. India* [J.D. Hooker] 2: 39. 1876 and Wong, T.M. *A Dictionary of Malaysian Timbers*. Revised by Lim, S.C. & Chung, R.C.K. Malayan Forest Record No. 30. Forest Research Institute Malaysia Kuala Lumpur. 1982, Lopez, D.T. *Malaysian Timbers—Rengas*. Malaysian Forest Service Trade Leaflet No. 87. The Malaysian Timber Industry Board and Forest Research Institute Malaysia, Kuala Lumpur. 1984, Menon, P.K.B. *Uses of Some Malaysian Timbers*. Revised by Lim, S.C. Timber Trade Leaflet No. 31. The Malaysian Timber Industry Board and Forest Research Institute Malaysia, Kuala Lumpur. 1986

(Irritant sap which is known to cause dermatitis. Due to the poisonous nature of the sap, the timber is not very often exploited, the seasoned timber, however, is quite safe to handle.)

in Malaysia: kerbau jalang, mempian, mempiang, rengas lanjut, rengas padi, swamp rengas

Melanochyla beccariana Oliver

Borneo.

See *Hooker's Icon. Pl.* 24: t. 2313. 1894 [1895 publ. May 1894]

(This species is reported to cause skin reactions.)

Common name: rengas lupi

Melanochyla elmeri Merr.

Borneo.

See *Univ. Calif. Publ. Bot.* xv. 169. 1929

(This species is reported to cause skin reactions.)

Melanolepis Reichb. f. ex Zoll. Euphorbiaceae

From the Greek *melas*, *melanos* 'black' and *lepis* 'scale, husk', see *Acta Societatis Regiae Scientiarum Indo-Neerlandicae* 1(4): 22. 1856.

Melanolepis multiglandulosa (Reinw. ex Blume) Rchb. f. & Zoll. (*Aleurites moluccanus* (L.) Willd.; *Croton multiglandulosus* Reinw. ex Blume, nom. nud.; *Jatropha moluccana* L.; *Mallotus angulatus* (Miq.) Müll.Arg.; *Mallotus*

calcosus (Miq.) Müll.Arg.; *Mallotus hellwigianus* K. Schum.; *Mallotus holrrungianus* K. Schum.; *Mallotus moluccanus* (L.) Müll.Arg.; *Mallotus moluccanus* var. *glabratus* Müll.Arg.; *Mallotus moluccanus* var. *pendulus* Merr.; *Mallotus multiglandulosus* (Reinw. ex Blume) Hurus.; *Manihot moluccana* (L.) Crantz; *Melanolepis angulata* Miq.; *Melanolepis calcosa* Miq.; *Melanolepis moluccana* Pax & K. Hoffm.; *Melanolepis moluccana* var. *pendula* (Merr.) Pax & K. Hoffm.; *Melanolepis moluccanus* Pax & K. Hoffm.; *Melanolepis multiglandulosa* Rchb. & Zoll.; *Melanolepis multiglandulosa* (Reinw.) Reich. f. & Zoll.; *Melanolepis multiglandulosa* var. *pendula* (Merr.) Merr.; *Ricinus dioicus* Wall. ex Roxb., nom. illeg.; *Rottlera angulata* (Miq.) Scheff.; *Rottlera calcosa* (Miq.) Scheff.; *Rottlera multiglandulosa* (Reinw. ex Blume) Blume; *Rottlera multiglandulosa* Reinw. ex Blume)

Trop. & E. Asia to Pacific. Shrub to tree, inflorescences densely pale brown hairy, fruits densely tomentose with stellate hairs to almost glabrous, seeds creamy to purplish magenta, aril grey to orange

See *Species Plantarum* 2: 1004–1006. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 28. 1754, *Institutiones Rei Herbariae* 1: 167. 1766, *Characteres Generum Plantarum* 111, pl. 56. 1775, *Flora Cochinchinensis* 601, 635. 1790, *Göttingisches Journal der Naturwissenschaften* 1(1): 7. 1797, *Species Plantarum*. Editio quarta 4: 590. 1805, *Bijdragen tot de flora van Nederlandsch Indië* 609. 1825, *Acta Societatis Regiae Scientiarum Indo-Neerlandicae* 1(4): 22. 1856, *Linnaea* 28: 324. 1857, *Linnaea* 34: 185. 1865 and *Journal of the Faculty of Science: University of Tokyo, Botany* 6(6): 308. 1954, *Blumea* 44: 437–446. 1999

(Bark used as a cure for cough, against chest pain; leaves or flowers on wrist against fever. Antidote, counter poison. Dried leaves crushed and mixed with cold water, solution drunk for constipation, tuberculosis and chest complaints.)

in Papua New Guinea: avima

in Philippines: alim, alom, alum, pasalkal, takip-asin, tres puntos

Melanoselinum Hoffm. Apiaceae (Umbelliferae)

From the Greek *melas*, *melanos* 'black' and *selinon* 'parsley, celery', see *Genera Plantarum Umbelliferarum* 156. 1814.

Melanoselinum decipiens (Schrad. & Wendl.) Hoffm. (*Selinum decipiens* Schrad. & J.C. Wendl.)

Europe.

See *Sert. Hannov.* 3: 23 t. 13. 1797, *Genera Plantarum Umbelliferarum* 156. 1814

(Leaf extract for skin diseases.)

in English: black parsley

Melanthera J.P. Rohr Asteraceae

From the Greek *melas* ‘black’ and *anthera* ‘anther’.

Melanthera biflora (L.) Wild (*Anthemioopsis macrophylla* Boj. ex DC.; *Verbescina biflora* L.; *Wedelia biflora* (L.) DC.; *Wollastonia biflora* DC.; *Wollastonia biflora* (L.) DC.; *Wollastonia zanzibarensis* DC.)

Tropical Africa.

See *Enumeratio Systematica Plantarum* 8, 28. 1760, *Species Plantarum*, Editio Secunda 2: 901–903, 1272. 1763, *Characteres Generum Plantarum* 45, pl. 45. 1775, *Skrifter af Naturhistorie-Selskabet* 2(1): 213–214. 1792, *Syn. Pl.* 2: 472–473. 1807, *Systema Vegetabilium*, editio decima sexta 3: 591. 1826, *Synopsis Generum Compositarum* ... 156. 1832, *Nouv. Ann. Mus. Hist. Nat.* 3: 414. 1834, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 546–547. 1836, *Contributions to the Botany of India* 18. 1837 and *Mémoires de la Société Linnéenne de Normandie* 25: 1–335. 1923, *Kirkia* 5: 1–18. 1965 [“The African species of the genus *Melanthera* Rohr”], *Botanical Magazine* 88: 323–328. 1975, *Taxon* 27: 223–231. 1978, *American Journal of Botany* 68: 206–215. 1981, *Glimpses in Plant Research* 8: 1–177. 1988

(Stomachic.)

Melanthera scandens (Schumach. & Thonn.) Roberty (*Buphthalmum scandens* Schumach. & Thonn.; *Lipotriche brownei* DC.; *Lipotriche brownii* DC.; *Melanthera brownei* (DC.) Sch. Bip.; *Melanthera brownii* (DC.) Sch. Bip.)

Tropical Africa. Erect herb, branched, straggling, scandent, scabrid, radiate orange-yellow flowers, solitary flower heads, weed, confused with *Aspilia latifolia*

See *Species Plantarum* 2: 903. 1753, *Skrifter af Naturhistorie-Selskabet* 2(1): 213–214. 1792, *Beskrivelse af Guineiske planter* 392. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 544. 1836, *Flora* 27: 673. 1844, *Flora of Tropical Africa* 3: 379. 1877 and *Exploration Botanique de l’Afrique Occidentale Française* ... 371. 1920, *Bulletin de l’Institut Fondamental d’Afrique Noire, Série A, Sciences Naturelles* 16: 68. Jan. 1954, *Kirkia* 5: 1–18. 1965, *Taxon* 29: 352–353. 1980, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987, *Feddes Repertorium* 99: 1–13. 1988, *Opera Botanica* 121: 159–172. 1993

(Root decoction emmenagogue. Shoots decoction drunk for stomachache, for constipation. Leaves infusion laxative, styptic, wound healing, applied to sores.)

in Congo: beuphu ba malu, moupou a malu

in Yoruba: aboba dudu, ajidari, ayaki

Melanthium L. Melanthiaceae (Liliaceae)

Latin *melanthium* and Greek *melanthion* for the plant *gith*, cultivated fennel-flower (Plinius); Greek *melas* ‘black’ and

anthos ‘a flower’, the flower segments become dark after flowering; Greek *melanthion* was an herb whose seeds were used as spice, black cummin, originally applied to a kind of *Nigella*; see Carl Linnaeus, *Species Plantarum*. 339. 1753 and *Genera Plantarum*. Ed. 5. 157. 1754; Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 376–377. Basel 1996. *Melanthium* often wholly or partly included in the closely related *Veratrum*. Resolution of the problematical *Melanthium-Veratrum* species series will require full molecular and phylogenetic analysis of the group.

Melanthium virginicum L. (*Evonyxis hybrida* (Walter) Raf.; *Evonyxis monoica* Raf.; *Evonyxis undulata* Raf.; *Evonyxis virginica* (L.) Raf.; *Helonias virginica* (L.) Sims; *Leimanthium hybridum* (Walter) Sweet; *Leimanthium monoicum* (Walter) Sweet; *Leimanthium virginicum* (L.) Willd.; *Melanthium biglandulosum* Bertol.; *Melanthium dispersum* Small; *Melanthium hybridum* Walter; *Melanthium hybridum* Elliott, nom. illeg.; *Melanthium laetum* Kunth, nom. illeg.; *Melanthium monoicum* Walter; *Melanthium monoicum* Pursh, nom. illeg.; *Melanthium polygamum* Desr.; *Melanthium virginicum* var. *hybridum* (Walter) Alph.Wood; *Veratrum virginicum* (L.) Aiton f.; *Zigadenus hybridus* Endl. ex Kunth; *Zigadenus monoecus* (Walter) Kunth; *Zigadenus virginicus* Endl. ex Kunth)

North America. Perennial herbaceous

See *Sp. Pl.* 1: 339. 1753, *Gen. Pl.* ed. 5, 157. 1754, *Sketch Bot. S. Carolina* 1: 419. 1817, *Fl. Tellur.* 2: 29. 1837, *Mem. Reale Accad. Sci. Ist. Bologna* 2: 316. 1850, *Bull. Torrey Bot. Club* 25: 606. 1898 and Leinfellner, W. “Zur Kenntnis des Monokotyledonen—Perigons. III. Die Perigonblätter einiger weiterer *Melanthioideen* (*Melanthium*, *Zygadenus*, *Anticlea*, *Toxicoscordion*, *Veratrum* und *Kreysigia*.)” *Osterr. Bot. Z.* 108: 108–210. 1961, Kupchan, M.S., J.H. Zimmermann and A. Afonso. “The alkaloids and taxonomy of *Veratrum* and related genera.” *Lloydia* 24: 1–26. 1961

(Species of *Melanthium* should be considered poisonous, since complex alkaloids derived from steroidal precursors, similar to those in *Veratrum*, are present.)

in English: Virginia bunch-flower

Melanthium woodii (J.W. Robbins ex Alph.Wood) Bodkin (*Veratrum intermedium* Chapm.; *Veratrum woodii* J.W. Robbins ex Alph.Wood)

North America. Perennial herbaceous, stout, erect, unbranched, short thick rootstocks, clusters of large broad alternate leaves, green to greenish-white inconspicuous flowers

See *Class-book Bot.*, ed. 2: 557. 1847, *Fl. South. U.S.*: 489. 1860 and *Novon* 8: 332. 1998

(Moderate to high toxicity, usually can cause birth defects; dangerous all parts, especially roots; affected sheep, chickens and cattle.)

in English: green false hellebore, Indian poke, white hellebore

Melastoma L. Melastomataceae

From the Greek *melas* 'black' and *stoma* 'mouth', some fruits have staining effects, the fruit of some species has purple pulp; see Carl Linnaeus, *Species Plantarum*. 1: 345, 389–391. 1753, *Genera Plantarum*. Ed. 5. 184. 1754, *Genera Plantarum* 328. 1789, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 100. 1828 and *Phytologia* 47: 199–220. 1980, *BioLlania*, Ed. Espec. 6: 167–190. 1997.

Melastoma beccarianum Cogn.

Malay Peninsula. Shrub

See *Handl. Fl. Ned. Ind.* (Boerlage) i. II. (1890) 530. 1890, *Monog. Phan.* vii. (1891) 356. 1891

(Twigs decoction for gargling and for drinking for relief of toothache.)

in Borneo: si ang

Melastoma borneense Bakh.f.

Borneo. Shrub

See *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht* No. 91, 84. 1943

(Eat the young leaves with the young leaves of *Dillenia suffruticosa* for stomachache.)

in Borneo: kemunting

Melastoma dodecandrum Lour. (*Asterostoma repens* (Desr.) Blume; *Melastoma dodecandrum* Desr.; *Melastoma repens* Desr.; *Osbeckia repens* (Desr.) DC.)

SE Asia, Vietnam.

See *Flora Cochinchinensis* 1: 274. 1790, *Encyclopédie Méthodique, Botanique* 4: 46. 1797, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 142. 1828, *Museum Botanicum* 1: 50. 1849, *Flora Brasiliensis* 14(4): 243. 1887

(Antibacterial, astringent and antifungal.)

in China: di nie

Melastoma malabathricum L. (*Melastoma affine* D. Don; *Melastoma banksii* A. Cunn. ex Triana; *Melastoma candidum* D. Don; *Melastoma cavaleriei* H. Lév. & Vaniot; *Melastoma esquirolii* H. Lév.; *Melastoma malabathricum* subsp. *normale* (D. Don) K. Mey.; *Melastoma malabathricum* var. *normale* (D. Don) R.C. Srivast.; *Melastoma normale* D. Don; *Melastoma polyanthum* Blume)

Indonesia, India. Shrub or small tree, stems and leaves covered with dense appressed rough hairs, bisexual flowers purplish violet in terminal cymes, ovoid fruits somewhat fleshy dehiscent irregularly, soft dark blue pulp with orange tiny seeds, young shoots and leaves eaten as a fresh or cooked vegetable, ripe fruits eaten

See *Species Plantarum* 1: 389–390. 1753, *Memoirs of the Wernerian Natural History Society* 4: 288. 1823, *Prodromus*

Florae Nepalensis 220. 1825, *Flora* 2: 481. 1831, *FBI* 2: 523. 1879 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(27–28): 21. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 8(160–162): 61. 1910, *Taxon* 28: 630. 1979, *Regnum Veg.* 127: 65. 1993, *Journal of Ethnopharmacology* 45: 75–95, 97–111. 1995, *Novon* 8(2): 203. 1998, *Blumea* 46: 364. 2001

(Plant astringent and antiseptic, used in diarrhea, dysentery and skin diseases. Young shoots astringent. Antibacterial, astringent and antifungal, bark juice given in skin troubles. A cold infusion of the flowers an ingredient in an oral remedy for anemia associated with gastrointestinal bleeding and epigastric pain; leaves and flowers given as astringent in diarrhea, dysentery and vaginal discharge. Leaves a remedy for diarrhea, dysentery, to treat stomach complaints and thrush, externally applied on painful arthritic joints; leaf paste applied externally to cuts and wounds; leaves pounded with garlic and ginger and taken for cough; leaf decoction applied on cuts, wounds and injuries; leaf juice to stop bleeding. Leaves and roots decoction a postpartum remedy. Magico-religious beliefs, ritual, tender tips kept on main door of the house to free from evil spirits. Veterinary medicine, leaf decoction given to goats in fever.)

in English: Bank's melastoma, common sendudok, Indian rhododendron, Malabar laurel, native lasiandra, Singapore rhododendron

in Brunei: kemungting uman, kuduk kuduk

in China: ye mu dan

in India: bik-bik-araung, bit-bit-araung, dieng sohkling, kianh, kinah, mantramu chettu, tidinekere, tinrok, wacosom

in Thailand: chuk naaree, khlongkheng khee nok, mang khre

in Vietnam: mua da hung, mua se

Melastoma sanguineum Sims (*Melastoma decemfidum* Roxb.; *Melastoma decemfidum* Roxb. & Jack)

Thailand, China. Shrub or small tree, red to brown scales or bristles, petals violet, capsule fleshy, yellow pulp with orange seeds, in disturbed forest, along streams and roads, in open locations and savanna

See *Botanical Magazine* 48: pl. 2241. 1821, *Flora Indica*; or descriptions of Indian Plants 2: 406. 1824 and *Cuscatlania* 1(4): 1–6. 1989

(Crushed leaves rubbed on affected part for bruises. Leaves, roots and fruits astringent, used in diarrhea, dysentery. Roots stimulant and tonic.)

in Borneo: kemunting

in Cambodia: kenchea das, prea

in Malaysia: sendudok, sendudok gajah, senduduk

in Thailand: bre chaang, mang khre chaang, mang khre khon

in Vietnam: mua b[af]

Melhania Forssk. Sterculiaceae (Malvaceae)

After Mount Melhan, in Yemen, [Djebbel Melhan, *Arabia felix*]; see P. Forsskål (1732–1763), *Flora aegyptiaco-arabica*. 64. Copenhagen 1775 and *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 2: 15, 19. 1949.

Melhania futteyporensis Munro ex Mast. (*Melhania tomentosa* Stocks ex Masters)

India. Shrub

See *The Flora of British India* [J.D. Hooker] 1: 373. 1874

(Paste of leaves applied on boils.)

in India: basni

Melhania velutina Forssk.

Tropical Africa. Shrub, woody-based sub-shrubby herb, yellow flowers

See *Fl. Aegypt.-Arab.* 64. 1775

(Stem and leaves for diarrhea and colds, cough.)

Melia L. Meliaceae

From *melia*, the classical Greek name used by Theophrastus (*HP.* 3.11.3) for the manna ash or flowering ash tree (*Fraxinus*), the leaves are quite similar; see Carl Linnaeus, *Species Plantarum*. 1: 384–385. 1753, *Genera Plantarum*. Ed. 5. 182. 1754, *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Enumeratio Methodica Plantarum* 221. 1759, *Fam. Pl.* (Adanson) 2: 342. 1763, *De Fructibus et Seminibus Plantarum...* 1: 277. 1788, *Genera Plantarum* 263. 1789, *Fl. Ludov.* 135. 1817 and *Rep. Bot. Exch. Cl. Brit. Isles*, 3: 429 (1913, *Fieldiana, Bot.* 24(5): 444–468. 1946.

Melia azedarach L. (*Azedara speciosa* Raf.; *Azedaraca amena* Raf.; *Azedarach deleteria* Medik.; *Azedarach sempervirens* Kuntze; *Azedarach sempervirens* (L.) Kuntze; *Azedarach sempervirens* var. *glabrior* Kuntze; *Azedarach vulgaris* Gomez de la Maza; *Melia azedarach* Blanco; *Melia azedarach* var. *glabrior* C. DC.; *Melia azedarach* var. *subtripinnata* Miquel; *Melia azedarach* var. *subtripinnata* Miq.; *Melia azedarach* var. *toosendan* (Siebold & Zuccarini) Makino; *Melia azedarach* L., orth. var., nom. illeg., non *Melia azedarach* L.; *Melia chinensis* Siebold ex Miquel; *Melia dubia* Cav.; *Melia dubia* Hiern; *Melia florida* Salisb.; *Melia japonica* G. Don; *Melia japonica* Hassk.; *Melia japonica* var.

sempervirens Makino; *Melia orientalis* M. Roem.; *Melia sempervirens* Sw.)

Tropics and subtropics, Western Asia, Himalayas. Deciduous tree, slender, fast growing, branching, cylindrical bole, symmetrical crown, bark in irregular plates, old branches purplish, compound leaves, inflorescence an axillary panicle, small strongly honey-scented lilac-purple flowers, filament tube dark purple, small globular fruit wrinkled and dull yellow at maturity, elliptical black seeds

See *Species Plantarum* 1: 384–385. 1753, *Prodr.* (Swartz) 67. 1788, *Monadelphis Classis Dissertationes* 7: 364. 1789, *Prodr. Stirp. Chap. Allerton* 317. 1796, *Gen. Hist.* 1: 680. 1831, *Fl. Griffen, *Indian Assimilation in the Franciscan Area of Nueva Vizcaya*. Tucson 1979, *Gard. Bull. Straits Settlements*. 37: 64. 1984, *Journal of Cytology and Genetics* 19: 115–117. 1984, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988, *AAU Reports* 24: 1–241. 1990, *Phytotherapy Research* 17(4): 414–416. 2003, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005

(Used in Ayurveda. Root bark, stem, seeds, bark and fruits are all very poisonous; reported that the fruits are poisonous to humans, fowls, pigs, birds and cattle; reported that intake of 4–6 seeds at a time causes nausea, diarrhea, vomiting and unconsciousness, large doses cause severe colic and even death. Fruits anthelmintic, tonic. Poultice of flower used to eradicate lice and to treat skin diseases. Leaves and bark used to treat malaria; leaves and bark decoction for skin diseases, including leprosy; leaves and stem purgative, febrifuge, for malaria, venereal diseases; leaves juice diuretic, vermifuge, anthelmintic, emmenagogue; leaf paste with turmeric used to heal wounds. Root bark or bark paste used for ascariasis, ringworm disease, against spleen enlargement; stem bark paste applied on swellings; roots decoction or infusion used for regulating fertility; pounded mixture of bark of *Acacia catechu* with bark and roots of *Melia azedarach* applied on swellings of legs. Oil from seeds for itching and skin affections; antimicrobial, bacteriostatic and fungistatic efficacy of leaf essential oils. Veterinary medicine, leaf juice as anthelmintic; root decoction applied to treat wounds of cattle. Fruits piscicide.)

in English: azedarach, bastard cedar, bead tree, berry tree, black red-medicine, Cape lilac, Cape seringa, Cape syringa, Ceylon cedar, China berry, China tree, Chinaberry, Chinaberry tree, Chinese umbrella, common bead tree, Indian bead tree, Indian lilac, Japanese bead tree, mahogany, night bloom, paradise tree, Persian lilac, pride of China, pride of India, pride of Persia, red seringea, South African syringa, sycamore, Syrian bead tree, syringa, syringa tree, Texas umbrella tree, umbrella tree, West Indian lilac, white cedar, wild lilac

in Fiji: bakain, dake

Melia composita Willd. (*Melia composita* Benth.; *Melia composita* DC.; *Melia dubia* Hiern; *Melia robusta* Roxb.; *Melia robusta* Roxb. & G. Don; *Melia superba* Roxb.)

India. Tree, white fragrant flowers, ovoid drupes

See *Species Plantarum* ed. 4 [Willdenow] 2(1): 559. 1799, *Hort. Bengal.* 33. 1814, *Prodr.* (DC.) 1: 622. 1824, *Gen. Hist.* 1: 680, descr. 1831 [early Aug 1831], *Flora Australiensis*: a description ... 1: 380. 1863, *Fl. Brit. India* [J.D. Hooker] 1: 545. 1875

(Bark digestive, antiseptic, decoction taken orally for gastric problems, also applied in wounds. Leaf paste mixed with the powder of rhizome of *Curcuma longa* applied to the parts affected in smallpox; leaf extract for fever and dysentery. Fruit pulp given in colic. Seed paste applied on skin diseases.)

in India: dinghurlong, eisur, gajharra, kadukhajur, limbarra, maha-limbu, malaivembu, malaveppa, munnatikaraha, neembaro, nimbara, sural, zatho sii

Melia dubia Cav. (*Melia dubia* Hiern)

India.

See *Monadelphiae Classis Dissertationes Decem* 7: 364. 1789

(Used in Ayurveda. Bark extract given for stomachache. Leaves to check stored foodgrain pests.)

in India: arangaka, baevu, betta baevu, betta bevu, bettabevu, bol aming gok, dieng jarasang, hebbaevu, hebbevu, kaadu baevu, kaaduvevu, kaatbaage, kadukhajur, kariaput, khaali khajoor, korijilli, limbaara, malai vembu, malai vempu, malavepu, malay vembu, mallay-vembu, munnatikaaraka, nimbaara, nimbara, soh dieng lang

Melia toosendan Siebold & Zuccarini (*Melia chinensis* Sieb. ex Miq.)

India.

See *Species Plantarum* 1: 384–385. 1753, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 159. 1843, *Annales Museum Botanicum Lugduno-Batavi* 3: 23. 1867

(Leaves and bark used to treat malaria, oil from seeds for itching and skin affections. Root bark or bark used for ascariasis, ringworm diseases.)

Melia volkensii Gürke

Tropical Africa.

See *Species Plantarum* 1: 384–385. 1753, *Die Pflanzenwelt Ost-Afrikas* C: 231. 1895

(Leaves and bark used to treat malaria, headache, cutaneous leishmaniasis; leaves and bark decoction for skin diseases, including leprosy; leaves juice diuretic, anthelmintic, emmenagogue; leaf paste with turmeric used to heal wounds.)

Melianthus L. Melianthaceae

From the Greek *meli* 'honey' and *anthos* 'a flower', the flowers are rich in nectar; see Carl Linnaeus, *Species Plantarum*. 2: 639. 1753 and *Genera Plantarum*. Ed. 5. 287. 1754. Preparations of these species are rarely used for other than external application, oral toxicity being almost universally acknowledged among traditional practitioners. The internal use of preparations of *Melianthus major* is not recommended. Allied species have been shown to contain cardiac glycosides (see *Melianthus comosus*) and animal studies confirm the oral toxicity of *Melianthus major*.

Melianthus dregeanus Sond. subsp. *insignis* (Kuntze) S.A. Tansley (*Melianthus comosus* Vahl; *Melianthus comosus* auct., sensu Burt Davy, non Vahl; *Melianthus dregeanus* Sond. var. *insignis* (Kuntze) E. Phillips & Hofmeyr; *Melianthus insignis* Kuntze)

South Africa. Shrub, rounded, multistemmed, shaggy, lax branches, leaves in dense drooping clusters at branch tips, scarlet flowers hanging in axillary sprays below leaves, inflated papery winged capsule, strong unpleasant smell when the leaves are crushed, copious black nectar, leaves and flowers are boiled and eaten

See *Species Plantarum* 2: 639. 1753, *Symbolae Botanicae*, ... 3: 86. 1794, *Flora Capensis* 1: 368–369. 1860 and *Bothalia* 15(1–2): 145. 1984, *South African Journal of Botany* 73(2): 286–287. 2007

(Antifungal. Leaf poultices and leaf decoctions to treat septic wounds, sores, bruises, backache and rheumatic joints. Roots and leaves a remedy for snakebite, skin infections, slow healing sores and ulcers.)

in English: touch-me-not, tufted honeyflower

in South Africa: Kruidjie-roer-my-nie

Melianthus major L.

South Africa, India. Shrub, flexible, branching at base, bruised leaves have a strong foul aroma, flowers honey-scented in dense erect racemes, fruit a papery capsule, many black shiny seeds, honey-like nectar from the flowers is eaten

See *Species Plantarum* 2: 639 [as 939]. 1753 and *Bothalia* 2: 351–355. 1927 *Phytochemistry* 15: 430–431. 1976, *Journal of Ethnopharmacology* 33: 237–242. 1991

(Root poisonous and emetic, used as a remedy against snakebites. Vulnerary, antidote, antimicrobial. Leaf infusion applied as a lotion to sores, ulcers and wounds, piles, venereal sores; leaf paste applied as a local dressing to the area affected by ringworms of the scalp. *Melianthus major* often used in combination with *Lobostemon fruticosus* and *Galenia africana* in traditional practice.)

in English: Cape honey flower, honey flower, large honey flower

in Southern Africa: heuningblom, klappers, krikkiebos, krikkiebos, kruidjie-roer-my-nie, kruidjiebos, kruie, Truitjie-roer-my-nie; ubuhlungu benamba, ubuhlungubemamba (Xhosa)

Melica L. Poaceae (Gramineae)

From the Greek name *melike* (*meli* 'honey') for a grass, or from Latin *herba(m) medica(m)* 'grass from Media', *melicus, a, um* 'Median'; or from Latin *melica, ae* for a kind of vessel (Marcus Terentius Varro); very variable, toxic for cattle and horses when grazed in large amounts, type *Melica nutans* L., see *Species Plantarum* 1: 66. 1753, *Familles des Plantes* 2: 34, 548. 1763, *Mantissa Plantarum* 31. 1767, *Systematisches Verzeichnis* 20, 40. 1800, *Observations sur les Graminées de la Flore Belgique* 109. 1823, *Observations sur les Graminées de la Flore Belgique* 109. 1823 [1824], *Lotos* 3: 67. Prague 1853, *Matériaux pour la Flore Atlantique* 1. Apr 2003.

Melica imperfecta Trin. (*Melica colpodoides* Nees; *Melica imperfecta* var. *flexuosa* Bol.; *Melica imperfecta* var.

imperfecta; *Melica imperfecta* var. *minor* Scribn.; *Melica imperfecta* var. *pubens* Scribn.; *Melica imperfecta* var. *refracta* Thurb.; *Melica panicoides* Nutt.; *Melica parishii* Vasey ex Beal; *Melica poaeoides* Nutt.) (after Samuel Bonsall Parish, 1838–1928)

Northern America, Mexico. Perennial, forage, along roadsides, rocky places

See *Mémoires de l'Académie Impériale des Sciences de Saint-Petersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 59. 1836, *Annals of Natural History* 1: 283. 1838, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Synopsis Plantarum Glumacearum* 1: 291. 1854, *Proceedings of the California Academy of Sciences* 1: 101. 1870, *Geological Survey of California, Botany* 2: 303. 1880, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1885: 42–43. 1885, *Grasses of North America for Farmers and Students* 2: 500. 1896 and *Bulletin, Division of Agrostology United States Department of Agriculture* 30: 8. 1901, *Phytologia* 37(4): 317–407. 1977

(Used for toothache.)

in English: California melic, small-flowered melicgrass, smallflower melicgrass

Melicoccus P. Browne Sapindaceae

From the Greek *meli* 'honey' and *kokkos* 'berry, grain, seed', the fruits are sweet, see *Species Plantarum* 1: 365. 1753, *The Civil and Natural History of Jamaica* in Three Parts 210–211. 1756, Carl Linnaeus, *Species Plantarum*. Editio Secunda 1: 495. 1762 and *Genera Plantarum*. Ed. 6. 188. 1762, *Histoire des plantes de la Guiane Française* 1: 349, pl. 136. 1775, *Introductio ad Historiam Naturalem* 234. 1777, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 8: 342. 1878 and *Fl. Neotrop. Monogr.* 87: 1–179. 2003, *Ceiba* 44(2): 105–268. 2003[2005].

Melicoccus bijugatus Jacq. (*Melicoccus bijuga* L.; *Melicoccus bijugatus* fo. *alatus* Kitan.; *Melicoccus carpodea* Juss., nom. illeg.; *Paullinia sphaerocarpa* Rich. ex Juss.)

West Indies, Jamaica.

See *Enumeratio Systematica Plantarum, quas in insulis Caribaeis* 19. 1760, *Species Plantarum*, Editio Secunda 1: 495. 1762, *Select Stirp. Amer. Hist.* t. 72. 1763, *Annales des Sciences Naturelles, Botanique* 4: 348. 1804, *Mémoires du Muséum d'Histoire Naturelle* 3: 187, f. 4. 1817 and *Phytology* (Bulgaria) 11: 48. 1979, *Fl. Lesser Antil.* 5: 147. 1989

(Used for coughs and fevers.)

in English: genip, genipe, honey-berry, kenip, mamoncillo, Spanish lime

Melicope Forst. & Forst.f. Rutaceae

Greek *meli* 'honey' and *kope* (*kopto* 'to cut off, to cut small, to pierce') 'a division', referring to the glands at the base of the ovary; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*, quas in itinere ad insulas maris australis, etc. 55, t. 28. London (Nov.) [1775].

Melicope glomerata (Craib) T.G. Hartley (*Euodia glomerata* Craib; *Euodia simplicifolia* Ridl. var. *pubescens* C.C. Huang)

China.

See *Bulletin of Miscellaneous Information Kew* 1918: 362. 1918, *Acta Phytotaxonomica Sinica* 16(2): 83. 1978, *Allertonia* 8(1): 263. 2001

(Used on poultice on swellings. Veterinary medicine, fed to horses with cough.)

in China: mi guo mi zhu yu

in Thailand: i sho, i sho hpu, i sho na

Melicope semecarpifolia (Merr.) T.G. Hartley (*Euodia semecarpifolia* Merrill; *Euodia camiguinensis* Merrill; *Euodia merrillii* Kanehira & Sasaki; *Euodia retusa* Merrill)

China, Taiwan. Small trees, dioecious, inflorescences axillary, fruit follicles subglobose

See *Publications of the Bureau of Science Government Laboratories* 35: 23. 1905[1906], *Flora of Taiwan* (Second edition) 3: 522. 1993, *Planta Med.* 71(11): 1078–81. 2005, *J. Nat. Prod.* 71(1): 71–5. 2008

(Cytotoxic and anti-platelet aggregation constituents from the root wood. Antiinflammatory, antiviral and anticancer.)

in China: tai wan mi zhu yu

Gilmore, *Uses of Plants by the Indians ...* 39. 1991, *International Organization of Plant Biosystematists Newsletter* 25: 8–9. 1995

(Whole plant aromatic, antidote, febrifuge, anticoagulant, carminative, digestive, emollient. Moderate toxicity, this plant contains a glycoside with a coumarin fraction; when sweet-clover is harvested for feed, the succulent stems usually mold before drying. The molds metabolize the glycoside into dicoumarol, which interrupts vitamin K activation of prothrombin, necessary in blood clotting. Cattle, horses and sheep have been poisoned, all animals that eat affected hay may be poisoned. Symptoms of moldy sweet-clover poisoning may appear without any obvious cause.)

in English: Bokhara clover, Bukhara clover, clover, hubam, hubam clover, Siberian melilot, sweet clover, sweet grass, sweet melilot, sweet-scented clover, white melilot, white melilot clover, white sweetclover

in China: bai hua cao mu xi

in India: metha, ole, pik, pirimasuriara, sada banmethi, tirep

in Peru: alfalfa chilena

in South Africa: Bokhaargras, Bokhaarklawer, witstinkklawer

Melilotus indicus (L.) All. (*Melilotus bonplandii* Ten.; *Melilotus indica* (L.) All.; *Melilotus indicus* Desr.; *Melilotus indicus* All.; *Melilotus indicus* (L.) All. subsp. *permixtus* (Jord.) (Traditional healers use it to chase away ominous clouds.)

in English: bristle-leaved red top, red top

in South Africa: blinkblaarblinkgras, boleya, fluweelgras, lechocho, rooitop, steekblaarblinkgras

Meliosma Blume Sabiaceae (Meliosmaceae)

Greek *meli* 'honey' and *osme* 'smell, odour, perfume', referring to the honey-scented flowers, see *Cat. Gew. Buitenzorg* ... (Blume) 10–11. 1823, *Plantarum vascularium genera secundum ordines* ... *Comm.*: 346. 1843, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1850(5): 67, 69, 71–72. 1850 and *Fieldiana, Bot.* 24(6): 273–275. 1949, *Blumea* 19(3): 430–431, 434–435, 447, 484, 516–517. 1971.

Meliosma cuneifolia Franchet

China, Tibet.

See *Nouvelles archives du muséum d'histoire naturelle*, sér. 2, 8: 211. 1886 and *Blumea* 19(3): 442. 1971

(Antiseptic.)

in China: pao hua shu

Meliosma fordii Hemsley (*Meliosma simplicifolia* subsp. *fordii* (Hemsl. ex Forb. & Hemsl.) Beusekom; *Meliosma simplicifolia* subsp. *fordii* (Hemsl.) Beusekom)

China.

See *Journal of the Linnean Society, Botany* 23(153): 144–145. 1886 and *Blumea* 19(3): 480, f. 22. 1971

(Antiseptic, for skin diseases.)

in China: xiang pi shu

Meliosma rigida Siebold & Zuccarini (*Meliosma simplicifolia* subsp. *rigida* (Siebold & Zucc.) Beusekom)

China. Small trees, ferruginous-pubescent, alternate leaves coriaceous, bisexual flowers in terminal panicles, white petals, globose drupes with single seed

See *Blumea* 19(3): 473, f. 22. 1971

(Antifungal.)

in China: bi luo zi

Meliosma simplicifolia (Roxb.) Walp. (*Millingtonia simplicifolia* Roxb.; *Meliosma simplicifolia* Walp.)

Sri Lanka, India. Treelet, evergreen, inflorescences terminal or axillary, white petals

See *Plants of the Coast of Coromandel* 3: 48, 50, pl. 254. 1819, Walpers, Wilhelm Gerhard (1816–1853), *Repertorium Botanices Systematicae*. 1: 423. Lipsiae: sumtibus Friderici Hofmeister, 1842–1848, *Numer. List* [Wallich] n. 8114 A. 1847

(Ritual, ceremonial.)

in China: dan ye pao hua shu

in India: chengoini, kolakkatta maram

Meliosma thorelii Lecomte (*Meliosma affinis* Merrill; *Meliosma buchananifolia* Merrill; *Meliosma henryi* Diels subsp. *mannii* (Lace) Beusekom; *Meliosma henryi* subsp. *thorelii* (Lecomte) Beusekom; *Meliosma mannii* Lace)

China, Vietnam.

See *Bull. Soc. Bot. France* 54: 677–678. 1908 [1907 publ. 1908], *Bulletin of Miscellaneous Information Kew* 113. 1915, *Philippine Journal of Science* 23(3): 250–251. 1923, *Journal of the Arnold Arboretum* 21(3): 375. 1940, *Blumea* 19(3): 449, 451, f. 22. 1971

(Ceremonial, bark used in making incense.)

in China: shan she ye pao hua shu, shan xian ye pao hua shu

Melissa L. Lamiaceae (Labiatae)

From the Latin *melissophyllum* and Greek *melissophyllum*, Greek *melissa* 'a honeybee, bee, honey', leaves in skeps alleged to attract bee swarms, lemon-scented leaves, bees are supposed to be delighted with this herb; Melissa was a nymph who is said to have invented the art of keeping bees; see Carl Linnaeus (1707–1778), *Species Plantarum*. 2: 592–594. 1753 and *Genera Plantarum*. Ed. 5. 257. 1754; Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 378–379. Basel 1996; Serapiom, *El libro agregà de Serapiom*. A cura di G. Ineichen. Venezia-Roma 1962–1966; [John Lemprière, 1765?–1824], *Lemprière's Classical Dictionary of Proper Names Mentioned in Ancient Authors*. Third Edition. 369. London and New York 1984; Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 738. 1983; P. Sella, *Glossario latino emiliano*. Città del Vaticano 1937.

Melissa axillaris (Benth.) Bakh. f. (*Calamintha cavaleriei* H. Lév. & Vaniot; *Geniosporum axillare* Benth.; *Melissa hirsuta* Blume; *Melissa parviflora* Benth.; *Melissa parviflora* var. *purpurea* Hayata)

Japan, China.

See *Species Plantarum* 2: 592–594. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Bijdragen tot de flora van Nederlandsch Indië* 14: 830. 1826, *Plantae Asiaticae Rariores* 1: 65–66 and 2: 18. 1830 and *Repertorium Specierum Novarum Regni Vegetabilis* 8(182–184): 424. 1910, *Journal of the College of Science, Imperial University of Tokyo* 30(1): 228–229. 1911, *Florula Javanica* 2: 629. 1965, *Taxon* 31: 593–595. 1982

(Used medicinally for dysentery and snakebites; also used as an essence in hair oil.)

in English: axillary balm

in China: mi feng hua, mi feng hua shu

Melissa officinalis Linnaeus (*Melissa bicornis* Klokov)

Europe.

See *Species Plantarum* 2: 592–594. 1753 and *Cytologia* 46: 27–44. 1981, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 4: 331–339. 1981, *Taxon* 32: 138–140. 1983, *Memórias da Sociedade Broteriana* 27: 27–75. 1984, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 203–228. 1985, *Regnum Veg.* 127: 65. 1993, *Thaiszia* 7: 75–88. 1997

(Leaves infusion sedative, analgesic, for insomnia, headaches and toothaches.)

in English: balm, common balm, bee balm, lemon balm, sweet balm, tea balm, balm leaf

in Peru: toronjil

in China: xiang feng hua

in Arabic: louiza, merzizou

Melocalamus Benth. Poaceae (Gramineae)

From the Greek *melon* ‘an apple’ and *kalamos* ‘reed’, resembling *Dinochloa*, type *Melocalamus compactiflorus* (Kurz) Benth. & Hook.f., see *J. Linn. Soc. Bot. London* 19: 134. 1881 [1882 publ. 1881], *Genera Plantarum* 3: 1095, 1212. 1883 and *Kew Bulletin* 1936: 251–254. 1936, *Acta Phytotax. Sin.* 30(2): 163–168. 1992, Z.-L. Li, The Flora of China Bambusoideae project, problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61–81. 1997.

Melocalamus compactiflorus (Kurz) Benth. & Hook.f. (*Dinochloa compactiflora* (Kurz) McClure; *Melocalamus compactiflorus* Benth.; *Melocalamus compactiflorus* (Kurz) Benth.; *Melocalamus compactiflorus* (Benth.) Hook.f.; *Pseudostachyum compactiflorum* Kurz; *Pseudostachyum glomeriflorum* Kurz)

Thailand, Myanmar, India, Bangladesh, China, Vietnam. Scrambling, evergreen, scandent, spreading, arching, climbing over tall trees, culms asymmetric and zigzag, densely tufted, arborescent, sheath hard and fragile, sheath auricles developed, sheath ligule almost truncate, large inflorescence on a leafless branch, interrupted panicle, clusters of pseudospikelets, two fertile florets and one empty terminal, 2 glumes 2-toothed, 3 lodicules long-ciliate, 6 stamens free, ovary glabrous, 2–3 stigmas plumose, watery sap coming out of the cut stem, used for making baskets, secondary forest

See *Journal of the Asiatic Society of Bengal*. Pt. 2. *Nat. Hist.* 42(4): 252. 1874 [1873 publ. 26 May 1874], *J. Linn. Soc. Bot. London* 19: 134. 1881 [1882 publ. 1881], *Genera Plantarum* 3: 1212. 1883 and *Kew Bulletin* 1936: 253. 1936[1937]

(The watery sap taken against influenza and cough in children.)

in Bangladesh: lota bans

in India: bethus bans, kalibans, latha, lota, lotabans, sai-ril, sairil

in Thailand: bo, bu, buh, lai khrua, lai mong, phai haang chaang, phai hang chang, sai tan, sai tang, sai wan, wa bo, waa boh

in Vietnam: ca truc, tre lim

Melocanna Trin. Poaceae (Gramineae)

From the Greek *melon* ‘an apple’ and *kanna* ‘a reed, cane’, referring to the fruit, a berry size of an avocado; planted species, charcoal of high absorbing power prepared from the plants, the culms contain abundant amounts of a secretion commonly known as *tabasheer* and used in medicine, type *Melocanna bambusoides* Trin., see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde 1820–1822, Journal de Physique, de Chimie, d’Histoire Naturelle et des Arts* 95: 151. 1822, *Clav. Agrostogr. Antiq.* 105, 397. 1822, *Allgemeine Naturgeschichte* 3(1): 422. 1841, *Deutsch. Fl.* 6: 6. 1846, *Synopsis Plantarum Glumacearum* 1: 332. 1854, *Flora van Nederlandsch Indië* 3: 418. 1855, *Catalogus plantarum quae in Horto botanico bogoriensi ...* 20. 1866, *Transactions of the Linnean Society of London* 26(1): 133–134. 1868, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 39(2): 89, t. 6, f. 1, 2, 29. 1870, *Forest Flora of British Burma* 2: 564. 1877, *Journal Linn. Soc., Bot.* 19: 31. 1881 and *Transactions of the Linnean Society* 6: 401–425. 1904, *Fieldiana, Botany* 24(2): 38–331. 1955, *Kew Bulletin* 2: 206. 1956, *Agriculture Handbook* 193: i-iii, 1–74. 1961, *Journal of the Bombay Natural History Society* 59: 696–697. 1962, *Bot. Bangladesh, Myanmar, northeastern India, Sikkim. Evergreen, sympodial, culms erect and straight, strong, smooth, pendulous tips, nodes inconspicuous and not swollen, white ring below the nodes, branching from midculm upwards, vigorously rhizomatous, elongated slender rhizome necks, internodes hollow, culm sheath deciduous or

persistent, sheath auricles indistinct, sheath ligule very short, leaf sheaths glabrous, leaves long lanceolate or oblong lanceolate, along one side of the axis groups of pseudospikes, one fertile floret and one abortive, 2–4 glumes shortly mucronate, ovary ovoid, recurved stigmas, large fruit berry-like, fruit shapes variable, fruits easily germinating often while still on the plant, flowers gregariously, aggressive and fast growing, forming diffuse and open clumps, eradication very difficult, durable culms for mat-making and construction, for making floats, baskets, very good pulp for paper, edible young shoots, edible fruits as famine food, grows on well-watered and drained sandy clay loam, fertile loam, moist areas, dry sandy slopes, lower hill forests, sandy soils, alluvial soil

See Hendrik Adriaan van Rheede tot Draakestein (1637–1691), *Hortus Indicus Malabaricus*. [commentariis illustravit Johannes Commelinus] Amstelodami [Amsterdam] 1678–1703, *Hort. Bengal.* 25. 1814, *Plants of the Coast of Coromandel* 3: 37–38, t. 243. 1819, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1821, *Syn. (Root infusion drunk for pain during pregnancy.)

Melodinus Forst. & Forst.f. Apocynaceae

Greek *melon* ‘an apple’ and *dineo* ‘I twist’, referring to the shape of the fruit and the climbing and twining habit, the fruit is a large and pulpy berry; see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 37, t. 19. London (Nov.) [1775].

Melodinus cochinchinensis (Loureiro) Merrill (*Melodinus henryi* Craib; *Oncinus cochinchinensis* Loureiro)

SE Asia.

(The fruits are used to treat infantile meningitis and fractures.)

in English: Henry melodinus

in China: si mao shan chen

Melodinus fusiformis Champion ex Bentham (*Melodinus edulis* H. Léveillé; *Melodinus esquirolii* H. Léveillé; *Melodinus flavus* H. Léveillé; *Melodinus seguinii* H. Léveillé; *Melodinus wrightioides* Handel-Mazzetti) (referring to the fusiform berries)

See *Hooker's J. Bot. Kew. Gard. Misc.* 4: 332. 1852

(Plant used for the treatment of rheumatism and injury. The fruit is poisonous.)

in English: fusiform melodinus

in China: jian shan chen

Melodinus suaveolens (Hance) Champion ex Bentham (*Lycimnia suaveolens* Hance in Walpers; *Melodinus laetus* Champion ex Bentham)

China.

(The fruit is used to treat abdominal pain, infantile malnutrition due to intestinal parasites, indigestion, and hernia.)

in English: fragrant melodinus

in China: shan chen

Melodorum Lour. Annonaceae

From the Greek *melon* ‘an apple’ and *doron* ‘gift’, referring to the fruit; or from the Latin *mel*, *mellis* ‘honey’ and *odor*, *odoris* ‘smell, perfume’, referring to the honey-scented leaves; see J. de Loureiro, *Flora Cochinchinensis* 329, 351. 1790 and *Philipp. J. Sci.* 15(2): 125. 1919.

Melodorum cylindricum Maingay ex Hook.f. & Thomson

Borneo.

See *Fl. Brit. India* [J.D. Hooker] 1: 80. 1872

(Root decoction drunk for diarrhea and snakebite.)

Malay name: tepak

Melodorum fruticosum Lour.

SE Asia, Thailand. Small tree, cylindrical crown, smooth dark green elongated leaves, solitary flowers axillary and terminal, sweetly scented cream flowers with brownish tips, three outer petals, aggregate fruits, black seeds, the symbol flower and tree of Itsisaket/Sisaket province (Thailand), in mixed deciduous forest and dry evergreen forest

See *Plant Systematics and Evolution* 144: 165–177. 1984, *Phytochemistry* 29(5): 1667–1670. 1990, Chaiyo Chaichantipyuth et al. “Oxidized heptenes from flowers of *Melodorum fruticosum*.” *Phytochemistry* 58(8): 1311–1315. 2001

(Dried flowers tonic, mild cardiac stimulant, preparations made from them increases hemoglobin and help with muscle tone.)

in English: devil tree, white cheesewood

in Thailand: lamduan

Melodorum fulgens Hook.f. & Thomson (*Melodorum fulgens* Fernandez-Villar)

SE Asia.

See *Fl. Ind.* [Hooker f. & Thomson] i. 120. 1855

(Leaves decoction as a postpartum remedy.)

Malay name: akar kep, medang salah hutan

Melodorum kentii Hook.f. & Thomson

Java. Understory tree, primary forest

See *Fl. Ind.* [Hooker f. & Thomson] i. 116. 1855

(Fresh aromatic roots peeled and chewed to ease stomachache.)

in English: forest kelembunyo

in Indonesia: kelembunyo bai

Melodorum lanuginosum Hook.f. & Thomson (*Fissistigma lanuginosum* (Hook.f. & Thomson) Merr.; *Fissistigma lanuginosum* Merr.)

SE Asia.

See *Flora Indica*: being a systematic account of the plants. 117. 1855 and *Philippine Journal of Science* 15: 132. 1919

(Root decoction as a postpartum remedy and for stomachache.)

Malay names: larak api, selusoh semang

Melodorum manubriatum Hook.f. & Thomson

Malay Peninsula. Tree

See *Fl. Ind.* [Hooker f. & Thomson] i. 118. 1855

(Roots febrifuge.)

Malay name: akar sumbulut

Melodorum pisocarpum Hook.f. & Thomson

Malay Peninsula. Tree

See *Fl. Ind.* [Hooker f. & Thomson] i. 123. 1855

(Roots febrifuge.)

Malay name: kudunak

Melothria L. Cucurbitaceae

Latin *melothron* or *melotrum* for a plant, the white bryony, also called *vitis alba* (Plinius), Greek *melothron* (*melon* ‘an apple’), ancient name used by Theophrastus and Dioscorides for a kind of white grape or a plant related to the genus *Bryonia*; see Carl Linnaeus, *Species Plantarum*. 1: 35. 1753 and *Genera Plantarum*. Ed. 5. 21. 1754, *Prodromus Florae Norfolkicae* 69. 1833, *Index Seminum* [Goettingen] 1835: 5. 1835, *Journal of Botany*, being a second series of the Botanical Miscellany 3: 274–275. 1841, *Linnaea* 17: 576. 1844, *Familiarum Naturalium Regni Vegetabilis Monographicae* 2: 15, 68. 1846, *The Flora of Jamaica* 2: 142. 1850 and *Fieldiana, Bot.* 24(11/4): 306–395. 1976, *Ann. Missouri Bot. Gard.* 65(1): 285–366. 1978, *Fl. Venezuela* 5(1): 11–202. 1992, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001.

Melothria pendula L. (*Bryonia convolvulifolia* Schldl.; *Bryonia guadalupensis* Spreng.; *Melothria donnell-smithii* Cogn.; *Melothria donnell-smithii* var. *hirtella* Cogn.; *Melothria donnell-smithii* var. *rotundifolia* Cogn.; *Melothria fluminensis* Gardner; *Melothria fluminensis* var. *microphylla* Cogn.; *Melothria fluminensis* var. *ovata* Cogn.; *Melothria guadalupensis* (Spreng.) Cogn.; *Melothria pendula* L. var. *chlorocarpa* (Engelm.) Cogn.; *Melothria pendula* L. var. *pen-*

dula; *Melothria guadalupensis* (Spreng.) Cogn.; *Melothria scabra* Naudin)

North America, Guatemala. Perennial vine, annual, slender, tendrils beside the leaves, flowers solitary and axillary

See *Systema Vegetabilium*, editio decima sexta 3: 15. 1826, *London Journal of Botany* 1: 173. 1842, *Linnaea* 26: 640. 1855, *Annales des Sciences Naturelles; Botanique*, sér. 5, 6: 10–11. 1866, *Flora Brasiliensis* 6(4): 28. 1878, *Monographiae Phanerogamarum* 3: 580–581, 585. 1881, *Botanical Gazette* 16(1): 9. 1891

(Fruits and roots toxic, poisonous, strongly purgative. Powdered leaves and gunpowder applied to moccasin bite.)

in English: Guadeloupe cucumber

Melothria perpusilla (Blume) Cogn. (*Cucurbita perpusilla* Blume)

India. Weak climber, yellowish green flowers, red fruits cooked as vegetable

See *Catalogus* ... 105. 1823, *Monographiae Phanerogamarum* 3: 607. 1881

(Roots decoction taken in venereal diseases, diarrhea, fever.)

in India: bankundri, birkudri

Melothria scabra Naudin (*Apodanthera pringlei* S. Watson; *Melothria costensis* C. Jeffrey; *Melothria donnell-smithii* Cogn.; *Melothria donnell-smithii* var. *hirtella* Cogn.; *Melothria donnell-smithii* var. *rotundifolia* Cogn.; *Melothria fluminensis* Gardner; *Melothria pendula* L.; *Melothria pringlei* (S. Watson) Mart. Crov.)

Mexico, North America. Slender

See *Systema Vegetabilium*, editio decima sexta 3: 15. 1826, *London Journal of Botany* 1: 173. 1842, *Linnaea* 26: 640. 1855, *Annales des Sciences Naturelles; Botanique*, sér. 5, 6: 10–11. 1866, *Flora Brasiliensis* 6(4): 28. 1878, *Monographiae Phanerogamarum* 3: 580–581, 585. 1881, *Proceedings of the American Academy of Arts and Sciences* 25: 149–150. 1890, *Botanical Gazette* 16(1): 9. 1891 and *Notulae Systematicae*. *Herbier du Museum de Paris* 15: 46. 1954, *Kew Bulletin* 33(2): 349. 1978

(Fruits and roots toxic, poisonous, purgative.)

Common names: cochinito, granadillita, sandillita de culebra

Memecylon L. Melastomataceae (Memecylaceae)

From the Greek *memekylon*, ancient name for the fruit of *Arbutus unedo*, the strawberry tree; Latin *memecylon*, *i* ‘the edible fruit of the strawberry-tree’ (Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 349. 1753 and *Genera Plantarum*. Ed. 5. 166. 1754 and *Veg. Erde* [Engler] 9 (*Pflanzenw. Afr.* Band 3, Heft 2): 768. 1921, *Adansonia* sér. 2, 17(3–4): 422–423. 1978, *Bull. Mus. Natl. Hist. Nat.*, B,

Adansonia Sér. 4, 6(4): 411, 441. 1985 [1984 publ. 1985], *Taxon* 59(1): 90. 2010.

Memecylon amplexicaule Roxb.

Malaysia, India. Small tree, red inner bark, sessile leaves, inflorescence an axillary cluster, blue-white bisexual flowers with spreading petals and lavender stamens, purple berries

See *Species Plantarum* 1: 349. 1753

(Used in Sidha. For dizziness.)

in India; kaya

Malay names: nipis kulit, pekan

Memecylon angustifolium Wight

India.

See *Illustrations of Indian Botany* 1: 215. 1840–1850

(Used in Ayurveda and Sidha.)

in India: alli, arrukanila, attukanalei, attukanila, attunjarei, belavaka, belavakaana, belavakana, bellakan, kakajembu, mundi mara, oodidalle, kaavu gida, kaaka jembu, udidalle, vellaikaya, vellaikkaya

Memecylon caeruleum Jack (*Memecylon cyanocarpum* C.Y. Wu ex C. Chen; *Memecylon floribundum* Blume)

India, SE Asia. Tree, ovate leaves, pink flowers, fruit globose

See *Malayan Miscellanies* 1(5): 26. 1820, *Museum Botanicum* 1: 361. 1851 and *Flora Yunnanica* 2: 134, pl. 32, f. 6–9. 1979

(Cooling and astringent.)

in China: tian lan gu mu

Memecylon dichotomum C.B. Clarke ex King

Malaysia, India.

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 69: 75. 1900

(Roots for rheumatism; a decoction as a postpartum remedy.)

Malay name: bebuas

Memecylon edule Roxb.

India.

See *Species Plantarum* 1: 349. 1753 and *Taxon* 31: 576–579. 1982, *Journal of Cytology and Genetics* 25: 321–322. 1990, *Proceedings of the Indian Science Congress Association* 79(3–viii): 124–125. 1992

(Used in Ayurveda and Sidha. Root decoction in controlling excessive menstrual discharges. Leaves astringent, cooling, for gonorrhoea, conjunctivitis.)

in India: alamar, alamarn, alie, alimar, alimaru, alle, alli, allichettu, anakayavu, aneikombi, anjani, archeti, caserychedi, cirukaca, cuyampuceti, gandukepala, kaca, kacamaram, kacan, kacariceti, kayac-ceti, kalayam, kana,

kanalei, kanila, kannavu, kanyavu, kasa, kasan, kasava, kasavu, kashamaram, kashava, kashavu, kashawa, kashoa, kasjavo-maram, kasavu, kaya, kayacceti, kayala, kayamaram, kayampuceti, kayampuchedi, kayampuvuchedi, kayan, kayavu, klavu, kucumam, limba, limbatoli, limbtoli, manchialli, manciyalli, masavu, midalli, mulacittincam, mundi, nemar, netunchetti, neymar, nibidalle, niroso, ollekodi, peddaalli, peddalli, punkali, tipali, tiyali, wollekodi

Memecylon flavovirens Baker

Tropical Africa. Small tree or shrub, erect, rough cracked bark, pink-white corolla, fleshy fruit

See *Bulletin of Miscellaneous Information Kew* 1897: 268. 1897

(Roots and leaves for pneumonia, stomachache, venereal diseases.)

Memecylon harmandii Guill.

Vietnam.

See *Bull. Soc. Bot. France* 68: 7. 1921, *Fl. Gen. Indo-Chine* 2: 933. 1921

(Antiinflammatory.)

Memecylon lancifolium Ridl.

Malay Peninsula.

See *Fl. Malay. Penin.* v. 311. 1925

(A treatment for impotence, boil roots together with those of *Corymborkis veratrifolia* and drink.)

Memecylon malabaricum Cogn. (*Memecylon malabarium* Kostel.; *Memecylon randerianum* S.M. Almeida & M.R. Almeida)

India.

See *Allg. Med.-Pharm. Fl.* iv. 1517. 1835, *Monogr. Phan.* [A. DC. & C. DC.] vii. (1891) 1148. 1891 and *J. Bombay Nat. Hist. Soc.* 85(3): 521. 1988 (publ. 1989)

(Used in Sidha. Leaves for skin diseases.)

in India: bandee kaayi, bandikya, bandikyaa, dodda nekkare, gandu kusumaale, gandukaepala, gandukepala, jadekodi, jodukodi, kasavu, kannavu, kanyavu, kashavu, kaya, kayavu, limbatholi, lokundi, malamthetti, mundi, nemar, neymar, ollikkoti, perungaca, perunkaca, perunkaya, puvai, puvaiceti, vacci, wolekodi

Memecylon minutiflorum Miq.

Sumatra. Small trees, red inner bark, lanceolate leaves

See *Fl. Ned., Eerste Bijv.* 2: 323. 1861 [*Flora Indiae Batavae* ... Supplementum Primum. *Prodromus Florae Sumatranae*.]

(Roots decoction as a postpartum remedy.)

Malay name: sedawai hitam

***Memecylon ovatum* Sm.**

Philippines.

See Rees, Abraham (1743–1825), *The cyclopædia: or, Universal dictionary of arts, sciences, and literature* / by Abraham Rees ... with the assistance of eminent professional gentlemen ... London: Longman, Hurst, Rees, Orme & Brown [etc.], 1819

(Roots for menstrual disorders. Leaves infusion as eyewash.)
in Philippines: kandon, kandong, kulis, malabanggi, sagingsing

***Memecylon polyanthemum* Hook. f.**

Tropical Africa.

See *Flora of Tropical Africa* [Oliver et al.] 2: 463. 1871

(Leaves and bark analgesic, for toothache and venereal diseases.)

***Memecylon umbellatum* Burm. f.** (*Memecylon umbellatum* C. Presl; *Memecylon umbellatum* Gaertn.; *Memecylon umbellatum* Kostel.; *Memecylon umbellatum* Blume; *Memecylon umbellatum* Benth.)

Sri Lanka. Tree, dark fruits

See *Bijdr. Fl. Ned. Ind.* 17: 1094. [Oct 1826–Nov 1827], *Epimel. Bot.* 208. 1851, *Fl. Austral.* 3: 293. 1867

(Used in Ayurveda. Root decoction in excessive menstrual discharge. Leaves cooling, astringent, given in gonorrhoea.)

in India: aalamar mara, aale maara, adachaare, adachare, alamaru, alle, alle mara, alli, anakkayavu, anjan, anjane, anjani, anjun, arachara, arachate, archeti, gandukepala, hal-achaare, harachaari, harchari, huli soppu, huli soppu mara, hulisoppu, kalayam, kalo-kudo, kanjavu, kannavu, kasa, kasai, kasan, kasavu, kaya, kayala, kayam, kayavu, knaila, korakaha, kukka alli, kurpa, lakhonde, limba, limbakoli, limbatholi, limboli, manchiyalli, manjiyalli, midalli, mudimara, mundi mara, naemaara, naimaru, netunjetti, neymar, nibidalle, nirasa, peddalli, perungaya, pungali, puvai, sarani, sirugasa, udaballi, udatalli, uididalle, wollekodi

Menispermum L. Menispermaceae

Moonseed, from the Greek *mene* ‘the moon, the crescent moon’ and *sperma* ‘seed’, referring to the shape of the seeds.

***Menispermum canadense* L.**

North America. Woody, deciduous, perennial twining vine without tendrils, greenish white flowers in small axillary clusters, fruit blue or bluish black drupe

See *Species Plantarum* 1: 340–341. 1753, *Gen. Pl.* ed. 5, 158, 1754 and Gress, E.M. “Poisonous plants of Pennsylvania.” *Penn. Dep. Agric. Gen. Bull.*, 531. 1935, Doskotch, R.W., Knapp, J.E. “Alkaloids from *Menispermum canadense*.”

Lloydia (Cincinnati), 34: 292–300. 1971, *Taxon* 31(2): 344–360. 1982, *Erigenia* 11: 1–8. 1991, M.R. Gilmore, *Uses of Plants by the Indians* ... 31. 1991, *Regnum Veg.* 127: 66. 1993

(All parts and the fruit are thought to be poisonous, highly toxic, may be fatal if eaten. Moonseed contains alkaloids that may be responsible for the toxicity of the fruit to humans. Used for skin diseases, gastrointestinal and gynecological disorders and venereal diseases.)

in English: Canada moonseed, ghost fruit, grapes of the ghosts, moonseed, sore mouth, yellow parilla

in North America: hakakut (Pawnee), ingthahe-hazi-i-ta (Omaha-Ponca), ménisperme du Canada, raison de couleur, wanaghi-haz (Winnebago)

***Mentha* L. Lamiaceae (Labiatae)**

The Latin name for mint, *menta*, *mentha*; Greek *mintha*, *minthe*, *minthes*; Akkadian *mitum* ‘dead’, Minthe was a daughter of Cocytus, loved by Pluto, Ovidius: “... in olentes mentas”, *Met.* X, 729; see Carl Linnaeus, *Species Plantarum*. 2: 576–578. 1753, *Genera Plantarum*. Ed. 5. 250. 1754, *The Gardeners Dictionary* ... Abridged ... fourth edition vol. 3. 1754, *Species Plantarum* 2: 804–805. 1763, *The Gardeners Dictionary*: ... eighth edition *Pulegium* no. 1. 1768, *Flore Française*. Troisième Édition 1: 537. 1805, *Outlines of Botany* 969, 1095, 1106. 1835, *Flora* 1: 314, 316. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 165, 171. 1848, *Flore Française*. Troisième Édition 2: 648. 1850 and *Flora URSS* 21: 606, 610, 613, 620. 1954, *Fieldiana, Bot.* 24(9/3): 237–317. 1973, M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 3: 741. 1983, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 472. 1994, G. Mentzelia veatchiana Kellogg (*Acrolasia veatchiana* (Kellogg) Rydb.; *Mentzelia albicaulis* var. *veatchiana* (Kellogg) Urb. & Gilg; *Mentzelia gracilentata* Torr. & A. Gray var. *veatchiana* (Kellogg) Urb. & Gilg; *Mentzelia gracilentata* var. *veatchiana* (Kellogg) Jeps.)

North America. Annual

See *Proceedings of the California Academy of Sciences* 2: 99–101, f. 28. 1863

(Seeds used for burns, toothache.)

in English: Veatch's blazingstar, white-stem stick-leaf, whitestem blazingstar

Menyanthes L. Menyanthaceae

Menyanthos, a Greek classical name for a water plant, possibly from the Greek *mene* 'moon, crescent moon' and *anthos* 'flower', or from *minyos* 'small, tiny' and *anthos*; see Carl Linnaeus, *Species Plantarum*. 1: 145. 1753 and *Genera Plantarum*. Ed. 5. 71. 1754, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 527. 1770 and *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1442–1443. 2001.

Menyanthes trifoliata L. (*Menyanthes trifoliata* L. var. *minor* Raf.; *Menyanthes trifoliata* L. var. *minor* Fernald)

China, North America. Perennial herb, long green rhizomes, flour, forage, food in time of scarcity

See *Species Plantarum* 1: 145. 1753 and *Rhodora* 31(370): 198. 1929, *Bot. Žurn.* (Moscow & Leningrad) 60(6): 864–872. 1975, *Bot. Žurn.* (Moscow & Leningrad) 61(7): 963–969. 1976, *Acta Fac. Rerum Nat. Univ. Comeniana*, *Bot.* 25: 1–18. 1976, *Taxon* 30: 857–860. 1981, *Taxon* 31(2): 344–360. 1982, *Bot. Zhurn.* 67 (6): 778–787. 1982, *Inform. Bot. (Roots analgesic, antiinflammatory, antihemorrhagic, antiemetic, laxative, carminative, antirheumatic, tonic, stomachic, an infusion taken for constipation and rheumatism, for chronic inflammatory conditions.)

in English: bogbean, buckbean, common buckbean, marsh-trefoil

in Brazil: trevo-aquático, trifólio-librino, trevo-da-água, trevo-dos-charcos

in China: cho tsai, ming tsai, shi cai, shui cai, shui cai shu, shui tsai, tsui tsao

Menziesia Smith Ericaceae

After the British (Scotsman) physician Archibald Menzies, 1754–1842 (London), 1782 naval surgeon Royal Navy, collected Scottish plants for John Fothergill and William Pitcairn, plant collector in Western Australia, 1790 Fellow of the Linnean Society, 1791–1795 with Captain George Vancouver (1757–1798) on the Voyage of the *Discovery* and *Chatham*. See *Plantarum Icones Hactenus Ineditae* 3: t. 56. 1791, George Vancouver, *A Voyage of Discovery to the North Pacific Ocean and round the World*. London 1798, *Linnaea* 24: 11. 1851 and John T. Walbran, *British Columbia Coast Names, 1592–1906. To Which are Added a Few Names in Adjacent United States Territory, Their Origin and History*. First Edition. Ottawa: Government Printing Bureau, 1909, Warren R. Dawson, *The Banks letters, a Calendar of the Manuscript Correspondence of Sir Joseph Banks*. 604–607. London 1958, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 209–210. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 476. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. 76. New York and London 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 264. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 285. 1973, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 250. Cape Town 1981, Jonathan Wantrup, *Australian Rare Books, 1788–1900*. Sydney 1987, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 750. Stuttgart 1993, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 482–483. 1994, H. Suzanne Maxwell and Martin F. Gardner, "The quest for Chilean green treasure: some notable British collectors before 1940." *The New Plantsman*. 4(4): 195–214. December 1997. Andromedotoxins (grayanotoxins), diterpenoid alkaloids, these toxins are common to all poisonous members of the heath family, including *Kalmia* spp. and *Rhododendron* spp.

Menziesia ferruginea Sm. (*Menziesia ferruginea* Sm. subsp. *glabella* (A. Gray) Calder & Roy L. Taylor; *Menziesia ferruginea* Sm. var. *glabella* (A. Gray) M. Peck; *Menziesia glabella* A. Gray)

North America. Perennial shrub

See *Plantarum Icones Hactenus Ineditae* 3: t. 56. 1791, *Synoptical Flora of North America* 2(1): 39. 1878 and Marsh,

C.D. “*Menziesia*, a new stock-poisoning plant of the north-western states.” *U.S. Dep. Agric. Bur. Plant Ind.*, 16. 1914, *Man. Pl. Oregon* 542. 1941, *Madroño* 6(4): 135. 1941

(This plant has occasionally been implicated in cases of sheep poisoning. Leaves analgesic, antiseptic, applied to sores and swellings; chewed for stomach disorders and for heart troubles. Magico-religious beliefs, love charm, witchcraft medicine, bark used against evil spirits.)

in English: mock azalea, rusty leaf, western minniebush

Mercurialis L. Euphorbiaceae

From the Latin *Mercurialis*, *e* ‘belonging to the god Mercury’, *Mercurius*, *ii* ‘the son of Jupiter and Maia’, originally *herba mercurialis*; see Carl Linnaeus, *Species Plantarum*. 2: 1035. 1753 and *Genera Plantarum*. Ed. 5. 457. 1754, *New Fl. (Rafinesque)* iv. 9. 1836, *Fl. Hautes-Pyrénées* 154. 1867.

Mercurialis annua L. (*Discoplis serrata* Raf.; *Mercurialis ambigua* L.f.; *Mercurialis annua* Thunb.; *Mercurialis annua* Uspenski ex Ledeb.; *Mercurialis annua* *lusus ambigua* (L.f.) in English: Brazilian jalap, Ceylon merremia, dissected merremia, Hawaiian wood rose, noon-flower, noyau vine, Spanish woodbine, wood rose, wooden rose, yellow morning glory

Merremia emarginata (Burm. f.) Hallier f. (*Convolvulus reniformis* Roxb.; *Evolvulus emarginatus* Burm. f.; *Evolvulus glechoma* Welw.; *Ipomoea reniformis* (Roxb.) Choisy; *Ipomoea reniformis* Choisy)

Tropical Africa, Asia and Malesia. A perennial, prostrate herb, flowers in a cyme, corolla tubular-campanulate, yellow, capsule brown-black, seed dotted. in open grasslands and fields, along railroads and waste places, sometimes confused with *Centella asiatica* (L.) Urb.

See *Flora Indica* ... nec non *Prodromus Florae Capensis* 77, pl. 30, f. 1. 1768, *Hortus Bengalensis*, or a catalogue ... 14. 1814, *Flora Indica*; or, descriptions of Indian Plants 1: 481. 1832, *Mémoires de la Société de Physique et d'Histoire Naturelle de Genève* 6: 446. 1833, *Apontamentos Phytogeographicos* 589, n. 64. 1859, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 16(4–5): 552. 1893 and *Taxon* 28: 274–275. 1979

(Used in Ayurveda and Sidha. Purgative, diuretic and alterative, used in rheumatism and neuralgia. Plant decoction for fever, plant juice dropped into the ear to cure sores. A leaf infusion a remedy for cough; powdered leaves of *Ipomoea obscura* made into pills taken for impotence, and also applied

in the lower region of abdomen a paste of leaves of *Merremia emarginata*.)

in English: emarginate merremia, rat's ear, rats ear

in China: shen ye shan zhu ca

in India: akatilai, akhukarni (akhu, rat, karna, ear pinna), akukarni, campari, cikappueliccevikkirai, civappeliccevi, eliccevi, eliccevikkirai, eliccevipputu, elika jimudu, elikajemudu, elikkadhu-keerai, elikkatilai, elikkatu, elikkatukkirai, irumpakakkirai, irumpakam, iyarram, kalakannikkirai, kappuka, kappukakkirai, katteliccevi, katteliccevikkirai, kiruminacani, mapali, mapaliccevikkirai, mooshkarni, musakakarni, musakani, musakaparni, musakari, mushkarni (mushak, rat and karn, ear), musikay, mutikkirai, nakatorani, nakatoranikkirai, nemi, nilakuntal, nilakkuntarkirai, parattai, pavalaccevikkirai, pavanaveliccevi, perattaikkirai, perettaikkirai, piramekacatarokkiyam, pirattaikkirai, putticcireni, tiravanti, turaki, umdrakani, underkarni, undirkani (undir, rat, kani, ear-like), yelikkaadhukeerai

in Indonesia: embun, pegagan utan

in Philippines: bato-bato, kupi-kupit, kupit-kupit

in Thailand: sa uek klet hoi, uek

Merremia gangetica Cufod. (*Merremia gangetica* (L.) Cufod.)

India. Prostrate herb rooting at the nodes

See *Hortus Bengalensis*, or a catalogue ... 13. 1814 and *Bull. Jard. Bot. État Bruxelles* 31(Suppl.): 743. 1961, *Taxon* 28: 274–275. 1979

(Used in Ayurveda. Whole plant paste applied locally against insect bites, joint pain and rheumatism; plant juice to reduce chest pain; plants diuretic, used for the treatment of rheumatism, abdominal disorders, cough and sores. Fresh or dry leaves powder given in rheumatism and cough.)

in India: akhukarni, akhuparni, althi gida, bhuibela, elekajee-daku, elikadilal, elikivi soppu, ilikivi soppu, mooshikaparni, musakani, musakarni, musikakarni, ranga alati, thigade, toinnuatali, underkani, undurukarnika, yelaka jeevi aaku

Merremia gemella (Burm. f.) Hallier f. (*Convolvulus gemellus* Burm. f.; *Ipomoea gemella* (Burm. f.) Roth; *Ipomoea polyantha* Miq.)

India.

See *Flora Indica* ... nec non *Prodromus Florae Capensis* 46, pl. 21, f. 1. 1768, *Novae Plantarum Species* 110. 1821, *Flora van Nederlandsch Indië* 2: 613. 1857, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 16(4–5): 552, in obs. 1893 and *Annual Taiwan Mus.* 38: 58–61. 1995

(Used in Sidha.)

in China: jin hua yu huang cao

in India: sirrootalie elley, tali

Merremia hederacea (N.L. Burman) H. Hallier (*Convolvulus acetosellifolius* Desrousseau; *Convolvulus chryseides* Spreng.; *Convolvulus chryseides* (Ker Gawler) Sprengel; *Convolvulus dentatus* Vahl; *Convolvulus dentatus* Blanco; *Convolvulus flavus* Salisb.; *Convolvulus flavus* B. Heyne ex Wall.; *Convolvulus flavus* Willdenow; *Convolvulus lapathifolius* Sprengel; *Convolvulus lapathifolius* Schltldl.; *Evolvulus hederaceus* N.L. (Used in Sidha. For treating acute tonsillitis; a poultice of the leaves, together with turmeric (*Curcuma longa* L.) and broken rice, used to heal cracks in the hands and feet. Root tuber ground with pepper and the extract taken in rheumatism and rheumatoid arthritis.)

in English: ivy-like merremia

in China: li lan wang

in India: elikkatutalai, komalata, kudici-valli, taltantiteega

in Indonesia: kelemibiet, lawatan, tatapajan

in Malaysia: ulan pelandok

in Thailand: cha uek, ma uek, thao sa uek

in Vietnam: b[if]m hoa v[af]ng

in Yoruba: adere eko, ata koko, irin wanjanwanjan

Merremia hirta (Linnaeus) Merrill (*Convolvulus hirtus* Linnaeus; *Convolvulus caespitosus* Roxburgh; *Convolvulus reptans* Linnaeus, p.p.; *Ipomoea linifolia* Blume; *Ipomoea philippinensis* Choisy; *Lepistemon decurrens*

Handel-Mazzetti; *Merremia caespitosa* (Roxburgh) H. Hallier; *Merremia decurrens* (Handel-Mazzetti) H.S. Kiu; *Skinneria caespitosa* (Roxburgh) Choisy)

China.

See *Sp. Pl.* 1: 159. 1753 and *Philipp. J. Sci.* 7: 224. 1912

(Used to treat arthritis.)

in English: hairy merremia

in China: mao shan zhu cai

Merremia hungaiensis (Lingelsheim & Borza) R.C. Fang var. ***linifolia*** (C.C. Huang) R.C. Fang (*Ipomoea hungaiensis* var. *linifolia* C.C. Huang)

China.

See *Rep. Stud. Pl. Trop. Subtrop. Yunnan* 1: 119. 1965, *Fl. Reipubl. Popularis Sin.* 64(1): 76–77. 1979

(The roots used externally to treat scabies.)

in China: shan tu gua, xian ye shan tu gua

Merremia mammosa (Lour.) Hallier f. (*Convolvulus mammosus* Lour.; *Ipomoea gomezii* C.B. Clarke)

India, Andaman Islands, Vietnam. Twiner, perennial, tubers fusiform to globose with a milky juice, sepals concave, corolla broadly funnel-shaped white, minute glands outside, capsule enclosed by permanent calyx, seed hairy

See *Fl. Cochinch.* 1: 108. 1790, *Teysmannia* 7: 164. 1897

(Sap of the fresh tubers mildly purgative, drunk in affections of the throat and respiratory organs, dysentery, fever, and applied for snakebite, burns, fevers, dysentery, poisoning, chest and throat affections and edema.)

in Indonesia: bidara upas, blantar, hailale, widara upas

in Malaysia: widara upas

in Philippines: angcoa

in Vietnam: b[if]m v[us]

Merremia peltata (L.) Merr. (*Convolvulus bufalinus* Lour.; *Convolvulus crispatus* Wall.; *Convolvulus distillatorius* Blanco; *Convolvulus peltatus* L.; *Ipomoea bufalina* Choisy; *Ipomoea nymphaefolia* Blume; *Ipomoea nymphaeifolia* Blume; *Ipomoea peltata* B. (Stimulant.)

in China: chang chun mu

Mertensia Roth Boraginaceae

Named for the German botanist Franz Karl (Carl) Mertens, 1764–1831, professor of botany at Bremen, with W.D.J. Koch (1771–1849) published ed. 3 of Johann Christoph Röhlings (1757–1813), *Deutschlands Flora*. 1823, etc. See Roth, Albrecht Wilhelm (1757–1834), *Catalecta botanica quibus plantae novae et minus cognitae describuntur atque illustrantur ab Alberto Gvilielmo Roth*. 1: 34. Lipsiae, 1797–[1806] and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 210. Oxford 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 478. 1965, Jeannette Elizabeth Graustein, Thomas Nuttall, *Naturalist. Explorations in America, 1808 - 1841*. Harvard University Press 1967, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 265. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 464. 1973, Stafleu and Cowan, *Taxonomic Literature*. 3: 430–431. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 750. Stuttgart 1993.

Mertensia ciliata (James ex Torr.) G. Don (*Mertensia ciliata* G. Don; *Mertensia ciliata* (Torr.) G. Don; *Pulmonaria ciliata* James ex Torr.)

North America. Perennial herb

See *Annals of the Lyceum of Natural History of New York* 2: 224. 1827 [1828], *A General History of the Dichlamydeous Plants* 4: 372. 1837

(Plant infusion taken to increase lactation. Powdered roots infusion taken for itching, scabies, smallpox.)

in English: mountain bluebells, streamside bluebells, tall fringed bluebells

Mertensia ciliata (James ex Torr.) G. Don var. *ciliata* (*Mertensia ciliata* (Torr.) G. Don; *Mertensia ciliata* (James ex Torr.) G. Don var. *latiloba* L.O. Williams; *Mertensia ciliata* var. *subpubescens* J.F. Macbr. & Payson; *Mertensia ciliata* (James ex Torr.) G. Don var. *subpubescens* (Rydb.) J.F. Macbr. & Payson; *Mertensia subpubescens* Rydb.; *Pulmonaria ciliata* James ex Torr.)

North America. Perennial herb

See *Annals of the Lyceum of Natural History of New York* 2: 224. 1827 [1828], *A General History of the Dichlamydeous Plants* 4: 372. 1837 and *Bulletin of the Torrey Botanical Club* 30(4): 261–262. 1903, *Contributions from the Gray Herbarium of Harvard University* 49: 67. 1917, *Annals of the Missouri Botanical Garden* 24(1): 84. 1937

(Plant infusion taken to increase lactation. Powdered roots infusion taken for itching, scabies, smallpox.)

in English: mountain bluebells, streamside bluebells, tall fringed bluebells

Mertensia maritima (L.) Gray (*Casselia maritima* Dumort.; *Casselia maritima* (L.) Dumort.; *Cerinthodes maritimum* (L.) (For skin diseases, measles and smallpox.)

Mertensia simplicissima (Ledeb.) G. Don fil. (*Mertensia asiatica* J.F. Macbr.; *Mertensia maritima* subsp. *asiatica* Takeda; *Pulmonaria simplicissima* Ledeb.)

Japan.

See *A Natural Arrangement of British Plants* 2: 354. 1821 and *Journal of Botany, British and Foreign* 49: 222. 1911, *Great Basin Naturalist* 28(3): 147. 1968

(An extract of the roots used for stomachache.)

in Japan: eraiba-pushii

Mertensia virginica (L.) Pers. ex Link (*Casselia virginica* (L.) Dumort.; *Casselia virginica* Dumort.; *Cerinthodes virginicum* Kuntze; *Cerinthodes virginicum* (L.) Kuntze; *Hippoglossum virginicum* (L.) Lilja; *Mertensia virginica* (L.) Link; *Mertensia virginica* (L.) Pers. ex Link; *Pneumaria virginica* Hill; *Pneumaria virginica* (L.) Hill; *Pulmonaria virginica* L.; *Steenhammera virginica* (L.) Turcz.; *Steenhammera virginica* Kostel.)

North America. Perennial herb, erect, toothed basal leaves strongly veined, trumpet-like flowers in loose drooping cyme clusters, wet woodland, flood plains

See *Species Plantarum* 1: 135. 1753, *The Vegetable System*. 7: 40. 1764, *Commentat. Bot.* (Dumort.) 21. 1822, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 1: 580. 1829, *Bulletin de la Société*

Impériale des Naturalistes de Moscou 14: 244. 1840, *Linnaea* 17: 111. 1843, *Revisio Generum Plantarum* 2: 436. 1891 and *Ann. Miss. Bot. Gard.* 24: 74. 1937

(For pulmonary troubles, cough, tuberculosis. Roots infusion as an antidote; a decoction for venereal diseases.)

in English: eastern bluebells, Roanoke bells, Virginia bluebells, Virginia cowslip, Virginian bluebell, Virginian cowslip

Merwillia Speta Asparagaceae (Hyacinthaceae, Liliaceae)

This genus has been named after F. van der Merwe (1894–1968), medical inspector of schools, with an interest in *Aloe*, *Ledebouria* and other indigenous plants, a botanist who worked on this family, see *Phyton* (Horn) 38: 109. 1998.

Merwillia plumbea (Lindl.) Speta (*Merwillia kraussii* (Baker) Speta; *Merwillia natalensis* (Planch.) Speta; *Scilla kraussii* Baker; *Scilla natalensis* Planch.; *Scilla plumbea* Lindl.)

S. Trop. & S. Africa. Perennial, large deciduous bulb, a rosette of 6 to 9 broad tapering leaves, inflorescence a many-flowered slender raceme of bright violet-blue or pale blue or blue and white star-shaped flowers, delicate amethyst blue stalk, a variable species

see *Species Plantarum* 1: 308–309. 1753, *Edwards's Bot. Reg.* 16: t. 1355. 1830, *Fl. Serres Jard. Eur.* 10: 185, t. 1043. 1855, *J. Linn. Soc., Bot.* 13: 243. 1873 and *Phyton* (Horn) 38: 107, 109. 1998, *Taxon* 52(1): 75–92. 2003, Manning, J.C., Goldblatt, P. & Fay, M.F. "A revised generic synopsis of Hyacinthaceae in sub-Saharan Africa, based on molecular evidence, including new combinations and the new tribe Pseudoprosperaeae." *Edinburgh Journal of Botany* 60: 533–568. 2004, *Outlook on Agriculture* 34(2): 116–120. 2005, *South African Journal of Botany* 71(2): 191–196. 2005

(This plant should be treated with extreme caution, as taking any part of it internally is potentially fatal. Toxic to mammals, said to be poisonous to stock, particularly when the young leaves appear in spring. Apparently toxic to humans when raw; sap reported to burn the skin. Antibacterial, antihelminthic, purgative, laxative, analgesic, antimicrobial, anti-mutagenic, anti-inflammatory. Ointments for wound healing, to treat sprains, fractures, boils and sores and to draw abscesses. The ash from a burnt plant, and the bulb in powdered form, is rubbed into cuts and scratches, and over sprains and fractures. Decoctions are taken as enemas for female infertility and to enhance male potency and libido. Magic, ritual, to increase strength and resistance to witchcraft.)

in English: blue hyacinth, blue squill, wild squill

in South Africa: blouberglelie, bloulangkop, inguduza (= searching the body for the cause of the ailment) (Zulu), matunga (Sotho)

Merxmuellera Conert Poaceae (Gramineae)

After the German botanist Hermann Merxmüller, 1920–1988, among his writings are “Compositen-Studien I.” *Mitt. Bot. Staatssamml. München* 1: 33–46. 1950 and *Prodromus einer Flora von Südwestafrika*. 1966–1972, with Wolfgang Engelhardt wrote [*Was lebt in Tümpel, Bach und Weiher?*] *The Young Specialist looks at Pond-life*, etc. [Translated by Heather J. Fisher ... Edited and adapted by Roderick C. Fisher.] London 1964, with A. Schreiber and Peter Frederick Yeo wrote “*Aster L.*” in *Flora Europaea*. 4: 112–116. 1976; sometimes included in *Rytidosperma* Steud. and *Danthonia* s.l., type *Merxmuellera davayi* (C.E. Hubb.) Conert, see Gustav Hegi, [*Alpenflora*] *Flora alpina*, etc. [Translated from the German edition revised by H. Merxmüller.] Milano 1953, *Senckenbergiana Biologica* 51(1–2): 129–133. 1970, *Senckenbergiana Biologica* 56(1–3): 145–152. 1975, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 251. Cape Town 1981.

Merxmuellera drakensbergensis (Schweickerdt) Conert (also spelled *drakensbergiensis*) (*Danthonia drakensbergensis* Schweick.)

South Africa, Natal Drakensberg. Perennial, tufted to densely tufted, clump forming, leaf blade very stiff and tightly folded, old leaf blades break off and two segments curl backwards, ligule an inconspicuous short membrane, panicle loosely contracted and interrupted, the very hard leaves are not grazed at all, used for making brooms and hats, handicrafts, ropes and mats, usually in stream banks, deep soil, seeps, high mountain grassveld

South Africa.

See *Senckenbergiana Biologica* 51: 132. 1970

(Poultice.)

in English: broom grass

in South Africa: besemgras, molala-hlolo, mosea, moseha, mosua, moswa

Meryta Forst. & Forst.f. Araliaceae

Greek *merytos* ‘glomerate’, referring to the male flowers; see *Characteres Generum Plantarum* 60. 1775, *Prodromus Florae Norfolkicae* 62. 1833, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 573. Ansbach 1852 and R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 378. 1993, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 382. 1996.

Meryta sinclairii (Hook.f.) Seem. (*Botryodendrum sinclairii* Hook.f.; *Meryta sinclairii* Seem.)

New Zealand.

See *Fl. Nov.-Zel.* 1: 97. 1852, *Bonplandia* (Hannover) 10: 295. 1862

(Abortifacient.)

Maori name: puka

Mesechites Müll.Arg. Apocynaceae

From the Greek *mesos* ‘in the middle’ plus the genus *Echites*, see *Fl. Bras.* (Martius) 6(1): 150, t. 46. 1860 and *Ann. Missouri Bot. Gard.* 20(4): 605–790. 1933, *Contr. Gray Herb.* 184: 1–223. 1958, *Field Mus. Nat. Hist., Bot. Ser.* 13(5/1): 363–455. 1959, *Fieldiana, Bot.* 24(8/4): 334–407. 1969, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 44(2): 453–489. 2006, *Candollea* 61(1): 215–277. 2006, *Darwiniana* 47(1): 140–184. 2009.

Mesechites trifidus (Jacq.) Müll.Arg. (*Echites bicorniculatus* Rusby; *Echites chloranthus* Schldt.; *Echites cuspidatus* Willd. ex Müll.Arg., nom. nud.; *Echites cuspidatus* Heyne ex Hook. f.; *Echites dichotomus* Thunb.; *Echites dichotomus* Kunth; *Echites dichotomus* Roth; *Echites dichotomus* Roxb.; *Echites dichotomus* Heyne ex Hook. f.; *Echites disadana* Miq.; *Echites disadenus* Miq.; *Echites japurensis* Stadelm.; *Echites mapirensis* H. 259. 1939, *Memoirs of the New York Botanical Garden* 10(1): 135–136, f. 16c-e. 1958

(Antidote, antiinflammatory, analgesic, for snakebites.)

Mesembryanthemum L. Aizoaceae

Latin *mesembrianthemum*, Greek *mesembria* ‘middle of the day, midday’ and *antheon* ‘flower’, referring to the opening of the flowers in the sun; see Carl Linnaeus, *Species Plantarum*. 1: 480–488. 1753, *Genera Plantarum*. Ed. 5. 215. 1754 and *Gardener’s Chronicle & Agricultural Gazette* ser. 3. 78: 412. 1925, *Fieldiana, Bot.* 24(4): 203–207. 1946, S. Battaglia, *Grande dizionario della lingua italiana*. X: 200. Torino 1978, *Mitteilungen aus dem Institut für allgemeine Botanik in Hamburg* 21: 72–73. 1986; some suggested from the Greek *mesos* ‘in the middle, middle’, *embryon* ‘embryo’ and *antheon* ‘flower’, referring to the position of the ovary.

Mesembryanthemum crystallinum Linnaeus (*Cryophytum crystallinum* (Linnaeus) N.E. Brown; *Cryophytum nanum* N.E. Br.; *Cryophytum parvum* L. Bolus; *Gasoul crystallinum* (L.) Rothm.; *Mesembryanthemum breve* L. Bolus; *Mesembryanthemum glaciale* Haw.; *Pentacoilanthus crystallinus* (L.) Rappa & Camarrone; *Perapentacoilanthus crystallinus* (L.) Rappa & Camarrone)

South Africa.

See *Species Plantarum* 1: 480–488. 1753, *Familles des Plantes* 2: 243. 1763 and *Gardener’s Chronicle & Agricultural Gazette* ser. 3. 78: 412. 1925, *The Genera of South African Flowering Plants* 245. 1926, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15: 413. 1941, Vivrette, N.J. and C.H. Muller. “Mechanism of invasion and dominance of coastal grassland by *Mesembryanthemum crystallinum*.” *Ecol. Monogr.* 47: 301–318. 1977, *Flora of Australia* 19–62. 1984, *Flora of Ecuador* 55: 14–27. 1996

(Used by sailors to treat scurvy, also for venereal diseases.)

in English: crystalline iceplant, iceplant

Mesembryanthemum guerichianum Pax

Namibia. Herb, low-growing, very fleshy, succulent, large fleshy leaves, shaggy flowers white to pink

See *Bot. Jahrb. Syst.* xix. (1894) 133. 1894 and *Mitteilungen aus dem Institut für allgemeine Botanik in Hamburg* 21: 5–116. 1986

(Oxalic acid poisoning.)

Mesembryanthemum tortuosum L. (*Mesembryanthemum tortuosum* Eckl. & Zeyh.; *Mesembryanthemum tortuosum* DC.; *Sceletium tortuosum* (L.) N.E. Br.)

South Africa.

See *Species Plantarum* 1: 487. 1753, *Enum. Pl. Afric. Austral.* [Ecklon & Zeyher] 3: 322. 1837

(Said to be narcotic.)

in South Africa: channa, kanna

Mesona Blume Lamiaceae

See *Bijdragen tot de flora van Nederlandsch Indië* 838. 1826 and *Taiwania* 43(1): 38–58. 1998.

Mesona chinensis Bentham (*Mesona elegans* Hayata; *Mesona procumbens* Hemsley; *Platostoma chinense* (Benth.) A.J. Paton)

China. See also *Platostoma palustre* (Blume) A.J. Paton

See *Bijdragen tot de flora van Nederlandsch Indië* 838. 1826, *Pl. Asiat. Rar.* 2: 18. 1830, *Prodr.* 12: 46. 1848, *Flora Hongkongensis* 274–275. 1861, *Annals of Botany*. Oxford 9(33): 155–156, pl. 7. 1895, *Nat. Pflanzenfam.* 4(3a): 365. 1897 and *Journal of the College of Science, Imperial University of Tokyo* 22: 360, pl. 16. 1906, *Philipp. J. Sci., C* 7: 101. 1912, *Kew Bulletin* 52(2): 281–282. 1997, *Taiwania* 43(1): 38–58. 1998

(A decoction of dried plants mixed with rice water is used as a cooling drink.)

in China: liang fen cao

Mespilus L. Rosaceae

Theophrastus (*HP.* 3.12.5) used the the Greek *mespile* for the medlar-tree, the oriental thorn and the hawthorn; Latin *mespilum*, Greek *mespilon* ‘a medlar’, Latin *mespilus*, *i* or *mespila*, *ae*, Greek *mespile* ‘a medlar-tree, a medlar’; nom. rej. prop. against *Crataegus* L., see *Species Plantarum* 1: 477–479. 1753, *Flora Carniolica*, Editio Secunda 1: 346. 1772, *Viaggio Amer. Sett.* 2: 292. 1790, *Hist. Nat. Vég.* (Spach) 2: 63. 1834.

Mespilus uniflora K. Koch

South America, Peru.

See *Wochenschr.* v. (1862) 383. 1862 and *Revista do Instituto de Medicina Tropical de São Paulo.* 46(3): 171–174. 2004

(An infusion taken against Carrion’s disease, *Bartonellosis bacilliformis*.)

Mesua L. Clusiaceae (Calophyllaceae, Guttiferae)

To commemorate Yuhanna ibn Masawaih (Yahya ibn Musawi, Yuhanna Ibn Masawayh) (Joannes Mesuë, J. Damasceni, Joannis Mesue, Ioannis M., Iean de Damascene), a celebrated Arabian physician and botanist of Damascus. See Mesue, the Younger, *De re medica*, libri tres. Jacobo Sylvio [Jacques Dubois, Jacobus Sylvius] medico interprete. Paris 1542, Carl Linnaeus, *Species Plantarum*. 1: 515. 1753, *Genera Plantarum*. Ed. 5. 231. 1754, *Species Plantarum*, Editio Secunda 1: 734. 1762, Ernst H.F. Meyer, *Geschichte*

der Botanik. III: 178–183. Königsberg 1854–1857 and A. Wagner, *La vie et l'oeuvre ophthalmologique de Jean Mésué*. Lyon 1932, Garrison and Morton, *Medical Bibliography*. 5562. 1961, Richard J. Durling, comp., *A catalogue of sixteenth century printed books in the National Library of Medicine*. 3143. 1967.

Mesua assamica (King & Prain) Kosterm. (*Kayea assamica* King & Prain)

India. Evergreen trees

See *Plantae Asiaticae Rariores* 3: 4–5. 1831 and *Indian Forester* 27: 62. 1901, *Reinwardtia* 7(5): 426. 1969

(Fruits as a fish poison.)

in India: sia-nahar

Mesua ferrea L. (*Calophyllum nagassarium* Burm.f.; *Mesua nagassarium* (Burm.f.) Kosterm.; *Mesua roxburghii* Wight)

Sri Lanka, India. Evergreen trees, buttressed at base, inner bark pink with creamy sap, young leaves pink, leaves white waxy below, leaves coriaceous stalked linear-ovate, white solitary stalked fragrant flowers, fruits ovoid, oil from seeds used for burning, seeds for feeding pigs

See *Species Plantarum* 1: 513–515. 1753, *Species Plantarum*, Editio Secunda 1: 734. 1762, *Flora Indica ... nec non Prodromus Florae Capensis* (N.L. Burman) 121. 1768, *FBI* 1: 277. 1872 and *Ceylon Journal of Science, Biological Sciences* 12: 71. 1976, *Indian J. Forest.* 7(1): 80. 1984, *Taxon* 35: 353. 1986

(Used in Ayurveda. Leaves and flowers used in snakebite and scorpion sting. Flowers astringent, stomachic, expectorant, administered as a stimulant and setting of pregnancy; a mixture of flowers of *Mesua ferrea* and seeds of *Ziziphus mauritiana* pounded and given in vomiting and in influenza; flowers juice with flowers juice of *Eichhornia crassipes* applied on sore eyes; flower paste or flower powder mixed with honey taken in bleeding piles; a decoction of flowers with stems of *Tolypanthus involucratus* and roots of *Ricinus communis* given for bodyache; a paste of flowers with shoots of *Morinda angustifolia* and ginger given in heart troubles; pounded flowers given as blood purifier; flower buds for dysentery; flowers of *Mesua nagassarium* used in scorpion sting. Fruit stimulant; unripe fruits aromatic, sudorific. Stem bark astringent, sudorific and stomachic, dried bark in skin diseases and in menstrual disorders; water extract of bark taken for diarrhea; powdered stem bark as a postpartum remedy. Seed oil used in sores, scabies, itch. Ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies; twigs used for burning dead bodies.)

in English: Assam ironwood, Ceylon ironwood, ironwood, ironwood tree

in India: herh-se, kengobang, micharne, nagakedar, nagchampa, nagchapha, nageshwar, nagesuri, nageswar, nagkesara, nahuar-araung, neghar, peri, pikcharne-araung

Malayan names: penaga, penaga lilin, penaga sabut, lenggapus, matopus, mentepus, nagasari, tapis

in Nepal: champeya, nagakeshsra, nagesar, nagesori, nagkesar, narisal

Metapanax J. Wen & Frodin Araliaceae

From the Greek *meta* 'changed in nature, next to, between, instead of' plus *Panax*, see *Brittonia* 53(1): 117–120, f. 1–2. 2001, Frodin, D.G. & Govaerts, R. *World Checklist and Bibliography of Araliaceae*: 1–444. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [2004].

Metapanax davidii (Franch.) J. Wen & Frodin (*Acanthopanax bockii* R. Vig.; *Acanthopanax bockii* (Harms ex Diels) R. Vig.; *Acanthopanax bockii* (Harms) R. Vig.; *Acanthopanax davidii* R. Sci. Engin.* 22: 121–144. 1985

(Poultice, antiinflammatory, for relieving pain.)

Methysticodendron R.E. Schultes Solanaceae

From the Greek *methysko* ‘to make drunk with wine, to be drunken’, *methystikos* ‘intoxicating, drunken’ and *dendron* ‘tree’, scopolamine leading to hallucinations after intoxication. See *Botanical Museum Leaflets—Harvard University* 17(1): 1–36. 1955, Richard Evans Schultes and Norman R. Farnworth, “Ethnomedical, botanical and phytochemical aspects of natural hallucinogenic.” *Botanical Museum Leaflets* 28(2): 123–214. Cambridge 1980, Richard Evans Schultes and Robert F. Raffa, *Vine of the Soul. Medicine*

Men, Their Plants and Rituals in the Colombian Amazonia. Synergetic Press, Oracle, Arizona 1992 and *The Healing Forest. Medicinal and Toxic Plants of the Northwest Amazonia*. 420, 422, 430. Dioscorides Press, Portland, Oregon 1992, Holger Kalweit, *Shamans, Healers, and Medicine Men*. Shambhala, Boston and London 1992, Mark J. Plotkin, *Tales of a Shaman's Apprentice*. Viking 1993.

Methysticodendron amesianum R.E. Schultes (*Brugmansia amesianum* (R.E. Schult.) D'Arcy)

Colombia. Small tree, large pendulous flowers

See *Botanical Museum Leaflets* 17: 2. 1955, *Journal of the American Pharmaceutical Association* 49(9): 621–622. 1960

(Narcotic, hallucinogen, stimulant, used in divination, witchcraft and medicine.)

in Colombia: culebra borrachero

Metopium P. Browne Anacardiaceae

Latin *metopion* or *metopium* for the gum of an African tree, also called *ammoniacum* (Plinius); Greek *metopon*, *metopion* 'forehead, containing oil of bitter almonds', purging resins from *Metopium toxiferum* (L.) Krug & Urban, see *The Civil and Natural History of Jamaica* in Three Parts 177–178, pl. 13, f. 3. 1756 and *Fieldiana, Bot.* 24(6): 177–195. 1949.

Metopium brownei (Jacq.) Urb. (*Amyris toxifera* L.; *Bursera gummifera* L., nom. illeg. superfl.; *Metopium linnaei* Engl.; *Rhus metopium* L.; *Terebinthus brownei* Jacq.)

Belize, Mexico and Central America. Shrub or tree, erect, leathery leaves, yellow flowers, beautiful tight-grained dense hardwood, in coastal tropical forests

See *Species Plantarum* 1: 265–267. 1753, *Species Plantarum* 2: 1026. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *The Civil and Natural History of Jamaica* in Three Parts 177. 1756, *Systema Naturae*, Editio Decima 2: 964. 1759, *Enumeratio Systematica Plantarum* 18. 1760, *Species Plantarum*, Editio Secunda 2: 471. 1762 and *Symbolae Antillarum* 5: 402–403. 1908, *Bulletin of the Torrey Botanical Club* 59(5): 279–288. 1932, *American Midland Naturalist* 19(2): 265–333. 1938, *Bot. Commelins* 55. 1983, *Phytochemistry* 45(5): 1003–1008. 1997, *Journal of Chemical Ecology* 25(1): 141–156. 1999, *Brittonia* 51(4): 389–394. 1999, *Rev. Biol. Trop.* 50(3–4): 1035–1044. 2002

(Poisonous, strongly irritant exudate, the caustic sap can cause painful irritation of the skin and eyes; the sanding dust can cause dermatitis and respiratory problems. Antiviral, antiinflammatory, sedative, used for rheumatism. *Bursera simaruba* it is known as the antidote to skin burns produced by the *chechen*.)

in English: black poison wood, Caribbean rosewood, coral sumac, poison wood

in Belize: chichem nigra

in Cuba: guao

in Mexico: boxcheché, che-chem, che'chen, chechém negro, chechén, chechén negro, kabal-chechen, palo de rosa

Metopium toxiferum (L.) Krug & Urban (*Amyris toxifera* L.; *Metopium linnaei* Engl.; *Metopium toxiferum* Krug & Urb.; *Rhus metopium* L.)

West Indies, Bahamas, Florida. Shrub or small tree, dioecious, insect pollinated, bark yellowish-brown, wide open branches, rachis not winged, greenish-yellow inconspicuous flowers clustered in axillary panicles, inflorescences loose and long-stalked, fruits small drupes turning a dull orange in late fall and presumably dispersed by birds, latex becomes black when exposed to air, a major food source for white-crowned pigeons

See *The Civil and Natural History of Jamaica* in Three Parts 177, 208. 1756, *Systema Naturae*, Editio Decima 2: 1000. 1759, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21: 612. 1896 and *Bulletin of the Torrey Botanical Club* 119(2): 181–191. 1992, *Biotropica* 24(4): 488–502. 1992, *Contact Dermatitis* 34(5): 363. 1996, *Int. J. Plant Sci.* 162(5): 1141–1153. 2001, *Biotropica* 33(1): 23–33. 2001

(All parts of this tree, except the pollen, include a resin which causes acute dermatitis, allergic contact dermatitis. Both the sap of the plant and its fruit are irritant, the juice from under the bark, when applied to the skin, produced vesiculation and erythema. The smoke from the burning wood is as dangerous and skin-irritating as the sap. Latex used to remove an aching tooth.)

in English: black poison wood, burn wood, coral sumac, doctor's gum, Florida poisons tree, gum hog, hog gum, hogg gum, mountain manchineel, poison bark, poison wood

Common names: chechém, guao de costa

Metrosideros Banks ex Gaertner Myrtaceae

Greek *metra* 'core, heartwood, the heart of a tree' and *sideros* 'iron', referring to the hardness of the wood; see *De Fructibus et Seminibus Plantarum*... 1: 170, t. 34. 1788, *Fl. Ned. Ind.* i. I. 399. 1855 and J.W. Dawson, in *Blumea*. 23(1): 7–11. 1976, H.E. Connor and E. Edgar, "Name changes in the indigenous New Zealand Flora, 1960–1986 and Nomina Nova IV, 1983–1986." in *New Zealand Journal of Botany*. Vol. 25: 115–170. 1987, Arthur D. Chapman, ed., *Australian Plant Name Index*. 1988–1993. Canberra 1991, *Fl. Nouv.-Calédonie & Dépend.* 18: 109. 1992.

Metrosideros excelsa Sol. ex Gaertn. (*Metrosideros excelsa* Gaertn.; *Metrosideros tomentosa* A. Rich.; *Nania tomentosa* (A. Rich.) Kuntze)

New Zealand. Tree, branching from near the base, dark glossy green leaves with white felt underside, scarlet blossoms, flowers contain much nectar

See *De Fructibus et Seminibus Plantarum...* 1: 172, t. 34, f. 8. 1788, *Voy. Astrolabe* 1: 336. 1832, *Revis. Gen. Pl.* 1: 242. 1891

(Inner bark used to stop bleeding, for toothache, diarrhea. Flowers sucked for sore throats.)

in English: Christmas tree

in New Zealand: pohutukawa

Metrosideros fulgens Sol. ex Gaertn. (*Leptospermum scandens* J.R. Forst. & G. Forst.; *Melaleuca scandens* Raeusch.; *Melaleuca spectabilis* Raeusch.; *Melaleuca splendens* J. Lee ex J. Kern., nom. illeg.; *Metrosideros aurata* Colenso; *Metrosideros florida* Sm.; *Metrosideros fulgens* Gaertn.; *Metrosideros scandens* (J.R. Forst. & G. Forst.) Druce, nom. illeg.; *Metrosideros speciosa* Colenso, nom. illeg.; *Nania florida* (Sm.) Kuntze; *Nania scandens* (J.R. Forst. & G. Forst.) Kuntze)

New Zealand. Vine, aerial roots, clinging to the trees, yellow-reddish flowers

See *Fruct. Sem. Pl.* 1: 172. 1788, *Nomencl. Bot.*, ed. 3: 142. 1797, *Trans. Linn. Soc. London* 3: 269. 1797, *Trans. & Proc. New Zealand Inst.* 22: 463. 1889 (publ. 1890), *Trans. & Proc. New Zealand Inst.* 23: 385. 1890 (publ. 1891), *Revis. Gen. Pl.* 1: 242. 1891 and *Rep. Bot. Soc. Exch. Club Brit. Isles* 1916: 635. 1917

(Stem juice astringent, antiseptic, tonic, given for coughs. Inner bark decoction drunk for *mate*, “Maori sickness” (when the cause of illness is not understood or the medical treatment was unsuccessful, the Maoris diagnose the “mate Maori”...); sap applied to sores, wounds, new cuts, to stop bleeding.)

in New Zealand: akakura, puatawhiwhi

Metrosideros polymorpha Gaudich. (*Metrosideros collina* (J.R. Forst. & G. Forst.) A. Gray subsp. *polymorpha* (Gaudich.) Rock; *Metrosideros polymorpha* J.R. Forst. ex Hook. f.; *Nania glabrifolia* A. Heller; *Nania polymorpha* (Gaudich.) A. Heller; *Nania pumila* A. Heller)

North America, Hawaii. Perennial tree or shrub

See *Handbook of the New Zealand Flora* 73. 1864, *Minnesota Botanical Studies* 1: 864. 1894 and *Botanical Bulletin Hawaii Board of Agriculture and Forestry* 4: 47. 1917

(Flowers juice taken as analgesic.)

in Hawaii: lehua ‘ohia’a, ‘ohi’a lehua, ‘ohi’a lechua

Metrosideros polymorpha Gaudich. var. *polymorpha* (*Metrosideros collina* auct. non (J.R. Forst. & G. Forst.) A. Gray; *Metrosideros collina* (J.R. Forst. & G. Forst.) A. Gray subsp. *polymorpha* (Gaudich.) Rock; *Metrosideros polymorpha* Gaudich. var. *macrostemon* Skotts.)

North America, Hawaii. Perennial tree or shrub

See *Handbook of the New Zealand Flora* 73. 1864, *Minnesota Botanical Studies* 1: 864. 1894 and *Botanical Bulletin Hawaii Board of Agriculture and Forestry* 4: 47. 1917

(Flowers juice taken as analgesic for childbirth pain.)

in Hawaii: lehua ‘ohia’a, ‘ohi’a lehua

Metrosideros robusta A. Cunn. (*Metrosideros florida* Sm.; *Metrosideros florida* Hook.f.; *Metrosideros florida* Hook.; *Nania robusta* (A. Cunn.) Kuntze)

New Zealand. Climbing vine, strangling, scarlet flowers in umbels

See *Trans. Linn. Soc. London* 3: 269. 1797, *Ann. Nat. Hist.* 3(15): 112. 1839, *Bot. Mag.* 75: t. 4471. 1849, *Revis. Gen. Pl.* 1: 242. 1891

(Young leaves chewed for toothache. Inner bark astringent and emollient, for colds and dysentery, to wash wounds and rheumatic joints, to stop bleeding, also for ringworm. Nectar from the flowers eased sore throats.)

in English: northern rata

Maori name: rata

Metrosideros umbellata Cav. (*Agalmanthus umbellata* (Cav.) Hombr. & Jacquinot)

New Zealand. Scarlet flowers

See *Icones et Descriptiones Plantarum* [Cavanilles] iv. 20. t. 337. 1797, Dumont d’Urville, Jules Sébastien César (1790–1842), *Voyage au Pôle sud et dans l’Océanie sur les corvettes l’Astrolabe et la Zelée ...* Paris, 1841–1846

(Young leaves chewed for toothache. Inner bark astringent and emollient, for colds and dysentery, to wash wounds and rheumatic joints, to stop bleeding, also for ringworm. Nectar from the flowers eased sore throats.)

in English: southern rata

Maori name: rata

Metroxylon Rottb. Arecaceae (Palmae)

Greek *metra* ‘core, the heart of a tree’ and *xylon* ‘wood’, referring to the large pith, *Metroxylon* species sources of sago and materials for house construction, seeds furnish a form of vegetable ivory, see Abraham Steck, *Dissertatio inauguralis medica de Sagu*. Argentorati [Strasbourg] [1757], *Nye Samling af det Kongelige Danske Videnskabers Selskabs Skrifter* 2: 527. 1783.

Metroxylon sagu Rottb. (*Metroxylon hermaphroditum* Hassk.; *Metroxylon inerme* (Roxb.) Mart.; *Metroxylon laeve* (Giseke) Mart.; *Metroxylon longispinum* (Giseke) Mart.; *Metroxylon micracanthum* Mart.; *Metroxylon oxybracteatum* Warb. ex K. Schum. & Lauterb.; *Metroxylon rumphii*

(Willd.) Mart.; *Metroxylon sago* K.D. Koenig; *Metroxylon sago* f. *longispinum* (Giseke) Rauwerd.; *Metroxylon sago* f. *micracanthum* (Mart.) Rauwerd.; *Metroxylon sago* f. *tuberatum* Rauwerd.; *Metroxylon squarrosum* Becc.; *Metroxylon sylvestre* (Giseke) Mart.; *Sagus americana* Poir.; *Sagus genuina* Giseke; *Sagus genuina laevis* Giseke; *Sagus genuina longispina* Giseke; *Sagus genuina sylvestris* Giseke; *Sagus inermis* Roxb.; *Sagus koenigii* Griff.; *Sagus laevis* Jack; *Sagus longispina* (Giseke) Blume; *Sagus micracantha* (Mart.) Blume; *Sagus rumphii* Willd.; *Sagus spinosa* Roxb.; *Sagus sago* (Rottb.) H. Karst.; *Sagus sylvestris* (Giseke) Blume)

New Guinea. Palm tree, suckers, leaves pinnate, male and female flowers similar

See Nye Saml. Kongel. Dansk. Vidensk. Selsk. Skr. 2: 527. 1783, *Annals of Botany* (König & Sims) 1: 193. 1804, *Encycl.* 6: 395. 1805, *Hist. Nat. Palm.* 3: 214–216. 1838, *Tijdschr. Natuurl. Gesch. Physiol.* 9: 175. 1842, *Rumphia* 2: 153–154. 1843, *Hist. Nat. Palm.* 3(ed. 2): 215. 1845, *Calcutta J. Nat. Hist.* 5: 19. 1845 and *Fl. Schutzgeb. Südsee*: 202. 1900, *Ann. Roy. Bot. Gard.* (Calcutta) 12(2): 182. 1918, *Res. Bull. Univ. Calcutta Cytogenetics Lab.* 2: 1–50. 1970, *Principes* 30: 175. 1986, Schuiling, Dirk L., *Growth and Development of True Sago Palm (Metroxylon sago Røttbøll) with Special Reference to Accumulation of Starch in the Trunk: A Study on Morphology, Genetic Variation and Ecophysiology, and Their Implications for Cultivation.* Wageningen, Wageningen University, 2009

(Stem sap applied on forehead to ease headache. Starch from the trunk mixed with water and drunk to treat diarrhea and stomach pains, made into a paste and applied onto burns.)

in English: sago, sago palm, smooth sago palm, true sago palm

in China: suo mu mian

Malayan names: rembia, rumbia, sago

in Papua New Guinea: abia, nangu, piia, saksak, sengin epi-i
in the Philippine Isl.: lumbia

Meyna Roxb. ex Link Rubiaceae

See *Jahrb. Gewächsk.* 1(3): 32. 1820.

Meyna laxiflora Robyns (*Vangueria spinosa* Roxb.)

India. Armed shrub or small tree, flowers greenish yellow in axillary cymes, cup-shaped calyx, brownish globose smooth fleshy edible fruits

See *Hort. Bengal.* 15. 1814, *Fl. Ind.*, ed. Carey & Wall., 2: 172. 1824, *Fl. Ind.*, ed. Carey, i. 536. 1832, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 46(2): 153. 1877, *Fl. Brit. India* 3: 136. 1880 and *Fl. Indo-Chine* 3: 302. 1924, *Bull. Jard. Bot. État* 11: 228. 1928

(Used in Ayurveda. Leaves chewed and eaten for gastric disorders, diphtheria; leaves made into paste applied on mumps; leaf powder useful in diarrhea. Fruits narcotic, cholagogue, tonic, expectorant, a decoction anti scorpion bite, for dysentery, boils, biliousness. Root juice in colic pain, stomachache.)

in India: aaliv, acchoora mullu, achchoora mullu, achhura mullu, ali, aliv, alive, alu, ber-ka-mowna-gach, chegu gadde, chegu gedde, chirbot, chircholi, dieng, gonda kaare, guna kaare, gundu kaare, halawni, heibi samatan, helu, huloo, kaari mullu, kotkora, madan, magaremara, maggaare, maina kanta, mainphala, manakkarai, mangare, maniphala, mon, mullu kaare, muyna, nagakesarah, nagapuspah, segagadda, soh mon, swasana, tang-nang, thitchkeng, veliki, vishikilamu, visikilamu

Meyna pubescens (Kurz) Robyns (*Vangueria pubescens* Kurz)

India.

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 42(2): 314. 1872 and *Bull. Jard. Bot. État* 11: 235. 1928

(Pounded fruits used as fish poison.)

in India: karadiyakoli

Meyna spinosa Roxb. ex Link (*Pyrostria spinosa* (Roxb. ex Link) Miq.; *Vangueria miqueliana* Kurz; *Vangueria mollis* Wall., nom. nud.; *Vangueria pyrostria* Boerl.; *Vangueria spinosa* Roxb.; *Vangueria spinosa* (Roxb. ex Link) Roxb.; *Vangueria spinosa* var. *mollis* Hook.f.; *Vangueria spinosa* var. *tomentosa* Pierre ex Pit.; *Vangueria stellata* Blanco)

India, China, Himalaya. Prickly shrub, ripe fruits edible

See *Hort. Bengal.* 15. 1814, *Fl. Ind.*, ed. Carey & Wall., ii. 172. 1824, *Fl. Ind.*, ed. Carey, i. 536. 1832, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 46(2): 153. 1877, *Fl. Brit. India* 3: 136. 1880 and *Fl. Indo-Chine* 3: 302. 1924, *Bull. Jard. Bot. État* 11: 228. 1928

(Used in Ayurveda. Seed paste applied on pimples. Ripe fruits rubbed on cracked heels for quick healing.)

in India: accuramullu, achchurmullu, achuramuulu, alu, cchircholi, cegagadda, chegagadda, gobergally, gundkare, gurbeli, halawni, huloo, karimullu, ketkora, kutkura, madandriksh, maggare, mainphala, manakkarai, mangare, mangase, moina, moltakanta, mon, montaphelo, moyunakonta, muduna, mullakare, muyna, muyuna, pinda, pindi, pinditaka, pindituka, pindu, sarela, segagadda, thitchkeong, veliki, vicikilamu, visikilamu

Meyna tetraphylla (Schweinf. ex Hiern) Robyns (*Canthium tetraphyllum* (Schweinf. ex Hiern) Baill.; *Meyna tetraphylla* Robyns; *Vangueria tetraphylla* Schweinf. ex Hiern)

Ethiopia to Tanzania, Comoros. Spiny shrub, liana, ascending, narrow crown, stems armed with strong paired spines above leaf nodes, flowers cream to green densely clustered in

leaf axils, sweet angled edible fruit, camel and goat fodder, riverine bushland, along dry watercourses in dry country

See *Flora of Tropical Africa* 3: 152. 1877, *Adansonia* 12: 192. 1878 and *Bull. Jard. Bot. État* 11: 232–233. 1928

(Root decoction given to pregnant women to ease pain and to protect them against bad spirits. Veterinary medicine, crushed leaves applied to infected hooves of animals.)

in Kenya: bururi, esugumaran, kakomoa, kitolousuu, kitootoo, kitotoo, leturmet, lkiremicoi, mtamba-kiko, mubururi, mukurungu, ngurungu, qaaleda, tamba-kiko, tiling, tiling'wo, tilingwo, tiliny, tilinyek, yeho

Mezoneuron Desf. Fabaceae (Caesalpinieae)

Greek *meizon* 'greater' (*megas* 'big, large, great') and *neuron* 'nerve', referring to the winged pod, see *Mémoires du Muséum d'Histoire Naturelle* 4: 245. 1818 and *Ann. Missouri Bot. Gard.* 77(4): 854. 1990.

Mezoneuron benthamianum Baill. (*Caesalpinia benthamiana* (Baill.) Herend. & Zarucchi; *Mezoneuron benthamianum* Baill.)

West and Central Africa, Benin, Ghana. Perennial climbing shrub, straggling, armed with recurved spines, inflorescence a branched or unbranched terminal raceme, fruit a flattened indehiscent winged pod, see also *Caesalpinia benthamiana*

See *Adansonia* 6: 196. 1866 and *Ann. Miss. Bot. Gard.* 77(4): 854–855. 1990

(Leaves, stem and roots anthelmintic, astringent, for dysentery, urethritis, venereal diseases. A decoction of roots, bark and leaves to cure urethral discharge; root decoction for dysentery and diarrhea; stems and roots aphrodisiac. Leaves antibacterial, mildly laxative, applied as a paste to treat snakebites, wounds, skin infections, piles and ulcers; young leaves eaten for hookworm or Guinea worm. Stem liquid dropped in the eye to cure inflammation and cataract.)

Michelia L. Magnoliaceae

After the Italian botanist Pier (Pietro) Antonio Micheli, 1679–1737, botanical collector, founder of the Società Botanica Fiorentina, 1718–1737 Curator of the Botanical Garden of Florence, his works include *Relazione dell'erba detta da' botanici Orobanche e volgarmente succiamele, fiamma, e mal d'occhio*. Firenze 1723 and *Catalogus plantarum Horti caesarei florentini*. Florentiae [Florence] 1748; see *Species Plantarum* 1: 536. 1753, Giovanni Targioni-Tozzetti (1712–1783), *Notizie della vita e delle opere di Pier Antonio Micheli*, pubblicate per cura di Adolfo Targioni-Tozzetti. Firenze 1858 and *Sunyatsenia* 4: 142. 1940, *Acta Phytotaxonomica Sinica* 8(4): 281–283. 1963, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 486. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented*

in the Hunt Institute Portrait Collection. 266. 1972, Francesco Rodolico, in *D.S.B.* 9: 368–369. New York 1981, *Annals of the Missouri Botanical Garden* 80(4): 1086–1087. 1993. Often in *Magnolia* L.

Michelia alba DC.

China.

(Used in Ayurveda and Sidha. Bitter bark used for the treatment of intermittent fevers; dried powdered bark mixed with coconut oil used to kill head lice; for childbirth, bark boiled and the decoction administered; bark paste given for abortion; rootbark laxative, expectorant, astringent, febrifuge, tonic, emmenagogue, abortive. Leaves pounded and smeared over the body after childbirth; juice of leaves with honey useful in colic; leaves infusion taken for stomach-ache; macerated leaves paste mixed with cow dung smeared to disperse cockroaches from house and store rooms. Roots and seeds for skin diseases. Root paste given after menstruation for infertility. Crushed fruits and seeds made into a paste applied to the cracks in the feet. Seeds pounded with castor oil and smeared on feet against leech, as a leech repellent. A cold infusion of the flowers an essential ingredient in a treatment for anemia associated with gastrointestinal bleeding and epigastric pain. Flower and fruits tonic, cooling, stomachic, diuretic, used in asthma, fever, gonorrhoea, renal diseases. Ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies.)

in English: fragrant champaca, golden champa, orange champak, yellow champa

Michelia maudiae Dunn (*Michelia chingii* W.C. Cheng; *Michelia maudii* Dunn)

China.

See *Species Plantarum* 1: 535–536. 1753 and *Journal of the Linnean Society, Botany* 38(267): 353–354. 1908, *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series* 10: 110. 1936, *Acta Botanica Yunnanica* 11: 234–238. 1989, *Acta Botanica Austro Sinica* 6: 50–53. 1990, *Acta Phytotaxonomica Sinica* 36(2): 145–149. 1998

(Rootbark laxative, expectorant, astringent, febrifuge, emmenagogue.)

in China: shen shan han xiao

Michelia nilagirica Zenk. (*Magnolia nilagirica* (Zenk.) Figlar; *Sampacca nilagirica* (Zenk.) Kuntze)

India. Tree

See *Revisio Generum Plantarum* 6. 1891 and *Proc. Internat. Symp. Fam. Magnoliac.* 1998 23. 2000

(Used in Sidha.)

in India: bana sampige, bili sampige, bilisampage, dodda sampige, doddasampage, kattu canpakam, kattu shanbagam, kattuc canpakam, kattuchempakam, kattushanbagam, nilakiricanpakam, nilakiriccanpakam, pila champa, pilachampa, sampage, sampane, tella sampanga, vanacampakam, vellachempakam

Miconia Ruiz & Pav. Melastomataceae

In honor of Francisco Micón (Micó), b. 1528, Spanish physician and botanist; see *Florae Peruvianaee, et Chilensis Prodrum* 60. 1794, *Systema Vegetabilium Florae Peruvianaee et Chilensis* 1: 105. 1798, *Memoirs of the Wernerian Natural History Society* 4: 284, 310–311. 1823, *Sylva Tellur.* 94. 1838, *Annales des Sciences Naturelles; Botanique*, sér. 3 16(2): 122. 1851, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 576. Ansbach 1852, *Genera Plantarum* 1: 764. 1867 and *Publ. Field Mus. Nat. Hist., Bot. Ser.* 13(4/1): 249–521. 1941, *Fieldiana, Bot.* 24(7/4): 407–570. 1963, *Ceiba* 20(2): 58–68. 1976, *Ceiba* 22(1): 41–64. 1978, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen.* 4. Aufl. 134. Berlin & Hamburg 1989, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1339–1419. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 394–574. 2007.

Miconia affinis DC. (*Acinodendron affine* (DC.) Kuntze; *Acinodendron affine* Kuntze; *Miconia affinis* Macfad. ex Griseb.; *Miconia beurlingii* Triana; *Miconia hyperprasina* Naudin; *Miconia microcarpa* Naudin; *Miconia microcarpa* DC.; *Miconia microcarpa* Triana; *Miconia microcarpa* Macfad. ex Griseb.; *Miconia planinervia* Naudin)

South America. Small tree

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 187, 189. 1828, *Annales des Sciences Naturelles; Botanique*, sér. 3 16(2): 159–161, 171–172, 186. 1851, *Kongl. Vetenskaps*

Academiens Handlingar 40: 130–131. 1854[1856], *Fl. Brit. W.I.* [Grisebach] 257. 1860, *Transactions of the Linnean Society of London* 28(1): 107, 111. 1871 [8 Dec 1871–13 Jan 1872], *Revisio Generum Plantarum* 2: 950–952. 1891

(Leaves on forehead for headache.)

Miconia ligustroides (DC.) Naudin (*Acinodendron ligustroides* (DC.) Kuntze; *Acinodendron ligustroides* Kuntze; *Cremanium ligustroides* DC.; *Miconia ligustroides* Naudin)

South America.

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 194. 1828, *Annales des Sciences Naturelles; Botanique*, sér. 3 16(2): 167. 1851, *Revisio Generum Plantarum* 2: 950–952. 1891 and *Pharm. Biol.* 48(2): 166–169. 2010

(Antibacterial, antibiotic, antitumoral, analgesic and antimalarial.)

Miconia salicifolia (Bonpl. ex Naudin) Naudin (*Acinodendron salicifolium* (Bonpl. ex Naudin) Kuntze; *Acinodendron salicifolium* (Naudin) Kuntze; *Acinodendron salicifolium* Kuntze; *Melastoma rasmarinifolia* Pav. ex Triana; *Melastoma salicifolia* Bonpl. ex Naudin; *Melastoma salicifolium* Bonpl. ex Naudin)

South America.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 16: 234. 1851, *Transactions of the Linnean Society of London* 28(1): 127. 1871 [8 Dec 1871–13 Jan 1872], *Revisio Generum Plantarum* 2: 952. 1891 and *Journal of Ethnopharmacology* 132(1): 101–108. 2010

(To treat bacterial infections, inflammations.)

Miconia tomentosa (Rich.) D. Don ex DC. (*Acinodendron amplexans* (Crueg.) Kuntze; *Acinodendron amplexans* Kuntze; *Acinodendron tomentosum* (Rich.) Kuntze; *Acinodendron tomentosum* Kuntze; *Diplochita tomentosa* (Rich.) Griseb.; *Diplochita tomentosa* Griseb.; *Jucunda tomentosa* (Rich.) Pl.* 2: 950. 1891 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die*

Angrenzenden Länder 47: 175. 1905, *Phytologia* 47: 199–220. 1980

(Astringent, antibacterial, antidiarrhea.)

in Peru: carache caspi, chaita ida, muringa, pichirina, tiriblanco

Microcephala Pobed. Asteraceae

From the Greek *mikros* 'small' and *kephale* 'head'.

Microcephala lamellata Pobed. (*Matricaria lamellata* Bunge; *Matricaria lasiocarpa* Boiss.)

Iran.

See *Botanicheskie Materialy Gerbariia Glavnogo Botanicheskogo Sada S.S.S.R.* 21: 357. 1961

(Dried leaves and flowers to relieve fever; flowers to treat jaundice and stomachache.)

in Pakistan: baboona, babuna, pimpli

Microcharis Benth. Fabaceae (Indigofereae)

From the Greek *mikros* 'small' and *charis* 'grace, beauty', see *Genera Plantarum* 1: 501. 1865 and *Kew Bulletin* Addnl. ser. 1: 1–166. 1958.

Microcharis asparagoides (Taub.) Schrire (*Indigofera asparagoides* Taub.; *Indigofera asparagoides* Taub. subsp. *asparagoides*)

Uganda. Annual non-climbing herb, small plant, erect, filiform, dark pink flowers, in grassland

See *Genera Plantarum* 1: 501. 1865, *Die Pflanzenwelt Ost-Afrikas* C 210. 1895 and *Bothalia* 22(2): 165–170. 1992

(For cerebral malaria, a cold infusion from a dry powdered mixture of aerial parts of the plant with aerial parts of *Justicia matammensis* (Schweinf.) Oliv. (*Justicia anseliana* (Nees) T. Anderson), *Dissotis brazzae* Cogn., *Cassia gracilior* (Ghesq.) Steyaert (*Chamaecrista gracilior* (Ghesq.) Lock), *Pentas zanzibarica* (Klotzsch) Vatke, *Rhynchosia minima* (L.) DC. and *Antherotoma naudinii* Hook. f. Leaves juice, application on burns. Veterinary medicine.)

in Burundi: urwibagiza, utwatsi tw 'infizi

in Tanzania: kayoiwa

Micrococca Benth. Euphorbiaceae

From the Greek *mikros* 'small' and *kokkos* 'berry, grain, seed', the fruits are very small, see *Niger Flora* 503. 1849 and *Boissiera* 55: 1–322. 1998, *Blumea* 47: 149–155. 2002.

Micrococca mercurialis (L.) Benth. (*Claoxylon mercuriale* (L.) Thwaites; *Claoxylon mercurialis* (L.) Thwaites; *Mercurialis abyssinica* Hochst. ex Pax & K. Hoffm.;

Mercurialis alternifolia Lam.; *Mercurialis alternifolia* Hochst. ex Baill.; *Microstachys mercurialis* (L.) Dalzell & Gibson; *Tragia mercurialis* L.)

Trop. and S. Africa, India to Malaysia. Herb, weed, erect, inflorescence a raceme, flowers white, leaves eaten as a vegetable, in open places, woodland and bushland, along rivers and shores

See *Species Plantarum* 2: 980–981, 1035–1036. 1753, *Encyclopédie Méthodique, Botanique* 4: 120. 1797, *De Euphorbiacearum Generibus Medicisque earumdem viribus tentamen*, tabulis aeneis 18 illustratum 43, pl. 14, f. 43. 1824, *Niger Fl.*: 503. 1849, *Étude générale du groupe des Euphorbiacées* 490. 1858, *The Bombay Flora ...* 227. 1861, *Enumeratio Plantarum Zeylaniae* 271. 1861, *Revisio Generum Plantarum* 2: 617. 1891 and *Notulae Systematicae*. *Herbier du Muséum de Paris* 9: 156–188. 1941, *Taxon* 30: 511–512. 1981, Balakrishnan, N.P. & Chakrabarty, T. *The Family Euphorbiaceae in India. A Synopsis of Its Profile, Taxonomy and Bibliography*. 2007 [as *Claoxylon mercurialis*.]

(Plant used to treat fever in children; plant sap instilled into nose, eyes or ears to treat headache and otitis.)

Microcos L. Malvaceae (Tiliaceae)

Possibly from the Greek *mikros* 'small' and *kos* 'public prison, a prisoner', the leaves are used for wrapping, see *Species Plantarum* 1: 514. 1753.

Microcos paniculata L. (*Fallopia nervosa* Lour.; *Grewia affinis* Lindl.; *Grewia microcos* L.; *Grewia nervosa* (Lour.) Panigrahi; *Microcos nervosa* (Lour.) S.Y. Hu)

India, Borneo, Papua New Guinea. Shrub or tree, erect, bole deeply fluted, short leaf stalk swollen in the upper part, leaves acuminate strongly 3-nerved, yellow flowers in terminal panicles, fleshy ripe fruits juicy

See *Species Plantarum* 1: 514. 1753, *Species Plantarum* 2: 964. 1753, *Familles des Plantes* 2: 277, 557. 1763, *Syst. ed.* 12. 2: 602. 1767, *Flora Cochinchinensis* 336. 1790, *Prodr.* (DC.) 1: 510. 1824, *Transactions of the Linnean Society of London* 12: 265. 1826, *Prodr. Fl. Penin. Ind. Or.* 81. 1834, *Fl. Brit. Ind.* 1: 392. 1874, *Handb. Fl. Ceylon* 1: 177. 1893 and *Bot. Hist. Hortus Malabaricus*: 102. 1980, *Taxon* 34: 703. 1985, *Journal of the Arnold Arboretum* 69(1): 79. 1988

(Roots used as a remedy for indigestion. Fruit diuretic.)

in Borneo: damak damak

in China: po bu ye

in India: abhraangu, abhrangu, abroni, barsubret, bili abhraangu, biliabhrangu, biliyabhrangu, bolchibins, bor-subret, cheerakalu, chowri soppu, dieng sohdkhar, dieng sohlienghadem, hasoli, kottai, kottakka, kotton, majjige soppu, majjigesoppu, pisoli

Microcycas A. DC. Cycadaceae (Zamiaceae)

From the Greek *mikros* 'small' and the genus *Cycas* L.

Microcycas calocoma (Miq.) A. DC. (*Zamia calocoma* Miq.)

Western Australia.

See *Species Plantarum*, Editio Secunda 2: 1659. 1763, *Flore des Serres et des Jardins de l'Europe* 7: 141. 1852, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 538. 1868 and *Taxon* 35(3): 582. 1986

(Roots used as a rat poison.)

Microdesmis Hook.f. ex Hook. Pandaceae

From the Greek *mikros* 'small' and *desmis, desmos* 'a bond, band, bundle', referring to the flowers, see *Icones Plantarum* 8: pl. 758. 1848 and *African Study Monographs* 24(1–2): 1–168. 2003, *African Study Monographs* 25(1): 1–27. 2004.

Microdesmis haumaniana J. Léonard

Cameroon, Angola. Tree or shrub, flowers light orange

See *Bulletin du Jardin Botanique de l'État* 31: 185, t. 22 g-i & 25. 1961

(Plant sap taken to treat gastrointestinal disorders, colic, stomachache, diarrhea, ovarian complaints and gonorrhea. Ground fresh leaves applied to treat hemorrhoids; leaf sap as ear drops to treat otitis. A vapor bath with boiled leaf sap taken to treat rheumatism.)

in Congo: nkuti

Microdesmis keayana J. Léonard

Senegal, Nigeria. Shrub, inflorescence an axillary fascicle, browsed by goats and cattle

See *Bulletin du Jardin Botanique de l'État* 31: 180. 1961, *Phytotherapy Research* 16(5): 497–502. 2002, *Journal of Ethnopharmacology* 87(2–3): 221–225. 2003, *Journal of Ethnopharmacology* 90(2): 221–227. 2004, *Chemistry and Biodiversity* 3(9): 982–989. 2006, *Journal of Ethnopharmacology* 104(1–2): 263–269. 2006, *Chemical and Pharmacological Bulletin* 55(4): 643–645. 2007

(Roots antioxidant. Leaf sap, or crushed and burnt twigs and roots applied to snakebites or to scarifications; leaf sap astringent, antitypanosomal, antiplasmodial, for diarrhea, prescribed for pregnant women and young children; leaf and stem sap taken to treat stomachache, intestinal worms, genital problems, mental illness, menstrual complaints, sterility, miscarriage, loss of virility and venereal diseases, also applied to eczema, scabies, burns, circumcision wounds, abscesses and sores from gonorrhoea. Magic, good luck charm, vapor from burned leaves believed to chase bad spirits from houses.)

in Nigeria: apata esunsun; Frankpata (Edo); nkperi, akbalata (Igbo); kawa (Boki); ntanebit (Ibibio)

Microdesmis puberula Hook.f. ex Planch. (*Microdesmis puberula* Hook.f.; *Microdesmis zenkeri* Pax)

Tropical Africa. Shrub or small tree, orange fruits and flowers, inflorescence an axillary fascicle, elephants eat the leaves and roots, leaves eaten by gorillas

See *Hooker's Icones Plantarum* 8: t. 758. 1848, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 531. 1897 and *Willdenowia* 21: 233–238. 1991

(Whole plant and leaves emmenagogue, aphrodisiac, astringent, for skin eruptions, diarrhea, threatened abortion. Leaf sap, or crushed and burnt twigs and roots applied to snakebites or to scarifications; leaf sap astringent, for diarrhea, prescribed for pregnant women and young children; leaf and stem sap taken to treat stomachache, intestinal worms and genital problems such as menstrual complaints, sterility, miscarriage, loss of virility and venereal diseases, also applied to eczema, scabies, burns, circumcision wounds, abscesses and sores from gonorrhoea. Roots eaten as a virility medicine; roots and berries eaten raw as aphrodisiac. Fruits laxative. Magic, good luck charm, vapor from burned leaves believed to chase bad spirits from houses.)

in Central African Republic: mokola, mokoula, mokula

in Congo: dikota

in Nigeria: amomilla, amomilan, anamomilla, apata, apata esunsun, ehan-apata, elohamienlo, esun-sun, igi-apata, ubelu; Frankpata (Edo); nkperi, akbalata (Igbo); kawa (Boki); ntanebit (Ibibio)

in Yoruba: akanju ile, apata, arin igo, arin igo dudu, esunsun, idi apata, igi ori apata, imeyinfun

in Zaire: amabuobuo, amakbalwamamba, amakbei, amakbei, siba, tetwa

Microglossa DC. Asteraceae

From the Greek *mikros* 'small' and *glossa* 'a tongue', an allusion to the corolla segments, to the shortness of the ray florets, see *Prodr.* (DC.) 5: 320. 1836.

Microglossa afzelii O. Hoffm.

Tropical Africa. Liana, scrambling, shrub, weed, flowers yellow white, flower-heads with white ligules to outer florets

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 320. 1836, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 469. 1898 and *Revue de Cytologie et de Biologie Végétales, le Botaniste* 10: 177–184. 1987

(Leaves infusion analgesic, febrifuge, anthelmintic, for toothache and fevers, to heal sores, squeezed into the ear as earache remedy.)

Microglossa densiflora Hook.f.

Tropical Africa. Herb, shrub, spreading, erect, climbing, white yellowish florets

See *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 320. 1836, *Journal of the Linnean Society, Botany* 7: 200. 1864 and *Opera Botanica* 121: 159–172. 1993

(For skin diseases, wounds.)

in Tanzania: kichwaighembe

Microglossa pyrifolia (Lam.) Kuntze (*Conyza heudelotii* Oliv. & Hiern; *Conyza pyrifolia* Lam.; *Erigeron pyrifolius* (Lam.) Benth.; *Microglossa petiolaris* DC.; *Microglossa pyrifolia* Kuntze; *Microglossa volubilis* DC.; *Pluchea subumbellata* Klatt)

East Africa. Shrub, weed, climber, spreading, straggling, lianescent, erect, scrambling, woody base, young stem yellowish to brown, leaves papery with strong tobacco-like smell, disc florets cream-white, flower-heads in laxly branched terminal corymbs, fruit brown with white wings, in flooded area, swampy bushland, forest edge, in mountain forest, see also *Conyza pyrifolia*

See *Species Plantarum* 2: 863–865. 1753, *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 89–90. 1786, *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 1: 14. 1818, *Synopsis Generum Compositarum* ... 203–204. 1832, *Archives de Botanique* 2: 517. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 5: 320–321. 1836, *Flora Hongkongensis* 176. 1861, *Ann. Sci. Nat., Bot.* sér. 5, 18: 369. 1873, *Fl. Trop. Afr.* [Oliver et al.] 3: 317. 1877, *Revisio Generum Plantarum* 1: 353. 1891 and *Opera Botanica* 121: 159–172. 1993

(Suspected of poisoning. Leaves and whole plant abortifacient, anthelmintic, postpartum remedy, aphrodisiac, expectorant. Roots and leaves used to treat stomachache and worms. Leaves used to treat cough and stomachache, yellow fever, toothache, colds, filariasis (philariasis); juice from crushed leaves applied to an ulcer.)

in Congo: muntantali

in Nigeria: anikan segbo, anikan segbo torisa, okbakakwu

in Tanzania: kichwaghwmbe, lauhala, mswaswaki, nanguo, uswawaki

in Papua New Guinea: gogo, pundari

Malay name: ragin

Microlepie Presl Dennstaedtiaceae

From the Greek *mikros* ‘small’ and *lepis* ‘scale’, alluding to the indusia; see *Journal für die Botanik* 1800(2): 124. 1800[1801], C. Presl (1794–1852), *Tentamen Pteridographiae, seu genera Filicacearum*. 124–125, t. IV, figs. 21–23. Prague 1836,

Historia Filicum 260–262. 1875, *Arbeiten aus dem Königl. Botanischen Garten zu Breslau* 1: 23. 1892 and *Polypod. Phil. Isl.* 55. 1905, *University of California Publications in Botany* 16: 82. 1929, *J. Sci. Engin.* (Nation. Chung-Hsing Univ.) 10: 196, 200. 1973, *Fern Gaz.* 11(2–3): 141–162. 1975.

Microlepie puberula Alderw. (*Microlepie puberula* Lacaita)

China, India.

See *Bull. Jard. Bot. Buitenzorg* Ser. 2, XI. 17. 1913, *J. Linn. Soc., Bot.* 43. 485. 1916

(Sporophyll antibacterial.)

Micromelum Blume Rutaceae

From the Greek *mikros* ‘small, little’ and *melon* ‘an apple’ or *melos* ‘a limb, part, member’, referring to the small and apple-like fruits or to the small branchlets; see Karl Ludwig von Blume, *Bijdragen tot de flora van Nederlandsch Indië*. 137. 1825.

Micromelum hirsutum Merr.

SE Asia, Malaysia.

See *Bijdragen tot de flora van Nederlandsch Indië* 1: 137, 20. 1825 and *Lingnan Science Journal* 6: 279. 1930

(Root decoction as a postpartum remedy. For skin diseases, fever, pound the leaves and poultice. Magic, ritual, a decoction to drive an evil spirit out.)

Malay names: chemama, chememar, cherek, cherek-cherek, daun gelang, secherek, senagu

Micromelum integerrimum (Buch.-Ham. ex DC.) Wight & Arn. ex M. Roem. (*Bergera integerrima* Buch.-Ham. ex DC.; *Bergera integerrima* Roxb. ex DC.; *Bergera integerrima* Buch.-Ham. ex Roxb., nom. inval.; *Micromelum integerrimum* (Roxb. ex DC.) Wight & Arn. ex M. Roem.; *Micromelum integerrimum* Wight. & Arn., nom. inval.)

India. Small tree, imparipinnate leaves, white fragrant terminal flowers in cymes, orange-red fruits, young leaves used as vegetable

See *Mantissa Plantarum* 2: 555, 563. 1771, *Hort. Bengal.* 32. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 537. 1824, *Transactions of the Linnean Society of London* 15(2): 367 (-368). 1827, *Fl. Ind.* (Roxburgh) 2: 376 (-377). 1832, *Prodr. Fl. Ind. Orient.* 1: 94. 1834, Roemer, Max Joseph, *Familiarum Naturalium Regni Vegetabilis Synopses Monographicae* 1: 47. [Weimar], 1846–1847, *FBI* 1: 501. 1875

(Leaves in giddiness. Stem extract given to hasten the process of delivery; stem bark decoction in dysentery. Root infusion after childbirth; roots chewed with betel for coughs; boiled roots applied as poultice for ague.)

in China: xiao yun mu

in India: enghat-laung-hing, khrang-kelau, krang-kelau, theng-han-se, theng-hanse

Micromelum minutum Wight & Arn. (*Micromelum minutum* (G. Forst.) Wight & Arn.)

SE Asia. Small tree, compound leaves in clusters, nearly sessile leaflets strongly asymmetric, dull white tomentose flowers

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 448. 1834

(Stem bark juice or decoction taken for dysentery; bark chewed for toothache. Leaves boiled and liquid used for infection, also drunk for headache, tuberculosis and stomachache.)

in English: red lime berry

in India: boibisi, enghat laughing

Malayan names: chama, chemama, chememar jantan, cherek, cherek puteh, secherek

in Philippines: makabangon

Micromelum pubescens Blume

Malay Peninsula, India.

See *Bijdragen tot de flora van Nederlandsch Indië* 137. 1825

(Plant expectorant.)

Micromeria Bentham Lamiaceae (Labiatae)

Greek *mikros* 'small, little' and *meris* 'a part, portion', referring to leaves and flowers, see *Botanical Journal of the Linnean Society* 155(3): 297–447. 2007, *Willdenowia* 38: 363–410. 2008.

Micromeria biflora (Buch.-Ham. ex D. Don) Benth. (*Clinopodium biflorum* (Buch.-Ham. ex D. Don) Kuntze; *Micromeria biflora* var. *indica* Elly Walther & K.H. Walther; *Satureja biflora* (Buch.-Ham. ex D. Don) Briq.; *Thymus biflorus* Buch.-Ham. ex D. Don)

China, India.

See *Prodr. Fl. Nepal.*: 112. 1825, *Labiatae Gen. Spec.*: 378. 1834, *Revis. Gen. Pl.* 2: 515. 1891, *Nat. Pflanzenfam.* 4(3a): 299. 1896 and Govaerts, R. *World Checklist of Selected Plant Families Database*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Micromeria imbricata*.]

(Paste of the roots antiseptic, for infections, boils. Leaves juice aromatic and carminative, in stomachache. Veterinary medicine, plant paste used in worm-infested wounds in cattle.)

in English: Indian wild thyme

in India: bhaneri, jagan, jungli ajwan, mondair

Micromeria douglasii Benth. (*Clinopodium douglasii* (Benth.) Kuntze; *Micromeria barbata* Fisch. & C.A. Mey.; *Micromeria chamissonis* (Benth.) Greene; *Micromeria*

douglasii (Benth.) Benth.; *Satureja douglasii* (Benth.) Briq.; *Thymus chamissonis* Benth.; *Thymus douglasii* Benth.)

North America. Herb, strongly aromatic, small whitish or purplish flowers

See *Linnaea* 6(1): 80. 1831, *Labiatae Gen. Spec.*: 372. 1834, *Revisio Generum Plantarum* 2: 515. 1891, *Man. Bot. San Francisco*: 289. 1894, *Die Natürlichen Pflanzenfamilien* 4(3a): 300. 1896

(Caution should be observed in taking this medicine as it can be toxic in large doses. Fresh and dried leaves decoction analgesic, antiseptic, stimulant, anticancer, diuretic, antispasm, antiemetic, for arthritis, headache, stomachache, indigestion, toothache and joint pains. Effective to drive away rats and other rodents.)

Common name: yerba buena

Micromeria formosana Marquand (*Mentha formosana* (C. Marquand) S.S. Ying; *Origanum vulgare* Linnaeus)

China.

See *Species Plantarum* 2: 576–578. 1753 and *Hooker's Icon. Pl.* 33: t. 3230. 1934, *Memoirs of the College of Agriculture, National Taiwan University* 29(1): 91. 1989

(Stimulant, astringent.)

in English: Taiwan micromeria

in China: tai wan jiang wei cao

Micromeria imbricata (Forssk.) C. Chr. (*Clinopodium biflorum* (Buch.-Ham. ex D. Don) Kuntze; *Clinopodium imbricatum* (Forssk.) Kuntze; *Micromeria biflora* (Buch.-Ham. ex D. Don) Benth.; *Micromeria imbricata* (Forssk.) C. Chr.; *Satureja biflora* (Buch.-Ham. ex D. Don) Briq.; *Satureja biflora* (Buch.-Ham. ex D. Tropics and Subtropics, Africa and Asia. Herb

See *Species Plantarum* 2: 981. 1753, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 835. 1826, *Hooker's Journal of Botany and Kew Garden Miscellany* 9: 17. 1857, *Étude générale du groupe des Euphorbiacées* 517. 1858, *Fl.*

Ned. Ind., Eerste Bijv. 3: 460. 1861, *Linnaea* 32: 95. 1863, *Adansonia* 4: 323. 1864, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 1161, 1175. 1866, *Linnaea* 32: 95. 1893 and *Bull. Soc. Bot. France* 57(8): 128. 1910, *Das Pflanzenreich* 52(IV. 147. V): 116–117. 1912, *Proc. Indian Sci. Congr. Assoc.* (IV, A) 67: 36. 1980, *Taxon* 29: 715–716. 1980, *Taxon* 31: 597–598. 1982

(Young twigs and leaves cooked with meat and vegetables and eaten as postpartum remedy.)

in Borneo: daun merayat

in China: di yang tao

Microstemon Engl. Anacardiaceae

From the Greek *mikros* ‘small, tiny’ and *stemon* ‘thread, filament’, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(4): 376. 1881.

Microstemon velutina Engl. (*Microstemon velutinus* Engl.)

Malacca.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 1(4): 376. 1881

(For ringworm and skin diseases apply the oil from the seeds.)

Malay name: pelong

Microtea Sw. Phytolaccaceae

Perhaps from the Greek *mikros* ‘small, tiny’ and *ous, otos* ‘an ear’ or *mikrotos* ‘smallness’, referring to the tiny flowers, some suggested from *thea* ‘a seeing, looking at, view, a sight’, see *Nova Genera et Species Plantarum seu Prodromus* (Swartz) 4, 53. 1788 and *Fieldiana, Bot.* 24(4): 192–202. 1946, *Memoirs of the New York Botanical Garden* 85: i-ix, 1–246. 2000, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 1924–1928. 2001, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 894–902. 2007, *Willdenowia* 39(2): 223. 2009.

Microtea debilis Sw. (*Microtea debilis* var. *ovata* Moq.; *Microtea debilis* var. *ovata* Delile ex Moq.; *Microtea debilis* var. *rhombofolia* Moq.; *Microtea ovata* Delile; *Microtea ovata* Delile ex Moq., nom. inval.; *Schollera debilis* (Sw.) J.B. Rohr; *Schollera debilis* Rohr)

Tropical America, West Indies. Annual low weedy herb, lax branches, small white flowers in lax terminal spike-like racemes, fruit covered with spine-like tubercles

See *Nova Genera et Species Plantarum seu Prodromus* 4, 53. 1788, *Tentamen Florae Germanicae* 1: 165, 170. 1788, *Skrifter af Naturhistorie-Selskabet* 2: 210. 1792, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 17. 1849 and *Ceiba* 19(1): 1–118. 1975, *Fieldiana: Botany, New Series* 13:

199–213. 1983, *Flóruilas de las Zonas de Vida del Ecuador* 1–512. 1985, *Rapid Assessment Program Working Papers* 1: 1–108. 1991 [A biological assessment of the Alto Madidi region and adjacent areas of Northwest Bolivia], *Flora of Ecuador* 46: 1–43. 1993

(Expectorant, antiinflammatory, decoction or infusion for cough, heart, inflamed areas, colds, flu, fever, whooping cough.)

in English: flat-of-the-earth

Microtoena Prain Lamiaceae (Labiatae)

From the Greek *mikros* ‘small’ and *tainia* ‘fillet, band’, an allusion to the small bands in the corolla, see *Hooker’s Icon. Pl.* 19: t. 1872. 1889 and *Acta Phytotaxonomica Sinica* 10(1): 43, 47, 52–53. 1965, *Flora Reipublicae Popularis Sinicae* 66: 579. 1977, *The Journal of Japanese Botany* 58: 1–13. 1983, *Botanical Journal of the Linnean Society* 165: 315–327. 2011.

Microtoena omeiensis C.Y. Wu & S.J. Hsuan

China.

See *Acta Phytotaxonomica Sinica* 10(1): 51–52. 1965

(Used for colds and rheumatism.)

in English: Omei Mountain microtoena

in China: e mei guan chun hua

Microtoena patchoulii (C.B. Clarke ex J.D. Hooker) C.Y. Wu & Hsuan (*Microtoena cymosa* Prain; *Microtoena insuavis* Prain ex Dunn; *Microtoena insuavis* (Hance) Prain ex Dunn, nom. illeg.; *Plectranthus patchoulii* C.B. Clarke ex J.D. Hooker)

China, Himalaya, India. An aromatic herb

See *The Flora of British India* [J.D. Hooker] 4(12): 624. 1885, *Hooker’s Icon. Pl.* 19: t. 1872. 1889 and *Notes Roy. Bot. Gard. Edinburgh* 6: 188. 1915, *Acta Phytotax. Sin.* 10(1): 44. 1965, *Botanical Journal of the Linnean Society* 165: 315–327. 2011

(Used for coughs, asthma, abdominal pain and enteritis.)

in English: Chinese patchouly, patchouli microtoena

in China: dian nan guan chun hua

Microtoena pauciflora C.Y. Wu (*Microtoena pauciflora* C.Y. Wu ex Hsuan)

China. This species may only be a variety of *Microtoena patchoulii*

See *Acta Phytotaxonomica Sinica* 10(1): 44–45, pl. 11. 1965, *Botanical Journal of the Linnean Society* 165: 315–327. 2011

(Stomachic, astringent.)

in China: shao hua guan chun hua

Mikania Willd. Asteraceae

For the Bohemian botanist Joseph Gottfried Mikán, 1743–1814, his works include *Catalogus plantarum omnium*. Pragae 1776 and *Dispensatorium oder Arzneiverzeichniss für Arme*, zusammengetragen von der medizinischen Fakultät ... Prag. Herausgegeben von J.G.M. Prag 1786. Some suggest the genus was dedicated to Johann Christian Mikán (1769–1844), son of Joseph Gottfried Mikán, botanist, entomologist, author of *Delectus florae et faunae brasiliensis*. Vindobonae 1820[–1825] and *Monographia Bombyliorum Bohemiae*, iconibus illustrata. Pragae 1796; see *Species Plantarum* 2: 836. 1753, *Species Plantarum*. Editio quarta [Willdenow] 3(3): 1481, 1742–1748. 1803 and J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 488. 1965, *Res. Bull. Univ. Calcutta Cytogenetics Lab*. 2: 1–50. 1970, *Ann. Missouri Bot. Gard*. 63: 862–888. 1976, *Bull. Torrey Bot. Club* 108: 467–471. 1981, Frans A. Stafleu and Cowan, *Taxonomic Literature*. 3: 481–483. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 751. Stuttgart 1993, *Ann. Missouri Bot. Gard*. 82: 581–592. 1995, H. Genaut, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 385–386. 1996, *Compositae Syst.* [ed. Hind & Beentje] 1: 624. 1996, *Fl. Venez. Guayana* 3: 177–393. 1997, *Compositae Newsl.* 40: 64–68. 2003.

Mikania capensis DC. (*Mikania dioscoreaefolia* DC.; *Mikania dioscoreaefolia* var. *bojeri* DC.; *Mikania dioscoreaefolia* var. *crenata* DC.; *Mikania floribunda* Bojer ex DC.; *Mikania oxyota* DC.; *Mikania thunbergioides* Bojer ex DC.)

East Africa. Shrub, vine, twining, scrambler, climber, cordate leaves, axes of the inflorescence and involucre light green, corolla white tinged very light purple, in open area, at the edge of montane forest, at forest edge

See *Species Plantarum*. Editio quarta 3(3): 1742–1748. 1803, *Prodromus Systematis Naturalis Regni Vegetabilis* 5: 198. 1836 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 103: 211–246. 1982

(Leaves for urinary complaints and venereal diseases.)

in South Africa: umDlonzo (Zulu)

Mikania carteri Baker (*Mikania scandens* (L.) Willd. var. *laciniata* Hutch. & Dalziel; *Mikania tropaeolifolia* O. Hoffm.)

Ghana.

See *Species Plantarum*. Editio quarta 3(3): 1743. 1803, *Revisio Generum Plantarum* 1: 371. 1891, *Bulletin of Miscellaneous Information Kew* 1895: 106. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 468. 1898 and *Flora of West Tropical Africa* 2: 172. 1931

(Alkaloids.)

in W. Africa: iroko, mbang

Milicia regia (A. Chev.) C.C. Berg (*Chlorophora regia* A. Chev.; *Maclura regia* (A. Chev.) Corner)

Tropical Africa. Tree, latex, flowers yellowish-green, edible fruit, closely related to *Milicia excelsa*

See *Bull. Soc. Bot. France* 58(Mém. 8d): 209. 1912 [1911 publ. 1912], *The Gardens' Bulletin Singapore* 19: 237. 1962, *Bulletin du Jardin Botanique National de Belgique* 52(1–2): 227. 1982

(The wood and sawdust may cause dermatitis, irritation to nose and throat, and asthmatic reactions. Fresh latex irritant. Bark galactagogue, febrifuge, aphrodisiac, antiinflammatory, tonic, purgative used to treat toothache, stomachache, piles, diarrhea, dysentery, abdominal pain, cough, asthma, heart trouble, lumbago, rheumatism, sprains, edema, ascites, venereal diseases, dysmenorrhea, gonorrhoea, scabies, wounds, fever. Leaves eaten to treat insanity; leaf maceration drunk as a galactagogue. Leaf and bark extract fungicidal, antiseptic, antibacterial, antidote. Latex antiseptic, healing, applied to itch, wounds, burns, gonorrhoea, stomach complaints, sores, eczema. Root decoction taken to treat female sterility; root and stem bark decoction taken as an aphrodisiac. Magic, ritual, ceremonial, often considered a sacred tree.)

in English: African oak, African teak, cokewood, counter wood, East African teak, iroko, mulberry, Nigerian teak, rock elm

Miliusa Leschen. ex A. DC. Annonaceae

Possibly the genus was named after the Italian botanist Josephus Mylius, author of *De hortorum cultura*. Brixiae 1574, or dedicated to Joannes Mylius, 1585–1618, physician and philosopher in Hesse, author of *Antidotarium Medico-Chymicum Reformatum*. Francofurti 1620, or from Latin *milius*, ii 'millet' or from a vernacular name; see S.K. Jain & R.R. Rao, *An Assessment of Threatened Plants of India*. Proceedings of the seminar held at Dehra Dun, 14–17 Sept., 1981. Howrah, *Botanical Survey of India*. 1983, M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 227. Dehra Dun 1985, L.W. Jessup, "The genus *Miliusa* Leschen. ex A. DC. (Annonaceae) in Australia." in *Austrobaileya*. 2: 517–523. 1988, D. Mitra & P. Chakraborty, "*Miliusa mukerjeeana* D. Mitra & Chakrab. (Annonaceae). A new species from Andaman & Nicobar Islands." in *Bull. Bot. Surv. India*. 33: 326–328, ill. 1994 [1991], *J. S. China Agric. Univ.* 18: 41–44. 1997.

***Miliusa roxburghiana* Hook.f. & Thomson**

India, Himalayas. Tree, elliptic aromatic leaves, pink flowers, oblong fruits

See *Fl. Ind.* [Hooker f. & Thomson] 1: 150. 1855, *FBI* 1: 87. 1872

(Seeds pounded with hot water and given in cholera. An extract of bark of *Garcinia xanthochymus* with bark of *Miliusa roxburghiana* and leaves of *Ocimum sanctum* given in alcoholic intoxication. A juice of *Miliusa roxburghiana* roots with roots of *Solanum indicum* given in muscular problems. Magic, contact therapy, a piece of root tied on wrist with red thread in fevers.)

in India: chalaw-araung

***Miliusa tomentosa* (Roxb.) J. Sinclair**

India. Tree, young branches tomentose, purple flowers, ripe fruits eaten

See *Gard. Bull. Singapore* 14: 378. 1955

(Fruit juice anti-diuretic. Bark decoction given internally in the treatment of rheumatism; bark decoction as gargle for mouth sores; stem bark paste applied in paralysis. Leaf paste applied for healing of wounds. Leaves used as fish poison.)

in English: karee gum

in India: barre dudduga, barre duduga, budda dudduga, bud-dadudduga, dudduga, gaadidalotta, gadidalotta, gopali, hes-sare, hoom, humb, hummas, humph, kaladri, kamarakoru, kanakkaita, kari, kari hessare, karri, kirua, nalla chika dudi, patmo, pedda chiluka, pedda chiluka dudduga, sanhes-are, umbh, umbio, vhum

***Miliusa velutina* (Dunal) Hook. f. & Thomson (*Guatteria velutina* (Dunal) A. DC.; *Uvaria velutina* Dunal)**

India.

See *Species Plantarum* 1: 536. 1753, *Monographie de la famille des Anonacées* 91. 1817, *Flora Indica*: being a systematic account of the plants . . . 1: 151. 1855

(Used in Ayurveda. Bark purgative.)

in India: anachae, ance, ancha, anche, anchehessare, anchey, anje, chopar chilli, dom-sal, domsal, dhuma saala hessare, gandhasal, kanakaita, kanakayitha, kanakkaita, kanaky-itha, kanakytha, nalla dadduga, nalla dudduga, nalladaduga, nalladudduga, nalladudugu, pedda chilkadudi, pedda chiluka dudduga, peddacilukadudduga, rsyaprokta, villooni, vil-luni, viluni

Millettia Wight & Arn. Fabaceae (Millettieae)

Named after the British plant collector Dr. Charles Millett of Canton, China, fl. 1825–1834, probably a physician, in the 1830s (about 1825–1834) he was in the service of the Honorable East India Company, he lived in Macao and Canton, Sri Lanka and Malabar, friend and correspondent of W.J. Hooker, in 1830–1831 introduced some Chinese plants into the Glasgow Botanical Gardens; see Robert Wight and G. Arnott Walker Arnott, *Prodromus florum Peninsulae Indiae Orientalis*. 263–264. London, 1834, *Flora* 27: 100. 1844 and *Notulae Systematicae*. *Herbier du Museum de Paris* 14(1): 72. 1950, *Kew Bulletin* 15(1): 27. 1961, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 240. Chipping Norton, N.S.W. 1981. According to some authors the genus was named after the 18th century French botanist J.A. Millet, see M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 227. Dehra Dun 1985.

Milletia aboensis (Hook. f.) Baker (*Milletia aboensis* Baker; *Milletia macrophylla* var. *aboensis* Hook. f.; *Phaseolodes aboense* (Baker) Kuntze; *Phaseoloides aboensis* Kuntze)

Tropical Africa. Perennial non-climbing tree, purple corolla
See *Fl. Trop. Afr.* [Oliver et al.] 2: 130. 1871, *Revisio Generum Plantarum* 1: 201–202. 1891

(Fruits and leaves for colds, headache, migraine.)

in Nigeria: awo (Edo); kpukpumanya (Igbo)

Milletia auriculata Baker (*Milletia auriculata* Baker ex Brand.)

India. Large woody climber, flat pubescent pods

See Stewart, John Lindsay, *The forest flora of north-west and central India: a handbook of the indigenous trees and shrubs of those countries.* Commenced by the late J. Lindsay Stewart. Continued and completed by Dietrich Brandis. Prepared at the herbarium of the Royal Gardens, Kew. London, 1874

(Bedbugs killed by the roots. Magico-religious beliefs, ritual ceremonial, plant worshipped and offered to the deity; contact therapy, twigs applied to cure fevers. Veterinary medicine, roots applied to sores and wounds to kill maggots. Powdered root as fish poison.)

in India: agya, autamala, gaj, gauj, gauja, gonja, gonjha, gurar, gurur, haranari, hehel, helaranari, helharanari, kadachina, kisimala, kondatangedutige, makadsiadi, nasmata, nedi-bunda, rekorlo, salanghe, sana, senag, sindugaboddu, solangen, vallimuritali, vallimurittali, vallimuruthally

in Nepal: gonjo

Milletia barteri (Benth.) Dunn (*Lonchocarpus barteri* Benth.)

Sierra Leone, Sudan. Perennial climbing shrub, woody vine, erect or straggling shrub, liana, smelling, white-pink purple flowers, gorillas eat the leaves

See *Journal of the Linnean Society, Botany* 4(Suppl.): 99. 1860 and *Journal of Botany, British and Foreign* 49: 221. 1911, *Kew Bulletin* 15(1): 19–40. 1961

(Toxins. Bark for menstrual cycle, pulmonary troubles, naso-pharyngeal affections; twigs emetic, laxatives. Fish poisons, stem beaten and bark; vine pounded put in water as fish poison.)

in Cameroon: lomba

in Central African Republic: lomba, mapowga

in Guinea: nambô

in Sierra Leone: asewuri, fantagbenombo, labo, ndaujo, ndava-jo, nwaiuri, ra-sapo, tawun, yailo, yuko

Milletia bonatiana Pampanini

China.

See *Nuovo Giornale Botanico Italiano*, new series 17(1): 24–25. 1910

(Plants are poisonous but used in small amounts medicinally.)

Milletia brandisiana Kurz (*Phaseolodes brandisianum* (Kurz) Kuntze; *Phaseoloides brandisiana* Kuntze)

Myanmar, Thailand. Perennial non-climbing tree

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 69. 1873, *Revisio Generum Plantarum* 1: 201. 1891 and *Taxon* 29: 355–357. 1980, *J. Nat. Prod.* 70(12): 1910–1914. 2007, *Chemical & Pharmaceutical Bulletin* 56(6): 835–838. 2008, *Bioorganic & Medicinal Chemistry* 17(3): 1181–1186. 2009

(Antiinflammatory activity from the leaves.)

Milletia caudata (Benth.) Baker (*Otosema caudata* Benth.; *Phaseolodes caudatum* (Baker) Kuntze; *Phaseoloides caudata* Kuntze)

India, Himalaya. Perennial non-climbing shrub, straggling, pinnate leaves, caudate leaflets, flowers in axillary racemes, coriaceous pods

See *Plantae Junghuhnianae* 2: 249. 1852, *The Flora of British India* [J.D. Hooker] 2(4): 109. 1876, *Revisio Generum Plantarum* 1: 201. 1891

(Pounded mixture of leaves of *Ixora acuminata* with leaves of *Milletia caudata* and roots of *Stauranthera grandifolia* applied on snakebite.)

in India: laung-la-tanap, longlatanap

Milletia championii Benth. (*Callerya reticulata* var. *championii* (Benth.) H. Sun.; *Phaseolodes championii* (Benth.) Kuntze; *Phaseoloides championii* Kuntze)

Hong Kong. Perennial non-climbing shrub

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 74–75. 1852, *Revisio Generum Plantarum* 1: 201. 1891 and *Flora Yunnanica* 10: 404. 2006

(Stems and roots are poisonous but also used medicinally.)

Milletia congolensis De Wild. & T. Durand

Tropical Africa.

See *Bulletin de l'Herbier Boissier*, sér. 2, 1: 15. 1900, *Ann. Mus. Congo Belge, Bot.* sér. 3, 1(1): 61. 1901

(Fruits and leaves antiviral, febrifuge.)

Milletia conraui Harms

Nigeria, Cameroon. Perennial non-climbing tree, violet to whitish flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 168. 1902, *Chem. Pharm. Bull.* (Tokyo). 55(9): 1402–1403. 2007, *Pharmazie* 63(2): 164–168. 2008

(For estrogen deficiency and also for the treatment of intestinal parasites and colic in children.)

Milletia dielsiana Harms (*Milletia argyrea* T. Chen; *Milletia blinii* H. Lev.; *Milletia champutongensis* Hu; *Milletia cinerea* Benth. var. *yunnanensis* Pamp.; *Milletia dielsiana* Harms. ex Diels; *Milletia duclouxii* Pamp.; *Milletia dunniana* H. Lev.; *Milletia fragrantissima* H. Lev.; *Milletia obtusifoliolata* Hu)

China.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 29(3–4): 412. 1900, *Nuovo Giornale Botanico Italiano*, new series 17(1): 25–26. 1910, *Flore du Kouy-Tchéou* 238–239. 1914, *Catalogue des Plantes de Yun-Nan* 159. 1916, *Acta Phytotaxonomica Sinica* 3(3): 358–359, 363–364. 1955

(Root and stem decoction emmenagogue, for anemia, dysmenorrhea, rheumatism. Anti-anemic, to enrich the blood and promote blood circulation, stem bark for anemia and muscular pain.)

in China: jixueteng (a red resin, a stem (*teng*) with a sap having a color reminiscent of dried chicken's blood, *ji* = chicken and *xue* = blood)

Milletia drastica Baker (*Milletia drastica* Welw. ex Baker)

Cameroon, Nigeria. Perennial non-climbing tree, liana, shrubby tree, smelling slash, purple petals

See *Flora of Tropical Africa* 2: 128. 1871, *Revisio Generum Plantarum* 1: 202. 1891 and *Pharmazie* 63(2): 164–168. 2008

(For estrogen deficiency.)

in Central African Republic: mobunja, timi

Milletia duchesnei De Wild.

Cameroon, Zaire. Perennial climbing shrub

See *Ann. Mus. Congo Belge, Bot. sér. 5*, 1[2]: 138. 1904 [1903–1906, publ. May 1904], *Phytochemistry* 69(1): 258–263. 2008

(Vermifuge, for the treatment of intestinal parasites.)

Milletia dura Dunn (*Milletia cyanantha* Dunn; *Milletia drastica* sensu Eggeling & Dale)

Tropical East Africa. Perennial non-climbing tree, small tree, deciduous, leaves compound, flowers lilac or purplish, thick flat pods split open explosively, hardy and drought resistant, forest soil, moist forest edges

See *Prodromus Florae Peninsulae Indiae Orientalis* 263. 1834 and *Journal of Botany, British and Foreign* 49: 221. 1911, *Journal of the Linnean Society, Botany* 41: 223. 1912, *Phytochemistry* 41(3): 951–955. 1996, *Pest Management Science* 59(10): 1159–1161. 2003, *Bulletin of the Chemical Society of Ethiopia* 17(1): 113–115. 2003, *International Journal of Botany* 4(4): 406–420. 2008

(Rotenoids from the seeds larvicidal. Veterinary medicine, for retained placenta.)

in Congo: cundurhi

in East Africa: muhatia, mutete, omulongo

in Rwanda: umuyogoro

Milletia elongatistyla J.B. Gillett

Tanzania. Perennial non-climbing tree, shrub, violet flowers

See *Kew Bulletin* 15(1): 30. 1961

(Roots used in the treatment of schistosomiasis.)

Milletia eurybotrya Drake (*Callerya eurybotrya* (Drake) A. Schott)

China. Perennial climbing shrub

See *Journal de Botanique* (Morot) 5(12): 187. 1891 and *Blumea* 39(1–2): 22. 1994

(Plants are poisonous and also used medicinally.)

Milletia extensa Benth. (Baker) (*Milletia auriculata* Brandis; *Milletia auriculata* Baker ex Brandis; *Milletia auriculata* var. *extensa* Craib; *Milletia extensa* (Benth.) Benth. ex Baker; *Milletia extensa* Benth. ex Baker; *Milletia macrophylla* Kurz; *Otosema extensa* Benth.; *Phaseolodes extensum* (Benth. ex Baker f.) Kuntze; *Phaseoloides extensa* Kuntze; *Robinia macrophylla* Roxb.)

Burma, India. Perennial climbing shrub or a liana, woody, suberect, leaves very variable, inflorescence an axillary pseudopanicule, corolla yellowish green to pink, woody strap-shaped pod, seed black, leaves and twigs for cattle fodder, oil from seeds edible

See *The Flora of British India* [J.D. Hooker] 2(4): 109. 1876, *Revisio Generum Plantarum* 1: 201. 1891

(Paste of bark applied to treat sprains, and its juice applied to treat scabies. Root bark given as an anticonceptive; root paste given to woman at the time of delivery to prevent troubles during childbirth; root paste applied to cure skin diseases, rashes, also applied on head to kill lice. Seeds and bark for cough. Veterinary medicine, leaves fed to milking cattle to enhance milk secretion; roots decoction applied on cattle's sores; an infusion of powdered roots rubbed on cattle and horses to keep off flies; root juice applied to kill maggots in cattle sores, lice; plant juice rubbed on the body of an animal to kill lice or other ectoparasites. Crushed root and stem bark as fish poison and insect repellent; dry bark powder piscicide.)

in China: ji xue teng

in India: agarbel, agari, agrivel, agryavel, cau, gaidi, ganj, gauj, gauju, godar, gonj, goydar, guadhuni, gulheri, gurendi, hehel, hel, katerumaalo, kauj, konch, kondatangedutige, majja, makdi, manju gochh, marada, patani, salangan, tinpati, valli muritali

in Nepal: gaujo, gonjo

in Thailand: kwaao khrua

Milletia ferruginea (Hochst.) Baker (*Berrebera ferruginea* Hochst.; *Milletia ferruginea* Hochst., nom. nud.; *Phaseolodes ferrugineum* (Hochst.) Kuntze; *Phaseoloides ferruginea* Kuntze)

Ethiopia. Perennial non-climbing tree

See *Prodromus Florae Peninsulae Indiae Orientalis* 263. 1834, *Flora* 27: 100. 1844, *Flora* 29: 597. 1846, *Flora of Tropical Africa* 2: 130. 1871, *Revisio Generum Plantarum* 1: 202. 1891 and *Kew Bulletin* 15(1): 27. 1961, *Agroforestry Systems* 48(1): 9–24. 2000, *Journal of Ethnobiology and Ethnomedicine* 3: 12. 2007, *Journal of East African Natural History* 97(2): 165–185. 2008, *Journal of Ethnobiology and Ethnomedicine* 5: 26. 2009

(For skin infections, juice of leaves or stems as ear drops; for amebiasis, fruit powder mixed with honey. Insecticidal properties. Fish poison, bark and mature fruit, pod and seeds ground into powder and spread over the water.)

in Ethiopia: birbira, biribira, kotalu, sari, sotallo, yego, zaghia

Milletia fruticosa (DC.) Baker (*Cracca fruticosa* (DC.) Kuntze; *Milletia fruticosa* Benth. ex Baker f.; *Milletia fruticosa* (DC.) Benth. ex Baker f.; *Otosema fruticosa* (DC.) Benth.; *Phaseolodes fruticosum* (Benth. ex Baker f.) Kuntze; *Phaseoloides fruticosa* Kuntze; *Robinia fruticosa* Roxb.; *Tephrosia fruticosa* DC.)

India, Nepal. Perennial climbing shrub

See *Hortus Bengalensis*, or a catalogue ... 56. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 249. 1825, *Plantae Junghuhnianae* 2: 249. 1852, *The Flora of British India* 2(4): 109. 1876, *Revisio Generum Plantarum* 1: 175, 201. 1891

(Plant juice applied to treat cuts and wounds. Squeezed bark and leaves used as fish poison.)

in Nepal: tantari

Milletia grandis (E. Meyer) Skeels (*Milletia caffra* Meisn.; *Virgilia grandis* E. Meyer)

Mozambique, South Africa. Perennial non-climbing tree, shrub or small tree, spreading crown, flowers pale purple, inflorescence a terminal spike-like panicle, flat pod dehiscent with spiralling valves, reddish brown seeds, baboons strip off and eat the bark

See *London Journal of Botany* 2: 99–100. 1843 and *U.S.D.A. Bur. Pl. Industr. Bull.* 248, 55. 1912

(Seeds toxic. Powdered seed taken as an anthelmintic, ground seed soaked in milk a remedy for roundworm. Ground roots used to induce sleep. Powdered roots as fish and arrow poison, fish must be boiled before consumption; ground seed can be used as an arrow poison.)

in English: kaffir ironwood

in Southern Africa: Umzimbeet, kafferysterhout, omsambeet; umSimbithi (= ironwood), umSimbithwa, umKunye (Xhosa); umSimbithi (Zulu)

Milletia griffoniana Baill. (*Derris leptorhachis* Harms; *Lonchocarpus griffonianus* (Baill.) Dunn; *Lonchocarpus griffonianus* Dunn.; *Milletia rhodantha* Baill.; *Ostryocarpus parviflorus* Micheli)

Cameroon, Central African Republic. Perennial non-climbing tree, shrub, white-lilac-pink to reddish-purple flowers, confused with *Milletia thonningii*

See *Adansonia* 6: 222–223. 1866, *Revisio Generum Plantarum* 1: 202. 1891 and *Journal of Botany, British and Foreign* 49: 15. 1911, *Kew Bull.* 25: 259–273. 1971, *Phytochemistry* 56(4): 363–368. 2001, *J. Nat. Prod.* 66(9): 1288–1290. 2003, *Zeitschrift Fur Naturforschung B: A Journal of Chemical Sciences*, 973–977. 2005, *Bulletin of the Chemical Society of Ethiopia* 19(1): 75–80. 2005, *Phytomedicine* 13(3): 139–145. 2006, *Planta Med.* 73(6): 512–518. 2007

(Root bark antiinflammatory, antiparasitic; estrogenic activities, root and stem bark reported to contain isoflavonoids, alkaloids and diterpenoids.)

in Ghana: dwindwira, senyana

in Nigeria: ehiengbo, erhiengbó, ito, katep ashie, katep-oshie, njasi, nzachi, nzasi, pere-igbéngi, turburku

in Sierra Leone: torlu gbélé

Milletia hemsleyana Prain (*Milletia decipiens* Prain)

Malaysia. Perennial non-climbing tree

See *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 90. 1897 and *J. Linn. Soc. (Bot.)* 41: 123–243. 1912

(For toothache.)

Malay name: mempari

Milletia lane-poolei Dunn

Sierra Leone, Ivory Coast. Perennial non-climbing tree, small tree, white or pale mauve flowers

See *Bulletin of Miscellaneous Information Kew* 1914(2): 79. 1914

(The twigs reportedly purify water.)

in Sierra Leone: heigbahama, heilegbame, katindane, lamsa, nyanga, taugbe, togbeli, togwe, tolu-gbele, tolugbe, torugbe

Milletia laurentii De Wild. (for the Belgian botanist Émile Laurent, 1861–1904, explorer, plant collector)

Tropical Africa, Cameroon, Congo. Perennial non-climbing tree, shrub or liana, branches drooping, bark exudes red gum when cut, white-lavender to purple flowers borne in clusters on small stalks, fruits with tawny pubescence, honeybee plant

See *Belg. Colon.* 378. 1904, *Arch. Belges Med. Social.* 30: 314. 1972, *Contact Dermatitis* 1: 315–316. 1975, *J. Nat. Prod.* 56(12): 2126–2132. 1993, *J. Nat. Prod.* 57(7): 1022–1024. 1994, *Phytochemistry* 36(6): 1561–1562. 1994, *Phytochemistry* 51(6): 829–832. 1999, *Fitoterapia* 78(3): 276–277. 2007

(Irritant, splinters cause persistent inflammation, mucocutaneous reactions and exposure to the sawdust can cause abdominal cramps. Bark decoction to treat liver complaints, epilepsy, smallpox, edema, skin diseases, sores and abscesses, diabetes, hernia, constipation, fever, rheumatism, and also for the treatment of intestinal parasites and colic in children; bark applied as an expectorant and emetic. Insecticide, vermifuge and arrow poison. Wood for fish poison.)

in English: grey ebony

in French: bois d'Ambam, bois de fer, bois noir, faux ébénier, palissandre du Congo, panga-panga, wenge, wengué

in Cameroon: awong, awoung, nsonso

in Central African Republic: lombaa, n'gondou, n'toko

in Congo: ehtali, mutoko, mutoto, n'toko, ngondou, ntoko, ontoko, wenge

in Equatorial Africa: kundu baenge

in Gabon: awong, awoung, otogo, son-so, wenge

in Mozambique: jambire, panga-panga

in Tanzania: mpanda, mpande

in Zaire: bokonge, bokonghe, dikela, kiboto, mboto, mbotu, mokonge, monkonge, mundambi, tshikalakala, wenge

Milletia leucantha Kurz (*Milletia leucantha* Vatke; *Milletia pendula* Baker)

Laos, Myanmar, Thailand. Perennial non-climbing small tree, woody climber or semi-shrubby, leaves drying white glaucous

See *Plantae Junghuhnianae* 2: 250. 1852, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 68. 1873, *Oesterreichische Botanische Zeitschrift* 29(7): 223. 1879, *Revisio Generum Plantarum* 1: 201. 1891 and *Flore du Cambodge du Laos et du Vietnam* 30: 112. 2001, *Chemical & Pharmaceutical Bulletin* 54(6): 915–917. 2006

(Leishmanicidal.)

in Burma: thinwin

Milletia nitida Benth. (*Milletia kueichouensis* Hu)

China.

See *London Journal of Botany* 1: 484. 1842, *Revisio Generum Plantarum* 1: 201. 1891 and *Acta Phytotaxonomica Sinica* 3(3): 356–357. 1955, *Leiden Botanical Series* 8: 83. 1984

(Stem anti-anemic, to enrich the blood and promote blood circulation.)

Milletia pachycarpa Benth. (*Milletia dunnii* Merr.; *Milletia fooningensis* Hu; *Milletia taiwaniana* (Hayata) Hayata; *Phaseolodes pachycarpum* (Benth.) Kuntze; *Phaseoloides pachycarpa* Kuntze; *Pongamia taiwaniana* Hayata; *Whitfordiodendron taiwanianum* (Hayata) Ohwi)

China, Himalaya. Perennial climbing tree, woody, pubescent branches, leaflets subcoriaceous, pink flowers on short peduncles

See Junghuhn, Franz Wilhelm (1809–1864), *Plantae Junghuhnianae*: enumeratio plantarum, quas, in insulis Java et Sumatra detexit Fr. Junghuhn. 2: 250. Lugduni-Batavorum [Leiden, The Netherlands], Parisiis, [1853?]-1857 [Confusion on dating of fascicles exists.], *FBI* 2: 106. 1876, *Revisio Generum Plantarum* 1: 201. 1891 and *Leaflets of Philippine Botany* 2: 743. 1910, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 3: 79–80. 1913, *Philippine Journal of Science* 13(3): 139–140. 1918, *Icones plantarum formosanarum nec non et contributiones ad floram formosanam*. 9: 22–23. 1920, *Journal of Japanese Botany* 12(9): 660. 1936, *Acta Phytotaxonomica Sinica* 3(3): 360–361. 1955, *Planta Medica* 72(5): 424–429. 2006 [Induction of apoptosis by isoflavonoids from the leaves of *Milletia taiwaniana* in human leukemia HL-60 cells.], *Journal of Chromatography*. A. 1178(1–2): 101–107. 2008

(Toxins. Bark and roots insecticide. Stem anti-anemic, blood purifier, to enrich the blood and promote blood circulation. Root infusion as a lotion for wounds, swellings and sprains; root paste used as antispasmodic. Pounded roots and stem bark applied to crops to kill and repel insects. Squeezed roots and pods, underground part and stem as fish poison.)

in China: hou guo ji xue teng, jixueteng

in India: bakal bih, bishloti, bokoabih, bokoabih, hapuling, ngamuyai, ru-teng, rulei, rupang, sulitong

in Japan: doku-fuji

in Nepal: kakushbish, kurkus

Milletia pallens Stapf

Guinea, Ivory Coast. Perennial non-climbing tree, shrub or small tree, spreading crown, white to purple flowers

See *The Known Plants of Liberia* 2: 593. 1906

(Branches as chewing sticks. Inner bark chewed to treat cough, pulmonary troubles.)

in Sierra Leone: bunde, garasina, katadane, katina, kitoi, kitwe, kolakare, megomapole, ngobo, sikayambe, tog

Milletia piscidia (Roxb.) Wight (*Galedupa piscidia* Roxb.; *Milletia piscida* (Roxb.) Wight; *Milletia piscidia* Wight & Arn.; *Phaseolodes piscidia* (Wight & Arn.) Kuntze; *Phaseoloides piscidia* Kuntze)

India, Himalaya. Perennial non-climbing tree

See *Hortus Bengalensis*, or a catalogue ... 53. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 240. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 263. 1834, *Revisio Generum Plantarum* 1: 201. 1891

(Toxins. Fruits as fish poison.)

in India: bokoa bih, bokol bih, dieng-sohkynthem, kharew, r-uteng, ruteng

Milletia puguensis J.B. Gillett

Tanzania. Perennial climbing shrub, woody climber, liana, stem strongly flattened, deep mauve to pale pinkish purple flowers in racemes

See *Kew Bulletin* 15(1): 19–40. 1961, *Planta Med.* 72(14): 1341–1343. 2006

(Anti-leishmanial, antiprotozoal and cytotoxic activities from the roots.)

in Tanzania: mkulubuku

Milletia rhodantha Baill. (*Phaseolodes rhodanthum* (Baill.) Kuntze; *Phaseoloides rhodanthum* Kuntze)

Ghana, Guinea, Ivory Coast, Sierra Leone. Perennial non-climbing tree, small tree, bark with reddish exudate, pale purple sweet-scented flowers, inflorescence a false raceme

See *Adansonia* 6: 223. 1866, *Revisio Generum Plantarum* 1: 202. 1891

(Bark chewed to treat cough. A root decoction taken against stomachache.)

in Nigeria: nzachi (Igbo)

in Sierra Leone: torlu gbélé

Milletia richardiana (Baill.) Du Puy & Labat (*Millettia baroni* Drake; *Millettia lenneoides* Vatke; *Millettia nathaliae* Du Puy & Labat; *Mundulea hysteraantha* Baker; *Mundulea richardiana* Baill.; *Neodunnia atrocyanea* R. Vig.; *Neodunnia edentata* R. Vig.; *Pongamiopsis amygdalina* (Baill.) R. Vig.)

Madagascar. Perennial non-climbing tree, shrub or small tree, pink-purple flowers, fruits with rusty indument

See *Linnaea* 43: 335–336. 1882, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 389–390, 396. 1883, *Journal of the Linnean Society, Botany* 25: 309–310. 1889 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 141. 1902[1903], *Notulae Systematicae*. Herbarium du Museum de Paris 14(1): 72–74. 1950, *Novon* 5(2): 171–182. 1995

(Emetic, laxative.)

in Madagascar: harandrato, hazovola, lovanjafy, magnary, manariboraka, manary, marary, mararybotry, mararytoloha, mararyvoroka, mendoravina, taintsidambo, taintsindambo, tankindambo, tsimahamasabary

Milletia sanagana Harms (*Millettia richardiana* (Baill.) Du Puy & Labat)

Guinea, Liberia, Sierra Leone. Perennial non-climbing tree, small tree or shrub, white-lilac to dark purple flowers, leaves eaten by gorillas

See *Bulletin Mensuel de la Société Linnéenne de Paris* 1(49): 389–390. 1883, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 288. 1899 and *Novon* 5(2): 179. 1995

(Analgesic, diuretic, febrifuge, laxative, hypotensive activities, for blood disorders, swellings, edema, menstrual cycle, and also for the treatment of intestinal parasites and colics in children.)

in Central African Republic: molopo

in Ivory Coast: féfé kola

in Sierra Leone: ekaban, fabanjui, ka-théréf, ngaonga, ngola, togbe, togwambe, tokboi

Milletia sericea Wight & Arn. (*Dalbergia angustifolia* Hassk.; *Millettia argentea* Miq.; *Millettia sericea* Benth.; *Millettia sericea* (Vent.) Wight & Arn. ex Benth.; *Millettia sericea* (Vent.) Wight & Arn.; *Millettia sericea* Wight & Arn. var. *malaccensis* Prain; *Millettia turgida* Miq.; *Millettia zollingeri* Miq.; *Millettia zollingeriana* Miq.; *Phaseolodes sericeum* (Wight & Arn.) Kuntze; *Phaseoloides sericea* Kuntze; *Pongamia sericea* Vent.)

Sumatra, Vietnam, Malaysia. Perennial climbing shrub, liana, leaflets coriaceous, inflorescence an axillary or terminal pseudopanicule, corolla violet, pod very thick

See *Prodromus Florae Peninsulae Indiae Orientalis* 1: 263. 1834, *Flora* 25(2): Beibl. 53. 1842, *Flora van Nederlandsch Indië* 1(1): 156. 1855, *Fl. Ned. Ind., Eerste Bijv.* 2: 300. 1861, *Revisio Generum Plantarum* 1: 201–202. 1891 and *J. Linn. Soc. (Bot.)* 41: 123–243. 1912, *Blumea* 39: 1–40. 1994, *Novon* 9(3): 289–291. 1999, *Blumea* 45: 403–425. 2000

(Febrifuge, vermifuge. Root infusion taken as a postpartum remedy. Leaves for poulticing sore eyes, ophthalmia; leaves decoction drunk for fever, urinary disorders. Veterinary medicine, the roots juice employed to cleanse infected wounds in horses and cattle. Pounded roots a fish poison.)

in Indonesia: akar tuba, bori akar, tuwa laleur

Malay names: akar mumbal, jemerah, lemak pahit, mambul, sekebah

in Thailand: cha-nai-kho, no-roh, paa-tuu

in Vietnam: th[af]n m[as]t l[oo]ng t[ow]

Millettia speciosa Champ. (*Millettia speciosa* Champ. ex Benth.; *Millettia speciosa* Welw.)

China.

See *Hooker's Journal of Botany and Kew Garden Miscellany* 4: 73–74. 1852, *Apontamentos Phytogeographicos* 585. n. 23. 1858, *Revisio Generum Plantarum* 1: 201. 1891 and *Blumea* 39(1–2): 32. 1994

(Stem anti-anemic, to enrich the blood and promote blood circulation.)

Milletia stuhlmannii Taubert

Mozambique, Tanzania, Zimbabwe. Perennial non-climbing tree, spreading crown, flowers purple and cream, rigid heavy pendulous rough pale brown pods, dark brown seeds with small aril at base

See *Die Pflanzenwelt Ost-Afrikas* C: 212. 1895 and *Ann. Allergy*. 7: 492. 1949, *Contact Dermatitis* 1: 315–316. 1975, *Naturwissenschaften* 71(5): 247–251. 1984

(A cause of dermatitis and asthma. Root decoction drunk to treat stomachache, schistosomiasis.)

in English: panga panga, partridge wood

in Mozambique: jambire, panga panga

in Southern Africa: muSara, muSaru, panga panga

in S. Rhodesia: muSaru

in Tanzania: mpande, mpangapanga

Milletia thonningii (Schum. & Thonn.) Baker (*Phaseolodes thonningii* (Baker) Kuntze; *Phaseoloides thonningii* Kuntze; *Robinia thonningii* Schumach. & Thonn.; *Robinia thonningii* Schum.)

Ghana. Perennial non-climbing tree, shrub

See *Beskrivelse af Guineiske planter* 349. 1827, *Flora of Tropical Africa* 2: 128. 1871, *Revisio Generum Plantarum* 1: 202. 1891 and *Phytochemistry* 21:1763–1765. 1982, *Planta Medica* 46: 195–209. 1982, *Phytochemistry* 22: 1001–1003. 1983, *Transactions of the Royal Society of Tropical Medicine and Hygiene* 80(3): 451–453. 1986, *Phytotherapy Research* 3: 112–114. 1989, *International Journal of Environmental Studies* 203: 505–509. 1989, *Parasitology* 109: 559–563. 1994, *Journal of Parasitology* 81: 833–835. 1995, *Phytotherapy Research* 9: 401–404. 1995, *Journal of Ethnopharmacology* 47(1): 49–54. 1995, *Parasitology Today* 12: 156–159. 1996, *Transactions of the Royal Society of Tropical Medicine and Hygiene* 90: 596–600. 1996, *Journal of Helminthology* 75: 259–265. 2001, *The Journal of Parasitology* 88(1): 163–170. 2002

(Bark laxative; root bark for blood disorders, menstrual cycle, vermifuge. Leaves astringent, for diarrhea, dysentery. Leaves and roots for bronchitis, mouth infections and ulcers. Seeds were shown to possess molluscicidal, schistosomicidal, larvicidal and cercaricidal activities, used as an anthelmintic and as a purgative agent, as a topical antischistosomal agent. Fish toxicity of the seeds.)

in Ghana: a-tite, hutso, ntsentsento, okuro-sante, osante, osantew, osantewa, pem, santew, taatso, tatso, teteku

in Nigeria: abe werewere ori ito, agbawi kowee, asunlera, ito, itoo, olukotun eye igbo, turburku

Milletia tsui F.P. Metcalf (*Callerya tsui* (F.P. Metcalf) Z. Wei & Pedley)

China. Perennial climbing shrub, liana, corolla pale yellow flushed with red or lilac

See *Lingnan Science Journal* 19(4): 554–556, f. 5. 1940

(Stem and root emetic.)

in China: hui guo ya dou teng

Milletia usaramensis Taub. subsp. *usaramensis*

Keny, Mozambique, Tanzania. Perennial non-climbing tree

See *Phytochemistry* 47: 951–955. 1998, *Phytochemistry* 64: 773–779. 2003

(Seeds and stem bark larvicidal, anti-plasmodial. Fish poison.)

Milletia versicolor Welw. ex Baker (*Isoberlinia schefleri* (Harms ex Engl.) Greenway; *Lonchocarpus dewevrei* Micheli; *Milletia versicolor* Baker; *Milletia versicolor* Welw.; *Phaseolodes versicolor* (Welw.) Kuntze; *Phaseoloides versicolor* (Welw. ex Baker) Kuntze; *Phaseoloides versicolor* Kuntze)

Tropical Africa. Perennial non-climbing tree, shrub or small tree, pale purple petals with a yellow spot, inflorescence a terminal panicle, flat pod explosively dehiscent

See *Prodromus Florae Peninsulae Indiae Orientalis* 263. 1834, *Flora of Tropical Africa* [Oliver et al.] 2: 129. 1871, *Revisio Generum Plantarum* 1: 201–202. 1891 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 3: 84. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 168. 1902, *Contributions from the Gray Herbarium of Harvard University* 59: 21. 1919, *Bulletin of Miscellaneous Information Kew* 1937(8): 416. 1937, *Bull. (Stem bark decoction antiinflammatory, anthelmintic, anti-parasitic, analgesic, anti-nociceptive, antiplasmodial, employed for intestinal parasites, kidney pains, cough, female sterility, senile impotence of men; infusion used to rub syphilitic wounds. Leaves decoction taken against feverish rheumatism, malaria, headache, kidney pains, intestinal parasites and cough, also used in bath against syphilis. Root decoction to treat kidney complaints, cough, sterility and impotence. Root, leaf and bark decoctions taken in small amounts against intestinal worms. Veterinary medicine, anthelmintic, ruminants with worms treated with root decoctions. Magic, ritual, against bewitchment.)

in French: bois d'or

in Angola: bobata

in Central African Republic: molopo

in Congo: bobota, boboto, bosoko, bota, hoto, luboka, lubota, luboto, mbota, mumboto, mumpena, ombolo, omboro

in Gabon: angwang-ngwang, édjondjo, kalanga, kananga, mbang-mbagwè, mboro, mbota, mumbogo, ndabomana-batolyè, nkalanga, osani wi ntsyé, upopa-mwa-ngwèya, vimbanbang

in Mozambique: musumba, muzumba

Millettia zechiana Harms (*Millettia stapfiana* Dunn)

Tropical Africa. Perennial non-climbing tree, woody vine, small tree or shrub, corolla purple-white with brown pubescence

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 36. 1907, *Phytochemistry* 29(6): 2043–2044. 1990, *Journal of Ethnopharmacology* 98(3): 281–285. 2005

(Antiplasmodial. Used for the treatment of bronchial and rhinopharyngeal ailments.)

in Guinea: potuman

in Nigeria: katep oshie

in Sierra Leone: heigbahama, heilegbame, ka-lin, katadane, katindane, nyanga, ra-sa, sikpayamba, taugbe, tolugbele

Millingtonia L.f. Bignoniaceae

Named to honor Sir Thomas Millington, 1628–1704 (London), 1659 M.D. Oxon, the discoverer of sexuality in plants, physician to William and Mary and to Queen Anne, in 1675 professor of natural philosophy at Oxford, in 1680 knighted. See *The Report of the Physicians and Surgeons, commanded to assist at the dissecting the body of his late Majesty (William III) at Kensington*. From the original delivered to the Right Honorable the Privy Council. [The report drawn up by Sir T. Millington, Sir Richard Blackmore and Sir Edward Hannes.] 1702, *Supplementum Plantarum* 45. 1782, R. Pulteney, *Historical and biographical sketches of the progress of botany in England*. 1: 336–337. London 1790, Robert John Thornton (1768?–1837), *New illustration of the Sexual System of C. von Linnaeus*. London [1799–] 1807, William Munk, *The roll of the Royal College of Physicians of London*. London 1878.

Millingtonia hortensis L.f. (*Millingtonia dubiosa* Span.)

China. Tree, white fragrant flowers

See *Supplementum Plantarum* 291. 1782

(Leaves crushed and used on skin diseases. Roots boiled and liquid drunk to treat malaria. Extract of stem bark to cure typhoid.)

in English: cork-tree, Indian cork-tree

in China: lao ya yan tong hua

in India: aydu

Milnea Roxb. Meliaceae

Named for the British (b. Aberdeen) clergyman Rev. Colin Milne, c. 1743–1815 (d. Kent), botanist and botanical collector, Rector of North Chapel, translated Linnaeus from the Latin; see John H. Barnhart, *Biographical Notes upon Botanists*. 2: 493. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 268. 1972.

Milnea roxburghiana Wight & Arn. (*Aglaia abbreviata* C.Y. Wu; *Aglaia elaeagnoidea* (A. Juss.) Benth.; *Aglaia elaeagnoidea* var. *formosana* Hayata; *Aglaia elaeagnoidea* var. *pallens* Merr.; *Aglaia formosana* (Hayata) Hayata; *Aglaia roxburghiana* (Wight & Arn.) Miq.; *Milnea roxburghiana* Wight & Arn.; *Nemeda elaeagnoidea* A. Juss.)

Cambodia, India, Indonesia, China. Tree, white latex, see also *Aglaia elaeagnoidea*

See *Flora Cochinchinensis* 173. 1790, *Flora Indica*; or descriptions of Indian Plants 2: 430. 1824, *Bulletin des sciences naturelles et de géologie* 23: 239. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 119. 1834, *Annales Museum Botanicum Lugduno-Batavi* 4: 41. 1868 and *Enum. Pl. Formosana* 78. 1906, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 52. 1913, *Journal of Ethnopharmacology* 36: 163–174. 1992, *Journal of Ethnopharmacology* 67(1): 45–51. 1999

(Used in Ayurveda and Sidha. Antiinflammatory, antifeedant, antifungal, used to treat *ciguatera* fish poisoning.)

in China: shan luo

in India: aevaadu, cempuli, cheeralam, chokkala, chokla, cokkalai, erranduga, gadagayya, gandhapriyangu, kalla bendaka, kannikkompu, kempu nola, kondanduga, kunrapalam, nyalei, phalini, priyangu, priyangu beej, priyanguh, punniyava, punyava, shempuli, syama, thottilu, tottilakayi, visvak-senakanta, yarra aduga, yerra adugu, yerraaduga

Mimosa L. Fabaceae (Leguminosae, Mimosaceae, Mimoseae)

Latin *mimus*, *mimum* ‘a mime, actor’, Greek *mimos* ‘a mimic, mime, imitator’, *mimeomai* ‘to mimic, imitate’; see Carl Linnaeus, *Species Plantarum*. 1: 516–523. 1753, *Genera Plantarum*. Ed. 5. 233. 1754, *A Voyage to Terra Australis* 2: 551. 1814 and *Bulletin de la Société Linnéenne de Normandie* sér. 7, 3: 325–356. 1921, *N. Amer. Fl.* 23(3): 137–194. 1928, *Darwiniana* 8(1): 9–231. 1948, *Mem. New York Bot. Gard.* 25(1): 1–152. 1973, S. Battaglia, *Grande dizionario della lingua italiana*. X: 418–419. (Antiinflammatory.)

in China: gou suan jiang, nan hong teng

Mimusops L. Sapotaceae

Greek *mimo*, *mimus* 'an ape, a mimic' and *opsis* 'resembling, aspect', *ops* 'eye, face', the corolla and the shape of flowers resemble the face of a monkey; Latin *mimus*, *i* 'a mimic actor'; see Carl Linnaeus, *Species Plantarum*. 1: 349. 1753, *Genera Plantarum*. Ed. 5. 165. 1754, *Familles des Plantes* 2: 166, 574. 1763, *Genera Plantarum* 152. 1789, *Plants of the Coast of Coromandel* 1: 16, pl. 15. 1795, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 202–203, 205. 1844, *Flora Brasiliensis* 7: 42. 1863, *Journal of Botany, British and Foreign* 16: 145. 1878, *Journal of Botany, British and Foreign* 17: 358. 1879, *Bulletin Mensuel de la Société Linnéenne de Paris* 2(115): 916. 1891, *Histoire des Plantes* 11: 269. 1891, *Die Natürlichen Pflanzenfamilien* 4(1): 142. 1891 and *Symbolae Antillarum* 5: 162, 174. 1904, *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 8: 55, 82. 1914, *Adansonia: recueil périodique d'observations botanique*, n.s. 3: 22. 1963.

Mimusops andongensis Hiern (*Mimusops warnecke* Engl.)

Tropical Africa. Tree or shrub, white sticky sap, fragrant flowers

See *Cat. Afr. Pl.* (Hiern) 1: 646, 649. 1898 and *Monogr. Afrik. Pflanzen-Fam.* 8: 68. 1904

(Latex to treat malaria.)

in Cameroon: mbomboli

Mimusops elengi L. (*Kaukenia elengi* (L.) Kuntze; *Mimusops elengi* Bojer; *Mimusops elengi* Sieber ex A. DC.; *Mimusops elengi* Wight)

Thailand. Tree, round spreading leafy crown, coriaceous elliptic leaves, whitish yellow fragrant star-shaped flowers, circle of petals with adhering staminodes, ovoid fruit orange-reddish, hard seed dark brown, ripe fruits eaten

See *Species Plantarum* 1: 349. 1753, *Hortus Mauritianus* 198. 1837, *Prodr.* (DC.) 8: 201, 207. 1844, *Revisio Generum Plantarum* 2: 406. 1891 and *Ann. Missouri Bot. Gard.* 68(1): 172–203. 1981

(Used in Ayurveda. Leaves cardiotoxic, antipyretic, astringent, used for sore throat, skin complaints, headache, ulceration of the nose, sore eyes and muscular pain, snakebite; leaf paste mixed with sugar taken against blood dysentery; sap from bark of *Baccaurea motleyana* treats sore eyes, sometimes used with leaves of *Mimusops elengi*. Flowers for wounds and ulcers; dried powder as a snuff to relieve headache; flowers and bark for fevers and diarrhea. Bark decoction astringent for diarrhea, also as a mouthwash to cure toothache, tooth decay, bleeding from the gum; a decoction of the bark of *Premna bengalensis*, *Mimusops elengi* and *Terminalia arjuna* applied in paralysis; bark powder mixed with sugar applied on jaw in toothache, also taken with milk to cure leucorrhea; juice of stem bark and fruit given in dental caries. Pulp of ripe fruits astringent, used in dysentery and diarrhea, also prescribed to increase conceiving ability of women. Seeds pounded and given in dysentery and constipation in children. Magic-religious beliefs, tribal hang a seed in black thread on the arm of children for keeping evil eyes away. Ceremonial, flowers used in marriage ceremony; ingredient of *Patra pooja* in different religious *pooja* ceremonies. Fragrant flowers used to worship God Shiva.)

in English: bullet wood, medlar, Spanish cherry, tanjong tree

in India: bakoli, bakool, bakul, bakula, bakulah, baukal-araung, baula, blok-chip-rip, bokul, bolasiri, elanni, elengi, ilanni, maulsari, morsali, pogadachettu

in Indonesia: tandjung

in Malaysia: bunga tanjong, mengkula, mengkulah, mengkulang, pekola batu, pokok tanjong, tanjong

in Nepal: bhalsari

in Thailand: phi-kun

Mimusops kummel Bruce ex A. DC. (*Binectaria fragrans* (Baker) Kuntze; *Binectaria fragrans* Kuntze; *Imbricaria fragrans* Baker; *Kaukenia kummel* (Bruce ex A. DC.) Kuntze; *Kaukenia kummel* Kuntze; *Mimusops djurensis* Engl.; *Mimusops fragrans* (Baker) Engl.; *Mimusops fragrans* Engl.; *Mimusops kerstingii* Engl.; *Mimusops kilimandscharica* Engl.; *Mimusops langenburgiana* Engl.; *Mimusops longipes* Baker; *Mimusops pohlii* Engl.; *Mimusops stenosepala* Chiov.)

Tropical Africa, Tanzania, Uganda. An evergreen tree, shrub, cream-white fragrant flowers, pointed drupe orange-yellow, red-brown seed, sweet fleshy ripe fruit pulp eaten raw, the

plant exudes a white latex when bruised, in riverine forest, beside streams, wooded grassland, rocky hills

See *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 203. 1844, *Nat. Pflanzenfam.* [Engler & Prantl] iv. I. (1891) 152. 1891, *Revisio Generum Plantarum* 2: 406. 1891, *Bull. Misc. Inform. Kew* 1895: 149. 1895 and *Monogr. Afrik. Pflanzen-Fam.* 8: 68, 70, 75–76, 78. 1904, *Atti Reale Accad. Italia, Mem. Cl. Sci. Fis. (Pl. Nov. Aethiop.)* 11: 47. 1940

(Bark used for anemia, asthma and malaria; inner bark used for a tea.)

in Kenya: chemalokutan, mugumo-ciano, nyabondo, olkirenyi, pusyoon

in Nigeria: emido (Yoruba)

in Tanzania: ghana, hiiti, mgama, mgambo, mlonje, mugama, olkirenyi

Mimusops parvifolia R. Br. (*Mimusops elengi* var. *parvifolia* (R. Br.) H.J. Lam.; *Mimusops parvifolia* (Nutt.) Radlk. ex Britton; *Mimusops parvifolia* (Nutt.) Radlk., nom. illeg.; *Mimusops parvifolia* Kurz, nom. illeg.)

Philippines.

See *Prodromus Florae Novae Hollandiae* 531. 1810, *Forest Flora of British Burma* 2: 124. 1877, *Sitzungsber. Math.-Phys. Cl. Königl. Bayer. Akad. Wiss. München* 12(3): 344. 1882 [Dec 1881] and *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 7: 235. 1925

(Bark and unripe fruit astringent, used for ulcers, wounds, gonorrhoea.)

in Philippines: bansalagin

Minquartia Aublet Olacaceae

A native name for *Minquartia guianensis* Aublet, this tree is called *minquer* by the Creoles, see *Genera Plantarum* 1: 345. 1862, *Prodr.* (DC.) 15(2.2): 227–228. 1866, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 16(3): 313. 1886, *Journal de Botanique* (Morot) 13: 77–78. 1899 and *Fieldiana, Bot.*, n.s. 13: 14–27. 1983, *Fl. Ecuador* 69: 59–103. 2002, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 814–823. 2007.

Minquartia guianensis Aublet (*Eganthus poeppigii* Tiegh.; *Endusa punctata* Radlk.; *Minquartia macrophylla* Ducke; *Minquartia parvifolia* A.C. Sm.; *Minquartia punctata* (Radlk.) Sleumer; *Secretania loranthacea* Müll.Arg.)

French Guiana, South America.

See *Histoire des plantes de la Guiane Française* 2(Suppl.): 4–6, t. 370. 1775, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 15(2.2): 228. 1866, *Sitzungsberichte der Mathematisch-Physikalischen Classe (Klasse) der K. B. Akademie der Wissenschaften zu München* 16(3): 313. 1886,

Journal de Botanique (Morot) 13: 77–78. 1899 and *Arquivos do Instituto de Biologia Vegetal* 2(1): 33. 1935, *Brittonia* 2(2): 149–150. 1936, *Repertorium Specierum Novarum Regni Vegetabilis* 39(10–25): 282. 1936

(Bark infusion to treat stomachache.)

in English: Brazilian sandalwood

in Bolivia: caricuara amarilla, iscocharasi

in Ecuador: wambulla cara, wambulla ruyu

Minthostachys (Benth.) Spach

Lamiaceae (Labiatae)

From the Greek *minthe* ‘mentha’ and *stachys* ‘spike’, see *Histoire Naturelle des Végétaux* 9: 164. 1840.

Minthostachys mollis (Kunth) Griseb. (*Bystropogon mollis* Kunth; *Mentha mollis* Benth.; *Minthostachys mollis* (Benth.) Griseb.)

Colombia, Venezuela. Shrub, aromatic, pubescent, small ovate leaves, small white flowers, dense axillary inflorescence

See *Sertum Anglicum* 12. 1789, *Nova Genera et Species Plantarum* (quarto ed.) 2: 317. 1818, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 235. 1874

(Leaves infusion carminative, against colds; used externally as an hemostatic and for rheumatism. Mutagenic activity of essential oils.)

in Ecuador: guarimi poléo, poléo

in Peru: muña

Miquelia Meissner Icacinaceae

For the Dutch (b. in Germany) botanist Friedrich Anton Wilhelm Miquel, 1811–1871 (d. Utrecht), M.D. Groningen 1833, professor of botany, Director of the Rotterdam Botanical Garden, Director of the Amsterdam Botanical Garden, among his very numerous and valuable writings are “Species aliquot novae valdivianas, a Domino W. Lechler collectas.” *Linnaea*. 25: 650–654. 1853 and “Animadversiones in Piperaceas Herbarii Hookeriani.” *London J. Bot.* 4: 410–470. 1845. See A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845 and Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. London 1918, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, E.D. Merrill, *Bernice P. Bishop Mus. Bull.* 144: 136–137. 1937, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 495. 1965, F.A. Stafleu, in *Wentia*. 16: 1–95. 1966, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 268. 1972, Frans A.

Stafleu and Richard S. Cowan, *Taxonomic Literature*. 3: 508–520. 1981, Frans A. Stafleu, in *D.S.B.* 9: 417. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Miquelia caudata King

Penins. Mal.

See *Journ. As. Soc. Beng.* lxiv. II. 124. 1895

(Roots as arrow or dart poison.)

Malayan names: pisang-pisang bulu, s'lowung, selowang, seluang

Mirabilis L. Nyctaginaceae

Latin *mirabilis*, e 'wonderful', *miror, atus, sum, ari* 'to wonder'; see Carl Linnaeus, *Species Plantarum* 1: 177. 1753, *Genera Plantarum* Ed. 5. 82. 1754, *Species Plantarum*. Editio quarta [Willdenow] 1(1): 170, 185. 1797, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 429. 1849, *Report on the United States and Mexican Boundary ... Botany* 2(1): 173. 1859, Watson, Sereno (1826–1892), *Report of the geological exploration of the fortieth parallel: made by order of the Secretary of War according to Acts of Congress of March 2, 1867, and March 3, 1869, under the direction of A.A. Humphreys*. Vol. 5, *Botany*. Washington: Government Printing Office, 1871, *Die Natürlichen Pflanzenfamilien* [Engler & Prantl] 3(1b): 24. 1889, *Beiträge zur Systematik der Nyctaginaceen* 23. 1897 and *Field Mus. Nat. Mischochloa Blume Sapindaceae

Greek *mischos* 'a stalk, pedicel, leaf-stalk' and *karpos* 'fruit', referring to the long stalked fruit; see Karl Ludwig von Blume (1796–1862), *Bijdragen tot de flora van Nederlandsch Indië*. 238. Batavia 1825.

Mischochloa lessertianus Ridl.

Malaysia.

See *Fl. Malay. Penin.* i. 508. 1922

(Root decoction taken for cough.)

Malay name: kelat puteh

Mischochloa pentapetalus (Roxb.) Radlk. (*Mischochloa fuscensens* Blume; *Mischochloa productus* H.L. Li; *Schleichera pentapetala* Roxb.)

SE Asia. Lower canopy tree, very dense crown, fluted bole, grey pimpled bark, inner bark bright orange to brown, leaves pinnate, lower leaf surface whitish, leaflets lanceolate, flowers male and bisexual on the same tree, obovate fruit

See *Species Plantarum*. Editio quarta 4: 1096. 1806, *Bijdragen tot de flora van Nederlandsch Indië* 238. 1825, *Flora Indica*; or, descriptions of Indian Plants 2: 275–277. 1832, *Rumphia* 3: 169. 1847 and *Journal of the Arnold Arboretum* 25(3): 306–307. 1944

(For coughs.)

in Malaysia: sugi

Mischochloa sundaicus Blume

SE Asia, India. Small tree, small greenish flowers in axillary panicles

See *Bijdragen tot de flora van Nederlandsch Indië* 5: 238. 1825

(Roots decoction for coughs.)

in China: bing guo mu

Misopates Raf. Scrophulariaceae (Plantaginaceae)

Misopates, a classical Greek plant name used by Dioscorides; see Constantine Samuel Rafinesque, *Autikon botanikon*. *Icones plantarum select. nov. vel rariorum*, etc. 158. Philadelphia 1840 and *Fl. Ecuador* 21: 1–189. 1940, *Opera Bot.* 137: 1–42. 1999.

Misopates orontium (L.) Raf. (*Antirrhinum orontium* L.)

India.

See *Species Plantarum* 2: 617. 1753, *Autikon Botanikon* 158. 1840 and *J. Palynol.* 16: 85–105. 1980

(Leaves applied as poultice to wounds and ulcers.)

in English: corn snapdragon, lesser snapdragon, small snapdragon, weasel's snout

Mitchella L. Rubiaceae

Named for John Mitchell, 1711–1768, physician, botanist, M.D. Leyden 1719, 1748 Fellow of the Royal Society. See *Acta Physico-Medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum* 8: 222. 1748, *Species Plantarum* 1: 111. 1753, R. Pulteney, *Historical and biographical sketches of the progress of botany in England.* 2: 278–281. London 1790, *Syst. Nat.*: 885. 1792, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.* London 1796–1800, *Mant.* 3: 18, 350. 1827, William Darlington (1782–1863), *Reliquiae Baldwinianae.* Philadelphia 1843, A. Lasègue, *Musée botanique de Benjamin Delessert.* Paris 1845, W. Darlington, *Memorials of John Bartram and Humphry Marshall.* Philadelphia 1849, Provancher, L. (Léon) (1820–1892), *Flore Canadienne* 1: 291. Québec, J. Mitchella repens L. (*Disperma repens* J.F. Gmel.; *Mitchella repens* f. *leucocarpa* Bissell; *Mitchella repens* var. *alba* Beal; *Perdicesca repens* (L.) Prov.; *Perdicesea repens* (L.) Prov.)

North America, Guatemala. Perennial subshrub, trailing creeper, ground cover, herbaceous, shiny evergreen leaves, white fragrant tubular flowers in pairs, bright red berries eaten by birds, food

See *Species Plantarum* 1: 111. 1753, *Syst. Nat.*: 892. 1792, *Flore Canadienne* 1: 291. 1862, *Flora Miquelonensis* 21. Lyon, 1888 [Ernest Delamare, Ferdinand Renaud, Jules Cardot, *Flora Miquelonensis: Florule de L'Île Miquelon (Amérique Du Nord).* Énumération systématique avec notes descriptives des phanérogames cryptogames vasculaires,

mousses, sphaignes, hépatiques et lichens.] and *Rep. (Annual) Michigan Acad. Sci.* 10: 87. 1908, *Rhodora* 13: 32. 1911, *Huntia* 7: 215. 1987

(Abortifacient, analgesic, anticonvulsive, febrifuge, diaphoretic, postpartum remedy, lactagogue, astringent, antiseptic, cathartic, carminative, diuretic, emetic and antiemetic, stomachic, sedative, blood purifier, for menstrual disorders and pain, irregular and painful menses, pain during childbirth, sore nipples, leucorrhoea, venereal diseases, kidney troubles, bowel complaints, urinating pain, diarrhoea, dysentery, piles, swellings, rheumatism, arthritis, bleeding cuts, rashes. Veterinary medicine, given to pregnant domestic animals. Ceremonial, love medicine and charm.)

in English: partridge berry, partridgeberry, squaw-berry, squaw-vine

Mitella L. Saxifragaceae

Referring to the fruits, from the Greek *mitra* ‘bishop's head-dress, cap’, Latin *mitella*, *ae* the diminutive of *mitra*, *ae* ‘head-band, coif, a kind of turban’.

Mitella diphylla L. (*Mitella oppositifolia* Rydb.)

North America. Perennial herb

See *Species Plantarum* 1: 406. 1753 and *Syst. Bot.* 5: 17–29. 1980, *Regnum Veg.* 127: 67. 1993, *Int. Organ. Pl. Biosyst. Newslett.* (Zurich). 24: 19–20. 1995

(Decoction of whole plants emetic; plant infusion as drops for sore eyes. Magic, ceremonial, sacred, good luck charm, whole plant decoction to counteract bad luck.)

in English: cool-wort, miterwort, twoleaf miterwort

Mitella nuda L.

China, North America. Small perennial herb, erect, long slender rhizomes, small greenish yellow saucer-shaped inconspicuous flowers in few-flowered clusters-spikes at stem tips, shiny black seeds

See *Species Plantarum* 1: 406. 1753, *Taxon* 31(2): 344–360. 1982, *Systematic Botany* 13: 64–72. 1988, *Botaničeskij Žurnal (Moscow & Leningrad)* 74: 268–271. 1989

(Crushed leaf wrapped in a cloth and inserted in the ear for earaches.)

in English: bishop's-cap, naked miterwort

in China: suo na cao

Mitella trifida Graham (*Mitella trifida* var. *trifida*; *Mitellopsis trifida* (Graham) Meisn.; *Ozomelis trifida* (Graham) Rydb.)

North America. Perennial herb

See *Edinburgh New Philosophical Journal* 7: 185. 1829, *Repertorium Botanices Systematicae.* 2: 370. 1843 and *North American Flora* 22(2): 95. 1905, *Taxon* 29: 534–535. 1980

(Roots infusion for infants with colic.)

in English: threeparted miterwort

Mitracarpus Zucc. ex Schultes & Schultes f. Rubiaceae

From the Greek *mitra* 'a turban, bishop's head-dress, cap, mitra, headband, girdle' and *karpos* 'fruit', referring to the fruits, see *Field Mus. Nat. Hist., Bot. Ser.* 13(6/1): 3–261. 1936, *Fieldiana, Bot.* 24(11/1–3): 1–274. 1975, *Opera Botanica Belgica* 7: 249–260. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999, *Blumea* 51(2): 199–220. 2006, *Contr. U.S. Natl. Herb.* 55: 1–584. 2007.

Mitracarpus hirtus (L.) DC. (*Borreria ferruginea* M. Martens & Galeotti, nom. illeg.; *Borreria ferruginea* (A. St.-Hil.) DC.; *Borreria remotifolia* DC.; *Diodia villosa* Moc. & Sessé ex DC.; *Mitracarpus breviflorus* A. Gray; *Mitracarpus hirtus* var. *remotiflorus* K. Schum.; *Mitracarpus pilosus* A. Rich.; *Mitracarpus rudis* Benth.; *Mitracarpus scaber* Zucc. ex Schult. & Schult. f.; *Mitracarpus senegalensis* DC.; *Mitracarpus simplex* Rusby; *Mitracarpus torresianum* Cham. & Schtdl.; *Mitracarpus verticillatus* Vatke; *Mitracarpus verticillatus* (Schumach. & Thonn.) Vatke; *Mitracarpus villosus* (Sw.) DC.; *Mitracarpus villosus* (Sw.) Cham. & Schtdl.; *Mitracarpus villosus* var. *glabrior* Oerst.; *Spermacoce aspera* (M. Martens & Galeotti) Hemsl.; *Spermacoce cephalotes* Willd. ex Roem. & Schult.; *Spermacoce declinata* Pav. ex DC.; *Spermacoce ferruginea* A. Tropical America, Mexico. Annual herb, minute white flowers in dense axillary clusters

See *Species Plantarum*, Editio Secunda 1: 148. 1762, *Nova Genera et Species Plantarum seu Prodrromus* 29. 1788, *Beskr. Guin. Pl.*: 73. 1827, *Linnaea* 3(4): 360, 363. 1828, *Prodr.* 4: 544–545, 562, 572. 1830, *Hooker's J. Bot. Kew Gard. Misc.* 3: 238. 1841, *Vidensk. Meddel. Dansk Naturhist. Foren. Kjøbenhavn* 1852: 29. 1853, *Linnaea* 40: 196. 1876, *Fl. Bras.* 6(6): 85. 1888 and *Mem. New York Bot. Gard.* 7: 381. 1927

(Plant paste taken in bone fracture. Leaves decoction for hysteria, mental disorders, malaria, fevers, skin diseases; a poultice applied to skin diseases, leprosy, also used as enema as anti-fertility drug; crushed leaves rubbed on ringworm.)

in India: gathia gobi

in Nigeria: abor din

Mitragyna Korth. Rubiaceae

From the Greek *mitra* 'a turban, bishop's head-dress' and *gyne* 'a woman, female organ', referring to the stigma and to

the cap-shaped ovary, see *Observ. Naucleis Ind.* 19. 1839 and *Peking Natural History Bulletin* 16: 241. 1948, *Adansonia: recueil périodique d'observations botanique*, n.s. 15: 66. 1975, *Blumea* 24(1): 43–100. 1978, *Amer. J. Bot.* 89(7): 1027–1041. 2002, *Taxon* 56(1): 247–248. 2007.

Mitragyna inermis (Willd.) O. Kuntze (*Adina inermis* (Willd.) Roberty; *Cephalanthus africanus* Rchb. ex DC.; *Mitragyna africana* (Willd.) Korth., nom. illeg.; *Nauclea africana* Willd.; *Nauclea africana* var. *luzoniensis* DC.; *Nauclea inermis* (Willd.) Baill.; *Nauclea platanocarpa* Hook.f.; *Platanocarpum africanum* (Willd.) Hook.f.; *Stephegyne africana* (Willd.) Walp.; *Uncaria inermis* Willd.; *Uncaria valetioniana* Merr. & L.M. Perry)

W. Trop. Africa to Sudan. Shrub, branched at base, slender twigs, leaves papery, stipules bright red, white globose inflorescence with strong sweet scent, clavate stigma, fruits pale green aggregate drying black, many little capsules, small numerous seeds, branches used for roofing houses, wood used for spear shafts

See *Genera Plantarum* 1: 125. 1789, *Revisio Generum Plantarum* 1: 288. 1891 and *Journal of the Arnold Arboretum* 25(2): 190. 1944, *Boissiera* 55: 1–322. 1988, *Journal of Ethnopharmacology* 92: 233–244. 2004, *Journal of Ethnopharmacology* 97: 327–336. 2005, *Journal of Ethnopharmacology* 99: 273–279. 2005

(Febrifuge, the decoction of the leaves mixed with those of *Anogeissus leiocarpa*; oxytotic, febrifuge, antimalarial, the leaves decoction. Leaves and twigs for fever and malaria.)

in Benin: kabé, kauli, lèkpatin, nekpèti

in Togo: dikprigan, elin, leppati, lèti, linkpa, yéluwum

in West Africa: dion, dioun, kodioli, orerewa

Mitragyna parvifolia (Roxb.) Korth. (*Nauclea parvifolia* Roxb.; *Nauclea parvifolia* Willd., nom. illeg.; *Stephegyne parvifolia* (Roxb.) Korth.)

India, Myanmar. Trees, deciduous, grey bark, yellow flowers in globose terminal and axillary heads, oblong capsules, in dry deciduous forests

See *Pl. Coromandel* 1: 40. 1795, *Sp. Pl.* 1: 929. 1798, *Observ. Naocl. Indic.* 19. 1839

(Used in Ayurveda and Sidha. Leaf paste applied on wounds; pounded leaves with garlic for chronic cough; leaf juice poured into eyes as hepatic stimulant, hepatoprotective, to cure jaundice, for liver ailments. Pounded bark in water given for stomachache; powdered bark along with fruits of *Phyllanthus emblica* boiled in water and inhaled through mouth for toothache; bark paste and juice applied for muscular pains and dog bite. Pasted bark given to prevent conception, an oral contraceptive; bark extract with extract of barks of *Dalbergia lanceolaria*, *Ougeinia oojeinensis* and *Pterocarpus marsupium* given for menorrhagia. Veterinary medicine, stem bark extract applied on boils, given for babesiosis in cattle, a malaria-like parasitic disease, and also for filariasis/philariasis)

in India: appucam, arkkam, ayappiriyam, batta ganapu, batta ganupu, batta ganapu, battaganapu, battagenupu, battagenupu chettu, battuga, bettaganapa, bhunikadamba, botruga, botrugua, bottakadapa, bottakadimi, calacam-punatam, carppatestam, chinnakadambu, colakantam, culompucam, dhara kadamba, dhulikadamba, elukki, gulikadam, hedu, iccalam, iracakuru, kadaani, kadaani mara, kadaga, kadagada, kadagada mara, kadam, kadamba, kadamb, kadamba, kadambe, kadambi, kadambu, kadani, kadavaala, kadaval, kadavala, kaddam, kaem, kaim, kaimb, kaini, kalam, kalamb, kalan, kaliyani, kaliyanimaram, kallam, kalmi, kam, kambhri, kamgi, karamb, karmi, karpakkatampu, karpakkatampumaram, katampai, katampuni, kathambu, kayim, kodiyaal, kongu, kongu mara, kullum, marukkuvikkatampu, marukkuvikam, mattayam, moondi, mundi, naayi kadambe, naayikadamba, nalipam, namankarpam, natikatampu, nayekadambe, neer kadamba, neerukadimi, nerkadamba, nichulam, niculam, nikalam, nipam, nir-kadambai, nir kadambu, nirkadambai, nirkadambu, nirkkatampu, nirompal, niyoturri, pacha pasara, padera, pattaikkatampu, pattakkatampu, pavvirusiyam, peykkatampai, phaldu, pippiriyam, pirakirutita, pompal, poochakadambu, pulakadimi, putakampakam, putakkatampu, putpaciyaam, rosekadambu, rosu katampu, rudra ganapa, rudraksha-kamba, sannakadamba, sinnakkatampu, tarakatam, tarokam, venmai, vimpu, virattaippentampanni, viruntam, vitanah

Mitragyna speciosa (Korth.) Havil. (*Mitragyna speciosa* Korth.; *Nauclea korthalsii* Steud., nom. inval.; *Nauclea luzoniensis* Blanco; *Nauclea speciosa* (Korth.) Miq.; *Nauclea speciosa* Miq.; *Nauclea speciosa* Walp.; *Stephegyne speciosa* Korth.)

Thailand, New Guinea. Tree, bark greyish, leaves opposite simple entire, stipules lanceolate pubescent, globose inflorescence terminal on lateral branches, flowers bisexual 5-merous, corolla yellowish-white turning deep yellow funnel-shaped, anthers lanceolate cordate protruding from the corolla, fruit composed of 2 cocci, seeds shortly winged on 2 sides, in swamp and riverine forests, in open savanna and secondary forest

See *Nomencl. Bot.*, [Steudel], ed. 2, 2: 186. 1841, *Verh. Nat. Gesch. Ned. Bezitt., Bot.*: 160. 1842, *Fl. Filip.*, ed. 2: 102. 1845, *Fl. Ned. Ind.* 2: 140. 1856, *J. Linn. Soc., Bot.* 33: 69. 1897

(Leaves an opium substitute, can cause hallucinations, euphoria and psychosis. Local anaesthetic, antihypertensive, tonic, analgesic, stimulant, astringent, used for diabetes mellitus, diarrhea, dysentery and stomachache. Pounded leaves used to poultice wounds, or to expel worms from children. The leaves, heated with those of *Blumea balsamifera* (L.) DC., *Morinda citrifolia* L. and *Oroxylum indicum*, applied hot to an enlarged spleen.)

in Indonesia: kadamba, puri

in Malaysia: bia, biak, biak-biak, ketum, kotum, kutum

in Philippines: lugub, mambog, polapupot

in Thailand: bai krathom, ee-thaang, thom

in Vietnam: giam d[ef]p, giam l[as] nh[or]

Mitrasacme Labill. Loganiaceae

From the Greek *mitra* 'a mitre, bishop's head-dress' and *akme* 'the top, summit', referring to the floral tube; see Jacques Julien Houtton de Labillardière (1755–1834), *Novae Hollandiae plantarum specimen*. 1: 35, t. 49. Parisii 1804–1806 [1807] and *Fl. Australia* 28: 308. 1996.

Mitrasacme pygmaea R. Brown (*Androsace tonkinensis* Bonati; *Mitrasacme capillaris* Wallich; *Mitrasacme capillaris* Wall. ex Roxb.; *Mitrasacme chinensis* Grisebach; *Mitrasacme galiifolia* Masamune & Syozi; *Mitrasacme lutea* H. Léveillé; *Mitrasacme lutea* F. Muell.; *Mitrasacme malaccensis* Wight; *Mitrasacme pygmaea* var. *malaccensis* (Wight) H. Hara)

China, SE Asia.

See *Prodromus Florae Novae Hollandiae* 453. 1810, *Fl. Ind.*, ed. Carey & Wall. i. 420. 1820, *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 51. 1843, *Fragm. (Mueller)* 1(5): 133. 1859 and *Repert. Spec. Nov. Regni Veg.* 4: 331. 1907, *Acta Phytotax. Geobot.* xii. 202. 1950, *J. Jap. Bot.* 30: 24. 1955

(For boils.)

in English: dwarf mitrasacme, dwarf mitrewort

in China: shui tian bai

Mitrella Miq. Annonaceae

The diminutive of the Greek *mitra* ‘a mitre, cap’, possibly referring to the stigma, see *Annales Museum Botanicum Lugduno-Batavi* 2: 38. 1865–1866.

Mitrella kentii Miq. (*Mitrella kentii* (Blume) Miq.)

Borneo. Woody climber

See *Annales Museum Botanicum Lugduno-Batavi* 2: 39. 1865–1866

(Fresh roots chewed and the juice swallowed as an antidote to snake, scorpion and centipede bites, for the same purpose cover the wounds with chewed roots. Ash from the burned stem applied on the male organ as a remedy for gonorrhoea. Magic, stem tied into a big ring, place it on the ground and step inside to hide from evil spirits.)

in Sarawak: akar rarak

Mnesithea Kunth Poaceae (Gramineae)

Possibly named after Mnesitheus Atheniensis medicus (IV a.C.), see Bertier, J., *Mnésithée et Dieuchès*, Leiden 1972, he was a doctor and herbalist from Athens; according to other authors the generic name from the Greek *mnesis* ‘memory, remembrance’, *mnemon* ‘mindful, remembering’, *mnao-mai* ‘to think on, to remember’, referring to an aspect of another genus; type *Mnesithea laevis* (Retz.) Kunth, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Révision des Graminées* 1: 153–154. 1829, *Rel. Haenk.* 1: 329. 1830, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Mémoires de la Société d’Agriculture, Sciences et Arts d’Angers* 1: 180, t. 9, f. 3. 1831, *Révision des Graminées* 2: 487, t. 158. 1831, *A Natural System of Botany* ed. 2: 379. 1836, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Revisio Generum Plantarum* 2: 776. 1891 and *United States Department of Agriculture: Bulletin* 772: 278. 1920, *Hooker’s Icones Plantarum* 36: t. 3548. 1956, *Blumea* 31: 281–307. 1986, *Austrobaileya* 3(1): 79–99. 1989, T.J. Killeen, “The grasses of Chiquitania, Santa Cruz, Bolivia.” *Annals of the Missouri Botanical Garden* 77(1): 125–201. 1990, *Flora of the Guianas. (Plant infusion for tonsillitis or sore throat.)

in English: bristly mallow, Carolina bristlemallow, Carolina mallow, red flowered mallow

Moghania J. St.-Hil. Fabaceae (Leguminosae, Phaseoleae)

Orthographic variant of *Maughania* J. St.-Hil., probably in honor of the Scottish botanist Robert Maughan, 1769–1844, in 1809 a Fellow of the Linnean Society, father of the botanist Edward James (1790–1868); some suggested a

Latinized form of an Indian name, see *J. Bot. Agric.* 1: 61. 1813, *Nouv. Bull. Sci. Soc. Philom. Paris* 3(63): 193. Dec 1812, *Nouv. Bull. Sci. Soc. Philom. Paris* 3(64): 216. 1813 [Jan 1813].

Moghania nana (Roxb. ex Aiton) Mukerjee (*Flemingia macrophylla* var. *nana* (Roxb. ex Aiton) M.R. Almeida; *Flemingia nana* Roxb. ex Aiton; *Maughania nana* Roxb.; *Maughania nana* (Roxb.) Mukerjee; *Maughania nana* Mukerjee)

India. Perennial non-climbing shrub, see also *Flemingia nana*

See *Hortus Kewensis*; or, a catalogue ... The second edition 4: 349–350. 1812, *Bull. Sci. Soc. Philom. Paris* sér. 2. 3: 216. 1813 and *Bull. Bot. Soc. Beng.* 6(1): 20. 1952, *Flora of Maharashtra State* 2: 77. 1998

(Antibacterial.)

Moehringia L. Caryophyllaceae

Named for the German botanist Paul Heinrich Gerhard (Paulus Henricus Gerardus) Möhring (Moehring), 1710–1792, physician, ornithologist, he is best known for *Avium Genera. Auricae* [Aurich] 1752, *Geslachten der Vogelen*. Amsterdam 1758, *Historiae Medicinales junctis fere ubique corollariis, praxin medicam illustrantibus*. Amstelodami 1739 and *Catalogus Bibliothecae Moehringianae historiae praeprimis naturali atque arti medicae inservientis*. Jeverae 1794. See *Species Plantarum* 1: 359. 1753, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796–1800, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 587. 1852 and J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 500. 1965.

Moehringia lateriflora (L.) Fenzl (*Arenaria lateriflora* L.; *Arenaria lateriflora* var. *angustifolia* (Regel) H. St. John; *Arenaria lateriflora* var. *angustifolia* H. St. John; *Arenaria lateriflora* var. *tayloriae* H. St. John; *Arenaria lateriflora* var. *tenuicaulis* Blank.)

SW Asia, Europe, China. Perennial, low-growing herb having clusters of small white flowers, ascending or decumbent

See *Species Plantarum* 1: 423. 1753, *Versuch einer Darstellung der Geographischen Verbreitungs- and Vertheilungs-Verhältnisse der Natürlichen Familie der Alsineen* 18, 38. 1833 and *Science Studies, Montana College of Agriculture and Mechanical Arts, Botany* 1(2): 51. 1905, *Rhodora* 19: 262. 1917, *Nordic J. Bot.* 14: 156. 1994

(Essence promoting bonding between the mother and child during pregnancy.)

in English: Bering Sea mouse-ear chickweed, bluntleaf sandwort, bluntleaved sandwort, grove sandwort, sandwort

in China: zhong fu cao

Molineria Colla Hypoxidaceae (Amaryllidaceae, Liliaceae)

After the Italian botanist Ignazio Bernardo Molineri, 1741–1818. See Luigi (Aloysius) Colla (1766–1848), *Illustrationes et icones rariorum Stirpium* quae in ejus horto Ripulis florebant, Anno 1824 (–1928), addita ad *Hortum Ripulensem*. Append. [Turin 1827–1831], *Genera Plantarum* 3: 718. 1883 and O. Mattiolo, *Cronistoria dell'Orto Botanico della Regia Università di Torino*. in *Studi sulla vegetazione nel Piemonte* pubblicati a ricordo del II Centenario della fondazione dell'Orto Botanico della R. Università di Torino. Torino 1929.

Molineria capitulata (Lour.) Herb. (*Curculigo capitulata* (Lour.) Kuntze; *Curculigo capitulata* Kuntze; *Curculigo fuziwarae* Yamam.; *Curculigo glabra* Merr.; *Curculigo recurvata* Dryand.; *Curculigo recurvata* W.T. Aiton; *Curculigo strobiliformis* D. Fang & D.H. Qin; *Leucojum capitulatum* Lour.; *Molineria hortensis* Britton; *Molineria plicata* Colla; *Molineria recurvata* (Dryand.) Herb.; *Molineria sulcata* Kurz; *Tupistra esquirolii* H. Lév. & Vaniot; *Veratrum mairei* H. Lév.)

Trop. & Subtrop. Asia. Herb, sweet fruits

See *Species Plantarum* 1: 289. 1753, *Flora Cochinchinensis* 1: 199. 1790, *Hortus Kewensis*; or, a catalogue ... The second edition 2: 253. 1811, *Amaryllidaceae*: 84. 1837, *Revisio Generum Plantarum* 2: 703. 1891 and *Economic Botany* 47(4): 345–357. 1993, *Guihaia* 16: 3. 1996

(Tuber/rhizome for eye diseases, outer skin peeled and soaked in water; tubers pounded up and applied to cuts, wounds, on diseases of vagina; latex from rhizome hemostatic; dried rhizome chewed for gastroenteritis and stomach problems; rhizome paste applied on skin for venereal diseases; juice of crushed rhizome applied for eye diseases, and also taken for stomachache; for dysentery and diarrhea, fresh leaves and tuber ground to paste taken orally mixed with urine of a heifer. Tender leaves and twigs of *Mucuna monosperma* and *Curculigo capitulata* rhizome made into a paste and mixed with tobacco ash, this paste used to check external hemorrhage in cuts.)

in Bangladesh: wa leng, wailfa

in India: doiyak, kor, koritong, phai-phek, phaiphek, rekosi, sage, togojuni, yakpheshak

Molineria crassifolia Baker (*Curculigo crassifolia* (Baker) Hook. f.)

India, Nepal.

See *Journal of the Linnean Society, Botany* 17(99): 121. 1878, *The Flora of British India* 6(18): 279. 1892 and *Cytologia* 45: 663–673. 1980

(Juice from crushed root stock and immature stem applied on deep cuts and wounds.)

in China: rong ye xian mao

in India: phai-phak

Molineria latifolia (Dryand. ex W.T. Aiton) Herb. ex Kurz (*Aurota latifolia* (Dryand. ex W.T. Aiton) Raf.; *Curculigo latifolia* Dryand. ex W.T. Aiton)

China, Malesia, Java.

See *Hortus Kew.* 2: 253. 1811, *Fl. Tellur.* 3: 61. 1837

(Diuretic, stimulant, stomachic, fever. For sore eyes, boil the leaves with the root of *Hibiscus rosa-sinensis* and drop the decoction into the eye. Eat the root with betel for too frequent menses.)

Malay name: lemboh, lumbah

Molineria latifolia (Dryand. ex W.T. Aiton) Herb. ex Kurz var. ***latifolia*** (*Curculigo agusanensis* Elmer; *Curculigo borneensis* Merr.; *Curculigo brevipedunculata* Elmer; *Curculigo glabrescens* (Ridl.) Merr.; *Curculigo latifolia* var. *glabrescens* Ridl.; *Curculigo senporeiensis* Yamam.; *Curculigo sumatrana* Roxb.; *Curculigo villosa* Wall. ex Kurz; *Curculigo weberi* Elmer; *Molineria longiflora* Kurz; *Molineria plicata* Kurz, nom. illeg.; *Molineria sumatrana* (Roxb.) Herb.; *Molineria villosa* Kurz)

China, Philippines, SE Asia, Malesia.

See *Hort. Bengal.*: 24. 1814, *Amaryllidaceae*: 84. 1837, *Tijdschr. Ned.-Indië* 27: 232. 1864, *Ann. Mus. Bot. Lugduno-Batavi* 4: 176. 1869 and *Mat. Fl. Malay. Penins.* 2: 67. 1907, *Leaflets of Philippine Botany* 5: 1645–1647. 1913, *J. Straits Branch Roy. Asiat. Soc.* 85: 162–163. 1922

(Anodyne, for centipede bites.)

Molineria trichocarpa (Wight) N.P. Balakr. (*Curculigo finlaysoniana* (Baker) Wall. ex Hook.f.; *Curculigo leptostachya* (Wight) Alston; *Curculigo trichocarpa* (Wight) Bennett & Raizada; *Hypoxis brachystachya* Wight; *Hypoxis latifolia* Wight; *Hypoxis leptostachya* Wight; *Hypoxis pauciflora* Wight; *Hypoxis trichocarpa* Wight; *Molineria finlaysoniana* Baker; *Molineria leptostachya* (Wight) Abeyw.)

India, Sri Lanka. Tuber/rhizome cooked and eaten

See *Icones Plantarum Indiae Orientalis* 6: t. 2044–2046. 1853, *J. Linn. Soc., Bot.* 17: 121. 1878, *Fl. Brit. India* 6: 279. 1892 and *Ceylon J. Sci., Biol. Sci.* 2: 143. 1959, *J. Bombay Nat. Hist. Soc.* 63: 330. 1967, *Indian Journal of Forestry* 4: 61. 1981

(Leaves for dysentery and diarrhea, fresh leaves for skin diseases. Seeds of *Punica granatum*, rhizome of *Curculigo trichocarpa* and roots of *Hemidesmus indicus* var. *pubescens* powdered and consumed for increasing the fertility.)

in India: thene guridi

Mollugo L. Molluginaceae (Aizoaceae)

From the Latin *mollugo, inis* (possibly from *mollis, e* 'soft') used by Plinius for a variety of the plant *lappago*, referring to

the tender leaves; see Carl Linnaeus, *Species Plantarum*. 1: 89. 1753, *Genera Plantarum*. Ed. 5. 39. 1754 and Bogle, A.L. "The genera of *Molluginaceae* and *Aizoaceae* in the southeastern United States." *J. Arnold Arbor*. 51: 431–462. 1970, *Flore des Mascareignes: la Réunion, Maurice, Rodrigues* 104: 1–13. 1991, Lu Dequan. *Aizoaceae (Gisekia-Mollugo)*. In: Tang Changlin, ed., *Fl. Reipubl. Popularis Sin.* 26: 20–30. 1996, Boetsch, J.R. "The *Aizoaceae* and *Molluginaceae* of the southeastern United States." *Castanea* 67: 42–53. 2002. The taxonomy of species of *Mollugo* is in great disarray, and the genus is in need of a thorough worldwide revision. Although *Mollugo* has little economic value, some species have been used medicinally or as vegetables.

Mollugo cerviana (L.) Seringe (*Mollugo cerviana* Ser.; *Mollugo cerviana* (L.) Ser. ex DC.; *Mollugo umbellata* Ser.; *Pharnaceum cerviana* L.; *Pharnaceum cervianum* L.)

Tropics and subtropics of Africa and Asia. Herb, very small, slender, stiff, upright, rosette of leaves, greenish flowers in short heads, no petals, 5 tiny sepals, tiny brown seeds, tender cooked leaves used as vegetable, plant for fodder, a troublesome weed

See *Species Plantarum* 1: 89, 272. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 392. 1824 and Bakshi, T.S. and R.N. Kapil. "The morphology of *Mollugo cerviana* Ser." *J. Indian Bot. Soc.* 33: 309–328. 1954, *Taxon* 27: 375–392. 1978

(Used in Ayurveda and Sidha. Plant cooked as vegetable and given to treat fevers, syphilis, postpartum discharges and to purify the blood, to clear the uterus; dried, powdered, burned, put in incisions to treat pleurisy. Roots boiled in oil and used for rheumatism. Leaves chewed to treat coughs, stomachache, constipation, and reduce hangovers; leaf paste taken for dysentery.)

in English: slender carpet-weed, thread-stem carpet-weed

in Tanzania: ilolompya, kibogaboga

in China: xian ye su mi cao

in India: chiri-glass, chirimorio, chiriya ro khet, citalacatti, citam, citappiriyam, cukkumapattiri, cutcumapattiri, ghimasak, grishmasundara, grishmsundari, jima, kaage purale gida, kaage purule gida, kage purale gida, kilavankuti, kirismacuntarakam, kolanti, kottamakantakam, kucattinpati, kuccakam, kuccam, narappiriyam, narpiriyam, pada, pappatam, parinatam, parpaadagam, parpaataka, parpaataka gida, parpaatakam, parpadagam, parpadagam, parpat, parpataka, parpatakam, parpatakamu, parpatam, parpatatam, parppanpuntu, parppatakam, parppatam, patakam, phanya, pichhu kaalu, porpaadagam, porpatakam, taph-jhad, tiricanakki, tiriteki, tiritekikam, titteki, venu, verri chatarasi, viriputu, viriputukam

in Pakistan: hazar dani

Mollugo nudicaulis Lam. (*Lampetia nudicaulis* (Lam.) Raf.)

From Sierra Leone to South Africa. Small herb, dwarf, weedy, erect, rosette of leaves on the ground, small whitish-green flowers, small capsules with many warty seeds, eaten, in deciduous forest, dry grassland, swampy grassland, on sand dunes, riverine forest, in disturbed areas

See *Encyclopédie Méthodique, Botanique* 4(1): 234. 1797 [9 Feb 1797], *Flora Telluriana* 1836[1837] and *Taxon* 27: 375–392. 1978

(Whole herb vermifuge, pectoral, a cough and cold remedy, effective in the treatment of whooping cough, bleeding nose; whole plant decoction taken for gonorrhoea and to facilitate labor. Crushed leaves and stems mixed with garlic given to typhoid patients; leaf juice mixed with milk dropped for eye diseases; leaf paste for skin diseases; leaves applied to boils to draw out the pus. The plant contains cyanogenic glycosides. Ritual, anthelmintic.)

in English: daisy-leaved chickweed, daisy-leaves chickweed

in China: wu jing su mi cao

in India: murukalu gida, paavattampull, paavattampulli, parpadagam, parpadagam, rangatio-khar, verrichaatharaashi

in Madagascar: aferontany

Mollugo pentaphylla L. (*Mollugo stricta* Linn.; *Mollugo trifolia* Schult.)

India. Erect glabrous herb, ascending, green and white minute flowers, nearly globose capsule, dark brown seeds, tender shoots cooked as vegetable, fodder

See *Sp. Pl.* 1: 89. 1753, *Sp. Pl.*, ed. 2. 1: 131. 1762 and *Fl. Upp. Gang.* Pl. 1: 387. 1903, *Taxon* 27: 375–392. 1978, *Taxon* 36: 766–767. 1987

(Used in Sidha. Plant paste applied to treat cuts and wounds; fresh extract from the entire plant taken to get relief from white discharge; whole plant decoction with water given for smooth delivery; plant paste consumed for giddiness and for cooling body. Young seeds used for stomach disorders. Antifungal, leaf juice in earache; powdered leaves given as an antidote against poisoning effect; leaves boiled in water and taken for cooling purposes.)

in English: carpetweed

in China: di ma huang

in India: chinavaragogu, gharpudi, jaraasi, jaradsi, jarasi, jharasa, julpapra, kedarasi, khet-papra, parpadagam, sirupaaraimalli, turapooundu

in Japan: zakuro-sô

Malayan names: rumput belangkas, tapak burong

in Nepal: nyauli

Mollugo stricta Linnaeus

China.

See *Sp. Pl.* ed. 2. 1: 131. 1762 and *Taxon* 36: 766–767. 1987

(Febrifuge, antiinflammatory.)

in China: su mi cao

in India: tsjeru-jonganam-pullu

Mollugo verticillata Linnaeus (*Mollugo costata* Y.T. Chang & C.F. Wei)

China.

See *Sp. Pl.* 1: 89. 1753 and Payne, M.A. “Morphology and anatomy of *Mollugo verticillata* L.” *Univ. Kansas Sci. Bull.* 21: 399–419. 1933, Payne, M.A. “The flower and seed of *Mollugo verticillata*.” *Univ. Kansas Sci. Bull.* 22: 5–25. 1935, *Contributions from the Gray Herbarium of Harvard University* 184: 1–223. 1958, *Acta Phytotaxonomica Sinica* 8(3): 263. 1963, *Rapid Assessment Program Working Papers* 10: 1–372. 1998, *Identificación de Especies Vegetales en Chuquisaca—Teoría, Práctica y Resultados* 1–129. 2000, *Flora de la región del Parque Nacional Amboró Bolivia* 2: 1–209. 2004, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005

(Febrifuge.)

in English: carpet-weed, green carpet-weed, Indian chickweed

in China: zhong leng su mi cao

Moltkiopsis I.M. Johnston Boraginaceae

Resembling *Moltkia* Lehm. For the Danish noble Joachim Godske Moltke, 1746–1818; see *Neue Schriften Naturf. Ges. Halle* 3(2): 3. 1817, Börge (Birgerus) Thorlacius [Rector of the University of Copenhagen], *Velgjøreren Grev Joachim Godske Moltkes Minde* etc. Copenhagen 1819 and *Journal of the Arnold Arboretum* 34: 2. 1953, A.M. Rizk et al., “Constituents of plants growing in Qatar.” *Fitoterapia*. 57(1): 3–9. Milano 1986, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 136. (*Lithospermum angustifolium* Forssk., non Michx.; *Lithospermum callosum* Vahl; *Lithospermum callosum* Vahl var. *asperrimum* Bornm.; *Lithospermum ciliatum* Forssk.; *Moltkia callosa* Wettst.; *Moltkia ciliata* (Forssk.) Maire; *Moltkia callosa* Wettst.; *Moltkia callosa* (Vahl) Wettst.; *Moltkia ciliata* (Forssk.) Maire; *Moltkiopsis ciliata* I.M. Johnst.)

Algeria. Herb, more or less spiny, blue-purple flowers

See *Cat. Pl. Maroc* [Emberger & Maire] iv. 1102. 1941, *Journal of the Arnold Arboretum* 34: 2. 1953, *United Arab Rep. J.* 21: 211–212. 1979

(Tonic, for indigestion, diuretic.)

Momordica L. Cucurbitaceae

Latin *mordeo*, *momordi*, *morsum*, *mordere* ‘to bite’, refers to the jagged and chewed appearance of the seeds, the seeds appear as if they had been bitten; see Carl Linnaeus, *Species Plantarum*. 2: 1009–1010. 1753 and *Genera Plantarum*. Ed. 5. 440. 1754, *Genera Plantarum* 398. 1789, *Elementa botanica* ... 1: 241. 1790, *Flora Cochinchinensis* 542, 596–597. 1790, *American monthly magazine and critical review* 4: 40. 1818, *Genera Plantarum* 1: 827. 1867, *Hooker’s Icones Plantarum* 11: 67. 1871, *Bulletin Mensuel de la Société Linnéenne de Paris* 1882: 309. 1882, *Nat. Pflanzenfam.* 4(5): 22, 25. 1889 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 654. 1907, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 8: 480. 1923, *Fieldiana, Botany* 24(11/4): 306–395. 1976, *Ann. Missouri Bot. Gard.* 65(1): 285–366. 1978, *Flóruilas de las Zonas de Vida del Ecuador* 1–512. 1985, *Reports from the Botanical Institute, University of Aarhus* 16: 1–74. 1987, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 136. 1989, *AAU Reports* 24: 1–241. 1990, *Flora de Venezuela* 5(1): 11–202. 1992, *Flora de Veracruz* 74: 1–133. 1993, *Revista de Biología Tropical* 43(1–3): 75–115. 1995, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 391–392. 1996, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 688–717. 2001, *Listados Florísticos de México* 22: 1–55. 2001, *Etnoflora Yucatanense* 22: 1–315. 2004, *Proceedings of the California Academy of Sciences*, Series 4 57(7): 247–355. 2006.

Momordica anigisantha Hook. f.

Tropical Africa. Climber herb, white to orange flowers, calyx dark blue and green, forest

See *Flora of Tropical Africa* 2: 536. 1871

(Toxic and poisonous to humans.)

Momordica balsamina L. (*Momordica involucrata* E. Mey. ex Sond.; *Momordica schinzii* Cogn.)

Africa. Vine, monoecious, climbing herb, yellow flowers with a dark centre, beaked orange-yellow bursting fruit

See *Species Plantarum* 2: 1009. 1753, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 30: 149. 1888 and *Bothalia* 8: 49. 1962, *Journal of Cytology and Genetics* 1: 30–40. 1966, *Proceedings of the Indian Science Congress Association* 76(3–vi): 185. 1989

(Toxic to human. Plant anthelmintic, laxative, stomachic, tonic; twigs used in liver diseases. Pounded seeds, soaked in water, inserted in the neck of the womb to procure abortion. Roots aphrodisiac, together with the fruits or seeds used as a remedy for urethral discharges, piles and as an abortifacient. A bitter stomachic, for stomach and intestinal complaints. Plant used as an ingredient in *Strophanthus* arrow poison.)

in English: African cucumber, balsam apple, balsam pear, balsamina, wonder-apple

in India: mokha

in Pakistan: jangli karela, keerelo jangro

in Peru: balsamina

in Mozambique: bale, caca, cacana, cãcãna, gaka, imbala, incaca, incacana, kaka, kata, mubabe, tia cana, zamba neluma

(Unripe raw fruit said to be toxic to human. Hypoglycemic, antimalarial, hypotensive, tonic, stomachic, laxative, abortifacient, depurative, astringent, febrifuge, vermifuge, carminative, cooling, aphrodisiac, blood tonic, pesticide, anti-edema, to increase sexual vigour, for rheumatism, dysentery, gout, diabetes, spleen and liver disorders; boiled fruits eaten for arthritis and obesity; fruit juice mixed with honey used for eczema; for diabetes, a decoction of dried fruit taken orally by adults, the effect could be potentiated when used with *Curcuma longa* and *Phyllanthus emblica*; fruit juice for snakebite; decoction of leaves and flowers of *Leucas cephalotes* mixed with *Momordica charantia* given for jaundice. Stems for toothaches. Fruits, leaves and roots for diabetes mellitus; juice of the leaves and fruits given as an anthelmintic, sexual tonic and vermifuge, used in piles, leprosy, jaundice; decoction of leaves and fruits taken against hypertension. Roots and seeds antipyretic, male aphrodisiac. Roots astringent, useful in piles. Pound the leaves and poultice the abdomen for stomachache in children; leaves for wound maggots; leaf extract mixed with leaf extract of *Azadirachta indica* and taken against intestinal worms; paste of leaves with leaves of *Houttuynia cordata* applied on sore of head; leaves juice emetic, purgative, given in biliousness, and with honey to promote sweating during fever; rhizome juice of *Curcuma longa* with leaf juice of *Momordica charantia* given in measles. Veterinary medicine, fruits as a general medicine; leaves crushed and applied on thorny growths on tongue.)

in English: African cucumber, balsam apple, balsam pear, bitter apple, bitter cucumber, bitter gourd, bitter melon, carilla fruit, carilla plant, carilla seed, leprosy gourd, maiden apple, wild cucumber

in Latin America: baan-caryla, balsamina, carailli, caryla, condiamor, cundeamor, fruto-de-cobra, fu-kua, koukouli, melão-de-são-caetano, melão-de-são-vicente, papayilla, pepinillo, ponm kouli, sorosi, wild caryla

in China: ku gua, k’u kua, chin li chih, lai pu tao

in India: chang-kha, chiripatra, corolo, kalla, kangk-arau, kantaphala, karavellaka, kareela, karela, kareli, karial, karla, kattupavaikkai

in Indonesia: belenggede, foria, kakariano, kambeh, opare, paita, palia, paliak, pania, papari, papariane, papariano, parah, paria, pariak, pariane, paya, pentu, pepare, pepule, peria, poya, prieu, pudu, taparipong, truwuk

in Japan: gôyâ, naga-reishi

in Lepcha: khaaktik

in Malaysia: daun periok, daun prioh, peria, peria kechil, peria laut, periok

in Nepal: tito karela

in Philippines: amargoso, ampalaya, apalia, apape, apapet, palia, paria, pulia, saligun, margoso

in Tibetan: gser-gyi metog

in Vietnam: kho qua, muop dang

in Benin: adoukèn, adoukènaslosikan, antanyaran, anyany-ira, douken, edjini, kpalayi, nyèsinken, sasika, tiati, vohwi

in Congo: lubuzi-buzi, lumbuzi, lumbuzi-busi

in Nigeria: akban ndene, ejinrin, ejinrin wewe, garafuni

in Mozambique: nhadzumba

in West Africa: corcumber, kikporisi

Momordica cissoides Planch. ex Benth. (*Momordica pterocarpa* A. Rich.)

Tropical Africa. Herbaceous climber, scrambling, prostrate, creeper, vine, trailing, simple or branched tendrils, white creamy flowers, orange fruit fleshly prickly, seeds sticky red-arilled, leaves eaten as spinach

See *Tentamen Florae Abyssinicae* ... 1: 292. 1847, *Niger Flora* 370. 1849

(Children's laxative, an infusion as a lotion for fever.)

in Central African Republic: mobunja

Momordica cochinchinensis (Lour.) Spreng. (*Momordica cochinchinensis* Spreng.; *Momordica macrophylla* Gage; *Momordica meloniflora* Hand.-Mazz.; *Momordica mixta* Roxb.; *Muricia cochinchinensis* Lour.)

SE Asia, India, China, Philippines, Vietnam, Malaysia. Climbing vine, coarse, robust, angular, perennial tuberous roots, stout tendrils, leaves alternate, solitary flowers, calyx hirsute or scabrous, corolla white tinged with yellow, red fleshy ovoid fruit, seeds much compressed, tender leaves and fruits used as vegetable

See *Species Plantarum* 2: 1009–1010. 1753, *Flora Cochinchinensis* 2: 542, 596–597. 1790, *Hort. Bengal.* 70. 1814, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 14. 1826, *Flora Indica*; or, descriptions of Indian Plants 709. 1832, *FBI* 2: 618. 1879 and *Records of the Botanical Survey of India* 3(1): 61–62. 1904, *Anzeiger der Akademie der Wissenschaften in Wien. Mathematisch-naturwissenschaftliche Klasse. Wien* 58: 94. 1921, *Cell and Chromosome Research* 12: 55–56. 1989

(Seed poisonous; plants as pesticide. Seeds decoction pectoral, used in cough and colds, chest pain, boils, ulcers, sores, skin inflammation, liver and spleen problems. Seeds, roots and leaves for edema and analgesic; bark decoction of *Alstonia scholaris* with bark of *Flacourtia jangomas*, seeds of *Luffa aegyptiaca* and rootstock of *Momordica cochinchinensis* given in asthma. Fruits and leaves applied on lumbago, bone fracture. Tender shoots made into a paste eaten for irregular menses. Rootstock pounded and mixed with latex of *Euphorbia neriifolia* given in fevers; root extract used in gastric troubles; root paste in rheumatism.)

in English: Cochinchina balsam apple, Cochinchina balsam pear, Cochinchina gourd, spiny bitter cucumber

in China: mu pieh tzu, mu bei zi, mu bie zi, mu hsieh

in India: bhat-karela, bhat kerela, juluk, mak-khrum-khon

in Japan: nanban-karasu-uri

in Philippines: tabog-ok

in Vietnam: moc miet

Momordica dioica Roxb. ex Willd. (*Momordica dioica* Wall.)

India. Perennial twiner, climber with rootstock, tendrils filiform simple glabrous, dioecious flowers, corolla yellow, ovoid fruit, young fruits eaten as vegetable

See *Species Plantarum* 2: 1009–1010. 1753, *Species Plantarum*. Editio quarta 4(1): 605. 1805, *Numer. List* [Wallich] n. 6750 A, F. 1832, *FBI* 2: 617. 1879 and *Journal of Cytology and Genetics* 1: 30–40. 1966, *Proceedings of the Indian Science Congress Association* (111, C): 65: 116. 1978, *Proceedings of the Indian Science Congress Association* 76(3-vi): 185. 1989, *Journal of Cytology and Genetics* 31(1): 65–71. 1996

(Root astringent, febrifuge, antidote for highly poisonous snakebite, antiseptic, sedative; powder to cure diabetes, also used in abortion; root paste an antidote of scorpion stings, also applied to swollen breast, piles and for curing fever; tuberous roots, dried, powdered and given in diphtheria. Tuber spermicidal, antifertility, anthelmintic. Tuberous roots decoction cooling for mild fever, urinary complaints. Fruits purgative; pounded and applied on women's breast to cure pain; boiled immature fruits given in gastric disorders, cough and heart diseases. Juice extract of leaves for urinary disorders. Veterinary medicine, plant given to cattle as a blood purifier, also given to animals suffering from injuries.)

in English: small bitter gourd

in India: banjkekoda, bankalla, bankarla, bary kakoda, ghogali, jangli karela, juluk, kakora, kankody, kankonda, kankor, kantola, kantoli, karela, karkotaki, kartoli, katol, khaksa, parora, van karela, vanz kantoli

Momordica foetida Schumach. (*Momordica cordifolia* E. Mey. ex Sond.; *Momordica cucullata* Hook.f.; *Momordica foetida* var. *villosa* Cogn.; *Momordica mannii* Hook.f.; *Momordica morkorra* A. Rich.; *Momordica schimperiana* Naudin)

Tropical Africa, South Africa. Hairy climber or creeping herb, stout perennial rootstock, simple or forked tendrils opposite the leaves, strong unpleasant smell, sexes on separate plants, female flowers single, male flowers grouped together in a broad bract on a long stalk, yellow to orange fruit bursting when ripe, flat seeds in a red pulp, leaves have a bad smell and a bitter taste, leaves boiled and eaten in small amounts as a famine food, plant for fodder, a troublesome weed, forest edges, margins of swamps and riverine forest

See *Beskrivelse af Guineeske planter* 426. 1827, *Flora of Tropical Africa* 2: 539. 1871

(Pod and leaves stomachic, poison, abortifacient, for diabetes. Leaves decoction as a steam bath for pains in the joint; crushed and the liquid applied into the ears to treat earache; parched leaves administered to pregnant women. Roots used to treat intestinal worms, intestinal and stomach complaints and constipation.)

in South Africa: inTshungu (Zulu)

in Tanzania: ikungulanyoka, kasalya, kisasasala, lushwe, mokiki, nyasasasala, orondi

Momordica pterocarpa A. Rich. (*Momordica bequaertii* De Wild.; *Momordica grandibracteata* Gilg; *Momordica macrantha* Gilg; *Momordica pterocarpa* Hochst. ex A. Rich.; *Momordica runssorica* Gilg; *Momordica rutshuruensis* De Wild.)

East Africa.

See *Tentamen Florae Abyssinicae* ... 1: 292. 1847

(Anthelmintic.)

Momordica rostrata A. Zimm.

East Africa, Tanzania. Herbaceous climber, trailing, weak, narrow, swollen fleshy rootstock, separate male and female plants, flowers pale orange with dark centre below, female flowers solitary, numerous male flowers with 5 free petals, beaked fruit bright orange-red, flat brown-black seeds in yellow edible pulp, ripe fruit edible, fodder, young tender leaves cooked and eaten, sweet juicy pulp eaten raw, fruits boiled and eaten, seeds may be roasted and eaten, rocky places, dry woodland, wooded grassland, in open grassland, *Acacia-Commiphora*, deciduous bushland

See *Cucurbitac.* 2: 183. 1922

(Used to treat diarrhea. A powder obtained from peeled, dried and crushed roots can kill stalkborers. Tuberous root toxic.)

in Kenya: enkamposhi, king'ong'oya, kiongoa, kyongoa, olamposhi, rukiri

in Tanzania: enkamposhi, kunguiva, litambalanzoka, lyungu-lya-nzoka, ngurura, olamposhi, tunda nyoka

Momordica spinosa (Gilg) Chiov. (*Kedrostis brevispinosa* Cogn.; *Kedrostis spinosa* Gilg; *Momordica brevispinosa* (Cogn.) Chiov.; *Momordica spinosa* Chiov.)

East Africa.

See *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 82. 1916

(Fruits, leaves and roots for diabetes, muscle spasms, body pains. A piece of fresh root crushed and boiled in water, the patient must vomit. Pain of the back, a piece of fresh root crushed and mixed with water, filtered, enema. Veterinary medicine.)

in Kenya: ibukoi, middanqajibu

in Somali: madax bishaar, maddah bahk, wal-wal daye

Momordica tuberosa Cogn. (*Momordica tuberosa* Dennst. ex Miq.)

SE Asia.

See *Flora van Nederlandsch Indië* 1(1): 664. 1855 and *Proc. Indian Sci. Congr. Assoc.* (111, C) 65: 107. 1978

(Tubers cause abortion.)

Monadenium Pax Euphorbiaceae

From the Greek *monos* 'single, one, only' and *aden* 'a gland', having only one gland, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 126–127. 1894. Often in *Euphorbia*.

Monadenium heteropodum (Pax) N.E. Br. (*Euphorbia heteropoda* Pax; *Euphorbia heteropodum* Pax; *Monadenium heteropodum* N.E. Br.)

Tanzania.

See *Species Plantarum* 1: 450–463. 1753, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 19: 126. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 374. 1904, *Flora of Tropical Africa* [Oliver et al.] 6(1.3): 453. 1911, Balakrishnan, N.P. & Chakrabarty, T. *The Family Euphorbiaceae in India*. A synopsis of its profile, taxonomy and bibliography. Bishen Singh Mahendra Pal Singh. 2007

(Suspected to be poisonous.)

Monadenium lugardae N.E. Br. (*Euphorbia lugardae* (N.E. Br.) Bruyns; *Euphorbia lugardiae* (N.E. Br.) Bruyns; *Monadenium lugardiae* N.E. Br.)

S. Trop. and S. Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeographie* 19: 126. 1894 and *Bulletin of Miscellaneous Information Kew* 1909: 138. 1909, Calane da Silva, M., Izdine, S. & Amuse, A.B. *A Preliminary Checklist of the Vascular Plants of Mozambique*: 1–184. Pretoria. 2004, *Taxon* 55(2): 413. 2006

(Toxic. Leaves for fevers, gonorrhoea, chest problems. Ritual, magic, divination, ceremonial.)

Monanthotaxis Baillon Annonaceae

From the Greek *monos* 'only, one', *anthos* 'flower' and *taxis* 'order', sometimes the flowers are solitary, see *Flora Peruviana, et Chilensis Prodromus* 85. 1794, *Systema Vegetabilium Florae Peruviana, et Chilensis* 1: 145. 1798, *Genera Plantarum* [Endlicher] 831. 1839, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 878. 1890 and *Kew*

Bulletin 25(1): 20, 23, 30–31. 1971, *Taxon* 39: 677. 1990, *Taxon* 42: 877. 1993.

Monanthes affra (Sond.) Verdc. (*Guatteria affra* Sond.; *Monanthes affra* Verdc.; *Popowia affra* Hook. f. & Thomson ex Benth.; *Popowia affra* (Sond.) Benth.; *Popowia affra* Benth.)

South Africa. Shrub or liane, small tree, sarmentose, red or blackish, leaves petiolate, flowers bisexual solitary or in 2–4-flowered cymes extra-axillary

See *Flora Peruviana, et Chilensis Prodromus* 85. 1794, *Genera Plantarum* 831. 1839, *Fl. Cap.* (Harvey) i. 9. 1860, *Trans. Linn. Soc. London* 23(3): 470. 1862 and *Kew Bull.* 25(1): 25. 1971, *Biochemical Systematics and Ecology* 28(6): 595–597. 2000

(Roots for venereal disease and to prevent hysteria and for deworming. Burial shroud. Said to have magical properties, a charm against nightmares.)

in English: dwaba-berry

in Southern Africa: dwababessie, iDwaba, iDwabe, uMaluswembe, umaVumba, mKonjane, uMazwenda-omhlophe, umGogi-wezihlanya, iThunganhlanzi

in Swaziland: libundza, masweleti, masweti, sititane, umtitanane, umxobe

Monanthes poggei Engl. & Diels

Angola, Tanzania. A climbing shrub or liane, rusty, tiny hairy sepals surround the sweet-scented flowers, white-yellow fleshy petals in one whorl, fruit covered with rusty hairs, sweet pulp of ripe fruits eaten fresh, a source of bee forage, fruits eaten by chimpanzees, riverine forest, evergreen forest

See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 878. 1890 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 53. 1901

(Roots used for stomachache and as an antidote for snakebite.)

in Tanzania: bulyankende, lujongololo

Monanthes trichantha (Diels) Verdc. (*Popowia buchananii* (Engl.) Engl. & Diels var. *trichantha* Diels)

Tropical Africa. Climber, shrub, liana, scandent, yellow flowers, ripe fruits bright red

See *Die Pflanzenwelt Ost-Afrikas* C: 179. 1895 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen* 6: 47, t. 18/B. 1901, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 270. 1936, *Kew Bulletin* 25(1): 23–24. 1971, *Fl. Trop. E. Africa, Annon.* 97. 1971

(Leaves for fevers, headache.)

Monarda L. Lamiaceae (Labiatae)

For the influential Spanish (b. Seville) physician Nicolás Bautista Monardes, circa 1493 (1512?)–1578 (1588?) (d.

Seville), botanist, among his writings are *Brief traité de la racine mechoacan*, venue de l'Espagne nouvelle. 1588 and *Simplicium medicamentorum ex novo orbe delatorum*, quorum in medicina usus est, historia, Hispanico sermone descripta. Antverpiae 1579, his first printer was Domingo de Robertis. See Garcia d'Orta, *Due libri dell'istoria de i semplici aromati, et altre cose ... con brevi annotationi di Carlo Clusio ... Con un trattato della neve & del bever fresco* di Nicolo Monardes ... tradotti da Annibale Briganti. [Second edition of the Italian translation, first 1576.] Venice 1582, Carl Linnaeus, *Species Plantarum*. 1: 22–23. 1753, *Genera Plantarum*. Ed. 5. 14. 1754, *Medical Flora* 2: 64. 1830, *Transactions of the American Philosophical Society* 5(6[3]): 186. 1837[1836], *Histoire Naturelle des Végétaux. Phanérogames* 9: 163. 1840, G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 590. 1852 and Johann David Schoepf (1752–1800), “Materia medica americana potissimum regni vegetabilis.” *B. of the Lloyd Library of Botany, Pharmacy and Materia Medica*. [Reproduction Series no. 3] Cincinnati 1903, *Madroño* 3(1): 22, 26. 1935, Garrison and Morton, *Medical Bibliography*. 1817. 1961, Francisco Guerra, *Nicolás Bautista Monardes. Su vida y su obra [ca. 1493–1588]*. Mexico 1961, Charles Ralph Boxer, *Two Pioneers of Tropical Medicine: Garcia d'Orta and Nicolás Monardes*. London, [1963], Richard J. Durling, *A Catalogue of Sixteenth Century Printed Books in the National Library of Medicine*. 3213, 3217, 3420. 1967, Francisco Guerra, in *D.S.B.* 9: 466. 1981, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 136. Berlin & Hamburg 1989.

Monarda bradburiana L.C. Beck (*Monarda amplexicaulis* Fisch. ex C. Morren; *Monarda fistulosa* Sims, nom. inq.; *Monarda rigida* Raf.; *Monarda villosa* M. Martens)

North America. Perennial herb

See *American Journal of Science, and Arts* 10: 260. 1826, *Med. Fl.* 2: 37. 1830, *Bull. Acad. Roy. Sci. Bruxelles* 8: 66. 1841, *Belgique Hort.* 1: 41. 1851

(Plant infusion drunk for colds, fevers, coughs, to increase milk flow for nursing mothers. Leaves for aching teeth. Insecticide, insect repellent.)

in English: Bradbury beebalm, eastern beebalm

Monarda didyma L. (*Monarda coccinea* Michx.; *Monarda contorta* C. Morren; *Monarda didyma* var. *angustifolia* Torr.; *Monarda didynama* Stokes; *Monarda kalmiana* Pursh; *Monarda oswegoensis* W. Barton; *Monarda purpurascens* Wender.; *Monarda purpurea* Lam.)

North America, China. Perennial herb

See *Species Plantarum* 1: 22. 1753, *Encycl.* 4: 256. 1797, *Fl. Bor.-Amer.* 1: 16. 1803, *Bot. Mat. Med.* 1: 44. 1812, *Fl. Amer. Sept.* 1: 17. 1813, *Fl. Philadelph. Prodr.* 1: 34. 1815, *Fl. N. Middle United States* 1: 25. 1824, *Belgique Hort.* 1: 37. 1851

(Abortifacient, diuretic, analgesic, sedative, diaphoretic, stomachic, carminative, used for colds, nosebleed, headache, heart trouble, colic and flatulence.)

in English: bee balm, Oswego tea, scarlet beebalm

in China: mei guo bo he

Monarda fistulosa L. (*Monarda fistulosa* var. *typica* Sherff, nom. inval.)

North America, Canada. Perennial subshrub or herb, square stem, toothed opposite leaves, cluster of pink to lavender flowers

See *Species Plantarum* 1: 22. 1753 and *Torrey* 45: 68. 1945, *Brittonia* 7(3): 129–142. 1951

(Plant infusion drunk for colds, fevers, coughs, colic, flatulence, to expel gas and worms, to increase milk flow for nursing mothers; essential oil anesthetic, antiinflammatory, worm-expelling and antioxidant. Leaves for aching teeth. Insecticide, insect repellent.)

in English: horsemint, wild bergamot, wild bergamot beebalm

in China: ni mei guo bo he

Monarda fistulosa L. var. ***menthifolia*** (Graham) Fernald (*Monarda comata* Rydb.; *Monarda fistulosa* L. subsp. *fistulosa* var. *menthifolia* (Graham) Fernald; *Monarda fistulosa* subsp. *menthifolia* (Graham) L.S. Gill; *Monarda menthifolia* Graham; *Monarda menthifolia* var. *praerea* Lunell; *Monarda mollis* var. *menthifolia* Fernald; *Monarda mollis* var. *menthifolia* (Graham) Fernald; *Monarda ramaleyi* A. Nelson; *Monarda stricta* Wooton)

North America. Perennial subshrub or herb

See *Edinburgh New Philos. J.* 1829(July-Oct.): 347. 1829, *Bull. Torrey Bot. Club* 25: 263. 1898 and *Bot. Gaz.* 31: 398. 1901, *Bull. Torrey Bot. Club* 28: 502. 1901, *Rhodora* 3: 15. 1901, *Amer. Midl. Naturalist* 5: 2. 1917, *Rhodora* 46: 495. 1944, *Caryologia* 30: 387. 1977 (publ. 1978)

(Plant infusion drunk for colds, headache, fevers, coughs, to increase milk flow for nursing mothers. Leaves for aching teeth, sore eyes. Insecticide, insect repellent. Contact therapy, dried leaves worn around neck and decoction taken for sore throat. Veterinary medicine. Ceremonial.)

in English: mintleaf bergamot

Monarda fistulosa L. var. ***mollis*** (L.) L. (*Monarda fistulosa* f. *albiflora* (Farw.) Sherff; *Monarda fistulosa* L. subsp. *fistulosa* var. *mollis* (L.) Benth.; *Monarda fistulosa* var. *mollis* (L.) Benth.; *Monarda mollis* L.; *Monarda mollis* f. *albiflora* Farw.; *Monarda scabra* Beck)

North America. Perennial subshrub or herb

See *Amoen. Acad.* 3: 399. 1756, *Species Plantarum*, Editio Secunda 32. 1762, *Labiatarum Genera et Species* 317. 1833

and *Pap. Michigan Acad. Sci.* 3: 103. 1924, *Torrey* 45: 68. 1945

(Roots decoction taken for worms. Infusion of blossoms used as an eyewash; dry flowers and leaves applied to scalds and burns; leaves infusion as a postpartum remedy.)

in English: Oswego tea, wild bergamot

Monarda pectinata Nutt. (*Monarda nuttallii* A. Nelson; *Monarda penicillata* A. Gray)

North America. Annual herb

See *Proc. Amer. Acad. Arts* 8: 369. 1821, *Transactions of the American Philosophical Society*, new series, 1: 182. 1847, *Proc. Acad. Nat. Sci. Philadelphia* 4: 25. 1848 and *Bot. Gaz.* 31: 397. 1901

(Plant analgesic, febrifuge, stomachic, for headache, cough, stomachache, fever. Flowers infusion as a wash for insect bites and stings. Ceremonial lotion.)

in English: pony beebalm

Monarda punctata L. (*Monarda punctata* L. var. *leucantha* Nash; *Monarda punctata* L. subsp. *punctata* var. *punctata*)

North America. Herb, annual, biennial, perennial subshrub or herb

See *Species Plantarum* 1: 22–23. 1753

(Plant analgesic, febrifuge, stomachic, for headache, cough, stomachache, fever.)

in English: dotted mint, horsemint, spotted bee balm, spotted beebalm

Monarda punctata L. var. ***arkansana*** (E.M. McClint. & Epling) Shinnars (*Monarda punctata* L. subsp. *arkansana* E.M. McClint. & Epling; *Monarda punctata* L. subsp. *punctata* var. *arkansana* (E.M. McClint. & Epling) Shinnars)

North America. Herb, annual, biennial, perennial subshrub or herb

See *Univ. Calif. Publ. Bot.* 20: 182. 1942, *Field & Lab.* 21: 90. 1953

(Plant analgesic, febrifuge, stomachic, for headache, cough, stomachache, fever.)

in English: spotted beebalm

Monarda punctata L. var. ***punctata*** (*Monarda lutea* Michx.; *Monarda punctata* L. subsp. *punctata* var. *punctata*; *Monarda punctata* var. *leucantha* Nash)

North America. Herb, annual, biennial, perennial subshrub or herb

See *Species Plantarum* 1: 22–23. 1753, *Fl. Bor.-Amer.* 1: 16. 1803, *Bull. Torrey Bot. Club* 23: 104. 1896

(Plant analgesic, febrifuge, stomachic, for headache, cough, stomachache, fever.)

in English: dotted mint, horsemint, spotted bee balm, spotted beebalm

Mondia Skeels Asclepiadaceae (Apocynaceae, Periplocaceae)

From *uMondi*, the Zulu name for the plant, see *U.S.D.A. Bur. Pl. Industr. Bull.* 223: 45. 1911.

Mondia whitei (Hook.f.) Skeels (*Chlorocodon whiteii* Hook. f.)

Tropical Africa, South Africa. Herbaceous vine, climbing shrub, crawling, trailing, stem dark green with milky sap, flowers greenish-cream, petals pale green outside and yellow to red-purple inside, corona yellow-green, fruit with milky latex when cut, strongly aromatic yellow roots, fleshy bark of the narrow roots eaten raw, the taste of the root of a female species is sweet not bitter, in riverine forest, on roadside at forest edge

See *Annales de la Société Linnéenne de Lyon*, sér. 2, 17: 113. 1869, *Botanical Magazine* 97: t. 5898. 1871 and *U.S.D.A. Bur. Pl. Industr. Bull.* 223: 45. 1911

(Root purgative, said to cause profuse urination, used for indigestion, gonorrhoea; roots chewed as an aphrodisiac and a postpartum remedy, and a cure for impotence and by women to contract the uterus after delivery. Charm, magico-religious beliefs, roots chewed for good luck before setting out to perform a difficult task.)

in Congo: mudiondo, mundiondo

in Kenya: kumokombera, muhukura, ogombo, omikobela, omugombera, omukombera

in South Africa: uMondi (Zulu)

in Tanzania: ngongola, ubombo

in Yoruba: ogba

Monechma Hochst. Acanthaceae

From the Greek *monos* ‘one, single’ and *echma* (*echo* ‘to hold, to sustain’) ‘stoppage, a defence against, hold-fast’, see *Flora* 24(1): 374. 1841.

Monechma hispidum Hochst.

Tropical Africa. Herb, woody-based, semi-prostrate, yellowish green flowers

See *Flora* 24(1): 375. 1841

(Leaves for diarrhea, smoke from burnt leaves inhaled for colds.)

Monechma subsessile (Oliv.) C.B. Clarke (*Justicia subsessilis* Oliv.)

Tropical Africa. Herb, woody-based, semi-prostrate, yellowish green flowers

See *Fl. Trop. Afr.* [Oliver et al.] 5(2): 216. 1900

(Poultice for wounds, skin diseases.)

Moneses Salisb. ex Gray Ericaceae (Pyrolaceae)

From the Greek *monos* ‘one, single’ and *esis* ‘a sending forth, delight’, referring to the solitary flowers, see *A Natural Arrangement of British Plants* 2: 396, 403–404. 1821.

Moneses uniflora (L.) A. Gray (*Bryophthalmum uniflorum* (L.) E. Mey.; *Chimaphila rhombifolia* Hayata; *Monanthium reticulatum* (Nutt.) House; *Monanthium uniflorum* (L.) House; *Moneses grandiflora* Salisb. ex Gray; *Moneses grandiflora* Salisbury; *Moneses reticulata* Nutt.; *Moneses rhombifolia* (Hayata) Andres; *Moneses uniflora* subsp. *reticulata* (Nutt.) (Roots very bitter, astringent, emetic, to treat dysentery, asthma, lung troubles.)

in English: growing at night

in Peru: anca usa, condorpa usan, hacchiquies, hacchiquis, muchi, muchuisa, muchuy, muchuysa, pahuata-huinac, sambo-ckorota, tuta huiña, urpay jacha

Monochoria C. Presl Pontederiaceae

Greek *monos* ‘alone, lonely’ and *chorion* ‘membrane’ or *chora* ‘country, place, region’ or *choris* ‘separate, asunder,

apart’, *chorizo* ‘to separate’, one stamen is larger than the others. See *Species Plantarum* 1: 288. 1753, C. Presl, *Reliquiae haenkeanae*. [Collector Thaddäus Peregrinus Xaverius Haenke, 1761–1816 or 1817] Pragae [Prah] 1827, *Flora Telluriana* 2: 10. 1836[1837] and Lorenzo Raimundo Parodi (1895–1966), “Thaddaeus Peregrinus Haenke a dos siglos de su nacimiento.” *Anales Acad. Nac. Ci. Exact. Buenos Aires*. 17: 9–28. 1964, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 243. Chipping Norton, N.S.W. 1981, Cook, C.D.K. *Taxonomic revision of Monochoria (Pontederiaceae)*. In: K. Tan, ed. 1989. *The Davis & Hedge Festschrift. Plant Taxonomy, Phytogeography, and Related Subjects*. Edinburgh. 1989, F.A. Sharr, *Western Australian Plant Names and Their Meanings. A Glossary*. 49. University of Western Australia Press, Western Australia 1996.

Monochoria hastata (L.) Solms (*Monochoria dilatata* Kunth; *Monochoria dilatata* (Buch.-Ham.) Kunth; *Monochoria hastata* Solms; *Monochoria hastifolia* C. Presl, nom. illeg. superfl.; *Monochoria sagittata* Kunth; *Monochoria sagittata* (Roxb.) Kunth; *Pontederia dilatata* Buch.-Ham.; *Pontederia hastata* L.; *Pontederia sagittata* Roxb.)

Tropical South and Southeast Asia. Herb, rhizomatous, strong, robust, creeping rootstock, leaf-blade sagittate or cordate, purplish blue flowers in dense racemes or subumbellate, lower spathe with sheath, capsule ovoid, yellowish seeds with fine brown ribs, above ground parts eaten as vegetable, rhizomes cooked for cattle feed, in rice fields

See *Species Plantarum* 1: 288. 1753, *Reliquiae Haenkeanae* 1(2): 127–128. 1827, *Flora Indica*; or, descriptions of Indian Plants 2: 124. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* [Kunth] 4: 134. 1843, *Monographiae Phanerogamarum* [A. in China: fou shih, ya she cao, ya she tsao

in India: jalkeena, mir-lang-haum, nanka, nukha, piyazi

in Malaysia: chachang layar, kelayar, rumput ayer

in Pakistan: cachiee

Monodora Dunal Annonaceae

Greek *monos* 'only, lonely, one' with *dora* 'a skin, skin when taken off, hide', referring to the solitary flowers and to the single terminal carpel; some suggested from *doron* 'gift'; see Dunal, Michel Félix (1789–1856), *Monographie de la famille des Anonacées*. 79. Paris: Treuttel et Wurtz, 1817, *Theoria Systematis Plantarum* 126. 1858 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 136. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 384. 1993, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 393. 1996.

Monodora crispata Engl. & Diels (*Monodora angolensis* Welw.; *Monodora brevipes* Benth.; *Monodora durieuxii* De Wild.; *Monodora gibsonii* Bullock ex Burt Davy; *Monodora klaineana* Pierre; *Monodora letestui* Pellegr.)

Gabon, Nigeria. Tree, corollas yellow spotted with orange

See *Transactions of the Linnean Society of London* 23: 475. 1862, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 301. 1899 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 122. 1903

(Stem and roots purgative.)

Monodora myristica (Gaertn.) Dunal (*Annona myristica* Gaertn.; *Monodora borealis* Scott-Elliott; *Monodora claesensii* De Wild.; *Monodora grandiflora* Benth.; *Monodora myristica* Blanco; *Monodora myristica* Dunal)

Tropical Africa. Tree, trunk slightly fluted, bark black with shallow fissures, slash scented fibrous, young stems and leaf undersides glaucous, leaves papery coriaceous, fragrant

solitary flowers among leaves, petals and sepals dark yellow, outer petals bright yellow with red blotches on the edges, seeds roasted and used for flavoring local foods

See *Species Plantarum* 1: 536–537. 1753, *Monogr. Anonacées* 55, 79. 1817, *Fl. Filip.*, ed. 2 [F.M. Blanco] 300. 1845, *J. Linn. Soc., Bot.* 30: 72. 1894 [1893–1895 publ. 1894] and *Bull. Jard. Bot. État Bruxelles* 3: 263. 1911, *Cytologia* 55: 187–196. 1990, *J. Ethnopharmacol.* 79(2): 213–220. 2002 [Correlation between chemical composition and antibacterial activity of essential oils of some aromatic medicinal plants growing in the Democratic Republic of Congo.], Tatsadjieu, L.N. et al. “Antibacterial and antifungal activity of *Xylopiya aethiopica*, *Monodora myristica*, *Zanthoxylum xanthoxyloides* and *Zanthoxylum leprieurii* from Cameroon.” *Fitoterapia.* 74(5): 469–472. 2003, Okpekon, T. et al. “Antiparasitic activities of medicinal plants used in Ivory Coast.” *J. Ethnopharmacol.* 90(1): 91–97. 2004, *Int. J. Food Microbiol.* 94(3): 329–334. 2004 [Evaluation of five essential oils from aromatic plants of Cameroon for controlling food spoilage and mycotoxin producing fungi.], *Nahrung.* 48(2): 85–87. 2004, *Journal of Pharmaceutical and Allied Sciences* 2(2): 233–236. 2004

(Fruits and leaves carminative, antiparasitic, anthelmintic. Seeds used as a treatment for headaches, considered effective applied to sores, including those from Guinea worm. Powdered seeds used for removing lice. The essential oils showed antibacterial, stimulant, antimicrobial, anthelmintic and antifungal activity; active against mites. Root chewed to relieve toothaches.)

in English: American calabash, calabash nutmeg, Jamaica nutmeg

in Cameroon: dzin, pebe

in Central Africa: annéhia, bende bende, bominingo, ding, effoin, fep, feup, ifuafua, kimbula, m’bo, mbende, mombende, mombendebende, moué, mukasa, musahusa, oniningo, ozek, pinguingu

in Ivory Coast: efuen, efueno, hane, mbong, moué, moui

in Liberia: gboite

in Nigeria: abo-lakoshin, ebenoyoba, din, efwen, efouen, ehuru, gbosa, igbo, ilakoshin-igbo, n’pokoson, njimgene, ukposa, wofiove; lakosin (Yoruba); ehinawosin (Ikale); uyenghen (Edo); ehuru ofia (Igbo)

in Sierra Leone: boite

in Togo: uyu

in Tropical Africa: lakoshe

in Tropical W. Africa: m’poussan

in Uganda: musamwu

in Yoruba: abalakose, ariwo, ilakosin igbo

Monodora tenuifolia Benth. (*Monodora cabrae* De Wild.)

Ghana, Cameroon. Tree, bark grey cracked rough, leaves papery, on elongate pedicel flowers fragrant whitish with purplish blotches, petals pale yellow at tips blending to white at base with reddish purple markings, fruits globular

See *Monogr. Anonacées* 55, 79. 1817, *Journal of the Linnean Society, Botany* 5: 72. 1860 [1861 publ. 1860] and *Planta Med.* 50(5): 455. 1984, *J. Nat. Prod.* 49(3): 534–537. 1986, *Planta Med.* 57(4): 393–394. 1991, *J. Agric. Food Chem.* 48(2): 231–234. 2000, *African Journal of Ecology* 45 (1): 62–71. 2007

(Antibacterial, anthelmintic and antifungal, astringent, used for the treatment of toothache, dysentery. After roasting and grinding, the seeds are rubbed on the skin for skin diseases. Magic, ritual.)

in English: African nutmeg

in Ivory Coast: pétimoué

in Nigeria: ehinawosin, lakoshin, ihe-igbe, uyengen; abo lakoshe (Yoruba); ebenoyoba (Edo); ehuru (Igbo)

in Yoruba: ilakose, ilakosin, lakose, lakosin

Monolepis Schrader Chenopodiaceae (Amaranthaceae)

From the Greek *monos* ‘single, one’ and *lepis* ‘scale’, in reference of the perianth-segment; see *Species Plantarum* 1: 4–5. 1753, *Mantissa* 1: 65. 1822, H.A. Schrader, in *Index seminum horti academici goettingensis* anno 1830 collecta. 4. [1830], *Genera Plantarum* 3(1): 52. 1880.

Monolepis nuttalliana (Schult.) Greene (*Blitum chenopodioides* L.; *Blitum chenopodioides* Nutt., nom. illeg.; *Blitum nuttalianum* Schult.; *Blitum nuttallianum* Schult.; *Chenopodium chenopodioides* (L.) Aellen; *Monolepis chenopodioides* Moq.; *Monolepis patagonica* Ulbr.)

North America. Annual herb

See *Mantissa Plantarum* 2: 170. 1771, *The Genera of North American Plants* 1: 4. 1818, *Systema Vegetabilium* 1: 65. 1822, *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 85. 1849, *Flora Franciscana* 2: 168. 1891 and *Ostenia* 98. 1933

(Poultice for skin diseases, burns, irritations. Ceremonial, emetic.)

in English: Nuttall’s poverty-weed, Nuttall’s povertyweed, spear-leaved goosefoot

Monophyllaea R. Br. Gesneriaceae

From the Greek *monos* ‘one, single’ and *phyllon* ‘a leaf’, see Bennett, John Joseph (1801–1876), *Plantae javanicae rariores*, descriptae iconibusque illustratae, quas in insula Java, annis 1802–1818, legit et investigavit Thomas Horsfield, M.D. 115, 121. Londini, Veneunt Apud G.H. Allen, et Socios, 1838–1852 [Horsfield, Thomas (1773–1859) and Brown, Robert (1773–1858)] and *Notes Roy. Bot. Gard. Edinburgh* 37(1): 22. 1978.

Monophyllaea horsfieldii R. Br.

Indonesia. Herb, a single leaf atop a long stalk, flowers produced directly from the leaf, lowland forest, streams, wet cliffs

See *Plant Systematics and Evolution* 169: 155–163. 1990, *Beitrag zur Biologie der Pflanzen* 70: 445–470. 1997

(Juice from leaves and stems splashed on young babies to promote health and fitness.)

in Indonesia: leluik

Monotes A. DC. Dipterocarpaceae

Greek *monos* ‘single’, *monotes* ‘unity, uniqueness’, at the time on publication it was the only genus of Dipterocarpaceae in Africa, see *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 623–624. 1868 and *Pl. Syst. Evol.* 216: 197–205. 1999.

Monotes africanus A. DC. (Monotes africana A. DC.)

Tropical Africa. Tree or shrub, fruit embedded in bright orange wing-like bracts

See *Prodr.* (DC.) 16(2.2): 624. 1868 and *Journal of Natural Products* 64(4): 546–548. 2001

(HIV-inhibitory activity.)

Monotes engleri Gilg (Monotes tomentellus Hutch.)

Tropical Africa. Tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 12: 291. 1908, *Phytochemistry* 45(3): 509–515. 1997, *Natural Product Research* 22(5): 383–392. 2008

(Leaves, stem and roots stomachic, antifungal, antiseptic, for skin eruptions; from the leaves, cytotoxic activity against several human cancer cell lines.)

in English: pink-fruited monotes

in Southern Africa: chiNdhara, muAra, muHarawashawa, muNete, muNonye, muNunta, muNunywa, muNuya (Shona)

Monotes glaber Sprague

Tropical Africa.

See *Bull. Misc. Inform. Kew* 1909, 305. 1909, Sohni, Y.R. et al. “Frameshift mutations in Salmonella induced by the

extracts of medicinal herbs *Lannea edulis* (Sond.) Engl. and *Monotes glaber* Sprague.” *Environ. Mol. Mutagen.* 25(1): 77–82. 1995, *J. Nat. Prod.* 66(4): 578–80. 2003

(Antibacterial.)

in English: pale-fruited monotes, yellow wood

in Southern Africa: baroshawa, muBarawashawa, muNinya, muNonye, muNyanyewa, muNyunyu, muShaba, muShawa, muVara, muWara (Shona)

in S. Rhodesia: iNyunya, muBarawashava, umNonye

Monotropa L. Ericaceae (Monotropaceae, Pyrolaceae)

Latin *monotropus* and Greek *monotropos* ‘of one kind, single’, referring to the nodding flower and to stem, onesided inflorescence, see *Species Plantarum* 1: 387–388. 1753, *The British Herbal* 221. 1756, Crantz, Heinrich Johann Nepomuk von (1722–1799), *Institutiones Rei Herbariae* 2: 467. [Vienna] 1766, *Flora Carniolica*, Editio Secunda 1: 285. 1772, *Genera Plantarum* 159–160. 1789, *Medical Repository* ser. 3, 1: 297. 1810, *The Genera of North American Plants* 1: 272. 1818, *Annales de la Société Botanique de Lyon* 7: 130. 1880 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 698. 1935, *Symbolae Sinicae* 7(4): 766. 1936, *Flora Neotropica* 66: 13–27. 1995, *Fieldiana: Botany, New Series* 45: 1–107. 2005.

Monsonia angustifolia E. Mey. ex A. Rich. (*Monsonia angustifolia* E. Mey.; *Monsonia biflora* DC. var. *pygmaea* Chiov.)

South Africa.

See *Mantissa Plantarum* 1: 14, 105. 1767, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 638. 1824, *Zwei Pflanzengeogr. Docum.* (Drège) 203. 1843–1844, *Tentamen Florae Abyssinicae ...* 1: 115. 1847 and *Bulletin du Muséum National d'Histoire Naturelle*, séries 4, Section B, *Adansonia. Botanique Phytochimie* 9(2): 133–136. 1987

(Whole plant for liver diseases and dysentery. Veterinary medicine, for blackquarter, blackleg.)

in English: crane's bill

in Kenya: lenpai-e-nabo

in Southern Africa: alsbos, malva naaldbossie, teebossie; malengoana (Sotho); phusana (Botswana)

Monsonia burkeana Planch. ex Harv. (*Monsonia betschuanica* R. Knuth; *Monsonia biflora* DC.; *Monsonia burkeana* Planch. ex Harv. & Sond.; *Monsonia glandulosissima* Schinz; *Monsonia malvaeiflora* Schinz; *Monsonia malviflora* Schinz)

South Africa.

See *Mantissa Plantarum* 1: 14, 105. 1767, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 638. 1824, *Fl. Cap.* (Harvey) 1: 155. 1860 and *Bulletin de l'Herbier Boissier* Sér. II. 3: 821–822. 1901–1908, *Pflanzenr.* (Engler) *Geraniac.* 298. 1912

(Leaves astringent, for dysentery, hemorrhoids, typhoid. Veterinary medicine, astringent, for blackquarter, blackleg.)

in English: crane's bill, dysentery herb

in Southern Africa: alsbossie, angelbossie, assegaibossie, keitabossie (keita = dysentery), naaldebossie; igqitha (Xhosa); khoara (Sotho); remarungana (Tswana)

Monsonia emarginata (L.f.) L'Hér. (*Geranium emarginatum* L.f.; *Monsonia ovata* Cav.; *Monsonia ovata* Cav. var. *biflora* Harv.)

South Africa.

See *Species Plantarum* 2: 676–683. 1753, Cavanilles, Antonio Jose (1745–1804), *Monadelphiae Classis Dissertationes Decem*. Matriti: Ex typographia regia prostant Matriti apud D. Antonium Baylo [et] Parisiis apud D. Firminum Didot, [1785]–1790

(Astringent. Veterinary medicine, astringent, insecticide, for blackquarter, blackleg, stomach troubles.)

in English: dysentery herb

in Southern Africa: igqitha, iGqita (Xhosa)

Monsonia glauca Knuth (*Monsonia ovata* Cav. subsp. *glauca* (Knuth) Bowden & T. Müller; *Monsonia stricta* R. Knuth)

South Africa.

See *Monadelphiae Classis Dissertationes Decem* 4: 193. 1787 and *Bot. Jahrb. Syst.* xl. 64. 1907, *Repert. Spec. Nov. Regni Veg.* 15: 137. 1918

(Astringent. Veterinary medicine, root infusion insecticide, pesticide, vermifuge.)

in English: dysentery herb

in Southern Africa: geitabossie, keitabossie, naaldebossie

Monstera Adans. Araceae

The origins and derivation are quite obscure, possibly from the Latin *mons*, *montis* (*emineo*, *promineo*) 'a mountain'

and *teres*, *retis* (*tero*) 'rounded off, smoothed, shapely', or from *monstrifer*, *era*, *erum* 'monster-bearing', or from *monstrum*, *i* (*moneo*) 'a warning, portent, wonder, monster, monstrosity, any unnatural person or thing', referring to the leaves; see *Familles des Plantes* (Adanson) 2: 470. 1763, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 4: 1028. 1830, *Genera Aroidearum exposita* 74. 1858, *The Genera of Plants* 5. 1866 and *Fieldiana, Bot.* 304–363. 1958, *Contributions from the Gray Herbarium of Harvard University* 207: 72, 90, 93. 1977, D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroideana*. 10: 15–25. 1988, *Monographs in Systematic Botany from the Missouri Botanical Garden* 92: 59–200. 2003. All species contain caustic and vesicant sap.

Monstera adansonii Schott (*Dracontium pertusum* L.; *Calla dracontium* G. Mey., nom. illeg.; *Calla pertusa* (L.) Kunth; *Monstera adansonii* var. *laniata* (Schott) Madison; *Monstera ecuadorensis* Engl. & K. Krause; *Monstera friedrichsthalii* Schott; *Monstera imrayana* Schott; *Monstera jacquini* Schott; *Monstera macrophylla* Schott; *Monstera pertusa* (L.) de Vriese, nom. illeg., non *Monstera pertusa* (Roxb.) Schott; *Monstera pertusa* (Roxb.) Schott; *Monstera pertusa* var. *laniata* (Schott) Engl.; *Philodendron pertusum* (L.) K. Koch & C.D. Bouché; *Pothos pertusus* Roxb.; *Tornelia laniata* Schott)

Tropical America.

See *Species Plantarum* 2: 967–968. 1753, *Familles des Plantes* 2: 470. 1763, *Flora Indica*; or descriptions of Indian Plants 1: 455–456. 1820, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 4: 1028. 1830, *Hortus Spaarn-Bergensis* 40–41. 1839, *Oesterreichisches Botanisches Wochenblatt* 4: 65–66. 1854, *Oesterreichische Botanische Zeitschrift* 8: 179. 1858, *Genera Aroidearum exposita* 74. 1858, *Oesterreichische Botanische Zeitschrift* 9: 40. 1859, *Prodr. Syst. Aroid.* 362. 1860, *Flora Brasiliensis* 3(2): 114. 1878 and *Das Pflanzenreich* IV. 23B (Heft 37): Fam. 23B: 107. 1908, *Contributions from the Gray Herbarium of Harvard University* 207: 38. 1977

(This species is reported to be irritant; very caustic juice of the leaves used as a vesicant and to cauterize wounds, applied to snakebite wounds to neutralize the venom.)

in Northwestern Amazonia: chupon khaki (Kofan); suso-iko (Shushufindi Siona)

in Brazil (Amazonas): xaa a

Monstera adansonii Schott var. *laniata* (Schott) Madison (*Heteropsis ovata* Miq.; *Heteropsis surinamensis* Miq.; *Monstera adansonii* Schott; *Monstera crassifolia* Schott; *Monstera ecuadorensis* Engl. & K. Krause; *Monstera fenestrata* Schott; *Monstera friedrichsthalii* Schott; *Monstera holtoniana* Schott; *Monstera milleriana* Schott; *Monstera ovata* (Miq.) Schott; *Monstera pertusa* var. *laniata* (Schott) Engl.; *Monstera poeppigii* Schott; *Monstera siltepecana*

Matuda; *Monstera surinamensis* (Miq.) Schott; *Tornelia laniata* Schott; *Tornelia lindenii* Schott ex Engl.)

Trop. America.

See *Species Plantarum* 2: 968. 1753, *Wiener Zeitschrift für Kunst, Litteratur, Theater und Mode* 4: 1028. 1830, *Oesterreichisches Botanisches Wochenblatt* 4: 65. 1854 and *Revista de la sociedad mexicana de historia natural* 11: 97, t. 2, f. 9. 1950

(This species is reported to be irritant.)

Monstera deliciosa Liebm. (*Monstera borsigiana* K. Koch; *Monstera deliciosa* var. *borsigiana* Engl.; *Monstera deliciosa* var. *sierrana* G.S. Bunting; *Monstera lennea* K. Koch; *Monstera tacanaensis* Matuda; *Philodendron anatomicum* Kunth; *Tornelia fragrans* Gut. ex Schott, nom. illeg.)

Mexico to C. America.

See *Familles des Plantes* 2: 470. 1763, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1: 19–20. 1849, *Monographiae Phanerogamarum* 2: 266–267. 1879 and *Das Pflanzenreich* IV Fam. 23B (Heft 37): 111. 1908, *Gentes Herbarum*; occasional papers on the kind of plants 9: 320, f. 228. 1965, Der Marderosian, A.H., Giller, F.B., Roia, F.C. “Phytochemical and toxicological screening of household ornamental plants potentially toxic to humans. 1.” *J. Toxicol. Environ. Health*, 1: 939–953. 1976, *Genética Ibérica* 30–31: 161–188. 1979, *Acta Botanica Austro Sinica* 5: 161–176. 1989, *Phytother. Res.* 18(1): 73–77. 2004 [The effect of medicinal plants of Islamabad and Murree region of Pakistan on insulin secretion from INS-1 cells.], *Biodiversidad del estado de Tabasco* Cap. 5: 111–144. 2005

(All species contain caustic and vesicant sap. Unripe fruit acrid and contains calcium oxalate crystals; ingesting the ripened fruit can cause rapidly developing urticaria (hives) in sensitive individuals. The leaves can cause problems if chewed by humans or family pets. Crystals are not poisonous, the insoluble oxalates do not cause systemic poisoning in humans. Potential natural resources for antidiabetic compounds.)

in English: ceriman, delicious monster, fruit salad plant, hurricane palm, Mexican bread fruit, Swiss-cheese plant, windowleaf

in Japan: hôrai-shô

in Latin America: camachillo, cerimán de Méjico, chirrivaca, costilla de adan, guela gutzi, piñanona

in Brazil: chagas-de-São-Sebastião (= St. Sebastian’s wounds), dragão-fedorento, folha-furada, folha-reta, imbéfarado, imbé-de-são-pedro

in La Réunion: fruit délicieux

in Mauritius: banane Anglaise, taro vine

Monstera dubia (Kunth) Engl. & K. Krause (*Marcgravia dubia* Kunth; *Monstera acreana* K. Krause; *Monstera dubia* Engl. & K. Krause; *Monstera irritans* Simmonds)

Tropical America.

Ethnopharm.* 11: 135–136. 1984, *Nordic Journal of Botany* 9: 119–166. 1989, *Int. J. Pl. Sci.* 158: 408–417. 1997, E. Gordon, “Contribución a la ecología de *Montrichardia arborescens* (L.) Schott (Araceae). II. Biomasa y producción = Contribution to the ecology of *Montrichardia arborescens* (L.) Schott (Araceae). II. Biomass and production.” *Acta Biologica Venezuelica* 21(1): 53–66. 2001

(The abundant acrid and caustic sap of this plant has caused dermatitis. The milky juice of the stem used in the treatment of deep cuts (external), also against nose bleeding, sore eyes; sap applied to ulcers in a poultice. Parboiled leaves poulticed for erysipelas. Dried roots and leaves decoction taken to relieve hypertension. Shoots juice used for shamanic practices.)

in South America: aninga, arracacho, arum lily, boroboro, castano, chupaya, malanga-gratter, moco moco, mocou mocou, moka-moka, moko moko, mokumoku, moli-ua, pup-pua, rabano, raya-balsa, yautia-madera

in French Guiana: arum du pays

Montrichardia linifera (Arruda) Schott (*Arum liniferum* Arruda; *Caladium liniferum* (Arruda) Nees; *Philodendron cyclophyllum* K. Krause)

Trop. South America. From the inner fleshy cortex of the stem a strongly acid caustic juice

(Leaves antirheumatic and effective in curing ulcers, parboiled leaves poulticed for erysipelas. Sap applied to ulcers in a poultice. Root diuretic although poisonous.)

Vernacular names: aninga, linga

Mora Benth. Fabaceae (Caesalpinieae, Caesalpinieae)

From a South American vernacular name, see *Systema Vegetabilium*, editio decima sexta 4(2): 404. 1827, *Transactions of the Linnean Society of London* 18: 209–211. 1839.

Mora excelsa Benth. (*Dimorphandra excelsa* Baill.; *Dimorphandra excelsa* (Benth.) Baill.; *Dimorphandra guianensis* Baill.; *Dimorphandra guianensis* (Schomburgk ex Benth. & Hook.f.) Baill.; *Dimorphandra mora* Benth. & Hook.f.; *Dimorphandra mora* R.H. Schomb. ex Benth.; *Mora guianensis* Schomburgk ex Benth. & Hook.f.; *Mora guianensis* Benth. & Hook.f.)

Guyana, Trinidad. Perennial non-climbing tree, small cream flowers, pod leathery or woody, seeds deeply kidney-shaped

See *Transactions of the Linnean Society of London* 18: 210, pl. 16–17. 1839, *Gen. Pl.* [Bentham & Hooker f.] 1(2): 588. 1865 [19 Oct 1865], *Histoire des Plantes* 2: 149, 167. 1870 and *Bull. Misc. Inform.* 1932(8): 395–406. 1932

(Pink decoction of the bark with a disagreeable nauseating odour and aftertaste, said to be purgative. Bark infusion taken for severe dysentery. Bark pounded and used as a fish poison.)

in English: black mora, red mora, sand mora

in Venezuela: mora

Moraea Miller Iridaceae

Named in honor of the British (Esquire of Shropshire) Robert More, 1703–1780, an amateur botanist and natural historian, 1729 Fellow of the Royal Society of London, traveller, friend of Linnaeus; according to Georg Christian Wittstein (in *Etymologisch-botanisches Handwörterbuch*. 594. Ansbach 1852) and N.E. Brown (in *Journal of the Linn. Soc., Botany*. 48: 40–41. 1928) Miller changed *Morea* to *Moraea* in honor of Dr. Johan Moraeus, father of Sara Elisabeth Moraea, wife of Linnaeus; see George H.M. Lawrence, “Derivation of the generic name *Moraea* (Iridaceae).” *Baileya*. 3(3): 130. 1955, Goldblatt, P. “Systematics of *Moraea* (Iridaceae) in Tropical Africa.” *Annals of the Missouri Botanical Garden* 64: 243–295. 1978, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 292. Basel 1996. *Moraea* and *Homeria* are poisonous and pose significant problems in cattle- and sheep-raising areas, notably in southern Africa.

Moraea carsonii Baker (*Moraea homblei* De Wild.)

Sudan to N. Botswana. Herb, erect, flat leaves, flowers pale purple

See *Figures of Plants in the Gardeners Dictionary* 159, t. 238. 1758, *Bulletin of Miscellaneous Information Kew* 1894: 391. 1894 and *Contr. Fl. Katanga*, Suppl. 4: 7. 1932, *Flora of Tropical East Africa*: 1–89. 1996, *Annals of the Missouri Botanical Garden* 84: 285–304. 1997, Geerinck, D. *Flore d’Afrique Centrale* (Zaire - Rwanda - Burundi) *Iridaceae*: 1–102. Jardin Botanique National de Belgique, Meise. 2005

(Poisonous.)

Moraea schimperii (Hochst.) Pic. Serm. (*Hymenostigma schimperii* Hochst.; *Hymenostigma tridentatum* Hochst.; *Iris diversifolia* Merino; *Iris diversifolia* Steud. ex A. Rich.;

Moraea diversifolia (Klatt) Baker; *Moraea diversifolia* Baker; *Moraea hockii* De Wild.; *Moraea welwitschii* Baker; *Moraea zambeziaca* Baker; *Moraea zambeziaca* Baker, nom. nud.; *Vieusseuxia schimperii* (Hochst.) Hochst. ex A. Rich.; *Vieusseuxia schimperii* Hochst. ex A. Rich.; *Vieusseuxia tridentata* (Hochst.) Hochst. ex A. Rich.; *Vieusseuxia tridentata* Hochst. ex A. Rich.; *Xiphion diversifolium* Klatt)

Trop. Africa. Herb, perennial, stem purple, perianth purple-blue, purple flowers arising from white bulbs or corms, outer tepals red-purple with bright yellow patch at base, inner tepals light blue-purple, stigma and anthers deep purple, cream-orange nectar guides, sheathing bracts reddish, fruit pale purple-green

See *Flora* 27(1): 24–25. 1844, *Tent. Fl. Abyss.* 2: 305. 1850, *Linnaea* 34: 572. 1866, *Journal of the Linnean Society, Botany* 16: 130. 1877 [1878 publ. 1877], *Trans. Linn. Soc. London, Bot.* 1(5): 270. 1878 [1880 publ. Jan 1878], *Handb. Irid.* 51. 1892 and *Bol. Soc. Arag.* vii. 225. 1908, *Repert. Spec. Nov. Regni Veg.* 11: 540. 1913, *Webbia* 7: 349. 1950, *Annals of the Missouri Botanical Garden* 84: 285–304. 1997

(Poisonous or suspected of poisoning sheep, stock.)

in English: Zambesi tulip

in East Africa: mahangala

in Zimbabwe: Zambesi tulp

Moraea thomsonii Baker (*Moraea mossii* N.E. Br.; *Moraea stricta* Baker; *Moraea trita* N.E. Br.)

W. Tanzania. Erect herb, wiry stem, brown stems straw-like, grass-like leaf, expanded flowers, petals elliptic, flowers pale lilac with orange markings on the sepals, stamens petaloid and divided into two at the tip

See *Handbook of the Irideae* 57. 1892 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 49: 178. 1904, *Transactions of the Royal Society of South Africa* 17: 347. 1929, Strugnell, A.M. “A checklist of the Spermatophytes of Mt. Mulanje, Malawi.” *Scripta Botanica Belgica* 34: 1–199. 2006

(Suspected of poisoning.)

in East Africa: embergoi, olperesi l’angamba, sekwe

Morella Lour. Myricaceae

A dark-red cherry, referring to the fruits, sometimes included in *Myrica* L.; see *Flora Cochinchinensis* 537, 548. 1790 and *Mém. Soc. Sci. Nat. Math. Cherb.* 32: 85. 1901, *Sida* 16: 99. 1994, Killick, D.J.B. et al. “New combinations in African Myricaceae.” *Kew Bulletin* 53: 993–995. 1998, *Brittonia* 52: 320–324. 2000, *Rhodora* 103: 120–122. 2001.

Morella cerifera (Linnaeus) Small (*Cerophora lanceolata* Rafinesque; *Cerothamnus arborescens* (Castiglioni) Tidestrom; *Cerothamnus cerifer* (L.) Small; *Cerothamnus*

ceriferus (Linnaeus) Small; *Cerothamnus pumilus* (Michaux) Small; *Morella cerifera* (L.) Small var. *pumila* (Michx.) Kartesz; *Myrica cerifera* L.; *Myrica cerifera* var. *angustifolia* C. DC.; *Myrica cerifera* var. *angustifolia* Aiton; *Myrica cerifera* var. *arborescens* Castiglioni; *Myrica cerifera* var. *dubia* A. Chevalier; *Myrica cerifera* var. *pumila* Michaux; *Myrica mexicana* Humb. & Bonpl. ex Willd.; *Myrica pumila* (Michaux) Small; *Myrica pusilla* Rafinesque; *Myrica xalapensis* Kunth)

North and Central America, Bermuda. Perennial, small many-branched tree or a shrub, strictly dioecious, oblanceolate aromatic glandular leaves, flower catkins/clusters from the old wood, spirally arranged scale-like bracts tightly enclosing the developing flowers, ripe glandular drupes clustered, an extremely variable species, see also *Myrica cerifera*

See *Species Plantarum* 2: 1024–1025. 1753, *Flora Cochinchinensis* 537, 548. 1790, *Flora Boreali-Americana* 2: 228. 1803, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 1011. 1809, *Nova Genera et Species Plantarum* (quarto ed.) 2: 16. 1817, *Alsographia Americana* 10–11. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2A): 149. 1864 and *Flora of the Southeastern United States* 337, 1329. 1903, *Elysium Marianum*. *Ferns* 41. 1910, *Flora of Miami* 61, 200. 1913, *Shrubs of Florida* 8, 133. 1913, *Castanea* 31: 183–185. 1966, *Journal of Japanese Botany* 62: 183–188. 1987, *Caldasia* 23(1): 136–137. 2001, *Ceiba* 44(2): 105–268. 2003 [2005]

(Leaves used for a gynecological aid and an emetic; the bark, as a blood purifier and a kidney aid. Leaves and stems decoction to treat fevers; and roots, to treat inflamed tonsils and stomachaches, and as a stimulant.)

in English: bayberry, candleberry, southern bayberry, southern wax-myrtle, wax myrtle

Morella kandiana (Engl.) Verdc. & Polhill (*Myrica kandiana* Engl.)

Tanzania. Herb, shrub or short tree, multi-branched, spreading, small flowers greenish-yellow, inflorescences produced on the old wood, fruit green when young black when mature, fruits papillate or with waxy exudate, grassland, in seasonal swamp

See *Species Plantarum* 2: 1024–1025. 1753, *Flora Cochinchinensis* 537, 548. 1790 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 278. 1910, *Kew Bulletin* 53: 994. 1998, *Journal of Ethnopharmacology* 70: 281–300. 2000

(Roots used as medicine for malaria, stomachache, headache; bark laxative, for diarrhea.)

in Congo: cikobarhi, hifukamarhende

in East Africa: mkekimbo

in Rwanda: isubyo, umusendese

in Tanzania: mikikimbo mikikimbo

Morella parvifolia (Benth.) Parra-Os. (*Myrica parvifolia* Benth.; *Myrica parvifolia* var. *longipedunculata* A. Chev.; *Myrica parvifolia* var. *lucens* A. Chev.; *Myrica parvifolia* var. *macrostachya* A. Chev.; *Myrica parvifolia* var. *major* A. Chev.; *Myrica parvifolia* var. *obtusata* Benth.)

South America. Shrub, essential oils

See *Plantas Hartwegianas imprimis Mexicanas* 251. 1846 and *Mém. Soc. Sci. Nat. Math. Cherbourg* 32: 284–286. 1901, *Monogr. Myricacées*, 200–202. 1901, *Brittonia* 54(4): 324. 2002 (publ. 2003)

(Leaves and stems burned and the aromatic smoke used to relieve pulmonary troubles. Tonic for women.)

in Ecuador: laurel de cera

Morella pubescens (Humb. & Bonpl. ex Willd.) Wilbur (*Myrica arguta* Kunth; *Myrica arguta* var. *peruviana* C. DC.; *Myrica arguta* var. *tinctoria* C. DC.; *Myrica caracasana* Kunth; *Myrica costata* Rusby; *Myrica interrupta* Benth.; *Myrica macrocarpa* Kunth; *Myrica polycarpa* Kunth; *Myrica pubescens* Humb. & Bonpl. ex Willd.; *Myrica pubescens* var. *caracasana* (Kunth) A. Chev.; *Myrica pubescens* var. *glandulosa* A. Chev.; *Myrica pubescens* var. *interrupta* (Benth.) A. Chev.; *Myrica pubescens* var. *tomentosa* A. Chev.)

South America.

See *Species Plantarum* 2: 1024–1025. 1753, *Species Plantarum*. Editio quarta 4(2): 746–747. 1806, *Nova Genera et Species Plantarum* (quarto ed.) 2: 18. 1817, *Plantas Hartwegianas imprimis Mexicanas* 251. 1846 and *Mémoires de la Société des Sciences Naturelles et Mathématiques de Cherbourg* 32: 294. 1901, *Descriptions of Three Hundred New Species of South American Plants* 8. 1920, *Rhodora* 103(913): 121. 2001, *Brittonia* 54(4): 322–326. 2002[2003], *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 681–683. 2007

(Tonic for women after childbirth, a postpartum remedy.)

in Ecuador: laurel de cera

Morella salicifolia (A. Rich.) Verdc. & Polhill (*Myrica salicifolia* Hochst. ex A. Rich.; *Morella salicifolia* (Hochst. ex A. Rich.) Verdc. & Polhill)

West Africa. Tree, thick corky bark, fire-resistant

See *Journal of Ethnopharmacology* 9: 105–128. 1983, *Journal of Ethnopharmacology* 29: 295–323. 1990, *Kew Bull.* 53(4): 995. 1998, *Journal of Ethnopharmacology* 97: 421–427. 2005, *Journal of Ethnopharmacology* 111: 271–283. 2007

(Bark and roots for sexual impotence and erectile dysfunction; root or stem bark ground with water and the extract drunk in diarrhea, bloody dysentery. Veterinary medicine.)

in Burundi: umusengese, umusengesenge

in Congo: ikijige

in Ethiopia: abaya, kalawa, kataba, nebi, radji, scinet, shinet, shinett

in Kenya: kitaloswa, mangwe

in Rwanda: umusengese, umusengesi, umushengeshe, umushengeshi, urusengese

in Tanzania: isinzivilizi, mawache, mbashe, mmungi, mshegheshe, mwangwi, orkitalaswa

in Uganda: mujeje

Morella salicifolia (A. Rich.) Verdc. & Polhill var. ***kilimandscharica*** (Engl.) Verdc. & Polhill (*Myrica kilimandscharica* Engl.; *Myrica usambarensis* Engl.)

West Africa.

See *Abhandlungen der Preussischen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 2: 188. 1891–1892 and *Kew Bulletin* 53(4): 995. 1998, *Journal of Ethnopharmacology* 97: 327–336. 2005

(Root stimulant, excitant, used to treat epilepsy; bark for cough.)

in Kenya: olkitolosua

in Tanzania: mdaula, msegeshe, mshegeshe, olkitolua

Morina L. Caprifoliaceae (Dipsacales, Morinaceae)

After the French physician Louis Morin, 1636–1715, botanist, author of *Quaestio medica, C. Guerin Praes. An sit insita alicui homini naturaliter vis curandi morbos?* [Paris 1666] and *Quaestio medica, C. Le Vasseur Praes. An annus qui fructuum idem et morborum ferax.* [Paris 1665]; see *Species Plantarum* 1: 28. 1753, *Annales Générales des Sciences Physiques* 6: 88. 1820, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 644–645. 1830, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 595. Ansbach 1852, *Beitrage zur Kenntniss des Russischen Reiches und der Angranzenden Lander Asiens...* St. Petersburg 145. 1852 and *Annales des Sciences Naturelles; Botanique, série* 9 10: 199. 1909, *Bulletin of the British Museum (Natural History)*, *Botany* 12(1): 15. 1984, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 136f. 1989, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 395. [b. 1635] 1996.

Morina coulteriana Royle

Himalaya.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 245. 1833–1840

(Roots paste applied on wounds; a decoction in high fever and in snake and scorpion bite. Roots burnt along with *Juniperus* for incense in *gompas*. Magico-religious, plants hung over the doors to keep out all ill happenings.)

in India: dayela, kane, nirvisi, shalgudi

Morina longifolia Wall. (*Morina longifolia* Wall. ex DC.)

India, Nepal, Himalaya. Herb

See *A Numerical List of Dried Specimens* [Wallich] 426. 1829, *Prodr.* (DC.) 4: 644. 1830

(Veterinary medicine, root extract to remove intestinal worms.)

in India: biskandra, biskandru, jema menthok

in Nepal: panche

Morina nepalensis D. Don var. ***nepalensis*** (*Morina betonicoides* Benth.; *Morina nana* Wall. ex DC.; *Morina nana* Wall.)

Himalaya.

See *Prodr. Fl. Nepal.* 161. 1825, *Numer. List* [Wallich] n. 424. 1829, *Mémoires de la Société Linnéenne de Paris* 4: 645. 1830, *Hooker's Icones Plantarum* 12: 63–64, t. 1171. 1873

(Aerial parts used as emetic and purgative.)

Morinda L. Rubiaceae

Indian mulberry, Latin *morus* and *indicus*, *indica*, because of the shape of the fruits; see Carl Linnaeus, *Species Plantarum*. 1: 176. 1753, *Species Plantarum* 2: 991–992. 1753, *Genera Plantarum*. Ed. 5. 81. 1754, *Familles des Plantes* 2: 146, 598. 1763, *Flora Cochinchinensis* 96, 146. 1790, *Nat. en Geneesk. Arch. Neerl. Indie*, ii. (1845) 2. 1845, *Museum Botanicum* 1: 179. 1850, *Mém. Acad. Roy. Sci. Lyon, Sect. Sci.* 10: 225. 1860, *Genera Plantarum* 2(1): 120. 1873 and *J. Bot.* 64(Suppl. 2): 30. 1926, *Contributions from the University of Michigan Herbarium* 8: 86–87. 1942, Brunel, J.F., Hiepo, P. & Scholz, H. (eds.) *Flore Analytique du Togo Phanérogames*. 1984, *J. Biol.* (Vietnam) 7(4): 40. 1985, Turner, I.M. *A Catalogue of the Vascular Plants of Malaya*. *Gardens' Bulletin*. Singapore 47: 347–655. 1995 (publ. 1997), *Fl. Reipubl. Popularis Sin.* 71(2): 337. 1999, Harris, D.J. *The Vascular Plants of the Dzanga-Sangha Reserve, Central African Republic*. Meise 2002, Chamchumroon, V. & Puff, C. “The Rubiaceae of Ko Chang, Southeastern Thailand.” *Thai Forest Bulletin (Botany)* 31: 13–26. 2003, Beaman, J.H. & Anderson, C. *The Plants of Mount Kinabalu* 5: 1–609. Natural History Publications (Borneo). 2004, *Scripta Botanica Belgica* 35: 1–438. 2006, Akoègninou, A., van der Burg, W.J. & van der Maesen, L.J.G. (eds.) *Flore Analytique du Bénin*. 2006, *Blumea* 51(2): 199–220. 2006.

Morinda angustifolia Roxb. (*Morinda angustifolia* Roth; *Morinda angustifolia* var. *scabridula* Craib; *Morinda squarrosa* Buch.-Ham.)

India, Himalaya. Low shrub, leaves oblanceolate membranous, white fragrant flowers, turbinate fruits, roots yield a yellow dye

See *Pl. Coromandel* 3: 32. 1815, *Nov. Pl. Sp.* 147. 1821, *Trans. Linn. Soc. London* 13: 535. 1822, *FBI* 3: 156. 1880 and *Fl. Siam.* 2: 174. 1934

(A paste of flowers of *Mesua ferrea* with shoots of *Morinda angustifolia* and ginger given in heart troubles. Bark for toothache. In giddiness, leaf decoction rubbed on forehead or taken orally; in sore feet, feet dipped in leaf decoction. Root juice and paste in insect bites and in fever; roots extract taken to cure jaundice and dysentery.)

in Bangladesh: tara taba

in India: achu goch, asu goch, chenong, chhengrong, chhen-nong, dieng siroi, jang-tarlaung, kanthu-araung, konthu, lum, tarlaung-araung, thingaieng

Morinda capitellata Wall. ex Foxworthy

Malay Peninsula.

See Foxworthy, Frederick William (1877–1950), [*Timbers of British North Borneo*. ii. Minor forest products and jungle produce.] 3rd ed., *Bull. Dep. For. B.N. Borneo*, no. 1, 1922. vii, 61 p.

(Leaves for snakebite. Roots astringent, for dysentery and diarrhea.)

Malay names: akar kemeniyan hantu, akar sutnibut

Morinda citrifolia L. (*Morinda angustifolia* Roth, nom. illeg.; *Morinda aspera* Wight & Arn.; *Morinda bracteata* Roxb., nom. illeg.; *Morinda chachuca* Buch.-Ham.; *Morinda chrysorhiza* DC.; *Morinda citrifolia* Hunter, nom. illeg., non *Morinda citrifolia* L.; *Morinda citrifolia* f. *potteri* (O. Deg.) H. St. John; *Morinda citrifolia* var. *bracteata* (Roxb.) Kurz; *Morinda citrifolia* var. *bracteata* (Roxb.) Hook.f., nom. illeg.; *Morinda citrifolia* var. *elliptica* Hook.f.; *Morinda citrifolia* var. *potteri* O. Deg.; *Morinda coreia* var. *stenophylla* (Spreng.) Chandrab.; *Morinda elliptica* (Hook.f.) Corp., Cambridge, England, Chadwyck-Healey, 1987.

Mortonia scabrella A. Gray

North America. Perennial shrub

See *Smithsonian Contributions to Knowledge* 5(6): 28–29. 1853

(Used for hunting and fishing.)

in English: Rio Grande saddlebush

Mortonia sempervirens A. Gray

North America. Perennial shrub

See *Smithsonian Contributions to Knowledge* 3(5): 35, t. 4. 1852, *Smithsonian Contributions to Knowledge* 5(6): 28–29. 1853

(Used for hunting and fishing.)

in English: Rio Grande saddlebush

Morus L. Moraceae

Latin *morum* and Greek *moron* for a mulberry, a blackberry, Latin *morus* and Greek *mora* or *morea* for a mulberry-tree; see Carl Linnaeus, *Species Plantarum*. 2: 986. 1753, *Genera Plantarum*. Ed. 5. 424. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* 17: 247. 1873 and *Fieldiana, Bot.* 24(4): 10–58. 1946, *Bulletin du Muséum d'Histoire Naturelle*, sér. 2 21: 732. 1949, *Bull. Jard. Bot. Belg.* 47: 267–407. 1977, *Cytologia* 55: 327–333. 1990, H. Genauast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 396. 1996.

Morus alba L. (*Morus acidosa* Griff.; *Morus alba* Bureau; *Morus alba* Sudw.; *Morus alba* var. *indica* Bureau; *Morus alba* var. *nigriformis* Bureau; *Morus alba* var. *stylosa* Bureau; *Morus alba* var. *tatarica* (Linnaeus) Seringe; *Morus australis* Poir.; *Morus australis* var. *hastifolia* (F.T. (Fresh juice from the bark applied on boils, itches, sores. Bark and leaf extracts used to treat coughs and respiratory disorders.)

in English: white mulberry, yellow mulberry

in China: nai sang

in India: bola, gaai, tut

in Myanmar: labri, malaing, posa, tawposa, tawpweesa

in Nepal: kimbu, kimu, nambyong

in Sikkim: senta, singtok

Morus nigra L.

Cosmopolitan.

See *Species Plantarum* 2: 986. 1753 and *Fl. Iran.* 153: 2. 1982, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 32: 59–65. 1985, *Cytologia* 55: 505–509. 1990

(Used in Unani. Astringent.)

in English: black mulberry, common mulberry

in Brazil: amora

in South Africa: swart moerbe

in Arabic: tout arbi

in China: hei sang

in India: baokhamba, kampali ppucciceti, mucukkattai, mucurkkacaicceti, rub tut siyah, shahtut, toot siyah

in Pakistan: shah tut

Morus rubra Linnaeus (*Morus rubra* var. *tomentosa* (Rafinesque) Bureau)

North America. Tree, monoecious, deciduous, twigs articulate, milky latex present, cordate leaves with toothed margins, male and female flowers mostly in separate pendulous

spikes, flowers always on the new growth, fleshy bracts of each flower enclosing the single seed, should not be confused with the paper-mulberry, *Broussonetia papyrifera*

See *Species Plantarum* 2: 986. 1753 and *Biologia* 54: 43–49. 1999

(Bark infusion for dysentery, also a laxative and purgative; root infusion for urinary problems; tree sap rubbed directly on the skin as treatment for ringworm.)

in North America: moral, mûrier rouge, red mulberry

Morus serrata Roxb. (*Morus alba* var. *serrata* (Roxb.) Bureau; *Morus gyirongensis* S.S. Chang; *Morus pabularia* Decne.)

China, India, Himalaya. Tree, leaves provide food for silkworms

See *Flora Indica*; or, descriptions of Indian Plants 3: 596. 1832, *Jacquem. Voy.* 4(Bot.): 149, t. 151. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 17: 242. 1873 and *Acta Phytotaxonomica Sinica* 20(1): 95–96, t. 1. 1982, *J. Cytol. Genet.* 24: 179–183. 1989, *Glimpses Cytogenet. India* 2: 203–211. 1989, *Cytologia* 54: 747–751. 1989

(Bark purgative, anthelmintic.)

in English: Himalayan mulberry

in China: ji long sang

in India: himu, kartut, kinu

Mosla (Benth) Buch.-Ham. ex Maxim. Lamiaceae (Labiatae)

From the vernacular name in India, see *Synopsis Plantarum* (Persoon) 2(1): 131. 1806, *Labiatarum Genera et Species* 366. 1834, *Journal of the Linnean Society, Botany* 9: 167. 1865, *Bulletin de l'Académie Impériale des Sciences de St.-Petersbourg* 20(3): 456–458. 1875.

Mosla cavaleriei H. Léveillé (*Orthodon cavaleriei* (H. Léveillé) Kudô)

China, Vietnam.

See *Repertorium Specierum Novarum Regni Vegetabilis* 9(211–213): 247–248. 1911, *Mem. Fac. Sci. Taihoku Imp. Univ.* 2: 81. 1929

(Astringent, stimulant.)

in English: Cavalerie mosla

in China: xiao hua qi zhu

Mosla chinensis Maximowicz (*Calamintha clipeata* Vaniot; *Mosla chinensis* var. *kiangsiensis* G.P. Zhu & J.L. Shi; *Mosla fordii* Maximowicz; *Orthodon chinensis* (Maximowicz) Kudô; *Orthodon fordii* (Maximowicz) Handel-Mazzetti)

China, Japan, Taiwan, Vietnam.

See *Mem. Fac. Sci. Taihoku Imp. Univ.* 2: 75. 1929, *Acta Horti Gothob.* 9: 89. 1934, *Acta Phytotax. Sin.* 33: 305. 1995

(Diaphoretic, stimulant.)

in English: Chinese mosla

in China: shi xiang ru, shi xiang rou

Mosla dianthera (Buch.-Ham. ex Roxb.) Maxim. (*Cunila buchananii* Spreng.; *Cunila nepalensis* D. Don; *Hedeoma napalensis* Benth.; *Hedeoma nepalensis* (D. Benth.; *Mostuea ulugurensis* Gilg; *Mostuea vankerkhovenii* De Wild.; *Mostuea walleri* Baker; *Mostuea zenkeri* Gilg)

Tropical Africa. Shrub or undershrub, liana, many-branched, spreading branches, fruit a 2-lobed glabrous or hairy capsule

See *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1853: 87. 1854, *Journal of the Linnean Society, Botany* 8: 160, t. 12. 1864 [1865 publ. 1864], *Hooker's Icones Plantarum* 12: 83. 1876, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 245–246. 1880, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 7: 339–340. 1886, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 17: 561. 1893, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 73. 1895, *Kew Bulletin* 1895: 96. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 198. 1896, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28: 116–117. 1899 and *Bulletin de la Société Botanique de Belgique* 39(2): 67. 1900, *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 173–174. 1904, *British Museum, Natural History. Catalogue of the plants collected by Mr. & Mrs. P.A. Talbot in the Oban district South Nigeria ...* 66. 1913, *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907–1908, Botanik* 2: 530. 1914, *Bulletin du Jardin Botanique de l'État* 5: 15. 1915, *Journal of Botany, British and Foreign* 67: 100. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 675. 1932, *Bulletin du Muséum d'Histoire Naturelle* 29: 513. 1957, *Journal of Natural Products* 62(10): 1427–1429. 1999, *Phytochemistry* 65(20): 2735–2749. 2004

(A natural source of the terpenoid indole alkaloid camptotecin, two semi-synthetic derivatives, topotecan and irinotecan, are currently prescribed as anticancer drugs. Young leaves eaten to treat stomach complaints; twigs and leaves for body pain, intestinal pain, colitis, dysentery. Root decoction or infusion aphrodisiac, vermifuge, analgesic, taken to treat colds, yellow fever, kidney troubles; root chewed to treat stomachache; crushed roots applied to wounds and snakebites. Root bark as ingredient of arrow poison.)

Mostuea hirsuta (T. Anderson ex Benth.) Baill. ex Baker (*Coinochlamys gabonica* Solereder; *Coinochlamys hirsuta* T. Anderson ex Benth. & Hook.f.; *Coinochlamys hirsuta* T. Anderson ex Benth.; *Mostuea gabonica* Baill.; *Mostuea hirsuta* (T. Anderson ex Benth. & Hook.f.) Baill. ex Baker; *Mostuea hirsuta* (T. Anderson ex Benth.) Baill.; *Mostuea periquetii* Pellegr.)

Tropical Africa. Shrub or undershrub, scandent, erect or decumbent, inflorescence a congested terminal cyme on a short lateral branch

See *Genera Plantarum* 2: 1091. 1876, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 244–245. 1880, *Nat. Pflanzenfam.* [Engler & Prantl] iv. 2. (1892) 29. 1892 and *Flora of Tropical Africa* 4(1): 509. 1903, *Bull. Mus. Natl. Hist. Nat.* 1919, xxv. 506. 1919

(Leaf sap applied to treat pain caused by caries. Roots febrifuge, analgesic, antiseptic, astringent, for skin diseases, venereal diseases; root infusion taken to treat colds and rheumatism. Root bark a powerful stimulant and aphrodisiac, antimalarial and antileishmanial; root decoction taken as an anthelmintic by children. Roots and stem bark hallucinogenic, aphrodisiac, febrifuge, psychodysleptic, stimulant, narcotic, tonic, for neurasthenia, fevers, extended use may lead to cerebral troubles. Root bark as ingredient of arrow poison.)

Moullava Adans. Fabaceae (Caesalpinieae, Caesalpinieae, Leguminosae)

Moullava spicata (Dalzell) Nicolson (*Caesalpinia spicata* Dalzell; *Wagatea spicata* (Dalzell) Wight) (*Wagatea* Dalzell, a local Marathi name derived from Sanskrit *vaghanti*, *vag* 'tiger', referring to the plant, a thorny scrambler.)

India. Perennial non-climbing shrub, scrambler, robust, woody climber or non-climbing, yellow recurved prickles, yellow flowers, oblong or ovate-oblong pods, seeds ovate or ovate-oblong, often confused with *Caesalpinia digyna* Rottler

See *Familles des Plantes* 2: 318, 579. 1763, *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 89–90. 1851 and *Ind. Gen. Vasc. Pl.* 1753–74 (Regn. Veg.li.) 66. 1967, *Botany and History of Hortus Malabaricus* 181–185. 1980, *Pharmaceutical Biology* 20(2): 87–88. 1982, *Ancient Science of Life* 6(4): 238–243. 1987, *Food Chemistry* 115(2): 631–634. 2009

(Used in Sidha. Free radical scavenging action. Bark decoction used in eczema and skin diseases. Leaf paste applied on boils. Crushed fruits given as tonic and for relieving body pain; young pods in constipation. Roots used in pneumonia and skin diseases; tuberous roots eaten as a tonic.)

in English: candy corn plant, false thorn, rat bean

in India: gajegabilu, gajigabilu, gajjiga balli, gajjigaballi, hooliganji, kadance, karantikkonrai, karantipputu, karingi, kodanchi, kuldajaga, nariverutti, okkadikkodi, okkatikkoti,

puli naga kondrai, pulinaka-k-konrai, pulinakakkonrai, pulinakkagondai, puliraki, pulirakippuntu, puliyukir, vagate, vagati, vakeri, varinakakkonrai, wagati, wakery, wakiry, wamera

Mucuna Adans. Fabaceae (Phaseoleae)

From *mucunã*, Brazilian (Tupi-Guarani) vernacular name for these plants; *mucunã* is also *Dioclea malacocarpa*. See *Fam. Pl.* (Adanson) 2: 325, 579. 1763, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 405. 1825, *The Flora of British India* 2: 186. 1879 and Huascar Pereira, *Apontamentos sobre madeiras do Estado de São Paulo*. Mucuna atropurpurea (Roxb.) Wight & Arn. (*Carpogon atropurpureum* Roxb.; *Mucuna atropurpurea* DC.; *Stizolobium atropurpureum* Kuntze; *Stizolobium atropurpureum* (Roxb.) Kuntze)

India. Perennial climbing shrub

See *Hortus Bengalensis*, or a catalogue ... 54. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 406. 1825, *Revisio Generum Plantarum* 1: 208. 1891

(Used in Sidha. Toxins. Bristles on pods cause dermatitis.)

in India: bhainswalibel, bu-chariya, buchariwa, dulagonid, erumaikkali, gededoolagondi, gededula, gededulagondi, ginipus-wel, gondi, pedda, peddoolagondi, peddoolikonda, peddadulagondi, periyatalarkoti, talargodi, tilikada, tillakaada, tillakanda

Mucuna biphlicata Kurz (*Mucuna atropurpurea* Baker; *Mucuna atropurpurea* DC.; *Mucuna biphlicata* Teijsm. & Binn.; *Mucuna biphlicata* Teijsm. & Binn. ex Kurz)

Indonesia, Thailand. Perennial climbing shrub

See *Prodr.* (DC.) 2: 406. 1825 and *Kew Bulletin* 47: 203–245. 1992

(Febrifuge, heat the leaves and apply them in a bandage to the abdomen. Bark sap applied to cuts and wounds.)

Malay name: kacang paleh

Mucuna bracteata DC. (*Carpogon bracteatum* Roxb., nom. nud.; *Mucuna brevipes* Craib; *Mucuna exserta* C.E.C. Fisch.; *Mucuna venulosa* (Piper) Merr. & F.P. Metcalf;

Stizolobium bracteatum (Roxb.) Kuntze; *Stizolobium bracteatum* Kuntze; *Stizolobium venulosum* Piper)

Eastern Himalayas, Burma, China. Perennial climbing shrub, edible fruit

See *The Civil and Natural History of Jamaica* in Three Parts 290. 1756, *Hortus Bengalensis*, or a catalogue ... 54. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 406. 1825, *Flora Indica*; or, descriptions of Indian Plants 3: 283. 1832, *Revisio Generum Plantarum* 1: 208. 1891 and *Proceedings of the Biological Society of Washington* 30(14): 60–61. 1917, *Lingnan Science Journal* 16(2): 196. 1937

(Hairs on the fruit used as vermifuge. Seeds tonic, aphrodisiac. Any part of the plant ground and the paste applied to cuts and injuries as a hemostatic agent.)

in China: huang mao li dou

in India: chaktali, wakmi, wilema

Mucuna coriacea Baker (*Mucuna rhynchosioides* Taub.; *Stizolobium coriaceum* (Baker) Kuntze)

Tropical Africa. Perennial climbing shrub

See *Familles des Plantes* 2: 325, 579. 1763, *An Introduction to the Natural System of Botany* 148. 1836, *Flora of Tropical Africa* 2: 187. 1871, *Revisio Generum Plantarum* 1: 208. 1891

(For skin diseases.)

in English: buffalo bean, fire bean, hell-fire bean

in Southern Africa: brandboontjie, chiriridzi, hurukuru, jeukpeul, uliri, ureri, uReri, uRiri

Mucuna elliptica (Ruiz & Pav.) DC. (*Mucuna elliptica* DC.; *Mucuna inflexa* (Ruiz & Pav.) DC.; *Mucuna inflexa* DC.; *Mucuna platycarpa* DC.; *Mucuna platycarpa* (Ruiz & Pav.) DC.; *Negretia elliptica* Ruiz & Pav.; *Negretia inflexa* Ruiz & Pav.; *Negretia platycarpa* Ruiz & Pav.; *Stizolobium ellipticum* (Ruiz & Pav.) Pers.; *Stizolobium ellipticum* Pers.; *Stizolobium inflexum* Pers.; *Stizolobium inflexum* (Ruiz & Pav.) Pers.; *Stizolobium platycarpum* (Ruiz & Pav.) Pers.; *Stizolobium platycarpum* Pers.)

South America, Peru. Perennial climbing shrub

See *Fl. Peruv. Prodr.* 98, t. 21. 1794, *Systema Vegetabilium Florae Peruvianaee et Chilensis* 1: 176, 178. 1798, *Synopsis Plantarum* (Persoon) 2(2): 299. 1807, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 405–406. 1825

(Powdered seeds antidote, applied to the stings of insects and to snakebites.)

Common name: llamapanau

Mucuna flagellipes Hook.f. (*Mucuna flagellipes* Vogel ex Benth.; *Stizolobium flagellipes* (Vogel ex Benth.) Kuntze; *Stizolobium flagellipes* Kuntze)

Tropical Africa. Perennial climbing shrub, vine, lianescent, woody, leaves pinnately 3-foliolate, flowers light

greenish-yellow, inflorescence an axillary pendent silvery hairy raceme on long herbaceous pendulous stalks, calyx campanulate 2-lipped, hard heavy fruits with stinging irritant urticating pubescence, in wet shaded localities, in riverine and swamp forests

See *Niger Flora* [W. J. Hooker]. 307. 1849, *Revisio Generum Plantarum* 1: 208. 1891

(Leafy twigs decoction astringent, emmenagogue, used for diarrhea, dysentery. Hairs on the fruit, which intensely irritate the skin, used in a medicine to expel tapeworm; pulverized fruits applied against lice.)

in Central African Republic: épi

in Congo: tsoko-mbele

in Ghana: gleemi, saman-te, tatwea

in Ivory Coast: blidué, blon dubu, eva

in Sierra leone: njo(-wi)

Mucuna gigantea (Willd.) DC. (*Carpopogon giganteum* (Willd.) Roxb.; *Carpopogon giganteus* Roxb.; *Dolichos gigantea* Willd.; *Dolichos giganteus* Willd.; *Mucuna gigantea* DC.; *Mucuna gigantea* subsp. *quadrialata* (Baker) Verdc.; *Mucuna gigantea* subsp. *tashiroi* (Hayata) H. Ohashi & Tateishi; *Mucuna grevei* Drake; *Mucuna longipedicellata* Hauman; *Mucuna quadrialata* Baker; *Mucuna tashiroi* Hayata; *Negretia gigantea* (Willd.) Oken; *Stizolobium giganteum* Moon; *Stizolobium giganteum* (Willd.) Spreng.; *Stizolobium giganteum* Spreng.; *Stizolobium giganteum* Kuntze; *Stizolobium giganteum* (Roxb.) Kuntze; *Stizolobium quadrialatum* (Baker) Kuntze; *Stizolobium quadrialatum* Kuntze)

Tropical Asia, Australia, Pacific Islands and Africa. Vine, climber, liana, woody, slender glabrous branches, flowers unscented, inflorescence an axillary pendulous false umbel, calyx cup-shaped 2-lipped, corolla pale creamy-green, legume hirsute densely covered with orange-brown bristle hairs, woody seeds, very variable, pollinated by bats, a littoral species, in coastal scrub, monsoon forest, on riverbanks, near water, in woodland and forest edges

See *Species Plantarum* 2: 725. 1753, *Familles des Plantes* 2: 325, 579. 1763, *Prodr.* 98. 1794, *Species Plantarum*. Editio quarta [Willdenow] 3(2): 1041. 1802, *Hort. Bengal.* 54. 1814, *Cat. Pl. Ceylon.* 53. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 405. 1825, *Systema Vegetabilium*, editio decima sexta [Sprengel] 4(2, Cur. Post.): 281. 1827, *Flora Indica*; or, descriptions of Indian Plants 3: 283, 287. 1832, *Linnaea* 10: 585. 1836, *An Introduction to the Natural System of Botany* 148. 1836, *Flora of Tropical Africa* 2: 186. 1871, *Revisio Generum Plantarum* 1: 208. 1891 and *Histoire Physique, Naturelle et Politique de Madagascar* 30: 111–112. 1902 [1903], *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 75–76. 1913, *Journ. Arn. Arb.* xxxi.281. 1950, *Kew Bulletin* 24(2): 287. 1970, *Journal of Japanese Botany* 51(6): 166–167. 1976,

Flowering Plants of Africa 50(2): pl. 1998. 1989, *Plant Foods Hum. Nutr.* 41(1): 45–51. 1991

(Used in Sidha. Narcotic poison. Presence of toxic compounds in the seeds, burning irritant hairs on the pods produce intense irritation and dermatitis; bristles of the pods used as a poison in criminal poisoning. Root decoctions taken to treat gonorrhoea and schistosomiasis. Bark applied to treat rheumatic complaints; powdered bark, mixed with dry ginger, used in rheumatic complaints by rubbing it over the affected parts. Powdered seeds strong purgative, violently cathartic, aphrodisiac. Irritant hairs on the outside of the pods mixed with food to get rid of rats.)

in English: burny bean, elephant cowitch, great ox-eye bean, sea bean, tiger bean, tribal pulse, velvet bean

in Hawaii: ka'e'e, ka'e'e'e

in Pacific: bayoga dikiki, bayogon dailaili, dikiki gaogao, gaye tan

in India: enuga-dulagondi, enugadoolagondi, enugadulagondi, kakavalli, kakkavali, kakkayvalli, kaku-valli, kaku-valli, kalakai valli, kalarkayvalli, kalgaivalli, kalgaivallic, kana-pus-waela, koyam, thorbilingi, turi-bilangi, turibilangi

Malayan name: kachang rimau

in Thailand: ka-chiap, ma-mui

in Tanzania: kihumpu

Mucuna holtonii (Kuntze) Moldenke (*Mucuna andreana* Micheli; *Mucuna holtoni* (Kuntze) Moldenke; *Stizolobium holtonii* Kuntze)

Belize, Colombia. Perennial climbing shrub

See *The Civil and Natural History of Jamaica* in Three Parts 290. 1756, *Revisio Generum Plantarum* 1: 207–208. 1891, *Journal de Botanique (Morot)* 6(8): 146–147, pl. 5–6. 1892 and *Phytologia* 1(1): 7. 1933, *Cuscatlania* 1(2): 1–16. 1989

(Aphrodisiac.)

Mucuna macrocarpa Wall. (*Mucuna bodinieri* H. Lev.; *Mucuna castanea* Merr.; *Mucuna colletii* Lace; *Mucuna collettii* Lace; *Mucuna ferruginea* Matsum.; *Mucuna ferruginea* Matsum. var. *bungoensis* (Ohwi) Ohwi; *Mucuna ferruginea* Matsum. var. *irukanda* (Ohwi) Ohwi; *Mucuna irukanda* Ohwi; *Mucuna irukanda* Ohwi var. *bungoensis* Ohwi; *Mucuna subferruginea* Hayata; *Mucuna wangii* Hu)

India. Perennial climbing shrub

See *Plantae Asiaticae Rariores* 1: 41, pl. 47. 1830, *Journal of the College of Science, Imperial University of Tokyo* 12: 422. 1899 and *Icones plantarum formosananarum nec non et contributiones ad floram formosanam*. 3: 74–75. 1913, *Bulletin of Miscellaneous Information Kew* 1915(9): 398–399. 1915, *Lingnan Science Journal* 11(1): 44–45. 1932, *Journal of Japanese Botany* 12: 659. 1936, *Bull. Fan Mem. Inst. Biol., Peiping Bot. Ser.* 10: 146. 1940, *Flora Japonica*, ... 1453. 1975

(Seed paste applied for sprains.)

in China: da guo you ma teng, ngau tau

in India: dusmai donkhar, jenran, jermi jendru, jinrin, thar jendru

Mucuna mollissima Teijsm. & Binn. ex Kurz (*Mucuna baileyana* Merr. & L.M. Perry; *Mucuna clemensiae* Merr. & L.M. Perry; *Mucuna cyanosperma* Schumann; *Mucuna urens* Medik. var. *papuana* F.M. Bailey; *Stizolobium cyanospermum* (K. Schum.) Kuntze; *Stizolobium mollissimum* K. Schum.)

Indonesia. Perennial climbing shrub, trifoliolate leaves, greenish-white flowers, axillary racemes

See *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 43(2): 187. 1874, *Revisio Generum Plantarum* 1: 208. 1891 and *Kew Bulletin* 45(1): 1–35. 1990

(Potentially poisonous or irritant plants, fruits with irritant bristles.)

in Indonesia: joa-joa

Mucuna monosperma Wight (*Carpopogon monospermum* Roxb.; *Carpopogon monospermus* Roxb.; *Mucuna anguina* Wall.; *Mucuna anguinea* Sweet; *Mucuna corymbosa* Graham; *Mucuna monosperma* Wall.; *Mucuna monosperma* (Roxb.) DC.; *Mucuna monosperma* DC.; *Stizolobium monospermum* Kuntze; *Stizolobium monospermum* (Wight) Kuntze; *Stizolobium monospermum* (Roxb.) Kuntze; *Stizolobium rugosum* Moon)

SE Asia, India. Perennial climbing shrub, woody twiner, slender glabrescent branchlets, flowers in racemes, winged pods clothed with reddish brown bristles

See *Hortus Bengalensis*, or a catalogue ... 54. 1814, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 2: 406. 1825, *Hort. Brit.* [Sweet] 482. 1826, *A Numerical List of Dried Specimens* [Wallich] n. 5622, 5623 C, partim. 1831, *Pl. Asiat. Rar.* (Wallich). 3: 19. 1832, *Revisio Generum Plantarum* 1: 208. 1891 and *J. Econ. Taxon. Bot.* 7: 249–276. 1985, *Kew Bull.* 42: 23–46. 1987, *Kew Bull.* 47: 203–245. 1992

(Used in Ayurveda and Sidha. Bristles will cause skin irritation. Seeds restorative, sedative, expectorant, applied in asthma, cough, tongue infections, sores, ulcers. Poultice of the seeds with water used to cure coughs and cold; paste of the seeds applied on forehead in headache and as a sedative. Tender leaves and *Curculigo capitulata* rhizome made into a paste and mixed with tobacco ash, this paste used to check external hemorrhage in cuts.)

in English: negro bean

in India: adadaveliya, anipe balli, anipeballi, avavikai, avavikaikkoti, bai donka, baidonka, baldhengra, buiguiguit, cecaniyakkoti, cecaniyam, dadhiipushpi, dadhipushpi, doola-goonda, enugadulagondi, godikohali, godikuhili, gurrupugacca, gurrupugutcha, guttapugacha, kagadolia,

in Nepal: bhaldengra

in Thailand: ma-ba-lai, ma-mui-yai, tam-yae-yai

Mucuna nigricans (Lour.) Steud. (*Citta nigricans* Lour., nom. rejic.; *Mucuna atropurpurea* auct. non (Roxb.) DC.; *Mucuna gigantea* (Willd.) DC. var. *nigricans* (Lour.) DC.; *Mucuna imbricata* Baker; *Mucuna imbricata* DC.; *Mucuna nigricans* Steudel; *Mucuna suberosa* Gagnep.; *Stizolobium imbricatum* (DC.) O. Kuntze; *Stizolobium imbricatum* Kuntze; *Stizolobium nigricans* (Lour.) Pers.; *Stizolobium nigricans* Pers.)

SE Asia. Perennial climbing shrub, woody, slender hollow branches, dull purple to violet flowers in long drooping axillary racemes, oblong pods covered with very irritant stinging bristles, large flat edible seeds, leaves for fodder

See *Flora Cochinchinensis* 456. 1790, *Synopsis plantarum* (Persoon) 2(2): 299. 1807, *Prodr.* (DC.) 2: 406. 1825, *Nomenclator Botanicus*. ed. 2 [Steudel] 2(9): 163. 1841, *FBI* 2: 185. 1876, *Revis. Gen. Pl.* 1: 208. 1891 and *Proc. 3rd All Indian Congr. Cytol. Genet.* 3: 493–499. 1981, *Kew Bull.* 39(1): 45. 1984, *Taxon* 40: 517. 1991

(The skin-irritant bristles and the stinging hairs of the pods cause irritation when touched, may cause intense itching and dermatitis. Watery sap from stem used for coughs and fevers. Leaves as vermifuge. Strong infusion of the roots mixed with honey given in cholera. For throat pain, poultice of the seeds rubbed on neck; pounded seed with ginger given for cough with fever; shoots of *Caesalpinia crista* with seeds of *Mucuna nigricans* pounded and warmed and given in colds and cough; a decoction of *Laportea crenulata* roots with roots of *Punica granatum* and kernel of *Mucuna nigricans* given in fever with cough; seeds paste given for asthma, also applied to cure ulcers of genital organs of both sexes; seed powder given along with milk in snakebites. Pods used for rat population management.)

in English: cowage, cowitch, horse eyebean

in India: badobaidonko, bhainslagalo, bhaisalu, bhaislagalo, dangyimirik, dangyimirik, gaunchi, kaoso, kasi, kaunch, kewanch, khuangtum, kiwanch, konch, konchili, kusee, marang-itika, mekuri-ghila, tarma-lang-baung, tarma-lang-beung, tarma-long-beung

in Japan: hime-wani-guchi (wani = crocodile), Kashô-modama

in Lepcha: dangyimirik, dangyimirik

in Nepal: dhoireti

in the Philippines Isl.: hipoi, ipa, nipay

Mucuna poggei Taub. (*Mucuna pesa* De Wild.; *Mucuna rubro-aurantiaca* De Wild.)

Tropical Africa, Tanzania. Perennial climbing shrub, liana, vigorous, woody, rather variable, flowers greenish cream to orange, inflorescence an axillary pendent hairy raceme, pods irregularly wavy, calyx and pods with bristly irritating orange hairs, seeds edible, plant browsed by cattle, dark red sap, in riverine and swamp forest, in bushland

See *Flora* 27(Beibl.): 4. 1844, *Genera Plantarum* 1: 39. 1862, *Nat. (Used in Ayurveda, Unani and Sidha. Seeds rich in L-Dopa; a seed diet produced a hypoglycemic effect in normal rats. Pods cause irritation when touched, may cause severe intense itching and dermatitis. The skin-irritant bristles, the stinging hairs, used as a vermifuge, generally taken in syrup; hairs of pods used with leaves for wound healing. Plant decoction given in dysentery and fever. Crushed seeds taken with molasses for intestinal worms, piles; seed paste applied on the sting of scorpion bite to relieve pain; seed powder aphrodisiac, astringent, to restore male fertility, to enhance the potency, to cure diarrhea; roasted seeds as an aphrodisiac; seed decoction to regularise menstruation, to increase fertility and chances of pregnancy. Seeds and roots tonic, narcotic, used in the form of powder and decoction to treat roundworm, sterility, difficult urination and as aphrodisiac; seeds and leaves anthelmintic, tonic. Roots stimulant, diuretic, purgative, astringent, an infusion used for nervous breakdown and cough; root decoction purgative; powdered root used in case of swellings of the feet and hands, also given with water to relieve constipation and dysentery; root extract with honey given in cholera, urine and kidney troubles; contact therapy,

root tied to the arm of male partner for prolonged sexual intercourse. Leaves and stems pounded and applied to burns; leaves paste applied on boils. Veterinary medicine, root paste mixed with turmeric and applied in boils, blisters, ulcers and wounds and root decoction drunk. Pods used for rat population management.)

(For constipation.)

Mulinum Pers. Apiaceae

Mulinum crassifolium Phil.

Chile.

See *Syn. Pl.* (Persoon) 1: 309. 1805, Philippi, Rudolph Amandus (1808–1904), *Florula Atacamensis* 24. Halis Saxonum: Sumptibus E. Anton, 1860

(Stem infusion against colds and coughs.)

in Chile: chuquicandia

Multidentia Gilli Rubiaceae

From the Latin *multi-* ‘many’ and *dens, dentis* ‘a tooth’, see *Ann. Naturhist. Mus. Wien* 77: 21. 1973.

Multidentia crassa (Hiern) Bridson & Verdc. (*Canthium crassum* Hiern; *Vangueria crassa* (Hiern) Schweinf. ex Hiern; *Vangueria crassa* Schweinf. ex Hiern)

Tropical Africa. A deciduous shrub or small tree, bark fire resistant, reddish underbark, if cut whitish sap, yellow-green flowers in dense bunches in leaf axils, fleshy petals, fleshy sweet fruit eaten raw, bee forage, in woodland, grassland, rocky places

See *Encyclopédie Méthodique, Botanique* 1: 602. 1785, *Fl. Trop. Afr.* [Oliver et al.] 3: 145. 1877 and *Annalen des Naturhistorischen Museums in Wien* 77: 21. 1973, *Kew Bulletin* 42(3): 652. 1987

(Leaves pounded, soaked in water and the juice applied into the ears to treat earache; roots used for earache, stomachache and intestinal worms.)

in Kenya: bunyinyi, kumunyanya, kumunyinyi

in Tanzania: ingulungulu, lungogolo, mandikiti, mbwewe, mkukumba, mugogolo, mukukumba, munyabitwa, musede, muwewe, muyogoyogo, nam

Mundulea (DC.) Benth. Fabaceae (Millettieae)

The meaning of the name seems obscure, it could have origins from *Munduli*, an African name used also for *Arachis hypogaea* or *Apios tuberosa*, referring to the whole look of the plant, or from Latin *mundulus* 'neat, trim', *mundule* 'neatly, trimly'; according to Georg C. Wittstein it could be the diminutive of *Mundia* (Polygalaceae); see *Nova Genera et Species Plantarum* (quarto ed.) 5: 392. 1821, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 338. 1824, Wight, Robert (1796–1872), *Prodromus Florae Peninsulae Indiae Orientalis* London, 1834, *Plantae Junghuhnianae* 2: 248. 1852 and H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 398. 1996.

Mundulea sericea (Willd.) A. Chev. (*Cytisus sericeus* Willd.; *Cytisus sericeus* Vis.; *Cytisus sericeus* Javorka; *Cytisus sericeus* Noronha; *Dalbergia sericea* Bojer; *Dalbergia sericea* G. Musanga R. Br. Cecropiaceae (Urticaceae)

A vernacular name in Zaire and Angola; see Tuckey, James Hingston (1776–1816), *Narrative of an expedition to explore the river Zaire*: usually called the Congo, in South Africa, in 1816 / under the direction of Captain J.K. Tuckey, R.N. To which is added, The journal of Professor Smith; some general observations on the country and its inhabitants; and an appendix: containing the natural history of that part of the kingdom of Congo through which the Zaire flows. Published by permission of the Lords commissioners of the Admiralty. London: J. Murray, 1818, Bowdich, Thomas Edward (1791–1824), *Mission from Cape Coast Castle to Ashantee*. 1819 and J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique Centrale*. CTA, Ede/Wageningen 1989.

Musanga cecropioides R. Br. ex Tedlie (*Musanga cecropioides* R. Br. apud Tedlie; *Musanga smithii* R. Br.)

Tropical Africa. Tree

See *Miss. Ashantee* 372. 1819 and *Flora of Tropical Africa* 6(2): 239. 1916–1917, G. Malcolm Guthrie, ed., *Lingala grammar and dictionary*. Léopoldville-Ouest. 1935

(Leaves and stem abortifacient, febrifuge, antiinflammatory, emmenagogue, for an easy delivery, rheumatism, fevers.)

in English: cork wood, umbrella tree

in French: parasolier

in Angola: gofé, mulela, musanga, musenga, nsanga, nsenga

in Cameroon: assan, asseng, bosengue, bosonge, bossengue, djseng, kombo, leseng, lisseng

in Central African Republic: angope

in Congo: kombo-kombo, mesenga, musenga, nsenga, nseenga, senga; bokombo (Turumbu); bombambo (Lokundu); gombo (Dundusana); kitumbe (Kinande); kimbongo (Low Zaire); kombo, okombo, kimbu (Uele); mobambo (Lingala); mubena (Kihunde); musenga (Lukula); mosinki (Kwilu); mushake (Kirega); n'senga, senga (Mayumbe); tshilombalomba (Tshiluba); tumbe-tumbe (Kingwana)

in Gabon: assan, assang, asseng

in Ghana: agyama, ajama

in Ivory Coast: amonia, kodé, abome, agbome, agoumi, djuna

in Nigeria: aga, agbawo, agoken, ajo-weku, aju-eku, asang, aworo, awunru, egbesu, agemanfuk, bokumbu, bosenge, congo-congo, egbu, egimatuk, ekombe, lisenga, obonia, ofogo, oghohen, olo, oro, oru, tako, uboniboni, ukhurube, ukporowi, ulu, uno, wosao; ogohen (Edo); ufogho (Etsako); egbesu (Itsekiri); ukhorube (Urhobo); ukporwe (Ijaw); oro (Igbo); uno (Efik); egimamfuk (Ekoi); bokuobe (Boki)

in West Africa: bokombo, bosenge, combo combo

Musella (A.R. Franchet) H. Wu Li Musaceae

The diminutive of *Musa* L., in *Acta Phytotax. Sin.* 16(3): 57. Aug. 1978.

Musella lasiocarpa (Franchet) C.Y. Wu ex H.-W. Li (*Ensete lasiocarpum* (Franchet) Cheesman; *Musa lasiocarpa* Franchet)

China. Used to feed pigs

See *J. Bot.* (Morot) 3: 329–330. 1889 and *Acta Phytotax. Sin.* 16(3): 56–57. 1978

(Stomachic, astringent.)

in China: di yong jin lian

Mussaenda L. Rubiaceae

A vernacular name for *Mussaenda frondosa* in Sri Lanka, see *Species Plantarum* 1: 177. 1753, *Familles des Plantes* 2: 159. 1763, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 390, 406. 1830 and *Bulletin of Miscellaneous Information Kew* 1939: 599. 1940.

***Mussaenda afzelii* G. Don**

Tropical Africa.

See *Gen. Hist.* 3: 490. 1834

(Roots and leaves antiinflammatory, antiseptic, for eye sores, conjunctivitis.)

***Mussaenda elegans* Schumach. & Thonn. (*Bertiera coccinea* (G. Don) G. Don; *Gardenia coccinea* G. Don; *Mussaenda discolor* Thonn. ex DC., nom. illeg.; *Mussaenda discolor* DC., nom. superfl.; *Mussaenda elegans* var. *minor* De Wild. & Th. Dur.; *Mussaenda elegans* var. *psilocarpa* Wernh.; *Mussaenda elegans* var. *rotundifolia* Wernh.; *Mussaenda hispida* Engl., nom. illeg.)**

Tropical Africa. Liana, branched, shrubby, spreading, woody vine, climber, fragrant scarlet flowers

See *Edinburgh Philosophical Journal* 11: 343. 1824, *Beskr. Guin. Pl.*: 117–118. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 137–138. 1828, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 372. 1830, *A General History of the Dichlamydeous Plants* 3: 506. 1834, *Bot. Jahrb. Syst.* 8: 66. 1887, *Annales du musée du Congo. Serie 1, Botanique, sér. 2* 1: 27. 1899 and *Journal of Botany, British and Foreign* 51: 277. 1913

(Roots febrifuge, antipyretic, for colds, gonorrhoea.)

in Central African Republic: àningà berè

***Mussaenda elmeri* Merr.**

Borneo. Creeper

See *Univ. Calif. Publ. Bot.* 15: 279. 1929

(Roots decoction drunk for diabetes. Leaves and roots decoction drunk for toothache. Warmed leaves applied on forehead for headache.)

Malay name: bejalin

***Mussaenda erythrophylla* Schumach. & Thonn. (*Mussaenda fulgens* Tedlie, nom. nud.; *Mussaenda splendida* Welw.)**

Trop. Africa.

See *Species Plantarum* 1: 177. 1753, *Beskrivelse af Guineiske planter* 116. 1827, *Bowdich Mission* 374. 1849, *Transactions of the Linnean Society of London* 27: 36, t. 13. 1869 and *Cytologia* 49: 407–413. 1984, *Plant Systematics and Evolution* 149: 89–118. 1985, *Journal of the Indian Botanical Society* 65: 158–162. 1986, *Cytologia* 52: 343–356.

1987, *Glimpses in Plant Research* 8: 177–244. 1988, *Flora of Tropical East Africa* 415–747. 1988

(Antitussive, cough sedative, expectorant.)

in English: Ashanti blood, flame of the forest, red mussaenda

in Philippines: Doña Trining (named in honor of Mrs. Trining Roxas)

***Mussaenda ferruginea* K. Schum.**

Papua New Guinea, Bismarck Arch. Shrub, scandent, twigs and flowers rusty brown, flowers in terminal 3-branched cymes, corolla tube deep yellow

See *Fl. Kais. Wilh. Land*: 129. 1889

(Stem sap drunk to treat malaria and fever. Fresh flower styles chewed and swallowed to treat stomachache and gastrointestinal disorders. Leaves applied for headache; leaves juice swallowed to ease cough.)

in Papua New Guinea: aganapa, ngadral, oliticne, pinambu

***Mussaenda frondosa* L. (*Gardenia frondosa* (L.) Lam.; *Mussaenda belilla* Buch.-Ham.; *Mussaenda dovinia* Buch.-Ham.; *Mussaenda flavescens* Buch.-Ham.; *Mussaenda formosa* L., nom. illeg.; *Mussaenda frondosa* Blanco; *Mussaenda frondosa* Michx.; *Mussaenda frondosa* Roxb.; *Mussaenda frondosa* Lour.; *Mussaenda frondosa* Wall.; *Mussaenda fruticosa* L.; *Mussaenda ingrata* Wall. ex Hook.f.; *Mussaenda macrophylla* Kurz, nom. illeg.; *Mussaenda sumatrensis* B. Heyne ex Roth; *Mussaenda tomentosa* Wight ex Hook.f., nom. illeg.; *Mussaenda villosa* Schltld. ex Hook.f., nom. illeg.)**

India, Malesia. Shrub, straggling, leaves stipulate, yellowish-white flowers in terminal cymes

See *Species Plantarum* 1: 177. 1753, *Encyclopédie Méthodique, Botanique* 2: 608. 1788, *Fl. Cochinch.* 1: 151. 1790, *Hort. Bengal.* 15. 1814, *Nov. Pl. Sp.* 152. 1821, *Numer. List* [Wallich] 6250 A. 1832, *Fl. Filip.* [F.M. Blanco] 167. 1837, *Fl. Brit. India* [J.D. Hooker] 3: 89. 1880 and *Journal of the Arnold Arboretum* 44: 239. 1963, *Proc. Indian Acad. Sci.*, B 47: 708–715. 1981, *Taxon* 31: 576–579. 1982, *Plant Systematics and Evolution* 154: 213–223. 1986, *Glimpses in Plant Research* 8: 177–244. 1988

(Used in Ayurveda and Sidha. Stem juice put into eye to cure soreness and redness of eyes. Flowers used in cough, asthma, applied to clean foul ulcers and to cure skin eruptions. Leaves and flowers applied in ulcers. Leaf decoction applied on head for cooling effects; leaf paste in water applied as antiseptic on ulcers; for bone fracture, paste of crushed fresh leaves applied to the broken part or for any kind of inflammation. Bitter roots used in leprosy, jaundice, fevers, eye troubles, eye sores; juice applied for the cure of ulcers, skin eruptions; root decoction for pneumonia, throat disturbances; root bark chewed for gastric ulcer, heartburn; a paste of roots applied for the treatment of abdominal troubles. Ceremonial, used in

pujas. Petaloid leaf of *Mussaenda belilla* used a substitute to betel vine leaves.)

in India: balethappu, bebina, bedina, belilla. bellary chedy, bellothi, belloti, belloti-gida, bellotigida, bellotti, bennegarhti, bennegarhti, bhoorthkashi, bhutakesi, bhuthkes, bili aelegida, bili yele gida, bili yele hoo, bolletappu, churthkasi, dasapathre, gurusathyam, hanurei, hasthi gida, ipparati, ipparathi, ippinta, ippiriti, ipri, lavasat, matantai, nagavalli, nagvalli, noksangchipen sapaklari naro, rajatarih, sarwath, sherwod, shivardole, shreevara, shrivatte, sitalo, sittalu, sribati, sripannah, tumberh, tunberh, vallai, vallai matantai, vallil, vellaellay, vellaellay, vellai ilai, vellaiyilai, vellallay, velli ilai, velli matantai, vellila, vellilai, vellilam, vellilattali, vellimaithali, vellimatantai, vellimayittali, vellithali, velliylaicceti

in Lepcha: tumbaar rik

Mussaenda glabra Vahl (*Mussaenda andersonii* S.K. Basu & T.K. Paul; *Mussaenda frondosa* var. *glabra* (Vahl) Miq.; *Mussaenda penangensis* Miq.; *Mussaenda setulosa* Klotzsch)

India, China.

See *Symb. Bot.* 3: 38. 1794, *Fl. Ned. Ind.* 2: 213–214. 1857 and *J. Bombay Nat. Hist. Soc.* 86: 430. 1989[1990]

(Roots for coughs. For headache and fever, poultice with leaves.)

in English: common mussaenda

in India: charai atha, chuba atha, hanurei, sonarupa, syntiewjarongtham, vakep

Malayan names: adap-adap, balek adap, balek hadap, balik adap, cha padi, daun puteri, segoreh

Mussaenda glabrata (Hook.f.) Hutch. ex Gamble (*Mussaenda frondosa* var. *glabrata* Hook.f.)

India.

See *Species Plantarum* 1: 177. 1753 and *Cytologia* 49: 407–413. 1984

(Used in Ayurveda. Alterative, demulcent.)

in India: bedina, bellotti, bhurtkasi, bhutkes, billoothi, churtkasi, hasthygidda, ipparati, karab-phul, kirabli, lavasat, nagavalli, pathri, sarvadi, sarwadh, sherwod, shivardole, shrivati, vellaiyilai, vellila, vellimadandai, vellimayittali

Mussaenda hirsutissima (Hook.f.) Hutch. ex Gamble (*Mussaenda frondosa* L. var. *hirsutissima* Hook.f.; *Mussaenda hirsutissima* Hutch. ex Gamble)

India.

See *Species Plantarum* 1: 177. 1753, *Fl. Brit. India* [J.D. Hooker] 3: 90. 1880 and *Flora of the Presidency of Madras*: 610. 1921

(Magic, contact therapy, sepal said to possess the power to cure conjunctivitis.)

in India: bellothi, biliaelegida, dasapathre, ippinta, vella ela chedi

Mussaenda isertiana DC. (*Mussaenda macrophylla* Schumach. & Vahl., nom. illeg.)

Tropical Africa. Pubescent shrub, orange flowers, large white sepals

See *Prodr.* 4: 371. 1830

(Emetic, demulcent.)

Mussaenda laxa (Hook.f.) Hutch. ex Gamble (*Mussaenda frondosa* var. *laxa* Hook.f.)

India.

See *Fl. Madras*: 610. 1921

(Paste of leaves along with those of *Aristolochia indica* locally applied to relieve pain during the initial stages of lactation in young mothers.)

in India: vellilai

Mussaenda laxiflora Hutch. (*Mussaenda sandakana* Govaerts)

China. Climbing liane, orange flowers, young leaves eaten as vegetable

See *Pl. Wilson.* 3(2): 399. 1916, *University of California Publications in Botany* 15: 280. 1929, *Botanical Journal of the Linnean Society* 157: 120. 2008

(Ritual, magic, a piece of root as a good luck charm.)

in English: tossed coin vine

in Indonesia: aka tepilik sulau

Mussaenda macrophylla Wall. (*Mussaenda hispida* D. Don; *Mussaenda hispida* Engl., nom. illeg.; *Mussaenda kotoensis* Hayata)

Nepal, India.

See *Fl. Ind.* 1: 228. 1824, *Prodromus Florae Nepalensis* 139. 1825, *Beskrivelse af Guineiske planter* 118. 1827, *Forest Flora of British Burma* 2: 57. 1877, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 8: 66. 1887 and *Journal of the College of Science, Imperial University of Tokyo* 30(1): 143–144. 1911

(A paste of roots of *Claoxylon khasianum* together with *Ardisia paniculata*, *Clerodendrum wallichii*, *Mussaenda macrophylla* and *Trevesia palmata* applied for the treatment of abdominal troubles and tumour.)

in India: dieng salynthiah

Mussaenda philippica A. Rich. (*Mussaenda grandiflora* Rolfe, nom. illeg.; *Mussaenda philippica* f. *aurorae* (Sulit) Jayaw.; *Mussaenda philippica* var. *aurorae* Sulit)

Philippines.

See *Mém. Fam. Rubiac.*: 165. 1830 [*Mem. Soc. Hist. Nat. Paris*, v. 245: 1834], *Niger Fl.* [W.J. Hooker]. 392. 1849, *J. Linn. Soc., Bot.* 21: 311. 1884 [1886 publ. 1884] and *Philipp. J. Sci.*, C 3: 264. 1908, *Philipp. J. Forest.* 2: 39. 1939, *J. Arnold Arbor.* 45: 131. 1964

(Plant antidote, astringent, against snakebites and dysentery. Leaves decoction applied as emollient. Roots for jaundice.)

in Philippines: agboi, aghoi, ayaunikilat, balai-lamok, balikaran, bogon, buyon, darumabi, gatas virgen, gibuian, hagbui, kahoi-dalaga, malacafé, matang-arau, taba-taba, talik-harap, taua-taua, tinga-tinga, tinuluan-gatas

Mussaenda raiateensis J.W. Moore

S. Pacific.

See *Species Plantarum* 1: 177. 1753 and *Bernice P. Bishop Mus. Bull.* 102: 44. 1933, *Pacific Science* 50: 317–323. 1996

(For ulcers and wounds.)

Mussaenda roxburghii Hook.f. (*Menestoria tocoyenae* DC.; *Uciana wallichii* D. Dietr., nom. illeg.)

Himalaya. Shrub, membranous leaves elliptic, flowers orange-yellow in cymes, oblong fruits, leaves used as vegetable

See *Prodr.* (DC.) 4: 390. 1830, *Synopsis Plantarum seu enumeratio systematica plantarum ...* (D. Dietrich) i. 798. 1839, *Fl. Brit. India* [J.D. Hooker] 3: 87. 1880

(Roots and barks dried and powdered, powder mixed with water and drunk for ulcer of the mouth. Root paste used for headache. Leaf juice applied on cuts and wounds, to eject pus from the boils, also as hemostatic.)

in Bangladesh: chung faingla

in India: bausa-langde, dieng jalongtham, gardek, hanurei, imphat-champring, jalai, naolungkamchal, saklati, sapak-lari-naro, soklati, vakep, vokep

Mussaenda sanderiana Ridl.

Thailand, Vietnam.

See *Gard. Chron.*, III, 46: 34. 1909

(Tonic, stimulant, strength medicine.)

Mussaenda variabilis Hemsl. ex Ridl.

Malay Peninsula.

See *J. As. Soc. Straits* xxx. 59. 1897

(Roots for cough; leaves for fevers.)

Malay name: balik adap bukit

Mussaenda villosa Wall. ex G. Don (*Mussaenda villosa* Wall.; *Mussaenda villosa* Wall. & G. Don; *Mussaenda villosa* Schlecht. ex Hook.f.)

Thailand, Malaysia.

See *Numer. List* [Wallich] n. 6254. 1832, *Gen. Hist.* 3: 489. 1834, *Fl. Brit. India* [J.D. Hooker] 3: 90. 1880

(For rheumatism, boil the leaves with seeds of *Nigella sativa* and garlic, and drink the decoction.)

Malay name: balek adap

Mussatia Bureau ex Baill. Bignoniaceae

See *Hist. Pl.* (Baillon) 10: 32. 1888, *Die Natürlichen Pflanzenfamilien* 4(3b): 223. 1894 and *Planta Med.* 56(1): 24–26. 1990.

Mussatia hyacinthina (Standl.) Sandwith (*Bignonia hyacinthina* (Standl.) L. Lohmann; *Bignonia macrophylla* Sessé & Moc.; *Bignonia prieurei* DC.; *Bignonia prieurei* DC. ex Seem., nom. illeg.; *Tynanthus hyacinthinus* Standl.)

Amazon Basin, Peru and Bolivia. Lianas, leaves compound, pseudostipules, flattened woody dehiscent fruit, primary forest, also as *Bignonia hyacinthina* (Standl.) L. Lohmann

See *Species Plantarum* 2: 622–625. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 154. 1845, *The Botany of the Voyage of H.M.S. ~Herald~* 179. 1854, *Proceedings of the Royal Horticultural Society of London* 3: 193. 1863, *Histoire des Plantes* 10: 32. 1888, *Die Natürlichen Pflanzenfamilien* 4(3b): 224. 1894 and *Publications of the Carnegie Institution of Washington* 461(4): 87. 1935, *Recueil des Travaux Botaniques Néerlandais* 34: 218. 1937, *Fieldiana, Bot.* 24(10/3): 153–232. 1974, *Botanical Museum Leaflets—Harvard University* 28(3): 253–261. 1980, *Journal of Ethnopharmacology* 9(2–3): 225–236. 1983, *Fieldiana, Bot.*, n.s. 41: 77–161. 2000, *Nuevo Catálogo de la Flora Vascular de Venezuela* 272. 2008

(Bark bitter and astringent, an admixture to coca. Leaf infusion against colds.)

in Peru: chamairo

Mutisia L.f. Asteraceae

Named for the Spanish (b. Cadiz) botanist José Célestino Bruno Mutis y Bosio (Bossio), 1732–1808 (d. Nueva Granada, now Bogotá, Colombia), physician, clergyman, in 1750 Nueva Granada, Director and leader of the *Real Expedición botánica del Nuevo Reino de Granada*, sent specimens to Linnaeus, professor of mathematics. See *Supplementum Plantarum* 57, 373. 1781, Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800, Friedrich Wilhelm Heinrich Alexander von Humboldt and Aimé Jacques Alexandre Bonpland, *Plantae aequinoctiales*. 1808, *Outlines of Botany* 934, 935, 1094, 1111. 1835, A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 600. 1852, Miguel Colmeiro y Penido, *La Botánica y los Botánicos de la Península Hispano-Lusitana*.

Madrid 1858 and A.F. Gredilla, *Biografía de José Mutis*. Madrid 1911, Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 279. 1972, J. Vernet, in *D.S.B.* 15: 429–430. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 754f. 1993.

Mutisia hamata Reiche (*Mutisia microphylla* Willd. ex DC.; *Mutisia philippii* R.E. Fr.)

Chile.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 7(1): 6, f. 17. 1838 and *Anales de la Universidad de Chile* 115: 103. 1904, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 1(1): 92. 1905

(To stop bleeding during menstruation and childbirth.)

in Chile: copihue

Mycetia Reinw. Rubiaceae

Probably from Greek *mykes*, *myketos* ‘mushroom, fungus, any knobbed round body’; Latin *mycetias*, Greek *myketias seismos*, for *mycematias*, an earthquake attenden with a rumbling noise, Greek *myketes* ‘bellower’; see *Bijdr. Fl. Ned. Ind.* 986. 1826, *Sylloge Plantarum Novarum* 2: 9. Ratisbonae, 1824–1828 and M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 233. Dehra Dun 1985.

Mycetia longifolia (Wall.) Kuntze (*Adenosacme longifolia* Wall., nom. inval.; *Adenosacme longifolia* (Wall.) Hook. f.; *Rondeletia longifolia* Wall.; *Wendlandia longifolia* (Wall.) DC.)

Himalaya, India, Pen. Malaysia.

See *Flora Indica*; or descriptions of Indian Plants 2: 137. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 412. 1830, *The Flora of British India* 3(7): 95. 1880, *Revis. Gen. Pl.* 1: 289. 1891

(Roots and leaves extract applied on forehead for cooling effect during fever.)

in India: janthro

Myoporum Sol. ex Forster f.

Myoporaceae (Scrophulariaceae)

Greek *myo*, *myein* ‘to close, shut’ and *poros* ‘opening, pore’, referring to the glands or transparent spots on the leaves; see J.G.A. Forster, *Florulae insularum australium prodromus*. Goettingen, 1786 and Salvatore Battaglia, *Grande dizionario della lingua italiana*. X: 501. Torino, 1978, F.

Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 137. Berlin & Hamburg, 1989, H. Genoust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 403. 1996, *Eremophila* 156. 2007.

Myoporum laetum G. Forst.

New Zealand. Tree, dark green glandular leaves, small white flowers, oval bright red drupe in clusters

See *Hort. Eltham*. t. 49, fig. 57. 1732, *Species Plantarum* 2: 638. 1753, *Iter Hispanicum* 193. 1758, *Florulae Insularum Australium Prodromus* 44. 1786 and *Regnum Veg.* 127: 25. 1993, *Insect Science and Its Application* 14(5): 697–700. 1993, *Brenesia* 41–42: 73–80. 1994, *Philippine Journal of Science* 126(2): 155–162. 1997, *Insect Science and Its Application* 18(2): 149–155. 1998, *J. Ethnobiol. Ethnomed.* 2: 45. 2006

(The tree and especially the fruits are poisonous and should not be eaten. Extracts of the plant used to control intestinal worms, herpes, inflammation, insect bites, ulcers and wounds. Leaves insecticidal, acaricidal, leaves steeped and the brew administered to people suffering from fish or mussel poisoning. Veterinary medicine, leaves for horse’s legs.)

Maori name: ngaio

Myosotis L. Boraginaceae

Latin *myosota*, *ae* and *myosotis*, *idis* (Plinius), Greek *myosotis*, *myosotidos* (*mus*, *mys*, *myos* ‘mouse’ and *ous*, *otos* ‘ear’), referring to the hairy leaves of some species of the genus; see Carl Linnaeus, *Species Plantarum*. 1: 131–132. 1753, *Genera Plantarum*. Ed. 5. 63. 1754, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 601. 1852 and *Novosti Sist. Vyssh. Rast.* 13: 223–224. 1976, Salvatore Battaglia, *Grande dizionario della lingua italiana*. X: 502. 1978, Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 760. Bologna 1983, *Bot. Zhurn.* (Moscow & Leningrad) 85(1): 146. 2000, *Turczaninowia* 3(1): 8. 2000, *Bot. Zhurn.* (Moscow & Leningrad) 86(12): 80–85. 2001.

Myosotis laxa Lehm.

North America. Annual, biennial or perennial herb

See *Plantae e Familiae Asperifoliarum Nuciferae* 1: 83. 1818

(For skin diseases.)

in English: bay forget-me-not, smaller forget-me-not

Myosotis sylvatica Ehrenb. ex Hoffm. (*Myosotis sylvatica* Baker; *Myosotis sylvatica* Hoffm.; *Myosotis sylvatica* Ehrh. ex Hoffm.; *Myosotis sylvatica* H. Mart.)

China, Himalaya.

See *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* (Hoffm.) 1: 61. 1791, *Bulletin de la Société*

Impériale des Naturalistes de Moscou 13: 258. 1840 and *Flora of Tropical Africa* 4(2): 57. 1905, *Acta Fac. Rerum Nat. Univ. Comeniana*, *Bot.* 26: 1–42. 1978, *Acta Fac. Rerum Nat. Univ. Comeniana*, *Bot.* 27: 127–133. 1979, *Bot. Zhurn.* 72: 1069–1074. 1987, *Watsonia* 18: 415–417. 1991, *Watsonia* 19: 134–137. 1992, *Preslia* 65: 325–334. 1993, *Kochia* 2: 31–35. 2007

(Plant decoction used in rheumatic pains.)

in English: garden forget-me-not, scorpion grass, wood forget-me-not, woodland forget-me-not

in China: wu wang cao shu

Myosoton Moench Caryophyllaceae

From the Latin *myosoton* applied by Plinius to the plant *alsine*, see *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* (Moench) 225. 1794, *Flora Hallandica* [5–6]: 77. 1817–1819, *Flora Germanica Excursoria* 795. 1832 and *Opera Bot.* 137: 1–42. 1999.

Myosoton aquaticum (L.) Moench (*Alsine aquatica* Britton; *Alsine aquatica* (L.) Britton; *Cerastium aquaticum* (L.) Fr.; *Cerastium aquaticum* L.; *Larabrea aquatica* A.St.-Hil.; *Larabrea aquatica* Ser.; *Larabrea aquatica* (L.) Ser.; *Malachium aquaticum* (L.) Fries; *Myosanthus aquaticus* (L.) Desv.; *Stellaria aquatica* (L.) Scopoli)

China.

See *Species Plantarum* 1: 439. 1753, *Flora Carniolica* 2(1): 319. 1774, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 225. 1794, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 5: 227. 1816, *Flora Hallandica* 78. 1817–1819, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 395. 1824, *Memoirs of the Torrey Botanical Club* 5(23): 356. 1894

(Used medicinally, a decoction of the leaves as a galactagogue.)

in English: water chickweed

in China: e chang cai

Myosurus L. Ranunculaceae

From the Greek *mus*, *myos*, *mys* 'mouse' and *oura* 'a tail', referring to the fruiting elongated spikes; see Carl Linnaeus (Carl von Linnaeus, Carl von Linné), *Species Plantarum*. 1: 284. 1753 and *Genera Plantarum*. Ed. 5. 137. 1754.

Myosurus apetalus Gay (*Myosurus aristatus* Bentham, nom. illeg. later homonym; *Myosurus aristatus* Bentham ex Hooker, nom. illeg.; *Myosurus aristatus* var. *apetalus* (Gay) Huth; *Myosurus minimus* var. *aristatus* (Bentham ex Hooker) B. Boivin, nom. illeg.)

North America.

See *Fl. Chil.* [Gay] 1: 31. 1845, *London J. Bot.* 6: 458–9 [bis]. 1847, *Bot. Jahrb. Syst.* 16: 286. 1892 and *Aliso* 2: 394. 1952, *Novon* 4: 78. 1994

(Magic, a protection against witches.)

Myosurus cupulatus S. Watson

North America.

See *Proc. Amer. Acad. Arts.* 17: 362. 1882

(Used both externally and internally as an aid for ant bites or swallowing an ant.)

Myosurus minimus Linnaeus (*Myosurus lepturus* Greene; *Myosurus lepturus* var. *filiformis* (Greene) Greene; *Myosurus minimus* subsp. *major* (Greene) G.R. Campbell; *Myosurus minimus* var. *filiformis* Greene; *Myosurus minimus* var. *major* (Greene) K.C. Davis)

North America.

See *Sp. Pl.* 1: 284. 1753

(Applied to ant bites.)

Myrcia DC. ex Guill. Myrtaceae

Possibly from the Greek *myron* 'a perfume, ointment, scent', see Saint-Hilaire de, Auguste (1779–1853), *Flora Brasiliae meridionalis* / auctore Augusto de Saint-Hilaire; accedunt tabulae delineatae a Turpinio aeri que incisae. Parisiis: Apud A. Belin, 1825–1833, *Dict. Class. Hist. Nat.* [Bory] 11: 406 (378, 401). 1827, *Prodr.* (DC.) 3: 242. 1828, *Linnaea* 27: 5. 1855, Planchon, Jules Emile (1823–1888), *Notice sur la vie et les travaux de J. Cambessèdes*. (Fruit purgative.)

Myrciaria O. Berg Myrtaceae

Referring to the genus *Myrcia*, or an anagram of *Myrciaria*, see *Linnaea* 27(2–3): 136, 320, 328. 1854[1856] and *Taxon* 5: 143. 1956, *Ann. Missouri Bot. Gard.* 45(2): 165–201. 1958, *Lilloa* 32: 345. 1966, *Loefgrenia* 51: 1, 5. 1976, *Fl. Lesser Antilles* 5: 463–532. 1989, *Brenesia* 31: 53–73. 1989, *Brittonia* 49(4): 508–536. 1997.

Myrciaria dubia (Kunth) McVaugh (*Eugenia divaricata* Benth.; *Eugenia grandiglandulosa* Kiaersk.; *Eugenia spruceana* O. Berg; *Marlierea macedoi* D. Legrand; *Myrciaria caurensis* Steyererm.; *Myrciaria divaricata* (Benth.) O. Berg; *Myrciaria lanceolata* O. Berg; *Myrciaria lanceolata*

var. *angustifolia* O. Berg; *Myrciaria lanceolata* var. *glomerata* O. Berg; *Myrciaria lanceolata* var. *laxa* O. Berg; *Myrciaria obscura* O. Berg; *Myrciaria paraensis* O. Berg; *Myrciaria phillyraeoides* O. Berg; *Myrciaria riedeliana* O. Berg; *Myrciaria spruceana* O. Berg; *Myrtus phillyraeoides* (O. Berg) Willd. ex O. Berg; *Psidium dubium* Kunth)

Trop. South America.

See *Species Plantarum* 1: 470–471. 1753, *Nova Genera et Species Plantarum* (quarto ed.) 6: 152, t. 546 bis. 1823, *Flora Brasiliae Meridionalis* (quarto ed.) 2: ed. fol. 269. 1833, *Journal of Botany*, being a second series of the Botanical Miscellany 2: 319. 1840, *Linnaea* 27(2–3): 136, 320, 326–327, 334. 1854 [1856], *Flora Brasiliensis* 14(1): 257, 363–365, 374. 1857, *Flora Brasiliensis* 14(1): 598. 1859, *Enum. Myrt. Bras.* 181. 1893 and *Fieldiana, Botany* 28: 1020. 1957, *Comunicaciones Botánicas del Museo de Historia Natural de Montevideo* 40: 27. 1962, *Fieldiana, Botany* 29(8): 501–502. 1963, *CIS Chromosome Information Service* 54: 16–17. 1993, *Napaea. Revista de Botânica* 9: 13–41. 1993

(Emollient, demulcent.)

Myriactis Less. Asteraceae

Greek *myria* ‘many’ and *aktis* ‘a ray, sunbeam’, referring to the ray florets, see *Bull. Sci. Soc. Philom. Paris* 1818: 34. 1818, *Linnaea* 6: 127. 1831.

Myriactis nepalensis Less. (*Dichrocephala leveillei* Vaniot)

China, Himalaya.

See *Linnaea* 6: 128–129. 1831, *Archives de Botanique* 2: 517. 1833 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 12(161–162): 241–242. 1903, *J. Cytol. Genet.* 22: 162–163. 1987, *Aspects Pl. Sci.* 11: 427–437. 1989

(Dried leaves smoked as tobacco.)

Myrianthus P. Beauv. Cecropiaceae (Urticaceae)

Greek *myria*, *myrioi* ‘many’ and *anthos* ‘a flower’, referring to the many and tiny flowers; see Flore d’Oware 1: 16. 1804 [1805] and J. Vivien & J.J. Faure, *Arbres des Forêts denses d’Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d’Afrique Centrale*. CTA, Ede/Wageningen 1989.

Myrianthus arboreus P. Beauv. (*Myrianthus talbotii* Rendle)

Tanzania, Uganda. Tree or shrub, short trunk, ascending thick branches, spreading crown, thick stilt roots, watery sap below bark, huge leaves red when young, separate male and female flowers, compound fruit bright yellow, soft pulp inside, a thin layer of sweet gelatinous flesh around one hard oval light brown seed, sweet ripe fruits eaten raw, fruits used as fodder for pigs, bee forage

See Flore d’Oware 1: 16–17, t. 11. 1804 [1805], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 149. 1894 and *Journal of Botany, British and Foreign* 1915: 354. 1915

(Juice from leaves, stems and roots purgative, vermifuge, laxative, carminative, for diarrhea. Fruit decoction lactogenic. Leaves used for improving lactation in women, leaves pounded, boiled and the liquid drunk. Antidiarrheal, treatment of dysentery and diarrhea with bark infusions. Seeds used for boils. Roots boiled and the liquid gargled to treat sore throat. Bark roasted, pounded and mixed with salt, then licked by a person suffering from hiccups; bark decoction for diabetes. Other medicinal uses are for headaches, swellings and tumours. Poison, for termites.)

in English: corkwood, giant yellow mulberry

in Angola: dijkala-kala, mbuba, mupalapanga, muxibiri, muzubidi, pernanbuco, umbukusu, vuiba

in Cameroon: angom, bokekou, engakom, mongo

in Congo: akawa, akawakawa, akpekpe, awaawa, besisi, embwembwe, ikamu, kawakawa, komu, mbombo, nsongoti, okamon, thesisi; bakombu, bonkowna mokili (Kundu); balandu (Mayogo); bokamu, bonkomu (Lingala); bokomu (lake Mai-Ndombe); bongunguna, ongunguna (Turumbu); buba, m'buba (Mayumbe); dikomokomo, mokamu a mukomo, mukomu, munkala (Tshiluba); ekama, ekamu (Musa); gwolo (Likimi); mamala (Kinande); mutuse (Kisantu); tshikala kala (Kaniama)

in Ivory Coast: anianahia, doba, grand wounian, niangama

in Malawi: chiwere, mkwakwa, mufwisa, mukwajo, mwa(n) ja

in Nigeria: alade, bekeku, charaka, ebisheghe, ekokom, ekokwan, ibisere, ibishere, ihi-egghi, ihieghe, isasa, kekeku, ndisok, ntinsek, obishere, oseghe, tsakpachi, ujuju, wakeku

in Tanzania: isakama, liwisa, mdewerere, mfutsa, mfuzo, mhunsa, mkonde, mkwayaga, mlowelowe, umufe

Myrianthus holstii Engl.

East Africa, Tanzania. Evergreen tree, often with stilt roots, short trunk branching close to the ground, very large palmate leaves, male and female flowers on separate trees, male flowers on thick branched heads densely covered with tiny green flowers with orange anthers, female flowers on a stalked head yellow, roundish compound pineapple-shaped edible fruits, each seed in a section surrounded by acidic edible pulp, fresh fleshy fruits eaten raw, rain forest, in lowland and mountain forests, riverbanks, moist valleys

See *Monographien Afrikanischer Pflanzen-Familien und -Gattungen* 1: 41. 1898

(Juice from leaves, stems and roots purgative, vermifuge, laxative, carminative, for diarrhea. Roots used in the treatment of sore throats; bark roasted, pounded and mixed with salt,

then licked by a person suffering from hiccups. A squeeze of the leaves dropped into pink eyes to relieve pains. Veterinary medicine, leaves for wounds, injuries, mastitis.)

in English: giant yellow mulberry

in Burundi: umwufe

in Congo: a'awa, akawa, akawafefe, awa-awa, bembekenyé, bwamba, ishike, kawakawa, kisike, kyamba, komu, mbwembwe, mufe, mwamba, tshefu, umufe, umwufe

in East Africa: mfutsa, mugunga, mutuya

in Kenya: mutuya

in S. Rhodesia: muDenya, guvu

in Southern Africa: muDenya, guvu, muTeswa

in Tanzania: isakama, libangala, liwisa, mabagala, mahusa, mdewerere, mftsa, mfutsa, mfuza, mkonde, mkonde dume, mkwaliti, mkwayaga, mlowelowe, mskisya, msuisya, mswiza, mufutsa, muhusa, mvalambi

Myrica L. Myricaceae

From the Greek name for tamarisk, *myrike*, from *myron* 'a perfume, ointment, scent'; Latin *myrice*, *es*, and *myrica*, *ae* 'tamarisk'. C. Plinius Secundus, *Naturalis historia* 13, 116; "pinguia corticibus sudent electra myricae", Publius Vergilius Maro, *Eclogae* 8, 54; Publius Ovidius Naso, *De arte amandi*. 1, 747; see *Species Plantarum* 2: 1024–1025. 1753, *Flora Cochinchinensis* 2: 537, 548. 1790, *Nova Genera et Species Plantarum* (quarto ed.) 2: 16. 1817, *Conspectus Regni Vegetabilis Secundum Characteres Morphologicas* ... 2: 16. 1835, *Alsographia Americana* 11. 1838, *Histoire Naturelle des Îles Canaries* 3(23): 272. 1844, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2): 151. 1864, *Genera Plantarum* 3: 401. 1880, *Die Natürlichen Pflanzenfamilien* 3(1): 27. 1893 and *Mémoires de la Société des Sciences Naturelles de Cherbourg* 32: 223. 1901, *Elysium Marianum. Ferns* 40–41. 1910, Salvatore Battaglia, *Grande dizionario della lingua italiana*. X: 525–526. 1978, *Sida* 16(1): 99–100, 103. 1994, *Taxon* 46: 347–348. 1997, *Taxon* 48: 367. 1999.

Myrica californica Chamisso (*Gale californica* (Chamisso) Greene; *Gale californica* (Cham. & Schltdl.) Greene; *Morella californica* (Cham. & Schltdl.) Wilbur; *Myrica californica* Cham. & Schltdl.)

North America.

See *Species Plantarum* 2: 1024–1025. 1753, *Traité des Arbres et Arbustes* 1: 253. 1755, *Flora Cochinchinensis* 537, 548. 1790, *Linnaea* 6(3): 535. 1831, *Manual of the Botany of the Region of San Francisco Bay* ... 298. 1894 and *Sida* 16(1): 102. 1994

(Bark used for kidney troubles.)

in English: bayberry, California bayberry, California wax-myrtle, Pacific bayberry, wax myrtle

Myrica caroliniensis Mill. (*Cerothamnus carolinensis* (Mill.) Tidestr.; *Morella caroliniensis* (Mill.) Small)

North America.

See *Species Plantarum* 2: 1024–1025. 1753, *Flora Cochinchinensis* 537, 548. 1790 and *Flora of the Southeastern United States* 337, 1329. 1903, *Elysium Marianum. Ferns and fern-allies...* 40–41. 1910

(For venereal diseases, skin infections.)

Myrica cerifera L. (*Cerophora lanceolata* Rafinesque; *Cerothamnus arborescens* (Castiglioni) Tidestrom; *Cerothamnus cerifer* (L.) Small; *Cerothamnus ceriferus* (Linnaeus) Small; *Cerothamnus pumilus* (Michaux) Small; *Morella cerifera* (Linnaeus) Small; *Myrica cerifera* var. *angustifolia* C. DC.; *Myrica cerifera* var. *angustifolia* Aiton; *Myrica cerifera* var. *arborescens* Castiglioni; *Myrica cerifera* var. *dubia* A. Chevalier; *Myrica cerifera* var. *pumila* Michaux; *Myrica mexicana* Humb. & Bonpl. ex Willd.; *Myrica pumila* (Michaux) Small; *Myrica pusilla* Rafinesque; *Myrica xalapensis* Kunth)

North and Central America, Bermuda. Small many-branched tree or a shrub, strictly dioecious, oblanceolate aromatic glandular leaves, flower catkins/clusters from the old wood, spirally arranged scale-like bracts tightly enclosing the developing flowers, ripe glandular drupes clustered, an extremely variable species, see also *Morella cerifera*

See *Species Plantarum* 2: 1024–1025. 1753, *Flora Cochinchinensis* 537, 548. 1790, *Flora Boreali-Americana* 2: 228. 1803, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 1011. 1809, *Nova Genera et Species Plantarum* (quarto ed.) 2: 16. 1817, *Alsographia Americana* 10–11. 1838, *Prodromus Systematis Naturalis Regni Vegetabilis* 16(2A): 149. 1864 and *Flora of the Southeastern United States* 337, 1329. 1903, *Elysium Marianum. Ferns* 41. 1910, *Flora of Miami* 61, 200. 1913, *Shrubs of Florida* 8, 133. 1913, *Castanea* 31: 183–185. 1966, *Journal of Japanese Botany* 62: 183–188. 1987, *Caldasia* 23(1): 136–137. 2001, *Ceiba* 44(2): 105–268. 2003 [2005]

(Leaves used for a gynecological aid and an emetic; the bark, as a blood purifier and a kidney aid. Leaves and stems decoction to treat fevers; and roots, to treat inflamed tonsils and stomachaches, and as a stimulant.)

in English: bayberry, candleberry, southern bayberry, southern wax-myrtle, wax myrtle

Myrica esculenta Buch.-Ham. ex D. Don (*Myrica farquhariana* Wall.; *Myrica sapida* Wallich)

Himalaya. Tree, small tree or shrub, rough bark dark brown, coriaceous leaves stalked entire, yellowish inflorescence, minute unisexual flowers, red succulent fruits eaten

See *Species Plantarum* 2: 1024–1025. 1753, *Prodromus Florae Nepalensis* 56. 1825, *Tentamen Florae Nepalensis Illustratae* 59–60, t. 45. 1826 and Kuang Ko-zen & Lu An-ming. *Myricaceae*. In: Kuang Ko-zen & Li Pei-chun, eds., *Fl. Reipubl. Popularis Sin.* 21: 1–6. 1979

(Used in Ayurveda, Unani and Sidha. Fruits eaten to treat indigestion, gas formation and as purgative. Bark astringent, antiseptic, carminative, a decoction given for fever, asthma, diarrhea, cold, cough, affections of the throat; bark juice given to treat dysentery with bloody stools; paste of the bark applied on the chest to get relief from cough and bronchitis; powder of bark astringent, anthelmintic, febrifuge, given for gastric troubles, toothache, headache, nasal congestion; snuffing the bark powder useful in relieving headache and toothache. Plant sap for cuts and wounds. Bark as a fish poison. Veterinary medicine, bark juice given to cattle to treat liver fluke.)

in English: bay berry, box myrtle, Malay gale, myrtle

in China: mao yang mei

in India: achensu, akolich, akolick, audul-barq, azuri, cavviyaci, cavviyacimaram, cippirakaruppam, darshishaaan, kaaphada, kaephal, kaidanyamu, kaidaryama, kaidaryamu, kaiphal, kaitariyam, kaphal, kaphaw, kataphala, katphal, katphala, katphalah, kayaphul, keifang, kirishivani, kirusnakarppam, kobusi, mahavalkala, marudam-pattai, marula, marulam, marutam, marutamtoli, marutham pattai, meza, naga tenga, qundol, sehliia, soma valka, soh-phie, sohphi

in Malaya: telur chichak

in Nepal: jheremsi, kabasi, kafal, kaiphal, kaphal, karbija, karpesi, kawasi, kobusi, namun

in Sanskrit: katphal, sombrikha

Myrica gale L. (*Angeia palustris* (Lam.) Tidestr.; *Gale palustris* A. Chev.; *Gale palustris* (Lamarck) A. Chevalier, nom. illeg.; *Gale palustris* var. *denticulata* A. Chev.; *Gale palustris* var. *lusitanica* A. Chev.; *Gale palustris* var. *subglabra* A. Chev.; *Gale palustris* var. *tomentosa* (C. DC.) A. Chev.; *Myrica gale* L. var. *subarctica* Rouss.; *Myrica gale* var. *subglabra* (A. Chev.) Fernald; *Myrica gale* var. *tomentosa* C. DC.; *Myrica palustris* Lamarck, nom. illeg. superfl.)

North America. Perennial shrub

See *Species Plantarum* 2: 1024–1025. 1753, *Traité des Arbres et Arbustes* 1: 253. 1755, *Flore Française* 2: 236. 1779 and *Monogr. Myricac.* 185. 1901, *Elysium Marianum. Ferns* 37. 1910, *Rhodora* 16(189): 167. 1914, *Revue de Botanique Appliquée et d'Agriculture Tropicale* 15: 946. 1936, *Canad. J. Bot.* 51: 1965–1975. 1973, *Canad. J. Bot.* 55: 2636–2651. 1977, *Systematics Association Special Volume* 40(2): 131–135. 1989, *Regnum Veg.* 127: 68. 1993, *Watsonia* 19: 169–171. 1993, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10–15. 1999

(The pounded branches utilized to prepare decoctions taken as a diuretic or as a treatment for gonorrhoea.)

in English: bog myrtle, gale, meadow fern, sweet gale

in North America: bois-sent-bon, meadow-fern, myrique baumier, sweet gale

Myrica hartwegii S. Watson (*Gale hartwegii* (S. Watson) A. Chevalier)

North America.

See *Proc. Amer. Acad. Arts.* 10: 350. 1875

(Diuretic.)

in North America: Sierra sweet-bay

Myrica heterophylla Rafinesque (*Cerothamnus carolinensis* (Miller) Tidestrom; *Myrica cerifera* Linnaeus var. *augustifolia* C. DC.; *Myrica cerifera* var. *latifolia* Aiton; *Myrica curtissii* A. Chevalier; *Myrica curtissii* var. *media* (Michaux) A. Chevalier; *Myrica heterophylla* var. *curtissii* (A. Chevalier) Fernald; *Myrica sessilifolia* Rafinesque; *Myrica sessilifolia* var. *latifolia* (Aiton) Rafinesque)

North America.

See *Alsographia Americana* 9. 1838

(Blood purifier.)

in English: evergreen bayberry, myrtle, wax-myrtle

Myrica inodora W. Bartram (*Cerothamnus inodorus* (W. Bartram) Small; *Morella inodora* (W. Bartram) Small; *Myrica laureola* C. DC.; *Myrica obovata* C. DC.)

North America

See *Travels through North and South Carolina.* 403. Philadelphia 1791

(For kidney disorders.)

in English: candleberry, odorless bayberry, odorless wax-myrtle, waxberry, waxtree

Myrica pensylvanica Mirbel (*Cerothamnus pensylvanica* (Mirbel) Moldenke; *Cerothamnus pensylvanicus* (Loisel.) Moldenke; *Cerothamnus pensylvanicus* (Mirb.) Moldenke; *Myrica cerifera* Linnaeus var. *frutescens* Castiglioni; *Myrica macfarlanei* Youngken; *Myrica pensylvanica* Hort. Reg. ex Lam.)

North America. *Myrica pensylvanica* hybridizes quite readily with both *Myrica cerifera* and *Myrica heterophylla*

See *Encycl. (Lamarck)* 2(2): 592. 1788, *Traité Arbr. Arbust. Nouv. éd.* 2.: 190. 1804 and *Revista Sudamer. Bot.* 4: 16. 1937

(Diuretic.)

in English: candletree, candlewood, Northern bayberry, small waxberry, swamp candleberry, tallow bayberry, tallowshrub, tallowtree, waxberry

in North America: myrique de Pennsylvanie

Myrica rubra Siebold & Zuccarini (*Morella rubra* Loureiro; *Myrica rubra* (Loureiro) Siebold & Zuccarini.; *Myrica rubra* var. *acuminata* Nakai)

SE Asia. Trees, monoecious, alternate chartaceous leaves aromatic when crumbed, achlamydeous flowers in catkins, reddish succulent globose drupes, edible fruit

See *Flora Cochinchinensis* 2: 537, 548. 1790, *Abh. Bayer. Akad. Wiss., Math.-Naturwiss. Kl.* 8 4(3): 230. 1846 and *Flora Sylvatica Koreana* 20: 64. 1933, *Journal of Japanese Botany* 62: 183–188. 1987

(Diuretic, for venereal diseases.)

in English: edible bayberry, strawberry tree

in China: yang mei, chiu tzu

in Japan: yama-momo

in Okinawa: mumu

Myricaria Desv. Tamaricaceae

From the Greek *myrike* ‘tamarisk’, false tamarisk, see *Annales des Sciences Naturelles* (Paris) 4: 349. 1825, *Nomenclator Botanicus* 1(1): 389. 1873 and *Dokl. Akad. Nauk Tadzh. SSR* ser. 2 20(7): 55–57. 1977, *Acta Biol. Cracov., Ser. Bot.* 22: 129–153. 1980, *Taxon* 29: 729. 1980.

Myricaria bracteata Royle (*Myricaria alopecuroides* Schrenk; *Myricaria germanica* (L.) Desv. subsp. *alopecuroides* (Schrenk) Kitam.; *Myricaria germanica* var. *alopecuroides* (Schrenk) Maxim.; *Myricaria germanica* var. *bracteata* (Royle) Franch.)

India, China.

See *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 214, t. 44, f. 2. 1835, *Enumeratio Plantarum Novarum* 1: 65. 1841, *Annales des Sciences Naturelles; Botanique, sér.* 6, 16: 293. 1883, *Flora Tangutica* 96. 1889 and Kitamura, Siro (1906–2002), *Flora of Afghanistan*. Results of the Kyoto University Scientific Expedition to the Karakoram and Hindukush, 1955, vol. 2 227. 1960

(Whole plant decoction used as blood purifier.)

in China: kuan bao shui bai zhi

in India: hambu

Myricaria elegans Royle (*Myrtama elegans* (Royle) Ovcz. & Kinzikaeva; *Tamaricaria elegans* (Royle) Qaiser & Ali)

Himalaya. Fodder for sheep

See *Annales des Sciences Naturelles* (Paris) 4: 349. 1825, *Illustrations of the Botany ... of the Himalayan Mountains ...* 1(6): 214. 1839 and *Dokl. Akad. Nauk Tadzh. SSR* ser. 2 20(7): 56–57. 1977, *Blumea* 24(1): 151–155, pl. 1, f. 1b. 1978

(Aerial parts paste applied in rheumatism.)

in China: xiu li shui bai zhi

in India: chackms, tsuch

Myricaria germanica (L.) Desv. (*Myricaria germanica* Dyer)

India, China.

See *Annales des Sciences Naturelles* (Paris) 4: 349. 1825, *The Flora of British India* 1(2): 250. 1874 and *Acta Biol. Cracov., Ser. Bot.* 22: 129–153. 1980, *Taxon* 29: 729. 1980

(Bark decoction in jaundice, inflammation, kidney, sore throat. Leaves emollient, applied to bruises and swollen joints.)

in India: hombug, umbu

Myricaria rosea W.W. Sm.

China. Woody herb, flower buds pink, petals very light pink

See *Notes from the Royal Botanic Garden, Edinburgh* 10(46): 52. 1917

(Aerial parts for wounds, fevers, cough and cold, chicken pox. Leaves and stem antibacterial, used for respiratory diseases. Plant paste taken to treat cold, also applied to relieve backache.)

in Bhutan: chushing-om-bu

in China: wo sheng shui bai zhi

in Nepal: angmeo, hanmbu, humpu

Myrioneuron R. Br. ex Hook.f. Rubiaceae

From the Greek *myrios* ‘many, myriad’ and *neuron* ‘nerve’, referring to the many nerved leaves.

Myrioneuron nutans Wall. ex Hook.f. (*Myrioneuron nutans* Wall. ex Kurz)

Bhutan to Myanmar.

See *Forest Flora of British Burma* 2: 55. 1877, *Fl. Brit. India* 3: 96. 1880

(Juice from stems used as eyedrops for eye diseases.)

in India: niktumoli

Myriophyllum L. Haloragaceae (Haloragidaceae)

Latin and Greek *myriophyllum* the plant milfoil, yarrow, Greek *myrios* ‘many, myriad, numberless, a great many, countless’ and *phyllon* ‘a leaf’, the leaves are very finely divided; see Carl Linnaeus, *Species Plantarum*. 2: 992–993. 1753 and *Genera Plantarum*. Ed. 5. 429. 1754.

Myriophyllum spicatum L. (*Myriophyllum sibiricum* Kom.; *Myriophyllum spicatum* var. *muricatum* Maxim.)

China, Eurasia. Rhizomatous, prostrate, branched herb, whorled leaves, aerial erect spikes, globular fruits, fodder

See *Species Plantarum* 2: 992–993. 1753, *Bulletin de l'Académie Impériale des Sciences de St-Petersbourg* 19: 182. 1873 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 13: 168. 1914, *Fl. W. Pakistan* 113: 4. 1977, *Bot. J. Linn. Soc.* 80: 216–218. 1980, *Lagascalia* 9: 249–284. 1980, *Botaničeskij Žurnal (Moscow & Leningrad)* 80(3): 85–88. 1995

(Veterinary medicine.)

in English: Eurasian milfoil, spiked water-milfoil, water-milfoil

in China: shui tsao

in Japan: hozaki-no-fusa-mo, kin-gyo-mo

Myriopterum Griffith Asclepiadaceae (Apocynaceae)

From the Greek *myrios* 'many, numberless, a great many, countless' and *pteron* 'wing', alluding to the papery and longitudinal wings of the follicles, see *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 385. 1844.

Myriopterum extensum (Wight & Arnott) K. Schumann (*Myriopterum horsfieldii* (Miquel) J.D. Hooker, nom. inval.; *Myriopterum paniculatum* Griffith; *Streptocaulon extensum* Wight & Arnott; *Streptocaulon extensum* var. *paniculatum* (Griffith) Kurz; *Streptocaulon horsfieldii* Miquel)

China, India, Indonesia. Lianas, branchlets lenticellate, inflorescences conical many flowered, follicles winged

See *Contributions to the Botany of India* 65. 1834, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 4: 385. 1844, *Flora van Nederlandsch Indië* 2: 470. 1857, *Forest Flora of British Burma* 2: 198. 1877, *The Flora of British India* 4(10): 11. 1883, *Die Natürlichen Pflanzenfamilien* 4(2): 215. 1895 and *Planta Medica* 70(6): 556–560. 2004

(Roots used for pulmonary tuberculosis and cough. Cytotoxic.)

in English: wing-fruitvine

in China: chi guo teng

Myristica Gronov. Myristicaceae

From the Greek *myristikos* 'fragrant, fit for anointing', *myron* 'a perfume, ointment, scent, sweet smelling, sweet oil', *myrizo*, *myrizein* 'to rub with ointment'; see Johan Frederik Gronovius, *Flora orientalis*. 141. Lugduni Batavorum [Leiden] 1755, *Natuurlijke Historie* 2(3): 333. 1774, *Histoire des plantes de la Guiane Française* 904. 1775, *Prodromus Florae Novae Hollandiae* 399. 1810, *Enchiridion Botanicum* 419. 1841, *Annales des Sciences Naturelles*;

Botanique, série 4 4: 22, 30. 1855, *Prodromus Systematis Naturalis Regni Vegetabilis* 14: 199–201. 1856, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 578. 1882, *Berichte der Deutschen Botanischen Gesellschaft* 13: 94. 1896 and *Brittonia* 2(5): 406. 1937.

Myristica andamanica Hook.f.

India, Andaman.

See *Fl. Brit. India* [J.D. Hooker] 5: 103. 1886

(Nuts decoction given in fever.)

in India: kinhanmo

Myristica argentea Warb.

Papua New Guinea. Tree

See *Bot. Jahrb. Syst.* xiii. (1891) 311. 1891

(Nuts astringent, aphrodisiac, for diarrhea.)

in English: long nutmeg, Papua nutmeg

in Java: pala lelaki

Myristica cagayanensis Merrill (*Myristica heterophylla* Hayata; *Myristica philippensis* Kanehira & Sasaki)

China, Philippines.

See *Gen. Ind. Fl. Formos.* 61. 1917, *Philippine Journal of Science* 17(3): 255–256. 1921 [1920 publ. 1921]

(Large dosage can cause death. Astringent, bactericidal, carminative, for diarrhea, mouth sores, cold, abdominal pain, insomnia, sprains and bruises from injuries.)

in English: nutmeg

in China: rou dou kou, rou guo, rou kou, tai wan rou dou kou, yu kou

in Japan: nikuzuku

in Korea: yuktugu

Myristica cinnamomea King

Malaysia, Singapore. Dioecious tree, crown coppery, bole with stilt roots, inner bark red-brown with red sap, twigs slender, inflorescence a short cyme, fruit ovoid, pericarp thick, seed with thin red aril, in lowland

See *Ann. Bot. Gard. Calc.* iii. 3 (1891) 292. 1891

(Insecticidal, fungicidal and bactericidal, stimulant, carminative, astringent and aphrodisiac; narcotic with hallucinogenic effects but it is dangerous.)

in Malaysia: mendarah, pala bukit, pendarah

in Singapore: maiang pahong

Myristica dactyloides Gaertn. (*Myristica dactyloides* Wall.)

India. Large evergreen tree, dioecious, exuding reddish watery juice when cut, flowers unisexual, drupes

powdery-pubescent with fleshy outer rind, ovoid seeds covered with fleshy orange-red to creamy-white aril

See *De Fructibus et Seminibus Plantarum...* 1: 195, t. 41. 1788

(Fruit sex stimulant. Aril together with dried ginger given to check diarrhea and to make stool firm; aril also used in treating cough, bronchitis, fever, inflammation in joints, skin and liver disorders, diarrhea, worms, wounds, insomnia.)

in India: kaatu-jathi, kattu-jathikai

Myristica fatua Houtt.

Indonesia. See also *Virola surinamensis* (Rol. ex Rottb.) Warb.

See Houttuyn, Maarten (Martin) (1720–1798), *Handleiding tot de plant-en kruidkunde* benevens eene uitvoerige beschrijving der boomen, planten, heester, kruiden, varens, mossen, bol-en gras-planten, volgens het zamenstel von C. Linnaeus. 3: 337. Amsterdam [1774–1783], *Bot. Jahrb. Syst.* xiii. (1891) 311. 1891, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 208–213. 1897

(Nuts astringent, aphrodisiac, for diarrhea.)

in Java: pala lelaki

Myristica fragrans Houtt. (*Myristica aromatica* Lam.; *Myristica moschata* Thunb.; *Myristica officinalis* L.f.; *Myristica officinalis* Mart.)

Tropical, SE Asia. Tree, dioecious, exuding a sticky red sap, leaves chartaceous, inflorescences axillary in umbellate cymes, flower buds green, fleshy fruit light green berry or drupe-like, seed with a lacinate red aril, essential oil

See *Flora orientalis* 141. 1755, *Natuurlijke Historie* 2(3): 333. 1774, *Supplementum Plantarum* 265. 1781, *Vet. Akad. Handl. Stockh.* 49. 1782, *Act. Acad. Sci. Paris* 1788: 155. 1791 and *Songklanakarín J. Sci. Technol.* 28(Suppl. 1): 157–163. 2006

(Used in Ayurveda, Unani and Sidha. Seed and seed-cover, nutmeg and mace, associated with chewing. Narcotic with hallucinogenic effects but it is dangerous, high doses highly hypnotic and potentially toxic, with tachycardia, dizziness, distortion of time and space, headache, visual hallucinations. Insecticidal, fungicidal and bactericidal, stimulant, carminative, astringent and aphrodisiac; antibacterial activity of *Boesenbergia rotunda* (L.) Mansf. and *Myristica fragrans* Houtt. against *Helicobacter pylori*. To cure dysentery, pains, sickness, to treat dyspepsia and peptic ulcer. Treats lung and heart disease, digestion, sleep. Carminative, applied externally for rheumatism; used in soup as a post-partum medication. Fruit paste applied on teeth for dental caries and pyorrhea.)

in English: common nutmeg, mace (from the aril surrounding the seed), nutmeg, nutmeg tree

in Arabic: gouz bouwa

in Burma (Myanmar): mutwinda

in Cambodia: pôch kak

in China: jou kuo, jou tou kou, rou dou kou

in India: adipalam, asana, aunda, bandhukapushpa, cakularppam, cakularppamaram, cakulatakam, cakulatakamaram, calukam, calukamaram, caluram, camuttirakantakakay, camuttirakantakam, camuttirantam, catakam, catakaram, catakaramaram, catalam, cati, caticam, catikamaram, catikkaymaram, catikocakkay, catikocam, catimaram, catipalai, catipalaimaram, catipalakkay, catipalam, catipattiri, ghatastha, jagikaya, jai, jaiphal (nutmeg), jaiphala, jaji-phalam, jajipatri, jathi, jati, jati-phalam, jatidala, jatikapongara, jatikosa, jatikosha, jatipatra, jatipatri, jatipatrika, jatiphala, jatiphalah, jatiphalam, jatisasya, jatishasga, jatri (mace), kosha, koshaka, madasaunda, majjasara, malathiphalam, malatiphala, patri, phala, puta, rajabhogya, shaluka, sumanaphala, tevatavi, tevatavikkay, tirukam, turvam, turvamaram, tuvikkattumakam, tuvittattumakam, vacivaci, vacuvaci, vacuvacimaram, varutiyorakkuticci

in Indonesia: pala, pala banda

in Laos: chan th'e:d

in Malaysia: buah pala, bunga pala, pala

in Philippines: duguan

in Singapore: pokok pala

in Thailand: chan-ban, chan-thet

in Tibetan: dza ta pha la, dza ti, dza ti pa tra, dza ti pha la, dzati, za ti

in Vietnam: nh[u]c d[aa]u kh[aa]s[u]

Myristica guatterifolia A. DC. (*Myristica guatteriaefolia* A. DC.)

Indonesia.

See *Annales des Sciences Naturelles; Botanique*, série 4 4: 30. 1855

(Astringent.)

in China: fan luo ye rou dou kou

in Philippines: penarahan

Myristica malabarica Lam.

India. Evergreen tree, oblong-lanceolate leaves, small white flowers in the leaf axils

See *Mém. Acad. Sc. Par.* 1788 (1791) 162. 1791

(Seed extract applied on ulcers; seed oil in rheumatism and sprains. Red sap smeared over legs to keep off land leeches.)

in India: kattujathi

Myristica simiarum A. DC. (*Myristica discolor* Merrill)

China.

See *Cellular and Molecular Life Sciences* 32(7): 828–829. 1976

(Carminative, astringent and aphrodisiac.)

in English: Antao nutmeg

in China: fei lu bin rou dou kou

Myrmeconuclea Merr. Rubiaceae

From the Greek *myrmex*, *myrmekos* ‘ant’ plus the genus *Nauclea* L., myrmecophilous, see *Herb. Amboin.* iii. (1743) 84 et 755. 1743, *Sp. Pl.*, ed. 2. 1: 243. 1762, *Observ. Nauc.* *Indic.* 17. 1839 and *J. Wash. Acad. Sci.* 5: 538. 1915, *Philipp. J. Sci.* 17: 375. 1921 [1920 publ. 1921].

Myrmeconuclea strigosa (Korth.) Merr. (*Bancalus strigosus* (Korth.) Kuntze; *Bancalus strigosus* Kuntze; *Nauclea strigosa* Korth.; *Neonauclea strigosa* (Korth.) Merr.; *Neonauclea strigosa* Merr.)

Indonesia, Borneo, Philippines. Shrub, white flowers

See *Verh. Nat. Gesch. Ned. Bezitt., Bot.*: 157. 1842, *Revis. Gen. Pl.* 1: 276. 1891 and *J. Wash. Acad. Sci.* 5: 542. 1915, *Philipp. J. Sci.* 17: 375. 1921 [1920 publ. 1921]

(Root decoction of *Breynia rhamnoides* drunk for vomiting and dizziness, and also a decoction of leaves of *Breynia rhamnoides* applied as a wash mixed with *Dalbergia pinnata* and *Myrmeconuclea strigosa*.)

Myrospermum Jacq. Fabaceae (Sophoreae)

From the Greek *myron* ‘a sweet smelling oil’ and *sperma* ‘seed’, see *Publ. Field Mus. Nat. Hist., Bot. Ser.* 18(2): 487–559. 1937, *Rhodora* 70: 492–532. 1968, *Brenesia* 18: 15–90. 1980, *Ann. Missouri Bot. Gard.* 68: 551, 557. 1981, *Anales Inst. Biol. Univ. Nac. Autón. México, Bot.* 63(1): 109–110. 1992.

Myrospermum frutescens Jacq. (*Bannisteria purpurea* Mill.; *Calusia emarginata* Bertero ex Klotzsch, nom. inval.; *Calusia emarginata* Bertero ex Steud.; *Calusia emarginata* Klotzsch; *Diphysa americana* (Mill.) M. Sousa; *Myrospermum emarginatum* Klotzsch; *Myrospermum secundum* Klotzsch; *Myroxylon frutescens* (Jacq.) Willd.; *Myroxylon frutescens* Willd.)

Honduras, Nicaragua. Perennial non-climbing tree, shrub or small tree, spreading, very fragrant lilac flowers

See *Enumeratio Systematica Plantarum* 4, 20. 1760, *The Gardeners Dictionary*: ... eighth edition. 1768, *Species Plantarum*. Editio quarta 2(1): 546. 1799, *An Introduction to the Natural System of Botany* 148. 1836, *Nomenclator Botanicus*. Editio secunda 2(9): 175. 1841, *Bonplandia* 5: 277. 1857, *Anales Hist. Nat.* 23: 300. 1894 and *Annals of the Missouri Botanical Garden* 77(3): 576. 1990, *J. Nat. Prod.* 66(7): 928–932. 2003, *Journal of Natural Products* 67(10):

1711–1715. 2004, *Antimicrobial Agents and Chemotherapy* 49(12): 5123–5126. 2005, *J. Nat. Prod.* 69(8): 1256. 2006

(Burned or boiled seed rub for flu, cold in head. Seed infusion for pneumonia. Acting internally as astringent, externally as counterirritant. Leaves antiprotozoal, parasiticide, against *Trypanosoma cruzi*.)

in Latin America: arco, bálsamo blanco, cercipo, chipilín, chiquirín, clavellino blanco, cuachipilin, cucharo, guachipelin ratón, plomillo, plumajillón, plumón negro, sereipo, wattama

Myroxylon L.f. Fabaceae (Sophoreae)

Greek *myron* ‘perfume, a sweet smelling oil’ and *xylon* ‘wood’, referring to the resinous heartwood of these trees, a source of balsam, see J.R. Forster and J.G.A. Forster, *Characteres generum plantarum*. 125, t. 63. (Nov.) 1775 and *Darwiniana* 5: 279–298. 1941, *Ceiba* 1(1): 38–49. 1950, *Mem. Inst. Oswaldo Cruz* 51: 417–461. 1953, *Webbia* 17(1): 153–186. 1962, *Rhodora* 70(784): 492–532. 1968, *North American Flora Ser. II*(7): 1–53. 1972, *Annals of the Missouri Botanical Garden* 67(3): 523–818. 1980 [1981], *Legum. Agric. Boliv.* 409–423. 1996.

Myroxylon balsamum (L.) Harms (*Myrospermum toluiferum* DC.; *Myrospermum toluiferum* (A. Rich.) DC.; *Myroxylon balsamum* Druce; *Myroxylon balsamum* var. *punctatum* (Klotzsch) Harms; *Myroxylon punctatum* Klotzsch; *Myroxylon toluiferum* A. Rich.; *Myroxylon toluiferum* Kunth, nom. illeg., non *Myroxylon toluiferum* A. Rich.; *Toluifera balsamum* L.)

Amazon Basin. Perennial non-climbing tree, resinous, vanilla odour, leaves compound imparipinnate, flowers white or yellow in terminal or axillary clusters, indehiscent papery samara, seeds surrounded by balsamic resin

See *Species Plantarum* 1: 384. 1753, *Enumeratio Systematica Plantarum* 4, 20. 1760, *Supplementum Plantarum* 34, 233. 1781 [1782], *Annales des Sciences Naturelles (Paris)* 2: 171–172. 1824, *Nova Genera et Species Plantarum* (quarto ed.) 6: 375. 1824, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 95. 1825 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 5(43): 94, 97. 1908, *Botanical Exchange Club and Society of the British Isles (Report)* 3: 421. 1914, *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980

(Can cause an allergic reaction in some individuals. Resin balsam febrifuge, Stimulant, expectorant, antiseptic, parasiticide, an external cicatrizant, effective for colds, abscesses, rheumatism, venereal diseases, asthma, bronchitis, catarrh and lung ailments.)

in English: balsam of Peru, tolu balsam

in Brazil: bálsamo-de-tolu

in Peru: estoraque, quina-quina

Myroxylon balsamum var. *pereirae* (Royle) Harms (*Myrospermum pereirae* Royle; *Myrospermum sonsonatense* Pereira ex Oersted; *Myrospermum sonsonatense* Oersted; *Myroxylon pereirae* Klotzsch; *Myroxylon pereirae* Royle; *Myroxylon pereirae* (Royle) Klotzsch; *Myroxylon toluiferum* A. Rich.; *Toluifera balsamum* L.; *Toluifera balsamum* var. *pereirae* (Royle) Baill.; *Toluifera pereirae* Baill.)

El Salvador. Perennial non-climbing tree, aromatic wood

See *Species Plantarum* 1: 384. 1753, *Enumeratio Systematica Plantarum* 4, 20. 1760, *Supplementum Plantarum* 34, 233. 1781 [1782], *Annales des Sciences Naturelles (Paris)* 2: 171–172. 1824, *An Introduction to the Natural System of Botany* 148. 1836, *A Manual of Materia Medica and Therapeutics* 414. 1853, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 27. 1855, *Bonplandia* 5(17): 274–275. 1857, *Histoire des Plantes* 2: 383. 1870 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 5(43): 95. 1908, *Rhodora* 70(784): 492–532. 1968, *North American Flora Ser. II(7)*: 1–53. 1972, *A Revised Handbook to the Flora of Ceylon* 1: 428–458. 1980, *Cuscatlania* 1(2): 1–16. 1989

(Stimulant, expectorant, antiseptic, parasiticide, essential oil used for skin care, cough. Balsam can cause an allergic reaction in some individuals, a contact allergen which may cause dermatitis.)

in English: balsam of Peru, black balsam, Indian balsam, Peru balsam, Peru balsam tree, Peruvian balsam

in Panama: paila

Myroxylon peruiferum L.f. (*Myrospermum pedicellatum* Lam.)

Bolivia, Colombia. Perennial non-climbing tree

See *Species Plantarum* 1: 384. 1753, *Enumeratio Systematica Plantarum* 4, 20. 1760, *Supplementum Plantarum* 34, 233. 1781 [1782], *Encyclopédie Méthodique, Botanique* 4(1): 191. 1797

(Resin and bark used to heal new wounds. Crushed leaves applied to wounds. Fruits poultice applied to the forehead for headache.)

in South America: balsamo, pau de balsamo, quina colorada, quina-quina, quinoquino

in Brazil: árvore-de-bálsamo, bálsamo, óleo vermelho

Myrrhis Miller Apiaceae (Umbelliferae)

Latin *myrrha*, *murra*, *murrha* for the myrrh-tree and myrrh (Plinius), Greek (of Semitic origin) *myrrhis*, *myrrhidos*, *myrr(h)a*, a name used by Dioscorides for a plant, probably sweet cicely, *Myrrhis odorata*; see E. Masson, *Recherches sur les plus anciens emprunts sémitiques en grec*. Paris 1967,

Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 969. Dover Publications, New York 1967, S. Battaglia, *Grande dizionario della lingua italiana*. X: 529. Torino 1978, Giovanni Semerano, *Le origini della cultura europea. Dizionari Etimologici. Basi semitiche delle lingue indeuropee. Dizionario della lingua Greca*. 2(1): 189. Leo S. Olschki Editore, Firenze 1994.

Myrrhis odorata (L.) Scop.

Europe.

See *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754 and *Acta Biologica Cracoviensia, Series Botanica* 28: 65–85. 1986, *Linzer Biologische Beiträge* 23: 457–481. 1991, *Watsonia* 21: 365–368. 1997

in English: garden myrrh, sweet cicely

Myrsine L. Myrsinaceae (Primulaceae)

Myrsine, *myrrhine*, ancient Greek names for the myrtle; Akkadian *murdudu*, Sumerian *mur-du-du* ‘a plant’, Akkadian *murdinnu*, *amurdinnu* ‘bramble’; see Carl Linnaeus, *Species Plantarum*. 1: 196. 1753, *Genera Plantarum*. Ed. 5. 90. 1754, *Mantissa Plantarum* 2: 144. 1771, *Histoire des plantes de la Guiane Française* 1: 121, pl. 46. 1775, *Encyclopédie Méthodique, Botanique* 1(1): 245. 1783, *Nova Genera et Species Plantarum seu Prodromus* 32. 1788, *Genera Plantarum* [Jussieu] 151. 1789, *Flora Cochinchinensis* 1: 94, 120. 1790, *Syst. Nat.*, ed. 13[bis]. 2(1): 398. 1791, *Annalen der Botanick*. ed. Usteri 1(3): 15. 1792, *Florae Peruvianaee, et Chilensis Prodromus* 141, t. 30. 1794, *Nova Genera Plantarum* 130–131. 1798, *Ges. Naturf. Freunde Berlin Mag. Neuesten Entdeck. Gesammten Naturk.* 3(1): 57 (1809, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 249. 1809, *Voyage de Découverts de l’Astrolabe~ ... Botanique* 1: 349. 1832, *Annals of Natural History* 2(7): 47. 1838 [1839 publ. Sep 1838], *Die Natürlichen Pflanzenfamilien* IV, 1: 87, 90. 1889 and *Bot. Mag.* (Tokyo) 1923, xxxvii. 39. 1923, *Flora of Japan* (Iwatsuki et al., eds.) 3a: 77–78. 1993, *Sida* 17(3): 579–589. 1997. *Myrsine* and *Rapanea* have traditionally been regarded as separate genera especially in regional and local floras.

Myrsine africana L. (*Myrsine africana* var. *acuminata* C.Y. Wu & C. Chen; *Myrsine africana* var. *bifaria* (Wall.) Franch.; *Myrsine africana* var. *glandulosa* J.M. Zhang; *Myrsine africana* var. *retusa* A. DC.; *Myrsine bifaria* Wall.; *Myrsine microphylla* Hayata; *Myrsine potama* D. Don; *Myrsine vacinifolia* Hayata; *Rhamnus myrtillus* H. Lév.)

East Africa. Small shrub, undershrub or small tree, woody, suffrutescent, erect, sparsely or many-branched, tiny toothed leaves, minute red to crimson flowers, sepals pale green with red-orange gland dots, small globose ripe fruit bluish to purple-black, single round seed, ripe fleshy fruits eaten fresh, grazed by cattle, used for broom, laughing thrush (genus *Garrulax*) eats fruit, *Myrsine africana* burns quickly even

when green because of its glandular leaves, at forest edge, in riparian scrub, in woodland

See *Species Plantarum* 1(1): 193–196. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 296–297. 1824, *Prodromus Florae Nepalensis* 146. 1825, *Transactions of the Linnean Society of London* 17(1): 105. 1834, *Nouvelles Annales du Museum d'Histoire Naturelle* 2: 82. 1883 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 3: 149–150. 1913, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 5: 87–88. 1915, *Fl. Southern Africa* 26: 5. 1963, *Flora Yunnanica* 1: 378. 1977, Chen Chieh. *Myrsinaceae. Fl. Reipubl. Popularis Sin.* 58: 1–147. 1979, *Taxon* 29: 353–355. 1980, *Bulletin of Botanical Research* 15(1): 47–48. 1995, *Novon* 6: 307. 1996

(Used in Ayurveda and Unani. Fruit dried, pounded, the powder soaked in water, the liquid drunk as an anthelmintic, purgative, a stomach medicine, for chest pains, arthritis; pulp of fruits taken with milk as anthelmintic, especially for tapeworms. Used to prevent worms in children, to treat stomach upset. Roots boiled to treat worms, especially for children.)

in English: African boxwood, African myrsine, Cape beech, Cape myrtle, wild myrtle

in Kenya: iloongwa, segete

in South Africa: mirting, vliegebos, wildemirt, wildemirting; chikuma, muDongera (Shona); thakxisa (Sotho); thlare-samadi (Tswana); tshilalantsa (Venda)

in Tanzania: kalyarahumla, kanakalayi, mahheli, ngeta, olsegetit, rofwa, segedid, zuma

in China: tie zai

in India: baibarang, bandraru oleander, banwa, banwan, baring, basuti, chapra, chhota mehndru, chhota mendhru, chitring, chota mendru, chupra, gugil, jhunjhra, kanaru, pahari cha, vidanga

in Pakistan: bebrang, chapra

in Tibetan: dong si peng, nabi, nabi shama

Myrsine cicatricosa (C.Y. Wu & C. Chen) Pipoly & C. Chen (*Rapanea cicatricosa* C.Y. Wu & C. Chen)

China.

See *Species Plantarum* 1(1): 196. 1753, *Histoire des plantes de la Guiane Française* 1: 121, 3: pl. 46. 1775 and *Flora Yunnanica* 1: 381, pl. 90, f. 4–8. 1977, *Novon* 5(4): 360. 1995

(Purgative.)

in China: duo hen mi hua shu

Myrsine laetevirens (Mez) Arechav. (*Myrsine laetevirens* (Mez) Pipoly; *Myrsine laetevirens* Arechav.; *Rapanea laetevirens* Mez)

South America.

See *Das Pflanzenreich* (Engler) Myrsin. IV. 236(Heft 9): 395. 1902, *Anales del Museo Nacional de Montevideo* 7: 38. 1909

(Bark as fish poison.)

Myrsine semiserrata Wall. ex Roxb. (*Celastrus cavaleriei* H. Léveillé; *Celastrus seguinii* H. Léveillé; *Myrsine semiserrata* Wallich; *Myrsine semiserrata* var. *brachypoda* Z.Y. Zhu)

China. Edible fruit

See *Species Plantarum* 1(1): 196–197. 1753, *Flora Indica*; or descriptions of Indian Plants 2: 293–295. 1824 and *Repertorium Specierum Novarum Regni Vegetabilis* 13(363–367): 262–263. 1914, *Taxon* 29: 353–355. 1980, *Acta Botanica Yunnanica* 4(1): 50. 1982

(Laxative.)

in English: needletooth myrsine

in China: zhen chi tie zai

in India: bains, dieng ching, gaunta, singgun

Myrtus L. Myrtaceae

Latin *myrtum*, *murtum* for the fruit of the myrtle, a myrtle-berry (Plinius), Latin *myrtus*, *murtus* for a myrtle, myrtle-tree (Plinius) and for a spear of myrtle-wood, Greek *myrtos*, *myrsine*; Akkadian *murdudû*, Sumerian *mur-dû-dû* 'a plant', Akkadian *murdinnu*, *amurdinnu* 'bramble'; see Carl Linnaeus, *Species Plantarum*. 471. 1753 and *Genera Plantarum*. Ed. 5. 212. 1754.

Myrtus communis L. (*Myrtus communis* L. var. *baetica*; *Myrtus communis* L. var. *italica*; *Myrtus communis* L. var. *lusitanica*; *Myrtus oerstediana* O. Berg; *Myrtus sparsifolia* O. Berg)

Cosmopolitan. Evergreen shrub, aromatic leaves, white fragrant flowers, blue-black berries, hard kidney-shaped white seeds

See *Species Plantarum* 1: 471. 1753, *Linnaea* 27(4): 402–403, 405–406. 1854 [1856] and *Cytologia* 50: 513–520. 1985, *Boletim da Sociedade Broteriana*, ser. 2 64: 135–142. 1991, *Regnum Veg.* 127: 68. 1993

(Used in Ayurveda, Unani and Sidha. Aromatic, astringent, dried leaves to relieve stomachache, also a remedy for apoplexy, cerebral affections; powdered leaves applied in eczema, wounds and ulcers. Leafy branches with flowers boiled and taken in the form of decoction in headache and stomach distress. Berries carminative, used in diarrhea, dysentery, hemorrhage, rheumatism, a wash for fetid ulcers, a mouthwash in aphthae. Sacred, ritual, a symbol of youth, beauty and marriage, twigs placed on graves to symbolize the virtue of the dead.)

in English: myrtle

in Bolivia: arayana, arrayan, chequen, mirto

in India: aas, abhulas, adhera, as, asbiri, asmirsin, baragasha, barg-e-maurid, bergi-i-murad, burg madar, cativam, chitti jama, firangimethi, gandhamalati, guemmam, habul, hab-ul-as, hab-ul-asa, habb-ul-aas (murad), hambalas, hubbul as, isbar, isferem, ismar, kulinaval, maurid, mersin, murad, murad (aas), muradvilayatimehndi, murid, mursine, murt, murukulu gida, ral safaid, rihan, sadevam, shalmun, sutrsowa, tevam, tevamamaram, tevarikon, tukhm-e-maurid, vilayati-mehndi, yas

in Pakistan: mort

Mystroxydon Ecklon & Zeyher Celastraceae

From the Greek *mystron* 'a spoon' and *xylon* 'wood', see *Notul. Syst.* (Paris) 10(4): 173–206. 1942, *Fl. Madagasc.* 116: 1–71. 1946, *Bol. Soc. Brot.*, ser. 2, 39: 5–56. 1965.

Mystroxydon aethiopicum (Thunb.) Loes. (*Cassine aethiopica* Thunb.; *Cassine aethiopica* Eckl. & Zeyh.; *Cassine burkeana* (Sond.) Kuntze; *Cassine comorensis* Loes.; *Cassine confertiflora* (Tul.) Myxopyrum Blume Oleaceae

From the Greek *myxa* 'slime' and *pyros* 'wheat', slimy or pulpy seeds, see *Flore portugaise ou description de toutes les* ... 1: 62. 1809, *Bijdragen tot de flora van Nederlandsch Indië* 13: 683. 1826.

Myxopyrum nervosum Blume

Malaysia, New Guinea.

See *Bijdragen tot de flora van Nederlandsch Indië* 13: 683. 1826

(Plant decoction used as a postpartum remedy.)

Malay names: chiput-chiput, taiping

Myxopyrum smilacifolium Blume (*Myxopyrum ellipticilimbum* H.T. Chang; *Myxopyrum serratum* A.W. Hill)

India. Scandent shrub, small yellowish flowers in axillary or terminal panicles, dark black berries

See *Museum Botanicum* 1(20): 320. 1851 [Dec 1850 publ. early 1851] and *Bull. Misc. Inform. Kew* 1910: 41. 1910, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1982(2): 3. 1982, *Blumea* 29(2): 511. 1984, *FoC* 15: 299. 1996

(Used for scabies, cuts, wounds, itching, asthma, rheumatism, headache, neuropathy, fever.)

in China: kuo ye jiao he mu

in India: chathuramulla

Myxopyrum smilacifolium Blume subsp. ***smilacifolium*** (*Chondrospermum laurifolium* Voigt; *Ligustrum laurifolium*

Roxb., nom. nud.; *Myxopyrum ellipticilimbum* H.T. Chang; *Myxopyrum serratum* A.W. Hill; *Myxopyrum smilacifolium* var. *ilicifolium* Kurz)

India, China. Scandent shrub, small yellowish flowers in axillary or terminal panicles, dark black subglobose berries

See *Hort. Bengal.*: 3. 1814, *Hort. Suburb. Calcutt.*: 548. 1845, *Museum Botanicum* 1(20): 320. 1851 [Dec 1850 publ. early 1851], *Forest Fl. Burma* 2: 160. 1877 and *Bull. Misc. Inform. Kew* 1910: 41. 1910, *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1982(2): 3. 1982, *Blumea* 29(2): 511. 1984, *FoC* 15: 299. 1996

(Used for scabies, cuts, wounds, itching, cough, asthma, rheumatism, headache, neuropathy, fever.)

in India: chathuramulla, sadhuramulla

N

Nageia Gaertner Podocarpaceae (Taxaceae)

Nagi, a vernacular name; see *Fruct. Sem. Pl.* 1: 191, t. 39. 1788, *Hort. Bengal.* 71. 1814, *Fl. Ind.* iii. 766. 1832 and Jisaburo Ohwi, *Flora of Japan.* 110. [*Podocarpus nagi* (Thunb.) (Leaves decoction used as an alterative in rheumatism and for painful joints.)

in China: rou tuo zhu bai

Malay name: podo kebal musang gunung

Nama L. Hydrophyllaceae (Boraginaceae)

Greek *nao* 'spring, to flow', *nama*, *namatos* 'spring, running water, stream', Latin *nama*, *namatis* 'a fluid, liquid', referring to the habitat; Akkadian *naba'um* 'to rise, said of flood', *namba'u* 'a large spring', *naqûm* 'to pour out', *niqûm* 'libation'; Hebrew *naba* 'to pour out', *nebeh* 'spring'; see *Species Plantarum* 1: 226. 1753, *Systema Naturae*, Editio Decima 2: 950. 1759, *United States Geological Explorations [sic] of the Fortieth Parallel*. Vol. 5, *Botany* 256. 1871, *Revisio Generum Plantarum* 2: 434. 1891, *Die Natürlichen Pflanzenfamilien* 4(3a): 69. 1897 and *Repertorium Specierum Novarum Regni Vegetabilis* 10(251/253): 281. 1912, *Das Pflanzenreich* IV. 251(Heft 59): 143, 146–147, 157. 1913, *A Manual of the Flowering Plants of California ...* 832. 1925, *American Journal of Botany* 20(6): 415–430. 1933.

Nama hispida A. Gray var. *spathulata* (Torr.) C.L. Hitchc. (*Conanthus hispidus* (A. Gray) A. Heller; *Marilaunidium hispidum* (A. Gray) Kuntze; *Nama biflora* Choisy var. *spathulata* Torr.; *Nama foliosum* (Woot. & Standl.) Tidestr.; *Nama hispidum* A. Gray; *Nama hispida* A. Gray var. *mentzelii* Brand; *Nama hispida* var. *revoluta* Jeps.; *Nama hispida* A. Gray var. *revolutum* Jeps.; *Nama hispida* A. Gray var. *spathulatum* (Torr.) C.L. Hitchc.; *Nama tenue* (Woot. & Standl.) Tidestr.)

North America. Annual herb

See *Reports of explorations and surveys : to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean, made under the direction of the Secretary of War* 7(3/1): 17. 1856, *Revisio Generum Plantarum* 2: 434. 1891, *Bulletin of the Torrey Botanical Club* 24(10): 479. 1897 and *A Manual of the Flowering Plants of California ...* 832. 1925

(A lotion for spider or tarantula bites.)

in English: bristly nama

Nandina Thunb. Berberidaceae (Nandinaceae)

The Japanese name *nanten*, see *Nova Genera Plantarum* 1: 14. 1781, *Primae Lineae Systematis Naturae* 90. 1834.

Nandina domestica Thunb. (*Nandina domestica* var. *linearifolia* C.Y. Wu)

Japan. Evergreen shrub, leaves clasping at base, white flowers in a terminal cluster, bright red berries

See *Nova Genera Plantarum* 1: 14. 1781 and *Kromosomo* 2–10: 271–281. 1978, *Taxon* 28: 630. 1979, *J. Jap. Bot.* 62: 22–27. 1987, *Acta Phytotaxonomica Sinica* 25(2): 154, pl. 4. 1987, *J. Shandong Coll. Traditional Chin. Med.* 12: 55–57. 1988

(Berries possibly toxic, low toxicity if eaten.)

in English: heavenly bamboo, nandina, sacred-bamboo

in China: nan tian zhu zi, nan tien chu, nan chu

in Japan: nanten

in Okinawa: nantin

Nannorrhops H.A. Wendl. Arecaceae (Palmae)

From the Greek *nannos* 'dwarf' and *rhops* 'a bush', bushy palms, see *Bot. Zeitung* (Berlin) 37: 147. 1879.

Nannorrhops ritchiana (Griff.) Aitchison (*Chamaerops ritchiana* Griff.; *Chamaerops ritchiana* Griff.; *Nannorrhops arabica* Burret; *Nannorrhops naudiniana* Becc.; *Nannorrhops ritchiana* (Griff.) H. Wendl.; *Nannorrhops stocksiana* Becc.)

S. Arabian Pen., Iran to Pakistan. Young inflorescences eaten raw or steamed as food

See *Calcutta J. Nat. Hist.* 5: 342 (-343). 1845, *Bot. Zeitung* (Berlin) 37: 148. 1879 and *Bot. Jahrb. Syst.* 73: 185. 1943, *Webbia* 5: 10. 1921, *Fl. Pak.* 153: 18, fig. 5. 1984

(Young leaves used to treat dysentery and diarrhea.)

in Pakistan: peesh

Nanocnide Blume Urticaceae

From the Greek *nanos* 'dwarf' and *knide* 'nettle', see *Mus. Bot.* 2(9–12): 154, t. 17. 1856.

Nanocnide lobata Weddell (*Nanocnide pilosa* Migo)

Japan, Ryukyu Islands.

See *Prodr.* (DC.) 16(1): 69. 1869

(Febrifuge.)

in China: mao hua dian cao

in Japan: shima-katen-sô, yaeyama-katen-sô

Napaea L. Malvaceae

Latin *napaeus* 'belonging to a wooded vale', *nymphae napaeae* 'dell-nymphs', Greek *Napaeae* (-paiai) 'nymphs of glens', see *Species Plantarum* 2: 686. 1753.

Napaea dioica L.

North America. Perennial herb

See *Species Plantarum* 2: 686. 1753 and *Amer. Midl. Naturalist* 70: 94. 1963, Moerman, Daniel E. *Native American Ethnobotany*. 1998

(Roots used for menstrual disorders, to ease childbirth, for piles, sores, swellings. Ceremonial, ritual, hunting charm.)

in English: glade mallow, glademallow

Napoleonaea P. Beauv. Lecythidaceae (Napoleonaeaceae)

Named in honor of the Emperor Napoléon Bonaparte, 1769–1821, see Palisot de Beauvois, Ambroise Marie Francois Joseph (1752–1820), *Napoléone impériale*, *Napoleonaea [Napoleona] imperialis*. Premier genre d'un nouvel ordre de plantes: les Napoléonées. [Paris, 1804], *Flore d'Oware et de Benin en Afrique*. Paris, [1804–1821] and *Proceedings of the American Philosophical Society*, LXXVI, 6, 1936, 899–920. 1936, *Adansonia*, 7: 115–140. 1967.

Napoleonaea heudelotii A. Juss.

Tropical Africa, Nigeria.

See *Annales des Sciences Naturelles; Botanique*, sér. 3 2: 227, t. 4. 1844

(Fruit and stem bark for cough, fevers.)

Napoleonaea imperialis P. Beauv. (*Napoleona imperialis* P. Beauv.; *Napoleonaea imperialis* Hook.)

Tropical Africa, Nigeria.

See *Flore d'Oware et de Benin en Afrique*. Paris, [1804–1821], *Bot. Mag.* 74: t. 4387. 1848 and *Adansonia*, 7: 115–140. 1967

(Fruits and leaves tonic, analgesic.)

in Nigeria: irosun-igbo (Yoruba); ukpakonrisa (Edo); akbodo (Igbo); mabungi (Hausa)

in Yoruba: boiboi, boribori, bongibongi

Napoleonaea vogelii Hooker & Planchon (*Napoleona parviflora* Baker f.; *Napoleona vogelii* Hook. & Planch.; *Napoleonaea angolensis* Welw.; *Napoleonaea leonensis* Hutch. & Dalzell; *Napoleonaea natividadei* A. Fern. & R. Fern.; *Napoleonaea parviflora* Bak.f.; *Napoleonaea talbotii* Baker f.)

Tropical Africa, Nigeria. Small tree, creamy flowers, fruits cauliflorous on trunk

See *Icon. Pl.* 4: t. 799–800. 1848, *Apontamentos Phytogeographicos* 586. 1859 [Dec 1858 publ. Dec 1859] and *Cat. Pl. Oban* 30, 32, t. 4, f. 1–2. 1913 [British Museum, Natural History. *Catalogue of the plants collected by Mr. & Mrs. P. A. Talbot in the Oban district South Nigeria ...*], *Flora of West Tropical Africa* [Hutchinson & Dalziel]1: 204. 1927, *Kew Bull.* 1928, 220. 1928, *Boletim da Sociedade Broteriana*, sér. 2, 43: 1. 1969

(Leaves and fruits for asthma, cough, colds.)

in Nigeria: afo, bobori, boiboi, bori-bori, itor, ukpagongbaragia; gbogbori (Yoruba); ukpagberajia (Edo)

in Yoruba: igo, boiboi, boribori

Naravelia Adans. Ranunculaceae

From *narawael*, the Sinhalese name for *Naravelia zeylanica* (L.) DC., the Malayalam name *naru-walli* refers to a trailing habit, see *Familles des Plantes* 2: 460, 581. 1763, *Regni Vegetabilis Systema Naturale* 1: 129, 167. 1817 [1818 publ. 1–15 Nov 1817].

Naravelia zeylanica DC. (*Atragene zeylanica* L.; *Atragene zeylanica* Blanco; *Naravelia pilulifera* var. *yunnanensis* Y. Fei)

India. Woody climbers, slender, leaves trifoliolate with lateral ovate-cordate leaflets and a terminal 3-branched tendril, greenish-yellow flowers in terminal and axillary panicles, achenes with persistent twisted pilose-feathery styles

See *Species Plantarum* 1: 542. 1753, *Regni Vegetabilis Systema Naturale* [Candolle] 1: 129, 167. 1817–1818, *Fl. Filip.* [F.M. Blanco] 461. 1837, *Journal of Botany, British and Foreign* 6(64): 111. 1868, *FBI* 1: 7. 1872 and *Botaniska Notiser* 132: 310. 1979, *Acta Botanica Indica* 8: 1–10. 1980, *Cytologia* 50: 759–768. 1985, *Acta Botanica Yunnanica* 19(4): 406. 1997

(Used in Ayurveda. Vine crushed and inhaled to cure headache; fresh stems chewed in toothache; plant paste consumed with *Borassus flabellifer* for chest pain. Young leaves paste applied on skin diseases and ulcers, and on forehead for cold and headache; roots of *Eranthemum palatiferum* pounded with leaves of *Naravelia zeylanica* and applied in bone fracture. Crushed roots inhaled against cold and fever. Ceremonial, religious and supernatural beliefs.)

in India: balluli hambu, behalisham, bendri-chi-vel, chagulbati, charachara balli, dhanavalli, erivally, erpeballi, gorap-choi, gorap choi, goropchoi, har-jura, iruppakkodi, kaarupippala tivva, karupippalativva, karuppakkoti, kathirvalli, kharau-sai-rikang, mukkupeenasa teega, mukkupinasatige, naakchaikani, nang-nang-birik-rikang, neendamalli, nintavalli, poitalacci, polutalacci, poytalacci, pulla bachala, rikang-birik, sangongri, sirukodipatchilai, talavedana valli vatakkoti, vadakkodivalli, vatakkoti, vatamkkolli, vatamkkolli, vathakodi

Narcissus L. Amaryllidaceae (Liliaceae)

Classical ancient Greek name, from Akkadian *narum* 'river' and *gissu* 'a thorny bush or tree', some suggested from *narke* 'dullness of sense, numbness' or from *naros* 'wet' (Sanskrit *nira*) or from Sanskrit *nara* 'very perfumed plant' and *kirros* 'yellow'; Narcissus (-kissos), handsome youth, was son of the river-god Cephissus and Liriope; see [Crusca], *Vocabolario degli Accademici della Crusca*. Firenze 1691, 1729–1738 and 1863–1923, Carl Linnaeus, *Species Plantarum*. 1: 289–290. 1753, *Genera Plantarum*. Ed. 5. 141. 1754, Redouté, Pierre Joseph (1759–1840), *Les liliacées*. Narcissus poeticus L. (*Autogenes poeticus* (L.) Raf.)

Europe.

See *Species Plantarum* 1: 289. 1753, *Flora Telluriana* 4: 20. 1838 and *Cytologia* 41: 55-61. 1976, *Taxon* 31: 763-764. 1982, *Anales Jard. Bot. Madrid* 40: 348. 1984, *Kew Bulletin* 42: 65-102. 1987

(This plant contains allergens in the aboveground plant parts, which cause dermatitis in sensitive humans. Ingesting the bulbs can cause poisoning in humans and has also poisoned some cattle. The bulbs contain oxalate crystals as well as an alkaloid lycorine, which cause toxic problems. Serious cases of poisoning are rare.)

in English: narcissus, pheasant's eye, poet's narcissus

Narcissus pseudonarcissus L. (*Ajax pseudonarcissus* (L.) Haw.)

Europe.

See *Species Plantarum* 1: 289-290. 1753 and *Anales del Jardín Botánico de Madrid* 39(2): 298. 1983, *Anales del Jardín Botánico de Madrid* 40: 361-367, 369-377. 1984, *Anales del Jardín Botánico de Madrid* 42: 117-123. 1985, *Kew Bulletin* 42: 65-102. 1987, Gonçalo, S., Freitas, J.D. and Sousa, I. "Contact dermatitis and respiratory symptoms and *Narcissus pseudonarcissus*." *Contact Dermatitis* 16: 115-116. 1987, *Cytologia* 54: 589-595. 1989, *Botanical Journal of the Linnean Society* 108(1): 1-13. 1992

(The aboveground parts cause dermatitis in sensitive individuals. The bulbs can also cause dermatitis. Humans have

been poisoned after ingesting bulbs. Animal poisoning is more severe than human poisoning because humans develop rapid emesis.)

in English: daffodil, Lent lily, Tenby daffodil, trumpet narcissus, wild daffodil

Narcissus tazetta Linnaeus (*Hermione tazetta* (L.) Haw.; *Jonquilla tazetta* (L.) Raf.; *Narcissus linnaeanus* Rouy, nom. illeg.; *Narcissus linnaeanus* (L.) Rouy; *Narcissus linnaeanus* subsp. *tazetta* (L.) Rouy; *Narcissus linnaeanus* subsp. *tazetta* Rouy, nom. inval.; *Narcissus tazetta* subsp. *eutazetta* (L.) Briq.; *Narcissus tazetta* subsp. *eutazetta* Briq.; *Pancratium tazetta* (L.) Sessé & Moc.)

Cosmopolitan. Perennial bulbous herb, white flowers, yellow corona

See *Species Plantarum* 1: 289-290. 1753, *Gen. Pl.* ed. 5, 141. 1754, *Suppl. Pl. Succ.*: 142. 1819, *Familiarum Naturalium Regni Vegetabilis Monographicae* 4: 223. 1847, *Fl. Mexic.*, ed. 2: 85. 1894 and *Prodr. Fl. Corse* 326. 1910, *Fl. France* 13: 40, 47. 1912, Meyer, F.G. "Narcissus species and wild hybrids." *Amer. Hort. Mag.* 45: 47-76. 1966, *Research Bulletin* [Cytogenetics Laboratory, Department of Botany, University of Calcutta] 2: 1-50. 1970, *Hereditas (Beijing)* 97: 227-235. 1982, *Daffodils* 1983-4: 61-63. 1983, *Bulletin of Botanical Research* 4: 159-164. 1984, *Kew Bulletin* 42: 65-102. 1987, *Genetica* 73: 217-221. 1987, *Journal of Fujian Agricultural College* 10: 31-36. 1989, *Informatore Botanico Italiano* 22: 227-236. 1990, Blanchard, J.W. *Narcissus—A Guide to Wild Daffodils*. Woking. 1990, *Journal of Wuhan Botanical Research* 8: 107-113. 1990, Jefferson-Brown, M.J. *Narcissus*. Portland. 1991

(Used in Unani. All parts of the plant are poisonous, especially the bulb, due to phenanthridine alkaloids such as narcissine and lycorine. Paste of bulb with milk and jaggery applied for boils.)

in English: angel's tears, bunch-flowered narcissus, Chinese sacred lily, narcissus, polyanthus narcissus, tazetta

in Arabic: nargis, behar, berengat

in China: chin chan yin tai, shui hsien, shui xian

in India: nargis, piyaz nargis, yamberzol

in Pakistan: nargis

Nardostachys DC. Valerianaceae

From the Greek *nardos* 'spikenard' and *stachys* 'a spike', used by Theophrastus (*HP*. 9.7.2); Latin *nardostachyon*, *nardostachys* 'spikenard', see *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 624. 1830.

Nardostachys jatamansi (D. Don) DC. (*Nardostachys gracilis* Kitam.; *Nardostachys grandiflora* DC.; *Nardostachys jatamansi* DC.; *Patrinia jatamansi* D. Don)

Himalaya. Perennial herb, stout woody-fibrous rootstock, aromatic root coarsely hairy, radical leaves nerved, cauline leaves sessile, small bracts, bluish white flowers in dense cymose heads

See *Annales du muséum national d'histoire naturelle* 10: 311. 1807, *Prodromus Florae Nepalensis* 159. 1825, *Coll. Mém.* vii. 4. t. 2. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 624. 1830, *Mem. Fam. Valerian.* 8, t. 2. 1832 and *Acta Phytotax. Geobot.* xv. 134. 1954, *Ethnobotany* 18: 37–45. 2006

(Used in Ayurveda and Unani. Whole plant antibacterial, used for diarrhea, fevers, conjunctivitis. Leaves stimulant, astringent, tonic, bitter, diuretic, laxative, stomachic, anti-spasmodic. Rhizome used for epilepsy, convulsions, jaundice, hysteria, asthma, snakebite; a tincture for epilepsy and convulsions. Root aromatic stimulant, carminative, febrifuge, antiseptic, root paste for curing piles, ulcers, stomachache and dysentery; root extract for burns, and mixed with *ghee* used to cure joint pain and rheumatism; dried roots used in cholera, palpitation, fevers and heart disorders. Ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies; dried paste of roots as incense, *dhoop*; roots of *Corydalis gowaniana* mixed with *Nardostachys grandiflora* for the preparation of *dhoop*.)

in English: nard, spikenard

in Bhutan: spang-spos

in India: akashamansi, amritajata, balacharea, balachhada, balchhar, balchir, baluchar, bhutajata, bhutakeshi, bhuti-jatt, chakravartani, gandhamansi, gauri, hinsra, jadamansi, janani, jatala, jatalasi, jatamamshi, jatamansi, jatamashi, jatawali, jati, jatila, jetamanshi, kalichhad, kanuchara, keshi, khasambhava, kiratini, kravyadi, krishnsjata, kukilipot, laghumansi, limasha, mansi, mansini, mashi, masi, massi, mata, mishika, misi, mrigabhaksha, nahni, nalada, niralemba, parvatavasini, peshi, peshini, pishachi, pishita, putena, sevali, shvetakeshi, sukshmajatamansi, sukshmapatri, sumbul, tamasi, tapasvini, behnini

in Nepal: bhulte, jatamansi, naorochi, naswan, pangbu, pangphoie

Naregamia Wight & Arn. Meliaceae

From the Malayalam *nila-naregam*, from *nila* 'ground' and *naregam* 'citrus', used by van Rheede in *Hortus Indicus Malabaricus*. 10: t. 22. 1690, see *Genera Plantarum* 263. 1789, *Prodromus Florae Peninsulae Indiae Orientalis* 116. 1834, C.S. Rafinesque, *Sylva Telluriana*. 98. 1838.

Naregamia alata Wight & Arn. (*Guarea glabrescens* (Hook. & Arn.) S.F. Blake; *Guarea glabrescens* S.F. Blake; *Sapindus glabrescens* Hook. & Arn., also *glaberescens*)

India. Herbs, winged petioles, white axillary flowers

See *Species Plantarum* 1: 367. 1753, *Mantissa Plantarum* 2: 150. 1771, *Prodromus Florae Peninsulae Indiae Orientalis* 116. 1834, *The Botany of capt. Beechey's Voyage*; comprising an account of the Plants collected by Messrs. Lay and Collie ... during the voyage to the Pacific and Bering's Strait, performed in H.M.S. *Blossom* ... 1825–1828. 281. London [1830–] 1841 and *Contributions from the United States National Herbarium* 23: 559. 1923

(Used in Ayurveda. Crushed roots applied to inflammation of navel region, also for treating asthma and bronchitis. Leaves pounded and mixed in water as a fish poison.)

in English: Goa ipecacuanha

in India: amlavalli, avacari, belakanji, bilekanchi, brihatpatra, chhinnagranta, drumaruha, jatamasi, kandabahula, kandalu, kapur-bhendi, kapurbhendi, naepa naaringa, nakanu, nela herali, nela naaringi, nela-naregam, nela-naringa, nela-naringu, nelaharile, nelakanchi, nelakanchi gida, nelakanci, nelanaaranga, nelanaaringi, nelanarakam, nelanaranga, nelanaregam, nelanaringa, nepanaringa, nepanaringu, nil-naregam, nilanaarakam, nilanaragam, nilanarai, nilanarakam, pagapapu, pithvel, pitmari, pitpapra, pittamari, pitthamaari, pitthapapra, pittvel, pitvel, thipathi, timpani, tinpani, tinparni, triparni (tri, three, parna, leaf), triparnika, vatarballadhesoppu

Naringi Adans. Rutaceae

From *narinjin*, a vernacular name for *Citrus maxima*, see *Species Plantarum* Editio Secunda. 554. 1762, *Familles des Plantes* (Adanson) 2: 341. 1763, *Genera Plantarum* 296. 1789.

Naringi alata (Wall. ex Wight & Arn.) J.L. Ellis (*Limonia alata* Wall.; *Limonia alata* Wight & Arn.; *Pleiospermium alatum* (Wight & Arn.) Swingle)

India.

See *Numer. List* [Wallich] n. 6363. 1832, *Prodromus Florae Peninsulae Indiae Orientalis* 92. 1834 and *Journal of the Washington Academy of Sciences* 6: 427–428. 1916, *Bull. Bot. Surv. India* 22(1–4): 193. 1980 (publ. 1982), *J. Plant Sci.*, 2: 113–117. 2007

(Stem bark along with that of *Azadirachta indica* boiled in water and the decoction given orally as a postpartum remedy.)

in India: nalla munukudu

Naringi crenulata (Roxb.) Nicolson (*Hesperethusa crenulata* (Roxb.) M. Roem.; *Limonia crenulata* Roxb.; *Naringi crenulata* Nicolson)

India. Small thorny trees, leaves imparipennate, sessile leaflets, white flowers, globose berries

See *Pl. Coromandel* 1: 60, t. 86. 1795–1798, *Familiarum Naturalium Regni Vegetabilis Monographicae* 1: 38. 1846 and *Fl. Hassan Distr. Karnataka, India* 387. 1976, *Proc. Indian Sci. Congr. Assoc.* 84(3:III): 44–45. 1997

(Bark decoction made into a paste and applied on boils. Roots crushed with onion, garlic and calcium made into a paste applied for rheumatism; root bark made into a paste and applied in body pain; powdered roots purgative and stomachic. Leaves soaked in buttermilk and consumed to get relief from ulcer. Bark, leaves and roots ground and made into a paste given orally to increase fertility among women. Roots, leaves and fruits purgative, sudorific, in colic, epilepsy, heart troubles. Fruit and roots anthelmintic, astringent, for diarrhea and dysentery; dried powdered fruits stimulant, tonic.)

in India: binnas, cherukaatanaregam, narimeratti, naringi, ranabela, torrelega, vellaivilvam

Nasa Weigend Loasaceae

See *Familles des Plantes* 2: 501. 1763 and *Arnaldoa* 5(2): 159–170. 1998, *Taxon* 55(2): 465. 2006, *Revista Peruana de Biología* 13(1): 71–84. 2006, *Monogr. Syst. Bot. Missouri Bot. Gard.* 111: 202–206. 2007.

Nasa speciosa (Donn. Sm.) Weigend (*Loasa speciosa* Donn. Sm.)

South America.

See *Botanical Gazette* 23(1): 8. 1897 and *Syst. Bot.* 2: 28–35. 1977, *Novon* 11(1): 153–154. 2001, *Revista Peruana de Biología* 13(1): 81. 2006

(Stinging hairs.)

in South America: campana, ortiga venticuatro

Nasa triphylla (Juss.) Weigend (*Loasa chelidoniifolia* Benth.; *Loasa papaverifolia* Kunth; *Loasa pinnata* Ruiz & Pav. ex E.A. López; *Loasa rudis* Benth.; *Loasa triphylla* Ruiz & Pav. ex E.A. (Stinging hairs.)

in South America: ortiga, pringamosca, pringamoza

Nassauvia Comm. ex Juss. Asteraceae

See *Genera Plantarum* [Jussieu] 175. 1789, *Philosophical magazine, or annals of chemistry, ...* 11: 390. 1832, *Comp. Bot. Mag.* i. (1835) 37. 1835 and *Darwiniana* 24(1–4): 364. 1982.

Nassauvia revoluta D. Don

Chile. Perennial herb

See *Genera Plantarum* 175. 1789, *Philosophical magazine, or annals of chemistry, ...* 11: 390. 1832

(Plant decoction taken for stomachache.)

in Chile: corontillo

Nasturtium R. Br. Brassicaceae (Cruciferae)

The etymology of the generic name quite uncertain, possibly from the Latin *nasturtium*, *ii* (*nasi tortium*) (“quod nasum torquat”) or *nasturcium* or *nasturcum* for a kind of cress, referring to the pungent taste or to the acidity of some species; according to Plinius “*nasturtium nomen accepit a narium tormento*”; see *The Gardeners Dictionary ... Abridged ... fourth edition 1754, Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 13. 1754, *Familles des Plantes* 2: 421. 1763, *Tentamen Florae Germanicae* 1: 281. 1788, *Methodus Plantas Horti Botanici et Agri Marburgensis: a staminum situ describendi* 262. 1794, *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) 4: 109–110. 1812, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 608. 1852 and F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 139. 1989, H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 411–412. 1996. See also genus *Rorippa*.

Nasturtium indicum Garsault (*Nasturtium indicum* sensu Oliver; *Nasturtium indicum* (L.) DC., nom. illeg., non *Nasturtium indicum* Garsault; *Sisymbrium indicum* L.)

India. Herb, whole plant used as vegetable

See *Species Plantarum*, Editio Secunda 2: 917. 1763, *Les Figures de Plantes et Animaux d'Usage en Médecine, Décrit[es] dans la Matière Médicale de Mr. Geoffroy*, t. 404. 1764, *Hortus Kewensis*; or, a catalogue ... The second edition 4: 109–110. 1812, *Regni Vegetabilis Systema Naturale* 2: 199. 1821

(Stimulant.)

in India: leriio

Nasturtium officinale R.Br. (*Nasturtium officinale* W.T. Aiton; *Rorippa nasturtium-aquaticum* (L.) Hayek; *Rorippa nasturtium-aquaticum* Schinz & Thell.; *Rorippa nasturtium-aquaticum* (L.) Schinz & Thell.; *Rorippa officinalis* (R.Br.) P. Royen; *Sisymbrium nasturtium-aquaticum* L.)

India. Perennial spreading herb, white flowers, inflorescence racemose, eaten cooked or raw

See *Species Plantarum* 2: 657. 1753, *Flora Carniolica* 520. 1760, *Methodus Plantas Horti Botanici ...* 262. 1794, *Hortus Kewensis*; or, a catalogue ... (W.T. Aiton) The second edition 4: 109–111. 1812, *Flora der Provinz Brandenburg* 1: 32. 1864, *Memoirs of the Torrey Botanical Club* 3(3): 1–67. 1893 and *Manual of British Botany* ed. 9 26. 1904, *Schedae ad floram stiriacum exsiccatum* 3–4: 22–23. 1905, *Die Flora der Schweiz* ed. 3 301. 1909, *The Alpine Flora of New Guinea* 3: 2029. 1982, *Parodiana* 3: 113–128. 1984, *Opera Botanica* 137: 1–42. 1999

(Watercress may be toxic when ripe. Plant against jaundice, cardiac diseases, low blood pressure, gout and tuberculosis; whole plant used as a vegetable to improve eyesight. Stem and leaves decoction taken orally to cure cough and tuberculosis.)

in English: common watercress, watercress

in Arabic: guernech, harrîqa, karsun, rashad

Maori name: kowhitiwhiti

in Brazil: agrião, agrião-da-fonte, agrião oficial, agrião-saúde-do-corpo

in China: dou ban cai shu, xi yang cai gan

in India: chhuch, ruchu, siche basti, simbraya, simraice, simrayo

Natsiatum Buch.-Ham. ex Arn. Icacinaceae

From *natsiat*, a Javanese plant name, see *Edinburgh New Philosophical Journal* 16: 314. 1834, *Annals and Magazine of Natural History*, ser. 2 8: 174. 1851.

Natsiatum herpeticum Buch.-Ham. ex Arn. (*Natsiatum tonkinense* Gagnep.)

India, Himalaya. Climber, tuberous roots, membranous leaves ovate-cordate, unisexual flowers in extra axillary pendulous racemes, oblique compressed fruits, tender stems and leaves used as vegetable

See *Numer. List* [Wallich] n. 4252. 1831, *Edinburgh New Philosophical Journal* 16: 314. 1834, *FBI* 1: 595. 1875 and *Notulae Systematicae*. *Herbier du Museum de Paris* 1: 205. 1910

(Leaves paste applied to heal and to dry wounds, as an antiseptic cream on cuts and wounds; leaf juice rubbed on forehead and backbone in influenza. Roots juice applied on the breasts to improve lactation at the time of childbirth.)

in China: bao he teng

in India: han-palu, hanpalu, kadda maada, sarak

Nauclea L. Rubiaceae (Naucleaceae)

Greek *naus*, *neos* ‘ship’ and *kleos* ‘glory’, referring to the wood not suitable for the building of a ship, or from *naus* and *kleio* ‘to close, shut, confine’, the half capsule is boat-shaped; or from Latin *naucula*, *ae* ‘a little ship’, because of the shape of the fruits; Latin *naulerus*, Greek *naukleros* ‘skipper’; see Carl Linnaeus, *Species Plantarum*. ed. 2. 1: 243. 1762 and *Taxon* 19: 468–480. 1970, James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 250–251. Chipping Norton, N.S.W. 1981, F.A. Sharr, *Western Australian Plant Names and Their Meanings. A Glossary*. 50. University of Western Australia Press 1996.

Nauclea diderrichii (De Wild.) Merr. (*Nauclea diderrichii* (De Wild. & T. Durand) Merr.; *Nauclea diderrichii* Merr.; *Nauclea trillesii* (Pierre ex De Wild.) Merr.; *Nauclea trillesii* Merr.; *Sarcocephalus badi* Aubrév.; *Sarcocephalus diderrichii* De Wild.; *Sarcocephalus diderrichii* De Wild. & T. Durand; *Sarcocephalus trillesii* Pierre ex De Wild. & A. Chev.; *Sarcocephalus trillesii* Pierre ex De Wild.)

Tropical Africa. Tree, trunk straight and branched horizontally on upper part, bark pale yellowish brown, deeply fissured bark, wood whitish hard, slash pale yellow fibrous, fruits pitted green-brown, fruits said to be eaten by natives, heavily fed upon by gorillas and other primates, in primary forest, *Hypparhenia* grassland, deciduous and evergreen forests

See *Trans. Hort. Soc.* 5: 442. 1824, *Etat. Indep. Congo Expos. Brux.* 1897: 439. 1897 and *Rev. Cult. Colon.* 9: 7. 1901, *Not. Pl. Util. Cardiac glycosides of *Maquira* and *Naucleopsis* species.” *Journal of Ethnopharmacology* 37(2): 129–43. 1992

(Arrow poison.)

Navarretia Ruiz & Pavón Polemoniaceae

After the Spanish physician Francisco Fernandez de Navarrete, professor of medicine at the University of Granada, Spain, author of *Ephemerides barometrico-medicas Matritenses*. 1737. See Ruiz & Pavón, *Flora peruviana, et chilensis prodromus*. 20. Madrid 1794; Sir William J. Hooker and G.A.W. Arnott, *The Botany of capt. Beechey's Voyage*; comprising an account of the Plants collected by Messrs. Lay and Collie ... during the voyage to the Pacific and Bering's Strait, performed in H.M.S. *Blossom* ... 1825–1828. London [1830–] 1841.

Navarretia atractyloides (Benth.) Hook. & Arn. (*Aegochloa atractyloides* Benth.; *Navarretia hamata* Greene subsp. *foliacea* (Greene) H. Mason; *Navarretia hamata* Greene var. *foliacea* (Greene) Thorne)

North America. Annual herb

See *Edwards's Botanical Register* 19: sub pl. 1622. 1833, *The Botany of Captain Beechey's Voyage* 368. 1839 and

Illustrated Flora of the Pacific States 3: 451. 1951, *Aliso* 6(3): 59. 1967

(Used for burns.)

in English: hollyleaf pincushionplant

Navarretia cotulifolia (Benth.) Hook. & Arn. (*Aegochloa cotulifolia* Benth.)

North America. Annual herb

See *The Botany of Captain Beechey's Voyage* 368. 1839

(Antirheumatic.)

in English: cotulaleaf pincushionplant

Neanotis W.H. Lewis Rubiaceae

Referring to the genus *Anotis* DC., from the Greek *a* 'without' and *ous, otos* 'an ear', there are no intermediate teeth between the calyx lobes, see *Genera Plantarum* 196. 1789 and *Annals of the Missouri Botanical Garden* 53(1): 32–46. 1966, *Taiwan J. For. Sci.* 23(3): 271–277. 2008.

Neanotis calycina (Wall. ex Hook.f.) W.H. Lewis (*Anotis calycina* Wall. ex Hook.f.; *Hedyotis calycina* Wall., nom. nud.)

India, Himalaya.

See *Numer. List*: 878. 1829, *The Flora of British India* 3(7): 73. 1880 and *Ann. Missouri Bot. Gard.* 53: 37. 1966

(Paste of tender leaves applied on cuts and wounds to stop bleeding and for healing.)

Neanotis hirsuta (L.f.) W.H. Lewis (*Anotis capitata* Korth.; *Anotis hirsuta* (L.f.) Miq. ex Backer & Slooten; *Anotis hirsuta* (L.f.) Boerl.; *Anotis hirsuta* (L.f.) Hochr., nom. illeg.; *Hedyotis hirsuta* (L.f.) Spreng.; *Hedyotis hirsuta* (L.f.) Sm.; *Hedyotis japonica* (Miq.) Guatemala, British Honduras. Small shrub, deep red-purple flowers

See *Botanical Gazette* 16(7): 199. 1891 and *Contributions from the United States National Herbarium* 13(11): 384. 1911, *Publications of the Field Columbian Museum, Botanical Series* 4(8): 204. 1929, *Contributions from the University of Michigan Herbarium* 7: 9–10. 1942, *Annals of the Missouri Botanical Garden* 30: 85–86. 1943, *Field & Laboratory* 13(1): 2–3. 1945, *The Rain Forests of Golfo Dulce* 410. 1956, *Wrightia* 4(2): 84. 1968

(Crushed leaves rubbed for pain in the joints.)

Neea verticillata Ruiz & Pav.

South America.

See *Systema Vegetabilium Florae Peruviana et Chilensis* 90. 1798

(Ceremonial, ritual, the fruits.)

Neesia Blume Bombacaceae (Malvaceae)

For the German botanist Theodor Friedrich Ludwig Nees von Esenbeck, 1787–1837, professor of pharmacy at Bonn University and co-director of the Botanic Garden, author of *De muscorum propagatione*. Erlangae 1818 and *Radix plantarum mycetoidearum*. Bonnae 1820, joint author with Fridolin Carl Leopold Spenner (1798–1841), Alois (Aloys) Putterlick (1810–1845), Stephan Friedrich Ladislaus Endlicher, Carl Wilhelm Bischof (born 1825), Johann Xaver Robert Caspary (1818–1887), Adalbert Carl Friedrich Hellwig Conrad Schnizlein (1814–1868) and Dietrich Brandis (1824–1907) of *Genera plantarum Florae germanicae*. Bonnae [1833–] 1835–1860, co-author with Carl Heinrich Ebermaier (1802–1870) of *Handbuch der medicinisch-pharmaceutischen Botanik*. Düsseldorf 1830–1832, with his brother the German botanist Christian Gottfried Daniel Nees von Esenbeck (1776–1858) wrote *De Cinnamomo disputatio*. Bonnae 1823 and *Plantarum in Horto Medico Bonnensi nutritarum icones selectae*. Bonnae 1824; see *Bijdragen tot de flora van Nederlandsch Indië* 118. 1825, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 17(1): 83, t. 6. 1835 and J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Bossert, compil., *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 283. 1972, Stafleu and Cowan, *Taxonomic Literature*. 3: 712–715. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Neesia altissima (Blume) Blume (*Esenbeckia altissima* Blume)

Indonesia. Tree

See *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 17(1): 83. 1835

(Fruits diuretic, against gonorrhoea.)

in Indonesia: bengang

Neillia D. Don Rosaceae

After the Scottish (b. Edinburgh) botanist Patrick Neill, 1776–1851 (d. Canonmills, Edinburgh), plant collector, printer,

(founder and) secretary of the Caledonian Horticultural Society and Wernerian Society, in 1813 a Fellow of the Linnean Society, friend of G. Don, his writings include *Journal of a horticultural tour*. Edinburgh, London 1823, *An Address to the Members of the Wernerian Natural History Society*. Edinburgh 1830, *A Tour through some of the Islands of Orkney and Shetland*. Edinburgh 1806, “Remarks made in a Tour thro’ some of the Shetland Islands in 1804.” *The Scots Magazine*. 67: 347–352 and 431–435. 1805, “Remarkable Shower of Hail in Orkney.” *Transactions, Royal Society of Edinburgh*. 1818, *Fruit, Flower and Kitchen Garden*. Edinburgh 1840 and *Canonmills Loch and Meadow*. [Edinburgh 1832]. See *Beytr. Pfl.-Anat.* [Hefts 1–4]: 109. 1799, *Prodr. Fl. Nepal*. 228. 1825, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 611. Ansbach 1852, *Revis. Gen. Pl.* 2: 949. 1891 and *N. Amer. Fl.* 22(3): 240. 1908, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 543. 1965, H.R. Fletcher and W.H. Brown, *Royal Botanic Garden Edinburgh, 1670–1970*. Edinburgh 1970, I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970 F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 139. Berlin & Hamburg 1989.

Neillia thyrsoiflora D. Don (*Opulaster thyrsoiflorus* (D. Don) Kuntze; *Opulaster thyrsoiflorus* Kuntze)

Nepal, India. Shrub, drooping shoots, flowers in branched racemes

See *Prodromus Florae Nepalensis* 228–229. 1825

(Roots of *Neillia thyrsoiflora* and roots of *Achyranthes bidentata* are crushed and the juice given with lukewarm water as a cure for pneumonia.)

in China: xiu xian mei

in India: sinkune, sirkune

Nelsonia R. Br. Acanthaceae

After the Kew gardener David Nelson, died 1789 (Koepong, Timor), plant and seed collector, explorer, from 1776 to 1780 collected for Banks on Cook’s third and last voyage, in 1787 with Captain (subsequently Rear Admiral) William Bligh on HMS *Bounty* (collected breadfruit trees); see Robert Brown, *Prodromus florae Novae Hollandiae*. 480–481. London 1810 and Joseph Henry Maiden, *Sir Joseph Banks, the Father of Australia*. 124–125. Sydney and London 1909, J. Britten, “Some early Cape botanists and collectors.” *J. Linn. Soc. Bot.* 45: 29–51. 1920, Ida Lee (afterwards Marriott), *Early Explorers in Australia*. 76–77. London 1925, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 544. 1965, Kenneth Lemmon, *The Golden Age of Plant Hunters*. 79–106. London 1968, *Phytologia* 37: 412. 1977, Mary Gunn and Leslie Edward W. Codd, *Botanical Exploration of Southern Africa*. 259. Cape Town 1981.

Nelsonia campestris R. Br. (*Justicia nummulariifolia* Vahl; *Nelsonia canescens* (Lam.) Spreng.; *Nelsonia canescens* Spreng.; *Nelsonia nummulariaefolia* (Vahl) Roem. & Schult.; *Nelsonia nummulariifolia* Roem. & Schult.)

Tropical Africa. Prostrate herb, pinkish flowers

See *Enumeratio Plantarum* ... 1: 122, 160, 164–165. 1804, *Prodromus florae Novae Hollandiae*. 480–481. 1810, *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 1: 172–173, 174–175. 1817, *Syst. Veg.* (ed. 16) [Sprengel] 1: 42. 1824 [dated 1825, publ. in late 1824] and *Catalogue des Plantes de Madagascar, Acanth.* 2(24): 7–32. 1939, *Taxon* 29: 358–360. 1980

(Leaves juice for yellow fever, eyes inflammation. Root ground with water and taken as a tonic and aphrodisiac.)

in India: patta kamraj

Nelsonia canescens (Lam.) Spreng. (*Dicliptera tomentosa* (Vahl) Nees; *Eranthemum nervosum* (Vahl) R. Br. ex Roem. & Schult.; *Justicia bengalensis* Spreng.; *Justicia brunelloides* Lam.; *Justicia canescens* Lam.; *Justicia hirsuta* Vahl; *Justicia lamifolia* J. König ex Roxb.; *Justicia lamiiifolia* Roxb.; *Justicia nervosa* Vahl; *Justicia nummulariaefolia* Vahl; *Justicia nummulariifolia* Vahl; *Justicia origanoides* Vahl; *Justicia tomentosa* Vahl; *Justicia tomentosa* Roxb., nom. illeg., non *Justicia tomentosa* Vahl; *Justicia vestita* Roem. & Schult.; *Nelsonia albicans* Kunth; *Nelsonia brunelloides* (Lam.) Kuntze; *Nelsonia campestris* R. Br.; *Nelsonia campestris* var. *vestita* (Roem. & Schult.) C.B. Clarke; *Nelsonia canescens* Nees ex Hemsl., nom. inval.; *Nelsonia canescens* Spreng.; *Nelsonia canescens* var. *vestita* (Roem. & Schult.) E. Hossain; *Nelsonia hirsuta* Roem. & Schult.; *Nelsonia hirsuta* (Vahl) Roem. & Schult.; *Nelsonia lamiiifolia* (Roxb.) Spreng.; *Nelsonia lamiiifolia* Spreng.; *Nelsonia nummulariaefolia* (Vahl) Roem. & Schult.; *Nelsonia nummulariifolia* Roem. & Schult.; *Nelsonia origanoides* (Nees) Steud.; *Nelsonia origanoides* Roem. & Schult.; *Nelsonia origanoides* (Vahl) Roem. & Schult.; *Nelsonia pohlii* Nees; *Nelsonia rotundifolia* R. Br.; *Nelsonia senegalensis* Oerst.; *Nelsonia tomentosa* A. Dietr.; *Nelsonia tomentosa* (Roxb.) Willd.; *Nelsonia villosa* Oerst.)

India. Herb, weed, prostrate, trailing branches, branching, softly pubescent, pink-purple to yellow flowers in cylindrical villous spikes

See *Species Plantarum* 1: 9, 15–16. 1753, *Symbolae Botanicae*, ... 2: 3. 1791, *Tableau Encyclopédique et Méthodique* ... Botanique 1: 40–41. 1791, *Enumeratio Plantarum* ... 1: 122, 160, 164–165. 1804, *Annales du muséum national d'histoire naturelle* 9: 267. 1807, *Prodromus Florae Novae Hollandiae* 480–481. 1810, *Nova Genera et Species Plantarum* (quarto ed.) 2: 234. 1817, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 1: 172–173, 174–175. 1817, *Flora Indica*; or descriptions of Indian Plants 1: 132–133, 135. 1820, *Systema Vegetabilium Mant.* 1: 145. 1822, *Systema Vegetabilium*, editio decima sexta 1: 42, 82. 1824 [dated 1825, publ. in late

1824], *Species Plantarum*. Editio sexta 1: 419. 1831, *Nomencl. Bot.* [Steudel], ed. 2: 488. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 481. 1847, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1854: 118–119. 1854, *Journal of the Linnean Society, Botany* 7: 13–54. 1864, *Biologia Centrali-Americana; ... Botany* ... 2(12): 501. 1882, *The Flora of British India* 4: 395. 1884, *Revisio Generum Plantarum* 2: 493. 1891 and *Catalogue des Plantes de Madagascar, Acanth.* 2(24): 7–32. 1939, *Flore de Madagascar et des Comores* 182: 1–219. 1967, *Taxon* 29: 358–360. 1980, *Willdenowia* 14: 403. 1984, *Systematic Botany* 18: 283–289. 1993, *Proceedings of the XIIIth Plenary Meeting of AETFAT, Zomba, Malawi*, 1–11 April, 1991 1: 315–325. 1994

(Herb used in uterine displacement. Roots pounded with salt are applied to wounds, itches, skin diseases; root paste to treat boils and blisters on the tongue and mouth; juice used against Guinea worms. A paste of leaf and inflorescence given orally in the diarrhea of children; leaf paste applied in piles. Plant paste applied to burning soles.)

in India: bodo rasna, botjuni, momorkha, mujari, punjiki jadi, rasna

Nelumbo Adans. Nelumbonaceae

Sinhalese name for lotus plant, *nelumbu*, *nelun*, see *Species Plantarum* 1: 510–511. 1753, *Familles des Plantes* 2: 76, 582. 1763, *Genera Plantarum* [Jussieu] 68. 1789, *Annals of Botany* 2: 70. 1805, *Regni Vegetabilis Systema Naturale* 2: 43. 1821, *Dictionnaire classique d'histoire naturelle* 11: 492. 1827, *Prodromus Florae Hispanicae* 1: 30. 1861 and *Novon* 2(3): 236. 1992, *Phytologia* 79(2): 72. 1995[1996], *Amer. J. Bot.* 89: 1367. 2002, *Flow. Pl. Fam. World* 226. 2007, *Plant Book* 575. 2008.

Nelumbo lutea Willdenow (*Nelumbium luteum* Willd.; *Nelumbo lutea* (Willdenow) Persoon; *Nelumbo lutea* Pers.; *Nelumbo lutea* Michx., nom. illeg., non *Nelumbo lutea* Willd.; *Nelumbo pentapetala* (Walter) Fernald; *Nymphaea pentapetala* Walter)

North America. Perennial, aquatic, herb with milky latex, round floating leaves, fragrant pale yellow to cream flowers, petal-like sepals, seeds and tubers for food, species sometimes an aggressive, difficult-to-eradicate weed in ponds, lakes and reservoirs

See *Species Plantarum*. Editio quarta 2(2): 1259. 1799, *Flora Boreali-Americana* 1: 317. 1803, *Annals of Botany* 2: 70. 1805, *Syn. Pl.* 2: 92. 1807 and Hall, T.F. and W.T. Penfound. “The biology of the American lotus *Nelumbo lutea* (Willd.) Pers.” *Amer. Midl. Naturalist* 31: 744–758. 1944, Schneider, E.L. and J.D. Buchanan. “Morphological studies of the Nymphaeaceae. XI. The floral biology of *Nelumbo pentapetala*.” *Amer. J. Bot.* 67: 182–193. 1980, M.R. Gilmore, *Uses of Plants by the Indians* ... 27–28. 1991

(Ceremonial plant, ritual, mystic-magico-religious beliefs and powers.)

in English: American lotus, water chinquapin, yellow lotus

in North America: tethawe (Omaha-Ponca), tewape (Dakota), tsherop (Winnebago), tukawiu (Pawnee), water chinquapin, yellow lotus

Nelumbo nucifera Gaertn. (*Nelumbium nelumbo* Druce; *Nelumbium nelumbo* (L.) Druce; *Nelumbium nuciferum* Gaertn.; *Nelumbium speciosum* Willdenow; *Nelumbo caspica* (DC.) Fisch.; *Nelumbo komarovii* Grossh.; *Nelumbo nucifera* var. *macrorrhizomata* Nakai; *Nelumbo speciosa* Willd.; *Nymphaea nelumbo* L.)

SE Asia. Aquatic perennial herb, robust, emergent, creeping rootstock, large single pink or white flower, obconical fruits, black oblong seeds, intensely bitter embryo, edible young rhizomes, tender rootstock, petioles, leaves and seeds

See *Species Plantarum* 510–511. 1753, *Familles des Plantes* 2: 76, 582. 1763, *De Fructibus et Seminibus Plantarum*... 1: 73. 1788, *Species Plantarum*. Editio quarta [Willdenow] 2(2): 1258–1259. 1799, *Fl. Brit. India* 1: 116. 1875, Karsten, Hermann (1817–1908), *Deutsche Flora. Pharmaceutisch-medicinische Botanik* (Karsten) 553. thaamarai, thaavare, thamara, thamarai, thambal, thavare, thavare hoo, thella thaamara, thellane padmanu, thumbal, tikkayam, tirumalarkkoti, tirumalkompar, tirumalunti, totakam, toyacam, tumarasa, tunaparicam, urocana, urocana, urokani, ussulnilufer, vacanakkoti, vacanam, vanacak-koti, vanacopanam, vanashobhana, vanicam, vannivannam, vantuni, vantunikkoti, varicam, varikam, varisoha, vaucikakkoti, vaucikam, ventamara, ventamarai, vicappicuranam, vicappiracunam, vicaputpam, vintu, vintukam, visaputpam

in Indonesia: padma (*padma* is a Sanskrit word that means lotus, and the lotus is the seat of God), teratai, teraté

in Japan: Hasu (= the Throne of Hasu = The Lotus Throne), renkon (for the roots, rhizomes)

Malayan names: lian hua, seroja, telepok, teratai

in Okinawa: rin, din

in Philippines: baino, balbalino, sukao

in Tibet: pa dma dkar po, pa dma dmar po, u-tpa-la

in Vietnam: lien, sen

Nemopanthus Raf. Aquifoliaceae

Greek *nema* ‘thread’, *pous* ‘foot’ and *anthos* ‘flower’, referring to the peduncles, or from *nema*, *ops*, *opsis* ‘aspect, sight, appearance, resemblance’ and *anthos*; see *Species Plantarum* 1: 125. 1753, *Le Botaniste Cultivateur* 4: 127. 1802, Constantine Samuel Rafinesque, *Florula ludoviciana*. 167. New York 1817, *American monthly magazine and critical review* 4: 357. 1819 and E.D. Merrill, *Index Rafinesquianus*. 159–160. 1949.

Nemopanthus mucronatus (L.) Trel. (*Ilex mucronata* (L.) M. Powell, Savol. & S. Andrews; *Ilicioides mucronata* (L.) Britton; *Ilicioides mucronata* Britton; *Vaccinium mucronatum* L.)

North America.

See *Species Plantarum* 1: 350. 1753, *Transactions of the Academy of Science of St. Louis* 5(3[1]): 349. 1889, *Memoirs of the Torrey Botanical Club* 5: 217. 1894 and *Ann. Missouri Bot. Gard.* 66: 856–861. 1979, *Taxon* 31: 766–768. 1982, *Kew Bulletin* 55(2): 345. 2000

(Cough sedative, febrifuge, tonic, for tuberculosis.)

in English: cat berry, mountain holly

Nemophila Nutt. Hydrophyllaceae (Boraginaceae)

Greek *nemos* ‘wooded pasture, glade, a grove’ and *philos* ‘loving’, referring to the habitat, see Barton, William Paul Crillon (1786–1856), *A flora of North America*, illustrated by coloured figures, drawn from nature. 2: 71, t. 61. Philadelphia. 1822, *J. Acad. Nat. Sci. Philadelphia* 2: 179. 1822.

Nemophila maculata Benth. ex Lindley (*Nemophila maculata* Lindl.)

North America. Herb, low-growing, slender, branching, pinnately lobed leaves, white open bowl-shaped flowers, petals with deep purple spot at the tip, forage

See *Journal of the Horticultural Society of London* 3: 319. 1848

(Veterinary medicine, tonic, stimulant.)

in English: fivespot

Nemophila menziesii Hook. & Arn. (*Nemophila insignis* Benth. var. *menziesii* (Hook. & Arn.) A. DC.; *Nemophila menziesii* A. Gray; *Nemophila menziesii* Hook. & Arn. subsp. *insignis* (Benth.) Brand; *Nemophila menziesii* Hook. & Arn. subsp. *insignis* Brand; *Nemophila menziesii* Hook. & Arn. var. *discoidalis* (Lem.) Voss; *Nemophila menziesii* Hook. & Arn. var. *venosa* (Jeps.) Brand; *Nemophila menziesii* Hook. & Arn. var. *venosa* Brand)

North America. Annual herb, low-growing, slender, branching, pinnately lobed leaves, pale blue flowers, forage

See *The Botany of Captain Beechey’s Voyage* 152. 1833, *Transactions of the Horticultural Society of London*, ser. 2, 1(6): 479–480. 1835, *Trans. Linn. Soc. London* 17: 275. 1836, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 9: 290. 1845 and *A Flora of Western Middle California* 434. 1901, *University of California Publications in Botany* 4(13): 210. 1912, *Das Pflanzenreich* IV. 251(Heft 54): 48–49. 1913, *Genetics*. 150(4): 1649–1661. 1998, *Journal of Evolutionary Biology* 17(4): 786–794. 2004, *Oecologia* 155(4): 729–737. 2008

(Veterinary medicine, tonic, stimulant.)

in English: baby blue-eyes, Menzies’ baby blue-eyes

Neoboutonia Müll.Arg. Euphorbiaceae

For the botanist Louis Sulpice Bouton (1799–1878), naturalist, plant collector, among his writings are *Sur le décroissement des forêts à Maurice*. Maurice 1838, “Plantes médicinales de Maurice. Indigènes ou cultivées dans les jardins.” *Société Royale des Arts & Sciences de Maurice*. Transactions, vol. 1, part 1. Port Louis 1857 [Engl. transl. “Medicinal plants growing or cultivated in the island of Mauritius.” *Trans. Roy. Soc. Arts Sci. Mauritius*, New Ser. 1: 1–177. 1857], *Rapport présenté à la Chambre d’Agriculture sur les diverses espèces de cannes à sucre cultivées à Maurice*. 1863 and *Plantes médicinales de Maurice*. Port Louis 1864. See John Vaughan Thompson (1779–1847), *A catalogue of the exotic plants cultivated in the Mauritius ...* to which are added the english and french names... Compiled under the auspices of R.T. Farquhar Esq. Governor of Mauritius. Mauritius 1816, *Journal of Botany, British and Foreign* 2: 336. 1864 and J.H. Barnhart, *Biographical Notes upon Botanists*. 1: 232. 1965,

Frans A. Stafleu and Erik A. Mennega, *Taxonomic Literature. Supplement II*. 393–394. [“1800–1879, or 1878”] 1993.

Neoboutonia macrocalyx Pax (*Neoboutonia glabrescens* Prain)

Tanzania. Tree, fruit covered with brown pubescence outside

See *J. Bot.* 2: 336. 1864 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(3–4): 339. 1901, *Bulletin of Miscellaneous Information Kew* 1911: 265. 1911, *Das Pflanzenreich* 147,7(Heft 63): 75. 1914

(For skin diseases, astringent.)

in Tanzania: kabhonobhono, mpala

Neocarya (DC.) Prance ex F. White Chrysobalanaceae

From the Greek *neos* ‘new’ and *karyon* ‘walnut, nut’, see *Bulletin du Jardin Botanique National de Belgique* 46(3–4): 308. 1976.

Neocarya macrophylla (Sabine) Prance ex F. White (*Ferolia macrophylla* (Sabine) Kuntze; *Neocarya macrophylla* (Sabine) Prance; *Neocarya macrophylla* (Sabine) Prance ex F. White; *Parinari macrophylla* Sabine; *Parinari senegalensis* Perr. ex DC.; *Petrocarya macrophylla* (Sabine) Steud.)

Tropical Africa. Tree or shrub, stout densely tomentose branchlets, gnarled bole, petals and stamens white, fruit rough-skinned edible, on banks of sandy seasonal watercourses, savanna, on sandy beaches

See *Histoire des plantes de la Guiane Française* 1: 514, pl. 204–206. 1775, *Genera Plantarum* ed 8. 1: 245. 1789, *Narrative of an Expedition to Explore the River Zaire* 433. 1818, *Transactions of the Horticultural Society of London* 5: 452. 1824, *Nomenclator Botanicus*. Editio secunda 2: 309. 1841, *Catalogus plantarum quae in Horto botanico bogoriensi ...* 256. 1866, *Revisio Generum Plantarum* 1: 216. 1891 and *Bulletin du Jardin Botanique National de Belgique* 46(3–4): 308. 1976, *Journal of Ethnopharmacology* 21: 109–125. 1987

(Bark for toothache, eye treatments; root bark haemostatic and cicatrisant on wounds. Endocarp hairs vermifuges. Veterinary medicine, leaves used for diarrhea and dysentery. Superstitions, magic, antidote.)

in English: ginger plum, gingerbread-plum, neou oil tree, rotten plum

in Burkina Faso: sicouni

in Ghana: nya

in Guinea: bansuma, cura-bussuma, kura-bansuma, mampataz, mampataz grande, n-bute, n-djapô, n-japo, neudi, niamui, node, nórônórôdô, nororodo, orodjô, sicougny, signon, sigon, sikonyi, tusukura, téhé, umbatú, undjapô

in Ivory Coast: néu, sicouni

in Liberia: tifi

in Mali: danga

in Niger: gamsa, gaosa, gawasa

in Nigeria: bakar rura, gawasa, gàwàsaá, kóbenci, naawdi, nawarre, putu, pútú, pútú’bá, pútú yiwó

in Senegal: ba, baa, baabu, bahan, bel, beul, danga, kifokum, tamba tambakumbaa, tétu

Neocinnamomum H. Liou Lauraceae

Referring to *Cinnamomum*, see *Contribution à l'étude systématique et phytogéographique des Lauracées de Chine et d'Indochine*. Paris: Jouve, 1932.

Neocinnamomum delavayi (Lecomte) H. Liou (*Cinnamomum delavayi* Lecomte; *Cinnamomum parvifolium* Lecomte; *Neocinnamomum delavayi* (Lecomte) H. Liou var. *pauciflorum* Y.C. Yang; *Neocinnamomum parvifolium* (Lecomte) H. Liou)

China.

See *Laurac. Chine et Indochine*, 88, 90. 1932

(Leaves used for rheumatism.)

in China: xin zhang

Neohouzeaua A. Camus Poaceae

Named for Jean Houzeau de Lehaie, 1867–1959, explorer, botanical collector, author of *Le bambou, son étude, sa culture, son emploi*. Mons 1906, “La culture des bambous dans le Sud-Ouest de la France.” *Bull. Soc. Dendr. Fr.* 14: 233–266. 1909, type *Neohouzeaua mekongensis* A. Camus, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829 and *Bulletin du Muséum National d’Histoire Naturelle* 28(1): 100. 1922, *Taxon* 6(7): 206. 1957, *Agriculture Handbook* 193: 1–74. 1961, *Contributions from the United States National Herbarium* 39: 112. 2000.

Neohouzeaua dulloa (Gamble) A. Camus (also *dullooa*) (*Schizostachyum dulloa* (Gamble) Majumdar; *Teinostachyum dullooa* Gamble)

Vietnam, Bhutan, India, Bangladesh. Erect, leaning, slender, thin-walled, open tufted, nodes more or less swollen, many branches at each node, culm sheath glabrous, sheath blade narrowly lanceolate and tapering, inflorescence on leafy branch, wild and cultivated, used for building purposes and basketry, light constructions and mats, poles and umbrellas, culms used as floats

See *Annals of the Royal Botanic Garden, Calcutta*. 7: 101, pl. 89. 1896, *FBI* 7: 411. 1896 and *Bulletin du Muséum National d’Histoire Naturelle* 28(1): 101. 1922, *Florae Indicae*

Enumeratio: Monocotyledonae, Bambusoideae Botanical Survey of India, Flora of India, Series 4, 281. Calcutta 1989

(For broken bones.)

in Bangladesh: dolu

in India: dolu, dongla, dullooa, puksalu, ruathla, wadru

in Thailand: mai hia

in Vietnam: cai noa, kei noua

Neohouzeaua helferi (Munro) Gamble (*Arundarbor helferi* (Munro) Kuntze; *Bambusa helferi* Munro; *Pseudostachyum helferi* (Munro) Kurz; *Schizostachyum helferi* (Munro) R.B. Majumdar; *Teinostachyum helferi* (Munro) Gamble) (for Johann Wilhelm Helfer, 1810–1840, born Prague and died Andaman Islands, explorer, botanist, collector in India and Burma, Andaman Islands and Tenasserim; see Mathilde Pauline Nostitz, *Johann Wilhelm Helfer's Reisen in Vorderasien und Indien*. Leipzig 1873, 1877 and *Travels of a Doctor and Madame Helfer in Syria, Mesopotamia, Burmah and other lands ...* Rendered into English by Mrs. G. Sturge. [With a preface by F. von Hochstetter.] 2 vols. London 1878)

Myanmar, India. Straggling, scrambling, climbing, culms used for basketry

See *Transactions of the Linnean Society of London* 26(1): 114, 142, t. 3. 1868, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 42(2): 253. 1873, *Revisio Generum Plantarum* 2: 761. 1891, *Annals of the Royal Botanic Garden, Calcutta*. 7: 102, pl. 90. 1896 and *Bulletin of Miscellaneous Information Kew* 1923: 91. 1923, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* 281. Calcutta 1989

(An infusion of the leaves used as an eye wash and internally given for bronchitis and gonorrhoea)

in Thailand: hia khrua, mai hia, so khae ya, tho ha kai, thoi ha kai

Neohymenopogon Bennet Rubiaceae

Genus *Hymenopogon* Wallich, from the Greek *hymen* ‘a membrane’ and *pogon* ‘beard’, see *Fl. Ind.*, ed. Carey & Wall. ii. 156. 1824 and *Indian Forester* 107(7): 436. 1981.

Neohymenopogon parasiticus (Wall.) Bennet (*Hymenopogon parasiticus* Wall.; *Hymenopogon parasiticus* var. *longiflorus* F.C. How; *Hymenopogon parasiticus* Wall. var. *longiflorus* F.C. How ex W.C. Chen; *Mussaenda cuneifolia* D. Don)

Bhutan, Nepal, China. Epiphyte, white flowers

See *Flora Indica*; or descriptions of Indian Plants 2: 157–158. 1824, *Prodr. Fl. Nepal.*: 139. 1825 and *Indian Forester* 107(7): 436. 1981, *Guihaia* 7(4): 297–298. 1987

(Fruit paste applied to treat toothache.)

in Nepal: gobre kath

Neolamarckia J. Bosser Rubiaceae

See *Bull. Mus. Natl. Hist. Nat.*, B, *Adansonia* Sér. 4, 6(3): 247. 1985 [1984 publ. 1985].

Neolamarckia cadamba (Roxb.) Bosser (*Anthocephalus cadamba* Miq.; *Anthocephalus cadamba* (Roxb.) Miq.; *Anthocephalus indicus* A. Rich. var. *glabrescens* H.L. Li; *Anthocephalus morindifolius* Korth.; *Nauclea cadamba* Roxb.; *Nauclea megaphylla* S. Moore; *Neonauclea megaphylla* (S. Moore) S. Moore; *Samama cadamba* (Roxb.) Kuntze; *Samama cadamba* Kuntze; *Sarcocephalus cadamba* (Roxb.) Kurz) (*Anthocephalus* A. Rich., from the Greek *anthos* ‘a flower’ and *kephale* ‘head’, referring to the heads of flowers.)

Trop. Asia. Tree, broad crown, long horizontal branches, sapwood white, triangular stipules, fragrant orange or yellow bisexual flowers in solitary terminal head, globose fruit edible, fresh leaves fodder

See *Flora Indica*; or descriptions of Indian Plants 2: 121. 1824, *Trans. Hort. Soc.* 5: 442. 1824, *Mémoire sur la famille des Rubiacées* 157. 1830, *Mémoires de la Société d'Histoire Naturelle de Paris* 5: 238. 1834, *Flora van Nederlandsch Indië* 2: 135. 1856, *Fl. Burm.* 2: 63. 1877 and *Journal of the Arnold Arboretum* 25(3): 318. 1944, *Bull. Mus. Nation. Hist. Nat.*, B, *Adansonia*, 1984(3): 247. 1985 [1984 publ. 1985], *Gardens' Bulletin. Singapore* 47: 347–655. 1995 [1997]

(Used in Ayurveda and Sidha. Stem as a tooth brush in gum infection and dental caries. Hepatoprotective, nematocidal, tonic and febrifuge, astringent; dried bark used to relieve fever, burning sensation and as a tonic; an extract of the leaves serves as a mouth gargle. Fruit fresh juice applied to the heads of infants, used to kill worms in sores. Veterinary medicine, leaves juice for colic. Magic, one of the sacred and mystical trees of India, related to Lord Krishna, traditionally believed to bring happiness and prosperity, wisdom and sublime love; it's not allowed to cut this tree; ceremonial, ritual, ingredient of *Patra pooja* in different religious *pooja* ceremonies; leaves and inflorescence offered to Lord Krishna.)

in English: common bur-flower tree

in Brunei: bangkal, kaatoan bangkal

in Burma: mau-lettan-she, maukadon, yemau

in Cambodia: thkoow

Japan.

See *Journ. Coll. Sci. Tokyo* 30: 246. 1911, *Bot. Mag. Tokyo* 23: 256. 1918

(Roots for the treatment of respiratory troubles, stomachache and dropsy.)

in China: xin mu jiagn zi

Neolitsea aurata (Hayata) Koidzumi var. *chekiangensis* (Nakai) Yang & P.H. Huang (*Neolitsea chekiangensis* Nakai)

China, Japan.

See *Journ. Bot. Jap.* 16: 128. 1940, *Acta Phytotax. Sin.* 16(4): 39. 1978

(Bark for the treatment of stomachache.)

in China: zhe jiang xin mu jiang zi

Neolitsea cambodiana Lecomte var. *cambodiana* (*Neolitsea ferruginea* Merrill)

SE Asia.

See *Not. Syst.* 2: 335. 1913

(Leaves applied to affected parts in tuberculosis.)

in China: xiu ye xin mu jiang zi

Neolitsea cassia (L.) Kosterm. (*Cinnamomum cassia* (L.) C. Presl; *Cinnamomum cassia* (L.) D. Don; *Laurus cassia* L.; *Persea cassia* (L.) Spreng.)

India. Evergreen tree, greenish flowers

See *Species Plantarum* 1: 369. 1753, *Systema Vegetabilium*, editio decima sexta 2: 267. 1825, *Prodromus Florae Nepalensis* 67. 1825 and *Journal of Scientific Research* 1: 85. 1952

(Root and bark for skin diseases, eruptions.)

in India: malagaschembagapalaei

Neolitsea levinei Merrill (*Benzoin levinei* (Merrill) Chun ex Liou Ho (also H. Liu); *Neolitsea chinensis* (Gamble) Chun; *Neolitsea lanuginosa* Gamble var. *chinensis* Gamble)

China, Indochina.

See *Species Plantarum* 1: 444. 1753, *Botanica expeditionior* 60. 1760, *Nova Genera Plantarum* 64. 1783, *Genera Plantarum*

80. 1789, *Getreue Darstellung und Beschreibung der in der Arzneykunde Gebräuchlichen Gewächse* 11, t. 24. 1830 and *Philippine Journal of Science* 1(Suppl.): 56. 1906, *Plantae Wilsonianae* 2(1): 79. 1914, *Philipp. Journ. Sci. Bot.* 13(3): 138–139. 1918, *Contributions from the Biological Laboratory of the Science Society of China* 1(5): 68. 1925, *Journal of the Arnold Arboretum* 8(1): 22. 1927, *Lauracées de Chine et de l'Indochine* 148. 1934, *Systematic Botany* 24(3): 374. 1999

(Roots for the treatment of women's diseases, menstrual troubles.)

in China: da ye xin mu iang zi

Neolitsea pallens (D. Don) Momiy. & H. Hara (*Litsea consimilis* (Nees) Nees; *Litsea umbrosa* (Nees) Nees var. *consimilis* (Nees) Hook. f.; *Tetradenia consimilis* Nees; *Tetradenia pallens* D. Don)

Nepal, India. Seed oil used as a substitute for ghee

See *Prodromus Florae Nepalensis* 66. 1825, *Plantae Asiaticae Rariores* 2: 64. 1831, *Systema Laurinarum* 628. 1836, *The Flora of British India* 5(13): 180. 1886 and *Journal of Japanese Botany* 47(9): 269–270. 1972

(Seeds for scabies and eczema; oil for skin diseases.)

in China: hui bai xin mu jiang zi

in India: bilaru, cherar, cheri, chiarara, sasoor

Neolitsea sericea (Blume) Koidz. (*Laurus glauca* Thunb.; *Laurus glauca* Hort. Wuerz. ex Nees; *Laurus sericea* Blume; *Laurus sericea* Wall.; *Laurus sericea* Willd. ex Nees; *Laurus sericea* Hook. ex Nees; *Litsea glauca* (Thunb.) (Stimulant, for skin diseases.)

in China: zhou shan xin mu jiang zi

Neolitsea umbrosa (Nees) Gamble (*Litsea umbrosa* (Nees) Nees; *Tetradenia umbrosa* Nees)

India. Small evergreen tree

See *Encyclopédie Méthodique, Botanique* 3(2): 574. 1792, *Edwards's Botanical Register* 15: no. 1300. 1830, *Plantae Asiaticae Rariores* 2: 64. 1831, *Systema Laurinarum* 623. 1836 and *Philippine Journal of Science* 1(Suppl.): 56. 1906, *Plantae Wilsonianae* 2(1): 79. 1914

(The oil from the fruits applied on skin diseases; paste of the fruits used in skin ailments.)

in India: charindi, cher, chindi, chirar, chirindi, chiur, shuru, suss

Neolitsea zeylanica (Nees & T. Nees) Merr. (*Litsea zeylanica* Nees & T. Nees; *Tetradenia zeylanica* (Nees & T. Nees) Nees)

Sri Lanka. Small trees, monoecious, unisexual tiny flowers in axillary clusters

See *Encyclopédie Méthodique, Botanique* 3(2): 574. 1792, *Amoen. Bot. Bonn.* 1: 58, t. 5. 1823, *Edwards's Botanical Register* 15: no. 1300. 1830, *Plantae Asiaticae Rariores* 2: 64. 1831 and *Philippine Journal of Science*, Suppl. 1 56–57. 1906, *Journal of Cytology and Genetics* 18: 56–58. 1983, *Journal of Cytology and Genetics* 22: 83–94. 1987

(Postpartum remedy.)

in China: nan ya xin mu jiang zi

Malay names: medang, teja betina

Neonauclea Merr. Rubiaceae

From the Greek *neos* 'new' and the genus *Nauclea*, see *Journal of the Washington Academy of Sciences* 5: 538. 1915.

Neonauclea calycina (Bartl. ex DC.) Merr. (*Bancalus peduncularis* (Wall. ex G. Don) Kuntze; *Bancalus peduncularis* Kuntze; *Nauclea blancoi* Vidal; *Nauclea callophylla* Blume ex Miq.; *Nauclea calycina* Bartl. ex DC.; *Nauclea imbricata* Blume ex Miq.; *Nauclea monocephala* Merr.; *Nauclea pallida* Blume ex Miq.; *Nauclea peduncularis* Wall. ex G. Don; *Nauclea purpurascens* Korth.; *Neonauclea calycina* Merr.; *Neonauclea monocephala* Merr.; *Neonauclea monocephala* (Merr.) Merr.; *Neonauclea peduncularis* Merr.; *Neonauclea peduncularis* (Wall. ex G. Don) Merr.; *Neonauclea purpurascens* S. Moore; *Neonauclea purpurascens* (Korth.) Ridl.)

Vietnam, Indonesia, Malesia. Tree

See *Prodr.* (DC.) 4: 346. 1830, *Gen. Hist.* 3: 469. 1834, *Verh. Nat. Gesch. Ned. Bezitt., Bot.*: 157. 1842, *Ann. Mus. Bot. Lugduno-Batavi* 4: 182. 1869, *Phan. Cuming. Philipp.* 175. 1885, *Revis. Gen. Pl.* 1: 276. 1891 and *Philipp. J. Sci.*, C 8: 44. 1913, *J. Wash. Acad. Sci.* 5: 539, 541. 1915

(Bark decoction bitter, febrifuge and astringent, drunk for diarrhea and dysentery. Leaves of *Glochidion arborescens* mixed with leaves of *Neonauclea calycina*, crushed with rice grains, made into a paste applied to the skin to reduce swelling in beriberi; leaves decoction astringent, febrifuge, for diarrhea and dysentery.)

in English: hat tree

in Indonesia: kayu sa'ong, tembalut bai

Neonauclea purpurea (Roxb.) Merr. (*Anthocephalus chinensis* Walp.; *Anthocephalus chinensis* (Lam.) Rich. ex Walp.; *Bancales purpureus* (Roxb.) Kuntze; *Nauclea elliptica* Dalzell & A. Gibson, nom. illeg.; *Nauclea purpurea* Roxb.)

India.

See *Pl. Coromandel* 1: 41. 1796, *Repertorium Botanices Systematicae*. (Walpers) 2: 491. 1843, *Bombay Fl.*: 118. 1861, *Revis. Gen. Pl.* 1: 276. 1891 and *Interpr. Herb. Amboin.*: 483. 1917

(Used in Ayurveda. Bark febrifuge, tonic, astringent, for dysentery, snakebite; a paste of bark or root said to decrease fertility in women, used for infertility; bark juice given to treat syphilis. Leaves decoction for gargling in stomatitis, aphthae; extract of fresh leaves or powdered leaves with water given to children against intestinal worms; a poultice from the pounded leaf applied to the chest for fevers. For malaria, smear the leaves with coconut oil, heat, and apply hot to the abdomen.)

in East Asia: kadam, kaddam, kedam, laran

in India: apathyada mara, arisina thaega, atuthekku, bale, banphar, begada, dhaaruja kaare, dieng sohalngpathi, etthakada, halipriya, hellthaega, helthige, kaada balige, kada pode, kadabolige, kadaga, kadaha, kadahada, kadahada mara, kadam, kadamb, kadamba, kadamba mara, kadambah, kadambakamu, kadambam, kadambamu, kadambaryya, kadambe, kadambole, kadambu, kadamchal, kadappai, kadava, kadaval, kadavala, kadavara, kadayaala, kaddabailu, kadimi, kadubale, kadubalige, kaduve, kadvala, kadwal, kalamb, kalampam, kalempeyan, kapam, karanapurakkiyam, karnapuraka, karnapurakam, katamba, katampa, katampacivam, katampai, katampam, katampamaram, katampu, katappai, katappaimaram, katappam, katarvayura, kathambu, katousjaka, kattuccakka, kattuchakka, kodawaala, kodeyaala, kodivaala, kokalamaram, kokali, kola aiyila, kolayilal, kucitam, kutsitangah, kuyilenamaram, laungchu-araung, mi bol, mogulu kadimi, neepamu, neeronje, neerpaala kadambamu, nhiv, nipa, niv, peddakambo, prenkhanamu, priyaka, priyakamu, rudraakshakamba, thole, vrattapuspa

in Indonesia: emajang, jabon, kelampajang, laran

in Malaya: kelampayan, kelapayan, kelempai, kelempayan, kelempoyan, kelepayan, kelumpang, kelumpang, kempoyan, kepayang kayu, laran, lempayang, lempoyan, selimpoh

in Nepal: kadam

Neonelsonia J.M. Coulter & Rose Apiaceae (Umbelliferae)

For the American naturalist Edward William Nelson, 1855–1934, explorer, in Mexico and Guatemala, plant collector, from 1890 to 1929 with the USDA, his writings include *Descriptions of new genera, species and subspecies of Birds from Panama, Colombia and Ecuador*. Washington 1912, *The Eskimo about Bering Strait*. Washington 1881, *Lower California and its natural resources*. Washington 1922 and *Wild Animals of North America*. Washington 1930. See Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950, *Botanical Museum Leaflets*—Harvard University 19(9): 191–194. 1961, *Field Mus. Nat. Hist., Bot. Ser.* 13(5A/1): 3–97. 1962, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964, [edited by H.W. Henshaw] *Report upon Natural History Collections made in Alaska between the years 1877 and 1881 by E.W. Nelson*. 1887 and John H. Barnhart, *Biographical Notes upon Botanists*. 2: 544. 1965, *Fl. Ecuador* 5: 1–71. 1976, Irving William Knobloch, compil., “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs*. VI. 1983.

Neonelsonia acuminata (Benth.) J.M. Coult. & Rose ex Drude (*Arracacia acuminata* Benth.; *Neonelsonia ovata* J.M. Coult. & Rose)

Ecuador, Colombia. Scandent, herbaceous, clambering, long woody taproot, compound umbel, obcordate greenish yellow petals, ellipsoid fruits with five fleshy ridges

See *Plantas Hartwegianas imprimis Mexicanas* 187–188. 1856, *Contributions from the United States National Herbarium* 3(5): 307, t. 9. 1895, *Die Natürlichen Pflanzenfamilien* 3(8): 167. 1898 and *Bull. Torrey Bot. Club* 76: 39–52. 1949, *Fieldiana, Bot.* 24(8/1): 21–66. 1966

(Leaves and stems decoction taken as a remedy for swelling and inflammation of intestine, a postpartum remedy.)

in English: wild arracacha

in Colombia: íngo-sha-hush

Neonotonia Lackey Fabaceae (Phaseoleae)

From the Greek *notos*, *noton* ‘the south, the south-west wind, the south wind, back’ (cf. Latin *notus* and *notos*, *i* ‘the south wind, auster, wind’; Akkadian *nadûm* ‘to pour’, *nataku* ‘to drip’; Armenian *nay*), or after Benjamin Noton, 1812–1835 botanical collector in Peninsular India, Nilgiri Hills; see *Adansonia* 2: 381–390. 1976, *Phytologia* 37: 209–212. 1977, *Economic Botany* 35(3): 272–288. 1981, *J. Econ. Taxon. Bot.* 7: 249–276. 1985, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 522. London 1994.

Neonotonia wightii (Wight & Arn.) J.A. Lackey (*Glycine albidiflora* De Wild.; *Glycine bujacia* Benth.; *Glycine bujacia* Benth.; *Glycine claessensii* De Wild.; *Glycine javanica*

auct.; *Glycine javanica* L.; *Glycine javanica* L. subsp. *javanica*; *Glycine javanica* subsp. *micrantha* (Hochst. & A. Rich.) F.J. Herm.; *Glycine javanica* subsp. *micrantha* (A. Rich.) F.J. Verdc.; *Neonotonia wightii* subsp. *pseudo-javanica* (Taub.) J.A. Lackey; *Neonotonia wightii* (Wight & Arn.) J.A. Lackey var. *coimbatorensis* (A. Sen) Karth.; *Notonia wightii* Graham ex Wight & Arn.; *Notonia wightii* Wight & Arn.; *Shuteria vestita* sensu Benth.; *Soja javanica* (L.) Graham; *Soja wightii* Graham

Tropical Africa and India. Perennial non-climbing herb, tangling, trailing, vigorous, slender and well branched, densely pubescent, strong taproot, twining, prostrate, climber, often forming dense clumps, flowers creamy-white with purple center in dense or lax pseudoracemes, dark reddish brown seeds, used as fodder or a cover crop

See *Species Plantarum*. Editio quarta 3(2): 1053. 1802, *A Numerical List of Dried Specimens* n. 5528, 5530. 1831, *Archives de Botanique* 2: 518. 1833, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 207. 1834, *Commentationes de Leguminosarum Generibus* 62. 1837, *Journal of the Linnean Society, Botany* 8: 267. 1865 [17 Feb 1865] and *Taxon* 15(1): 35. 1966, *Phytologia* 37(3): 210. 1977, *American Journal of Botany* 67: 595–602. 1980, *Iselya* 2: 11–12. 1981, *Euphytica* 40: 221–226. 1989

(Treating, preventing, or inhibiting bone or joint inflammation. Present estrogenic substances. Roots of *Neonotonia wightii* ground with the fruits of *Terminalia chebula* and the paste used in toothache.)

in English: perennial soybean, soya bean

in China: zhao wa da dou

in Southern Africa: dinawá tsá nága, olieboontjie, sooi-boontjie, soyaboontjie

in Tanzania: fundo-fundo

Neopicrorhiza D.Y. Hong Scrophulariaceae

From the Greek *neos* 'new' and *Picrorhiza* Royle ex Benth. see *Opera Botanica* 75: 56. 1984.

Neopicrorhiza scrophulariiflora (Pennell) D.Y. Hong (*Picrorhiza scrophulariiflora* Pennell)

Himalaya, Kashmir to Sikkim. Herb, thick rootstock, coriaceous serrate leaves, winged sheathing petiole, long spikes

See *Scrophularineae Indicae* 47. 1835 and *Academy of Natural Sciences of Philadelphia Monographs* 5: 65, pl. 6B. 1943, *Opera Botanica* 75: 56. 1984

(Roots antibacterial, used for fevers, heart diseases, blood poisoning, typhoid, malaria, diarrhea, jaundice, boils, scabies, ringworm, stomachache. Dried roots for treating cough, cold, stomach disorders, fever, heart diseases. Rhizomes bitter, cooling, cathartic, stomachic, appetizer, purgative, antipyretic, used in fever, asthma, dropsy, stomach trouble, to treat cold, jaundice, liver complaints, inflammation, anorexia, cholera, diarrhea, heart diseases. Chewing roots a sedative for severe coughing.)

in Bhutan: hong-len

in China: hu huang lian

in India: karwi, kutki

in Nepal: hogling, katuko, kutaki, kutki

in Sanskrit: katuka

Neorautanenia Schinz Fabaceae (Phaseoleae)

After a Finnish missionary, the Rev. Martti (Martin) Rautanen, 1845–1926, collected 1886–1891 S.W. Africa (Ovamboland); see *Kew Bulletin* 24: 235–307. 1970, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 290–291. Cape Town 1981, I.H. Vegter, *Index Herbariorum*. Part II (5), *Collectors N-R. Regnum Vegetabile* vol. 109. 1983, *Nordic J. Bot.* 8: 457–488. 1989.

Nat. Prod.* 69(3): 397–399. 2006

(Toxins, poisonous or repellent. Decoctions of the root abortifacient and also for the treatment of neuropsychiatric disorders. Tubers anti-nociceptive, cytotoxic, antitumor, sedative, antifungal, antiinflammatory, antiparasitic, larvicidal, acaricide, arachnidicide, insecticidal and mosquitocidal, used in the treatment of dysmenorrhea, stomachache, scabies, parasitic infection, venereal diseases; ashes of tuberous roots, local application for ulcers, boils, skin lesions. Fruit with irritating hairs. Fish poison.)

in Nigeria: karamin karara

in Rwanda: igitembatembe

in Tanzania: insatembwa, iwayo, mkaswende, oleisusu, paya-momo, taudazi, tuha, yombo-nguru

in Zambia: chilekeleke, mwita, tinde

Neostenanthera Exell Annonaceae

From the Greek *neos* 'new' and the genus *Stenanthera* Engl. & Diels ('narrow anthers', from the Greek *stenos* 'narrow' and *anthera*), see *Prodromus Florae Novae Hollandiae* 538. 1810 and *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 3: 53, 57. 1900, *Journal of Botany, British and Foreign* 73(Suppl. 1): 5. 1935.

Neostenanthera gabonensis (Engl. & Diels) Exell (*Neostenanthera bakuana* (A. Chev. ex Hutch.) Exell; *Neostenanthera micrantha* Exell; *Oxymitra gabonensis* Engl. & Diels; *Stenanthera bakuana* A. Chev. ex Hutch.; *Stenanthera gabonensis* (Engl. & Diels) Engl. & Diels)

Ghana, Gabon. Treelet or shrub, papery glossy leaves, white calyx lobes, fleshy fruits yellow-orange

See *Prodr.* 538. 1810, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 297. 1899 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen*, 6 Anonaceae 68. 1901, *Flora of West Tropical Africa* 1: 56. 1927, *Journal of Botany, British and Foreign* 73 Suppl.: 5–6. 1935, *Am. J. Botany* 93: 36–54. 2006

(The dried pulverised leaves used like snuff for tumour of the nose.)

Neostenanthera hamata (Benth.) Exell (*Oxymitra hamata* Benth.; *Stenanthera hamata* (Benth.) Engl. & Diels)

West Africa. Tree, flowers greenish covered with brown indumentum, fruits green covered with brown indumentum

See *Flora Indica*: being a systematic account of the plants . . . 145. 1855, *Transactions of the Linnean Society of London* 23: 471, t. 50. 1862 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen*, 6 Anonaceae 68. 1901, *Journal of Botany, British and Foreign* 73 Suppl.: 5–6. 1935

(Vermifuge.)

Neostenanthera myristicifolia (Oliv.) Exell (*Neostenanthera pluriflora* (De Wild.) Exell; *Oxymitra myristicifolia* Oliv.; *Stenanthera myristicifolia* (Oliv.) Engl. & Diels; *Stenanthera pluriflora* De Wild.)

Liberia, Ghana, Gabon. Small tree or shrub, slender, slash whitish, dark leaves glossy above glaucous below, flowers solitary in leaf axils, egg-shaped fruits yellow-orange smooth, forest, on riverbank, swamp, riverine forest

See *Prodr.* 538. 1810, *Flora Indica*: being a systematic account of the plants . . . 145. 1855, *Flora of Tropical Africa* 1: 33. 1868 and *Monographien afrikanischer Pflanzen-Familien und -Gattungen*, 6, 67. 1901, *Journal of Botany, British and Foreign* 73 Suppl.: 5–6. 1935

(The dried powdered leaves used like snuff for tumour of the nose. Roots for skin diseases.)

in Central African Republic: pota

in Nigeria: uyenghen eze (Edo)

Nepenthes L. Nepenthaceae

Greek *nepenthes*, from *ne, ni* 'not' and *penthes, penthos* 'mourning', a plant or drug that drives away sadness, see Homer, *Odyssey*. 4.221, and Theophrastus, *HP*. 9.15.1 (Loeb Classical Library 1916), Latin *nepenthes* for a plant which

mingled with wine had an exhilarating effect (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 955. 1753, *Genera Plantarum*. Ed. 5. 909. 1754, *Flora Cochinchinensis* 598, 606. 1790, A. Bonavilla, *Dizionario etimologico di tutti i vocaboli usati nelle scienze, arti e mestieri, che traggono origine dal greco*. Milano 1819–1821, *Analyse des Familles de Plantes* 14, 16. 1829 and *Beihefte zum Botanischen Centralblatt* 39(2): 162. 1923, C.T. Onions, *The Oxford Dictionary of English Etymology*. Oxford University Press 1966, Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 416. Basel 1996, *Sendtnera* 4: 169–174. 1997.

Nepenthes khasiana Hook. f.

India. Pitcher with stored juice

See *Prodr.* (DC.) 17: 102. 1873 and *Ethnobotany* 16: 52–58. 2004, *Journal of Experimental Botany* 61(3): 911–922. 2010

(The digestive juice found in the pitcher used to treat gastrointestinal disorders (Doctrine of Signatures). Antifungal naphthoquinones.)

Nepenthes mirabilis (Lour.) Druce (*Nepenthes mirabilis* (Lour.) Merr.; *Nepenthes mirabilis* Druce; *Nepenthes phyllamphora* Willd.; *Nepenthes phyllamphora* Reinw. ex Miq.; *Nepenthes phyllamphora* Hook.f. & Thomson; *Phyllamphora mirabilis* Lour.)

Indonesia, India. Climber

See *Flora Cochinchinensis* 2: 606. 1790, *Sp. Pl.*, ed. 4 [Willdenow] 2(2): 874. 1799, *Species Plantarum*. Editio quarta 4(2): 874. 1806, *Prodr.* (DC.) 17: 102. 1873 and *Botanical Exchange Club of the British Isles. Report* 4: 637. 1916, *Lingnan Science Journal* 5(1–2): 84. 1927

(Stem juice swallowed as an antidote for alcohol intoxication.)

in English: monkey cup, pitcher plant, tropical pitcher plant

in China: zhu long cao

in Japan: utsubo-kazura

Malay name: trumo

Nepenthes reinwardtiana Miq.

Malay Peninsula.

See Junghuhn, Franz Wilhelm (1809–1864), *Plantae jung-huhnianae*, enumeratio plantarum, quas, in insulis Java et Sumatra / detexit Fr. Junghuhn. Lugduni-Batavorum [Leiden, The Netherlands], Parisiis, [1853?]-1857.

(Antifungal.)

Malay name: priok kra betina

Nepeta L. Lamiaceae (Labiatae)

Nepeta, ae ‘Italian catnip, *Nepeta italica* Willd.’, Latin *nepos*, *otis* ‘a descendant, a sucker’, Hebrew *nib* ‘to produce’,

Arabic ‘*nb* ‘offspring, child’; see Carl Linnaeus, *Species Plantarum*. 2: 570–572, 578. 1753, *Genera Plantarum*. Ed. 5. 249. 1754, *Fam. Pl.* 2: 192. 1763, *Acta Lit. Univ. Hafn.* 1: 294. 1778, *Methodus* [Moench] 388. 1794, *Mém. Acad. Imp. Sci. Saint Pétersbourg*, Sér. 7, 21(1): 58. 1878, *Nat. Pflanzenfam.* 4(3a): 235. 1896, *J. Bombay Nat. Hist. Soc.* 11: 696. 1898 and *Contr. Fl. Maroc*: 31. 1918, *Fl. Reipubl. Popularis Sin.* 65(2): 587–590. 1977, *Fl. Iranica* [Rechinger] 150: 176, 191. 1982, *Lagascalìa* 11(1): 76. 1983, *Lagascalìa* 12(1): 54. 1983, *Bot. Zhurn.* (Moscow & Leningrad) 75(7): 1008, 1010, 1012. 1990, *Bot. Zhurn.* (Moscow & Leningrad) 76(11): 1605. 1992 [1991 publ. 1992], *Bot. Zhurn.* (Moscow & Leningrad) 77(1): 118. 1992, *Bot. Zhurn.* (Moscow & Leningrad) 77(6): 84. 1992, *Bot. Zhurn.* (Moscow & Leningrad) 77(10): 76, 79–80. 1992, *Bot. Zhurn.* (Moscow & Leningrad) 78(1): 98, 102, 104. 1993, Giovanni Semerano, *Le origini della cultura europea. Dizionario della lingua Latina e di voci moderne*. 2(2): 484–485. Firenze 1994.

Nepeta annua Pallas (*Glechoma annua* Kuntze; *Glechoma annua* (Pall.) Kuntze; *Glechoma benthamii* Kuntze; *Nepeta bipinnata* Cav.; *Nepeta bipinnatifida* Ledeb.; *Nepeta botryoides* Solander; *Nepeta gracilis* Salisb.; *Nepeta multifida* L.f., nom. illeg.; *Schizonepeta annua* (Pall.) Schischk.; *Schizonepeta botryoides* (Solander) Briquet; *Schizonepeta deserticola* H.C. Fu & Ninbu)

SW. Siberia, Eurasia to China.

See *Species Plantarum* 2: 570–572. 1753, *Acta Acad. Sci. Imp. Petrop.* 2: 263. 1783, *Hortus Kewensis* ed. 1 2: 287. 1789, *Das Pflanzenreich* 4(3a): 235. 1879, *Die Natürlichen Pflanzenfamilien* 4(3a): 235. 1896 and *Fl. Intramongolica* 5: 412. 1980 [1981]

(Source of an essential oil, carminative.)

in China: xiao lie ye jing jie

Nepeta azurea R. Br. ex Benth. (*Glechoma azurea* Kuntze; *Glechoma azurea* (R.Br. ex Benth.) Kuntze; *Glechoma biloba* (Hochst. ex Benth.) Kuntze; *Glechoma biloba* Kuntze; *Nepeta biloba* Hochst. ex Benth.; *Nepeta petitiiana* Baker)

NE & E. Trop. Africa.

See *Species Plantarum* 2: 570–572. 1753, *Revis. Gen. Pl.* 2: 518. 1891 and *Fl. Trop. Afr.* 5: 460. 1900

(Carminative, refrigerant.)

Nepeta cataria Linnaeus (*Calamintha albiflora* Vaniot; *Cataria tomentosa* Gilib.; *Cataria vulgaris* Gaterau; *Glechoma cataria* Kuntze; *Glechoma cataria* (L.) Kuntze; *Glechoma macrura* Kuntze; *Glechoma macrura* (Ledeb. ex Spreng.) Kuntze; *Nepeta americana* Vitman, nom. illeg.; *Nepeta bodinieri* Vaniot; *Nepeta cataria* var. *citriodora* (Dumort.) Lej.; *Nepeta citriodora* Dumort.; *Nepeta laurentii* Sennen; *Nepeta macrura* Ledeb. ex Spreng.; *Nepeta minor* Mill.; *Nepeta mollis* Salisb.; *Nepeta ruderalis* Boiss., nom. illeg.; *Nepeta tomentosa* (Gilib.) Vitman; *Nepeta vulgaris* Lam.)

Europe, China. Perennial herb with white flowers

See *Species Plantarum* 2: 570–572. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Revis. Gen. Pl.* 2: 518. 1891 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 14(183): 172–174, 181–182. 1904, *J. Korean Res. Inst. Ewha Women's Univ.* 11: 455–478. 1967, *Genetica* 50: 111–117. 1979, *Fragmenta Floristica et Geobotanica* 27: 581–590. 1981, *Revue de Cytologie et de Biologie Végétales, le Botaniste* 4: 331–339. 1981, *Lagascalia* 12: 17. 1983, *Le Naturaliste Canadien* 111: 447–449. 1984, *Hessische Floristische Briefe* 33: 46–48. 1984, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(2): 13–24. 1992, *Watsonia* 19: 169–171. 1993, *Botaničeskij Žurnal* (Moscow & Leningrad) 80(2): 87–90. 1995

(Low toxicity; stems and leaves dangerous for cats. Tea from fresh plants to cure cold and cough. Leaves decoction given in dysentery; leaves chewed to relieve toothache. Dried leaves and flowering tops used as a stimulant, tonic, carminative, diaphoretic, and for infantile colic; hot tea alleviates menstrual cramps.)

in English: catmint, catnip

in China: jing jie, jia jing jie

in India: bili-lotan, gandh-soi, gandhsoi

Nepeta ciliaris Benth. (*Glechoma ciliaris* (Benth.) Kuntze; *Glechoma ciliaris* Kuntze; *Glechoma leucophylla* (Benth.) Kuntze; *Glechoma leucophylla* Kuntze; *Nepeta leucophylla* Benth.)

India, Himalaya. Herbs, purple flowers in dense-flowered cymes

See *Plantae Asiaticae Rariores* 1: 64. 1830, *Labiatarum Genera et Species* 476. 1834, *Revisio Generum Plantarum* 2: 518. 1891

(Leaf juice applied on cuts.)

Nepeta connata Royle ex Benth. (*Glechoma connata* (Royle ex Benth.) Kuntze; *Glechoma connata* Kuntze)

India, Himalaya.

See *Botanical Miscellany* 3: 378. 1833, *Revis. Gen. Pl.* 2: 518. 1891

(Leaves chewed to treat toothache.)

Nepeta deflersiana Schweinf. ex Hedge

Saudi Arabia. Perennial herb

See *Notes Roy. Bot. Gard. Edinburgh* 40(1): 65. 1982

(Leaf decoction drunk for stomachache; mashed leaves a remedy for burns.)

in Arabic: shaya'a

Nepeta discolor Royle ex Benth. (*Glechoma discolor* Kuntze; *Glechoma discolor* (Royle ex Benth.) Kuntze; *Nepeta sabinei* J.A. Schmidt)

India, Himalaya, Tibet. Spreading perennial herb, white or purple flowers in cylindrical spikes

See *Species Plantarum* 2: 578. 1753, *Botanical Miscellany* 3: 378. 1833, *Journal of Botany, British and Foreign* 6: 228, 238, pl. 82, f. 1–4. 1868, *Revis. Gen. Pl.* 2: 518. 1891

(Plant carminative, tonic, diaphoretic, used in cold, cough and headache. Paste of fresh leaves to cure wounds and cuts. Dried leaves ground into powder and mixed with milk and honey for eye diseases; dried leaves decoction given for asthma, cold and cough. Ceremonial, used for making incense.)

in China: yi se jing jie

in India: khirku, nyomala, tianko

Nepeta floccosa Benth. (*Nepeta alii* Jehan; *Nepeta floccosa* subsp. *pseudofloccosa* (Pojark.) A.L. Budantzev; *Nepeta gilesii* Mukerjee; *Nepeta kunlunshanica* Chang Y. Yang & B. Wang; *Nepeta pseudofloccosa* Pojark.; *Nepeta vakhanica* Pojark.)

India.

See *Labiatarum Genera et Species* fasc. 7: 736. 1835 and *Journal of the Indian Botanical Society* 19: 85. 1940, *Not. Syst. Leningrad* 15: 293, 296, f. 3. 1953, *Bulletin of Botanical Research* 7(1): 97–98, f. 2. 1987, *Willdenowia* 18: 427. 1989, *Bot. Žurn.* 76: 1320. 1991

(Leaf decoction taken against malaria, fever, cold and cough.)

in China: cong juan mao jing jie

in India: shamalolo

Nepeta glutinosa Benth. (*Glechoma glutinosa* (Benth.) Kuntze; *Glechoma glutinosa* Kuntze; *Nepeta badamdarica* Lipsky)

Afghanistan, China. Branched perennial herb, clumped, violet flowers in long lax leafy spikes

See *Species Plantarum* 2: 570–572. 1753, *Labiatarum Genera et Species* fasc. 7: 735–736. 1835, *Revis. Gen. Pl.* 2: 518. 1891 and *Botaničeskij Žurnal* (Moscow & Leningrad) 77(2): 13–24. 1992

(Glandular indumentum.)

in China: xian jing jie

Nepeta hemsleyana Oliver ex Prain (*Dracocephalum hemsleyanum* (Oliver ex Prain) Prain ex C. Marquand & Airy Shaw; *Dracocephalum hemsleyanum* Prain ex C. Marquand; *Nepeta angustifolia* C.Y. Wu)

Tibet, E. Himalaya.

See *Species Plantarum* 2: 570–572, 594–596. 1753, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 59(4):

305. 1891 [1890 publ. 14 Mar 1891] and *Journal of the Linnean Society, Botany* 48(321): 218. 1929, *Flora Reipublicae Popularis Sinicae* 65(2): 296, 588 (addenda). 1977

(Used for convulsions.)

in English: Hemsley nepeta

in China: zang jing jie

Nepeta hindostana (B. Heyne ex Roth) Haines (*Glechoma calaminthodes* (Benth.) Kuntze; *Glechoma calaminthodes* Kuntze; *Glechoma erecta* Buch.-Ham. ex Roxb.; *Glechoma erecta* Kuntze; *Glechoma hindostana* B. Heyne ex Roth; *Glechoma indica* Spreng.; *Nepeta calaminthoides* Benth.; *Nepeta clinopodioides* Royle ex Benth.; *Nepeta hindostana* Haines; *Nepeta ruderalis* Buch.-Ham. ex Benth.; *Nepeta ruderalis* Boiss.; *Thymus nepetoides* D. Don)

E. Afghanistan to Himalaya and W. India. Erect pubescent herb, crenate leaves, blue-purple flowers, oblong nutlets brown with white spots

See *Species Plantarum* 2: 570–572. 1753, *Hort. Bengal.* 44. 1814, *Prodr. Fl. Nepal.* 113. 1825, *Bot. Misc.* 3: 379. 1833, *Fl. Orient.* [Boissier] 4(2): 643. 1879, *Revis. Gen. Pl.* 2: 518. 1891 and *Bot. Bihar & Orissa* 4: 744. 1922, *Taxon* 31: 593–595. 1982

(Used in Unani. Plant used as a cardiac tonic, also given in fever and gonorrhoea. Roots in body ache. Leaves in bleeding, secretion, diarrhoea and dysentery. Leaves and flowering top carminative, tonic, antispasmodic, astringent, stimulant, for toothache, diarrhoea and dysentery; leaves chewed for mouth ulcers.)

in English: Indian catmint

in India: arq badranj boya, badran boya, badranj boya, badranjboya, bililotan, billilotan, fulwari, khushk badranj boya

Nepeta juncea Benth. (*Glechoma juncea* (Benth.) Kuntze; *Nepeta juncea* Hedge & Lamond)

Afghanistan to Pakistan.

See *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 379. 1848 and *Notes from the Royal Botanic Garden, Edinburgh* 28: 116. 1968

(Stems and leaves decoction to relieve acute cough and bronchitis.)

in Pakistan: shimshok, simsok

Nepeta laevigata (D. Don) Handel-Mazzetti (*Betonica laevigata* D. Don; *Glechoma laevigata* (D. Don) Kuntze; *Glechoma laevigata* Kuntze; *Nepeta elata* Royle ex Benth.; *Nepeta nuristanica* Murata; *Nepeta spicata* Benth., nom. nud.; *Nepeta spicata* var. *incana* H. Léveillé)

Afghanistan, Himalaya, China.

See *Species Plantarum* 2: 570–573. 1753, *Prodromus Florae Nepalensis* 110. 1825, *A Numerical List of Dried Specimens*

n. 2083. 1829, *Hooker's J. Bot. Kew Gard. Misc.* 3: 378. 1833 [*Botanical Miscellany. London*], *Revis. Gen. Pl.* 2: 518. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(211–213): 245. 1911, *Symbolae Sinicae* 7(4): 916–917. 1936, *Acta Phytotax. Geobot.* 17: 74. 1958

(Seeds infusion taken for dysentery. Plant diaphoretic.)

in English: smooth nepeta

in China: sui hua jing jie

in India: tukhmmalanga

Nepeta longibracteata Benth. (*Glechoma longibracteata* (Benth.) Kuntze; *Glechoma longibracteata* Kuntze)

Afghanistan, China. Annual or perennial herb, prostrate, highly aromatic, blue flowers in dense clusters

See *Labiatae. Gen. Spec.*: 737. 1835, *Revis. Gen. Pl.* 2: 518. 1891

(Whole plant extract taken against inflammation of stomach and liver. Leaves used in worship.)

in India: behungu, ongmongo, prianku, shangukaram

Nepeta multifida Linnaeus (*Glechoma multifida* (L.) Kuntze; *Glechoma multifida* Kuntze; *Lophanthus multifidus* (L.) Benth.; *Lophanthus multifidus* Benth.; *Nepeta lavandulacea* Linnaeus f.; *Nepeta lavandulifolia* J.F. Gmel., orth. var.; *Nepeta lobata* Rudolph; *Saussuria pinnatifida* Moench; *Schizonepeta multifida* (L.) Briq.; *Schizonepeta multifida* var. *longistyla* J.X. Huang, T.J. Feng & J.Z. Wang; *Vleckia multiflora* Raf.)

Siberia to China.

See *Species Plantarum* 2: 570–572. 1753, *Supplementum Plantarum* 272. 1782, *Edwards's Bot. Reg.* 15: sub t. 1282. 1829, *Revis. Gen. Pl.* 2: 518. 1891 and *J. Hebei Agric. Univ.* 17(4): 17. 1994

(Diaphoretic, tonic.)

in China: duo lie ye jing jie

Nepeta nuda Linnaeus (*Cataria nuda* (L.) Moench; *Cataria nuda* Moench; *Glechoma nuda* (L.) Kuntze; *Glechoma nuda* Kuntze; *Nepeta pannonica* Linnaeus)

Europe, China. Honey plant

See *Species Plantarum* 2: 570–572. 1753, *Methodus* (Moench) 388. 1794, *Revis. Gen. Pl.* 2: 518. 1891 and *Taxon* 30: 829–842. 1981, *Willdenowia* 13: 335–336. 1983, *Flora Mediterranea* 1: 157–173. 1991, *Botaničeskij Žurnal* (Moscow & Leningrad) 77(2): 13–24. 1992

(Stimulant, carminative.)

in China: zhi chi jing jie

Nepeta podostachys Benth. (*Glechoma podostachys* (Benth.) Kuntze; *Glechoma podostachys* Kuntze)

Himalaya, India. Slender perennial herb, many spreading stems, white flowers in terminal cylindrical spikes

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 12: 372. 1848, *Revisio Generum Plantarum* 2: 518. 1891 and *Flora URSS* 20: 312. 1954

(Useful in kidney diseases, dyspepsia and stomach-ache. Veterinary medicine, a paste from the plant used as anthelmintic.)

in India: shagukaram, shangu karom, shangukaram, shangukuram

Nepeta raphanorhiza Benth. (*Glechoma raphanorhiza* (Benth.) Kuntze; *Glechoma raphanorhiza* Kuntze)

Afghanistan to Tibet. Plants perennial, with succulent walnut-sized tubers, easily recognized by the prominent tubers if they are present

See *Species Plantarum* 2: 570–572. 1753, *Labiata. Gen. Spec.* fasc. 7: 734. 1835, *Revis. Gen. Pl.* 2: 518. 1891 and *Revue de Cytologie et de Biologie Végétales, le Botaniste* 7: 5–16. 1984, *Chromosome Information Service* 39: 33–35. 1985

(In toothache.)

in China: kuai gen jing jie

Nepeta sibirica L. (*Dracocephalum sibiricum* (L.) L.; *Glechoma sibirica* (L.) Kuntze; *Glechoma sibirica* Kuntze; *Moldavica elata* Moench; *Moldavica sibirica* (L.) Moench ex Steudel; *Moldavica sibirica* Moench ex Steud.; *Moldavica sibirica* Steud.; *Nepeta macrantha* Fischer)

Siberia to N. China.

See *Species Plantarum* 2: 570–572, 594–596. 1753, *Systema Naturae*, Editio Decima 1104. 1759, *Enumeratio Methodica Plantarum* 55. 1759, *Methodus Plantas Horti Botanici* ... 410. 1794, *Catalogue du jardin des plantes, ... à Gorenki* ... ed. 2 22. Moskva, 1812, *Nomencl. Bot.* [Steudel] 285, in syn. 1821, *Revis. Gen. Pl.* 2: 518. 1891 and *Botaničeskij Žurnal* (Moscow & Leningrad) 77(2): 113–114. 1992

(For skin diseases, carminative.)

in English: Siberian nepeta

in China: da hua jing jie

Nepeta tenuifolia Benth. (*Elsholtzia integrifolia* Benth.; *Glechoma japonica* (Maxim.) Kuntze; *Glechoma japonica* Kuntze; *Glechoma tenuifolia* (Benth.) Kuntze; *Glechoma tenuifolia* Kuntze; *Nepeta japonica* Maxim.; *Nepeta vaniotiana* H. Léveillé; *Schizonepeta tenuifolia* Briq.; *Schizonepeta tenuifolia* (Benth.) Briq.; *Schizonepeta tenuifolia* var. *japonica* (Maxim.) Kitag.)

China to Japan. Herb

See *Species Plantarum* 2: 570–572. 1753, *Botanisches Magazin (Römer & Usteri)* 4(11): 3. 1790, *Labiatarum Genera et Species* fasc. 5: 468. 1834, *Labiatarum Genera*

et Species 714. 1836, *Revis. Gen. Pl.* 2: 518–519. 1891, *Nat. Pflanzenfam.* [Engler & Prantl] iv. III A. 235. 1896 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(208–210): 220. 1911, *Notes R.B.E.* 6(28): 151. 1915

(Used for diaphoresis.)

in China: lie ye jing jie

Nephelium L. Sapindaceae

Greek *nephele* 'a cloud'; Pseudo Apuleius Barbarus in his *Herbarium* applied Latin *nephelion* to a plant called also *personata* (Latin *personata*, *ae*, is a kind of large burdock (Plinius), said to be synonymous with *persolata* or *persollata*, the brown mullein); see Carl Linnaeus, *Systema Naturae*. Ed. 12. 2: 623. 1767 and *Mantissa Plantarum*. 18, 125. 1767.

Nephelium cuspidatum Blume

Borneo.

See *Rumphia* 3: 110. 1849

(Crushed bark decoction for diseases of the tongue, mouth, and toothache.)

in Indonesia: buah abung

Nephelium lappaceum L. (*Nephelium chryseum* Blume; *Nephelium glabrum* Cambess.; *Nephelium lappaceum* Poir.; *Nephelium sufferrugineum* Radlk.)

Southern China, Sumatra. Tree, inflorescences pseudoterminal to terminal, sweet-tasting fruits, in humid tropical lowlands, dry land to swamp, primary and secondary forest

See *Systema Naturae*, ed. 12 2: 623. 1767, *Mantissa Plantarum* 1: 125. 1767, *Mant. Pl. Altera* 566. 1771 and *Blumea* 31: 398. 1986

(Cases of poisoning are known, the fruit wall contains a toxic saponin. Astringent, febrifuge, stomachic and anthelmintic. Bark decoction for diseases of the tongue. For headache pound the leaves and use as a poultice upon the head; leaf sap a remedy for coughs and vomiting. Fish poison.)

in English: rambootan, rambutan

in Cambodia: saaw maaw, ser mon

in China: shao tzu, shao zi

in Indonesia: bulung uso, rambut, rambutan

in Malaysia: rambutan, rambutan jantan

in Philippines: rambutan, usan

in Thailand: ngoh, phruan

in Vietnam: chôm chôm, vai thiêu

Nephelium mutabile Blume (*Euphoria longana* Lam.; *Nephelium longana* Cambess.)

Malaysia.

See *Encyclopédie Méthodique, Botanique* 3(1): 574. 1792, *Mémoires du Muséum d'Histoire Naturelle* 18: 30. 1829, *Rumphia* 3: 104–105. 1847

(Root vermifuge; leaves febrifuge.)

Malay name: pulasan

Nephrodium Marthe ex Michaux Dryopteridaceae (Aspleniaceae)

Greek *nephrodes* 'kidney-like', referring to the indusium; see André Michaux (1746–1803), *Flora Boreali-Americana*. 2: 266. Paris 1803.

Nephrodium heterocarpum (Blume) T. Moore (*Aspidium heterocarpum* Blume; *Cyclosorus heterocarpus* (Blume) Ching; *Dryopteris heterocarpa* (Blume) Kuntze; *Sphaerostephanos heterocarpus* (Blume) Holttum; *Thelypteris heterocarpa* (Blume) C.V. Morton)

SE Asia, Malaysia.

See *Revisio Generum Plantarum* 2: 813. 1891 and *Bulletin of the Fan Memorial Institute of Biology* 8(4): 180–181. 1938, *Index Filicum* 93. 1958, *American Fern Journal* 49(3): 113. 1959

(Discoloration of the skin, rub the leaves upon the skin.)

Malay name: paku

Nephrolepis Schott Davalliaceae (Nephrolepidaceae, Oleandraceae)

Greek *nephros* 'kidney' and *lepis* 'scale', referring to the shape of the indusia, see *Tentamen Pteridographiae* 136–137. 1836, *Mémoires sur les Familles des Fougères* 5: 301. 1852, *Hist. Filicum* 226. 1875 and *Polypod. Philipp.* 55. 1905, *Philippine Journal of Science* 3(1): 33. 1908, *Webbia* 29(1): 8–11. 1974, *Fern Gaz.* 11(2–3): 141–162. 1975, *J. Cytol. Genet.* 29(2): 187–191. 1994.

Nephrolepis biserrata (Sw.) (Used in Ayurveda. All parts of the plant exude an acrid milky irritant sap when injured or cut; the milky juice causes contact dermatitis, skin rash, blisters. Poisonous, all parts of the plant extremely toxic, human beings and animals are equally susceptible; irritant twig introduced in vagina for abortion; toxic, poisonous if the leaves or stems are ingested, ingesting a single leaf may be toxic to a person, also if dry the

leaves remain toxic; roots if given to horses are said to kill them. Smoke from burning twigs is said to be toxic; humans have died after eating meat that was skewered with oleander stems. Oleandrin, a cardiac glycoside, found throughout the plant, including the nectar of the flowers. Leaves and latex for dysentery and skin infections. Leaves and bark used externally in eczemas; leaf in the treatment of scabies; ground ash of burned leaves applied directly to the injury to facilitate healing of skin wounds, open sores. Cytotoxic effects of leaf, stem and root extracts of *Nerium oleander* on leukemia cell lines. Molluscicidal and larvicidal activity of *Nerium indicum*. Antitumor and immune-stimulating effects, neuro-protective. Powdered root bark fish poison; roots pesticide, insecticide. Ceremonial, used in religion and magico-religious beliefs, ingredient of Patra pooja in different religious pooja ceremonies, in Ganesh-pooja; flowers used for religious worships.)

Nervilia Comm. ex Gaudich. Orchidaceae

Latin *nervus*, *i* 'nerve', referring to the veined leaves or to the pseudobulbs; see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 1: 317. 1809, *Voyage autour du Monde...sur les corvettes...l'Uranie et la Physicienne...* par M. Louis de Freycinet, *Botanique...* 421,

pl. 35. 1829, *Genera Plantarum* 219. 1837, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842--1844* 89. 1846 and *J. Bombay Nat. Hist. Soc.* 38: 791–799. 1936, Richard Evans Schultes and Arthur Stanley Pease, *Generic Names of Orchids. Their Origin and Meaning.* 210. Academic Press, New York and London 1963, *Orchid Monogr.* 5: 1–89. 1991, Hubert Mayr, *Orchid Names and Their Meanings.* 162. Vaduz 1998.

Nervilia aragoana Gaudich. (*Aplostellis flabelliformis* (Lindl.) Ridl.; *Epipactis carinata* Roxb.; *Nervilia carinata* (Roxb.) Schltr.; *Nervilia flabelliformis* (Lindl.) Tang & F.T. Wang; *Nervilia scottii* (Rchb.f.) Schltr.; *Nervilia tibetensis* Rolfe; *Nervilia yaeyamensis* Hayata; *Pogonia carinata* (Roxb.) Lindl.; *Pogonia flabelliformis* Lindl.; *Pogonia gracilis* Blume; *Pogonia nervilia* Blume; *Pogonia scottii* Rchb.f.) (*Aplostellis* Thouars, from the Greek *haplos*, *haploos* ‘simple, single’ and *stello* ‘to bring together, to bind, to set’.) (*Pogonia* A.L. Juss., from the Greek *pogonias* ‘bearded’, Latin *pogonias* ‘bearded, a kind of comet’, an allusion to the fringed lip; see A.L. de Jussieu, *Genera Plantarum.* 65. (Aug.) 1789.)

Trop. & Subtrop. Asia to Pacific. Terrestrial, small tuberous herbs, solitary leaves, greenish pale yellow flowers in terminal racemes, 3-lobed capsules

See *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'~Uranie~ et la ~Physicienne~ ... Botanique* 422, pl. 35. 1826, *Gen. Sp. Orchid. Pl.*: 414–415. 1840 and *Bot. Jahrb. Syst.* 45: 404. 1911, *Fl. Malay Penins.* 4: 203. 1924, *Acta Phytotax. Sin.* 1: 68. 1951

(Tubers used for cooling; root tuber mixed with milk used for improving body vigour. Leaves decoction as a postpartum remedy, women boil the leaves and drink the liquid after childbirth as a precaution against attending sickness.)

in India: orila thamarai

in Japan: Yaeyama-kuma-sô, aoi-bokuro

Malay name: daun sa-helai sa-tahum

Nervilia crociformis (Zoll. & Moritzi) Seidenf. (*Bolborchis crociformis* Zoll. & Moritzi; *Coelogyne javanica* Lindl.; *Nervilia afzelii* var. *grandiflora* Summerh.; *Nervilia bathiei* Senghas; *Nervilia bollei* (Rchb. f.) Schltr.; *Nervilia crispata* (Blume) Schltr. ex K. Schum. & Lauterb.; *Nervilia crispata* (Blume) Schltr. ex Kraenzl.; *Nervilia erosa* P.J. (Tubers cooling. Leaves crushed and made into a paste used to cure skin diseases; leaves juice applied externally on burns and itches.)

in China: mao ye yu lan

in India: oarilai thamarai, phurtakhlo

Nesaea Comm. ex Kunth Lythraceae

According to Greek mythology, Nesaea or Nesaie was a name given to a sea nymph, one of the Nereids; Greek *nesos* 'an island'; *Nesaea triflora* (L.f.) Kunth was found on the island of Mauritius, see *Gen. Pl.* [Jussieu] 332. 1789, *Nov. Gen. Sp.* [H.B.K.] 6: 151 (ed. f.). 1823, *Nov. Gen. Sp.* [H.B.K.] 6: 191 (ed. qu.). 1824 and *Bol. Soc. Brot. sér. 2*, 48: 124. 1975 [1974 publ. 1975].

Nesaea sagittifolia Koehne

South Africa.

See *Bot. Jahrb. Syst.* 3(3): 339. 1882 and *Bothalia* 21(1): 48. 1991

(Leaves and whole plant for hematuria and blackwater fever.)

Nesogordonia Baillon Sterculiaceae (Malvaceae)

Presumably from the Greek *nesos* 'an island' and the genus *Gordonia*, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 555. 1886, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 234. 1897 and *Revue des Maladies Respiratoires* 5: 71–73. 1988.

Nesogordonia kabingaensis (K. Schum.) Capuron ex R. Germ. (*Cistanthera fouassieri* A. Chev.; *Cistanthera kabingaensis* K. Schum.; *Cistanthera leplaei* Vermeosen; *Cistanthera papaverifera* A. Chev.; *Nesogordonia fouassieri* (A. Chev.) Capuron ex N. Hallé; *Nesogordonia kabingaensis* (K. Schum.) Capuron; *Nesogordonia leplaei* (Vermeosen) Capuron ex R. Germ.; *Nesogordonia papaverifera* (A. Chev.) Capuron ex Keay)

Sierra Leone Congo, Uganda. Tree, evergreen or shortly deciduous, inflorescence an axillary compact cyme, winged seeds

See *Die Natürlichen Pflanzenfamilien* 1: 234. 1897 and *Notul. Syst.* (Paris) 14: 259, 1953, *Flore du Congo Belge et du Ruanda-Urundi* 10: 225. 1963

(Leaf decoction used to relieve dental caries.)

in Tanzania: kamema

in Zaire: amambaka

Neuracanthus Nees Acanthaceae

From the Greek *neuron* 'nerve, tendon' and *akantha* 'thorn', see *Plantae Asiaticae Rariores* 3: 76, 97. 1832.

Neuracanthus trinervius Wight (*Neuracanthus tetragonostachyus* Nees subsp. *trinervius* (Wight) Bidgood)

India. Blue flowers

See *Plantae Asiaticae Rariores* 3: 97. 1832, *Icones Plantarum Indiae Orientalis* 4(4): 5, t. 1532. 1850 and *Kew Bulletin* 53(1): 16. 1998

(Dried plants burnt and the ash, mixed with coconut oil, applied on skin diseases.)

in India: nasula

Neuractis Cass. Asteraceae

From the Greek *neuron* 'nerve' and *aktis, aktin* 'a ray', referring to the flowers.

Neuractis bidens (Retz.) Veldkamp (*Bidens denudata* Turcz.; *Bidens tenuifolia* Labill.; *Bidens tenuifolia* Tausch; *Coreopsis tannensis* Spreng.; *Coreopsis tannensis* Biehler; *Glossogyne bidens* (Retz.) Alston; *Glossogyne bidentidea* F. Muell.; *Glossogyne pedunculosa* DC.; *Glossogyne pinnatifida* DC.; *Glossogyne pinnatifida* DC. ex Wight; *Glossogyne tannensis* (Spreng.) Garnock-Jones; *Glossogyne tenuifolia* (Labill.) Cass. ex Less.; *Glossogyne tenuifolia* (Labill.) Less.; *Glossogyne tenuifolia* Cass., nom. inval.; *Neuractis bidens* (Retz.) Veldkamp ex Mesfin; *Zinnia bidens* Retz.) (*Glossogyne* Cass., from the Greek *glossa* 'a tongue' and *gyne* 'female', referring to the style branches or to the pistillate florets; see Alexandre Henri Gabriel Comte de Cassini, in *Dictionnaire des Sciences Naturelles*. 51: 475. 1827 and 59: 320. 1829.)

India. Slender annual herb, thick stout fusiform roots, leaves mostly radical, terminal heads on peduncle, disc florets purple, black achenes

See *Observationes Botanicae* 5: 28. 1788, *Plantarum Novarum ex Herbario Sprengelii Centuriam*. 39. 1807, *Dictionnaire des Sciences Naturelles* [Second edition] [F. Cuvier] 51: 475. 1827, *Syn. Gen. Compos.* 212. 1832, *Flora* 19(2): 395. 1836, *Prodr.* (DC.) 5: 632. 1836, *Bull. Soc. Imp. Naturalistes Moscou* xxiv. (1851) I. 183. 1851, *Linnaea* 25: 402. 1853 and *Hand-Book Fl. Ceylon* vi. Suppl., 168. 1931, *Taxon* 35(1): 125. 1986, *Kew Bulletin* 45(1): 141–145. 1990, *Blumea* 35(2): 468. 1991

(Whole plant crushed and applied to aching teeth for relief; extract of whole plant taken to expel intestinal worms and for dysentery; juice given in vomiting and headache; aerial parts decoction useful in curing impotency. Root paste mixed with leaves paste of *Butea monosperma* given in chronic blood dysentery, diarrhea; root pounded with the root of *Peucedanum dhana* applied to cure rheumatic joint pain.

Preparations from the roots employed in snakebite and scorpion sting; paste root for abdominal pain; roots powdered and used in toothache.)

in India: bajardati, bandhani, bazardanti, buthitejraj, jalvarkur, jangli dhanya, kamraj, mainthori, nakdana, pardesi bhangro, pirigazra, vishay

Neurada L. Neuradaceae

Possibly from the Greek *neuron* 'nerve, sinew, tendon, string' and *aden* 'gland', referring to the leaves or to the mucilage-ducts in pith; Latin *neuras*, *nevrás*, *neuradis* 'the plant *manicon*, which excites the nerves'; *neuras*, *neurados* was a Greek plant name used by Dioscorides and Plinius for *potirion* or *poterion*, goat's thorn, a species of *Astragalus*; see *Species Plantarum* 1: 441. 1753.

Neurada procumbens L.

India.

See *Acta Phytotax. Geobot.* 48: 69–71. 1997

(Whole plant used as tonic.)

in India: chapari

in Sahara: sâdan

Neurolaena R. Br. Asteraceae

Greek *neuron* 'nerve' and *chlaena*, *laina* 'cloak, blanket, coat', see *Transactions of the Linnean Society of London* 12: 120. 1817 and *Fl. Venez. Guayana* 3: 177–393. 1997.

Neurolaena lobata (L.) Cass. (*Calea lobata* (L.) Sw.; *Calea suriani* Cass.; *Conyza lobata* L.; *Conyza symphytifolia* Mill.; *Critonia chrysocephala* (Klatt) R.M. King & H. Rob.; *Eupatorium chrysocephalum* Klatt; *Eupatorium valverdeanum* Klatt; *Neurolaena fulva* B.L. Turner; *Neurolaena integrifolia* Klatt; *Neurolaena integrifolia* Cass.; *Neurolaena lobata* R. Br.; *Neurolaena lobata* var. *indivisa* Donn. Sm.; *Neurolaena suriani* (Cass.) Cass.; *Pluchea symphytifolia* (Mill.) Gillis)

South America. Herb, aromatic leaves

See *Species Plantarum* 2: 862. 1753, *Nova Genera et Species Plantarum seu Prodromus* 113. 1788, *Dictionnaire des Sciences Naturelles* [Second edition] 34: 501–502. 1825 and *Fieldiana, Bot.* 24(12): 181–361, 503–570. 1976, *Taxon* 38: 659–662. 1989, *Amer. J. Bot.* 81(6): 770–775. 1994

(Leaves and young shoots used as a tea for stomachache, diabetes, colds, fevers, asthma, rheumatism, malaria, intestinal parasites, gastric ulcer; as a poultice for strains and dislocations. Bark decoction to wash cuts and sores.)

in English: jumbie tobacco

in Central America: arnica, capitana, cola de faisán, conragavilana, cure-for-all, gavilana, hierba amarga, inaciabi,

konali, kuák ku, kunami, kunani, mano de lagarto, quina, rabo de faisán, tabaco cimarrón, tabak zonbi, tres puntas, white kunani, zòwèy mouton

Newbouldia Seemann ex Bureau Bignoniaceae

After the British botanist Rev. William Williamson Newbould, 1819–1886 (Kew, Surrey), Curate at Bluntisham, Hunts and Comberton, Cambr., a close friend of Rev. Churchill Babington (1821–1889) and H.C. Watson, a member of Ray Society, 1863 a Fellow of the Linnean Society. See *Flore d'Oware* 1: 46–47. 1805, James Sowerby (1757–1822), *English Botany ... Supplement ...* The descriptions, synonyms, and places of growth by ... W.W. Newbould. Vol. V. London 1863, *Journal of Botany, British and Foreign* 1: 225. 1863, Bureau, Edouard, *Monographie des Bignoniacées*. Paris, 1864 and H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 217. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 2: 548. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 285. 1972.

Newbouldia laevis (P. Beauv.) Seemann ex Bureau (*Bignonia glandulosa* Schumach. & Thonn.; *Newbouldia laevis* (P. Beauv.) Seem.; *Newbouldia laevis* Seem.; *Newbouldia pentandra* (Hook.) Seem.; *Newbouldia pentandra* Seem.; *Spathodea adenantha* G. Don; *Spathodea jenischii* Sond.; *Spathodea laevis* P. Beauv.; *Spathodea pentandra* Hook.; *Spathodea speciosa* Brongn.)

Tropical Africa. Treelet or shrub, fissured trunk, soft wood, leaves stiff compound dark green, leaflets with purple nectariferous glands, corolla lilac-violet, flowers in terminal racemes, elongate fruits dark purple-brown, seeds with papery wings, on forest edge

See *Flore d'Oware* 1: 46–48, t. 29. 1805, *J. Bot.* 1: 226. 1863, *Monogr. Bignon. Atlas* 17: 49. 1864, *J. Bot.* 8: 210, 337–338. 1870 and *Journal of Ethnopharmacology* 21: 109–125. 1987

(Leaves, stem and fruits febrifuge, wound dressing, stomachic. Dried bark and young twigs pounded with spice and given in infusion for stomachache and dysmenorrhea. Bark and root bark decoction used for malaria.)

in English: smooth Newbouldia

in Congo: mmeni, moumeni, mumeni, ondjomono, ondzomigui, udjuomo, udjomongo

in Gambia: gam, kunjunburung, ngam, sukunde

in Guinea: dantili kofon, kidin kanya, krindi, sukunde, sukundè

in Ivory Coast, Burkina Faso: bama, batié, bolou, gba boui, siddo, tonzué, zotou

in Nigeria: aduruku, akoka, akoko, bareshi, ikhimi, ogirici, ogirishi, oji-karisi, okurimi, oririsi; aduruku (Hausa); kontor

(Tiv); akoko (Yoruba); ikhimi (Edo); ogirisi (Igbo); obot (Efik)

in Senegal: egompa

in Sierra Leone: an jol, keslolo, pomamagbeh, pumamagbei, snof lif

in Togo: avianti, kpatima, kpotimayi

in West Africa: an jol, pumamagbei, snof lif

in Yoruba: akoko

Newtonia Baillon Fabaceae (Leguminosae, Mimosaceae, Mimoseae)

According to Stafleu and Cowan (see their *Taxonomic Literature*. 3: 738. 1981) the name of the genus honors the great English (b. Woolsthorpe) mathematician and scientist Sir Isaac Newton, 1642–1727 (d. London), among his writings are *Philosophiae Naturalis Principia Mathematica*. London 1687 and *Observations upon the profecies of Daniel*, and the apocalypse of St. John. [Edited by Benjamin Smith, Newton's half brother, first edn.] London 1733, pupil of Isaac Barrow (1630–1677) the first Lucasian professor of mathematics at Cambridge; see *Bulletin Mensuel de la Société Linnéenne de Paris* 1(91): 721. 1888, Engl. & Prantl. *Naturl. Pflanzenfam.* iii. 3 (1894) 385. 1894 and Benjamin Daydon Jackson (1846–1927), “A list of the contributors to the herbarium of the Royal Botanic Gardens, Kew, brought down to 31st December 1899.” *Bull. misc. Inf. Kew.* 169–171. 1901, G.J. Gray, *A Bibliography of the Works of Sir Isaac Newton*. [Reprint of the 2nd edition.] London 1966, *Fl. Illustr. Catar.*, 1 (Leguminosae: Mimosoideas): 285. 1979, Charles Coulston Gillispie, editor, *Dictionary of Scientific Biography*. 10: 42–103. 1981, *Bulletin du Jardin Botanique National de Belgique* 60(1–2): 119–138. 1990. Related to *Fillaeopsis* and *Lemurodendron*.

Newtonia aubrevillei (Pellegr.) Keay (*Piptadenia aubrevillei* Pellegr.)

Sierra Leone to Ghana. Perennial non-climbing tree

See *Bulletin de la Société Botanique de France* 80: 466. 1933, *Kew Bulletin* 8(4): 488. 1953[1954]

(Bark used as an aphrodisiac.)

Newtonia buchananii (Baker f.) Gilbert & Boutique (*Piptadenia buchananii* Baker f.)

East Africa. Perennial non-climbing tree, large, spreading, flat-topped and layered, smooth bark, branchlets rusty, feathery compound leaves, inflorescence an axillary or terminal spike-like false raceme, erect yellow-creamy spikes of fragrant flowers, flattened linear straight brown pods dehiscent at one side, reddish winged seeds hanging from open pods by funicles, leaves as fodder for livestock, pods as forage

See *Bulletin of Miscellaneous Information Kew* 1894: 354. 1894 and *Flore du Congo Belge et du Ruanda-Urundi* 3: 213. 1952

(Roots decoction to remove intestinal worms. Powdered bark decoction applied to abscesses; bark used as an aphrodisiac.)

in English: East African newtonia, forest newtonia, newtonia

in East Africa: mkufi, mpewere, mukui

in Malawi: mkweranyani, mkweronyowi

in Mozambique: mufunuti

in Rwanda: umukereko

in Southern Africa: muFumiti, muFumoti, muJairaiya, mupfumboti

in Tanzania: mafamuti, mkufi, mnyasa, mnyassa, mshashita, muenze, mufumoti

Newtonia elliotii (Harms) Keay (*Piptadenia elliotii* Harms)

Sierra Leone. Perennial non-climbing tree, small tree

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 260. 1899 and *Kew Bulletin* 8(4): 488. 1953[1954]

(Seeds used as a laxative.)

Newtonia erlangeri (Harms) Brenan (*Piptadenia erlangeri* Harms)

Somalia, Kenya and northern Tanzania. Perennial non-climbing tree, yellow-cream flowers, winged seeds, foliage forage for livestock

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 151. 1902, *Kew Bulletin* 10(2): 180. 1955

(Bark decoction taken for treatment of tympanites.)

in Somalia: dhay-dhay, dhey-dhey

in Tanzania: mikame

Newtonia hildebrandtii (Vatke) Torre (*Newtonia hildebrandtii* (Vatke) Brenan, nom. illeg., non *Newtonia hildebrandtii* (Vatke) Torre; *Piptadenia hildebrandtii* Vatke) (the specific name honors a German traveller and collector in East Africa, Johann Maria Hildebrandt, 1847–1881)

South Africa, Tanzania, Zambia, Zimbabwe. Perennial non-climbing tree, rounded widely spreading crown, creamy white spikes in clusters on flowering twigs, flat wine-red pods, flat pinkish-brown winged seeds

See *Oesterreichische Botanische Zeitschrift* 30: 273. 1880, *Bulletin Mensuel de la Société Linnéenne de Paris* 1(91): 721. 1888 and *Kew Bulletin* 10(2): 181. 1955, *Fitoterapia* 72(4): 415–417. 2001

(Root decoction used as an anthelmintic. Bark extracts antimicrobial, antifungal. Magic.)

in English: Lebombo wattle, lowveld newtonia

in Gabon: ensale

in Southern Africa: Lebombowattel, uDongolokamadilika, umFomothi

Nicandra Adans. Solanaceae

After the Greek botanist Nikander of Colophon (Nikandros Kolophonios) (c. 100–150 A.D.), physician, poet, medical writer, author of *Alexipharmaca*. Halae [Halle an der Saale] 1792 and *Theriaca* [and other works]. Venetiis 1522; see Ernst H.F. Meyer (1791–1858), *Geschichte der Botanik*. I: 244–250. Königsberg 1854–1857.

Nicandra physalodes (L.) Gaertner (*Atropa physalodes* L.; *Boberella nicandra* E.H.L. Krause; *Nicandra minor* Hort. ex Fisch.; *Nicandra physalodes* Scop., nom. inval.; *Physalis daturaefolia* Lam.; *Physalodes peruviana* Kuntze)

Central America, Peru. Annual herb, erect or low spreading, heavily ribbed, smooth, succulent, stem yellow-green, leaves alternate with irregularly deeply toothed margins, flowers pale blue with white centre borne singly in axils of upper leaves, corolla funnel-shaped, calyx winged and inflated, yellow berry almost spherical, pitted seeds, damaged fruit with smell of cooking oil, seed edible, tender leaves cooked and used as a vegetable, weed, in wasteland, croplands, gardens

See *Species Plantarum* 1: 181–184. 1753, *Familles des Plantes* 2: 219. 1763, *Syst. Nat.*, ed. 12. 2: 171. 15–31 Oct 1767, *Introd. Hist. (Ceremonial plant.)

in English: tobacco

Nicotiana velutina Wheeler

Australia.

See *University of California Publications in Botany* 18: 55. 1935

(Narcotic.)

in English: velvet tobacco

Nigella L. Ranunculaceae

The classic Latin name for the plant, *nigella*, *ae* (in Theodorus Priscianus), *nigellus*, *a*, *um* 'somewhat black, dark', the diminutive of the Latin *niger*, *nigra*, *nigrum* 'black', referring to the colour of the seeds; see Carl Linnaeus, *Species Plantarum*. 1: 534. 1753 and *Genera Plantarum*. Ed. 5. 238. 1754, *Theoria Systematis Plantarum* 76. 1858 and *Fliediana*, *Bot.* 24(4): 243–256. 1946.

Nigella damascena L. (*Nigella coerulea* Lam; *Nigella damascena* var. *africana* Brandt; *Nigella damascena* var. *minor* Boiss.; *Nigella damascena* var. *oligogyne* Caball.; *Nigella pygmaea* Persoon)

Turkey, Crete. Herb, simple or branched, flowers terminal solitary, dissected involucre leaves, fruit a subglobose inflated capsule, hornlike persistent styles, seed black rugose, deep yellow essential oil

See *Species Plantarum* 1: 534. 1753 and *Inform. Bot. Ital.* 10: 421–465. 1978, *Journal of Japanese Botany* 54: 65–77. 1979, *Informatore Botanico Italiano* 12: 173–180. 1980, *Taxon* 29: 538–542. 1980, Mitchell, R.S. and J.K. Dean. "Ranunculaceae (Crowfoot Family) of New York State." *Bull. New York State Mus. Sci. Serv.* 446. 1982, *Cell and Chromosome Research* 6: 21–24. 1983, Zohary, M. "The genus *Nigella* (Ranunculaceae): a taxonomic revision." *Plant Systematics and Evolution* 142: 71–107. 1983, *Cytologia* 50: 759–768. 1985, *Revue Roumaine de Biologie, Série de Biologie Végétale* 30: 89–99. 1985, *Lagascalia* 14: 286–288. 1986, *Collectanea Botanica a Barcinonensi Botanico Instituto Edita* 18: 45–57. 1990, *Boletim da Sociedade Broteriana*, ser. 2 64: 135–142. 1991, *International Organization of Plant Biosystematists Newsletter* 22: 3–4. 1994, *Candollea* 50(2): 457–493. 1995, *Journal of Cytology and Genetics* 31(2): 199–204. 1996

(The oil contains an alkaloid with mildly narcotic properties.)

in English: jack-in-the-green, love-in-a-mist

in Arabic: habba souda, sinouj

Nigella sativa L. (*Nigella cretica* Miller; *Nigella indica* Roxb. ex Fleming)

Mediterranean, Middle East up to India. Herb, erect, profusely branched, yellow-brown taproot, flowers terminal solitary, yellow fleshy receptacle, fruit a ribbed tuberculate capsule, persistent stigmas, seed dark black, a rather variable species

See *Species Plantarum* 1: 534. 1753 and *Protoplasma* 104: 353–357. 1980, *Cytologia* 48: 293–303. 1983, *Cell and Chromosome Research* 6: 21–24. 1983, *Proceedings of the Indian Science Congress Association* 72(3–vi): 49. 1985, *Revue Roumaine de Biologie, Série de Biologie Végétale* 30: 89–99. 1985, *Cytologia* 50: 649–654. 1985, *Proceedings of the Indian Science Congress Association* 78(3, viii): 134. 1991, *J. Ethnopharmacol.* 31(3): 283–289. 1991, *Journal of Cytology and Genetics* 31(2): 199–204. 1996, *Taxon* 54: 469. 2005

(Used in Ayurveda. Powdered seeds paste applied on eczema and skin diseases. Used for headache, rheumatic pains, asthma and coughs, also applied as a galactagogue, emmenagogue, cooling, tonic, vermifuge and diuretic. Excessive use of seed causes abortion.)

in English: black cumin, common fennel flower, fennel flower, love-in-a-mist, small fennel

in Arabic: habba sooda, kammun aswad

in India: kala zerah, kalonji, karijirige

in Indonesia: jinten hitam, jira hitam, yira hitam

in Malaysia: jintan hitam

in Tibetan: zira nagpo

Nilgirianthus Bremek. Acanthaceae

Nilgiris, mountains in W. Ghats, Tamil Nadu State, India, see *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk., Tweede Sect.* 41 (1): 171. 1944.

Nilgirianthus heyneanus (Nees) Bremek. (*Strobilanthes heyneanus* Nees)

India. Small shrub, pale blue flowers

See *Pl. Asiat. Rar.* (Wallich). 3: 85. 1832 and *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk., Tweede Sect.* 41 (1): 173. 1944, *J. Cytol. Genet.* 32(1): 29–33. 1997

(Leaf paste for chest pain. A postpartum remedy.)

in India: karimkurinji, kurunji

Nitraria L. Zygophyllaceae (Nitrariaceae)

From the Latin *nitrum*, *i* 'natron, native soda', Greek *nitron*, soda sources, the plant was first found on the saline plains in Siberia; see Carl Linnaeus, *Systema Naturae*. Ed. 10. 1044. 1759, *Species Plantarum*, Editio Secunda 1: 638. 1762, *An Introduction to the Natural System of Botany* 149. 1830.

Nitraria retusa (Forssk.) Asch. (*Nitraria retusa* Asch.; *Nitraria retusa* (Forssk.) Asch. subsp. *tridentata* (Desf.) A. Chev.; *Nitraria senegalensis* Lam.; *Nitraria senegalensis* Poir.; *Nitraria sericea* Jaub. & Spach; *Nitraria tridentata* Desf.; *Peganum retusum* Forssk.)

North Africa. Young shoots whitish pubescent, spiny at the apices

See *Species Plantarum* 1: 444–445. 1753, *Systema Naturae*, Editio Decima 1044. 1759, *Flora Aegyptiaco-Arabica* 211. 1775, *Flora Atlantica* 1: 372. 1798, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die Angrenzenden Länder* 18: 94. 1876 and *Fl. Palestine, Syria & Sinai* ed. 2. 1: 272. 1932, *Fl. Iran.* 98: 9. tab. 10. fig. 1. 1972, *Stud. Fl. Egypt* ed. 2. 313. 1974 (under Nitrariaceae), *Taxon* 28: 395. 1979

(For piles, stomachache, enteritis, influenza. Veterinary medicine, stomachic.)

in Sahara: garizim

Nitraria schoberi L. (*Nitraria caspica* Willd. ex Pall.; *Nitraria roborowskii* Komar.; *Nitraria schoberi* auct.; *Nitraria schoberi* var. *caspica* Pall.; *Nitraria schoberi* var. *roborowvskii* (Komar.) Hadidi)

Eurasia. Perennial, many-branched, woody shrub. Young branches covered with greyish pubescence, spiny at apices

See *Systema Naturae*, Editio Decima 1044. 1759, *Species Plantarum*, Editio Secunda 1: 638. 1762, *Fl. Orient.* 1: 919. 1867 and *Fl. Turk.* 2: 493. 1967, *Fl. Iran.* 98: 10. 1972

(For sprain.)

Nitraria tridentata Desf.

Syria.

See *Flora Atlantica* 1: 372. 1798

(For swelling, boils, wounds.)

Nosema Prain Lamiaceae (Labiatae)

Greek *sema* ‘sign, standard’, or an anagram of the generic name *Mesona* Blume, see *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 73(1): 20. 1904.

(Astringent.)

in China: long chuan cao

Nothapodytes Blume Icacinaceae

Greek *nothos* ‘false’ and *apodyo*, *apodutos* ‘to strip off, undressed’, referring to the calyx or to the petals, see *Mantissa Plantarum* 154, 252. 1771, *Plantarum Rariorum Horti Caesarei Schoenbrunnensis* 1: 22, pl. 47. 1797, *Mémoires de la Société d’Histoire Naturelle de Paris* 1: 174. 1823, *Bijdragen tot de flora van Nederlandsch Indië* 648. 1825, *Museum Botanicum* 1(16): 248. 1851 [Jul 1850 publ. early 1851], *Annals and Magazine of Natural History*, ser. 2 8: 174. 1851, *Annals and Magazine of Natural History*, ser. 2 9: 395. 1852 and *Compte Rendu des Séances de la Société de Physique et d’Histoire Naturelle de Genève* 53: 35. 1936, *Nat. Pflanzenfam.* ed. 2. 20b: 365. 1942, *J. Arnold Arbor.* 23(1): 55–78. 1942, *Fieldiana, Bot.* 24(6): 225–229. 1949, *Ann. Missouri Bot. Gard.* 63(3): 399–417. 1976 [1977], *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1156–1157. 2001.

Nothapodytes nimmoniana (J. Graham) Mabb. (*Mappia cambodiana* Pierre; *Mappia championiana* Miers; *Mappia dimorpha* Craib; *Mappia foetida* (Wight) Miers; *Mappia gardneriana* Mier; *Mappia insularis* (Matsum.) Hatus.; *Mappia oblonga* Miers; *Mappia ovata* Miers; *Mappia ovata* var. *insularis* Matsum.; *Mappia tomentella* Miers ex Valetton; *Mappia tomentosa* Miers; *Mappia wightiana* Miers; *Neoleretia dimorpha* (Craib) Baehni; *Neoleretia foetida* (Wight) Baehni; *Nothapodytes dimorpha* (Craib) Sleumer; *Nothapodytes dimorpha* R.A. Howard; *Nothapodytes foetida* (Wight) Sleumer; *Premna nimmoniana* J. Graham; *Stemonurus foetidus* Wight)

India. Small tree, foul smelling creamy yellow flowers in terminal corymbose cymes, petals hairy inside, purplish smooth drupes

See *A Catalogue of the Plants Growing in Bombay and its Vicinity* 155. 1839, *Icones Plantarum Indiae Orientalis* 3: pl. 955. 1843–1845, *Annals and Magazine of Natural History*, ser. 2 9: 396. 1852, *Flore Forestière de la Cochinchine* 17: 267. 1892 and *Botanical Magazine* 15: 55. 1901, *Bulletin of Miscellaneous Information Kew* 1926(8): 347. 1926, *Candollea* 7: 177–179. 1936, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 15(2): 247. 1940, *Journal of the Arnold Arboretum* 23: 67. 1942, *Taxon* 29(5–6): 606. 1980, *Bot. Hist. Hortus Malabaricus* 88. 1980

(Stem juice may cause hemorrhagia, diarrhea, coma and death. The extract of leaves and young shoots used for treating wounds, boils, ulcers, cancer. A natural source of the terpenoid indole alkaloid camptothecin, two semi-synthetic derivatives, topotecan and irinotecan, are currently prescribed as anticancer drugs. Magico-religious beliefs,

spiritual, emotional, flowers kept in house to keep off evil spirits and ghosts.)

in China: chou wei jia chai long shu

in India: arali, chorla, durnaathada mara, durvaasane mara, ghanera, haelu, hedare, kalgur, kodasa, kodsas, moore gida, more gida, peenari

Nothocnide Blume ex Chew Urticaceae

From the Greek *nothos* 'false' and *knide* 'nettle'; see Karl Ludwig von Blume, *Museum Botanicum Lugduno-Batavum*. Lugduni-Batavorum 1856.

Nothocnide repanda Blume

Sumatra, Borneo. Woody climber or scandent shrub, no irritant hairs, leaves spirally arranged, axillary inflorescence spicate, unisexual flowers

See *Museum Botanicum* 2: 137, t. 14. 1856

(Stem sap drunk to ease a sore throat; stem sap used to treat influenza or fever, and to ease body pain. Sap squeezed from the new top leaves and applied to sores or rubbed on the chest to soothe a bad cough. Leaves tonic, used also to cure mouth ulcers.)

in Papua New Guinea: backilo, ese-kureka, galoho, garoho, yakuandumo

Notholaena R. Br. Pteridaceae (Polypodiaceae, Adiantaceae)

Cloak ferns, from the Greek *nothos* 'false' and *chlaena*, *laina* 'cloak, blanket, coat', referring to the leaf margins and to the incomplete indusium; see Robert Brown (1773–1858), *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 145. London 1810.

Notholaena nivea (Poir.) Desv. (*Argyrochosma nivea* (Poir.) Windham; *Cincinalis nivea* (Poir.) Desv.; *Gymnogramma nivea* (Poir.) Mett.; *Notholaena nivea* Desv.; *Pellaea nivea* (Poir.) Prantl; *Pteris nivea* Poir.)

Tropical America.

See *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 313. 1811, *Mémoires sur les Familles des Fougères* 5: 160. 1852, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 3: 417. 1882. and William Ralph Maxon and C.A. Weatherby "Some species of *Notholaena*, new and old. I. The group of *Notholaena nivea*." *Contr. Gray Herb.* 127: 3–15. 1939, *American Fern Journal* 77(2): 41. 1987, *Hickenia* 2(38): 177. 1996

(Leaves infusion used for cough, stomachache.)

in Chile: culantrillo

Notholaena nivea (Poir.) Desv. var. *flava* Hook. (*Acrostichum tereticaulon* Desv.; *Notholaena chrysophylla* Kl.; *Pellaea flavens* C. Chr.)

Tropical America.

See *Prodromus Florae Novae Hollandiae* 145. 1810, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 310. 1811, *Filicum Species* 59. 1841, *Species Filicum* 5: 112. 1855, *Allgemeine Gartenzeitung* 23: 265. 1855 and *Index Filicum* 480. 1906, *Contr. Gray Herb.* 127: 3–15. 1939, *Hickenia* 2(38): 177. 1996

(Whole plant decoction used for regulating fertility.)

in Paraguay: doradilla

Nothopegia Blume Anacardiaceae

From the Greek *nothos* 'false' and the genus *Pegia* Colebr., Greek and Latin *pege* 'a source, spring, origin, fountain, stream', see *Trans. Linn. Soc. London* 15(2): 364. 1827 [11–20 Dec 1827], *Museum Botanicum* 1(13): 203. 1850.

Nothopegia colebrookiana (Wight) Blume (*Nothopegia colebrookiana* Blume; *Pegia colebrookiana* Wight)

India.

See *Illustrations of Indian Botany* 185. 1840, *Mus. Bot.* 1(13): 203. 1850 [Apr 1850 publ. Oct 1850]

(Dried powdered seeds taken with cow's milk for snakebite.)

in India: karunthillai

Nothosaerva Wight Amaranthaceae

From the Greek *nothos* 'false, bastard, spurious' plus *Aerva* Forsskål, see *Systema Vegetabilium*, editio decima sexta 4(2): 22, 25. 1827, *Icones Plantarum Indiae Orientalis* 5(2): 3. 1852, *Icones Plantarum Indiae Orientalis* 6: 17. 1853.

Nothosaerva brachiata (L.) Wight (*Achyranthes brachiata* L.; *Aerva brachiata* (L.) Mart.; *Illecebrum brachiatum* (L.) L.; *Pseudanthus brachiatus* (L.) Wight)

India. Woody-based herb, white flowers

See *Species Plantarum* 1: 204–205. 1753, *Mantissa Plantarum* 1: 50. 1767, *Mantissa Plantarum* 2: 213. 1771, *Flora Aegyptiaco-Arabica* 170. 1775, *Beitr. Amarantac.* 83. 1825, *Icones Plantarum Indiae Orientalis* 5: 3. 1852, *Icones Plantarum Indiae Orientalis* 6: 1, 17. 1853, *Fl. Brit. Ind.* 4: 726. 1885 and *Ann. Cat. Pl. Vasc. W. Pakistan* 232. 1972

(Used in Ayurveda. For skin diseases, stomachache, astringent, antiseptic.)

in India: pasanabheda

Nothosmyrnum Miq. Apiaceae (Umbelliferae)

From the Greek *nothos* ‘false’ and the genus *Smyrnum* L., see *Annales Museum Botanicum Lugduno-Batavi* 3: 58. 1867.

Nothosmyrnum japonicum Miquel var. *japonicum* (C.B. Clarke) Ridley (*Macrochlaena glaucocarpa* Handel-Mazzetti)

China, Japan.

See *Ann. Mus. Bot. Lugduno-Batavi*. 3: 58. 1867 and *Symbolae Sinicae* 7(3): 720–721, pl. 22, f. 1–3. 1933

(The taproot as a sedative and to relieve pain.)

in China: bai bao qin

Nothosmyrnum japonicum Miquel var. *sutchuenense* H. Boissieu (*Nothosmyrnum japonicum* var. *sutchuensis* H. Boissieu)

China.

See *Bulletin de la Société Botanique de France* 16. 1909, *China J. Pl. Resources & Environm.* 4(3): 1–8. 1995

(Analgesic.)

in China: chuan bai bao qin

Nothosmyrnum xizangense R.H. Shan & T.S. Wang var. *xizangense* (C.B. Clarke) Ridley (*Nothosmyrnum xizangense* var. *simpliciorum* Shan & T.S. Wang; *Nothosmyrnum xizangense* var. *xizangense*)

China.

See *Acta Phytotaxonomica Sinica* 18(3): 375–376. 1980

(Analgesic, stomachic.)

in China: xi zang bai bao qin

Notopleura (Hook.f.) Bremek. Rubiaceae

Greek *notos*, *noton* ‘back, south’ and *pleura*, *pleuron* ‘side, rib, lateral’.

Notopleura uliginosa (Sw.) Bremek. (*Psychotria laevis* DC.; *Psychotria phytolacca* Spreng. ex DC.; *Psychotria uliginosa* Sw.; *Uragoga laevis* (DC.) Kuntze; *Uragoga uliginosa* (Sw.) Kuntze)

C. Mexico to Trop. America.

See *Revis. Gen. Pl.* 2: 961, 963. 1891 and *Recueil Trav. Bot. Néerl.* 31: 289. 1934, Schultes, R.E. and R.F. Raffauf. *The Healing Forest: Medicinal and Toxic Plants of the Northwest Amazonia*. Dioscorides Press. 1995

(The leaves are a source of a dark blue or black dye used for ceremonial body painting by Indians in the Río Miritiparaná region.)

Notopterygium Boissieu Apiaceae (Umbelliferae)

From the Greek *notos* ‘back’ and *pterygion* ‘a small wing’.

Notopterygium franchetii H. de Boissieu (*Angelica rubri-vaginata* H. Wolff; *Drymoscias forbesii* (H. de Boissieu) Koso-Poljansky; *Drymoscias franchetii* (H. de Boissieu) Koso-Poljansky; *Notopterygium forbesii* H. de Boissieu)

See *Bull. Herb. Boissier*, sér. 2. 3: 839. 1903

(The rootstock and root are used in some districts instead of *Notopterygium incisum* for the important traditional medicine *qiang huo*.)

in China: kuan ye qiang huo

Notopterygium incisum C.C. Ting ex H.T. Chang

See *Acta Phytotax. Sin.* 13(3): 86. 1975

(The rootstock and root are used in the important traditional medicine *qiang huo*, see also *Notopterygium franchetii*.)

in China: qiang huo

Nucularia Batt. Amaranthaceae (Chenopodiaceae)

From the Latin *nucula* ‘a small nut’, *nux*, *nucis* ‘a nut’, see *Bulletin de la Société Botanique de France* 50: 469. 1903, Naegelé, A. *Exposé sommaire sur la végétation des environs d’Atar en Mauritanie*. [Dakar] 1956.

Nucularia perrinii Batt. (*Nucularia perrinii* var. *incrassata* Maire)

Tropical Africa, Sahara. Low bush, halophyte, papery fleshy leaves, small yellow axillary flowers, relished by camels

See *Bulletin de la Société Botanique de France* 50: 469. and 51: 434. 1903

(Leaves infusion taken for asthma, depurative, diuretic, for stomach pain, respiratory disorders. Fresh leaves applied for skin diseases, wounds, rheumatism.)

in Mali: askaf, âskâf

in Mauritania: arjem

Tamahaq name: tassak

Nuphar Sm. Nymphaeaceae

An Arabic or Persian name; see *Florae Graecae Prodromus* 1(2): 361. 1809 [dt. 1806; issued May–Nov 1809], Auguste Adolphe Lucien Trécul (1818–1896), *Recherches sur la structure et le développement du Nuphar lutea*. Paris 1845 and Beal, E.O. “Taxonomic revision of the genus *Nuphar* Sm. of North America and Europe.” *J. Elisha Mitchell Sci. Soc.* 72: 317–346. 1956, Kuan Ke-chien. *Nymphaeaceae* subfam. *Nymphaeoidae*. *Fl. Reipubl. Popularis Sin.* 27: 6–15. 1979, H. Genaust, *Etymologisches Wörterbuch der botanischen*

Pflanzennamen. 425. 1996, *Sida* 18(3): 824. 1999. The taxonomy of the genus is problematic. Prior to conservation in its current sense, the name *Nymphaea* was frequently used for *Nuphar*.

Nuphar lutea (L.) Sm. (*Nuphar lutea* Sibth. & Sm.; *Nuphar luteum* (L.) Sm.)

North America. Perennial herb, heart-shaped floating leaves on long stalks, bright yellow flowers bowl-shaped

See *Species Plantarum* 1: 510. 1753, *Fl. Graec. Prodr.* 1(2): 361. 1809

(Roots infusion to treat blood diseases, heart trouble, chills with fever; a poultice for boils, wounds, swellings and wounds; rhizome a remedy for impotence, but large doses could be toxic or potentially poisonous.)

in English: brandy bottle, cow-lily, Indian pond-lily, spatter-dock, yellow pond-lily, yellow pondlily, yellow waterlily

in China: ou ya ping peng cao

Nuphar lutea (L.) Sm. subsp. *advena* (Aiton) Kartesz & Gandhi (*Nuphar advena* (Aiton) W.T. Aiton; *Nuphar advena* Ait.; *Nuphar advena* subsp. *ozarkana* (G.S. Mill. & Standl.) D. Padgett; *Nuphar advena* var. *tomentosa* Torr. & A. Gray; *Nuphar fluviatilis* Standl.; *Nuphar fluviatilis* (R.M. Harper) Standl.; *Nuphar lutea* subsp. *macrophylla* (Small) E.O. Beal; *Nuphar lutea* subsp. *ozarkana* (G.S. Mill. & Standl.) E.O. Beal; *Nuphar microcarpa* (G.S. Mill. & Standl.) Standl.; *Nuphar ovata* (G.S. Mill. & Standl.) Standl.; *Nuphar ozarkana* (G.S. Mill. & Standl.) Standl.; *Nuphar puteora* Fernald; *Nuphar puteorum* Fernald; *Nuphar* x *interfluitans* Fernald; *Nymphaea advena* Aiton; *Nymphaea advena* subsp. *macrophylla* (Small) G.S. Mill. & Standl.; *Nymphaea chartacea* G.S. Mill. & Standl.; *Nymphaea fluviatilis* R.M. Harper; *Nymphaea ludoviciana* G.S. Mill. & Standl.; *Nymphaea macrophylla* Small; *Nymphaea microcarpa* G.S. Mill. & Standl.; *Nymphaea ovata* G.S. Mill. & Standl.; *Nymphaea ozarkana* G.S. Mill. & Standl.; *Nymphaea puberula* G.S. Mill. & Standl.; *Nymphozanthus advena* (Aiton) Fernald; *Nymphozanthus ozarkanus* (G.S. Mill. & Standl.) Palmer & Steyererm.)

North America. Perennial herb

See *Species Plantarum* 1: 510. 1753, *Hortus Kewensis*; or, a catalogue ... 2: 226–227. 1789, *Hortus Kewensis*; or, a Catalogue of the Plants Cultivated in the Royal Botanic Garden at Kew. London (2nd ed.) (W.T. Aiton) 3: 295. 1811, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 2: 70. 1822, *Repertorium Botanices Systematicae*. 1: 108. 1842 and *Rhodora* 21(250): 186. 1919, *Publ. Field Columb. Mus., Bot. Ser.* 8: 311. 1931, *J. Elisha Mitchell Sci. Soc.* 72: 332, 337. 1956, *Phytologia* 67(6): 463. 1989

(Analgesic, anticonvulsive, febrifuge, stomachic, for epilepsy, chills, blood diseases, fever, smallpox, sores, swellings, bruises, heart and respiratory troubles, inflammatory diseases. Witchcraft medicine, anti-witch remedy, to keep witches away.)

in English: spatter-dock, yellow pond-lily, yellow pondlily

Nuphar lutea (L.) Sm. subsp. *polysepala* (Engelm.) E.O. Beal (*Nuphar polysepala* Engelm.; *Nymphaea polysepala* (Engelm.) Greene; *Nymphozanthus polysepalus* (Engelm.) Fernald; *Nymphozanthus polysepalus* Fernald)

North America. Perennial herb

See *Transactions of the Academy of Science of St. Louis* 2(2): 282. 1866, *Bulletin of the Torrey Botanical Club* 15(3): 84. 1888 and *Rhodora* 21(250): 187. 1919, *Journal of the Elisha Mitchell Scientific Society* 72(2): 339. 1956

(Roots considered poisonous. Analgesic, contraceptive, anti-rheumatic, anticonvulsive, febrifuge, stomachic, for epilepsy, chills, blood diseases, gonorrhoea, ulcers, sores, swellings, bruises, heart and respiratory troubles, lung hemorrhages, asthma and chest pains, tuberculosis, toothache, bites and infections, fever, smallpox, inflammatory diseases, rheumatism. Witchcraft medicine, anti-witch remedy, to keep witches away.)

in English: Rocky Mountain pond-lily, Rocky Mountain pondlily, Rocky Mountain spatter-dock

Nuphar lutea (Linnaeus) Smith subsp. *variegata* (Durand) E.O. Beal (*Nuphar advena* (Aiton) W.T. Aiton var. *fraterna* (G.S. Mill. & Standl.) Standl.; *Nuphar americana* Provancher; *Nuphar fraterna* (G.S. Miller & Standley) Standley; *Nuphar variegata* Durand; *Nuphar variegatum* Engelm.; *Nymphaea americana* (Provancher) G.S. Miller & Standley; *Nymphaea fraterna* G.S. Miller & Standley; *Nymphozanthus variegatus* (Durand) Fernald)

North America. Perennial herb, heart-shaped floating leaves

See *Florae Graecae Prodromus* 1: 361. 1809 [1806], *Fl. Canada* [Provancher] 28. 1862, *Annual Reports of the State Botanist* 19: (App.) 73. 1866 (also *Annual Report of the New York State Museum* 19: 73. 1866 or *Annual Rep. New York State Mus. Nat. Hist.*) and Miller, G.S. Jr. and P.C. Standley. "The North American species of *Nymphaea*." *Contr. U.S. Natl. Herb.* 16(3): 63–108. 1912, *Rhodora* 21(250): 187. 1919, *Publications of the Field Museum of Natural History, Botanical Series* 8(5): 310. 1931

(Roots infusion cooling, disinfectant, for skin diseases, venereal diseases, urinary problems; crushed roots applied to skin diseases, sore joints, swellings and painful limbs, bruises, wounds, infections, infected sores. Veterinary medicine, boiled and crushed roots on deep cuts of horses.)

in English: bullhead lily, pond lily, variegated yellow pond-lily

Nuxia Comm. ex Lam. Buddlejaceae (Loganiaceae)

The genus was named after a French botanist on La Réunion Island, M. de la Nux, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 295–296, t. 71. 1792, *Flora*

26: 77. 1843 and *Bulletin of Miscellaneous Information* 1, 1930. pp. 10–32. 1930 [Smith, Christo Albertyn, *Nuxia and Lachnopylis in Africa.*], Leeuwenberg, Anthonius Josephus Maria (1930-), “The Loganiaceae of Africa: XIV, a revision of *Nuxia* Lam.” *Meded. Landbouwhogeschool Wageningen* 75(8): 77. 1975.

Nuxia congesta R. Br. ex Fresen. (*Lachnopylis angolensis* (Gilg) Philipson; *Lachnopylis compacta* C.A. Sm.; *Lachnopylis congesta* C.A. Sm.; *Lachnopylis congesta* (R. Br. ex Fresen.) C.A. Sm.; *Lachnopylis flocculosa* C.A. Sm.; *Lachnopylis goetzeana* Greenway ex Burt Davy; *Lachnopylis goetzeana* (Gilg) Greenway; *Lachnopylis guineensis* Hutch. & M.B. Moss; *Lachnopylis guineensis* Hutch., M.B. Moss, Hutch. & Dalziel; *Lachnopylis heterotricha* C.A. Sm.; *Lachnopylis mannii* (Gilg) Hutch. & M.B. Moss; *Lachnopylis montana* C.A. Sm.; *Lachnopylis odorata* (Gilg) Greenway; *Lachnopylis odorata* Greenway ex Burt Davy; *Lachnopylis platyphylla* (Gilg) Dale; *Lachnopylis platyphylla* (Gilg) C.A. Sm. ex Robyns; *Lachnopylis platyphylla* (Gilg) Greenway; *Lachnopylis sambesina* (Gilg) C.A. Sm.; *Lachnopylis saxatilis* C.A. Sm.; *Lachnopylis schistotricha* C.A. Sm.; *Lachnopylis speciosa* C.A. Sm.; *Lachnopylis ternifolia* Hochst.; *Lachnopylis viscidulosa* C.A. Sm.; *Nuxia angolensis* Gilg; *Nuxia breviflora* S. Moore; *Nuxia dekindtiana* Gilg; *Nuxia emarginata* Sond.; *Nuxia gillettii* De Wild.; *Nuxia goetzeana* Gilg; *Nuxia keniensis* T.C.E. Fr.; *Nuxia latifolia* T.C.E. Fr.; *Nuxia mannii* Gilg; *Nuxia odorata* Gilg; *Nuxia platyphylla* Gilg; *Nuxia pubescens* Sond.; *Nuxia rupicola* Gilg; *Nuxia sambesina* Gilg; *Nuxia siebenlistii* Gilg; *Nuxia tomentosa* Sond.; *Nuxia viscosa* Gibbs)

Tropical Africa.

See *Tabl. Encycl. Meth., Bot.* 1: 295. 1791, *Flora* 21: 606. 1838, *Flora* 26: 77. 1843, *Linnaea* 23: 83–84. 1850, *Pflanzenw. Ost-Afrikas* C (1895) 312. 1895, *Notizbl. Königl. Bot. Gart. Misc. Inform. Kew* 1937, 61. 1937, *Check-Lists For. Trees & Shrubs Brit. Empire* No. 5 (Tanganyika Terr.) Pt. 1, 112, 133. 1940, *Catalogue of the vascular plants of S. Tomé* 245. 1944, *Flore des spermatophytes du parc national Albert*. ii. 60. Bruxelles, 1947–1955

(Astringent. Magic.)

in English: bogwood, brittlewood, common wild elder

in Cameroon: evoun

in Southern Africa: gewone wildevlier, bergsalie, broshout, witblomsalie; mohatantswe, mokwerekwere (Ngwaketse dialect, Botswana); umKhobeza, isiPhofane (Zulu); umKho-beza (Xhosa)

Nuxia floribunda Benth. (*Lachnopylis floribunda* C.A. Sm.; *Lachnopylis floribunda* (Benth.) C.A. Sm.)

Tropical Africa. Tree, branched, rounded crown, small sweetly scented cream-white flowers in large branched inflorescences, tiny seeds, honey tree, foliage browsed by game and stock

See *Companion to the Botanical Magazine* 2: 59. 1836 and *Bulletin of Miscellaneous Information Kew* 1930: 17, 25. 1930

(Bark mixed with water to treat diarrhea. Leaves to treat coughs, colds, influenza, fevers, indigestion, infantile convulsions. Root mixed with other plants to treat hernia. Rituals, magic, the leaves.)

in English: forest elder, kite tree, white elder, wild peach

in Southern Africa: bosvlier, vlier, wildevlier; motlhabare (North Sotho); umHlambandlazi (= mousebird washer), umDlambandlaze, isanywana, iThambo, inGobese, umSunuwembuzi, umGwaqu, umKhobeza, umKhombeza (Zulu); iNgqota, isiKhali, isiKali (Xhosa); mula-notshi, mpupumwa (Venda)

in Tanzania: chirazi, mkombaluiko, mkombalwika, mkombalwiko, msasi dume, muacho, muasho, mvambe, mwasho

Nyctanthes L. Oleaceae (Verbenaceae)

From the Greek *nyx*, *nyktos* ‘night’ and *anthos* ‘flower’, the flowers open at night and fall off at the break of the day, at dawn, see *Species Plantarum* 1: 6. 1753.

Nyctanthes arbor-tristis L. (*Parilium arbor-tristis* Gaertn.; *Parilium arbor-tristis* (L.) Gaertn.)

India. Shrub or small tree, quadrangular branchlets, dentate scabrous leaves, white flowers with orange tube, suborbicular compressed capsule, grown for its fragrant flowers, dried flowers eaten in curries, leaves used for polishing wood, from the corolla tube an orange dye is extracted

See *Species Plantarum* 1: 6. 1753, *De Fructibus et Seminibus Plantarum...* 1: 234 et 2: 265. 1788, *FBI* 3: 603. 1882 and *For. Fl. Punj.* ed. 3: 318. 1956, *Journal of Cytology and Genetics* 18: 56–58. 1983, *Current Science* 53: 439–441. 1984, *Journal of Cytology and Genetics* 24: 71–77. 1989

(Used in Ayurveda. Root extract to cure fever; roots kept in paddy stock to protect from insects; roots chewed in toothache. Bark expectorant, a decoction given for gastrointestinal disorders. Soft leaves crushed and given with milk in the treatment of malaria; leaf juice taken with honey as a treatment for arthritis and waist pain; leaf paste or juice

applied on eczema, scabies and ringworm; leaf juice given as a febrifuge, vermifuge in infants and for curing hiccups; leaf decoction to cure malaria, fevers, sciatica, rheumatic pains; leaf infusion for fevers and as an antidote for reptile venoms. Inflorescence and young fruits pounded in water used to relieve cough. Seeds for the treatment of piles and skin diseases; seed powder mixed with honey given in malaria; powdered seeds mixed with coconut oil, kept in sunlight and applied to scalp to prevent premature whitening of hair. Veterinary medicine, leaf juice given to kill intestinal worms and applied for skin diseases, eczema.)

in English: coral jasmine, musk flower, night-blooming jasmine, night jasmine, sorrowful tree, tree of sadness

in China: nai hua, hung mo li

in India: basgo, char-amir, gangaseoli, gangashvli, gangashvili, gangashvli, gangasiuli, gargad, gauda-khadika, gotha khadika, harshinghar, harsingar, gotkhadika, goudakhadika, harsingar, harshinghar, hengra, kharsa, khirsari, manja pumeram, manjapumaram, mannappumaram, murjhatani, parijat, parijata, parijatak, parijatham, parsikut, pavalamallikai, pavizamalli, samsah-door, san-chiari, sansiari, saparam, sephaali, sephalika, seulli sephali, shihor, siharu, sihor, simhali, singadahara

Surv.* 1888(4): 164. 1891, *Bulletin of the Torrey Botanical Club* 22: 147. 1895, *The Water Garden* 88. 1897 and *Rhodora* 10(111): 49. 1908, *Muhlenbergia*; a journal of botany 3(9): 145. 1908, *Proc. Iowa Acad. Sci.* 23: 621. 1916, *Manual of the Southeastern Flora* [Small] 543. 1933, *Rhodora* 38(455): 406. 1936, *Rhodora* 49(581): 141–142, tab. 1061–1063. 1947, Seymour, Frank Conkling (1895–1985), *Flora of Lincoln County, Wisconsin*: an annotated list of flowering plants and ferns, with keys and brief descriptions for identification. Treating briefly also the plants of the adjacent counties: Oneida County, Langlade County, Marathon County, Taylor County, Price County. 1960, *Phytologia* 37(5): 443–444. 1977, *Rhodora* 96(886): 170. 1994

(Roots considered poisonous; large doses may be toxic. Leaves infusion for colds, swellings. Roots infusion or juice to treat coughs, tuberculosis, mouth sores, diarrhea; root poultice for swellings.)

in English: American water-lily, fragrant waterlily, pond lily, white waterlily

Nymphaea rubra Roxb. (*Nymphaea rubra* Roxb. ex Salisb.)

India.

See *Cytologia* 45: 307–314. 1980

(Used in Ayurveda and Unani. Flowers blood purifier, febrifuge aphrodisiac, useful in cough and vomiting.)

in English: Indian red waterlily

in India: alagandha, alipriya, alohita, alpapatra, anda, aravinda, arunakamala, atti, bhadra, charunalaka, erra kaluva, hallaka, indivara, kalharamu, kamala, kokanada, krishnakkottpala, kumuda, kunalaya, lal shapla, lalakamal, nilotpala, nilufar, nulufar, raktakairava, raktakalhara, raktakamal, raktakamala, raktakumuda, raktambhoja, raktasandhyaka, raktasaroruha, raktavarija, raktavarna, ravipriya, rochana, rongabhet, sandhyaka, shonapadma, somakhya, thaamara

in Japan: aka-bana-hitsuji-gusa (= red flowered *Nymphaea tetragona*)

in Okinawa: suirin

in Tibet: utpa ladmar po

Nymphaea stellata Willd. var. *cyanea* Hook. f. (*Nymphaea stellata* F. Muell.)

India, Tropical Africa.

See *Sp. Pl.*, ed. 4 [Willdenow] 2(2): 1153. 1799, *Hort. Bengal.* 41. 1814, *A General History of the Dichlamydeous Plants...* 1: 125, descr. 1831, *Fragm.* (Mueller) 2(16): 142. 1861 and *Cytologia* 45: 307–314. 1980

(Used in Ayurveda.)

in India: nila, nilotpala, utpala

Nymphaea tetragona Georgi (*Castalia crassifolia* Hand.-Mazz.; *Nymphaea acutiloba* DC.; *Nymphaea crassifolia* (Hand.-Mazz.) Nakai; *Nymphaea tetragona* var. *crassifolia* (Hand.-Mazz.) Chu)

India. Leaves broadly ovate, thalamus tetragonous, light yellow flowers with crimson lines, petioles eaten as vegetables

See *Species Plantarum* 1: 510–511. 1753, *Bemerkungen einer Reise im Russischen Reich im Jahre 1772* 1: 220. 1775, *The Paradise Londinensis* 1: t. 14. 1805, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 116. 1824 and *Proc. Carnegie Inst. Wash.* 4: 170. 1905, *Symbolae Sinicae* 7(2): 333–334, pl. 7. 1931, *Journal of Japanese Botany* 14(11): 751. 1938, *Journal of Cytology and Genetics* 6: 67–89. 1971, *Flora Plantarum Herbacearum Chinae Boreali-Orientalis* 3: 82, t. 33, f. 5. 1975, Kuan Ke-chien. *Nymphaeaceae subfam. Nymphaeoidae. Fl. Reipubl. Popularis Sin.* 27: 6–15. 1979, *Journal of Japanese Botany* 56: 367–375. 1981, *Aquatic Pl. Japan* 112. 1994

(Used in Ayurveda. Highly laxative, eaten raw for constipation.)

in English: pigmy waterlily

in China: shui lien

in India: cheni boub, keni boub, kumuda, utpalam, thariktha

in Japan: hitsuji-gusa

Nymphoides Séguier Menyanthaceae (Gentianaceae)

Resembling the genus *Nymphaea*, see *Plantae Veronenses* 3: 121. 1754, John Hill (1716–1775), *The British Herbal*. 77. London 1756, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 527, pl. 17, f. 2. 1770 and Arthur D. Chapman, ed., *Australian Plant Name Index*. 2098–2099. Canberra 1991.

Nymphoides aurantiaca (Dalzell) Kuntze (*Limnanthemum aurantiacum* Dalzell; *Nymphoides aurantiacum* Kuntze)

China, India. Small aquatic herb, floating leaves deeply cordate, white flowers in clusters, flattened globose seeds covered with minute spines

See *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 136. 1850, *Revisio Generum Plantarum* 2: 429. 1891

(Root decoction in jaundice.)

in China: shui jin lian hua

Nymphoides cristata (Roxburgh) Kuntze (*Limnanthemum cristatum* (Roxb.) Griseb.; *Limnanthemum cristatum* Griseb.; *Menyanthes cristata* Roxb.; *Nymphoides cristata* Kuntze; *Villarsia cristata* (Roxb.) Spreng.; *Villarsia cristata* Spreng.)

India.

See *Species Plantarum* 1: 145. 1753, *Plants of the Coast of Coromandel* 2: 3–4, t. 105. 1819, *Systema Vegetabilium*, editio decima sexta [Sprengel] 1: 582. 1824 [dated 1825; publ. in late 1824], *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 342–343. 1838 [1839 publ. 1838], *Revisio Generum Plantarum* 2: 429. 1891

(Used in jaundice and fevers. Seeds anthelmintic. Leaves decoction given after conception as a pre-partum remedy. Leaves and stalks pulverised with oil and applied to insect bites, skin parasites and ulcers.)

in English: cristate floating heart

in China: shui pi lian

in India: panchuli, tagarmul

Nymphoides hydrophylla (Lour.) Kuntze (*Limnanthemum hydrophyllum* (Lour.) Griseb.; *Menyanthes hydrophylla* Lour.; *Nymphoides hydrophylla* Kuntze; *Nymphoides hydrophyllum* Kuntze)

India. Aquatic plant, erect rhizome

See *Flora Cochinchinensis* 1: 105–106. 1790, *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 348. 1839[1838], *Revisio Generum Plantarum* 2: 429. 1891

(Whole plant tonic during pregnancy. Paste of leaves applied in skin diseases.)

in China: ci zhong xing cai

in India: kumudini

Nymphoides indica (L.) Kuntze (*Limnanthemum esquirolii* H. Lév.; *Limnanthemum humboldtianum* (Kunth) Griseb.; *Limnanthemum humboldtianum* var. *parviflorum* Griseb.; *Limnanthemum indicum* (L.) Griseb.; *Limnanthemum indicum* (L.) Thwaites; *Limnanthemum indicum* (L.) Griseb.; *Limnanthemum thunbergianum* Griseb.; *Menyanthes indica* L.; *Nymphoides humboldtiana* (Kunth) Kuntze; *Nymphoides indica* subsp. *occidentalis* A. Raynal; *Nymphoides thunbergiana* (Griseb.) Kuntze; *Trachyspermum humboldtianum* (Kunth) House; *Villarsia humboldtiana* Kunth; *Villarsia indica* (L.) Vent.)

India. Aquatic herb, floating orbicular leaves, dimorphic flowers, subglobose capsule, many obovate seeds

See *Species Plantarum* 1: 145. 1753, *Genera et Species Gentianearum adjectis observationibus quibusdam phytogeographicis* 342–343. 1839 [1838], *Revisio Generum Plantarum* 2: 429. 1891 and *J. Jap. Bot.* 55: 244–248. 1980, *Bull. Child. Develop., Kochi Women's Univ.* 5: 71–82. 1981

(Seeds ground up and given in fever and jaundice. Paste of leaves applied on boils and sores.)

in English: fringed water lily, Indian floating heart, Indian marshwort, water snowflake, white fringe

in China: jin yin lian hua

in India: barachuli, kumudani, kumudini, niruthavare

Nymphoides peltata (S.G. Gmel.) Kuntze (*Limnanthemum nymphoides* (L.) Hoffm. & Link; *Limnanthemum peltatum* S.G. Gmel.; *Menyanthes nymphoides* L.; *Nymphoides nymphaeoides* Britt.; *Nymphoides peltatum* (S.G. Gmel.) Britten & Rendle)

China, India. Floating perennial herb, stems black-dotted, thick nodes, compressed fruits with an acute apical beak, often young leaves and petioles cooked as vegetables

See *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 527, pl. 17. 1769 (1770), *Revisio Generum Plantarum* 2: 429. 1891 and *List of British Seed-Plants and Ferns* 20. 1907, *J. Jap. Bot.* 55: 244–248. 1980, *Bull. Child. Develop., Kochi Women's Univ.* 5: 71–82. 1981, *Bot. Zhurn.* 66 (11): 1584–1594. 1981, *Watsonia* 19: 169–171. 1993

(Cardiotonic. Veterinary medicine, given as fodder to cows to enhance the milk production. Ritual, ceremonial flowers offered to the idols by the pandits.)

in English: shield floating heart, water fringe, yellow floating heart

in China: ching so tien, hui tiao, hui tiao tsai, xing cai

Nypa Steck Arecaceae (Palmae)

From Malayan or Moluccan word *nipah*.

Nypa fruticans Wurm (Cocos *nypa* Lour.; *Nypa arbore-scens* Wurm ex H. Wendl.; *Nypa fruticans* Thunb.; *Nypa fruticans* (Wurm) Thunb.; *Nypa litoralis* Blanco; *Nypa fruticans* var. *neameana* F.M. Bailey)

Sri Lanka, Caroline Is. Palm, creeping, unarmed, pleonanthic, monoecious, prostrate or subterranean (rhizome), leaves erect, inflorescence solitary erect branched, globose head of female flowers, solitary male flowers, fruiting head subglobose, fruit eaten, young seeds and buds edible, subhumid to humid, sap used as beverage, swamp soils, tidal mud

See *Species Plantarum* 2: 1188. 1753, *Dissert. Inaug. Med. Sagu* 15. 1757, *Verhandeligen van het bataviaasch genootschap van kunsten en wetenschappen* 1: 349. 1779, *Kongl. Vetenskaps Academiens Nya Handlingar* 3: 231. 1782, *Flora Cochinchinensis* 2: 567. 1790, *Icon. Pl. Asiat.* 3: 244–247. 1851, *Proc. Roy. Soc. Queensland* 5: 147. 1888 and *Plant Systematics and Evolution* 189: 83–122. 1994, *Botanica Acta* 110: 79–89. 1997

(Leaves decoction applied to snake and centipede bites. Juice from young shoots used against herpes; leaves included in a decoction taken as a remedy for bloody diarrhea; ashes against toothache and headache. Thorny roots for hunting crocodiles.)

in English: mangrove palm, nipa palm, nypa palm, water coconut, water palm

in Brazil: palmeira do mangue, palmeira ripa

in Burma (Myanmar): dane

in Cambodia: cha:k

in India: phudo, railoi

in Indonesia: bobo, buyuk, nipah

in Japan: nippa-yashi

in Malaysia: nipah

in Papua New Guinea: biri-biri

in Philippines: anipa, lasa, nipa, pawid, pinog, pinok, saga, sasa, tata

in Sri Lanka: gin-pol

in Thailand: atta, chak

in Vietnam: d[uwf]a n[uw][ows]c, d[uwf]a l[as]

Nyssa L. Cornaceae (Nyssaceae)

Greek *nyssa* 'to prick, to pierce', Nyssa or Nysa was the name of one of the water nymphs, some species love moist or swampy habitat; Dionysus was the Greek god of wine and revelry, he was the son of Zeus and the youngest of the twelve Olympians, the nymphs of Nysa raised him, and were later rewarded by being changed into a constellation; Nysa was the name of several mountains sacred to Dionysus; in the Homeric "Hymn to Demeter," the story is told of how

Persephone was gathering flowers in the Vale of Nysa when she was seized by Hades and removed to the underworld; see *Species Plantarum* 2: 1058. 1753, *Analyse des Familles de Plantes* 13. 1829.

Nyssa sylvatica Marshall (*Nyssa caroliniana* Poir.; *Nyssa multiflora* Elliott; *Nyssa multiflora* Wengenh.; *Nyssa multiflora* Wengenh. var. *sylvatica* (Marshall) S. Watson, nom. superfl.; *Nyssa sylvatica* Marsh. var. *caroliniana* (Poir.) Fernald; *Nyssa sylvatica* Marshall var. *caroliniana* Fernald; *Nyssa sylvatica* Marsh. var. *dilatata* Fernald; *Nyssa sylvatica* Marsh. var. *typica* Fernald)

North America. Perennial tree

See *Arbustrum Americanum* 97–98. 1785, *Beschreibung einiger Nordamericanischen Holz-und Buscharten* 46, t. 16, f. 39. 1787, *Encyclopédie Méthodique, Botanique* (Lamarck) 4(2): 507. 1798, *A Sketch of the Botany of South-Carolina and Georgia* [Elliott] 2: 684. 1824, *Bibliographical Index to North American Botany* 442. 1878 and *Rhodora* 37(444): 434, 436. 1935

(Anthelmintic, emetic, astringent, given for worms, gastrointestinal disorders, diarrhea.)

in English: black gum, black tupelo, cotton gum, manzanillo, pepperidge, sour-gum, tupelo, upland tupelo

O

Oberna Adans. Caryophyllaceae

See *Species Plantarum* 1: 414. 1753, *Familles des Plantes* (Adanson) 2: 255, 583. 1763, *Verh. Naturf. Ver. Bruenn* xv. II. (1877) 130. 1877 and *Novosti Sist. Vyssh. (Whole plant applied for the treatment of skin diseases, eczema, scabies, eye troubles. Leaves emollient, cooked and eaten to reduce the blood pressure.)

in English: bladder campion

in India: ghandoli, jhunjunu, kurmuik chae, tomrya

Oberonia Lindley Orchidaceae

Named after Oberon, the mythical King of the Fairies, husband of Titania, in reference to the variable forms; see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 1: 319. 1809, John Lindley (1799–1865), *The Genera and species of Orchidaceous Plants*. 15. London 1830–1840.

Oberonia lycopodioides (J. König) Ormerod (*Cymbidium lycopodioides* (J. König) Willd.; *Epidendrum lycopodioides* J. König; *Iridorchis anceps* (Lindl.) Kuntze; *Malaxis anceps* (Lindl.) Rchb.f.; *Oberonia anceps* Lindl.; *Oberonia ancipita* Náves; *Oberonia griffithii* Wight; *Oberonia imbricata* Wight, nom. illeg.; *Oberonia imbricatiflora* J.J. Sm.)

Vietnam, SE Asia, Burma.

See *Observationes Botanicae* 6: 55. 1791, *Sp. Pl.* 4: 98. 1805, *Sertum Orchidaceum* sub t. 8 B. 1838, *Icon. Pl. Ind. Orient.* 5: t. 1629. 1851, *Ann. Bot. Syst.* 6: 214. 1861, *Fl. Filip.*, ed. 3, 13A: 230. 1880, *Revisio Generum Plantarum* 2: 669. 1891 and *Bull. Jard. Bot. Buitenzorg*, II, 13: 5. 1914, *Opera Bot.* 124: 21. 1995

(Whole plant crushed and used as a poultice for boils; leaves used for poulticing.)

Malayan name: sakat lidah buaya

Oberonia wightiana Lindl. (*Iridorchis wightiana* (Lindl.) Kuntze; *Iridorkis wightiana* (Lindl.) Kuntze; *Malaxis wightiana* (Lindl.) Rchb. f.; *Oberonia arnottiana* Wight; *Oberonia stachyoides* A. Rich.; *Oberonia wightiana* var. *arnottiana* (Wight) R. Ansari, N.C. Nair & V.J. Nair; *Oberonia wightiana* var. *nilgirensis* R. Ansari, N.C. Nair & V.J. Nair)

India, Sri Lanka. Epiphyte

See *Edwards's Bot. Reg.* 25(Misc.): 14. 1839, *Ann. Sci. Nat., Bot.*, II, 15: 15. 1841, *Icones Plantarum Indiae Orientalis* 5: t. 1628. 1851, *Ann. Bot. Syst.* 6: 212. 1861, *Revisio Generum Plantarum* 2: 669. 1891 and *Annales Botanices Systematicae* 6: 212. 1961, *Journal of Economic and Taxonomic Botany* 3: 118. 1982, *Cell Chromosome Res.* 17(1): 40–47. 1994

(Leaves crushed with calcium, salt and turmeric, the paste applied and tied with bandage for external swellings.)

in India: badanika

Obolaria L. Gentianaceae

From the Greek *obolos* 'obol', Latin *obolus* 'a small Greek coin, an obol', referring to the shape of the fruits, see *Species Plantarum* 2: 632. 1753.

Obolaria virginica L.

North America. Perennial herb

See *Species Plantarum* 2: 632. 1753 and *Rhodora* 61: 61. 1959

(Used for colds, cough, colic, abdominal pain, stomach-ache, menstrual pains, eye disease, headache, high fever and diarrhea.)

in English: pennywort, Virginia pennywort

Ochanostachys Mast. Olacaceae

From the Greek *ochanon* 'holder of a shield, a bar or band fastened crosswise' and *stachys* 'a spike', see *The Flora of British India* 1: 576. 1875.

Ochanostachys amentacea Mast.

SE Asia, Malaysia. Canopy tree, wood very hard and durable, fluted buttressed bole, greenish bisexual flowers in narrow axillary racemes, black drupes with a thin flesh

See *The Flora of British India* 1: 576. 1875 and *J. Nat. Prod.* 64: 246. 2001

(Febrifuge, cytotoxic, bark infusion or decoction for bathing the body after childbirth and to reduce fever.)

Malayan names: mentatai, petaling, petaling bukit, petaling misu, petikal

Ochlandra Thwaites Poaceae (Gramineae)

From the Greek *ochlos* 'crowd, mass' and *aner, andros* 'man, stamen, male', see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, George Henry Kendrick Thwaites (1812–1882) and Joseph Dalton Hooker (1817–1911) [Collaborator: William Ferguson, 1820–1887], *Enumeratio plantarum zeylanicae*: an enumeration of Ceylon plants.

5: 376. London [1858–] 1864, *Transactions of the Linnean Society of London* 26: 144. 1868, *The Flora Sylvatica for Southern India* 239, t. 234. Madras [1869–1874], *Annals of the Royal Botanic Garden, Calcutta*. 7: 125. 1896 and *Bull. de la Société Linnéenne de Lyon* 9: 185–188. 1945, *Taxon* 6(7): 201. 1957, *Agriculture Handbook* 193: i–iii, 1–74. 1961, *Smithson. (Poaceae-Bambusoideae.)" *Rheedea* 5(1): 63–89. 1995, *Flora Reipublicae Popularis Sinicae* 9(1): 1–761. 1996, *Contributions from the United States National Herbarium* 39: 35, 64, 81–82. 2000, *Botanical Journal of the Linnean Society* 138(1): 1–7. Jan 2002, *New Phytologist* 162(1): 25–44. Apr 2004, *Forest Pathology* 34(5): 329–333. Oct 2004.

Ochlandra scriptoria (Dennst.) Fisch. (*Bambusa scriptoria* Dennst.; *Beesha rheedii* Kunth; *Beesha rheedii* Munro; *Bheesa rheedii* Kunth; *Melocanna rheedii* Steudel; *Ochlandra rheedii* (Kunth) Benth. and Hook.f. ex Gamble; *Ochlandra scriptoria* Fischer) (for the Dutch botanist Hendrik (Henricum, Henricus, Henric) Adriaan (Adrien) van Rheede (Reede) tot Draakestein (Draakensteen, Drakestein, Drakenstein) (Rheedius a Drackenstein), 1637–1691)

India, Kerala, Karnataka. Shrubby, gregarious, erect, smooth, leaves linear-lanceolate, culm sheaths with 2 small falcate long-ciliate auricles fringed with deciduous bristles, inflorescence terminal or axillary on leafy branchlets, 2–3 glumes mucronate, paleas mucronate, many glabrous lodicules, 15–18 or more stamens, ovary oblong, 3 plumose stigmas, flowers sporadically each year, suitable for pulp and paper industry, used for making mats and baskets, useful for erosion control and as a soil binder, small culms for making flutes, planted along margins of ponds, on the river banks

See August Wilhelm Dennstedt (1776–1826), *Schlüssel zum Hortus indicus malabaricus*, ... 31. Weimar 1818, *Révision des Graminées* 1: 141. 1829, *Enum. Pl.* 2: 434. 1833, *Synopsis Plantarum Glumacearum* 1: 332. 1854, *Transactions of the Linnean Society of London* 26(1): 144. 1868, *Annals of the Royal Botanic Garden, Calcutta*. 7: 121, 122. 1896 and *Flora of the Presidency of Madras* 10: 1863. 1934, *Kew Bull.* 149. 1935, *Taxon* 6(7): 201. 1957, *Rheedea* 5(1): 70, fig. 3. 1995

(Religious and supernatural beliefs.)

in India: amma, ammei, ammei ottal, amnei, ampu, beesha, bheesa, chitthu, hodake, hode, huda, kolanji, kolanni, maietta, nanyura, oda, odai, ottal, vaate, vanta nalagi, vishamula, wate amme

Ochlandra travancorica (Bedd.) Benth. ex Gamble (*Beesha travancorica* Bedd.; *Bheesa travancorica* Bedd.; *Melocanna travancorica* Muell.; *Ochlandra travancorica* (Bedd.) Benth.; *Ochlandra travancorica* Benth.; *Ochlandra travancorica* Benth. ex Gamble)

India. Arborescent or shrubby, erect, reed-like, gregarious, nodes swollen, thin walls, culm sheaths wrinkled,

inflorescence subverticillate, spicate panicle, large fertile spikelets, 5–6 plumose stigmas, used for *hookah* pipes and as a fuel, raw material mainly for paper manufacture, leaves used for thatching, small culms for making flutes, fodder for horses during scarcity, leaves eaten by elephants, useful for erosion control and as a soil binder, planted along margins of ponds, moist areas, rich loamy soil, banks of streams, lower slopes, undergrowth in evergreen and semi-evergreen forests

See Sir Ferdinand Jacob Heinrich von Mueller (1825–1896), *Select Plants* (exclusive of timber trees) readily eligible for Victorian industrial culture, with indication of their native countries and some of their uses. Melbourne 1872, *Flora Sylvatica for Southern India* 239, t. 234. 1873, William Robert Guilfoyle (1840–1912), *Fibres from plants, indigenous and introduced, eligible for industrial culture and experiment in Victoria*. [Department of Agriculture, Victoria.] Melbourne 1894, *Annals of the Royal Botanic Garden, Calcutta*. 7: 125, 126. 1896 and *Rheedea* 4(1): 28, fig. 3. 1994, *Rheedea* 5(1): 82, 85, fig. 8, 9. 1995

(Used in Sidha. Poulticed for skin diseases, eczema, sprain, swellings.)

in English: elephant bamboo, elephant grass, reed bamboo

in India: eatha, eera kalli, eera katti, eerakalli, eeral, eetha, eetta, era, erakatti, eral, etta, garte, hodake, hode, ila kalli, iral, ircca, irttal, irttagalli, irul, ita, ita-kalli, itakalli, itam, kaarirttal, kagamungil, kar-eetta, kar-etta, kareeta, karircca, nanal, oda, odai, ootai, ote, othe, vei, velam, vennanku, wote

Ochna L. Ochnaceae

Greek *ochne* ‘wild pear, a pear tree, a pear’, Homer used this name for the wild pear tree, see also Theophrastus (*HP*. 2.5.6); see Carl Linnaeus, *Species Plantarum*. 1: 513. 1753 and *Genera Plantarum*. Ed. 5. 229. 1754, *Nouveau Bulletin des Sciences*, publié par la Société Philomatique de Paris 2: 209. 1811, *Beiträge zur Botanik* 2: 24. 1825 and *Journal de Botanique* (Morot) 16: 118, 125. 1902, *Ann. Sci. Nat.*, sér. 8, 16: 196, 350. 1902, *Fl. Madag.* 133: 22. 1950, *Novon* 2(3): 239. 1992, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(2): 1596–1600. 2001.

Ochna holstii Engl. (the specific name honors the German gardener and plant collector Carl H.E.W. Holst, 1865–1894, traveller in East Africa.)

East Africa. Deciduous tree or shrub, bushy tree, rough bark, straight cylindrical bole, hard and tough wood, branchlets dotted, alternate shiny leaves, yellow flowers, soft fruit enclosed by brown bracts, forest, in woodland areas

See *Die Pflanzenwelt Ost-Afrikas* C: 273. 1895

(Febrifuge, astringent, cathartic.)

in English: forest ochna, real red pear, red ironwood

in East Africa: m'muaga, mtakula, mundugiti, mungirima, mutandi, takula

in Southern Africa: rooiysterhout, regterrooipeer; isiBhanku (Zulu); tshipfure (Venda)

in Tanzania: kitakuwa, mkazi, nyalukwale

Ochna integerrima (Lour.) Merr. (*Elaeocarpus integerrimus* Lour.; *Ochna harmandii* Lecomte)

India, China. Undershrubs or shrubs, treelet, bright yellow flowers

See *Flora Cochinchinensis* 1: 338. 1790 and *Flore Générale de l'Indo-Chine* 1: 706, pl. 75, f. 1–5. 1911, *Trans. Amer. Phil. Soc.*, n.s., 24(2): 11, 265–266. 1935

(Bark and fruit crushed and mixed with water, the filtered mixture given in blood dysentery. Roots for malaria, bronchitis, cholera, dysentery, diarrhea. The root can be used as a cathartic for worms and as a medicine for lymphatic disorders.)

in China: jin lian mu

in India: khemda, khemda-veng

Ochna jabotapita L. (*Ochna jabotapitta* Vell.; *Ouratea jabotapita* Tiegh.)

India, Caribbean. Small evergreen tree, yellow flowers

See *Species Plantarum* 1: 513. 1753, *Fl. Flumin.* 223. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 5: t. 90. 1831. [1827 publ. 29 Oct 1831] and *Ann. Sci. Nat., Bot.* ser. 8, 16: 256. 1902, *Taxon* 11: 49. 1962

(Bark digestive, tonic. Roots given in asthma, menstrual disorders, as antidote to snakebite.)

in India: chilanti, sherundi

Ochna mossambicensis Klotzsch

Tropical Africa.

See *Naturwissenschaftliche Reise nach Mossambique ...* 6(1): 88, t. 16. 1862[1861]

(Roots decoction taken for stomachache. Bark paste applied to the wounds, ulcers.)

in Tanzania: mlanyuki

Ochna obtusata DC.

India. Deciduous shrub

See *Annales du Museum National d'Histoire Naturelle*. Paris 17: 411. 1811, *Prodr. Fl. Nepal.* 224. 1825 and *Fl. Bilaspur District* 1: 156. 1989

(Bark extract mixed with water given for dysentery; stem bark paste applied on boils. Root and bark digestive, astringent, tonic, for asthma, diarrhea, menstrual disorders; crushed roots extract given for dysmenorrhea. For snakebite, root infusion drunk.)

in India: bhuichampa, champa baha, raktharohidi, simalkanta

Ochna obtusata DC. subsp. *pumila* (Buch.-Ham. ex DC.) Panigrahi & Murti

India.

See *Fl. Bilaspur District* 1: 156. 1989

(Paste of root rubbed for body pain; taken orally in measles, diarrhea, dysentery and menstrual complaints.)

in India: bhui kumbhi, champa, ote champa

Ochna obtusata DC. var. *pumila* (Buch.-Ham. ex DC.) Kanis

India.

See *Prodr. Fl. Nepal*. 224. 1825 and *Fl. Bilaspur District* 1: 156. 1989

(Fresh root chewed in asthma, taken orally in diarrhea, dysentery.)

in India: bhui kumbhi, champa

Ochna pulchra Hook. (*Diporidium pulchrum* (Hook.) Walp.; *Ochna antunesii* Engl. & Gilg; *Ochna aschersoniana* Schinz; *Ochna brunnescens* Engl. & Gilg; *Ochna fuscescens* Heine; *Ochna hoffmannii-ottonis* Engl.; *Ochna huillensis* (Tiegh.) Exell; *Ochna pulchra* fo. *integra* Suesseng.; *Ochna quangensis* Büttner; *Ochna rehmannii* Szyszyl.; *Polythecium pulchrum* (Hook.) Tiegh.; *Polythecium rehmannii* (Szyszyl.) Tiegh.; *Porochna antunesii* Tiegh.; *Porochna aschersoniana* (Schinz) Tiegh.; *Porochna bifolia* Tiegh.; *Porochna brunne-scens* Tiegh.; *Porochna davilliflora* Tiegh.; *Porochna hoffmannii-ottonis* (Engl.) Tiegh.; *Porochna huillensis* Tiegh.; *Porochna quangensis* (Büttner) Tiegh.)

Tropical Africa. Small tree, fruits black-blue

See *Species Plantarum* 1: 513. 1753, *Icones Plantarum* 6: t. 588. 1843, *Repertorium Botanices Systematicae*. 4: 378. 1847

(Roots used for gangrenous rectitis.)

in English: beautiful ochna, peeling-bark ochna, peeling plane, wild pear, wild plum

in N. Rhodesia: kachale, musang'u

in Southern Africa: lekkerbreek (this name refers to the brittleness of the branches), skilferbas, pypsteel, pypsteelhout, morsaf, mansaf, Barnardsgif, seerbas, seerbos, seermak (probably from siermaak = bringing good cheer), slegbreek, vervelbas; nzololo (Tsonga); monyelenyele (Tswana: Western Transvaal, northern Cape, Botswana); monamane, mopha (North Sotho); musuma, tshithothonya (Venda); mozwe (Mbukushu: Okavango Swamps and western Caprivi); ujue (Samui); omu (Ovambo); muChedza, muChoa, muMinu, muNino, muNinu, muNzeremanga, muParamoswa, muParamota, murezeremanga, muSonzoa, muSwaswari (Shona)

Ochna pumila Buch.-Ham. ex D. Don

Ochrocarpos Noronha ex Thouars Clusiaceae (Guttiferae)

India, Nepal.

See *Prodr. Fl. Nepal*. 224. 1825 and *Fl. Bilaspur District* 1: 156. 1989

(Root used in snakebite, diarrhea, dysentery. Paste of root rubbed for body pain.)

in India: bhui kumbhi, champa, keda, ote champa

Ochna serrulata (Hochst.) Walp. (*Diporidium serrulata* Hochst.; *Ochna atropurpurea* sensu Harv. non DC.; *Ochna atropurpurea* DC.; *Ochna serrulata* Walp.)

South Africa. Small shrub or a small tree, slender, fragrant yellow flowers, shiny black and berry-like fruits suspended below bright-red persistent sepals

See *American Association for the Advancement of Science: Annual Meeting* [Program and Abstract] xvii: 412. 1811

(A roots decoction to treat children suffering from bone diseases or gangrenous rectitis.)

in English: bird's eye bush, carnival bush, Mickey Mouse bush, Mickey Mouse plant, small-leaved plane

in Southern Africa: fynblaarrooihout, rooihout; umBovu (Zulu); iLitiye (= stone) (Xhosa)

Ochrocarpos Noronha ex Thouars Clusiaceae (Guttiferae)

From the Greek *ochros* 'pale yellow, pale, wan, paleness' and *karpos* 'fruit', referring to the colour of the fruits, see *Species Plantarum* 1: 443–444. 1753, *Genera Nova Madagascariensia* 15. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 560. 1824 and *Novon* 18(4): 524–537. 2008.

Ochrocarpos africana (Sabine) Oliv. (*Mammea africana* Sabine; *Ochrocarpus africanus* (Sabine) Oliv.)

Tropical Africa.

See *Species Plantarum* 1: 512–513. 1753, *Transactions of the Horticultural Society of London* 5: 457. 1824, *A General History of the Dichlamydeous Plants* 1: 619. 1831, *Flora of Tropical Africa* [Oliver et al.] 1: 169. 1868 and *Bull. Jard. Bot. État Bruxelles* 4: 168–169. 1914, *Fl. W. Trop. Afr.* [Hutchinson & Dalziel] i. 237. 1927, *Kew Bulletin* 1928, 228. 1928, *Annals of Tropical Medicine and Parasitology* 98(7): 733–739. 2004, *African Journal of Biomedical Research* 9(2): 129–132. 2006, *Journal of Ethnopharmacology* 111(2): 329–334. 2007

(Fruits, leaves and bark for fevers, venereal diseases, skin infections, diarrhea, bronchitis. Bark decoction anthelmintic, antibacterial, cytotoxic, vasodilator, stomachic, febrifuge, taken to treat gonorrhoea, ovarian troubles, coughs, anemia, and to ease childbirth; applied to treat wounds, sores, ulcers, scabies, skin diseases, itch, fever, rheumatism, uterine and vaginal inflammations.)

Ochrocarpos longifolius Benth. & Hook.f. ex T. Anderson

India.

See *Fl. Brit. India* [J.D. Hooker] 1: 270. 1874

(Ceremonial, ritual, ingredient of Patra pooja in different religious pooja ceremonies.)

in India: punnag, surangi

Ochrosia A.L. Juss. Apocynaceae

From the Greek *ochros*, *ochra* 'pale yellow, yellow ochre', referring to the flowers or to the fruit colour or to the yellow colour of the timber; see A.L. de Jussieu, *Genera Plantarum*. pl. 144. 1789.

Ochrosia coccinea (Teijsmann & Binnendijk) Miquel (*Bleekeria coccinea* (Teijsmann & Binnendijk) Koidzumi; *Bleekeria coccinea* Koidz.; *Excavatia coccinea* Markgr.; *Excavatia coccinea* (Teijsmann & Binnendijk) Markgr.; *Excavatia coccinea* var. *pekelii* Markgr.; *Lactaria coccinea* Teijsmann & Binnendijk; *Ochrosia coccinea* Miq.; *Ochrosia coccinea* var. *pekelii* (Markgr.) Fosberg & Sachet)

New Guinea.

See *Tijdschr. Nederl. Ind.* xxix. (1867) 249. 1867, *Ann. Mus. Bot. Lugduno-Batavi* 4: 138. 1869 and *Bot. Mag.* (Tokyo) 37: 52. 1923, *Bot. Jahrb. Syst.* 61: 195. 1927, *Notizbl. Bot. Gart. Berlin-Dahlem* 10: 282. 1928, *Adansonia*, n.s., 17(1): 25. 1977

(Stomachic.)

in English: beautiful ochna, peeling-bark ochna, peeling plane, wild pear, wild plum

in N. Rhodesia: kachale, musang'u

in Southern Africa: Barnardsgif, lekkerbreek (this name refers to the brittleness of the branches), mansaf, morsaf, pypsteel, pypsteelhout, seerbas, seerbos, seermak (probably from siermaak = bringing good cheer), slegbreek, skilferbas, vervelbas; nzololo (Tsonga); monyelenyele (Tswana: Western Transvaal, northern Cape, Botswana); monamane, mopha (North Sotho); musuma, tshithothonya (Venda); mozwe (Mbukushu: Okavango Swamps and western Caprivi); ujue (Samui); omu (Ovambo); muChedza, muChoa, muMinu, muNino, muNinu, muNzeremanga, muParamoswa, muParamota, murezeremanga, muSonzoa, muSwaswarin China: guang e mei gui shu

Ochrosia mariannensis A. DC. (*Bleekeria mariannensis* (A. DC.) Koidz.; *Excavatia mariannensis* (A. DC.) Markgr.; *Lactaria mariannensis* (A. DC.) Kuntze)

Pacific, Marianas.

See *Prodr.* 8: 357. 1844, *Revis. Gen. Pl.* 2: 415. 1891 and *Bot. Mag.* (Tokyo) 37: 52. 1923, *Bot. Jahrb. Syst.* 61: 194. 1927

(Astringent, irritant.)

in Guam: langiti

Ochrosia oppositifolia (Lam.) K. Schum. (*Bleekeria salubris* (Rumph. ex Raf.) Hassk., nom. illeg.; *Bleekeria salubris* Hassk.; *Calpicarpum lamarckii* G. Don, nom. illeg.; *Calpicarpum oppositifolium* (Lam.) Boiteau; *Cerbera fruticosa* Roxb., nom. illeg.; *Cerbera muricata* Lam.; *Cerbera oppositifolia* Lam.; *Cerbera parviflora* G. Forst.; *Cerbera platyspermos* Gaertn.; *Cerbera salutaris* Lour., nom. superfl.; *Kopsia lamarckii* G. Don ex DC.; *Lactaria oppositifolia* (Lam.) Kuntze; *Lactaria salubris* Rumph. ex Raf., nom. illeg.; *Neisosperma muricatum* Raf., nom. illeg.; *Neisosperma oppositifolium* (Lam.) Fosberg & Sachet; *Ochrosia borbonica* Hook. f.; *Ochrosia commutata* K. Schum.; *Ochrosia cowleyi* F.M. Bailey; *Ochrosia parviflora* (G. Forst.) Hensl.; *Ochrosia parviflora* Hensl.; *Ochrosia parviflora* G. Don; *Ochrosia platyspermos* A. DC.; *Ochrosia platyspermos* (Gaertn.) A. DC.; *Ochrosia salubris* Blume; *Ochrosia salubris* (Rumph. ex Raf.) Blume, nom. illeg.)

Seychelles to Pacific. Small tree, white flowers in cymes, edible seeds

See *Gen. Hist.* 4: 99–100. [1837–1838], *Ann. Nat. Hist.* 1(5): 345. 1838, *Prodr.* (DC.) 8: 352, 356. 1844, *Mus. Bot.* 1(10): 158. 1850, *Nat. Pflanzenfam.* 4(2): 156. 1895 and *Adansonia* sér. 2, 14(3): 495. 1974

(Roots used as antidote for poisonous fish and crustaceous. Leaf extract of *Colubrina asiatica* and *Ochrosia oppositifolia* taken by women as emmenagogue, stomachic.)

in India: ma tak

in Pacific: fago

Ochthochloa Edgew. Poaceae (Gramineae)

From the Greek *ochthos* 'hill, tubercle, bank' and *chloe*, *chloa* 'grass', a segregate from *Brachyachloa* S.M. Phillips, see *Journal of the Asiatic Society of Bengal* 11: 26–27. 1842 and *Kew Bulletin* 36(3): 560. 1981 and 37: 158. 1982, *Annals of the Missouri Botanical Garden* 81(4): 784–791. 1994.

Ochthochloa compressa (Forssk.) Hilu (*Eleusine arabica* Hochst. ex Steud.; *Eleusine caespitosa* A. Rich.; *Eleusine compressa* (Forssk.) Asch. & Schweinf. ex C. Chr.; *Eleusine flagellifera* Nees; *Ochthochloa dactyloides* Edgew.; *Panicum compressum* Forssk.)

Africa, Arabia, Ethiopia. Perennial, wiry, hard, many-branched, stoloniferous, prostrate or ascending, creeping, bulb-like rooting nodes, useful for forage and hay, very good fodder both for horses and cattle, suitable for erosion control, saline soil, sandy beaches, sandy soils, plains

See *Flora Aegyptiaco-Arabica* 18. 1775, *Linnaea* 16(2): 220. 1842, *Journal of the Asiatic Society of Bengal* 11: 27. 1842, *Tentamen Florae Abyssinicae* ... 2: 412. 1850, *Synopsis Plantarum Glumacearum* 1: 211. 1854 and *Dansk Botanisk*

Arkiv 4(3): 12. 1922, *Kew Bulletin* 36(3): 560. 1981, *Journal of Cytology and Genetics* 21: 152–154. 1986

(Plant decoction taken for rheumatism.)

in India: bharu, chembri, chemri, chhembar, chhimbar, chhimber, chubrei, dubra, ganth dob, ganthia, ganthia ghas, ganthil, ghantil, ghatil, ghurdub, kharimbar

in Somalia: hari hari

Ocimum L. Lamiaceae (Labiatae)

From the ancient Greek name *okimon* used by Theophrastus (*HP*. 1.6.6) and Dioscorides and Galenus for an aromatic herb, basil, Latin *ocimum* ‘basil’ (Plinius), *ocinum* also *ocimum*, *ocymum* and *ozymum* for an herb which serves for fodder, perhaps a sort of clover (Plinius); see Yuhanna ibn Sarabiyun [Joannes Serapion], *Liber aggregatus in medicinis simplicibus*. Venetijs 1479, Carl Linnaeus, *Species Plantarum*. 2: 597–598. 1753 and *Genera Plantarum*. Ed. 5. 259. 1754, *Labiatarum Genera et Species* 3, 11–12. 1832, *Prodromus Systematis Naturalis Regni Vegetabilis* 12: 32, 34, 41. 1848, *Die Natürlichen Pflanzenfamilien* IV. 3a: 368. 1897 and V. Bertoldi, in *Archivio glottologico italiano*. XXI: 140–142. Torino and Firenze 1927, *Fieldiana, Bot.* 24(9/3): 237–317. 1973, Franco Montanari, *Vocabolario della Lingua Greca*. 2284. Loescher Editore, Torino 1995, Paton, Alan James (1963–), *Ocimum: An Overview of Classification and Relationships*/Alan Paton, M.R. Harley and M.M. Harley. Amsterdam, Netherlands: Harwood Academic, 1999 [Extract from: *Basil: The Genus Ocimum*/edited by Raimo Hiltunen and Yvonne Holm.], Hiltunen, Raimo, *Basil: The Genus Ocimum* edited by Raimo Hiltunen and Yvonne Holm. Amsterdam, Netherlands: Harwood Academic, 1999, Mabberley, D.J. & De Kok, R.P.J. *Labiatae. Flore de la Nouvelle-Calédonie et Dépendances* 25: 20–141. Muséum National d’Histoire Naturelle, Paris. 2004.

Ocimum americanum L. (*Ocimum africanum* Loureiro; *Ocimum album* Roxb.; *Ocimum americanum* Hutch. & Dalziel; *Ocimum brachiatum* Blume; *Ocimum canum* Sims; *Ocimum canum* var. *integrifolium* Engl.; *Ocimum dichotomum* Hochst. ex Benth.; *Ocimum dinteri* Briq.; *Ocimum fluminense* Vell.; *Ocimum fruticosum* Burch.; *Ocimum hispidulum* Schumach. & Thonn.; *Ocimum incanescens* Mart.; *Ocimum petitianum* A. Rich.; *Ocimum stamineum* Sims; *Ocimum thymoides* Baker)

Trop. & Subtrop. Old World. Herb, small bushy aromatic plant, woody-based, leaves grey-green with pleasant aroma, calyx and bracts green tinged reddish, corolla greenish-white, stigma and style purple, fruiting calyx pale brown, put in new hive to attract bees

See *Species Plantarum* 2: 597–598. 1753, *Centuria I. Plantarum ...* 15–16. 1755, *Amoenitates academicae ...* 4: 276–277. 1755, *Flora Cochinchinensis* 2: 370–371. 1790,

Botanical Magazine 51: t. 2452. 1824 and *Flora of West Tropical Africa* ed. 1 2: 285. 1931

(Used in Ayurveda and Sidha. Herb infusion carminative, astringent, antiseptic, respiratory stimulant, for indigestion, cough, diarrhea; herb juice for dysentery. Seeds given for jaundice, burning micturition and respiratory diseases. Leaves made into a paste used for skin diseases and *Herpes zoster*; leaves eaten as purgative; leaves decoction as a postpartum remedy; leaves for the treatment of fevers, dysentery and to relieve toothache; sap from the leaves dripped into ears to relieve earache. Whole plant antifungal, mosquito and insect repellent. Veterinary medicine, leaf juice mixed with water used for washing the sores of cattle; crushed plant given for treating cough. Magico-religious beliefs, auspicious, talisman.)

in English: American basil, common basil, hoary basil, lemon basil, mint, peppermint, sweet basil

in China: hui luo he

(Used in Sidha. Leaf juice given in malaria.)

in English: sweet basil

in China: shu rou mao bian zhong

in India: babestul, barbar, cunaikkarantai, kiruttina parani, takamariya

Oclemena Greene Asteraceae

See *Leaflets of botanical observation and criticism* 1(1): 4–5. 1903.

Oclemena nemoralis (Aiton) Greene (*Aster nemoralis* Aiton; *Aster nemoralis* Sol. ex Aiton; *Aster nemoralis* forma *albiflorus* Fernald; *Eucephalus nemoralis* (Sol. ex Aiton) Greene; *Eucephalus nemoralis* (Aiton) Greene; *Galatella nemoralis* (Sol. ex Aiton) Nees; *Galatella nemoralis* (Aiton) Nees)

North America. Herb, small, slender, creeping rootstalk, leaves with inrolled margins, single flower head at the top of the stem, ray florets light violet-purple or pale to deep pink, disk florets yellow becoming purple at maturity, in fens, bogs or boggy areas, lake margins, marshes

See *Hortus Kewensis*; or, a catalogue ... 3: 198. 1789, *Genera et Species Asterearum* 173. 1832, *Pittonia* 3(14B): 57. 1896 and *Leaflets of botanical observation and criticism* 1(1): 5. 1903

(Plant decoction dropped into the ear or applied on a warm cloth for soreness in the ear; roots decoction used as drops for sore ear.)

in English: bog aster, leafy bog aster, nodding bog aster, wood aster

Ocotea Aublet Lauraceae

Based on the native name in French Guiana, the Garipons called *Ocotea guianensis* Aublet *aiou-hou-ha*, see *Histoire des plantes de la Guiane Française* 2: 781, t. 310. 1775, *Caracteres Generum Plantarum* [second edition] 7. 1775, *Voyage aux Indes Orientales* 2: 226 and 3: 248. 1782, *Genera Plantarum* 431. 1789, *De Fructibus et Seminibus Plantarum* ... 2: 100. 1790, *Linnaea* 8: 39–40, 45. 1833, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 99. 1864, *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 5: 310. 1889 and *Fieldiana, Bot.* 24(4): 302–344. 1946, *J. Sci. Res.* (Jakarta) 1: 117. 1952.

Ocotea bullata (Burchell) E. Meyer (*Laurus bullata* Burch.; *Ocotea bullata* (Burch.) Baillon; *Ocotea bullata* E. Mey. ex Meissner; *Oreodaphne bullata* (Burch.) Nees)

South Africa. Tree

See *Species Plantarum* 1: 369. 1753, *Histoire des plantes de la Guiane Française* 2: 781, t. 310. 1775, *Travels in the interior of South Africa* 1: 72. 1822, *Linnaea* 8: 39. 1833, *Systema Laurinarum* 449. 1836, *Flora* 26: 205. 1843, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 118. 1864 and *Phytochemistry Reviews* 4(1): 39–46. 2005

(Used against inflammation, cyclooxygenase inhibiting activity. Bark for urinary complaints.)

in English: African acorn, blank stinkwood, bubbled ocotea, Cape laurel, Cape olive, knobbed ocotea, laurel wood, stinkwood

in Southern Africa: laurelhout, stinkhout, swartstinkhout; umHlungulu, umNukani, umNukane (Xhosa); umNukani, umNukane, uNukani (Zulu)

Ocotea glaziovii Mez

South America.

See *Jahrbuch des Königlichen Botanischen Gartens und des Botanischen Museums zu Berlin* 5: 281. 1889

(Anti-depressant.)

in English: yellow cinnamon

Ocotea guianensis Aubl. (*Oreodaphne guianensis* (Aubl.) Nees; *Oreodaphne guianensis* Nees; *Oreodaphne guianensis* var. *aurea* Meisn.)

French Guiana.

See *Histoire des plantes de la Guiane Française* 2: 781, t. 310. 1775, *Linnaea* 21: 516. 1848, *Prodromus Systematis Naturalis Regni Vegetabilis* 15(1): 337. 1864 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 819–931. 1938, *Mus. Nac. Hist. Nat. (Bolivia) Com.* 10: 32–52. 1990

(Leaves antiseptic. Oil from the fruits used for rheumatism. Bark antiseptic, for abscesses.)

in French Guiana: ajouhona, ajouva

in Peru: macaa, quinilla amarilla

Octamyrtus Diels Myrtaceae

Probably from the Greek *okto* ‘eight’ plus *Myrtus*.

Octamyrtus behrmannii Diels

New Guinea.

See *Bot. Jahrb. Syst.* lvii. 376. 1922

(Young shoots mixed with water and drunk, a cure for tuberculosis.)

in Papua New Guinea: kokorabegisi

Octamyrtus pleiopetala Diels (*Eugenia pleiopetala* F. Muell.; *Octamyrtus lanceolata* C.T. White)

New Guinea. Small tree, in montane forest, disturbed areas

See *Bot. Jahrb. Syst.* lvii. 373. 1922, *J. Arnold Arbor.* 32: 145. 1951

(Bark to cure colds, sore throat, fever, and upset stomach.)

in Papua New Guinea: womnawa

Octolepis Oliver Thymelaeaceae

Greek *okto* ‘eight’ and *lepis*, *lepidos* ‘scale’, in reference to the petals, see *Journal of the Linnean Society, Botany* 8: 161, pl. 12 [*Octolepis*, f. 1–6]. 1864 [1865 publ. 1864], *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 619–620. 1886, *Bull. Mens. Soc. Linn. Paris* 2: 947. 1891 and *Adansonia*: recueil périodique d’observations botanique, n.s. 3(1): 138–140, pl. 2 (f. 1–10). 1963, *Fl. Gabon* 11: 35–95. 1966, *Adansonia*, sér. 3 27(1): 89–111. 2005.

Octolepis casearia Oliv. (*Makokoa congolana* Baill.; *Octolepis congolana* (Baill.) Warb.; *Octolepis dinklagei* Gilg; *Octolepis macrophylla* Gilg; *Octolepis nodosericea* Gilg; *Octolepis pierreana* Gilg)

Tropical Africa.

See *Journal of the Linnean Society, Botany* 8: 161, pl. 12. 1864 [1865 publ. 1864], *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 619–620. 1886, *Bull. Mens. Soc. Linn. Paris* 2: 947. 1891, *Die Natürlichen Pflanzenfamilien* 3(6a): 56. 1893, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 28(1): 143–145. 1899 and *Die Vegetation der Erde* 9: 628. 1921, *Fl. Gabon* 11: 46. 1966, *Adansonia*, sér. 3, 27: 98. 2005

(Leaves for rheumatism, earache.)

Odontadenia Benth. Apocynaceae

Greek *odous*, *odontos* ‘tooth, anything pointed or sharp’ and *aden* ‘gland’, referring to the pistil, see *Journal of Botany*, being a second series of the Botanical Miscellany (Hooker) 3: 242–243. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 8: 395. 1844, *L’illustration horticole* 2: Misc. 9–10. 1855, *Flora Brasiliensis* 6(1): 118. 1860, *On the Apocynaceae of South America* 173, 180, 182–183, t. 28. 1878 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 80, f. 2 A-E. 1924, *Field Museum of Natural History, Botanical Series* 11(1): 35. 1931, *Annals of the Missouri Botanical Garden* 19(4): 386. 1932, *Flora of Suriname* 4(1): 53. 1932, *Bulletin of the Torrey Botanical Club* 60(6): 392. 1933, *Annals of the Missouri Botanical Garden* 22(2): 271, 295–296, 299, 305. 1935, *Ann. Missouri Bot. Gard.* 23: 193. 1936, *Bulletin du Muséum d’Histoire Naturelle*, sér. 2 20: 301. 1948, *Mémoires du Muséum National d’Histoire Naturelle. Nouvelle Série. Série B, Botanique* 1: 89–90. 1950, *Bull. Jard. Bot. Belg.* 67(1–4): 381–477. 1999, *Monogr. Syst. Bot. Missouri Bot. Gard.* 85(1): 116–132. 2001, *Darwiniana* 43(1–4): 90–191. 2005, *Darwiniana* 47(1): 140–184. 2009.

(Sap mixed into foodstuffs used for poisoning nuisance animals.)

Oenanthe L. Apiaceae (Umbelliferae)

Greek *oinos*, *oenos* 'wine' and *anthos* 'flower', a plant smelling of wine; see Carl Linnaeus, *Species Plantarum*. 1: 254–255, 259. 1753, *Genera Plantarum*. Ed. 5. 122. 1754, *Prodr.* (DC.) 4: 140. 1830 and *Kew Bull.* 38(2): 314. 1983, *Clin. Toxicol.* (Philadelphia, Pa.) 47(4): 270–278. 2009, *Clin. Toxicol.* (Philadelphia, Pa.) 49(3): 142–149. 2011.

Oenanthe benghalensis (Roxb.) Benth. & Hook.f. (*Dasylooma benghalense* (Roxburgh) DC.; *Dasylooma benghalense* DC.; *Dasylooma glaucum* DC.; *Oenanthe benghalensis* Kurz; *Oenanthe benghalensis* (Roxb.) Kurz; *Oenanthe benghalensis* Benth. & Hook.f.; *Seseli bengalense* Roxb.; *Seseli benghalense* Roxburgh; *Seseli benghalensis* Roxb.)

India. Very similar to, and possibly not distinct from, *Oenanthe javanica*, the two differ in umbel and fruit characters

See *Species Plantarum* 1: 254–255, 259. 1753, *Hortus Bengalensis*, or a catalogue ... 22. 1814, *Prodr.* (DC.) 4: 140.

1830, *Genera Plantarum* [Bentham & Hooker f.] 1(3): 906. 1867, *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 46(2): 115. 1877 and *Genetica* 56: 205–211. 1981

(For skin diseases.)

in China: duan fu shui qin

Oenanthe crocata L. (*Oenanthe crocata* Kit.)

Europe.

See *Species Plantarum* 1: 254–255. 1753 and *Boletim da Sociedade Broteriana*, ser. 2 48: 171–186. 1974, *Lagascalina* 6: 23–32. 1976, *Boletim da Sociedade Broteriana*, ser. 2 52: 69–77. 1978, *Anales del Jardín Botánico de Madrid* 49: 95. 1991, *Watsonia* 19: 134–137. 1992, *Watsonia* 19: 269–271. 1993, *Arch. Pediatr.* 15(2): 139–141. 2008

(One of the most poisonous of European plants.)

Oenanthe javanica (Blume) DC. (*Dasylooma javanicum* (Blume) Miquel; *Dasylooma javanicum* Miq.; *Falcaria javanica* (Blume) DC.; *Falcaria javanica* DC.; *Oenanthe decumbens* Koso-Pol.; *Oenanthe javanica* DC.; *Oenanthe stolonifera* (Roxb.) DC.; *Oenanthe stolonifera* (Roxb.) Wall. ex DC.; *Oenanthe stolonifera* Wall.; *Oenanthe stolonifera* var. *javanica* (Blume) Kuntze; *Phellandrium stoloniferum* Roxb.; *Sium javanicum* Blume)

Asia, Papua New Guinea. Perennial herb or vine, creeping, hollow, aggressive, often aquatic, erect or ascending, many-branched, stalks narrow, flowers white, strong odor of celery, leaf morphology particularly variable, young shoots and leaves edible, the complex nomenclatural history reflects the taxonomic problems with these morphologically very variable plants

See *Species Plantarum* 1: 251–252, 254–255. 1753, *Hortus Bengalensis*, or a catalogue ... 21. 1814, *Bijdragen tot de flora van Nederlandsch Indië* 15: 881. 1826, *Numer. List* [Wallich] n. 585 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 110, 138. 1830 and *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 130. 1915, *Acta Phytotax. Geobot.* 25(4–6): 105. 1973, *CIS Chromosome Information Service* 20: 32–33. 1976, *Taxon* 29: 543. 1980, *Journal of Hokkaido University of Education: Section IIB* 31: 19–23. 1980, *Plant Systematics and Evolution* 154: 11–30. 1986, *Journal of Plant Biology* 39: 15–22. 1996, *Journal of Phytogeography and Taxonomy* 46: 161–166. 1998

(Analgesic, antifungal, hypoglycemic. Plant used as an antidote poison, and to cure headache; stem chewed and swallowed to treat cough. Shoots and leaves compose the dietary herb *shui qin* of traditional Chinese medicine. Leaves rubbed on the forehead to relieve headache; leaves chewed with wild ginger as a poison antidote. Magic.)

in English: Chinese celery, Indian pennywort, water celery, water dropwort

in China: shui qin, shui qin shu, shui chin, ku chin, chin tsai, shui ying, chu kuei

in Japan: seri, shiiriba

in Papua New Guinea: igundaurautu, takae

Oenanthe javanica (Blume) DC. subsp. ***javanica*** (Batalin) H. Hara (*Dasylooma javanicum* (Blume) Miquel; *Dasylooma javanicum* Miq.; *Dasylooma subbipinnatum* Miquel; *Falcaria javanica* DC.; *Falcaria javanica* (Blume) DC.; *Oenanthe decumbens* Koso-Poljansky; *Oenanthe javanica* DC.; *Oenanthe javanica* subsp. *stolonifera* (Roxburgh) Murata; *Oenanthe javanica* subsp. *stolonifera* (DC.) (For constipation.)

in China: xian ye shui qin

Oenanthe linearis Wall. ex DC. subsp. ***rivularis*** (Dunn) C.Y. Wu & F.T. Pu (*Oenanthe rivularis* Dunn)

China.

See *Species Plantarum* 1: 254–255. 1753 and *Journal of the Linnean Society, Botany* 35(247): 496. 1903, *Vascular Plants Hengduan Mts.* 1: 1332. 1993

(Stomachic, emetic.)

in China: meng zi shui qin

Oenanthe mildbraedii H. Wolff

East Africa. Herb, leaves twice pinnate, leaflets ovate

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 271. 1912

(Poisonous.)

Oenanthe palustris (Chiov.) Norman (*Oenanthe uhligii* (H. Wolff) C. Norman; *Peucedanum uhligii* H. Wolff; *Stephanorossia palustris* Chiov.)

East Africa, Ethiopia. Herb, straggling, semisucculent, leaves long stalked, leaflets elliptic, flowers fragrant, calyx cream, filaments pale green, anthers cream, no basal bracts, a ring of short bracts at base of each single umbel, in open areas, in swampy places

See *Species Plantarum* 1: 254–255. 1753 and *Annali di Botanica* 9(1): 65. 1911, *Journal of Botany, British and Foreign* 71: 135. 1933

(Extremely poisonous to stock; the green shoots particularly poisonous.)

in East Africa: murerema, ngirarubanda

Oenanthe phellandrium Lam. (*Oenanthe phellandrium* Nutt.)

Asia.

See *Fl. Franç.* (Lamarck) 3: 432. 1779 [publ. after 21 Mar 1779]

(To treat cough.)

Oenanthe procumbens (H. Wolff) Norman (*Volkensiella procumbens* H. Wolff)

East Africa. Herb, aromatic, bracts at base of ultimate umbels,

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 265. 1912, *Journal of Botany, British and Foreign* 70: 140. 1932

(Poisonous.)

Oenanthe sarmentosa C. Presl ex DC. (*Oenanthe sarmentosa* Nutt., nom. illeg.; *Oenanthe sarmentosa* Bol.)

North America. Perennial herb, food

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 4: 138. 1830, *A Flora of North America: containing ...* 1(4): 617. 1840

(Poisonous, highly toxic, emetic, laxative. Roots used as a purgative, cathartic, emetic; seeds and roots emetic. Ceremonial, purification.)

in English: water-celery, water parsely

Oenanthe thomsonii C.B. Clarke subsp. *stenophylla* (H. Boissieu) F.T. Pu (also *stenophyllum*) (*Oenanthe dielsii* H. Boissieu subsp. *stenophylla* (H. Boissieu) C.Y. Wu & F.T. Pu; *Oenanthe dielsii* var. *stenophylla* (H. Boissieu) H. Boissieu; *Oenanthe thomsonii* var. *stenophylla* H. Boissieu)

China.

See *Species Plantarum* 1: 254–255. 1753, *The Flora of British India* 2(6): 697. 1879 and *Bulletin de l'Herbier Boissier*, sér. 2, 3(10): 843. 1903, *Bulletin de l'Académie Internationale de Géographie, Botanique* 16(203): 184–185. 1906, *Vascular Plants of the Hengduan Mountains* 1: 1333. 1993, *Keys Vascular Pl. Wuling Mts.* 579. 1995, *Novon* 8: 71. 1998

(Emetic.)

in China: zhai ye shui qin, duo lie ye shui qin

Oenanthe thomsonii C.B. Clarke subsp. *thomsonii* (Batalin) H. Hara (*Oenanthe caudata* C. Norman)

China.

See *Species Plantarum* 1: 254–255. 1753, *The Flora of British India* 2(6): 697. 1879 and *Journal of Botany, British and Foreign* 67(5): 147. 1929)

(Emetic.)

(in China: duo lie ye shui qin)

Oenocarpus Martius Arecaceae (Palmae)

Greek *oinos*, *oenos* 'wine' and *karpos* 'fruit', wine palm, fruit an oil source, mesocarp fleshy and oily, from the mesocarp a creamy drink; see C. von Martius, *Historia Naturalis Palmarum*. 2(1): 21–22, 24. Munich 1823, *Linnaea* 28: 387. 1857 and *Gentes Herb.* 9: 269. 1963, M.J. Balick, "Systematics and Economic Botany of the *Oenocarpus-Jessenia* (Palmae) Complex." *Advances in Economic Botany*. 3: 114. The New York Botanical Garden. 1986, Govaerts, R. & Dransfield, J. *World Checklist of Palms*. The Board of Trustees of the Royal Botanic Gardens, Kew. 2005.

Oenocarpus bacaba Mart. (*Areca bacaba* Arruda, nom. nud.; *Oenocarpus bacaba* var. *bacaba*; *Oenocarpus bacaba* var. *grandis* (Burret) Wess. Boer; *Oenocarpus bacaba* var. *xanthocarpa* Trail; *Oenocarpus baccata* Cuervo Marquez; *Oenocarpus grandis* Burret; *Oenocarpus hoppii* Burret)

Tropical America, Colombia, Venezuela. Trunk solitary, mass of slender roots at base, pinnate leaves, subglobose fruits, dark purple epicarp, quite variable species

See *Hist. Nat. Palm.* 2: 24, t. 26, fig. 1–2. 1823 and *Notizbl. Bot. Gart. Berlin-Dahlem* 11: 1041. 1934, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 612. 1935, *Pittieria* 17: 131. 1988, *Field Guide Palms* 291. 1995

(Milk-like beverage from the ripe fruits taken as an important source of high quality proteins.)

Vernacular names: cupéri, seje pequeño

Oenocarpus bataua Mart. (*Jessenia bataua* (Mart.) Burret; *Jessenia bataua* subsp. *bataua*; *Jessenia bataua* subsp. *oligocarpa* (Griseb. & H. Wendl.) Balick; *Jessenia oligocarpa* Griseb. & H. Wendl.; *Jessenia polycarpa* H. Karst.; *Jessenia repanda* Engl.; *Jessenia weberbaueri* Burret; *Oenocarpus bataua* var. *oligocarpa* (Griseb. & H. Wendl.) A.J. Hend.; *Oenocarpus oligocarpa* (Griseb. & H. Wendl.) Wess. Boer; *Oenocarpus seje* Cuervo Marquez)

Trinidad, E. Panama to Trop. South America. Solitary trunk, stiff brown spines, pinnate leaves, ovoid purple-black fruits

See *Historia Naturalis Palmarum* 2(1): 21–22, 23–24, pl. 24–25, 26, f. 1–2. 1823, *Linnaea* 28: 387–388. 1857, *Flora of the British West Indian Islands* 516. 1864, *Linnaea* 33: 691, t. 3, f. 6. 1865 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(93): 300, 302–304, 840. 1928–1929, *Gentes Herb.* 9: 269. 1963, *Flora of Suriname* 5(1): 58. 1965, *Econ. Bot.* 35: 261–271. 1981, *Advances Econ. Bot.* 3: 126. 1986, *Field Guide to the Palms of the Americas* 1–352. 1995, *Botanica Acta* 110: 79–89. 1997, *Rapid Biological Inventories* 1: 1–79. 2000, *Flora de Palmeras de Bolivia* 1–262. 2004

(Milk-like beverage from the ripe fruits taken as an important source of high quality proteins. The fruits of *Aspidosperma megalocarpon* Muell. Arg., when reduced to ashes and mixed with oil of patabá from *Jessenia polycarpa* Karsten (*Oenocarpus bataua* Mart.), may be used to lighten dark skin. The long spines of *Jessenia bataua* are used for darts in blow pipes. Dried and powdered resinous bark of *Clusia opaca*, mixed with oil from this palm, applied to sprains and aching joints.)

in Brazil: pataúa

in Colombia: ataíto, oxáe, pevítsa

in Peru: chocolatera, hizaan, hungurahui, ingurabe, obaanjoro, sacumana, shega, sinami, ungurahuy, unguray

Oenocarpus mapora H. Karst. (*Oenocarpus dryanderæ* Burret; *Oenocarpus macrocalyx* Burret; *Oenocarpus mapora* subsp. *dryanderæ* (Burret) Balick; *Oenocarpus mapora* subsp. *mapora*; *Oenocarpus minor* Mart.; *Oenocarpus multicaulis* Spruce; *Oenocarpus panamanus* L.H. Bailey)

Tropical America. Trunk solitary to caespitose, slender straight stems, pinnate leaves, purple-black subglobose fruits

See *Historia Naturalis Palmarum* 2: 25–26, pl. 27 (part). 1823, *Linnaea* 28: 274. 1857, *Journal of the Linnean Society, Botany* 11: 142. 1869 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 865. 1933, *Gentes Herbarum*; occasional papers on the kind of plants 3(2): 71, f. 50–53. 1933, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 1043. 1934, *Advances Econ. Bot.* (Syst. & Econ. Bot. *Oenocarpus-Jessenia* (Palmae) Complex) 3: 110. 1986, *Monogr. Syst. Bot. Missouri Bot. Gard.* 92: 201–293. 2003

(Milk-like beverage from the ripe oily fruits taken as an important source of high quality proteins.)

Vernacular names: macopáji, seje pequeño

Oenothera L. Onagraceae

Greek name *oinotheris*, *oinotheras* (*oinos* ‘wine’ and *thera* ‘booty’) ‘wine catcher’, or from *onotheras* (*onos* ‘an ass’, *thera* ‘hunting’ or *ther* ‘wild beast, wild animal’); Latin *oenothera*, *ae* ‘a plant, whose juice may cause sleep’ (“*onothera*, sive *onear*, hilaritatem afferens in vino”, Plinius); see Carl Linnaeus, *Species Plantarum*. 1: 346–347. 1753, *Genera Plantarum*. Ed. 5. 163. 1754, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, Robin, C. C. (Charles-César), *Voyages dans l'Intérieur de la Louisiane* 3: 489. Paris, 1807, *Florula ludoviciana*: or, A flora of the state of Louisiana/Tr., rev., and improved from the French of C.C. Robin, by C.S. Rafinesque ... New York: C. Wiley & co., 1817, *Prodr.* (DC.) 3: 46. 1828, *Fl. N. Amer.* (Torr. & A. Gray) 1(3): 501–502, 505–507. 1840, *Gen. Pl.* [Endlicher] 2(15): 1190. 1840, *Deut. Bot. Herb.-Buch* 170. 1841, *Anales Soc. Gray) Wooton & Standl.; *Pachylophus longiflorus* (A. Heller) A. Heller; *Pachylophus marginatus* (Nutt. ex Hook. & Arn.) Rydb.; *Pachylophus prolatus* A. Nelson)

North America. Perennial

See *Memoirs of the American Academy of Arts and Science*, new series 4(1): 45. 1849, *Botanical Gazette* 19(3): 117–118. 1894 and *Bulletin of the Torrey Botanical Club* 33(3): 146. 1906, *Muhlenbergia*; a journal of botany 2(2A): 224–225. 1906, *Muhlenbergia*; a journal of botany 4(3): 40. 1908, *Botanical Gazette* 47(6): 429. 1909, *Contributions from the United States National Herbarium* 16(4): 157. 1913, *American Journal of Botany* 18(9): 731, 733–734. 1931, *American Journal of Botany* 25(2): 114. 1938, *North American Flora*, series 2, 5: 100–101. 1965

(Plant used for toothache, sore eyes, large swellings, also as substitute for tobacco. Ceremonial, the flowers.)

in English: tufted evening primrose

Oenothera clelandii W. Dietr., P.H. Raven & W.L. Wagner (*Oenothera rhombipetala* auct. non Nutt. ex Torr. & A. Gray)

North America. Perennial or biennial herb

See *Memoirs of the Torrey Botanical Club* 3(3): 33. 1893 and *Annals of the Missouri Botanical Garden* 64(3): 585, 587. 1977[1978], *Annals of the Missouri Botanical Garden* 70(1): 196. 1983

(Ceremonial.)

in English: Cleland's evening primrose

Oenothera coronopifolia Torr. & A. Gray (*Anogra coronopifolia* (Torr. & A. Gray) Britton; *Oenothera sinuata* race *coronopifolia* (Torr. & A. Gray) H. Lév.; *Raimannia coronopifolia* (Torr. & A. Gray) Rose)

North America. Perennial herb

See *A Flora of North America: containing ...* 1(3): 495. 1840, *Memoirs of the Torrey Botanical Club* 5(16): 234. 1894 and *Contributions from the United States National Herbarium* 8(4): 330. 1905, *Monographie du Genre Onothera* 354. 1909

(Plant antirheumatic, used for toothache, large swellings. Cold leaves infusion drunk for stomachache.)

in English: crownleaf evening primrose

Oenothera elata Kunth subsp. *hookeri* (Torr. & Gray) W. Dietr. & W.L. Wagner (*Oenothera biennis* fo. *hookeri* (Torr. & A. Gray) B. Boivin; *Oenothera biennis* L. var. *hookeri* (Torr. & A. Gray) B. Boivin; *Oenothera communis* var. *hookeri* (Torr. & A. Gray) H. Lév.; *Oenothera hookeri* Torr. & A. Gray; *Oenothera hookeri* Torr. & A. Gray subsp. *montereyensis* Munz; *Onagra hookeri* (Torr. & A. Gray) Small)

North America. Perennial herb, food

See *Nova Genera et Species Plantarum* (quarto ed.) 6: 90. 1823, *A Flora of North America: containing ...* 1(3): 493. 1840, *Bulletin of the Torrey Botanical Club* 23(5): 171. 1896 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 19: 330. 1909, *Le Naturaliste Canadien* 93(5): 644. 1966, *Le Naturaliste Canadien* 94: 654. 1967, *Annals of the Missouri Botanical Garden* 74(1): 152. 1987, *Syst. Bot. Monogr.* 50: 1–234. 1997

(Plant antirheumatic, emetic, used for toothache, colds, sores, mumps, large swellings. Cold leaves infusion drunk for stomachache. Ceremonial, emetic, good luck charm; protection, roots to repel snakes.)

in English: Hooker's evening primrose

Oenothera flava (A. Nelson) Garrett (*Lavauxia flava* A. Nelson; *Oenothera flava* (A. Nelson) Munz; *Oenothera flava* (A. Nelson) Garrett subsp. *flava*)

North America. Perennial herb

See *Bulletin of the Torrey Botanical Club* 31(5): 243–244. 1904, *Spring Flora of the Wasatch Region* 106. 1927, *American Journal of Botany* 17(5): 361. 1930

(Plant used for toothache, large swellings. Seed pod ashes applied to burns.)

in English: yellow evening primrose

Oenothera flava (A. Nelson) Garrett subsp. *flava* (*Lavauxia flava* A. Nelson; *Oenothera flava* subsp. *taraxacoides* (Wooton & Standl.) W.L. Wagner)

North America. Perennial herb

Univ.*, Ser. 4, *Biol.* 40(3): 243. 1999

(Roots decoction given in discharge of blood in urine; decoction of the roots of *Desmodium caudatum* with the roots of *Solanum indicum* and *Solanum surattense* given in respiratory troubles. The roots and leaves used for rheumatism and diuresis, and as a pesticide. Paste of the leaves of *Desmodium caudatum* with leaves of *Erythrina stricta* and *Nicotiana tabacum* applied on ulcers, sores, wounds.)

in China: xiao huai hua

in India: naunthe-lak

Olax L. Olacaceae

Probably from the Latin *olax*, *olacis* 'odorous, smelling' (Latin *oleo*, *es*, *ui*, *ere* 'to smell'; Akkadian *alu*, *elu*, Hebrew *ala* 'to move up, to rise'; Akkadian *elesu* 'to rejoice', *ullusu* 'to cause rejoice'), referring to the scent of some species, see Martianus Minneius [Mineus] Felix Capella, 4th-5th century a.C., author of *De nuptiis Philologie et Mercurii*. Vicentiae 1499; or, according to other authors the genus was named after the Doric *olax*, *olakos*, Greek *aulax*, *aulakos* 'a furrow', referring to the ridged bark and branches; see Carl Linnaeus, *Species Plantarum*. 1: 34. 1753, *Genera Plantarum*. Ed. 5. 20. 1754, *Genera Nova Madagascariensia* 15–16. 1806, *Narrative of an Expedition to Explore the River Zaire* 452. 1818, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 1: 533. 1824 and *Fieldiana, Bot.* 24(4): 88–92. 1946, *Allertonia* 3(2): 155–210. 1982, *Fl. Veracruz* 93: 1–15. 1996.

Olax acuminata Wall. ex Benth. (*Olax acuminata* Wall.)

India, Himalaya. Shrub, acuminate elliptic leaves, greenish yellow flowers, deflexed peduncles, leaves used as vegetable, black sticky gum for the green stems

See *Numer. List* [Wallich] n. 6781. 1832, *Proceedings of the Linnean Society of London* 1: 89. 1840, *FBI* 1: 576. 1875 and *Taxon* 31(1): 71. 1982

(Leaves eaten for stomach pain and pneumonia.)

in China: jian ye tie qing shu

in India: han-maljiangga-araung, han-misang, hankangyang, himmashing, hymmashing

Olax dissitiflora Oliv. (*Olax andronensis* Baker; *Olax emirnensis* Baker; *Olax stuhlmannii* Engl.) (Latin *dissitus*, *a*, *um* 'well spaced, scattered, lying apart, disperse, remote, apart', referring to the well-spaced flowers)

Mozambique. Tree or shrub, lianescent, drooping branches, small white flowers

See *Flora of Tropical Africa* [Oliver et al.] 1: 350. 1868, *J. Linn. Soc., Bot.* 21: 331. 1884 [1886 publ. 1884], *Journal of the Linnean Society, Botany* 25: 306. 1889, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 146. 1897, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2(17): 283–284. 1899

(Roots and leaves for fevers, venereal infections and skin diseases. Roots mixed with other species to treat infertility in women.)

in English: olax, small sourplum

in Southern Africa: kleinsuurpruim, small sourplum; uMaphunzana, mapunzana (Zulu); mutandavha (Venda);

Soutpansberg, northern Transvaal); mudowe (Mbukushu: Okavango Swamps and western Caprivi)

in Tanzania: mbonzi kunze, mtesi

Olax gambecola Baill. (*Olax alliacea* (De Wild.) Boutique; *Olax alliacea* (De Wild.) Vermoesen ex Boutique; *Olax poggei* Engl.; *Olax viridis* Oliv.; *Ptychopetalum alliaceum* De Wild.; *Ptychopetalum nigricans* De Wild.)

Tropical Africa. Treelet or shrub, yellow flowers, orange-red fruits

See *Adansonia* 3: 121. 1862, *Flora of Tropical Africa* [Oliver et al.] 1: 349. 1868, *Nat. Pflanzenfam. Nachtr.* [Engler & Prantl] I. 146. 1897, *Notizblatt des Königlichen botanischen Gartens und Museums zu Berlin* 2: 285. 1899 and *Études de systématique et de géographie botaniques sur la flore de Bas- et du Moyen-Congo* 1: 33–34. 1903 [Ann. Mus. Congo Belge, Bot. sér. 5, 1[1]: 33–34. 1903] [1903–1906 publ. Jun 1903], *Journal of Ethnopharmacology* 18(1): 63–88. 1986

(Effects of *Olax gambecola* methanol extract on smooth muscle and rat blood pressure.)

in Central African Republic: pumbye enge

in Zaire: dawa bakbele

Olax imbricata Roxb. (*Olax wightiana* Wall.; *Olax wightiana* Wall. ex Wight & Arn.; *Ximenia olacoides* Wight & Arn.)

India. Scandent unarmed shrub, twining, ovate leaves, fragrant white flowers in clusters or solitary, oblong fruits nearly covered by truncate yellow adherent glabrous calyx

See *Hort. Bengal.* 5. 1814, *Flora Indica*; or descriptions of Indian Plants ed. Carey & Wall, 1: 169. 1820, *Fl. Ind.*, ed. Carey, i. 164. 1832, *Numer. List* [Wallich] 6779. 1832, *Prodr. Fl. Ind. Orient.* 1: 89. 1834 and *Blumea* 26: 156. 1980, *Handb. Fl. Ceylon* 10: 297. 1996

(Leaves given to children as vermifuge; leaves in skin diseases. Root decoction as drought and bark in fever; root in backache and jaundice.)

in China: tie qing shu

Olax mannii Oliv.

Tropical Africa.

See *Flora of Tropical Africa* [Oliver et al.] 1: 349. 1868

(Roots and leaves for venereal diseases, yellow fever, jaundice and snakebite.)

Olax scandens Roxb.

India. Small tree or shrub, scandent branches, soft yellowish-white wood, flowers in racemes, drupes oblong-globose enclosed in accrescent calyx, leaves eaten as vegetable, in dry deciduous forests

See *Species Plantarum* 1: 34. 1753, *Plants of the Coast of Coromandel* 2: 2, t. 102. 1798

(Used in Sidha. Fruit paste used in eye diseases. Pounded bark in water given to cure pain in any part of the body; bark for anemia and fever. Root extract taken orally to give relief when muscles are strained. Leaves taken as a vegetable for constipation; leaves decoction along with *Holarrhena pubescens* given orally in psoriasis.)

in India: archafal, baacamushti gida, baapana balli, baapana mushti gida, baapanamushti, baapanamusthi gida, baavamusti gida, badbadolia, bapana mushti, bapanamushti, boodanakkiri, chehra, dhan, dhehiani, elka-nakira, gendasiga, harduli, hit-timaada, kadairanchi, kadalranchi, karadu, karra, karru, katalalincil, katalanci, kataliranci, katalranci, kataluranci, kataluraynci, katalurinci, katalviranci, kogita teega, kogitathige, kogitatige, kothi, kotiki, kurpodur, kurposur, kusur-tonda, mal-liveppam, marikimalle, muikimalle, muriki malle, murimalle, nakkare, nalla durada, nallaudata, nallavudata, nallavudatha, nurikimalle, taraganepa, tharagavepa, thige nakkeru, thuraka vaepa, tigenaku, turkavepa, udupunakkeri, uduthanekkeru, urchirri, urehirri, vudapunakkeri, vudutanekkar

Olox subscorpioidea Oliver (*Olox subscorpioides* Oliv.)

Tropical Africa. Shrub or small tree, flowers pale green

See *Flora of Tropical Africa* [Oliver et al.] 1: 350. 1868 and *Phytomedicine*. 10(4): 325–333. 2003

(Bioactivity against brine shrimp/sea monkeys, *Artemia salina*. Crushed leaves in cold water, the water applied to child's body when sick and with fever. Bark or fresh leaves snake repellent.)

in Central African Republic: mongomba, ngberengbere, ngombangoba

in Congo: ombiena-mbiena, otsotsolo

in Gabon: ontsóuntsoulou

in Ivory Coast: acagnikaba

in Nigeria: gwanon rafi (Hausa); ifon (Yoruba); ukpakon (Edo); igbulu (Igbo)

in Yoruba: awefin, ifon

Olox zeylanica L. (*Olox zeylanica* Wall.)

Sri Lanka, India. Shrub, small white flowers in many flowered axillary racemes, globose fruits nearly covered by yellow hairy calyx

See *Species Plantarum* 1: 34. 1753, *Numer. List* [Wallich] n. 6777 B. 1832

(Leaves warmed and oiled and used as poultice, its juice taken in diarrhea. Roots used in paralysis.)

Oldenlandia L. Rubiaceae

After the Danish botanist Henrik (Hendrik) Bernard Oldenland (Henricus Bernardus Oldenlandus), c.1663–1699,

physician, naturalist, plant collector at the Cape of Good Hope and Curator-Superintendent of the Botanical Garden of the Dutch East Indian Company. See J. Burman (1707–1779), *Catalogi duo plantarum Africanarum, quorum prior complectitur plantas ab Hermanno observatas, posterior vero quas Oldenlandus et Hartogius indagarunt*. [Contains lists of nearly 1,000 plants collected at the Cape by Paul Hermann (1646–1695) and of about 400 collected by H.B. Oldenland and J. Hartog.] Amstelaedami 1737, Carl Linnaeus, *Species Plantarum*. 1: 101–102, 119. 1753 and *Genera Plantarum*. Ed. 5. 55. 1754, N.L. Burman, *Flora Indica: cui accedit series Zoophytorum Indicorum, nec non Prodromus Florae Capensis*. [The *Florae Capensis Prodromus* is based on Oldenland's collections.] Lugduni Batavorum & Amstelaedami 1768, *American monthly magazine and critical review* 2: 268. 1818, *Linnaea* 4: 154. 1829, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 429. 1830, *New Flora and Botany of North America ... (Rafinesque)* 4: 101. 1836, Jens Wilken Hornemann, *Naturh. Tidsskr.* 1: 562–563. 1837, *Bull. Soc. Imp. Naturalistes Moscou* 11: 266. 1838, *Autikon Botanikon* 13. 1840, A. Lasègue, *Musée botanique de Benjamin Delessert*. 66. 1845, *Tent. Fl. Abyss.* 1: 364. 1848, *Ned. Kruidk. Arch.* 2(2): 155. 1851, P. MacOwan, "Personalia of botanical collectors at the Cape." *Trans. S. Afr. Philos. Soc.* 4(1): xxx–liiii. 1884–1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 335. 1903, J. Britten, "Some early Cape botanists and collectors." *J. Linn. Soc. (Bot.)* 45: 34–36. 1920, John Hutchinson, *A botanist in Southern Africa*. 610. 1946, J. Hoge, *Africana Notes*. (On H.B. Oldenland) 3: 125. 1946, *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk., Tweede Sect.* 48(2): 54, 140, 165. 1952, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 219. 1964, J.H. Barnhart, *Biographical Notes upon Botanists*. 3: 26. 1965, *Bull. Bot. Surv. India* 11: 214. 1971, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 265–266. [1663–1697] 1981, *Taxon* 41: 564. 1992, *Taxon* 44: 611–612. 1995, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999, *Taxon* 52: 775. 2003, *Blumea* 51(2): 199–220. 2006.

Oldenlandia affinis (Roem. & Schult.) DC. subsp. *fugax* (Vatke) Verdc. (*Hedyotis decumbens* Hochst.; *Hedyotis fugax* Vatke; *Kohautia decumbens* (Hochst.) Roberty; *Kohautia longiflora* E. Mey. ex Sond. & Harv., nom. illeg.; *Oldenlandia decumbens* (Hochst.) Hiern, nom. illeg.; *Oldenlandia decumbens* Spreng.)

Tropical and S. Africa, Comoros, Madagascar. Herb, prostrate, ascending, suberect to straggling, climber, procumbent, stem tinged blue-brown-purple, corolla blue-purple with white throat, anthers blue, fruit greenish

See *Species Plantarum* 1: 101–102, 119. 1753, *Beskrivelse af Guineiske planter* 72–73. 1827, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 425, 428. 1830, *Flora* 27: 552. 1844, *Fl. Cap.* 3: 11. 1865, *Oesterreichische Botanische Zeitschrift* 25: 232. 1875, *Flora of Tropical Africa* 3: 54. 1877 and *Bull. Inst. Franç. Afrique Noire* 16: 54. 1954, *Kew*

Bulletin 30: 247–323. 1975, *Flora of Tropical East Africa* 415–747. 1988, Akoègninou, A., van der Burg, W.J. & van der Maesen, L.J.G. (eds.) *Flore Analytique du Bénin*. Backhuys Publishers. 2006

(Roots used for chest complaints and heart disease, a decoction drunk for rheumatic pains.)

in South Africa: uMampeshana (Zulu)

in Tanzania: muamba ziwa

Oldenlandia auricularia (L.) K. Schum. (*Exallage auricularia* (L.) Bremek.; *Hedyotis auricularia* Walter; *Hedyotis auricularia* L.; *Metabolus auricularius* (L.) Blume ex Bremek.; *Oldenlandia auricularia* (L.) F. Muell.; *Oldenlandia auricularia* F. Muell.; *Oldenlandia auricularia* K. Schum.)

Trop. & Subtrop. Asia. Trailing herb, glabrous stem, white flowers

See *Fl. Carol.* [Walter] 85. 1788, *Nat. Pflanzenfam.* [Engler & Prantl] 4(4): 25. 1891 and *Meded. Bot. Mus. Herb. Rijks Univ. Utrecht* 56: 439. 1939, *Rec. Trav. Bot. Neerl.* 1939, xxxvi. 439. 1940, *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 142. 1952

(Whole plant emollient, astringent, a remedy for diarrhea, dysentery, cholera and stomach ailments. Leaves antiseptic, leaf juice mixed with breast milk used for local application for eye diseases.)

in India: tharavu

Oldenlandia biflora L. (*Gerontogea racemosa* (Lam.) Cham. & Schltdl.; *Gonotheca biflora* (L.) Masam.; *Hedyotis alsinifolia* Zipp. ex Span.; *Hedyotis biflora* (L.) The Board of Trustees of the Royal Botanic Gardens, Kew. 2003 [as *Scleromitron verticillatum*.], *Edinburgh Journal of Botany* 66: 371–390. 2009

(Leaves heated and applied as a poultice to infected wounds, sprain, bone dislocation; leaves infusion drunk for snakebites and insect stings. Root paste given for dysentery.)

in English: mosquito weed

in Indonesia: udu langau

Malay name: duk spatok

Oldfieldia Benth. & Hook. Picrodendraceae (Euphorbiaceae)

After the British physician Richard Albert K. Oldfield, plant collector in Nigeria and Sierra Leone, 1832–1834 on 1st Niger Expedition led by Laird and Lander; see Macgregor Laird and R.A.K. Oldfield, *Narrative of an Expedition into the Interior of Africa by the river Niger*. London 1837 and Benjamin Daydon Jackson (1846–1927), “A list of the contributors to the herbarium of the Royal Botanic Gardens, Kew, brought down to 31st December 1899.” *Bull. misc. Inf. Kew.* 1901 and “A list of the collectors whose plants are in the herbarium of the Royal Botanic Gardens, Kew, to 31st December 1899.” *Kew Bulletin* 1–80. 1901, R.W.J. Keay, “Botanical Collectors in West Africa prior to 1860.” *Comptes Rendus A.E.T.F.A.T.* Lisbon 1962, F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 62. 1971, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 526. London 1994, Akoègninou, A., van der Burg, W.J. & van der Maesen, L.J.G. (eds.) *Flore Analytique du Bénin*. Backhuys Publishers. 2006, Sosef, M.S.M. et al. “Check-list

des plantes vasculaires du Gabon.” *Scripta Botanica Belgica* 35: 1–438. 2006.

Oldfieldia africana Benth. & Hook.f.

W. and WC. Trop. Africa. Tree, straight, bitter slightly watery sap from bark-slash

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 2: 185. 1850

(Leaf bark insecticides, arachnicides. Magic, ritual, a powerful fetish tree. Bark for venereal diseases. Seeds and bark pounded together used as a pesticide. Ointment from the bark to treat lice infestation; leaves used on the head and loins for lice and crabs. Bark seeds fish poisons.)

in English: African oak, African teak, oak

in Cameroon: alenile, bobindo

in Congo: vesambata

in Ivory Coast: ahien’gré, angouran, anguaran, blahon, dantoue, dantué, dentué, esson, esson angouaran, esui, etui, fou, fu, habétu, hiérahiré, hirahiré, sséhiriri, sué-ngoran, takuétu

in Liberia: pau-lau, saye

in Nigeria: fou

in Sierra Leone: kpacha, kpaola(-i), mbaimba, tanalia, tortorza

in Tropical W. Africa: paulati

Oldfieldia dactylophylla (Welw. ex Oliv.) J. Léonard (*Paivaeusa dactylophylla* Welw. ex Oliv.)

Tanzania to Angola. Tree, deciduous or semi-deciduous, irregular flattish or rounded crown, short bole, dark grey stem bark rough, spreading branches, thick branchlets, compound digitate leaves, very small flowers on male and female trees, female flowers solitary, male flowers in dense clusters orange-brown, fruit light green with soft brown hairs, sweet edible pulp around the seeds, found in miombo woodland, sandy loams

See *Species Plantarum* 1: 119. 1753, *Hooker’s Journal of Botany and Kew Garden Miscellany* 2: 184. 1850, *Gen. Pl.* 1: 993. 1867, *Flora of Tropical Africa* 1: 328. 1868, *Trans. Linn. Soc. London* 27: 20–21, t. 7. 1869 and *Wiss. Ergebn. Schwed. Rhod.-Kongo-Exped.* 1, 1: 118. 1914, *Check-list For. Trees Shrubs Tang. Terr.*: 221. 1949, *Bulletin du Jardin Botanique de l’État* 26: 340. 1956, *F.T.E.A., Euphorb.* 1: 115. 1987

(Roots decoction for treatment of venereal diseases and hernia, also an aphrodisiac.)

in Tanzania: mkalanga, mliwanfwengi, msamina, muliwanfwengi

Oldfieldia somalensis (Chiov.) Milne-Redh. (*Cecchia somalensis* Chiov.; *Paivaeusa orientalis* Mildbr.)

Somalia to Mozambique. Tree, crown rounded, flaky grey rough bark, young branches and buds with rufous

indumentum, leaves dark green glossy, inflorescences all axillary, woody ovoid indehiscent orange fruits

See *Hooker’s Journal of Botany and Kew Garden Miscellany* 2: 184. 1850 and *Flora Somala* 2: 397, f. 227. 1932, *Kew Bulletin* 3: 456. 1949

(Poisonous to animals. Roots for colds, fever, infertility.)

in Tanzania: mbanga hwalu, mbangahwalu, mnyuluryulu

Olea L. Oleaceae

Greek *elaio*, *elaia*, Latin *olea* ‘an olive, olive-berry, an olive-tree’; see Carl Linnaeus, *Species Plantarum*. 1: 8. 1753 and *Genera Plantarum*. (Leaves and fruits for skin diseases, measles, urinary tract infections.)

in English: black ironwood, bushveld ironwood, forest ironwood, ironwood

in Comoros: dramena

in Nigeria: zitum (Hausa)

in Southern Africa: baster swartysterhout, basterysterhout, bosveldysterhout, isiTimane, regte swartysterhout, ysterhout; umSishane, unSinjane, isiNhletshe, iGwanxi, umZimane (Zulu); motshere (North Sotho); uGqwangxe, umHlebe (Xhosa)

in Zaire: ndobo

Olea dioica Roxb. (*Tetrapilus dioicus* (Roxb.) L.A.S. Johnson)

India, Nepal. Shrub or tree, coriaceous leaves, white flowers in compound panicles, leaves eaten

See *Species Plantarum* 1: 8. 1753, *Flora Indica*; or descriptions of Indian Plants 1: 105–106. 1820, *Fl. Ind.*, ed. Carey, i. 106. 1832 and *Contributions from the New South Wales National Herbarium* 2: 408. 1957, *Indian Journal of Botany* 5: 7–12. 1982, *Journal of Tree Sciences* 6: 89–93. 1987, *Journal of Cytology and Genetics* 24: 71–77. 1989

(Used in Sidha. Bark used as febrifuge.)

in English: rose sandalwood

in India: adale, aedaala, ajeyton, akkasalle, akkasalli, akki-varakalu, akkivaralu, baara nuke, baarankooka, baranuke, batteharakalu, bili saralu, bilisarali, bonbholuka, burranuge, chapu, edala, edalai, edale, edana, edanna, etala, hakkaasarali, hakkakalu, hakkiasarali, hejjevarakalu, hekkerakalu, idalai, idalai koli, irippa, itala, karambu, karavetti, kari-vetti, karivetti, kattolivam, koli, koli payar, kolipayar, kunde, madle, mahodale, manidalai, manidalei, muddale mara, mudla, paarajaamba, paarajambu, pad-dhaliki, paralana, paravaidalei, paravanidalai, parrjamb, parujambu, payar, poreng, sadli, valiyaedala, valiyavetila, vetila, vidana, yedala, yedalei

Olea europaea L.

Europe.

See *Species Plantarum* 1: 8. 1753

(Used in Unani and Sidha. Leaves infusion antihypertensive; leaves and unripe fruits emollient, laxative, antiinflammatory.)

in English: common olive, edible olive, European olive tree, Indian olive, olive tree, wild olive tree

in China: mu xi lan

in India: alivceti, caitun, cimaikkalikacceti, cimaikkalikam, jaitun, julipe, julpai, olivai, olivu, zaitun

in Japan: oribu-no-ki

in Arabic: zitoun, zaytun, zebbour

in Hawaii: 'oliwa, 'oliwa haole

in Mexico: biache riche zaa castilla, piache castilla nititi zaa niza, yaga biache

Olea europaea L. subsp. ***africana*** (Mill.) P.S. Green (*Linociera lebrunii* Staner; *Olea africana* Mill.; *Olea chrysophylla* Lam.; *Olea chrysophylla* var. *euchrysophylla* A. Chev.; *Olea chrysophylla* var. *nubica* (Schweinf. ex Baker) A. Chev.; *Olea chrysophylla* var. *somaliensis* (Baker) A. Chev.; *Olea cuspidata* Wall. ex G. Don; *Olea cuspidata* Wall.; *Olea europaea* subsp. *africana* (Mill.) P.S. Green; *Olea europaea* subsp. *cuspidata* (Wall. ex G. Don) Cif.; *Olea europaea* var. *nubica* Schweinf.; *Olea europaea* var. *verrucosa* Willd.; *Olea kilimandscharica* Knobl.; *Olea monticola* Gand.; *Olea sativa* Hoffmanns. & Link; *Olea sativa* Hoffm.; *Olea sativa* Gaterau; *Olea sativa* var. *verrucosa* R. & S.; *Olea schimperi* Gand.; *Olea somaliensis* Baker; *Olea subtrinerivata* Chiov.; *Olea verrucosa* Raf.; *Olea verrucosa* (Willd.) Link; *Olea verrucosa* Link)

East Africa. Tree or shrub, many-branched, crooked and gnarled trunk, wood very hard, rounded crown, grey-green foliage, stiff leaves opposite, small white flowers, fleshy oval fruits bitter-sweet when ripe, in dry forest, forest margins

See *Species Plantarum* 1: 8. 1753, *The Gardeners Dictionary*: ... eighth edition n. 4, *Olea*. 16 Apr 1768, *Pl. Descr. Montaub.* 26. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 29. 1791, *Fl. Portug.* [Hoffmannsegg] 1: 388. [1813–1820], *Enum. Hort. Berol. Alt.* 1: 33. 1821, *Numer. List* [Wallich] n. 2817. 1831, *Gen. Hist.* 4: 49. 1837, *Sylva Tellur.* 8. 1838 and *Fl. Trop. Afr.* [Oliver et al.] 4(1.1): 18. 1902, *Bull. Soc. Bot. France* 65: 58. 1918, *Rev. Zool. & Bot. Afr.* xxii. 244. 1932, *Notizbl. Bot. Gart. Berlin-Dahlem* 12: 200. 1934, *Taxon* xvii. 516. 1968, *Kew Bulletin* 34: 69–70. 1979, *Flora Zambesiaca* 7(1): 300–327. 1983, *Flowering Plants of Africa* 55: 92–95. 1997

(An infusion of the bark taken as a remedy for tapeworm; a bark decoction added to the bath to alleviate itchy rashes. Leaves infusion febrifuge, for kidney and bladder complaints. The fruits to treat diarrhea. Oil from fruit, leaves and bitter bark used as astringent, antiperiodic, febrifuge. Ceremonial, ritual, blessed leaves put inside the houses for purification.)

in English: brown olive, South African olive, wild olive

in East Africa: mlamuru, mutamaiyu, muthata

in Lesotho: mohloare

in Southern Africa: olienhout, olyfboom, swartolienhout; umNquma (Swazi); muGuma, muToba (Shona); mohlware (South Sotho); motlhware (North Sotho); mokgware (Ngwaketse dialect, Botswana); motlhware (Western Transvaal, northern Cape, Botswana); umNqumo, umHlwathi, isAdlulambazo (Zulu); umNquma (Xhosa); khérob, khéra-heis (Nama: Southern Southwest Africa)

Olea europaea L. subsp. ***cuspidata*** (Wall. ex G. Don) Cif. (*Olea aucheri* A. Chev. ex Ehrend.; *Olea aucheri* Ehrend.; *Olea chrysophylla* Lam. var. *aucheri* A. Chev.; *Olea chrysophylla* Lam. var. *cuspidata* (Wall. ex G. Don) A. Chev.; *Olea chrysophylla* Lam. var. *ferruginea* (Royle) A. Chev.; *Olea chrysophylla* Lam. var. *subnuda* R.E. Link)

Pakistan. Wood very hard and heavy, used for turning, ploughs and as firewood

See *Species Plantarum* 1: 8. 1753, *Enum. Hort. Berol. Alt.* 1: 33. 1821, *Numer. List* [Wallich] n. 2817. 1831, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 267, t. 65, f. 1. 1835, *A General History of the Dichlamydeous Plants* 4: 49. 1837, *Sylva Tellur.* 8. 1838, *Nomencl. Bot.* [Steudel], ed. 2. 2: 209. 1841, *J. Linn. Soc., Bot.* 8: 67. 1864 [1865 publ. 1864] and *L'Olivicoltura* 19(5): 96. 1942, *Anz. Österr. Akad. Wiss., Math.-Naturwiss. Kl.* xcvi. 156. 1960, *Kew Bull.* 34(1): 69. 1979, *J. Cytol. Genet.* 23: 219–228. 1988

(Bark astringent, to relieve diarrhea. Leaves emetic, astringent, to treat gonorrhoea, fevers, stomachache, debility and gum for eye diseases. Oil from the fruit of *Olea cuspidata* is rubefacient, useful in rheumatism, bodyache, backache and lumbago; fruit used in liver complaints and toothache.)

in China: xiu lin mu xi lan

in India: bairbanj, kan, kau

in Pakistan: aath ka patta, kahu ja pann, kao, khat, khot

Olea paniculata R. Br. (*Linociera yunnanensis* H.T. Chang; *Olea glandulifera* Desf.; *Olea glandulifera* Wall.; *Olea glandulifera* Wall. ex G. Don, nom. illeg., non *Olea glandulifera* Desf.)

China, Himalaya.

See *Species Plantarum* 1: 8. 1753, *Genera Plantarum* 2: 784. 1791, *Prodromus Florae Novae Hollandiae* 523. 1810, Desfontaines, Rene Louiche (1750–1833), *Catalogus plantarum horti regii parisiensis: cum annotationibus de plantis novis aut minus cognitis. Parisiis, 1829* [Tableau de l'École de Botanique du Muséum d'histoire naturelle, 1804 - Tableau de l'École de Botanique du Jardin du Roi, 1815], *A General History of the Dichlamydeous Plants* 4: 49. 1837 and *Acta Scientiarum Naturalium Universitatis Sunyatseni* 1982(2): 1. 1982, *New Botanist* 12: 135–141. 1985, *Journal of Tree Sciences* 6: 89–93. 1987, *Journal of Cytology and Genetics* 23: 219–228. 1988

(Astringent, to treat gonorrhoea, skin diseases.)

in Australia: Australian olive, clove berry, native olive, pigeonberry ash

in China: xian ye mu xi lan

in India: gaild, gair, galdu, jharinu, kunde, kunthay, kunthe, lodajang, loddajang

in Pakistan: barkao

Olea tsoongii (Merrill) P.S. Green (*Ligustrum tsoongii* Merrill; *Olea brevipes* L.C. Chia; *Olea yuennanensis* Handel-Mazzetti; *Olea yuennanensis* var. *xeromorpha* Handel-Mazzetti)

China.

See *Species Plantarum* 1: 7–8. 1753 and *Philipp. J. Sci.* 21(5): 506. 1922, *Symbolae Sinicae* 7(4): 1008–1009. 1936, *Acta Phytotaxonomica Sinica* 3(3): 313–314. 1955, *Kew Bulletin* 50(2): 338. 1995

(Bark used as febrifuge.)

in China: yun nan mu xi lan

Oleandra Cav. Oleandraceae (Davalliaceae)

Referring to the simple and oleander-like fronds, laminae simple, entire; see Antonio José Cavanilles, in *Anales de Historia Natural Madrid.* 1(2): 115. 1799 and *Rhodora* 99(900): 335–343. 1997.

Oleandra pilosa Hook. (*Aspidium pendulum* Raddi; *Aspidium pendulum* Splitg., nom. illeg.; *Nephrodium pendulum* (Raddi) Desv.; *Nephrolepis cordifolia* var. *pendula* (Raddi) Sodiro; *Nephrolepis pendula* (Raddi) J. Sm.; *Nephrolepis tuberosa* var. *pendula* (Raddi) Hook.; *Oleandra decurrens* Maxon; *Oleandra dura* Maxon; *Oleandra micans* Kunze; *Oleandra neriiformis* Cav.; *Oleandra neriiformis* Hook.; *Oleandra neriiformis* var. *pilosa* (Hook.) Baker; *Oleandra neriiformis* Cav.; *Oleandra neriiformis* (Cav.) Bedd.; *Oleandra panamensis* Maxon; *Oleandra trinitensis* Maxon; *Oleandra trujillensis* H. Karst.)

Nepal, India, South America.

See *Anales de Historia Natural* 1: 115. 1799, *Opuscoli scientifici d'una Società di professori della Pontif. Università di Bologna* 3: 289. 1819, *Mémoires de la Société Linnéenne de Paris* 6: 252. 1827, *Genera Filicum* t. 45B. 1840, *Journal of Botany*, being a second series of the Botanical Miscellany 4: 197. 1841–1842[1841], *Mém. Foug.*, 5. *Gen. Filic.* 196. 1850–52. 1850, *Botanische Zeitung.* Berlin 9: 346. 1851, *Flora Columbiae* terraumque adjacentium specimina selecta in peregrinatione duodecim annorum observata delineavit et descripsit 1: 147, t. 73. 1859, *Species Filicum* 4: 151. 1862, *Flora Brasiliensis* 1(2): 494. 1870, *Cryptogamae vasculares Quitenses* 276. 1893 and *Contributions from the United States National Herbarium* 17(4): 396–397. 1914, *American Fern Journal* 35: 21. 1945, *Rhodora* 99: 340. 1997

(Stipes decoction emmenagogue.)

in English: stilt fern

Oleandra pistillaris (Sw.) C. Chr. (*Aspidium pistillare* Sw.; *Oleandra neriiformis* Cav.; *Oleandra neriiformis* Bedd.; *Oleandra neriiformis* auctt.)

China.

See *Anales Hist. Nat.* 1. 115. 1799, *Tent. Pterid.* 78. 1836 and *Index Filicum, Supplementum Tertium pro Annis 1917–1933* 132. 1934

(Plant emmenagogue, vermifuge, anthelmintic, for snakebite.)

in the Philippines: kaliskis-ahas

Oleandra wallichii (Hook.) C. Presl (*Aspidium wallichianum* Spreng.; *Aspidium wallichianum* Wall.; *Aspidium wallichianum* Bory; *Aspidium wallichii* Hook.; *Neuronia asplenioides* D. Don, nom. superfl.; *Oleandra wallichii* C. Presl; *Oleandra wallichii* var. *lepidota* H. Christ)

India.

See *Exotic flora* 1: 5, t. 5. 1823, *Prodromus Florae Nepalensis* 7. 1825, *Syst. Veg.* (ed. 16) [Sprengel] 4(1): 104. 1827, *Numer. List* [Wallich] n. 373. 1828, *Tentamen Pteridographiae* 78. 1836 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 16(199–200–201): 140. 1906

(Rhizome tonic, rejuvenating; rhizome paste applied on forehead to treat headache.)

in Nepal: jibre unyu

Oligochaeta (DC.) K. Koch Asteraceae

From the Greek *oligos* 'few, small, little' and *chaite* 'bristle, long hair', small bristles, see *Linnaea* 17: 42. 1843.

Oligochaeta ramosa (Roxb.) Wagenitz

India.

See *Veroffentlichungen des Geobotanischen Institutes der Eidg. Techn. Hochschule. Zürich: Das Institut, 1961–2002* [Continues: *Veroffentlichungen des Geobotanischen Institutes Rubel in Zurich, 1924–1959. Continued by: Perspectives in Plant Ecology, Evolution and Systematics* (held at 1.42/43).], *Taxon* 26: 107–109. 1977, *Taxon* 30: 514. 1981, *Ann. Missouri Bot. Gard.* 81: 800–808. 1994

(Stem and leaves consumed for cold and cough.)

in India: badavard, oonth-kantela, poilaichedipatchilai, sakayi, unt kantalo

Oligomeris Cambess. Resedaceae

From the Greek *oligos* 'few' and *meris* 'part', referring to the petals or to the small flowers with lobed calyx and capsule.

Oligomeris linifolia (Vahl) J.F. Macbr. (*Dipetalia linifolia* (Vahl) Tidestr.; *Dipetalia ruderalis* (Nutt.) A. Heller; *Ellimia ruderalis* Nutt.; *Oligomeris dregeana* Müll.Arg. var. *sphaerocarpa* Abdallah; *Oligomeris glaucescens* Cambess.; *Oligomeris ruderalis* (Nutt.) A. Nelson & P.B. Kenn.; *Oligomeris subulata* Boiss. ex C.A. Mull.; *Reseda linifolia* Vahl)

North America.

See *Hortus Regius Botanicus Hafniensis* 2: 501. 1815, *Voyage dans l'Inde* 4(Bot.): 23. 1844[1839] and *Contributions from the Gray Herbarium of Harvard University* 53: 13. 1918, *Contributions from the United States National Herbarium* 25: 251. 1925

(Roots infusion a remedy for measles.)

Olinia Thunberg Oliniaceae (Panaeaceae)

After the Swedish botanist Johan Henrik (Henric) Olin, 1769–1824, medical man and student of Thunberg, Dr. med. Uppsala 1797, author of *Plantae svecanae*. Upsaliae [Uppsala] 1797 and *Dissertatio de arnica*. Upsaliae 1799; see *Archiv für die Botanik* (Leipzig) 2(1): 4. 1800 and John Hendley Barnhart, *Biographical Notes upon Botanists*. 3: 27. 1965.

Olinia emarginata Burt Davy

South Africa. Evergreen tree, rounded crown, glossy green foliage, very small slightly fragrant pale to dark pink flowers in loose axillary heads, small round red fruit

See *Man. Pl. Transvaal* [Burt Davy] 1: 47, 199, 200. 1926

(Release of cyanide. Leaves used for headache and diarrhea.)

in English: mountain hard pear, Transvaal hard pear

in Southern Africa: berghardepeer, rooibessie; umNganalahla, iQudu (Xhosa); uQudu (Zulu); mmasephaletsi (North Sotho)

Olinia rochetiana Juss. (*Olinia usambarensis* Gilg; *Olinia usambarensis* Gilg ex Engl.)

Tropical Africa. Tree or shrub, dark pink fruits, kipunji monkeys eat the fruits

See *Comptes Rendues Acad. Sci., Paris* 22: 812. 1846, *Bot. Jahrb.* xix. (1894) 277. 1894, *Abh. Preuss. Akad. Wiss. Mathematisch-naturwissenschaftliche Klasse* (1894) 63. 1894 and *Journal of Ethnopharmacology* 100(1–2): 168–175. 2005, *Journal of Ethnopharmacology* 112: 55–70. 2007, *Journal of Ethnopharmacology* 114(2): 146–152. 2007

(Roots, young shoots and leaves, used to treat cough, bronchitis, fever, indigestion, intestinal parasites; leaves expectorant, analgesic, antalgic, for cough, colic; roots for treating microbial infections of the skin. Bark traditional dietary additives antiviral against the measles virus; bark for malaria.)

in English: sando tree

in Kenya: nkirenyi, olkirenyi

in Southern Africa: sando (Venda)

in Tanzania: mbanga, mpanga, muambe, okyeni

Olinia ventosa (L.) Cufod. (*Canthium ventosum* (L.) S. Moore; *Canthium ventosum* S. Moore; *Olinia acuminata* Klotzsch; *Olinia capensis* Klotzsch; *Olinia cymosa* Thunb.; *Olinia cymosa* (L.f.) Thunb.; *Plectronia ventosa* L.; *Sideroxylon cymosum* L.f.)

South Africa. Evergreen tree or shrub, spreading crown, glossy dark green leaves, tiny white to pale pink flowers borne in dense axillary clusters, coral-pink to bright red berry-like fruits, fruits eaten by fruit-eating birds, crushed leaves, twigs, bark and freshly cut wood all smell strongly of almonds

See *Mant. Pl.* 52. 1767, *Suppl. Pl.* 152. 1782 [1781 publ. Apr 1782], *Archiv für die Botanik* 2(1): 4. 1800, *Allg. Gartenzeitung* (Otto & Dietrich) 4: 27. 1836 and *Journal of the Linnean Society, Botany* 40: 91. 1911, *Phytochemistry* 70(3): 388–393. 2009

(Expectorant, for cough. In dried leaves the cyanogenic glucoside-related compound prunasinamide.)

in English: hard pear

in Southern Africa: hardepeer, rooibessieboom; iNgobamak-hosi, umNgenelahla, umNonono, ongenalahle (= tree that has no embers or charcoal), iNqudu (Xhosa)

Oliverella Tieghem Loranthaceae

After the British botanist Daniel Oliver, 1830–1916 (Kew, Surrey), at the Kew Herbarium, professor of botany at London (University College), 1853 Fellow of the Linnean Society, 1863 Fellow of the Royal Society, editor and joint author of *Flora of tropical Africa* (vols. 1–3), among his very numerous publications are “Notes on the Loranthaceae, with a synopsis of the genera.” *J. Proc. Linn. Soc. Bot.* 7: 90–106. 1864, *Official Guide to the Kew Museum*. A Handbook to the Museums of Economic Botany of the Royal Gardens, Kew. [London] 1861 and *First book of Indian botany*. London 1869. See *Bulletin de la Société Botanique de France* 42: 258–259. 1895 and J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Royal Botanic Gardens, Kew, London 1906, E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. London 1918, Ernest Nelmes and William Cuthbertson, *Curtis’s Botanical Magazine Dedications, 1827–1927*. 159–160. [1931], E.D. Merrill, *Bernice P. Bishop Mus. Bull.* 144: 145. 1937 and *Contr. U.S. Natl. Herb.* 30(1): 231. 1947, H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of*

Oxford. 219. Oxford 1964, Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 557. Philadelphia 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 27. 1965, Mea Allan, *The Hookers of Kew*. London 1967, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 293. 1972, M. Hadfield et al., *British Gardeners: a Biographical Dictionary*. London 1980, Emil Bretschneider (1833–1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition, St. Petersburg 1898.] Leipzig 1981, Stafleu and Cowan, *Taxonomic Literature*. 3: 819–828. 1981, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Oliverella hildebrandtii (Engl.) Tiegh. (*Loranthus campestris* Engl.; *Loranthus hildebrandtii* Engl.; *Loranthus orientalis* Engl.; *Oliverella campestris* (Engl.) Tiegh.; *Oliverella campestris* Tiegh.; *Oliverella sacleuxii* Tiegh.; *Tapinanthus campestris* (Engl.) Danser; *Tapinanthus hildebrandtii* (Engl.) Danser; *Tapinanthus sacleuxii* (Tiegh.) Danser)

Tanzania. Parasite

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 96. 1894, *Bulletin de la Société Botanique de France* 42: 259. 1895 and *Verh. Kon. Akad. Wetensch., Afd. Natuurk., Sect. 2*. 29(6): 109, 113, 119. 1933

(Ashes applied to itch, rashes.)

Olneya A. Gray Fabaceae (Robinieae)

For the American botanist Stephen Thayer Olney, 1812–1878, author of *Catalogue of plants*. Providence 1845. See E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 28. 1965, J. Ewan, ed., *A Short History of Botany in the United States*. 92. New York and London 1969, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 294. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 465. 1973, *Quarterly Review of Biology* 52: 155–178. 1977, *Aridus* 4(4): 1–4, 7. 1992.

Olneya tesota A. Gray

Mexico, USA, Arizona. Perennial non-climbing tree, very slow growing, small tree, many-branched, wide spreading crowns, pink to lavender flowers in short dense racemes or panicles, mature pods rapidly dehiscent, a nurse plant, seeds for food, livestock browse the foliage

See *Plantae Novae Thurberianae* 328. 1854 and *Pharmaceutical Biology* 46(10–11): 732–737. 2008, *J. Agric. Food Chem.* 57(2): 689–694. 2009

(Insecticidal, seeds contain a mild toxin. Sapwood drunk as an emetic. Antibacterial, against enteropathogenic bacteria, for gastrointestinal disorders, diarrhea and dysentery. Painfully sharp paired spines.)

in English: Arizona ironwood, desert ironweed, desert ironwood, ironwood, ironwood tree, tesota

Omphalocarpum P. Beauv. Sapotaceae

From the Greek *omphalos* ‘umbilicus, navel’ and *karpos* ‘fruit’, see *Bull. Soc. Philom. Paris* 2: 146. 1801, Palisot de Beauvois, Ambroise Marie Francois Joseph (1752–1820), *Flore d’Oware et de Benin en Afrique*. Paris, [1805–1821], *Annales du muséum national d’histoire naturelle* 5: 263. 1804 and *Pl. Bequaert*. 4: 100, 102. 1926.

Omphalocarpum elatum Miers (*Omphalocarpum anocentrum* Pierre ex Engl.; *Omphalocarpum radlkoferi* Pierre; *Omphalocarpum radlkoferi* Pierre var. *pluriloculare* Engl.; *Omphalocarpum trillesianum* Pierre ex Engl.)

Tropical Africa. Small tree, cauliflorous, white latex, flowers creamy-yellow lemon, hard fruit

See *Annales du muséum national d’histoire naturelle* 5: 263. 1804, *Transactions of the Linnean Society of London, Botany ser.* 2 1(1): 16, t. 4. 1875 [1880 publ. Jul 1875], *Bull. Mens. Soc. Linn. Paris* 1: 580. 1886 and *Monogr. Afrik. Pflanzen-Fam.* 8: 13, 15–16. 1904

(Bark and seed oil for constipation, wound dressing, syphilitic sores.)

in Cameroon: abo, aboc, bele, mbate, mebemengono, pinbi

in Central African Republic: mbate, mbati

in Ivory Coast: agua

in Gabon: olong

in Nigeria: usha (Igbo)

Omphalogonus Baillon Asclepiadaceae

From the Greek *omphalos* ‘umbilicus, navel’ and *gonia* ‘an angle’, see *Bull. Mens. Soc. Linn. Paris* 2: 812. 1889, *Histoire des Plantes* 10: 300. 1890 and *Annals of the Missouri Botanical Garden* 88(4): 550–568. 2001, see also genera *Parquetina* and *Periploca*.

Omphalogonus calophyllus Baill. (*Omphalogonus nigritanus* N.E. Br.; *Parquetina nigrescens* (Afzel.) Bullock; *Periploca calophylla* (Baill.) Roberty, nom. illeg., non *Periploca calophylla* (Wight) Falc.)

Tropical Africa. Liana, herbaceous, climbing, white sticky milky latex, reddish stem, leaves coriaceous succulent, corolla pale green tinged purple outside and pale yellow on inside, hard paired fruits

See *Species Plantarum* 1: 211–212. 1753, *Stirpium in Guinea medicinalium species novae ...* 1: 2. 1818, *Bull. Mens. Soc. Linn. Paris* 2: 812. 1889, *Histoire des Plantes* 10: 300. 1890 and *Bulletin of Miscellaneous Information Kew* 1912: 279. 1912, *Bulletin de l’Institut Française d’Afrique Noire* 15: 1429. 1953, *Kew Bulletin* 15: 205. 1961

(Latex abortifacient, diuretic, vermifuge, used against dysmenorrhea, rheumatism, arthritis. Roots decoction aphrodisiac, antidote, reptile repellent, for convulsions, spasms, epilepsy. Leaves urticant and stomachic; leaf sap laxative, for eyes troubles, venereal diseases. Arrow poison, fish poison.)

in Benin: agbodwadou, amandohonou, assobo, mampon, toboké, tona

in Central African Republic: mombango, moumngango

in Congo: (k)oro(k)u(k)o, korokuko, lolenga, mutali, mutalikuko, mutare, orouo

in Senegal: бага буé, бу takadi, kātālā

in Sierra Leone: bobokaiya, bumbot, koke, kpokoyangolo, ndowe, tambale-bisindo, wunte

in Tanzania: sikombe, ubombo

Omphalogonus nigritanus N.E. Br.

Nigeria, Tropical Africa.

See *Species Plantarum* 1: 211–212. 1753, *Stirpium in Guinea medicinalium species novae ...* 1: 2. 1818, *Bull. Mens. Soc. Linn. Paris* 2: 812. 1889, *Histoire des Plantes* 10: 300. 1890 and *Bulletin of Miscellaneous Information Kew* 1912: 279. 1912, *Bulletin de l’Institut Française d’Afrique Noire* 15: 1429. 1953, *Kew Bulletin* 15: 205. 1961

(Fish poison.)

Oncoba Forssk. Flacourtiaceae (Salicaceae)

From the Arabic name *onkob*, see Pehr (Peter) Forsskål (1732–1763), *Flora aegyptiaco-arabica*. 103. Copenhagen 1775.

Oncoba spinosa Forssk.

Tropical Africa. Spiny shrub or small tree, many-branched, rounded bushy crown, branches with straight slender and sharp axillary spines, leathery leaves, solitary flowers showy and fragrant, white overlapping petals, golden stamens, round shiny red-brown fruit, old calyx persistent, shiny brown seeds, sweet ripe orange-yellow pulp eaten fresh, along river banks, in woodland, scrub forest

See *Flora Aegyptiaco-Arabica* 1: cxiii, 103–104. 1775 and *Journ. Linn. Soc., Bot.* 37: 429. 1906, *For. Fl. Port. E. Afr.*: 12, t. 2 fig. B. 1909, *Journ. Linn. Soc., Bot.* 40: 23. 1911, *Wiss. Ergebn. Schwed. Rhod.-Kongo-Exped.* 1: 155. 1914, *Trans. Roy. Soc. S. Afr.* 5: 422. 1916, *Bull. Soc. Roy. Bot. Belg.* 86: 11. 1953, *Rhod. Agr. Journ.* 53: 62, cum tab. 1956, *Taxon* 29: 355–357. 1980

(Fruits and leaves for colds, fever, female infertility; seed oil febrifuge. Roots pounded, soaked in hot water and the liquid drunk to treat headache, diarrhea and dysentery. Magic ceremonies, superstitions.)

in English: African dog-rose, bush lime, fried egg tree, snuff-box tree, wild white rose

in Arabic: korkor, onkob

in Cameroon: takwa

in Ghana: asragui, asrato, asratoa, asratoa-dua, kpuri, kpuri-tia, monomorka

in Guinea: anyekedio, ko bara ni

in Ivory Coast: toanegosoro, toro sogo nani

in Mali: ko bara ni ko, sara bara, sira bara

in Nigeria: ajisabere, amurikpa, bilau, epúnung, gbomishere, gbonsere, gamugamusu, icákiricá, kakandika, kánkán diká, kokochiko, kokociko, kóókóócikoo, kóókóócikóó, màk-pàtalík, naki, ngumi, njora, njore, njori, okongul, okonkoul, okpoko, parisa, ponce ponceré, ponce, ponsere, tin púnúng, wofongo, wosao, wufongo

in Senegal: a-ñékedo, a-ñékodo, a-nékodo, a-ngubanan, be mével, dègdèg, gi-tioven, gi-tyofèn ganak, ka tãnda, ka tiãda, ko bara ni, lumbuj, lumbuti, mburkul, mud, mur, ndumbuj, nduyuf, ogèl, ogun, palkiu, sara bara, sarnana, si lind, sira bara, sirabara, unguti

in Sierra Leone: gbuwe, ndogbo-dumbele

in Southern Africa: iShungu elikhulu, isiNgongongo, kafferklapper, mutuzwu, snuifkalbassie, umShungu, umThongwana, umThongwane

in Tanzania: kaposo, katwa, mdara, mduvi, msaibi, msangu, msebeye, msuguswa, mtonga, ng'ewe, olboldoli, olsanangururi

in Togo: butjesu, fendira, kongofira, kongowura, kpoe, kruta, krutu

in Upper Volta: toro sogo nani

in W. Africa: babara, kongobarani

Oncocalyx Tieghem Lorantheaceae

From the Greek *onkos* 'bulk, mass, tumour' and *kalyx* 'calyx', see Jacquin, Nicolaus (Nicolaas) Joseph von (1727–1817), *Enumeratio Stirpium Plerarumque, quae sponte crescunt in agro Vindobonensi* 55, 230, pl. 3. 1762, *Flora Javae* 15. 1830, *Der Deutsche Botaniker Herbarienbuch* [1]: 73. 1841, *Bull. Soc. Bot. France* 42: 260. 1895.

Oncocalyx fischeri (Engl.) M.G. Gilbert (*Loranthus acaciatorum* Bullock; *Loranthus dichrostachydis* Chiov.; *Loranthus fischeri* Engl.; *Loranthus stuhlmannii* Engl.; *Loranthus stuhlmannii* var. *somalensis* Engl. ex Sprague; *Tapinanthus*

acaciatorum (Bullock) Danser; *Tapinanthus fischeri* (Engl.) Danser; *Tapinanthus stuhlmannii* (Engl.) Danser)

Tropical Africa. Shrub, parasite, hemiparasite, flowers orange-yellow, bright pink verrucose succulent fruits, grazed by animals, flowers eaten by goats

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 20: 85 t. 1 f. A. 1894 and *Bull. Misc. Inform. Kew* 1931, 271. 1931, *Fl. Somalia* 2: 386. 1932, *Verh. Kon. Akad. Wetensch., Afd. Natuurk.*, Sect. 2. 29(6): 107, 112, 120. 1933, *Nordic Journal of Botany* 5: 222. 1985

(Leaves and stem bark antiinflammatory, analgesic, for toothache. Decoction of branches used to bathe children with fever. Branches for people who have mental disturbance. Magic, to protect against loss of cattle caused by wild animals and thieves.)

in Tanzania: armandaite

Oncocarpus A. Gray Anacardiaceae

From the Greek *onkos* 'bulk, tumour' and *karpos* 'fruit', see *U.S. Expl. Exped.*, *Phan.* 15: 364, t. 43. 1854.

Oncocarpus vitiensis A. Gray (*Oncocarpus atra* Seem.; *Semecarpus atra* Vieill.; *Semecarpus vitiensis* Engl.; *Semecarpus vitiensis* (A. Gray) Engl.; *Semecarpus vitiensis* (A. Gray) T. Durand ex Drake)

Pacific.

See *U.S. Explor. Exped. Bot.* 15: 365. 1854, *Monogr. Phan.* [A. DC. & C. DC.] 4: 483. 1883, *Ill. Fl. Ins. Pacif.* 146. 1890

(The irritant milky juice may cause dermatitis.)

Common names: kau karo, itchwood tree

Oncosperma Blume Arecaceae (Palmae)

From the Greek *onkos* 'bulk, mass' and *sperma* 'seed', fruit spherical, see *Rumphia* 2: 96. 1843.

Oncosperma horridum (Griff.) Scheff. (*Areca horrida* Griff.)

Thailand, Malaysia. Tall prickly palms growing in clusters, spiny stem, leaf stalk strongly spiny, pinnate leaves finely leathery, spiny spathes on spiny hanging spikes, flowers spirally arranged in threes, waxy black fruits

See *Calcutta J. Nat. Hist.* 5: 465. 1845, *Natuurk. Tijdschr. Ned.-Indië* 32: 191. 1871

(Root decoction taken against fever.)

Malay names: bayas, nibong

Onoclea L. Dryopteridaceae (Onocleaceae, Aspleniaceae, Woodsiaceae)

From the Greek *onos* 'a vessel' and *kleio* 'to close, shut', referring to the sori or the rolled fertile fronds; *onokleia* was an ancient name for another plant (Dioscorides, Galenus); see Carl Linnaeus, *Species Plantarum*. 1062. 1753 and *Genera Plantarum*. Ed. 5. 484. 1754.

Onoclea sensibilis L. (*Calypterium sensibile* (L.) Bernh.; *Onoclea augescens* Link; *Onoclea obtusilobata* Schkuhr; *Onoclea sensibilis* forma *hemiphyllodes* (Kiss & Kümmerle) Gilbert; *Onoclea sensibilis* forma *obtusilobata* (Schkuhr) Gilbert; *Onoclea sensibilis* var. *obtusilobata* (Schkuhr) Torrey; *Pterinodes sensibile* (L.) Kuntze; *Ragiopteris obtusilobata* (Schkuhr) C. Presl; *Ragiopteris onocleoides* C. Presl; *Riedlea sensibilis* (L.) Mirb.)

Europe.

See *Species Plantarum* 2: 1062. 1753, *Journal für die Botanik* (Schrader) 1801: 22. 1802, *Histoire Naturelle des Végétaux, Classés par Familles* 5: 71. 1803, *Deutschland's kryptogamische Gewächse* 1: 95–96, pl. 103. 1809, *Tentamen Pteridographiae* 95–96, pl. 3, f. 9–10. 1836, *Filicum Species* 37. 1841, *Revisio Generum Plantarum* 2: 819–820. 1891 and Waller, E.F. et al. "Sensitive-fern poisoning of horses." *Univ. N. H. Agric. Stn. Tech. Bull.*, 83. 1944, *Huntia* 7: 223. 1987

(The plant, often abundant in low, wet areas, has been implicated in the poisoning and death of horses in field cases. Ingesting hay containing sensitive fern produces the following symptoms: difficulty in eating, falling down, walking as if blind, rubbing against objects, and death. *Onoclea sensibilis* resembles *Woodwardia areolata* (Linnaeus) T. Moore, with which it often grows.)

in English: sensitive fern

Onopordum L. Asteraceae

Greek *onos* 'an ass' and *porde* 'fart, crepitus ventris', *por-don*, *pardos* 'stinkard', Latin *onopordon*, *i* (al. *onopraddon*) 'a plant, St. Mary's thistle', Greek *onopordon* for the pellitory, *Parietaria cretica*; see Carl Linnaeus, *Species Plantarum*. 2: 827. 1753, *Genera Plantarum*. Ed. 5. 359. 1754 and *Bot. J. Linn. Soc.* 71(1): 46. 1975.

Onopordum acanthium L. (*Acanos spina* Scop.)

India, Nepal.

See *Species Plantarum* 2: 827. 1753, *Fam. Pl.* (Adanson) 2: 116. 1763, *Flora Carniolica*, Editio Secunda 2: 132–133. 1772 and *Watsonia* 11: 211–223. 1977, *Taxon* 28: 408. 1979, *Taxon* 29: 538–542. 1980, *Bot. J. Linn. Soc.* 82: 357–368. 1981, *Trans. Nebraska Acad. Sci.* 15: 49–52. 1987, *Watsonia* 20: 63–66. 1994, *Opera Bot.* 137: 1–42. 1999

(Roots antibacterial, used for urinary infections.)

in English: cotton thistle, Scotch thistle

in Nepal: mangh

Maori name: kotimana

Onosma L. Boraginaceae

Greek *onosma* for stone bugloss, *Onosma echioides*, Latin *onosma*, *atis* for a kind of *anchusa* (Plinius), see *Species Plantarum*, Editio Secunda 1: 196. 1762 and *J. Arnold Arbor.* 35: 73. 1954.

Onosma bracteata Wall.

India, Kashmir, Himalaya, Nepal. Herb, purple petals

See *Fl. Ind.*, ed. Carey & Wall. ii. 13. 1824

(Used in Ayurveda, Unani and Sidha.)

in India: arq gaozaban, arq-i- gaozaban, arq-i-gapzaban, barg gaozaban, burg gaozaban, canakippuntu, canakki, canakkikki-rai, darvipatra, erumainakki, gaajbaan saaf ki hui, gaavjabaana, gajubaan-saaf, gaozaban, gauzaban, gauzban, gauzuban, gavjaban patti, gazbaan, gazoban, goji, gojihva, gul-i-goozaban, gule-gaozaban, gul-i-gaozaban, gul gaozaban, gule-gajuban, gule gajvan, gule gauzban, gule-gazbaan, gulegaajban, gulegaajbaan asli, gulegaunzuban, gauzaban, ilavatitam, ilavtitaceti, itapavakanan, kanamuli, kharapatra, khomig, kolli, kollikai, kollikaiceti, nayaral, sankhaholi, valaipalatti

Onosma echioides (L.) L. (*Cerithe echioides* L.)

India.

See *Species Plantarum* 1: 136–137. 1753, *Species Plantarum*, Editio Secunda 196. 1762 and *Nuov. Giorn. Bot. Ital.*, n. s. 31: 24. 1924, *Prop. Brit. Bot.* 128. 1929, *Ber. Schweiz. Bot. Ges.* 85: 210–252. 1975, *Taxon* 27: 519–535. 1978

(Used in Ayurveda and Unani. Leaves antipyretic, purgative. Flowers cordial, tonic, stimulant, used in rheumatism and heart troubles. Roots powder mixed with butter and eaten for skin diseases; bruised roots applied to eruptions.)

in India: adhanani, anjanakeshi, dhamani, kapotabana, kapotacharana, kapotanghri, laljadi, nali, nalika, nalini, narttaki, nati, nirmadhya, raktadala, ratanajota, ratanjot, ratanjoat, rattanjot, shushira, stutya, vidrumalata

Onosma hookeri C.B. Clarke (*Onosma hookeri* subsp. *wardii* Stapf; *Onosma hookeri* var. *intermedium* I.M. Johnst.; *Onosma hookeri* var. *wardii* W.W. Sm.)

India.

See *The Flora of British India* [J.D. Hooker] 4(10): 178. 1883 and *Notes from the Royal Botanic Garden, Edinburgh* 9(42): 113. 1916, *Botanical Magazine* 155: pl. 9254. 1931, *Journal of the Arnold Arboretum* 32(4): 350. 1951

(Roots used for asthma, pneumonia, hypertension, and as a tonic for hair.)

in Bhutan: bri-mog

in China: xi hua dian zi cao

Onosma limitaneum I.M. Johnst.

Pakistan.

See *Journal of the Arnold Arboretum* 32(4): 354. 1951

(Dried plant to relieve chest congestion. Strong sedative effect.)

in Pakistan: charmang

Onosma paniculatum Bureau & Franchet (*Onosma oblongifolium* W.W. Smith & Jeffrey; *Onosma paniculatum* var. *hirsutistylum* Lingelshiem & Borza)

China.

See *Species Plantarum*, Editio Secunda 1: 196. 1762, *Journal de Botanique (Morot)* 5(7): 104–105. 1891 and *Notes from the Royal Botanic Garden, Edinburgh* 9(42): 113–114. 1916, *J. Arnold Arbor.* 35: 73. 1954

(Analgesic.)

in English: paniculate onosma

in China: dian zi cao, zi cao

Onosmodium Michx. Boraginaceae

Referring to the genus *Onosma* L., see *Flora Boreali-Americana* 1: 132–133, pl. 15. 1803.

Onosmodium molle Michx. (*Onosmodium carolinianum* (Lam.) A. DC. var. *molle* (Michx.) A. Gray)

North America.

See *Flora Boreali-Americana* 1: 133, pl. 15. 1803, *Synoptical Flora of North America* 2(1): 206. 1878 and *Bulletin of the Torrey Botanical Club* 32(9): 502–504. 1905

(Antirheumatic, for swellings, pains, joint pain. Veterinary medicine.)

in English: marble-seed, smooth Onosmodium, western false grommwell

Onosmodium molle Michx. subsp. ***hispidissimum*** (Mack.) B. Boivin (*Onosmodium bejariense* DC. var. *hispidissimum* (Mack.) B.L. Turner; *Onosmodium hispidissimum* Mack.; *Onosmodium molle* var. *hispidissimum* (Mack.) Cronquist)

North America.

See *Flora Boreali-Americana* 1: 133, pl. 15. 1803, *Synoptical Flora of North America* 2(1): 206. 1878 and *Bulletin of the Torrey Botanical Club* 32(9): 500–504. 1905, *Vascular Plants of the Pacific Northwest* 4: 234. 1959, *Phytologia* 22: 372. 1972, *Taxon* 31(2): 344–360. 1982, *Phytologia* 78(1): 45. 1995

(Antirheumatic, for swellings, pains, joint pain. Veterinary medicine.)

in English: marble-seed, smooth Onosmodium, western false grommwell

Onosmodium molle Michx. subsp. ***occidentale*** (Mack.) Cochrane (*Onosmodium bejariense* var. *occidentale* (Mack.) B.L. Turner; *Onosmodium molle* var. *occidentale* (Mack.) I.M. Johnst.; *Onosmodium occidentale* Mack.)

North America.

See *Bulletin of the Torrey Botanical Club* 32(9): 500–504. 1905, *Contributions from the Gray Herbarium of Harvard University* 70: 18. 1924, *The Michigan Botanist* 15: 104. 1976, *Phytologia* 78(1): 46. 1995

(Antirheumatic, for swellings, pains, joint pain, lumbago. Veterinary medicine.)

in English: western Onosmodium

Onychium Kaulfuss Pteridaceae (Adiantaceae, Cryptogrammeae)

Greek *onyx*, *onychos* ‘a claw, nail’, referring to the shape of the lobes of the fronds; in *Berlin. Jahrb. Pharm. Verbundenen Wiss.* 21: 45. 1820, *Enumeratio Filicum* 144–145. 1824 and *American Fern Journal* 20(4): 133. 1930, *Lingnan Sc. Journ.* 13: 495. 1934, Pichi Sermolli, *Webbia*. 17: 308. 20 Apr. 1963.

Onychium contiguum Wall. ex C. Hope (*Cheilanthes contigua* Baker; *Cheilanthes contigua* Wall.; *Cheilanthes contiguum* Wall., nom. nud.; *Onychium contiguum* C. Hope; *Onychium cryptogrammoides* H. Christ; *Onychium japonicum* (Thunb.) Kunze var. *intermedia* C.B. Clarke; *Onychium japonicum* var. *multisecta* C.B. Clarke; *Onychium japonicum* (Thunb.) Kunze var. *multisectum* C.B. Clarke)

China, India.

See *A Numerical List of Dried Specimens* [Wallich] n. 72. 1828, *Bot. Zeitung* (Berlin) 6(28): 507. 1848, *Syn. Fil.* (Hooker & Baker), ed. 2. 476. 1874, *Transactions of the Linnean Society of London, Botany* 1(7): 459. 1880 and *Journal of the Bombay Natural History Society* 13: 444. 1901, *Notulae Systematicae. Herbarium du Museum de Paris* 1(2): 52–53. 1909, *J. Cytol. Genet.* 19: 111–112. 1984, *J. Cytol. Genet.* 23: 38–52. 1988, *Aspects Pl. Sci.* 11: 459–465. 1989, *Bot. Mag.* (Tokyo) 105: 105–124. 1992

(Plant antibacterial.)

Onychium japonicum (Thunb.) Kunze (*Caenopteris japonica* Thunb.; *Caenopteris japonica* (Thunb.) Thunb.; *Caenopteris japonica* Willd.; *Cryptogramma japonica* (Thunb.) Prantl; *Cryptogramma japonica* Prantl; *Darea japonica* Willd.; *Darea japonica* (Thunb.) Willd.; *Onychium japonicum* Blume; *Pteris japonica* (Thunb.) Mett.; *Pteris japonica* Mett.; *Trichomanes japonicum* Thunb.; *Trichomanes japonicum* Franch. & Sav.; *Trichomanes japonicum* Poir.)

China, Japan.

See *Syst. Veg.*, ed. 14 (J.A. Murray). 941. 1784, *Fl. Jap.* (Thunberg) 340. 1784, *Phytogr.* 14 t. 8 f. 1. 1794, *Nova Acta Petr.* 9. 161 t. G. f. 2. 1795, *Encycl.* (Lamarck) 8: 79. 1808, *Sp. (Plant decoction astringent, antidyseric; whole herb paste mixed with honey given for the treatment of sexual weakness. Rhizome juice given to relieve fever.)

in India: shilpuji

in Nepal: kangiyo sottar, sumbu phul

in the Philippines: pakong anuang

Operculina Silva Manso Convolvulaceae

The diminutive of the Latin *operculum*, i 'a cover, lid', referring to the capsules, see *Candollea* 14: 11–60. 1952, *Cytologia* 44: 275–286. 1979, *Annual Taiwan Mus.* 38: 58–61. 1995.

Operculina macrocarpa Urban (*Convolvulus macrocarpus* Linn.; *Merremia alata* Rendle)

Brazil. Stout glabrous climber, stems hollow, 4-winged, funnel-shaped creamy white flowers, persisting calyx

See *Systema Naturae*, Editio Decima 2: 923. 1759 and *Symbolae Antillarum* 3: 343. 1902, *Flora of Tropical Africa* 4(2): 102. 1905

(An antidote to snakebite. Magic, ritual, seeds worn around the neck of a mental patient.)

in Brazil: jalapa-do-brasil, jalapão, batata-da-purga

Operculina turpethum (L.) J. Silva Manso (*Argyrea alulata* Miquel; *Convolvulus anceps* L.; *Convolvulus triquetra* Vahl; *Convolvulus turpethum* L.; *Convolvulus turpethus* L.; *Ipomoea altissima* Mart. ex Choisy; *Ipomoea anceps* (L.) Roemer & Schultes; *Ipomoea diplocalyx* Baker; *Ipomoea ornithopoda* B.L. Rob.; *Ipomoea turpethum* (L.) R. Br.; *Ipomoea turpethum* var. *anceps* (L.) Miquel; *Merremia turpetha* (L.) Rendle; *Merremia turpethum* (L.) Bojer; *Merremia turpethum* (L.) Rendle; *Operculina altissima* (Mart. ex Choisy) Meissn.; *Operculina ornithopoda* (B.L. Rob.) Ophelia chirata Griseb. (*Ophelia chirayita* (Roxb.) Griseb.)

Malay Peninsula.

See *Genera et Species Gentianearum* adjectis observationibus quibusdam phytogeographicis 320–321. 1839[1838]

(Febrifuge.)

Malay name: chiretta

Ophiocaulon Hook.f. Passifloraceae

From the Greek *ophis* ‘a snake, serpent’ and *kaulos* ‘stem’, referring to the climbing habit.

Ophiocaulon gummifer Harv. (*Ophiocaulon gummifer* Mast., nom. illeg., non *Ophiocaulon gummifer* Harv.)

Tropical Africa.

See *Sylva Telluriana* 129. 1838, *The Genera of South African Plants* 121. 1868, *Flora of Tropical Africa* 2: 518. 1871

(Very poisonous. Root for febrile complaints.)

in South Africa: imFulwa (Zulu)

Ophioglossum L. Ophioglossaceae

From the shape of the fructification, from the Greek *ophis* ‘a snake, serpent’ and *glossa* ‘a tongue’, snake-tongue, referring to the sometimes bifid apex above the fertile spike; see Carl Linnaeus, *Species Plantarum*. 2: 1062–1063. 1753, *Genera Plantarum*. Ed. 5. 484. 1754, *Genera Plantarum* 66. 1836, *Supplementum Tentaminis Pteridographiae*... 47, 56.

1845[1846], *Ber. Deutsch. Bot. Ges.* 1. 350–351. 1883 and *Mem. Torrey Bot. Club* 19(2): 112, 114, 120, 163. 1938, *Bull. Nation. Sc. Mus. Tokyo* ser. 2. 4: 327, 333–334. 1959, *Fl. Ecuador* 66: 107–170. 2001.

Ophioglossum costatum R. Br.

Australia.

See *Prodromus Florae Novae Hollandiae* 163. 1810 and *Bot. J. Linn. Soc.* 102(3): 205–217. 1990

(Rhizome antibacterial, cholagogue, antiseptic, antiemetic, used for wounds, sore eyes, nose bleeding.)

Ophioglossum pedunculatum Desv. (*Ophioglossum fibrosum* Schumacher.; *Ophioglossum wightii* Grev. & Hook.)

China.

See *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 5: 306. 1811, *Botanical Miscellany* 3: 218. 1833

(Plant antiviral, antiseptic, antidote to snakebite.)

Ophioglossum pendulum L. (*Ophioderma pendula* (L.) Presl)

East Africa, SE Asia.

See *Herb. Amboin.* t. 37, fig. 3. 1741, *Species Plantarum* 2: 1062–1063. 1753, *Gen. Pl.* ed. 5, 484. 1754, *Species Plantarum*, Editio Secunda 2: 1518. 1763, *Genera Plantarum* 66. 1836, *Supplementum Tentaminis Pteridographiae* 56. 1845 and *Flore de Madagascar et des Comores* 2: 1–8. 1951

(Ointment for skin diseases, hair tonic.)

in English: hanging adder’s tongue fern, ribbon fern

in Japan: kobu-ran (= knobby orchid)

Ophioglossum reticulatum L. (*Ophioglossum dudadae* Mickel; *Ophioglossum ellipticum* Hook. & Grev.; *Ophioglossum holm-nielsenii* B. (II) 47–67. 1986, *Bot. J. Linn. Soc.* 102(3): 205–217. 1990, *Indian Fern J.* 9: 94–101. 1992, *Brittonia* 44(3): 313, f. 1F. 1992, *Watsonia* 20: 63–66. 1994, *Flora of Ecuador* 66: 16, f. 3c. 2001

(Plants paste taken to treat stomach disorders, indigestion and acidity. Fern antiseptic, styptic, vulnerary, astringent, mucilaginous; fronds used as tonic, also taken to treat heart diseases; fresh fronds paste to check bleeding from cuts. A warm decoction of the rhizome used as a lotion for boils; root paste applied on wounds; powdered dried rhizome applied on ulcerated sores, burns and wounds; rhizome decoction taken internally to treat heart ailments, pulmonary and bronchial diseases. Leaves and rhizome if taken by men cause impotence.)

in English: common tongue fern

in India: ak-bir, ekpatia

in Nepal: jibre sag

Ophioglossum thermale Kom. (*Ophioglossum vulgatum* var. *thermale* (Kom.) C. Chr.)

China.

See *Repertorium Specierum Novarum Regni Vegetabilis* 13: 85. 1914, *Bot. J. Linn. Soc.* 102(3): 205–217. 1990

(Rhizome antibacterial, cholagogue, antiseptic, antiemetic, used for wounds, sore eyes, nose bleeding.)

Ophiopogon Ker Gawl. Asparagaceae (Convallariaceae, Liliaceae)

Greek *ophis* ‘a serpent, snake’ and *pogon* ‘a beard, hair’, tuft forming; see John Bellenden Ker Gawler, 1764–1842, in *The Botanical Magazine*. 27: t. 1063. 1807.

Ophiopogon bodinieri H. Léveillé (*Mondo bodinieri* (H. Léveillé) Farwell; *Mondo formosanum* Ohwi; *Ophiopogon bodinieri* var. *pygmaeus* F.T. Wang & L.K. Dai; *Ophiopogon filiformis* H. Léveillé; *Ophiopogon lofouensis* H. Léveillé)

Bhutan, China, Taiwan. Herb, low, very narrow linear wiry blades, flowers pale lavender, fruits green, grazed by cattle

See *Familles des Plantes* 2: 496. 1763, *Botanical Magazine* 27: pl. 1063. 1807 and *Mem. Pontif. Accad. Romana Nuovi*

Lincei. 23: 343. 1905, *Repertorium Specierum Novarum Regni Vegetabilis* 9(199–201): 78. 1910, *Bulletin de l'Académie Internationale de Géographie, Botanique* 25: 25. 1915, *American Midland Naturalist* 7(2): 42. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 36(1–6): 45. 1934, Wang Fa-tsuang & Tang Tsin, eds. 1978; 1980. *Liliaceae. (Widely cultivated in China for its tuberous roots, which are used medicinally for cough, anxiety, pharyngitis, thirst.)

in English: dwarf lily turf, Japanese snake's beard, lily turf

in China: mai dong, mai men dong

in Japan: ryu-no-hige (= dragon's beard)

in Okinawa: habukusa

in Vietnam: lan tien, mach mon

Ophiorrhiza L. Rubiaceae

From the Greek *ophis* 'a snake, serpent' and *rhiza* 'a root', referring to the serpentine roots; see Carl Linnaeus, *Species Plantarum*. 1: 150. 1753 and *Genera Plantarum*. Ed. 5. 74. 1754 and *Nucleus* 22: 47–50. 1979.

Ophiorrhiza communis Ridl.

Malaysia.

See *J. Straits Branch Roy. Asiat. Soc.* 61: 16. 1912

(For cough and enlarged spleen, pound the plant and poultice.)

Malay name: peparu

Ophiorrhiza eriantha Wight

India.

See *Icon. Pl. Ind. Orient.* [Wight] 3(4): t. 1067. 1846

(For scabies.)

in India: avilpori

Ophiorrhiza hirsutula Wight ex Hook. f.

India. Slender annual herb with white flowers

See *The Flora of British India* 3: 81. 1880 and *Nucleus* 22: 47–50. 1979

(Plant juice in snakebite.)

in India: garuda patala, mungisagida, sarpari

Ophiorrhiza mungos L. (*Ophiorrhiza ostindica* Christm., nom. inval.)

India to W. Malesia. Erect small herb, small white flowers in terminal cymes

See *Species Plantarum* 1: 150. 1753 and *New Botanist* 14: 47–54. 1987, *Glimpses in Plant Research* 8: 177–244. 1988, *Regnum Veg.* 127: 71. 1993

(Used in Ayurveda and Sidha. Whole plant poulticed. Root bitter, tonic. Roots, leaves and bark decoction given as a stomachic. Leaves for dressing ulcers.)

in India: aravakkiriti, aravakkiritippuntu, avilpori, avilpuri, bhiyangakshi, bili garuda paathaala, cadachi, caka, cakar, cakati, cannakarai, cannakaram pattai, caramankam, carpanayakceti, carpanayakam, carparaci, carpatci, cataicci, cataiccupuntu, cataippuntu, cayalavam, cemperikam, cemperikamuli, chhatrika, citakentika, cittika, cittikappuntu, cornakam, cornakappuntu, cukali, gandali, gandhanakuli, garuda paathaala, garuda patala, garudapatala, garudaputa, iracakiri, iracakirippuntu, karuncataicci, keerip-pundu, keerippundu,

kiri, kiri-p-puntu, kiric ceti, kiri-purandan, kiricceti, kiripundu, kirippuntu, kirippurandan, kirippurantan, kiripputu, kiripurandan, kiripurantan, kuttukkal, matavaniram, mungusavela, mungasee gida, mungasi gida, mungusee gida, nadikalapaka, nagasugandha, nagvelli, nakarutappuntu, nakarutapputu, nakavalli, nakulapputu, nakuleshtha, nakuli, nakulipputu, naranki, nava, paathaala garuda, pampukkolli, pampukolli, pampukollippuntu, patala garuda, patalabhedhi, patalagaruda, patalagarude, patalakarati, patalakarutan, patalabhedhi, pattirai, perunkirippuntu, perunkiripputu, pilukam, pitam, pucakam, pucakapputu, rasna, sadaichi, sarahati, sarhati, sarpaakshi chettu, sarpaari chettu, sarpakshi, sarpakshi-chettu, sarpaksi, sarपालocana, sarpari, sarpashi-chettu, sarpasicettu, surpashechettu, sarpshe chettu, sugandha, surasa, suvaha, tirkkapi, tirkkapipputu, tiruvilai, tiruvilaipputu, tutayi, tutayippuntu, vatacani, vatacanipputu, vipanam, vipanapputu

Malay name: kundunak

in Tibet: sa rba ksi

Ophiorrhiza nicobarica N.P. Balakr.

India, Nicobar. Herb with large white flowers in terminal cymes

See *Reinwardtia* 9(4): 411. 1980

(Leaves for dressing ulcers; leaf paste applied locally to ulcers. Root bitter, tonic; roots, leaves and bark decoction given as a stomachic.)

Ophiorrhiza ochroleuca Hook.f.

India, Himalaya. Glabrous herb, elliptic-lanceolate leaves, terminal or axillary dichotomous inflorescence

See *The Flora of British India* [J.D. Hooker] 3(7): 78. 1880

(Leaf juice given in headache.)

in India: laungla-mihik, longlamihik

Ophiorrhiza pumila Champ. ex Benth. (*Ophiorrhiza aureolina* H.S. Lo f. *qiongyaensis* H.S. Lo; *Ophiorrhiza hayatana* Ohwi; *Ophiorrhiza humilis* Y.C. Tseng; *Ophiorrhiza inflata* Maxim.; *Ophiorrhiza pumila* Merr. & Chun, nom. illeg.; *Ophiorrhiza pumila* var. *inflata* (Maxim.) Masam.; *Ophiorrhiza stenophylla* Hayata, nom. illeg.)

Vietnam, China, Japan.

See *Hooker's J. Bot. Kew Gard. Misc.* 4: 169–170. 1852, *Bull. Acad. Imp. Sci. Saint-Petersbourg* 32: 488. 1888 and *Icon. Pl. Formosan.* 2: 91. 1912, *Repert. Spec. Nov. (Leaf paste as poultice applied for the treatment of arthritis.)

in India: rangajari

Ophiorrhiza rugosa Wall. var. *prostrata* (D. Don) Deb & Mondal (*Ophiorrhiza harrisiana* B. Heyne ex Hook.f., nom. inval.; *Ophiorrhiza harrisiana* var. *condorensis* Pit.; *Ophiorrhiza harrisonii* G. Don; *Ophiorrhiza prostrata* D. Don; *Virecta prostrata* Buch.-Ham. ex D. Don)

Vietnam, India, Sri Lanka. Perennial herb

See *Prodromus Florae Nepalensis* 136. 1825 and *Fl. Indo-Chine* 3: 162. 1923, *Bull. Bot. Surv. India* 24: 228. 1982 [publ. 1983]

(Leaves infusion taken for body and chest pain.)

in Bangladesh: rubong

Ophiorrhiza singaporensis Ridl.

Malaysia.

See *J. Straits Branch Roy. Asiat. Soc.* 61: 17. 1912

(For leprosy, rub the plant.)

Malay name: rumput lumor

Ophiorrhiza subcapitata Wall. ex Hook.f.

India, Thailand, SE Asia.

See *Fl. Brit. India* 3: 83. 1880

(Decoction of roots and leaves mixed with honey taken orally for fever, sore throat, tonsils.)

in India: samachik

Ophiorrhiza treutleri Hook. f. (for the British (b. India) physician William John Treutler, 1841–1915 (d. Sussex), plant collector in Sikkim, 1868 Fellow of the Linnean Society.)

India, Himalaya.

See *The Flora of British India* 3: 83. 1880

(Leaf paste taken to cure burning sensation in urine.)

Ophryosporus Meyen Asteraceae

Greek *ophrys* and *sporos* 'a seed', see *Reise um die Erde* 1: 402. 1834.

Ophryosporus peruvianus (J.G. Gmel.) R.M. King & H. Rob. (*Flaveria peruviana* J.G. Gmel.; *Piqueria artemisioides* Kunth; *Piqueria peruviana* (J.G. Gmel.) B.L. Rob.)

Peru.

See *Genera Plantarum* 186–187. 1789, *Systema vegetabilium* 2(2): 1269. 1791[1792], *Icones et Descriptiones Plantarum*, quae aut sponte ... 3(1): 18. 1794[1795], *Nova Genera et Species Plantarum* (folio ed.) 4: 120. 1820[1818] and *Proceedings of the American Academy of Arts and Sciences* 42: 13. 1906, *Phytologia* 25: 66. 1972

(Infusion of upper plant in flower applied locally for skin diseases.)

Opilia Roxb. Opiliaceae

Derivation not known, possibly from the Greek *ope* ‘a hole, opening’ and *eilo* ‘to be shut, to assemble’, referring to the imbricate bracts concealing the flowers before opening; or from the Latin *opilio, onis* ‘a shepherd’, or from an Indian name; see William Roxburgh (1751–1815), *Plants of the Coast of Coromandel*. 2: 31, t. 158. London (Apr.) 1802.

Opilia amentacea Roxb. (*Groutia celtidifolia* Guill. & Perr.; *Opilia amentacea* auct.; *Opilia amentacea* Wall.; *Opilia amentacea* Roxb. var. *tomentella* Oliv.; *Opilia angiensis* De Wild.; *Opilia celtidifolia* var. *sphaerocarpa* Chiov.; *Opilia celtidifolia* var. *tomentella* (Oliv.) G.Ll. Lucas; *Opilia parviflora* Peter; *Opilia ruwenzoriensis* De Wild.; *Opilia tomentella* (Oliv.) Engl.)

Tropical Africa. Shrub, vine, scandent, lianescent, climbing, woody, multi-trunked, pendulous branches, fetid odor when cut, glabrous twigs, thick waxy leaves, axillary racemes, small fragrant flowers 5-merous greenish or yellowish, cone-like bracts around flower buds, oblong fruits light orange, white endosperm, green nectaries and stigma, ripe fruits eaten raw, leaves cooked as a vegetable, in savanna, in woodland, in riverine and montane forest

See *Plants of the Coast of Coromandel* 2: 31, t. 158. 1802, *Numer. List* [Wallich] n. 2331. 1830, *Florae Senegambiae Tentamen* 1: 101. 1831, *Repertorium Botanices Systematicae* 1: 377. 1842 and *Fl. Orania Zipp. Areaceae (Palmae)

Named after the Prince of Orange (Oranje), 1792–1849, Crown Prince of the Netherlands; see Karl Ludwig von Blume (1796–1862), in *Alg. Konst- en Letterbode*. 1829(19): 297. 1829, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 5: 489. 1845 and *Annales de l'Institut Botanico-Géologique Colonial de Marseille* 1(1): 11. 1933, *Principes* 28(4): 163. 1984.

Orania sylvicola (Griff.) H.E. Moore (*Macrocladus sylvicola* Griff.; *Orania macrocladus* Mart.)

Thailand, Malesia. Thornless jungle palm, densely leafy crown, solid nut

See *Hist. Nat. Palm.* 3(ed. 2): 186. 1845, *Calcutta J. Nat. Hist.* 5: 490. 1845 and *Principes* 6: 44. 1962

(Exceedingly poisonous.)

Malayan name: buah ibul

Oreocnide Miquel Urticaceae

From the Greek *oros* 'mountain' and *knide* 'nettle', see *Plantae Junghuhnianae* 1: 39. 1851, *Annales des Sciences Naturelles; Botanique*, série 4 1: 195. 1854.

Oreocnide frutescens (Thunb.) Miq. (*Boehmeria frutescens* (Thunb.) Thunb.; *Urtica frutescens* Thunb.; *Villebrunea frutescens* (Thunb.) Blume)

Nepal.

See *Syst. Vegetabilium*. Editio decima quarta 851. 1784, *Transactions of the Linnean Society of London* 2: 330. 1794, *Museum Botanicum* 2: 168. 1856, *Annales Museum Botanicum Lugduno-Batavi* 3: 131. 1867

(Root paste applied in case of scabies.)

in China: zi ma

in Nepal: chiple, lendru

Oreocnide integrifolia (Gaudich.) Miq. (*Oreocnide integrifolia* (Gaudich.) C.J. Chen; *Oreocnide integrifolia* Miq.; *Oreocnide integrifolia* subsp. *subglabra* C.J. Chen; *Villebrunea integrifolia* Gaudich.; *Villebrunea sylvatica* var. *integrifolia* Wedd.)

China, India. Shrub, multi-branched, fibrous bark, leaves elliptic-oblong or oblanceolate, flowers in clusters, black seed surrounded by clear flesh

See *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... Botanique*, pl. 91. 1847, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 16(1): 235, f. 20, 21. 1869, *Annales Museum Botanicum Lugduno-Batavi* 4: 306. 1869, *FBI* 5: 589. 1888 and *Fl. Xizang*. 1: 561. 1983, *Acta Phytotaxonomica Sinica* 21(4): 473–474. 1983

(Plant juice given in difficult urination, used also as eye wash and applied on pimples. Leaves poultice applied on forehead in headache. Root paste made along with the roots of *Leea sambucina* and *Cissus repens* given in bubo and boils.)

in China: quan yuan ye zi ma

in India: ingthum-abab-araung, thehauy-araung

Oreocnide rubescens (Blume) Miq. (*Oreocnide rubescens* Miq.; *Oreocnide sylvatica* (Blume) Miq.; *Oreocnide sylvatica* Miq.; *Urtica rubescens* Blume; *Urtica sylvatica* Blume; *Villebrunea integrifolia* var. *sylvatica* (Blume) Hook. f.; *Villebrunea rubescens* Blume; *Villebrunea rubescens* (Blume) Blume; *Villebrunea sylvatica* (Blume) Blume)

India.

See *Species Plantarum* 2: 983–985. 1753, *Bijdragen tot de flora van Nederlandsch Indië* 506. 1825, *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la ~Bonite~ ... (Leaves and bark boiled and the solution used to wash a patient with fever.)

in Papua New Guinea: andako

Oreosolen Hook.f. Scrophulariaceae

From the Greek *oros* ‘mountain’ and *solen* ‘a tube, channel, pipe’, see *Fl. Brit. India* [J.D. Hooker] 4(11): 318–319. 1884.

Oreosolen wattii Hook. f. (*Oreosolen unguiculatus* Hemsl.)

Himalaya.

See *The Flora of British India* [J.D. Hooker] 4(11): 319. 1884, *Hooker's Icones Plantarum* 25(3): t. 2467. 1896, *Bull. Misc. Inform. Kew* 1896(119): 213. 1896

(Roots as antiinflammatory.)

in Bhutan: sgon-bu

in China: zang xuan shen

Oricia Pierre Rutaceae

Origins obscure, possibly from the Greek *oros* ‘mountain’ or Latin *Oricius*, *a*, *um* ‘belonging to Oricum, Orician’; Oricum or Oricus, a town of Epirus, on the Ionian Sea, the tree which produces the turpentine grew there in abundance, see Vergilius, *The Aeneid*. 10, v. 136, *Ann. Sci. Nat., Bot. sér.* 2, 20: 90. 1843, *Bulletin Mensuel de la Société Linnéenne de Paris* 1897: 1287–1289. 1897.

Oricia bachmannii (Engl.) Verdoorn (*Oricia bachmannii* I. Verd.; *Oricia swynnertonii* I. Verd.; *Oricia swynnertonii* (Bak.f.) Verdoorn; *Oricia transvaalensis* Verdoorn; *Teclea bachmannii* Engl.; *Teclea swynnertonii* Baker f.) (the specific name honors Charles Francis Massey Swynnerton, 1877–1938, botanical collector in Gazaland, b. India 1877–d. Tanganyika 1938, farmer, botanical collector in Rhodesia and Mozambique, 1907 Fellow of the Linnean Society; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 339. Cape Town 1981, Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 668. 1994)

South Africa, Malawi. Tree, fragrant creamy flowers

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 153. 1897 and *J. Linn. Soc., Bot.* xl. 35. 1911, *Bull. Misc. Inform. Kew* 1926, 413–414. 1926

(Antiseptic, emetic.)

in English: twin-berry tree

in Southern Africa: oricia, tweelingbessieboom; ruAnzili, ruAnziti, chiRgwanzili (Shona); uMozane (Zulu); iNzanyane (Xhosa)

Oricia suaveolens (Engl.) Verdoorn (*Oricia suaveolens* I. Verd.; *Teclea suaveolens* Engl.; *Vepris suaveolens* (Engl.) Mziray)

Tropical Africa.

See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 23: 152. 1897 and *Bulletin of Miscellaneous Information Kew* 1926: 413. 1926, *Acta Universitatis Upsaliensis: Symbolae Botanicae Upsaliensis* 30(1): 76. 1992

(Stem bark and leaves antiparasitic, cytotoxic, analgesic, febrifuge, for toothache, fevers.)

in Nigeria: ain-adie (Yoruba)

Origanum L. Lamiaceae (Labiatae)

Ancient classical Greek name, *origanon*, *oreiganon*, *origanos*, *oreiganos*, possibly from the Greek *oros* ‘mountain’ and *ganos* ‘beauty, brightness, ornament, delight’, Latin

origanum and *origanon* and *origanus* for the plant wild-marjoram, organ (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 588–590. 1753, *Gard. Dict. Abr.*, ed. 4. [829]. 1754, *Genera Plantarum*. Ed. 5. 256. 1754, *Brit. Herb.* 381. 1756, *Syst. Pl.* [Gleditsch] 189. 1764 and *Rep. Bot. Exch. Cl. Brit. Isles*, 3: 433. 1913, V. Bertoldi, in *Revue de linguistique romane*. II: 140. Paris 1926, *Testi fiorentini del Dugento e dei primi del Trecento*, con introduzione, annotazioni linguistiche e glossario a cura di Alfredo Schiaffini. Firenze 1926, R. Strömberg, *Griechische Pflanzennamen*. 24–26, 117. Göteborg 1940, Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1015. New York 1967, *Notes Roy. Bot. Gard. Mexico* 48: 155–158. 1988, *Phytochemistry* 27(2): 439–444. 1988, *Economic Botany* 57(2): 218–230. 2003.

Ormosia amazonica Ducke (*Ormosia bopiensis* Pierce ex J.F. Macbr.; *Ormosia euneura* Harms)

Brazil. Perennial non-climbing tree, bright red seeds

See *Archivos do Jardim Botânico do Rio de Janeiro* 3: 139. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 972. 1926, *Field Museum of Natural History, Botanical Series* 13(3/1): 248–249. 1943

(Seed very poisonous if chewed. The seeds are a symbol of good luck and abundance, reputed to ward off any kind of bad luck, to protect one from jinxes, and keep away the evil eye.)

in Brazil: huayruru, huayruru macho, mulungu

Ormosia cambodiana Gagnep. (*Placolobium cambodianum* (Gagnep.) Yakovlev)

Cambodia. Perennial non-climbing tree

See *Transactions of the Linnean Society of London* 10: 360. 1811, *Flora van Nederlandsch Indië* 1(1): 1082. 1858 and *Notulae Systematicae. Herbarium du Museum de Paris* 3: 29. 1914, *Novosti Sist. Vyssh. Rast.* 10: 192. 1973

(Alkaloids. Stem laxative.)

in Laos: khi mou

Ormosia coccinea (Aubl.) Jacks. (*Ormosia costulata* (Miq.) Kleinhoonte; *Ormosia subsimplex* Spruce ex Benth.; *Robinia coccinea* Aubl.)

Brazil, Nicaragua. Perennial non-climbing tree, deep red and black seeds

See *Histoire des plantes de la Guiane Française* 2: 773. 1775, *Transactions of the Linnean Society of London* 10: 360. 1811, Miquel, Friedrich Anton Wilhelm (1811–1871), *Stirpes Surinamensis Selectae* 17–18. 1851 [Also issued as *Natuurkundige Verhandelingen van de Hollandsche Maatschappij der Wetenschappen te Haarlem* ser. 2, vol. 7. 1851], *Flora Brasiliensis* 15(1B): 316, pl. 125. 1862 and *Recueil des Travaux Botaniques Néerlandais* 22: 392. 1925, *Contributions from the United States National Herbarium* 32(5): 328. 1965

(Seeds poisonous if chewed and eaten; keep the seeds out of reach of small children. Magic, ritual, seed as amulet, a charm to attract good fortune and wealth.)

in Brazil: huayruru

Ormosia glauca Wall. (*Fedorouia glauca* (Wall.) Yakovlev; *Fedorovia glauca* (Wall.) Yakovlev)

India, Nepal, Himalaya. Perennial non-climbing tree

See *Pl. Asiat. Rar.* (Wallich). 2: 23, t. 125. 1831 and *Botaničeskij Žurnal* (Moscow & Leningrad) 56(5): 657. 1971

(Leaf juice applied to treat cuts and wounds.)

in Nepal: ghamra

Ormosia jamaicensis Urb.

Jamaica. Perennial non-climbing tree, red seeds

See *Symbolae Antillarum* 5(3): 366. 1908, *J. Org. Chem.* 25(11): 1959–1962. 1960, *The Journal of Organic Chemistry* 26(6): 2143–2145. 1961, *Tetrahedron Letters* 50: 6291–6294. 1966

(Alkaloids.)

in English: nickel, red nickel

Ormosia laxiflora Benth. ex Baker (*Afrormosia laxiflora* (Baker) Harms; *Afrormosia laxiflora* (Benth. ex Baker) Harms; *Pericopsis laxiflora* (Benth.) Meeuwen; *Pericopsis laxiflora* (Baker) Meeuwen; *Pericopsis laxiflora* (Benth. ex Baker) Meeuwen)

Tropical Africa. Perennial non-climbing tree, see also *Pericopsis laxiflora*

See *Fl. Trop. Afr.* [Oliver et al.] 2: 255. 1871 and *Die Natürlichen Pflanzenfamilien* 3: 158. 1906, *Bulletin du Jardin Botanique de l'État* 32(2): 218. 1962

(Leaves, stem and roots for headache, venereal diseases, eye inflammation and arthritis. Alkaloids. Roots tonic, stimulant, antiseptic, for asthenia; pounded bark for cough, pneumonia.)

in Benin: gorodjohi bodehi, kpassiwan

in Senegal: kulkuli

Ormosia macrocalyx Ducke (*Ormosia apulensis* Cortes, nom. nud.; *Ormosia chlorocalyx* Ducke; *Ormosia clorocalyx* Ducke; *Ormosia toledoana* Standl.)

Caribbean, Costa Rica. Perennial non-climbing tree

See *Flora de Colombia* 61. 1919, *Archivos do Jardim Botânico do Rio de Janeiro* 3: 137–138. 1922, *Publications of the Carnegie Institution of Washington* 461(4): 64. 1935, *Boletim Técnico do Instituto Agrônomo de Norte* 2: 23–24. 1944, *Ann. Missouri Bot. Gard.* 67(3): 741. 1980 [1981], *Journal of Ethnopharmacology* 53(3): 149–156. 1996

(Alkaloids.)

Ormosia nobilis Tul.

Brazil. Small tree, bright red seeds with a black spot

See *Transactions of the Linnean Society of London* 10: 360. 1811, *Archives du Muséum d'Histoire Naturelle* 4: 106. 1844 and *Guía de Árboles de Bolivia* 1–958. 1993

(Alkaloids.)

in English: lady bug tree

in Brazil: mulunga, mulungu

Ormosia panamensis Benth. (*Fedorovia panamensis* (Benth.) Yakovlev; *Ormosia macrocalyx* Ducke; *Ormosia panamensis* Benth. ex Seem.; *Ormosia stipitata* Schery)

Panama, Guatemala. Perennial non-climbing tree, cut trunk exuding a clear sticky sap, bright red seeds

See *The Botany of the Voyage of H.M.S. ~Herald~* 111. 1853 and *Archivos do Jardim Botânico do Rio de Janeiro* 3: 137–138. 1922, *Annals of the Missouri Botanical Garden* 30(1): 90–92, f. 2. 1943, *J. Am. Chem. Soc.* 80(6): 1506–1510. 1958, *Botaničeskij Žurnal (Moscow & Leningrad)* 56(5): 657. 1971, *Ann. Missouri Bot. Gard.* 67(3): 741. 1980 [1981]

(Alkaloids.)

in Spanish: chaperno, coronil, peronil

Ormosia sumatrana (Miq.) Prain (*Chaenolobium decemjugum* Miq.; *Chaenolobium septemjugum* Miq.; *Macrotropis sumatrana* Miq.; *Ormosia coarctata* sensu auct.; *Ormosia decemjuga* (Miq.) Prain; *Ormosia decemjuga* Prain; *Ormosia euphorioides* Gagnep.; *Ormosia euphorioides* Pierre ex Gagnepain; *Ormosia microsperma* Baker; *Ormosia septemjuga* Prain; *Ormosia septemjuga* (Miq.) Prain; *Ormosia sumatrana* Prain ex King; *Ormosia yunnanensis* Prain)

Sumatra, Thailand, Vietnam. Perennial non-climbing tree

See *Transactions of the Linnean Society of London* 10: 363–364, pl. 27. 1811, *Flora van Nederlandsch Indië* 1: 294, 302. 1860, *The Flora of British India* 2(5): 253. 1878, *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 66: 150, 468. 1897 and *Journal of the Asiatic Society of Bengal*. Part 2. *Natural history* 69(2): 183. 1900, *Notulae Systematicae*. *Herbier du Muséum de Paris* 3: 30. 1914, *Thai Forest Bulletin (Botany)* 13: 1–22. 1980, *Cancer Res.* 59(11): 2615–2622. 1999, *J. Nat. Prod.* 67(11): 1911–1914. 2004 [Activity-guided fractionation of the leaves of *Ormosia sumatrana* using a proteasome inhibition assay.]

(Alkaloids. Proteasome inhibitors: a novel class of potent and effective antitumor agents.)

in China: yun nan hong dou

Ornithogalum L. Asparagaceae (Hyacinthaceae, Liliaceae)

Name used by Dioscorides and Plinius, from the Greek *ornis*, *ornithos* ‘a bird’ and *gala* ‘milk’, in reference to the very fleshy bulbs or to the very white flowers, the white of an egg being called milk by the Greeks; Latin *ornithogale*, *es* and Greek *ornithogale* for a plant, the star of Bethlehem. See Carl Linnaeus, *Species Plantarum*. 306. 1753 and *Genera Plantarum*. Ed. 5. 145. 1754, Jacques Julien Houtton de Labillardière (1755–1834), *Novae Hollandiae plantarum specimen*. Parisiis 1804–1806 [1807].

Ornithogalum longibracteatum Jacq. (*Eliokarmos caudatum* (Aiton) Raf.; *Fenelonina bracteata* (Thunb.) Raf.; *Loncomelos caudatum* (Aiton) Dostál; *Ornithogalum bracteatum* Thunb.; *Ornithogalum caudatum* Aiton; *Ornithogalum massonii* J.F. Gmel., nom. illeg.; *Ornithogalum scilloides* Jacq.; *Stellarioides longibracteata* (Jacq.) Speta; *Urginea mouretii* Batt. & Trab.; *Urophyllon caudatum* (Aiton) Salisb., nom. inval.)

South Africa. Herb, bulbs, flowers green with white edge to petals, tepals with green keels

See *Species Plantarum* 1: 306–308. 1753, *Hort. Bot. Vindob.* 3: 18. 1777, *Collectanea* 2: 315. 1788 and *Bull. Soc. Bot. France* 68: 438. 1921 (publ. 1922), *Folia Mus. Rerum Nat. Bohemiae Occid.*, *Bot.* 21: 15. 1984, *New Botanist* 15: 61–68. 1988, *Stapfia* 75: 173. 2001, Germishuizen, G. & Meyer, N.L. (eds.) “Plants of Southern Africa: an annotated checklist.” *Strelitzia* 14: i-vi, 1–1231. National Botanical Institute, Pretoria. 2003

(Extremely poisonous; the root is the most poisonous part.)

in English: false sea onion, German onion, sea onion, wild onion

in East Africa: kikwashi

in Southern Africa: masxabana (Xhosa)

in Tanzania: nyondoita, nyondoito

Ornithogalum nutans Linnaeus (*Albucea chlorantha* Rchb.; *Albucea neapolitana* Montandon; *Albucea nutans* (L.) Rchb.; *Brizophila nutans* (L.) Salisb., nom. inval.; *Honorius nutans* (L.) Gray; *Hyacinthus myogalea* E.H.L. Krause; *Ifuon nutans* (L.) Raf.; *Myogalum affine* K. Koch & C.D. Bouché; *Myogalum nutans* (L.) Link; *Myogalum nutans* subsp. *prasandrum* (Griseb.) Nyman; *Myogalum prasandrum* (Griseb.) Walp.; *Myogalum thirkeanum* K. Koch; *Ornithogalum asernii* Velen.; *Ornithogalum chloranthum* Saut. ex W.D.J. Koch, nom. illeg.; *Ornithogalum nutans* subsp. *prasandrum* (Griseb.) Radenkova; *Ornithogalum prasandrum* Griseb.)

Bulgaria to Turkey.

See *Species Plantarum* 1: 306–308. 1753, *Gen. Pl.* ed. 5, 145. 1754, Samuel Frederick Gray (1766–1828), *A Natural Arrangement of British Plants* 2: 177. London 1821, *Consp. Fl. Eur.* 728. 1882, *Sitzungsber. Königl. Böhm. Ges. Wiss., Math.-Naturwiss. Cl.* 37: 63. 1893 and *Fl. Nar. Rep. Bulg.* 2: 288. 1964, Tutin, T.G. et al. (eds.) *Flora Europaea* 5: 1–452. Cambridge University Press, Cambridge. 1980, Davis, P.H. (ed.) *Flora of Turkey and the East Aegean Islands* 8: 1–632. Edinburgh University Press, Edinburgh. 1984, *Taxon* 41: 566. 1992, *Taxon* 44: 611–612. 1995, *Kew Bulletin* 52(1): 121–138. 1997, *Bocconeia, Monographiae Herbarii Mediterraneae Panormitani* 5: 743–747. 1997, *Linzer Biologische Beiträge* 32(2): 698. 2000, Ali, S.I. *Hyacinthaceae. Flora of Pakistan* 214: 1–20. Department of Botany, University of Karachi, Karachi. 2005

(Poisonous. The bulbs of *Ornithogalum* species are poisonous due to the presence of a variety of cardiotoxic cardenolides, and the bulbs should not be confused with those of wild onions.)

in English: nodding star-of-Bethlehem

Ornithogalum puberulum Oberm.

Namibia. Bulb, very small, ovoid, hard dark scales, white star-like flowers, tepals membranous

See *Bothalia* 12: 33. 1978

(Poisonous to the stock.)

Ornithogalum thyrsoides Jacq. (*Eliokarmos coarctatum* (Jacq.) Raf.; *Eliokarmos thyrsoides* (Jacq.) Raf.; *Lomaresis alba* Raf.; *Myogalum coarctatum* (Jacq.) Endl.; *Myogalum thyrsoides* (Jacq.) Endl.; *Ornithogalum bicolor* Haw.; *Ornithogalum ceresianum* F.M. Leight.; *Ornithogalum coarctatum* Jacq.; *Ornithogalum conicum* Willd. ex Kunth, nom. inval.; *Ornithogalum gilgianum* Schltr. ex Poelln.; *Ornithogalum grimaldiae* Nocca; *Ornithogalum hermannii* F.M. Leight.; *Ornithogalum revolutum* Jacq.; *Ornithogalum revolutum* sensu Ker-Gawl., non Jacq.; *Tomoxis coarctata* (Jacq.) Raf.)

South Africa.

See *Hort. Bot. Vindob.* 3: 17. 1777, *Icon. Pl. Rar.* 2: 20, t. 435. 1794, *Pl. Hort. Schoenbr.* 1: 46. 1797, *Flora Telluriana* 2: 24. 1837, *Fl. Tellur.* 3: 54, 59. 1837, *Catalogus horti academici vindobonensis* 1: 134. 1842, *Enum. Pl.* 4: 353. 1843 and *S. African Gard.* 23: 61. 1933, *J. Bot.* 71: 72. 1933, *Feddes Repert. Spec. Nov. Regni Veg.* 54: 23. 1944, *Cytologia* 56: 297–302. 1991

(All parts poisonous, but mainly the not edible bulbs; toxicity only if eaten, skin irritation following prolonged contact.)

in English: African wonder flower, Cape lily, chinchinchee, chincherinchee, chinkerinchee, common chinkerinchee, star-of-Bethlehem, wonder flower

in Portuguese: pinhas, torrões de açúcar

in South Africa: gewone tjenkerientjie, tjenkerientjie, viooltjie, witviooltjie

Ornithogalum umbellatum Linnaeus (*Hyacinthus umbellatus* (L.) E.H.L. Krause)

Europe to E. Medit. Perennial bulbous herb, flowers white, tepals white with a green stripe on the outer surface, moist wood along stream

See *Species Plantarum* 1: 306–308. 1753 and *Taxon* 28: 405. 1979, *Webbia* 33: 379–423. 1979, *Naturalia monspeliensia. Série botanique.* 29: 1–64. 1979, *Boletim da Sociedade Broteriana*, ser. 2 53(2): 745–791. 1981, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Biological, Chemical, Geological, Physical and Medical Sciences* 85: 563–574. 1982, *Ann. Mus. Goulandris* 6: 153. 1983, *Botaniceskij Žurnal SSSR* 70(8): 1130–1131. 1985, *Nordic Journal of Botany* 6: 525–544. 1986, *Bulletin de la Société Botanique de France, Lettres Botanique* 134: 155–163. 1987, *Travaux de l'Institut Scientifique, Université Mohammed V. 1995, *Bocconea*, *Monographiae Herbarii Mediterranei Panormitani* 5: 239–249, 743–747. 1996–7, *Kew Bulletin* 52(1): 121–138. 1997, *Flora Mediterranea* 7: 262–267. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Pruhonice)* 31: 11–12. 1999, Danin, A. *Distribution Atlas of Plants in the Flora Palaestina Area*. The Israel Academy of Sciences and Humanities, Jerusalem. 2004

(All parts poisonous, but mainly the not edible bulbs; toxicity only if eaten. Digitalis-like glycosides, very toxic to humans and livestock, are found throughout the plant, but are concentrated in the bulbs and the flowers. Symptoms of ingestion include pain in the mouth, stomach and intestinal irritation, nausea, abdominal pain and diarrhea, irregular heart rate, death, rarely; skin irritation, dermatitis, following prolonged contact.)

in North America: nap-at-noon, sleepy dick, snowdrop, star-of-Bethlehem

Ornithoglossum Salisb. Colchicaceae (Liliaceae)

Bird's tongue, from the Greek *ornis*, *ornithos* 'a bird' and *glossa* 'a tongue', the tepals are very narrow.

Ornithoglossum undulatum Sweet (*Cymation laevigatum* (Willd.) Spreng.; *Cymation undulatum* (Willd.) Spreng.; *Lichtensteinia laevigata* Willd.; *Lichtensteinia undulata* Willd.; *Ornithoglossum glaucum* var. *grandiflorum* Baker; *Ornithoglossum glaucum* var. *undulatum* (Willd.) Baker; *Ornithoglossum lichtensteinii* Schltld.; *Ornithoglossum undulatum* (Willd.) Spreng., nom. illeg.; *Ornithoglossum viride* var. *grandiflorum* (Baker) T. Durand & Schinz; *Ornithoglossum viride* var. *undulatum* (Willd.) J.F. Macbr.)

Namibia to Cape Prov. Geophyte, simple, stout, tepals quite tubular

See *Parad. Lond.* t. 54. 1806, *Brit. Fl. Gard.* 2: t. 131. 1825, *J. Linn. Soc., Bot.* 47: 449. 1879 and *Contr. Gray Herb.* 53: 6. 1918, *Opera Botanica* 64: 1–51. 1982

(Very poisonous to all livestock, can cause severe losses.)

Ornithoglossum viride (L.f.) Dryand. ex W.T. Aiton (*Melanthium viride* L.f.; *Onixotis viridis* (L.f.) Raf.; *Onixotis viridis* Raf.; *Ornithoglossum glaucum* Salisb., nom. illeg.; *Ornithoglossum viride* [Dryand.]; *Ornithoglossum viride* (L.f.) Dryand.)

SW. Cape Prov. Bulbous, perennial, tuber geophyte, leaves linear lanceolate basal sheathing, dark purple to dull green flowers, terminal raceme, in miombo woodland, *Burkea* woodland, Kalahari sands

See *Suppl. Pl.* 213. 1782 [1781 publ. Apr 1782], *Parad. Lond.* t. 54. 1806, *Hortus Kew.* (W.T. Aiton), ed. 2. 2: 327. 1811, *Fl. Tellur.* 2: 32. 1837 [1836 publ. Jan–Mar 1837]

(Very poisonous to stock.)

in English: Cape poison onion, poison onion

in South Africa: Cape slangkop, eendjies, geelslangkop, Kaapse slangkop, karoo-slangkop, slangkop, yellow slangkop

Ornithoglossum vulgare B. Nord. (*Ornithoglossum glaucum* Salisb., nom. illeg.)

Zimbabwe, Tanzania to S. Africa. Geophyte, slender or stout, tepals recurved

See *Opera Botanica* 64: 37–42, f. 1–2. 1982

(All parts of the plant, fresh or dried, are toxic.)

Orobanche L. Scrophulariaceae (Orobanchaceae)

Greek *orobagche*, *orobanche*, *orobos* 'a kind of vetch' and *anchein* 'to strangle', Akkadian *arawu* (*aramu*), *erewu*, *eremu* 'to cover', *erwum*, *ermu* 'covering, cover', referring to the parasitic habit of the plant; Latin *orobanche*, *es* for the broom-rape, choke-weed (Plinius); see Carl Linnaeus, *Species Plantarum*. 2: 632–633. 1753 and *Genera Plantarum*. Ed. 5. 281. 1754, *Nouveau Matériaux pour la Flore Atlantique* 102. 1874, *Bibliotheca Botanica* 4 19(1): 74, 85. 1890 and *Das Pflanzenreich* IV. 261 (Heft 96): 304. 1930, Salvatore Battaglia, *Grande dizionario della lingua italiana*. Walp.; *Phelipaea indica* (Buch.-Ham.) G. Don; *Phelipaea indica* (Buch.-Ham. ex Roxb.) G. Don; *Phelipanche aegyptiaca* (Persoon) Pomel; *Phelypaea aegyptiaca* (Pers.) Walp.)

India, China. Parasitic, a variable species

See *Species Plantarum* 2: 632–633. 1753, *Flora Atlantica* 2: 60. 1798, *Syn. Pl.* 2: 181. 1807, *Flora Indica*; or, descriptions of Indian Plants 3: 27–28. 1832, *A General History of the Dichlamydeous Plants* 4: 632. 1838, *Repertorium Botanicæ Systematicæ* 3: 463. 1844–1845, *Nouveaux Matériaux pour la Flore Atlantique* 102, 107. 1874 and *Journal of Palynology* 16: 85–105. 1980, *Taxon* 29: 704. 1980, *Bocconea*, *Monographiae Herbarii Mediterranei Panormitani* 11: 117–169. 1999

(Veterinary medicine, plant paste used to cure wounds, skin diseases, and also boils in the throat of cattle.)

in China: fen zhi lie dang

in India: bhatua ghas, bhatura, khumbi

in Pakistan: sabzgul, masosak, khar gheni

Orobanche alba Stephan (*Orobanche alba* Stephan ex Willd.; *Orobanche epithymum* DC.; *Orobanche rubra* Sm.)

China, India, Himalaya.

See *Species Plantarum*. Editio quarta 3(1): 350. 1800 and *Taxon* 29: 722–723. 1980

(Paste of leaves to cure wounds and cuts.)

in English: thyme broom rape

in China: bai hua lie dang

in India: tokra

Orobanche californica Cham. & Schltld. (*Myzorrhiza californica* (Cham. & Schltld.) Rydb.)

North America. Annual herb

See *Linnaea* 3(2): 134–136. 1828, *Linnaea* 29: 36. 1858

(Decoction of plant taken for colds.)

in English: California broomrape

Orobanche californica Cham. & Schltld. subsp. ***californica*** (*Myzorrhiza californica* (Cham. & Schltld.) Rydb.; *Orobanche grayana* G. Beck var. *nelsonii* Munz; *Orobanche grayana* G. Beck var. *violacea* (Eastw.) Munz)

North America. Annual herb

See *Linnaea* 3(2): 134–136. 1828, *Linnaea* 29: 36. 1858 and *Amer. J. Bot.* 91: 439–448. 2004

(Decoction of plant taken for pneumonia.)

in English: California broomrape

Orobanche cernua Loefl. (*Orobanche cernua* Vell., nom. illeg.; *Orobanche cernua* Pall.)

India, Himalaya. Parasitic, mauve flowers in dense spikes

See *Iter Hispanicum* 152. 1758, *Fl. Flumin.* 258. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 6: t. 71. 1831. [1827 publ. 29 Oct 1831]

(Veterinary medicine, against boils in throat of cattle.)

in English: broomrape, nodding broomrape

in China: wan guan lie dang

Orobanche cernua Loefl. var. ***hansii*** (A. Kern.) Beck (*Cistanche feddeana* K.S. Hao; *Orobanche hansii* A. Kern.)

India, China. Parasite

See *Iter Hispanicum* 152. 1758, *Fl. Flumin.* 258. 1829 [1825 publ. 7 Sep–28 Nov 1829], *Fl. Flumin. Icon.* 6: t. 71. 1831. [1827 publ. 29 Oct 1831], *Ber. Naturw. Ver. Innsbruck* i. (1870) 111. 1870, *Monogr. Orob.* 144, pl. 2, f. 33(4). 1890 and

Repertorium Specierum Novarum Regni Vegetabilis 36(12–15): 222. 1934

(Extract of leaves, stem, flowers and fruits given to promote kidney function.)

in India: sgro-shang-rtse

Orobanche coerulescens Stephan (*Orobanche ammophila* C.A. Meyer; *Orobanche bodinieri* H. Léveillé; *Orobanche canescens* Bunge; *Orobanche coerulescens* fo. *coerulescens*; *Orobanche coerulescens* f. *korshinskyi* (Novopokrovsky) Ma; *Orobanche coerulescens* f. *pekinensis* Beck; *Orobanche coerulescens* var. *albiflora* Kuntze; *Orobanche korshinskyi* Novopokrovsky; *Orobanche japonensis* Makino; *Orobanche mairei* H. Léveillé; *Orobanche nipponica* Makino; *Orobanche pycnostachya* Hance var. *yunnanensis* Beck)

Japan, China.

See *Species Plantarum* 2: 632–633. 1753, *Species Plantarum*. Editio quarta 3(1): 349. 1800, *Flora Altaica* 2: 454–455. 1830, *Enumeratio Plantarum, quas in China Boreali* 50, n. 282. 1831, *Journal of the Linnean Society, Botany* 13: 84–85. 1873, *Monogr. Botanical Club 60(6): 447, 449–450, f. 14–15. 1933, *Leaflets of Western Botany* 5(2): 36. 1947

(Plant poisonous to stock.)

in English: clustered broom rape, clustered broomrape

Orobanche ludoviciana Nutt. (*Aphyllon ludovicianum* (Nutt.) A. Gray; *Myzorrhiza ludoviciana* (Nutt.) Rydb.; *Phelipaea ludoviciana* (Nutt.) Walp.)

North America. Annual herb

See *The Genera of North American Plants* 2: 58. 1818, *Repertorium Botanices Systematicae*. 3: 461. 1844, *Geological Survey of California, Botany* 1: 585. 1876 and *Flora of the Southeastern United States* 1093. 1903

(Poultice for skin diseases.)

in English: Louisiana broomrape, prairie broomrape

Orobanche ludoviciana Nutt. subsp. *ludoviciana* (*Aphyllon arenosum* Suksd.; *Conopholis ludoviciana* (Nutt.) Alph. Wood; *Myzorrhiza ludoviciana* (Nutt.) Rydb.; *Orobanche ludoviciana* Nutt. var. *arenosa* (Suksd.) Cronquist; *Orobanche ludoviciana* Nutt. var. *genuina* G. Beck; *Orobanche multiflora* Nutt. var. *arenosa* (Suksd.) Munz)

North America. Annual herb

See *The Genera of North American Plants* 2: 58. 1818, *Repertorium Botanices Systematicae*. 3: 461. 1844, *Geological Survey of California, Botany* 1: 585. 1876 and *Flora of the Southeastern United States* 1093. 1903

(Poultice for skin diseases, ulcers, sores.)

in English: Louisiana broomrape, prairie broomrape

Orobanche minor Smith (*Orobanche ambigua* Pomel; *Orobanche barbata* Poir.; *Orobanche barbata* Poir. var. *violacea* Maire; *Orobanche curvata* Pomel; *Orobanche minor* Sutton; *Orobanche minor* Sm. var. *ambigua* (Pomel) Batt.; *Orobanche minor* Sm. var. *hyalina* (Reut.) Batt.; *Orobanche minor* Sm. var. *minor*; *Orobanche nudiflora* Wallr.)

South Africa.

See *Species Plantarum* 2: 632–633. 1753, *English Botany* 6: pl. 422. 1797 and *Taxon* 30: 507–508. 1981, *Gayana, Botánica* 42: 1–157. 1985, *Fieldiana: Botany, New Series* 41: 165–169. 2000

(Whole plant given to promote kidney function.)

in English: clover broom rape, lesser broom rape

in South Africa: klawerbesemraap

Orontium L. Araceae

From the ancient Greek *orontion*, name of a water-plant, a remedy for jaundice (Galenus), possibly from Orontes, a river in Syria, Latin *Oronteus*, poetic for Syrian, see *Acta Acad.*

Nat. Cur. App. 8: 206. 1748, *Species Plantarum* 1: 324. 1753, *Fam. Pl.* 2: 470. 1763, *Ordines Naturales Plantarum* 24, 68. 1830, *Autikon Botanikon* 158–159. 1840.

Orontium aquaticum Linnaeus (*Amidena undulata* Raf.; *Aronia aquatica* (L.) Baill.; *Orontium angustifolium* Raf.; *Orontium aquaticum* f. *natans* Glück; *Orontium aquaticum* f. *terrestre* Glück; *Orontium vaginatum* Raf.; *Pothos ovatus* Walter)

North America. Aquatic, rhizomatous herb, erect leaves broadly strap-like, yellow flowers on an elongated naked erect spadix, roots very bitter

See *Sp. Pl.* 1: 324. 1753, *Gen. Pl.* ed. 5: 151. 1754, *Fl. Carol.*: 224. 1788, *Autik. Bot.*: 197. 1840, *Histoire des Plantes* 13: 508. 1895 and *Beih. Bot. Centralbl.* 39(2): 319. 1923, Grear, J.W. Jr. “Cytogeography of *Orontium aquaticum* (Araceae).” *Rhodora* 68: 25–34. 1966, *Nordic J. Bot.* 9: 119–166. 1989, Klotz, L.H. “On the biology of *Orontium aquaticum* L. (Araceae), golden club or floating arum.” *Aroideana* 15: 25–33. 1992

(All parts poisonous, low toxicity if eaten, burning and swelling of lips, tongue and throat; contact may cause skin irritation, dermatitis. Fleshy rootstalk acid.)

in English: floating arum, golden club

Orophea Blume Annonaceae

From the Greek *orophe* ‘roof, ceiling of a room’, referring to the petals, see *Bijdragen tot de flora van Nederlandsch Indië* 18. 1825, *Flora van Nederlandsch Indië* 1(2): 32–33. 1858 and *Sci. Rep., Coll. Gen. Educ., Osaka Univ.* 36: 7–32. 1987, *Blumea* 33(1): 13. 1988. Roots of *Orophea* sp., Malay name *supucha pelandok*, used for coughs.

Orophea katschallica Kurz

India. Tree or shrub, blackish branchlets, bright red fruits

See *Journal of Botany*, being a second series of the Botanical Miscellany 13: 323. 1875

(Chewed leaves sprayed to disperse honeybees; leaf-juice used as bee repellent; juice rubbed on face and arms for protection.)

in India: tanjoge, tapileialo, tonyoge, toyoge, toyonggo

Orophea setosa King (*Pseuduvaria setosa* (King) J. Sinclair)

Malay Peninsula.

See *Journal of the Asiatic Society of Bengal*, Pt. 2, *Nat. Hist.* 61(1): 80. 1892 and *Gardens’ Bulletin, Straits Settlements* 14: 43. 1953

(Roots febrifuge.)

Malay name: pialu

Orophea thomsonii Bedd.

India.

See *Madras Journal of Literature and Science* Ser. II, 22: 72. 1861

(Leaf, stem bark and root bark crushed and made into a paste taken as stimulant, tonic.)

in India: pinchili

Orostachys Fisch. Crassulaceae

From the Greek *oros* 'mountain' and *stachys* 'a spike', referring to the habitat and flowering, see *Species Plantarum* 1: 429–430. 1753, *Mémoires de la Société Impériale des Naturalistes de Moscou* 2: 270, 274. 1809 and *J. Fac. Sci. Univ. Tokyo, Bot.*, 12(4): 160. 1978, *Taxon* 41: 561. 1992, *Taxon* 44: 611–612. 1995, *Sosud. Rast. Sovet. Dal'nego Vostoka* 7: 231. 1995, *Novosti Sist. Vyssh. Rast.* 32: 41–42, 48. 2000.

Orostachys fimbriata (Turczaninow) A. Berger (*Cotyledon fimbriata* Turczaninow; *Cotyledon fimbriata* var. *ramosissima* (Maximowicz) Maximowicz; *Orostachys fimbriata* var. *grandiflora* F.Z. Li & X.D. Chen; *Orostachys fimbriata* var. *shandongensis* F.Z. Li & X.D. Chen; *Orostachys jiuhuaensis* X.H. Guo & X.L. Liu; *Orostachys ramosissima* (Maximowicz) V.V. Byalt; *Sedum fimbriatum* (Turczaninow) Franchet; *Sedum fimbriatum* var. *ramosissimum* (Maximowicz) Fröderström; *Sedum limuloides* Praeger; *Sedum ramosissimum* (Maximowicz) Franchet; *Umbilicus fimbriatus* (Turczaninow) Turczaninow; *Umbilicus ramosissimus* Maximowicz)

China.

See *Bull. Soc. Imp. Naturalistes Moscou* 17: 241. 1844 and *Nat. Pflanzenfam.*, ed. 2. 18a: 464. 1930

(Abortifacient, contraceptive.)

in China: wa song

Oroxylum Vent. Bignoniaceae

From the Greek *oros* 'mountain' and *xylon* 'wood', a pachycaul tree, see *Decas Generum Novorum* 8. 1808, *Forest Flora of British Burma* 2: 237. 1877.

Oroxylum indicum (L.) Bentham ex Kurz (*Bignonia indica* L.; *Bignonia indica* Lour.; *Bignonia pentandra* Lour.; *Calosanthos indica* (L.) Blume; *Calosanthos indica* Blume; *Hippoxylum indica* (L.) Raf.; *Hippoxylum indica* Raf.; *Oroxylum indicum* (L.) Kurz; *Oroxylum indicum* (L.) Vent.; *Oroxylum indicum* Vent.; *Spathodea indica* (L.) Pers.; *Spathodea indica* Pers.)

India, southern China, Philippines. Deciduous small tree, open irregular crown, sparingly branched, compound opposite leaves crowded near the end of the stem

or branches, erect raceme terminal, flowers bisexual, brown coriaceous campanulate calyx, yellowish to pinkish funnel-shaped corolla, fruit a black sword-like capsule, papery-winged seeds, membranous and transparent wing, young shoots and cooked flowers used as a vegetable, bitter bark and fruits used in tanning and dyeing, the flowers are large, nocturnal and offensive fetid smelling and said to be bat pollinated, in secondary growth and thickets, along the riverbanks or slopes

See *Species Plantarum* 2: 622–625. 1753, *Flora Cochinchinensis* 2: 379, 460. 1790, *Syn. Pl.* (Persoon) 2(1): 173. 1806, Ventenat, Étienne Pierre (1757–1808), *Decas Generum Novorum* aut parum cognitorum ... 8. Parisiis, 1808, *Bijdragen tot de flora van Nederlandsch Indië* 14: 760. 1826, *Sylva Telluriana* 78. 1838, *Forest Flora of British Burma* 2: 237. 1877, *FBI* 4: 378. 1884 and *Ind. Trees* 496. 1906, *For. Fl. Punj.* 377. 1918, *Wayside Trees of Malaya* 1: 166. 1952, *Journal of Ethnopharmacology* 85(2–3): 207–215. 2003

(Used in Ayurveda. Lipoxygenase inhibitors. Bark vermicide, tonic, antiinflammatory, antirheumatic, antidiarrheal, astringent, antidyenteric, diuretic, antiseptic, antimicrobial; crushed bark boiled and the extract taken to cure jaundice; bark paste heated and applied in muscular pain, rheumatism, rheumatoid arthritis; bark extract of *Woodfordia fruticosa* along with extract of barks of *Oroxylum indicum*, *Mangifera indica*, *Bauhinia racemosa* and *Dalbergia lanceolaria* given for jaundice; bark of *Oroxylum indicum* along with barks of *Pterocarpus marsupium*, *Bridelia retusa*, *Dalbergia lanceolaria* and *Albizia lebbek* crushed with water and the extract given for jaundice; bark extract with extract of barks of *Morinda pubescens*, *Haldina cordifolia* and *Terminalia bellirica* given in jaundice; root decoction of *Plumbago zeylanica* with bark of *Oroxylum indicum* and roots of *Carissa congesta* given for jaundice; stem bark decoction given for liver ailments as hepatic stimulant, hepatoprotective; bark along with prop roots of *Ficus benghalensis* and bark of *Dalbergia lanceolaria* crushed with water and the extract given for jaundice; decoction of bark along with that of bark of *Radermachera xylocarpa* given in jaundice; bark along with barks of *Dalbergia lanceolaria*, *Albizia lebbek* and *Pterocarpus marsupium* crushed with water and the extract given for jaundice; juice of stem bark mixed with cow's milk given for treatment of bone fracture; powdered stem bark taken for easy delivery and dysentery; powdered bark mixed with water given to cure jaundice and general weakness, also applied in rheumatism; powdered stem bark along with powdered grain of *Hordeum vulgare* and black pepper given in dysentery and diarrhea. Root juice taken for body pain; root bark as a tonic in stomach complaints; root applied to cure diseases of gum. Seeds and bark antiphlogistic, used for alleviating pain; seed laxative and expectorant; paste of the seeds applied to wounds; treatment of snakebite, seed paste prepared with hot water applied externally. Leaves of *Acanthus ebracteatus*, stembark of *Oroxylum indicum* and stems of *Cryptolepis buchananii* and *Derris scandens*

used as remedies for arthritis. Root paste, with the flowers of *Michelia champaca*, said to increase fertility in women. Veterinary medicine, roots mixed with turmeric for healing sores of animals; for maggot wounds, a strip of bark tied around the animal's neck, and ground bark fed orally to the animal; to cure wounds and sores of cattle, burnt stem bark ash applied directly on the septic wounds; seed preparations externally applied to abscesses, mammary abscesses. Ceremonial, magico-religious beliefs, ritual, a venerable form of flower for the Buddhists; a pod is hung over the entrance of the house or a necklace of seeds tied around neck to keep evil spirits away and/or to prevent contagious disease from affecting people.)

in English: India trumpet flower, Indian calosantes, midnight horror, tree of Damocles

in Bangladesh: egaroh

in Cambodia: pi ka

in China: mu hu die, mu hu die shu

in India: achi, alangi, archange kawm, banskali, bapani chettai, bapinichettu, bhatghila, bunepale, daskaranda, dhangrikhara, dundilum, dundukara, fanafania, ghoranau, hastidantaphala (hasti, elephant, dant, tooth, phala, fruit), jamlaomala, kotadi chettu, kotor, krishnadinga, lompaising, mokka vepa, napak-ban-araung, nemali chettu, pak-sam, pampini, pana, peiarlankei, phamphana, phan phana, phanphana, phapen, phaphni, ponponia, sheonak, shyonak, sona, sonachhal, sonakanka, sonapatha, syonaka, syonakah, talaralu, tandricettu, tantia, tappakaya, tentu, tetav, tetoli, tetu, titu, totola, urru

in Indonesia: kayu lanang, mungli, pongporang

in Laos: lin may, ung ka

in Malaysia: beka, beka kampung, bekak, bekak kampung, bikir, bikir angkup, boli, boloi, bonglai, bonglai kayu, bongloi, bulai, bulai kayu, daun juak, kankatong, kulai, merelai, merlai

(Roots decoction as an eyewash.)

in English: one-side pyrola, one-sided wintergreen, sidebells wintergreen

in China: dan ce hua

Orthrosanthus Sweet Iridaceae

Flower opens early in the day, from the Greek *orthros* ‘morning’ and *anthos* ‘flower’, referring to the short-lived flowers, fading before noon; see the British horticulturist and botanist Robert Sweet (1783–1835), *Flora Australasica*. t. 11. London 1827, *Fl. Tellur.* 4: 30. 1838 [1836 publ. mid-1838] and *Fieldiana, Bot.* 24(3): 159–178. 1952, *Ann. Missouri Bot. Gard.* 74(3): 577–582. 1987, *Fl. Mesoamer.* 6: 71–80. 194.

Orthrosanthus multiflorus Sweet (*Eveltria multiflora* Raf.; *Eveltria multiflora* (Sweet) Raf.; *Libertia azurea* Baker; *Libertia stricta* Endl.; *Orthrosanthus multiflorus* var. *hebecarpus* Benth.; *Sisyrinchium cyaneum* Lindley; *Sisyrinchium multiflorum* Steud.; *Sisyrinchium multiflorum* (Sweet) Steudel; *Sisyrinchium multiflorum* Lem.; *Sisyrinchium multiflorum* Phil.)

South America, Australia.

See *Fl. Australas.*: t. 11. 1827, *Bot. Reg.* 13: t. 1090. 1827, *Fl. Tellur.* 4: 30. 1838, *Nomencl. Bot.*, [Steudel], ed. 2, 2: 596. 1841, *Pl. Preiss.* 2: 32. 1846, *Fl. Austral.* 6: 411. 1873, *Handb. Irid.*: 118. 1892, *Anales Univ. Chile* xci. (1895) 628. 1895

(Roots decoction drunk as laxative, drastic purgative.)

in English: morning flag, morning iris

Orthrosanthus occissapungus (Ruiz ex Klatt) Diels (*Orthrosanthus chimboracensis* (Kunth) Baker subsp. *tunariensis* (Kuntze) Ravenna; *Orthrosanthus nigrorhynchus* Rusby; *Orthrosanthus occissapunga* (Ruiz) Diels; *Orthrosanthus occissapungus* (Klatt) Diels; *Orthrosanthus ocisapunga* Diels; *Orthrosanthus tunariensis* Kuntze; *Sisyrinchium occissapungum* Ruiz ex Klatt)

South America, Argentina, Bolivia.

See *Linnaea* 31: 379. 1862, *Mem. Torrey Bot. Club* 6: 126. 1896, *Revis. Gen. Pl.* 3(3): 309. 1898 and *Nat. Pflanzenfam.* ed. 2, 15a: 478. 1930, *Revista Inst. Munic. Bot.* 3(2): 30. 1969

(Roots decoction drunk as laxative, drastic purgative.)

Vernacular names: pajapurgante, palma-palma

Oryza L. Poaceae (Gramineae)

Latin and Greek *oryza* ‘rice’, Arabic *eruz*, Tamil *arisi* or *erisi*, Malayalam *ari*; hybridizes with *Triticum* L., resembling *Leersia*, type *Oryza sativa* L., see Carl Linnaeus, *Species Plantarum*. 1: 333. 1753, *Genera Plantarum*. Ed. 5. 155. 1754, *Nova Genera et Species Plantarum seu Prodromus* 1, 21. 1788, *Exposition des Familles Naturelles* 1: 87. 1805, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 76, 77. 1813, *Révision des Graminées* 1: 6. 1829, H.G.L. Reichenbach (1793–1879),

Oryza nivara S.D. Sharma & Shastry (*Oryza sativa* f. *spontanea* Roshev., nom. illeg.)

South and SE Asia, Tropical Asia. Annual, short to intermediate height, not stoloniferous, semi-erect to decumbent, caryopsis deciduous at maturity, a wild relative of rice, forms weedy hybrids with cultivated rice, valuable as food supplement (in India and Sri Lanka), usually found in swampy areas, seasonal swamp, at edge of pond and tanks, beside streams, in ditches, in or around rice fields, grows in shallow water, in seasonally dry and open habitats, dry pond, similar to *Oryza sativa* L.

See *Indian Journal of Genetics and Plant Breeding* 25: 161. 1965

(Discovered to be a source of resistance for the grassy stunt virus (GSV) biotype one.)

Oryza officinalis Wallich ex G. Watt (*Oryza minuta* J. Presl; *Oryza minuta* var. *sylvatica* (Camus) Veldkamp; *Oryza officinalis* Wall.)

Tropical Asia, SE Asia. Annual or perennial, tufted, stoloniferous, erect to semi-erect, leaf sheath tight and inflated, weed, eaten by cattle, severe infestation in Vietnam and other Southeast Asian countries, grown spontaneously, from half-shaded area in a forest margin to a disturbed sunny area.

See *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 77. 1813, *Reliquiae Haenkeanae* 1(4–5): 208. 1830, *A Numerical List of Dried Specimens* no. 8635. 1848, *Dictionary of the economic products of India* 5: 500. 1891 and *Bulletin du Muséum d'Histoire Naturelle* 27: 456, f. 41, t. 18. 1921, *Botanical Magazine* (Tokyo) 75: 422. 1962, *Blumea* 37(1): 232. 1992, *Chin. J. Rice Sci.* 10(3): 138–142. 1996, *Journal of Cytology and Genetics* 31(2): 195–198. 1996

(Ceremonial, ritual, a kind of holy plant and is protected within sanctuaries of Buddhist temples.)

Oryza rufipogon Griffith (*Oryza cubensis* Ekman ex Gotoh & Okura; *Oryza fatua* J. König ex Trin.; *Oryza fatua* var. *longearistata* Ridl.; *Oryza glumipatula* Steud.; *Oryza paraguayensis* Franch.; *Oryza paraguayensis* Wedd. ex E. Oxford* 3: 728. 1853, *Synopsis Plantarum Glumacearum* 1: 419–420. 1854

(A poultice for wounds and skin diseases.)

in English: roughleaf ricegrass

Osbeckia L. Melastomataceae

For the Swedish clergyman Pehr Osbeck, 1723–1805, naturalist and botanist, a student of Linnaeus, traveller and plant collector in South East Asia, Java and China; see Carl Linnaeus, *Species Plantarum*. 1: 345–346. 1753 and *Genera Plantarum*. Ed. 5. 162. 1754, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 3: 140. 1828, *Comm. Phytogr.* 72. 1840, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 643. 1852, *Transactions of the Linnean Society of London* 28(1): 53–54. 1871[1872] and Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 33. 1965, T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 295. 1972, S. Lenley et al., *Catalog of the Manuscript and Archival Collections and Index to the Correspondence of John Torrey*. Library of the New York Botanical Garden. 318. 1973, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 267–268. 1981, Emil Bretschneider (1833–1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition, St. Petersburg 1898.] Leipzig 1981.

Osbeckia aspera Blume (*Osbeckia aspera* Benth.)

India. Shrub, reddish-violet flowers

See *Numer. List* [Wallich] n. 4073. 1831, *Flora* 14: 474. 1831

(Used in Ayurveda and Sidha.)

in India: katou-kadah, kattukkadalai, kattukkadali, kattukkatalai, kattukkatali, tinisah, totukara

Osbeckia brachystemon Naudin

India.

See *Ann. Sci. Nat., Bot.* sér. 3, 14: 57. 1850 and *J. Cytol. Genet.* 25: 321–322. 1990

(Leaf paste applied on boils.)

in India: melatumbe

Osbeckia chinensis L.

China.

See *Species Plantarum* 1: 345–346. 1753 and *Taxon* 21: 656. 1972

(Roots for coughing, chewed and swallowed for the treatment of toothache, diarrhea. Veterinary medicine, for wounds of cattle.)

in English: Chinese osbeckia

in China: tin xiang lu

in Japan: hime-no-botan

Osbeckia crinita Benth. ex C.B. Clarke (*Osbeckia crinita* Benth. ex Naudin; *Osbeckia crinita* Benth., nom. nud.)

China, Sikkim. Under shrub, hairy, reddish stem, pink flowers, fruits eaten as a vegetable, leaves fodder

See *A Numerical List of Dried Specimens* no. 4066. 1829, *The Flora of British India* 2: 517. 1879 and *Ginkgoana* 4: 31. 1977

(Root bark crushed and the juice taken for stomachache and indigestion. Leaves crushed and applied to treat wounds, against snakebites and to stop nose bleed; dried leaves to cure toothache and gum boils; leaves decoction taken for stomach upset.)

in India: chulaysi, dieng sohkhing, imlaktaksu, numbir, soh-thut

Osbeckia glauca Benth. (*Osbeckia glauca* Wall. ex Naudin)

India.

See *A Numerical List of Dried Specimens* no. 4073. 1829

(Leaves crushed and applied to treat wounds, against snakebites and to stop nose bleed.)

in India: soh-thut

Osbeckia nepalensis Hook. f.

Nepal.

See *Exotic flora* 1: pl. 31. 1823

(Leaf juice applied on cuts and wounds; flowers pounded and applied to sores in children's mouths.)

in China: ma yi hua

in India: бага phatkala, bagaphatkala, boga phutkola, builukhampa, kaleangeri

in Nepal: ambal bumbal, lemlang

Osbeckia nutans Wall. ex C.B. Clarke

India. Ripe fruits edible

See *The Flora of British India* 2: 521. 1879

(Magic, ritual, ceremonial, used in festivals.)

in China: hua tou jin jin xiang

in India: dai, jikenemi

Osbeckia stellata Buch.-Ham. ex Ker Gawl. (*Melastoma mairei* H. Lév.; *Osbeckia crinita* Benth. ex Naudin; *Osbeckia crinita* var. *yunnanensis* Cogn.; *Osbeckia mairei* (H. Lév.) Craib; *Osbeckia opipara* C.Y. Wu & C. Chen; *Osbeckia paludosa* Craib; *Osbeckia pulchra* Geddes; *Osbeckia rhopalotricha* C.Y. Wu; *Osbeckia robusta* Craib; *Osbeckia rostrata* D. Don; *Osbeckia sikkimensis* Craib; *Osbeckia stellata* Wall. ex

C.B. Clarke; *Osbeckia stellata* Wall., nom. nud.; *Osbeckia stellata* var. *crinita* (Benth. ex Naudin) C. Hansen; *Osbeckia yunnanensis* Franch. ex Craib; *Osbeckia yunnanensis* Franch. ex Cogn.)

Nepal. Shrubs, purple flowers, roots and leaves sweetish sour

See *Botanical Register*; consisting of coloured ... 8: pl. 674. 1822, *Prodromus Florae Nepalensis* 221. 1825, *A Numerical List of Dried Specimens* [Wallich] no. 4062, 4066. 1829, *The Flora of British India* 2(6): 517. 1879, *Monographiae Phanerogamarum* 7: 324. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 11(286–290): 300. 1912, *Bulletin of Miscellaneous Information Kew* 1916(10): 262–263. 1916, *Notes from the Royal Botanic Garden, Edinburgh* 10(46): 54–58. 1917, *Bulletin of Miscellaneous Information Kew* 1930(4): 171. 1930, *Ginkgoana* 4: 31. 1977, *Flora Yunnanica* 2: 85, f. 23, 15. 1979, *Taxon* 30: 513–514. 1981, *Guihaia* 2(4): 184, 186, f. 1, 13–14. 1982

(Juice and paste of leaves used as an antidote to snakebite, and to heal cuts and wounds in small children. Root juice given in case of stomachache, chyluria/chylous urine.)

in China: xing mao jin jin xiang

in India: builukham, chulasi, dieng sohkthem, ghanghass

in Nepal: arbale, gaurak lyangsai

Osbeckia zeylanica Steud. ex Naudin (*Osbeckia zeylanica* DC. ex Naudin; *Osbeckia zeylanica* [Ker-Gawl.]; *Osbeckia zeylanica* L.f.)

India, Sri Lanka.

See *Suppl. Pl.* 215. 1782 [1781 publ. Apr 1782], *Bot. Reg.* 7: t. 565. 1821, *Annales des Sciences Naturelles; Botanique*, sér. 3, 14: 56, 71. 1850

(Plant paste consumed with milk for cold and cough.)

in India: akka jogi gida, burada alli, neerpadarthipatchilai

Osmanthus Lour. Oleaceae

From the Greek *osme* ‘smell, odour, perfume’ and *anthos* ‘flower’, with fragrant flowers.

Osmanthus fragrans Lour. (*Olea fragrans* Thunberg ex Murray; *Olea fragrans* Thunberg; *Olea ovalis* Miquel; *Osmanthus asiaticus* Nakai; *Osmanthus asiaticus* var. *latifolius* Makino; *Osmanthus longibracteatus* H.T. Chang; *Osmanthus macrocarpus* P.Y. Bai)

China.

See *Species Plantarum* 1: 8. 1753, *Systema Vegetabilium*. Editio decima quarta 57. 1784, *Fl. Jap.* 18. 1784, *Flora Cochinchinensis* 1: 17, 28–29. 1790, *Journal de Botanique Néerlandaise* 1: 111. 1861 and *Acta Botanica Yunnanica* 1(1): 153, pl. 2, f. 1. 1979, *Acta Scientiarum Naturalium*

Universitatis Sunyatseni 2: 5. 1982, *Investigatio et Studium Naturae* 12: 66–77. 1992

(At one time united with *Olea* which differs chiefly in its valvate corolla lobes. *Osmanthus fragrans* is a well-known spice plant. Widely cultivated for the perfume of flowers. Fruit is rarely formed.)

in English: fragrant olive, sweet olive, sweet osmanthus, sweet tea, tea olive

in China: gui hua, mu hsi, mu xi, shu, yen kuei

in Japan: usu-gin-mokusei, gin-mokusei

Osmorhiza Raf. Apiaceae (Umbelliferae)

Greek *osme* ‘smell, odour, perfume’ and *rhiza* ‘a root’; see C.S. Rafinesque, *Am. Monthly Mag. Crit. Rev.* 2: 176. 1818, *American monthly magazine and critical review* 4(3): 192. 1819, *Jour. Phys. Chim. Hist. Nat.* 89: 257. 1819, *Med. Fl.* 2: 249. 1830, *The Botany of Captain Beechey's Voyage* 26–27. 1830, *New Fl. N. Am.* 4: 34. 1836 [1838], *The good book*. 53. 1840, *A Flora of North America*: containing ... 1(4): 639. 1840, *Proceedings of the American Academy of Arts and Sciences* 7(2): 346. 1868, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 147. 1879, *The Flora of British India* 2(6): 690. 1879, *J. Acad. Nat. Sci. Philadelphia* 3: 79–104. 1885, *Die Natürlichen Pflanzenfamilien* 3(8): 153. 1897 and *Contributions from the United States National Herbarium* 7: 62. 1900, *Lexikon Generum Phanerogamarum* 582. 1904, *University of California Publications in Botany* 23: 112. 1948, Elmer D. Merrill, *Index Rafinesquianus*. 181. 1949, *Annals of the Missouri Botanical Garden* 71(4): 1156, 1161. 1984[1985].

Osmorhiza aristata (Thunberg) Rydberg (*Chaerophyllum aristatum* Thunb.; *Myrrhis aristata* (Thunb.) Spreng.; *Scandix aristata* (Thunb.) Makino; *Uraspermum aristatum* (Thunberg) Kuntze)

China.

See *Species Plantarum* 1: 256–259. 1753, *The Gardeners Dictionary* ... Abridged ... fourth edition. 1754, *Systema Vegetabilium*. Editio decima quarta 288. 1784, *American monthly magazine and critical review* 4(3): 192. 1819, *An Introduction to the Natural System of Botany* 21. 1836, *Revisio Generum Plantarum* 1: 270. 1891, *Bot. Surv. Nebraska* 3: 37. 1894 and *Botaniceskij Žurnal SSSR* 67(2): 206–210. 1982, *Journal of Plant Biology* 39: 15–22. 1996

(Astringent.)

in China: xiang gen qin

Osmorhiza aristata (Thunberg) Rydberg var. *aristata* (C.B. Clarke) Ridley (*Chaerophyllum aristatum* Thunberg; *Chaerophyllum claytonii* (Michaux) Persoon; *Myrrhis aristata* (Thunberg) Sprengel; *Myrrhis claytonii* Michaux; *Osmorhiza amurensis* F. Schmidt ex Maximowicz;

Osmorhiza aristata (Thunb.) Makino & Yabe var. *brevistylis* (DC.) B. Boivin; *Osmorhiza aristata* var. *montana* Makino; *Osmorhiza claytonii* (Michaux) C.B. Clarke; *Osmorhiza japonica* Siebold & Zuccarini; *Scandix aristata* (Thunberg) Makino; *Scandix claytonii* (Michaux) Koso-Poljanski; *Uraspermum aristatum* (Thunberg) Kuntze; *Washingtonia claytonii* (Michaux) Britton

Japan, China. Perennial

See *Species Plantarum* 1: 256–259. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Systema Vegetabilium*. Editio decima quarta 288. 1784, *Flora Boreali-Americana* 1: 170. 1803, *Syn. Pl.* 1: 320. 1805, *American monthly magazine and critical review* 4(3): 192. 1819, *An Introduction to the Natural System of Botany* 21. 1836, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 4(2): 203. 1845, *Primitiae Florae Amurensis* 129–130. 1859, *The Flora of British India* 2(6): 690. 1879, *Botanische Zeitung. Berlin* 37(5): 68. 1879, *Revisio Generum Plantarum* 1: 270. 1891, *Bot. Surv. Nebraska* 3: 37. 1894, *An Illustrated Flora of the Northern United States* 2: 530. 1897 and *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 143. 1916, *Journal of Japanese Botany* 2(2): 7. 1918, *Botaniceskij Žurnal SSSR* 67(2): 206–210. 1982, *Journal of Plant Biology* 39: 15–22. 1996

(Astringent, roots used for ulcers, sore eyes, coughs, sore throat, running sores, to ease parturition.)

in English: bland sweet cicely, Clayton's sweetroot, hairy sweet cicely, sweet jarvil, woolly sweet cicely

in China: xiang gen qin

Osmorhiza aristata (Thunberg) Rydberg var. *laxa* (Royle) Constance & R.H. Shan (*Osmorhiza aristata* (Thunb.) Makino & Yabe var. *laxa* (Royle) Constance & Shan; *Osmorhiza claytonii* C.B. Clarke; *Osmorhiza laxa* Royle; *Washingtonia laxa* (Royle) Koso-Poljanski ex B. Fedtschenko)

China.

See *Species Plantarum* 1: 256–259. 1753, *American monthly magazine and critical review* 4(3): 192. 1819, *Illustrations of the Botany ... of the Himalayan Mountains ...* 233, pl. 52, f. 1. 1835, *Botanical Survey of Nebraska* 3: 37. 1894 and *Univ. Calif. Publ. Bot.* 23(3): 130. 1948

(Astringent.)

in China: shu ye xiang gen qin

Osmorhiza berteroi DC. (*Osmorhiza brevipes* (J.M. Coult. & Rose) Suksd.; *Osmorhiza chilensis* Hook. & Arn.; *Osmorhiza divaricata* (Britton) Suksd.; *Osmorhiza nuda* Torr.; *Washingtonia divaricata* Britton)

North America. Perennial herb, thick aromatic roots

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 232. 1830

(Poisonous. Root emetic, aromatic, purgative, analgesic, stimulant, for colds, headaches. Magic, love charms, good luck charm, roots placed under pillow to prevent sickness. Veterinary medicine.)

in English: sweetcicely

Osmorhiza brachypoda Torr. (*Osmorhiza brachypoda* Torr. ex Durand; *Osmorhiza brachypoda* Torr. var. *fraterna* Jeps.; *Washingtonia brachypoda* (Torr. ex Durand) A. Heller)

North America. Perennial

See Durand, Elias Judah (1870–1922), *Plantae Prattenianae Californicae*: an enumeration of a collection of California plants, made in the vicinity of Nevada, by Henry Pratten, Esp., of New Harmony, with critical notices and descriptions of such of them as are new, or get unpublished in America. 89. 1855, *Botanische Zeitung. Berlin* 37(5): 68. 1879, *Catalogue of North American Plants North of Mexico* 5. 1898

(Decoction of roots taken for colds, coughs. Insecticide.)

in English: California sweetcicely

Osmorhiza longistylis (Torr.) DC. (*Osmorhiza aristata* (Thunb.) Makino & Yabe var. *longistylis* (Torr.) B. Boivin; *Osmorhiza longistylis* (Torr.) DC. var. *brachycoma* S.F. Blake; *Osmorhiza longistylis* (Torr.) DC. var. *imbarbata* Salamun; *Osmorhiza longistylis* (Torr.) DC. var. *villicaulis* Fernald; *Scandix longistylis* (Torr.) Koso-Pol.; *Uraspermum aristatum* subsp. *longistyle* (Torr.) Kuntze; *Washingtonia longistylis* (Torr.) Britton)

North America. Perennial herb

See *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 232. 1830, *Revisio Generum Plantarum* 1: 270. 1891, *An Illustrated Flora of the Northern United States* 2: 530. 1897 and *Bulletin de la Société Impériale des Naturalistes de Moscou* 29: 143. 1916, *Phytologia* 17(2): 104. 1968

(Plant stimulant, stomachic, for stomach upset, weakness, amenorrhea, kidney troubles, wounds, sore throat, boils, to ease parturition. Roots infusion as stomachic. Veterinary medicine.)

in English: anise-root, long-styled anise-root, longstyle sweetroot

Osmorhiza obtusa (J.M. Coult. & Rose) Fernald (*Washingtonia obtusa* J.M. Coult. & Rose)

North America.

See *American monthly magazine and critical review* 4(3): 192. 1819, *Botanische Zeitung. Berlin* 37(5): 68. 1879 and *Contributions from the United States National Herbarium* 7(1): 64–65. 1900, *Rhodora* 4(43): 154. 1902, *Checklist of the Vascular Plants of the Northwest Territories Canada* i–viii, 1–607. 1980

(For skin diseases.)

Osmorhiza occidentalis (Nutt.) Torr. (*Glycosma occidentale* Nutt.; *Glycosma occidentalis* Nutt. ex Torr. & A. Gray; *Myrrhis occidentalis* (Nutt.) A. Gray; *Osmorhiza ambigua* (A. Gray) J.M. Coult. & Rose; *Osmorhiza occidentalis* (Nutt. ex Torr. & A. Gray) Torr.; *Washingtonia occidentalis* (Nutt.) J.M. Coult. & Rose)

North America. Perennial

See *A Flora of North America: containing ...* 1(4): 639. 1840, *Report on the United States and Mexican Boundary ... Botany* 2(1): 71. 1859, *Proceedings of the American Academy of Arts and Sciences* 7(2): 346. 1868 and *Contributions from the United States National Herbarium* 7(1): 67. 1900

(Roots infusion for colds, toothaches, fevers, eye troubles, swollen breasts, coughs and sore throats, nose troubles, stomachaches, or the roots chewed; a decoction for venereal sores, skin rashes, measles, diarrhea, pulmonary disorders and pneumonia, whooping cough, colds and influenza, chills, applied to kill head lice; a poultice applied to cuts, snake-bites, sores, swellings and bruises.)

in English: sweet cicely, western sweetroot

Osmorhiza purpurea (J.M. Coult. & Rose) Suksd. (*Osmorhiza chilensis* Hook. & Arn. var. *purpurea* (J.M. Coult. & Rose) B. Boivin; *Osmorhiza leibergii* (J.M. Coult. & Rose) Blankinship; *Washingtonia purpurea* J.M. Coult. & Rose)

North America. Perennial

See *Contributions from the United States National Herbarium* 7(1): 67. 1900, *Allegmeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 12(1): 5. 1906, *Le Naturaliste Canadien* 93(5): 644. 1966

(Love charms, roots used by girls.)

in English: purple sweetroot

Osmoxylon Miq. Araliaceae

From the Greek *osme* 'smell, odour, perfume' and *xylon* 'wood'.

Osmoxylon micranthum (Harms) Philipson (*Boerlagiodendron micranthum* Harms; *Boerlagiodendron sayeri* Harms; *Boerlagiodendron tricolor* Philipson; *Eschweilera gawadensis* Baker f.)

New Guinea. Shrub, sparsely branched, leaves in terminal clusters, leaf blade deeply lobed, inflorescence a terminal compound umbel, corolla reddish orange, fruit a deep purple to black drupe

See *Annales Museum Botanicum Lugduno-Batavi* 1: 3, 5. 1863, *Die Natürlichen Pflanzenfamilien* 3(8): 31. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56: 379. 1920, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 1: 11. 1951, *Blumea* 23: 115. 1976

(Leaves rubbed on centipede bites; leaves chewed to relieve backache.)

in Papua New Guinea: diauka

Osmunda L. Osmundaceae

Uncertain attribution, French *osmunde*, English *osmund*, of unknown origin, possibly after the Saxon Osmunder, a name for Thor, the god of war, or for Osmundus, c. 1025, a Scandinavian writer of runes, or after Osmun, Bishop of Salisbury, d. 1099, etc.; see Carl Linnaeus, *Species Plantarum*. 2: 1063–1067. 1753, *Methodus Plantarum* 25. 1754, *Genera Plantarum*. Ed. 5. 484. 1754, *Journal für die Botanik* 1800(2): 126. 1801, *Anales de Ciencias Naturales* 5(14): 164–165. 1802, *Hortus Regius Botanicus Berolinensis* 445. 1833, *Tentamen Pteridographiae* 109–110, pl. 3, f. 13. 1836, *Supplementum Tentaminis Pteridographiae...* 68. 1845, *Die Gefässbündel im Stipes der Farrn* 18. 1847 and Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1017. 1967, Salvatore Battaglia, *Grande dizionario della lingua italiana*. Brasil.* 17(1): 19–26. 2003, *Revista Soc. Boliv. Bot.* 4(2): 293–313. 2009

(Root decoction applied to rheumatism, snakebite, taken for colds, coughs. Veterinary medicine.)

in English: cinnamon fern, fiddleheads

Osmunda cinnamomea L. var. *cinnamomea* (*Osmunda cinnamomea* L. var. *frondosa* A. Gray; *Osmunda cinnamomea* L. var. *imbricata* (Kunze) Milde)

North America. Perennial herb

See *Traité Foug. Amér.* t. 155. 1705, *Species Plantarum* 2: 1065–1066. 1753, *Journal für die Botanik* 1801: 126. 1801, *Synopsis Filicum* 157. 1806, *Die Farrnkräuter* 2: 29. 1849,

Monogr. Osmund. 95. 1868 and *Philippine Journal of Science* 4(1): 16. 1909, *Journal of Japanese Botany* 17(12): 697. 1941, *Feddes Repert.* 85: 325–360. 1976, *Acta Bot. Brasil.* 17(1): 19–26. 2003, *Revista Soc. Boliv. Bot.* 4(2): 293–313. 2009

(Root decoction applied to rheumatism, taken for fevers, headache, joint pain, rheumatism, chills, used for menstrual disorders.)

in English: cinnamon fern, fiddleheads

Osmunda claytoniana L. (*Osmundastrum claytonianum* (L.) Tagawa; *Plenasium claytonianum* (L.) C. Presl; *Struthiopteris claytoniana* (L.) Bernh.)

Japan. Perennial herb, sometimes as *Osmundastrum claytonianum*

See *Species Plantarum* 2: 1063–1067. 1753, *Methodus Plantarum* 25. 1754, *Journal für die Botanik* (Schrader) 1800–2: 126. 1801, *Tentamen Pteridographiae* 109–110, pl. 3, f. 13. 1836, *Die Gefäßbündel im Stipes der Farrn* 18. 1847, *Abhandlungen der königlichen Böhmisches Gesellschaft der Wissenschaften* ser. 5 5: 325. 1848 and *Journal of Japanese Botany* 17(12): 697–698. 1941, Nakaike, T. *Enumeratio Pteridophytarum Japonicum, Filicales* 1975, *J. Cytol. Genet.* 19: 111–112. 1984

(Blood purifier, a decoction taken for gonorrhoea. Rhizome and fronds antibacterial; rhizome extract used to wash wounds.)

in English: interrupted fern

in Nepal: kuthurke

Osmunda regalis L. (*Aphyllocalpa regalis* (L.) Lag., D. García & Clemente; *Osmunda abyssinica* (Kuhn) A.E. Bobrov; *Osmunda capensis* C. Presl, nom. illeg., non *Osmunda capensis* L.; *Osmunda longifolia* (C. Presl) A.E. Bobrov; *Osmunda mexicana* Fée; *Osmunda obtusifolia* Kaulf.; *Osmunda palmeri* A.E. Bobrov; *Osmunda palustris* Schrad.; *Osmunda regalis* fo. *abyssinica* Kuhn; *Osmunda regalis* subsp. *spectabilis* (Willd.) Á. Löve & D. Löve; *Osmunda regalis* var. *brasiliensis* (Hook. & Grev.) Kunze; *Osmunda regalis* var. *brasiliensis* (Hook. & Grev.) Pic. Serm., nom. illeg., non *Osmunda regalis* var. *brasiliensis* (Hook. & Grev.) Kunze; *Osmunda regalis* var. *brevifolia* Desv.; *Osmunda regalis* var. *capensis* (C. Presl) Milde; *Osmunda regalis* var. *longifolia* C. Presl; *Osmunda regalis* var. *obtusifolia* (Kaulf.) Milde; *Osmunda regalis* var. *spectabilis* (Willd.) A. Gray; *Osmunda schelpei* A.E. Bobrov; *Osmunda spectabilis* Willd.; *Osmunda spectabilis* var. *brasiliensis* Hook. & Grev.; *Osmunda spectabilis* var. *palustris* (Schrad.) C. Presl; *Osmunda transvaalensis* A.E. Bobrov; *Struthiopteris regalis* (L.) Bernh.)

Europe, East and South Africa. Fern arising from erect underground rhizome, tufted, terrestrial, woody trunks, frond green, sorus brown, fertile fronds at end of vegetative sporangia light brown, root used for plants pots, on rocky river bank in forest, along stream among rocks, boggy ground, in water and on riverbank, near stream, swamps, on shady river banks, along marsh edge

See *Species Plantarum* 2: 1063–1067. 1753, *Methodus Plantarum* 25. 1754, *Anales de Ciencias Naturales* 5(14): 164. 1802, *Species Plantarum*. (Plant antibacterial, anticonvulsive, astringent, antidiysenteric; whole plant extract taken for psychosis, hysteria, muscular debility. Bark juice for abortion. Roots poisonous, an infusion used against malaria and jaundice. Magico-religious beliefs, ritual, spiritual, emotional, whole plant tonic taken to chase away evil spirits.)

in English: flowering fern, royal fern

in China: wei

in Madagascar: ampanga, kobilantsahona

Osmundastrum C. Presl Osmundaceae

Referring to the genus *Osmunda* L., see *Species Plantarum* 2: 1063–1067. 1753, *Supplementum Tentaminis Pteridographiae*... 68. 1845.

Osmundastrum claytonianum (L.) Tagawa (*Osmunda claytoniana* L.; *Plenasium claytonianum* (L.) C. Presl; *Struthiopteris claytoniana* (L.) Bernh.)

Japan. Sometimes as *Osmunda claytoniana* L.

See *Species Plantarum* 2: 1063–1067. 1753, *Methodus Plantarum* 25. 1754, *Journal für die Botanik* (Schrader) 1800–2: 126. 1801, *Tentamen Pteridographiae* 109–110, pl. 3, f. 13. 1836, *Die Gefäßbündel im Stipes der Farrn* 18. 1847, *Abhandlungen der königlichen Böhmisches Gesellschaft der Wissenschaften* ser. 5 5: 325. 1848 and *Journal of Japanese Botany* 17(12): 697–698. 1941, Nakaike, T. *Enumeratio Pteridophytarum Japonicum, Filicales* 1975, *J. Cytol. Genet.* 19: 111–112. 1984

(Rhizome and fronds antibacterial; rhizome extract used to wash wounds.)

in Nepal: kuthurke

Osteophloeum Warb. Myristicaceae

From the Greek *osteon* ‘a bone’ and *phloios* ‘bark of trees, smooth bark, husk’, see *Ber. Deutsch. Bot. Ges.* 13: (89).

1895, *Nova Acta Acad. Caes. Leop.-Carol. German. Nat. Cur.* 68: 127. 1897 and *Field Mus. Nat. Hist., Bot. Ser.* 13(2/3): 766–784. 1938.

Osteophloeum platyspermum (Spruce ex A. DC.) Warb. (*Myristica platysperma* Spruce ex A. DC.; *Myristica platysperma* Spruce; *Myristica platysperma* Poepp.; *Osteophloeum platyspermum* Warb.; *Osteophloeum sulcatum* Little; *Palala platysperma* Kuntze; *Palala platysperma* (Spruce ex A. DC.) Kuntze)

Ecuador. Tree, green flowers

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 695–696. 1857, *Revisio Generum Plantarum* 2: 567. 1891, *Nova Acta Academiae Caesareae Leopoldino-Carolinae Germanicae Naturae Curiosorum* 68: 162–163. 1897 and *Phytologia* 18(7): 404, f. 6. 1969, *Planta Med.* 50(1): 53–55. 1984, *Journal of Ethnopharmacology* 12(2): 179–211. 1984, *Nordic Journal of Botany* 20(4): 445. 2000[2001]

(Hallucinogenic use. Sap drunk for cough and cold; leaves smoke inhaled to relieve asthmatic conditions.)

Osteospermum L. Asteraceae

From the Greek *osteon* ‘bone’ and *sperma* ‘seed’, the achenes are hard; see Carl Linnaeus, *Species Plantarum*. 2: 923. 1753 and *Genera Plantarum*. Ed. 5. 395. 1754 and Watt, J.M. & Breyer-Brandwijk, M.G. *The Medicinal and Poisonous Plants of Southern and Eastern Africa*. Livingstone, London 1962, *Compositae Newsletter* 25: 46–49. 1994.

Osteospermum ecklonis (DC.) Norl. (*Dimorphotheca ecklonis* DC.) (after the Danish botanist Christian Friedrich (Frederik) Ecklon, 1795–1868, apothecary and botanical collector, traveller, sent plants to Bentham (1835), author of *Topographisches Verzeichniss der Pflanzensammlung von C.F. Ecklon*. Esslingen 1827 and “A list of plants found in the district of Uitenhage between the months of July 1829 and February 1830.” *S. Afr. Quart. J.* 1: 358–380. 1830, with Karl Ludwig Philipp Zeyher wrote *Enumeratio plantarum africae australis extratropicae*. Hamburg [1834–] 1835–1836[–1837]; see Karl Boriwog Presl, *Botanische Bemerkungen*. Prague 1844, Peter MacOwan, “Personalalia of botanical collectors at the Cape.” *Trans. S. Afr. Philos. Soc.* 4(1): xliii–xlvi. 1884–1886 and Günther Schmid, *Chamisso als Naturforscher. Eine Bibliographie*. Leipzig 1942, John Hutchinson, *A botanist in Southern Africa*. 641–642. London 1946, H.N. Cloukie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. Oxford 1964, John H. Barnhart, *Biographical Notes upon Botanists*. 1: 494. 1965, Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981, Gordon Douglas Rowley, *A History of Succulent Plants*. 1997.)

South Africa. Perennial, white ray florets, dark blue disc florets

See *Prodromus Systematis Naturalis Regni Vegetabilis* 6: 71. 1837[1838] and *Stud. Calend.* 244. 1943

(Poisonous to cattle, hydrocyanic acid.)

in English: African daisy, blue-and-white daisy bush, Cape marguerite, Sundays River daisy, Van Staden’s River daisy, Vanstadens River daisy, white daisy bush

in South Africa: bergbietou, bietou, jakkalsbos, Kaapse magriet, Sondagsrivier madeliefie, Vanstaden-osteospermum, Vanstadensrivier madeliefie

Osteospermum imbricatum L. subsp. *nervatum* (DC.) Norl. (*Osteospermum glaberrimum* O. Hoffm.; *Osteospermum nervatum* DC.)

South Africa.

See *Species Plantarum* 2: 923–924. 1753, *Mantissa Plantarum* 2: 290. 1771

(Used for stomach and intestinal complaints. Roots for febrile complaints.)

in South Africa: uMasigcolo (Zulu)

Osteospermum jucundum Norl. (*Dimorphotheca jucunda* Phillips)

South Africa. Perennial herb, erect, sprawling, purple flowers

See *Veld & Flora* 89: 10, 11. 2003

(Used for stomach and intestinal complaints.)

Ostericum Hoffm. Apiaceae

Ostericum citriodorum (Hance) C.Q. Yuan & R.H. Shan (*Angelica citriodora* Hance)

China.

See *Gen. Pl. Umbell.*, ed. 2. 162. 1816 and *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen.* 1984–1985: 3. 1985 [1984]

(The roots used as an analgesic and antipyretic.)

in China: ge shan xiang

Ostericum grosseserratum (Maximowicz) Kitagawa (*Angelica grosseserrata* Maximowicz; *Angelica koreana* Maximowicz; *Angelica mongolica* Franchet; *Angelica peucedanoides* H. Wolff; *Angelica smithii* H. Wolff)

See *J. Jap. Bot.* 12: 233. 1936

in China: da chi shan qin

Ostericum scaberulum (Franchet) C.Q. Yuan & R.H. Shan

China.

See *Bull. Nanjing Bot. Gard. Mem. Sun Yat Sen.* 1984–1985: 3. 1985 [1984]

(The roots used as an analgesic and antipyretic.)

in China: shu mao shan qin

Ostericum sieboldii (Miquel) Nakai var. *sieboldii* (C.B. Clarke) Ridley (*Angelica miqueliana* Maximowicz;

Angelica urticifoliata H. Wolff; *Ostericum miquelianum* (Maximowicz) Kitagawa; *Ostericum sieboldii* var. *microphyllum* Y.C. Ma; *Peucedanum miquelianum* (Maximowicz) H. Wolff; *Peucedanum sieboldii* Miquel)

China, Japan.

See *J. Jap. Bot.* 18: 219. 1942)

(Roots analgesic and antipyretic.)

in China: shan qin

Ostrya Scop. Corylaceae (Carpinaceae, Betulaceae)

Latin *ostrya*, *ae* and *ostrys*, *yos* for a tree with hard wood, perhaps the common hornbeam (Plinius), Greek *ostrys*, *ostrya*, *ostrye*, *ostrysis*, hop hornbeam, *Ostrya carpinifolia* Scop., Theophrastus (*HP.* 3.10.3) and Plinius, presumably referring to the hardwood.

Ostrya japonica Sargent (*Ostrya liana* Hu; *Ostrya ostrya* MacMill. var. *japonica* (Sarg.) C.K. Schneid.)

North America.

See *Flora Carniolica* 414. 1760, *Flora Carniolica*, Editio Secunda 2: 244. 1772, *The Metaspermae of the Minnesota Valley* 187. 1892, *Garden & Forest* 6: 383, f. 58. 1893 and *Illustriertes Handbuch der Laubholzkunde* 1: 142. 1904, *Journal of the Arnold Arboretum* 11(1): 49–50. 1930

in China: tie mu, tie mu shu

Ostrya virginiana (Mill.) K. Koch (*Carpinus virginiana* Miller; *Ostrya italica* subsp. *virginiana* (Mill.) Winkl.; *Ostrya italica* var. *guatemalensis* H.J.P. Winkl.; *Ostrya mexicana* Rose; *Ostrya virginiana* subsp. *lasia* (Fernald) E. Murray; *Ostrya virginiana* var. *glandulosa* Sargent; *Ostrya virginiana* var. *guatemalensis* (H.J.P. Winkl.) J.F. Macbr.; *Ostrya virginiana* var. *lasia* Fernald)

North America.

See *Species Plantarum* 2: 998. 1753, *The Gardeners Dictionary*: ... eighth edition *Carpinus* no. 4. 1768, *Dendrologie* 2(2): 6. 1873 and *Das Pflanzenreich* IV,61: 22. 1904, *Contributions from the United States National Herbarium* 8(4): 292. 1905, *Botanical Gazette* 67(3): 216. 1919, *Publications of the Field Columbian Museum, Botanical Series* 4(6): 193. 1929, Fernald, M.L. "Plants from the outer coastal plain of Virginia." *Rhodora* 38: 376–404, 414–452. 1936, *Taxon* 31: 583–587. 1982, *Kalmia* 13: 10. 1983, *Taxon* 39: 357. 1990, *Taxon* 42: 875. 1993

(Used to treat toothache, to bathe sore muscles, for hemorrhages from lungs, coughs, kidney trouble.)

in North America: Eastern hop hornbeam, ironwood, leverwood, ostryer de Virginie, bois de fer

Osyris L. Santalaceae

Possibly from the Greek *ozos* 'branch, knot', the small tree is many-branched. Plinius and Dioscorides used *osyris* or *osiris*, *osiridos* as a plant name for poet's cassia, *Osyris alba*; Latin *osyris* applied by Plinius to a plant, probably the broom-like goose-foot or summer cypress; see *Species Plantarum* 2: 1022. 1753, *Flora Brasiliensis* 13(1): 236. 1864, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 151. 1879.

Osyris quadripartita Salzm. ex Decne. (*Osyris abyssinica* Hochst. ex A. Rich.; *Osyris abyssinica* Hochst. ex A. Rich. forma *latifolia* Fiori; *Osyris arborea* Wall. ex A. DC.; *Osyris arborea* var. *rotundifolia* P.C. Tam; *Osyris arborea* var. *stipitata* Lecomte; *Osyris compressa* A. DC.; *Osyris densifolia* Peter; *Osyris laeta* Peter; *Osyris lanceolata* Hochst. & Steud.; *Osyris lanceolata* Hochstetter & Steudel ex A. Candolle, nom. illeg. superfl.; *Osyris oblanceolata* Peter; *Osyris parvifolia* Baker; *Osyris quadripartita* Decne. var. *canariensis* Kämmer; *Osyris rigidissima* Engl.; *Osyris tenuifolia* Engl.; *Osyris urundiensis* De Wild.; *Osyris wightiana* Wall. ex Wight; *Osyris wightiana* var. *rotundifolia* (P.C. Tam) P.C. Tam; *Osyris wightiana* var. *stipitata* (Lecomte) P.C. Tam)

Algeria, Ethiopia. Evergreen shrub or small tree, glabrous, slash bright crimson, sweet scented wood, smaller branches drooping, slightly fleshy leaves crowded along the stems, flowers either hermaphrodite or male, plants androdioecious, small pale yellow-green flowers, dull orange-green anthers, hermaphrodite flowers in axils of upper leaves, male flowers both axillary and terminal, waxy berries shiny red, fleshy ripe fruits eaten raw as an emergency food, roots used for a red dye, on rocky ridges, mountain slopes, *Brachystegia* woodlands, a very widespread and variable species with several widely used synonyms, plants with stipitate fruit described as *Osyris arborea* var. *stipitata*

See *Species Plantarum* 2: 1022. 1753, *Unio Itineraria* In sched., Schimper s.n. 1832 [in Stafleu and Cowan, *Taxonomic literature*. 5: 163–165. 1985], Schimper, Georg (Heinrich) Wilhelm (1804–1878), *Wilhelm Schimper's Reise nach Algier in den Jahren 1831 und 1832 ...* Stuttgart, 1834, *Annales des Sciences Naturelles; Botanique*, sér. 2, 6: 65. 1836, *Icones Plantarum Indiae Orientalis* 5: 17, pl. 1853. 1852, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 14(2): 633–634. 1857 and *Mem. New York Bot. Gard.* 19(1): 50–53. 1969, Gillett, J.B. "W.G. Schimper's botanical collections localities in Ethiopia." *Kew Bulletin* 27: 115–128. 1972, *Anales del Jardín Botánico de Madrid* 36: 373–389. 1980, *Bulletin of Botanical Research* 1(3): 71. 1981, *Flora Reipublicae Popularis Sinicae* 24: 64. 1988, *Énumération des Plantes à Fleurs d'Afrique Tropicale* 2: 1–257. 1992

(Leaves and roots wound dressing, galactagogue, a remedy for infertility, venereal diseases, menorrhoea. Young leaves and buds in large doses poisonous to cattle. Bark juice applied to treat dislocated bone; bark decoction given as postpartum remedy. Roots used for diarrhea; roots and bark a tonic tea;

root bark paste applied in fracture. Bark and heartwood boiled and the liquid drunk to treat venereal diseases and anemia. Leaves a powerful emetic, infusion to treat swellings and as a purgative tea; crushed leaves applied on cuts and wounds.)

in English: African sandalwood, barkbush, East African sandalwood, Transvaal sumach

in Southern Africa: bergbas, basbessie, pruibos, looibos; mpere (Tsonga or Shangaan: Eastern Transvaal); mofetela (South Sotho: Lesotho, Orange Free State, southeast Transvaal); muritho, mpeta (Venda: Soutpansberg, northern Transvaal); iNtshakasa, inGondothe-mpete, uMbulunyathi (Zulu); inTekeza, uMbulunyathi (Xhosa)

in Tanzania: getakhubay, kibwala, kilangati, kimbwala, kipaa-atu, kipatina, kizulu, lidunula, mberegesa, mdunula, mkaisya, msandali, mudunula, muningwampembe, muvabaahi, mzulu, oloyesyayi, olsesyani, omunyinya, siginyanyi, umunyinya

in China: sha zhen, sha zhen shu

in India: banigani, chisa sii, dalami, jangli chai, kaile, kurigandha, mukkadaka, mukudaka, naatadike, naathadike, nata-dike, sonan, sonsan, tamparale, tembaralli

in Nepal: bhote sajini, bor sajini, jhiguni, manjari, mimiyan, nundhikee, nundhiki

Otholobium C.H. Stirt. Leguminosae

See *Advances in Legume Systematics* 1: 341. 1981, Grimes, J.W. "A revision of the New World species of Psoraleeae (Leguminosae: Papilionoideae)." *Mem. New York Bot. Gard.* 61: 1–114. 1990.

Otholobium mexicanum (L.f.) J.W. Grimes (*Indigofera mexicana* L.f.; *Lotodes divaricatum* (Humb. & Bonpl. ex Willd.) Kuntze; *Psoralea divaricata* Humb. & Bonpl. ex Willd.; *Psoralea maleolens* J.F. Macbr.; *Psoralea mexicana* (L.f.) Vail; *Psoralea mexicana* var. *maleolens* (J.F. Macbr.) J.F. Macbr.; *Psoralea mexicana* var. *triana* (Vail) J.F. Macbr.; *Psoralea mutisii* Kunth; *Psoralea triana* Vail)

South America.

See *Supplementum Plantarum* 335. 1781[1782], *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 788. 1809, *Mimoses* 191, pl. 54. 1824, *Revisio Generum Plantarum* 1: 193–194. 1891, *Bulletin of the Torrey Botanical Club* 21(3): 119. 1894 and *Publications of the Field Columbian Museum, Botanical Series* 4(4): 82. 1925, *Field Museum of Natural History, Botanical Series* 13(3/1): 360. 1943, *Memoirs of the New York Botanical Garden* 61: 23. 1990

(Leaves infusion taken for stomachache.)

in Ecuador: culín, trinitaria

Otholobium pubescens (Poir.) J.W. Grimes (*Lotodes marginatum* (Meyen) Kuntze; *Psoralea featherstonei* J.F. Macbr.;

Psoralea lasiostachys Vogel; *Psoralea lasiostachys* var. *potens* (J.F. Macbr.) J.F. Macbr.; *Psoralea marginata* Meyen; *Psoralea potens* J.F. Macbr.; *Psoralea yurensis* Rusby)

South America.

See *Species Plantarum* 2: 762. 1753, *Encyclopédie Méthodique, Botanique* 5: 686. 1804, *Reise um die Erde* 1: 436. 1834, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 19: 13. 1843, *Revisio Generum Plantarum* 1: 193–194. 1891 and *Bulletin of the New York Botanical Garden* 6(22): 511. 1910, *Publications of the Field Columbian Museum, Botanical Series* 4(4): 84–85. 1925, *Publications of the Field Columbian Museum, Botanical Series* 4(5): 113. 1927, *Publications of the Field Columbian Museum, Botanical Series* 8(2): 88. 1930, *Field Museum of Natural History, Botanical Series* 13(3/1): 360–361. 1943, *Gayana* 48: 121–126. 1991, *Las Leguminosas en la Agricultura Boliviana: Revisión de Información* 409–423. 1996, *Identificación de Especies Vegetales en Chuquisaca—Teoría, Práctica y Resultados* 1–129. 2000

(Used medicinally.)

Othonna L. Asteraceae

Greek *othonna*, used by Dioscorides for the greater celandine, *Chelidonium majus*, Latin *othonna*, *ae* used by Plinius for a Syrian plant; see Carl Linnaeus, *Species Plantarum*. 924. 1753 and *Genera Plantarum*. Ed. 5. 396. 1754; Gordon Rowley, *Succulent Compositae (Senecio and Othonna)*. Strawberry Press 1994; Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997.

Othonna natalensis Sch. Bip. (*Othonna scapigera* Harv.)

South Africa.

See *Species Plantarum* 2: 924. 1753

(Used for tapeworm, nausea, stomach and intestinal disorders.)

in South Africa: iNcamu (Zulu)

Otomeria Benth. Rubiaceae

From the Greek *ous*, *otos* 'an ear' and *meris* 'part', see *Niger. Fl.* 405. 1849.

Otomeria cameronica (Bremek.) Hepper (*Tapinopentas cameronica* Bremek.; *Tapinopentas latifolia* Verdc.)

Tropical Africa. Herb, straggling, creeping, many-branched, erect, strong rootstock, white narrow petals, flowers very small

See *Verh. Kon. Ned. Akad. Wetensch., Afd. Natuurk.*, Sect. 2, 48(2): 49. 1952, *Bull. Jard. Bot. État* 23: 60. 1953, *Kew Bull.* 14: 253. 1960

(Leaves poultice applied to the body of a swollen person.)

Otomeria elatior (A. Rich. ex DC.) Verdc. (*Otomeria dilatata* Hiern; *Otomeria elatior* f. *speciosa* (Baker) Verdc.; *Otomeria speciosa* (Baker) Scott-Elliott; *Pentas elatior* (A. Rich. ex DC.) Walp.; *Pentas elatior* (A. Rich.) Walp.; *Pentas lanceolata* (Forssk.) Deflers subsp. *lanceolata*; *Pentas speciosa* Baker; *Sipanea elatior* A. Rich. ex DC.; *Sipanea elatior* A. Rich.)

Ghana. Herbaceous plant, shrub, erect, hairy, strongly scented, corolla tube dilated above, flowers salmon pink to red, fruit turbinate

See *Histoire des plantes de la Guiane Française* 1: 147, t. 56. 1775, *Mém. Rubiac.*: 196. 1830, *Prodromus Systematis Naturalis Regni Vegetabilis* 4: 415. 1830, *Botanical Magazine* 70: t. 4086. 1844, *Repertorium Botanices Systematicae*. 6: 57. 1846, *Fl. Trop. Afr.* 3: 50. 1877, *Bull. Misc. Inform. Kew* 1895: 67. 1895, *J. Linn. Soc., Bot.* 32: 437. 1896 and *Bulletin du Jardin Botanique de l'État* 23: 18, 23. 1953

(Disinfectant.)

Otophora Blume Sapindaceae

From the Greek *ous*, *otos* 'an ear' and *phoros* 'bearing', see *Rumphia* 3: 142, 146. 1849.

Otophora resecta Radlk.

Thailand, Malaysia. Shrub or tree, a liana, leaves usually paripinnate, fruit a subglobose berry dark red to black, seed flattened on one side

See *Rec. Bot. Surv. India* iii. 346. 1907

(Root used in a compound poultice to relieve itching.)

in Cambodia kândâk

in Indonesia: mojawontu

in Laos: hwàd khaaz

in Malaysia: setengok

in Thailand: chammaliang, mathao, phumriang

Otostegia Benth. Lamiaceae (Labiatae)

From the Greek *ous*, *otos* 'an ear' and *stegē* 'roof, cover, covering', referring to the petals, see *Labiatarum Genera et Species* 601. 1834.

Otostegia fruticosa (Forssk.) Schweinf. ex Penzig subsp. *schimperii* (Benth.) Sebald (*Ballota microphylla* (Desr.) Benth.; *Ballota schimperii* Benth.; *Clinopodium fruticosum* Forssk.; *Marrubium microphyllum* Desr.; *Moluccella*

microphylla (Desr.) Delile; *Moluccella sinaitica* Ehrenb. ex Boiss., nom. inval.; *Otostegia arabica* Jaub. & Spach; *Otostegia fruticosa* var. *kaiseri* (Täckh.) Täckh.; *Otostegia fruticosa* var. *schimperii* (Benth.) Täckh.; *Otostegia kaiseri* Täckh.; *Otostegia schimperii* (Benth.) Boiss.; *Otostegia sinaitica* Täckh., nom. inval.)

Saudi Arabia, Israel. Shrub

See *Atti Congr. Bot. Genova*: 356. 1893 and *Stuttgarter Beitr. Naturk.*, A 263: 66. 1973, *Publ. Cairo Univ. Herb.* 5: 63–64. 1972 [publ. 1974]

(Veterinary medicine, irritated eyes of animals rinsed with leaf infusion.)

in Arabic: sharam

Otostegia integrifolia Benth.

Ethiopia.

(Insecticide and disinfectant. Magic, ritual cleansing.)

in Ethiopia: tchiendog

Otostegia persica Boiss.

Iran.

(Leaves, flowers and stems to relieve fever, stomachache, malarial fever, arthritis.)

in Pakistan: gulder, gurder, kandero

Ottelia Pers. Hydrocharitaceae

Ottel-ambel, the native name for an Indian aquatic species, *Ottelia alismoides* (L.) Pers., used by van Rheedee in *Hortus Indicus Malabaricus*. 11: t. 46. 1692; see Christiaan Hendrik Persoon (1761/1762–1836), *Synopsis plantarum*. 1: 400. Paris et Tubingae 1805–1807; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 645. Ansbach 1852 and Cook, C.D.K., J.-J. Symoens, and K. Urmi-König. "A revision of the genus *Ottelia* (Hydrocharitaceae). II. Generic considerations." *Aquatic Bot.* 18: 263–274. 1984, Cook, C.D.K. and K. Urmi-König. "A revision of the genus *Ottelia* (Hydrocharitaceae). 2. The species of Eurasia, Australasia, and America." *Journal of Science of Hiroshima University, Series B, Division 2 (Botany)* 22: 271–352. 1989, Helmut Genau, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 447. Basel 1996.

Ottelia alismoides (L.) Pers. (*Damasonium indicum* Willd.; *Ottelia alismoides* Pers.; *Ottelia condorensis* Gagnep.; *Ottelia dioecia* Yan; *Ottelia japonica* Miq.; *Stratiotes alismoides* L.)

India. Succulent, flaccid, aquatic submerged leaves, very variable, flowers bisexual, small oblong sepals, petals white with yellow base, fruit crowned with the sepals, fruits eaten by children, petioles and leaf-blades used as a vegetable

See *Species Plantarum* 1: 535. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition*. 1754, *Species Plantarum* Editio quarta 2(1): 276. 1799, *Syn. Pl.* (Persoon) 1: 400. 1805, *Annales Museum Botanicum Lugduno-Batavi* 2: 271. 1866 and *Bulletin de la Société Botanique de France* 54(7): 543. 1907, Holmes, W.C. "Range extension for *Ottelia alismoides* (L.) Pers. (Hydrocharitaceae)." *Castanea* 43: 193–194. 1978, Turner, C.E. "*Ottelia alismoides* (L.) Pers. (Hydrocharitaceae)—U.S.A., California." *Madroño* 27: 177. 1980, *J. Sci. Med. Jinan Univ.* 2: 162, f. 187. 1982, *Proceedings of the Indian Science Congress Association* 80(3:viii): 150. 1993, *Proceedings of the Indian Science Congress Association* 82(3:viii): 79–80. 1995

(Used in Sidha. Plants rubefacient. Leaf paste in hemorrhoids; leaves as a poultice in fever. Veterinary medicine, to expel leech.)

in English: tropical swamp lily

in China: long she cao

in India: betta honne, edukula thaamara, hasiru neeru paathre, huli, jalkalai, kal honne, kal mutthaga, kari honne, kari mutthaga, kari mutthala, kotti genasu balli, kottigensu balli, male honne, naayi honne, neeru veniki, nirkkuliri, olek-alsem, ottel-ambel, panico, parmikalla, parmikkala

in Japan: mizu-ôba-ko (= water *Plantago*)

in Okinawa: karanazu, takubu

in Philippines: kalaboa

Oxalis L. Oxalidaceae

Greek *oxalis* (*oxys* 'acid, sour, sharp'), referring to the taste of leaves and stem; Plinius used Latin *oxalis*, *idis*, for some species of *Rumex*. See Carl Linnaeus, *Species Plantarum*. 1: 433–435. 1753, *Genera Plantarum*. Ed. 5. 198. 1754, *Revisio Generum Plantarum* 1: 90. 1891 and *Flora of the Southeastern United States* 665–669, 1332–1333. 1903, *Contributions from the United States National Herbarium* 10(3): 116–117. 1906, *North American Flora* 25(1): 26–28. 1907, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(Suppl.): 219, 224. 1914, T.M. Salter, "The genus *Oxalis* in South Africa: a taxonomic revision." *The Journal of South African Botany*. Supplementary Volume no. 1: 238–242. 1944, *Phytologia* 46(7): 451–452. 1960.

Oxalis acetosella L. Nat. Prod.* 70(5): 835–838. 2007

(Antiinflammatory.)

Oxyanthus DC. Rubiaceae

The generic name is based on the Greek words *oxys* ‘sharp’ and *anthos* ‘flower’, referring to the sharp teeth of calyx and acute segments of the corolla, see *Annales du muséum national d’histoire naturelle* 9: 218. 1807.

Oxyanthus speciosus DC. (*Oxyanthus speciosus* W.T. Aiton; *Oxyanthus speciosus* subsp. *stenocarpus* Bridson)

Tropical Africa, South Africa. Shrub or small tree

See *Annales du muséum national d’histoire naturelle* 9: 218. 1807, *Hortus Kewensis*; or, a catalogue ... 1: 371. 1810 and *Botanical Journal of the Linnean Society* 154: 455–495. 2007

(Stem and flowers for fevers and toothache. A decoction of a paste made with the leaves and stem bark used against cough.)

in Central African Republic: mbangosui

in Congo: buko ba cafe, ekie

in Tanzania: mtwila

Oxybaphus L’Hérit. ex Willd. Nyctaginaceae

Greek *oxybaphon* ‘saucer, shallow earthen vessel, small vinegar saucer’, Latin *oxybaphus* ‘a vinegar-cup’, see *Species Plantarum* 1: 177. 1753, *Species Plantarum*, ed. 4 [Willdenow] 1(1): 170, 185. 1797, *Prodrromus Systematis Naturalis Regni Vegetabilis* 13(2): 430. 1849, *Nat. Pflanzenfam.* [Engler & Prantl] 3(1b): 24. 1889.

Oxybaphus himalaicus Edgeworth (*Mirabilis himalaica* (Edgew.) Heimerl)

India, Himalaya, Nepal. Fodder plant

See *Trans. Linn. Soc. London* 20(1): 87. 1846 [1851 publ. 29 Aug 1846], *Die Natürlichen Pflanzenfamilien* 3(1b): 21. 1889 and *Notizbl. Bot. Gart. Mus. Berlin-Dahlem* 11: 454. 1932, *Rep. & Abstr. 60th Anniv. Bot. Soc. China* 102. 1993

(Leaves and flowers antibacterial, aphrodisiac, used for bone fracture, inflammation, indigestion, kidney troubles.)

in Nepal: nigghibulung

in Tibet: ba spru

Oxybaphus himalaicus Edgeworth var. ***chinensis*** (Heimerl) D.Q. Lu (*Mirabilis himalaica* (Edgeworth) Heimerl var. *chinensis* Heimerl)

China, Himalaya.

See *Trans. Linn. Soc. London* 20(1): 87. 1846 [1851 publ. 29 Aug 1846] and *Notizbl. Bot. Gart. Mus. Berlin-Dahlem* 11: 454. 1932, *Rep. & Abstr. 60th Anniv. Bot. Soc. China* 102. 1993

(The roots for venereal diseases.)

in China: zhong hua shan zi mo li

Oxyceros Lour. Rubiaceae

Greek *oxys* 'sharp, acid, sour' and *keras* 'horn' or *keros* 'wax', see *Flora Cochinchinensis* 150. 1790.

Oxyceros bispinosus (Griff.) Tirveng (*Oxyceros bispinosa* (Griff.) Tirveng; *Oxyceros curtisii* (King & Gamble) K.M. Wong; *Oxyceros fragrantissima* (Ridl.) K.M. Wong; *Randia bispinosa* (Griff.) Baker f.; *Randia longiflora* var. *harmandiana* Pierre ex Pit.; *Randia uncarya* Elmer ex Merr.; *Randia williamsii* Elmer; *Stylocoryna bispinosa* Griff.; *Stylocoryna junghuhniana* Miq.; *Webera bispinosa* (Griff.) Kurz; *Webera bispinosa* Kurz; *Webera junghuhniana* (Miq.) Boerl.; *Webera junghuhniana* Boerl.)

New Guinea, Vietnam.

See *Notulae ad Plantas Asiat.* 4: 260. 1854, *Forest Flora of British Burma* 2: 49. 1877, *Handl. Fl. Ned. Ind.* (Boerlage) ii. I. 129. 1891 and *Journal of the Asiatic Society of Bengal.* Part 2. *Natural history* 72: 208. 1903, *J. Straits Branch Roy. Asiat. Soc.* 50: 115. 1908, *J. Straits Branch Roy. Asiat. Soc.* 79: 79. 1918, *Fl. Indo-Chine* 3: 225. 1923, *Flora Siamensis Enumeratio* 2(1): 99. 1932, *Nordic Journal of Botany* 3(4): 466. 1983, *Malayan Nat. J.* 38(1): 43. 1984

(For childbirth and postpartum remedy, take the leaves and roots.)

Malay name: tambun tahi

Oxydendrum DC. Ericaceae

From the Greek *oxys* 'sharp, sour' and *dendron* 'tree', referring to the bitter and acid-tasting leaves or to the shape of the trees.

Oxydendrum arboreum (L.) DC. (*Andromeda arborea* L.)

North America. Tree or shrub

See *Species Plantarum* 1: 393–394. 1753, *Prodromus Systematis Naturalis Regni Vegetabilis* 7(2): 601. 1839

(Tonic, astringent, sedative, infusion for diarrhea, asthma, lung diseases. Bark chewed for mouth ulcers.)

in English: sorrel tree, sourwood, tree sorrel

Oxygonum Burch. ex Campdera Polygonaceae

Greek *oxys* 'sharp' and *gonia* 'an angle', with sharp angles, with spiny fruits, see *Monographie des Rumex* 18. 1819, *Plantae Asiaticae Rariores* 3: 63. 1832.

Oxygonum sinuatum (Hochst. & Steud. ex Meissn.) Dammer (*Ceratogonon cordofanum* Meissn.; *Ceratogonon sinuatum* Hochst. & Steud. ex A. Rich.; *Ceratogonon cordofanum* Meissn.; *Ceratogonon sinuatum* Hochst. & Steud. ex Meissn.; *Oxygonum elongatum* Dammer; *Oxygonum sinuatum* Dammer; *Oxygonum sinuatum* (Meissn.) Dammer; *Oxygonum somalense* Chiov. var. *pterocarpum* Chiov.)

Eastern Africa, Sudan. Herb, many-branched, sprawling, prostrate near the base and becoming erect, leaves with bases sheathing round the stem, long inflorescence arising from axils of upper leaves, small pink or white tubular flowers with 4–5 petal-like lobes, tubular bracts fringed by stiff hairs, nutlet fruit angular pointed at each end with 3 spreading prickles near the centre, leaves eaten raw for their acid taste, young leaves and shoots cooked as a vegetable, a troublesome weed in cultivation, grasslands, waste places, roadsides, on poor sandy soils

See *Monogr. Rumex* 18. 1819, *Prodr.* (DC.) 14(1): 39. 1856, *Nat. Pflanzenfam.* [Engler & Prantl] iii. I. a, 30. 1892, *Die Pflanzenwelt Ost-Afrikas* C: 170. 1895 and *Missione Stefanini-Paoli nella Somalia italiana* 152. 1916

(Spiny fruits can injure the feet of humans and animals. Roots and leaves for fevers, skin infections, amebiasis. Leaves used for boils; also squeezed and the juice dropped into eyes for conjunctivitis. Stems chewed for tonsillitis. Drink decoction mixed with fresh milk, for coughs. Roots for venereal diseases.)

in English: double thorn

in East Africa: akitikemiria, awayo, kafumita bagenda, kar-inga, kuru, mbigiri, nyatiend-gweno, obucumita-mbogo, obwita-mbogo, okuro

in Kenya: apadita, awayo, bamba, chementril, chimbiri, cong'e, echirikukwai, echunge, emeworil, enkaisijoi, kimbiri,

kindri, makongo, mchetwatongo, mendiril, nabikumba, nakwa, namawa, nchunge, ng'onge, njunge, nyatiend-gueno, okuru, song'e

in Tanzania: echunge, enkaisijoi, kindri, mbamba, mbigili, mbigiri, mbiinu, nsokolo, nyalenge, nyambigili, shyokolo

Oxyria Hill Polygonaceae

From the Greek *oxys* 'sharp, sour', indicating the acidity of the leaves, see Hill, John, *The British Herbal: an history of plants and trees, natives of Britain, cultivated for use, or raised for beauty*. London, 1756, Hill, John (1714/1716–1775), *The Vegetable System*, or, the internal structure and the life of plants: their parts and nourishment explained: their classes, orders, genera and species, ascertained and described, in a method altogether new: comprehending an artificial index and a natural system. With figures of all the plants: designed and engraved by the author. 10: 24, pl. 24, f. 2. London, 1765 and *Taxon* 28: 265–268. 1979, *Bot. Zhurn.* 65 (1): 51–59. 1980.

Oxyria digyna (L.) Hill (*Acetosa digyna* (L.) Mill.; *Donia digyna* (L.) R. Br.; *Lapathum digynum* (L.) Lam.; *Oxyria digyna* fo. *elatiior* R. Br. ex Meisn.; *Oxyria elatiior* R.Br.; *Oxyria elatiior* R. Br. ex Meisn.; *Oxyria reniformis* Hook.; *Oxyria reniformis* var. *elatiior* Regel; *Rheum digynum* (L.) Wahlenb.; *Rumex digyna* L.; *Rumex digynus* L.)

North America, China, Pakistan, Himalaya. Perennial herb, fresh acidic leaves mixed with salt and chili powder and eaten raw, tender green parts eaten

See *Species Plantarum* 1: 337. 1753, *The Gardeners Dictionary: ... eighth edition* 4. 1768, *Hortus Kewensis* 158. 1768, *Flore Françoise* 3: 6. 1779, *Flora Lapponica* 101. 1812, *Flora Scotica* 3: 111. 1821, *Journal of a Voyage for the discovery of a North-West Passage to the Appendix*. XI. *Botany. A List of Plants Collected in Mellville Island*. 41. 1824, *Numer. List* [Wallich] n. 1726. 1829, *Plantae Asiaticae Rariores* (Wallich). 3: 64. 1832

(Plant antiscorbutic, refrigerant, for arthritis. Whole plant decoction used when somebody has lost his appetite due to prolonged illness. Leaves made into pickles and used in stomach disorders, indigestion, diarrhea; leaves used as a good source of vitamin C; leaves decoction given in high fever; leaf juice for swellings, ulcers in the mouth, urinary disorders, inflammation, to stop bleeding.)

in English: alpine mountainsorrel, mountain-sorrel

in China: shan liao

in India: chahahak, chyakulti, jagali-palak, kailashi almora, kailashialkoru, khattiimli, lamanchu, shup-chi

Oxyspora DC. Melastomataceae

From the Greek *oxys* 'sharp, pointed' and *sporos* 'a seed', referring to the awned and pointed seeds, see *Memoirs of*

the Wernerian Natural History Society 4: 283, 298–299. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 123. 1828, *Museum Botanicum* 1: 24. 1849, *Monographiae Phanerogamarum* 7: 472. 1891.

Oxyspora paniculata (D. Don) DC. (*Arthrostemma paniculatum* D. Don; *Bredia soneriloides* H. Lévl.)

India.

See *Memoirs of the Wernerian Natural History Society* 4: 299–300. 1823, *Prodromus Systematis Naturalis Regni Vegetabilis* 3: 123. 1828 and *Repertorium Specierum Novarum Regni Vegetabilis* 9(196–198): 21. 1910

(Leaves decoction antidote.)

in China: jian zi mu

in India: inlaklasu tepetipa, tehering

Oxystelma R. Br. Asclepiadaceae

Greek *oxys* 'sharp, pointed' and *stelma*, *stelmatos* (*stello* 'to bring together, to bind, to set') 'a girdle, belt', indicating the sharp corona segments; see R. Brown, "On the Asclepiadeae." *Memoirs of the Wernerian Natural History Society*. 1: 40. Edinburgh 1811.

Oxystelma esculentum (L.f.) Smith (*Asclepias rosea* Roxburgh, nom. illeg.; *Asclepias rosea* Kunth; *Oxystelma alpini* Decne.; *Oxystelma esculentum* R.Br.; *Oxystelma esculentum* (Roxb.) R.Br.; *Oxystelma esculentum* (L.f.) Schult.; *Oxystelma esculentum* (L.f.) R.Br. ex Schult., nom. illeg.; *Oxystelma esculentum* Wall. ex Decne.; *Oxystelma esculentum* var. *wallichii* (Wight) T. Cooke; *Oxystelma secamone* (L.) H. Karst. var. *wallichii* (Wight) M.A. Rahman & Wilcock; *Oxystelma wallichii* Wight; *Periploca esculenta* L.f.; *Sarcostemma esculentum* (L.f.) R.W. Holm)

India. Annual climbing herb, twiner

See *Species Plantarum* 1: 214–217. 1753, *Supplementum Plantarum* 168. 1782 [1781 publ. Apr 1782], *Prodromus Florae Novae Hollandiae* 462–463. 1810, *The Cyclopaedia*; or, universal dictionary of arts, ... 1813, *Hort. Bengal.* 20. 1814, *Systema Vegetabilium* ed. 15 bis [Roemer & Schultes] 6: 89. 1820, *Flora Indica*; or, descriptions of Indian Plants 2: 40–41. 1832, *Contributions to the Botany of India* 54. 1834, *Prodr.* (DC.) 8: 543. 1844, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 1031. 1880–1883 and *The Flora of the Presidency of Bombay* 2: 153. 1904, *Annals of the Missouri Botanical Garden* 37: 482. 1950, *Blumea* 34(2): 520. 1990, *Taxon* 40: 629–630. 1991, *Phytochemistry* 30(1): 301–303. 1991, *Phytochemistry* 65(7): 975–980. 2004

(Latex antiseptic. Plant decoction used as a gargle and mouthwash in the treatment of sore throat and aphthous ulcers; paste of plant applied in skin diseases. Decoctions of all parts used against cancer, menoxenia (= any abnormality of menstruation), and traumatic injury. Roots decoction

taken for lactation, jaundice, a tonic; juice from fresh root used to cure jaundice.)

in English: edible oxystelma

in China: jian huai teng

in India: dudhilata, jal-dudhi

***Oxystelma secamone* (L.) Karst.**

India. Twiner, flowers bright reddish, in marshy places

See *Prodromus Florae Novae Hollandiae* 462. 1810, *Deutsche Flora. Pharmaceutisch-medicinische Botanik...* 1031. 1880–83 and *Proceedings of the Indian Science Congress Association* (III, C): 67: 57. 1980, *Taxon* 30: 696. 1981, *Taxon* 40: 629–630. 1991

(Used in Sidha. Fresh roots applied to cause abortion; root extract given in jaundice and liver troubles. Latex on ulcers.)

in India: dudhialata, dudhni, jal kechua, oosippalai

Oxytenanthera Munro Poaceae (Gramineae)

Greek *oxytes* ‘sharpness, of acute angles, acidity’, *oxytenes* ‘pointed’ and *anthera* ‘anther’, an allusion to the nature of the anthers, see *Tent. Fl. Abyss.* 2: 439. 1850, *Transactions of the Linnean Society of London* 26(1): 126–127. 1868, *Die Natürlichen Pflanzenfamilien* 2(2): 96. 1887 and *Lexicon* 509. 1903, *Die Natürlichen Pflanzenfamilien*, Nachtrag 3: 21. 1906, *Boll. Soc. Ort. Mutuo Soccorso*. Palermo 8(6): 84. 1910, *Taxon* 6(7): 206. 1957, *Kyoto University African Studies* 7: 37–129. 1972, *Kyoto University African Studies* 10: 143–212. 1976, *Indian Forester* 109: 306–308. 1983, *African Studies Monographs* 3: 109–130. 1983

***Oxytenanthera abyssinica* (A. Rich.) Munro** (*Bambusa abyssinica* A. Rich.; *Houzeaubambus borzii* (Mattei) Mattei; *Oxytenanthera borzii* Mattei; *Oxytenanthera braunii* Pilg.; *Oxytenanthera macrothyrsus* K. Schum.) (after the Italian botanist Antonino Borzi, 1852–1921, professor of botany, 1892–1921 Orto Botanico of Palermo, see T.W. Bossert, *Biographical Dictionary of Botanists Represented in the Hunt Institute Portrait Collection*. 46. 1972; John H. Barnhart, *Biographical Notes upon Botanists*. 1: 224. 1965)

Tropical Africa. Perennial, tufted, unarmed, erect or ascending, leafy, woody, stout, thick-walled, strong, more or less hollow-stemmed, rhizomatous, clumps forming an impenetrable thickets, drooping culms, forage plant, seeds important food in times of famine, young shoots edible, leaves browsed by cattle, alcoholic drink obtained from the plant (*Ulanzi*, a fermented bamboo sap obtained by tapping young bamboo shoots during the rainy season), plants eaten by chimpanzees, found in the foothill forests, wooded hillsides, in damp places, gardens, along river banks, in dry forest, savanna, moist or dry conditions, termite mounds

See *Tentamen Florae Abyssinicae...* 2: 439. 1850, *Transactions of the Linnean Society of London* 26(1): 126–127. 1868 and

Bot. Jahrb. Syst. 39(3–4): 601. 1907, *Boll. Soc. Ort. Mutuo Soccorso*. Palermo 8(6): 84. 1910, *Boll. R. Orto Bot. Giardino Colon.* 8: 36. Palermo 1909, *Taxon* 6(7): 206. 1957

in English: bamboo, Bindura bamboo, common bamboo, Holy Venda bamboo, savanna bamboo, West African bamboo

in Arabic: gana

in Angola: lumbungu, ombungu

in Cameroon: lekwe, ndyung, nkà, shyu

in Dahomey: téma

in Ethiopia: shimel

in Gambia: bo, boho, bongo, kebe, kewal, wah

in Ghana: anohwere, gora, kremponyi, kyemponyi, mbaramboro, mpampro, mprampuro, nkampon, nkampro, nyoringa, pamplo, pamplo, pamploo, pampro, paplo, prampru

"Locoweed (*Oxytropis sericea*) poisoning and congestive heart failure in cattle." *J. Am. Vet. Med. Assoc.*, 189: 1549–1556. 1986, Panter, K.E. et al. "The relationship of *Oxytropis sericea* (green and dry) and *Astragalus lentiginosus* with high mountain disease in cattle." *Vet. Hum. Toxicol.*, 30: 318–323. 1988, *The Canadian Field-Naturalist* 108(1): 94. 1994, *Great Basin Naturalist* 55(3): 279. 1995

(This plant has caused a number of problems in cattle, horses and sheep. Swainsonine, an indolizidine alkaloid, inhibits its alpha-mannosidase in animal bodies, which can lead to

disruption of cellular function. The blooms and mature fruit of locoweed have higher quantities of the toxin swainsonine than do the leaves. Locoism is a chronic disease that causes depression, incoordination, and nervousness under stress. Death can result. Leaves infusion applied to sores, also used for ear troubles.)

in English: locoweed, silvery oxytrope

Ozoroa Del. Anacardiaceae

Probably after an Arabian name, or an Ethiopian name for 'queen', see *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91. 1843.

Ozoroa insignis Delile (*Heeria insignis* (Del.) O. Kuntze; *Heeria insignis* sensu G.B. Miller; *Ozoroa insignis* Delile; *Rhus insignis* (Delile) Oliv.)

Tanzania, Zambia. Tree or shrub, erect, many branched from the base, bark grey-brown cracked, white sticky milky latex in young stems, leaves coriaceous, shiny wrinkled fruits whitish dull yellow ripening to black

See *Species Plantarum* 1: 265–267. 1753, *Plantarum vascularium genera secundum ordines ...* 1: 75. 1837, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91, t. 1, f. 3. 1843, *Flora of Tropical Africa* 1: 437. 1868, *Revisio Generum Plantarum* 152. 1891

(Root for tuberculosis.)

in Tanzania: mwembe pori

Ozoroa insignis Delile subsp. *reticulata* (Baker f.) J.B. Gillett (*Heeria insignis* (Delile) Kuntze var. *lanceolata* Suess.; *Heeria insignis* (Delile) Kuntze var. *reticulata* Baker f.; *Heeria mucronifolia* Burt Davy & Hoyle; *Heeria reticulata* (Baker f.) Engl.; *Heeria reticulata* auct., sensu Meikle; *Ozoroa reticulata* (Baker f.) R. Fern. & A. Fern.; *Ozoroa reticulata* subsp. *grandifolia* R. & A. Fern.; *Ozoroa reticulata* var. *cinerea* R. & A. Fern.; *Ozoroa reticulata* var. *nyasica* R. & A. Fern.; *Ozoroa reticulata* var. *reticulata*)

Malawi, South Africa. Small tree, shrub, many-branched, twisted, bark thick fissured in squares, branches ascending, leaves white below with marked reticulate veining, panicles of small white flowers, fruits whitish dull yellow ripening to black, white sticky milky latex in young stems, flowers attractive to ants, timber for durable rafters and beams, hoe handle, firewood and also beehive, not eaten by animals, fruits edible, along roadside, mixed woodland, *Brachystegia* woodland, in miombo woodland, in secondary miombo

See *Species Plantarum* 1: 265–267. 1753, *Plantarum vascularium genera secundum ordines ...* 1: 75. 1837, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91, t. 1, f. 3.

1843, *Flora of Tropical Africa* 1: 437. 1868, *Revisio Generum Plantarum* 152. 1891 and *Boletim da Sociedade Broteriana*, ser. 2 38: 195. 1965, *Kew Bulletin* 34: 746. 1980

(Medicinal use, cause of death. Roots boiled and drunk for gonorrhoea and stomach pains. Root for tuberculosis.)

in Southern Africa: harpuisboom, isifico; isiFico (Zulu); shinungu (Tsonga); muacha, muBedu, chafitcha, maDsikavakadzi, muHacha, iHlanshwachipini, muRingu, muRungu, sukavu (Shona)

in Tanzania: ikaa la vashana, impwiligo, ipahama, mkalakala, mnyongompembe, munyugwa pembe, munyugwapembe, munyungapembe, mwembe pori

Ozoroa mucronata (Bernh. ex Krauss) R. Fern. & A. Fern. (*Heeria mucronata* Bernh. ex Krauss)

Tropical Africa. Shrub

See *Boletim da Sociedade Broteriana*, ser. 2 38: 160. 1965

(Root decoction for diarrhea, dysentery, stomach troubles, gonorrhoea, bilharzia. Leaves juice an antidote for snakebite.)

in Tanzania: mvunda-jukunu

Ozoroa obovata (Oliv.) R. Fern. & A. Fern. var. *obovata* (*Heeria mucronata* Bernh. var. *obovata* (Oliv.) Engl.; *Rhus insignis* (Delile) Oliv. var. *obovata* Oliv.)

Tropical Africa.

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91. 1843, *Flora of Tropical Africa* 1: 437. 1868 and *Boletim da Sociedade Broteriana*, ser. 2 38: 161, t. 16–17. 1965

(Stomachic, astringent.)

in English: broad-leaved resin tree

in Southern Africa: breëblaarharpuisboom; isiFice, isiFica, isiFico (Zulu); ashiFisu, shinungumafi (Thonga or Tsonga); mochudi (Western Transvaal, northern Cape, Botswana); munungu-mahfi (Venda)

Ozoroa paniculosa (Sond.) R. Fern. & A. Fern. var. *paniculosa* (*Anaphrenium paniculosum* (Sond.) Engl.; *Heeria paniculosa* (Sond.) Kuntze; *Rhus paniculosa* Sond.)

South Africa.

See *Species Plantarum* 1: 265–267. 1753, *Annales des Sciences Naturelles; Botanique*, sér. 2, 20: 91. 1843 and *Boletim da Sociedade Broteriana*, ser. 2 38: 167. 1965

(For kidney and lung complaints, for tuberculosis.)

in English: bushveld ozoroa, common resin tree

in Southern Africa: gewone harpuisboom; isiFice, isiFica, isiFico sehlanze (Zulu); monokane (Hebron dialect, central Transvaal); monoko (North Sotho)

Ozoroa pulcherrima (Schweinf.) R. Fern. & A. Fern. (*Anaphrenium pulcherrimum* Schweinf.; *Heeria pulcherrima*)

(Schweinf.) Kuntze; *Rhus djalonensis* A. Chev.; *Rhus herba-
cea* A. Chev.; *Rhus pulcherrima* (Schweinf.) Oliv.)

Tropical Africa.

See *Species Plantarum* 1: 265–267. 1753, *Plantarum vas-
cularium genera secundum ordines ...* 1: 75. 1837, *Genera
Plantarum* 1425. 1841, *Annales des Sciences Naturelles;
Botanique*, sér. 2, 20: 91. 1843, *Beitrag zur Flora Aethiopiens
... 1: 32*. 1867, *Flora of Tropical Africa* 1: 436. 1868, *Revisio
Generum Plantarum* 152. 1891 and *Boletim da Sociedade
Broteriana*, ser. 2 38: 168. 1965

(Abortifacient.)

Ozoroa reticulata (Baker f.) R. & A. Fernandes subsp. ***retic-
ulata*** (*Heeria insignis* sensu Steedman; *Heeria pulcherrima*
sensu Eyles)

Tropical Africa.

See *Species Plantarum* 1: 265–267. 1753, *Plantarum vas-
cularium genera secundum ordines ...* 1: 75. 1837, *Annales
des Sciences Naturelles; Botanique*, sér. 2, 20: 91, t. 1, f. 3.
1843, *Flora of Tropical Africa* 1: 437. 1868, *Revisio Generum
Plantarum* 152. 1891 and *Boletim da Sociedade Broteriana*,
ser. 2 38: 195. 1965, *Kew Bulletin* 34: 746. 1980

(Leaves juice antidote.)

P

Pachira Aublet Bombacaceae

Pachira, a native name in Guiana; see Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 650. 1852 and *Fieldiana, Bot.* 24(6): 386–403. 1949, *Field Mus. Nat. Hist., Bot. Ser.* 13(3A/2): 477–478, 593–622. 1956, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen* 14. Aufl. 676. 1993, *Ceiba* 44(2): 105–268. 2003 [2005].

Pachira glabra Pasq. (*Bombacopsis glabra* (Pasq.) Robyns; *Bombax aquaticum* (Aubl.) K. Schum.; *Bombax glabrum* Robyns; *Bombax insigne* Wall.; *Bombax insigne* K. Schum.; *Bombax kimuenzae* De Wild. & T. Durand; *Bombax macrocarpum* (Schltdl. & Cham.) K. Schum.; *Bombax oleagineum* Robyns; *Bombax rigidifolium* Ducke; *Carolinea macrocarpa* Schltdl. & Cham.; *Carolinea princeps* L.f.; *Pachira aquatica* Aubl.; *Pachira aquatica* var. *occidentalis* Cuatrec.; *Pachira aquatica* var. *surinamensis* Decne.; *Pachira grandiflora* Tussac; *Pachira longiflora* (Mart. & Zucc.) Decne.; *Pachira longiflora* Decne.; *Pachira macrocarpa* (Schltdl. & Cham.) Walp.; *Pachira macrocarpa* Walp.; *Pachira pustulifera* Pittier; *Pachira spruceana* Decne.; *Pachira villosula* Pittier; *Pachira villulosa* Pittier; *Sophia carolina* L.)

South America. Small evergreen tree, very fat trunk to store water, leathery leaves, white flowers, semi-woody capsules, seeds eaten raw or cooked or roasted, young leaves and flowers edible

See *Hist. Pl. Guiane* 2: 726–727, tt. 291–292. 1775, *Pl. Asiat. Rar.* (Wallich). 1: 74, t. 79 et 80. 1830, *Repert. Bot. Syst.* (Walpers) 1: 329. 1842, *Rendic. Acc. Nap.* vii. (1868) 18. 1868, *Nat. Pflanzenfam.* [Engler & Prantl] 3(6): 62. 1890 and *Bulletin du Jardin Botanique de l'État* 33: 207. 1963

(Used in Ayurveda. Tea used to treat anemia and for low blood pressure. Bark of *Bombax insigne* crushed with bark of *Mangifera indica*, boiled, and the decoction taken as a remedy against dysentery.)

in English: chestnut of the Maranhao, French peanut tree, Guiana chestnut, Guianan chestnut, Malabar chestnut, provision bark, provision tree, Saba nut, Santo Domingo, water cacao, water-chestnut, wild cocoa

in China: gua li

in India: didu, dumboil, kalilavu, kallilavu, katpoola, kattupula, kutasalmali, pang, parayilavu, pareilavu, poola, semul, simul, tera, vellaikungiliyam

in Latin America: bellaco caspi, bobo, cuyche, huimba, pasharo, punga, wimba, zapote de bobo

Pachistima Raf. Celastraceae

Genus *Pachistima* Raf., Greek *pachys* ‘thick, stout’ and *stigma* ‘stigma’; see C.S. Rafinesque, *American monthly magazine and critical review* 2: 176. 1818, *Sylva Telluriana* 42. 1838 and *Jour. Phys. Chim. Hist. Nat.* 89: 257. 1819 and *Fl. Canada* 3: 547–1115. 1978. Also as *Paxistima*.

Pachistima myrsinites (Pursh) Raf. (*Ilex myrsinites* Pursh; *Pachistima myrsinites* Raf.; *Pachystima myrsinites* (Pursh) Raf.; *Paxistima myrsinites* (Pursh) Raf.; *Paxistima myrsinites* Pursh)

North America. Perennial shrub, berries eaten, forage

See *Flora Americae Septentrionalis*; or, ... 1: 119. 1813, *Sylva Telluriana* 42. 1838

(Branches decoction taken for colds, tuberculosis, kidney troubles. Roots infusion drunk for syphilis. Ceremonial, emetic.)

in English: boxleaf myrtle, mountain lover, myrtle box-leaf, Oregon boxleaf, Oregon boxwood

Pachycarpus E. Meyer Asclepiadaceae (Apocynaceae)

From the Greek *pachys* ‘thick, stout’ and *karpos* ‘a fruit’, with a thick pericarp, see *Commentariorum de Plantis Africae Australioris* 209–210. 1838 [1837] and *Notes Roy. Bot. Gard. Edinburgh* 41(2): 301. 1983, *Bothalia* 20(1): 88. 1990.

Pachycarpus concolor E. Mey. (*Asclepias concolor* Schltr.; *Asclepias concolor* (E. Mey.) Schltr.; *Asclepias geminiflora* (Schltr.) Schltr.; *Asclepias geminiflora* Schltr.; *Gomphocarpus concolor* (E. Mey.) Decne.; *Gomphocarpus concolor* Decne.; *Gomphocarpus geminiflorus* Schltr.; *Gomphocarpus rhinophyllus* K. Schum.; *Gomphocarpus scaber* K. Schum., non Harv.; *Gomphocarpus trachyphyllus* K. Schum.; *Pachycarpus concolor* E. Mey.; *Pachycarpus lineolatus* (Decne.) Bullock; *Pachycarpus rhinophyllus* (K. Schum.) N.E. Br.; *Pachycarpus rhinophyllus* N.E. Br.; *Xysmalobium concolor* (E. Mey.) D. Dietr.; *Xysmalobium concolor* D. Dietr.)

South Africa, Tanzania. Herb, exuding white latex when cut

See *Species Plantarum* 1: 214–217. 1753, *On the Asclepiadeae* 27. 1810, *Memoirs of the Wernerian Natural History Society* 1: 37(preprint). 1810, *Comm. Pl. Afr. Austr.* (Meyer) 210. 1836–1838, *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 326. 1838, *Synopsis Plantarum* (D. Dietrich) 2: 902. 1840, *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 8: 563. 1844, *Journal of Botany, British and Foreign* 33: 336. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 21(Beibl. 54): 6. 1896, *J. Bot.* 34: 455. 1896 and *Kew Bulletin* 8: 333. 1953

(For skin diseases.)

Pachycarpus lineolatus (Decne.) Bullock (*Asclepias lineolata* (Decne.) Schltr.; *Asclepias lineolata* Schltr.; *Gomphocarpus lineolatus* Decne.; *Pachycarpus schweinfurthii* (N.E. Br.) Bullock)

Tropical Africa. Shrub, coarse woody-based herb, stem producing white milky latex

See *Annales des Sciences Naturelles; Botanique*, sér. 2, 9: 326. 1838, *Bulletin of Miscellaneous Information Kew* 1895: 253. 1895, *Journal of Botany, British and Foreign* 33: 336. 1895 and *Kew Bulletin* 8: 330, 333. 1953

(Leaves pounded and mixed with water and drunk by women for increasing breast milk flow. Roots aphrodisiac, tonic, abortifacient, eaten by men to improve fertility.)

in Tanzania: mweta

Pachycarpus rhinophyllus (K. Schum.) N.E. Br. (*Gomphocarpus rhinophyllus* K. Schum.; *Pachycarpus rhinophyllus* N.E. Br.)

Tropical Africa.

See *Memoirs of the Wernerian Natural History Society* 1: 37(preprint). 1810, *Die Pflanzenwelt Ost-Afrikas* C: 322. 1895 and *Flora of Tropical Africa* [Oliver et al.] 4(1): 377. 1902

(Healing wounds.)

Pachycereus (A. Berger) Britton & Rose Cactaceae

From the Greek *pachys* 'thick, stout' plus *Cereus*, referring to the stems of these tree-like cacti, see *Annual Report of the Missouri Botanical Garden* 16: 62–64, pl. 1. 1905, *Contributions from the United States National Herbarium* 12(10): 420, 424, 426. 1909, *Blätter für Kakteenforschung* 1938(6): [21]. 1938, *Cactus and Succulent Journal* 22: 154. 1950, *Anales del instituto de biología de la universidad nacional de México* 24(2): 230–231. 1953[1954], *Cactáceas y Suculentas Mexicanas* 17(4): 119. 1972, *Calyx* 2(3): 106, 108. 1992.

Pachycereus pecten-aboriginum (Engelm. ex S. Watson) Britton & Rose (*Cereus pecten-aboriginum* Engelm. ex S. Watson; *Pachycereus pecten-aboriginum* subsp. *tehuantepecanus* (T. MacDoug. & Bravo) P.V. Heath; *Pachycereus*

pecten-aboriginum subsp. *tehuantepecanus* (T. MacDoug. & Bravo) P.V. Heath; *Pachycereus tehuantepecanus* T. MacDoug. & Bravo)

Mexico.

See *Proceedings of the American Academy of Arts and Sciences* 21: 429–430. 1886 and *Contributions from the United States National Herbarium* 12(10): 422. 1909, *Cactáceas y Suculentas Mexicanas* 1(4): 64–67, f. 43–48. 1956, *Lloydia* 32: 206–212. 1969, *Calyx* 2(3): 107. 1992

(Narcotic.)

in Mexico: cawe

Pachycereus pringlei (S. Watson) Britton & Rose (*Cereus pringlei* S. Watson)

North America. Fruits for food

See *Proceedings of the American Academy of Arts and Sciences* 20: 368. 1885 and *Contributions from the United States National Herbarium* 12(10): 420, 422. 1909

(Fresh slice for rheumatism and aching parts of the body. Alkaloids present.)

in English: giant cactus

Pachycereus schottii (Engelmann) D.R. Hunt (*Cereus schottii* Engelmann; *Lophocereus schottii* (Engelmann) Britton & Rose; *Pilocereus schottii* (Engelmann) Lemaire)

North America.

See *Proc. Amer. Acad. Arts* 3: 288. 1856 and *Contr. U.S. Natl. Herb.* 12: 420. 1909, Lindsay, G.S. "The genus *Lophocereus*." *Cact. Succ. J. (Los Angeles)* 35: 176–192. 1963, *Ecology* 48: 530–536. 1967, *Ann. Missouri Bot. Gard.* 65: 999–1057. 1978, *Ecology* 61: 1–7. 1980, *Vegetatio* 78: 125–140. 1988, *Bot. Gaz.* 149: 335–346. 1988, *SouthW. Naturalist* 34: 392–401. 1989

(Alkaloids present.)

in North America: old-man-cactus, senita

Pachyelasma Harms Fabaceae (Caesalpinieae, Caesalpinieae)

Greek *pachys* and *elasma*, *elasmos* 'a metal plate', referring to the fruits, see *Systematic Botany* 26(3): 487–514. 2001, *African Study Monographs* 23(2): 47–64. 2002, *Toxicon* 44(4): 417–430. 2004.

Pachyelasma tessmannii (Harms) Harms (*Stachyothyrsus tessmannii* Harms)

Tropical Africa. Perennial non-climbing tree, bole straight and cylindrical, umbrella-shaped crown, malodorous red inflorescence, sepals yellowish green, pendulous woody thick 4-angled indehiscent black pods, gorillas eat bark, closely related to *Erythrophleum*

See *Die Nat. Pflanzenfamilien Nachtr.* 1: 198. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 303. 1910, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 428, 430. 1913, *J. Agric. and Food Chem.* 53(3): 608–613. 2005

(Bark for arthritis, rheumatism, molluscicidal. Pod abortifacient, astringent, anti diarrhea. Bark, fruit, husk, seed, as a fish poison. Religion, superstitions, magic.)

in Cameroon: esese bajong, eyec, eyek, lec, mbaghe, mbo, ndiai

in Central Africa: dogabela, duma, noduma

in Congo: boliko, bolubo, bomboli, dula, ediouk

in Gabon: mekogbo, mekogho

in Nigeria: eru, ire, mbaghe, ogiesegheseghe

Pachygone Miers Menispermaceae

Greek *pachys* ‘thick, stout’ and *gonos* ‘seed’, referring to the thick seeds, or from *gony* ‘joint, knee’, indicating thick joints or nodes; see John Miers (1789–1879), in *Annals and magazine of natural history*. Ser. II, 7: 37, 43. London 1851, *Denkschriften der Bayer. Botanischen Gesellschaft in Regensburg* 5: 1. 1896.

Pachygone dasycarpa Kurz

Burma.

See *J. Asiat. Soc. of Bengal*, Pt. 2, *Nat. Hist.* 39(2): 62. 1870 and *J. Nat. Prod.* 60(3): 258–260. 1997, *Phytochemistry* 49(8): 2561–2563. 1998, *J. Nat. Prod.* 62(1): 59–66. 1999

(Morphinan alkaloid isolated from the stem bark, cytotoxic, antiplasmodial.)

Pachygone nitida Pierre ex Gagnep.

Vietnam. Woody vine

See *Annals and Magazine of Natural History* ser. 2. 7: 37, 43. 1851, *Flora Indica*: being a systematic account of the plants . . . 1: 176, 202. 1855 and *Bull. Soc. Bot. France* 55: 39. 1908

(Sedative.)

Pachygone ovata Miers ex Hook.f. & Thomson (*Cissampelos ovata* Poir.; *Cissampelos ovata* Vell.; *Pachygone ovata* (Poir.) Diels)

India, Malaya. Climbing shrub, male and female flowers separated, yellow flowers in axillary racemes, orange reniform fruits

See *Species Plantarum* 2: 1031–1032. 1753, *Encyclopédie Méthodique, Botanique* V: 10. 1804, *Flora Fluminensis* 10: t. 141. 1829, *Fl. Ind.* [Hooker f. & Thomson] i. 203. 1855 and *Das Pflanzenreich* IV. 94(Heft 46): 243. 1910, *J. Nat. Prod.* 42(4): 399–406. 1979, *J. Nat. Prod.* 47(3): 459–464. 1984

(Dried fruit used as a rodenticide, anthelmintic, insecticidal, antidote, insect repellent and fish poison. Root powder mixed with leaf powder of *Hemionitis arifolia* given for treating snakebites.)

in India: peerukattukodi, perung kattukodi

Pachypodium Lindley Apocynaceae

Greek *pachys* ‘thick, stout’ and *podion* ‘a small foot’, alluding to the fleshy and thick roots.

Pachypodium densiflorum Baker (*Pachypodium brevicalyx* (H. Perrier) Pichon; *Pachypodium densiflorum* var. *brevicalyx* H. Perrier)

Madagascar.

See *Edwards’s Botanical Register* 16: 1321. 1830, *Journal of the Linnean Society, Botany* 22: 503. 1886[1887] and *Bulletin de la Société Botanique de France* 81: 303. 1934, *Mémoires de l’Institut Scientifique de Madagascar, Série B, Biologie Végétale* 2: 120. 1949, Rapanarivo, S.H.J.V. & A.J.M. Leeuwenberg “Taxonomic revision of *Pachypodium*—Series of revisions of Apocynaceae XLVIII.” *Pachypodium (Apocynaceae): Taxonomy, Habitats and Cultivation* 1–82. 1999

(Spiny.)

in Madagascar: songosongo, somo, somoy (Betsileo); vontaka (Bara); veloarivatana (Merina)

Pachypodium lealii Welw. (*Pachypodium giganteum* Engl.) (the specific name honors the Portuguese cartographer Lt. Col. Fernando Da Costa Leal whose map of Angola assisted Welwitsch in his travels; Friedrich Welwitsch discovered this species in southern Angola and described it in 1869; see the historic plate of two *Welwitschia* plants made by Leal and Thomas Baines that appeared in *The Transactions of the Linnean Society*, 1863–1864.)

Angola, Namibia.

See *Transactions of the Linnean Society of London* 27: 45. 1869

(Spiny.)

Common name: bumbo

in English: bottle tree

in South Africa: bottelboom

Pachypodium namaquanum (Wyley ex Harvey) Welw. (*Adenium namaquanum* Wyley ex Harvey)

S. Namibia to NW Cape Prov.

See *Systema Vegetabilium* 4: xxxv, 411. 1819, *Edwards’s Botanical Register* 16: 1321. 1830, *Histoire Naturelle des Îles Canaries* 3(21): 74. 1836, *A Flora of North America*: containing . . . 1(1): 96–97. 1838, *Transactions of the Linnean Society of London* 27: 45. 1869

(Spiny.)

in English: elephant's trunk, ghost men, half men

Pachypodium rosulatum Baker (*Pachypodium cactipes* K. Schum.; *Pachypodium drakei* Costantin & Bois; *Pachypodium rosulatum* var. *drakei* (Costantin & Bois) Markgr.)

Madagascar.

See *Edwards's Botanical Register* 16: 1321. 1830, *Journal of Botany, British and Foreign* 20: 219. 1882, *Die Natürlichen Pflanzenfamilien* 4(2): 178. 1895 and *Annales des Sciences Naturelles; Botanique*, série 9 6: 319, t. 2, f. 7. 1907, *Compt. Rend. Hebd. Séances Acad. Sci.* 145: 270–271. 1907, *Bulletin de la Société Botanique de France* 81: 297–318. 1934, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 2(1): 45–140. 1949, *Adansonia: recueil périodique d'observations botanique*, n.s. 12(4): 590. 1972, *Flore de Madagascar et des Comores* 169: 1–317. 1976, *Caryologia* 51: 245–252. 1998, *Cactus File* 5: 1–79. 1999, *Taxon* 48: 181. 1999, *Pachypodium (Apocynaceae): Taxonomy, Habitats and Cultivation* 1–82. 1999

(Spiny.)

Pachypodium saundersii N.E. Br. (*Pachypodium lealii* Welw. subsp. *saundersii* (N.E. Br.) Rowley)

S. Trop. & S. Africa.

See *Bulletin of Miscellaneous Information Kew* 1892: 126. 1892 and *Natl. Cact. Succ. J.* 28: 4. 1973

(Spiny.)

Common name: star of the Lundi

Pachypodium succulentum (L.f.) Sweet (*Belonites succulenta* (L.f.) E. Mey.; *Belonites succulenta* E. Mey.; *Echites succulentus* L.f.; *Echites tuberosus* Haw. ex Steud.; *Pachypodium griquense* L. Bolus; *Pachypodium jasminiflorum* L. Bolus; *Pachypodium succulentum* Steud.; *Pachypodium succulentum* (Jacq.) Sweet; *Pachypodium tomentosum* G. Don; *Pachypodium tuberosum* Lindl., nom. illeg.)

S. Africa.

See *Hort. Brit.* [Sweet], ed. 2. 594. 1830, *Comm. Pl. Afr. Austr.* (Meyer) 187. 1837, *Nomencl. Bot.* [Steudel], ed. 2. 1: 196 and 2: 245. 1840 and *S. African Gard.* 22: 83. 1932, *Taxon* 29(56): 605. 1980, *Genetica* 68: 3–35. 1985

(Spiny.)

Pachyrhizus Rich. ex DC. Fabaceae (Leguminosae, Phaseoleae)

Greek *pachys* 'thick' and *rhiza* 'a root', referring to the edible and tuberous roots; see A.P. de Candolle, *Prodromus*. 2: 402. 1825 and *Boissiera* 28: 1–273. 1978, *Brenesia* 18: 15–90. 1980, *Annals of the Missouri Botanical Garden* 67(3): 523–818.

1980[1981], *Nordic Journal of Botany* 8(2): 167–192. 1988, National Research Council, *Lost Crops of the Incas: Little-Known Plants of the Andes with Promise for Worldwide Cultivation*. National Academy Press, Washington, D.C. 1989, *Vascular Flora of the Southeastern United States* 3(2): xix, 1–258. 1990, *Acta Botanica Austro Sinica* 7: 26–39, pl. 1. 1991, Sørensen, Marten. *Yam bean (Pachyrhizus DC.)*. Promoting the conservation and use of underutilized and neglected crops. 2. Institute of Plant Genetics and Crop Plant Research, Gatersleben/International Plant Genetic Resources Institute, Rome. 1996, *Memoirs of the New York Botanical Garden* 85: i–ix, 1–246. 2000, *Biodiversidad del estado de Tabasco* Cap. 4: 65–110. 2005.

Pachyrhizus ahipa (Wedd.) Parodi (*Dolichos ahipa* Wedd.; *Pachyrhizus ahipa* Parodi; *Pachyrhizus ahipa* var. *albiflora* Parodi; *Pachyrhizus ahipa* var. *violacea* Parodi)

South America. Perennial herbaceous plant, twining, trailing, semi-erect, bushy, erect, entire leaflets, short racemes, wings curl outwards following anthesis, kidney-shaped black or black and cream seeds

See *Annales des Sciences Naturelles; Botanique*, série 4 7: 113. 1857 and *Anales Acad. Nat. Agron. & Veterinaria Buenos Aires* 1: 137–138, f. 5. 1935

(Tubers eaten for lung infections, cough, gout. Insecticide. Toxic to fish and amphibians.)

in English: yam bean

Pachyrhizus erosus (L.) Urb. (*Cacara bulbosa* Thouars; *Cacara bulbosa* Rumphius ex Du Petit-Thouars; *Cacara erosa* (L.) Kuntze; *Cacara erosa* Kuntze; *Cacara palmatiloba* (DC.) Kuntze; *Cacara palmatiloba* (Moc. & Sessé ex DC.) Kuntze; *Dolichos articulatus* Lam.; *Dolichos bulbosus* L., nom. illeg. superfl.; *Dolichos erosus* L.; *Dolichos palmatilobus* DC.; *Dolichos palmatilobus* Moc. & Sessé ex DC.; *Pachyrhizus angulatus* Rich. ex DC., nom. illeg.; *Pachyrhizus angulatus* DC.; *Pachyrhizus articulatus* Duchass. ex Walp.; *Pachyrhizus articulatus* Walp.; *Pachyrhizus bulbosus* (L.) Kurz; *Pachyrhizus bulbosus* (L.) Britton, nom. illeg., non *Pachyrhizus bulbosus* (L.) Kurz; *Pachyrhizus erosus* var. *palmatilobus* (Moc. & Sessé ex DC.) R.T. Clausen; *Pachyrhizus erosus* var. *palmatilobus* (DC.) R.T. Clausen; *Pachyrhizus erosus* var. *typicus* R.T. Clausen; *Pachyrhizus jicamas* Blanco; *Pachyrhizus palmatilobus* (DC.) Benth. & Hook.f.; *Pachyrhizus palmatilobus* (Moc. & Sessé ex DC.) Benth. & Hook.f.; *Pachyrhizus panamensis* R.T. Clausen; *Pachyrhizus strigosus* R.T. Clausen; *Pachyrhizus vernalis* R.T. Clausen; *Pachyrhizus erosus* (L.) Urb.; *Pachyrhizus erosus* var. *palmatilobus* (DC.) Clausen; *Pachyrhizus erosus* var. *palmatilobus* (Moc. & Sessé ex DC.) R.T. Clausen; *Robynsia lobata* M. Martens & Galeotti; *Robynsia macrophylla* M. Martens & Galeotti; *Stizolobium bulbosum* (L.) Spreng.; *Stizolobium bulbosum* Spreng.; *Stizolobium domingense* Spreng., nom. illeg. superfl.; *Taeniocarpum articulatum* (Lam.) Desv. (Latin *strigosus* 'covered with strigae, with stiff bristles')

Tropical America. Perennial climbing shrub, herbaceous, very long and large tuberous roots, flowers deep violet to white, young roots eaten both raw and boiled

See *Species Plantarum* 2: 725–726. 1753, *Species Plantarum*, Editio Secunda 2: 1021. 1763, *Encyclopédie Méthodique, Botanique* 2(1): 296. 1786, *Dict. Sci. Nat. (Levrault)* 6: 35. 1806, *Prodromus Systematis Naturalis Regni Vegetabilis* 2: 399–400, 402. 1825, *Annales des Sciences Naturelles (Paris)* 9: 420–421. 1826, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 252, 525. 1826, *An Introduction to the Natural System of Botany* 148. 1836, *Flora de Filipinas* 579. 1837, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 10(2): 193. 1843, *Flora* 36: 226. 1853, *Genera Plantarum* 1: 540. 1865, *Journal of the Asiatic Society of Bengal. Part 2. Natural history* 45(2): 246. 1876, *Bulletin of the Torrey Botanical Club* 16(12): 324. 1889, *Revisio Generum Plantarum* 1: 165. 1891 and *Symbolae Antillarum seu Fundamenta Florae Indiae Occidentalis* 4(2): 311–312. 1905, *Flora of West Tropical Africa* 2: 68, 108. 1931, *Cornell University Agricultural Experiment Station Memoir* 264: 13, 17–27, f. 5–9. 1944 [1945], *Annals of the Missouri Botanical Garden* 68: 551–557. 1981, *Listados Florísticos de México* 1: 1–123. 1983, *Descriptive Flora of Puerto Rico and Adjacent Islands: Spermatophyta* 2: 1–481. 1988, *Cuscatlania* 1(2): 1–16. 1989, *Acta Botanica Austro Sinica* 7: 26–39, pl. 1. 1991

(Used in Ayurveda. Toxins, leaves, ripe beans and mature seeds poisonous; young hairy pods cause irritation. Seeds for skin diseases, boils; seed oil can be used as a purgative, anthelmintic, insecticide. Flour obtained from tubers in the treatment of dysentery and hemorrhoids. Root to cure fever, headache, cholera, smallpox and to stop bleeding. Seeds stupefy fish.)

in English: chopsui potato, Mexican turnip, turnip tree, yam bean

in Latin America: jicama

in China: di gua

in India: chana, sankalu, sankhalu

in Japan: kuso-imo

Malayan names: kachang bengkuang, kachuang sangkuang

in Philippines: hikamas, hinkamas, kaman, kamas, lakamas, sikamas, sinkamas

in Vietnam: cat can, cu dau, cu day san, cu san, cu san dai, cu sang, men phao, san day, sen chat, sen com

Pachyrhizus tuberosus (Lam.) Spreng. (*Cacara tuberosa* (Lam.) Britton & Wilson; *Cacara tuberosa* Britton; *Dolichos tuberosus* Roxb. ex Wight & Arn.; *Dolichos tuberosus* Lam.; *Pachyrhizus tuberosus* Spreng.; *Stizolobium tuberosum* (Lam.) Spreng.; *Stizolobium tuberosum* Spreng.)

West Indies. Perennial climbing shrub, white to yellow flowers, legumes conspicuously compressed between the seeds, black and white or orange-red kidney-shaped seeds

See *Encyclopédie Méthodique, Botanique* (Lamarck) 2(1): 296. 1786, *Systema Vegetabilium*, editio decima sexta [Sprengel] 3: 252. 1826, *Systema Vegetabilium*, editio decima sexta [Sprengel] 4(Cur. post.): 281. 1827, *Prodr. Fl. Ind. Orient.* 1: 249. 1834 and *Scientific Survey of Porto Rico and the Virgin Islands* 5: 424. 1924, *Amer. J. Bot.* 67: 595–602. 1980

(Seed might be poisonous. Leaves insecticide. Tubers juice diuretic. Seeds decoction or powder to control vermin. Fresh pods as an ointment to cure itching. Toxic to fish and amphibians.)

in English: Amazonian yam bean, potato bean, yam bean

Pachysandra Michx. Buxaceae

Greek *pachys* ‘thick, stout’ and *aner, andros* ‘a man’, referring to the thick stamens.

Pachysandra terminalis Siebold & Zucc.

China. Fruit with a pleasant taste, eaten by deer

See *Flora Boreali-Americana* 2: 177–178, pl. 45. 1803

(Leaves cathartic and stomachic.)

in Japan: huttoma-kina, yuktopa-kina

Packera Á. Löve & D. Löve Asteraceae

Packera aurea (L.) Á. Löve & D. Löve (*Senecio aureus* L.; *Senecio aureus* var. *aquilonius* Fernald; *Senecio aureus* var. *ashei* Greenm.; *Senecio aureus* var. *aurantiacus* Farw.; *Senecio aureus* var. *gracilis* (Pursh) Hook.; *Senecio aureus* var. *gracilis* (Pursh) Britton, nom. illeg., non *Senecio aureus* var. *gracilis* (Pursh) Hook.; *Senecio aureus* var. *intercursum* Fernald; *Senecio gracilis* Pursh)

Eastern North America to Texas. Herbaceous perennial, sparsely leaved, leaves alternate, flat-topped clusters (corymbs) of yellow daisy-like flowers, somewhat weedy, in moist soils, wet woods, meadows, ravines, swamps, along streams and springs

See *Species Plantarum* 2: 866–872. 1753, *Flora Americae Septentrionalis* 2: 529–530. 1814, *Flora Boreali-Americana* 1(suppl.): 333. 1834 and *Annals of the Missouri Botanical Garden* 16: 406, pl. 35. 1929, *American Midland Naturalist* 12: 74. 1930, *Rhodora* 45(540): 499–502, pl. 802, 803. 1943, *Taxon* 24: 671–678. 1975, *Botaniska Notiser* 128(4): 520–521. 1975 [1976], Moerman, Daniel E. *Native American Ethnobotany*. 526. 1998

(Roots and leaves abortifacient, diaphoretic, diuretic, emmenagogue, pectoral, stimulant and uterine tonic; used externally in the treatment of vaginal discharge and to treat various complaints of the female reproductive system, and also to ease childbirth. Root tea for urinary problems, to increase blood pressure and stimulate uterine contractions. The plant

contains alkaloids that, in isolation, can cause liver damage and so this remedy can no longer be recommended for internal use; *Senecio* is very toxic both fresh and in hay, affected animals often die, all grazing animals may be affected.)

in English: golden groundsel, golden ragwort, squaw weed

Packera bellidifolia (Kunth) W.A. Weber & Á. Löve (*Senecio bellidifolius* Kunth; *Senecio cheiranthifolius* Kunth; *Senecio lactucella* Sessé & Moc.; *Senecio pauciflorus* Kunth; *Senecio vulneraria* DC.; *Senecio vulnerarius* Sessé & Moc.)

Mexico.

See *Species Plantarum* 2: 866–872. 1753, *Nova Genera et Species Plantarum* (folio ed.) 4: 137. 1820[1818] and *Pittonia* 4(22A/B): 110–111. 1900, *Phytologia* 49(1): 46. 1981, *Sida* 16(4): 699–709. 1995

(Whole plant used as tea for kidney ailments, tonic, as a general medicine, and to cure sores, ulcers, and vaginal ailments.)

Packera candidissima (Greene) W.A. Weber & Á. Löve (*Senecio candidissimus* Greene)

Mexico.

See *Species Plantarum* 2: 866–872. 1753 and *Pittonia* 4(22A/B): 110–111. 1900, *Phytologia* 49(1): 46. 1981, *Sida* 16(4): 704. 1995

(Whole plant used as tea for kidney ailments, tonic, as a general medicine, and to cure sores, ulcers, and vaginal ailments.)

Packera neomexicana (A. Gray) W.A. Weber & Á. Löve (*Packera neomexicana* W.A. Weber & Á. Löve; *Senecio hartmanii* Greenm.; *Senecio neomexicanus* A. Gray)

North America. Perennial herb, subshrub

See *Synoptical Flora of North America* 1(2): 392. 1884 and *Annals of the Missouri Botanical Garden* 5: 44. 1918, *Amer. J. Bot.* 64: 791–798. 1977, *Taxon* 30: 844–845. 1981, *Phytologia* 49(1): 47. 1981, *Taxon* 33: 351–354. 1984, *Sida* 16(4): 699–709. 1995

(An antidote for narcotics.)

in English: New Mexico groundsel

Packera neomexicana (A. Gray) W.A. Weber & Á. Löve var. ***neomexicana*** (*Senecio appendiculatus* Greenm., nom. illeg.; *Senecio appendiculatus* (L.f.) Sch.Bip.; *Senecio appendiculatus* Sch.Bip.; *Senecio appendiculatus* (Lam.) DC.; *Senecio appendiculatus* DC.; *Senecio appendiculatus* Poir.; *Senecio encelia* Greene, nom. illeg.; *Senecio encelia* Remy; *Senecio eurypterus* Greenm.; *Senecio hartmanii* Greenm.; *Senecio neomexicanus* A. (An antidote for narcotics.)

in English: New Mexico groundsel

Padus Miller Rosaceae

Greek *pados*, *pedos*, used by Theophrastus (*HP.* 4.1.3 and 5.7.6) for a species of *Prunus* or for a tree whose timber was used for axles, see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 1. 1754, *The Gardeners Dictionary: ... eighth edition* no. 1. 1778, *Die Natürlichen Pflanzenfamilien* 3(3): 54. 1888.

Padus avium Mill. var. ***avium*** (*Cerasus padus* (L.) DC.; *Cerasus padus* (L.) Delarbre; *Padus germanica* Borkh.; *Padus racemosa* (Lam.) Gilib.; *Padus vulgaris* Borkh.; *Prunus padus* L.; *Prunus racemosa* Lam.)

China.

See *Species Plantarum* 1: 473–475. 1753, *The Gardeners Dictionary: ... eighth edition* no. 1. 1778, *Flore Française* 3: 107. 1778, *Flore Française. Troisième Édition* 4: 580. 1805 and *Acta Fac. Rerum Nat. Univ. Comenianae, Bot.* 39: 53–57. 1992

(Twigs tea used for stomach and intestinal catarrh. Magic, the wood regarded as a talisman against evil.)

in English: European bird cherry, hag-berry

in Japan: kikinni

Padus cornuta (Wall. ex Royle) Carrière (*Cerasus cornuta* Wall. ex Royle; *Padus cornuta* Carrière; *Padus cornuta* var. *glabra* Fritsch ex C.K. Schneid.; *Prunus cornuta* Wall.; *Prunus cornuta* Wall. ex Royle; *Prunus cornuta* (Wall. ex Royle) Steud.)

India. Shrub, edible oil

See *Numer. List* [Wallich] no. 716. 1829, *Illustrations of the Botany ... of the Himalayan Mountains ...* [Royle] 207, t. 38,

f. 2. 1834 (1835), *Nomenclator Botanicus*. [Steudel], Editio secunda 2: 403. 1841, *Revue Horticole* 1869: 275, f. 64. 1869 and *Illustriertes Handbuch der Laubholzkunde* 1: 639. 1906

(Young leaves reported to be highly toxic to animals, sometimes cause death. Oil from the seed kernels used externally as a massage to keep body warm during winter season, also taken for stomach disorders. Dry root powder with honey given for intestinal worms in children.)

in China: guang e chou li

in India: arnya bis, jamana, jamun

Paederia L. Rubiaceae

Latin *paedor* (*pedor*), *paedoris* ‘filth, stench, an offensive smell’, Akkadian *padu*, Hebrew *pada* ‘to dismiss, to free’, possibly referring to an unpleasant (faecal) smell of some species when bruised, see *Familles des Plantes* 2: 146, 158. 1763, *Systema Naturae*, ed. 12 2: 135, 189. 1767, *Florae Peruviana*, et *Chilensis Prodrromus* 32, t. 5. 1794, *Flora Peruviana* 2: 48, t. 188. 1799, *Synopsis Plantarum* 1: 210. 1805, *Prodrromus Systematis Naturalis Regni Vegetabilis* 4: 470. 1830, *Revisio Generum Plantarum* 1: 285. 1891 and *Opera Botanica Belgica* 3: 199. 1991, *Monogr. Syst. Bot. Missouri Bot. Gard.* 73: 1–177. 1999.

(For skin diseases.)

in China: mu dan, mu dan pi

Pagamea Aubl. Rubiaceae (Loganiaceae)

See *Histoire des plantes de la Guiane Française* 1: 112–113, pl. 44. 1775 and *Field Mus. Nat. Hist. Bot.* 13: 144. 1936.

Pagamea coriacea Spruce ex Benth. (*Pagamea coriacea* var. *acuta* Steyererm.; *Pagamea coriacea* var. *pubescens* Steyererm.)

Tropical America. Tree, closely related to *Pagamea macrophylla*

See *J. Linn. Soc., Bot.* 1: 110. 1857 and *Mem. New York Bot. Gard.* 12(3): 273. 1965, *Botanical Museum Leaflets—Harvard University* 28(1): 57. 1980, *Botanical Museum*

Leaflets—Harvard University 28(3): 271–275. 1980, *Journal of Ethnopharmacology* 13(1): 3–49. 1985

(Heated blue-black fruits dropped as antifungal into the ear. Bark decoction drunk as a stimulant.)

Pagamea macrophylla Spruce ex Benth.

Brazil, Colombia. Tree

See *J. Linn. Soc., Bot.* 1: 110. 1857 and *Botanical Museum Leaflets*—Harvard University 28(1): 57. 1980, *Botanical Museum Leaflets*—Harvard University 28(3): 271–275. 1980, *Journal of Ethnopharmacology* 13(1): 3–49. 1985

(Leaves and bark infusion drunk to alleviate stomach or intestinal bleeding, caused presumably by use or overuse of coca. Ceremonial, ritual, magic, powdered leaves aspirated as a snuff by the medicine men during ceremonies of divination.)

Pajanelia DC. Bignoniaceae

From *pajaneli*, the Malabar/Malayalam name for *Pajanelia longifolia*; see van Rheede tot Draakestein, *Hortus Indicus Malabaricus*. 1: t. 44. 1678, *Bibliothèque Universelle de Genève* sér. 2. 17: 130. 1838.

Pajanelia longifolia K. Schum.

India. Tree or treelet, slender, winged fruit

See *Nat. Pflanzenfam.* [Engler & Prantl] iv. 3b (1895) 244. 1895

(For bone fracture use paste of crushed twigs of young foliage or leaves.)

in India: ramarchangkawm

Pajanelia multijuga (Wall.) DC. (*Bignonia multijuga* Wall.; *Pajanelia multijuga* DC.)

Malaysia.

See *Plantae Asiaticae Rariores* 1: 81. 1830, *Nova Genera et Species Plantarum seu Prodromus* (DC.) 9: 227. 1845

(Leaves for stomach disorders in children.)

Malay name: bekak gunong

Palafoxia Lagasca Asteraceae

Possibly named after the Spanish general José de Rebolledo Palafox y Melci (or Melzi), 1775/1776–1847, author of *Exhortacion del Señor Palafox, despues de la última Victoria conseguita por los Zaragozanos*. Sevilla [1808], of *Proclama hecha á los Aragoneses ... con motivo de la Batalla de las Heras de Zaragoza*. Cadiz [1808], among the defenders of Zaragoza (during the protracted siege (1808–1809) by the French) was María Agustín, the “Maid of Saragossa”, whose exploits are described in Lord Byron’s poem *Childe Harold*; or named for the prelate Juan de Palafox y Mendoza

(1600–1659), visitor general of New Spain (*visitador*), on December 27, 1639 consecrated Bishop of Puebla de Los Angeles (founded as Puebla de los Angeles in 1532, now Puebla of Zaragoza, capital of Puebla State, Central Mexico) and in 1655 Bishop of Osma (Soria, Spain), served briefly as Archbishop of Mexico (1642–1643), was very involved in affairs of government and held the posts of fiscal of the Consejo de Guerra, fiscal of the Consejo de Indias, a forwarer of education and book collector, *juez de residencia*, and viceroy of New Spain, he was an administrative reformer who came into conflict with the Jesuits, with whom he was involved in litigation from 1647 to 1655, among his many works and letters are *Obras*. Madrid 1762, *Oeuvres spirituelles ...* Marseille 1775, *Virtudes del Indio*. [1650?] and *Vida interior del ... Señor D.J. de Palafox y Mendoza ...* Copiada fielmente por la que el mismo escribió con título de Confesiones y Confusiones ... Sacala a luz Don M. de Vergara. Sevilla 1691. See Genaro García, *Colección de documentos inéditos o muy raros para la historia de México* (volume 7), Mexico, Vda. de C. Bouret. 1906, Genaro García, *Don Juan de Palafox y Mendoza*. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 451. 1996, Ana María Huerta Jaramillo, *El jardín de Cal. Antonio de la Cal y Bracho, la botánica y las ciencias de la salud en Puebla, 1766–1833*. Puebla 1996.

Palafoxia linearis (Cav.) Lag. var. ***linearis*** (*Ageratum lineare* Cav.; *Stevia linearis* (Cav.) Willd.)

Mexico, North America.

See *Icones et Descriptiones Plantarum, quae aut sponte ...* 3(1): 3, pl. 205. 1794[1795], *Species Plantarum*. Editio quarta 3(3): 1774. 1803, *Genera et Species Plantarum* 26. 1816 [July–Dec. 1816]

(Veterinary medicine, plant is ground and used to kill insect larvae in a dog’s sores.)

Palaquium Blanco Sapotaceae

A Philippine native name, *palak-palak* or *palac*, for *Palaquium ellipticum*, in Tagalog language *palakihin* means to let grow, increase in size; see F.M. Blanco, *Flora de Filipinas*. 403. Manila 1837 and Herman Johannes Lam (1892–1977), in *Bull. Jard. Bot. Buitenzorg*. Ser. 3, 7: 107. 1925.

Palaquium calophyllum (Teijsm. & Binn.) Pierre ex Burck (*Croixia calophylla* (Teijsm. & Binn.) Baehni; *Dichopsis calophylla* Benth. & Hook.f.; *Dichopsis calophylla* (Teijsm. & Binn.) Benth. & Hook.f.; *Isonandra calophylla* Teijsm. &

Binn.; *Isonandra calophylla* Kurz; *Palaquium calophyllum* Pierre ex Burck; *Palaquium calophyllum* var. *philippinense* H.J. Lam)

Indonesia, Borneo, Philippines. Tree

See *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 35. 1864, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 42(2): 88. 1873, *Genera Plantarum* [Bentham & Hooker f.] 2(2): 658. 1876, *Annales du Jardin Botanique de Buitenzorg* 5: 28. 1885 and *Bull. Jard. Bot. Buitenzorg*, III, 8: 398. 1927, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 11: 109. 1965

(Bark juice as fish poison.)

in English: white pig, white wood

in Indonesia: kayu pute, kayu puté, puto babui

Palaquium ellipticum (Dalzell) Baill. (*Bassia elliptica* Dalzell; *Croixia elliptica* (Dalzell) Baehni; *Dichopsis elliptica* (Dalzell) Benth.; *Palaquium ellipticum* (Dalzell) Engl.; *Palaquium ellipticum* Engl.)

Philippines, India. Tree, edible ripe fruits eaten by children, food for monkeys

See *Hooker's Journal of Botany and Kew Garden Miscellany* 3: 36. 1851, *Genera Plantarum* 2: 658. 1876, *Traité de Botanique Médicale Phanérogamique* 1500. 1884, *Bot. Jahrb. Syst.* xii. (1890) 511. 1890 and *Boissiera* 11: 110. 1965

(Fruits eaten against worms.)

in India: paali

in Philippines: kattappil, palac, palak-palak

Palaquium formosanum Hayata (*Croixia formosana* (Hayata) Baehni; *Palaquium hayatae* H.J. Lam.)

Taiwan, Philippines. Tree, edible fruits

See *Fl. Filip.* 403. 1837 and *J. Coll. Sci. Imp. Univ. Tokyo* 30(1): 184–185. 1911, *Bulletin du Jardin Botanique de Buitenzorg* 3(8): 414. 1927, *Blumea* 10: 472. 1960, *Boissiera* 11: 110. 1965

(Anthelmintic.)

in English: Hayata nato tree

in China: jiao mu shu, tai wan jiao mu, taiwan jiao mu

Palaquium gutta (Hook.f.) Baillon (*Croixia gutta* (Hook.) Baehni; *Dichopsis gutta* (Hook.) Benth.; *Dichopsis gutta* (Hook.) Bentley & Trimen; *Isonandra gutta* Hook.; *Palaquium oblongifolia* (de Vriese) Burck)

SE Asia.

See *London Journal of Botany* 6: 463. 1847, *Genera Plantarum* 2: 658. 1876, *Annales du Jardin Botanique de Buitenzorg* 5: 24. 1885 and *Boissiera. Mémoires du*

Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève 11: 110. 1965

(Against intestinal worms.)

in English: guttapercha, guttapercha tree, Malay guttapercha, nato tree, nyato tree

Malayan names: taban, taban merah, getah percha, nyatoh barak, getah durian, getah rian

Palaquium luzoniense (Fern.-Vill.) Vidal (*Croixia luzoniensis* (Fern.-Vill.) Baehni; *Dichopsis luzoniensis* Fern.-Vill.)

Philippines.

See *Novissima appendix*, ed. 3, 4 125. 1880, *Revision de Plantas Vasculares Filipinas* 176. 1880 and *Boissiera* 11: 110. 1965

(Fruits against worms.)

Palhinhaea Franco & Vasc. Lycopodiaceae

For the Portuguese (Azores-born) botanist Ruy Telles Palhinha, 1871–1957, from 1921–1941 Director of the Botanical Institute of the University of Lisbon, editor of Antonio Xavier Pereira Coutinho (1851–1939), *Flora de Portugal*. Ed. 2. Lisbon 1939; see Francisco de Mello, *Memoria sobre a malagueta ...* 2a edição prefaciada e revista por R.T. Palhinha. Lisboa 1945, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 43. 1965.)

Palhinhaea cernua (L.) Franco & Vasc. (*Lepidotis cernua* (L.) P. Beauv.; *Lycopodiella cernua* (L.) Pic. Serm.; *Lycopodium capillaceum* (Spring) Hieron.; *Lycopodium cernuum* L.; *Lycopodium cernuum* var. *capillaceum* Spring)

South America. See also *Lycopodium cernuum*

See *Species Plantarum* 2: 1103. 1753, *Histoire Naturelle des Végétaux, Classés par Familles* 3: 477. 1803, *Prodrome des Cinquième et Sixième Familles de l'Aéthérogamie* 101. 1805, *Nouveaux Mémoires de l'Académie Royale des Sciences et belles Lettres de Bruxelles* 15: 80. 1842 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 573. 1905, *Preslia* 36: 20, 22. 1964, *Boletim da Sociedade Broteriana*, ser. 2 41: 24–25. 1967, *Webbia* 23(1): 166. 1968, *Fieldiana: Botany, New Series* 12: 1–91. 1983, *Ferns of Jamaica* 26. 1985, *Flora of Ecuador* 33: 1–156. 1988, *Flora Mesoamericana* 1: i–xxi, 1–470. 1995

(Dried plant infusion taken for nervous breakdown; plant extract for stomachache, also as antacid, and antidote for snakebite; for beri-beri, plant decoction for washing. Whole plant slightly heated and tied on the forehead helping in recovery from unconsciousness and severe headache. Magic, ritual, ceremonial, used in worship.)

in English: coral fern, devil's powder, nodding club moss

in Peru: shapunba

in China: chien nien sung, pu di wu gong
 in India: bonmala, nagbelli, pile, tapang
 in Japan: mizu-sugi (= water *Cryptomeria*)
 Malay name: rumput kenarus
 in Okinawa: aginochôra
 in Madagascar: anatrandraka
 in Yoruba: lewu

Palisota Reichb. ex Endl. Commelinaceae

For the French botanist Ambroise Marie François Joseph Palisot de Beauvois (Palliat de Beauvois), 1752–1820, traveller, explorer; see *Systema Naturae*, ed. 12 2: 229, 246. 1767, *Conspectus Regni Vegetabilis* 59. 1828, *Enum. Pl.* [Endlicher] 125. 1836, William Darlington (1782–1863), *Reliquiae Baldwinianae*. 160. Philadelphia 1843, Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 653. Ansbach 1852, *Monographiae Phanerogamarum* 3: 131. 1881 and E.D. Merrill, in *Proc. Amer. Phil. Soc.* 76: 899–920. 1936, John H. Barnhart, *Biographical Notes upon Botanists*. 3: 43. 1965, H. Heine, in *Adansonia*. sér. 2, 7: 115–140. 1967, F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 63. 1971, *Bot. J. Linn. Soc.* 81: 301–325. 1980, Stafleu and Cowan, *Taxonomic Literature*. 4: 15–19. 1983, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 761. 1993.

Palisota alopecurus Pellegr.

Cameroon. Shrub, herb, stout, mucilaginous juice present in stems, leaves sheathing stem at base, white flowers, fruits orange-red or white with purple dots

See *Bull. Mus. Natl. Hist. Nat.* 1930, Sér. II. ii. 572. 1930

(Arrow poison, latex of *Parquetina nigrescens* of *Rauvolfia vomitoria*, and leaves juice of *Palisota alopecurus*.)

in Central African Republic: doto

Palisota ambigua (P. Beauv.) C.B. Clarke (*Aneilema ambiguum* (P. Beauv.) Loudon; *Commelina ambigua* P. Beauv.; *Palisota ambigua* C.B. Clarke)

Tropical Africa. Herb, liana, branched, shrub, climbing, robust, tufted, semi-succulent, greenish-white water sap when cut, white-purple flowers, large smooth bluish-red fruits

See *Species Plantarum* 1: 40–42. 1753, *Loudon's Hortus Britannicus*. A catalogue ... 15. 1830, *Genera Plantarum* 125. 1836, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 131. 1881 and *Phytotherapy Research* 8(7): 426–429. 1994

(Neuropharmacological effects of an ethanol extract of the leaves, hyperthermia, sleep, convulsions.)

in Central African Republic: doto

in Gabon: alí-lòlò, aliloró

in Zaire: ituulu

Palisota barteri Hook. (*Palisota barteri* Hook. f.)

Tropical Africa. Shrub, erect, acaulescent, large pubescent leaves, rosette herb, flowers white

See *Bot. Mag.* 88: t. 5318. 1862

(Carotenoids.)

Palisota hirsuta K. Schum. (*Dianella triandra* Afzel.; *Dracaena hirsuta* Thunb.; *Duchekia hirsuta* (Thunb.) Kosteletzky; *Duchekia hirsuta* Kostel.; *Palisota hirsuta* K. Schum. ex C.B. Clarke; *Palisota hirsuta* (Thunb.) K. Schum.; *Palisota maclaudii* Cornu; *Palisota preussiana* K. Schum. ex C.B. Clarke; *Palisota preussiana* Sousa; *Palisota prionostachys* C.B. Clarke; *Palisota thyrsoflora* Benth.)

Tropical Africa. Herb, robust, hemi-cryptophyte, rosette, white flowers, infructescence purple

See *Allgemeine Medizinisch-Pharmazeutische Flora* 1: 213–214. 1831, *Niger Fl.* [W.J. Hooker]. 544. 1849, *Monographiae Phanerogamarum* [A. DC. & C. DC.] 3: 134. 1881, *Bull. Soc. Bot. France* 43: 30. 1896, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 347. 1897 and *Flora of Tropical Africa* [Oliver et al.] 8(1): 30, 32. 1901, Dokosi, O.B., *Herbs of Ghana*. Ghana Universities Press, Accra, Ghana, 1998, *J. Pharm. Pharmacol.* 2: 191–199. 2008, *International Journal of Pharmacology* 5(2): 101–113. 2009, *International Journal of Pharmacology* 5(3): 181–190. 2009

(Used in Ayurveda. Stem and leaves analgesic, anti-nociceptive, anti-inflammatory, anti-arthritic, antipyretic, antiviral, for cough, earache, sore throat, toothache, malaria, kidney pains, for various painful inflammatory conditions. Roots juice used for treatment of gonorrhoea. Leaves extracts used to stop wound bleeding; a leaf infusion or poultice drunk or applied for piles, gunshot wounds and swelling. Whole plant for stomach pains.)

in Ghana: mpentemi, sombenyin, somenini, sumbe

Paliurus Mill. Rhamnaceae

From *paliouros*, the ancient Greek name for *Paliurus spinachristi* Mill., Christ's thorn, or the great jujube, *Ziziphus spina-christi*, Latin *paliurus* for a plant, Christ's-thorn (Plinius), *paliuraeus* 'covered with Christ's-thorn' (Plinius); see *The Gardeners Dictionary ... Abridged ... fourth edition* vol. 3. 1754, *The Gardeners Dictionary: ... eighth edition* *Paliurus* no. 1. 1768, *De Fructibus et Seminibus Plantarum...* 1: 379. 1788, *Flora Cochinchinensis* 259, 283. 1790 and Pietro Bubani, *Flora Virgiliana*. 87–88. [Ristampa dell'edizione di Bologna 1870] Bologna 1978.

Paliurus ramosissimus (Loureiro) Poir. (*Aubletia ramosissima* Loureiro; *Paliurus aubletia* Roemer & Schultes; *Paliurus aubletii* Benth.; *Paliurus ramosissimus* Poir.;

Ziziphus ramosissimus Sprengel; *Ziziphus ramosissima* (Lour.) Spreng.

China. Shrub, thorny branches

See *Fl. Cochinch.* 1: 283. 1790, *Encyclopédie Méthodique. Botanique ...* (Lamarck) Supplément 4(1): 262–263. 1816, *Systema Vegetabilium*, ed. 15 bis [Roemer & Schultes] 5: 343. 1819, *Systema Vegetabilium*, editio decima sexta 1: 771. 1825[1824]

(Triterpenes from fruits. Leaves applied as a poultice to ulcers and abscesses. Root in the treatment of sore throats, swellings. Fruit cooling and diuretic.)

in English: thorny wingnut

in Japan: hama-natsu-me

in China: ma jia zi, ma jia zi ye, pai chi

Paliurus spina-christi Mill. (*Paliurus aculeatus* Lam.; *Paliurus australis* Gaertn.; *Paliurus virgatus* D. Don; *Rhamnus paliurus* L.)

China. Perennial thorny shrub, fruit eaten

See *Species Plantarum* 1: 194. 1753, *The Gardeners Dictionary*: ... eighth edition *Paliurus* no. 1. 1768, Lamarck, Jean Baptiste Antoine Pierre Monnet, Chevalier de (1744–1829), *Tableau encyclopédique et méthodique des trois règnes de la nature. Botanique*. Paris, 1791–1823, *Bot. Mag.* 52: t. 2535. 1824 and *Taxon* 28: 635–636. 1979, *Acta Pharm. Jugosl.* 40: 551–554. 1990, *Fitoterapia* 64: 284–285. 1993, *Journal of Ethnopharmacol.* 52: 119–122. 1996, *Journal of Ethnopharmacol.* 66: 175–179. 1999, *Iranian Journal of Pharmaceutical Research* 3: 51–54. 2004

(Fruits hypocholesterolemic, antimicrobial, hypolipidemic, astringent, diuretic, tonic and anti-hypertensive.)

in English: Christ's thorn, Jerusalem thorn

in China: bin zao

Palmeria F. Muell. Monimiaceae

After the English-born Australian politician Sir John Frederick Palmer, 1804–1871, physician, medical practitioner, pastoralist, in 1846 Major of Melbourne; see Ferdinand von Mueller, *Fragmenta Phytographiae Australiae*. 4: 151. Melbourne 1864.

Palmeria arfakiana Becc.

Papua New Guinea.

See *Malesia Raccolta ...* 186. 1877

(Leaves and stem contain alkaloids.)

Palmeria gracilis Perkins

Papua New Guinea. Liana, woody climber, stiff coriaceous leaves

(Bark contains alkaloids.)

Palmeria hooglandii Philipson

Papua New Guinea. Woody liana, leaves opposite, paniculate inflorescence axillary and terminal, scented creamy flowers, beaked globose fruit, in primary and secondary rainforest

See *Blumea* 28(1): 88. 1982

(Leaves chewed and dripped into the nose to treat influenza and cough.)

in Papua New Guinea: kivika

Panax L. Araliaceae

Latin *panacea*, *ae*, *panaces*, *is* and also *panax*, *acis* for an herb to which was ascribed the power of healing all diseases, all-heal, *panacea*, *catholicon* (Plinius), Greek *panakes*, *panakeia*, *panax* 'all healing, a panacea', *pan* 'all' and *akos* 'a remedy'; see Carl Linnaeus, *Species Plantarum*. 2: 1058–1059. 1753, *Genera Plantarum*. Ed. 5. 481. 1754, *The British Herbal* 420. 1756, *Characteres Generum Plantarum* [second edition] 63, pl. 32. 1775, *Supplementum Plantarum* 441. 1782, *A Flora of North America*: containing ... 1: 648. 1840, *Revue Horticole* 4(3): 105. 1854, *Annales d'Horticulture et de Botanique, ou Flore des Jardins du Royaume des Pays-Bas* 4: 89. 1861, *Annales Museum Botanicum Lugduno-Batavi* 1: 3–4, 10, 16. 1863.

Panax ginseng C.A. Meyer (*Aralia ginseng* (C.A. Mey.) Baill.; *Aralia ginseng* Baill.; *Aralia quinquefolia* (L.) Decne. & Planch.; *Aralia quinquefolia* var. *ginseng* (C.A. Mey.) auct.; *Aralia quinquefolia* var. *ginseng* (C.A. Mey.) Anonymous; *Panax chin-seng* Nees; *Panax quinquefolia* Linnaeus var. *ginseng* (C.A. Meyer) Regel & Maack; *Panax quinquefolium* var. *coreensis* Siebold; *Panax quinquefolium* var. *ginseng* (C.A. Mey.) Regel & Maack ex Regel; *Panax quinquefolius* var. *ginseng* (C.A. Mey.) Regel & Maack; *Panax schin-seng* Nees, nom. illeg. superfl.; *Panax schin-seng* var. *coraiensis* T. Nees; *Panax schinseng* Nees; *Panax verus* Oken)

Russia, Korea, China. Perennial herb

See *Species Plantarum* 1: 273–274. 1753, *Species Plantarum* 2: 1058–1059. 1753, *Verhandelingen van het bataviaasch genootschap van kunsten en wetenschappen* 12: 45. 1830, *Allg. Naturgesch.* 3(1): 3. 1841, *Rep. Pharm. Prakt. Chem. Russ.* 7: 524. 1842, *Bulletin de la Classe Physico-Mathématique de l'Académie Impériale des Sciences de Saint-Petersbourg* 1: 350. 1843, *Revue Horticole* 3: 105. 1854, *Gartenflora* 11: 314. 1862, *The American Botanist and Florist* 142. 1871, *Histoire des Plantes* 7: 197. 1879, *Official Guide Mus. Econ. Bot. Kew*, ed. 2, 1: 87. 1886 and *American Journal of Botany* 62: 833–837. 1975, *Rhodora* 82: 627–636. 1980, *Scientia Agricultura Sinica* (5): 31–35. 1985, *Phytologia* 71: 473. 1991, *Korean Journal of Botany* 36: 75–81. 1993, *J. Jilin Agric. Univ.* 16(3): 43–46. 1994

(Stimulant, tonic, used for amnesia, general weakness, all kinds of chronic disease, collapse.)

in English: ginseng, Korean ginseng

in China: jen shen, ren shen, shen tsao

in Vietnam: tam that, tho sam

Panax japonicus (T. Nees) C.A. Meyer var. ***angustifolius*** (Burkill) C.C. Cheng & Chu (*Aralia pseudoginseng* var. *angustifolia* (Burkill) Craib; *Aralia quinquefolia* (L.) (Root aphrodisiac, stimulant, expectorant, analgesic, anti-convulsive, febrifuge, in indigestion and vomiting, headache, convulsions and palsy.)

in English: American ginseng

in China: xi yang shen

in India: laksmana

Panax stipuleanatus C. T. Tsai & K. M. Feng (*Panax pseudoginseng* var. *bipinnatifidus* (Seem.) H.L. Li)

China.

See *Transactions of the Medical and Physical Society of Calcutta* 4: 117. 1829, *Journal of Botany, British and Foreign* 6(62): 54. 1868 and *Sargentia*; continuation of the contributions from the Arnold Arboretum of Harvard University 2: 118. 1942, *Acta Phytotax. Sin.* 13(2): 44. 1975

(Root aphrodisiac, stimulant, expectorant, vomiting.)

in China: bing bian san qi

Panax trifolius L. (*Aralia trifolia* (L.) Decne. & Planch.; *Aralia trifolia* Banks & Sol. ex C. Muell.; *Ginseng trifolium* (L.) Alph. Wood; *Panax trifolium* L.)

North America. Perennial herb

See *Species Plantarum* 2: 1059. 1753, *Revue Horticole* 3: 105. 1854, *Annales Botanique Systematicae* 5: 85. 1858, *The American Botanist and Florist* 142. 1872 and *Rhodora* 82: 627–636. 1980

(Plant analgesic, coagulant, antirheumatic, chewed for headache, used for venereal diseases, tuberculosis, chest pain.)

in English: dwarf ginseng, groundnut

Panax zingiberensis C.Y. Wu & K.M. Feng

China.

See *Species Plantarum* 2: 1058–1059. 1753 and *Acta Phytotaxonomica Sinica* 13(2): 42, pl. 6, f. 5–6. 1975

(Root aphrodisiac, stimulant, expectorant, emetic.)

in China: jiang zhuang san qi

Panacium Dill. ex L. Amaryllidaceae (Liliaceae)

An old Greek name for a bulbous plant, *pankration*, from *pan* ‘all’ and *kratus* ‘strong, mighty’, *kratos* ‘strength, might, power’, referring to its supposed medicinal properties, Latin *pancratium*, *pankration* used by Plinius for the herb succory or for a plant, called also *scilla pusilla*; see Carl Linnaeus, *Species Plantarum*. 1: 290. 1753, *Genera*

Plantarum. Ed. 5. 141. 1754 and *Fieldiana, Bot.* 24(3): 103–145. 1952. Although some species are used in folk medicine, several are cardiac poisons.

Pancratium biflorum Roxburgh

India, Sri Lanka, Hong Kong.

See *Species Plantarum* 1: 290. 1753, *Hort. Beng.* 23. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 125. 1832 and *Fl. Bermuda* 77. 1918

(For skin diseases, rheumatism.)

in China: quan neng hua, quan neng hua shu

Pancratium maritimum L.

Europe.

See *Species Plantarum* 1: 290–291. 1753 and Sandberg F., Michel K.H. “Alkaloids of *Pancratium maritimum* L. (Amaryllidaceae). II.” *Acta Pharm. Suec.* 5(2): 61–66. 1968, *Giornale Botanico Italiano* 114: 100. 1980, *Anales del Jardín Botánico de Madrid* 36: 373–389. 1980, *United Arab Rep. J. Bot.* 23: 127–129. 1980, *Lagascalia* 14: 297–301. 1986, *Regnum Veg.* 127: 73. 1993, *Flora Mediterranea* 5: 265–278. 1995, Pettit, G.R. et al. “Antineoplastic agents, 301. An investigation of the Amaryllidaceae genus *Hymenocallis*.” *J. Nat. Prod.* 58(5): 756–759. 1995, *J. Pharm. Pharmacol.* 49(8): 828–830. 1997 [Antinociceptive effect of some amaryllidaceae plants in mice: *Pancratium maritimum* L., *Narcissus tazetta* subspecies *tazetta* and *Leucojum aestivum* L.], *J. Egyptian Soc. Parasitol.* 28(1): 197–205. 1998, *Planta Med.* 64(7): 669–670. 1998 [Alkaloids of the flowers of *Pancratium maritimum*.], Sener B., Orhan I., Satayavivad J. “Antimalarial activity screening of some alkaloids and the plant extracts from Amaryllidaceae.” *Phytother. Res.* 17(10): 1220–1223. 2003, *Z. Naturforsch. [C]*. 59(1–2): 65–69. 2004

(Alkaloids from the flowers. Antinociceptive, antimalarial, insecticidal, acaricidal and pesticidal.)

in English: sea daffodil

in Egypt: soosan

Pancratium trianthum Herb. (*Pancratium saharae* Coss. ex Batt. & Trab.; *Pancratium saharae* var. *chatinianum* Batt.; *Pancratium trianthum* sensu Bak., non Herb.; *Pancratium trianthum* var. *chatinianum* (Batt.) Maire & Weiller; *Pancratium trianthum* var. *saharae* (Coss. ex Batt. & Trab.) Maire)

Sahara, Trop. Africa. Bulbous perennial

See *Annals of Natural History* 4(21): 28. 1839 [1840 publ. Sep 1839], *Bull. Soc. Bot. France* 39: 338. 1892, *Fl. Algérie, Monocot.*: 46. 1895 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 28: 381. 1937, *Fl. Afr. Nord* 6: 41. 1959

(Psychoactive, rubbing the bulb over incisions or wounds on the head is said to induce hallucinations.)

in Botswana: kwashi

Pancratium triflorum Roxb. (*Pancratium verecundum* Hook.f.)

India. Herb

See *Hortus Kew.* (W. Aiton) 1: 412. 1789, *Hort. Bengal.* 23. 1814, *Flora Indica*; or, descriptions of Indian Plants 2: 126. 1832

(Bulb applied over the foot corn. Magico-religious beliefs, flowers used in worship.)

in India: catulli-pola, kandad, kattu ulli

Pancratium verecundum Sol.

Himalaya, India.

See *Hortus Kewensis; or, a catalogue ...* (W. Aiton) 1: 412. 1789

(Bulb for leucorrhoea and anemia.)

in India: kobaron, korarona

Pancratium zeylanicum L.

Sri Lanka.

See *Species Plantarum* 1: 290. 1753 and *Bot. Commelins* 40. 1983, *New Botanist* 17: 175–181. 1990

(The roots of this and possibly other species are irritant.)

Panda Pierre Pandaceae

A vernacular name in Douala (Nigeria) and in Cameroon; see *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1255. 1896 and *Syllabus der Pflanzenfamilien* (ed. 7) 223. 1912–1913, J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985, Y. Tailfer, *La Forêt dense d'Afrique Centrale*. CTA, Ede/Wageningen 1989.

Panda oleosa Pierre (*Porphyranthus zenkeri* Engl.)

Tropical Africa. Tree, red-purple inflorescence, people eat seeds raw and roasted, gorillas, chimps, pigs, elephants and duikers eat fruits

See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1255. 1896, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 26: 367. 1899

(Fruits astringent, antiseptic, in skin diseases; seed fat applied to ulcers.)

in Cameroon: abfan, afam, afan, afane, afann, bokol, canna, mbanda, mfanda, mwanda, nkana, ovanda, panda, pate, pendo

in Central African Republic: mocana, mokana

in Congo: n'kokoti, okana, okokoti, pad

in Gabon: afam, afame, afan, afane, afann, bepanda, elongongo, ewawa, m'panda, mubaka, muguba, muvaga, muvamba, nkuba, ouando, ovaga, ovanda, upando, uvando

in Ghana: apurokuma, krakun, tana

in Ivory Coast: aoukoua, aukua, gere

in Nigeria: afam, iku, ipade, iyoku, mpanda, obirijia, ojifo ewum, otieme, otiemme, panda, uku

Pandanus S. Parkinson Pandanaceae

From a Malayan name, *pandan* or *pandang*, meaning conspicuous; see Sydney C. Parkinson, *circa* 1745–1771, *A journal of a voyage to the South Seas, in His Majesty's Ship, the Endeavour*. London 1773, *Suppl. Pl.* 64. 1782 [1781 publ. Apr 1782], Gaudichaud, Charles (1789–1854), *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique ...* Paris, 1844–1846 [1851, 1866], G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 655. Ansbach 1852, *Verh. Kon. Akad. Wetensch., Afd. Natuurk.* 2: 203. 1854, *Journal of Botany*, being a second series of the Botanical Miscellany 5: 101, 105. 1867 and *Das Pflanzenreich* III, 54, 62, 73. 1900, *Atti della Società Toscana di Scienze Naturali, Processi Verbali e Memorie*, Serie A 42: 57. 1933, *Mémoires de l'Institut Scientifique de Madagascar, Série B, Biologie Végétale* 3(1): 20, 112, 155. 1951, *Taxon* 12: 201–204. 1963, *Bulletin du Museum National d'Histoire Naturelle: Section B: Botanique* 3(1): 50. 1981, *Botanica Helvetica* 101(1): 35. 1991, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 415. 1993. *Pandanus* sp., aerial roots used for colds and headaches, leaves for anemia.

***Pandanus affinis* Kurz (*Pandanus aurantiacus* Ridl.)**

Vietnam, Malaysia.

See *J. Bot.* 5: 101. 1867 and *J. Straits Branch Roy. Asiat. Soc.* 41: 49. 1914

(Boil the crown and give to drink immediately after childbirth, as a postpartum remedy.)

Malay names: hakek preh, mengkuang prah

***Pandanus amaryllifolius* Roxb. (*Pandanus hasskarlii* Merr.; *Pandanus latifolius* Hasskarl, nom. illeg.; *Pandanus latifolius* var. *minor* Hassk.; *Pandanus odoratus* Ridley)**

Indochina to Malesia. *Pandanus amaryllifolius* has two distinct growth forms, small growth form and large growth form, aromatic fragrant scented leaves

See *Journal of a voyage to the South Seas* 46. 1773, *Flora Indica*; or, descriptions of Indian Plants 3: 743. 1832, *Journ. Roy. Asiat. Soc. Bengal* 38: 148. 1869 and *Fl. Malay Penins.* 5: 81. 1925, *Notul. Syst.* 6: 177. 1938, *Journ. Arnold Arb.* 43: 348. 1962, *Flora of Java* 3: 205. 1968, *Fl. Hainan* 4: 535. 1977, *Economic Botany* 32(3): 285–293. 1978, *J. Bombay*

Nat. Hist. Soc. 78: 196–198. 1981, *Proceedings of the Indian Science Congress Association* 77(3, vi): 149. 1990

(Tonic, essential oils. Alkaloids. Leaves and coconut oil employed as an embrocation for rheumatic pains. Leaves infusions used internally and externally as a sedative. In Thailand it is a traditional medicine to treat diabetes. Ceremonial uses.)

in English: fragrant pandan, fragrant screwpine

in Cambodia: taëy

in China: xiang lu dou

in India: ambemohor-pat, ambemohor patta

in Indonesia: daun pandan, pandan rampe, pandan rampeh, pandan wangi, pondak

in Laos: të:y ho:m, të:y ba:nz

in Malaysia: pandan wangi

in Papua New Guinea: karuka

in Philippines: pandan, pandan mabango

in Thailand: bai toey, panae-wo-ning, toei-hom

in Vietnam: d[uws]a th[ow]m

***Pandanus foetidus* Roxb.**

India.

See *Flora Indica*; or, descriptions of Indian Plants 3: 742. 1832

(Leaves and bracts stimulant, antiseptic, in leprosy, smallpox, syphilis, scabies, headache, rheumatism.)

in India: keor-kanta, keya, keya-kanta, kiyakonta, lam ketukee

***Pandanus furcatus* Roxb. (*Barrotia diodon* Gaudich.; *Pandanus crassipes* Wall. ex Balf.f.; *Pandanus diodon* (Gaudich.) Martelli; *Pandanus furcatus* var. *indica* Kurz; *Pandanus horridus* Reinw. ex Blume, nom. nud.; *Pandanus nepalensis* H. St. John; *Pandanus spinifructus* Dennst.; *Pandanus urophyllus* Hance; *Rykia furcata* (Roxb.) de Vriese)**

Nepal, Indochina. Shrub, strap-shaped leaves with spiny margins

See *Flora Indica*; or, descriptions of Indian Plants ed. 1832, 3: 744. 1832, *Hooker's J. Bot. Kew Gard. Misc.* 6: 268. 1854, *Gardener's Chronicle & Agricultural Gazette* 349. 1868 and *Bot. Mag. (Tokyo)* 85: 254. 1972, *Economic Botany* 40(4): 442–450. 1986

(Used in Ayurveda. Stem antidote to snake poison. Part of fruit mixed with pitch from *Pinus merkusii* boiled and the liquid drunk for urinary problems, also mixed with *Iris* for the same problems.)

in India: bongi, ceriyakaita, kaida-tsjeria, kaidatsjerria, kaita, ketaki, lam ketukee

Pandanus kaida Kurz (*Pandanus candelabrum* Kurz; *Pandanus candelabrum* (Gaudich.) Kurz, nom. illeg.; *Pandanus candelabrum* P. Beauv.; *Pandanus candelabrum* Hook.; *Pandanus forceps* Martelli; *Pandanus siamensis* F.N. Williams; *Pandanus unipapillatus* Dennst.; *Tuckeya candelabrum* Gaudich.)

India.

See *Schlüssel Hortus Malab.*: 27. 1818, *Voy. Bonite, Bot.* 3: t. 26. 1841, *Bot. Mag.* 83: t. 5014. 1857, *J. Bot.* 5: 127. 1867, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 38(2): 148. 1869 and *Bull. Herb. Boissier*, II, 4: 220. 1904, *Webbia* 1: 363. 1905

(Used in Ayurveda.)

in China: le gu zi

in India: kaida, ketaki

Pandanus kamiae B.C. Stone

Pen. Malaysia.

See *Fed. Mus. J.* 15: 201. 1972 [1970 publ. 1972]

(Leaves used to prevent injuries.)

Malay name: pandan

Pandanus klossii Ridl.

Malaysia.

(As a postpartum remedy, boil the crown and give to drink immediately after childbirth.)

Malay names: hakek jehun, mengkuang

Pandanus leram Jones ex Voigt (*Pandanus andamanensis* Hort. ex Balf.f.; *Pandanus andamanensium* Kurz; *Pandanus leram* Kurz, nom. illeg.; *Pandanus leram* Jones ex Voigt var. *andamanensium* (Kurz) B.C. Stone)

India.

See *Hortus Suburbanus Calcuttensis* 683. 1845, *J. Bot.* 5: 185. 1867, *J. Asiat. Soc. Bengal*, Pt. 2, *Nat. Hist.* 38: 148. 1869, *J. Linn. Soc.*, *Bot.* 17: 41. 1878 [1880 publ. 1878] and *Ceylon J. Sci.*, *Biol. Sci.*, 11(2): 118. 1975

(Roots paste applied on urogenital organs for venereal diseases.)

Pandanus luzonensis Merr. (*Pandanus calicarpus* Martelli)

Philippines. Slender tree, few short prop roots, leaves narrowly acuminate apex and spinescently serrated margins, syncarpium fruit solitary, drupes yellowish-red

See *Publ. Bur. Sci. Gov. Lab.* 17: 6. 1904

(Roots are stomachic; decoction of tips of fresh or dried prop roots used as diuretic; pounded prop roots, mixed with leaves of *Mentha arvensis* in water, used as stomachic.)

in Philippines: pandan-luzon

Pandanus odorifer (Forssk.) Kuntze (*Athrodactylis spinosa* J.R. Forst. & G. Forst., nom. superfl.; *Bromelia sylvestris* Burm.f.; *Eydouxia delessertii* Gaudich.; *Hasskarlia leucacantha* Walp.; *Jeanneretia littoralis* Gaudich.; *Keura odora* Thunb.; *Keura odorifera* Forssk.; *Marquartia leucacantha* Hassk.; *Pandanus adduensis* H. Philippines to Pacific. Tree or shrubs, branched, crowded prop roots, open crown, trunk covered with short thick scattered thorns, small flowers usually crowded, orange-red fruits

See *Journal of a voyage to the South Seas* 46. 1773, *Der Naturforscher* 4: 250. 1774, *Supplementum Plantarum* 424. 1781, *Fragmenta Botanica* 21. 1801, *Journal of the Linnean Society, Botany* 17: 63, 56. 1878 and *Fieldiana, Botany* 24(1):

67–68. 1958, *Ceiba* 19(1): 1–118. 1975, *Proceedings of the Indian Science Congress Association* 71(3-vi): 93. 1984, *Proceedings of the Indian Science Congress Association* 77(3, vi): 149. 1990, *Monographs in Systematic Botany from the Missouri Botanical Garden* 85(3): 1911. 2001

(Used in Ayurveda, Unani and Sidha. The fruits cause irritation in mouth when eaten. Prop roots possess diuretic properties; chewing the roots strengthens the gums. New roots scraped and boiled and the liquid used to treat gonorrhea; young roots juice applied on bite, wound caused by fish. Bark juice given to sedate mental patients. Stem bark and leaves for dysentery, gastrointestinal disorders. Juice of the leaves for skin diseases, leprosy. Headache, arthritis, stomach spasms, decoction of leaves; pulverized dried leaves used to facilitate wound healing. Sweetly fragrant flowers as moth repellent in clothing and insect repellent in dwellings. Veterinary medicine, root extract given to increase potency.)

in English: breadfruit, coastal bread fruit, coastal screw pine, fragrant screw pine, pandanus-palm, thatch screw-pine

in Hawaii: hala, pu hala

in China: lou dou shu

in India: bali, bondayi, chamarapushpa, dalapushpa, dhuli puspika, dhulipushpika, dirghapatra, gagandhul, gajangi, gandhapushpa, gedaji, gedangimogali, gojjangi, halina, indukalka, jambuka, jambula, kadam, kadhi, kaide, kaikata, kaitha, kantadala, kazi, kea, kedagai, kedage, kedagi, kedige, keora, ketaka, ketakaishta, ketakee, ketaki, ketgi, keuda, keur, keura, kevda, kevda kaadi, kewda, keya, kiyarige, krakacacchada, krakachachhada, mane, medhya, mogali, mogili, mugali, mundige, nripapriya, oro, panshula, rajahpuspa, sthiragandha, suchikapushpa, suvarnaketaki, tala, talamchedi, tale, talhai, talum, thazha, thazhai, tikshnapushpa, trnasunya, viphalā

in Papua New Guinea: foram, galeng, halewa bonebonei, marita, marite, masap, vap-masap

in Thailand: lam-chiak

Pandanus unipapillatus Dennst.

India.

See *Schlüssel Hortus indicus malabaricus*, ... 27. 1818

(Used in Ayurveda.)

in India: ketaki, perin-kaida-taddi

Pandanus urophyllus Hance (*Pandanus furcatellus* Martelli; *Pandanus furcatus* sensu auct. mult. chin. & Warburg (1910), non Roxburgh ex Roxburgh)

S. China to Indochina. Trees, simple or branched at apex, aerial roots present, female inflorescence pendulous, male inflorescences consisting of several golden yellow spikes, fruit solitary or in racemes

See *Hort. Bengal.* 71. 1814, *Flora Indica*; or, descriptions of Indian Plants 3: 744. 1832, *Journ. Bot.* 13: 68. 1875

(Roots diuretic, astringent.)

in English: Ceylon screwpine, furcate screwpine

in China: fen cha lou dou, fen cha lu dou shu

in Malay: pandan artoenoe

in Thailand: chang li, kiang luang, kiang pa

Pandiaka Benth. & Hook.f. Amaranthaceae

See *Prodromus Systematis Naturalis Regni Vegetabilis* 13(2): 310. 1849, *Gen. Pl.* [Bentham & Hooker f.] 3(1): 35. 1880 and Suessenguth, Karl, "Neue Amaranthaceen aus Rhodesia und Angola mit einer Übersicht der Gattung *Pandiaka* Hook.f.", in *Bot. Tropical Africa. Erect

See *Prodromus Systematis Naturalis Regni Vegetabilis* (DC.) 13(2): 310. 1849, *Gen. Pl.* [Bentham & Hooker f.] 3(1): 36. 1880, *Index Kewensis* 2: 409. 1894 and *Catalogue of the African Plants collected by Dr. F. Welwitsch in 1853–61* (Hiern) Pt. 4, 894. 1900, *Journal of the Washington Academy of Sciences* 5: 76. 1915

(Leaves as a postpartum remedy.)

Pandiaka metallorum P.A. Duvign. & Van Bockstal

South Africa.

See *Genera Plantarum* 3: 35. 1880

(This species is known to hyperaccumulate copper and cobalt when growing in soils rich in these elements.)

Pandorea Spach Bignoniaceae

Named for Pandora (Greek *pan* 'all' and *doron* 'gift'), according to Greek mythology, the first woman sent to earth, the first mortal woman. See Hesiod, *Opera & Dies & Theogonia & Clypeus* [and other works]. Florentiae 1540, *Genera Plantarum* 137, 711. 1839, Édouard Spach (1801–1879), *Histoire naturelle des Végétaux*. Phanérogames. 9: 136. Paris 1840 and *Bulletin du Jardin Botanique de Buitenzorg* 3(10): 204. 1928, *Fl. Neotrop.* 25(2): 1–370. 1992.

Pandorea pandorana (Andrews) Steenis (*Bignonia pandorana* Andrews; *Campsis pandorana* (Andrews) Steenis;

Pandorea australis Spach; *Pandorea australis* var. *oxleyi* (DC.) Domin; *Pandorea doratoxylon* (J.M. Black) J.M. Black; *Pandorea pandorana* Steenis; *Tecoma doratoxylon* J. Black; *Tecoma oxleyi* Cunn. ex A. DC.; *Tecoma oxleyi* DC.; *Tecoma pandorana* (Andrews) Skeels; *Tecoma pandorana* Skeels)

Papua New Guinea, Australia. Woody climber

See *Botanist's Repository*, for new, and rare plants 2: t. 86. 1800, *Nomencl. Bot.* [Steudel], ed. 2. 2: 664. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 225. 1845 and *Transactions and Proceedings of the Royal Society of South Australia* 51: 383. 1927, *Bulletin du Jardin Botanique de Buitenzorg*, sér. 3, 10: 198. 1928, *Bibliotheca Botanica* 89: 599. 1929, *Trans. & Proc. Roy. Soc. S. Austral.* 1937, Ixi. 248. 1937

(Crushed leaves applied as a poultice to reduce itch, inflammation, pain, swelling of the foot.)

in English: maggot vine, spearwood, spearwood bush

in Indonesia: aka letien

in Australia: wonga vine, wonga-wonga vine (Eastern Australia); ooratan (Everard Range); urtjunpa (Pitjantjatjara)

Pangium Reinw. Flacourtiaceae (Bixineae)

From a Malay vernacular name, *pangi*, see *Sylloge plantarum novarum* itemque minus cognitarum a praestantissimis botanicis adhuc viventibus collecta et a Societate regia botanica Ratisbonensi edita. Ratisbonae: Typis viduae C.E. Brenck, 1824–1828, *Hort. Suburb. Calcutt.* 85. 1845, *Nat. Pflanzenfam.* [Engler & Prantl] iii. 6a (1893) 23. 1893 and *Bijdr. Combret. Flacourt. Ned.-Ind.* 80. 1919.

Pangium edule Reinw.

Java. Tree, greenish flowers, flat seeds, ripe fruit edible

See *Isis* oder encyclopädische Zeitung 315. 1823, *Sylloge Plantarum Novarum* 2: 13–14. 1824–1828 and *Kagoshima University Research Center for the Pacific Islands, Occasional Papers* no. 34: 141–144. 2001

(Poisonous, seeds extremely poisonous, fruit poisonous when eaten raw, edible after soaked in water for a long time. Fruit sliced and the juice applied to sores and cuts; for boils pound the seeds and poultice. Seeds insecticide, antioxidant. Arrow or dart poison. Poisonous leaves, resin and bark used as fish poison.)

in English: football fruit

in India: dello

in Indonesia: kepajang, putjung

in Japan: kupayan, pangino-ki

Malayan names: buah keluak, kapayung, kepayang, payang, payung

in Papua New Guinea: maing, mapak, murok, puga, tobo

in Pacific: lasret, raul

Panicum L. Poaceae (Gramineae)

From a classical Latin name for millet, *panicum*, *i* (*panus*, *i* ‘the thread, a tumor, an ear of millet’, Akkadian *panu* ‘to turn’), Italian panic grass, *Panicum italicum* L., high variability of this genus, sometimes or often referred to *Urochloa* P. Beauv., *Dichantherium* (Hitcch. & Chase) Gould and *Brachiaria* (Trin.) Griseb., nomenclature of several species has been changed and is still changing; see *Species Plantarum* 1: 55, 58. 1753, *Genera Plantarum*. Ed. 5. 29. 1754, *Familles des Plantes* 2: 34. 1763, *Flora Graeca* 1(2): 44, t. 59. 1808, *Prodromus Florae Novae Hollandiae* 190. 1810, *Essai d'une Nouvelle Agrostographie* 49, 168, t. 10, f. 10. 1812, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 104. 1819, *De Graminibus Paniceis* 51, 53, 125, 266, 184. 1826, *Systema Vegetabilium, editio decima sexta* 4(2): 22, 30. 1827, *Révision des Graminées* 1: 219. 1829, *Bulletin Botanique [Genève]* 1: 220. 1830, *Nomenclator Botanicus. in English: Pacific panic grass, panic grass, Western panic grass, Western panicum, Western witch grass

Panicum amarum Elliott (*Chasea amara* (Elliott) Nieuwl.; *Panicum amaroides* Scribn. & Merr.; *Panicum amarulum* Hitchc. & Chase; *Panicum amarum* var. *minor* Vasey & Scribn.)

Belize, Cuba, Bahamas, Mexico, Honduras, USA, Texas, Florida. Perennial, robust, upright, roots at lower nodes, slightly rhizomatous, leafy, bluish green, clump forming, very elongated leaves, upper leaf may extend above spikelets, spikelets ovoid in narrow panicles, seed head slender, many small ellipsoid seeds supported on short branches, grass barrier for wind erosion control, useful for stabilization of disturbed areas, cover for wildlife, economic plant, grows on beach sand on coastal sand dunes and other critical sites, sandhills on the seashore, backside of primary dune, on secondary dunes and sand flats

See *A Sketch of the Botany of South-Carolina and Georgia* 1: 121. 1816, *Department of Agriculture. Botanical Division.
